Monday, 7 May 2018

(10.06 am)

CHAIRMAN: Good morning.

The Independent Review Committee on Hong Kong's Franchised Bus Service was set up by the Chief Executive on 13 March 2018. Its terms of reference, which are displayed for you to see, are these, and it is important that we all understand what the terms of reference are, so I will read them out:

"From the point of view of safety, in the light of the fatal accident on 10 February 2018 and other recent serious incidents involving franchised buses in Hong Kong:

(a) to examine the operation and management of bus franchises under the current legislative, franchise and other contractual requirements;

(b) to examine the present regulatory and monitoring system for franchised buses; and

(c) in relation to the above, to make recommendations to the Chief Executive on safety-related measures with a view to sustaining a safe and reliable franchised bus service in Hong Kong.

The Committee may invite submissions from interested parties and from the public on the above matters and should use its best endeavours to submit its report

within nine months. Issues relating to the causes and liability of persons involved in the fatal accident on 10 February 2018 will be investigated by the Police and fall outside the Committee's terms of reference."

It follows that it is the duty of the committee to obtain information in respect of, first, the operation and management of bus franchises, and secondly, the regulatory and monitoring system of bus franchises. Most importantly, the ultimate objective of the committee is to make recommendations to the Chief Executive on safety-related measures with a view to sustaining a safe and reliable franchised bus service.

The committee intends to be and to remain focused on attaining that objective.

Significantly, it is to be noted that the committee has been directed that issues relating to the causes and liability of persons involved in the fatal accident on 10 February 2018 on the Tai Po Road fall outside the committee's terms of reference. That of course is because the incident is the subject of a separate police investigation.

On 28 March 2018, the committee commenced its work, and on that date issued a public invitation to passengers and family members of the victims of the fatal accident on Tai Po Road and other recent serious

incidents involving franchised bus services, together with members of the public generally, to make written submissions to the committee.

Today, we acknowledge and welcome the presence of some of the surviving passengers and their family members, and the family members of others who have lost their lives in the incident on the Tai Po Road.

On 28 March 2018, the committee issued letters to specified interested parties, requesting or inviting them to make written submissions to the committee on the matters identified in the terms of reference. The committee requested some of those specified interested parties to provide responses, addressing issues and questions set out in annexes to the committee's letters. Amongst the specified interested parties asked to respond in that way were the Transport and Housing Bureau, the Transport Department, the five franchised bus companies, and no fewer than 16 trade unions representing franchised bus drivers, and one bus driver association, the LegCo Panel on Transport, the Community for Road Safety, and others.

Subsequently, the committee wrote to the Commissioner for Police, requesting the Hong Kong Police Force to make a written submission and asking them to address the issues and questions posed in an annex

attached to the letter.

During April 2018, the committee received helpful submissions, written submissions, from the Transport and Housing Bureau, the Transport Department, all five franchised bus companies, and from or on behalf of various trade unions.

On 27 April 2018, the committee requested the Transport and Housing Bureau and the Transport Department to make further written submissions, addressing specifically identified issues and questions.

On 3 May 2018, the committee invited the Transport and Housing Bureau and the Transport Department to provide a representative to give oral evidence before the committee at today's and tomorrow's hearing. Today, we acknowledge the presence of Mr Joseph Lai, Permanent Secretary for the Transport and Housing Bureau, and his colleagues, Mr Kevin Choi and Ms Crystal Yip, who are representatives of the Transport and Housing Bureau, and in due course we would welcome representatives of the Transport Department, who are providing no fewer than six representatives to assist the committee.

The committee is grateful to those bodies for having accepted the committee's invitation to give oral evidence, and is pleased that they are here today to assist the committee in its work.

On 4 May 2018, the committee requested all five franchised bus companies to make further written submissions, addressing specifically identified issues and questions. On the same date, the committee received written submissions from the Transport and Housing Bureau and the Transport Department, and we are awaiting written submissions from the Commissioner of Police.

We acknowledge that the time frame in which those various parties have been asked to respond has been short, and we are grateful that they have obviously worked under time pressure to provide us with the information we have requested.

On 4 and 5 May 2018, the committee uploaded to its website paginated versions of the letters it had sent to interested parties and the written submissions that it had received, and they are available for all to access as they wish.

Finally, before we begin to receive the oral evidence, it is appropriate that we should acknowledge and mark the tragic circumstances that have led to this committee being set up. As a mark of our respect, for the 19 persons who died in the Tai Po Road incident on 10 February 2018, and in commiseration to their family members for their grievous loss, and as a mark of respect for others who have died in recent incidents

involving franchised buses, may I ask that we all stand and observe a short moment of silence.

Thank you.

At the outset, I am going to ask Mr Duncan, senior counsel of the counsel assisting the committee in its work, to open proceedings.

Mr Duncan.

EVIDENCE FROM THE TRANSPORT AND HOUSING BUREAU:

MR JOSEPH LAI, MR KEVIN CHOI AND MS CRYSTAL YIP

MR DUNCAN: Mr Chairman, thank you.

Mr Choi, Mr Lai and Ms Yip, thank you for attending this morning, and thank you for providing your written submissions. Would you care to take your seats, please, at the table.

As the chairman has already noted this morning, the invitation has been issued to the bureau to provide oral submissions today, in addition to the written submissions that you have helpfully provided the commission.

In the absence of your being represented by legal counsel this morning, who would normally lead you through any oral evidence that you wish to give, can I ask whether any of you do wish to take the opportunity of making any oral submissions?

CHAIRMAN: Mr Lai?

MR JOSEPH LAI: Mr Chairman, if I may, I would like to make a short opening statement.

CHAIRMAN: Please do.

Opening statement by MR JOSEPH LAI

MR JOSEPH LAI: Chairman and members of the committee, good morning. Thank you for inviting the Transport and Housing Bureau to attend before the committee and to give us the opportunity to make an opening statement.

Before I deliver the statement, I would like to convey a message from the Secretary for Transport and Housing. It has always been the intention of the secretary to personally attend before the committee. Regrettably, by the time the invitation from the committee arrived, the secretary already had a commitment firmed up some time ago with the Legislative Council. At this very moment, the secretary is attending a meeting of the Bills Committee which is set up to scrutinise the bill to provide for customs, immigration and quarantine co-location arrangements in the West Kowloon Station. The secretary has asked me to send his apologies to the committee for not being able to be here today.

Chairman, there are two characteristics of Hong Kong's public transportation system which stand out in any global comparison. These may form the backdrop

to the issues which are being reviewed by the committee.

The first characteristic is that Hong Kong has a highly developed public transport system to cater for the daily commuting needs of the population. Our basic transport policy can be summarised as "public transportation is the primary means of transportation with railway as the backbone". Chairman, if you allow me, I will just translate that particular policy into Chinese, because it is a very familiar term in the local community.

CHAIRMAN: Please do so.

MR JOSEPH LAI: Thank you, Chairman. That is "(Chinese spoken)".

Of all the daily trips undertaken by commuters every day, over 90 per cent, in other words 12 million or so, are made by way of public transport. This percentage, as far as we are aware, is by far the highest in the world. Within those 12 million trips, about 39 per cent are by heavy rail, 31 per cent by franchised buses, 14 per cent by public light buses, 7 per cent by taxis, 4 per cent by Light Rail, and other modes of public transport account for the remaining 5 per cent.

The other way to look at it is that on a typical day, franchised buses carry some 4 million passenger trips.

The second characteristic is that, unlike almost all other overseas jurisdictions, public transport services in Hong Kong, including franchised buses, are operated by private companies in accordance with prudent commercial principles, generally without government's direct subsidies. This reflects government's overall policy thinking, established over many years, that running public transport through prudent commercial principles would help ensure efficiency and competitiveness.

At the same time, franchised bus operators and other public transport operators are not just any other commercial entities. Many aspects of their operation are subject to government regulation, control and monitoring. These include, for example, fares, service level and frequency, as well as the all-important issue of safety.

In this connection, government has two roles. As policymakers, government formulates standards and requirements and seeks to reflect these in legislation, franchise terms, and other contractual commitments. In the process, government seeks to balance different, sometimes competing, interests. Different stakeholders include, for example, franchised bus operators, the operators of other public transport modes, the

travelling public, other road users, politicians, and so on.

The Legislative Council also plays an important role, in particular where laws need to be introduced or amended or where financial resources are required.

The other role of government is that of regulator, to ensure that the franchised bus operators do comply with the prevailing legislation, franchise terms, and other contractual commitments.

Policies and thus the details and focus of the regulatory regime change over time. Sometimes this can be the result of change in public expectation. At other times this can be due to changing technologies or the changing mode of operation of the franchised bus operators. At still other times, policies can change in response to certain events or incidents.

But throughout the years, an overarching constant emphasis is always this. Franchised bus operators must provide proper and efficient service. This requirement for the provision of proper and efficient service is set out in the Public Bus Services Ordinance enacted in 1975. Safety is always a crucial element when considering whether the service is proper. Indeed, safety is of uppermost priority in our transport policy, and this is publicly documented. For instance, in the

2016 Hong Kong Yearbook, it is stated, and I quote:

"The Government aims to provide a safe, efficient, reliable and environmentally-friendly transportation system ..."

In the controlling officer's report of the Transport Branch of the Transport and Housing Bureau for this year, ie 2018 to 2019, it is stated that one of the aims of the Branch's work in relation to land and water-borne transport is to promote road safety. The website of the Transport and Housing Bureau states that one of the policy objectives of the bureau is to promote safety, and in this context I would say that this refers to the safety of passengers.

Furthermore, the Road Safety Council was established in 1973 to promote road safety in Hong Kong. Various promotion and publicity programmes were launched by the Road Safety Council over the years. For example, the Road Safety Council supports the Transport Department's signature event which is called Safe Driving and Health Campaign for Commercial Vehicle Drivers. This event is held each year on an annual basis, with a view to enhancing the safe driving skills and health awareness of commercial vehicle drivers, including of course franchised bus drivers.

The campaign includes a wide range of activities,

including radio programmes, health checks, and advice provided for commercial vehicle drivers, as well as community promotion by goodwill ambassadors.

Safety-related standards and requirements can broadly be categorised into output-based, input-based and process-based.

To give just a few examples, accident rate in terms of, for example, involvement in accidents per vehicle-kilometre travelled; customer satisfaction as reflected through, for example, the number and nature of complaints received and the outcome of passenger surveys; type approval for any new bus model; annual and spot-checks of buses in service; mandatory bus equipment, such as the installation of black box and speed limiter; licensing requirements for bus captains; and maximum working hours and minimum rest time for bus captains.

As I alluded to a moment ago, standards and requirements evolve over time, as environment and community expectations change. Again, just to quote a few examples, Guidelines on Bus Captain Working Hours, Rest Times, and Meal Breaks was first introduced in 1998, and then they were revised on several occasions, the latest being earlier this year, 2018.

Two or three other examples I would quote would

include the installation of speed limiters and black boxes following a fatal accident in 2003; the installation of an additional horizontal guard bar on the exit doors, following a few accidents in 2016; and the requirement for newly purchased franchised buses must comply with the prevailing statutory emission standards.

With regard to the overall road safety in Hong Kong, the total number of accidents involving franchised buses has remained relatively stable in the past five years or so, which averages at about 2,200 per year, as compared with the total number of traffic accidents in Hong Kong, which averages at about 16,000 per year. The number of accident involvement for franchised buses in fact dropped slightly from 2,292 in the year 2013 to 2,187 in the year 2017, at a time when the number of franchised buses increased by 3.3 per cent. The involvement rate per million vehicle-kilometres of franchised buses also remained stable over the past few years.

Chairman, I should perhaps also mention that franchised buses are run, by definition, on the basis of franchises. These are to be differentiated from services that are provided directly by government and from services that are run purely as ordinary private businesses.

A franchise is awarded to a franchisee on the basis that the franchisee would be able to fulfil all the standards and requirements set out in law, the franchise, and so on. The regulatory authority scrutinises the performance of the franchisee at a broad overall level. There are checks and balances, sort of overall quality control, to ensure that franchisees are able to deliver and do deliver. A quick example is the spot-checks conducted every day on buses in service. At the same time, in terms of day-to-day performance, the primary onus and responsibility is on the franchisee to deliver and to meet its basic obligations.

Generally speaking, a franchisee is expected to have the maturity, the resources and the general capability to provide its services without the regulator having to look over the shoulder of each and every minute detail, day in and day out.

Chairman, the last point I would like to make is this. Whilst every effort has been made continuously by government to improve the safe operation of franchised buses, we are fully conscious that there is always room for further improvement. We constantly look for ways to bring safety to the next higher level, and any comments and suggestions from different stakeholders are always gratefully welcomed.

Chairman, this concludes my statement. My colleagues and I will be happy to answer questions.

CHAIRMAN: Thank you, Mr Lai.

Might I acknowledge on behalf of the committee that we were aware of the Secretary's commitment in LegCo, but given the urgency that we should examine and receive material, we, the committee, decided that we must press ahead, even without his attendance. But we thank him for his apology.

MR JOSEPH LAI: Thank you.

CHAIRMAN: Mr Duncan.

Examination by MR DUNCAN

MR DUNCAN: Thank you, Mr Chairman.

Thank you, again, Mr Lai, for those comments.

There are a number of matters that I wish to explore with the bureau. Before I start with those, can I just recognise a point which has been made in your written submissions, and that is the differentiation of duties and responsibilities between the bureau on the one hand and the Transport Department on the other.

The point that has been made in your submissions is that it's the bureau's task to formulate policies and initiate proposals, whereas the role of the department is to implement those policies, enforce the laws, and provide services generally to the community.

I recognise that distinction.

Accordingly, my questions of you this morning will be aimed, as far as I can, at the role you perform. We will of course have the benefit of personnel from the Transport Department later, and a lot more of the detail will be covered with those persons.

I would like to actually start with the terms of reference themselves, to which the chairman has already referred, and bring to your specific attention item (b) in the terms of reference. You will see, at the risk of repetition, that the committee is charged with the examination of the present regulatory and monitoring system for franchised buses.

So the first matter which I wish to explore with you a little this morning is the extent to which the current regulatory system truly addresses the issue of safety. As I understand it, again, from your written submissions, the basics of our regulatory regime consist firstly of the ordinance, to which Mr Lai has referred to this morning, the Public Buses Ordinance, Cap 230, I believe; secondly, the regulations which are made under that ordinance; and then, thirdly, the franchise document issued to a grantee as provided for in the ordinance.

What I would like to do is take you to the

ordinance. I'm going to run through -- quickly, I hope, because all of these provisions will be well known to you -- identify those which seem to us to be the significant ones with regard to the committee's terms of reference; and then, having regard to those provisions, explore with you a number of matters.

The ordinance, I believe, is being brought up on the screen. If you wish to have access to the hard copy of that, it's in the THB-2 bundle at page 104.

MR JOSEPH LAI: Yes. Thank you.

MR DUNCAN: The first version to which I would bring your attention is section 9 of the ordinance. It gives the power to the Chief Executive to appoint not more than two persons as additional directors of any of the grantees under a franchise.

Moving from section 9, we go to section 12. That is the provision which requires, as Mr Lai has already referred to this morning, the franchisee or the grantee to provide a proper and efficient bus service.

Subsection (2) of section 12 refers to the fact that the grantee shall not be treated as maintaining that sort of service unless it maintains the service and operates it in accordance with the franchise, and any direction or requirement under the franchise or under the ordinance and any programme or any approval under

section 16A.

Now, the reference to the programme is picked up in the following section of the ordinance, section 12A, "Forward planning programme". There is a requirement in subsection (1) for a grantee, in each year, to prepare a programme of the operations of the grantee for the following five years in respect of the matters set out in the schedule.

I will take you to the schedule in just a moment, but if you look down to subsection (4), there is a provision whereby if the franchisee concerned and the Commissioner for Transport are unable to agree as to matters to be included in the programme, then that is a matter which has to be resolved by the secretary.

If we go through to the schedule, at the end of the ordinance, it's page 126 on the marked bundle, the contents of a programme are set out in detail there, items (a) to (h). As far as I can tell, there is nothing specific within the schedule pertaining to the matter of safety. However, item (h) appears to be a catch-all, in that it states "any other matters, whether or not specified in paragraphs (a) to (g) inclusive, as may be required by the Commissioner".

Going back to the substance of the ordinance, the next section which is I think of relevance is that at

section 18, page 112 of the bundle, the requirement for the grantee to keep proper records in respect of particular matters. At item (e), there is reference to accidents.

Then, following on from that, the next provision I wish to refer you to is section 22. This is on page 114, the provision for the Chief Executive-in-Council to require the payment of a financial penalty under certain circumstances. Those circumstances are set out in subsection (2):

"... may be imposed in respect of any failure by a grantee to comply with its franchise or this Ordinance or any direction or requirement under [the franchise or the ordinance], or with any programme ..."

With reference back again to the forward planning programme in section 12A.

Then section 24 on page 115 provides for fairly drastic measures in the case of a grantee having failed to maintain a proper and efficient public bus service, and the steps that are available to the administration to withdraw the franchise if that extreme situation were to develop.

Then section 35, if I could take you to that, please, at page 124 of the bundle:

"The Secretary for Transport and Housing may make

regulations for [a number of matters set out there] ..."

If I could bring your attention to three of those provisions in the context of this Committee's terms of reference, first of all, at item (c):

"regulating the conduct of ... drivers, conductors and authorised persons" employed by the bus companies.

At (d):

"generally as to the conduct of passengers and intending passengers on buses used by a grantee".

And thirdly, at (j) over the page:

"regulating, in relation to the drivers of buses used by a grantee --

(i) the maximum number of hours during which any such driver may be permitted to drive ... a bus; and

(ii) the intervals to be provided by a grantee for the rest and refreshment of such drivers ..."

Then the following section, section 36, provides for a grantee, not the administration but the bus operator itself, to make by-laws for a number of matters, and at item (c) there is reference to, and I quote, "the safe and efficient operation of the grantee's public bus service".

Before I leave that, at subsection (3), there is a provision to enable those by-laws to provide that a contravention shall be an offence and can provide

penalties.

Perhaps it's also worthy of note, in subsection (2), that any by-laws passed by a franchisee are subject to the approval of the Legislative Council.

So they are the provisions to which I wish to refer you to in the ordinance itself.

Then you have the regulations, which commence from page 128. Very quickly, you will notice that there are some regulations already passed with regard to the conduct of the driver and also the conduct of passengers on buses.

At page 130, we have regulation 9, which has some provisions for the conduct of driver; they are continued on page 131, under regulations 11, 12 and 13. I notice in passing that regulation 11 addresses the general conduct not just of the driver but also of the conductor, and to my knowledge bus companies these days do not employ conductors, so perhaps that is a reflection of how ancient perhaps these regulations may be.

Nevertheless, let's move on. At page 132, we have regulation 13A which pertains to the topic of the general conduct of passengers and intending passengers.

With regard to the regulatory landscape, we can see important provisions there in the ordinance and in the

regulations.

I would then like to take you, please, to the franchise document itself. For this purpose, I'm going to refer to the latest franchise which has been issued, which I understand was last year to the Kowloon Motor Bus Company (1933) Ltd. You will find that document in the hard copies at THB-2 at page 137.

Do you have that in front of?

MR JOSEPH LAI: Yes, I do. Thank you.

MR DUNCAN: The first provision perhaps I could bring to your attention would be clause 7, one of the franchise documents which can be found at page 141. A relevant clause appears there:

"The Grantee shall, as far as practicable, acquire, provide, adopt, maintain, or modify to the satisfaction of the Commissioner such safety or service enhancement facilities, installation, fixtures, fittings, apparatus or equipment on its buses as may be reasonably required by the Commissioner after consultation with the Grantee."

So there is a specific reference there at clause 7 with regard to facilities on the buses of the franchisee.

The ordinance, we have seen, refers to directions or requirements which may be required under the franchise

document. That also is reflected in the franchise document itself, in clause 1 at subclause (3) at page 139 of the bundle. We see at the bottom of that page:

"For the avoidance of doubt, unless there is express provision to the contrary, the Grantee shall at no cost to the Government comply with any direction and requirement given under this franchise by the Commissioner, the Financial Secretary or any ... public officer."

The next issue one turns to is what sort of direction or requirement is the commissioner, the Financial Secretary or any other public officer, able to issue, within the terms of the franchise.

If we look through this document, as far as counsel can tell, there is no general power to issue any sort of direction or any sort of requirement. There are specific matters in respect of which the administration can issue a direction or a requirement.

I will give you some examples of those. Page 141, paragraph 7, with regard to the provision of facilities, that is a typical example of a matter which can be the subject of a direction or a requirement; at item 9, the shared use of bus stops; item 12 at page 143, parking facilities at terminal points, display of routes and

fares, and so on.

I won't take you through them all, but if you go down to number 28, clause 28 of the document, you will see a provision, 28(1):

"provide to the commissioner the information relating to and records kept by the Grantee in respect of the Bus Service in accordance with Schedule II ..."

And you will see that schedule at page 168 with regard to the sorts of records and information which has to be provided according to the terms of the franchise.

What I would like to note in passing is that it would appear to counsel that there are probably a number of safety-related issues which are not specifically addressed in the franchise document and which would not therefore be able to be the subject of any particular direction or requirement. The one that occurs to counsel as being an obvious one is the matter of the training of bus captains. There would appear to be nothing specific in the franchise which might set out requirements for the training of bus captains, either when they commence work as a bus captain or when refresher training might be required at a later date.

We will see undoubtedly later during the hearing that there are some arrangements between the administration and the bus companies with regard to

training, but whether these arrangements have the teeth which some persons may think appropriate is a matter which may call for some questions.

I would now like to take you back to the ordinance, if I could, leading on to some of the matters now that I wish to explore from those provisions that I've taken you through.

Can we go back to the ordinance at page 124 of the bundle. If I could pick this up at section 35, the power of the secretary to make regulations. In particular, the item at (j), which is "regulating, in relation to the drivers of buses used by a grantee --

(i) the maximum number of hours during which any such driver may be permitted to drive such a bus; and

(ii) the intervals to be provided by a grantee for the rest and refreshment of such drivers ..."

The first matter I would like to ask the committee is whether it is true that this topic has for some years been a bone of contention between bus franchisees on the one hand, and employees and trade unions on the other? Is that something which has been an issue for the administration for some time?

CHAIRMAN: So your question is directed at Mr Lai?

MR DUNCAN: Yes, it is.

CHAIRMAN: You said "the committee".

Mr Lai, can you respond to that?

MR JOSEPH LAI: Yes. Thank you, Chairman, and thank you, counsel, for the question.

I think the way I would put it is that it is an issue which has been reviewed from time to time since the guidelines which all franchised bus operators are supposed to observe, and they do observe, I should add. If I could use it in a very loose sense, it was made mandatory since 1998. Prior to that, for over ten years, as I recall it, there were guidelines on a voluntary basis, to be observed on a voluntary basis.

I would say that this is an area which we have always been trying to improve. In doing so, of course, we need to consider all sorts of factors, including the feasibility of any changes and improvements, in terms of the impact on the actual operation of the operators, how they would deal with the need for any additional drivers that may be required as a result, how they would recruit and train the necessary drivers, and so on. At the same time, according to my understanding, whilst the bus drivers would perhaps welcome an improvement in that aspect, at the same time there is also the concern that the take-home pay should not be affected in a negative sense.

So there are a whole range of issues that will need

to be taken on board.

The other issue, for completeness, I should mention, is the financial implications of any changes to the status quo and how those financial implications should be addressed.

MR DUNCAN: I think those guidelines have been amended on something like six occasions since 1998. Is that true?

MR JOSEPH LAI: If my recollection is correct, yes, counsel. 1999, the year 2000, 2004, 2007, 2010, and then most recently earlier this year.

MR DUNCAN: Thank you. Now, they are guidelines. The ordinance itself enables regulations to be passed in that respect. Why are these the subject only of guidelines and not of regulation?

MR JOSEPH LAI: Chairman, in answer to counsel's questions, I actually do not have an immediate answer to that. What I can say, first of all, with a fair degree of firmness, is that the guidelines, although they are classified as guidelines, they are meant to be observed strictly by the operators. As I said a moment ago, they are in fact observed by the operators, and they know that the Transport Department will carry out surveys to ensure that the guidelines are observed, and that if for any reason the guidelines have not been observed fully on occasions, the department will come after them for

explanation, and the operators are obliged to provide the explanation.

As to exactly why there have not been regulations in the sense of subsidiary legislation being made, I am afraid I don't have an immediate answer to that, but I suppose -- and I am surmising here now -- that it is the way we approach the whole regulatory regime, we seek to do that through various means, and if one means, ie the issue of guidelines, has proved feasible and workable, then to us that is also a means of achieving the objective of ensuring that the drivers will have the necessary rest time, and so on.

CHAIRMAN: Mr Lai, you have said twice that you are unable to give an immediate answer. Would you like the opportunity to give a considered answer, perhaps by supplying your answer in writing?

MR JOSEPH LAI: Chairman, I will certainly take that up, although I should add that because we are talking about guidelines which were first laid out in 1998, I do not have full confidence that I will be able to dig out the written record at the time.

But yes, of course, Chairman, we would be more than happy to give it a go.

CHAIRMAN: Thank you.

MR DUNCAN: You do appreciate, of course, that if this

matter was the subject of regulation, that would enable a regulation to be passed, according to the terms of the ordinance, to make it an offence, if the content of the regulation was not conformed to.

MR JOSEPH LAI: Chairman, as I mentioned in my opening statement, we see the need for the franchise operators to ensure safety in the operations, very much part of the proper and efficient requirement test, perhaps not the "efficient" part of it but most certainly the "proper" part of it. We take the view, we have always taken the view, that if the operator are unable to provide safe operation, either through taking initiatives on their own or following initiatives, guidelines, directives, however we might want to put it, or even legislative provisions set out by the government to ensure safety, then we would argue that, if that failure is on a consistent basis, the franchisee's ability to provide proper service is in doubt.

MR DUNCAN: But then your only remedy would, as I understand it, be to take action under that what I described as the drastic provision of withdrawing the franchise?

MR JOSEPH LAI: Chairman --

CHAIRMAN: You are referring to the revocation provision?

MR DUNCAN: Yes.

CHAIRMAN: Remind us, if you would -- where do we find that?

MR DUNCAN: Section 24 of the ordinance.

CHAIRMAN: Which page do we find that on?

MR DUNCAN: Page 115 of the bundle.

There would have to be certain procedures followed, and the matter would have to be ultimately considered by the Chief Executive-in-Council, quite a long and cumbersome process, I would imagine?

MR JOSEPH LAI: Chairman.

CHAIRMAN: Yes.

MR JOSEPH LAI: In response to counsel's question, I would say that, yes, apart from revocation of the franchise, either the whole of it or perhaps part of it, the financial penalty provision in section 22 of the ordinance, in my opinion, could also come into play, because that refers to failure by the grantee to comply with, maybe if not the franchise, then certainly the ordinance. The ordinance does require the franchisee to provide proper and efficient service.

MR DUNCAN: Just referring to that, over the weekend, when the final submissions came in, it was clarified by the Transport Department that the guidelines did not constitute either a direction or a requirement under the terms of the ordinance. So would that not inhibit the ability to invoke the financial penalty provisions of section 23?

MR JOSEPH LAI: Chairman, not being a lawyer, the way I read section 22(2) is this. Subsection (2) says the financial penalty may be imposed for failure to comply with franchise or this ordinance or any direction of or requirement, and so on and so forth, or with any programme or any approval.

So there is a series of "ors", alternative scenarios. I have noted the Transport Department's written submission which says that the guidelines do not constitute direction or requirement. I was alluding a moment ago to the reference in section 22(2), to this ordinance, and this ordinance being the PBSO, in that the franchisee is obliged to provide a proper and efficient service.

The proper service, I would say, I would suggest, includes the safety requirement.

MR DUNCAN: That would not entitle the administration to invoke the provisions of section 22; would you agree?

MR JOSEPH LAI: Chairman --

MR DUNCAN: Sorry, let me -- I'm sorry for being a lawyer. We will leave this perhaps to the lawyers. But if it is only invoked by virtue of the fact that it's a breach of the franchise generally, or the ordinance, for failure to provide a proper and efficient service, the remedy of the administration in those circumstances would be

limited to the revocation clause; would that be right?

MR JOSEPH LAI: Chairman, as I was trying to suggest just now, not being a lawyer, my reading of section 22(2) should give us room, if necessary, to invite the Executive Council to impose a financial penalty, because section 22(2) refers specifically to failure by the grantee to comply with this ordinance, and this ordinance imposes the obligation on the operators to run a proper and efficient service.

The proper service, I would argue -- the proper service requirement, I would argue, includes the requirement to provide a service which is safe, otherwise it cannot be proper.

But, Chairman, as I said, I am seeing this from a policy point of view. This particular scenario has not been tested.

MR DUNCAN: Thank you, Mr Lai.

Can we move on to --

CHAIRMAN: Before you move on, Mr Duncan -- by that do you mean no financial penalty has ever been invoked?

MR JOSEPH LAI: Chairman, by that I mean the question of safety issue leading to an attempted use of this particular section concerning financial penalty has never been invoked thus far, so it's not tested.

MR DUNCAN: So do we understand correctly from that answer

that no financial penalty has ever been imposed for any of the reasons set out in that section, section 22?

MR JOSEPH LAI: Chairman, not to my recollection or understanding. I would be more than happy to come back with a written confirmation of that, but certainly not in recent times.

MR DUNCAN: Has any application ever been made to the Chief Executive-in-Council for such a penalty to be imposed?

MR JOSEPH LAI: Chairman, not that I am aware of in recent times, and I think the explanation for that is that we do not see that that provision needs to be invoked, having regard to the circumstances of everything.

MR DUNCAN: Can I take you now to section 36, please, page 125, which gives the power of a grantee to make by-laws for certain matters, including the safe and efficient operation of the grantee's public bus service.

Have any of the current grantees made any such by-laws?

MR JOSEPH LAI: Chairman, I personally can recall certain by-laws having been made, but I cannot answer right now whether each and every item set out in section 36 are the subject of by-laws which may currently be in force. I do not have the information in my hand and I would need to come back to the committee on this point.

MR DUNCAN: That would be helpful, because from our search

we can't find any such by-laws, of any of the franchisees.

CHAIRMAN: Please do. Your shopping list for written submissions is growing.

MR JOSEPH LAI: Thank you, Chairman.

MR DUNCAN: I believe in the case of other transport providers, specifically the Mass Transit Railway Corporation, they have passed their own by-laws?

MR JOSEPH LAI: The MTR do have their by-laws, yes.

MR DUNCAN: Of course the advantage of that is that the MTR can take its own action, backed up by appropriate by-laws and offences under those by-laws, in respect of conduct by drivers and in respect of conduct by passengers who may be on the bus?

MR JOSEPH LAI: Chairman, yes and no. As counsel reminded us a moment ago, there are regulations, Cap 230A, which provide for the regulation of the conduct of drivers and passengers. So there are already provisions in the law as it stands.

The only way I could put it is that it's not as if there is a total vacuum in law on this particular subject.

MR DUNCAN: Who, then, would be responsible for enforcing the regulations?

MR JOSEPH LAI: Chairman, generally speaking, the police, as

far as I understand, will be responsible. As to whether any other authorities might be responsible, I can confirm. But generally speaking the police would be responsible.

MR DUNCAN: Would you see advantages in the bus companies themselves being able to take action in this respect, rather than relying on the police?

MR JOSEPH LAI: Chairman, a very off-the-cuff response: the mode of -- if we use the MTR as the reference point, Chairman, the mode of operation of buses and railways are rather different, because of the way MTR or rather the railway works, in a confined place, generally, with a lot of staff around, where backup and support will be generally -- can be made available generally rather quickly, and so on and so forth. Not being a trained law enforcer, to my mind, it may be easier to enforce whatever by-law that's in place regarding passengers' behaviour, and so on and so forth, without unduly affecting the movement of other passengers.

In a bus, particularly in this day and age where there is only the bus driver in control of the bus, and if something untoward were to happen during the journey, it might be in operational terms rather more tricky to expect the driver to enforce the law.

But that's really my very off-the-cuff response, but

that might also be the reason why having the police enforce the law might be the present arrangement.

MR DUNCAN: The committee, in its submissions, has received a number of comments with regard to the conduct of drivers, on the one hand, and also with regard to the conduct of what might be called unruly passengers on the other.

How often are prosecutions instituted under the regulations relating to the conduct of drivers and passengers?

MR JOSEPH LAI: Chairman, if you could just give me a second.

CHAIRMAN: Mr Duncan, perhaps it might assist everyone else's understanding of what you are raising, if you were to take us to one of the submissions -- I think it's KMB, is it not? -- where there is reference to increasing abuse drivers suffer from passengers.

MR DUNCAN: I will find the reference to that, Mr Chairman. Thank you.

MR JOSEPH LAI: Chairman, if I could answer counsel's question just now.

CHAIRMAN: Yes, please do.

MR JOSEPH LAI: According to the police -- and this is a piece of information which in fact was made public in 2016, in reply to a question from the Legislative

Council -- the advice by the police at the time is that when there are incidents involving assault, they would investigate, regardless of, obviously, the location, and so on and so forth.

But the police do not maintain figures on cases of assault on bus captains or passengers, for that matter, nor do they keep the respective prosecution and conviction statistics.

The police also advised at the time that if there were cases of assault in a bus, for example, involving whatever parties, then apart from relying on Cap 230A, they could also use other pieces of legislation as may be appropriate, to investigate and to prosecute. There are a good number of criminal legislation which the police could make use of.

Thank you.

MR DUNCAN: I know the provision is there. My question really is aimed at how often is it actually invoked. It looks as though figures are not available.

MR JOSEPH LAI: Chairman, the short answer is that according to the police, they do not keep such figures.

MR DUNCAN: Just going back to the chairman's question, I think the reference -- you will probably be aware, Mr Lai -- to KMB's comments on this is to be found in the KMB bundle number 1 at page 95, at paragraph 35.

CHAIRMAN: Perhaps you would be kind enough to read that out, or the relevant parts.

MR DUNCAN: I quote:

"A recent phenomenon which has been causing considerable concern to KMB is the increasing incidence of assault by passengers or other road users on its bus captains. This has often resulted from tension arising directly or indirectly from worsening traffic congestion. While we have been doing our best to institute legal proceedings against the culprits, we observe that the penalties meted out in such cases have generally been insufficient to have much deterrent effect."

I think that is the matter, and I think it's fair to say that the submissions have referred not just to physical abuse but also to verbal abuse of passengers. Is the bureau aware of those allegations?

MR JOSEPH LAI: Chairman, we are aware of the concern of bus companies and bus drivers in that respect, and I could add that one of the things which the Commissioner for Transport and her colleagues are working on is an education plan, to educate the travelling public on the sort of behaviour expected of them, and also the sort of complaints channels that they could or they should resort to in case of any dissatisfaction with

either bus service generally or with the service of a particular driver.

So the Transport Department is working on that already.

We tend to think that education is perhaps more important, if not equally important, than looking purely on the question of enforcement. The law is already there. It's to be observed. And, really, the important thing is to educate the public to behave in a civil manner, even though, when they feel upset, there are other channels rather than resorting to physical or verbal abuse.

MR DUNCAN: When were these regulations last considered with regard to their applicability to current circumstances?

MR JOSEPH LAI: Sorry, Chairman, can I ask what regulations counsel is referring to?

CHAIRMAN: Yes. Perhaps you can more specific.

MR DUNCAN: The regulations provided for to which I am referring, which is the regulations made under the ordinance, talks about the responsibilities of drivers, conductors, passengers, and I'm just wondering when they may have been the subject of review by the administration, as to whether they cater for current-day circumstances?

MR JOSEPH LAI: Chairman, I believe, when -- I expect, when

the Transport Department in due course presents the bureau with an overall plan on education and publicity, they would also look into the question of, you know, how the existing criminal penalty provisions in the legislation should be more widely promulgated, and in that connection, perhaps the need for any review.

CHAIRMAN: If I could ask you to respond directly to the question. The question was: when were the regulations last reviewed?

MR JOSEPH LAI: Chairman, we have not actually taken out this particular piece of legislation for, shall I put it, a thorough review, because the assumption has always been that the provisions therein are not insufficient.

CHAIRMAN: So there has been no review?

MR JOSEPH LAI: Chairman, we have not done a review because we do not think that the provisions therein are insufficient. But, as I said, we do expect that when the Transport Department come up with the education plan, in that context they will also look into the sufficiency of the provisions with a fresh pair of eyes.

CHAIRMAN: Thank you.

MR DUNCAN: Do I understand from those answers, Mr Lai, that the bureau has actually already charged the department with coming up with an education plan?

MR JOSEPH LAI: Yes, Mr Chairman, that is correct.

MR DUNCAN: When was the department given that directive?

MR JOSEPH LAI: Chairman, that directive followed shortly after the very tragic accident in Tai Po, when there were a number of reports coming to us which suggested that there seemed to be some occasions of rising tension between drivers and passengers.

MR DUNCAN: In essence, what is the education plan designed to address?

MR JOSEPH LAI: Chairman, as I said, as regards the details, I need to await the proposals from the Transport Department, and so I would not wish to pre-empt what they will come up with for the bureau's consideration. But the overall sense of it should be, and they are aware of it, that we should remind passengers to behave in a civil and orderly manner at all times, that if they are dissatisfied with either the provisions of the bus service generally or in relation to a particular bus driver, and so on, there are complaints channels that they could go to, and that is the far more sensible way than to take out their dissatisfaction on a particular bus driver.

MR DUNCAN: Has the department been given a time schedule for the plan?

MR JOSEPH LAI: They have not been given a deadline as such, but the department is fully aware of the urgency, so

they are working on it expeditiously. This is what I have asked the department to do, and they are working on it.

MR DUNCAN: Can I raise another matter with you, going back to the ordinance, please, at page 108.

This is section 9 and the power of the Chief Executive to appoint additional directors of the grantees. Is this a power that the Chief Executive has exercised?

MR JOSEPH LAI: Chairman, yes, it is a power which the Chief Executive has exercised, and it's been exercised for a number of years.

The Commissioner for Transport and the deputy secretary responsible for bus service, the incumbent being Mr Choi to my right, they have been appointed by the CE as government directors to all the franchised bus companies.

MR DUNCAN: I believe at the moment there are five franchisees. Do I understand those two individuals sit on the boards of each of the five franchisee companies?

MR JOSEPH LAI: Mr Chairman, that is correct.

MR DUNCAN: And to what extent do the directors so appointed become concerned with safety issues on those boards?

MR JOSEPH LAI: Mr Chairman, the directors are appointed to represent the government. I would argue that by

extension to represent the Government's interests. So safety issues are one of the issues which are of concern to the government directors, and where necessary or where appropriate they will in fact raise the issues at board meetings. That has been set out in our submission to the committee dated 4 May.

MR DUNCAN: We are aware that some companies from time to time may have subcommittees of the board, for example an audit committee or a safety committee, those sorts of committees. Have the government directors come across, in any cases of the franchises, to a particular committee of the board devoted to safety matters?

MR JOSEPH LAI: Chairman, if you will allow me, can I invite Mr Choi to answer the question, Mr Choi being the government director?

CHAIRMAN: Yes. Thank you.

MR KEVIN CHOI: Thank you, Chairman, thank you, Mr Lai, and thank you, counsel.

As Mr Lai said, I, as the incumbent Deputy Secretary for Transport, and also Commissioner for Transport, Ms Mable Chan, we are the two persons being appointed as the directors representing by the government, appointed by the Chief Executive to sit on the board of the five franchised bus companies as such.

We perform as one of the directors, so of course we

represent the Government's interests, but at the same time we are also one of the many directors to look after the company matters in a strategic manner. So we do participate in the business as one of the many directors.

As far as I know, because I have been in post since September last year, I have been attending board meetings bi-monthly or quarterly of these boards. They do run audit committee or some form of audit programmes in their daily life or their everyday operations, which cover proper and efficient service part of it and also the safety part of it.

So indicators like accident rates and lost trip rates are examined by -- reported from the management to the board, through board papers, and we are also copied in and have a copy for reference.

Unfortunately, I would say that we don't really sit on the audit committee per se.

MR DUNCAN: Would you see value in these companies operating safety committees on which government directors might be members?

MR KEVIN CHOI: Well, chairman and counsel, thank you for your question. As Mr Lai has mentioned in the opening remarks, franchisees are given the duty and the responsibility for it to run its franchise properly and

efficiently, to this extent. And of course, if there are improvements in the governance and also especially in the aspect of safety, we will see how best the government directors should join efforts on this end.

Of course, we do look forward to better governance and also more focused on the safety part of it, for the franchisee to discharge its duties in carrying out a proper and efficient franchised bus service in Hong Kong.

MR DUNCAN: Thank you, Mr Choi.

Can I refer now the members from the bureau to the forward planning programme provisions of the ordinance, in particular section 12A.

CHAIRMAN: If you are going to move to another topic, we are intending to take a short morning break, to give the witnesses some recovery time. Would this be a convenient moment?

MR DUNCAN: Indeed it would, Mr Chairman.

CHAIRMAN: We will take 15 minutes now.

MR DUNCAN: Thank you.

(11.32 am)

(A short adjournment)

(11.48 am)

CHAIRMAN: Yes, Mr Duncan.

MR DUNCAN: Thank you, Mr Chairman.

Mr Lai, I was going to refer you to section 12A of the ordinance, please, at page 109.

CHAIRMAN: Yes.

MR JOSEPH LAI: Yes.

MR DUNCAN: You will recall I had taken you to this when we went through the provisions initially. This is the section that deals with the five-year forward planning programme.

We saw that the matters that could be contained in the programme are set out in the schedule, at page 126.

If you look at page 109, subsection (4) -- I brought your attention to the provision whereby if there was any disagreement or a failure to reach agreement, between the commissioner and the franchisee, the point of disagreement could be referred to the secretary for his resolution.

Has the secretary ever been called upon to resolve such a disagreement?

MR JOSEPH LAI: Chairman, no, not that I am aware of, because -- I suppose the way to explain it is the forward planning programme is often a result of many rounds of iterative or reiterative discussion process between the Transport Department and the franchised bus operators, so that -- usually, by the time the programme is finalised, it will have obtained the consent of both

the department and the bus operators.

MR DUNCAN: Could I ask you to turn to the schedule, please, page 126, where you will see the contents of the programme set out.

Has the bureau issued any proposals to the department with regard to what the programme should contain over and above the specific provisions of clauses (a) through to (g)? I brought to your attention the catch-all provision of item (h), "any other matters", and my question is whether the bureau has at any time suggested to the department what matters should be included in the five-year plan. Was that something you leave to the department?

MR JOSEPH LAI: Chairman, we do know, from the content page of the most recent FPP provided to the committee, the committee will also know that there are certain broad subjects, or broad subject headings in at least some of the FPP, which are over and above what is strictly required as set out in the schedule.

For example, one of the bus companies, they do provide certain information on staff training, bus driver training to be more exact. I have been given to understand that this is the result of discussion between the department and the bus operators, but I cannot confirm one way or another whether that is very much the

department's initiative or whether the department was acting under some specific request by the bureau.

I suspect it's more than likely to be the former.

CHAIRMAN: I think Mr Duncan's question was directed to another issue, and that is whether or not the bureau has issued any proposals to the Transport Department as to what should be contained in a five-year plan.

MR JOSEPH LAI: Chairman, the short answer to that is I cannot recall any specific directive of the sort you suggested or you alluded to. The starting point, the basic point, is always that everything in the schedule should be in the programme, and if the department is able to secure, through discussion with the bus companies, further information, then that would be reflected in the individual programmes.

CHAIRMAN: So no directive to the Transport Department?

MR JOSEPH LAI: Not in this context.

CHAIRMAN: Thank you.

MR DUNCAN: Mr Lai, I'm going to leave the regulatory regime now, and if I could take you back to the terms of reference again.

Just to remind us all, with regard to paragraph (b) of the terms of reference, the committee is also charged to examine the monitoring system for franchised buses, and it's that that I wish to explore with you briefly,

if I could.

It is clear from the submissions that the committee has received that the companies, as a matter of practice, furnish the department with quite a significant supply of written documentation, either on a monthly or on a quarterly basis, with regard to the operation and the management of the bus franchisees. You are no doubt aware of that?

MR JOSEPH LAI: Yes.

MR DUNCAN: Does the bureau require the department to undertake any sort of verification process with regard to the written documentation which is provided to the department?

MR JOSEPH LAI: Chairman, if I seek a clarification on counsel's question. Counsel is asking whether the bureau has asked the department to check that the information provided by the companies, the information itself is truthful or accurate.

MR DUNCAN: Yes, that is so.

CHAIRMAN: Yes, that's Mr Duncan's question.

MR JOSEPH LAI: The short answer to that is that we expect the department to take the necessary action to ensure the truthfulness of the information, without the bureau having to actually ask or remind the department to do that.

Of course, under the franchise, if I recall correctly, there is also the requirement, in broad terms -- and I'm not sure it will cover each and every scenario or each and every piece of information to be provided by the operators -- but I do recall there is a provision which requires the bus companies to ensure that information provided to the commissioner is accurate and is truthful.

So there is also that requirement on the part of the operators to follow, to observe.

And I know, for example, that the department, as a matter of fact, on certain issues at least, that they will take action on its own, just to double-check to ensure the veracity of the information. For example, in the case of the bus drivers' rest time and working hours, for example, they do provide -- the department does engage contractor to conduct independent survey, ie independent of the bus companies, to check that the bus companies do observe the guidelines, quite apart from whatever information is received by the department from the bus companies.

MR DUNCAN: Yes, and of course that's a matter that we will explore further with the department.

But leading on from that answer, can I ask you this. A lot of the monitoring process is carried out,

obviously, by receiving and considering the records prepared by the bus companies. A considerable amount of the monitoring process is done in that way. Has the bureau issued any proposals/suggestions to the department as to the extent to which the department should be monitoring the activities of the bus companies directly, rather than relying on records that the bus companies provide to the department?

MR JOSEPH LAI: I suppose the answer to this is perhaps a rather long-winded one, counsel, if you would allow me, and Chairman, if you would allow me.

There are checks and balance features built into the overall regulatory and monitoring system, and all those checks and balances are basically either endorsed by the bureau or, at the very least, are initiatives which the bureau is aware of. Those include, for example -- just to quote a few examples -- I referred a moment ago to the survey on bus captain rest hours, rest time. There are also daily spot-checks conducted by the department on buses in service. So every day they will pick 14 buses which are supposed to go into service, they will pick the 14 buses at random, and they will be subject to testing/examination by the Transport Department's own vehicle examiner. This is again quite apart from whatever information bus companies provide on the safety

of their buses.

These are just two examples I can think of offhand of the sort of mechanism that we have built in with the policy endorsement of the bureau, to check against what's provided as a matter of course by the bus companies.

Of course, as you will have noticed from the written submissions by the Transport Department, if there is doubt on either the accuracy or the comprehensiveness of whatever information is provided by the bus companies, then the Transport Department does go after the bus companies and ask for more complete information.

That has been built up very much over the years, as very much part and parcel of the overall mode of operation of the department, and I think we have come to a stage when, you know, certain things are being done because colleagues know what is expected, without the need for any further specific written directives.

CHAIRMAN: So does it come to this, that there have been no such directives to the Transport Department because they are doing the job that you would expect them to do?

MR JOSEPH LAI: Basically, Chairman, I think that would be a fair way of putting it.

MR DUNCAN: I want to move away from monitoring, about which we will ask the department more later, but turning from

monitoring to the general topic of safety policies. There are a number of matters I would like to explore with you in that respect, Mr Lai.

The submissions from the bus companies indicate that they themselves will explore from time to time new safety technology that might be available, new safety measures that might be introduced. Does the bureau itself undertake research, domestically or internationally, to understand what new initiatives might be available with regard to technology or general safety measures?

MR JOSEPH LAI: Chairman, the division of labour between the bureau and the department is such that generally the research which counsel alluded to is done by the Transport Department rather than by the bureau, because at the bureau we really do not have the necessary expertise to do that, whereas in the department we have a team of traffic engineers who are, you know, more -- and also electrical and mechanical engineers who are more well-versed, shall I say, in this sort of thing. And they do carry out research of that sort, as evidenced, for example, by the adoption and introduction of the black box and the speed limiters installed in all buses. Also as evidenced more recently, as this committee will be aware, following the tragic accident

in Tai Po, the setting up of a working group, chaired by the Transport Department, with participation by the franchised bus operators, to look into possible additional safety equipment or safety features that could be installed on our franchised buses, the details of which are already set out in one of the Transport Department's submissions.

So, yes, we do that.

MR DUNCAN: Has the bureau considered the possibility of a requirement whereby the individual bus franchisee should be required to draw up a composite approved safety programme, as opposed to dealing with individual safety issues on an ad hoc sort of basis?

I'm suggesting the possibility of a safety programme equipped with suitably qualified personnel with a safety background and with the requisite qualifications and experience.

Is that a matter that has been considered at all by the bureau?

MR JOSEPH LAI: Chairman, no, not in a structured or detailed way. However, since the question is put to me this morning by counsel, my first instinct would be, yes, we would be more than happy to look into that.

MR DUNCAN: As I understand the current situation, one of the bus franchisees might have a totally different

safety programme, looked at overall, from one of the other franchisees. Could that be the case?

MR JOSEPH LAI: Chairman, I do not know enough about the exact details of how things are done on a day-to-day basis at the company, to say definitively "yes" or "no". But I would not be surprised if there is some difference.

So if we were to request or to require the setting-up of a safety programme of the sort counsel has in mind, there are of course a few things we would need to discuss with the operators, including, for example, what the programme should look like, should we insist for one size fits all, or should we accept that company A may come up with certain programme with different emphasis and focus, company B with a slightly different set of focus.

So those are sorts of the things obviously we would need to sort out.

MR DUNCAN: Many countries have adopted the international standard ISO -- I think it's 39001 -- road safety management system, and if I'm not wrong the Road Safety Committee has constantly advocated for the adoption of that in Hong Kong.

Has the bureau considered adopting the road safety management system for Hong Kong?

MR JOSEPH LAI: Chairman, this is a rather new standard, as far as I know. It's a standard which -- again, if I haven't got it wrong -- is normally used by transport and logistics companies, rather than by public authorities per se.

The question of whether we would encourage or we would ask bus companies to adopt this particular ISO, I would suggest could perhaps be looked at in conjunction with the earlier idea, counsel, you put across to me, ie the safety programme, whether -- I suppose there is some logic in policy terms to look at the two issues together.

No, I wouldn't rule that out as a matter of principle. I think really the question to ask is, you know, what the cost and benefit of the adoption of the ISO is. Again, if we have companies with different stages of readiness regarding the adoption of the ISO, what should done about that, and so on?

We would like to look into that and we have an open mind about it.

MR DUNCAN: Can I take it from that that that's not really been a matter considered to date by the bureau?

MR JOSEPH LAI: Chairman, I think that is not an unfair way of putting it, because it is a relatively new ISO, as far as I'm aware. It's been around for only a few

years. In terms of standard and so on, it is still relatively new. But we are happy to look into new ideas.

CHAIRMAN: Mr Duncan, we have a copy of the ISO 39001, do we not? Does it state on its face when it came into being?

MR JOSEPH LAI: Mr Chairman, the document can be found at miscellaneous bundle 2 at page 645. According to that document, at page 646, it was issued in 2012.

CHAIRMAN: And that's the first edition. Yes, thank you.

MR DUNCAN: Hong Kong, the geography of Hong Kong, Mr Lai, is such that we have almost a peculiar situation whereby double-decker buses are visible on very steep and very narrow roads onto which pedestrians often spill.

How much of those sorts of situations are taken into account by the bureau with regard to the general topic of safety in Hong Kong?

MR JOSEPH LAI: Chairman, road design and how it affects safety is one of the tasks which our colleagues in the Transport Department, in particular the transport engineering team, look into very much as part of their routine. By "routine" I do mean as a day-to-day task.

So either after a particular accident or a particular spate of accidents, or as part of their normal review process, they will look into the safety of a particular stretch of road and see what can be done to

improve the safety situation and whether, if necessary, certain restrictions should be placed on that particular stretch of road, restrictions including speed limit, including the type of vehicles which can access the particular stretch, and so on and so forth.

So, again, this is part of their ongoing job. For example, if a place has been designated a black spot -- there is a very objective yardstick for determining whether a particular spot is a black spot, usually by reference to the number of accidents within a certain period -- then they will take a particularly closer look at that spot to see whether any of the changes I referred to a moment ago should be considered.

As I say, it's not a purely reactive process in the sense that they also take the initiative to look at other stretches of roads which are not black spots as such but they feel would require looking into or reviewed.

MR DUNCAN: I take it from those answers that there have to date been no discussions between the bureau and the department with regard to the responsibility of introducing into Hong Kong, either directly or through the bus companies or other transport companies, the road safety management system to which I have referred? Is that correct?

MR JOSEPH LAI: You are talking about the road safety --

MR DUNCAN: The ISO system, yes.

MR JOSEPH LAI: This ISO 39001, no. I think -- sorry, yes, it is correct to say that there have not been any discussion on this as such. As I explained, this is, to us, a relatively new ISO, although introduced in 2012, still at a relatively youthful stage, shall I say. But we also note that a growing number of transport and logistic companies are using that.

So, yes, now that the matter has been drawn to our attention on this particular ISO, as I said, we will be more than happy to look into its applicability in Hong Kong, in conjunction with the franchised bus operators.

MR DUNCAN: Can I turn to the topic of manpower supply. The submissions that the committee has received would indicate that there has been a shortage of persons who are either qualified or willing to undertake the duties of a bus captain, and this shortage has been with us for some time now.

Is that a fair summary of the situation?

MR JOSEPH LAI: Chairman, I would say that this is perhaps a reflection of the rather tight labour supply situation in Hong Kong. Yes, it exists not only in franchised bus companies but also in other transport-related companies,

and in fact in logistics-related companies as well.

MR DUNCAN: One of the matters the department has brought to the attention of the commission -- and I'm sure you are aware of this -- is that, as a result of the latest guidelines to which you have already referred, something like 250 additional bus drivers would need to be employed. Are you aware of that?

MR JOSEPH LAI: Yes, I am aware of that, Mr Chairman.

MR DUNCAN: In your submission, you stated that Hong Kong is one of the few places in the world where the franchised bus service is provided by private companies, without any direct subsidies. Do you recall that being in your submission?

MR JOSEPH LAI: Yes, Mr Chairman, although, if the chairman would allow, to be absolutely precise, I said "generally without direct subsidies".

CHAIRMAN: Perhaps you would like to refer to the passage to which Mr Duncan is referring.

Is that on the screen now, Mr Duncan?

I think that deals with a separate issue, does it not?

MR DUNCAN: Yes, that's a related but separate issue, Mr Chairman. I think it's --

CHAIRMAN: Your qualification is that that is a general observation, Mr Lai?

MR JOSEPH LAI: Mr Chairman, I was just trying to clarify -- sorry for appearing to be pedantic. I heard Mr Duncan say that in my opening statement I said there was absolutely no government subsidies. I was trying to clarify that it's not absolutely no subsidies. It's generally no direct subsidies.

MR DUNCAN: Yes, I'm sorry.

Let us go to paragraph 14. Or perhaps you could locate where you have referred to this in your submission. The passage relates to the question of subsidies and the fact there are no direct subsidies. Is it paragraph 14?

MR JOSEPH LAI: It is paragraph 14, that might be the one, yes.

MR DUNCAN: Let me quote directly from that.

MR JOSEPH LAI: In our submission dated April, yes.

MR DUNCAN: "It should be noted that Hong Kong is one of the very few cities/jurisdictions in the world where the franchised bus service is provided by private companies without direct government subsidies."

That was the passage to which I was referring.

MR JOSEPH LAI: Yes.

MR DUNCAN: Does the government provide indirect subsidies to the franchisees?

MR JOSEPH LAI: Chairman, there are a few examples which

I could cite. For example, franchised buses are exempted from, first, registration of tax. That is perhaps one of the more clear examples.

The other reason, Mr Chairman, why I said in my open statement that government generally does not provide subsidies is sort of -- it's meant to be elaboration of the written submissions we provided. In recent times, over the years, we do provide some form of financial assistance to franchised buses, to pursue a particular initiative or to pursue a particular programme.

To give this committee an example, the trial and testing of electric buses, this is an initiative by the Environment Bureau rather than by the THB, but nonetheless it is a government subsidy, and the subsidy is provided to the bus companies to procure a certain number of electric buses, on a trial basis.

So it is a form of subsidy, if you will, for a targeted means.

We also provide --

CHAIRMAN: Am I right in remembering that that involves four buses, four electric buses?

MR JOSEPH LAI: That involves 36 single-deckers, Mr Chairman.

CHAIRMAN: Thank you.

MR JOSEPH LAI: Another more recent example is that we

provide subsidy to help the company put up realtime arrival display panels at bus stops. That is on a matching basis, a dollar-to-dollar matching basis.

But otherwise, apart from the few specific targeted subsidies, yes, it is fair to say that the government does not provide subsidy to the operators as such.

MR DUNCAN: Does the government provide subsidies to certain ferry companies?

MR JOSEPH LAI: We provide special helping measures, that is the terminology of the programme -- in counsel's wording, it's "subsidy", and I will not dispute the use of word -- for ferry service to outlying islands, specifically to outlying islands. The specific policy consideration is that ferry is the only transport means for people who live in the outlying islands, and those ferries are financially not viable, and that is a chronic problem, unless we go for a huge hike in the fare, which we do not think the public will be able to afford.

So there is a particular background to that special helping measure programme.

CHAIRMAN: How is that special helping measure implemented?

MR JOSEPH LAI: Could I invite Mr Choi, who looks after that on a day-to-day basis, to explain?

CHAIRMAN: Mr Choi.

MR KEVIN CHOI: Thank you, Mr Chairman, and thank you, counsel, for that particular question.

As Mr Lai has said, the outlying island ferry routes are a specific case for which the government has provided some special helping measures. There are six such routes that we are providing special helping measures, and the scheme is under review for the time being.

Basically, the government, as Mr Lai said, recognises that unless we have a very huge hike of ferry fares for these outlying islands, residents who rely on these ferry services to come to town, say for their office and other duties, otherwise these ferry services are not viable.

Under these special helping measures, the government undertook to subsidise individual items. For example, maintenance fees, electricity bills, some concession costs or insurance premium, or like also revenue forgone when they are introducing elderly or child concessions, so the costs of such measures.

The special helping measures identified individual items and subsidised these areas. The government undertook to the Legislative Council to get the funding approval from the Finance Committee of LegCo, and then we provided this public money to ferry operators, as

I said, over those items, and we have an audit programme through the Transport Department to consider whether those costs are true or not and also to ensure that the public moneys are well spent.

So that's the case for the special helping measures.

MR DUNCAN: Thank you.

Going back to the manpower separation, Mr Lai, I wonder if you could be shown bundle TD-5 at page 1510. This is a document that came to the commission just over the weekend, and you may or may not have seen this.

MR JOSEPH LAI: Yes. It's notes of a meeting; is that right?

MR DUNCAN: Yes, minutes of the meeting. It's in the Chinese language.

It appears to be extracts from a special meeting held by the Sham Shui Po District Council on 28 September 2017, following from the tragic accident in Sham Shui Po.

My interest is in particular with regard to page 1523 of the document.

MR JOSEPH LAI: Yes, Mr Chairman.

MR DUNCAN: It's paragraph 203(iii).

MR JOSEPH LAI: Yes.

MR DUNCAN: If I could read the translation with which I've been provided. It reports a chief transport officer of

the department saying that the government is concerned about manpower shortage and that bus companies had responsibilities to increase salary, fringe benefits and promotion prospects, in order to attract new blood.

Is that a fair translation of what you are reading in the Chinese?

MR JOSEPH LAI: Mr Chairman, yes, I would say so.

MR DUNCAN: Does that reflect the Government's position accurately with regard to the manpower shortage?

MR JOSEPH LAI: Mr Chairman, I think it reflects what we expect the franchise companies to do. It does not reflect the full picture, because this is meant to be a summary of what Mr Leung, the chief transport officer, was supposed to have said. All I can say is that it is part of what our position is.

The other part of our position, regarding the chronic problem of shortage in commercial drivers, is that we are taking steps to try to -- a full legislative amendment, and I would be happy to elaborate on that in a moment or two -- full legislative amendment to relax the licensing requirement for commercial drivers.

So, basically, what happens is that, at present, if you want to apply for a licence, a driving licence, to be a commercial vehicle driver, you will have to have had a private car driving licence for three years before

you are eligible to make the application, ie the application for a driving licence for commercial vehicles.

Because of the chronic manpower shortage, we have proposed, and the trade as well as Legislative Council have agreed, that the three-year period could be reduced to a one-year period. So in future, all you need is to have a private car driving licence for one year before you can apply for a driving licence for a commercial vehicle. Commercial vehicles include, of course, buses, and that includes of course franchised buses.

We are drafting the amendment legislation, and we hope to be able to introduce that into the Legislative Council before the end of this year. If that is passed by the Legislative Council, that should also go some way towards relieving the private shortage problem. It may not provide a total answer, but hopefully it will provide some relief.

On our part, that's what we have been doing. But yes, having said that, we do also think that it's part of the franchised bus companies, as the franchisee, to take all reasonable measures to ensure that they have the necessary number of drivers to provide service.

MR DUNCAN: Given the statement to which I referred, what steps has the administration taken with the bus

companies to persuade them to increase the remuneration for bus captains?

MR JOSEPH LAI: Chairman, most recently there has been some, shall I say, restructuring in the pay package of the bus drivers, with a view to enhancing the package or at least improving the certainty of bus drivers that they would be able to take home X amount of dollars every month bus drivers.

That is a result of a discussion between the government and the bus companies, although it also has to be said, in fairness to the bus companies, that they reacted very quickly to the Tai Po accident, which is a very tragic one, and realised that something must be done very quickly about that.

MR DUNCAN: Have the bus companies undertaken that they will increase the remuneration?

MR JOSEPH LAI: I think the restructured package has already been announced.

MR DUNCAN: Given what you described as a chronic shortage, would the government consider providing a subsidy in respect of the added remuneration which appears to be desirable?

MR JOSEPH LAI: When we talk about subsidy for the long-term basis, we will have to consider that most carefully. It does represent a rather fundamental departure to the

basic philosophy of how the public transport system is run in Hong Kong. Speaking sort of off-the-cuff, I do not think that for recruitment of bus drivers we have come to that stage. I think there can be means through which bus companies can recruit and retain the necessary number of qualified drivers.

As I went through some of the documents provided by some of the bus companies to this committee, it can also be seen that they are doing quite a lot to improve the situation.

So, no, I don't think we have come to that stage of having to provide subsidy for recruitment of bus drivers. There are ways through which we can help ease the problem, apart from what I just explained about the licensing requirement. Another is about, for example, the 250 drivers, counsel, you alluded to. You will be aware that there is the agreement that the guidelines will be introduced progressively, starting from later this year, to sometime next year, 2019, and the whole purpose being to enable the bus companies to have the necessary turnaround time to recruit the necessary number of people.

The other thing we have done in the past one or two years is to give priority to the driving exams of rookie bus drivers. They are given priority over people who

want to take driving exams for, for example, a private car driving licence. This is against the backdrop of a big and rather sustained increase in the number of people who apply for driving licences, and against that background the Transport Department have redeployed driving examiners to give priority to bus driver applicants.

MR DUNCAN: Have the bus companies indicated to you that the requirement for increased remuneration which has been referred to in that minute is going to entail considerably more expense?

MR JOSEPH LAI: Chairman, this will be a fact anyway. As you recruit more drivers, then of course the cost generally speaking will go up. But this has not stopped the bus companies from agreeing to the latest guidelines.

MR DUNCAN: So does the bureau have any other initiatives, apart from speaking to the bus companies, lowering the licence qualifications; any other initiatives whereby the manpower shortage might be alleviated?

MR JOSEPH LAI: We have been encouraging them to look for new, unexplored or at least under-explored possibilities, the recruitment of women drivers, for example, and of course this is something that they have been doing more in recent years; and, I have to admit,

the rather sensitive subject nowadays, since the Tai Po accident, of part-time drivers. That was meant to provide some relief for the manpower shortage problem, but of course, as the committee will be aware, since the accident, the facts means it has been suspended by the companies themselves.

MR DUNCAN: What proportion of the bus captains are female?

MR JOSEPH LAI: Sorry, Chairman, I don't have the answer with me. I don't know if my colleagues have the answer. No.

MR DUNCAN: Would it be very low?

MR JOSEPH LAI: It would not be high, definitely, but, Chairman, it's growing. From our point of view, we would welcome more women joining the ranks.

MR DUNCAN: Has the bureau taken any particular steps to attract the fairer sex to the position of bus captain?

MR JOSEPH LAI: Chairman, not us directly. It's very much a responsibility of the companies to recruit drivers. But we have put across that message to them in more than one or two occasions, and I know the Transport Department has also been in discussion with them. And, as I said, I do know for a fact that they have stepped up recruitment, in fact, in that process, as evidenced by, anecdotally at least, the probability of us running into women driver as we take the buses.

But no, sorry, I don't have the exact figures with me.

MR DUNCAN: What I'm interested in is any particular substantive step that either the administration or the bus companies may have taken to attract females to their position?

MR JOSEPH LAI: Chairman, maybe this is a question which the bus companies themselves would be best placed to answer.

CHAIRMAN: So the direct answer to Mr Duncan's question is that there has been no such initiative?

MR JOSEPH LAI: Sorry, Chairman --

CHAIRMAN: There has been no such initiative because this is a matter for the bus companies?

MR JOSEPH LAI: Initiative --

CHAIRMAN: By the Transport and Housing Bureau.

MR JOSEPH LAI: Chairman, the short answer is that we do not do the recruitment ourselves, but we do encourage the bus companies to do that.

CHAIRMAN: Thank you.

MR DUNCAN: One of the reasons for the inquiry is the unfortunate spate of accidents over the years involving buses. Does the bureau conduct its own research into any common causes attributable to these accidents?

MR JOSEPH LAI: Chairman, I was explaining a moment earlier that the task of researching into the causes of

accidents are the job of the professional colleagues in the Transport Department. Quite frankly, in the bureau, we are not equipped to do any research.

However, there have been cases when we note that something properly should have been done, and we then ask or task of department to look into that.

If I could quote two examples. One is the most recent update of the Guidelines on Working Hours and Rest, and here I am making a factual correction to the written submission we made in April, because we have since been able to ascertain that that review, which started in 2017, was triggered from a request by the bureau. So that is one example.

The other example is, somewhere in our submissions and also in TD's submission, we refer to the cases of the broken glass doors, the exit doors in the buses with glass panels, and there were a spate of accidents in 2016, where the glass was broken, leading to injuries suffered by passengers.

As it gradually became what looks like to be a pattern, not one accident but two accidents and then three accidents -- if I remember correctly, that was within a spate of maybe two months, more or less -- we suspected something might not be entirely right; there might be some weaknesses in either the bus design or the

quality of the glass or whatever. So we asked the department to take a look at it, and they looked into it, in conjunction with the bus companies, and in the end the safety feature that was put in place was an additional horizontal handrail across the width of the glass door, to prevent -- sorry, not to prevent -- but to reduce the possibility of passengers suffering major injuries such as that would be suffered if the passenger was thrown out of the bus.

So, yes, we do try to keep track of things, and where we can, when it comes to our attention, sometimes we will initiate, request a review by the Transport Department. Still other times the review or study would be initiated by the department itself, direct, because they are really at the coal face, so to speak. They are the frontline department, and they have a better sense sometimes than we do on what needs to be done or what needs to be looked into, having regard to their day-to-day interaction with the bus companies, the District Council, members of the public, and so on.

MR DUNCAN: Understanding that it's their domain, if they found any common causes, would you expect them to relate those back to the bureau?

MR JOSEPH LAI: Chairman, if we are talking about causes of accidents --

MR DUNCAN: Yes.
MR JOSEPH LAI: -- then particularly if the operation of buses is involved, then, yes, we would expect there to be some communication between the department and the bureau.
MR DUNCAN: Has the bureau drawn any conclusions as to whether there's any common causes threading their way through these spates of accidents?
MR JOSEPH LAI: Chairman, if I could ask counsel, when he refers to "these spates of accidents", what spate of accidents?
MR DUNCAN: There were a number of accidents. Go back to 2003, I think it was in Tuen Mun. There was an accident in Chai Wan. There was an accident in Sham Shui Po. And then we had this one, this year, in Tai Po. A number of quite serious fatal accidents involving buses. They are the sorts of accidents I'm referring to.
MR JOSEPH LAI: Chairman, if you would allow me, I would leave out the accident in Tai Po in my response, because obviously it is subject to legal processes, and I would not want to infer or suggest that we have any particular view on what might have caused the accident. But generally --
CHAIRMAN: No. The committee has been directed not to

consider issues as to the causes and liability, but it doesn't mean that we can't have regard to the accident.

MR JOSEPH LAI: No. I do understand that point, Mr Chairman.

Generally speaking, each accident will have a specific reason for it.

MR DUNCAN: Yes.

MR JOSEPH LAI: They could be categorised either into mechanical failure on the part of the buses or the design of the buses or the design of the roads, or driving behaviour or passenger behaviour. Some of the causes might be what we would call active involvement of the bus or the bus drivers, in the sense that the bus drivers are responsible or it's a mechanical failure of the bus which is responsible. Some of the other accidents would be the result of passive involvement of the buses, in the sense that the bus, shall we say, is the victim, is being rammed into from behind, for example, when it's travelling perfectly normally.

So there are different causes, and after each accident or spate of accidents, the Transport Department/THB, would look into those accidents and see what improvements we might make, what lessons we might learn from that.

The speed limiter and the black box was a direct

result of another very tragic accident in Tuen Mun in the year 2003.

CHAIRMAN: And as a result of the experts' report, because the experts recommended both those safety measures.

MR JOSEPH LAI: Yes, and, as a result of that, the government accepted the expert report, and that was put into practice very quickly. So by now all the buses are equipped with both devices, the black box and the speed limiter.

MR DUNCAN: You have mentioned a number of factors there: mechanical failure, design of roads, driver behaviour, passenger behaviour. Has the bureau been able to discern a predominant feature?

MR JOSEPH LAI: Chairman, no, not that I am aware of.

MR DUNCAN: The chairman has just referred to measures which were taken after the 2003 accident in Tuen Mun. Is it correct that the accident in Sham Shui Po in September 2017, that was the matter which prompted a review of the guidelines which was concluded in February of this year?

MR JOSEPH LAI: Chairman, yes. I think it's fair to say that that particular tragic accident prompted the review.

MR DUNCAN: The previous guidelines --

CHAIRMAN: That is the working hours of bus captains guideline?

MR JOSEPH LAI: Yes, Chairman, that's right.
MR DUNCAN: The previous guidelines I think had been in force since 2012; is that correct?
MR JOSEPH LAI: 2010, Mr Chairman.
MR DUNCAN: 2010. Thank you.

And the new guidelines were issued, if I understand it correctly, on 23 February this year. That's just a couple of weeks after the unfortunate accident in Tai Po. Is that the position?

MR JOSEPH LAI: Yes, Chairman.
MR DUNCAN: Now, if I understand correctly, the Sham Shui Po accident also prompted the department to require more monthly information from the bus companies; is that correct?
MR JOSEPH LAI: Chairman, yes.
MR DUNCAN: For example, matters such as the traffic offences of bus captains, on-board monitoring by the bus companies, random checks on the black boxes, alcohol breath tests of the drivers, those sorts of things.

Do I understand correctly also that since the Tai Po accident, a working group has been established?

MR JOSEPH LAI: Yes, Mr Chairman, that is correct.
MR DUNCAN: And that is to review the technical feasibility of installing new safety devices on buses?
MR JOSEPH LAI: Yes, Mr Chairman, that's correct too.

MR DUNCAN: Was that also prompted by the unfortunate incident at Tai Po?

MR JOSEPH LAI: Yes, Mr Chairman, that would be a fair way of putting it.

MR DUNCAN: Can I ask you this, in conclusion, Mr Lai. What would you say to the suggestion that the administration has adopted a reactive approach to matters of safety rather than a proactive approach?

MR JOSEPH LAI: Mr Chairman, I would say that after particularly serious accidents, it falls to the government to try not only to look into the cause of it but also to see how such accidents could be prevented in future or at least to reduce the likelihood of recurrence.

But, as I said in my opening statement, we also seek to improve safety in response not only to particular accidents or incidents but in the light of changing technologies, different expectation and demands, and so on.

So I would not say that our approach is purely a reactive one, although I would agree that after an accident, you have to react, and in that sense it's a reactive one, and it's always tragic that you could not have prevented it in the first place, but at least you should try to see what might be done to prevent it

from happening again.

MR DUNCAN: Thank you, Mr Lai.

CHAIRMAN: Thank you, Mr Duncan.

MR DUNCAN: Do you have any questions?

MEMBER LO: I just have some minor questions. The working hours guidelines talk about still keeping the special shift of 14 hours. Has the bureau done any research or study into if you were to totally remove the special shift, what is the impact on drivers needed; how many more drivers would the companies need?

MR JOSEPH LAI: Chairman, I do know that the Transport Department has done the research. I do not have the findings at the top of my head. The commissioner is right behind me. If you would allow, Chairman, the commissioner could answer that question in the next session.

CHAIRMAN: Yes.

MR JOSEPH LAI: But yes, something has been done.

CHAIRMAN: If she has the information, of course, that's sensible.

MR JOSEPH LAI: Thank you.

MEMBER LO: One more question. You mentioned about driver supply is a chronic problem. That means it has been for a long time. So why haven't more drastic measures been put up to address the problem more directly? Because

that has led to severe consequences in the work hours, in the tiredness of drivers. Has there been any policy that looks directly at this problem?

MR JOSEPH LAI: Chairman, I believe over these many years the bus companies have, you know, come up with different measures, from the recruitment of more women, to recruitment of part-time drivers. I know, as I said, this is now becoming a rather sensitive subject. But it was introduced to help relieve the shortage problem. The introduction of more benefits to the drivers; to the initiative to step up recruitment locally, "locally" meaning recruitment of drivers living near where the depots are, because my understanding is that drivers usually don't want to travel far to report for duty and to travel far to get home after work. So they have been looking at all those sorts of things.

So these are different measures. And also, recruitment of retirees, to get them working again, with suitable remuneration, and the improvement in remuneration package, bonus and all that.

Prof Lo might have in mind the question of importing labour, importing drivers. On this particular one, we have looked into this every now and then. Our conclusion is that it might not be suitable in the context of bus drivers, because bus drivers need to have

very often and close interaction with passengers, where the ability to communicate in the passenger's language is most important.

So importing drivers from other places outside Hong Kong may create a communication problem between the imported drivers and the passengers.

Also, the other thing is we are right-hand drive in Hong Kong, which is a rarity.

MEMBER AUYEUNG: Thank you, Chairman.

The question I have to Mr Lai is -- I think in your opening statement, you mentioned that one of the safety measures is that you have 14 spot-checks a day. Considering the thousands of buses on the street every day, can you provide some more insight into how you determine this number, 14?

MR JOSEPH LAI: Chairman, again, this is a question which I believe the commissioner would be better placed than I to answer. But regardless of the exact number, how it came about and the exact rationale for it, I suppose the reason why the number is not bigger is that you have to bear in mind, first of all, that it is a surprise check, in the sense that we call in the buses on the day. So there is no prior notification, no prior warning. You can imagine the effect it will have on bus deployment on the day.

So, on the day, the bus companies will have to make alternative arrangements to replace that bus by another bus. I suppose this operational consideration is one factor that has to be taken into account.

The other is that this is on top of the annual check, the monthly check, and whatever check which the bus companies have, which the buses have to undergo; and also the daily examinations which the bus companies themselves are to undertake every day, before the bus is sent out for service and at the end of the day when the bus comes back to the depot.

So this surprise spot check of 14 buses is an additional check and balance safeguard measure, in addition to everything that's been done to ensure that the bus is in a sound and proper state.

MEMBER AUYEUNG: Thank you.

Thank you, Chairman.

CHAIRMAN: Thank you. For my own part, I have no questions, so it remains for me to thank you, Mr Lai, and thank you, Mr Choi. We haven't heard from you, Ms Yip. But thank you for attending, and we are grateful to the help you have provided the committee in having a better understanding of how the system works.

We will take a lunch break now and we will resume at 2.30, when we will hear from Ms Chan.

MR JOSEPH LAI: Thank you, Chairman. Thank you, members.

Thank you, counsel.

CHAIRMAN: Thank you.

(1.04 pm)

(The luncheon adjournment)

(2.30 pm)

EVIDENCE FROM THE TRANSPORT DEPARTMENT: MS MABLE CHAN, MS AMY LEE, MS RACHEL KWAN, MS MACELLA LEE, MR REGINALD YK CHAN, MR TONY YAU

CHAIRMAN: Ms Chan and your representatives from the Transport Department. May I invite you to take your seats, all together, as you wish, or one at a time. It's a matter for you.

MS MABLE CHAN: We will sit as a team.

CHAIRMAN: Thank you.

Mr Duncan, if you would commence proceedings.

MR DUNCAN: Thank you.

Ladies and gentlemen, thank you very much for providing written submissions to the committee, and thank you also for attending today, having been given the opportunity of making any oral submissions you may wish.

In the absence of any legal representatives of yours who would perhaps normally take you through any oral submissions, do you wish to make any oral submissions to

the committee?

MS MABLE CHAN: Yes, counsel, I would like to make an oral submission in front of the committee.

CHAIRMAN: Yes, please do so.

Opening statement by MS MABLE CHAN

MS MABLE CHAN: Thank you, Chairman.

Chairman, members of the committee, good afternoon. Thank you for giving us the opportunity today to appear before the committee to give oral submission on matters relating to the Transport Department's regulation and monitoring of the franchised bus operations in Hong Kong, in support of the committee's important mission in reviewing Hong Kong's franchised bus service following the occurrence of the tragic accident on Tai Po Road on 10 February 2018.

Today with me is my team, including my deputy, Ms Macella Lee, and three assistant commissioners overseeing the monitoring of franchised bus, Ms Rachel Kwan, Mr Reg Chan, overseeing vehicle licensing and examination, and Mr Tony Yau, who is the chief engineer overseeing road safety and standards.

We are happy to facilitate the committee's proceedings today by giving truthful and detailed evidence in order to facilitate the committee's understanding of what we know and more importantly what

we have been doing as a regulator.

The Transport Department, headed by the commissioner, is the main authority for administering the Road Traffic Ordinance and its subsidiary legislation for the management of road traffic, regulation of public transport services, and operation of major transport infrastructures, as well as the Public Bus Services Ordinance and the public bus services regulation. Both constitute the key statutory tools for the regulation of franchised bus operation in Hong Kong.

The policy objective and public expectations on the Transport Department in ensuring proper and efficient franchised bus service is clearly embedded in the statute.

Safety-related aspects are of utmost importance in sustaining a safe and reliable franchised bus service. The fact that safety-related defects per bus examination and number of buses involved in accidents per million vehicle-kilometres are two of the nine key indicators adopted in the annual performance assessment of the franchised bus operator speaks for itself.

To ensure the roadworthiness and operational safety of franchised buses, the Transport Department, in short "TD", keeps track closely of the conditions and

performance of franchised buses, from their design and build stage, to the in-service period, through periodic examinations and inspections of vehicles as required under the regulatory framework.

All of the 5,900-plus licensed franchised buses are subject to annual inspection, monthly inspections, as well as spot-checks by the Transport Department at the average rate of 14 franchised buses per day, or around 3,400 buses per year.

The TD conducted monthly review on bus operation safety by analysing the accident statistics derived from a database on all traffic accidents, jointly maintained by the police and TD. Should the TD find that there is a rising trend or abnormality, the TD will follow up with the respective bus operators for explanations and follow-up actions, remedial actions.

We would also examine the accident trends of each bus operator annually, as part of the systematic review on the performance of the bus operators.

To enable the delivery of public bus service through grant of franchise to private operators, the six franchises currently signed with the five operators have empowered the Commissioner for Transport to regulate the bus service performance levels in highly prescriptive terms, in the form of a schedule of service, ranging

from the greeting and timetable, location of bus stops, fares and concessions, to the number and types of buses deployed for each route.

Pursuant to the relevant clause in the franchise, grantees are required to keep and provide information and records relating to the number of buses, passengers, journeys, as well as driver duties and establishment and strength, in order that the TD can monitor the delivery of service in accordance with the approved schedules of services.

Chairman, the regulation and monitoring of bus franchises is an ongoing and evolving process. Over the years, for better delivery of franchised bus service and to enhance safety and service, the TD has signed commitment letters with bus operators pursuant to the relevant franchises, requiring them to install safety and service enhancement measures.

While ensuring the delivery of franchised bus service according to the approved schedules of service, the TD pays importance to the working conditions and environment of bus captains, while reckoning that bus captains are employees of bus companies and their working conditions are parts of the latter's manpower policy.

In the form of administrative requirement reached

with mutual agreement with franchised bus operators, the TD promulgated a set of Guidelines on Working Hours, Rest Times, and Meal Breaks in 1998, and revised it six times over the years, with the latest in 2018, for franchised bus operators to follow in bus captain deployment for their respective bus routes.

Bus operators are required to submit regular reports on the compliance with the guidelines to the Transport Department, which also conducts regular surveys to assess compliance with the guidelines.

As far as bus captains are concerned, franchised bus operators have also voluntarily made performance pledges on providing training to all new recruits, and training once every three years for in-service bus captains. They submit information on training to the TD on an annual basis for monitoring.

It is obviously not realistic for the TD to perform day-to-day checking of compliance of the franchised bus operators and the accuracy of information and records, each and every one submitted by the bus operators. As far as bus service is concerned, there is check and balance through monitoring by way of TD's on-site surveys, passenger satisfaction surveys, and monitoring of public complaints received.

As far as safety is concerned, we monitor franchised

bus operators' performance by analysing the nature, severity and contributing factors of accidents involving franchised buses, coupled with black spot investigation, trend analysis, and benchmarking with other commercial vehicles in territory-wide accident statistics.

Follow-up actions include quarterly reporting to and monitoring by the Road Safety Council. We will also follow up recommendations and our own findings through road safety review, vehicle safety enhancements, and regular meetings with bus operators to discuss measures and proposals to improve bus captains' driving behaviour.

Chairman, franchised bus services have been expanding over the years in terms of fleet size and patronage. While the local licensed bus fleet has grown by 3.24 per cent as compared with that of ten years ago, to meet the increase in patronage by 37 million passenger journeys in absolute terms, franchised bus operators are facing an increasingly acute problem of manpower shortage. It is inevitable that the bus companies are exploring various means to meet manpower needs by increasing the remuneration package to attract new recruits, extending the retirement age of bus captains, and recruiting part-time bus captains.

It is against such background that the Transport

Department sees the need to enhance bus captains' safe driving by institutionalising the monitoring of bus companies' training arrangements, including those for the new recruits, the in-service, be they full-time or part-time, as well as special or remedial training for those who are found to have improper driving behaviour or who have been away from driving duties for a long period because of sickness or other reasons.

What we intend to do includes the formulation of a set of new guidelines on the manpower training framework, with basic requirements on modules, duration and weighting, so as to provide a common basis for internal monitoring and audit within individual franchised bus companies.

We have indeed shared our thoughts with bus companies at our first two meetings of the Working Group on Enhancement of Safety of Franchised Buses on 13 March and 21 April 2018.

The feedback has been positive. The working group has pledged to complete its work by the end of June.

Taking advantage of the latest technological know-how on driver-assisted devices, we are also discussing with the bus companies and bus manufacturers to examine the feasibility of installing on new buses seat belts for all passenger seats, electronic stability

control, speed limiter to cap the maximum speed for buses travelling downhill, and put on trial driver monitoring device, in order to assist bus captains to drive safely and improve passenger safety.

All in all, the Transport Department will continue monitoring of the public transport services in the territory and will spare no effort in enhancing the safety operation of public transport operators in Hong Kong.

Chairman, this concludes my statement. My team and I will be happy to answer questions. Thank you.

CHAIRMAN: Thank you.

Mr Duncan.

Examination by MR DUNCAN

MR DUNCAN: Mr Chairman, thank you.

Ms Chan, I am very interested to hear your remarks just at the end of your submission with regard to monitoring, because I think as you probably know from the terms of reference of the committee, one of the prime matters they have to consider -- it's item (b) of the terms of reference -- is first of all the regulation of the bus companies' operations, and secondly the monitoring.

This morning, I think you were in the auditorium when questions were asked of the bureau with regard to

regulation. I would just like to ask a few more questions, please, about the monitoring process, as it is at the moment, and how the monitoring process as presently conducted might be in the process of change from the remarks that you've made this afternoon.

First of all, if I could understand the current process by which the monitoring is carried out. It may be useful if you were to turn up, please, one of the exhibits to your submission. This will be TD-2, page 293.

You will see there a document which is tabbed appendix L, and it's headed, "Records and information submitted by franchised bus operators". It's one of the documents that the department helpfully provided to the commission.

Are you able to have that in front of you?

MS MABLE CHAN: Yes.

MR DUNCAN: This, as I understand it, summarises the records and information which, by arrangement with the operators, they are required to supply the department from time to time. I think sometimes it's on a monthly basis; sometimes it's on a quarterly basis.

Would it be true to say that, at the present time, this represents the principal methods by which you monitor the operation of the bus companies?

MS MABLE CHAN: Yes, senior counsel, the records and information highlighted in appendix L actually flows from the requirements as specified in schedule 2 to the relevant franchises we signed with the bus operators, and this formed the basis for the regular monitoring by TD, either on a daily or quarterly basis.

For those which relate to passengers, buses, journeys, things like that, they are actually submitted by the bus companies, through an electronic system, so that -- and they are also required to upload the information within seven days from which those trips are made, so that the Transport Department can monitor them on a frequent basis as well as on an ad hoc basis.

As we have stated in my opening statement, the franchise has specified and empowered C for T power to regulate and monitor the delivery of franchised bus service in highly prescriptive terms. So this list of information actually helps us to monitor the delivery of the services in terms of the routes, the passengers, the bus deployment.

But I would also like to add that this only forms the basis. In order to verify whether this is actually happening on the ground, the Transport Department has been conducting regular on-site surveys, which include inspections on trips on board the buses and also at the

bus stops. Those on-site surveys will help us to sort of do it on a random basis, in order to verify the information supplied by the bus operators are on valid and accurate terms.

Apart from that, we also conduct passenger satisfaction surveys, through which we will also gather feedback from the passengers on the various performance levels in a more systematic manner.

Thank you.

MR DUNCAN: So those on-site surveys to which you have just referred, are they referred to here in this appendix L?

MS MABLE CHAN: I would say that the on-site surveys actually cover most of the items in appendix L.

MR DUNCAN: Right. But if I take you to, for example, page 297 of the bundle, you see in the first box on the right-hand side, "Survey conducted by an independent consultant". That's a different type of survey, is it, from the one you've just referred to?

MS MABLE CHAN: Yes. This one is a special survey that we employed an independent contractor to do special checking on the compliance with the guidelines.

MR DUNCAN: Right. So what I want to clarify for the committee's consideration at the moment is what are the monitoring steps over and above what is in this appendix. So you mentioned during your statement

spot-checks, about 14 buses a day. Can you tell us a little bit more about that, please?

MS MABLE CHAN: Sure. For the spot-checks, it's actually on top of the annual inspection and also the monthly inspection of the vehicle fleet.

The bus operators are actually required to do their monthly inspection, but as a statutory requirement, the Transport Department oversees the safety and the construction and maintenance fitness of the buses. So, to facilitate the Transport Department in monitoring, we conduct annual inspection and also monthly inspection.

But on top of that, in order to ensure the robustness of our monitoring, the vehicle licensing and inspection team will carry out unannounced spot-checks of an average 14 franchised buses from the fleet in the bus company. That is unannounced and that is to ensure that apart from the regular inspection which the bus companies may have geared up to prepare for the inspection, we can conduct on a spot-check basis to make sure that the buses are safe and fit for running.

MR DUNCAN: You mentioned regular on-site surveys. What do you mean by that?

MS MABLE CHAN: For the regular on-site surveys, they relate to the delivery of the services, including the bus journeys, the passengers on board from the first stop or

at individual stops, and also the destination, the number of passengers alighting or boarding, and also the bus driver deployment on the individual bus, as well as whether there is any delay or change in frequency of the bus deployment according to the specified frequency in the approved schedule of routes.

MR DUNCAN: Who carries out the surveys?

MS MABLE CHAN: Transport Department.

Perhaps I can invite my deputy to fill in some details about how it is actually conducted from the ground, if I may.

MR DUNCAN: Thank you.

CHAIRMAN: Yes.

MS MACELLA LEE: Thank you, Chairman.

Because of the resources required, we also contract out these surveys to independent consultants or contractors. But of course our officers sometimes would also go and look for the demand situation himself, so as to better understand the situation or to go with the district councillors, and so on.

Basically, the bulk of them is contracted out to independent consultants.

MR DUNCAN: Are written records kept of --

MS MACELLA LEE: Yes.

MR DUNCAN: I don't recall this, but have any samples of

those records been provided to the committee?

MS MACELLA LEE: As the commissioner has explained, these are all on the service side, whether the services are provided according to those approved by C for T.

So these are on the service side and we can supply some examples of these surveys if required.

MR DUNCAN: I don't think we have seen those. That's the point. So are they available if we require them?

MS MABLE CHAN: I can confirm that through the bundles we have not provided those samples, but we can surely do.

MR DUNCAN: Thank you.

In your remarks, Ms Chan, just a few moments ago, I believe you mentioned monthly undertakings by the Road Safety Council, in the context of monitoring.

MS MABLE CHAN: Quarterly.

MR DUNCAN: Could you give us some details about that, please.

MS MABLE CHAN: Sure. The Road Safety and Standards Division, headed by Mr Tony Yau, who is a traffic engineer, they will monitor and analyse the data about accidents from a common database jointly maintained by the police and the Transport Department. The purpose of the monitoring is to analyse the nature, the severity and also the contributing factor of the accidents. Then, based on the analysis, they will provide a report

on a quarterly basis to the Road Safety Council.

In that report, they will analyse whether there is any common factor in those accidents, in order to prepare for necessary improvement or remedial actions. The aspects covered will include road safety, vehicle safety, or human factor, including driver behaviour or whether there are any common phenomena of pedestrians crossing in a very dangerous way.

So, on a quarterly basis, we submit the report to the Road Safety Council, and we will then take the follow-up actions accordingly.

Worth noting is that should any trend or analysis involving franchised bus companies, in particular the driver behaviour, they will also highlight those actions that need to be taken to the Bus and Railway Branch of the Transport Department, and my team will then raise the issue with the franchised bus operators in their regular meetings, to remind them of necessary actions to remind the bus captains.

MR DUNCAN: The portion which caught my attention was what was recorded in the transcript.

The transcript has you recorded as saying this:

"Follow-up actions include quarterly reporting to and monitoring by the Road Safety Council."

Now, is the Road Safety Council distinct from the

Transport Department?

MS MABLE CHAN: Yes. The Road Safety Council is distinct from the Transport Department. Actually, can I take this point to correct the flow of my wording?

MR DUNCAN: Yes, please.

MS MABLE CHAN: Actually, I would like to say that the Transport Department conduct a quarterly analysis of the accidents and analyse the contributing factor, the nature and severity, and then we will produce quarterly report to the Road Safety Council. Then the follow-up actions arising from our analysis and report to the Road Safety Council will include road safety review, vehicle safety enhancements, and then regular meetings with the franchised bus operators, to discuss means to improve bus captains' driving behaviour.

MR DUNCAN: So that initial work that you do and provide to the Road Safety Council, that's done by your conclusions from the documentation that the bus companies provide to you; is that correct?

MS MABLE CHAN: Basically, it's from the analysis done by the Transport Department's road safety and standards team on the accidents data collected in the common database managed by the Transport Department and the police.

MR DUNCAN: Right.

MS MABLE CHAN: So it is an independent source, not from the bus companies.

MR DUNCAN: Right. What I'm trying to understand is any steps the department takes to monitor the operations of the bus companies, apart from relying on the records of the bus companies.

MS MABLE CHAN: Yes, this is true. We have our own database. We do not rely just on the bus companies' data.

MR DUNCAN: Right. At the risk of asking you to repeat a few things, can you just identify what steps you take over and above considering the written information provided to you by the bus companies?

CHAIRMAN: Whenever there is an accident, in a particular fatal accident occurred, the police will timely input those data into the database. The Transport Department and the police jointly maintain that database. Then the Road Safety and Standards Unit, they will regularly monitor that database and analyse the accidents from that database. They do it independently, without reliance on the bus company's information on the accidents, because the bus companies' reports on the accidents, they may come a bit later, or they may come in the context of their annual programme provided by the TD.

So we actually look into that database maintained by the police and the Transport Department and then we will do a quarterly review to the Road Safety Council.

MR DUNCAN: Right. There, you are relying on the records from the police. I'm trying to find out what work the staff of the Transport Department might do independently to assess the operations of the bus companies, not relying on documentation of any sort. Your own work, that's what I would like you to identify.

MS MABLE CHAN: In that regard, I will invite Tony Yau, the chief engineer, to respond.

MR DUNCAN: Thank you.

MR TONY YAU: Thank you, Chairman, counsel.

As the commissioner mentions, we directly derived the accident data from a computer system which is input by the police, and we have accessibility to the system, and we retrieve the accident data in doing our monitoring and analysis work, including the trends, number of accidents, severity, collision type, vehicle types, and mainly the contributory factors.

The contributory factors can be driving factor, casualty factor, vehicle factor and environmental factors. So if we find out any common factors or any observations, we will quarterly report to the Road Safety Council.

The Road Safety Council consists of members from different bureaux, including Transport and Housing Bureau, Education Bureau, police, Highways Department, as well as other representatives from external members, such as Hong Kong Medical Association, Hong Kong Road Safety Association, Hong Kong Automobile Association, Institute of Logistics, to formulate -- what we are going to do then, the Road Safety Council will formulate -- help the different departments, initiate the department and the bureau to formulate the policy, and maybe implement road safety improvement measures such as updating or introducing new legislation, priority in enforcement, education and publicity campaign, et cetera.

MR DUNCAN: Thank you.

Those remarks I think have been made in the context of accidents. My enquiry is more operations generally. We've got an abundance of written records which are supplied, but over and above that, as I understand you, there is different work that the Transport Department actually undertakes with regard to the operations of the bus companies.

You have mentioned spot-checks, about 14 buses a day. I understand that. You have mentioned feedback you get back from passenger surveys; I understand that.

You have mentioned regular on-site surveys. Could you tell me just a little bit more about that: what does that consist of, who does the work, what conclusions do you draw from that?

MS MABLE CHAN: Perhaps I will invite Ms Lee to elaborate.

MR DUNCAN: Thank you.

MS MACELLA LEE: Thank you, Chairman.

Because of the requirement in the law about the service to be delivered by the franchised bus operators, those approval by C for T include a timetable, routing, stops, and also some patronage figures.

What we do is we either do terminal surveys, so we choose -- in a particular route, we station people in the terminus to time the departures, whether the bus companies have adhered to the schedules, and then on the same occasion record the number of passengers boarding.

In another end of the terminus, we will have the arrival time, so we know the journey time, we know if there are any delays in the trips, and so on. These are terminal surveys or stop surveys.

Another type is on-board surveys. We have surveyors on the bus. At each bus stop, they will record how many passengers getting down, setting down and so on. So we have the detailed operational data. These data are very important because all along we have to make sure that

the operators adhere to the schedules, and especially if there are complaints saying that there are missing trips, then we will examine these reports and take up with bus companies.

Another angle is the planning angle, because there are often requests for re-routing or to combine some routes, and so on, so for planning purpose we also need this data.

Actually, we got these data from the bus companies, but we verify them and also do -- sometimes we will need updated figures, especially for planning purpose. So because with these records and also our on-site survey we perform this operational performance monitoring and also planning purpose.

Thank you.

MR DUNCAN: Thank you.

I understand a lot of that work. A lot of it of course is not related to safety requirements. Is there any work done by the Transport Department independently of the records provided by the bus companies aimed at independently checking safety provisions undertaken by the bus companies? For example, the training of bus captains. Are you totally dependent on what the bus companies to inform you, or do you undertake independent assessments of safety

requirements?

MS MABLE CHAN: Perhaps I can try to answer on that. The safety-related aspects, I have mentioned two of them, two of the nine key indicators, including safety-related defects per bus examination. Senior counsel has asked a minute ago about our 14 spot-checks. Perhaps on that I can ask the assistant commissioner to elaborate a little bit.

MR DUNCAN: I don't think you need to do that. I think we understand that one.

MS MABLE CHAN: The other is on the number of buses involved in accidents per million vehicle-kilometres. This is one of the indicators that we monitor. In this regard, we will check the information supplied by the bus companies on the number of buses involved in accidents per million vehicle-kilometre. Then we will compare the performance year-on-year.

In meeting that indicator, training is also an important aspect that the bus company has mentioned as an important aspect to ensure that the driver has received sufficient training. In this regard, the bus company has voluntarily made two performance pledges. One is provide training for all new recruits, and the other is provide training for in-service bus captains once every three years.

The bus companies have provided information in this regard in their annual programme to meet their voluntary performance pledges. We take note of the information supplied in that programme and we review their work on an annual basis.

But I would like to emphasise that the Transport Department does not, as in the previous case, perform our independent checks on that, because I must admit that the training is not a requirement that flows from the franchise or that flows from the ordinance. It was actually formulated by the bus company on a voluntary basis as part of our discussions with them to improve and enhance bus safety, but there is no such legal requirement nor requirement in the franchise.

So, up to the present moment, the Transport Department does not do any spot-checks or independent checking on the training provided by bus companies.

MR DUNCAN: Do I take it also that there is no direction or requirement, as stipulated in the ordinance, with regard to training?

MS MABLE CHAN: No.

MR DUNCAN: It's all done on a voluntary basis?

MS MABLE CHAN: No direction or requirement.

MR DUNCAN: I'm going to go back to the records, this table, in a moment, but are you able to inform the committee as

to any other independent steps that the Transport Department might take, outside of the records supplied to you by the bus companies, with regard to matters of safety?

MR YK CHAN: I would like to supplement. The commissioner has mentioned about the spot-checks on vehicles. That's one thing. Another thing is, for all the buses run by bus companies nowadays, they have to do a complete check or repair once a year, and after that the Transport Department needs to check every one of them. So this is really an independent complete check to the standard, as spot-checks, really. So this is an aspect that the Transport Department do have independent information obtained by carrying out our own works by our inspectors, our vehicle examiners, at the depots.

MR DUNCAN: Thank you.

Let us go then back to this document, appendix L, "Records and information submitted by franchised bus operators". We can see the records and information which are supplied, the reference to the ordinance or the franchise, the relevant clause, the time frame for submission, and then the follow-up actions.

What we have done is been through the follow-up actions to try and identify where it is that matters beyond what the bus operators have provided you have

been checked or investigated in some way.

The first one I've come across appears at page 296. If you look at the second-last box on that page, there is in the second paragraph reference to:

"Survey conducted by independent consultant ..."

Do you see that reference?

MS MABLE CHAN: Yes.

MR DUNCAN: Thank you. In fact the same reference is made in the next box, at the bottom of page 196, and another one at the top of page 297.

I believe that although there's three references, they all refer to one survey; is that correct?

MS MABLE CHAN: Correct.

MR DUNCAN: Can you tell us a bit more about that, a survey conducted by an independent consultant? Who is the independent consultant and what does the survey indicate?

MS MABLE CHAN: Again, Ms Lee, please.

MS MACELLA LEE: Thank you, Chairman. These surveys are to check the compliance of the franchised bus companies, whether they follow the guidelines in arranging the duties for the captains.

As you are aware, the original guideline, not the one just revised, there are four parts of the guideline. Basically, there are two types. One is the driving --

the rest breaks, rest breaks and driving hours. This type of survey, we need to follow -- actually, the surveyor followed -- we select the drivers randomly and then the surveyor follows the driver the whole day. So we can check whether really rest break is given to him or whether, say, sometimes -- the rest break and the driving hours, whether the driving hours within that duty is within the maximum.

So this kind, we follow the surveys. But for breaks between two consecutive duties, for example, we check the sign in and sign out record of the drivers.

So there are basically two teams of surveyors. So where do we find these surveyors? We do it by an open tender, for qualified consultants to do it. We have a study brief, we select the most appropriate consultants, and then we follow up with the consultant to do this.

So, with these samples and we can see the compliance, and in fact, as we have included in the bundle, over the years the compliance rate is quite high, and for those items or guidelines that we found a small percentage of non-compliance, we have asked the bus company the reasons and explanations, and most of them are outside their control. This is the way surveys are done, and I must say these are very labour

intensive. We do 12,000 bus drivers altogether, the bus companies.

So the surveys are done like that. Thank you.

MR DUNCAN: Sorry, you do 12,000?

MS MACELLA LEE: Yes.

MR DUNCAN: What does that mean?

MS MACELLA LEE: I mean we select samples and we take -- the six companies as a whole, we do 12,000 samples of these --

MR DUNCAN: You speak to 12,000 drivers?

MS MACELLA LEE: Sorry, 1,200.

MR DUNCAN: Per year?

MS MACELLA LEE: Yes.

MR DUNCAN: When did this system commence? When did you first engage surveyors for this?

MS MACELLA LEE: At least when the current guideline is implemented in 2010, and for those before 2010, I cannot give a definite answer here.

MR DUNCAN: If I refer the commissioner now to page 297, there is another box in the middle of the page:

"Survey conducted by independent consultant ..."

That is the same survey that's referred to, is it, earlier on?

MS MABLE CHAN: Yes, I can confirm it's the same.

MR DUNCAN: Thank you. The other one that we have located

is on page 299. This refers to the report on the passenger liaison group, and it refers to sending of representatives to attend PLG meetings. Could you give us a bit more detail about that, please?

MS MABLE CHAN: Perhaps on this I can ask my assistant commissioner overseeing bus to explain the details.

MR DUNCAN: Thank you.

MS RACHEL KWAN: Mr Chairman, each of the bus franchisees arrange their passenger liaison group meeting once in every two months, and once they have determined the location of the PLG meeting, we will be informed and we will send our representatives to attend the meeting as well, and to monitor that the franchised bus operator will do their own PLG meeting properly and to listen to the views collected from the meeting.

We will take records and after the meeting the franchised bus operator will also send us the record for our forward bus planning purpose.

MR DUNCAN: Who selects --

CHAIRMAN: Before you proceed, Mr Duncan -- so are you saying there are two sets of records, one taken by your representative and another taken by the bus company?

MS RACHEL KWAN: We will do our own -- because we will only send one representative to attend the meeting, we cannot follow all the passengers' opinions collected. So

whenever we collect, we listen to the passengers' views, we will jot our own notes, and we will not put it formally into a record but we will report to our senior when they come back to the office.

But actually, all the information collected will be recorded by the franchisee, and they will send us their report afterwards to countercheck our own handwritten record.

CHAIRMAN: So are there two sets of records?

MS RACHEL KWAN: Yes.

CHAIRMAN: Have we been supplied with these records?

MS RACHEL KWAN: Not yet.

MR DUNCAN: Could they be made available as well?

MS RACHEL KWAN: Yes.

MR DUNCAN: Thank you. Samples.

How many persons typically attend these PLG groups, meetings?

MS RACHEL KWAN: Mr Chairman, it all depends on the location of the PLG meeting. If it is held at a popular location, more than 20 passengers will attend.

MR DUNCAN: Who determines the make-up of the passenger liaison group?

MS RACHEL KWAN: Pardon me?

MR DUNCAN: Who determines, who makes up, the passenger liaison group? Are they selected by the Transport

Department? Are they selected by the bus operator?

MS RACHEL KWAN: Yes. They are determined by the bus operator.

MR DUNCAN: Thank you. You can put that document away. I think I've finished the questions on that particular topic.

CHAIRMAN: Before we move on from that, at these passenger liaison group meetings, are issues of bus safety raised?

MS RACHEL KWAN: Depends on the passengers' opinion. There is no definite topic for the passengers, for them -- in fact, they can raise whatever comments they would like to put forward.

CHAIRMAN: I appreciate that. Perhaps the question is better put this way. Do they ever raise questions of bus safety?

MS RACHEL KWAN: In my mind, most of the comments received are service related or fare concession related, not much --

CHAIRMAN: So questions of bus safety not raised?

MS RACHEL KWAN: Very little.

CHAIRMAN: Thank you.

Yes, Mr Duncan.

MR DUNCAN: Thank you, Mr Chairman.

Turning to another topic, Ms Chan -- reference has been made already this afternoon to the Guidelines on

Working Hours, Rest Times, and Meal Breaks for the bus captains, and one of your colleagues mentioned the guidelines in 2010, and we know that they were revised very recently and the guidelines issued in February of this year.

I would like to refer you, please, to your supplemental submission, the one that came in, I think, on 4 May. You will find this at TD-1 at page 157. In answer to a query from the committee, at paragraph (d) you mentioned that the department received a suggestion from a bus captains' union suggesting a revision of the guideline. It goes on to say that the department discussed the suggestion with the bus operators and another bus captains' union and both expressed objection to the suggestions. After further discussion with the proponent, it was concluded that the guidelines would not be changed.

Is it not the case that even before 2015, there had been requests and suggestions to the department that the guidelines be changed; do you recall that?

MS MABLE CHAN: Perhaps I can start -- the guidelines' development process is quite a long one.

MR DUNCAN: Yes.

MS MABLE CHAN: It dated back to 1993, when we sort of developed the guidelines for voluntary following up by

the relevant bus operators. It was not until 1998 that we promulgated the guidelines and required the bus companies to follow.

Since the promulgation in 1998, the guidelines were revised six times.

I would like to highlight that throughout the years and as the process, there have been ongoing suggestions and views from the staff union side, to further improve the working conditions and shorten the working hours of the bus captains; and, on the other hand, we are also mindful of ongoing and increasing public expectations to enhance the service level of franchised bus service.

So senior counsel's referral of our written statement in March 2019 [sic], I would say that is an example to illustrate that the staff union all along, they have a genuine request for further improvement in the working hours and conditions of the bus captains.

MR DUNCAN: Thank you. Just in that respect, I would ask you to pick up bundle SEC-1, and go to page 437.

These are minutes of a meeting of the Panel on Transport of the Legislative Council on 27 November 2012. Do you see that?

Then if you look through, please, to page 441, at the bottom of the page you will see that the chairman refers to:

"... a serious traffic accident had taken place in Chai Wan on 19 November 2012 involving two buses and a taxi and this had aroused extensive public concern on the health and driving attitudes of professional drivers, particularly bus captains."

So that was the context in which that meeting took place.

Then if you go through, please, to 442, there's reference in paragraph 2 to the secretary and the commissioner giving a brief account on paper which had included reference to details of the health check and the working hour arrangements for bus captains of franchised bus companies.

Then at 447, if I could refer you to that, paragraph 24, there's reference to the secretary undertaking that the administration would review the guidelines in conjunction with stakeholders, including franchised bus companies and their staff unions. He added that the department was liaising with major staff unions of the bus captains to discuss the problems arising from that accident.

Then there is, at page 454, a summing-up by the chairman of the meeting, where he thanked the parties and, amongst other things, indicated that members considered that the administration should review the

operation of franchised bus services, the captains' rest times, working hours and remuneration, as well as measures to improve the existing traffic network.

Now, it would seem that notwithstanding the contents of those minutes, there was no change to the guidelines from 2012 up until the time of the Sham Shui Po accident in 2017. Are you able to assist the committee with regard to what determination and for what reasons that determination was made of the administration regarding the guidelines as they were at that time?

MS MABLE CHAN: Perhaps I can give a general answer first and then I will invite Ms Rachel Kwan to supplement on the thinking and review process.

Following the tragic accident back in 2012, actually there are two major follow-up actions. The first one is the enhancement of the health check requirement of the bus captains. It is following from that incident that we have required all the bus operators to step up the health check requirements. In addition to the annual health check for bus captains aged 50 or above, we actually stipulate additional health check requirement for those bus captains who have declared significant health illness, so that the companies can arrange more frequent health examination and also including the cardio checking on the bus captains.

We also require the bus companies to arrange health check for bus captains at the 54 and 60, things like that.

On the other hand, on the review of the guidelines, I understand that the department has actually, at that time, taken another look at the guidelines on the working hours of the bus captains. But, at the end of the day, there is no specific change made to the guideline at that moment. But the department did undergo a review of the guidelines to see whether any parts of it would need to be enhanced at that moment.

CHAIRMAN: You said there were two follow-up actions that followed the incident in November 2012, one was increased health checks. What was the other?

MS MABLE CHAN: The other is the review of the guideline, though it does not lead to any specific revision at that juncture.

Thank you, Chairman.

CHAIRMAN: Yes, Mr Duncan.

MS MABLE CHAN: I would invite Ms Kwan --

MS RACHEL KWAN: Mr Chairman, I would like to supplement. The working hours guidelines was last reviewed in 2010. At that time, a new guideline was introduced. That is on the meal break. At that time, when we promulgated the guidelines in 2010, we allowed the bus companies to

implement the new guideline E on the meal break in two years' time. That means, for full implementation of the revised guideline in 2010, that will be in 2012 already.

So I cannot give a definite answer right now why, after the review in 2013, there is no change to the guideline. May we have some time to check our record? Maybe it's due to the fact that the new guideline for full implementation has just been implemented in 2012, in the latter part of the year, so maybe this is one of the reasons for perhaps at that time to look at the performance of the franchised bus operator for a longer period of time.

MR DUNCAN: Thank you.

Ms Chan, you were present this morning, I think, when I asked representatives from the bureau as to why these guidelines with regard to working hours are simply guidelines, as opposed to regulations, given that the ordinance expressly stipulates that this topic can be the subject of regulation.

Are you able to assist the committee as to the reason why this has not been a regulation or has not even achieved the status of a direction or a requirement?

MS MABLE CHAN: Perhaps I can try to. Because I was present at this morning's session and the context in which this

issue was raised was on whether or not it should be better implemented or enforced under the law or as a franchise requirement.

First perhaps I can express my view from an operational and monitoring point of view. As I see it, the history of the working hours guidelines is long and it is an ongoing process. As revealed from the few times that the guidelines are revised, the beauty of the requirements as set out in the guidelines is that it could be reviewed and revised in a more timely basis as compared to if it is stipulated as the ordinance or in the regulation; though I must admit that as and when necessary, we should not spare ourselves from the effort in reviewing the legislation or taking it through the Legislative Council.

The fact remains that, being guidelines, it can be more flexible and it can be sort of enhanced in the light of the prevailing circumstances. Franchised bus service is a very labour-intensive service. There are also highly prescriptive requirements on the service levels of franchised bus. So I think from the government perspective, we are trying to strike a balance in ensuring the delivery of bus service according to franchise requirement on the one hand and the enhancement of the working environment of bus

captains on the other.

That being the case, while the working hours guidelines are guidelines as such, administrative requirement in our words, in our written submission, we also require the franchised bus operators to supply information on their compliance, and we do independent checking on their compliance, so as to ensure that the franchised bus operators will comply with those guidelines as a product following ongoing and mutual discussions with the franchised bus operators.

So we would see it as a contractual requirement in that sense, because it is a product of ongoing discussions between the government and also the bus operators.

On the other hand, I also note from the franchise document signed with the franchisees, under clause 28(1)(a), the grantee shall provide the commissioner information relating to records kept by the grantee in respect of the bus service in accordance with schedule 2 to the franchise.

Under that schedule 2, item (l), we have stipulated in the franchise that the grantee shall provide records and information on, inter alia, the percentage of bus drivers selected on the sample size as specified by C for T in compliance with the guidelines on

arrangements in relation to working hours and rest time of bus drivers issued by C for T after consultation with the grantee.

CHAIRMAN: Before you go on any further, forgive me for interrupting -- Mr Duncan, may we see one of these franchise clause 28(1)(a) so we can follow this?

MR DUNCAN: Certainly. The franchise, Mr Chairman, is at THB-2 at page 137.

CHAIRMAN: Thank you.

MR DUNCAN: And I believe Ms Chan is referring to page 169.

CHAIRMAN: She referred first of all to clause 28, subsection (1), that's page 158, is it not? And schedule 2 is at 168.

Yes, Ms Chan, if that helps you with your explanation.

MS MABLE CHAN: Thank you, Chairman.

MR DUNCAN: I don't want to get into a legal debate, but that seems to be a requirement to produce records?

MS MABLE CHAN: Yes.

MR DUNCAN: As opposed to a requirement to keep to the guidelines?

MS MABLE CHAN: Absolutely. I'm not a legal expert on that, but I'm trying to explain how we would make use of the provision.

MR DUNCAN: Yes, in a practical sense.

MS MABLE CHAN: In a practical sense, I would see that the commissioner should exercise my authority to ensure that the bus operators do the checking and submit data according to the sample size and specify the commissioner according to item (l) of schedule 2 to the franchise.

So, in this respect, should we find that the bus operators cannot provide the information pursuant to this requirement, and should that lead us to any suspicion or cast doubt on whether the franchisees are providing proper and efficient service, we would also undertake necessary action, follow-up action, with the bus operators.

MR DUNCAN: So you gain flexibility on the one hand. On the other hand, it would appear that you may lose the force of a regulation providing for an offence, or action under section 12A, namely the imposition of a financial penalty.

MS MABLE CHAN: I would say that it does not constitute a statutory requirement as such in case of any failure of the bus operator in compliance with the guideline that leads to a strict triggering of the relevant clause, ie section 22, in regard of the imposition of the financial penalty.

But I would ride on the relevant item (l) in

schedule 2 to ensure that the bus franchise operators are providing the information as required, and we would also do independent checking on the data provided, and then will take that into account in assessing whether a bus operator is providing proper and efficient service.

MR DUNCAN: Could we turn to the ordinance itself, which I think is in the bundle that you may have in front of you now. This is at page 104. This is the reference to the forward planning programme.

Do you see section 12A?

MS MABLE CHAN: Yes.

MR DUNCAN: Can I ask you this. To what extent does the department require bus operators to include detailed safety provisions in the forward planning programme?

MS MABLE CHAN: The forward planning programme flows from the legal backing in the law. The forward planning programme serves as a planning tool and it covers, by and large, the service aspects of the bus operators in fulfilling the requirement under the franchise.

I think we have provided the committee, in our bundle, a contents page of the forward planning programme. As one of the chapters in the forward planning programme, there is a chapter on bus safety. This actually arises from the past experience of the

analysis of bus accidents involving franchised buses and our discussions with the franchised bus operators on important aspects to ensure bus safety.

CHAIRMAN: If you just pause there for a moment, I think an attempt is being made to put up this contents page which does have, as you say, in the index, references to bus safety, I think it's called. Perhaps we could have that on the screen.

Is this not something that comes from a letter sent to Citybus by the Transport Department?

Mr Duncan, where do we find the latest written submissions from the Transport Department?

MR DUNCAN: I think the document Mr Chairman is looking for is TD-4/1038. TD-4/1035, I believe.

CHAIRMAN: What I had in mind was what was sent to the bus operators, saying, "For your forward planning programme, please address the following matters." Is this the document?

MR DUNCAN: No. What I'm looking at is the document referred to by Ms Chan, which is the index document, indicating what was expected to be found in the forward planning programme document, the converse.

Could we go to TD-4 at page 1035. This is the contents page, is it not, that you were referring to?

And if you look at page 1038, there's a heading,

"Bus safety". That's what you're referring to?

MS MABLE CHAN: Yes.

MR DUNCAN: Thank you. Now, you have not yet provided the committee with the report itself and the programme itself, you say for commercial confidential reasons.

Would there be any problem in your supplying that section which deals just with safety?

MS MABLE CHAN: We can certainly take that up and make sure that we can get the consent from the bus company on that part.

CHAIRMAN: Before we go ahead, Mr Duncan, let's take this step by step so that this can be followed by others who are not aware of what you are talking about.

Could we go to the submission where we have the passage that you just have in mind about the inability to furnish this material.

I'm looking at the document that was made available to me on Friday and it wasn't paginated but it's in the appendix at paragraph 22. Item 22, paragraph 34(a):

"All FB operators provided the TD a five-year plan. As the five-year plan contains commercially sensitive information of individual FB operators ...", and so on.

Do you have what I have in mind?

MR DUNCAN: Yes. That's actually been tabulated now. It's TD-1 at 164.

CHAIRMAN: Thank you.

Because this is what your question is aimed at, is it not?

MR DUNCAN: It is indeed.

If I could just remind you, Ms Chan, of the response of the department:

"As the five-year plan contains commercially sensitive information of individual FB operators, the FB operators agree to disclose the information to the IRC provided that prior agreement from IRC is obtained for not disclosing the information to the public."

All the committee will need is that portion -- for present purposes, anyway -- of the programme which is concerned with safety.

If I could ask you again, perhaps overnight, to try and speak to the bus operators, gain their consent to that part of the programme being provided to the committee.

MS MABLE CHAN: Yes. The basis of our response to the committee as highlighted on the screen now is we have sought the bus operators' view on the disclosure of their five-year plan and it's not made on the basis of just an extract of the relevant chapter. But knowing what the senior counsel has just asked me, we will certainly take that up and ask the operator again, to

seek their consent and see whether that particular chapter on bus safety can be provided to the committee.

CHAIRMAN: That's a matter we will take up directly with the bus companies.

MR DUNCAN: I think I can still ask this, though, if I may.

Could you look at TD-5, page 1599.

This is the index for the five-year forward planning programme for the New Lantao Bus company, one of the five franchisees.

If you turn the page to 1600, we have the contents page there. Do you see the contents page?

MS MABLE CHAN: Yes.

MR DUNCAN: There is no reference to the topic of safety there, for that particular company.

So my question is this, and I think you can answer this perhaps even though we are awaiting the full details. To what extent does the department require the franchisee to include in the forward planning programme details as to safety requirements?

MS MABLE CHAN: Actually, regarding this contents page, the bus safety is covered in part 1, "Route development programme".

MR DUNCAN: It's part of that, is it?

MS MABLE CHAN: Yes, it's part of the route development programme.

MR DUNCAN: So could you answer my question, perhaps a bit more directly: what details does the department require of the bus franchisees with regard to safety requirements in the context of this programme?

MS MABLE CHAN: Perhaps I will invite Ms Lee to give the details.

MS MACELLA LEE: Thank you, Chairman.

The preparation of the forward planning programme is a requirement under the PBSO, and in the PBSO there's a schedule setting out the content which the bus company must provide. So you can see from the law that it is emphasised on the route development programme, on the buses, purchasing and scrapping programmes, maintenance facilities, et cetera. Of course, at the last item, it mentions about other materials that C for T considers appropriate, and other matters that C for T may specify.

Some years ago -- just now my colleagues already said that we have analysed accident data, et cetera, and we find, actually, when we do this annual exercise, we look at the trends of the accident data and we found that it's good that we require the bus companies to provide a chapter -- not a chapter -- provide in the FPP their own analysis of traffic accidents and tell us what improvement measures that were made. It is in this context and for this purpose we asked them to include in

the FPP, and since then it is included.

So now, for submission of this FPP every year, the bus companies will include an analysis of data, of their own accident statistics, and then tell us their proposed improvement measures. This is the background.

Of course, there are others that we added over the years. For example, because of the public aspiration for using more environmentally friendly buses, we added a chapter about environmental initiatives. So we have an environmental initiative that is outside -- I mean using the last item about "Other matters". This is the way that we add. And the commissioner has just mentioned that the bus companies also voluntarily make some performance indicators and targets. Some of them are on safety and some of them are on training.

This is the way that we deal with the forward planning programme. Thank you.

MR DUNCAN: Just before I leave this topic, it would be very helpful if you made contact with the bus companies this evening to obtain that safety information, so that we could ask you questions about it tomorrow. We don't want to wait until the bus companies come.

MS MACELLA LEE: Thank you. We can do that.

CHAIRMAN: Before you leave the topic, the matter is addressed in the some of the other five-year plan

material that's in the bundle. That is TD-5 at page 1602. We see "Forward planning", where "Bus safety" is section 5; do you have that? We see "Bus safety" is item 5 at page 1604.

Then we have the five-year plan for Long Win Bus, and we have more detail here because at 1607 we see a chapter dealing with safety review.

There are eight items there in "Safety review" -- are all of those items addressing requests that were made by the Transport Department of the bus company?

MS MABLE CHAN: I would try to answer this. As a statutory requirement or the franchise requirement, we do not specify specific requirement on training or on specific measures to be taken. That said, as an ongoing monitoring and discussions with franchised bus operators to assess their performance on an annual basis and also on top of the road safety quarterly review, we have asked the bus companies to include in their forward planning programme a safety chapter, to analyse their own accident data, and also to provide their improvement measures in bus operation.

Those improvement measures relate to vehicle safety, bus maintenance, as well as the measures taken to address drivers' behaviour, driving behaviour, and also training.

CHAIRMAN: Yes. Thank you.

MR DUNCAN: Moving on to the point about training. You have said I think a couple of times now that there is no specific requirement in the franchise document, nor do I think you say it anywhere else, that contains any particular requirement of the department with regard to what the actual training should be.

Is that a correct understanding?

MS MABLE CHAN: Yes.

MR DUNCAN: So do I take it that the department has not issued any particular directives to any of the franchisees as to how they should conduct their training?

MS MABLE CHAN: No, we did not issue any directive on that.

MR DUNCAN: So that's a matter left entirely to the bus companies?

MS MABLE CHAN: Yes.

MR DUNCAN: Does it vary then from one bus company to the next?

MS MABLE CHAN: Based on the information they provide in the context of bus safety and also training on bus captains in the forward planning programme, we have gathered that in terms of the arrangements for new recruits, in-service bus captains and also refresher course, remedial course, basically in terms of the contents,

they are the same.

But the duration of the individual training courses and modules may vary. So, in very specific terms, all the bus companies provide training for the new recruits. For the in-service bus captains, they provide training once every three years, and actually these are all which the bus operators have pledged to do so.

For those drivers which have been absent from the driving duties for a long period of time, they will provide refresher course or remedial courses for the drivers before they are taking up the driving duties again.

In terms of the refresher course, we know that, except one operator which does not provide refresher course for part-time captains, all the other bus operators provide refresher course for the part-time bus captains.

It is actually against this background that we think that there is merit in aligning the basic requirements in terms of the contents and modules for the training to be provided to the bus captains. While noting that it may not be realistic or reasonable to stipulate the duration or the frequency of such courses to be provided, bearing in mind that operators actually vary in terms of scale and also the bus routes operated, in

terms of the manpower strength of the various bus operators.

So it is on this basis that we are developing a set of guidelines to devise a framework for the delivery of this kind of training, and we think that it is very important to have a common basis for the bus operators to perform internal monitoring and audit, to make sure that trainings are actually provided as pledged.

Thank you.

MR DUNCAN: When did you commence the development of these proposed guidelines?

MS MABLE CHAN: We have formulated our thinking on these proposals with the bus operators following the Tai Po accident in February, and the working group was formed in March. This is one of the proposals that we have noted in the first working group meeting held in March.

MR DUNCAN: So this is a matter of discussion with the bus operators at the moment?

MS MABLE CHAN: It is under discussion.

MR DUNCAN: Now, you mentioned earlier this afternoon health checks of the drivers. What is the current arrangement or directive, whatever it may be, between the department and the franchisees with regard to health checks?

MS MABLE CHAN: Perhaps on health checks I can invite Ms Kwan to elaborate on the details.

CHAIRMAN: Yes. Thank you.

MS RACHEL KWAN: Mr Chairman, before joining the service, all full-time and part-time bus drivers are required to declare their health conditions and to pass a health check, to prove that he or she is medically fit to drive buses.

The health check includes a chest examination, eyesight, hearing, diabetes, blood pressure, blood and urine test. And now, all the franchised bus operators currently require bus drivers aged 50 or above to undergo an annual health check which covers chest examination, eyesight, hearing, diabetes and blood pressure, blood and urine test.

For the bus drivers at the age of 50, 54, 57 or 60 or above, they are also required to undergo an electrocardiogram as part of their health check. Moreover, for the bus drivers who have suffered stroke or cardiovascular diseases or are on medication due to diabetes or hypertension, they are also required to declare such illnesses to their employers and undergo an electrocardiogram in their annual health check.

This is the current arrangement.

MR DUNCAN: When you say it's an arrangement, is it a requirement or is this simply an understanding that you have with the bus companies?

MS RACHEL KWAN: The health check requirement is not a direction or a requirement under the bus franchise or under the PBSO. It is a requirement made known to all bus drivers.

MR DUNCAN: How long have these arrangements been in place?

MS RACHEL KWAN: The arrangements are evolving. I remember, since 2007, the health check requirement for all bus drivers aged 50 or above to undergo annual health check started from 2007.

MR DUNCAN: There are some observations in the submissions received by the committee that it would be beneficial for the checks on respective bus captains to include test as to their suitability in coping with the stress which is involved in the task of driving a bus.

Has that been brought to the attention of the department, that sort of proposal?

CHAIRMAN: I take it, Mr Duncan, you have in mind the submissions of KMB, where this matter was dealt with specifically?

MR DUNCAN: I think it is from KMB, Mr Chairman, yes.

CHAIRMAN: It might be useful if you were to draw our attention to it.

MR DUNCAN: Okay.

Would you turn up, please, KMB-1, page 81-1.

You see the reference there to "Remedial training"?

We are looking for another reference as well, but that concept --

CHAIRMAN: If you are doing a word search, find the word "psychologist" because that's the passage I had in mind.

MR DUNCAN: Thank you, Mr Chairman.

CHAIRMAN: What I have in mind -- it's the report to the Commissioner for Transport. It's the third of the documents that was provided in the first of the submissions, and it's paragraph 38. That's at page 113.

MR DUNCAN: Do you have that, Ms Chan?

MS MABLE CHAN: Yes.

MR DUNCAN: Paragraph E, referring to "Psychological support", and this is the KMB submission:

> "A task force ... has been formed to look into enhancing the provision of emotional support for [bus captains] and frontline staff. The task force will engage a professional consultant to provide a comprehensive review of the current practice and make recommendations in areas including but not limited to recruitment, assessment on [bus captains'] emotional intelligence and stress tolerance, training, counselling and performance management. It is expected that the recommendations will be implemented phase by phase to address immediate concerns."

So is the department aware of that initiative?

MS MABLE CHAN: Thank you, senior counsel. We have not received such kind of suggestion from the KMB as such, and this is also not raised in our working group in discussing possible enhancements or alignments in the training to the offered to the bus captains.

But I can offer that in terms of training for new recruits and in-service bus captains, the bus companies have included stress handling and counselling as one of the modules in the courses for the new recruits and also the in-service bus captains. It is actually one of the topics that we will include -- that we intend to include in the future guidelines on the content framework for training to be offered. But that one does not address the point about emotional assessment for possible candidates applying for the job of bus captains.

MR DUNCAN: It could be considered, could it not, as part of any training regime which might be suggested?

MS MABLE CHAN: The suggestion to beef up the stress handling as part of the training modules was discussed in the working group, and this will be part of the topics that we will look into, in setting out possible guideline on the training framework.

But if there are any suggestions to make the emotional and stress as an assessment for new recruits, I think this will have to be carefully deliberated

amongst all bus operators. Obviously, we note that KMB, as one of the bus operators, have raised this. We will need to flag this up and discuss with other bus operators, because this will also affect their recruitment policy, particularly the manpower supply situation in the current local market.

MR DUNCAN: So do I take it that this is a new concept as far as the department is concerned?

MS MABLE CHAN: I think so, yes.

MR DUNCAN: I would like to turn to the topic of part-time drivers. It's a fact, is it not, that many of the bus companies have, over the years, engaged part-time drivers, especially in view of the manpower issue. Is that correct?

MS MABLE CHAN: The manpower issue has long been an issue of concern in bus operation. This has particularly been so with the ever-increasing public expectations on the increase and enhancement of bus services in terms of bus routes and also frequency.

While we have been trying hard to discuss with the bus operators and the local district councils on ways to review the frequency and also the service of the bus routes, the fact is that over the ten years there has been an increase in percentage of the bus routes concerned. This will also imply an increasing need for

recruiting more bus drivers to meet with the expectations of the franchise.

We are aware of this situation in our annual review and also in the board meetings, that especially in the annual review with the bus companies, we have encouraged them to look into various ways to increase the manpower supply. The Transport Department has, together with the Labour Department, helped the bus operators to stage recruitment exercises and campaigns in the various districts to help them recruit bus drivers, and we have also encouraged the bus companies to review their remuneration package so as to provide a more attractive and reasonable package to attract new blood into the industry.

MR DUNCAN: Thank you.

As far as the department is concerned, does the engagement of part-time drivers create any particular safety issues?

MS MABLE CHAN: In the past review, there is no obvious phenomenon or trend revealing that part-time bus captains is a cause for concern in contributing to franchised bus accidents.

MR DUNCAN: What checks are undertaken by the bus companies, as far as you are aware, as to what a part-time bus driver might be doing before he commences his work or

after he finishes his work?

MS MABLE CHAN: In terms of training, the bus companies are expected to provide training for the in-service bus captains, be they full-time or part-time.

MR DUNCAN: Sorry to interrupt you. I'm not concerned about training so much. I'm concerned about whether they are fresh enough to undertake the duties of a bus captain, if they are working on a part-time basis, and there is no knowledge as to what they may be doing for other parts of the same day. Is that a matter that has been considered by the department?

MS MABLE CHAN: From the Transport Department's perspective, we do not have the information as to the bus companies in monitoring the part-time captains in their driving -- in delivering their driving duty. The part-time bus captains are recruited by the bus companies as a relief, to help the bus companies meet the bus services, particularly in the hours where there are peak service demands.

So, over the years, we know that, at the present moment, the percentage of part-time bus captains ranges from 3 per cent in some companies to 31 per cent in one company, and that latter company actually has a lot of routes being operated on holidays, and that they need, in addition to their basic team members of the full-time

bus captains, it is an established practice for them to recruit part-time drivers to meet the holiday peak demands.

MR DUNCAN: Has the department conducted any analysis as to the relationship between part-time drivers and accidents, whether there's more accidents as a result of driving by part-time drivers as opposed to full-time drivers? Has that analysis been carried out?

MS MABLE CHAN: I do not have the information at hand, but perhaps we can do some research on that and then we will supply the committee with information.

MR DUNCAN: Thank you.

CHAIRMAN: Mr Duncan, hasn't one of the bus companies given us the information as far as they are concerned? That there's no incidence of a greater rate of accidents of part-time drivers?

MR DUNCAN: I'm not up to the play with that. It might have come in very late.

CHAIRMAN: If you are about to leave this topic of part-time bus drivers.

MR DUNCAN: Yes, I am.

CHAIRMAN: Perhaps I can ask you this. The question I think Mr Duncan was asking you was this. By its nature, if you are part-time in one job, bus driver, perhaps you are part-time in another job, taxi driver, truck driver,

coach driver. Does the Transport Department require the bus companies to first of all gather any information about what other jobs the part-time bus driver might have?

MS MABLE CHAN: At the present moment, we do not have such requirement on the bus operators to gather such information and support to us.

CHAIRMAN: So I take it that it follows, then, that you have no information as to what these part-time drivers might be doing in the rest of their day?

MS MABLE CHAN: No, Chairman.

CHAIRMAN: Thank you.

MR DUNCAN: Could I ask you to turn up, please, the CTB-1 file, page 26, please. This is part of the submission received by one of the bus franchisees, Citybus. At the bottom of page 26, there's reference to "New technological aids". Do you see that?

MS MABLE CHAN: Yes.

MR DUNCAN: If I quote from page 26, at the bottom:

"We plan to include the following features on new buses for delivery from June 2019 onward".

And there's a series of headings, "Electronic stability control", "Dynamic stability control, "Roll-over prevention", "Active speed limiting system".

I wonder if I could ask you this. Does the

department itself conduct any research, locally or overseas or with bus companies, whatever, with regard to what new technology or what new safety aids may be coming into the system and which could be considered for improving safety requirements? Does the department itself conduct that sort of research?

MS MABLE CHAN: Perhaps I can invite Mr Chan, who oversees the vehicle licensing and hardware, to advise on that.

CHAIRMAN: Yes.

MR YK CHAN: Thank you, Chairman.

The Transport Department is always mindful of having new technology applied in buses, particularly those that can make the operation of buses safer.

Of course, there are ways of doing it. You can do it in-house or you can do it in collaboration with bus companies. To us, I think we will always take the path that -- I think it's more useful actually to work with the bus companies, because they actually do the operations and actually have different types of buses to actually test out all this equipment, which is whether they are suitable for the type of buses they operate.

So, for us, your question is we always look out for improvements, and if there's any particular equipment that could be useful, then we will bring this up to discuss with the bus companies, to see whether there is

any way we can ask the bus company to try them out and discuss with the vehicle manufacturers.

MR DUNCAN: Thank you. When you say you look out, where do you look?

MR YK CHAN: There are always developments search on the web and our engineers actually do it quite often, doing the web search, and also we have magazines. We do subscribe to magazines of equipment and we try to read them and see whether there are things that are worthwhile taking or trying out with bus companies.

MR DUNCAN: Do you have any contact with your counterparts overseas, regulators in other countries, in this context?

MR YK CHAN: Not regularly, but from time to time, if we want to do some research on equipment, we try to contact our counterparts in different countries, particularly in Singapore, UK, Japan, all these kind of Western countries. But of course we don't have sort of regular contact with them.

MR DUNCAN: The ASLS system referred to here by Citybus, was that something which was identified by them or was it identified by the department?

MR YK CHAN: I think this is something that was identified by them, but from the description of it, I think this is something like the system we talk about, the ESC, the

electronic stability control.

CHAIRMAN: I think ASLS is an active speed limiter, as opposed to a passive one.

MR YK CHAN: Okay. So this is another initiative that we are also discussing with bus companies concurrently. This is the features that on top of the current speed limiters which cap the speed at 70 kph at the moment, but we do need more functions when it's going downhill, to cap the bus to run on 70 kph.

What I think Citybus mentioned, talking about, is something like similar equipment but with a different name.

MR DUNCAN: Currently, the speed limiter comes in at 70 kilometres per hour, I think. Is there any provision to limit the speed of a bus --

MR YK CHAN: Yes.

MR DUNCAN: -- going, say, 60 kilometres per hour in a 50 kilometre zone?

MR YK CHAN: A bus going 60 kph in a 50 kph zone is speeding.

MR DUNCAN: Yes. Is there any way of limiting the bus in that respect? Is there any technology available?

MR YK CHAN: This is something that people are talking about, if you can have something automatic GPS system, coupled with the operation of a limiter like this, and

also the base map, that have charted out the whole area, and with the speed limit imposed on, yes, theoretically, you can do that.

But we have also touched base and discussed with bus operators on this, and the consensus is, yes, theoretically it can be done, but in the Hong Kong environment, the application of the GPS signal may have problems in areas, because the signals may be blocked out by skyscrapers.

So this is something that we are still asking the bus companies to explore, and hopefully one day, hopefully not too long in the distant future, you can adopt it as a safety measure, a safety device, which is reliable and functional.

At this point in time, probably they are still experimenting or exploring it.

CHAIRMAN: Is this system called geo-fencing?

MR YK CHAN: Yes.

MS MABLE CHAN: Chairman, can I add that --

CHAIRMAN: Yes.

MS MABLE CHAN: -- actually, these items as flagged up by Citybus are part of those items that we have included in the discussing under the Working Group on Enhancement of Bus Safety.

CHAIRMAN: Yes.

MS MABLE CHAN: While we note that there may be proposals from the bus companies on new devices and technology advancements, we would discuss with them very thoroughly on the technical feasibility, on the safety application, and also on how it could be put in a context of local franchised bus operation.

So we have actually covered this in our Working Group on Bus Safety Enhancement and will continue to look into that.

CHAIRMAN: May I come back to a question Mr Duncan asked earlier and I don't think he got an answer. Who has identified and suggested these various technical devices to be discussed in the working group? Was that done by the bus companies or by the Transport Department, or by both?

MS MABLE CHAN: Chairman, we have, in the first meeting, flagged up a number of possible devices and technology for discussion with the bus operators. The ideas could be suggested by various parties over the years, but it is the Transport Department to put out a paper to discuss with the bus operators on possible technology or devices to be discussed under that context.

CHAIRMAN: Who invited the bus manufacturers to be parties to the working group?

MS MABLE CHAN: The Transport Department.

CHAIRMAN: Thank you.

MR DUNCAN: Sorry, did you wish to add to that?

MR YK CHAN: That's all.

MR DUNCAN: I was going to ask you this. The geo-fencing to which the chairman referred, in what jurisdictions is that functioning, do you know?

MR YK CHAN: You mean currently in the world?

MR DUNCAN: Yes.

MR YK CHAN: We don't have this information in hand. Actually, I think this technology -- by concept, it may not be new, but in actual applications or actual formal application in other parts of the world, we don't have any information on that.

But from my information, I gather from the transport operators in Hong Kong, they are actually running this sort of management system, which you can check -- even now, they can check the buses on the computer utilising the GPS system, which partly nowadays people can find out where they are and has estimated arrival time from the application today.

One thing they do inside, internally, is to sort of mark out certain roads that they consider sensitive, or say they should be operating more safely, and they actually can find out whether those buses are operating above the speed limit. That is something very similar

to geo-fencing, but I think at the moment, for them, it's not entirely accurate. But this is something that they might think about and are testing out, whether it will be applicable in the future.

To answer your question, I don't know anybody actually formally adopting -- using the geo-fencing successfully, but of course we are now all working towards this goal.

MR DUNCAN: What you've just described would tell you what the bus is doing, but it wouldn't necessarily stop the problem, if there's a problem. What I'm trying to explore with you is whether the geo-fencing would actually provide a measure equivalent to the speed limiter over 70, if the bus was going more than 50 in a 50 zone.

MS MABLE CHAN: As Mr Chan just supplemented, it appears that the application of this kind of technology is more for fleet management and for tracking of buses or other vehicles over a territory. As to whether this technology can be further applied as to limit the speed or retard the speed, and prohibit the bus driver in speeding beyond 70 or even 50 in some cases, we don't have the information on successful experience overseas.

We do recollect that some individual bus operators have cautioned that with the availability of technology

and driver-assisted devices, we should bear in mind that we should not go to the point that the bus drivers rely fully on such kind of devices, to the extent that they are being so accustomed to the device and they do not exert extra care or personal judgment in certain critical situations. This is one thing the bus operators have flagged up in examining the technical feasibility of any technology and devices.

MR DUNCAN: Yes, I understand, but just for the avoidance of any doubt, is the possibility of a speed limit within the geo-fencing system on the table for discussion?

MS MABLE CHAN: It is on the table for discussion.

CHAIRMAN: Mr Duncan, I see we have reached 4.30. If that a convenient moment or not an inconvenient moment?

MR DUNCAN: Yes, it is.

CHAIRMAN: Ms Chan and the rest of your team, we are going to adjourn our proceedings for the day now, and as you were invited earlier to make yourself available for tomorrow and you have kindly done so, may I invite all of you to come back at 10 o'clock tomorrow to continue with your testimony.

MS MABLE CHAN: Thank you.

CHAIRMAN: Thank you. 10 o'clock tomorrow.

(4.32 pm)

(The hearing adjourned until 10.00 am the following day)

香港專營巴士服務獨立檢討委員會

日期 ： 2018 年 5 月 7 日

時間 ： 上午 10 時 07 分

主席 ： Hon Mr Justice Michael Lunn（倫明高）

委員 ： 歐陽伯權先生

： 羅康錦教授

代表大律師 ： Peter N. Duncan（鄧樂勤）資深大律師，
黃佩琪大律師及陳政龍大律師，由高露雲律師行委聘，
代表香港專營巴士服務獨立檢討委員會

出席人士 ： 黎以德先生，運輸及房屋局常任秘書長 （運輸）

蔡傑銘先生，運輸及房屋局副秘書長 （運輸）2

葉倩菁女士，運輸及房屋局首席助理秘書長 （運輸）1

陳美寶女士，運輸署署長

李萃珍女士，副署長／公共運輸事務及管理

陳英傑先生，助理署長／行政及牌照

關翠蘭女士，助理署長／特別職務

邱國鼎先生，總工程師／道路安全及標準研究

李美鳳女士，總運輸主任／特別職務

以下內容乃數碼錄音謄本

主席：（經傳譯員）香港專營巴士服務獨立檢討委員會係由行政長官成立嘅，當時係 2018 年 3 月 13 號，佢嘅職能範圍而家已經係打咗上畫面，就係咁樣樣嘅。我希望大家都明白呢個係重要嘅，所以我就係將佢讀出，讓大家明白。從安全角度而言，鑑於香港專營巴士涉及 2018 年 2 月 10 號發生嘅致命意外以及其他近期發生嘅嚴重事故：

（一） 審視巴士專營權喺現行法律專營權同埋其他合約規定下嘅運作同埋管

Transcript by Epiq Hong Kong, Limited

理模式；

（二） 審視現行對專營巴士嘅監管及監察制度；以及

（三） 就上述事宜向行政長官提出與安全相關嘅建議，以維持香港嘅專營巴士服務安全可靠。

我哋係可以邀請相關人士同埋公眾人士就上述嘅事宜提交意見書，亦都會盡力就係希望儘量可以喺九個月之內提交我哋嘅報告。關於有關 2018 年 2 月 10 號致命意外呢件事件嘅成因同埋所涉及人事嘅法律責任呢啲事宜會由警方進行調查，佢哋係唔屬於委員會嘅職權範圍。所以我哋委員會嘅責任就係要獲取一啲資訊，首先就係關於巴士專營權佢嘅運作同埋管理；第二，亦都要睇下專營巴士嘅監管同埋監察制度。最重要嘅就係我哋最終個目標，委員會最終嘅目標就係向行政長官提出建議，而係同安全相關嘅，希望係維持香港嘅專營巴士服務安全可靠。委員會希望一直都會聚焦，係達致呢一個目標。

重要嘅亦都係下面嘅一項事宜，有關呢一個意外嘅成因同埋係相關人士佢嘅法律責任，即係我係指 2018 年 2 月 10 號大埔道呢一宗意外，呢啲事宜就唔屬於我哋專責委員會嘅職權範圍裏面嘅。當然，呢個另行係由警方進行調查嘅。喺 2018 年 3 月 28 號，我哋開始我哋嘅工作，喺嗰一日我哋就係發出咗一項邀請，係向公眾人士邀請嘅，係相關嘅團體以及大埔交通意外死難者嘅家屬，以及係近期其他嚴重事件嘅相關人士。我哋邀請佢哋就係向我哋提交意見書，我哋今日係見到有一啲傷者同埋死難者佢哋嘅家屬，佢哋今日係到場嘅，佢哋係喺大埔道嘅交通意外裏面受傷或者死亡。

喺 3 月 28 號，我哋發出函件係畀嗰啲指名嘅團體，要求佢哋或者係邀請佢哋就係向我哋委員會提交意見書，呢個係關乎我哋嘅職權範圍裏面嘅事宜。我哋亦都係曾經同佢哋有函件嘅來往，咁就喺我哋嘅附件嗰度，喺我哋函件嘅附件嗰度列出啲問題嘅。喺嗰啲指名團體裏面，我哋希望佢哋就係有一啲回應，其中包括就係運房局、運輸署、五間專營公司同埋係不少於十六個公會，佢哋都係專營巴士公司嘅公會、立法會交通事務委員會，以及道路交通安全委員會以及其他嘅團體。之後，我哋係寫信畀警務處處長，要求警方嗰方面提交書面意見書，同埋同我哋講一講就係喺我哋函件裏面，附件裏面所列出嘅問題，請佢哋回應。

喺 4 月份，我哋得到好多意見書，書面嘅意見書，係嚟自運房局同埋運輸署嘅，同埋係五間專營公司，以及係代表各個公會佢哋提交上嚟嘅意見書，都係非常有用嘅資料。喺 4 月 27 號，我哋檢討委員會係請運房局以及運輸署係作進一步嘅書面陳述嚟到回應我哋係鑑別出嘅某一啲事項或者問題。喺 5 月 3 號，我哋委員會係邀請運輸及房屋局以及運輸署就係話畀我哋聽，係有邊一位做佢哋嘅代表，喺今日同聽日嘅聽證會嗰度作呢個口述證供。我哋今日好高興係有運輸及房屋局常任秘書長（運輸）黎以德先生同埋佢兩位同事蔡傑銘先生同埋葉倩菁女士，佢哋都係代表運輸及房屋局嘅。稍後我哋亦都會係介紹同埋歡迎運輸署嘅代表，佢哋總共係有六位代表出席協助委員會。我哋委員會亦都感謝局同埋署同埋

Transcript by Epiq Hong Kong, Limited

其他團體就係上嚟畀口述證供我哋，感謝佢哋今日上嚟協助我哋嘅工作。

喺 5 月 4 號，我哋委員會係請所有五間專營權公司作進一步嘅陳述，嚟到回應我哋提出嘅一啲事項同埋問題。喺同一日，我哋接到運房局同埋運輸署畀我哋進一步嘅陳述，我哋而家就等緊警務處處長嘅書面陳述，我哋明白相關各位係畀佢哋回應嘅時間係好短嘅。當然，佢哋亦都受到好大嘅壓力，就係要提供我哋所要求嘅資訊，呢點我哋係明白嘅。喺今年嘅 5 月 4 號、5 月 5 號，檢討委員會我哋就係將文件編碼同埋將佢上載咗去我哋嘅網站，呢啲都係各方交畀我哋嘅陳述書，呢啲都係讓大家可以如果有需要嘅話，去取覽嘅。

最後，當我哋開始進行呢一個聽證會之前，我哋有一點好重要嘅，就係要理解成立呢一個委員會個背後嘅慘劇。呢個慘劇當中，就係喺大埔道嘅巴士意外，2018 年 2 月 10 號，導致到十九人死亡。我哋亦都明白死者家屬嘅哀痛，仲有喺近來一啲專營巴士嘅意外當中嘅死難者嘅家屬，希望大家而家起立去默哀。唔該。

喺一開始，我首先會邀請鄧樂勤資深大律師，佢就係協助呢個委員會嘅代表大律師，請佢開場發言。

MR DUNCAN：（經傳譯員）主席，唔該晒。蔡先生、黎先生、葉女士，多謝你哋今朝嚟到聽證會，亦都好多謝你提供咗書面嘅陳詞，而家請你去到個檯前面就座。剛才主席先生已經提到，曾經係發信件邀請運房局今日就作一個嘅口頭取證，除咗之前已經向檢討委員會提交過書面陳詞之外，今朝早亦都係有律師代表，通常如果有律師代表就會係引導你點樣做一個口頭證供嘅，希望亦都畀呢個機會就睇下你會唔會想做一個口頭嘅陳詞先。

黎以德先生：（經傳譯員）可以。主席、委員，早晨。多謝你邀請運房局嚟到呢一個聽證會，亦都有機會講一個開場白。我首先想代表運房局局長去講以下嘅說話，局長一向都希望係親身能夠嚟到呢一個獨立檢討委員會，但係喺訂定呢個聽證會時間表之前，其實局長已經係承諾咗喺立法會出席一個會議，其實呢一刻局長係出席緊一地兩檢嗰個嘅法案委員會，即係呢一個委員會就係關於喺西九龍高鐵總站一地兩檢嘅安排，所以首先要同委員會道歉，佢冇辦法今日出席呢個聽證會。

主席，香港嘅公共交通系統係有兩個特色，比起全球各地有呢兩個特色，咁亦都可以作為一個背景資料畀委員會參考。

第一個特色，香港嘅公共交通系統係有好高嘅載客量嘅，去滿足乘客嘅要求。我哋基本嘅公共交通政策就係可以咁講嘅，公共交通係作為交通嘅主要工具，我哋係以鐵路為骨幹，亦都容許我用中文去再強調呢一個嘅政策，因為喺本地，公眾都係好明白，「公交為主，鐵路為骨幹」。喺每日，乘客搭嘅交通工具超過百分之九十，即係話 1,200 萬乘客人次都係用公共交通工具嘅。據我哋所知，全球嚟講係最高嘅載客率，有百分之三十九係重型鐵路，百分之三十一係專營巴士，百分之十四係公共小巴士，百分之七的士，百分之四輕鐵，而其他嘅交通模式就佔其餘嘅百分之五。用另外一個角度睇，日常嚟講，專營巴士每日載客

量係 400 萬嘅。

第二個特色就係同其他國家唔同嘅，喺香港嘅公共交通模式，包括專營巴士，係由私營嘅公司營運，係根據審慎嘅商業理財原則，一般嚟講，係冇政府直接資助。呢個亦都反映政府整體嚟講，當年呢一個諗法都係用私營嘅方式營運公共交通，就可以確保有競爭性同埋有效率。其他嘅公共交通營運者都唔係一般嘅經營者嚟嘅，佢哋都係要受到政府嘅規管、監察同埋監管嘅，譬如話喺車費方面、服務水平、班次同埋係要確保安全。

喺呢方面，政府有兩個角色，作為決策局，政府係制訂政策，亦都喺法例入面反映，譬如話仲有係專營權同埋其他合約嘅協議。喺呢個過程當中，政府有時要平衡各方利益嘅，譬如話專營公司嘅利益、其他交通工具嘅營運者、公眾、政客等等。立法會亦都有一個重要角色嘅，尤其係如果要引入法例或者修改法例，需要更多嘅財政資源等等。

政府另外一個角色就係一個規管角色，去確保專營巴士公司嘅營運者係可以符合到專營權入面嘅內容同埋係合約嘅內容。而有關呢個規管架構喺個政策上都係與時並進，有時都係因為公眾嘅期望係唔同咗，又或者係科技嘅發展，又或者係營運者佢個營運模式改變，所以政策亦都可能係因為某啲事件而有改變嘅。

但係多年嚟，我哋一直致力都係強調呢個大原則，就係專營巴士公司嘅營運者必須要提供適當而有效率嘅巴士服務，呢一個要求，即係要提供適當而有效率嘅巴士服務，呢個係喺 1975 年訂立嘅《公共巴士服務條例》入面指出嘅。當考慮到底呢一個服務係唔係適當嘅時候，安全就係喺我哋運輸政策入面至為重要，呢一樣嘢亦都係各個公眾文件嗰度可以見到嘅。譬如喺 2016 年嘅報告，喺個年報入面就係話政策嘅目標就要提供安全、有效率、可靠同埋環保嘅運輸工具。而喺運房局嘅運輸嗰方面嘅觀察人員報告，即係今年 2018 及 19 年財政年度入面，亦都係話其中一個運輸科喺陸上運輸嗰方面嘅目標就係要推廣道路安全，而運房局個政策其中一點亦都係推廣安全嘅，我意思即係話係乘客嘅安全。

另外，道路安全議會係喺 1973 年成立，亦都係推廣喺香港嘅道路安全，我哋有唔同嘅推廣活動，咁多年嚟都係由道路安全議會提出嘅。譬如道路安全議會都係支持運輸署一啲嘅活動，譬如係「至 fit 安全駕駛運動」，呢一個運動係每年都會舉行嘅，目的就係提高商業司機安全駕駛嘅標準同埋佢哋嘅健康，亦都包括專營巴士嘅司機。有好多節目，包括電話節目、健康檢查，同埋係有啲意見畀商業司機，亦都都有一啲嘅大使。

有關嘅安全標準可以大概分為向外型、向內型同埋呢個過程嘅安全嘅，可以舉幾個例子：意外率，譬如話以行車公里計算嘅涉及意外率；顧客嘅滿意率，譬如話係收到幾多乘客嘅投訴，同埋係調查咗幾多位乘客；有冇一啲新嘅巴士嘅型號，同埋一啲突擊檢查，有啲必須要安裝嘅巴士嘅儀器，譬如係話限速器同埋

Transcript by Epiq Hong Kong, Limited

個黑盒；車長牌照方面有冇符合批准，同埋係車長嘅工作同埋休息時間。呢啲嘅標準亦都一樣與時並進，因為隨住時日改變，公眾嘅期望亦都可能唔同。

我亦都可以舉個例子，有關於車長工作、休息同埋用膳時間指引，就首先喺 1998 年引入，然後經過幾次修訂，最近一次修訂就係今年年頭，2018 年嘅時候。仲有兩三個例子，譬如安裝限速器同埋黑盒，呢個係因為喺 2003 年一次致命嘅意外之後要求嘅。另外，就係喺落客嘅車門嗰度，喺 2016 年嘅意外之後，就裝咗一個橫向嘅護欄。另外，巴士亦都要符合法定嘅排放標準。

至於整體香港嘅道路安全方面，牽涉專營巴士嘅意外率，過去五年其實個數字都係穩定嘅，平均大概每年 2,200 宗，呢個係相比起香港整體嘅交通意外數字，平均就係一萬六千多宗。專營巴士涉及意外嘅比率其實係輕微下降嘅，由 2,092 宗，呢個係 2013 年嘅時候，咁到 2017 年，個數字係 2,187 宗，但係同時間專營巴士嘅數目亦都上升咗百分之三點三，每百萬行車公里嘅意外涉及率對於專營巴士嚟講，過去幾年亦都係維持穩定。

主席，或者我都要提到，專營巴士係以專營嘅方式去營運—專營權。呢一個比起政府直接提供嘅服務係唔同嘅，亦都同純粹商業運作唔同嘅，專營權就係由政府批與一個公司，而呢個公司就必須要符合喺法例入面提出嘅所有要求，專營權條約入面嘅要求等等。規管當局就會喺一個較廣、較高嘅層面去監管公司嘅運作，有制衡嘅機制，可以話整體嚟講，係一個質管控制去確保專營嘅巴士公司佢哋係能夠提供有關嘅服務。其中一個例子就係每日對於行走中嘅巴士，我哋有突擊嘅檢查，同時每日嘅表現方面，主要嘅責任就係由專營巴士公司去提供服務同埋達至要求。一般嚟講，專營公司係應該有呢個成熟程度，有呢一個資源同埋有呢個能力去提供服務，而唔需要每一個細節每日都需要由政府去看管。

主席，最後想提嘅一點係咁樣樣嘅，我哋係盡一切嘅努力，恒久咁樣去做，政府係致力改善專營巴士嘅安全。我哋亦都完全明白總係有足以改善嘅地方，我哋不斷去尋求方法嚟到將安排嘅水平將佢再提升，任何嘅建議或者意見嚟自各方嘅人士，其實我哋都係衷心咁樣去觀迎嘅。主席先生，我作嘅開場白就係到此為止，我本人同埋我兩位同事都樂意回答大家嘅問題。

主席：（經傳譯員）唔該晒你，黎先生。讓我代表委員會，我哋知道局長係需要去立法會嘅，知道佢係需要出席，不過鑑於就係咁趕急，所以我哋委員會覺得都應該係縱使佢無法出席，就係都要開始我哋嘅工作，不過亦都感謝佢係作出致歉。係，鄧大律師。

MR DUNCAN：（經傳譯員）黎先生，多謝你嘅發言。有幾樣嘢我就係想同局方探討一下嘅。或者我未開始之前，或者咁，我就想係表明一點，你喺書面陳述書嗰度係提過嘅。你話其實局係一方，以及署係另一方，兩者就喺個責任上面係有一個區別。你哋有咁講過嘅，就話局方負責制訂政策，同埋就係建議一啲提議嘅。至於運輸署嗰個責任就係去執行呢一啲政策，落實呢啲政策，同埋就係去執法嘅。我明白兩者係有個分別嘅，因此，今朝我向你提出嘅問題，我儘量去就係集中喺

你哋嗰個角色嘅。當然，我知道今日稍後亦都會有運輸署嘅代表上嚟，我哋亦都會向佢哋提出相關嘅問題。

其實咁，不如我先講一講我哋嘅職權範圍，其實主席剛才已經係提過嘅。或者我就特別係想請你睇番第二項，職權範圍裏面嘅第二點，我相信你喺呢度會睇到嘅，我好似都喺度重覆緊剛才主席所講嘅。不過，我要指出就係話職權範圍係咁嘅，就係審視現行對專營巴士嘅監管及監察制度，所以我想同你探討嘅第一個事項就係咁樣樣嘅，我就係想知道目前嗰個監管制度喺幾大程度上係能夠處理到呢個安全嘅問題嘅呢？而且從你嘅書面陳述嗰度，我知道我哋嘅監管制度就包括係有關嘅條例，今朝你都提過嘅，就係《公共巴士服務條例》。另外就係有關嘅規則，而呢啲規則都係喺嗰條條例底下就係制訂嘅。仲有第三，就係嗰個專營權嘅文件，呢個就係發畀專營權公司嘅，呢個都係根據條例之下係發出嘅。

剛剛就係有人提醒我，我頭先講錯咗，唔係 430 章，係 230 章嘅。或者咁，等我係請你去睇一睇嗰個條例，我都會好快嘅，因為你應該都好熟悉嗰條條例。不如咁，我哋就係搵出嗰啲重要嘅條文，有關乎我哋呢個委員會嘅職責範圍，職權範圍嘅。我就同你睇睇嗰啲條文，然後就再幾項事宜同你係探討一下，我而家先將有關嘅條文打咗出嚟，唔知你會唔會係想睇番有關嘅文本呢？咁就係喺運房局嘅 THB-2 嗰個文件夾嘅 104 頁嗰度。

黎以德先生：（經傳譯員）係，得。

MR DUNCAN：（經傳譯員）首先，第一條條文想你睇嘅，就係條例嘅第 9 條，呢個就係讓行政長官係有權去委任不多於兩人為專營公司嘅額外董事，即係呢個係喺嗰個專營權底下嘅安排嚟嘅。

係，睇咗第 9 條之後，亦都想你揭去第 12 條，嗰度就係有一條咁嘅條文，呢度就正如黎先生剛才講過，就係話專營公司係需要提供一個適當而有效率嘅公共巴士服務。12(2)嗰度亦都係提及一點事實，就係話專營公司除非佢係按照佢嘅專營權，本條例如任何根據其專營權或者根據本條例所作出嘅指示、要求或者規定，以及任何計劃，或者係根據 16A 條作出嘅批准，以維持同埋經營，否則不可以被視為維持適當而有效率嘅嘅公共巴士服務。

仲有 12A 呢條就講及遠期嘅計劃，呢度 12A 下面嘅第(1)款就咁有咁嘅要求，就話專營公司喺每一年就係需要已備佢嘅經營計劃，係涉及之後嗰五年嘅經營計劃，咁涉及咩嘢事宜呢？其實就係要睇番嗰個附表嗰度就會講。我等一陣就會同你睇呢個附表，即係你睇番落去第(4)款嗰度。第(4)款嗰度就咁講嘅，如果有關嘅專營公司同埋運輸署署長係無法就已備計劃裏面某項事宜達成協議嘅話，咁就係需要由運房局局長去處理同埋解決。

講到嗰個附件，附件就係喺條例嘅後面嘅，咁大家可以睇番第 126 頁嘅，如果係我哋嘅文件夾。嗰度就係講及究竟計劃裏面應該有啲咩嘢內容，好詳細嘅，有啲細節嘅，由(a)至到(h)咁多項嘅。照我所知，其實喺嗰個計劃裏面，就

冇任何一樣係提及安全嘅事宜。不過，(h)嗰項似乎就係包羅萬有嘅，嗰度就係話其他事宜，不論該等事宜是否(a)至(g)段所指明者。呢個就係話要應署長嘅要求包括落去嘅。

好，我哋講番呢個條例，下一條條文，而我認為係相關嘅就係第 18 條，112 頁，嗰度就係要求專營公司備存妥當嘅紀錄，咁有各項事宜嘅。(e)嗰度就係涉及意外嘅。

跟住請睇下一條條文，就係第 22 條，114 頁。嗰度就係話行政長官會同行政會議就可以喺某一啲情況底下要求專營公司係繳付經濟罰則。呢一個就係喺第(2)款嗰度講咗嘅，就係話若果專營公司冇遵從其專營權或本條例，或沒有遵從根據其專營權或本條例作出嘅指示或規定，或者冇遵從任何計劃，或者任何根據 16A 給予嘅批准。當然，我哋剛才就係提及 12A 跟住所睇嘅附表。

另外，第 24 條，呢個就係睇 115 頁。嗰度就係有啲好犀利嘅權力，就係話如果專營公司佢唔能夠係維持一個適當而有效率嘅公共巴士服務嘅話，究竟政府當局係有啲咩嘢權力呢？呢度就係話喺極端嘅情況之下，係可以撤銷佢嗰個專營權嘅。

跟住第 35 條，請你去睇睇第 35 條，124 頁。呢度就係話運輸及房屋局局長係可以訂立規條，就一系列事宜有權訂立規例嘅，嗰度係列咗出嚟嘅。我就係想請你睇睇其中三點嘅，呢個係關乎我哋呢個委員會嘅職權範圍。首先就係：

(c) 嗰項，規管該等司機、售票員或獲授權的人在如此受僱時的行為。

(d) 一般地關於某專營公司所使用嘅巴士上嘅乘客或擬成為乘客的人的行為。

然後就係跟住嗰版，喺：

(j) 嗰點，就駕駛某專營公司所使用嘅巴士嘅司機而言，規管在本規例所指明嘅任何期間：

(i) 該公司可准許駕駛該類巴士嘅最多時數；及

(ii) 該專營公司給予該等司機休息和用茶點的相隔時間。

跟住就係第 36 條，呢個就話專營公司，即係話巴士嘅經營者，佢係獲得授權去訂立一啲附例，而(c)嗰項就係有提及，我要將佢引述出嚟，就係講到安全和有效率運作，就係該專營公司的公共巴士服務的安全和有效率運作。另外，第(3)款嗰度亦都係有一個條文，就係話如果違反咗嘅話，就會係一個屬於犯法，而且亦都可以係罰款。或者大家亦都可以睇番呢個第(2)款，就係話如果係專營公司係提出呢啲附例嘅話，都需要經過立法會嘅批准。

我剛才讀出咗一啲條文，我希望你睇番呢一啲條文嘅。當然，亦都係有嗰啲規例，由第 128 頁開始嘅，咁好快你會見到，其實係有一啲規例就已經係通過

Transcript by Epiq Hong Kong, Limited

咗，係關乎係嗰個司機嘅行為，同埋乘客喺車上面嘅行為。第 130 頁，就係第 9 條，嗰度就係關乎司機嘅行為。另外，你可以繼續落去，就係 131 頁，就係第 11 條、12、13。我知道 11 嗰條就唔係淨係司機嘅，售票員都係嘅，所以我知道今時今日其實就係都冇乜售票員，所以你就可以反映出，其實嗰個規例已經過時。132 頁，我哋有 13A，就係話乘客嘅一般行為，同埋擬成為乘客嘅人嘅一般行為。

講到嗰個監管，其實你見到條文，你見到嗰個條例同埋個規例裏面嘅條文，跟住我就想請你睇睇個專營權文件。喺呢一方面，我就係想睇番最新嗰份專營權嘅文件，嗰個係發出咗，呢個係去年向九巴發出嘅。呢份文件，你可以睇到呢個副本就係喺運房局嘅文件冊第 2 冊嘅第 137 頁。你面前見唔見到呢個文件？

黎以德先生：（經傳譯員）見到。

MR DUNCAN：（經傳譯員）睇下呢啲條文，第 1 條--其實我想睇嘅係第 7 條，其中第 141 頁睇到呢一個專營權文件入面，佢就話專營公司應該喺合理可行嘅範圍內係令到運輸署署長信納去購置、提供、維護等等，係任何安全同埋提高服務嘅裝置、設施、儀器等等，就係喺同專營公司商討之後，合理地由運輸署署長提出嘅要求，呢個就係提到喺專營公司嘅巴士上面應該安裝啲乜嘢嘅安全措施或者係儀器。

我哋睇過個條例，條例入面就講到喺專營權文件入面要求嘅嗰啲嘅要求。呢個專營權文件入面其實自己都有提到，就係喺第 1 條第(3)款，呢個係第 139 頁。我哋見到呢頁最底就係話為免呢一個混亂，除非係另有明確指明，專營公司應該係根據運輸署署長、財政司司長或者任何公務人員喺呢一個嘅專營權文件底下要求嘅任何指示或者要求嘅。

如果我哋繼續睇呢份文件，據我理解，冇一啲一般嘅權力去作出咁嘅指示同埋要求，佢講政府係喺點樣嘅情況底下係可以發出呢啲指示或者要求。我可以畀啲例子你，譬如第 141 頁，第 7 段，關於話要提供啲設施，呢個係一個好通用嘅例子，政府可以提供要求嘅。譬如話巴士站，即係第 143 頁嘅第 12 條就提到，就係話喺總站嘅時候，會提供一啲停泊設施之類之類。

我唔會逐個講，但係如果你睇到第 28 項嘅話，即係第 28 條，睇番呢份文件，你會見到就係運輸署署長需要獲提供有啲嘅資料，係由專營公司保管嘅紀錄，咁係關係喺附表二入面巴士服務。168 頁就睇到呢個附表二，呢度提到需要有啲乜嘢紀錄同埋資料係要由專營公司根據專營權文件要求提供嘅。我順帶一提，我哋覺得似乎有幾項都係同安全有關，喺專營權文件係冇明確提出嘅。因此，亦都唔會係任何指示或者要求入面會提到，其中一點就譬如係話車長嘅訓練，似乎冇任何喺個專營權文件入面係仔細講及點樣要培訓車長嘅要求，無論佢哋係已經擔任緊車長嘅工作，或者係一啲培訓新人，以便佢日後做車長嘅工作，都冇嘅。我知道政府同埋巴士公司喺培訓方面都有啲安排，但係呢啲安排

到底係咪有力呢？令到即係有人覺得係或者佢係咪合適嘅培訓呢？有人都會提出啲疑問嘅。我而家就想你請睇番個條例，我而家打算就某啲範圍問一啲問題。頭先我已經講解咗某啲條文畀你聽，而家我哋可以返番去第 124 頁，文件冊 124 頁，個條例。我想講下呢一點，第 35 條，運房局局長訂立規例嘅權力，特別我想講(j)款嘅，關於就駕駛某專營公司所使用嘅巴士司機而言，規管呢個條例所指明嘅任何時間，該司機可准許駕駛該類巴士嘅最多時數，同埋專營公司給予司機休息同埋用茶點嘅相隔時間。

第一點，我想問嘅，事實係咪咁呢？呢一個題目已經多年嚟都係有啲爭拗，一方面巴士公司同埋佢嘅僱員，又或者係公會之間都有啲爭拗，呢一點係唔係政府一段時間都知悉嘅呢？

主席：（經傳譯員）你問嘅問題係問黎先生？問黎先生，你可唔可以回應？

黎以德先生：（經傳譯員）唔該主席，唔該律師。我會咁樣形容嘅，呢個問題不時都會有人提出，即係自從引入一個指引，係所有專營巴士公司都應當遵守。或者我可以咁講，其實喺 1998 年引入之後，差唔多係一個硬性嘅指引嚟嘅，必須遵守。而十年嚟，呢個指引就係叫做一個自願意性嘅一個指引，我就會咁樣講，我哋一直致力改善，而當中亦都要考慮多種因素，包括任何改變係有冇改善呢？係咪可行呢？對於營運者嘅實際運作有冇影響呢？如果需要額外司機嘅話，佢哋點樣應付到呢？或者佢哋點樣會可以聘請同埋培訓有關嘅司機呢？同時，據我理解，巴士司機或者喺呢方面都會要求有改善嘅，都會歡迎。同一個時間亦都要關注嘅，就係佢哋嘅薪酬唔應該受到影響，即係話係減少咗咁嘅意思，所以係有一系列嘅問題都需要一併考慮。為咗完整性，我仲要提到另外一點，就係任何嘅改動對於公司狀況嘅財務影響，而呢個財務影響係應該點樣解決。

MR DUNCAN：（經傳譯員）我諗嗰個指引應該有六次嘅條訂，喺 1998 年引入之後，係咪呀？如果我記憶係冇錯嘅話。

黎以德先生：（經傳譯員）冇錯，你講得啱。1999 年、2000 年、2004 年、2007 年、2010 年，最近就係今年年頭。

MR DUNCAN：（經傳譯員）嗰啲係指引嚟嘅，條例本身就容許制訂規例嘅。喺呢一方面，點解只係以指引嘅方式而唔係以規例嘅方式實施呢？

黎以德先生：（經傳譯員）主席，回答番律師嘅問題，我其實即時亦都冇一個答案。我只能夠咁樣講，首先我都可以幾確定咁樣講，雖然呢個指引只算係一個指引性質，叫做，但係意義上係營運者要嚴格遵守嘅。我頭先亦都提到的而且確營運者都係有遵守，佢哋亦都知道運輸署會進行調查，睇下係咪有符合呢個指引。如果有任何原因，冇完全遵守呢個指引，有咁嘅情況，運輸署係會要求公司解釋嘅，而呢個營運者就會被運輸署要求提供個解釋。

至於點解冇用附屬法例方式喺規例入面包含呢樣嘢，我恐怕我都即時畀唔到個答案。我只係猜測，喺我哋整個規管制度嘅底下，我哋希望係用唔同嘅方式。

如果我哋嘗試用某一個方式，譬如話係引入指引嘅時候，都係可行，已經係運作良好嘅話，呢個亦都係能夠達到我哋目的嘅其中一個手法，我哋個目的就係要確保司機要有足夠嘅休息時間等等嘅。

主席：（經傳譯員）黎先生，你講咗兩次，你話你即時都回答唔到，你想唔想要有啲機會諗咗，再畀個書面答案呢，遲啲？

黎以德先生：（經傳譯員）主席，我呢一方面會跟進嘅，但係我都要補充，我哋講緊呢個指引係喺 1998 年初次引入嘅，我就唔係有百分百信心可以搵番當年嘅書面紀錄。不過，當然，主席，我哋好樂意返去試下嘅。

MR DUNCAN：（經傳譯員）係，你都會明白如果呢一件事係 包括咗喺個規例入面，根據職權範圍，就可以被列作一個罪行，即係話如果巴士公司冇遵守嗰個規例嘅內容嘅話，就會係犯罪。

黎以德先生：（經傳譯員）主席，正如我喺開場發言入面提到，我哋見到專營巴士公司係有需要喺運作上確保安全，我哋視為呢個係適當而有效率服務嘅其中一部分嚟嘅，或者唔當係即係有效率嗰方面，但係起碼係適當嗰方面嘅。我哋一向嘅睇法都係如果營運者係唔能夠提供安全嘅運作嘅話，無論係佢哋自行去做一啲措施，又或者係跟從任何我哋施行嘅，或甚至係政府以立法嘅方式施行嘅指示、安全嘅規則等等，如果佢哋持續係做唔到呢個要求嘅話，我哋嘅睇法就係專營公司係咪有能力提供適當嘅服務呢？我哋就會有懷疑。

MR DUNCAN：即係話我形容去到一啲極端嘅條文入面，係可以採取行動，譬如話係撤銷佢個專營權。

主席：（經傳譯員）講到撤銷，咁你可唔可以提一提我哋，就應該係搵番邊條款文呢？

MR DUNCAN：（經傳譯員）係第 24 條條例嘅第 24 條。

主席：（經傳譯員）可唔可以講番邊一頁呢？

MR DUNCAN：（經傳譯員）係 115，文件夾嘅 115 頁。呢度要跟番某一啲程序嘅，而最終嚟講，係要有行政長官會同行政會議去考慮，所以都相當繁複嘅一個程序嘅。

黎以德先生：（經傳譯員）係，主席。

主席：（經傳譯員）係。

黎以德先生：（經傳譯員）喺回答係大律師嘅問題嘅時候，我會話「係」㗎，除咗呢個撤銷專營權之外，即係可能係專營權嘅全部或者係一部分，另外亦都係有經濟罰則呢一個條文。大家可以睇番第 22 條，呢條條例嘅第 22 條。而我嘅睇法就係呢一個施加經濟罰則亦都可以應用，因為呢度就係講及就係專營公司係需要遵從嗰個專營權同埋條例。條例就講明咗就係專營公司係要提供一個適當有效率嘅服

務。

MR DUNCAN：（經傳譯員）係，喺週末嘅時候，你哋亦都提交咗進一步嘅書面嘅陳述，你哋亦都係澄清咗，就話嗰個指引就唔構成呢度所講嘅指示或規定。會唔會因此你哋就無法就係去施加嗰個經濟罰則呢，即係話第 23 條所提及嘅經濟罰則呢？或者第 22 條呢？

黎以德先生：（經傳譯員）主席先生，我本身唔係一位律師，我自己點樣去詮釋呢個第 22(2)呢？22(2)嗰度就咁講，「可以施加經濟罰則，如果沒有遵從其專營權或本條例，又或者係根據其專營權或本條例所作出嘅指示或規定，又或者係冇遵從任何嘅計劃或者係批准」，所以呢度有好多個係或乜嘢，「或」即係話有好多個選項。

其實運輸署亦都有作出過陳詞，佢就話「嗰個指引不屬於指示或者規定」。不過較早之前我係提及喺呢個 22(2)條底下，呢度就講話「本條例」，嗰個「本條例」就係指《公共巴士服務條例》。呢度就係話係經營呢個專營權嘅公司係需要維持適當而有效率嘅服務。講到適當嘅服務，我會咁樣睇嘅，就係包括咗係嗰個安全嘅要求，

MR DUNCAN：（經傳譯員）但係都唔能夠係令到政府當局就可以引用呢個第 23 條或者第 22 條個嘢？

黎以德先生：（經傳譯員）主席先生。

MR DUNCAN：（經傳譯員）對唔住，我係律師，所以其實係咪呢條題目應該留番畀律師呢？如果你純粹話因為佢冇遵從或者佢違反咗嗰個專營權或者係條例，因為佢冇維持一個適當而又有效率嘅服務，政府當局嗰個補救，就只能夠係去番嗰個撤銷嗰個條文，撤銷專營權嗰個條文。

黎以德先生：（經傳譯員）主席，我剛剛其實係想咁講，我自己唔係律師，但係我自己點樣去睇呢個第 22 條第(2)款呢？其實你咁樣睇嘅時候，應該我哋就係有咁嘅能力，就係去向行政長官會同行政會議申請，就係要求施加係經濟罰則。

因為呢度講得好清楚，就話專營公司係冇遵從本條例。講到本條例，本條例其實就係施加咗個責任畀嗰個經營者，就係話必須係維持一個適當而有效率嘅服務。適當嘅服務，我會話適當嘅服務係即係要求啲咩嘢呢？適當嘅服務就係要求你係提供一個係安全嘅服務，否則嘅話，不能視之為係適當嘅服務。

主席，正如我所講，我當然係從一個政策嘅角度去睇。其實一個咁樣嘅情況係冇出現過，未經考驗。

主席：（經傳譯員）對唔住，或者你意思係咪從來都冇施加過經濟罰則呢？

黎以德先生：（經傳譯員）主席先生，我剛才咁講意思係話，因為安全嘅事宜而引致我哋係嘗試去援引呢條條文，即係關乎經濟罰則嘅，我哋從來未試過去援引過，

所以我就話佢未經考驗，冇測試到。

MR DUNCAN：（經傳譯員）我哋咁嘅理解啱唔啱呢？即係話其實從來就冇施加過經濟罰則，而個理由即係冇話係因為呢個 22(2)款需要施加經濟罰則呢？

黎以德先生：（經傳譯員）主席先生，如果照我嘅記憶所及同埋照我嘅理解所知，就係咁樣樣。不過我好希望你畀機會我返去就係查咗，然後書面確認。不過最近應該冇，係咪呀？

MR DUNCAN：（經傳譯員）行政長官會同行政會議有冇施加過咁嘅罰則呢？

黎以德先生：（經傳譯員）主席先生，以近期嚟計，我當然--即係我就係唔知有個咁樣嘅情況，就冇嘅。即係我哋冇遇過係一啲情況而需要係援引呢條文嘅。

MR DUNCAN：（經傳譯員）我而家係想請你去睇呢個第 36 條，125 頁。文件夾嘅 125 頁，呢個就係 36 條，對唔住，係講係附例。就話專營公司就可以係訂立附例。我就想問，目前嘅現有嘅專營公司有冇制定過呢啲咁樣樣嘅附例呢？

黎以德先生：（經傳譯員）主席，我本人記得係有一啲附例係有訂立過，不過現時未必能夠講到係咪第 36 條裏面嘅每一點都係有一啲係而家執行緊嘅附例嘅。我而家係返去查一查，然後再返嚟向大家匯報。

MR DUNCAN：（經傳譯員）係，請你幫我哋手。因為我哋自己查，就係查唔到有啲咁樣專營巴士公司嘅係附例，我哋自己就查唔到。

主席：（經傳譯員）好呀，唔該你。你即係已經需要再補充嘅書面資料係不斷增加。

MR DUNCAN：（經傳譯員）我諗其他嘅係公交嘅專營--或者營運者係佢哋有附例。

黎以德先生：（經傳譯員）係呀，地鐵公司有自己嘅附例。

MR DUNCAN：（經傳譯員）因為地鐵就可以自己採取行動，因為佢係有附例，附例下面有訂明邊一啲事情係犯法，同埋有啲咩嘢罰則。譬如話如果係巴士嘅司機，係巴士嘅乘客，有冇類似嘅安排？

黎以德先生：（經傳譯員）主席先生，可以講話係，亦都可以講話唔係。我諗你剛剛提醒我，我哋有規例㗎。其實嗰度係有附例，230A 就係可以規管司機同埋乘客嘅行為，所以法例上面其實係有咁樣嘅條文。所以我要指出，其實唔係話就呢一個具體嘅課題唔係完全係一無所有㗎。

MR DUNCAN：（經傳譯員）邊一個去執行呢一啲規例呢？

黎以德先生：（經傳譯員）主席，一般嚟講，照我嘅理解就係警方就會係負責係執法。至於話有冇其他嘅權利當局係都可以負責呢，咁我要再查核一下。一般嚟講，警方係負責執法㗎。

MR DUNCAN：（經傳譯員）你會唔會覺得就係巴士公司自己去做，巴士公司自己喺

呢方面都可以執法係會更好，亦都係好嘅咩？就唔使淨係靠警方。

黎以德先生：（經傳譯員）主席，或者我--你即時問我，我即時答呢，就係可能大家都以地鐵嘅附例作為一個參考點。嗰個其實巴士公司同埋係鐵路公司佢個營運模式係相當不同，因為地鐵或者鐵路公司佢個運作係點呢，佢係一個密封嘅環境裏面嘅，一般都喺密封嘅環境裏面㗎，而且佢下面就係有好多職員作一個支援。佢哋提供支援嘅職員，一般都好快可以到場處理㗎。或者講到係執法嘅話，即係如果係乘客嘅行為有問題，而需要執行呢個附例。其實佢哋比較容易去執法，就唔使就係妨礙其他嘅乘客嘅進出。

但係巴士又唔同嘞，巴士就係現場係只係得一位巴士司機係喺度控制住嗰部巴士。如果係有啲係唔妥當嘅地方嘅話，係行走中、喺旅程中係有啲問題嘅話，咁樣樣一般嚟講，你可以諗到，其實就比較難去預期嗰個司機喺嗰度去進行執法㗎。呢個純粹係我--即係你問我，我即時嘅一個回應，呢個可能亦都係點解需要由係警務人員去執法，呢個就係現時嗰個安排。

MR DUNCAN：（經傳譯員）委員會喺嗰啲收到嘅意見書，好多人都有提及--一方面提及司機嘅行為，另一方面亦都有人提及一啲係比較粗魯或者係唔聽話嘅乘客嘅行為。我就想問嘞，究竟根據現有嘅規例，關乎司機同埋乘客嘅行為係幾多次進行過檢控呢？

黎以德先生：（經傳譯員）主席先生，畀少少時間我。

主席：（經傳譯員）或者係鄧大律師，或者你話番畀我哋聽，究竟係邊一個陳述書嗰度係有講呢，係咪九巴呢？係咪好似我諗佢哋嗰度就話係越嚟越多人，就係有咁嘅做法嘅，可唔可以話番畀我哋聽係邊一段呢？

黎以德先生：（經傳譯員）主席，或者我可以回答番律師頭先問嘅問題。根據警方嘅資料，而呢個資料其實都有公開嘅，喺 2016 年，就係我哋回覆番立法會嘅質詢。警方當時嘅意見就係話，如果係牽涉襲擊嘅事件，警方會調查，不論地點之類。但係警方就冇就住襲擊--即係對車長襲擊嘅個案數字，又或者關於乘客方面嘅數字，亦都冇去做一個統計嘅，有關嘅數字。警方當時亦都有個意見，就係話如果喺巴士上面有襲擊嘅事件，無論牽涉嘅係邊一方，除咗係倚賴法例 230A 章之外，亦都會倚賴其他嘅法例條文去恰當咁樣調查，同埋去提出檢控，亦都有幾條刑事嘅法例，警方係可以引用。

MR DUNCAN：（經傳譯員）我知道有呢啲條文，但係我想問嘅就係有幾常去提出檢控呢？

黎以德先生：（經傳譯員）主席，簡短嘅答案，根據警方，佢哋冇記錄呢啲數字。

MR DUNCAN：（經傳譯員）講番主席嘅問題，我諗頭先講到一啲參與文件，黎先生你都應該知道嘞，呢個係九巴嘅書面意見，就係喺佢哋嘅文件夾嘅第 95 頁第 35 段。

主席：（經傳譯員）或者請你讀番有關嘅部分出嚟。

MR DUNCAN：（經傳譯員）「最近有一個現象對九巴嚟講都係相當關注，就係似乎係有更多嘅事件係由乘客或者其他道路使用者對巴士嘅車長係襲擊。呢個好多時候係由日漸惡化嘅交通意外--交通擠塞，直接或者間接造成一啲嘅緊張嘅情況。我哋儘量係對於犯事者係採取法律行動，我哋亦都明白喺呢一方面嘅罰則係唔足以有阻嚇作用。」

我相信呢一段唔單只--所謂「襲擊」，唔係講緊話用武力嘅襲擊，仲有譬如係乘客粗言穢語辱罵司機。你知唔知道係有呢啲指控呢？

黎以德先生：（經傳譯員）主席，我哋知悉巴士公司同埋車長對呢方面有關注。我可以講下，運輸署署長同佢嘅同事而家就係致力一啲公眾教育嘅工作，就係指出喺公交具上面係唔應該有呢啲行為嘅。另外投訴有咩嘢渠道，而乘客如果想投訴唔滿意巴士服務又或者係某一個司機嘅行為嘅時候，可以用咩嘢渠道去投訴，運輸署係喺呢方面已經有工作。我哋就認為教育或者係重要，甚至比起純粹考慮執法係更重要。法例就有㗎嘞，大家應該遵守法律，但係重要嘅一點就係教育公眾文明嘅方式去使用交通工具，就算佢哋不滿，其實係有投訴嘅渠道，唔應該係動武，或者係粗言穢語㗎。

MR DUNCAN：（經傳譯員）呢啲嘅規例，對上一次係幾時考慮過能唔能夠仍然適用喺今時今日嘅情況呢？

黎以德先生：（經傳譯員）主席，唔好意思，我可唔可以請律師講清楚講緊乜嘢規例？

MR DUNCAN：（經傳譯員）嗰啲規例，我頭先講緊嘅，即係根據條例底下制定嘅規例提到巴士車長、票務員、乘客嘅責任等等，政府係幾時檢討過呢？睇下到底佢哋仲對於今時今日嚟講係咪適用呢？

黎以德先生：（經傳譯員）主席，我預期運輸署即將會向運房局呈交佢哋推廣同埋教育方面嘅工作嘅計劃嘅時候，亦都會提出現行嘅刑事刑責嘅條文，喺法例入面點樣應該進一步去推廣，或者去考慮下需唔需要檢討。

主席：（經傳譯員）我諗我可以請你直接回答番個問題，個問題就係話嗰啲規例對上一次係幾時檢討過？

黎以德先生：（經傳譯員）主席，我哋冇單獨就住呢一條法例去徹底檢討。因為個假設一直都係入面嘅條文並非不足。

MR DUNCAN：（經傳譯員）即係冇做過檢討？

黎以德先生：（經傳譯員）主席，我哋冇做檢討，因為我哋唔覺得入面嘅條文係唔足夠。不過正如我頭先講，到運輸署提交一個教育嘅計劃嘅時候，佢哋亦都會去考慮番重新去審視番嗰啲條文係足唔足夠。

主席：Thank you.

MR DUNCAN：（經傳譯員）黎先生，以你嘅答案，係咪運房局已經係指示運輸署要提交一個公眾教育計劃？

黎以德先生：（經傳譯員）冇錯，主席。

MR DUNCAN：（經傳譯員）幾時畀咁嘅指示畀運輸署呢？

黎以德先生：（經傳譯員）主席，呢個指示就係喺剛剛發生喺大埔呢一個巴士意外之後，因為我哋收到一啲嘅報告，似乎有更多嘅時候，我哋發現車長同埋乘客之間嘅緊張嘅氣氛係增加嘅。

MR DUNCAN：（經傳譯員）簡單嚟講，有咩嘢教育計劃去解決呢個問題呢？

黎以德先生：（經傳譯員）主席，正如我講，細節方面，我哋都要等運輸署提交，所以我唔想而家先一步去講，到底佢哋會提交啲乜嘢畀局方考慮。但係整體嚟講，個方向應該係咁，佢哋亦都知道嘅，就係我哋應該提醒乘客係要文明有禮，有秩序，任何時候都係。而如果乘客唔滿意巴士服務嘅提供，又或者係就住某一個司機嘅不滿嘅話，係可以透過投訴嘅渠道去跟進，呢個係更加合理嘅做法，而唔係因為自己不滿，就對某一個司機出氣。

MR DUNCAN：（經傳譯員）運輸署有冇--你哋有冇畀一個時間表？

黎以德先生：（經傳譯員）我哋冇畀限期，但係運輸署都知道呢件事嘅--有幾緊張㗎嘞，佢哋已經係加快進度進行緊。我已經叫咗運輸署咁樣做，佢哋亦都係做緊㗎嘞。

MR DUNCAN：（經傳譯員）我可唔可以同你提另外一點，而家講番第 108 頁嗰個條例，呢個第 9 條，第 9 條就提到話行政長官係有權就住專--可以委任額外嘅董事嘅。呢個係唔係行政長官曾經有行使過嘅權力呀？

黎以德先生：（經傳譯員）主席，係嘅。呢個就係行政長官擁有嘅權力，佢亦都曾經行使過，有幾年嚟都行使過。運輸署長以及副秘書長，即係負責巴士服務嘅副秘書長，而家就係坐我右手邊嘅蔡先生，都係獲得行政長官委任作為所有專營公司董事局嘅額外董事嘅。

MR DUNCAN：（經傳譯員）我相信而家係有五間專營公司，我理解係咪就係呢兩位嘅官員都係呢五間專營公司嘅董事局嘅成員？

黎以德先生：（經傳譯員）冇錯。

MR DUNCAN：（經傳譯員）委任咗呢啲額外董事，佢哋係點樣喺董事局入面提出安全嘅事項嘅關注呢？

黎以德先生：（經傳譯員）主席，委任嘅額外董事係代表政府，所以以此延伸，即係話係代表政府嘅利益，或者關注。如果係講到安全問題，呢個係其中一個我哋政

府嘅董事關注嘅事項。喺適當嘅時候，適當嘅場合，佢哋會喺董事局開會嘅時候提出，喺我哋提交畀檢討委員會嘅書面陳詞亦都有提到。

MR DUNCAN：（經傳譯員）我哋知道有啲公司不時喺董事局會有啲嘅譬如係核數嘅委員會，安全委員會，有啲嘅小組委員會嘅。政府嘅額外董事有冇就住呢啲嘅專營公司，要求董事局成立一啲嘅小組委員會會關乎安全嘅呢？

黎以德先生：（經傳譯員）主席，如果得你准許，我想邀請蔡先生回答，因為佢係代表政府嘅額外董事嚟嘅。

蔡傑銘先生：（經傳譯員）唔該晒主席，唔該晒律師。就好似黎先生所講，我就係運房局嘅副秘書長，同埋連同陳美寶女士，即係運輸署署長，都係獲行政長官委任作為額外董事嘅，去代表政府參與五間專營公司嘅董事局。我哋作為其中一個董事，我哋係代表政府嘅利益，我哋其中亦都係即係喺專營公司嚟講嘅其中一個董事，睇番公司嘅策略嘅發展，我都可以話係其中一個公司董事。

我由去年 9 月上任，每兩個月或者每季，我都會去參與董事局嘅會議。佢哋係有一啲嘅核數嘅小組委員會，又或者係有啲會議去睇番每日嘅運作，以確保係提供適當而有效率嘅服務，同埋係安全嗰方面，譬如係意外率、巴士脫班率。管理層都會係透過提交畀董事局嘅文件，係要向董事局匯報，同埋一啲參考嘅資料。可惜，我哋就冇參與佢嗰個嘅核數小組委員會嘅會議。

MR DUNCAN：（經傳譯員）你會唔會建議成立一啲安全運作嘅小姐委員會，而政府嘅董事係可以參與做委員嘅呢？

蔡傑銘先生：（經傳譯員）感謝你提出呢個問題。正如係黎先生剛才喺發言嘅時候講過，就專營公司有咁嘅責任係妥善咁樣樣去做好佢嘅專營權嘅工作。其實講到公司管治同埋講到安全，我哋會睇下政府董事究竟喺呢一方面可以做啲乜嘢嘢。當然我哋亦都係希望佢哋嘅公司管治係更好，而且係更聚焦喺安全嘅事項。希望就專營公司喺去履行職責嘅時候，喺佢係致力係維持喺香港有適當而又有效率嘅服務嘅時候，都會關顧呢一點。

MR DUNCAN：（經傳譯員）唔該你，蔡先生。我而家係想問下局方一啲問題係關於呢個係遠期計劃，特別就係呢個 12A。

主席：（經傳譯員）我哋未落去另一個課題之前，我打算就係今朝早有一個小休。我就想請--亦都讓證人有少少時間休息一下，呢個係咪一個適當嘅時間呢？

MR DUNCAN：（經傳譯員）係嘅。

主席：（經傳譯員）好，我哋而家係休息十五分鐘，休息十五分鐘，唔該。

上午 11 時 32 分聆訊押後

上午 11 時 46 分恢復聆訊

出席人士如前

主席：（經傳譯員）鄧樂勤大律師。

MR DUNCAN：（經傳譯員）唔該晒，主席。黎先生，頭先我想你睇番，就係呢個條例嘅第 12A，即係 109 頁。

黎以德先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）你應該記得，頭先我同你都提到過嘅，我哋最初頭講呢個條例嘅條文嘅時候， 12A 條就係講緊一個五年嘅遠期計劃。我哋見到呢個計劃入面嘅內容應該有啲咩嘢呢？就係喺個附表度有寫嘅，呢個就係 126 頁嘅附表。

而家睇番 109 頁嘅第(4)款，我就想你睇番呢個條文嘅，就話係「如果係唔能夠達成協議，又或者有唔同意嘅地方，專營公司同埋運輸署署長要將有歧見嘅事項嘅細節呈交畀運房局局長，等運房局局長去解決」。

有冇需要過運房局局長解決呢個有歧見嘅事項呢？

黎以德先生：（經傳譯員）主席，冇㗎，據我所知冇試過。我相信應該咁樣解釋，遠期計劃好多時都係經過多輪嘅一個討論嘅過程，就係運輸署同埋專營公司嘅討論過程，通常到計劃敲定細節嘅時候，就已經係得到運輸署同埋巴士公司嘅同意。

MR DUNCAN：（經傳譯員）可唔可以請你揭去附表第 126 頁？你可以見到計劃內容。運房局有冇向運輸署發出過任何建議，呢個計劃應該有咩嘢內容呢？即係話除咗喺附表入面提到呢一啲特定嘅條文，即係由(a)至(g)咁多之外，我提--我同你提到過嘞，就係(h)嗰一款，就係有提到「其他事宜」，似乎係包含所有包羅萬有個條款。有冇任何時間，運房局曾經建議過運輸署，呢個五年遠期計劃內容應該係乜嘢呢，定話係由運輸署決定呢？

黎以德先生：（經傳譯員）主席，我哋知道由最近嘅遠期計劃，其實委員會亦都會知道起碼其中嘅遠期計劃入面都有某啲嘅比較廣義嘅標題嘅，就係符合附表入面提到嘅計劃內容嘅。譬如其中一間巴士公司就可能要提供一個訓練員工嘅資料，據我理解，呢個亦都係運輸署同埋巴士公司嘅多番商討之後擬定嘅，但係我就唔可以確定到底係唔係由運輸署主動提出，定話係因為局方某啲特定嘅要求而行事嘅。我懷疑應該係前者。

主席：（經傳譯員）我諗鄧樂勤大律師嘅問題，其實係問第二樣嘢，就係運房局有冇向運輸署提交任何建議，去講呢個五年遠期計劃內容應該包括乜嘢？

黎以德先生：（經傳譯員）主席，簡短嘅答案，就係我唔記得有冇主席你提到你解釋呢啲嘅指示嘞。基本上所有喺附表入面提到嘅內容都應該係包含喺個計劃入面，如果運輸署能夠透過同巴士公司嘅商討有進一步資料，亦都會喺嗰個遠期計劃入面反映。

主席：（經傳譯員）即係話運房局冇發出任何指示畀運輸署？

黎以德先生：（經傳譯員）唔係喺呢一個範圍入面嘅。

主席：（經傳譯員）得嘞，唔該。

MR DUNCAN：（經傳譯員）黎先生，我而家就唔再講呢一個嘅規管嘅制度，我而家想講番我哋委員會職權範圍。

再提醒番所有人，第(b)嗰一點就係職權範圍就係話委員會係要檢--係要審視現行對專營巴士嘅監管同埋監察制度。希望就住呢一方面，我進一步向你發問。

根據委員會收到嘅書面陳詞，好清楚巴士公司作為一個慣常做法，都會提交一啲資料畀運輸署嘅，就係一啲近期嘅好新近嘅文件，可能係按月、按季咁樣去提交，內容就係呢一個專營公司嘅營運同埋管理嘅。我都相信毫無疑問你都知道嘅。

黎以德先生：Yes.

MR DUNCAN：（經傳譯員）局方有冇要求運輸署去採取任何核實嘅步驟呢？睇下提交畀運輸署嘅定期嘅文件嘅真確性呢？

黎以德先生：（經傳譯員）主席，我希望澄清一下律師嘅問題。律師係咪問緊局方有冇要求運輸署去查核一下巴士公司提交畀運輸署嘅資料，嗰啲資料本身係唔係真確呢？

主席：（經傳譯員）係呀，係呀，鄧樂勤大律師就係問呢個問題。

黎以德先生：（經傳譯員）簡短嘅答案，就係我哋預期運輸署採取適當嘅或者需要嘅步驟去確保收到嘅資料嘅真確性，而唔係需要由局方去提醒運輸署咁樣做。當然喺專營權底下，如果我冇記錯嘅話，有一個要求，廣泛而言，我唔知道係咪可以即係包括晒每一項提交畀運輸署嘅資料，但係我記得有一條條文，就係要求巴士公司確保提交畀運輸署嘅資料係準確、真確。的確係對運營者有施加咁嘅要求，佢哋需要遵守。

而我都知道譬如運輸署實際上喺某啲事項上，佢哋都會採取行動，主動採取行動去查核一下收到嘅資料係咪真確。舉個例，就係巴士司機休息時間、更次時間等等。運輸署係有聘請外判商去做一啲獨立調查，即係喺巴士公司個調查以外，自己做調查，去睇下巴士公司有冇跟從指引。呢個係除咗運輸署由巴士公司收到嘅資料以外會做嘅嘢。

MR DUNCAN：（經傳譯員）當然我哋進一步都會再同運輸署去查問呢樣嘢，但係你頭先咁樣答之後，我想繼續問你。

監管嘅過程，或者監察過程，大部分都係其實睇巴士公司提交嘅紀錄文件，呢個係所謂監察嘅過程就係咁樣做。運房局有冇發出過任何建議，運輸署應該某程度上，應該點樣監察巴士公司嘅活動呢？點樣直接去監察，而唔係淨係睇一啲巴士公司提供嘅紀錄呢？

黎以德先生：（經傳譯員）我相信呢個答案都會係幾長，主席，希望你畀時間我解釋。

整體嘅監管同埋監察制度入面係有制衡，所有呢啲嘅制衡基本上都係得到運房局嘅許可，又或者起碼運房局係知悉嘅。

或者講幾個例子，較早時間我就講過，譬如話調查一下車長佢嘅休息時間。另外亦都每日係會進行呢個突擊檢查，呢個係署方去做㗎，就會睇下現役巴士嘅情況，所以每一日佢哋會抽十四部巴士。呢十四部巴士本來就係要投入服務，佢哋係隨機咁抽呢十四部巴士。呢十四部巴士就係要通過署方自己嘅驗車主任嘅檢驗，呢個就係除咗巴士公司所提供嘅安全方面嘅事之外，我哋會再做呢啲抽樣嘅調查。

我而家即時隨手就諗到呢兩個例子，就講及究竟我哋喺機制入面係有啲乜嘢嘢，而呢一啲亦都係局方所批准咗嘅，去核對一下究竟有冇做到，即係話核對一下係巴士公司係做成點㗎。當然，你亦都會喺書面意見書嗰度睇到，就係署方講過，就話如果有疑問嘅話，譬如話如果懷疑嗰啲資料係咪唔準確，又或者啲資料係唔夠全面嘅話，運輸署係可以，亦都有去追問有關嘅巴士公司，要求佢哋提供更全面嘅資料。呢一個其實係多年嚟所建立嘅一個機制，亦都係我哋整體嘅做法嘅一個環節，係署方嘅安排嚟嘅。

呢個就係同事都知道係應該點樣做，因此就唔需要進一步需要有一個書面嘅指示。

主席：（經傳譯員）換句話講，你哋冇一啲咁樣樣嘅係指示畀運輸署，因為你係預期係期望咗佢哋係會咁做㗎嘛。

黎以德先生：（經傳譯員）係呀，主席先生，我諗你講得好公道。

MR DUNCAN：（經傳譯員）好，監察我而家就唔講住，稍後會問署方多啲監察方面嘅事宜。跟住我就講下一般嘅安全政策呢個事宜。黎先生，嚟自巴士公司嘅意見書顯示就係巴士公司本身都不時係會研究一下有一啲乜嘢新嘅安全嘅技術、安全嘅措施都可以係引入嚟應用。我想問下，局方本身又有冇係進行一方面嘅研究呢？睇下本地或者海外有啲乜嘢嘅進展、有咩嘢發展、睇下有冇啲咩嘢新嘅措施就可以係引用，即係話一般嚟講係指嗰啲科技同埋嗰啲係安全嘅措施喇。

黎以德先生：（經傳譯員）律師，局同埋署嘅分工係點呢？一般嚟講，如果話你剛才提及嘅嗰類型嘅研究就會由運輸署去進行，就唔係局方去進行，因為喺局嗰方面，我哋其實真係冇所需嘅專材嚟到去進行呢啲研究，相反，署方就會係有一隊運輸工程師以及就係機電工程師，佢哋係更熟悉呢一方面嘅事情，而且佢哋亦都有係進行你所講及嘅嗰類嘅研究，其實你都睇到一啲證據，譬如話係採納咗嗰個黑盒喇，同埋係車速限制器呢一啲嘅要求嘅建議，而最近我相信委員會亦都會知道㗎喇，就係因應大埔所發生嘅巴士慘劇，運輸署就係組成咗一個工作小組，佢係做主席㗎，咁同埋就你有專營巴士公司嘅成員加做委員，就去研究一下有冇一啲係進一步嘅安全嘅設備可以係加入去我哋嘅專營巴士嗰度㗎。咁我相信運輸署嘅意見書嗰度都有提及呢點㗎。係呀，我哋有㗎，有咁樣做㗎。

MR DUNCAN：（經傳譯員）我想問下，局方有冇考慮過以下嘅可能性，即係話個別嘅專營巴士公司係要制訂一個計劃，而又得到你嘅批准，而唔係只不過係時不時耐唔中就某一個單一嘅項目去係引入一啲安全措施呢？換句話講，譬如話搵一個係有資歷嘅人士係關於安全嘅事方面有相關嘅資歷同埋經驗嘅人士去草擬一份咁樣樣關乎安全措施嘅計劃書咁呢？

黎以德先生：（經傳譯員）主席先生，冇。冇話好有組織或者好詳細咁樣去咁樣做，不過既然你問我呢一個問題，今朝早你問我呢個問題，律師，我諗我即時嘅回應係，係呀，我哋會好樂意去探討呢一個可行性。

MR DUNCAN：（經傳譯員）照我所知，目前個情況係咁㗎，係嘛？其中一家嘅專營巴士公司佢所推行嘅一啲安全措施就可能會同另外嗰幾間係巴士公司嘅好唔同㗎喎，會唔會有咁嘅情況出現呢？

黎以德先生：（經傳譯員）主席先生，究竟喺日常運作裏面點樣樣去做，我諗我唔掌握個情況，不過如果佢哋之間係有一個差別，我唔會感到奇怪。如果話要求佢哋係寫好一份係安全計劃，即係好似律師所講嘅咁樣樣，咁當然我哋係有幾樣嘢係要同營運商就係傾㗎，譬如話究竟嗰個計劃係點樣樣嘅呢，係咪所謂一本通書睇到老，大家個個都係一樣吖，定抑或係不同嘅係營運公司，係因為嗰個重點不同而略有一啲不同呢？當然係如果要做嘅話，我哋都要處理呢啲事宜。

MR DUNCAN：（經傳譯員）有好多國家，佢哋採納咗一啲國際嘅標準，譬如ISO39001，關乎一個係道路安全管理系統，咁另外係道路安全議會亦都不時就係促請話應該喺香港係採納呢一套標準㗎，咁究竟係局方有冇諗過都係採納一個咁樣樣嘅道路安全管理系統呢？

黎以德先生：（經傳譯員）主席先生，照我所知，呢一套標準係都幾新下㗎，如果我冇搞錯嘅話，一般係運輸及物流公司所採納，就唔係就係政府當局去採納㗎。至於話我哋會唔會鼓勵佢哋咁樣做，會唔會請巴士公司去採納呢一套嘅 ISO 國際標準，我諗不如咁喇，我哋應該係同你較早時候同我講嘅嗰樣嘢一齊去睇，即係話要唔要寫一個係安全計劃書。我諗從政策嘅角度，係兩者應該係一齊去

睇嘅，我唔會喺原則上就係排除個可能性，而其實要睇嘅係究竟嗰個成本同埋個效益係點樣樣呢，如果我哋採納呢一個國際標準。如果公司之間佢哋嗰個準備嘅程度係有所不同，咁我哋又應該如何處理呢？另外我想講就係，我哋係保持個開放嘅應度，樂意去睇睇㗎。

MR DUNCAN：（經傳譯員）換句話講，你哋局方到今日嚟講係未有考慮過呢樣嘢㗎，係嘛？

黎以德先生：（經傳譯員）主席先生，你咁講都唔係話唔公道嘅，其實係新嘅事物嚟嘅，係只係有幾年嘅歷史，講到標準嚟到計，佢都係一個新嘅事物，不過我哋好樂意係去研究下一啲，探討下呢啲新嘅事物嘅。

主席：（經傳譯員）鄧樂勤大律師，我哋有冇呢一個係 ISO39001 呢？呢度佢有冇講明話係幾時係出版㗎？

MR DUNCAN：（經傳譯員）係，大家可以睇雜類文件二，645 頁、646 頁，咁根據 646 頁嗰度講，就話 2012 年嘅時候出版嘅，呢個就係第一版。

主席：（經傳譯員）好，唔該。

MR DUNCAN：（經傳譯員）黎先生，香港嘅地理環境係咁嘅，個情況比較係奇怪嘅，我哋就有好多雙層巴士行走喺一啲糾斜喇、狹窄嘅道路，好多時乘客有呢個超載嘅情況添嘅，我就想問喇，呢一個安全嘅問題你又點睇呢？

黎以德先生：（經傳譯員）道路嘅設計同埋佢如果影響個安全，運輸署嘅同事，特別係交通工程師或者運輸工程師，佢哋嘅日常嘅工作都會係處理呢啲事宜嘅，即係佢哋每日都做㗎。一係就可能發生某件事件又或者一系列嘅意外，又或者係佢哋平時做嘅檢討工作，佢哋都會睇睇某一段路係咪安全，又再睇下究竟有啲咩嘢可以做，去進一步係令佢更加安全，又或者睇下係咪應該喺嗰段路嗰度係施加一啲限制，所謂限制可以包括係車速嘅限制喇，可以係限制某一類嘅車輛使用喇，諸如此類，所以呢個係佢哋不斷做緊嘅工作嚟嘅。譬如話有一笪地方已經被列為係黑點喇，咁呢個就其實我哋有一個好客觀嘅標準就去界定一個地方係咪一個黑點㗎，一般我哋就會參考究竟喺某一段時段裏面係發生咗幾多宗嘅交通意外，如果係黑點嘅話，我哋會更加密切咁去留意，去睇下究竟我剛才所提及嘅改變係咪可以係加以考慮。所以我可以咁講，呢個唔係話完全一個被動嘅程序，佢哋亦都會採取主動去睇睇其他嘅路段，縱使佢哋唔係黑點佢哋都會去睇嘅，即係如果佢哋發現就係都有咁嘅需要去睇睇嗰個安全情況。

MR DUNCAN：（經傳譯員）照你嘅回答就係話局方同埋署方係冇傾過就係直接又或者係透過巴士公司，或者其他嘅運輸公司呢一個係道路安全管理系統呢一套嘅 ISO 國際標準，係嘛？

黎以德先生：（經傳譯員）你意思係指個 ISO 呢一個係國際標準？

MR DUNCAN：（經傳譯員）係，呢一個 ISO39001。

黎以德先生：（經傳譯員）我相信咁樣講係啱嘅，呢一方面冇傾過，正如我解釋，因為有個新嘅國際標準係 2012 年引入嘅，都叫做係相對比較新鮮嘅事，但係我哋都知道物流公司同埋啲其他嘅運輸公司都有用呢一個國際標準，呢件事而家我哋關注喇，呢個國際標準，正如我頭先解釋，我哋都好樂意探討下喺香港嘅適用性嘅，對於籠港嘅交通運輸系統嚟講。

MR DUNCAN：（經傳譯員）可唔可以而家同你講下人力嘅供應嘅問題？委員會收到嘅書面意見書就係顯示合資格嘅員工，特別係巴士車長方面係有短缺嘅，呢個問題已經持續咗一輪㗎喇，我咁樣簡述個情況公唔公道呢，咁講？

黎以德先生：（經傳譯員）主席，我會話其實呢個情況係都反映番整體香港勞動市場嘅問題，唔單只係專營巴士公司出現咁嘅現象，其他同運輸有關嘅公司等等都有呢一個情況嘅，物流嘅公司亦都一樣。

MR DUNCAN：（經傳譯員）咁其中一點運輸署有令到委員會知悉嘅，相信你都知道嘅，就係係最新嘅指引，頭先我哋傾過㗎喇，就係需要--因為有新嘅指引要多聘請二百五十個嘅額外司機，你知唔知道？

黎以德先生：（經傳譯員）我都知道嘅。

MR DUNCAN：（經傳譯員）喺你嘅書面意見書你提到香港係全球少數嘅地方係專營巴士嘅服務係冇獲得任何政府嘅直接補貼，而由私人嘅營運商去營運嘅，你記唔記得喺你嘅陳詞入面有提到呢一點？

黎以德先生：（經傳譯員）係嘅，主席，雖然--如果主席准許嘅話，我想即係準確啲去講，係一般嚟講，冇政府補貼。

主席：（經傳譯員）你可唔可以講番頭先鄧樂勤大律師指緊係邊段呢？係咪律師而家已經係喺嗰個畫面嗰度見到喇？但係呢個應該係講緊另外一部分，呢個係一般嘅觀察嘅，黎先生。

黎以德先生：（經傳譯員）主席，唔好意思，我想澄清下，即係或者我比較執著，我聽到鄧樂勤大律師話喺我嘅開場白入面提到我話完全冇政府嘅資助，我想即係澄清一下，一般嚟講係冇政府資助，唔係話絕對冇政府資助。

MR DUNCAN：（經傳譯員）好，咁請大家睇第 14 段。或者你可以指畀我哋睇，當你講番頭先呢點嘅時候，喺書面意見書邊部分？關於冇政府直接資助嗰方面係邊段？

黎以德先生：（經傳譯員）第 14 段，應該係第 14 段。

MR DUNCAN：（經傳譯員）而家可以等我引用番呢一段，應該要留意嘅就係香港係全球嘅國家或者城市當中極少數專營巴士服務就係由私人營運商提供，係冇直接嘅政府資助嘅，你頭先提到係呢點，係咪？

黎以德先生：（經傳譯員）冇錯。

MR DUNCAN：（經傳譯員）政府有冇喺非直接嘅提供資助或者補貼畀專營公司？

黎以德先生：（經傳譯員）主席，有幾個例子，我而家可以引述嘅，譬如專營巴士公司喇，就唔需要交首次登記稅，呢個似乎都係其中一個比較清晰嘅例子。主席，另外一個原因點解喺我開場發言嘅時候咁樣講呢？政府一般嚟講係唔會提供資助，其實我係想解番喺書面意見書入面呢度提供嘅說話嘅，咁多年嚟，喺近年喇，尤其，我哋係有提供一啲嘅某啲形式嘅財政嘅資助--援助係畀專營公司嘅，去達至某一個政策或者達至某一個計劃，畀個例子畀委員會參考，譬如電動巴士嘅試驗計劃，呢個措施屬於環保局嘅，而唔係運房局，但係呢個都係政府嘅資助之一，就係提供資助畀巴士公司購置一定數目嘅電動巴士，以試驗性質運行，所以呢個某程度上都係一種資助嚟嘅。

MR DUNCAN：（經傳譯員）另外，我咁樣--我記憶啱唔啱，係咪有四架電動巴士？

黎以德先生：（經傳譯員）係三十六架單層巴士，主席。一個更新近嘅例子，就係我哋提供資助，幫助巴士公司設置喺巴士站有啲實時嘅資訊板，咁係一個配對資助嘅計劃嚟嘅，一個自願性嘅資金配對資助嘅計劃。除此之外，除咗呢幾個有特定目的嘅資助計劃方面，整體嚟講，的而且確政府係唔會直接提供資助畀專營公司嘅。

MR DUNCAN：（經傳譯員）政府係咪有提供資助畀渡輪公司？

黎以德先生：（經傳譯員）我哋提供啲特別支援措施，呢個係嗰個計劃嘅用語，咁律師用嘅「資助」呢個字眼我都唔會有爭議嘅，但係意思就係話對於係離島嘅渡輪服務，我哋提供資助，但係呢個有特別嘅政策考慮嘅。渡輪對於住喺離島嘅居民係唯一交通工具，而呢啲渡輪財政上因為唔可行喇，呢個係一個長期嘅問題，除非佢哋渡輪大幅加費喇，我哋認為公眾亦都未必能負擔。有一個特定背景，所以我哋先對渡輪公司係有一個特別嘅援助措施。

MR DUNCAN：（經傳譯員）呢個特別援助措施施行咗幾耐？

黎以德先生：（經傳譯員）我可唔可以講蔡先生回答？因為佢係負責日常嘅運作嘅，蔡先生。

蔡傑銘先生：（經傳譯員）唔該晒，主席。律師問呢個問題，正如黎先生講，離島嘅渡輪航線係一個特別嘅情況，政府係有提供一啲嘅特別支援措施，有六條航線都係接受緊我哋嘅特別支援嘅措施嘅。基本上，正如黎先生所講，政府亦都明白，除非渡輪服務大幅加費，因為離島居民係要倚賴渡輪嘅服務去返工、出去市區或者係做其他嘅事，如果唔大幅加費，佢哋呢啲服務財政上不可行嘅，喺咁嘅情況底下，政府嘅資助個別計劃，譬如話係維修費、電費、有啲嘅補費嘅扣減喇，同埋如果係有小童同埋長者嘅半價優惠嘅話，亦都係明白佢哋減少個收入嘅，呢啲係我哋就住呢方面提供嘅資助。政府都需要向立法會財務委員會申請撥款，然後就將公帑資助呢啲渡輪嘅營運商，咁我哋亦都有透過運輸署去核實呢啲原因係咪真確，去確保公帑係用得其所，咁呢個係關於對於渡輪公司

嘅特別支援計劃措施嘅。

MR DUNCAN：（經傳譯員）唔該。講番人力嘅問題，黎先生，我想畀你睇下 TD--即係運輸署嘅第 1510 頁，呢個就係啱啱週末先會收到嘅文件喇，你可能係睇過，可能未睇。

黎以德先生：Yes. It's notes of a meeting; is that right?

MR DUNCAN：（經傳譯員）係呢個會議紀錄嚟㗎，係寫中文嘅，呢個似乎就係一個特別會議嘅會議紀錄，深水埗區議會，2017 年 9 月 28 號，就喺深水埗發生慘劇之後開嘅特別會議。我就有興趣睇 1523 頁。

黎以德先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）第 203 段，羅馬數字 III，我讀番呢個我收到嘅英文譯本，佢就係咁講㗎，佢就會係「運輸署嘅總運輸主任就話政府關注運輸業人手不足的問題，巴士公司有責任透過增加薪酬、福利和晉升機會吸引新人入行及挽留人才。」你中文睇嘅版本同我頭先英文講嘅係咪都係脗合？

黎以德先生：（經傳譯員）都係嘅。

MR DUNCAN：（經傳譯員）係咪都反映--準確反映政府就住人手不足嗰個問題嘅立場呢？

黎以德先生：（經傳譯員）主席，我諗係反映我哋預期專營公司要做啲乜嘢，佢唔係反映整體嘅情況，因為呢一個係一個即係梁先生，即係總運輸主任一個綜合回應嘅一部分，我只能夠話呢個係我哋立場嘅部分，我哋嘅立場其餘嘅部分，譬如話關於長期人手不足嘅問題，我哋通過立法嘅程序，我都會再解釋番嘅，提交修訂嘅法例去--嘅建議去--譬如放鬆對於商業司機嘅牌照規定等等，所以基本上現時如果你想申請一個牌照做商業司機嘅話，你需要持有私人駕駛執照三年先可以有資格申請--即係話申請做商業車輛嘅司機，咁亦都因為長期人手不足嘅問題喇，我哋已經提出建議，同埋立法會亦都同意㗎喇，同業界一樣都同意三年呢一個要求可以縮減為一年。日後你只需要係擁有私家車嘅駕駛執照一年，咁你就已經可以係申請商用車輛嘅駕駛執照，呢一個就係包括咗巴士嘅駕駛執照，亦都包括埋係專營巴士嘅駕駛執照。我哋而家正係草擬緊嗰個修訂嘅條例草案，希望係今年嘅年尾之前可以引入立法會。如果立法會係通過嘅話，亦都可以喺某程度上幫我哋舒緩司機人手不足呢個問題，未必係可以完全解決個問題，不過希望都可以係緩減一下嗰個問題，所以我哋喺呢方面係做咗呢個工夫。另外，縱使係咁講，我哋都話專營公司--佢作為呢個專營巴士公司，佢作為一個專營公司，佢要採取一切嘅步驟嚟到確保佢有足夠嘅司機人手去提供服務。

MR DUNCAN：（經傳譯員）我剛才係提及係呢一個講法，咁究竟政府係同巴士公司跟進過咩嘢工夫嚟到去係促請佢哋係要有足夠嘅司機呢？有足夠嘅車長呢？

黎以德先生：（經傳譯員）主席先生，好近期呢--我可唔可以咁講呢？就話喺佢哋嗰個薪酬方案嗰度係有一啲重組，即係我係指巴士司機嘅薪酬方案，佢哋嗰個重組都係希望係將個薪酬變得更有吸引力，或者起碼等佢哋巴士司機更加確定究竟係每個月係有幾多收入，希望可以有一個更大嘅保障，呢一個都係因為政府係同埋巴士公司之間嘅商討嘅結果㗎，當然，我哋都要對巴士公司係公道嘅，我一定要指出，佢哋係反應好快、好迅速，喺大埔意外之後，喺大埔嘅巴士意外呢個慘劇之後，佢哋亦都係反應非常之迅速。

MR DUNCAN：（經傳譯員）我想問，巴士公司係咪已經承諾咗會係提升佢哋嘅薪酬？

黎以德先生：（經傳譯員）我諗嗰個重組咗嘅薪酬方案已經係公布咗㗎喇。

MR DUNCAN：（經傳譯員）鑑於你講嗰個人手不足都係長期嘅問題，我想問下政府會否就係提供--或者會否考慮係提供一啲補助、補貼，即係薪酬嗰方面咁做呢？

黎以德先生：（經傳譯員）如果我哋講話補貼，如果係長期咁樣提供一個補貼，我諗我哋必須非常之小心咁去考慮呢件事宜，因為如果咁做嘅話，其實對於我哋認為喺香港點樣樣去營運公共交通服務嘅一個好根本嘅政策嘅改變。另外或者你而家問我，我即時嘅回應係我諗巴士司機嘅招聘問題未去到嗰個階段，我諗仲係有方法，巴士公司係可以用嗰啲方法去招聘同埋挽留足夠嘅合資格嘅司機嘅。我亦都有睇過一啲巴士公司提交畀呢個委員會嘅一啲文件，我諗喺嗰啲意見書，喺嗰啲文件裏面，你都可以見到喇，佢哋亦都好盡力咁樣樣去改善個情況，我諗我哋未去到嗰個階段、嗰個地步就係話要係提供補貼係畀巴士公司去招聘人手㗎。我哋可以透過其他嘅方法嚟到去舒緩呢個人手不足嘅問題，剛剛我提過，就係喺呢個係牌照嘅申請資格喇。剛才你亦都提過二百一十五名嘅司機，我哋嗰啲指引就會今年稍後時間就係陸續咁推出嘅，一路係去到 2019 年，嗰個目標就係希望巴士公司有足夠嘅時間去招聘足夠嘅人手，佢哋所需要嘅司機嘅數目。另外，過去嗰一、兩年，我哋亦都有做過呢啲工作㗎，就係話我哋優先處理係新嘅司機嘅牌照考試，我哋會優先就係處理呢啲巴士司機嘅駕駛執照嘅考試，就係同處理私家車嘅駕駛執照考試係唔同嘅。其實我哋就係--運輸署就已經係調動咗嗰啲考車官嚟到係優先處理嗰啲申請駕駛巴士嘅照牌嘅考生。

MR DUNCAN：（經傳譯員）如果話增加薪酬，其實剛剛我哋都提過喇，你認唔認為增加薪酬就係會引致嗰個支出係大大增加呢？

黎以德先生：（經傳譯員）其實事實就係你招聘得愈多司機，咁當然一般嚟講嗰個成本就會上升，不過咁樣並冇令到巴士公司係唔肯就係去跟從最新嗰個指引。

MR DUNCAN：（經傳譯員）所以我想問，局方有冇其他嘅措施，除咗係同巴士公司講以及係降低嗰個考牌嘅申請嘅資格，有冇其他嘅措施去企圖去舒緩嗰個人手不足嘅問題？

黎以德先生：（經傳譯員）我哋都喺度鼓勵巴士公司喺招聘嗰方面或者諗下一啲潛在

嘅人手嘅，譬如話婦女，其實而家佢哋呢方面都做多咗好多呢方面嘅工夫㗎喇。即係佢哋可以考慮一下聘用婦女係做司機。自從係大埔嘅慘劇之後，當然以下呢個課題就更加係具敏感性，即係話招聘兼職司機嚟到去喺某程度上就係緩解一下呢個人手不足嘅問題，我相信委員會係會知道㗎喇，就係自從慘劇之後，呢一個方法其實巴士公司已經係暫停咗。

MR DUNCAN：（經傳譯員）我想問下，車長嗰方面，有幾多--或者嗰個比例上係幾多係女性？

黎以德先生：（經傳譯員）我自己就冇嗰個答案，唔知我啲同事知唔知呢。

MR DUNCAN：（經傳譯員）會唔會個比例好低？

黎以德先生：（經傳譯員）肯定就唔高。主席先生，嗰人數字有所上升嘅，個比例有所上升嘅，我哋個角度就係我哋歡迎更多就係女士去駕駛巴士。

MR DUNCAN：（經傳譯員）我想問，局方有冇採取任何嘅措施嚟到係鼓勵女士去申請駕駛巴士？

黎以德先生：（經傳譯員）唔係我哋去做㗎，因為係巴士公司佢負責招聘，但係呢一個訊息我哋係唔止一次係提過出嚟嘅，而運輸署我亦都知道有同佢哋討論。我知道就係巴士公司方面--喺呢方面嘅程序都係有加強個工作嘅，起碼譬如都聽聞就係話--其實你大家如果去搭巴士嘅時候，你會見到多啲--遇上多啲係女性嘅司機，你都可以係明白呢一點。

MR DUNCAN：（經傳譯員）局方、政府又或者係巴士公司，究竟有冇採取步驟嚟到係吸引女士去揸巴士？

主席：（經傳譯員）呢個留番係畀巴士公司去答。不過你都要直接回答鄧樂勤大律師嘅問題，係咪冇作出咁嘅--冇主動去做呢一方面嘅工作？即係話係問下局方有冇主動咁樣去促進呢件事？

黎以德先生：（經傳譯員）主席先生，簡短咁回答，我哋自己唔係負責招聘嘅，不過我哋的而且確係有鼓勵巴士公司去咁樣做。

主席：（經傳譯員）係，好，唔該。

MR DUNCAN：（經傳譯員）我哋進行呢一個檢討，就係由於過往嗰幾年涉及巴士都有多宗就係慘劇，多宗嘅意外，我諗想問下，局方自己有冇進行過研究，有冇去睇下有冇啲共同嘅係成因呢？即係喺呢啲嘅意外背後，有冇一啲共同嘅成因？

黎以德先生：（經傳譯員）主席先生，我較早時候解釋過，研究意外嘅成因呢個係運輸署裏面嘅專業嘅同事嘅工作嚟㗎，坦白講，我哋喺局方，我哋冇咁嘅能力去做呢方面嘅研究，不過過往曾經有咁嘅情況，我哋認為應該都有做過咁嘅工作或者係應該做呢方面嘅工作嘅話，我哋就會叫署方就係去睇一睇嘅。譬如係讓

我提兩個例子喇，一個就係最近係修訂咗嗰個工作休息及用膳時間嘅指引。呢度我就係要為我哋喺 4 月交上嚟嘅書面意見書就係作一個更正，因為交咗之後，自此我哋就知道係 2017 年嘅時候開始做嗰個檢討，而且亦都係由局方去係提議嘅，呢個係其中一個例子。另外喺我哋嘅意見書裏面嘅某處同埋喺運輸署嘅意見書裏面亦都有寫嘅。講到話車門--落車嘅車門玻璃爆裂，當時喺 2016 年有幾宗咁樣嘅事件，當時玻璃就爛咗，導致乘客係受傷。咁喺逐漸我哋睇得出有個咁樣嘅模式，因為意外接二連三咁發生嘅時候，我都記得喺兩個月之內都有連續發生嘅，我哋就思疑可能有啲地方出咗問題，可能係巴士設計方面喇、係咪巴士用嘅玻璃吖等等。我哋就敦促運輸署去睇下呢個情況，然後運輸署就同巴士公司研究，到最尾就有增加咗一啲嘅安全措施嘅，譬如話喺車門--玻璃門就打橫係有一個嘅護欄喇，去減低乘客重傷嘅可能性，因為如果乘客被拋出巴士外嘅話，係會重傷嘅。我哋都儘量去跟緊呢件事，有時我哋亦都會主動要求運輸署檢討，呢啲檢討、研究好多時候其實亦都會由運輸署直接提出嚟，因為佢哋其實係前線日常接觸呢啲事嘅部門，有時佢哋嘅判斷比我哋更加準確，佢哋更加明白要做啲乜嘢事、要研究乜嘢嘢嘅，因為佢哋每日都會同巴士公司、區議會、公眾等等有來往。

MR DUNCAN：（經傳譯員）我嘅理解就係佢哋嘅範圍嚟嘅，如果發現有一啲共同嘅成因嘅話，咁佢哋係會匯報畀局方聽？

黎以德先生：（經傳譯員）主席，如果係講緊意外原因嘅話，尤其如果巴士嘅運作係牽涉其中嘅呢，冇錯，我哋預期運輸署同埋運房局之間係應該有溝通嘅 。

MR DUNCAN：（經傳譯員）咁局方有冇任何嘅結論？多宗嘅意外，一連串嘅意外，有冇咩嘢共通嘅成因？

黎以德先生：（經傳譯員）主席，我可唔可以請律師--問下，所謂「一連串嘅意外」係講緊咩嘢一連串意外？

MR DUNCAN：（經傳譯員）係咪有一連串意外吖？我哋講番 2003 年喺屯門有一--後來柴灣有巴士意外喇，喺深水埗喇，然後就今年喺大埔，都有數宗非常嚴重嘅致命巴士意外，我提到嘅「一連串意外」就係呢啲。

黎以德先生：（經傳譯員）主席，如果你容許嘅話，我回應就唔想提今次呢一個大埔嘅巴士意外住，因為仲有法律嘅程序，我就唔想作出任何推斷或者有任何嘅指稱呢一次意外成因係乜嘢。

主席：（經傳譯員）唔係，調查委員會已經係講清楚我哋唔會係喺呢個調查釐清邊一個嘅係有咩嘢責任嘅，但係我哋亦都可以去探究一下一般嘅情況。

黎以德先生：（經傳譯員）一般嚟講，每一宗意外都有一個特定嘅意外嘅原因嘅，可以將佢分類，機件故障吖，係咪巴士機件故障，或者巴士本身個設計，或者道路設計，又或者駕駛態度、乘客嘅行為，有啲嘅成因我哋就會話巴士同埋巴士司機係有積極嘅參與嘅，意思即係話巴士司機又或者係巴士嘅機件故障就係直

接導致意外嘅原因，有啲嘅意外就係一啲被動嘅方式，即係話架巴士--譬如話都係有一個受害嘅涉事車輛喇，就係譬如係後面架車撞上嚟咁樣，有唔同嘅意外成因。喺發生一連串嘅意外之後，運輸署、運房局就會睇番有關啲意外，睇下我哋可以吸取咩嘢教訓，有咩嘢改進。黑盒同埋車輛限速器就係有一次喺屯門，係 2003 年嘅巴士慘劇意外之後提倡㗎喇。

MR DUNCAN：（經傳譯員）咁亦都係根據當時專家報告，專家報告建議呢啲安全措施嘅？

黎以德先生：（經傳譯員）冇錯，係，政府採納專家嘅報告，亦都好快實施咗呢一個做法，而家所有巴士已經係有黑盒同埋有限速器兩個裝置㗎喇。

MR DUNCAN：（經傳譯員）你提到幾個原因喇，係道路設計、機件故障、司機操守、乘客嘅行為，有冇一個比較係佔大嘅比重係個成因呢？

黎以德先生：（經傳譯員）主席，據我所知就冇喇。主席，啱啱提到有啲嘅安全措施喺 2003 年嗰個意外之後實施嘅，喺屯門發生嘅巴士嘅意外。咁講啱唔啱呢？喺深水埗，2017 年 9 月發生嘅巴士意外之後，就亦都導致檢討咗有關嘅指引，咁嗰個指引就喺今年 2 月修訂嘅，主席，咁講亦都係公道嘅，發生咗嗰次慘劇之後，就係導致我哋做咗個檢討。

主席：（經傳譯員）呢個就係車長嗰個工作時間嗰個指引吖嘛？

黎以德先生：（經傳譯員）冇錯。

MR DUNCAN：（經傳譯員）之前嘅指引我相信就係喺 2012 年開始實施嘅，啱唔啱？

黎以德先生：（經傳譯員）應該係 2010 年，主席。

MR DUNCAN：（經傳譯員）係，2010 年，唔該。新嘅指引據我理解就係 18 年 2 月 23 號就修訂嘅，即係發生咗喺大埔道嘅咁不幸嘅意外嘅幾個星期之內，係咪呀？

黎以德先生：（經傳譯員）冇錯，主席。

MR DUNCAN：（經傳譯員）如果我冇理解錯嘅話，深水埗嗰次意外亦都導致部門係要求巴士公司每月提交更多資料，啱唔啱？

黎以德先生：（經傳譯員）冇錯。

MR DUNCAN：（經傳譯員）譬如車長干犯交通違例事項喇、喺巴士公司車上監察嘅工作喇、突擊檢查黑盒、司機要做嗰啲呼氣測試，測試酒精含量喇呢啲，我理解啱唔啱？喺大埔嗰次意外之後就係成立咗一個工作小組㗎？

黎以德先生：（經傳譯員）冇錯，主席。

MR DUNCAN：（經傳譯員）呢一個工作小組嘅目的係檢討安裝--喺巴士上安裝新嘅

安全儀器嘅可行性？

黎以德先生：（經傳譯員）冇錯。

MR DUNCAN：（經傳譯員）係咪都係因為喺大埔道呢個不幸嘅意外導致咁樣做呢？

黎以德先生：（經傳譯員）係，咁樣講亦都係公道。

MR DUNCAN：（經傳譯員）所以總括嚟講，黎先生可唔可以咁樣問你呢？如果有咁嘅講法，你同唔同意呢？政府其實係用一個被動嘅反應式嘅方法去處理呢件事，而唔係一個主動嘅方法呢？

黎以德先生：（經傳譯員）主席，喺一個尤其嚴重嘅意外之後，政府有責任唔單只係找出成因，更加要睇下以後點樣避免類似嘅意外，或者起碼減低再次發生嘅可能性，但係正如我喺開場發言所講，我哋亦都希望加強安全，唔單只係就住某件事、某次意外，而係因應科技嘅轉變、公眾期望嘅同埋要求嘅轉變，所以我唔會話我哋純粹係被動作反應嘅。雖然我都同意喺一次意外之後當然政府係要有反應喇，發生意外一定係悲慘㗎，因為冇辦法防止到佢發生，但係重要嘅就係點樣可以防止佢再一次發生。

MR DUNCAN：（經傳譯員）唔該晒，黎先生。

主席：（經傳譯員）唔該晒，鄧樂勤大律師。

羅先生：（經傳譯員）我仲有幾條好短嘅問題關於個指引，即係話特別更次係可以做到十四個小時，運房局有冇做過任何研究，可以睇下取消呢一個嘅--完全取消個特別更次嘅話，會點樣影響司機人手方面呢？

黎以德先生：（經傳譯員）主席，我知道運輸署係有做研究嘅，我就冇--而家冇研究嘅結果喺度，署長而家就喺我身後，如果主席容許嘅話，下一節可以由署長回答，但係有啲做㗎，係，可以問下署長有冇做過任何嘅工作。

羅先生：（經傳譯員）仲有一條問題，你提到司機人手不足係一個長期嘅問題㗎喇，個問題已經喺度咁耐時間，點解冇採取更加即係強烈嘅措施去處理呢個問題呢，因為喺工作時數方面，司機駕駛過勞都會有好大影響，有冇政策去直接研究呢個問題呢？

黎以德先生：（經傳譯員）主席，我相信多年來巴士公司制訂過唔同嘅措施，譬如話聘請更多女車長、兼職司機，不過我頭先提到喇，而家呢個係敏感話題，之前引入呢個做法就係解決人手不足嘅問題，又或者係提高車長嘅福利，仲有措施去加強本地僱用公司，本地即係本區咁解，即係話住喺巴士廠附近嘅人士可以聘用做車長，因為我理解，好多人就唔想話長途跋涉去當班，然後收工之後又長途跋涉返屋企嘅，佢哋亦都有考慮所有呢啲嘅措施。呢啲係唔同嘅措施喇，另外仲有聘用番退休嘅車長或者退休人士喇，令佢哋再次投入勞動市場，提供適當嘅報酬，譬如話改善佢哋個報酬嘅計算方法同埋係有一啲嘅特別獎金咁。

可能盧教授（羅教授？）就係有諗到呢個輸入外勞嘅問題，喺呢一點，我哋不時都會研究嘅，我哋嘅結論都係不適宜即係喺車長方面引入外勞係不適合㗎，因為車長需要非常--好多時候非常近距離同乘客接觸㗎，所以同乘客能夠以乘客嘅語言去溝通都係好重要。如果話由香港以外引入勞工擔任車長嘅話，就可能會引發乘客同埋外勞司機嘅溝通問題喇。另一點，我哋香港係・右軚嘅，呢一點亦都係比較少見啲嘅。

唔該晒，主席。

歐陽先生：（經傳譯員）我想問下黎先生嘅就係喺你嘅開場白--對唔住，因為我有啲感冒所以把聲比較沉，你喺開場白嗰度有講過，就話你每一日就會特別抽樣檢查十四部巴士嘅，咁但係喺街上每日有數以千計嘅巴士，咁可唔可以解釋一下點解係定咗係每日抽查十四部車呢？

黎以德先生：（經傳譯員）主席先生，我相信--再次喇，就喺呢條問題上面，署長應該可以係答得更好。我講番嗰個具體嘅數字，即係點解係十四，咁同埋點樣樣達至呢個數字，至於話點解個數字唔係再多啲，你要明白，呢一個係一個突擊嘅檢查。換句話講，我哋當日即時係睇嗰架車嘅，即係之前冇預先嘅通告，冇預先嘅警告㗎，你可以想像一下，其實咁樣樣對於當日巴士嘅調動係會有影響，喺嗰一日嚟講，就係巴士公司就要調動一下嚟到搵另一部巴士去代替嗰部抽中咗嘅巴士㗎，所以喺營運上面嚟到考慮，你都要睇埋呢一點。

另外就係呢一個係喺年檢同埋月檢之外，或者係其他嘅巴士公司係做--或者係需要做嘅檢查以上再做嘅。而且巴士公司自己本身每一日都會有係檢查嘅，喺架巴士係出去服務之前就會做檢查，夜晚係返去車廠嘅時候都有，所以我哋呢一個係突擊係抽樣調查十四部車輛，呢一個係一個制衡嘅保障嘅措施，呢一個就係喺其他嘅所做嘅嘢以外再做嘅，所以我哋認為呢個做法都可以確保啲巴士就係穩妥嘅。

主席：（經傳譯員）我自己就冇咩嘢問題要問㗎，所以我就係感謝黎先生同埋蔡先生喇。葉女士，雖然你冇發言，但係亦都感謝你出席，我哋非常感謝你哋係協助我哋委員會，讓我哋係更好咁理解嗰個制度點樣運行。

我哋而家就係會小休午飯，我哋會兩點半再返嚟嘅，咁兩點半嘅時候就會聽陳女士嘅發言。

黎以德先生：（經傳譯員）好，唔該晒主席，唔該晒，係，律師。

下午 1 時 04 分聆訊押後

下午 2 時 27 分恢復聆訊

出席人士如前。

主席：（經傳譯員）陳女士同埋你哋運輸署嘅各位代表，我想邀請你哋坐上前面嚟。或者你哋可以逐個上嚟，我哋會係整隊人一齊坐喺度嘅。鄧樂勤大律師，你可以開始喇，係咪呀？

MR DUNCAN：（經傳譯員）各位先生女士，感謝大家提供咗書面嘅意見書畀我哋，交咗畀檢討委員會，亦都感謝大家今日出席，讓我有機會係問下大家一啲口述嘅證供。你哋係冇律師代表嘅，如果有嘅話，一般就會帶你哋係講番嗰啲係口述證供嘅，你哋會唔會係想係作一個口述嘅證供呢？

陳美寶女士：（經傳譯員）係，我想嘅，我就想喺席前就係作一個陳述。

主席：（經傳譯員）好，請你開始，唔該。

陳美寶女士：（經傳譯員）主席先生，委員會嘅成員，午安，感謝你哋畀我哋呢個機會今日喺你哋席前，讓我哋作一個口述證供，呢個就係關乎係運輸署如何去監管同埋監察係香港嘅專營巴士服務，我哋知道你哋係進行呢一個檢討嘅，呢個係喺大埔公路發生係巴士意外慘劇之後所組成嘅一個檢討委員會，係 2 月 10 號所發生嘅。

我自己以及係李萃珍女士同埋其他嘅助理署長，佢哋都係幫手係做呢個監察同埋監管嘅。我哋有陳英傑先生，佢係助理署長／行政及牌照；關翠蘭女士，助理署長／特別職務；同埋邱國鼎先生，佢係總工程師／道路安全及標準研究；同埋李美鳳女士，係總運輸主任／特別職務。我哋樂意係協助檢討委員會，我哋會如實作證，希望就係可以回答係你哋想問嘅問題，亦都係想話畀大家聽我哋作為一個監管機構，係如何工作嘅。

運輸署嘅首長係運輸署署長，佢係負責呢一個係《道路交通條例》，我哋亦都係會係睇呢一個公共交通服務，我哋亦都睇埋係主要嘅係交通基建嘅。我哋係有《公共巴士服務條例》同埋有關嘅規例嘅，呢兩者都係我哋最主要嘅係工具，讓我哋去監管同埋監察香港嘅公共巴士服務。我哋嘅政策嘅目標同埋公眾嘅期望，即係對我哋運輸署方面，都係要確保係專營巴士服務都係適當同埋係有效率嘅，呢一點亦都係喺條例嗰度寫明嘅。

講到安全方面嘅事宜，對我哋嚟講，都係好重要嘅，否則嘅話，就唔能夠係有一個係有效同埋可靠嘅服務。其實我哋喺驗車嘅時候，我哋會睇下有冇毛病，我哋亦都會睇下每一百萬行車公里係有幾多係意外率，呢啲都係我哋每年去評估一下究竟專營巴士公司係如何運作呢一啲都係不言而喻嘅。

為咗確保專營公司佢哋就係安全運作，我哋署方就非常之密切咁留意佢哋嘅表現，我哋會睇下佢哋喺設計、建造嘅階段，去到係投入服務嘅階段，我哋都會定期去檢查同埋檢驗佢哋嘅車輛，呢個都係喺我哋個規管框架底下係有咁嘅

要求嘅。

喺五千九百多部持牌嘅專營巴士，佢哋都係要係通過我哋年檢、月檢，同埋我哋就係每日抽查十四部專營巴士嘅，呢個都係每日十四部，其實我哋每年就總共有三千四百部咁嘅巴士受到檢查嘅。我哋亦都係每個月都檢討一下佢哋嘅安全表現，譬如話我哋去分析嗰啲意外嘅數字，呢一啲都係嚟自一個數據庫嘅。數據庫就係由警方同埋運輸署聯合係輸入嗰個資料同埋製作嘅，如果發現有咩問題或者一啲唔妥嘅地方，我哋都會跟進，都會同有關嘅經營者跟進，要求佢哋作一個解釋同埋作一個補救嘅。我哋亦都會去睇一睇每一間公司每年佢嗰個交通意外嘅趨勢嘅，我哋會睇嗰啲數字嚟到睇佢嗰個表現係如何嘅。

為咗讓公共巴士服務可以得以提供，我哋係批出一啲專營權嘅，而家總共就係有六個專營權係畀咗五家公司嘅，呢啲專營權都係授權係署長就可以係監管巴士公司嘅表現，我哋都係有一啲係服務嘅細節嘅，講及係巴士站嘅地點、票價，以及係每一條路線係要派幾多部巴士，呢啲都係有所指明嘅，其實係專營公司都係有咁嘅責任，就係要提供一啲紀錄，話畀我哋聽究竟有幾多部巴士、有幾多乘客、車程、巴士司機嘅職責、佢哋嘅編制同埋佢哋實際嘅人手，讓我哋署方可以就係根據番係嗰啲已經係批咗出嚟嘅服務表就係去跟進佢哋嘅表現嘅。

其實我哋嘅監管嘅工作都係不斷進行嘅，過往好多年，為咗我哋更好咁樣去監管巴士嘅服務同埋係提高呢一個服務嘅水質同埋安全，其實我哋係同巴士營運商就係有一啲係函件嘅，呢個都係根據係專營權去發出嘅，去確保佢哋就會增加嗰個安全嘅意識、提高個安全嘅水平同埋服務水平嘅。

我哋係有一個批准咗嘅一個服務詳細表，而我哋亦都係關注車長佢哋嘅工作環境，但係車長都係公司嘅僱員，而佢哋嘅僱用條件都係公司嘅人手政策之一嘅。我哋係有一啲行政嘅要求，呢個就係同專營公司係雙方協定咗嘅，我哋署方就係有一啲指引嘅，呢啲指引係關乎係工作、休息同埋用膳時間嘅指引，就係喺 1998 年嘅時候引入嘅，過去咁多年係修正咗係六次嘅，最新嘅係 2018 嘅，就係呢個畀佢哋喺呢個調派係車長去唔同嘅路線嘅時候有所依循嘅。巴士公司係需要經常咁樣樣話畀我哋聽，提供報告，話畀我哋聽究竟佢哋係咪遵從咗呢啲方面嘅指引嘅。另外我哋亦都就去進行調查，去睇下佢哋係咪跟從嗰個指引去做事嘅。

講到巴士車長嗰方面，其實係專營權公司亦都自願咁樣樣係作出一啲服務嘅承諾，亦都為所有新入職嘅車長就去提供呢個培訓，亦都每三年一次為現役嘅車長提供一個培訓嘅。佢哋亦都提供咗培訓方面嘅資訊，係每年咁樣向署方係交呢啲係資料，讓我哋進行呢個監察嘅。呢個當然係喇，如果話署方係每日咁樣去睇住佢哋係咪係跟從所有嘅指引，同埋嗰個資料紀錄係咪每一項都係準確無訛，呢個當然係一個不切實際嘅期望。

講到巴士服務方面，我哋係一個制衡嘅機制嘅，我哋就係透過係現場嘅調

查，亦都會睇下係乘客嘅滿意調查，以及係睇下有冇收到一啲係投訴嘅。

講番呢個安全，其實我哋係監察住專營巴士公司嘅服務。點樣做呢？就係睇下嗰個係意外嘅性質、因素等等嘅。此外，我哋亦都係會對一啲交通黑點進行調查，睇下嗰個趨勢，我哋亦都會同其他嘅商用車輛，係以全港嚟計佢嗰個意外率，係互相比較一下嘅。

我哋有跟進嘅工作嘅，譬如話每季都會有交通安全議會嘅係監察嘅；另外，我亦都會跟進其他嘅提議，我哋亦都有自己嘅觀察，譬如話我哋經常咁樣係同巴士公司去會面，去研究一下有啲咩嘢措施、有啲咩嘢建議係可以就係提升巴士車長佢嗰個駕駛嘅態度同埋係表現嘅。

其實我哋知道巴士嘅車隊同埋乘客量都不斷有所係擴大嘅，我哋知道同十年之前比較就係多咗百分之三點二四嘅，我哋嘅乘客量亦都係去到係三千萬人次嘅，其實係專營權公司係面對一個非常嚴峻嘅人手不足嘅問題嘅，所以無可避免嘅就係巴士公司係要尋求不同嘅方法嚟到去滿意呢個人手嘅需要。譬如話佢哋透過調查一個薪酬，希望係令到新入行嘅人士係覺得更加吸引，亦都將退休年齡係延長，以及係聘請呢個兼職嘅司機嘅。

就係喺一個咁嘅背景底下，我哋運輸署係見到有咁嘅需要去加強一下巴士車長佢嗰個安全駕駛嘅意識，我哋亦都係透過係監察佢哋嗰個培訓嘅安排嘅，包括係新入行嘅車長、在職嘅車長，無論佢係全職定係兼職嘅車長，以及係一啲特別嘅培訓或者一啲係補救嘅培訓，如果發現佢哋就係嗰個駕駛行為係唔好，又或者佢嗰個駕駛嘅工作係因為生病或者其他原因係暫停咗好一段時間嘅，我哋係希望係有一啲新嘅指引，呢個就係關乎係人手培訓方面嘅新嘅指引，希望裏面有一啲基本嘅指引，佢有啲咩嘢元素、係有幾長同埋就係嗰個比重嘅，好讓我哋可以係內部同埋係出面都可以監察住佢哋嘅表現嘅。

我哋已經同巴士公司就係喺頭嗰兩次係召開工作小組會議嘅時候講咗我哋嘅睇法，因為我哋有一個工作小組係喺3月13號同埋係4月30號就係舉行過呢啲會議嘅。我哋就希望係喺呢個 6 月尾嘅時候完成呢個工作小組嘅工作，係關乎安全嘅問題嘅。

講到話有啲乜嘢係設備可以協助車長嘅工作呢？我哋亦都同巴士公司同埋係巴士製造商係研究過，睇下譬如話新嘅巴士係咪所有嘅座位要有安全帶，同埋一個車速限制器，亦都係可以喺落斜嘅時候都做到，以及係有一啲係設備可以監察住車長嘅表現。我哋最終嘅目標都係希望安全駕駛，提高乘客嘅安全。

總括嚟講，我哋繼續係會監察呢一個公共巴士嘅服務，香港嘅公共巴士服務，我哋係會不遺餘力咁樣樣去提升呢一個安全嘅水平。

主席先生，我要作嘅開場白係到此為止，我同埋我嘅同事都係樂意回答大家嘅問題。

主席：（經傳譯員）好，唔該晒。鄧樂勤大律師。

MR DUNCAN：（經傳譯員）唔該晒主席。陳女士，我哋剛剛係聽到你嘅開場白，你講到呢一個監察嘅工作。我相信你都記得我哋呢個委員會佢嘅職權範圍，其中一項--大家可以或者睇番一個第 2 嗰項，即係關於呢個職權範圍，就係講到監管，即係監管專營巴士公司同埋係監察專營巴士公司。我知道今朝早你都係在席嘅，你都聽到我哋係向局方係問一啲問題，就係關乎係監管嘅工作嘅。我就監管嗰方面亦都係想問一問你嘅，有幾條問題問你嘅。目前嚟講，嗰個監察嘅工作係點樣進行嘅，或者你哋而家都喺度睇緊一啲轉變，因為聽你剛才所講，監察嘅工作係會有啲會有啲改變嘅，係咪呀？

或者首先咁，我嘅理解啱唔啱呢？目前嗰個程序，即係你做監察嗰個程序係咪係咁樣樣嘅呢，或者你可以睇番你嘅書面陳詞，就係 TD-2 第 293 頁嘅，你會見到呢度就有一份文件，就係附錄 L 嘅，就係有一啲嘅由專營巴士公司提交嘅紀錄，呢個就係運輸署交畀委員會嘅文件之一，你係咪已經搵到呢一頁呀？

陳美寶女士：Yes。

MR DUNCAN：（經傳譯員）正如即係以我理解，呢個表就係綜合咗各項嘅紀錄，就係呢啲就係專營巴士公司需要定期向運輸署提交嘅資料嘅，有時可能係每個月呈交，有時係每季呈交。喺現時嚟講，可唔可以咁樣講呢？呢個就係你主要監察巴士公司營運嘅方式呢？

陳美寶女士：（經傳譯員）係嘅。鄧大律師，呢個係附錄 L 嘅資料，就係符合咗同專營巴士公司簽署協議附錄 II 嘅或者附件 II 嘅要求，呢啲資料就係每月或者係每季呈交嘅。至於關於啲巴士乘客等等嘅資料，呢啲就係巴士公司透過一個電子系統去呈交嘅，而佢哋亦都需要係喺七日內係上載呢啲資料，咁樣運輸署就係可以定期去監察佢哋嘅工作，亦都可以係喺--即係以一個隨時嘅--即係隨時都可以去檢視佢哋嘅情況。

而運輸署署長就係可以定期係好嚴格地去檢視專營巴士公司嘅運作，而呢啲資料係令到我哋可以監察巴士服務、巴士路線、乘客或者係人手調配方面嘅問題嘅。我哋係可以--為咗確保係咪實際係有進行咗呢啲安排，運輸署亦都係有定期係有一啲實地嘅抽查，包括就係喺巴士上面、巴士站嗰度，而呢啲實地嘅檢查就會係以一個隨機嘅形式進行嘅，目的就係確保佢巴士商呈交嘅資料都係正確同埋準確嘅。

除此之外，我哋亦都有做一啲乘客嘅滿意度調查，我哋就會從乘客收集一啲服務水平嘅資料，係比較有系統咁樣做嘅。

MR DUNCAN：（經傳譯員）呢啲實地嘅調查，即係你啱啱所提到呢啲調查，喺呢一個附錄 L 入面有冇提及到㗎？

陳美寶女士：（經傳譯員）我會話呢啲實地嘅調查其實已經係包含咗附錄 L 嘅大部分項目。

MR DUNCAN：（經傳譯員）或者我想帶你哋去睇 297 頁嘅，喺文件冊入面。喺右面

1 嗰一欄，你就見到係獨立顧問所進行嘅調查，呢個係咪另外一項調查嚟嘅呢？

2 陳美寶女士：（經傳譯員）呢個就係一項特別調查嚟嘅，我哋就係委託咗一個獨立嘅
3 公司係去檢視呢一個指引嘅執行嘅。

4 MR DUNCAN：（經傳譯員）委員會而家考慮嘅點就係即係究竟係呢一個附錄上面所-
5 -即係有啲咩嘢係喺呢個附錄嘅進行嘅基礎上面去做嘅呢？陳美寶女士：（經傳
6 譯員）你講到呢啲突擊檢查，而突擊檢查就包括一啲突擊嘅檢查同埋每月嘅檢
7 查，而巴士營運商係需要每月進行檢查嘅，但係根據法定嘅規定，運輸署係有
8 監管巴士車隊嘅運作同埋狀況嘅，而運輸署有進行每年同埋每月嘅檢查。

9 但係除此之外，為咗確保我哋監管嘅工作係穩妥，而我哋驗車嘅隊伍亦都係
10 會進行一啲突擊檢查，就係每間巴士公司嘅車隊平均係會檢查十四架巴士嘅，
11 呢個係唔會事先通知，目的係確保除一啲常規檢查之外，因為巴士公司可能已
12 經準備好接受呢啲常規檢查，我哋除此之外，亦都係會有突擊檢查去確保呢啲
13 巴士嘅狀態係良好嘅。

14 MR DUNCAN：（經傳譯員）你講到一啲定期嘅實地嘅一啲檢查，呢個係咩嘢意思
15 呢？

16 陳美寶女士：（經傳譯員）呢啲就係關於服務嘅提供，包括係嗰個巴士嘅車程，喺某
17 啲嘅巴士站，上車或者落車嘅乘客嘅數目、個別巴士嘅車長調配，同埋有冇任
18 何嘅延誤或者係人手調配上面有冇變更等等，同埋原本嘅計劃有冇任何嘅出
19 入。

20 MR DUNCAN：（經傳譯員）邊個係會進行呢啲調查？

21 陳美寶女士：（經傳譯員）係運輸署嘅。或者我可以講多少少詳情究竟實際係點樣進
22 行嘅。

23 李萃珍女士：（經傳譯員）因為資源問題，我哋亦都係將呢啲調查服務係外判畀某一
24 啲嘅公司嘅，但係有時我哋係會睇下實際嘅情況係點樣，去睇下需唔需要係回
25 應某啲區議會嘅要求等等，而呢啲服務就係外判畀一啲獨立嘅承辦商嘅。

26 MR DUNCAN：（經傳譯員）有冇書面嘅紀錄㗎？

27 李萃珍女士：（經傳譯員）有嘅。

28 MR DUNCAN：（經傳譯員）呢啲嘅書面紀錄有冇呈交畀檢討委員會？

29 關翠蘭女士：（經傳譯員）正如署長所講，呢啲全部都係同服務有關嘅，就係睇下呢
30 啲即係實際提供嘅服務同運輸署署長所指定嘅係咪一致。

31 MR DUNCAN：（經傳譯員）我諗我哋未見過呢啲資料，其實有冇--係咪--如果我哋想
32 睇呢啲資料，係咪有呢？

33 陳美寶女士：（經傳譯員）文件冊入我哋冇包括到呢啲資料嘅，但係如果有需要，我

啲可以提供嘅。

MR DUNCAN：（經傳譯員）陳女士，你啱啱講到，你提到就係道路安全議會進行每月嘅檢查，係咪？或者係即係喺監管方面。

陳美寶女士：（經傳譯員）係每季進行嘅，每季進行。

MR DUNCAN：（經傳譯員）你可唔可以畀多啲詳情我哋呢？

陳美寶女士：（經傳譯員）喺道路安全同埋標準科就係由邱國鼎先生係處理嘅，佢哋係會負責係去睇一啲交通意外嘅數字，呢啲就係由警方同運輸署共同提供嘅。而工作嘅目標就係去監管道路或者交通意外嘅成因同埋詳情，而佢哋係每季係向道路安全議會提交一個報告嘅，喺報告入面，佢哋係會分析喺呢啲意外之中有冇一啲共通點，目的就係可以提供一啲改善或者解決嘅措施，而範疇係包括道路安全、車輛安全或者係人為因素嘅，包括司機嘅行為或者譬如話會唔會有行人係以一啲好危險嘅方式過馬路等等，呢啲就會呈交畀道路安全議會，然後我哋係會有相應嘅跟進行動嘅。

如果有任何關於專營巴士公司嘅分析，特別係關於車長嘅行為或者表現，相關嘅資料亦都係會交畀運輸署嘅道路同埋鐵路科嘅，而我哋亦都係會提醒佢哋去提醒巴士車長有咩嘢需要注意嘅。

MR DUNCAN：（經傳譯員）喺嗰個謄本入面有冇提到呢？就係喺呢一個跟進嘅行動，就係包括每季嘅報告同埋係由道路安全議會係監察嘅，道路安全議會係咪獨立於運輸署？

陳美寶女士：（經傳譯員）係，冇錯，道路安全議會係獨立於運輸署嘅。我想更正一下頭先頭先所講嘅。

MR DUNCAN：Yes, please.

陳美寶女士：（經傳譯員）就頭先話運輸署係會就住呢啲交通意外進行每季嘅報告，同埋會分析佢哋嘅嚴重性同埋性質，然後我哋係會向道路安全議會提交每季嘅報告。而我哋分析所衍生嘅建議，就係會包括道路安全嘅檢討、車輛安全嘅改善同埋定期係同專營巴士公司會面，就係會討論車長嘅行為嘅。

MR DUNCAN：（經傳譯員）你向道路安全議會提供嘅報告就係根據巴士公司向你提供嘅資料，係咪呀？

陳美寶女士：（經傳譯員）基本上係根據運輸署道路安全及標準科進行嘅分析，係會從一個共同嘅資料庫度係去獲取一啲資料嘅，所以呢個來源係嚟自警方同埋運輸署，唔係來自巴士公司嘅。

MR DUNCAN：（經傳譯員）就住運輸署監察巴士公司，除咗係即係呢...

陳美寶女士：（經傳譯員）我哋係有自己嘅資料庫，我哋並唔係只係依賴巴士公司嘅

資料嘅。

MR DUNCAN：（經傳譯員）我就想請你講一講除咗--即係喺巴士公司提供嘅資料之上，你就有做咗啲咩嘢或者提供咩嘢資料呢？

陳美寶女士：（經傳譯員）如果有啲嚴重嘅意外或者致命嘅意外，一啲相關嘅巴士嘅公司就會將呢啲資料就入咗落呢個資料庫，而運輸署同埋警方係會共同係維護呢個資料庫，亦都係會定期監察呢個資料庫，同埋係會分析呢一個資料庫嘅。佢哋係會獨立去進行呢啲資料，而唔會係依靠巴士公司提供嘅資料嘅，因為巴士公司就住意外嘅報告可能係會遲一啲先至出現，或者可能係佢哋每年嘅報告之中先至會提及嘅，所以呢個資料庫係由警方同埋運輸署共同維護。而我哋每季係會呈交畀道路安全議會嘅。

MR DUNCAN：（經傳譯員）即係你係要依賴警方嘅資料，我嘅問題就係運輸署有啲咩嘢工作係獨立去進行去幫助啲巴士公司，而唔係去依賴其他嘅資料呢？

陳美寶女士：（經傳譯員）我會邀請邱國鼎先生我哋嘅總工程師去回應嘅。

MR DUNCAN：Thank you.

邱先生：（經傳譯員）多謝主席、律師。正如署長所講，我哋係由一個電腦系統直接係去取得啲資料，而呢啲資料係由警方輸入嘅，而我哋係可以攞到呢個系統上嘅資料嘅，我哋係會進行一啲監管同埋分析，包括係一啲趨勢、意外嘅數目、嚴重性、車輛嘅類別同埋成因等等。

而意外嘅成因可能係同駕駛有關、環境、車輛等等有關嘅，如果我哋發現有一啲共通嘅成因或者係觀察，我哋係會每季向道路安全議會匯報，而議會嘅成員係包括唔同局嘅官員，包括係運房局、教育局、警務處、路政署同埋一啲其他外在嘅成員，譬如話由醫委會、道路安全協會、香港汽車會等等。

而道路安全議會就會係訂立政策同埋去執行一啲嘅改善措拖，譬如話係訂立新嘅法例、進行一啲宣傳工作等等。

MR DUNCAN：（經傳譯員）唔該晒。你剛才講嘅就係意外嗰方面嘅情況，但係我問嘅就係一般嘅係營運上嘅情況，我呢度就睇到你哋有啲文件嘅，如果我嘅理解冇錯，你就係話運輸署會做唔同嘅工作嚟到睇下巴士公司佢嘅運作嘅，你頭先有提過係突擊檢查，每日就有十四部，呢個我哋明白嘅。另外你亦都有提過，就係話嚟自係乘客調查嘅意見，你亦都有提過話定期係實地進行呢個調查，可唔可以係詳細啲講一講係乜嘢一回事呢？邊個去做嘅呢？同埋會得出啲咩嘢結論呢？

陳美寶女士：（經傳譯員）或者我係請李女士去講。

李萃珍女士：（經傳譯員）好，唔該晒主席。由於法例有咁嘅要求，就講到話係公交營運商佢哋嘅服務表現係有規定嘅，署長嗰方面就要求有時間表、路線、係巴

士站等等嘅，我哋做啲咩呢？一係我哋喺總站嗰度進行調查，譬如話我哋喺某一條路線，我哋就會派啲人去到總站嗰度，就會睇睇佢幾多點鐘開車、睇下巴士公司係咪跟番個時間表，另外我哋亦都會睇下有幾多乘客上車；咁喺另一個車站，我哋亦都會睇埋嗰個到達時間，即係話佢用咗幾長嘅時間，亦都知道究竟有冇延誤等等，呢啲係總站同埋車站嘅調查。

另外亦都有車上嘅調查嘅，我哋有調查人員上咗車上面，每一個站佢就會記錄低有幾多人落車、有幾多人上車，我哋會有啲詳細嘅營運嘅資料，好重要嘅，因為一直嚟講，我哋一直係要確保巴士公司係跟番嗰個時間表嘅，因為好多時都有投訴，就話有脫班，我哋就係要係檢查嗰啲報告，然後同巴士公司跟進。

另外就係一個規劃嘅角度，好多時係有一個要求，就話要改嗰啲路線，將啲路線合併等等，所以喺規劃嗰方面亦都要靠呢一啲數據。呢啲數據，我哋喺巴士公司嗰度有嘅，但係我哋都想去核實一下同埋我哋亦都需要一啲更新嘅、更合時嘅資料畀我哋進行規劃。呢啲係啲紀錄，我哋亦都有實地嘅調查，去睇下佢嗰個系數，讓我哋係知道點樣樣規劃，亦都可以進行呢一個服務表現嘅監察。

MR DUNCAN：（經傳譯員）當然好多呢一方面嘅工作未必係同安全有關嘅，我就想問運輸署有冇獨立咁樣樣就巴士公司所提交嘅紀錄去睇一睇呢，或者獨立咁樣去查核一下，去睇一睇佢哋喺安全方面所做嘅工夫，譬如話培訓車長，定抑或你完全係倚賴巴士公司講啲咩畀你聽呢，定抑或你自己會自行獨立咁樣樣去睇睇佢嗰個係安全要求有冇做到呢？

陳美寶女士：（經傳譯員）讓我嘗試回答一下。講到安全有關嘅方面，其實我亦都提咗兩點嘅，九個重要嘅指標裏面有兩個，一個就係話每一次檢查巴士係有幾多個係安全上面嘅問題，另外就係每日係抽查十四部巴士嘅，或者我請呢一個係助理署長去補充。

MR DUNCAN：（經傳譯員）嗰方面唔使喇，我哋明㗎喇。

陳美寶女士：（經傳譯員）另外係有幾多巴士係涉及意外？即係每百萬行車公里嘅涉及意外率，呢個都係我哋睇住嘅一個係數據。我哋會睇巴士公司所提供嘅數據，譬如話究竟每一百萬行車公里有幾多部巴士涉及意外，然後我哋會逐年逐年咁去比較嗰個表現。

培訓亦都係好緊要嘅，巴士公司亦都有提過，巴士公司就話係車長嘅培訓係重要嘅，係要確保係車長有足夠嘅培訓。喺呢一方面，巴士公司自願咁樣樣就係作出兩個服務承諾，一個就係話所有新入職嘅車長係有培訓，另外就係所有在職嘅車長都會係每三年再會有一次嘅培訓。

巴士公司提供咗一啲資料畀我哋嘅，喺呢一方面，喺佢哋每年嗰個計劃嗰度都有話畀我哋聽係點樣樣去落實佢哋自願作出嘅呢一個服務承諾，我哋會睇佢

啲呢啲資料，而且亦都每年去檢視佢哋嘅表現嘅。

我要係強調一點，運輸署並唔會係再自己獨立咁進行去查核嘅，因為呢啲培訓嘅工作唔係源自嗰個係專營權或者係嗰個條例嘅，其實就係巴士公司係自願咁樣樣係提出呢一個就跟進我哋同佢哋講係如何去加強巴士安全。其實喺法例上面就係冇咁嘅要求，專營權嗰度亦都冇咁嘅要求嘅，所以到目前為止，我哋運輸署就係冇抽樣調查、突擊檢查或者係自己獨立咁去調查佢哋嗰個車長方面嘅培訓。

MR DUNCAN：（經傳譯員）換句話講，你就冇好似條例要求嗰度咁講話有任何嘅指示或者要求，係咪呀？

陳美寶女士：（經傳譯員）冇嘅。

MR DUNCAN：It's all done on a voluntary basis?

陳美寶女士：No direction or requirement.

MR DUNCAN：（經傳譯員）我等陣間亦都會再睇番呢一個表裏面嘅資料，但係我想而家問你嘅，就係話運輸署有冇獨立咁樣樣去再跟進呢？即係除咗佢哋所交畀你嘅紀錄之外，有冇再自己獨立咁去睇佢哋嘅安全表現呢？

陳英傑先生：（經傳譯員）係，等我補充一下。署長剛才提過呢個突擊檢查，呢個就係檢查啲車輛嘅。另外巴士公司今時今日嘅巴士都要接受每年嘅檢查同埋維修，然後我哋運輸署就會再檢查嘅，所以可以話係一個獨立嘅檢查，呢個亦都係同係抽樣調查係不同嘅。運輸署的而且確係會有一個獨立嘅資料，因為我哋自己係有由自己嘅驗車主任去進行呢個檢查嘅，呢個就係喺車廠嗰度做。

MR DUNCAN：（經傳譯員）好喇，好，或者係睇番呢個附件 L，講到係巴士公司，專營巴士公司佢哋提交啲乜嘢嘅紀錄同埋資料嘅。呢度可以見到，你就講番話--即係睇番係條例嘅邊一條或者係咪跟呢個專營權，你另外亦都有講到話有咩嘢跟進嘅行動。我睇過嗰啲係跟進嘅行動，運輸署嘅跟進行動，我就想去睇下，你有冇做一啲工作去進行一個調查等等。我首先睇嘅就係 296 頁嗰度，屘二嗰格，嗰度有第二段，嗰度就話獨立嘅顧問進行一個調查，睇到嗰句未呀？

陳美寶女士：（經傳譯員）睇到。

MR DUNCAN：（經傳譯員）唔該。其實下一個格仔，即係話 296 頁最底下嗰度亦都有一樣咁嘅講法，落去 297 頁頂頭嗰個格亦都有咁講，我相信呢度三處嘅地方都係講番同一個調查，係咪呀？

陳美寶女士：（經傳譯員）啱。

MR DUNCAN：（經傳譯員）可唔可以再講多一啲，究竟呢度所講嘅獨立顧問所進行嘅調查係邊一個顧問同埋究竟佢做啲咩嘢調查？

陳美寶女士：（經傳譯員）係，我亦都再想請李女士去答嘅。

李萃珍女士：（經傳譯員）唔該主席。呢啲調查就睇下係專營巴士公司佢哋有冇跟從我哋嘅指引，呢個就係關乎巴士車長嘅安排嘅指引嘅。其實唔係最新嗰份，而係就係有--之前嗰個係四個部分，主要就係講嗰個休息嘅時間同埋工作嘅時間嘅。

呢一類嘅調查嗰個調查人員就會隨機咁樣抽查一啲司機，然後嗰個調查人員就會整日咁跟住嗰個司機嘅。我哋會睇住究竟佢係咪真係得到嗰個休息時間呢？有咁長嘅時間呢？亦都會睇埋嗰個駕駛嘅時間--嗰個更次裏面嘅駕駛時間係咪冇超過嗰個上限，所以我哋會跟住嗰個司機嘅。

至於話兩更之間嘅休息時間，我哋會睇下佢簽到同埋走嘅時候簽名嗰個時間，所以就會有兩隊唔同嘅調查人員去做嘅。呢啲調查人員係點呢？喺邊度搵番嚟嘅呢？我哋會係公開招標，搵一啲合資格嘅顧問幫我哋做嘅，我哋就搵最適合嘅顧問公司同我哋做，就係請佢哋進行呢個調查嘅。我哋有呢啲嘅資料，我哋就會睇到佢哋究竟係咪有跟從嗰個指引嘅。其實嗰個遵從律多年嚟都幾高嘅，我哋見到有少量就係未有遵從嘅個案，我哋會問公司點解有咁情況，好多時都係因為一啲佢哋控制唔到嘅因素嘅。我要指出就呢個係勞工密集嘅一項工作嚟嘅，我哋係有萬二個係巴士司機嘅。

MR DUNCAN：Sorry, you do 12,000?

李萃珍女士：Yes.

MR DUNCAN：（經傳譯員）你話萬二個，「萬二」係乜嘢？

李萃珍女士：（經傳譯員）我哋抽查嘅，將呢六間公司縱合嚟到一齊睇，總共就有萬二個調查嘅。

MR DUNCAN：（經傳譯員）你即係同萬二個...

李萃珍女士：（經傳譯員）對唔住，係一千二百，每年係一千二百個司機，我哋睇一千二百個司機。

MR DUNCAN：（經傳譯員）幾時開始做呢啲工作？第一次搵調查人員去做呢啲工作係幾時呢？

李萃珍女士：（經傳譯員）我諗起碼係喺 2010 年有呢個指引嘅時候就開始做嘅，之前我就唔係太肯定。

MR DUNCAN：（經傳譯員）署長，而家請你睇呢個 297 頁，嗰頁中間嗰度有一個方格嘅，嗰度亦都係講係獨立顧問進行調查，係咪就係你較早時候所提及嘅嗰個調查呢？

陳美寶女士：（經傳譯員）係，我可以確認，係講番同一個調查。

MR DUNCAN：（經傳譯員）另外喺 299 頁，呢個就係乘客聯絡小組嘅報告嚟嘅，佢講到就係派一啲代表去出席乘客聯絡小組嘅會議，你可唔可以講多啲詳情？

陳美寶女士：（經傳譯員）我想邀請我哋嘅助理署長係去講一講。

關翠蘭女士：（經傳譯員）主席，而每間巴士專營公司會每兩個月係安排一次乘客聯絡小組嘅會議嘅，當佢決定咗小組會議嘅地點之後，就會通知我哋，而我哋就會派代表去出席呢啲會議嘅。我哋會監察呢啲專營巴士公司就會係即係好妥當地進行呢一啲嘅小組會議。喺呢啲會面之後，佢哋亦都係會將呢啲紀錄就會呈交畀我哋作規劃嘅用途嘅。

主席：（經傳譯員）你嘅意思係咪有兩組嘅資料，有一套就係由你嘅代表去做，另外一組就係由巴士公司去準備嘅？

關翠蘭女士：（經傳譯員）我哋只會派一位代表去出席呢啲會議嘅，因為我哋唔可以個別去問晒每一個乘客意見嘅，所以我哋會係聽乘客嘅意見，我哋會自己去做一啲筆記，即係我哋唔會有一個好正式嘅紀錄，但係我哋係--即係當我哋嘅同事返番去公司之後，就會向上級匯報嘅，但係雖然巴士公司係會有晒紀錄，而佢哋事後係會向我哋呈交嘅。

主席：（經傳譯員）即係話會有兩組嘅紀錄，係咪呀？

關翠蘭女士：（經傳譯員）係。

主席：（經傳譯員）之前有冇呈交呢啲紀錄畀我哋，可唔可以之後畀我哋？

關翠蘭女士：（經傳譯員）可以嘅。

MR DUNCAN：（經傳譯員）通常會有幾多人係出席呢一啲乘客聯絡小組嘅會議呀？

關翠蘭女士：（經傳譯員）主席，呢個係視乎小組會議嘅地點喺邊，如果係一啲比較受歡迎嘅地點進行，可能會有二十幾個乘客。

MR DUNCAN：Who determines the make-up of the passenger liaison group?

關翠蘭女士：Pardon me？

MR DUNCAN：（經傳譯員）邊個係--即係由邊個去決定乘客聯絡小組嘅成員係--嘅組成係由邊個決定嘅呢？係咪由運輸署選擇嘅呢，定係由巴士公司去選擇嘅呢？

關翠蘭女士：（經傳譯員）佢係由巴士公司去決定嘅。

MR DUNCAN：（經傳譯員）唔該晒。我就問完呢一份文件。

主席：（經傳譯員）喺我哋繼續之前，我想知道呢啲乘客聯絡小組會唔會提及到巴士安全嘅問題呢？

關翠蘭女士：（經傳譯員）呢個好視乎乘客嘅意見，係唔會有一啲特定嘅議題去規限

啲乘客嘅，乘客係可以表達任何嘅意見。

主席：（經傳譯員）或者我個問題應該係咁問，啲乘客有冇曾經提到巴士安全嘅問題呢？

關翠蘭女士：（經傳譯員）喺我印象中，大部分嘅意見都係同一啲車費、優惠同埋服務有關。

主席：（經傳譯員）係咪巴士安--即係冇提及過巴士安全嘅問題呢？

關翠蘭女士：（經傳譯員）係好少嘅。

主席：（經傳譯員）唔該晒。係，鄧律師。

MR DUNCAN：（經傳譯員）我想講另外一個話題，今日下午我哋有講到呢個巴士車長工作、休息及用膳時間指引，你嘅同事就提到 2010 年嘅指引，我哋知道呢個指引最近亦都係有修訂，喺今年 2 月係有一個修訂本嘅，我想講番你喺 5 月 4 號提交嘅額外嘅陳述，你呢個就係第 157 頁，你回應委員會嘅問題之中，喺 D 段，你就提到運輸署就係從一個巴士車長嘅聯盟係收到一項嘅建議，就係表示指引係應該修訂嘅。然後就講到運輸署係有同專營巴士公司同埋另外一個巴士車長嘅工會係傾過呢個意見，而兩者都係反對呢個建議嘅。喺同呢個提建議人嘅討論之後，就係決定唔會修訂指引。喺 2015 年之前，係咪已經收到一啲要求或者係建議，係去修訂啲指引，即係運輸署有冇收到呢啲建議，你有冇印象？

陳美寶女士：（經傳譯員）首先訂立指引嘅過程係好漫長嘅，係由 1993 年開始，就係當時我哋去開始訂立一啲指引，係以自願性質係畀一啲巴士公司去遵從嘅。係到 1998 年先至正式係頒布啲指引，係要求巴士公司係跟隨嘅。而喺 98 年頒布指引之後，指引已經係修訂咗六次，喺咁多年嚟，一直都係有唔同嘅意見，就係嚟自一啲職員嘅工會，就係希望係改善工作嘅環境同埋縮短車長嘅工作時間。

我哋亦都係明白一直都--即係外間都係希望專營巴士嘅服務得以提升嘅，所以根據我哋嘅書面陳述，我哋提到 15 年 3 月呢一個就係一個例子係去說明職員工會一直都係有一個確切嘅要求，希望係改善車長嘅工作條件同埋工時嘅。唔該晒。

MR DUNCAN：（經傳譯員）我想你撳去文件冊 SEC 1 號，我想你睇第 437 頁，呢份係立法會交通事務委員會嘅會議紀錄嘅，就係 2012 年 11 月 27 號，你見唔見到呀？請你撳去第 441 頁，喺最底嗰度，你就會見到，佢就話主席就話一個喺柴灣，喺 2012 年 11 月 19 號嘅嚴重交通意外係涉及兩架巴士同埋一架的士，係引致公--即係大眾嘅憂慮，就係對於呢啲專業司機嘅健康同埋駕駛態度嘅，特別係巴士車長。

請你撳去第 442 頁，第 2 段就有提及運房局局長同埋運輸署署長，就係簡單介紹事件，就係包括係專營巴士公司車長嘅健康檢查同埋工時安排。

而喺第 447 頁第 24 段，局長係承諾政府係會檢視呢啲指引嘅，就會同相關嘅持份者合作，包括係專營巴士公司同埋佢哋嘅工會。佢表示運輸署係有同一啲主要嘅巴士車長工會係溝通，去討論嗰一宗意外所引申嘅問題。

而第 454 頁，呢個就係由主席去總結，佢就感謝各方出席會議，而佢表示議員一般都係對巴士公司車長嘅健康檢查方面係有擔憂嘅，而佢認為政府係需要檢視各個方面嘅，包括係改善一個現有嘅交通網絡。

喺 2012 年至到深水埗交通意外，即係 17 年嗰宗意外，期間係冇任何修訂過，即係嗰份指引。而政府係幾時或者係點樣決定去--即係當時係修訂指引嘅呢？

陳美寶女士：（經傳譯員）或者我可以畀一個比較一般嘅答案，然後我就會交畀關女士去講啲詳情嘅。講番 12 年嘅交通意外慘劇，當時有兩項主要嘅跟進行動嘅，第一係就係提升巴士車長健康檢查嘅要求，喺嗰一宗意外之後，我哋係要求所有嘅巴士公司係去提升呢一個健康檢查嘅要求，除咗每年為 50 歲或以上嘅車長進行健康檢查之外，就住一啲已經申報有重大健康問題嘅車長亦都會再進行年檢嘅，就令到車長嘅健康檢查更加頻密，同埋亦都係會包括車長嘅心臟檢查嘅。我哋都係要求巴士車長，係為 54 至 60 歲嘅車長安排健康檢查。

至於檢討指引方面，我係明白當時運輸署係有檢視巴士車長工時嘅要求，但係最後係冇--即係喺當時係冇修訂到指引，但係運輸署係有檢視指引，去睇下有冇任何部分係需要改善嘅。

主席：（經傳譯員）你表示就係有兩項嘅跟進行動，就喺 12 年 11 月之後嘅交通意外，第一項係檢視呢個健康檢查嘅安排，第二就係？

陳美寶女士：（經傳譯員）第二項就係檢視指引，但係當時係冇進行任何嘅修訂嘅。多謝主席。

關翠蘭女士：（經傳譯員）我想補充一下，呢個工時指引對上修訂係 2010 年，當時係有一啲新嘅指引，就係關於用膳時間嘅。而我哋喺 2010 年頒布指引嘅時候，我哋係允許巴士公司就係喺兩年之後先至係實行呢個用膳時間嘅指引，即係話喺 2012 年係全面實施咗相關嘅指引，至於話點解 2013 年檢討之後指引冇修改，我諗我而家係唔能夠準確咁去回答，畀少少時間我哋返去查核一下，有可能就係剛剛先至係喺 2012 年嘅下半年先至係全面實施對上一次嗰個係修訂嘅要求，有可能就係話想有一啲時間去睇睇係專營巴士公司佢嗰個表現，畀多啲時間睇咗佢哋表現，然後再作呢個修訂都唔定嘅。

MR DUNCAN：（經傳譯員）好，唔該。陳女士，我諗今朝早我向係局方提問嘅時候，你都在場嘅，當時我哋就問過，就點解呢啲指引就純粹只係指引嚟嘅呢？就唔係成為一部係規例呢？因為條例度係有講，就呢一啲事宜係可以訂定規例嘅，你就呢一個問題，你可唔可以幫到手呢？可唔可以講出嗰個原因點解呢啲只係指引，就唔係一個規例呢？甚至乎唔係一個指示，亦都唔係一個要求呢？

陳美寶女士：（經傳譯員）讓我嘗試，我今朝都在場嘅，我亦都係理解剛才你喺咩情況之下提出呢個問題，你就係話其實係咪應該用一個更好嘅方法去實施呢一個要求呢？譬如話作為法例嘅一部分，又或者作為一個專營權嘅條文嘅一個部分，讓我係從呢一個係營運同埋係一個監察嘅角度去到睇。

講到呢個工作時間嘅指引，佢係一個好長嘅歷史，亦都係一個不斷演化嘅係情況，呢個指引已經經過多次嘅修訂，指引裏面所列出嘅要求，用咁嘅形式嘅好處就係我哋可以更適時咁樣去進行檢討同埋修訂。如果係喺條例或者規例裏面訂明嘅話，就冇咁容易去檢討同埋修訂。當然我雖然咁講，我亦都覺得我哋應該不遺餘力咁樣樣去係檢討我哋嘅條例，同埋係如果有需要，去修訂。

佢係指引，指引佢可以更有彈性，亦都可以係因應當時嘅情況係加以係提升。其實專營巴士嘅服務係非常之勞工密集嘅，而且亦都有好多規範性嘅要求，係要求巴士公司喺服務裏面係做得到嘅，喺呢一個角度，其實我哋希望作出一個平衡，一方面希望佢哋係根據嗰個專營權嘅要求，提供一個巴士嘅服務，另一方面，我哋亦都希望能夠係提升係車長佢哋嘅工作嘅條件。

指引，佢而家係指引嚟嘅，但係喺我哋嘅係意見書嗰度就講咗，喺行政上，我哋亦都要求係專營巴士公司話畀我哋聽佢哋有冇遵從呢一個指引，而且我哋亦都獨立咁樣去調查啲指引有冇得到遵從，嚟到確保係巴士公司係有遵守嗰個嘅指引嘅。

而呢個指引係點樣制訂出嚟呢？呢個就係長時間雙方商討係同意之後得出嘅結果嚟嘅，所以我哋就覺得喺呢一方面嚟講，都可以作為一個合約嘅要求，因為呢個係政府同巴士公司之間不斷嘅對話而得出嘅成果。

另一方面，同巴士公司所簽訂嘅專營權，28(1)(a)條嗰度就有講嘅，就話巴士公司係需要係提供一啲紀錄嘅，呢個係跟乎就係專營權附表 II 嗰度提供嗰啲文件嘅，呢一個附件 II 嘅(l)嗰項，我哋其實喺專營權嗰度係講咗，專營公司係要畀資料、畀紀錄我哋，包括以下：就係有幾多係--即係我哋係署長所講及嘅巴士司機嘅係百分比，讓我哋知道佢哋嗰個工作時間、佢個休息時間等等，而呢個都係同專營公司同意咗嘅指引。

主席：（經傳譯員）對唔住，我想打斷一下，可唔可以攞其中一份嘅專營權嘅文件嘅 21(sic)(1)(a)嗰度出嚟呢？

MR DUNCAN：（經傳譯員）可以嘅，可以。THB-2，睇番 THB-2 嗰個文件夾裏面嘅相關嘅頁數，係 137 頁，佢係講到 169 頁，陳女士係講 169 頁。

主席：（經傳譯員）係 158 頁，係咪呀？嗰個第 28 條，然後第 168 頁就係附件 II 嘅。係，打番出嚟，咁可能幫到你答呢個問題，係咪呀？陳女士。

陳美寶女士：（經傳譯員）係呀。

MR DUNCAN：（經傳譯員）似乎呢一度就係要求去提出呢一個係紀錄，係咪呀？

陳美寶女士：Yes。Yes。

MR DUNCAN：（經傳譯員）就唔係...

陳美寶女士：（經傳譯員）我唔係一位法律嘅專家，不過我就想嘗試去解釋我哋點樣樣引用嗰個條文，喺實際上點樣係運作。

MR DUNCAN：（經傳譯員）係呀。

陳美寶女士：（經傳譯員）署長--我作為署長，係要運用我嘅權力嚟到確保係巴士公司係會係根據我哋所要求嘅百分比嘅樣本就係提供嗰啲紀錄嘅，呢一個就係睇番呢一個係(l)嗰項嘅，即係話如果我哋認為巴士公司係冇或者無法提供嗰個係紀錄，即係根據我哋呢度(l)呢項嘅要求去做，又讓我哋就感到懷疑、有疑問，究竟呢一個係專營權公司係咪真係提供一個適當而有效率嘅服務，我哋亦都可以採取係相關、適當嘅行動，針對呢間公司。

MR DUNCAN：（經傳譯員）即係話你有一個彈性，一方面係有個彈性，另一方面，睇嚟就係你亦都可能冇嗰個規管嘅力度。12A，條文 12A 嗰度就講係可以施加呢個經濟罰則，就變咗係無法做到，係咪呀？

陳美寶女士：（經傳譯員）我會咁講，佢就唔係構成一個法定嘅責任，即係話如果巴士公司喺冇遵從指引，嗰度就唔係構成一個係法定嘅責任，就唔會話即時就係引致就係 12A 嗰度係有問題，就話可以係要求佢交一個經濟嘅罰則。不過喺呢個附件 II 嘅(l)嗰項，我哋有呢一點，就係想確保巴士公司係會係應我哋嘅要求，提供嗰個資料，而且我亦都可以進行呢個獨立嘅調查嘅，根據佢畀我哋嘅數據。我哋亦都會喺評估究竟嗰個巴士公司係咪提供咗適當而效率嘅服務嘅時候，亦都可以以此作為一個根據。

MR DUNCAN：（經傳譯員）我想睇番有關嘅條文嘅，我諗你面前都有嘅，104 頁，有關嘅條文喺 104 頁嗰度，呢個就係講及嗰個遠期計劃，12A，睇到嘛？

陳美寶女士：Yes。

MR DUNCAN：（經傳譯員）我想問你呢個問題，署方係喺呢個遠期計劃嗰度，會要求專營巴士公司講及安全方面嘅嘢會去到咩嘢程度嘅呢？

陳美寶女士：（經傳譯員）呢個遠期計劃其實就喺法例嗰度係有一個係條文嘅，遠期嘅計劃係作為一個規劃嘅工具，而佢基本上就會講及係呢一個係巴士公司營運者佢嘅--係喺專營權底下究竟要提供咩嘢服務嚟到滿足嗰個要求嘅。我相信喺我哋嘅文件夾嗰度都有嗰一個內容表係講咗出嚟嘅，喺嗰個遠期計劃嗰度，其中一個項目就係關乎巴士安全嘅，其實呢個係睇番過往我哋分析咗係涉及專營巴士嘅巴士交通意外，亦都係完善我哋同巴士公司就一啲重要嘅事項商討嘅結果，呢啲都係關乎安全事宜嘅。

主席：（經傳譯員）或者你等等，我諗佢哋嘗試係打番嗰個目錄表出嚟嘅，嗰度就係

有--你話係有一部分係關乎安全嘅，或者我哋搵番嗰一個部分出嚟先。呢個係咪嚟自運輸署發畀城巴公司嘅一封函件裏面嘅內容呀？鄧樂勤大律師，喺邊度呢？喺佢哋嘅意見書嘅邊一度呢？

MR DUNCAN：（經傳譯員）係喺 1038 頁，TD-4，1035。

主席：（經傳譯員）呢度你就係話--係咪咁樣樣㗎？你寫封信畀嗰啲公司，就話「遠期計劃，你要包括以下各點」？

MR DUNCAN：（經傳譯員）唔係，係陳女士就提及就係話有一個索引嗰頁，就講及係遠期計劃應該包括邊一啲係要點，我諗呢個啱啱調轉，係咪呀？或者去我哋 TD-4 1035 嗰頁。呢個係目錄嗰頁，係咪呀？

陳美寶女士：Yes。

陳英傑先生：（經傳譯員）睇番 1038，嗰度有啲標題嘅，其中一個標題就係巴士安全，我諗你剛才係講呢一樣，係咪呀？

陳美寶女士：（經傳譯員）係呀。

MR DUNCAN：（經傳譯員）你未有向委員會係提交嗰個計劃，你話因為裏面就係涉及一啲商業敏感資料嘅。可唔可以單單就嗰一段係抽出嚟畀我哋睇呢？淨係想睇嗰個安全嗰部分。

陳美寶女士：（經傳譯員）我哋可以跟進一下嘅。我哋要確保係得到巴士公司同意我哋發放呢一個部分。

主席：（經傳譯員）係，你未落去之前，不如我哋逐步逐步咁去睇喇，好讓其他人士都知道，否則嘅話，佢哋跟唔到你喇。你頭先講到話係攞唔到呢一份文件，我就睇番係上個星期五即係畀我嘅文件，就係冇頁數嘅，就係 22 段 34(A)條嘅，佢就話所有嘅巴士經營公司都係向運輸署呈交一個五年計劃，因為呢個計劃就會有一啲商業上敏感嘅資料等等、等等嘅。

MR DUNCAN：（經傳譯員）我想大家睇番文件冊 TD-1 嘅第 164 頁。

主席：（經傳譯員）好，唔該晒。即係呢個就係你所問嘅問題，係咪？

MR DUNCAN：（經傳譯員）冇錯。陳女士，我就想畀你睇番運輸署嘅回應，佢就話因為呢個五年計劃就係有個別巴士公司嘅商業敏感資料，營運商係同意向獨立檢討委員會係呈交呢啲資料，即係條件就係委員會唔會向公眾係披露呢啲資料。其實委員會所需要嘅就只係嗰個計劃嘅關於安全嗰一部分嘅啫，或者我就再問一次，可唔可以向巴士公司係去尋求佢哋嘅同意，去向委員會呈交嗰一部分嘅資料呢？

陳美寶女士：（經傳譯員）我哋向委員會嘅回應，即係正如而家螢幕所顯示，就係我哋已經係諮詢巴士公司佢哋係咪願意去披露一個五年計劃，但係睇番--即係根據

鄧大律師嘅意見，我哋係會再次係去徵詢巴士公司去尋求佢哋同意係咪可以去提交關於巴士安全部分嘅資料。

主席：（經傳譯員）係咪委員會可以會直接問佢哋去攞呢個資料呢？

MR DUNCAN：（經傳譯員）如果你睇番文件冊 TD-5 第 1599 頁嘅，呢個就係新大嶼山巴士公司嘅五年計劃，而後面嗰一頁，你睇番第 1600 頁，呢個就係目錄，你見唔見到呢一頁目錄？

陳美寶女士：Yes。

MR DUNCAN：（經傳譯員）就冇提及過安全嘅問題嘅，即係就住呢一間專營巴士公司。我嘅問題就係運輸署對專營巴士公司要求佢哋喺五年計劃入面關於安全嘅部分個要求係點嘅呢？

陳美寶女士：（經傳譯員）就住呢一頁目錄，第一部分即係路線發展計劃已經係包含咗安全嘅問題㗎喇，係。

MR DUNCAN：（經傳譯員）你可唔可以直接回應我嘅問題呀？運輸署係會要求專營巴士公司提供啲咩嘢詳情呢，就住安全要求方面？

陳美寶女士：（經傳譯員）我會請李女士去回答呢個問題。

李萃珍女士：（經傳譯員）多謝主席。喺《公共巴士服務條例》底下，必須要巴士公司係要準備一個五年嘅計劃，所以呢個係包括一啲巴士或者車隊嘅維護、安全等等，而佢亦都係需要提供一啲運輸署署長需要嘅資料。我同事啱啱已經解釋到，我哋有分析到一啲交通意外嘅資料，當我哋每年進行呢項工作嘅時候，我哋亦都會分析啲意外嘅趨勢，我哋係會要求巴士公司喺呢個五年計劃入面係提供佢哋自己對交通意外嘅分析，同埋佢哋要話畀我哋知佢哋會進行一啲咩嘢改善嘅措施，喺呢個前提底下，我哋係要求佢哋喺五年計劃入面包括呢啲資料，所以而家每一間專營巴士公司都會係包括咗佢哋自己對交通意外嘅分析，同埋亦都話畀我哋知佢哋會做咩嘢改善措施嘅。

當然我哋係會隨住時間，亦都係會增加一啲要求，例如公眾對環保巴士係有一個要求，所以我哋喺五年計劃之中亦都要求有一個環境嘅章節。

署長啱啱講到巴士公司亦都係有自願地去提供一啲表現嘅指標或者目標，有一啲同安全或者係培訓有關嘅，呢個就係我哋即係處理呢一啲五年計劃嘅方式。

MR DUNCAN：（經傳譯員）如果你係今晚係去接觸呢啲巴士公司去要求佢哋攞呢啲安全嘅資料，係會好有幫助嘅，就唔使--即係我哋聽日就可以問。

陳美寶女士：Thank you. We can do that.

主席：（經傳譯員）喺有一啲嘅五年計劃入面係有提過呢個問題嘅。即係喺文件冊

TD-5 第 1604 頁，或者 1602 頁，我哋有見到第五--即係喺呢一個計劃中嘅第 5 章，就係有巴士安全，就係喺 1604 頁。而龍運巴士嘅五年計劃之中，亦都係有多一啲詳情嘅，喺 1607 頁，就係有一章係關於安全檢討嘅，就總共有八項嘅，喺安全檢討底下，係咪所有嘅項目都係回應運輸署嘅要求呢？

陳美寶女士：（經傳譯員）我會嘗試答呢個問題。根據法定要求或者係專營權嘅要求，我哋冇特別係指明對培訓或者係某啲措施嘅一啲--去訂明我哋嘅要求，而專營巴士公司係需要每年去檢討佢哋嘅表現同埋每季亦都會有一個道路安全嘅檢討，我哋係要求專營巴士公司喺佢哋嘅五年計劃入面係包含一個安全嘅章節，佢哋係需要分析佢哋自己嘅意外嘅資料，同埋亦都係要提供一啲巴士行車安全嘅改善建議嘅，呢啲係同車輛安全、巴士維護、車長嘅行為同埋培訓等等嘅範疇都係有關係。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）我哋講講培訓嘅問題，你提到喺經營權文件入面係冇特別針對培訓係有要求，或者係--而運輸署亦都係唔會有特定嘅要求去講培訓--即係要做一啲乜嘢培訓嘅，我咁理解啱唔啱呀？

陳美寶女士：（經傳譯員）係。

MR DUNCAN：（經傳譯員）我可唔可以咁講，運輸署係冇發出任何嘅指示畀呢一啲嘅專營巴士公司嘅？

陳美寶女士：（經傳譯員）係，冇錯，我哋係冇提供指引。

MR DUNCAN：（經傳譯員）所以呢啲就係由巴士公司決定嘅。

陳美寶女士：Yes。

MR DUNCAN：（經傳譯員）係咪每間巴士公司嘅做法都唔同呢？

陳美寶女士：（經傳譯員）根據佢哋提供嘅關於巴士安全嘅資料同埋訓練車長嘅資料，即係喺佢哋嘅五年計之中，我哋見到喺新入職同埋現職車長嘅培訓方面，或者係一啲補救或者係溫習嘅課程，基本上係一致嘅，但係個別培訓課程或者單元嘅長度係會有唔同嘅。所以嚴格嚟講，所有嘅巴士公司都會向一啲新入職嘅司機係進行培訓，而至於現職嘅車長，佢哋亦都係會每三年進行培訓，所有嘅專營巴士公司係都承諾咁做。

至於長期冇執行駕駛職務嘅車長，巴士公司亦都係會提供一啲溫習嘅課程，然後車司先至會再投入佢哋嘅職務嘅。至於一啲溫習課程，除咗一間巴士公司之外，佢哋係冇為兼職車長係提供溫習課程，其他所有嘅巴士公司都係會向呢啲嘅車長係提供--或者一啲退咗休嘅車長提供一啲溫習課程嘅。

如果係劃一呢啲標準，即係就住為車長提供嘅課程，係有好處嘅，但係如果係要訂明呢一啲課程，即係提供嘅頻度或者係長度未必係可行，因為呢啲課程

嘅規模係唔同，亦都係會視乎巴士路線、人手數目等等嘅因素，喺唔同嘅專營巴士公司有所唔同嘅。

所以我哋係訂立緊一啲嘅指引，係去制訂一個框架係提供呢啲培訓，我哋認為巴士營運商係需要有劃一嘅標準係進行一啲內部嘅審核嘅，即係就住佢哋嘅培訓課程。

MR DUNCAN：（經傳譯員）你哋幾時開始係制訂呢一啲擬議嘅指引？

陳美寶女士：（經傳譯員）我哋同巴士經營公司喺 2 月嘅大埔交通意外之後，就係著手去做呢個工作，而 3 月就係成立咗工作小組，我哋喺 3 月嘅第一次工作小組會議已經係有提到呢一點。

MR DUNCAN：（經傳譯員）呢件事就係係同巴士營運公司喺度討論緊，係咪呀？

陳美寶女士：（經傳譯員）係，冇錯，而家係討論緊嘅。

MR DUNCAN：（經傳譯員）今日下午早前你提到畀車長嘅健康檢查，現時嘅安排或係指令係點樣㗎？即係喺運輸署同埋專營公司之間，關於健康檢查嘅要求係點呢？

陳美寶女士：（經傳譯員）我會邀請關女士去講講，關女士。

主席：Yes. Thank you.

關翠蘭女士：（經傳譯員）全職同埋兼職嘅車長喺入職之前，佢哋係必須申報佢哋嘅健康情況，佢哋亦都係要通過健康檢查去證明佢哋係健康係良好，可以去揸巴士嘅，呢個包括係心腔嘅檢查、視力檢查、血壓、尿液、糖尿病檢查等等。而所有現時嘅專營公司亦都係要求所有 50 歲或以上嘅車長係接受每年嘅健康檢查，係包括胸腔檢查、糖尿病、視力、尿液、血壓檢查等等嘅。50 歲、54 歲、57 歲、60 或者以上嘅司機，佢哋亦都係要做埋嗰個心電圖嘅檢查，呢個係佢哋嗰個係體檢嘅一部分。

另外就係講到有一啲巴士司機如果試過中風又或者有過心血管病嘅話，又或者佢哋要食藥，係因為有糖尿病或者係高血壓食藥嘅話，亦都需要就係向佢哋嘅僱主作出呢一方面嘅申報，亦都係要做嗰個係心電圖嘅檢查嘅，如果做嗰個每年嘅體檢，呢個目前嘅安排係咁嘅。

MR DUNCAN：（經傳譯員）呢啲安排係安排吖，定抑或係你同巴士公司之間嘅一個理解吖，定抑或係一個要求嚟嘅呢？

關翠蘭女士：（經傳譯員）呢一個身體檢查嘅要求唔係一個專營權或者係條例底下嘅一個指示或者要求，呢個要求就係巴士司機個個知道係要做嘅。

MR DUNCAN：（經傳譯員）就係呢啲安排做咗有幾耐呢？

關翠蘭女士：（經傳譯員）我哋不斷有所演變嘅，我記得自從 2007 年呢一個身體檢

查，即係所有 50 或以上嘅巴士司機每年要做呢個體格嘅檢查、身體檢查係由 07 年開始實施嘅。

MR DUNCAN：（經傳譯員）我哋睇到一啲係交畀委員會嘅意見書就有講，就話如果係有關嘅車長佢哋嘅身體檢查係包括埋佢哋能否應付駕駛巴士嘅壓力，呢個係會好啲嘅，我想問呢啲咁樣嘅建議，有冇人同署方係提過呢？

主席：（經傳譯員）鄧樂勤大律師，我相信你指嘅就係咪具體地處理這事項的九巴嘅書面意見呢？

MR DUNCAN：（經傳譯員）係呀。

主席：（經傳譯員）或者你話畀我哋聽究竟係喺邊一頁或者邊度？

MR DUNCAN：（經傳譯員）請你睇 KMB-1，81-1 嗰度。嗰度就係講及一啲補救性質嘅培訓。

主席：（經傳譯員）如果你用“psychologist”「心理學家」呢一個字眼嚟到搜尋嘅話，就會搵到。

MR DUNCAN：Thank you, Mr Chairman.

主席：（經傳譯員）係，因為我諗心目中即係應該用嗰個字嚟到進行搜尋。係喺第一份嘅意見書嘅第 3 項嗰度嘅，第 81 頁，就係交畀署長--對唔住，係第 38 頁，交畀署長嘅一份文件，113 頁，搵到嘛？

陳美寶女士：（經傳譯員）搵到。

MR DUNCAN：（經傳譯員）E 嗰個部分講到係心理嘅支援，嗰度就話有一個小組，提及就係要為車長同埋前線人員提供呢個情緒嘅支援，小組就會搵一個專業嘅顧問去全面咁檢討目前嘅做法，同埋提供一啲意見，包括但係並不限於呢個係招聘，睇下係車長佢嗰個情緒智商能否係應付壓力、佢嘅培訓、輔導、係表現嘅管理，希望佢可以逐步逐步咁樣樣去實行嚟到係處理一啲係而家已經係有嘅一啲關注嘅，咁呢方面有冇做呢？

陳美寶女士：（經傳譯員）我哋喺九巴嗰度冇收到一個咁嘅建議，而且喺我哋工作小組工作小組--即係我哋工作小組就係話，係咪應該車長之間嘅培訓作一個統一，呢方面亦都冇收到咁嘅建議。不過我知道係新入職同埋現役車長佢哋嘅培訓，我知道公司亦都會包括就係輔助同埋係如何應付呢個壓力，呢啲都包括咗喺新入職同埋在職車長嘅培訓課程裏面嘅，其實呢啲嘅課題我哋亦都打算係喺日後嗰個指引嗰度包括埋嘅，即係話如果講到培訓，培訓嗰個框架應該包括啲咩嘢課題，我哋就都係有咁樣嘅諗法嘅。至於話係申請入職嘅人士，係咪應該睇埋佢哋嗰個情緒智商，我哋就冇睇埋嘅。

MR DUNCAN：（經傳譯員）不過或者係咪可以作為培訓嘅一個部分呢？

陳美寶女士：（經傳譯員）加強佢哋如何應付壓力作為培訓嘅一個部分，呢一個睇法係工作小組有提過嘅，亦都會係我哋會考慮嘅，即係喺我哋如果要訂定一啲培訓方面嘅指引嘅話，我哋都會考慮埋呢一點嘅。如果話有任何嘅建議就係要睇埋嗰個人嘅情緒、智商同埋佢應付壓力嘅能力，作為考核一個申請人係咪取錄佢呢？九巴係巴士公司之一，諗係要同其他巴士公司亦都一同係研究一下，因為呢個亦都會影響佢哋嘅招聘嘅工作嘅，特別係而家嗰個人手供應嘅問題，現有個勞工市場嗰個人手供應嘅問題。

MR DUNCAN：（經傳譯員）換句話講，對署方嚟到講，呢個係一個新嘅概念，係咪呀？

陳美寶女士：（經傳譯員）我諗都係。

MR DUNCAN：（經傳譯員）我而家就想轉到去講下兼職司機或者兼職車長呢樣嘢，呢個係事實嚟嘅，係咪呀？好多巴士公司過去咁多年都有請兼職嘅司機，特別係因為人手嘅問題，我咁講啱唔啱呀？

陳美寶女士：（經傳譯員）人手嘅問題其實一直都係大家所關注嘅，喺巴士營運方面都係一直受人關注嘅，特別係就係公眾嘅期望不斷有所提升，佢哋都希望巴士嘅服務係有所改善，講到路線、班次、公眾嘅期望都有所上升嘅。我哋好努力咁樣係同巴士公司係商討，亦都係同當區嘅區議會係商討，搵下有啲咩嘢方法可以增加個班次、提升個服務，但係過去嗰十年，嗰個事實就係巴士嘅路線係有所上升，換句話講，我哋係需要招聘更多嘅巴士司機嚟到去係應付嗰個專營權嘅要求。

我哋係知道嗰個情況嘅，我哋喺周年個檢討同埋喺董事局開會嘅時候都好明白呢個情況，特別係我哋每一年同巴士公司檢討嘅時候，做周年檢討嘅時候，我哋都有係鼓勵巴士公司係搵唔同嘅方法去增加人手嘅供應。喺運輸署嗰方面，同埋勞工處一齊，我哋協助巴士公司係做呢一個招聘嘅工作，喺各區係搞一啲招聘會去招聘巴士司機，亦都鼓勵巴士公司去檢討佢哋嗰個巴士司機嘅待遇，好讓嗰個薪酬就更加係有吸引力，而且嗰個待遇就係更為合理，可以吸引新血入行嘅。

MR DUNCAN：（經傳譯員）好，唔該。兼職司機--因為聘用兼職司機有冇引致一啲安全方面嘅問題呢？

陳美寶女士：（經傳譯員）喺過去嘅檢討裏面，我哋唔見到有啲咩嘢特別嘅情況或者個趨勢就顯示兼職司機係要讓人擔心係導致巴士意外嘅成因。

MR DUNCAN：（經傳譯員）究竟照你所知，巴士公司做過啲乜嘢嘢嚟到去睇下究竟兼職巴士司機返工之後或者放工之後究竟佢係做啲咩嘢嘅呢？

陳美寶女士：（經傳譯員）講到培訓，巴士公司--我哋期望巴士公司係提供培訓係畀在職嘅車長，無論佢係全職或者係兼職...

MR DUNCAN：（經傳譯員）係，係，對唔住，打斷。我唔係講培訓，我意思即係話佢哋係夠唔夠精神去開始去返工、上班同埋係去揸車嘅，即係話佢係兼職嘅司機吖嘛，佢一日裏面其他嘅時間佢會係做啲乜嘢嘅嘢？

陳美寶女士：（經傳譯員）從呢個運輸署嘅角度嚟到睇，我哋冇咁嘅資料究竟巴士公司點樣樣去監察兼職巴士司機點樣樣去駕駛，兼職巴士司機呢啲車長就係巴士公司招聘嘅人手，嚟到去幫手係舒緩嗰個問題同埋係去滿足嗰個巴士服務嘅需求，特別係有某一啲時候就係一個服務需求嘅高峰期嘅，過去咁多年，我知道講到嗰個兼職車長嘅百分比係有啲公司係百分之三至到係去到百分之三十一，其中一家公司就係百分之三十一嘅，而嗰間公司就因為佢有好多路線都係喺假日嘅時候行使，所以佢哋係需要除咗基本嘅人手之外，佢哋係全職嘅，之上佢哋一直有咁嘅安排，就係搵兼職嘅司機嚟到去應付係假日嘅額外嘅需求。

MR DUNCAN：（經傳譯員）公司有冇提供一啲分析畀你哋，就話係兼職司機同意外之間有冇關係呢？即係話會唔會話因為啲巴士係由兼職司機揸對比起全職司機揸，就多咗意外呢？

陳美寶女士：（經傳譯員）我冇咁嘅資料，手頭上冇咁嘅資料，不過我諗我哋可以喺呢一方面做一啲研究，然後提供資料畀委員會。

主席：（經傳譯員）鄧大律師，其中一間巴士公司有提供到佢哋嘅資料，係咪呀？即係嗰個涉及兼職司機嘅意外率就並冇特別係高嘅，你問完關於呢個兼職司機嘅問題未呀？

MR DUNCAN：Yes, I am.

主席：（經傳譯員）我諗鄧大律師想問嘅就係如果你係一個兼職司機或者你可能會做一啲其他嘅兼職嘅工作，譬如話係兼職的士司機，兼職貨車司機等等，運輸署有冇要求巴士公司係去收集佢哋嘅兼職司機有啲咩嘢其他嘅兼職工作呢？

陳美寶女士：（經傳譯員）目前我哋係冇咁嘅要求，即係冇要求巴士公司係去搜集呢啲資料同埋向我哋呈交嘅。

主席：（經傳譯員）我即係假設你係冇資料，你哋係唔知道呢啲兼職司機喺日間仲做緊啲咩嘢其他工作？

陳美寶女士：（經傳譯員）冇錯。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）我想大家睇 CTB-1 嘅文件冊第 26 頁嘅，呢個就係其中一間專營巴士公司，即係城巴所呈交嘅陳述，喺第 26 頁嘅最底就講到一啲新嘅科技輔助儀器，你見唔見到呢？

陳美寶女士：（經傳譯員）係。

MR DUNCAN：（經傳譯員）喺第 26 頁底，就話我哋係計劃去包括以下嘅技術，就係由 19 年 6 月開始付運嘅新巴士入面包括嘅，就係有電子穩定系統，一個--另一個穩定系統，一個防翻滾嘅系統，一個主動嘅速度限制系統，我問題就係運輸署有冇進行任何本地或者海外嘅研究，或者有冇同巴士公司去合作，有冇研究過有啲咩嘢新嘅技術或者新嘅安全措施係可以係考慮採納係去改善安全呢？運輸署有冇進行呢一類嘅研究？

陳美寶女士：（經傳譯員）或者我請陳先生，佢係負責呢一個硬件嘅部分嘅。

陳英傑先生：（經傳譯員）運輸署一直都係好留意係將新技術採納喺巴士上面，特別係一啲可以改善巴士安全嘅技術，至於我哋嘅做法可以係內部去做，或者係同巴士公司去合作嘅，對我哋嚟講，我哋認為同巴士公司合作係會更加有效嘅，因為佢哋係有運作嘅經驗，同埋佢哋有唔同種類嘅巴士係可以測試呢啲儀式嘅，佢哋可以睇下究竟呢啲技術係適唔適合佢哋嘅車輛。

我哋係一直都會尋求改善，如果有一啲儀器係幫到手，我哋係會同巴士公司去傾，睇下有冇辦法係可以測試同埋引入呢一啲儀器，我哋亦都係會同一啲車輛製造商去傾嘅。

MR DUNCAN：（經傳譯員）你話你會留意，你喺邊度留意或者點樣留意呢？

陳英傑先生：（經傳譯員）我哋會喺網上會搵資料，而我哋嘅工程師都係經常喺網上搵資料，我哋係會睇一啲嘅雜誌，我哋會--有訂閱一啲關於儀器嘅雜誌，我哋會睇下有啲乜嘢可以同巴士公司一齊去測試嘅。

主席：（經傳譯員）你有冇聯絡你哋一啲海外嘅其他嘅監管機構呢，喺呢一方面？

陳英傑先生：（經傳譯員）唔係經常嘅，但係耐唔耐我哋係會做一啲關於儀器嘅研究，我哋亦都係會聯絡唔同國家嘅監管機構，特別係新加坡、英國、日本等等，但係我哋係唔會有一個恆常嘅接觸。

MR DUNCAN：（經傳譯員）呢個主動嘅限速系統，呢個就係城巴提到嘅系統係咪由佢哋去建議嘅呢，定係由運輸署去建議嘅呢？

陳英傑先生：（經傳譯員）呢個係由佢哋建議嘅，我覺得，根據佢哋嘅描述，呢個就係同一個電子穩定系統相若嘅系統嚟嘅。

主席：（經傳譯員）我諗呢一個主動嘅限速系統係一個主動嘅限速系統，而唔係一個被動嘅限速系統。

陳英傑先生：（經傳譯員）我哋係同巴士公司亦都係有提過--即係有傾緊呢一個系統嘅，除咗一啲現有嘅限速器，即係最高嘅時速係每小時九--七十公里，我哋亦都係會引入多一啲嘅功能，當架車係落坡嘅時候，所以個車速上限係每小時 70 公里。城巴所提嘅就係一個類似嘅儀器，只不過個名唔同嘅啫。

MR DUNCAN：（經傳譯員）目前呢個車速限速器係上限係時速 70 公里，

陳英傑先生：（經傳譯員）如果一啲行緊--即係譬如話喺一個車速限制 50 公里嘅地方，如果有架巴士係行緊 60 公里嘅話，如果係咁嘅情況，即係架巴士超速。

MR DUNCAN：（經傳譯員）有冇任何方法係限制巴士超速，喺科技或者技術上？

陳英傑先生：（經傳譯員）如果你一啲有自動嘅全球定位系統，加上一啲某種嘅限速系統，再加上呢個地圖，如果係有車速限制，理論上係做得到嘅，我哋亦都係有同巴士公司去討論過呢一點，而個共識就係理論上係行得通嘅，但係喺香港嘅環境，全球衛星定位嘅訊號喺某啲地方可能會有啲問題，因為可能有一啲--喺某啲地方啲訊號可能畀啲高樓大廈係擋住，所以我哋仍然係要求巴士公司係去探討啲技術，希望喺不久嘅將來係可以採納呢一啲安全系統係有效嘅，但係目前佢哋仍然係試驗緊或者係探討緊。

主席：（經傳譯員）呢個係咪叫做地理圍欄嘅系統呀？

陳英傑先生：（經傳譯員）冇錯。

陳美寶女士：（經傳譯員）主席，我想補充，城巴所提嘅呢啲技術除咗我哋喺改善巴士安全嘅工作小組亦都係有睇過呢一啲嘅技術，我哋係會同巴士公司係會睇新嘅儀器同技術，我哋亦都會詳細同啲巴士公司睇呢啲技術上嘅可能性、安全同埋點樣可以應用喺本地嘅專營巴士上面嘅。我哋喺工作小組入面，即係呢個改善巴士安全嘅工作小組我哋係有睇過呢個問題，我哋係會繼續探討嘅。

主席：（經傳譯員）鄧大律師之前問過一個問題係未答到嘅，係邊個去建議、討論--即係喺工作小組上面係去討論呢啲嘅技術呢？究竟係由運輸署建議吖，定係巴士公司建議吖，定係兩者都有建議呢？

陳美寶女士：（經傳譯員）主席，喺第一次會議，我哋係有提及一啲新嘅技術同埋裝置去預備同巴士公司去傾嘅，呢啲嘅建議可能係多年嚟各方提出，但係最後係由運輸署去草擬呢個文件去提呢一啲技術嘅。

主席：（經傳譯員）係邊個邀請呢啲巴士公司係出席呢個工作會議小組呀？

陳美寶女士：（經傳譯員）係運輸署。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）你有冇嘢想補充？

陳英傑先生： You mean currently in the world?

MR DUNCAN：（經傳譯員）喺呢個地理圍欄嘅技術，正如主席所講，係有用乜嘢嘅法理基礎去運作呢？或者喺邊一個嘅司法管轄區去運作呢？

陳英傑先生：（經傳譯員）我哋手頭上冇呢一項嘅資料，我諗呢項技術就唔係新嘅，但係喺實際應用方面我哋冇資料响手嘅，但係根據我知道嘅資料，香港嘅運輸--作為啲交通工具營運商係有一個咁嘅系統嘅，佢哋可以喺電腦上就用呢一個全

球定位系統就可以睇到啲巴士喺邊度，即係啲人可以知道佢哋响邊度或者幾時會到站，即係用啲手機應用程式可以睇到嘅。而內部嚟講，佢哋可能覺得--即係會見到某一啲嘅路線可能係營運得比較好啲或者安全啲，呢個同地理圍欄呢一個技術係相似，但係巴士公司係有留意到呢一方面，佢哋會睇下啲技術以後係能唔能夠應用嘅，所以回應番你嘅問題，據我所知，就冇人係--即係成功係應用地理圍欄技術，但係當然大家都係向住呢個方向去做嘅。

MR DUNCAN：（經傳譯員）你所講就即係可能係--即係我哋知道啲巴士嘅情況係點，但係你防止唔到問題， 如果有巴士喺呢個時速限制 50 公里嘅地方度開--即係超過 50 公里係會點樣呢？

陳美寶女士：（經傳譯員）呢啲嘅技術主要係為咗管理車隊同埋檢查巴士或者其他車輛嘅情況，至於呢項技術可唔可以用嚟去控制--限制速度或者去減慢速度或者係防止巴士司機係駛超過時速 50 公里或者 70 公里，即係我哋知道有一啲嘅巴士營運商就表示如果有呢啲輔助駕駛技術或者技術，佢哋係警告我哋嗰啲司機唔應該係純粹倚賴一啲技術或者係儀器，因為佢哋可能會過份倚賴呢啲儀器，而係會失去咗一啲--即係喺有一啲關鍵嘅時刻，可能會失去咗個人嘅判斷嘅，呢啲係專營巴士公司係特別提到嘅呢一點。

MR DUNCAN：（經傳譯員）為免生疑問，其實呢一個係車速限制係咪喺嗰個地理圍欄呢一個係概念係檢討嘅時候都有包括埋睇埋嘅呢？

陳美寶女士：（經傳譯員）有。

主席：（經傳譯員）鄧樂勤大律師，我哋而家已經到咗四點半，係咪一個啱嘅時候就今日係暫停呢？陳女士同埋你嘅同事，我哋今日就會暫停，我諗較早時候已經係邀請咗你亦都係明日就係再嚟嘅，請你預留咗明日嘅時間，所以請你哋明天係 10 點鐘再嚟到呢度繼續係作呢一個口述嘅證供。

好，明天 10 點鐘再繼續。

2018 年 5 月 7 日

下午 4 時 32 分聆訊押後

[blank page]

Tuesday, 8 May 2018

(10.00 am)

CHAIRMAN: Good morning.

Ms Chan, might I invite you to resume your seats at the table.

EVIDENCE FROM THE TRANSPORT DEPARTMENT: MS MABLE CHAN, MS AMY LEE, MS RACHEL KWAN, MS MACELLA LEE, MR REGINALD YK CHAN, MR TONY YAU

CHAIRMAN: Overnight, the Transport Department has provided the committee with material relating to the forward planning documents that the various bus companies have provided to the Transport Department on bus safety. I think at the outset we ought to afford you an opportunity -- and I do -- if you wish to make some statement about those documents. Otherwise, I will ask Mr Duncan to pursue it in examination.

MS MABLE CHAN: Good morning. Thank you very much, Chairman, for giving me this opportunity. I would just like to say a very few words on that.

CHAIRMAN: Please do.

Further opening statement by MS MABLE CHAN

MS MABLE CHAN: Actually, I thank the chairman for raising this and giving us the opportunity to have a go with the bus operators last night, because I do appreciate that the request came from the IRC secretariat for sight of

the whole FPP, but on the basis of the document containing commercial value, that's why we did not disclose it at the outset, but also noting that it comprises an important chapter on bus safety which does not comprise commercial value, we actually took the opportunity to run it past the bus operators last night and we managed to provide the IRC secretariat with copies.

In fact, I would like to say a few words, that the forward planning programme is part of the statutory requirement that the bus operators would have to submit for discussion and agreement with the Transport Department.

It is part of the two-pronged process which the Transport Department monitor and regulate the bus operators. The bus operators are expected to provide an FPP comprising the route development programme as well as other operational aspects to the Transport Department by the end of June of each year.

It is since 2003 that the Transport Department has required the bus operators to include a dedicated chapter on bus safety, and since then that chapter forms part of the programme and serves as a planning tool for the Transport Department to discuss and monitor the accident statistics of each franchised bus operator in

their own analysis, and we expect the bus operators to propose improvement measures and we expect them to include in that programme the implementation timetable for the various improvement measures.

Apart from this forward planning process, we also conduct an annual performance assessment by the end of each year. That exercise, we will take into account nine indicators, of which two are related to safety. As I replied to the senior counsel during yesterday's oral session, we also maintain an independent database on the overall territory-wide accident statistics, in which there is also analysis of accident statistics in respect of each franchised bus operator. We will also conduct independent analysis of the accidents by its nature, by its contributing factor, in order to conduct our annual performance assessment of each franchised bus operator. This assessment is done annually based on independent data from the database, independent of the forward planning exercise. So the two run in parallel. And the annual performance assessment report will also be submitted to the Transport Advisory Committee for discussion and reference.

Thank you, Chairman.

CHAIRMAN: Thank you.

Mr Duncan.

Examination by MR DUNCAN (continued)

MR DUNCAN: Thank you, Chairman.

Good morning, Ms Chan, and ladies and gentlemen. Thank you again for your homework last evening. What I would like to do is just note the documents which have been provided overnight, first of all, and then ask you a couple of questions about those.

With regard to the forward planning programmes, the safety parts of that, I will have questions on those later this morning. So I won't spend any time on those at the moment.

You have also, via your submission overnight, provided us with a number of other matters that were raised during the evidence yesterday, and for those I thank you.

There is just one of those matters referred to in your submission that I would like to ask you a little bit about. If you could turn to paragraph 8 of the overnight supplementary written submission, there is reference there to the Working Group on Enhancement of Safety of Franchised Buses. The committee has been informed that that group was formed after the Tai Po accident in February of this year, and contains as its membership, amongst others, representatives of bus companies.

You mentioned right at the end of the submission that the first meeting of that group was held on 13 March this year. My question is: how many meetings have been held since that date?

MS MABLE CHAN: Two meetings.

MR DUNCAN: Since then, so three meetings in total?

MS MABLE CHAN: Two meetings at the working group level and then two meetings at the technical meeting, focusing on bus safety devices and technology.

MR DUNCAN: Thank you. So one meeting on 13 March and one subsequent meeting?

MS MABLE CHAN: Yes, I think on 24 April, if I remember. 23 April.

CHAIRMAN: I think you gave us that date yesterday. You mentioned two dates.

MS MABLE CHAN: Yes, in the opening statement.

MR DUNCAN: Thank you.

And the technical meeting, who attends the technical meeting?

MS MABLE CHAN: Perhaps I will ask Rachel, because she convened the technical meeting.

MS RACHEL KWAN: Thank you, Ms Chan, and good morning, Mr Chairman.

The bus companies and the bus manufacturers, representatives of them have attended the meeting.

MR DUNCAN: The technical meetings?

MS RACHEL KWAN: Yes.

MR DUNCAN: Now, are minutes kept of these meetings?

MS RACHEL KWAN: Yes.

MR DUNCAN: Would the committee be able to obtain copies, please, of the minutes?

MS RACHEL KWAN: Sure.

MS MABLE CHAN: As far as minutes are concerned, because as a general rule it is comprised of internal deliberations, and our general principle is that we will not disclose the internal deliberations which may comprise incomplete analysis and research and may affect candid discussion within the government.

But we can surely provide some relevant extracts of the deliberations in terms of the measures being proposed and also actions being explored for the IRC's information.

MR DUNCAN: I know the committee is particularly interested in the technical considerations being given by those two groups, and it's in that context that I ask that the minutes be provided.

MS MABLE CHAN: If the committee considers it important to see the minutes, we may be able to provide to the committee in confidence.

CHAIRMAN: No. We are operating transparently, with

everything on our website. We are not taking any information from anybody that is not disclosed publicly.

But what we have in mind -- one imagines, when there is a technical meeting and you are discussing what technology might be used in Hong Kong, and bus manufacturers come to help in the meeting, are we correct to assume that there would have been papers put forward by them? For example, speed limiters, you can do it passively by cutting off fuel but you can also do it actively, for example, by engaging gears and applying brakes. Are there any papers of that nature, saying, "These are the technological advances" -- is there material of that kind?

MS MABLE CHAN: There have not been papers as such so far. We have tabled a scope of work and also the items to be discussed and explored at the meetings. But the attendees haven't proposed or tabled any papers so far.

CHAIRMAN: Perhaps "papers" is too technical. Anything in writing? It's hard to believe that you have meetings with nothing in writing about these kind of obvious issues, because I think it's the Transport Department that's identified the various technological devices that might be used.

MS MABLE CHAN: Chairman, because at the first two meetings we have listed out possible devices and technological

matters to be explored and discussed, and we are attending the attendees to go back and study and then to come back. So I would have thought that for facilitating the discussion in future meetings, there will be analysis papers for us to consider.

Thank you.

CHAIRMAN: Thank you.

Yes, Mr Duncan.

MR DUNCAN: There is one other matter which I referred to you yesterday during the evidence, and in respect of which I did not ask for any particular reports. That was a matter which you mentioned during your evidence, when you mentioned quarterly undertaking -- quarterly reports to the Road Safety Council, in the context of monitoring.

Could I make a request, please, that we obtain copies of, or samples, of those quarterly reports?

MS MABLE CHAN: Yes.

MR DUNCAN: That can be arranged?

MS MABLE CHAN: Yes, samples of quarterly reports, sure.

MR DUNCAN: If we just go back to that matter that I have raised, and you had a discussion with the chairman, the minutes of the four meetings. I understand your reluctance. I think at the early stage of the exchange with the chairman, you indicated that there would be no

problem with some parts of the minutes being communicated to the committee. Is that correct?

MS MABLE CHAN: I will seek further legal advice as to how to facilitate the committee to appreciate the work of the working group and also the technical meeting.

MR DUNCAN: Right. We will leave that in your court for the moment.

MS MABLE CHAN: Yes.

MR DUNCAN: And would be grateful for your response in due course.

MS MABLE CHAN: Sure.

MR DUNCAN: Thank you.

There were two other matters, just dealing with yesterday's proceedings, before I proceed this morning, that I wish to raise. The first related to the reason why no changes were made to the guidelines following the administration's undertaking to look at the guidelines again after the 2012 accident. That was a matter I think that you said you would look into further.

Have you had the opportunity of looking further into that as yet?

MS MABLE CHAN: I'm sorry, but in the interests of time we have not been able to do thorough file research, but we will do that as quickly as possible and we will provide written response on that.

MR DUNCAN: Thank you.

One other matter was the question of the full-time/part-time drivers, when I asked whether the department had conducted any analysis as to the relationship between the two and accidents as a whole, whether any analysis had been carried out, and you indicated that you did not have the information at hand, but perhaps some research could be done on that and the information supplied.

Is work being undertaken on that particular issue?

MS MABLE CHAN: Perhaps I can clarify on that. Based on the analysis provided by the companies over the years, especially in the forward planning programme, in the bus safety section, in analysing the accident by its category and its nature, there is no analysis or information pointing towards part-time bus captains as being the contributing factor to the accidents. In other words, there is no information as revealed from those analysis that there is a correlation between the deployment of part-time bus captains with the accidents.

So this is the basis based on which I mentioned yesterday that there is no information leading to such kind of correlation.

CHAIRMAN: Having had an opportunity briefly to go through the forward planning papers provided by the various

franchised buses, the phrase "no correlation" is repeated frequently when one looks at more or less anything: bus models, ages of drivers, number of hours working.

MS MABLE CHAN: Chairman, as I have said, those analyses are conducted and prepared by the bus companies. In our own independent analysis for reporting to the Road Safety Council, we do analyse the accidents, be it fatal or serious, and then in our analysis we will try to identify common factors, for example driver behaviour or the involvement of vehicles in those accidents.

CHAIRMAN: And that's a separate independent report?

MS MABLE CHAN: Yes.

CHAIRMAN: And you are making that available to us?

MS MABLE CHAN: In the Road Safety Council quarterly report.

CHAIRMAN: Yes. Thank you.

MR DUNCAN: Let's turn then to the bus safety contents of the forward planning programmes, the documents that were sent to us over the break.

I have looked at these in three groups, because although I think there are five franchisees, Kowloon Motor Bus and Long Win provide the same sort of reports; Citybus and New World First Bus Services, they supply the same sort of reports, that's the second type; and then the New Lantao Bus Company provides a third form of

report.

Can I ask you first this: the type of information which is contained in these reports relating to bus safety, is that determined by the department or is it left to the bus companies to say, "This is what we will put in the FPP"?

MS MABLE CHAN: As I have mentioned in my opening statement this morning, the requirement for including a bus safety chapter in the forward planning programme dates back to 2003. Since 2003, as an annual exercise, the department will keep track of the information supplied by the bus operators in terms of bus safety, accident analysis in the forward planning programme, and then we will write to the bus operators in around April or May on issues to be covered and provided in the upcoming forward planning programme.

In terms of bus safety, there are occasions at which the department will make special request on certain areas to be covered. So, basically, the scope of information, and sometimes on an occasional basis the specific areas provided by the bus companies are made on the advice of the TD.

MR DUNCAN: So who prepares the first draft of the document?

MS MABLE CHAN: The colleagues in the Bus and Railway Branch.

MR DUNCAN: Right. And have they been given a list of topics that need to be covered, or do they generate their own list of topics that the department then examines?

MS MABLE CHAN: It is an evolving exercise. So it starts off with framework on the coverage of the areas to be included in the various chapters. But over the years, there are also topics, list of topics, in those letters, as and when needed, to be provided to the operator, to guide them to include certain things in the chapter.

MR DUNCAN: Now, we have noticed that these programmes, the safety parts of these programmes, contain quite an amount of statistical information relating to accidents and to accident causes. You will be aware of that?

MS MABLE CHAN: Yes.

MR DUNCAN: They also contain information from the companies as to what they describe as their safety measures, and their proposed safety measures.

If I could take you to one example of the proposed measures, by asking you to turn to that of the New World First Bus Services Ltd, which is annex 3 to your material overnight. I'm looking at page 6, internal numbering, of that document., which has been apparently noted now as page 200 of the bundle.

Do you see on that page clause 5.3, "Measures and implementation programme to enhance safety"? Are you looking at that page?

MS MABLE CHAN: Yes.

MR DUNCAN: Thank you. Then if you look at the text:

"Apart from disciplinary actions taken, measures and programmes planned to reduce common types/causes of accidents are listed below".

And there's a series of measures, no less than 14 measures described there by the company.

You mentioned yesterday and again this morning, in fact, the annual performance assessment of the franchised bus operators, and the fact that -- and I think what you were informing the committee was that safety is taken very seriously because if you look at the nine indicators, two of them are concerned with safety matters.

MS MABLE CHAN: Yes.

MR DUNCAN: Could we just go to those. I think you will find that in TD-2 at page 316.

Are you at the page that reads, "Summary of performance of the franchised bus operators in 2016"?

Do you have that in front of you?

MS MABLE CHAN: (Nodded head).

MR DUNCAN: Thank you. Do you see the nine key indicators,

as they are described? And the two you have noted, are they respectively "Safety-related defects per bus examination", and then "No. of buses involved in accidents per million vehicle-kilometre"? Are they the two that you have referred to?

MS MABLE CHAN: (Nodded head).

MR DUNCAN: Thank you.

When the department conducts that annual assessment, does it carry out any sort of check on the individual matters which a bus operator has indicated it is going to pursue during that particular year? For example, the 14 items which are contained in the New World submission.

MS MABLE CHAN: I would say yes.

MR DUNCAN: When you say you would say yes, why would you say that? Does it or does it not?

MS MABLE CHAN: The annual performance assessment was made on a company basis. So the Transport Department will look at the accident performance of the individual bus operators, in terms of the safety, by means of the two indicators. And the forward planning programme, in particular bus safety chapter, actually serves as a tool for us to study and examine better the circumstances faced by the bus companies and also their performance in terms of safety.

So this actually serves as the basis for the Transport Department to assess the annual performance assessment of that company.

MR DUNCAN: There is nothing in this summary that indicates that the department reaches into the individual companies' statements as to what they are going to do during a particular year. It's confined to accidents per million vehicle-kilometres and safety-related defects which are picked up during the oral examination.

MS MABLE CHAN: I can ask my colleague to search in our covering paper, paper number 2, but I think there is -- yes, may I refer to paper number 2, appendix -- sorry, paper number 1, appendix M, "Performance of franchised bus operation in 2016". This is a sample of an annual performance assessment we did for the franchised bus operation; appendix M to paper 1.

CHAIRMAN: Yes. Mr Duncan, can you give us a page number for that?

MR DUNCAN: 305.

CHAIRMAN: Thank you.

Yes. You were speaking to this document, "Performance of franchised bus operation"?

MS MABLE CHAN: Yes. In paragraph 19, "Bus safety measures", it summarises our assessment in overall terms on the franchised bus performance in terms of the bus

safety aspects, and also the common factors identified in those accidents. In particular in that year, the 2016 performance:

"[The] accidents typically involved passengers losing balance inside bus compartment due to various reasons, such as not holding the handrail tightly, or falling down when boarding or alighting. The operators have made efforts in enhancing safety of bus operation through various measures."

Then we include in the summary the performance of individual bus operators in that particular year.

Then in annex B to that paper, we also mention the various measures to enhance safety of bus operations.

Thank you, Chairman.

MR DUNCAN: Do I understand you to say that they are specifically taken into account during the annual performance review?

MS MABLE CHAN: Yes.

MR DUNCAN: Thank you.

Now, I'm going to leave those safety provisions now of the forward planning programme, so you can put those to one side.

I want to turn now to the topic of passenger behaviour, which has been a topic in many of the submissions made to the committee. The committee has

been alerted to what is said to be an increasing occurrence of both verbal and physical assaults on bus drivers in recent times.

The committee has heard these allegations from different sources, so from trade union movement, from LegCo itself, and also from one of the bus companies, KMB.

If I could just put this matter in perspective. Can I ask you to go to the TU bundle at page 256, please. In fact it's 256-1, the document which I ask you to look at, which is -- forgive me, but it's an English translation, and not certified, of minutes of a meeting between the Federation of Bus Industry Trade Unions and the Department. Do you see that document?

MS MABLE CHAN: Yes.

MR DUNCAN: If you want to look at the Chinese, I will give you the reference to that. 250 for the Chinese.

Now I wish to take you to the translation, 256-5, which is under the heading, "Issues on personal safety of bus captains". If I could read from the translation:

"Representatives of the union expressed concern on the recent incidents where bus captains were attacked, although the bus captains under attack reported to the police, in many cases, the police upon arrival would suggest the parties to settle the matter, without

prosecuting the perpetrators. Union representatives also expressed that, apart from the general insurance that bus companies provide to its employees, there is no other support to frontline bus captains."

If you would bear that in mind, and then also refer, please, to 256 --

CHAIRMAN: Before you move on, this was a meeting on 4 October 2016?

MR DUNCAN: That's correct.

Then at 256-8, you will see minutes of a meeting on 27 March 2017. The Chinese of that will be at page 245. If I could refer you to the translation at 256-13, where we have the heading under (vi), "Bus captains being assaulted and prosecution standard for the perpetrators":

"The representative of the union paid close attention to incidents of assaults on bus captains. Even though the bus captains being assaulted reported to the police, most of the times when the police arrived they suggested the parties to settle the case instead of prosecuting the relevant persons. Besides, the bus company only provided insurance coverage for its staff.

The police expressed that they will not tolerate the use of violence, and asked that if the bus captains encounter such situation they must call for police and

endeavour to seek witness(es) for the police's further handling."

Perhaps I should have mentioned, if you go back to the minutes of the meeting, you will see there the persons present: the government representatives, the District Councillors and the Federation of Unions, and so on.

Then thirdly, for the trade unions' complaints, page 256 --

CHAIRMAN: Before you move on, it is said that the police expressed a view. Was a police officer present at the meeting?

MS MABLE CHAN: Yes.

CHAIRMAN: Where is he identified?

MS MABLE CHAN: Mr Tsang Moon Lun, chief inspector on traffic safety from the police department, 256-8.

CHAIRMAN: Ah, yes. Thank you.

MR DUNCAN: Thank you.

Then if you go to page 256-16, please. That's the translation. The Chinese is at page 250. If I could take you to the translation, 256-18, you will see the minutes of a meeting on 20 July 2017, again a meeting with representatives of the Transport Department, the police force and the Hong Kong Federation of Trade Unions for the Bus Industry.

If I could bring your attention, please, to 256-18, and the entry at item (ii), "Assault incident on bus captain". It's long, so I won't read that out, but if you could just read through it quickly, please, and I will pick it up at the last couple of paragraphs. In fact, I will pick it up at the last paragraph:

"Further, the police and the trade union recommended to install protective equipment during bus captains' driving. The Transport Department will address the trade unions' concern to the Transport Department."

I'm sure that's not particularly well expressed. The Transport Department no doubt was alerted to the concern of the unions.

MS MABLE CHAN: Chairman, if I may, I am also looking at the original, the Chinese version of the minutes --

CHAIRMAN: Yes.

MS MABLE CHAN: -- which is on page 251. On that particular item, it is recorded that the Transport Department will relay the trade unions' concerns to the bus operators.

CHAIRMAN: Thank you. So there's an infelicity in the translation?

MS MABLE CHAN: Yes.

MR DUNCAN: I am grateful for that. Thank you. I will come back to that in a moment.

But if I could just go to some of the other examples

of this being brought to the attention of the department.

Can we go to SEC-2, please. There is, again, a translation at 815 of a communication in Chinese, at page 814. This is a document actually addressed within LegCo. Do you know whether the department became alerted to this matter?

MS MABLE CHAN: I do not have the information at hand.

MR DUNCAN: Thank you.

CHAIRMAN: Perhaps you could give us more information, the date and between whom the communication is made?

MS MABLE CHAN: Because this letter was not addressed to us, but we can check.

CHAIRMAN: Sorry, I'm asking Mr Duncan.

What is the date of this communication?

MR DUNCAN: This is dated 19 May 2016, and it is addressed to the chairman of the Panel on Transport Affairs within the Legislative Council. But if you haven't seen this, I won't ask you any further questions about this.

Then finally can I take you, please, in this context, to KMB bundle 1, at page 62.

This document is part of the submission made by the Kowloon Motor Bus Company to the committee. I'm not sure whether you've had the opportunity of reading this, Ms Chan. Have you?

MS MABLE CHAN: I have done a cursory reading of the submissions. Thank you.

MR DUNCAN: Thank you.

Can I take you to page 62, please, and the top of the page, perhaps you can just read to yourself the first entry there, indicated by the indicator, commencing with, "In response to increasing number of assaults against [bus captains], we have taken the following measures".

CHAIRMAN: Mr Duncan, to assist those who are following this with simultaneous translation, given that the document is displayed only in English, perhaps I could invite you to read what you say are the relevant parts of the document.

MR DUNCAN: There is a reference in that passage, I think, Ms Chan, to "Surveillance cameras, including forward-looking cameras and a camera covering the driver seat, have become standard features on all new buses since 2015."

Do you see that reference?

MS MABLE CHAN: Yes.

Q. And:

"Up to February 2018, surveillance cameras were installed in 2,319 KMB buses and 146 [Long Win] buses. The remaining buses will be equipped with surveillance

cameras phase by phase. Surveillance cameras capture the behaviour (with audio recording) of difficult passengers. It will protect the interest of [bus captains] in subsequent investigation by the police or legal proceedings."

Then there is reference to the fact that the company intends to install a protective shield near the driver seat starting from June 2018, and they say:

"We have added more on-board announcements to advise passengers not to do certain acts that will affect the [bus captains] and other passengers."

Finally, they indicate that they "offer legal support to [bus captains] after they have been assaulted."

With that background, from those papers, could I ask you a few things.

First of all, when I raised this issue, the issue of passenger behaviour, with the bureau yesterday, we were told that the department has been directed to prepare an education plan in respect of this matter. What is the status of this education plan?

MS MABLE CHAN: Thank you, senior counsel. The issue of passengers' behaviour or aggression towards bus captains was particularly discussed in the context of the Transport Advisory Committee's meeting in March, when we

presented our actions to be followed for the Tai Po accident.

As we reported to the Transport Advisory Committee at that meeting in March, we reported that the department or the government is aware of the concern of the bus captains of incidents of passenger assault or aggression towards bus captains, and we reported that this matter was actually followed through in the Road Safety Council, in which both Transport Department and also the police are members.

We also reported that, as an ongoing education and publicity campaign, there are radio APIs, TV programmes, in Chinese it's "ging sun", educating the public on the appropriate behaviour of passengers when aboard buses.

At the meeting, after the discussion at the Transport Advisory Committee meeting, we are tasked to look into that and devise a more comprehensive publicity and education plan in this particular matter. Since then, in the 77th meeting of the Road Safety Campaign Committee, which is a committee formed under the Road Safety Council to look at campaign matters, in the meeting held on 13 April 2018, it has been agreed that the attitude of passengers will be one of the themes for the road safety campaign in 2018-19. The first publicity activity is to produce the radio API for the

purpose of educating passengers on appropriate behaviour, and disseminating the road safety message in the third quarter of this year.

From the Transport Department's side, we also raised this issue with other public transport operators, for example the taxi trade. This is also one of the issues raised by the taxi drivers, and we are devising a code of practice and guidelines for quality taxis, to improve the taxi quality of the existing 18,000 taxis under the existing regime.

Apart from the chapters on drivers, we will also include a chapter on passengers' responsibility and attitude.

I have also raised with the MTRC at our annual operational review committee that we are planning to launch a comprehensive education and publicity campaign territory-wide, involving the various public transport operators. That means not only bus operators but also MTRC and taxis, et cetera.

We are considering the details of the plan and we hope to be able to launch the relevant publicity activity towards the end of 2018.

Thank you, senior counsel.

MR DUNCAN: So, by an education plan, we are really talking about a series of measures, are we? Is that it amounts

to?

MS MABLE CHAN: By education plan, we think that education is a very important element in bringing out the key messages that passengers should bear in mind when they are aboard public transport vehicles.

One of the messages that we have been deliberating with the operators and within ourselves is that it is the joint responsibility of the driver and the passengers to ensure a safe and decent journey from the origin to the destination.

Thank you.

MR DUNCAN: KMB have indicated that they have installed, and will continue to install, surveillance cameras in their buses. Is that a requirement of the Transport Department to KMB?

MS MABLE CHAN: No.

MR DUNCAN: Have you had discussions with any of the other bus companies with regard to the installation of surveillance cameras?

MS MABLE CHAN: Personally, I am aware of the KMB's measures such as the installation of surveillance cameras. They have raised it with us at regular discussions, and also at the board meeting level. This issue was not particularly raised at the board meetings of the other bus operators, as far as I am aware, but we are also

aware that they are thinking of various ways to help the bus drivers deal with this issue, in order to facilitate, in the occasions whereby the passengers have any aggressive attitude towards the drivers, and that may lead to dispute on the spot, would there be any device to help to have some objective evidence?

On the other hand, the Transport Department has not, up to this stage, required this kind of installation, knowing that there may be implications on other aspects, the sentiments of the drivers towards this kind of device.

So this is an issue which is ongoing discussed within the bus operators. Thank you.

MR DUNCAN: So the Transport Department is not pursuing this matter? You are leaving it to the bus companies?

MS MABLE CHAN: We consider that, as I have said at the meetings between the Transport Department and the trade unions, we have relayed the concerns to the bus operators and we expect the bus operators to look into ways to address the occasions and incidents happening involving the bus drivers of the companies and seeing what suitable facilities or measures can be taken, having taken into account the employees' concerns, sentiments.

Thank you.

CHAIRMAN: So the answer is yes, it's being left to the bus operators?

MS MABLE CHAN: I would not say so, because we consider the passengers' attitude towards the drivers is an important issue, and we have over the years taken efforts to promote this message and do education and publicity exercise. We are aware that the trade unions have expressed this kind of concern to the bus companies and to the Transport Department, and we have relayed this matter to the bus operators. We take a keen interest on how the bus companies will address this concern, and we welcome the measures that will be produced by the bus companies.

On the other hand, to answer the chairman's question, we do not totally refer the matter to the bus companies, because we know that specific devices such as surveillance cameras may have its own implications. So we do want the bus companies to look into this carefully.

Thank you.

CHAIRMAN: I'm sorry, can I ask you what you mean by surveillance cameras have their own implications? Can you amplify what you mean by that?

MS MABLE CHAN: Based on our understanding and discussions at the board meetings of KMB, as an example, there are

some concerns expressed by the bus captains that with the installation of the surveillance cameras in front of the driving seat, it may intrude into their personal privacy, and we have also received some complaints on that front.

Thank you.

CHAIRMAN: From bus captains, through trade unions?

MS MABLE CHAN: Trade unions, yes.

CHAIRMAN: Do we have that documented anywhere, in any of the material that we have?

MS MABLE CHAN: We may not be able to find it but we will try to locate.

CHAIRMAN: Thank you.

So, on the one hand, bus captains or at least some of them are concerned about their own safety and being abused, and yet others are concerned about privacy? Is that it?

MS MABLE CHAN: Yes.

CHAIRMAN: Thank you.

MR DUNCAN: What about the matter of protective shields? Is that a matter which is being considered by the Transport Department as a suitable measure?

MS MABLE CHAN: This is also an initiative of the bus company, in this case the KMB.

MR DUNCAN: Right, but my question is whether it occurs to

the Transport Department as a matter worth pursuing, and if so whether the Transport Department is suggesting this to any of the other bus companies.

MS MABLE CHAN: This is a measure taken by the KMB in response to the concerns and suggestions from the bus captains towards the management, and we are aware of that.

CHAIRMAN: The question was have you suggested to other bus companies or operators that they look at this?

MS MABLE CHAN: We have suggested this measure to the other bus companies for consideration.

MR DUNCAN: So it would be entirely up to them as to whether they engage with it or not?

MS MABLE CHAN: Yes.

MR DUNCAN: It would be their decision?

MS MABLE CHAN: At the present moment, yes.

CHAIRMAN: Mr Duncan, do we have any photographs in the material that we've got as to what is meant by a protective shield?

MR DUNCAN: We will try and locate that, Mr Chairman.

One of the questions I raised with Mr Lai from the bureau yesterday was whether or not any of the bus companies had passed its own by-laws so that it could act in respect of the conduct of its drivers or passengers, and he wasn't sure precisely what the

position was with regard to by-laws.

What is the position? Have any of the bus companies passed the by-laws provided for by the ordinance?

MS MABLE CHAN: We have checked on this specifically. At the present moment, the bus companies have not passed any by-laws at the present moment. As our colleagues have recalled, it appears that at least for the past ten years this issue has not been raised by the bus operators.

MR DUNCAN: It hasn't been raised by the bus operators, but has the department considered that the passing of by-laws by the bus companies may be able to provide some assistance in respect of the problem which seems to be reasonably prevalent and for which the police have apparently found difficulty in taking prosecution?

MS MABLE CHAN: The current legislative requirement under the Public Bus Services Regulations and also the Road Traffic (Public Service Vehicles) Regulations have provisions stated about the general conduct of passengers, prohibiting bus passenger disorderly conduct on public bus, including not to obstruct or distract the driver.

So there is a legislative basis for overseeing this matter. Thank you.

MR DUNCAN: You might understand a comment that this may not

be the top of the police force's priorities, whereas the bus companies would be far more concerned about it.

MS MABLE CHAN: I am not in a position to respond on behalf of the police.

MR DUNCAN: Now, to the knowledge of the department, are drivers provided with any training with regard to how they should deal with an unruly passenger?

MS MABLE CHAN: I am aware that the bus companies have included modules on handling passengers and during stressful situations as part of their training courses for in-service bus captains, as well as new recruits.

MR DUNCAN: Given the fact that trade unions have complained about this, has the department looked into those modules to see what sort of training procedures might be available?

MS MABLE CHAN: The mentioning about the inclusion or enhancement of stressful courses, handling courses, as part of their training is mentioned in the forward planning programme, and we also take that into account and it is actually our plan to formalise the alignment of the training framework, to ensure that this will form part of the modules in the training for the new recruits as well as the in-service bus captains.

At the present moment, the bus companies are offering such kind of training courses to handle

passengers during particular occasions whereby the drivers may feel offended.

MR DUNCAN: Are you aware of any protocols that are in place for the drivers that they should follow if there is an incident arising from the behaviour of a passenger?

MS MABLE CHAN: I can speak from my personal knowledge, that the KMB have set out some rules, basic rules, for their drivers to follow and to observe in handling such kind of situations.

MR DUNCAN: Have you examined those?

CHAIRMAN: Forgive me, Mr Duncan. Whilst this is fresh in my mind. You say you intend to formalise alignment of training framework. What do you mean by that?

MS MABLE CHAN: Chairman, the Working Group on Enhancement of Bus Safety formed in March, the terms of reference and the scope of work included the enhancement of training as one of the areas to be looked into. As mentioned in our paper 11, TD paper 11, "Training and health checks of bus captains", we have reported that our intention is to set out the guidelines on the training framework in order to align the content and the modules of the training.

CHAIRMAN: Take your time to locate what you are looking for.

MS MABLE CHAN: Let me try to locate it.

It is shown on the screen, page 131.

CHAIRMAN: Paragraph 15?

MS MABLE CHAN: Yes.

CHAIRMAN: Thank you.

MS MABLE CHAN: The training of bus captains to handle this kind of situation involving passengers is a very important issue to be addressed. We know that at the present moment various bus companies have included such kind of module, but we think that it is very important to align and formalise the requirement, to make sure that this module is included in the training for new recruits as well as in-service captains, and we want to set out a guideline on the weighting and the contents of this relevant module, to make sure that there are appropriate training to be provided for bus captains, to equip them with the necessary skills and to prepare them psychologically for such kind of distressful situations.

Thank you, Chairman.

CHAIRMAN: So when you say "an alignment", and you say "formalise", you mean issue guidelines so that they are the same for all bus operators?

MS MABLE CHAN: Yes. In a way, we plan to issue a guideline requiring all the bus operators to include this kind of training as their training framework, and we will also plan to set out the basic duration and also the relative

weighting of each of the modules, so it will form a framework for the bus operators to follow, so that there will be a common basis for the individual bus operators to conduct internal monitoring and audit. By such kind of device, we can align the practice of the various bus operators.

Although the duration and the frequency may vary in very detailed way, but there will be a basic minimum duration required, and also the weighting to be accorded to the various modules under the broad training framework.

CHAIRMAN: What do you mean by "weighting"?

MS MABLE CHAN: The relative weighting of, say, the module on handling passengers, relative to the other modules on driving skills, route training, et cetera.

CHAIRMAN: Thank you.

This working group, it is anticipated, would report by the end of June; am I correct?

MS MABLE CHAN: Yes, you are correct, Chairman.

CHAIRMAN: Is it intended that the guidelines be issued at that stage?

MS MABLE CHAN: We are trying very hard to formulate the guidelines as early as possible. The pledge of the working group currently is to complete the report by the end of June. We will consider as to whether a draft of

the guidelines can be included as part of the report. But I think the detailed guidelines may take a little bit of time.

Thank you, Chairman.

CHAIRMAN: Thank you.

Yes, Mr Duncan.

MR DUNCAN: I just noticed that particular paragraph, Ms Chan, doesn't actually mention the problem that I've raised with you. It doesn't specifically address the question of the behaviour of passengers towards captains, does it?

MS MABLE CHAN: The paper does not make specific mention of that, but in our discussions at the two working group meetings, the various modules were actually discussed, and we have also sought the agreement of the bus operators to work towards having a common framework, comprising the modules that they are providing.

Thank you, Chairman.

MR DUNCAN: Let me try and finish this topic. With the complaints having been made, as we can see, by the trade unions, amongst others, and with meetings held involving the Transport Department, the unions and the police, and so forth, has the department itself developed any ideas as to how this problem might be overcome, as opposed to leaving ideas for the bus companies to pursue?

MS MABLE CHAN: The department considers this issue as a very important issue to be addressed, and as demonstrated by the various efforts that the Transport Department is taking, we believe that equipping the drivers with necessary skills and preparing them psychologically to handle such kind of situations, coupled with education and publicity campaign to impress upon them the important message of passengers' responsibility, are two-pronged measures to tackle this issue.

Thank you.

MR DUNCAN: Do you have any specific ideas, apart from a general approach?

MS MABLE CHAN: I think this is a very specific approach. Thank you.

MR DUNCAN: Now, I want you, please, to go to your supplementary submission. You will find this at TD-1, page 163. May I just ask you to clarify a matter. Page 163.

The committee raised a question with you, and it was in these terms:

"'[The Transport Department] would review the results of random checks to ascertain that the [bus] operators have been monitoring the driving behaviour of their drivers and have taken/will take follow-up action

against those drivers with improper driving behaviour.' Please describe the process by which those random checks are reviewed. If their process is recorded in writing, please provide copy samples of such documents."

The answer that you gave was this:

"The requirement for the submission of the results of random checks ... has been implemented only since January 2018. The [Department] reviewed the monthly report submitted by the [bus] operators to ascertain that the ... operators have been monitoring the driving behaviour of their drivers ..."

What is the arrangement between the department and the bus operators with regard to these random checks?

MS MABLE CHAN: The requirement of installing black box and also the arrangement for onboard plain-clothed employees of the bus companies to inspect the driving behaviour and attitude of the bus captains have been required over the years. I do not have the specific year at the present moment, but perhaps colleagues can check and supplement on that.

So, in order to equip and facilitate the bus companies to have a better knowledge and to better monitor the driving behaviour and attitude of the bus drivers, the installation of black box, coupled with the arrangement on onboard plain-clothed inspectors, would

help them to analyse and monitor and to devise relevant improvement measures to be followed through by the bus companies.

This is a requirement set by the Transport Department, and we expect the bus operators to, based on this kind of observations, on an ongoing basis, and then they will devise the suitable measures.

Since January 2018, it is the initiative of the Transport Department to step up our monitoring of the bus operators, to ensure that they have done this kind of analysis and monitoring on a regular basis. We take the initiative to do so not because of any particular accident but we think that that will give us information, a basis, for us to consider whether any step-up monitoring can be conducted by both the bus companies or at the TD level, in order to ensure that there will be more informed basis to consider any appropriate measures to address improper driving behaviour of drivers.

We think that over the years, when we analyse the accident data, driver behaviour is one of the key contributing factors of many of the accidents, be it serious or less serious. So we consider this as a step forward for us to step up the monitoring on a more regular basis.

Thank you.

MR DUNCAN: My question is just aimed at what is constituted by the random check. What is this random check system?

MS MABLE CHAN: Based on my understanding and recollection, the bus companies are required to conduct random checks on the black box data, as well as random checks onboard the buses.

MR DUNCAN: Right. Let's just keep to onboard the buses. Is this a directive from the Transport Department or what?

MS MABLE CHAN: It is a requirement of the Transport Department.

MR DUNCAN: In writing?

MS MABLE CHAN: I can check. I can check on that and then supplement.

MR DUNCAN: I am interested in the details of what random checking may be conducted by the bus companies themselves of drivers' behaviour.

MS MABLE CHAN: I do not have the record at hand, but we can certainly check and try to locate whether there is anything in writing on this.

MR DUNCAN: Is there any random checking of passengers' behaviour?

MS MABLE CHAN: The random checking is focused on the driver behaviour.

MR DUNCAN: Thank you.

Turning away from --

CHAIRMAN: Before you do so.

The request made of you, the Transport Department, was to describe the process by which those random checks are reviewed, and that is a reference to the Transport Department. How are they reviewed by the Transport Department, the random checks?

MS MABLE CHAN: Chairman, if I may, I will locate the form, the compliance form, and then I will refer you to that.

CHAIRMAN: Thank you. Take your time.

MS MABLE CHAN: May I refer you to annex 11, to paper 4, in TD's bundle. Perhaps counsel's team can mention the page number.

CHAIRMAN: Perhaps Mr Duncan can help us as to where we find annex 11.

MR DUNCAN: Page 1020.

MS MABLE CHAN: Chairman, this monthly report was issued since January 2018. It comprises four aspects.

CHAIRMAN: Yes.

MS MABLE CHAN: The part (B), "Mysterious ride checks for monitoring of driving behaviours of bus captains", is relevant to our discussion just now. So we have stipulated in the monitoring report the number of routine mysterious ride checks conducted, number of

ad hoc mysterious ride checks conducted, and the number of malpractice cases found on a monthly basis, as well as the follow-up actions taken. This return will help us to check and monitor the number of routine and ad hoc mysterious rides conducted by the various bus companies, and to monitor whether there are any malpractice cases found and the follow-up actions taken.

In this sample provided in January 2018, you can see the various follow-up actions taken by the bus companies. On this return, we will look at it and then we will see whether the bus companies have regularly conducted such kinds of mysterious rides and whether the number of checks fluctuate by monthly basis, and on the other aspect, if we identify any trend in driver -- inappropriate behaviour, from our independent analysis, in respect of the various bus operators, we will use this as one of the tools for us to follow up with the bus companies, to see whether they have taken appropriate actions to address the driving behaviour of bus captains.

Thank you.

CHAIRMAN: So just dealing with, say, black boxes, this particular form details the fact that there were 8,552 checks on black box data as at the end of the month; yes?

MS MABLE CHAN: Yes.

CHAIRMAN: And that had produced speeding in 271 incidences.

MS MABLE CHAN: Yes.

CHAIRMAN: And that had resulted in what's described as a verbal warning, 187; a written warning, 78; and a final warning, 6.

MS MABLE CHAN: Yes.

CHAIRMAN: So the Transport Department reads this document, that's what's meant by "review", and presumably that would satisfy you, the entry here, that a system is in place, and that's the extent of the review?

MS MABLE CHAN: This monitoring mechanism by means of a monthly report serves to provide us with basic information on how the bus companies conduct the checks, either on mysterious ride or black box data, and the follow-up actions. This serves as one of the tools for us to do the assessment on the bus company on an annual basis, coupled with our independent analysis based on the accident data in respect of the bus operators and the contributing factors, if any, say in relation to the driving behaviour of bus captains.

So with all this, we will take issue with the bus companies and consider any appropriate improvement measures to be taken by the bus companies.

Thank you, Chairman.

CHAIRMAN: Yes. Thank you.

MR DUNCAN: Are you able to tell us, Ms Chan, how often police have prosecuted passengers in respect of their behaviour on buses, say over the last five years?

MS MABLE CHAN: I do not have the information.

MR DUNCAN: Does the department not maintain that information?

MS MABLE CHAN: We do not maintain such kind of information, but I am not sure whether such kind of information is presented to the Road Safety Council, because the police is one of the members, and they also chair the Road Safety Council -- the deputy director of operations chairs the Road Safety Council.

MR DUNCAN: What about under the regulations made under the Public Bus Services Ordinance: how often are prosecutions instituted under the regulations?

MS MABLE CHAN: We do not have the information at hand.

MR DUNCAN: Mr Chairman, if I may just interrupt, the protective shield photographs are apparently not in the bundle. We don't have any of those available within the bundle.

CHAIRMAN: I'm sorry, I missed the first part?

MR DUNCAN: The protective shields for the drivers, there are no copies of those photographs in the bundles, as far as we are aware.

CHAIRMAN: Thank you.

MS MABLE CHAN: Chairman, perhaps we can help on that. I think I have seen such photo in our file records. Perhaps we can try to locate and supply the committee.

CHAIRMAN: Thank you. That would assist.

MS MABLE CHAN: I will try. I cannot commit, but we will try.

CHAIRMAN: I understand that. If you can find one, please give it to us so that we can understand what it is that has been installed or will be installed.

MS MABLE CHAN: Because they are actually installed in the buses and when we ride on the buses, we actually see such kind of shield beside the driver.

Thank you.

MR DUNCAN: Now, spot-checks on vehicles. This was raised with Mr Lai yesterday, and he was asked a question by one of the committee members as to how the figure of 14 per day had come about.

Are you able to assist us in that respect?

MS MABLE CHAN: The 14 vehicles under spot-check by the Transport Department is one of the indicators in the controlling officer's report under the Transport Department.

In devising the pledge or the indicator, we have to consider it in the context of a robust vehicle

inspection exercise conducted by the TD. Every franchised bus vehicle is inspected on a monthly basis. On top of that, it is also inspected on an annual basis. Only in those cases whereby that bus vehicle is not under an investigation of a monthly inspection at that particular moment -- I would like to phrase it again -- we would conduct monthly and annual inspection of each and every bus vehicle. It is only in those cases whereby the bus vehicle is not subject to a monthly inspection --

MR YK CHAN: Not recently --

MS MABLE CHAN: Can I ask my colleague to supplement on that detail?

CHAIRMAN: Certainly. I think the real question is why 14, why not 24, why not 214?

MS MABLE CHAN: In very simple terms, the spot-check is conducted on top of the regular monthly and annual inspection, and the monthly and annual inspection is on a planned basis. The spot-check is really to exercise a more robust and unplanned random check.

CHAIRMAN: But why 14? Why not some other number?

MS MABLE CHAN: 14 buses per day, equivalent to 3,400 buses per year, and this is against the total fleet of 5,900 bus fleet of all the bus operators. There is not a very specific or scientific basis to arrive at 14, but

obviously this is also derived having regarded to the resources available and also the size of the fleet and also the size of the fleet of vehicles to be inspected by TD under the monthly and annual programme in our vehicle examination centre.

So far, the check results of the annual and monthly checks, as well as the spot-checks, give us a reasonable, confident basis to say that in general the construction and maintenance of the bus vehicle is under a satisfactory situation, and should there be any safety-related bus defects, those are immediately rectified and detected.

Thank you, Chairman.

CHAIRMAN: Thank you.

Mr Duncan.

MR DUNCAN: Thank you, Mr Chairman.

Ms Chan, I want to turn now to a different topic, if I could. It's concerned with the department's contact with trade unions. It's clear from your evidence that there is a lot of communication between the department and the bus companies. What I'm keen to explore is the contact that you have from time to time with the trade unions.

The trade unions, many of them have made submissions to the committee for these proceedings. Have you had

the opportunity of reading some of those submissions?

MS MABLE CHAN: I have read some of them.

MR DUNCAN: You have read them? Thank you.

Do I understand the position to be that, from time to time, trade unions will come to the department or write to the department and indicate matters of concern to them to the department?

MS MABLE CHAN: I will say time and again we have received letters or requests from the trade unions expressing their issues of concern.

MR DUNCAN: How does the department deal with those approaches?

MS MABLE CHAN: Perhaps I will start by saying this. As an ongoing basis, should the trade unions express any issues of concern relating to the benefits and working conditions of the bus captains, we will, depending on the nature of their request, consider whether it relates to the employment or manpower policy of individual bus companies, and then we will consider referring the matter or discuss the matter with the bus company on a case-by-case basis.

More frequently, relatively speaking, some of these requests relate to the working hours and the rest times of the bus drivers, because while the ordinance does not require us to stipulate specific requirements of working

hours and conditions, the department over the last 10 to 20 years have devised the guidelines requiring the bus companies to follow, insofar as the working hours, the driving hours and the rest and meal breaks are concerned.

In that context, it has developed to the present moment that the trade unions may raise their concerns in that context to us.

So the ongoing implementation of the working hours guideline actually enables the trade unions to express their suggestions or views time and again to the Transport Department, and we will take that into account and reflect upon them as an ongoing basis.

Thank you.

MR DUNCAN: Earlier on this morning, we saw minutes of three meetings that you had held at which trade union representatives were present. They were respectively in October 2016, March 2017 and July 2017.

What prompted those meetings?

MS MABLE CHAN: Perhaps I may invite my assistant commissioner, Ms Kwan, to try to respond to that question.

MR DUNCAN: Thank you.

MS RACHEL KWAN: Thank you, Chairman.

CHAIRMAN: Before you do so, just to remind ourselves, these

were meetings where you took us to the issue of the safety of bus captains?

MR DUNCAN: That's right.

CHAIRMAN: Your question now is more general --

MR DUNCAN: It is.

CHAIRMAN: -- as to what led to the meetings being held?

MR DUNCAN: Yes.

CHAIRMAN: Thank you.

MS RACHEL KWAN: So, Mr Chairman, over the years, we met the staff unions from time to time, in response to their request. They would raise issues that concern them most, such as working hours, implementation of the working hours guideline, the working conditions, and also their practical difficulties in their driving duties, such as they encounter some on-street obstructions to their bus operation, something like that. They will raise with us some congestion black spots to us, for us to liaise with other concerned departments to resolve the problems.

MR DUNCAN: So how regularly would you meet the trade unions in a meeting such as we have seen from the documentation?

MS RACHEL KWAN: There is no such fixed pattern. Usually, when we have some items to raise with them, we will discuss with them, we will arrange meeting to discuss

with them; or, on the other hand, if they have matters that concern them most, they will ask us to arrange meeting for them.

MR DUNCAN: So could you give the committee some idea as to how many times in a year you would meet with the trade unions?

MS RACHEL KWAN: It's about two to three times a year.

MR DUNCAN: Was it typical that persons from the police and other bodies would attend those meetings?

MS RACHEL KWAN: Yes. It really depends on the agenda, on the items to be raised at the meeting. We will invite, for example, the police to attend the meeting if necessary.

MR DUNCAN: I want to refer you, Ms Chan again, back to bundle TU-1, at page 80 this time.

This is part of the submission from the Kowloon Motor Bus Staff Union to the committee. I assume, Ms Chan, that this is one of the documents you have been able to read?

MS MABLE CHAN: Mm-hmm.

MR DUNCAN: Can I bring your attention, please, to paragraph 1 of the letter.

The translation is at page 80-1.

Item (1), could you just read that to yourself, please.

MS MABLE CHAN: Yes.

MR DUNCAN: Have you read that?

MS MABLE CHAN: Yes.

MR DUNCAN: You can see some sentiments, quite strongly worded there, from the trade union, sentiments that have been communicated to the committee.

What is your response to those sentiments?

MS MABLE CHAN: From the English translation of that letter, it actually -- the first paragraph mentions a number of issues, like high wastage rate, low remuneration package, overlong working hours, et cetera. These are the issues that have been raised by the staff unions, both to the bus operator and also during their discussions or meetings with the Transport Department.

On the high wastage rate, I think this was also mentioned in the first session yesterday, about the acute manpower shortage.

The low remuneration package is also one of the areas that the government has asked the bus operators to look into that as one of the measures to attract new blood and to retain the in-service bus captains.

The overlong working hours is a longstanding issue, and that is actually one of the issues that we have been looking into time and again over the years, when we formulate or revise the working hours guidelines.

The tight bus trip schedules is another issue concerning the operation, and this relates to the increasing public demand on public bus service, coupled with on-the-ground traffic congestion issues in certain areas, that will lead to the tight deployment of bus trip schedules.

As far as the management, they have raised the issue about the management issue, this is more an issue between the management and the staff as far as the individual bus companies are concerned.

So, in short, these areas relating to the general bus operation in Hong Kong, the manpower issue, the remuneration issue and also the working hours of bus captains, the government is aware of that and that is why we are taking various measures to discuss with the bus companies.

The working hours guideline is one of the measures that we would want to improve their working conditions, by further shortening their working hours. And the remuneration package, we have also asked the bus companies to devise various means to attract new recruits and to retain the in-service bus captains as far as possible.

Thank you.

MR DUNCAN: How would you describe the department's

relationship with the trade unions? Is it a healthy relationship? Is it a tense relationship? Just how would you describe it?

MS MABLE CHAN: The Transport Department is a regulator of the franchised bus operators. Bus captains are an important asset and an important component in the operation of franchised bus operators. The Transport Department, though not being a labour department, we maintain an ongoing and close relationship with the staff unions of the bus captains under various bus operators.

I would say that we maintain an ongoing relationship and we stand ready to meet with them, on their request or on our own initiative.

Thank you.

MR DUNCAN: I wasn't really asking whether it was ongoing or not, but is it a good relationship? Do you get on well together?

MS MABLE CHAN: It is difficult to generalise, to reply to your question in very short manner. I do not want to say so. But I would say that we keep an ongoing dialogue and we maintain a cordial relationship with them, to discuss issues of mutual concern, and we take into account their views and concerns, amongst other factors, in devising our guidelines on working hours,

and also in asking or facilitating the bus operators to improve the rest facilities in the depots and in the bus stops to address their very basic needs during the day.

MR DUNCAN: How does it compare with the relationship the department has with the bus companies?

MS MABLE CHAN: It is difficult to compare. We are the regulator of the bus operators. We take a very serious attitude in regulating and monitoring the bus operators. As far as the staff unions are concerned, we consider them as important stakeholders in the process to ensure a proper and efficient service. The employees are key components of the bus operators, so we consider them as important stakeholders and that we have to maintain a close and ongoing discussion and dialogue with the staff unions.

MR DUNCAN: Just before the break, could I ask you again to look, please, at the heading, the introductory words to clause (1) of that submission. That was the sentiment to which I was referring earlier.

Does that sentiment come as a surprise to you?

MS MABLE CHAN: I will not comment on that.

CHAIRMAN: Perhaps for the purpose of the record you want to read it out, then it will be in our transcript.

MR DUNCAN: Yes. It reads this:

"Serious negligence of duty by officials of the

Transport Department and their ineffective monitoring".

Does it surprise you that the trade unions have made that suggestion to the committee?

MS MABLE CHAN: I will not comment on that. What I can respond is that we have done our part in regulating and monitoring the bus operators, and we also take into account the views and concerns of the staff unions in devising the various measures that relate to the bus captains. We have maintained an ongoing discussion channel with the staff unions and we stand ready to meet them and hear their views, and we take seriously their views into account when we devise the various measures.

MR DUNCAN: Thank you, Ms Chan. After the break, I will take you to just some of the particular matters that the trade unions have raised with the committee. I'm not going to go through them all, but some of them, and I will be anxious to find out whether they have been raised with the department and, if so, how they have been resolved. But we will do that after the break.

MS MABLE CHAN: Thank you.

CHAIRMAN: Yes. We will take a break for 15 minutes. Thank you.

(11.38 am)

(A short adjournment)

(11.58 am)

CHAIRMAN: Yes, Mr Duncan.

MR DUNCAN: Thank you, Mr Chairman.

Ms Chan, before we turn to some of those issues that the trade unions have raised with the committee, there are just a couple of other matters I would like to ask you about.

The first arises from something you said this morning, during your evidence, pertaining to the guidelines on working times, and so forth.

If I could just quote from your evidence this morning. You said:

"More frequently, relatively speaking, some of these requests" -- and you are talking about requests from the trade unions -- "relate to the working hours and the rest times of the bus drivers, because while the ordinance does not require us to stipulate specific requirements of working hours and conditions, the department over the last 10 to 20 years have devised the guidelines requiring the bus companies to follow, insofar as the working hours, the driving hours and the rest and meal breaks are concerned."

Now, of course it is true that the ordinance does not require those matters to be dealt with, but you are aware, are you not, of the regulation in the ordinance which specifically provides for these matters to be the

subject of regulation? You are aware of that?

MS MABLE CHAN: Yes.

MR DUNCAN: So I'm going to ask you the same question --

CHAIRMAN: Could you take us to where we find that?

MR DUNCAN: Certainly. It's in the THB-2 bundle, Mr Chairman, at pages 124 and 125.

CHAIRMAN: And what are we looking at there?

MR DUNCAN: At 124, we are looking at section 35 of the ordinance, which is introduced by the words:

"Secretary for Transport and Housing to make regulations."

And the provision then within section 35 for:

"The Secretary ... [to] make regulations for all or any of the following matters".

If I can refer you over the page, 125, to item (j), regarding "in relation to the drivers of buses used by a grantee":

"(i) the maximum number of hours during which any such driver may be permitted to drive such a bus; and

(ii) the intervals to be provided by a grantee for the rest and refreshment of such drivers, in any period specified in the regulations".

Are you able to tell us is there any particular reason why the working hours schedule is governed by guidelines as opposed to regulations?

MS MABLE CHAN: As a matter of fact, the Transport Department first formulated the guidelines for compliance by the franchised bus operators on a voluntary basis back in 1993. The formal promulgation of the guidelines was in 1998. Since then, the guidelines were reviewed and as a result revised six times since 1998.

The process of implementation of the guidelines and review of the guidelines is an ongoing, evolving process. So far, the formulation of the guidelines and the revision to the guidelines were arrived at through discussions with the bus operators and also through our meetings with the staff unions, taking into account the views expressed by various stakeholders.

In implementation of the guidelines, we have required the bus operators to do the regular monitoring and supply us with regular information. The Transport Department has also employed independent contractor to do the independent survey and checking, to monitor the compliance.

Over the years, we can observe that the compliance by the bus operators to the guideline is significantly high. We do not detect any significant deviation from the bus operators from the guidelines.

So, from the operational point of view, we think

that the existing arrangement under which the working hours and the driving hours and the rest break and meal break are set out in the form of guidelines works well. Should there be any persistent non-compliance of the bus operators, we will take necessary follow-up actions, including issuing advisory letters, warning letters, to make sure that any non-compliance is rectified as early as possible.

Thank you, Chairman.

MR DUNCAN: So do I take it from that that it has never even occurred to the department to do this by way of regulation?

MS MABLE CHAN: Under the existing framework, the guidelines serve as an effective tool for us to monitor the bus operators in deploying the bus drivers' driving duties, to meet the requirements under the guidelines, the guidelines provided for requirement on rest breaks and meal breaks for the bus captains. Coupled with that, we will also discuss with the bus operators and require them to provide necessary rest facilities. The whole process is an ongoing process and needs to be implemented in a pragmatic manner.

So we think that the guidelines at the present moment serve well and we will surely take that into account in assessing the bus operators' performance in

providing a proper and efficient service.

MR DUNCAN: Now, it is true, isn't it, that from time to time the trade unions and the staff unions have complained that the bus companies have not been complying with the guidelines? That has been a source of complaint from the unions and the staff members, has it not?

MS MABLE CHAN: We are aware that there may be individual complaints on particular occasions, but we have our own independent checking on the compliance of bus operators according to our guideline. We have tried our very best to institute independent checking mechanism, and we also expect the bus operators to make sure that those requirements are complied with.

Up to the present moment, we are reasonably satisfied that the bus operators regard those guidelines seriously and also fulfil the requirements as we required, to comply with the relevant guidelines, in formulating the bus driver duty shifts on an ongoing basis.

Thank you.

MR DUNCAN: Do you accept that if they were the subject of regulation, the department would have more teeth to enforce the arrangements than it does with simple guidelines?

MS MABLE CHAN: Based on our experience so far, we are satisfied that the guidelines are followed through and there are checks and balances to ensure independent checking, and should there be any non-compliance on a particular occasion, we would take it up with the bus operator and see what are the causes for those non-compliance in a particular case, and then we will take it up with the bus operator accordingly.

So far the mechanism to ensure compliance and follow-through works effectively.

Thank you.

CHAIRMAN: The question was: do you accept that the regulations would give the department more teeth than guidelines, not whether or not guidelines are working, but whether or not the regulations would give the armoury available to the Transport Department more teeth?

MS MABLE CHAN: I think this is an issue to be looked at in the overall scheme of things and the legislative framework. At the present moment, the monitoring of TD and also the regulation of TD of the bus operators actually flows from the statutory framework under the PBSO and the Road Traffic Ordinance, under the franchise, and also there are other commitment letters and administrative requirements.

So I think, overall, in the overall scheme of things, it is how the Transport Department performs our monitoring and mandatory role.

So I will not comment at this stage as to whether a particular requirement to be set out in the regulation will particularly give us more teeth in that particular sense, because the monitoring and regulation by TD on the bus operators' operation is performed under the overall scheme of things, with statutory requirements, franchise provisions, and also other directives or notices issued by the Commissioner for Transport.

CHAIRMAN: So does it come to this: although the legislature thought it was sensible to give you the power to make regulations, you have not found it necessary to do so because the informal system that you have works?

MS MABLE CHAN: I would respond that, as I mentioned just now, the existing framework or regime under which we enforce the compliance of the guidelines and follow through and take rectification system works to our satisfaction at the present moment.

CHAIRMAN: Thank you.

MR DUNCAN: The other matter I want to ask you about before we go to the trade unions' points is something that arises from your supplemental written submission. It's at TD-1 at page 163. Could you turn up that, please.

Could I refer you to the first item on that page, item 17.

MS MABLE CHAN: Yes.

MR DUNCAN: The question that was asked by the committee was that "If the requisite capabilities of the tachograph/black box were communicated to the [bus] operators in written form, please provide copy samples of such documentation. Has the [Department] revised the requisite capabilities of the tachograph/black box from the time that the [Transport Department] first required [bus] operators to fit the device on franchised buses?"

So that was the matter which was posed.

If we look at your response:

"The [Department] have issued a 'Basic minimum requirements for electronic recording devices (also known as black box) on new buses' to the [bus] operators and a copy is enclosed ..."

We will go to that in a moment.

"Based on these requirements, the vehicle examiners would conduct random checks on the functionality of the black boxes during bus inspections.

We understand that over the years with the advancement of technology, the ... operators have taken initiative to work with the supplier of the device to widen the scope of information being kept by the black

box to facilitate their fleet management, which may include records of route number, door bell pushing, opening of the doors, GPS location, brake application, et cetera."

Now, if I could take you, please, to annex 15. You will find that at TD-5 at page 1597.

Do you see at that page, 1597, the letter that the Transport Department sent to a number of franchisees? Is that the letter requiring the use of the so-called black box?

MS MABLE CHAN: Yes. It was at a time when the black box requirement was imposed.

MR DUNCAN: Thank you.

If you turn over the page --

CHAIRMAN: So that is 17 October 2003?

MS MABLE CHAN: Yes.

MR DUNCAN: Then over the page, the "Basic minimum requirements for the electronic data recording device" are set out.

Is that correct?

MS MABLE CHAN: Sorry, I beg your pardon?

MR DUNCAN: Over the page, you will see the "Basic minimum requirements" set out.

MS MABLE CHAN: Yes.

MR DUNCAN: Since 2003, of course, technology has moved on

and black boxes are able to provide all sorts of information now which wasn't available in 2003. You will be aware of that.

Has the department issued any further directives to the bus companies as to the sort of information that it needs to collect from these black boxes in today's technology world?

MS MABLE CHAN: I just confirmed with my colleagues that since 2003 we have not issued similar directive regarding the electronic data recording device.

MR DUNCAN: So this is something simply left to the bus companies, to keep up with technology?

MS MABLE CHAN: The advancement of the technology has evolved over the years, and we are in the process of discussing the enhancement of the black box system in our working group which I mentioned this morning, which we started to commence deliberation in March 2018.

This is one of the issues that has been included in the scope of work for discussing with the bus companies and bus operators. Over the past years, we have not issued any similar directive on enhancement over the years. But we would expect that as the technology advances, the bus companies, they are also prepared to consider and examine any possible means to enhance their existing devices in the buses.

CHAIRMAN: So the answer is yes, it's been left to the bus companies in the intervening 14 years?

MS MABLE CHAN: In the intervening 14 years, as my colleagues mentioned yesterday, there is ongoing contact with the bus manufacturers and the bus companies, and they keep in view any new technological data and advancement in the various devices.

We have not issued any particular additional note to supplement on this directive, but that doesn't mean that we did not look into that.

Thank you.

MR DUNCAN: Now I want to go, please, to some of the matters that --

CHAIRMAN: Before you do that, if you are moving away from black boxes?

MR DUNCAN: Yes.

CHAIRMAN: Perhaps you could help the committee with this. Is the Transport Department aware of the devices that are now in use, the black box devices, in the various franchised bus companies?

MS MABLE CHAN: I beg your pardon? Is it are we aware of any --

CHAIRMAN: Are you aware of the capability of the devices now being used, that are called black boxes, by the various companies?

MS MABLE CHAN: Perhaps I will invite Mr Chan, our expert, to --

MR YK CHAN: Thank you, Chairman.

I think I will just roughly go over the various functions of the black box that various companies are now adopting.

CHAIRMAN: Can you answer the company directly, "yes" or "no" to start with, and then by all means give us your explanation. Are you aware of the capabilities of the devices described as black boxes, as a general sort of term, used by the various bus companies?

MR YK CHAN: Yes.

CHAIRMAN: So the answer is yes?

MR YK CHAN: Yes.

CHAIRMAN: Thank you.

Please explain.

MR YK CHAN: A black box -- I think basically the first thing is the device is capable of sort of monitoring the movement of the vehicle by each time interval, by a certain time interval, perhaps second by second.

CHAIRMAN: That was the 2003 requirement.

MR YK CHAN: It's the 2003 requirement.

CHAIRMAN: Yes.

MR YK CHAN: And really, in the old days, it's sort of analogue type of black box, tachographs, but nowadays

it's become electronic, so there are developments that you can utilise this basic information in various ways.

I understand from the bus companies nowadays, they actually -- apart from recording, the braking, the speed, the opening of doors, the sounding of bells are all recorded in that gadget -- we call it black box nowadays -- and actually the bus companies are utilising this information as a driver monitoring or fleet management tool, to conduct their day-to-day monitoring.

That is the basic function of it. Of course, with the development of other type of technologies, like GPS or other --

CHAIRMAN: That's hardly a new technology, is it?

MR YK CHAN: I think the technology itself is not new.

CHAIRMAN: American mothers were buying their sons in the military in the Gulf War in 1990 Magellan GPS machines so they could find their way across the desert.

MR YK CHAN: Yes, the technology itself may not be new, the basic information it produces may not be new, but with the advance of technologies and the development of various uses of the information, in the context of fleet management, the bus companies are actually utilising this sort of information, as I said, as a tool to monitor the operation of the vehicles day in and day out, and also they can also monitor the driving

behaviour of drivers day in and day out.

So you can say fleet management is not new either, because actually it has been deployed by various transport companies for a long, long time, and this information, for our bus companies in Hong Kong, as I said, as the commissioner said, we have not just left it to the bus companies to look into what they want to do.

Over the years, as I mentioned yesterday either, we have been sort of looking around, new technologies and new applications or utilising technologies that are available. Now, black box, although it is producing very basic information, but we actually over the years have been communicating -- talking to bus companies, asking them to study and investigate the feasibility of applying this sort of technologies and the information produced by the black box to better manage their bus operation and drivers.

I think they have been doing that, and I understand also from a couple of companies, bus companies, recently they are actually upgrading their software and systems to better utilise the black box information.

CHAIRMAN: These requests that were made of the various bus companies, that they investigate the improved technology and consider using them, were these made in writing?

MR YK CHAN: I cannot answer this question right now. I can go back and check. But certainly we have various meetings and also discussion and even when -- our staff all go over to the depots to see the management over maintenance or construction and maintenance of vehicles, we do raise out this sort of discussions.

But whether these questions or requests have been recorded down formally, then we will have to check again.

CHAIRMAN: Whether it's formal or not, were there any minutes taken of meetings, were there any letters evidencing what you say was communication over the years? If you are able to find them, would you be kind enough to first of all locate them and give us sample copies?

MR YK CHAN: Sure.

MS MABLE CHAN: We will try to do our hard work again.

CHAIRMAN: Thank you.

MR DUNCAN: Can I take you, please, to bundle TU-1 at page 185.

I think I have to introduce this page by asking you to go back to page 147. We don't have a translation of this but it's a very small portion I'm going to ask the committee to consider. The start of the document is at page 147. Do you have that?

MS MABLE CHAN: Yes.

MR DUNCAN: Thank you. If you go back two pages to 145, you will see the covering letter. This is a written submission to the committee by the Federation of Bus Industry Trade Unions.

If you could go through then, please, to page 185 of the document, and if I could bring your attention, please, to the last paragraph which starts on page 185.

The translation that I have suggests that the content of this paragraph is as follows:

"In order to receive a bonus payment, the bus captains must pass the assessment. The bus operators use the attendance rate as an important criteria in determining whether to grant a bonus. Bus captains would continue driving even when they are sick."

Do you see that in that portion that I have brought to your attention?

MS MABLE CHAN: I have yet to locate the specific statement in the Chinese.

CHAIRMAN: Take your time.

MS MABLE CHAN: I can locate the paragraph, although the order of the expression of the views may not totally --

CHAIRMAN: Perhaps you can give us your interpretation, if you are able to. If not, say so.

MR DUNCAN: As it's been put to me -- you can agree with

this or you can comment on it -- I will put to you --

MS MABLE CHAN: Can you put your English translation --

MR DUNCAN: I will read it to you again, yes.

MS MABLE CHAN: -- again so I can hear --

MR DUNCAN: So you can understand it and see whether that's reflective of what you have read:

"In order to receive a bonus payment, the bus captains must pass the assessment. The bus operators use their attendance rate as an important criteria in determining whether to grant a bonus."

So the bus companies (sic) have to continue have to continue driving in order to keep their attendance rate up, in order to get the bonus, so they will drive even when they should be on sick leave?

CHAIRMAN: That's bus captains do that?

MR DUNCAN: Bus captains, yes.

You need to read 185 and on to 186.

MS MABLE CHAN: Perhaps I can try to help.

MR DUNCAN: Thank you.

MS MABLE CHAN: Because the paragraph starts to mention about the new recruit employed on contract basis and the bus company takes into account their attendance performance, their attendance rate, as one of the factors in considering whether to renew the contract. And such contract staff very often, in order to hope

that the company will renew their contract, may attend while they are sick or have illness.

You consider this attendance as a factor in considering the renewal of the contract is unreasonable, then it's the second part of this paragraph mentioning that the bus company in recent years introduced a year-end bonus for new recruits, and the bus company has introduced an assessment mechanism for awarding of such bonus, and the bus company will also consider this attendance rate as one of the indicators in the assessment.

So there are two parts of the statement.

MR DUNCAN: Right. Let's not quibble with what is in there. Let me ask you this, though. Is this a matter that the trade unions have brought to the department's attention?

MS MABLE CHAN: As I have said, because I have seen this submission, and this is also one of the issues recently raised by the staff unions in various occasions, so I am aware of that.

MR DUNCAN: Yes.

MS MABLE CHAN: But as to whether they have formally raised this in their submission or letter to the Transport Department, I will have to check on that.

CHAIRMAN: But it's been brought to the Transport Department's attention?

MS MABLE CHAN: I will have to check on that because I am aware of that and my colleagues are also aware of that, because this concern has been raised by the staff unions, particularly following the Tai Po accident, but I would have to check on that and then revert to the committee with our written response.

CHAIRMAN: Thank you.

MR DUNCAN: Please do so. What I'm interested in is, first of all, whether it's been communicated to the department and then, secondly, if so, what steps have been taken by the department to look into this matter. Could you cover that in your written response, please?

MS MABLE CHAN: Yes, because we are aware of these kinds of concerns through the various occasions the media has widely reported and following the Tai Po incident. But I'm not sure whether this has been formally communicated to the Transport Department. This relates to the recent introduction by the bus company on the year-end bonus and also on their indicators to assess newly recruited staff on contract basis.

So it relates to the terms of the employment and the recruitment of a bus company.

CHAIRMAN: If you are aware of it, I think the broader question is what have you done about it, if anything, so far?

MS MABLE CHAN: I was aware of it in very recent months, following the Tai Po incident, as widely reported, but I will revert with further information as to the department as a whole is aware of this concern and through formal channels.

Thank you.

MR DUNCAN: Another matter raised by the trade unions can be found at page 311 of the same bundle.

This, you will see, at page 310, is a document received from the Federation of Hong Kong & Kowloon Labour Unions. Do you see that?

MS MABLE CHAN: Yes.

MR DUNCAN: I'm referring you, please, to the paragraph which is the last paragraph to commence on page 311. For the purposes of the hearing this morning, I've had a translation of that particular paragraph prepared, and I'm going to make it available now. (Handed).

CHAIRMAN: Do we have a copy for the stenographer? (Handed).

MR DUNCAN: Could you take the time to read through that, please.

MS MABLE CHAN: Yes.

MR DUNCAN: In this particular part of the submission, the union has raised a matter pertaining to the advertising revenue of the franchised bus operators. Do you see

that?

MS MABLE CHAN: (Nodded head).

MR DUNCAN: There's a request of the government to review the regulation with regard to the non-fare revenue of the bus company.

Is this a matter which the unions have raised with the Transport Department?

MS MABLE CHAN: Not that I'm aware, no.

MR DUNCAN: So this is the first that you've come to know of this issue?

MS MABLE CHAN: Yes.

MR DUNCAN: The submission to the committee?

MS MABLE CHAN: Yes.

CHAIRMAN: Could you just read out the part that you say is the request for a review.

MR DUNCAN: It's the last sentence of the first paragraph:

"The Federation of Hong Kong & Kowloon Labour Unions demands the government to review the regulation on the non-fare revenue in the franchised bus ['policy', I think it must be] to avoid the repetition of the aforementioned vicious cycle."

CHAIRMAN: Thank you.

MR DUNCAN: I guessed correctly, "policy".

CHAIRMAN: So you are not aware of this request, Ms Chan?

MS MABLE CHAN: No.

MR DUNCAN: Can I then refer you back to another matter, this time at page 71.

MS MABLE CHAN: Sorry, Chairman, apart from giving the answer that we are not aware, can I comment on that?

CHAIRMAN: Of course you can, yes.

MS MABLE CHAN: Based on the submission, and the issue they raise about the companies' definition of the non-fare revenue, may I say for the record that the bus companies are expected to prepare their annual accounts and budget according to the international accounting standards, and they are subject to the internal audit of the department. Should they suggest any fare increase proposal, those will be scrutinised by the department and also the Financial Monitoring Unit of the Transport and Housing Bureau.

In considering the justification and basis for any fare increase, we will take into account the financial position of the company, projections of the cost and revenue; the non-fare revenue and fare revenue will both be taken into account.

Thank you.

MR DUNCAN: I now wish to refer you to page 67 of the same bundle, please.

This is an email which encloses a submission to the committee from the Monthly-rated Drivers Union.

Could I bring your attention, please, to page 72 of the translation. You may wish to read the Chinese at page 68. Would you read to yourself, please, paragraph 3, headed, "Training of bus captains".

MS MABLE CHAN: Yes, I have read that.

MR DUNCAN: This concerns the matter of training.

MS MABLE CHAN: Mm-hmm.

MR DUNCAN: Have trade unions from time to time raised these sorts of issues with the department?

CHAIRMAN: Could you be more specific, when you say "these sorts"?

MR DUNCAN: The particular complaints that are set out in this paragraph, has the department been apprised of these particular matters?

CHAIRMAN: For my benefit at least, can you identify what you regard as the significant points?

MR DUNCAN: Certainly, Mr Chairman.

If I could quote from the translation, at the bottom of page 72, it's alleged as follows:

"At present, each training course consists of one or two trainees and an instructor, who will get along with one another for 17 days. Besides teaching proper driving skills and manners, the instructor will also observe the character of the trainees. However, the company neglects relevant comments under the existing

system. In fact, there is an abundant supply of trainees in the KMB bus captain training school. Nevertheless, only a few stay after a year. High work pressure ... and the discrepancy between the claimed salary in recruitment advertisements and actual income ... are reasons for wastage."

Have those sorts of allegations been brought to the attention of the department in the past?

CHAIRMAN: I'm sorry?

MR DUNCAN: My question is: have those sorts of complaints been brought to the attention of the department in the past?

MS MABLE CHAN: I have read the Chinese version as well as the English version.

MR DUNCAN: Yes.

MS MABLE CHAN: The first part of the paragraph describes a particular case in which a new recruit candidate goes through the training process and also the driver licence examination, and it happens that after one week of service there is an accident happened and the bus company organised training course for this captain.

The Chinese says the company, under the existing system, they did not take into account relevant opinion. So this is not sure how they said that the company does not take into account the relevant opinion, because at

the outset it described the training course provided by the bus captain.

But the latter part of this paragraph actually mentioned about for those new recruits who continue to work for the first year, they may have to pay some training fees for the company. So, in this particular form, we have not received such kind of complaint, as to the specific occasion and also the specific arrangement of the training for individual companies, no.

Thank you.

MR DUNCAN: You haven't received those sorts of complaints?

MS MABLE CHAN: No.

MR DUNCAN: Moving to another topic: have trade unions or staff associations from time to time made comments to you about safety technology and safety provisions that might be introduced on buses? Have they themselves made suggestions?

MS MABLE CHAN: I will have to ask my colleagues to check from their memory.

Maybe I will ask Rachel to help out.

MR DUNCAN: Yes.

MS RACHEL KWAN: When we met the staff union in the past, say, two years, they seldom raised question or suggestions about safety device.

I remember once upon a time they raised about

demister on the windscreen, because they find in spring time the foggy situation is serious. After that, we have followed up with their employers to see what solution could be made. This is the only item that relates to safety matters that I can remember.

MR DUNCAN: Have the unions from time to time raised matters pertaining to reflective mirrors and demisting devices, those sorts of things?

CHAIRMAN: I think that's what you just said that they have raised, some years ago; is that right?

MS RACHEL KWAN: Maybe two or three years ago, yes.

MR DUNCAN: What about display monitors and warning devices, sensors, to facilitate reversing? Have they been raised with you by trade unions at all?

MS RACHEL KWAN: I'm sorry, I'm not aware of that.

MR DUNCAN: Are trade unions represented at all on the working group which is looking at the new technology that might be available?

MS MABLE CHAN: No. The working group, the focus of the working group is to look at the bus safety enhancement device and also the training framework. We discussed with the bus companies and the bus manufacturers. In providing their views, insofar as the bus companies are concerned, we will expect the bus companies to take into account the company's circumstances and their other

stakeholders' views as necessary to provide the feedback to us.

As colleagues have just recalled and mentioned, our ongoing discussion with the trade unions arises from our ongoing process in developing the working hours guidelines, so in that context, it is more often that they raise the working hours and the conditions and their concern about remuneration and take-home pay. It is not common for them to raise specific issues regarding their remuneration arrangement and the contractual terms which falls into the purview of the individual bus companies and their employees.

The bus operators are expected to fulfil the statutory requirements under the Employment Ordinance, to devise their employment terms for the recruitment of the bus captains.

Thank you.

CHAIRMAN: Is there any reason why the trade unions were not involved in the working group, if one of the things you are considering is training?

MS MABLE CHAN: Thank you, Chairman.

The working group started its scope of work to look at the bus enhancement device, and also see whether there are any ways to improve the monitoring and formalisation of the training framework.

The working group is not tasked to look into imposing new training requirements as such or modules on the bus companies. What we are trying to do is to get hold of the existing training arrangements and then to formalise it and align it.

Thank you.

CHAIRMAN: One of the technological devices being considered was a speed display unit in the bus, like the PLBs, as I understand it. Do I understand it correctly?

MS MABLE CHAN: Yes.

CHAIRMAN: Isn't that a matter that would be something that bus drivers themselves might contribute to?

MS MABLE CHAN: The speed display unit, the feasibility of such kind of device or the speed display unit in the bus is one of the topics being considered in the working group. But we are also aware of the bus companies' feedback that perhaps it may impose burden and pressure on the bus drivers, with passengers on board monitoring the driving behaviour of the bus captains.

Should there be any particular new proposal that may have implication on the staff, Transport Department is more than happy to involve the staff unions to explore feasibility of new measures.

Thank you.

CHAIRMAN: Rather than having the bus operators tell you

what they think the bus captains might react to in terms of having a speed display unit, is there any reason why the bus drivers themselves were not asked or their trade unions?

MS MABLE CHAN: We are prepared to meet with them and discuss with them.

Thank you, Chairman.

CHAIRMAN: Mr Duncan.

MR DUNCAN: Which are the stakeholders then which are represented in this working group?

MS MABLE CHAN: The working group comprises of the bus operators and the bus manufacturers, and it also comprises the Vehicle Licensing Examination Unit, the electrical and mechanical engineers involved overseeing the technology side, and also the Road Safety and Standards Unit within the Transport Department, overseeing the territory-wide road safety matters.

CHAIRMAN: So the group is constituted by the Transport Department on one side, bus operators on the other side, and for technical purposes bus manufacturers are brought in; do I understand it correctly?

MS MABLE CHAN: Yes.

MR DUNCAN: Has the department given any consideration at all to involving trade union representatives in that working group?

MS MABLE CHAN: At the present moment the working group does not comprise representatives from the trade unions. The working group is tasked to look into possible ideas, in order to formulate proposals. As with our usual practice, when there are more systematic thoughts and proposals, we can discuss with the other stakeholders, including the trade unions, and we are ready to do so.

MR DUNCAN: I take it that the answer to my question is no, you haven't considered that?

MS MABLE CHAN: I have considered that, because at the present moment the working group has just discussed the initial thoughts on the devices and the training framework, and the training actually involves the bus captains. So, after the working group has come up with more concrete proposals, with our ongoing dialogue and discussion with the trade unions, we are ready to share with them, and I have this in my mind.

Thank you.

CHAIRMAN: So it has been determined, for current purposes, not to involve the trade unions at this stage?

MS MABLE CHAN: Yes, at this initial formulation stage.

Thank you.

MR DUNCAN: Have you communicated that intention to the trade unions?

MS MABLE CHAN: No, because the working group was initiated

by us in order to take stock of various suggestions, requests, and various ideas initiated by the department. We want to scope the work and the task involved with a view to formulating more concrete proposals. It will be by then that we have a more clearer and more systematic framework in order to consult various stakeholders.

Thank you.

MR DUNCAN: Now could I take you, please, to one other matter raised by the unions. This you will find at TU-1, page 174. Sorry, this is a matter which has not been translated.

CHAIRMAN: Is this the document that begins at page 147?

MR DUNCAN: Indeed it is, Mr Chairman, yes.

CHAIRMAN: And it's the submission of the Federation of Bus Industry Trade Unions?

MR DUNCAN: Yes, with a cover letter at age 145. I've referred to this document before. I'm going back to the same document.

Can I bring to your attention, please, the bottom part of page 174, that paragraph. Could you read that to yourself.

MS MABLE CHAN: I beg your pardon, is it at the bottom of the page, the second paragraph?

MR DUNCAN: Correct, the second paragraph on page 174, yes.

CHAIRMAN: With the words "Alexander Dennis Enviro"?

MR DUNCAN: That's correct.

MS MABLE CHAN: We have read that paragraph. Thank you.

MR DUNCAN: Is that paragraph bringing to the attention of the committee the danger in trying to control buses that have rear-wheel steering functions, and also problems involved in 12.7-metre buses?

MR YK CHAN: Yes. If I may go into -- try to answer this question. I believe the question is about that recently there has been introduced 12.8-metre buses, with the turning circle may be -- well, some of the drivers find it is difficult to handle for them.

First of all, any buses introduced in Hong Kong will have to comply with all the construction and maintenance regulations, and also all those buses imported into Hong Kong, nowadays they -- I think over 99 per cent actually come from Europe, and they have to comply with all the European standards.

The question is whether these buses are sort of applicable in Hong Kong. This is the main question. So, in our system, any new buses introduced into Hong Kong, the first thing we do, it has to go through a type of approval procedure. Those procedures, apart from looking at the technical part, technical aspects of the vehicles, and also the vehicle, we also look into

whether these vehicles are suitable to be used on roads in Hong Kong.

Having assessed those technical requirements, those buses, as we see, they are technically sound and feasible to be used in Hong Kong. On that, we notice actually some of the drivers feel that because the bus is longer than the existing -- most of the buses we use are 12 metres, and this one is 12.8 metres, so in the sort of turning handling, there is a slight deviation, slightly -- they have to sort of, I would say, get accustomed to the handling of those vehicles.

In this respect, we have actually asked -- we have done a few things. One, the bus company will have to sort of train their drivers to be accustomed to handle this vehicle. So there's no question of the bus is dangerous, if the buses can be handled properly.

The second thing is, if this bus is longer than most of the buses we use in Hong Kong, so in deploying these buses we have to actually look into the routes they are actually deployed, and it is -- at the moment when we deploy these 12.8-metre buses, they are route-specific. So we have to try those routes first and see if they are safe to be operated before we allow the bus companies to deploy them.

Not all buses used by the bus companies are

12.8 metres. Some of them may be restricted to 12 metres and some even to shorter buses, like those going up to The Peak.

So this is a matter of training and also deployment of the routes in the right place, and there is no question of these buses are dangerous.

That's my reply.

CHAIRMAN: Earlier on you said that they are 99 per cent from Europe and they comply with European standards?

MR YK CHAN: Yes.

MR DUNCAN: Has this been a matter which the trade unions have raised with the department?

MS MABLE CHAN: Yes. We are aware of that and we have looked into that.

MR YK CHAN: Yes, actually this has been raised by the union to the department, and that's why my division actually studied in detail on the turning circles and turning path, to see what the problem was.

We have actually mentioned that this is something that the bus companies should look into, because the complaint from the drivers is that they feel it is not comfortable to drive a new vehicle with that length. That's why we impress upon the bus company to do their job in driver training, and also on our part, when we improve these buses, we deploy them on a suitable route.

CHAIRMAN: Perhaps one last question from the chair before we have our lunch break.

Presumably there is some advantage to having a longer bus. Does it give greater passenger capacity? Is that the reason?

MR YK CHAN: Strictly speaking, if it's a longer bus, they provide more seats. But for this particular model, I would expect that this model does have the advantage to be deployed in Hong Kong. Apart from sort of a few seats, there may be other advantages in the manoeuvrability and the new technology deployed.

CHAIRMAN: You can tell us about the advantages after lunch.

MS MABLE CHAN: Perhaps I can add one point?

CHAIRMAN: Yes.

MS MABLE CHAN: The bus companies have pledged to enhance the accessibility facilities, like wheelchair passengers. So the greater room for manoeuvrability within a bus vehicle will enable them to improve in this aspect. This is also one of the indicators we look into in assessing the performance of the bus operator.

Thank you.

CHAIRMAN: Thank you. We will adjourn then and we will resume at 2.30 this afternoon.

MS MABLE CHAN: Thank you.

(1.02 pm)

(The luncheon adjournment)

(2.30 pm)

CHAIRMAN: Good afternoon.

Mr Duncan.

MR DUNCAN: Thank you, Mr Chairman.

Mr Chan, I think you were going to add some comments with regard to the advantages of these rather large buses.

MS MABLE CHAN: I have nothing to add.

MR DUNCAN: Sorry, Mr Chan. Is it Mr Chan?

CHAIRMAN: Yes, it is. You were telling us that there were some advantages to large buses.

MR YK CHAN: Yes. I think my colleagues already supplemented that longer buses will be able to make the bus have low-floor features and also accessible to wheelchairs.

CHAIRMAN: Easier access, in those circumstances?

MR YK CHAN: Yes.

CHAIRMAN: Thank you.

MR DUNCAN: Mr Chan, I want to raise another question with you, which was raised with Mr Lai from the bureau yesterday, and again he was unable to assist us. This is a matter raised I think by Prof Lo during the hearing. It relates to the number of drivers who are required, given the special shift provisions in the

working hours.

The question was whether any research had been done into the impact that there would be if that 14-hour special shift was removed, given that the current estimate of the Transport Department is that, with those new guidelines, there is going to be a need for something like 250 or so additional drivers. We were led to believe by Mr Lai that that sort of research had been done by the department, and I'm just wondering whether you are in a position to provide us with the results of that research.

MS MABLE CHAN: I would be pleased to do so.

We commenced a review of the working hours guidelines in September 2017. That was made on the initiative of the Transport and Housing Bureau. The starting point is to explore room for further improvement in the working conditions, in particular the working hours of bus captains.

In considering room for improvement and noting there have been changes and revisions in the past, we have taken a comprehensive review of the guidelines, taking into account the operational needs of the franchised bus operators, passengers and members of the public's demands for increased bus service level, staff unions' ongoing requests and demands for improvement in working

conditions, et cetera.

In conducting the review, we have also taken into account a number of factors, including the manpower implications of the implementation of the guidelines.

As I mentioned, the starting point is to improve the working conditions, in particular including the shortening of the maximum duty shift hours as well as the driving hours of the bus captains.

The latest products or the latest revised guidelines have involved research into the demands for the additional bus captains, and that ranges in the order of 250-something, 260, and we have included it in our bundle, paper 5, on the working conditions.

In the process, we have explored the possibility of reducing the maximum duty hours of the prevailing long shifts which are in current operation by some of the bus operators. It is our understanding that some of the bus operators have arranged for longer shifts in order to cater for the morning and the peak demands of certain bus routes, especially in those bus routes which are long and may span across various districts, from the New Territories, to cross harbour, to the Island.

We looked into the possibility of shortening the maximum duty hours and driving hours for these kinds of special duty shifts as well. Based on the information

provided by the bus operators, and having regard to those statistics that we have collected from our own surveys on the onboard bus trips as well as the driver deployment and establishment, we have conducted an analysis of the additional manpower implications should the maximum duty hours of this kind of special duty shifts be further shortened.

In very high-level summary terms, the ballpark estimate of the additional manpower implications for reducing the maximum duty hours of this kind of special duty shifts will range to the level of 1,600 additional bus captains amongst all the franchised bus operators.

Manpower implication is one of the factors that we have taken into account, because we are also very mindful to ensure a satisfactory level of bus service, as well as the practicality of the bus companies in recruiting additional bus captains, to ensure a timely implementation of the guideline.

We very much hope, and we have actually proposed to the bus companies throughout our meetings with them, to achieve a reasonable time frame for the full implementation of the guidelines.

Having regard to the manpower implications, the practicality of implementation, as well as the time frame for achieving the full implementation of the

guidelines, we eventually consider that we will include in the revised guidelines a section on this special duty shift. The special duty shift maximum duty hour will be maintained at 14 hours as the maximum cap, but the driving hours of bus captains who are on the special duty shift will be reduced to ten hours, which is on par with that of the driving hours of the normal duty shift.

In addition, we also impose a requirement on the bus companies to provide a break of no less than three hours within the shift duty. This is to ensure that while the bus captain may be deployed for such kind of routes which are operated under special duty shift arrangement, there will be enough rest break for the bus captain, and the driving hours, ie the bus drivers who are on the road, the maximum hours will be reduced to ten hours.

We provided our research and also assessment to the Transport and Housing Bureau and discussed with them. After the discussion, and noting the relevant implications, the guidelines were finalised and promulgated earlier this year, in February 2018.

Thank you, Chairman.

MR DUNCAN: Sorry, I just really want to deal with the numbers, if I could. I may have misunderstood some aspects of your earlier submission. So, at the risk of having you to repeat some matters, could I just clarify

some numbers?

MS MABLE CHAN: Sure.

MR DUNCAN: Currently, how many people are engaged as bus captains, across all of the franchised companies, the approximate number of all bus captains?

CHAIRMAN: When you locate the information, perhaps you could tell us and we can follow it in the written submission.

MS MABLE CHAN: Sure. I am actually trying to refer to paper 5, TD bundle, table 1.

The total adds up to more than 12,000.

CHAIRMAN: Where do we find that? Which paragraph?

MS MABLE CHAN: Paragraph 9. Below paragraph 9, there is a table 1, showing the breakdown of the bus captains in respect of the individual FB operators.

CHAIRMAN: Thank you.

MS MABLE CHAN: So the total of each of the captains employed by the respective bus companies will add up to some 12,000-plus.

MR DUNCAN: Assuming the implementation of the guidelines, what is the department's estimate as to the additional number of captains required?

MS MABLE CHAN: Let me refer to paragraph 7 of this paper:

"Based on the crude projections by the FB operators, it is estimated that a total of 250 additional bus

captains will be required for full implementation of the [currently revised] guidelines."

We have also studied this figure and compared with our own information regarding the bus captains' strength and numbers in respect of the FB operators. So it is in the order of a total of additional 250.

MR DUNCAN: Thank you. And if the special shift, which is provided for in the new guidelines, was done away with, how would that impact the figure of 250?

MS MABLE CHAN: It will be increased to a total of 1,600 additional bus captains.

MR DUNCAN: So instead of 250, read 1,600?

MS MABLE CHAN: 1,600, yes. More than 10 per cent of the total establishment of the FB operators added together.

MR DUNCAN: We may be able to work this out for ourselves, but given your position, can you explain very succinctly why the number would increase so significantly?

MS MABLE CHAN: Perhaps I can invite my deputy, who will have the knowledge about the shift duties and the hours and deployment, in order to help the committee to appreciate in simple and direct way. Thank you.

CHAIRMAN: Thank you.

MS MACELLA LEE: I will try to be simple. Because the operating hours are very long and there is a peak demand in the morning and the evening peak, so if we don't

allow these drivers to have longer duty hours covering the two peaks, it means you have to have two drivers to meet the extra demand at the peak, and these drivers will have to have shorter duty hours. That means it can be six hours and seven hours. This, to some extent, is not efficient, in a sense.

Because we have to cover the demand in the morning peak and the evening peak, so we don't have one person doing that now, you have two people, so the headcount is not just 250 plus two, because -- actually, the heads are more but each one will do a shorter time, much shorter duty shifts, maybe six hours, seven hours or even five hours.

So that's why it's not 250 times two. More heads, each one doing -- you may say that a normal driver drives ten hours, but if we have to cancel the split shift, it means that those extra -- about 13 per cent of the drivers have to double, because they can't work so long, and when you double the head, each one of them doing not 14 hours but even shorter, like six hours. So the mathematics is like that. So it's up to 1,600.

I hope I can clarify the situation.

CHAIRMAN: Thank you.

MEMBER LO: I wonder if I can ask a question.

CHAIRMAN: Please do.

MEMBER LO: I'm just thinking about very simply how many drivers were involved in special shift, multiply that by two, that would be the answer; right?

MS MACELLA LEE: No.

MEMBER LO: How come it's not?

MS MACELLA LEE: I have to explain that. There are 12,000 drivers, but this is the establishment, to me the daily service needs, it is about 9,000 duty shifts. You have more headcounts because everybody does only six days a week, you have leave, and so on.

I can tell you it's every day we need 9,000 duties, driving duties, or you can say 9,000 duty shifts, and among them about 1,200 are special duty shifts, 13 per cent, about 13 per cent.

MEMBER LO: Okay.

MS MACELLA LEE: So these 1,200 duties have to be times two, so it's 2,400, but of course there's no need to have a double in that sense, so it ranges at about 1,600. So we have to look at the matter in terms of duty shifts.

MR DUNCAN: Is a special shift a new initiative, or was it in play before the latest revised guidelines?

MS MABLE CHAN: The special duty shift has been operated by the individual bus operators to meet the morning and peak demand. In our review of the guidelines, we consider it necessary, in the first place, to look at

whether the maximum duty hours can be reduced, no matter they are normal or special duty.

We take the opportunity of the revision of the guidelines to specify in clearer terms on our requirements on the maximum duty hours and the driving hours. It is under this perspective that we introduce the subsection of requirements in the guidelines to illustrate more clearly on the special duty shift arrangement, and for this kind of arrangement what is our requirement on the maximum duty hours, driving hours and rest break for this special duty shift.

MR DUNCAN: So the previous version of the guidelines made no reference to the special shift?

MS MABLE CHAN: That's correct.

MR DUNCAN: It's something that evolved within the bus companies?

MS MABLE CHAN: It is evolving. We know this as a matter of fact. And more importantly, in our discussion with the bus operators and in meeting the staff unions, there are also views and suggestions that for those drivers who have been deployed for these special duty shifts, those drivers are also concerned about the remuneration or the take-home pay that they can get from the bus companies, in particular those working on these special duty shifts.

While we are looking at ways to shorten the duty hours and the driving hours, another concern that comes out during the discussion is the staff side, some of the staff side's anxiety about possible reduction in their take-home pay they then get from the bus companies.

So this is the whole process that we tackle the issue and it is an evolving process. Thank you.

CHAIRMAN: How were those concerns expressed by the staff about a reduction in their take-home pay?

MS MABLE CHAN: They make them in written submissions and also raise them with the meetings with the Transport Department, because during that period from October 2017 to February 2018, the Transport Department have met with the various staff unions and there were a series of meetings held during that period.

CHAIRMAN: Thank you.

MR DUNCAN: Thank you, Ms Chan.

I want to move to another topic now, if I may.

CHAIRMAN: Before you do that, Mr Duncan -- I think Mr Duncan was trying to ask you this question: when did special duties come into operation with bus companies? How long has this practice been in place?

MS MACELLA LEE: I think it exists at least 10 or 20 years before.

CHAIRMAN: A longstanding practice?

MS MACELLA LEE: Yes, a longstanding practice?

CHAIRMAN: Thank you.

Yes, Mr Duncan.

MR DUNCAN: Thank you, Mr Chairman.

Could you turn up, please, SEC-2 at page 664.

Are you looking at a document which is headed, "Community for Road Safety", and the heading, "Comments on the scope of the Public Transport Strategy Study (PTSS) for LegCo's Panel on Transport"?

Does this document appear to bear a date in 2015?

MS MABLE CHAN: Yes.

MR DUNCAN: Was there a public transport strategy study in 2015?

MS MABLE CHAN: Yes, there is a study conducted in 2015.

MR DUNCAN: Did the department participate in this study?

MS MABLE CHAN: Yes. It was led by the bureau and involved the Transport Department's input.

MR DUNCAN: Right. Would this paper have come to the attention of the department during the course of the study?

MS MABLE CHAN: In the usual practice of LegCo, they include this submission as the deputations to LegCo, and the bureau and also the department appear before that meeting of the deputations, and we note that this is one of the deputations made during that occasion.

MR DUNCAN: So this would be one of the documents that would have come to the attention of the department?

MS MABLE CHAN: Yes.

MR DUNCAN: Can I bring your attention down to the second subheading on page 664, "Opportunities and strategy for better safety".

Can you read the second of the black marks there, reference to the ISO standard, "Road traffic safety management". If I quote from the document:

"... a new member of ISO launched in 2012 to target at transport fleets of public transport operators and the logistic industries. This would follow the steps of other ISO quality assurance systems in the future to help deliver far more responsible transport operation from the road safety perspective."

Perhaps I should have read the introductory words:

"With the advent of new measures or practices, the PTSS [that's the study] should examine all opportunities afresh to improve safety and quality of service."

Then those examples are set out.

At any time before this paper was issued, before 2015, or during the course of the study, did the department give consideration to supporting the introduction of this standard?

MS MABLE CHAN: We are aware of the remark made by the

Community for Road Safety, in particular on the suggestion regarding the adoption of ISO 39001 in the context of the PTSS. Actually, this Community for Road Safety have also raised this in other occasions of LegCo.

The ISO 39001 was one of the subjects flagged up in yesterday's oral session as well. We note that this is a road traffic safety management standard, and it was finalised in 2012, after rounds of discussion. Over the years since 2012, there are a number of transport companies or logistics companies in certain jurisdictions, including Japan, Korea, and some of the European companies start adopting this kind of standard. We are aware of that.

We take an open-minded approach towards this ISO 39001. The Transport Department at the present moment, we also maintain and establish our road safety management system. As we explained yesterday, we keep track of the accident data from a common database, we analyse it, we identify common factors, and also try to develop preventive or remedial actions, as part of that system.

This ISO 39001 stipulates in a more sophisticated way, an elaborative way on how a road traffic safety management system can be formulated having regard to

data and objective criteria. So we take an open-minded approach. We do not rule out the possibility of improving our standards of road traffic management system within the TD, towards a more sophisticated world standard.

Thank you.

MR DUNCAN: So, when you say you have an open mind, does that mean you are not for it, nor are you against it?

MS MABLE CHAN: We are not against it. As I said --

MR DUNCAN: Are you for it?

MS MABLE CHAN: We have our established road traffic safety management in the department. It's always a positive move for the department to take into account latest and prevailing standards, in order to improve our system or to adopt latest standards in improving our system.

So any improvement in the standards, I would say, we would welcome and we would be ready to consider and look into it and see how our existing system can be further improved.

MR DUNCAN: Has the department at any time since 2012 considered the standard, to see whether it might improve the department's own current standards?

MS MABLE CHAN: Since the standards were first developed and promulgated in 2012, we noticed that it is quite new at that stage, and mostly it's the transport and logistics

operators who are considering the adoption of such standard.

So, upon its promulgation in 2012, we see that it is the start of a newly developed standard, at its early stage.

This submission by the Community for Road Safety was made in 2015 in the context of the PTSS, so our department currently established our road traffic management system and at the present moment we take an open-minded approach to this standard and see whether there is scope for improvement or even the adoption of this standard.

MR DUNCAN: As I understand this document, this would be a standard which would not actually be adopted by the department; it would be adopted by the transport company, ie the bus operator. Is that correct?

MS MABLE CHAN: Yes.

MR DUNCAN: So has the department taken any steps to refer this to the bus companies for their consideration?

MS MABLE CHAN: We do not. We do not. This standard was raised by the community for road traffic in the overall study of the public transport strategy. It is very comprehensive and it's fully-fledged, and there are a lot of different suggestions and views made in the overall scheme of things.

So we did not at that juncture refer this particular standard to discuss with the bus operator.

MR DUNCAN: Can I move further into the bundle at page 778.

Are you looking at a communication from the Community for Road Safety, this time dated 16 June 2016?

MS MABLE CHAN: Yes.

MR DUNCAN: Does it appear to be a response to the public consultation which was conducted leading up to the question of whether KMB's franchise should be renewed in 2017?

MS MABLE CHAN: Yes. I'm aware of that.

MR DUNCAN: No doubt this letter and the document enclosed with this would have come to the attention of the department --

MS MABLE CHAN: Yes.

MR DUNCAN: -- during that consultation exercise?

MS MABLE CHAN: Yes.

MR DUNCAN: If I could bring your attention to the letter, page 778, and in particular the first and second paragraphs -- the letter in total actually. Let me read it:

"In response to the above public consultation, we submitted a document to Government on 18 April 2016. Our comments focus on continuous safety improvement for bus operation. The contents cover a safety management

system in conjunction with a series of specific topics.

The document submitted by Government to LegCo's Panel on Transport ... 'Administration's paper on new franchise for bus network of the Kowloon Motor Bus Company (1933) Ltd -- report on the public consultation on the new franchise' only consists of a short paragraph on safety with two simplified points, namely 'to monitor bus captains' driving behaviour more closely' and 'to improve safety facilities on buses'. These clearly fail to reflect the much broader issues we raised.

Bus safety is a very important topic. For this reason we consider that it is necessary to submit our original document directly to LegCo's Panel on Transport for reference."

Then you will see what I understand to be the original document, which runs from page 779 through to 783.

Could I ask you to go to page 781. You will see the heading on that page, "Bus safety -- road safety management system", and there is reference again to the ISO 39001 standard, and there is reference, if I could quote it:

"This quality assurance system encourages fleet operators to be far more accountable and proactive in reducing accidents and risks."

Then the recommendations, there are two:

"Under the new franchise requirements encourage the bus companies to adopt a more advanced road safety management system towards the ISO ... standard."

Then:

"Government shall collaborate with the bus companies to study bus accidents and risks in details, with the view of setting targets of accident reduction."

Now, having received this document, did the department take any steps to encourage the bus companies to adopt the ISO standard?

MS MABLE CHAN: This submission was made as part of the submissions from the other stakeholders to LegCo, and this was made in the context of the discussion of the renewal of franchise for KMB in that year.

The discussion in LegCo at that juncture focused on a number of issues, as reflected in our LegCo Brief submitted to the IRC. I can ask my colleagues to refer to that paper in a moment.

There are a number of issues flagged up in the LegCo Brief to address the various key suggestions and issues raised in the renewal of the franchised buses. This recommendation made by the Community for Road Safety relates to the encouragement of bus companies of a more advanced road traffic safety management system and a new

standard.

At that juncture, we need to say that we did not bring this issue specifically to the bus company, but on the other hand, because the bus company, over the years we have required them to institute an internal monitoring system for the accident -- and also the safety performance of the bus company. On the other hand, the Transport Department has also established our own safety management system with independent analysis, to achieve the principle of "plan, do, check, act", which is very similar to the ISO 39001 standard.

So while the ISO 39001 standard is pretty new in relative terms as compared to the ISO 9001, and also the certificate or the adoption of the ISO 9001 is on a more widespread basis as compared to the adoption of the 39001, we treat it as a relatively new standard. That is why we did not raise this specifically with the bus companies at that juncture.

MR DUNCAN: How does the 39001 standard, as a standard, compare with the management systems that the bus companies operate? Which is better?

MS MABLE CHAN: Perhaps I will invite the chief engineer on road safety to highlight a few key features of 39001 and then to try to address the --

MR DUNCAN: I don't think we need, with respect, to go into

a lot of detail with regard to what the standard contains.

What I think the committee would be interested in is the respective merits of one against the other.

MR TONY YAU: Chairman, as the commissioner mentioned, I think our system is actually doing the same thing, our safety management system is doing the same thing, that we have the planning process and we have the monitoring process -- we analyse and monitor the accident statistics, and then we report to the Road Safety Council to formulate policy on relevant road safety management measures, such as legislation enforcement.

Then, after these measures are delivered or implemented, the result will be reflected in the accident statistics, which is the result of our performance, and then we monitor the statistics again and then review to see if any of our existing policy or measures need to be reviewed.

The management system I think is quite similar in principle, but I cannot compare the details between the two systems, which one is better or which one is not so good as the others.

But in principle, I think for the Transport Department as an authority, our existing safety management system can achieve the same purpose.

MS MABLE CHAN: May I add that the Legislative Council Brief on the renewal of the franchise for KMB can be found on page 1100 in bundle TD-4.

The discussion in LegCo at that juncture actually involved a lot of the service enhancement initiatives, including enhancing ancillary facilities for passengers to disseminate information and provision of fare concessions and other issues relating to profit-control scheme.

MR DUNCAN: Has the department actually sat down and made a comparison between the ISO standard 39001 and its own systems?

MS MABLE CHAN: Pardon me?

MR DUNCAN: Has the department actually conducted a proper comparative analysis of the ISO standard on the one hand and the systems in place in the Transport Department on the other?

MS MABLE CHAN: We have yet to conduct a very comprehensive and systematic study and review at this present stage, especially given that we have mentioned the ISO 39001 is, relatively speaking, new as an adoption as a tool for the transport sector. We have yet to conduct a very systematic and elaborative study on that.

MR DUNCAN: It did come into force in 2012.

MS MABLE CHAN: In relative speaking terms, since its

promulgation in 2012, the rate of the adoption of the standard by the transport operators and logistics companies is small as compared to the prevailing adoption of the ISO 9001 by the other transport operators.

I have some figures or perhaps Tony can supplement on the statistics, as regards the adoption.

MR TONY YAU: Yes. You may say that 2012, just a few years ago, is quite a long time, but for a management system it's very new and the time is very, very short. What we are talking about is the overall management system.

With reference to the overseas experience, the system so far is mainly adopted by the operators. Even in Singapore and the UK, they are still studying, start studying or may not try to commit to adopt the system.

So you may say 2012 may be a long time ago, but for a policy system or for a management system, it's very new, especially for a department, for an authority to adopt it, it needs some time to get more information and experience, the implementation experience, so that we can do a more meaningful analysis.

MR DUNCAN: Thank you.

Can I ask this: has the department conducted any comparative analysis of the ISO standard 39001 and the management systems apparently in place within the bus

companies?

MS MABLE CHAN: No.

MR DUNCAN: Do you have any plan in that respect?

MS MABLE CHAN: In any initiatives in improving or making the management system more robust, we would be ready and prepared to look into that.

MR DUNCAN: Do you think that would be a way of possibly improving matters?

MS MABLE CHAN: We will be ready to look into that as a possible way to improve the traffic management system in the bus operators.

MR DUNCAN: If I could refer you, please, to page 782 of the submission of the Community for Road Safety.

There are a number of suggestions there, under the heading of "Bus safety -- driving standard". They are under the heading "Recommendations".

Did any of those suggestions of the Community for Road Safety lead to any consideration of those sorts of matters by the department?

MS MABLE CHAN: I will ask my colleague to read them in a minute and then to give a response.

MR TONY YAU: Yes, Chairman. We receive the Community for Road Safety -- we occasionally receive their suggestions to introduce some lower speed limits to different areas.

I think I need to refer to our existing speed limit

structure in Hong Kong. In Hong Kong we implement a quite simple three-tier speed limit structures. We have a low-band, medium-band and high-band speed limit. For low-band, we are talking about 50 kilometres per hour; that will be adopted for urban or new town built-up areas. Then we have the middle band, it's 70 or 80 kilometres per hour; it's for areas or for some trunk roads outside the urban and new town areas. And the last one is the high band. High band is 100 kilometres per hour. It's usually for the high-standard expressway.

In Hong Kong, the highest speed limit is 110 kilometres per hour, which only exists in North Lantau Highways.

We base on this speed limit structure, this three-tier structure, actually we have done a review on this speed limit structure by consultants, and the existing structure is generally in line with overseas jurisdictions, with proven safety records. These three tiers are simple for the motorists to be familiar with the speed limit. We are talking about the speed limit, it's not the motorist, you need to follow, or you forget the traffic condition, just simply follow the speed limit. The speed limit is the legislative requirement that you cannot exceed the speed limit at any time, and

the motorists have to have the duty to make reference to the traffic condition, their vehicle condition --

CHAIRMAN: The speed limit's not compulsory. If it's 50 k, you don't have to drive at 50 k; that's your point, isn't it?

MR TONY YAU: Yes. So for a particular point, say a bend or some road with a hazard or need to slow down, we will not simply just lower this bend or short section of road to a lower speed limit. Instead, we provide sufficient advance warning signs, road markings, to inform the motorist ahead that there may be a hazard in front of you and you have to slow down.

So that with all the information provided to the motorist, the motorist has a duty to choose a safe speed for travelling.

MS MABLE CHAN: Chairman, may I supplement that the statements made by Mr Yau were actually stated in our paper 10 in TD bundle, paragraphs 12 to 17. There is a section on the designation of speed limits on roads and also our structure on a regular review of the speed limit.

Thank you, Chairman.

CHAIRMAN: Yes, I remember reading that. You made the same point: the speed limit isn't mandatory. It's not exceeding it that's mandatory.

MS MABLE CHAN: Yes.

MR DUNCAN: The part of page 782 that I was particularly interested in was the commencement of the recommendation, not so much the speed matters.

The commencement reads as follows:

"Incorporate into franchise requirement the need to set up a comprehensive standard and driver monitoring system using the installed black boxes."

Is that something which caused consideration within the department? Given that black box technology of course has moved on considerably since 2003.

MS MABLE CHAN: The black box and the related updated technology and devices is one of the subjects we discussed this morning, and there is a basic minimum requirement on the black boxes issued to the franchisees. Over the years our vehicle licensing team have taken stock of the possible advancements in black boxes and have been exploring on an ongoing basis with the franchisees and also the bus manufacturers, to see how the black box installation can be upgraded and deployed for better safety measure.

This is one of the issues that is keen in our heart and it is actually included in our scope of work under the working group under discussion currently, at the moment.

CHAIRMAN: But that hasn't resulted in any revision of the basic minimum requirement, which has its origins in 2004.

MS MABLE CHAN: Yet to be reflected, yes, Chairman, you are right.

CHAIRMAN: And it doesn't incorporate GPS, does it? It simply requires that speed be measured.

MS MABLE CHAN: The basic specifications do not reflect that.

MR DUNCAN: If we can move to page 783, please, and the Community for Road Safety's suggestion with regard to bus safety and bus fleets, and the observation which was made by that organisation was:

"KMB has been investing in new modern buses. It is well agreeable that these buses are comfortable and well designed. However, attention is still required for safety risks including ..."

And then a number of safety risks are set out.

As matters stood at the time of this consultation in 2016, would the department have agreed with this observation of the Community for Road Safety, that attention was still required for those risks which have been set out?

MS MABLE CHAN: I would say yes, because this is actually an ongoing process, as reflected and included in our

requirements for the bus companies to include in the forward planning programmes. There are a number of improvement measures that we have discussed with the operators and suggest them to retrofit and to include in their forward planning programmes a retrofitting programme. Past examples include installation of double handrailing along the staircases, horizontal guard bar on the upper deck windscreen, and also strengthened glass on the upper deck windscreen as well.

We note the suggestions by the Community for Road Safety. In fact, it is an ongoing close partner with us, the Road Safety and Standards Unit, and we actually take note of the various suggestions and this is on the agenda when we discuss with the bus operators to explore ways to further enhance bus safety within the vehicle.

Thank you.

MR DUNCAN: Sorry, when you say it's on the agenda, it's on the agenda currently or has been on the agenda?

MS MABLE CHAN: It has been on the agenda, yes.

MR DUNCAN: So if these matters which the Community has suggested should be incorporated into the franchise agreements, if they exist they would be found in the forward planning programmes?

MS MABLE CHAN: Yes.

MR DUNCAN: That's where we would look for those?

MS MABLE CHAN: Yes. You can look for those in past forward planning programmes, or we have also issued a requirement to sum up the safety and enhancement initiatives and requirements, and we got the confirmation letter from the bus companies to install, retrofit the related service or safety enhancement measures in the past.

So as and when our discussion with them is mature and those are technically feasible for application, we will issue updated service enhancement list for them to confirm for retrofitting or for installation, and we also will include those in our requirement in the letter towards the bus operators, so that they will include a retrofitting programme in their upcoming forward planning programmes.

MR DUNCAN: We can leave that document, thank you.

CHAIRMAN: Before we move on, could you help me at least with who are the members of the Community for Road Safety?

MS MABLE CHAN: Tony has the information.

MR TONY YAU: Mr Julian Kwong.

CHAIRMAN: One member?

MR TONY YAU: I know he has his friends. Maybe -- to my information, it's only a few members, and the founder is Mr Julian Kwong.

CHAIRMAN: And how long has the organisation been in existence, as far as you are aware?

MR TONY YAU: Maybe less than ten years but I'm not sure.

CHAIRMAN: Has LegCo received papers over a period of time from the Community for Road Safety, a number of years?

MR TONY YAU: Did you mean LegCo?

CHAIRMAN: Yes, the LegCo Transport Panel.

MR TONY YAU: Yes.

CHAIRMAN: Over what period of time?

MR TONY YAU: To my memory, it's only in these few years when we had some topic that was related to road safety would be discussed in the Transport Panel, and Community for Road Safety would submit the document.

CHAIRMAN: Yes. I have been doing my own research and I'm trying to get some time parameters of when these papers first appeared.

MS MABLE CHAN: Past few years, past couple of years, I think, in LegCo.

The chairman's question is for how many years has this Community for Road Safety put in papers for LegCo; right?

CHAIRMAN: Yes.

MS MABLE CHAN: This is the question.

MR TONY YAU: I have no information. Not sure.

MS MABLE CHAN: Do you need us to do some --

CHAIRMAN: Perhaps if you could come back to us with something in writing as to that.

MS MABLE CHAN: Okay, sure. No problem.

CHAIRMAN: Thank you very much.

MR DUNCAN: Just on that, Ms Chan, what reputation does this organisation enjoy; are you able to say?

MS MABLE CHAN: I cannot comment on this.

MR DUNCAN: As far as the department is concerned, does the department respect the views of this organisation?

MS MABLE CHAN: We do not have any comment on the reputation or the standing of this Community, but being a stakeholder, which will submit deputation and submission to LegCo, we will take into account all the submissions, including the submission from this Community. Thank you.

CHAIRMAN: At least you could say perhaps this, that it does appear to present reasonably well thought-out -- whether or not you agree with them -- suggestions?

MS MABLE CHAN: They show interest in the road safety and make a number of recommendations on various occasions.

CHAIRMAN: And appears to be informed? Whether or not you agree with the recommendations, they are based on an informed understanding, it appears?

MS MABLE CHAN: I have no particular comment on that.

CHAIRMAN: Just a smile, nothing else; is that it?

MS MABLE CHAN: Any deputation or submission submitted by groups or bodies in the deputation meetings, we will take into and account and read over that.

Thank you, Chairman.

CHAIRMAN: Mr Duncan, you were moving on.

MR DUNCAN: Thank you, Mr Chairman.

The committee has been informed, as you know, of these new initiatives, if I could call them that, or the latest initiatives, which have been prompted by the Sham Shui Po accident in September 2017, with the revision of the guidelines, and the further proposals following on from the accident in Tai Po in February of this year, with the added information you're getting from the bus companies and the working group, and so on.

So we understand that in recent times, new matters are being considered by the department.

Apart from those recent initiatives, would it be fair to say that since, say, 2012, up until the time of the Sham Shui Po tragedy, there were really no significant changes at all in the way in which the department addressed matters of safety; it was the same system throughout that period? Is that a fair observation?

MS MABLE CHAN: Let me get my papers.

In terms of the overall road traffic safety

management and monitoring, I wish to reiterate that we have an established system to take stock of the data from the accident database, analyse them, and take preventive or corrective or remedial actions.

I would like to quote a few examples arising from the discussion and analysis of that independent analysis of accident data and for reporting to the Road Safety Council.

A number of legislative amendments have been actually made over the years arising from discussion in the Road Safety Council, after monitoring and analysing the accident statistics. The recent one is being in June 2015, regarding the provision of the attendance of pre-service course for the issue of a full driving licence of public light bus, and in 2004, December --

CHAIRMAN: Sorry, what is a pre-service course?

MS MABLE CHAN: Pre-service course for the issue of a full driving licence of public light bus drivers.

CHAIRMAN: Yes.

MS MABLE CHAN: And in 2014 --

CHAIRMAN: I still don't understand. What is a pre-service course?

MS MABLE CHAN: Pre-service course is the requirement for them to attend a pre-service course after -- the public light bus driver is required to, after going through the

driving test, they should have to attend a pre-service course before we would issue a full driving licence for the driver.

CHAIRMAN: So before he is let loose on the roads he has to attend this course?

MS MABLE CHAN: Yes.

CHAIRMAN: Thank you.

MR DUNCAN: Sorry, I may not have made my question clear, because I don't want to get involved with public light buses, unless it's relevant to these proceedings.

MS MABLE CHAN: Okay.

MR DUNCAN: What I'm really trying to get at is whether, if you compare the system as it was, system for safety as far as the department is concerned, safety in public buses, the system was more or less the same, from, say, 2012 right down to 2017. There are no significant changes during that period to the system. Is that fair?

MS MABLE CHAN: The system is established, but under the system we have an ongoing and robust monitoring and regulatory framework to monitor and regulate the franchised bus operation, and under that system we have time and again analysed the bus safety performance of individual bus operators, and then we would issue requirements for the bus operators to enhance the safety measures.

So this underpins the robustness of the system on an ongoing basis. The system is there, and we are exercising the control and monitoring under their system.

The other system that I want to mention is about the overall road safety traffic management system. It is also an established system under which there will be monitoring and follow-up actions. Some of the follow-up actions may lead to legislative amendment exercise to tackle the relevant issues as revealed from those accidents.

CHAIRMAN: The first of the examples you gave about actions taken was June 2015.

MS MABLE CHAN: Yes.

CHAIRMAN: You wanted to mention some others?

MS MABLE CHAN: There are a couple of other legislative amendments in 2014. One is requiring the public light bus to install approved electronic data recording device. The other one is to require --

CHAIRMAN: Recording what kind of data?

MS MABLE CHAN: Public light bus.

CHAIRMAN: To record what data?

MS MABLE CHAN: Electronic data recording device, like black box.

CHAIRMAN: Do you have -- first of all, was that direction

given in writing?

MS MABLE CHAN: This is a legislative amendment.

CHAIRMAN: I see. Can you give us then the legislative reference? Where do we find this?

MS MABLE CHAN: We will try to locate it under the Road Traffic Ordinance.

CHAIRMAN: In due course --

MS MABLE CHAN: In the THB bundle, there should be the Road Traffic Ordinance. Let us try to locate it.

CHAIRMAN: If one of your colleagues locates it at some later stage, you can come back and tell us about it.

So that's black boxes for PLBs, 2014. Yes?

MS MABLE CHAN: And also the attendance of the pre-service course for the issue of the full driving licence, it is also a legislative amendment exercise. We will try to locate it as well.

In 2003, we also introduce breath analysing for drink-driving.

CHAIRMAN: For all drivers of all vehicles?

MS MABLE CHAN: Yes.

So there is a long list dating until 2010, based on cursory research, but I don't want to bother the committee with all the details.

CHAIRMAN: We want to give you an opportunity to say what you want to say.

Yes, Mr Duncan.

MR DUNCAN: So can I put it this way: restricting it to public buses --

CHAIRMAN: Franchised buses?

MR DUNCAN: Public franchised buses, just looking at those, do I understand from what you have said that essentially, between 2012 and 2017, the same robust, in your words, system, regulatory and monetary, was utilised during that period?

MS MABLE CHAN: Yes, I would say so, not to mention during the 2012 to 2017 period, apart from legislative amendment exercise, there are also measures to improve the road design and also the road markings. After we have conducted black spot investigation and analysis of the accident data, then we will take appropriate either preventive or remedial actions in terms of road safety enhancement.

MR DUNCAN: Now, could I ask this. At any time up until the time of the Sham Shui Po accident, had you engaged in consultation with any of your overseas counterparts as to what sort of safety management systems they required of their public bus operators?

MS MABLE CHAN: Based on the colleagues' recollection, there is not any specific discussions with the overseas bus regulators in this regard.

MR DUNCAN: What about since these two tragedies in September last year and February this year? Has the department made contact with any of its counterparts to see what provisions they have with regard to safety?

MS MABLE CHAN: I did not recall we have particularly contacted the overseas regulators or bus regulators, but in the context of the working hour guidelines we have actually done the research into overseas experience and requirements. Examples include Singapore, the United Kingdom, United States, Australia, and EU countries.

The working hour guidelines, the important factors that we have taken into account is how the local operators operate and also the request from the staff unions for improvement. But we also did research into the overseas experience and requirements, in order to assess our comparability with overseas standards as well.

MR DUNCAN: When was that done?

MS MABLE CHAN: September 2017 to March 2018, in that review of the working hour guidelines leading to the current revised version.

MR DUNCAN: So it was just restricted to the working hours issue?

MS MABLE CHAN: Yes.

MR DUNCAN: You realise that the Community for Road Safety

has made submissions to the committee. Have you read those submissions?

MS MABLE CHAN: You mean the Community for Road Traffic -- sorry, I beg your pardon?

MR DUNCAN: The Community for Road Safety.

CHAIRMAN: Perhaps we could bring them up.

MR DUNCAN: Yes.

CHAIRMAN: Where do we find that?

MR DUNCAN: TU-25.

MS MABLE CHAN: Yes, I have read that.

MR DUNCAN: I'm going to take you through a few of the points that they made, and I'm bearing in mind the chairman's remarks that they are just one view, and everybody is entitled to a view. The question will be of course as to what your view of these is and what the committee may think are practical and worthwhile considering, having heard perhaps from the Community itself and having heard your response to it.

But can I ask this general question of you: having read this paper, have any of the ideas in this paper occurred to you as good ideas that the Transport Department might take into consideration, serious consideration?

MS MABLE CHAN: I have read this submission when we received it in the bundle provided to us. The purpose of my

reading is to take note of that for preparation of the IRC's proceedings. It does not amount to a serious and detailed examination of the proposals as spelled out in this submission that will bring us to a level of giving very considered and conscious response.

In a very general remark, any suggestions made by bodies such as the Community for Road Safety, especially this has been a body which has been providing views in the past, we will also take note of that and I expect our colleagues will also take note of that in their upcoming discussions and deliberations with the various bus companies and manufacturers in our working group.

I would like to just say that for the purpose of the IRC proceedings, I have read that, but I think that does not give us sufficient time and opportunity for us to go through it one by one and to give very detailed and informed remarks and response on the individual recommendations.

MR DUNCAN: I understand. Notwithstanding that, what I'm going to do is take you through perhaps just a summary of the paper, and invite you to make any preliminary comments you may wish to make, and if you feel, because you haven't had time consider this properly, you will have the opportunity of making further written submissions on the matters.

Does that sound in order for you?

MS MABLE CHAN: I would be inclined not to give any response at this stage in response to the recommendations.

What I can respond to the committee is that we will also treat this submission to the IRC as a note and a list of recommendations so that we can take it back and look into, but I think we may not be in a position to provide further written submission, further to today's meeting, at this juncture.

We treat the recommendations and suggestions very seriously, and we have to go through the due process within the department to look into the technical feasibility and applicability of each and every one.

In general terms, any recommendations that may help, we will take an open-minded approach to looking into that, but it may not be fair for us to rush to any preliminary observations in regard to those recommendations for the IRC's purpose.

MR DUNCAN: I don't wish to be unfair to you, so would you prefer to be given the opportunity of responding to these suggestions in writing?

CHAIRMAN: I think the Commissioner for Transport has answered in the negative to that.

MR DUNCAN: She would not?

CHAIRMAN: No.

MR DUNCAN: I think first of all you are saying you don't wish to be asked questions about this today; is that correct?

MS MABLE CHAN: Let me try to restructure, in a way, my response.

We take note of this submission from the Community for Road Safety for the IRC, and I read this in preparation for the deliberations. We would not wish to provide our written submission for the IRC on our analysis and the observations on the applicability of the recommendations within such period of time, because we have to go through the due process.

On the other hand, I wish to assure the IRC that while we also see this submission to the IRC, we will treat this as suggestions and recommendations for the department to take it back and look seriously into in our system, and in particular in the working group on the enhancements of bus safety, and I can assure that we can go a step further in discussing with the Community for Road Safety, to hear further views from them in that context.

MR DUNCAN: Let me understand this properly. First of all, you don't wish to answer questions today relating to the proposals of the Community for Road Safety; is that correct?

MS MABLE CHAN: I can try to answer but my answer should not be regarded as the department's considered view as to the applicability of the individual devices, because we haven't prepared in that regard.

MR DUNCAN: Okay.

MS MABLE CHAN: But I'm sure, to help the IRC and give our preliminary view, on a preliminary basis, if that can help the IRC.

CHAIRMAN: Mr Duncan, let's proceed on that basis.

And you, Ms Chan, indicate if you feel unable to respond.

Mr Duncan.

MR DUNCAN: And you don't wish to advance any written submissions, as Mr Chairman observed a few moments ago. You are saying that rather than supply written submissions to the committee, you will take these away and give them consideration; is that your position?

MS MABLE CHAN: That's correct.

CHAIRMAN: And go through due process?

MS MABLE CHAN: Yes, that is correct.

MR DUNCAN: Let me then take you to the points which occurred to me as perhaps being worthy of some consideration.

MS MABLE CHAN: Sure.

MR DUNCAN: First of all, in the summary at page 27, the

fifth paragraph down, there's the observation that:

"The safety risks of buses are diversified in terms of scenarios and severity. Scenarios of particular concerns include ..."

And there are a number set out:

"-- Passenger losing balance: most frequent.

-- Collision with pedestrians (cyclists): common and potentially severe.

-- Rear-front collision: common and potentially severe.

-- Head-on collision: less frequent but potentially severe.

-- Collision with roadside objects: common and potentially severe.

-- Rollover: sporadic but potentially catastrophic."

Would you agree that that's a fair scenario of particular concerns?

MS MABLE CHAN: I would say that it is a fair description of some of the scenarios of particular concern. In fact some of the aspects mentioned were also flagged up in our independent accident data analysis and also in our monitoring of the franchised bus operators' analysis of the accident data in the forward planning programmes.

MR DUNCAN: And they are not inconsistent with those observations?

MS MABLE CHAN: These are some of the common issues of concern.

MR DUNCAN: Thank you.

Then the next paragraph:

"Over the years various measures have been introduced to improve bus safety. However, without an insight into the problems involved, further substantial improvement is unlikely and current patterns will continue."

Do you wish to respond to that?

CHAIRMAN: It may be that you can't respond to that, it being so general.

MS MABLE CHAN: Yes. The chairman is correct.

MR DUNCAN: Thank you.

We can turn the page, and let me take you straight to the recommendations:

"The 'Safe System' approach should be adopted to cover the interactions among vehicle factors, road factors, human factors and management. Active measures aim at preventing a crash and passive measures aim at limiting injury consequences. They are equally important.

In the short term, active measures based on operational protocols and deployment of monitoring systems can be quickly implemented. The risk of severe

rollover at some locations without safety barrier, [for example] Peak Road, Repulse [Bay] Road, Tai Tam Road, is very high and interim measures must be implemented swiftly.

In the medium to long term, passive measures aiming at limiting the consequences of crashes are very important. These measures fall into two primary groups, namely bus design and road design."

I appreciate that's a very general comment as well, but the issue with regard to safety barriers in respect of some locations and examples there, is that an issue that you consider is worthy of attention?

MS MABLE CHAN: Incidentally, because the road safety, in particular roadside safety on Hong Kong Island with bends and curvatures has been a longstanding issue of concern. In the past, we will look into the particular circumstances of the spot and also the relevant road section, then we will review whether there is a common factor in order to take remedial or preventive measures.

In parallel, it just happened -- I just reported to the committee -- that the Transport Department and Highways Department have commissioned a consultancy study on review of potential roadside safety hazards in Hong Kong road network to investigate and identify roadside safety hazards in a more proactive manner, in

a thorough and systemic safe-track approach, taking into account overseas technology. The study will actually commence in mid-May for completion in 30 months.

MR DUNCAN: When you say it has issued a study, is there a document which --

MS MABLE CHAN: Yes, there is a consultancy brief.

MR DUNCAN: Can that be provided to the committee?

MS MABLE CHAN: Yes.

MR DUNCAN: Thank you. Will that address things such as the safety barriers on these narrow, hilly roads?

MS MABLE CHAN: Without divulging any commercial information, my colleague reminds me that this Community for Road Safety is one of the sub-consultants, for the consultant to conduct the study.

MR DUNCAN: I think the committee would be content with some sort of brief as to what exactly is involved in the study.

MS MABLE CHAN: Yes, we can provide that information, on the scope and also the coverage and objective of that study.

CHAIRMAN: Thank you.

MR DUNCAN: Then we have the heading, "Operational protocols and monitoring systems", and at the top of page 29, two particular types of protocols are suggested. First of all:

"-- General protocols -- addressing typical

scenarios including speeds on busy urban streets.

-- Route-specific protocols -- addressing specific safety risks such as sections of narrow hillside road lacking a safety barrier."

Do these sorts of protocols exist at present?

MS MABLE CHAN: I'm not aware of that. But --

MR DUNCAN: How does that strike you? Does that strike you as a good idea or are you unable to --

MS MABLE CHAN: I think the Community has come up with some suggestion on how to address various scenarios in a more systematic way. The route-specific protocols address the sections of narrow hillside road lacking safety barrier, and I think the study that I mentioned just now is very important in mapping out the relevant road sections involving hillsides and curves and to devise relevant safety measures, and that will form a basis for us to consider as a step forward whether there should be any measures or protocols in that sense to address specific safety risk scenarios.

I think this is the preliminary observation that I can make on the spot.

MR DUNCAN: Thank you.

We then see the ISO standard creeping in again. I won't ask any further questions about that.

Then the issue of bus design, and a number of safety

features "are recommended as a priority".

Are these matters which commend themselves to the department?

MS MABLE CHAN: Perhaps I can invite Mr Chan to comment on this. I have some knowledge about a few of them but perhaps he can give a more systematic and comprehensive response, in a simple way.

CHAIRMAN: Certainly.

MR YK CHAN: I will try to make it simple.

For the "safer bus front", actually all the double-decker buses currently operating in Hong Kong are in compliance with the European requirements, as I mentioned earlier.

CHAIRMAN: Because 99 per cent of them come from Europe.

MR YK CHAN: Yes, that's the magic figure, and confirm the body structures on the franchised buses used in Hong Kong are the same as those apply to other countries, such as the United Kingdom, USA and Singapore.

The major double-decker buses suppliers have also confirmed that the use of aluminium alloys on the bus body has been an international trend in recent years, and they explain that the use of the material is stronger, but nowadays all these bodies are aluminium body, and they are, as explained, the use of materials

stronger than aluminium may not be beneficial during accidents and it may cause other types of casualties.

So the buses we use nowadays, it's already up to international standard, and I would say it's safe, but in terms of the "safer bus" at the front, you will notice that in recent years we have strengthened our -- put the seat belt in front on those seats in front of the window, to prevent passengers from being thrown out.

In connection with the construction of those seats, the bus company has to actually strengthen the floor and fittings at the front of the buses in order to support those seats and the anchorage of the seat belts.

CHAIRMAN: This is if it was necessary to retrofit them --

MR YK CHAN: Yes.

CHAIRMAN: -- because the bus frame itself is not strong enough to sustain the anchor points for the seat belts?

MR YK CHAN: That's right, because those originally -- the old buses are not supposed to be fitted with that sort of safety seat belt, so they have to not only provide the seat belts in the seats but have to actually strengthen the anchorage and also the support inside the frontal part of the buses.

So, in that respect, I would say nowadays people travelling in front, with the seat belts on, are really safe.

Do you want me to go over the others as well?

CHAIRMAN: Please.

MR DUNCAN: If you can, please.

MR YK CHAN: But safety seat belts, actually this time we discuss in the technical group, they agree to fitting -- all the seats in the bus will be fitted with seat belts.

CHAIRMAN: On new buses?

MR YK CHAN: On new buses, as just mentioned, because retrofitting is not just providing a seat and a seat belt.

CHAIRMAN: No, no, we understand that point.

MR YK CHAN: "Treatments of hazards of bus interiors: including" -- that has always been -- proper design of buses should not have that sort of sharp edges that actually people bump into and get hurt. This is something that we do look into very seriously.

CHAIRMAN: I think in fact it might assist us more if you were to move to what is described as, "The following safety features should be explored": IAS and ESP.

IAS.

MR YK CHAN: Intelligence speed adaptation?

The look of the terms, I'm not sure exactly what function is going to be provided. But if you are talking about the old thing, sort of integrating the speedometer with GPS and the base, the roadmap, in order

to sort of provide an overall monitoring of the driving behaviour and the vehicle's operating status --

CHAIRMAN: That's what I understand this system to be.

MR YK CHAN: If it is the system is meant to be used for, then yes, we have been -- in the technical group we did discuss about this, and obviously at the moment the discussion is still going, because there are sort of technical and also management considerations that have to be sorted out.

CHAIRMAN: What are the technical issues?

MR YK CHAN: Today, as I mentioned earlier, in the session yesterday, the sort of merging of the function of the speed limiter and also the GPS system, to provide accurate positioning of the vehicle, and interface with the base map, and this sort of matching -- I think mainly it's because GPS is not accurate in the moment, in the operating environment of Hong Kong, but --

CHAIRMAN: What is the problem?

MR YK CHAN: Because the height of the buildings and all the surrounding area, that may, in some patches of road, in particular like if you are in Central, when both sides are covered by buildings and we only have a little bit of sky you can pick up the GPS, then --

CHAIRMAN: The GPS antenna needs to be able to pick up the satellites in the sky; that's the problem, isn't it? If

it can't see the satellite because of a building, the signal fails. Is there any research on this?

MR YK CHAN: Actually, we are discussing with the bus companies and in conjunction with the supplier of those systems, to see whether there's any sort of reliable and more functional system that can be adopted.

So I would say, at this moment, under the working group, we are not ruling out this particular application. This is still ongoing.

MS MABLE CHAN: And we ascertained that this is actually a very intelligent way of controlling speed and mapping it with the geotechnical features on the road. We are certainly alive to the benefit and advantage of this system, but in the process we have to make sure that it can work in the local context of Hong Kong.

We do not rule it out. We will try our very best to see whether it can be adopted in the medium term or in the not-too-distant future. We will put it on trial.

Actually, the electronic stability programme is an issue that they have agreed to install on new buses as an immediate measure.

The autonomous emergency braking system is another example that we will also look into.

CHAIRMAN: Thank you.

MR DUNCAN: Thank you.

If you turn to page 55, you may get a little bit more assistance with regard to the intelligent speed adaptation system and the autonomous emergency braking systems, which seem to be under active consideration at the moment by Transport for London, which is your counterpart, I think, in that city.

MS MABLE CHAN: Yes. I would just like to mention that personally, as commissioner, I haven't had an opportunity to contact the overseas counterpart or visit them, but my colleagues in the Transport Department have in the past visited London, United States as well, for different various issues under Transport Department's purview.

I would just like to emphasise that we will make use of opportunities available to make contact with them and visit them, and to go through various issues under our purview.

MR DUNCAN: Have those contacts in the past been concerned with safety matters?

MS MABLE CHAN: My deputy has conducted a visit to London.

MS MACELLA LEE: For example, I went to visit the authority of Transport for London and also Singapore, but at that time our focus was more on service rationalisation, on the service side more, and also the use of realtime bus arrival systems, and those more new technologies for

provision of passenger information, more on the service side, I'm afraid. On that occasion, it was not on bus safety.

CHAIRMAN: But you are aware that Transport for London have conducted tests on this IAS system?

MS MABLE CHAN: Yes, from the engineering side, they have kept me informed of this.

Actually, my colleague have been drafting a programme for me to visit other overseas jurisdictions. The issue is that there is not -- we have yet to plan on that basis. We have to deal with a number of competing priorities at the moment.

Thank you.

MR DUNCAN: Finally then on page 29, "Road design":

"The following improvements related to road design and traffic management are crucial for bus safety".

And there are some particular matters there. Would you be able to respond at all to those, Ms Chan?

MS MABLE CHAN: You mean paragraph 2?

MR DUNCAN: Paragraph 3 on page 29.

MS MABLE CHAN: These areas relating to road design and traffic management are actually our task and on the agenda of our regular road safety monitoring and audit, under the Road Safety Council agenda, and as part of the follow-up or as part of the preventive actions we looked

into ways to improve road design, which includes safety barriers and widening of blind bends.

The imposition of some safety barriers actually is one of the measures that we have adopted to improve the Tai Po Road section as well.

The safe crossing facilities or conditions around bus stops is actually an ongoing task for us to provide on a district basis. We conduct regular district visits and meetings with district councillors and we will take the opportunity of new developments and redevelopments on the district. Should there be any provisions of bus stops, bus lay-by, then we will look into the need to provide suitable pedestrian crossing to enhance the safety of pedestrians.

MR DUNCAN: You mentioned an audit under the Road Safety Council agenda. What is that?

MS MABLE CHAN: By means of audit, I'm referring to our established system of the road safety monitoring and analysis, with a quarterly report to the Road Safety Council.

MR DUNCAN: That's the one that I asked you about this morning?

MS MABLE CHAN: Yes. I should not use the word "audit". I have to be careful with this word. So the road safety monitoring system relating to the Road Safety Council.

MR DUNCAN: Ms Chan, that brings me to the end of the questions that I was going to ask and the matters that I wish to explore.

The committee may have some further questions for you. I would like to thank you and your colleagues for assisting the commission.

MS MABLE CHAN: Thank you very much, senior counsel, for assisting me and my team to answer the questions. Thank you.

Questioning by THE COMMITTEE

MEMBER LO: I just have some clarification questions on the statistics provided by your bundle last night on the accident statistics.

If you flip to page 91, I think it's KMB or Citybus. KMB, I think.

CHAIRMAN: Mr Duncan, has this been given pagination now, overall pagination? I think Prof Lo is working from internal pagination.

MR DUNCAN: Yes, it has now.

CHAIRMAN: Where do we find it?

MR DUNCAN: TD-1.

MEMBER LO: Yes, starting at page 182.

MR DUNCAN: 176 onwards.

CHAIRMAN: They are yet to find their way into our bundle.

MS MABLE CHAN: It should be the forward planning

programme -- the safety chapter in the forward planning programme of KMB.

MEMBER LO: Yes. The numbers are categorised, for example, at the bottom of page 91, by "Hours on duty before accident". The table seems to indicate that those working over ten hours have a lower involvement rate in accidents, because it's the lowest bar. But I think, to be fair, we have to divide or normalise by the population in that bar. If there were very few drivers driving over ten hours, of course the accident rate would be lower. So this way of presenting information could be made clearer, so we can understand the causes of that.

The same for also bus captain service period, the figure above. The table indicates that the year zero to one year has the highest accident rate. Maybe there are simply more drivers belonging to that category.

To be fair for the analysis and also to expose the issues underlying the figures, would it be possible to regenerate this graph and to normalise it, so that we know exactly the risk exposure, instead of simply categorising it. I know the data is from KMB. I'm not sure if this thing can be done by TD or we can ask KMB to redo it.

CHAIRMAN: If it's a KMB document, perhaps it lies for KMB

to address whether or not it's appropriate to rectify it, if that's necessary.

MS MABLE CHAN: I agree with the chairman.

MEMBER LO: Okay. So I raise with KMB? Okay.

The question I have is would TD actually write out the specification for future reports, so as to report accordingly, not using this particular format?

MS MABLE CHAN: Yes. It is an ongoing requirement, and I take your point. Although we are -- sort of this analysis is done by the bus company, your point is -- we will take that back and then look into how the accident rate analysis can be more accurate and concise in reflecting the picture. We will consider that.

Thank you.

MEMBER AUYEUNG: Thank you, Chairman. I have one request or maybe question. This refers back to the report that Mr Duncan referred to earlier, named Community for Road Safety.

On page 29, talking about road design, as we all know, we have many new buses coming in which are of much larger size than before, and when I look at the road design, and you did mention, Ms Chan, that the government has widened some roads before, in view of all these new vehicles coming -- can you give us some examples in writing later on, just to show that we

actually -- your department has actually widened some roads in consideration of all the new buses coming in which are as large as 12.8 metres long?

MS MABLE CHAN: The widening of some roads is not particularly to cater for the new buses with that extended length. But we can go back and ascertain -- try to locate whether there are some examples, like the cul de sac, which we have to make sure -- I have to sort of explain. The cul de sac is --

CHAIRMAN: The turning circle.

MS MABLE CHAN: -- yes, the turning circle for buses or other vehicles to turn around, and how we have to ensure the design, the width and the turning curve on the cul de sac can accommodate buses of, say, 12.8 metres, for those bus stops nearby or in the vicinity, especially in those new residential developments, where we have the cul de sac for buses and other vehicles to turn around before going out to the main road.

I will see if we can give some example to illustrate that, in order to answer the question.

MEMBER AUYEUNG: Also, if possible please cover the New Territories area, because, as we understand, New Territories have a different set of design of roads, so I would like to know how are we accomplishing accommodating those buses.

Thank you very much.

Thank you, Chairman.

MS MABLE CHAN: That is doable. Thank you.

CHAIRMAN: There are one or two matters I would like to take up with you.

Since you've got the KMB paper that you provided us with, the forward planning paper -- I think that's still in front of you -- at KMB internal pagination 96, "Bus captain training and monitoring". Of course, this is a KMB paper, but presumably the Transport Department understand what they are talking about when they give it to you.

Can you help us -- it's the last two lines on the page -- what are "Realtime driving indicators are installed in all buses which can help bus captains to utilise the driving skills learnt in the eco-safe driving training course"? What are these realtime indicators?

MS MABLE CHAN: In our discussions with the KMB and also at the KMB board meetings, on some occasions they will update us on the monitoring device to assist or enhance the driving behaviour of the bus captains, because at some point they also identify the driver behaviour factor, including the incidence of harsh braking, and there is some realtime -- as I understand, these

realtime driving indicators will first help to identify those bus captains with this high incidence on a particular route, then they will sort of install this kind of indicator in the bus, so as to -- as a reminder for the bus captains to utilise the driving skills in order to remind them of the necessary skills along a particular route.

Perhaps the KMB will be in a better position to elaborate how it functions and how it serves the purpose of improving the drivers' behaviour, in those circumstances.

CHAIRMAN: The use of the word "indicator" doesn't suggest a flashing light or a device; it is an analysis done on a tachograph to see heavy retardation or heavy acceleration?

MS MABLE CHAN: Yes.

CHAIRMAN: Thank you.

At KMB again, page 98, paragraph 8.4.2, the statement is made that in terms of assignments to new bus captains, they are given, it states, "easy routes". Are you aware of any designation of routes by KMB as being easy, difficult; any other system?

MS MABLE CHAN: There are some description of routes which are complicated, complicated routes, so other not designated as complicated routes should be considered as

easy routes.

More often, they refer to complicated routes.

CHAIRMAN: So this is their system of determining the difficulty or otherwise of a particular road or route?

MS MABLE CHAN: Yes, because the complicated routes, as I understand, may cover areas with more turns and bends, or there are more stops along the routes, with more passengers boarding or alighting, so it will not be straightforward driving and short route. Some of the routes involve more stops and cover a lot of various districts and there may be some routes covering some common or black spot accident areas.

CHAIRMAN: Thank you.

Page 99, paragraph 8.5.7. That's the internal pagination.

The references there to there having been a survey of "44 buses installed with 3-point seat belts on all seats by the end of April 2017. Survey will be conducted to assess the utilisation rate of seat belt on buses which are installed with [those kinds of seat belt]."

Are you aware of the results of such a survey?

MS MABLE CHAN: We are aware that this is an initiative done by the KMB themselves and they would like to conduct a survey to ascertain the utilisation rate. But we are

not aware of the findings of the survey yet.

CHAIRMAN: Would you expect to be told the results?

MS MABLE CHAN: Yes, because this is actually raised in the board meetings as well, and we would expect the company to report on the utilisation rate of seat belts. If they do not report, we will certainly raise.

CHAIRMAN: Very well.

One final matter. In the TD-1, it's your paper 8 where you look at technology, and one of the items at page 102, paragraph 21, is a speed display unit.

What is said about that is that it is technically feasible to install it. That's paragraph 22:

"The ... manufacturers have advised that it is technically feasible ..."

Then there are the comments made in the latter part of paragraph 22:

"... the FB operators are concerned that [the speed display unit] would create conflicts and arguments between the bus captain and passengers, and impose additional pressure on the bus captains which in turn would affect the safety for bus driving. The FB operators consider that the SDU is not conducive in enhancing bus safety."

Am I correct in understanding that this kind of units, speed display units, are used and have been used

on PLBs for some time?

MS MABLE CHAN: Yes.

CHAIRMAN: Can you help us as to when they were installed on PLB?

MS MABLE CHAN: A few years. We will try to be more specific.

CHAIRMAN: Yes.

MS MABLE CHAN: A few years. This device was installed in public light buses in the light of the concerns about speeding in public light buses. This issue was actually also discussed in the Transport Advisory Committee, and we include this as an agenda item in the scope of work to be discussed with the bus manufacturers and bus companies, to ask them to seriously consider the feasibility and applicability of installing the speed display unit.

The statements that we make here in paragraph 22 reflect the current status of discussion.

CHAIRMAN: I appreciate that, because at the moment the discussion is confined to a tripartite group, is it not?

MS MABLE CHAN: Yes.

CHAIRMAN: Namely the franchised bus operators, yourself, and the bus manufacturers, when required to be brought in technically.

MS MABLE CHAN: Yes. We are also aware from the feedback

from the bus operators that the bus captains may consider this device may impose additional pressure on them. So this is a sensitive area that we will have to seriously consider and we may as well have to explore it with the bus captain associations to tap their sentiments on it before we can take it further.

CHAIRMAN: Will you be doing that?

MS MABLE CHAN: We will be doing that.

CHAIRMAN: Will you also be consulting the public as to whether or not this is something they think is a good idea, as being passengers whose safety is in the hands of a bus captain?

MS MABLE CHAN: We will surely need to take into account any public views on that. We haven't thought of any particular way to do that, but a possible and usual way is to sort of first discuss with the staff unions and also the bus captains to get their reaction, and then we may have to see whether we can get further views or feedback from the Legislative Council Panel on Transport, which may serve as a forum to flesh out the proposals to be taken forward in enhancing bus safety.

CHAIRMAN: How was it that the Transport Department came to learn that the public were concerned about speeding in PLBs? How was the public opinion learnt in that case?

MS MABLE CHAN: It is not just a public concern but it is

also the accident rates involving public light bus. One of the contributing factors is also speeding and driver behaviour, so the accidents of the public light bus actually over the years is relatively high. Actually I would say that the rate of involvement of public light bus is higher than the franchised bus as well. So we have taken the effort to require the installation of the speed display units inside the public light bus.

CHAIRMAN: Are you able to help -- and say so if you are not -- as to whether or not the installation of these devices on public light buses led to any conflicts and arguments between passengers and drivers? I'm paraphrasing from what the franchised bus operators have said is their concern about installation on franchised buses. Was there any increasing conflict?

MS MABLE CHAN: Following the installation of the speed display unit inside the public light bus, we are not particularly aware of any surge in public complaints on such kind of installation during their journey over the public light bus.

CHAIRMAN: I was thinking more about conflicts resulting from the fact that the information is available to the passengers that the bus is speeding. Has that resulted in conflicts, for example?

MS MABLE CHAN: Not to our knowledge that there is any

significant increase in such kind of complaints about the installation of the units in the public light bus.

Chairman, to supplement, the imposition of the speed limiter for public light bus was commenced since June 2010 as part of the licensing conditions for public light buses.

CHAIRMAN: Thank you.

In that case, that brings me to the end of the questions I have for you. May we thank you and your colleagues for all the assistance you have given us, and we look forward to receiving the material that you said you would endeavour to provide to us in writing in due course.

Thank you very much.

MS MABLE CHAN: Thank you very much. Thank you again, Chairman, for your guidance during the deliberations, and the senior counsel as well. Thank you.

CHAIRMAN: In those circumstances, these proceedings will be adjourned. For general information, these are the first of the oral hearings, to which we intend to invite others to attend in due course. When we make those invitations, if they are accepted, then information will be displayed on our website as to when those hearings are to take place.

Thank you very much.

(4.27 pm)

(The hearing adjourned to a date to be fixed)

Questioning by THE COMMITTEE 150

[blank page]

2018 年 5 月 8 日

上午 10 時正恢復聆訊

出席人士如前。

主席：（經傳譯員）各位，早晨。陳女士，請你哋係上前就座。琴晚運輸署向我哋提交咗一啲資料，呢個就係關於各間巴士公司提供畀運輸署關乎巴士安全嘅遠期計劃。如果你就呢啲文件係有乜嘢想發言嘅話，你可以而家做，否則嘅話，我會請鄧樂勤大律師係繼續提問嘅。

陳美寶女士：（經傳譯員）多謝你，主席，或者我咁喇，我講幾句喇，就此。

主席：（經傳譯員）係，請你開始。

陳美寶女士：（經傳譯員）實質上，我感謝主席係提出呢一點，讓我哋有機會就同巴士公司琴晚係傾過，我亦都當然好明白呢一個係嚟自秘書處，就係話希望可以睇晒所有嘅遠期計劃，但係鑑於佢裏面係有一啲商業嘅資料，所以我哋最初嘅時候就話唔能夠發放。但係我哋睇番嗰個重要嘅章節，就係巴士安全，裏面就係冇任何商業價值牽涉在內嘅，我哋就係藉呢個機會同巴士營運商就係琴晚討論過，而最後就係提供咗資料畀秘書處嘅。

我就想先講幾句嘅，講到呢個遠期計劃，佢係呢個法定要求嘅一個部分，即係話巴士營運商係需要提交畀政府當局，係讓運輸署可以同巴士營運商談判嘅。其實呢個喺我哋嚟講，就係我哋監察同埋監管巴士營運商兩個方面嘅其中一個部分。巴士營運商，我哋對佢有咁嘅期望，佢哋要有呢個遠期計劃，裏面係要有路線發展計劃同埋其他營運方面嘅資料，係讓運輸署知悉，呢一個係每年嘅 6 月尾係需要交到畀我哋。

自從 2003 年開始，運輸署已經係要求巴士營運商有一個專章就係講及巴士安全。自此之後，呢個章節一直都係遠期計劃嘅一個部分，亦都作為運輸署一個計劃或者規畫嘅工具，嚟到同佢哋商討同埋監察每一間巴士公司佢哋嗰個意外率，佢哋當然自己亦都會分析。巴士營運商係應該提議一啲改善嘅措施，我哋都期望佢哋係將有關建議落實嘅時間表，即係各項措施嘅時間表，亦都係包括在內。

除咗呢個遠期計劃嘅程序，我哋每年亦都進行呢個評估，每年嘅年尾之前都會做呢個評估嘅。呢啲嘅工作做嘅時候，我哋會睇九個指標，其中兩個就係同巴士嘅安全有關。我喺回答大律師昨日嘅問題嘅時候，我哋亦都係講咗我哋自己本身有一個獨立嘅數據庫，講及全港嘅意外嘅數字，裏面亦都分析咗一啲意外嘅統計數字，係關乎每一間專營巴士公司嘅。我哋自己亦都係進行獨立嘅分析，分析有關嘅意外嘅性質、成因，以助我哋係每年評估每一間公司個表現。呢啲評估嘅工作係每年去做，係根據一啲獨立嘅數據，嚟自呢一個數據庫嘅。而我哋係遠期

Transcript by Epiq Hong Kong, Limited

計劃同埋呢個意外分析就係並行嘅，有關嘅報告亦都會交畀交通諮詢委員會參考嘅，唔該。

主席：（經傳譯員）唔該晒。鄧樂勤大律師。

MR DUNCAN：（經傳譯員）多謝你，主席。陳女士，早晨，各位先生、女士，早晨。再次感謝你哋琴晚係做咗功課交畀我哋，我而家想做嘅就係想拆析你哋昨晚交畀我哋嘅文件，然後就問你幾條問題係關乎呢個文件嘅。關於遠期計劃，特別係安全嗰個章節，我今朝稍後會有問題問你，暫時我就唔會係問嗰方面嘅問題。你哋亦都係昨晚提交咗一啲文件係涉及其他嘅事宜，咁都係源於昨日提出嘅問題，我亦都感謝你係交咗呢啲資料。

你喺你嘅意見書嗰度係提出一樣，我就想跟進嘅。或者請你就係睇番呢個第 8 段，係昨晚交上嚟嘅補充資料嘅第 8 段，呢度有提及一個工作小組，呢個工作小組就係加強專營巴士嘅安全。委員會獲悉呢一個工作小組係喺大埔公路交通意外 2 月發生咗之後成立嘅一個工作小組，而嗰個成員就係包括咗所有嘅巴士公司及其他人士。你喺呢一個陳詞嘅最後嗰度就有咁講嘅，呢一個工作小組第一次開會就係喺今年嘅 3 月 13 號，我個問題要問嘅就係話其實自此之後係總共開過幾多次會呢？

陳美寶女士：（經傳譯員）兩次。

MR DUNCAN：（經傳譯員）自此就兩次，即係總共三次？

陳美寶女士：（經傳譯員）兩次就係工作小組嘅層面，另外就係有兩個就技術小組嘅層面，咁就係講及嗰啲裝備同埋科技嘅。

MR DUNCAN：（經傳譯員）係之後有一次會議，係咪呀？

陳美寶女士：（經傳譯員）係呀，4 月 24--對唔住，係 4 月 23 號。

主席：（經傳譯員）琴日都有提過呢個日子嘅。

陳美寶女士：（經傳譯員）係，喺嗰個開場白嗰度有提過。

MR DUNCAN：（經傳譯員）講到嗰個技術會議，技術會議係邊個出席嘅呢？

陳美寶女士：（經傳譯員）或者我問一問我嘅同事，因為係關小姐就係負責嘅。

關翠蘭女士：（經傳譯員）係，早晨。主席，早晨。巴士公司同埋巴士製造商係應邀請出席會議。

MR DUNCAN：（經傳譯員）你指嗰個技術會議？

關翠蘭女士：（經傳譯員）係。

MR DUNCAN：（經傳譯員）有冇係會議紀錄？

關翠蘭女士：（經傳譯員）有。

MR DUNCAN：（經傳譯員）委員會可否得到係一份呢個會議紀錄嘅副本？

關翠蘭女士：Sure.

陳美寶女士：（經傳譯員）講到會議紀錄，因為一般嚟講，裏面係涉及一啲內部嘅討論，我哋一般嘅原則就係唔會將佢披露，因為呢啲係內部嘅討論，亦都有涉及一啲係未成熟嘅研究，亦都如果係將佢披露，可能就會妨礙大家好開放、好坦白咁樣係交談。或者我哋可以抽出其中嘅部分，又或者講及就有啲乜嘢係我哋探討緊嗰個可行性嘅。

MR DUNCAN：（經傳譯員）係，我諗委員會係特別關注嗰個技術方面嘅考量，即係話你哋呢兩個小組考慮咗啲乜嘢嘢，所以係因此，我先至話要求係得到一份會議紀錄嘅副本。

陳美寶女士：（經傳譯員）如果委員會認為係有需要攞嗰個會議紀錄嘅話，或者我哋以保密嘅形式係交出。

主席：（經傳譯員）唔係，我哋好透明嘅，我哋行事透明嘅，乜嘢都上載喺網站，我哋唔會接收任何嘅嘢係唔能夠披露畀公眾。你講到話有個技術小組嘅會議，就講喺香港可以應用啲乜嘢嘅科技，你就話巴士製造商亦都有出席會議嚟到幫手。我可唔可以假設你哋都喺佢哋嗰邊收到一啲文件呢？譬如話一啲車速限制器，你可以被動咁樣樣係截斷嗰個燃資料嘅供應，亦都可以主動形式，譬如話將嗰個傳動嘅裝置影響佢，又或者係制動架車，即係煞車咁樣樣呢？呢度當然就係關乎科技嘅進展，有冇咁嘅文件呢？

陳美寶女士：（經傳譯員）到而家為止，冇乜咁樣嘅文件。我哋可以將喺會議探討過嘅課題嘅名目係交出嚟嘅，到而家我哋未有任何嘅文件嚟到我哋嗰度。

主席：（經傳譯員）或者啲文件都太過技術性強嘅，咁即係有咩嘢係書面寫低嘅呢？其實呢啲咁嘅課題即係好明顯，一定係會有文件，我即係覺得如果你話冇，就好奇怪，會唔會你哋大家有提出過話可以考慮邊一類嘅設備去應用啲科技呢？

陳美寶女士：（經傳譯員）喺嗰兩次會議，我哋係有列出話可以加以考慮嘅設備或者科技去進行呢個研究同埋討論。我哋要求與會人士返去係考慮，然後再返嚟開會嘅，我諗就或者係讓日後便利開會，我相信日後都會有一啲分析文件係畀大家參考嘅，好，唔該。

MR DUNCAN：（經傳譯員）昨天，我亦都提過另外一件事，我冇特別要求你交任何嘅報告，不過就係你作證嘅時候提過嘅，你當時就話有一啲季報就會交畀道路安全議會，讓佢哋進行監察嘅。我而家想作出一個請求，我哋想得到係一啲樣本，即係話你交畀呢一個議會嘅季報。

陳美寶女士：（經傳譯員）係，係，我哋呢啲季報嘅樣本，係，可以。

MR DUNCAN：（經傳譯員）剛才你同主席討論嘅事宜，即係話剛才提過嗰四個嘅會議紀錄，我理解你係唔願意將佢交出，你不過就講過，就話會議紀錄嘅部分應該係冇問題嘅，可以交上嚟委員會度，係咪咁呀？

陳美寶女士：（經傳譯員）我相信我要係問一問律師，得到法律意見先至知道究竟呢個工作小組同埋技術會議嘅會議紀錄可否披露嘅。

MR DUNCAN：（經傳譯員）係，我等你去問一問先。

陳美寶女士：Yes.

MR DUNCAN：That can be arranged?

陳美寶女士：Sure.

MR DUNCAN：（經傳譯員）另外，仲有兩件事嘅，即係跟番琴日嘅兩點，然後先至去問今日要問嘅問題。我哋就問過，就係點解嗰啲指引縱使就你哋係承諾咗，喺 2012 年交通意外發生之後，承諾就話要修訂嗰個指引，點解係冇做到呢個修訂嘅工作，我哋就問你點解，你有冇做到呢方面嘅工夫呢？

陳美寶女士：（經傳譯員）對唔住，因為時間緊逼，我哋琴日未有做到嘅，我哋會儘快去做，亦都會係交番個書面嘅回覆畀你。

MR DUNCAN：（經傳譯員）好，唔該。另外仲有一件事就係全職同兼職司機，我曾經有問過部門有冇進行過分析，睇下兩類司機同埋意外之間嘅關係，問下有冇咩嘢分析，你就話你手頭上冇呢個資料。或者係咪可以係進行研究，然後再交嗰個資料畀我哋呢？你哋著手做呢一個工作未呀？

陳美寶女士：（經傳譯員）或者讓我澄清一下，根據公司多年嚟畀我哋嘅數據，特別喺嗰個遠期計劃裏面，關乎係巴士安全嘅章節，我哋就會係分析嗰個交通意外嘅性質等等，我哋就係冇資料顯示，就話兼職巴士司機就係一個造成交通意外嘅成因。換句話講，係冇由呢啲分析入面得到任何資料顯示兩者有關連嘅，即係話聘用兼職巴士司機同發生意外，呢一個係我琴日提到話冇資料去指出有咁樣關連嘅基礎。

主席：（經傳譯員）你有機會好快睇番嗰啲遠期計劃，遠期計劃係各個專營巴士公司提供嘅。你話冇關連，你經常重複呢句說話，巴士型號、巴士司機嘅年歲、工作時數。

陳美寶女士：（經傳譯員）主席，正如我講，呢啲嘅分析係由巴士公司製備。喺我哋自己獨立而分析嚟講，就再交畀道路安全議會，我哋就會分析意外係咪致命，係咪嚴重交通意外，然後我哋嘅分析亦都會嘗試找出一啲共通嘅因素，譬如話係駕駛態度，又或者係涉案嘅車輛。

MR DUNCAN：（經傳譯員）呢個係另一個分開獨立嘅報告？

陳美寶女士：（經傳譯員）係。

MR DUNCAN：（經傳譯員）你會交畀我哋個呵？

陳美寶女士：（經傳譯員）係，我哋喺交畀呢一個道路安全議會季度報告入面有嘅。

MR DUNCAN：（經傳譯員）而家講下巴士安全，喺遠期計劃入面，即係交咗畀我哋--琴晚交畀我哋嘅遠期計劃，關於巴士安全嘅內容。我睇過，有五間專營公司，九巴、龍運都係交同一種報告，然後城巴同埋新巴又係都係交同一份報告，呢個第二款。另外仲有係新大嶼山巴士公司，就係有第三種格式嘅報告。首先，我想咁樣問你，關於巴士安全方面，資料類別，要交啲乜嘢係運輸署決定，定係巴士公司決定呢？即係話喺遠期計劃入面要提供咩嘢內容。

陳美寶女士：（經傳譯員）正如我喺開場發言，今朝早提到，喺遠期計劃入面，我哋有個要求係 2003 年引入嘅，要提供關於巴士安全嘅內容。而運輸署就會睇番巴士營運者喺巴士安全，意外率方面嘅有關資料，然後我哋就會寫信畀巴士營運商，大概 4 月、5 月嘅時候，就會寫番我哋要求要啲咩嘢資料，喺嚟緊嘅遠期計劃應該包括啲乜嘢嘅。關於巴士安全，有啲時候運輸署會有特別嘅要求，要求提供某啲範圍嘅資料，即係基本上資料嘅範圍，又或者係某啲時候，我哋會要求啲地區咁樣，咁呢個係運輸署會提供建議畀巴士公司嘅。

MR DUNCAN：（經傳譯員）咁文件係邊個交第一份嘅草稿？

陳美寶女士：（經傳譯員）係鐵路部門嘅同事。

MR DUNCAN：（經傳譯員）咁有冇係有一份嘅草稿吖定或係佢哋自己寫低有啲咩嘢嘅題目需要準備呢？

陳美寶女士：（經傳譯員）呢個係雙向嘅工作嚟嘅，首先就會寫番個範圍喺唔同章節需要包括啲乜嘢，但係多年嚟，亦都有某啲題目或者係一個題目嘅清單，附隨信件嗰度，有需要係可以交畀營運商，去指導佢哋要喺報告某一章節包括咩嘢內容嘅。

MR DUNCAN：（經傳譯員）我哋留意到呢啲遠期計劃嘅安全嘅部分都有頗多統計數字，係關於意外嘅數字同埋意外成因嘅數字，你都知道，係咪？

陳美寶女士：（經傳譯員）係。

MR DUNCAN：（經傳譯員）咁亦都由巴士公司就提供一啲嘅資料，佢哋形容嗰啲叫做安全措施，同埋佢哋擬議實施嘅安全措施。我可以同你舉個例子，佢哋提議有咩嘢安全措施呢？而家就請你揭去新巴嗰一份嘅遠期計劃，呢個就係你琴晚交嚟嘅附件三嘅部分，我睇緊第 6 頁，呢個係該分文件嘅第 6 頁，應該就係文件冊而家係第 200 頁嘅。你見唔見到呢一段呀？就係 5.3 段，即係話實施咩嘢嘅措施去加強安全嘅。

陳美寶女士： Yes.

MR DUNCAN：（經傳譯員）如果你睇番啲文字嘅話，除咗係採取紀律行動之外，仲有計劃以下嘅措施，同埋計劃去減低某類型意外嘅成因或者係種類。然後就總共列咗有 十四項嘅措施，呢個係巴士公司嘅描述嚟嘅。

琴日同今朝早你都有提過，每年表現評估，即係評估巴士營運商嘅表現，你同委員會講就話安全係好重要嘅，因為如果你睇番九個指標嘅話，有兩個指標都係關乎安全。我哋亦都可以而家去睇下，應該係喺運輸署第 2 文件冊嘅 316 頁。你而家會睇到呢一頁，就係話 2016 年專營巴士營運商表現嘅一個撮要，面前見到嘛？

陳美寶女士：（點頭示意）。

MR DUNCAN：（經傳譯員）你見到有九個主要指標喇，我哋頭先講過。你提到有兩個同安全有關嘅，就係例如與安全有關嘅，喺巴士檢查中發現與安全有關嘅缺損，另外就係每百萬行車公里涉及巴士嘅意外率。運輸署喺每年進行服務表現評估嗰時有冇查核過巴士營運商佢哋提出某一件事，喺某一年佢哋打算做嘅，譬如頭先講到呢十四項，即係喺新巴嗰份嘅遠期計劃入面嗰十四項。

陳美寶女士：（經傳譯員）我會答有嘅。

MR DUNCAN：（經傳譯員）你話「我會答有」係咩嘢意，即係有定冇咁做？

陳美寶女士：（經傳譯員）每年嘅表現報告就係--評估就係按照每間公司去做嘅，運輸署會睇番意外嘅表現，每一間營運商，睇番佢個安全嘅情況，就係用呢兩個指標嚟睇。遠期計劃，尤其關於巴士安全嘅章節，就係畀我哋去仔細研究，睇清楚巴士公司佢個情況同埋佢哋喺安全方面嘅表現，呢個就係作為一個基礎畀運輸署評估呢間公司嘅表現。

MR DUNCAN：（經傳譯員）但係喺呢個撮要入面，冇任何部分顯示運輸署係有逐間營運商睇佢哋個報告話每一年佢哋打算實施乜嘢喎，呢度只係指每百萬行車公里有幾多次意外，同埋係喺檢查巴士嗰時發現同安全有關嘅缺損。

陳美寶女士：（經傳譯員）我請你睇番我哋嘅第 2 號文件。我想請你睇番第 2 號文件，附件 F--對唔住，應該係運輸署第 1 號文件，另外就係 2016 年嘅巴士營運商嘅表現報告。咁應該...

主席：（經傳譯員）你可唔可以再講下邊一頁呀？

MR DUNCAN：305。

主席：Thank you。（經傳譯員）你頭先講到呢份文件，係嘞，就係 2016 年嘅專營巴士公司運作嘅表現。

陳美寶女士：（經傳譯員）睇到同安全措施有關嘅段落，咁就簡述專營公司嘅安全嗰方面嘅表現，同埋喺呢啲意外入面係搵到嘅共通成因。尤其喺 2016 年嘅表現，意外通常都包括係譬如因為唔同原因，乘客喺呢個巴士車廂入面失衡，譬如話係

有扶穩扶手，或者係落緊樓梯咁樣跌嘅，而巴士公司就以唔同嘅方式實施措施，加強安全嘅。然後我哋就再睇番嗰一年嗰間巴士公司嘅表現，然後呢份文件嘅附錄 B，我哋亦都有提到有啲乜嘢措施去加強巴士運作嘅安全性。

MR DUNCAN：（經傳譯員）我理解啱唔啱呢？即係有特登喺每年嘅評估入面考慮嘅？

陳美寶女士：（經傳譯員）係。

MR DUNCAN：（經傳譯員）而家我暫時唔講呢個遠期計劃入面嘅安全有關部分，你可以將文件搦開先。而家想同你講下乘客嘅行為方面，委員會亦都收到好多有關嘅書面意見，亦都委員會知悉，又據稱對車長近來亦都多咗係用武力嘅對待，或者係粗言穢語嘅，有唔同嘅團體，譬如係公會、立法會、其中一間巴士公司，即係九巴，都有呢啲嘅指稱。我再解釋一下個情況，請你睇番第 256 頁，應該係 256-1 頁，我就請你睇番，呢個係一個英文譯本，未鑑證嘅譯本嚟嘅，就關於呢一個會議紀錄，就係呢個巴士業職工會聯盟同埋運輸署嘅會面。

陳美寶女士：Yes.

MR DUNCAN：（經傳譯員）你如果要睇中文嘅話，我可以畀番中文嗰個頁數你，中文版係 250 頁，英文譯本就係 256-5，呢度係講及就係車長嘅人身安全。我就讀番嗰個翻譯本出嚟，嗰度就講及車長擔心就係話好多時佢哋受到襲擊，但係警方嚟到嘅時候，就係唔告嗰個犯案嘅人，就叫佢哋自行解決。而公會就問下，就係究竟有冇啲乜嘢嘢嘅保障，即係前線嘅車長，究竟遭遇呢啲情況有啲乜嘢保障嘅，所以就你記住呢一點先。另外就 256-6。

主席：（經傳譯員）2016 年 10 月 4 號所舉行嘅一次會議嚟嘅，係咪？先搞清楚呢點。

MR DUNCAN：（經傳譯員）係。256-8，你呢就會見到就係呢一個 3 月 27 號 2017 年嘅一次會議紀錄。中文就係 245 頁嗰度見到。或者我就係想請你睇番呢一個譯本，嗰度就係講到話車長受到襲擊，同埋施暴者嘅檢控準則。工會就表示關注近日車長被襲擊，即係使被襲擊嘅車長報警，好多時候，警方到場就提議雙方和解，就係冇檢控有關人士。另外，巴士公司只係為員工提供保險。警方表示就係唔會容忍任何人使用暴力，並同係呼籲車長如果遇到有關情況，就必須報警，並且儘可能係尋找證人，以便警方跟進。或者我想話畀你聽，就不如你睇番嗰個會議紀錄，會議紀錄嗰度就有話畀你聽有邊個出席嘅，嗰度就係有政府代表，有議員同埋巴士業職工會嘅代表咁樣樣。

主席：（經傳譯員）講番佢哋嘅投訴，256 頁，你呢度就話警方就係表達一個意見，警方有冇人在場代表嘅呢？

陳美寶女士：Yes.

主席：（經傳譯員）喺邊度可以見到佢個名呀？

陳美寶女士：（經傳譯員）曾滿麟先生係警務處嘅總督察（道路安全），256-8 嗰頁，英文版。

主席：（經傳譯員）係，好，唔該，好。

MR DUNCAN：（經傳譯員）256-16 嗰度，嗰個就係中譯本嚟嘅。中文版係 250 頁，我就想請你睇一睇。英文譯本就係 256-18 嗰度嘅，你會就係見到 2017 年 7 月 20 號一次開會嘅會議紀錄。係，當時亦都有係運輸署、警方嘅代表出席，亦都係有巴士業職工會聯盟嘅代表出席嘅。或者我想請你睇番 256-18 嗰度，嗰度第（ii）嗰項就係講到巴士車長被襲事件，嗰度比較長嘅，我就唔會逐句讀出嚟，或者你自己好快咁睇一睇嗰幾段，然後我就係想講番屘嗰兩段。或者不如我講最後個--呢一個部分最屘嗰段。另外，警方及工會建議巴士公司喺司機駕駛間加裝保護設施，運輸署會就公會嘅關注向巴士公司反映，好似嗰個書面翻譯嗰度係有啲唔係好清楚。當然，就係呢度，運輸署係知悉公會嘅關注。

陳美寶女士：（經傳譯員）主席，我亦都睇番中文嗰個原本嗰個版本，呢個係喺 251 頁。就呢個部分，嗰度就咁講，運輸署會就公會嘅關注向巴士公司反映。

MR DUNCAN：（經傳譯員）係，好。嗰個書面翻譯嗰度就係有啲問題，係咪呀？我稍後會再返番嚟呢度。不過，我再想係講及其他嘅例子，就係話運輸署其實都知悉呢一啲關注。請你睇 SEC 2 嘅文件，亦都睇番嗰個翻譯本，係 815 頁，佢原本就係中文嘅，中文嗰個版本就喺 814 頁。呢份其係提交畀立法會嘅文件，你知唔知道其實部門都--即係有人係話畀部門聽，話發生呢件事呢？

陳美寶女士：（經傳譯員）我手頭上冇呢啲資料。

主席：（經傳譯員）不如咁，你可唔可以講多啲資料畀我哋聽，就係日期同埋係邊個寫畀邊個嘅呢？

陳美寶女士：（經傳譯員）呢封信唔係寫畀我哋嘅。

主席：（經傳譯員）我明白，我係想請鄧樂勤大律師講講。

MR DUNCAN：（經傳譯員）呢個日期就係 2016 年嘅 5 月 19 號，咁係一封函件係致函畀立法會交通事務委員會嘅主席。如果你冇睇過呢一封信嘅話，咁我唔問你任何問題。最後就呢一方面，我亦都想請你睇一個係--九巴嘅第一份文件，係喺第 62 頁嗰度，呢個就係九龍巴士有限公司向委員會提交嘅意見書。我唔知道你有冇時間，有冇機會係睇過呢？

陳美寶女士：（經傳譯員）我只係攞一攞嘅。

MR DUNCAN：（經傳譯員）係，好，唔該。我想請你睇呢個第 62 頁，喺頂頭嗰度，或者你自己睇一睇。或者先睇第一點，即係話因應就係愈嚟愈多車長受襲，我哋就係採取咗下列嘅措施。

主席：（經傳譯員）由於即時傳譯就係都需要做翻譯，但係我打上嚟嘅，就只係嗰個

英文個版本，你係咪都將佢讀出嚟方便啲呢？

MR DUNCAN：（經傳譯員）嗰度係有講過就係一啲偵察嘅相機，就包括向前嘅相機，同埋有相機就係睇住，就係影住嗰個司機位嘅，呢個都已經係所有嚟自 2015 年新嘅巴士都會裝呢啲咁嘅鏡頭，咁係一個標準設備嚟嘅。2018 年嘅 2 月，其實就二千三百一十九部九巴同埋一百四十六部龍運巴士都有呢啲鏡頭。其餘嘅巴士就會逐步逐步係加裝嘅，呢一啲嘅監察鏡頭就可以係睇到嗰啲如果有麻煩嘅乘客佢嘅行為係點，亦都包括埋錄音嘅，咁就會保障喺事後警方嘅調查或者法律行動嘅車長嘅利益。我哋亦都會係喺 18 年嘅 6 月開始，就係喺近司機位嗰度加個保護罩，我哋亦都會有更多車上嘅宣布，就係促請乘客唔好做某一啲嘢係會影響車長或者其他嘅乘客，我哋亦都會就係提供一個法律支援畀車長，如果佢哋係遇襲嘅話。

大家就睇到呢啲文件，作為一個背景，我想問下你幾個問題。首先，當我提及呢一個乘客嘅行為嘅時候，即係琴日我都同局方就講呢個乘客嘅行為，當時佢哋就話部門獲得指示，就係要草擬一啲呢方面嘅公眾教育嘅計劃。我想問下，你哋做呢個公眾教育，究竟而家程度--嗰個進展係如何呢？

陳美寶女士：（經傳譯員）講到係乘客嘅行為，即係佢哋點樣對嗰啲車長，其實我哋喺 3 月分交諮會開會嘅時候，我哋當時就係提交咗我哋有啲咩嘢跟進嘅行動，即係跟進番大埔公路交通意外有咩嘢行動。交諮會當時喺 3 月開會，當時我哋就作一個報告，就係話部門，即係政府就係知悉車長嘅關注，即係話曾經發生過一啲事件就係乘客襲擊車長，或者就係對佢哋有暴力咁樣嘅。其實就係道路安全議會亦都有跟進嘅，而當時--其實呢個議會亦都有運輸署同埋警方嘅代表作為成員，以作為一個係持續嘅宣傳同埋教育嘅工作，我哋係有電台嘅宣傳片，亦都有電視嘅宣傳片，亦都喺警訊嗰度話畀大家聽究竟就係如果你搭巴士嘅時候，作為一個乘客，你點樣做先係屬於一個適當嘅行為。而交諮會開會嘅時候，當時我哋就係--佢哋就係叫我哋睇一睇有冇一啲裝置係好啲嘅，同埋就係有冇一個好嘅教育同埋宣傳嘅工作。喺交通安全運動委員會第七十七次嘅會議，呢一個委員會就係交通安全議會底下嗰個工作小組，佢哋喺 4 月 13 號嘅時候開咗會，佢哋就係話乘客嘅態度應該就係道路安全運動喺 2019(sic)年嘅主題之一。第一個推廣活動就係製造一啲公共宣傳，就係推廣乘客喺公交上嘅操守，同埋係今年第三季就會推出。

喺運輸署方面，我哋亦都有同其他公共交通嘅營運商或者行業溝通，例如係的士業，呢個亦都係的士司機提出嘅關注，正在製備一啲嘅守則同埋指引去推行優質的士服務，改善現行嘅制度底下一萬八千架的士嘅服務質素。除咗司機嗰方面，我哋亦都有一個章節係關於乘客嘅責任同埋態度。我亦都有同港鐵公司提出喺我哋每年嘅運作檢討委員會提出，我哋係打算推行大型嘅公眾教育推廣活動，係牽涉不同嘅公交營運商，唔單只係巴士公司，亦都有港鐵、的士之類。我哋考慮緊計劃細節，希望可以呢一個有關嘅推廣活動喺 2018 年底推出。唔該晒，大律師。

MR DUNCAN：（經傳譯員）教育計劃其實即係講緊話有一系列嘅措施，係咪呀？

陳美寶女士：（經傳譯員）教育計劃嘅意思就係我哋覺得教育係好重要嘅一個元素，可以帶出一個主要信息，乘客乘搭工具交通工具嘅時候需要留意乜嘢。其中一個訊息，我哋一直都係同營運商同我哋自己之間都有討論，就係話司機同乘客之間都有個共同嘅責任去確保旅途係安全舒適嘅，由出發地至到目的地都係。

MR DUNCAN：（經傳譯員）九巴已經表示，佢哋已經安裝同埋會繼續安裝一啲嘅監視鏡頭喺佢哋嘅巴士上面。呢個係咪運輸署要求嚟㗎？係咪運輸署對九巴嘅要求？

陳美寶女士：（經傳譯員）唔係。

MR DUNCAN：（經傳譯員）你有冇同其他巴士公司商討過安裝監視鏡頭？

陳美寶女士：（經傳譯員）我個人嚟講，就知悉九巴嘅措施，譬如話安裝啲監視鏡頭，佢哋喺日常嘅討論入面有同我哋講過，喺董事局嘅層面都有提過。呢一點喺董事局，即係其他嘅巴士營運商嘅董事局會議就冇提出嘅，據我所知，但係我哋都知道佢哋考慮用唔同嘅措施協助巴士司機處理呢個問題。如果出現一啲情況，乘客對司機有啲侵犯嘅行為嘅話，喺車上有啲爭議嘅話，車上有冇一啲裝置可以收集證據呢？另外一方面，運輸署直至現在係冇要求安裝鏡頭嘅，我哋明白喺某啲方面會有啲關注，譬如話司機對於呢啲鏡頭會有乜嘢嘅情緒反映，呢點而家喺巴士營運商之間都係討論緊嘅。

MR DUNCAN：（經傳譯員）即係話運輸署而家唔會係跟進呢件事，係交畀巴士公司做？

陳美寶女士：（經傳譯員）正如我提到，運輸署同公會開會入面，都聽到有關嘅關注，將佢轉交咗畀巴士公司，亦都請巴士公司尋找一啲方法去處理一啲咁樣嘅事件，即係牽涉巴士司機嘅，就睇下有啲乜嘢嘅設施，有咩嘢措施可以解決，但係亦都要考慮到職員嘅士氣同埋佢嘅情緒。

MR DUNCAN：（經傳譯員）咁即係個答案係喇，你係交畀巴士公司自己決定。

陳美寶女士：（經傳譯員）我唔會咁講嘅，因為我哋要考慮埋乘客對司機嘅態度亦都係好重要嘅問題。多年來，我哋致力透過教育同埋推廣嘅活動，發放呢個訊息，我哋亦都知道公會同公司同運輸署都有反映佢哋嘅關注，呢件事我哋亦都有將關注轉交畀巴士公司，我哋明白巴士公司係會處理呢一項嘅關注，我亦都歡迎巴士公司制訂一啲措施係處理呢個問題。再回答番個問題，我哋唔係完全話交畀巴士公司處理就算嘅，因為我哋都知道有啲特定嘅儀器，譬如係監視鏡頭，可能本身都有某啲影響嘅，我哋係要求巴士公司小心去研究呢一方面。

主席：（經傳譯員）我可唔可以請你再解釋，你話監視鏡頭會有啲咩嘢影響，可唔可以解釋下？

Transcript by Epiq Hong Kong, Limited

陳美寶女士：（經傳譯員）據我哋理解，同埋同九巴董事局開會，舉個例子，車長有啲關注嘅，安裝咗監視鏡頭嘅話，喺佢哋司機位前方安裝嘅話，係會侵犯佢哋個人私隱，我哋亦都有收到一啲投訴嘅，呢方面，唔該。

主席：（經傳譯員）即係車長透過公會投訴？

陳美寶女士：公會，係。

主席：（經傳譯員）有冇文件，呢啲投訴，有冇任何資料？

陳美寶女士：（經傳譯員）我哋可能搵唔到，我哋會儘量去搵下。

主席：（經傳譯員）即係一方面有啲車長喇，起碼，就係關注可能侵犯個人私穩，另一方面，車長亦都擔心可能係被襲嘅。

MR DUNCAN：（經傳譯員）保護罩，呢一方面有冇考慮？係咪運輸署考慮嘅，覺得係合適嘅措施呢？

陳美寶女士：（經傳譯員）呢個亦都係巴士公司主動提出嘅，喺呢個情況，即係九巴提出嘅。

MR DUNCAN：（經傳譯員）我個問題係運輸署覺得值唔值得研究加裝保護罩呢？係咪由巴士--係咪運輸署研究之後，可以向其他巴士公司都提出呢啲要求呢？

陳美寶女士：（經傳譯員）呢個係九巴提出嘅措施，佢哋係回應番車長對於管理方面嘅一啲建議同埋關注，我哋都明白嘅。

主席：（經傳譯員）個問題係你有冇同其他嘅巴士公司提議，或者營運商提議，佢哋都考慮呢個措施呢？

陳美寶女士：（經傳譯員）我哋有對其他嘅巴士公司提呢個建議畀佢哋考慮。

MR DUNCAN：（經傳譯員）即係都係由佢哋自己決定繼唔繼續去實施呢個措施，係佢哋考慮嘅，呢個現階段係。

主席：（經傳譯員）鄧大律師，有冇任何相片可以睇下你所謂嘅保護罩係點樣嘅呢？

MR DUNCAN：（經傳譯員）我會儘量搵下。琴日我同局方嘅黎先生就問咗呢個問題，到底有冇邊一間巴士公司有自己成立附例去規管，譬如話車長或者乘客嘅行為？黎先生就話呢一方面，附例方面佢唔係十分清楚個情況係點樣，你答唔答到呢？有冇任何嘅巴士公司係根據條例底下制訂附例呢？

陳美寶女士：（經傳譯員）呢一方面我哋有檢查過嘅，係現階段，巴士公司係冇喺呢一個階段就制訂任何嘅附例，我哋同事就記得似乎起碼過去十年，巴士營運商都冇提過呢一點。

MR DUNCAN：（經傳譯員）巴士營運商冇提過，但係你作為運輸署，有冇考慮過巴士公司訂立附例，可能係可以幫助到解決近來都頗為猖獗嘅問題呢？因為警方顯

然都覺得提出檢控係有困難。

陳美寶女士：（經傳譯員）根據《公共巴士服務規例》同埋係道路交通嘅規例，咁已經提到有關係乘客嘅操守，喺公共巴士上面嘅一般操守，係唔可以阻礙司機嘅，呢個已經係一個立法嘅基礎，規管呢一方面嘅事情。

MR DUNCAN：（經傳譯員）你或者唔係好明白，呢個意見可能就係話唔係警方嘅首要任務，但係巴士公司就可能會好關注。

陳美寶女士：（經傳譯員）我唔可以代表警方回答呢個問題。

MR DUNCAN：（經傳譯員）據運輸署所知，有冇提供訓練畀司機呢？對於一啲不守禮嘅乘客點樣處理。

陳美寶女士：（經傳譯員）據我知，巴士公司喺課程入面有一啲部分係關於點樣處理乘客嘅，係，呢個佢哋培訓嘅部分嚟嘅，對於現行嘅車長同埋新入職嘅車長都有嘅。

MR DUNCAN：（經傳譯員）公會已經投訴過，運輸署有冇考慮過呢個培訓課程入面嘅部分，睇下有咩嘢措施可以提供培訓呢？

陳美寶女士：（經傳譯員）我提到，就係喺有啲處理壓力嘅培訓內容，就係喺嗰個遠期計劃入面提到培訓部分都有嘅。我哋本身亦都係計劃將培訓嘅框架，大家睇齊，令到畀新入職同埋現職嘅車長都有同一個培訓嘅模組，而家亦都有呢啲培訓課程提供，喺某啲情況，車長如果覺得受侵犯嘅話，點樣處理呢啲乘客。

MR DUNCAN：（經傳譯員）你知唔知道對於巴士車長嚟講，如果發生一件事係涉及乘客行為嘅話，一般個準則應該點處理呢？

陳美寶女士：（經傳譯員）據我所知，九巴係有訂立一啲基本嘅規矩畀車長遵守同埋係處理喺呢啲情況。

MR DUNCAN：Have you examined those?

主席：（經傳譯員）等一等，大律師。趁我仲記得，你就話你打算將培訓嘅架構係將佢體齊，係咩嘢意思？

陳美寶女士：（經傳譯員）有一個工作小組 3 月成立，係增強呢一個巴士安全嘅。佢哋嘅工作範圍亦都包括增強培訓，呢個係其中一個佢哋研究嘅題目。正如喺我哋文件亦都有提到，文件 11 號，即係話關於巴士車長嘅培訓同埋健康狀況，我哋已經匯報咗，我哋就打算訂立指引係關於培訓嘅架構，將培訓嘅內容同埋組成嘅部分都係一致嘅。

主席：（經傳譯員）你花啲時間去搵番文件嘅邊部分喇。

陳美寶女士：（經傳譯員）畀啲時間我。係第 131 頁嘅螢幕上都有顯示。

主席：（經傳譯員）第 15 段？

陳美寶女士：Yes.

主席：（經傳譯員）唔該。

陳美寶女士：（經傳譯員）培訓車長處理有關情況，即係牽涉乘客係十分重要，需要處理呢個問題。現時有好多巴士公司已經提供有關嘅培訓嘅課程，但係我哋覺得呢啲嘅課程係需要有一致性，去確保喺畀新入職同埋現職車長嘅培訓入面有呢個內容，我哋想制定指引，睇下呢一個有關嘅模組培訓課程嘅比重，去確保有合適嘅培訓提供畀車長，令到佢哋有相關嘅技能，心理上亦都可以處理到呢啲有壓力嘅情況。

主席：（經傳譯員）當你講話要睇齊同埋將佢常規化，你意思係咪話發出啲指引，好讓就係所有嘅巴士公司喺呢方面都係一致呢？

陳美寶女士：（經傳譯員）係，我哋打算發出指引。呢個指引就要求所有巴士營運商，就係將呢一類嘅培訓係加入去佢哋嘅培訓框架嗰度，而且我哋亦都打算係將基本嘅要求，譬如嗰個係時間，佢個比重等等，就係列出嚟嘅，制作成為一個框架，就係讓巴士公司去遵從。換句話講，就係有一個框架，亦都係讓各家巴士公司就係進行監察。希望有咁樣嘅做法，就可以將各家巴士公司佢嘅做法係一致。

當然可能喺細節上面，佢嗰個係期間等等可能係有所不同，但係有啲基本嗰個時間同埋不同單元個比重，亦都應該係差唔多。

主席：（經傳譯員）你所謂嘅「比重」係咩嘢意思？

陳美寶女士：（經傳譯員）相對嘅比重，即係譬如話處理乘客呢一個單元，相對其他嘅單元，譬如話關乎呢個駕駛技術、路線嘅訓練咁樣。

主席：（經傳譯員）好。呢一個工作小組，我知道你哋預期佢哋係喺 6 月尾就係完成工作。

陳美寶女士：（經傳譯員）係，主席，你啱㗎。

主席：（經傳譯員）係咪預計到時就可以發出啲指引？

陳美寶女士：（經傳譯員）我哋好努力㗎嘞，我哋儘早希望制定到嗰啲指引。而家喺工作小組個承諾，就話希望喺 6 月尾嘅時候寫好嗰個報告。我哋就會睇下嗰個指引嘅草擬本係咪可以喺報告嗰度係包括埋，但係嗰個詳細嘅指引可能都需要一啲時間添。

唔該你，主席。

主席：（經傳譯員）係，唔該晒。係，鄧大律師。

MR DUNCAN：（經傳譯員）其實呢段文字，其實都冇處理到我同你提嗰個問題，冇

具體咁樣樣去回應到嗰個乘客嘅行為，即係啲乘客點樣對嗰個車長呢一個問題。

陳美寶女士：（經傳譯員）係，呢份文件冇具體特定咁樣係回應呢一點，但係喺工作小組兩次開會嘅時候係有講過呢一個單元。我哋亦都係取得巴士營運商嘅同意，就係大家同意就係有一個一致嘅框架，而裏面就係有所需嘅單元。

MR DUNCAN：（經傳譯員）我想即係結束呢一方面嘅討論。我想問下就係我哋都見到，工會同埋其他人都有提出過投訴，我就知道運輸署、警方同埋工會都開過會嘅。我想問下部門本身有冇構思係點樣樣去解決呢個問題，就唔係話將佢留番畀巴士公司自行去解決？

陳美寶女士：（經傳譯員）署方認為呢一個係一個好重要嘅課題係需要處理，你哋亦都可以見到，我哋運輸署係喺各方面作出努力。我哋相信係讓車長有所需嘅技巧，同埋讓佢哋心理上係作好一個準備，可以處理呢啲情況。另外仲有教育同埋宣傳嘅工作係話畀大家聽，就最重要就係要知道自己乘客有啲咩嘢責任，都係一個雙管齊下嘅方法嚟嘅。

MR DUNCAN：（經傳譯員）你有冇啲係比較具體嘅措施，即係除咗你剛才所講比較係一個廣泛嘅手法？

陳美寶女士：（經傳譯員）我相信我剛才講嘅已經係好具體。

MR DUNCAN：（經傳譯員）我就想睇番你嗰個補充嘅資料，TD-1 嘅 163 頁。就有一點係想你澄清一下，163。

委員會係曾經問過你一個問題，就係咁樣問嘅，運輸署就係睇過嗰啲抽樣調查嘅結果，就去確保專營巴士營運商就係有監察佢哋司機嘅駕駛嘅行為，同埋就會採取跟進行動。如果有啲司機就係駕駛態度或者行為不良，請你講一講，你係用啲乜嘢嘅程序嚟到進行呢一個檢討或者檢視嘅工作？如果係書面嘅話，請交出嚟。

你呢度就係話，突擊檢查或者抽樣調查嘅結果係需要呈交，呢個就喺 04 號文件嘅附件十一嗰度睇到，就係指係 18 年嘅 1 月先開始推行。運輸署就係檢討營運商所提交嘅每月嘅報告，去確保佢哋有監察住呢個司機嘅駕駛行為。我想問呢一方面，究竟你有做過啲咩嘢，即係關乎呢個抽樣嘅調查？

陳美寶女士：（經傳譯員）呢個要求佢哋係設置呢個黑盒，同埋係要有係公司自己嘅便衣嘅職員上車嗰度，嚟到監察車長嘅行為。其實過去多年，就係進行咗，不過我唔記得係具體邊一年嘅，或者我嘅同事都可以查核一下，然後再補充。

為咗係讓巴士公司係有能力係知道得更多，同埋更好咁樣樣去監察車長嘅駕駛行為，我哋就話呢一個黑盒，同埋就係車上嘅便衣嘅督察都可以協助公司分析，同埋監察行為，同埋亦都可以建議一啲改進嘅措施。呢個要求係運輸署訂定。

我哋預期--或者我哋期望巴士公司就根據呢度觀察所得，而呢樣嘢亦都係不斷咁去做，希望佢哋喺呢個基礎之上，就係訂定一啲適當嘅措施。

18 年 1 月之後，運輸署就係採取主動，就要求係做好呢個監察嘅工作，嚟到確保巴士公司係真係有做分析，亦都有做監察，亦都係定期咁樣做。我哋採取主動去做，唔係因應有乜嘢意外，而係話我哋覺得咁樣樣可以讓我哋得到一啲資料作為一個基礎，去諗下究竟係咪可以巴士公司又或者係運輸署嗰方面都可以加強嗰個監察，嚟到確保我哋--如果要考慮一啲適當嘅措施嘅話，都係一個知情嘅情況之下去做嘅。

呢個就關乎係駕駛嘅行為，過去多年，我哋都喺度分析嗰啲意外嘅數據，而好多時係意外裏面，無論係嚴重或者冇咁嚴重嘅意外裏面，司機嘅行為都係一個重要嘅因素，所以我哋認為係有需要加強嗰個定期嘅監察。

MR DUNCAN：（經傳譯員）其實我嘅問題就只係問你所講嘅係隨機抽查係點樣樣嘅呢？

陳美寶女士：（經傳譯員）據我嘅理解同埋我所記得，巴士公司係要應我哋嘅要求係就黑盒嘅數據進行呢個隨機抽樣調查，同埋亦都喺車上進行隨機嘅抽查。

MR DUNCAN：（經傳譯員）好，講番車上嘅抽查。呢一個係咪運輸署嘅要求定點呢？

陳美寶女士：（經傳譯員）其實運輸署要求。

MR DUNCAN：（經傳譯員）係咪書面要求？

陳美寶女士：（經傳譯員）我可以查下，然後再補充。

MR DUNCAN：（經傳譯員）我好想知道你呢個隨機嘅抽查究竟嗰個詳情係點，同埋巴士公司係咪佢哋自己去進行，係咪係針對呢個司機嘅行為？

陳美寶女士：（經傳譯員）我冇有關嘅紀錄喺手邊，不過我哋可以返去查下，同埋睇下有冇咩嘢係已經寫低咗落嚟。

MR DUNCAN：（經傳譯員）我就係想問會唔會隨機抽樣抽查一下乘客嘅行為？

陳美寶女士：（經傳譯員）呢個隨機抽查就係焦點在於車長嘅行為。

MR DUNCAN：（經傳譯員）好，我去另一個題目。

主席：（經傳譯員）不過你未去第二個題目之前，其實我哋係請運輸署形容一下，你哋點樣樣去檢視嗰啲隨機抽查嘅報告，或者嗰啲紀錄。究竟你哋點樣去即係睇番檢討番、檢視番佢哋交上嚟嘅報告？

陳美寶女士：（經傳譯員）讓我係搵一搵番有關嗰個遵從嘅報告表格，然後話畀你聽。

主席：（經傳譯員）好，慢慢嚟。

陳美寶女士：（經傳譯員）請大家睇一個 04 號文件嘅附件十一，喺運輸署嘅文件夾嗰度，或者律師嘅團隊可以話畀大家聽嗰個頁碼。

主席：（經傳譯員）鄧大律師，可唔可以話畀我哋聽喺邊度搵到嗰個附件十一？

MR DUNCAN：（經傳譯員）1020 頁。

陳美寶女士：（經傳譯員）主席，呢個月報嚟，係指 18 年 1 月開始發出，係涉及四個方面。

主席：（經傳譯員）係。

陳美寶女士：（經傳譯員）(B)部嗰度就係便裝嘅檢查，就去睇下車長嘅駕駛行為。我哋喺嗰個監察報告嗰度，就係講明係需要知道有幾多個係常規嘅便衣檢查，有幾多個係隨機做，同埋每個月係發現到有幾多宗不良嘅行為，同埋跟進嘅行動。有個咁嘅報告，就讓我哋係知道同埋監察到，究竟佢哋常規係做幾多呢個便衣嘅視察，同埋幾多係非常規。亦都知道係有幾多宗個案係涉及不當嘅行為同埋有咩嘢跟進行動。呢個係 18 年 1 月嘅報告，你亦都見到佢哋係有啲咩嘢跟進行為。

喺呢個報表嗰度，我哋會收到之後就睇，我哋就睇下究竟巴士公司係有冇定期咁樣樣去喬裝乘客咁樣去睇佢哋個情況，亦都睇下嗰個數字會唔會係波動得好緊要，亦都更重要嘅，就會睇下有冇一個趨勢，就係話車長嘅行為係不當。我哋自己會進行呢個分析，就會睇到各家巴士公司嗰個情況，我哋亦都用佢作為其中一個工具，等我哋就可以同巴士公司就跟進，就問下佢哋，睇下佢哋有冇採取適當嘅行動，嚟到去處理一個車長嘅不當行為。

主席：（經傳譯員）譬如講下黑盒，喺呢個表格度就有寫到「八千五百五十二次」喺月尾--截至月尾，就有八千五百五十二次嘅檢查黑盒？

陳美寶女士：Yes。

主席：（經傳譯員）然後超速就有二百七十一宗。

陳美寶女士：Yes。

主席：（經傳譯員）跟進行動就包括一百八十七次嘅口頭警告，七十八次書面警告，同埋六次嘅最後警告。

陳美寶女士：Yes。

主席：（經傳譯員）運輸署即係睇呢份文件，所謂檢視嘅情況，相信睇到呢個記項，你都就係即係知道有咁樣嘅儀器，有咁嘅檢查，你嘅檢視工作就係咁？

陳美寶女士：（經傳譯員）呢個係以月報嘅形式提供嘅，提供資料畀我哋，一啲基本資料，睇下巴士公司係以乜嘢方式去檢查，譬如話係查嗰個黑盒嘅數據，又或者

係便裝去監察司機，呢個係等我哋喺每年評估巴士公司表現嘅時候嘅一個理據，再加埋我哋有個獨立嘅分析。我哋分析番巴士營運商嘅意外嘅數字，同埋有冇乜嘢嘅成因，譬如話係咪巴士車長個行為嘅問題，所有呢啲問題，我哋會再同番巴士公司跟進，睇下巴士公司要提出咩嘢改良嘅措施。

主席：（經傳譯員）唔該。

MR DUNCAN：（經傳譯員）陳女士，你可唔可以同我哋講下，有幾常見係檢控乘客？

陳美寶女士：（經傳譯員）關於佢哋喺巴士上嘅行為，過去五年，我冇資料。

MR DUNCAN：（經傳譯員）運輸署冇保存呢啲資料？

陳美寶女士：（經傳譯員）我哋冇保存呢一啲資料，但係我唔肯定啲資料係有冇提交畀道路安全議會。因為警方就係其中一個議會嘅成員，另外仲佢哋亦都係即係做主席，去主持呢一個嘅道路安全議會。

MR DUNCAN：（經傳譯員）喺啲規例底下呢？即係根據《公共巴士服務條例》底下制定嘅規例？根據呢個規例底下有幾常提出嘅檢控呢？

陳美寶女士：（經傳譯員）我哋現時亦都冇資料。

MR DUNCAN：（經傳譯員）主席，我想打斷一下。嗰啲嘅保護罩，就喺文件冊入面，就冇呢個相片嘅。

主席：（經傳譯員）我聽唔清楚，唔好意思。

MR DUNCAN：（經傳譯員）關於巴士車長嗰個位置嘅保護罩，喺文件冊入面係冇相。

陳美寶女士：（經傳譯員）主席，或者我哋可以呢方面協助。我相信我有見過呢一張相嘅。或者我哋可以搵下喺我哋啲紀錄入面，提交畀委員會，我會盡力嘗試嘅。

主席：（經傳譯員）好吖，總之你搵到一張就交畀我哋，等我哋明白係咩嘢嚟嘅。因為話已經有安裝咗，同埋亦都會繼續安裝。

陳美寶女士：（經傳譯員）我哋其實搭巴士嗰陣時都可以見到有咁嘅保護罩，有啲已經安裝咗，就喺個司機位旁邊。

MR DUNCAN：（經傳譯員）突擊檢查車輛，尋日同黎先生亦都有講呢個問題。其中一位委員亦都有問，有個數字，每日十四架，點解會有咁嘅數字呢，呢一方面你可唔可以協助我哋？

陳美寶女士：（經傳譯員）運輸署檢查十四部車係突擊檢查，就喺《管制人員報告》入面提出嘅，係喺運輸署嗰個《管制人員報告》。制定指標或者承諾，我哋要考慮一個穩建嘅車輛檢查嘅制度，係屬於運輸署。每一架專營巴士都要每個月檢

查，除此之外，每年亦都有檢查。如果有一架巴士係當時每月冇做檢查嘅話--等我再重講一次，我哋會每月、每年就住每一架巴士都會檢查嘅。如果有啲情況，有架巴士唔係每月或者每年有檢查嘅話...

陳英傑先生：Not recently...

陳美寶女士：（經傳譯員）或者我請我同事補充。

主席：（經傳譯員）可以。我諗個問題其實話點解淨係得十四架，唔係二百四十架，譬如咁講？

陳美寶女士：（經傳譯員）簡單嚟講，突擊檢查就係喺每月同埋每年例行檢查之外嘅突擊檢查工作嚟嘅。每月、每年就係一啲已經計劃咗嘅檢查工作，突擊檢查就係令到個制度更加完善，因為係以突擊、隨機嘅性質嘅。

主席：（經傳譯員）係呀，點解十四架，而唔係其他數目？

陳美寶女士：（經傳譯員）每日十四架，即係等如每年三千四百架巴士，總數就係有五千九百架巴士係屬於唔同嘅專營巴士公司。呢個唔係一個特別有科學根據嘅數據嘅，每日十四架。但係我哋亦都考慮到有嘅資源，巴士車隊嘅數目，同埋運輸署喺每年或者每個月例行檢查嘅時候，喺驗車中心需要檢驗嘅車輛數目。

每月、每年嘅檢查同埋突擊檢查加埋嘅數據，就畀一個基礎畀我哋去考慮巴士嘅車輛嘅構造係咪安全嘅情況。同埋找出如果巴士嘅基件有咩嘢缺失嘅話係要能夠辨認到，同埋係更正番嘅。

主席: Mr Duncan.

MR DUNCAN：（經傳譯員）主席，我而家想講下另外一個範圍，關於運輸署同工會嘅聯繫。你嘅證供就顯然運輸署同埋巴士公司就有好多嘅來往嘅、連繫嘅，我想知道你哋接觸--即係不時會接觸工會嘅情況又係點？好多工會都有提交文件畀我哋聽證會嘅，你有冇機會睇，呢啲書面嘅意見書？

陳美寶女士：（經傳譯員）睇咗。

MR DUNCAN：（經傳譯員）我理解啱唔啱呢，行業工會不時係會接觸運輸署或者寫信畀運輸署，提出佢哋嘅關注畀運輸署知道？

陳美寶女士：（經傳譯員）我會話我哋不時會收到工會嘅信件去提及佢哋嘅關注嘅。

MR DUNCAN：（經傳譯員）運輸署係點樣處理，對方接觸你嘅時候？

陳美寶女士：（經傳譯員）或者我可以咁樣講，係一個持續嘅工作嚟嘅。如果工會提出某一項關注，譬如係員工福利，或者係巴士嘅車長工作情況嘅話，我哋會睇下佢哋提出要求嘅性質，睇下係咪同各自巴士公司嘅聘用僱員政策有關，再考慮同巴士公司就住個別個案進行商討嘅。

相對嚟講，更常見嘅就係有啲要求係關於工作時數同埋休息時間嘅。雖然條例並冇要求我哋指明一啲特別要求關於工作環境同埋工作時數，過去十至二十年，我哋已經制定咗指引係要求巴士公司遵守番更次時間、駕駛時間、休息時間，同埋用膳嘅時間。發展到現時，工會可能都係就住呢一個指引嘅範圍同我哋提出關注嘅。呢個工作時間指引一直係實施嘅，令到工會可以向我哋不時表達佢哋嘅意見，同埋建議。我哋亦都會考慮佢哋嘅關注嘅，即係一直都會咁做。

MR DUNCAN：（經傳譯員）今朝早啲嘅時候，我哋睇到有三次會議。你哋係同工會代表開會，我哋睇到個會議紀錄。2016 年 10 月、2017 年 3 月，同埋 2017 年嘅 7 月。係有咩嘢原因要開呢啲會？

陳美寶女士：（經傳譯員）或者我可以請阿關女士，助理署長去回答呢個問題嘅。

MR DUNCAN： Thank you.

關翠蘭女士： Thank you, Chairman.

主席：（經傳譯員）喺你開始回答之前，就要提醒大家。呢啲會議，你係同我哋講番巴士車長安全問題嗰啲會議？

MR DUNCAN： That's right.

主席：（經傳譯員）即係你而家問一個比較概括性嘅問題，就係點解要開呢啲會，係咪？

MR DUNCAN：Yes.

主席：Thank you.

關翠蘭女士：（經傳譯員）主席，多年來我哋係不時同行業工會會面嘅，回應佢哋嘅訴求。佢哋會提出一啲切身關注嘅問題，譬如係話實施呢個工作時間嘅指引，工作環境，以及佢哋實際上遇到嘅困難嘅。譬如話喺街上可能對於佢哋巴士嘅運作有啲阻礙咁樣，都會同我哋提出嘅，譬如話有邊啲係交通擠塞黑點，等我哋可以同有關嘅部門去聯絡，解決問題。

MR DUNCAN：（經傳譯員）你有幾常見工會代表？係咪就好似我哋文件睇到嗰啲嘅會議？

關翠蘭女士：（經傳譯員）就唔係話有固定嘅時間表嘅，通常當我哋有一啲事項要同佢哋提出嘅時候，就會同佢哋開一個會見面傾下。如果有啲事項，佢哋覺得係設身關注嘅，佢哋亦都會要求安排會議嘅。

MR DUNCAN：（經傳譯員）可唔可以解下畀委員會聽？譬如話一年開幾多次會，你會同工會？

關翠蘭女士：（經傳譯員）大概一年兩至三次。

MR DUNCAN：（經傳譯員）警方又或者其他嘅代表都會參與會議，呢個係咪亦都係好經常發生嘅嘢？

關翠蘭女士：（經傳譯員）呢個係視乎喺會議個議程入面將會討論咩題目，譬如話如果有需要，我哋會邀請警方出席會議嘅。

MR DUNCAN：（經傳譯員）陳女士，我想請你睇番行業工會嘅書面意見書第80頁，呢一份係九龍巴士公司，即係九巴員工協會交畀委員會嘅書面意見書，相信你都有機會睇過呢份文件。

陳美寶女士：（經傳譯員）係嘅。

MR DUNCAN：（經傳譯員）請你睇番信件第1段，翻譯就係第80-1頁，第(1)項，你可唔可以自己睇一睇？

陳美寶女士：（經傳譯員）睇咗。

MR DUNCAN：（經傳譯員）你可以見到呢度語氣都幾重，即係工會提出佢哋嘅即係情緒，話畀我哋委員會聽。你嘅回應係點樣？

陳美寶女士：（經傳譯員）我睇嗰個英譯本，呢封信嘅英譯本，其實第1段佢就提及幾個問題，譬如話嗰個待遇低、留失率高，工作時間長等等，呢啲都係即係工會係向巴士公司同埋運輸署開會嘅時候，佢哋所提過嘅問題嘅。

講到流失率高，琴日我諗大家都有講過，大家就講及係人手短缺嘅嚴重--人手短缺嘅問題；講到係待遇太低，政府亦都有請巴士公司就係考慮係咪要處理呢個問題，嚟到係吸引更多嘅新血係入行；工作時間過長，呢個亦都係一個好耐嘅一個問題。其實我哋過去多年，就時不時咁樣去睇，我哋亦都有去修訂咗嗰個工作時間嘅指引。至於話編訂行車時間緊迫，呢個就係關乎巴士公司嘅事宜。其實公眾對於公共巴士服務嘅期望不斷提升，另外喺路上某啲地區交通十分擠迫，就令到編定行車時間係好緊迫。跟住又講管理層嘅手法，管治嘅手法，呢個更多係管理階層同埋員工之間嘅關係，係指某一啲巴士公司。

所以係有人手問題、待遇問題、工作時間問題，即係車長嘅工作時間問題，政府係知悉。所以我哋係採取不同嘅措施，亦都係同巴士公司傾，我哋有嗰個工作時間指引，正正就係我哋其中一個方法，希望係再縮短佢哋嘅工作時間，嚟到改善佢哋工作環境。薪酬待遇，我哋係請巴士公司用各種嘅方法嚟到吸引新人入行，亦都希望佢哋係改善現職車長嘅待遇。

MR DUNCAN：（經傳譯員）運輸署同呢一啲工會嘅關係，你係會點形容？就係健康，定抑或好緊張？

陳美寶女士：（經傳譯員）運輸署係監管專營巴士公司嘅監管當局，車長係一個重要嘅資產，亦都係一個重要嘅一環，如果唔係，就無法做呢個營運。當然我哋運輸署唔係勞工處，但係我哋亦都係一直係同車長--即係工會保持一個關係，一個

持續不斷嘅關係。呢個關係一直都喺度，我哋亦都隨時係預備好同佢哋會面，一係佢哋要求，又或者我哋自己採取主動係要求開會。

MR DUNCAN：（經傳譯員）我其實唔係問呢個關係係咪一直都係喺度定抑或點樣，我哋係問即係個關係是否良好？

陳美寶女士：（經傳譯員）我諗好難去一概而論，然後去回答你個問題，或者係簡單去回答你嗰個問題，我好難咁樣去講。我只能夠話我哋嘅對話係持續不斷，而且我哋嘅關係都係融洽，我哋大家傾一啲大家都關注嘅問題，我哋亦都考慮佢哋嘅意見，同埋佢哋嘅關注，再加埋其他嘅睇法，然後先至草擬嗰個工作時間嘅指引。講到話佢哋喺車廠、喺巴士站嘅休息嘅設施，我哋亦都有同巴士公司講，就希望可以照顧到車長日常嘅需要。

MR DUNCAN：（經傳譯員）你哋同巴士公司嗰個關係又點呢？

陳美寶女士：（經傳譯員）好難去比較，我哋就係巴士營運商嘅監管當局，我哋好認真嚴肅咁樣樣去監察佢哋嘅表現。講到職工會，我哋認為職工係喺呢一個程序裏面，佢哋係重要嘅資產。如果冇嘅話，就無法有呢個有效率嘅服務。所以員工就係佢哋一個重要嘅一環，所以我哋都認為佢哋係一個重要嘅持分者，因而我哋係持續同佢哋保持一個對話。

MR DUNCAN：（經傳譯員）我哋就快會有一個小休，我想請你睇一睇呢一度嗰個標題，呢份意見書嘅呢段文字嗰個標題。我諗呢個就係佢哋嘅感受，我較早時候亦都提過佢哋嘅感受。佢哋有咁嘅感受，你覺唔覺得出奇？

陳美寶女士：（經傳譯員）我唔會講。

主席：（經傳譯員）要為求記錄起見，請你將佢讀出，亦都方便傳譯。

MR DUNCAN：（經傳譯員）呢度標題就話「政府運輸署官員嚴重失職，監管失效」，即係工會佢哋有咁嘅睇法，即係咁樣寫上嚟委員會，你覺唔覺得係出奇？

陳美寶女士：（經傳譯員）我唔會作一個回應，不過我哋覺得係喺監管呢個巴士公司方面，我哋已經盡責。我哋亦都有考慮職工會嘅意見，然後先至制定同車長有關嘅一啲政策。我哋亦都係同佢哋保持呢個溝通嘅渠道，我哋亦都時常就係願意會見佢哋，而佢哋表達咗意見嘅時候，我哋亦都認真考慮，然之後先至制定我哋各項嘅措施。

MR DUNCAN：（經傳譯員）好，唔該晒。我諗小休之後，我諗我哋同你再講一講係一啲比較具體嘅事件，而係職工會就係已經提咗出嚟嘅，唔係全部要你逐個去答，我就會抽其中一部分，就睇下運輸署有冇回應同埋如何去解決呢啲問題，我哋小休之後會處理。

陳美寶女士：Thank you.

主席：（經傳譯員）係，我哋會小休十五分鐘，唔該。

上午 11 時 38 分聆訊押後

上午 11 時 58 分恢復聆訊

出席人士如前。

主席：（經傳譯員）鄧樂勤大律師。

MR DUNCAN：（經傳譯員）唔該，主席。陳女士，喺我哋講番公會向委員會提出嘅一啲關注之前，我仲有幾點想問下你嘅。第一，就係你今朝早作供嗰時提到工作時間等等嗰個指引，我而家想講番你今朝早嘅口述證供係咁嘅。唔該晒，而家要呢個科技做到先，就係更加常見嘅係相對嚟講，頭先就講到話公會有啲嘅要求就係關於車長嘅工作時間、休息時間嘅，因為雖然條例係冇寫明要我哋指定車長嘅工作時間同埋工作環境，我哋亦都有制訂指引係要求巴士公司追求--跟從呢一個車長嘅工作時間、休息、用膳時間等等嘅，雖然你話即係條例就冇要求要處理呢啲事項，但係你都知悉有規例--喺條例底下有規例係指明呢啲事項係需要規管嘅，你係知道，係嘛？

主席：（經傳譯員）係，你可唔可以話畀我哋聽喺邊度搵到？

MR DUNCAN：（經傳譯員）當然喇，局方嘅文件 125 頁，局方嘅文件嘅 125 頁，係 124、125 頁，係局方嘅第二份嘅文件。

主席：（經傳譯員）我哋睇嘅又睇邊度呢？

MR DUNCAN：（經傳譯員）我哋睇番呢一個條例嘅第 35 條，嗰度就講及由運輸及房屋局局長訂立規例，咁第 35 條嗰度就講就係話係局長就可以就以下所有或任何事宜訂立規例嘅。我想請你睇番跟住嗰版喇，就係 125 頁喇，就去到 J 嗰行嘅，嗰個就係「就駕駛某專營公司所使用嘅巴士嘅司機而言，規管在本規例所指明嘅任何期間(i)該司機可准許駕駛該類巴士的最多時數；及(ii)該專營公司給予該等司機休息同埋用茶點的相隔時間」，你可唔可以話畀我哋聽有冇咩嘢特別嘅原因，點解佢哋嘅工作時間係只係由指引規管，而唔係由規例嚟到去規管呢？

陳美寶女士：（經傳譯員）事實上，運輸署喺呢個指引嘅制訂其實係畀專營公司係自願咁樣遵從㗎，係喺 93 年嘅時候係做㗎，咁 98 年嘅時候先至正式係有呢啲指引嘅，自此之後，我哋有檢討過嗰個指引喇，亦都係修訂咗六次嘅，自從呢個 98 年以嚟，但講到話指引嘅係落實同埋係檢討喇，呢個係一個不斷進行嘅一個程序喇。咁講到話係制訂嘅指引同埋修訂個指引，我哋都係透過係同巴士營運商商討喇，亦都係透過我哋同職工會係開會商量喇，咁我哋就會係考慮晒所有持份者嘅意見嘅。

喺實施呢啲指引嘅時候，我哋需要專營巴士公司係做嗰個監察工作，亦都提供嗰個數據畀我哋嘅，運輸署本身亦都有聘請係獨立嘅承辦商幫我哋做一個獨立嘅調查，去查下睇下佢哋有冇遵從嘅。過去多年，我哋可以見到巴士公司遵從呢個指引嗰個比率都相當高㗎，我哋冇睇到佢哋係大幅咁樣偏離咗呢一個指引。所以從呢個營運嘅角度嚟到睇，我哋認為目前嗰個安排，即係話工作時間以及係駕駛時間，以及係休息同埋用膳時間，係用指引嘅形式嚟到定出係恆之有效㗎。咁如果係見到係持續不斷巴士公司係唔遵從嘅話，我哋就會採取跟進行動，包括就係發出呢一個警告信或者勸喻信，嚟到確保佢不遵從嘅情況可以儘早得以糾正，唔該。

MR DUNCAN：（經傳譯員）係咪咁講呢，就係部門根本冇諗過係要透過規例嚟到做呢？

陳美寶女士：（經傳譯員）根據現有嘅框架，呢啲指引係一個有效嘅工具，讓我哋可以監察巴士公司嘅表現，監察巴士公司點樣樣去調派車長去工作喇，呢啲指引講出咗係工作、休息同埋用膳時間有咩嘢要求，呢個係關乎車長嘅情況㗎。我哋亦都有同巴士公司講，亦都係同佢講，一定要畀足夠嘅休息設施係畀啲車長㗎，呢個係不斷咁喺度一直做緊嘅工作。落實嘅時候、施行嘅時候亦都係要實際嘅。我哋繼續指引而家係有效㗎，係我--當然，我哋亦都會睇埋呢樣嘢嚟到去評估專營公司係咪真係提供到個適當、有效率嘅服務。

MR DUNCAN：（經傳譯員）我咁講啱唔啱呢，是不是職工會都有投訴，就話巴士公司其實冇遵從到嗰個指引㗎，呢個都係職工會同埋職員同埋係職員方面--員工方面不時都有係投訴呢一點㗎，係嘛？

陳美寶女士：（經傳譯員）我哋知道喺某啲時候曾經有個別嘅投訴，不過我哋自己本身亦都係有獨立嘅調查，睇下巴士公司係咪真係有遵從我哋嘅指引㗎，我哋好盡力咁樣樣去用呢一個獨立嘅查核機制，我哋亦都預期或者期望巴士公司係會確保我哋呢啲要求佢哋係會遵從㗎。喺目前嚟講，喺個合理程度上，我哋都覺得係滿意嘅，我哋都覺得巴士公司就係認真咁樣去對待呢啲指引喇，亦都有係遵從有關嘅指引㗎。有遵從呢啲指引嚟到--喺佢哋嗰個調配工作嗰方面有遵從指引嘅。

MR DUNCAN：（經傳譯員）如果係做咗規例嘅話，你哋部門更有牙力去係執法，就唔係單單係靠指引喇，係咪？同唔同意？

陳美寶女士：（經傳譯員）根據我哋一直以嚟嘅經驗，我哋都覺得滿意嘅就係呢啲指引佢哋係有遵從，而且亦都一個制衡嘅機制嚟到確保我哋自己亦都有一個獨立嘅查核，如果某一個時候、某一次係有不遵從，我哋就會同巴士公司係跟進，問下佢點解有不遵從嘅個案，咁亦都會係採取適當嘅行動跟進。到而家嚟講，呢一個機制都係恆之有效㗎。

MR DUNCAN：（經傳譯員）唔係，個問題就係話規例就會讓你哋係更有力--更有牙力，就唔係淨係指引，問你同唔同意，唔係問你個指引係咪恆之有效，而係話如果用咗規例，就係讓運輸署就係有--更有牙力去執行呢一個要求喇，同唔同

意？

陳美寶女士：（經傳譯員）我諗呢一點係要整體咁去睇，亦都睇番嗰個法律框架，目前我哋運輸署嘅監察--我哋監察呢啲巴士公司，其實係沿自嗰個道路交通同埋公共巴士服務呢兩條條例底下畀我哋嘅法定權力，所以以整體嚟到去睇，呢一個就係我哋運輸署係點樣樣去履行我哋嘅職責，去扮演我哋嘅監察嘅角色，喺呢個階段，我唔會評論究竟某一個要求係咪應該薑喺規例更好，讓我哋更有牙力，因為我哋監察巴士公司嘅表現，我哋都係要睇番整個框架去做嘅，裏面有法定嘅要求喇、有專營權嘅條文喇同埋亦都有其他嘅指引喇同埋係通告㗎，都係我哋發出㗎。

MR DUNCAN：（經傳譯員）立法會就覺得應該係畀呢個權力你哋，咁但係你覺得冇需要運用呢個權力，因為你認為呢一個非正式嘅機制你覺得係恆之有效，係咪咁講？

陳美寶女士：（經傳譯員）我剛才講過，目前嗰個框架我哋就係用呢個框架嚟到去係執行呢個指引喇，咁同埋係請佢哋糾正喇，如果有問題，我就認為而家係恆之有效㗎。

MR DUNCAN：（經傳譯員）唔該。我哋未講職工會嘅關注之前，我就係想同你再跟進另一點，呢個就喺你哋嘅補充文件嗰度㗎，咁就係 TD-163 頁，請你哋將佢打出嚟喇。我想請你睇番呢一版嘅第一個項目，就係第十七，嗰度委員會問嘅問題就係話，如果呢一個黑盒或者車速紀錄儀嘅所需嘅係功能或者能力就係以書面係話咗畀專營權公司聽，咁可唔可以畀啲副本我哋睇喇，咁同埋你有冇修訂過佢嗰個功能？即係話由你一開頭要求佢哋去加裝呢一啲設施到而家，中間有冇修訂過嗰個要求？呢個就係委員會問你哋個問題，咁或者我哋睇番你哋嗰個回應，你就話部分就發出咗一個咁嘅文件㗎，咁就係話基本最低要求呢個係電子紀錄儀，新巴士嘅電子紀錄儀器，亦即係黑盒嘅最低嘅基本要求，咁你就畀咗營運商喇，咁就係附錄咗呢個附件喺度嘅，根據呢啲要求，咁驗車主任就會抽查佢哋嗰個功能㗎。

我哋知道就多年嚟就由於科技係有發展喇，咁而專營公司就已經主動咁樣樣去同呢個供應商去擴充嗰個黑盒保存嘅資料嘅範圍，嚟到讓佢哋就可以更好咁管理個車隊，包括就係車嗰個路線號碼、門鈴、開門、地點、係就係--地點等等嘅。我想請你睇呢個 TD-1597 頁。喺 1597 頁嗰度喇，咁你見到有封信嘅，咁呢個係運輸署發出去畀多間專營公司嘅一封信，呢封信係咪就係你所講嗰封信，就要求佢哋係要裝呢個黑盒呢？

陳美寶女士：（經傳譯員）係呀，呢個就最初係要求要有黑盒㗎，係。

MR DUNCAN：（經傳譯員）睇下你跟住嗰版。

主席：（經傳譯員）呢個就係 2003 年嘅 10 月 7(sic)號，係咪呀？

陳美寶女士：（經傳譯員）係。

MR DUNCAN：（經傳譯員）喺跟住嗰版就開列咗係呢一個電子數據紀錄裝置嘅基本最低要求，係嘛？

陳美寶女士：（經傳譯員）對唔住，你再問一次。

MR DUNCAN：（經傳譯員）係，喺跟住嗰版你就見到係列咗嗰個基本嘅最低要求出嚟，係嘛？

陳美寶女士：（經傳譯員）係。

MR DUNCAN：（經傳譯員）自 2003 年開始，科技一直發展喇，黑盒而家可以提供好多嘅資料㗎喇，2003 年當時可能未發展到提供到，你都知道嘅，咁運輸署有冇再發出進一步嘅指引去畀巴士公司，關於由黑盒度應該收納咩嘢嘅資料呢，考慮到科技嘅發展？

陳美寶女士：（經傳譯員）我同同事啱啱確認咗，由 2003 年之後，我哋係冇再就住呢個電子嘅數據紀錄儀係再發出指引。

MR DUNCAN：（經傳譯員）即係係要靠巴士公司自己去追上個科技喇？

陳美寶女士：（經傳譯員）的確咁多年嚟科技發展嘅，我哋而家係商量緊點樣可以加強黑盒嘅功能，我今朝睇到喇，就喺個工作小組嗰度而家討論緊，就係 2018 年 3 月開始工作嘅，呢個係其中一個喺佢哋工作範圍嘅一個要點嚟嘅，係我哋--係同巴士公司商討，過去咁多年我哋就冇再就發出呢個修訂嘅指引去加強黑盒嘅功能，但係我哋亦都會同巴士公司溝通喇，佢哋亦都願意去睇下有咩嘢方法去加強巴士上嘅裝置。

主席：（經傳譯員）即係話個答案係冇錯，的確過去十四年呢樣嘢係交畀巴士公司自己做喇？

陳美寶女士：（經傳譯員）正如我同事琴日睇到，呢十四年間我哋亦都有同巴士嘅製造商同埋巴士公司一直保持聯繫，佢哋亦都知道科技嘅發展嘅，各項儀器有咩嘢新嘅科技發展，我哋係的確冇發出任何嘅備考，就住呢一個嘅指引，咁但係唔等於我哋冇研究過呢方面嘅。

MR DUNCAN：Now I want to go, please, to some of the matters that --

主席：（經傳譯員）如果你而家唔再講黑盒呢。

MR DUNCAN：Yes.

主席：（經傳譯員）我想喺你講第二個範圍之前問呢個問題，或者你可以協助委員會嘅。運輸署知唔知道而家用緊嘅譬如黑盒--數據盒喇，咁係各個專營巴士公司用緊嘅係乜嘢呢？

陳美寶女士：（經傳譯員）唔好意思，係咪問我哋知唔知道...

主席：（經傳譯員）我問你知唔知道而家各間巴士公司用緊嘅所謂黑盒，佢嗰個能力係點樣嘅？

陳美寶女士：（經傳譯員）或者請我哋專家陳先生回答呢個問題嘅。

陳英傑先生：（經傳譯員）或者我好簡單講下喺黑盒而家用緊嘅功能係咩嘢。

主席：（經傳譯員）可唔可以回答，直接回答，答咗知或者唔知先，跟住你再畀你嘅專家意見喇，你知唔知道而家各間嘅專營巴士公司用緊嘅所講黑盒嘅儀器個功能係點樣嘅？

陳英傑先生：Yes.

主席：So the answer is yes?

陳英傑先生：Yes.

主席：Thank you. Please explain.

陳英傑先生：（經傳譯員）基本上，黑盒呢個儀器係可以監察車輛嘅移動，係每隔某一個時刻㗎，呢個 2003 年嗰陣時係--冇錯，係每一秒嘅方法去監察嘅。

主席：That was the 2003 requirement.

陳英傑先生：It's the 2003 requirement.

主席：Yes.

陳英傑先生：（經傳譯員）以前就係用一個即係非數碼嘅方式嘅，係一個製圖嘅方式，今時今日就係電子嘅方式㗎喇，就基本上係可以用唔同嘅方式使用番呢個數據嘅，我理解今時今日巴士公司除咗係紀錄之外，譬如話嗰個剎車喇、嗰個嘅車速或者嗰個門、門鐘咁等等，都係有紀錄㗎喇，咁然後可以使用番喺黑盒呢啲嘅數據去作為一個管理駕駛嘅工具去進行每日嘅監察嘅，呢個就係黑盒嘅基本功能。當然喇，亦都有其他嘅科技嘅發展，譬如係全球定位系統喇。

主席：（經傳譯員）但係呢個都唔係新嘅科技喇？

陳英傑先生：（經傳譯員）個科技本身未必係新。

主席：（經傳譯員）喺 1990 年，喺美國嘅時候已經係有啲--即係有啲媽媽都識得買啲全球定位系統儀器畀佢啲仔去海灣嗰度服役嗰時可以搵到方向。

陳英傑先生：（經傳譯員）嗰個科技本身未必係新，但係嗰個用嘅資料個方法就係唔同㗎喇，喺管理數據方面，而家管理層係可以用番嗰啲嘅數據可以監察番每日車輛嘅運作喇，同埋司機嘅操守、駕駛態度都可以每日去監察嘅，你可以話對於巴士嘅管理，呢個唔係新嘅科技喇，因為有唔同嘅運輸公司好耐以嚟都有用呢一個嘅技術，由於香港嚟講，正如我所講，或者正如委員會講，並唔係--即係唔係好似署長所講喇，我哋唔係就咁交畀巴士公司做嘅，多年嚟我哋都有去四圍睇下

有咩嘢新嘅科技嘅應用。黑盒係提供一啲好基本嘅數據，但係咁多年嚟，我哋亦都有同巴士公司溝通，請佢哋--即係話要利用數據--喺黑盒入面嘅數據去更好管理巴士嘅行走同埋車長個態度嘅。佢哋亦都有咁做，據我知道，有啲巴士公司最近其實都係將佢哋嘅系統同埋軟件升級，去更好利用黑盒數據資料。

主席：（經傳譯員）對於不同嘅巴士公司你有咁嘅要求，叫佢哋投放資源去用多啲新嘅技術，咁呢個係咪用書面提出㗎？

陳英傑先生：（經傳譯員）而家我回答唔到呢個問題，我可以返去睇下，但係肯定我哋有同佢哋成日開會傾，商討嘅。有時我哋嘅職員去個車廠睇番佢哋整體嚟講車輛嘅構造同埋維護喇，我哋亦都有提呢一類型嘅討論嘅。但係呢啲嘅討論或者要求有冇正式書面，咁我要返去睇下。

主席：（經傳譯員）無論係咪正式提出都好喇，有冇會議紀錄吖，有冇任何書信來往吖，可以去顯示咁多年嚟你哋溝通之間有提過，如果你搵到嘅話，首先你搵出嚟，就都畀啲副本畀我哋。

陳英傑先生： Sure.

陳美寶女士：（經傳譯員）我哋會儘量嘅。

主席：（經傳譯員）唔該。

MR DUNCAN：（經傳譯員）咁請你睇番行業工會嘅文件冊喇，第 185 頁。我諗我先要請你睇番第 147 頁，呢一份文件我哋係冇譯文嘅，但係我將會請委員會係調--研--去考慮一小段。呢份文件係 147 頁開始嘅，如果睇番第 145 頁，你就可以見到呢一個附隨嘅信件，呢個係巴士業職工盟交畀檢討委員會嘅書面意見。咁而家請你睇第 185 頁。而家睇番最屘嗰段，185 頁最屘嗰段。我有嘅翻譯嘅版本就係話呢段嘅內容係咁樣嘅「為咗要收到花紅，車長必須要係通過一個評核，而巴士公司成日用一個出勤表現作為畀唔畀花紅嘅因素喇，所以車長好多時候就算生病都會繼續帶病上班嘅」，你見唔見到嗰部分？

陳美寶女士：（經傳譯員）我仲搵緊有關嗰個段落。我搵到一個段落，但係嗰個表達嘅方式似乎就...

主席：（經傳譯員）或者你譯畀我哋聽吖。

MR DUNCAN：（經傳譯員）你可以睇下你同唔同意吖，我知道嘅版本係咁樣嘅，

陳美寶女士：（經傳譯員）你可唔可以讀你英文嘅譯文讀多次出嚟？

MR DUNCAN： I will read it to you again, yes. （經傳譯員）係，等我睇下係--「員工要收到年中獎金嘅話，必須要經過評核，巴士公司卻將出勤率作為其中一項評核指標去決定巴士員工能夠全數取得年中獎金，巴士員工往往為咗得到整筆嘅年中獎金便儘可以帶病都會上班」，即係話就算佢哋應該本來請病假，佢都繼續會去揸車嘅。

主席： That's bus captains do that?

MR DUNCAN：（經傳譯員）即係講緊係巴士嘅車長。可能你需要睇第 185 至 186 頁喇。

陳美寶女士：（經傳譯員）或者等我協助一下。

MR DUNCAN： Thank you.

陳美寶女士：（經傳譯員）你提到嗰個段落係關於新入職員工以合約方式聘請嘅，巴士公司會考慮佢哋出勤率作為其中一項評核指標是否續約，而員工往往為咗得到公司續約，就算係生病都係會繼續執勤嘅。即係話出勤率係作為考慮員工續約嘅因素，而工會覺得係不合理嘅。然後呢一段仲有第二部分嘅，就係話近年巴士公司設立年中獎金畀新入職員工，咁樣巴士公司就係有一個評核嘅制度嘅，先至--要通過先可以獲得個年中獎金，但係巴士公司亦都會將出勤率作出其中一個評核指標。即係其實係有兩部分嘅，呢個段落。

MR DUNCAN：（經傳譯員）我哋唔需要爭拗入面嘅內容喇，或者我咁樣問你，工會係咪曾經同運輸署反映過呢個問題㗎喇？

陳美寶女士：（經傳譯員）正如我所講喇，我哋都有睇過呢一封意見書，而最新職工會喺不同嘅場合亦都有提過呢個關注，所以我係知悉嘅。

MR DUNCAN： Yes.

陳美寶女士：（經傳譯員）不過至於話佢哋有冇正式咁樣 樣你向運輸署係有書面嘅意見或者係講過，我要返去查核嘅。

主席：（經傳譯員）但係佢哋已經係話咗畀運輸署聽有咁嘅情況個喎？

陳美寶女士：（經傳譯員）我都要再查一查。我自己係知嘅，我嘅同事亦都知嘅，因為呢個關注其實係職工會特別係喺大埔嘅意外之後都係有提出過嘅，不過我要返去再查下，再返嚟書面咁回覆你哋嘅。

主席：（經傳譯員）好，唔該晒。

MR DUNCAN：（經傳譯員）係，麻煩你。我呢度要問嘅就係，第一，佢哋有冇同部門講過；第二，如果有嘅話，咁究竟部門係採取一個乜嘢措施、咩嘢步驟去研究呢件事呢，麻煩你回應嘅時候跟番呢一點。

陳美寶女士：（經傳譯員）我哋係知道佢哋有咁嘅關注嘅，喺不同嘅場合，我哋知道嘅，媒體亦都有廣泛報導喇，呢個係喺大埔意外之後有咁嘅廣泛報導。不過至於話有冇正式咁樣樣係同部分溝通過呢，因為呢度講及係新近推出嘅年中獎金喇，同埋係講及呢個員工續約，新入職嘅員工續約嘅情況。咁呢個就係關乎埋佢哋嘅招聘事宜嘅。

主席：（經傳譯員）咁如果你係知嘅話，咁更--嗰個大啲嘅問題就係話，既然係知

喇，到而家為止做過啲咩嘢？

陳美寶女士：（經傳譯員）係呢幾個月，自從大埔意外之後，由於廣泛報導，咁所以我係知嘅，我要再睇睇究竟部門整體嚟講係有冇透過正式嘅渠道係知悉呢一個關注嘅。

MR DUNCAN：（經傳譯員）職工會亦都有另一樣嘢就係提過出嚟嘅，就係同一個文件冊嘅 311 頁。310 頁就係港九勞工社團聯會寫入嚟嘅。我想請你係睇最屘嘅一段，喺 311 頁嘅最屘嗰段。我亦都有一個英譯本喺度嘅，就有關嗰一段係有個英譯本我係將佢打出嚟嘅。

主席：（經傳譯員）可唔可以畀一份我哋嘅速記員？

MR DUNCAN：（經傳譯員）你慢慢睇咗先喇。

陳美寶女士：（經傳譯員）係。

MR DUNCAN：（經傳譯員）喺呢份意見書嘅呢一個部分，工會就講及廣告裏面嘅收入㗎，廣告收入㗎，咁就話要求政府就係要檢討嘅，呢個就係指嗰個非票務收入。呢樣嘢我想問下喇，工會係咪已經係同運輸署係提過呢？

陳美寶女士：（經傳譯員）我冇聽聞過。

MR DUNCAN：（經傳譯員）即係話你而家先係首次係知道有咁樣嘅意見，而佢哋就係將呢個意見交咗畀呢個委員會。

主席：（經傳譯員）可唔可以將佢係讀出嚟？邊一度係講話要求檢討？

MR DUNCAN：（經傳譯員）第 1 段嘅最後一句，「勞聯要求政府必須檢討非票務收入嘅規管，呢個係指巴士專營權政策裏面嘅呢個部分，以免係上述惡性循環，不斷重複」。

主席：（經傳譯員）好，唔該。所以你之前係唔知道佢哋有咁嘅要求，係嘛，陳小姐--陳女士？

陳美寶女士：（經傳譯員）係，啱㗎。

MR DUNCAN：（經傳譯員）再請你睇番另一個項目，係 71 頁。

陳美寶女士：（經傳譯員）對唔住，主席，除咗係講話我哋之前係唔知，我可唔可以亦都補充一下，講下我哋嘅睇法？

主席：（經傳譯員）當然可以喇，請你講吖。

陳美寶女士：（經傳譯員）根據佢哋嘅意見同埋佢哋提及就係公司對於係非票務收入嘅定義，我就想係紀錄在案，公司係要擬備佢哋嘅周年賬目同埋佢哋嘅報告，呢個都要跟番國際嘅標準同埋做法，而且佢哋亦都有內部嘅稽核喇，即係有我哋部門嘅內部稽核嘅。如果佢哋係提議票價要增加，咁我哋部門就會係檢討喇，另外

就係運房局裏面有關嘅小組亦都會去檢視嘅。如果佢哋想申請加價，我哋會睇埋佢哋嘅財務嘅情況喇，佢哋預計嘅收入同埋支出喇，以及係票務收入、非票務收入，兩者我哋都會考慮埋嘅。唔該。

MR DUNCAN：（經傳譯員）我而家想請你睇同一沓文件嘅第 67 頁。一封電郵，裏面就係嚟自月薪車長大聯盟所提交畀委員會嘅一份意見書，我就想請你睇呢個 72 頁，72 頁就係嗰個翻譯本，或者你想睇番個中文版，就係第 68 頁嘅。麻煩你睇一睇呢個第 3 段，個標題係「車長培訓」。

陳美寶女士：（經傳譯員）係喇，我已經睇咗喇。

MR DUNCAN：（經傳譯員）呢個關乎培訓嘅事宜嘅。我想問下喇，工會有冇時不時咁樣樣係同部門係提及呢一啲關注？

主席：（經傳譯員）對唔住，你可唔可以講得具體一啲？

MR DUNCAN：（經傳譯員）呢段裏面佢哋都係一個投訴嚟嘅，咁我想問喇，部門係知唔知悉佢哋有呢個咁嘅情況？

主席：（經傳譯員）起碼你話畀我聽，究竟你講嘅邊一樣係嗰個重點？

MR DUNCAN：（經傳譯員）當然可以喇，主席。我想喺嗰個譯本嗰度係引述，嗰度就咁講，「目前訓練就由一至兩名學員同埋導師組成，導師會同學員相處十七日，除咗教導學員正確嘅駕駛技術同埋態度，亦都會觀察學員嘅性格，可怕公司現行嘅制度無視相關嘅意見，其實九巴駕駛訓練學院嘅學生源源不絕，川流不息，無奈一年之後，剩下嘅寥寥可數。工作壓力大，包括精神壓力。招聘廣告與實際收入不相稱等都係流失嘅原因。」呢啲嘅指稱、指控，有冇係喺過去曾經已經同部門講咗呢？

主席：（經傳譯員）對唔住。

MR DUNCAN：（經傳譯員）我嘅問題係，呢啲嘅投訴有冇話過畀運輸署聽？即係過去。

陳美寶女士：（經傳譯員）我睇咗嗰個中文版，亦都睇咗個英文版，呢一段文字嘅開頭嗰度提及一個個案，有一個個案就係一個係新入職嘅應徵者喇，咁就係接受培訓同埋考咗牌，咁一個禮拜之後--入職一個禮拜就發生交通意外，而公司係為呢一個車長提供培訓，中文嗰度咁寫嘅，就話公司喺現有嘅制度底下係唔會考慮相關嘅意見㗎，嗰度話無視相關嘅意見，其實佢最初嘅時候就講，係話車長個培訓，但係呢一段文字嘅後面嘅部分其實就係講呢啲新入職嘅人士佢哋係工作一年喇，咁佢哋可能係要賠款嘅，喺呢一方面嚟講，呢一類嘅投訴關於嗰個具體嘅安排喇，呢個咁嘅投訴就冇喎，我哋冇收過咁嘅投訴，冇。

MR DUNCAN：（經傳譯員）講下第二部分喇，咁呢啲行業工會會唔會不時同你反映呢個意見呢，關於有咩嘢安全技術，又或者有乜嘢安全嘅條文可以引入規管巴士

呢，佢哋自己有冇就畀過意見你？

陳美寶女士：（經傳譯員）我要請同事去查一查先。或者請關女士回答吖。

關翠蘭女士：（經傳譯員）我哋過去兩年同工會聯絡，係好少提出咁嘅問題嘅，係講關於安全嘅儀器嘅，我記得佢哋曾經講過，喺擋風玻璃有除霧裝置，因為佢哋覺得春天嘅時候就好多霧，個情況嚴重喇，之後我哋亦都同佢哋僱主跟進，睇下有乜嘢解決方法。呢個係唯一一個關於安全嘅事項我記得係有傾過嘅。

MR DUNCAN：（經傳譯員）工會有冇不時提出，譬如係話嗰個嘅車鏡或者係擋風玻璃個除霧裝置？

主席：（經傳譯員）我諗佢頭先係講咗，係幾年之前曾經提過呢樣嘢，係咪？

關翠蘭女士：（經傳譯員）又或者兩、三年前，係嘅。

MR DUNCAN：（經傳譯員）顯示屏呢，同埋一啲警告嘅裝置呢，或者一啲嘅譬如倒後嘅感應器咁樣，工會有冇提過？

關翠蘭女士：（經傳譯員）對唔住，我自己就唔知喇。

MR DUNCAN：（經傳譯員）工會代表係咪喺你嘅工作小組都係有一個代表㗎，去睇下有冇咩嘢新嘅科技可以應用？

陳美寶女士：（經傳譯員）冇㗎，工作小組個重點係睇下有咩嘢嘅加強巴士運作嘅裝置喇，同埋培訓嘅框架，我哋同巴士公司同埋廠商商量，喺巴士公司角度而言，我哋預期佢哋會考慮番公司本身個情況，其他嘅持份者嘅意見，再畀番佢哋嘅回應我哋嘅。好似我頭先同事咁講喇，我哋同工會持續嘅溝通都係喺制訂嗰個工作時數指引嗰方面嘅發展嘅，喺咁嘅情況，我哋比較通常傾嘅就係工作環境，同埋佢個工作時數、薪酬等等，就唔係話好常見會去商量佢哋嘅合約條款、工資，因為呢個係個別公司個佢嘅僱員嘅安排。巴士公司係要根據《僱傭條例》去符合入面嘅僱傭嘅要求喇，亦都係制訂工作時間、合約條款咁樣。

主席：（經傳譯員）有冇咩嘢原因點解冇巴士工會嘅代表係喺你個工作小組呢，尤其是你考慮緊其中一樣嘢係培訓？

陳美寶女士：（經傳譯員）唔該，主席。工作小組個工作範疇就係本身係睇巴士嗰個安全裝置，同埋睇下有冇咩嘢方法增強或者監察培訓嘅架構。工作小組個職權範圍就唔包括引入新嘅培訓要求或者係單元要求公司跟從嘅，我哋做嘅就係對於現有嘅培訓嘅安排，我哋將佢達至一致性嘅。

主席：（經傳譯員）其中一個考慮嘅科技嘅裝置就係一個顯示車速屏嘅，喺巴士上面嘅，我嘅理解啱唔啱？呢一樣嘢係咪會--即係巴士司機本身都會有參與呢？

陳美寶女士：（經傳譯員）顯示個速度嘅顯示屏，其中一個工作小組考慮嘅儀器嚟嘅，但係我哋亦都明白巴士公司一個反應，就係話可能會令到巴士司機係更加大

壓力嘅，因為乘客都喺車上可以一直監察巴士司機點樣揸車，如果有個咁嘅建議，係會對職員係有影響嘅話，運輸署亦都好高興可以即係請職方參與去商量嘅。

主席：（經傳譯員）唔單只係話巴士公司話畀你聽佢哋車長可能覺得如果裝個車輛顯示屏會有咩嘢問題嘅話，你點解冇直接問下佢哋職方睇法呢，同工會見面呢？

陳美寶女士：（經傳譯員）我哋係樂意同佢哋見面嘅。

主席：（經傳譯員）鄧樂勤律師。

MR DUNCAN：（經傳譯員）咁喺你個工作小組有乜嘢持份者代表？

陳美寶女士：（經傳譯員）有巴士營運商喇，同埋巴士嘅製造商，亦都有車輛牌照及檢驗組喇、機電署喇去睇番科技或者技術嗰方面嘅問題喇，同埋道路安全同埋標準，呢個都係運輸署底下其中一組去睇番全港嘅道路安全。

主席：（經傳譯員）咁一方面你就係有運輸署、巴士公司同埋亦都有啲技術上嘅問題就係請巴士嘅製造商都參與嘅，我理解有冇錯？

陳美寶女士：Yes.

MR DUNCAN：咁運輸署有冇考慮過請埋工會嘅代表參與工作小組嘅呢？

陳美寶女士：（經傳譯員）而家嚟講就冇工會代表喺工作小組嗰度嘅，工作小組嘅職權範圍就係考慮下有可行嘅建議喇，睇下我哋一般嘅做法喇，如果係有啲有系統嘅諗法或者建議嘅話，我哋就會同持份者溝通㗎，就係包括職方、工會，我哋樂意咁做。

MR DUNCAN：（經傳譯員）即係你嘅答案係冇？

陳美寶女士：（經傳譯員）我哋冇考慮到--我哋考慮咗嘅，因為呢一刻工作小組先至啱啱喺度傾呢啲嘅儀器同埋培訓嘅初步諗法，咁而呢啲亦都係牽涉巴士車長嘅培訓嘅，到我哋有更加多細節嘅建議之後，我哋就會可以會見工會，同佢哋分享我哋嘅建議喇，呢個我都有諗過㗎。

主席：（經傳譯員）即係你而家諗下呢個階段就係唔牽涉工會先嘅？

陳美寶女士：（經傳譯員）冇錯㗎，喺最初草擬一個建議嘅階段。

MR DUNCAN：（經傳譯員）咁你有冇將呢個諗法同工會溝通過？

陳美寶女士：（經傳譯員）冇，因為呢一個工作小組係由我哋成立嘅，去考慮所有唔同嘅--由署方提出嘅建議、諗法，咁我哋就係等待制訂一啲更多細多嘅建議嘅，我哋有一個更加系統性嘅架構嘅時候，我哋就會諮詢有關持份者。

MR DUNCAN：（經傳譯員）而家想請你睇下第二個問題喇，都係工會提出嘅，喺工會嗰個文件冊第174頁。同樣喇，呢份文件都係呢部分冇譯到嘅。

主席：（經傳譯員）係咪就 174(sic)頁開始嗰份文件？

MR DUNCAN：（經傳譯員）的確係。呢個係巴士業職工盟嘅書面意見嘅，其實我會--其實睇番嗰個成個文件開頭，145 頁嘅，咁我都會繼續講番。而家想請你睇番 174 頁頁底，你可唔可以自己睇下先？

陳美寶女士：（經傳譯員）唔好意思，係咪頁底？

主席：（經傳譯員）第 2 段，174 頁，第 2 段。你會見到呢個 Alexander Dennis Enviro E500NG 系列。

陳美寶女士：（經傳譯員）我哋睇咗喇，呢段。

MR DUNCAN：（經傳譯員）呢段係咪解釋番畀委員會聽，如果係有尾軸轉向功能嘅話，巴士□起上嚟有個咩嘢危險，尤其是係 12.7 米長嘅巴士？

陳英傑先生：（經傳譯員）或者我嘗試回答呢個問題。我相信個問題就係最近就係引入 12.8 米巴士嘅，咁而嗰個轉向有啲司機就覺得轉彎嗰時係好難操控嘅。首先，任何喺香港引入嘅巴士都要符合所有嘅車輪構造及維修嘅規例嘅，而喺香港呢啲巴士，超過百分之九十九都係嚟自歐洲車廠㗎喇，都係要符合歐洲嘅標準。個問題係到底呢啲巴士喺香港係咪適用呢，呢個先係主要問題，喺我哋嘅系統當中，任何引入新巴士嘅時候，第一件事都係要經過一啲嘅程序嘅，個程序係咩嘢呢？除咗係睇車輛技術嘅問題之外，都要睇下呢個車輛喺道路上係咪適宜香港使用，符合咗技術要求之後，我哋見到嘅呢啲嘅巴士，佢係技術上係可行，係可以喺香港路上行走嘅，而我哋都留意到有啲司機就認為因為呢啲巴士比起現有嘅長，而家現有嘅都係 12 米，但係新引入嘅係 12.8 米，喺轉彎嘅時候，車輛控制方面--即係佢哋比較適應舊款嘅巴士嘅駕駛方法喇。

咁我哋就要求佢哋做幾樣嘢，第一，巴士公司要訓練佢哋嘅員工適應新嘅巴士，並唔係話架巴士本身危險，又或者只係係可唔可以係好好控制好架巴士啫；第二，如果呢架巴士比起大部分香港現行嘅巴士都長嘅話，喺使用新嘅巴士嘅時候，我哋又要睇下個路線喇，會派啲車行咩嘢路線喇，而家當我哋派 12.8 米嘅巴士行走路面嘅時候，係行某啲路線嘅，我哋要試過，要確保係可以安全咁樣行走先至會准巴士公司派呢啲車行嗰啲路線嘅。唔係所有巴士都係 12.8 米，有啲巴士公司都係用番 12 米嘅車，有啲甚至--可能係上山頂、上山嘅就用一啲巴士更加短，呢個係培訓問題同埋係恰當咁樣調派呢啲巴士行走某啲路線，並唔係話啲巴士本身係危險嘅，呢個係我嘅回應。

主席：（經傳譯員）你話百分之九十九係嚟自歐洲，亦都符合歐洲嘅標準，係嘛？

陳英傑先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）我想問，職工會有冇同運輸署提過呢件事呢？

陳美寶女士：（經傳譯員）有嘅，我哋知道嘅，亦都有睇過嘅。

陳英傑先生：（經傳譯員）其實工會有同運輸署講過㗎，咁因此我嗰個組別係有好仔細咁樣樣去睇過佢嗰個轉彎個弧度同埋轉彎個路線嗰個問題嘅。我哋有講過就話係巴士公司都要睇嘅，因為司機有投訴，佢哋就覺得就唔穩陣，即係咁長嘅一架新車，佢哋覺得就係揸得唔好，咁所以我哋就話巴士公司要做多啲培訓，咁而當我哋嗰部分，我哋做呢一個係類型評估嘅時候，只能夠批准佢做某一啲路線嗰度用嘅。

主席：（經傳譯員）或者最後一點，然後我哋就小休午飯。有長啲嘅巴士，當然有優點喇，咁其中係咪包括即係載客量係高啲，呢個係咪長身啲嘅巴士嘅一個原因呢？

陳英傑先生：（經傳譯員）嚴格嚟講，如果架巴士更長，咁可以安多啲座位，咁但係以呢一個型號嚟到計，呢個型號本身如果喺香港行走，都有一啲係好處，一啲優點嘅，除咗多幾個位，佢嗰個新嘅科技，同埋就係可以駕駛得更好。

主席：（經傳譯員）或者係午後我哋可以再講。

陳美寶女士：（經傳譯員）其實--譬如話係輪椅嘅乘客，坐輪椅嘅乘客，佢可以就係出入容易啲嘅，所以係呢一類嘅巴士係喺呢一方面係有所改善嘅，所以我哋喺評估巴士營運商嘅時候，呢一點我哋都睇埋嘅。

主席：（經傳譯員）好，我哋而家就係小休，就係兩點半再繼續嘅，唔該。

下午1時02分聆訊押後

下午2時30分恢復聆訊

出席人士如前。

主席：（經傳譯員）各位，午安。鄧樂勤大律師。

MR DUNCAN：（經傳譯員）唔該晒主席。陳女士，我相信你係想有啲補充嘅，係咪呀？關於話用呢啲比較大型嘅巴士嘅好處。

陳美寶女士：I have nothing to add.

MR DUNCAN：（經傳譯員）我諗陳先生，係，對唔住，係咪陳先生？

主席：（經傳譯員）係，你頭先啱啱講到話用呢啲大型啲嘅巴士係有好處嘅。

陳英傑先生：（經傳譯員）係，我諗我哋同事就係已經講咗㗎喇，就話大部啲嘅巴士就係可以有低地台，讓輪椅可以上嚟。

主席：（經傳譯員）換句話講，就係上落係容易啲，係咪呀？

陳英傑先生：（經傳譯員）係。

主席：（經傳譯員）唔該。

MR DUNCAN：（經傳譯員）我就係想問，琴日係黎先生問過佢，不過佢就係答唔到，我諗就係羅教授喺聆訊嘅時候有提過嘅，呢個就係講及係需要幾多司機，因為話有一啲叫做特別更，當時問嘅問題就係話有冇做過任何嘅研究，去睇下有冇影響，即係話如果呢個特別更十四個鐘呢一個上限係取消嘅話，對司機嘅數目有咩嘢影響，琴日就講過話需要多二百五十位司機嘅，黎先生就同我哋話，就話呢個研究就係部門進行嘅，我就想問下，唔知你係咪可以同我哋講一講就嗰個研究嘅結果係點？

陳美寶女士：（經傳譯員）係，我可以嘅。我哋就呢個工作時間嘅指引嘅檢討係喺 17 年嘅 9 月係開始檢討嘅，呢個係因為局方請我哋去做嘅，我哋就希望就睇下係咪有空間可以進一步改善係車長嘅工作嘅條件，特別係車長嘅工作時間，講到話要改善佢哋嘅工作情況，亦都睇番過往嘅改變同埋修訂。我哋就係比較全面咁樣去檢討過嗰個指引，我哋考慮咗佢哋嘅營運嘅要求，即係話專營巴士公司嘅營運要求，以及係乘客，以及公眾，係希望巴士嘅服務水平有所提升，另外車長亦都希望工作嘅情況，工會亦都係希望嗰個工作嘅條件有所改善嘅。

我哋做指引嘅時候，考慮咗數個因素嘅，其中係包括對人手嘅影響，即係話如果實施呢一啲指引對人手有咩嘢影響，我其實講過，其實嗰個出發點就希望改善車長嘅工作條例，特別就係希望將嗰個更次嘅時間縮短，同埋車長嘅駕駛時間係縮短嘅。

最新嘅修訂指引其實就係涉及我哋一個研究，研究一下係需要額外係增加幾多個車長嘅，大概就二百六十個，我哋就係喺我哋嘅文件夾或者意見書，5 號文件嗰度嘅。

我哋亦都研究過目前長嘅更次嘅工作時間係咪可以縮短，而家有一啲巴士公司係有一啲比較長嘅更次嘅，我哋嘅理解就係咁嘅，有一啲巴士營運商佢哋係有一啲長嘅更次時間嚟到去滿足呢個早上同埋係傍晚嘅繁忙時間，特別係一啲係路程比較長嘅路線，以及係會係跨越幾個地區嘅，譬如話由新界嗰度係去到港島呢一啲嘅路線。我哋睇過，睇下係咪可以將嗰個更次時間同埋駕駛時間係將佢縮短，呢啲就叫做係特別更次。我哋根據巴士公司畀我哋嘅資料，同埋亦都睇過嗰啲嘅數據，我哋手頭上係已經係從自己嘅調查嗰度收集咗一啲數據，呢啲就係上咗車上面就去收集嘅數據。

另外亦都係睇番車長嘅編制同埋實際嘅人手，我哋就分析過，究竟係對增加人手方面嘅影響有幾大，然後睇下呢啲嘅特別更次嘅係--最長嘅更次時間係咪可以進一步縮短嘅，或者係好概括性咁講，我哋可以話粗略嘅估計，對人手嘅影響，即係話將呢啲嘅特別更次嘅最高嘅時間就係會要增加一千六百名嘅司機，係

指係所有嘅專營巴士公司加埋一齊嘅。

我哋睇過呢啲因素，當然我哋亦都係要確保巴士嘅服務水平係令人滿意嘅，另外亦都要睇下巴士公司實際上係咪能夠招聘到額外嘅人手，好讓佢哋可以適時咁樣樣去落實有關嘅指引。我哋亦都好想，亦都向巴士公司係建議過，我哋不斷同佢哋開會，就話我哋希望佢哋可以有一個合理嘅時間嚟到全面落實嗰個指引。

我哋考慮過嗰個人手嘅影響、係咪可行以及嗰個時間，即係話全面引入呢個指引嗰個時間表，我哋最終就認為喺個修訂本嗰度，就特別更次係有一個特別嘅提述嘅，呢個特別更次最長嘅時間，我哋就話都依然係上限喺十四小時，但係呢啲做特別更次嘅車長佢嘅駕駛時間應該將佢減至係十小時，呢個十小時就係同一般正常更次嘅駕駛時間係一樣。

此外，我哋亦都有多一個要求嘅，就係要求巴士公司係提供一個休息時間，而呢個休息時間係要不少於三小時嘅，亦都喺嗰個更次裏面，呢個去確保車長可能係要調派到去揸啲咁樣嘅路線，而係要有特別更次嘅安排。都希望佢哋有一個足夠嘅休息時間，而嗰個駕駛時間，即係話佢坐埋個軚盤嗰度開車嗰個時間就係將佢減至十小時。

我哋係將嗰個研究同埋評估就係交咗畀運房局，亦都同運房局係傾過，討論過之後，亦都留意到係對各方面嘅影響，嗰個指引就最終定咗稿，亦都係頒布咗，係今年年初嘅時候頒布咗，係 2018 年嘅 2 月。唔該。

MR DUNCAN：（經傳譯員）對唔住，或者我再想講一講嗰啲數字，我恐怕我可能就係喺你嗰個陳述書嗰度就或者係有啲誤解嘅，我想請你澄清一下某一啲數字嘅。

陳美寶女士：（經傳譯員）好呀。

MR DUNCAN：（經傳譯員）目前，而家有幾多人係請咗係做車長嘅呢？即係所有嘅專營公司，所有加埋有幾多人係車長呢？

主席：（經傳譯員）等你係搵嗰頁出嚟嘅時候，係咪都答咗先，等我哋可以理解一下？

陳美寶女士：（經傳譯員）我想請大家睇嘅就係運輸署嘅文件夾嘅 5 號文件，第一個表，表 1，總數加埋係多過萬二。

主席：（經傳譯員）喺邊度搵到呢？喺邊一段？

陳美寶女士：（經傳譯員）第 9 段，第 9 段下面就有表 1，嗰度就係分別列出個別專營權巴士公司嘅車長嘅數目。

主席：Thank you.

陳美寶女士：（經傳譯員）嗰個總數，個別公司佢嘅車長嘅數目，如果將佢全部加埋，就係萬二。

MR DUNCAN：（經傳譯員）假設嗰個指引係落實，你哋嘅估計係點呢？即係話要增聘幾多嘅車長呢？

陳美寶女士：（經傳譯員）不如大家睇番呢個第7段，同一份文件嘅第7段。好粗略咁樣樣睇過，係營辦商佢粗略嘅係一個預測，就話總共係要二百五十位嘅車長，先至可以係全面落實嗰個指引嘅，我哋自己亦都係睇過呢個數字，我哋亦都比對我哋自己手頭上嘅資料，即係話睇番係車長嗰個編制同埋嗰個實際人手嘅數字，所以大概係要增加二百五十位車長。

MR DUNCAN：（經傳譯員）好，唔該。如果特別更次，特別更次喺嗰個指引嗰度嘅，如果係冇特別更次嘅話，對二百五十嗰個數字有咩影響呢？

陳美寶女士：（經傳譯員）就會增加，增加到要額外多一千六百位車長。

MR DUNCAN：（經傳譯員）即係話唔係二百五十，就變咗係一千六百，係咪呀？

陳美寶女士：（經傳譯員）係。換句話講，係編制嘅多於百分之十，即係所有公司加埋一齊。

MR DUNCAN：（經傳譯員）或者我哋自己都計到嘅，不過我諗你亦都可以好精簡咁樣樣係介紹一下，點解會個數字大增到係嗰個水平呢？

陳美寶女士：（經傳譯員）或者我係請我嘅副手佢就係好熟悉呢一個更次同埋人手嘅問題，等佢解釋，係讓你哋係好簡單、好直接咁樣去理解個問題。

MR DUNCAN：（經傳譯員）好，唔該晒。

李萃珍女士：（經傳譯員）我會儘量係簡單嘅。呢度講緊嗰個佢哋營運嘅時間好長，一早一晚亦都有一個繁忙時間，我哋唔畀司機就係咁長嘅更次嚟到係包括咗一早一晚嘅繁忙時間，即係話要有額外嘅司機先至可以做晒嗰兩節嘅繁忙時間，佢哋就要有短啲嘅時間，即係話六個鐘或者七個鐘，咁樣樣就冇效率嘅，即係換句話講，因為我哋要有照顧朝早嘅繁忙時間同埋傍晚嘅繁忙時間，與其係一個人做，就要分兩個人去做，計人頭，就唔係二百五十嘅兩倍，而係就係多啲人，因為每一個人做嘅更次時間係短啲，可能係六個鐘、七個鐘，甚至乎係五個鐘，所以就唔係二百五十乘二，我哋要更多嘅人手。

你可能會話一般司機係駕駛時間係十小時，但係如果係冇咗呢個特別嘅更次，呢個分開兩節嘅更次嘅話，咁樣就係有百分之十三嘅司機就係需要係將佢乘二，而每人就唔係十四個鐘，就係更短嘅時間，譬如係六個鐘，所以計數就係咁樣計嘅，所以就去到一千六百。我希望我就澄清咗嗰個計算方法。

主席：Thank you.

羅先生：I wonder if I can ask a question.

主席：Please do.

羅先生：（經傳譯員）喺特別更次有幾多司機，將嗰個數目乘二唔係就係答案喇咩？

李萃珍女士：（經傳譯員）唔得。

羅先生：How come it's not?

李萃珍女士：（經傳譯員）我要解釋一下，有一千二百個司機，呢個係個編制，即係去滿足每日個需求，就有九千個更份，但係人數要多啲，因為每人返工返六日，仲要放假等等。我可以話每日我哋需要九千個駕駛嘅更份，而當中大概一千二百個就係特別更次嚟嘅，即係百分之十三，大概百分之十三。所以呢個一千二百個更次，要將佢乘二，即係二千四百，但係咁又唔需要雙倍嘅，即係話大概一千六百個，我哋要用更次呢個概念去睇呢件事。

MR DUNCAN：（經傳譯員）特別更次係咪一個新措施嚟㗎？定或喺最近嘅修訂指引之前已經存在㗎喇？

陳美寶女士：（經傳譯員）特別更次係由個別嘅專營巴士公司去營運嘅，去處理一早一晚嘅高峰期，我哋就考慮下最高嘅工作嘅時數，無論係咪特別更次都好，可唔可以縮減。喺呢次修訂指引，我哋都藉機會去澄清我哋對於最大駕駛同埋工作時間，我哋嘅要求係點，喺咁嘅角度底下，我哋就加入咗喺指引入面一個要求，去清楚解釋呢一個特別更次嘅要求係乜嘢，而呢一個安排，我哋個要求係點呢？即係關於係最高嘅工作時數、駕駛時數同埋係休息時間。

MR DUNCAN：（經傳譯員）即係呢個指引之前就冇提到特別更次嘅？

陳美寶女士：（經傳譯員）冇錯。

MR DUNCAN：（經傳譯員）只係喺巴士公司營運期間係慢慢演變出嚟，係有演變過程嘅？

陳美寶女士：（經傳譯員）我哋都知道更重要嘅係喺同巴士公司商量嘅時候，同工會見面嘅時候，我哋都聽到有啲意見，有啲司機係被指派做特別更次嘅時候，呢啲司機亦都關注薪酬或者係實際上賺取嘅酬金係幾多嘅，尤其係做特別更次嘅同事，我哋一方面探討點樣可以縮減駕駛同埋工作時間，另外一個喺商討嘅時候提出嘅關注，就係職方有啲焦慮，會唔會係咁樣影響到佢哋收到巴士公司發畀佢哋嘅薪酬嘅減少，呢一個過程我哋都要處理呢啲問題嘅，呢個過程都不斷演變。

主席：（經傳譯員）呢一種關注係點樣表達出嚟呀？

陳美寶女士：（經傳譯員）即係話驚影響佢哋嘅薪酬，喺書面意見書入面同埋同佢哋見面，同運輸署都有提到嘅，因為由2017年10月至到2018年嘅2月，運輸署有同不同嘅工會會面，喺嗰段期間，我哋亦都有一系列嘅會面嘅。

主席：（經傳譯員）唔該。

MR DUNCAN：（經傳譯員）唔該晒陳女士。我而家想同你講第二個範圍，...

主席：（經傳譯員）你開始講之前，鄧樂勤大律師，應該律師想問嘅問題就係咁嘅，呢個做法係已經維持咗幾耐喇？

李萃珍女士：（經傳譯員）我諗呢個問題已經有十年、二十年㗎喇之前。

主席：（經傳譯員）即係一個係長久以嚟個做法都係咁？

陳美寶女士：（經傳譯員）係呀。

主席：（經傳譯員）係，大律師。

MR DUNCAN：（經傳譯員）而家請你睇下秘書處嘅文件第 2 冊第 664 頁，而家係咪睇緊呀？呢個係道路安全研究小組嘅文件，佢哋畀咗啲意見，就係關於係呢一個公共交通策略研究，簡稱英文 PTSS，係佢哋將呢個意見書交咗畀立法會嘅交通事務委員會嘅，似乎個日期就係 2015 年嘅，呢份文件。

陳美寶女士：（經傳譯員）係。

MR DUNCAN：（經傳譯員）係咪有公共交通策略研究 2015 年嘅時候？

陳美寶女士：（經傳譯員）係呀，係有一個策略研究，係 2015 年做嘅。

MR DUNCAN：（經傳譯員）運輸署有冇參與呢個研究？

陳美寶女士：（經傳譯員）係，由局方帶頭嘅，就有運輸署嘅協助。

MR DUNCAN：（經傳譯員）運輸署喺進行研究期間有冇留意到有呢份文件？

陳美寶女士：（經傳譯員）喺立法會一般嘅情況，一般嘅做法，呢一個係當係公聽會嘅團體嘅書面意見嚟嘅，亦都會邀請署方、局方去參與呢一個嘅會議，我哋就知悉呢一個係其中一個團體提交嘅書面意見。

MR DUNCAN：（經傳譯員）即係話部門都係知悉有呢一個書面意見嘅。

陳美寶女士：Yes.

MR DUNCAN：（經傳譯員）而家想請你睇下第 664 頁嘅標題第 2，即係話提升安全嘅機會同埋策略嘅，你可唔可以睇番第 2 點？入面提到國際標準，應該係話道路交通安全管理，呢度就咁講嘅，國際標準喺 2012 年有一個新嘅標準，係針對公共交通營運者同埋物流業嘅，呢個亦都係跟從國際標準其他品質保證系統，喺將來可以由道路安全嘅角度幫助建立一個更加負責任嘅交通嘅運作，我讀番呢一個嘅引言，就係話因為有新嘅做法，新嘅措施，公共交通策略研究係應該研究所有有機會--嘅機會可以提供--即係提升安全同埋服務質素嘅。喺 2015 年，呢份意見書提出之前，又或者喺你研究期間，運輸署有冇研究過引入呢一個國際標準呀？

陳美寶女士：（經傳譯員）我哋知悉道路安全研究小組提出嘅意見，尤其係喺採用呢一個嘅國際標準組織 39001 呢一個嘅標準，道路安全議會其實喺其他嘅--或者

呢個小組喺立法會喺其餘嘅時間都曾經向立法會提出嘅，其實喺尋日嘅口頭聽證會亦都有提出過呢一點，

我哋知道呢一個係關於道路交通安全管理嘅標準，喺 2012 年係最後定稿嘅，喺多番商量之後，喺 2012 年之後，有幾間嘅運輸公司同埋物流業就喺日本、韓國或者仲有一啲歐洲嘅國家都有採納呢個標準。我哋知道，對於呢個 ISO 39001 嘅標準，我哋保持開放態度，而家我哋亦都維持自己嘅道路交通安全系統。

正如我尋日解釋，我哋用一個通用嘅數據庫追蹤意外率，我哋去辨認出有冇一個模式或者係再制訂一啲補救措施或者防禦策略，呢個國際標準嘅 39001 號標準係一個更加複雜嘅、仔細嘅標準，關於道路交通安全管理嘅，係要考慮數據同埋係啲客觀嘅標準，呢方面我哋持開放態度，我哋唔會排除以咁嘅方式喺運輸署內係提高安全同埋呢個服務質素嘅，令我哋邁向國際化。

MR DUNCAN：（經傳譯員）當你話持開放態度，即係你唔係話贊成定反對嘅？

陳美寶女士：（經傳譯員）我哋唔係反對。

MR DUNCAN：（經傳譯員）咁你係咪支持？

陳美寶女士：（經傳譯員）我哋運輸署內已經有既定嘅道路交通安全管理系統，運輸署當然都會考慮現行嘅或者最新嘅標準去改善我哋嘅系統，又或者係採用英國標準去改善我哋嘅系統嘅，所以我話我哋歡迎任何措施可以改善我哋嘅系統，我哋亦都隨時可以研究一下，睇下我哋現行嘅系統可以點樣提升

MR DUNCAN：（經傳譯員）2012 年之後，運輸署有冇曾經考慮過呢個標準，睇下能唔能夠採納呢個標準之後係改善運輸署自己嘅系統嘅標準呢？

陳美寶女士：（經傳譯員）喺 2012 年發展同埋頒布呢個新嘅國際標準之後，我嘅理解，當時都係算係好新嘅一個標準，運輸同物流業都係考慮緊會唔會採用呢個新標準，所以 2012 年頒布標準之後，我哋所見都係一個新發展嘅一個系統同埋係一個新嘅--仲係好新嘅。呢一個道路安全研究小組，佢係就住公共運輸策略研究提出呢個意見，係 2015 年嘅，我哋自己係有個道路交通安全管理系統，我哋而家亦都係持開放態度，睇下可唔可以採納呢一個標準或者點樣可以改善我哋嘅系統嘅。

MR DUNCAN：（經傳譯員）據我理解，呢份文件唔會係話實際上運輸署去採納呢個國際標準，而相反，就係啲運輸公司，嗰啲營運者去採納呢個標準嘅。

陳美寶女士：（經傳譯員）冇錯。

MR DUNCAN：（經傳譯員）運輸署有冇採取任何嘅步驟去同巴士公司傾下，提出畀佢哋考慮呢？

陳美寶女士：（經傳譯員）我哋冇。呢個標準就係道路安全研究小組佢哋提出嚟，作

為整體嘅交通策略之一，係好全面、好成熟，亦都有唔同嘅建議同埋意見包含喺呢個意見書入面，我哋呢一刻就冇將呢一個國際標準轉介畀--同巴士公司商量嘅。

MR DUNCAN：（經傳譯員）我想睇第 778 頁，同一份文件冊，我哋都係睇緊道路安全研究小組嘅一封信，就係 2016 年 6 月 16 號嘅，似乎係回應緊一個公眾諮詢嘅活動，就係諮詢喺 2017 年九巴嘅專營權續期嘅事情嘅。

陳美寶女士：（經傳譯員）我知道嘅。

MR DUNCAN：（經傳譯員）毫無疑問，呢一封信同埋佢夾附嘅文件，我相信部門都係知悉嘅，係咪呀？喺嗰個嗰個諮詢嘅過程裏面。

陳美寶女士：（經傳譯員）係。

MR DUNCAN：（經傳譯員）我想請你睇一睇嗰封信，778 頁嗰封信，特別係第一同埋第二段，其實封信都只係有幾段嘅，呢度就話「回應上述嘅公眾諮詢，我哋就係喺 16 年嘅 4 月 18 號提交咗一份文件畀政府，我哋嘅意見就係集中係巴士營運要不斷咁樣係改善個安全，內容就係涉及就係一啲具體題目嘅安全管理系統。政府交咗畀立法會交通事件委員會嘅文件，就係叫做『政府文件』，係關於係九巴嘅巴士網絡嘅新專營權，即係話嗰度就只係得一段好短嘅文字，就係講安全，而且兩個好簡單嘅論點，一個就係話更緊密咁樣樣、去密切咁樣去監察係車長嘅駕駛行為，同埋就係改善巴士上面嘅安全措施，呢個顯然就係未能夠就係更廣泛咁樣去睇剛才所講嘅問題嘅，巴士安全係一個好重要嘅題目，所以我哋認為係有需要將原本嗰份文件直接交畀立法會嘅交通事務委員會參考嘅。」

佢所謂原本嘅文件，你可以睇番嘅，就 779 頁，一路就去到 783 頁嘅，我想麻煩你睇一睇 781 頁。你會見到嗰個標題就係巴士安全--道路安全管理制度嘅系統，呢度就係有提番係 ISO 39001 國際組織標準--國際標準組織 39001 嘅，呢度就話一個質素保證嘅系統就係鼓勵車隊嘅營運商就係更加問責同埋就係更主動咁樣去減少意外嘅出現同埋嗰啲風險減少嘅。

呢度就係有兩個建議嘅，就話根據新嘅專營權嘅要求，就應該鼓勵巴士公司係去採納一個更加先進嘅道路安全管理系統，而且應該就係更加靠近 ISO 39001 嘅，亦都話就政府應該同巴士公司一齊就去研究一下呢個巴士嘅意外同埋嗰個風險，更加詳細咁睇，希望有一啲係減少意外呢一啲嘅目標嘅。

我個問題就係話部門有冇採取呢啲步驟去鼓勵巴士公司去採納呢一個係 ISO 嘅標準呢？

陳美寶女士：（經傳譯員）呢份陳述書係其他嘅持份者係交畀立法會交通事務委員會嘅，當時就係要睇呢個九巴專營權續期嘅問題，當年要處理嗰個問題嘅，當時立法會嗰個焦點就係喺幾樣嘢嗰度嘅，或者大家都可以再睇番我哋嗰個交畀立法會嘅文件嘅，我哋亦都交咗畀委員會嘅，我可以叫我嘅同事等陣間啲番嗰份文件出嚟嘅，另外喺我哋交畀立法會嘅文件嗰度亦都提咗幾個關鍵嘅建議，即係話喺同

佢哋續期嘅時候有啲咩關鍵嘅論點。

呢一度係道路安全研究小組嘅陳述書，佢講到就係講到話要求就係我哋鼓勵巴士公司係採納一個更加先進嘅道路安全管理系統，係更加貼近呢個 ISO 39001。我哋冇好具體咁樣係叫巴士公司做呢樣嘢，但另一方面，多年嚟，巴士公司都係畀我哋要求係要有一個內在嘅監管制度嚟到去睇嗰個意外同埋係睇佢哋嗰個安全表現，一方面運輸署亦都有自己嘅安全管理系統嘅，我哋亦都獨立進行呢個分析嚟到係規劃、做同埋係達致目的，呢個都好似 ISO 39001 嘅。

39001 比對嚟講，對比呢個 9001 就係新一啲嘅。其實 9001 就係更加係闊嘅，即係對比起 39001，我哋就覺得佢係一個比較新嘅一個標準，所以我哋未有係特別係具體咁樣喺嗰個時候同巴士公司提呢一個標準。

MR DUNCAN：（經傳譯員）39001 呢個標準係同巴士公司做開嘅管理系統係點樣比較呢？邊一個係好一啲呢？

陳美寶女士：（經傳譯員）或者係請總工程師係講一講呢個 39001 有啲乜嘢特色。

MR DUNCAN：（經傳譯員）我諗我哋唔需要嘅，唔需要講好多細節嘅，唔需要講好多細節話個標準係包括啲乜嘢嘢，我哋好想知道兩者點樣比較，嗰個優劣喺邊度。

邱國鼎先生：（經傳譯員）主席，正如剛才署長講過，我諗我哋嗰個制度，我哋嘅系統，我哋嗰個安全管理系統都係做緊同一樣嘢嘅，我哋有一個規劃嘅程序，然後有一個監察嘅系統，跟住就係分析，我哋會監察同埋分析嗰啲意外嘅數字，然後就會作一個匯報，報告畀交通安全議會，亦都會係建議一啲措施嘅，譬如話立法同埋執法。

落實咗呢啲措施之後，我哋嗰個結果應該--或者成效應該會喺嗰啲數字嗰度反映出嚟，我哋會再次監察住個情況，再去睇下究竟現有嘅政策係咪--措施係咪需要再進一步檢討嘅。我諗嗰個係原則上大家嗰個管理制度係差唔多嘅，但係如果話要比較邊個係好啲，我諗就好難嘅，但係原則上運輸署作為一個政府當局，而我哋認為我哋嗰個安全管理系統都可以做到同樣嘅功效。

陳美寶女士：（經傳譯員）其實我哋畀咗文件畀立法會就講呢個專營權嘅續期，大家可以睇 1100，喺 TD-4 嗰個文件夾嘅 1100 頁嗰度，喺立法會當時嗰個討論係講好多點樣去改善嗰個服務，包括一啲輔助嘅設施，係畀乘客用嘅，以及就係去發放資料，以及係呢個票價嘅優惠咁樣嘅，亦都有其他同係嗰個利潤管制計劃有關嘅事宜。

MR DUNCAN：（經傳譯員）我想問，部門究竟有冇去比較過 39001 同埋你哋自己嗰個系統呢？

陳美寶女士：（經傳譯員）對唔住，講一次。

MR DUNCAN：（經傳譯員）你哋有冇比較過 ISO 39001 同埋係你哋自己已經係有嘅嗰套系統呢？

陳美寶女士：（經傳譯員）我哋仲未有係全面或者有系統咁樣樣進行呢一方面嘅檢討嘅，特別係我哋都提過 ISO 39001 相對嚟講都係比較新嘅，對比起--同埋就係比交通行業嚟講，就係比較一個新嘅標準，我哋仲未進行呢個檢討。

MR DUNCAN：（經傳譯員）不過係 2012 年嘅時候已經係引入咗個囉嗦？

陳美寶女士：（經傳譯員）係。我諗佢喺 2012 年頒布咗之後，其實係運輸、物流嗰個界別嗰個採納率係對比起 ISO 9001 嗰個佢哋採納嗰個比率就係比較慢嘅、低一啲嘅。或者邱先生都可以講一講嗰個係有幾多人係採納嗰個比率嘅。

邱國鼎先生：（經傳譯員）2012 年只不過係幾年之前，你可能覺得一個好長嘅時間，但係從管理個角度，幾年只係一個好短嘅時間，講番海外嘅經驗，其實呢一個系統只係營運者就係採納嘅，就算喺星加坡或者係英國，佢哋仲喺度研究緊嘅，佢哋都仲未係承諾話會係採用呢一個系統嘅。你可能話自從 2012 年到而家已經係一個好長嘅時間，但係從呢個政策個角度嚟到講，特別係以一個部門、一個政府當局係要係採用某一個系統嘅話，呢一個唔係一個長嘅時間，我哋仲要有多啲資料，亦都要睇下其他人嗰個經驗，我哋仲要去進行分析嘅。

MR DUNCAN：（經傳譯員）好，唔該。我可唔可以問一個問題呢？我就想問究竟部門有冇進行過比較呢？比較呢個 ISO 39001 同埋就係睇嚟你哋所見到巴士公司自己所採納咗管理系統，有冇進行過兩者之間嘅比較呢？

陳美寶女士：（經傳譯員）冇。

MR DUNCAN：（經傳譯員）你哋有冇打算做呢個比較呢？

陳美寶女士：（經傳譯員）改善嗰個交通安全系統，其實我哋係成日都想做呢啲嘅，我哋係樂意去做。

MR DUNCAN：（經傳譯員）咁你會唔會做？

陳美寶女士：（經傳譯員）我哋可以考慮嗰個係咪可以用呢一個方法嚟到去改善佢哋嘅管理系統嘅。

MR DUNCAN：（經傳譯員）或者咁，我想請你睇呢個 782 頁，呢個就係道路安全研究小組嘅陳述書，782 頁，其實嗰度有多個建議嘅，或者可以睇番嗰個標題，有呢個係巴士安全，以及係駕駛嘅水準，同埋亦都有嗰個建議咁樣樣。我就想問，呢一個道路安全研究小組所作嘅任何建議有冇係令你哋部門係進行呢方面嘅研究呢？

陳美寶女士：（經傳譯員）或者我請我嘅同事就睇一睇，然後就係畀一個係回應。

邱國鼎先生：（經傳譯員）好，主席。係呀，我哋係收到道路安全研究小組佢哋嘅意

見書，時不時都收到佢哋嘅意見書，佢哋係譬如話叫我哋喺某一啲地段、路段就係有一個低啲嘅車速嘅限制。

喺香港，我哋有一個比較簡單嘅三級嘅車速限制，如果係第一層嘅話，就係嗰個時速限制，係每小時 50 公里，就係市區同埋就係新市鎮嘅市區部分；另外就係去到係每小時 70 公里或者八十--至到 80 公里嘅，呢啲就係喺嗰個市區同埋新市鎮以外嘅地方嘅；最後就係最高層就係每小時係 100 公里嘅，呢個一般嚟講，就係畀一啲係高標準嘅快速公路嘅，喺香港，我哋最高嘅時速限制就係每小時 110 公里，呢個就只係喺北大嶼幹線嗰度先至有嘅。

我哋有一個咁樣嘅三級嘅制度，我哋其實做過一個檢討嘅，呢一個三級嘅車速限制，我哋搵咗顧問去做嗰個就係檢討。我哋知道呢一個都同海外嘅司法管轄區而嗰個安全紀錄良好嘅都係差唔多嘅，呢個三級嘅制度對駕駛人士嚟講係一個好簡單嘅制度，佢哋亦都係好容易熟悉嗰個有關嘅限制。

我哋講緊嘅速度限制就唔係話叫道路使用者唔需要理道路狀況，只係跟從嗰個車速限制就得，只係話呢個係最高嘅車速，任何時候，但係始終司機都要考慮番當時嘅路面情況。

主席：（經傳譯員）即係話車速限制唔代表你一定要揸到去限制嘅時速 50 公里嘅，只係話一個最高速嘅限制。

邱國鼎先生：（經傳譯員）某一個位置，譬如話一個彎位或者一個路段係有啲隱患需要減速嘅話，唔單只係淨係減速嘅，我哋仲有譬如話係預先有啲嘅道路標記或者係路牌通知司機「前方可能係一個彎位，有一啲嘅危險，你需要慢速嘅。」我哋提供充足嘅資訊，但係司機就有責任去確保係安全車速行駛嘅。

陳美寶女士：（經傳譯員）主席，我想補充，邱先生講嘅說話其實喺我哋文件第 10 號，運輸署嘅文件冊第 10 號第 12 至 17 段係有解釋到道路嘅車速限制嘅定義同埋我哋嗰個設計嘅，唔該晒。

主席：（經傳譯員）我記得我有睇過嘅，都係同一點，即係話嗰個車速限制就唔係話一定要揸到去最高嘅速限嘅。

MR DUNCAN：（經傳譯員）我想睇第 782 頁就係佢哋嘅建議，唔係講速度嗰方面，佢就話要喺呢個嘅專營權文件度加入呢個要求，要設立一個全面嘅標準，同埋利用安裝咗嘅黑盒去監察司機，要製造一個咁嘅系統，呢點係咪都係喺運輸署入面都較為關注㗎？

陳美寶女士：（經傳譯員）當然都考慮到黑盒嘅科技已經係由 2003 年之後都有相當嘅發展，黑盒以及有關嘅更新嘅科技同埋其他嘅儀器今朝都係有傾過嘅，喺黑盒方面有啲嘅基本要求，我哋有向專營公司發出嘅，而我哋嘅車輛牌照組亦都有留意黑盒嘅技術發展，亦都持續去同專營巴士公司同埋廠商研究，安裝黑盒點樣可以提升去加強安全，呢個就係其中一個我哋好關注嘅課題，喺我哋工作小組嗰個嘅工作範圍亦都包括咗嘅，佢哋亦都有商討呢件事嘅。

主席：（經傳譯員）但係結果冇修改過畀--即係喺 2004 年向巴士公司發出嘅基本黑盒嘅要求

陳美寶女士：Yet to be reflected, yes, Chairman, you are right.

主席：（經傳譯員）譬如話冇包括全球定位系統，只係要求量度個速度。

陳美寶女士：（經傳譯員）呢個只係基本嘅最低嘅要求。

MR DUNCAN：（經傳譯員）睇下第 783 頁，道路安全研究小組就都有研究過巴士嘅安全、巴士隊伍，呢個小組嘅建議就係話九巴一路係有投資更新佢嗰個巴士隊伍，現代化，亦都同意而家啲巴士係舒適同埋設計好好嘅，但係仍然有啲安全嘅隱患嘅，有啲風險，跟住就有幾點就係呢啲安全嘅風險，喺 2016 年做呢一個諮詢嘅時候，運輸署會唔會同意道路安全研究小組呢一個嘅觀察呢？即係佢列出嚟嘅呢啲所謂安全風險呢？

陳美寶女士：（經傳譯員）我會話同意嘅，因為呢個其實係一個持續嘅過程嚟嘅，我哋一路都有要求巴士公司喺準備遠期計劃嘅時候要包含呢啲元素，有啲改善嘅措施嘅，但係我哋要同營運者商討，譬如建議佢哋加裝某啲設施，同埋喺佢哋遠期計劃入面要包括一個加裝嘅計劃嘅。有啲例子，譬如係話雙層嘅--喺樓梯嗰度要裝雙層嘅扶手，喺上層嘅擋風玻璃要有一個橫向護欄，另外係喺上層嘅擋風玻璃要用強化玻璃。我哋被悉道路安全研究小組嘅建議，不過一路我哋都係喺--同我哋嘅道路安全標準小組都係好好嘅合作夥伴嚟嘅，我哋亦都有採納佢哋好多嘅建議，當我哋同巴士營運商開會嘅時候都有呢啲議題，傾下喺車輛內點樣加強車輛嘅安全。

MR DUNCAN：（經傳譯員）你話喺議題係--喺個議程係咪即係話而家先係一個議程？

陳美寶女士：（經傳譯員）唔係，一直都有嘅。

MR DUNCAN：（經傳譯員）小組就建議呢啲嘢應該係加入去專營權文件嗰度嘅，但係你就係話係好似一啲開會嘅過程咁樣？

陳美寶女士：（經傳譯員）你可以睇番過去嘅遠期計劃，又或者我哋都有發出一啲要求，係增強安全嘅措施，亦都有巴士公司寫信回覆，承諾佢哋會加裝譬如話安全帶等等嘅，加強安全嘅，所以到我哋同佢哋商討係成熟嘅時候，可以應用嘅時候，我哋就會發一個清單，就係有一啲嘅提升服務嘅事項，畀佢哋加裝或者安裝嗰啲儀器，當中亦都係包括我哋嘅信件入面提出要求，巴士營運商要做乜嘢，等佢哋喺嚟緊嘅遠期計劃入面要加設一啲嘅加裝計劃嘅。

MR DUNCAN：（經傳譯員）而家暫時完成呢份文件。

主席：（經傳譯員）喺講完呢份文件之前，我想請你協助我，呢個道路安全研究小組嘅成員係乜人呀？

陳美寶女士：Tony has the information.

邱國鼎先生：（經傳譯員）係一位鄺先生，據我所知，係幾個成員嘅啫，主席，就係呢位鄺先生，Julian Kwong。

主席：One member?

邱國鼎先生：I know he has his friends. Maybe -- to my information, it's only a few members, and the founder is Mr Julian Kwong.

主席：（經傳譯員）成立咗幾耐呢？

邱國鼎先生：（經傳譯員）係唔夠--應該唔夠十年嘅。

主席：（經傳譯員）立法會之前有冇--係咪過去幾年都有收到呢一個嘅小組嘅文件呢？

邱國鼎先生：（經傳譯員）就係鄺子憲先生做主席嘅。

主席：（經傳譯員）係咩嘢時間呢？

邱國鼎先生：（經傳譯員）據我印象，都係近幾年，當我哋喺交通事務委員會提供--即係商討關於道路安全嘅時候，呢個小組都有提交意見書，我自己都有做過啲研究嘅。

主席：（經傳譯員）我想知道個時間性嘅問題，第一次係幾時提交一啲建議，大概？

陳美寶女士：（經傳譯員）主席嘅問題係呢一個道路安全研究小組係有幾多年嚟都有提交意見書畀立法會嘅事務委員會？

主席：Yes.

陳美寶女士：This is the question.

邱國鼎先生：（經傳譯員）我冇資料。

陳美寶女士：Do you need us to do some --

主席：（經傳譯員）或者你可以書面回覆番我哋。

陳美寶女士：（經傳譯員）可以。

主席：Thank you very much.

MR DUNCAN：（經傳譯員）陳女士，你可唔可以評價一下呢個道路安全研究小組個評價係點樣呀？

陳美寶女士：（經傳譯員）我唔可以畀評語。

MR DUNCAN：（經傳譯員）運輸署嚟講，運輸署有冇尊重呢一個機構嘅意見呀？

陳美寶女士：（經傳譯員）我哋對於佢個聲譽或者佢個地位係有乜評語嘅，不過作為持份者，佢哋會提交書面意見畀立法會嘅，我哋亦都考慮所有呢啲嘅意見，包括呢一個小組嘅。

主席：（經傳譯員）或者起碼你可以咁樣講，視乎佢哋嘅書面意見似乎都係好似係一啲深思熟慮嘅建議嘅，無論你同唔同意佢建議都好。

陳美寶女士：（經傳譯員）佢哋對於道路安全係好有興趣，亦都有係多次係提出一啲嘅建議。

主席：（經傳譯員）無論你同唔同意佢哋建議都好，似乎係做足資料搜集嘅，似乎佢哋係充分知悉一個議題嘅。

陳美寶女士：（經傳譯員）我呢一方面冇特別嘅意見。

主席：（經傳譯員）你微笑一下，冇其他喇。

陳美寶女士：（經傳譯員）任何團體、機構喺立法會聽證會提交書面意見，我哋都會考慮嘅。

主席：（經傳譯員）鄧樂勤大律師，你係繼續講第二個範圍，唔該。

MR DUNCAN：（經傳譯員）委員會都知悉係有啲最新嘅措施，係因應深水埗喺 2017 年 9 月嘅意外之後就有嘅，就係譬如修訂咗個指引，同埋喺大埔嘅交通意外，2 月發嘅交通意外之後，亦都有一啲嘅嘅建議嘅，由巴士公司你索取更多資料、成立咗工作小組等等，我哋理解最近又有新嘅事情，運輸署考慮緊嘅，除咗新措施之外，咁樣講公唔公道呢？喺 2012 年之後一路至到深水埗嗰個慘劇，運輸署喺解決安全嘅問題其實冇重大改變，喺嗰段期間冇重大嘅改變，咁樣嘅講法你覺得公唔公道？

陳美寶女士：（經傳譯員）喺整體道路安全管理監察方面，我想強調我哋有既定嘅系統，由意外嘅數據庫係分析數據同埋採取一啲更正補救嘅措施，我想畀幾個例子，就係我哋利用過採集數據之後，做獨立分析，向道路安全議會提交我哋分析嘅結果。其實咁多年嚟係有一啲嘅嘅建議，都係同道路安全議會商議之後，係因為監察咗有啲嘅數據，其中 2015 年 6 月關於公共小巴係發放一個嘅牌--小巴司機牌照之前。

主席：（經傳譯員）你再講多一次。

陳美寶女士：（經傳譯員）係入職前嘅課程，係為公共小巴司機攞正式牌照而設嘅，喺 2014 年...

主席：（經傳譯員）我唔係好明白，呢個叫入職前嘅課程係咩嘢意思呢？

陳美寶女士：（經傳譯員）即係話學員要先上一個入職前課程，就算考完駕駛測試之

後，公共小巴司機都要上呢個入職前嘅課程，先至會獲發正式牌照嘅。

主席：（經傳譯員）即係話佢哋可以正式揸車出路面之前就要上呢一個嘅課程嘅？

陳美寶女士：Yes.

MR DUNCAN：（經傳譯員）唔好意思，可能我冇解釋清楚我嘅問題，因為我其實唔係想講公共小巴嘅牌照嘅，唔係同呢個嘅聽證會有關嘅。其實想問嘅，就係話你係咪可以比較一下嗰個系統或者制度，你係咪想比較呢個小巴嗰個制度？其實 2012 至到 2017 基本上期間都冇咩嘢重大嘅改變嘅，係咪呀？我咁講啱唔啱呢，公唔公道呢？

陳美寶女士：（經傳譯員）呢個系統我哋一早係設立咗，我哋會好嚴謹咁樣去規管、監管同埋監察佢哋嗰個表現嘅，喺呢個系統底下，我哋不時會分析個別巴士公司佢嗰個安全嘅數據，而且亦都會發出要求畀巴士公司，要求佢就係加強嗰個安全嘅，所以呢個係我哋嘅制度嘅一個部分，個制度有喺度嘅，系統有喺度嘅，亦都係健全嘅，所以我哋就係有做嗰個規管嘅工作。

另外就講番嗰個整體嘅道路安全管理系統，亦都係既定㗎喇，我哋就會做監察，就會做呢一個跟進嘅，有時可能係需要修訂法例，嚟到係處理--係喺意外發現咗一啲問題，要去處理嘅。

主席：（經傳譯員）2015 年 6 月個情況你講咗，有冇其他嗰啲你想講呢？

陳美寶女士：（經傳譯員）都有其他嘅改例嘅，譬如話 2014 年，有要求就係公共小巴就係就有一個電子紀錄嘅。

主席：（經傳譯員）乜嘢紀錄呀？

陳美寶女士：（經傳譯員）佢哋要有一個電子紀錄儀器，即係黑盒，黑盒。

主席：（經傳譯員）呢個指示係咪書面嘅要求嚟㗎？

陳美寶女士：（經傳譯員）呢個係法例嘅修訂。

主席：（經傳譯員）係，好。可唔可以講番畀我哋聽有關嗰個資料喺邊度可以搵到呢？

陳美寶女士：（經傳譯員）係，我哋會睇番嘅，應該喺《道路交通條例》底下。

主席：（經傳譯員）陣間話畀我哋聽。喺嗰個運房局嘅文件夾嗰度會有嗰個條例嘅，稍後你哋同事可以話畀我哋聽嘅，而家搵咗，然後之後話畀我哋聽。2014 年，係咪？

陳美寶女士：（經傳譯員）係。另外就係話喺發出正式牌照之前要有一個入職前嘅課程嘅，呢個亦都係法例嘅要求嘅，我哋亦都會搵番相關嘅文件畀大家睇。喺 2013(sic)年，我哋亦都有嗰個因為要處理呢個醉酒駕駛，我哋有嗰個呼氣測

試嗰方面嘅修訂法例。

主席：（經傳譯員）係所有車輛類別嘅所有司機都係受佢嘅管轄嘅，係咪？

陳美寶女士：（經傳譯員）係。其實個名單都好長嘅，即係我查過㗎喇，就係由 2010 年開始，不過我唔想講晒咁多出嚟。

主席：（經傳譯員）係，鄧律師。

MR DUNCAN：（經傳譯員）係，不如咁喇，我哋只係講公共巴士。

主席：（經傳譯員）專營巴士？

MR DUNCAN：（經傳譯員）係專營公共巴士，我哋淨係睇專營公共巴士，你剛才所講嘅，我嘅理解咁啱唔啱？2012 年至到 2017 年期間，你就話你嗰個制度好健全㗎嘛，你嗰個監管、監察嘅制度，一直嗰幾年都係用你所講嘅一個好健全嘅制度嘅，係咪呀？

陳美寶女士：（經傳譯員）係。12 至到 17 年間，除咗係立法方面有修訂之外--法例有修訂之外，其實亦都有一啲措施去改善嗰個道路嘅設計、路面嘅標誌或者道路嘅標記，另外我哋亦都有一個黑點方面嘅調查工作，我哋去分析係嗰啲意外嘅數據，就睇下有啲乜嘢補救或者係防範嘅措施嚟到去提升嗰個道路安全嘅水平。

MR DUNCAN：（經傳譯員）我想問，直到去嗰個深水埗交通意外，直到嗰陣時為止，當時有冇係同你哋嘅海外嘅對口部門係討論過，就話有啲乜嘢嘅安全管理制度、安全管理嘅系統佢哋係要求佢哋自己嘅公共巴士公司去建立、制訂咁嘅呢？

陳美寶女士：（經傳譯員）根據同事記憶所及，冇同對口嘅海外嘅巴士監管者喺呢方面有討論過。

MR DUNCAN：（經傳譯員）嗰兩宗悲劇發生之後，慘劇發生之後有冇做過呢？即係最近一宗同埋之前嗰宗，你哋有冇同海外嘅規管當局就係問下佢哋喺安全嘅管理嗰方面有啲咩嘢做過呢？

陳美寶女士：（經傳譯員）我唔記得我哋有特別就同海外嘅規管當局或者巴士規管當局就係傾過嘅，不過係我哋睇嗰個工作時間指引嘅時候，我哋係有研究過海外係有啲乜嘢嘅要求嘅，其中包括睇咗星加坡、英國、美國、奧大利亞同埋係歐盟嘅國家嘅。

講到呢個時間--工作時間嘅指引，我哋睇過一啲好重要嘅因素，譬如話睇下佢哋當地嘅營運者點樣營運，亦都睇下佢嘅工會有啲乜嘢要求、要求點樣改善法。我哋自己亦都有睇過海外嘅經驗，嚟到去睇下我哋同人哋比較，係點樣樣。

MR DUNCAN：（經傳譯員）係幾時做？

陳美寶女士：（經傳譯員）17 年嘅 9 月至到 18 年嘅 3 月，我哋就係檢討嗰個工作時間嘅指引，而後嚟就係有嗰個修訂。

MR DUNCAN：（經傳譯員）即係只係講及工作時間，係咪呀？

陳美寶女士：（經傳譯員）係。

MR DUNCAN：（經傳譯員）你知道呢個道路安全研究小組都有向呢一個委員會就係提交意見書嘅，你有冇睇過？

陳美寶女士：（經傳譯員）你指邊一個？可唔可以再講一次？

MR DUNCAN：（經傳譯員）道路安全研究小組...

主席：（經傳譯員）或者將佢再打番出嚟

MR DUNCAN: Yes.

主席：（經傳譯員）喺邊度？

MR DUNCAN：（經傳譯員）TU-25。

陳美寶女士：（經傳譯員）有，我有睇過。

MR DUNCAN：（經傳譯員）我當然謹記主席所提醒，就係話呢個係其中一個睇法，每一個人都可以有自己嘅睇法，我亦都想知道你嘅睇法，然後委員會就會諗下邊一個就係一個比較實際可行嘅做法。當然我哋或者會都聽下道路安全研究小組佢嘅講法，聽下你嘅回應。我就想問你呢個問題，你睇咗呢份文件，我就想問下，呢份文件裏面有冇任何一個主意、一個概念對運輸署嚟講都係一個好嘅睇法，而運輸署都應該認真去考慮嘅呢？

陳美寶女士：（經傳譯員）我睇咗呢份意見書，我哋係--你哋交嗰個文件夾畀我哋嘅時候，我哋都有睇到嘅，我睇就係為咗要準備呢一個聽證會，所以我就去睇過嘅，就唔係話好認真、好詳細咁樣逐個去睇佢哋意見書裏面個別嘅建議，所以就唔能夠話係作出一個知情嘅回應嘅。

不過一般咁嚟講，任何一個團體，譬如話好似道路安全研究小組，特別係呢一個團體就過往都有交意見畀我哋嘅，我哋一定就會去睇，我哋嘅同事亦都會去留意，然後日後我哋同巴士公司同埋巴士製造廠喺嗰個工作小組嘅層面都會去睇嘅。

我有睇過嘅，不過我冇足夠嘅時間去逐點、逐點咁樣去睇，所以而家唔能夠作一個係充分嘅、詳細嘅回應嘅，如果係逐個建議去睇嘅話。

MR DUNCAN：（經傳譯員）當然，我明白。我就係或者係想你睇一睇呢份文件嗰個總結，然後就請你就係去作一個初步嘅回應，因為你話你冇時間去充分咁去考慮，或者係之後，亦都可以畀一個係比較詳細嘅回應，咁樣你覺得可以嘛？

陳美寶女士：（經傳譯員）我傾向就唔喺呢個階段係回應佢哋嘅建議。其實呢個意見書，佢哋係交畀呢個委員會，我哋覺得都可以作為好似畀我哋嘅建議咁樣，我哋

可以帶返去去睇下嘅，但係我恐怕就未可以喺呢個時候返去再寫一份書面嘅回應，我哋係認真咁對待佢哋嘅建議嘅，我哋亦都要喺部門裏面係跟番既有嘅程序，去睇下佢每一項建議究竟係咪可行嘅。其實一般嚟講，任何有用嘅建議，我哋都持開放嘅態度，我哋都會去睇嘅，但係如果叫我哋匆匆忙忙咁樣樣去交一個初步嘅回應，咁樣去問我哋嘅話，就未必係好公道嘅，如果係喺今日呢一個聽證會嘅咁嘅場合。

MR DUNCAN：（經傳譯員）我就想問，你願唔願意係書面係回應呢？因為我都唔想對你唔公道。

主席：（經傳譯員）我諗其實佢已經講咗話唔好，唔會咁樣做。

MR DUNCAN：（經傳譯員）佢話唔會？

主席：（經傳譯員）唔會。

MR DUNCAN：（經傳譯員）我諗你剛才嘅意思係話你唔想我今日喺呢一方面問你問題，係咪呀？

陳美寶女士：（經傳譯員）不如等我再重組一下我嗰個答案，我哋係留意到呢一個道路安全研究小組交畀委員會嘅意見書，我做今次嘅準備工作嘅時候，我亦都有睇過，不過我唔想係而家向委員會交一個書面嘅分析或者係講一講究竟呢一個研究小組佢個別嘅建議究竟我哋嘅回應係點，因為我哋要走過嗰個既定嘅程序嘅，不過我可以向委員會係確保，我睇過佢哋呢一份嘅意見書，我會將佢視為係一啲意見、一啲建議，而部門係會認真咁去考慮嘅。我哋會喺我哋自己內部嗰度就去睇，特別係有嗰個工作小組亦都會係認真去睇嘅。我哋亦都會再進一步係會同道路安全研究小組係傾，就會係希望聽取佢哋進一步嘅意見。

MR DUNCAN：（經傳譯員）等我睇下我嘅理解啱唔啱，第一，你今日唔想就呢一方面係佢哋嘅提議就回應我嘅問題，係咪呀？即係道路安全研究小組嘅建議，我今日問問題，你唔願意回答，係咪呀？

陳美寶女士：（經傳譯員）我可以嘗試去回答，但係唔應該被視為係部門深思熟慮係諗清楚係個別嘅建議是否可行嘅一個回應，因為喺呢一方面，我哋未有作咁嘅準備

MR DUNCAN：Okay.

陳美寶女士：（經傳譯員）但我哋願意係協助委員會，我哋可以係初步咁樣作一個回應嘅，如果咁樣做可以係幫助到檢討委員會。

主席：（經傳譯員）係，佢可以隨時話畀我聽有邊一部分佢係答--唔答到嘅。

MR DUNCAN：（經傳譯員）即係你唔想提交嗰個書面嘅陳詞，據主席嘅講法，即係你寧願係--係咪即係話會返去再仔細研究呢？

陳美寶女士：Correct.

主席：（經傳譯員）經過政府既定嘅程序？

陳美寶女士：（經傳譯員）冇錯。

MR DUNCAN：（經傳譯員）我而家帶你睇番一啲部分，都應該大家關注嘅，首先27頁撮要，第5段，佢嘅觀察，就係話關於巴士嘅安全風險係要考慮個嚴重程度同埋個情景，然後有唔同嘅情景，下面就講，譬如係話乘客失平衡，同埋係同行人或者係踩單嘅人士相撞，呢個都係可以潛在嘅、好嚴重嘅風險，譬如話係追尾嘅撞車，或者係對頭撞車，或者係撞到路邊嘅物件，因為常見同埋潛在係嚴重嘅，另外就係翻側都係不常見，但係可以係潛在非常之即係災難性嘅。邊一方面係特別關注呢？

陳美寶女士：（經傳譯員）我會覺得咁樣去形容大家尤其關注嘅意外都係好公道嘅，尤其是頭先提到嘅一啲情況，的確喺我哋嘅獨立數據分析都有提到，同埋喺我哋監管專營公司佢哋喺遠期計劃提供嘅分析亦都係一樣嘅。

MR DUNCAN：（經傳譯員）係咪亦都係類似呢？

陳美寶女士：（經傳譯員）呢啲係一啲大家都關注嘅事項嘅。

MR DUNCAN：（經傳譯員）跟住嗰段，就話過去咁多年曾經係引入唔同嘅措施去改善巴士安全，但係唔透徹理解問題所在嘅話，係好難獲得好大嘅改善，而而家呢個情況會繼續嘅，你同唔同意咁講呀？

主席：（經傳譯員）或者你唔可以回應到，因為佢講得咁概括。

陳美寶女士：（經傳譯員）冇錯，主席講得啱。

MR DUNCAN：（經傳譯員）揭去跟住嗰頁，我請你睇番建議，呢個安全系統嘅方法應該係採納呢個方法，即係話包括車輛、道路、人性嘅因素同埋管理，仲要有一啲主動嘅措施去防止有撞車同埋一啲被動嘅措施就係要減低受傷嘅程度，大家一樣重要嘅，短期方面有啲主動嘅措施，譬如係根據一啲運作上嘅標準，同埋係監察系統係可以儘快實施嘅。喺某啲道路--某啲地點係譬如冇安全撞欄嘅、會有嚴重翻側嘅風險，譬如話山頂道、淺水灣道、大潭道係非常之高嘅風險，呢啲短期措施必須要儘快實施。

中至長期，啲被動啲嘅措施，啲減低撞車帶嚟嘅後果都--嚴重性都係好重要嘅。呢個主要就係有兩方面，我讀番呢一段，就係--冇錯喇，中至長期，有啲被動嘅措施要減低撞車帶嚟嘅嚴重後果，呢啲好重要嘅，可以有兩方面去做，譬如話係巴士設計同埋道路設計。你可能都會話呢個係好概括嘅一個評語。講到安全欄或者防撞欄，喺某啲地點，譬如頭先講嘅，你覺唔覺得都值得關注嘅事呢？

陳美寶女士：（經傳譯員）順帶一提，因為某啲喺香港島嘅地方係彎位多，我哋持續都係關注個道路安全嘅，過去我哋會睇番嗰個地點個道路情況，同埋會考慮各個

因素，睇下採用啲乜嘢嘅補救或者防禦措施嘅。

同時，我亦都想同委員會匯報，運輸署同路政署其實係有做一個嘅顧問研究，就係睇下喺香港嘅道路網絡入面係邊一度嘅路邊行人係會有啲安--即係嘅風險，去用一個更加主動嘅方式去查出路面嘅隱患嘅，亦都考慮到海外嘅技術，呢一個研究其實喺 5 月中會開始，會持續三十個月嘅。

MR DUNCAN：（經傳譯員）你話會發出一個研究，即係係咪一份文件？

陳美寶女士：（經傳譯員）一個顧問研究。

MR DUNCAN：（經傳譯員）可唔可以提交畀委員會？

陳美寶女士：（經傳譯員）可以。

MR DUNCAN：（經傳譯員）係咪會回應呢啲好窄嘅山路入面冇安全防撞欄呢個問題呢？

陳美寶女士：（經傳譯員）我唔可以透露任何商業嘅資料，不過我同事提醒我呢個道路安全研究小組其實係個顧問佢會做呢個研究。

MR DUNCAN：（經傳譯員）我諗委員會都希望會聽到好簡單嘅個研究內容嘅。

陳美寶女士：（經傳譯員）可以研究範圍或者研究目的都可以嘅。

主席：（經傳譯員）唔該。

MR DUNCAN：（經傳譯員）跟住就有一個標題，就係運作嘅準則同埋係監察系統嘅，第 29 頁，頂部提到有兩種嘅準則，一種就係一般嘅，就係講述一般嘅情景，譬如係喺繁忙嘅市區街道嘅車速問題，有啲係關乎路線嘅，某一啲，譬如係好窄嘅山路冇防撞欄嘅安全風險，而家有冇咁樣嘅準則㗎？

陳美寶女士：（經傳譯員）我唔知道。

MR DUNCAN：（經傳譯員）你覺得點？你覺得係咪一個好嘅主意？

陳美寶女士：（經傳譯員）我諗佢哋提出咗係用一個更加有系統嘅方法去回應呢啲嘅關注嘅，呢個準則就係譬如話處理喺某啲路段係好窄嘅山路，冇防撞欄，我覺得呢個亦都係要先喺地理上找出邊一啲地方係有咁樣嘅情況，再制訂安全嘅措施，作為一個基礎畀我哋進一步考慮要唔要實施一啲措施或者一啲準則去解決一啲特定嘅安全嘅風險嘅情景。我可以初步講嘅，對呢件事嘅觀察就係咁。

MR DUNCAN：（經傳譯員）跟住就講話國際標準 ISO，我唔繼續講喇。然後就到巴士設計，有幾個安全嘅措施，佢哋建議應該優先採用嘅，呢啲措施運輸署個睇法又係點呢？

陳美寶女士：（經傳譯員）或者我可以請陳先生回應嘅。我有某啲我都有認知，但係我諗等陳先生畀一個更加整體嘅、好簡單嘅回應。

陳英傑先生：（經傳譯員）我嘗試簡單地講，譬如話巴士前方更安全呢一點，其實所有雙層巴士而家喺香港運作嘅，都係跟從歐洲嘅標準嘅，正如我頭先提過，...

主席：（經傳譯員）百分之九十九都係嚟自歐洲。

陳英傑先生：（經傳譯員）冇錯，而專營巴士用嘅巴士車身亦都係符合譬如話英國、美國、星加坡嘅。雙層巴士都係個趨勢都係用鋁鋼身嘅，呢個係近年嘅全球趨勢。用嘅物料係強韌啲，即係起碼都係用鋁。

我可以解釋下，如果用比起鋁更加強硬嘅物料，喺音意外嘅時候未必係最好嘅，可能會導致到第二種嘅意外嘅。今日用嘅巴士車身嘅材料已經係國際標準㗎喇，但係至於巴士前方更安全方面，近年嚟我哋都有啲措施，譬如話前座嘅座位喺擋風玻璃前面嘅係有安全帶，令乘客唔易拋出車外，而巴士公司都要加強車前面嘅嗰個構造，令到佢可以支持到嗰個安全帶同個座椅嘅。

主席：（經傳譯員）即係意思話佢本身嗰個支架唔係咁夠力嘅？

陳英傑先生：（經傳譯員）因為最初舊嘅巴士唔諗住要裝安全帶嘅，只係諗住係有座位，但係你要加強個繫固，呢個係巴士前方嗰度要做㗎喇。喺呢方面，今日大家坐巴士前方，扣安全帶嘅就好安全㗎喇。我要唔要討論埋其他嘅要點吖？

主席：Please.

MR DUNCAN：（經傳譯員）可以嘅。

陳英傑先生：（經傳譯員）安全帶方面，我哋喺技術小組有討論過係咪所有嘅巴士座椅都要加裝安全帶。

主席：（經傳譯員）係新嘅巴士？

陳英傑先生：On new buses。（經傳譯員）我都提過，因為加裝嗰方面唔係就咁話係裝一張凳、加個安全帶。

主席：（經傳譯員）我哋理解嘅。

陳英傑先生：（經傳譯員）所以呢段係話巴士嘅內裝有咩嘢隱患要處理呢？呢個係我諗如果巴士設計得好，唔應該係有一啲尖凸嘅邊、物件會令人撞到。呢一個我哋都好小心去睇。

主席：（經傳譯員）我諗有一點可能對我哋更有幫助嘅，或者你可以睇下，佢話以下嘅安全嘅措施都可以考慮嘅，譬如係IAS、ESP。

陳英傑先生：（經傳譯員）IAS就係呢個智能嘅速度控制或者調適，就咁睇，我都唔係好知道嗰個功能係乜嘢嘅，但係如果你係講緊話舊嘅方法，譬如話係將速度計同全球定位系統同埋個路面嘅地圖係一個整合嘅，提供司機--即係監察司機嘅情況，同埋係提供數據嘅話，...

主席：（經傳譯員）據我理解係咁樣。

陳英傑先生：（經傳譯員）如果係咁嘅意思，設計嗰個系統係有呢個功能嘅話，喺技術小組，我哋都有傾過嘅，現時都仲係商討緊嘅，因為有一啲技術同埋管理方嘅考慮--即係有啲問題要處理。

主席：（經傳譯員）乜嘢係技術問題？

陳英傑先生：（經傳譯員）正如我頭先提到或者尋日提過，融合呢一個車速限速器、全球定位系統去提供嗰架車輛嘅準確位置，然後再同地圖比對，我諗因為整體嚟講，全球定位系統喺香港嘅操作環境唔係咁準確。

主席：（經傳譯員）個問題係咩嘢呢？

陳英傑先生：（經傳譯員）因為高樓大廈、四周嘅環境，可能有啲路段，譬如你喺中環嘅話，兩邊都有高樓大廈，得好少嘅露天範圍。

主席：（經傳譯員）但係佢係可以收到衛星嘅訊號，如果係話有大廈喺度就會收唔到訊號？咁有冇做過研究呢？

陳英傑先生：（經傳譯員）我哋同巴士公司研究緊，同埋嗰啲系統嘅供應商，睇下有冇啲有效啲嘅系統我哋可以採用嘅，所以喺呢一刻，工作小組唔會排除應用呢一個科技，仍然都係討論緊嘅。

陳美寶女士：（經傳譯員）呢個係一個好智能嘅方法嚟到去控制嗰個時速，亦都將佢就係同路上嗰個地理環境就配對嘅。我哋有講過呢一個系統嘅好處，不過亦都要確保喺香港本地嘅環境係真係行得通，我哋冇將佢排除，我哋好盡力咁去睇下究竟係中期或者唔係太遠嘅將來可以係做到，我哋都想去進行呢個試驗嘅。講到嗰個電子穩定控制系統，我哋就話喺新嘅巴士嗰度已經即時係做㗎喇，至於話自動緊急剎車系統，我哋都喺度考慮緊嘅。

主席：Thank you.

MR DUNCAN：（經傳譯員）好，麻煩你揭去第 55 頁，講番話呢一個智能嘅車速適應系統，或者我哋可以睇番嘅，倫敦佢哋係做緊嘅，呢個都係你哋嗰個對口部門嘅，係咪呀？

陳美寶女士：（經傳譯員）我就想講我個人作為呢一個署長，我自己本人未有機會係同海外嘅對口當局就係接觸或者係探訪過佢哋，不過我哋嘅部門嘅同事過往有去探訪過倫敦、美國，佢哋就係因應就係運輸署其他職責範圍--包括其他職責範圍，有同佢哋係交流過嘅。我哋會係儘量係搵機會同佢--就我哋嘅職責範圍，就係去交流嘅。

MR DUNCAN：（經傳譯員）關乎安全嘅問題？

陳美寶女士：（經傳譯員）我嘅副手係去過倫敦嘅。

李萃珍女士：（經傳譯員）係呀，譬如話我有去過倫敦同埋星加坡係同當局嘅--當地嘅運輸署就交流嘅，但係就嗰個重點有些少唔同，我哋就更多就係睇嗰個實時巴士到站嘅資訊，以及係其他嘅新嘅科技，係讓乘客係得到更多嘅資訊，我哋當時係睇嗰啲多過就係巴士安全。

主席：（經傳譯員）不過我諗你會知道就係倫敦嘅巴士規管當局係有試驗過呢個 IAS 呢個智能車速調適系統嘅，係咪呀？

陳美寶女士：（經傳譯員）係，其實就我啲同事就幫我喺度係睇緊--就草擬緊一個行程，讓我去海外參觀係交流嘅，不過我哋仲未落實嘅，因為而家仲有好多其他嘅事就係要優先處理咗。

MR DUNCAN：（經傳譯員）係，好，第 29 頁就係講到呢個道路嘅設計，呢度就係話巴士嘅設計、道路嘅設計，呢度講道路嘅設計同埋係交通嘅管理都係對巴士嘅安全係起關鍵嘅作用。

陳美寶女士：（經傳譯員）你講係第 2 段？

MR DUNCAN：（經傳譯員）第 3。第 29 頁嘅第 3 個部分。

陳美寶女士：（經傳譯員）道路設計，呢啲關乎係道路嘅設計同埋交通管理，呢個都係我哋常規嘅道路安全議會嗰個議程嗰度都會睇嘅，我哋就會跟進，我哋亦都想有一啲防範嘅工作，我哋會睇嗰個道路嘅設計，亦都會睇嗰個防撞欄，亦都會拉闊嗰啲彎位等等嘅。

講到話呢個防撞欄，安全嘅防撞欄，呢個我哋亦都採納咗--即係因應就係大埔嘅巴士意外之後有咁樣做嘅。至於話巴士站附近嗰個係提供一啲安全嘅過馬路嘅設施，我哋不時都係睇嘅，我哋經常都會落區嗰度去睇，亦都同區議會係交流嘅，我哋會因應有新嘅發展，去睇下要唔要有巴士站，係巴士嘅彎位等等，咁去睇下係咪需要有合適嘅行人過路設施嚟到係保障行人嘅安全。

MR DUNCAN：（經傳譯員）你有提過，就係剛才提過話道路安全議會嘅議程，咁究竟係乜嘢嘢呢？

陳美寶女士：（經傳譯員）你講個審核，其實我哋道路安全監管同埋分析，就係我哋同道路安全議會一直有咁做嘅。或者我唔應該用「審計」或者「審核」呢樣，因為我諗用呢個字都要比較小心嘅。呢個係我哋嘅道路安全嘅監察系統。

MR DUNCAN：（經傳譯員）我要問嘅問題嘅後面嘅部分，已經去到尾聲㗎喇，或者委員會係有問題要問你嘅，我自己要問嘅係咁多。

陳美寶女士：（經傳譯員）感謝你，資深大律師，感謝你協助我同埋我嘅團隊係回答你嘅問題。

委員會的提問

羅先生：（經傳譯員）我係有啲問題想問，就係想作澄清嘅，就係你琴晚交上嚟嘅，就係關乎嗰啲統計數字，不如你揭去呢個第 91 頁，我諗係九巴或者係城巴，係咪呀？

主席：（經傳譯員）我想問，有冇編到頁碼？我諗羅教授就係講番佢自己內部嗰個頁碼，但係整體，即係跟番我哋嗰個文件嘅頁碼又點樣樣呢？

MR DUNCAN： Yes, it has now.

主席： Where do we find it?

MR DUNCAN：（經傳譯員）TD-1。

羅先生： Yes, starting at page 182.

MR DUNCAN：（經傳譯員）176 打後。

主席：（經傳譯員）咁佢已經入咗我哋嗰個文件夾，係咪呀？

陳美寶女士：（經傳譯員）哦，呢個係關乎係呢個遠期計劃巴士安全嗰個章節，係九巴嘅。

羅先生：（經傳譯員）係，好，呢度嘅數字，譬如話下面嗰幅圖就係講係意外之前究竟係當更咗幾耐嘅，呢度睇下，超過十個鐘嘅，佢嗰個涉及意外率係最低嘅，不過我哋亦都要睇番嗰個數字，即係譬如話得好少司機係揸超過十個鐘，當然嗰個比率就係低，所以喺呢方面嘅數字應該係搞清楚啲，讓我哋可以知道嗰個因果。

另外，你亦都有--上面嗰個圖表，就話佢喺公司服務咗幾多年，你有呢個零至到一年，可能純粹係更多嘅司機係屬於呢個類別，所以嗰個比率就高啲，我諗就係要公道嘅，同埋讓我哋就係更好咁樣去知道背後嗰個成因。我就想問你，你可唔可以就將呢啲表就係再做過？讓我哋知道究竟嗰個風險係幾多，就唔好純粹係去咁樣樣分類。當然我知道呢啲數據係嚟自九巴嘅，運輸署可唔可以做番嗰個表，又或者九巴可唔可以做呢？

主席：（經傳譯員）如果係九巴嘅文件，不如我哋係請九巴話畀我哋聽係咪可以係將佢係修正下呢？

陳美寶女士：（經傳譯員）係，我都同意主席嘅講法。

羅先生：（經傳譯員）係，好。我想問運輸署嘅，就係講日後嘅報告，就希望你哋日後唔好用呢一種咁樣樣嘅形式。

陳美寶女士：（經傳譯員）呢個係我哋一直都要求佢要經常提交呢一啲數字嘅，呢啲係巴士公司自己做嘅分析。你剛才嘅建議，我哋一定會謹記嘅，我哋會睇下嗰個意外分析嘅數據係如何可以係編寫得更好，更精確咁樣樣係將嗰個情況反映番出

嚟。

歐陽先生：（經傳譯員）多謝主席。我有一個未必係問題，係一個要求，呢個係關乎係鄧大律師係較早時候提及嘅嗰個報告，係 29 頁，係呢一個道路安全研究小組嗰個報告嘅第 29 頁，講到道路嘅設計，我哋知道有更多嘅新巴士嗰個設計都係比以前嘅尺寸為大嘅，講到道路嘅設計，其實有冇話鑑於有呢啲新嘅巴士，就會係擴闊啲道路，你可唔可以之後書面回覆下我哋，畀啲例子我哋知道即係睇下運輸署會唔會因應呢啲新嘅巴士，而你哋就係擴闊啲路呢？因為新嘅巴士有啲長到係 12.8 米嘅。

陳美寶女士：（經傳譯員）擴闊路面唔係單單係為咗就係符合呢一啲新嘅車身嘅長度嘅標準嘅，不過我哋可以返去搵一搵嘅，譬如話有時有啲倔頭路。

主席：The turning circle.

陳美寶女士：（經傳譯員）我諗我要解釋一下，即係話嗰個譬如話巴士或者其他車輛佢哋點樣樣喺倔頭路嗰度轉彎，我哋要確保巴士如果佢係 12.8 米咁長嘅話，譬如話佢喺附近嗰度嘅巴士站，特別係一啲新發展區、新嘅住宅發展區，如果佢哋係有一啲倔頭路，無論係巴士或者其他車輛，我哋都要確保係有足夠嘅空間畀佢哋去駕駛嘅。

歐陽先生：（經傳譯員）如果得嘅話，亦都係睇埋新界地方，因為照我哋所知，新界就係嗰個道路嘅設計係有所不同嘅，所以我好想知道我哋如何去可以就係讓呢啲巴士就係可以喺嗰度行駛嘅。

陳美寶女士：（經傳譯員）好，唔該。

主席：（經傳譯員）有一、兩樣嘢我就想同你跟進一下嘅，因為你有呢個係九巴嘅文件，嗰度就係佢哋嘅遠期計劃嘅，我諗仲係喺你面前嘅，係咪呀？就係九巴佢哋自己嘅內部嘅頁碼就係 96 頁，就講及係巴士車長嘅培訓同埋監察，當然呢一份係九巴嘅文件，不過我都假設運輸署都應該睇得明佢哋講緊乜嘢嘢嘅，當佢哋交份文件畀你嘅時候。呢一頁嘅最屘嗰兩行，乜嘢叫做「實時駕駛指標」？呢啲全部都喺所有嘅巴士嗰度安裝咗，就可以係讓巴士司機係可以就係引用係佢哋嗰個環保安全駕駛訓練學番嚟嘅駕駛技術用得著。

陳美寶女士：（經傳譯員）我哋同九巴係傾過，亦都係喺九巴嘅董事會嗰度開會，佢哋有時都會同我哋講佢哋有啲咩嘢新嘅監察設備，嚟到就係加強或者改善車長嗰個駕駛嘅技術或者行為嘅，佢哋亦都有時睇到，佢哋可能就係有陣時好大力咁樣去踩嗰個 brake 嘅，我哋知道呢一方面就係話首先就係睇下，有冇一啲司機就係揸某一條路線嘅時候成日會咁樣做嘅，然後就會係安裝咗一啲駕駛提示器，提醒呢啲車長要佢改善駕駛嘅技術，喺嗰一條路線應該用乜嘢駕駛技術，或者九巴可以更加好咁樣解釋呢一個儀器嘅功能，點樣可以幫助司機改善佢嘅態度。

主席：（經傳譯員）你提到就係話可能喺個儀器度有一個閃燈，然後就開咗個電子紀錄儀器，睇下會唔會有啲急剎嘅情況嘅，或者係急劇減速嘅情況嘅？

陳美寶女士：（經傳譯員）係。

主席：（經傳譯員）都係九巴文件，8.4.2 段嘅，第 98 頁，呢個講法係咁嘅，對於新入職車長嘅工作，會安排佢哋揸一啲容易啲嘅路線，你知唔知九巴係有冇指明邊啲路線係容易，有邊啲係難呢？

陳美寶女士：（經傳譯員）有啲比較複雜嘅路線係有咁嘅形容嘅，如果冇指明係複雜路線嘅話，就可以當成係容易嘅路線，好多時候佢哋提到係複雜嘅路線。

主席：（經傳譯員）即係佢哋有個系統決定路線嘅難度嘅，某一條路或者某一段路嘅難度？

陳美寶女士：（經傳譯員）因為據我理解，有啲路線可能包括更多彎位，或者要停多啲站嘅，更多客嘅，要上落更多嘅客嘅，就唔會話好直接嘅揸一條好短嘅路線，有啲可能係停好多個站，又會包括唔同區域，有啲路線就亦都會經過一啲嘅交通黑點、意外黑點嘅。

主席：（經傳譯員）第 99 頁，8.5.7 段，呢句係咁講嘅，就話做咗一個調查，有四十四架巴士係所有嘅座位都係安裝咗一啲三點繫固嘅安全帶，已經喺 2017 年 4 月底嘅時候，然後亦都會做一個調查去評估一下喺巴士上已經安裝咗所有座位都有安全帶嘅使用率嘅，你知唔知道有咁樣嘅調查？

陳美寶女士：（經傳譯員）我哋知道九巴係自己有做呢一個調查，佢哋想調查一下使用率係點，但係我哋就唔知道調查嘅結果，我哋未知。

主席：（經傳譯員）你哋係咪預期對方會通知你？

陳美寶女士：（經傳譯員）係，因為喺董事局嘅會議有提到。我哋預期九巴會向我哋匯報安全帶嘅使用率情況，如果佢唔匯報，我哋都會一定追問。

主席：（經傳譯員）好。最後一件事，喺運輸署 1 號嘅文件冊第 8 號文件，睇番技術嘅度，第 21 段，第 102 頁，就係有一個嘅車速顯示屏，呢方面，我想問嘅就係技術上係可以安裝嘅，呢個係第 22 段，就話巴士嘅廠商就畀咗意見話技術上係可行嘅，但係 22 段較後就有個咁嘅意見，巴士公司關注用咗呢個車速顯示屏係會增加車長同埋乘客之間嘅磨擦同埋拗撬，亦都會令到車長有更大壓力嘅，可能影響巴士嘅安全駕駛，巴士公司認為呢一個嘅車速顯示屏對於加強巴士嘅安全係冇幫助。

我咁樣理解啱唔啱呢？呢啲嘅顯示屏喺公共小巴都已經用咗一段時間，係咪呀？

陳美寶女士：Yes.

主席：（經傳譯員）可唔可以解釋畀我聽幾時喺公共小巴度安裝？

陳美寶女士：（經傳譯員）幾年，我哋想講得準備啲，不過係幾年。呢個裝置係安裝

喺公共小巴上面，原因係之前有個關注小巴超速嘅問題，呢件事其實喺交通諮詢委員會都有討論過，喺工作小組工作範圍都有包括呢一方面嘅，要同巴士嘅製造商、巴士公司再商討下安裝車速顯示屏嘅可行性。我哋 22 段咁寫其實就係而家討論嘅狀態。

主席：（經傳譯員）我哋明嘅，因為而家係個討論只係牽涉三方，即係話巴士嘅營運商、你哋同埋巴士嘅製造商，佢哋考慮技術上嘅可行性。

陳美寶女士：（經傳譯員）另外仲有巴士公司嘅回應，車長覺得安裝呢個儀器會令佢哋更大壓力，呢個係好敏感嘅地方，我哋要小心考慮，或者要同車長嗰啲工會組織去睇下佢哋嘅意見係點樣先。

主席：（經傳譯員）你會唔會咁樣做？

陳美寶女士：（經傳譯員）我哋會。

主席：（經傳譯員）你係咪都會諮詢公眾，睇下公眾認為係咪作為乘客，佢哋認為係咪一個好主意呢？因為佢哋作為乘客，佢哋嘅命都係車長控制。

陳美寶女士：（經傳譯員）我哋會考慮所有公眾嘅意見，我哋而家未諗到用咩嘢方式進行，不過一般有可能嘅做法就係首先同職方工會傾、車長，睇下佢哋嘅反應，再睇下點樣進一步由立法會嘅交通事務委員會作為一個平台去聽下佢哋意見，再敲定最終嘅建議點做。

主席：（經傳譯員）小巴呢個例子，運輸署又點樣知道公眾都關注超速嘅問題呢，小巴？

陳美寶女士：（經傳譯員）呢個唔單只係公眾關注，而係意外率，因為牽涉小巴嘅意外率嘅問題就係超速，但係多年嚟小巴嘅意外率都係幾高嘅，其實我可以話比起專營巴士，公共小巴嘅意外率係更高，所以先要要求小巴入面安裝呢個速度顯示屏。

主席：（經傳譯員）你睇下你可唔可以協助下，喺公共小巴上加裝呢一個儀器，有冇導致到司機同乘客更多衝突同埋拗撬呢？就好似呢度巴士公司嘅講法，佢哋係反對安裝呢個車速顯示屏，你知唔知道小巴司機同乘客有冇爭執？

陳美寶女士：（經傳譯員）我哋冇特別留意到喺--即係話我哋冇特別留意到喺搭公共小巴嘅時候有冇增加投訴，啲乘客。

主席：（經傳譯員）我係關注有冇衝突，根據有安裝咗個顯示屏之後，乘客可能有較多資料知道司機有冇超速，咁有冇增加衝突吖？

陳美寶女士：（經傳譯員）據我所知，就冇特別增加關於安裝呢一個小巴嘅速度顯示屏嘅投訴。主席，我補充，公共小巴嘅限速器係 2010 年開始安裝嘅，作為公共小巴嘅發牌條件。

主席：（經傳譯員）唔該。我都問完我需要問嘅問題，我感謝你同埋你嘅同事盡力協助我哋，我哋亦都會繼續等你哋提交--你承諾會提交嘅書面嘅資料嘅，唔該晒。

陳美寶女士：（經傳譯員）唔該晒，主席，多謝你嘅指導同埋資深大律師嘅協助。

主席：（經傳譯員）喺咁嘅情況底下，而家會押後呢個程序，我哋嘅口頭聽證會就係第一節到呢度，遲啲我哋都會邀請其他各方出席、我哋要先發出邀請，如果對方接受嘅話，喺我哋網頁會發放資料，睇下幾時會再開聽證會，唔該晒。

(10.00 am)

EVIDENCE FROM NEW WORLD FIRST BUS SERVICES LTD AND CITYBUS LTD: MR SAMUEL CHENG, MR WILLIAM CHUNG, MR PAUL LI, MR GARETH NG, MR KENNETH LIT, MR KENNY SO (given in Cantonese; transcription of the simultaneous interpretation)

CHAIRMAN: Good morning. Today we welcome and thank Mr Cheng and his colleagues for responding to our invitation to assist the committee by giving evidence, and he and his various colleagues are available to answer as they choose the different questions that counsel to the committee pose for them.

But first of all, Mr Cheng, if I can address you directly -- make yourself comfortable with the translation, first of all. I understand first of all no request has been made of the committee that lawyers appear on your behalf, and in those circumstances I understand that you wish to make a brief statement at the outset, and you propose doing so in Cantonese.

MR SAMUEL CHENG: Mr Chairman, yes.

CHAIRMAN: Please do make your statement.

Opening statement by MR SAMUEL CHENG

MR SAMUEL CHENG: Thank you.

Mr Chairman, members, ladies and gentlemen, good morning. I would like to thank the committee for

inviting us to attend today's hearing. On behalf of New World First Bus and Citybus, I would like to make the following brief statement.

New World First Bus and Citybus have been operating franchised bus service for many years. Our core value is to provide safe and quality bus service. We have all along been in strict compliance with all the legislation, regulations, franchise terms governing franchised bus service, as well as all the guidelines issued by the Transport Department to franchised bus operators.

New World First Bus and Citybus take a positive stance towards the present review of franchised buses by the Independent Review Committee. In the past few months, we have been reviewing the operation of our companies, in particular the safety aspect, so as to identify room for improvement.

Recently, New World First Bus and Citybus have formed a safety committee, to specifically examine all matters related to operational safety. Initially, we have identified the following areas for improvement.

First, strengthening driver training on new bus routes for all in-service bus captains.

Second, increasing the number of driving training hours for newly recruited part-time bus captains.

Third, providing classroom training, including training on customer service and EQ management for newly recruited part-time bus captains.

Fourth, providing refresher training, including training on customer service and EQ management, for in-service part-time bus captains.

Fifth, from 1 June 2018 onwards, all part-time bus captains will be required to provide information about the working hours of their principal employment to enable the companies to better understand whether they have sufficient rest time.

Sixth, upon upgrading the companies' black box system, in the third quarter of this year, when a bus captain exceeds the speed limit, the on-board black box will automatically give out alert signal to the bus captain.

Seventh, we have started to explore the feasibility of conducting psychological assessment of bus captain applicants.

Eighth, we will continue to explore the feasibility of introducing new technologies for enhancing safe driving.

Apart from the above, regarding the recommendations to be made by the Independent Review Committee, subject to the availability of our financial resources, where

feasible, we shall actively consider them.

Thank you, Mr Chairman.

CHAIRMAN: Thank you, Mr Cheng.

I'm now going to ask Mr Duncan, senior counsel, to pose questions to you. He will be asking questions in English. They will be translated to you into Cantonese. And then your answer in Cantonese will be translated into English. So we will have to learn together how to do this successfully. It will require shorter questions, and it will require pauses in answers. So if we can all bear that in mind.

Mr Duncan.

Examination by MR DUNCAN

MR DUNCAN: Thank you, Mr Chairman.

Mr Cheng, good morning, and good morning, gentlemen, and again thank you for attending the committee this morning.

Thank you for your opening statement, Mr Cheng. There are a number of matters that I would wish to explore with you arising from the submissions that you have already supplied to the committee.

CHAIRMAN: Ms Wong, are you able to confirm whether or not this is being translated into Cantonese? On which channel is the translation?

MS MAGGIE WONG: It's on channel number 1.

CHAIRMAN: Thank you.

MR DUNCAN: The first matters arise from the franchise agreement under which the company operates. I'd like you to turn up the franchise agreement, if you could. We will find this at bundle reference TD-2 at page 386.

Mr Cheng, I'm aware of the fact that you appear on behalf of two companies. When I ask you questions, I will probably be referring mainly to "the company", but by that I will be referring to both companies. If you wish to distinguish between one company and the other, please feel free to do so.

The document which you should now have in front of you is the franchise agreement under which Citybus Ltd operates many of its routes, the latest, I believe, of the franchise documents under which the company operates. Do you understand that?

MR SAMUEL CHENG: Yes, I understand.

MR DUNCAN: Thank you. Can I bring your attention, please, to clause 7, which you will find on the bundle reference at page 389. Could you just familiarise yourself with the provisions of clause 7(1).

MR SAMUEL CHENG: Yes, I have read it.

MR DUNCAN: We will see reference in that clause to the grantee providing, amongst other things, such safety or service enhancement facilities or equipment on its bus

as may be reasonably required by the Commissioner for Transport from time to time. Do you see that?

MR SAMUEL CHENG: Yes, I do.

MR DUNCAN: I understand from the submissions that you have provided to the committee that back in 2003, the committee determined that a black box system, as it's often referred to, should be introduced on all public franchised buses. Is that correct?

MR SAMUEL CHENG: Correct.

MR DUNCAN: Can I ask you this question: apart from that determination by the Commissioner in 2003, has the Commissioner required any specific safety features to be installed on any of your buses?

MR SAMUEL CHENG: Yes, there were.

Let me cite two examples. The Transport Department did ask the bus operators -- allow me to use English to talk about this term -- in relation to exposed seats, seat belts must be fixed.

In addition, a small number of our buses had a straight and long flight of steps, so the Transport Department asked us to fix an additional handrail.

MR DUNCAN: We are aware that amongst the features carried on your buses are speed limiters. Do I understand from your answer that the introduction of a speed limiter is a matter decided by the company, not required of you by

the Transport Department?

MR SAMUEL CHENG: This was not a requirement from the Transport Department. The bus manufacturer added this facility to the bus.

MR DUNCAN: So the only requirements which have come from the Department are the black box system, seat belts, and the guardrails to which you have just referred?

MR SAMUEL CHENG: Yes. Just now I mentioned two examples that I can recall, but I'm not sure whether there were just these two facilities. There might be other facilities but I'm afraid I cannot mention them; I don't know about that.

Let me put it this way. I defer to Mr Li, head of engineering, to provide you with more information.

MR PAUL LI: Chairman, in the annex of our submission, page 29, annex 1.6, that is annex 1.6 of the first submission, therein is the agreement between the bus company and the Transport Department with regard to the safety features. When we order new buses, they have to be installed and they have to be considered. They include the seats, the design of the seats. For the exposed seats, three-point seat belts have to be provided. The seats have to have headrests. The design of the seats and the design of the seat belts and the anchoring points of the seat belts and the design will

have to measure up to the European standard.

For other safety features, for staircases of double-decker buses, we have to provide double handrails, guardrails, so that passengers going up and down will have the guardrails to hang on to.

We have to bear in mind the safety of the glass. We have to provide a hammer with which to break the glass. In an emergency situation the hammer will be needed to break the glass. We also need to provide CCTV. When buses are reversed, the captain would be able to use the camera, and the bus captain will also be able to see what's happening upstairs and also the passengers going up and down the staircase.

In terms of fire prevention, all the materials have to fulfil the relevant regulations. The relevant regulations are set out in a table on page 31.

In the engine area, we need to install high-temperature detector. When a bus catches fire, when a bus experiences high temperature, there will be alarms emitted in the cabins, in the bus captain's cabin.

In terms of air-conditioning, if the engine area catches fire, there is a partitioning between the engine area and the air-conditioning. Between the bus compartment and the engine area, we need to have metal

partitioning wall. If it catches fire, it will not spread into the compartment of the bus.

As regards other features, we need to have a meter and a speed limiter. The area designed for wheelchair, no seats, should be installed. For air-conditioning system, we have to have an all-weather control mechanism. Near the passenger seats, we have the air-con fans, for which they can regulate the flow of the air and the direction.

Thank you, Chairman.

MR DUNCAN: Thank you, Mr Li.

I notice that this document bears the date February 2012. Is this the latest document to be issued in this respect?

MR PAUL LI: Yes, indeed, Chairman.

MR DUNCAN: When would the previous document in this respect have been dated?

MR SAMUEL CHENG: Chairman, we don't have that document with us now. What you are looking at is the document that we first received.

MR DUNCAN: Do you know whether this document is reviewed from time to time between the Transport Department and the company?

MR SAMUEL CHENG: Mr Li?

MR PAUL LI: With the publication of this document, indeed

it was reviewed.

MR DUNCAN: Sorry, there was a review leading up to the publication of the document; is that what you mean?

MR PAUL LI: Well, this document was discussed at our regular meetings many times, and in 2012 we finalised this document.

MR DUNCAN: Thank you.

Just before I leave the document, I notice also it does refer to a speed limitation function. Can you see that in paragraph 4(a)?

MR PAUL LI: Yes.

MR DUNCAN: There doesn't appear to be any specifications with regard to the limiting function; is that correct?

MR PAUL LI: As we all know, for our buses, we have the limiting function, limiting the speed to 70 kilometres per hour, and we all know that the speed limit is 70 kilometres, that's the limit.

MR DUNCAN: So there's simply an understanding between your company and the Transport Department but which hasn't been recorded in detail in the document; is that correct?

MR PAUL LI: Indeed, yes, sir.

CHAIRMAN: Forgive me if I interject. Was the requirement for a speed limiter to be fitted to franchised buses not introduced in the aftermath of the Tuen Mun bus tragedy

in 2003?

MR PAUL LI: Chairman, many years ago the buses had this functionality for the buses, earlier than 2003.

CHAIRMAN: Can you tell us when it was first introduced?

MR PAUL LI: In terms of diesel engines, diesel engines have the functionality of cutting the fuel, and 30 or 40 years ago the functionality was there, although we couldn't limit the speed to 70kph, maybe 75, 80kph. It depends on the design of the gearbox and the engine.

When Euro II engines came about, we had the electronic control, and it was easily achievable. We could limit the fuel supply at the speed of 70.

MR DUNCAN: Leaving clause 7 now, could I take you through, please, to page 393 of the bundle, still with the franchise agreement.

In your submission, you have referred to the matter of passenger liaison groups, and I just want to ask a couple of matters with regard to those groups.

Could I ask you, please, to have in front of you clause 15(3) of the franchise agreement, which deals with the matter of passenger liaison groups.

MR SAMUEL CHENG: I beg your pardon. We can't see this on the screen. What you are referring to we can't see, sorry.

MR DUNCAN: TD-2, at page 393.

Could you just familiarise yourself, please, with clause 15(3).

CHAIRMAN: I take it you are able to see that now?

MR SAMUEL CHENG: Yes, sir. Yes, I can.

Yes, I have done so.

MR DUNCAN: Thank you.

The franchise clause provides for the grantee to promulgate rules for membership and meetings.

Has the company promulgated any such rules?

MR SAMUEL CHENG: I defer to Mr Chung, head of operations.

MR WILLIAM CHUNG: Chairman, this passenger liaison group holds meetings every two months. We will hold the meetings at different bus terminus and passengers will be invited to come in and express their views. At the meetings, we will invite the Transport Department representatives, and our company's representatives will engage passengers and discuss the relevant issues.

CHAIRMAN: I think the question was more specific: has the company promulgated any rules that govern such meetings?

MR WILLIAM CHUNG: We did talk to the Transport Department as to how this would be done.

MR DUNCAN: Yes. Have any rules been issued in writing?

MR WILLIAM CHUNG: No, we didn't.

MR DUNCAN: You will see in the same clause provision for the Commissioner for Transport to direct or approve

matters in writing. Do you see that reference?
MR WILLIAM CHUNG: Yes.
MR DUNCAN: As far as you are aware, has the Commissioner issued any such directions or approvals?
MR WILLIAM CHUNG: I'm not sure, because that was quite a long time ago.
MR DUNCAN: But these meetings are held, are they not, from time to time, even today; is that correct?
MR WILLIAM CHUNG: Correct.
MR DUNCAN: Can I ask you to refer to another page in the bundle, this time CTB-2 at page 170. There's a translation of this in the bundle at page 172-1.

You will see that this is annex 4.1 to one of your submissions, and it seems to constitute notes of the meeting of one of these passenger liaison groups on 27 February 2018. Do you see that?
MR WILLIAM CHUNG: Yes.
MR DUNCAN: Now, I cannot see, at least on the translation, any record as to how many passengers attended that meeting. Is there any entry?
MR WILLIAM CHUNG: The minutes didn't record the number.
MR DUNCAN: Would the minutes normally record the number of people attending?
MR WILLIAM CHUNG: These minutes doesn't mention how many people attended.

MR DUNCAN: If you go through to page 173 of the same bundle, CTB-2, page 173, that's apparently notes of a meeting on 28 February.

Are there any indications from those notes as to how many passengers attended that meeting?

MR WILLIAM CHUNG: No.

MR DUNCAN: How is it decided which passengers would attend such a meeting?

MR WILLIAM CHUNG: We didn't restrict as to which passenger may attend. Two weeks before a meeting is to be held, through the company's website and at the bus terminus where the PLG meeting will take place, a notice will be put up to inform passengers about the time and date of the meeting. On the relevant date, the passengers can freely attend the meeting.

MR DUNCAN: Typically, how many passengers would turn up?

MR WILLIAM CHUNG: It depends on the location. Generally speaking, there would be eight or ten.

MR DUNCAN: When you say it's at a terminus, is there a room at which the meeting would take place, or does it take place outdoors or ...?

MR WILLIAM CHUNG: We will make arrangements so that there would be a bus parked at the bus terminus. On the bus body we will put up a notice saying there is a passenger liaison group. There are also staff members outside the

bus, urging passengers to attend the meeting.

MR DUNCAN: Can I take you back to page 170 again, and bring your attention to entry number 3 on that document, the translation at 172-1. The translation reads:

"Proposed to add a bus speed indicator (similar to that of the minibus) to all buses and emit noise when they exceed the speed limit."

Do you see that reference?

MR SAMUEL CHENG: Yes.

MR DUNCAN: Can I bring your attention to what is recorded as the company's response:

"In response to the installation of certain facilities on the bus, the company will carry out assessments based on factors such as operation costs, economic benefits and the technical front. Currently, there is no plan to install the relevant facilities."

Do you see that entry?

MR SAMUEL CHENG: Yes.

MR DUNCAN: Has the company, since February 2018, carried out any assessments as referred to there?

MR SAMUEL CHENG: Well, we carried out an assessment in another area. We are worried that there would be a greater likelihood that the passenger may have a confrontation with our bus captain.

In recent years, we have had confrontation between

bus captains and bus passengers, so we are concerned. Say, for example, for a particular stretch of road, the speed limit may be 50kph, and then at that time a bus captain may be driving at, say for example, 52kph. From the perspective of the bus passenger, he would regard it as speeding, exceeding the speed limit. If the passenger chooses to take this up with the bus captain right on the spot, this will cause a nuisance to -- this will disturb the bus captain.

Therefore, our company has chosen to work through the black box system so that we can become aware of the performance of the bus captains, like whether he has exceeded the speed limit, and then we can work through our internal disciplinary mechanism, and we will follow our internal instructions to discipline bus captains who have been caught speeding.

We believe that in this way we won't be creating a scenario in which there will be confrontation between the bus captain and the bus passenger, while at the same time we can monitor whether our bus captains have been exceeding the speed limit.

Thank you.

MR DUNCAN: So do I understand from that, Mr Cheng, that the company has actually decided not to install the speed indicators?

MR SAMUEL CHENG: At this moment, our assessment is that there is no need to install such a speed limit display unit.

Regarding the monitoring of the bus speed, we will rely on our black box system. We believe that this is more effective.

MR DUNCAN: The committee is aware that these indicators have been installed as per a requirement of the Transport Department in public light buses in Hong Kong. You would be aware of that?

MR SAMUEL CHENG: Yes, I have seen public light buses equipped with such display units.

MR DUNCAN: Has the company made any enquiries as to whether that has caused confrontation between the PLB drivers and their passengers?

MR SAMUEL CHENG: Well, many people take public light buses, all because they are driven at a high speed. So I don't think that when passengers see that there is an exceedance of the speed limit, there will be a confrontation.

For the people in Hong Kong, for those who take public light buses, especially during nighttime, this is quite common. So, when compared with taking a ride on a franchised bus, this is different.

MR DUNCAN: Can we go back to the franchise document,

please.

CHAIRMAN: Before you do that, Mr Duncan -- it appears, then, Mr Cheng, that the companies have decided not to install the speed indicators on buses at the moment?

MR SAMUEL CHENG: Unless this becomes a requirement, otherwise we do not have the plan to install such a speed limit display unit.

CHAIRMAN: Have you communicated this decision to your passenger liaison group, in view of what was said in February?

MR SAMUEL CHENG: Mr Chung will answer this question.

CHAIRMAN: Thank you.

MR WILLIAM CHUNG: I think on the spot we have given a reply to that passenger, as indicated in the response. That is, at this moment we do not have a plan to install such a facility.

CHAIRMAN: Have you communicated the results of your assessment as to the factors such as operation costs and economic benefits and the technical front?

MR WILLIAM CHUNG: When we answered the passenger's question, we did mention those factors.

CHAIRMAN: Well, you were carrying out an assessment; that's what the minute says. Have you carried out an assessment, and if so have you communicated that to the passenger liaison group?

MR WILLIAM CHUNG: No, we did not. That's because we do not have the contact details of the passenger.

CHAIRMAN: Did you carry out an assessment?

MR SAMUEL CHENG: Mr Chairman, we have not started this assessment. This is because we tried to look at it from another perspective. The concern instead is on the possible confrontation between the bus captain and the bus passenger. We believe that this is the main reason as to why we do not plan to install such a speed limit display unit.

CHAIRMAN: Thank you.

Mr Duncan.

MR DUNCAN: Thank you, Mr Chairman.

Could I ask you to go back to the franchise again, and move this time to bundle TD-2 at page 410. Can I bring your attention to clause 33 of the franchise document and just ask you to familiarise yourself, please, with its terms.

MR SAMUEL CHENG: Yes, I have done so.

MR DUNCAN: Thank you. Can I then ask you to have in front of you a document from CTB-2 at page 32.

At page 32, you should be looking at a document, it's a little hard to read, but it's annex 2.1 to one of your submissions, and it's headed, "NWFB Fuller Disclosure 2017". Do you have that in front of you?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: Thank you.

Then could you go through, into the document, at page 42 of the bundle. It's CTB-2 at page 42.

Do you see on that page a heading which reads, "Corporate social responsibility"? Do you see that?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: Do I understand correctly that that is the document, the corporate social responsibility, which is required under clause 33 of the franchise document?

MR SAMUEL CHENG: Correct, sir.

MR DUNCAN: Thank you.

This page, I think it's a page, the corporate social responsibility, is part of this wider document called "Fuller Disclosure 2017". I haven't been able to find reference in the franchise agreement to the requirement for this "Fuller Disclosure" document.

Could you inform the committee the basis on which this document is issued, the "Fuller Disclosure" document?

MR SAMUEL CHENG: Chairman, this document, we publish it every year, October every year in fact.

MR DUNCAN: Is that a requirement, or is it a voluntary thing on behalf of the company, or what? Because I can't see it in the franchise agreement. That's the

only reason I ask.

MR SAMUEL CHENG: This is a requirement of the Transport Department.

MR DUNCAN: When did this requirement come about?

MR SAMUEL CHENG: If I remember correctly, it's been more than ten years.

MR DUNCAN: So it's issued annually by the company; is that correct?

MR SAMUEL CHENG: Correct, sir.

MR DUNCAN: Can I bring your attention to page 39 of the bundle, so CTB-2/39, which is headed, "Financial information".

MR SAMUEL CHENG: Yes, I can see that, sir.

MR DUNCAN: In particular, does it contain a profit and loss account for the year ended 30 June 2017?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: Can I bring your attention to the heading, "Turnover". The turnover is constituted by two items: first of all, fare receipts, and then advertising income.

Where does the company generate its advertising income from?

MR SAMUEL CHENG: In that year, the advertising income came from three sources. First, the advertising at the bus stops. Second, the advertising on the side of the

buses. Third, inside the buses we have the monitor, the screen monitor, on which we also have advertising. Starting from last year, we discontinued that, because this mode of advertising wasn't popular so we discontinued that. So from now we have only two sources of income from advertising.

First, that's the advertising from the bus stops, and the second is the advertising on the bodies of the buses.

MR DUNCAN: Does the company have any plans to generate advertising revenue from any other source?

MR SAMUEL CHENG: As a matter of fact, where we can get advertising revenue, we have already explored all the sources.

MR DUNCAN: If I could take you back again to the franchise document, please, TD-2, at page 410. Can I on this occasion bring your attention to clause 34. Could you please familiarise yourself with that provision.

MR SAMUEL CHENG: I'm done, sir.

MR DUNCAN: This clause refers to an annual system report. Does the company issue an annual system audit report, as required by this clause?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: Thank you. Has that been referred to in your submission?

MR SAMUEL CHENG: Yes, sir.
MR DUNCAN: Could you please, if you can, just take me to the reference.
MR SAMUEL CHENG: It is in the first submission. That's page 15, paragraph 6(a)(iii).
MR DUNCAN: Thank you. That contains the name of the auditing body who attends to the report; is that correct?
MR SAMUEL CHENG: Yes, sir. That is Hong Kong Quality Assurance Agency, HKQAA.
MR DUNCAN: Would the company be prepared to provide the committee with a sample of one of its latest reports?
MR SAMUEL CHENG: Yes, sir, no problem. We can supplement the information.
MR DUNCAN: Thank you.
I'm going to leave the franchise document. Thank you. And I'm going to ask you now to turn to another document in CTB-2, this time at page 64.
MR SAMUEL CHENG: Yes, sir.
MR DUNCAN: Are you looking at a document headed, "Organisational chart"?
MR SAMUEL CHENG: Yes, sir.
MR DUNCAN: Does this illustrate the senior management structure of the company?
MR SAMUEL CHENG: Correct, sir.

MR DUNCAN: Does the company have a dedicated safety department?

MR SAMUEL CHENG: Well, in this document, there is the head of operations. Under this particular division, there is a department which is responsible for service quality. If there are bus captains whose service leaves something to be desired or he has committed some wrongdoing or if he was involved in any traffic accidents, that department would be responsible for investigation and disciplinary actions.

Thank you.

MR DUNCAN: Does the company have a department which is looking proactively at the matter of safety, as opposed to reacting to breaches of safety requirements?

MR SAMUEL CHENG: Mr Chairman, for the past practices, if there is new technology available, my colleagues would make a report to me, and if necessary I would gather together the senior management to explore the feasibility of these ideas.

If there is a major traffic accident, for instance, my colleagues, Mr William Chung, head of operations, Mr Paul Li, head of engineering, and all the relevant managers, will review and investigate into the causes of the accident.

Recently, we have formally set up a safety

committee. This safety committee is tasked to review and scrutinise all the safety issues in the company.

For this safety committee, the membership includes myself -- I'm the chairman -- as well as the head of operations, the head of engineering, the head of human resources and administration, as well as the senior operations manager and senior engineering support manager. So I've just mentioned the membership of the safety committee.

In the bus operating environment in Hong Kong, I think the members are very experienced. I mentioned a few members. Each of us has had more than 20 years' experience in bus operations.

Thank you.

MR DUNCAN: If I understand it correctly, the formation of that safety committee is a very recent development; is that correct?

MR SAMUEL CHENG: Correct.

MR DUNCAN: So just when?

MR SAMUEL CHENG: Roughly three weeks ago.

MR DUNCAN: Right. Prior to that, was there any particular person employed within the company whose responsibility was safety?

MR SAMUEL CHENG: No. We didn't have a specific employee for that purpose. This is because, for safety-related

matters, we who are seated here today from the senior management share such responsibility.

MR DUNCAN: The committee appreciates that as time goes by, technology with regard to safety devices can change, can evolve. Up until the time of the formation of this new committee, who in the company had the responsibility of keeping up with changes in technology?

MR SAMUEL CHENG: For safety-related technologies, as to the source of our information, it mainly comes from the suppliers of our buses. For the bus suppliers, if they become aware of new technologies, and if it has been proven to be effective, they will tell us when they have meetings with our people from the engineering department.

Of course, we have to find out about the details, as to how the new technology will work, and we will find out whether it is relevant to the application in Hong Kong.

MR DUNCAN: Can I take you to your second submission, at CTB-1 at page 54.

Are you at page 54? This is the first page of your submission dated 18 May. CTB-1 at 54.

MR SAMUEL CHENG: Yes, I'm there.

MR DUNCAN: Is it in the second paragraph of this letter that you have referred to the establishment of the

safety committee?

MR SAMUEL CHENG: Correct.

MR DUNCAN: Is it your intention to employ anybody or nominate anybody who would have specific responsibility for matters pertaining to bus safety?

MR SAMUEL CHENG: You mean getting somebody from outside or getting somebody from the company itself?

MR DUNCAN: Either. Either way.

MR SAMUEL CHENG: Okay. Well, as of now, we do not have plan to engage anybody from outside to join this safety committee. As I have said, for this committee, all the members have a long history of experience working with bus operators.

As far as the company itself is concerned, my personal view is as follows. For safety-related matters, the scope will cover many departments. We may very well be talking about the facilities on board the bus. It may be related to the training of bus captains. It may also cover the recruitment of bus captains. Therefore, for this safety committee, when we talk about the primary responsibility, the person will be I myself, because I do oversee all the departments. I am the chair of this safety committee. So the person in charge is myself.

MR DUNCAN: Are you familiar with the ISO standard

ISO 39001?

MR SAMUEL CHENG: I only learnt about it recently. I wasn't aware of it prior to that. No, I'm not familiar with it.

MR DUNCAN: I wonder if you could be shown one of the documents that has been provided to the committee, which we will find at TU-1 at page 18.

MR SAMUEL CHENG: Yes.

MR DUNCAN: Let me tell you, Mr Cheng, this is an extract from one of the submissions that the committee has received, this coming from an organisation called the Community for Road Safety. Are you familiar with that organisation?

MR SAMUEL CHENG: No, I do not know that organisation.

MR DUNCAN: Could you please just look at the last entry on that page, headed, "Bus safety -- road safety management system", and just read that to yourself, please.

CHAIRMAN: Mr Duncan, whilst that's being done, did we not receive something in the middle of the night from the Transport Department setting out the membership of this body?

MR DUNCAN: I think we did, Mr Chairman.

CHAIRMAN: That might help the witnesses, if some of the names are drawn to their attention.

MR DUNCAN: Have you been able to read that, Mr Cheng?

MR SAMUEL CHENG: No. I cannot read the membership on the screen.

Well, I can see it now.

MR DUNCAN: Do the names of the members of that community mean anything to you?

MR SAMUEL CHENG: There is only one among the many names that I have seen before.

MR DUNCAN: And that is?

MR SAMUEL CHENG: Paul Zimmerman.

MR DUNCAN: Very good.

Can I take you back, please, from the membership, to the document that I wished you to read, which is TU-1 at page 18. It's the last paragraph on that page, Mr Cheng, which continues over the page. Can you just read that to yourself, please.

MR SAMUEL CHENG: Yes. I've finished with that page.

MR DUNCAN: Could you also look, please, at TU-1 at page 53. This is a separate document also issued by the Community for Road Safety, and I'm asking you to read the paragraph immediately before paragraph 3.5. The paragraph is headed, "ISO 39001 road traffic safety management system". I would like you to read that paragraph to yourself, please.

MR SAMUEL CHENG: Yes, I have done with that.

CHAIRMAN: It might help, to put things into context,

Mr Duncan, if we have page 25 on the screen. That is the front page of the document, is it not? So it's a April 2018 report.

MR DUNCAN: Can you look at the front cover of that, Mr Cheng, "Community for Road Safety. Report on bus safety in Hong Kong".

Can I perhaps ask you this: are you familiar with that report? Have you seen it?

MR SAMUEL CHENG: No, I haven't read it.

MR DUNCAN: Those extracts I have shown you suggest that that particular standard would encourage fleet operators to be more accountable and proactive in reducing accidents and risks. Have you seen that in those two extracts? Have you seen reference to that?

MR SAMUEL CHENG: Yes, I read it.

MR DUNCAN: Having read that, do you consider that that would be worthy of consideration by the company?

MR SAMUEL CHENG: First of all, Mr Chairman, this ISO 39001, we don't have any knowledge of it. In Hong Kong, in the public transport sector, I have never heard of any large companies that have adopted this ISO.

Earlier, at the hearing involving the Transport Department, it was then that I became aware of ISO 39001, and obviously I didn't have any idea what this was all about, so I cannot say whether we will be

adopting it.

As far as our company is concerned, if there is anything that can be done to help safety, as long as it is feasible, as long as we have the financial resources to adopt it, we keep our options open.

So, going forward, I think we have to try and understand what ISO 39001 is all about, what country and what company has adopted it, and as a result of the adoption what the effectiveness is. Then we will be in a position to consider adopting it.

Thank you.

MR DUNCAN: In the context of safety, does the company from time to time ascertain from companies overseas --

CHAIRMAN: I'm sorry, Mr Duncan, forgive me for interrupting, but I think it would be fair to Mr Cheng to draw his attention to how the Transport Department have dealt with this in their overnight submission.

It's at paragraphs 24 and 25 of annex 1, which is on internal pagination 8 and 9.

MR DUNCAN: I think if that can be brought up on the screen.

CHAIRMAN: Yes. I think the problem is that because the material came in overnight, we haven't been able to make arrangements to do it, but I think it's important that you should see what view the Transport Department take.

Yes, I think that's it. So if you scroll down, 23

and 24. Take a moment to read that, Mr Cheng, 23 first. Could we have paragraph 23 on the screen, and then 24. I'm sorry, it's 24 and 25 that I want.

Perhaps to assist you, Mr Cheng, when we received evidence from the Transport Department and the Transport and Housing Bureau, although this standard was introduced in 2012, they regarded that, so they told us, as at an early stage of the development of such a system, and that's perhaps the point they are making here. In other words, they are waiting to see whether or not it is effective, and to what extent it is adopted.

It may be that you have nothing to add to your answer. I just wanted you to be aware of what this other material was.

MR SAMUEL CHENG: Mr Chairman, for this ISO 39001, I have no knowledge of it, so I'm afraid I don't have anything to add, sir.

CHAIRMAN: Thank you.

MR DUNCAN: Just before I leave this topic, can I take it, Mr Cheng, that given your coming to know of this earlier than today's hearing, it is something that the company will at least consider in the future?

MR SAMUEL CHENG: Well, in future we will explore what this is all about. We will consider it, yes.

CHAIRMAN: Thank you. I think you have already said, if it's feasible, you keep your options open.

MR SAMUEL CHENG: Correct, sir.

MR DUNCAN: I want to turn now to the matter of recruitment, something you have referred to already this morning. The committee has been informed, through submissions and through its hearings, that over the years there has been a shortage of persons willing to take up the position of a bus captain. Do I assume correctly that that's the experience of your company?

MR SAMUEL CHENG: Mr Chairman, in recent years, we do experience difficulties recruiting bus captains.

MR DUNCAN: Could I refer you, please, to CTB- 1 at page 24. This is an extract from your first submission.

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: Can I bring your attention to the very last paragraph on that page. In that paragraph, have you referred to the fact that in order to comply with the latest guidelines issued by the Transport Department, and in order to meet your own internal targets, the companies will need to engage some 121 additional bus captains?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: Does the company have any plan to increase the remuneration of bus captains, in order to attract them

to a position in your company?

MR SAMUEL CHENG: In March 2018, the company, for the bus captains, in particular the new recruits, has already put up the remuneration. The salaries package of the company has to be in keeping with the labour market situation.

MR DUNCAN: What was the increase in March?

MR SAMUEL CHENG: For the new recruits, it was 8 to 9 per cent increase. Sorry, for new recruits, they have had about 6 per cent increase.

MR DUNCAN: The committee has received a number of submissions which suggest that the remuneration available to bus captains is not competitive with the general transport market. I would like just to refer you, please, to two of those submissions.

The first you will find in the miscellaneous bundle, MISC-2, at page 644. It's actually a document that starts, I think, at page 643. It's a two-page document, received from the Democratic Alliance.

Have you seen this document before, Mr Cheng?

MR SAMUEL CHENG: No, sir. I'm reading it now though.

MR DUNCAN: Thank you. Take your time. The particular aspect I want to bring to your attention is on the second page, and is headed, under item 2, and in particular 2.1, which talks about the current salary of

franchised bus captains.

So by all means familiarise yourself with the document, but I'm going to ask you specifically about the entry in clause 2.1.

CHAIRMAN: Mr Cheng, if you would like to take up Mr Duncan's offer and familiarise yourself with the whole document, we are about to have a morning break and it may be that you could use that time so that you can achieve that. Is that what you would like to do?

MR SAMUEL CHENG: Yes, sir.

CHAIRMAN: Very well. What we will do is we will take our morning break for 20 minutes. We will resume in 20 minutes' time.

Yes?

MR SAMUEL CHENG: Chairman, sir, I've got a request. Could we have the Chinese version, please, for our reading?

CHAIRMAN: Yes, of course. I'm sure a hard copy can be given to you.

Mr Duncan, can we do that, a hard copy of the Chinese?

MR DUNCAN: Certainly.

CHAIRMAN: So a 20-minute break.

MR SAMUEL CHENG: Thank you, sir.

(11.29 am)

(A short adjournment)

(11.51 am)

CHAIRMAN: Yes, Mr Duncan.

MR DUNCAN: Thank you, Mr Chairman.

Mr Cheng, did you get a chance to read that document?

MR SAMUEL CHENG: I have done it, sir.

MR DUNCAN: The clause I was going to ask you about is clause 2.1 on the second page, and in particular the assertion that, according to the Democratic Alliance, the current salary of franchised bus captains is around 15,000, which is around 2,000 less than that of a non-franchised bus captain, 17,000.

Does that accord with your understanding of the situation?

MR SAMUEL CHENG: Well, I'm not sure how many hours of duty they are referring to. There are two figures being cited, $15,000 and $17,000. For non-franchised buses, we don't have any information. Then why don't we focus our attention on the remuneration of our company?

In our company, the remuneration package of our bus captains is in our first submission.

MR DUNCAN: Yes. I don't want to interrupt you. I'm going to go to that in a few moments. So by all means, you will have a chance at that time to explain all of that.

Is there anything else you want to say about that

claim, that there's a difference of about $2,000 between franchised bus captains and non-franchised bus captains? Is there anything that you would wish to say about that?

MR SAMUEL CHENG: For our company, I dispute the figure 15,000. That's because, for our bus captains, on average they have two hours of additional duty. So let's take ten hours of work on average, this is the figure. And for the monthly salary, they are making something like $20,000. That's on the basis of ten hours of work.

For the non-franchised buses, $17,000 cited, I don't have any idea how many hours they are referring to for this amount of money. So I don't think I can make any meaningful comparison.

MR DUNCAN: Thank you. Just before I take you to your own remuneration figures, there's one other matter I would like to refer to you, it having been provided to the committee. That's to be found also in the MISC-2 bundle, this time at page 632.

There's a translation, Mr Chairman, at 642-2.

CHAIRMAN: Thank you.

MR DUNCAN: Could the original Chinese be brought up, please, at page 632.

CHAIRMAN: And who is the author of this document?

MR DUNCAN: The author of this document, as I understand it,

is the Confederation of Trade Unions, the Labour Party, and the Federation of Bus Industry Trade Unions.

CHAIRMAN: Thank you.

MR DUNCAN: Mr Cheng, there is just one page to contend with on this occasion. Could you familiarise yourself with the document. I wish to ask you a question or two with regard to the paragraph which appears towards the bottom of the page and which is headed, "Protect the wage level of bus captains, protect bus service quality". Do you see that?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: Thank you. Please take your time to read that, and I'm going to ask you a question or two.

MR SAMUEL CHENG: I'm done, sir.

MR DUNCAN: The assertion in this document is:

"Currently the basic salary of newly joined bus captain of the three bus companies is $15,364, which is far lower than the 'median range of land transport', $18,200, bus captains have no choice but work overtime to sustain their living, it is not surprised that the workforce of bus captains has been diminishing continuously."

Just leave aside the comment, but the comparison which the author of that document has advanced, does that accord with your understanding?

MR SAMUEL CHENG: Mr Chairman, I defer to Mr Gareth Ng, head of human resources and administration.

CHAIRMAN: Yes. Thank you.

MR GARETH NG: Mr Chairman, as Mr Cheng said just a moment ago, for a bus captain, every month, if he is doing two additional hours of overtime work, the pay will reach something like HK$20,000.

So here they are talking about the basic salary and also the median wage. They are not comparing apples with apples.

Thank you, Chairman.

MR DUNCAN: We'll get into a little bit more detail on this in a few moments, but one way of interpreting what has been said here is that the base salary of a franchised bus captain, leaving aside overtime, is 15,364, or thereabouts, compared with the base salary of the median wage of land transport at 18,200.

Are you able to comment as to whether that's a proper comparison? Leave aside overtime for the moment.

MR GARETH NG: Mr Chairman, our understanding is as follows. For this land transport median wage, it does include overtime work, so it is not just covering the basic salary.

Thank you.

MR DUNCAN: Is it true that the Transport Department does not lay down at all what the salary, remuneration conditions of bus captains should be? This is a matter entirely for the company to determine?

MR GARETH NG: Correct.

MR DUNCAN: So let us have a look, if we could, just for a few moments, at some of the remuneration figures with which you have supplied the committee, Mr Cheng, and to which you were referring a few moments ago.

I think we will find these at CTB-1, page 34.

You have set out for the committee there, in paragraph 9, the remuneration packages of your full-time bus captains. We first see those for Citybus, recruited on or before March 1999, and a base salary of $17,106. Is that correct?

MR SAMUEL CHENG: Correct.

MR DUNCAN: Then if we turn the page to page 35, there's a second group, recruited between 1999 and 8 March 2004, with a basic salary of 15,874.

MR SAMUEL CHENG: Correct.

MR DUNCAN: Then there's a third group, those who are recruited on or after 9 March 2004, with a base salary of 15,364 up to 15,764.

MR SAMUEL CHENG: Correct.

MR DUNCAN: Then we have, not exactly the same, but we also

have classifications for New World First Bus Services Ltd, continuing on pages 35 and 36.

If I understand matters correctly, the remuneration on or after 9 March 2004 is identical for both companies. So if you look at item (iii) on page 35, the amounts are the same as appear under item (iv) for New World First Bus; is that correct?

MR SAMUEL CHENG: Correct.

MR DUNCAN: Thank you. So let us just keep with page 35, if we could. And please, I need to understand this a little further.

If one looks, as I no doubt have done, superficially at this, one would get the impression, perhaps, that the basic salary of bus captains is actually diminishing rather than increasing. I get that simply by looking at the basic salary of persons recruited between March 1999 and March 2004 at 15,874, and then recruited after 9 March 2004, 15,364 to 15,764. Are you able to explain that? Are they in fact diminishing or what?

MR SAMUEL CHENG: Bus captains were recruited at different times and their basic salary was different. This is because we looked at the prevailing demand and supply in the labour market.

MR DUNCAN: So there was in fact a decrease post-March 2004 from the position which had preceded that?

MR SAMUEL CHENG: Correct.

MR DUNCAN: Right. Now, why is the basic salary of 15,364 -- sorry, let me ask you this again. What is the basic salary today, 2018? Where we read "15,364 to 15,764", what is it today?

MR SAMUEL CHENG: This is the basic salary that they are getting, but our company is currently negotiating with different trade unions as to the pay rise for 2018. After the pay rise, the figure will be different.

MR DUNCAN: So are you able to give an estimate of what the difference will be, in percentage terms?

CHAIRMAN: Perhaps you could say what the difference is between the two sides.

MR SAMUEL CHENG: Well, I have heard from the trade unions that they have this claim. Well, some unions have asked for an 8 per cent increase, other trade unions have asked for an increase of 10 per cent.

For the company, we have yet to decide on the rate of increase. Therefore, at this moment, I cannot guess as to how much more they were getting. Otherwise, I will be sending out a wrong or misleading signal to our trade union representatives, because I just now saw representatives of the trade unions in the audience.

MR DUNCAN: I understand, Mr Cheng.

Today, is the prevailing basic salary rate or the

actual basic salary rate 15,364 to 15,764, today?

MR SAMUEL CHENG: Correct.

MR DUNCAN: So do I read this correctly that there has been no increase in the basic salary since 2004?

MR SAMUEL CHENG: No. Well, every year our company negotiates and meets with the trade unions and staff representatives over pay rise. For the figures that you see here, in fact you are reading the pay levels for 2017. For the year 2018, we have to decide on that after discussion with them. For the past ten years, every year we have provided a pay increase. In fact, I can say that for the past 20 years, other than the time when Hong Kong's economy was in a poor shape, the pay level was frozen. Otherwise, every year we did increase the pay levels for our staff.

MR DUNCAN: So in 2017, the basic salary for a bus captain is 15,764; is that correct?

MR SAMUEL CHENG: For a new recruit, 15,764 for 2017. Sorry, it should be 15,364.

MR DUNCAN: So why have we got "to 15,764'? Who gets 15,764?

MR SAMUEL CHENG: Well, for a new recruit, he will be getting 15,364, and then there will be an increment, depending on the length of service. The longer you have worked for the company, then the more you will get, and

you will reach 15,764.

MR DUNCAN: So that's the maximum, 15,764, in 2017?

MR SAMUEL CHENG: Correct.

MR DUNCAN: Then, if I understand it correctly, that's less than the bus captain would have been getting back in 2004, 15,874; is that correct?

MR SAMUEL CHENG: I don't think you can draw such a comparison. This is because they were recruited at different times and they were subject to a different remuneration structure.

Now, you can see from the figures from our company, for those recruited many, many years ago, they were paid more. That was because at that time it was even more difficult to recruit bus captains in Hong Kong than now. With the improvement of the economy of Hong Kong, the demand and supply in the labour market has also changed. So, at that time, we offered a lower level of pay and we were still able to recruit bus captains. Therefore, for staff members recruited at different times, they are having a different pay level.

MR DUNCAN: I understand that, but is this the case -- to make sure I have a correct understanding of this -- a new recruit who joined the company on 7 March 2004 would have received a basic salary of $15,874; is that correct?

MR SAMUEL CHENG: Correct.

MR DUNCAN: Is it also correct that if a new recruit joins the company today, his basic salary is $15,364, some $500 less than his counterpart joining in 2004; is that correct?

MR SAMUEL CHENG: Correct.

MR DUNCAN: Thank you.

Now, there are other allowances to which you have referred on page 35. You have indicated just a few moments ago that your best bus captains, if I understand you correctly, generally, with overtime, would earn about $20,000 per month. Is that a correct understanding of your evidence?

MR SAMUEL CHENG: Correct.

MR DUNCAN: Could you just break that down so we understand how he gets from 15,364 to 20,000?

MR SAMUEL CHENG: So the basic salary is 15,364. Lower down you can see that for the overtime pay per hour, it's derived from this formula: basic salary to be divided by 240 and multiplied by 1.5. So you get a figure. It would be around $96 an hour. That is, if you do overtime work, you get $96 an hour.

For our bus captains, he works 25 days in a month. Every day, on average, he has two hours' overtime work. In other words, 50 hours' overtime per month. Then you

apply the figure I mentioned, $96 per hour, and then you will get a figure of $4,800 a month. That's the overtime pay. $4,800, and to that you add 15,364, which is the basic salary, and you will get the figure 20,164.

That's the basis of what I said earlier on, roughly $20,000 a month.

Thank you.

MR DUNCAN: If you look back at page 34 of the bundle, the overtime rate which prevailed before March 1999 was different from the overtime rate which applies today; is that correct?

MR SAMUEL CHENG: Yes, they are different, correct.

MR DUNCAN: Likewise, for the period between March 1999 and 8 March 2004, the overtime rate is different from that which applied in 1999?

MR SAMUEL CHENG: Correct.

MR DUNCAN: So has the overtime rate increased or decreased?

MR SAMUEL CHENG: Before March 1999, those who joined would have the overtime rate multiplied by 1.75. March 1994 to March 2004, the overtime rate, it is multiplied by 1.5. After March 2004, the rate is multiplied by 1.5. That's for Citybus.

For New World First Bus, it is somewhat different. For NWFB, for those who switched over from CMB, the rate was multiplied by 1.35; that was in 1998. In September

1998, thereafter, until now, all of them had the rate multiplied by 1.5.

MR DUNCAN: So, given the differences, the 1.75, the 1.5 and the 1.35, have the overtimes rates increased over the years or have they decreased?

MR SAMUEL CHENG: Whether there has been a decrease or increase, as I said for the Citybus, for the earliest stage, they had 1.75 and then 1.5. For First Bus, for those who switched over from CMB, it was 1.35, and thereafter they all had 1.5.

So, for the same staff, if he enjoys 1.5, then he's always on 1.5. Depending on the basic salary, the overtime rate will also increase per hour.

So, for the same person, for instance, with the passage of time, the overtime pay will not experience any decrease.

MR DUNCAN: What about page 34:

"Overtime paid per hour: basic salary/240 x 1.75".

That's a higher rate, is it not, than basic salary divided by 240, times 1.5?

MR SAMUEL CHENG: There is a difference when it comes to the sum worked out from that.

MR DUNCAN: The basic salary, if I understand you correctly, is reflective of eight hours' work; is that correct?

MR SAMUEL CHENG: Yes, correct, sir.

MR DUNCAN: In fact, do any of your drivers work just for eight hours?

MR SAMUEL CHENG: They are in the minority. On average, they work for ten hours.

MR DUNCAN: Is it a significant minority or a tiny minority?

MR SAMUEL CHENG: My colleague has to have a look at the information first.

CHAIRMAN: Please take your time.

MR SAMUEL CHENG: If their duty hours are eight hours to eight hours and 30 minutes, then the percentage is about 12 per cent.

MR DUNCAN: Is there a dynamic here at all? I mean, do most drivers want to work the overtime, or is it a situation of the bus company saying, "You have no choice, you must work the overtime"? What's the climate in that respect?

MR SAMUEL CHENG: The company makes the arrangement for the shifts for the bus captains. If the shift involves overtime, then the bus captain will have to work overtime.

MR DUNCAN: He doesn't really have a choice?

MR SAMUEL CHENG: No, they don't have a choice. However, for our bus captains, between them, they can swap their shifts or their duties with mutual consent.

MR DUNCAN: In your view, Mr Cheng, is the amount of remuneration that the company is able to provide to bus

drivers an inhibitor to people wanting to apply for a position as a bus captain?

MR SAMUEL CHENG: That's not the main reason. Obviously, what level of pay will attract people to join, it varies from person to person. Some may consider 15,000 reasonable, whereas some others consider that on the low side. So it varies from person to person.

The difficulty with recruitment lies, amongst others, in the fact that those who are willing to sign up to become bus captains are mostly living in remote areas, like in housing estates. If they are required to travel all the way to turn up for work and then travel back after work all the way, then they consider that unsuitable.

It is, to our knowledge, the main reason. There are people turning up wanting to be bus captains every day, but there is a difference between the number of people turning up and the number of vacancies. We have consistent vacancies. It doesn't mean that they don't want the salaries.

MR DUNCAN: The matter to which you have just referred, the people living in public housing estates in the New Territories, that is something which is in your submission, I think, at page 29, CTB-1/29.

MR SAMUEL CHENG: Yes, I did indeed, sir.

MR DUNCAN: Has the company given any consideration to ways in which that problem might be overcome, apart of course from changing all the routes? I'm thinking of shuttle buses, other means of transport for the drivers, things such as that. Has the company addressed measures which might ameliorate that situation?

MR SAMUEL CHENG: We have all along provided vehicles to take the staff to and from work. But we will not pick them up at their doorstep. We have different zones in our pickup service.

MR DUNCAN: What sort of vehicles do you provide for that?

MR SAMUEL CHENG: Our buses.

MR DUNCAN: On regular routes?

MR SAMUEL CHENG: Yes, indeed, at fixed points, fixed routes.

MR DUNCAN: What about shuttle buses, direct routes, so that people can go quickly from their housing estate to the terminus? Has that been considered?

MR SAMUEL CHENG: Let me elaborate a little bit further. These are staff buses. They are not the buses for the franchised routes. These are the buses that are deployed to areas where we have a large number of bus captains living there. We pick them up and we will come back to the depot. Our depot is the place where they sign in.

MR DUNCAN: Mention has been made already of remuneration, mention is made of the difficulty because people live in the outlying areas of the New Territories. Are there any other particular factors which have contributed over the years to what seems to be a shortage of bus drivers?

MR SAMUEL CHENG: As a matter of fact, we have difficulties recruiting bus captains. It happens over the past few years.

I would like to take this opportunity to make available some information to the committee.

For the past few years, we have found that for the spare bus captains, for the purpose to cover staff members on sick leave, have to be increased in the number all the time. I think -- we believe -- well, let me say this. I think the reason being that our bus captains are applying for more and more sick leaves over the past few years, and therefore we have had this problem of not having enough bus captains. This is one of the reasons. We have to recruit bus captains but then there are bus captains who have applied for sick leave, and some of them, we have reason to believe or we have suspected that it's a matter of abuse of sick leave.

Of course, when this happens, and if we have hard evidence, we did dismiss the relevant bus captain

immediately. In other cases, it was highly suspicious, we thought it was a matter of abuse of sick leave and we have acted on them.

Now, it is always said that there aren't enough bus captains. So it isn't the case that we haven't got any applicants. In fact, every day we have applicants, and for our bus driver training section every day we have new recruits joining the training section and get trained.

I think the main point is that the issue of sick leave is causing us a headache.

Thank you.

MR DUNCAN: Can I take you to page 29 of your first submission. So that's CTB-1/29.

At the bottom of the page, there's reference to unsocial working hours.

MR SAMUEL CHENG: Yes.

MR DUNCAN: Just before I ask a question about that, could I take you, please, also to page 28, the previous page, where you talk about operational efficiency leading to a splitting of 14 hours between a full-time bus captain working for ten hours and a part-time bus captain working for four hours.

So, in the light of those comments, could you give the committee some idea of a typical working day for

a bus driver who works the ten hours? When does he start, when does he finish, when does he take his rest time?

MR SAMUEL CHENG: May I defer to Mr Chung, head of operations.

MR WILLIAM CHUNG: Mr Chairman, for a normal duty shift, at about 6 am --

INTERPRETER: Sorry, the speaker is not close to the mic enough.

MR WILLIAM CHUNG: -- for those on the morning shift, they start at about 5 or 6. Generally speaking, at about 1 or 2 o'clock, he will finish the duty, and then he will be or his work will be taken over by someone from the night shift. So we have the morning shift as well as the night shift.

So, for a night shift bus captain, he will start at 2 or 3, up to 12 midnight. In addition, we have got shifts which run longer, so they start at about 6 or 7 and work until 7 or 8 in the evening, covering the peak hours. Some would also knock off at 6 or 7 o'clock, and after that, as we have said, we will get part-time bus captains to work for a few more hours so as to cover the evening peak hours.

Thank you, Mr Chairman.

MR DUNCAN: So those hours would necessitate some rest times

for the drivers during those different shift periods; is that correct?

MR WILLIAM CHUNG: Correct. We follow the guidelines on bus captain duty hours and rest times, so as to arrange for their duty hours and meal hours.

MR DUNCAN: So a rest time, if I understand, could be up to two to three hours in the course of a shift; is that correct?

MR WILLIAM CHUNG: Could be, but just for a minority. Generally speaking, if we are talking about a longer shift, having 12 or 13 hours, then our arrangement will be such that there will be a tea break, at least 30 minutes of tea break. Then there is also a meal break with at least 60 minutes.

If we talk about a ten-hour shift, then perhaps he will only get one meal break no less than one hour's length.

MR DUNCAN: Right. So, if he is working ten hours from start to finish, for what period would he be driving through those ten hours, approximately, on average? Eight hours? Nine hours?

MR WILLIAM CHUNG: Well, if somebody is on a ten-hour shift, then the driving hours would generally be about eight hours or so, because you have to take out an hour's meal break, and before he starts he will be given time to

make preparation, like inspecting the bus. For every trip, one-way trip, when he comes back to the bus terminus, there is time for layover, so a brief pause. So then he can alight from the bus to go to the restroom or to have a sip of water.

MR DUNCAN: So his tea break and his meal break, he is paid overtime for that; is that correct? So, if he works ten hours, an hour or so of which is a meal break, he's getting eight hours at the standard rate plus two hours of overtime; is that a correct understanding?

My question is aimed at the meal break. Is he paid for the meal break?

MR WILLIAM CHUNG: Correct. The meal break as well as the rest times are paid.

MR DUNCAN: Right.

Look at page 30, CTB-1, page 30. The writer has referred to "demands and aspirations of bus captains", and amongst them are the aspirations for more facilities at the bus terminals.

What exactly are the aspirations in that respect?

MR SAMUEL CHENG: At the bus terminus, generally speaking there's a room for the bus captains to take a break. Generally speaking, it is rather small. This is because the company doesn't own the land. Usually, it would be on the property, on a private property. We always want

to provide a larger room for our bus captains, and this is exactly what our bus captains would like to get.

There is one other point. At the bus terminus, you may not have a toilet nearby, but then our bus captains do have to use a toilet. So there's the demands and aspirations of our bus captains. They are the sort of facilities they want the company to provide.

MR DUNCAN: We will look later on at the special shift arrangements that exist under the new guidelines. We will explore those later. But if I could just touch on those for the moment.

If I understand things correctly, the company is going to try and limit the duty hours under those guidelines to something like 13 hours as opposed to 14 hours, which is the guideline, but there is going to be a limitation within those 13 hours as to the actual amount of time the driver has to spend driving the bus. Is that correct?

MR WILLIAM CHUNG: Correct.

MR DUNCAN: And built into that arrangement are rest times for the drivers; is that correct?

MR WILLIAM CHUNG: Yes.

MR DUNCAN: So where would the bus company expect the driver to spend his rest time during those duty hours? Are there any facilities made available to him to have

a rest?

MR WILLIAM CHUNG: Currently, we don't have such special shifts and therefore we haven't got such facilities. But then, in the light of the new guidelines, there's a need on our part to introduce the special shifts, and we have already talked to our staff representatives and trade union representatives, at our depots and at places where we park our buses we are going to provide such facilities, so that bus captains may take a rest at such facilities.

In addition, they don't necessarily have to stay at such a facility. If, say for example, their homes are nearby, they may go home.

MR DUNCAN: Given the issues that Mr Cheng has raised, with toilets and lack of land that can be occupied at the termini, what prospects are there of having appropriate facilities for a bus captain who's on duty for 13 hours that wants, as he is entitled to under the guidelines, to have a rest for two to three hours? What facilities are likely to be available?

MR WILLIAM CHUNG: Just now, I mentioned our depot as well as the places where we park our buses. At such locations, the site constraints will be different from that at bus termini. So, at those locations, we are able to provide a larger room for them to take a rest.

It will be air-conditioned, there will be refrigerators and facilities like microwaves, microwave ovens, and there will be chairs for them to take a rest.

MR DUNCAN: So do I understand that these facilities do not currently exist but when the special shifts are introduced they will be available?

MR WILLIAM CHUNG: That's correct, because it will take time to make preparation.

MR DUNCAN: Just before we leave page 30, TD-1/30, there seems to be some demands and aspirations from bus captains for fringe benefits. What sort of fringe benefits have they sought?

Sorry, I'm looking at the top of page 30, and (ii) at the top, "In our view, the demands and aspirations of bus captains include the following", and item (ii), "Better remuneration and more fringe benefits".

What sort of fringe benefits have they sought in the past?

MR SAMUEL CHENG: Well, for fringe benefits, they want more holidays and they want bus passes for family members, and they want less restrictions. For instance, their children should have bus passes. There are some suggestions that there should not be any age limit. Their child can be 40 years old, they still want a bus pass for him. That's something I've heard of.

There are some suggestions to the company that there should be more allowance for doctors' visits, more visits to the doctor.

Thank you.

MR DUNCAN: I don't need details, but is there a bus pass system of some sort? Is there a bus pass for families?

MR SAMUEL CHENG: Yes. We do provide staff members with free bus passes. At the moment, they are available. However, I have heard from some staff members the request that they want one or two additional bus passes, and they want less restrictions on the bus passes. This is what I have heard.

MR DUNCAN: There is no medical cover for your employees, as I understand it; is that correct?

MR SAMUEL CHENG: Yes, there is medical cover. That includes GP visits and also hospitalisation.

MR DUNCAN: Again, I wonder if your HR department could provide the committee with details of that medical cover. Would that be possible?

MR SAMUEL CHENG: Yes, certainly, sir. My colleague Mr Ng, Mr Gareth Ng, can supplement.

MR DUNCAN: We don't need it now. There is no doubt -- something in writing which the committee can digest.

MR SAMUEL CHENG: No problem, sir.

MR DUNCAN: You mentioned a few moments ago depots and

termini. How many depots does the company have?

MR SAMUEL CHENG: Altogether six, big and small -- or more than six in fact. Some are smaller, or smaller scale.

MR DUNCAN: Are they on Hong Kong Island?

MR SAMUEL CHENG: Yes. On Hong Kong Island there are three depots, and on Lantau we have two, and in other places, in Kowloon also, but of a smaller scale. Mainly on Hong Kong Island, yes.

MR DUNCAN: Just go back to the question of salaries for a moment, remuneration. Could you look at page 36, so CTB-1/36, please.

There is, at the bottom of that page, reference to a reward for good performance. CTB-1/36. Do you see the reference there, "Reward for good performance"?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: And there's reference to a safety bonus, performance bonus and attendance bonus, and there's reference to a demand by staff unions "these bonuses were reclassified to basic salaries".

So do I understand from that that these are paid irrespective of whether it's safety or performance or attendance; it's simply a supplement to the basic salary?

MR SAMUEL CHENG: Yes, correct.

MR DUNCAN: So does it follow then that at the moment,

there's no remuneration incentive for a person to maintain a safe driving record?

MR SAMUEL CHENG: We do have a discipline system here. If there are problems with safety, there may not be any safety bonus. That can be deducted. However, we will mete out disciplinary action to them. For those who are subject to disciplinary action and they are not making improvements, then the disciplinary action would be escalated, and if it persists, they will be dismissed.

MR DUNCAN: So how long were these safety bonuses in place?

MR SAMUEL CHENG: Well, this safety bonus has been around for many years. Until March 2018, we merged that into the basic salaries.

MR DUNCAN: When you say you merged it into the basic salaries, do the basic salaries then go up?

MR SAMUEL CHENG: There are two aspects here. First, there will not be any deduction of the bonus, because it's been reclassified into the basic salaries, and this has become part of the basic salaries. When it comes to working out the overtime pay, the base factor would increase.

MR DUNCAN: But also the basic salary would increase reasonably significantly, would it not, if there was a safety bonus of 1,285 to 1,552 a month, that would have quite an effect on the basic salary, would it not?

MR SAMUEL CHENG: Previously, that's not part of the basic salary, right.

MR DUNCAN: What drove the staff unions to have this reclassified as a basic salary?

MR SAMUEL CHENG: There are three reasons. First, for the three bonuses, if they are not reclassified into basic salaries, then it is likely that there will be deductions. Say, for instance, if a bus captain is unsafe in his driving, it is likely that the safety bonus will be deducted. If a bus captain is impolite to the passengers, then the performance bonus will go. If a bus captain doesn't observe the attendance, then the attendance bonus will be deducted.

So, for these three bonuses, if they are incorporated into the basic salaries, then there will be no prospect of deduction. That's reason number one.

Second, as I said just a moment ago, the calculation of overtime pay.

Third, each year, when it comes to pay hikes, we will adjust the basic salaries.

For these three bonuses, there is no adjustment, with the exception of 2017, when we made the adjustment. Prior to 2017, all these bonuses, the level remained unchanged for many years. Now they have been incorporated into the basic salaries. Effectively each

year, when it comes to pay adjustment, there would be an increase as a result of that merge.

MR DUNCAN: So if we go back to the day when a safety bonus existed --

CHAIRMAN: Mr Duncan, before we get involved in that, I think we should take the break now for lunch. But can I ask you to ask Mr Cheng or one of his colleagues to provide us with details of how these systems worked. It appears to be something that was in place that you lost or it was deducted if you didn't fulfil certain criteria, and I would invite you to explore that after lunch.

MR DUNCAN: Certainly.

MR SAMUEL CHENG: Thank you, sir.

MR DUNCAN: We will adjourn now until 2.30. Thank you.

(12.59 pm)

(The luncheon adjournment)

(2.31 pm)

CHAIRMAN: Good afternoon. Yes, Mr Duncan.

MR DUNCAN: Thank you, Mr Chairman.

Good afternoon, gentlemen.

Mr Cheng, I think before the break I had asked you to look at CTB-1, page 36 -- if we could just bring that up, please -- and I had begun to ask you some questions about the "Reward for good performance" part of this

page, at the bottom.

You told us just before the luncheon break that the safety bonus had been there for quite some time, and we know from your submission that it has now been reclassified to part of the basic salary.

Prior to that reclassification, what were the criteria which were to determine whether or not a particular individual was entitled to the safety bonus?

MR SAMUEL CHENG: Mr Chung, my colleague, will answer this question.

MR WILLIAM CHUNG: Mr Chairman, in relation to the safety bonus, we try to see if the bus captain has committed any mistakes when it comes to driving, and then there will be deductions. Maybe it is due to a traffic accident or he has been complained by passenger for improper driving. It may also be the case that we have found exceedance of the speed limit as a result of the black box data.

We have got driving instructors or inspectors. They are on board to assess his performance. If it is found that there has been improper driving, then depending on the extent, there will be deductions.

Thank you.

MR DUNCAN: When you say there would be deductions, this is

actually termed to be a bonus. It's a plus, isn't it, a bonus?

MR SAMUEL CHENG: Mr Chairman, if a staff member has not committed any mistakes, then he's going to collect the full amount of the bonus. However, if he has committed a mistake, depending on the extent, then the bonus will be deducted to a certain extent.

Thank you.

MR DUNCAN: I understand.

What about the performance bonus; what were the criteria for the performance bonus?

MR SAMUEL CHENG: Mr Chung, please.

MR WILLIAM CHUNG: Yes, for the performance bonus, we mainly look at the customer service. Say, for example, he has been complained by a passenger for poor attitude, and if it has been established, then his performance bonus will be deducted.

MR DUNCAN: So no complaint, no deduction; it would be an automatic payment?

MR WILLIAM CHUNG: Correct.

MR DUNCAN: Attendance bonus: what was the criteria for that?

MR SAMUEL CHENG: This is the attendance bonus. Say, for example, for that particular month, he has full attendance. That is, after then the leave he has been

assigned, if he has been attending on all the days assigned to him, then he will get the full amount of the attendance bonus. However, had he been absent, then the bonus will be deducted proportionately.

Thank you.

MR DUNCAN: With regard to the situation post the reclassification, I would like just to ask about a couple of matters.

Is it the position at the moment, then, that there's no financial incentive offered to any driver to adopt safe driving measures?

MR SAMUEL CHENG: As far as financial incentives are concerned, yes, I agree, there would no longer be an incentive as you have said.

But let me say this again. Safe driving is their duty. If a bus driver fails to do that, then we will look at the breach that he has committed, we will look at the degree of seriousness. Depending on the severity, we will hand out different degrees of disciplinary action.

Thank you.

MR DUNCAN: If I was to take you, please, to CTB-2 at page 209 -- the translation at 209-1 and -2.

MR SAMUEL CHENG: Yes.

MR DUNCAN: Do we see set out there the guidelines of New

World First Bus Services Ltd for disciplinary actions against normal bus terminus supervisor and bus captains who are in breach? Does that contain the guidelines?

MR SAMUEL CHENG: Yes, I do see the guideline.

MR DUNCAN: If you look at the end of the guidelines, that's page 209-2 in particular of the translation, you will see guidelines which deal with breaches of speed limits by the bus driver?

MR SAMUEL CHENG: Yes, I see that.

MR DUNCAN: And the sanctions can be seen there as well.

MR SAMUEL CHENG: Yes.

MR DUNCAN: Oral warnings, written warnings, and ultimately perhaps dismissal, without the need for payment in lieu. Are those the sorts of sanctions that the company might consider?

MR SAMUEL CHENG: Yes.

MR DUNCAN: So do I understand correctly that under the current system, post-reclassification, there is no provision for any loss of income with regard to a speed breach?

MR SAMUEL CHENG: You are correct.

MR DUNCAN: That is a different situation from that which prevailed prior to reclassification, in that previously, if a person had breached the speeding limit, then amounts otherwise payable to him would be withheld. Is

that a correct understanding?

MR SAMUEL CHENG: Correct.

MR DUNCAN: Just with regard to the effect of the reclassification, if we go back to page 36 of CTB-1, if we start with the new recruit at the moment, his basically salary, if I understand correctly, would be $15,364. Is that correct?

MR SAMUEL CHENG: Correct.

MR DUNCAN: Then he would have added to that a reclassified safety bonus of at least 1,285?

MR SAMUEL CHENG: Well, for the various bonuses, they have already been included in the sum of 15,364.

MR DUNCAN: What about the performance bonus of 362 per month?

MR SAMUEL CHENG: The three bonuses covering safety, performance and attendance, they have already been included in the sum of $15,364.

MR DUNCAN: I see. When did this reclassification actually take place?

MR SAMUEL CHENG: 1 March 2018.

MR DUNCAN: So when you have at (iv) on that page, "Recruited on or after 9 March 2004", the figure of 15,364 would in fact be much less prior to 1 March 2018? You would have had a figure plus these other bonuses; is that correct?

MR SAMUEL CHENG: All the three bonus have been added and then you will get 15,364.

MR DUNCAN: Right. That's today, isn't it?

MR SAMUEL CHENG: Correct.

MR DUNCAN: Let's go back 12 months. What would the basic salary have been 12 months ago?

MR SAMUEL CHENG: Mr Chung, my colleague, will do the sums now.

CHAIRMAN: Yes. Take your time.

MR SAMUEL CHENG: Thank you, Mr Chairman.

MR GARETH NG: I beg your pardon, Chairman. Let me give an example.

The bonus reclassified into basic salary went into effect on 1 March. On 1 February, prior to this reclassification, the basic salary was 12,536.

MR DUNCAN: Thank you.

CHAIRMAN: So on what basis is it asserted on page 36 that if you were recruited on or after 9 March 2004 your basic salary was 15,364, and you now tell us that if you were recruited on 1 February 2018, your basic salary was 12,536?

MR GARETH NG: Mr Chairman, would you repeat, please?

CHAIRMAN: Yes. I'm looking at page 36. In the middle of that page, it asserts:

"(iv) Recruited on or after 9 March 2004.

Basic salary: 15,364."

You now tell us that if you were recruited on 1 February 2018, your basic salary is 12,536.

MR SAMUEL CHENG: If I may explain once again.

Starting from 1 March, the three bonuses were reclassified into basic salaries. Let's say in February 2018, the basic salary was 12,536, and the bonuses amounting to 2,328 was reclassified to basic salaries, and the basic salaries were put up by $500. Adding all together, it amounts to 15,364. Let me repeat the numbers again. 12,536, 2,328 and 500. Adding them together would amount to 15,364.

CHAIRMAN: I hear what you say, but I don't understand what you say.

MR SAMUEL CHENG: Let me repeat. In February, before the changes took place, the new recruits had the basic salary standing at 12,536. And I mentioned the three bonuses. The three bonuses together amounted to 2,328.

On 1 March, this 2,328 by way of bonuses were classified to basic salaries. At the same time, we added or we increased the basic salaries by $500 for all the bus captains. So, in March, the basic salary comes to 15,364, but the bonuses were not there because they had been incorporated into the basic salaries.

CHAIRMAN: I've heard you again.

MR DUNCAN: Thank you, Mr Cheng. I'm going to move from remuneration now, but keeping with the topic of recruitment, the question of female or lady drivers -- what proportion of your drivers are females?

MR SAMUEL CHENG: Less than 10 per cent. However, I would like to stress one point. When we mount recruitment, we give equal treatment to male and female and we don't give any priority to any particular gender. So those who turn up for employment, the number of males outnumbers females.

MR DUNCAN: Has the company considered any initiatives to increase the interest in bus captaincy amongst the female population?

MR SAMUEL CHENG: We have recruitment advertisements. There are three faces of our bus captains. One of the faces is a female bus captain. That way, we hope that the members of the public will know that female population would be welcome to join as bus captains.

MR DUNCAN: Are there any female part-time drivers?

MR SAMUEL CHENG: We are not sure, but even if there are, the number would not be high.

MR DUNCAN: Can I ask you to look at page 29 of the bundle, again on your submission. So CTB-1/29. It's on that page that you have informed --

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: -- the committee as to the number of part-time bus captains registered with the companies. We can see that these, at the time of the submission, totalled some 346 bus captains.

I understand also from your submission -- this is at page 36 of the bundle -- that the part-time bus captains are paid an hourly rate of $80. Is that the sum total of their remuneration?

MR SAMUEL CHENG: Correct, because each hour, they get paid on an hourly basis.

MR DUNCAN: How long has that rate prevailed?

MR SAMUEL CHENG: This rate started from 1 March.

MR DUNCAN: This year?

MR SAMUEL CHENG: 2018.

MR DUNCAN: Yes. What was it previously?

MR SAMUEL CHENG: It was 75, if my memory serves any correctly.

MR DUNCAN: Is this something which is subject to an annual review?

MR SAMUEL CHENG: Not necessarily, because we have to look at the market. We have to look at the prevailing market rate for part-time then we have the corresponding number.

MR DUNCAN: Do any of your office workers at Citybus or New World act from time to time as part-time bus

drivers?

MR SAMUEL CHENG: When they finish the work or when they are on holiday, yes, sometimes.

MR DUNCAN: What sort of numbers would be in that category?

MR SAMUEL CHENG: At the moment, it is 179.

MR DUNCAN: So roughly half of the current part-time establishment are office workers at the company?

MR SAMUEL CHENG: No. If you look at -- in our previous submission which you quoted, 314 is the number for First Bus, and there is another number for Citybus, 346. Altogether the number stands at 660.

MR DUNCAN: Oh, I see. Sorry, could you take me to that number again? I've got 346 at page 29.

MR SAMUEL CHENG: Yes, sir. 346 for Citybus, 314 for First Bus. Altogether, 660.

MR DUNCAN: Of which approximately -- you gave a figure -- 179 would work in the offices of either of those two companies?

MR SAMUEL CHENG: That's correct, sir.

MR DUNCAN: Leaving aside the office workers, most of the other part-time works presumably would have other employment; is that your understanding?

MR SAMUEL CHENG: That's correct.

MR DUNCAN: If we look, please, at page 59 of the bundle, CTB-1 at 59.

MR SAMUEL CHENG: Yes.
MR DUNCAN: I bring your attention, please, to paragraph 5(b) on that page.
MR SAMUEL CHENG: Yes, I've read that.
MR DUNCAN: In that paragraph, have you stated, amongst other things, that at the moment the company does not "specifically require part-time bus captains to declare if they have adequate rest time before commencing their duties"; do you see that?
MR SAMUEL CHENG: Yes, I see that.
MR DUNCAN: And I think it's fair to say that in the third paragraph under item (b), you have signalled changes that you intend to adopt with regard to that aspect of recruiting part-time bus captains. Would that be correct?
MR SAMUEL CHENG: Correct.
MR DUNCAN: If I could take you, please, to CTB-2 at page 401 -- actually, 400 I think the document starts -- there is a form which runs over four pages, 400 to 403, "Job application form (driving)".
MR SAMUEL CHENG: Yes.
MR DUNCAN: Is this a form which is used for both full-time and part-time applicants?
MR SAMUEL CHENG: Yes, correct.
MR DUNCAN: Relative to this issue of other employment or

rest time, could I ask you to look at page 401, please, the second page of the document. You see the first heading, "Important information", and item 3. Does that read, "Are you currently working part-time? If yes, what is the work nature and the working hours?"

MR SAMUEL CHENG: Yes.

MR DUNCAN: So each applicant, either for full-time or part-time work, would be required to complete that part of the form?

MR SAMUEL CHENG: Yes.

MR DUNCAN: Then if you go through to page 402, page 3 of the document, we see a declaration, pages 402 and 403.

MR SAMUEL CHENG: Yes, I see that.

MR DUNCAN: Do I understand correctly that that is also required to be filled out at the time of the application?

MR SAMUEL CHENG: May I defer to my colleague Mr Ng?

MR DUNCAN: Certainly.

MR GARETH NG: Mr Chairman, yes. For this particular form, the applicant has to fill out this part. But let me supplement. If he has omitted anything, it means that we will not be able to know. Say, for example, if he applies for a post with us, on the right-most side it talks about supplementary information. For that particular column, if the candidate doesn't write

anything, we won't insist that he must fill out all the parts.

MR DUNCAN: So I take it there's no independent verification of anything that a person might say in this form?

MR GARETH NG: You may say so.

MR DUNCAN: Apart from the application form, if the person is accepted for a position with the company, is he required to sign a formal employment contract?

MR GARETH NG: Yes.

MR DUNCAN: And is there a standard form for that, for the case of a bus captain?

MR GARETH NG: It's an employment contract in the form of a letter rather than a form.

MR DUNCAN: Does that address at all the question of working in outside employment beyond the company?

MR GARETH NG: No.

MR DUNCAN: Would you be able to provide the committee with a sample of one of those employment letters, as you have referred to it?

MR GARETH NG: Yes, we can.

MR DUNCAN: Thank you.

CHAIRMAN: Is this letter the same for both full-time and part-time employees?

MR GARETH NG: Not the same.

CHAIRMAN: Do you have sample then of a part-time employee

contract as well, the letter?

MR GARETH NG: We can provide the information to the committee later on, Mr Chairman.

CHAIRMAN: Yes, that's what I'm asking. This will be something that we would invite you to provide subsequently. We will give you a list of what it is you have undertaken to provide.

MR GARETH NG: Thank you, Mr Chairman.

MR DUNCAN: Could I bring your attention --

CHAIRMAN: Before you move on, Mr Duncan --

MR DUNCAN: Sorry.

CHAIRMAN: -- has the format of this letter changed, say in the last several years?

MR GARETH NG: I'm not sure.

CHAIRMAN: Perhaps you can check and, if there is a change, because new references have been made in the current letter, provide us with examples of older letters that will illustrate to us what the change has been.

MR DUNCAN: Can I bring your attention now to --

CHAIRMAN: Is there something you wanted to say, Mr Cheng?

MR SAMUEL CHENG: No, no. No problem at all. We can provide that information.

CHAIRMAN: Thank you.

Yes, Mr Duncan.

MR DUNCAN: Thank you, Mr Chairman.

Could I ask you to look at one other document, please, in this context. Page 404 of CTB-2. The translation is at 404-1 and 404-2.

You should be looking at a document which is headed, "Employee code of conduct and discipline/declaration for external works". What is the function of this document?

MR SAMUEL CHENG: Say we have a full-time employee working for us. If he has part-time work outside the company, then we ask him to inform the company.

In addition, if he is a part-time employee with us, so if he has got a principal employment, again he has to give us the information.

MR DUNCAN: Now, we can see that, according to the document, it's annex 7 to your submission, your second submission, I believe. If we go back to page 59, please. So CTB-1 at page 59.

MR SAMUEL CHENG: Yes, I see that.

MR DUNCAN: And I think you will see a reference to annex 07 right at the end of paragraph 5(b).

MR SAMUEL CHENG: Yes.

MR DUNCAN: It's referred to there as an annual declaration.

Is there any requirement within any of these documents or any employment letter that an employee is obliged to inform you if he changes his outside employment or undertakes new outside employment?

MR SAMUEL CHENG: For full-time employee, they must do so. For part-time employees, if they don't declare, as of now, we don't have the mechanism to go after them. But then, starting from 1 June 2018 onwards, at the time of taking up the post and on a yearly basis, a declaration must be made.

MR DUNCAN: When you say the full-time employee must do that, obviously he has to fill out a form annually. What is the position if he takes on outside work halfway through the year? Is there any obligation on him to report that?

MR SAMUEL CHENG: For the details, I would like to defer to Mr Ng.

MR GARETH NG: Mr Chairman, just now the counsel referred to this scenario. Well, the employee has the duty to make a declaration to us, and upon approval by us he can then take up other part-time work.

Thank you, Chairman.

MR DUNCAN: Where is the provision for that, which requires the employee to do that?

CHAIRMAN: It might help if you have a look at page 72-1 in the English, and no doubt the preceding pages in the Chinese. CTB-2, page 72.

MR DUNCAN: Thank you.

Does that help, Mr Ng?

72-7 in the English, paragraph 26.

CHAIRMAN: The form that I'm looking at is headed, "Employee code of conduct ... declaration of outside work". In the middle of the page it reads:

"I would like to apply for/have the following outside work (in accordance with article 26 of the employee code of conduct and discipline, full-time employees shall apply to the company before accepting outside employment and do so annually thereafter)."

Then there are various headings which provide for information to be supplied.

MR DUNCAN: Thank you, Mr Chairman. Which page is that?

CHAIRMAN: On my version, it's got "72-1" at the bottom. It's described as annex 3.1.

MR GARETH NG: Thank you, Chairman. Here in this form, we have made it very clear that the employee has to make the declaration.

I would also like to say, if I remember correctly, we will review this later on. My impression is that in the employment letter, we do have the same requirements specified.

Thank you.

MR DUNCAN: Thank you, Mr Ng.

I think also, if you look at page 72-7 of the translation, and if you are looking at the original

document, paragraph 26, there is reference to the same point, as I understand it.

Is my understanding correct?

MR SAMUEL CHENG: Correct, sir.

MR DUNCAN: Thank you.

So the improvements or the changes that you are considering implementing in this respect are designed more at the part-time employees than the full-time employees; is that a correct understanding?

MR SAMUEL CHENG: That's correct, sir, because for full-time, we do have adequate declaration system.

MR DUNCAN: Could I ask you, please, to --

CHAIRMAN: Are you moving to another topic, Mr Duncan?

MR DUNCAN: Yes.

CHAIRMAN: Before you do so, what is it that you propose asking part-time employees to do once they are employed, if they are going to take up different or extra other part-time work? What are you asking them to do?

MR SAMUEL CHENG: Starting from 1 June, if an applicant comes forward to apply to be a part-time bus captain, he has to fill out a form which spells out the principal employment, the working hours, what hour to what hour, and what days of the week he's supposed to work and what days he is not supposed to work. Then we will be in a position to ascertain whether he is suitable to become

a part-time bus captain.

Say, for instance, if someone has to be working for a dozen hours of work every day, then we will not employ him because there would not be enough rest time. If somebody has to work eight hours a day, and if he were to tell us that maybe he would be making himself available on Saturdays and Sundays to become part-time bus captain, then there will be no problems and we would put him through the normal procedures. If he is suitable, then he would be taken on as part-time bus captain.

Other than making the declaration when he first took up the job, every year he has to make the same declaration. If there are no changes, he would fill out the same stuff in the form. If there are some changes, then the new nature of work will be declared to the company. That's what we are going to do starting from 1 June.

CHAIRMAN: So this is an enquiry you make when you recruit somebody, and then a year later he's got to confirm what the position is?

MR SAMUEL CHENG: Yes, that's correct, sir.

CHAIRMAN: Is there any obligation, proposed obligation, to be imposed on such a part-time bus captain if he was to take up part-time employment or additional part-time

employment in that one-year period?

MR SAMUEL CHENG: If he takes up other extra work, he has to make the declaration to us. That way, we will be able to understand the working hours he's putting in, whether he would have the energy to become part-time bus captain with us.

CHAIRMAN: Is this requirement reflected in forms, documents?

MR SAMUEL CHENG: Starting from 1 June, yes, there will be.

CHAIRMAN: Right. Have we been provided with this prospective form or not?

MR SAMUEL CHENG: Not for the time being. We will make these available.

CHAIRMAN: Thank you.

MR DUNCAN: Could I take you back to the document, "Employee code of conduct and discipline". The original Chinese version is at page 66 of CTB-2, the translation from page 72-2.

Could I ask you this. This employee code of conduct and discipline, does it apply to both full-time and part-time employees?

MR SAMUEL CHENG: Yes, all of them, yes.

MR DUNCAN: If I could take you back to paragraph 26 -- the translation at page 72-7 -- there's a heading there, "Outside work", and a reference to what a full-time

employee should do if he's going to take up concurrent employment, either on a regular or consulting basis. Do you see that?

MR SAMUEL CHENG: Yes, I do.

MR DUNCAN: Given what you have told the chairman just a few moments ago, is there any reason why that sort of provision should not apply to part-time employees?

MR SAMUEL CHENG: Well, the part-time staff in our company, they are mainly bus captains. Bus captains are working part-time for us. Whatever their principal employment is, the likelihood of any conflict of interest would be negligible. It would be zero, in fact.

MR DUNCAN: So the intention is to provide a different sort of form for the part-time employee who changes his outside work during the course of the year between the annual declaration; you would have a different sort of form for that?

MR SAMUEL CHENG: Yes. That's when conflict of interest arises or the potential of conflict of interest arises, that's where they have to fill that out.

MR DUNCAN: Right. Let us move away from that and back to your submission, CTB-1, this time at page 61.

May I bring your attention to paragraph 7, headed, "Customer service and EQ management training"; do you see that?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: It's paragraphs (b) and (c) in which I'm interested at the moment. Could you just read through those paragraphs to familiarise yourself with what is being communicated to the committee, please.

MR SAMUEL CHENG: We have read it, sir.

MR DUNCAN: You refer to the fact that in March of this year, a study was commenced to explore the feasibility and effectiveness of conducting a psychological assessment in order to screen out applicants who either have an inclination to drive aggressively or who are easily provoked and therefore lose control and drive in an aggressive manner.

What is the progress that has been made with regard to that step?

MR SAMUEL CHENG: I defer to Mr Gareth Ng, please.

MR GARETH NG: Chairman, after March, we have started the study. Other than downloading the information online regarding the evaluation in the public domain out there, we also had meetings with a practising clinical psychologist and also a psychologist academic. We had meetings with these two people about the feasibility and effectiveness of this kind of assessment.

At the present moment, we are trying to meet a mechanical engineering professor who has been having

a lot of expertise regarding the EQ management vis-a-vis driving, and we try to meet him about this.

Thank you, sir.

MR DUNCAN: The meetings that you have had, are these with local psychologists?

MR GARETH NG: Yes.

MR DUNCAN: And the professor, have you actually identified the professor? Do you have somebody particular in mind? I don't need a name. I just need whether you have actually identified somebody.

MR GARETH NG: He is a professor from CUHK, Chinese University of Hong Kong, in the faculty of psychology.

MR DUNCAN: Has he been given a brief?

MR GARETH NG: It was on an exploratory basis. We are exchanging ideas, our background purposes, our purposes, and what areas we want him to enlighten us on regarding the practices in the industry, in the field.

MR DUNCAN: When you say "the practice in the industry, in the field", what does "the field" comprise of? Is it a Hong Kong field? Is it a China field? What's the field?

MR GARETH NG: As a matter of fact, the world over, we are looking for some psychological assessments that can be applicable to bus captains, and our discussion surrounded this area.

MR DUNCAN: Have you explored this issue with any other local bus companies?

MR GARETH NG: Not in that area, no.

MR DUNCAN: Have you explored this issue by making contact with any overseas bus companies?

MR GARETH NG: No, sir.

MR DUNCAN: Are you able to give the committee any idea as to when you think you might be able to make progress with regard to this study?

MR GARETH NG: As I have said, there is a professor from the mechanical engineering faculty who has said that he could only meet with us in June, so I believe that the earliest would be end of June that we would be able to come back to the committee in relation to the progress.

Thank you.

MR DUNCAN: Thank you. I'm going to move now from recruitment to the matter of training, the training of bus captains. If I could ask you this. Do I understand correctly that what training is required is entirely a matter for the company? It's not a matter where you receive any directive from the Transport Department?

MR SAMUEL CHENG: Yes, decided by the company.

MR DUNCAN: And there is no scheme, there's no training of any sort, offered by the government authorities over and above or separate from any training scheme which the

company operates? Is that a correct understanding?

MR SAMUEL CHENG: Correct.

MR DUNCAN: And because of that, do I understand correctly that whatever training you provide is totally independent of what training might be provided by other franchised bus operators in Hong Kong?

MR SAMUEL CHENG: We are only responsible for the training of our own company.

MR DUNCAN: With regard to what training is required, are these decisions made solely by your company, or would you make them after consultation with perhaps some of your counterparts in overseas jurisdictions, other bus companies? Is it entirely your decision or do you check out with other bus companies how they might go about their training?

MR SAMUEL CHENG: Entirely decided by our company.

MR DUNCAN: If we look, please, at CTB-1, page 37. I just want to run through what the current situation is with regard to the training, first of all of persons who become full-time bus captains.

Do we have page 37 available?

MR SAMUEL CHENG: Yes. We can see that.

MR DUNCAN: Thank you. So we see that at (i), full-time bus captain without a bus driving licence has 15 days' driving training before attending the driving

examination which is required by the Transport Department. If he doesn't pass, he has another five days of training. Once he's passed that and obtained the licence, employment is offered and induction training is arranged.

Is that correct?

MR SAMUEL CHENG: Correct.

MR DUNCAN: Thank you. And that induction training consists of two parts. The first is a one-day classroom training, and the second is 10 to 15 days of driving training.

MR SAMUEL CHENG: Correct.

MR DUNCAN: Then if we go down to (ii), those who become full-time bus captains but already have a bus driving licence, they will be provided with the induction training.

MR SAMUEL CHENG: Correct.

MR DUNCAN: The one day in the classroom and the 10 to 15 days of driving training?

MR SAMUEL CHENG: Correct.

MR DUNCAN: As a matter of interest, is there much movement amongst bus captains from one bus company to another in Hong Kong?

MR SAMUEL CHENG: Yes, they do transfer, but not too many.

MR DUNCAN: Just going back to page 37, moving to the

question of part-time bus captains who have a bus driving licence, do I take it from the headings here that you wouldn't take on a part-time bus captain unless he held a bus driving licence? You wouldn't provide him with the 15 days' driving training which you make available to full-time applicants; is that a correct understanding? You only take part-time people on if they are already holders of a bus driving licence?

MR SAMUEL CHENG: Correct. All part-time bus captains must possess bus driving licences before we would consider employing them.

MR DUNCAN: Thank you.

Now, as far as those persons are concerned, they will be provided with two days of driving training; is that correct?

MR SAMUEL CHENG: Correct.

MR DUNCAN: As opposed to the 10 to 15 days of driving training which the full-time driver gets. Is that a correct understanding?

MR SAMUEL CHENG: Yes, your understanding is correct. This is because for someone who would like to become a part-time captain with us, he must be somebody who is already driving a bus or a heavy vehicle. In other words, he is already experienced in driving large vehicles.

So, for the two-day driving training, it's mainly route training.

MR DUNCAN: So he would receive two days' training irrespective of the degree of experience that he's had in driving a bus? It doesn't matter whether he's had one month or ten years; he still just gets the two days?

MR SAMUEL CHENG: In relation to the driving experience of heavy vehicles or large vehicles, if he is not too experienced, we are not going to take him on. In other words, for those who would like to be part-time bus captains, those that we engage, they are all experienced.

MR DUNCAN: Sorry, do you want to refer to something else there?

MR SAMUEL CHENG: Yes. Well, while we are still on this page, towards the end, we have got some supplementary information. Whether we are talking about full-time or part-time bus captain, after the bus captain has completed all the training, he will be assessed by our driving instructor. If the assessment is not satisfactory, there will be further training for the bus captain.

Therefore, as far as part-time bus captains are concerned, yes, indeed they get two days, but after training them for two days, if they cannot pass the

assessment, such a bus captain would not be deployed to drive on the road.

MR DUNCAN: You said a few moments ago that you wouldn't employ somebody on a part-time basis unless they were very experienced. Can you give us some idea as to what sort of experience would be required? Is there any criterion for that?

MR SAMUEL CHENG: Not so much a particular criterion. For experience part-time bus captains, some of them were previously bus captains. They were former franchised bus captains. They might have worked for us in the past; they left for a period of time. But in fact they have had a lot of experience. That's the first group.

The second group, they may be retirees who used to be franchised bus captains for other companies.

So these are the two main sources, and we believe they possess adequate experience in driving buses.

MR DUNCAN: They don't get the classroom training before they are able to take up their duties; is that correct?

MR SAMUEL CHENG: Not as of now, but later on we are going to make arrangements for them to be given classroom training which will cover customer service and EQ management as well.

Thank you.

MR DUNCAN: The question of driving instructors. How does

one become a driving instructor in your company?

MR SAMUEL CHENG: First of all, he must have obtained a driving instructor licence from the TD for driving vehicles of the same type as that in our company. Then he may become a driving instructor. And for our driving instructors, most of them or all of them have been very experienced bus captains and they have been driving instructors for a long time.

Thank you.

MR DUNCAN: How many driving instructors does the company employ?

MR SAMUEL CHENG: Currently, there are 15 who are full-time driving instructors, two part-time driving instructors. In addition, we have five bus captains in the near future will take an examination with the Transport Department so as to get the driving instructor licence.

Thank you.

MR DUNCAN: Now we turn the page to page 38 of the bundle, so it's CTB-1/38. We see the topic of "Refresher training", and the statement that you provide refresher training to in-service full-time bus captains, and it is said:

"We pledged to the [Transport Department] that the refresher training should be provided to every in-service full-time bus captain at least once every

3 years.

Only classroom training is provided ..."

And you then go on to describe the course contents.

Now, the classroom training, is this the same classroom training that is provided as part of the induction training, when a person first joins the company? Is that the sort of material which is covered?

MR SAMUEL CHENG: Yes, most of them are the same. However, in the last sentence of this submission, we look at the analysis of traffic accidents. From the first inception with us to the training, it may be one or two years already, and within these one or two years, maybe something had occurred that would be of reference value to them, some traffic accidents, and we would bring up these cases and share with them during the classroom training. That way, we will try to tell them how to avoid these kinds of accidents.

MR DUNCAN: When was the pledge given to the Transport Department?

MR SAMUEL CHENG: That was many years ago. We don't have the precise information with us now.

MR DUNCAN: Just going back to the previous page for a moment. Right at the end of the page, page 37, you state:

"After passing the assessment, they are sten

assigned to the routes that they have been trained."

MR SAMUEL CHENG: Yes, correct.

MR DUNCAN: In the course of being trained to be a bus driver, how many routes would a bus driver be required to undertake?

MR SAMUEL CHENG: I defer to Mr Chung who has detailed information.

MR WILLIAM CHUNG: It would depend on which depot he is assigned to. Some three routes, some four, some five. Even for five routes, some of the routes are duplicated. In other words, the starting point and the end point may be different but a lot of the routes will be overlapping. Let's say Moreton Terrace, they start from Moreton Terrace in Causeway Bay, going to the south, and will go through the Aberdeen Tunnel, and the route before the tunnel would be the same, and then they split up, some would go to Wah Kwai, Wah Fu, and some would go to South Horizons.

MR DUNCAN: So would he be then stuck with those routes forever?

MR WILLIAM CHUNG: They would be driving on these routes for some time, maybe a couple of months, and thereafter they will be redeployed to other routes.

For these routes, we categorise them as more straightforward routes. The number of stops would be

smaller, and the road conditions would be less complicated. Things would be more straightforward. We would let them familiarise themselves with the driving skills and the routes, and then they would be deployed to other routes.

MR DUNCAN: So if a driver is required to take on a new route, is he provided with familiarisation process, or does he, to coin a phrase, learn on the job?

MR SAMUEL CHENG: Mr Chung.

MR WILLIAM CHUNG: For new routes, we have a number of ways. We see whether he has been instructed about the route or whether he has declared that he is familiar with the route. If he is familiar with the route, then we will let him drive on the route, but if he is unfamiliar with the route, then we will arrange him to ride on a serving bus to get him familiar with all the bus stops en route and how he should go about taking on this route. This is how we deal with it now.

MR DUNCAN: If I understand correctly from your submissions, the company utilises buses from three different bus suppliers. Is that correct?

MR SAMUEL CHENG: Mr Li.

MR PAUL LI: Yes, that's correct, sir.

MR DUNCAN: Just for the record, which companies are those?

MR PAUL LI: Mainly the main suppliers: Alexander Dennis,

Volvo and MAN.

MR DUNCAN: Again, if I understand matters correctly, these individual companies will have different models from time to time?

MR PAUL LI: Yes.

MR DUNCAN: So, when a bus captain undertakes his initial training, how is it determined which bus he does his training on, which model?

MR SAMUEL CHENG: I defer to Mr Chung, please.

MR WILLIAM CHUNG: We look at the routes that are going to be deployed and the types of buses that will be used. For a new recruit, we would coach him on a number of models. For the 15 days, other than coaching him about the routes, every day we would coach him on the different models of buses.

So, for the 15 days of training, he would be familiar with different models of buses.

MR DUNCAN: I think you mentioned a few moments ago perhaps four to five routes during the course of the training. Is that correct?

MR WILLIAM CHUNG: Yes, correct, sir.

MR DUNCAN: So how many different models of buses would you expect a trainee to encounter during his training period?

MR WILLIAM CHUNG: Yes, a moment ago we said that there are

three suppliers. Most of the buses are the Alexander Dennis model, to be followed by Volvo. These are the main suppliers. In the course of the training, mostly we would use ADL, Alexander Dennis, for training purposes.

MR DUNCAN: Any reason for that?

MR WILLIAM CHUNG: Mainly because most of the buses are Alexander Dennis's bus.

MR DUNCAN: And what if a driver is required to drive a new bus on a new route subsequently in his career? Is there any training provided for the new type of bus?

MR WILLIAM CHUNG: If there are new models that the bus captain has to drive, we will arrange for training to be provided.

MR DUNCAN: What does that training consist of?

MR WILLIAM CHUNG: The driving instructors would show the meters, the seats and all the instruments, all the buttons, on the meters, all the warning signals, warning lights, and under the guidance of the instructor they would be allowed to drive some distances to familiarise themselves with the operation.

MR DUNCAN: So would that be half a day's work, a day's work or ...?

MR WILLIAM CHUNG: It would depend on the model and how different it is from the original buses that he's

familiar with. Let's say there are some electric buses, the control, the buttons and everything are different, so it would take a longer time.

When we order the buses, we require the suppliers, for the control panel and so on, we try to have the system standardised instead of having different control mechanisms. That's to facilitate the familiarisation.

MR DUNCAN: If we go back to page 38 of the bundle, so CTB-1/38, you then provided the committee with a section on "Remedial training".

CHAIRMAN: Before you embark on that, Mr Duncan, now you have gone back to that page -- Mr Cheng, can I ask you this. Under the heading "Refresher training", and from what you've said in evidence, the refresher training is provided for full-time bus captains at least once every three years. How is it that that time period was decided, rather than, for example, once a year?

MR SAMUEL CHENG: We don't feel that there is a need for them to come back every year, not that frequent.

CHAIRMAN: Are you aware of the practices of other bus companies in Hong Kong in this regard?

MR WILLIAM CHUNG: Mr Chairman, as far as I understand, other bus operators have the pledge with the TD that it is once every three years.

CHAIRMAN: And are you aware of practices in overseas

jurisdictions as far as this is concerned?

MR WILLIAM CHUNG: We didn't make the comparison.

CHAIRMAN: Thank you.

MR DUNCAN: Another point with regard to refresher training. Do I understand correctly from that section that no refresher training is currently provided to part-time employees?

MR SAMUEL CHENG: Not for the time being, no. However, later on, we are going to provide that to the part-time workers.

MR DUNCAN: When you say "later on", when?

MR WILLIAM CHUNG: Well, that we have to discuss with the part-time drivers, because they hold down a principal employment. We have to work out the time. But we hope we can arrange for a suitable time as soon as possible, to facilitate the part-time drivers to come for these refresher training.

MR DUNCAN: Have you made any contact with the part-time drivers yet in that regard?

MR WILLIAM CHUNG: Not yet, no.

MR DUNCAN: If you then turn to "Remedial training", please, page 38. In the first paragraph, you refer to the fact that both companies require full-time and part-time bus captains to report their driving offence points, and there is then a points system which will determine

whether a remedial training course is required.

Do you see that?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: Now, are you totally reliant then on the bus captains to report their driving points?

MR SAMUEL CHENG: For the precise operation, I defer to Mr Ng, please.

MR GARETH NG: Chairman, for the bus captains, they have the obligation to make the declaration. That's number one.

Number two, every single month we would random check. We will randomly select some bus captains and they have to sign a consent form for us to check the points record with the Transport Department.

Thank you, sir.

MR DUNCAN: How long has that system been in place, that system of registration with the Transport Department?

MR GARETH NG: My recollection is it has been so for a few years. It should be five years.

MR DUNCAN: Have you encountered any faults in the system at all? Have people suffered from incurring points but not reported to you? Have you come across that at all?

MR GARETH NG: Yes. When we find this out, we will resort to disciplinary action.

MR DUNCAN: You have a need for that from time to time, do you? Has that actually happened?

MR GARETH NG: I remember that it did happen. Sorry, it did happen but not too many.

MR DUNCAN: If I could refer you to the third paragraph under that heading, "Remedial training", please:

"In 2016, 198 bus captains attended the remedial training."

I just want to understand the sentence which follows:

"76.3 per cent of these bus captains did not have been disciplined for blameworthy accidents in the subsequent 6 months."

I think there's a grammatical error in there somewhere, but do I understand this correctly, that if 76.3 per cent have not been disciplined for blameworthy accidents in the subsequent six months, does it follow that some 23.7 per cent have been disciplined, even after remedial training; is that how I should read that?

MR SAMUEL CHENG: Yes, you are right.

MR DUNCAN: So these persons have incurred eight or more points, they've been through remedial training, and notwithstanding that, they've had to be disciplined subsequently?

MR SAMUEL CHENG: Yes, they did, but of course we have to understand the degree of severity of their mistakes.

If it is serious and if they have already had

a similar incident, then we will escalate the disciplinary action. It may even result in dismissal.

MR DUNCAN: Is that figure a cause of concern for the company, that that proportion would be disciplined for blameworthy accidents subsequent to receiving remedial training? Is that a matter of concern?

MR SAMUEL CHENG: I agree, it is a matter of concern.

MR DUNCAN: Has the company addressed how the situation might be improved? Does something need to be done to the remedial training, for example?

MR SAMUEL CHENG: I think this is one of the directions. We need to carry out a further analysis as to why, despite attending the remedial training, they are still involved in accidents. In fact, each accident has its own cause. They are different, and we need to go back to carry out a more detailed analysis.

MR DUNCAN: Are you planning to do that?

MR SAMUEL CHENG: Yes.

MR DUNCAN: Now, could I raise the matter of simulator training. We all know that pilots of aeroplanes, as part of their training, operate simulators. Is there a similar system available for a person who wishes to take on the responsibility of driving a bus, which often involves as many passengers as you would find on an aeroplane? Is there such a system?

MR SAMUEL CHENG: We don't have such a system, because we believe that for someone to practise driving, it is better to drive a real bus on a real road in reality. That's the better version.

CHAIRMAN: But to answer the question directly, do such systems exist?

MR SAMUEL CHENG: We don't have it in our company, but I have heard that it does exist.

MR DUNCAN: What have you heard?

MR SAMUEL CHENG: In the past, I heard there was another bus company which had such a simulator.

MR DUNCAN: Which was this company?

MR SAMUEL CHENG: KMB. I heard about that. I didn't see it myself.

MR DUNCAN: Have you heard of any bus companies overseas operating a simulator system?

MR SAMUEL CHENG: Yes, I have heard that Singapore has got this system.

MR DUNCAN: And where did you hear that from?

MR SAMUEL CHENG: Just now, my colleague sitting next to me, Mr Chung, told me so.

CHAIRMAN: Are you aware that in Singapore the government takes on the responsibility for training bus captains?

MR SAMUEL CHENG: Perhaps I would like to defer to Mr Chung.

MR WILLIAM CHUNG: Mr Chairman, yes, we have heard about

that. Well, two years ago my colleague went to Singapore to visit their simulator system, and he also looked at the operations of the Land Transport Authority in Singapore.

Thank you.

MR DUNCAN: So your colleague went to Singapore?

MR WILLIAM CHUNG: Correct.

MR DUNCAN: Is this sent by the company?

MR WILLIAM CHUNG: Yes, sent by our company.

MR DUNCAN: And what level was he at? Was he a senior manager in the company?

MR WILLIAM CHUNG: Yes, a manager.

MR DUNCAN: Did he come back and write a report as to what he had seen, and so on?

MR WILLIAM CHUNG: After they have returned, they did give a presentation to me.

MR DUNCAN: Was that in writing?

MR WILLIAM CHUNG: No. It was a presentation. Other than looking at the simulator, they also looked at the bus operation in Singapore.

MR DUNCAN: And what was the thrust of what he had to say about the simulator?

MR WILLIAM CHUNG: As the chair has said, for this simulator, it was subsidised by the government. This is because the simulator is rather expensive. Then, for

this simulator training, different scenarios would be shown on the screen, so as to test the response of the driver.

MR DUNCAN: I'm sorry, this was two years ago, did you say?

MR WILLIAM CHUNG: Correct.

MR DUNCAN: Right. Whose idea was this? Was it your company's idea or was it the idea of the government that this be looked at?

MR WILLIAM CHUNG: I'm not sure whether it was an initiative from the Singaporean government or an initiative from the Singaporean bus company.

MR DUNCAN: Was it an initiative of your company or some other organisation?

MR WILLIAM CHUNG: You mean the Singapore visit?

MR DUNCAN: Yes. I mean was this something that your company came up with, or was it provided to you by somebody else as a proposal?

MR WILLIAM CHUNG: For this visit, our black box supplier had a UITP conference in Singapore, so they invited us to go there to participate. So outside of the conference we made arrangements to visit the authorities and look at the simulator.

MR DUNCAN: So it was the bus supplier who suggested you look at the simulator, or was it your company which decided off its own bat to look at the simulator?

CHAIRMAN: I don't think we were told it was the bus supplier. It was the black box supplier.

MR DUNCAN: I beg your pardon.

CHAIRMAN: The black box supplier is NEC, is it not? Is that right?

MR WILLIAM CHUNG: (Nodded head).

CHAIRMAN: So NEC invited you to this UITP. Can you give us the meaning of that acronym?

MR WILLIAM CHUNG: UITP, the international transport organisation.

CHAIRMAN: What's the acronym? International Transport?

MR WILLIAM CHUNG: I'm not too sure but I can provide the information later.

CHAIRMAN: It has a website, doesn't it, public transport?

MR WILLIAM CHUNG: Correct.

MR SAMUEL CHENG: My colleague is trying to look it up right now.

CHAIRMAN: Very well. If you get the answer, tell us.

And it was on the occasion of this visit that you took the opportunity, because you were in Singapore, to examine the bus simulator, and at whose suggestion was that?

MR WILLIAM CHUNG: It was NEC which made the suggestion.

MR DUNCAN: Did you yourself attend that?

MR WILLIAM CHUNG: I didn't.

MR DUNCAN: It was your colleague who subsequently gave you a report; is that correct?
MR WILLIAM CHUNG: Correct.
MR DUNCAN: But did I understand you to say earlier that the government had provided some sort of subsidy for this?
CHAIRMAN: I think he was suggesting the Singapore government subsidised the use of this training facility. Is that right?
MR WILLIAM CHUNG: Yes, that's how I understood it.
CHAIRMAN: Because they provide the training of bus captains; it's not done by the bus companies, it's done by the government of Singapore, through the Land Transport Authority. Is that correct?
MR WILLIAM CHUNG: Correct.
CHAIRMAN: Before we leave the topic -- if that's what you were about to do, Mr Duncan --
MR DUNCAN: Sure.
CHAIRMAN: -- your colleague came back and reported to you, and so far you have told us one element of the report, that it was rather expensive. Was there anything else he reported?
MR WILLIAM CHUNG: My colleague reported that the simulator wasn't real enough, the simulator couldn't move, and there was the absence of the 3D element there, or 4D.
CHAIRMAN: Do you know who were the manufacturers of this

bus simulator?

MR WILLIAM CHUNG: That I'm not aware of.

CHAIRMAN: Yes, Mr Duncan.

MR DUNCAN: Thank you, Mr Chairman.

So, after that, did you carry the matter forward at all within the company, as to whether any further consideration should be given to engaging some sort of simulation?

MR SAMUEL CHENG: No, we didn't consider adopting it.

CHAIRMAN: That's because of a preference you have for reality practice driving; is that right, Mr Cheng?

MR SAMUEL CHENG: That's correct, sir.

MR DUNCAN: Now, if we could move from the current training to what you propose for the future, and you have indicated, Mr Cheng, in your submission that there are some changes afoot.

Could I ask you to look at page 54, so CTB-1/54. If you look first of all at paragraph (a) on that page.

MR SAMUEL CHENG: I've done it, sir.

MR DUNCAN: The first thing I notice is that you said:

"In our recent review of various safety-related matters, we identified the following areas for improvement".

Could you tell us a little bit more about this review? Who took part in it? How long did it take?

MR SAMUEL CHENG: That review, I referred to the safety committee this morning, and that's part of it. Our company has set up the safety committee which has not been around for so long and the membership of the safety committee is set out in our submission.

Basically myself, Mr Chung next to me, Mr Ng, Mr Li, Mr So, and also the one who cannot make it today, Mr Fung, the six of us are standing members.

MR DUNCAN: How did you go about the review?

MR SAMUEL CHENG: Well, we have identified what we set out in the submission, (a) to (f), and these are the areas that we have identified for improvement.

As to the specifics, how we are going to go about it, and the time frame, we have assigned the job to different departments to carry out the review. But there are things that can be undertaken straightaway, like, for example, the part-time bus captains, they have to declare the working hours of the principal employment, these can be undertaken immediately. We have decided this would go into effect come 1 June.

There are other areas where it would be rather difficult to get on top of, like for instance the classroom training being made available to the part-time bus captains. As Mr William Chung said just a moment ago, we have to tie in with the timing of the part-time

bus captains when we make arrangement for them to sit through this kind of training. And in each of these areas, we have to look at the actual timing.

MR DUNCAN: So the review itself, was this done in writing, through communications, memos, and so forth, or did you have a sit-down meeting, or what was the process?

MR SAMUEL CHENG: We have just had the first meeting. We do have the minutes. After the meeting, we have the supervisor or the senior manager who would be following up. Maybe there would be more than one supervisor would be in charge. And they would be tasked to see when these are implemented, all the details that will be involved.

Once we have identified all the details, then they will come back to the safety committee and make a report there, and the whole committee will be discussing the issues and work out the actual implementation timetable. That's how we plan to proceed.

Other than conducting the review at the committee, we also discussed the fact that once a review has been undertaken, once implementation has been undertaken, the follow-up work would also be terribly important. How we are going to follow up this, the safety committee will take the decision also.

Thank you.

MR DUNCAN: Is there a proposal for a second meeting?

MR SAMUEL CHENG: Our committee would like to have the meeting every two months. If the managing director sees fit, then we can have extra meetings scheduled.

I have been enquiring my colleagues, of course, in the office, how they are progressing and whether there are any difficulties they encounter. If I see the merit of having additional meetings, I will do so; I will convene extra meetings.

Thank you.

MR DUNCAN: Would it be possible to provide the minutes of the first meeting to the committee?

MR SAMUEL CHENG: Most certainly, sir.

MR DUNCAN: Thank you.

In paragraph (a) on that page, there is indication that the committee proposes to "enhance new route driving training for all bus captains".

Sorry, we are still on page 54.

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: Both for full-time and part-time drivers.

MR SAMUEL CHENG: Yes.

MR DUNCAN: Have you been able to detail just exactly how that training is to be enhanced as yet?

MR SAMUEL CHENG: For the details, I defer to Mr William Chung, please.

MR WILLIAM CHUNG: For the new route, the bus captain will have to ride on the bus of the relevant route. Other than riding on the bus, we would let him drive a bus on that route. Now, that's not a passenger-carrying bus. That will familiarise him with all the route details.

MR DUNCAN: And the plan to increase the driving training hours for newly recruited part-time bus captains, what is the plan?

MR WILLIAM CHUNG: For new part-time bus captains, the driving hours will go up from eight hours to 16. And also we will have a four-hour classroom training which will include customer services, EQ management, traffic safety awareness and knowledge, and the relevant laws and regulations, drug driving, drink-driving, and also the Discrimination Ordinance regarding disability, and so on.

MR DUNCAN: Do we see other proposals at the bottom of page 54 under (b)(i) and (ii)?

MR SAMUEL CHENG: Yes. What's your question, sir?

MR DUNCAN: I'm just asking you to confirm that the enhancement that you have referred to includes what we can all read in paragraph (b)(i) and (ii) on pages 54 and 55.

MR SAMUEL CHENG: Yes, sir, they are included.

MR DUNCAN: Now, at page 55, the provision of refresher

training to all in-service bus captains, will that apply to both full-time and part-time bus captains?

MR SAMUEL CHENG: The earlier page, (b), we are talking about enhancing the training for part-time bus captains. For the part-time bus captains training, it is divided into two parts, (i) and (ii). As a matter of fact, we are talking about part-time bus captain training, because full-time training for full-time bus captains, they will already have this kind of training.

MR DUNCAN: Thank you. I see. Thank you very much.

The chairman asked you a question earlier on with regard to the period between one refresher training and another, and I think in the case of full-time bus captains it's once every three years. Is that correct?

MR SAMUEL CHENG: Yes, at least they have to have one every three years.

MR DUNCAN: Do I assume that the same period is proposed to be applied to the part-time bus captains?

MR SAMUEL CHENG: In future, yes. At the moment, that doesn't include the part-time bus captains, but in future, yes.

MR DUNCAN: Right. The chairman asked why three years was selected. Is there any proposal to review the periods at which refresher training should be provided to the bus captains in order to keep them reminded as to the

need to undertake procedures which can minimise safety concerns?

MR SAMUEL CHENG: As a matter of fact, for the refresher training, we feel that it doesn't have 100 per cent correlation with driving safety. It is partially related to that. The thing is, we have to monitor the driving behaviour of the bus captains. That's far more important.

For the once every three years refresher training, we haven't heard from the bus captains any suggestion that it is too long a cycle, but when we meet the unions, we will explore with them and hear their views as to whether there is a need to increase the frequency. We would like to hear from them because they are the beneficiaries. We would like to hear from them.

MR DUNCAN: The reason that I ask that is that we seem to have encountered a situation where the remedial training doesn't seem to be as successful as perhaps it might have been intended to be. Does that alert you to the fact that some more training of a remedial fashion might be considered? Sorry, refresher training might be considered.

MR SAMUEL CHENG: Having heard your suggestion today, when we go back to our safety committee meetings, we will explore the idea.

MR DUNCAN: Just before we finish today, you have touched on a matter that I was going to ask you about. The safety committee has been set up. You've had one meeting. You've delegated certain work to other people. What sort of communication has there been with the bus captains and/or the unions so far with regard to these different proposals?

MR SAMUEL CHENG: Not yet. We haven't, not yet, because we have only just had our first meeting. In fact, in future, for the safety committee, if we are to conduct a review, if there are changes, we will only communicate with the trade unions once they have been finalised. This is because before it is finalised, and if we start to talk to them, it may cause confusion in the messages.

MR DUNCAN: When you say "finalise", do you mean you've made the decision and you tell the unions, or you've made a preliminary decision which you are then going to discuss with the unions, and then make a final "final" decision?

MR SAMUEL CHENG: It depends whether it is controversial in nature. If it is not controversial, say for example, I suggest that I would like to increase the number of training hours, I believe it is not going to be controversial. In this case, I don't think there is a need to have prior discussion with the trade unions.

However, for other matters which may be controversial, then, depending on the circumstances, if there is a need, then perhaps we need to engage the trade unions at an earlier stage and communicate with them.

MR DUNCAN: Mr Chairman, that would be a convenient moment.

CHAIRMAN: Yes, Mr Duncan.

Mr Cheng and your colleagues, we have reached beyond 4.30, so we are going to adjourn proceedings today, and I'm going to ask you if you would be kind enough to come back tomorrow so we can resume our hearing at 10 o'clock.

Thank you for your attendance today.

MR SAMUEL CHENG: Thank you.

(4.34 pm)

(The hearing adjourned until 10.00 am the following day)

EVIDENCE FROM NEW WORLD FIRST BUS SERVICES LTD 1
AND CITYBUS LTD: MR SAMUEL CHENG, MR WILLIAM CHUNG, MR PAUL LI, MR GARETH NG, MR KENNETH LIT, MR KENNY SO

Opening statement by MR SAMUEL CHENG 1

Examination by MR DUNCAN 4

2018 年 5 月 29 日

上午 10 時正恢復聆訊

出席人士 ： 鄭偉波先生，董事總經理（新世界第一巴士服務有限公司和城巴有限公司）

鍾澤文先生，營運總監（新世界第一巴士服務有限公司和城巴有限公司）

李廣威先生，工程總監（新世界第一巴士服務有限公司和城巴有限公司）

吳智光先生，人力資源及行政總監（新世界第一巴士服務有限公司和城巴有限公司）

列俊華先生，營運支援經理（新世界第一巴士服務有限公司和城巴有限公司）

蘇國健先生，高級工程支援經理（新世界第一巴士服務有限公司和城巴有限公司）

主席：（經傳譯員）各位早晨，今日我哋係歡迎同埋感謝鄭先生同埋佢嘅同事，佢哋回應咗我哋嘅邀請，我哋邀請佢哋上嚟作證，協助我哋。佢同埋幾位同事今日都出席，係回應咗我哋嘅問題。我哋嘅律師就已經向佢哋提咗啲問題，今日律師亦都會再向佢哋問題，佢哋係樂意今日回答嘅。

首先，鄭先生，或者讓我直接同你講，首先我哋會有傳譯服務，或者你帶好個耳機。首先，我明白我哋冇要求你哋係請律師代表你哋嘅，所以我明白你希望一開始嘅時候，就係作一個短嘅開場白，同埋用粵語進行嘅，用廣東話嘅，係咪呀？

鄭偉波先生：主席，係呀。

主席：（經傳譯員）請你而家開始發言。

鄭偉波先生：多謝。主席先生、各位委員、女士們、先生們，早晨。多謝委員會邀請我哋今日嚟到呢個聽證會，我現在代表新巴同埋城巴作出以下嘅簡短陳述。新巴同城巴經營專營巴士服務已經好多年，提供安全及優質嘅巴士服務係我哋嘅核心價值，我哋一向嚴格遵守規管專營巴士嘅所有法例、規例、專營權條款，以及所

Transcript by Epiq Hong Kong, Limited

有運輸署對專營巴士公司所發出嘅指引。就今次獨立檢討委員會對專營巴士所作出嘅檢討，新巴同城巴嘅取態係正面嘅。過往幾個月，我哋對於公司嘅運作，尤其是安全方面作出檢討，查找不足。近日，新巴同城巴已經成立咗安全委員會，專責檢討所有有關營運安全嘅事項，我哋初步確定有以下嘅範圍會作出改進嘅：

第一， 就係加強所有在職車長嘅新路線駕駛訓練；

第二， 增加新入職兼職車長嘅駕駛訓練時數；

第三， 向新入職嘅兼職車長提供課堂培訓，內容包括顧客服務同埋情緒管理（EQ Management）；

第四， 向在職嘅兼職車長提供重溫培訓（Refresher Training），內容亦都包括咗顧客服務同埋情緒管理；

第五， 由今年 6 月 1 日起，規定所有兼職車長必須提供佢正職嘅工作時間，以便公司更了解佢哋是否有足夠嘅休息時間；

第六， 喺今年嘅第三季，當公司嘅黑盒系統完成提升之後，每當車長超速駕駛，佢車上嘅黑盒會自動發出警號提示車長；

第七， 我哋已經開始探討對車長職位嘅申請人作心理評估嘅可行性；

第八， 我哋會繼續探討引入新嘅科技，以提升駕駛安全。

隨咗上述嘅事項，對於獨立檢討委員會將來所作出嘅建議，喺我哋有足夠財政資源，並且可行嘅情況下，我哋都會積極考慮，多謝主席。

主席：（經傳譯員）唔該晒你，鄭先生。我而家就係想請鄧樂勤資深大律師向你提出問題，佢就會用英文係向你提問嘅，我哋就會係有傳譯將佢譯番做廣東話，然後你用廣東話作答，亦都會將佢傳譯番做英文嘅。我諗我哋大家都要學下點樣樣好成功、好順利咁樣去做呢一樣嘢嘅，我相信就係要問嘅時候問得比較短，同埋就係答嘅時候，可能中間亦都有稍為一個停頓，希望大家謹記。鄧大律師。

MR DUNCAN：（經傳譯員）唔該晒，主席。鄭先生，早晨。各位先生，早晨。亦都再一次感謝你哋今日出席檢討委員會今朝嘅聽證會，感謝你剛才所作嘅開場發言，鄭先生，有幾樣嘢我係希望可以同你探討一下嘅，呢個都係源自你哋已經提供咗畀委員會嘅陳述書。

主席：（經傳譯員）黃女士，係咪可以確認一下，係咪已經係傳譯咗做廣東話？係邊一個頻道呀？唔該。

MR DUNCAN：（經傳譯員）講到呢個專營權嘅協議，你哋就喺呢個專營權協議底下去運作㗎嘛，關於呢件事，我就想請你就係揭番去呢個專營權協議嗰度嘅，你可以喺 TD-2 呢個文件夾第 386 頁嗰度搵到嘅。鄭先生，我知道你係代表兩間公司出席，當我問你問題嘅時候，我相信我會講係「間公司」咁樣樣，其實我講話

「你間公司」嘅時候，我都係講及你哋嘅兩間公司嘅。如果你想特別係指明兩間公司裏面嘅邊一間，請你隨時話畀我聽。你前面嘅嗰份文件就係嗰個專營權協議，而城巴有限公司就係喺呢一份專營權協議底下營運嘅，講及嗰個路線，我諗就係你哋係最新嗰份專營權協議畀你哋去運作嘅，就係靠呢一份，你明唔明白我講㗎？

鄭偉波先生：我明白。

MR DUNCAN：（經傳譯員）唔該晒。麻煩你睇第 7 條，請你揭去第 389 頁。或者你睇一睇番嗰個條文第 7 條第(1)款，7(1)嗰條，請你睇睇。

鄭偉波先生：我睇咗。

MR DUNCAN：（經傳譯員）你會睇到喺嗰條條文嗰度係有提及專營權公司要提供一系列嘅東西，其中包括就係一啲提升安全或者服務嘅設施擺喺嗰個巴士上面，而呢一啲都係應運輸署署長所作嘅合理要求，而且佢係有權不時咁樣提出呢啲合理要求嘅，睇到嘛？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）你哋係提供咗嗰個陳述書，你話畀我哋聽，就係話喺 2003 年嗰陣時，運輸署已經決定就係要--我哋成日都係叫做黑盒，當時運輸署署長就話所有嘅公共專營巴士都要安裝呢個黑盒嘅，咁講啱唔啱呀？

鄭偉波先生：正確嘅。

MR DUNCAN：（經傳譯員）跟住想問你呢一個問題，除咗 2003 年當時嘅運輸署署長作出咁嘅決定之外，運輸署署長有冇要求係其他指明嘅安全裝置要安喺個巴士上面呢？

鄭偉波先生：係有嘅，我舉兩個例子，就運輸署係有要求巴士公司喺車上面有啲較為--我諗我用英文先講到呢個字，啲“exposed seats”就要加裝安全帶嘅。而另外，我哋有小部分嘅巴士就係條樓梯係一條長嘅直樓梯，運輸署有要求我哋就要加裝額外嘅扶手。

MR DUNCAN：（經傳譯員）我哋知道，講到你哋巴士上面嘅裝置，亦都有個車速限制器嘅，你剛才咁樣答，意思係咪車速限制器係公司自己嘅決定，就唔係運輸署嘅要求，係咪呀？

鄭偉波先生：呢個不是運輸署嘅要求嚟嘅，係嗰個巴士生產商佢加落去嘅設施嚟嘅。

MR DUNCAN：（經傳譯員）所以部門唯一嘅要求就係嗰個黑盒、安全帶同埋嗰個扶手，係咪呀？你剛才所提及嘅。

鄭偉波先生：我剛才提及嘅就係兩個我記得嘅例子，但係我唔可以肯定就只係得呢幾樣嘢，即係可能仲有其他嘅嘢，我而家呢度就未必答得到你。或者咁樣，我畀我

啲嘅工程總監李先生提供多少少呢部分嘅資料。

李廣威先生：主席，喺我哋嘅 submission 嘅 Annex page 29。第 29 頁，Annex 1.6，係第一次 submission 嘅 Annex 1.6，裏面係一啲巴士公司同運輸署達成嘅一啲協議，裏面亦都係包括咗一啲嘅安全設施，喺我哋訂購新車嘅時候，係需要加裝，需要考慮嘅。裏面包括咗座位嘅設計，其中包括咗一啲無遮掩嘅座位係需要安裝三點式嘅安全帶；座位係儘量需要有頭枕；座位嘅設計同埋安全帶嘅設計，安全帶嗰個嘅定位同埋車身嘅結構需要符合歐盟嘅標準。

喺另外一啲嘅安全設施方面，喺雙層巴士嘅樓梯係需要有雙重嘅扶手，令到乘客上落嘅時候，可以有足夠嘅扶手可以搵扶嘅。我哋亦都需要考慮到玻璃嗰個嘅安全，亦都需要提供一啲打破玻璃嘅錘仔，係有足夠呢啲嘅設施喺緊急嘅情況底下可以打破玻璃。

我哋亦都需要提供一啲閉路電視系統，可以協助巴士喺倒車嘅時候，可以畀車長佢睇得到，亦都需要畀車長可以睇到上層嗰個嘅情況，同埋乘客上落嘅情況。

喺巴士嘅防火方面亦都需要所有嘅物料係符合一啲相關嘅規例。相關嘅規例亦都係列咗喺第 31 頁嘅嗰個表嗰度。

喺引擎室嗰度，我哋亦都需要係安裝一啲高溫嘅探測，係當巴士預到火警或者高溫嘅時候，就會喺車長室度會有一啲嘅警號。

至於冷氣系統方面，假如巴士喺引擎室發生火警，就需要有一個自動嘅閘去令到引擎室嗰度同個冷氣系統係分離。引擎室同埋車廂之間亦都需要加裝一啲金屬做嘅防火牆，令到當發生火警嘅時候，火勢唔可以容易蔓延到車廂裏面。

至於其他方面，我哋亦都需要提供咪錶同埋車速限制。另外，就係輪椅位嗰度個位置唔可以提供座位。

喺冷氣方面，我哋個冷氣系統亦都需要去有一個全天候嘅控制，乘客座位附近需要提供嘅冷氣出口亦都需要係可以調節風量或者方向，多謝主席。

MR DUNCAN：（經傳譯員）唔該晒，李生。我留意到呢份文件就係 2012 年 2 月份嘅，呢份係咪最新嘅文件嚟㗎嘞？即係喺方面，係咪最新嘅文件嚟㗎嘞？

李廣威先生：係，冇錯。

MR DUNCAN：（經傳譯員）以前嗰啲文件，即係上一份嗰啲文件係幾時㗎，即係對上嗰啲文件，日期係幾時呀？

鄭偉波先生：主席，而家我哋手頭上就冇嗰份文件嘅，而家大家睇到嗰份文件係我哋第一次收到嘅。

MR DUNCAN：（經傳譯員）呢份文件係咪經常檢討㗎嘛，係咪呀？即係運輸署同你

哋大家經常檢討住呢份文件㗎嘛，係咪？

鄭偉波先生：李生。

李廣威先生：呢份文件出咗之後，冇再檢討過。

MR DUNCAN：（經傳譯員）即係檢討完之後先至出呢一份，係咪咁嘅意思？

李廣威先生：呢份文件係喺多次嘅例會大家商討咗之後，就定咗呢一份文件，就喺 2012 年嘅時候，就係定咗出嚟。

MR DUNCAN：（經傳譯員）唔該晒。離開呢份文件之前，就我知道你提到嗰個即係限速嘅功能，其實你係睇到第 4(a)段都有講嘅。

李廣威先生：係，冇錯。

MR DUNCAN：（經傳譯員）睇嚟冇一啲嘅規格喺度個喎，就係呢個限速嘅功能嗰方面，係咪㗎？

李廣威先生：其實大家都知道，或者係過往我哋嘅車都已經係有一個限速喺 70 公理嘅功能，不過喺呢度定咗就係一個正規化，所以大家都理解巴士嗰個限速就係 70 公里。

MR DUNCAN：（經傳譯員）其實呢個係一個理解，你哋公司同運輸署之間有一個理解係咁樣，其實就冇一啲具體咁樣寫明喺文件入面嘅，係咪咁嘅意思？

李廣威先生：係，冇錯。

MR DUNCAN：（經傳譯員）唔該晒。

主席：（經傳譯員）或者我係加多句，嗰個限速器喺呢啲專營巴士喺屯門嗰個 2003 年慘劇之後係咪先至裝，定係點樣㗎？

李廣威先生：主席，其實喺好多年前，巴士已經有呢一個限速嘅功能，早過 2003 年。

主席：（經傳譯員）可唔可以同我哋講幾時開始裝嘅呢，咁樣？

李廣威先生：其實喺柴油引擎方面，喺柴油引擎其實本身係已經有一個收油嗰個功能嘅。以我記憶，其實喺三、四十年前已經有呢一個功能，不過就當時未必係可以指定限制到 70 公里嘅時候收油，可能就係譬如話 75 或者 80，係視乎嗰個引擎嗰個設計同埋波箱嘅設計。到咗歐盟二期嘅引擎嘅時候，因為可以有呢個電子控制，所以就可以好容易做到限制喺 70 公里嘅時候會收油呢一個功能。

MR DUNCAN：（經傳譯員）我哋講完第 7 項，我哋而家睇睇第 393 頁，都係嗰個專營權嘅協議，393。喺你嘅陳述書嗰度，你係提到嗰啲乘客聯絡小組。乘客聯絡小組，咁想問幾方面嘅，喺呢一度係關於呢個小組嘅。或者想請你係睇睇面前 15(3)，專營權嘅第 15(3)條。

鄭偉波先生：對唔住，我哋而家喺個畫面度睇唔到你所講嗰一頁。

MR DUNCAN：（經傳譯員）可唔可以就係睇一睇第 15(3)，393 頁，15(3)嗰度？我相信睇到，你而家係咪呀？

鄭偉波先生：睇到。我哋睇咗。

MR DUNCAN：（經傳譯員）唔該晒。呢條條款就係規定公司就要制定一啲規則係關於嗰個會議同埋成員嘅，你有冇頒布呢類咁嘅規則呢？

鄭偉波先生：呢個我請我嘅營運總監鍾先生回答。

鍾澤文先生：主席，我哋呢個乘客聯絡小組就係每兩個月嘅會舉行一次嘅，我哋會喺唔同嘅巴士總站嗰度係邀請一啲乘客，佢係喺--入嚟呢個會議係發表佢嘅意見。同埋喺呢個會議裏面，我哋會邀請運輸署嘅代表同埋呢個我哋公司嘅代表係同乘客去商討佢哋提出嘅問題。

主席：（經傳譯員）我諗個問題較為具體嘅，你哋公司係有冇頒布呢啲乘客聯絡小組嘅規則，關於個成員同埋開會？

鍾澤文先生：我哋係有同運輸署講咗究竟點樣做嘅。

MR DUNCAN：（經傳譯員）有冇係書面咁樣制定咗一啲規則呢？

鍾澤文先生：我哋冇。

MR DUNCAN：（經傳譯員）喺同一條條文嗰度亦都講咗話係運輸署署長可以作出指示，或者書面就係作一啲批准嘅，睇唔睇到嗰幾個字呀？

鍾澤文先生：睇到。

MR DUNCAN：（經傳譯員）照你所知，運輸署署長有冇係出過啲咁嘅指示，或者係作出咁嘅批示呢？

鍾澤文先生：我唔肯定，因為都較耐之前嘅事。

MR DUNCAN：（經傳譯員）呢啲開會呢就係時不時召開嘅，即使今時今日都仲係咁，啱唔啱呀？

鍾澤文先生：啱嘅。

MR DUNCAN：（經傳譯員）亦都想請你睇另一頁，係 CTB-2，170 頁。亦都係有一個翻譯本，係 172-1 嗰頁就係嗰個翻譯本。你會見到附件 4.1 就係你嘅陳述書，係附件 4.1，嗰個就係其中一個乘客聯絡小組開會嘅會議紀錄，日期就係 2018 年 2 月 27 號開會嘅會議紀錄，睇唔睇到呀？

鍾澤文先生：睇到。

MR DUNCAN：（經傳譯員）起碼喺翻譯本嗰度，我就睇唔到話究竟有幾多位乘客係出席當次嘅會議，有冇嘅呢？

鍾澤文先生：呢個會議紀錄冇寫低。

MR DUNCAN：（經傳譯員）一般會唔會係提及有幾多人出席嘅呢？

鍾澤文先生：呢個會議紀錄冇提及有幾多人出席嘅。

MR DUNCAN：（經傳譯員）你揭到去第 173 頁，同一個文件夾嘅 173 頁，173 頁，CTB-2 嘅 173 頁，嗰度睇嚟就係 2 月 28 號嘅會議紀錄嚟嘅。我想問，呢個會議紀錄嗰度有冇顯示話有幾多位乘客係出席該次會議呢？

鍾澤文先生：冇嘅。

MR DUNCAN：（經傳譯員）其實點樣決定係邊位乘客出席呢啲會議嘅呢？

鍾澤文先生：我哋係冇限制咩嘢乘客嚟出席嘅。喺開會之前兩個禮拜，我哋會係透過公司嘅網頁，同埋喺個將會舉行呢個聯絡小組嘅巴士站係張貼啲通告，就通知乘客嗰個會議嘅日期同埋時間。咁當日，乘客就會係自由去出席嘅。

MR DUNCAN：（經傳譯員）一般嚟講，有幾多乘客會係出席嘅呢？

鍾澤文先生：會視乎地區，一般都會有十個、八個嘅。

MR DUNCAN：（經傳譯員）你講係巴士總站，會唔會係有一個會議室係開會，定抑或喺戶外進行嘅呢？

鍾澤文先生：我哋係會安排一架巴士就係停喺嗰個巴士站嗰度嘅，咁個巴士嘅出面亦會張貼咗嗰個乘客聯絡小組會議，亦都有同事喺個巴士出面就係叫嗰啲乘客就參與咁樣嘅。

MR DUNCAN：（經傳譯員）再請你翻番去第 170 頁，麻煩你睇第 3 項，喺嗰一頁，嗰份文件嘅第 3 項，翻譯本就係喺 172-1 嗰頁嘅。翻譯嗰度就咁講嘅，就話建議係增加一個巴士車速顯示器，即係類似小巴嗰種，係安裝喺所有嘅巴士嗰度，同埋如果係超過嗰個車速限制，就會發出聲響嘅，睇唔睇到嗰項嘅紀錄？

鄭偉波先生：我睇到嘅。

MR DUNCAN：（經傳譯員）就想請你睇睇，呢度就話係公司嘅回應，講到話係回應番喺車上係安裝某一啲設施，公司就會評估嘅，咁就係睇番一啲因素，譬如話係運作嘅成本、經濟效益同埋嗰個技術嘅問題。目前嚟講，就係冇計劃安裝所講嘅有關設施，睇唔睇到嗰項紀錄？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）我想問下，自從 2018 年 2 月開始到而家有冇進行過你呢度所講嘅評估呢？

鄭偉波先生：其實我哋就係進行咗另一方面嘅評估，因為我哋就擔心個乘客會有更大嘅機會同我哋嘅車長喺架巴士上面發生爭執，因為即係而家其實近年都有啲乘客同車長有磨擦嘅情況出現。我哋就係驚，比喻嚟講，嗰段嘅路段嘅限速係 50 公里，而當時我哋嘅車長譬如佢係揸緊 52 公里，喺乘客嘅角度，佢就覺得呢個係超速。如果個乘客選擇即時同我哋嗰個車長理論嘅話，呢個會滋擾我哋嘅車長，所以我哋公司選擇就係透過個黑盒系統，咁就得知我哋嘅車長駕駛嘅時候有冇超速，繼而我哋就會有啲內部嘅懲處，就跟番我哋公司內部嘅指引嚟到懲處有超速嘅車長。我哋覺得呢一個方法就唔會製造一個機會畀車長同乘客發生磨擦，而同時我哋亦都可以監察到我哋車長有否超速，多謝。

MR DUNCAN：（經傳譯員）鄭生，你意思係咪話你哋決定咗係唔會安裝呢一啲車速顯示器？

鄭偉波先生：喺現時，我哋嘅評估就係冇需要安裝呢個車速顯示器，反而對於監察車速，我哋會著重喺透過我哋嘅黑盒系統，我哋覺得呢個係更加有效。

MR DUNCAN：（經傳譯員）委員會就係知道嘅，呢一啲顯示器就會係按呢個運輸署嘅要求喺公共小巴嗰度安裝，香港嘅情況係咁嘅，你知唔知道呀？

鄭偉波先生：我見過公共小巴有呢個顯示器。

MR DUNCAN：（經傳譯員）我想問，公司有冇查詢過，即係話係咪咁樣樣係有引致到公共小巴嘅司機同乘客之間係有磨擦呀？

鄭偉波先生：其實好多人搭公共小巴就係貪佢開得快，咁變咗啲乘客--即係我唔覺得啲乘客見到佢有超速嘅情況底下，就走去同佢磨擦嘅，即係呢個喺我哋香港人真係有去搭公共小巴，尤其是喺夜晚嘅時候，呢個係經常嘅現象嚟嘅，變咗就同搭我哋專營巴士係唔同嘅。

MR DUNCAN：（經傳譯員）我哋講番嗰份專營權文件。

主席：（經傳譯員）對唔住，鄧大律師，你未繼續之前--鄭先生，似乎公司就係決定咗就唔會喺巴士上面，喺呢個時候安裝車速顯示器，係咪？

鄭偉波先生：除非呢個係一個規定，否則我哋冇計劃去安裝呢個顯示器。

主席：（經傳譯員）你有冇將呢一個決定係話番畀你哋嘅乘客聯絡小組知呀？即係 2 月嘅時候開會吖嘛。

鄭偉波先生：鍾生回答呢個問題。

主席：（經傳譯員）唔該。

鍾澤文先生：我諗我哋喺即場已經係回答咗嗰個乘客，就係我哋喺嗰個回應嗰度寫嘅，就係話我哋現階段係暫無計劃加裝有關設施。

主席：（經傳譯員）有冇將你嘅評估結果，包括係嗰啲因素，即係話營運成本、經濟

效益同埋技術問題係話畀個乘客知呢？

鍾澤文先生：我哋話畀乘客聽嗰陣時係有講埋呢啲原因嘅。

主席：（經傳譯員）但係嗰個會議紀錄就係話你哋進行評估，有冇進行過評估？如果有進行過評估，評估咗之後，有冇通知番呢個乘客聯絡小組呢？

鍾澤文先生：冇嘅，因為我哋係冇佢哋嗰個聯絡方法。

主席：（經傳譯員）你有冇進行過評估呢？

鄭偉波先生：主席，我哋係未進行呢個評估嘅，因為我哋喺另一個角度嚟到睇呢件事，嗰個關注反而就喺嗰個車長同乘客之間可能發生磨擦，嗰個我哋覺得係一個最主要嘅因素，我哋唔打算去安裝呢個顯示器。

主席：（經傳譯員）唔該晒。鄧律師。

MR DUNCAN：（經傳譯員）係，主席。或者而家想睇番嗰個專營權協議，而家就想睇一睇第 TD-2，410 頁。或者想大家睇一睇第 33 條，呢份文件嘅 33 段，或者請大家係睇一睇當中嘅內容。

鄭偉波先生：我哋睇咗嘅。

MR DUNCAN：（經傳譯員）唔該。或者想你哋睇一睇另一份文件 CTB-2，頁數就係 32 頁。CTB-2，32 頁，喺第 32 頁，呢度係比較難睇嘅，附件二，2.1，係你嗰個陳述書嘅當中嚟嘅，NWFB，寫住“Fuller Disclosure 2017”咁樣嘅，個版面係咁樣，大家睇唔睇到？

鄭偉波先生：我哋睇到嘅。

MR DUNCAN：（經傳譯員）唔該。可唔可以係睇一睇嗰份文件，就睇第 42 頁，文件嘅第 42 頁。CTB-2，第 42 頁。咁睇唔睇到喺呢一版，有一個標題就係“Corporate Social Responsibility”，即係企業社會責任，睇唔睇到呀？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）我咁理解啱唔啱呢？即係話呢個企業社會責任呢一份文件，就係嗰個專利協議嘅第 32 條當中係有咁規定嘅，係咪呢？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）唔該。呢一版，喺呢一版嗰度，企業社會責任其實就係喺呢一個即係更全面披露呢一份文件當中係有關嘅，喺呢一個專利權嘅協議嗰度就冇睇到呢一個即係更全面披露呢一份嘅文件，即係城巴概覽，咁可唔可以同我哋講講，即係幾時係出呢一份文件嘅？即係呢一個 Fuller Disclosure，即係全面披露呢一份嘅文件。

鄭偉波先生：主席，呢一份文件係我哋每一年出一次嘅，就每一年喺 10 月嘅時候出嘅。

MR DUNCAN：（經傳譯員）呢個係咪一個規定嚟㗎，還是係自願咁做，公司自願咁做定係點？因為我睇唔到喺嗰個專營權協議當中有咁樣講嘅？

鄭偉波先生：呢個係運輸署嘅規定嚟嘅。

MR DUNCAN：（經傳譯員）咁幾時係有咁嘅規定㗎？

鄭偉波先生：以我嘅記憶，都有超過十年。

MR DUNCAN：（經傳譯員）咁每一年出，係咪呀？即係公司每年出嘅，呢一份，係咪？

鄭偉波先生：正確嘅。

MR DUNCAN：（經傳譯員）我想你睇一睇 39 頁，文件夾嘅第 39 頁。CTB-2，39 頁。當中就係有個標題就係「財務資料」咁樣。

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）當中就有一個損益表 2017，6 月 30 號嘅。

鄭偉波先生：見到。

MR DUNCAN：（經傳譯員）想你睇一睇營業額嗰一個部分，營業額就有兩項，車費嘅收入同埋廣告嘅收入。公司嗰個廣告入收入嗰個來源係點樣㗎？

鄭偉波先生：喺當年，我哋公司嘅廣告收入就係分開三部分嘅，有三個來源：第一，就係喺我哋啲巴士站上面嘅廣告；第二，就喺我哋嘅巴士車身上面嘅廣告；第三，就係喺巴士裏面，就有啲電視機咁樣嘅嗰個--嗰啲愛嚟賣廣告嘅。但係第三種就喺舊年開始就冇咗，因為呢一個嘅廣告模式就唔受歡迎，所以冇咗。喺現時，我哋就只係有兩種廣告嘅收入來源，第一，就係巴士站嘅廣告收入；第二，就係巴士車身嘅廣告收入。多謝。

MR DUNCAN：（經傳譯員）咁公司有冇計劃從其他來源係開源，咁係攞一啲廣告收入番嚟呢？

鄭偉波先生：其實可以攞到收到嘅來源，我哋都已經探討齊晒。

MR DUNCAN：（經傳譯員）或者而家想你睇一睇嗰個專營權嘅協議，TD-2，第 410 頁。而家想大家睇一睇第 34 條，或者大家睇一睇個內容。

鄭偉波先生：我睇咗。

MR DUNCAN：（經傳譯員）呢條條文就係講到有一個每年嘅報告，公司有冇一個即係每年經審核嘅一個報告，喺呢度規定嘅報告有冇每年出㗎？

鄭偉波先生：有嘅。

MR DUNCAN：（經傳譯員）唔該。咁你喺個陳述書有冇提到呢一點呀？

鄭偉波先生：係有。

MR DUNCAN：（經傳譯員）可唔可以同我哋講講係邊一度呀？

鄭偉波先生：係喺我哋第一個 submission，first submission 嘅第 15 頁第 6 段嘅 A3。

MR DUNCAN：（經傳譯員）唔該晒。呢個係有講到審核機構嘅名稱，即係睇個報告，係咪？有講，係咪？

鄭偉波先生：有，係香港品質保證局，HKQAA。

MR DUNCAN：（經傳譯員）咁公司係咪可以向委員會提供一啲報告嘅一啲樣辦？

鄭偉波先生：可以嘅，我哋可以後補呢個資料。

MR DUNCAN：（經傳譯員）唔該晒。而家講完呢一個--暫時講完呢個專營權協議先。我而家就想問--或者想請你睇 CTB-2 嘅另一份文件，呢一份文件就喺第 64 頁嘅。CTB-2，64 頁。

鄭偉波先生：見到。

MR DUNCAN：（經傳譯員）唔該。你而家睇嘅文件就係嗰個架構圖。

鄭偉波先生：見到。

MR DUNCAN：（經傳譯員）呢個架構圖係咪顯示出嗰個高層管理層嘅架構呢？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）公司其實係咪有一個即係專門管安全嘅部門㗎？

鄭偉波先生：喺呢個文件就有一欄就係 Head of Operations，營運總監。喺呢個 Operations 嘅 division 轄下，其中有部門就係負責 service quality 嘅，而呢個部門就係譬如話我哋有車長嗰個服務唔好，做咗啲違規嘅事情，或者有交通意外，都係由呢個部門負責調查同埋懲處嘅，多謝。

MR DUNCAN：（經傳譯員）公司有冇一個部門係好積極咁樣睇安全嘅問題，即係唔係話單係咁樣被動式咁樣係睇嗰啲安全有違反嘅情況，有冇積極咁睇嘅呢？

鄭偉波先生：主席，呢個公司以往嘅做法，以往就係如果即係有啲新嘅譬如話科技咁樣，我哋嘅同事就會嚟報告番畀我知，我覺得有需要就會搵埋其他高級嘅同事，就愛嚟研究呢啲嘢嘅可行性。而另外如果有大型嘅交通意外發生咗，我哋相關嘅同事就包括埋我、營運總監鍾先生、我哋嘅工程總監李先生同埋佢轄下相關嘅經

理都會去檢討嗰個意外嘅成因。

我哋係喺近排就正式成立咗一個安全委員，呢個安全委員會嘅職能就係去檢討同埋去審視所有我哋公司有關安全嘅事項。而呢個安全委員嘅成員就包括我就係個主席，跟住就係營運總監、工程總監、人力資源總監同埋高級營運經理，同埋高級工程支援經理。而頭先我述嘅呢個安全委員會嘅成員，其實喺香港個巴士行業嗰個工作經驗係非常豐富，頭先我講過嗰幾位成員，每一個人喺香港巴士嘅工作經驗都超過二十年，多謝。

MR DUNCAN：（經傳譯員）如果我個理解係正確嘅話，你提嘅係安全委員會係最近先至成立，係咪？非常近期先成立嘅，係咪？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）即係近到幾時呢？

鄭偉波先生：大約係三個星期之前。

MR DUNCAN：（經傳譯員）之前有冇邊一位人士係你公司嘅僱員，而佢嘅職責就係專注安全嘅呢？

鄭偉波先生：我哋冇特定話係邊一位僱員，因為有關安全嘅嘢，其實就係我哋即係今日坐喺呢處幾位公司嘅高級嘅人員大家都有責任。

MR DUNCAN：（經傳譯員）委員會明白隨住時間，我哋有新嘅係唔同嘅安全有關嘅係技術，咁直到係你成立呢個安全委員會之前，我就想問下，公司裏面有邊個人係負責睇住跟進住不時變化係安全有關嘅技術嘅呢？

鄭偉波先生：有關呢啲安全嘅技術，我哋嗰個信息嘅來源主要都係嚟自我哋巴士嘅供應商。巴士供應商如果佢係知道有呢啲嘅新科技，而又已經證明到有成效嘅話，佢哋喺同我哋公司工程部嘅同事開會嘅時候就會話畀我哋知，我哋當然就要詳細去了解到底嗰啲新科技係點樣去運作，同埋是否適合香港嘅應用，多謝。

MR DUNCAN：（經傳譯員）想請你睇番係 CTB-1，第 54 頁。你去到第 54 頁未呢？呢個係你嘅 5 月 18 號嘅陳述書嘅第 1 頁。

鄭偉波先生：去到。

MR DUNCAN：（經傳譯員）係喺呢封信嘅第二段，你就係提及話成立咗一個安全委員會？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）你哋有冇打算係聘用任何人士，又或者係提名任何人士讓佢係有專門嘅責任嚟到去睇呢一個巴士嘅安全呢？

鄭偉波先生：你嘅意思係外面嘅人士定係我哋自己內部呢？

MR DUNCAN：（經傳譯員）兩樣是但一樣都得嘅。

鄭偉波先生：就現時我哋就冇計劃去聘任外面嘅人士入呢個委員會，因為頭先我哋亦都講過，其實我哋喺呢個委員會裏面嘅所有嘅成員，其實都喺香港有好長嘅巴士公司工作嘅經驗。而至於喺內部，我哋公司嘅內部，因為我自己嘅睇法，就係話有關呢啲安全嘅嘢其實牽涉嘅範圍就係跨部門性，可能係個車裏面嘅設施，亦都包括車長嘅訓練，亦都包括車長嘅招聘。所以喺呢一個委員會裏面，嗰個叫做primary responsibility 嗰個人就係我自己嚟嘅，因為我係睇晒咁多個部門，因為我係呢個委員會嘅主席嚟嘅，所以個負責人就係我嚟嘅。

MR DUNCAN：（經傳譯員）國際機構標準，你熟唔熟呢？ISO39001，你熟唔熟悉？

鄭偉波先生：我係近日先至聽過，之前我係未聽過，唔熟。

MR DUNCAN：（經傳譯員）或者將其中一份文件係畀你睇睇，咁我哋委員會係有收到呢一份文件。請你睇番TU-1嘅第18頁。

鄭偉波先生：見到。

MR DUNCAN：（經傳譯員）鄭先生，其中我哋收到嘅一份意見書就係抽咗呢一度出嚟，我哋就係有道路安全研究小組所提交嘅意見書，你熟唔熟呢一個係道路安全研究小組（Community for Road Safety）？

鄭偉波先生：唔認識。

MR DUNCAN：（經傳譯員）好。麻煩你睇一睇嗰一頁嘅最後一項，個標題就係「巴士道路安全－安全管理系統」，麻煩你自己睇一睇先。

主席：（經傳譯員）鄧律師，其實我哋半夜係咪運輸署有交過啲資料上嚟，就講及係嗰個成員嘅呢？

MR DUNCAN：I think we did, Mr Chairman.

主席：（經傳譯員）或者可以協助係證人，咁可以將啲名畀佢睇一睇。

MR DUNCAN：（經傳譯員）鄭先生，剛才有機會睇到嘛？

鄭偉波先生：我而家睇到嘅，就係而家呢個screen我睇唔到嗰啲成員。而家見到。

MR DUNCAN：（經傳譯員）呢一個機構話呢個組織嗰啲名字係你認唔認識？

鄭偉波先生：裏面只係有一個名字我係見過嘅。

MR DUNCAN：（經傳譯員）邊一個名？

鄭偉波先生：（經傳譯員）係司馬文。

MR DUNCAN：（經傳譯員）好，唔該。而家唔睇嗰個成員，就睇番剛才嗰份文件。

我就先想請你睇嘅，TU-1 嘅第 18 頁。嗰一頁嘅最後一段，鄭先生，佢會係繼續到跟住嗰版嘅，請你繼續自己再睇一睇呢一段文字。

鄭偉波先生：呢一版睇咗。

MR DUNCAN：（經傳譯員）麻煩你亦都睇睇 TU-1 第 53 頁。另一份文件嚟嘅，不過亦都係一個道路安全研究小組發出嘅。我想麻煩你睇 3.5 段之前嗰一段嘅，佢嗰個標題就係 ISO39001 道路交通安全管理系統，我想請你自己睇一睇嗰一段文字。

鄭偉波先生：睇咗。

主席：（經傳譯員）鄧律師，或者我哋亦都打埋第 25 頁出嚟。呢個就係呢份文件嘅首頁，係 2018 年 4 月--對唔住，2015 年 4 月嘅文件嚟嘅。

MR DUNCAN：（經傳譯員）係，想麻煩你亦都睇一睇呢份文件嘅首頁嗰個封面，道路安全研究小組一個關於香港巴士安全嘅報告。我想問你自己有冇睇過呢個報告？你熟唔熟佢嗰個內容嘅呢？

鄭偉波先生：冇睇過。

MR DUNCAN：（經傳譯員）剛才係抽咗一部分出嚟畀你睇，嗰啲內容就係話講及嗰個標準，如果有嘅話，就會讓嗰個車隊嘅經營者就更加就係問責，同埋係更加主動咁樣去減少個意外同埋風險，有冇睇到剛才所提及嘅嗰個部分？

鄭偉波先生：有睇到。

MR DUNCAN：（經傳譯員）你睇咗之後，你會唔會認為係值得你哋公司去考慮呢？

鄭偉波先生：首先，呢個 ISO39001，就我哋對佢完全冇任何認識嘅，就喺香港公共運輸行業，我亦冇聽過有邊一間大間嘅公司係有應用到佢呢一個 ISO 嘅。我其實就係喺之前，就呢個委員會同運輸署嗰個 hearing 嘅時候，我喺嗰處先至得知有呢一個 ISO39001 嘅。

當然我完全唔知道佢係乜嘢嚟嘅，咁我就答唔到話是否會去用呢一樣嘢。我哋公司對於任何可以幫到我哋嗰個安全嘅嘢，只要係可行嘅，同埋我哋有足夠嘅財政資源愛嚟應用佢，我哋都係持開放態度嘅。呢一個我諗將來我哋要真係去了解一下，呢一個 ISO39001 到底喺乜嘢國家，乜嘢公司係有應用到，而應用咗之後嗰個成效又到底係點樣樣，咁我哋先至可以就較為深入咁樣去考慮佢，多謝。

MR DUNCAN：（經傳譯員）喺安全嗰個角度嚟講，你公司係咪都是不是即係睇下外國嘅公司...

主席：（經傳譯員）鄧律師，等一等先。我諗對鄭生嚟講，就係即係我睇喺呢一個即係嗰份陳述書，即係 24、25 頁嘅陳述書嗰度。呢個係第 8、第 9 頁嘅號碼。

MR DUNCAN：（經傳譯員）我諗係可以打出嚟嘅。

主席：（經傳譯員）因為尋晚好夜先至出，就未有準備得咁好，咁大家可以應該睇到運輸署嗰啲資料，我相信係，或者落啲，第 24、25，或者係花少少時間。鄭生，花少少時間睇下第 24 段先。23 段可唔可以打埋出嚟呀？然後就睇埋 24 段--對唔住，應該係 24、25 先啱。

鄭生，可以幫幫你手。我哋喺運房局同埋運輸署嗰度都畀個證供，咁呢個就係 2012 年係提出呢啲，其實呢個系統就係 2012 年嗰度係引進嘅，佢就而家就係睇下係唔係有效咁樣，同埋係咪即係應該係要採納嘅，採納幾多咁，或者呢方面你可能冇嘢補充嘅，即係你未必咁熟悉呢一方面。

鄭偉波先生：我其實係對於呢個 ISO39001 係冇認識嘅，所以對唔住，我係冇嘢補充嘅。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）或者離開呢個課題之前，或者鄭生想講講，你就係喺今日聆訊之前係冇睇到呢度，咁將來會唔會考慮呢？

鄭偉波先生：將來我哋會去探討一下到底係乜嘢嘢嚟嘅，我哋係會考慮嘅。

主席：（經傳譯員）係，你話如果可行嘅話，你都係會保持開放態度，係咪？

鄭偉波先生：正確嘅。

MR DUNCAN：（經傳譯員）而家想睇睇招聘嗰方面，咁其實你今朝亦都係有提過嘅。委員會係得到知會，係透過啲陳述書同埋透過聽證會咁樣，就係多年嚟係的確有短缺，係比較少人鍾意想揸巴士，想投入呢個行業，可唔可以假定就係你公司都係有同樣嘅問題呢？

鄭偉波先生：主席，喺近年我哋招聘車長係有困難。

MR DUNCAN：（經傳譯員）我要想你睇一睇 CTB-1，第 24 頁。呢份就係喺第一份嘅陳述書當中抽出嚟嘅。

鄭偉波先生：見到。

MR DUNCAN：（經傳譯員）最後嗰段，呢版嘅最後嗰段。喺呢一段你提到要符合最新運輸署嘅指引，同埋係要達到內部嗰個嘅目標，公司就係需要係請多一百二十位嘅車長咁樣。

鄭偉波先生：係，睇到。

MR DUNCAN：（經傳譯員）公司其實有冇一啲計劃係增加車長嘅工資，希望係吸引到更多人係投身呢個行業呢？

鄭偉波先生：公司喺 2018 年嘅 3 月就已經對於我哋嘅車長，尤其是新入職嘅車長就

有個特別嘅加薪嘅，我哋公司所訂立嘅薪金制度，其實都係要因應個勞工市場嘅情況嚟到訂立嘅。

MR DUNCAN：（經傳譯員）3 月係加咗幾多？

鄭偉波先生：喺新入職嘅車長嚟講，就加咗係大約 8 至到 9%--sorry，新入職嘅車長係大約加咗 6%。

MR DUNCAN：（經傳譯員）委員會係收咗一啲嘅陳述書，就係講到話嗰個嘅巴士車長嘅收入其實係唔夠競爭力，喺呢個運輸界其實唔夠競爭力。我就想請你睇一睇呢兩份嘅陳述書。第一份就係喺嗰個雜項嘅文件夾 MISC-3(MISC-2?)，644 頁。份文件就係 643 頁開始嘅，係兩版嘅。係民主陣線嘅一份陳述書嚟嘅。鄭生，有冇睇過呢份文件？

鄭偉波先生：我冇睇過嘅，但係而家我係睇緊。

MR DUNCAN：（經傳譯員）唔該。仲一度我想係你留意下，不過你睇一睇喺第 2 頁嗰度，第 2 項嗰度，2.1，係講到目前係專營巴士車長嘅薪酬待遇，你花少少時間係睇一睇，跟住我就會好具體咁樣係睇 2.1 嗰段嘅內容。

主席：（經傳譯員）鄭生，或者係你可以聽下鄧律師講就睇一睇份文件，咁我哋而家會有個小休嘅，或者喺小休嘅時間，你就花啲時間就再深入啲去睇，可唔可以咁樣？咁樣好唔好？

鄭偉波先生：好。

主席：（經傳譯員）係，好。或者而家可以係小休二十分鐘，我哋係廿分鐘之後再開會。

鄭偉波先生：主席，我有個請求，可唔可以畀我哋睇到中文版本，呢份文件？

主席：（經傳譯員）係，冇問題嘅。

鄭偉波先生：多謝。

主席：（經傳譯員）亦都係有紙張嘅版本畀你嘅，可唔可以係畀一份文本畀鄭生睇睇？

MR DUNCAN：Certainly.

主席：（經傳譯員）休息廿分鐘，唔該。

鄭偉波先生：好，多謝主席。

上午 11 時 29 分聆訊押後

上午 11 時 51 分恢復聆訊

出席人士如前。

主席：（經傳譯員）大律師。

MR DUNCAN：（經傳譯員）多謝你，主席。鄭生，有冇機會睇到份文件呀？

鄭偉波先生：睇咗。

MR DUNCAN：（經傳譯員）剛才想問嘅就係 2.1 段，第 2 頁，特別係有提到就話根據呢個民主陣線就係話啲專營公司嘅車長就係 15,000 蚊嘅薪酬待遇嘅，咁就係比--對於非專營車長嘅$17,000 就係少咗 2,000 蚊嘅，咁呢個係咪你嘅理解嚟㗎？

鄭偉波先生：我其實就唔清楚佢講緊嘅人工係幾多小時嘅工作，因為佢呢度就只係引述咗兩個數目字，就一個就$15,000，一個就$17,000，就非專營巴士嗰處我就冇嗰個資料，不如我哋集中講一講我哋公司嗰個薪酬嘅情況。我哋公司嗰個車長薪酬情況，就喺我哋嘅 first submission。

MR DUNCAN：（經傳譯員）我唔想係打斷你，鄭生，我哋一陣間就會講到呢一方面嘅。

鄭偉波先生：好。

MR DUNCAN：（經傳譯員）咁你一陣間係有機會就係進一步解釋呢一方面嘅資料，但係就住呢一點，呢一個聲稱，佢話係有賸咗 2,000 蚊吖嘛，公營嘅巴士車長同呢個非--專營同非專營係賸咗 2,000 蚊咁樣，咁呢方面你有冇嘢想講呢？

鄭偉波先生：喺我哋公司喇，嗰 1,500 蚊呢個數字我係不同意嘅，因為...

MR DUNCAN：（經傳譯員）點解呢？

鄭偉波先生：...我哋公司嘅車長就一般嚟講，平均一日都有兩小時嘅加班工作嘅，所以如果以十小時嚟到計喇，十小時工作時間嚟到計吖，佢哋一般個平均都係呢個數字嚟嘅，佢哋嘅月薪就大約係有兩萬蚊左右嘅，咁呢個就係喺我哋公司十小時工作嚟到計，咁而非專營嗰處，佢話嗰 17,000 蚊，我就完全冇概念，唔知道佢係講緊幾多小時嘅工作嘅，所以就我唔能夠作出個比較。

MR DUNCAN：（經傳譯員）唔該你。我就講你哋公司嗰個待遇之前，仲有一樣嘢我就想係你睇一睇嘅，就係咁亦都係 MISC 第 2 號嘅文件夾，咁今次就係 632 頁。係有份翻譯本嘅，就係 642 頁第 2 號，642 嘅 2。可唔可以打埋呢一個 642 嘅中文版--632 嘅中文版？係邊個寫㗎，呢一份文件？照我理解就係係工

盟同埋工黨，同埋呢一個嘅職工會嘅一個聯會。鄭生，一版嘅啫，或者想請你係睇一睇呢份文件嘅內容，咁跟住我就會係向你問一、兩個問題，係關於下--比較底嘅段落，係保障車長公工資水平、保障巴士服務質素嗰一段，大家睇唔睇到？

鄭偉波先生：睇到嘅。

MR DUNCAN：（經傳譯員）唔該。花少少時間係睇一睇，鄭生，一陣間我就會問問題嘅，好唔好？

鄭偉波先生：睇完喇。

MR DUNCAN：（經傳譯員）好喇，呢份文件所指稱嘅就係目前新入職嘅車長嘅底薪就係 15,364 蚊，咁就係低於陸路運輸工資中位數嘅$18,200 嘅，咁車長就係惟有超時工作嚟到養妻活兒喇，咁難怪車長嘅人手係不斷流失。或者後面嗰度唔好講喇，咁呢份文件其實所作出嘅比較，咁你其實個理解係咪都係咁樣呢？

鄭偉波先生：主席，呢個問題我會畀我哋嘅人力資源總監吳先生嚟到回應嘅。

主席：（經傳譯員）係，唔該。

吳智光先生：好，主席。正如頭先鄭先生所講，喺嗰個整體入息嚟講，一個車長一個月如果佢做大概係有每日多兩個鐘頭嘅超時工作嘅話，佢嘅總體入息水平大概已經係去到港幣兩萬蚊左右嘅，咁所以如果喺呢個通告所寫嘅，用底薪嚟比對呢一個中位數，呢個係唔公平嘅，並不是蘋果對蘋果嘅一個比對嘅。多謝，主席。

MR DUNCAN：（經傳譯員）或者係一陣間會講得詳細少少喇，但係正話所講嘅其中一個睇法就係嗰個底薪，一個專營巴士嘅底薪，唔好計嗰個嘅超時補水喇，就係$15,364 嘅，咁相對於嗰個嘅陸路運輸工資中位數$18,200，你可唔可以係講--評論一下，即係點解唔係一個合理嘅比較呢？其他加薪唔好講，補水唔好講。

吳智光先生：好，主席，據我哋嘅理解，呢個陸路運輸工資中位數係包含埋超時工作嘅，並不是淨係個基本底薪嘅，多謝，主席。

MR DUNCAN：（經傳譯員）咁講啱唔啱？運輸署係完全冇規定車長嘅薪酬嘅，薪酬完全就係由公司去決定，啱唔啱？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）大家睇一睇其他嘅薪酬嘅數字，你哋係交咗呢啲數字上嚟畀我哋嘅，鄭生睇過嘅，你亦都有睇過嘅，有關嘅數字可以睇番 CTB-1，第 30 頁--實質上應該係 34，第 34 頁先至啱㗎，CTB-1，34 頁。你睇第 9 段，你話畀委員會聽，就係你哋嘅全職車長嘅薪酬係點樣樣㗎，咁我哋見到首先係城車嘅資料㗎，如果係喺 1999 年 3 月 9 號嗰日或之前受聘嘅話，咁嗰個底薪

就係 17,106 蚊，啱唔啱？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）揭去跟住嗰版第 35 頁，呢個就係有第二個組別喇，係喺 1999 年嘅 3 月 10 號至到 2004 年 3 月 8 號期間受聘嘅，佢嗰個底薪就係 15,874 元？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）有第三個組別嘅，受聘嘅日期係喺 2004 年 3 月 9 號或之後，佢哋嘅底薪就係 15,364 元至到 15,764 元？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）跟住個資料唔係完全一樣，不過你哋亦都有分類嘅，就係講及係新巴，嗰個資料係由第 35 頁係去到第 36 頁嘅。如果我嘅理解冇錯嘅話，2004 年 3 月 9 號之後嘅薪酬，兩間公司嘅係一樣㗎。你可以睇番第 35 頁嘅第 3 段，嗰個數字就係同新巴嘅第四項嗰度嘅數字係一樣㗎，啱唔啱？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）唔該晒。我哋而家睇番 35 頁喇，我想係進一步了解一下呢度嘅資料，我初步睇過嘅，如果你睇，你就會得出一個咁樣嘅印象，巴士車長嘅底薪其實就冇加，反減咗個嘢，我有咁嘅印象，因為我就淨係睇嗰個底薪喇，即係話你比較 99 年 3 月同係 99 年 3 月嘅--同 2004 年 3 月之後嘅數字係唔同㗎，一個就係$17,166 同埋$15,364、一個$15,874，咁係咪係減少緊呢？

鄭偉波先生：呢個係唔同時期入職嘅車長佢哋嗰個薪酬係不同嘅，呢個就係我哋因應當時勞工市場嗰個供求情況嚟到制訂嘅。

MR DUNCAN：（經傳譯員）實質上係下降咗，04 年 3 月之後對比起之前，嗰個數目係減少咗㗎，係嘛？

鄭偉波先生：係。

MR DUNCAN：（經傳譯員）好，點解嗰個底薪$15,364--咁等我再問一次，再問過，我想問，今時今日，2018 年，今日今日嘅底薪係幾多？呢度寫「$15,364 至到$15,764」，咁今時今日，2018 年嗰個底薪有幾多吖？

鄭偉波先生：現時佢哋嘅底薪就係呢個數字，不過我哋公司現正係同唔同嘅工會商討緊 2018 年度嗰個加薪嘅，咁到加咗薪之後就嗰個數字會係唔同嘅。

MR DUNCAN：（經傳譯員）咁你可唔可以估計一下？即係大概會跳咗幾多，可唔可以話畀個百分比我哋？你可唔可以講下雙方各自嗰個睇法係幾多呀？

鄭偉波先生：我就聽到工會就有個睇法，有啲工會就要求要加 8%，有啲工會就要求就要加 10%，咁而公司就都未定得到會係加幾多，所以我唔可以喺呢度猜測就會多幾多錢，因為如果咁樣嘅話，可能就畀咗一個錯誤嘅信息我哋工會嘅同事，因為頭先我都見到我哋有啲工會嘅成員而家都喺觀眾席度。

MR DUNCAN：（經傳譯員）我明白嘅，鄭先生。今時今日嗰個現行嘅底薪都仲係$15,364 至到$15,764，啱唔啱？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）我咁嘅理解又啱唔啱？以底薪嚟到計，自 2004 年到而家，係冇調整過--冇加過㗎？

鄭偉波先生：不是，而家呢個二零--我哋--其實我哋公司喺每一年都會同我哋嘅工會同埋員工代表嚟到商討嗰個每年嘅加薪嘅，咁現時你喺呢處見到嘅數字就係我哋公司 2017 年嘅薪金水平嚟嘅，咁 2018 年就要等我哋同佢商討咗之後先至會定到嗰個數字喇，咁我哋其實每年都係有--喺過往十年喇，過往十年，每年都有加人工嘅，甚至喺過往二十年，除咗係即係香港個經濟特別差嘅時候就會凍薪，否則，我哋每一年都係有加人工畀我哋嘅員工㗎。

MR DUNCAN：（經傳譯員）2017 年嗰個底薪，作為一個車長係$15,764 喇，啱唔啱？

鄭偉波先生：新入職嘅車長係$15,764，2017 年。Sorry，係$15,364 嘅。

MR DUNCAN：（經傳譯員）咁又有一個數字$15,764，...

鄭偉波先生：係。

MR DUNCAN：（經傳譯員）邊個先攞到$15,764 呢？

鄭偉波先生：佢哋入職嘅時候就係$15,364，咁佢就有個增薪點嘅，就係根據佢哋嘅年資，咁個增薪點就做得耐啲嗰啲就會去到$15,764 嘅。

MR DUNCAN：（經傳譯員）嗰個$15,764 就係以 2017 年嚟到計，就係最高係咁㗎喇嗲，係嘛？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）如果我理解係啱嘅話，咁呢個係少於 2004 年嘅時候嗰個薪酬喇嗲，當時係$15,874 吖嘛，咁講啱唔啱？

鄭偉波先生：唔可以咁樣嚟到比較，因為佢哋係唔同時期入職就係唔同嘅薪酬架構㗎，咁我哋公司呢度我哋睇到個數據喇，就係啲好多年前已經入職嘅，佢哋嘅人工就係高啲嘅，因為當時喺香港請人係比起而家更困難㗎，咁隨住香港個經濟環境有所改變，咁喺嗰個勞工市場嗰個供求情況亦都有所改動，咁我哋當時就係用一個較低嘅薪金都可以請到人返嚟㗎，咁所以唔同時期入職嘅人，佢嗰

個--喺去到今日嗰個人工係唔同嘅。

MR DUNCAN：（經傳譯員）我都明白嘅，咁我要確保我嘅理解係啱㗎，即係對於你所作嘅證供。一個新入職嘅車長，如果佢係 2004 年 3 月 7 號入職，係會攞到 15874 作為佢嘅底薪，啱唔啱？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）以下所講嘅都啱㗎，係嘛？如果係今時今日作為一個新入職嘅車長，佢嗰個底薪就係$15,364 喇，係咪呀？即係話少咗 500 蚊喇，...

鄭偉波先生：係嘅。

MR DUNCAN：（經傳譯員）就對比佢嘅--同時係 2004 年嘅時候入職？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）係，唔該晒。我知道係有其他嘅津貼，你亦都有提過㗎，喺第 35 頁嗰度有呢啲津貼，剛剛有提過，即係如果我理解係啱嘅話，最好嘅時候，一個車長加埋補水係會去到係賺到一個月 20,000 蚊㗎，係咪呀？咁嘅理解啱唔啱？你嘅作證係咪咁講？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）點樣由$15,364 係變咗做 20,000 蚊，可唔可以將佢細分？

鄭偉波先生：個底薪就係$15,364，咁喺下少少嗰處我哋寫咗，就話嗰個加班，每小時個加班嘅薪金，就係由個底薪除以 240，就再乘番 1.5。咁呢個得咗出嚟嘅數字就係九十幾蚊嘅，係 96 蚊一個鐘頭嘅，即係如果係加班就有 96 蚊一小時。我哋嘅車長一個月係工作二十五天，每天平均係兩小時嘅加班，換言之，一個月就有五十小時嘅加班總數，就乘番頭先講嘅 96 蚊一小時，得出嘅數字就係 4,800 蚊一個月，係加班嘅薪金。4,800 蚊加番底薪$15,364 就得出就係$201,641，呢個就係剛才我所講嘅大約兩萬蚊一個月，多謝。

MR DUNCAN：（經傳譯員）如果你睇一睇 34 頁，文件嘅第 34 頁。超時工作，99 年 3 月之前就係唔同嘅，即係同今日嗰個超時嗰個補水係唔同嘅，係咪呢？

鄭偉波先生：係唔同嘅，正確。

MR DUNCAN：（經傳譯員）同樣，99 年 3 月到 04 年 3 月之間，咁就亦都係唔同嘅，即係同 99 年嘅時候係唔同嘅，係咪呢？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）咁嗰個率係加咗定係減咗，其實？

鄭偉波先生：喺 99 年 3 月之前入職嘅，佢哋嗰個加班就係乘 1.75 嘅，99 年 3 月至

到 2004 年 3 月，嗰個加班就係乘 1.5 嘅，咁而 04 年 3 月之後入職嘅，都係乘 1.5 嘅，呢個就係城巴嘅情況。喺新巴，嗰個同城巴都係有少少唔同嘅，如果新巴喺 98 年 9 月 1 號，由中巴轉職過嚟新巴嘅同事，佢哋嘅加班就係乘 1.35 嘅，而喺 98 年 9 月之後去到而家，全部都係乘 1.5 嘅。

MR DUNCAN：（經傳譯員）咁由於有咁樣嘅分別喇，1.75、1.5、1.35，咁喺超時補水咁多年嚟，整體嚟講，係加咗還是減咗？

鄭偉波先生：我哋呢個就要--即係所謂加咗、減咗，喺個制度上就係頭先已經講咗出嚟喇，喺城巴就最早期嘅車長就係乘 1.75，之後，由 99 年開始請番嚟嗰啲就係 1.5，而新巴就有兩種嘅，一種就係由中巴轉職嘅，就係乘 1.35，咁之後請嘅就全部係 1.5。咁我諗唔係應該話用--即係如果對一個--同一個員工嚟講，同一個員工嚟講，佢如果係 1.5 嘅，咁就一路都係 1.5，就要隨住佢個底薪增加，佢每小時嗰個加班嘅薪金亦都會係增加嘅，即係喺同一個人嚟講，就唔會隨住時間，佢嗰個加班，每個小時嘅加班收入係減少，就不會有呢個情況發生嘅。

MR DUNCAN：（經傳譯員）第 34 頁嗰度，嗰個每個鐘頭嘅超時工作，薪酬除 240 再乘 1.5，咁其實呢個就比起即係底薪除 240 乘 1.5 係有唔同㗎喎，係咪呢？

鄭偉波先生：計咗出嚟嘅答案係有唔同嘅。

MR DUNCAN：（經傳譯員）底薪，照我理解就係反映咗八個鐘頭嘅工作，係咪㗎？

鄭偉波先生：係。

MR DUNCAN：（經傳譯員）其實你哋嘅車長係咪淨係八小時工作嘅呢？

鄭偉波先生：呢個佔絕少部分，平均嚟講佢哋係工作十小時嘅。

MR DUNCAN：（經傳譯員）係，咁即係絕大部分少數還是係即係只係少數，定係點呢，可唔可以量化一下？

鄭偉波先生：我同事要檢視一下啲資料。

MR DUNCAN：（經傳譯員）係，花少少時間，唔緊要嘅。

鄭偉波先生：如果佢哋嘅工作時間係八小時至到八小時三十分，就嗰個百分比大約係12%左右。

MR DUNCAN：（經傳譯員）咁其實大多數嘅車長係咪都係有超時工作嘅呢，還是公司就話「你冇得揀㗎喇，你必須係要超時工作」嘅呢，定係點樣？即係嗰個情況會係點樣㗎？

鄭偉波先生：就係公司安排嗰個更分畀個車長，如果嗰個更分係要有超時工作，嗰個車長就要做超時工作。

MR DUNCAN：（經傳譯員）佢冇得揀㗎喇喎，係咪呀？

鄭偉波先生：係冇得揀嘅，但係我哋嘅車長佢哋互相之間就可以調更嘅，即係大家雙方同意就係可以調更嘅。

MR DUNCAN：（經傳譯員）照你所知喇，鄭先生，咁呢一個公司所提供畀車長嗰個薪酬待遇，係咪令到啲人唔係好想去投身做呢個巴士車長呢？

鄭偉波先生：呢個我諗唔係個主要原因嚟㗎，即係當然，就幾多錢人工先至可以吸引到一個人去做一份工，就個個人就唔同嘅，即係同一份工，有人可能就話 15,000 蚊就覺得合理，有人就可能覺得係低，個個人唔同嘅。其實我哋而家請人嗰個困難，其中有一個原因，就係我哋發現嗰個--即係願意應徵做巴士車長嘅人就多數就住喺啲新界偏遠嘅地方，例如係啲公共屋邨，咁但係如果要佢哋每日來回咁長時間搭車返工、放工，咁呢就令到佢哋就覺得係唔適合嘅，即係呢個我哋覺得係其中一個原因嚟嘅。其實我哋每日我哋公司都有人嚟應徵做我哋嘅巴士車長嘅，但係個問題就係話應徵嘅人同我哋嘅空缺都仲有一個距離，就所以我哋而家持續都係有空缺喺處嘅，就不是就話而家呢個人工就冇人肯嚟做，就唔係咁樣嘅。

MR DUNCAN：（經傳譯員）但係你正話所提嘅，啲人就住喺新界嘅屋邨咁樣，咁其實喺你陳述書係有講嘅，第 29 頁嗰度，CTB-1，29。

鄭偉波先生：我係有講嘅。

MR DUNCAN：（經傳譯員）公司有冇考慮過一啲方法嚟到克服呢一個問題？即係當然喇，即係除咗改變啲路線等等之外，我諗緊譬如話一啲嘅穿梭巴士畀啲車長咁樣，提供穿梭巴士畀佢哋，公司有冇有一啲嘅措施嚟到去緩解呢個問題呢，解決呢個問題呢？

鄭偉波先生：我哋一向有提供員工車接載佢哋返工、放工，但係當然喇，就唔係話每一個同事都去到佢門口度嚟到接載喇，係分開一個一個地區咁樣嚟到接載佢哋嘅。

MR DUNCAN：（經傳譯員）咁係咩嘢車嚟㗎，你派啲咩嘢車出去接佢哋？

鄭偉波先生：係我哋啲巴士嚟嘅。

MR DUNCAN：（經傳譯員）有一定嘅路線㗎，係咪呀？

鄭偉波先生：有嘅，有定嘅地點、定嘅路線嘅。

MR DUNCAN：（經傳譯員）即係穿梭巴士又得唔得？直接嘅路線，等啲人可以快啲咁樣由屋邨上車就去到總站，可唔可以考慮呢一點？

鄭偉波先生：或者我想講解多一次吖，呢啲係員工巴士嚟嘅，就唔係我哋平時嗰啲喺街見到專利路線嘅巴士嚟嘅，就係我哋特定安排咗，就去比較多我哋員工居住

嘅地區，就去接佢哋返工嘅，咁而接咗佢哋之後，就係多數就返番嚟我哋嘅車廠，因為我哋嘅車廠係一個主要嘅簽到點嚟嘅。

MR DUNCAN：（經傳譯員）你提到即係嗰個薪酬待遇，提到嗰個嘅即係招聘困難，因為啲人住得比較偏遠嘅地方，咁有冇一啲嘅因素係多年嚟即係令到點解係咁難請呢啲車長呢？

鄭偉波先生：其實我哋話難請車長就並不是多年來嘅，係近年來，即係近呢幾年。咁另外一樣喇，就我都想喺呢一處就同委員會提供一啲資訊喇，我哋喺過往呢幾年就發現我哋安排嘅後備車長愛嚟填補啲員工嘅病假，係要不斷嚟到增加，咁其中我哋相信--唔係相信先喇，個原因就係因為我哋嘅車長佢哋攞病假係一路增加嘅，喺過往呢幾年，就變咗我哋所謂有唔足夠車長其中一個原因，就係我請人返嚟，跟住又有多啲人就走去攞咗病假，咁而呢啲病假有部分我哋係有懷疑過係騙取病假嘅。咁當然喇，有呢啲情況，公司如果係有真憑實據就試過係即時解僱呢啲車長嘅，而另外有啲都係我哋覺得係高度懷疑係騙取病假嘅，我哋亦都作出處理嘅。但係我哋喺呢處就話--經常就話唔夠車長，其實就唔係話完全冇人嚟應徵，每一日都有人嚟應徵，我哋嘅車長訓練部每一日都有新嘅車長係加入嚟到培訓，但係最主要就係嗰個病假嗰度係一個令我哋覺得係一個好頭痛嘅問題嚟嘅，多謝。

MR DUNCAN：（經傳譯員）想麻煩你睇第 29 頁，係你第一份嘅意見書，第 29 頁嘅，係 CTB-1 嘅 29 頁。喺嗰頁嘅底下嗰度提到話嗰啲工作時間就不利社交生活嘅，喺我未問你呢個問題之前，想麻煩你亦都去睇睇之前嗰頁，第 28 頁。你有提及呢個營運嘅效率，因為營運嘅效率，咁所以就係將佢係分開嗰個十四個鐘，即係如果係全職嘅話，就十四個鐘嘅話就係變成十個鐘，咁然後兼職嘅就四個鐘，睇番呢度所講嘅，你可唔可以話畀委員會聽，究竟一個巴士車長如果佢做十個中頭嘅話，典型嗰個分布係點樣樣，幾時開工、幾時收工，同埋幾時會有休息時間？

鄭偉波先生：呢個我畀我營運總監鍾生嚟到回答。

鍾澤文先生：主席，一個正常嘅更分通常會係朝頭早六點零鐘就會開工，咁我哋會分咗係有一啲叫做「早更」，早更嘅同事佢哋喺六點零鐘開工或者五點幾鐘開工喇，一般係會喺兩點鐘--點零兩點鐘就會收工，咁佢哋就會係由夜更嘅夜車長就會去接替佢哋嘅工作，咁就分咗早更同夜更，咁夜更係兩、三點鐘開工就會做到夜晚黑嘅 12 點、1 點鐘嘅。除此之外，我哋有啲更分係會比較長一啲嘅，咁佢哋會做係 6、7 點鐘開工喇，就做到夜晚黑嘅 7 點鐘、8 點鐘嘅，咁就 cover 咗繁忙時間，咁亦都有一啲會係六點零鐘、七點鐘收工，之後我哋會--頭先所講，會搵一啲 part-time 嚟係去做多幾個鐘，去 cover 埋嗰個尾嘅繁忙時間。多謝，主席。

MR DUNCAN：（經傳譯員）呢啲時間就需要係車長係喺唔同嘅更分裏面有一啲休息時間㗎，啱唔啱？

鍾澤文先生：啱嘅，我哋係會跟番運輸署畀我哋嘅車長工作同埋休息時間嘅指引去編排佢哋嘅休息時間同埋用膳時間。

MR DUNCAN：（經傳譯員）休息時間，呢個係喺一更裏面可能去到係兩、三個鐘㗎，係咪呀？啱唔啱？

鍾澤文先生：會有，不過都--我哋係會佔少部分，一般嚟講就係如果長--比較長嘅更分，譬如有十二、十三個鐘嘅，咁我哋會編排有一個茶休嘅時間，最少有三十分鐘，咁同埋亦都會有一個食飯嘅時候，係最少有六十分鐘，咁但係如果係譬如話你係一個十個鐘頭嘅更分，咁佢可能淨係只係得一個食飯嘅時間係--即係唔少過一個鐘嘅食飯時間。

MR DUNCAN：（經傳譯員）好，呢啲做十個鐘嘅，由開始至到結束係十個鐘嘅，咁係邊段時間或者佢一般嚟講平均係做幾多個鐘頭係駕駛嘅呢，係八個鐘吖，定九個鐘？

鍾澤文先生：如果佢係做十個鐘嘅更分，佢哋嗰個駕駛嘅時間一般係八個零鐘嘅啫，因為扣除咗一個鐘頭嘅食飯時間喇，同埋喺佢開工之前我哋亦都有啲時間畀佢去準備，譬如檢查架車咁樣，咁而每一個--每一轉車或者每一個單程嘅車，返到總站亦都有一啲 layover 嘅，即係一啲休息站--即係短暫停留嘅時間畀佢哋落車可以去下洗手間或者係飲杯水咁樣嘅。

MR DUNCAN：（經傳譯員）好，佢嘅飲茶時間同埋用膳時間，佢係有呢個係人工㗎，係咪呀？譬如話佢工作十小時，其中一個鐘頭係一個用膳時間喇，咁佢有係八個幾鐘頭就係底薪嘅人工喇，另外有兩個鐘頭就係超時補水，係咪呀？我主要就係講呢個用膳時間，用膳時間佢係咪有人工㗎？

鍾澤文先生：係，用膳時間同埋啲休息時間都係有人工嘅。

MR DUNCAN：（經傳譯員）好，請你睇第 30 頁喇，CTB-1 嘅第 30 頁，你喺嗰度有講過係巴士車長嘅要求同埋佢哋嘅訴求，其中就包括咗希望有多啲嘅係--總站嗰度有多次設施畀佢哋，呢一個可唔可以講清楚啲，佢哋係要求啲乜嘢呢？

鄭偉波先生：就喺個總站嗰處喇，其實我哋一般嗰個車長嘅休息室都係偏細㗎，因為嗰啲地就唔係屬於我哋公司嘅，即係好多時係啲私人嘅物業嘅地方嚟嘅，咁我哋其實都想整啲大間少少嘅休息室畀我哋嗰啲車長嘅，咁呢個亦都正正係我哋啲車長嘅要求。而另一樣，就係好多時喺個總站嗰處，就附近就冇洗手間嘅，咁而我哋嘅車長亦都係有呢個嘅需要嘅，咁呢啲就係我哋一向聽到番嚟，我哋嘅車長希望公司可以提供到嘅設施畀佢哋嘅。

MR DUNCAN：（經傳譯員）稍後我哋會講及呢個特別更次嘅，你喺新嗰個指引底下有講及特別更次㗎，我之後再講。如果我嘅理解係啱嘅話，公司都希望係將嗰個更次嘅時間將佢最高係限於十三個鐘，就唔係指引所講嘅十四個鐘，不過喺嗰十三個鐘裏面係有一啲限制嘅，即係話究竟十三個鐘裏面，究竟嗰個車長係用幾多時間去駕駛，咁講啱唔啱？

鄭偉波先生：啱嘅。

MR DUNCAN：（經傳譯員）咁喺咁嘅安排底下，嗰個休息時間--就包括咗休息時間嘅，係咪？

鄭偉波先生：係，冇錯。

MR DUNCAN：（經傳譯員）咁巴士公司諗住車長喺佢當值嘅時間，喺個更次時間裏面嘅休息時間，你諗住佢哋會係喺邊度打發嗰個時間㗎？有冇任何嘅設施提供畀佢哋，等佢哋喺嗰度休息一下咁？

鍾澤文先生：我哋而家就係冇呢啲特別更嘅，所以我哋就未有呢啲設施，咁但係我哋而家因為呢個新嘅指引，我哋有需要要引入呢個特別更分，咁我哋亦都係同咗我哋嘅員工代表同埋工會代表講咗，我哋會喺我哋嘅車廠同埋一啲泊車嘅場地係增設呢啲休息嘅設施，等佢哋可以喺呢段時間裏面，喺呢啲設施裏面休息嘅。咁另外，其實佢哋都唔需要一定要留喺呢啲設施，如果佢哋嘅屋企喺附近嘅，其實佢哋都可以返屋企休息嘅。

MR DUNCAN：（經傳譯員）鑑於鄭生有提及洗手間同埋冇地方可以喺總站嗰度使用，我就想問喇，你講到話提供一啲適當嘅設施畀做十三個鐘嘅車長去得到佢哋係兩、三個鐘應得嘅休息時間，咁究竟嗰個可能性或者個前景係點？

鍾澤文先生：我哋會係喺--因為我頭先所講嘅，喺我哋嘅車廠同埋一啲泊車嘅場地，咁嗰度嘅地方嘅限制同會喺巴士總站就有分別嘅，咁變咗就我哋可以喺呢啲地方設置一啲大啲嘅休息室，咁休息室裏面會有冷氣、雪櫃、微波爐呢啲設施，咁亦會有一啲類似安樂椅嘅座椅畀佢哋可以係攤咁嘅。

MR DUNCAN：（經傳譯員）咁就照我理解，就而家係未有呢啲設施嘅，咁但係當呢個特別更行嘅時候就會係有呢啲設施，係咪？

鍾澤文先生：嗯，冇錯，因為都要需要時間去準備。

MR DUNCAN：（經傳譯員）或者我哋離開呢一頁之前，TD-1，30，睇嚟車長係有一啲訴求，一啲嘅附帶福利方面都有啲訴求嘅，咁佢哋要求啲咩嘢附帶福利？係，而家我睇緊就係第 30 頁，羅馬數字第 II 嘅，即係巴士車長嘅訴求喇，包括以下：薪酬待遇好啲喇，同埋附帶福利係好啲咁樣。咁係乜嘢嘅附帶福利，即係其他嘅福利佢哋係希望係要求得到嘅呢？

鄭偉波先生：（在低聲的說話）如果講話附帶福利喇，咁就係佢哋要多啲假期，就同埋就係要嗰個家屬乘車證就要多啲，就同埋裏面嗰啲限制就少啲，舉個例，譬如話個子女就有呢個乘車證喇，就曾經有人就提議過就唔好有年齡限制，即係個仔女去到 40 歲都仲有張子女乘車證，呢一類我都聽過，咁同埋就係又亦都有人向公司提議過，就係要增加睇醫生嘅次數，即係免費睇醫生嘅次數，主要都係呢幾樣嘢，多謝。

MR DUNCAN：（經傳譯員）我唔需要個細節，咁但係即係其實呢個巴士乘車證嗰度係咪有一個咁嘅制度喺度㗎？

鄭偉波先生：係。

MR DUNCAN：（經傳譯員）乘車證。

鄭偉波先生：我哋係有向我哋嘅員工就發出家屬嘅免費乘車證嘅，現時係有嘅，不過我聽過有員工就要求就係要畀多一張、兩張咁樣，就同埋啲限制就減低，呢啲我係以前有聽過嘅。

MR DUNCAN：（經傳譯員）咁你嘅員工係冇醫療㗎，係咪呀？而家係咪冇㗎？

鄭偉波先生：係有醫療福利嘅，就包括門診就同埋住院保險。

MR DUNCAN：（經傳譯員）我就想知道人力資源部門可唔可以係即係嗰個醫療嗰度嗰方面嘅資料畀多啲我哋，得唔得？

鄭偉波先生：可以，我交畀我同事吳生。

MR DUNCAN：（經傳譯員）唔使而家講，或者喺書面--你可以書面畀啲資料我哋喇，你等委員會係消化一下咁得唔得？

鄭偉波先生：Okay，冇問題，可以嘅。

MR DUNCAN：（經傳譯員）你剛才就講到啲車廠同埋總站，咁有幾多個總--有幾多個廠㗎，你哋公司？

鄭偉波先生：大大細細加埋都有六個嘅--六個以上，即係有啲細啲喇，有啲係主要㗎喇。

MR DUNCAN：（經傳譯員）係咪全部喺港島區㗎？

鄭偉波先生：喺港島區車廠就有三個，咁跟住就喺大嶼山又有兩個，咁同埋有其他嗰啲地方就比較小，喺九龍又有，比較小型嘅，主要都係喺香港島。

MR DUNCAN：（經傳譯員）或者返番去薪酬待遇嗰度嘅情況先喇，或者請你睇一睇第 36 頁，TD-1，36。喺底下嗰度有提到一個表現良好嘅獎項嘅，嘅獎賞咁樣嘅，係喇，TD-1，36--CTB，對唔住，CTB-1，36，對唔住。你睇到良好表現嘅獎賞嗰度，睇唔睇到？

鄭偉波先生：見到。

MR DUNCAN：（經傳譯員）有提到就係嗰個安全嘅獎金、表現獎金同埋勤工獎咁樣，咁呢個就係話員工工會係要求嘅，咁嗰啲獎金就重新納入到去嗰個底薪，咁我嘅理解就係而家佢哋都係不管佢哋安全好唔好、表現好唔好、勤工好唔好，咁全部都係納入咗去底薪，係唔係？

鄭偉波先生：係。

MR DUNCAN：（經傳譯員）好喇，咁目前嗰個薪酬待遇嗰度有冇一啲誘因，等啲車長就係要維持一個良好嘅安全紀錄㗎喇喎喎，係咪？

鄭偉波先生：但係我哋有個紀律制度喺處嘅，如果佢個安全係有問題嘅話喇，雖然而家就冇咗個安全獎愛嚟扣，但係我哋係會對佢哋作出紀律處分嘅，咁而如果受到紀律處分嘅話，佢又唔去改進，咁嗰個紀律處分就會向上提升，到最後如果真係好差嘅一個人，我哋就係會係解僱佢嘅。

MR DUNCAN：（經傳譯員）咁呢個安全嘅獎金維持咗幾耐，即係行咗幾耐㗎喇？

鄭偉波先生：呢個安全獎金就喺我哋公司行咗好多年㗎喇，咁就直至到係 2018 年嘅 3 月我哋先至將佢歸納咗落去底薪裏面嘅。

MR DUNCAN：（經傳譯員）你納入去底薪，咁但係即係個底薪就會高咗，係咪？

鄭偉波先生：呢個有兩方面嘅效果嘅，就第一，就唔會有機會畀公司扣減喇，因為納入咗去底薪喇；第二，因為佢係底薪嘅一部分，就所以計算嗰個加班薪金嘅時候嗰個基數係增大咗嘅。

MR DUNCAN：（經傳譯員）咁個底薪都會增加咗囉，係咪呀？都增加咗好多㗎喎，係咪呢？以前就係有個$1,285、$1,552 一個月嘅安全嘅津貼吖嘛，咁呢個唔係底薪嚟㗎嘛，係咪？

鄭偉波先生：以前唔係底薪。

MR DUNCAN：（經傳譯員）點解工會係要求咁樣將佢納入去底薪？

鄭偉波先生：係有三個原因嘅，第一，如果嗰三個嘅獎金係冇納到入去底薪，咁就有機會就畀公司扣錢嘅，例如如果佢揸車不安全嘅話，就有可能扣佢個安全獎喇；如果佢對乘客唔禮貌嘅話，我哋就有可能會扣佢個表現獎喇；如果佢有缺勤嘅話，就有機會會扣佢哋嘅勤工獎，如果呢三個嘅獎金全部納入咗底薪裏面嘅話，咁我哋就係冇機會會扣佢喇，呢個係第一個原因嚟嘅。第二個原因就係頭先我所講解過嘅，就係嗰個超時薪金嗰個計算喇。第三，就係我哋以往每一年嘅加薪就只係調整嗰個底薪嘅，而呢幾項嘅津貼我哋都冇調整嘅，即係除咗一個例外，就係喺 2017 年就係有調整過，喺 2017 年之前，我哋呢啲嘅獎金嘅數目就維持不變咗好多年㗎喇，咁而家將佢歸納咗入去底薪裏面，就變咗每一年嗰個薪金調整，呢啲數字都相等於係有增加到。

MR DUNCAN：（經傳譯員）好喇，講番呢個安全嗰個嘅獎金先喇，即係當時喺度嘅時候喇...

主席：（經傳譯員）或者我哋講呢度之前，或者應該而家係要食飯時候喇。或者想請鄭生同埋你嘅同事就關於個制度個運作畀多啲資料我哋。咁其實即係呢個點樣扣，有啲唔符合某啲嘅標準點樣扣咁樣，我哋想即係攞多啲資料嘅，我哋食完

飯先再講喇，呢方面。

鄭偉波先生：好，多謝主席。

主席：（經傳譯員）好，而家暫時休會，兩點半返嚟，唔該晒，各位。

下午 12 時 59 分聆訊押後

下午 2 時 31 分恢復聆訊

出席人士如前。

主席：（經傳譯員）各位，午安。係，鄧樂勤大律師。

MR DUNCAN：（經傳譯員）唔該主席先生。各位，午安。鄭先生，喺小休之前，我就請你去睇一睇 CTB-1 嘅第 36 頁。唔該打番出嚟。我剛剛開始咗問你一啲問題，係關於表現良好嘅獎勵，我就問你呢一頁紙嘅下面嗰部分，我哋未去食飯之前，你曾經同我哋講過呢個安全獎金就其實行咗好耐嘅，根據你嘅意見書，你就話咗畀我哋聽已經將佢納入咗去底薪裏面，喺未納入底薪之前，我就想問下，究竟有乜嘢準則去決定個別嘅車長係可以攞到個安全獎金嘅呢？

鄭偉波先生：我同事鍾生會回答呢條問題。

鍾澤文先生：主席，嗰個安全獎金係會因應嗰個司機佢喺嗰個駕駛嘅方面有冇犯錯而去扣減嘅，佢犯錯嘅情況可能係因為交通意外，亦都可能係因為佢嗰個畀乘客投訴佢駕駛不當，亦都會係如果係我哋喺黑盒嗰度係發現佢係有超速同埋如果佢係有一啲我哋一啲駕駛嘅導師或者督察喺跟車去評估佢個表現嗰陣時發覺佢係有駕駛不當，我哋就因應佢嗰個駕駛不當嘅程度而去扣減嘅。多謝。

MR DUNCAN：（經傳譯員）你話會扣減，咁呢個係一個獎金，其實係獎金就話喺原本嘅嘢之上加上去㗎嘛，唔係咩？

鄭偉波先生：主席，如果嗰個員工係完全冇犯錯嘅情況底下，佢哋會全數支取嗰個獎金嘅，但係如果佢係有犯錯，咁要睇下唔同程度嘅犯錯，呢個獎金係會扣減嘅。多謝。

MR DUNCAN：（經傳譯員）明白喇。至於話嗰個良好表現嘅獎金，又用咩嘢準則呢？

鄭偉波先生：鍾生，唔該。

鍾澤文先生：良好表現嗰個主要係睇佢哋嗰個顧客嗰個服務，譬如話佢畀乘客投訴佢

態度唔好，而我哋亦都引證得到佢係態度唔好嘅，我哋會扣減佢嗰個服務表現獎。

MR DUNCAN：（經傳譯員）如果冇投訴，就冇扣減，就自動會得到呢個獎金，係咪呀？

鍾澤文先生：冇錯。

MR DUNCAN：（經傳譯員）勤工獎個準則又點樣嘅呢？

鄭偉波先生：呢個就勤工獎嚟嘅，如果佢係嗰個月返足工，即係個意思就係除咗佢公司編咗假期畀佢之外，其他應該要返工嘅日子佢全部都有返工，就會全數攞到呢個勤工獎嘅，但係如果佢有缺勤嘅話，就會按比例嚟到扣減呢個勤工獎嘅。多謝。

MR DUNCAN：（經傳譯員）喺納入底薪之後嗰個情況，我而家就想有幾條問題問一問，目前個情況係咪咁呀，而家喺金錢上、財政上對車長冇咩嘢誘因令到佢就係會係安全啲㗎？

鄭偉波先生：喺錢銀方面，我同意嘅，呢度就唔會再有你所講嘅 incentive 嘅，但係我要重申，就係佢哋安全駕駛係佢哋嘅責任嚟嘅，如果佢唔能夠做得到呢件事，咁就要睇下佢所犯嘅規則係有幾嚴重，我哋視乎嗰個事情嘅嚴重性，就會對佢哋作出唔同程度嘅紀律處分嘅。多謝。

MR DUNCAN：（經傳譯員）我想請你睇 CTB-2，209 頁，翻譯就可以睇番 209-1 同埋 209-2，好，唔該。睇唔睇到新巴有限公司一般站長及車長違規事件違例處分指引？呢度就係有係講站長同埋一般嘅司機如果違例嘅話就點樣樣咁嘅，係咪嗰頁有嗰個指引？

鄭偉波先生：我哋見到個指引嘅。

MR DUNCAN：（經傳譯員）喺個指引後面嗰個部分，英文版就 209-2，嗰度就有一啲指引嘅，係關乎係超速，如果車長係超過咗嗰個車速限制就係點樣樣嘅。

鄭偉波先生：係，見到嘅。

MR DUNCAN：（經傳譯員）罰則都有列出嚟嘅。

鄭偉波先生：係。

MR DUNCAN：（經傳譯員）口頭警告、書面警告，以及係最終就係可能係將佢辭退，就唔需要補番薪金畀佢嘅，係咪就係呢一啲咁嘅罰則呢，即係公司就會考慮上述所講嘅各類罰則，係咪呀？

鍾澤文先生：係嘅。

MR DUNCAN：（經傳譯員）我咁嘅理解啱唔啱呢？根據係現有嘅制度，即係話將佢

納入咗做底薪之後，其實你哋冇任何嘅條文，即係如果有人超速嘅話，就佢嘅收入都唔會被扣減㗎喎，係咪呀？冇咁嘅條文嘅？

鄭偉波先生：正確嘅。

MR DUNCAN：（經傳譯員）呢個情況就同係將佢納入底薪之後係唔同喇，之前如果有個人就係超速咗，咁本來畀到佢嘅嗰啲錢就會係扣起咗，啱唔啱呀？咁樣嘅理解啱唔啱呀？

鄭偉波先生：正確嘅。

MR DUNCAN：（經傳譯員）將佢納入底薪之後嘅一個影響，或者請你揭番去第36頁，CTB-1嘅第36頁，我哋睇番新入職嘅車長，佢目前嗰個底薪，如果我理解係啱，佢底薪入職就係$15,364，啱唔啱？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）再加上一個已經納入咗底薪嘅安全獎金，起碼就會1,285蚊，係咪呀？

鄭偉波先生：嗰幾個獎金已經包括咗喺$15,364裏面。

MR DUNCAN：（經傳譯員）良好表現獎金又點呢？362蚊一個月嘅。

鄭偉波先生：嗰三個獎金包括安全獎、表現獎同埋勤工獎，全部已經包咗喺$15,364裏面。

MR DUNCAN：（經傳譯員）明白。呢個改組或者納入咗去底薪嗰度究竟係幾時開始實施嘅呢？

鄭偉波先生：2018年3月1號。

MR DUNCAN：（經傳譯員）喺2004年3月9號嗰日或者之前入職嘅，$15,364嗰個數字就仲少囉嗦，係咪呢？因為你嗰個數字係會有一個數再加呢一啲獎金㗎嘛，啱唔啱呢？

鄭偉波先生：係加晒呢三個獎金之後先至係$15,364。

MR DUNCAN：（經傳譯員）今時今日係咁樣，係咪呀？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）去番十二個月之前嘅情況，當時個底薪係會點嘅呢？十二個月之前嘅底薪係幾多？

鄭偉波先生：呢個我同事吳生會而家計一計。

MR DUNCAN：（經傳譯員）好，你慢慢。

吳智光先生：多謝主席。唔好意思，主席，我想舉個例，譬如話喺我哋--因為嗰個嘅津貼轉入去底薪其實就係 3 月 1 號就生效嘅，咁譬如話喺 2 月 1 號嘅時候，未有呢一個嘅歸撥嗰個嘅津貼嘅時候，其實當時嘅底薪，一個入職嘅車長就係 12,536 蚊。多謝。

MR DUNCAN：（經傳譯員）唔該晒。

主席：（經傳譯員）好喇，咁樣喺第 36 頁嗰度，因為 04 年 3 月 9 號入職--之後入職就係$15,364，咁而家你講就係--咁 2018 年 2 月 1 號之後入職就係$12,536，係咪呢？

吳智光先生：主席，我請問可唔可以再重複一次？

主席：（經傳譯員）你睇第 36 頁中間嗰度第羅馬 IV，04 年 3 月 9 號之後入職就係$15,364，而家你講就係如果佢哋 2018 年 2 月 1 號入職嘅就變咗係$12,536 嘅底薪，係咪呢？

鄭偉波先生：或者呢度我再講解一次喇，我再講解一次，我哋就係 3 月 1 號開始就將嗰三項津貼就納入去底薪嘅，好喇，咁即係話譬如話係 2018 年嘅 2 月嘅時候嘅情況，喺 2 月嗰個底薪就係$12,536 嘅，$12,536，咁我哋就將$2,328 嘅津貼，呢個總數嚟嘅，就加咗落去呢個底薪，另外佢哋嘅底薪亦都另外再增加 500 蚊，咁幾個數加埋就係$15,364 嚟㗎喇。或者我再重複嗰幾個數字，$12,536、$2,328 同埋$500，呢度全部加晒就係$15,364 嚟㗎喇。

主席：（經傳譯員）我聽到你講，但係我又唔係好明嗰個點樣計出嚟。

鄭偉波先生：或者我再重複一次，喺 2 月份嘅時候，即係未作出呢啲改動嘅時候，我哋嘅新入職嘅車長，佢嘅底薪係$12,536，而佢有頭先講過嗰三項嘅獎金，呢三項獎金嘅總數係$2,328，咁我哋喺 3 月 1 號嘅時候就將呢$2,328 由獎金改為納入咗去底薪裏面，而同時我哋另外再加 500 蚊人工個底薪，再加 500 蚊底薪畀每一位車長，咁樣嘅情況底下，佢喺 3 月份佢嘅底薪就係$15,364，但係就冇咗頭先講嗰三項嘅津貼，因為已經納入咗去個底薪裏面。

主席：（經傳譯員）係，我都聽多呢一次喇。

MR DUNCAN：（經傳譯員）係，唔該你。好喇，而家就講完嗰個待遇，就講番嗰個嘅招聘女性嘅車長。其實女性嘅車長佔車長總數係有幾多呢？

鄭偉波先生：係低過 10%嘅，不過我要喺呢度要重新一樣嘢，我哋公司係招聘嘅時候係男女平等嘅，就唔會話因為係男士或者係女士佢有任何優勢嘅，但係就--即係呢個咁樣嘅結果，即係我相信就係嚟到應徵嘅人係男士多過女士。多謝。

MR DUNCAN：（經傳譯員）咁公司有冇諗過一啲措施就增加嗰個車長嗰個興趣呢，就係女性嗰個車長嘅數目嗰度，有冇提高佢哋嘅興趣參加、加入呢？

鄭偉波先生：我哋現在我哋嘅招聘廣告--現時我哋嘅招聘廣告，我哋都有三位車長嘅

相擺咗喺我哋嘅廣告嗰處嘅，嗰啲相其中一位就係女車長嚟嘅，我哋希望咁樣就等公眾嘅人士就知道女士亦都係歡迎加入我哋新巴、城巴成為車長嘅，多謝。

MR DUNCAN：（經傳譯員）有冇一啲女性嘅兼職車長？

鄭偉波先生：呢個我哋唔肯定，但係就算有，都唔會多。

MR DUNCAN：（經傳譯員）或者想請大家睇一睇第 29 頁，文件第 29 頁，係閣下嘅陳述書嚟嘅，CTB-1，29，你就話畀委員會聽，喺呢一版嗰度，係關於嗰個兼職嘅車長，公司兼職車長嘅數目，我哋睇到總共就係三百一十四嘅車長數目，係兼職嘅，好喇，我理解到，從你嗰個嘅陳述書嗰度，即係第 36 頁嗰度，就係話個兼職嘅車長就係有時薪嘅，就係 80 蚊時薪，呢個係咪即係佢哋嗰個待遇嘅數目嚟㗎？

鄭偉波先生：正確，因為佢哋係每一個小時嚟到計算薪金嘅。

MR DUNCAN：（經傳譯員）呢一個率係即係行咗幾耐呀，呢個數？

鄭偉波先生：呢個數係 3 月 1 號嘅時候開始嘅。

MR DUNCAN：（經傳譯員）今年？

鄭偉波先生：2018 年。

MR DUNCAN：（經傳譯員）之前係幾多？

鄭偉波先生：係 75 蚊，如果我冇記錯嘅話。

MR DUNCAN：（經傳譯員）呢個係咪每年檢討㗎？

鄭偉波先生：唔係一定嘅。因為我哋呢個要去睇市場嗰個時薪或者個兼職嘅人工大約係幾多，咁我哋就要出番個相應嘅人工嘅。

MR DUNCAN：（經傳譯員）你哋喺寫字樓嘅員工，即係城巴嗰度或者係新巴，會唔會係即係有時都兼職做埋呢個司機？

鄭偉波先生：喺佢哋放咗工或者放假嘅時候，有時係會嘅。

MR DUNCAN：（經傳譯員）咁個數目又幾多喫呢，呢個裏面？

鄭偉波先生：現時係一百七十九人。

MR DUNCAN：（經傳譯員）咁差唔多係一半，即係而家個兼職車長數目嘅大概一半，即係你哋寫字樓嗰啲人就係做兼職咁係一半喫喇，係咪？

鄭偉波先生：不是，因為而家我哋睇番呢度，我哋之前個 submission，頭先你有引述過嗰一頁，314 只係新巴嘅數字，而城巴另外有 346 嘅，即係總數就係 660

嘅。

MR DUNCAN：（經傳譯員）哦，我明喇。可唔可以講番邊一個數目？講多次數目，好唔好呀？呢度係 346，咁講多次個數目，好唔好呀？

鄭偉波先生：城巴 346，新巴 314，總數 660。

MR DUNCAN：（經傳譯員）唔該晒。咁當中即係 179 就係寫字樓做嘅，咁就係其中兩間公司都有，係咪？

鄭偉波先生：係，正確。

MR DUNCAN：（經傳譯員）唔該晒。好喇，暫時唔講嗰啲寫字樓嘅員工先，大多數嘅其他嘅兼職車長，我相信佢哋有其他嘅職業嘅，係咪？

鄭偉波先生：係。

MR DUNCAN：（經傳譯員）你嘅理解係咪咁？

鄭偉波先生：係，正確。

MR DUNCAN：（經傳譯員）好喇，或者我想你睇一睇第 59 頁，文件 59 頁，CT-8，59 頁，CT-1，59 頁，CTB-1，59 頁。

鄭偉波先生：見到。

MR DUNCAN：（經傳譯員）我想請你睇下嗰一頁嘅 5B 嗰一段。

鄭偉波先生：睇咗。

MR DUNCAN：（經傳譯員）喺嗰一段裏面你講咗啲嘢，其中就包括就話目前公司就冇特別要求職位嘅車長去申報佢哋喺開工之前有冇足夠嘅休息時間，睇到嘛？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）我諗我咁講係公道嘅，喺呢度嘅 B 底下嘅第三段，講到--你就講咗就係話有一啲改變嘅，你就話打算係會有所改變嘅，呢一個係關乎招聘兼職車長嘅，咁講啱唔啱呀？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）我想你睇 CTB-2，401 頁，應該係第 400 頁嘅，文件係喺第 400 頁嗰度開始嘅，CTB-2 第 400 頁，嗰度有個表格嘅，總共有四頁紙，由第 400 去到第 403 頁嘅，個名就叫做係職位申請表--「駕駛職位申請表」。

鄭偉波先生：見到。

MR DUNCAN：（經傳譯員）我想問，呢份表格係咪全職、兼職嘅車長都係用呢一份申請表嘅呢？

鄭偉波先生：係。

MR DUNCAN：（經傳譯員）講到係佢哋其他嘅職業同埋休息時間，我想你睇呢份文件--呢份表格嘅第 2 頁，你睇到個標題就叫做「重要資料」，第 3 項，嗰度係咪咁講，「現時有否兼職工作？如有，工作類型」同埋「時間」？

鄭偉波先生：係。

MR DUNCAN：（經傳譯員）即係每一位申請人，無論係全職定抑或兼職嘅申請人，都需要填寫呢一個部分嘅，係咪呀？

鄭偉波先生：係。

MR DUNCAN：（經傳譯員）如果你落到去 402 頁，即係嗰個表格嘅第 3 頁嘅，我哋見到嗰度有一個申報或者聲明書嘅，402 頁同埋 403 頁。

鄭偉波先生：係，見到。

MR DUNCAN：（經傳譯員）我咁嘅理解啱唔啱呢？呢個亦都要填報嘅，呢個要喺申請嘅時候就要填報㗎喇，係咪呀？

鄭偉波先生：呢一部分我交畀我同事吳生作答。

MR DUNCAN：（經傳譯員）可以嘅。

吳智光先生：主席，係嘅，就呢張表格嘅時候，嗰個 applicant，即係話個應徵者係需要寫嘅，但係我想補充一點，就係如果佢真係有填漏嘅時候，我哋亦都唔會話確信知道嘅。又舉個例，如果佢係申請我哋嘅工作職位嘅時候，如果譬如話喺表格最右手面寫住「補充資料」嗰一個欄裏面，如果佢唔填，我哋亦都唔會話一定要佢填晒嘅。

MR DUNCAN：（經傳譯員）咁即係話唔會係獨立咁樣去查核一下嗰個人所填報嘅資料，係咪呀？

吳智光先生：可以咁講。

MR DUNCAN：（經傳譯員）除咗呢個申請表格之外，如果你係招聘呢一個人擔任你公司嘅一個職位，我想問要唔要係填番--簽番一份正式嘅聘用書嘅呢？

吳智光先生：係有嘅。

MR DUNCAN：（經傳譯員）有冇係就車長嚟講，有一份標準嘅咁樣樣嘅招聘書呢？

吳智光先生：係一個僱傭合約，係一封書信嘅形式啫，就並不是一個表格嘅形式。

MR DUNCAN：（經傳譯員）會唔會係兼顧到喺外間工作--兼職工作呢一啲嘅事宜呢？

吳智光先生：不會。

MR DUNCAN：（經傳譯員）可唔可以畀個咁樣樣嘅係僱傭合約嘅樣本畀我哋呢？

吳智光先生：可以嘅。

MR DUNCAN：（經傳譯員）唔會晒。

主席：（經傳譯員）呢封信係咪全職、兼職嘅僱員都係一樣嘅呢？

吳智光先生：不一樣嘅。

主席：（經傳譯員）有冇係兼職嘅僱員即係嗰一封嘅招聘信，有冇嗰個樣本呢？

吳智光先生：我哋稍後可以提供畀委員會嘅，主席。

主席：（經傳譯員）係，我要求嘅就係咁。我哋邀請你哋就係事後係補充嘅，我哋會開一個清單就係話你應承係提供啲咩額外嘅資料。

吳智光先生：多謝主席。

MR DUNCAN：Could I bring your attention...

主席：（經傳譯員）鄧律師，未繼續...

MR DUNCAN：Sorry.

主席：（經傳譯員）...我想問下，過去嗰幾年，你哋呢封招聘書嗰封信嘅內容有冇改變過呢？或者形式有冇改變過呢？

鄭偉波先生：我哋唔肯定。

主席：（經傳譯員）或者你返去查下，如果有改變到嘅話，因為--若果你係有係新同舊唔同嘅版本嘅，麻煩你都畀我哋，等我哋知道有咩嘢改變。

MR DUNCAN：Can I bring your attention now to...

主席：（經傳譯員）你係咪有啲嘢想講，鄭生？

鄭偉波先生：冇問題嘅，我哋可以提供。

主席：（經傳譯員）唔該晒。係，律師。

MR DUNCAN：（經傳譯員）唔該晒主席先生。我想請你睇另一份文件，都係關於呢一個課題嘅，CTB-2，404頁，個翻譯喺404-1同埋404-2嗰兩頁嘅。嗰個標題應該就僱員嘅行為守則同埋係紀律處分，然後斜哋，就話外間工作嘅聲明書，我想問，呢份文件嗰個目的係做咩嘢嘅呢？

鄭偉波先生：呢一個如果我哋有個全職嘅員工喺我哋嗰度做嘢，如果佢又喺外面係有兼職嘅話，咁我哋要佢要話番畀公司知道嘅，而另外如果佢係一個喺我哋度嘅

兼職員工，佢如果有份正職嘅喺外面，佢亦都要填寫嗰個資料畀我哋嘅。

MR DUNCAN：（經傳譯員）根據份文件嗰個係你嘅意見書嘅附件 7，我諗係你第二份嘅意見書嘅附件 7，或者我哋睇番第 59 頁，就係 CTB-1 嘅 59 頁。

鄭偉波先生：見到。

MR DUNCAN：（經傳譯員）我諗你呢度見到就提及係附件 7，係喺第 5B 嗰段最尾嗰個部分講及係附件 7。

鄭偉波先生：係。

MR DUNCAN：（經傳譯員）嗰度就提及一個每年嘅聲明或者每年嘅申報，我想問你哋有冇咁嘅要求呢啲文件又或者係僱傭合約有冇要求就係話僱員有咁嘅責任就報告畀你聽，即係如果佢喺外間嘅工作唔同咗，又或者係開始喺外面有其他工作，有冇規定要佢哋向你哋匯報嘅呢？

鄭偉波先生：如果係正職員工就一定要報，如果係兼職員工，就唔--如果佢唔報番返嚟，我哋都喺現時嚟講，都冇去追佢嘅，但係喺 2018 年嘅 6 月 1 號開始，我哋就係無論佢入職嘅時候同埋每一年都一定規定佢哋要作出申報嘅。

MR DUNCAN：（經傳譯員）你講到係全職嘅員工一定要咁做，咁明顯就係佢每年就要填番一份表格，如果佢做外間嘅工作，即係喺嗰年嘅中間嘅時候先至去做外面嘅嘢，兼職嘅話，咁佢有冇責任係向你哋報告呢？

鄭偉波先生：呢個詳細嘅情形吳生會作答嘅。

吳智光先生：主席，頭先律師所講嘅情況，個員工係有責任要向我哋作出申報，在得到我哋嘅批准之後，佢先至可以去接受其他嘅兼職工作。多謝主席。

MR DUNCAN：（經傳譯員）咁喺邊度見到呢個規矩、見到呢個條文就話要求僱員咁樣做呀？

主席：（經傳譯員）你或者可以睇 72-1 嗰版，嗰個係英文嘅譯本，72-1，我諗應該之前嗰幾版就係嗰個中文，CTB-2 嘅第 72 頁。

MR DUNCAN：（經傳譯員）唔該主席。

主席：（經傳譯員）吳生，睇番呢度會唔會係幫到你答呢個問題呢？72-7 嗰個係英文譯本，或者 72-6。我睇緊嗰度就係員工守則係申報外間工作，嗰度就寫住按就係申請係做以下嘅兼職工作，嗰度就第 26 段就講及就係話應該--如果全職嘅話，就應該就係要先申請咗，先可以做外間嘅兼職工作，之後係每年要申報嘅，下面有不同嘅標題就講及，就係話要求提供啲乜嘢嘅資料。

MR DUNCAN：（經傳譯員）好，唔該晒主席，係，究竟係邊一頁呢？

主席：（經傳譯員）我嗰度就係下面個角落嗰度寫住“72-1”嘅，係嗰個頁碼嘅。

吳智光先生：多謝主席。係嘅，喺呢一張嘅表格裏面，呢個附註我哋亦都講得好清楚，嗰個同事係需要作出申報嘅。同埋我都想講，如果我冇記錯，呢個我哋之後--稍後會返去再檢視一下，我印象就係喺我哋嗰個 employment letter，即係話嗰個招聘書--嗰個聘用書嘅時候，我哋都有同樣呢一個嘅要求寫咗喺度嘅。多謝。

MR DUNCAN：（經傳譯員）唔該晒吳生。如果你睇埋 72 頁 7，翻譯版本嗰度，你睇原本嘅版本第 26 段，係有提到同樣一點嘅，照我理解，我理解啱唔啱呀？

吳智光先生：對的。

MR DUNCAN：（經傳譯員）唔該晒。好喇，嗰個你考慮嘅更改其實就係針對嗰啲兼職嘅員工，就唔係呢個全職嘅員工，係咪呀？咁理解啱唔啱？

鄭偉波先生：正確，因為我哋全職員工而家已經有足夠嘅申報制度㗎喇。

MR DUNCAN：（經傳譯員）或者我想請大家...

主席：（經傳譯員）係咪講另一個課題呀？

MR DUNCAN：Yes, I am.

主席：（經傳譯員）等一等先，嗰啲兼職嘅僱員，你係要求佢哋點樣做呢？即係佢哋一招聘之後，然後就係做額外嘅其他嘅兼職工作，你會要求佢哋點樣做呢？

鄭偉波先生：由 6 月 1 號開始，如果有一個工作申請者嚟我哋公司申請做兼職嘅車長工作，佢就首先就要填一份表，而呢份表就要講得出就係佢自己嘅正職係乜嘢嘢嚟嘅，嗰個工作時間係幾多點至幾多點，同埋星期幾係返工、星期幾係放假，咁我哋就可以掌握得到就係呢個人是否適合嚟我哋公司度做兼職車長。舉個例，如果有個人佢日日都要返十幾個鐘頭工嘅，佢嚟我哋度應徵兼職車長，我哋係不會僱用佢嘅，因為呢個一定係唔足夠休息時間。另外，如果有個人，譬如佢係一日係返八小時嘅工作，佢就同我哋講就話主要係星期六或者星期日嚟我哋嗰處做兼職車長嘅，咁我哋睇番個個案，我哋覺得係冇問題嘅，呢個我哋就會經過我哋一貫嘅程序嚟到考核，如果係得嘅話，就會請佢做兼職車長；佢除咗呢個入職嘅時候申報之外，以後每一年都要作出同樣嘅申報，如果佢係冇變到嘅，佢就填番同舊年一樣嘅嘢，如果佢嘅工作係變咗嘅，佢就要將佢新嘅工作嘅模式要申報番畀公司知。呢個就係我哋喺 6 月 1 號之後將會做嘅嘢嚟。

主席：（經傳譯員）其實當你係請人嘅時候，你就會咁樣查詢，之後一年後，咁就即係睇下個情況係點樣，係咪？

鄭偉波先生：係，冇錯。

主席：（經傳譯員）呢個係一個責任嚟嘅，咁佢哋即係做啲兼職車長係有咁嘅責任，如果佢係做呢啲兼職嘅工作或者係有其他嘅兼職工作，喺一年之內，佢有個責

任，係咪，匯報？

鄭偉波先生：佢有其他嘅工作，佢都要報畀我哋知，等我哋就可以了解到佢嗰個每一日嘅工作嘅時間係幾多，有冇足夠嘅精神嚟我哋度做兼職車長。

主席：（經傳譯員）咁呢一個規定有冇一啲表格、一啲文件係反映咗出嚟？

鄭偉波先生：喺 6 月 1 號開始係會有嘅。

主席：（經傳譯員）而家有冇一啲嘅資料，即係嗰啲表，呢度有冇喺度，有冇提供到？

鄭偉波先生：現時係冇提供到嘅，我哋可以後補。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）或者想大家睇番一份文件，僱員嘅紀律同埋係守則--行為守則，中文版就係 66，CTB-1 嘅 66 頁，翻譯就係喺 72 頁嘅 2，想問一問，就係呢一個行為守則同埋紀律係適用於全職、兼職都適用嘅，係咪？

鄭偉波先生：全部都適用嘅。

MR DUNCAN：（經傳譯員）或者想睇番第 26 段嗰度，翻譯就喺 72 頁，嗰度就話「外間工作」嘅，有個標題係咁寫嘅，提到全職嘅員工應該點樣做，即係如果佢係做呢啲其他嘅工作，喺呢度有講嘅，睇唔睇到？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）正話主席就提到一點，其實有冇特別原因呢啲咁嘅條文唔適用喺兼職身上嘅？

鄭偉波先生：我哋公司嘅兼職員工其實主要就係車長嚟嘅，而車長喺我哋度兼職，就無論佢個正職係做乜嘢工作都好，而可以出現到呢個利益衝突嘅機會係等於零嘅。

MR DUNCAN：（經傳譯員）咁嘅諗法就係有不同嘅表格係畀兼職嘅員工，即係喺一年之內，申報之前佢哋有一啲兼職嘅改變，咁呢度係有不同嘅做法，係咪？

鄭偉波先生：呢個係出現咗有利益衝突或者有機會有利益衝突嘅時候先至需要填寫嘅。

MR DUNCAN：（經傳譯員）好，我哋暫時唔講呢度先，就講番你哋嘅陳述書，CTB-1 第 61 頁，或者想大家係留意第 7 段顧客服務同埋情緒智商嘅管理訓練咁樣，睇唔睇到？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）B 同 C 嗰度，咁我哋係想睇一睇嘅，或者係睇一睇呢兩

段，等大家熟悉一下嗰個內容，好唔好？即係關於個內容係點樣。

鄭偉波先生：係，我哋睇咗。

MR DUNCAN：（經傳譯員）你提到今年 3 月就係開始一個研究，係睇下一個可行性或者係可唔可以做一個心理嘅評估，等你可以係識別一下一啲申請者可能就係有一啲揸車上嚟比較躁狂或者係佢哋嗰個揸車嘅態度就比較粗暴咁樣，而家喺呢一方面嗰個進展係點樣呀，喺你做嘅研究方面有冇進展，進展成點？

鄭偉波先生：係吳生會作答嘅。

吳智光先生：多謝。其實我哋喺 3 月之後就開始咗呢個嘅 study，我哋除咗喺網上係下載有關文件，即係睇下喺出面坊間嗰啲嘅評估係點做之外，我哋其實亦都同一啲嘅專業人士開過會討論過，其中包括咗就係一個執業嘅精神科醫生，另一位就係香港一間大學心理系嘅一個教授，我哋同呢兩位專業人士都分別開會討論過就係嗰個評估嘅可行性同埋嗰個嘅收效--成效，而我哋亦都而家係約見緊一位--另外一位大學嘅機械工程系嘅教授，而呢位嘅教授素來就係喺呢個情緒影響駕駛方面係有研究嘅，咁我哋亦都想同佢約見，了解下佢嗰個嘅研究嘅成效。多謝主席。

MR DUNCAN：（經傳譯員）你提到呢啲會議，佢哋係咪本地嘅心理學家嚟嘅？

吳智光先生：係。

MR DUNCAN：（經傳譯員）一位教授，咁其實係邊位教授？有冇諗到邊一位㗎，其實？我唔需要你講名，或者即係咩嘢教授？

吳智光先生：係中文大學心理系嘅一位教授。

MR DUNCAN：（經傳譯員）咁係咪即係畀咗簡介佢要點樣做㗎喇？

吳智光先生：係一個探討性質嘅，其實就係我哋交換緊我哋嘅背景、我哋嘅目的同埋我哋想佢 enlighten 我哋究竟而家坊間或者喺嗰個行業裏面嗰個做嘅範圍咁樣樣嘅情況。

MR DUNCAN：（經傳譯員）即係你話呢個做法，佢哋喺呢行行內嘅做法，其實即係呢個範圍係乜嘢呀？係香港嘅範疇吖，中國嘅範疇吖，定係邊度呢？即係邊個範圍呢其實？

吳智光先生：其實我意思就係話喺世界各地有冇呢啲嘅心理嘅評估，亦都係喺--套用喺呢個巴士車長方面嘅，我哋嘅討論係圍繞住呢個方面。

MR DUNCAN：（經傳譯員）你有冇係探討過--即係同本地嘅其他巴士公司探討過呢一方面呀？

吳智光先生：呢方面我哋冇。

MR DUNCAN：（經傳譯員）呢個問題有冇接觸過海外嘅巴士公司呢，喺呢方面？

吳智光先生：沒有。

MR DUNCAN：（經傳譯員）可唔可以話到畀委員會聽關於呢一個研究幾時會有啲進展呢？

吳智光先生：因為正如我頭先所講，我哋睇到第--另外有位機械工程系嘅教授，佢話要喺 6 月嘅時候先至可以同我哋見面，所以我諗最快我哋都要喺 6 月底嘅時候先至可以再同委員會講述番嗰個嘅進展。多謝。

MR DUNCAN：（經傳譯員）好，唔該晒。而家就由招聘轉為講去訓練嗰方面，培訓車長。我想問你，唔知以下嘅理解啱唔啱呢，其實要求點樣培訓完全係公司嘅事，就唔係話運輸署有作出過任何嘅指示嘅，係咪呀？

鄭偉波先生：係由公司決定出嚟。

MR DUNCAN：（經傳譯員）政府當局就冇提供過任何嘅係計劃或者培訓係多過你哋自己自行所提供嘅，咁樣講啱唔啱呀？只係由你哋自己公司所提供嘅，政府冇喺之上再提供其他嘅培訓，係咪呀？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）因為係咁，你所提供嘅培訓完全係獨立於其他專營巴士公司所提供嘅培訓嘅，係咪呀？

鄭偉波先生：我哋淨係負責我哋自己公司嘅培訓嘅。

MR DUNCAN：（經傳譯員）係，關於話要求啲乜嘢嘅培訓，作決定嘅純粹係你哋公司自己決定定抑或係你會同你哋其他海外嘅巴士公司傾過先至決定吖，定抑或點呢？係完全自己決定，定抑或你會問下其他巴士公司點樣做，然後你哋先至係制定嗰個計劃嘅呢？

鄭偉波先生：完全係由我哋公司自己去決定嘅。

MR DUNCAN：（經傳譯員）想請你睇 CTB-1，37 頁，想同你講一講究竟目前嗰個情況係點嘅，即係關乎培訓方面嘅，首先睇番嗰啲嘅係做全職車長嘅。37 頁，打咗上去未呢？

鄭偉波先生：係，我哋睇到。

MR DUNCAN：（經傳譯員）唔該晒。喺羅馬數字 I 嗰度，就係全職車長而冇一個係駕駛巴士嘅牌照嘅，有十五日嘅駕駛訓練，然後先至去考運輸署所舉辦嘅駕駛考試，若果佢唔通過嘅話，就會有多五日嘅培訓，通過咗嗰個考試之後，佢就有嗰個牌照，就會係請佢，就會開始做嗰個入職嘅培訓，啱唔啱呀？

鄭偉波先生：正確嘅。

MR DUNCAN：（經傳譯員）唔該晒。而呢個入職嘅培訓就包括兩個部分嘅，首先就係一個一日嘅課堂嘅培訓，第二個部分就係十至到十五日嘅駕駛培訓。

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）落去羅馬數字 II，如果想做全職車長，但係佢自己本身已經有巴士嘅駕駛執照嘅，佢哋就會參加嗰個入職嘅培訓喇？

鄭偉波先生： 正確。

MR DUNCAN：（經傳譯員）即係話係一日課堂，十至到十五日就係駕駛培訓喇？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）我有啲好奇，想知道喺香港會唔會啲車長係喺一間巴士公司轉去第二間巴士公司，即係喺巴士公司之間咁樣轉職，多唔多呢？

鄭偉波先生：係有，不過就唔多。

MR DUNCAN：（經傳譯員）又返番去第 37 頁，講到兼職嘅車長，如果兼職車長佢本身已經有巴士嘅駕駛執照，睇番嗰個標題，我咁嘅理解啱唔啱呢，除非嗰個申請者佢已經有巴士駕駛執照，否則你都唔會請佢做兼職嘅巴士車長，亦都唔會係畀嗰十五日嘅培訓畀嗰啲申請做全職巴士車長嘅人嘅，咁嘅理解啱唔啱呢？請兼職嘅話，係要請嗰啲已經擁有巴士嘅執照嘅人，係咪呀？

鄭偉波先生：正確，全部兼職車長佢都需要擁有巴士駕駛執照，我哋先至有可能會請佢嘅。

MR DUNCAN：（經傳譯員）唔該晒。而呢一個類別嘅人士，你哋係提供兩日嘅駕駛培訓，啱唔啱呀？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）就同全職車長所得到嘅十至十五日嘅駕駛培訓就唔同，咁嘅理解啱唔啱呀？

鄭偉波先生：呢個理解係啱嘅，原因就係我哋--如果嚟我哋度做兼職車長嘅人，佢一定係平時都係揸開巴士或者揸開重型車嘅，即係大型車嘅，就變咗佢揸大型車嘅經驗就已經喺處㗎喇，咁嗰兩日嘅訓練就主要係路線訓練嚟嘅。

MR DUNCAN：（經傳譯員）即係話佢有兩日嘅培訓，無論佢有幾多經驗都好，都係畀兩日嘅培訓佢，即係究竟佢係揸過巴士一個月吖，定抑或揸過巴士十年都好，佢都只係得到兩日嘅駕駛培訓，係咪呀？

鄭偉波先生：如果佢揸大型車嘅經驗係淺嘅話，我哋係不會請佢嘅，即係換句話嚟講，嚟到做兼職嗰啲，我哋請得佢嘅，佢哋都係有足夠嘅經驗嘅。

MR DUNCAN：（經傳譯員）你係咪想提及啲乜嘢嘢呢？

鄭偉波先生：係，就喺而家大家睇緊呢一頁，就喺最底嗰處，我哋亦都有啲補充嘅資料嘅，當嗰個兼職車長--當啲所有嘅車長，無論佢係全職或者兼職，完成咗嗰個駕駛訓練之後，佢哋就要通過我哋駕駛導師嘅評核嘅，如果嗰個評核嘅結果係不滿意嘅，就會再有額外嘅培訓會畀佢哋嘅，所以喺嗰個兼職車長嗰處，佢係兩日，但係如果培訓咗佢兩日，佢係過唔到呢個評核嘅話，佢都唔會出去執勤嘅。

MR DUNCAN：（經傳譯員）你剛才就話除非佢哋係好有經驗，否則嘅話，亦都唔會請佢哋嘅，可唔可以講一講你話好有經驗係乜嘢意思呢？有冇準則嘅呢？

鄭偉波先生：就唔係話一個準則嚟嘅，呢啲嘅有經驗嘅兼職車長，有啲就係以前就係揸開巴士嘅，係專營巴士，即係可能喺我哋公司做過，就離開咗一段時間，其實佢揸咗好多年巴士嘅，呢度有嘅；第二，就可能係其他巴士公司退休嘅車長。主要就係呢兩類，就係我哋覺得佢哋係有好足夠嘅駕駛巴士嘅經驗嘅。

MR DUNCAN：（經傳譯員）佢哋就冇課堂培訓，喺佢哋開工之前就唔會有課堂嘅培訓畀佢哋，係咪呀？

鄭偉波先生：現時係冇嘅，不過我哋遲下就會安排佢哋會有課堂培訓，就係裏面包括顧客服務、情緒管理呢啲嘅環節嘅。多謝。

MR DUNCAN：（經傳譯員）講到係駕駛導師，你公司嗰度點樣樣先可以成為呢個駕駛導師呢？

鄭偉波先生：佢首先就要取得運輸署嘅駕駛導師執照，即係駕駛我哋嗰啲型號嘅車嘅導師執照，就先至有可能喺我哋嗰處就做到導師，而我哋嗰啲導師佢哋大部分或者全部都係以前好有經驗嘅車長，同埋亦都做咗好多年導師嘅。多謝。

MR DUNCAN：（經傳譯員）你哋公司總共聘用咗幾多位嘅駕駛導師呢？

鄭偉波先生：現時係有十五位全職嘅駕駛導師、兩位兼職嘅駕駛導師，另外我哋再有五位車長就喺不久嘅將來就會去運輸署嗰度考試，就考取嗰個導師嘅牌照。多謝。

MR DUNCAN：（經傳譯員）好，我哋睇下一頁，第 38 頁，CTB-1，38，個標題就係「重溫課程」或者係「復收課程」，你就話係提供呢個重溫培訓畀嗰啲全職嘅、在職嘅車長，你亦都話就向呢個運輸署係作出咗承諾，呢一啲嘅重溫課程就會係起碼至少就每三年就會向在職嘅全職車長係提供畀佢哋嘅，然後就話係只係有課堂嘅培訓，跟住就講及嗰個培訓嘅內容。講到課堂嘅培訓，呢個係唔係同入職嘅培訓所講嘅係課堂培訓一樣呢？即係一個人新入職，就得到嘅課堂培訓同呢度嘅係咪一樣呢？所涉及嘅材料或者內容係咪一樣呢？

鄭偉波先生：大部分嘅內容係一樣嘅，但係我哋嗰個 submission，喺呢一段最後嗰句，就係嗰個交通意外嘅分析，由佢入職至到佢嚟到重溫培訓課程可能係已經經過咗兩年嘅時間或者兩年幾嘅時間，喺呢兩年幾時間裏面，可能就已經喺香

港發生過一啲值得佢哋去有參考性嘅交通意外，我哋就會將呢啲嘅個案就喺個課堂裏面就同佢哋嚟到分享嘅，就等佢哋知道點樣去避免呢啲交通意外嘅。

MR DUNCAN：（經傳譯員）幾時係畀運輸署嗰個承諾㗎？

鄭偉波先生：呢個都好多年前喇，我哋而家手頭上冇呢個準確嘅資料，對唔住。

MR DUNCAN：（經傳譯員）講番之前嗰一頁，喺最後嗰度，37 頁，你話通過嗰個評估之後，跟住就係派佢哋去某啲嘅路線就訓練。

鄭偉波先生：係。

MR DUNCAN：（經傳譯員）喺培訓嘅時候嘅過程當中，其實佢哋會係睇到幾多條線㗎？

鄭偉波先生：鍾生會畀呢個詳細嘅資料。

鍾澤文先生：呢個就會視乎佢將會派去邊一個廠嗰度去做嘅，有啲係三條、有啲四條、有啲五條，不過就算五條嘅路線，有啲路線係重疊嘅，即係個意思佢雖然話嗰個起點或者個終點係唔同，但係喺中間好多部分係相同，舉個例，譬如話佢喺銅鑼灣嘅摩頓臺開車去南區，佢可能就係喺銅鑼灣摩頓臺南區經過香港仔隧道之後嗰段路都係一樣嘅，之後有一架車可能就去咗海怡半島，有架車就可能去咗華貴邨，咁就喺尾嗰段係唔同嘅啫。

MR DUNCAN：（經傳譯員）其實佢哋都係一路揸呢啲線嘅囉喎，係咪？

鍾澤文先生：佢哋會喺呢啲路線裏面揸一段期間，可能係幾個月嘅，之後就會調佢去其他嘅路線㗎喇，喺呢啲路線我哋--一般我哋介定為一啲比較簡單嘅路線，可能佢嗰個站--停嘅站比較少啲，或者係佢嗰條路就冇咁複雜嘅，係比較直接啲嘅，咁等佢係熟習咗嗰個路線同埋熟習咗個駕駛技巧，我哋就會調派佢去做其他嘅路線。

MR DUNCAN：（經傳譯員）好喇，有一個司機係要揸新路線嘅話，咁係咪會有一啲熟習嘅一個過程嘅呢，還是係佢一路揸一路學定係點呢？

鄭偉波先生：鍾生。

鍾澤文先生：新嘅路線，我哋會係睇下佢會--我哋有幾個方法嘅，第一就係話佢係咪之前會係有導師係教過佢行嘅，另外就係佢或者佢自己即係宣稱佢已經係熟悉嗰啲路線，因為佢如果係熟悉個路線嘅話，我哋就可以直接畀佢去揸嘅，但係如果佢係話佢唔識呢條路線嘅話，我哋會安排佢就係去乘坐係一個服務中嘅巴士就去認識嗰一條路線嘅呢啲巴士站嘅巴士站位，同埋喺嗰條路線係點樣行法。呢個就係而家我哋嗰個做法嚟嘅。

MR DUNCAN：（經傳譯員）從你嘅陳述書嗰度，如果我理解得正確嘅話，公司就係會有三間不同嘅供應商，喺巴士嚟講，三間不同嘅生產商，係咪呢？

鄭偉波先生：李生。

李廣威先生：係，正確嘅。

MR DUNCAN：（經傳譯員）邊啲公司呀？可唔可以講一講？

李廣威先生：主要嘅供應商--主要供應商係 Alexander Dennis，即係亞歷山大丹尼士，第二就係富豪，另外就係 M-A-N，即係 Youngman。

MR DUNCAN：（經傳譯員）如果我理解冇錯嘅話，呢啲個別嘅巴士生產商佢哋係有不同嘅型號，係咪呀？

李廣威先生：係。

MR DUNCAN：（經傳譯員）好喇，當車長係接受初步訓練嘅時候，你點樣決定佢揸邊類車呀，喺訓練期間，邊個型號，點決定㗎？

鄭偉波先生：鍾生。

鍾澤文先生：我哋會睇番佢將會派落去嗰啲路線，嗰啲路線係用邊一類型嘅車，我哋都會教佢嘅。如果係一個新入職嘅車長，其實幾種類型我哋都會教，即係喺嗰十五日裏面，我哋除咗話係教佢行嗰啲路線之外，每日都可能係教佢唔同類型嘅巴士，等佢喺呢十五日裏面係熟悉各種類型嘅巴士。

MR DUNCAN：（經傳譯員）剛才你提到四、五條線嘅，即係喺訓練、培訓期間有四、五條線㗎嘛，係咪呢？

鍾澤文先生：係，冇錯。

MR DUNCAN：（經傳譯員）咁有幾多種型號嘅巴士，一個受訓嘅人喺訓練期間會接觸到㗎？

鍾澤文先生：頭先我哋講過其實我哋有三個供應商，其實主要我哋大部分嘅巴士就係 Alexander Dennis 嘅型號，亦都有富豪，呢兩個係我哋最主要嘅，喺嗰個訓練裏面，我哋多數都會係用 Alexander Dennis 嘅車去訓練我哋嗰啲司機嘅。

MR DUNCAN：（經傳譯員）有咩嘢特別原因點解係咁樣呢？

鍾澤文先生：主要因為我哋大部分嘅車都係 Alexander Dennis 嘅車。

MR DUNCAN：（經傳譯員）如果司機係需要揸一個新嘅路線咁講，即係喺之後佢可能揸新路線，新嘅模型--型號，有冇一啲訓練嘅呢？

鍾澤文先生：如果我哋有新嘅型號嘅車，我哋係會即係再安排訓練畀啲車長嘅。

MR DUNCAN：（經傳譯員）呢啲訓練訓練啲乜嘢？

鍾澤文先生：我哋嘅駕駛導師會教佢哋呢啲新型號嘅巴士嘅司機位嗰個儀標板嗰啲所有嘅控制嗰啲掣，標板裏面關於一啲警告燈嘅燈號同埋就會畀佢哋喺個導師嘅指導下係駕駛一段嘅路程去熟習架巴士嘅運作咁。

MR DUNCAN：（經傳譯員）咁係半日吖，一日吖，定點呢？

鍾澤文先生：呢個要睇下嗰個巴士--即係呢個型號嘅巴士同原有我哋嘅巴士嗰個分別有幾大，即係舉個例，譬如話我哋之前有啲電動巴士咁樣，咁嗰啲--因為全--嗰個操控或者啲掣都好唔同嘅，所以嗰個時間就會長啲。因為我哋喺訂巴士嗰陣時，其實我哋都要求供應商喺呢啲控制嘅譬如話嗰個標板各樣嘢都儘量係標準化，就唔會咁多唔同嘅操控嘅方式，就方便我哋嘅車長係去熟習嘅。

MR DUNCAN：（經傳譯員）好喇，我哋返番去第 38 頁，CTB-1，38，你就向委員會提到一啲矯正嘅訓練咁樣，...

主席：（經傳譯員）等等先，鄧律師。鄭生，想問一問，喺呢一個即係嗰個復修嘅訓練、重溫嘅訓練嗰度，就畀呢啲全職嘅車長，係三年起碼有一次嘅，其實呢一個--點樣定呢一個嘅時間嘅呢？點解唔係一年一次呢？點定㗎？

鄭偉波先生：我哋覺得就冇需要一年一次返嚟返得咁密。

主席：（經傳譯員）你知唔知道其他巴士公司嘅做法係點㗎，喺呢方面，佢哋點樣做㗎？

鍾澤文先生：主席，據我理解，其他巴士公司同運輸署嗰個承諾都係每三年一次呢一個重溫課程嘅。

主席：（經傳譯員）你知唔知道海外嗰啲巴士公司喺呢方面又點樣做㗎？

鄭偉波先生：我哋冇去對比過。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）另一點就講到呢啲嘅重溫培訓，而家就係兼職嘅就冇重溫培訓嘅，係咪呀？

鄭偉波先生：現時係冇嘅，不過我哋遲下亦都係會提供呢個課程畀兼職車長嘅。

MR DUNCAN：（經傳譯員）你話遲啲，係幾時呀？

鄭偉波先生：呢個我哋要同啲兼職車長去商討，因為嗰個時間性，因為佢哋--要就到佢哋，因為佢哋可能有份正嘅職業，咁要睇下嗰個時間嘅安排，咁但係我哋希望可以儘快係搵到一個合適嘅時間方便呢啲兼職車長係返嚟上呢個重溫課程嘅。

MR DUNCAN：（經傳譯員）咁有冇接觸過呢啲兼職車長，有冇接觸過佢哋，喺呢方面？

鄭偉波先生：未嘅。

MR DUNCAN：（經傳譯員）好喇，講到呢啲矯正嘅培訓，即係第58頁，第1段嗰度，你都睇到兩間公司就需要全職、兼職嘅車長係如果有一啲違例扣分，就要向公司匯報嘅，跟住就有一個計分嘅制度，就要決定究竟需唔需要係上呢啲咁樣嘅矯正嘅訓練課程咁樣嘅，睇唔睇到呀？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）你其實係咪全倚賴車長本身係匯報呢啲咁嘅扣分畀你哋聽呢？

鄭偉波先生：個具體運作，吳生會同大家講解。

吳智光先生：主席，車長嚟講，佢係有責任向我哋申報嘅，呢個係第一；而第二，我哋亦都每個月係會隨機抽樣係搵一啲嘅車長出嚟，而我哋就抽咗佢之後，係要求佢讓我哋--簽同意書畀我哋去有關嘅政府部門去查核佢而家記分嘅紀錄。多謝主席。

MR DUNCAN：（經傳譯員）呢個制度行咗幾耐呀？

吳智光先生：我印象起碼有幾年嘅，應該有五年嘅。

MR DUNCAN：（經傳譯員）有冇問題呢，即係呢個咁嘅制度？即係話佢哋係扣咗分，但係又冇向你呈報，有冇發現咁嘅事情呢？

吳智光先生：有試過，如果我哋見到有呢啲咁嘅情況嘅時候，我哋會作出紀律嘅懲處。多謝。

MR DUNCAN：（經傳譯員）時不時亦都曾經需要過咁做，有冇實際上發生過咁嘅事情呢？

吳智光先生：我印象係有嘅，亦都有啲嘅情況就係--睇下先，對唔住，應該係有嘅，不過亦都唔多。

MR DUNCAN：（經傳譯員）想睇番第3段，即係標題係「矯正培訓」嘅第3段，喺2016年一百九十八位車長係參加過呢一啲嘅矯正培訓，我就想問下跟住嗰句係點解嘅，佢哋裏面嘅百分之76.3嘅車長就喺之後嗰六個月冇再係因為佢哋需要負責，而所以有紀律處分，可能嗰度英文嘅文法上面有啲錯誤，百分之76.3就冇話因為佢哋有交通意外而佢哋需要負責而受紀律處分係講之後嗰六個月，換句話講，減一減個數，就即係話就算係上過呢啲糾正嘅課程之後都仲有百分之廿三點幾佢哋再有呢啲咁樣樣佢哋係做錯咗而引致交通意外，係咪呀？

鄭偉波先生：正確嘅。

MR DUNCAN：（經傳譯員）換句話講，佢哋有扣咗8分或者更多，佢哋就參加咗個糾正課程，縱使係咁，即係縱使佢哋係咁都好，之後都仲有再犯錯，需要紀律

處分，係咪呀？

鄭偉波先生：係有嘅，但係當然，就要睇下佢哋嗰個再犯錯係犯得有幾嚴重，如果係犯咗嚴重嘅錯，而之前又有類似嘅錯，呢個我哋就會再提升嗰個處分嘅，甚至係有可能係解僱嘅。

MR DUNCAN：（經傳譯員）呢一個比例對公司嚟講係咪需要關注呢？即係話有咁嘅百分比嘅車長縱使係接受咗矯正嘅培訓，但係之後依然涉及一啲佢哋需要負責嘅交通意外，而又要接受紀律處分，你哋關唔關心、擔唔擔心呢個問題？

鄭偉波先生：我同意係需要關注嘅。

MR DUNCAN：（經傳譯員）咁又點樣樣去--係咪需要係譬如話試下修改一下你哋嗰個糾正課程，咁先至可以將呢個百分比係做得更好呢？

鄭偉波先生：呢個係其中一個方向，我哋係需要再去分析佢哋係點解上完呢個堂都繼續會有意外嘅，因為呢個每一單意外個成因都係不相同嘅，我哋係需要返去再作詳細嘅分析嘅。

MR DUNCAN：（經傳譯員）你係咪打算咁樣做㗎？

鄭偉波先生：係。

MR DUNCAN：（經傳譯員）模擬訓練，我想講一講呢個安排，我哋都知道飛機師佢哋培訓嘅其中一個部分就會係揸個模擬駕駛嘅，我想問呢一啲咁樣嘅系統有冇嘅呢？如果有人係想做係車長，有人想揸巴士，即係其實佢哋都--巴士上面都載住好多乘客㗎，你哋有冇一個咁樣嘅系統嘅呢？模擬駕駛巴士嘅系統，有冇？

鄭偉波先生：我哋沒有呢個系統嘅，因為我哋覺得如果要練習駕駛巴士，係駕駛一架真嘅巴士，喺真嘅路面上面嚟到去行駛先至真係學到嘅。唔該。

MR DUNCAN：（經傳譯員）不如你答番個問題，直接問嗰個問題，咁樣樣嘅系統有冇嘅呢？即係有冇咁嘅系統喺度嘅呢？

鄭偉波先生：我哋公司冇，不過我就聽過係有嘅，有呢一類嘢嘅。

MR DUNCAN：（經傳譯員）咁聽到嘅係咩嘢呢？

鄭偉波先生：我以前聽過香港有--另外有巴士公司有呢個 simulator 嘅。

MR DUNCAN：（經傳譯員）係邊一間公司？

鄭偉波先生：九巴，我係聽過嘅啫，我冇見過。

MR DUNCAN：（經傳譯員）有冇聽過海外嘅巴士公司有用到呢一啲嘅模擬駕駛嘅系統？

鄭偉波先生：我有聽過星加坡有嘅。

MR DUNCAN：（經傳譯員）喺邊度聽番嚟嘅呢？

鄭偉波先生：我剛剛喺我隔籬同事鍾生度聽番嚟嘅。

MR DUNCAN：（經傳譯員）你知唔知道喺星加坡政府佢哋都係會負責嗰個巴士車長嘅培訓，部分嘅責任都係政府做番嘅，有冇聽過呢？

鄭偉波先生：我畀我嘅同事鍾生答。

鍾澤文先生：主席，我哋係聽過嘅，其實我哋喺兩年前，我嘅同事亦都去過星加坡嗰度就係參觀過呢一個 simulator，同埋了解過喺星加坡嗰個 Land Transport Authority 佢哋喺呢一方面嘅運作、嘅工作係點樣嘅。多謝主席。

MR DUNCAN：（經傳譯員）即係你同事去過星加坡，係咪呀？

鍾澤文先生：冇錯。

MR DUNCAN：（經傳譯員）係公司派佢去嘅？

鍾澤文先生：係我哋公司派佢去嘅。

MR DUNCAN：（經傳譯員）佢係咩嘢職級嘅呢？係咪公司裏面嘅高層管理嘅人士呢？

鍾澤文先生：佢係我哋公司嘅經理級同事嚟。

MR DUNCAN：（經傳譯員）佢返嚟有冇寫番個報告畀你哋，話畀你哋聽佢睇到啲乜嘢嘢呢？

鍾澤文先生：佢哋返咗嚟之後係有做過一個 presentation 畀我睇嘅。

MR DUNCAN：（經傳譯員）係咪書面㗎？

鍾澤文先生：唔係，係一個 presentation 嚟嘅，佢係當時除咗話去睇呢個 simulator，仲係睇咗其他嘅--即係喺星加坡嘅巴士嘅運作嘅嘢。

MR DUNCAN：（經傳譯員）關於呢個模擬訓練，佢主要係講咗啲咩嘢呢？

鍾澤文先生：主要，好似頭先主席講，呢一個模擬訓練，呢啲都係政府嘅一啲資助去做嘅，因為嗰個 simulator 都非常之昂貴嘅；同埋喺嗰個模擬訓練裏面係--都係會用--有一啲唔同嘅情況係喺嗰個螢光幕嗰度會播出嚟係去考核個司機嗰個反應咁樣嘅。

MR DUNCAN：（經傳譯員）呢個係兩年前嘅，你咁講嘅，頭先，係咪呀？

鍾澤文先生：係，冇錯。

MR DUNCAN：（經傳譯員）當時係邊個嘅主意呢？係公司嘅主意吖，定抑或係政府嘅主意就係要睇一睇呢一個模擬訓練呢？

鍾澤文先生：我哋唔清楚係星加坡係星加坡政府吖，定係星加坡嘅巴士公司嘅主意。

MR DUNCAN：（經傳譯員）係咪你哋自己公司嘅睇法，定抑或係其他機構或者組織嘅主意嚟嘅呢？

鍾澤文先生：你係指去星加坡參觀呢一個？

MR DUNCAN：（經傳譯員）係呀，係你公司自己諗到呢一個主意吖，定抑或係其他人提出呢一個咁樣嘅建議呀？

鍾澤文先生：呢一個 visit 係其實係我哋個黑盒嘅供應商喺星加坡因為有一個 EYTP 嘅 conference，佢請我哋去參--去 participate，咁喺嗰個 conference 之外，我哋另外再安排去參觀呢一個 simulator 嘅。

MR DUNCAN：（經傳譯員）咁係巴士製造商定抑或係你哋係決定--自己決定話都想睇下模擬器呢--模擬？

主席：（經傳譯員）我諗佢唔係話巴士供應商，係嗰個黑盒嘅係供應商，係咪 NEC 呢？係咪 NEC 邀請你哋去 UTIP，UTIP 其實係咩嘢意思？可唔可以講一講呢個簡稱其實代表乜嘢嘢呢？

鍾澤文先生：係一個 UITP，佢係一個國際嘅運輸...

主席：（經傳譯員）嗰個簡稱究竟係--即係嗰個英文嘅縮寫係乜嘢嘢呢？係咪 International Transport 呢？

鍾澤文先生：我...

主席：（經傳譯員）係咪國際運輸...

鍾澤文先生：好似係，我唔 sure，我可以補番畀你。

主席：（經傳譯員）佢自己有個網站嘅，係咪呀？

鍾澤文先生：冇錯。

主席：（經傳譯員）係關乎公共交通？

鍾澤文先生：冇錯。

鄭偉波先生：其實我嘅同事而家查緊。

主席：（經傳譯員）好，唔該晒，你搵到個答案，就話畀我哋聽喇。

鄭偉波先生：係。

主席：（經傳譯員）係當時就係你去參觀嘅時候，因為你喺星加坡，所以你就係借嗰個機會去睇過星加坡嗰個模擬訓練系統喇，當時係邊個提出一個咁嘅建議呢？

鍾澤文先生：係 NEC 建議我哋去睇一睇嘅。

MR DUNCAN：（經傳譯員）你自己有冇親自出席去睇過？

鍾澤文先生：我冇。

MR DUNCAN：（經傳譯員）但係你嗰個之後畀番個報告你嗰個同事自己去睇過，係咪呀？

鍾澤文先生：係，冇錯。

MR DUNCAN：（經傳譯員）你較早時候係咪咁樣講㗎，政府提供一啲資助㗎，係咪呀？

主席：（經傳譯員）我諗佢意思係話星加坡政府係資助係使用呢一類嘅培訓，咁講啱唔啱呀？

鍾澤文先生：我嘅理解係咁樣。

主席：（經傳譯員）唔該。因為佢哋就係培訓嗰個車長嘅，係政府係培訓車長，就唔係巴士公司培訓車長嘅，呢個係透過佢哋嘅陸上交通當局去做嘅，係啱唔啱呀？

鍾澤文先生：啱。

主席：（經傳譯員）未離開呢一個題目之前，我就想問，你個同事去完之後返嚟向你匯報，你剛才所講嘅就係話其中報告裏面嘅一個元素就話都相當貴，除此之外，佢仲有冇匯報其他嘅嘢呀？

鍾澤文先生：我同事就匯報咗嗰個 simulator 就唔係咁真實，因為架車嗰個 simulator 係唔會識郁嘅，即係冇咗嗰個 3D 嗰個--4D 嘅感覺。

主席：（經傳譯員）你知唔知道呢一個模擬機器嘅製造商喺邊一度呀？

鍾澤文先生：我哋唔知道。

主席：（經傳譯員）鄧律師。

MR DUNCAN：（經傳譯員）好喇，之後你公司入面有冇進一步跟進，睇下會唔會考慮用呢類咁樣嘅模擬訓練嚟到去做培訓呢？

鄭偉波先生：我哋冇考慮會採用嘅。

MR DUNCAN：（經傳譯員）因為你係想真正實際嘅駕駛體驗，係咪呀？你係希望做呢方面，係咪呀？鄭生。

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）好喇，而家想講一講目前嗰個嘅培訓同埋將來你打算點樣做，鄭生，你嘅陳述書嗰度有講到就話會有一啲改變嘅，短期內，咁或者想你睇一睇 54 頁，CTB-1 第 54 頁，或者首先睇一睇 A 嗰段，呢一版 A 嗰段。

鄭偉波先生：睇咗。

MR DUNCAN：（經傳譯員）我留意到你講到話最近有檢討即係一啲安全嘅問題，跟住就係搵出以下嘅範疇係可以加以改善嘅咁，可唔可以同我哋講一講呢一個檢討邊個參與呢個檢討㗎，同埋檢討咗幾耐呢？

鄭偉波先生：呢個檢討其實就係我今朝有講過嘅安全委員會嚟嘅，我哋公司成立咗唔係太耐嘅安全委員會，而呢個安全委員會嘅成員就都已經寫咗喺我哋個陳述書嗰處㗎喇，就其實就係我、我隔籬嘅鍾生、吳生、李生、蘇生，就同埋今日有一位嚟唔到嘅同事馮生，就係我哋六位係常設嘅會員。

MR DUNCAN：（經傳譯員）好喇，你點樣進行呢個檢討呀？

鄭偉波先生：我哋就而家已經搵到出嚟，就係喺呢度個 submission 寫咗出嚟，就係 A、B、C、D、E、F、G--E、F 咁樣，就係呢一啲嘅嘢，初步我哋搵到呢啲嘅位置，就覺得需要改善嘅，咁而個具體嘅改善係點樣做法同埋嗰個時間性，咁我哋就會係分派咗畀我哋嘅唔同部門嘅同事而家去檢討緊嘅，有啲如果可以即刻做得到嘅，舉個例，就係我哋嗰啲兼職車長，就要佢申報佢嗰個正職嘅工作時間，呢啲比較可以快做到嘅，我哋就決定咗係 6 月 1 號就要實行。而有啲就要牽涉到就係唔係--有啲我哋唔係咁容易可以控制到嘅嘢嘅，舉個例，就係我哋嗰個培訓，課堂嘅培訓，提供畀兼職車長嘅課堂培訓，頭先鍾生都講解過，我哋就要時間，要就番嗰啲兼職車長佢自己嘅時間，就安排啲課堂畀佢哋返嚟上嘅，我哋就係每一個呢啲範疇，我哋都要睇嗰個實際嗰個時間性係點樣樣嘅。

MR DUNCAN：（經傳譯員）所以檢討就係有書面嘅，係咪呀？即係有大家溝通、有便箋呀咁樣，還是坐低大家開會，就咁算，個程序係點㗎？

鄭偉波先生：我哋剛剛開咗第一次嘅會議，就我哋係有會議紀錄嘅，咁開完個會之後，每一個事項就要有唔同嘅總監或者高級經理係要負責跟進，有可能係一位總監，亦都有可能係跨部門係多過一位總監，佢哋就係要去睇一睇，就真係去實行呢啲嘢嘅時候，個細節--個執行細節到底要係點樣樣，好喇，知道咗，咁樣喺下個會議就會返番去嗰個安全委員會，就報番返去，就大家成個委員會就去要商討一下，再檢討一下，就有個真真正正嘅實行時間，呢個我哋就係我哋打算咁做嘅。除咗話去檢討之外，我哋亦都喺個委員會有傾過，就話檢討咗、實行咗，將來我哋嗰個跟進嘅工作亦都係好重要嘅，到底到時點樣嚟到跟進呢？我哋會繼續喺嗰個委員會裏面嚟到做決定嘅。多謝。

MR DUNCAN：（經傳譯員）會唔會有第二次嘅會議？有冇建議第二次嘅會議呀？

鄭偉波先生：我哋嗰個委員會就暫定就每兩個月就開一次會，而董事總經理如果覺得係有需要嘅時候，就可以加開會議嘅。就而家其實我都一路問緊我身邊嗰啲同事，即係當然喺公司問，就係佢哋嘅進展係點樣樣同埋有冇遇到困難，咁如果我--去到我認為值得要加開會議嘅時候，我就會召開呢個會議㗎喇。多謝。

MR DUNCAN：（經傳譯員）會唔會係第一次開會個會議紀錄畀唔畀到我哋委員會參考呢？

鄭偉波先生：可以，我哋畀你。

MR DUNCAN：（經傳譯員）唔該晒。好喇，第 8 段，呢一版嘅第 8 段就提到就提升嗰個新路線嘅培訓嘅，即係對車長嚟講，係 54 頁，應該 54 頁。

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）全職、兼職都係有㗎喇，你喺呢方面有冇一啲細節，咁呢個訓練點樣係提升？

鄭偉波先生：細節鍾生係會提供嘅。

鍾澤文先生：咁而家新路線嘅安排就係個司機就係去搭一次嗰架車嘅路線，將來我哋會係除咗佢搭完呢一程車之外，我哋會再畀呢架車佢揸一次，呢架車當然唔係載客嘅，等佢可以熟習晒成條路嘅行法咁樣。

MR DUNCAN：（經傳譯員）喺嗰個培訓嘅時數方面，即係啲新請番嚟嘅兼職車長嗰方面，個計劃又係點樣呀？

鍾澤文先生：新車長嗰個--即係兼職車長嗰度，我哋嗰個駕駛嘅時數會係由而家嘅八個鐘增加到去十六個鐘，另外我哋亦都會係增加一個四個鐘嘅課堂訓練，呢個課堂嘅訓練係會包括咗顧客嘅服務、情緒嘅管理、一啲交通嘅安全嘅知識同埋一啲相關嘅法例，例如話酒駕、毒駕、藥駕或者係嗰啲《殘疾歧視條例》等等呢一啲條例嘅。

MR DUNCAN：（經傳譯員）好喇，有冇其他嘅建議？即係呢度喺底嗰度，第 54 頁，底嗰度，B，I 同埋 II 嗰度。

鄭偉波先生：對唔住，我唔明個問題，可唔可以重複？

MR DUNCAN：（經傳譯員）可唔可以確定一下呢啲咁樣嘅提升嘅培訓，你正話所講，咁係咪包括埋我哋而家睇到喺第 B I 同埋 II 嗰度當中所講嘅細節呢？即係 54 頁同埋第 55 頁嗰度，係咪包埋呢啲㗎？

鄭偉波先生：係包埋呢啲。

MR DUNCAN：（經傳譯員）好喇，第 55 頁，嗰個重溫培訓就畀嗰啲車長嘅--在職車長嘅，呢個係咪全職同埋兼職都有份㗎？

鄭偉波先生：之前一頁嘅 B，我哋係講緊我哋係會增強兼職車長嘅培訓，而呢個兼職車長嘅培訓就係分開兩部分，就係羅馬數目字 I 同埋羅馬數目字 II，其實我哋一路而家講緊係兼職車長嚟嘅，因為全職車長一向已經有兩方面嘅訓練。

MR DUNCAN：（經傳譯員）唔該晒，我明喇。主席剛才問你一個問題，就係問到即係嗰一個矯正培訓嗰一方面，佢哋係得三年一次咁樣，呢個啱唔啱呀？係咪咁講呀？即係嗰個重溫培訓嗰度，三年一次，係咪呀？

鄭偉波先生：至少喺三年裏面要有一次。

MR DUNCAN：（經傳譯員）咁我相信呢個期間，即係呢個咁嘅訓練期間，兼職嘅車長都係一樣，係咪咁樣？

鄭偉波先生：將會係，現在兼職車長係冇，將會係，將來。

MR DUNCAN：（經傳譯員）係主席就問點解三年，點解揀三年呀？有冇一啲建議就話係可以檢討一下佢哋接受呢啲重溫培訓嗰個嘅期間，等佢哋就係得到一啲知識，就係需要採取一啲嘅步驟咁樣，等佢哋可以係--等啲乘客可以減低嗰個安全嘅顧慮呢？

鄭偉波先生：其實嗰個重溫訓練，我自己覺得就係同嗰個駕駛安全就唔係有百分之一百嘅關係嘅，係有部分有關係，反而我哋日常係點樣監察我哋啲車長嘅駕駛行為，呢個係更重要嘅。而嗰個三年一次嘅課堂重溫訓練，我哋暫時都冇聽到車長反映返嚟話隔得太長，不過呢個我哋可以同工會開會嘅時候探討下、聽下佢哋嘅意見，睇下佢哋覺得係有冇需要係加密啲呢個培訓，我哋要聽一聽，因為佢哋係受眾嚟嘅，我哋一定要聽一聽佢哋嘅睇法。

MR DUNCAN：（經傳譯員）我點解問呢個問題呢？就係由於似乎我哋遇到一個咁嘅情況，就係話嗰啲糾正嘅培訓似乎唔係好似你預想中咁有效用喎，會唔會促使你就係去考慮一下或者有一啲係又重溫、又矯正咁樣樣嘅形式嘅培訓會唔會有用呢？你會唔會係考慮係加密啲嗰個重溫嘅培訓呢？

鄭偉波先生：今日聽咗你嘅意見之後，我哋返去會喺我哋嘅安全委員會嚟到探討嘅。

MR DUNCAN：（經傳譯員）我哋今日未結束之前，我亦都提過一下你哋成立咗呢個安全委員會，你哋開過一次嘅會議，你亦都將一啲工作下放咗畀其他人士，我想問下，有冇同車長以及係所有嘅工會係溝通過呢，即係關於你哋安全委員會所提出嘅建議，有冇同車長、同工會提過呀？

鄭偉波先生：係冇佢哋提過或者未有同佢哋提過嘅，因為而家只係剛剛開咗第一次會議，同埋將來我哋打算就係喺個安全委員會有任何檢討、任何改動，有定案嘅時候先至會同工會講嘅，因為如果嗰個事情未成熟之前就走去同佢哋講，咁可能會製造到嗰個訊息混亂嘅。唔該。

MR DUNCAN：（經傳譯員）你話定案，即係話你作咗決定，你就通知啲工會，定抑

或你作一個初步嘅決定，然後就同工會去討論呢，然之後先至作最後嘅定案呢？

鄭偉波先生：呢一個就要睇嗰個事情是否有爭議性嘅，如果嗰件事情係沒有爭議性嘅，譬如我話要加長佢哋嗰個駕駛訓練嘅時數，呢個我相信一定冇爭議性，如果咁樣嘅話，我唔覺得就需要話事先要同工會講嘅，但係如果有啲事情有可能係有爭議性嘅，我哋就要視乎嗰個情況，就有需要就同嗰個工會喺比較早嘅階段，就要溝通嘅。

MR DUNCAN：（經傳譯員）主席先生，我諗係差唔多時候喇，係咪呀？

主席：（經傳譯員）係，大律師，鄭先生同埋你嘅同事，我哋而家嚟到四點半，我哋今日就係暫時到此為止，係想邀請你哋明天再繼續出席，我哋會明天10點鐘再恢復嘅，感謝你哋今日出席。

鄭偉波先生：再見。

(10.00 am)

EVIDENCE FROM NEW WORLD FIRST BUS SERVICES LTD AND CITYBUS LTD: MR SAMUEL CHENG, MR WILLIAM CHUNG, MR PAUL LI, MR GARETH NG, MR KENNETH LIT, MR KENNY SO (given in Cantonese; transcription of the simultaneous interpretation)

CHAIRMAN: Good morning.

Mr Duncan.

Examination by MR DUNCAN (continued)

MR DUNCAN: Thank you, Mr Chairman.

Mr Cheng, good morning.

MR SAMUEL CHENG: Good morning.

MR DUNCAN: Good morning, gentlemen.

I would like to start this morning by asking some questions relating to the devices that are available to the company with regard to bus safety.

The first matter that I would like to address is the question of what's commonly referred to as the black box.

In that respect, could I ask you to turn up, please, CTB-1 at page 55.

MR SAMUEL CHENG: Yes, I see that.

MR DUNCAN: Could I bring to your attention item 1 on that page, "Introduction of black boxes to our buses". Do you see that entry?

MR SAMUEL CHENG: Yes.

MR DUNCAN: Do those paragraphs contain a brief history as to the installation of black boxes in the buses?

MR SAMUEL CHENG: Correct.

MR DUNCAN: It seemed to have commenced in October 2003, with a requirement from the Transport Department for the devices to be installed.

MR SAMUEL CHENG: Correct.

MR DUNCAN: Then that would apply to buses first registered after July 2004.

MR SAMUEL CHENG: Correct.

CHAIRMAN: Perhaps we could have the letter from the Transport Department, which I think is October 2013, which details this, so that this can be followed by others. I think it's annex 1, is it not?

MR DUNCAN: It would be, I think, at TD-2, page 205.

MR SAMUEL CHENG: Yes, I see it.

MR DUNCAN: So the buses registered after 2007 came with black boxes; is that a correct understanding?

MR SAMUEL CHENG: For the first batch of buses first registered after the effective date, that was in 2007, in other words between 2004 and 2007, we didn't have any batch of new buses. In 2007, we had the first batch of buses equipped with black boxes when they were first registered.

MR DUNCAN: Right. So did the bus companies themselves then provide the black boxes as part of the delivery of the bus?

MR SAMUEL CHENG: Correct.

MR DUNCAN: Thank you.

If I go back to CTB-1/55, it was stated that in 2010, your companies took the initiative to upgrade the black boxes to an integrated system, with automatic bus stop announcement capability.

Is that the position?

MR SAMUEL CHENG: Yes.

MR DUNCAN: Thank you.

CHAIRMAN: Mr Duncan, before you pursue that line, perhaps we could establish what was the base requirement. It's the second page of the document we just looked at, the 2003 letter, and it's on the next page that the requirements are stipulated.

MR DUNCAN: So can we take you back to that page, please, TD-2 at 206.

In paragraph 2, do you see the requirements of the Transport Department as they were when the requirement was issued --

MR SAMUEL CHENG: Yes, I see that.

MR DUNCAN: -- in 2003, headed under (a) and (b) -- first of all, the operation times, the start time, rolling time,

idle time and finish time; and secondly, the speed of the vehicle.

Now, if you go back to --

CHAIRMAN: Forgive me again, Mr Duncan -- item 1 stipulates the purpose of this requirement, does it not, in these terms?

"The purpose of the Electronic Data Recording Device is to provide tools for the bus company to monitor and manage the on-road speed- and safety-related behaviour of its buses, and indirectly to encourage better driving behaviour."

Do you see that, Mr Cheng?

MR SAMUEL CHENG: Yes, I see it.

CHAIRMAN: What did you understand was the role, if any, that was to be played by the Transport Department in response to this requirement?

MR SAMUEL CHENG: Yes, the TD had a role. The TD took the initiative to promote the idea of installation of black boxes by the bus company.

CHAIRMAN: And thereafter?

MR SAMUEL CHENG: Thereafter, the bus company has to meet this requirement under the guideline. The technology at that time was such that those items were available, but then, a few years later, there was new technology. When our company became aware of that, we upgraded the system

of our black boxes.

CHAIRMAN: And how did you become aware of the development of new technology?

MR SAMUEL CHENG: May I defer to Mr Chung, my colleague?

CHAIRMAN: Yes, Mr Chung.

MR WILLIAM CHUNG: Mr Chairman, at the time we had a study. We were studying the idea of a bus stop announcement facility. We didn't want the bus captains to have an increase in their workload. Therefore, we studied the idea of making use of GPS so that there would be automatic bus stop announcements.

When we were studying the matter, we came to understand that the two systems could be integrated so that, in addition to meeting the requirements of the TD in relation to provision of data, we could also have the positions, the locations of the buses.

Thank you.

CHAIRMAN: Yes, Mr Duncan.

MR DUNCAN: Thank you, Mr Chairman.

So do I understand that it was the company which took the initiative to increase the available technology?

MR SAMUEL CHENG: Correct.

MR DUNCAN: So do I understand correctly that between 2003 and 2010, when according to the letter the company took

that initiative, the Transport Department itself did not require any further advances in the technology in the black box, beyond what it set out back in 2003?

MR SAMUEL CHENG: Mr Chung will answer this question.

MR WILLIAM CHUNG: No, there wasn't.

MR DUNCAN: If I go again to your submission at page 55, at the bottom of the page you have set out the second-by-second data which is available from the black box.

Is that the data which is available today from the black box?

MR SAMUEL CHENG: For such a question relating to the technology, my colleague Mr Lit will take it.

MR KENNETH LIT: Correct.

MR DUNCAN: Have there been improvements to the system between the time that the automatic bus stop announcement capability was integrated with the system?

MR KENNETH LIT: Yes.

MR DUNCAN: What are those improvements?

MR KENNETH LIT: Last year, in 2017, we started to install a new system. We call it RTS2, real-time system 2. We have added new functions, including the following. As Mr Cheng mentioned yesterday, in the third quarter, when the entire fleet has been fitted with this system, then we will able to provide a display; that is, we will

alert the bus captain when the bus is speeding.

MR DUNCAN: That's the real-time system which is yet to be implemented across the whole fleet; is that right?

MR KENNETH LIT: Correct. We haven't completed the fitting of the entire fleet.

MR DUNCAN: Right. Apart from the real-time system, were there any other improvements to what was available from the black box between the time of the integration of the system, of the bus stop announcement, up until the present time?

MR KENNETH LIT: No. For that period of time, no, no improvement.

MR DUNCAN: Now, when was it that the company decided that the real-time system would be implemented?

MR KENNETH LIT: Round about 2015, when the franchise of the Citybus was granted by the TD, among the clauses there was this requirement on us. That is, we have to provide a real-time -- to provide estimated time of arrival.

As a result of this requirement of the ETA system, it means that we require a real-time function. Therefore, round about that time, we started to prepare for the fitting of the entire fleet with this real-time bus stop announcement or the ETA.

MR DUNCAN: I would like you to look, please, at a document --

CHAIRMAN: Before you move on -- you said earlier that this RTS2 system would be fully installed in the third quarter. Is that the third quarter of 2018?

MR KENNETH LIT: That's correct, sir.

CHAIRMAN: Thank you.

Yes, Mr Duncan.

MR DUNCAN: Thank you, Mr Chairman.

Could you look, please, at a document which you will find at BM1 at page 35.

Are you looking at a document which is headed "News release"?

MR SAMUEL CHENG: Yes, we're reading it.

CHAIRMAN: Take your time to familiarise yourself with it first.

MR SAMUEL CHENG: We are done, sir.

MR DUNCAN: Thank you. Now, is it headed, "NEC won the contract of the integrated automatic bus stop announcement and data logger system by New World First Bus Services Ltd and Citybus Ltd"? Is that the heading?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: Is it dated 13 January 2012?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: Does the first paragraph announce, on the part of NEC, that it has won a contract in respect of 702 buses of New World First Bus Services Ltd and 172 buses

of Citybus Ltd?

MR SAMUEL CHENG: Yes, I see.

MR DUNCAN: And does it refer to the deployment of the integrated automatic bus stop announcement, ABSA, and the data logger, DL, system?

MR SAMUEL CHENG: Yes. This is about the specific details. I defer to Mr Chung, please.

MR WILLIAM CHUNG: That is correct, sir.

MR DUNCAN: Thank you. Then if I take you down to the third paragraph, does it refer to the fact that, "The BSA and DL system combines the Global Positioning System ('GPS'), bus odometer signal and proprietary snap-on-route technology to overcome the 'ghost' GPS signal caused by the unique environment of narrow streets and skyscrapers in Hong Kong"?

MR WILLIAM CHUNG: That's correct, sir.

MR DUNCAN: Then the last paragraph on that page, does it refer to the fact that, "The control unit also logs the position and speed of the bus throughout the day"?

MR WILLIAM CHUNG: That's correct, sir.

MR DUNCAN: And that the data will be uploaded to the server via WiFi when the bus is returned to the bus depot?

MR WILLIAM CHUNG: That's correct, sir.

MR DUNCAN: I want to understand exactly what this contract achieved for the company. If you go back to your

submission at page 55, CTB-1/55.

CHAIRMAN: Before you embark on that, Mr Duncan, might I ask this question.

Paragraph 1 has two parts to it. One is the contract which has apparently been recently won; and secondly, it states this:

"... after its successful implementation of the same system across 760 buses of Citybus, the only large-scale deployment of GPS and ABSA system in Hong Kong."

Of that statement, can I ask this: first of all, is that accurate; and secondly, when was this system implemented?

MR WILLIAM CHUNG: Mr Chairman, this system was first implemented in the Citybus franchise 1. We started with franchise 1 and then we extended it to Citybus franchise 2 and also First Bus.

CHAIRMAN: The question was when was it installed, in terms of time?

MR WILLIAM CHUNG: Citybus franchise 1, it was June 2011. Citybus franchise 2 and also New World First Bus, the installation was towards the end of 2012; they were completed then.

CHAIRMAN: Thank you.

Thank you, Mr Duncan.

MR DUNCAN: Thank you, Mr Chairman.

If you go to page 55, there is reference there at the bottom to the fact that:

"In 2010, our companies took the initiative to upgrade the black boxes to an integrated system with automatic bus stop announcement capability."

Is this via the NEC project?

MR WILLIAM CHUNG: Yes, correct. That was done by NEC, sir.

MR DUNCAN: So was it 2010 or 2011?

MR WILLIAM CHUNG: In 2011, we started discussion with NEC and developed this system. In June 2011, the installation took place in the Citybus fleet franchise 1.

MR DUNCAN: Right. So when you refer at the bottom of that page to something happening in 2010, is that the same as the NEC system you have just been referring to, or is it a separate integration?

MR WILLIAM CHUNG: Your question again, please, sir.

MR DUNCAN: I am trying to ascertain what happened in 2010, as we can see from the bottom of page 55. It is stated there:

"In 2010, our companies took the initiative to upgrade the black boxes to an integrated system with automatic bus stop announcement capability."

It would appear that that's what NEC did, according to your testimony a few moments ago, in 2011. Is that

correct?

MR WILLIAM CHUNG: That's correct, sir.

MR DUNCAN: So for "2010" here, should we be reading "2011"?

MR SAMUEL CHENG: Mr Chairman, if we have to develop a new system, it would take time, and in 2010 we took the initiative to get in touch with NEC to design the new system. With the new system, we have to install them in 700 or so buses, and that again would take time. We can manage a couple of them per day, because the buses are deployed on the road every day.

So, from the installation to the end of the installation, it took about a year's time. So, in our submission -- perhaps please turn to the next page. Here we say:

"The whole fleet of CTB (F1) was equipped with this integrated system in June 2011. The whole fleet of CTB (F2) and NWFB were equipped with the same integrated system at the end of 2012."

That's the same system that I'm talking about, because CTB (F1), during the franchise renewal, the government imposed a requirement that we have to provide the bus announcement system, so we had to complete the CTB (F1) fleet first.

MR DUNCAN: Thank you for clarifying that. So the initiative was taken in 2010 but the installation

commenced in 2011, with the help of NEC; is that correct?

MR SAMUEL CHENG: That's correct.

MR DUNCAN: Thank you.

CHAIRMAN: Before you move on, Mr Duncan -- you say that in the course of the renewal of the CTB (F1) franchise, the government imposed a requirement that you provide a bus announcement system. Have we been provided with documentation that evidences that requirement?

MR SAMUEL CHENG: In the franchise document, it doesn't specifically refer to this bus announcement system. But when the franchise was renewed, other than the franchise document, through exchanges of letters, there was an undertaking that something else would be done.

In our company, we do have that document with us. Thank you.

CHAIRMAN: Would you be in a position to provide us with copies of those documents -- perhaps there were a series of documents -- so we can follow this point?

MR SAMUEL CHENG: No problem, sir.

CHAIRMAN: Thank you.

MR DUNCAN: I think there was reference earlier on to another document, a franchise, which first raised a question of real-time capability. Was that mentioned earlier, Mr Cheng?

MR SAMUEL CHENG: Yes, that was.

MR DUNCAN: Is that a separate requirement from the one that you just mentioned?

MR SAMUEL CHENG: I defer to Mr Chung, please.

MR WILLIAM CHUNG: Yes, that's a separate requirement.

MR DUNCAN: Was that expressed in a franchise document?

MR WILLIAM CHUNG: Like Mr Cheng said a moment ago, that was a separate issue. That wasn't inside the franchise document.

MR DUNCAN: So was there documentation backwards and forwards which would evidence that?

MR WILLIAM CHUNG: Yes, we do have the information. We can make available the information afterwards.

MR DUNCAN: Thank you very much.

CHAIRMAN: Thank you, if you would do so.

Can you give us the time frame of when there was this -- in the course of which franchise renewal was this, and what was the time?

MR SAMUEL CHENG: We had exchanges of correspondence with the Transport Department. That was a couple of days before, in fact, the franchise was awarded, we had to make these pledges.

Thank you.

CHAIRMAN: Which year was that? Was this franchise 2 or franchise 1?

MR SAMUEL CHENG: 2015.

CHAIRMAN: Thank you.

MR SAMUEL CHENG: The franchise started to take effect in 2016.

CHAIRMAN: Was that franchise 2?

MR SAMUEL CHENG: Franchise 1.

CHAIRMAN: Thank you.

Yes, Mr Duncan.

MR DUNCAN: Thank you, Chairman.

I want to move on now and explore what data the black box actually provides and what use is made of that data.

In that respect, can I ask you, please, to look at your first submission. So it will be CTB-1 at page 33.

MR SAMUEL CHENG: Yes, I see it.

MR DUNCAN: At the moment I'm concerned with the system as it is at the moment. I'll ask you about the real-time capability later, but I'm just concerned with the system prior to the real-time capability.

At the bottom of that page, 8(a)(i), there is reference to this:

"Data captured by black boxes installed on buses is uploaded to our server every night for generation of reports to monitor the driving behaviour of bus captains."

Do you see that reference?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: So, no doubt, if a driver is driving at an excessive speed, let's say 80 kilometres per hour, that is something which will show up on the server; is that correct.

MR SAMUEL CHENG: No. Before we get the real-time function -- let me explain how it works. Every night, the bus will return to the depot, and then, only at that time, will the data be transmitted to our computer system of the company. So it won't be a question of letting us know in real-time. In future, there will be a real-time function, and then, once every 15 seconds, such data will be transmitted to our company system. So the two are different.

MR DUNCAN: Yes. Just keeping with the non-real-time system, the current system, once the data is uploaded on the server at night, it will show if the bus driver has exceeded the speed limit of 70 kilometres per hour; is that correct?

MR SAMUEL CHENG: Perhaps let me elaborate. When the bus is in service during daytime, if there has been an exceedance of the speed limit, the black box on board will record this incident of speeding. At night, this piece of information will be uploaded or transmitted to

our computer system, which will then collate the data. On the following day -- sorry, well, in fact, in about five days' time, a report will be generated in relation to exceedance of speed incidents.

So what happens to those five days? Our system has to match the speed exceedance incident with our Octopus card system, so as to identify the name of the relevant driver. So it takes a few days' time to do that. So we have a report on the speed exceedance and then our colleagues will follow up on that.

Thank you.

MR DUNCAN: So what about other faults that the driver may have caused or may have -- his conduct may have been at fault? For example, if he had braked excessively or if he had accelerated too fast, would that sort of information appear on the server in the same way as excessive speed appears on the server?

MR SAMUEL CHENG: Yes, we do get such information, but we do not generate such reports.

MR DUNCAN: So the only reports that are currently generated are speed reports; is that correct?

MR SAMUEL CHENG: Correct.

MR DUNCAN: And when that report is available, what happens to it? Does it just sit there, or is there somebody who is required to examine each and every report?

MR SAMUEL CHENG: When the report is available, our system will automatically generate an email to our operations division. In fact, there are three operation divisions: CTB1, CTB2, and New World operations. So, for each of them, when such an email is received, then it will be known that within the relevant division, which drivers are involved in such cases of exceeding the speed limit.

Thereafter, we will follow the guideline, the internal guideline, on disciplinary action, and appropriate disciplinary action will be taken. For a first offender and not too serious, then a reminder will be issued. In the case of a serious incident or in the case of a repeat offender, then a warning will be issued.

Thank you.

MR DUNCAN: So do I understand correctly that the current monitoring system, monitoring of the drivers' conduct, is limited to speed only?

MR SAMUEL CHENG: Well, there are two aspects. Every day, we have the routine monitoring, and that's about the speed. On the other hand, if there is a passenger complaint or when there is a traffic accident, then we will have colleagues who will look up the relevant data and then will carry out an investigation. The findings of the investigation, if say the case is established,

then the relevant bus captain will be disciplined.

MR DUNCAN: Right. As far as the black box is concerned, it monitors only speed, no other conduct of the driver?

MR SAMUEL CHENG: The black box isn't just about monitoring the speed.

MR DUNCAN: I'm sorry, let me rephrase that. I understand what you were about to say.

As far as the report is concerned, the report which comes up on the server from the black box is concerned only with speed; it does not reflect any other driving fault of the driver. Is that correct?

MR SAMUEL CHENG: Our server will issue routine reports, and that would just be about exceeding the speed limit. However, for the data, for the information that we have recorded, that goes beyond vehicle speeds. Well, in fact we cover the following information as well, like the G force generated when the vehicle is in motion. That will be recorded as well. And of course other behaviour of the bus captain, say for example whether he has opened the bus doors, that would also be recorded as well.

Thank you.

MR DUNCAN: But do I understand correctly, those sorts of matters are not the subject of any report currently?

MR SAMUEL CHENG: There won't be an automatic report, but

then if we find the need to carry out an investigation, then such information can be retrieved from the system, to facilitate our investigation.

CHAIRMAN: I think we understand your evidence, Mr Cheng. A report is generated in respect of speed only, but other data is available if you wish to investigate. Is that the position?

MR SAMUEL CHENG: Correct.

MR DUNCAN: Thank you, Mr Chairman.

Now, sticking with the matter of speed, could I ask you please to refer again to your submission, and this time page 26 of CTB-1.

MR SAMUEL CHENG: Yes, I see it.

MR DUNCAN: Thank you.

May I bring your attention to the page just under the heading "Bus ignition" -- so you will see item (ii), "Bus ignition (on/off)", and then a portion which commences:

"The black boxes are used to monitor the speed of each bus and over speed exception report[s] are generated automatically."

Do you see that?

MR SAMUEL CHENG: Yes, I see it.

MR DUNCAN: I think, if you read through that, it covers some of the matters that I have just been asking you

about.

MR SAMUEL CHENG: Yes, I see it.

MR DUNCAN: So if there is the speed of over 70 kilometres per hour, that would be caught in the black box or be recorded in the black box, and will automatically become part of the report; is that correct?

MR SAMUEL CHENG: Correct.

CHAIRMAN: Is it not 75 kilometres per hour generates a report?

MR SAMUEL CHENG: We are monitoring the speed limit of 70, but then the black box is set in such a way that there has to be 70 kilometres per hour for 10 consecutive seconds before an event would be generated.

CHAIRMAN: So there are two qualifications, one is 75 kilometres and the other is 10 consecutive seconds?

MR SAMUEL CHENG: Correct.

MR DUNCAN: That would occur whatever route and whatever road the bus is on; is that right?

MR SAMUEL CHENG: That's correct, sir.

MR DUNCAN: Dealing with the situation where the speed limit is 50 kilometres per hour, the reference you will see there is:

"Speed of over 55 [kilometres per hour] for 10 consecutive seconds on road section[s] with speed limit[s] of 50 [kilometres per hour]".

Do you see that?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: Now I wish to ask you about these road sections that exist. Do I understand, these are just random sections of road which the company has chosen from time to time?

MR SAMUEL CHENG: That's incorrect. In our company, we have selected 25 road sections with a speed limit of 50kph. For these 25 road sections, they include the continuous downhill slope road sections, and also these road sections involve sharp bends. For these road sections, there were major traffic accidents that occurred before; it wasn't random per se.

MR DUNCAN: I think if I could bring your attention, please, to page 56. This is your second submission. So CTB-1, page 56.

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: There has been a question asked and you have responded in that submission in 2(a) with "Criteria for identifying road sections for speed detection". Do you see that?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: It is said in the response:

"Among these 25 road sections, 11 road sections were identified for monitoring in June 2013, 3 additional

road sections ... in September 2014, and 11 road sections ... identified for monitoring in March 2018."

How long are these road sections?

MR SAMUEL CHENG: I defer to Mr Chung, please.

MR WILLIAM CHUNG: Generally speaking, they are more than 100 metres.

MR DUNCAN: Why have you increased these from time to time? There was 11 initially, then three additional, three added, and then 11 added. Why are you adding to them from time to time?

MR WILLIAM CHUNG: When we first introduced this method to monitor the road sections, we discussed with the unions' representatives. We discussed with them the road sections. We need them to know what sections we are dealing with so that they will observe the speed on these sections. As we increased the number, we also kept them posted of the development.

MR DUNCAN: Would it be fair to say that the total of these 25 road sections would be a very, very small proportion of the area covered on all the routes on which the buses of the company ply their trade?

MR WILLIAM CHUNG: Yes, you may put it this way, but we feel that these are rather dangerous sections; if they go beyond 50kph, it would pose some danger.

MR DUNCAN: What is actually involved in identifying these

road sections?

MR WILLIAM CHUNG: As Mr Cheng said a few moments ago, we basically look at the three criteria, continuous downward slope, sharp bends, and also there were frequent traffic accidents that occurred in the past or some serious ones. So we identified these road sections on the basis of these criteria.

MR DUNCAN: Yes, I understand that you identify them, but how do they then get into the system? What is involved technically?

MR WILLIAM CHUNG: Technically, we have the electronic map in the system. We just set these into the system and we set all these 55kph for 10 continuous seconds -- we set all these criteria and set it into the system.

MR DUNCAN: Is there any reason why all the routes couldn't be fed into the system, so that you could monitor not only speed in excess of 70 kilometres per hour but also speeds in excess of 50 kilometres per hour wherever it occurs?

MR WILLIAM CHUNG: In theory, yes, but it would involve a lot of efforts, because then we would have to separate all the different routes and everything would be separated out. In the electronic map, we have to split the 50kph and 70kph. That would take a lot of efforts.

MR SAMUEL CHENG: Mr Chairman, if I may supplement. I agree

with that. At the present moment, these 25 road sections cannot cover all the routes that we serve, all the routes that the buses are deployed to. Right now, we have 25 identified that we consider prone to danger.

In addition to that, in the days to come, we will be randomly selecting additional road sections for speed detection purposes in relation to the 50kph sections. This is something we plan to do. That would be similar to what the police do with regard to speeding detection. They have the cameras that are mounted at certain locations, and the police would also randomly put the mobile cameras to detect speeding.

This is the inspiration that we got from the police initiative. This is something that we are going to do. But until that happens, we do need to have a word with the unions.

Thank you.

MR DUNCAN: Do the unions know currently which are the 25 sections?

MR SAMUEL CHENG: Yes, they do, because this has been published in the appendix of the captains handbook.

MR DUNCAN: Would it improve your monitoring system --

CHAIRMAN: Before you move on, just so we can confirm we are talking about the same thing -- you are referring to, for example, annex 1 of CTB-2 at page 169-88? That's

the English version, where the sections are identified. Is that correct?

MR SAMUEL CHENG: That's correct, sir.

CHAIRMAN: So these are the 25 sections of road that are currently monitored in your system to produce a report of a vehicle going greater than 55 kilometres per hour, your buses going greater than 55 kilometres per hour?

MR SAMUEL CHENG: That's correct, sir.

MR DUNCAN: With the advent of the real-time system, is there any proposal to increase the number of road sections from 25?

MR SAMUEL CHENG: With the real-time system, it doesn't have any direct relationship with the number of sections. As regards the increase in the number of monitored road sections, that doesn't present any problems to us, but we have to discuss with the unions. So that's why I said that we do have the plan to randomly identify road sections in an electronic map to detect the speed limit -- speeding on the 50kph sections.

MR DUNCAN: But do I understand you correctly, that would be done in conjunction with the unions, so they would know the outcome of any proposals in that respect?

MR SAMUEL CHENG: Yes, we have to notify the unions. We are not asking them for permission, but they have to be kept posted.

MR DUNCAN: Let us turn then to the proposal for real-time capability. If I could ask you to go back, please, to page 33 of your submission. So CTB-1/33.

At the bottom of the page, in the third line of the last paragraph on the page:

"We schedule to replace the black box system with real-time capability by the third quarter of 2018. By then, we will be able to monitor the driving behaviour of bus captains in real-time and take immediate action as appropriate".

In that respect, could I ask you to turn to your second submission at page 58.

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: Thank you. Do we see at the bottom of the page this entry:

"The real-time ... system will emit an instant audio warning (ie a beeping sound) automatically through the black box control panel in the driver cab to alert the bus captain whenever an over speed event occurs."

Is that a summary of the real-time capability of the system?

MR SAMUEL CHENG: Yes. This can only be done with the real-time capability.

MR DUNCAN: So is the real-time capability concerned only with the matter of speed?

MR SAMUEL CHENG: Mr Chung, my colleague, will answer the question.

MR WILLIAM CHUNG: For the real-time capability, it isn't just about the speed. Just now, we have already said that one of the functions of the real-time capability is to enable us to estimate the arrival time of the bus. So that's one of the functions of the real-time feature.

MR DUNCAN: Right. So speed is one aspect. The arrival time is another. What about other faults of the driver? Would any of those be picked up in real time? I'm thinking of things such as sudden braking, excessive acceleration, those sorts of things. Would they be picked up in real time?

MR SAMUEL CHENG: I need to consult my colleague.

CHAIRMAN: Yes, please do so.

MR SAMUEL CHENG: Mr Lit will answer the question.

MR KENNETH LIT: Thank you, Mr Chairman.

Mr Cheng mentioned that data will be transmitted once every 15 seconds, and that's about simple information like the speed. For the transmission of data for over 25-second sort of cycling, that's not the second-by-second data. For second-by-second data, it will be sort of based on a 15-minute cycle, and it will come from the bus to the server of the company.

MR DUNCAN: One of the advantages of the real-time system is

that there is an instant audio warning to alert the bus captain that he's speeding. Would the driver receive any alert for any matter other than speeding?

MR SAMUEL CHENG: Mr Lit will take the question.

MR KENNETH LIT: Other than speeding, no, we are not having any other alerts for the bus captain.

MR DUNCAN: When it is said at page 33 that immediate action as appropriate can be taken, what is meant by "immediate action"?

MR SAMUEL CHENG: The immediate action that we refer to is actually what we have just referred to. That is the beeping sound so as to alert the bus captain.

MR DUNCAN: Now, I need to understand this, please. If the driver is exceeding 50 kilometres per hour in one of the 25 road sections, clearly the new system will result in his receiving an alert; is that correct?

MR KENNETH LIT: Yes.

MR DUNCAN: If, say, he is going 60 kilometres per hour on a road which is not caught by one of the 25 road sections, will he be alerted in that situation?

MR KENNETH LIT: No.

MR DUNCAN: Would your system of monitoring be far better if there were a lot more road sections covered than simply 25?

MR SAMUEL CHENG: Yes, it would have been better, but

currently we are not able to get a digital map which includes all the speed limits of all the roads in Hong Kong. Currently, there isn't such a digital map. So what we have to do is to manually mark such road sections onto our digital map.

MR DUNCAN: The fact that there's no digital map available, is that something which has been the subject of discussion at all between the company and the Transport Department?

MR SAMUEL CHENG: No, we didn't.

MR DUNCAN: Would that be a matter worth discussing with the Transport Department, do you think?

MR SAMUEL CHENG: We will try.

MR DUNCAN: Now, unless anybody has some further questions, I'm going to leave the matter of black boxes and move to the matter of speed limiters.

CHAIRMAN: Prof Lo.

MEMBER LO: I just have a question on the real-time alert. Would that be part of the report generated about the bus captain's performance, or is it just an alert without record, without permanent record?

MR SAMUEL CHENG: In real time, the bus captain will be alerted if the over speed continues for continuously 10 seconds, then the black box will record such an event. And as I have mentioned earlier on, later on

the information will be transmitted to our system, and then it will be listed in the over speed report.

MEMBER LO: So they are kind of independent?

MR SAMUEL CHENG: Sorry, I don't understand your question.

MEMBER LO: The real-time warning is independent of the report generated offline five days later?

MR SAMUEL CHENG: Yes, the two are separate.

CHAIRMAN: In your approach to generating an alert to the driver, would it not be easier to set the system to generate a report at 55 kilometres per hour for all roads, except those that you then identify as being 70 kilometre per hour roads, rather than doing it the other way around?

MR SAMUEL CHENG: I think technically your idea is feasible, but then the work to be done will be equal in terms of the volume. Our current system is such that we have pre-set all the road sections to have a speed limit of 70, and then for 25 road sections we have marked it as 50. If we have to reverse it, it means that the digital map of our system has to be set in such a way that it would be 55 throughout, and then we have to identify those road sections which permit 70 or above, so as to make it 70.

In other words, either way, the workload will be heavy. So just now we have said that we are thinking of

adding randomly picked road sections so as to monitor the speeding of our bus captains.

CHAIRMAN: Broadly speaking, what is the proportion of the roads that your buses travel that are subject to a 70 kilometre per hour speed limit rather than 50? What is the general proportion?

MR SAMUEL CHENG: Sorry, Mr Chairman, I'm afraid I don't have the information with me just off the cuff. However, in Hong Kong, for road sections allowing 70kph, we don't just have expressways.

Allow me to cite an example for you, sir. Say for example, along Gloucester Road westbound, part of it has a limit of 50, while other parts 70. In other words, for the speed limit of 70km/h, our buses would not be having too few in relation to such road sections, but I'm afraid I haven't got the percentage that you asked for.

CHAIRMAN: What's your off-the-cuff feeling? Are there more 70 kilometre per hour roads that you travel on or 50 kilometre per hour roads?

MR SAMUEL CHENG: Maybe Mr Chung, head of operations, is more familiar with this.

Mr Chung, please.

MR WILLIAM CHUNG: Mr Chairman, really, it would be difficult for me to give you an answer on the spot.

CHAIRMAN: Very well.

Yes, Mr Duncan.

Professor?

MEMBER LO: I'm just thinking about speed limit. Other than freeways, they should be all on 50, basically, mostly? For urban arterials, typically it's 50?

MR SAMUEL CHENG: I'm afraid that's not my understanding. Earlier on, I gave you the example of westbound Gloucester Road. It's not an expressway, but for certain parts of it, they have a speed limit of 70km/h.

MEMBER LO: One further question on the rapid deceleration and sudden braking. They don't depend on speed limits, so there should be no technical issues of implementing that.

MR SAMUEL CHENG: Sorry, in which way?

MEMBER LO: In case of sudden stopping, sudden braking, sudden acceleration, they should be independent of speed limits of the roads the buses are travelling on; they can be done without knowing speed limits?

MR SAMUEL CHENG: They are unrelated. Yes, we can monitor such scenarios. Say, for example, we have a bus and there is a need to step on the brake suddenly. It may not necessarily be a fault on the part of a bus captain. Say, for example, there may be a pedestrian stepping onto the road suddenly and then the bus captain has to

respond properly, which means stepping on the brake suddenly. If we start to collect all the information about sudden deceleration, it means that we have to follow up on such cases and we have to make enquiries with the bus captains, and that will mean quite a large amount of work and it would be rather time-consuming.

So what we are doing now is that the system does collect such information. In the event of a traffic accident or there is a complaint against us, then in the course of investigation, we will retrieve the data from the system.

Thank you.

CHAIRMAN: Mr Duncan.

MR DUNCAN: Thank you, Chairman. Just one other matter --

CHAIRMAN: I'm sorry, Mr Duncan.

MEMBER AUYEUNG: Sorry, Mr Duncan -- I just want to clarify one thing.

The 10 seconds report on speeding, is this report -- sort of anything over 10 seconds generating a report -- is this 10 seconds determined by your company or by the manufacturer?

MR SAMUEL CHENG: (Chinese spoken).

MEMBER AUYEUNG: So if there is a desire to change the 10 seconds to 15 or five, it's doable, technically?

MR SAMUEL CHENG: I defer to Mr Chung, please.

MR WILLIAM CHUNG: Yes, indeed, this can be done.

MEMBER AUYEUNG: Thank you.

MR WILLIAM CHUNG: Let me say this, 10 consecutive seconds, when we discussed this with the unions, we got input from them, and they indicated that they do not look at the speedometer all the time. When they become aware of speeding, they have to react, but when they are behind the wheel, it would be hard for them to slam on the brakes to decelerate and they have to react. It would take time for them to make the adjustment. That was the discussion with the unions. That's one of the considerations why 10 seconds for over-speeding.

MEMBER AUYEUNG: Thank you.

Thank you, Mr Duncan.

CHAIRMAN: It is the case, is it not, that the legislation that deals with black boxes on PLBs prescribes a period of three seconds' consecutive speeding? Are you aware of that?

MR SAMUEL CHENG: We are not aware of that, sir.

CHAIRMAN: Perhaps that's something Mr Duncan can deal with in due course.

Yes, Mr Duncan.

MR DUNCAN: Thank you, Chairman.

Just before leaving the black boxes, one other point, if I may, Mr Cheng.

In the press release that I referred you to, the press release of NEC, the company stated that the system that they had installed, or were installing, would "overcome the 'ghost' GPS signal caused by the unique environment of narrow streets and skyscrapers in Hong Kong".

Do you remember reading that in their press release?

MR SAMUEL CHENG: Yes, I did, sir.

MR DUNCAN: Are you able to tell the committee as to whether that has been effective? Has that system coped adequately with the unique environment, narrow streets and tall buildings in Hong Kong, so that you don't get these "ghost" GPS signals? Has the system been effective in that respect?

MR SAMUEL CHENG: First of all, this press release was released by NEC. What they say there doesn't represent the stance of the CTB and NWFB.

As regards the accuracy of the system, how accurate it is, I would say that it is not 100 per cent accurate. It all depends on the road sections that the bus goes through, and the high-rises, the number of high-rises, whether there are any buildings with curtain walls; that would have a bearing on the accuracy of the GPS system.

I can tell you that it is not 100 per cent accurate, but the level of accuracy is acceptable to us though.

MR DUNCAN: Do I take it that this not regarded as a major problem by the company with the system?

MR SAMUEL CHENG: At the present moment, the system that we are using, we do not see any major problems at all.

MR DUNCAN: I said I would move to the matter of speed limiters.

CHAIRMAN: Before you do that, Mr Duncan -- Mr Cheng, presumably you have available a map which depicts all of the routes that your buses travel on. Is that the case?

MR SAMUEL CHENG: I defer to Mr Lit, my colleague, who is more familiar with this.

MR KENNETH LIT: Yes, Mr Chairman. In our system, in our interface, we can show all the routes on the map.

CHAIRMAN: Can you provide such a map to us, so that we can see every route that you travel? I'll tell you what I have in mind. Somebody must know what the speed limits are on the roads of Hong Kong, whether it's the Transport Department or the police or somebody else, and what I propose doing is being in a position to compare both your routes with speed limits.

So can you provide us with a map of your routes, all your routes?

MR KENNETH LIT: Most certainly, sir. However, Mr Chairman, it all depends on the data that you are looking for, because if we provide in hard copies, then you may not

be able to get what you want.

CHAIRMAN: What I'm seeking, as I suspect is obvious, is to know which roads you travel down. Somebody else could tell us what the speed limit is on those roads.

MR KENNETH LIT: I understand. No problem, sir.

CHAIRMAN: Thank you very much.

MR DUNCAN: Can I take you to your submission at page 26, so CTB-1, page 26.

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: The matter of the speed limiter is referred to there, two-thirds of the way down the page. So:

"When the vehicle speed reaches 70 [kilometres per hour], the speed limiter functions by restricting fuel supply to the engine even if the bus captain presses hard on the thottle. However, vehicle speed may exceed 70 [kilometres per hour] on a downward slope."

Do you see that reference?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: If we go to the following page, there's reference on that page to an active speed limiting system, ASLS, and it is stated:

"In the event that the speed of the bus exceeds 70 [kilometres per hour] when travelling on a downward slope, the [system] will automatically apply the gearbox retarder and/or the service brake to limit the bus speed

to 70 [kilometres per hour]."

If I understand the submission correctly, it is planned to introduce that feature on new buses delivered from June of next year. Is that the position?

MR SAMUEL CHENG: I defer to Mr Li, director of engineering.

MR PAUL LI: Chairman, that's correct, sir.

MR DUNCAN: Is this a requirement of the Transport Department or is this an initiative of the company?

MR PAUL LI: With this system, we have discussions with the Transport Department and the working group, and we agree that for new buses that are delivered, we have this requirement.

Starting from next year, June, all the vehicles delivered will be equipped with this.

MR DUNCAN: When you say "the working group", is that the working group which was formed after the Tai Po accident in February of this year?

MR PAUL LI: That's correct, sir.

MR DUNCAN: So before that, had the company considered the question of this ASLS system?

MR PAUL LI: No, sir, not before that.

MR DUNCAN: So whose idea was it within the working group? Was it the company's idea? Was it the Transport Department's idea? Was it somebody else on the working group who came up with this proposal?

MR PAUL LI: That was something arising out of the discussion at the working group; Euro VI vehicles, they do have the technology to provide that.

MR DUNCAN: So it was the bus manufacturers who came up with this proposal?

MR PAUL LI: It was the working group. There was a request that was made to consult the manufacturers to ascertain whether this would be achievable, and they said that for Euro VI buses, it is doable.

CHAIRMAN: Who convened the working group?

MR PAUL LI: It was Transport Department, sir.

CHAIRMAN: Did they produce an agenda for the first meeting?

MR PAUL LI: There was, yes.

CHAIRMAN: Do you have a copy of the agenda?

MR PAUL LI: We can make this available afterwards, sir.

CHAIRMAN: So the answer is you do?

MR PAUL LI: Yes, we do.

CHAIRMAN: Were technological advances/devices identified in this agenda?

MR PAUL LI: Yes, on the agenda there are some suggestions regarding new technological devices.

CHAIRMAN: So this came from the Transport Department?

MR PAUL LI: Yes, sir.

CHAIRMAN: Thank you. Would you be kind enough to provide us with the agenda?

MR PAUL LI: Certainly.

CHAIRMAN: Thank you.

Yes, Mr Duncan.

MR DUNCAN: With regard to the possibility of retrofitting this facility, this is something which has been addressed in your second submission, at CTB-1, page 61. Do you see at 60 the heading number 8, "Speed limiters", and the entry:

"We have enquired with our bus suppliers on the technical feasibility and cost implications in retrofitting our buses with the [ASLS] system."

MR PAUL LI: Yes, sir.

MR DUNCAN: Thank you. And you see all the details that have been provided there.

First of all, with regard to the Dennis buses, I notice that the company apparently has 876 buses which are of the model E500 MMC, and it would, according to the company, be feasible to retrofit those buses with that facility.

What's the company's intention with regard to retrofitting that model?

MR PAUL LI: Your question again, sir?

MR DUNCAN: Is the company proposing to retrofit the ASLS system on its 876 Alexander Dennis E500 MMC buses?

MR PAUL LI: We need further details from the bus supplier

about the feasibility of retrofitting the device. We need the details.

Moreover, we haven't been told about the costs involved in retrofitting it on each and every bus. So we have yet to consider that.

MR DUNCAN: Is this a matter which is under consideration by the company?

MR SAMUEL CHENG: Not yet. As stated in our submission, we are told by them that it would be feasible, that is ADL thinks that it is feasible, but then it would require 12 months' time to develop the product.

Therefore, at this moment, they cannot provide the retrofitting cost at this stage. Before we know how much it will cost to retrofit such a device per us, we are not able to give an answer as to whether we will consider it or not. First of all, we need to know the cost before we can consider the matter.

Thank you.

MR DUNCAN: So, to the extent that you are waiting on the cost, it is a matter still under consideration; is that correct?

MR SAMUEL CHENG: Yes.

MR DUNCAN: What about the Volvo B9 buses, 117, an entry of "Feasible", with the asterisk we can see over the page, "Volvo requires 18 to 24 months for product

development"? Is this something that is under consideration by the company?

MR SAMUEL CHENG: Given the cost indicated, if they are able to deliver the product and if we are happy with the test result, we are going to retrofit it.

MR DUNCAN: How long would a bus like this, a B9, a Volvo bus, for example, be in service?

MR SAMUEL CHENG: Our buses would be put into service for 17 years or more. Of course, I must supplement. Here we talk about 117 B9 buses. They are around three years old. In other words, we can use them for another 14 years.

Thank you.

MR DUNCAN: Just one other matter on speed limiters, if I could, before the morning break.

Could I ask you to go to TD-1 at page 94.

I don't know whether you've seen it --

MR SAMUEL CHENG: Yes, I see it.

MR DUNCAN: I'm not sure whether you have read this document, Mr Cheng. Let me explain what it is.

MR SAMUEL CHENG: Thank you.

MR DUNCAN: It's part of the submission received by the committee from the Transport Department, which is headed, "Application of new devices or technology on franchised buses", and the purpose is described as:

"This paper gives an account of the feasibility and desirability for application of new devices or technology on franchised buses."

Have you seen this document before?

MR SAMUEL CHENG: Sorry, we haven't read it.

MR DUNCAN: Right. In that case, what I might do, if the chairman is minded to take the morning break -- I just refer you to page 101 of the bundle, and read the section (c) which is headed, "Speed control by Global Positioning System ('GPS') or geo-fencing". Would you be able to do that during the course of the break, read paragraphs 19 and 20?

MR SAMUEL CHENG: Can you also show paragraph 20 for us? So two pages. In that case, it means I can't read paragraph 19. Would you mind giving me a hard copy?

CHAIRMAN: I'm sure you can be provided with a physical copy so that you can see the context.

MR SAMUEL CHENG: Thank you, Mr Chairman.

MR DUNCAN: It deals with the situation where there is no speed limitation at the moment. In other words, a bus travelling, say, 60 kilometres per hour in a 50 kilometre zone, it deals with that situation, something which is not covered currently by the speed limiters in the buses, and that's what I'm interested in.

What I would ask you to do, perhaps, is read to yourself paragraphs 19 and 20 of that paper, which you will see on pages 101 and 102 of the bundle.

MR SAMUEL CHENG: Yes, we will do so.

MR DUNCAN: Thank you.

CHAIRMAN: We will take a 20-minute break now. Thank you.

(11.37 am)

(A short adjournment)

(11.59 am)

CHAIRMAN: Yes, Mr Duncan.

MR DUNCAN: Thank you, Chairman.

Mr Cheng, have you had a chance of reading that extract?

MR SAMUEL CHENG: Yes, I did, sir.

MR DUNCAN: This is the matter of speed control by GPS, or as is it's sometimes called, geo-fencing. Is this something which has been discussed in the working group?

MR SAMUEL CHENG: I defer to my colleague, Mr Chung, if I may, please.

MR WILLIAM CHUNG: Yes, we did.

MR DUNCAN: First of all, if this sort of system was to be implemented, there would be the requirement again for the digital mapping; is that correct?

MR WILLIAM CHUNG: Correct.

MR DUNCAN: At paragraph 20, the Transport Department has

referred to the fact that all of the bus manufacturers have given the opinion that the technology was being controlled by GPS is theoretically feasible.

The Department say:

"However, they do have concerns on the accuracy of the signals as it would be affected by the high-rise buildings of Hong Kong."

Do you see that?

MR WILLIAM CHUNG: Yes.

MR DUNCAN: Is this consideration to go no further, or is somebody going to be looking into whether those concerns about the GPS system are justified and, if so, whether they can be overcome?

MR WILLIAM CHUNG: Our view is that we know that the system is available in the market. However, in the past, when we worked on the black box, the accuracy of the GPS signals was indeed a matter of concern to us.

So currently we think that we need to get some devices from the suppliers and we need to test the devices so as to ascertain the functionality as well as their accuracy first. So it's not a matter that we are ruling it out at this moment.

MR DUNCAN: So can we take it that that's under active consideration?

MR WILLIAM CHUNG: Yes, you may say so.

MR DUNCAN: And who is considering this? Is it your company? Is it all of the bus companies, or what?

MR WILLIAM CHUNG: It was discussed within the working group and we said that we would consider it. Other companies also said they would consider it.

MR DUNCAN: Okay. Now I'm going to move from speed limiters, please, to another of the devices. This is the electronic stability control.

You will see reference to this in CTB-1 at page 26, please.

MR SAMUEL CHENG: Yes, I see that.

MR DUNCAN: At the bottom of page 26, there's reference to the company planning to include the electronic stability control system on new buses for delivery from June 2019 onwards.

And at page 27, we can see a description of the two aspects of the mechanism. First of all, dynamic stability control, and then roll-over prevention.

Is this something which has been decided as a result of the working party discussion?

MR SAMUEL CHENG: I would like to defer to Mr Li.

MR PAUL LI: Thank you, Chairman. Yes, indeed, that's true.

MR DUNCAN: So this was not something which was considered at all prior to the formation of that working group; is that correct?

MR PAUL LI: Correct.

MR DUNCAN: The proposal is to have this installed on new buses supplied after June 2019. Has the possibility of retrofitting this facility onto existing buses been considered?

MR PAUL LI: We are now asking our bus suppliers to examine our buses to see whether retrofitting such systems would be feasible. That is, whether it is technically feasible.

We would also like to know about the cost implications for the retrofitting. We are awaiting replies from the bus suppliers.

MR DUNCAN: Have those sorts of requests been made in writing of the bus suppliers?

MR PAUL LI: Yes.

MR DUNCAN: I wonder if you could provide a couple of samples of that correspondence also to the committee.

MR PAUL LI: Mr Chairman, we will go back and look for the relevant records.

MR SAMUEL CHENG: Sorry, Mr Chairman, Mr Li may not be too certain as to whether we have the correspondence. We need to go back to check whether we did have the correspondence.

CHAIRMAN: Yes, please provide an answer in writing in due course. If you have it and you are prepared to supply

us with a copy, please do so.

MR DUNCAN: Thank you.

Moving to another of the devices, TD-1/103, could I bring your attention to that page, please.

MR SAMUEL CHENG: Yes, I see it.

MR DUNCAN: This, Mr Cheng, is also part and parcel of that document I asked you to look at just before the break, the Transport Department document, "application of new devices or technology on franchised buses".

At page 103, from paragraphs 23 through to 26, there is reference to this sort of facility, collision prevention and lane-keeping devices.

I wonder if you could just read through that to familiarise yourself with what's contained in paragraphs 23 to 26, please.

MR SAMUEL CHENG: I think Mr Chung, my colleague, can answer the question, because he has already read it.

MR DUNCAN: Thank you.

Mr Chung, if I could then ask you to look at paragraph 26. It records the fact that "the ... bus operators do not consider that the installation of collision prevention and lane-keeping devices are effective for enhancing the safe operation of franchised bus services", and I believe this for the reasons that you can see earlier in paragraph 26. Is that the case?

MR WILLIAM CHUNG: Correct.

MR DUNCAN: So do I understand correctly then that as far as the company is concerned, it is not proposing to pursue that possible device any further?

MR WILLIAM CHUNG: Let me first of all explain. Such a device, in the year 2014, our company did carry out a test of such devices. This is called Mobileye. Mobileye is a driving assisting device. At that time, it was mainly applied to private cars. What was involved was that they would use the visual aid to detect what is in front and then the system will carry out an analysis and then calculations would be made as to the distance between the subject vehicle and the preceding one and the following one, and then come up with an idea about the time of collision, then warning signals would be sent to the driver.

At the time we fitted this Mobileye on three of our buses, we carried out a trial scheme for four months. We made arrangements for representatives of different trade unions, that is bus captain representatives, as well as 50-plus bus captains to drive such buses, that is three of them, in their normal service, and after that they were asked to fill out a questionnaire for us, telling us what they think about this device called Mobileye.

So the findings were such that some of the alerts were not quite suitable for use on buses. Say, for example, when the bus pulls up at a bus bay, since it is detected that there are people in front of the bus, as you know there are passengers waiting at the bus stop, so when people are detected then there will be an audio signal. Well, in fact the driver hasn't yet straightened the bus and so a signal would also be sent.

Moreover, when the bus is stopped too close to the preceding bus, this will be a signal to be sent out in the case of when the traffic is slow. As a result, it means that the warning signals are emitted many times during a journey. 46 per cent of the bus captains told us in the questionnaire that there were too many warning signals and it was causing a nuisance to their driving, and as a result they ignored the signals, and then 50 per cent of the drivers told us that the Mobileye didn't help in their safe driving.

So having considered the functions of this Mobileye and having taken into account the views of our bus captains, moreover there is a high cost involved in the installation, we as a result decided against following up on the idea.

So that's our experience. We shared our experience at the meeting.

Thank you.

MR DUNCAN: So that exercise that was conducted in 2014, was that of your own initiative or was that something requested by the Transport Department?

MR WILLIAM CHUNG: At that time, it was our own initiative. This is because the supplier approached us and told us about this safety device, saying that it could help to reduce the number of traffic accidents. Therefore we on our own carried out this trial scheme.

MR DUNCAN: Was this supplier one of the bus manufacturers or was it independent of the bus manufacturers?

MR WILLIAM CHUNG: An independent supplier, the device supplier.

CHAIRMAN: Who is that?

MR WILLIAM CHUNG: It is an Israeli company, Neshtech Pty Ltd. There is an agent in Hong Kong.

CHAIRMAN: Thank you.

MR DUNCAN: Moving down, still on the Transport Department's document at page 105 --

CHAIRMAN: Before you move on -- were the results of your testing of this device produced into some paper which gave an opportunity for the decision to be made?

MR WILLIAM CHUNG: Yes, Chairman. We have a report as a result of the test.

CHAIRMAN: Are you in a position to provide us with a copy

of that report, the salient features as to why it was not thought to be useful?

MR WILLIAM CHUNG: Most certainly, sir.

CHAIRMAN: If you could provide us with that, we would be grateful.

Yes, Mr Duncan.

MR DUNCAN: Thank you, Chairman.

Moving down page 105 to another of the safety devices, this time the driver monitoring device. Can you familiarise yourselves with paragraphs 27 and 28 of that document, please.

MR SAMUEL CHENG: My colleague Mr Li can take the questions. He has already done the reading. Thank you.

MR DUNCAN: Thank you. Can I ask you this: is the company, either Citybus or New World, one of the two operators who have advised that they would install a system of this nature in four of their buses for a trial of three months, tentatively starting from early May of this year?

MR PAUL LI: No, sir.

MR DUNCAN: So there's been no commitment from the company to become involved in this system?

MR PAUL LI: Correct. We haven't made any commitment, sir.

MR DUNCAN: Have you decided against it?

MR PAUL LI: No. We are enquiring about the three

suppliers, we are liaising with the suppliers, and trying to get hold of some information there.

MR DUNCAN: Can I bring your attention to your submission at page 62. It's CTB-1, page 62.

At paragraph 9, have you set out the suppliers with whom you have already met with regard to the potential for installing this facility?

MR PAUL LI: Yes, correct.

MR DUNCAN: What is the current situation with regard to this study?

MR PAUL LI: The latest situation is Consolidated Parts & Accessories Sales Centre Ltd, they gave us a demonstration of the product, but the videoing process is not sufficiently sophisticated. It's not good enough, and in June they are going to be coming again for the demonstration of the videoing process.

The second, Guardian, they said they would put forward a proposal to make available 10 devices on loan and will give us a quotation. We have received a quotation and it is being considered at the moment.

The third supplier, BYD Auto Industry Co Ltd, they haven't shown us any products yet. They are going to be showing us some products for testing.

Other than those three, we will explore whether there are other devices available.

MR DUNCAN: I would like to refer you, please, to the website of the Ming Pao newspaper, which carries an article relevant to this particular matter. This is not in the bundle.

CHAIRMAN: Where do we find that?

MR DUNCAN: This is not in the bundle, Mr Chairman, but it's available on the screen now, I believe, with a translation.

CHAIRMAN: Yes.

MR DUNCAN: Could you just read through this publication on the website dated 27 May. Could you read that to yourself, please.

MR WILLIAM CHUNG: We've seen it, sir.

MR DUNCAN: Have you seen this article before?

MR WILLIAM CHUNG: Yes, I was given this yesterday.

MR DUNCAN: Are you aware, because of that article, that it's proposed to introduce some sort of monitoring device for the benefit of the bus driver on the buses which will ply between Hong Kong, Macau and Zhuhai, on the new bridge? Are you aware of that?

MR WILLIAM CHUNG: Yes, I am.

MR DUNCAN: Were you aware of that before you read this article?

MR WILLIAM CHUNG: I learnt about it from the news.

MR DUNCAN: Do you have any plan with regard to exploring

what this system, apparently researched and developed in the mainland, might provide for the company?

MR WILLIAM CHUNG: We will see whether we can get in touch with the shuttle bus company for this Hong Kong-Zhuhai-Macau Bridge and see if we can get more information from them about the system.

MR DUNCAN: Are you able to give the committee any idea as to when it's likely that you will make a decision on this sort of device? When do you think you will be in a position to make a decision?

MR SAMUEL CHENG: At the moment, we haven't been able to get in touch with the relevant company regarding the Hong Kong-Zhuhai-Macau Bridge, and we are not sure about all the actual operational details. We are not sure about the cost implications. So, at this present stage, I find it difficult to say precisely when that decision will be taken, until such time as we have all the relevant information, before we can consider it and take a decision.

Thank you.

MR DUNCAN: When was it that the company first started to consider the possibility of utilising this sort of facility?

MR SAMUEL CHENG: We haven't started considering it yet, in the absence of any information.

MR DUNCAN: Right, but you made contact with various suppliers. When did you make contact with those suppliers?

MR SAMUEL CHENG: Your question is about the Hong Kong-Zhuhai-Macau Bridge company, or which part are you referring to?

MR DUNCAN: The earlier companies referred to in your submission.

MR SAMUEL CHENG: I defer to Mr Li, please.

MR PAUL LI: It was about April this year.

MR DUNCAN: So, again, was that as a result of the discussions amongst the working group?

MR PAUL LI: Yes, correct, sir.

MR DUNCAN: And had it not been considered before the formation of the working group?

MR PAUL LI: No, sir.

MR DUNCAN: Could I ask you now, moving to another safety matter, to go to TD-1.

CHAIRMAN: Before you do that and before we move on -- at page 63 of your second submission, CTB-1, page 63, it is stated in that paragraph that Guardian, I think the Australian manufacturer of the device, indicated that Singapore Land Transport Authority had stipulated that the device be deployed in their new public buses.

Have you contacted the Singapore Land Transport

Authority for any information?

MR PAUL LI: We were made available this information through Guardian. We haven't got in touch with SLTA.

CHAIRMAN: Thank you.

MR DUNCAN: Could I ask you please to go to TD-1/195.

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: You will probably recognise this, Mr Cheng, as part of --

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: -- the forward planning programme of Citybus that you have provided to the committee. It's that part of the forward planning programme which is concerned with the topic of bus safety, item number 5. Do you see that?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: Could I bring your particular attention to page 202 of the bundle.

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: Thank you. In particular, item 5.13, "Feasibility of installation of seat belts on (a) all seats and (b) all seats on the upper deck on new buses".

Do you see that entry?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: If I could read it quickly:

"It is feasible to install seat belts on all seats

or on all seats on the upper deck. However, our observation shows that very few people wear the seat belts currently available at the exposed seats. Without any legislation to mandate the wearing of passenger seat belts on a franchised bus and the enforcement authority to strictly enforce the legislation, installing seat belts on all seats will be a waste of resources because vast majority of passengers will not wear seat belts even though they are provided."

That was a statement that you made in the latest forward planning programme for Citybus.

Could you now look at, please, TD-1/95, again the same document, and the heading on this particular page, "Installation of seat belts for all passenger seats". Do you see that entry?

MR SAMUEL CHENG: Sorry, which paragraph, please?

MR DUNCAN: TD-1, page 95.

CHAIRMAN: 95, not 195.

MR DUNCAN: TD/95, sorry.

MR SAMUEL CHENG: Yes, I've got it.

MR DUNCAN: I wonder if you or one of your colleagues could read through what's contained in paragraphs 5 to 9 of this matter.

CHAIRMAN: This is paper 8 of the Transport Department's submissions to the committee, Mr Duncan.

MR SAMUEL CHENG: My colleague is reading it.

MR DUNCAN: Can I ask you this question: has this been a matter which has been discussed amongst the working group?

MR SAMUEL CHENG: Yes, it was.

MR DUNCAN: If I could bring your attention to paragraph 7 in particular. Is it the case that the company has indicated that it now agrees to incorporate the requirement for all new buses to be equipped with seat belts for all passengers?

MR PAUL LI: Yes, our company has agreed that, starting from June 2019 onwards, those buses delivered should get the seat belts, that's the three-point safety seat belts.

MR DUNCAN: As far as retrofitting seat belts into existing buses, have you read the content of paragraph 8 of the document?

CHAIRMAN: Before you embark on retrofitting, might I ask this question. In your earlier answers, you said that it was a waste of resources to fit seat belts because the vast majority of passengers simply wouldn't wear them, so that it required enforcement. Given that you have now indicated that you have agreed to incorporate them, what view do you have about whether or not this is a waste of resources if there isn't enforcement?

MR SAMUEL CHENG: If it is not mandated by law, then it is

impossible to enforce the law. Currently, there is no requirement that when you are on a bus you have to put on your seat belt. Even if it is mandated by law, in the absence of law enforcement, I'm afraid it is also a waste of resources. We maintain the same view.

CHAIRMAN: Have you raised this view with the Transport Department?

MR SAMUEL CHENG: We did. Our colleagues did raise it with the TD.

CHAIRMAN: And what, if any, response did you get?

MR SAMUEL CHENG: I can defer to Mr Chung. He was there at that time.

CHAIRMAN: Thank you.

MR WILLIAM CHUNG: Mr Chairman, at that time, the TD said that it should be fitted there and then it is up to the passenger to choose whether to put on the seat belt. If the passenger worries for his safety, he will have a seat belt available for use, but if it is not there, then even if he is worried, he can't have one to use.

CHAIRMAN: Thank you.

MR DUNCAN: Have you actually raised with the Transport Department whether they would endeavour to have the appropriate legislation passed?

MR WILLIAM CHUNG: We did mention to the Transport Department, that is, if there isn't any statutory

backup, then the seat belt may very well be a waste. But then the TD didn't promise that there would certainly be the passage of the relevant legislation.

MR DUNCAN: Can I ask you to refer, please, to TD-2 at page 58.

You will see there an extract from the Public Bus Services Ordinance, and in particular section 36 of the Ordinance. Do you see that?

MR SAMUEL CHENG: Yes.

MR DUNCAN: Are you familiar with that provision, Mr Cheng?

MR SAMUEL CHENG: No, I am not.

MR DUNCAN: Is this the first time you have come across it?

MR SAMUEL CHENG: Yes, the first time.

MR DUNCAN: You see that it --

CHAIRMAN: Take your time to read it so that you understand what you are being asked.

MR SAMUEL CHENG: Yes, I have taken a look of that.

MR DUNCAN: Do you understand that it provides that subject to the Ordinance and the franchise, the grantee may make by-laws for a number of matters which are therein set out?

MR SAMUEL CHENG: Yes, I read it.

MR DUNCAN: Has the company ever considered passing by-laws pursuant to this provision?

MR SAMUEL CHENG: In relation to the making of by-laws and

the related laws involved, I'm not familiar with that, and therefore I'm afraid I cannot give you an answer, that is, whether we could consider and whether we would make the by-laws, because we haven't considered this particular area.

Thank you.

MR DUNCAN: Is the behaviour of passengers on your buses sometimes a matter of concern to the company?

MR SAMUEL CHENG: Which aspect do you mean?

MR DUNCAN: In their abuse of drivers, verbal abuse of drivers. Does that happen from time to time?

MR SAMUEL CHENG: Yes, it did happen.

MR DUNCAN: Do you think that the company would be better equipped to cope with that situation if it had its own by-laws which itself could enforce?

MR SAMUEL CHENG: I'm not familiar with things like by-laws as well as what you mentioned. That is, with the by-laws, we can then enforce the law. I don't know how it will work. In particular, law enforcement. Our bus captains would not know how to enforce the law. Moreover, if it is left to the bus captain to enforce the law, then all the more there will be a greater conflict between the bus captain and the bus passengers. There is only one bus captain on board. The rest are all bus passengers. He is on his own.

MR DUNCAN: Do you have any bus inspectors?

MR SAMUEL CHENG: Yes, we do have bus inspectors, but we won't have a bus inspector on each and every bus. Bus inspectors are there to monitor the work performance of our bus captains. Moreover, at the bus terminus, bus inspectors also carry out their work.

MR DUNCAN: Are you aware of the fact that the Mass Transit Railway has its own by-laws?

MR SAMUEL CHENG: I've heard about that but I don't know about the details.

MR DUNCAN: If seat belts were installed on all buses, and if passengers refuse to wear a seat belt, do you think that by-laws passed by the company might be able to assist with regard to enforcement?

MR SAMUEL CHENG: I believe our bus captains do not have the ability to enforce it, because if the bus passenger insists on not wearing the seat belt, first of all, the passengers are seated on the upper deck; it is impossible for the bus captain to see whether each and every passenger has worn a seat belt. Even if he can, it means he has to stop the bus and then the bus captain has to turn off the engine.

Now, for a public bus, if the engine is on, it is impossible for the bus captain to leave his cabin, so he has to switch off the engine, he has to walk upstairs,

identify the passenger not wearing the seat belt, and then ask him to do it. If the passenger refuses to do it, it means then, right on the spot, there will be a confrontation between the passenger and the captain. Our service will be affected, and the bus captain may even have a fight with the bus passenger.

So I don't think our bus captain can actually enforce the law.

Thank you.

MR DUNCAN: The bus inspectors whom you say are there just to monitor the driving of the bus, how many bus inspectors are employed in that capacity?

MR SAMUEL CHENG: First of all, let me correct a fact. Inspectors don't just go to monitor the driving of bus captains. Monitoring of bus driving is one of the duties of the bus inspectors. Bus inspectors are at the frontline to manage the bus operation.

As to how many bus inspectors we have and what they do, I would like to defer to Mr Chung, my colleague.

MR WILLIAM CHUNG: Thank you, Mr Chairman.

We have more than 100 inspectors, and they have different areas of work. Some will be in the control centre. Others are on the road, making their rounds. They may be at the bus terminus, assisting the passengers or maintaining order.

We have a thousand or more buses on the roads. It is impossible for the inspectors to be on hand, if anything happens, to give assistance to the drivers. The MTRC has the by-laws but there is a difference here. For the MTR stations, they have a certain number of staff who can offer assistance. If anything happens on board the train, their drivers will be driving into the station, into the platform, to seek assistance. But for our bus captains, if anything happens, like we said, he cannot drive the bus to look for the inspector. If a dispute has already occurred, then this simply cannot happen.

So there is a bit of difference between the two.

Thank you.

MR DUNCAN: If we go back to the Transport Department document -- I had you at page 96 of the bundle, paragraph 7, which is concerned with seat belts on new buses.

In paragraph 8, the question of retrofitting seat belts on seats of existing buses is raised, and at the end of that paragraph there's an indication that the franchised bus operators will further study this proposal.

Is this something which is under study by the company?

MR SAMUEL CHENG: I defer to Mr Li, please.

MR PAUL LI: Our company is consulting the suppliers regarding the feasibility of retrofitting the existing buses with seat belts. The preliminary reply is that for ADL buses, post-2013, buses in 2013 and post-2013, the upper deck seats can be retrofitted. But we do need to have structural reinforcement and all the seats have to be replaced, because the existing seats cannot be used for the retrofitting purposes.

The preliminary cost, estimated cost, is for each bus, it would be 15,000 to 20,000 pounds per vehicle. We estimate that we have 1,100 buses in a fleet that belong to this category or this model. If retrofitting has to happen, the price tag is going to be $180 million to $240 million. That's a vast sum of money, and some money will be wasted.

CHAIRMAN: It will be wasted because passengers won't use the seat belts?

MR PAUL LI: Correct, sir, because we noticed, for our existing buses, for the exposed seats, we do have the three-point seat belts available, but we noticed the passengers can't be bothered putting on the seat belts.

MR DUNCAN: Has the company in the past received any form of subsidy from the government authorities?

MR PAUL LI: In the past, the government or the EPD in fact

subsidised the installation of some emission-reduction devices. And there were some hybrid vehicles, three, that were funded for trial purposes.

Also, there are 10 single-decker buses, electric buses, that were tested.

Thank you, sir.

MR DUNCAN: We have seen that a number of these initiatives for safety devices or improvement to safety devices have been raised as a result of the working group which has been set up.

In the course of those deliberations, has it occurred to the company to raise with the government the possibility of subsidies being made available in order to meet some of the cost of what might be regarded as improved safety provisions?

MR SAMUEL CHENG: We never talk to the government, but if the government is prepared to offer subsidy with a view to enhancing safety, we will work on that.

MR DUNCAN: Why would you never talk to the government about this?

MR SAMUEL CHENG: We didn't know that we could ask for subsidy from the government.

MR DUNCAN: I want to ask you just a few questions, please, about the disciplinary process, to which reference has been made already. If I could ask you in that respect,

please, to turn up page 39 of the CTB-1 bundle. So CTB-1 at page 39.

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: We can see reference to this at the bottom of the page, (b), under the heading "Background checks and penalties for traffic convictions":

"(b) Our service quality department is responsible for administering disciplinary sanctions for any misconduct by bus captains, as per the guidelines set out in the bus captain manual."

Then there is further detail provided to the committee with regard to the disciplinary process.

Now, the reference to "the bus captain manual", could we just turn this up, please. CTB-2 at page 85.

CHAIRMAN: Which year of the manual is that, Mr Duncan?

MR DUNCAN: 2018, Mr Chairman.

CHAIRMAN: Thank you.

MR DUNCAN: Thank you.

We have extracts from the bus captain's handbook at page 85, and a translation of the extracts from page 169-1.

If I could ask you to look, please, at the list of contents, which I believe you will see in original version at page 87, and in the translation at 169-3.

Are you at the list of contents?

MR SAMUEL CHENG: I see them.

MR DUNCAN: Thank you.

Would you agree that this is a very long and a very detailed document?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: And the English version -- both versions, we have seven different sections, with a number of different paragraphs in each section.

What steps are taken by the company to ensure that a bus captain is familiar with all the provisions in the handbook?

MR SAMUEL CHENG: I defer to Mr Chung, please.

MR WILLIAM CHUNG: In this bus captain's manual, when they first join the induction training, they are briefed on most of the details of this handbook, and in the refresher training we also brief them on the details again. So this handbook is there to facilitate them, after attending all these training courses, to go into detail about them. If they don't remember anything, they can go back to this manual.

Thank you.

MR DUNCAN: In answer to the chairman, I indicated that this particular handbook bears the date of April of this year. When was the previous version of this issued?

MR WILLIAM CHUNG: The previous version was July 2017.

MR DUNCAN: Is this handbook reviewed from time to time?

MR WILLIAM CHUNG: Yes, sir.

MR DUNCAN: How often is that?

MR WILLIAM CHUNG: There is no fixed time frame, no fixed cycle. It depends on whether there are changes that have to be added or made.

MR DUNCAN: Could you give the committee some idea as to how many bus captains have been subjected to a disciplinary process, say in the last 12 months?

MR SAMUEL CHENG: Well, at first we thought we will be asked questions about driving safety, so we haven't prepared the information about the number of disciplinary actions. We can certainly provide the information afterwards.

CHAIRMAN: Yes, please do so.

MR DUNCAN: Thank you.

Mr Chairman, that would be a convenient moment, if it suits the committee.

CHAIRMAN: Yes, it does.

We will now adjourn and resume the hearing at 2.30 this afternoon. Thank you.

(1.01 pm)

(The luncheon adjournment)

(2.30 pm)

CHAIRMAN: Good afternoon.

Yes, Mr Duncan.

MR DUNCAN: Thank you, Chairman.

Mr Cheng, I would like to ask you a few questions, please, arising out of the 2018 Guidelines on Bus Captain Working Hours, Rest Times, and Meal Breaks.

You will find the actual guidelines at CTB-2 at page 2, and the previous guidelines you will find, if you want to refer to those, at TD-5 at page 1556.

But just for the ease of this afternoon's questions, I'm having distributed what is a comparison table of the various guidelines, which seeks to compare the guidelines as they evolved between 2004 and 2018.

So could I perhaps ask you just to have a look at that chart, first of all. You should be looking at a document which is headed "Comparison table of the guidelines", with a date of 4 May 2018. Do you have that in front of you?

MR SAMUEL CHENG: Yes.

MR DUNCAN: Thank you.

What I would like to do first is just identify some of the more important changes which have been made between the guidelines passed in this year with those passed back in 2010. Do you follow that?

MR SAMUEL CHENG: Yes.

MR DUNCAN: Thank you.

What I would like to do first of all, on the chart, is bring to your attention the third entry down on the page, the maximum driving hours. Do you see that entry?

MR SAMUEL CHENG: Yes.

MR DUNCAN: We can see the change, that as far as maximum driving hours are concerned, the new guideline is that it should be 10 hours in a shift, as opposed to what was, in the 2010 guidelines, as 11 hours in a working day.

Do you see that difference, first of all?

MR SAMUEL CHENG: Yes, I can see that the wordings are different.

MR DUNCAN: Does that accord with your understanding of the changes?

MR SAMUEL CHENG: I would like to defer to Mr Chung.

MR WILLIAM CHUNG: Yes, it is.

MR DUNCAN: Thank you.

Now, the second matter I would like to bring to your attention is the maximum duty hours, which is the entry just above that. Do we see the change there to the effect that, from the 2018 guidelines, the maximum duty hours are 12 hours in a shift, as compared with 14 hours in a working day? Does that accord with your understanding, Mr Chung?

MR WILLIAM CHUNG: Yes.

MR DUNCAN: If we turn the page, we will see, however, that in the context of maximum duty hours and driving hours, there is a new arrangement arising out of what is described as a "special shift duty". Do you see that on the second page?

MR WILLIAM CHUNG: Yes.

MR DUNCAN: So there is a provision whereby the duty hour of the driver may in fact exceed the 12 hours provided for, as we can see on page 1, and it can be as much as 14 hours; do you see that?

MR WILLIAM CHUNG: Yes.

MR DUNCAN: Again does that accord with your understanding of the new guidelines?

MR WILLIAM CHUNG: Yes.

MR DUNCAN: And the driving hour within that special shift duty, is that subject to a maximum of 10 hours?

MR WILLIAM CHUNG: Yes.

MR DUNCAN: And is there a further condition with regard to the special shift duty, that there should be a rest break of no less than three consecutive hours?

MR WILLIAM CHUNG: Yes.

MR DUNCAN: Is that again your understanding?

MR WILLIAM CHUNG: Yes.

MR DUNCAN: Having taken you through those, could I ask you this, first of all: do I understand correctly that

notwithstanding the provision that there can be a special shift duty of maximum duty hours of 14 hours, it is the company's intention not to operate a shift duty in excess of 13 hours? Is that the company's intention?

MR WILLIAM CHUNG: Correct.

MR DUNCAN: Earlier on, we noted that according to the information that you've given to the committee, in the light of these new guidelines, some 121 additional drivers would be needed. Do you recall seeing that figure?

MR WILLIAM CHUNG: Yes.

MR DUNCAN: Has the intention to invoke the maximum of 13 hours been taken into account in reaching that figure?

MR WILLIAM CHUNG: Correct.

MR DUNCAN: If in fact you availed yourself of the ability to have maximum duty hours of 14 hours, as opposed to 13 hours, would that reduce the number of additional drivers that you would need?

MR WILLIAM CHUNG: Yes, it would.

MR DUNCAN: So what has prompted the company to decide to restrict its maximum duty hours just to 13?

MR WILLIAM CHUNG: Because we are aware of the public's concern about safety.

MR DUNCAN: And how will this help safety?

MR WILLIAM CHUNG: Regarding the daily hours of the bus captains, that won't be too long, because it will be capped at 13.

MR DUNCAN: But the driving hours would be the same in either case, wouldn't it? The maximum driving hours would be 10 hours, irrespective of whether the shift was 13 hours or 14 hours?

MR WILLIAM CHUNG: Correct.

MR DUNCAN: So it's just the extra hour in a long day, is it, that the company takes into account?

MR WILLIAM CHUNG: Yes. In other words, if he can knock off earlier, then he will have more rest time between two consecutive shifts.

MR DUNCAN: Right.

Now, you told us earlier that typically a driver, a bus captain, apart from the part-time drivers, of course, would be working for something like 10 hours, eight hours at normal time and two hours of overtime. Do you recall telling the committee about that?

MR WILLIAM CHUNG: Yes, I recall.

MR DUNCAN: A person who is required to work the special shift duty -- in other words, be on duty for 13 hours but who drives just for 10 -- on what basis is he paid? Does he get eight hours of normal time and five hours of

overtime, or does he get eight hours of normal time and two hours of overtime, as per the usual arrangement, with no payment for the rest break?

MR WILLIAM CHUNG: He will get eight hours' basic salary, and then, for the five hours, that would be overtime pay.

MR DUNCAN: Have you started to introduce the operation of the new guidelines?

MR WILLIAM CHUNG: Not yet.

MR DUNCAN: When are they going to start?

MR WILLIAM CHUNG: We plan to do so in the third quarter of this year.

MR DUNCAN: Why the delay?

MR WILLIAM CHUNG: First, we need to recruit sufficient bus captains before we can launch it. Second, we have to increase facilities for bus captains to take their rest for those three hours. They need to have a place to take a break.

MR DUNCAN: Are you able to give the committee any idea as to how often a driver will be required to be on duty for the 13-hour period which you indicated would be introduced?

MR WILLIAM CHUNG: For New World First Bus and Citybus, they have different arrangements. For the New World First Bus, for the bus captains, they have a fixed shift. If

a bus captain has applied to be on special shift duties, then he will always be on a special shift duty, unless and except when he's on leave.

For Citybus, for their bus captains, they have a roster system. So every week he will be having a different shift. So it depends. It depends on the deployment of the roster.

So it would be difficult to say how often he would be on such a shift.

MR DUNCAN: With regard to New World First Bus, do I understand you to be saying that some drivers would be permanently on a 13-hour shift, special shift?

MR WILLIAM CHUNG: Yes.

MR DUNCAN: How many days a week would they be working?

MR WILLIAM CHUNG: Work for five days or six days per week, with one day off.

MR DUNCAN: When you say five or six, is that the driver's choice or ...?

MR WILLIAM CHUNG: They have to apply for the shift that they prefer. There are some shifts that would go on from Monday to Saturday and they would have to work for six days, with Sunday being off. There are other shifts that we go on from Mondays to Sundays and then they work for five days and then they will have a day off.

MR DUNCAN: So do I understand that many of the drivers in

that company, New World First Bus, would be on duty 13 hours a day for five or six days in a week?

MR WILLIAM CHUNG: There are some bus captains who are like that, but not all of them. We estimate that there are 10 or more per cent of the shifts that are special shifts.

MR DUNCAN: So approximately what proportion of drivers would be working those hours, a 13-hour special shift each day, for five to six days; approximately what percentage of the New World First Bus contingent?

MR WILLIAM CHUNG: With indulgence, sir.

10-odd per cent, about 144 shifts.

MR DUNCAN: Going to Citybus, could you explain again, please, the difference between New World First Bus and Citybus in this respect?

MR WILLIAM CHUNG: For Citybus, the bus captains do not have a fixed shift per day. Each week, they will -- every five days, they have a shift and then they have a day off, and when they come back from the day off they will rotate to the next shift, for five days, and then they have a day off and then they come back for another shift. It works like this.

MR DUNCAN: So do I understand correctly that within a week, one day they might be on duty for a maximum of 10 hours and another day they might be on duty for 13 hours? It

changes day-to-day?

MR WILLIAM CHUNG: Every five days. They rotate every five days.

MR DUNCAN: I see.

CHAIRMAN: So what are the variables? You have a 10-hour day. You've got a 13-hour day. Is there any other different category?

MR WILLIAM CHUNG: Yes, there are -- 10 hours is the average number. There are some shifts that would involve eight hours, some nine hours, 10 hours, 11 hours.

MEMBER LO: The whole five-day shift has the same pattern, so you don't change from eight, 10, 13? So the five days, exactly the same shift?

MR WILLIAM CHUNG: That's correct.

MR DUNCAN: Are you able to give the committee some idea as to what practical effect this will have, the new guidelines will have, on the duty of the average, if I can call it that, the average bus captain's working hours? Is this going to be a shift change within the companies, or is it going to be other than significant, with regard to their working hours?

MR WILLIAM CHUNG: Well, if they are on special shift, then the rest time would be concentrated on the three hours. Before we changed the guidelines, the maximum working hours would be 14 hours, with driving hours 11 hours.

For a 14-hour shift, they have three hours' rest time, but this rest time would be broken up during that stretch. For a special shift, the rest break will be concentrated in a particular three-hour or more than three-hour stretch.

MR DUNCAN: The old 14-hour shift, was that popular with your drivers?

MR WILLIAM CHUNG: Some. It is popular with some captains.

MR DUNCAN: Were any bus captains required to work a maximum of 14 hours or be on duty for 14 hours against their wishes?

MR WILLIAM CHUNG: We assign them the shifts and they have to observe the shifts. However, if they can find a colleague to swap the shift with and it is in keeping with the guidelines, then this would be granted.

MR DUNCAN: And if a person was not happy with the 14-hour provision, would he find it easy to undertake that exchange?

MR WILLIAM CHUNG: I'm not sure whether they find it easy to exchange, but the swap arrangement is quite common.

MR DUNCAN: What do you anticipate with regard to the special shift duty? Do you think it will be popular with your employees or other than popular?

MR WILLIAM CHUNG: I heard from some union representatives that it is popular, but other representatives that it is

unpopular.

MR DUNCAN: So you've got mixed reports, have you?

MR WILLIAM CHUNG: Whether it is half-and-half, I'm not sure. I heard some bus captains that they would like to have longer shifts because they want more money.

MR DUNCAN: What makes it unpopular with some?

MR WILLIAM CHUNG: There are some bus captains who don't need so much money. There are some, for instance, who've been with us for a long time and they are not the breadwinner in the family, and eight hours/nine hours would be enough for them, and therefore they don't prefer any shifts which are long.

MR DUNCAN: Do you anticipate requiring people to be on duty for up to 13 hours against their will? Do you expect that to happen?

MR WILLIAM CHUNG: I don't think so.

MR DUNCAN: Right. In the absence of any further questions, I'm going to leave the guidelines now.

I want to go back to the forward planning programme, please. This is what we will find at TD-1, at 195. We've seen this document this morning, Mr Cheng, in the context --

MR SAMUEL CHENG: I did, yes, sir.

MR DUNCAN: -- of seat belts. There are just a few other matters I wish to explore with you, if I could.

First of all, if you would look at page 199 of the bundle, and "Analysis of accident by nature in 2016". Do you see that entry?

MR SAMUEL CHENG: Yes, I do, sir.

MR DUNCAN: We can see table 4 there. The nature of the accidents have been classified under a number of heads, with the table reaching over to page 200. Do you see that?

MR SAMUEL CHENG: Yes, I do.

MR DUNCAN: The nature of the accident which is the greatest by quite a long way is the last on page 199, and that is the non-collision accident involving a passenger injury. Do you see that?

MR SAMUEL CHENG: Yes, I do.

MR DUNCAN: And that point is picked up on page 200:

"As about 60 per cent of the accidents were non-collision accidents involving passenger injury, further analysis was made on this type of accidents as shown in table 5 below. The analysis revealed that accidents caused by passengers losing balance in the bus has always been the major cause of accidents."

As far as you know, does that remain the case today, that that proportion appears to be the highest with regard to the nature of accidents?

MR SAMUEL CHENG: Not much different, yes.

MR DUNCAN: So, if I'm reading from the paragraph above table 5:

"The analysis revealed that accidents caused by passengers losing balance in the bus has ... been the major cause ..."

What has the company been able to do with regard to this particular matter?

MR SAMUEL CHENG: I defer to Mr Chung, please.

MR WILLIAM CHUNG: Yes. Passengers falling over on buses, this has always been the major cause. In the past, we had publicity together with the Transport Department. The government had some APIs which were broadcast on TV to remind the passengers that when they are on board they have to hold onto the handrail, and if they are loaded down with a lot of stuff, they should not move upstairs. Our company has also put up some signs on board, to remind passengers that as soon as they get on board, they should find a seat to sit down on or they should hold onto the handrails.

Other than the signs or notices, we have also made use of the bus stop announcement system, to show messages and to broadcast messages, to remind passengers to hold onto the handrails. So this was what we had done in the past.

Other than enhancing publicity for the public, for

our passengers, when we train our drivers, we also remind the bus captains that when they drive, they need to note the activities of the bus passengers on board. In particular, before they leave the bus stop, they have to check whether passengers have already reached their seats or whether they have held onto the handrails, and they have to pay particular attention to the elderly passengers. And before they stop, they need to be gradual and smooth in the manoeuvring, so as to avoid braking the vehicle and causing injuries to passengers, when they fall.

MR DUNCAN: Does the mode of driving by the driver contribute to these passengers falling over? Is that your experience?

MR WILLIAM CHUNG: The driving attitude of bus captains may contribute to the passengers falling. Yes, this is one of the causes.

As to whether a bus passenger has held onto the handrail after boarding, it's also part of the duty or the responsibility of the passenger himself. And for the roads of Hong Kong, from time to time, there may be emergencies and they are beyond the control of the bus captains. Therefore, sometimes there is indeed a need to brake suddenly and this may cause a passenger to fall.

MR DUNCAN: Are there rules and regulations as to how many people can travel on a bus, over and above those persons actually seated in a spot on the bus? Are there rules and regulations as to how many people are permitted to stand in a bus?

MR WILLIAM CHUNG: For each and every bus, the number of seats as well as the number of standees are subject to a limit, and such limits are already sort of written on the side of the body of the bus, near to the door. Depending on the model and the length of the bus, the carrying capacity would vary, in terms of the number of seats as well as the number of standees.

MR DUNCAN: And who is responsible for determining whether there is more than the required number of standees on the bus? Whose responsibility is that?

MR WILLIAM CHUNG: For each new bus delivered to Hong Kong, the TD will carry out the process of type approval. As part of this process, consideration will be given to the size of the passageway on the lower deck of the bus, before coming up with a figure for the number of passengers who can stand. We would also take into account the load of the bus, and that would come into the calculations as well.

CHAIRMAN: I think the question is more specific: whose job is it to decide that the number of standees is in excess

of the stipulated limit?

MR WILLIAM CHUNG: The bus captain has the duty to make sure that the carrying capacity hasn't been exceeded.

MR DUNCAN: How would you expect the bus captain to discharge that duty?

MR SAMUEL CHENG: Let me answer this question. For every bus, the number of standees will be stated and stipulated. When a bus captain is driving a bus, it is impossible for him to be distracted, to count the number of passengers boarding his bus. When a bus passenger boards a bus, I think probably he will first of all try to sit down. When all the seats have been taken up, then passengers have to stand. But at any one time, the bus captain will not know how many passengers he is carrying on his bus. He can only observe. And such an observation would be based on how near the standing passengers are to the front of the bus. If there are many people standing, that means it's quite full. However, if you have ever made the observation on the street or if you have taken a ride on a bus during peak hours, you would notice that towards the further end of the passageway of the lower deck, passengers don't like to stand there. They would rather stand near to the door, that is, the exit door in the middle of the bus. And then, when there are more and more people standing,

they would rather stand near the front of the bus. They are reluctant to go further inside.

Now, the bus captain can only make an observation. He will only notice that many people are standing near to the front of the bus. He would not know whether there is in fact a lot of space available further down the passageway but nobody is willing to take up that space. That is common during the peak hours.

Thank you.

MR DUNCAN: I understand those difficulties, Mr Cheng. Does it mean that in fact it's really virtually impossible for the driver to enforce the standing limits that are written on the side of the bus?

MR SAMUEL CHENG: First of all, the bus captain would not know when he has to enforce it, because it is not possible for him to count how many people are on the bus. I think we all need to understand one point. There are always people boarding and alighting. As to the net number of passengers on board, I don't think you can expect a bus captain to do the calculations using a calculator. He can't have an accurate idea. The most he can do is to rely on visual observation. All right? If he sees that there are many people standing quite near to the front of the bus, there is no way and nothing that he can do. This is because passengers are

all anxious to go to work and they have already paid for the bus fare. For passengers standing inside the bus, they have all paid by using the Octopus card or inserted coins into the fare box.

Now, if the bus captain is to start a headcount one by one, and say, for example, he finds that there are two passengers above the limit, it will be difficult for him to identify which two passengers should be persuaded to alight. So that's a practical difficulty.

Thank you.

MR DUNCAN: Is overcrowding on buses an issue for the company? Overcrowding meaning more people standing on buses than the limits imposed on the bus. Is that a problem?

MR SAMUEL CHENG: Let me repeat once again. In fact, we don't have any data to prove that we have got having more standing passengers than the standee limit. We don't have such a figure. We don't have such data.

So I can't say with certainty as to whether we have got this question of overcrowding.

MR DUNCAN: So that is something unknown to the company; is that correct? You don't know whether you have an overcrowding problem or not?

MR SAMUEL CHENG: Let me say this once again. Near to the front of the bus, or for the first half, first part of

the bus, there may be cases of overcrowding, but then for the further end of the bus, on many occasions nobody is standing. So in certain parts of the bus, there may be overcrowding, but then it's an impression only. As to whether there is an excess of the carrying capacity, it is something objective. We don't have such information, that is whether and how many buses have got passengers exceeding the carrying capacity. We don't have this sort of figures.

MR DUNCAN: I would like to refer you, please, to another of the submissions that the committee has received, by taking you to MISC-1, at page 124-1.

MR SAMUEL CHENG: Yes. We have already read that.

MR DUNCAN: You've read this letter from the Hong Kong Police Force dated 7 May 2018?

MR SAMUEL CHENG: Yes, we have read it.

MR DUNCAN: Have you read paragraph 5 on the second page?

MR WILLIAM CHUNG: Yes, we did.

MR DUNCAN: In that particular paragraph, the writer has referred to five main causation factors. Do you see that?

MR WILLIAM CHUNG: Yes.

MR DUNCAN: Can I ask you this: does the company receive from time to time reports of this nature from the police?

This is of course addressed to the committee, but I'm just trying to ascertain what information, if any, the company might receive from the police from time to time.

MR WILLIAM CHUNG: No, we haven't received from the police information like this.

However, when we prepared the five-year forward planning programme, the Transport Department gives us guidelines for preparing the forward planning programme, and information like this has been given to us, and on a yearly basis.

MR DUNCAN: So you get this sort of information but through the Transport Department; is that a correct understanding?

MR WILLIAM CHUNG: Correct.

MR DUNCAN: Can I just ask you this with regard to paragraph 5, with regard to the main causation factors: does that indication come as any surprise to you? Is it consistent with your own understanding?

MR WILLIAM CHUNG: Yes, it accords with our understanding; not surprised.

MR DUNCAN: Right. Now, I'm going to ask you to look, please, at another document that the committee has received from the Transport Department, this time very recently. I'm not sure whether you will have seen this.

We can locate it at TD-5/1649. This, I believe, is a communication to the committee received just a couple of days ago, headed, "Road safety management system", and the purpose of which is described, it is to outline "the road safety management system currently adopted by the government".

Have you or your colleagues been able to read this document?

MR WILLIAM CHUNG: No, sir.

MR DUNCAN: Right.

If I could then take you slowly to just a couple of aspects of the document, please.

Could I bring your attention first of all to the first page, page 1649, and paragraph 4 of that page, commencing with, "Apart from the follow-up actions by the TD". Could you just read that to yourself.

MR WILLIAM CHUNG: I've done so.

MR DUNCAN: It refers to a sample of the quarterly traffic accident situation report, submitted by the Transport Department to the Road Safety Council, a sample of which is at attachment I.

In that respect, could I ask you to go to page 1658 of the document, please, of the bundle, 1658. Do you see at 1658 the heading, "Traffic accident situation report for Road Safety Council meeting on 7 March 2018"?

Do you see that?

MR WILLIAM CHUNG: Yes.

MR DUNCAN: Thank you. Then if you look at the next page, 1659, you see appendix I with a heading, "Summary of traffic accidents status in 2017".

MR WILLIAM CHUNG: Yes, sir.

MR DUNCAN: If you go down that page, you get to "Appendix 3 franchised bus involvements", still at 1659. "Appendix 3 franchised bus involvements"; do you see that paragraph?

MR WILLIAM CHUNG: Not yet, sir.

MR DUNCAN: Do you see it now?

MR WILLIAM CHUNG: Yes.

MR DUNCAN: "Appendix 3 ...

For franchised bus involvements in Q4 2017, Kowloon Motor Bus, Long Win Bus, New Lantao Bus and Citybus (franchise 2) recorded increases while New World First Bus and Citybus (franchise 1) recorded decreases over Q4 2016."

If I could then take you to appendix 3 which has been referenced there, which you will find at 1664 of the bundle. Do you see the heading "Appendix 3" and "Franchised bus involvements"?

MR WILLIAM CHUNG: Yes, sir.

MR DUNCAN: And then a box for each of the franchisees?

MR WILLIAM CHUNG: Yes, sir.

MR DUNCAN: One of the ways in which the Transport Department measures road safety is the involvement rate, as they refer to it, per million of vehicle-kilometres. Are you aware of that?

MR WILLIAM CHUNG: Yes, I do.

MR DUNCAN: If you look at the first entry, Kowloon Motor Bus, and if we look at the last two entries, the fourth quarter of 2016 and the fourth quarter of 2017, you will see the involvement rates at 2.979 and 4.005 respectively. Do you see those entries?

MR WILLIAM CHUNG: Yes, I do.

MR DUNCAN: If you look then through the rest of it, do you see that the figures for New World First Bus and Citybus franchise 1 seem to be amongst the highest with regard to the involvement rate per million vehicle-kilometres. Can you detect that from reading through the document?

MR WILLIAM CHUNG: Yes, sir.

MR DUNCAN: Does that come as any surprise to you?

MR WILLIAM CHUNG: No, sir. Well, because for each franchise, the network is different, and the traffic situations that they serve also varies. Citybus, for instance, Citybus franchise 1 and Citybus franchise 2, the accident rates differ vastly. These are the two franchises managed by the same company. Why the vast

difference? That's because the networks that they serve are different.

Citybus 2, most of the buses are running on highways and the mileage is pretty high for them. Also, they don't serve much in busy road sections. So we feel that we cannot simply make the comparison like this in relation to the accident rate per million kilometres. We cannot simply make a comparison like that.

CHAIRMAN: This is a point you have made in one of your submissions, is it not, apples with apples?

MR WILLIAM CHUNG: Correct, sir.

CHAIRMAN: Can you give us the reference where this point is made? Or perhaps you can come back to it in due course.

MR WILLIAM CHUNG: Sorry, Mr Chairman, we haven't got this in the submission, we didn't say this in the submission, but in the five-year forward plan, in 5.1, in the introduction, we have made this point.

MR DUNCAN: It will be at page TD-1/195.

CHAIRMAN: Yes:

"The significant difference in accident statistics of Citybus [franchise 1 and franchise 2] is a good demonstration of the effect of network composition and operating areas of Citybus [franchise 1] and Citybus [franchise 2] are both operated by Citybus.

What are the highways on which Citybus franchise 2

operate mostly?

MR WILLIAM CHUNG: Mainly North Lantau Highway and also West Kowloon Corridor.

CHAIRMAN: Thank you.

MR DUNCAN: There is one other point I wish to explore with you or raise with you, Mr Cheng, before I leave this Transport Department document recently received.

Could you look at page 1650. So it's TD-5/1650.

This morning, the chairman raised the matter of black boxes on public light buses, and I would just like you, please, to read through paragraph 7 on that page, page 1650.

MR SAMUEL CHENG: I've done it, sir.

MR DUNCAN: Thank you.

The chairman also referred to the fact that, according to his understanding, there were provisions applicable to public light buses which had an over speed threshold of three seconds as opposed to the 10 seconds we were discussing this morning. Do you remember his raising that with you?

MR SAMUEL CHENG: Yes, I do, sir.

MR DUNCAN: I'm just going to tender for the record schedule 19 to the Road Traffic (Construction and Maintenance of Vehicles) Regulations. I think that's on the system now.

If one was to look at paragraph 3 of the schedule, you will see there a requirement with regard to the capability of an EDRD, or black box, with regard to its installation in a public light bus. And in paragraph 3(d) there's reference to "records of vehicle activity when the actual speed of the vehicle exceeds an over speed threshold stored in the EDRD for a continuous period of more than three seconds".

I simply bring that to your attention because of the chairman's comment this morning.

MR SAMUEL CHENG: Yes, I've read it.

MR DUNCAN: Thank you.

Let us go now back to the forward planning programme and the bus safety report. So it's TD-1 at page 200.

At 5.11 -- and of course this was written before the working group was set up --11 there is a heading, "Measures and programmes planned to enhance safety". We can see on that page, 200, going right through to page 201, a number of measures that have been identified.

Just one matter I would like to raise with you in (iv) on page 201, please. The fourth-last line:

"Harsh braking reports generated whenever deceleration is beyond threshold are used to identify drivers with harsh braking habit. Remedial training or

disciplinary action will be taken to rectify the misbehaviours."

How are these harsh braking reports generated?

MR SAMUEL CHENG: I would like to defer to Mr Chung.

MR WILLIAM CHUNG: Yes. If we receive a complaint from a passenger saying that the bus driver has had harsh braking, then we will get hold of the data, to find out whether he does have such a habit of harsh braking. If it is established, then we would take follow-up action.

MR DUNCAN: Thank you. So no complaint, no report; is that the situation?

MR WILLIAM CHUNG: Correct.

MR DUNCAN: Then page 202, 5.12, in the middle of that paragraph we have this entry:

"Proper and fair disciplinary procedure and reward mechanism are in place to deter bad driving behaviour and to encourage good driving attitude."

Do you see that reference?

MR SAMUEL CHENG: Not yet. Now I see it.

MR DUNCAN: Thank you.

Now, post-reclassification of the safety bonus, the attendance bonus, the performance bonus, what reward mechanism is now in place to deter bad driving behaviour and to encourage good driving attitude?

MR SAMUEL CHENG: I think I have answered this question

before. If they have a poor driving attitude, if they are not having a high standard of driving safety, then there will be different degrees of disciplinary action.

CHAIRMAN: I think the real question perhaps is this, Mr Cheng. At one stage you had a stick and a carrot, and now you have given up the carrot. Is that the situation?

MR SAMUEL CHENG: Yes. Correct.

MR DUNCAN: We can leave the forward planning report now, please, and go back to your submission, which is -- the entry I wish to take up is at CTB-1, pages 27 to 28.

MR SAMUEL CHENG: Yes, I see it.

MR DUNCAN: At page 27, we have a heading provided by the company, "Maintenance and inspection", and that runs through to most of page 28.

The pre-service check, item (d), which is a requirement on the bus captain, is the bus captain required to keep a written record of this check?

MR WILLIAM CHUNG: No.

MR DUNCAN: To what extent have maintenance matters contributed to bus accidents involving company buses over the last few years?

MR SAMUEL CHENG: I would like to defer to Mr Li.

MR PAUL LI: I haven't got the figures with me. I believe it is quite unlikely and there are just very, very few

cases.

MR DUNCAN: The very, very few cases have revealed what? What sort of problems?

MR PAUL LI: As far as I can recall, some parts have been broken, causing damages to the bus, but it was minor.

MR DUNCAN: Are there written reports made of these sorts of incidents?

MR PAUL LI: Yes, there are.

MR DUNCAN: I wonder if you could provide the committee with samples of reports which have led to any sort of incidents, say in the past two years. Would that be possible?

MR PAUL LI: Yes, we will go back to check.

CHAIRMAN: Thank you.

Mr Duncan, is this not a matter that has been addressed in the LegCo papers dealing with the renewal of the franchise, where the overall record of the company, for example Citybus, was examined, and the success of their maintenance programme described?

MR DUNCAN: I think that is right, Mr Chairman. We'll try and find the reference to that. We'll try and locate that.

Just moving away from that topic, could I ask you this, Mr Cheng. In the context of safety, are there any matters where you would consider that the government

could assist your company materially, in a way in which it doesn't assist the company at the moment? We understand that primarily safety is a matter for the bus companies, but is there anything which occurs to you whereby you could be assisted by the government in your endeavours?

MR SAMUEL CHENG: Mr Chairman, as far as we are concerned, anything to enhance safety would involve expenditure. It will cost money. In future, should there be requirements incurring a vast amount of money on our part, to install certain devices so as to enhance the safety standards of our service, I do hope that the government will provide some financial support to us.

Thank you.

MR DUNCAN: Can you point to anything specific which you would regard as beyond your financial capabilities at the moment, but which, if it could be could funded, would add materially to the matter of safety? Is there any specific matter?

MR SAMUEL CHENG: I cannot give any examples which will substantially enhance the safety. Rather, there are certain things which the public would think that, when done, the safety would be enhanced.

I can give examples. Say, for example, this morning, you explored the idea of retrofitting safety

seat belts for the upper deck. This morning, Mr Li talked about the cost. It will be 15,000 to 20,000 pounds per bus, and we have got 1,100 buses falling into this category. If they all have to be retrofitted with safety belts on the upper deck, the total cost, as we have given, will be HK$180 million to HK$240 million.

The two companies are registering a very low level of profits. We don't know how many years we have to operate before we can earn that amount of money so as to retrofit the safety belts. So this is one of the examples that our financial capability cannot afford.

So, for such kinds of expenditure, I believe we have to be very cautious, and find out whether it can really very effectively achieve the purpose.

This morning, we have said that currently there are certain exposed seats on board and they have been fitted with seat belts, but then in fact I ride on the buses many times. I seldom see passengers occupying such seats put on the seat belts. In future, if you ask our company to spend $100 million to $200 million, or more than $200 million to work on this, while we query very much the effectiveness, of course, if the administration would like to impose such a requirement, that is to retrofit the seat belts, then I very much hope that the

government will provide a subsidy so that we can install the seat belts.

So this is one of the examples. Thank you.

CHAIRMAN: So your point really is this: if the government thinks that it's worthwhile doing because it gives passengers who might want to put a seat belt on the opportunity to do so, but it's your experience that if they don't do so, then it's up to government to fund this, rather than impose it on your own? Is that the point?

MR SAMUEL CHENG: If the government sees the need for seat belts, in order for the passengers to put on the seat belts if they want to, if that's the case then I hope the government would fund the exercise because if we fund it, it would be a waste of resources.

Sorry, if I may, Mr Chairman, most importantly, if you think of the situation in Hong Kong, we do have standing capacity. If you feel that it is not safe enough to sit down and you need the seat belt, what about those who are standing up? They don't have a seat belt. For the standees, I think it's a bit of a contradiction.

Thank you.

CHAIRMAN: I think your other point was -- I will leave that point.

Yes, Mr Duncan.

MR DUNCAN: Thank you, Chairman.

Can I refer you to page 40 of your submission. So that will be CTB-1 at page 40 of the bundle.

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: You should be looking at a page which has the heading in the middle, "Other relevant information". Do you have that?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: You have said:

"To assist the committee in understanding the franchised bus industry, we also wish to take this opportunity to explain our operating environment and challenges we have encountered in providing franchised bus services".

And you have set out there a number of issues. Can I just bring your attention to item (b), "Route rationalisation". You have said at the end of that paragraph that what has happened has led to a waste of money and resources at your end.

CHAIRMAN: Might I invite you to read out the short paragraph?

MR DUNCAN: Certainly. I quote:

"To tackle the competition posed by the railway, we proposed route rationalisation plans to the [Transport

Department] to scale down or cancel low demand services. Due to the objection of district councils, a number of our route rationalisation plans could not be computed to match the decrease in passengers demand. This has led to a waste of money and resources on our end."

Could you just appraise the committee of the system that operates, first of all with regard to the routes you are required to support, and then the system, if you wish to change a route?

MR SAMUEL CHENG: I defer to Mr Chung, if I may.

MR WILLIAM CHUNG: Thank you, Mr Chairman.

If a railway line is coming on stream, we will make proposals to the Transport Department. If there are routes that are overlapping with the rail alignment, then we would propose a cancellation of these routes or, alternatively, scale back the frequency of these routes or have diversion.

With the proposals being put in, then we have to submit the route rationalisation plans to the district councils for discussion. Normally, the councillors would have a lot of comments and they would raise a lot of objections. These bus routes have been around for some considerable time, and many of the residents have been using these routes. With the railway coming on stream, some passengers will be lost to the railway and

we are running short of patronage, although there will still be passengers using them. Still, the councillors would object to the cancellation or the scale-back of the services.

If the objection is particularly strong, the Transport Department may not necessarily approve the plan.

Thank you, Chairman.

CHAIRMAN: Is the MTR link to Ocean Park or Wong Chuk Hang an example of how a railway system arriving affects passenger usage on buses, just as an example?

MR WILLIAM CHUNG: Yes, sir. Yes, indeed.

MR SAMUEL CHENG: Mr Chairman, if I may, the impact was significant because prior to the railway coming on stream, we had a route, that's the 629, bus 629, running between Admiralty and Ocean Park. At that time, if anybody wants to go to Ocean Park by public transport, they will be using this particular route.

Ever since the MTR line has come on stream, we had to cancel the route altogether because we have lost all the passengers to MTR.

Thank you.

MR DUNCAN: So the Transport Department has the final say; is that the position?

MR WILLIAM CHUNG: Indeed, sir.

MR DUNCAN: You don't have any right of appeal to any further authority with respect to that sort of matter?

MR WILLIAM CHUNG: No. We never tried.

CHAIRMAN: Is there an avenue of appeal?

MR SAMUEL CHENG: We don't realise there is such a channel.

MR DUNCAN: Do you have any -- have you ever considered --

MR SAMUEL CHENG: I would like to correct this. It's we don't aware of such a channel, not realised, we don't aware of.

CHAIRMAN: Is there not an appeal to the Secretary of Transport and Housing, or am I thinking of another provision?

MR SAMUEL CHENG: I defer to Mr Chung. He is more familiar with this.

MR WILLIAM CHUNG: According to Cap 230, PBSO, if there is dispute over the rationalisation plan, then the THB would be the authority for settlement, but we never tried this.

CHAIRMAN: But specifically the Secretary for Transport and Housing?

Don't worry. We can check that. But that's the provision I have in mind.

MR DUNCAN: Moving from the route rationalisation to another matter you have raised, the fare adjustment arrangement, item (f) on page 41.

Perhaps I could read quickly through this before I ask you a couple of matters:

"The approval of franchised bus fare adjustment applications is governed by the fare adjustment arrangement ('FAA'). Under the FAA, there is a basket of factors that the government would consider. Public acceptability and affordability is one of the factors. In our view, this factor is highly discretional and subjective and has been conveniently abused by politicians.

We had our last fare adjustment in 2008. Since then, we have not applied for any fare adjustment until August 2017 when [Citybus, the first franchise, and New World First Bus] submitted applications for fare adjustments to mitigate the substantial revenue loss due to railways competition in recent years and cost increases over the last 10 years. As mentioned in (c) above, the cumulative inflation rate in Hong Kong over this ... period was 31.2 per cent and we have awarded a cumulative increase in wages of 39.9 per cent. Although we were fully justified to seek fare adjustments under the FAA on various occasions, no application had been made mainly due to the ineffectiveness of the FAA and the highly politicised environment against fare/price increases of public

utilities.

In addition to the difficulty in obtaining a fair deal in FAA applications, the fare adjustment approval process has been excessively long. By way of example, our current fare adjustment applications submitted in August 2017 are still being scrutinised by the government.

Unlike the MTR, which has automatic fare adjustment made annually in accordance with a prescribed formula, franchised bus companies do not have the same certainty in fare adjustments. Without such certainty, it is difficult for franchised bus companies to formulate comprehensive future plans."

You have identified in those paragraphs a number of matters which can perhaps be summed up by your phrase "the ineffectiveness of the FAA". Have you --

CHAIRMAN: Before you embark on any questioning, Mr Duncan, do we have that document available, the fare adjustment arrangement?

MR DUNCAN: I think we do.

Mr Chairman, if we are able to turn up SEC/373.

CHAIRMAN: SEC-1 at page 373?

MR DUNCAN: Yes.

This is an example of one of the fare increase applications --

CHAIRMAN: Thank you.

MR DUNCAN: -- and its treatment.

Back to you, Mr Cheng, if I could. Given your description of the FAA being ineffective, the process, have you made any overtures to anybody with regard to changing what you see as an ineffective system?

MR SAMUEL CHENG: Yes, we did. Last time, when the FAA was reviewed -- allow me to paraphrase it. Every time when the government reviews the FAA, we point out that the FAA has certain inadequacies and it is not transparent enough, in the eyes of the bus operators.

Thank you.

MR DUNCAN: How long has that situation existed?

MR SAMUEL CHENG: Ever since the FAA came into existence, so far we have only applied for one fare increase, and that was in 2008. On that occasion, for Citybus (F1), it was only for the jointly operated cross-harbour routes were allowed to put up the fares. For the Hong Kong Island routes, we were not allowed to increase the fare levels.

As to the rationale, and then as to the financial forecast data submitted by us to the government, whether the government has taken on board all our financial projection data or which part of our data was not acceptable, nothing was said to us.

At the end of the day, all we knew was that for

CTB (F1), all the Hong Kong Island routes were not allowed to increase their fare levels. In fact, the last time we increased the fares for the Hong Kong Island routes, it was 1998. That's because in 2008 our application was rejected. And we didn't know the reason.

So, for this FAA, I believe that the transparency has to be enhanced.

Thank you.

CHAIRMAN: Are you saying that you simply get the result without any reasoned decision?

MR SAMUEL CHENG: Correct.

MR DUNCAN: Just for the record, Mr Chairman, there is another reference to the fare adjustment arrangement at THB-2 at 23, a fuller description.

CHAIRMAN: Thank you.

MR DUNCAN: So, Mr Cheng, when did this arrangement come into existence?

MR SAMUEL CHENG: It was 2005 or 2006, round about that time. I think 2006.

MR DUNCAN: As far as you are aware, have there been any changes made to the adjustment mechanisms since that time?

MR SAMUEL CHENG: Yes, there were some changes, but I'm afraid I cannot state the specific changes. But at

least I can remember that originally it was not called FAA. It was not called -- it was at first called fare adjustment mechanism. Later on, the name was changed, together with other changes, and it is now called FAA.

As to the specific changes, I'm afraid offhand I don't have the information for you.

MR DUNCAN: I'm sorry, did you say in 2008 you made an application which was unsuccessful?

CHAIRMAN: Well, it was successful for the harbour route but nothing else.

MR SAMUEL CHENG: In year 2008, for CTB (F1) and New World First Bus, there was an application for fare increase from both. The result was, for New World First Bus, the fare increases were approved. But then for CTB, for our Hong Kong Island routes, we were not allowed to increase the fares. For the harbour routes, when they were jointly operated with KMB, since KMB was given approval to increase the fares, and as a result we were also allowed to increase the fares. But of course most of our operations are on Hong Kong Island, and for those we were not allowed to increase the fares.

MR DUNCAN: Were you given any reasons at all as to why that application was rejected?

MR SAMUEL CHENG: No, no specific reasons were given.

MR DUNCAN: Well, any reasons? Did you receive anything in

writing, beyond the fact that it had been unsuccessful?

MR SAMUEL CHENG: No.

MR DUNCAN: Since we are moving to the MISC bundle, can I raise another matter with you.

CHAIRMAN: Are you moving on to another matter?

MR DUNCAN: Yes.

CHAIRMAN: Before you do so -- at page 42 of your first submissions, paragraph (g), "Reasonable return", the last three lines say this:

"We are given to understand that the government is in the course of reviewing the FAA, and we earnestly hope that the above-mentioned issues can be addressed in the review."

Perhaps, Mr Duncan, I can invite you to read out the whole of that paragraph as being relevant to the conclusion.

MR DUNCAN: "Due to the difficulties regarding fare adjustment as described above, the chance of being awarded a fare adjustment and the increase rate are full of uncertainties. We forecast that the return on [average net fixed assets of CTB franchise 1 and New World First Bus] will be below 1 per cent for the financial year ending 30 June 2018. This is taken into account that the status quo can be maintained in regard to our overall expenditure. Should there be any

significant increase in staff and fuel costs, both of these franchises may well become loss making. Therefore, let alone earning a reasonable return, when the companies' commercial viability is at stake, it will be impossible for our companies to continue to provide the high quality and efficient services expected by the public, and to offer attractive pay packages to recruit and retain staff. We are given to understand that the government is in the course of reviewing the FAA, and we earnestly hope that the above-mentioned issues can be addressed in the review."

Do you maintain those sentiments today, Mr Cheng?

MR SAMUEL CHENG: Yes, I maintain this view.

MR DUNCAN: Your information that the government is in the course of reviewing the FAA, on what basis have you formed that understanding?

MR SAMUEL CHENG: We have had meetings with the government.

CHAIRMAN: Specifically with whom in the government?

MR SAMUEL CHENG: Transport and Housing Bureau.

CHAIRMAN: When were those meetings which led to this understanding?

MR SAMUEL CHENG: Let me say this. I say "we are given to understand", and so on and so forth. I think I have made it rather indirect. Allow me to rephrase this sentence. I should say, "We understand" or "We know

that".

CHAIRMAN: As a result of meetings?

MR SAMUEL CHENG: Correct.

CHAIRMAN: When were the meetings?

MR SAMUEL CHENG: I have to go back to check the meeting date.

CHAIRMAN: Were they this year or last year?

MR SAMUEL CHENG: Last year.

CHAIRMAN: Nothing this year?

MR SAMUEL CHENG: I don't recall having any more meetings this year, but I really have to go back to check my diary.

CHAIRMAN: Please do so, if you would be kind enough, and inform us what the position is, as to whether there were meetings this year, on this subject.

MR SAMUEL CHENG: Yes. Certainly, I will do that.

MEMBER LO: Can I ask a question? The question, is it about the FAA or it's about the formula? According to the formula, have you calculated how much fare increase you could ask for or request?

MR SAMUEL CHENG: The FAA itself.

MEMBER LO: But there's a formula you can apply?

MR SAMUEL CHENG: We don't have an automatic mechanism. According to the FAA, we may submit an application, and after that there will be a process, a series of

examination and approval. Ours is different from that of the MTR.

MEMBER LO: So is it about the procedure or is it about what is the change that you request for reviewing the FAA?

MR SAMUEL CHENG: Well, to us, if we have more certainties about the fare adjustment, and if the transparency is enhanced, then at least it will be better. I hope at least in those two areas there will be improvements.

MR DUNCAN: Mr Chairman, just for the record, I referred to the fact that the fare adjustment arrangement had been the subject of one of the THB documents, THB-2/23.

CHAIRMAN: Yes.

MR DUNCAN: The matter of the review of the FAA is a matter which the bureau has also addressed at the ensuing pages, THB-2, pages 24 and 25, for the record.

CHAIRMAN: Perhaps we ought to turn to that, since it's the subject matter of this evidence.

MR DUNCAN: Certainly.

Just before we do that, Mr Cheng, do I understand correctly from your evidence that you had discussions about a change in the FAA, but you have not yet been informed by the government as to the outcome of those discussions? Is that the position?

MR SAMUEL CHENG: Yes. The review is with the government. It's in the government's court.

MR DUNCAN: And you don't know what the outcome of that review is at the present time?

MR SAMUEL CHENG: At the moment, we don't know. We don't.

MR DUNCAN: So can we have on the screen, please, THB-2, pages 24 and 25. We want bundle page 24. Yes.

I will read through, if you can follow me. Perhaps if we go back to the previous page, just to get the full flavour, page 23 of the bundle. Do you see item (d) on that page, "Fare adjustment arrangement", and then a subheading, "Current arrangement"?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: Then if I could pick it up at the following page, bundle page 24, paragraph 4.28:

"The aforesaid existing arrangement was put in place in 2006 after consultation with the LegCo. The arrangement was subsequently fine-tuned having regard to the outcome of the review in 2009. As the existing arrangement can basically strike a balance between the sound operation of bus service as well as public affordability and acceptability, there is no need for an overhaul of the FAA.

In this regard, the government has conducted a review of the FAA. The initial findings indicate that the arrangement should be kept intact, while the data could be updated on two fronts:

(a) Productivity gain value ...

(b) Passenger reward arrangement".

Unless the chairman wishes me to go to that, I will leave out the detail of that, but then move to item 4.30:

"The government has initiated discussion with the franchised bus companies on the initial review outcome and the details of the above two data updates. We will announce the discussion outcome and expect to implement them in the first half of 2018 upon approval by the Chief Executive-in-Council."

Now, according to that statement, Mr Cheng, the government has initiated discussions with the bus companies, obviously including yours, on the initial review outcome and what they propose, namely that the arrangement should be kept intact but with the data being updated on two fronts. Have you in fact been informed of the government's view with regard to those matters?

MR SAMUEL CHENG: Yes, I am aware that the government is conducting a review.

MR DUNCAN: But has the government indicated to you their findings --

CHAIRMAN: I think they are called "initial findings".

MR DUNCAN: Yes, the initial findings that indicate that the

arrangement should be kept intact but with the data being updated on two fronts, as it's suggested in paragraph 4.29. Has the government informed you of that?

MR SAMUEL CHENG: Yes, at the meeting, yes. But as to the updating of the data on two fronts, what new figures would there be, we are not sure. We don't know. For these two figures, they are terribly important.

MR DUNCAN: And you are still awaiting details with regard to those figures; is that the position?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: Thank you. I'm going to leave the fare adjustment arrangement now and go to MISC-2.

Could I bring to your attention again a document we saw yesterday at page 643 of the bundle, with the translation at 644-1.

If we could pull up the Chinese document, please, at page 643. Thank you.

Do you recall my referring this submission to you yesterday from the Democratic Alliance?

MR SAMUEL CHENG: Yes, I do.

MR DUNCAN: That was in the context of the salary of franchised bus captains. Today, I want to bring to your attention a matter which they have brought to the attention of the committee. That appears in the third

paragraph of the first page, beginning with the words:

"The industry actions of bus captains that took place in February 2017 and 2018 aroused the concern of different sectors of the community over problems such as illegal parking at bus stops, bus captains' treatment and working hours."

It goes on to say, "Below are reasons for illegal parking at bus stops", and there are four items which are mentioned. Do you see those?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: Then if you go to the second page of the original document, page 644 of the bundle, and the translation, the last paragraph on page 644-1:

"To eradicate illegal parking at bus stops, it must be dealt with from its roots and by formulating suitable policies, revising the outdated laws. The problem can only be resolved by multipronged measures."

Then there's a paragraph:

"Suggestion 1: Following Singapore and installing cameras on all bus fleets."

Before we go further into this, does the company regard illegal parking at bus stops as a problem?

MR SAMUEL CHENG: I defer to Mr Chung, if I may.

MR WILLIAM CHUNG: Yes, sir.

MR DUNCAN: Could you perhaps just describe the extent of

the problem?

MR WILLIAM CHUNG: In many bus stops, there is illegal parking, and these vehicles are getting in the way of the buses, in a way that they cannot pull up close to the kerb for loading and unloading. There may be markings for the bus stop. Our buses require a certain distance to pull into the bay. If there is illegal parking on the front end or back end of the bay, it would be getting in the way of the bus operation, and sometimes the buses would have to pick up and set down passengers in the middle of the road. This is quite a commonplace and serious problem.

MR DUNCAN: Does it cause safety concerns?

MR WILLIAM CHUNG: Indeed, yes.

MR DUNCAN: In what way?

MR WILLIAM CHUNG: For instance, illegal parking would reduce the width of the road when the buses drive past. Because of the large size of the bus, it's likely to get into problem, and if the passengers cannot get on and off on the kerbside, there is a likelihood of them being hit by vehicles or they may fall over.

MR DUNCAN: If we go back to the letter -- sorry, before we go back to the letter, has the company endeavoured to overcome this problem?

MR WILLIAM CHUNG: We notified the Transport Department

about the black spots of illegal parking. We hope that these sections, they will have 24-hour restricted zone. We also notified the police to do enforcement work.

MR DUNCAN: Has that eradicated the problem?

MR WILLIAM CHUNG: It doesn't help much.

MR DUNCAN: If we go back to --

CHAIRMAN: Did it result in any action?

MR WILLIAM CHUNG: The police would take action, but as soon as the police back is turned, then the illegal parking problem would recur. Say, for instance, in Causeway Bay, Yee Wo Street, near SOGO, outside SOGO, in fact, this is a problem that occurs very often. Earlier, a taxi driver got into a confrontation with a bus captain.

MR DUNCAN: If we go back to the letter, there is then reference to a system which appears to exist in Singapore. I'm quoting from the letter to the committee:

"Following Singapore and installing cameras on all bus fleets. Singapore has since 2008 installed cameras on buses and the cameras are installed next to the driver's seats. When drivers discover cars parking inside the bus stop, they can press the button and record a video of 5-10 minutes. The bus companies will then hand the recording to the police, thereafter the

police can review the recording and in around two weeks' time the ticket will be sent to the car owner's home. Each penalty ticket costs nearly HK$800, there is an additional charge of HK$5,000 and imprisonment of 3 months for late payment of penalty.

For the first year, Singapore has recorded 2,112 incidents of drivers driving into the bus lanes or bus stops to pick up and drop off customers. For 2014, the number of cases of driving into the bus lanes and illegal parking has already reduced to 886, it has successfully deterred most drivers not to stop at the bus stops."

Is that a method which has any appeal to you?

MR SAMUEL CHENG: Regarding this proposal, I have doubts about the credibility of such an arrangement. If I understand it correctly, what it means is that on board the bus, near to the bus driver's seat, there is a camera, so that when the bus approaches the bus stop, if it is found that there is somebody who has parked his vehicle there, then the bus driver would press a button and then there would be an automatic recording of a clip running for five to ten minutes. That's how I understand it.

But then, first of all, in Hong Kong, when the bus driver reaches a bus stop, it is impossible for us to

stop there for five to ten minutes, not for our buses in Hong Kong. For the approach in Singapore, I think they have something similar to that in Hong Kong. I don't quite think that you will see a bus pulling up in a bus stop, it is found that there is illegal parking and then the bus doesn't pull up into the bus bay and then the camera is on for five to ten minutes. Well, I don't think this is going to be feasible, at least not in Hong Kong.

CHAIRMAN: Five to ten seconds?

MR SAMUEL CHENG: Here, in the Chinese version, it's five to ten minutes.

CHAIRMAN: I'm asking you what you think about five to ten seconds.

MR SAMUEL CHENG: It depends whether a bus can move further up and stop by the bus stop. If we don't and yet we just stop our bus there and then make a recording of that offending vehicle for five to ten seconds, I'm afraid this will cause delay to our passengers. It will also obstruct the traffic on the road.

Thank you.

CHAIRMAN: We saw from the demonstration at the Chai Wan depot that you have forward-looking cameras in buses, did we not?

MR SAMUEL CHENG: Yes, we do.

CHAIRMAN: We saw a lady for whom the bus driver waited and opened the door again so she could board.

MR SAMUEL CHENG: Yes.

CHAIRMAN: That kind of camera could capture what is being described, could it not?

MR SAMUEL CHENG: Yes, it can capture images for one to three seconds. However, if it is just for one to three seconds, I'm not sure whether it is adequate to establish a case and penalise the driver for having stopped the vehicle at a bus bay. I'm not familiar with the criteria on the part of the police to prosecute. Will somebody be booked and issued a summons for just stopping there for two seconds? I'm not sure.

CHAIRMAN: That's a matter for the prosecuting authorities, but at least you would be providing them with evidence. It's for them to judge whether it is sufficient.

MR SAMUEL CHENG: In that case, it means that our bus captain has to be doing both at the same time. While driving, he has to note down at what time and at which bus stop somebody has parked illegally there, and then, when he finishes work, he hands over such a logbook to the company, and then the company tries to identify this car and tries to download the video clip. In other words, we have to go through a series of steps before that can be done.

I think, for this matter, it should be the police that should be doing something about it, because if that stretch of the road should be an urban clearway and nobody should park there, then the police should enforce the law. Our bus captains are already very busy while driving. If you ask them to remember doing such, it means adding to the burden of their work.

Thank you.

CHAIRMAN: Are you aware that the police suggested to I think the Transport Department and LegCo that cameras should be used, fixed, perhaps lamppost, cameras, to record what you are describing, and that that should be the source of the evidence?

MR SAMUEL CHENG: If we have cameras on lampposts, I think it's a very good idea. I really hope that you won't be involving the bus captains in this kind of work.

CHAIRMAN: Presumably, that would be a relatively simple thing to do, because you would provide the police with details of the bus stops that are black spots and they would simply install a camera.

MR SAMUEL CHENG: I think that's feasible.

CHAIRMAN: Are you aware of vehicle number recognition systems, so that a computer that takes a photograph, or rather a camera that takes a photograph of a number plate, can match it with the registered owner?

MR SAMUEL CHENG: This is very technical. I would like to defer to Mr Chung.

MR WILLIAM CHUNG: Yes, we are aware of such a system, but I don't think it is affordable by us.

CHAIRMAN: No, I'm suggesting that this is something that might be considered by the Transport Department and the police: A camera takes a photograph of the stationary vehicle impeding the photograph; the computer matches the vehicle registration owner; and the third step is to issue a ticket by email.

MR WILLIAM CHUNG: We welcome such an idea.

CHAIRMAN: Mr Duncan.

MR DUNCAN: It's getting on a bit, but there is just one other substantive matter that I want to raise with you, Mr Cheng, if I could.

This arises from a document which we can find at page 822 of SEC-2. Again, I'm not sure whether you have seen this document. You will see from the screen that it starts as an information note relating to franchised bus services in Seoul and Singapore, and it is apparently a production of the research office at the Legislative Council Secretariat here in Hong Kong.

Have you seen this document at all?

MR SAMUEL CHENG: No, we haven't.

MR DUNCAN: I'm going to take you directly to page 826 of

the bundle, and bring your attention to paragraph 2.11, and the heading, "Implementation of the bus signal priority system". Do you see that heading?

MR SAMUEL CHENG: Yes.

MR DUNCAN: If I can read the entry:

"The bus signal priority ('BSP') system, which has been deployed in many cities around the world, is a traffic signal enhancement strategy. The strategy facilities efficient movement of buses through signalised intersections which allows an approaching bus to have priority on using the limited intersection capacity over other vehicles entering the intersection. The Seoul Metropolitan Government has implemented the BSP system to permit the optimisation of traffic signals to speed up buses."

Are you aware of such systems in different cities around the world?

MR SAMUEL CHENG: Yes, we are aware of such a system in the world. We are aware that in Singapore they do have a similar system.

MR DUNCAN: Do you think this sort of system might have some relevance as far as Hong Kong is concerned?

MR SAMUEL CHENG: We would welcome it very much.

MR DUNCAN: Have any steps been taken to have this considered?

MR SAMUEL CHENG: All the time, we believe that it is what the government should do.

MR DUNCAN: Have you raised it with the government?

MR SAMUEL CHENG: We haven't raised it with the government.

MR DUNCAN: I think in some cities around the world, buses are accorded general priority, are they not? If a bus is pulling out of a bus stop, cars are required to make way for the bus. Is that the situation in some countries, some cities?

MR SAMUEL CHENG: Let me defer to Mr Chung.

MR WILLIAM CHUNG: Yes, indeed. We are aware, say for example, that in Singapore, when a bus leaves the bus bay, other vehicles have to give way.

MR DUNCAN: Is that something which the company would regard as a good thing?

MR WILLIAM CHUNG: Yes, we regard it as something which is good. However, in Hong Kong, the road conditions may not permit this. Say, for example, we have bus-only lanes. In the past, as a result of complaints, some of them have been cancelled.

CHAIRMAN: Complaints by whom?

MR WILLIAM CHUNG: Citizens, complaining that the bus lanes were not put to optimal use, and as a result they have to be scrapped.

CHAIRMAN: Citizens who are car drivers?

MR WILLIAM CHUNG: I'm not sure, but then we were informed by the Transport Department.

CHAIRMAN: Presumably not citizens standing on a bus with 130 other passengers.

MR DUNCAN: Just going back to the system in Seoul for the moment, the bus signal priority system. Given your response to my question, is that something that would be worthy of your taking up with the Transport Department?

MR SAMUEL CHENG: Yes, sir.

MR DUNCAN: Do you have any plans to do that?

MR SAMUEL CHENG: As a result of today's hearing, we have been enlightened. We are going to do it.

MR DUNCAN: Can I just bring to your attention a couple of other matters that have come up during the course of the questions this afternoon. First of all, may I bring to your attention section 33(1) of the Public Bus Services Ordinance, which reads as follows --

CHAIRMAN: Do we have that in the papers?

MR DUNCAN: Yes. It will be in THB-2 at page 124, Mr Chairman.

CHAIRMAN: Thank you.

MR DUNCAN: THB-2, page 124, section 33(1). You can probably read that for yourself, Mr Cheng. It reads as follows:

"A grantee which is aggrieved by any decision,

direction or requirement of the Secretary for Transport and Housing, or a public officer given directions under section 3, or the Commissioner, or any person authorised by him, under this Ordinance or its franchise may, within 28 days of the giving or making of the decision, direction or requirement, appeal by petition to the Chief Executive-in-Council, and the decision of the Chief Executive-in-Council on any such appeal shall be final."

Hitherto, have you been aware of that provision?

MR SAMUEL CHENG: I am aware of that.

MR DUNCAN: Has the company ever availed itself of its rights under that?

MR SAMUEL CHENG: Never, sir.

MR DUNCAN: One other matter, just a reference, if I could, with regard to the issue I raised as to whether maintenance of facilities had contributed at all to accidents.

I just refer the committee to another of the documents, TD-2 at page 183, which is the Brief of the Legislative Council considering the new franchises and the bus networks of Citybus Ltd, that's for Hong Kong Island and the cross-harbour bus network, and the New Lantao Bus Company.

You will see, in the course of the assessment of the

applications, references to accidents, maintenance, and so on, pages 183 and 184. That may be the provision that the chairman had in mind.

CHAIRMAN: Yes. Thank you.

MR SAMUEL CHENG: I beg your pardon. You mentioned the maintenance and repair. I can't see any mention of maintenance and repair here.

CHAIRMAN: I think what I had in mind was the inspections, the random checks on buses, detected a very low rate of defects, and that was the observation that was made.

MR DUNCAN: By the Transport Department?

CHAIRMAN: Yes.

MR DUNCAN: We will look for that, Mr Chairman, and find it for the committee.

CHAIRMAN: Thank you.

MR DUNCAN: Mr Chairman, unless the committee has any further matters that you wish me to explore, they are the questions.

CHAIRMAN: There is one matter, and I will raise the question directly with you, Mr Cheng. It's simply this. You have told us about a safety committee that was put into being I think in April in the companies, to address safety issues, of which you are the chair, and on which some of your fellow representatives here today also sit. My question, first of all, is this. It's right, is it

not, that a director or perhaps two of your directors are Transport Department employees?

MR SAMUEL CHENG: Yes. This safety committee is composed of our senior management. We have not invited the government officials to sit on this committee, because if the company has issues to discuss with the Transport Department, then it would be meeting between the company and the Transport Department. It's not for us to invite the Transport Department to sit on this safety committee.

CHAIRMAN: So although they are directors of the company, you specifically decided not to invite them because of, what, a potential conflict? Is that it?

MR SAMUEL CHENG: No, it's not because of the conflict; because the operation of our company is the responsibility of the management. The Transport Department has two officials sitting on the board, and generally speaking, the operation is a matter for the management of the company. We have non-executive directors. They are not involved in operation of the company.

CHAIRMAN: Thank you for your answer to that. Those are the questions that counsel has to ask you and those are the questions that we have. I understand that there is a final short statement that you wish to make, and if

that's so, please do so now.

Closing statement by MR SAMUEL CHENG

MR SAMUEL CHENG: Thank you, Chairman.

Mr Chairman, on behalf of New World First Bus and Citybus, I would like to thank the following members over the past two days: first, I thank the IRC for inviting us to this hearing; Mr Duncan and his team has raised questions to us and that allowed us the opportunity to talk about the operation of the company; third, I would like to thank the secretariat of the IRC for the arrangement over the past fortnight; finally, I would like to thank the simultaneous interpreters for their service.

Thank you very much, Mr Chairman. Thank you, members.

CHAIRMAN: Finally, then it remains for us to thank you for your oral evidence and to remind you of the various matters that you said that you would provide us with in writing in due course. To assist you with that, the secretariat will identify those matters and give you the transcript references so that you will see what it is that is sought from you.

MR SAMUEL CHENG: Most certainly, sir. Thank you.

CHAIRMAN: Thank you very much.

MR SAMUEL CHENG: Thank you, Mr Chairman.

(4.55 pm)

(The hearing adjourned to a date to be fixed)

Examination by MR DUNCAN (continued) 1

Closing statement by MR SAMUEL CHENG 134

2018 年 5 月 30 日

上午 10 時正恢復聆訊

出席人士如前。

主席：（經傳譯員）各位早晨。鄧大律師。

MR DUNCAN：（經傳譯員）多謝你，主席。鄭先生，早晨。

鄭偉波先生：早晨。

MR DUNCAN：（經傳譯員）各位先生，早晨。今朝早我首先想問一啲問題係關於一啲裝置嘅，係關乎巴士安全方面嘅裝置。首先，我就想講下嗰個俗稱係黑盒嗰個裝置，我就想請你睇 CTB-1，55 頁。

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）唔該晒。想請你睇嗰一頁，寫住“1”，係喺我哋個巴士嗰度引入黑盒嗰個部分，請你睇一睇。睇到嗎？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）嗰幾段文字就係咪講及喺巴士嗰度安裝呢個黑盒嘅歷史呀？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）似乎就係喺 2003 年嘅 10 月開始，當時運輸署就係有一個咁嘅要求，就要求呢啲裝置就要係安裝喺巴士嗰度嘅，係咪呀？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）咁就係適用於 2004 年 7 月 1 號之後首次登記嘅巴士，係咪呀？

鄭偉波先生：正確。

主席：（經傳譯員）或者係將 2013 年 10 月運輸署嗰封信亦都打上嚟，好唔好呀？應該就係附件一。

MR DUNCAN：（經傳譯員）係 TD-2，205 頁。

鄭偉波先生：我哋睇見。

MR DUNCAN：（經傳譯員）2007 年之後註冊嘅巴士就係有埋黑盒，係咪呀？

鄭偉波先生：喺嗰個生效日期之後，我哋首批登記嘅車就係喺 2007 年嘅。換句話嚟講，喺 04 至到 07，即係我哋登記啲車之前，有一段時間我哋係冇新車嘅。而喺 2007 年，我哋首次登記嘅車係有黑盒嘅。

MR DUNCAN：（經傳譯員）好，巴士公司係咪就係你哋接收啲巴士嘅時候，你自己有埋嗰啲黑盒呢？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）唔該晒。CTB-1，55 頁，你就話喺 2010 年嘅時候，你哋公司採取主動就將黑盒係提升，咁係成為一個綜合系統嘅一部分，裏面係有埋一個功能，就係自動有嗰個到站嘅廣播嘅，係咪咁呀？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）唔該。

主席：（經傳譯員）律師，請你停一停。講番嗰份文件嘅第 2 頁，就講及係嗰個基本嘅要求係乜嘢嘢，但係係 2003 年嗰封信嘅，下面嗰頁，嗰個要求就喺嗰一頁嗰度列咗出嚟嘅。

MR DUNCAN：（經傳譯員）係，不如係請你睇番嗰一版，TD-2，206 頁，第 2 段。請問你睇唔睇到嗰個要求呢？即係話運輸署嘅要求。

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）係當時嗰個情況。

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）咁就係 2003 年發出嗰個要求嘅時候嘅細節，就有分開 A 同埋 B 兩項嘅。首先，就係嗰個營運時間開始，就係結束時間，中間係冇開引擎嘅時間，行緊車嘅時間。B 嗰項就係車速。

主席：（經傳譯員）對唔住，律師。第一項嗰度講出就係點解有咁嘅要求嘅，係咪呀？佢呢度就話係電子數據記錄系統嘅目的就係希望讓巴士公司係有呢個工具去監察，同埋管理喺路上嘅車速，同埋佢嘅巴士同安全有關嘅表現，係間接就希望鼓勵駕駛嘅行為係更好嘅。鄭生，睇到嘛？

鄭偉波先生：睇到。

主席：（經傳譯員）你嘅理解係點呢？你嘅理解係運輸署喺呢方面，佢扮演咩嘢角色呢？如果有嘅話。即係話佢有咁嘅要求，你回應佢嘅要求，咁喺你眼中，運輸署係咪有一個角色？同埋個角色係咩嘢呢？

鄭偉波先生：運輸署係有個角色嘅，係由佢推動巴士公司去安裝呢個黑盒嘅裝置。

主席：（經傳譯員）之後呢，個角色係點呢？

鄭偉波先生：之後，巴士公司就要符合呢一個指引嘅要求。而呢一個喺當時嚟講，嗰個科技就係去到呢啲嘅內容，但係喺幾年之後有再新嘅科技，當我哋公司知道咗之後，於是我哋就提升我哋嗰個黑盒嘅系統。

主席：（經傳譯員）你點知道係有新科技嘅發展呢？

鄭偉波先生：呢個我畀我同事鍾生嚟到答大家。

主席：（經傳譯員）係，鍾先生。

鍾澤文先生：冇錯，當時我哋亦都係有研究緊喺一個巴士上面嘅報站裝置。因為呢個報站裝置，我哋當時就考慮到唔想令啲司機係加重佢嗰個工作負擔，所以我哋就係研究一個利用衞星定位嘅方法係去自己動報站嘅。喺研究呢樣嘢嗰陣時係理解到可以將兩個系統串連咗一齊嘅，咁就可以除咗話提供運輸署所要求嘅一啲資料之外，亦都可以加埋嗰啲巴士嘅位置，係咁樣產生出嚟嘅，多謝。

主席：（經傳譯員）鄧生。

MR DUNCAN：（經傳譯員）唔該主席。我嘅理解啱唔啱呢？就係公司係主動提升嗰個科技，用更多嘅科技，係咪呢？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）咁講啱唔啱呢？喺 2003 年至到 2010 年之間，因為你話 2010 年嘅時候，你主動係提升吖嘛，03 至到 10 年之間，運輸署冇要求喺黑盒嗰方面係採取新啲嘅科技，除咗係早喺 2003 年已經作出嘅要求之外，冇要求有新嘅科技，係咪呀？

鄭偉波先生：我同事鍾生回答。

鍾澤文先生：係冇嘅。

MR DUNCAN：（經傳譯員）我又想睇番你嘅意見書，亦都睇番第 55 頁，喺嗰版嘅下面嗰度，你就講出就係話逐秒逐秒嘅數據，呢個黑盒可以提供逐秒逐秒嘅數據嘅，呢啲數據今時今日喺黑盒嗰度係咪都係有嘅呢？

鄭偉波先生：呢個技術性嘅問題，我同事列先生回答嘅。

列俊華先生：係正確嘅。

MR DUNCAN：（經傳譯員）我想問下，你哋有嗰個係自動嘅巴士到站廣播入咗去個黑盒嗰個制度之後--個系統之後，直至而家有冇新嘅提升或者改進呢？

列俊華先生：係有嘅。

MR DUNCAN：（經傳譯員）有提升，有改進係邊啲呢？

列俊華先生：我哋喺上一年，2017 年，我哋開始安裝新嘅系統，我哋簡稱係“RTS2”，Real Time System 2，裏面我哋加入啲新嘅功能，包括正如鄭生喺昨天講，提及過嘅，我哋會喺第三季當所有車隊完成安裝呢套系統之後，就會可以提供一個顯示，當車輛係發覺超速嘅時候，我哋會提供一個顯示通知車長。

MR DUNCAN：（經傳譯員）嗰個係實時嘅系統，呢個係未做嘅，係咪呀？即係仲未喺整個車隊嗰度係安裝呢個實時系統嘅，係咪呀？啱唔啱呀？

列俊華先生：正確，未完全安裝喺所有車隊裏面。

MR DUNCAN：（經傳譯員）除咗嗰個實時系統之外，我想問有冇其他方面係有所提升呢？即係喺黑盒嗰方面。我所講嘅時間就係你將黑盒同埋到站廣播結合咗之後，到而家中間有冇啲咩嘢地方係有提升，有改進呢？

列俊華先生：冇，暫時喺嗰段時間係冇改進嘅。

MR DUNCAN：（經傳譯員）公司係幾時決定將呢一個實時嘅系統加落去呢？

列俊華先生：係，我哋大約喺 2015 年，當我哋城巴專營權由運輸署批准，政府批准之後，其中一條條款係要求我哋提供一個實時到站畀乘客，英文係“Estimated Time of Arrival”。由於呢一個系統提供呢一個 ETA 嘅系統需要有一個實時嘅功能，所以我哋喺嗰段時間開始就籌備去完成為所有新巴、城巴嘅車隊提供實時報站。

MR DUNCAN：（經傳譯員）我就係想請你睇番份文件...

主席：（經傳譯員）不過你未繼續之前，我就想問，你較早時候就講過 RTS2 呢個實時系統就會喺第三季係落實嘅，係咪 2018 年嘅第三季呀？

列俊華先生：正確。

主席：（經傳譯員）唔該晒。鄧大律師。

MR DUNCAN：（經傳譯員）多謝你，主席。或者想你睇一睇呢份文件 BM-1，35 頁。你睇緊份文件就係有一個新聞發布咁樣嘅，而家係咪睇緊份文件？

鄭偉波先生：我哋而家睇緊。

MR DUNCAN：（經傳譯員）唔該晒。

主席：（經傳譯員）或者花少少時間係睇睇個內容，唔該。

鄭偉波先生：我哋睇完嘞，份文件。

MR DUNCAN：（經傳譯員）唔該晒。佢就係話 NEC 就係攞到嗰份合約，就係一個綜合嘅自動報站系統同埋嗰個數據紀錄嘅系統，咁就係城巴、新巴嘅系統嚟嘅，個標題睇到，係咪？

鄭偉波先生：係，冇錯，睇到。

MR DUNCAN：（經傳譯員）係 2012 年 1 月 13 號嘅。

鄭偉波先生：見到。

MR DUNCAN：（經傳譯員）第一段就係宣布，代表 NEC 宣布就係話中咗一份合約係關於七百零二部巴士嘅，呢啲就係新巴嘅巴士同埋一百七十二部城巴嘅巴士。

鄭偉波先生：見到。

MR DUNCAN：（經傳譯員）同埋佢講到就係運用呢一個嘅報站系統 ABSA 同埋嗰個數據嘅儲藏 DL 嘅系統，係咪？

鄭偉波先生：因為呢個係去到啲具體嘅操作，我畀我同事鍾生答。

鍾澤文先生：係，正確嘅。

MR DUNCAN：（經傳譯員）唔該晒。或者第 3 段，係咪講到呢個 BSA 同埋 DL 嘅系統就係結合咗呢個衞星定位嘅系統，巴士嗰個車速計嘅訊號同埋有關一啲特別嘅技術係可以克服到一啲街道狹窄或者高樓大廈所產生嘅一啲假嘅訊號嘅問題，係咪呢？

鍾澤文先生：正確。

MR DUNCAN：（經傳譯員）最後嗰段，呢一版，係咪提到就係話有一個控制嘅裝置，咁就記錄咗嗰個巴士位置速度全日都係做㗎嘢，係咪？

鍾澤文先生：正確。

MR DUNCAN：（經傳譯員）同埋呢個數據就會係用 Wi-Fi，就係巴士回廠嘅時候，就會係加番入去個數據庫嗰度咁樣？

鍾澤文先生：正確。

MR DUNCAN：（經傳譯員）究竟呢份合約對公司嚟講係點樣呢？如果你睇番你嘅陳述書第 55 版嗰度，CTB-1。

主席：（經傳譯員）鄧律師，等一等，我想問一個問題，第 1 段嗰度就有兩部分嘅，第一，就係最近係佢哋中咗標；第二，就係提到喺成功推行呢一個系統之後，就係城巴嘅七百六十部巴士之後，佢哋係有呢一套嘅 ABSA 同埋 DL 嘅系統。我想問一條問題，就係第一，呢個係咪準確嘅？第二，就係呢個系統幾時係推行嘅？

鍾澤文先生：主席，我哋呢個系統係首先喺城巴嘅專營權一嗰度先做先嘅，當時我哋做咗專營權一之後，係再去推廣到喺新巴同埋城巴嘅專營權二嘅。

主席：（經傳譯員）咁係幾時安裝呀？喺嗰個時間性，幾時裝？

鍾澤文先生：城巴嘅專營權一就係喺 2011 年嘅 6 月完成嘅，城巴嘅專營權二同埋新巴嘅安裝喺 2012 年嘅年尾就完成安裝嘅。

主席：（經傳譯員）唔該晒。鄧律師。

MR DUNCAN：（經傳譯員）多謝你，主席。好，而家想睇番第 55 版嗰度，底嗰度就有講到 2010 年我哋公司就採取步驟就係提升嗰個黑盒，就做一個綜合嘅制度，咁結合埋嗰個巴士報站嘅系統能力咁樣，呢個係咪 NEC 係有份㗎，呢度？

鍾澤文先生：係，都係 NEC 幫我哋做嘅。

MR DUNCAN：（經傳譯員）係 2010 年定 2011 年，個實際日期？

鍾澤文先生：2011 年我哋開始同呢個 NEC 去商討同埋研發嘅，咁 2011 年 6 月係裝好咗城巴嘅專營一嘅車隊。

MR DUNCAN：（經傳譯員）係。你講到呢版最底嗰度，你講到話即係 2010 年就係有啲咁嘅情況發生，呢個係咪 NEC 嗰個系統，還是呢一個係另一套嘅呢個結合嘅系統，係咪 NEC 個系統定係點呀？

鍾澤文先生：你可唔可以重複個問題？

MR DUNCAN：（經傳譯員）其實我就係要去確定一下，究竟喺 2010 年嘅時候，我哋睇到呢版最底嗰度，就係 55 頁，佢就話喺 2010 年嘅時候，我哋公司就採取咗措施係提升嗰個黑盒，咁就變成一個結合嘅系統，可以結合呢一個報站嘅系統，睇嚟呢個係即係 NEC 做，根據你正話所講嘅，NEC 有份做，咁 2011 年就係 NEC 做咗好多呢啲咁嘅安裝喎，係咪？

鍾澤文先生：冇錯。

MR DUNCAN：（經傳譯員）喺 2010 年嘅時候，其實係咪應該係 2011，唔係 2010 呢？我問題係咁。

鄭偉波先生：主席，如果我哋去研發一個新嘅系統，係需要時間嘅，我哋喺 2010 年嘅時候就採取個主動，就搵 NEC 去設計呢個新嘅系統。而有咗呢個新嘅系統之後，我哋要安裝七百多部嘅巴士係需要時間嘅，就因為每日可能安裝幾部咁樣，因為我哋啲車就需要每日運作嘅。由佢開始安裝至到安裝完成就都要成一年時間，所以喺我哋個 submission，請可唔可以去下一頁呢？係，我哋呢度就講咗，就係我哋城巴專營權一就喺 2011 年嘅 6 月就完成咗安裝呢個系統。而至於城巴嘅專營權二同埋新巴就去到 2012 年尾先至完成安裝呢個系統，就係同一個系統嚟嘅。因為當時城巴專營權一喺佢嗰個 franchise renewal 嘅時候，政府就有個要求要我哋提供嗰個報站系統，所以城巴專營權一係首先要完成呢個安裝嘅，多謝。

MR DUNCAN：（經傳譯員）係，唔該晒，你澄清呢一點。當時你哋採取咗措施，10 年嘅時候，就話安裝呢一個系統，11 年就裝好，咁就 NEC 幫手裝嘅，係咪？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）唔該晒。

主席：（經傳譯員）鄧律師，等等先。喺嗰個城巴第一號嘅專營權續期嘅時候，政府就有個規定，就話你係需要一個報站系統咁樣，而家呢啲資料有冇文件畀我哋，有冇一啲證供係話有咁樣嘅規定呢？

鄭偉波先生：喺嗰個專營權--喺專營權文件裏面，就冇提及到呢一個報站系統嘅，但係當我哋當時係續嗰個專營權嘅時候，除咗個專營權文件之外，我哋亦都透過書信來往嘅形式就承諾有啲其他嘅事項需要做嘅，呢個就我哋喺公司係有呢份文件嘅，多謝。

主席：（經傳譯員）可唔可以係將嗰份文件畀個副本畀委員會呢？應該係有幾份文件嘅，係咪？我哋可以跟進呢一方面嘅情況。

鄭偉波先生：可以。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）我諗剛才都有提到另外一份文件，就係話嗰個專營權，咁提到就話嗰個實時嘅能力咁樣嘅，實時功能咁樣嘅，係咪呀？正話係咪有提到？鄭生。

鄭偉波先生：有提到。

MR DUNCAN：（經傳譯員）呢份係咪即係另外一個要求嚟，唔係同一個要求嚟呀？

鄭偉波先生：鍾生會回答呢個問題。

鍾澤文先生：係，嗰個係另外一個要求嚟嘅。

MR DUNCAN：（經傳譯員）係咪喺嗰個專營權文件當中有講嘅呢？

鍾澤文先生：都係好似頭先鄭生講，我哋係另外書信，就唔喺個專營權嘅文件裏面。

MR DUNCAN：（經傳譯員）嗰啲文件你哋大家書信來往嗰度係咪有證據喺度嘅呢，有資料呢？

鍾澤文先生：係有嘅，我哋可以事後提供番。

MR DUNCAN：（經傳譯員）唔該晒。

主席：（經傳譯員）唔該晒。嗰個時間係點樣呢，邊一份嘅專營權嗰個時間係點樣嘅，即係續期嗰啲資料，時間性係點樣㗎？

鄭偉波先生：我哋同運輸署呢啲嘅書信來往，就係喺政府頒發個專營權畀我哋之前幾日，我哋就要作出呢啲嘅承諾，多謝。

主席：（經傳譯員）咁邊一年呀？鄭生，呢個係一號定二號專營權嚟㗎？

鄭偉波先生：係 2015 年。

主席：（經傳譯員）唔該。

鄭偉波先生：而個專營權就係 2016 年開始先至係生效嘅。

主席：（經傳譯員）係咪二號嘅專營權呀？

鄭偉波先生：係專營權一。

主席：（經傳譯員）唔該。係，律師。

MR DUNCAN：（經傳譯員）我想繼續，跟住想睇下究竟呢一個黑盒就係提供啲乜嘢嘅數據，同埋呢啲數據係攞嚟點樣用。我想請你睇番你嘅第一部分嘅意見書，CTB-1，33 頁。

鄭偉波先生：我見到。

MR DUNCAN：（經傳譯員）唔該。目前我想睇而家嗰個系統現有嘅功能，遲啲我先至會問嗰個實時嘅功能。而家我想關注就係未做到嗰個實時功能之前嘅現況，喺嗰版下面嗰度，8(a)(i)嗰段，你有咁提到嘅，就話安裝喺巴士上面嘅黑盒所收集到嘅數據就係會上番去嗰個伺服器，咁就每晚都做嘅，嚟到係去做一啲報告出嚟，啲報告愛嚟就去監察我哋車長嘅駕駛行為嘅，睇到呢句嘛？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）無疑嘅就係如果有一個車長係超速，譬如話開到 80 公里一小時，咁肯定就會喺嗰個伺服器嗰度係顯示到出嚟，係咪呀？

鄭偉波先生：不是。喺我哋未有 real time 嗰個系統之前嘅情況，我先講一講，咁就係每一晚架車返到嚟我哋嘅車廠，我哋先至會將嗰啲數據就傳輸去我哋公司嘅電腦系統，就唔係實時我哋知得到嘅。而將來我哋係有個實時系統嘅時候，呢啲資料就係會每十五秒就傳輸一次上嚟我哋公司嘅系統，兩者係有分別嘅。

MR DUNCAN：（經傳譯員）明白。我哋先集中睇嗰個未有實時功能，即係現在嗰個系統。上傳咗嗰啲數據，夜晚上傳畀個伺服器，嗰度都可以睇到話一位司機就係超過咗每小時 70 公里嗰個車速，啱唔啱呀？

鄭偉波先生：或者我再詳細少少嚟到講一講，當架車喺運作緊嘅時候，個巴士喺日頭運作嘅時候，如果係發生咗超速嘅情況，我哋車上面嘅黑盒就會記錄低呢一個超速嘅事件，當呢啲資料喺夜晚上傳到我哋公司嘅電腦系統，我哋嘅電腦系統就會將呢啲嘅數據嚟到整理，而第二日--對唔住，係大約五日之後，就會可以出到一個超速嘅事件嘅報告。咁呢五日到底係咩嘢事呢？我哋嘅系統就係需要將呢個超速嘅事件去配對番我哋公司另外一個嘅八達通系統，就去搵出相關嘅車長名

字，呢個就需要幾日嘅時間。咁有咗呢一個超速事件嘅報告，我哋嘅同事就會作出跟進，多謝。

MR DUNCAN：（經傳譯員）咁其他嘅問題，即係譬如話車長可能係有其他嘅失誤，或者佢嘅行為係唔妥，譬如話佢加速加得太快，又或者佢嗰個踩剎動器，即係踩 brake 係太犀利，會唔會亦都好似係超速咁樣樣，喺你嗰個公司個電腦系統，喺個伺服器嗰度係睇到呢啲資料呢？

鄭偉波先生：係有呢啲資料，但係我哋個系統冇去編製個報告出嚟。

MR DUNCAN：（經傳譯員）目前唯一會產生嘅報告就關於個車速嘅報告，啱唔啱呀？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）個報告出到嚟嘅時候，咁就會點嘅呢？就咁躉咗喺度，定抑或會有人係有咁嘅責任，就係要逐個呢啲報告去睇嘅呢？

鄭偉波先生：當呢個報告出咗嘅時候，我哋個系統就會自動產生電郵去畀我哋嘅營運部門。我哋公司係有三個營運部門嘅，係城巴一部、城巴二部同埋新巴嘅營運部。喺每一個部門，佢當收到呢個電郵之後，就知道喺佢個部門嘅車長有邊啲嘅人係牽涉咗喺呢啲超速嘅事件裏面，之後就會根據我哋公司嘅內部紀律處分指引嚟到作出合適嘅處分，可以係--如果係初犯，唔係嚴重嘅話，就係用提示嘅形式。如果係嚴重或者係再犯嘅，就會係用警告嘅形式，多謝。

MR DUNCAN：（經傳譯員）我咁嘅理解啱唔啱呢？目前嗰個監察嘅系統，即係你監察住車長嗰個行為係只限於個車速嘅啫，係咪呀？

鄭偉波先生：係呢兩方面嘅，喺每一日嗰個慣常嘅監察就係車速方面，而另外一方面，當有乘客投訴或者有交通意外發生，我哋有同事就會搵番相關嘅行車紀錄資料作出調查，咁調查嘅結果如果係成立嘅，相關嘅車長係會受到紀律處分。

MR DUNCAN：（經傳譯員）講番嗰個黑盒，淨係講嗰個黑盒。個黑盒其實只係監察嗰個車速嘅，係咪呀？就睇唔到，亦都唔會監察車長嘅其他行為，啱唔啱呀？

鄭偉波先生：嗰個黑盒就唔係淨係監察車速，喺我哋嗰個遞交嘅...

MR DUNCAN：（經傳譯員）對唔住，或者等我再問過個問題，我諗我知你想講乜嘢。講到嗰啲報告，報告即係話喺呢個伺服器嗰度嚟自黑盒嗰啲報告，嗰啲報告就只關乎係車速，就唔會係反映到其他車長嘅失誤嘅，係咪呀？咁講啱唔啱呢？

鄭偉波先生：我哋恒常性電腦系統產生嘅報告就只係有關超速嘅，而喺我哋個系統裏面所記錄嘅數據資料就唔只係超速嘅，就包括當時駕駛嘅時候，嗰架車所產生嘅 G force，咁都有記錄低喺處嘅。當然，就仲有其他個車長嘅行為，例如有冇開到車門，都會有記錄到喺處嘅，多謝。

MR DUNCAN：（經傳譯員）我咁嘅理解啱唔啱呢？嗰啲講嘅就唔會係喺報告嗰度，即係唔會產生一個報告係報告呢啲嘢嘅，啱唔啱呀？目前嗰個情況係咁。

鄭偉波先生：係唔會自動產生呢個報告。如果我哋公司覺得有需要做調查嘅時候，就可以將呢啲嘅資料喺個電腦裏面攞出嚟愛嚟做調查工作。

主席：（經傳譯員）我諗我哋嘅理解就咁嘅，係咪呀？有報告，只係關乎車速，就可以產生一個報告，但係如果你想做調查，亦都可以有其他嘅數據，其他資料嘅，啱唔啱呀？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）唔該晒，主席先生。我哋集中番講車速，我想請你再睇番你自己嗰個意見書，今次係想睇 26 頁，CTB-1，26 頁。

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）唔該。想請你--嗰個講到係開動引擎，開同關，你呢度就話啲黑盒係用嚟監察每部巴士嘅車速，同埋就會係自動係產生呢一個超速嘅例外報告出嚟，睇唔睇到嗰句呀？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）如果你繼續睇落去，你就會見到係其實都講及一啲剛剛我問及你嘅一啲情況嘅。

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）如果嗰個車速係超過咗一小時 70 公里嘅話，咁就係嗰個黑盒嗰度會有一個紀錄，同埋會自動成為嗰個報告嘅一個部分，係咪呀？啱唔啱？

鄭偉波先生：正確。

主席：（經傳譯員）乜唔係 75 咩？呢度唔係 75 就會有報告？

鄭偉波先生：我哋係監察 70 公里嘅限速，但係我哋 set 咗落去嗰個黑盒，就係要 75 公里就連續十秒鐘先至會產生一個 event 嘅。

主席：（經傳譯員）即係話嗰度係有兩樣嘢睇嘅，一個就 75，同埋仲要連續十秒，要符合兩個條件先得㗎，係咪呀？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）邊條線，邊條路都好喇，咁都係會咁樣，係咪呀？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）講番嗰個速限即係 50 公里，一小時 50 公里嗰個速限咁講，你睇到就係超過 55 公里係連續十秒，而嗰個路段個速限就係每小時 50 公里，你睇到呢句嘛？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）我想問一個問題，就係嗰啲路段，即係而家嗰啲路段，我嘅理解啱唔啱呢？呢啲係隨意咁抽嘅路段，係咪？即係公司其實係隨意咁樣係不時揀呢啲路段出嚟嘅，係咪呢？

鄭偉波先生：不是，我哋喺公司--就我哋公司揀咗二十五個路段，佢限速係 50 公里嘅路段，而呢個二十五個路段就包括咗係落長嘅斜路，長嘅斜路，係落斜嘅。第二，呢啲路段係有啲急彎嘅。第三，呢啲路段以前曾經係有啲比較大型嘅交通意外發生過嘅，就不是隨意嘅。

MR DUNCAN：（經傳譯員）或者我想請你係睇一睇第 56 版，係你第二份陳述書嘅第 56 頁，CTB-1，56。

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）正話有問題問到，你喺呢度--即係以前問過問題，你喺呢度答咗嘅，2a)嗰度就係有啲準則搵出呢啲偵速嘅一啲嘅路段，係咪？你睇唔睇到呢句？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）呢度有講，呢廿五條嘅路段有十一個路段就係喺 2013 年 6 月嗰度係搵出嚟嘅，另外就係有 14 年 9 月就係有另外三條，跟住 18 年 3 月就有十一條嘅路段咁樣。咁呢啲路段有幾長㗎，其實？

鄭偉波先生：我畀我同事鍾生答你。

鍾澤文先生：一般呢啲路段都會係超過一百米嘅。

MR DUNCAN：（經傳譯員）點解你不時咁增加呢啲路段呢？初期，十一，跟住三，跟住加多十一，點解不斷咁加呢？點解嘅？

鍾澤文先生：（經傳譯員）喺我哋初初引入呢個方法去監控嗰個路段嗰陣時，我哋係有同我哋嘅工會代表去商討，亦都同佢哋就傾談過有啲咩嘅路段，因為我哋都要佢哋知道係邊啲路段，從而佢哋會係去跟番嗰度路段嘅車速咁樣。我哋亦都日後喺度一路加，我哋都有同佢哋--即係去話畀佢哋聽，等佢哋知道嘅，嗄。

MR DUNCAN：（經傳譯員）可唔可以咁講呢，係咪公道呢？呢廿五個路段其實就係所有呢啲巴士所行嘅路線嘅路段係一小部分嚟嘅啫，係咪？

鍾澤文先生：可以咁樣講，不過就呢啲都係我哋覺得係比較危險啲，如果佢係超過

50 公里嘅超速嘅話，呢啲路段係比較危險嘅。

MR DUNCAN：（經傳譯員）其實喺搵呢啲路段嘅時候，係點樣搵㗎，係做啲乜嘢？

鍾澤文先生：正如頭先鄭生所講嘅，我哋都係跟番嗰三個準則，佢如果係落長斜，或者嗰段路係好多急彎嘅，或者我哋發覺呢段路段過往都經常發生一啲交通意外，或者發生過嚴重交通意外，我哋去搵呢啲路段係即係用呢三個因素去考慮嘅。

MR DUNCAN：（經傳譯員）係，我明白，你咁樣搵。但係喺技術上，你點樣係將佢加入去個系統入面呢？

鍾澤文先生：技術上，我哋喺嗰個系統嘅電子地圖上面，我哋喺嗰個路段，我哋畫咗落個地圖裏面，咁 set 番頭先我哋所講嗰啲準則，譬如話 55 公里十秒連續咁樣，咁佢就會加咗落去嗰個系統裏面。

MR DUNCAN：（經傳譯員）點解你唔將所有嘅路線都加晒入去個系統入面，你咪全部都睇晒囉，即係 70 或者 50 嘅情況你都可以睇晒，所有路段，邊度都好，都睇到晒，咁得唔得？

鍾澤文先生：理論上係可以嘅，不過嗰個要花嘅工夫就會好長，因為我哋要分番我哋所有唔同路線，或者香港嘅道路係全部要喺嗰個電子地圖裏面就分番邊啲係 50 公里，邊啲係 70 公里，咁嚟去做，呢個比較花嗰個工夫。

鄭偉波先生：主席，我有少少補充。我同意嘅，現時我哋呢二十五個路段就唔能夠涵括晒我哋所有路線所行經嘅路段。而家我哋就係已經有二十五個揀咗係比較我哋覺得係高風險嘅位置。除此之外，我哋打算就係喺將來就會係以隨機嘅形式就再劃一啲附加嘅路段愛嚟偵測呢啲 50 公里限速嘅駕駛情況。其實呢個我哋打算做呢一樣嘢，就同警察去捉快車係類似嘅，現時有啲影相機就固定裝喺某啲嘅位置嗰處。而除此，警察亦都係會以隨機嘅方法，有啲流動嘅快速攝影機，即係愛嚟捉嗰啲快車嘅攝影機，我哋其實都係由呢度啟發到出嚟，我哋而家就打算係會咁樣做嘅，但係我哋咁樣做之前，我哋亦都需要同我哋嘅工會溝通嘅，多謝。

MR DUNCAN：（經傳譯員）工會其實目前佢哋知唔知嗰廿五段嘅路段，佢哋知唔知㗎？

鄭偉波先生：知道嘅，因為呢個係刊登咗喺我哋嘅車長手冊嘅附件裏面。

MR DUNCAN：（經傳譯員）呢個...

主席：（經傳譯員）鄧律師，等等先。我哋即係確定一下先，譬如話附件一嗰度，係咪？CTB-2，169-88 頁，英文版就係呢度，你係咪講緊呢一拃嘅地點？而呢啲路段係列咗出嚟嘅，係咪？

鄭偉波先生：正確。

主席：（經傳譯員）呢個就係嗰廿五個路段，所有呢啲路段而家就喺呢個系統嗰度係

監察緊嘅，同埋係會出報告。如果個車係制動 55 咁樣，即係巴士去到 55，咁就會有報告出，係咪？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）而家你準備有實時系統，咁有冇一啲計劃就係增加呢啲路段嘅數目呢，就超過二十五個呢？

鄭偉波先生：實時系統同幾多個路段冇直接關係嘅，而我哋對於增加呢啲監偵嘅路段，喺我哋公司嚟講，係覺得冇問題嘅，但係我哋亦都要同我哋嘅工作嚟到商討，所以就頭先我有講過，我哋有個計劃就係以隨機嘅形式嚟到畫落去我哋個電子地圖嗰處，愛嚟偵測更多嘅 50 公里限速嘅路段，多謝。

MR DUNCAN：（經傳譯員）咁係咪即係話呢個係同工會一齊傾，等佢哋知道嗰個結果係點樣呢？

鄭偉波先生：我哋要先話畀佢知，當然唔係問佢哋攞批准，要佢哋要知道。

MR DUNCAN：（經傳譯員）而家就睇睇嗰個實時系統嗰個建議，或者想請大家睇一睇第 33 頁，即係 CTB-1，33，係閣下嘅陳述書嚟嘅。底嗰度，第三行，最後嗰度第三行，我哋打算就係取代嗰個黑盒系統，咁新嘅系統就係一個有實時嘅能力，個時間就係 2018 年第三季咁樣做。到時我哋就能夠係監察車長嘅駕駛行為，係實時可以做到，同時就係有需要，就係即時咁樣係採取行動嘅。喺呢方面，我就想請你睇睇你第二份嘅陳述書，就係第 58 頁。

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）唔該晒。你睇到最底嗰度又係有一項嘅，嗰個實時嘅系統就會係發出一啲即時嘅響號，即係一啲嗶嗶聲嘅響號，咁係喺嗰個控制台嗰度就會自動發出呢啲訊號係知會嗰個車長，即係話如果佢哋係有超速嘅話，就會有咁嘅情況。呢個其實係咪可以話係總結咗呢個系統嘅實時功能嘅做法呢？

鄭偉波先生：呢一個係嗰個實時功能先至做得到嘅。

MR DUNCAN：（經傳譯員）嗰個實時嘅功能係咪只係關乎嗰個車速嘅呢？

鄭偉波先生：我同事鍾生回答。

鍾澤文先生：嗰個實時功能唔係淨係做車速嘅，頭先我哋講過個實時功能其中一個作用，就係畀我哋去預計架巴士嘅到站時間，就係 estimated arrival time，咁呢個其實就係嗰個實時嘅其中一個功能嚟嘅。

MR DUNCAN：（經傳譯員）車速係其中一方面，到站時間亦都係另一方面，咁有冇其他車長嘅行為失誤會唔會亦都喺呢個實時功能嗰度係察識得到嘅呢？我諗下譬如話佢突然間係剎掣，又或者係加速加得好緊要，咁呢啲咁樣唔妥當嘅地方會唔會亦都可以用嗰個實時嘅功能嚟到係即時知道呢？

鄭偉波先生：我要問一問我嘅同事。

主席：（經傳譯員）係，你問喇。

鄭偉波先生：我嘅同事列先生會回答呢個問題。

列俊華先生：係，主席，鄭生提及過嘅每十五秒傳送數據係指一啲關於車速簡單嘅資訊，佢哋數據以十五秒嘅傳送方法傳送上嚟嘅數據，並非每秒嘅數據。至於每秒傳送上嚟嘅車輛數據係以十五分鐘為一個單位，由車輛傳送到公司嘅伺服器當中，thank you。

MR DUNCAN：（經傳譯員）嗰個實時嘅功能嘅一個好處，就係咪即時係會發出個聲響嚟到係提示嗰個車長，就話你而家超速嘞。我想問車長會唔會係收到係除咗係超速之外，有冇其他方面亦都會收到個提示嘅呢？

鄭偉波先生：列先生，請你答。

列俊華先生：我哋除咗呢個超速之外，未有其他嘅提示畀車長。

MR DUNCAN：（經傳譯員）喺 33 頁嗰度，你就話如果有需要嘅話，就可以即時採取行動，咁你所講嘅「即時行動」係咩嘢意思呢？

鄭偉波先生：我哋所講嘅即時行動就係我哋頭先講緊嗰個「嗶嗶」聲，愛嚟提醒嗰個車長。

MR DUNCAN：（經傳譯員）我需要多啲理解呢一方面嘅事宜嘅。若果嗰個司機係超越咗每小時 50 公里嘅車速，即係喺嗰二十五個道路嗰度，咁就會收到一個係提示，係咪？即係如果喺嗰廿五個路段裏面佢超過咗 50 公里，佢就會收到提示，啱唔啱呢？

列俊華先生：係，正確。

MR DUNCAN：（經傳譯員）如果佢去到 60 咁又點呢，喺一段路，但係嗰段路又唔係屬於嗰廿五個路段，佢又去到 60，咁有冇提示畀佢呢？

列俊華先生：沒有。

MR DUNCAN：（經傳譯員）你嗰個系統如果要做到監察嘅話，其實係包括更多嘅路段，就唔係單單廿五個路段，咁樣樣個監察嘅作用係咪更好呢？

鄭偉波先生：會係更好嘅，但係因為而家我哋都搵唔到有一個電子地圖有晒香港所有路段嗰個限速，而家係冇呢一樣嘢嘅，就變咗我哋現時個做法係要人手將呢啲路段寫落去我哋嗰個電子地圖上面嘅。

MR DUNCAN：（經傳譯員）係咪因為冇電子地圖就有咁嘅問題。我又想問係你哋公司有冇同運輸署講呢個問題，話冇一種咁樣樣嘅電子地圖？

鄭偉波先生：我哋冇嘅。

MR DUNCAN：（經傳譯員）其實你唔會覺得係值得同運輸署係商量下呢件事咩？

鄭偉波先生：我哋會嘗試。

MR DUNCAN：（經傳譯員）若果冇其他人係就黑盒有其他問題嘅話，我打算就係問其他嘅事宜，譬如我會問呢個係車速限制，或者係想問下呢個問題嘅。

主席：（經傳譯員）教授。

羅先生：（經傳譯員）我想問你到時就係有一個報告會產生，定抑或係淨係只係一個「嗶嗶」聲係提示個司機呢？有冇一個報告嘅呢？

鄭偉波先生：呢一個就實時就會提示司機，而如果佢嗰個超速係連續超過十秒，我哋個黑盒就會將呢一個嘅 event 記錄低，咁就同之前我講過，就係會之後入番去我哋個系統，就喺個超速報告嗰度就會列出嚟嘅。

羅先生：（經傳譯員）係獨立嘅，係咪呀？就唔係獨立嘅，係咪呀？

鄭偉波先生：對唔住，我唔明嗰個問題。

羅先生：（經傳譯員）呢個實時嘅警告係獨立於嗰個係報告嘅，係咪呀？嗰個報告係離線㗎嘛，係五日之後先至產生嗰個報告，實時嗰個提示就同佢兩個係分開嘅，獨立嘅，係咪？

鄭偉波先生：係兩樣分開嘅。

主席：（經傳譯員）向司機產生一個提示，係咪所有嘅路都喺 55 嗰度就設個提示，除咗嗰啲係 70 嘅，就唔係調轉，你而家係調轉咗㗎嘛？所有除咗 70 嗰啲嘅路段都設喺 55 就有提示，會唔會好啲呢？

鄭偉波先生：呢個技術上係可行嘅，但係我哋需要做嘅工作係同樣咁多，因為而家我哋嗰個系統就預設咗就全部嘅路段都係用 70，咁而有廿五個路段我哋就劃咗佢係 55，就係咁樣嘅。如果我哋要調轉嚟到做，就要將我哋成個系統嗰個電子地圖就全部設咗佢係 55，就要搵番晒所有嗰啲 70 或以上嘅路段，就將佢改為 70，咁其實兩方面所做嗰個工作都係多嘅，所以我哋就頭先有提過，我哋諗緊就係話係加一啲嘅隨機嘅路段愛嚟監察我哋車長超速嘅行為。

主席：（經傳譯員）大體嚟講，我想問下你哋巴士所行嘅路有幾多就係屬於係車速係 70，就唔係 50 嘅呢，嗰個比例大概係幾多呢？

鄭偉波先生：對唔住，主席，我手頭上係冇呢個數據。不過，其實喺香港行 70 公里嘅路段，就唔係淨係只喺啲快速路嗰處嘅。我舉一個例畀主席知道，就係例如喺告士打道西行，喺呢個路段就有部分就係 50 嘅，有部分就係 70 嘅，咁所以其實嗰個 70 限速嘅路段喺香港，我哋巴士有行經嘅地方都唔會係太少，但係我就

有嗰個資料就係佔個百分比係幾多，多謝。

主席：（經傳譯員）你即是可以講到嗰個係印象係點呢，係多啲係 70 定抑或多啲係 50 嘅呢？

鄭偉波先生：呢個我諗我哋營運總監鍾生會比我更熟悉，鍾生。

鍾澤文先生：主席，我都真係好難話即時可以畀到一個答案你。

主席：（經傳譯員）好，係，鄧律師--教授。

羅先生：（經傳譯員）我有另一個問題。除咗係喺呢個高速公路，你講到嗰個時速，我諗除咗高速公路，應該大部分都應該係時速限制係 50 嘅，係咪？即係喺呢個係市區，基本上一般個典型嗰個都係 50 嘅，係咪呢？

鄭偉波先生：以我個理解就不是嘅，頭先我舉咗嗰個例子，告士打道西行佢不是一條高速公路嚟嘅，但係佢有某啲路段限速係 70 嘅。

羅先生：（經傳譯員）亦都有多一個問題想問嘅，就係突然之間係加速，又或者突然之間係踩 brake 嘅，咁呢個就係同嗰個車速限制無關嘅，所以喺落實嗰方面應該冇問題嘅，係咪呢？

鄭偉波先生：邊一方面呀？對唔住。

羅先生：（經傳譯員）突然間停車，突然間係踩腳掣，突然間係加速，呢啲係咪都係應該同嗰個車速限制係無關嘅，唔需要知道個車速限制你都可以去嘗試去監察呢啲突然加速、踩 brake 嗰啲嘅事宜嘅，係咪呀？

鄭偉波先生：係無關嘅。如果要監察係可以，但係譬如我哋有部車係突然間要踹 brake，呢個未必係代表我哋個車長係做錯嘢。例如有個行人突然間衝出馬路，我哋嘅車長就要即時剎停架車，咁而呢一個就係佢個正確嘅反應。咁如果我哋去攞晒所有嗰啲突然間去減速嘅數據，我哋去跟進嘅時候，去問番個車長，我哋做嘅嘢就會係好多嘅，同埋就係亦都頗浪費時間嘅。所以我哋而家個做法就係個系統有記錄低晒呢啲嘅數據，如果當時係有交通意外或者係有人投訴我哋嘅話，咁我哋就係喺個調查嘅階段，就會攞番呢啲數據出嚟睇嘅，多謝。

主席：（經傳譯員）鄧大律師。

MR DUNCAN：Thank you, Chairman. Just one other matter...

主席：（經傳譯員）對唔住，對唔住，律師。

歐陽先生：（經傳譯員）對唔住，律師，我亦都想再有一點係要澄清一下嘅，你講到嗰個係十秒嘅係超速報告，任何超過十秒就會有報告，呢個十秒係你公司就係設定，定抑或係嗰個製造商設定係十秒嘅呢？

鄭偉波先生：係我哋公司設定嘅。

歐陽先生：（經傳譯員）咁如果你想係改嗰十秒，譬如話改到十五秒、五秒都做到嘅，係咪呀？技術做到嘅，係咪？

鄭偉波先生：我畀鍾生回答呢個問題。

鍾澤文先生：係做到嘅。

歐陽先生：Thank you。

鍾澤文先生：我想解一解即係點解我哋十秒，當時我哋同公會去商討嗰陣時，佢哋有畀到意見我哋嘅。咁因為就佢哋亦都表示佢哋唔係成日睇住嗰個咪錶，同埋當佢哋知道係超速嘅時候，佢哋都要做反應。咁但係揸住架巴士亦都唔可以話好急速咁樣剎車去減低個車速嘅，咁佢都柔順去反應，所以佢哋要有一個時間畀佢哋去調整，咁呢個係當時我哋同公會去商討嘅時間，其中一個考慮點解要用十秒呢個時段嚟去先至記錄佢嗰個超速。

歐陽先生：（經傳譯員）唔該晒，鄧律師。

主席：（經傳譯員）係，法例就係即係喺小巴嗰度就係三秒，係咪呀？法例嗰度係三秒，即係佢超速嗰度，小巴。你知唔知，小巴嗰方面？

鄭偉波先生：我哋係唔知嘅，對唔住。

主席：（經傳譯員）或者鄧律師可以係處理一陣間。鄧律師。

MR DUNCAN：（經傳譯員）唔該你，主席。或者離開黑盒之前，仲有一點嘅，就或者鄭生，我想係睇一睇，喺嗰個新聞發布嗰度，剛才我就係提到 NEC 嗰份新聞稿，公司提出就話佢哋安裝嗰套嘅系統，即係當時安裝嘅系統就可以克服到一啲 GPS 嘅訊號嘅問題，譬如香港高樓大廈、道路又窄，咁可能出現啲問題，咁佢呢個系統克服到呢啲問題，你記唔記得睇過呢一句，喺嗰個發布嗰度？

鄭偉波先生：有睇過。

MR DUNCAN：（經傳譯員）可唔可以同我哋講講究竟呢個係咪有效呢，嗰套嘅系統係咪好有效咁樣嚟到應付到香港呢個咁獨特嘅環境街道狹窄、高樓大廈，咁引致嗰個 GPS 嘅訊號問題，就係唔會出錯咁呢啲問題，咁嗰套系統係咪好有效咁克服到呢個問題呢？

鄭偉波先生：首先，就呢一個新聞發布係 NEC 出嘅，就佢哋講嘅嘢就並不代表係我哋新巴、城巴嘅睇法。至於呢個系統嗰個準確度係有幾高，我覺得就一定唔係百分之一百準確，咁要視乎就所經過嘅路段，佢側邊嗰啲高樓大廈，甚至有冇玻璃幕牆嘅大廈，呢啲都係會有影響到嗰個 GPS 嗰個定位嘅準確性嘅。咁我可以答你就唔係百分之一百準確，但係嗰個準確度我哋覺得都可以接受。

MR DUNCAN：（經傳譯員）咁係咪即係話唔係有咩嘢重大問題，公司唔覺得有一啲重大嘅問題喺呢個系統入面？

鄭偉波先生：現時我哋用緊嗰個系統，我哋睇唔到有重大嘅問題。

MR DUNCAN：（經傳譯員）好，而家講嗰個限速器...

主席：（經傳譯員）鄧律師--鄭生，我相信你其實係有一個地圖就係顯示你哋巴士嘅路線嘅，係咪？係咪有個地圖有巴士路線喺度嘅，係咪呀？

鄭偉波先生：我畀我個同事列生答，因為佢喺呢方面係比較熟悉嘅。

列俊華先生：係，主席，喺我哋呢一個系統，我哋嘅操作介面裏面係可以顯示各巴士路線嘅地圖嘅。

主席：（經傳譯員）可唔可以係畀個地圖，提供畀委員會，等我哋可以睇到晒你哋嗰啲公司嘅路線呢？或者點解我咁講，咁相信有啲人就知道香港道路嘅速限喺邊度，運輸署或者警方佢哋都知嘅。我打算做嘅就係可以將你啲路線同嗰啲速限係比較一下咁解。可唔可以將嗰啲資料提供畀委員會呢，嗰啲路線嗰啲個地圖咁樣？

列俊華先生：當然可以，不過，主席，要視乎你需要嘅數據係喺一個咩情況，因為如果我哋以紙張去提交，可能係未必得到主席所想得到嘅嘢。

主席：（經傳譯員）我希望就係即係你嗰啲路，即係有啲人可以話畀你聽嗰啲路上面嘅速限係幾多咁解。

列俊華先生：好，明白，我哋會提供有關數據。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）好，想你睇睇第 26 頁，CTB-1，第 26 頁係閣下嘅陳述書。

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）嗰個速限嘅裝置，中間嗰度有限速器，當車就去到 70 公里，咁嗰個限速器就會係限制咗個供油量，即使係踩油都好，都係限咗個油，但係車速就喺落山段就可能會超過 70 咁樣。你睇唔睇到呢一段呀？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）好，睇番下一頁。咁呢一版就係有提到一個自動嘅減速系統咁樣嘅，英文就係“ASLS”。咁嗰度講呢，就係話即係如果個車速過咗 70，係落山落斜咁計，咁呢個 ASLS 就會自動咁樣係有一個波箱嘅減速嘅系統，咁就或者係收油，咁等佢個車速係去限到去 70 嘅。如果我個理解係正確嘅話，咁打算就呢個系統係喺新巴市嗰度就會安裝，明年 6 月開始新嚟嘅巴士就會裝，係咪？

鄭偉波先生：呢個我哋工程總監李先生會回答呢一部分嘅。

李廣威先生：係，主席，係正確嘅。

MR DUNCAN：（經傳譯員）咁呢個係咪運輸署規定，還是係公司自己主動咁做？

李廣威先生：呢一個嘅系統係我哋同運輸署喺度嘅 working group 一路傾嘅時候，就係大家都同意喺新車嘅時候，我哋需要要求呢一個規格，咁喺明年 6 月開始運送嘅車就會有。

MR DUNCAN：（經傳譯員）你提到工作小組，咁係咪即係話喺大埔意外，今年 2 月意外之後成立嗰個工作小組呀？

李廣威先生：正確。

MR DUNCAN：（經傳譯員）之前公司有冇考慮過呢個 ASLS 嗰個系統，有冇考慮過呢一個系統，之前？

李廣威先生：之前係冇嘅。

MR DUNCAN：（經傳譯員）咁係邊個嘅諗法嚟㗎，工作小組嗰度嘅諗法，還是係公司嘅諗法，定係運輸署嘅諗法，還是工作小組入面有人提出咁樣嘅做法呢？

李廣威先生：呢個係喺工作小組裏面商討嘅時候，大家覺得歐盟六型嘅車係係可以有咁嘅技術提供到。

MR DUNCAN：（經傳譯員）咁係製造商係提出呢個建議嘅，係咪？定係點樣？

李廣威先生：係工作小組裏面我哋去提出呢個要求，去諮詢巴士個供應商佢哋可唔可以提供到呢一樣嘢，咁佢哋嘅答覆係歐盟六型嘅車係可以。

MR DUNCAN：（經傳譯員）係。邊個召集嗰個工作小組？

李廣威先生：係運輸署。

主席：（經傳譯員）佢哋第一次開會有冇議程出㗎？

李廣威先生：係有嘅。

主席：（經傳譯員）有冇嗰個議程嘅副本喺度呀？

李廣威先生：我哋試下可以提交番。

主席：（經傳譯員）你有，係咪即係話？

李廣威先生：係。

主席：（經傳譯員）其實喺議程上面有冇話即係睇一啲新嘅科技嘅裝置咁樣，有冇呢個議程？

李廣威先生：議程上面係有一啲嘅建議去考慮新嘅裝置嘅。

主席：（經傳譯員）咁呢個其實係運輸署嗰度係提出嘅，係咪？

李廣威先生：冇錯。

主席：（經傳譯員）唔該晒。咁麻煩你就畀嗰個議程我哋參考下，好唔好？

李廣威先生：好。

主席：（經傳譯員）唔該。鄧律師。

MR DUNCAN：（經傳譯員）好嘞，講到嗰個係裝番呢啲咁樣嘅設施喇，呢個問題就係喺你第二份嘅陳述書嗰度係有講嘅，個頁數就係 CTB-1，61 頁。喺 61 頁嗰度你睇到第 8 段嗰個限速器，同埋即係我哋係同呢個供應商講過個技術可行性，同埋成本，就話即係喺呢啲車上面安裝呢啲 ASLS 嘅系統，你睇到呢段嘛？

李廣威先生：睇到。

MR DUNCAN：（經傳譯員）唔該晒，你睇到晒嗰啲細節喺度喇。好，首先，關於個 Dennis 嗰款車，我知道公司有八百七十六部係 E500 MMC 嘅，根據公司就話係可以裝到呢啲設施嘅。公司對於呢一個型號，佢哋嘅講法係點樣，即係佢哋關於呢一個型號安裝嗰個設施？

李廣威先生：對唔住，可唔可以重複個問題？

MR DUNCAN：（經傳譯員）公司係咪建議係呢啲 ASLS 呢個系統，就喺八百七十六部 Alexander Dennis E500 MMC 呢啲巴士係咪諗住喺度裝？

李廣威先生：我哋需要供應商提供畀我哋有詳細嘅資料，後裝嘅可行性嘅詳細嘅資料，同埋因為我哋未曾收到佢哋講後裝嗰個每一部車所牽涉嘅費用，所以我哋需要去考慮。

MR DUNCAN：（經傳譯員）你公司係咪考慮緊呢件事？

鄭偉波先生：未係考慮嘅，因為喺我哋嗰個文件上面亦都講咗，就佢話係可行嘅，即係 ADL(ASLS？)覺得係可行，咁但係就要需要十二個月嘅時間就要發展呢個產品，就所以喺現階段就未能夠提供到嗰個安裝嘅價錢畀我哋。咁喺我哋未知道每部車需要幾多錢嚟到安裝嘅時間，即係現在，我哋就唔能夠答得到就係話考慮定係唔考慮嘅，我哋首先要知道嗰個價錢先至可以考慮嘅，多謝。

MR DUNCAN：（經傳譯員）即係話你喺度等緊佢哋價錢嗰個問題先至去考慮，係咪呀？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）富豪 B9 一一七部係話咗可行嘅，就係講話係需要十八至廿四個月去發展嗰個產品，公司係咪考慮緊？

鄭偉波先生：喺呢一個價錢就嘅情況底下，如果到時佢嗰個產品係做到出嚟，而我哋測試又滿意嘅話，我哋係會安裝嘅。

MR DUNCAN：（經傳譯員）一部咁樣嘅車，B9 嘅巴士，佢會係可以行到幾多年車？

鄭偉波先生：我哋架車係用十七年或者十七年幾左右。

MR DUNCAN：（經傳譯員）唔該。

鄭偉波先生：當然我要補充少少，而家我哋講緊呢一百一十七部 B9 嘅車，佢已經係大約係三歲，咁即係話我哋再可以用多十四年左右，多謝。

MR DUNCAN：（經傳譯員）關於呢個車速限制器我想問多個問題，然後我哋大家先至有早上嘅小休。想請你睇呢個 TD-1，94 頁。TD-1，94 頁。

鄭偉波先生：我係見到嘅。

MR DUNCAN：（經傳譯員）唔該。我唔知道你有冇睇過呢份文件，鄭先生，或者我解釋一下。

鄭偉波先生：多謝。

MR DUNCAN：（經傳譯員）呢個就係委員會喺運輸署嗰方面收到嘅呢一份意見書，嗰個標題就係話喺專營巴士嗰度應用一啲係科技嘅發展。呢份文件就係話畀我哋聽究竟係咪可行，亦都係咪可取嘅，即係話究竟係咪可以用一啲新嘅裝置或者新嘅科技喺嗰個專營巴士嗰度。呢份文件你之前有冇睇過？

鄭偉波先生：對唔住，我哋係冇睇過嘅。

MR DUNCAN：（經傳譯員）好，如果咁因為我諗主席都係諗住係有朝早嘅小休，我不如係請你睇呢個係 101 頁。請你係閱讀(c)嗰個部分，個標題就係話用全球定位系統或者係地理圍欄去控制嗰個車速，喺呢個標題底下嘅文字可唔可以麻煩你等陣間小休嘅時候睇一睇呢，即係讀一讀呢個第 19 同埋第 20 呢兩段呢，可以嘛？

鄭偉波先生：可唔可以出埋第 20 段畀我睇到？嗰兩頁喎，哦，咁樣第 19 段我又睇唔晒。可唔可以印一張畀我哋？

主席：（經傳譯員）係，可以畀份實物你嘅，咁樣你係知道嗰個上文下理。

鄭偉波先生：多謝，主席。

MR DUNCAN：（經傳譯員）目前一部巴士佢如果係行緊 60 公里，不過佢嗰個地段就嗰個車速限制係 50 嘅，呢度就係講話點樣樣可以處理到呢個情況，因為係而家巴士上面嘅裝置就處理唔到呢個問題，所以我哋請你等陣間自己睇一睇第 19 同埋第 20 呢兩段嘅文字，呢個就係佢哋嘅意見書嘅第 101 同埋 102 頁呢兩頁嘅。

鄭偉波先生：好，我哋會睇嘅。

MR DUNCAN：（經傳譯員）唔該晒。

主席：（經傳譯員）好，我哋而家就係小休二十分鐘，唔該。

上午 11 時 37 分聆訊押後

上午 11 時 59 分恢復聆訊

出席人士如前。

MR DUNCAN：係，唔該你，主席。鄭生，正話有冇機會係睇過嗰段文字？

鄭偉波先生：有睇咗。

MR DUNCAN：（經傳譯員）好喇，呢個係用 GPS 同埋呢個地理圍欄嚟到控制車速，咁喺工作小組有冇討論過呢個問題呢？

鄭偉波先生：我畀我同事鍾生嚟到發言吖。

鍾澤文先生：係有嘅。

MR DUNCAN：（經傳譯員）首先，呢類系統如果要做嘅話，就首先要有一個電子地圖，係嘛？

鍾澤文先生：冇錯。

MR DUNCAN：（經傳譯員）製造商就話對於嗰個 GPS 嘅信息嘅準確性就係話有啲係關心，因為香港好多高樓大廈，睇唔睇到？

鍾澤文先生：睇到。

MR DUNCAN：（經傳譯員）我想問，呢一方面嘅考慮係咪就已經唔再考慮，定抑或係會有人係睇下究竟 GPS 呢樣嘢係咪真係要--即係真係做唔到，定抑或係會考慮下 GPS 嗰個問題係咪可以克服到咁呢？

鍾澤文先生：我哋嗰個睇法就係我哋都知道呢一個系統喺坊間都會有嘅，咁但係我哋喺過往做呢個黑盒嗰陣時，嗰個 GPS 嘅準確度確實都係令我哋有個關注嘅，咁所以我哋而家係認為需要係將我哋搵一啲供應商係攞一啲咁樣嘅儀器返嚟，做一啲測試，去確認佢嗰個功能同埋佢嗰個準確性先。咁呢個我哋唔係話而家就話唔做嘅。

MR DUNCAN：（經傳譯員）可唔可以咁講，你哋仲係積極考慮中？

鍾澤文先生：可以咁講。

MR DUNCAN：（經傳譯員）咁邊個負責考慮？係你哋公司吖，其他所有巴士公司都考慮中吖，定抑或點？

鍾澤文先生：喺嗰個工作小組裏面討論，我哋話我哋公司都會考慮嘅，其他公司亦都話會考慮。

MR DUNCAN：（經傳譯員）好。我而家就係唔係呢個車速限制器喇，就講另一個裝置喇，呢一個就係電子穩定控制系統，你可以睇番 CTB-1 第 26 頁。

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）喺第 26 頁嘅下面嗰度係有提及話你哋公司就計劃係包括以下嘅系統嘅，就係一個電子穩定控制系統喇，就係話會由 2019 年 6 月之後所收嘅新巴士就話會有一個咁嘅系統嘅，咁喺 27 頁嗰度我哋就睇到喇，你哋就描述咗兩個方面，即係話嗰個機制有邊兩方面嘅特色，一個就係動態穩定控制，另一個就係防止翻車嘅特色嘅。我想問，呢個係咪都係因應嗰個工作小組開會同埋討論之後你哋先有咁嘅決定嘅呢？

鄭偉波先生：我同事李生會回答。

李廣威先生：係，主席，冇錯嘅。

MR DUNCAN：（經傳譯員）換句話講，喺嗰個工作小組成立之前，你哋係冇考慮過呢啲事㗎，係嘛？啱唔啱？

李廣威先生：係，冇錯嘅。

MR DUNCAN：（經傳譯員）呢度個建議就係話係喺新巴士嗰度安裝，係指嗰啲喺 2019 年 6 月之後係畀你哋嘅車，有冇諗過話對現有嘅巴士都加裝番呢一啲系統，有冇考慮過？

李廣威先生：我哋而家係要求緊我哋嘅巴士供應商去檢視我哋嘅車係咪可以加裝呢啲嘅系統，喺技術上面係咪可行，同埋有冇一個嘅財政上面嗰個嘅需要，即係話加裝係需要幾多錢。咁我哋而家係等緊供應商嘅答覆。

MR DUNCAN：（經傳譯員）係咪書面咁作出一個咁嘅要求，向巴士供應商作出咁樣嘅書面要求？

李廣威先生：係，冇錯嘅。

MR DUNCAN：（經傳譯員）可否係畀一啲咁樣樣嘅書面往來嘅紀錄畀我哋睇睇，畀啲樣本我哋睇？

李廣威先生：主席，我哋會返去再搵番啲紀錄。

鄭偉波先生：對唔住，主席，我諗李生未必肯定係唔係有書信來往㗎，我哋係要返去要 check 下係唔係有書信來往。

主席：（經傳譯員）係，好吖，請你係喺適當嘅時候書面話畀我哋聽，係咪如果有，同埋有嘅話係咪願意畀一個副本畀我哋。

MR DUNCAN：（經傳譯員）唔該晒。好，而家講其他嘅裝置喇，TD-1，103，請你睇番嗰一頁吖。

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）鄭生，呢個亦都係剛才我請你喺小休嘅時候請你睇嘅嗰份文件嘅其中一個部分嘅，呢個就係運輸署嘅文件，就話就係專營巴士嗰度可以應用一啲乜嘢新嘅裝置或者新嘅技術㗎。103 頁第 23 段一路落到去第 26 段，呢度就係有提及呢一種嘅裝置，就係避免碰撞同埋係保持喺嗰個行車線嗰度。我想請你自己睇一睇，讓你係熟悉第 23 至到 26 段嗰個內容。

鄭偉波先生：呢個問題會係由我哋同事鍾生答，佢已經睇咗㗎喇。

MR DUNCAN：（經傳譯員）唔該晒。鍾先生，如果咁嘅話，我就想請你睇呢個第 26 段喇，呢度就話巴士公司唔認為裝置呢啲防碰撞同埋保持行車線係會提升嗰個巴士服務嘅，我諗其實就喺第 26 段前啲嗰度你就睇到佢哋講嗰個原因㗎，係咪咁？

鍾澤文先生：係，冇錯。

MR DUNCAN：（經傳譯員）係咪你哋公司嚟講，你哋都唔打算去跟進係裝置呢一種咁樣樣嘅設備呢，即係你哋都唔會再跟進，唔會做呢樣嘢㗎喇，係嘛？

鍾澤文先生：我想先先解釋一下關於呢一種裝置，咁我哋公司喺 2014 年都曾經做過一個測試係呢一啲咁樣嘅裝置嘅，咁呢一個裝置係叫做「神眼」，英文係叫做“Mobileye”，咁呢個神眼係一個駕駛輔助嘅系統，當時係主要係應用喺私家車上面嘅，佢係利用視像嘅科技去偵測前方嘅影像，再由系統進行分析同埋計算前後車之間嘅距離同埋相撞嘅時間，從而係對嗰個司機係發出一啲警示嘅。當時我哋喺三架巴士上面就裝咗呢個神眼進行測試，就為期四個月。咁我哋安排咗唔同工會嘅代表，即係司機代表喇，同埋有五十幾個車長去揸呢三架車，係如常咁樣工作。咁之後佢哋係要做番一份問卷畀我哋，就係佢哋對呢一個神眼嘅意見嘅。

咁喺結果顯示，有部分嘅警示就唔係咁適合喺巴士裏面使用嘅，例如架車係駛入個巴士彎個站嗰陣時，嗰個警示器因為偵測到前面有人，因為喺巴士站裏面好多人企喺度等車嘅，咁偵測到人，佢就即刻發出呢個聲響嘅，咁但係當時架巴士係轉緊入個彎度，個司機係未將架巴士拉番直，咁就出現咗呢啲咁樣嘅響聲。

咁亦都有就係停車嗰陣時係太近距離，同前車太近距離，喺慢車嗰陣時亦都會出現一啲咁樣嘅警示。咁因為咁樣，就喺嗰個車程裏面都出現咗好多次嘅呢啲警示，有 46%嘅司機佢哋喺佢問卷就認為太多嘅警示，對佢哋嘅駕駛造成滋擾，甚至乎佢因為咁樣佢係唔理呢啲警示。咁 50%嘅司機認為呢一個神眼對佢哋嘅駕駛嘅安全係冇幫助。咁喺考慮過神眼呢啲功能之後，同埋我哋車長嘅意見，亦都考慮要裝呢個神眼嗰個費用亦都幾大嘅，咁當時我哋就即係決定唔繼續去搞呢一樣嘢喇。咁呢個就係我哋嘅經驗嚟嘅，咁喺嗰個會議裏面我哋亦都分享咗我哋呢個經驗。多謝，主席。

MR DUNCAN：（經傳譯員）你哋係喺 2014 年嘅時候進行㗎，係自己係提出呢一個主意吖，定抑或係應呢個運輸署嘅要求去做呢個測試嘅呢？

鍾澤文先生：當時係我哋自己主動嘅，因為呢一間公司就佢哋嚟我哋嗰度就係提出有個咁樣嘅安全嘅系統可以幫助到我哋去減低交通意外嘅，咁所以我哋就自己進行咗一個測試。

MR DUNCAN：（經傳譯員）你意思係咪嗰三家巴士供應商嘅其中一間吖，定抑或係另外一個獨立嘅呢種儀器嘅供應商？

鍾澤文先生：係一個獨立嘅儀器供應商嚟㗎。

主席：（經傳譯員）係邊間公司？

鍾澤文先生：係一間以色列嘅公司嚟嘅，個公司喇叫做“Neshtech Pty Limited”，咁佢係喺香港嘅代理嘅。

MR DUNCAN：（經傳譯員）唔該晒。好喇，亦都係運輸署嗰份文件 105 頁...

主席：（經傳譯員）等等先，鄧生。嗰個測試呢個儀器嗰個結果有冇一啲的文件喺度㗎？可唔可以係有機會等你作出決定咁樣㗎？

鍾澤文先生：我哋係有一個報告，即係測試後嘅報告嘅。

主席：（經傳譯員）咁可唔可以向委員會係提供一份副本，有關嗰啲重點，點解係覺得唔係好有用咁樣呢？

鍾澤文先生：可以嘅。

主席：（經傳譯員）咁如果係可以嘅話，係好感激你。鄧律師。

MR DUNCAN：（經傳譯員）好喇，105 頁，講到另一個嘅安全嘅裝置，咁呢個就係司機監察嘅裝置，或者你係--請你睇一睇第 27 段同埋 28 段嘅內容，係請你睇一睇，唔該。

鄭偉波先生：呢個問題係我同事李生會答，佢睇完咗份文件喇。

MR DUNCAN：（經傳譯員）唔該晒。或者想問一問，公司，城巴、新巴係咪話會安

裝呢一類咁樣嘅設施，咁就即係試辦三個月，咁就應該係今年 5 月開始，係咪咁樣？

李廣威先生：唔係嘅。

MR DUNCAN：（經傳譯員）咁係冇作出任何承諾嘅，係咪？即係公司冇作出承諾，就話係裝呢啲設置，係咪呀？

李廣威先生：對，公司冇作出任何承諾。

MR DUNCAN：（經傳譯員）係，咁係咪決定唔裝喇？

李廣威先生：唔係嘅，我哋會--我哋都同唔同嘅供應商同埋--我哋都問緊三間巴士供應商，亦都同唔同嘅供應商聯絡緊，係攞緊一啲資料嘅。

MR DUNCAN：（經傳譯員）好喇，我想請你留意一下你嘅陳述書第 62 頁，CTB-1，62 嘅。好喇，第 9 段嗰度，你就係列出咗有關嘅供應商，咁你亦都係見過㗎喇，咁呢個就係關於睇下可唔可以安裝呢類咁嘅設施嘅，係咪？

李廣威先生：冇錯。

MR DUNCAN：（經傳譯員）目前嗰個情況係點樣呀？即係關於呢個研究。

李廣威先生：最新嘅進展就係 Consolidated Parts，即係呢個大聯合零件銷售中心有限公司，佢哋曾經嚟做過產品嘅示範，但係嗰個錄影嘅程序就係未曾完善嘅，咁佢哋將會喺 6 月份會再嚟再做一次嘅錄影程序嘅示範。第二間，Guardian，佢哋話會提供一個嘅建議，係租借十套嘅設備同埋畀我哋有報價，咁我哋最近係收咗個報價，而家正在考慮當中。第三間，比亞迪有限公司，咁佢哋係未曾有一個產品畀我哋嘅，咁佢亦都係將會係有一個產品畀我哋去測試。另外，除咗呢三間之外，我哋亦都會搵--繼續去睇下有冇其他嘅產品可以供應到。

MR DUNCAN：（經傳譯員）我想請大家睇一睇呢個明報嗰個嘅網頁，咁嗰度有一篇文章就係同呢個係相關嘅。呢個文件當中冇㗎，主席。咁而家喺螢幕嗰度係打咗出嚟㗎喇，係有翻譯。或者想請大家睇一睇呢個係 5 月 27 號嘅一篇文章，或者請大家睇一睇先，好唔好？

鄭偉波先生：我哋係睇咗㗎。

MR DUNCAN：（經傳譯員）以前睇過㗎喇？

鍾澤文先生：琴日你哋畀咗我哋睇。

MR DUNCAN：（經傳譯員）係，咁喺呢篇文章就係關於一啲嘅監察裝置，監察嘅司機嘅，咁佢係港珠澳大橋嗰度行駛嘅一啲司機嘅監察咁樣嘅，你知道㗎？

鍾澤文先生：知道。

MR DUNCAN：（經傳譯員）咁你睇呢篇文章之前知唔知道呢件事㗎？

鍾澤文先生：之前我喺新聞睇過。

MR DUNCAN：（經傳譯員）係，有冇計劃就係探討一下呢套制度，喺國內即係研發嘅一套咁嘅制度係咪可以喺公司提供？

鄭偉波先生：我哋睇下可唔可以聯絡到呢個港珠澳大橋穿梭巴士公司，去問佢哋攞多啲關於佢哋啲監察系統嘅資料。

MR DUNCAN：（經傳譯員）你可唔可以向委員會係講講，咁幾時係會作出決定係關於裝唔裝呢類設備呢？幾時可以即係作出到決定，講唔講到？

鄭偉波先生：我哋而家係未聯絡到嗰個港珠澳嗰個營運嘅公司，咁而嗰個裝置嘅具體運作我哋係唔清楚嘅，而牽涉嘅成本係幾多，我哋亦都係未知道，所以喺現階段，我哋答唔到係幾時可以做到決定，我哋要有足夠嘅資訊我哋先至可以做到考慮，做咗考慮之後先至可以做決定嘅，多謝。

MR DUNCAN：（經傳譯員）公司係幾時開始係考慮用呢類咁樣嘅設施㗎，幾時？

鄭偉波先生：我哋係未開始考慮嘅，因為我哋未有資料㗎。

MR DUNCAN：（經傳譯員）係，咁但係你會係接觸不同嘅供應商㗎嘛，咁你幾時開始同佢哋接觸㗎？

鄭偉波先生：對唔住，我想知道你而家問緊嘅係同港珠澳有關嗰啲設施，定係邊一部分？

MR DUNCAN：（經傳譯員）喺最早嗰間公司，即係你喺陳述書嗰度講咗幾間公司，最早嗰啲公司係幾時開始接觸㗎？

鄭偉波先生：呢個李生會答。

李廣威先生：係大約今年嘅 4 月嘅。

MR DUNCAN：（經傳譯員）好喇，咁呢個係咪其實喺工作小組傾完之後，你先開始咁做㗎？

李廣威先生：係，冇錯。

MR DUNCAN：（經傳譯員）咁工作小組之前係冇考慮過，係咪呀？

李廣威先生：係冇嘅。

MR DUNCAN：（經傳譯員）好喇，而家講另一項嘅安全嘅問題，TD-1...

主席：（經傳譯員）等等，鄧律師，我哋--第 63 頁，你第二份嘅陳述書嗰度，CTB-1，63，咁有講到就話 Guardian，澳洲嘅製造商，於提到就話星加坡嘅

土地運輸局佢哋就話喺新嘅巴士嗰度就會有呢啲咁樣嘅裝置嘅，你其實有冇接觸過星加坡嗰個當局係關於呢方面嘅資料？

李廣威先生：呢方面嘅資料其實我哋係經 Guardian 話畀我哋聽嘅，我哋冇接觸過 LTA。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）係，想請大家睇睇 TD-1，195 頁，TD-1，195 嘅。

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）你應該係睇到，鄭生？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）呢個就係嗰個即係長遠計劃，即係呢個城巴嗰個嘅長遠發展計劃係提供畀委員會，咁喺呢一個遠期計劃嗰度係有第 4 項係講到安全嘅，你睇到嘛？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）我想請你睇 202 頁，文件嘅 202 頁。

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）唔該，5.13 嗰度，安裝安全帶嘅可行性同埋即係所有座位，同埋係上層嘅所有嘅座位，咁呢個係(b）嗰度喇。你睇到？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）或者好快咁讀一讀喇，「其實就安裝喺所有座位同埋喺上層座位安裝安全帶係可行嘅，但係我哋嘅觀察就係話好少人係會纜安全帶嘅，而家喺一啲即係比較空曠嘅位置，咁如果冇法例嚟到規定喺專利巴士上面係戴安全帶同埋執法當局係嚴格咁執行法律，喺所有座位安裝安全帶就係浪費資源嘅，因為大多數嘅乘客根本都唔會係纜呢個安全帶，即使有都唔纜嘅」，咁呢一個其實係之後喺嗰個遠期--城巴遠期嘅計劃嗰度係你有咁嘅說話喇。咁其實你可唔可以睇一睇 TD-1，95 頁？同一份--同一套文件夾㗎喇，嗰個標題就係講「為所有嘅乘客嘅座椅係安裝安全帶」嘅，睇唔睇到嗰一段？

鄭偉波先生：睇唔--係邊一段？第幾段，請問？

MR DUNCAN：（經傳譯員）TD/95，係 95，唔係 195。係 TD/95，對唔住。

鄭偉波先生：睇到嘅。我同事睇緊。

MR DUNCAN：（經傳譯員）係 TD-08 號嘅文件嘅，第 95 頁，第 5 至到第 9 段。

主席：（經傳譯員）唔該。

鄭偉波先生：有，有。

MR DUNCAN：（經傳譯員）想問你呢個問題喇，喺工作小組裏面有冇傾過呢件事？

李廣威先生：係有嘅。

MR DUNCAN：（經傳譯員）想你特別睇睇呢個第 7 段。想問下，你哋公司係咪顯示話已經同意咗嗰個要求，就話所有新嘅巴士都要為所有嘅乘客座椅係安裝呢一個安全帶，係咪你哋同意咗？

李廣威先生：係，我哋公司同意咗由 2019 年 6 月開始付運嘅車係會有安全帶嘅，三點式安全帶。

MR DUNCAN：（經傳譯員）講到話事後補裝，即係現有嘅巴士再加裝番呢啲安全帶，唔知道你有冇睇到第 8 段，呢份文件嘅第 8 段，唔知你睇咗未呢？

主席：（經傳譯員）未講番加裝之前，我自己就想問一個問題喇，你哋較早嘅時候答過，就話如果係裝呢個安全帶就係浪費資源，因為大部分嘅乘客都唔會纜安全帶嘅，咁而且亦都要靠有人去執法先至得㗎。你而家就話你同意係將呢個要求加落去，咁如果冇人去執法嘅話，又會唔會係浪費資源呢？你喺呢一度嘅睇法又點呢？

鄭偉波先生：如果法例冇規定嘅話就冇得執法喇，因為現時就冇規定坐巴士要纜安全帶嘅，就算法例有規定，如果到時冇執法嘅話，咁呢個都係浪費資源嘅，我哋仍然係呢個睇法。

主席：（經傳譯員）咁你有咁嘅睇法，你有冇同運輸署講？

鄭偉波先生：有㗎，我哋同事有同運輸署講過嘅。

主席：（經傳譯員）咁運輸署有冇回應？係咩嘢回應？

鄭偉波先生：我同事鍾生，當時係佢負責，佢會答一答，係。

主席：（經傳譯員）唔該。

鍾澤文先生：主席，當時運輸署就話裝咗喺度就畀個乘客自己去選擇嘅，佢纜唔纜，即係如果佢係擔心自己嘅安全嘅，佢就有得纜，但係如果我哋係冇嘅話，佢擔心都冇得纜，呢個就係佢哋嘅 response。

主席：（經傳譯員）好，唔該你。

MR DUNCAN：（經傳譯員）你有冇同運輸署講過，就話佢哋都打算係引入相關嘅法例要求？

鍾澤文先生：我哋有同運輸署提過，就話如果佢唔立法，根本條安全帶就可能係真係

浪費咗嘅，咁但係運輸署冇應承話一定會立法。

MR DUNCAN：（經傳譯員）想麻煩你睇番 TD-2 第 58 頁，TD-2 嘅 58 頁。呢度就係《公共巴士服務條例》其中嘅一個部分，特別就係第 36 條，有關嗰個條例嘅第 36 條，睇到嘛？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）有關呢個條文，鄭先生你熟唔熟悉佢個內容㗎？

鄭偉波先生：我係唔熟悉嘅。

MR DUNCAN：（經傳譯員）係咪第一次睇到呢個條文？

鄭偉波先生：係第一次。

主席：（經傳譯員）咁你慢慢，畀少少時間自己去睇清楚呢個內容，咁先至答到陣間嘅問題嘅。

鄭偉波先生：初步睇咗。

MR DUNCAN：（經傳譯員）根據嗰個專營權協議同埋呢個條文就可以係制訂附例嘅，睇唔睇到？

鄭偉波先生：剛剛睇到。

MR DUNCAN：（經傳譯員）公司有冇諗過就係制訂呢啲附例呢？即係根據呢條嘅條文去制訂附例呢？

鄭偉波先生：因為我哋對於制訂附例所關乎嘅法例，我係唔識嘅，咁所以我哋係今日喺度就答唔到話我哋會不會制訂附例，因為我哋係冇接觸過呢個範疇嘅，多謝。

MR DUNCAN：（經傳譯員）你以巴士上面嘅巴士乘客嘅行為，係咪有陣時你哋公司都係關注，都係擔心嘅呢？

鄭偉波先生：你係指邊一方面？

MR DUNCAN：（經傳譯員）譬如話佢哋有陣時鬧啲巴士車長喇，係咪時不時有咁嘅事發生？

鄭偉波先生：係有發生過嘅。

MR DUNCAN：（經傳譯員）你認唔認為如果你有自己嘅附例，就自己可以執法嘅話，咁樣係可以更好咁樣，更有效咁處理呢啲場面，同唔同意？

鄭偉波先生：我係唔認識呢啲附例嘅嘢，同埋剛剛你講過，話如果有附例就我哋自己可以執法，但係我唔清楚係點樣執法喎，因為我哋個車長佢唔識得執法喎，同

埋如果由個車長去執法，就更加會同個乘客就產生更加大嘅衝突，一架車裏面淨係有一個車長，一個人㗎咋喎，其他全部乘客嚟㗎。

MR DUNCAN：（經傳譯員）你哋係咪有稽查㗎？

鄭偉波先生：我哋係有稽查，但係我哋就不會係每部車上面有個稽查㗎，稽查係負責去監察我哋車長嘅工作，同埋喺巴士總站嗰度工作嘅。

MR DUNCAN：（經傳譯員）你知唔知道其實地鐵有自己嘅附例嘅，你知唔知㗎？

鄭偉波先生：我有聽過，但係詳細係點樣，我係唔清楚㗎。

MR DUNCAN：（經傳譯員）如果所有嘅巴士都有安全帶，又如果乘客拒絕纜安全帶，你認唔認為你哋公司自己制訂嘅附例可以幫到手去執行呢一個咁嘅要求？

鄭偉波先生：我相信我哋嘅車長冇能力去執行，因為如果個乘客堅持唔戴安全帶，首先，佢係坐喺樓上嘅，我個車長唔可能係睇得到每一個乘客有冇戴安全帶，就算睇到，就要停低架車，跟住個車長就要熄咗架車。因為一架公共巴士如果著咗車，唔可以冇車長喺個駕駛位嘅。要熄咗部車，跟住就行上去樓上，就搵番冇戴安全帶嗰位乘客，咁就叫佢戴安全帶，咁假若嗰個乘客拒絕戴安全帶，咁就當場就會同我哋嘅車長就發生爭執㗎喇，咁呢個又影響到我哋個服務，同埋即係可能會車長同個乘客打交都唔定㗎，所以我唔覺得我哋嘅車長可以執法。多謝。

MR DUNCAN：（經傳譯員）稽查，你講到稽查就只係去監察嗰個巴士嘅駕駛，我想問喇，你哋係有幾多個稽查就係受你哋僱用，又履行呢一方面咁嘅職責嘅呢？

鄭偉波先生：首先就我想 correct 一個 fact 先，就稽查並不是只係去監察巴士車長嘅駕駛，監察駕駛係佢一部分嘅職能，稽查係負責管理，係我哋嘅前線管理我哋個巴士嘅運作嘅。至於我哋有幾多個稽查，係做啲乜嘢嘅工作，我交畀我同事鍾生回答。

鍾澤文先生：係，多謝，主席。我哋有百幾個呢啲所謂 inspector 嘅稽查，咁但係佢哋嘅工作係有唔同嘅，例如有一啲佢哋係會喺個控制中心嗰度負責調配，有一部分會喺街上面做巡邏，或者喺總站嗰度係協助一啲乘客嘅秩序。咁相比我哋有千幾架車喺街嗰度行緊嘅話，啲稽查係唔可能即時可以去到發生事故嘅巴士裏面係提供協助畀啲車長。呢個同譬如話港鐵有附例有好大嘅分別，因為喺港鐵嘅車站都有相當數量嘅職員可以提供協助，如果係港鐵喺架車上發生事故嘅話，佢哋嘅司機係會揸番架車去到個站度，係尋求個站務員幫佢協助嘅，咁如但係我哋嘅車長如果發生事故，頭先都講，已經停咗架車，佢唔可以就走番去架車嗰度揸架車去搵個督察，或者如果係咁嘅情況喇，已經係有個爭執喺度嘅話，就做唔到嘅，咁呢個就有個分別喺度。多謝，主席。

MR DUNCAN：（經傳譯員）好喇，我哋返番去運輸署嗰份文件，96 頁第 7 段，就係關於安全帶嘅，新巴士嘅安全帶。第 8 段講到加裝安全帶，即係現時巴士上面

加裝安全帶呢個問題係有提出嘅，咁最後嗰部分就係提到，就話專利巴士公司係會進一步咁研究呢一項嘅建議咁樣，咁而家公司係咪諗緊呢樣嘢，係咪研究緊？

鄭偉波先生：我同事李生會答。

李廣威先生：我哋公司係諮詢緊我哋嘅巴士供應商，對於一啲嘅舊車係可唔可以加裝安全帶嘅。初步嘅回覆係 ADL 嘅車係 2013 年之後--2013 年或之後嘅車嘅上層係可行嘅，但係需要加裝好多嘅結構上面嘅鞏固，同埋需要將所有嘅凳係更換，因為現時嘅凳係唔可以再用。咁嗰個初步估計，估算嗰個價錢係每一架車可能係需要 15,200 磅至到 20,000 磅一架車。我哋估計我哋嘅車隊入面大概有一千一百架車係呢一類型，如果真係要加裝嘅，嗰個價錢係會可能去到一億八千萬至到二億四千萬。呢一個係好巨大嘅數目，係會造成好大嘅浪費。

MR DUNCAN：（經傳譯員）浪費係因為啲乘客唔纜安全帶，係咪呀？

李廣威先生：：冇錯，因為我哋都留意到乘客而家--其實我哋而家嘅車嘅無遮擋座位都係已經有三點式安全帶，但係我哋留意到乘客係冇用呢啲嘅安全帶嘅。

MR DUNCAN：（經傳譯員）公司喺過去有冇一啲嘅補貼，係即係政府當局畀任何補貼㗎？

李廣威先生：喺過往政府只係補貼過--即係由環保署係補貼我哋係安裝一啲嘅減排裝置，亦都係曾經出資係買過幾架嘅混能嘅電車--混能車去試驗，有三架。另外亦都係有提供有十架單層嘅電動巴士係畀我哋作測試嘅。係，多謝，主席。

MR DUNCAN：（經傳譯員）：我哋睇到呢啲咁嘅措施，就安全措施嘅設施喇或者係改善安全嘅措施喇咁，但係呢啲其實就係喺工作小組成立咗之後先提出嘅，咁喺考慮嘅過程當中，公司係咪有冇諗過同政府講，就話睇下可唔可以有一啲嘅補貼畀公司，等你哋可以係照顧到部分嘅成本，咁等你哋可以提升嗰個安全？

鄭偉波先生：我哋係未同政府講嘅，但係如果政府係願意補貼我哋提升--令到我哋可以更加提升安全，我哋係非常歡迎嘅。

MR DUNCAN：（經傳譯員）點解你唔同政府講一講，點解？

鄭偉波先生：我哋唔知道可以咁樣問政府攞津貼㗎。

MR DUNCAN：（經傳譯員）好喇，我想問多幾個問題添，就係關於嗰個紀律處分嘅程序，咁其實都係有提過㗎喇，或者想請大家睇一睇 39 頁，CTB-1 嘅 39 頁，CTB-1，39。

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）我哋睇到底下嗰度，(b）嗰度就係背景檢查同埋係定罪嘅刑罰咁樣，咁其實就係服務質素嘅部門就係負責嗰個紀律處分嘅，即係有違

規行為，咁呢個係根據嗰個車長嘅手冊嚟到做，仲有，委員會就係收到一啲嘅資料，就係關於嗰個紀律處分嘅程序咁樣嘅。好喇，講到個車長嘅手冊，咁或者而家等我打一打出嚟，CTB-2，就係 85 頁嘅。

主席：（經傳譯員）鄧律師，係幾時㗎？

MR DUNCAN：（經傳譯員）係 2018 嘅。咁車長手冊嗰度係有一啲嘅節錄，第 85 頁，翻譯就係 169-1。或者想大家睇一睇嗰個目錄喇，就應該係第 87 頁嘅，喺翻譯個版本嗰度 169-3。你係咪睇到個目錄嗰一版，睇唔睇到？你同唔同...

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）你同唔同意就係呢個係好詳盡，有好多細節嘅文件嚟嘅，同唔同意？

鄭偉波先生：同意。

MR DUNCAN：（經傳譯員）英文嘅版本，即係兩個版本喇，有七個唔同嘅章節嘅，咁就當中係包括不同嘅段落喇，每一章都係有不同嘅段落咁樣。好喇，其實公司係採取咗乜嘢嘅步驟去確保車長係熟習所有呢個手冊當中嘅條文嘅呢？

鄭偉波先生：我同事鍾生會答嘅。

鍾澤文先生：喺呢本車長手冊裏面所講嘅嘢，其實我哋喺--有大部分喺佢哋入職嗰個訓練嗰度係已經講過畀佢哋聽，咁亦都有一部分係喺嗰個重溫課程裏面亦都會喺--再講解嘅。咁呢一本手冊就係方便佢哋上完呢啲課程之後再去詳細睇番嘅，或者佢如果係真係唔記得嘅，佢可以睇番。多謝。

MR DUNCAN：（經傳譯員）好喇，答番主席喇，呢個手冊就係今年 4 月嘅，個日期係。咁之前嗰個版本係幾時出㗎？

鍾澤文先生：上一個版本係 2017 年嘅 7 月。

MR DUNCAN：（經傳譯員）咁呢個手冊係咪不時咁樣檢討㗎？

鍾澤文先生：係，冇錯。

MR DUNCAN：（經傳譯員）幾耐檢討一次？

鍾澤文先生：呢個都唔係一個定期嘅，咁就要睇下我哋喺嗰段時間有幾多嘢有改動或者需要加番落去。

MR DUNCAN：（經傳譯員）可唔可以同委員會講一講，有幾多車長係曾經係受過紀律處分，即係譬如過去嗰十二個月，有幾多位車長係遭受到紀律處分嘅呢？

鄭偉波先生：因為今次我哋嚟，就以為主要就係講交通安全呢一部分嘅，即係駕駛安全，所以我哋冇準備到資料就係整體紀律處分嘅數字，呢個我哋可以後補番畀

委員會。

主席：（經傳譯員）係，請你之後補番，唔該。

MR DUNCAN：（經傳譯員）主席先生，而家會唔會係一個適當嘅時間係小休？

主席：（經傳譯員）係，係，啱。我哋而家就係休息，就會係下晝兩點半再繼續㗎，唔該晒。

下午 1 時 01 分聆訊押後

下午 2 時 30 分恢復聆訊

出席人士如前。

主席：（經傳譯員）各位，午安。鄧律師。

MR DUNCAN：（經傳譯員）唔該主席。鄭先生，有幾條問題係想問一問你嘅，呢個就係關乎 2018 年嘅指引，呢個就係巴士車長工作、休息及用膳時間嘅指引，2018 嘅版本。有關嘅指引，CTB-2 嘅第 2 頁嗰度就會見到嘅。至於話之前嘅版本，你就會係--如果想睇番嘅話，可以喺 TD-5，喺 1556 頁嗰度見到。或者為求今日係問題嘅時候比較係容易理解，我而家就分發咗個比較表，係將不同嘅指引，將佢進行一個比較，因為啲指引就係有改變嘅，喺 04 年至到 2018 年之間呢啲指引係有個變動嘅，或者咁，我想請你係睇一睇我呢一個表，嗰份文件嗰個標題就係嗰份指引嘅比較表，嗰個日期就係 2018 年嘅 5 月 4 號，你面前係咪已經有呢份文件呀？

鄭偉波先生：有。

MR DUNCAN：（經傳譯員）唔該晒。首先，我想講番一啲比較重要嘅變動嘅，呢啲係今年嘅指引，同以前 2010 年所通過嘅指引之間嘅不同之處，你跟到我所講嘅說話嘛？

鄭偉波先生：跟到。

MR DUNCAN：（經傳譯員）唔該晒。首先喺呢個表嗰度想請你係睇第 3 項，即係話嗰個係總嘅或者最高嘅駕駛時間，見到嘛？

鄭偉波先生：見到。

MR DUNCAN：（經傳譯員）嗰個變動，如果以呢一個係最長嘅係駕駛時間嚟到計，新嘅指引就咁嘅，喺一更裏面係十個鐘，之前喺 2010 年嗰個指引係講喺一個工

作日裏面十一個鐘，首先見唔見到佢兩者不同之處呀？

鄭偉波先生：我見到個指引唔同嘅。

MR DUNCAN：（經傳譯員）呢個腳唔腳合你自己所理解嘅變動呢？

鄭偉波先生：呢一部分我請鍾先生負責回答。

鍾澤文先生：係腳合嘅。

MR DUNCAN：（經傳譯員）唔該晒。第二點想請你睇嘅就係嗰個最長嘅更次時間，呢個就正正喺剛才所講嗰項嘅上面，你睇唔睇到嗰度嘅變動呀？個變動就係 2018 年最長嘅更次時間就一更裏面係十二個鐘，對比起一個工作天裏面係十四小時，呢個係咪亦都腳合你嘅理解呢，鍾先生？

鍾澤文先生：腳合嘅。

MR DUNCAN：（經傳譯員）我哋揭去後面嗰版，你會見到最長嘅更次同埋呢一個駕駛時間由於係有一個所謂嘅特別更次，所以就有啲變動，喺第 2 頁嗰度，見唔見到呀？

鍾澤文先生：見到。

MR DUNCAN：（經傳譯員）嗰度就有一個要求嘅，就話嗰個更次嘅時間，嗰個司機嘅更次時間係實質上可以超過嗰個剛才第 1 頁所講嘅十二個鐘，係可以最多去到十四個鐘嘅，睇到嘛？

鍾澤文先生：睇到。

MR DUNCAN：（經傳譯員）亦都腳唔腳合你對新指引嘅理解呢？

鍾澤文先生：腳合。

MR DUNCAN：（經傳譯員）講到個駕駛時間，即係喺嗰個特別更次裏面嘅駕駛時間，係咪有一個上限㗎？個上限係十小時，啱唔啱呀？

鍾澤文先生：啱嘅。

MR DUNCAN：（經傳譯員）嗰度亦都有多一個條件嘅，如果係呢個特別更次嘅話，就係話應該係有一個休息，嗰個休息唔可以少於連續三小時。

鍾澤文先生：係嘅。

MR DUNCAN：（經傳譯員）係咪都係你嘅理解係咁㗎？

鍾澤文先生：係嘅。

MR DUNCAN：（經傳譯員）我請你睇咗剛才嘅資料之後，首先我想問，我嘅理解啱

唔啱，縱使可以係有一個特別更，而個特別更就係上限嗰個時間可以去到十四個鐘，但係你哋公司就唔諗住係多過十三個鐘嘅，係咪你哋嘅計劃或者你哋嘅打算係咁呀？

鍾澤文先生：係嘅。

MR DUNCAN：（經傳譯員）較早時候，我哋留意到，根據你哋提交畀委員會嘅資料，有鑑於新嘅指引，係需要增加一百二十一位車長嘅，你記唔記得曾經提過一個咁嘅數字呀？

鍾澤文先生：記得。

MR DUNCAN：（經傳譯員）你計算出呢個數字嘅時候係咪已經考慮埋你哋打算最高嗰個時數係十三個鐘呀？

鍾澤文先生：冇錯。

MR DUNCAN：（經傳譯員）如果你哋係用到嗰個上限十四個鐘，就唔係用十三個鐘嚟到計嘅話，會唔會減少你所需要增聘或者增加嘅車長嘅數目呀？

鍾澤文先生：會嘅。

MR DUNCAN：（經傳譯員）好，咁點解公司而家決定係將嗰個最長嘅時間係定喺十三嗰度呢？

鍾澤文先生：因為我哋理解到公眾對嗰個安全嘅關注。

MR DUNCAN：（經傳譯員）咁嘅安排又點樣樣可以有助安全呢？

鍾澤文先生：車長佢個每日工作時間都唔會太長，去到十三個鐘。

MR DUNCAN：（經傳譯員）但係無論如何，最高嘅駕駛時間都會係十個鐘，即係無論嗰個更係十四個鐘定十三個鐘，嗰個駕駛時間嘅上限都係十個鐘嘅，係咪呀？

鍾澤文先生：冇錯。

MR DUNCAN：（經傳譯員）即係話係嗰個--你指係就係講到話而嗰日係好長嘅話，你就係考慮到嗰個多咗一個鐘嗰個問題啫，係咪呀？

鍾澤文先生：係，冇錯，即係佢可以早啲放工嘅話，咁佢同下一個更分嗰個相隔時間，休息就會多啲。

MR DUNCAN：（經傳譯員）唔該。早啲時候，你講過一位車長，即係當然唔計嗰啲兼職車長，一般車長一般會係工作十小時，八個鐘頭就係正常嘅，兩個鐘就係超時嘅，你記唔記得曾經同我哋咁樣講過呀？

鍾澤文先生：記得。

MR DUNCAN：（經傳譯員）好，如果有一個人佢要做呢個特別更次，你哋要求佢做特別更嘅，換句話講，佢當值就係十三個鐘嘅，但係裏面駕駛嘅時間就只係十個小時，我就想問，佢係攞八個鐘頭正常時間嘅工資，另外五個鐘頭嘅超時補水，係咪咁樣計嘅呢？佢點樣出糧嘅呢？定抑或係佢係有八小時嘅正常工資，另外兩小時嘅超時補水，即係好似平時咁樣樣，而嗰個休息嘅時間就係冇工資嘅，係邊一種安排呢？

鍾澤文先生：係佢會獲得八個鐘頭嘅基本底薪，跟住嗰五個鐘就係一個超時嘅補水。

MR DUNCAN：（經傳譯員）我想問，你哋係行咗新嘅指引未呢？

鍾澤文先生：仲未嘅。

MR DUNCAN：（經傳譯員）幾時會開始呀？

鍾澤文先生：我哋打算會喺今年嘅第三季。

MR DUNCAN：（經傳譯員）係點解要遲啲先做呢？

鍾澤文先生：第一，因為我哋要請到足夠嘅車長，先至可以推行；第二，我哋亦都要增加一啲休息嘅設施畀嗰啲車長喺嗰三個鐘嘅休息時間裏面有一個地方去休息。

MR DUNCAN：（經傳譯員）你可唔可以同委員會講下司機幾常係需要做嗰個十三個鐘嘅更次呢？即係你遲啲就會有呢個十三個鐘嘅更次，幾頻密、幾常佢哋要咁做呢？

鍾澤文先生：新巴同城巴就係有唔同嘅安排嘅，新巴嘅司機佢哋係返梗一個更次嘅，如果佢申請咗做呢啲特別更分嘅話，咁佢就係每一日都會係做呢個特別更分，除咗佢係休息。而城巴嘅車長，因為佢哋嗰個返工係輪更嘅方式嘅，佢哋係每一個禮拜係會輪一個唔同嘅更分，咁就要睇下嗰個更分嘅編排係點樣，就好難講話究竟佢係有幾頻密。

MR DUNCAN：（經傳譯員）講到新巴，你嘅意思係咪話有啲司機就係恆常都會係做十三個鐘呢一啲嘅特別更次嘅，係咪呀？

鍾澤文先生：係。

MR DUNCAN：（經傳譯員）一個禮拜做幾多日呢？會返幾多日工呢？

鍾澤文先生：一個禮拜會返五日或者六日，就會有一日嘅休息時間。

MR DUNCAN：（經傳譯員）你話五、六日，係咪佢哋有得揀㗎？

鍾澤文先生：要佢申請去做邊一個更分，有一啲更分因為係一至六都會有嘅，佢哋就會返六日，就星期日會休息，有一啲更分係星期一至星期日都會有嘅，佢哋就會返五日就放一日假，咁嚟休息嘅。

MR DUNCAN：（經傳譯員）我嘅理解就係有好多嘅喺新巴嘅車長就會係十三個鐘一日，就一係五日、一係六日一個禮拜咁計，係咪呢？

鍾澤文先生：會有一啲車長係咁樣，但係唔係全部嘅，我哋估計就大約係會有十幾個 per cent 嘅更分會係呢啲特別更嘅更次。

MR DUNCAN：（經傳譯員）大概有幾多比例嘅車長係做呢啲更分--呢啲時間，十三個鐘特別更，每一日，就五至六日，大概個百比分係幾多呢，車長嘅數目，喺新巴嚟講？

鍾澤文先生：等我睇一睇。有十幾個 per cent 喽，大約係一百四十四個更分。

MR DUNCAN：（經傳譯員）好喇，講到城巴嗰方面，可唔可以解多次新巴同城巴之間喺呢方面嘅分別係點樣呀？

鍾澤文先生：城巴嘅車長佢哋唔係每一日都固定返嗰一個更分嘅，佢哋係每一個禮拜返一個更分，或者五日返一個更分，跟住就會放一日假，放完假之後，佢就會係 rotate 去下一個更分，又做五日，之後又放假，又去第二個更分咁樣嘅。

MR DUNCAN：（經傳譯員）即係話喺一個禮拜之內，佢哋就會係十個鐘咁計，跟住下一更就可能係十三個鐘，係咪即係每一日都唔同，一日就十個鐘，一日十三個鐘，係咪咁樣唔同㗎？

鍾澤文先生：係每五日就轉一次更。

MR DUNCAN：（經傳譯員）係，我明。

主席：（經傳譯員）咁係可以係一日十個鐘，一日係十三個鐘，仲有冇其他嘅類別呀，有冇其他做不同鐘數嘅類別呀？

鍾澤文先生：有嘅，十個鐘其實係一個平均嚟嘅，我哋有一啲更分，有啲係八個幾鐘，有啲係九個鐘，十個鐘又有，十一個鐘又有咁樣嘅。

羅先生：（經傳譯員）咁呢個即係五日嗰度，就即係個模式係一樣嘅，係咪呀？即係五日之後先至轉嘅，即係每五日嚟講係完全一樣嘅，個時數，係咪呀？

鍾澤文先生：冇錯。

MR DUNCAN：（經傳譯員）你可唔可以就畀委員會一啲嘅講法呢，其實呢啲新嘅指引對一般車長嚟講，有啲咩嘢嘅具體影響？有冇一啲具體嘅改變、實質嘅改變呀咁樣呢？還是係喺佢哋工作時數都冇乜特別嘅轉變呢？

鍾澤文先生：如果佢係轉咗做一個特別更咁先算，佢嗰個休息時間就會係集中咗喺嗰三個鐘或者三個幾鐘嘅安排裏面，未改呢個指引之前，其實最高工作時間係十四個鐘，而嗰個駕駛時間係十一個鐘，其實佢如果係一個十四個鐘嘅更分，佢都係有三個鐘嘅休息時間，不過呢啲休息時間其實就會分開咗係唔同嘅時間畀

佢啫。但係喺一個特別更嚟講，嗰個休息時間就會連續集中咗喺同一段時間，即係嗰三個鐘裏面或者三個鐘以上嘅裏面。

MR DUNCAN：（經傳譯員）舊時就十四個鐘嗰個嘅更係咪車長好鍾意㗎，鍾唔鍾意㗎？

鍾澤文先生：有部分車長係鍾意嘅。

MR DUNCAN：（經傳譯員）有冇車長就係需要做到十四個鐘--最高十四個鐘，而係唔想咁樣做嘅，違背佢哋嘅意願咁樣做嘅，有冇㗎？

鍾澤文先生：我哋係編排咗個更分畀佢，佢就需要去做嗰個更分嘅，不過佢哋如果係搵到同事同佢去調更，而又合乎個指引嘅話，我哋係會批准嘅。

MR DUNCAN：（經傳譯員）如果嗰個人對十四個鐘嘅安排唔滿意嘅話，係咪即係好難搵人調呢，其實？

鍾澤文先生：我唔知道佢哋難唔難，不過我哋車長調更嘅安排都幾普遍嘅。

MR DUNCAN：（經傳譯員）你估計--對於呢啲特別更嚟講，你覺得對員工嚟講係咪都係受歡迎吖，還是真係唔受歡迎㗎？

鍾澤文先生：我聽過有工會話歡迎，亦都有工會話唔歡迎。

MR DUNCAN：（經傳譯員）都係兩樣都有，係咪呀？一樣一半咁樣，係咪呀？

鍾澤文先生：係咪一樣一半，我唔知，但係我又聽過一個，有啲車長佢係鍾意做長啲嘅更分，因為佢要搵--想搵多啲錢。

MR DUNCAN：（經傳譯員）如果唔受歡迎，點解唔受歡迎呀？

鍾澤文先生：有啲車長佢唔需要搵咁多錢，譬如話有一啲車長佢都做咗好多年，可能屋企佢唔係一個主要嘅經濟支柱，佢可能佢做八個鐘、九個鐘，佢已經足夠㗎喇，所以佢哋就唔鍾意做一啲較長嘅更分。

MR DUNCAN：（經傳譯員）你估計要求員工係做到十三個鐘其實係咪即係違背佢哋嘅意願，佢哋係唔想嘅，係咪呢？你覺唔覺得係咁呢？

鍾澤文先生：我唔覺得。

MR DUNCAN：（經傳譯員）好喇，或者如果大家冇問題，我哋就講完嗰個指引。我就想講番嗰個遠期嘅計劃，呢個就喺 TD-1，195 嘅，今朝都睇過呢份文件，鄭先生。

鄭偉波先生：有睇過。

MR DUNCAN：（經傳譯員）係，唔該。係喇，就係講嗰個安全帶咁樣，或者我再講多少少，呢一度。首先或者想請你睇一睇第 199 頁，文件嘅 199 頁，呢度係有

一個意外嘅性質嘅分析，係 2016 嘅，睇唔睇到，鄭生？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）好喇，表 4，意外嘅性質係有不同嘅類別咁樣嘅，呢一度，就一路係去到 200 頁嘅，睇唔睇到呀？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）意外嘅性質係 199 頁最後嗰度就係一啲非碰撞嘅意外就係有呢個乘客受傷嘅咁，你睇到，鄭生？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）呢一點就係喺 200 頁嗰度都係有跟進嘅，六成嘅意外都係非碰撞嘅意外而係有乘客受傷嘅，就有進一步咁樣嚟到去分析呢一類嘅意外，喺表 5 嗰度係有列出嚟嘅，個分析就係話有啲乘客就係失咗平衡，呢個係一個主要嘅意外嘅成因嚟嘅，就你所知，呢個今日都係咪--即係都係咁樣呢？嗰個比例睇嚟係最高嘅，即係對於呢個意外嘅性質嚟講，係咪今日嘅情況都係一樣，冇變呀？

鄭偉波先生：冇大分別。

MR DUNCAN：（經傳譯員）好喇，喺表 5 嗰度上高個段落，個分析就係話乘客就失平衡咁樣，呢個就係個主要嘅成因，公司嚟講，係可以做啲乜嘢呢？對於呢類咁嘅事情，可以做啲乜嘢呢？

鄭偉波先生：我畀鍾生回答。

鍾澤文先生：乘客喺呢個車度跌到嘅，我哋一向都睇得到佢係最主要嘅原因嚟嘅，我哋過往都同運輸署係做一啲宣傳嘅工夫，包括政府就拍咗一啲宣傳嘅短片，喺電視嗰度播嘅，就係提醒啲乘客上車咗之後，就要緊握扶手，同埋就係如果搦住太多嘢嘅話，就唔好行上去樓上坐；另外我哋公司亦都喺車上面加貼咗一啲標示，提醒啲乘客係去上車之後，係儘快去搵位坐或者係扶手--緊握扶手嘅；除咗標貼之外，我哋亦都有利用車上面嘅報站系統係出示一啲--顯示同埋廣播係提醒啲乘客緊握扶手，呢啲都係我哋過往有做嘅嘢嚟嘅；除咗話係加強乘客嘅宣傳，我哋亦都有喺我哋嘅司機嘅訓練裏面係提醒啲司機，喺駕駛時要留意乘客喺車廂入面嘅活動，尤其是喺停完站開車之前要睇下啲乘客佢哋係行到埋去位未，或者係扶穩未，同埋係留意有啲老人家佢哋嗰個狀況，同埋喺開--即係停車之前，都要柔順一啲，呢啲我哋都有提醒啲車長係儘量避免因為剎車而令到乘客係跌到嘅，呢啲係我哋做嘅嘢。

MR DUNCAN：（經傳譯員）巴士車長嗰個駕駛態度會唔會就係都導致到乘客會跌到呢？你嘅經驗、去嘅體驗係咪咁呢？

鍾澤文先生：車長嘅駕駛態度係會導致乘客跌到嘅，呢個係其中一個原因，乘客佢自

己上咗車之後有冇緊握扶手，呢個都係佢哋自己--即係乘客嘅一個責任嚟嘅。當然喺香港嗰個駕駛路面亦都有好多突發嘅事情，車長係控制唔到，變咗有時佢真係需要緊急剎車而令到乘客係跌到嘅。

MR DUNCAN：（經傳譯員）有冇啲規例或者規則講到話一架巴士可以載幾多乘客呢？即係話除咗係有座位坐嘅乘客之外，有冇規例、規則講除此之外仲可以多載幾多乘客，換句話講，可以係有幾多乘客係企喺度嘅呢？

鍾澤文先生：每一架巴士佢嘅座位數目同埋可以企立乘客嘅數目都係有限制嘅，而呢個數目亦都寫咗喺架車嘅出面，喺近住車門嗰度，唔同巴士嘅種類或者佢嘅長度，佢嗰個載客量都會有唔同嘅，企位嘅人數亦都會有唔同。

MR DUNCAN：（經傳譯員）邊個負責去決定係可以載得多過係巴士所容許嘅站立乘客呢？邊個負責嘅呢？

鍾澤文先生：每一架新入到嚟香港嘅巴士，運輸署都會做一個所謂叫做 type approval 嘅程序，喺呢個程序裏面就會因應架巴士嗰個喺樓下嘅通道嘅面積去計算嗰個可以企嘅乘客嘅數目，同埋呢個亦都要考慮埋嗰個車嘅總載重量，亦都有一個重量去計算。

主席：（經傳譯員）我諗嗰個問題係比較係具體嘅，邊個可以決定就係嗰個企喺度嘅乘客嗰個上限過咗，邊個可以決定，邊個有咁嘅責任呢？

鍾澤文先生：司機有責任要確保佢架車唔會超載。

MR DUNCAN：（經傳譯員）你諗住巴士嘅車長點樣樣可以履行到呢個職責呢？

鄭偉波先生：呢個由我負責回答，我哋每部車就係有定咗嗰個企位嘅總數嘅，但係當我哋個車長佢揸住架車嘅時候，佢就冇可能分心就去一路數住有幾多乘客上咗車，因為乘客上咗車，首先佢哋係應該選擇係會坐位先，如果冇晒座位嘅話，就啲乘客就需要企，但係喺任何一個時間，我哋巴士上面嘅車長佢係唔可能知道自己架車上面係載咗幾多乘客嘅，佢只係可以憑觀察嘅，而呢個觀察就係啲乘客企到幾近車頭嗰度，即係如果企到好近車頭，即係好多人企，但係--即係如果大家喺街上面有留意嘅話，或者平時有喺繁忙時間搭巴士嘅，就會有呢個體驗㗎喇，喺架巴士樓下嘅後面嘅部分，乘客係唔鍾意企喺嗰處嘅，佢哋就選擇就企喺近住個門口嗰度，即係架巴士中門，即係個 exit door 嗰度，同埋就再企下企下就企咗去車頭，就唔行入去，如果喺咁樣嘅情況底下，嗰個巴士車長佢只係憑觀察見到好多人企喺佢近住車頭，但係佢唔會知道喺後面嘅位置會唔會有好多嘅空間係冇人願意入去企，呢個就係普遍我哋喺繁忙時間嘅情況嚟嘅。多謝。

MR DUNCAN：（經傳譯員）我明嘅，我明呢啲困難嘅。換句話講，係咪話實質上巴士車長係無法去執行嗰個係企位嘅上限，縱使佢喺車身嗰度已經寫明咗只可以企咁多個人，但係佢其實係無法去執行嘅，係咪呢？

鄭偉波先生：第一，個車長佢不知道幾時要去執行，因為佢數唔到有幾多個人喺架車上面，因為大家要注意嘅，一架車一路有人上車，一路又有人落車，到底剩番喺架巴士裏面嘅係幾多人呢，個車長唔可能拎住部計數機一路去計住嘅，唔可以咁準確做得到嘅，佢就只可以憑肉眼嘅觀察。好喇，如果佢觀察到話好多人企到去近住車頭，佢亦都冇嘢可以做得到嘅，因為啲乘客係趕住去返工，同埋已經畀咗錢，因為企喺架車裏面嘅乘客全部已經一係入咗錢，一係拍咗八達通㗎喇，如果個車長真係去逐個人、逐個人去數，數完係多咗--譬如多咗兩個人，佢唔可能去執行到嘅，佢唔知叫邊兩個人落車，即係呢個就係嗰個實質上嗰個困難嚟嘅。多謝。

MR DUNCAN：（經傳譯員）巴士過份擠逼係咪你哋公司面對嘅難題之一呢？過份擠逼而令致就有好多人係要企，而企嘅人就多過嗰個企位嘅上限，對你哋公司嚟講，呢個係咪你哋嘅問題之一呢？

鄭偉波先生：我再重申一次，我哋其實係冇任何數據去證明到係有呢個所謂超載，即係個企位多過個準許上限呢個情形，我哋係冇呢個數字嘅，所以我唔能夠可以好清楚咁樣答到你我哋有冇呢個超載嘅情況嘅。

MR DUNCAN：（經傳譯員）即係公司係唔知嘅，即係你哋有冇過度擠逼呢個問題，你哋就唔知，係咪呀？

鄭偉波先生：再重申一次，係喺車頭，近住車頭，或者架車嘅前半部係有可能有過度擠逼，但係喺架車嘅後半部，係樓下後半部好多時係冇人企喺度，呢個就係架車有部分嘅位置係過度擠逼，但係過度擠逼就係一個觀感嚟嘅，有冇超載就係一個客觀嘅計算，我哋就冇呢個資料就係話啲車有幾多部係超過咗嗰個車容許嘅上限嘅，我哋冇呢個資料嘅。

MR DUNCAN：（經傳譯員）我想請你睇委員會所收到嘅另一份意見書，MISC-1，124-1 嗰頁。

鄭偉波先生：我哋係睇咗。

MR DUNCAN：（經傳譯員）唔該。呢個係嚟自警方嘅，喺 18 年 5 月 7 號嘅嗰封信，你睇咗，係咪呀？

鍾澤文先生：睇咗。

MR DUNCAN：（經傳譯員）第 2 頁嘅第 5 段。

鍾澤文先生：有睇過。

MR DUNCAN：（經傳譯員）喺嗰段裏面，寫呢封信嘅人就講到係五個主要嘅成因，睇到嘛？

鍾澤文先生：睇到。

MR DUNCAN：（經傳譯員）我想問你呢個問題，公司會唔會時不時收到咁樣性質嘅報告，係警方交畀你哋嘅，當然呢封信就係特登係寫畀專責委員會嘅，但係我嘅問題就話你哋公司會唔會喺警方嗰度時不時都收到類似咁樣樣嘅資料呢？

鍾澤文先生：我哋係冇同警方嗰度係收到呢啲資料嘅，不過我哋喺做頭先嗰個五年發展計劃嗰陣時，運輸署佢哋畀我哋嗰個--做嗰個發展計劃個指引嗰度係有提供類似嘅資料畀我哋嘅，係每一年一次。

MR DUNCAN：（經傳譯員）呢一類嘅資料係有嘅，不過係透過運輸署攞到，係咪呀？咁樣講啱唔啱，咁嘅理解啱唔啱？

鍾澤文先生：啱嘅。

MR DUNCAN：（經傳譯員）講到第 5 段，講到嗰五個係主要嘅成因，佢哋指出呢五大成因，你覺得啱唔啱呢？係咪胎合你哋平時嘅理解，定抑或你都感到意外呢？

鍾澤文先生：胎合嘅，唔感到意外。

MR DUNCAN：（經傳譯員）好，跟住就想請你睇另一份文件嘅，亦都係委員會係從運輸署嗰度所收到嘅資料，係好近期嘅，不過就唔知道你哋有冇機會係睇過，呢度就係 TD-5，1649，TD-5，1649 嘅，我相信就係委員會幾日前先至收到嘅啫，道路安全管理系統，呢度就係講到而家政府所採納嘅嗰一套制度，你同同事有冇睇過呢份文件呀？

鍾澤文先生：冇睇過。

MR DUNCAN：（經傳譯員）好，或者睇幾方面，呢份文件，首先第一版 1649 第 4 段，呢版第 4 段，“Apart from”嗰段，或者請大家睇一睇呢段先。

鍾澤文先生：睇咗。

MR DUNCAN：（經傳譯員）呢度有一個嘅樣辦，即係每一季嘅交通意外嘅情況，係運輸署係提交畀道路安全議會嘅，咁個資料就係喺附件 1 嗰度，或者喺呢方面就請大家就睇去 1658 嗰一版，1658，大家睇唔睇到 1658 呀？個標題就係交通意外嘅報告，係畀呢個道路安全議會嘅，日期就係 2018 年 3 月 7 號，睇到喇呵？

鍾澤文先生：睇到。

MR DUNCAN：（經傳譯員）好，下一版，1659，就係交通意外情況嘅總結，係 2017 年嘅。

鍾澤文先生：睇到。

MR DUNCAN：（經傳譯員）好喇，睇落啲就係附件 3，專利巴士，牽涉專利巴士嘅，

係 1659，附件 3，牽涉到專利巴士，睇到嘛？

鍾澤文先生：未睇到。

MR DUNCAN：（經傳譯員）睇到喇呵，而家？

鍾澤文先生：睇到。

MR DUNCAN：（經傳譯員）附件 3，專利巴士，第四季，17 年第四季，九巴、龍運、大嶼山、城巴（第二），就係記錄到係有增加嘅，而新巴、城巴（專利一）就係有下降嘅，呢個係相對 16 年第四季嚟講。好喇，而家想請大家係睇附件 3，呢度係有講附件 3，我哋睇埋附件 3，就係文件嘅 1664 頁，睇到呢度附件 3 專利巴士嘅情況，有冇睇到？

鍾澤文先生：睇到。

MR DUNCAN：（經傳譯員）然後每間專利巴士公司都有個表喺度嘅，係咪？

鍾澤文先生：係。

MR DUNCAN：（經傳譯員）好喇，其中一個方法運輸署量度或者衡量道路安全嘅就係睇嗰個嘅每一百萬公里行車嘅數目嚟到去睇，你知唔知道咁樣計法㗎？

鍾澤文先生：知道。

MR DUNCAN：（經傳譯員）睇九巴嗰欄，屘嗰兩項，16 年第四季同埋係 17 年第四季咁睇，2.979、4.005，係兩季嘅，大家睇到嘛？

鍾澤文先生：睇到。

MR DUNCAN：（經傳譯員）如果你一路睇埋其他，你睇唔睇到新巴嗰度同埋城巴一嗰度，睇嚟好似係最高㗎喎，即係咁多間嚟講，講到話嗰個牽涉嘅比率，即係每一百萬公里咁計，睇嚟好似係呢兩間係最高，你睇呢個表嘅時候，係咪睇到咁樣嘅情況呀？

鍾澤文先生：係。

MR DUNCAN：（經傳譯員）你睇到呢啲數字，覺唔覺得好出奇呀？

鍾澤文先生：唔覺得，因為每一個專營權嘅路線嘅網絡都唔同嘅，同埋佢哋所行走嗰個地區個交通情況都好大分別嘅。就以城巴嚟睇，城巴嘅專營權一同城巴嘅專營權二，呢一個意外嘅比率都係差別好大嘅，兩間公司都係同一個管理層去管理嘅，點解會有咁大嘅差別呢？就係因為兩個專營權嘅網絡係好唔同，城巴二嘅專營權網絡嘅車唔係--大部分會係喺一啲高速公路行走，佢所行嘅咪數亦都好高；除此之外，路線比例喺一啲繁忙嘅路段亦都係相對低嘅，所以我哋覺得唔可以就咁樣去比較呢一個 involvement rate per million km 去比較唔同專營權嗰個安全度。

主席：（經傳譯員）呢個其實你喺陳述書嗰度都有講過，係咪呀？即係唔係蘋果比蘋果咁樣，係咪呀？你話。

鍾澤文先生：冇錯。

主席：（經傳譯員）可唔可以同我哋講一講喺邊一度你講過呢一個觀點呀？或者一陣間可以再返番嚟講呢一點嘅。

鍾澤文先生：對唔住，主席，我哋 submission 係冇講過。但係喺我哋嗰個運輸署提交我哋嗰個五年發展計劃嗰度喺 5.1 我哋嗰個 introduction 係有提過嘅。

MR DUNCAN：（經傳譯員）係 TD-1-195。

主席：（經傳譯員）嗰個第城巴一、城巴二，都係顯示出就係佢哋嘅網絡組別同埋營運嘅地點，即係城巴一、城巴二，兩者都係城巴運作嘅，其實你講嗰啲公路，城巴二嗰啲公路大多數係咩嘢公路呀？

鍾澤文先生：主要係北大嶼山公路同呢個西九龍走廊。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）仲有一點我想同你探討一下嘅，鄭生，我講埋呢點先至係講其他嘅運輸署嘅文件，或者最近收到嘅文件。而家想請你睇一睇 1650 嗰份 TD-5-1650，今朝主席就睇到黑盒嗰個問題，即係喺小巴嘅黑盒嘅問題，我而家就想請鄭生你睇一睇第 7 段，呢一版嘅第 7 段，1650 第 7 段。

鄭偉波先生：睇咗。

MR DUNCAN：（經傳譯員）唔該。主席亦都提到，根據佢嘅理解，就係小巴嗰度嗰啲情況，佢哋係有一個超速嗰度嗰個時間就係三秒鐘嘅，佢哋係三秒嘅，今朝主席提過嘅，你記唔記得主席今朝講過呢一點？

鄭偉波先生：記得。

MR DUNCAN：（經傳譯員）或者係為咗紀錄，呢一個道路交通車輛構造保養規例嘅附表 19 嗰度，而家係打咗出嚟，如果或者大家睇一睇第 3 段，附表第 3 段，大家睇到就有個規定嘅，就係一個電子數據紀錄儀器，即係黑盒，呢個係關於喺小巴安裝呢一類嘅黑盒嘅情況嘅，同埋仲有，就係第 3D 嗰段，就有提到就係所有該汽車嘅實際速度超過呢一個超速限制持續多於三秒嘅紀錄咁樣嘅，呢度咁寫，或者想你係留意下呢一點，今朝主席都提過下嘅。

鄭偉波先生：睇咗。

MR DUNCAN：（經傳譯員）唔該。等我哋而家又睇下嗰個遠期計劃同埋你哋嘅巴士安全報告，TD-1，200 頁，喺 5.11 段，當然寫嘅時候就係仲未成立咗嗰個工作小組嘅，5.11 嗰段就講及係有啲乜嘢嘅措施同埋計劃係規劃咗嚟到去加強個

安全嘅，喺呢度可以睇到，200 頁嗰度落到去後面 201 頁，嗰度就係羅列咗一啲你哋已經鑑別咗出嚟嘅一啲措施，相睇下羅馬數字(iv)，係 201 頁嘅羅馬數字(iv)，請你睇一睇嗰段，屘四嗰行就話大力踩 brake 嘅報告就係會產生出嚟嘅，就會用嚟係睇下有邊啲司機就成日有咁嘅習慣就係會急剎掣嘅，就會係有呢個糾正嘅培訓或者係紀律處分嘅，嚟到係糾正呢啲情況，我想問呢啲報告係點樣樣產生到嘅呢？

鄭偉波先生：我嘅同事鍾生會負責答呢啲題目。

鍾澤文先生：如果我哋係收到有乘客投訴，係話嗰個車長佢嗰個 brake 係好重嘅，我哋就會係攞番呢一個車長佢過往喺使用 brake 嗰個情況嚟去睇下佢係咪有呢一個咁樣嘅習慣，從而就係會--如果真係有嘅，我哋就會去跟進番。

MR DUNCAN：（經傳譯員）唔該。即係話冇投訴就唔會有嗰個報告出，係咪呀？

鍾澤文先生：冇錯。

MR DUNCAN：（經傳譯員）5.12 段，我哋有呢一個嘅講法，就係話有啲乜嘢嘅紀律處分同埋有啲咩嘢獎勵嚟到係鼓勵佢哋唔好有啲壞嘅習慣同埋鼓勵佢哋有好嘅駕駛態度，見唔見到呢一個提述呀？

鄭偉波先生：未見到 。

MR DUNCAN：（經傳譯員）唔該。

鄭偉波先生：見到喇而家。

MR DUNCAN：（經傳譯員）喺嗰個安全獎金、勤工獎同埋係表現獎金，將佢歸撥咗之後，我想問，有啲乜嘢嘅獎勵制度係可以係避免佢哋駕駛態度唔好同埋鼓勵佢哋駕駛態度要好呢？

鄭偉波先生：我之前都答過㗎喇，就係如果佢哋個駕駛態度唔好、駕駛個安全度唔夠高嘅話，我哋係對佢哋會有不同程度嘅紀律處分嘅。

主席：（經傳譯員）可能個問題其實係咁，你就即係有獎、有罰，但而家就只係得獎，係咪呢？即係蘿蔔同棍嗰個嘅比喻。

鄭偉波先生：正確嘅，係嘅。

MR DUNCAN：（經傳譯員）我哋而家可以將嗰個遠期計劃係躉開，跟住就講番你嗰個意見書，想大家睇下呢個 CT-1 第 27 至到第 28 頁。

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）27 頁嗰個標題就係維修同埋檢查，係你哋落嘅標題，嗰度一路去到 28 頁嘅大部分都喺呢個標題底下嘅，講到話開工之前嘅檢查，即係(d)嗰項，呢個係要求巴士車長去做嘅，我想問巴士車長係咪需要係有一個書面

嘅紀錄呢，即係檢查咗之後？

鍾澤文先生：唔使嘅。

MR DUNCAN：（經傳譯員）想問下，維修嘅事宜有冇係引致過去嗰幾年你哋公司嘅巴士係涉及意外呢？維修係咪一個成因之一呢？

鄭偉波先生：李生會答呢條題目嘅。

李廣威先生：我而家冇呢啲嘅數字，相信係好少機會、又好少嘅情況係出現過嘅。

MR DUNCAN：（經傳譯員）你話好少、好少係乜嘢呢？係顯示出一個乜嘢嘅問題呢？係邊一類嘅問題呢？

李廣威先生：曾經試過，呢個我記憶所及係有試過一啲嘅零件損壞而造成另外一啲嘅車輛嘅損毀嘅，不過呢個係輕微嘅。

MR DUNCAN：（經傳譯員）有冇書面嘅報告呢，呢一類事件有冇書面嘅報告呢？

李廣威先生：有嘅。

MR DUNCAN：（經傳譯員）係咪都可以係畀一啲樣本我哋呢，呢啲報告嘅樣本？譬如話過去嗰兩年係引致事件發生嘅，得唔得呢？有冇咁嘅樣本呢？

李廣威先生：我哋會返去睇一睇。

MR DUNCAN：（經傳譯員）唔該，唔該你。

主席：（經傳譯員）鄧大律師，我想問下，喺立法會嘅文件，即係關乎呢個專營權嘅續期，講到話公司嘅整體嘅紀錄，即係話睇下城巴佢嗰個維修嗰個紀錄，係咪嗰度處理咗呢？

MR DUNCAN：（經傳譯員）我諗啱嘅，我而家會嘗試去搵搵究竟係喺邊一度，我哋會嘗試搵番嗰一頁出嚟嘅。離開呢一個題目喫喇，但係鄭先生，想問下，講番安全嘅時候，我想問有冇咩嘢事情你認為政府可以幫到你哋公司嘅呢，可以好實質上幫到你哋公司嘅呢，而現時又冇係做到、冇幫到公司嘅呢？當然，我哋知道安全都係你哋公司嘅責任，但係你有冇諗到一啲嘢就話政府其實可以係幫你哋手，喺呢度，係當你哋致力尋求安全嘅水平嘅時候，係咪有啲嘢你認為政府都可以幫到手嘅呢？

鄭偉波先生：主席，其實喺我哋嘅睇法，所有要提升安全嘅嘢，全部都係要用錢嘅，如果將來係有啲嘅要求我哋係要用大額嘅金錢去安裝一啲嘅裝置以提升我哋嘅服務嘅安全，我好希望政府可以畀到個財政嘅資助我哋，多謝。

MR DUNCAN：（經傳譯員）可唔可以較為具體咁講下呢？有啲乜嘢嘢係你哋目前嘅財政能力係做唔到，但係就如果係有政府資助就會大大咁樣係提升嗰個安全呢？可唔可以講得比較具體嘅事項呢？

鄭偉波先生：我就舉唔到有啲嘅例子就可以大大咁樣提升安全嘅，其實就係有啲嘢就係大家或者個公眾覺得做咗就會提升安全嘅，呢啲就有，舉一個例子，就今朝大家都有探討過，就係話巴士會唔會加裝番啲安全帶喺個樓上嘅，今朝李生都有引述過嗰個成本，個成本就係 15,000 英鎊至到兩萬英鎊一部巴士，我哋就一千一百部巴士係呢一個類別，如果全部要加裝安全帶喺樓上嘅話，嗰個總開支就會係港幣係 180 個 million，就至到港幣 240 個 million，我哋其實兩間公司而家嗰個利潤係好低嘅，我哋而家嘅利潤係好低，我哋唔知道要營運幾多年先至賺到個錢可以去安呢啲嘅安全帶，呢個就係其中一個例子，就係我哋嘅財務資源係唔足夠或者不存在去做呢件事嘅，所以呢一類嘅開支，我覺得就要好審慎咁樣嚟到睇，就是否真係好有效嘅。

今朝有提過，就係話而家我哋嘅車上面都有啲嘅 exposed seats 就有安全帶喺處嘅，但係我好少、好少，我自己經常有搭巴士嘅，係好少、好少見到車上嘅乘客坐喺呢啲位置有扣上安全帶嘅，而將來如果真係話叫我哋公司拎億幾、兩億，甚至兩億幾出嚟愛嚟做呢件事情，而我哋就非常質疑佢個成效嘅。當然，如果政府真係到時有個要求要我哋去加裝安全帶嘅，我就好希望就政府就會提供資助嚟到畀我哋安呢啲安全帶，呢個係一個例子。多謝。

MR DUNCAN：（經傳譯員）即係如果話政府覺得係值得嘅，因為乘客可能係想纜安全帶，都有機會係纜到安全帶，但係根據你經驗，佢哋通常都唔會咁樣做，就你覺得政府應該係出錢嚟到去做，唔係你哋做，係咪咁嘅意思呀？

鄭偉波先生：如果政府覺得我哋有必要要加安全帶，就係為咗乘客要纜安全帶，就有條安全帶，如果係咁樣樣嘅話，我就希望政府就出錢愛嚟安呢啲安全帶上去。因為如果喺我哋自己嘅角度，我哋就覺得呢個係一個浪費嚟嘅，同埋最重--sorry，我仲有少少補充。同埋最重要，大家再諗一諗喺香港嘅巴士係有企位嘅，如果坐位坐喺度都覺得唔安全，要有個安全，咁我車上面企喺嗰度嗰啲人佢唔可以有條安全帶畀佢嘅，呢個就其實係一個都幾自相矛盾嘅做法嚟嘅。多謝。

主席：（經傳譯員）唔該晒，好，暫時我都冇嘢講。鄧律師。

MR DUNCAN：（經傳譯員）好，請睇大家嘅陳述書嘅第 40 頁，CTB-1，40。

鄭偉波先生：我見到。

MR DUNCAN：（經傳譯員）唔該。你睇到中間嗰度，「其他相關資料」“other relevant information”嗰段，睇唔睇到？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）你就話「協助委員會了解到專營巴士呢個行業，我哋都希望藉呢個機會係解釋一下我哋營運嘅環境同埋個挑戰」，即係喺提供呢啲專營服務嘅時候嗰啲挑戰同埋環境，下低嗰度你講咗幾個事項嘅，或者我想請大

家睇(b)嗰度，路線嘅重組，你就話最後嗰度就講，其實就係有浪費嗰個金錢同資源嘅。

主席：（經傳譯員）或者係讀一讀出嚟，鄧律師。

MR DUNCAN：（經傳譯員）「要處理鐵路造成嘅競爭，我哋建議就係做呢個巴士路線重組計劃，係建議畀運輸署係將某一啲需求低嘅服務係取消或者係減低嗰個規模，由於區議會嘅反對，我哋有若干嘅巴士重組嘅計劃係做唔到嘅，嚟到配合番嗰個乘客下降嘅情況，呢個就導致金錢同埋資源上嘅損耗咁樣。」可唔可以同我哋講一講而家嗰個制度係點樣㗎？即係嗰個你需要支援嘅一啲嘅路線，即係嗰個制度如果你係話想改呢啲路線嘅話，個制度係點樣㗎？

鄭偉波先生：鍾生會回答。

鍾澤文先生：多謝主席。如果係有新嘅鐵路落成，我哋會同運輸署係提出一啲建議，有一啲路線如果係同嗰個新鐵路係重疊嘅，我哋會建議取消啲條線或者係將呢啲路線嘅班次係削減或者有一啲係改道。建議咗之後，呢一啲路線嘅重組方案係需要提交畀區議會去討論，一般議員都會有好多意見或者係反對嘅聲音，因為我哋行呢啲巴士線都有一段時間，有部分嘅居民都係會採用，只不過當新鐵路開通，有啲乘客就會流失咗，形成呢啲路線嘅客量係不足，但係亦都唔可以完全話冇晒人搭，喺咁嘅情形之下，區議員佢哋都會反對我哋去做一啲取消路線或者係大幅削減班次嘅。如果議員嘅反響係好強烈嘅話，運輸署就未必會批准畀我哋去做呢啲路線重組。多謝主席。

主席：（經傳譯員）如果地鐵係喺黃竹坑嗰度譬如話去到海洋公園，佢哋呢一個咁樣嘅鐵路安排係咪影響到巴士嘅服務呢，舉個例咁講，係咪有影響㗎？

鍾澤文先生：係，有影響嘅。

鄭偉波先生：主席，其實係好大影響，因為未有呢條地鐵之前，就我哋有條路線就係 629 號嘅路線，就係喺金鐘去海洋公園嘅，而當時喺香港，如果有人要去海洋公園，搭公共交通工具主要就係搭呢條線嘅，自從呢個地鐵通車咗之後，我哋係成條線要取消咗，因為全部嘅乘客流失晒去地鐵嗰處。多謝主席。

MR DUNCAN：（經傳譯員）好喇，運輸署就有最後決定權嘅，係咪呀？

鍾澤文先生：冇錯。

MR DUNCAN：（經傳譯員）你冇得上訴、咩嘢嘅囉喎？冇更高嘅權力係可以處理，係咪呀？

鍾澤文先生：我哋冇試過。

主席：（經傳譯員）有冇上訴渠道㗎？

鄭偉波先生：我哋唔察覺有呢個渠道。

MR DUNCAN：Do you have any -- have you ever considered...

鄭偉波先生：Sorry，個翻譯嗰處，我覺得有少少要更正嘅，係“we don't aware of such a channel”，就唔係“not realize”，“we don't aware of”。（經傳譯員）係「唔察覺」嘅，係「唔察覺」。

主席：（經傳譯員）其實呢個運房局嗰度有冇得上訴嘅呢？有冇得上訴？有冇渠道上訴？

鄭偉波先生：呢方面鍾生會比較熟啲，由鍾生答。

鍾澤文先生：根據嗰個《公共巴士服務條例》Cap. 230，係如果嗰個五年即係路線發展計劃係有 dispute 嘅話，係會係去呢個運房局嗰度係做一個 settlement 嘅，但係我哋未試過。

主席：（經傳譯員）具體上，個局長，係咪運房局局長係可以處理，係咪？唔緊要，我哋可以查一查嘅，但係我就即時諗到係咁樣。

MR DUNCAN：（經傳譯員）好喇，而家係講完巴士重組路線，就而家講一講嗰個 f 嗰度，就係票價調整，就係第 41 頁嘅，或者好快咁係讀一讀，然後就係想請大家評論一下。

「專營巴士票價調整嘅批准就係根據嗰個『票價調整安排』嚟到去做嘅，喺根據呢個安排底下，就有一籃子嘅因素政府會考慮嘅，公眾嘅接受同埋負擔能力係其中，我哋認為呢啲都係好主觀同埋係有酌情性質嘅，同埋從政人士就往往都係好容易係用咗呢啲嘅理由嘅。

我哋就係 08 年就係上次調整過，之後我哋係冇申請過票價調整，直至到 17 年 8 月，當時就城巴一同埋新巴就係提交申請係進行票價調整，嚟到去緩減嗰個收入嘅損失，因為鐵路嘅競爭同埋成本增加，喺過去十年，正如(c)嗰度講，嗰個香港嗰個累積嘅通脹率喺呢十年就係百分之 31.2，而累積嘅增加喺嗰個工資嗰度就百分之 39.9，儘管我哋係有理由係根據呢個安排，不同時候係要求調整票價，但係我就冇係提出咁樣嘅申請嘅，因為呢個安排就唔係好有效，同時個環境係好政治化，係反對公共設施係加價嘅。

除此之外，喺嗰個『票價調整安排』嘅申請嗰度，係好難係取得一個公平嘅待遇嘅，而票價嘅調整程序亦都係非常之冗長。舉個例子，目前嘅票價調整申請就喺 2017 年 8 月提出，政府而家都仲係睇緊嘅。

同地鐵唔同，佢哋就係每年係根據佢哋嘅方程式就係有自動嘅票價調整，專營巴士公司就並冇咁樣嘅肯定性可以作出票價調整，冇呢一個肯定性，專營巴士公司其實好難係制訂一個全面嘅、長遠嘅計劃。」

就係搵出咗呢啲段落，就係有一啲嘅因素，你就講到呢一個即係票價調整安排就唔係好有效嘅，...

主席：（經傳譯員）鄧律師，嗰份文件有冇㗎，呢個票價調整嘅安排嗰份文件會唔會有喺度呢？

MR DUNCAN：（經傳譯員）我哋有嘅，係咪呀？主席先生，SEC 373。

主席：（經傳譯員）係咪 SEC-1 373 呢？

MR DUNCAN：（經傳譯員）呢個係一個例子，講到其中一次嘅係票價調整申請...

主席：（經傳譯員）好，唔該晒。

MR DUNCAN：（經傳譯員）...同埋係點樣處理咗嘅。鄭先生，我想繼續問，你剛才係提過，就話呢個票價調整安排呢個過程就唔係好有效嘅，你有冇向任何人提議過就係將呢一個你認為係冇效嘅安排去作一個調整呢？

鄭偉波先生：係有嘅，呢個喺上一次就佢哋去檢討呢個票價調整安排嘅時候--或者我再講過，喺每一次當政府去檢討票價調整安排嘅時候，我哋都係有指出呢個票價調整安排裏面有啲地方係唔理想嘅，同埋唔夠透明度嘅，對於我哋巴士公司嚟講。多謝。

MR DUNCAN：（經傳譯員）咁嘅情況係持續咗幾耐呢？

鄭偉波先生：從一開始有呢個票價調整安排到而家，我哋就只係申請過一次加價，就係 2008 年嗰一次，而嗰一次加價，我哋城巴專利一就只係聯營嘅過海線可以有得加價，而本地，即係香港島嘅路線全部就冇得加價，但係到底個原因係點樣樣，或者我哋當時提交咗一啲財務嘅預測數據畀政府，政府又有冇全盤接納我哋提交嘅財務預測數據，而係邊一部分嘅數據佢唔接受、佢反對，冇同我哋講過，我哋到最後只係知道城巴一喺香港島所有路線都冇得加價，所以呢個其實呀，其實城巴一香港島嘅路線上一次加價其實係 1998 年嚟㗎喇，因為 2008 年嗰次佢係冇得加嘅，而點解冇得加我哋都唔知道嘅，所以呢個票價調整安排，我覺得嗰個透明度要提升嘅。多謝。

主席：（經傳譯員）你係咪話你淨係得到個結果，就冇畀個原因你就點解有一個咁嘅決定，係咪咁嘅意思呀？

鄭偉波先生：正確。

MR DUNCAN：（經傳譯員）主席，其實亦都有提過嗰個票價調整安排底下嘅申請嘅，係喺呢個 THB 嗰度 2 嗰度亦都有提過嘅，23 嗰度嘅。

主席：Thank you.

MR DUNCAN：（經傳譯員）幾時係開始有呢個票價調整安排㗎？鄭生。

鄭偉波先生：係喺 2005 年或者 2006 年左右，大約係 2006 年。

MR DUNCAN：（經傳譯員）照你所知，呢個調整安排自此之後有冇係改變過呢？

鄭偉波先生：係有改變過嘅，但係而家具體我講唔到畀大家知嗰個具體嘅改變，因為最少一樣嘢，我記得佢個原名就唔係叫做「票價調整安排」嘅，就叫做“Fare Adjustment Mechanism”嘅，就係「票價調整機制」，就後來就有改動咗之後，同埋個名都改咗，就係叫 FAA，就係咁樣嘅，而具體嗰個改動，我對唔住，我喺呢處 off hand，我畀唔到個資料大家。

MR DUNCAN：（經傳譯員）對唔住，你係咪講過話 2008 年申請過加價，但係就唔成功呢？

主席：（經傳譯員）係過海嗰啲線就得，但係其他嗰啲就唔得。

鄭偉波先生：2008 年就係城巴專營權一同埋新巴都有申請加價嘅，而個結果就係新巴就全部路線都有得加價，新巴係有嘅，而城巴喺香港島嘅路線就冇得加價，而嗰啲過海路線如果係同九巴一個聯營嘅過海路線就因為九巴有得加價，所以到帶到我哋嗰啲聯營過海路線有得加，而我哋主要就其實係香港島嘅路線嚟嘅，嗰啲就冇加到價。

MR DUNCAN：（經傳譯員）有冇畀到個原因你就點解該次申請係被拒絕呢？

鄭偉波先生：係冇畀到具體原因嘅。

MR DUNCAN：（經傳譯員）有冇畀過任何原因？有冇係除咗係話唔成功之外，有冇書面上係畀過啲理由你呢？

鄭偉波先生：係冇嘅。

MR DUNCAN：（經傳譯員）我哋去 MISC 嗰個文件夾...

主席：（經傳譯員）你而家轉去另一樣嘢，係咪呀？

MR DUNCAN：Yes.

主席：（經傳譯員）或者你未去第二個項目之前，喺第 42 頁，即係你第一次提交嘅意見書 42 頁 g 嗰項，即係「合理回報」最屘嗰三行就咁講嘅，「我哋嘅理解就係政府而家正在喺度檢討呢個巴士票價調整安排，我哋熱切希望上述所講嘅事宜係會喺檢討嗰度處理到嘅。」或者係鄧律師，你係咪可以將呢段成段係讀出嚟呢，作為係問下係咪一個合理嘅一個結論呢？

MR DUNCAN：（經傳譯員）「鑑於就係喺呢一個剛才上述嘅票價調整所遇到嘅困難，即係話如果得到票價調整同埋嗰個加幅其實都係有不肯定性嘅。我哋預計講到嗰個城巴專營權一，同埋新巴佢嗰個資產淨值嘅回報就會係喺 2018 年 6 月結束嘅財政年度嚟講，係會低於百分之一嘅，呢個就係考慮到目前嗰個現狀就會係關於我哋整理嘅支出係維持到，但如果喺嗰個職員嘅支出同埋嗰個燃料費有重大增加嘅話，就呢兩個專營權就會蝕錢，所以唔好講話有合理回報，公司嘅商業可行性都甚至乎係岌岌可危，因此就無法話我哋公司可以繼續維持一個高質素同埋有效嘅服務提供畀公眾，同埋就係有一個有吸引力嘅薪酬去招聘同

埋挽留職工。我哋理解就政府而家正在喺度檢討呢一個巴士票價調整安排，我哋熱切希望上述提及嘅事項會喺檢討工作裏面係處理到嘅。」你會唔會係都而家依然係話你嘅睇法都係咁呀，鄭先生？

鄭偉波先生：我仍然係咁嘅睇法。

MR DUNCAN：（經傳譯員）你話知道政府就正在喺度檢討嗰個票價調整安排嘅，你係基於乜嘢嘢就係有一個咁嘅理解呢？

鄭偉波先生：我哋有同政府開過會。

主席：（經傳譯員）可唔可以具體啲講係同政府嘅邊位係開會呢？

鄭偉波先生：係同運房局嘅人開會。

主席：（經傳譯員）呢啲會議幾時開，而令到你有一個咁樣嘅理解呢？

鄭偉波先生：或者咁，而家我嗰個文字上，“we are given to understand”，即係我覺得呢個講得比較間接嘅，就或者我重新 rephrase 呢一句嘢，就係“we understand that”或者“we know that”。（經傳譯員）「我哋明白到」。

主席：（經傳譯員）係因為同佢哋開會，所以就有咁嘅理解，係咪呀？

鄭偉波先生：正確。

主席：（經傳譯員）幾時開會？

鄭偉波先生：我要返去檢視一下嗰個開會日期。

主席：（經傳譯員）係今年吖，定去年吖，定點呢？

鄭偉波先生：係舊年嘅。

主席：（經傳譯員）今年冇？

鄭偉波先生：我印象當中，今年係冇再開過會。不過我要返去就要檢視我嘅日記簿。

主席：（經傳譯員）好，請你--麻煩你咁樣做，然後話番畀我哋聽究竟個情況係點，即係話究竟今年就呢件事、呢個課題有冇開過會。

鄭偉波先生：好，一定。

羅先生：（經傳譯員）係講嗰個調整安排定抑或係嗰個方程式呢？因為如果你有計過嗰個方程式，你就可以有一個要求㗎嘛。

鄭偉波先生：係整理個票價調整安排。

羅先生：（經傳譯員）但係嗰度有一個方程式又可以計出嚟㗎嘛，然後就申請嘅。

鄭偉波先生：但係我哋嗰個唔係一個自動機制嚟嘅，我哋係根據嗰個 FAA，可以去遞交個申請，而申請咗之後，就有一連串、一系列嘅審核同埋批准嘅程序嘅，我哋同地鐵係唔同嘅。

羅先生：（經傳譯員）係咪就係嗰個程序定抑或係有邊啲方面你係想佢喺檢討嘅時候作出一個改動呢？

鄭偉波先生：其實我覺得如果我哋嗰個票價調整嗰個肯定性係加強同埋透明度係增高，最少喺呢兩方面我覺得係可以改進嘅。

MR DUNCAN：（經傳譯員）主席，為咗紀錄，我就睇到嗰個票價調整安排，呢個係運房局嘅文件，THB-2，23 嘅，嗰個檢討就係運房局係有處理，有講嘅，跟住嗰頁 THB-2 24、25 頁嗰度係有嘅，呢個為咗紀錄嘅啫。

主席：（經傳譯員）或者可以打埋出嚟，呢個係一個證供。

MR DUNCAN：（經傳譯員）我哋講呢方面之前，鄭生，咁理解啱唔啱呢，就係你其實就係討論過一個票價調整嘅安排嘅更改，但係政府就冇話畀你知嗰個結果--討論之後嘅結果係點，就冇講嘅，係咪？係咪呀？

鄭偉波先生：係嗰個檢討仍然係喺政府嗰處進行緊。

MR DUNCAN：（經傳譯員）你唔知道嗰個檢討嘅結果係點樣嘅，目前唔知，係咪呀？

鄭偉波先生：目前係唔知道嘅，係未知道嘅。

MR DUNCAN：（經傳譯員）好喇，可唔可以打出嚟就係 THB-2 嗰度 24、25 頁？我哋睇 24 頁嘅，第 24 頁嗰一版，冇錯，或者我讀一讀，你可以跟住睇。我哋睇番前一頁先，等我哋睇晒，全面啲，第 23 頁嗰度，你睇到(d)嗰度，係咪？「票價調整安排」，然後就目前嘅安排咁樣，睇到嘛？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）或者我想睇下一頁，第 24 頁，4.28，「上述嘅安排就係由 06 年係制定嘅，就係經過同立法會諮詢，個安排之後就係有微調嘅，就考慮到嗰個 09 年嘅檢討嘅結果，由於目前嘅安排基本上就係平衡咗巴士服務嘅有效運作同埋公眾人士嘅接受程度同埋負擔能力，係冇需要係檢討或者修改呢一個票價修訂安排嘅。

喺呢一方面，政府其實做過一個檢討嘅，檢討過呢個票價調整安排，初步嘅結果就係顯示就唔變，而嗰個數據係兩方面可以係修訂或者更新嘅，第一，就係嗰個生產力嘅因素，(b)就係乘客嗰個獎勵嘅安排。」詳細唔講喇，呢度。

好喇，講到係 4.30 嗰度，「政府就係同專利巴士公司就有一個嘅討論，就係講嗰個檢討嘅，而有關嘅兩項數據係會更新嘅，佢哋就會係宣布嗰個嘅結

果，同埋喺 18 年上半年就得到呢一個行政長官會同行政會議嘅批准，就會行。」㗎喇咁。

好喇，根據呢一個聲明，鄭生，政府其實就係有開始同巴士公司係討論嘅，你都知喇，就係根據嗰個初步嘅檢討結果，同埋佢哋所建議嘅，即係話個安排應該係維持不變嘅咁樣，但係嗰個有關數據兩方面就會係更新，其實你有冇得到知會就係話政府喺呢方面嘅睇法呢？

鄭偉波先生：我知道政府係做緊檢討嘅。

MR DUNCAN：（經傳譯員）但係政府有冇同你講過就係佢哋嘅結果...

主席：（經傳譯員）初步結果喇，不如話。

MR DUNCAN：（經傳譯員）個初步結果就係顯示嗰個安排就應該維持不變嘅，但係有關嘅數據兩方面係會更新嘅，正如喺第 4.29 嗰段有講，政府有冇同你講過呢一方面呢？

鄭偉波先生：係開會嘅時候有講過嘅，但係至於嗰個兩個數據嗰個更新，會更新成為係乜嘢數字呢，我哋就係未知嘅，而呢兩個數字其實就係好重要。

MR DUNCAN：（經傳譯員）你而家仲係等緊有關嘅細節嘅數字，係咪呀？你立場係咪咁呀？

鄭偉波先生：係。

MR DUNCAN：（經傳譯員）唔該晒。我哋而家講完嗰個票價調整嘅安排，而家想講 MISC-1--MISC-2 嘅，應該係，或者想請大家留意一份文件，琴日都睇過㗎喇，就係文件夾嘅第 643 頁，翻譯版就係 644 嘅，644-1 嗰度，或者係搵埋嗰個中文嘅文件，就係 644-3 嘅，唔該晒。你記唔記得我就曾經提過呢一份嘅意見書，尋日同你講嘅，記唔記得？就係呢個民主陣線嘅一份意見書，記唔記得呀？

鄭偉波先生：記得。

MR DUNCAN：（經傳譯員）呢個就係關於嗰個專利巴士車長薪酬嘅，今日我就想你留意一下佢哋係想委員會注意嘅一點，就喺第三段，第一版嘅第三段，就係講個巴士車長工業行動，就係 17 年 2 月同埋 18 年發生嘅，就引起社會各界關於巴士站違例泊車、車長待遇、工作時數等等問題咁樣，跟住就講到以下就係一啲巴士站違例泊車嘅原因咁樣，有四項嘅呢一度，睇唔睇到，鄭生？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）或者睇落去下一頁，文件嘅下一頁就係 644 嘅，翻譯版就係 644-1 嘅最後嗰段，就係解決巴士站嗰度違例泊車，就係有一定嘅政策，就要修訂過時嘅法例，同埋就係多方面嘅措施先解決到個問題咁樣，跟住有一

段就係睇到星加坡嘅例子，同埋就係巴士上面就係安裝攝錄機咁樣嘅。其實公司係咪認為巴士站嘅違例泊車係一個問題呢？

鄭偉波先生：鍾生會回答。

鍾澤文先生：係嘅。

MR DUNCAN：（經傳譯員）可唔可以同我哋描述一下究竟問題有幾嚴重呀？

鍾澤文先生：有好多巴士站因為有一啲違例泊車就阻礙咗我哋巴士係可以停近嗰個行人路邊上、落客，就算係有一個 bus stop 嘅 marking 係 mark 咗喺度都好，因為我哋架巴士需要一段距離去轉入嗰個彎道嘅，如果有違例泊車喺嗰個巴士彎嘅前、後泊咗喺度，亦都會阻礙到我哋嗰個巴士嘅運作，逼使有時啲巴士係要喺路中間畀個乘客上落咁樣，呢個問題都幾普遍同嚴重。

MR DUNCAN：（經傳譯員）係咪有安全嘅顧慮喺呢方面？

鍾澤文先生：都有嘅。

MR DUNCAN：（經傳譯員）邊方面呀？

鍾澤文先生：譬如違例泊車會令到路面嗰個闊度係減少咗，架車經過嗰陣時嗰個情況就好容易因為架車--巴士大，轉彎係會揩碰到，或者乘客唔可以喺呢個路邊嗰度上、落客，形成佢喺上、落客嗰陣時可能有車撞到佢或者係佢會容易跌到。

MR DUNCAN：（經傳譯員）我哋返番去嗰封信--等陣先，公司其實係有冇致力去刻服或者解決呢個問題呢？

鍾澤文先生：我哋有通知運輸署一啲違例泊車嘅黑點，希望佢哋可以喺呢啲路段嗰度增設一啲廿四小時嘅禁區，亦都有通知警察去執法嘅。

MR DUNCAN：（經傳譯員）咁有冇解決到個問題呀？

鍾澤文先生：幫助不大。

MR DUNCAN：（經傳譯員）好喇，我哋返番去...

主席：（經傳譯員）咁有冇採取過行動--有冇任何行動採取過㗎？

鍾澤文先生：警察會採取行動，但係當警察係離開咗嗰個地點之後，嗰一個泊車問題--即係違例泊車嘅問題又返番嚟嘅。舉一個例，譬如話喺銅鑼灣怡和街崇光百貨公司門外就經常出現呢啲問題，早前亦都出現過的士上客，同我哋啲車嘅車長係發生衝突呢啲嘅問題嘅。

MR DUNCAN：（經傳譯員）好喇，而家返番去嗰封信，就係有提到星加坡嗰個嘅制度咁樣，我而家係引述番嗰封信，即係星加坡安裝咗呢啲鏡頭，即係喺巴士線嗰度，星加坡自從 2008 年安裝咗喺巴士上面嘅鏡頭，就近住呢個司機位嘅，佢

啲就可以睇到有車係違例泊車，就亦都係有啲紀錄就係十分鐘嘅紀錄咁樣，佢係可以搵警方嚟到去處理，警方可以係睇番嗰個紀錄，兩個禮拜之後就會將個告票送畀嗰個司機，呢個就係香港紙 800 collect，然後就係如果唔交，仲有 500 collect 嘅罰款，有監禁嘅。呢個係 2012 年，佢啲就好多時就喺巴士站嗰度係上、落客咁樣嗰啲，啲私家車，2014 年個數目就減低到係 886 嘅，亦都係好有效咁樣係阻止到一啲司機喺呢啲巴士站嗰度停車嘅。係咪呢種方法對你嚟講，都覺得係幾好呢，有吸引力呢？

鄭偉波先生：我對於呢一個建議裏面嗰啲內容嗰個可信性，我係有疑問嘅，如果我嘅理解係正確嘅話，佢係講緊就係部巴士上近住個司機位就安裝一部錄影機，而駛到去車站，發覺有人喺個車站度泊低咗架車，於是個巴士司機就撳個掣，就會自動就錄影五至十分鐘嘅影片，即係我嘅理解就係咁嘅，首先喺香港我啲啲巴士駛到去一個車站，我意思係中途嘅車站，係永遠冇可能停喺度五至十分鐘嘅，我啲架巴士。而星加坡嗰個運作模式其實同香港都有類似嘅地方，我就唔係太覺得喺星加坡可以有架巴士駛到去個站就見到有架車就阻--泊咗喺處，仲要嗰架巴士就唔好駛入個站，係咁影住嗰架車就影五至十分鐘，即係呢個我聽起上嚟就不可行嘅，即係至少喺香港我啲嘅運作係不可行。

主席：（經傳譯員）五至十秒呀？

鄭偉波先生：我呢度中文版係五至十分鐘，5 to 10 minutes。

主席：（經傳譯員）如果五至十秒又得唔得呢？

鄭偉波先生：就要視乎我啲架巴士係能唔能夠譬如駛前啲就去停到個站，如果可以，而我又唔使前少少，就停住架車喺處就係咁影住人啲嗰個違例架車，影佢五至十秒，呢個其實會阻慢咗我啲乘客，亦都會阻礙到路上嘅交通。多謝。

主席：（經傳譯員）喺柴灣車廠嗰度，你啲就有啲係示範，就話你啲有啲向前--個鏡頭向住前面嗰種裝置㗎嘛，係咪呀？

鄭偉波先生：係有嘅。

主席：（經傳譯員）我啲就見到就係有位女士佢喺嗰度等，然之後就再開門，就讓佢可以上車，係咪呀？

鄭偉波先生：係。

主席：（經傳譯員）呢啲咁嘅鏡頭就可以捕捉到剛剛所提及嘅情況，係咪呢？

鄭偉波先生：會係捕捉到可能係一秒、兩秒、三秒嘅畫面，但係如果只係一、三、兩秒嘅畫面，我就唔知道係唔係足夠可以罰呢個私家車，話佢停咗喺巴士站度，我唔熟悉嗰個警方檢控嗰個準則，即係係咪停兩秒鐘喺處就可以出告票，我唔知道。

主席：（經傳譯員）呢啲就係檢控當局嘅事，但係起碼你啲就可以提供到啲證據畀佢

哋，讓佢哋自己去判斷夠唔夠證供去告。

鄭偉波先生：但係如果係咁樣做，我哋個車長係要去自己一路揸緊車，就要記低喺幾多點鐘喺邊個巴士站曾經有人就停咗架車喺處，到放工嘅時候就將呢一個嘅 logbook 或者呢個 log 就交畀公司，就公司就再去搵番呢部車，就去 download 條影片，要一系列嘅程序先至做得到，其實我覺得呢件事，最應該要做嘢嘅係警方，因為嗰個路段如果係唔准停車嘅，就應該係警方去執法，因為如果唔係呢，我哋個車長已經係好忙㗎喇佢個工作，揸緊車嘅時候，仲要再去記埋呢啲嘢，就加重佢哋嗰個工作負擔嘅。多謝。

主席：（經傳譯員）你知唔知道警方其實有咁嘅建議，我諗係運輸署同埋立法會就係建議就係用--喺燈柱嗰度有啲鏡頭嚟到處理你剛才所講嘅情況，就會係有一個來源，就讓我哋可以搜集到證據喇？

鄭偉波先生：如果喺燈柱嗰度愛嚟做，我覺得係非常好嘅，但係就希望唔好搞到我哋啲車長都要做埋呢一個工作。

主席：（經傳譯員）我諗相信都好簡單嘅啫，要做嘅話，因為你純粹就話畀警方聽邊一啲巴士站就係黑點，然後警方就去裝設嗰啲鏡頭。

鄭偉波先生：呢個係可以嘅。

主席：（經傳譯員）你又知唔知道其實係有一啲系統係可以幫你辨識嗰啲車牌秣巴，就個電腦或者係有一個鏡頭就會影張相，影咗個車牌張相，然後就再將佢配對番、搵番出嗰個係車主？

鄭偉波先生：呢個好技術性嘅嘢，我畀鍾生回答。

鍾澤文先生：我哋知道係有嘅，不過即係呢個系統都唔係我哋可以--喺我哋負擔嘅範圍。

主席：（經傳譯員）我係提議或者運輸署同埋警方可以考慮呢一點，即係有個鏡頭就拍低嗰個係停咗喺度嘅車，即係霸住咗嗰個巴士站，將呢架車嘅相影咗，然後個電腦就會係睇下個車牌秣巴係幾多，然後配對番、搵番出嗰個車主，第三步，就係用電郵就係發出一張告票。

鄭偉波先生：我哋歡迎嘅。

主席：（經傳譯員）鄧律師。

MR DUNCAN：（經傳譯員）仲有多一樣嘢係想問鄭生嘅，如果我可以嘅話，我哋見到一份文件嘅，822 嗰頁，DM-1 嘅 822 嗰頁嗰度可以搵到呢個資料嘅，對唔住，係 SEC-2 嘅 822 頁，我亦都唔肯定你之前有冇睇過呢份文件，你喺螢光幕上面見到呢個就係話係一份係資料文件嚟嘅，係關乎喺首爾同埋星加坡嘅專營巴士服務，睇嚟就係立法會秘書處佢哋嘅研究部嘅，你有冇睇過呢份文件呢？

鄭偉波先生：我哋冇睇過嘅。

MR DUNCAN：（經傳譯員）我就想請你直接去睇第 826 頁，826，我想你睇呢個 2.11 段，嗰度就係話實施一個巴士訊號優先系統，睇唔睇到個標題？

鄭偉波先生：睇到。

MR DUNCAN：（經傳譯員）或者我將嗰度係讀出嚟，「呢一個巴士訊號優先系統其實全世界有好多城市都有做嘅，呢一個係一個交通訊號嘅提升策略，呢一個策略就係讓巴士可以有效咁樣樣係進出嘅，就係透過嗰個有燈號嘅路口，就讓一架嚟緊嘅巴士就可以係對比起其他入嗰個路口嘅車輛係有優先權使用嗰個路口嘅。首爾嘅政府就係有用到呢一個咁嘅系統嚟到係讓嗰個交通訊號可以優化，嚟到係等巴士可以行得快啲。」你知唔知道有咁嘅系統，係世界各地嘅城市係有做嘅呢？

鄭偉波先生：我哋知道世界上係有呢啲系統嘅，同埋我哋知道星加坡係有類似嘅系統嘅。

MR DUNCAN：（經傳譯員）你認唔認為咁樣樣嘅系統喺香港都用得著呢？

鄭偉波先生：我哋會非常歡迎。

MR DUNCAN：（經傳譯員）你哋有冇採取過任何嘅步驟係讓人考慮呢一個咁嘅建議呢？

鄭偉波先生：我哋一向覺得呢個係政府要做嘅嘢。

MR DUNCAN：（經傳譯員）你哋有冇同政府提議過？

鄭偉波先生：我哋冇同政府提議過。

MR DUNCAN：（經傳譯員）我諗喺世界上有一啲城市巴士一般嚟講都係得到優先嘅，係咪呀？譬如話巴士係入站，就係私家車就係要讓畀巴士嘅，係咪世界有啲地方係有啲國家係有咁樣嘅優先嘅政策嘅呢？

鄭偉波先生：我畀鍾生回答。

鍾澤文先生：係嘅，我哋都知道譬如星加坡咁樣，佢哋係譬如巴士離開站，其他車係要讓畀佢出先嘅。

MR DUNCAN：（經傳譯員）呢樣嘢係咪你哋公司都會覺得係好嘅呢？

鍾澤文先生：我哋係覺得係好嘅，但係喺香港，可能嗰個路面嘅環境未必許可嘅，譬如話我哋有啲巴士專線，過往都因為有人投訴而要取消咗。

主席：（經傳譯員）邊個投訴？

鍾澤文先生：有市民投訴話嗰個巴士專線嘅使用量低，而令到就要取消。

主席：（經傳譯員）嗰啲自己本身係駕駛人士嘅市民呀？

鍾澤文先生：我唔清楚，但係呢個係由運輸署去通知我哋。

主席：（經傳譯員）假設唔係企喺巴士--同其他一百三十個乘客一齊企喺巴士上面嘅市民啩。

MR DUNCAN：（經傳譯員）講番喺首爾嘅嗰個系統，就即係話佢哋有一個巴士訊號嘅優先系統，如果你正話嘅回應，其實你覺得係咪值得同運輸署係討論呢個問題呢？

鄭偉波先生：值得。

MR DUNCAN：（經傳譯員）有冇計劃點樣做呀？

鄭偉波先生：經過今日呢次會議之後，我哋係被 enlighten 咗，我哋係會咁做。

MR DUNCAN：（經傳譯員）或者想講講其他嘅問題，今日下晝係有提到嘅，第一就係想請你留意一下第 32 條第(1)款，呢個係喺《公共巴士服務條例》嘅，32(1)。

主席：（經傳譯員）文件有冇㗎？

MR DUNCAN：（經傳譯員）喺 THB-2，就係 124 頁。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）THB-2，124 頁，33 條(1)，你自己可以睇一睇先，鄭生。「任何專營權公司如果因為運輸及房屋局局長或者係因為根據第 3 條獲給予指示嘅公職人員，又或者因為署長或者署長授權嘅人，根據本條例或者該專營公司專營權所作嘅決定、指示、要求或者規定感到受屈，可以喺給予或作出該項決定、指示、要求或規定嘅廿八日之內，以呈請方式向行政長官會同行政會議提出上訴，而行政長官會同行政會議嘅上訴所作嘅決定係最終嘅決定。」你知唔知有呢項條文㗎？

鄭偉波先生：我係知嘅。

MR DUNCAN：（經傳譯員）公司有冇曾經用過呢個條文？

鄭偉波先生：冇用過。

MR DUNCAN：（經傳譯員）仲有一項，就係關於我都提過嘅一點，就係嗰個保養，係咪對意外係有一個--造成一個因素，我就想委員會係睇另一份文件嘅，TD-2，第 183 頁，TD-2 183，呢個就係畀立法會嘅資料摘要嚟嘅，係考慮一個城巴港島嘅一啲嘅路線同埋新大嶼山巴士公司，大家可以睇到就係有提到一啲意外一啲保養，就喺 183、184 嗰度係有講嘅，而主席亦都係考慮過呢一點。

主席：（經傳譯員）係，唔該。

鄭偉波先生：對唔住，你頭先有講過話係同--講維修嘅事情，但係我呢一頁，我係睇唔到同維修有關嘅事情。

主席：（經傳譯員）我諗我諗緊嘅就係嗰個抽樣檢查，就即係嗰個問題，即係個問題嗰度嗰個數目係低嘅。

MR DUNCAN：（經傳譯員）呢個係運輸署嗰度嘅資料，可能可以睇一睇，睇下可唔可以提供畀委員會嘅。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）主席，除非委員會有任何其他嘅事項想提供，我就冇其他問題。

主席：（經傳譯員）仲有一樣嘢，就係鄭生，我想直接問一問嘅，就係你同我哋講到一個安全委員會，我相信係 4 月成立嘅，係公司成立㗎喇，嚟到去處理安全嘅問題，你作為一個主席嘅，你嘅今日嘅代表亦都係喺呢個委員會上面嘅，我問題首先就係咁樣，係咪正確嘅，就係話你哋嘅董事或者兩位嘅董事運輸署嘅僱員？

鄭偉波先生：我哋呢個安全委員會純粹係由我哋嘅 senior management 嚟到組成嘅，就冇--我哋冇邀請到政府嘅官員喺呢個委員會嗰處，因為如果我哋公司有需要有事情要同運輸署商討，我覺得係應該係公司同運輸署之間嘅會議嚟嘅，就唔係話邀請運輸署入嚟我哋呢個安全委員會。

主席：（經傳譯員）好喇，就有公司董事喺度，你就決定唔請運輸署，係咪因為有衝突定乜嘢呢？

鄭偉波先生：完全同有衝突係冇關係嘅，因為我哋公司嘅運作就係由我哋公司嘅管理層負責嘅，而運輸署佢有兩位嘅--而家有兩位政府官員就喺我哋嘅董事會嗰處嘅，我哋一般我哋嘅運作就係番我哋自己嘅管理層嚟到負責嘅，就我哋嘅--譬如喺我哋公司嘅非執行董事都唔會參與我哋公司嘅運作。

主席：（經傳譯員）好，唔該晒。好喇，我哋問都問得七七八八。我知道你係有一份聲明想講嘅，係咪呀？而家可以講，鄭生。

鄭偉波先生：多謝主席。主席，我代表新巴、城巴就過往兩日嘅聽證會多謝以下嘅人士：一，獨立檢討委員會邀請我哋出席呢兩日嘅聽證會；第二，鄧樂勤資深大律師同埋律師團隊喺呢個聽證會對我哋嘅提問，而等到我哋有機會講解我哋公司嘅營運情況；三，係獨立檢討委員會嘅秘書處喺過往兩星期所作出嘅安排；最後，我亦都要多謝負責即時傳譯嘅人士所提供嘅服務，多謝主席，多謝各位委員，多謝各位。

主席：（經傳譯員）好喇，最後，我哋都係好感激大家口頭作出陳述，同埋就希望有

啲資料就你可以進一步書面咁樣提供畀我哋嘅，秘書處就會係指明邊一類嘅問題，就會畀嗰個謄錄嘅文本畀大家，等大家可以係清楚啲嘅。

鄭偉波先生：一定，多謝。

主席：（經傳譯員）好，唔該晒。

鄭偉波先生：多謝主席。

(10.00 am)

EVIDENCE FROM NEW LANTAO BUS CO LTD: MR JAMES WONG CHEUK ON, MR TIMOTHY WONG CHEUK TIM, MR BENNY CHAN TIN LUNG, MR PATRICK YEUNG KA PO, MR RICHARD LEE CHUN FAI, MR BILLY WONG LEONG TING (given in Cantonese; transcription of the simultaneous interpretation)

CHAIRMAN: Good morning. We thank Mr James Wong and the other representatives of the New Lantao Bus Company who have attended today to assist the committee by supplementing what they have provided already in written submissions with answers to questions that counsel to the committee will ask of them.

Before we reach that stage, I understand, Mr Wong, that you wish to make a short statement orally in opening, and I would invite you to move to that now.

Opening statement by MR JAMES WONG CHEUK ON:

MR JAMES WONG: Mr Chairman, members, counsel, ladies and gentlemen, good morning. I am Wong Cheuk On, James. I am the managing director of the New Lantao Bus Company (1973) Ltd. My colleagues and myself would like to thank the committee for inviting us to attend today's hearing to give oral evidence.

We are open-minded on the examination of the franchised bus system by the Independent Review

Committee on Hong Kong's Franchised Bus Service. We have all along been operating our bus service in strict compliance with the relevant legislation, franchise terms as well as the guidelines issued by the Transport Department. In recent months, we have implemented and will implement the following measures in our daily operation as well as administration, with a view to enhancing the safety level in operating our bus service.

First, increasing the number of hours and the instructor-to-trainee ratio of driving training for our bus captains; second, requiring the part-time bus captains to declare more information about their principal employment; third, setting up a Bus Captain Training School to assist qualified persons in obtaining bus driving licences; and fourthly, making reference to international standards in raising the standard of safe driving.

We apologise for not being able to provide written information in time on the aforementioned measures to the committee. We are pleased to provide detailed information at today's hearing. If necessary, we can submit more detailed information after the hearing.

Thank you, Mr Chairman.

CHAIRMAN: Thank you, Mr Wong. I'm sure, from what you've said in your statement, that counsel will be asking you

questions on those new matters, but I would ask counsel, Ms Wong, to begin questioning.

Examination by MS WONG

MS MAGGIE WONG: Yes. Mr Wong, good morning, and good morning, gentlemen, and thank you for attending the committee this morning, and thank you for your opening statement, Ms Wong.

There are a number of matters that I would wish to explore with you arising from the submissions that you have already supplied to the committee.

In your submissions, the number of part-time bus captains employed by your company, if we can see at NLB bundle 1, page 17 -- we can see in the table the number of part-time bus captains employed by your company has nearly tripled in the past six years. As we can see, 13 part-time bus captains in 2012, that is about 9.4 per cent of 137 total bus captains, to 2017, where we have 53 part-time bus captains, constituting 27 per cent of the total 183 bus captains employed by the company. And we can see throughout the years the employment and proportion of the part-time bus captains has been constantly rising between 2012 and 2018.

Can you first of all tell us why there has been such a substantial increase?

MR JAMES WONG: Thank you. First of all, let me make

a point. From the perspective of the company, whether a bus captain is full-time or part-time, in relation to the safety requirements of the driving skills, we don't make a distinction. In other words, we won't harbour the thinking that part-time bus captains would drive more dangerously. We don't think this happens.

And regarding the counsel's question, that is between 2012 and 2017, why the number of part-time bus captains has been increasing all the time -- well, for full-time and part-time bus captains, I think the major difference is that part-time bus captains can turn up for work for fewer days. In other words, they have more flexibility concerning their work as well as their leave. They can make their own arrangements.

And we are different from two other companies. For part-time bus captains and full-time bus captains, they were very different in their case, but for the case of the New Lantao Bus Company, other than salary, we are not able to give too many fringe benefits to our full-time bus captains. Say, for example, for other bus companies, for the full-time bus captains, they do have a concessionary fare card for their family members. In our case, as of today and as a result of the use of Octopus cards, we are not able to share such concessionary cards with the other two bus companies.

In other words, the fringe benefits for our bus captains is such that their family members can have a free ride on New Lantao buses but not on other buses of other bus companies.

Of course, I won't know the details about the number of such cards given to the family members, but you can see that there is a very clear distinction between full-time and part-time bus captains.

I also mentioned that in the case of part-time bus captains, they are able to have a greater flexibility in terms of the number of working days, and that's why many colleagues are interested in becoming part-time bus captains.

MS MAGGIE WONG: Thanks for your answer, but my question is actually: do you know why there has been such a substantial increase in terms of the number of part-time captains over the years?

MR JAMES WONG: When we recruit our staff, we recruit both full-time as well as part-time bus captains. It won't be because of financial reasons or any other work-related reasons we are interested in part-time rather than full-time bus captains. No, that's not the case.

A candidate will approach us for recruitment. We tell him about the package for full-time as well as

part-time bus captains. Of course we welcome him as a full-time bus captain, because in terms of deployment, it's easier for the company because we are certain about the number of working days from this full-time bus captain. For part-time bus captains, it's uncertain, and of course the decision is in the hands of the candidate. If somebody would like to be a part-time bus captain, we can't impose a wish on him and say, "You must be full-time." You may ask why we haven't been employing more people. Well, in fact, it was only in recent years we have seen a greater number of routes and we have recruited more people and that's why we have seen an increase.

You ask why more part-time and not more full-time bus captains. That's the explanation. It's up to the candidate to choose. So it is not for us to make a choice.

MS MAGGIE WONG: So, if I understand correctly, it's because of the manpower shortage, or there are other reasons, or because of the pay? Or there is increase in manpower supply because of the increase in demand of bus captains?

MR JAMES WONG: You asked for the reason. As I have said in the outset, I don't think, if you say there is a shortage, it means we would not even be able to get

part-time bus captains. That's my view.

On the other hand, as I have said, in fact we did think about it and some colleagues also told us about the small difference between the pay for full-time and part-time bus captains, and then to individual bus captains, since our franchised service is rather focused on the Lantau district only, so if somebody isn't living on Lantau Island, then, as I have said, the concessionary card for the family members will not be attractive.

So, in the trade, somebody has said that such a concessionary card would have the value of $1,000 if you take a ride every day. For us, for our full-time bus captains, this isn't something that they have when they compare with other bus captains from other bus companies.

When you asked for the reason, of course, on our part, we can't be sure about the reason in individual cases. It is up to them to make a choice. But I think probably it is due to the fact that the pay isn't really that different, among other reasons.

MS MAGGIE WONG: Does your company regularly recruit full-time bus captains who have retired, to take up employment as part-time bus captains?

MR JAMES WONG: Counsel, was it your question that whether

we recruit our retirees?

INTERPRETER: Yes.

MR JAMES WONG: Yes, we did. When a colleague retires, and if his health condition is still fit for taking up the duty as a bus captain, then we will offer to him that he should stay with us.

MS MAGGIE WONG: What is the approximate percentage?

CHAIRMAN: What is the retirement age for full-time bus captains?

MR JAMES WONG: 65.

CHAIRMAN: Thank you.

MR JAMES WONG: Can we provide the information after the hearing? At this moment, I'm afraid we don't know how many retired bus captains have become part-time bus captains. But initially I don't think there are too many of them at this moment.

MS MAGGIE WONG: In your introductory remarks, you stated that in recent months your company has implemented and will implement measures in your daily operation and administration, with a view to enhance safety level in operating buses. This includes requiring the part-time bus captains to declare more detailed information about their principal employment.

You also stated you are pleased to provide further information to the chairman and members at the hearing

today.

Can you tell us, first of all, what are the new measures?

MR JAMES WONG: May I defer to Mr Benny Chan?

CHAIRMAN: Yes, please do.

MR BENNY CHAN: Thank you, Mr Chairman. Mainly speaking, we have enhanced the requirement that part-time bus captains must declare to us their principal employment as well as the number of working hours, so as to safeguard us, so that we can meet the requirements of the Transport Department.

MS MAGGIE WONG: So since when did you implement these measures?

MR BENNY CHAN: For this measure, it was introduced recently in June.

MS MAGGIE WONG: So do I understand it correctly, before June, there is no requirement for part-time bus captains to declare information about their principal employment?

MR BENNY CHAN: Well, when a bus captain joins us, we do require the bus captain to make a declaration about his work. Now, the difference is that within a certain period of time, we will ask the bus captain to make a declaration again to update the information.

MS MAGGIE WONG: Do all part-time bus captains have to fill in a form?

MR BENNY CHAN: The part-time bus captain, upon joining the company, has to declare, by filling out the information, as shown on the screen, there is a form.

MS MAGGIE WONG: We will come to that form in a moment, but after June, do you have a new form requiring the part-time bus captains to declare their working hours, before their employment?

MR BENNY CHAN: Yes, we do. We have already prepared a new form for the bus captains to declare their work details.

MS MAGGIE WONG: Can we have a sample of that form, if convenient?

MR BENNY CHAN: Yes. Later on, we can provide it to the committee.

CHAIRMAN: Please do so, and there's an earlier matter that you indicated that you would supply information. That was Mr James Wong, who said that you would provide information as to the number of retired full-time bus captains who work part-time. So that's the second item on the shopping list, as it were.

MR JAMES WONG: (In English) Okay.

MS MAGGIE WONG: Now, Mr Wong, you earlier referred to your current application form. If I can take you to bundle 2, NLB-2, page 468.

If we look at the form, the form itself does not require part-time bus captains to provide information as

to whether they are currently working part-time or the work nature and the working hours. And earlier, when you gave evidence, you said the form itself does provide declaration for that kind of information. Can you tell us where?

MR JAMES WONG: Thank you. I would like to say that in this form, when they are required to fill in, at the time when they join us, we require the person to declare to us where they have worked before. But indeed, in this form, there is no requirement to do so, because their employment may be clerical and not related to driving. So there is no requirement of stating the number of work hours in the old form.

And in the new form which Mr Chan mentioned, it has this added.

MS MAGGIE WONG: So it's not simply a form but a new employment contract, if I understand correctly? Or it is two different things?

MR JAMES WONG: It's not a contract. Serving part-time bus captains will have to file this declaration.

MS MAGGIE WONG: And have you revised this employment contract since June?

MR JAMES WONG: No, not this one.

MS MAGGIE WONG: And if I may take you to the declaration paragraphs in the current form at page 472, in all these

paragraphs of your existing form, it does not specifically require the part-time bus captains to declare if they have adequate rest time before commencing their duties? Can you confirm that?

MR JAMES WONG: That is right. I confirm that.

MS MAGGIE WONG: And just now you said there would be certain period of time where you would require part-time bus captains to declare the information. Under these new measures, how regularly or what is the period of time would you require part-time bus captains to declare principal employment and working hours?

MR JAMES WONG: At this stage, our plan is to ask the colleague to, starting from June -- well, because they are part-time bus captains, they won't come to work every day; they will have to furnish all the information to us. That is to start with.

Just now, you asked about the frequency of making such a declaration. Our thinking at this moment is once a year. Say, for example, in a year's time, they will have to update the record.

But this is a new measure, after all, so we think that perhaps in three months' time there will be a review on the frequency and whether this measure is appropriate and sufficient.

MS MAGGIE WONG: And in your new form, is there any

requirement which requires an employee to oblige to inform you if he changes his outside employment or undertakes new employment, given it will be an annual declaration?

MR JAMES WONG: Yes. Yes. It's there.

MS MAGGIE WONG: If I could go back to the previous practice --

CHAIRMAN: Before you do that -- are we to understand that this process has begun with you asking part-time bus captains to declare their principal employment and their working hours, that you've already started asking some bus captains, part-time ones, those questions?

MR JAMES WONG: Yes. Yes. We have begun doing that.

CHAIRMAN: Have any of these part-time bus captains declared that they do have other employment and have given you their working hours?

MR JAMES WONG: Yes, indeed, Chairman.

CHAIRMAN: Have any of them told you they have other employment involving driving?

MR JAMES WONG: Yes.

CHAIRMAN: Are you able to illustrate, by reference to one of the bus captains, what kind of employment and how much driving was involved in this other job?

MR JAMES WONG: Chairman, the initial information we have got -- well, I hope that you would give us some time to

collate the information. From the initial information we have received, there are part-time bus captains, according to them, that they are bus captains working for a hotel. According to the information supplied to the company, they work on average five days a week. Per working day, the average driving time is about eight hours. That is just an example.

CHAIRMAN: Can you give us some idea of how many of your part-time bus captains you have asked these questions of, so far?

MR JAMES WONG: There are 30 or so of them who have replied to us. It's about 80 per cent of our part-time bus captains, those 30 or so bus captains.

CHAIRMAN: Thank you, Mr Wong.

Yes, Ms Wong.

MS MAGGIE WONG: Thank you, Mr Wong.

If I may take you to your submissions at NLB bundle 1, page 31, the third box from the right. You submitted that you:

"... require the applicant to submit their past and existing employment information in the application form ... During the recruitment process, we will explain to applicant, no matter he/she apply for part-time or full-time bus captain vacancy, their working arrangement is regulated by [the guidelines] ... and verbally convey

[ed] to part-time bus captain applicant that they have to ensure sufficient rest time and separation time from other external employment."

My question is this. Apart from verbally conveying to these part-time bus captains that they have to ensure sufficient rest time and separation time, are there any requirement or disclosure made by part-time bus captains as to the number of hours they worked prior to coming to their duties in your company?

MR JAMES WONG: Thank you. At the time when we furnished the information, there was no such thing. It was only verbally. It was the information we have supplied. There is a new measure that we require them to declare the information.

MS MAGGIE WONG: So prior to June 2018, there was no way you could ascertain if the part-time bus captains have been working over the working hours as stipulated in the guidelines, apart from this verbal assurance?

MR JAMES WONG: That is right. Prior to June -- well, to a certain extent, today -- we rely on face-to-face communication with bus captains in relation to their working hours of the principal employment.

MS MAGGIE WONG: Now, if I may take you to some of the documents that we have seen from other bus companies. If I may take you to CTB bundle 2, page 400.

At page 401, that's page 2 of the original document, headed, "Important information", item 3, it reads:

"Are you currently working part-time? If yes, what is the work nature and [the] working hours?"

This is the Citybus application form, and as one can tell, it requires the employee to specifically state in the employment contract whether they have other part-time employment.

Would you consider adopting this form, in revising your employee application form?

MR JAMES WONG: The document you just showed me -- well, I will have to look further into it with my colleagues. My initial thinking is it is of high reference value. We will consider adopting or enhancing such measures.

MS MAGGIE WONG: Yes, and also, if we continue on page 404 in Chinese, and English at page 404-1 to 404-2, we can see that is a requirement, perhaps similar to your new form, called "Employee Code of Conduct and Discipline/Declaration for External Works", setting out in details not only the employment, the employer's company, working hours, salary, and we can see at the bottom, part C, "Signature", it requires specific declarations, requiring the employee to strictly comply with the terms of disclosure.

Would you consider adopting this in your new form,

if it hasn't contained similar paragraphs?

MR JAMES WONG: Well, we have just seen this form. We have to look further into it. Any good suggestions will be adopted by us, but I don't have time to go into it. I would need time to go into it when we go back.

MS MAGGIE WONG: Before I move on to another topic, I would like to ask something about disclosure of driving offence points during recruitment.

In your submission, you state that you request all bus captains, full-time or not, to compulsorily declare their driving offence point record annually and report to company when their points records changed, and then there would be random cross-check to be conducted, to make sure information provided by staff is true and accurate.

My first question is, would you check the driving offence points of your bus captains before you employ them?

MR JAMES WONG: I will defer to Mr Benny Chan.

MR BENNY CHAN: Chairman, at the time of recruitment, before we employ them, we will require the bus captain to obtain a record. This record will show the driving-offence points.

MS MAGGIE WONG: Thank you. If I may take you to TD bundle 1. It is a paper submitted by the Transport

Department at page 135, paragraph 4. It states in the first sentence:

"All FB operators, except the New Lantao Bus Company ..., will also check the driving offence points of their bus captain applicants."

It appears from what is stated in the Transport Department's submission that apart from your company, all other operators will check the driving-offence points of their bus captain applicants.

Do you have any comment as to this sentence?

CHAIRMAN: From what you've said earlier, this statement is inaccurate. Is that the position?

MR JAMES WONG: I believe -- well, Mr Chan talks about the check. It started at the beginning of 2018, and we have to go back to check when it was formally implemented. I think it was the beginning of 2018. When we supplied the information to the committee, we would not communicate with the Transport Department first.

MS MAGGIE WONG: I understand.

MR JAMES WONG: Perhaps in their record, this information is not updated. After all, this is internal measure of the company. Perhaps we did not mention this to the Transport Department in a meeting. That's why there is this misunderstanding.

MS MAGGIE WONG: So do I understand correctly --

CHAIRMAN: Before you move on, Ms Wong -- would you provide the information as to when it was that this check took place?

MR JAMES WONG: (In English) Yes, sure.

CHAIRMAN: Thank you.

Yes, Ms Wong.

MS MAGGIE WONG: Apart from providing the information, can you tell us about this checking of driving offence points? When is this new policy, or what is the policy before June 2018? Do you know?

CHAIRMAN: I think Mr Wong has told us that this began, he thinks, at the beginning of 2018, not June, but the beginning of the year.

MR JAMES WONG: (In English) That's right. Should be.

MS MAGGIE WONG: Yes. Now, if we look at paragraph 4, it states that:

"... Citybus ... and New World First Bus Services Ltd ... will not offer employment to applicants who have incurred 9 or above driving-offence points in the recent 2 years."

Whilst:

"... KMB and Long Win Bus ... will not offer employment to applicants who have incurred 9 or above driving-offence points in the recent 3 years ..."

Can you tell us what is your company's policy in

relation to this?

MR JAMES WONG: We don't have detailed information for the time being. We are not like the other two companies whereby we have clear stipulation as to, say, in the recent two to three years, whereby you have certain points deducted, then you will not be hired. At this moment, we don't have such a policy.

MS MAGGIE WONG: Would you consider adopting this policy?

MR JAMES WONG: We will consider doing so.

Now, we want to look at whether the bus captains have driving-offence points deducted, and actually we can observe that through their normal driving attitude. We will consider adopting such a policy, but at this moment, if you are to say specifically whether it's seven points, nine points, two years or three years, I cannot give you a definite answer. We will consider doing so.

MS MAGGIE WONG: Based on your answer, do I understand correctly that prior to 2018, your company have not checked the driving-offence points of part-time bus captains at all?

MR JAMES WONG: Chairman, can you give us some time to collect the relevant information and pass the same on to the committee later?

MS MAGGIE WONG: Thank you.

CHAIRMAN: Very well. Thank you.
MS MAGGIE WONG: Now, moving on to another topic, the use of non-franchised buses.
MEMBER LO: I have a question.
CHAIRMAN: Prof Lo wishes to ask a question.
MS MAGGIE WONG: Yes.
MEMBER LO: I just want to clarify that the use of higher percentage of part-time bus captains, is that a strategy of the company or is it a consequence of your ability to hire full-time, that you cannot hire enough full-time, so you become hiring part-time? So which is which?
MR JAMES WONG: Thank you, Professor. Is it the company's policy to hire part-time bus captains? Definitely not. The counsel has also asked why there is a high ratio of part-time bus captains. Before the committee's hearing, for myself, I don't know the number of part-time bus captains in other companies. Only after the hearing did I learn about the higher ratio of part-time bus captains in our company versus other bus companies.

So we've been pondering what the real issue is here. Of course, we are inclined to hiring more full-time rather than part-time bus captains.

MS MAGGIE WONG: Following on that question, Mr Wong, in your submission at page 18, NLB bundle 1 at page 18, and if we can see the paragraph right below paragraph 6 and

above section 5, "Journey time", it started with the words:

"During the years, we are actively resourcing manpower from different means, such as joining career day organised by Labour Department and local charity communities, job referral ..."

And the end of the paragraph states:

"Together with employment condition improvement as mentioned in previous paragraph, we believe these measures can strengthen our manpower resourcing status ..."

And you mention a number of measures from 1 to 6. Apart from those measures, have you considered other improvement measures, in terms of remuneration and benefits to part-time -- or full-time bus captains?

MR JAMES WONG: For our company, every year, basically, there will be an adjustment of the salary. As for benefits, starting 2018, we are giving an extra five days of leave to our bus captains, in the trade generally. We will give labour days 12 days and we are giving them an extra five days, which is on a par with that of the white-collar workers.

We hope the colleagues can enjoy more holidays and they can take more rest and they are given the flexibility to choose their leave days.

As for a pay rise, we will do it on an annual basis depending on the actual circumstances.

MS MAGGIE WONG: About this extra five days, that applies to all full-time employees? Is that the case?

MR JAMES WONG: Yes, that's correct, all full-time bus captains enjoy that.

MS MAGGIE WONG: May I move on to another topic, use of non-franchised bus. At page 17, bundle NLB-1, if we can see right below the table, you stated, your company stated, that with the approval of the Transport Department, you:

"... hire at least 30 non-franchised bus with bus captain from our contractor on every weekends, and this surplus of bus is almost 25 per cent extra of our fleet."

First of all, you state "our contractor" -- is it one contractor or multiple suppliers?

MR JAMES WONG: Just one contractor.

MS MAGGIE WONG: And who is that contractor?

MR JAMES WONG: It's called Kwoon Chung Motors.

MS MAGGIE WONG: Now, these franchised buses is to cater for upsurge in passenger demand only in weekends and public holidays, is that correct? It does apply to weekdays?

MR JAMES WONG: Correct.

MS MAGGIE WONG: And in your supplementary submission filed

on 15 June 2018 at page 38, NLB-1, you attach the "no objection" letter from the Transport Department dated 19 December 2017. Your letter, if we go back to page 37, also stated that the initial approval from the Transport Department was issued over the past 20 years, and that you have been locating or searching this document by different means.

Have you been able to locate this initial approval document?

MR JAMES WONG: No, I haven't been able to retrieve the information.

MS MAGGIE WONG: Will you continue with the attempt?

MR JAMES WONG: Yes, we will try to retrieve the initial letter. I joined the company in 2011 myself and I have asked the colleagues that have worked longer than myself. The letter was approved, I mean it was given, in 1990 and 1991, and on Lantau, back then, during holidays, there was a great surge in demand, but on weekend days there wasn't such a huge demand. We were talking about trips to Po Lin Monastery. At that time, not even a cable car was put in place or built, so the New Lantao Bus was given approval by the Transport Department to hire non-franchised buses to operate on public holiday to deal with the passenger demand peak.

Our company, compared to the two bus companies, in

terms of our scale and the structure of our route, it was very different from them. So conversely, actually, the holidays, we are seeing a passenger demand peak, and on weekdays we don't see such a big passenger demand.

So our starting point or rationale here is if just for the sake of coping with the demand on weekends and public holidays to procure an extra 20 to 30 per cent of buses -- well, in the 1990s, the Tsing Ma Bridge was not even built. I could not give you the exact size of our fleet back then. So that's the arrangement put in place back then and it lasts until today.

MS MAGGIE WONG: Now, this letter from the Transport Department was dated 19 December 2017, but in the first paragraph it makes reference to "your letter", presumably your application on 4 December 2017, and the first paragraph states that the Transport Department has no objection to your application for deployment of a maximum of 80 non-franchised buses on every Sunday and public holidays for six months from 1 June 2018, suspension period of Ngong Ping 360, et cetera; and 50 non-franchised buses on every Saturday in the periods mentioned in subparagraph (2).

My first question is, who decides the number of non-franchised buses to be deployed for those periods?

MR JAMES WONG: Thank you. It is our company which made the

decision as to the extra number of buses needed.

MS MAGGIE WONG: And if I understand correctly, your total amount or total number of franchised buses that you operate are 130; is that correct?

MR JAMES WONG: More or less. Around 100, 130 or so.

MS MAGGIE WONG: So the percentage is quite significant, and have you considered deploying or purchasing more buses in future, to be managed by your company exclusively?

MR JAMES WONG: Thank you. In this letter, the Transport Department approved the number, 80 and 50. That's the maximum number. And in actual fact, why were we making an application for a larger number? Usually, because the contractor would sometimes tell us that because of certain deployment situation or reasons, we need a closed road permit to go into Lantau South for these 50 buses and the administration's approval is required for them to provide the service.

So that's why we asked for more. Your question, on whether we would be procuring more buses ourselves -- for the time being, we don't have such a plan. That's exactly because of what I just said. Even if we procure more buses, it's just for the sole purpose of certain passengers, on Saturdays and public holidays and Sundays. But we are just talking about two days in a week.

Even -- it's not the case that for a Saturday and a Sunday there would be a lot more passengers. For example, if the weather is not that good, then the situation would be affected. Now, the buses going to Tai O and Ngong Ping will see passenger rise in public holidays, but in, say, bad weather, the passenger number will significantly drop. So at this juncture we don't have plan to add more buses.

Say, however, if in the long term, if we see that there is an increase in passenger demand from Monday to Friday, then we will of course consider procuring our own buses.

MS MAGGIE WONG: Thank you. Who decided the six-month period as set out in paragraphs (1) and (2) for the deployment of non-franchised buses?

MR JAMES WONG: I believe it's the Transport Department, half-year, you talk about half-year, that is the Transport Department's decision.

MS MAGGIE WONG: Now, at the bottom it set out six conditions by the Transport Department, (a) to (f), and if I may summarise:

"(a) the buses must be below six years of age;

(b) the same franchised bus maintenance standard must be adopted for the hired buses."

Now, what does it mean by "the same franchised bus

maintenance standard must be adopted for the hired buses"; what does that include?

MR JAMES WONG: Can I defer to Mr Yeung to take that question?

CHAIRMAN: Yes, Mr Yeung.

MR PATRICK YEUNG: Thank you, Chairman. For all non-franchised buses, they will be treated the same as the franchised buses in terms of repair and maintenance. Every month, there will be a monthly inspection called MI, and they have to go through an annual examination as well, the same as franchised buses.

MS MAGGIE WONG: Does this include -- do you know if all these non-franchised buses have black box or speed limiters?

MR PATRICK YEUNG: Yes, they do. Yes, they do.

MS MAGGIE WONG: Is that a contractual requirement in the contracts that you signed with this non-franchised bus contractor?

MR JAMES WONG: We asked our contractor to fit out the non-franchised bus to the same degree as our franchised bus. So that's our original intention.

MS MAGGIE WONG: So prior to today is there a requirement for all these non-franchised buses to have black box or speed limiters installed?

CHAIRMAN: Whose requirement?

MS MAGGIE WONG: Whether your company requires the non-franchised bus operators to install speed limiters and black box before today.

MR JAMES WONG: In fact, you can refer to item (d). It says "similar on-vehicle facilities". Of course, we are referring to those buses engaged by us to assist us. My understanding is that as of today, in relation to non-franchised buses, the TD does not have such a requirement. So it is different in the case of franchised buses.

Here, it has already been said that if the non-franchised bus is to be used by us and serving us, then that bus should be equipped with the same on-vehicle facilities as a franchised bus.

MS MAGGIE WONG: Would there be any document --

CHAIRMAN: Just allow me a moment.

Do you read paragraph (2)(d) as a Transport Department requirement that you have a black box and a speed limiter, or not?

MR JAMES WONG: For item (d), of course, the term "black box" hasn't been included. But my understanding, our understanding, is that this is the requirement; it has to be fitted. That's our understanding.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Can you provide us with a sample of the

contract between your company and Kwoon Chung in respect of the arrangement to use the non-franchised buses, specifically the safety features?

MR JAMES WONG: Yes, we can provide the information afterwards.

MS MAGGIE WONG: Maybe I should clarify. Before today, is there a contractual requirement for Kwoon Chung to provide non-franchised buses with black box and speed limiters, contractual requirement? The question is "contractual requirement".

MR JAMES WONG: I think we need to go back to check the document. Thank you.

MS MAGGIE WONG: Now, if we go to the sixth requirement, (f), it states:

"non-part-time drivers should be arranged to operate the Tung Chung Road bus routes. They must have been given proper and adequate training by your company."

Can you tell us: why single out the Tung Chung Road bus routes?

MR JAMES WONG: As I have said, for South Lantau, the routes for South Lantau, will certainly go via Tung Chung Road, because for you to go from Tung Chung to Tai O and Ngong Ping and South Lantau, you have to go past Tung Chung Road. For this to be singled out -- well, of course we are not trying to get a bus to travel on

Tung Chung Road. Rather, we are getting buses to travel in South Lantau. I think that's what is meant here.

MS MAGGIE WONG: Well, it appears that it set out a must condition, that you have to have full-time drivers to drive the Tung Chung Road bus routes. Is there anything special about the Tung Chung Road bus routes? And also it requires a specific condition that it has to receive proper and adequate training by your company.

MR JAMES WONG: I am not too sure. We are not too sure about the reason for this condition. For us here, our initial view, we believe that prior to the reconstruction of Tung Chung Road, it was very, very narrow, very different from what you see today as far as the road conditions are concerned. But then back then, I was too young to recall what it was like. But we believe that as far as this condition or this requirement is concerned, I think the prevailing road conditions back then should be relevant. Perhaps we will ask, "Tung Chung Road has been reconstructed, you want to know why this particular condition remains there?" Let me go back to check with my colleagues for the details.

My understanding is this is a letter issued by the Transport Department on a half-yearly basis. It's a routine document. Perhaps we haven't reviewed as to

whether certain conditions no longer apply.

MS MAGGIE WONG: And it says that --

CHAIRMAN: Before you go on, Ms Wong -- perhaps, this being a Transport Department letter, it's the Transport Department who can tell us why the condition is there.

MR JAMES WONG: (In English) Maybe.

MS MAGGIE WONG: It also states that they must have been given proper and adequate training by your company. Have there been any arrangements to ensure these full-time drivers of these non-franchised bus operators or bus company should receive training by your company, any arrangement?

MR JAMES WONG: Mr Chairman, may I defer to Mr Lee?

CHAIRMAN: Yes, Mr Lee.

MR RICHARD LEE: Mr Chairman, let me answer the question. As far as training is concerned, for bus drivers plying Tung Chung Road, from FB or non-FB, well, for South Lantau, the roads are narrow and there are many bends. Therefore, for bus captains travelling on such routes, they have to receive a two-day route training to make sure they are familiar with the road conditions and they are alert.

So, so far as the route training is concerned, during that time our instructor will check if the bus captains are skilful at manoeuvring the bends and they

are assessed. Therefore, for the non-FB bus captains carrying out the duty for us, we do provide a route training for them.

MS MAGGIE WONG: I believe the full-time bus captains require five days' training, is that correct, if they are to drive this route?

MR RICHARD LEE: If I may add a word here, counsel. For the five-day training, that's for the new recruits, that's the induction training. For serving bus captains, depending on the needs, will adjust. Like for South Lantau Road, we provide an extra two-day training.

MS MAGGIE WONG: Thank you.

Now, is there any measure in place to monitor the qualifications and driving records of these non-franchised bus drivers?

MR JAMES WONG: We have the same treatment for franchised buses and non-franchised buses, as far as our measures are concerned. In other words, the answer is yes.

MS MAGGIE WONG: As of today?

MR JAMES WONG: Mmm.

MS MAGGIE WONG: So prior to 2018, is there any measure in place to check the qualifications and driving records of this non-franchised bus operator, or is this a contractual requirement in your contract with Kwoon Chung?

MR JAMES WONG: Today, we do not require our contractor -- well, just now, in the letter, you see the registration numbers with information about the buses. As to the bus captains -- well, it will involve a larger number of bus captains rather than just 80 or 50 respectively. Therefore, as of today, we do have a specific requirement to ask for the details of the captains involved. So we haven't got this as a current requirement.

CHAIRMAN: Sorry, I don't understand that. Do you have this requirement today or is this something you are going to impose in the future?

MR JAMES WONG: We haven't got such a requirement as of today.

CHAIRMAN: Thank you.

Yes, Mr Auyeung.

MEMBER AUYEUNG: Thank you, Chairman. I want to stay on this letter from the Transport Department. If I read this letter correctly, this provision they have given you will expire the end of June. Have you received a new letter from Transport Department on similar arrangement?

MR JAMES WONG: Not yet.

MEMBER AUYEUNG: Okay. Thank you.

MS MAGGIE WONG: Did you apply?

MR JAMES WONG: We did. We have.
MS MAGGIE WONG: When? When was that?
MR JAMES WONG: I have to go back to check. I believe it must be end of May or early June. Say, for example, for the letter shown on the screen, so it expired towards the end of December, and we wrote in early December to apply.
MS MAGGIE WONG: Can you provide us with a copy of your letter to the Transport Department?
MR JAMES WONG: Yes.
MS MAGGIE WONG: Have there been follow-up discussions about this arrangement with the Transport Department since you wrote the letter?
MR JAMES WONG: I don't quite understand your question.
MS MAGGIE WONG: Have there been discussions with the Transport Department since you wrote the letter to renew this arrangement? Any meetings?
MR JAMES WONG: We did meet with the Transport Department. Well, as to the letter we wrote, as to the application we have made, I don't think they are related to such.
MS MAGGIE WONG: Now, about this arrangement, do you wait until you have received the approval from the Transport Department before you sign the contract with Kwoon Chung to provide non-franchised buses?
MR JAMES WONG: Well, as to our contract with the

contractor, it is for a longer duration. I don't have the information with me, but if my memory serves me right, it's a three-year duration. So it won't be the case that for every six months I get the approval from the TD and then I sign a contract with the contractor. No. It is a three-year contract, for -- if we need to hire vehicles from them, then we do so. So that's the arrangement.

So the TD requires renewal once every six months. I think it is mainly because the TD would like to know whether the vehicles are in line with their requirements, like the year of age.

MS MAGGIE WONG: Now, you talked about the measure, earlier on, that you would require the Kwoon Chung operators to install speed limiters and black box from now on. Can you tell us what is the measure to ensure that?

MR JAMES WONG: The installation of such devices would have to be notified to us upon completion.

MS MAGGIE WONG: From now on.

MR JAMES WONG: It has been so all the time. After they have installed the devices, they would inform us. Like in the case of black boxes, of course we can check from the system, in relation to the transmission of data or data uploaded. So if you ask me as to whether we regularly verify the arrangement, that is whether, when

the vehicle arrives, I will check it every time, we didn't, because we believe that the hardware installed will not be dismantled, so they would notify us the first time it has been installed.

MS MAGGIE WONG: Is there any written record of such notification?

MR JAMES WONG: I can go back to get it and give it to you. We haven't come prepared with that.

CHAIRMAN: Please supply that, if you would.

MR JAMES WONG: (In English) Sure.

MS MAGGIE WONG: What is the measure, the current existing measure, to monitor the qualifications and driving records of these non-franchised bus drivers?

MR JAMES WONG: Existing, as was mentioned, at this moment of time, we do not require the contractor to supply us with the information. For part-time bus captains, we would obtain the information, and we have plans to get the information from them.

MS MAGGIE WONG: Would you ask for a similar requirement as you impose on your part-time bus captains, namely to sign a declaration form from all these non-franchised bus drivers, before they would be allowed to drive those buses?

MR JAMES WONG: At this moment of time, we haven't made a decision as to how to implement the measure. We don't

have a definite decision yet. I believe that we will adopt the same practice whether they are permanent staff or not. We don't have a decision yet.

MS MAGGIE WONG: So at this moment, do I understand correctly, your company would not know as of today whether any of these non-franchised bus drivers used on any particular day have any previous driving-related records, nor their experience?

MR JAMES WONG: When it comes to Kwoon Chung Motors, it's not completely independent from us. It's not the case that we don't know anything about them. Kwoon Chung Motors is a shareholder of New Lantao Bus Company. In relation to staff of Kwoon Chung Motors, when it comes to New Lantao Bus Company -- well, we don't have their files, but when it comes to recruitment, we have adopted certain measures to ensure that they are qualified bus captains. We will collate the information and give it to you.

CHAIRMAN: Please do.

Yes, Professor.

MEMBER LO: The question -- there are three types of drivers: full-time, part-time, and also drivers driving on those non-franchised buses. They have different treatments in terms of the last group.

Now, the question is, the non-franchised buses also

have a black box. When will this black box information be used? Because they are driven by non-franchised operators, drivers. So would that ever be used to monitor their performance?

MR JAMES WONG: Thank you. In our system today, we can see black box records of non-franchised buses. We have access to such records today.

MEMBER LO: But are they used? Are such information ever used to assess their performance?

MR JAMES WONG: It's not just the non-franchised buses. In our fleet, black box has already been installed. Let's leave the non-franchised buses aside first. We use random checks to check every month whether there are problems with the buses or with the driving of the drivers.

For non-franchised buses, I believe that we use the same approach, but I have to go back to ask my colleagues as to random checks are conducted on their 80 buses during Saturdays and Sundays, because I can't give you a definite answer now. But that is our general approach in relation to random checks.

CHAIRMAN: Before you move on, are there none of the six of you who are able to answer that question? It's a simple enough question. Do you actually check the black boxes of the non-franchised buses?

MR BENNY CHAN: I would like to supplement, Chairman. At the moment, we don't really take the initiative to check the information in the black box. When we receive complaints, we will conduct random checks of the information of the black box to investigate into the incidents.

MS MAGGIE WONG: Following from your --

CHAIRMAN: Forgive me -- so you respond to complaints; is that it?

MR BENNY CHAN: That is right.

CHAIRMAN: And accidents?

MR BENNY CHAN: Right.

CHAIRMAN: But do you do random checks on black boxes on non-franchised buses?

MR BENNY CHAN: Yes, we do that too.

CHAIRMAN: Thank you.

At some stage, Ms Wong, we are going to take a 20-minute break. It's a matter for you when it's convenient.

MS MAGGIE WONG: Yes. Maybe I will follow up with the question on the safety performance.

Mr Wong, apart from this question, any measures in place to monitor the safety performance of these drivers of non-franchised buses whilst they are being used by your company? For example, mystery rides, or would you

put your staff on these buses to monitor performance?

MR BENNY CHAN: Chairman, every month we have used mystery shoppers. We don't distinguish between New Lantao Bus Company's or non-franchised buses.

MS MAGGIE WONG: So these secret checks of bus captain performance apply to all three types of bus captains?

MR BENNY CHAN: That is right.

MS MAGGIE WONG: So if you find there are performance that are substandard or over-speeding, what disciplinary actions would you take on these non-franchised bus drivers?

MR BENNY CHAN: If we find, let's say, for example, speeding, we will issue a warning letter. We may even suspend the bus driver from working on Lantau Island.

MS MAGGIE WONG: Mr Chairman, that may be an appropriate time.

CHAIRMAN: Yes, very well.

Mr Wong and your fellow colleagues, we are going to take a 20-minute break now and then we will resume at 11.50 by that clock. Thank you.

(11.29 am)

(A short adjournment)

(11.50 am)

CHAIRMAN: Yes.

MS MAGGIE WONG: Thank you, Mr Chairman.

MR JAMES WONG: Excuse me, Chairman, I would like to provide some supplementary information. Excuse me.

CHAIRMAN: Yes, please supplement.

MR JAMES WONG: In relation to new bus captains, our checking of their records, I would like to supplement that we did not start doing that only in 2018. This has been a long-established practice. We have been doing it for many years. What we meant by starting in 2018 is that in the past, we used to select some bus captains by random and check on their records, and what we started in the beginning of 2018, for all bus captains we checked, on all of them.

CHAIRMAN: Thank you.

MR JAMES WONG: So we will do it annually.

MS MAGGIE WONG: You mean the driving offence records or other records?

MR JAMES WONG: Yes, correct.

MS MAGGIE WONG: Just a few follow-up questions, Mr Wong.

Earlier on, you said on the safety features that the physical hardware on the non-franchised bus -- you said earlier on that these buses are equipped with the same on-vehicle facilities as franchised buses.

May I take you to bundle NLB-2, page 453. It set out a list of bus safety features adapted in NLB buses, and that includes 24 features.

Are you able to confirm, or based on your understanding, whether all these non-franchised buses are equipped with the same safety features as set out at page 453?

MR JAMES WONG: Sorry, it will take a while for me to confirm this. For these 24 items, say, for example, for double-decker buses -- excuse me, yes, I confirm that. I just tried to check with my colleague. We did indeed hire double-deckers as well, and all these safety features are there. Thank you.

MS MAGGIE WONG: Thank you. Now, just a few follow-up questions on -- you mentioned that you hired non-franchised buses from Kwoon Chung Bus Holdings; correct? You hired non-franchised bus buses from Kwoon Chung Bus Holdings?

MR JAMES WONG: Kwoon Chung Motors.

MS MAGGIE WONG: Kwoon Chung Motors?

MR JAMES WONG: Correct.

MS MAGGIE WONG: Is it correct that New Lantao Bus is a 99.99 per cent owned subsidiary of Kwoon Chung Bus Holdings, a listed company?

MR JAMES WONG: The parent company is Kwoon Chung Holdings. Maybe other companies are used to hold shares of NLB. I have to check. But ultimately the parent company is Kwoon Chung Bus Holdings.

MS MAGGIE WONG: Is your company, in other words, renting non-franchised buses from your parent company?
MR JAMES WONG: Correct. We have gone through an open tender exercise.
MS MAGGIE WONG: Is it correct that both Mr Wong, yourself, and Mr Timothy Wong, are senior management of Kwoon Chung Bus Holdings as well?
MR JAMES WONG: I am the managing director of Kwoon Chung and Mr Timothy Wong is the operations director of Kwoon Chung.
MS MAGGIE WONG: Thank you. As of 2017, the chairman of Kwoon Chung is Mr Matthew Wong Leung Pak, who is your father; is that correct?
MR JAMES WONG: Correct.
MS MAGGIE WONG: My question is this. How is the hiring price delivered when your company is renting non-franchised buses from its parent company, Kwoon Chung, or agreed? How is the price agreed?
MR JAMES WONG: As I said, once every three years, we will have an open tender exercise.
MS MAGGIE WONG: And how is the hiring price determined?
MR JAMES WONG: The tenderer makes a decision about the pricing, and for us, NLB makes a decision as to the number of vehicles to be deployed.
MS MAGGIE WONG: And who is the tenderer?

MR JAMES WONG: Sorry, what is your question? Kwoon Chung Motors is the tenderer.

MS MAGGIE WONG: Do you know whether the Transport Department has any requirements or guidelines on the price at which these non-franchised buses are hired?

MR JAMES WONG: No. As far as pricing is concerned, the Transport Department does not have any requirements for us.

MS MAGGIE WONG: Thank you. If I may continue --

CHAIRMAN: Before you move on -- is this arrangement with Kwoon Chung Motors Company, by which non-franchised buses are leased, is that an arrangement that came into place on 1 May 2018?

MR JAMES WONG: Mr Chairman, for the existing one, it is dated August 2016. It came into effect since August 2016, up to now.

CHAIRMAN: Prior to that date, did you have other contractors providing you with non-franchised buses?

MR JAMES WONG: No. All the time it was Kwoon Chung Motors.

CHAIRMAN: Give us some timescale, if you would, as to "all the time".

MR JAMES WONG: Well, I have this understanding, from what I have heard. When Kwoon Chung acquired NLB, it was in 1992. Kwoon Chung started to provide service to NLB, I think it was in the year 1990 or 1991.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Now, if I may continue. Any measures in place to monitor these non-franchised bus drivers' physical condition before they start driving for your company's purposes, for example any medical checkups?

MR JAMES WONG: Can I confirm with you as to your question? You mean every time they drive for us or prior to taking up duties from us?

MS MAGGIE WONG: Either way.

MR JAMES WONG: If you refer to the scenario every time before they drive, certainly not. We won't. Not to mention the bus captains from non-franchised buses, even for our own bus captains of NLB, it is impossible for us to carry out a medical checkup every time before they start work.

As to the other arrangement in relation to medical check, well, upon joining us, they will undergo such a medical checkup. If I may also add to the answer, for Kwoon Chung Motors -- well, Kwoon Chung Motors and NLB are sister companies, so to speak. Well, for NLB, it is of a smaller scale, having 130 buses only, and then a lot of our back-office officers and management staff, we must rely on the parent company's support. Otherwise, NLB cannot do what the other two franchised bus companies have been doing. We won't be able to put

up a similar performance because we are one 13th or one 33rd of their scale.

So for a Kwoon Chung bus captain, for him to drive an NLB bus, if you ask prior to taking up the duty as to whether there is a formal document being sent to NLB to confirm a medical checkup has been done, I am afraid I have to ask my colleagues as to how it actually works. But for us, for Kwoon Chung to recruit the bus captains, it has already gone through all the procedures like checking the records and going through the medical examination.

CHAIRMAN: Perhaps you would make those enquiries and provide us with a formal document, if one is sent to NLB.

MR JAMES WONG: (In English) Sure.

MS MAGGIE WONG: In respect of these non-franchised buses used for your company purposes, any measures in place to ensure these buses are mechanically fit for use?

MR JAMES WONG: If I may defer to Mr Yeung.

MR PATRICK YEUNG: Thank you. Regarding the non-franchised buses, they undergo regular checks and every year they go through the government's vehicle examination. So they are subject to the same requirement as our franchised buses.

MS MAGGIE WONG: What documentation would you ask from all

these non-franchised bus companies to verify this information?

MR JAMES WONG: Thank you. Well, as I have said, as of today, NLB and Kwoon Chung are sister companies, so for documents in black and white, we don't actually demand them from Kwoon Chung. This is the current arrangement. But of course, for the management, in particular, we are aware of the conditions in both companies. We provide passenger service. We provide safe passenger service to our customers.

In future, maybe we will review and see if there is a need to do so. Of course, sometimes we may not be talking about an associate company. In future, we may have a non-associate contractor providing the service to NLB. So perhaps we have to think more about whether there is a need to have more documents from the contractors.

MS MAGGIE WONG: In your supplemental annex 2A, 2B and 2C -- that's NLB bundle 2, pages 474 to 480. Annex 2A is at pages 473 and 474; 2B at 476; and 2C at 479.

Who conducts these surveys?

CHAIRMAN: To which surveys are you referring?

MS MAGGIE WONG: Three surveys.

CHAIRMAN: What are the titles of the surveys?

MS MAGGIE WONG: Annex 2A is the "Monthly report on

scheduled and actual compliance with guidelines on bus captains' working hours, rest times and meal breaks".

Annex 2B is "On-board survey to check NLB's driver rest time".

And annex 2C is a "Survey on franchised bus captains' working hours (Guidelines B & D)".

CHAIRMAN: Thank you.

MR JAMES WONG: Thank you, Mr Chairman. Regarding the three surveys mentioned, they were conducted internally by ourselves, that is NLB.

MS MAGGIE WONG: If we look at page 474, annex 2A, the "Monthly report on scheduled and actual compliance with guidelines on bus captains' working hours, rest times and meal breaks", it states the number of captains surveyed at 115. So does it mean that 115 captains were surveyed on that single day, ie 21 February 2018, by a single person?

MR JAMES WONG: Correct. 115 on that day, on a single day. A day was picked and we tried to have a look.

MS MAGGIE WONG: So would they be surveyed by a single person of your company?

MR JAMES WONG: If I may supplement. The format wasn't so much that he followed each and every 115 bus captains. Rather, our colleagues checked the driving records. We try to check against that record.

MS MAGGIE WONG: So that would be based on driving records submitted to your company by who?

MR JAMES WONG: It was the Transport Department who picked the date, and then we checked against our internal records. So that's the record provided by the operating division.

MS MAGGIE WONG: If we go to annex 2B, "On-board survey to check NLB's driver rest time", pages 477 to 478, how would this be conducted?

MR JAMES WONG: Sorry, please give us a bit of time to read through the record.

CHAIRMAN: Yes, please take your time.

MR JAMES WONG: Mr Chairman, for this form, it was prepared by the company internally.

MS MAGGIE WONG: If we go to page 480, the third annex, "Survey on franchised bus captains' working hours", how would this be conducted? Or, to put it another way, would someone follow the driver for that day?

MR JAMES WONG: Mr Chairman, with this form, it talks about "Employee No. of bus captain". For this column, it was picked by the Transport Department as well as the survey date, and then on the right-hand side we tried to retrieve the record. So it wasn't that somebody was on board to follow, because it was provided afterwards, so we tried to look up our records and we tried to find out

the working hours of that particular colleague.

CHAIRMAN: How were these records created in the first place, sign-off time, sign-on, and so on?

MR JAMES WONG: Mr Chairman, currently, what we do is that at the bus terminus, we have a card reader, so the colleague will clock his time by tapping his card on the reader and that would record his sign-on time and sign-off time. For others who are at remote locations and not at the bus terminus, then we rely on the telephone to ask him to report the time.

MS MAGGIE WONG: I apologise for that. I should have asked page 477 the same question, because the title is "On-board survey to check NLB's driver rest time", so it was a survey on board. So my question is, would someone follow the driver for that day?

MR JAMES WONG: Thank you, Chairman. For this on-board survey, we did have a colleague on board. It was a requirement from the Transport Department. So for ten days, five holidays and ten weekdays, we carried out the survey.

MS MAGGIE WONG: Can you tell us whether, during the rest time or meal time provided under the guidelines, is a bus captain, be it those three types of bus captains, hired by your company required to perform any non-driving duties, like updating duty or shift rosters,

undertaking other administrative tasks, or inspecting vehicles?

MR JAMES WONG: Thank you, Chairman. When it comes to rest time, they are not required to perform those administrative duties mentioned, because these administrative duties are carried out by regulators, terminal regulators. There may be other staff members at the terminus to deal with such duties.

MS MAGGIE WONG: The same applies -- would travelling under the instructions of your company to another location or to attend to another driving shift be included in the rest time or meal time?

MR JAMES WONG: Thank you. The scope of our service is rather confined. There is no need for our bus captains to travel to a different district, say for example to Kowloon, to provide services. If your question is whether that is counted towards rest time -- well, basically, under normal circumstances there is no such duty, but should there be, it would be counted towards one's duty hours instead of rest time.

MS MAGGIE WONG: If I may take you to DC bundle 1, page 71. The Chinese is at page 71, the last five lines; English at page 75, last six lines. If I may read out --

CHAIRMAN: What are you reading from, first of all?

MS MAGGIE WONG: I'm sorry. This is a submission by the

Islands District Council submitted to the committee in relation to this review of Hong Kong's franchised bus service.

CHAIRMAN: Thank you.

MS MAGGIE WONG: If I may read out the last five lines:

"... NLB's bus routes are mainly composed of mountainous routes to and from the south of Lantau Island and long-distance routes along the highways to and from the main areas, which require high level of attention in order to handle these routes, therefore, more rest time is required in order to prevent accidents caused by fatigued driving."

Mr Wong, just one question, about the bus routes in South Lantau. What is the approximate length or duration for each shift?

CHAIRMAN: Can you help me as to what you mean by "shift"? Is that the completion of a route or a working shift?

MS MAGGIE WONG: Yes, completion of a route. Say, for example, the route 3M from Mui Wo Ferry Pier to the Tung Chung, I believe, town centre.

MR JAMES WONG: Thank you, Chairman. Using 3M as an example, from Tung Chung to Mui Wo or Mui Wo to Tung Chung, it takes about 30 or 40 minutes, depending on whether there are a lot of passengers getting on or off on route.

MS MAGGIE WONG: And what do you --
MR JAMES WONG: 35 to 40 instead of 30.
MS MAGGIE WONG: Now, it states that it requires long-distance routes and requires a high level of attention. Do you agree with that statement, first of all?
MR JAMES WONG: This document was first shown to me just now.
MS MAGGIE WONG: Oh, I apologise for that.
MR JAMES WONG: I don't really understand what is meant by "long-distance routes along the highways to and from the main areas". For Lantau Island, the scope of our franchise is limited to Lantau Island. We don't go to other areas, say for example urban areas. From Shenzhen Bay Port, we provide a service to Yuen Long and Tin Shui Wai, but they don't go to Lantau Island. So I am not too sure what is meant by the district council.

Perhaps -- well, I will only focus on what I know instead of speculating what it means. When it comes to south of Lantau Island, in terms of journey time, compared to the route of the other two bus companies', ours are not too long. The scope of our service and the road's condition is rather free from congestion. So when it comes to the scheduled journey time, compared to the actual journey time, it won't deviate too much.

For 40 minutes, compared to feeder bus services to train stations, say, for example, that of Yat Tung which takes only about several minutes, a 40-minute journey time would be longer. But when it comes to comparison with other routes, say for example from New Territories to the urban area, ours are not that long. Compared to airport routes, if you add congestion time, those would be even longer.

That's my view.

MS MAGGIE WONG: Yes, and --

CHAIRMAN: Ms Wong, do you have any more questions arising from this document? Because if you do, Mr Wong should have the opportunity to read it.

MS MAGGIE WONG: Yes, I will have a few questions.

CHAIRMAN: Mr Wong, take the time that you need to read these two or three pages.

MR JAMES WONG: (In English) Okay. Thank you.

CHAIRMAN: If you do that now, we will wait.

MS MAGGIE WONG: Maybe if you read the Chinese version. It's at pages 71 to 72.

MR JAMES WONG: Chairman.

CHAIRMAN: Yes, Ms Wong.

MR JAMES WONG: (In English) Excuse me.

CHAIRMAN: Yes.

MR JAMES WONG: I have read the Chinese translation.

Perhaps there is some translation error, because in the Chinese version it says "Lantau Island buses", but they don't refer to our bus company but bus services serving Lantau Island. So it's not routes of NLB. Of course, for south island, some of the routes are ours, but when it comes to routes that ply highways, I think they are referring to Long Win Bus or Citybus.

MS MAGGIE WONG: Thank you. If I may refer you to paragraph 3, English at page 76, it expressed certain concerns raised by the Islands District Council about NLB's bus routes, and if I read it out:

"As stated in the submissions above, NLB's bus routes are mainly composed of mountainous routes to and from the south of Lantau Island and long-distance routes along the highways to and from the main areas, nevertheless currently the facilities in bus cabin and the regulation are not able to ensure the safety of passengers. For instance, taking the example of NLB route 3M that runs to and from Tung Chung and Mui Wo, I, at various times, found that the buses were [fully loaded], and even the aisles of the bus cabin were packed, for buses that run urban bus routes, other than the very front row, the very last row and seats facing backwards ... other seats are not installed with seat belts; [compared] to the regulation of the European

Commission, regardless of the bus type, whereby all captains and passengers must fasten their seat belts to ensure driving safety. This reflects that Hong Kong is very behind on passenger safety."

And we see some photographs on pages 78 and 79. May I ask what is your view on this matter?

MR JAMES WONG: Thank you, Chairman. I see that two points have been raised. First, in relation to the fact that no safety belts have been installed on our buses, and second, that's in relation to some photographs depicting a crowded bus compartment.

I will first reply to the first point -- well, to the second point, that is the bus that is packed. We do notice that in Mui Wo, during morning peak hours, for route 3M, plying to and from Tung Chung, there are more passengers compared to other times. In our previous analysis, we found that it's because there are more people going there to work in construction sites. These projects will be completed soon. Our approach is to increase bus frequency for these routes. The bus type we use is different from other companies, because there are more mountainous routes. It's been a few years that we have stopped using double-deckers, so during peak hours, given the limited capacity of a single-decker, in 2017 we decided that for route 3M, we would use

double-decker buses, because in 2018-19 there will be population intake for their home ownership scheme flats, so we used double-decker buses in 2017 to address the problem of limited capacity during peak hours. From Mui Wo to Tung Chung, for a 40-minute journey time, well, a double-decker bus can only take so many passengers, so we have specifically procured buses that are shorter in length. We have done some road tests, to ensure that the use of double-decker buses along these routes would not be problematic.

In relation to the point of seat belts, currently there is no requirement that all seats are to be fitted with seat belts. So we have retrofitted seat belts for exposed seats. We keep an open mind. If there is a view that all seats should be fitted with seat belts, we will keep an open mind.

CHAIRMAN: Yes, Ms Wong.

MS MAGGIE WONG: Yes. If I may take you to the minutes, again by the Islands District Council, dated 23 October 2017 -- Chinese at page 252; English at 256 -- Mr Wong, on the first page, this is the minutes of the meeting of the Islands District Council dated 23 October 2017, and we can see the persons in attendance include, if we go to page 257 and page 258, I believe your company was also present, Mr Benny Chan Tin Lung, deputy general

manager of New Lantao Bus Co Ltd, was present at this meeting.

If I may take you to paragraph 41. The Chinese is at page 254. If you may read that first.

If I may also invite you to read paragraph 43 as well, as to the district councillor's suggestion, Mr Eric Kwok. If you may read that first.

MR JAMES WONG: (In English) Okay.

MS MAGGIE WONG: One of the matters he raised is that:

"... the EU rules limited the working hours of drivers to 9 hours ... The present 14 hours of work was excessive and bus captains would be tired and prone to accident. He was concerned about the safety of Lantau buses and opined that the Guidelines of the Transport Department were inadequate. If the bus accident occurred on Tung Chung Road or Keng Shan Road of Lantau Island, the consequence would be too ghastly to contemplate. It was hoped that the Transport Department and the bus companies could handle the long driving hours of bus captains and the functionality of their buses seriously."

As to this suggestion, what is your view on this, or what is your company's view on this?

MR JAMES WONG: Sorry, it will take a while for us to read through the information.

CHAIRMAN: Yes. Take your time.

MR JAMES WONG: Thank you, Chairman. For Southern Lantau, the bus captains who are working on 14-hour duty shift, we call these special shifts. The number of bus captains on special shift is relatively small. There are just eight routes on special shift. Out of 100 or so routes, out of in fact 113 routes, eight are on special shift duty. We would ensure that the bus captains have sufficient rest time. Many of our bus captains live in that district, in Lantau. We believe that we have done our best to make sure that bus captains on special shift are not exhausted; they should have sufficient rest time.

And Mr Kwok referred to the EU standards. I have not looked at the standards myself. If they drive continuously for nine hours, I believe they would be very tired. For a 14-hour duty, or a duty with less hours, we have to look at the rest time and the driving time and the proportion of these different periods.

In Hong Kong, many people do not work in places where they live, and for the service sector -- well, for bus captains, they have to go to work earlier than the normal people because they have to take them to work, and when people get off work, bus captains have to work even later to take these people back home. So we are

talking about these 14-hour duties, special shift, and if you want to cut it to nine hours, the arrangement is not that simple, because you can imagine, say, during the peak morning we need the most people and during the evening peak hours we need the most people, our bus captains.

So we would go beyond nine hours. We just cannot simply change the 14-hour shift to a nine-hour shift.

Thank you.

MS MAGGIE WONG: Mr Wong, I'm going to move on to another topic, facilities and support to bus captains.

You just gave evidence that many of your bus captains live in the Lantau district; correct?

MR JAMES WONG: (In English) Yes, but I don't have the numbers, actual numbers.

MS MAGGIE WONG: Does your company provide any bus shuttle service to bus captains between their living area and their working place, for example the bus terminus?

MR JAMES WONG: Mr Chairman, we don't provide bus services for our colleagues. That's mainly because most of our colleagues live where they are supposed to take their buses. If they, say, live further away, we would arrange for the buses to be parked near where they live, say in the bus terminus near their homes or maybe some other appropriate locations as well. So there is no

need for us to provide shuttle bus service for our bus captains, to take them to work.

MS MAGGIE WONG: Apart from the rest facilities at the major service hub that you mentioned in your submissions -- if you want the reference, that's at page 20 -- would toilets or break rooms be available in the proximity of your company's every bus terminal during breaks in between for bus captains?

MR JAMES WONG: Thank you, Mr Chairman. It's not the case that for every bus terminus there will be toilets and rest rooms. We will have to look at the land titles and other issues. We don't have the exact information on hand, but on the application -- indeed, we have applied for such facilities to be installed at bus termini, but then we have to go through many government departments which are there to supervise the procedure and it takes a lot of time for our application to be processed, and actually we failed in some of our applications.

MS MAGGIE WONG: If I may refer you to your forward planning programme --

CHAIRMAN: Before you do that, perhaps I could ask this: could you provide the committee with samples illustrating your applications to provide facilities, be they toilets or places to rest, and letters that illustrate, on the one hand, perhaps, success, but the

length of time it took, and then, on the other hand, failure, where you were refused.

MR JAMES WONG: (In English) Okay.

CHAIRMAN: Perhaps indicating, for our benefit, what is the ratio of success as against failure, and the length of time it all takes.

MR JAMES WONG: (In English) Okay.

CHAIRMAN: Thank you.

MS MAGGIE WONG: If I may take you to TD-1, page 241. Mr Wong, this is a forward planning programme of your company, and if we cast our eye down to the bottom, it states that all terminals are facilitated with toilets, but in the cases of Yat Tung, Tin Tsz and Tin Yiu, they could only be accessible within walking distance to public toilets.

Can I ask you, what is the "walking distance", do you know?

MR JAMES WONG: Thank you, Mr Chairman. The bus termini is adjacent to a shopping centre. Say, for example, for Yat Tung, there is a shopping centre next to it, so the colleagues are asked to go inside the shopping centre. So, after the colleague has parked the bus, he goes to the shopping centre and he returns, and the whole thing, the whole process, will take around ten minutes.

MS MAGGIE WONG: Yes, thank you, Mr Wong, because I want to

ask this question. It's the new guidelines imposed in 2018 by the Transport Department. If I may take you to TD bundle 4, page 1086.

If you can see that the new guidelines state that within six-hour duty, they should have short rest breaks, ie rest times, of less than 40 minutes:

"... totalling not less than 20 minutes, of which no less than 12 minutes should be within the first 4 hours of duty."

So my question is: can we do better, in terms of this provision of toilets, or to extend the rest time if necessary?

MR JAMES WONG: Thank you, Mr Chairman.

The counsel mentioned about the provision of facilities and whether more facilities could be provided. The company's stance is that we are more than happy to do that, because we treasure our colleagues, respect them as human beings, and if they are asked to walk a long distance to go to the toilet, I believe that those who are seated here would not like to have that kind of experience, and maybe after that, after the hearing, we will provide you with additional information on our application, that we have been refused to provide facilities. So there seems nothing much that we can do.

You talk about Yat Tung Estate and the shopping

centre. The shopping centre has been newly renovated -- is being renovated, rather, and the toilet is not being put to use, so our colleagues need to go to another toilet, and this places a great impact on our colleagues; we will try our best to help them.

MS MAGGIE WONG: Thank you, Mr Wong.

CHAIRMAN: Have you made any application at your terminus at Yat Tung to provide your own toilet facility?

MR JAMES WONG: (In English) Yes.

CHAIRMAN: Was that refused? Or is that one in the waiting queue?

MR JAMES WONG: (In English) Yes, it should be in the queue.

CHAIRMAN: How long ago did you make that application?

MR JAMES WONG: We will provide you with the information later.

CHAIRMAN: Okay. Thank you.

MS MAGGIE WONG: Just one last question on this document. If Mr Wong may refer to page 242. I apologise, it's TD-1, page 242. Again, this is the forward planning programme. It states at the top:

"Toilet and dining facilities are all within walking distance from the terminals, with the exception of Shenzhen Bay Port, where there is no dining facilities."

So may I ask what would be done to ameliorate the situation, to ensure there are sufficient facilities?

MR JAMES WONG: At Shenzhen Bay, that's a port, that's a boundary crossing facility. Permission was not given to us to provide a facility for colleagues to take a rest. For that particular route, it runs from Shenzhen Bay to Yuen Long or Tin Shui Wai. The current arrangement is such that colleagues have to take their meals in Yuen Long or Tin Shui Wai so as to resolve the problem. At Shenzhen Bay Port, they have toilet facilities.

MS MAGGIE WONG: Mr Chairman, I see the time.

CHAIRMAN: Yes. We will now adjourn for lunch and we will resume at 2.30 this afternoon. Thank you.

(1.01 pm)

(The luncheon adjournment)

(2.30 pm)

CHAIRMAN: Good afternoon.

MS MAGGIE WONG: Good afternoon.

CHAIRMAN: Yes, Ms Wong.

MS MAGGIE WONG: Thank you.

Mr Wong, we are going to the topic of training of bus captains. You referred in your introductory statement that in recent months you have implemented or will implement measures, including increasing the number of hours and the instructor-to-trainee ratio of driving training for your bus captains, and setting up a Bus

Captain Training School to assist qualified persons in obtaining bus driving licences.

My question is this: what is the situation on this aspect before this change?

MR JAMES WONG: Mr Chairman, if I may defer to Mr Lee to answer the question.

CHAIRMAN: Yes, Mr Lee.

MR RICHARD LEE: Thank you, Mr Chairman.

There are a number of aspects here. First of all, in the past, as far as bus captain training was concerned, for new recruits and for serving bus captains, there were different cases. For new recruits, in the past, there was a five-day training, route training, bus-type training and classroom training. Recently, for the five-year training programme, we have added an additional day, so that there will be six days.

Mainly speaking, for classroom training, there used to be theory during the five-day training. Now we have a whole-day classroom training. Therefore, for new recruits, currently we are giving him six days' training, five days at the wheel.

In the past, the instructor-to-trainee ratio was one-to-two or one-to-three, depending on the elements involved. Now we have decided that for the instructor-to-trainee ratio, it should be set at

one-to-two. With a one-to-two ratio, it means that the instructor will spend more time with the trainees when compared with the past.

And for in-service captains, there are different kinds of training. Say, for example, route familiarisation, bus-type training, supplementary training and refresher training.

In the past, for route training and bus-type training, both lasted for a day. Currently, we would examine the bus type involved. This is because in future most of the buses will be double-deckers, and with the introduction of the double-decker buses, we think the training should last for two to three days. This is because we want to allow the trainees to get familiar with the manoeuvring of the double-decker buses, including making a turn.

Then, for refresher training, we ask each and every bus captain to return to the training section or the training school to attend a class.

As to the establishment of a training school, we have done some preparatory work. Earlier on, we have applied to the Transport Department that we could have GP2, that is the restricted instructor licence for franchised buses. We're waiting the TD's reply. So that's the GP2. We are also trying to recruit more

instructors. Currently, for the instructors of the NLB, they do not possess the GP2 qualification. In other words, we have only got those with class 1, class 2, and who's been licence holders. In other words, in future, if our application is to be granted, we can become self-sufficient; we will get qualified driving instructors to help the candidates, the new recruits, to sit the bus driving licence. In other words, we can have an expanded source, instead of confining ourselves to applicants holding a class 9 and class 10 bus driving licence.

Of course, for the setting up of the school, we need other support measures, like parking training venue and also route training venues. If we can get the restricted licence, then for the six-day training, it will be lengthened to nine days. For those without a bus driving licence, for those with a private car licence only, we are providing 18 days' training. For the number of trained hours, currently we have a mere six days. In future, there will be a much larger number of training hours.

MS MAGGIE WONG: If I may take you to bundle NLB-2, page 467. It is a table setting out the bus captain -- annex 10, setting out the Bus Captain Training schedule. Section A is the regular training for newly recruited

bus captain; section B is the regular training for serving bus captains.

Can I firstly ask, is this the old training or the new measures as you have just told us?

MR RICHARD LEE: The previous arrangement.

MS MAGGIE WONG: So this is the old training?

MR RICHARD LEE: Correct.

MS MAGGIE WONG: Can you tell us who provided this training, as you have told us that the training school was not established yet.

MR RICHARD LEE: You are correct. We are preparing for the establishment. Our driving instructors are giving the training.

MS MAGGIE WONG: And if you look at section A, "Induction Training", below "Classroom lectures on company rules", there is "accident black spot analysis"; do you see that?

MR RICHARD LEE: Yes, I see it.

MS MAGGIE WONG: "Classroom lectures on company rules, passenger safety, accident black spot analysis ..."

Can you tell us what this is, or what empirical data did you compile to make this accident black spot analysis?

MR RICHARD LEE: To us here, first of all, case studies from previous instructors, like the black spots for accidents

along South Lantau Road, and then other than relying on the experience-sharing of instructors, we would also look at the locations where there were traffic accidents. We shared with the trainees as to the cause of the accident and ways to prevent an accident.

In addition to classroom lectures, during the driving training session, the instructor would also make explanations about ways to prevent accidents at the bends and they have the defensive training.

MR JAMES WONG: Ms Wong, Mr Chairman, if I may add to the answer. Just now, you talked about preparing for the establishment of the training school and you want to know how we are training the new recruits today. I just want to add to Mr Lee's point.

Mr Lee was talking about how we could do it when we have the new school so that those who don't have a bus driving licence, that is those only having a private car licence or a goods van licence but they want to become a bus captain of franchised buses, when we get the approval from the TD to set up the school, then we can help such drivers to sit for the bus driving licence exam. So that's the difference. Other franchised bus companies have already got such an arrangement, that is they help drivers who haven't got a bus driving licence to take the exam.

I just want to add this point. For our regular training, that is whether we have got the training school or not, we have already got the capability to train up our drivers.

Thank you.

CHAIRMAN: How many people work in your current training regime?

MR RICHARD LEE: Four, four driving instructors who are providing the training.

CHAIRMAN: And the future training school, how many people is it envisaged will work in that?

MR RICHARD LEE: Recently, we have applied for a licence from the TD, and the quota will be six.

CHAIRMAN: Six driving instructors?

MR RICHARD LEE: Correct.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Thank you, Mr Lee, for your explanation.

About this accident black spot analysis, is there a copy that you can provide to us about the analysis that your company has carried out?

MR RICHARD LEE: Well, in addition to what we have said -- well, in fact, we can give you a report. During the course of training, we have printed some handbooks or leaflets. There are ten units. The first five are about safe driving, and for the other five, that's about

quality service. Then, for the second unit among the first five, it is about the major causes of traffic accidents, among which we talk about slippery roads, wet weather, the health condition of the drivers, the vehicle features, as well as the design of the roads. On such basis, we talk about the cause of accidents.

MS MAGGIE WONG: You talk about the design of the roads. Where did you get information concerning this design of the roads and which parts of the roads would be selected for your analysis?

MR RICHARD LEE: We rely on the suggestions of the instructors, like the hilly roads of South Lantau, they have alerted us to the bends that we need to pay attention, the gradients; the usual one is 1 to 6 and then a motorist has to pay attention at certain points for such steep-hill roads then when making a turn, what is needed to make it a safe driver.

MS MAGGIE WONG: Mr Lee, may I also refer you to another document, which is the forward planning programme, at TD bundle 1, page 237.

If you can cast your eye to paragraph (g). This is your company's forward planning programme, which states that your company --

CHAIRMAN: Am I right in recalling that this was June 2017?

MS MAGGIE WONG: Yes, this was June 2017.

Your company states that it:

"... may seek to cooperate with fellow franchised bus operators to achieve the above, by sending bus captains to the training programmes offered by other operators, subject to mutual acceptance and cooperation."

Have you liaised with fellow franchised bus operators on this matter with.

MR TIMOTHY WONG: Mr Chairman, at the level of the driving school, for us to get somebody who's experienced, it is very difficult in this trade. Mr Lee joined the NLB earlier this year. In year 2017, in addition to relying on our own instructors who are experienced instructors, we have also asked an institute to help us with smart driving. At that time, we didn't have very qualified or professional instructors, so we tried to get input from a third party. That's why we have got this institute to help us, and in fact every driver has one such opportunity. It was done in 2017. Mr Lee joined us in 2018. He had over 20 years' experience in training. So we have become more sort of positive in trying to get from the TD an instruction licence, so as to get six instructors to do this.

So what we want to do is to be more positive, more active, to make use of our resources internally to

enhance our training. I was talking about the Institute of Advanced Motorists.

CHAIRMAN: When you say that every driver had an opportunity in this respect, what was that opportunity?

MR TIMOTHY WONG: Thank you, Chairman. The opportunity to take part in the smart driving programme offered by the Institute of Advanced Motorists Hong Kong, IAM. So it's about awareness, mainly about the driving attitude, and talking about the different road conditions and they try to give lectures to help our instructors. Sorry.

CHAIRMAN: Is this a classroom source, or classroom plus road?

MR TIMOTHY WONG: (In English) It's on road.

CHAIRMAN: And how long, duration?

MR TIMOTHY WONG: (In English) Three hours.

CHAIRMAN: Is this opportunity offered to instructors or to all your bus captains?

MR TIMOTHY WONG: (In English) So there are two types of classes. The first part will be instructor to drivers, which is driving behaviour, and also there will be classes offered by IAM -- I'll be telling you the full name in a moment -- so IAM could provide a trainer course, we also call it an instructor course, back in 2017; early 2017, about 20 of our experienced drivers actually had an instructor course. And for NLB, we have

four instructors, as Richard was saying.

CHAIRMAN: Thank you.

MS MAGGIE WONG: If I may take you to bundle TD-1 -- it's still the forward planning programme -- at page 239, paragraph (c). I understand this is back in 2017, and the proposal is to have a:

"Regular review of bus drivers' performance [and to encourage them] to register for driving enhancement programmes, which NLB would be prepared to reimburse, subject to prior approval."

About this, has this been overtaken by your recent measures about setting up of training school and training courses, or is this still in place?

MR TIMOTHY WONG: As we have mentioned before, last year we used a partnership with IAM. At the beginning of this year, we have recruited Mr Lee. As a result, the training school will replace paragraph (c).

MS MAGGIE WONG: I come to another topic, and that would be on the topography of Southern Lantau.

Can I take you to a document by the Islands District Council minutes of meeting on 19 March 2018. The Chinese is at DC bundle 1, page 264; English at page 272. And I think Mr Benny Chan on behalf of your company was also present, if you can see at page 265 in Chinese and English at 273.

May I summarise some of the points raised in these minutes? The first issue they raised is whether it is safe to use double-decker bus in Southern Lantau. That would be at paragraph 30; Chinese at 266, English at 275.

Can I trouble you to read paragraphs 30, 35 and 36, so three paragraphs first.

Paragraph 30 raised concerns about using double-decker buses to serve on route 3M. Paragraph 30 is by Ms Sherman Choi. She is the senior transportation officer of Islands, and she said that:

"... the Transport Department has conducted two on-site tests ... with the police, Lantao Bus and the bus manufacturer, in November 2016 in Tung Chung Road section and in November 2016 on the entire route 3M ..."

Can I confirm that has been done, the two road tests have been done?

MR JAMES WONG: Chairman, I can confirm that the two site tests have been done.

MS MAGGIE WONG: Are the two tests in writing?

MR BENNY CHAN: At that time, we require manufacturer of buses to furnish us with a report.

MS MAGGIE WONG: If we look at --

CHAIRMAN: Did they do so? Did they furnish you with a report, the bus manufacturer?

MR BENNY CHAN: We have the report. We can give you the report after today's hearing.

CHAIRMAN: Which bus manufacturer was this?

MR BENNY CHAN: For the one in November 2016, it's MAN. The second one, June 2017, it's ADL.

CHAIRMAN: Alexander Dennis?

MR BENNY CHAN: That's right.

CHAIRMAN: Thank you.

MS MAGGIE WONG: If we look at paragraphs 35 and 36, by Mr Fan Chi Ping, he was one of the committee members, and he expressed that one should not simply use sand bags during simulation tests as in actual situation, because the passengers are not evenly distributed and they may concentrate on one side. And he urged to conduct another test and in bad weather condition.

If I may also take you to another paragraph, just to complete this. It's at paragraph 44(b) [sic], in which I believe Mr Chan, Benny Chan, provided a reply, at 40(b).

CHAIRMAN: 40 or 44?

MS MAGGIE WONG: 40(b). I apologise for that. Your reply is set out at paragraph 40(b):

"During the two above mentioned road tests, the said company acted in accordance with the Transport Department's requirement to place metal boards, each

assuming the standard person weight ... to simulate the situation that the vehicle is fully loaded."

And if we go on to look at paragraph 44, by Mr Randy Yu, one of the committee members:

"He suggested that before official commencement of service of the double-deck buses in end of June, the department and the Lantao Bus should arrange two double-deck buses of the same model type to conduct another on-site test, especially for the turn in Silver Mine Bay? All stakeholders, including district council members, the committee members, the rural committees and village representative(s), to monitor the entire process and make improvement suggestions."

Lastly, paragraph 51, in which Ms Sherman Choi on behalf of the Transport Department:

"... replied that as to arrangement for another road test, the department will make appropriate follow-up with the Lantao Bus after the meeting, and committee members who are interested can participate."

If we turn over the page:

"... [as to] the suggestion that the road test shall be conducted under bad weather condition ... [the department said it] needs to coordinate with [other] departments ... But the department understood the relevant proposal and will try to arrange. [They]

understood the committee's concern about the use of double-deck buses to serve on route 3M, and will continue to keep in close contact with the bus company to strengthen the safety of the bus service."

May I ask, has this road test been carried out after the meeting?

MR BENNY CHAN: Chairman, that bus was newly procured. The first one was delivered today to Hong Kong. There are some formalities to be done, say for example to get a registration mark as well as vehicle examination. After we have completed the formalities we will liaise with the district council to arrange for the road test.

MS MAGGIE WONG: And if that test is carried out, would you be able to provide a test report to the committee as well?

MR BENNY CHAN: Of course.

MS MAGGIE WONG: In this meeting, they also raised a second matter.

CHAIRMAN: Before you move on -- do you have in mind a time frame during which this test is likely to be conducted?

MR BENNY CHAN: I think it is in about one month's time.

CHAIRMAN: Thank you.

MS MAGGIE WONG: The second matter I raise is about the installation of a tilting alarm system. If you look at paragraph 32, Chinese at page 266, English at 275.

If you read paragraph 32, Mr Kwong suggested about installing:

"... a tilting alarm system within the bus compartment, when the bus tilt angle reaches tipping point, the alarm will be triggered to remind the bus captain. On the basis island that most roads on Lantau Island are narrow with lots of turns, he suggested the bus company to consider installing the same."

We also see the Transport Department's response at paragraph 38(b). Ms Sherman Choi stated:

"The department understood the proposal to install tilting alarm within the bus compartments, and will research for its feasibility with Lantao Bus."

So has this tilting alarm system been explored by your company?

MR JAMES WONG: Chairman, I will hand over to Mr Yeung.

CHAIRMAN: Yes, Mr Yeung.

MR PATRICK YEUNG: Thank you.

Chairman, in relation to this system, we have been having meetings with the Transport Department. We propose that all new double-decker buses will be installed with ESP system. There are two functions. One is to stop over-steering and to improve the steering. The other one is anti-tilting. Before the critical point is reached, the speed of the vehicle will

be reduced to maintain stability of the vehicle.

In relation to the alarm system, if necessary we can ask the supplier to add that function.

We have this concern about the alarm. It may disturb the bus captain. Say, for example, it's an alarm for speeding and there is another alarm for door opening and closing. With too many alarms in place, it may disturb the bus captain. So instead of installing another alarm system, we aim to enhance the stability of the vehicle itself.

MS MAGGIE WONG: Thank you. The third matter --

CHAIRMAN: Before you move on -- you say that before the critical point is reached, the speed of the vehicle will be reduced. How is that achieved?

MR PATRICK YEUNG: We make use of two devices. The injection to the engine will be reduced, and there is also a retarder, speed retarder, to reduce the speed of the vehicle.

In relation to the monitoring of the speed, we have a sensor. The sensor is installed on the chassis, right in the middle of the chassis. The function is to detect lateral speeding and calculation of centrifugal force, so that it will have the function of stabilising the vehicle before it reaches a critical point.

CHAIRMAN: So there are two aspects: one is fuel injection

is reduced. Is that a reference to diesel or whatever the fuel is?

MR PATRICK YEUNG: (In English) Correct.

(Via interpreter) Yes.

CHAIRMAN: Reduce but not cut off?

MR PATRICK YEUNG: Well it's from reduction to halting of injection, depending on the speed of the vehicle. On top of that, there is also the retarder which will reduce the speed of the vehicle.

CHAIRMAN: The retarder, does that involve the use of lower gears and/or brakes, or both?

MR PATRICK YEUNG: Both.

CHAIRMAN: Thank you.

MS MAGGIE WONG: The third matter the Islands District Council members raised is the topography of Southern Lantau. They raised the fact that there are many turns and speed roads, particularly the turns in Silver Mine Bay are very rapid, and they mentioned a problem that even single-deck buses have to give way to each other for there to be enough room to pass through, and there is no parking bay installed.

If I may invite you to read a number of paragraphs. It's 34(a), first of all, and then 45(a), stating that that particular road requires bus drivers:

"... to be equipped with experience and driving

techniques and shall be on high alerts in order to handle the roads ... especially the Silvermine Bay turn, because the slightest mistake can cause accident."

And at paragraph 52 --

CHAIRMAN: Before you move on, could you identify the status of the person making the observation?

MS MAGGIE WONG: He is Mr Wong Fuk Kan. I believe he is also a member -- yes, he is also a committee member of the Islands District Council, at page 272.

CHAIRMAN: Thank you.

MS MAGGIE WONG: If we can go to paragraph 48, that's the vice-chairman, Mr Cheung Fu, also mentioned this problem. He mentioned that:

"... the biggest problem came from the roads and not the buses, therefore the priority is to improve the turns of the roads."

And stating that there is simply not enough room to fit two buses to pass through at the same time, "especially the rapid turn of Silvermine Bay".

May I ask you your views on this matter: is this a problem that caused concern to your company?

CHAIRMAN: By that you mean the roads themselves are the problem?

MS MAGGIE WONG: First of all, the roads themselves, and secondly, some of the members expressed that it required

highly skilled drivers to drive that particular road.

CHAIRMAN: So there are two questions there.

MS MAGGIE WONG: There are two questions.

CHAIRMAN: And the first question is: what view, if any, do you have about the observation about the roads being the problem?

MR JAMES WONG: Thank you, Mr Chairman. First, I would like to take this opportunity, and actually at various occasions, including the meeting of the district council as cited by the paper. We understand that there have been road accidents in Hong Kong giving rise to worries about safety of double-deckers. But I must remind all of us here that for the road now, buses are already operating on that road. It's not the case that the roads are not used by the buses. So that's number one.

We don't have the plan to have double-deckers running the entire area of Southern Lantau. Our judgment is that, say, in places like Ngong Ping, Tai O -- well, for these places, they are not suited to the -- not suitable for double-deckers' operation. But in Mui Wo, double-deckers are suitable.

We have finished the tendering exercise and we have decided to procure a certain model of double-decker. Those of us who are here will understand that, say, for Hong Kong Island, there are also hilly terrains,

including, say, Stanley, The Peak, Shek O, et cetera, and these double-deckers also run in these places as well.

So the car model that we are going to procure will have a shorter length than single-deckers. It's 10.4 metres in length. For single-deckers, their length is between 11 metres to 11.5 metres or 11.6 metres. So it is shorter in length compared to the single-deckers.

Of course, we understand that there is this perception that double-deckers are more prone to overturning. Theoretically speaking, that may be so. But then we think what matters most is the driver's driving attitude.

Of course, single-deckers will have less risk of overturning than double-deckers, but does it mean that for all hilly roads double-deckers should not be used? No, that should not be the case.

So we think what matters most is the driver's attitude, and in terms of the hardware, we also have to consider what can be done. This time, we decided to procure a shorter double-decker. In the market, there are longer double-deckers, but we opted for a shorter double-decker which also comes with a lesser height, and we believe that given that this is the model and coupled with the appropriate training to be provided to bus

captains, the risk can be lowered.

Thank you, Mr Chairman.

CHAIRMAN: What do you mean, Mr Wong, when you say, "What matters most is the driver's driving attitude"?

MR JAMES WONG: Thank you, Mr Chairman.

We have a traditional way of doing things here. For every bus, we need a bus captain to operate the bus, and after all he is a human being. It's not like rail or an aircraft. There are so many automated processes in place. There are automated devices to help the pilots and, say, the drivers of trains.

In buses, as you mentioned, our chairman of the company is my father and we have been operating in the transport business for three generations. We started the business with my grandpa, and they used to say that vehicles in the old days were not as advanced as today's. Maybe I was not born when, say, the old vehicles were being used. But we deeply believe that the most important thing to ensure safety -- of course, it will be good that we have technology to help us, but what matters most is the driver's attitude. He must be professional. He must have the mindset that he should drive very safely. This is the core value that we embrace.

CHAIRMAN: Thank you.

MS MAGGIE WONG: You mentioned earlier that the double-deck buses, in terms of length and height, are less than the normal single-deck buses. For completeness, actually, your Mr Chan did say that in the minutes at paragraph 40(a) at page 278, for the committee's reference.

CHAIRMAN: They were less in length than singles, but surely not less in height?

MS MAGGIE WONG: Not less in height but --

CHAIRMAN: But shorter.

MR JAMES WONG: (In English) But the height is less than those normal double-deckers.

CHAIRMAN: Yes.

MS MAGGIE WONG: There is another minute I would like to refer you to. This is based on an accident that happened on 6 April 2015, when a bus of your company nearly fell off the hill when it was travelling down a slope on its way from Tung Chung to Tai O.

Do you remember this incident? We can show you the news article, if it may assist you.

That's the Keng Shan Road.

CHAIRMAN: What is the source of this material?

MS MAGGIE WONG: This is from the Oriental Daily News, and that would be on 30 May 2015.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Would you mind taking a look at the article, or do you recall this accident happening on 6 April 2015?

CHAIRMAN: And where is this to be found in the materials, the bundles?

MS MAGGIE WONG: Chairman, this is not found in the bundle but it is on the website link. We have provided a translation for your ease of reference.

MR JAMES WONG: Mr Chairman, I just read this article. It mentions that there is an accident which happened 42 years ago, and there was another accident which happened 12 years ago, and it didn't mention about the accident happening in April 2015.

Well, I can remember this particular photo. For these three accidents, they came with different causes. For the accident 42 years ago, the road condition back then was very different from today's.

I, of course, could not confirm the situation on the road 42 years ago, but as far as what I've heard, the road situation has improved a lot today.

CHAIRMAN: Take your time to read the material before you answer.

MR JAMES WONG: (In English) Yes.

(Via interpreter) It mentioned an accident in 2003. We have to go back and look for the information, because

we are not sure about the location of the accident, and also how it happened.

For the accident in 2015, it was not mentioned in this article at all. But the photo that was shown and the vehicle is stranded there -- yes, that's the one -- I remember that this happened in 2015. For this accident, fortunately, no one was seriously injured; there was no injury or death. Some passengers sustained minor injuries and had to be sent to the hospital. This photo looks rather appalling. The front part of the bus actually landed on a piece of land. After the incident, we tried to conduct a review on how we could improve on things. We have to check into the details further.

We looked into a speed limiter, so we just don't count on the braking system. Because we are talking about a downward slope, so we are looking into the possibility of adopting a retarder. So in future, whether we are using a double-decker or -- right now, for the single-deckers, they are retrofitted with retarders.

MS MAGGIE WONG: Thank you.

CHAIRMAN: Before you move on, do I understand you to say that the photograph of the bus that we can see displayed on the screen now is, as you remember it, a photograph of the 2015 April 6 accident; is that correct?

MR JAMES WONG: (In English) Yes.

(Via interpreter) Correct.

CHAIRMAN: But the article itself doesn't give any description of that accident; it's just a photograph?

MR JAMES WONG: Correct. The article doesn't mention about this particular accident. Maybe it's not reported by this article here.

CHAIRMAN: Do you have any report, Ms Wong, of the 6 April 2015 accident for Mr Wong to remind himself about the details?

MS MAGGIE WONG: Chairman, I think this matter was discussed at the minutes of meeting on 18 May 2015 by the Islands District Council; Chinese at page 203, English at page 208.

This was in response to a question raised at page 201, in Chinese, and page 202 in English, a question raised by district council member Mr Randy Yu in relation to the safety of North Lantau Highway.

CHAIRMAN: So we should start with the question --

MS MAGGIE WONG: We should start with the question.

CHAIRMAN: Page 201 in the Chinese and 202 in the translation.

MS MAGGIE WONG: Correct.

CHAIRMAN: Take a moment to familiarise yourself with that, Mr Wong.

MS MAGGIE WONG: Mr Wong, if you look at page 204, I believe your company's representative, Mr Wong Wah, was present. In English, it's at page 209. And the committee members in the Islands District Council on 18 May 2015 identify three main issues.

First, they mentioned the road design. That's at paragraph 79(c) by Mr Lou Cheuk Wing. He is also a committee member. He identified that the road design on Lantau Island is not safe, such as the South Lantau Road and the Keng Shan Road between the reservoir and Tai O, and it states that the Transport Department had conducted several improvement construction and that there are more than ten turns but only three received improvements.

The second problem is at paragraph 79(d):

"The Transport Department approved 30 tour buses to operate on Lantau Island, but the vehicle body of these tour buses are relatively longer than regular buses and when driving through substandard turns on Keng Shan Road, accidents will be caused more easily."

The third is at paragraph 81, by Ms Lee Kwai Chun. She's also a committee member, and she identified that the request to expand the road, South Lantau Road, for more than 20 years, but still the situation had not improved.

And in relation to the first issue, I believe Mr Wong Wah of your company have enquired about the exact location of the three improvement spots, and if we can go to paragraph 90:

"Mr Wong Wah enquired about the exact location of the 3 improvement spots to be carried out. He was of the opinion that the entire Keng Shan Road has about 30 spots that needed improvements."

My question is, did your company identify those 30 spots to the Transport Department?

MR JAMES WONG: Mr Chairman, at this moment, we cannot be sure as to whether we have formally taken up the matter with the TD in the form of correspondence in writing, that is asking the TD to tell us which locations will get improvements.

For Mr Wong Wah, who was at this district council meeting, he is not present today and has also retired. I'm afraid I have to go back to check the information to see what has transpired between ourselves and the TD.

CHAIRMAN: Yes, please do so, and if you are able to obtain anything which casts light on this, please provide it to the committee.

MR JAMES WONG: (In English) Yes, sure.

MS MAGGIE WONG: In your provision of information, I wonder if you could also assist by telling us whether these 30

spots are within the accident black spot analysis in your training programme that you are going to provide to your bus captains.

MR JAMES WONG: Mr Chairman, at this moment, as to the 30 locations -- I think it's roughly 30 spots -- for those 30 spots requiring improvements mentioned by Mr Wong Wah, at this moment we are not sure of the locations, so offhand it is impossible for us to tell whether they are the same as those covered in our training programme where we need to enhance the training. I'm sorry, I'm afraid I have to go back to check and clarify, that is those 30 spots mentioned by Mr Wong Wah.

CHAIRMAN: Thank you. Please do so.

MS MAGGIE WONG: The next topic I'm going to go to is the illegal parking problem, and if I may take you to miscellaneous bundle 2, page 63 in Chinese, and the translation at 644-1.

If you can look at this page, the third paragraph, at page 644-1. This is a letter from the Democratic Alliance provided to the committee, a matter brought to the attention of the committee. It begins with the words:

"The industry actions of bus captains that took place in February 2017 and 2018 aroused the ...

different sectors of the community over problems such as illegal parking at bus stops, bus captains' treatment and working hours."

They identified a number of reasons for illegal parking, and if we go over to page 644, English at 644-1, it states:

"To eradicate illegal parking at bus stops, it must be dealt with from its roots and by formulating suitable policies, revising the outdated laws. The problem can only be resolved by multipronged measures."

Then one of the suggestions --

CHAIRMAN: Before you move on, where do we find that in the translation?

MS MAGGIE WONG: Page 644 at the bottom, 644-1, the last four paragraphs.

CHAIRMAN: The final paragraph?

MS MAGGIE WONG: The final paragraph.

Then over the page at 644-2, they made one suggestion:

"Following Singapore and installing cameras on all bus fleets. Singapore has since 2008 installed cameras on buses and the cameras are installed next to the driver's seats. When drivers discover cars parking inside the bus stop, they can press the button and record a video of 5-10 minutes. The bus companies will

then hand the recording to the police ... the police can review the recording ... in around two weeks' time the ticket will be sent to the car owner's home", et cetera.

Before we go further into this, does the company regard illegal parking at bus stops as a problem?

MR JAMES WONG: Yes. Thank you, Mr Chairman.

Well, in the case of the NLB, all the time we have been talking about the roads in South Lantau. You need a closed road permit before you can drive in South Lantau. So when compared with the case downtown, we have less traffic. For the information received by us from the colleagues, as far as illegal parking at bus stops, we don't have as many instances. Currently, this is the case. But then in individual cases, say for example at the bus terminus at Tai O, recent years have seen a lot of construction works going on, and at the bus terminus, where we set down and pick up passengers, space is limited. Sometimes there may be vehicles nearby, especially on festive days. Well, in fact, they don't have enough private parking spaces. We do have this scenario to a lesser degree, but when compared to the urban area, the problem isn't as bad.

Thank you.

MS MAGGIE WONG: The reason why I raise this is because the minutes of meeting, again from the Islands District

Council on 21 March 2016, if you go to page 98 in Chinese.

CHAIRMAN: Of which bundle?

MS MAGGIE WONG: DC bundle 1, page 98 in Chinese, paragraphs 143 to 144, and in English, page 103-1. So paragraphs 143 and 144.

Both concerns were raised by the committee member, and they talked about the illegal parking problem or the double parking observed at Tat Tung Road. I wonder if -- what is your comment on the problems raised by these two district councillors?

MR JAMES WONG: Mr Chairman, if I may defer to Mr Chan, thank you.

CHAIRMAN: Yes, Mr Chan.

MR BENNY CHAN: Mr Chairman, well, for us to operate bus service in Tung Chung, we have seen that for Tat Tung Road, the traffic situation there is quite bad. We have only got a single direction for traffic and a single lane.

For the points raised by the district council members, of course we are talking about the town centre of Tung Chung, and whenever there is the congestion, the entire Tung Chung will be blocked, and for our bus operation, it creates a difficulty. This is because our bus stop is at Tat Tung Road, and then it is sometimes

difficult for buses to depart from the bus terminus.

I think it is a problem for the community as a whole, and in fact this is a problem that is known to the district council for quite a long time.

CHAIRMAN: Are you saying that the problem for your buses, in that they find it difficult to leave from the bus terminus, is directly because of illegal parking, or is caused indirectly by traffic caused by illegal parking elsewhere?

MR BENNY CHAN: Indirectly affected. As I have said, for this particular road, it is very busy. It is in the town centre of Tung Chung. Whenever there is double parking or whenever there is a traffic accident, then the town centre of Tung Chung will suffer from congestion.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Are you aware that the police suggested to the Transport Department and LegCo that cameras should be used at black spots, fixed at the lamppost, to record this illegal parking at the bus terminus, and that could be the source of the evidence? Do you know about that?

MR JAMES WONG: Thank you, Mr Chairman.

Yes, I have heard about such a suggestion in the news reporting.

MS MAGGIE WONG: Do you welcome such an idea?

MR JAMES WONG: From the standpoint of the company, of course we very much welcome any means that can resolve the problem of roadside illegal parking.

MS MAGGIE WONG: I'm going to another topic. It's about disciplining of bus captains. If I may take you to NLB-1, page 23.

Your company states that bus captains involved in serious accidents will be suspended from driving duty.

May I ask how long will they be suspended?

MR JAMES WONG: Thank you, Mr Chairman.

I think page 13 of the same document -- well, I think the page following the one shown on the screen -- I think we have explained. You can refer to item 3. If it is so unfortunate that there is a very serious accident, we have to spend time to carry out an investigation, to find out whether our colleague is to be blamed or whether it is not his responsibility. During that period of time, we may very well be suspending his driving duty. He's still being paid, because first of all we want to find out about the facts. In the past, there were cases in which something very unfortunate happened and the bus captain himself also asked for a break; he would like to take a rest. So suspension pending investigation is of assistance.

MS MAGGIE WONG: Thank you. If I may take you to page 23.

It also makes reference to bus captains who are suspected to suffer from mental -- who require mental attention. Can you tell us how are these bus captains identified, those who require mental attention?

MR JAMES WONG: Thank you, Chairman.

Well, I won't say that today we have any mechanism to investigate into bus captains who are suspected from having some mental problems, because it would take professionals to be qualified to give such views. As to how we find those who are in such need, we will have to wait for our colleagues to approach us, because it's not something physical. If they need more attention, they need someone to talk to, our company has engaged an outside company to work with us. Colleagues may call that company to receive professional help.

MS MAGGIE WONG: You have made reference in this paragraph to counselling service. Would this counselling service be provided by your company and paid for by your company?

MR JAMES WONG: Thank you.

At this moment of time, we have provided a hotline for our colleagues. If our colleagues think there is a need, they may call a consultant service hotline. After talking to their operator, because some screening may be required, if that consultant is of the view that

counselling service may be needed, the case will be referred to more professional organisations. All these are paid for by our company. Our employees don't have to pay.

MS MAGGIE WONG: Would you like to introduce a system for regular assessment of whether a driver is mentally and emotional fit to continue to be a bus captain?

MR JAMES WONG: Thank you.

After the hearing with Citybus, I noticed that they are looking into it, to see if it's suitable. I have some friends who are psychologists. I would like first to find out how to help them, from a professional point of view. Well, we don't -- even for a psychologist, it's not easy for them to tell us who is suitable to be a bus captain. However, after conducting psychological assessment, the psychologist may be able to tell us what further assistance or support is required by a particular bus captain, and we can start to help from that point.

It's not an across-the-board approach where, like a medical checkup, a doctor can tell you whether someone is fit to drive or not. Everything I have said just now is something that I have learned from my friends. We are aware that sometimes our colleagues are under pressure because they deal with many different people

every day. We do need to provide different channels for our colleagues to vent or to talk. We will look further into it. Is it helpful to have some psychological assessment before they join us? Is it necessary to have regular assessment? Do we need random checks? I can't say because we don't have much information at this point of time. I can't give you a concrete answer. I will have to look further into it.

MS MAGGIE WONG: I am going to the topic of remuneration and welfare. If I may invite you to look at two pages of your submission, NLB-1, page 17 and page 21.

At page 17, the second paragraph from the bottom, your company states:

"To enhance job attractiveness and retain existing bus captain, apart from wages and welfare package adjustment ..."

If I may invite you to look at page 21, which sets out the remuneration packages. Are they before or after the adjustment?

MR JAMES WONG: The adjustment you just referred to, when was it? Which adjustment?

MS MAGGIE WONG: I'm just referring to your company's submission at page 17, the second paragraph from the bottom, line 3. You make reference to "wages and welfare package adjustment" and --

CHAIRMAN: Could you read out the sentence?

MS MAGGIE WONG: Yes:

"To enhance job attractiveness and retain existing bus captain, apart from wages and welfare package adjustment, our company is developing some measures, include but not limited to the following items of enhancing their job satisfaction".

So it is this word "adjustment" I'm referring to.

MR JAMES WONG: Thank you.

In relation to that table, it's July 2017. We haven't done the adjustment this year. Just now, Ms Wong mentioned about an adjustment. You find a number of measures following the paragraph she just read out. Apart from take-home pay, we have introduced some enhancements. So that's what it was about. And for that table, it's from July 2017 to now. We are preparing for the adjustment for 2018. We are still looking into it, about the rate of increase.

MS MAGGIE WONG: When will this rate of increase be determined for 2018?

MR JAMES WONG: Thank you.

Under normal circumstances, there will be a pay rise on 1 July. This year, at the beginning of April, we announced that there will be a one-off special bonus. It is because we noticed that the two other bus

operators in the market, in around February or March, I think it was March, they have changed the pay structure of their employees. We are concerned that if we wait until July to have the pay rise, there will be a huge gap.

That's why, in April, we announced the one-off arrangement. The bonus will be released in September. In relation to the wage adjustment in 2018, just like we have done before, we are talking to the labour union and we are also looking at the company's situation.

There is actually an indicator for our reference. The scale of our company is the smallest, so we will draw reference from the two major operators in the market, in order to gauge the rate of increase, because their wage adjustment will be of reference to us.

Today is 19 June. We hope that in around July or August we will be able to do that. If it's after July, then it will have a retrospective effect.

MS MAGGIE WONG: Would you be able to provide us with an updated table after the review has been carried out in 2018?

MR JAMES WONG: Yes, of course.

MS MAGGIE WONG: Thank you.

Now, if we look at the table, we can see that the remuneration package, a significant part of the driver's

monthly pay appears to derive from per-day duty allowance, that is item 2. Do you agree?

MR JAMES WONG: Yes.

MS MAGGIE WONG: How many days a month would a driver be typically required to work?

MR JAMES WONG: Thank you.

On average, it's 24 to 25 days.

MS MAGGIE WONG: So a rough calculation would be 5,500-odd, if it is a 24 days' duty allowance. So if the driver was sick, would that mean he would not get that allowance?

MR JAMES WONG: Right. You are referring to duty allowance, item 2?

MS MAGGIE WONG: Yes, correct.

MR JAMES WONG: If on that day the bus captain is not working, absent from work, there won't be any duty allowance.

MS MAGGIE WONG: So let's quote an example. If he was sick for three days, he would lose about $700-odd; is that correct? About $700, assuming it's $230.

MR JAMES WONG: Thank you.

Yes, I confirm. Assuming that a colleague has been sick for three days and not reported duty, he would not be given the duty allowance.

MS MAGGIE WONG: What about the attendance bonus at item 4,

which is given on a monthly basis --

CHAIRMAN: Before you move on, is the duty allowance that is lost, the $230 for each of the days that he doesn't work, or does he lose an overall package of duty allowance?

MR JAMES WONG: If you're referring to the duty allowance, it's on a daily basis. It's counted on a daily basis. Say, for example, if that person -- well, there are 25 working days, then it's $230 times 25 for that month. For whatever reason, if that person has worked less than that number of days, then we will times 230 by the number of days he has worked.

CHAIRMAN: So if he doesn't work one of the 25 days, then he only loses one day's $230 daily duty allowance?

MR JAMES WONG: If you're talking about duty allowance, yes.

CHAIRMAN: Thank you.

MS MAGGIE WONG: What about the attendance bonus, $750, awarded on a monthly basis? If he was sick for three days, would that be deducted pro rata?

MR JAMES WONG: Thank you, Chairman.

When it comes to the attendance bonus, in Chinese it's (Chinese spoken). It's given to the employee on a monthly basis. If the colleague has missed work, for the first day there will be a deduction of 200; second day, 250; the third day, 300, and so on, and so forth.

So if that person has missed work for three days, that means the $750 will not be given to that person. That means if that person has not come to work for three days, the attendance bonus will not be given. If it's just one day of work, then what's missed is $200.

MS MAGGIE WONG: So, if my calculation is correct, if the bus captain is sick for three days, then he would in total lose 1,500? Is that an accurate calculation? 750 plus 750?

MR JAMES WONG: Sorry, I confirm that. If the colleague has not turned up for work for three days, just like what was said, $690 deduction from the duty allowance -- well, not deduction but that will not be paid, and another $750 under attendance bonus will not be paid to that colleague.

CHAIRMAN: Mr Auyeung has a question.

MEMBER AUYEUNG: Am I right to assume then that both duty allowance and attendance bonus is having the same objective; it's to encourage the employee to report to work?

MR JAMES WONG: Thank you, Mr Auyeung.

In response to your question, like you said, when we set the duty allowance, the objective is to encourage colleagues to work hard, and for the attendance bonus, it has undergone some changes, just like the safety

bonus. Maybe I have to check into old records to come up with a more exact picture. It used to be, say, once every year or twice every year, but colleagues told us that they had to wait for too long if this is distributed, say, once or twice a year. Later, it was changed to a quarterly disbursement. Now, it's a monthly disbursement.

Indeed, the aim is to encourage colleagues to work hard. So the objectives of the two allowances are similar.

MEMBER AUYEUNG: Thank you.

CHAIRMAN: So the answer was "yes", in the short form?

MR JAMES WONG: (In English) Yes.

CHAIRMAN: Ms Wong.

MS MAGGIE WONG: This is not the only bonus that incentivises workers to allowance. If we look at item 6, "Rest day work allowance", the worker or the bus captain will be awarded $625 per working day if they work on a rest day; is that correct?

MR JAMES WONG: Correct.

Maybe I can give you the rationale behind. I would like to use the best words to describe this. As I said, our chairman, Mr Wong, has been working in the transport sector for many, many years, and he had some practical thoughts. When the grass-roots and frontline workers

would like to work on a rest day, this $625 is an additional amount. They should already have the duty allowance, and then another $625 would be given to them.

Say for this colleague, maybe he should be working 25 days and then he would like to work on the 26th day as well, so he's sacrificing his rest time to work, so if we are not going to give him the rest day work allowance, indeed, it is easy for the colleagues to find some part-time driving duties outside, say driving lorries and taxis, et cetera. So instead of having them doing that, we would be giving them a good return to our colleagues, if they work for us.

Like we said, compared to other bus companies, we are offering an extra five days' leave, and honestly speaking, we allow the colleagues to choose to take leave or not. So sometimes a colleague would not like to take leave; they would opt to work. So, in other words, it's an increase in the pay for the colleague, in effect.

CHAIRMAN: Prof Lo.

MEMBER LO: For the rest day, is it by invitation or can the bus captain invite himself to work on a rest day? For example, he's one day sick and wants to make up the loss, can he, say, work 27 days?

MR JAMES WONG: Thank you, Professor.

If, say, the colleague would have one less day on rest day, he would like to drive, we would have to look at when he applied for that. Say, for example, he said, "Tomorrow I have an appointment with a friend", but then, "The friend would not like to meet with me", then all of a sudden he said, "I have nothing better to do tomorrow so I will work tomorrow", so we will look at whether there is an actual need for him to work tomorrow. Normally, that application will be declined because it is a sudden request, because we have the duty roster drawn up in advance.

Then we would also be looking at the guidelines issued by the Transport Department and also we will be mindful of the actual circumstances, whether he is exceeding the duty hours, et cetera. So all these will be looked into.

MS MAGGIE WONG: So would this structure of pay provide incentive for the driver to work longer hours or working even if he was sick?

MR JAMES WONG: Now, first, when you mentioned he was sick, does it mean he's seriously ill or he's not fit for driving, or he is still fit to drive, although he suffers from minor illness? Our system is that if the colleague has some minor illnesses -- well, we would actually look at the extent or the degree of sickness.

If he is not fit to drive, then even if he doesn't want to take the rest day he shouldn't be driving.

Also, our core belief is that the more you work, the more return you will get. This is very much a servicing industry, and for the newly joined bus captains, they think it's a complicated system and we have to spend efforts to make the calculations for the colleague. But what we want to do most is for colleagues who are dedicated and hard-working, they will be given the pay they deserve. That's our aim.

MS MAGGIE WONG: Moving on to another topic. It's about passengers' behaviour. We have heard other bus operators, that their bus captains have experienced problems of passenger behaviour. Do you or does your company receive similar complaints?

MR JAMES WONG: Chairman, I would like to defer to Mr Timothy Wong to take that.

CHAIRMAN: Yes, Mr Wong.

MR TIMOTHY WONG: James has said that we provide localised services, relatively speaking. Routes are centred around Southern Lantau and Tung Chung, and for the passengers, they are normally the local residents, and our colleagues and bus captains our regulators will meet with the passengers every day, so we receive relatively fewer complaints.

Another source of our passengers is tourists. Tourists' intention really is to sight-see Hong Kong, so there are fewer disputes involving tourists. And for the regulators, the problems that they encounter mostly have to do with whether passengers can carry luggages on board, and also if people go into Lantau, when they are carrying surfing boards and bicycles, et cetera. The regulators will also tell the passengers if they are too bulky, they should not be carried on board.

If there are luggage racks on board, then we will assist the passengers to take them on board. So we experience fewer disputes.

MS MAGGIE WONG: We note that earlier we have seen one of the bus safety features adapted in NLB buses include CCTV at driver console with video-record function. Does this camera include or have audio facility?

CHAIRMAN: Firstly, can you take us to where this dealt with in the written submission?

MS MAGGIE WONG: Yes, the submission is at page 20, Mr Chairman.

CHAIRMAN: Thank you.

MS MAGGIE WONG: And the bus safety features is at page 453 of the NLB-2 bundle.

CHAIRMAN: And page 20, would you read out the relevant passage?

MS MAGGIE WONG: Yes:

"In-bus [CCTV] video may also be retrieved in real-time to monitor the bus captain or passenger situation in restricted to emergency and security purpose."

CHAIRMAN: And page 453 of NLB-2.

MS MAGGIE WONG: Yes, page 453, NLB-2, item 16.

Does this CCTV system or cameras have audio facility?

MR TIMOTHY WONG: Well, let me explain what kind of cameras we have. We have two types of buses. One is single-deckers, the other is double-deckers.

Let's talk about double-deckers first. For the newly procured double-deckers, they come with CCTV functions. Your question just now is about audio recording. The audio function -- the CCTV with audio function will be placed on top of the bus captain, and for existing single-deckers, for the time being, no CCTV has been installed. If we are to retrofit such CCTV cameras, it takes a long time, and this system will involve recurring costs as well. We have to pay monthly fees.

Given our existing financial burden, we don't have plan to retrofit every bus with CCTVs, but for new buses, we will actively look into retrofitting CCTVs.

MS MAGGIE WONG: You just mentioned that the CCTV with audio function will be placed on top of the bus captain. What is the purpose of that?

MR TIMOTHY WONG: The audio function is mainly to help, say, if there are passengers making complaints and then, say, at our customer service hotline we receive calls about disputes with the bus captain, we will retrieve the relevant information to look into the real situation. We would not on our own initiative retrieve such files.

MS MAGGIE WONG: So it is reactive to complaints rather than on a random checking purpose?

MR TIMOTHY WONG: Correct.

MS MAGGIE WONG: The next topic is the design of buses and safety devices and if I may invite you to go to NLB-2 bundle at page 2.

The franchise agreement starts at page 2. If we go to page 5, clause 7.

CHAIRMAN: Sorry, which bundle is this?

MS MAGGIE WONG: This is the NLB-2 bundle.

Could you familiarise yourself with the provisions of clause 7(1) at page 5.

It makes reference to the grantee providing, amongst other things:

"... such safety or service enhancement facilities, installation, fixtures, fittings, [et cetera] ...

apparatus or equipment on its buses as may be reasonably required by the commissioner of transport after consultation with the grantee."

So, in other words, the Commissioner for Transport can reasonably require your company to install service enhancement facilities from time to time?

MR JAMES WONG: Correct.

MS MAGGIE WONG: Do you have any discussions recently with the government about service enhancement facilities?

MR BENNY CHAN: Mr Chairman, I want to say this. When we discussed with the Transport Department on the new franchise, the Transport Department has asked us to provide certain facilities, and recently, in our meetings with the Transport Department, we discussed safety devices to be installed on buses. We had discussed those with the Transport Department.

CHAIRMAN: When was that?

MR JAMES WONG: For the new franchise, that came into effect in 2017. We had to look into the exact date. We started discussing with the Transport Department towards the end of 2015/early 2016, and we discussed what enhancement should be made under the new franchise.

Mr Chan referred to our discussions with the Transport Department on safety devices and there was a meeting. The meeting was held several months ago. In

fact, we held two meetings in the past several months, and going forward we will have a third meeting.

CHAIRMAN: And when were these meetings?

MR PATRICK YEUNG: Mr Chairman, if I may add to the answer. There should have been three such meetings. After the IRC has been established, there was this second working group, on 27 March, 30 May and 12 June respectively.

CHAIRMAN: And these were meetings at which the franchised bus operators, bus manufacturers and the Transport Department attended; is that correct?

MR PATRICK YEUNG: Correct.

CHAIRMAN: Thank you.

MS MAGGIE WONG: You refer to the discussions about the safety devices. What safety devices were discussed with the Transport Department at these three meetings?

CHAIRMAN: Perhaps we could leave you with that question for the moment because I think it's appropriate we take a short break now, because we are going to sit until at least 5.30, but I think, given the imposition placed on you, that we give you a break. So we will take ten minutes now. Thank you.

Ten minutes.

(4.32 pm)

(A short adjournment)

(4.41 pm)

CHAIRMAN: Yes, Ms Wong.

MS MAGGIE WONG: Just a while ago, Mr Wong, we have provided you with the TD bundle 1, page 98.

CHAIRMAN: What is this document?

MS MAGGIE WONG: This is the paper of the Transport Department, TD_Paper_07, with the title, "Vehicle safety -- design, build, examination and inspection of franchised buses". It started at page 81. I'm focusing on page 98, as to the safety devices of franchised buses.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Yes, Mr Wong, you have had an opportunity to read, in particular, paragraph 10?

MR JAMES WONG: Yes, I read it.

MS MAGGIE WONG: Are these the safety devices that you discussed with the Transport Department in its three meetings?

MR JAMES WONG: Yes. At those three safety-related meetings, we had a discussion of the above-mentioned safety devices.

MS MAGGIE WONG: I would like to focus your attention to three particular safety devices. First is the geo-fencing at (c), "Speed control by GPS or geo-fencing".

Can you give your views or feedbacks regarding the

Transport Department's suggestion of implementing a geo-fencing system, ie a speed limiter that uses a GPS system to limit the speed of buses at specific road sections?

MR TIMOTHY WONG: Mr Chairman, for us to discuss the GPS system, I think we need to talk about the background of the black box. As early as 2015 and 2016, when we had a negotiation about the new franchise, we identified a new supplier of black box. As Mr Chan has already said, GPS is nothing new. However, as far as operators are concerned, we have to bear in mind the frame point to the long-term. For the data collected by GPS as well as the black box, we have to transmit the raw data to the server of the company.

Between 2012 and 2015, at that time there was another black box supplier for our company. Many suppliers in the market provide the maintenance on a recurrent basis in the form of a monthly cost. For our long-term development, in 2016 we acquired the black box. Of course the black box has got important functions. At that time, under the new franchise agreement, we had to provide the ETA function. We looked at two suppliers and we chose our current supplier, called Openmatics. For the GPS of this supplier as well as the raw data produced, they can be

uploaded onto our server.

For geo-fencing, for this to be used to monitor the speed or to control the speed, we are open-minded. We hope in the future we can develop a way so that on specific road sections we can control the speed.

So when compared with other operators, I believe that we stand a higher chance to do this. This is because we have fewer interferences for the road sections on Lantau. I think for our black box system, I think it would be easier for us to send the GPS data correctly to our server.

What is important is that for the real-time transmission of the data from the GPS, and for it to interface with the computer on board, it takes time to develop the arrangement. This is because currently the black box is directly connected to the bus cam. For this to be done, however, we have to cooperate with the bus manufacturer.

Of course we welcome the new direction, but as far as NLB's IT department is concerned, the scale is such that probably it will take it more time to have it researched and done, but we certainly welcome such a move.

MS MAGGIE WONG: Now, since we are on the black box, may I refer you to your submissions at NLB-1, page 14, first

of all. The second-last paragraph, you stated:

"Through our in-house information technology team, we planned to develop an exceptional report system of using 'on-bus' black box data log to generate reports actively to spot any bus captain with potential hazard of their driving habit."

If I also take you to page 20 of your submission, second-last paragraph:

"As per commencement of 2nd generation black box system in late 2017, it provides lowest level of raw data of its data log. Additional application such as generation of exceptional report of vehicle speed at certain location is not included. We are now developing our in-house software to provide such information for bus captain performance monitoring purpose. At present, we will check and consolidate the raw data from data log manually upon traffic incident and passenger complaint investigation."

Now, do I understand this to suggest at the moment your company does not have an over-speed exceptional report generated automatically?

MR TIMOTHY WONG: At this point of time, no. When we were writing this document, we have considered introducing the exceptional report function in relation to speeding.

MS MAGGIE WONG: If I may also take you to NLB-1, page 33,

the first box on the right. In response to the committee's further questions, you provided supplementary information, and you stated:

"Refer to our existing black box system, it can record multiple bus operations information, which includes geographical location, speed, orientation, gear, door, bell push, [et cetera] by every second. To record and manipulate all these large number of data, it is require heavy capital investment of data transmission, data storage system and sophisticated software to do so."

Now, it made reference to this "heavy capital investment". May I ask if your company is prepared to invest on this system, as you stated there?

MR JAMES WONG: Thank you.

When it comes to our finances, out of the bus operators, our company is of the smallest scale. When it comes to development of softwares or new systems, the cost involved, whether it is one bus or 1,000 buses, the development cost will not differ much. The major difference is hardware on board our buses. In our work to continuously strengthen our input in this regard, say for example what Tim has said, generation of exceptional report, we are willing to make such investments.

But you must understand that if we calculate the

cost per bus, our cost will be much higher than other operators.

MR TIMOTHY WONG: I would like to add that our current investment is on mainly two areas. First, hardware. Black boxes on board buses, and the transmission of black box data to our server. When it comes to software, as we have said, we buy black box for our back-end system software development, there is a fee. In the new franchise, we are required to provide ETA; there is a development fee. Every month, the upload fees or transmission fee of bus data, all these are development cost, and there is also manpower required to maintain this system.

Just now we said that the black box is able to record information by every second. Currently, our system will upload the information once every 30 seconds. If it's changed to every second, the fees and the server size will have to be enhanced. That is what we mean by capital investment. It's mainly the software development fee.

MS MAGGIE WONG: Mr Wong, you made reference to the development of this software. When would you expect your company --

CHAIRMAN: Before you get involved in that, perhaps I could ask this.

You say there are two elements of cost. One is the black box and the other is software. Do I understand you correctly?

MR TIMOTHY WONG: (In English) Yes, correct.

CHAIRMAN: What is the cost of a black box, in ballpark figures?

MR TIMOTHY WONG: (In English) When we first purchased it in 2016, per unit, it's EUR800 per unit, which is approximately HK$8,000-something back in 2016 and --

CHAIRMAN: Do I take it the black box side of the cost isn't the significant cost?

MR TIMOTHY WONG: (In English) Significant.

CHAIRMAN: You say it is significant?

MR TIMOTHY WONG: (In English) It is significant, yes.

CHAIRMAN: Right. What about software?

MR TIMOTHY WONG: (In English) Software, at the moment we have three headcounts maintaining this programme. Actually, the ETA apps and system we developed back in 2016 up till now, total cost around HK$1 million, and there's another issue that I would like to raise up, the installation cost, installation cost of the black box, because it requires skilful professional technician to install this black box. It requires connection with the supplier, who are teams from Czech Republic.

CHAIRMAN: This is Openmatics?

MR TIMOTHY WONG: (In English) Openmatics, yes, in Czech Republic.

Back in 2016, when we have not acquired our in-house technician, per bus, installation per bus, it's up to HK$4,000 per bus.

CHAIRMAN: Up to?

MR TIMOTHY WONG: (In English) Up to. It depends on the amount of buses that we can provide for the company to install black boxes.

CHAIRMAN: You were dealing with software and you said there are three accounts. You dealt with installation of the ETA requirement. What about the other accounts?

MR TIMOTHY WONG: (In English) Sorry, Chairman, do you mean the other headcounts for IT department, or do you mean the installation?

CHAIRMAN: No, the other accounts, as you called them.

MR TIMOTHY WONG: (In English) Oh, headcounts.

CHAIRMAN: As in head?

MR TIMOTHY WONG: (In English) As in number of employees, sorry. So we need three --

CHAIRMAN: Who are the other two?

MR TIMOTHY WONG: (In English) A total number of three persons have been deployed to develop the programme. I'm sorry.

CHAIRMAN: So the cost is three people; is that it? That's

what "headcounts" means?

MR TIMOTHY WONG: (In English) Yes, exactly.

CHAIRMAN: Thank you.

Ms Wong.

MS MAGGIE WONG: You earlier stated that your company planned to develop this exceptional report system to generate reports, to spot bus captains' potential hazard behaviour.

When would you expect this to be done?

MR TIMOTHY WONG: (In English) 2018, quarter 3 -- sorry, quarter 4 of 2018.

MS MAGGIE WONG: So later this year?

MR TIMOTHY WONG: (In English) Yes.

CHAIRMAN: That will be an exceptional over-speed report, 4th quarter 2018?

MR TIMOTHY WONG: (In English) That's correct.

MS MAGGIE WONG: We've heard other bus companies setting the criteria at speeds of over 5 kilometres per hour for every road section with certain speed limit, say over 55 kilometres per hour for ten consecutive seconds, for road sections with speed limit of 50 kilometres per hour. We have heard a bus operator using this criteria.

Can you tell us what criteria your company would be using for these Openmatics generated reports?

MR TIMOTHY WONG: (In English) We have to confirm the

criteria. We will be negotiating with our labour union to come up with a final decision, but we will take the other operator as a consideration as well.

MS MAGGIE WONG: And whether your company would consider this real-time capability to be concerned only with the matter of speed, or would you take into account other faults of the driver, for example sudden braking, excessive acceleration, that sort of thing; would that be picked up?

MR TIMOTHY WONG: (In English) At the moment, we consider speeding as a priority for the exceptional report, but we could also look at hard braking, harsh turn. Yeah, we will need to study further. Thank you.

MS MAGGIE WONG: Would you also consider giving real-time information or monitoring alerts to the particular bus driver when that occurs?

MR TIMOTHY WONG: (In English) Again, we will consider and we will need to speak to our labour union to discuss whether this will affect the driving -- it might affect the attention of the drivers, if there are too many alerts.

MS MAGGIE WONG: Thank you. If we go back to your submissions at page 14.

CHAIRMAN: Just before you do that, this exceptional over-speed report, which is the one that is planned to

be introduced in the 4th quarter of 2018, is that one that is intended to be done real-time, or is this something that will be generated subsequently?

MR TIMOTHY WONG: (In English) Real-time.

CHAIRMAN: And the system, as I understand it to be in place, is an upload every 30 seconds from a bus; do I understand you correctly?

MR TIMOTHY WONG: (In English) Currently, yes, but we are hoping to upload data from the black box per second in the coming future.

CHAIRMAN: Yes, and you indicated that there was a cost attached to doing it every second?

MR TIMOTHY WONG: (In English) Yes.

CHAIRMAN: What is that cost?

MR TIMOTHY WONG: (In English) The network fee, so it requires more gigabytes to upload data every second. At the moment it's being uploaded every 30 seconds because all the data have been zipped and been uploaded to our server, so it requires less gigabytes to do it every 30 seconds rather than every second.

CHAIRMAN: Do you have a ballpark figure for the extra cost?

MR TIMOTHY WONG: (In English) Not right now, sorry.

CHAIRMAN: Nothing at all? No range?

MR TIMOTHY WONG: (In English) Around HK$100 per bus.

CHAIRMAN: Per what?

MR TIMOTHY WONG: (In English) Per black box.
CHAIRMAN: Thank you.
MEMBER LO: Per month?
MR TIMOTHY WONG: (In English) Per month, yes.
MS MAGGIE WONG: Thank you.
CHAIRMAN: I'm sorry, before you move on, have you discussed these issues of cost with the Transport Department?
MR JAMES WONG: I don't think we did, no.
CHAIRMAN: Because we've looked at the list of the devices that the special group, the Transport Department convened I think in March this year where there have been three meetings. One thing that is missing from the six items that have been discussed is the black boxes or Openmatics devices. Am I correct?
MR TIMOTHY WONG: (In English) It's not on the agenda but I suppose all bus operators have installed black box on it.
CHAIRMAN: But it's not on the agenda -- has it been discussed?
MR TIMOTHY WONG: (In English) I think they discussed about the black box indirectly, relating to geo-fencing.
CHAIRMAN: And who set this agenda, if that's what one can call it?
MR TIMOTHY WONG: (In English) The Transport Department.
CHAIRMAN: Thank you.

Yes, Ms Wong.

MS MAGGIE WONG: If we look at your NLB submission at page 14, it's the third paragraph from the top, the last sentence:

"At present, a random selected 50 trips of black box data will be retrieved every month and this random check report will [be sent] to TD for their record."

And this was put in place in March 2018. Can I first of all ask -- it talks about selecting 50 routes at random -- who selects these routes?

MR JAMES WONG: Our company. It's 50 trips.

MS MAGGIE WONG: What is the criteria for selecting these 50 trips?

MR JAMES WONG: It's random. It's at random.

MS MAGGIE WONG: And what, if anything, would be checked by your company in this report? For example, speeding, or any information you can provide us?

MR BILLY WONG: Chairman, in our second submission, in the last page, you will find a table in relation to black box data that we checked.

MS MAGGIE WONG: That's page 487 of NLB-2 bundle.

MR BILLY WONG: Yes, it's the one shown on the screen, this report. As per the request of the TD, we have randomly checked 50 trips of black box data. We will look at the speed, whether there is any hard braking and any

abnormal driving behaviour. In this report, we only report a number we have -- a number of normal behaviour and abnormal behaviour.

In relation to more detail, say location, time, what happened, that is the raw data, they are not required in this report.

Thank you.

CHAIRMAN: How do you define "hard braking"?

MR BILLY WONG: Our information shows that if the G force reaches 0.2, then there is serious hard braking. So that we count as hard braking.

CHAIRMAN: Is that one of the requirements in the 2003 Transport Department requirements in respect of black box, 0.2G?

MR BILLY WONG: Yes, that is correct. The guidelines mention that, say, if there are accidents, then we have to provide data on G force.

CHAIRMAN: Abnormal driving behaviour is monitored in these 50 random trip checks?

MR BILLY WONG: Mr Chairman, the black box will also record the topographical location of the buses, the X/Y axis, et cetera. So we can look at the geographical location and the orientation that the bus is supposed to be in, and then we can compare that against the actual situation. If these two do not match, then that means

the buses are taking the wrong route or taking the wrong timing, then that means the bus drivers or bus captains are, you know, having abnormal behaviour.

CHAIRMAN: When you refer to X/Y axis, do you mean latitude and longitude?

MR BILLY WONG: Yes, correct.

CHAIRMAN: And the orientation, is that the magnetic direction of the bus?

MR BILLY WONG: Yes, correct.

CHAIRMAN: Thank you.

Yes, Ms Wong.

MS MAGGIE WONG: If I may take you to your forward planning programme submitted by your company at TD bundle 1, page 236 to 237. 236 is at the bottom.

We can see that there is a "Plan for automation of monitoring bus captain driving behaviour through data captured in black boxes or similar devices."

It mentioned about retrieval of data that requires special analysis, and if we go to page 237 at the top:

"Analysis results could be put forward for prevention studies to avoid accidents of similar nature."

Has your company carried out any prevention studies or any reports of that nature?

MR JAMES WONG: Can we look at the previous page?

MS MAGGIE WONG: Yes, it is at page 236.

MR JAMES WONG: Thank you, Mr Chairman.

When we drew up the five-year plan, we did have such a plan, but as of today we haven't been able to deliver the plan. At this moment in time, we haven't worked on it. As we said, we have hope that by the end of this year we could strengthen work in that area.

MS MAGGIE WONG: If I could go back to the TD bundle at page 198 -- I have finished the topic on the black box.

CHAIRMAN: Before we move away from the black boxes, may I ask that NLB-1, page 33, be put up on the screen. It's that top box on the right-hand side. You speak there about the existing black box system. You speak about the recording and manipulation of the data. and the "heavy capital investment of data transmission, data storage system and sophisticated software".

Then you say this:

"At the time being ..."

I think it perhaps means this: "At the moment, it is not a mandatory requirement for franchised bus operators to perform real-time bus captain performance monitoring by black box system ..."

I take it that's a reference to the 2003, 15 years old, requirement of the Transport Department.

Am I correct?

MR JAMES WONG: Yes, correct. That was the 2003 standards.
CHAIRMAN: And the position being taken is that this is not a requirement of the Transport Department, so am I right to interpret this as, "And therefore we have a choice as to what we do"?
MR JAMES WONG: Mr Chairman, my colleague has mentioned this. After 2003, while we were required to install black box, so all along we have been using an old model of black box. We couldn't upload certain data to our server, and when we started discussing the new franchise in 2016, we needed to work on ETA, so we replaced the old black box with a new model of the black box.

Now, once the new model of black box was put in place, we realised that we could do more. Of course, you mentioned -- I believe that if I understand you correctly, for NLB, could we do more? The answer is always in the affirmative. We can always do more. We will continue to review and we want to progress.

And honestly, given our scale, we were not in full grasp of the latest developments in the sector, and so please allow us some time for us to keep abreast of the developments and catch up.

Thank you.

CHAIRMAN: It was the requirement that you provide an estimated time of arrival of buses, the ETA system

that you refer to, that led to the enhancement of the black boxes; am I correct?

MR JAMES WONG: Correct.

CHAIRMAN: Could we have back on the screen the 2003 Transport Department guidelines.

So being able to monitor real-time the behaviour of drivers comes as a side-wind from having to do estimated time of arrival of buses for the benefit of passengers; is that right?

I'm coming to the other document in a moment. I'm just establishing what I think is the position, that it is ETA that produces by a side-door the ability to do things real-time?

MR TIMOTHY WONG: (In English) I think the ETA system gave us a doorway to look into more sophisticated black box systems. As I have mentioned earlier, the old one we used, we are not able to retrieve the data to our server; we have to speak to the supplier and get all the reports. So, yes, the ETA system gave us a doorway to look into a new system.

CHAIRMAN: Because if one looks at this document, the 2003 guidelines, the Transport Department spell out in the very first sentence what is the purpose of this equipment, and it is this, is it not:

"The purpose of the electronic data recording device

is to provide tools for the bus company to monitor and manage the on-road speed- and safety-related behaviour of its buses, and indirectly to encourage better driving behaviour."

That was the initial purpose. Do you still regard this as the purpose of this equipment?

MR TIMOTHY WONG: (In English) Yes.

CHAIRMAN: Thank you.

Ms Wong.

MS MAGGIE WONG: If I may move on to the Transport Department's suggestion of installing speed display unit in passenger compartment.

If I may take you to the TD bundle 1, page 102 to 103, paragraphs 21 to 22.

21 states:

"It is a device which can be installed in the passenger compartments. It captures the real-time signal from the vehicle speed sensor and provides a visual display of the current speed to the passengers on board ... The existing SDU installed on a public light bus which may resemble the installation of the proposed device on a [franchised bus] ..."

If we go to paragraph 22, the last five lines:

"In addition, the FB operators are concerned that SDU would create conflicts and arguments between the bus

captain and passengers, and impose additional pressure on the bus captains which in turn would affect the safety for bus driving. The FB operators consider that the SDU is not conducive in enhancing bus safety."

Do you accept the summary made by the Transport Department at paragraph 22 as to your company's position?

MR JAMES WONG: Yes, thank you, Mr Chairman.

Regarding the speed display unit, I would like to supplement. Of course it would be up to the committee to verify the truth of what I am going to say. We understand that for public light buses which have installed this speed display unit, these SDUs were installed in 2005 and then in 2010 or even afterwards, it was decided that the speed limiter and the black boxes were installed afterwards. When they installed the SDU, the main reason was that for public light buses, their operation is very different from the buses. They are mainly operated by small and medium sized operators. But for franchised buses, there are mainly three operators. And the bus captains of public light buses may not have an employment relationship with the operators. Maybe it's just the owners of the PLBs will handle the management of some managers who in turn lease the public light buses to the drivers. So there is

no one to monitor the drivers' attitude and the driving habits. Well, in extreme cases, that is like that.

And in 2005, the SDUs were installed and the passengers on board, before the SDUs were installed, felt they were in danger because of speeding and they lodged a number of complaints and there were a series of accidents and ultimately the administration believed that speed limiters should also be installed on the public light buses.

Our view is that if SDU is installed in bus compartments, it means that the passenger will know about the speed every second. So let's take a step backwards. If the passengers know that there is speeding, do they have a brake to press on that they can retard the vehicles? Then what would happen is that the passengers will talk to the bus captain and ask him to "Drive more slowly because you are speeding". We all have to be mindful about the passenger's attitude. They may be angry passengers and they may display very good behaviour. We don't know.

Should we be posing a notice on the bus compartment, asking the passengers to call a certain number if they find there is speeding? Maybe some passengers will do that. But there is a high possibility, however, that the passengers will confront the bus captains.

Given today's technology, if there is a technical means to make sure there is no speeding of the buses, then we would prefer to do that, instead of asking the passengers to confront the bus captains and have conflicts with them. This is the last thing that we would like to see.

Thank you, Mr Chairman.

MS MAGGIE WONG: The last matter in the safety device at page 98 of TD-1 is the driver monitoring device.

CHAIRMAN: Before you move on to that, perhaps just dealing with what you've just had to say -- of course it's an offence, is it not, under the regulations to the ordinance, to talk to the bus driver whilst he's driving; it's an offence, criminal offence?

MR JAMES WONG: He must not disturb the bus captain.

CHAIRMAN: Or the word might have been "distract" but yes, that's the spirit of the regulation.

At the moment, you respond to complaints that you have received from passengers, and that's when you might do, as I understand it, a search of the black box, to see if the complaint is made out?

MR JAMES WONG: It depends on the nature of the complaint, whether it is about the speed or the driving performance. If the complainant is not complaining about such matters, even if we turn to the black box, it

won't help us.

Thank you.

CHAIRMAN: Let's assume it is a complaint about speed. "This bus driver was going too fast." Would you accept that if there is a speed display unit, one thing a passenger could do was simply take a photograph of the speed display unit, so there would then be empirical evidence to substantiate the complaint?

MR JAMES WONG: Mr Chairman, as to the scenario that you refer to, so there is a speed display unit indicating the speed of the vehicle, the passenger takes a photograph. If it can clearly show the location, the section of the road, then perhaps it can achieve the effect that you mentioned, so using that photograph as a piece of evidence. But if it only shows the speed of the vehicle, it will still be difficult to tell with certainty as to when and where the photograph has been taken.

CHAIRMAN: Let's make it simple. A franchised bus is not permitted to do more than 70 kilometres per hour; is that correct?

MR JAMES WONG: (In English) Yes.

CHAIRMAN: So if the speed display unit showed 80 kilometres per hour and the passenger took a photograph, that would be objective empirical evidence of the behaviour of the

bus at that time?

MR JAMES WONG: Mr Chairman, you said that a photograph has been taken, it indicates 80 km/h. Initially, I think you need to take a photograph of the registration number, to indicate who the bus captain is, because after all it's an allegation, it's a complaint from the passenger, saying he's on a particular bus. I haven't thought through this or think in this direction, but you outlined a scenario as to whether this can become the evidence for this. I'm just sort of giving you some initial response.

CHAIRMAN: So you mentioned the possibility of putting a number up for the passengers to call, earlier on in your evidence. If this was displayed, an email address could be provided so that the passenger whilst he's on a bus could email the speed of the vehicle to the Transport Department, to your headquarters; do you accept that?

MR JAMES WONG: Yes. Say, for example, in future, if we have to install a speed display unit on board, we would accept the arrangement that we allow the passenger to inform the company directly, so that we can resolve the problem. I'm sure this is much better than the passenger taking it up with the driver, because there may be a confrontation.

CHAIRMAN: Yes. Thank you.

Ms Wong.

MS MAGGIE WONG: Would this not have a deterrent effect on the bus captain in not over-speeding? Because the real source of the problem is not to over-speed, so if you put on a speed display unit, the drivers know, the passengers know, everyone knows. Wouldn't that discourage the bus captains in not driving excessively or over-speeding?

MR JAMES WONG: In reality, I believe of course, as the Chinese say, your fingers are of different lengths. The majority of our bus captains in our company are good drivers. But of course there may be some who are more aloof or they are more impatient.

Ms Wong, just now, you mentioned that perhaps many people see that a driver is speeding; will this create a lot of pressure on him? I won't say that, but of course good colleagues, they will never speed, they will never over-speed. But for others who are more impatient -- just thinking off the cuff -- it all depends on what happens. Say, for example, when we receive an over-speed report, it all depends on whether we are being harsh about the penalty given in relation to the safety bonus, and some colleagues may care a lot about that. But I don't think that just because many

people witness the speeding, so he has the pressure. On the other hand, it depends on how he sees it himself. Say, for example, he's worried that driving points will be deducted or he's worried that there may be an accident. Sometimes, excessive speed may be the result of overconfidence on the part of the driver, or he may be a bit impatient or he thinks that he is in control of the bus.

MS MAGGIE WONG: Moving on to the driver monitoring device. Can I take you to the website of the Ming Pao newspaper. The article talks about the anti-dozing device. Could you just read through briefly the publication on the website. It is dated 27 May this year.

The article, in summary, provided some sort of monitoring device for the benefit of bus driver on the buses which will ply between Hong Kong, Macau and Zhuhai on the new bridge. Are you aware of that?

MR JAMES WONG: Yes. Yes. I have come across this in the news.

MS MAGGIE WONG: Do you have any plan with regard to exploring what this system -- apparently researched and developed in the mainland -- might provide for the company?

MR JAMES WONG: Mr Chairman, at this moment, we will continue to pay attention. We won't say no to anything

that would enhance our overall safety. We will continue to keep an open mind and we will watch the development.

However, if you ask me, my initial understanding of the news report is as follows. If you ask for my priority, of course we want to make good use of our existing resources, because, after all, the service that we provide covers a shorter distance, so perhaps this is not the most urgent item for us at this moment in time, but we will be watching the development.

MS MAGGIE WONG: I'm going to the last topic. It's the financial information of your company.

If you look at NLB bundle 2, page 71, it is a document of fuller disclosure of financial and operational information, and that's for the year 2012/2013.

If we go to page 72, it stated that for the year ended 31 March 2013, the total turnover was approximately 145.5 million, with a profit of approximately HK$9.52 million. Do you see that?

And if we go to page 132, that's for 2014 and 2015, and if we see the income, the revenue, we see there are three sources of income or revenue: the fare revenue, advertising income, and the sundry income.

Can you tell us where the advertising income comes from?

MR TIMOTHY WONG: Mr Chairman, for the advertising income, it is drawn from the bus body. Different from the other two bus companies, we don't have a lot of advertisements at our bus stops. The main source of income for advertising comes from the bus body, the advertisements.

MS MAGGIE WONG: What about the sundry income?

MR JAMES WONG: Thank you, Mr Chairman.

In NLB, say for example, we have an agreement with Ngong Ping 360. If the cable car system has to be suspended suddenly, say for example due to weather or other reasons, then we will provide immediate support.

In addition, at our bus depots, we have got the arrangement to provide annual inspection for the non-franchised buses, and we charge a fee for that.

Thank you.

MS MAGGIE WONG: If we see on this page, at page 132, we see the advertising income was $493,000, and in 2014/2015 it is $438,000.

But if we go to 2016 and 2017, that's at page 182, we see the advertising income dropped significantly; in 2015/2016 to 190,000, and in 2016/2017, to 87,000.

Can you tell us the reasons?

MR TIMOTHY WONG: If you look at the case 2012/2013 to 2013/2014, at the time the advertising income was relatively high because we had the Shenzhen Bay Port

route. On the part of the company, it was rather attractive to the clients in advertisements. For 2015/2016 and up to now, for this kind of advertisements on the bus body, relatively speaking they aren't as attractive to our clients who like to place advertisements.

Take Shenzhen Bay as an example. Many clients have stopped placing advertisements. This is because the production cost to put the advertisements on the bus body are expensive, and then for the media agencies, for this traditional form of advertisements, this is no longer attractive and therefore we see a huge drop. Very soon, we will have the Hong Kong-Zhuhai-Macau Bridge being commissioned. We believe there will be an increase in the advertising income because many clients have become interested in the new port. Therefore the advertising income in relation to our routes, since we are running along hilly routes and they are not so visible, and so for Lantau routes and for South Lantau routes they cannot attract advertising income. For Tung Chung, we can have some local advertisements, say for example related to markets, but they are not going to draw a lot of income.

For Shenzhen Bay Port, currently, since it has already got a long history now -- for others who would

like to place advertisements, they would rather opt for other forms of transport, like the cross-boundary buses.

MS MAGGIE WONG: Thank you.

If I may take you to bundle NLB-2, page 27, that's your franchise agreement clause 34. This clause refers to an annual system report, and may I ask what is the name of the auditing body for you to comply with this clause 34?

MR JAMES WONG: Allow us a bit of time to look up the information for you.

CHAIRMAN: Yes, take your time.

MR JAMES WONG: Yes, Mr Chairman. It is a local accountancy firm called Tony Yau & Company. We can give you the full name after the hearing.

MS MAGGIE WONG: Thank you. Would you be able to provide us with a sample of the latest annual system audit report by this company?

MR JAMES WONG: Of course, yes.

MS MAGGIE WONG: Lastly, if I can take you to the same bundle, NLB-2, page 196. That's your organisational chart. It shows the senior management structure of your company.

Can you tell us whether the company has a dedicated safety department?

MR TIMOTHY WONG: Mr Chairman, as far as bus safety is

concerned, our company is of the idea that it covers all departments. Every month or on a bi-weekly basis, all the management as indicated on this organisation chart, the management staff will come together and talk about it. Every time we talk about bus safety. In a recent meeting we focused on training schools, so you can't see a particular person dedicated to safety.

Bus safety is the duty of the entire team of the entire bus company.

MEMBER AUYEUNG: Can I ask a question on that. If a terrible accident happens, what would happen within your organisation?

MR TIMOTHY WONG: You mean should there be an accident, what our team will do? There is an established system in place to deal with accidents, regardless of the size of the accident. So we have a complete structure to deal with that. I can't tell you off the top of my head, but I can supplement information in relation to our procedures dealing with accidents. I apologise.

MEMBER AUYEUNG: Thank you.

CHAIRMAN: No doubt you can provide that to us in due course.

MR TIMOTHY WONG: (In English) Okay.

(Via interpreter) And I would like to add -- well, what I would like to say is that ISO 39001 has been

mentioned by the committee. The stance of our company is that we strongly support achieving that standard. Back in 2017, when we used on a trial basis double-decker buses on route 3M, we would like to achieve this international standard.

First of all, in our Mui Wo depot, we have done three ISOs. That is ISO 39001 quality system, 14001 environmental system, and ISO 18001, occupational safety and management.

In May 2018, that is last month, we have been authorised to use it starting from the middle of 2017, we have in our depot updated our system for the verification. BSI, that is the company responsible for ISO, told us about ISO 39001.

Our view at that time was we were concerned that if ISO 39001 is to be implemented company-wide, the cost will be high. However, when we talked further with the company, we found that it can be put on a trial basis by route.

So when it comes to B4 and B6, in relation to the Hong Kong-Zhuhai-Macau Bridge, when it is commissioned, we will take the initiative to cooperate with BSI to obtain ISO 39001 for these two routes.

If we achieve success for these two routes, then we will use it on the route that we use a double-decker bus

in order to achieve the ISO 39001 accreditation.

MS MAGGIE WONG: In what way does ISO 39001 standard improve or raise the level of safe driving? Can you be more specific about this?

MR TIMOTHY WONG: (In English) Sorry, I will use English because I have been reading it and understand it in English.

CHAIRMAN: You can use whatever language you like.

MR TIMOTHY WONG: (In English) The scope of the ISO is to develop and implement road traffic policy to improve the company's performance. In order to establish and implement such system, most important is to have the organisation, to have a standard between the organisation. So, in other words, there is no uniform standard from BSI or anyone.

So what the organisation needs to do is to create a uniform standard which could promote and implement road traffic safety system.

We cannot guarantee -- using this system, we cannot guarantee zero accidents, but the new system could help reduce the number of incidents and also improve whenever there -- improve our back-end system and our support whenever there is an accident.

One of the key issues or one of the key elements of ISO is the importance of internal audit. Having the

internal audit could help us improve and sustain our safety management system within the company in the longer run.

So, in the meantime, we have confirmed with BSI that we will go ahead with the ISO examination with our new routes, B4 and B6. The whole process is yet to proceed because the bridge hasn't been opened yet, so hopefully by year-end we could give the committee good news that we will be able to acquire the standard for our new routes.

Thank you.

MS MAGGIE WONG: Mr Chairman, I have finished my questions. Thank you.

Thank you, gentlemen.

CHAIRMAN: One matter, Mr Wong, I would like to come back to you on, and that was the information you gave us about the use of special shifts. They are the 14-hour shifts. You told us that they were used on eight routes, that is eight of the 113 routes that you have.

MR JAMES WONG: (In English) That's for those trips at South Lantau, eight out of 113 South Lantau routes. We will provide the total numbers, because we still have some other routes at Tung Chung and Shenzhen Bay.

CHAIRMAN: So there are more than eight special shifts?

MR JAMES WONG: (In English) The total number should be more

than that, the total number.

CHAIRMAN: Let me just confirm this. You have altogether 113 routes; is that right?

MR JAMES WONG: (In English) No, should be more than that.

CHAIRMAN: More than that?

MR JAMES WONG: (In English) Yes, More than that.

CHAIRMAN: Then perhaps you can come back to us. What I'm interested in is being told what proportion of your routes are special shifts, and perhaps you can answer this now, if not, say so, but with a special shift, where the bus captain has a three-hour rest break, can you tell us where on these special shifts he would get out of his bus and he would come back three hours later? Because relevant to that is what are the rest facilities that you provide at that place.

So are you in a position to answer that now or would you prefer to come back with a written explanation?

MR JAMES WONG: Well, it involves a lot of information. Perhaps we will collate the information before we send it to the committee.

CHAIRMAN: Yes. Please provide that information. And if there are no facilities or limited facilities for rest, no doubt you can explain if this is one of the places where you have applied for facilities but haven't been granted permission, so that we can understand the

situation in context.

Prof Lo.

MEMBER LO: I just have one question on the income statement. You have a fairly sizeable rental for non-franchised buses, so in the income statement, which part is for that non-franchised buses? Is it in the category of "Other expenses"?

MR JAMES WONG: Yes, under "Other expenses".

MEMBER LO: About what proportion? What is the amount paid for these non-franchised buses?

MR JAMES WONG: Sorry, Professor, we don't have the information at this moment. Do you mind if we supply it to you afterwards?

CHAIRMAN: Please do.

Would this information appear in your interim results for the six months ended 30 September 2017?

MR JAMES WONG: Chairman, do you mean the interim report of the listed company? Because NLB doesn't have an interim report.

CHAIRMAN: Perhaps that's what I do mean. Do we find it in something that's published?

MR JAMES WONG: For NLB, there will be the fuller disclosure -- it's once a year -- we set out all the details.

CHAIRMAN: Perhaps you can provide it to us subsequently

with the answer to Prof Lo's question, the cost of the non-franchised buses. Thank you.

MR JAMES WONG: Yes.

CHAIRMAN: That concludes the questions that we have, and obviously it concludes the questions that counsel assisting the committee have.

I understand that you wish to make and we are happy to receive a concluding statement. So over to you, Mr Wong.

Closing statement by MR JAMES WONG

MR JAMES WONG: Thank you. Thank you, Chairman.

When it comes to the provision of safe bus service, we think it is our responsibility. Our level of service is always regulated by the government under the bus franchise. There are changes in society as well as the travel pattern of the public. We have to keep pace with these changes. We have to keep improving and enhancing our service to achieve expectations.

The key management personnel of our company are also shareholders of our company. Therefore, we don't just focus on short-term performance or profit. We also focus on long-term development and sustainability of our company. To carry on the tradition of the company, we have been maintaining long-term and good relationships with our bus captains, and we think that that is of

particular importance to quality service and safety of our bus service.

The scale of our company is significantly different than that of our companies. As I have explained already, our fleet is only one 13th or one 33rd of other bus companies. When it comes to development of new systems or software, or the implementation of such, the cost incurred and the difficulties we encounter will be much higher and more than other companies.

Given the current bus franchise system, it is difficult for us to develop our fleet. Using Lantau Island as an example, our catchment is just the Lantau residents. There are two other franchises for Chek Lap Kok and Tung Chung, going outside to the urban area. We are different from other franchised bus operators who have different routes operating in different areas and the number is increasing.

So, from the perspective of operational efficiency, it's not easy for the market to accommodate a small-scale franchised bus company. However, having regard to the overall interest of the community, I do believe that the existence of our company can enhance the competitiveness of the industry and provide more options for Hong Kong residents.

Notwithstanding the aforementioned constraints, we

are willing to invest in the company and support government policies to enhance our capability to better serve the public in the future.

Lastly, on behalf of New Lantao Bus Company (1973) Ltd, I would like to thank the chairman and the two members for their invitation to our company to come here to explain to you our situation. I thank Ms Wong's questions, the secretariat and relevant parties, for their arrangements.

I would like to also thank my colleagues, especially frontline colleagues, for their contribution to the bus industry.

Thank you.

CHAIRMAN: Mr Wong, it remains for us to thank you and your colleagues for attending this hearing to assist the committee in its deliberations, and we look forward to receiving what I think is quite a bundle of material that is promised to us. It would assist if we could receive that sooner rather than later, whilst the details of this hearing are actively in our minds.

Thank you for your help. These proceedings then are concluded.

(6.06 pm)

(The hearing adjourned to a date to be fixed)

2018 年 6 月 19 日

上午 10 時正恢復聆訊

出席人士 ： 黃焯安先生，董事總經理（新大嶼山巴士（一九七三）有限公司）

黃焯添先生，董事（新大嶼山巴士（一九七三）有限公司）

陳天龍先生，副總經理（新大嶼山巴士（一九七三）有限公司）

楊家寶先生，維修部總監（新大嶼山巴士（一九七三）有限公司）

李春暉先生，培訓經理（新大嶼山巴士（一九七三）有限公司）

黃亮霆先生，助理經理-營運支援（新大嶼山巴士（一九七三）有限公司）

主席：（經傳譯員）各位，早晨。我哋感謝黃焯安先生同埋新大嶼山巴士公司其他嘅代表今日出席，協助我哋委員會，因為佢哋除咗書面嘅陳述書之外，佢哋今日上嚟就係會回應律師同埋委員會嘅問題，嚟到協助我哋嘅工作。喺未開始提問之前，我知道黃先生你係想作一個簡單嘅開場白嘅，我而家係邀請你係發言嘅。

黃焯安先生：主席、各委員、律師、女士們、先生們，早晨。我係黃焯安，係新大嶼山巴士有限公司嘅董事總經理。今日好多謝委員會給予我哋機會嚟到今日嘅聽證會提供陳述資料。我哋對專營巴士服務獨立檢討委員會審視巴士專營權制度持開放嘅態度，我哋一向都按香港相關嘅法例、專營權條款、運輸署嘅指引去營運我哋嘅服務。近月，我哋喺日常運作以及行政上做咗一啲同埋將會做一啲措施去加強營運巴士嘅安全水平嘅，措施係如下嘅：提升車長訓練時數及導師與車長學員嘅比例；要求兼職車長申報更詳細、正式嘅資料；成立車長訓練學校以協助合資格人士考取巴士駕駛執照；以及引用國際標準提高行車安全水平。

就上述嘅措施，非常之抱歉，我哋未能及時準備書面嘅資料畀委員會，我哋樂意喺今日嘅聽證會度詳細講解，如果有需要，我哋可以喺今日嘅聽證書之後去遞交詳細嘅資料嘅。唔該，主席。

主席：（經傳譯員）唔該晒，黃先生。剛才聽到你嘅開場白，我知道大律師就會就新嘅措施就係向你提問嘅，而家我想係將時間交畀黃佩琪大律師，佢會提問嘅。

黃女士：（經傳譯員）係，唔該晒，主席。黃先生，早晨，各位代表，早晨。亦都感謝你哋今早係出席委員會嘅聆訊。感謝你作咗開場合，裏面係有一啲問題我係想同你探討一下㗎，呢個都係源於你哋係已經較早之前向委員會提交咗嘅陳述書嘅。

首先，喺你嘅陳述書裏面講到係兼職車長嘅數字，或者大家可以睇番係你哋嘅陳述書一嘅第 17 頁嘅。大家可以睇番嗰個圖表喇，講番嗰個兼職巴士車長，即係你哋所聘用嘅兼職巴士車長嘅數字喇，喺過去嗰六年，差唔多係三倍於之前㗎，咁呢個就係講 2012 年嘅時候就係一百三十七位車長裏面係佔咗百分之九點四嘅。咁去到 2017 年，當時--你見到喇，就係有一百八十三位嘅車長喇，咁裏面有五十三位係兼職嘅，就佔咗百分之廿九嘅，呢個係你哋嘅公司係聘用嘅情況。我哋亦都可以見到喺嗰幾年裏面，如果你睇番就係聘用兼職巴士車長係一直係上升嘅，由 2012 年至到 2018 年嘅情況都係咁樣樣㗎。所以首先問你呢個問題喇，點解係會嗰個升幅咁大？

黃焯安先生：唔該。咁首先關於--我想先係講一點，就係喺我哋公司嘅角度，不論佢係正職或者兼職嘅同事，我哋對佢駕駛嘅要求，包括安全等等，係冇分別嘅。就唔會存在喺一啲諗法話兼職嘅同事駕駛會唔會危險啲，我哋相信係唔會有咁崌情況嘅，呢個第一點。咁啱啱律師嘅提問就話，咁點解喺 12 年到到 2017 年其實呢個兼職嘅車長係會即係持續嘅上升，我哋嘅睇法就--本身我哋係全職同兼職嘅車長，其實佢最大分別就係佢哋兼職嘅車長可以係返工嘅日數少啲，返工嘅日數少啲，咁變咗佢哋可以喺工作上同埋佢哋自己嘅假期嗰個彈性，即係佢哋自己有個彈性去自己安排。

咁而本身我哋同其他另外兩間公司有個好大嘅分別係正職嘅同事同兼職嘅同事，其實佢哋嘅福利係差好遠嘅，但係喺大嶼山巴士嚟講，即係薪酬以外，其實本身嘅嗰個福利，其實我哋畀唔到話太多福利我哋全職嘅同事，以一個例子嚟比喻，其他嘅巴士公司佢哋全職嘅同事係有嗰個乘車--家屬係有個乘車證，咁但係喺我哋嘅情況，喺今天我哋個八--因為係八達通系統嘅原故，其實我哋亦都冇辦法同另外兩間巴士公司去共用呢個乘車證，變咗我哋嘅員工--全職員工嘅福利，其實佢係只係可以免費乘坐番大嶼山巴士嘅車，而佢唔會可以免費去乘坐其他巴士公司嘅車。

咁喺呢一方面，我相信係同--即係喺另外--即係當然我唔會好詳細知道另外兩間佢哋實際嗰個乘車證畀咗幾多個家屬吖，但係係有個明顯嘅分別嘅，喺全職同埋兼職嘅員工。咁另外就係頭先我提及到，兼職嘅員工佢哋係可以有一個彈性啲嘅工作日數，咁我相信呢個就係點解會都有好多同事係想去做一個兼職，係。

黃女士：（經傳譯員）唔該晒你嘅回答，不過其實我嘅問題就係想知道點解嗰個增幅咁大，你知唔知？即係話兼職車長嘅數目係咁多年嚟係有咁大幅嘅增加。

黃焯安先生：當我哋去招聘嘅時候其實我哋係長工、兼職同一時間招聘嘅，我哋唔會話因為財政嘅原因，定係我哋自己工作個原因，就淨係請兼職，唔請全職，主要都係畀嚟到嘅--即係嗰個人嚟到見工，咁我哋就話畀佢聽全職係咁樣嘅薪金，兼職係咁樣嘅薪金，咁當然我哋係希望佢揀全職喇，咁但係--因為全職其實對公司嚟講，當然嗰個調動會係--喺公司嚟講係舒服啲嘅，因為我可以確定佢一個月個工作日數係幾多，兼職始終都有個不穩定性，咁但係始終最終嘅決定權其實喺嗰個車長度，當佢係決定話「我想做兼職」，咁我哋都冇得話一定

要佢做長工，咁但係當然喇，即係如果律師你話點解我哋會即係請多咗人呢，因為本身我哋即係都係呢幾年嘅線路有增加，咁所以我哋都要一路增加人手。係喇，就--即係你話如果人手多咗就呢個原因囉，咁你話點解會係多咗喺兼職，唔係多咗喺長工，咁我哋個分析係咁樣，即係都係我哋會畀佢揀囉，係喇，就唔係話即係喺我哋去選擇。

黃女士：（經傳譯員）如果我嘅理解係正確嘅話，呢個係由於人手短缺又或者係有其他原因，又或者係嗰個薪酬，係咪因為--你呢度請多咗人，就係因為對巴士車長嗰個需求大咗？

黃焯安先生：你話個原因就好似頭先我喺第--一開頭咁講吖，我就唔覺得係話--即係如果其實短缺嘅話，我哋連兼職都請唔到喇，即係我會--我認為係咁樣喇，咁反而係--頭先咁講，就係佢--即係我哋自己都有諗過嘅，做兼職、做長工，好似個--都有同事反映過，即係嗰個薪酬其實唔係賸太遠，而福利本身亦都喺--即係個別同事喇，如果佢哋係真係喺當區--因為我哋嗰個專營嗰個服務其實就係好集中喺大嶼山嗰個區域嘅，咁如果佢本身唔係居住喺大嶼山，其實變咗--頭先我講嗰個乘車證嗰個問題，佢就唔會覺得話做全職員工好吸引，係喇，因為呢個係--因為佢哋其實係行內會講話一張乘車證係等同可能係 1,000 蚊咁樣嘅，如果佢哋每日都去搭車等等咁樣，咁但係正正我哋就係--即係全職嚟講就係同另外啲公司比較係少咗呢樣嘢喇。係，咁至於你話咩嘢原因，我相信就我哋自己去--當然唔能夠好確實知道每一個人嘅諗法係點樣吖，因為都係畀佢揀嘅，咁但係我相信都不外乎係本身全職同兼職嗰個--佢哋可能覺得個工資比較又唔係話真係賸咁遠，即係等等呢啲原因喇。

黃女士：（經傳譯員）想問下喇，你哋公司會唔會係經常定時咁樣樣去招聘一啲已經退休嘅全職司機去喺你哋嗰度做番兼職司機、兼職車長嘅呢？

黃焯安先生：律師，請問你個問題係咪話我哋自己請番我哋公司退休嘅同事？

黃女士：（經傳譯員）係。

黃焯安先生：呢個情況係有嘅，當我哋嘅同事佢退仔，而係佢係嗰個健康情況係繼續適合去做呢個車長嘅工作，我哋係都會去 offer 佢，都會邀請佢留低繼續提供服務。

黃女士：（經傳譯員）大概係佔百分幾？

主席：（經傳譯員）你哋嘅退休年齡係幾多歲，如果係全職嘅話，幾多歲退休？

黃焯安先生：65。

主席：（經傳譯員）唔該晒。

黃焯安先生：呢個可唔可以後補畀委員會？因為呢一刻我哋唔係好掌握到究竟我哋有幾多退休嘅同事轉咗做兼職，但係我哋初步睇就嗰個唔係--應該唔係太多嘅，

Transcript by Epiq Hong Kong, Limited

暫時嚟睇。

黃女士：（經傳譯員）好，喺你嘅開場白嗰度，你有講過喺近月你哋公司係落實咗，亦都將會落實係一啲措施，呢個係指喺呢個日常運作同埋行政上面係有一啲措施，係希望能夠係加強嗰個營運巴士嘅安全水平嘅，呢個就包括係要求兼職車長係申報更加詳細嘅正職嘅資料嘅。你亦都係有講過，就話係樂意喺今日嘅聽證會係向主席同埋委員講解資料嘅，首先，可唔可以講一講有啲咩嘢嘅新措施？

黃焯安先生：我交畀陳天龍先生去回答，唔該。

主席：（經傳譯員）係，請你講，陳生。

陳天龍先生：主席，係，其實最主要我哋而家係會加強咗就係要求我哋兼職車長佢哋申報番佢哋個正職係乜嘢，同埋佢哋個工作時數有幾多，咁嚟到保障番我哋符合運輸署所訂出嚟嘅指引嘅。

黃女士：（經傳譯員）係幾時開始你哋係落實咗呢項措施？

陳天龍先生：呢個措施係我哋最近喺6月份開始嘅。

黃女士：（經傳譯員）我咁嘅理解啱唔啱，喺6月之前冇咁嘅要求，冇要求兼職車長去申報佢哋正職嘅資料？

陳天龍先生：其實我哋喺嗰位車長佢入職嘅時候有要求佢申報佢嘅在職嘅情況嘅，但係而家個分別係我哋係會喺一段時間之內就會要番佢重新再申報番佢，update番佢嘅資料。

黃女士：（經傳譯員）我想問下喇，嗰個僱員，即係指呢個兼職巴士車長喇，需唔需要係填寫一個表格㗎？

陳天龍先生：嗰位兼職車長佢喺入職嘅時候係需要填報佢嘅資料嘅，就好似而家喺畫面上面見到嗰張form咁樣。

黃女士：（經傳譯員）我哋稍後就會講下呢個表嘅，6月之後有冇一份新嘅表要求兼職車長去申報佢哋嘅工作時間？即係話未入職之前有冇係另外一張表係叫佢哋申報咗佢哋嘅工作時間？

陳天龍先生：係有嘅，我哋已經整咗一張新嘅表去畀呢啲車長去申報番佢哋嘅在職嘅情況。

黃女士：（經傳譯員）可唔可以畀個樣本畀我哋睇下，如果方便嘅話？

陳天龍先生：我哋可以喺稍後交番畀委員會嘅。

黃女士：（經傳譯員）唔該。

主席：（經傳譯員）好，請你提供呢個表畀我哋喇。咁同埋較早時候你亦都講過話會提供資料嘅，呢個就係黃焯安先生佢就話會話畀我哋聽係有幾多已經退休嘅全職車長係而家成為你哋嘅兼職車長，咁換句話講，呢個名單上面就有兩個項目要畀補充資料我哋喇。

黃女士：（經傳譯員）黃先生，較早時候你提及現時現行嘅係申請表嘅，咁我哋就係睇番一個係你哋嘅補充資料或者附件嘅第 468 頁，或者我哋睇番嗰份表喇，個表本身就並冇要求兼職車長係提供啲資料，即係話究竟佢哋目前係唔係做緊兼職，又或者工作性質係乜嘢，又或者有點樣嘅工作時間嘅。而頭先你作證嘅時候你就話呢個表格係有要求佢哋係申報呢一類型嘅資料㗎，喺邊度搵到？

黃焯安先生：係，唔該，律師，咁我想補充番，喺我哋呢一張入職填嗰張係有要求個入職者佢去填番佢喺邊度或者曾經工作喇，咁喺呢一張上面的而且確係冇話要求佢寫今--即係每一日，因為佢其實個工作唔一定係駕駛㗎嘛，佢有機會係做緊文職嘅工作嘅，咁就冇話要求佢寫番嗰個每日嗰個工作時數，喺遠--即係舊嗰張，咁喺新嗰張，頭先陳生提嗰個就係我哋開--即係有加番呢樣嘢上去。

黃女士：（經傳譯員）即係唔係淨係一個表格，係一個新嘅僱員嘅合約嚟㗎，以我所理解，定係兩樣唔同嘅嘢嚟嘅呢？

黃焯安先生：我哋嘅--唔係一個合約嚟嘅，即係係另外係在職嘅兼職同事都要佢去申報，即係有個申報表，係喇。

黃女士：（經傳譯員）咁你有冇喺 6 月之後改過你哋嘅僱傭合約？

黃焯安先生：冇，呢份冇。

黃女士：（經傳譯員）請你睇番有關於申報嗰一段，即係而家嗰個嘅表格，係呢一個 472 頁，喺呢一段聲明裏面，現有嘅表格裏面冇特別要求兼職車長申報有冇足夠嘅休息時間先至開始替你哋工作㗎，可唔可以確認一下？

黃焯安先生：係，冇嘅，確定。

黃女士：（經傳譯員）剛剛你話係有一啲嘅時間你會要求兼職車長去申報呢啲資料嘅，喺呢個新嘅措施底下，你哋隔幾耐要求兼職車長申報正職嘅資料同埋有關嘅工作時數？

黃焯安先生：我哋喺現階段，現階段個計劃就係要個同事先係喺 6 月份開始要--因為兼職佢都唔係日日喺度嘅，咁先要佢第一階段就係填番晒，報番返嚟，呢個係第一喇。第二就係啱啱你問到，例如要佢幾頻密去做，我哋暫時個諗法就係一年，暫時嘅諗法，即係可能要佢例如一年後都要將我哋嘅紀錄更新番，咁但係當然，我哋呢一刻--因為呢個都係個新嘅措施嚟嘅，咁我哋就諗住喺三個月後就再作檢討，睇一睇嗰個時間同埋呢個措施適唔適合同埋足唔足夠。

黃女士：（經傳譯員）喺個新表格裏面你有冇任何嘅要求僱員有責任係如果佢正職係

有改變嘅時候或者轉咗工，要話番畀你聽，即係要喺呢一個嘅聲明裏面講番畀你聽？

黃焯安先生：有嘅，喺上面係有寫，上面。

黃女士：（經傳譯員）我想返番轉頭之前，...

主席：（經傳譯員）你咁做之前，我想理解一下，呢個過程其實你係要求兼職車長申報正職同埋工作時數，已經開咗咗要求某啲嘅兼職車長去咁做㗎喇，係嘛？

黃焯安先生：係，開始咗。

主席：（經傳譯員）有冇任何嘅兼職車長申報的確係有其他嘅工作，亦都畀咗工作時數你哋？

黃焯安先生：有嘅，主席。

主席：（經傳譯員）咁有冇任何呢啲嘅車長話畀你哋聽佢哋嘅其他職業係有駕駛嘅呢？

黃焯安先生：有。

主席：（經傳譯員）咁你可唔可以譬如講番其中一位嘅車長係乜嘢嘅職業同埋啲咩嘢類型嘅駕駛？即係喺佢呢個嘅另外一份工裏面。

黃焯安先生：主席，我哋初步嘅資料--即係呢個都希望畀啲時間我哋詳細整理畀委員會喇，咁我哋初步就有--例如喇，係有--我哋兼職嘅同事佢係根據佢寫，佢例如係做一個酒店嘅車長嘅，例如。咁佢--根據佢去報畀公司，佢每周平均嘅工作係五天，咁每個工作日平均嘅駕駛時間就係八小時，例如呢啲咁樣，係。

主席：（經傳譯員）可唔可以畀多啲資料，你哋兼職車長裏面有幾位即係你有問--你係問過呢類型嘅問題，係幾多位兼職車長，目前嚟講？

黃焯安先生：當而家已經回覆嘅就有三十幾位，接近我哋兼職嘅八成嘅喇，係喇，即係三十幾位喇。

主席：（經傳譯員）唔該晒，係，黃律師。

黃女士：（經傳譯員）唔該晒，黃生。想請你睇一睇 NLB 第一號文件喇，31 頁，第三個文件冊，右手邊。你提供嘅資料就話你要求申請人將過去同現有嘅職業資料係喺申請表裏面填寫㗎，咁喺呢一個就聘用嘅過程裏面，我哋會解釋畀佢哋聽，無論係全職定兼職都好喇，嗰個工作嘅安排係受呢個指引去規管㗎，咁亦都就係要確保要係同外間嘅工作係要分得好清楚，同埋係要有足夠嘅休息時間，咁除咗口頭上將呢啲資料講畀兼職車長聽之外，即係話要佢哋係確保有足夠嘅時間同埋係同外面嘅工作有適當嘅分隔之外，仲有冇其他嘅要求或者係要求兼職車長去提供資料，即係話係喺你公司返工之前就係--即係嗰個嘅工作時

數等等。

黃焯安先生：好，唔該，咁喺我哋遞交呢個資料嘅時候，嗰陣時係未有嘅，只係係口頭上嘅啫，咁就係頭先我哋正正頭先提及到嗰啲就係一個新嘅措施，咁就要求佢哋去申報番，唔該。

黃女士：（經傳譯員）即係 2018 年 6 月之前喇，你係冇辦法去確保呢啲兼職車長係咪工作超過咗指引上面嘅工作時間，即係除咗係口頭同你講之外？

黃焯安先生：係，之前--6 月前我哋都係--即係或者到有一部分喇今天，係喇，都係要靠主要係同佢面對面去溝通喇，咁去了解佢嗰個即係作息、工作，即係正職工作嗰個時間。

黃女士：（經傳譯員）我想叫你睇番就係其他巴士公司嘅資料，就係呢一個嘅城巴嘅文件夾嚟㗎，第二號文件夾嘅第 400 頁、401 頁，呢個就係嗰份文件嘅第 2 頁嚟㗎，係一啲嘅重要資料，第 3 項就話「你現時有否兼職工作，如有，工作類型及時間」，呢個係城巴嘅申請表，我哋睇到係要求僱員係喺呢一個合約上面表明有冇其他嘅兼職工作，你會唔會考慮採納呢個申請表呢一項嘅資料去更新你自己嗰個嘅入職申請表？

黃焯安先生：啱啱睇到嗰個文件，咁即係當然我要再詳--返去同同事再詳細啲睇，咁初步咁睇，我覺得都係好值得去參考嘅，會考慮，即係我哋返去都會係考慮將呢啲措施加強。

黃女士：（經傳譯員）我哋繼續，404 頁，係中英對照嘅，404 頁，404-1 同 404-2，我哋就見到係一啲嘅要求，可能同你哋嘅新表格差唔多，係僱員嘅守則，就係關於外間工作㗎，裏面有一啲詳細嘅資料，唔單只係有嗰個公司、薪酬、工作時間喺底下喇，仲有一個特定嘅聲明添㗎，呢個聲明就要求僱員係要確保遵行呢個資料嘅披露㗎，你會唔會考慮採納呢個嘅措施喺你哋新嘅表格裏面？

黃焯安先生：我哋自己如果而家初步去睇呢張 form，因為都要再詳細啲睇喇，咁我哋都--好嘅建議我哋都一定會去接納吖，因為--係，即係都未能夠好詳細睇，係喇，呢個都要返去再詳細啲睇一睇先。

黃女士：（經傳譯員）未講另外一個事項之前，我就想講一講關於係一個違例駕駛記分嘅披露㗎，喺你資料裏面，你就話要求所有嘅車長，無論係兼職、全職都好，係硬性規定要將自己違例駕駛記分嘅紀錄係講畀公司聽，如果有改變亦都要講，同時，公司係會隨機去抽樣檢查㗎，即係確保呢啲資料係正確。我第一個問題就係你會唔會係喺僱用佢哋之前先查下佢哋嗰個有關嘅駕駛罪行或者記分紀錄？

黃焯安先生：我交畀陳天龍先生去作答。

陳天龍先生：主席，我哋喺我哋請人嘅時候，如果申請咗入職之前，我哋係會要求個車長去攞一份所謂叫做「查底紙」嘅，咁上面係會睇到佢曾經被扣分嘅紀錄喺

度嘅。

黃女士：（經傳譯員）唔該。想請你睇下有關運輸署文件夾一號，呢個就係運輸署嘅文件嚟㗎，第 135 頁第 4 段，喺第一行就話喇，所有嘅專營巴士經營者就係除咗大嶼山，就要求佢哋嘅車長申請人係會 check 下佢哋嗰個嘅記分紀錄㗎，咁你哋--即係除咗你哋公司之外，其他嘅巴士公司都會係會查一查佢哋個紀錄㗎，對於呢一個資料呢一句，你有冇任何嘅意見想表達？

主席：（經傳譯員）你頭先所講喇，呢句說話係不正確㗎，係唔準確㗎，係咪咁嘅意思？

黃焯安先生：我相信因為本身我哋其實呢一個--頭先啱啱陳生講話查牌嗰個措施，我哋係今年 2018 年初嘅時候開始嘅，咁我哋呢個都要返去睇清楚係幾時係即係正式係推行呢樣嘢喇，係喇，應該就 2018 年初嘅。咁可能就係喺呢度--即係話因為本身我哋交呢個資料上委員會嘅時候，咁我哋就唔會同運輸署溝通，即係大家填啲乜㗎嘛，係喇，呢個都大家獨立㗎喇，咁可能喺佢個紀錄度就未有我哋呢方面嘅更新咗喇，咁或者我哋自己更新咗，亦都--因為我哋自己個定位呢啲都係公司內容嘅一啲措施，咁我哋亦都可能冇去--即係當開會嘅時候又冇同運輸署提番呢樣嘢，咁所以可能大家有咁嘅誤會。

主席：（經傳譯員）你講之前--黃女士。你會唔會提供資料係幾時開始做呢個檢查㗎？

黃焯安先生：Yes, sure。

主席：（經傳譯員）黃律師，可以，請你繼續吖。

黃女士：（經傳譯員）除咗提供呢個資料，你可唔可以講下有關於呢一個係查下佢哋嘅違例駕駛記分，喺 2018 年 6 月之前，你哋嘅措施係咩嘢嚟㗎，知唔知？

主席：（經傳譯員）黃先生同我哋講就係話 2018 年初開始嘅，而並非 6 月開始嘅。

黃女士：（經傳譯員）我哋睇番第 9 段或者係第 4 段吖，呢度講新世界、城巴兩間公司就會話如果嗰啲申請人佢喺過去三年之內就係有九分扣咗嘅時候，佢哋就唔會聘請呢啲申請人嘅，咁而九巴同埋龍運就係話如果呢一個嘅申請人喺過去兩年係扣咗九分嘅時候，佢哋就唔會獲聘用㗎，咁你哋嘅政策又係點樣，喺呢方面？

黃焯安先生：我哋暫時冇呢一方面嗰個好詳細嘅資料，不過我哋呢一刻相信就我哋冇話好似另外兩間公司咁樣，有個明確定咗話例如對上兩年或者對上三年佢係有幾多分扣減咗，我哋就一定唔請囉，咁呢一刻我哋就--我相信我哋冇呢一個 policy 喇，即係...

黃女士：（經傳譯員）咁你會唔會考慮係實施有相關類似嘅政策？

黃焯安先生：呢個會考慮嘅，因為咁我相信就咁--即係就咁好表面去睇落去，其實最

主要我哋諗呢一個車長嘅--佢有冇畀人哋去扣咗分，咁主要都係想--即係呢個因為係正正就係其實佢平時個駕駛態度等等，可以好實際反映出嚟囉，咁呢個我哋都會考慮，咁但係當然你話要我哋喺呢一刻去答你話係兩年吖、三年吖、九分吖、七分吖咁樣，我就即係答唔到喇，不過會係咪--考慮下係咪同佢哋一樣囉，係。

黃女士：（經傳譯員）好，根據你嘅答案，喺 2018 年 6 月之前，你哋間公司係冇去查核兼職車長佢哋個違例駕駛記分紀錄㗎，係唔係？

黃焯安先生：主席，呢個我哋希望畀啲時間我哋返去搜集番啲資料再交番畀委員會，係。

主席：（經傳譯員）好，唔該晒。

黃女士：（經傳譯員）就想去另一個課題，係關於租用非專營巴士嘅，...

羅先生： I have a question.

主席：（經傳譯員）羅教授係想問一個問題。

羅先生：（經傳譯員）我想澄清一點，你係用更多非全職或者兼職嘅車長，呢個係你間公司嘅政策吖，還是因為你係唔能夠係聘用足夠嘅全職，所以你就係用更多嘅兼職㗎，係邊一方面呢？

黃焯安先生：你話係咪我哋公司嘅策略去請兼職，呢個就一定唔係，咁至於你話--即係頭先律師都有問到，點解會嗰個兼職個比例咁高，因為其實以往--即係亦都去講番喇，喺今次委員會之前，其實我都--我自己本人喇，亦都唔會知道其實其他巴士公司嗰個兼職人數，我都係睇到先知原來我哋嗰個兼職比例係比起其他公司係高咁多嘅，咁呢個我哋都會即係再去--即係我哋自己內部都會去--即係一路都有--呢一刻，就去諗番其實嗰個即係實際嘅問題係喺邊度喇，係喇，當然，我哋自己梗係請到想--傾向係想請全職嘅員工多過想請兼職嘅員工，係。

黃女士：（經傳譯員）我想跟進呢一個問題，黃先生，喺你個陳述書第 18 頁之中，第一號文件第 18 頁，第 6 段之下嗰一段同埋喺行車時間之前嗰段，佢呢度就講話--呢個講就係話「我哋好積極係希望能夠增加我哋嘅人手，譬如--例如可以係參加勞工處嘅職業招聘會同埋其他等等嘅相關嘅活動」，咁同埋你就講話「我哋喺呢一個聘用條件改善咗之後，我哋相信呢一啲嘅措施可以係增強我哋嘅人力資源」，你亦都提到有一系列嘅措施，包括係第一至到第六點。除咗呢一啲第一至六嘅措施之外，你有冇考慮過其他改善措施，譬如話薪酬方面或者福利方面等等，就係改善兼職或者全職車場嘅待遇？

黃焯安先生：咁本身喺我哋公司，其實每年都會--基本上每年都會去做一個薪酬嘅調整喇，咁至於你話福利嚟講，我哋喺 2018 年開始其實就畀多咗五日嘅假期我哋啲車長嘅，因為普遍其實行業嚟講，佢哋嗰個假期就叫做勞工假喇，就十二

日，咁我哋就係畀多五日佢哋，就同白領睇齊囉，因為我哋都覺得即係我哋自己嗰個出發點都係希望即係同事係多啲假期，咁有個多啲作息時間，亦都畀個彈性佢哋去選擇係工作定係休息咁樣囉。咁當然，你話人工加幅嗰啲，我哋就每年去睇番個實際情況囉。

黃女士：（經傳譯員）關於呢個另外五個假期就係咪所有嘅全職嘅車長都適用？

黃焯安先生：係，所有全職嘅車長都有。

黃女士：（經傳譯員）我就去另一個課題，係關於係租用非專營巴士，係第一號文件嘅第 17 頁。我哋喺個表格下低我哋睇到，你就話就係如果運輸署係同意嘅時候，咁你就會喺租用--係起碼向承辦商租用三十架非專營巴士，係有埋車長㗎，喺每一個週末都會咁做，咁呢個嘅數量係等如你嘅成個車隊數目大概係百分之二十五。首先我想問一問，就係關於承辦商，你係講緊一個承辦商，還是係多個供應商？

黃焯安先生：一個，one contractor。

黃女士：（經傳譯員）咁係叫做乜嘢名？

黃焯安先生：嗰間公司個名叫做冠忠遊覽車有限公司，Kwoon Chung Motors。

黃女士：（經傳譯員）呢啲係非專營巴士，就係係去應付喺週末嘅時候嗰個乘客量嘅增加同埋假期，就唔係喺平日嘅，係咪？

黃焯安先生：係。

黃女士：（經傳譯員）喺你補充嘅陳述書之中講，喺 2018 年 6 月 15 號提交嘅時候，第 38 頁裏面，係呢個一號文件夾第 38 頁，咁你就係附夾咗運輸署不反對嘅書信，就係 2017 年 12 月 19 號嘅日子，咁呢一封信--我哋睇番第 37 頁，你信件裏面講就係話運輸署嘅同意書其實過去二十年都有同意嘅，咁你就係用唔同嘅方法就去搵番相關嘅資料，咁你就有冇搵過首封嘅准許信？

黃焯安先生：暫時未搵到，都仲係。

黃女士：（經傳譯員）咁你會唔會再繼續？

黃焯安先生：會，我哋會繼續嘗試去搵番呢個文件出嚟嘅。因為--不過--即係當然我哋--因為我自己加入公司就係喺 2011 年嘅時候嘅，咁我照我嘅理解去問番啲做得耐啲嘅同事，係喺--我哋知道就應該係 1990 或者 1991 年嘅時候已經有呢個批准嘅，係，咁嗰陣時亦都係因為主要就係嗰陣時喺大嶼山假日係有個好大嘅需求，但係平日就冇咁嘅需求嘅，嗰陣時係講緊去呢個寶蓮寺，因為嗰陣時轉吊車都未起嘅。咁所以就大嶼山巴士就得到運輸署嘅同意，咁就向--租用一啲非專營巴士，喺假日嘅時候就去幫佢哋高峰囉。

因為我哋嗰個公司其實同另外兩個公司都--不論喺規模上同埋其實我哋嗰個

--即係啲線路嘅結構都好唔同，咁我哋都係其實主要就係倒番轉，假日先至係我哋嘅高峰嚟嘅，反而一至五就其實係相對地嗰個客量就冇咁多嘅。咁變咗我哋嗰個出發點就係如果要我哋公司去為咗星期六或者日嘅高峰而去採購額外，都講緊兩至三成嘅車吖，咁嗰陣時當然係唔止添喇，因為我哋今天先有今日咁嘅數量啫，喺 90 年嘅時候，咁嗰陣時連青馬橋都未起嘅，咁當然我答唔到嗰陣時係嗰個車隊係幾大喇。咁變咗就有呢一個安排囉，就時至今日。

黃女士：（經傳譯員）呢個運輸署嘅信件就係 2017 年 12 月 19 號嘅日期，咁但係你嗰個信件--你就係 2017 年 12 月 4 號嘅時候發出嘅，咁你就話嗰個運輸署就講，就話唔會反對你喺假日同埋週日--星期日嘅時候係租用不超過八十個非專營巴士，就係由 2018 年 1 月 1 號至到 6 月 30 號嘅。咁然後喺五十架就係非專營巴士就係每一個嘅星期六，就由 2018，1 月 1 號等等，呢個就係第 2 段嘅。咁我嘅問題就係邊個決定究竟係租用幾多㗎非專營巴士喺呢啲嘅時期裏面係邊個做決定嘅呢？

黃焯安先生：係，唔該。係我哋公司去決定有幾多部車，即係需要多幾多部車。

黃女士：（經傳譯員）係，如果我冇理解錯誤，你嘅專營巴士嘅數目一共總數係一百三十嘅，係咪正確？

黃焯安先生：係差唔多咁--一百三十嘅，一百三十幾咁樣，係。

黃女士：（經傳譯員）所以嗰個比例係幾高㗎喎，你有冇考慮過就購置更多嘅巴士，喺將來就由你哋自己嚟管理嘅呢？

黃焯安先生：因為本身喺--唔該先。喺本身喺呢個信度，運輸署批准八十、五十呢個數字係 maximum 吖，即係最高，咁實際我哋其實就點解要即係叫做申請多啲呢，因為我哋係以往試過係嗰個非專營嗰邊去同番我哋講，就係嗰個--可能佢哋臨時嘅調動或者攞咗--因為呢個要個禁區證入去大嶼山南，其實呢五十部車係要有個額外嘅禁區證同埋得到署方去准許佢去提供呢個服務，咁所以我哋叫做攞多啲，其實主要係呢個出發點囉。

咁至於你啱啱問，話我哋會唔會考慮採購多啲車喺自己車隊度，咁暫時就未有呢個計劃嘅，因為最主要就係正正頭先我咁講喇，如果就算我哋去買多啲車，其實都係為咗星期六或者星期日，咁一個禮拜七日裏面，其實係淨係得嗰兩日，同埋係就算係星期--唔係每一個星期六、星期日都會係有咁多客嘅，例如係天氣唔係咁好嘅時候吖，因為咁主要我哋其實今日喺星期六、日較為--即係個客量比平日較為多嘅線路，其實就係例如去大澳同埋去昂平呢兩條線。咁當一打風落雨或者天氣唔係咁好嘅時候，其實嗰個客量就會係大大咁減少，咁所以我哋呢一刻係未有呢個計劃去加多啲。咁當然，如果你話如果未來係講緊連我哋星期一至五都會係--長遠嚟講，星期一至五都睇到係有個咁嘅增長或者個需求係有喺度嘅話，咁我哋當然係會考慮去自己採購車。

黃女士：（經傳譯員）邊個去決定呢個六個月嘅時期，就喺第 1 段同埋第 2 段所陳列

嘅，係關於租用非專營巴士？

黃焯安先生：呢個就我相信係運輸署嗰邊喇，就半年，即係你講嗰個問題係半年吖嘛，係喇，就運輸署嗰邊嘅--係喇，即係我哋都係入半年咁樣，係。

黃女士：（經傳譯員）喺下半部分就係運輸署就羅列咗六個條件，(a)至到(f)嘅，我哋可以咁樣就係講一講喇，就係「嗰啲巴士個年齡係六歲以下喇；咁我哋就係--我哋係採用相同嘅維修標準喇，好似呢一個嘅專營巴士一樣」，呢一個係咩嘢意思？就係「我哋租用嘅巴士係同呢一個我哋專營巴士個維修水準一樣」，咁呢個確切嚟講係咩嘢意思？

黃焯安先生：我想請楊先生去幫我作答呢條問題。

楊家寶先生：主席，多謝。所有呢啲非專營巴士，我哋都係會將佢納入為好似我哋專營巴士咁樣嘅處理方式，喺個保養同埋維修方面，咁包括係每一個月有一個我哋叫做"MI monthly inspection"，月檢嘅保養喇。同埋佢會--佢需要通過一個年檢嘅檢查嘅，呢個同專利巴士一樣嘅做法。

黃女士：（經傳譯員）你知唔知道呢啲所有嘅非專營巴士佢哋有冇黑盒？又或者限速器？

楊家寶先生：係有嘅，係有嘅。

黃女士：（經傳譯員）呢個係咪一個合約嘅要求嚟嘅呢？喺你哋係同呢啲--同呢一間非專利巴士承辦商簽嘅合約係咪有一個咁嘅要求？

黃焯安先生：因為我哋今天係會要求我哋呢個營辦商去將呢部非專營巴士係要將佢去配置到等同我哋一部專營巴士，要佢咁樣安排喇，係，即係嗰個原意就係要做到呢樣嘢喇。

黃女士：（經傳譯員）今日之前，即係以前又點？以前有冇咁嘅要求，就要求所有呢啲非專營巴士都要有埋呢個黑盒或者係限速器係安裝好？

主席：（經傳譯員）邊個嘅要求？

黃女士：（經傳譯員）無論係你哋公司嘅要求定--即係話你哋間公司有冇要求呢個非專營巴士公司係裝配呢一個係黑盒同埋限速器，即係講以前有冇咁嘅要求？

黃焯安先生：其實你可以睇番呢度(d)嗰項，咁係喇，其實佢呢架車嘅要求係"similar on-vehicle facilities"喇，係喇，咁但係當然係佢入嚟提--即係幫我哋去提供服務嗰啲車喇，因為本身喺我嘅理解，今天喺運輸署對非專營巴士係冇咁嘅要求，即係同專營巴士係唔同嘅，咁但係就係正正呢一度都已經係提出咗，如果嗰架非專營巴士係去幫我哋去提供服務，佢就係要將呢架車係要裝備到同一架專營巴士一樣咁嘅要求。

主席：（經傳譯員）對唔住，等等。(2)(d)嗰個係咪視為係運輸署嘅要求，呢一句

你嘅解讀係咪就話要求車上有一個黑盒呢，你嘅理解係咪咁㗎？

黃焯安先生：因為我嘅理解喺(d)嗰項當然佢係冇寫到"black box"喺(d)嗰項嗰度，但係我哋自己個理解，即係都係要去要求佢裝呢樣嘢囉，我哋自己嘅理解係咁樣。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）可唔可以係畀個樣本我哋睇下，即係睇下你間公司同冠忠關於使用非專利巴士嘅服務嘅合同嘅樣本，特別係我哋想知道有關嘅安全設備嘅。

黃焯安先生：呢個我哋後補番畀委員會，唔該，係，唔該。

黃女士：（經傳譯員）或者讓我澄清一下喇，以前，以前，我想問下，有冇咁嘅合約嘅要求嘅呢？即係話要求冠忠提供一個非專利巴士畀你哋嘅時候，佢係有埋呢個黑盒同埋限速器嘅，想知道合約裏面有冇咁嘅合約要求呢？

黃焯安先生：呢個我唔--我哋都要返去睇番嗰個文件先，係，係喇，唔該。

黃女士：（經傳譯員）唔該。好，去到第6項嘅要求喇，(f)嗰度，嗰度就係話應該係安排非兼職司機去行呢個東涌道嘅巴士線，之前亦都係要得到恰當同埋足夠嘅訓練嘅，由你哋去訓練嘅。好喇，想問下喇，點解東涌路就係嘅路線就特別係要抽出嚟講嘅？

黃焯安先生：因為喺--頭先我講就係喺嶼南，即係大嶼山南面嘅線路其實佢就係一定係會經東涌道，因為嗰邊啲路其實係主要係靠東涌到嘅啫，即係從東涌入去嶼南，包括去大澳同去昂平，咁我相信佢喺呢度咁樣去列出嚟，係即係主要係呢個--因為我哋唔係話去搵部車嚟去行東涌嗰邊嗰啲線路吖嘛，就係行嶼南嘅線路，大嶼山南面嘅線路，咁我相信係呢一個意思喇，係。

黃女士：（經傳譯員）睇嚟呢度就講出一個必定要遵守嘅要求，即係話必定要搵全職嘅車長去行呢啲東涌道嘅巴士線。我想問下喇，東涌道嘅巴士線有冇咩嘢特別嘅呢，有乜嘢嘅特別呢？同埋呢度亦都有一個好具體嘅要求，就話啲車長係要由你哋公司係畀足夠同埋恰當嘅係培訓啲車長嘅。

黃焯安先生：呢個我哋唔係肯定嗰個條款嘅原因，咁我哋在座我哋自己去初步去諗，就覺得係因為喺東涌道重建之前，其實係一條好窄好窄嘅路，而係同今天嗰條路就好唔同，個路況，咁但係我嗰陣時太細個，我冇印象係點樣。咁但係我哋相信即係其實喺即係呢個條款度，其實主要係--係喇，即係因為嗰陣時東涌道嘅路況喇。咁當然，你話如果係咁，咁而家都重建完喇，咁點解都仲喺上面呢？咁呢個都要再返去我哋自己同啲同事去詳細啲去傾一傾，因為喺我哋嘅理解，其實呢封就係運輸署出畀我哋，就每半年出一次咁樣嘅，咁就可能一啲恒常啲嘅文件，我哋亦都冇好--即係定期去檢討番其實會唔會有啲條款裏面係唔適用呀點樣，係，唔該。

主席：（經傳譯員）或者你未繼續問之前，黃律師，呢個係運輸署嘅信件嚟嘅，運輸署或者可以話畀我哋聽點解嗰個條款係喺嗰度嘅。

黃女士：（經傳譯員）係，好。呢度亦都講咗㗎，一定係得到你哋公司嘅妥善同埋足夠嘅培訓，我想問喇，你哋有冇咩安排嚟到確保呢啲全職嘅車長--係呢一個非專利巴士嘅全職巴士車長係會得到你哋公司嘅足夠嘅培訓先至去揸嗰啲車？

黃焯安先生：主席，我會交畀李先生幫我哋作答。

主席：（經傳譯員）係，李先生，請。

李春暉先生：主席，咁我講番喇，咁其實喺培訓嗰方面，非專利同埋專利嘅車長行呢個東涌道，其實我哋都有特別嘅安排嘅，我哋都同運輸署--都覆番佢喇，呢個嶼南路喇，由於嗰個路面比較窄同埋彎位比較多，我哋會行經呢類嘅同事車長都要接受兩日嘅路線訓練，目的就係要佢熟習喺路面上嗰個嘅操作熟習性、嗰個警覺性。咁喺呢一個路線訓練嘅同時，我哋嘅駕駛導師係會睇一睇車長本身喺呢啲彎位嗰個嘅技巧，咁我哋都會有個評估嘅，咁所以喺非專利車長去幫我哋做呢個嘅責任嗰陣時，我哋都會同佢做一個路線訓練。

黃女士：（經傳譯員）我相信嗰個全職車長係需要五天嘅培訓㗎，係嘛？即係如果佢哋要行呢條線，佢哋就接受五天嘅培訓㗎，係嘛？

李春暉先生：我補充律師先，五天嗰個培訓係 for 新入職嘅車長，而現職車長我哋會因應番佢嗰個嘅需要，譬如頭先我所講，嶼南路我哋會額外提供兩日嘅路線訓練。

黃女士：（經傳譯員）唔該。我想問，有冇咩措施嚟到去睇下呢啲係非專營巴士嘅車長佢哋嗰個資歷同埋佢哋個水準咁呢，或者佢哋個扣分紀錄咁呢？

黃焯安先生：今天我哋去對待呢個非專營巴士同我哋專營巴士嗰啲會係一樣嘅，係喇，即係嗰個措施等等嗰啲都係一樣，即係有，有嘅，係，即係都係一樣嘅。

黃女士：（經傳譯員）即係今日，今時今日？

黃焯安先生：唔。

黃女士：（經傳譯員）咁之前？2018 年之前又有冇咩措施嚟到去查核佢哋嗰個資歷同埋佢哋嗰個駕駛嘅紀錄？即係關乎呢啲非專營巴士嘅車長，定抑或你哋基本--根本就係喺合約上已經係有咁要求，要求冠忠做到呢點？

黃焯安先生：因為今天我哋就冇即係要求我哋個承判商佢係將每一個佢嗰個--即係個車--頭先嗰封信有個車牌喺度喇，即係呢一封後面就有啲車牌喇，咁車我哋就有資料喇，咁但係佢係咪每一個人--因為其實人--就會涉及多啲人嘅，就唔一定係八十個人定五十個人咁樣嘅，咁本身今天我哋就冇特別安排要佢去提交番嗰啲人嗰個資料，即係今天就冇呢個安排。

黃女士：（經傳譯員）較早時候，...

主席：（經傳譯員）我唔明白，你今時今日有冇咁嘅要求，定抑或你將來係會係要求咁樣做？

黃焯安先生：今天未有呢個安排。

主席：（經傳譯員）好，唔該你。係，歐陽委員。

歐陽先生：（經傳譯員）係，唔該晒，主席。我想講番係呢封信，呢個係運輸署嘅函件嚟嘅，如果我嘅理解係啱嘅話，佢呢度就係畀你嘅呢個批准就會係 6 月尾就係到期㗎喇，你哋收到運輸署另一封函件係作出咁嘅類似安排嘅未？

黃焯安先生：未收到。

歐陽先生：（經傳譯員）好，唔該你。

黃女士：（經傳譯員）有冇申請？

黃焯安先生：有申請，申請咗。

黃女士：（經傳譯員）幾時？幾時申請？

黃焯安先生：呢個要返去睇番先，呢個你可以例如--我相信都係喺 5 月底、6 月頭嘅時候，因為例如喺啱啱而家喺螢光幕上面嗰封信，咁我哋都係喺嗰陣時係--例如 12 月尾到期，我哋就係 12 月初嘅時候就寫入去續咁樣囉。

黃女士：（經傳譯員）可唔可以畀個係副本我哋睇？即係畀運輸署封信。

黃焯安先生：可以，係呢...

黃女士：（經傳譯員）你哋有冇係就呢啲安排係同運輸署就係有啲跟進嘅討論？即係除咗寫咗信寄咗畀佢哋之外。

黃焯安先生：我唔係太明你個問題係咩嘢意思。

黃女士：（經傳譯員）同運輸署有冇進行過商討？即係寫咗信申請係續期之後，有冇再同佢哋商量過？又或者有冇開過會去跟進？

黃焯安先生：因為我哋有同運輸署見面呀、開會呀，但係就唔--你話相信係同我哋入嗰封信或者個申請而去開會，我相信就冇嘅。

黃女士：（經傳譯員）好，關於呢項安排喇，我想問喇，你係咪每一路等，等到係運輸署作出批准，然後你先至係同冠忠係簽合同，係請佢哋係提供啲非專利巴士畀你哋㗎？

黃焯安先生：因為我哋同個 contractor 個合約就係長啲嘅，係講緊--我印象中--因為呢一刻冇個實際資料喺手，但係應該係三年期嘅，咁就唔係話我每半年當

我收到運輸署嘅同意喇，咁我先至再同個 contractor 去簽，即係其實係一個簽咗三年嘅合約，如果我哋需要同佢租車就同佢租車，咁樣嘅安排囉，咁但係就本身署方就係--係囉，就有--一路有呢個安排，就要我哋每半年去續呢個申請，係喇，我諗主要就係佢要去睇番啲車係咪符合番頭先講嗰啲要求，包括年份嗰啲。

黃女士：（經傳譯員）你剛才就有提到，你提到就會係要求冠忠就係安裝一個限速器同埋黑盒㗎，即係由而家開始就要求佢安裝呢兩樣嘢喇，你可唔可以講多啲？你有啲咩嘢措施去確保佢哋會裝一個黑盒同埋限速器？

黃焯安先生：因為佢裝呢個儀器，咁佢裝咗上去，我哋就即係要佢通知番我哋佢裝咗咁樣。

黃女士：（經傳譯員）係咪由而家開始？

黃焯安先生：之前都--即係一路嘅做法都係佢裝咗就通知我哋咁樣，係，咁而我哋--因為例如好似黑盒咁樣，我哋係可以即係睇番，即係從一啲系統度都可以睇番究竟嗰啲叫做上傳嘅數據㗎嘛，咁變咗都即係呢方面我哋就--即係你話我哋喺我哋自己有冇去話定期再去核實佢，即係係咪話例如佢每次嚟到，我哋都會睇下佢有冇呢，呢個就一定冇嘅，咁因為我哋都相信佢裝咗上去，嗰啲硬件其實佢唔會拆番落嚟，係喇，咁我哋就係會咁，即係佢第一次裝咗就通知我哋咁樣囉。

黃女士：（經傳譯員）有冇書面嘅紀錄，就係記錄低佢哋係咁樣樣通知你哋？

黃焯安先生：可以，我哋返去補充番畀你，一係呢個，係，因為冇準備得咁充足，唔好意思。

黃女士：（經傳譯員）係，好吖，唔該你。

主席：（經傳譯員）麻煩你都提供呢啲資料。

黃焯安先生：Okay，sure。

黃女士：（經傳譯員）我想問下喇，而家有啲咩嘢措施去監察呢啲非專營巴士嘅車長佢嗰個駕駛嘅資歷同埋佢嗰個駕駛嘅紀錄？

黃焯安先生：係，唔該。Existing，即係頭先都有提到喇，呢一刻我哋就冇要求我哋個承辦商去將呢啲資料提供畀我哋嘅，咁我哋都即係會--頭先例如我哋講，我哋兼職嗰啲同事去攞喇，咁我哋都下一步係即係有呢個計劃去向佢哋索取呢啲資料。

黃女士：（經傳譯員）咁會唔會有類似嘅要求，即係好似要求兼職車長咁，即係簽一個嘅聲明書，即係要求呢一啲嘅非專營巴士車長簽類似嘅聲明，先至可以畀佢哋駕駛呢啲嘅巴士？

黃焯安先生：我諗我哋呢一刻未有個決定究竟係點去即係實施嗰個措施喇，呢刻未有個確定點去做，咁但係就我相信會係啲即係同我哋本身不論請長工或者兼職，都係一啲類似嘅做法喇，咁呢個會--但係呢一刻未有嗰個決定，係。

黃女士：（經傳譯員）即係而家以我嘅理解，你嘅公司今日就唔知道呢啲非專營巴士司機即係喺任何一日用嘅，之前有冇試過係違反一啲嘅交通條例，你亦都唔知道佢哋嘅經驗㗎？

黃焯安先生：因為本身呢一個 Kwoon Chung Motors，其實佢同我哋嘅關係就唔係一個完全獨立，即係完全係一個我哋唔識佢咁樣嘅關係嘅，即係本身 Kwoon Chung Motors 亦都係其實係新大嶼山巴士嘅嗰個控股股東嚟嘅，即係持股，係喇，咁變咗其實我哋亦都係對於佢 Kwoon Chung Motors 下面嘅嗰個員工，佢嗰啲我哋都係即係知道佢本身係--即係當然喺大嶼山巴士，我哋係唔會話好詳細知道每一個同事嘅嗰個--即係我哋本身大嶼山巴士冇存檔吖，但係我哋知道佢本身喺招聘等等都係有去即係採取一定嘅措施去確保嗰個係一個 qualified 嘅車長。咁呢個都可以我哋整理一下啲資料，再補充番嘅。

主席：（經傳譯員）係，唔該晒。

羅先生：（經傳譯員）有三類型嘅巴士喇，全職、兼職同埋駕駛非專營巴士嘅司機，就有唔同嘅待遇㗎，即係對於最後嘅一種。我問題就係話呢啲非專營巴士都有黑盒嘅，呢啲黑盒嘅資料幾時會用到？因為呢啲巴士係由非專營巴士嘅司機駕駛㗎嘛，咁所以係幾時會用到黑盒嘅資料去監察佢哋嘅表現？

黃焯安先生：係，唔該，委員。咁喺今天我哋個系統度係睇到呢啲入嚟幫我哋大嶼山巴士做嘢嘅呢啲非專營巴士嘅黑盒嘅紀錄，我哋係 access 到呢個紀錄嘅。即係今天已經係我哋係接觸到，係。

羅先生：（經傳譯員）咁但係呢啲資料有冇試過用到去監察或者評估佢哋嘅駕駛表現？

黃焯安先生：因為本身講番唔係淨係呢啲非專營巴士喇，我哋自己喺我哋嘅車隊度已經裝咗黑盒，咁本身我哋去檢視呢啲我哋自己--即係先唔好講話 non-franchised 先，我哋都係用一個 random check 嘅方式，每個月咁就去檢查究竟我哋呢啲車有冇一啲--或者啲車長有冇啲駕駛嘅問題嘅，咁喺非專營巴士呢啲，我哋相信都係用一個同樣嘅--即係喺我哋自己嗰邊，去同樣去一個方法，但係呢一刻我要即係返去都要問番啲同事，究竟呢個 random check 呢一個抽查係有冇抽查到嗰八十部車喇，喺星期六、日嘅時候。因為呢一刻我抱歉，未能夠去確定答到你，但係本身我哋整體都係咁樣去抽查。

主席：（經傳譯員）講其他嘢之前我想問，你哋六個人冇一個可以答到呢個咁簡單嘅問題？即係話會唔會去檢查下呢啲非專營巴士上面嘅黑盒。

陳天龍先生：主席，我想補充少少，而家我哋就暫時未係好主動咁去 check 個黑盒

Transcript by Epiq Hong Kong, Limited

裏面嘅資料嘅，但係裏面嘅資料我哋會點樣用？我哋如果收到投訴嘅時候，我哋就一定會抽查裏面黑盒嘅資料去調查個事件嘅。

主席：（經傳譯員）唔好意思，即係你係有投訴先至會採取行為，係嘛？

陳天龍先生：冇錯。

主席：（經傳譯員）即係同埋有意外嘅時候？

陳天龍先生：冇錯。

主席：（經傳譯員）咁會唔會隨機抽樣查呢啲非專營巴士嘅黑盒㗎？

陳天龍先生：我哋亦都有做嘅。

主席：（經傳譯員）唔該。黃律師，喺適合嘅時間我哋想休息二十分鐘。

黃女士：（經傳譯員）或者我想係先講一講關於呢一個安全表現方面先。黃生，除咗呢一個嘅問題之外，仲有冇其他嘅措施去監察非專營巴士佢哋嘅安全表現？即係你哋公司用緊呢啲呢類型嘅巴士司機，譬如係一啲神秘嘅乘客，或者會唔會係將你哋嘅員工係要佢哋搭巴士去監察呢啲巴士司機嘅表現？

陳天龍先生：主席，我哋其實每個月都有做 mystery shoppers 嘅，咁其實呢一方面都係唔分我哋大嶼山嘅車吖，定係入嚟幫手嘅非專營巴士嘅。

黃女士：（經傳譯員）呢個神秘嘅檢查就會係即係三種嘅巴士車長都會用嘅？即係如果你發現一啲唔合標準、低於標準嘅表現，或者超速，又會採取咩嘢嘅紀律行動，即係關於非專營巴士司機呢方面？

陳天龍先生：如果我哋發現有譬如係超速嘅情況，咁我哋會有一啲--我哋會發警告信畀--甚至乎我哋會 suspend 佢哋，唔畀佢入嚟大嶼山嗰度做嘢嘅，如果嚴重起上嚟。

黃女士：（經傳譯員）喺呢個係一個適合嘅時間。黃生同埋你嘅同事，我哋而家會休息二十分鐘，跟住喺呢個 11 點 50 分再繼續。

上午 11 時 28 分聆訊押後

上午 11 時 50 分恢復聆訊

出席人士如前。

主席：（經傳譯員）黃律師。

黃女士：（經傳譯員）多謝主席。

黃焯安先生：Excuse me，Chairman，我有啲資料想補充番，係關於頭先講--excuse me。

主席：（經傳譯員）係，可以，可以補充。

黃焯安先生：關於頭先我哋講話新入職嘅同事去做嗰個查底嗰個紀錄，我想補充番，我哋唔係由 2018 年開始嘅，我哋呢個做法已經係一個好長嘅時間，即係好多年㗎喇。我哋 2018 年做嗰個係因為以往我哋每年可能只係會揀一部分嘅車長出嚟去抽查佢哋嗰個紀錄，喺 2018 年我哋做嘅，年初係講緊我哋全體嘅車長，我哋向佢哋再攞--即係去查多次全體車長，我哋自己個計劃係每年...

主席：Thank you.

黃焯安先生：係喇，都去查，係。

黃女士：（經傳譯員）你講緊就係呢啲關於係違例駕駛記分嘅紀錄，係咪？

黃焯安先生：係。

黃女士：（經傳譯員）另外仲有啲跟進問題，黃生，之前你講過，關於嗰啲安全裝置方面，嗰啲非專營巴士嘅硬件，你話佢哋係有同專營巴士相同嘅裝置，我哋就睇番第 453 頁，就係文件冊嘅第 2 號，呢度就係有講到所有喺新大嶼山巴士公司嘅安全嘅裝置嘅，呢度一共有二十四個裝置嘅，你可唔可以確認又或者基於你嘅理解，呢啲所有嘅非專營巴士都係有裝置所有 453 頁嘅所列出嘅一啲嘅裝置？

黃焯安先生：唔該，抱歉，要少少時間去確定番。因為喺呢廿四個 item 嗰度，有一--例如講雙層巴士嗰個，就--唔好意思，係，確認有嘅。因為頭先我問清楚同事，我哋都有租用雙層巴士嘅，裏面嘅係有。

黃女士：（經傳譯員）唔該晒。亦都有跟進問題，你話你會租用非專營巴士，就有冠忠公司，係咪？你係從呢個冠忠遊覽車公司去租用嘅？

黃焯安先生：Kwoon Chung Motors。

黃女士：Kwoon Chung Motors. （經傳譯員）你係咪新大嶼山巴士公司百分之九十九點九九都係冠忠遊覽車有限公司所擁有㗎喇，呢個後者係一間上市公司嚟嘅？

黃焯安先生：個母公司係 Kwoon Chung Bus Holdings，但係中間可能係有用其他公司嚟持有新大嶼山巴士嘅股份，我嘅喺呢度--係喇，要去睇番，但係最終嗰個母公司就係 Kwoon Chung Bus Holdings，冠忠巴士集團。

黃女士：（經傳譯員）你間公司，換句話嚟講，就係向你嘅母公司去租用非專營巴士？

黃焯安先生：係，正確，係，但係我哋係有公開去投標嘅，呢個過程係。

黃女士：（經傳譯員）黃先生，你自己同埋 Timothy Wong 就係黃焯添先生都係呢一個嘅冠忠遊覽車有限公司嘅股東呢？

黃焯安先生：係，正確，本身我自己冠忠巴士集團係個職銜係行政總裁，黃焯添先生係冠忠巴士集團嘅營運總監。

黃女士：（經傳譯員）唔該晒。喺 2017 年冠忠嘅主席就係 Mr Matthew Wong，係你嘅爸爸，啱唔啱㗎？

黃焯安先生：係，正確。

黃女士：（經傳譯員）我個問題就係話當你間公司係租用非專營巴士公司，係同母公司去租用嘅時候，嗰個佢哋嗰個租金係點樣去取得大家去同意個租金嘅呢？

黃焯安先生：頭先正如我咁講，就我哋每三年會係去投標。

黃女士：（經傳譯員）個租金係點樣去釐訂嘅呢？

黃焯安先生：係落標嗰間公司去決定嗰個定價咁樣，而我哋 NLB 就去決定用幾多部車。

黃女士：（經傳譯員）落標嘅公司係指邊個？

黃焯安先生：唔好意思，你嘅問題係講緊--即係落標嗰間就叫做 Kwoon Chung Motors。

黃女士：（經傳譯員）你知唔知道運輸署有冇咁嘅要求又或者有冇指引就講及如果用上呢個非專營巴士嘅租賃嗰方面，喺定價嗰方面佢哋有冇乜嘢指引嘅呢？

黃焯安先生：冇嘅，關於價格上嘅，運輸署就冇呢個 requirements 或者 guideline。

黃女士：（經傳譯員）唔該晒。等我繼續，...

主席：（經傳譯員）你未繼續之前，我就想問下，呢個咁嘅安排，同冠忠巴士呢個安排，你就透過呢個安排，你哋就係租嗰啲非專利巴士，我就想問，係咪 2018 年 5 月 1 號開始嘅呢？

黃焯安先生：Chairman，我哋手頭上最--而家 existing 現有嗰份係 2016 年 8 月生效嘅，到而家，2016 年 8 月。

主席：（經傳譯員）喺嗰日之前，我就想問，你哋有冇其他嘅供應商係提供呢一啲非專營巴士畀你哋用呢？

黃焯安先生：冇，係一直都係 Kwoon Chung Motors。

主席：（經傳譯員）可唔可以畀我哋知道乜嘢叫做「一直以嚟」？係幾時呢？

黃焯安先生：我都係聽番--我哋嘅理解，就係喺--因為冠忠收購大嶼山巴士嘅時候就係 1992 年嘅，冠忠開始向大嶼山提供服務就應該係 1990 或者 1991 年嘅。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）等我繼續。想問下，你哋有冇咩嘢措施去監察住呢啲非專利巴士嘅車長佢哋嘅身體狀況，有冇監察咗，睇咗，然後先至係畀佢哋上班呢？譬如話有冇驗身嘅呢？

黃焯安先生：我想確定個問題係講緊佢每一次駕駛吖，定係佢開始駕駛，即係入職前咁樣，即係駕駛--幫大嶼山巴士駕駛前？

黃女士：（經傳譯員）兩者，兩者都問。

黃焯安先生：如果你話每一次駕駛前，呢個冇嘅，一定唔會話每一次駕駛前，因為包括唔好話係非專營巴士提供嘅車長，我哋自己大嶼山巴士嘅車長，我哋都冇可能每一次開車前去幫佢做一個檢查。至於你講話另外嘅身體檢查，就係例如喺入職嘅時候，佢就會去做身體檢查。

因為我都想補充，其實頭先即係本身，因為 Kwoon Chung Motors 同大嶼山巴士係一個姊妹公司嘅關係，其實佢本身都有好多今天--因為大嶼山巴士其實規模係較為細嘅，得一百三十部車，而有好多後勤嘅工作人員或者一啲主要嘅管理人員其實都係要靠母公司嗰面去支援嘅，如果唔係，係冇可能去可以跟到另外--即係大嶼山巴士去做到可以好似另外兩間專營巴士公司咁樣嘅相近嘅表現出嚟嘅，我哋大嶼山巴士只係佢哋嘅十三分之一或者三十三分之一咁嘅規模。

所以係當你話如果喺冠忠嗰個車長佢去駕駛大嶼山巴士之前會唔會話真係有一個文件正式存入去大嶼山巴士個紀錄度話佢做咗身體檢查，呢個我都要返去問番我自己嘅同事佢哋嗰個實際嗰個操作係點樣，但係本身我哋嘅了解，喺冠忠佢哋自己去聘請呀盛，都係有做足頭先講嗰啲去查底、身體檢查等等，係有做嘅。

主席：（經傳譯員）或者你查番之後，就再正式咁畀份文件我哋喇，即係佢哋點樣樣正式咁將個文件交畀你哋新大嶼山巴士公司嘅。

黃焯安先生：Sure。

黃女士：（經傳譯員）關於呢啲非專營巴士，即係利用呢啲非專營巴士嚟到係做巴士營運嘅，我想問你哋有冇咩嘢措施嚟到確保呢一類嘅巴士喺機器上面、機械上面都係適宜係你哋使用嘅呢？

黃焯安先生：我交畀楊生代我作答。

主席：（經傳譯員）係，楊生。

楊家寶先生：Thank you。關於呢啲非專利巴士，佢哋都會定期做一個檢查，同埋每一年佢哋都會 go through 政府嗰個驗車嘅，因為呢個係完全同我哋專營巴士係一樣嘅。

黃女士：（經傳譯員）關於呢啲非專營巴士嘅公司，你會要求佢哋畀啲咩嘢文件嘅證明你哋，就去證明呢啲嘢都做咗呀？

黃焯安先生：唔該。因為本身--正如頭先我咁講，喺今天大嶼山巴士同冠忠係一個姊妹公司嘅關係，可能有好多 black and white 嘅文件我哋係冇話係由大嶼山嗰邊係向冠忠去索取嘅，今天。但係當然我哋自己本身係--尤其是我哋管理層呢方面亦都係知道兩間公司佢哋係--因為我哋都係提供客運嘅，亦都係會提供呢個安全嘅服務去畀我哋嘅乘客嘅，當然呢一方面我哋如果往後係我哋自己都返去檢討一下，覺得係咪真係有需要係就算係--即係當然唔一定嗰個係一個我哋有關連嘅公司，如果往後係一個冇關連嘅公司去幫大嶼山巴士提供嘅服務，變相我哋都可能要諗清楚往後會唔會係需要多啲文件係需要番呢個營辦商去提供番畀我哋。

黃女士：（經傳譯員）喺你嗰個附件 2A、2B 同 2C，即係話你哋文件嘅 474 至到 480 頁，473、474 頁就係附件 2A 嘅，2B 就係 476，之後嗰個就喺 479 頁嘅。我想問，呢啲嘅調查係邊個進行嘅呢？

主席：（經傳譯員）我想問一下你講邊一個調查？

黃女士：（經傳譯員）三個調查。

主席：（經傳譯員）可唔可以講嗰個係標題呢？

黃女士：（經傳譯員）2A 就係呢個每月嘅報告，就係講及就係編定咗嘅服務同埋實際嘅服務就係佢哋究竟係咪符合到嗰個休息時間、用膳時間；2B 就係呢個車上嘅調查，去調查一下就係大嶼山巴士車長嘅休息時間；2C 就係提及專營巴士車長工作時間嘅調查，就關乎係 B 同 D 嗰兩項嘅指引嘅。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）唔該你。

黃焯安先生：唔該主席。呢三份啱啱提到嘅 survey 都係由我哋公司 NLB 內部自己去做嘅。

黃女士：（經傳譯員）喺呢個 2A，474 頁，呢個就係每月嘅報告，就講及就係嗰個巴士車長嗰個工作時間個指引，編定咗嘅同實際嘅，嗰度就係有一百一十五位車長係接受調查嘅，換句話講，你意思係咪話一百一十五位車長就係喺嗰一日

單一日裏面都畀你哋調查，即係話 2018 年嘅 2 月 21 號嗰日單一個人係調查晒一百一十五位車長呢？

黃焯安先生：係，正確，係當天嘅一百一十五個，係喇，喺嗰一日，係喇，抽一日去睇番嗰日。

黃女士：（經傳譯員）會唔會係單一位公司嘅職員去進行晒呢個調查呢？

黃焯安先生：因為我想補充番，佢呢一個形式，佢唔係話去逐個、逐個一百一十五個司機去跟住佢去見，而係我哋嘅同事去對番當天喺我哋自己嘅人事--即係嗰個車務嘅紀錄--行車紀錄，去對番當天嘅工作。

黃女士：（經傳譯員）換句話講，即係睇番嗰個係交畀你哋公司嘅駕駛紀錄，係咪呀？邊個交出嚟嘅紀錄呢？

黃焯安先生：Thank you，Chairman，我哋係呢個日子係運輸署去定畀我哋嘅，而我哋就去同我哋自己個--即係對番我哋自己內部嘅紀錄，喺嗰個營運--即係主要係營運部門嗰方面提供嘅紀錄。

黃女士：（經傳譯員）或者你去睇番附件 2B，就話車上嘅調查，去查核一下大嶼山巴士公司嘅司機嘅休息時間，請你睇番 477 至到 478 頁嘅，呢個又點樣進行嘅呢？

黃焯安先生：唔好意思，我哋要少少時間去睇番個紀錄，唔好意思。

主席：（經傳譯員）係，慢慢。

黃焯安先生：Chairman，呢一個表係我哋公司內部自己做嘅都係。

黃女士：（經傳譯員）去 480 嗰頁，附件 3 就係調查番專營巴士車長嘅工作時間，呢個又係點樣進行嘅呢？又或者調轉去咁問，會唔會有個人係嗰一日整日跟住個車長，然後作出呢個調查呢？

黃焯安先生：好，主席，喺呢個表度，“Employee No. of bus captain”呢一項就係運輸署去選取嘅，同埋嗰個“Survey Date”都係，而我哋喺右邊呢度，我哋就係搵番嗰個紀錄，即係都唔係話有個人去坐喺架車跟住，因為呢個係事後去填報番出嚟嘅，我哋就填番究竟--搵番我哋自己個紀錄，佢當天嗰個同事嘅工作時間。

主席：（經傳譯員）當初係點樣樣有呢一啲嘅紀錄呢？即係呢個又係簽到同埋簽走嘅時間，最初呢啲時間係點樣樣係記錄低嘅呢？

黃焯安先生：主席，喺我哋嘅今天嚟講，主要就係喺呢個總站，即係站頭嗰度有個拍卡機咁樣，個同事就攞個員工證去打卡，即係拍卡，就係去記錄番佢嗰個上、下班時間。如果有啲係 remote，唔係呢個站頭，就靠個電話去報番。

黃女士：（經傳譯員）對唔住，我其實係應該問 477 頁都同一個問題嘅，因為嗰個標題就係話車上嘅調查你都係查核大嶼山巴士公司司機嘅休息時間嘅，呢個都係就係車上嘅調查，都想問同一個問題，係咪當日係有人跟車去調查嘅呢？

黃焯安先生：唔該主席。呢一個 on-board survey 呢個就我哋係有同事喺車度嘅。佢呢個係運輸署要求我哋有十日就係喺平日，有五日就喺假日嘅時候去做嘅。

黃女士：（經傳譯員）你可唔可以講下喺休息或者係用膳嘅時間，即係根據呢個指引，嗰三類嘅巴士車長需唔需要做任何嘅非駕駛嘅職務，譬如話係要更新佢哋嗰個當更時間或者其他一啲行政嘅工作？

黃焯安先生：唔該主席。喺啱啱提及嘅如果休息時間，係唔會需要去做你講嘅呢一類我會當佢係行政工作咁樣，因為主要行政工作係會由我哋一啲例如喺個站站長--即係喺個站頭嗰度就有個站長去處理呢啲工作，或者喺個總站嗰度係有其他一啲職員去幫手。

黃女士：（經傳譯員）如果根據你公司指示，要去到另外一個地點，或者係要去進行另外一種嘅駕駛工作，會唔會包埋喺呢個食飯或者休息時間裏面呀？

黃焯安先生：唔該。因為本身我哋嗰個服務嗰個範圍其實係較為集中，就唔會話出現一個要跨區喺大嶼山搭車去到九龍提供服務呢啲咁嘅情況，所以如果你嘅問題係話嗰啲會唔會都當咗係一個 rest time 呢，因為本身呢啲情況基本上係冇嘅，我哋相信，但係如果有都好，我哋都要計，當係一個工作時間畀我哋嘅同事嘅，就唔會當佢係一個休息時間咁樣。

黃女士：（經傳譯員）唔該。或者想睇下，就係呢一個第 71 頁，係區議會嘅文件夾，中文係 71 頁最後嘅五行，英文就係 75 頁最後嘅六行，我會讀出嚟。

主席：（經傳譯員）你係由邊度讀出嚟呀？

黃女士：（經傳譯員）呢個係離島區議會嘅意見書，交畀委員會，有關於呢次嘅專營巴士獨立檢討委員會嘅聆訊嘅。

主席：Thank you.

黃女士：（經傳譯員）我想讀出最屘嗰五行，「大嶼山巴士路線主要係一啲山路，係大嶼山南同埋就喺高速公路來往主要地區嘅長途，呢啲嘅路線係需要高度集中，所以需要更多嘅休息時間，防止因為疲勞引致交通意外。」黃生，我有一個問題，係關於大嶼山南嘅一啲路線，每一更嗰個嘅時間、時數或者長度係幾多？

主席：（經傳譯員）可唔可以講下，一更？係指一個工作嘅更數定係行完一條路線呀？

黃女士：（經傳譯員）行完路線，譬如話 3M 呢條線，由梅窩碼頭到東涌應該市中心

喇。

黃焯安先生：Thank you，Chairman，如果以梅窩呢個 3M 為例，佢由東涌去到梅窩或者梅窩去東涌，就大概係三十五至四十分鐘，睇下沿途多唔多--即係要上落咁樣。

黃女士：And what do you...

黃焯安先生：三十五至四十，唔好意思，三十五，唔係三十。

黃女士：（經傳譯員）呢度就話呢啲嘅長途路線係需要高度集中，你同唔同意呢一句咁講呢？

黃焯安先生：因為啱啱呢一個文件我都係第一次睇，即係...

黃女士：Oh, I apologise for that.

黃焯安先生：唔緊要，唔緊要，我自己就唔--我都唔係太明其實佢嗰個“long-distance routes along the highway to and from the main areas”嗰個意思係點，因為其實我哋本身大嶼山嗰個--我哋就--我哋嗰個專營權嗰個範圍其實就淨係喺大嶼山，就冇話去其他例如市區咁樣嘅，我哋另外就係喺深圳灣口岸嗰度就有服務去到元朗同埋天水圍嗰度，亦都唔連去大嶼山嘅。

我唔係太肯定議員嗰個--我唔知係咪講緊--或者如果你就咁--我集中番講番，我唔去揣測佢嗰個意思係點先，如果就咁講嶼南嗰面，我相信以嗰個車程嚟講，其實比起一啲喺另外兩間巴士公司嘅路線嚟講，就我諗對比起上嚟，就唔算話係好長。

同埋本身因為我哋嗰個服務嘅範圍嗰個路面情況其實就係較為暢通嘅，就好少會遇到嗰啲擠塞嘅問題，所以就我哋編排嗰個時間通常都唔會話同實際行車時間睜太遠。當然你話四十分鐘同一啲好近好近，例如一啲我哋叫 feeder bus，係去地鐵站嗰啲咁樣，即係另外--例如逸東邨去地鐵站嗰個車程只係講緊幾分鐘，比較起上嚟，佢會係長啲。但係如果你話真係同--我相信其他，例如喺新界去市區嗰啲咁，我諗我哋又唔算好長嘅。或者係同一啲喺機場，機場去市區嗰啲，其實嗰啲可能就跨區再加埋喺市區擠塞嘅，嗰啲個車程會更加長，我個睇法會係咁。

黃女士：Yes, and...

主席：（經傳譯員）黃女士，呢份文件仲有冇其他問題呀？因為如果有，應該畀個機會黃生睇過先。

黃女士：（經傳譯員）有呀，我有幾個問題要問。

主席：（經傳譯員）黃生，你去睇番呢三頁，你可以而家睇嘅，用幾多時間都冇問

題，我哋會等你。

黃女士：（經傳譯員）或者睇中文，中文就係 71 至到 72 頁。

黃焯安先生：主席，我...

主席：（經傳譯員）係，黃生(sic)。

黃女士：Thank you. And...

黃焯安先生：Sorry，excuse me。因為我睇咗個中文譯本，可能佢翻譯嗰度係搞錯咗，因為佢個中文譯本嗰度係寫「大嶼山巴士」，嗰個「大嶼山巴士」唔係講緊我哋公司，係講緊喺大嶼山度服務嘅巴士，係包括--即係佢話加上第--佢話「加上大嶼山巴士路線」其實唔係講緊係新大嶼山巴士公司嘅路線。當然我會有一部分，大嶼南嗰啲就係我哋公司，你話往來高速公路嗰啲就係講緊城巴或者龍運嘅線路。

黃女士：（經傳譯員）唔該。請你睇番第 3 段，英文就喺 76 頁，呢度就表達咗啲嘅關注，係離島區議會，關於大嶼山巴士公司嘅路線，讀出嚟，就係話「正如先前嘅意見書所講，大嶼山巴士公司嘅路線主要都係呢一個來往大嶼山南嘅一啲山路同埋一啲來往主要區域嘅高速公路，長途嘅，無論如何，目前嚟講，嗰個巴士車廂同埋嗰個嘅規定嘅設施都唔能夠係確保乘客嘅安全嘅，譬如話 3M 呢條線，來往梅窩同埋東涌，我有時候就發現啲巴士就係載滿客嘅，連呢一個嘅車廂裏面嘅通道都滿晒客嘅，而一啲來往市區嘅，除咗前面嗰幾行座位之外，後面嗰幾行同埋係向車尾嘅嗰啲座位都冇安全帶嘅，呢個相比起歐盟嘅規定，即係話無論任何嘅類型都好，巴士乘客、司機、乘客都係要戴安全帶，呢個顯示到香港係落後好多嘅。」

跟住我就睇番 78 同埋 79 頁，我想問，你對於呢件事有咩嘢嘅睇法？

黃焯安先生：好，唔該主席，如果簡單去睇，我睇到佢提出有兩個疑問，第一個疑問就係對於我哋啲車冇裝安全帶呢個問題，第二就係佢另外有去影咗啲相，喺啲相度就見到企得好滿咁樣，即係呢個情況。我首先回應第二個疑問嘅，就係關於佢話啲車好似企得好滿咁樣。

因為我哋其實都有留意到喺梅窩每日一啲較為繁忙嘅時間，正正呢條 3M 嘅路線其實係去呢個東涌--往返東涌，其實係比起以往嗰個人係多咗嘅，之前我哋嘅分析就係因為佢多咗人入去起樓，因為嗰面而家係起緊啲居屋咁樣嘅，都應該係將會起完，或者都差唔多起完咁樣。我哋之前嗰個做法就係都係儘量喺啲繁忙時間去加密嗰個班次，因為本身我哋同平時各位喺市區見到嘅提供嘅車款就較為唔同嘅，我哋本身因為嗰度行嗰個山路較為多，其實我哋已經係好多年冇去採用呢個雙層巴士，所以就當一有啲去到一啲繁忙嘅時間，一個單層巴士始終個載客量就冇咁高，我哋喺 2017 年嘅時候就決定就係想喺 3M 嗰度就係去用番呢個雙層巴士。

因為都見到嗰個，同埋嚟緊嘅都知道本身梅窩係會有呢個居屋喺 2018、19 年去入伙，我哋喺 2017 年嘅時候其實就試埋車盛呀咁樣，個目標就係希望去解決番一啲喺繁忙時間，就即係喺個車度即係唔夠--都始終我哋都明白例如喺四十分鐘，由梅窩去到東涌，如果你話個坐位咁少，因為單層嘅車始終個坐位係比較少嘅，我哋就去專登係喺市面度都採購咗一啲車身較為短啲--車長較為短啲，都係我哋做過路面測試，都確保係上述嘅呢部雙層巴士係去投入服務都唔會有問題。

至於你話議員佢有提到話安全帶嗰個，我哋嘅本身，因為今天係冇要求我哋所有座位都安裝安全帶嘅，我哋就主要喺一啲較為署方認為即係叫做 exposed seat 嗰啲座位度去加番安全帶，我哋都係開放態度嘅，如果你話係當覺得係真係有需要去喺所有嘅座位度加安全帶，我哋都覺得呢個建議係可以，我哋好開放嘅，對呢個建議。

主席：（經傳譯員）係，黃律師。

黃女士：（經傳譯員）而家我想請你睇番會議紀錄，係同樣，離島區區議會嘅，係 2017 年 10 月 23 日嘅會議紀錄，中文係 252 頁，英文係 256 頁。黃生，呢個係第一頁嚟嘅，係離島區議會嘅會議紀錄，日期係 17 年嘅 10 月 23 號，我哋可以睇到出席人士，睇番 257 頁同埋 256，仲有 258 頁，你間公司係有出席嘅，就係陳天龍先生副總經理，係大嶼山巴士公司，有出席嘅，現在想請你睇第 41 段，中文就係 254 頁，可以請你睇，你自己睇下。我亦都想請你睇第 43 段添，就係區議員郭平先生佢嘅建議。

黃焯安先生：唔，okay。

黃女士：（經傳譯員）佢提出嘅其中一個事項，就係話歐盟嘅規例就限制巴士車長工作時間係九小時嘅，如果係連續工作嘅時間就係十四小時就太長，會引致可能會有呢一個意外發生嘅，所以佢就關注呢一個大嶼山巴士公司同埋呢一個嘅運輸署，有關於呢個羌山路、東涌道，即係大嶼山嗰個嘅情況嘅，因為後果係不勘設想嘅，所以佢希望巴士公司同埋運輸署就可以係做啲嘢關於呢一個嘅工作長嘅時間，對於呢方面，你有咩嘢嘅意見呀？或者你哋間公司對於呢方面有咩嘢意見？

黃焯安先生：唔好意思，我哋要少少時間睇番啲資料先，唔好意思。

主席：（經傳譯員）好呀，你慢慢。

黃焯安先生：唔該主席。本身我哋公司，講番喺即係嶼南呢面，我哋嘅嗰個--因為而家其實規定做，可以提供十四--即係駕駛--即係工作十四個小時嗰啲車長，我哋稱呼嗰啲叫做「特別更」，特別更嘅車長，本身因為我哋嗰個呢類型嘅車長就比較少嘅，其實係得八條，因為我哋自己編咗路線嘅，即係叫做「字軌」，我哋個行業簡稱。我哋係當中係百幾條裏面係有--一百一十三條裏面就有八條係要去即係呢種特別更嘅工作嘅。

特別更佢中間我哋係確保佢有足夠嘅休息時間同埋係--因為本身我哋都有好多車長其實係喺當區居住嘅，因為我哋較為係集中喺番大嶼山嗰面，變咗就我哋去相信就算係呢一種特別更，我哋都會確保佢哋唔會話係過勞咁樣，就係安全嘅，呢個可以放心。

當然你話郭議員佢提出話係 EU 嗰個 standard，因為我自己就冇睇過嗰個 standard，你話如果真係佢連續駕駛九個小時，我相信都會係好攰，呢個係事實嚟嘅，連續駕駛，但係我覺得都要真係睇番究竟係如果係一個十四小時嘅工作或者少啲或者以下嘅，究竟當中嘅駕駛時間、休息時間等等係點樣。因為始終香港係我哋好多居民其實都係工作嘅地點同埋佢真係居住嘅地點其實係有距離嘅，而我哋作為服務性行業，其實係要喺大部分嘅市民佢哋去工作之前我哋已經喺早啲上班，去送啲市民去工作，到佢哋收工，我哋就去接佢哋放工。

你可以諗下假設今日係用十四個小時一個叫做特別更嘅安排去處理呢一個咁嘅結構，如果你話「唔得，太長，一刀切。」佢係例如九個鐘，但係就嗰個人手就唔係咁簡單話係用呢個比例，九個小時同十四小時咁樣嘅比例，因為你可以想像到係例如我哋喺朝早最繁忙嘅時間，你要最多嘅人，到到傍晚放工時間嗰個最繁忙時間又要最多嘅人，隨時嗰個--你話真係九個鐘咁樣嘅安排係好大機會就--即係一定會高過你就咁樣咁簡單話係十四轉九咁樣嘅一個比例。唔該。

黃女士：（經傳譯員）黃先生，我而家就會講第二啲嘅課題，就關於係設施同埋對於車長嘅支援，你啱啱就講到，就係話你好多嘅車長都係喺大嶼山居住嘅，係咪呀？

黃焯安先生：（經傳譯員）但係我冇嗰個正確嘅數字。

黃女士：（經傳譯員）你嘅公司會唔會提供穿梭巴士畀車長，就將佢哋從佢哋嘅屋企就係去番嗰個總站咁樣佢哋工作嘅地點？

黃焯安先生：主席，我哋今天係冇提供呢個即係叫做員工車去車我哋啲同事，因為最主要個原因就係我哋大部分同事都住得同佢哋嗰個攞車嘅地點係好近嘅，有啲可能住得遠少少嘅，佢可能架車就係--我哋都係安排咗係泊喺佢哋可能係屋企附近嘅一啲巴士站頭或者係搵個合適嘅位去泊車，變咗我哋就冇呢個需要去話提供一個返工車咁樣嘅安排。

黃女士：（經傳譯員）除咗話休息嘅設施，喺啲主要嘅服務嘅地點嗰度，呢個係第 24 頁嘅，喺你嗰個文件夾當中，係咪喺每個總站都會係有呢一個嘅洗手間，就係讓一啲車長喺小休嘅時間可以去使用洗手間呢？

黃焯安先生：唔該主席。喺我哋今天嘅情況，就唔會話所有嘅站都有呢啲休息或者我哋去安排咗洗手間畀啲同事嘅，因為都要真係睇番實際嗰個地權等等嗰啲問題嘅。我哋亦都係有經驗，當然呢一刻我哋冇準備喺手究竟係實際係邊一個申請

同埋係用咗幾多時間，但係以往的而且確係我哋有喺一啲站等等想去申請去起嗰啲設施，但係就礙於係都要經過唔同，因為係唔同政府部門去監管嘅，亦都係需要我哋花費好多嘅時間先至申請到，亦都有啲係試過係申請唔到。

黃女士：（經傳譯員）你嗰個遠期計劃嗰度...

主席：（經傳譯員）我可唔可以問一問呢？你可唔可以提供畀委員會就係一啲你個申請書嘅樣本，就話你希望能夠係提供休息室、廁所等等嘅設施，就可以話到畀我哋聽就係究竟需要幾多時間，同埋另一方面就係話你啲申請被拒嘅情況？就亦都可以話清楚畀我聽究竟成功同失敗嗰個申請嘅比例係點樣同埋嗰個所需嘅時間係幾多。

黃焯安先生：Okay。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）我就想去運輸署嘅文件夾第 241 頁，呢個係遠期計劃，呢度寫到你間公司嘅遠期計劃，我哋睇到最後呢一版嘅呢個部分，呢個講就係話所有嘅總站都係有廁所嘅，但係喺逸東、天慈同埋天耀邨佢哋只不過係嗰個總站就會附近係可以行到去一個公共廁所嘅，你知唔知道大概嗰個要行幾耐呢或者係幾長呢嗰個距離？

黃焯安先生：唔該主席。嗰個我哋呢一刻問到，就係本身嗰個巴士總站隔籬係有商場嘅，例如以逸東為例，佢側邊係商場嚟嘅，我哋就要個同事行入去個商場度，由佢放低部車，泊低咗，行到去商場，返番嚟，個時間我哋粗略估計係十分鐘嘅。

黃女士：（經傳譯員）多謝黃生。2018 年就運輸署出咗一個新嘅指引，就係運輸署嘅文件資料夾 1086 頁嘅，第 4 號文件夾嘅 1086 頁，喺新嘅指引嗰度就係車長駕駛六小時後最少係有一啲嘅小休，就應有四十分鐘休息時間，而該六小時內應有合共不少於二十分鐘嘅小休，其中不少於十二分鐘嘅小休應該安排喺首四小時內提供。我個問題就係話呢個可唔可以改善多啲呢？特別係關於嗰個洗手間嘅設施方面。如果有需要嘅時候，可唔可以延長嗰個休息時間呢？

黃焯安先生：唔該主席。啱啱律師提到嘅我哋--你話提供呢個設施，我哋可唔可以提供多啲，喺公司嘅立場，我哋係非常之樂意去做呢樣嘢嘅，因為我哋都希望我哋嘅--即係我哋嘅同事其實都係人，就大家都係人，你叫我要去洗手間要每次要行到咁遠，我相信在座都希望唔需要去有咁嘅經歷嘅。我啱啱問番我哋嘅同事，但係就真係喺--我哋之後都會補充番資料畀委員會，喺申請嗰度，而又有好多嘢都係喺我哋公司能力範圍以外，即係嗰個地方係唔批准我哋去裝置呢啲設施嘅，我哋都冇咩嘢可以做到。

我哋之前嘅--即係有亦都係一啲咁嘅--例如遇到啲問題，因為啱啱講話逸東嗰個商場，正正就係個商場係啱啱裝修緊，變咗嗰度個洗手間亦都係用唔到

嘅，我哋就惟有係要我哋同事去另外一面嘅--即係其他洗手間，我哋亦都係好清楚對我哋嘅同事係好大嘅影響嘅，我哋都會盡力去協助佢哋。

黃女士：（經傳譯員）多謝黃生。

主席：（經傳譯員）你有冇逸東邨嗰度嘅總站就有冇申請話「我自己要去裝置啲洗手間。」呢？

黃焯安先生：（經傳譯員）有嘅。

主席：（經傳譯員）但係有冇--係咪申請被拒絕呢？或者係而家等緊批呢？

黃焯安先生：（經傳譯員）應該係等緊審批嘅。

主席：（經傳譯員）你幾耐之前去提出申請㗎？

黃焯安先生：我哋後補番呢個資料，因為就呢一刻答唔到。

主席：（經傳譯員）好，唔該晒。

黃女士：（經傳譯員）喺呢一個嘅文件，最後一個問題，請你睇下第 242 頁，對唔住，呢個係運輸署嘅第 1 號文件冊嘅第 242 頁嘅，呢個亦都係遠期計劃嗰度就講到就係話喺呢個嘅總站附近都係步行距離就係有廁所同埋餐飲設施，除咗話喺深圳灣口岸嗰度就係冇餐飲設施，我就想問你哋會唔會做啲乜嘢嘢係去改善個情況，確保有足夠嘅設施呢？

黃焯安先生：Chairman，因為本身喺--深圳灣做一個例子，嗰度係個關口，嗰度係唔批准畀我哋去配置例如一個休息室去畀同事，所以我哋--因為而本身嗰條路線其實係從深圳灣去元朗或者去天水圍，我哋今天嘅嗰個安排就係要同事喺元朗或者天水圍嗰面去食飯咁樣，去解決呢個問題，佢哋喺深圳灣入面就嗰度有洗手間呢啲設施。

黃女士：（經傳譯員）主席先生，我睇到個時間。

主席：（經傳譯員）係，我哋而家就小休，讓大家食飯，我哋會喺下晝嘅兩點半再繼續，唔該晒，唔該。

下午 1 時 01 分押聆訊押後

下午 2 時 30 分恢復聆訊

出席人士如前。

主席：（經傳譯員）各位午安。係，黃律師。

黃女士：（經傳譯員）唔該主席。黃先生，我哋而家係講到巴士車長嘅培訓，你喺嗰個開場白嘅時候就講咗喺最近幾個月係已經引入咗又或者將會引入呢一啲新嘅措施，係包括下面嘅措施嘅，第一，就係將巴士車長嘅訓練時數同埋導師與培訓學員嘅比例提升，亦都話會成立一所巴士車長嘅訓練學校去協助合資格嘅人士取得巴士駕駛執照嘅。我而家嘅問題係咁嘅，喺呢方面，而家個情況係點呢？未改變之前，你原本嗰個安排係點㗎？

黃焯安先生：主席，我會交畀李先生代表我去作答。

主席：（經傳譯員）李先生，請你答。

李春暉先生：主席，幾方面，第一，喺以往嚟講，個車長訓練喺新人同埋喺現職車長都略有唔同嘅種類去提供呢個培訓嘅，喺新入職嘅車長嚟講，過往係有五日--五天嘅車長訓練，包括路線、車型、課堂嘅訓練。喺最近嚟講，我哋喺呢一個五天嘅訓練就加咗一日，變為六天嘅訓練，主要嚟講，喺邊度加咗呢？就喺嗰個課堂嗰方面，我哋由以往嗰五日喺車上嘅理論就加咗一日，全日嘅課堂理論，所以而家喺新車長入職嚟講，我哋喺而家嚟講係提供六日嘅訓練，包括五日嘅掂車。而呢個掂車喺以往嘅導師同呢一個學員個比例係一比二或者一比三，視乎當時嗰個入職嗰個嘅成分而定嘅，但係我哋而家去決定嗰個導師同學員嘅比例係定喺一比二。一比二嚟講，學員同導師嗰個相處嘅時間亦都會多咗，比以往嚟講。

喺現職車長嘅訓練嚟講，我哋會有幾種嘅，包括路線訓練、車種嘅訓練、輔助訓練同埋重溫嘅訓練。喺以往嚟講，路線同埋車型嘅訓練都係一日，但係而家我哋會檢視番嗰個車種嗰個種類，因為日後嚟講，我哋嗰個車種大部分都可能會係雙層巴士。雙層巴士嘅引入，我哋會喺培訓嗰方面定喺兩至三日嘅訓練，因為呢種訓練係要畀學員嗰方面係要熟習嗰個雙層車嘅操作，包括轉彎嗰陣時嘅技巧。而喺重溫班嗰方面，我哋都要求每個學員--每個車長都要喺一年之內係要返嚟學校或者返嚟我哋培訓部去上堂嘅，就有關車長訓練學校成立一事，其實我哋有幾個準備工夫做咗，包括較早前向運輸署申請要求有呢一個限制導師執照考巴士--專利巴士，俗稱“GB2”嘅駕駛執照，而家就等候呢一個回覆。

我哋喺內部嚟講，亦都會招聘更加多嘅駕駛導師，由於而家現時我哋大嶼山個駕駛導師係並非擁有呢一個 GB2 嘅資格，即是話我哋本身而家嚟講係未有培訓，只有持有私家車牌、1 號牌或者 2 號牌、貨 van 牌嘅人士去考取巴士牌，如果日後我哋嘅申請係接納嘅話，我哋可以自給自足，我哋可以有資歷嘅駕駛導師去考取--去幫持有--即係應徵者--新應徵者嘅車長應徵人士去考取呢一個巴士牌，我哋嗰個來源，即係我哋嗰個嘅來源會更加廣闊，並非而家限制於 9 號、10 號私家車同埋巴士牌嘅人士申請。當然呢一個訓練學校嘅成立仲需要一啲配合，包括我哋嗰個泊位、路線、個場地去訓練嘅地方。

而如果個牌照係攞到嗰個限制牌照嘅話，我哋會喺而家持有巴士牌嘅六日訓練係會增加到九日嘅訓練，而未有巴士牌，只係持有私家車牌嘅人士，我哋暫定係會提供十八日嘅訓練，喺訓練嘅時數係會比而家純粹只係六日嚟講係多好多嘅。

黃女士：（經傳譯員）唔該，或者咁，我想請你睇番 NLB-2，467 頁，呢度係一個圖表嚟嘅，個圖表就係列出就係車長嘅培訓嘅時間表，呢個附件 10，A 就係新入職嘅巴士車長嘅恒常嘅訓練，B 嗰項就係現職車長嘅恒常嘅訓練嘅，我想問下呢個係咪舊有嘅安排定抑或你剛剛所講及嘅新嘅安排呢？

李春暉先生：呢個係舊有嘅安排。

黃女士：（經傳譯員）呢個係舊嘅訓練，係咪呀？

李春暉先生：係，冇錯。

黃女士：（經傳譯員）可唔可以話畀我哋聽係邊個提供呢啲培訓嘅呢？你有講過你哋嘅訓練學校係仲未成立嘅，係咪呀？

李春暉先生：係，冇錯。而家籌備中，我即係話喺而家嚟講，呢啲訓練係由我哋嘅駕駛訓練導師係教緊嘅，in service 嘅。

黃女士：（經傳譯員）如果你睇番 A 嗰個部分，即係入職嘅訓練，你就係喺呢個課室嘅上堂下面嗰度，你呢度就有講及就係喺呢個意外黑點嘅分析，睇唔睇到呀？

李春暉先生：睇到。

黃女士：（經傳譯員）你呢度就話課堂--上堂講公司嘅規則、乘客嘅安全同埋意外黑點嘅分析，你可唔可以解釋一下你用啲咩嘢實證嘅數據作為基礎嚟到去做呢一個意外黑點嘅分析呢？

李春暉先生：兩部分，一部分係由過往嘅駕駛導師所提供一啲嘅過往經驗，包括喺嶼南路嘅交通意外所發生嘅地點。除咗係導師過往經驗個分享之外，我亦都會根據番實質喺個意外嘅真實地點嗰方面係同啲學員分享番個成因--意外個成因係乜嘢、點樣去預防。而且除咗係課堂嗰個理論之外，喺真實嘅行車訓練當中，導師亦都會講解一啲彎位、一啲嘅防衛性駕駛嘅技巧。

黃焯安先生：Ms Wong、Chairman，我想補充一點，頭先你嘅問題係話當我哋準備成立嗰個 training school，我哋今天點去培訓，因為我想補充番一點，係啱啱頭先李生提嗰個係可以 set up 咗嗰個 training school，嗰個用意就係變咗我哋可以去幫一啲冇巴士牌，今天可能淨係得私家車或者客貨車嘅人士，而佢又想去做一個專營巴士嘅車長，佢就可以經過我哋，當我哋係正式向署方申請到，就變咗我哋都可以幫嗰啲人去考到個駕駛執照，巴士嘅駕駛執照，即係主要嗰個分別喺呢度。

而今天呢一個安排係喺另外嗰啲專營巴士公司佢哋都已經係有做緊，即係

去幫一啲未有巴士牌嘅車長去考呢個巴士牌，想補充呢點。但係本身我哋恆常一啲基本嘅訓練，即係嗰個係不論我哋有冇呢個叫做學--即係駕駛學堂咁樣，呢個 training school 呢個考牌呢一個，我哋本身都係有呢個能力去同佢做一個訓練。唔該。

主席：（經傳譯員）目前訓練嗰度，你哋有幾多人係做緊訓練嘅工作㗎？

李春暉先生：我哋而家有四個--四名嘅駕駛導師係進行呢個培訓嘅。

主席：（經傳譯員）日後嘅訓練學校，你諗住係會有幾多人做培訓㗎？

李春暉先生：我哋最近向署方申請嗰個牌照係六個配額。

主席：（經傳譯員）六個係駕駛嘅導師，係咪呀？

李春暉先生：係，係，冇錯。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）唔該晒李先生，唔該晒你畀我哋嘅解釋。關於呢一個意外黑點嘅分析，我想問你可唔可以畀個副本我哋睇下呢，即係睇下你哋公司係點樣進行嗰個分析嘅？

李春暉先生：其實除咗頭先我所講，我哋可以畀個副本你，因為其實我哋而家喺個培訓當中，我哋自己都印有一啲小冊子或者叫做手冊，當中我哋會有十個單元，頭嗰五個單元係講關於安全駕駛，另外嗰五個單元係講呢一個優質服務，而喺第二個單元，即係頭五個單元嘅第二個單元係講交通意外主要成因，當中我哋會講解天雨路滑、天氣影響、駕駛者嘅身體狀況、車輛嘅設備同埋路面嘅設計呢四大方向去討論意外嘅成因。

黃女士：（經傳譯員）你講到路面嘅設計，關於呢一點--關於路面嘅設計，你喺邊度係攞資料呢？你會係選取路面嘅邊一個方面嘅特色嚟到進行你嗰個分析呢？

李春暉先生：其實呢度我哋都係主要攞番導師畀我哋嘅意見，包括喺嶼南路呢啲山路邊啲彎位係要特別留意同埋佢嗰個斜度，嗰個斜路個波幅同正常係一比六，作為一個駕駛者，喺呢一個斜度入面要留意啲乜嘢，如果喺轉彎嗰陣時嘅車速同埋嗰個扭力要幾多先為之安全。

黃女士：（經傳譯員）李先生，我想請你睇另一份文件嘅，呢個就係你哋嘅遠期計劃，大家可以睇呢個 TD-1 嘅 237 頁，麻煩你睇一睇(g)嗰一段，呢個就係你哋公司嘅遠期計劃，呢度就咁講嘅，就話你哋公司...

主席：（經傳譯員）我咁寫低，好唔好呀？係 2017 年嘅 6 月嘅，係咪呀？

黃女士：（經傳譯員）係，2017 年嘅 6 月。你公司就咁講嘅，就話公司就可能就會係尋求係其他嘅專營巴士嘅營運商合作嚟到係達致上述所講嗰點，就係話將自

己嘅巴士車長就係送去接受人哋嘅培訓，當然要雙方接納同埋合作嘅，我想問，有冇同其他嘅專營巴士公司就呢件事展開商討呢？

黃焯添先生：主席，其實我哋喺一個駕駛學校嘅層面上面要搵一個好有經驗同事去做係喺呢一個行業係非常之困難嘅，李先生係今年年初係去加入我哋大嶼山巴士，喺 17 年嘅時候，其實我哋一路都--除咗係一啲用我哋自己本身嘅導師以外--一啲有經驗嘅導師以外，我哋亦都會去搵咗一間叫做香港汽車高級駕駛協會，去做一啲叫精明駕駛嘅訓練嘅，當時我哋因為喺冇一個咁專業嘅導師嘅情況下，我哋希望用一啲第三者嘅角度去畀一啲培訓我哋嘅司機，所以我哋就特別去搵咗呢間協會去做一啲培訓，係當時我哋係每一位司機都做過一次嘅，當時係 2017 年。

啱啱李先生就係 2018 年係加入我哋公司嘅，李先生就有超過二十年係呢個培訓嘅經驗，所以我哋就積極啲再向運輸署署方去申請一個駕駛學校嘅牌照，希望可以增加到六個嘅 instructor 去做到呢一樣嘢嘅。我哋其實公司都係希望可以積極啲用內部嘅資源去加強番本身我哋嘅訓練。

主席：（經傳譯員）你話每個車長就有一次機會，喺呢方面究竟係咩嘢意思呢？乜嘢有一次呢，每位車長都一次呢？

黃焯添先生：個機會就係去參與由 IAM 去設計嘅，sorry，高級駕駛協會去設計嘅精明駕駛訓練，個訓練內容其實最主要都係講番一啲駕駛嘅 awareness，即係佢唔係教個司機點揸車嘅，最主要係駕駛佢哋嘅--個駕駛態度，同埋本身佢哋喺個路面嘅--唔同路面嘅情況，講下路牌，佢用一啲口述嘅方式去幫下我哋嘅師傅嘅，所以呢個訓練係--sorry。

主席：（經傳譯員）係咪課堂㗎，上堂㗎，定抑或又有上堂，又有去路面嗰度學習嘅呢？

黃焯添先生：（經傳譯員）路面嘅。

主席：（經傳譯員）幾長時間呢？

黃焯添先生：（經傳譯員）三個鐘頭。

主席：（經傳譯員）係咪畀教車師傅定抑或係畀你哋所有嘅車長呢？

黃焯添先生：（經傳譯員）有兩類嘅課堂嘅，一個就係畀車長，就講佢哋嘅揸車嘅態度，另外亦都係呢個高級駕駛協會，佢叫做 IAM，IAM 呢個香港汽車高級駕駛協會就會畀一個培訓者嘅課程嘅，即係話教嗰啲導師嘅，係參與呢個導師嘅訓練嘅，正如頭先李生所講，就係我哋呢個大嶼山巴士公司喺 2017 年初就有二十位嘅具經驗車長參加嗰啲導師訓練。

主席：Thank you。

黃女士：（經傳譯員）而家請你睇番就係運輸署嘅文件，1 號文件夾，就係關於你哋

遠期嘅計劃，第六段，239 頁，我知呢個係 2017 年嘅事嚟嘅，建議就係有個定期嘅檢討關於巴士車長嘅表現同埋鼓勵佢哋去參加一啲駕駛提升嘅培訓訓練，而你哋巴士公司係會畀番呢個課堂錢佢哋嘅，呢個係關於你哋設立培訓課程同埋呢一個駕駛學院，呢樣嘢係咪仍然存在嘅呢？

黃焯添先生：正如頭先所講，上年我哋係用 IAM 呢個夥伴合作嘅，今年嘅年初我哋有機會請到李先生，所以我哋嚟緊嘅呢個 paragraph (c)，係會我哋嘅 training school 會取代。

黃女士：（經傳譯員）而家講另外一個課題，就係關於大嶼山南部嘅地勢嘅，想請你睇番呢一個離島區 2018 年 3 月 19 號嘅區議會文件，文件夾 1 號，中文版係 264 頁，英文版係 272 頁嘅，你哋公司陳天龍先生係有出席，你可以喺中文嘅 265 頁見到，英文 273 頁就見到，我就想將呢一次嘅會議紀錄其中一啲要點提出，第一個議題就係話你哋喺呢一個大嶼山南部係咪用雙層巴士，呢個係關於第 30 段嘅，中文係 266 頁，英文係 275 頁，請你睇一睇第 30 段、35 同埋 36 段，即係你睇番三段先。

第 30 段，呢個就關於使用雙層巴士喺 3M 路線，30 段就係一位嘅蔡小姐，佢係離島區嘅運輸署嘅主任嚟嘅，而運輸署佢係就於呢一個--同埋運輸署、警方同埋大嶼山巴士喺呢一個嘅 2016 年嘅 11 月，就喺東涌道嗰一段，同埋係 2017 年 6 月係成段嘅 3M 路線係做咗兩次嘅實地測試嘅，呢個係蔡小敏女士。

陳天龍先生：主席，我可以確認嗰兩次嘅試路係確實有做到。

黃女士：（經傳譯員）呢兩個嘅測試係咪書面有寫嘅呢？

陳天龍先生：係，我哋當時有要求到巴士嘅生產商提供番一份報告畀我哋。

黃女士：And if we look at...

主席：（經傳譯員）佢哋係咪有真係交畀你吖？有冇真係交到份報告畀你吖，嗰班巴士嘅製造商？

陳天龍先生：個報告我哋喺手嘅，我哋可以喺會後提供番畀委員會。

主席：（經傳譯員）係邊間巴士製造商嚟㗎？

陳天龍先生：2016 年 11 月嗰次嘅測試係 MAN，而喺第二次，2017 年 6 月嘅測試就係 ADL。

主席：（經傳譯員）係咪 Alexander Dennis？

陳天龍先生：冇錯。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）我哋睇番 35 同埋 36 段，就係一位樊先生嘅，佢係樊志平先生，佢係議員嚟嘅，佢就表達話唔應該單單使用沙包去做呢個模擬測試當係真實，因為真實係乘客可能側埋一邊，唔會平均分佈喺巴士，佢就促請做多一次，喺呢一個天氣差嘅時候嘅測試。

我再請你睇另外一段，就係 44 段(b)，當時就係陳天龍先生回答咗嘅，44--40(b)。

主席：（經傳譯員）40 定係 44 呀？

黃女士：（經傳譯員）40(b)。你嘅回覆係喺 40(b)寫咗出嚟，話喺呢兩次嘅道路測試嘅時候，呢一間公司就根據運輸署嘅要求去做嘅，即係就將一啲嘅金屬板，每一塊就係代表一個人嘅重量喺個座位嗰度嘅，去模擬巴士係載滿乘客嘅。

跟住 44 段，一位嘅余先生，余漢坤先生，佢係議員嚟嘅，佢就建議，喺開始服務--正式服務之前，即係呢啲嘅雙層巴士喺 6 月服務之前，運輸署同埋大嶼山巴士應該係安排兩架嘅雙層巴士用番同一個嘅巴士型號就係做道路測試嘅，尤其就係銀礦灣嗰個嘅彎位，所有嘅持份者，包括議員、鄉士委員會、村代表會睇晒成個嘅過程，同埋作出建議。

跟住最後，第 51 段，呢位嘅蔡小敏女士代表運輸署就回答話關於安排另一次嘅道路測試，署方就會同大嶼山巴士公司喺會後作進一步適當嘅跟進，委員係如果有興趣，可以參與。

揭去跟住嗰頁，道路測試就根據佢哋嘅要求，就係喺一個天氣差嘅時候做，署方需要同其他嘅部門作安排嘅，其他嘅部門都明白呢一個建議會嘗試安排嘅，署方係明白委員對於使用雙層巴士係用作 3M 線係有關注，亦都會係密切同巴士公司係跟進，確保加強安全性嘅。有關於呢一次建議嘅道路測試，喺會後有冇真係做到呀？

陳天龍先生：主席，因為嗰架巴士係我哋新購買嘅，其實第一架巴士其實先至喺今日先至送到嚟香港，喺今朝早，所以就佢仲有一啲手續要做，要上牌或者其他驗車嘅手續要做，所以我哋喺完成晒呢啲手續之後，我哋會再聯絡番區議會嗰面，會安排番一個試車嘅。

黃女士：（經傳譯員）唔該。如果係進行呢一次嘅測試，你可唔可以係都將嗰個嘅試車報告交畀委員會呢？

陳天龍先生：呢個當然可以。

黃女士：（經傳譯員）喺呢次會議仲提出...

主席：（經傳譯員）唔好意思，等一等。你心目中會唔會知道大概幾時會進行呢一個測試呢？

陳天龍先生：應該係大約喺一個月後左右。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）第二個課題就係關於一個傾側嘅警號系統，請你睇番中文第266頁，英文係第275頁嘅，你睇咗32段，鄺官穩先生就話有關於安裝喺車上呢一個嘅傾側警報器，如果個巴士嘅車身係斜到某一個程度就會響警號去話畀車長聽嘅，係大部分大嶼山嘅道路都好窄，同埋係好多彎嘅，佢就建議巴士公司安裝呢一個警報器嘅。

睇番運輸署嘅回覆，就係38(b)段，蔡小敏女士就話署方理解呢一個建議，喺車廂上面安裝警報器嘅，亦都就會同大嶼山巴士公司睇下嗰個可行性。呢個嘅傾側警報器，有冇真係去由你公司去詳細了解一下？

黃焯安先生：主席，我交畀楊先生去作答。

主席：（經傳譯員）楊生。

楊家寶先生：主席，thank you。關於呢一個系統，我哋一路都有同運輸署嗰邊做一個檢討同埋開會咁傾嘅，焦點而家就係基本上係會所有--我哋建議所有新嘅雙層巴士都會安裝一個系統，叫做ESD嘅系統。而呢個系統就有兩個功能嘅，一個功能係防止架車過度轉向同埋改善轉向，另外一個功能就係防滾嘅，即係防反車嘅，喺嗰個臨界點之前，嗰架車有自動一個反應就係將個車速減慢，而令佢保持喺一個穩定嘅狀態。至於講嗰個警號嗰度，就如果有需要嘅話，可以叫生產商加埋落去都得。

基本上嗰個警號可能我哋有個concern就係佢會影響到個司機，即係太多警號嚟講，因為我哋講緊over speed，即係超速一個警號，有時啲門嗰啲開閂又一個警號，變咗有時司機太多警號，佢哋會有一個混淆，變咗所--與其將佢提出一個警號，倒不如將佢控制喺穩定嘅情況之下。

黃女士：（經傳譯員）唔該。

主席：（經傳譯員）唔好--未講第二樣嘢住。你就話係臨界點嗖之前，嗰架車速就會係減慢嘅，點做到呢樣嘢呀？

楊家寶先生：佢嗰個係用有--包括有兩樣嘢嘅，就係車速嘅，佢會將個injection，即係嗰個噴油就係減少，同埋就會用嗰個叫做減速器將個車速減慢嘅。至於嗰個速度嘅嗰個監測，佢哋因為有個sensor，嗰個sensor一個感應器，就裝咗喺嗰個底盤嗰個中間位置，佢嘅作用就係感應嗰個車嘅本身嗰個側向加速同埋呢一個離心力嘅計算，而提早計算出一個當時到達嗰個臨界點未呢，而產生一個功能嘅。

主席：（經傳譯員）即係有兩方面，一就係會將嗰個噴油減慢，係咪講緊關於呢一個汽油，或者無--即係睇下嗰架車用咩油？

楊家寶先生：係，correct。

主席：（經傳譯員）係減慢嘅啫，唔係將佢直情切斷？

楊家寶先生：基本上佢係有一個減慢至到停止 injection 嘅，因為視乎嗰個車嘅速度同埋再加埋嗰個 retarder，嗰個叫做「減速器」嘅功能將架車收慢。

主席：（經傳譯員）呢個車速減慢器係咪將個檔次減低或者用制動器或者兩個都用？

楊家寶先生：兩個都用。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）第三樣，離島區議會嘅委員就講過一樣嘢，關於大嶼山南部嘅地勢，佢哋就話有好多斜嘅路同埋好多彎道，尤其係銀礦灣路，係好崎嶇同埋好多彎，佢哋就話單層巴士都要讓路畀對方先至夠位過，而且係冇任何嘅避車或者泊車處嘅。我想請你睇番 34(a)，跟住就 45(a)，就係呢一個磩石灣路，呢度就話呢條路係需要巴士司機要具備經驗同埋技巧同埋要係好警覺，尤其係呢一個磩石灣嘅彎，因為好細微嘅錯誤都會引致意外。跟住 52 段...

主席：（經傳譯員）未講第二樣之前，可唔可以講番，講呢句說話嘅係咩嘢人呀？

黃女士：（經傳譯員）係黃福根，佢都係議員嚟嘅，以我所知，佢都係呢一個委員會嘅委員。272 頁。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）我哋去睇一睇第 48 段，呢個係副主席張富先生，佢亦都係提出相同嘅問題，佢話最大嘅問題係出於道路，而唔係巴士，因此首要係改善道路彎位，佢亦都講，就根本就唔夠位就係兩架巴士一齊通過呢段路，尤其係磩石灣嘅彎位十分急速嘅。我想聽一聽你對呢件事嘅睇法，呢個對你嚟講--對你哋公司嚟講，係咪都係一個關注點呢？

主席：（經傳譯員）你嘅意思就係話個問題係個道路？

黃女士：（經傳譯員）首先就係個道路，另外有啲嘅委員亦都講到，就係需要嗰啲車長需要足夠嘅經驗。

主席：（經傳譯員）所以呢度有兩條問題嘅。

黃女士：There are two questions.

主席：（經傳譯員）第一個問題就係話，就住呢個觀察，就係話個問題在道路本身，你哋嘅立場係點樣呢？

黃焯安先生：唔該主席。首先我哋想都藉呢個機會，其實喺好多唔同嘅場合，包括係啱啱喺呢份文件見到嗰個區議會嗰個會議，我亦都係明白喺之前嘅一啲--即係喺香港嘅交通意外係令到公眾係擔心雙層巴士--即係整體嚟講，雙層巴士嗰個行車安全嘅。不過首先我想喺度先係再去補充--即係提醒番，其實本身今天嗰

條路我哋已經係有巴士行緊嘅，即係唔係話一條路係本身冇巴士去行駛嘅，呢個係首要先。

我哋亦都唔係計劃整個嶼南都去行雙層巴士嘅，我哋嘅判斷有一部分係向例如大澳、昂平嗰面係都唔適合行雙層巴士嘅。而去梅窩嗰面，我哋認為係可以行嘅，雙層巴士，因為我哋今天打算--即係今天我哋之前已經開咗標，去採購嗰種巴士其實喺市面度，我相信在座好多人都會了解，例如喺港島，都一樣係有好多山路好險要，好多彎路係行，包括赤柱、山頂、石澳等等嘅路段嘅，而我哋打算採購嗰一種嗰款車個車長都係甚至乎係比我哋今天嘅單層巴士係為短嘅，嗰部車係 10.4 米，我哋今天嘅單層巴士係介乎 11 米，接近 11 米 5 左右，11 米 3 至 11 米 6，所以變咗個長度嚟講，佢係短咗嘅，同單層巴士嚟比較。

當然我哋都好理解有個感覺話雙層巴士嗰個會唔會反車個風險大咗等等，當然可能喺科學上、理論上可能會，但係我哋覺得最重要、最重要就係駕駛個車長個態度。當然你話呢架車單層永遠都係比雙層去反嗰個風險會為低，咁係咪全港所有嘅山路都唔可以行雙層巴士呢？我相信都唔會係一個咁嘅情況。所以我哋認為最重要嘅係個車長嘅態度。

當然我哋喺嗰個車個硬件上面，我哋亦都要去諗有啲乜嘢係--例如好似我哋今次就係覺得用一架短啲嘅車，因為我哋其實喺市面上係有長啲嘅雙層巴士嘅，但係我哋都係選擇例如用一部短啲嘅雙層巴士，個高度亦都係矮啲嘅，而我哋相信呢一個配置，再加上我哋畀到適合嘅培訓畀我哋啲車長，係可以將呢個風險係減低。唔該主席。

主席：（經傳譯員）黃先生，你話最重要嘅就係呢個車長嘅駕駛態度，嘅意思係乜嘢呢？

黃焯安先生：唔該主席。可能我哋個做法比較傳統啲，始終喺巴士--每一架巴士都需要一個車長去操控，始終佢都係一個人，我哋唔同話係飛機或者鐵路，有好多--今天嘅科技已經有好多好自動化嘅儀器去幫嗰啲機師或者火車上嘅車長。喺巴士嚟講，我哋呢個咁--我哋自己本身亦都係--頭先你有提及到我哋公司嘅主席黃良柏先生，佢係我嘅父親，我哋自己經營咗呢個交通運輸行業，係我已經去到第三代，由阿爺開始去做。而當然你話以前嘅車，佢哋成日都去講以前嘅車係咪好似今日咁樣咁先進呢？當然我可能都根本都未出世，可能以前嘅車我都未睇到，但係我哋深信最緊要、最緊要嗰個元素，今天要去安全，當然有科技去幫到我哋梗係好，係一個輔助，但係最重要嘅一定係我哋車長嘅嗰個態度，即係佢要係有個心去專業嘅，佢有個心係去真係去安全咁去駕駛嘅，呢啲係相信係最核心嘅價值。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）你早前講過就係雙層巴士無論係長度同埋高度嚟講，就係會係就短過同埋矮過就係單層巴士嘅，但係陳先生就喺第 48 段嗰度講，喺 278 頁嗰

度講，...

主席：（經傳譯員）佢就當然係長度係比較短，但係如果喺高度嚟講，一定唔會係低過或者矮過嗰個單層巴士。

黃女士：Not less in height but...

主席：But shorter...

黃女士：...shorter.

黃焯安先生：（經傳譯員）但係就係嗰個係比較一般嘅雙層巴士係比較矮嘅。

黃女士：（經傳譯員）我就想睇一睇另外一個會議嘅會議紀錄，呢個係有關就係2015年4月6號發生嘅交通意外，就係你哋嘅公司嘅一架巴士就差啲跌落山，就係落緊斜嘅時候，就由東涌--大澳嘅時候，你記唔記得呢個事件呢？我哋可以就係畀你睇一睇個相關嘅新聞報道嘅，係幫你去睇一睇，呢個係講緊羌山道。

主席：（經傳譯員）呢個係個來源喺邊度呢，呢個嘅文章？

黃女士：（經傳譯員）呢個係《東方日報》2015年5月30號嘅一個報道。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）我哋睇一睇呢一個報道，你或者記唔記得呢個意外係2015年4月6號發生嘅？

主席：（經傳譯員）呢個喺我哋嘅聽證會文件之中喺邊度搵到呢？

黃女士：（經傳譯員）主席，呢個就冇擺落個文件冊嗰度，但係就係喺個網站嗰度嘅，我哋亦都係將佢翻譯咗出嚟，等你容易啲去參考嘅。

黃焯安先生：唔該。主席，因為如果我就咁睇呢個報道，其實佢裏面提及到首先有一單係四十二年前嘅意外，跟住另外有一單就係十二年前，另外就反而佢冇提到話2015年4月嗰單，但係張--即係如果你話張相呢個，呢個我哋有印象嘅，呢單意外。三單意外，我相信都係唔同嘅成因嘅，你話喺四十二年前嗰單，嗰條路同而家個路況相信都已經係改變咗好多，當然我唔--四十二年前嘅，我唔能夠確定嗰陣時個路況係點，但係我一路嘅理解，就係聽番啲同事講嗰個今天喺大嶼山嗰面嘅路況已經係改善咗好多。咁十二...

主席：（經傳譯員）好呀，你慢慢睇，睇完先至回答。

黃焯安先生：Yes。至於裏面提及到03年嗰個意外，就我哋要返去再搵一搵資料先，而家嗰個都唔係太過肯定當時嗰個事發地點同埋嗰個事發經過。至於你話15年嗰個，就喺內文--呢度內文就冇提及到嘅，係張相嗰度--有見到張相係喺嗰個--即係有架車揦住咗喺嗰度咁樣，係喇，呢個，呢個就應該係我粗略記得

都係 15 年時候去--好似 15 年嗰陣時發生嘅，好似係，應該係，係喇。

呢一單意外嗰陣時就冇--即係慶幸係冇人係嚴重受傷或者--即係死傷都冇嘅，係當日有乘客係受咗輕傷，而要去送院。當然喺呢張相嗰個角度去睇係即係好似好驚險咁嘅，但係其實前面嗰度唔係一個--即係佢嗰個位係嗰啲--嗰個平，即係其實佢前面車頭嗰個位係--即係其實都係一個陸地嚟嘅，其實平嘅，但係當然係我哋事後去了解番嗰個--即係呢一單意外，我哋之後都去檢討係要去點樣做好啲呢，就係嗰陣時嗰個--即係再 detail 啲，真係要返去搵下，但係就本身嗰個車款同埋我哋之後都要求咗係用另外--即係可以用一個--個中文應該係叫「減速器」，就變咗可以唔使淨係靠個剎車系統去--因為嗰度係個斜路落嚟，就唔需要淨係靠嗰個剎車系統去剎車。

呢啲裝置，即係呢一個減速器呢個裝置，我哋都係會喺--就算我哋之後用雙層巴士又好，或者我哋自己今天用嘅單層巴士都好，都係有配備咗呢個裝置。

黃女士：Thank you. Actually the...

主席：（經傳譯員）我想問一問，呢張喺螢幕上嘅巴士，呢個你係會係 2015 年 4 月 6 號嗰個交通意外嘅情況嚟嘅，係唔係呢？

黃焯安先生：Yes。

主席：（經傳譯員）但係嗰個文章本身就冇講到呢一單意外嘅，但係淨係幅相係關於呢單意外嘅啫？

黃焯安先生：係喇，如果我就咁睇呢個新聞，就冇提到嗰單新聞，可能唔喺呢個報道度。

主席：（經傳譯員）黃律師，你有冇 2015 年 4 月 6 號嗰一單意外嘅報道呢？

黃女士：（經傳譯員）呢個係 2015 年 5 月 18 號呢一個離島區議會嘅一個會議紀錄嗰度，就中文版 203，然後英文版係 208 嘅，呢一個就係有關於回應一個 201 頁嗰個問題，就係英文版係 202 嘅，係余先生係一個區議會議員嘅時候就係問到呢個北大嶼公路嗰個嘅安全嘅。

主席：（經傳譯員）咁我哋就應該係...

黃女士：We should start with the question.

主席：（經傳譯員）就係中文版係 201，英文版就係 202 嘅，黃先生，或者你自己睇一睇先。

黃焯安先生：Yes。

黃女士：（經傳譯員）黃先生，你睇一睇第 204 頁，我相信你個公司嘅代表係黃先

生都有出席嘅，喺英文版就係209頁嘅，喺離島區議會嘅2015年5月18號嘅時候就發現有三個主要嘅問題嘅，佢哋講及嗰個道路嘅設計，呢個就係喺79(c)嗰段，當時就係劉焯榮先生，佢都係委員之一，佢就提出呢點嘅，佢就話嗰個係大嶼山嘅道路設計就唔安全嘅，譬如話嶼南道同埋係羌山路，即係喺水塘同大澳之間嗰段路都唔安全嘅；另外，佢就話運輸署就已經係多次就係作出改善嘅，但係都有超過十個彎位嘅，但係只係得三個真係有所改善嘅。

跟住佢就講出第二個問題，你可以睇到79(d)嗰段嘅，運輸署就係批准係有三十條嘅旅遊路線就喺大嶼山嗰度行走嘅，但係呢啲車嘅車身就係比起正常嘅巴士稍為長嘅，同埋行呢個係羌山道一啲唔合標準嘅彎位嘅話，就更加容易係發生意外。

第三個成因，佢就話--你可以睇呢個第81段，李桂珍女士就咁講嘅，佢亦都係委員之一嚟嘅，佢就話要求擴闊嗰條道路，即係嶼南路，其實要求咗超過二十年，但係嗰個情況依然係未有改善嘅。

而關於第一點，我相信黃華先生，即係你哋嘅代表，當時就問過究竟嗰三個改善地點係邊三個，或者我哋可以睇一睇呢個第80段--對唔住，第90段。黃華先生就問究竟嗰三個改善咗嘅地點係喺邊度，或者將要改善嘅邊度嘅，佢嘅意見就認為係羌山道有三十個地點係需要改善嘅。

我而家個問題係你公司有冇係搵出運輸署所講嗰三十個地點呢？

黃焯安先生：Chairman，關於呢一個，呢一刻我哋唔能夠確定有冇同運輸署嗰面去喺一啲正式嘅文書或者書信往來係畀佢哋話我哋係希望佢去--即係去將話邊啲位置去改造咁樣，呢個都要返去--因為本身喺區議會代表我哋嗰位黃華先生今日就唔在場，同埋佢都已經退咗休其實，我哋都要返去搵一搵番啲資料，睇下佢去--即係我哋都搵番究竟係同署方嗰面嗰個往來係點樣先。

主席：（經傳譯員）好，好，請你返去搵一搵，如果係攞到啲咩嘢資料可以幫我哋理解嘅話，就麻煩你係交畀我哋委員會。

黃焯安先生：（經傳譯員）好呀，主席。

黃女士：（經傳譯員）你提供資料嗰方面，麻煩你亦都係幫我哋手，話埋畀我哋聽呢度嗰三十個地點係咪都係你哋喺培訓嘅課程裏面所提及嘅交通意外黑點分析嘅名單上面呢？

黃焯安先生：主席，因為呢一刻我哋手頭上冇--即係唔知究竟係黃華先生嗰陣時講嗰三十個--約略喇，佢話“has about 30 spots”，約呢三十個需要改善嘅位置係喺邊個位，所以我哋都唔能夠一時間去回覆到究竟呢三十個位係咪等同我哋而家自己喺培訓嗰度覺得需要特別加強嗰三十個位，我都真係抱歉，呢度我都要返去真係先搞清楚喺黃華先生佢講嘅呢約略三十個位係邊三十個位先。唔該。

主席：（經傳譯員）好，唔該晒，麻煩你返去咁樣查下喇。

黃女士：（經傳譯員）我亦都想講一講一個違例泊車呢一個課題，想請你係睇一睇呢一個雜項文件夾嗰度嘅第 643 頁，如果係翻譯，就係 644 嗰頁嘅。想請你睇睇呢度呢一頁嘅第三段，644-1 嗰一頁嘅，呢度係有一封信，就係民主陣線係寫畀委員會，係請委員會就係要留意嘅，呢度就開頭嗰句就係話係巴士車長喺 2017 年 2 月、2018 年所採取嘅工業行動，就係令到係社區嘅不同界別嘅人士留意到一啲咁嘅問題，例如就係喺巴士站違例泊車、車長嘅待遇同埋嗰啲工作時間；跟住佢哋就係列出幾個原因點解係有人違例泊車--喺巴士站違例泊車。

我哋落去跟住嗰頁，644，英文版就 644-1，呢度就講嘅，如果要係取締巴士站嘅違例泊車，一定係要連根拔起同埋要有適當嘅政策，亦都係要將嗰啲過時嘅法例係修訂嘅，呢個問題要解決嘅話，一定要多管齊下。佢哋其中一個建議...

主席：（經傳譯員）對唔住，你未繼續之前，英文版喺邊度呀？

黃女士：（經傳譯員）644-1，下面嗰度。

主席：（經傳譯員）最後嗰段，最後嗰段。

黃女士：（經傳譯員）係，最後嗰段。

主席：（經傳譯員）好。

黃女士：（經傳譯員）跟住嗰頁，644-2 嗰頁，佢哋作一個咁嘅建議嘅，就話可以跟隨星加坡嘅例子，就喺所有車隊嘅巴士嗰度都係安裝呢個相機，自從 2008 年星加坡已經係咁做，巴士上面同埋車長個座位側邊嗰度嘅，如果司機發現有車停咗喺巴士站嗰度，就撳個掣，然後錄係五至到十分鐘，巴士公司跟住就將嗰個錄影帶交畀警方，警方跟住就可以檢視，然後喺兩個星期之內就會將告票係送去畀呢個車主屋企嗰個住址嗰度。或者我哋未繼續落去之前，我就想問你哋公司覺唔覺得喺巴士站有違例泊車係一個問題呢？

黃焯安先生：唔該主席。喺大嶼山巴士嘅情況嚟講，本身我哋--因為頭先例如一路講緊嶼南嗰面嘅路係一個禁區，係需要禁區紙先可以進入嘅，喺巴士--即係嗰面嘅車其實同市區比較，係少啲嘅，即係冇咁繁忙嘅，喺你話一啲--即係我哋同事--我哋收到返嚟嘅訊息，你話巴士站呢啲違泊嘅情況係較為少嘅，喺我哋自己嘅暫時嘅一啲路。

當然你話反而係個別--一啲好個別，例如去到喺大澳巴士總站嗰度，因為近年都係一路做緊啲工程等等，喺個巴士總站嗰度就即係個上落客個位置就唔係好足夠，亦都本身可能旁邊有啲車，有少少--尤其是係一啲大時大節咁樣，因為有咁禁區紙，即係嗰度可能當區其實係一啲私家車泊位又唔係好足夠，會有少少啲咁嘅情況，但係你話真係--我相信同市區比較，我哋嗰面嘅嗰個情況就唔係咁惡劣嘅。唔該。

黃女士：（經傳譯員）點解我提出呢件事呢？就係因為離島區議會 2016 年 3 月 21 號嘅會議紀錄嗰度，或者睇番第 98 頁中文。

主席：（經傳譯員）邊一度呀？

黃女士：（經傳譯員）DC-1，第 98 頁就係中文，第 143 至到 144 段，英文就請你睇呢個 103-1 嗰一頁嘅，143、144 兩段，呢兩段都係委員會嘅成員提出嘅，佢哋就講到話泊車--違例泊車同埋雙行泊車，呢個都係指呢個達東路嘅，我想問下，你對於呢兩位區議會嘅委員所提出嘅問題，你有咩睇法？

黃焯安先生：主席，我交畀陳先生代我去作答，唔該。

主席：（經傳譯員）請你講。

陳天龍先生：主席，其實喺近年我哋喺東涌營運巴士，都睇到喺達東路其實嗰個交通情況都頗為惡劣嘅，因為嗰度係單向行車，得一條路嘅啫，相信喺區議會裏面嗰啲 member 所提出嚟嘅意見，其實係因為嗰個係一個東涌嘅市中心嘅道路嚟嘅，如果嗰度有擠塞起上嚟，就會成個東涌區都會塞晒嘅，亦都對我哋巴士營運亦都有相當嘅困難，因為我哋嘅巴士站就係喺達東路，變咗有陣時有啲情況可能連我哋架巴士駛出總站都有困難。但係呢一個問題，其實我相信係成個社會個問題嚟嘅，呢個議題其實都喺區議會裏面都存在咗好耐㗎喇。

主席：（經傳譯員）你意思係咪話你哋嘅巴士所面對嘅問題就係話喺總站嗰度都難以開出，呢個都係直接係由於係違例泊車，定抑或係間接係因為違例泊車而引致有交通問題所造成呢？

陳天龍先生：係有間接嘅影響嘅，正如我頭先所講，因為呢條路係非常之繁忙嘅，喺東涌市中心嚟講，其實呢條路只要有 double parking 或者有交通意外發生，就會影響到成個東涌市中心都會擠塞。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）你知唔知道警方就係向運輸署同埋立法會嗰度建議，就話應該喺黑點嗰度就係用呢個相機，即係話喺燈柱嗰度係安裝一啲攝影機，嚟到係應付呢一個巴士總站附近嘅違例泊車，咁樣樣就可以收集到啲證據，你知唔知道有咁嘅建議呀？

黃焯安先生：唔該主席，喺新聞度有睇過呢啲關於呢個建議。

黃女士：（經傳譯員）你歡唔歡迎一個咁嘅提議呢？

黃焯安先生：係。

黃女士：（經傳譯員）咁嘅建議你覺得好唔好呀，歡唔歡迎呀？

黃焯安先生：當然我代表喺公司嘅立場，當然係非常之歡迎，如果係有方法去解決到

呢啲喺路邊嘅違泊。

黃女士：（經傳譯員）好喇，而家講去第二個題目，就關於就係巴士車長嘅紀律處分，我就想請你睇番呢個 NLB-1，呢個第 23 頁嘅，你哋公司就有咁講過嘅，巴士車長如果佢係涉及一啲嚴重嘅交通意外，就會就係唔畀佢繼續揸車住，會暫停駕駛嘅，我想問下，究竟呢個暫時係唔揸車係會維持幾耐嘅呢？

黃焯安先生：唔該主席。喺我哋--應該喺同一個文件嘅第 13 頁，應該呢個螢幕而家睇緊嗰度之後嗰版，我哋都有去講解番當有啲--即係喺第三樣咁嘅情況，當然其實通常如果真係咁不幸發生一啲好嚴重嘅事故，我哋都當然要先--都要花啲時間去調查究竟係同事嘅問題吖，定係唔係佢嘅責任吖，定係--即係係咪佢個責任。而亦都係呢段時間，其實我哋即係雖然係暫停咗佢個駕駛職務，但係我哋都會係繼續支薪畀佢，即係先我哋了解清楚晒成件事，亦都係--因為亦都試過過往有啲情況係可能係發生咗啲好不幸嘅事件，而個車長係自己要求都係想話要停一停，休息一下先，即係想去啲一啲先咁樣，我哋覺得呢一個先叫佢停工，調查咗先呢個安排係有幫助嘅。

黃女士：（經傳譯員）唔該晒，好，或者想請你睇呢個第 23 頁，你就提及到話一啲車長，懷疑佢哋需要係一啲精神上嘅支援，你可唔可以講下點樣可以搵出呢一類嘅車長？即係話嗰啲需要精神上去特別照顧佢嘅車長。

黃焯安先生：唔該主席。喺今天，我哋就唔會話有一個機制或者調查去睇下我哋啲同事佢會唔會有喺你啱啱提到嘅 mental problem 咁樣，呢個都係我相信要好專業嘅人士先至可以畀到呢個意見，而我哋--即係你啱啱講話我哋點去--即係呢啲人係--呢啲同事喺邊度嚟，就都係要等個同事自己主動提出。倘若例如佢係一啲唔係一啲 physically 嘅問題，佢係覺得有啲咩嘢心--即係個心裏面有啲咩嘢唔舒服，想好似搵人哋去傾下偈，去傾訴咁樣嘅，我哋公司就搵咗一個出面嘅機構去合作，就係可以畀我哋嘅同事去打電話嗰度，就去得到一啲專業啲嘅幫助。

黃女士：（經傳譯員）你提及就係一個輔導嘅服務，呢個輔導嘅服務係咪由你公司提供，由你公司支付嘅，畀錢嘅呢？

黃焯安先生：唔該。呢一刻我哋係將呢個服務係有個熱線畀咗我哋嘅同事嘅，而個同事如果覺得有需要，就可以致電去嗰個一個顧問服務熱線咁樣，當佢喺嗰個熱線嗰度去同嗰面個 operator 去傾完，而嗰面佢覺得佢係有需要，因為可能佢都要先篩選下或者了解下個問題係啲咩嘢嘅，佢係覺得佢係有需要係做一啲--即係一啲叫做輔導性質，佢會再將佢轉介去另外一啲再專業啲嘅機構，以上呢啲都係由我哋公司去畀嘅費用，就唔需要我哋嘅僱員去自付。

黃女士：（經傳譯員）你想唔想引入一個系統就係定期評估巴士車長心理、精神上係咪適合繼續做車長？

黃焯安先生：好，唔該。因為本身喺上一次城巴上完嚟委員會之後，我亦都留意到其

實佢有去研究緊究竟合唔合適，我自己就都有去--因為我自己有啲朋友係有去一啲--即係叫做心理學家，咁我都即係先係想去搞清楚其實究竟喺從一個真係叫做話專業啲嘅角度係點幫到我哋呢？即係初步，我諗--不過我哋只係一個好初步咁樣，而我嘅了解到，就係我哋又唔好話會覺得係咁容易會話去搵到話--即係就算心理學家都好，佢都唔會可以話到畀我哋聽有邊啲人係合適定係唔合適去做一個巴士嘅車長嘅。

反而心理學家可能係做咗一啲適當嘅評估之後，佢係可以話到畀我哋公司聽可能呢一個同事佢係喺邊一方面係較為弱，係需要即係有啲--或者係需要一啲額外嘅支援或者協助嘅，就從而係向嗰方面去著手，就唔--即係我相信未必會存在係可以好清一色，好似一個--當係你好似去驗身咁樣，而個醫生可以好清晰咁話到畀我哋聽呢個人係適合揸車定係唔適合揸車咁樣。

但係只係一個好--因為其實頭先我講嘅都係一個口頭上我同--即係我自己嘅一啲朋友去了解嘅，我哋都喺呢一方面，你見到其實我哋自己喺本身都已經係有去--都意識到其實有陣時係同事嘅壓力，尤其是我哋都係較為好日常面對好多唔同嘅人，都了解其實有陣時都要搵啲渠道去畀同事去表達佢哋嘅即係心中嘅一啲壓力嘅，我哋亦都好樂意如果係往後即係繼續會再深入啲了解，如果你話喺心理輔導呢方面，例如係--即係甚至乎你話係一啲入職前去做一啲評估等等，係咪真係有幫助呢？都要真係再了解下先。

或者你話定期嘅去有啲嘅抽查一啲同事咁，但係因為呢一方面就我哋暫時未真係掌握太多資料，就唔能夠話去有個好確實嘅答案，不過就要再研究一下先。

黃女士：（經傳譯員）而家講就係呢一個薪酬同埋福利，我想請你睇你自己嘅文件NLB-1，17同埋21頁，17頁，第二段，由屘數上，你公司就話就係要提高你哋公司個職位嘅吸引力去吸引車長，就會有一個嘅薪酬同埋待遇嘅調整。我想請你睇第21頁，上面就講咗你哋公司嘅薪酬待遇，呢個係調整之前定之後嘅事嚟㗎？

黃焯安先生：請問你講嗰個adjustment係講緊幾時嘅，即係邊個，咩嘢嘅adjustment？

黃女士：（經傳譯員）我提及嘅就係你公司嘅意見書，第17頁屘數上第二段第三行，上面就提及過，就係“wages and welfare package adjustment”，薪酬同埋福利嘅待遇調整...

主席：（經傳譯員）你成段讀，成句讀。

黃女士：Yes。（經傳譯員）佢就話「為咗提升我哋職位嗰個吸引力同埋挽留現有嘅車長，除咗就係調整薪酬同埋福利，我哋公司就係發展緊一啲嘅措施，就係包括就不限於係以下嘅一啲項目，以提高工作嗰個嘅滿足感嘅」，呢個就係我所提及嘅嗰個調整。

黃焯安先生：唔該主席。喺呢個薪酬嗰個表嗰度，就係 2017 年 7 月份嘅，今年就未做呢個調整。至於頭先嗰句，即係你啱啱--黃小姐提到嗰個 adjustment，即係嗰個成個安排就係喺頭先嗰段後面就有幾樣--有幾個措施，就係即係我哋除咗喺 take-home pay，即係佢真係喺個薪酬嗰度，另外我哋就去加強咗啲係希望--我諗主要係講緊後面呢度，你話本身佢哋嗰個--上面嗰個表嗰個人工就係 2017 年 7 月到暫時為止，我哋都而家一路喺度都準備緊 2018 年嗰個人工，就都而家準備緊，睇下--即係未--都仲傾緊都係個加幅嗰度。

黃女士：（經傳譯員）呢個係幾時決定 2018 年嘅加幅呀？

黃焯安先生：唔該，本身我哋正常嚟講，就係 7 月 1 號嘅時候加人工嘅，今年個情況就我哋本身喺 4 月初嘅時候就公布咗會發放一個一次性嘅特別獎金先嘅，因為我哋其實係留意到喺個市場度其實另外兩間巴士公司喺 2、3 月嗰陣時咁上下，佢哋就--應該 3 月份嘅時候，就佢哋將一個佢哋薪酬度有啲--個架構有啲改變咗，就我哋擔心如果我哋等到 7 月份先至加人工，就會同佢哋嗰個距離太遠，就所以我哋喺 4 月份就有個一次性嘅--有個咁嘅安排，就去到 9 月底嘅時候發放。

至於 2018 個人工，我哋呢一刻就都係正常，其實每年都係會同工會嗰面去商討，第一；亦都係我哋自己睇番我哋自己公司嗰個情況，同埋其中一樣，我哋都會係有個指標性去參考，就係因為我哋嗰個規模就係最細嗰間，我哋都會係睇番市場另外兩間主要嘅公司，睇一睇佢哋嗰個大概個加幅係點樣嘅，我哋又再去--即係都有啲參考作用。

因為今年--其實今日已經係 6 月 19 號，暫時嚟講，我哋睇可能都係會--應該希望喺 7 月份、8 月份咁上下做到，如果你話過咗 7 月 1 號嘅，我哋就會--即係往時都係叫追加番咁樣。唔該。

黃女士：（經傳譯員）可唔可以畀一個更新咗嘅表，即係你喺做咗 2018 年嘅覆核之後，畀番一個更新版本我哋？

黃焯安先生：當然可以。

黃女士：（經傳譯員）如果我哋睇番個表，可以見到薪酬待遇，有大部分，即係車長嘅月薪，大部分似乎係來自一個每日嘅值日津貼嘅，即係第 2 項，你同意嘛？

黃焯安先生：係。

黃女士：（經傳譯員）每個月有幾多日車長係需要工作嘅呢？

黃焯安先生：唔該，就平均而言，就二十四至二十五日。

黃女士：（經傳譯員）大概計到就係五千五百零釐嗖，即係二十四日嘅值日津貼的話，如果車長係病咗，係咪佢唔會得到呢一個--呢項嘅津貼㗎喇？

黃焯安先生：係，請問你係咪講緊第 2 項嗰個 duty allowance？

黃女士：（經傳譯員）冇錯。

黃焯安先生：如果嗰日個同事個車長係冇上班，就唔會攞到個 duty allowance。

黃女士：（經傳譯員）譬如如果佢係病咗三日，就會失去七百零蚊，係咪呀？大概700蚊喽，假設就係一日$230。

黃焯安先生：係，thank you，Chairman，係，確認，如果嗰個同事係假設你啱啱講嗰個例子，佢係三日病咗，冇上到班，係，嗰三日嗰個 duty allowance 係唔會攞到。

黃女士：（經傳譯員）第4項嗰個勤工獎，就係每個月咁計？

主席：（經傳譯員）未講呢樣嘢之前，個失去咗嘅值日津貼，即係每一日$230 就係逐日計，定係佢成套嘅值日津貼冇咗？

黃焯安先生：如果係講緊個 duty allowance，我哋係逐日去計算畀個同事嘅，佢一日--即係佢例如係叫做佢係嗰日--嗰個月佢有二十五個工作天，嗰個 duty allowance 就係用$230 乘以25咁去計算，如果佢係咩嘢緣故都好，而佢係少--即係叫做係嗰個日數係少咗嘅，個收入就會係用番$230 乘番幾多日咁去減少咗。

主席：（經傳譯員）即係如果佢二十五日裏面有一日冇返工，只係喪失 230 蚊嘅，即係嗰日嘅津貼啫，係咪呀？

黃焯安先生：如果係用第2種嘅 duty allowance 嚟講，係。

主席：（經傳譯員）唔該。

黃焯安先生：係，唔該。

黃女士：（經傳譯員）勤工獎呢？750 蚊就係月計嘅，如果佢病咗三日，會唔會扣咗--即係會按比例咁樣扣番呀？

黃焯安先生：唔該主席。喺嗰個講到去呢個 attendance bonus 呢度，本身係我哋呢個中文係叫做勤工服務獎，係每月去發放畀個同事嘅，如果佢係有--即係冇上到班，第一日就會係少發兩百蚊，第二日就少發$250，第三日就少發$300，如此類推，就如果佢三日--即係咁樣，你將佢加埋，三日就係 750 蚊就唔會發畀個同事，個獎金，即係三日都個同事係冇上到班，呢個 attendance bonus 都係唔會發畀個同事嘅，變咗，如果佢一日，就係$200。

黃女士：（經傳譯員）如果我計得啱，如果車長係病咗三日，總共就會喪失 1,500 蚊，我咁樣講，計得啱唔啱？$750 加$750。

黃焯安先生：唔好意思，主席。係，確認，如果嗰個同事佢係三日--如果佢三日冇上到班，就會係好似頭先咁講，喺 duty allowance 嗰度有 690 蚊嘅扣減--唔

係扣減，即係少發咗。同埋就係喺 attendance bonus 嗰度又$750 亦都係唔會發畀個同事。唔該。

黃女士：Now would this -- sorry.

主席：（經傳譯員）歐陽先生。

歐陽先生：（經傳譯員）我咁樣講，就係話值日津貼同埋勤工獎服務都係同一個目標，就係希望鼓勵嗰啲員工係儘量都返工嘅？

黃焯安先生：唔該歐陽先生，如果回應你嘅提問，我哋去--好似你咁講，去訂立呢個 duty allowance 嗰個用意係想同事係積極啲去工作，呢個第一；第二，你話去--因為嗰個勤工獎嗰個其實佢有個變化嘅，本身以往係即係同安全獎都係，其實係一個--當然嗰陣時我唔係好--即係呢一刻我都可能都要搵番啲舊啲嘅資料，可能以前係一年發一次或者發兩次咁樣嘅，但係慢慢因為同事都反映番，如果咁樣，要等太耐，第一，呢個獎金要去到一年或者半年先攞到，就變咗季度，季度再久而久之轉咗就月發，就咁樣。

好似你咁講，如果你話嗰個--我哋個目的係咩嘢呢？的而且確我哋當然就係想我哋嘅同事係即係積極去工作。驟眼睇，都你可以話佢哋嗰個出發點係相近。

歐陽先生：Okay，thank you，thank you。

黃焯安先生：唔該。

歐陽先生：Thank you，Ms Wong。

主席：（經傳譯員）所以個答案係即係簡單嚟講，就「係」喇？

黃焯安先生：（經傳譯員）係，冇錯。

主席：（經傳譯員）黃律師。

黃女士：（經傳譯員）呢個唔係唯一嘅獎金就係鼓勵嗰啲同事係工作嘅，如果你睇番第 6 項，關於休息日嘅津貼，車長就會係每一日嘅工作日就係 625 紋嘅，如果佢哋喺休息日都工作，佢哋就會獲發 625 紋，係咪呢？

黃焯安先生：係，我諗喺度都想講一講我哋背後嗰個理念，可能講出嚟會--希望個字眼表達得可以好啲，因為本身--正如我頭先咁講，我哋嘅主席黃良柏先生佢從事咗交通運輸行業係好多年，而佢亦都有個較為--即係佢覺得係一個實際啲嘅想法，當如果我哋一啲咁基層前線嘅同事，如果佢想去喺嗰個你啱啱講嗰個 rest day 嗰個--其實呢$625 係另外去發畀啲同事，即係佢會本身嗰日已經係有當天嘅 duty allowance，另外再發嗰個$625 畀佢嘅，係因為佢知道如果嗰個同事，例如佢係嗰個月 suppose 佢原先佢應該要返廿五日工，變咗佢肯額外返多一日，返第二十六日咁嘅，打個比喻，當然就係正正個同事犧牲咗佢嘅

休息嘅時間，而我--如果倘若我哋唔去叫做畀一個 rest day allowance 嗰個同事，可能嗰個同事只係會--因為其實喺出面其實要去搵一啲兼職揸車嘅工作，其實都市場上有好多嘅，包括可能喺出面揸貨車、的士等等，我哋公司嘅諗法就係覺得倒番轉，與其係咁，不如我哋畀個好啲嘅叫做少少回報咁樣去畀我哋同事。

正如我哋再之前有提及到，其實我哋同其他巴士公司比較，係多咗五日嗰個假期，其實嗰五日假期，好坦白講，好坦白講，個同事其實未必--因為我哋會係容許個同事去選擇放假，有啲同事佢不嬲都係冇放開咁多假嘅，可能佢會選舉去寧願係想工作嘅，佢就變相喺呢度都係一個加咗人工畀個同事咁樣。唔該。

主席：（經傳譯員）羅教授。

羅先生：（經傳譯員）關於休息日嘅呢度，其實我哋--你係邀請嗰個車長係去工作，還是個車長自己要求呢？譬如話我係有一日係放咗病假嘅，我就喺番我嘅休息日去工作番，我咪彌補番囉咁樣，會唔會係咁呢？

黃焯安先生：好，唔該晒教授。本身如果個同事佢係--例如佢想話休息--即係少一日休息咁樣，佢想話嗰日去開車咁嘅，當然要實際睇番佢幾時同公司申請，即係如果佢例如係無端端話聽日畀人哋--約咗人，人哋俗啲咁講，放咗佢飛機，唔知應該點可以簡單講，就佢突然間話佢冇嘢做，想開番工，我哋都要實際睇番究竟我哋有冇需要，通常嚟講，即係咁嘅情況，其實就都唔會有工作畀佢做，即係咁即時，因為本身我哋其實嗰個更分係編好晒。當然我哋亦都係再睇番其實我哋自己運輸署嗰個 guidelines，睇下佢有冇話--亦都睇番實際情況，佢有冇超咗工作時間等等，呢一類型。唔該。

黃女士：（經傳譯員）好，總結嚟講，就係呢個咁樣嘅工資嘅結構，就會令到嗰啲車長會係就工作長啲時間，甚至乎當佢病嘅時候佢都想工作呢？

黃焯安先生：我諗首先，要睇下你講話“he was sick”，即係佢唔舒服嗰度，究竟佢係真係非常之唔舒服而係唔適合駕駛，定係佢有少少唔舒服都仲可以駕駛，因為我哋相信我哋今日呢個制度就係倘若嗰個同事佢係有少少唔舒服嘅，因為你話 sick 都可以係睇下嗰個程度去到邊，如果本身佢真係都唔適合駕駛嘅，佢當然係唔能夠話就算佢唔想去休息，佢都係--即係佢都不能駕駛，佢都唔可以去開車㗎。

同埋我哋--當然我哋自己個信念本身嘅核心，就係覺得多勞多得，因為我哋呢個係一個服務性嘅工種，當然可能我哋裏面都係有啲例如新嚟見工、入職嘅同事有反映話好似好複雜，有陣時我哋都要花好多唇舌去計算畀個同事，但係當然我哋嗰個希望最緊要做到出嚟嘅就係真係畀到一啲勤力嘅同事，佢哋係用心去做嘅同事，佢哋係攞到佢哋應有嘅薪金，就係我哋嗰個目標係咁樣。

黃女士：（經傳譯員）好，我就想去另外一個課題，就係關於乘客嘅表現，我哋聽到

其他嘅巴士公司就佢哋話一啲車長係曾經係同呢個顧客嘅行為係有問題，就係有困難嘅，你哋有冇係有收過類似嘅投訴呢？

黃焯安先生：主席，我交畀黃焯添先生去作答。

主席：Yes, Mr Wong.

黃焯添先生：唔該主席。頭先 James 都有講到，我哋嘅服務係相對比較地區性，我哋大部分嘅路線都係圍繞住喺東桶區或者嶼南區嘅，所以大部分平日嘅乘客都會係一啲本地嘅住客，我哋嘅同事或者係車長、站長都基本上係每日都見到呢啲乘客嘅，所以我哋遇到呢啲所謂爭執或者係投訴係相對地較少。

另外我哋最主要另外一個收入嘅來源或者係客路就係旅客。旅客相對地嚟講，因為佢哋本身嚟嘅 intention 都係遊覽香港，佢哋比較少會係遇到呢啲爭執嘅問題嘅；相反之，我哋喺前線嘅站長遇得比較多問題嘅就係可能喺車上可唔可以攜帶行李或者係如果入大嶼山嘅話，可唔可以帶一啲 surfing board、單車，呢啲我哋喺前線嘅站長嘅處理都儘量係會同啲乘客講如果太大件嘅，亦都唔可以攜帶上車。如果可以嘅，我哋一啲旅遊巴係有一啲行李櫃可以放到入去嘅，我哋都儘量會幫啲乘客去放入去。所以對於我哋公司嚟講，呢一類型嘅爭執係比較少見。唔該主席。

黃女士：（經傳譯員）其中一個就安全嘅設施，喺你哋嘅巴士，就係有閉路電視--喺嗰個司機位嗰度就係有閉路電視係有錄影嘅功能嘅，呢度有冇一個嘅錄音系統嘅呢？

主席：（經傳譯員）你可唔可以話畀我聽喺邊度，喺個陳詞度？

黃女士：（經傳譯員）第 20 頁嘅。

主席：（經傳譯員）好，唔該晒。

黃女士：（經傳譯員）就關於嗰個安全裝置，就喺佢哋嘅文件冊第 2 號嘅第 453 頁嘅。

主席：（經傳譯員）你可唔可以講一講第 20 頁嗰度？

黃女士：（經傳譯員）係，喺呢一個嘅閉路電視都可以實時嗰啲資料抽取，就可以去監察車長同埋乘客嘅情況，特別係喺一啲安全同埋緊急嘅情況有關嘅情況。

主席：（經傳譯員）第 453 頁嗰度呢。

黃女士：（經傳譯員）喺第 16 項嘅安全裝置。呢個嘅閉路電視系統又或者呢個攝錄機佢哋有冇一啲錄音嘅功能？

黃焯添先生：先解釋番有啲邊類型嘅鏡頭先喇，我哋有兩款嘅巴士嘅，第一款就係單層巴士，另外一款係雙層嘅。先講雙層，我哋新買番嚟嘅雙層巴士都會有配備

到CCTV嘅功能嘅，剛才你嘅問題係audio，有audio function嘅都會係只係放喺司機頂頭上面嗰個，司機頂頭上面嗰個。至於我哋一啲現有嘅巴士，existing嗰啲單層巴士，我哋暫時係未裝CCTV嘅，因為要retrofit呢啲CCTV嘅鏡頭係需要好多時間，同埋其實本身呢一個系統係需要一啲叫recurring cost，就係我哋每個月都要畀一啲可能monthly fee，相比起現時我哋嘅財政嘅--即係我哋financial burden，我哋未有咁樣嘅方向，每一部車會retrofit CCTV，但係新車我哋係會積極考慮裝晒。

黃女士：（經傳譯員）你剛才提及個閉路電視係錄音嘅功能，就係會擺喺車長個頭頂嘅，嗰個目的係乜嘢呢？

黃焯添先生：個錄音嘅裝置最主要係當有一啲乘客有投訴或者係喺我哋嘅CS hotline係講番同司機有爭執嘅情況，我哋先至會攞番呢啲嘅數據出嚟去睇番件事係點樣嘅。本身我哋自己唔會主動去retrieve呢啲--唔會主動去攞番呢啲嘅file去睇嘅。

黃女士：（經傳譯員）你即係被動，就話如果係有投訴，你哋先至會睇，所以你就唔會話係抽查嘅，係咪？

黃焯添先生：係，冇錯。

黃女士：The next topic is the design of buses and safety devices and if I may invite you to go to NLB-2 bundle at page 2. The franchise agreement starts at page 2. If we go to page 5, clause 7.

主席：Sorry, which bundle is this?

黃女士：This is the NLB-2 bundle. Could you familiarise yourself with the provisions of clause 7(1) at page 5. It makes reference to the grantee providing, amongst other things:

> "... such safety or service enhancement facilities, installation, fixtures, fittings, [et cetera] ... apparatus or equipment on its buses as may be reasonably required by the commissioner of transport after consultation with the grantee."

So, in other words, （經傳譯員）運輸署署長嘅要求同埋就係係經過諮詢過專營公司，所以就係運輸署署長就係可以有合理咁樣去係要求你哋係裝置一啲可以提升服務質素嘅設施嘅？

黃焯安先生：係。

黃女士：（經傳譯員）最近你有冇同政府有討論關於係點樣係裝置一啲提升服務嘅設施呢？

陳天龍先生：主席，我想交代，就係其實我哋喺同運輸署傾新 franchise 嗰陣時，都有一啲 facilities 運輸署要求我哋 provide 嘅。另外喺最近我哋同運輸署嘅會議上面都有講到一啲安全嘅設施係安裝喺啲巴士上面嘅，呢個我哋都有同運輸署有討論。

黃女士：Can you tell...

主席：（經傳譯員）請問係幾時呢？

黃焯安先生：新嗰個專營權，我哋係講緊喺 2017 年嘅時候正式去實行嘅，當然嗰陣時去傾，我哋要睇番啲資料先，但係約略係 2015 年底、2016 年頭嗰陣時開始去同運輸署接觸，要去--即係有啲咩嘢再喺新嗰個專營權嗰度去加強。至於頭先啱啱陳生提到嗰個一啲關於同署方嗰面去傾關於一啲安全嘅設施嗰個會就係喺最近呢幾個月開過兩次會，喺最近呢幾個月開過兩次會，嚟緊會開第三次。

主席：（經傳譯員）幾時開呢啲會嘅呢？

楊家寶先生：主席，有少少補充一下，嗰個會議應該係有三次咁多嘅，就係就呢個獨立調查委員會之後成立嘅第二個工作小組，第一次會議就係喺 3 月 27 號，第二次喺 5 月 30 號，第三次喺 6 月 12 號嘅。

主席：（經傳譯員）呢啲會議就係專營巴士公司、巴士製造商同埋運輸署係出席嘅會議嚟嘅，係咪呀？啱唔啱呀？

楊家寶先生：Correct，係。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）你有講過話一啲安全嘅裝置，其實你哋係同運輸署係討論過邊一啲嘅係安全嘅設備呢？即係你頭先提及三次會議，係講及邊一啲嘅安全設備呢？

主席：（經傳譯員）或者暫時可以係唔答呢個問題住，我諗我哋起碼都要係做到五點半，不如而家作一個小休，我諗我哋都要畀少少時間你休息，我哋而家休息十分鐘，唔該，休息十分鐘。

下午 4 時 32 分聆訊押後

下午 4 時 41 分恢復聆訊

出席人士如前。

主席：（經傳譯員）黃律師。

黃女士：（經傳譯員）不久之前，黃先生，我哋剛剛就係畀你睇咗 TD-1 第 98 頁，TD-1 第 98 頁。

主席：（經傳譯員）呢份文件係咩嘢文件嚟㗎？

黃女士：（經傳譯員）呢份文件就係運輸署嘅文件嘅，文件 7 號，嗰個標題就係話係專營巴士公司，喺 81 頁嗰度開始嘅，就係「車輛安全 – 設計建造、檢查同埋驗車」嘅，我哋就想睇番呢個第 98 頁嘅，就係使用科技嚟到就係加強專營巴士嘅安全。

主席：Thank you.

黃女士：Thank you。（經傳譯員）黃先生，想問下，你剛才有冇時間就係睇一睇呢一份文件，特別係第 10 段呢？

黃焯安先生：係，睇咗。

黃女士：（經傳譯員）呢啲嘅安全裝置係咪就係你哋同運輸署喺嗰三次會議裏面所提及、所討論嘅安全裝置呀？

黃焯安先生：係，係嗰啲三個安全會議嗰度係有討論過上述嘅一啲儀器。

黃女士：（經傳譯員）我想請你就係特別睇其中嘅三項嘅，首先就係呢個地理圍欄，即係(c)嗰項，就話靠呢個係全球定位系統或者係地理圍欄嚟到控制嗰個車速。可唔可以話畀我哋聽關於運輸署呢一個建議，即係話要引入呢一個地理圍欄，換句話講，就係使用呢一個全球定位系統，嚟到去限制巴士喺某一啲路段上面嘅車速，你哋個睇法係點呀？

黃焯添先生：主席，要去討論呢個 GPS system，我諗我哋要先帶出個黑盒個 background 先，因為早喺 2015 年同埋 2016 年，喺我哋討論我哋新嘅專營權嘅時候，我哋有去特別搵咗一個新嘅黑盒嘅提供嘅 supplier 嘅，最主要其實之前主席都有講過，其實 GPS 唔係一個好新嘅技術，但係對於我哋營辦商嚟講，我哋最重要同埋要長遠考慮到就係必須要將呢啲 GPS 同埋本身黑盒攞到個數據要以 raw data 嘅形式去上傳番去我哋本身公司嘅 server 嘅。

喺 2012 年至 2015 年嘅時候，其實我哋本身係有另一個黑盒嘅 supplier，但係好多市面上呢啲嘅公司佢哋係以一個 recurring 嘅方式去做一個 monthly cost 嘅 maintenance，對於我哋公司長遠嘅發展，因為其實喺 16 年點解會採購黑盒呢？當然黑盒本身嘅功能係好緊要，另外就係當時我哋新嘅專營權底下，我哋要做一個叫做 ETA 嘅功能，即係實時到站嘅功能，當時

我哋睇咗兩間公司之後，選擇咗而家我哋嘅 supplier，係 Openmatics，呢間公司佢哋嘅 GPS 同埋本身一啲 raw data 嘅數據係可以上傳上去我哋嘅 server 嘅。

講到用 geo-fencing 去監察或者係去限速，呢個我哋係 open-minded 嘅，即係我哋係希望會可以嚟到將來可以研究到一個方式，喺我哋一個特定嘅路段去做呢一個限速嘅。喺度咁講，即係相比起其他嘅營辦商，我相信我哋做到嘅機會亦都會較大，因為本身我哋大嶼山嘅道路相對係少啲 interference，我哋嘅黑盒係可以應該做到容易啲--或者係容易啲將呢啲準確啲將啲 GPS 嘅數據可以上傳到我哋 server。

但係最主要一樣嘢就係將呢一個 GPS 嘅數據實時去同我哋本身架車嘅電腦去做到個配合，呢個係需要時間去研究，最主要係現時我哋嘅黑盒係會直接駁落去車嘅電腦，即係簡稱“bus CAN”。呢一個嘅動作係需要去同車嘅製造商有啲嘅合作去傾嘅，我哋就當然係好 welcome 呢一個新嘅方向去做，但係以我哋而家暫時大嶼山巴士嘅 IT 部門嘅規模，我哋可能係會比起其他公司可能要花多少少嘅時間去做呢一個嘅研究工作，但係絕對係歡迎去做呢一樣嘢。

黃女士：（經傳譯員）既然我哋都係講緊呢個黑盒，我哋而家講緊個黑盒，我就想請你睇番你哋嘅陳述書 NLB-1 第 14 頁，屘二嗰段，喺嗰度就講咗，「透過我哋內部嘅資訊科技嘅隊伍，我哋係計劃係會發展一個例外報告嘅系統，呢個就係使用就係車上嘅黑盒嘅數據嚟到去產生呢啲報告，就係主動咁提出啲報告，嚟到睇下有邊一啲車長就係佢駕駛嘅習慣係唔好，會引致問題嘅。」

另外就想睇下呢個第 20 頁，就係你哋嗰個陳述書嘅第 20 頁，係屘二嗰段嘅，呢度就話「喺呢一個 2017 年尾有第二代嘅黑盒製造引入咗之後，佢就係會就係最低嗰個層次嗰度有一啲原數據嘅。另外有進一步嘅應用，就譬如話喺一啲例外報告，呢啲就係冇包括在內嘅，即係話車速嘅例外報告就冇嘅，而家我哋就內部就想發展一啲軟件，嚟到提供呢一類嘅資訊，就畀我哋監察住車長嘅表現，目前我哋而家喺度檢視緊同埋綜合緊嗰啲數據嘅，就人手去做嘅，即係如果有交通事件或者有乘客投訴，就會咁做。」

我咁樣理解啱唔啱呢，目前嚟講，你公司係冇一個超速嘅特別報告--自動產生呢啲特別報告嘅功能？

黃焯添先生：呢一刻係冇嘅，但係我哋寫呢份 supporting document 係考慮到嚟緊嘅將來我哋係會加呢一個 exceptional report，係特別喺 over speed 方面，我哋會做多啲工作嘅。

黃女士：（經傳譯員）我想請你睇番 NLB-1 第 33 頁，第一格右手邊有關於委員會進一步嘅問題，係要求你哋提供資料，你喺呢度就話「睇番現有嘅黑盒系統可以記錄到幾個巴士運作嘅資料嘅，包括地理位置、速度、方向檔次、門、有冇人撳鐘等等，係要秒計嘅，如果需要記錄同埋係使用呢啲咁大量嘅數據，係需要大量嘅資金投入有關於呢一個資料傳送同埋儲存同埋要有一個好先進嘅軟件

嘅。」有關於呢一個大量嘅資金投資，你公司係咪願意投資喺呢一方面嘅系統裏面呀？

黃焯安先生：係，唔該主席。喺財務方面，因為我哋喺咁多間巴士公司嗰個規模就最細，當要去發展呢啲軟件或者係一啲新嘅系統，其實需要到嘅嗰個成本，坦白講，不論係一部車同一千部車，其實嗰個發開成本，我相信係唔會睇得太遠嘅，嗰個主要嘅分別就可能喺嗰個硬件，即係喺架車上面嗰個硬件個分別啫，變咗係當我哋嚟緊要去繼續去加強我哋喺呢方面嘅投入，不論頭先 Timothy 提到嘅喺嗰個 exceptional report 等等，呢啲我哋係好樂意去投入嘅，但係都希望係即係會各位係了解，就係當我哋要去做呢啲嘅時候，其實我哋每用--如果你按每部車咁去計嗰個成本，就一定會係比起其他公司係高出好多。

黃焯添先生：同埋我想補充，其實現時我哋嘅投資係投資咗喺啲咩嘢度呢？尤其最主要係兩方面嘅啫，第一方面就係 hardware，喺車上面嘅黑盒，同埋黑盒上傳數據去我哋公司上面嘅 server，呢兩個最主要嘅 hardware cost；另外一啲 software 嘅，就係剛才講到，我哋買呢個黑盒去做一個 back-end system 個 software development fee，本身我哋喺個新專營權度講到要我哋用嘅 ETA 嘅 development fee，每個月巴士--呢啲數據嘅上傳嘅數據費用，呢啲都係一啲 recurring cost 嚟嘅，因為本身要去 maintain 同埋去維繫呢一個系統都需要人力去做嘅。

剛才講到話呢一個黑盒係可以每秒去記錄呢啲嘅數據，但係現時我哋嘅系統係每三十秒，集晒所有數據，每三十秒上傳一次，當如果我哋改到每一秒上傳一次，其實嗰個數據嘅費用同埋本身個 server 個 size 都要相對地係提升，所以講到話會有個 capital investment，其實就喺呢一方面上面係最主要嘅，當然就係本身我哋嘅 software development fee，係主要呢兩方面。唔該主席。

黃女士：（經傳譯員）唔該晒。你提及呢個軟件嘅發展費用...

主席：（經傳譯員）唔好講呢樣嘢之前，你話有兩個元素，一個就係黑盒，另外一個就係軟件，我咁講啱唔啱？

黃焯添先生：（經傳譯員）啱。

主席：（經傳譯員）黑盒嘅大約成本係幾多？

黃焯添先生：（經傳譯員）當我哋喺 2016 年開始採購嘅時候，每一件--每個單位就係 800 歐羅一件，大約八千零釐港紙，係 2016 年嘅事。

主席：（經傳譯員）呢一個係咪最大嘅成本呢？

黃焯添先生：（經傳譯員）係呢一個主要嘅成本，係。

主席：（經傳譯員）軟件呢？

黃焯添先生：（經傳譯員）目前我哋有三位人員去負責維護呢個系統嘅，有關於嗰個係預計到暫時間嘅發展費用，大概係要一百萬港元。另外有一個事項，我都想提一提，就係安裝費用，安裝費用係關於黑盒嘅，呢個係一啲要有一啲高技術嘅專業人士，呢類嘅技術人員去安裝，需要將佢係同個供應商係連繫，供應商係來自捷克嘅。

主席：（經傳譯員）呢個就係 Openmatics 呢間公司？

黃焯添先生：（經傳譯員）冇錯。喺 2016 年嘅時候，我哋係冇請到自己公司嘅技術人員嘅，每架巴士嘅安裝費大約係要 4,000 蚊港元。

主席：（經傳譯員）係要去 4,000 蚊？

黃焯添先生：（經傳譯員）係呀，睇下係公司裏面有幾多架巴士係提供去安裝黑盒。

主席：（經傳譯員）你講過話係軟件就有三項，安裝呢個--預計到站時間嘅要求，仲有另外嗰兩項係咩嘢嚟㗎？

黃焯添先生：（經傳譯員）你指係另外嗰兩位人士呀定係...

主席：（經傳譯員）另外兩位人士，係咪呀？

黃焯添先生：（經傳譯員）係，另外兩位人士，即係人員。

主席：（經傳譯員）另外兩位係咩嘢人？

黃焯添先生：（經傳譯員）總共有三個人員係請咗嚟去發展呢個軟件嘅。

主席：（經傳譯員）即係有三個人佢哋嘅費用，你所指人頭就係呢個意思，係咪呀？

黃焯添先生：（經傳譯員）係。

主席：（經傳譯員）唔該。黃律師。

黃女士：（經傳譯員）早前你提及你間公司計劃發展呢個特別報告系統，就會係如果巴士車長係有一啲潛在危險行為，就會發出呢個特別報告嘅，你預期係幾時會做呢？

黃焯添先生：（經傳譯員）第三季，2018 年嘅第四季。

黃女士：（經傳譯員）即係今年嘅較後時間？

黃焯添先生：（經傳譯員）係。

主席：（經傳譯員）係呢個超速嘅特別報告系統係 2018 年嘅第四季？

黃焯添先生：（經傳譯員）冇錯。

黃女士：（經傳譯員）我哋聽過其他巴士公司，就定咗一啲嘅標準，就係話係車速超

過每一段路段，係每小時過咗五公里，譬如話連續係十秒超過喺一段係限速 50 公里嘅路段，行駛 55 公里，就會係用到呢個嘅系統喇，你哋公司定咗咩嘢標準使用呢個自動發布報告嘅系統呀？

黃焯添先生：（經傳譯員）我哋要確認一下嗰個條件係乜嘢，我哋要同工會傾過先有最後決定，但係另外嗰兩間巴士公司做嘅嘢，我哋都會考慮。

黃女士：（經傳譯員）你問公司會唔會考慮呢個實時係只係同車速有關，定係會考慮埋車長其他嘅問題，譬如話突然耷車，過份係加速，會唔會都包埋喺裏面呢？

黃焯添先生：（經傳譯員）目前我哋考慮超速係發布報告嘅條件，另外大力剎車、扭軚扭得太犀利，呢樣我哋會進一步再研究。

黃女士：（經傳譯員）你會唔會考慮--你一個實時嘅資料可以利用嚟監察某一啲嘅車長嗰個駕駛行為嘅，即係如果發生啲咁嘅事嘅時候？

黃焯添先生：（經傳譯員）我哋會考慮，但係我哋要同工會傾一傾，因為呢個係有關於話會影響到車長嗰個嘅集中度嘅，如果太多警報系統的話。

黃女士：（經傳譯員）講番第 14 頁你哋嘅交嚟嘅資料，第 14 頁，...

主席：（經傳譯員）未講之前，呢個係超速嘅特別報告，你係打算 2018 年第四季推行，呢個係咪實時做嘅呢，定係話之後事後先至會發出報告㗎？

黃焯添先生：（經傳譯員）實時嘅。

主席：（經傳譯員）呢個系統以我所理解，係每三十秒就上傳一次資料嘅，係嘛？

黃焯添先生：（經傳譯員）目前嚟講，係，我哋希望可以做到從黑盒每秒上傳資料。

主席：（經傳譯員）你講過其實如果要咁做，係有更高成本，呢個成本係乜嘢呀？

黃焯添先生：（經傳譯員）淨網絡費用就需要多啲嘅寬頻，而家係每三十秒，因為所有資料全部都係壓縮咗先至上傳去我哋嘅伺服器，所以我哋就係暫時做都係每三十秒。

主席：（經傳譯員）你知唔知道大概額外嘅費用係幾多？

黃焯添先生：（經傳譯員）唔知。

主席：（經傳譯員）冇，連一個範圍都冇？

黃焯添先生：（經傳譯員）每架巴士 100 港元。

主席：Per what?

黃焯添先生：（經傳譯員）每個黑盒計。

主席：Thank you.

羅先生：（經傳譯員）每個月呀？

黃焯添先生：（經傳譯員）係，每個月。

黃女士：Thank you. And...

主席：（經傳譯員）唔好意思，未講第二啲嘢之前，你有冇同運輸署講過關於成本嘅問題？

黃焯安先生：應該就冇，冇。

主席：（經傳譯員）因為我哋睇番一啲儀器嘅清單，就係呢一個今年 3 月傾過三次，其中一樣，嗰六項裏面冇講嘅，就係黑盒，即係行車紀錄儀，但係你哋有傾過嘅，係咪呀？

黃焯添先生：（經傳譯員）唔喺呢個表上面，但係我認為所有嘅巴士公司都有安裝。

主席：（經傳譯員）呢上面冇記錄到嘅，但係有冇傾過呢？

黃焯添先生：（經傳譯員）有間接傾過黑盒，呢個就係同講呢一個地理圍欄嘅時候提到嘅。

主席：（經傳譯員）呢個議程係邊個定㗎？

黃焯添先生：（經傳譯員）運輸署。

主席：（經傳譯員）唔該。黃律師。

黃女士：（經傳譯員）睇番第 14 頁你哋自己嘅文件，頂數落嚟第三段，最屘嗰句，「目前就係隨意揀選五十程嘅黑盒資料，就會每個月去攞到，而呢個隨機嘅檢查報告係會發送畀運輸署畀佢哋作紀錄嘅。」呢一個嘅 2018 年 3 月。我想問先問，呢度講就話揀咗就係隨機五十程嘅，邊個揀㗎？

黃焯安先生：係我哋公司去揀，我哋公司去選擇。

黃女士：And what is...

黃焯安先生：同埋係五十個 trips，唔好意思，sorry，五十個 trips。

黃女士：（經傳譯員）選擇呢五十個車程嘅條件係乜嘢呀？

黃焯安先生：隨機去揀，random。

黃女士：（經傳譯員）如果你間公司有檢查任何嘢嘅話，係檢查啲乜嘢呢？喺呢個報告裏面，譬如話超速或者有冇任何資料你可以畀到我哋嘅呢？

黃亮霆先生：主席，個資料就係我哋响第二次個 submission 入面嘅 annex 最屘嗰

一版，就有一個報表嘅，就係關於抽查呢啲黑盒嘅數據。

黃女士：（經傳譯員）呢個係第2號文件嘅487頁。

黃亮霆先生：係，就係螢光幕而家顯示緊呢個報表，我哋就因應番運輸署嘅要求，就係抽查正話我哋提--見到個段落所提及嘅隨機抽查五十班車嘅黑盒嘅數據，入面就喺嗰個格仔入面都有提到，就係睇啲咩嘢呢？就係睇個車速、佢有冇做過hard brake 嘅動作，或者其他有啲唔正式嘅駕駛嘅行為嘅，喺呢個報表度就我哋淨係就報告番我哋抽查嘅數量，有幾多係正常或者唔正常嘅，至於就話入面會唔會細睇究竟每一單個抽查入面嗰個譬如咩嘢時間、咩嘢位置、究竟發生啲咩嘢，個 raw data 就喺呢個報表入面就冇要求到我哋要同時去遞交嘅。報告係咁多，唔該。

主席：（經傳譯員）你點樣去釐訂或者界定乜嘢叫做「突然剎車」呢？

黃亮霆先生：我哋嘅資料顯示，就係如果個 G force 係達到 0.2 嗰陣時候，就嗰個hard brake 都係相當之嚴重嘅，我哋會 count 呢個就做一個 hard braking。

主席：（經傳譯員）呢個係咪運輸署 2003 年發出關於黑盒嘅自願嗰個指引方面，就係話 G force 去到 0.2 呢？

黃亮霆先生：係嘅，以我哋嘅印象，就係嗰個指引入面係有提及如果萬一架車發生咗交通意外嗰陣時候，就我哋要提供呢一個 G force 嘅數據。

主席：（經傳譯員）仲有啲咩嘢其他嘅不正常嘅駕駛嘅行為你會係監察嘅呢，特別係呢個五十個車程之中？

黃亮霆先生：主席，因為個黑盒同一時間可以記錄到架車當時嗰個地理上嘅位置，即係嗰個 X、Y，我哋叫做，嗰個地理上嘅位置，我哋可以根據番我哋抽查嗰啲車輛究竟佢嗰陣時應該係行緊咩嘢巴士路線、應該係行緊咩嘢方向，我哋可以睇到佢哋係咪出嚟嗰個 raw data 係同佢哋而家執行緊嗰個駕駛職務係相符嘅，如果係個地理位置係唔相符嘅，即係話嗰架車其實係行錯咗路，或者係可能喺時間方面唔吻合，可能佢可能係開錯車諸如此類咁樣樣。唔該晒。

主席：（經傳譯員）你係講 X、Y，你係咪講緊經度同埋緯度？

黃亮霆先生：係，冇錯。

主席：（經傳譯員）個方向呢，係咪講緊嗰個巴士嘅方向呢？

黃亮霆先生：係，冇錯。

主席：（經傳譯員）唔該晒。

黃焯安先生：Excuse me，sorry。我呢個同事唔係叫 William Chung，因為佢

嗰度出咗個名係出錯咗個名，我想澄清番，佢係 Billy Wong，唔該。

主席：（經傳譯員）好，唔該晒。黃律師。

黃女士：（經傳譯員）就係遠期計劃，就你哋公司提交嘅，係運輸署第 1 號文件夾，係第 236 頁嘅去到 237 頁嘅，236 頁就係下底嘅部分，呢個就係講，就話有一個係透過黑盒嘅錄得嘅數據，就令到希望能夠更好係可以監察車長嘅行為嘅，而呢度就係話啲數據應該係更加詳盡去分析嘅，呢度二百--下一頁就係講，就話應該係呢啲嘅分析嘅資料，就希望能夠係防止以後有類似嘅意外發生嘅，你哋公司有冇做過呢一方面嘅就係分析呢，係致使到相同嘅意外唔會喺將來發生？

黃焯安先生：可唔可以睇番前一頁？

黃女士：（經傳譯員）第 236 頁。

黃焯安先生：唔該主席。喺我哋去訂立呢個 five-year plan 嘅時候，我哋有呢個計劃，但係就到呢一刻為止係未實現到，即係嗰個--頭先喺後面嗰段嗰度，係喇，preventive 嗰度我哋未--暫時呢一刻未做到，個計劃就好似頭先我哋一路講，就希望喺今年年底可以喺呢一方面加強啲。唔該。

黃女士：（經傳譯員）亦都係呢一個運輸署嘅第 1 號文件夾第 98 頁，就關於黑盒嘅，我哋係繼續講黑盒。

主席：（經傳譯員）第 33 頁就佢哋嘅文件冊嘅第 1 號，可唔可以將佢打出嚟呢？喺右上角嘅嗰個格裏面，你就話而家就有--目前有個黑盒嘅系統，就講緊點樣去處理同埋去記錄呢啲嘅數據，同埋就係需要傳送數據或者一啲儲存等等，都要好花費嘅，你就話目前嚟講，就呢個就唔係話強行要求就係話專營嘅巴士公司就需要係實時去用黑盒去監察車長嘅表現嘅。我相信你呢個係講緊就係 2003 年，即係十五年前運輸署嘅要求嘅，我係咪正確呢？

黃焯安先生：係，2003 年嗰個時候嘅標準，係。

主席：（經傳譯員）你哋嘅立場就係話因為唔係運輸署嘅要求，所以我咁樣演繹啱唔啱，所以我哋就有個選擇，究竟我哋係點樣做法，我哋有個選擇嘅？

黃焯安先生：Chairman，喺我哋本身頭先我哋同事都有提及到，喺 2003 年之後，我哋當然係嗰陣時要求我哋去裝黑盒，我哋以前係有去即係用--一路--一直用一個舊式嘅黑盒，其實係連一啲資料我哋想去上傳番返去我哋個 server 度，都做唔到。

亦都係喺 2016 年我哋開始去傾個新專營權嘅時候，因為係去做個 ETA，而我哋就換咗一個新款嘅黑盒，喺呢一度，當有呢個新款黑盒嘅時候，我哋就亦都係意識到我哋可以去再做多啲咁樣。當然你頭先提及到，就係--即係我諗個意思都係--如果我冇意會錯，就係我哋喺大嶼山巴士呢一方面係咪可以做多

啲呢，當然係我相信呢個答案永遠都係「係」嘅，我哋永遠都係可以去做多啲嘅，我哋會去一路去檢討，盡力去行前啲。

亦都係好坦白講，亦都係以往有好多我哋亦都唔會知道行業度究竟係--其實有好多發展我哋--以我哋嘅規模，其實我哋有好多嘢係唔能夠完全掌握嘅，係喺呢方面亦都係希望畀啲時間我哋去追番我哋落後咗嘅系統。唔該主席。

主席：（經傳譯員）個要求就係話你就係應該係有個預計實時到站嘅系統嘅，就令到你就係改良嗰個黑盒嘅，係咪咁樣呢？

黃焯安先生：Yes，係。

主席：（經傳譯員）我哋可唔可以打番出嚟 2003 運輸署嗰個指引呢？你係可以實時係監察嗰個車長嘅表現，其實只不過係--唔係--你主要都係話有個實時到站系統，而監察車長嘅行為只係一個輔助嘅啫，呢個預計實時到站系統令到你其實你亦都有能力係可以做其他實時嘅系統嘅報告嘅？

黃焯添先生：（經傳譯員）呢個預計實時到站系統畀我哋一個機會就睇下可唔可以有啲先進嘅黑盒，嗰啲舊式嘅黑盒其實就令到我哋唔可以取回一啲嘅資料就可以上載，冇錯喇，預計實時到站系統畀我哋有一個機會可以睇一啲新嘅系統。

主席：（經傳譯員）如果我哋睇番呢個 2003 年嘅指引，運輸署第一句就係話呢個咁樣嘅裝置有啲咩嘢嘅目的，呢個目的就係提供一啲嘅工具令到巴士公司可以去監察、管理道路上面關於呢個車速同埋一啲呢一個安全有關嘅行為，而係間接係鼓勵一啲更加好嘅駕駛行為嘅，呢個都係一個目的嚟嘅，你同唔同意呢？

黃焯添先生：（經傳譯員）同意。

主席：（經傳譯員）黃律師。

黃女士：（經傳譯員）運輸署亦都係有提議就喺車廂裏面係有一啲嘅車速顯示器嘅，就係我哋睇番運輸署第 1 號文件冊嘅第 102 至 103 第 21 至 22 段，第 21 段就係「呢個係一個裝置，就可以喺車廂裏面裝置，佢就係知道就係有實時可以喺呢一個嘅嗰個監察器嗰度攞啲資料，而亦都係將嗰個現存嗰個速度就係可以展示出嚟。而家就係有小巴有裝置嘅，亦都係建議喺巴士裝置。」

第 22 段最後屘嗰五行，「此外，嗰啲巴士公司就係好擔心就係呢個咁樣嘅巴士速度顯示器就會令到呢一個車長同埋巴士(sic)就有拗撬，亦都致此令到個安全受影響，所以巴士公司認為呢個車速顯示器都幫唔到提高個巴士安全嘅。」

你會唔會接受運輸署呢個第 22 段嘅結論呢？你公司嘅立場係點樣呢？

黃焯安先生：唔該。主席，喺關於呢個 display unit，我有少少都想補充嘅，但係當然可能嗰個資料都需要委員會去事後核實番，因為我哋亦都去理解番，其實喺小巴佢哋去安裝呢個車速顯示器，其實係安裝咗呢個喺二零零--好似係

2005 年咁上下，係先安裝車速顯示器，跟住去到 2010 年定係再打後先至係去決定去加裝個黑盒同埋嗰個限速器。

我哋嘅理解嗰陣時當佢哋安裝個車速顯示器嗰個原因，就係因為其實專線小巴或者--即係就喺公眾小巴，其實同我哋嗰個巴士嘅營運都幾大分別嘅，佢哋好多都係主要由一啲中、小型嘅營辦商去組成嘅，就唔同我哋專營巴士其實主要係三間公司，第一；第二，佢哋好多都係嗰個車長--小巴嘅車長同嗰個車公司未必係有嗰個僱傭關係，佢哋只係可能係個車主將嗰個車交咗畀一啲管理人，而將嗰個車租咗畀個車長嘅啫，變咗其實當中係冇人喺後面去監管嗰個車長個駕駛嗰個態度、表現等等咁樣，即係一啲極端啲嘅例子。

而當嗰陣時去安裝咗--呢個 05 年安裝顯示器之後，正正就係好多市民坐喺車度感受到--我相信其實未裝之前，嗰陣時都可能已經感受到危險嘅，就見到係常常超速等等，衍生好多投訴同埋係一連串嘅意外，就最終署方就決定要將黑盒、限速器呢啲都加裝落去小巴嗰度。

講番喺我哋嘅睇法，就係如果去將呢個顯示器加裝喺車度，的而且確乘客係會每分每秒都會睇到架車嘅車速，但係各位褪後一步去諗番，乘客知道架車超速，佢係咪有個 brake 畀佢剎停架車，減慢個車速呢？係唔會㗎嘛，其實佢都係直接去同番嗰個車長--喺現場去同番個車長講話「喂，你揸慢啲喇，超速喎。」當然亦都要睇嗰個乘客個態度，有機會好，有機會好惡劣，而我都唔相信到時我哋就算藐張紙話叫乘客「如果超速，你打去呢個熱線喇。」可能會有啲乘客會咁做，但係我相信最大嘅機會都係直接去 confront 嗰個車長嘅。

反而我會覺得如果係喺今天嘅技術上，頭先提及嘅嗰啲技術係可以做到真係有個方法去令到架車係唔超速，我覺得個效果係會好過係要個乘客去出聲，一個我哋變咗唔係太控制到嘅情況之下去同嗰個車長去產生一啲磨擦，我哋最唔想係見到呢個情況嘅。唔該主席。

黃女士：（經傳譯員）最後關於安全裝置嘅一樣嘢，就係想請你睇番呢個 TD-1 嘅 90 頁嗰度，呢個就監察呢個司機嘅行為嘅。

主席：（經傳譯員）或者你未落去之前，當然我就想問，呢個係違例事項嚟嘅，係咪呀？即係其實就係法例裏面有規例，就話如果司機開緊車嘅時候你同司機談話嘅話，其實係一個刑事嘅違例行為嚟嘅，啱唔啱呀？

黃焯安先生：佢唔可以騷擾個車長。

主席：（經傳譯員）即係唔可以去令佢分心、干擾佢，係呀，呢個就係嗰個精神，係咪呀？目前如果乘客有投訴，你就會作出回應，喺嗰個時候，照我嘅理解，就係你就會去番個黑盒嗰度，去睇下嗰個投訴係關乎幾時嘅事，係咪呀？同埋睇下佢講得啱唔啱？

黃焯安先生：都要睇下嗰個投訴係同--係咪例如係同車速或者嗰個駕駛表現有關，倘

若嗰個投訴人嘅投訴同嗰啲冇關，就我哋去睇番個黑盒都幫唔到我哋。唔該。

主席：（經傳譯員）假設，假設就係投訴呢個車速，就話嗰個司機就係開得太快，我想問，你同唔同意我嘅講法，如果係有一個車速顯示器，就係嗰個乘客純粹咪影張相，喺嗰度影咗張相，影咗顯示器係幾多車速，然後就係作為佢嗰個投訴嘅證據喇？

黃焯安先生：喺主席你提到嗰個情況，佢去一邊有個車速顯示器顯示可能嗰個一個車速，佢去影相，如果你話好清晰影到係邊個位置、路段等等，都可能會做到你講嗰個效果嘅，即係以嗰張相去做一個證據，但係我亦都要--即係始終其實佢如果就咁影住嗰個車速，我哋都唔能夠確定究竟係幾時、幾刻同埋喺邊度去影嗰張相，我就咁即時去諗嗰個情況。

主席：（經傳譯員）不如將佢簡化一下，專營巴士就唔可以係超過每小時 70 公里嘅，係咪呀？啱唔啱呀？

黃焯安先生：Yes。

主席：（經傳譯員）好，如果嗰個車速顯示器就係打出嚟就係每小時係 80 公里，有乘客影咗張相，呢個就係客觀嘅證據，就係證明到當時巴士車長嘅行為，係咪呀？

黃焯安先生：啱啱主席講到，好喇，佢影到係 80，我哋都要可能影埋個--我就咁好快咁諗，可能都要影埋個車牌，我哋亦都知道係邊個車長或者--即係咁可能都係一個例如，因為咁都係嗰個人講，個乘客話佢喺邊部車等等咁樣，因為我就從來冇咁諗過呢個方向，不過啱啱你咁提問，我諗你話係咪真係做到證供，就可能要--例如有咁樣。

主席：（經傳譯員）不過你都有提過，就話譬如話寫個電話號碼出嚟，等呢個乘客打電話，你較早時候係咁樣講過嘅，係咪呀？如果係顯示咗出嚟，或者有個電郵嘅地址，當佢仲係喺車上嘅時候，係咪可以將嗰個車速就係電郵畀運輸署或者電郵畀你哋嘅總部，你會唔會接納呢？

黃焯安先生：如果係--倘若未來真係要擺呢個車速顯示屏喺個車上面，我哋會接受畀乘客去直接通知我哋公司去解決，我相信咁就一定係好過個乘客去同個車長去有個--驚有個衝突。

主席：（經傳譯員）唔該晒。黃律師。

黃女士：（經傳譯員）咁樣唔係會對呢個司機有阻嚇作用咩？因為其實嗰個問題就在於唔好超速，如果你係有個車速顯示器嘅話，個司機知，乘客知，個個都知有呢樣嘢喺度，你唔覺得係會令到車長就因而就係會係小心，就唔會係超速駕駛？

黃焯安先生：喺實際嘅情況，我相信--當然十隻手指有長短，大部分嘅車長，就算喺

我公司旗下都好，大部分都係好嘅，但係當然就係有啲可能個個性孤僻少少，可能個人急躁啲咁樣，你啱啱 Ms Wong 去提到就係假設有好多人都見到佢超速、做得唔啱，係咪會對佢構成好大壓力呢？我又唔敢講，即係有啲極端啲嘅情況，我相信，即係當然你話一啲好嘅同事，佢根本都唔會超速嘅，梗係冇問題，有啲心急啲嘅同事，我就咁諗，我又唔會特別覺得--即係可能都好睇我哋公司到時倘若你話係好--即係叫做倘若收到佢哋呢啲超速嘅情況，我哋會有啲可能喺個安全獎金會有個好嚴重嘅懲處定點嘅，可能會有啲緊張啲。

但係個情況我就唔覺得會話因為好多人都睇到佢超速，反而我覺得每個人其實倒番轉，佢哋主要都係喺番自己嗰個角度去睇啫，佢究竟會唔會話畀人--驚畀人扣分，或者會唔會真係危險、發生意外，好多時其實超速係--有陣時係個同事嘅即係有少少過度自信嘅，即係佢哋覺得可能有少少急，亦都係覺得自己會操控到部車。

黃女士：（經傳譯員）嗰啲監察司機嘅裝置，我想請你睇睇《明報》嘅網站，嗰度有一份報道--有一篇報道就講及就係避免啲人係瞌眼瞓嘅，請你睇番有關嘅報道，係今年嘅 5 月 27 號嘅，嗰篇報道。呢篇文章就係話畀我哋聽係有一啲監察嘅裝置嘅，其實呢個都係講及香港、珠海、澳門，即係話港珠澳大橋上面行走巴士嘅司機之用嘅，你知唔知道有呢篇嘅報道呀？

黃焯安先生：係，喺新聞度有見到呢個報道。

黃女士：（經傳譯員）你自己有冇打算去研究一下呢一種嘅系統，睇嚟就係喺內地係進行研究同埋開發嘅，你有冇諗過話--有冇打算都自己係引用入去你公司嗰度用呢？

黃焯安先生：主席，喺現階段，我哋會繼續留意，當然我哋唔會對任何對本身整個安全提升嘅系統 say no，一定會--我哋都會保持住開放態度，睇一睇到時成個演變。不過當然你--即係本身如果你問我，我會覺得係--我淨係好表面去初步了解個即係喺個新聞度嘅一啲--即係去咁睇，當然你問我哋嗰個 priority，當然係希望先做好咗我哋現有一啲已經有嘅資源，呢個我哋會再--因為始終我哋提供嘅服務其實係嗰個車程較為短啲，我相信嗰個--即係未必係我哋呢一刻最迫切覺得係要立即做嘅嘢，不過我哋會留意住嗰個事態發展。

黃女士：（經傳譯員）我去到最後一個課題，就講及係公司嘅財務情況嘅，請你睇番呢個 NLB-2 嘅 71 頁，呢份文件就係透露更詳盡財務及營運資料，呢個就係 2012/2013 年嘅情況嘅，請你睇番第 72 頁，呢度就講就話係 2013 年 3 月 31 日為止嘅年度，就係話你哋嗰個財務就係咁樣樣嘅，就係你嗰個係一億四千五百五十萬，而嗰個盈利就係九百五十二萬元嘅，係咪呀？

黃焯安先生：唔。

黃女士：（經傳譯員）你去呢個 132 頁，嗰個係 2014/2015 年度嘅，你睇睇嗰個收入，你個收入，你見到就係有三個來源嘅，你嘅收入，首先就票務嘅收入，廣

告收入同埋係雜項嘅收入，可唔可以話畀我哋聽嗰個廣告嘅收入係嚟自邊度呢？

黃焯添先生：主席，我哋廣告嘅收入主要來源都喺我哋車身，巴士車身，同兩間巴士公司唔同之處，我哋係好少巴士站嘅廣告，我哋主要嘅廣告收入都係巴士車身，唔該。

黃女士：（經傳譯員）雜項收入又點呢？

黃焯安先生：唔該主席。本身我哋新大嶼山巴士同--例如，同昂平 360，係簽咗一個協議，就係當嗰個吊車例如佢係突然要停駛，即係可能因為天氣或者種種原因，我哋會係去立即去支援佢咁樣，譬如。同埋另外就嗰度例如係有喺呢個我哋嘅車廠去幫我哋頭先提及嗰啲非專營巴士去做嗰個年檢嗰類嗰啲服務，我哋就收番佢費用咁。唔該。

黃女士：（經傳譯員）喺呢版嗰度，132 頁講到嗰個廣告嘅收入係四十九萬三千元嘅，2014/2015 年就係四十三萬八千元嘅，但係如果你去番 2016 年/2017 年，就係就係睇番呢個 182 頁，我哋見到嗰個廣告嘅收入就係下降，大幅下降嘅，喺 2015/16 年度就係十九萬，喺 2016/17 年就係 87,000 元，可唔可以話畀我哋聽點解？

黃焯添先生：12 至 13、13 至 14，當時個廣告收入會相對地偏高，係最主要因為我哋有條深圳灣線，深圳灣線喺我哋嘅公司立場嚟講，係相對地吸引，對於廣告商。當去到 15/16，特別係 16/17 同埋而家，呢一類型我哋巴士車身嘅廣告係相對地冇咁吸引，即係對於一啲落廣告嘅人嚟講。我哋而家最主要譬如我哋深圳灣咁講，我哋好多嘅廣告商都已經冇落廣告，最主要原因係本身巴士車身廣告嘅製作費係相當之昂貴，而對於一啲落廣告嘅人，即係而家嘅 media agency 嚟講，我哋呢一類型嘅傳統廣告係比較唔吸引，所以係有個相對大嘅跌幅。

但係譬如嚟緊港珠澳大橋嘅開張，我哋嘅廣告係應該會有個提升嘅，係因為已經有唔少嘅廣告商係對一個新嘅口岸係有興趣，所以我哋嘅廣告嘅收入係同我哋本身路線相對地唔吸引，因為我哋行嘅路，特別係大嶼山，我哋行嘅路係山路，係唔會有人見到嘅，所以基本上大嶼山、大嶼南嘅路線係唔會有人落廣告。東涌係有機會有啲地區性嘅廣告出現嘅，譬如係街市，呢啲嘅廣告係唔會有好大嘅收入嘅。

至於深圳灣，本身深圳灣係個關口，而家係比較耐，所以想落廣告嘅人都有機會選擇其他嘅交通工具，譬如可能係跨境巴士等等，所以我哋係有見到咁嘅跌幅。

黃女士：（經傳譯員）唔該晒。我想請你睇呢個 NLB-2 第 27 頁，呢個就係你哋嗰個專營協議嘅第 34 條，呢項條款就講到一個每年嘅一個報告嘅制度，我想問下，究竟你哋嗰個核數嘅機構係叫咩嘢名呢？如果你要符合第 34 條，係搵邊一個做

呢個核數嘅，佢叫咩嘢名呢？或者係審核嘅機構。

黃焯安先生：畀少少時間我搵番個資料先，抱歉，搵一搵先要。

主席：（經傳譯員）你慢慢喇。

黃焯安先生：主席，嗰間公司係一間本地嘅會計師樓，係叫做 Tony Yau & Company 咁，或者可以我哋之後將個全名補番上畀你睇。

黃女士：（經傳譯員）唔該晒，係咪可以畀個樣本我哋，即係睇一睇你哋係最新嘅一份呢間公司幫你哋做嘅年度審核？

黃焯安先生：當然可以。

黃女士：（經傳譯員）最後或者係想請你睇番同一份嘅文件，第 196 頁，呢一個就係你哋嗰個組織架構表，呢度就係顯示你哋嘅高層管理，你可唔可以話畀我哋聽你哋公司有冇一個專責嘅安全嘅組別或者部門呢？

黃焯添先生：主席，對於巴士安全，喺我哋嘅公司立場嚟講，其實係包含晒所有部門嘅，其實我哋每個月，有機會係甚至兩個星期，我哋所有嘅管理層，即係所有喺呢個 org. chart 見到嘅大部分嘅管理層都會坐低去傾嘅。每一次我哋都會當然會講到巴士安全，譬如最近我哋會 focus 喺 training school 上面。所以喺呢個 org. chart 上面我哋係見唔到一個特別嘅人係 dedicate 去做 safety 嘅，而其實 bus safety 呢樣嘢就係整個公司，成個團隊嘅 duty 嚟嘅，唔該。

黃女士：（經傳譯員）唔該。

歐陽先生：（經傳譯員）我想問一個問題，如果有一個係好可怕嘅意外發生咗，你哋公司裏面會發生啲咩嘢事嘅呢？

黃焯添先生：唔好意思，委員，你嘅意思係咪我哋當有意外發生嘅時候，我哋嘅團隊會做啲咩嘢？

歐陽先生：Yes。

黃焯添先生：Okay，其實我哋本身對於交通意外已經有個既定嘅制度嘅，不論大小，我哋本身有個完整嘅 structure 去做，呢一刻我喺個頭度即刻講唔到畀你聽，但係我哋可以後補一個我哋本身當遇到意外成個 procedure 可以點樣做、點樣面對，呢個我哋可以做到，交到畀你嘅，唔該，唔好意思。

歐陽先生：Thank you.

主席：（經傳譯員）冇錯，你係可以儘快交番畀我哋嘅。

黃焯添先生：Okay。其實我想再補充多少少，其實我想講番，就係最近我見到嘅關於呢個獨立委員會有提及到 ISO39001 嘅，其實我哋本身公司嘅立場係好支持

同埋好積極去做到呢一個 standard 嘅，其實個 background 都要講番，就係喺 2017 年，當我哋去試行呢啲新嘅雙層巴士，即係喺 3M 嘅雙層巴士，我哋公司都有個目標，係希望可以做到呢一個國際水準。

我哋首先就喺我哋嘅梅窩廠房係做咗三個嘅 ISO，分別就係 ISO9001 質量管理體系、ISO14001 環境管理體系同埋 ISO18001 職業安全健康管理體系，呢三個嘅認證，我哋喺 2018 年嘅 5 月，其實即係上個月，係正式授權係可以用嘅。我哋 17 年嘅年中開始就開始有喺我哋嘅廠房度做一啲嘅 system 嘅更新，去做一啲考核嘅。

當我哋喺 17 年嘅年中開始做考核嘅時候，BSI，即係嗰間 ISO 嘅公司亦都有同我哋講過 ISO39001 嘅，當時我哋嘅睇法就係擔心如果將 39001 去畀全公司用嘅話，我哋嘅成本會好高，但係再去同 BSI 呢間公司傾落去，其實就發現原來一個 ISO 係可以用一個路線上面去試行嘅，即係用個 routes 去分嘅，所以嚟緊我哋港珠澳大橋 B4、B6 線，當然而家條橋未開，但係當條橋開咗之後，我哋係會主動去同 BSI 合作係儘快幫 B4、B6 呢條路線去攞到 ISO39001 嘅。

當攞咗成功--呢個 trial 成功咗之後，我哋會積極去幫 3M 呢條路線，即係頭先剛才大家都好擔心我哋行雙層巴嗰條路線，我哋都會好積極去做呢個 ISO39001 嘅認證。唔該。

黃女士：（經傳譯員）唔好意思。

黃焯安先生：我想補充番，嗰個係 39001，唔係 3900。

黃女士：（經傳譯員）呢個 ISO39001 點樣可以提升安全駕駛呢，可唔可以詳細啲講呀？

黃焯添先生：（經傳譯員）或者我用英文進一步講。

主席：（經傳譯員）冇所謂，用咩嘢語言都得。

黃焯添先生：（經傳譯員）ISO 其實就係要訂定一啲嘅道路交通安全去提升公司嘅表現，為咗要執行呢個系統，公司係要有一個好清晰嘅標準，唔係一個單一嘅標準，即係唔係 BSI 或者任何一間機構嘅單一標準，公司要做嘅就係要做一個統一嘅標準，要提升同埋係推廣道路交通安全，用呢個系統，我哋唔能夠確保係零意外，但係新嘅系統係可以幫助我哋提升表現，同時改善我哋嗰個終端嘅系統同埋我哋嘅支援嘅，即係如果出現意外。其中一個主要嘅元素，即係 ISO 嘅主要元素就係內部審核，有內部審核可以幫助我哋改善同埋維持安全管理系統，呢個就係我公司內部同埋長遠嚟講。

喺呢段時間，我哋已經同 BSI 確認咗係會進行 ISO 嘅 B4、B6 兩條線嘅認證，整個過程係未開始，因為港珠澳大橋未通車，希望喺年尾可以將好消息講畀委員會聽，即係我哋呢一個新線會有一個國際標準。

黃女士：（經傳譯員）我已經完成晒我所有嘅問題，唔該晒主席，唔該。

主席：（經傳譯員）黃生，我有一個問題，就係想講番你話用特別更嘅資料，即係一個十四個小時嘅更，你就話係八條線有用，即係一百一十三條裏面八條線係有用特別更？

黃焯安先生：（經傳譯員）呢啲就係大嶼南--就係一百一十三條裏面嘅八條係大嶼山南部，我哋會將總數交畀你，因為仲有其他嘅路線喺東涌、深圳灣。

主席：（經傳譯員）即係超過八條線有用？

黃焯安先生：（經傳譯員）總數會多過呢個數嘅，係。

主席：（經傳譯員）我想確認一下，你總共就係一百一十三條嘅路線，係咪呀？

黃焯安先生：（經傳譯員）應該係多過呢個數。

主席：（經傳譯員）或者可以之後講番畀我哋聽。

黃焯安先生：Yes。

主席：（經傳譯員）我想知嘅就係你哋嘅路線裏面有幾大部分係用呢個特別更？睇下你答唔答到，用特別更，巴士車長就會有三個小時嘅小休，咁可唔可以講喺呢啲特別更，佢係會離開架車，跟住三個小時後返嚟呢？呢個有關係，因為我哋想知道你喺嗰個地方提供嘅休息設備，你想而家答吖，定係之後先至再提供呢個資料呢？即係可以用書面解釋。

黃焯安先生：主席，或者我哋--因為嗰度都涉及多啲資料，我哋一次過整理好，再送去委員會度。

主席：（經傳譯員）係，請你將呢啲資料提供。如果冇任何設施或者係有限嘅設施，你要解釋一下，等我哋知道係整個嘅情況，即係你哋係--即係有關於特別更同埋休息設施等等。Professor Lo。

羅先生：（經傳譯員）關於嗰個嘅收入嘅申報方面，我有啲資料想問嘅，來自非專營巴士嗰個嘅收入都幾多，我就想知道喺呢個數字裏面有幾多係來自非專營巴士呢？係咪就係話其他嘅支出呢方面？

黃焯安先生：係喺 other expenses 嗰度。

羅先生：（經傳譯員）嗰個比例係幾多？即係支付用作非專營巴士嘅數額係幾多？

黃焯安先生：教授，抱歉，因為我哋呢一刻未有呢個資料係，你介唔介意我哋之後補充番畀你？講番畀你？

羅先生：Yes, please.

黃焯安先生：係，好，唔該。

主席：（經傳譯員）請你咁做。呢個嘅--會唔會喺你嗰個中期即係六個月嘅報告裏面有呢？即係嗰個係截止於 17 年 9 月 30 號嗰個嘅資料。

黃焯安先生：主席，你係咪講緊個中期報告？係上市公司定係大--因為大嶼山巴士應該有獨立有個中期報告，係，我哋...

主席：（經傳譯員）可能我真係呢個意思，係咪可以喺一啲公開資料裏面搵到㗎？

黃焯安先生：如果大嶼山巴士嚟講，就每年會喺 fuller disclosure 個文件度去--一年一次，就去詳細顯示番出嚟。

主席：（經傳譯員）就係請你提供番盧教授嘅資料，有關於非專營巴士嘅支出。

黃焯安先生：Okay，好。

主席：（經傳譯員）今次就完成咗律師要問嘅問題，我哋亦都--如果你有嘅話，我哋都係會係開始聽你嗰個嘅總結發言，黃生。

黃焯安先生：唔該主席，喺我哋巴士公司提供安全嘅載客服務係責無旁貸，喺專營權底下，我哋嘅服務水平一直受到政府嘅監管，不過隨著社會嘅變化，市民出行模式係改變，我哋自身亦都要與時並進，改善同埋優化服務，以滿足市民對巴士服務嘅期望。

我哋公司主要嘅管理層都係公司其中一個股東，因此我哋唔係淨係著眼於好短期嘅表現或者利益，而係更著眼於公司長遠嘅發展同埋可持續性，而繼承公司嘅傳統，我哋同車長嘅關係係保持長遠同埋良好嘅關係，而呢個係我哋認為對營運巴士嘅服務同埋安全水平係尤其重要。

但係基於我哋公司嘅規模同其他巴士公司嗰個差距係好大，頭先有提及到，我哋如果以車輛去比較，係只有佢哋十三分之一至到三十三分之一嘅，當要發展新嘅系統或者軟件，不論係從開發硬件，甚至乎係去 implement 呢啲系統，其實我哋嘅成本都係會遇到嘅困難會比起其他巴士公司係多好多。

而我哋預期喺現有嘅專營巴士制度之下，我哋想去發展我哋嘅車隊係好困難嘅，以今天喺大嶼山為例，我哋可以服務嘅區域其實只係喺大嶼山入面，而大嶼山出去以外嘅範圍係有另外兩個專營權，即係喺赤臘角、東涌去市區咁，我哋就唔同其他嘅專營巴士公司，本身佢哋係有好多路線已經喺市區度係一路去運行或者一路加緊咁樣。

可能從營運嘅效率呢個角度去考慮，其實社會係好難去容納一間規模咁細嘅專利巴士公司，但我相信係從整體嘅社會利益角度，我哋公司嘅存在係可以提升業界嘅競爭力同埋係畀市民多一個選擇。

縱使係受到我剛剛提及嘅條件去限制，我哋係好樂意繼續投放資源同埋配合政府嘅政策，以便我哋有更好嘅條件去為未來嘅服務去加強去服務市民嘅。

最後，我喺度代表新大嶼山巴士有限公司再次多謝主席、兩位委員邀請我哋公司上到嚟聽證會去講解我哋嘅情況同埋意見，亦都好多謝 Ms Wong 嘅提問，亦都多謝秘書處同埋相關人員嘅安排，亦都想藉呢個機會去多謝我哋一班嘅同事，包括我哋前線嘅同事一直去對巴士行業嘅付出同埋努力。多謝主席，多謝各位，thank you。

主席：（經傳譯員）黃生，我哋多謝你同你嘅同事出席今次嘅聆訊嘅，我哋期待接到你應承畀我哋嘅資料，其實如果儘早畀到我哋，係會幫助到我哋嘅，因為我哋而家仲仍然係進行緊呢一個嘅聆訊，所以今次嘅聆訊完結。

2018年6月19日

下午6時06分聆訊押後

(9.00 am)

EVIDENCE FROM TAI PO DISTRICT COUNCIL: MS WONG PIK KUI, MR CHAN CHO LEUNG, MR YAM KAI BONG, MR CHAN SIU KUEN, DR LAU CHEE SING

(given in Cantonese; transcription of the simultaneous interpretation)

CHAIRMAN: Good morning. We welcome the representatives of the Tai Po District Council. We thank them for responding to our invitation by coming today to assist us with their evidence.

I'm going to ask Ms Wong to begin by posing questions to the representatives. If Ms Wong wishes one of the other representatives of the council to respond to a particular question, please feel free to identify that person, and that person can then deal with the particular question. But I will ask counsel assisting the committee to begin her questioning now.

Examination by MS MAGGIE WONG

MS MAGGIE WONG: Yes. Thank you, Chairman. And thank you, ladies and gentlemen, for coming to this hearing today. I have a few topics and areas of questions.

First of all, may I draw your attention to a letter sent by the Committee on 4 May 2018, inviting you to address three accidents. That would be DC-2 page 759.

It is in Chinese. I will just summarise the three accidents.

The first accident is at Dai Kwai Street on 10 August 2011, at footnote 1; the second incident is at Tai Wo Service Road West on 12 May 2013; and the third is the Tai Po Road accident on 10 February 2018. And by that letter the committee invited you to provide documentation in relation to these three accidents.

Is that correct?

MS WONG PIK KUI: Good morning.

So is it now for the Tai Po District Council to give our views on the three accidents?

MS MAGGIE WONG: This is just a general question, that by that letter the committee invited you to comment or give documentation in relation to these three accidents. Can you confirm that, first of all.

MS WONG PIK KUI: Yes. In this document, it is true, on those three days there were the accidents.

MS MAGGIE WONG: And the reply, I believe the Tai Po District Council, its committee and working group, was able to confirm that you have only discussed about the Tai Po accident on 10 February 2018. If I invite you to look at the document at page 762 in Chinese, English at page 764.

Do you see that? It is in the second paragraph. If

I may read you. It is a letter from the Tai Po District Council, replying to the committee. Dated 23 May 2018. The letter states that:

"Among the records, the Tai Po District Council, its Committees and Working Groups had only discussed about the traffic accident that occurred on Tai Po Road near Tai Po Mei on 10 February 2018."

Is that correct?

MS WONG PIK KUI: Yes. Yes.

MS MAGGIE WONG: So do I take it that according to your records, the discussion, you were only able to retrieve documents in relation to the Tai Po accident, but not the other two accidents?

MS WONG PIK KUI: Yes. For the accident on 10 February 2018, we had a special meeting to discuss it.

MS MAGGIE WONG: Thank you. And may I first of all refer you to the minutes of the special meeting on 12 February 2018. The Chinese is at page 766, English starts at page 782. If I may refer to English version, we can see that the persons in attendance at page 768 in Chinese and 783 in English, that includes Ms Mable Chan, Commissioner for Transport, and also Mr Chau, amongst others, Chau Chung Mun, superintendent of police, do you see that? 768 in Chinese and 783 in English.

MS WONG PIK KUI: Yes, correct.

MS MAGGIE WONG: If I may take you to paragraph 5, English at 785, Superintendent of Police, Mr Chau Chung Mun stated in that paragraph as to that particular road section, that:

"In 2017, the police had made 4 arrests involving 2 drunk drivers, 1 case of dangerous driving and 1 case of drug-related crime. The police had issued a total of 32 fixed penalty tickets at the road section in 2017 for speeding and traffic violations. A total of 29 traffic accidents had occurred in the Chek Nai Ping to Wong Yee Au section on Tai Po Road, out of which 2 are more serious. Although there were no speed enforcement cameras installed at the above mentioned road section, the police could carry out operations to detect speeding from time to time by placing detection equipment a few designated spots along the road section."

Do you see that?

MS WONG PIK KUI: Yes.

MS MAGGIE WONG: Now in relation to this, is this enquiry made in response to the Tai Po District Council's query, or questions as to the number of accidents that happened in that particular Tai Po Road accident that the police provided those information?

MS WONG PIK KUI: Yes.

MS MAGGIE WONG: And as a matter of fact, your minutes state at paragraph 16, if I may take you to paragraph 16, page 772 in Chinese and English at 789, if you see at 16 (iv) it stated that:

"Some district councillors had made suggestions on how to improve the design of the road section involved in the past. But the Transport Department cited technical factors as a reason and did not follow up, he [that is Mr Lo Hiu Fong, I believe he is a member of the Tai Po District Council] hoped that after this accident, the Transport Department could respond to the demands of the district councillors and install road-side speed detection equipment and signage to improve road safety."

In relation to that paragraph, can you elaborate on the first sentence that some district councillors had made suggestions in the past how to improve the road design, but the Transport Department did not follow up. Can you elaborate on that.

MS WONG PIK KUI: Yes, thank you. Now, today, we have district councillor from the constituency Mr Chan Siu Kuen attending the meeting. Perhaps he could give his views on this paragraph.

MR CHAN SIU KUEN: May I speak please?

As the district councillor of that constituency I received comments from residents. On holidays there

are often cars speeding along the Tai Po Road and it causes great disturbance to residents and they go at great speed. So after I received complaints from residents I wrote to the Transport Department asking for speed cameras at the road section.

On 24 July 2015 and also on 5 June 2017, as mentioned in the letter, I wrote to the Transport Department, and the police respectively, the first letter to Transport Department, the second one to police, and I made it clear in the letters that near the Savannah Garden on weekends there is car speeding.

The Transport Department responded to me orally, and they said they would consult the Owners' Corporation first to see what the response is. For the Savannah Garden it is not a major traffic black spot, accident black spot. That's why there has been no follow-up.

On the second letter from Tai Po Mei to this Green Wood Villa, that's a slope, so when cars go up, you know, for ordinary cars they can't speed, but of course sports cars could. When they come down that bend, cars come at a great speed and it is scary. That's why I wrote to police directly to ask the police to put a speed camera there. The police responded to me saying that that is not a traffic black spot, but they would put some police officers there to set up speed traps.

After that incident people asked me whether I have looked at that particular section of road. Fortunately, as a district councillor I have been monitoring the government's work all the time so I was able to produce the two letters at once at the District Council meeting.

I'm the District Councillor of that constituency, when the media asked me questions I could produce proof that I did ask the Transport Department to put up a road sign slowing down, and also speed cameras there and I made the request both to the Transport Department and the police. That's why you now ask how come there is no response to my two letters.

MS MAGGIE WONG: Thank you, Mr Chan.

You mentioned a few letters. The first one is 24 July 2015. May I first of all take you to that document. It is a letter to the Transport Department. Chinese at 840-72 in DC-2-bundle. English at 840-75.

That's the first letter in which you wrote to the Transport Department project in Tai Po section, engineer, Mr Wong Kwok Leung, stating that you have received request for assistance from the residents in the vicinity of Tai Po Road, and there was an absence of speed limit traffic signs around the bend of Savannah Garden. Then you stated that:

"To ensure the safety of road users, your department

is now requested to expeditiously install the '50km' speed limit signs at the above location to remind the motorists to pay attention to driving at safe speed for prevention of unnecessary incidents."

Is that the first letter you refer to in your answer?

MR CHAN SIU KUEN: Correct.

MS MAGGIE WONG: Mr Chan, you mentioned that about expeditiously install the 50-kilometre speed limit signs, but in fact during that time, for that particular road section, the speed limit is actually 70 kilometre per hour. In that regard, why did you write 50 kilometres per hour?

MR CHAN SIU KUEN: 70 kilometres -- one step down from 70 is 50 under the laws of Hong Kong, there is no 60 or 65 kilometres per hour of speed limit. And for residents living near Savannah Garden they said to me that "Please write on behalf of us as the District councillor", and so I wrote on their request.

And also there were some minor traffic accidents, at the biggest bend. I believe for that section a speed limit of 50 kilometres is reasonable. But of course I'm not the expert, that's why I have asked the Transport Department, asking them to help me do a consultation and see whether it is possible to put up this 50-kilometre

sign.

CHAIRMAN: Do we understand that this was a request that the speed limit be reduced from 70 kilometres per hour to 50 kilometres per hour?

MR CHAN SIU KUEN: Yes. Yes. I have just listened to residents' views. Residents called me up, and I also believe that for that bend it is rather dangerous. That's why I have stated specifically for that particular bend the speed limit should be reduced from 70 to 50 kilometres per hour.

MS MAGGIE WONG: In relation to this letter the Transport Department no written response was received from the Transport Department in reply to this letter before the Tai Po accident, is that correct? I believe you stated that in the further submission to the committee by letter dated 11 July 2018. Chinese at 840-76, and English at 840-86.

MR CHAN SIU KUEN: That is right. At that time, the Transport Department did not give me a direct reply. However, I have spoken to them on the phone. They said that if the speed is to be reduced to 50 they would have to consult residents as well as owners corporations. And in 2014, near the Japanese International School there was a traffic accident at the signal junction, as a result a person was injured, and the TD, Transport

Department replied to me. He said for the speed to be reduced to 50 the TD would have to conduct a study, and after the accident they have appealed to the public to abide by road traffic regulations. They said that from the perspective of the TD, for the speed to be reduced to 50, they would have to do a lot of consultation and to liaise with the police.

I have been waiting. And I have been in contact with them. Well, Mr Wong of the Transport Department has been transferred out. And regrettably we had the traffic accident at Tai Po Mei. And I approached the police, because the TD could not help us. I asked the police to install speed cameras and I have been following that up.

CHAIRMAN: Who was it that you spoke to the telephone at the Transport Department about this matter?

MR CHAN SIU KUEN: It was Mr Wong Kwok Leung, an engineer of the TD.

CHAIRMAN: What was his status or rank within the Transport Department?

MR CHAN SIU KUEN: At that time I think he was a senior officer in the department.

CHAIRMAN: When did you have this conversation in relation to the letter of 24 July 2015?

MR CHAN SIU KUEN: I can't remember. I'm a district

councillor, every day as soon as I receive calls for assistance I would deal with departments as soon as possible. I urged them to erect the sign and reduce the speed as soon as possible. However, the government is very serious about following procedures, I understand that they have to follow the procedure if the sign is to be put up. I have been following the matter up, and I have a lot of work as a district councillor. Residents from time to time would call me to say that in that road section where there is a bend, they ask for the speed to be reduced.

CHAIRMAN: Ms Wong, before we go any further, could we see a photograph of this area of road, and perhaps we could see a map so that we can all understand what we are talking about?

MS MAGGIE WONG: I wonder if we may pull up the map of the Tai Po Road section. And first of all, Mr Chan, if you look at the map, the section where you propose to reduce the speed limit is in relation to Savannah Garden. And it appears it would be around the location between numbers 26 to 29 on the map. Is that correct?

MR CHAN SIU KUEN: Yes. It is before the Hung Lam Road, at the bend.

MS MAGGIE WONG: Can you point out the parts that you propose to the Transport Department to look into the

speed limit or reduction of the speed limit from 70 to 50 kilometres per hour by reference to the number shown on the map?

MR CHAN SIU KUEN: I think it is 30, 28 and 29. That's the bend. So going from 30 to 29 and 28, and for that road surface, as soon as there is heavy rain it would flood. That is at location 28. I have just sent a letter to the Highways Department asking for them to do something about the underground water, because as soon as there is heavy rain there will be accumulation of water under the road surface. In the mornings on Saturdays and Sundays there are cars racing and doing that bend, and it is very dangerous.

MS MAGGIE WONG: Maybe we can show you the photographs of number 28, 29 and 30. So that we know which bend or curve we are talking about.

Photo 28, Mr Chan, I believe is the area near the Hung Lam Road, is that correct.

MR CHAN SIU KUEN: That is a bit too forward. You have to go back a little bit. This is the Kowloon-bound section. I think you have gone the other way. You should go the other way.

MS MAGGIE WONG: 27?

MR CHAN SIU KUEN: I think you have to go further back.

MS MAGGIE WONG: 26?

MR CHAN SIU KUEN: You have overshot.

MS MAGGIE WONG: So it should be between 26 and 27; is that correct?

MR CHAN SIU KUEN: Not this one. This is a different residential development. Go back a bit.

MS MAGGIE WONG: Or photo 29?

Mr Chan, maybe we will show you a video about the relevant locations, so that you can ask us to pause when the location we talked about is the location mentioned.

MR CHAN SIU KUEN: It is close, it is close. Keep going. Keep going.

(Video played)

MR CHAN SIU KUEN: It is after this bend. Stop. And all the way, when you continue, if there are two double-decker buses servicing this bend, it would be very dangerous. And just now at the position where someone was standing, as soon as there is rain, it would flood. So it is particularly dangerous here.

CHAIRMAN: Before we move on. Can we identify this from the still photographs?

MS MAGGIE WONG: Yes. Maybe we would print out a photo of that particular photo that you have identified.

CHAIRMAN: Do we have a physical album of photographs?

MS MAGGIE WONG: We have selected a few photographs, but this does not happen to be one of them. We will mark

the time, we can look at the time, and we will print out that particular photo in due course. Or with those particular coordinates.

And Mr Chan, you mentioned another incident about a Japanese International School accident, and if I may refer you to the letter of complaint from the Japanese International School, that was dated 10 February 2015. English at page 840-84, and Chinese at 840-85.

The original version is 840-84, and Mrs Juliet Ashton wrote to you stating:

"Last year, outside our school a lady was killed whilst crossing the road. The speed limit is 70 [kilometres an hour] which probably contributed to the severity of her injuries."

In the fourth paragraph she also mentioned that:

"Along the Tai Po Road there are other areas where the speed limit has been adjusted to 50 [kilometres per hour] and I would ask that the same adjustment is made for outside our school."

So that's a plea made by Ms Juliet Ashton on behalf of the Japanese International School to reduce the speed limit from 70 to 50 kilometres per hour. Is that the letter you mentioned earlier on?

MR CHAN SIU KUEN: I mentioned this letter, which is in front of me. I am aware that someone talked about

a traffic accident. I was concerned about it, that's why I wrote a letter about the area near Savannah Garden asking for the speed to be reduced to 50. I asked the TD about details of the accident, whether the person dashed into the road, or someone did not obey the traffic light. If the person involved rushed into the road, well, that one might be different. The TD was asked by me to make some improvement at the signal junction to facilitate pedestrian crossing to make that location safer to cross.

And as to whether that location is suitable, I have actually talked to the TD about it.

CHAIRMAN: This was a letter addressed to Mr Man; how did you come to be dealing with it?

MR CHAN SIU KUEN: Yes, it is just that I see it here.

Oh, yes, it is written to the chairperson, Mr Man, who is the chairperson of the Tai Po Transport and Traffic Committee.

CHAIRMAN: Thank you.

MS MAGGIE WONG: And this matter was discussed at the District Council meeting on 13 March 2015. Chinese is at page 840-81, and English at 840-92. And we can see the chairman's name there, Mr Man Chen Fai. If you look at paragraph 79, the chairman made reference to the letter of the Japanese International School stating

their request to reduce the speed limit from 70 kilometres per hour to 50 kilometres per hour, and actually invites the district council members to go there to visit their school to discuss about the transport issues. Do you see paragraph 79?

MR CHAN SIU KUEN: Yes, I can see it.

MS MAGGIE WONG: If you go to paragraph 80, that's at page 840-92, a Mr Wong Kwok Leung responded. I believe that is the Mr Wong Kwok Leung referred to in your letter that you addressed to in July 2015. Is that correct?

MR CHAN SIU KUEN: Yes, it is related. At that time when I wrote to him it was when I received complaints from residents of Savannah Garden, especially on the mornings of Saturdays and Sundays, there were a lot of cars racing. Around that area, it is very dangerous, that was a different matter.

And I wrote to him to ask for the speed to be reduced to 50, around Savannah Garden. And I was aware of that.

MS MAGGIE WONG: And in that paragraph 80, Mr Wong Kwok Leung responded that he knew that the Japanese International School suggested the reduction of speed limit of the road section in front of the school in view of a traffic accident in the section of Tai Po Road in

front of the school in 2014, in which a member of the public was killed.

It also stated that the Transport Department and police were examining the cause of that traffic accident which might not necessarily be related to the speed limit of that road section, including issues of some motorists' driving attitude and problem as to whether pedestrians observed traffic light signals. But it also stated that the Transport Department would examine whether the present speed limit of that road section was appropriate.

Furthermore, the Transport Department has sent an interim reply to the school, and will provide a detailed reply letter.

So Mr Chan, it appears that the Transport Department stated back in March 2015 that they are going to examine the speed limit of that road section.

Did they follow up with the district council, with your district council about their proposal or suggestion since that meeting?

MR CHAN SIU KUEN: Yes, I was shown this by the deputy chairperson. They said the case is sub judice, so it was not appropriate for them to discuss the case. There might be a prosecution against the driver. It was mentioned in paragraph 87 in the district council.

MS MAGGIE WONG: But my question is not about the cause of the accident, but the fact that the Transport Department would examine whether the present speed limit of that road section was appropriate. Did you see that sentence in paragraph 80 where Mr Wong Kwok Leung stated that?

MR CHAN SIU KUEN: Every day we have a lot of meetings. As far as I know, we asked them -- we told that we could only wait, because they are dealing with the procedure or the proceeding.

MS MAGGIE WONG: So is the answer no, that after the minutes, or after the meeting in March 2015 the Transport Department did not approach the district council discussing about the speed limit of that road section. Is that the case?

MR CHAN SIU KUEN: I don't know whether they have talked to the chairperson, Mr Man, but I was the councillor of that constituency, so I would talk to them. They said there needed to be consultation. They needed to consult if the speed limit is to be reduced to 50.

CHAIRMAN: The question really is this. Did they tell you what was the result of this consultation? This happened three years ago.

MR CHAN SIU KUEN: No, they did not. If there was a result, I would not have sent a second letter to the police. From the letter dated 2015, there wasn't much result.

That's why in 2017 I sent a letter to the police.

MS MAGGIE WONG: Before we move on, can I show you the map identifying where the location of the Japanese International School. I believe the location is around -- it is between number 21 and 22. If we can pull up the photo, 21 and 22, I believe it is 21. This shows the site of the Japanese International School. Is that correct?

MR CHAN SIU KUEN: This one is correct. This one, near the traffic signal.

MS MAGGIE WONG: Thank you. And you referred to the letter to the police, and if I may refer you to the bundle at page 840-70 in Chinese, and 840-74 in English. It was a letter dated 5 June 2015, written by you to the Hong Kong Police.

We can see that the letter stated that there were a lot of people over-speeding during holidays and then requesting for installation of speed enforcement cameras. Is that correct?

MR CHAN SIU KUEN: Correct.

MS MAGGIE WONG: And there was a reply from the police --

CHAIRMAN: Before you move on. The reference here is generally to the Tai Po Road. Was there any particular part of the Tai Po Road where there was this problem with speeding?

MR CHAN SIU KUEN: I think just now I said that Tse Lai King(?), uphill, when they approach the bus accident location, the first bend, there are a lot of accidents there. So in that section I had specified all the way up to Ng San Jong(?) that there are some residents who wrote a letter in Dragon Hill Bay -- Deerhill Bay, where they say there is a lot of speeding from sports cars, and in the first bend, that's where the bus accident occurred, when they turn right, there is a drifting, and vehicles can flip very easily. So that's why we want a 50-kilometre speed limit and also a speed camera.

MS MAGGIE WONG: We have a map pulled up. Can you first of all identify the location of the Deerhill Estate mentioned in your letter. Or your evidence. Deerhill Bay. Is that around the location of the Japanese International School?

MR CHAN SIU KUEN: This is the second letter. The first letter was referring to Savannah Garden. This is the second letter, and this letter does not mention the Japanese school. The first letter involved the international school.

MS MAGGIE WONG: Yes. So that's the location that you are referring to on the map, the Deerhill Bay, which is behind the Japanese International School on the map.

Can you confirm that?

MR CHAN SIU KUEN: Let me see. It is not very clear. It is between 22 and 20, right? Kon Hang is also on the map. This is Cheung Shue Tan, the bus stop before we reach Deerhill, that would include -- this is Deerhill. That is correct. This is approaching Deerhill, the approach, the entrance to Deerhill.

MS MAGGIE WONG: And your letter stated that there are often speeding and unlawful motor racing on the Tai Po Road, but there appears no reference to the speed limit in this letter. Can you tell us why? Or request in relation to the speed limit.

MR CHAN SIU KUEN: Well, in the heading I said that I request a 50-kilometre speed limit sign, and I also wanted -- I had written that, I had requested that.

MS MAGGIE WONG: I refer to a letter dated 5 June.

CHAIRMAN: Perhaps we can put that letter up on the screen.

MR CHAN SIU KUEN: Well, this speeding camera, the -- typically it is 70 kilometres, if you have a speeding camera they will take pictures, if it exceeds the speed limit. A typical motorist when they see the camera they will slow down, it is very natural, so what I wrote was they needed to heed our residents' request to add a speed camera -- you are correct, I did not add that there, but the purpose is that if you have a speed limit

of 50 then it would activate the camera if it exceeds 50, and if --

MS MAGGIE WONG: There was a reply from the police on 16 June 2017.

If I may take you to 840-71 in Chinese, English at 840-73. The police stated that:

"The locations for installation of fixed speed monitoring cameras are mainly determined by the Transport Department. After installation, the Police is responsible for taking enforcement action. This office understands that the Transport Department currently has no plans to install fixed speed monitoring cameras in the captioned road section. At the same time, the Police will continue to closely monitor the traffic situation of the road section concerned."

This letter was copied to the Transport Department, Mr Paul Chiu, Traffic Control Division, Technical Service Branch, and the district commander at Tai Po. Do you see that?

This letter was addressed to you personally.

MR CHAN SIU KUEN: That is correct. I issued the letter and they should have responded to me. I had submitted them the letter, and I have a record of all the letters I send, so all these three letters were disclosed by myself, and the fact is we -- I see the Transport

Department have not concluded their work, so I wrote directly to the police to see if they could install the speeding camera at the end of where the slope is going downhill, and that was my request.

MS MAGGIE WONG: So in other words they said that the Transport Department refused the request, and the police is simply the enforcement department. So they can't do anything about it unless the Transport Department install the fixed speed monitoring cameras; is that correct?

MR CHAN SIU KUEN: That is correct. It is clear that's what they responded, and subsequently, after this serious accident, I had contacted a police officer, we went to the site, and they promised that at the end of the year they would install a speeding camera.

MS MAGGIE WONG: I refer you back to the minute dated 12 February 2018. That would be at page 790 in English. Chinese at page 772.

In this paragraph 17(ii), Dr Lau Chee Sing raised the following views, and he stated that:

"Half a year ago, some district councillors had proposed installing speed enforcement cameras in the road section where the accident had occurred but were rejected by the relevant departments. He opined that despite there were sufficient signage at the scene,

a vehicle's speed would increase as a result of the impulse and centrifugal force generated as the vehicle went downhill and made a turn. Relevant departments should review on whether it was appropriate to keep the speed limit of the road section in concern at 70 [kilometres per hour]. He said, for example, there had been an accident at Sai Kung ... [and] Clear Water Bay ... as the vehicle failed to brake in time. The speed limit was then lowered from 70 kph to 50 kph, and speed enforcement cameras were also installed. He suggested to lower the speed limit to 50 [kilometres per hour] and install speed enforcement cameras in the road section concerned to deter drivers from speeding."

This is perhaps a question directed at Dr Lau. Reference was made to the fact that half a year ago district councillors had proposed installing speed enforcement cameras in the road section where concerned in relation to this accident. Was that in writing? Was this request made in writing?

DR LAU CHEE SING: So it was not my request. At the time they were aware that district councillors had written a request.

CHAIRMAN: Were you referring to Mr Chan's request, is that what this is a reference to?

DR LAU CHEE SING: (In English) Yes, that was Mr Chan's

request, yes.

MS MAGGIE WONG: And when you made reference to "rejected by the relevant departments", that was the letter of rejection by the police that we have just seen; is that correct?

DR LAU CHEE SING: (In English) Correct, yes.

MS MAGGIE WONG: If we continue, if we look at paragraph 24(iii), English at page 794, Chinese at page 776, paragraph 24(iii), that's the response by Mr Au Chun Wah stated that:

"He agreed that the speed limit of the road section concerned should be lowered from 70 [kilometres per hour] to 50 [kilometres per hour]. Yet, the attitude of the driver was just as important. Some bus drivers who knew the route extremely well might drive at a higher speed. To add one, the road section was sloping downwards. Even if the bus would be 'locked' when the speed exceeds 70 [kilometres per hour], there would be an impulse generated from the slope and the weight of the vehicle, causing an increase in the speed. He suggested that the bus company should remind bus drivers to be patient at all times, and to slow down when going downhill. In addition, he hoped that the bus company would instruct all bus drivers to maintain a good attitude while driving."

Then at (vi):

"He enquired the police for the number of traffic accidents that had happened ..."

Not only for the road section concerned, but also for the entire length of Tai Po Road, and he asked whether there were speed enforcement cameras at Tai Po Road, and if yes, the number and the locations.

And now may I ask, first of all, about this speed limit lowering from 70 kilometres to 50 kilometres per hour. After this meeting, did you and the Transport Department have a site inspection of the location of the accident, in order to discuss about this request of reduction of speed limit?

DR LAU CHEE SING: (In English) You asking me? Or ask Mr Chan?

CHAIRMAN: It is a matter for you, amongst yourselves, to decide who should answer a particular question. Perhaps Ms Wong could indicate who might best reply.

MS MAGGIE WONG: Maybe Ms Wong, if --

MS WONG PIK KUI: I will invite our TT group chairman Dr Lau.

DR LAU CHEE SING: (In English) That question was raised by Mr Au, another district councillor. I think that should be better answered by Mr Chan, because he is the district councillor of that area.

CHAIRMAN: Mr Chan, can you help us? The question is, was there a site visit?

MR CHAN SIU KUEN: Well, I personally did, now whether the district council chairman, he spoke at that -- on that occasion, he just raised the question, but whether there was any follow-up, that was another issue. Now, as a councillor, I definitely went to examine the scene before and after the accident. I definitely went myself, and Dr Lau Chee Sing, as chairman, whether he attended I could not recall.

CHAIRMAN: Did you go with the Transport Department, I think is the question. Was there any joint site visit?

MR CHAN SIU KUEN: I went personally with the Transport Department.

MS WONG PIK KUI: Let me also answer, well, we -- the Tai Po District Council, the chairman, Mr Cheung Hok Ming, the Home Affairs officer DO, Ms Cheung, together with us, the whole Tai Po Transport Traffic Committee, all our members went to the site to visit once. And Au Chun Wai had also attended.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Thank you. Out of this site visit was it agreed amongst Transport Department and the persons in attendance at this site visit that the speed limit has to be reduced? For that particular road section in

relation to the accident?

MS WONG PIK KUI: Yes, when we were at the site we had raised two requests. The first was to bring in the 70 kilometres speed limit and lower it to 50 kilometres per hour, and we also wanted signage, and the second request was that in this section where we needed the speed limit to be slowed down, they should also install the speeding cameras.

MS MAGGIE WONG: During the site visit did you discuss about where the speed enforcement cameras should be installed, or the location of the cameras?

MS WONG PIK KUI: We, yes. We did identify the location. We had a whole coach, tour bus coach, some 40 people visiting the site, and we had more than 40 people on that section, and we felt it was dangerous to conduct our site visit under those conditions, so we took our request, and raised that in our district council meeting room in our Traffic and Transport Committee.

So if we wanted a precise location for the speeding cameras, we handed that over to the TD and the police, and our Councillor Chan Siu Kuen would follow up.

MR CHAN SIU KUEN: I did. I was with the police officer responsible for traffic at the site, and I identified and designated the site -- that is the stretch that is going downhill where the cameras should be installed,

and we did have a discussion.

MS MAGGIE WONG: So was all this in writing? Or recorded in minutes, apart from the ones that you produced to us?

MS WONG PIK KUI: No. These were not listed out in such details at the meeting, because on the locations of the cameras, the district councillor of the constituency had to liaise with the village heads of the three villages at Tai Po Mei, he had to listen, consult them on the views, because there are also bus stops involved, maybe they need to be repaired and then need to remove the lamp post, and so on. So these are all details which are left to Mr Chan Siu Kuen to follow up by making appointment on another occasion with the relevant parties. That is why it was mentioned repeatedly, Mr Chan said he and the department went to the site several times afterwards.

CHAIRMAN: Can we have the date of the communal visit, the 40-odd people in the coach. When was that?

MS WONG PIK KUI: I think it should be 12 April. Perhaps our colleagues could all help out. I think it was 12 April. On that day we hired a coach bus to go there. Yes. 2 pm on 12 April. We started from the Tai Po government offices and then we went up to the Tai Po Road bus stop for a site inspection. We arrived at 2.15 at the scene at Tai Po Mei.

CHAIRMAN: Thank you.

MS WONG PIK KUI: Yes, and then ... then at 3.30 there was a DMC, the district management committee meeting. At that meeting, we had a discussion after the site inspection. Now only the chairman and deputy chairman of the district council and the chairman of the five committees, so altogether seven district councillors who met with the district office and the departments of Tai Po. So that's a meeting for these people. And yes, there is a minute for this meeting.

MS MAGGIE WONG: Can I take you back to -- still in the February 2018 minutes, as to the response by the KMB. That would be at 798 in English, and 780 in Chinese. At paragraph 35 it stated that:

"Mr Godwin So's views and responses to the questions raised by the district councillors were as follows ..."

And 35(ii) stated:

"The KMB will consider the views of the District Councillors on the routes, schedules, and dispatches of Route 872, and will submit proposals to the Transport Department and the district council for future considerations."

First of all, what views of the district councillors was he referring to?

MS WONG PIK KUI: The route 872, I proposed that it

shouldn't continue to go via the racecourse, and then on to Tai Po Road to the terminus. I hope there would be a new route. And then the new route could take the Tolo Harbour Highway.

MS MAGGIE WONG: Did they submit any proposal to your council for consideration? Since -- (Simultaneous speakers - unclear) --

MS WONG PIK KUI: After the end of the meeting, well, it was close to the Chinese New Year, there was no further meeting. The Transport Department colleague called me, and asked if I agreed to this, that is for route 872X, it will go from the racecourse via the Tolo Highway to Tai Po centre.

MS MAGGIE WONG: If I may refer you to paragraph 12 at page 788 in English, and 771 in Chinese. This request was made by Mr Kwan Wing Yip, at paragraph 12(iv). He stated that:

"Since he began serving as District Councillor 18 years ago, there had not been any large-scale road widening or improvement works carried out on Tai Po Road. He understood that Tai Po Road was subjected to geographical limitations, but he still hoped that the relevant departments could try their best to work on improvement plans. He also hoped that the Transport Department could also consider improvement plans of

other roads (eg Ting Kok Road, Lam Kam Road, Sai Sha Road) proposed by the Traffic And Transport Committee of the Tai Po District Council ... so as to prevent traffic accidents caused by road defects."

In relation to this request by Mr Kwan, he mentioned that the Tai Po Road had not had any improvement works carried out during the past 18 years.

What is your view on that, when he stated that?

MS WONG PIK KUI: Now I think, perhaps it is best to get a response from the district councillor of the constituency, Mr Chan Siu Kuen.

MR CHAN SIU KUEN: For the Tai Po Road, there are quite a number of bends. Yes, there have been widening works, for example the bend near Savannah Garden, this slope was cut before. There were not too many serious accidents there, it is true. But really, I think in this case, it is the bus driver, who drove carelessly. For this whole section, now as the district councillor of the constituency, most of the complaints were about speeding, and the residents were worried that might lead to serious traffic accidents, but for that particular location, best of course if it could be widened. You know, in Hong Kong there are many such roads with such bends, but for Tai Po Road it is not particularly dangerous, but of course if the widening could be done

we could support it.

CHAIRMAN: Before you go on, Mr Chan, may I remind you, in view of the remarks that you just made, that the causes and liability of the accident on 10 February are not within the terms of reference of this committee. We are interested to find out about the circumstances, but we are precluded from making any determination about that, for obvious reasons in light of prospective litigation.

MR CHAN SIU KUEN: Yes. I got it.

MS MAGGIE WONG: Mr Chan, that paragraph made reference to improvement plans. Can you tell us when did the Traffic and Transport Committee of your district council propose the improvement plan? When?

MR CHAN SIU KUEN: There is no mention here. On widening of Tai Po Road, it is not mentioned.

MS MAGGIE WONG: Dr Lau --

MS WONG PIK KUI: Perhaps I could say this here. Mr Kwan said he has been a district councillor for 18 years, actually I am in the same case.

Now, at the district council, for all these years, it is true, there are widening works at some sections of Tai Po Road, for instance, Ting Kok Road has been widened and is open to traffic already, it is a very successful case. The roundabout at Lam Kam Road, again widening works have been completed. Sai Sha Road, there

is now consideration of an option. Next time, when we talk about road improvement works again, we would ask the Transport Department to submit proposals together with others for the consideration of the Traffic and Transport Committee. That should be the case.

MS MAGGIE WONG: Do you have anything to supplement?

DR LAU CHEE SING: Yes, I would like to add this. At the Traffic and Transport Committee meetings we discussed requests made by a particular member. When that is the case, it is not necessarily that the committee would submit plans. Usually at meetings we would ask the Transport Department to make improvements, and we would wait for the Transport Department to make proposals. Because they are the experts on transport matters. So it is for them to respond to members' requests, and come up with some improvement proposals for our consideration. Because district council councillors are not experts in this area. So usually when we make request at the Traffic and Transport Committee meetings, then we hope the Transport Department or the relevant departments would then put forward proposals for improvement for our consideration.

That's the point I would like to clarify.

MS MAGGIE WONG: In other words, you propose a certain idea, but in terms of execution, you leave it to the Transport

Department as experts, to execute the improvement works. Is that what you are saying?

DR LAU CHEE SING: Yes. Correct.

MS MAGGIE WONG: And may I also refer you to paragraph 26, page 796 in English. And 778 in Chinese.

Paragraph 26(ii). Mr Yu Chi Wing, councillor, commented as follows. He said that:

"The staff of the Transport and Housing Bureau and Transport Department often refused to implement the suggestions put forward by the District Councillors, and they are often biased in favour of KMB at the meeting. In addition, there are often personnel changes in the Transport Department, which has led to a slow progress in handling cases."

First of all, when Mr Yu made reference to suggestions put forward by the district councillors are they referring to safety-related measures in relation to the road section of Tai Po Road? Or can you tell us what those suggestions were?

MS WONG PIK KUI: Now, I think, perhaps I should say this. Mr Yu Chi Wing expressed his views at the meeting so it should be for him to explain and clarify his views. We really cannot speak for him and interpret what he meant here.

MS MAGGIE WONG: Have there been meetings with the Transport

and Housing Bureau and Transport Department after suggestions had been put forward by the district councillor each time?

MS WONG PIK KUI: Yes. Now let me put it this way. District councillors receive complaints from residents. So through various channels they would convey these complaints. Going through the district council is one way, then writing is another way, or calling up someone is also a possibility. And then district councillors would speak with the Transport Department on their proposals or suggestions.

Perhaps other departments could also express their views on the matter. Mr Yam, thank you.

MR YAM KAI BONG: Now, on Mr Yu Chi Wing's views, and the counsel just asked about the views of other members, for example on how the Transport Department views members' views. I would like to give my opinion as well.

Now, the Transport Department, the police, and relevant departments did respond expeditiously including reducing the speed limit from 70 to 50, or undertaking to install speed cameras, speeding cameras, but then as Mr Chan Siu Kuen said, he has actually followed up on such proposals for a long time. Let me say this, it's a fact which may not be pleasing to the ear, it is only when someone is killed or injured then the would

actively respond to our views, and we don't want to see that.

Now, there's mention of questions asked by district councillors and often the Department would reject district councillors' demands, and that's true. It is not just on this particular subject. For example, in Tai Po district we would like to build a flyover at Kwong Fuk Road, we have talked about it for 10, 20 years, but because no lives were lost -- and then for district councillors of the Tai Po town going into Tai Po town or Kam Shan Village there is just a single road section, and if there should be a traffic accident and ambulances or fire engines prevented from entering it would affect rescue effort. So because nothing happened, that's why this demand of the district council for many years could not be addressed.

Now, you have to understand it. You know, district council is rather passive, especially when departments often cite technical reasons to block our request, and it is hard for us to question those technical considerations, and technical considerations include a lot of data, or a thousand reasons why something cannot be done.

Now we are very unhappy about it, but we feel rather helpless too -- and I must say this too.

Now, district councillors collect views from the public on traffic and transport issues, whether it be about professional drivers or pedestrians or after accidents have happened. Yes, of course those are minor accidents, but after minor accidents have happened does it mean that there could be more serious accidents in the future? This is something we can see. That's why Mr Chan Siu Kuen or other district councillors here have put forward these views. It is not groundless, because we predict something could happen so we want to make improvements as earlier as possible.

As to how improvements could be made, we don't have the capacity or the expertise to deal with it. But if certain measures are taken, could it then reduce the chance of accidents happening? This is what the district council could like to achieve.

CHAIRMAN: Ms Wong, perhaps we could move forward to the improvements that did actually happen. And as I recall, there was a paper dated 9 April which was discussed by the district council on 11 May.

And I think that we might have received the approved minutes yesterday.

MS MAGGIE WONG: Yes. Chairman. Maybe I should jump immediately to the proposals made by the Transport Department.

CHAIRMAN: Thank you.

MS MAGGIE WONG: I believe after this meeting there was another meeting on 9 March 2018, also in relation to the Tai Po Road accident. Is that correct?

CHAIRMAN: Perhaps you could bring up the minutes of the meeting.

MS MAGGIE WONG: Yes. The Chinese is at page 801 and the English is at page 815.

Maybe I will summarise some of the key matters in this minute before I go straight to the Transport Department's proposals.

This meeting was on 9 March 2018, and paragraph 4. Mr Cheung Wai Fung representing the Transport Department --

CHAIRMAN: Slow down a bit, Ms Wong, so that the representatives can see what you are addressing. I think you have hard copies, do you, of these minutes? You don't. In that case, take time, so that we can show them to you on the screen.

You are going to ask some questions about paragraph 4?

MS MAGGIE WONG: Paragraph 4. Mr Cheung Wai Fung representing the Transport Department made four suggestions in that paragraph. First, to study whether to revise speed limits. Second, to strengthen traffic

signs, and road markings. Third, installation of speed enforcement cameras, and fourth, to examine the topography of the site of the accident and explore how the bus stop could be optimised.

So those are the four issues the Transport Department would comprehensively review as stated in paragraph 4. Do you confirm that?

MS WONG PIK KUI: Yes.

MS MAGGIE WONG: I believe in that meeting some members voiced their discontent about the progress in general terms because some district councillors considered that the reduction of the speed limit of the particular road section where the accident occurred could be reduced at a shorter time, and to have the road section, the entire length of the road section reviewed comprehensively later.

Can you recall that?

CHAIRMAN: Can you take us to an example of such a suggestion?

MS MAGGIE WONG: Yes. If you look at paragraphs 11 and 12, by Councillor Yam Kai Bong, and in the first paragraph he expressed discontent or disappointment about the progress.

And he mentioned that there are many sharp bends or slopes at paragraph 12 in the section of Tai Po Road

between Chek Nai Ping and Kwong Fuk Road to Savannah Garden.

CHAIRMAN: Perhaps it is paragraph 12(ii) that captures what you are saying.

MS MAGGIE WONG: Yes.

CHAIRMAN: The suggestion was that the department should first install a speed enforcement camera on this road section.

"Do it now, don't wait until later."

Wasn't that the suggestion.

Yes, Doctor?

MS WONG PIK KUI: I defer to Dr Lau.

DR LAU CHEE SING: I was chairman of that meeting. The first item for discussion was about the traffic accident, we would like to know the progress of follow-up of improvement measures by the Transport Department.

Their representative on that day mentioned the four items mentioned. However, what he said was there was no confirmation as to when they would be implemented. We are district councillors, something major happened in February. In March there was still nothing to respond to our request. That is, reduction of speed. Because that was something simple and could be done immediately.

The representative of the Transport Department at that time still said that it would be under consideration. District councillors expressed discontent and disappointment. That was because even though they have mentioned four items, they did not say anything about implementation date.

CHAIRMAN: Thank you.

MS WONG PIK KUI: Mr Yam is here, maybe we can hear from him.

MR YAM KAI BONG: I agree what Dr Lau said. It was not that I was not happy with the recommendation of the Transport Department. I was not happy about the lack of timetable, and the date of installation of speed camera. The meeting took place on 9 March, and on 12 April during the site visit they then gave us a report saying that there would be speed camera and improvement to facilities and the locality of the bus stop as well as speed reduction. So it was only on 12 April that they gave us a confirmation about the improvement.

However, at that time the Transport Department used words like they would consider "whether" there would be an adjustment to the speed limit, as well as "whether" there should be improvement to road signs.

So it was "whether" they would do it or not. That's why I myself and other councillors were not happy and

were disappointed.

MS MAGGIE WONG: I think, Dr Lau, you have also recorded your sentiments at paragraph 31 of the minutes, just for completeness. That's at page 811 in Chinese, and 825-2 in English. By the time of this meeting you had not received the proposal from the Transport Department, and you complain about reducing speed limits and the fact that installing speed cameras are not difficult to implement. The matters that you have averred to earlier.

If we may look further at the Tai Po District Council paper dated 9 April 2018 -- that's at TD-1 page 354 in Chinese, and 360-1 in English.

This paper lists out a number of measures that they proposed to the Tai Po District Council. If you can see the first section -- the second section is the review of the speed limit, and it is proposed that the speed limit of certain sections be reduced from 70 kilometres per hour to 50 kilometres per hour.

If we could go to subparagraphs 4(a), (b) and (c). Subparagraph 4(c) is the part where they proposed the section between Chek Nai Ping and Yun Yi Road of Tai Po Road be adjusted, the speed limit be adjusted from 70 kilometres per hour, be lowered to 50 kilometres per hour. That's subparagraph 4(c).

And if we could -- if you could read it first, and then we will pull up the map for you to look at. Subparagraph 4(c). If we enlarge it, the section that we are referring to where the speed limit is reduced is the section starting from number 15 to number 31. The line marked in orange or brown colour.

Can you confirm that's the Transport Department's proposal?

DR LAU CHEE SING: (In English) Yes. By Transport Department.

MS MAGGIE WONG: And they also proposed other measures including the road traffic signs be put up and other road markings. That's at subparagraph 8(a). If we may look, first of all, at the map showing where the road traffic signs are proposed by the Transport Department. That's TD-1 page 360.

So they proposed to add two "Ahead" sign at the bottom, and then warning traffic sign, you can see the first, "Reduce speed now", "100 metres", and "Bend to the right ahead"; and then the second traffic sign, then we can see nine signs of sharp deviation of route, used with amber border. Then we can see the enlargement of the building, or construction of the pedestrian, and other road markings, or more markings on the road indicating the reduction of speed limit.

Can you confirm that's the proposal you have discussed with the Transport Department?

DR LAU CHEE SING: (In English) Yes. Actually that was presented by the Transport Department.

MS MAGGIE WONG: Yes.

DR LAU CHEE SING: (In English) And we discussed that at the TTC meeting.

CHAIRMAN: So the paper was 9 April, and the meeting was on the 12th.

DR LAU CHEE SING: (In English) That was the -- the meeting was on --

CHAIRMAN: I'm talking about the site visit. As I understand the evidence, that was 12 April: then there was a meeting on 11 May.

DR LAU CHEE SING: (In English) No.

DR LAU CHEE SING: It was mentioned during site visit and then it was mentioned later.

(In English) The meeting on 12 April.

CHAIRMAN: Thank you.

MS MAGGIE WONG: As to this proposal, I believe there was draft minutes of the meeting dated 11 May this year. If we may go to Chinese at page 840-9.

CHAIRMAN: Before we do that, were we not told that they would be considered and approved in a meeting that was held yesterday? The 13th?

MS MAGGIE WONG: Yes.
CHAIRMAN: Have they been approved?
MS MAGGIE WONG: Have they been approved?
DR LAU CHEE SING: So Mr Lunn would like to know whether it was discussed yesterday?
MS MAGGIE WONG: No because what we have here is a draft minute. Has that been approved, this draft minute, or have there been changes?
DR LAU CHEE SING: (In English) That was approved.
MS MAGGIE WONG: Without changes?
CHAIRMAN: Without changes?
DR LAU CHEE SING: (In English) Without changes.
CHAIRMAN: Thank you. In which case we can go to the draft minutes, if that is what you were going to do.
MS MAGGIE WONG: Thank you.
If we go to page 840-09 in Chinese, and 840-20 in English. And at paragraph 5 --
CHAIRMAN: Which bundle are we in now?
MS MAGGIE WONG: We are at DC-2, page 840-23 in English, and 840-12 in Chinese.
CHAIRMAN: Thank you.
MS MAGGIE WONG: And maybe we should go back one page to see who is present. At page 840-22, the chairman welcomed a few representatives, including Dr Lau and Mr Hui Kam Nin Henry, the senior engineer of the Transport

Department. If we go to paragraph 4:

"The chairman said that the Transport Department had earlier submitted documents to the committee introducing the latest traffic control measures on Tai Po Road ..."

And it made reference to a Tai Po District Council paper. That is the paper I took you to earlier on.

"The secretariat had also sent the same by e-mail on 10 April 2018 to the members ... Further, the secretariat had assisted the Transport Department in arranging the members of this committee to conduct a site inspection of Tai Po Road with the District Management Committee on 12 April this year, and the Transport Department had explained the traffic control measures to be implemented shortly. He invited the Transport Department to report on the implementation of the various measures."

And paragraph 5 is the response from the Transport Department by Mr Henry Hui. He made five updates of work progress. First, he stated that: The speed limits of the Tai Po Road between Chek Nai Ping and Yung Yi Road had been lowered from 70 to 50 kilometres per hour from 27 April this year.

Second, that they have added the traffic sign and road sign with yellow fluorescent on the background on the signs to enforce reminder to drivers. Third,

widening of the bus bay that was damaged in the accident with protective barriers. The works were expected to be completed in this month, in July 2018.

The fourth is optimise the bus stop near the Tai Po Mei. The work is supposed to be completed in August 2018.

Fifth is to improve the traffic sign and road markings near Hung Lam Drive, Dragon Fountain and Yin Tse Lane. The relevant works expected to be completed by the end of this year.

Can you confirm the suggestions or the work progress reported by the Transport Department?

MS WONG PIK KUI: Counsel, Mr Chan can respond.

MR CHAN SIU KUEN: (No interpreted answer).

MS MAGGIE WONG: If we go to paragraph 14. Mr Henry Hui also reported that the Transport Department endeavoured to complete installation of speed enforcement cameras by the end of this year. As to operation matters, it would be the responsibility of the police.

So the Transport Department has reported on the work progress thus far. Is that correct? Or is this an ongoing process?

MR CHAN SIU KUEN: It is not ongoing, it is a single project. They had installed the camera and they were restoring the bus stop to its previous condition. That

was the end of the project.

MS MAGGIE WONG: If we could go further to see Henry Hui's observations after the reduction of the speed limit. At paragraph --

CHAIRMAN: Before you move on. Was the committee given any explanation as to why it would take until the end of the year to install a single speed camera, one camera?

MR CHAN SIU KUEN: There was an explanation given. They said that it took time to order the camera, they couldn't order just one camera, they had to order a whole batch, and second, it had to go through EMSD, Highways, Transport, Police, they had to go to visit the site. They had to dig up the road site, they had to get permits, they could not do it for one project, so that's why they had to take until the end of the year. I asked why they couldn't speed it up, and they said that they received the permit, after questioning by district councillors they promised by the end of this year that they would install a speed camera for us.

CHAIRMAN: They had various procedures to go through in order to lower the speed limit, did they not? But they had managed to achieve that by 27 April.

DR LAU CHEE SING: Because the speed reduction is simple, and it does not involve a lot of government departments, so I think regarding the speed reduction it was just the

Transport Department, they could make the arrangements themselves. And Highways Department -- they are also an executive, or a branch of the government. It is easier to coordinate the work.

MR CHAN SIU KUEN: So when you order the speed camera you cannot order one unit. I recall from memory that they had to order a whole batch, and there are still a lot of areas in Hong Kong where they need to install these camera heads and they were ordering a batch then, they couldn't just order one single camera ahead, and there were a lot of procedures, government department procedures. They had to consult the different government departments, they had to contact EMSD, Electrical and Mechanical Services Department to get the power supply for the camera. That was the response I had at the site.

CHAIRMAN: Are we to understand that although there are 4,200 kilometres of roads in Hong Kong, the Transport Department has no inventory of speed cameras?

Perhaps you can't answer that.

MS WONG PIK KUI: Let me add. The incident occurred on 10 February, and after that, in our special meeting on 12 February, and then in March, we had our regular session at the district council meeting, and then the third meeting was the Traffic and Transport Committee

meeting, and the subsequent discussion on 12 April, and then in May, July, we focused on urging for the installation of a speed camera vociferously and up until now we still have not accomplished this request.

So perhaps our councillors could also add.

MR YAM KAI BONG: I agree with the honourable judge. We do have a question why there isn't inventory. It is such a large traffic department. How come they don't have back-up, or even parts, because the government said they were going to respond to the issue very promptly, and the honourable judge said just now, or Mr Chan Siu Kuen said that the changing of the speed limit, that could be done very quickly in terms of works, but the Transport Department said that they had to purchase the components, and use that as a reason, and the district council found that unreasonable.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Thank you.

Madam Wong, I would like to take you to paragraph 19 in this minute. At page 840-29, and that's paragraph 19. I would like to ask a few observations you made in this paragraph.

The first paragraph, you make reference to the lowering of the speed limit. After it came into effect, you received feedback from school coach drivers, bus

drivers, and traffic accident victims, et cetera.

May I know what feedback you have received?

MS WONG PIK KUI: Well, the incident had been discussed thoroughly in the district council and we were focused on reducing the speed from 70 to 50 kilometres per hour and I received feedback from school bus drivers regarding this road section. And they say that this is an incline, and if you want to travel uphill and then you want them to brake and brake to 50 kilometres, they say it is very hard to control or maintain the speed of the bus. But they understand that the incident needs to lead to some improvements, but they are worried that if they have to reduce the speed, their school bus, they have more than 40 passengers, so such a large vehicle, it is very hard to keep it under 50 kilometres speed. So I heard different drivers' input, and I reflected that in the district council.

MS MAGGIE WONG: At (iii), you mentioned that some bus drivers reflected that double-decker buses are not suitable to operate on Tai Po Highway since the speed limit will easily exceed 50 kilometres per hour, even the bus is accelerated when not at a full capacity.

Can you elaborate on this. Are you suggesting that double-decker buses are not suitable for this road section? Or are you making other suggestions here?

MS WONG PIK KUI: Well, I have visited the injured, after they were discharged from hospital -- one of the victims was a bus driver, there were also lorry driver victims, so they had -- they were victims, and they told me that double-decker buses on this road is very dangerous because a double-decker bus is so large. When they accelerate uphill they have to step on the gas, and such a large double-decker bus compared to a single-decker bus, they told me that they don't want to see double-decker buses running on this section. They say it is very dangerous, and they were asking for single-decker buses. So that's the opinion that I brought back to the council.

MS MAGGIE WONG: Before we move on, can we look at the map with some of the photographs to identify the location as to how -- what it looks like now with the improvement works? That would be photo 14 to 19. That's the first reduced -- that's the first "ahead" traffic sign.

And then that's the reduction of limit 50 kilometres per hour and the road markings.

And I believe just now what we saw is the -- what you said is when the bus is driving uphill and then slightly downhill, that's the part you referred to earlier on. Is that correct? The 50 speed limit.

MS WONG PIK KUI: Yes.

MS MAGGIE WONG: And then we see the first warning sign, "Reduce speed now", "100 metres". And then the next is the second sign, and then we see a lot of -- nine of them, nine signs with amber background asking drivers to be alert to slow down.

CHAIRMAN: I think they are described as "chevrons", are they not? Nine chevrons.

MS MAGGIE WONG: If we go to the next photo we can see the reconstruction of the bus stop and the expansion of the pedestrian area.

We also see there are three new lamp posts installed in that bus stop. This is something I wish to ask. What is the lighting condition before the Tai Po accident, for this area? Do you know?

CHAIRMAN: You mean by that the street lighting? Or the road lighting?

MS MAGGIE WONG: Yes, for this particular bus stop. Because we can see there are three new lamp posts installed.

MR CHAN SIU KUEN: Basically, the lighting is sufficient, there is a requirement of a street lighting every 60 feet, and there was a tree that had shaded the bus stop, but now with three extra lamp posts there is sufficient lighting, but we are most concerned about the bend. There is a slight incline on the bend, and that is where it is most dangerous, but now with three extra

lamps or street lighting it is sufficient.

MS MAGGIE WONG: Did your council have any comments on any of these improvement measures, whether they are sufficient to address the concerns that you have expressed previously in the previous meetings? Would they be sufficient to address your concerns?

MR CHAN SIU KUEN: Well, basically, I personally had discussed with the relevant government departments including TD, so the bus stop is now moved forward, it is widened, they have removed, they felled the old tree, they widened that piece of road. And I also asked for a traffic signal, but they were not able to do that. They created some pedestrian crossing, and so the village entrance has been widened a little bit. They cannot do that right now.

So is it 100 per cent meeting the villagers' requirements, no? The village head also asked whether the bus stop could be moved further ahead, make it more visible. So TD, after looking at the actual site they said they can't do it. They said there is a very steep incline. After the improvement they have to consider the actual usage and conditions before they make further decisions.

MR CHAN CHO LEUNG: Honourable judge, I want to say that they cannot meet our requirements. Even when we provide

input regarding safety, I feel this kind of signage, the arrows, the chevrons, are only visual information, but a lot of our colleagues have provided input that when you are going downhill the most effective input is not visual input, you would need a small speed bump, or yellow stripes, when you go downhill. You can feel there is a palpable sensation, and it helps you meet the safety needs.

MS MAGGIE WONG: Did you relate the request that you made about putting speed bump or yellow stripes to allow people to feel, or there is a palpable sensation so that people feel they have to slow down. Did you relate this request to the Transport Department?

MR CHAN CHO LEUNG: We did. All councillors had expressed this, but the response was the Hong Kong TD have some constraints. The constraint is installing the yellow stripes, they can only do that at say the interchange going downhill, for example in Sai Kung where they have an incline, they have installed it there. But it is not in front of the interchange, if it doesn't go down towards the interchange they cannot do it.

MS WONG PIK KUI: I had visited this site, and in another picture where we have these nine chevrons, this is the highest point. The bus drivers say if you are driving a double-decker full of passengers they need to step on

the gas to -- and then they start going downhill. There is a sharp bend, and we also feel it is dangerous, so on this road surface, as Mr Chan Cho Leung said, can we have some yellow stripes, we had mentioned that on the site, but TD said it is not easy to implement, and the reason was given by Mr Chan Cho Leung.

We also said that the rest area, could it be relocated, and they said it couldn't, because that little resting area, that is the entrance to the Tai Po village, they need to cross the road to access the bus stop, but the bus stop is at the steepest point in this indented area, and the buses turning into that bend from the high point you have to decelerate, and then you have to turn into that indentation, so you need to consider the bus driver's skills, can they accomplish this manoeuvre. So that is something we do not wish to see repeated.

MS MAGGIE WONG: Thank you.

I'm going to refer to the last document. It is the 25 May 2018 minutes. In Chinese it is at page 826, English at page 827, where you enclosed the 25th minutes at page 828 in Chinese, and then English starts at 834.

In this minute you made a number of suggestions or expressed certain opinion. I would like to explore that with you. First, it is paragraph 4 of this minute.

Reference was made to the working hours, the Transport Department's current guidelines which state:

"The maximum duty hours of bus captains shall not exceed 14 hours."

And then it is stated there:

"It was thought that the maximum duty hours as stipulated in the guidelines is too long and caused safety concerns to passengers. It was hoped that the committee could review the issue of the overly long working hours of bus captains."

It also states at 835 in English and 830 in Chinese that:

"Irrespective of how duty is arranged it was thought that it was in fact too long for bus captains to work 14 hours on a daily basis."

My question is, can you explain why you consider 14 hours too long?

MS WONG PIK KUI: In a day, there are 24 hours, and how we distribute the 24 hours, well, they should be divided into three parts, 8 hours for work, 8 hours for rest, and 8 hours for us to, you know, take care of family, or do studying and so on. That's reasonable.

But then for 24 hours in a day now, the KMB has divided that into just two parts. In fact it is more than half of a day, it's 14 hours, they ask staff to go

to work, and here we are talking about drivers. We are not talking about someone just sitting there, and you can just close your eyes if you want, or when you are tired you can just stretch or something. No, they can't do that.

So we are talking about 14 hours, in such an important position. He is responsible for the lives of over 130 passengers on a bus, and this is totally inappropriate.

I can invite my colleagues also to give their views on this.

MR YAM KAI BONG: Thank you, Ms Wong.

On working hours we would like to say this. Especially in the New Territories, I hope you will appreciate this, for New Territories residents early in the morning they will go from New Territories to Kowloon or Hong Kong Island and then in the evening they go from Hong Kong Island or Kowloon to go back to the New Territories or Tai Po. Now this is the way of commuting. So, say, we are talking about 10 loaded buses going to Kowloon, then there won't one or two loaded buses going back to Tai Po.

In fact, bus operators said in their evidence that there are especially during peak hours, that is why there is this special shift. Maybe in the morning they

work four or five hours, then in the evenings they work another three or four hours, in between. So 14 hours is not 14 hours straight in a row driving. But they are on duty, or the so-called rest break.

Do they really get to rest during that break? Sometimes bus drivers will tell us maybe they live in Tuen Mun or Yuen Long but they are assigned to Tai Po to work, let's say they finish at 10 am, that is the peak morning shift, they may have three or four hours to take a rest, but can they really get home to take a nap, for instance? If they go from Tai Po to go home to take a nap they may spend two hours or so commuting, and then they have to come back to Tai Po, pick up the bus and then take the second shift of driving duties.

And then in between they have a few hours of free time, but can they really take a rest then? That's the question.

Now we learned this from bus drivers for the break in between there is not a proper environment for them to take a rest.

Ms Wong led us to the mainland some time ago on a study visit, we went to Hangzhou and visited a bus company. The bus company actually had a proper rest facilities, similar to dormitory for drivers to rest.

All around the world people usually work from 9 to

5, so that's why there are peak hours for travelling. But in between, probably few people take the bus, so there are such a special arrangement, but then in between, do staff really get to go home to take a rest? Probably not.

But then shouldn't the bus company have the duty to provide a good environment for drivers to take a rest? Maybe they start working at 5 am and then they have to work again until 8 to 9 pm in between do they get to take a rest.

So shouldn't the bus company have the responsibility to provide proper environment for their drivers to take a rest during their breaks?

Now I hope members of the committee will appreciate this, especially for empty bus routes, this is even more important.

Because after 9 am or 10 am, for passengers going to Hong Kong Island or Kowloon there are far fewer in number, and then probably the peak hours start again at 4 or 5 pm when people start to come home from work.

So let's say we just remove the special shift altogether, it will actually affect bus services in the New Territories, unless the bus company is to hire double the number of drivers so there would be drivers from the morning shift, another batch of drivers for the

evening shift, but if the bus companies cannot do that and they just reduce the special shifts, then for residents of the New Territories, or many of the bus routes in the New Territories will be affected, so please appreciate that.

You have to understand the way NT residents commute and how bus services are provided as a result.

MS MAGGIE WONG: Thank you.

I would like to ask four proposals set out in your minutes --

CHAIRMAN: Before you move on, on this issue of the Guideline of Bus Captain Working Hours, Rest Times, and Meal Breaks, in September of 2017, the Transport Department announced that it was reviewing the then guidelines, which was the 2010 version. Were you asked to give your views as a district council about the proposed changes to guidelines?

MR YAM KAI BONG: (In English) No.

MS WONG PIK KUI: No. We were not consulted.

CHAIRMAN: Thank you.

MS MAGGIE WONG: I would like to ask four proposals set out in your minutes. The first one is at page 836, second bullet from the bottom, in English, and then page 830 in Chinese, also the second bullet from the bottom.

You quoted Singapore as an example where the local

government is responsible for hardware assets such as bus depot, vehicles, operation system, and operators are responsible for operation. So the operators are simply responsible for the operation, and that could have additional bonus.

So first, why do you think the Singapore model, or do you advance the Singapore model as suitable for Hong Kong?

MS WONG PIK KUI: Can I invite Mr Yam Kai Bong to respond, please.

MR YAM KAI BONG: Thank you, Ms Wong.

Yes, I raised this suggestion. We have looked at studies done in the market on how bus services should be run, should buses be totally privately run as is done here now? Or should bus services be owned by the government, and they could hire staff as civil servants or it could be a public-private partnership, the Singapore model, the London model. That is, the government buys the bus depot, the vehicles, and so on, and then the routes are contracted out to contractors. Why did I suggest that? For franchised bus services, we count there are all together five operators.

So they each have their own turf, if I could put it that way. KMB, Kowloon; New World Bus, New Territories, Hong Kong Island, blah, blah, blah.

So they will just focus on profit-making routes. For loss-making routes, because they are franchise operators, they may overlook the service to the public on these routes. Perhaps Mr Chan Siu Kuen could say a bit more later.

Now, if the companies could be split up further, that is we have more companies, that means there would be more competition, then would there be a possibility of improvement? For the Singapore model, the services are contracted out to a few operators, so for the bus routes, the fare level, or staff, wages, it is for the government to decide. So their consideration is not just about profit then. They will consider whether the wage level is reasonable, for instance, and so on.

And then you can look at another place, Taipei. In Taipei there are many different companies operating different bus routes. Even for routes that are similar, there could be different operators and that leads to competition. With competition, it leads to two things.

One, because they have to, you know, fight for staff, so there may be an increase in wage, and if the routes are similar, that could also bring about competition, maybe they will offer concessions, so passengers will benefit from that.

Why we are proposing that the government should buy

up the whole bus system and then contract out the routes to different operators? Because then we could consolidate certain routes, let's say for some profit-making routes they could be packaged together with some of the less profitable routes to meet the needs of smaller groups of residents, because the needs of these residents are now overlooked, and they cannot provide more bus services in such cases.

But if a route is profitable the bus company will just focus on that.

That's why we believe the Singapore model is more flexible. If it is a totally privately run bus service, of course, first of all, companies will put profits first. They will exploit -- maybe I shouldn't say "exploit", they will see where they could save costs, they can't save fuel costs, you know, as for costs of vehicles, there's probably a world standard, so there is not much room for reduction. So they could save only staff costs, or at least they won't increase wages, and that's why some staff or unions say that the pay and conditions of service of bus drivers have always been kept on the low side.

Why is it that, it will change, that's why we say if we change the models, maybe we can bring about changes in the services provided.

MR CHAN CHO LEUNG: Let me provide two facts by way of supplement. Of course there are merits for the model proposed. One fact is there are buses without patronage, so these are the loss-making routes. Of course, bus companies are not keen on them. Let's say there are popular routes like the Lam Tsuen route, there is just one bus route so it is heavy patronage. But the bus company will still just make use of existing resources for that route to redeploy bus services to meet our needs.

These are the two facts I would like to share with you.

MS MAGGIE WONG: Thank you.

The second suggestion you made is using the real time technology, or real time information, and you asked that information be released as similar application.

CHAIRMAN: Where do we find this suggestion?

MS MAGGIE WONG: If we look at page 838 in English, and 831 in Chinese at the bottom. And 838 is the second bullet.

It states that:

"Some members indicated that because Hong Kong buses has high loss trip rate, if the bus companies are to provide this information, the passengers will discover the loss trip problem more easily and this is the reason why this realtime information has not been fully

released. He is of the opinion that the passengers' oversight will be of certain use to improve the operation of buses. It is hoped that the committee will consider to [require] bus companies to release similar application, to use technology to monitor bus service."

Can you elaborate on this about how the passenger could use this technology to monitor the loss trip rate, if I understand it correctly.

MR YAM KAI BONG: Well, let me explain that. Because it is from me. I found this information on line or it is also from my own experience. And that's why I expressed this view at the meeting.

I mentioned the Taipei Citybus information system. That's a mobile app, and on that app you can see on the map where the bus is, say, the bus is at a certain junction, or it has arrived at a certain bus stop. For the KMB's mobile app it can only show that the bus will arrive in three minutes or five minutes.

But we cannot see how long the distance is, where the bus is.

Now, why do we want to know that? If they say it is just three minutes but maybe there is traffic congestion, so it doesn't mean that the bus will actually arrive at three minutes.

The mobile app only tells us it is three minutes

journey time but maybe for the three-minute journey, if it is totally congested then maybe the bus will not arrive in 15 minutes. But if it is like the Taipei bus information system the public can see that the bus is trapped in traffic congestion two blocks away. It is like when you read the Google map you have realtime information on traffic condition whether the road is congested or not, we see there is true traffic and the bus still does not arrive in three minutes then we can ask what the problem is.

Or if we want to monitor bus service many we should say the next bus should have arrived, why is it that it is still not here after so long? Is it because of a road condition, like traffic congestion, or traffic accident, or is it a case of loss trip?

For the KMB mobile app we can't see such information and there is limited information provided. If we could follow the example of other countries or places with realtime display of information, then we can see this clearly for ourselves, we see there is a bus two blocks away, it will arrive in about three minutes and traffic condition is fine, but maybe there is another bus at a junction five minutes away but it is actually, you know, trapped in traffic congestion, for instance, and then the passenger may decide not to wait for the bus,

instead I'll take the MTR so I get a choice. But now we don't see that information.

MR CHAN CHO LEUNG: I could give you an example of loss trips. Again, I will use Lam Tsuen as an example. For the past 20 years the problem of lost trips could never be addressed. You know why? From Yuen Long, going through Kam Shan Road to Tai Po, there are so many bus stops along Kam Shan Road, by the time the buses come to Lam Tsuen there are just two or three services left and this problem can never be addressed.

The problem now is for the KMB mobile app, it may show it is arriving in 10 or 15 minutes but that is totally inaccurate. So far many have complained about the mobile app to say that the ETA is totally inaccurate.

Counsel just mentioned the paragraph, Mr Yu Chi Wing just said, the Transport Department is biased towards the KMB. Now they cannot address this problem for so many years, so TD is just defending KMB or speaking up for KMB. That's how we see it.

MS MAGGIE WONG: The third proposal you made is at page 839. At the fourth bullet, and in Chinese at page 833, the second bullet. You proposed a penalty mechanism for bus companies similar to the MTR mechanism. In other words, a fine will be imposed when an accident occurred. And

I would like to explore this.

Why do you think it would be suitable in the franchise operations environment in Hong Kong?

MS WONG PIK KUI: It was proposed by a number of members. Perhaps I will defer to Mr Yam Kai Bong. Thank you.

MR YAM KAI BONG: A number of members were of the view that when it comes to the renewal of franchise and a penalty system, there can be a mechanism put in place. We see that for the MTRCL where there are service delays as a result of incidents, they will be fined.

However, when it comes to bus companies, providing substandard service or where there are lost trips, it seems that there are no penalties.

We can't see why the government would continue to renew the franchise, say for example, for the KMB about three years ago or so when the franchise was renewed, it wasn't discussed at the district council.

For a franchised bus service using KMB as an example, the service coverage is Kowloon and New Territories. Members of the public and district councillors should be given an opportunity to speak, but I can say with certainty that district council has not been consulted when it comes to whether to renew the franchise of KMB.

In this case, KMB doesn't have to pay attention to

views of district councillors. We have, as some others members said, we have made suggestions by saying that there should be increase of service, of routes, bus companies did not respond to us actively, because we are not effectively their boss, we don't have the say when it comes to franchise renewal. The Transport Department, or the government, do they effectively monitor whether there are lost trips, and what is the service level of bus companies? We think that the Transport Department has not done their job.

For 64K from Yuen Long to Tai Po via Lam Tsuen there have been a number of problems. They remain unresolved. Bus services from Tai Po to Hong Kong Island, it seems that bus service cannot be increased. We think that it is because there is no monitoring mechanism. We do think that by introducing a penalty mechanism we will be able to, hopefully, reduce lost trips and the occurrence of incidents.

We can't stop bus companies from renewing their franchise or focusing on making a profit. With the penalty mechanism we can urge bus companies to do better.

It seems that we don't have any measures to monitor bus companies. With a penalty mechanism, members would be able to find a way to penalise bus companies should

their bus service fall below standard.

MS WONG PIK KUI: I would like to say something as the chairperson. Franchise of bus companies in Hong Kong, once they have the franchise, the government tasks the Transport Department to monitor their service and to work with them in the formulation of bus routes.

We think that the Transport Department has not devoted enough manpower to do this. In Tai Po we have over 100 routes. We have the Transport Department with us in meetings, only one representative overseeing the entire Tai Po area. We have over 100 bus routes, many buses and many drivers, and even more passengers.

We don't speak too often about this in district council meetings, but it is an important livelihood issue, because when you go to do your shopping, to go to hospital, to go to work, you always have to take a bus.

Airport bus service is very important to us as well. We have A47X from Tai Po. I use this as an example. There are lost trips. However the Transport Department, especially the higher echelons of the department don't even know that the bus driver has fallen ill so the bus remains at the terminus. If there is no one there to drive the bus, passengers will have to wait for three more buses to go to the airport.

I'm talking about between 6 and 7 am.

We couldn't find anyone when we make a phone call to try to get the problem solved.

And that's when people had to go to the airport.

We visited Hangzhou, we really appreciated the supervision of Hangzhou, because there is one single centre with many computers. You only have to key in a bus route number when information such as number of passengers waiting for a bus and all the different situations will be displayed by these computers. When it comes to Hong Kong, there is nothing like that. We have not progressed at all. Thank you.

MS MAGGIE WONG: Can I move on to the fourth proposal, because it is also on the same page, 839, the second bullet from the bottom, that the district council as a stakeholder of bus route planning and services has a close relationship with bus companies. And it is proposed that a marking scheme be added during the process of renewal with bus companies to allow district council to rate and to provide comments on the performance of bus companies.

I believe that's the fourth proposal that your counsel made.

MS WONG PIK KUI: I would defer to Mr Yam Kai Bong.

MR YAM KAI BONG: Thank you.

As I said previously, regarding franchise renewal,

it seems that the district council doesn't really have the power to make decisions. We hope that we can increase the say of district council as a stakeholder. Regarding franchise renewal, they would just come to the district council for a brief consultation, but if district council can make comments on, say, poor service of the bus company and the say of the district council would affect the government's decision when it comes to franchise, it would be good.

As mentioned in the review committee regarding the Tai Po accident, district councillors have made a lot of comments.

District council is both passive and active. When it comes to bus service we have a working group in the Tai Po District Council. We have made a lot of suggestions. But how much have the bus company and the Transport Department responded to them? If there is a scoring system, if we can make comments, and these comments would influence the government's decision on franchise renewal, then I think the bus company would listen and respond to views expressed by district councillors.

I would like to draw the attention of the Independent Review Committee that district councillors' views are not groundless. We have collected views from

the public. We are returned by voters, we speak for them in council meetings. But if our views are not addressed properly by departments and companies, then there is nothing we can do.

We think that if district council can be involved in the scoring system in franchise renewal, then bus companies would definitely listen to our views.

We think that our views can be incorporated in your review of bus service. Thank you.

MS MAGGIE WONG: Thank you.

Thank you ladies and gentlemen, I have completed my questioning.

CHAIRMAN: Thank you.

MEMBER AUYEUNG: Thank you, Chairman. I want to follow up a comment, Ms Wong, you made earlier, about you have heard comments that Tai Po Road may not be suitable for double-decker buses. Would you agree to that statement?

MS WONG PIK KUI: Well, the views I have received came from one of the injured persons. It was a bus driver. I spoke to that person. They said that there was Tai Po Road before Tolo Highway. The route number is called 872 because there was a bus route called 72. Later, there was the racecourse, this route will be used to take residents from Tai Po to the racecourse, and the bus route was therefore called 872. Later, the KMB

started to turn single-decker buses to double-decker buses.

The buses that KMB procured would be used for route 872. I said that we only asked for residents to be taken to the racecourse, and there is the Tolo Highway. If it is a point-to-point service then it is simple. You can use the other way. So that was the 872X. Do we still need to use double-decker buses for route 872? Are there so many passengers, over 100 of them? If that is the case, you can increase the service by using three single-decker buses.

CHAIRMAN: That's on the assumption that you have enough bus drivers to drive the buses.

Do you have any questions?

MEMBER LO: I just have one clarification question, Ms Wong.

You mentioned about when the speed limit was reduced from 70 to 50 certain drivers of coaches expressed some concern. Is their concern that lowering the speed limit does not deliver, or what is their concern?

MS MAGGIE WONG: They said to me that at the highest point, well, they have to use 70 kilometres per hour because when the bus is fully loaded they couldn't effectively control the bus at 50k per hour. However, I think that for this section of the road, safety is paramount. So we asked for the speed limit to be reduced to 50.

That's the view they expressed to us in this regard.

CHAIRMAN: Well, it remains for the committee to thank you, Ms Wong, and gentlemen, for assisting us with your evidence. The committee is interested in receiving the views of the district councils, which is why we have invited you and two other district councils. We are charged to make recommendations in relation to safety of buses, to enhance bus safety, not wider issues.

But it is in that context that we have been most interested to receive your evidence, Mr Chan, about the concerns that you have expressed specifically about this very stretch of road in terms of the speed limit and the need for cameras. And we thank you for your evidence on that subject.

We are now going to adjourn the proceedings for 20 minutes.

Dr Lau.

DR LAU CHEE SING: (In English) Will we be given a chance to express some other issues regarding the bus service?

CHAIRMAN: If they relate to safety, please do.

DR LAU CHEE SING: (In English) Should be related to safety.

CHAIRMAN: Yes.

DR LAU CHEE SING: (In English) After the adjournment?

CHAIRMAN: Well, we have already been under way for 2.5 hours. But how long do you expect to take? Because

we have given you an opportunity to give us written submissions.

DR LAU CHEE SING: (In English) In that case let me express some views which I received regarding the bus drivers' view.

CHAIRMAN: Yes, please do.

DR LAU CHEE SING: (In English) I will express it in Chinese.

CHAIRMAN: Yes, of course.

DR LAU CHEE SING: Chairman, it is unfortunate that we have had the Tai Po Mei accident. People have the impression that it was the bus driver who has committed careless driving. When it comes to franchise bus service, bus drivers play a very important role. As my colleagues said, there are over 100 passengers on board, so the professional knowledge as well as the driving attitude of drivers are very important.

There are some friends of mine who are bus drivers, they expressed my views to me when they knew I was going to come here.

They said that it is about management and staff deployment of bus companies. They don't have sufficient experience. That may be the reason.

They said that when it comes to deployment of bus captains, if bus captains are deployed to unfamiliar

routes, there will be tremendous pressure. They asked for a chance to familiarise themselves with the route before they are deployed. That is something about staff training.

If they can be given an opportunity to familiarise the route before they drive a bus load of passengers, it would be better.

And if they are deployed to drive new buses, they should be given a chance to familiarise themselves with the new bus. That's the view they expressed to me.

There is a third point. It is about bus schedules. There is a pre-set time. Bus drivers think that the time is not enough, and if that is the case, they will have to speed up to catch up. And as a result, there may be dangerous situations.

These are the three points I would like to say.

And I hope the committee can take note of these issues and you could follow up with bus driver associations and other related associations, and hear their views as well, thank you.

CHAIRMAN: Yes. One matter on that last point you raise, Dr Lau, this is a generic complaint that we have heard about, that journey times are too short. But what we need is evidence that the times are too short. So if your bus driver/captains can communicate with us with

specific examples that the route from A to B is set at a one-hour journey time, but in fact can it take more than that, that's the kind of information the committee needs.

DR LAU CHEE SING: The honourable judge, in my constituency, 75K, since I have been in office, the bus travel time has been adjusted. The timetable was roughly 35 minutes from Tai Mei Tuk to Tai Po, and they felt that is too rushed. So ultimately it was adjusted to 45/50 minutes, it allowed the bus drivers during the journey they would not feel that it was an unreasonable demand for bus drivers. So if you ask KMB for the timetable, that is a fact. So they had made some adjustments.

CHAIRMAN: Yes, it is really the ones that remain a problem that, if somebody gives us evidence about that, then we can take that up.

DR LAU CHEE SING: Do you mean I need to provide this evidence?

CHAIRMAN: Somebody needs to give us evidence. We have anecdotal or generic assertions that are made that journey times are too short, bus drivers therefore speed up, they are worried about losing rest time, but we need to have evidence to support that, not just sweeping statements.

DR LAU CHEE SING: Okay.

CHAIRMAN: Thank you.

MR YAM KAI BONG: I would also like to supplement. The request for evidence, well, if you look at the bus companies, the average travel time, well, I recall there was a statistic, but I cannot recall where it originated from. In the last 10-plus years, the average travel time has been slower and slower. So the bus speed is slower, and have the companies deployed sufficient drivers to maintain the service? Because when vehicle speed is slowing down that will lead to longer travel time, and if you maintain the frequency of service, then you need to add drivers and add to the fleet.

So that is in direct proportion, so as councillors we feel that you need to maintain the service, you cannot have loss of service, but then the road is more and more congested, we have more and more vehicles on this road. So TD, did they communicate with the bus company, to deploy more staff, deploy more resources? That is something that needs to be looked into.

There are statistics, but I cannot recall or cannot confirm the source, the average bus speed has been slower and slower. So district council has asked for special bus routes, and other measures, so we could look into that. Thank you.

CHAIRMAN: Thank you. Mr Chan.

MR CHAN CHO LEUNG: (No interpreted channel recorded) -- when they look at signs that is insufficient, so as a motorist we feel if there is a palpable sensation, if you can feel a speed bump you can slow down. So I hope for village roads that are going downhill that there can be some speed bumps.

Another suggestion is that in villages downhill areas where there are bus stops, there should be barriers. These barriers are very important. For example, on the last occasion we have a wishing tree, there is a bus stop, and I asked for a few years to add a barrier railing, and they had neglected us. But that is necessary because it is going around a bend and it is going downhill, so it is very treacherous for a double-decker bus if it is a full of passengers, and if they skip the bus stop they are travelling at even higher speeds. So passengers waiting at the bus stop feel terrified. So we need some barriers.

CHAIRMAN: Thank you.

If that concludes the various views that you wish to give us, and we have made our invitation, Dr Lau, the committee is open to receiving further information that addresses the topic that you have raised.

But it remains for us to thank you very much for attending today to assist us, and to encourage those

that are waiting to give evidence, that we will hear their evidence soon, but we are going to take a 20-minute break now. Thank you.

(11.46 am)

(A short break)

(12.05 pm)

EVIDENCE FROM SHA TIN DISTRICT COUNCIL: MICHAEL YUNG

(Given in Cantonese; transcription of the simultaneous interpretation)

CHAIRMAN: We will now move to receive evidence from Mr Yung on behalf of the Sha Tin District Council.

Thank you for accepting our invitation on behalf of the council to attend to give evidence, and I will ask Ms Wong to begin by asking you questions.

Examination by MS MAGGIE WONG

MS MAGGIE WONG: Thank you for coming, Mr Yung.

I have a few areas of questions for you. First of all, may I take you to your discussion paper dated 8 January 2013. Page 631 in Chinese and 637 in English.

CHAIRMAN: Which bundle?

MS MAGGIE WONG: DC bundle 2.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Mr Yung, if you take time to read this page, this is a question raised by I believe district councillor Ms Yeung Sin Hung, and she raised questions

on behalf of the Sha Tin District Council relating to the lost trips and working hours of bus captains.

She said that she received first complaints from residents that there was a situation of lost trips of buses during peak hours; and secondly, she observed that some bus captains had no rest time between too long a bus trip.

Can you tell us something about this complaints, Mr Yung?

MR MICHAEL YUNG: Let me first of all say this. Ms Yeung Sin Hung is a former district councillor. Now I would like refer to the minutes of the meeting, the Chinese version, because the Chinese version is the one confirmed by members. As for the English version, it is just for summary reference.

The government counsel would like us to talk about rest hours, and lost trips, right?

Ms Yeung Sin Hung referred to E42, this is Long Win bus route. My understanding that Long Win operates franchised bus services to the airport.

So Long Win, compared to its parent company KMB, is much smaller in scale. Therefore, it has fewer bus captains, and so if bus captains are absent from work then it is easy to have lost trips.

MS MAGGIE WONG: Yes, I am more concerned about the problem

about the journey time being too short, and then the driver have to speed up and to make up the time, for example there may be traffic jam and then there may be other problems on the road. And by the time he got to the station, it is unrealistic the journey time, let's put it this way. And then he has to make up the time, and by doing that he has to speed up. I'm concerned about this issue. Maybe you can enlighten us. During your time as district councillor have you received complaints in that regard?

MR MICHAEL YUNG: Now, the journey time you mentioned, perhaps I could put it this way. I understand that during different times of the day, let's say the morning peak hours, the morning non-peak hours, the evening peak hours, and the evening non-peak hours, in theory there are different bus schedules or there are -- there is a different journey time rather, on that basis they would compile a schedule. So it is possible that one driver may use one or more than one vehicle to go on the same route. So they could achieve the standard schedules on the bus schedule.

Now there is a system. They call it, you know, hopping planes, that's the jargon bus drivers use. Let's say bus captain takes the E42 route primarily, but then, say, at Ma On Shan there is another route, A41P,

it goes from Wu Kai Sha to the airport, ETC, that is the transport centre of the airport. So sometimes they may need buses from the E42 route to drive on the A41P route, and if there should be problems with the A41P route, that means the E42 routes would also suffer at the same time.

There could be two scenarios. One, for this reason, during the highway section bus drivers may have to make up for the lost time. But I understand there is a limit on bus speed. So when it is approaching 70 kilometres per hour there should be a speed limiter to prevent the bus from going any faster, but on other sections along the route, or on road sections where the speed limit is lower than 70, if the buses go faster we cannot control that.

That's the first scenario.

Another case is, say, if they couldn't catch up with the lost time, then it is possible that for the next bus service there is a delay, or they need to take special measures to make up for part of the trips. Let's say instead of starting from the airport, maybe the bus service would start midway along the route to make up from the journey time.

So it depends how much time is lost when the bus arrives it the terminus. My understanding is that the

bus stop officer on duty would decide on that, or there is a rostering system from the bus company and then the bus captain would be told from where to start his service.

MS MAGGIE WONG: And on this page, there is another issue that touches upon the long working hours of bus captains, and when the Transport Department in September 2017 reviewed the guidelines, did they consult your district council as to those guidelines, as to the proposed revision of those guidelines?

MR MICHAEL YUNG: From my recollection, I am the deputy chairman of the transport and traffic committee of the Sha Tin District Council. Of course I have no power to decide on the agenda of our meetings, but from what I recollect, since 2016, that is for this term of the district council, of all the TCC meetings we have had, I don't recall having discussed the Guideline of Bus Captain Working Hours, so our views have not been sought.

MS MAGGIE WONG: And what was your district council's opinion on these guidelines?

MR MICHAEL YUNG: Since we have not had a discussion, as in a formal discussion, there is no formal records. If you ask me personally, I believe the working hours of bus captains are on the long side.

Let's say for security guard, the longest working hours are 12 hours, and as some colleagues from the Tai Po District Council said just now, we only have 24 hours in a day. If the working hours are longer than 12 hours, that means the rest time and time for other activities would be reduced. Let's not forget, for colleagues of bus companies, they have to start early in the morning, and finish late at night, and there may not be a convenient mode of transport for them to go between their place of work and their home. So if you take out the travels hours as well, do they really have eight hours of rest a day? That remains a question mark.

So if you ask me personally, I believe a maximum of 14 working hours for someone who has to look after road safety as well as being responsible for the safety of passengers on board, then the hours are far too long.

MS MAGGIE WONG: The reason I'm asking is because if you look at your district council's minutes, TT paper 23/2017, Chinese at page 709 to 710, English at bundle DC-2, page 714 to 715. It is a question from Mr Chiu Man Leong, in relation to the bus accident.

And the comments from Mr Chiu was that the guidelines in terms of the working hours are too long, and the drivers do not have enough time for rest. He expected the Transport Department, and bus company to

make a review so as to reduce the maximum working hours of drivers to 10 hours.

So --

CHAIRMAN: What is the date of this meeting?

MS MAGGIE WONG: Chairman, I believe this date of the meeting is.

MR MICHAEL YUNG: (In English) March 8th, 2017.

CHAIRMAN: Thank you.

MS MAGGIE WONG: So it appears that your council has made certain position on the working hours. Did you consult trade union about the maximum number of working hours?

MR MICHAEL YUNG: I have not consulted the trade unions on what would be the suitable working hours. But as a passenger, or as someone from the local community -- now I have been in contact with some of our residents, they are bus drivers as well. In general, they start the day early and finish late. Let's say we take the morning shifts. Now my constituency is Tai Shui Hang, Fu On Garden. The nearest bus depot is in Sha Tin, Yuen Shun circuit, opposite Yu Chui Court. The journey time is about 15 minutes.

Now, usually, bus captains will have to take their company coach at around 4-something in the morning, and then they arrive at the bus depot at about 5-something in the morning to report to duty. And then they would

take their bus or they go on some other buses, and then get to the point where they would pick up their bus. In between, actually, for the shifts arranged, it could be about them starting off only at 6 or 7 am in the peak hours.

So in between there is no way they could take a rest, because at the bus depot there may not be an ideal environment for them to take a rest. That's the first point.

There is also this situation. In order to set out punctually, they would have to drive the bus to a relevant terminus, or substation. There may not be a staff rest kiosk for them to rest inside. So they will have to stay in the bus to rest.

Under the requirement by the Environmental Protection Department to turn off your engine when the vehicle is idling, that means bus drivers cannot start the engine to keep the air conditioning working.

So they will have to be stuck in a very close and stuffy environment when they are waiting to start their driving duties. So bus drivers don't have a place to rest, and they can't properly rest. That would result in a drop of their driving performance. So if you ask me whether there should be more rest kiosks or a place to rest before they start their driving duty. I think

we can look into that.

In relation to work hours, I know that there is a dilemma. Tai Po District Councillors have talked about work hours and the transportation, or traffic pattern of the New Territories. In the morning you will find a lot of people travelling from the New Territories to urban areas, for example Kwun Tong, Wanchai or Chai Wan. There needs to be really frequent bus services to take passengers to work. However, these buses will have to return to do the next trip. But the return trip is not as frequent. When it comes to planning the working schedule for bus drivers, they would require a lot of people to drive buses.

However, during non-peak hours they don't need that many people.

Then later in the evening peak they will need a lot of people to drive buses to take passengers from urban areas back to their own homes. So the actual driving hours may not be as long as 10 hours. But the work hours, that is the time on standby and the time on driving duties, can be as long as 10 to 14 hours. Without a proper place for them to rest, bus captains can only find a place to rest in shopping malls, or stay in a rest kiosk cramming up with other bus drivers trying to rest. I do think that bus companies should

provide suitable rest facilities for bus drivers to take on special shifts.

CHAIRMAN: Can you identify a place that does not have a proper rest facility?

MR MICHAEL YUNG: Perhaps I can do it this way. There are not many places where there is rest kiosk for staff members. In my constituency, at one point, bus companies asked us for our views about increase of rest facilities. It was about six months or nine months ago. Well, these staff rest kiosk is not just to partition an area. They will have to connect water supplies, electricity --

CHAIRMAN: Mr Yung --

MR MICHAEL YUNG: If you ask me --

CHAIRMAN: We are familiar with what the problems are, because we have received a lot of information about the difficulties in constructing these kiosks: water, sewage, electricity. Just give us an example of a place and we will go and visit it.

MR MICHAEL YUNG: For large terminus, say for example New Town Plaza, Sha Tin train station. There are no large-scale rest kiosk. So you can --

CHAIRMAN: Sha Tin train station?

MR MICHAEL YUNG: Sha Tin PTI under New Town Plaza is the public transport interchange, and also Sha Tin train

station, the rest kiosk is small, and there is only one.

There is also another bus company, Citybus. They don't have a proper staff rest kiosk for bus drivers of another bus company to use.

CHAIRMAN: Thank you.

MS MAGGIE WONG: You mentioned that one of the bus companies asked your views, your council's views about the facility. Is it in writing?

MR MICHAEL YUNG: At that time it was asked verbally. If I remember correctly, there was a consultation paper. It was done via the Transport Department and the district office. I think it was around March or April this year. I have to find the document, and I will give it to you after the hearing.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Thank you.

Mr Yung, I'm going to ask a few questions about accidents that happened at a few locations. First is the Lei Yue Mun accident, which I believe your council has raised a lot of questions. If I may take you to page 709 in Chinese, and in English at paragraph 133. In English at page 714.

CHAIRMAN: What's the date of this document?

MS MAGGIE WONG: March. I believe it is also in March 2017.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Now this accident happened, and then -- one of the questions raised by Mr Chiu --

CHAIRMAN: When was the accident?

MS MAGGIE WONG: The accident was in January 2017.

CHAIRMAN: Thank you.

MS MAGGIE WONG: And Mr Chiu Man Leong raised a question regarding the accident. And one of the questions he asked is whether the companies allowed drivers to work part time for long hours after their normal work.

And he quoted some examples, for example as part-time bus or minibus drivers.

If we look at the reply of the Transport Department at page 707.

CHAIRMAN: Paragraph?

MS MAGGIE WONG: The paragraph at the top. "Reply from the Transport Department".

If I may go back, actually, it is 706, the question is at 706, and it identified the vehicle accident on 14 January 2017 of number 681 bus of KMB. And the bus drove to Lei Yue Mun.

MR MICHAEL YUNG: (In English) It is Citybus, not KMB.

CHAIRMAN: That's a typographical error.

MS MAGGIE WONG: Yes, that is a typographical error.

"When the bus travelled to Lei Yue Mun Road and approached the Lam Tin bus station, it bumped into the

ramp stone crack in the middle of the road and turned over towards left as it was out of control. Tens of people were thrown out of their seats ... and several people were trapped ..."

Regarding this incident, they raise a number of matters.

First, is the condition of passengers on scene. Second, bus company, did the company follow up? But I'm more concerned about (c), (d) and (e). The (c) issue is about the health condition of the driver, whether it conformed to standards.

Second is the existing design of the pavement and ramp stone crack increase.

And the third is the design of the bus running in Hong Kong, whether it guaranteed passenger safety.

And the Transport Department gave a reply on the next page.

CHAIRMAN: Before you move on, surely the question that is relevant to our topic is (c):

"Do the government and bus companies allow drivers to work part time for long hours after their normal work as part-time bus or minicab drivers for example?"

MS MAGGIE WONG: If we see the reply from the Transport Department over the page at page 707, the Transport Department did not appear to answer the second part of

the question that the chairman just read out. Instead, they made quite a generalised answer if we look at page 707.

The second paragraph:

"We have formulated guidance on the shifts of bus drivers, including working, rest and meal time. The shift arrangement of the driver involved as well as his schedule before work conforms to the requirement specified in our guidance."

Et cetera.

Then he did not address the question whether part time drivers can work for long hours after their normal work.

In relation to this issue, did your district council follow up on the Transport Department's reply?

MR MICHAEL YUNG: From my recollection, in the meeting our focus was on the traffic accident. We did not discuss in detail about part-time bus drivers are allowed to carry out driving duties for how long. As I recall, during the renewal of a franchise of bus companies, the community was very concerned about lost trips. As a result, bus companies introduced a lot of part-time bus captains to deal with the situation. There are two groups of part-time bus captains. For one, they have a job during the day and then they will drive for a few

hours in the evening.

Administration staff of bus companies have driving licence to drive buses. That is what I know.

If the Transport Department only focused on the driving hours then they would always meet the requirement. Because they don't take into account the working hours of their main job. But if there are ways for bus companies to record their own driving duties, if the part-time bus captains have a principal employment, you won't be able to find out whether the principal employer allows these people to take up driving duties after work. I don't know whether these part-time bus captains are required to report the exact number of hours they work in their principal employment.

So it is very difficult for bus companies to know whether these part-time bus captains are working exceedingly long hours.

The guidelines they have don't target part time duties, and the problem is that bus companies do employ part-time bus captains, so I think it is a matter of chicken and egg.

CHAIRMAN: The problem is if the bus companies don't ask the questions about what their part-time drivers do in the rest of their day?

MR MICHAEL YUNG: (In English) Yes.

MS MAGGIE WONG: Given this is a concern, did your council raise these matters with the Transport Department as to the monitoring mechanism?

MR MICHAEL YUNG: Of course district councillors expressed the view. After the meeting we asked for guidelines on working schedules, and that guideline does not cover part-time bus captains and that is the focus.

We tried to follow up on this matter but they never dealt with it, so there are no ways for us to pin them down to get them to resolve it.

CHAIRMAN: Did you do so in writing?

MR MICHAEL YUNG: In the meeting, apart from moving a motion -- well, if there was a motion, then the department will be asked to follow up. As to whether other councillors have been chasing for a reply, I don't know, so I don't have the information as to whether it was done in writing. I believe that district councillors of different parties have mentioned this in unofficial meetings of the Transport Department, and I have raised this issue as well. I've raised it with Citybus, First Bus, KMB and the Transport Department. And as to whether bus companies have actually implemented anything to address the problem, I think it is for bus companies to answer.

CHAIRMAN: When you raised these matters with those parties,

you did so orally, rather than in writing?

MR MICHAEL YUNG: (In English) Orally. Orally during meeting.

CHAIRMAN: Thank you.

MS MAGGIE WONG: The second issue identified at page 706 is the design of the pavement and ramp stone crack increased the probability of serious bus accidents, that's (d), page 706 at (d). And the reply from the Highways Department and Transport Department is at page 707. It states, if we start from line 2:

"The open end of the fence railing uses an inclined stone crack, which can reduce injury to drivers and passengers when any vehicle runs into the fence railing, if it is out of control. The Highways Department, together with the Transport Department, continue to inspect the protection facilities on the existing public roads and install appropriate protection facilities on new and existing public roads according to the actual conditions and needs."

It states that the Transport Department and the Highways Department will continue to inspect these protection facilities. Did you follow that up with the Transport Department?

MR MICHAEL YUNG: In the minute, paragraph 135(a) and (b), it was mentioned at that time that the design of the

road does not allow that to happen. We have been asking them to do something that is similar to a U-shape, so when there is a crash the vehicle will be made to go a certain way. I know that on highways this design would be adapted. If I remember correctly, in the part of Tai Po District Council, there is this design in the new bus stop in Tai Po. On that day, the Transport Department told us that it could only happen on highways.

If that is the case, we then understand that from Kwun Tong bypass there was the speed limit of 70 kilometres per hour. That would be suitable to have this kind of protective facilities installed, because the design is to absorb the impact.

So what we are saying is these locations should be reviewed as soon as possible. I recall there was an engineering diagram just now, there was a location where it was installed.

MS MAGGIE WONG: If we continue, I'm moving on -- I think you may be referring to TD bundle, bundle 5, page 1617.

If we enlarge the --

MR MICHAEL YUNG: That is correct. We are talking about the crash barrier. In my understanding, that location is suitable for installing this type of equipment. It is not a highway, and I should put it this way. The TD

highway design is based on transport design and planning manual. They have different paragraphs describing highway design. So if you ask me whether the initial design was up to standard, that I can reserve for the experts to comment on, but if we are talking about access roads leading up to the highways, these crash barriers were not installed. Now, if a barrier is installed and if a car or vehicle crashes into it, it will be stuck in that material, and they won't create a serious accident.

MS MAGGIE WONG: Is that what you are referencing in paragraph 135(a) and (b)?

MR MICHAEL YUNG: Yes.

MS MAGGIE WONG: And the Transport Department, I believe is set out at paragraph 138. English is at page 717:

"Mr Fung Ka Chun, regional engineer of ... Highways Department ... indicated in his reply that the Lei Yue Mun Road is designed as ramp type, aiming to reduce the injury to drivers and passengers when any vehicle bumps into the fence as it is out of control."

Then on, over the page, 718:

"On the highways with maximum vehicle speed of 70 [kilometres per hour], the Highways Department also installs organ type safety fences. As the Lei Yue Mun Road does not satisfy the conditions, the existing stone

crack design conforms to relevant standards. The Highways Department will improve the facilities here according to actual conditions."

In other words, they refused your suggestion. Is that correct?

MR MICHAEL YUNG: Correct. But take note, you said in bundle TD-5. The original speed limit was 70, and because of this traffic accident the speed has now been reduced to 50. So that means we have one country, two systems.

So highways, when they have a 70 kilometres standard, they had not reviewed this location and whether it was suitable to install a crash barrier. So the committee in our special meeting, we had requested all the government departments regarding their previous responses, they should have reviewed those responses and see whether a new response was appropriate. In my understanding, the Highways Department did not provide an updated response.

In other words, essentially I can only say that TD and highways they did not look at it from a comprehensive safety perspective. They only dealt with the issues as they arose. They did not implement further designs to ensure motorist safety and pedestrian safety, and I expressed my regret regarding this

situation.

MS MAGGIE WONG: I will now move on to the A Kung Kok Street, which relates to another accident. The minutes or the discussion paper is dated 8 May 2018, entitled "TT paper number 26/2012". It is at page 610, in English, and Chinese at page 607.

In the second paragraph, I believe it is Mr Yeung Cheung Li in the Traffic and Transport Committee of Sha Tin District Council, raised questions about the safety at A Kung Kok Street. In the second paragraph he pointed out that there had been many serious traffic accidents taken place at A Kung Kok Street.

Do you know about all the complaints or these accidents mentioned by Mr Yeung?

MR MICHAEL YUNG: Mr Yeung Cheung Li was an ex Sha Tin councillor. He did not raise specific questions regarding a specific accident, but I recall that there was a traffic incident that had a lot of fatalities and injured people. I recall that in the morning an 89D bus heading towards Kowloon, they couldn't brake in time rammed into either a 85K or 86K bus, and it led to some 30-plus people being injured. And at the time, after the accident, I had visited the site and I had seen the injured people, and I also helped with the claims, the injury claims of the victims.

So that was a bus accident, and subsequently there were some other accidents relating to minibuses, and there were also some fatalities. I think Mr Yeung's question about fatalities and injuries was not just limited to buses. There were other accidents in that question. So that is my understanding.

Second, why A Kung Kok Street is accident prone, that is because A Kung Kok Street is a dual lane dual carriageway road, and from my constituency, Fu On Gardens to the interchange, there are two crossing lanes and one traffic light, if I remember correctly, and there are also three T-sections to Mui Tsz Lam Road, Ah Kung Kok Fisherman Village, and to Sha Tin Hospital. There is also another road heading up to A Kung Kok Street. So there are four branches of the road, and the design of all four sections have a yielding -- has priority junctions, it is not a signallised junction, and this yielding design has to accommodate low traffic flow. But a lot of times, the motorists, when they use these sections, they are not very careful, and that leads to traffic accidents.

So that is one of my understandings that I have regarding that situation. So aside from the morning and afternoon busy hours where there are a lot of trucks and lorries, there is not a lot of traffic, because we have

another highway, Ma On Shan highway, and that is a dual-lane six-carriageway highway and they can travel at 60 to 80 kilometres, so normally private vehicles will not traverse that section of road. But in the morning, maybe people want to avoid congestion so some private vehicles will use that road. But typically, the incidents, traffic incidents don't occur in the morning. Usually it is smooth driving, there is no speed camera, and there is only one traffic light, it is also a manually controlled light where that leads to Sha Tin hospital. So the motorist might not be complying with the 50 kilometres speed limit. They might be going at more than 50 kilometres.

So it is relatively easier to have traffic accidents there because of that design.

MS MAGGIE WONG: If we look at page 611, there are certain figures provided by the Hong Kong Police from 2007 to 2011.

Is it within your council's knowledge, whether the occurrence of the accident has increased, decreased, or remained constant in the years after 2012? Did you make enquiries?

MR MICHAEL YUNG: (In English) No.

MS MAGGIE WONG: If we look at the question raised by Mr Yeung at page 610, he asked whether the Transport

Department have any short-term or long-term plans to resolve the problems at A Kung Kok Street, and the Transport Department advised four matters. And that's at page 611. First, question (d). The Transport Department mentioned there is no obstruction to driver's line of sight, the design conforms to the present road design standards.

And then the third, it had been considering whether to enhance the traffic control over this section.

Lastly, the 16 April 2012 incident, the Transport Department had reminded the bus companies to enhance the training of drivers and would make further improvements upon knowing the results of the police investigation.

So did your council follow up with this? Or you are satisfied with the answer provided -- first of all, are you satisfied with the answer provided by the Transport Department?

MR MICHAEL YUNG: Well, on page 613 of the minutes of meetings, paragraphs 67(c) and (d), I had made some recommendations. So they say they want to have double white line to prevent traffic violations. So in Texaco Road, there was a fatal accident near the bridge, and they had added these double white lines, so we thought that that was very good improvement, but I recall that that suggestion hasn't been taken up.

And in paragraph (d), the police don't have a laser gun, they will use their unmarked vehicles, and they would deploy these unmarked vehicles on highways. They don't deploy unmarked vehicles on local roads. But after that question the police in fact did deploy more laser guns to detect speed on A Kung Kok Street, and the installation, if I remember correctly, was the exit of A Kung Kok fisherman new village, and they would test vehicle speeds for vehicles entering Ma On Shan, because after Sha Tin hospital, after the traffic light, it is a straight road, and motorists tend to drive at a higher speed. But TD, at the yielding area, they had issued a works order to widen that area, but even if the yielding area is widened, because there is a hospital there, there are visitors or people queuing.

So even if you increase the yielding space, sometimes the buses, they have to wait, or they might even have to allow passengers to embark, disembark at the road side. So it is not very effective.

MS MAGGIE WONG: I can see at page 615 there was a provisional motion passed by Mr Yeung demanding for a -- paragraph 73 in Chinese, and at 618 in English, paragraph 73.

There was a provisional motion passed by Mr Yeung demanding a comprehensive review of the road design of

A Kung Kok street, including making the street wide and installing additional speed camera. So did the Transport Department respond to this request?

MR MICHAEL YUNG: In paragraph 13(1) the police had stepped up law enforcement. There was not any patrolling, and they started to patrol, and the design of A Kung Kok Street, regarding the widening of A Kung Kok Street and installing speed cameras, and up until now we still don't have the cameras. The widening of A Kung Kok Street, next to it is the Ma On Shan road, there is a divider, and that is where the Ma On Shan rail is located. So by widening A Kung Kok Street we need to start from Fu On all the way to Sam Mun interchange.

But I think it would be difficult to identify suitable locations to widen the road because widening a road according to the planning standards, 3.6 to 3.7 metres is required to accommodate an extra traffic lane. But my understanding is the pedestrian minimum width is 1.5 metres so. That means, given limited space, if you widen the vehicle's space, and if the pedestrian space is not wide enough, then the Transport Department will not proceed with the works because if the pedestrian sidewalk is too narrow they cannot accommodate wheelchairs, so they did not install cameras, they did not widen the area, and I think the

widening was constrained by the space, so relatively speaking, the cameras are easier to install.

MS MAGGIE WONG: I see the time.

CHAIRMAN: We will carry on.

MS MAGGIE WONG: Carry on.

CHAIRMAN: I think we are moving into areas that are a long way away from making recommendations about bus safety.

MS MAGGIE WONG: Yes, I believe there will be one or two topics, and I will complete the documentation.

Mr Yung, you referred to in your minutes of the meeting, I believe it is TT paper 3/2017. If you go to page 710, Chinese.

CHAIRMAN: What is the document we are going to?

MS MAGGIE WONG: This is a minutes of meeting of Sha Tin District Council. TT paper --

CHAIRMAN: We don't need the paper number. What is the date?

MS MAGGIE WONG: I think it is still March 2017.

CHAIRMAN: Yes.

MS MAGGIE WONG: If we look at paragraph 134(a), it raised the suggestion that bus companies should assess annually if bus captains suffer from sleep disorder.

CHAIRMAN: Sleep apnea.

MS MAGGIE WONG: Yes, and did you follow up with that suggestion? Or did your council follow up with that

suggestion?

MR MICHAEL YUNG: I need to check with that. Because we have some colleagues following up on whether the suggestions were acted upon, and if there were some motions the government departments would respond at a later date, and in the next meeting in the matters arising, it would be dealt with. And if not, then my understanding is the government department would take note and would see whether the opinion could be implemented.

I do not have the document at hand. That is the paper on the matters arising. Maybe I have to go and check whether it is covered under matters arising.

CHAIRMAN: Perhaps if you can locate it in due course you can provide it to us if it is relevant.

MR MICHAEL YUNG: Okay.

MS MAGGIE WONG: Mr Yung, I'm coming to near the end of the topic. It is the Tai Po Road which you have expressed in a discussion paper at page 727.

This is a question raised by Mr Yiu Ka Chun in question (b) and (c). And the problem is, they raised the question about Tai Po Road, Sha Tin Heights section, that it has a number of potentially dangerous locations and bends. At Chinese it is at page 719.

Do you know how Mr Yiu came to the view that this

particular section is potentially dangerous, that it is a dangerous location and bend? Is it because he received complaints, or can you tell us why?

MR MICHAEL YUNG: Are you asking me this? That is for that location on Tai Po Road why we consider it dangerous, is it because we have received complaints, right?

Now, Mr Yiu is not here. Please give me some time to read the document.

CHAIRMAN: Yes, take your time.

MR MICHAEL YUNG: I believe, having read the document, the location referred to by Mr Yiu Ka Chun is -- well, because there are different locations along the Tai Po Road, and the section referred to falls within Sha Tin district, that's the Sha Tin section. I believe you are talking about question (c), the location mentioned in question (c), right? Is it question (c)?

(In English) Is it question (c)?

CHAIRMAN: I think it is, yes.

MR MICHAEL YUNG: Okay, because for the entire Tai Po Road, of course there are various sections. If I recall, within Sha Tin, there is the Sha Tin section, the Sha Tin Heights section, the Piper's Hill section, and so on. And I think Mr Yiu is referring to the Sha Tin section near the Luk Hop new estate, and there have been fatal accidents there involving buses. But if I recall

correctly, I believe it is someone ramming into the buses, not the other way around.

MS MAGGIE WONG: If we look at page 728, question (b) at the bottom. The answer from the Transport Department. In spite of the speed limit from Tai Po Road, Sha Tin Heights section to Tai Po Road Piper's Hill section is 70 kilometres. And this section is about 1.7km long with two sharp turns. The remaining 1.4km is close to Sha Tin and the speed limit is 50 kilometres with three sharp turns. The locations of sharp turns are set out on the next page.

Then it states that:

"A number of traffic signs on speed limit have been erected in the proper location on the Tai Po Road ... to and from, including road sections where the speed limit has been changed. Furthermore, the warning traffic signs have been erected in front of sharp turns and the 'slow down' road markings have been added on the road to remind the driver to decelerate before the sharp turns."

Now the Transport Department was aware of the sharp turns, and the speed limit of this road section. Are you satisfied with the Transport Department's answer that it is sufficient in terms of road speed limit and in terms of traffic -- sufficiency of traffic signs.

MR MICHAEL YUNG: Perhaps I would speak as a motorist.

Because sometimes I would go via Tai Po Road to drive between Sha Tin and Kowloon. Now, the location in question, here there are sharp bends. In addition there are uneven road levels, it could be slanting in one way or the other.

If a car travels at 70 kilometres per hour, along this section, and if we have weather like today, that is a rainy day, then it is possible that there could be a crash.

So this is a little similar to the case, you know, under your investigation at Tai Po Road. The sharp bend is not the main consideration, but rather you can feel that the cars, you know, are travelling at different levels, so for people with lesser driving skills there is a chance that they may cause traffic accidents. And that explains why there are so many traffic accidents along that section. Because if I recall correctly, I think on both sides -- no, no, for the Luk Hop Village, going out 70 kilometres coming back 50 kilometres, if I recall correctly.

MS MAGGIE WONG: Thank you. Lastly, I would like to refer to you a minutes of meeting, page 736 in Chinese, and 743 in English.

It is also by Mr Yiu Ka Chun.

CHAIRMAN: What is the date of this meeting?

MS MAGGIE WONG: It is minutes of meeting, but it does not bear a date, but it has the paper number 2/2018. I assume it is in February 2018. Following the Tai Po Road accident.

It starts, in Chinese, page 735. And in English at 742.

If we look at paragraph 128(c), the comments by Mr Yiu Ka Chun was that there were three different speed limits in different sections of the Tai Po Road, which would make it hard for drivers to adapt.

And he asked whether the Transport Department would review this situation and mount additional speed monitors.

Can you see that?

MR MICHAEL YUNG: Yes. I see that. So you are asking after that meeting whether the Transport Department conducted any review, is that your question?

MS MAGGIE WONG: Yes, but I think to facilitate your consideration the Transport Department did respond at the meeting at 132, paragraph 132. English at page 746. Chinese at 739. In short they said that the section had been provided with clear signs for speed limit and turns to alert drivers.

So did your district council follow up or did your district council deal with this matter after this

meeting?

MR MICHAEL YUNG: I have to go back to what I said before. If there is a motion, yes, they will follow up on it. If there is not a motion, then we will have to look at whether there is response in the supplementary information. Because in this bundle, it does not include supplementary information after the discussion, so I can't see it now. Do you want me to check now or what?

CHAIRMAN: If you are able to find something that is relevant later, by all means provide it to us in writing.

MR MICHAEL YUNG: Fine. Perhaps I can do this later. Later on I will liaise with your committee to see what information you want me to provide. And then I will instruct the secretary to look up the information and see whether there are relevant meeting documents that we could provide later.

CHAIRMAN: That would be most helpful, thank you.

MS MAGGIE WONG: Mr Chairman, I have completed my questions.

CHAIRMAN: Mr Yung, thank you for coming to assist us with your evidence, and we look forward to your communication if you do find any relevant documents, that we should have sight of. Thank you very much.

MR MICHAEL YUNG: (In English) Thank you.

CHAIRMAN: We now have representatives from the Sham Shui Po district council. May we ask Mr Lam and Ms Chan to come forward.

Just allow us a moment, we will change the names over and provide you with fresh glasses.

EVIDENCE FROM SHAM SHUI PO DISTRICT COUNCIL: MR LAM KA FAI AND MS CHAN WING YAN, JOEPHY

(given in Cantonese; transcription of the simultaneous interpretation)

CHAIRMAN: Mr Lam and Ms Chan, thank you for accepting our invitation to give evidence today. Apologies for the delay before we reached you, but I would now ask Ms Wong to pose her questions to you.

Examination by MS MAGGIE WONG

MS MAGGIE WONG: Thank you, Mr Lam, and Ms Chan for coming.

May I first of all deal with the topic on the working hours for bus drivers. If you would turn to DC-2 bundle page 986 in Chinese and in English at 988.

CHAIRMAN: What are we going to?

MS MAGGIE WONG: We are going to questions for discussion to Sham Shui Po district council in relation to the fatal traffic accident at Sham Shui Po. Cheung Sha Wan Road near Yen Chow Street. It was on 25 September 2017.

CHAIRMAN: This is in consequence of the accident on 22 September.

MS MAGGIE WONG: Yes.

CHAIRMAN: That's 2017.

MS MAGGIE WONG: 2017.

CHAIRMAN: Yes.

MS MAGGIE WONG: And one of the matters raised in this document, if you look at paragraph 3, is to strengthen the management of working hours of bus captains. And in this document, it states that:

"In a foreign country, such as the EU, there are restrictions on drivers from driving more than 9 hours a day, whereas the bus captains in Hong Kong work for a maximum of 14 hours per day, amounting to 360 plus hours per month."

If I may also refer you to the minutes of the first special meeting, after the Sham Shui Po accident, dated 28 September 2017, Chinese is at page 1026, English at page 1043.

And I --

CHAIRMAN: Of which bundle?

MS MAGGIE WONG: DC-3.

CHAIRMAN: Yes.

MS MAGGIE WONG: If we look at paragraph 168, Councillor Yeung Yuk added that:

"He required the government to revise the guidelines, reducing working hours from 14 to

12 hours ..."

If we look at paragraph 170, Councillor Tam Kwok Kiu added that the:

"... relevant rules and regulations stipulate that driver cannot work over 14 hours ... many labour union had pointed out 14 working hours are not humane:

And at paragraph 201, Councillor Tam Kwok Kiu commented that Citybus shall reduce all driver's work hours to 12 hours.

My question is, it appears that the Sham Shui Po district council proposed 10 working hours. Can you tell us why you propose 10 working hours?

CHAIRMAN: Where do we see that? Which paragraph?

MS MAGGIE WONG: You see that at the letter at page 986, English at 988, paragraph 3. We asked --

CHAIRMAN: Thank you. Just read it out.

MS MAGGIE WONG: "We asked the Transport Department to reflect that the longest driving time per day is 10 hours."

Can you tell us why you proposed 10 hours as the longest driving time?

MR LAM KA FAI: After that accident, the council in relation to this matter discussed for a very long time the location where the accident took place was right in front of the district council. It was a junction. From

the window of the conference room you would be able to see the tragedy. The wreckage was not cleared immediately. It was done only after a long time when the injured were rescued.

The bus was stuck and wedged at that location, and it took a lot of engineering staff to dislodge the bus. The district council discussed for a very long time the cause of the accident. The district council concluded that one of the major reasons was that the bus driver has been driving for too long.

Regarding 14 hours, no one in the meeting was of the view that it was a suitable length. We discussed it from 14 to 12 hours, and then to 10 hours. We thought that the suitable length of driving duties given the fact that bus captains were in control of a large bus, were responsible for picking up passengers and letting passengers alight and on top of their driving duties they have their family lives. There should be a balance.

If bus captains could have just 10 hours of maximum driving duties, well, we thought that caretakers in public housing estates only worked for eight hours. Security guards under the Housing Authority work eight hours per shift. The workload, the pressure faced by security guards can't possibly compare with that faced

by bus captains. That is, bus captains face tremendous pressure and in recent times customers very often scold bus captains. In the past month or two, we found incidents where seats are planted with needles. So we see that there is tremendous pressure faced by bus captains.

In that meeting, we thought that if the working hours of bus captains could be reduced to 10 hours, it would be ideal.

We also thought that this would reduce the possibility of traffic accidents involving buses. That is also another area of concern. Assuming that the work hours can be reduced from 14 to 12 to 10, we would think whether they would be paid a sufficient wage to support their families.

We were concerned about that as well.

Bus captains is not an easy job. If they are not paid a wage that can support the family, we think there will always be a shortage of bus captains, and as a result, then work hours can never be reduced. Bus companies would use various ways to continue to increase their work hours.

MS MAGGIE WONG: There were some minutes of the meeting on 28 September 2017. The 5th Sham Shui Po district council meeting. The English starts at 1041, and

Chinese at 1026.

CHAIRMAN: Yes, which paragraph?

MS MAGGIE WONG: Paragraphs 167 and 168, and I would like to draw your attention to two sentences. 167, at the end, Councillor Vincent Cheng Wing Shun at the end:

"... inquired why the driver work hour instruction was not amended over past 7 years."

And 168, the second sentence in (i), Councillor Yeung Yuk:

"He required the government to revise the guideline reducing working hours from 14 to 12 hours and increasing rest hours and salaries."

If we look at the reply from the Transport Department at page 1044, paragraph 171, Mr Leung Cheong Kit stated that:

"After the accident, drivers' work hour and rest hours drew public attention."

Then over the page:

"To guarantee drivers' enough rest time, the Transport Department and all bus companies made ... bus companies have to follow the instruction ... and the department engages in independent investigator ... to investigate drivers' work ..."

And then (iv):

"Transport Department is preparing to review the

guideline, and plans to consult bus companies and labour unions, and respond to public concerns about drivers' work hours. The department has no established position on the review, and will then consider comments of bus companies, labour unions, and public."

I have two questions.

It appears the revision of guidelines was triggered by this September 2017 incident, and because of the complaints received from the public about the concerns of drivers' work hours. Do you agree?

MS JOEPHY CHAN: Thank you. Perhaps I will supplement.

In relation to your question, perhaps you refer to paragraph 196. I said, because I am a representative of a labour union, we always been expressing our views to bus companies and transportation companies in relation to the conditions of employment and working hours of bus captains. It was only after the accident that the Transport Department and bus companies seriously considered our views.

The last time, when there was a real amendment was seven years ago. That is seven years before the accident. It was 2010. I believe that labour union representatives have been expressing their views but they were not responded to until the accident.

You mentioned about work hours of 10 hours. I know

that representatives of labour unions have been advocating no more than 14 hours of maximum driving duties. They would like that to be revised to 12 hours. As to the proposed 10 hours, perhaps it was the result of studies conducted by district councillors. The general view of the district council was that 14 hours was too long.

I represent labour unions. I think that we should not just focus on work hours, because that is related to conditions of employment as well as salaries.

I understand that the driver involved in the accident has just over five years of experience. On that day he was scheduled to work earlier than he was supposed to because he wanted to make up for work hours in order to earn a wage that can support him and his family.

I understand that for the KMB they offer just over $10,000 for bus captains. For First Bus it is slightly better. It would be around 12,000. However, you will have to take into account various allowances in order to make a salary comparable to other jobs that have to deal with a lot of pressure.

So the review should not be just focused on work hours, we have to attach importance to conditions of work as well.

We have mentioned about rest as well. I have heard other councillors talk about rest kiosks. I can't say how many estates or locations are without rest kiosk, but using Lai Kok Estate as an example. That estate has been in place for over three decades. However, it was only at the end of last year that the bus terminus had a rest kiosk for our bus routes. That is not desirable. For Kowloon East Lok Wah Estate, I know it was with the intervention of Jonathan Ho, a legislator, that a rest kiosk was installed for bus captains.

So I think we should not just focus on work hours. We have to look at salaries, conditions of employment as well as the rest facilities.

CHAIRMAN: Before you move on, Mr Lam, Ms Chan, you say that you are a representative of labour unions. What do you mean by that? Explain that.

MS JOEPHY CHAN: I came from the FTU.

CHAIRMAN: What was your position in the federation?

MS JOEPHY CHAN: I am a district councillor.

CHAIRMAN: You said you came from the FTU. What do you mean by that?

MS JOEPHY CHAN: (In English) That's my political association.

CHAIRMAN: Thank you.

Yes, Mr Lam.

MR LAM KA FAI: Just now I was asked by the counsel about this review of the Transport Department, whether it was a result of the traffic accident or complaint made by the council or members of the public.

I think that is the case. In the community, when it comes to road safety, traffic accidents, of course members of the public are very concerned. Every day we see traffic accidents, minor ones or major ones, happening every day. It may not be as serious as that one.

But if a serious accident takes place, it would shake the community. We see very often that as a result, the government and the public would try to do something. I think the establishment of this Independent Review Committee might be a result of a number of major accidents.

I do think that it is really worthwhile to have this Independent Review Committee. We have to consider the scale of the accidents and the number of fatalities and casualties and hope that it will not happen again.

Regarding the location of accidents, there may be inadequacies in the design of the road or the facilities provided. Say, for example, the locality of this accident, it is the centre of Sham Shui Po, it is right in front of the government office, right in front of the

district council.

Regarding transportation services, road users, we see that when there is a change of traffic light, thousands or hundreds of pedestrians would be waiting at that junction waiting to cross. And at that junction, there may be dozens of buses waiting to pass that junction.

For Sham Shui Po district, it is the centre point between New Territories and urban areas. Well, you will have to go via Sham Shui Po, wherever you are going to or wherever you are travelling from. It is unfortunate that we have seen this accident. The district council has been making a lot of suggestions to transportation operators and the Transport Department about the heavy traffic at this junction, and the fact that pedestrians have to compete for space with vehicles.

We don't want bus companies to deploy their buses in a way that they would all have to travel along this road. We know that bus routes will have to pick up passengers from various places. I'm sorry to see that this accident has happened, but I hope that with this hearing there may be a policy change.

We have made a discussion, say, for example, building foot bridges at this junction so that pedestrians don't have to congregate at road crossings.

A lot of people --

CHAIRMAN: Forgive me for interrupting. But may I ask you to help me with the other suggestion you made, and that was in terms of the review of the guidelines of working hours for bus captains.

Can I ask you this. Having made the suggestion, and having received the Transport Department's answer, that they were going to review it, that's at the meeting of 28 September of 2017, did the Transport Department consult you again before, I think it was 23 February, they announced the result of the review? Were you consulted in the meantime?

MR LAM KA FAI: No, they did not.

CHAIRMAN: Yes, Ms Wong.

MS MAGGIE WONG: Thank you.

If you look at page 1053 of bundle DC-2, paragraph 203, Mr Leung Cheong Kit made a comprehensive reply stating that:

"The Transport Department will work together with bus companies and labour union stakeholders to review the instruction on drivers' work hour and rest hour to reach a consensus."

But the Transport Department never approached the district council, your district council to seek your views. Is that correct?

CHAIRMAN: I think he just answered that.

MS MAGGIE WONG: Yes.

May I move on to another accident which is on 26 April 2016 at Kwong Lee Road. If you look at bundle page 991, English, and in Chinese, 990.

MS JOEPHY CHAN: Before we move on, we would like to express the view regarding the accident in Yen Chow Street. Aside from work hours, our union members also tell us that would it be possible to assist bus drivers through road design, for example the minutes also mention that if you look at other cities, they have diagonal crossing or X crossing, in Japan, UK, in busy areas they have road design --

CHAIRMAN: We have read the minutes, and this matter was canvassed at some length in the minutes.

MS JOEPHY CHAN: Just now it was mentioned why did we have an accident. It is because the crossing -- people want to cross diagonally, but the pedestrians when they wait too long, they can only cross diagonally, it is a L crossing, so when they are waiting at the junction they are waiting a longer time, and that increases the chances or odds of an accident. That's why we mentioned the X crossing idea. The Transport Department needs to consider this, and the bus drivers also tell us that they hope that there can be some countdown at the

crossing lights, and that can remind them, remind the pedestrians they can get ready, when they need to stop.

So if you look at the other cities, there is a lot of technology that helps reduce pressure from motorists, but Hong Kong is lagging behind. We have not even attempted the X crossing, so the committee needs to consider this.

Thank you, chairman.

MS MAGGIE WONG: Go to document page 990 and 991. It relates to a fatal accident on 26 April 2016 on Kwong Lee Road. If you see at the bottom there were certain requests. And one of them is that:

"KMB and Transport Department should carry out detailed investigation of this serious traffic accident and provide a detailed explanation to the public."

And at paragraph 4:

"The Transport Department should properly handle the follow-up work and improve traffic conditions on Kwong Lee Road against potential traffic hazards."

Did your council follow up on these two requests?

MR LAM KA FAI: Yes.

MS MAGGIE WONG: Before you answer, are they in writing? This follow-up? Are they in writing?

MR LAM KA FAI: The district council practice, for example our councillors, they would write -- there was an

accident in So Tsuen bus stop, and we would have a discussion in the council and the Transport Department representative would respond to these documents, and in our practice after the discussion there might be motions, maybe not on this occasion, but it could be followed up in matters arising in the next meeting.

So in future meetings we would have a list of matters that need to be followed up and in the next meeting we can have further discussions.

So on that occasion, we requested the government to do certain items, they were able to respond to some of the points on the spot, and they might have to go back and consider our other requirements, so they would have documents in preparation.

So regarding the So Uk Estate bus accident, that gave rise to a discussion topic that the So Uk Estate bus stop had been in operation for more than 50 years, so whether its design, its usage, because new bus routes are continuously added, there are more and more bus routes, so the suggestion was to rebuild the bus stop, and there were even other calls for multipurpose uses, where other community facilities could be built.

Whether a building could be built, there could be maybe be a government clinic or even a social welfare office and so on.

MS MAGGIE WONG: Mr Chairman, I've finished my questions for this district council.

CHAIRMAN: Sorry, I missed the first part?

MS MAGGIE WONG: I completed my questions.

CHAIRMAN: Right.

Those are the questions that we have posed for you, you have made some general statements, and we thank you for that. You have made some specific statements as well. If there is anything more you wish to raise, do so now.

But I will tell you this. We have a video link with a witness in Germany at 3 o'clock and we would like to take some break before that, but if there is anything you want to say, you can have the last word.

MR LAM KA FAI: Okay. Thank you, honourable judge.

Regarding traffic accidents, one is too much. And I sincerely anticipate that this IRC under your leadership can come up with innovative ideas or new measures for the government to allow the public transport service -- and can modernise and move to a higher level of service. That is my expectation. Thank you.

CHAIRMAN: Thank you.

MS JOEPHY CHAN: I wish to say that the committee here today, I think the role it will play is a positive one,

and I hope these regular reviews can be routine practice rather than occurring after accidents. We would like our views to be accepted, but the franchise arrangement, because of its heritage, the bus companies, whether we are talking about the reprovisioning of bus routes, about public convenience, or when you talk about public safety, bus captain safety, a lot of times our views are ignored, because I understand that bus franchise won't be affected because of our views. And that is regrettable and not ideal.

When we talk about bus routes we have continuously provided our input. We even talked about bus safety, but unfortunately in the past we didn't have platforms, and routine venues, so in the past our views have never been acknowledged. So we hope after this there can be a new practice, a new venue where our views regarding improvement can be made.

Thank you, Chairman.

CHAIRMAN: Thank you.

MR LAM KA FAI: Just now Tai Po District Council made a point and I agree with them, regarding bus policy or franchise issues. If the 18 district councils could have some input before the expiry of the franchise, if they could be consulted, if their views could be adopted formally, then the bus companies would respect community

views even more.

So given the government structure, we do have some examples, for example the Town Planning Board. Even the Urban Renewal Authority or other land use changes, developments, the Town Planning Board needs to seek the support of the district council, and they might also have to take on board other views. They have to take on board -- it is the majority view, before they decide on a change of land use.

So there are precedents, and I hope the honourable judge can provide some strong impetus to an improvement in bus company service and management such that our views can be conveyed through our counsel and taken seriously. And it should be greatly respected.

CHAIRMAN: May I ask you this. In the context of the Transport Department's, Transport and Housing Bureau's consultation about whether or not to recommend the renewal of a bus franchise, has your district council made submissions in response to invitations to the public to forward their views?

MR MICHAEL YUNG: When the franchise is about to expire, in our existing policy they don't need to consult the district council.

CHAIRMAN: I appreciate that. But they do make a general invitation. I was looking at a document yesterday, when

the KMB franchise was being renewed. And it starts off with an invitation to the public to make representations, and has the district council, your district council, not contributed to that general invitation?

MR LAM KA FAI: I was not aware of that response. But if there is a mechanism that is part of our agenda or all the 18 district councils' agendas, then it would be taken much more seriously. If it is a regular agenda item, of course the franchise does not come up for reapplication on a frequent basis, it is every five, 10 years, then ...

CHAIRMAN: Nowadays.

MR LAM KA FAI: So, in the 9th year, the 18 district councils could place this on our agenda. Then all district councils, we can discuss that in earnest, a year before the application. That would be more conducive to enhancing bus service.

MS JOEPHY CHAN: Mr Lam means that the bus companies should take the initiative in contacting the 18 district councils and consult us.

I know there are general invitations, but if you want to stimulate a discussion, then they need to reach out to our district councils. I'll give you an example.

The bus companies, whether it is a franchise, or

whether it is during the operation, when they talk about the bus route reorganisation, our views are not respected, they don't even bother listening.

I'll give you a bus route example. You asked whether there are written submissions. So I have written to the Commissioner for Transport Department, bus route 6F, about a route change, because it travels along -- it passes a hospital. So they shouldn't just consider the passenger numbers, because a lot of the elderly take that bus route to visit hospital services, but unfortunately our views are ignored, and they might cut bus service or even change the routes. So the district councils have no way or no incentive to have them heed our views.

So when the franchise is up for renegotiation, they need to consider the DC views before a decision is made. That would be appropriate and in the public's interest. Thank you, Chairman.

CHAIRMAN: Thank you very much. I'll ask the secretariat to communicate with you about the document that I had in mind which sets out the public consultation that the government says it has before a franchise is renewed. The first step. There are a number of papers that follow. But I would ask that you be given a copy of that in due course.

It remains for me on behalf of the committee to thank you for giving up your time on a rainy Saturday to come and help us with your evidence.

Thank you very much. And we will resume at 3 o'clock.

(1.58 pm)

(The luncheon adjournment)

(3.16 pm)

EVIDENCE FROM ZF FRIEDRICHSCHAFEN REPRESENTATIVE:

MR JAN KULIS

(Given via video link)

CHAIRMAN: Good afternoon, Mr Hui. We welcome you and your colleagues as the legal representatives of ZF Friedrichschafen and its subsidiaries, including Openmatics, and we welcome you, Mr Kulis, and thank you for accepting our invitation to assist us with understanding how the technical devices work.

I'm going to ask counsel for the committee, Mr Chan, to begin posing questions of you.

Now, if there are any difficulties in your accessing material, if you need time to read material, please say so, and we will do what we can to help you.

Do you understand?

MR KULIS: Okay, perfect, I understand, thank you.

Examination by MR DEREK CHAN

MR DEREK CHAN: Good morning, Mr Kulis. My name is Derek Chan, and I'm counsel for the committee.

I will be asking you questions on behalf of the committee, and the committee members themselves may also ask you questions directly during this session.

Can I start first by thanking you, Mr Kulis, for attending today. Your evidence is important to the committee's task in considering from a technical perspective the safety-related measures that are available for franchised buses in Hong Kong.

Mr Kulis, can I start first by asking you several basic questions about your current position in your company.

Now, if I may, I will use the term "ZF" in short, to collectively refer to your company and its subsidiaries, including Openmatics.

So I will just use the term "ZF" collectively.

MR KULIS: Yes, of course.

MR DEREK CHAN: I understand you are an employee of ZF; what is your current position in the company?

MR KULIS: My current position is team leader of system engineering and I'm an employee of the company Openmatics, which is the subsidiary of the ZF. So that's the correct technical status.

MR DEREK CHAN: Can you just give us a very general

description of your responsibilities as a team leader of systems engineering?

MR KULIS: Yes. So my work is consisting mainly from the technical support for deploying the Openmatics systems for current customers, new customers, and in general the job of the system engineer is to tailor our system to customer needs, because our system is pretty much configurable so we are always trying to find the best technical way how to fit our system into some customer solution.

MR DEREK CHAN: And I understand that you have a degree in electronic engineering and telecommunications from the University of West Bohemia; is that correct?

MR KULIS: Yes, that's correct.

MR DEREK CHAN: Mr Kulis, the committee had previously been in correspondence with a law firm in Hong Kong that represents your company, and through correspondence the committee has already asked some questions and your company gave some answers through this law firm. Are you aware of that?

MR KULIS: Yes, I am aware.

MR DEREK CHAN: Yes. Do you have the answers provided by your company through this law firm in front of you?

MR KULIS: Yes, I have it in front of me.

MR DEREK CHAN: Mr Chairman and members, the correspondence

in our bundle is located at the bundle for bus and technical devices manufacturer. I think it is BM-1, in short.

CHAIRMAN: Thank you.

MR DEREK CHAN: And the letter from Zhong Lun Law Firm starts at page 64.

Mr Kulis, can I just confirm that we are reading the same thing?

Do you have in front of you a letter from a law firm for Zhong Lun Law Firm dated 26 June 2018?

MR KULIS: Yes, and I can see it on the screen also.

MR DEREK CHAN: You can see it on the screen also. Great.

Mr Kulis, the hard copy you are reading off, is it paginated in the bottom right-hand corner.?

MR KULIS: No.

MR DEREK CHAN: It is not, no problem --

MR KULIS: -- (Simultaneous speakers - unclear).

MR DEREK CHAN: I see.

Mr Kulis, I'll be asking you questions today from two perspectives, and I'll tell you what they are, so you know where I'm coming from. Firstly, I will be asking you questions about the technical capabilities of the black boxes that had already been supplied by your company to Hong Kong bus operators.

So for this, I will be asking you to clarify and

explain to the committee some of the matters that arise from the written answers that your company has very helpfully provided.

That's the first perspective.

Secondly, I will be asking you questions about technical capabilities of other hardware or software systems that your company provides, or are able to provide, that are relevant to the issue of bus safety.

These are the two perspectives I will be asking you questions from.

So with that in mind, Mr Kulis, can I ask you to look at the submissions in front of you at paragraph 1.

Does the page that you are looking at start with the word "Annex III" at the top?

MR KULIS: Yes.

MR DEREK CHAN: The answers provided by your company are in blue, and can I draw your attention to the second paragraph -- sorry, paragraph 1, in the three blue paragraphs, the second one:

"Openmatics entered into a supply contract to deliver telematic systems ... with Kowloon Bus Company and Long Win Bus Company."

And then your company states here:

"Openmatics started offering telematic services by using the first black box system called the 'Mozart

Box'. Later on, Openmatics replaced the Mozart Box by a successor platform black box called the 'Bach Box'. Clients can use both systems in parallel as KMB does."

Now can you first tell us when were the Mozart Box and the Bach box first introduced to the market?

MR KULIS: If I remember correctly, the Mozart Box was introduced to the market in 2011.

MR DEREK CHAN: What about the Bach box?

MR KULIS: The Bach Box, it was -- I think it was in summer of 2015.

MR DEREK CHAN: So a Bach Box is more advanced than a Mozart Box? Can you --

MR KULIS: Yes, it is an advance of technical evolution.

MR DEREK CHAN: Can you tell us in general terms what are the key differences between the two boxes or the advances that have been made to the first generation?

MR KULIS: Yes. As the technology develops, then the Bach Box is the second generation of our telematic product, so it was designed to be smaller, cheaper, faster and it have more interfaces. That's the major difference.

MR DEREK CHAN: More interfaces, what do you mean by that?

MR KULIS: Yes, our device can read different data from different sources, and different ports. You can -- it mentioned the situation with your laptop, where you have maybe USB port, the video port and so on, so the Mozart

Box and the Bach Box, we have the interfaces for the vehicle systems, to the cameras, serial line and tachograph interface, GPS, and so on and so on. So the Bach Box have more of them.

MR DEREK CHAN: Is the Bach Box currently the most advanced black box system offered by your company?

MR KULIS: The current moment, yes.

MR DEREK CHAN: Now, can I go on in the submissions provided by your company. Your company talks about the driver feedback device.?

MR KULIS: Okay.

MR DEREK CHAN: Over the page, after that, there is a screen grab of certain driver feedback thresholds?

MR KULIS: Mm-hmm.

MR DEREK CHAN: Now, your company says here that the thresholds were initially defined by Kowloon Motor Bus and then calibrated by Openmatics to fit the defined parameters. My first general question is, after your company has calibrated these threshold values, can the end user, for example, the bus operator, can they change or redefine these values by themselves, or do they have to go back to your company?

MR KULIS: Yes. The general concept is that customer can change the threshold if he wants to.

MR DEREK CHAN: Now, just going through the threshold

values, one by one.

The first two parameters, or the first two thresholds, relate to acceleration and deceleration. Can you tell us what is the time frame within which the acceleration or deceleration is measured before the threshold is considered crossed?

MR KULIS: Okay. I think the acceleration -- in general all the thresholds are measured in the time frame of one second.

MR DEREK CHAN: Of one second. Is the system -- and I'm talking about the system supplied to the Hong Kong bus companies, is it capable of incorporating different measures of acceleration and deceleration over different time periods, for example a constant acceleration over three second or five second intervals? Is that possible under this current system?

MR KULIS: Yes, this is possible, I think this option is configured.

MR DEREK CHAN: So this type of measuring acceleration, and deceleration, is capable to be recorded under the both the Mozart Box and Bach Box, or just one type of them?

MR KULIS: Yes. On the both, it is the same software, to be correct.

MR DEREK CHAN: If that's the case, is there any reason why we don't see that type of threshold definition in this

screen grab here? If it is possible?

MR KULIS: Excuse me, I didn't get the point of your question.

MR DEREK CHAN: I will just start again. If I can draw your attention to the screen grab in the middle of the page?

MR KULIS: Yes.

MR DEREK CHAN: You just told us that the acceleration and deceleration rates are measured per second?

MR KULIS: Yes.

MR DEREK CHAN: And my question was can the acceleration and deceleration threshold values be measured at variable time periods over a longer period, three seconds, five seconds, so that you can measure a more constant acceleration or deceleration? Is it possible under this system? Or do you need something else?

MR KULIS: Yes. To be absolutely correct, this is possible, but the configuration of this parameter is not public. So the current application is not designed to be configurable in this time frame of the (unclear), but the system is capable to be configured in this way. It is just not designed for the end customer like that.

MR DEREK CHAN: The reason I'm asking this question is because when I look at your company's website, and in the Vivaldi on-board unit, one of the thresholds for acceleration/deceleration is speed increase by more than

50 per cent within three seconds, or an increase of more than 32 kilometres per hour over five seconds, so you have a variable way of measuring sudden or extended acceleration and deceleration.

So my question is really, is that sort of more sophisticated way of measuring acceleration and deceleration available with the current technology that is supplied to the Hong Kong bus companies?

MR KULIS: Yes. Now you are talking about the Vivaldi unit, this is the unit we are providing for passenger cars and which we introduced to the market in 2017, or beginning of 2018, so the software is more sophisticated on the Vivaldi unit that compared to the Mozart and the Bach.

MR DEREK CHAN: Yes, I understand that. So do I take it that the most sophisticated way of measuring acceleration and deceleration is not available in the current Mozart or Bach units?

MR KULIS: I think it is available because we have the open application concept. It was just not requested by any customer so far. But it can be changed any time.

MR DEREK CHAN: I see. On the issue of acceleration and deceleration still, can I take you to a few pages on --

CHAIRMAN: Before you move on. Mr Kulis, can I just ask you, from that page where you have the data displayed, just above the data display there is a narrative

describing what is being displayed. Can I ask that that be brought up on the screen.

The sentence that I want to draw to your attention is this:

"The driver feedback thresholds for the accident bus were initially defined by KMB and then calibrated by Openmatics to fit KMB's defined parameters."

And the question I wanted to ask you is, which is the accident bus? What is meant by that?

MR KULIS: I think this is referring to the recent fatal accident on the Tai Po Road, if I'm correct.

CHAIRMAN: The Tai Po accident bus?

MR KULIS: Yes, which happened ...

CHAIRMAN: Thank you.

MR DEREK CHAN: Mr Kulis, on the issue of acceleration and deceleration values, can I draw your attention a couple of pages on from the submissions at paragraph 5.

Chairman, members of the committee, page 69 of our bundle. Paragraph 5.

MR KULIS: Okay.

MR DEREK CHAN: In the middle of the page, again, in blue, that is the answers from your company, it is stated that:

"The telematics system installed at KMB is capable of recording speed, deceleration and acceleration of the

buses. However, the deceleration and acceleration of the buses as feature recording this on an ongoing basis is not enabled."

Are you able to elaborate or explain to us what is meant by this paragraph, especially the part about recording acceleration and deceleration on an ongoing basis?

MR KULIS: Yes, I'm also not sure if I will get the point of this sentence correctly, but I think the sentence is referring to the situation that these values, acceleration and deceleration, for the KMB we are using to raise realtime warnings, not for recording them to the data. This is my understanding of this declaration. So we have the system, the driver feedback device, which is warning the drivers in the realtime if they accelerating too much or decelerating too much. For this propose we are using the values of acceleration and deceleration, we are not storing these values for the historical data. That's my understanding of this sentence declaration.

MR DEREK CHAN: I see. Okay.

So your understanding is that the acceleration and deceleration are not recorded in the black box data systems?

Is that correct, Mr Kulis?

MR KULIS: Yes, that's my understanding. Because another function of the -- our box is the record, the several data, as the black box feature. There are maybe 20 different values, but not the acceleration and deceleration.

MR DEREK CHAN: Is there a reason, a purpose for not enabling the storing of such data?

MR KULIS: If definitely there must be a reason, but it is not known for me, and I think the data set which is recording for the customer, KMB for example, most definitely by the customer KMB, so whatever data they can read, we can store. Obviously it has some impact on the data volume transferred and so on. That might be the reason, but it is not, at least for the moment.

MEMBER LO: I have a question on acceleration, deceleration, is it measured by an accelerometer or is it calculated by velocity change over time?

MR KULIS: As we can also see on this screenshot from the configuration, the very first parameter is the acceleration signal source, in this situation the signal source is changed in the vehicle speed, and from that over the one second is calculated acceleration or deceleration, in this case. But it can be also switched to the internal accelerometer of the Mozart Box or the Bach Box.

MEMBER LO: So is it directly measured or is it derived from velocity changes over time?

MR KULIS: From this configuration, which we are looking on, it is derived from the vehicle speed --

MR DEREK CHAN: So did the signal come from the speedometer, is that correct, in this case? So the signal source of the acceleration and deceleration calculation, the signal source comes from the speedometer of the bus, and then the computer or the system calculates the acceleration and deceleration based on the changes in the vehicle speed as recorded by the bus itself; is that correct?

MR KULIS: Yes, that's correct.

MR DEREK CHAN: Moving on to the next parameter, which is the tilting angle, in terms of degrees?

MR KULIS: Yes.

MR DEREK CHAN: In this case we see that the tilting angle is set at 44 degrees in this case?

MR KULIS: Mm-hmm.

MR DEREK CHAN: From a technical perspective, do you know why the angle of 44 is selected, why not some other figure?

MR KULIS: I think value of the 44, as you can imagine, is not a real value for the operating bus. So my understanding of this configuration is that it means

that deactivation of the tilting angle warning in this example.

If you do not want to be notified on the tilting, then you can set it up to the value which you will not reach during the normal operation, and this, for example, is 44.

MR DEREK CHAN: The next parameter under tilting angle is the configuration of excessive speed values.

In this screenshot we can see two parameters under that. One is speed and one is speed in areas, and this this case, both are set at 75 kilometres per hour.

Now, firstly, a more basic question. Just to see if my understanding is correct. So if the bus in this case exceeds 75 kilometres per hour, the threshold would be considered crossed; is that correct?

MR KULIS: That's correct.

MR DEREK CHAN: What is the difference between these two parameters, speed and speed in areas?

MR KULIS: The application driver feedback is capable of handling the areas where you can set up different speed limits. For example, you can have some areas with 50 and some with 70. So if you want to configure this application in that way, that you are respecting that in some areas you have different speed limit, then this particle configuration parameter, speed in area, should

be different.

And then, of course, you need also to configure the areas in some other window, or enter some geofencing into the system.

MR DEREK CHAN: I'm interested in that last bit of your answer.

Obviously the bus, if you wish to take advantage of the speed in areas parameter, the system would have to know where the bus is to trigger that parameter. How is that done, technically?

MR KULIS: This is currently done by the GPS technology, both on the Mozart and the Bach Box, and in the Hong Kong commission, the GPS technology is also supplied with data recording feature which is helping to recover the GPS position when the signal is lost.

MR DEREK CHAN: Is this capability of setting different speed thresholds in different areas, is this capable in the current systems that are supplied to the Hong Kong bus companies? Or do they have --

MR KULIS: Yes.

MR DEREK CHAN: -- to add something extra to utilise this feature?

MR KULIS: No. Of course they need to configure or in cooperation with us, we need together to configure the areas, we need to define results, the rules, then the

system is capable.

MR DEREK CHAN: In this case, we have the same speed, 75, for both parameters. What would be the use of, or the purpose of configuring both parameters at the same speed in this case?

MR KULIS: I think that also means that this feature is not used for this particular configuration.

MR DEREK CHAN: I see. Now in Hong Kong, I'm sure you realise, that we are generally a very dense city, with lots of high rise buildings. To what extent would the stability or reliability of the GPS signals in places such as Hong Kong with a lot of high rise buildings, how would it affect the efficiency of such a system?

MR KULIS: Of course the -- let's say the precision of the positioning is affected by the Hong Kong environment, it is called (unclear), you have very high rise buildings, so the efficiency and let's say the error in the meters is higher than on the free land, but I think our positioning system was generally accepted by the customers after some several trials of examination and fine tuning, so as I was recently speaking about the data recording, we have the special algorithm which is trying to input the position, the value when the GPS signal is lost or not recorded. So we are trying our best to provide a good position.

MR DEREK CHAN: As far as you are aware, how widespread or how common is it for commercial fleet operators around the world to take advantage or to configure different speeds thresholds, when the vehicle moves into a for example a lower speed zone? How often is that used?

MR KULIS: According to our experience, it is not used so widely. Most likely we have the operators which are using only the higher limit, and that's it. It doesn't matter if you are talking about buses or trucks, usually the interest is about one general high rule, and it is I think because they don't want to introduce too complex system to the drivers.

MEMBER LO: If the system can set different speed thresholds for different areas, the input interface got to be more complicated than one number. It got to define the area and the threshold, right? So in this simple interface, it cannot handle different speed thresholds for different areas; is that correct?

MR KULIS: In this interface you can set up the two different speed thresholds, and then you need define the areas in the next window which is not shown, but next to the headline of this configuration window, you have the details, settings, messages, and areas configuration. So you can --

MR DEREK CHAN: So does this --

MR KULIS: -- particular areas to this configuration, and maybe you want to limit the speed and the depth only for some numbers, so you can do it through that.

MEMBER LO: So the system is already designed for that, it is just the interface shown here does not show that feature?

MR KULIS: Yes.

MR DEREK CHAN: If I have a digital map that is able to show different speed limits on different roads, would I be able to use that combining with the system currently available here, to configure to set different speed thresholds depending on where the bus is on the digital map? Or is that not possible under the system?

MR KULIS: Definitely it is possible. Of course we will need some software which will convert the file format of your map, which we don't know, to the file format of our configuration, and at the current moment I also need to highlight that we are supporting only two different speed limits, not unlimited values of the limits.

MR DEREK CHAN: I see, so the limit of the system is just two speeds, not multiple speeds; is that correct?

MR KULIS: I think this is, to be correct, this is limit of the current application. It can be easily extended to support more limits, it is just a software change, but it is not supported right now because the request was

just a low band and a middle band of the speeds.

MR DEREK CHAN: Again, just staying on this screenshot and focusing on the equipment currently supplied to the Hong Kong bus operators, am I correct to understand if one or more of these threshold values are crossed, the driver feedback system would provide visual and acoustic feedback to the driver immediately? So a light would come on and there would be a beeping sound of some sort, is that correct?

MR KULIS: Yes, that is correct.

MR DEREK CHAN: Now, what I'm interested in is this.

In addition to alerting the driver who was driving the bus, if these threshold values are crossed, do the systems presently supplied by your company to the Hong Kong bus operators have the capability of automatically generating reports for the crossing of threshold values to alert those monitoring the driver's behaviour that these values had been crossed?

MR KULIS: Yes, the system is capable.

MR DEREK CHAN: Of automatically generating reports?

MR KULIS: Yes.

MR DEREK CHAN: Would the bus company need to have additional software applications in order to take advantage of this automatic generation of reports?

MR KULIS: No, actually, this is supported directly in the

application bundle which we got driver feedback. To be exact, the driver feedback is not also meant for the device, it is also the application bundle we are providing. Part of the application is running on the device in the bus, but another part of the application is also running on the server, and it is capable of receiving events as they appear, so together with the position information where it happened. Then, for example, if you have the speeding event, you can see on the bottom there had been the speeding event recently on this road, and so on, or you can check the statistics of it.

MR DEREK CHAN: So it is a matter of how the end user or the bus operator wants to use the data that is being collected; is that correct?

MR KULIS: Yes.

MR DEREK CHAN: In addition to these basic threshold values that we see in this screenshot, do the systems provide any other threshold values that relate to safety or safe driving?

MR KULIS: Not the application driver feedback currently. We have also another application which we can just upload to these boxes, and then we can measure -- basically, any parameter which we can technically read we can analyse, so if you realise that some maybe bridge

somewhere is important parameter to monitor, then we can start monitoring such parameter, and make the notifications, something like that.

MR DEREK CHAN: Can I then move on to the next topic, which is the transmission of the data collected by the black boxes to another place.

So for that, can I first take you to our page 69, which I think in your bundle would be under paragraph 5. If you have the correct page, at the bottom of the page there should be a small (ii) at the bottom of the page.?

MR KULIS: Yes. I have it.

MR DEREK CHAN: And the blue answer given by your company refers to the system collecting the defined data every second. And then sends that data to a defined FDP server every 30 seconds.

MR KULIS: Mm-hmm.

MR DEREK CHAN: My first question is is the setting of a 30-second data transmission time gap, is it a matter of choice, or a matter of the limitations of the hardware capabilities offered by your company?

MR KULIS: It is a matter of choice. It is a configurable parameter.

MR DEREK CHAN: So if the end user wants he can configure the system to send the data to a defined server every second, for example?

MR KULIS: For example, then I will assume there will be some technology limitation, because the transfer protocol is FDP file transfer protocol and it needs some seconds to check and establish a connection and upload the file, so I think the technology limitation for the FDP can be about two or three seconds for this --

MR DEREK CHAN: So delay --

MR KULIS: Just I think the lowest useful value for the FDP transfer rate should be around 5 seconds. That's my feeling.

MR DEREK CHAN: Taking into account the speed of data transfer, is my understanding correct?

MR KULIS: Exactly.

MR DEREK CHAN: Now if the data is capable of being transmitted and received at, say, 5-second intervals, does your company provide the technology either in hardware or software to facilitate realtime monitoring of the data collected by the black box?

MR KULIS: Yes.

MR DEREK CHAN: So let me see if I get this right. Your company supplies the black box, it collects the data, and the system is able to transfer that data, say, every five seconds, to a defined server?

MR KULIS: Mm-hmm.

MR DEREK CHAN: So as a supervisor, I'm sitting in my

office, how do I monitor the driver, realtime? Do I need additional software, or does your company already provide the software for me to do so?

MR KULIS: There are two options, we can provide our software solution, which consists of the Openmatics portal and additional applications on the server side. That is one option, but some customers they are preferring just to get the data, and they have their own IT systems behind. In that case we are just the data provider and we don't care about the utilisation or operating of that. Utilising that.

MR DEREK CHAN: In this case, KMB, is it the case that ZF only works as, as you describe it, a data provider, or are you aware of any more advanced use by KMB of your company's realtime monitoring capabilities?

MR KULIS: I think in this case KMB is the customer, at current moment, they are using their own IT system to handle the data and work with the data. But, yes, it's by agreement, we can also change it if we want.

MR DEREK CHAN: I see. In your experience, how common is it around the world in terms of commercial fleet management for the company to monitor the driving behaviour of its drivers realtime? How common is that?

MR KULIS: I think this is quite a common request. Both from the safety and economic reason, the companies

usually want to monitor the drivers. In some countries there is the conflict with the law regulation and protecting the driver safety, like in the West European countries, sometimes it is not so easy to introduce monitoring system, but the demand is always there.

MR DEREK CHAN: Moving on, then, Mr Kulis, to another topic. You mentioned a bit earlier, or I mentioned actually, the Vivaldi unit that is offered by your company. When was this unit first introduced to the market?

MR KULIS: I think that was at the end of 2017 or beginning 2018 I'm not sure exactly, but it is relatively new hardware.

MR DEREK CHAN: Is it a more advanced version of the Mozart and Bach boxes or something completely different?

MR KULIS: This is something completely different. The Vivaldi unit is designed for the passenger cars, it cannot work in the buses because of different interface.

MR DEREK CHAN: So this unit is more for passenger cars not for buses?

MR KULIS: Or maybe light commercial vehicles, but not big buses. Not for the heavy --

MR DEREK CHAN: In that case I'll move on.

The next item that I'm interested in, or I am going to ask questions on, is the ability or the capability of using software analysis to provide a report on

acceptable or unacceptable, safe or unsafe driving behaviour.

Does your company provide the software that is capable of assessing, based on the data collected by the black box, capable of assessing or coming up with a report of what is acceptable or unacceptable driving behaviour? Is that possible?

MR KULIS: Yes, it is possible.

MR DEREK CHAN: How is that possible? What do I have to do? If I'm a bus operator and I come to you and say I want something that allows me to generate a report of a particular driver? How would you tell me that can be done, how can that be done?

MR KULIS: In that case, I will introduce you to our application driver feedback, together with the portal parts, together with the software solution which we are providing, so then you can regard the parameters as we were talking about, then, and you can get also the statistics, so then at the end of the day, or some period, you can make your own analysis, for example, which driver have most warnings, thresholds, speeding events, and so on.

This is one option.

And then we can also design the solution for you, if you are not satisfied with the driver feedback only, if

you want to have more sophisticated calculations, we can log the driving data, the parameters, into the database and make the analysis relevant for you. If you are more focused on different inputs, maybe some other parameter is concerning you, we can make analysis and score it on that.

It depends how you feel the logic. If you want to calculate the bonus points and evaluate the best driver, or if you want to introduce, let's say, the negative restriction, it is just check they are better drivers, or better behaviour, and so on. There are multiple ways to achieve it.

Also depends what the drivers are open for, or the unions, it can have more solutions.

MR DEREK CHAN: So it is just the software capabilities. Because the hardware itself is just the data collected by the black boxes. Is my understanding correct? I don't need to buy new equipment? In order to come up with such a score card of a driver's behaviour?

MR KULIS: No, you don't need new equipment. If, for example, now you are the customer, and you already have our boxes we can just talk about new possibilities and we can give you the new software and you will use the same hardware for that.

MR DEREK CHAN: In your experience, how common is it around

the world in commercial fleet management for the operator to use software to come up with a score card of the driver's driving behaviour? How common is it around the world?

MR KULIS: It is -- based on my experience it is relatively common in the West European countries. On the other hand, in some other regions, they want to keep the system simple, like is the driver feedback negative. Only a simple warning, and that's it. Because still we need to consider that drivers need to understand what they are scored for. So if you introduce more complex calculation, to evaluate the score cards, we need to provide the training of the drivers, need to understand it. So it differs by the countries and regions.

MR DEREK CHAN: But I think you said it is quite common in Western European countries?

MR KULIS: Definitely.

MR DEREK CHAN: Moving on then from this driver score card --

CHAIRMAN: Before you move on. If it is quite common in Western European countries, what thresholds do they use to monitor driver behaviour if they are scoring the driver "good" or "bad", or "average". Whatever the score card might be?

MR KULIS: To give you the example, for example the truck

companies in Germany, they are using the parameters as we have here, the basic parameters, so the speeding events, acceleration, deceleration, but on top of that they are, for example, evaluating if the driver is using the (unclear) for the driving, so he is saving the brakes, or they even have the analysis of the speed value shape in time, and the brake application. So if they are not using the aggressive driving style or if they are not -- how to say, if they are driving more effectively. There are multiple analyses for this.

CHAIRMAN: So the basic model would be to start with analysing speeding, acceleration and deceleration, that's the basic model?

MR KULIS: Yes. Also the idling, if you keep the engine running, if you are standing, then you are wasting money obviously. That's the basic model. And then on top of that, maybe saving of the brakes and so on.

CHAIRMAN: Thank you.

MEMBER LO: I have another question on the 30 seconds. So when you send information every 30 seconds, do you send second by second of the last 29 seconds, or do you average everything for the last 30 seconds and send one number?

MR KULIS: We are sending second by second.

MEMBER LO: So you get second by second of the last 30

second, and not one every --

MR KULIS: Each second is recorded.

MEMBER LO: Okay, good.

MR DEREK CHAN: Moving on to the next topic, which is automatic logging of a driver's driving or rest times.

MR KULIS: Okay.

MR DEREK CHAN: I understand that your company offers the hardware and software to enable a driver's driving time to be automatically logged or digitally; is that correct?

MR KULIS: To be exact, we are offering the Mozart and Bach boxes where you can upload the software which is logging the driver's driving time. We are not selling the tachographs by the definition of the European law because the tachographs in Europe are produced and sold by different companies, and to that kind of the tachographs we can connect and download, but we are not selling them.

MR DEREK CHAN: Let me see if I understand it correctly. So what your company provides is the software to be able to record the driver's driving time based on the data collected by the Mozart and Bach boxes; is that correct?

MR KULIS: That's correct.

MR DEREK CHAN: And I think, is the software application called Digi Tacho Download, or is that something

different?

MR KULIS: That particular application is used to download the data from the digital tachograph that needs to be installed in the vehicle. It is widely used in Europe, where we have the tachograph rule, tachographs are mandatory, and to avoid manual downloads from the big fleets, we can download the data through the Mozart or Bach Box. For that we have this application.

MR DEREK CHAN: I see. What about the application called the Driving Times app? Does that perform the same sort of function or is it something different?

MR KULIS: It is a little bit more advanced sort of function. This application is also connected to the digital tachograph in the vehicle, but the scope of the application is that you will see on the screen the remaining driving time for each driver in your fleet, so you will get the fast overview which driver needs to be exchanged, which drivers can drive, where they are, so on. So kind of that.

MR DEREK CHAN: So if in Hong Kong we do not have a tachograph system in the way that Western European countries may have them, can Hong Kong use this electronic recording of the driver's driving time through the data collected by the Mozart and Bach boxes?

MR KULIS: Yes. This is generally possible. Because we

need just the information about the driver identification, and the speed. Then we can easily get the information how long the driver is driving. So we can make our own implementation of measuring the driver and times.

MR DEREK CHAN: How widely is it used in the world in terms of systems for electronically logging driver's driving times? Is it very common or not common?

MR KULIS: It is very common in Europe, because we need to have the tachographs from law. It is not so common in north or south America, these countries are just considering if they need the tachographs or the measuring of the driving times in general or not. Same in Asia Pacific I think. It is still under discussions.

MR DEREK CHAN: Thank you.

Moving on then from the electronic logging of driving times, the next topic I want to cover with you is the braking systems that are offered by your company.

MR KULIS: Okay.

MR DEREK CHAN: The two braking systems that we saw from your company's website being offered by your company, the two systems that we found are called intarders, and the second one is called integrated brake control.

Now, firstly, what are they, and secondly are they suitable for use on commercial buses and in particular

in Hong Kong, double-decker buses?

MR KULIS: Yes, so the --

MR DEREK CHAN: If I can ask you to explain those matters one by one, firstly the intarder. What is it?

MR KULIS: I think the intarder, this is the additional brake system which is part of the gearbox. For example, the echo live gearbox, which is the product that is used, is also in some Hong Kong buses. It is mostly equipped with this brake system and its commercial name is intarder. So it is kind of additional device on the gear box which can provide the braking power.

MR DEREK CHAN: So let me see if I understand it generally. The device, does it use the engine to slow down the vehicle, or am I getting it completely wrong?

MR KULIS: No, no, the braking function or the braking power is done in the gear box in this intarder device.

CHAIRMAN: So effectively it is going down into lower gears, is that it?

MR KULIS: It is actually not going to lower gears, it is using another kind of gear which is there only for this braking. But the principle is something like that.

MR DEREK CHAN: Is the intarder capable of being retrofitted to existing buses or do they have to be incorporated in the manufacturing stage?

MR KULIS: It is definitely part only of the transmission,

so you can use the intarder only in the buses where you have modern sort of transmissions. So the retrofitting, I'm not sure if this is possible. Probably not in every bus.

MR DEREK CHAN: And how does the intarder enhance safer driving? Does it help the driver brake in certain circumstances? How does it help safe driving?

MR KULIS: Let me check. If you can give me a few seconds, I need to browse the training manual.

CHAIRMAN: Please take your time.

MR KULIS: I think the main advantage is that intarder have, let's say, bigger braking effect at the higher speeds, if we will check the brake diagram which shows the braking power based on the vehicle speed, then the -- if you are braking by the intarder, then you have higher braking power at higher speeds, and even available to the lower speed range.

Maybe later I can provide you with the official diagrams and documents for this.

CHAIRMAN: Yes, thank you. That would be helpful.

MR KULIS: If you are fine with that, I can give some PDFs or something.

CHAIRMAN: Please do that.

MR DEREK CHAN: Just on the issue of providing us with material explaining how the intarder works, can you also

provide something similar in relation to the driver feedback app, the app with which you create a score card for the driver. Can you provide the committee later on, as well, with presentation materials, PDFs to explain how it actually works.

MR KULIS: For the driver feedback application I can send you the application manual, the official instruction, how to use the application, how it works.

MR DEREK CHAN: That would be very helpful, thank you.

I have asked you questions about the intarder. Can I move on to the same type of questions about the integrated brake control.

Again, firstly what is it, and how does it help safe driving?

MR KULIS: For the integrated brake system, I didn't find the relevant information so far. So I need to excuse myself, I will prepare information on that and later I will give you the connection to the expert on this field. Still my specialisation is more on the Openmatics side.

MR DEREK CHAN: I see. It would be helpful if you could forward those materials to us on a later stage.

MR KULIS: Yes. Just give me a bit more time and I will give you something on that.

MR DEREK CHAN: Mr Chairman, those are the questions I had

for Mr Kulis.

CHAIRMAN: Mr Chan, do we know which franchise bus companies in Hong Kong ZF have supplied equipment and what equipment they have supplied?

MR DEREK CHAN: Mr Kulis, firstly, in relation to the equipment that is supplied to the bus operators in Hong Kong, can I take you to your submission at page 65.

It is page 65 for us, but it would be the first page of your submission.

MR KULIS: Okay.

MR DEREK CHAN: That has the heading "Annex III".?

MR KULIS: Okay.

MR DEREK CHAN: Now, you have noted -- or at least your company has noted in this submission that your company has entered into supply contracts with Kowloon Bus Company, and Long Win Bus Company. And the black box systems installed are the Mozart Box and the Bach Box. Are these systems supplied to both KMB and Long Win, or are the systems supplied a bit different for each company?

MR KULIS: As far as I know, our customer is called KMB, but I'm not specialist for this business question, so I cannot say it for sure.

MR DEREK CHAN: Do you personally, or at least do you have access to information which tells us what equipment has

been supplied to Kowloon Motor Bus and Long Win Bus Company?

MR KULIS: You mean which kind of hardware?

MR DEREK CHAN: Yes.?

MR KULIS: I think also as is stated below we were supplying the Mozart Box in the past, and then the Bach Box is the successor to the Mozart. Plus the driver feedback device and the accessories, that means cables, antennas and all the stuff which you need to run the system.

MR DEREK CHAN: Can I also refer you to what in our bundle is page 52. For your purposes, what I'm looking at is a letter from the Committee to your company dated 25 May 2018, which contains a number of annexes, and I want to look at annex II. So perhaps you can look at the screen.?

MR KULIS: Okay.

MR DEREK CHAN: The screen talks about Kwoon Chung, which is a company in Hong Kong that runs buses, to put it generally?

MR KULIS: Mm-hmm.

MR DEREK CHAN: Do you have any knowledge about what is being described in this page?

CHAIRMAN: Perhaps for the purpose of the record, Mr Chan --

MR KULIS: I didn't see this text before, but it is definitely true that Kwoon Chung is also our customer

and they are also using some telematics services in a similar case to the customer KMB.

CHAIRMAN: Perhaps you could read it out, Mr Chan, because when one comes to read the transcript, it is difficult to understand what one is following unless at least some of it has been read out.

MR DEREK CHAN: Certainly. Firstly, the page refers to a system that has been supplied to Kwoon Chung, and at the bottom paragraph of this page it is stated that:

"We got a tailored app for data collection to substitute the Black box. Now we receive telematics and also diagnostics data about our vehicles. Openmatics telematics solution was integrated in our BSAS (bus stop announcement system) so our passengers get up to date information. We were able to increase safety and reduce costs by changing particular behaviour of our drivers. We are planning to move forward to Openmatics platform 2.0 soon. We would like to use more smart solutions from Openmatics in our company and are currently considering an entertainment solution with on-board hotspot and depot management to monitor vehicles entering and leaving depot with bluetooth smart TAGs."

So firstly, are you able to tell from the paragraph what system had been supplied to Kwoon Chung?

MR KULIS: I think to Kwoon Chung we supply the Bach boxes

as the hardware plus the cables and so on, and the software downloads. They do not have the Mozart boxes because I think --

MR HUI: If I may assist, the witness is more responsible on the technical side. So on the business side, he may not be able to provide useful information to this commission. But if Mr Chan wants to ask, we can continue the questioning.

CHAIRMAN: I don't understand the difference between the business and the technical side. The question simply is this. When the statement says "We plan to move forward to Openmatics platform 2", what does that mean to you?

MR KULIS: Ah, okay. They are going to release soon the new portal version, or we to all Openmatics customers, we will provide access to the new Openmatics portal, because the old portal, the server solution was designed five or six years ago, and it uses old technologies, it is not so nice, so the 2.0 will mean the new server solution for the Openmatics system.

CHAIRMAN: Thank you.

MR DEREK CHAN: Perhaps I can see if I'm understanding this correctly, in terms of hardware being supplied to the Hong Kong bus operators, you are talking about the Bach and the Mozart boxes that are responsible for collecting data?

MR KULIS: Yes.

MR DEREK CHAN: How that data is then subsequently used is a software problem, not a hardware problem, is that correct?

MR KULIS: That's correct.

MR DEREK CHAN: And your company develops certain software to take advantage of the data collected by the Mozart and Bach Boxes?

MR KULIS: Yes, that's true.

MR DEREK CHAN: Do you know if your company is supplying the software to analyse the data? Is your company supplying that software to the Hong Kong bus companies and, if so, what software had been supplied, do you know?

MR KULIS: I think they are not supplying software to the KMB as far as I know, for this analysis but we are in negotiation with Kwoon Chung to develop some common solution how to analyse, for example, the driver behaviour and some other parameters like maybe some diagnostics services and so on.

MR DEREK CHAN: Mr Kulis, thank you for your help.

Mr Chairman, those are the questions I have for Mr Kulis.

CHAIRMAN: Thank you.

MEMBER LO: I just have a clarification. The paragraph mentioned about Openmatics platform 2.0. Is that

a hardware platform or is it a software app platform?

MR KULIS: It is the software app platform. It is the server side of the solution.

MEMBER LO: So that's a software platform, that will manipulate the data collected for various purposes.

MR KULIS: Exactly.

CHAIRMAN: Well, thank you very much for your assistance, Mr Kulis, it has been an educational experience. And we hope to put the information to good use.

Thank you for accepting our invitation to assist this enquiry in its work.

MR KULIS: Okay, it is my pleasure to help you.

MR HUI: Mr Chairman, I have a short closing remark on behalf of ZF.

CHAIRMAN: We will happily receive it.

MR HUI: On behalf of ZF I wish to thank this Commission for its invitation to assist. ZF will continue to try their best to assist this Commission on a voluntary basis. ZF is determined and committed to make a contribution to the improvement of road safety in Hong Kong and around the world.

We hope the information provided by ZF, and Mr Kulis, is helpful to this Commission, and for further information and documents, we will continue to work with the Secretariat. Thank you.

CHAIRMAN: Thank you for that statement, and thank you for the undertaking to continue to assist us. It is most gratefully received.

Mr Kulis, thank you for your assistance, and these proceedings are now closed, for the current hearing. Thank you.

(4.30 pm)

2018 年 7 月 14 日

上午 9 時 01 分恢復聆訊

出席人士： 黃碧嬌議員，BBS，MH，JP，大埔區議會副主席和交通及運輸委員會轄下跟進公共巴士及小巴服務工作小組主席（大埔區議會代表）

劉志成博士，交通及運輸委員會主席（大埔區議會代表）

陳笑權議員，MH，JP，環境、房屋及工程委員會主席（大埔區議會代表）

陳灶良議員，MH，地區設施管理委員會主席（大埔區議會代表）

任啟邦議員，交通及運輸委員會委員（大埔區議會代表）

容溟舟議員，交通及運輸委員會副主席（沙田區議會代表）

陳穎欣議員，環境保護工作小組主席（深水埗區議會代表）

林家輝議員，BBS，JP，地區設施委員會主席（深水埗區議會代表）

主席：（經傳譯員）早晨，我哋歡迎大埔區議會嘅代表，我哋多謝佢哋接受我哋邀請今日嚟到協助我哋提供證供。我首先會請黃女士向代表提問題，如果黃女士想請區議會嘅邊位特別嘅代表回答問題，請你可以指出係邊一位嘅代表，然後請佢答問題。而家可以請黃女士協助委員會提出問題。

黃佩琪女士：（經傳譯員）多謝主席，歡迎各位先生、女士出席今日嘅聽證會，我有幾個題目方面係想提問題嘅。首先我想邀請大家睇一封信，係委員會喺 2018 年 5 月 4 號所寫嘅，就係請你就住三宗意外提供證供，就係 DC 文件夾第 2 號 759 頁，係中文嘅，我想提嗰三宗嘅意外，就係大概講一講，第一宗就係大貴街，2012 年 10 月 10 號，就喺註腳 1 嗰度嘅；第二，就係大窩西支路，2013 年 5 月 12 號嘅；然後第三宗意外就喺大埔公路，喺 2018 年 2 月 10 號嘅。喺呢封信嗰度，委員會請你就住呢三宗意外提交文件，係咪正確呀？

黃碧嬌女士：早晨。係咪而家係屬於由我哋大埔區議會係就住呢三宗嘅 case 係表達意見呀？

黃佩琪女士：（經傳譯員）仲未係嘅，而家只係一般嘅問題，就關於嗰封信，就話委員會喺封信裏面邀請各位發表意見或者提供文件，係同呢三宗交通意外有關嘅，你可唔可以首先證實呢一點呢？

黃碧嬌女士：係，喺大埔，喺呢一份文件裏面，上述三個日期都係有呢啲交通意外嘅。

黃佩琪女士：（經傳譯員）喺回覆嘅時候，我相信大埔區議會同埋佢嘅委員會同埋工作小組都可以證實，就話你只係就住大埔嗰宗意外，即係 2018 年 2 月 10 號嗰宗意外有討論過，請大家睇文件 762 頁，而英文版就係 764 頁，睇唔睇到？中文版 762 頁，第二段，或者可以讀出嚟，就係大埔區議會所發出嘅信件，係回覆委員會嘅，日期就係 2018 年 5 月 23 日，信裏面提及喺相關嘅紀錄當中，大埔委員會同埋佢嘅屬下委員會同埋工作小組只係討論過喺大埔公路接近大埔尾嗰宗交通意外，即係 2 月 10 號嗰宗交通意外，係咪正確呢？

黃碧嬌女士：係。

黃佩琪女士：（經傳譯員）我可唔可以咁講，就係根據你嘅紀錄，或者你哋嘅討論，你哋只能夠可以搵番同大埔交通意外有關嘅紀錄，就冇其他交通意外嘅紀錄呢？

黃碧嬌女士：我哋都係就住 2018 年 2 月 10 號呢一個嘅巴士意外事件係進行過一個嘅特別嘅會議係討論嘅。

黃佩琪女士：（經傳譯員）好，唔該。首先我想請你睇番呢個特別會議嘅會議紀錄，就係 2018 年 2 月 12 號，中文版就係 766 頁開始，英文版就由 782 頁開始。或者我用英文版本，我哋可以睇到出席會議嘅人士名單就喺 768 頁中文版，然後英文版就係 783 頁，就包括就係運輸署署長陳美寶女士，仲有鄒頌滿先生，就係警司嚟嘅，就係 766 頁開始，中文版。

黃碧嬌女士：係呀。

黃佩琪女士：（經傳譯員）或者就請大家睇第 5 段，英文版就 785 頁，鄒頌滿警司喺嗰段提到，就話有關嗰段路段喺 2017 年警方喺嗰度有四次拘捕行動，就係牽涉到兩名醉駕嘅人士同埋一宗同毒品有關嘅罪行，即係兩宗就危險駕駛，然後喺嗰個路段，2017 年警方就一共發出咗三十二張告票，涉及超速或者其他不遵守交通規則嘅罪行，喺赤泥坪到黃宜坳段喺 2017 年一共發生咗二十九宗交通意外，其中兩宗比較嚴重，雖然嗰段路段就冇路面偵速攝影機，但係警方不時會喺嗰個路段幾個特定地點擺放偵速工具，進行偵測超速嘅行動，你睇唔睇到呢段？

黃碧嬌女士：睇到。

黃佩琪女士：（經傳譯員）好，有關呢一點，呢個係咪因為回應大埔區議會嘅問題，就話問到嗰段路段，大埔公路嗰個特別路段發生嗰幾宗意外，所以點解警方就提供呢啲資料，係咪？

黃碧嬌女士：係。

黃佩琪女士：（經傳譯員）而事實上，你嘅會議紀錄第 16 段，或者請大家睇第 16 段，中文版 772 頁，英文版 789 頁，你可以睇到喺第 16 段第 (iv) 小段提到話過去曾經有區議員提出建議點樣改善有關肇事路段嘅道路設計，但係運輸署以

Transcript by Epiq Hong Kong, Limited

技術理由就冇跟進，佢，即係羅曉楓議員，我相信佢係大埔區議會嘅區議員，佢希望署方喺發生呢次意外之後能夠回應區議員嘅訴求加裝路面測速儀器同埋指示牌，令到呢個路段更加安全。喺呢段裏面，你可唔可以再詳細啲解釋一下第一句說話，就話過去曾經有區議員提出建議點樣改善道路設計，但係運輸署就冇跟進，可唔可以再詳細啲講一講呢一段呢？

黃碧嬌女士：好呀，唔該。我哋今日都有我哋當區嘅區議員陳笑權議員係出席嘅，喺呢度都可以請佢就住呢一段係表達一下意見。

陳笑權先生：可唔可以由我講解？

主席：（經傳譯員）係可以嘅，請講。

陳笑權先生：好。就我作為當區議員，就收到啲居民就反映，有時啲假期就好多啲快車就喺嗰個大埔公路嗰度就擾民同埋佢嘅車速非常之快，我收到啲居民投訴，我就去信畀運輸署，要求嗰度就加番啲快相機，喺信件都有提及，喺2015年7月24號同埋喺2017年6月5號分別我都去咗兩封信，第一封就畀運輸署，第二封就畀警方。我封信都寫得好清楚嘅，第一封信就關乎就喺翡翠花園附近嗰度逢係星期六、日朝頭早好多啲快車，就我就畀咗封信運輸署，運輸署就佢都有口頭上有回覆我嘅，首先都一定要諮詢當區啲居民、啲法團，睇下佢哋個回應先，由於上面嗰度就--翡翠花園嗰度就唔屬於係一個嚴重交通意外嘅黑點，所以一路一路就未有去跟進到。

至於第二封信嗰度，就喺大埔尾至到嗰個鹿茵山莊嗰段，由於喺赤泥坪嗰面一路上斜坡，個車速一般普通車係快唔到嘅，除非嗰啲係一定係啲跑車先可以快得到。上咗之後一落，落個彎位個車速就一定好快，所以我見到嗰個彎位好得人驚，我知，我就去信畀直情係警方，要求警方喺度加個快相機，警方就都有覆我嘅，佢就話嗰度唔屬於一個好交通黑點，不過佢都會派人去睇或者派嗰啲快相機，喺嗰度裝啲快相機就喺度監控，呢度都有做。

上次經過呢個意外之後，佢哋問我有冇睇過呢條路，我即時--好在我自己有作為一個議員，不斷都有監察政府嘅運作，所以我即時就攞番兩封信就呈現番喺區議會度，同埋好多傳媒、啲媒界就都係我作為當區議員，我係有事實當然係有要求運輸署同埋警方喺嗰個路段就要求佢做一個減速標誌同埋加快相機嘅，所以羅曉楓睇到我呢兩封信，佢先至有追問，佢話「點解議員寫咗封信，你哋冇反應呢？」就咁嘅一封信得嚟嘅，唔該。

黃碧嬌女士：唔該陳笑權議員。

黃佩琪女士：（經傳譯員）唔該陳先生。你提到有幾封信，第一封就係2015年7月24號嘅信件，或者我哋首先睇嗰份文件，呢個就係寫畀運輸署嘅，中文就係840-72頁，英文就係840-75頁。

陳笑權先生：係，啱。

黃佩琪女士：（經傳譯員）呢封就係第一封信你寫畀運輸署嘅，大埔組王國良先生就

係負責工程嘅，嗰度就提到話你係收到喺附近居民要求協助，就話嗰度就冇足夠嘅慢駛嘅道路標誌喺近住翡翠花--嗰度嘅，所以你就要求佢哋儘快加裝50公里時速限制嘅道路標誌喺度，然後以提醒駕駛者就要小心安全駕駛，呢個係咪你第一封信得到個回覆？

陳笑權先生：正確嘅。

黃佩琪女士：（經傳譯員）陳先生，你提到話要儘快加裝時速50公里嘅速度限制標誌，喺嗰段時間，嗰段車其實個車速限制係70公里嘅，所以點解你會寫到話係50公里呢？

陳笑權先生：由於70就再減落去，香港法例係得50嘅，佢冇65，又冇60，所以得50，同埋佢哋啲居民--住喺翡翠花園一帶嗰啲居民都向我嗰個求助，佢話「你作為一個議員，就幫我去信。」我應佢哋要求。亦都之前有少少嗰啲插曲，有啲嗰個--有些少交通意外，同埋個彎位--個手臂彎係最彎嗰個位，我覺得喺嗰段嚟講，就50就都係合理嘅，我就唔係專家，我就交番畀運輸署嗰面就幫我做一個諮詢同埋去睇下可唔可以喺上面路段可以裝番個50咁。

主席：（經傳譯員）我哋嘅理解，就係話呢個即係你係有要求將嗰個時速限制由70公里減到50公里呢，即係每小時？

陳笑權先生：係，我都係聽民意，市民畀電話畀我，我都覺得喺嗰個彎位係危險啲嘅嗰度，所以我係特別註明嗰個彎位一帶嗰度就由70減為50嘅。

黃佩琪女士：（經傳譯員）有關呢封信，運輸署或者--應該話運輸署冇畀過書面回覆係回應呢封信嘅，即係喺大埔意外之前，係咪正確呢？我相信你喺你進一步提交文件畀本委員會時候有提到嘅，就係一封信18年7月11號嘅，中文版即係840-76頁，然後英文版就係840-86頁。

陳笑權先生：係，就當時就運輸署就冇好正面，不過我都有電話同佢傾嘅，佢哋都係要口頭上都要--如果係要減嗰個改為50，都要去諮詢番一帶嗰個居民同埋嗰啲法團嘅意見。亦都喺2014年嗰度，亦都喺國際嗰個--日本人國際學校嗰個紅綠燈對出嗰度有單交通意外嘅，導致一名市民就會傷亡，運輸署亦都有回應過嘅，就係王國良先生。佢始終就嗰個車路就限制50，運輸署與警方要研究後個意外，包括埋駕駛者嘅態度同埋遵守嗰個交通燈嘅問題，個意外就--即係喺嗰個路段要做一個70改50，可能喺運輸署嘅角度，佢要做好多好多諮詢同埋要同警方聯繫，咁樣先可以改到。我就一路一路喺度等，都有聯絡，而家都王國良先生都調咗，都有不幸就呢個大埔尾嗰個交通意外，好在我之前亦都提示警方，我話運輸署做唔到，我話不如試下警方，由警方負責去裝呢個快相機嘅，呢度就係一路跟進緊。

主席：（經傳譯員）喺電話上面，同運輸署關於呢件事，你同邊個通過電話？

陳笑權先生：王國良，嗰個運輸署嗰個工程師。

主席：（經傳譯員）佢喺運輸署入面，佢嗰個嘅官階職級係乜嘢呀？

陳笑權先生：嗰陣時應該係運輸署嗰個高級主任嚟嘅，好似高級主任。

主席：（經傳譯員）你同佢講關於2015年7月24號嗰件事通話嘅時候就係講啲乜？係幾時同佢通電話？

陳笑權先生：唔係好清楚，我哋每一日做議員，都一收到啲個案，都儘快都同佢哋傾，希望佢哋儘快裝嗰個標誌同埋嗰個減速嘅，由於佢哋嗰個程序上，政府好多個程序上嘅，我都明白嘅，我哋一路一路去跟進，佢要去裝嗰個50呢，佢真係要去地區諮詢嘅，我都明白到有個程序喺度，一路一路一路跟，尤其是我哋喺地區上係好多好多工作，呢個係其中之一嘅工作。呢度就都居民都耐唔耐都有畀下電話我，都想將呢一段路段，嗰個手臂彎位嗰度一帶就係想減速為50，呢個好清楚嘅呢度。

主席：（經傳譯員）黃律師，我哋未講其他嘢之前，可唔可以睇一睇呢段路段嘅地圖、相，等我哋知道我哋究竟講緊乜嘢呢？

黃佩琪女士：（經傳譯員）係。或者可唔可以睇番大埔公路路段嘅地圖？首先，陳生，我想你睇下呢個地圖，有關嘅路段，話你建議將車速減低係喺呢一個翡翠花園附近嘅，似乎就係喺26同29呢兩個數字中間嘅，係嘛？

陳笑權先生：係，嗰個紅林路之前嘅手臂彎位嗰度。

黃佩琪女士：（經傳譯員）或者你可以指出你向運輸署建議，叫佢哋睇番減速嘅嗰段路段，即係由呢一個70公里減到50公里嗰個路段，可以講一講嗰個數字，顯示畀我哋睇。

陳笑權先生：係30、29至28嗰個彎位嗰度，即係喺30進入29至28嗰個彎位嗰度，同埋佢地下嗰度一大雨就會水浸，嗰個彎位，28嗰度個彎位，我啱啱亦都去咗信畀路政署，要求佢將嗰個地下水--就佢一大雨就養住啲水，就喺個路面度係非常之危險嘅，所以嗰個彎位，我特別好重視呢個彎位嘅。同埋朝頭早，星期六、日，嗰啲跑車入呢個彎位好危險，所以我就係重點就喺呢一帶嘅。唔該。

黃佩琪女士：（經傳譯員）或者我哋可以畀你睇下28、29同埋30嗰啲嘅相，等我哋知道你講緊嘅係邊一個彎，第28號嘅相，呢一度就影到嗰一部分，就係近住紅林路嘅，係咪呀？

陳笑權先生：呢個係前咗，後番少少，呢個係出番九龍方向，你而家再前--你係啱啱倒番轉頭，應該係向後。

黃佩琪女士：（經傳譯員）或者27，係咪呢？

陳笑權先生：我諗褪多一格。

黃佩琪女士：（經傳譯員）26？

陳笑權先生：你又過咗龍，30，29。

黃佩琪女士：（經傳譯員）應該係26同27之間？

陳笑權先生：呢個蔚海山莊，唔係呢個，你後番，後番。

黃佩琪女士：（經傳譯員）係咪29呢？

陳笑權先生：（沒有可聽到的回答）

黃佩琪女士：（經傳譯員）陳生，或者我哋畀條片你睇，就係有關路段，等你可以話--到咗嗰度，你就叫我哋停。

陳笑權先生：再向前啲，就到㗎嘞。（上午9時27分委員會播放影片）

陳笑權先生：再向前啲。

（上午9時27分委員會繼續播放影片）

陳笑權先生：就係過咗呢個--喺呢個彎位，停，呢個彎位，一路轉落去，個彎位有陣時兩架雙層巴士一過都好--呢個就好危險，同埋地下呢個彎位，即係啱啱有個人企喺度嗰度就好容易養水嘅呢度，一落雨就有堆水喺度，所以呢度係特別危險嘅呢度。

主席：（經傳譯員）未講之前，我可唔可以就係從呢一個嘅照片嗰度搵到呢個地點呀？

黃佩琪女士：（經傳譯員）或者可以我哋係印出嚟。

主席：（經傳譯員）咁相，有冇一本相簿？

黃佩琪女士：（經傳譯員）我哋揀咗幾張相嘅，但係就冇影到呢個位，不過我哋可以寫低個時間，然之後就印嗰張硬照出嚟嘅，即係搵番呢一個座標，然之後印番嗰個地點出嚟。

陳生，你就提到有一宗意外，就喺日本人學校嘅，我想請你睇番一封嘅投訴信，就係來自香港日本人學校嘅，日期係15年嘅2月10號，英文就係840-84頁，中文就係840-85頁，正本就係一橫84，就係840頁嘅，呢度見

到係一位 Ashton 先生就寫信畀你哋，就話之前嗰年喺學校外面有位女士過馬路嘅時候就被撞死，嗰度嘅車速係 70，每小時 70，可能因為咁樣而令到佢嘅傷勢嚴重。喺第四段，佢亦都提及喺大埔公路有啲路段車速已經調低到係時速 50 公里，所以佢懇請將學校外嘅嗰段路段車速都要調低到同一水平，呢個係由 Ashton 太太代表香港日本人學校請求將嗰段路段由每小時 70 調低至每小時 50 嘅，呢個係咪就係你之前提及嘅嗰封信呀？

陳笑權先生：就我提及呢封信，即係我檯面封信，我知道就有人提及就話上次有個交通意外，我都關注到嘅，所以我呢封信就係寫喺翡翠花園一帶附近減至 50。上述嗰個意外，我都問咗運輸署嘅，屬於係一個什麼交通意外，係佢自己衝出馬路吖，定喺紅綠燈畀車撞到呢，係屬於邊個責任呢，我哋亦都要問一問署方嘅。如果佢自己衝出馬路，我哋就都要睇佢點樣做。我上次都同運輸署同警方都--運輸署，我都要求佢將而家上述嗰個紅綠燈嗰度改善佢嘅，即係畀佢哋啲行人過路就更加安全、更加適合去過馬路，係咪上述嗰個位置係咪真係適合呢，我都同運輸署都同佢提過下嘅。唔該。

主席：（經傳譯員）呢封信係寫畀一位嘅文生或者萬生嘅，點解會係去到你手呢？

陳笑權先生：唔係，我睇到呢份嘢喺度，呢份文件喺度。佢寫畀文春輝主席，當時佢係交通運輸委員會主席，係呀，係呀，應該係。

主席：（經傳譯員）唔該晒。

黃佩琪女士：（經傳譯員）呢封信就喺區議會會議，15 年 3 月 13 號係討論過嘅，中文係 840-81 頁，英文就係 840-92 頁，我哋就見到主席嘅名文春輝，如果睇番 79 頁的話，主席提及日本人學校嗰封信，就話佢哋要求將時速 70 減至 50，要求區議員去探訪佢哋學校，同佢哋傾關於交通嘅事項嘅，你見唔見到 79 段？

陳笑權先生：我睇到，係。

黃佩琪女士：（經傳譯員）如果睇番第 80 段，呢個就係 840-92，王國良先生就回應，我相信呢位王國良先生即係喺封信裏面提及到嘅，就係即係你寫信畀佢，當時就係呢個 15 年嘅 7 月時候你寫過信畀呢位王生嘅，係咪呀？

陳笑權先生：呢個都係有關連嘅，當年我寫信畀佢嗰時就係收到翡翠花園一帶啲居民就投訴話嗰個車速，有朝頭早星期六、日好多快車喺度奔馳，好危險，呢單係另外一單嚟嘅，我都知道連貫帶一帶，我要求佢就要喺嗰個翡翠花園一帶就將嗰個車速減為 50，就呢個係我都知嘅呢單。

黃佩琪女士：（經傳譯員）喺第 80 段，王國良先生回應話佢知悉日本人國際學校要求喺學校門口嘅嗰段路段係將嗰個嘅車速係降低嘅，因為曾經發生過呢一個嘅係意外，當時係 2014 年，有一位嘅公眾人士係因而死亡嘅。佢就話運輸署就係究研過呢個嘅意外原因，未必係同當個路段嘅車速有關，因為可能就係同駕駛

人士態度、行人有冇遵守燈號係有關，呢度亦都同時有講話署方會研究呢個路段嘅車速限制係咪適合。另外署方亦都係作咗一個嘅簡覆畀學校，稍後會係再詳細回覆嘅。似乎 3 月，即係 2015 年 3 月，運輸署話會研究該路段嘅車速限制，佢哋有冇同區議會跟進番呢個嘅意見、呢個嘅要求，即係喺嗰次開會之後？

陳笑權先生：係呀，佢嗰日都有寫嘅，呢一段，副主席畀我睇，佢已經進入嗰個司法程序，所以就唔方便討論，因為可能嗰陣時檢控緊嗰個--唔知係咪檢控個司機定係咩嘢，都有寫，喺 87 段嗰度係區議會都有提過。

黃佩琪女士：（經傳譯員）陳生，但係我個問個問題唔係講關於意外嘅原因，就係話運輸署話佢哋會研究目前嗰段路嘅車速係咪適合，你見唔見到喺 80 段裏面呢一行呀？係王國良先生講嘅。

陳笑權先生：每一日我哋開好多會，真係我就冇乜印象，不過據我所知，我哋要求佢做，就係佢哋進入佢哋嘅程序，就由佢哋決定，我哋都係等嘅啫，我哋作為一個議員就。唔該。

黃佩琪女士：（經傳譯員）即係喺會議之後，當時係 2015 年嘅 3 月，會議之後，運輸署係冇搵區議會同佢哋傾關於時速限制嘅，係咪呀？

陳笑權先生：有冇同文主席講，我就唔係好清楚，即係佢寫信畀文主席，我作為當區議會，就而家我都係不斷都有同佢傾嘅，始終都係話嗰度一定要諮詢，要成個路段--即係喺嗰一段個彎位要改個 50，都係要諮詢嘅，佢話唔係咁簡單嘅。

主席：（經傳譯員）個問題其實就係問佢哋有冇同你講呢一個諮詢之後嘅結果呀？因為係三年前嘅事嚟㗎嘛。

陳笑權先生：冇呀，如果有結果，我就唔會再去第二封信去畀警方，就係 17 年--唔係，17 年--2015 年嗰封信到而家就係冇乜結果，所以我先至再喺 2017 年嗰度先再畀封信畀警方。

黃佩琪女士：（經傳譯員）喺我哋繼續之前，我想畀個地圖你睇睇嘅，係畀你睇睇日本人學校個位置嘅，個位置就係响 21、22 之間嘅，如果可以攞番照片 21、22 號出嚟，應該係 21 嘅，21 係顯示到日本人學校個位置嘅，啱唔啱呀？

陳笑權先生：呢張係鹿茵，呢張就啱喇，呢張啱，嗰個紅綠燈嗰度。

黃佩琪女士：（經傳譯員）唔該晒。你就將封信係交咗畀警察，麻煩你睇睇文件夾係 840-70 嘅，呢個係中文版，840-74 係英文版嘅，呢封信係 2017 年嘅 6 月 5 日嘅，係由你寫畀警察嘅，我哋見到封信就話好多人係超速嘅，係响假期會超速，你要求係有啲影快相嘅攝影機安裝嘅，係咪呢？

陳笑權先生：係。

黃佩琪女士：（經傳譯員）警察亦都有回應嘅，...

主席：（經傳譯員）喺你繼續問之前，呢度係講緊大埔路嘅，會唔會係有某個路段係有超速呢個問題呢？

陳笑權先生：嗰個我頭先都講咗，由赤泥坪上斜路嗰度，佢進入嗰個大埔尾，而家巴士意外涉事嗰個位置，嗰個手臂彎位都好多交通意外嘅，所以我喺嗰個路段指明就大埔尾至鹿茵山莊嗰段，呢封係第二封信，我亦都收到鹿茵山莊有啲居民就不斷畀電話我，就話嗰度星期六、日又係一樣，就嗰度好多啲快車，超速，尤其是手臂個彎位，啱啱巴士個意外嗰度，佢一落一轉過去右手嗰度，架車會飄，你普通車就好容易反嘅，所以嗰段我就註明咗喺嗰度，就要求佢做一個 50 公里同埋做嗰個快相機嘅，呢度我第二封信出去嘅。

黃佩琪女士：（經傳譯員）而家係有個地圖係可以顯示出嚟，你可唔可以講一講嗰個--頭先你封信提到嗰個鹿茵山莊？呢個係咪接近日本人學校嗰個位置呀？

陳笑權先生：呢封信係第二封嚟嘅，第一封就係翡翠花園一帶，呢封係第二封嚟嘅，就你呢封就唔係提及嗰個日本人國際學校嘅，第一封就牽涉到國際學校。

黃佩琪女士：（經傳譯員）呢個就係你講緊嗰個位置，地圖呢個鹿茵山莊就响日本人學校後面嘅，喺地圖上顯示出嚟嘅，可唔可以確認呢？

陳笑權先生：地圖嗰度，咪住先，我就睇得唔係太清楚，應該係咪喺 22 至到 20 嗰度嗰段，定係--乾坑都屬於係咩嘢㗎喎。

黃佩琪女士：（經傳譯員）我哋放大個圖片畀你睇睇。

陳笑權先生：呢個就係樟樹灘，樟樹灘個路口巴士站，未到鹿茵，包括埋在內，呢段路，係喇，鹿茵，呢度係鹿茵，至到鹿茵呢度啱，鹿茵嘅入口。

黃佩琪女士：（經傳譯員）你封信就講到話成日有超速、賽車响大埔路嘅，你就喺封信就冇提到嗰個車速限制，可唔可以講一講點解呢，點解要有個咁嘅車速嘅要求呢？

陳笑權先生：我 heading 已經寫咗，要求加設 50 公里車速限制標誌，同埋加埋嗰個時速--係呀，有寫喎。

黃佩琪女士：（經傳譯員）我而家係講緊係 6 月 5 號嗰封信。

主席：（經傳譯員）呢個封信可以打埋上屏幕吖不如。

陳笑權先生：呢個快相機，一般嚟講，嗰度係 70，如果你加個快相機，佢超過個車速就會影相，一般駕駛者嚟講，佢一見到快相機會收腳，好自然嘅，我就寫咗上去，係都係要--應我哋啲居民，要加個快相機上去嘅，你啱嘅，呢度係我冇寫上去，不過快相機個作用，如果佢寫 50，就超過 50 就會著，如果佢寫 70，超過 70 就會影到佢嘅。

黃佩琪女士：（經傳譯員）警察就响 2017 年嘅 6 月 17 號係有個回應嘅，麻煩你睇

睇 840-71 頁，英文版就 840-73 嘅，警察就話個安裝呢個定點嘅快相機主要係由運輸署嗰度去決定嘅，喺安裝咗之後，警察就係負責係執法嘅，而運輸署係知道目前係冇一個安裝固定偵察車速嘅一個意圖嘅，喺相關嘅路段。同時警方就會繼續密切留意住呢個路段嘅交通嘅情況嘅，呢封信係抄送畀趙鏡波先生，又係運輸署技術服務交通控制組嘅，同埋亦都畀咗大埔分區指揮官，你睇唔睇到呢封信嘅內容？呢封信亦都係發咗去你本人嗰度嘅。

陳笑權先生：就呢封信我出嘅，佢都應該都要回覆番我嘅，呢封信都係我交出嚟嘅，我每一封信我都有紀錄嘅，就呢三封信全部都係我攞出嚟畀大家睇嘅。亦都事實係，佢哋就--我哋就同--運輸署，我見到佢都仲未搞得掂，我所以我直接就寫信畀警方，睇下佢哋嗰面可唔可以加一個快相機就喺大埔尾同埋啱啱落斜路之間嗰個位置嘅，呢個係我要求。

黃佩琪女士：（經傳譯員）換句話說，佢哋就話運輸署就係拒絕咗你個要求，而警察只不過係一個執法機關嚟嘅，所以佢哋係無能為力嘅，除非運輸署係安裝呢個固定嘅偵察車速攝影機，係咪咁呢？

陳笑權先生：係，清楚嘅，佢都咁回覆，事後我都有經過呢一次咁嚴重災禍，我都直接再同警方一位警司都落去現場睇過，亦都佢哋都承諾咗就會喺呢個年尾就會裝番個快相機。

黃佩琪女士：（經傳譯員）主席先生，麻煩你睇番個會議紀錄，係 2018 年嘅 2 月 12 號嘅，呢個就會係响英文版嘅 790，中文就係 772 頁嘅，喺第 17 段有個羅馬數字(ii)嘅，劉志成博士就有以下嘅意見嘅，佢就話大概喺半年前，有啲區議會議員係建議安裝一啲快相機嘅，就响意外發生嗰個路段安裝嘅，但係就被相關嘅當局係拒絕咗嘅，佢嘅意見就話係--即係佢話政府部門就話有足夠嘅一個車速嘅限制嘅牌，當車行落山嘅時候，佢話有關嘅政府當局就應該考慮番係咪應該係維持一個 70 公里咁嘅速度嘅，佢話舉個例子，喺西頁有過意外，清水灣又有意外，因為個車未能夠及時剎車嘅，所以個車速其後由時速 70 公里調低到 50 公里，同埋亦都加裝咗偵速嘅攝錄機，佢建議調低大埔公路調低到 50 公里同埋加裝呢個偵速嘅攝錄機嘅，係讓啲駕駛人士就唔好超速嘅。呢個問題其實應該係問番劉志成博士嘅，佢係提到大概半年前區議員係已經建議係喺有關路段安裝呢個偵速機嘅，呢個要求係咪以書面形式提出嚟嘅呢？

劉志成先生：你話個 request 係--即係唔係我嘅 request，而係我當時係知道有當區議員寫咗一個 request 出去嘅。

主席：（經傳譯員）你係咪講緊陳先生嘅要求？呢個係咪個問題？呢個係陳先生嘅要求嚟嘅。

劉志成先生：Yes, that was Mr. Chan's request, yes.

黃佩琪女士：（經傳譯員）當你相關嘅政府部門拒絕，係有警察嘅一封拒絕信，我哋剛剛見過嗰封，啱唔啱？

劉志成先生：（經傳譯員）啱嘅。

黃佩琪女士：（經傳譯員）如果我哋接住睇落去，睇第24段(iii)，英文喺794頁嘅，中文776頁嘅，第24段羅馬數字(iii)，呢個區鎮樺議員，佢就話認同要將肇事路段嘅車速限制由70公里調到50公里嘅，然而司機嘅駕駛態度亦都十分重要，部分巴士司機可能因為係十分熟悉路段，就會以較快嘅車速行駛，加上該路段係斜路，就算巴士喺車速達到時速70公里時會鎖車，但係落斜同埋車身嘅重量會產生衝力嘅，令到車速係更快嘅，佢建議巴士公司係應該提醒行駛危險路段嘅巴士司機係應該更有耐性嘅，同埋落斜路要減慢車速；另外佢希望巴士公司係會訓示所有巴士司機，提醒佢哋要保持良好嘅駕駛態度嘅；而响羅馬數字(vi)嗰度，佢就問警方過去一年該路段或者整段大埔公路發生嘅交通意外數字嘅，佢就問大埔公路係咪應該設有呢個偵速嘅攝錄機呢，如果係嘅話，個數量同埋位置係幾多。而家我想首先問一問關於呢個車速限制，由70公里下調到50公里，喺嗰次會議之後，你同運輸署有冇去考察過現場呢？去番個意外個現場嗰度考察，去討論你呢個下調車速嘅要求嘅。

劉志成先生：（經傳譯員）你係問緊邊位呢？

主席：（經傳譯員）你哋之間要商量下究竟係邊位要回答，或者黃小姐係可以提示邊個會作答。

黃佩琪女士：（經傳譯員）黃小姐。

黃碧嬌女士：好，我請我哋交通運輸委員會主席劉志成博士答吖，係。

劉志成先生：（經傳譯員）呢個係區先生同埋另一位區議員提出嘅，我覺得應該係由陳先生回答會好啲，佢係嗰區嘅區議員--當區區議員嘅。

主席：（經傳譯員）陳先生，可唔可以幫幫忙呢？個問題係就係有冇去考察。

陳笑權先生：我本人就有，你話區議會佢委員會主席當日喺個會講，議員就個個都有提問嘅，佢提問啫，不過佢有冇跟進就另外一 part。我作為自己當區議員，我就一定係有去睇過嘅，事前、事後、之前、之後我都有睇過嘅，我本人一定有，劉志成博士就佢作為一個主席，有冇出席，我唔係好記得喇咁就。

主席：（經傳譯員）你係咪同運輸署一齊去？嗰個係問題呀，嗰個問題係有冇聯席嘅一個考察活動？

陳笑權先生：同運輸署有嘅，我私人有。

黃碧嬌女士：好，或者等我回答一下，我哋係同埋我哋大埔區議會張學明主席、我哋民政事務專員呂少珠女士，就聯同我哋全體大埔交通運輸委員會全體嘅委員係實地係視察過一次嘅，當中區鎮樺議員都有出席嘅。

主席：（經傳譯員）係，唔該晒嘅。

黃佩琪女士：（經傳譯員）唔該晒。喺嗰次嘅實地考察，現場考察，你哋同運輸署同埋出席嘅人士係去做嗰次考察，係咪同意就係嗰個車速限制應該下調嘅，係為嗰個路段係需要下調，係因為出咗交通意外，應該下調個車速？

黃碧嬌女士：係，我哋喺現場就提出咗兩個要求，第一個就將呢一個嘅車速由 70 公里下調至 50 公里，就要落番一個車速嗰個嘅指示牌；第二個要求就係要喺呢一個嘅減速呢個路段係加裝一個就係嗰個叫做快相機。

黃佩琪女士：（經傳譯員）喺考察嗰個時間有冇討論到應該邊度安裝呢個車速攝錄機，個位置，即係邊度安裝呢個攝錄機？

黃碧嬌女士：係有睇到呢一個嘅位置嘅，跟住因為嗰日都一部旅遊巴嘅人數，接近有四十人去到現場，其實嗰個嘅路面有超過四十人喺度，我哋都覺得大家喺度咁樣視察都係比較危險，因此我哋就再係將有一啲我哋要求嘅嘢就帶番喺嗰個嘅區議會嘅會議室度，再喺我哋嘅 T and T 裏面繼續跟進嘅，而好準確要放嗰個嘅快相機喺邊一度呢，我哋就交咗畀運輸署同埋警方係再聯絡當區區議員就係陳笑權議員係再去跟進。

陳笑權先生：我有嘅，我同負責嗰個交通個警司喺現場睇過嘅，都有指定嗰個位置，喺嗰個啱啱落斜嗰個位係安裝嗰個攝錄機嘅，都有傾過嘅。

黃佩琪女士：（經傳譯員）呢啲係咪全部書面寫低嘅呢，或者喺會議紀錄嗰度有記錄嘅呢？即係除咗你提交畀我哋嘅紀錄之外，有冇記錄呢？

黃碧嬌女士：呢一個就冇係再喺嗰個會議裏面逐項咁細節寫出嚟，因為要去到擺呢一啲位，當區嘅區議員仲要連絡埋喺呢一個嘅大埔尾佢有三條村嘅村長嘅，亦都要聽番村長嘅意見同埋呢一個巴士站嘅一啲--即係再將佢維修同埋燈柱點樣種番，呢一啲好細節嘅嘢就真係由番當區區議員陳笑權議員係繼續喺現場再約一啲嘅時間去跟進，所以你剛才都聽到陳議員係講咗好幾次之後佢係自己同不同嘅部門都落過去睇過。

主席：（經傳譯員）你可唔可以畀番個日期，即係嗰四十個人嚟去考察係幾時呢？

黃碧嬌女士：應該係 4 月 12 號，我諗我哋各位同事一齊協助下，應該係 4 月 12 號，因為我哋就租咗架旅遊巴上去，睇完之後，我哋就--係喇，4 月 12 號嘅兩點鐘，我哋喺大埔政府合署集合，跟住就上到去大埔公路巴士站就進行視察嘅，嗰個時間就係兩點三個字去到大埔尾呢一個事發嘅現場嘅。

主席：（經傳譯員）唔該。

黃碧嬌女士：係，okay，唔該。跟住我哋就係喺番三點半有一個叫做 DMC，地區管理委員會嘅會議上面就進行我哋視察之後嗰個嘅討論嘅嘢，呢一個嘅會議就只係區議會嘅正、副主席同埋我哋五個委員會嘅主席，有七位嘅區議員就同我哋民政事務署同埋係大埔嘅部門係一齊開會嘅。亦都再補充，呢一個嘅會議係有一份會議紀錄嘅。

黃佩琪女士：（經傳譯員）繼續講2018年2月嘅會議紀錄，即是九巴嘅回應，798頁英文，780頁中文，35段提到蘇偉基先生嗰個意見同埋佢回應區議員嘅意見，35段第(ii)小段就話九巴會考慮區議員有關782路線嘅建議同埋會提交建議畀運輸署同埋區議會，畀佢哋考慮嘅，即係日後。首先九巴--或者應該話，首先九巴提及區議員嗰個意見係咩嘢呢？

黃碧嬌女士：872呢個路線，我係建議唔好繼續係行番由馬場行大埔公路再返大埔嘅呢條路線，我希望佢係再有一條新嘅路線，而呢條新嘅路線就可以係行吐露港公路。

黃佩琪女士：（經傳譯員）佢哋有冇提交任何建議畀區議會考慮呢？即係自從嗰次之後。

黃碧嬌女士：係，由佢--就我哋呢一個會完咗之後，就接近係過年，就冇再會議㗎喇，運輸署嘅同事就有打過電話畀我，就問我同唔同意就係改為872X，就由呢一個馬場經吐露港就返到去大埔中心嘅。

黃佩琪女士：（經傳譯員）想請你睇第12段，英文版788頁，中文版771頁，呢個建議係關永業先生提出嘅，第12段第(iv)小段，佢就話自從佢出任區議員十八年嚟，一路都未試過有大型嘅大埔公路擴闊或者改善工程，佢明白大埔公路受到地理環境嘅限制，但係佢仍然希望有關部門可以盡力喺今次意外之後研究改善方案；佢亦都希望運輸署能夠一併研究大埔區議員轄下其他嘅公路嘅改善方案，例如係汀角路、林錦公路同埋西沙路，認真處理區議員提出嘅訴求，避免發生因為道路缺憾而引致嘅交通意外。喺有關呢個要求，係關議員提出嘅，佢提到大埔公路從來都喺過去十八年進行過--都冇進行過大型嘅擴闊同埋改善工程，你嘅睇法係點呢，當佢咁講嘅時候？

黃碧嬌女士：我諗就聽番呢一個區嗰個嘅區議員回應下，好唔好呀？陳笑權議員，唔該。

陳笑權先生：大埔公路本身有個先天性就係個彎位就都多嘅，有擴闊過嘅，佢之前翡翠花園嗰個彎位都有削過嗰個斜坡嚟嘅，事實上喺嗰個路段嚟講，佢嘅嚴重交通意外就唔係太多嘅，咁係事實。唯一即係我哋睇到嗰個巴士嘅司機真係佢自己係不小心駕駛，如果整個路段嚟講，即係我作為當區議員，就係好多投訴就係佢哋揸快車，而驚影響有發生嚴重嘅意外嘅啫。嗰個現場嗰個位置，如果你真係話去擴闊梗係最好，香港整體嚟講，好多呢啲咁嘅彎位嚟講，大埔公路都唔算好特別嘅危險，如果真係可以做嘅，我哋都支持嘅。

黃佩琪女士：This paragraph ...

主席：（經傳譯員）或者你繼續之前。陳先生，我想提醒你，你剛才所作嘅講法，有關於2月10號嗰個意外個成因同埋邊個負責任，呢個唔係我哋委員會嘅職權範圍裏面嘅，我哋想知道嘅就係點樣去處理當時嘅情況，但係我哋就唔會係會處理邊個要負責任嘅問題嘅。

陳笑權先生：知道。

黃佩琪女士：（經傳譯員）陳生，嗰段就提到話改善嘅方案，交通運輸委員會，即係你哋區議會下面嘅交通運輸委員會係幾時提過呢啲嘅改善方案呢？

陳笑權先生：呢度就冇提過嘅，擴闊嗰個大埔公路係冇提過。

黃佩琪女士：（經傳譯員）其他嘅改善方案呢，有冇任何改善方案？

黃碧嬌女士：或者呢度講下，關議員所講，因為佢做十八年議員，佢同我同一齊做十--即係我哋一齊做議員做到而家嘅，喺我哋區議會裏面，咁多年，的而且確係喺大埔有一啲嘅路段係做緊擴闊公路嘅，例如汀角路已經擴闊咗同埋行緊，好成功㗎喇，林錦公路就迴旋處亦都係完成咗擴闊嘅，西沙路就係研究呢個方案嘅，佢嘅意思係講應該再喺下一次我哋再有提到改善公路嘅時期，應該將大埔公路都請運輸署係一併畀我哋交通運輸委員會係作一個考慮嘅。唔該。

黃佩琪女士：（經傳譯員）劉博士，你有咩嘢要補充？

劉志成先生：我想補充就係我哋喺交通運輸委員會討論某位同事提出嘅一啲嘅要求，我哋委員會就未必會係提交一個計劃畀大家嘅，通常我哋都係喺個會嗰度提出一啲要求運輸署去做一啲嘅改善嘅建議，我哋都係等運輸署嚟到去提出，佢哋作為運輸嘅專家，點樣去應議員嘅要求嚟到去畀一啲改善嘅建議畀我哋考慮嘅，即係我哋作為議員，就唔係喺呢方面嘅專家，所以喺交通運輸委員會通常我哋提咗出嚟，就希望運輸署或者有關部門係可以畀到我哋去考慮嘅就係由佢哋提出一個改善建議，我想澄清一點，喺呢方面。

黃佩琪女士：（經傳譯員）換言之，你哋會提出一啲諗法，然後--但係講話實際執行，你就會交畀運輸署，因為佢哋係專家，由佢哋去執行有關嘅改善工程，你講嘅係咪咁意思呢？

劉志成先生：係，都應該係正確嘅，係呀。

黃佩琪女士：（經傳譯員）可唔可以請你睇第26段796頁英文版，778頁中文版，第26段第(ii)小段，余智榮議員發表以下嘅意見，佢話運房局及運輸署嘅人員經常拒絕落實區議員提出嘅建議，而且經常喺會議上偏幫九巴；另外運輸署人員經常變動，導致個案嘅處理進度十分緩慢。當余議員提到話區議員提出嘅建議嘅時候，呢啲建議係咪同安全有關嘅措施呢？即係指有關大埔公路嘅路段，你可唔可以講一講嗰啲建議係咩嘢嚟呢？

黃碧嬌女士：我諗咁，因為喺會上面余智榮議員佢自己去表達呢個意見，需要由佢自己喺呢度作一啲嘅解釋同埋澄清同埋表達，我哋喺呢度就唔可以代表到佢演繹呢一段嘅深化嗰個意思嘅。唔該。

黃佩琪女士：（經傳譯員）同運輸房屋局同埋運輸署喺提出建議之後，即係每一次議員提出建議之後，會唔會有同佢哋開會嘅呢？

黃碧嬌女士：有，係，我哋喺--咁樣講，區議員佢係接受市民嗰一個嘅投訴，佢就會將呢個投訴係應該喺不同嘅渠道去表達佢哋嘅建議，透過區議會係一種，佢哋自己用信件亦都係一種，打電話亦都係一種，運輸署嘅同事係會有同區議員係一齊商討佢哋提出嘅建議嘅。或者我都可以畀--我哋有其他嘅議員，我都或者請佢可以表達一下呢樣嘢，任啟邦議員，唔該。

任啟邦先生：好，唔該。我諗就住余智榮議員或者頭先剛才律師盤問嘅時候講緊其他一啲議員同事個意見，就住運輸署點樣睇議員嗰個嘅建議，我都想表達一下。當今次嚴重嘅事故之後，運輸署或者相關嘅政府部門，包括警方、路政署咁樣，的而且確係作出好快嘅回應，包括係減呢個嘅速度，由 70 轉 50，包括係承諾係會加呢個快相機，但係呢啲訴求，陳笑權議員頭先嘅發言嗰度都已經講咗，其實佢係跟進咗好耐嘅。我亦都可以講番一句，都唔係幾好聽，不過可能係一個事實，係見到有人命傷亡，部門先至會去積極考慮、積極嘅回應，呢個我諗我哋係唔想見到嘅。頭先律師提到呢一個即係呢啲引述到議員提問嘅時候，佢就會講話--即係議員話好多時都拒絕咗區議員提出嘅訴求，呢個係事實。

喺區議會嘅文件裏面，我諗唔係淨係呢個議題，譬如話我哋喺大埔區我哋希望起一條行車天橋，一個廣福道嘅行車天橋，講咗十幾、二十年，因為嗰個問題唔會牽涉到一個人命損失，但係當當區嘅議員--大埔墟嘅議員講到話因為入去大埔墟或者入去錦山村係單一嘅路段，如果當地有交通意外，阻礙咗消防車、救護車進入嘅時候，如果又冇呢條橋，咁樣係咪會影響救援呢咁，因為冇呢件事發生，所以唔能夠催生到區議會多年嘅訴求。

我諗希望主席閣下或者法官閣下即係呢個要明白，區議會嘅運作可以咁講係非常之被動，尤其是部門係提出好多技術嘅阻礙，技術因素我哋係好難係去抗拒或者去質疑，呢個技術嘅因素包括好多數據，包括係好多即係千萬種唔能夠做到嘅理由，呢個係我哋議會覺得係好不滿，亦都係相當之無耐嘅一個情況。

我想講多一句，就係尤其是我哋議員提出嘅就係收集咗市民嘅意見，如果講交通嘅，講緊係無論係職業車司機、行人，以至到甚至係有時一啲意外發生咗之後，當然嗰啲意見係比較輕微嘅意外，但係我哋會睇到輕微嘅意外出現咗，係咪未來日子會有啲更嚴重嘅意外會出現呢？呢個我哋係睇到，所以陳笑權議員或者我哋在席我哋所有區議員點解會提出呢啲意見，都唔係空談，而係希望將一啲可能預測到嘅事故係早日去作出改善。當然點樣去作出改善，我哋冇一個能力或者冇一個技術去能夠去處理得到，但係如果做咗嗰啲措施係咪可以減輕或者減少呢啲意外出現呢？呢個當然係我哋想--即係區議會所做得到嘅工作，唔該。

主席：（經傳譯員）黃律師，或者我哋可以講其他，即係真係有發生嘅一啲改善，我知道喺 4 月 9 號有一份嘅文件，由區議員喺呢一個 5 月 11 號傾過嘅，或者可以就係同佢哋講一講。

黃佩琪女士：（經傳譯員）係，我可以跳去講運輸署嗰個嘅建議。喺呢個會議之後，喺3月9號即係18年嘅時候有另外一個會議，同樣亦都係有關於大埔公路嘅意外，係咪呀？

主席：（經傳譯員）或者你可以攞番嗰個會議紀錄出嚟。

黃佩琪女士：（經傳譯員）中文就係801，英文就係815頁開始嘅，815-82就係個英文版。或者我講番呢一個會議紀錄嘅一啲重點，跟住先至講運輸署嘅建議，呢個會議喺2018年3月9號進行嘅，第4段張偉鋒先生，佢係代表運輸署嘅。

主席：（經傳譯員）慢慢，慢慢，等代表可以睇到你究竟講緊乜嘢。其實你都會議紀錄係有呢一個嘅--有文件印咗出嚟嘅，如果冇嘅話，就可以睇個顯示屏嘅，你頭先講緊嘅就係第4段，係咪呀？

黃佩琪女士：Paragraph 4.（經傳譯員）張偉鋒先生，佢係代表運輸署嘅，佢提出四個建議嘅，喺呢一段，第(i)，就係會研究嗰個嘅速度限制會唔會修訂；第(ii)，就係加強交通標誌同埋道路標記，同埋進一步促進道路、安裝偵速攝錄機、睇番肇事附近嗰個嘅地形環境同埋點樣優化巴士站；呢個就係四項運輸署會全面檢視嘅事項嚟嘅，係咪呀？

黃碧嬌女士：係。

黃佩琪女士：（經傳譯員）我相信喺呢一次會議裏面有啲議員就係爭議呢一個--呢一啲改善項目嘅進度嘅，區議員就話減低車速限制，即係喺肇事嘅嗰段路段係咪真係可以喺較短嘅時間內將個車速限制調低，同埋係咪可以之後先至去將整段路段嗰個嘅車速限制全面檢視？

主席：（經傳譯員）或者可唔可以講一講個例子呀？

黃佩琪女士：（經傳譯員）請大家睇下第11同埋12段，呢個就係任啟邦議員嘅意見，首先佢就表示對於運輸署報告失望，佢提及喺嗰段路段有好多急彎同埋斜路嘅，就係大埔公路赤泥坪至廣福道到翡翠花園嘅一段。

主席：（經傳譯員）係12段嘅羅馬數字(ii)，佢就話首先就係要安裝一個嘅偵速攝錄機，就叫佢哋而家係要即刻要裝，唔好等到之後，係咪咁嘅意思呀？劉博士。

黃碧嬌女士：劉博士回應。

劉志成先生：我係嗰個會議個主席，就安排咗第一項就即係話呢個交通意外，想了解下運輸署跟進一啲改善措施嘅情況，其實喺當日運輸署嘅官員代表係有提過頭先講嗰四樣嘢，但係佢嗰個表達係未曾確實會幾時落實，當日佢講嘅時候。站喺我哋區議員發生咁大件事，喺2月份發生咁大件事，去到3月份都冇一啲即係話我哋要求嘅要求，即係話我哋嘅要求就係減速、加相機，呢兩樣嘢係好基

本可以即係話儘快落實嘅嘢，運輸署嘅代表都冇--當時係仍然係話喺考慮中嘅話，我哋議員同事係表達不滿，呢個表示失望或者表示不滿係呢個前設就係話因為佢當其時--雖然佢講咗四樣嘢，但係佢冇講到話係落實嘅時間。我想表達呢個意見，喺度。

主席：（經傳譯員）唔該。

黃碧嬌女士：任啟邦議員都喺度，佢可以直接表達一下。

任啟邦先生：係，我同意頭先劉志成博士嗰個演繹嘅，因為我唔係話不滿運輸署個建議，我係不滿佢個回覆係未有一個時間表，未有一個係確實係安裝快相機嘅日期，因為呢一個會就係3月9號開，直至到4月12號，即係剛才頭先都講過喺一個實地視察嘅時候先至有一個正式嘅一個匯報，就話畀我哋聽會加快相機、會改善巴士站嗰個位置同埋設施同埋會將嗰個限速調低，係直至到4月12號先有一個比較明確嘅答覆話會做出呢啲改善。當時即係如果佢運輸署用嗰個字眼，都係話「包括研究應否修訂速度限制」，「應否」即係唔知有冇，「與及係是否需要加強現有嘅交通標誌或者道路標記」，都係「應否」嘅啫，即係都係研究階段。但係我哋會覺得咁嚴重嘅意外之後其實係咪應該比較落實啲去答呢個答案呢，所以先導致到我或者當中其他議員好不滿嘅一個原因或者係好失望嘅一個原因就係咁解。唔該。

黃佩琪女士：（經傳譯員）劉博士，你都記錄低咗你嗰個嘅感受嘅，就喺呢一個嘅第31段，中文係811頁，英文係825-2，喺開呢個會嘅時候，你冇收到運輸署嘅建議書，你就投訴話係減低車速限制同埋安裝車速攝錄機唔難做嘅。

可以再睇番大埔區議會文件，日期係18年嘅4月9號，中文就係354頁，英文就係360-1，呢份文件寫咗幾個嘅措施，係佢哋向大埔區議會建議嘅措施嚟嘅，睇番，第一部分就係目的，第二部分就係檢視速度限制。建議就係話某啲路段車速限制就係會由時速70減低到時速50嘅，我哋睇番第4 (a)、(b)、(c)，即係4(I)、(II)、（III），（III）就係關於赤泥坪至雍宜路嘅一段路段，就話可唔可以將車速限制由時速70減到時速50嘅，呢個就係第4嘅(III)段。

我哋先睇一睇，跟住再畀個地圖你睇下，係4嘅小段(III)。如果我哋撐番大嚟睇，頭先我哋提及過嗰個嘅路段，即係建議車速限制減低，就由15去到31呢兩個數字之間嗰段嘅，即係呢個啡色嗰段路段，可唔可以確認一下就係運輸署嘅建議嗰個路段嚟嘅？

劉志成先生：（經傳譯員）係，呢個係由運輸署建設嘅。

黃佩琪女士：（經傳譯員）佢哋亦都提出咗其他嘅措施，包括道路標記、交通標誌，呢個係第8小段(1)，我哋睇番，首先係顯示到交通標誌，即係運輸署建議嘅，係頁數係運輸署嘅文件360頁，佢哋就建議增加兩個嘅標誌，另外就係其他嘅一啲警告標誌，即係譬如話慢速，而家有一個見到就係100米，跟住就話右邊

有彎；第二個交通標誌就係見到就係有個--又係黃色同埋呢一個嘅係紅色嘅標誌嘅；跟住就係其他嘅道路標記表示道路嘅車速限制係減低嘅。可唔可以講畀我哋聽呢個係咪同運輸署所傾過嘅建議呀？

劉志成先生：（經傳譯員）係，呢個係運輸署提出嘅，我哋喺交通運輸委員會同佢哋傾過。

主席：（經傳譯員）即係話文件就係9號，但係開會就係12號？

劉志成先生：（經傳譯員）會議係...

主席：（經傳譯員）我而家講緊嗰個嘅係--真係去睇嗰個道路段，另外開會就係5月11號，係咪呢？

劉志成先生：（經傳譯員）呢個就喺4月12號會議嘅時候有提出嘅。

黃佩琪女士：（經傳譯員）有關於呢個建議其實係有一個草稿嘅，係今年嘅5月11號會議紀錄嘅議稿，係咪...

主席：（經傳譯員）未講之前，我哋講一講，就係咪話即係之前嗰日，13號係咪已經就係批准咗㗎喇？

劉志成先生：喺琴日你--法官想知道喺琴日我哋開交通運輸委員會個會議有冇再傾呢一個proposal，係咪呀？

黃佩琪女士：（經傳譯員）唔係呀，呢個只不過係一個會議紀錄嘅草稿嚟嘅，係有冇批准--係咪已經核准咗嘅呢？

劉志成先生：That was approved. Yes.

黃佩琪女士：（經傳譯員）冇改到？

主席：Without changes?

劉志成先生：（經傳譯員）冇改到嘅。

主席：（經傳譯員）我哋就可以嗰個嘅議稿。

黃佩琪女士：（經傳譯員）中文係840-9，英文就係一橫20，第5段。

主席：（經傳譯員）邊一沓嘅文件呀？

黃佩琪女士：（經傳譯員）係區議會文件2號，840-23頁英文版，中文係840-12頁。

主席：（經傳譯員）唔該。

黃佩琪女士：（經傳譯員）或者我哋講番之前嗰一頁，睇下邊個出席，就係840-22

頁，就係主席係歡迎出席人士，包括係劉博士同埋係 Henry Hui，佢係運輸署嘅高級工程師，請睇番第 4 段，主席話運輸署早前向委員會提交文件，介紹大埔公路最新嘅交通管理措施，提及到一個係大埔區議會文件嘅號碼，就係之前我向你展示嘅文件，秘書處亦都係經電郵喺 4 月 10 號將呢個發畀委員會參閱；另外秘書處協助運輸署安排委員會嘅委員係大埔公路做現場視察，就係聯同呢一個地區委員會喺 4 月 12 號做嘅，運輸署亦都即場講解即將實施嘅交通管理措施，佢請運輸署報告各項措施嘅落實情況。

第 5 段就係運輸署嘅回應，係由許錦年先生回應嘅。佢就係講咗四方面嘅工程進展，首先，佢話大埔道介乎赤泥坪至雍宜路嘅車速限制已經由時速 70 減到 50 公里，係由 4 月 27 號開始。第(ii)，佢哋亦都就係安裝咗一啲係黃色螢光背景嘅安全標誌。同埋路牌，亦都就係擴闊喺呢一個意外中損毀嘅巴士站停車彎。（直接用英語說）The works were expected to be completed in this month, in July 2018. The fourth is optimise the bus stop near the Tai Po Mei. The work is supposed to be completed in August 2018.

第(v)，（經傳譯員）就係署方會改善紅林路、觀海崇庭同埋燕子里一帶嘅交通標誌同埋道路標記嘅，呢個工作會喺年底完成嘅。

你可唔可以確認呢個係運輸署嘅一個進度報告？

黃碧嬌女士：當局陳笑權議員回應下。

陳笑權先生：唔係，佢運輸署係咁講嘅，係，確認嘅。

黃佩琪女士：（經傳譯員）如果我哋睇一睇第 14 段，許先生亦都回應就係運輸署就致力喺年底完成呢個安裝偵速嘅攝錄機，但係至於個運作事宜就要交畀警方。運輸署就已經提供咗呢個進度報告，還是係一個持續嘅工作嚟嘅呢？

陳笑權先生：呢個應該唔係持續工作嚟嘅，呢個係單一個工程，佢裝咗嗰個攝錄機之後同埋而家還原番嗰個肇事嗰個巴士站，就會完㗎喇。

黃佩琪女士：（經傳譯員）如果我哋再睇一睇許錦年先生嘅一啲觀察，...

主席：（經傳譯員）喺你繼續之前，我喺會--有冇聽到一個解釋，點解要等到年底先安裝到一部咁嘅偵速嘅攝錄機呢？一部攝錄機喎。

陳笑權先生：佢有解釋過畀我聽嘅，佢話訂貨就整體嘅，就唔會話訂一部嗰個攝錄機，仲有要經過機電署、路政署、運輸署、警方、到現場實地掘路、攞permit，好多複雜嘅問題，佢唔會單一做一個，我問過佢呢個問題，所以佢一定要年尾，我話點解唔快啲呢，我話，佢話已經批准咗，畀我哋區議會好多議員都質詢佢之後，最後佢都承諾咗話今年年尾就會加個快相機畀我哋。

主席：（經傳譯員）佢哋係有唔同嘅程序，先至係可以降低嗰個車速，係咪呀？佢哋

就响 4 月 27 號就已經完成咗呢個工作，係咪呢？

劉志成先生：因為個減速係比較簡單同埋佢係賣憲報，就唔牽涉到好多個部門，我諗減速嗰度係主要係運輸署佢哋即係話可以安排得到，又搵路政署，亦都係佢哋喺工程上嘅一個執行嘅部門，佢哋兩面係比較容易協調到嘅。

陳笑權先生：嗰個訂嗰個快相機個頭，安裝個頭，佢話冇單一嘅，佢話一訂，好似據我所知，我問過佢嚟嘅，我記憶之中，佢就話訂一批嘅，香港仲有好多地方需要加啲快相機頭，佢話而家訂緊嘅，係一批過，單一就暫時就冇嘅，同埋要經過好多程序，好多政府部門嘅程序，諮詢好多部門，又要放電--要搵機電署畀電嗰個快相機，先至可以做得到嘅，呢個佢當時，我同佢對答，就係咁覆我。

主席：（經傳譯員）我哋係咪要理解，就係話全港有 4,200 公里嘅路，而運輸署係唔會有存貨嘅，即係有呢啲咁嘅攝錄機嘅存貨，係咪咁樣理解？或者你答唔到呢個問題喇。

黃碧嬌女士：或者我都講下，呢件事情 2 月 10 號發生咗之後，我哋喺特別會議，2 月 12 號有個特別會議，跟住就 3 月我哋有區議會嘅大會，就第二次會議，跟住就係第三次就係交通運輸委員會會議，跟住再去討論就係 4 月 12 號嘅 DMC 會議，跟住 5 月、7 月，我哋都係集中好強烈地要求儘快安裝呢一個嘅車速嘅攝錄機，但係到而家應該都仲係未曾能夠完成嘅。或者我哋啲議員可以發表下。

任啟邦先生：係，我同意法官閣下所講嘅，因為我哋都有個質疑，就話點解冇存貨呢個問題，或者咁大個運輸署嘅部門，點解會一啲後備嘅一啲零件--唔係，即係後備嘅一啲嘅裝置都冇呢？因為呢個政府話到要好快去回應呢個問題，其實頭先法官講話更改--唔係，頭先陳笑權議員講因為更改地面嗰個--即係更改個車速可能喺工程上可以就好快做得到，但係呢個運輸署曾經係用呢一個訂貨呢啲理由，我哋區議會嚟講，都認為係一個不合理嘅理由。

主席：（經傳譯員）唔該晒。黃小姐。

黃佩琪女士：（經傳譯員）黃女士，我就想你睇一睇第 19 段嘅，會議紀錄嘅 19 段，係 840-29，呢個係第 19 段嘅，我就想問係關於呢一段嘅一啲幾個問題，你第一樣嘢講到就話要下調個車速，車速下調咗之後，你就得到一啲校巴司機、巴士司機同埋意外康復者嘅一啲意見，我就想知道你收到啲咩嘢回應呢？

黃碧嬌女士：因為呢一件事，我哋都比較集中喺議會度討論，就係要求嗰個現階段嗰個 70 公里降至到 50 公里，就係我係收到係喺呢一段道路嘅校巴司機同我講，佢話由於有一個好--佢嗰個係斜路嚟嘅，斜路佢哋如果係要由一個咁高嘅地方，佢踩上到去最高，跟住要佢踩低收油落番嚟去到 50，佢話好難控制到呢一個嘅車速，就都希望我哋--佢哋好理解呢一單嘅意外係必須要有一啲嘅改善，但係如果純粹就係要減嗰個嘅速度，佢係驚影響--因為佢哋嗰部嘅校巴，佢載嘅客都超過四十個嘅，佢話咁大嗰個嘅車輛唔容易控制到去壓低過 50。所以我

都喺接收到不同嘅司機，我都喺番嗰個區議會度表達嘅。

黃佩琪女士：（經傳譯員）而你第二個觀察，就係羅馬數字(iii)嗰度，你就提到有啲巴士司機--有啲雙層巴士司機就唔適合係行走大埔公路，因為佢哋係好容易係超過每小時公里嘅，就算係巴士裝唔滿人，都係好容易係加速嘅，你係咪知道有咁嘅情況，你係咪意思話雙層巴士係唔適宜行走呢個路段呢，還是你係有第二啲嘅意見呢？

黃碧嬌女士：呢一度就咁嘅，我就去探嗰啲嘅傷者，個傷者出咗院之後，其中有一個傷者佢就係揸巴士嘅，同埋揸貨--亦有揸巴士嘅傷者，亦都有揸貨車嘅傷者，佢哋喺呢段路裏面，自己都係其中一個受傷嘅乘客，佢都有同我講，佢話喺呢一段路係行雙層巴士係好危險嘅，因為一架雙層巴士佢咁大，佢嗰個嘅油門係--佢上斜路嘅時期，佢哋踏嗰個油門係會大力啲去踏落去加油嘅，一部車咁--雙層巴士，唔係一般嘅單層巴士，所以佢哋都同我提議番，佢話而家唔想再睇到喺呢一個公路上面係有雙層巴士，佢話其實係好危險，能唔能夠再係去畀番一啲嘅單層巴士行呢咁樣。我喺呢一次嘅會議上面，我係將佢哋嗰個意見表達出嚟。

黃佩琪女士：（經傳譯員）喺我哋繼續之前，我哋睇睇啲相片同埋個地圖，睇睇有咗改善之後個情況係點，個圖片就係 14 至 19 號嘅，呢個係第一個交通標誌，呢個係減速之後嘅新嘅時速限制 50 公里同埋地下有啲標誌嘅，剛才我哋見到就係巴士上斜同埋有少少落斜嗰部分嘅，呢個就係你較早前講嘅部分，啱唔啱？

黃碧嬌女士：係，係。

黃佩琪女士：（經傳譯員）見到第一個警示嘅標誌，前面 100 米要減速，接住就有第二個標誌，有九個標誌，有呢個黃色框提醒啲駕駛者要小心嘅，係有九個箭嘴標示嘅。

主席：I think they are described as "chevrons", are they not? Nine chevrons.

黃佩琪女士：（經傳譯員）我哋見到巴士站重建，同埋行人區擴大嘅範圍，呢度個巴士站亦都加咗三盞燈嘅，我都想問大埔交通意外之前個燈光個照明個情況係點㗎？

主席：（經傳譯員）你意思係街燈路段嘅照明係畀呢個嘅巴士站？

黃佩琪女士：（經傳譯員）因為而家見到有三盞新嘅燈安咗上去...

黃碧嬌女士：陳議員回應下。

陳笑權先生：基本上佢個照明就可以嘅，佢規定有 60 呎一支街燈嘅，之前就有棵樟樹喺度，個樹蔭就遮咗個巴士站上蓋嗰度，就較為黑啲嘅，而家加咗三支燈，基本上 okay，最危險就係架巴士站嗰個彎位，即係我哋成日講就係嗰個彎位，

就有少少暗斜嗰度，就係講嚟講去就係最危險嗰個路段，而家可以嘅，而家加咗三支燈，okay。

黃佩琪女士：（經傳譯員）有晒呢啲措施，議會對呢啲改善措施有冇反映話係足夠--係咪足夠，係咪滿足到你哋之前嗰啲擔憂，係咪能夠解決咗你哋之前嗰啲擔憂㗎？

陳笑權先生：基本上我本人我都有同運輸署相關部門都有傾過，佢而家將嗰個巴士站就拉前、擴闊，將嗰棵枯萎嗰棵樹都移咗，將個現場個巴士站係擴闊咗嘅，係事實。我要求佢做一個手按式紅綠燈嗰度，佢做唔到，不過就做咗一個行人輔助線，就喺大埔尾個入口嗰度將嗰個出口--個村嘅出口就想擴闊番少少，暫時都做唔到住，你話係咪百分之百應佢哋村民嘅要求呢，係未係嘅。亦都有村長提及將個巴士站可唔可以褪番前去嗰個位置就容易睇得到，運輸署即係佢哋睇嗰個現場嗰個實際情況，佢話暫時喺呢刻係做唔到住嘅，佢話本身個後面好大個斜坡，而家就改善咗之後，要睇日後嗰個實際用落先至知道嘅。唔該。

黃碧嬌女士：陳議員補充下。

陳灶良先生：法官，我想講其實滿足唔到，因為就住安全嗰方面去畀意見，我就覺得呢啲咁嘅標示同埋呢啲咁嘅箭嘴都可能都係畀一啲駕駛者去睇，用眼嚟到去睇呢個--即係去警示呢一個嘅車速等等，但係我哋好多同事都畀一個意見，就係尤其是喺呢啲咁嘅落斜路，其實最有效唔係用眼嚟到去睇，最有效就係喺地面用一啲減速嘅，即係好輕微減速嘅一啲黃間，即係我哋有陣時見到落斜都有啲「戤戤戤戤」，即係有個感覺，用呢個感覺嚟去呢個減速可以達致呢個安全呢個要求嘅。

黃佩琪女士：（經傳譯員）你有冇去表達安裝呢個減速帶、呢啲條，畀人有個體感係感覺到係需要減速，係覺得係要減速，你有冇將呢個要求係表達畀運輸署呢？

陳灶良先生：我哋都有嘅，我哋所有區議會都有表達呢個，但係佢哋嘅回覆，因為香港運輸署佢係有一個局限嘅，個局限要設立呢啲咁嘅黃間減速只能夠喺一啲交匯處，即係落交匯處嘅斜路，例如西貢嗰單交通意外嗰個暗斜嗰度，佢而家加咗，但係唔係喺交匯處嘅前面，即係唔係落交匯處呢，佢哋係做唔到呢一個嘅。

黃碧嬌女士：我哋喺現場，我自己都有睇嘅，因為佢去到另外一張圖，我哋有九個嗰個--係呀，呢個牌，其實呢度已經係最高點㗎喇，佢哋即係揸巴士嗰啲司機就話如果揸住一架雙層巴士，載滿客，佢係要有一個踩油門大力加油先至可以去到，跟住佢呢度就衝落去嘅，呢個就係斜路，有一個急彎，呢一個彎就係會--我哋自己都覺得係危險，能唔能夠喺呢一個路面，就正如陳灶良議員講嘅，就畫一啲黃色嘅斜線，喺現場有提到嘅，但係佢哋都表達咗就係唔容易，嗰個原因就陳灶良議員都有講嚟嘅。

同埋我哋都有講過將呢一個亭再移上去上面呀咁，亦都佢哋都表示咗係做

唔到，因為你呢個亭喺度，就係前面就係大埔尾嗰個村民嗰個嘅路口嚟嘅，佢哋就係要由嗰度去過馬路去入到去嗰個巴士站，嗰個巴士站其實凹咗落去，喺最斜路嘅呢一個位裏面過馬路，你話係咪好危險呢？係呀，仲要架巴士扭入去，你喺最高處要減速，減速之餘，你架巴士係扭埋入去落客。即係我哋要諗下呢一個司機嗰個嘅駕駛嘅技術能唔能夠做到呢樣嘢，所以即係意外我哋就希望唔好再有第二次㗎喇。

黃佩琪女士：（經傳譯員）係，唔該晒陳女士嘅。我而家要畀最後一份文件你睇嘅，係 2018 嘅 5 月 25 號嘅會議紀錄嘅，中文就係响 826 頁，英文係 827 頁嘅，你係有個附件，英文版就係 834，中文版係 828，喺呢個會議紀錄，你係作出一啲建議嘅，同埋發表咗一啲意見嘅，我想同你探討下嘅，第一個就係會議紀錄第 4 段，係提到運輸署目前對司機嘅工作時數，就話車長更次就唔應該超過十四小時嘅，就覺得就最長嘅工時，喺呢個指引嘅工時太長，係對乘客係有啲安全嘅擔憂嘅，就希望委員會係可以檢討呢個車長嘅工作時間嘅過長嘅；亦都講到喺 835 段，英文，同埋中文 830，就不管工作點安排都好，個工作時數係太長，個車長要佢做十四個鐘，每日十四個鐘係太長嘅。我個問題就係你可唔可以解釋下點解你會覺得十四個鐘係太長呢？

黃碧嬌女士：我哋一日係有二十四小時，二十四小時嗰個嘅分配就應該係用三分去分嘅，八個鐘頭就係工作，八個鐘頭就係休息，另外八個鐘頭就係畀自己係做一啲係家庭或者係自己嘅學習咁樣樣先至係合理嘅，而家九巴就將一日嘅廿四小時，佢係將二分一嘅一半仲要多嚟成為十四個小時畀一個員工去返工，佢承擔嘅工作係一個司機嚟㗎喎，你十四個鐘頭唔係坐喺度可以你鍾意就瞇埋隻眼或者係「我好攰喇，咁樣攤一攤條腰。」完全係冇，絕對我諗如果十四個鐘頭喺做呢一個咁重要嘅崗位，承擔住整架巴士超過一百三十個人嘅生命嘅安全，我諗絕對係不適合。呢個我都可以請我哋其他議員同事都去表達一下嘅，任啟邦議員。

任啟邦先生：係，唔該晒黃碧嬌副主任。我就住工時嗰個問題，我哋都要表達番一個意見，因為日常喺--尤其是新界區，我希望各位都了解，就係新界區嗰個市民出行模式就係朝頭早就好多人喺新界出九龍或者出港島，黃昏放工時間就喺港島、九龍就返入新界，呢個運輸模式就其實喺--我相信喺--即係嗰個比例，可能十架車出九龍，即係十架車裝滿人出九龍，都未必有一架車或者兩架車裝滿人返番入大埔；所以變咗嗰個運輸模式就運--即係其實之前嘅委員會嘅一啲嘅其他，譬如巴士公司嘅作供都講到，就話其實都有一啲繁忙時間嘅需要，而家正正就係出現一啲特別更嘅情況，就係朝頭早可能做四個鐘、五個鐘，跟住黃昏時間可能做三個鐘、四個鐘，但係中間有一段係所謂叫做唔需要，即係十四個鐘頭未必係十四個鐘頭全部係揸緊車嘅，但係佢一啲所謂叫做 on duty 或者叫做待命，即係叫做所謂嘅休息時間，其實係咪畀到佢哋休息呢？

當我哋有時接觸到啲巴士司機就會講佢可能係住屯門，可能住元朗嗰面，佢分派到嚟大埔區揸啲特別路線，好喇，佢 10 點鐘，佢完咗上晝嗰個繁忙時

間，佢可能有三、四個鐘頭佢係可以休息嘅，但係嗰個休息佢返唔返到佢屋企瞓覺呢？佢如果由大埔返屋企瞓覺，可能佢要花兩個鐘頭、兩個幾鐘頭一個搭車時間，好喇，跟住之後又要返番嚟大埔度攞車，就再做埋下半場嗰個嘅工作，所謂駕駛嘅工作，而導致到佢哋其實中間有幾個鐘頭所謂空閒時間，其實係咪真係畀到佢休息呢？呢個我哋都會覺得係有個問題。

而巴士公司，我哋又唔係好清楚，不過我聽番啲司機講，就係佢中間嗰橛嘅時間其實係未必有一個好好嘅休息環境，我要講一講，其實黃碧嬌主席帶領我哋喺早前去到中國大陸就去參觀考察，其中去到杭州嘅一個巴士公司嗰度講，就係其實佢都有一啲休息室或者一個--直情一個--類似一個宿舍咁樣樣嘅性質，係畀到巴士司機係作一啲休息。

我諗甚至我可以講大啲，全世界返工、放工時間都係朝九晚五、晚六，peak hour，即係嗰個高峰時間亦都喺嗰個時段，中間嘅時間我相信係比較少人去搭車，呢個亦都可能係事實，好喇，其實佢哋都有類似啲所謂特別更嘅模式，但係中間嗰啲職員佢係咪返到屋企瞓覺，係咪返到屋企休息呢？呢個我哋覺得係未必，但係巴士公司有冇一個責任去畀一啲特別更嘅員工有一個好嘅休息嘅時間，佢朝頭早五點幾揸緊部車，要佢可能揸到夜晚十點--八、九點嘅時候，佢係咪有足夠嘅精神呢？中間冇一個好嘅環境休息，呢個我哋覺得係一個問題。所以巴士公司係咪應該有個責任喺所謂呢啲特別更嘅員工休息嘅地方或者時間係畀到一個好啲嘅環境佢哋呢？

法官閣下，我哋或者幾位委員會嘅成員，我希望大家明白，特別更對新界區，我可以咁講，尤其係新界區嘅巴士路線係特別嘅重要，因為好明顯過咗九點零、十點鐘之後出九龍、出港島嘅乘客係明顯減少咗好多嘅，而放工返嚟，就亦都係可能係四、五點個高峰期開始，之前嘅時間其實係比較少人嘅，如果一刀切將特別更嘅巴士司機即係切除咗，即係叫做冇咗呢個特別更分嘅話，其實亦都會幾影響新界區嘅巴士服務嘅，除非佢係大幅度即係請多一倍人，早上有一班司機，下午黃昏又另一班司機，呢個其實如果佢唔係咁樣做得到嘅話，佢就將特別更嘅服務就減少嘅話，其實對於新界區，唔淨只大埔，係新界區嘅好多路線都係可能會因此而受到影響，希望委員會係明白新界區居民出行嘅模式同埋巴士服務嘅需要嘅情況。唔該。

黃佩琪女士：（經傳譯員）唔該。我想問關於你哋會議紀錄裏面提到四個建議...

主席：（經傳譯員）或者喺你繼續之前。關於話嗰個指引，即係巴士車長工作休息用膳嘅時間指引，喺2017年9月嘅時候運輸署就檢討過當時嗰個指引，即係講緊2010年嗰個版本，當時你作為區議會，有冇諮詢你哋嘅意見，就係話佢哋建議點樣修改個指引呢？

黃碧嬌女士：冇諮詢過我哋。

主席：（經傳譯員）唔該。

黃佩琪女士：（經傳譯員）跟住我想問關於會議紀錄裏面提到嘅四項建議，第一，836頁，第二點，即係英文版本，然後830頁就係中文版本，都係第二點，由下數番上去。你提到星加坡作為一個例子，就話當地政府佢哋負責一啲硬件嘅資產，例如話巴士車廠、車輛、運作系統等等，營運方面就由營運商負責，所以營運商只需要負責營運嗰部分，佢哋仲可以額外得到獎金，點解你認為星加坡個模式喺香港係合適呢？

黃碧嬌女士：呢個請任啟邦議員回應一下。

任啟邦先生：好，唔該黃碧嬌副主席。就呢個題目其實--呢個意見係我提出嘅，其實我亦都參考過一啲市面上一啲嘅研究，就住究竟巴士嘅服務係應該點樣樣去經營呢咁樣，究竟係全私營，全私營即係好似現在嘅模式吖，定係話我國營，由政府去擁有，包括係聘請員工，變成咗公務員呢？定係話公、私營模式，即係話好似而家講緊星加坡或者倫敦嘅模式，即係話政府就係購買咗佢哋嘅車廠、車輛咁樣樣，跟住就去再外判一啲路線畀一啲承辦商呢咁？

點解會咁樣講呢？因為我哋會覺得而家專營巴士嘅服務係分咗四間--如果計埋龍運，五間公司，其實係各有一啲路線，即係俗啲講，就係一個各有地盤，九巴係九龍、新界，新巴、城巴就係港島區，大嶼山巴士公司諸如此類。其實佢哋一個咁大嘅組合，其實佢好明顯就會著重咗一啲賺錢嘅路線，而一啲蝕錢嘅路線，佢因為其實專營，佢對於市民嘅服務可能係會有個忽略，陣間陳灶良議員可以講一講呢一方面嘅情況。

我哋都睇到就話如果佢能夠將佢拆散成為更多公司嘅話，喺一啲互相競爭嘅情況之下，有冇機會係可以做到啲改善呢？譬如星加坡嘅模式就係話佢外判咗畀幾間巴士公司去做營運，令到嗰個譬如話路線、票價或者員工嘅薪酬佢都可以由政府係去做一個編制，就未必係完全純粹用盈利個考慮，而係講緊有冇需要同埋工資係咪一個合理或者係一個能夠滿足到個工人嘅一個水平。

第二，就係話其實我哋睇番另一個地方，台北，其實佢台北就係好多唔同嘅公司係去營運緊唔同嘅巴士路線，台北嘅巴士路線就係可能會有啲好接近嘅路線係由唔同嘅公司去做嘅，其實互相係作出一個競爭，競爭會帶嚟兩個情況，第一，就係工資可以係更加係--因為搶員工，可能會有個上升，令到佢個工資嘅回報係會好啲，第二個路線如果係一個相近嘅路線嘅話，佢係可以帶來一啲競爭，帶來一啲優惠，乘客可以得益。

第三，其實我哋會建議就係點解會由政府去買起晒成個巴士公司嘅系統，去再交畀去其他公司--即係再外判一啲公司去營運呢？就話可以將一啲路線做一啲整合，譬如話賺錢嘅一啲路線，再搭一啲冇咁賺錢，但係有居民--可能少數嘅居民需要，而家就係少數居民嘅需要或者佢嘅服務係被忽略，當某啲地區佢成日爭取希望加多啲車嘅時候就加唔到，但係就有啲地方可能係覺得--即係佢政府--巴士公司認為有錢賺，佢就係咁去做。

所以點解我哋覺得所謂呢個星加坡模式係比較彈性，因為如果全私營嘅模式

Transcript by Epiq Hong Kong, Limited

嘅話，巴士公司就好明顯就第一，就以盈利掛帥；第二，就係話佢可以剝--我唔用「剝削」，即係可能會可以減低嘅開支係邊度呢？油價佢減低唔到，嗰個購買車嘅成本其實都可以咁講係世界嘅一個標準，其實都冇得點樣減，減就可能係減，或者唔能夠加到員工嘅人工，呢個就係喺度就向佢哋開刀，所以點解先至會有一啲員工或者工會就話巴士司機嘅薪酬、待遇係一直係被壓低個情況。可能陳灶良議員都講，即係點解會出現咗點解--即係其中有啲人講到話模式上面嘅改變可以帶動到一啲服務嘅改變。唔該。

黃碧嬌女士：陳灶良議員。

陳灶良先生：或者我補充兩個事實，一個事實就係正話講嗰個--當然佢建議嘅模式喺個好處方面都係有嘅，講兩個事實，就一個，一個就係冇人搭，即係蝕本嘅，蝕本嘅路線，佢梗係唔係幾想做喇；好喇，講一個多車有人搭嘅，譬如好似林村咁，得一條巴士線嘅啫，好多人搭嘅，但係佢都只能夠用番現有嗰條路線嘅資源去調動嗰啲班次嚟到去滿足我哋，變咗呢兩個係事實嘅情況都要大家分享下。

黃佩琪女士：（經傳譯員）好，唔該。第二個建議，你就話用實時技術--即係實時資料嘅技術，你話要求實時訊息可以發放，...

主席：（經傳譯員）呢個建議喺邊度搵到呀？

黃佩琪女士：（經傳譯員）英文版 838 頁，中文就係 831 頁，喺底下嗰度，即係中文版底下嗰部，838 就係英文，第二點，就提到有啲議員提到因為香港嘅巴士脫班情況嚴重，如果巴士公司可以提供呢個資訊嘅話，政府就能夠更好咁監控嗰個脫班嘅問題，可能呢個就係原因點解實時嘅資料冇全面發放，佢認為如果由乘客嚟監察就可以改善嗰個脫班嘅情況，所以佢希望委員會會考慮要求巴士公司發放類似嘅應用程式，利用呢個技術去監察巴士服務，你可唔可以再解釋一下乘客點樣可以利用呢個技術嚟去監察脫班率呢？即係如果我理解正確嘅話。

任啟邦先生：呢個都我去講一講嘅，呢個建議或者呢個資料都係我去喺網上面去搵到或者我哋自己一啲經驗去睇到嘅，喺嗰個會議上面去表達番，我引用呢個台北市公車動態資訊系統作一個例子，就係佢係喺個手機嘅應用程式裏面係實際上睇到嗰架巴士喺個地圖上面顯示緊佢係行到邊個位置，即係譬如話行到邊一個街口、邊一個站頭，我哋睇到嘅。而家九巴嗰個手機應用程式，佢只係 show 到--即係佢顯示到係仲有三分鐘就嚟到，仲有五分鐘就嚟到，但係而家呢個資料其實係睇唔到佢仲有幾遠嘅途程。

呢個資料點解會我哋要知道比較清楚呢？就係話如果佢仲有三分鐘，但係其實原來係好塞車嘅話，其實嗰三分鐘係唔等於三分鐘之後到達，因為嗰個巴士嗰個手機應用程式只係睇到三分鐘嘅路程，但係如果三分鐘嘅路程係全部塞死咗車嘅話，其實可能係十五分鐘都嚟唔到，但係如果我哋能夠喺嗰個 app--如果好似台北嗰個系統嘅話，市民係能夠睇到嗰架巴士原來就塞咗喺兩個路口之

前，但係佢係--嗰個系統亦都睇到埋當時嘅實時嘅交通狀況，好似大家而家睇Google Map咁樣，都會睇到實時嘅交通狀況究竟係擠塞定係暢通呢咁。

如果睇到其實條路係暢通，但係三分鐘嚟唔到係咪有咩問題呢？或者亦都可以監察到巴士嗰個服務，就話其實我哋下一班車係應該要有嚟到，點解隔咗咁耐都嚟唔到，究竟係咩問題呢？究竟係道路嘅路面嘅擠塞、交通意外所導致吖，定係巴士公司脫班嘅情況出現呢？而家嗰個九巴嗰個apps，即係嗰個手機應用程式係睇唔到嘅，亦都資訊係比較有限。

如果可以引用到譬如其他國家地區嘅一啲實時嘅一啲嘅顯示嘅模式嘅話，我哋好清楚睇到有一架巴士喺兩個街口，約莫三分鐘後嚟到，佢係好暢通嘅；約莫有一架巴士五分鐘之後可能嚟到，不過原來係塞死咗喺條路上面嘅。我哋市民無論作為監察又好，作為旅客，我唔等，我搭地鐵，我都可以有個選擇。而家就睇唔得好清楚呢方面嘅資料。

陳灶良先生：或者我補充呢一個脫班一個嘅事實嘅例子，亦都好似林村咁樣樣，佢咁多年嚟，即係講緊超過二十年嚟，個脫班解決唔到，個原因就係點解呢？大家都知道，喺由元朗經錦上路嚟到林村，嚟到大埔，佢喺錦上路太多巴士站，停下又等下，停下等下，分分鐘嚟到林村兩架、三架，咁多年都解決唔到。好喇，出現一個問題係咩嘢呢？而家佢九巴嗰個應用程式佢可能show十分鐘、十五分鐘，其實佢完全係唔準嘅，個例子就係咩嘢呢？到而家為止，都好多人投訴佢嗰個應用程序係已經完全係唔準時到達，第一樣嘢。

點解會之前有一個--即係正話律師講嗰個證供呢？點解好似余智榮議員咁講呢？運輸署偏幫九巴個情況就係咁樣樣，點解呢？我哋係作為一個橋樑同運輸署講，佢咁多年都解決唔到呢個問題，惟有用一啲維護或者去幫佢--即係我哋感覺上佢係幫佢講嘢，咁覺得即係幫緊佢，即係個意思咁樣。

黃佩琪女士：（經傳譯員）你提過第三嘅建議，就係呢個839頁，第四點，中文就833頁第二點嚟嘅，你就建議一個懲罰機制畀巴士公司，類似港鐵嘅懲罰機制，即係話如果發生意外就要交罰款。我想進一步講下，點解你認為喺專營巴士嘅經營環境，呢樣嘢係適合呀？

黃碧嬌女士：其實呢一度就幾個成員提嘅，任啟邦議員都可以繼續嘅。

任啟邦先生：係，唔該主席。我哋多位嘅成員其實都覺得巴士公司呢一個是否去續牌又或者係嗰個懲處嘅時候有冇一個機制去處理呢咁，而家我哋睇到港鐵如果佢係因為一啲事故而導致到延誤嘅話，佢係要罰款，但係巴士公司如果出現咗脫班或者出現咗一啲服務欠缺理想嘅情況嘅話，其實佢好似就冇一個罰則，我哋亦都睇唔到或者冇一個好清晰嘅公眾知道嘅情況就係究竟政府點樣或者點解會繼續續一啲專營權畀巴士公司。即係譬如九巴咁，幾年前，應該三幾年前，即係呢個續到佢個專營嘅時候，其實冇拎過嚟區議會討論嘅。

一個專營嘅巴士服務，對於--如果用九巴嚟計，整個九龍同新界區嘅服

務，咁多個區議會，咁多個區議員，咁多個市民，其實係咪應該有一個發聲嘅機會呢？但係我所了解，就肯定喺區議會上面係冇被諮詢過九巴應唔應該去續呢個專營權，呢一個情況其實就似乎巴士公司咪唔需要理議員嘅一個意見囉。如果佢唔需要理議員嘅意見嘅話，我哋就當然我哋其實喺議會裏面講嘅嘢，正如頭先幾個議員都講，我哋係有提出一啲唔同嘅意見，要求佢改善服務、增加班次、增加路線，但係似乎都唔能夠得到巴士公司好積極嘅回應，個問題就係我哋係咪佢嘅老闆，我哋係咪佢嘅一個能夠有操一個生殺大權嘅一個持份者呢？似乎區議會就唔係。

但係而政府作為運輸署，作為一個行政部門，有冇有效監察到、監督到巴士公司有冇脫班、服務嘅質素係點呢？似乎我哋又覺得運輸署亦都有啲不力。即係好似頭先陳灶良議員所講，64 號 K，元朗去到大埔，經過林村一個唯一嘅巴士服務，講咗好耐嘅問題都似乎解決唔到，又或者我哋議員希望由譬如大埔區去某一啲地方、去港島區嘅巴士服務，似乎都唔能夠增加得到。個原因我哋就睇到其實佢都冇一個監察嘅機制。

我哋希望引入呢啲所謂罰則嘅話，除咗係希望改善服務之餘，就係希望減少譬如脫班又或者譬如話一啲事故咁樣樣，令到巴士公司--我哋阻唔到佢繼續去搵錢，阻唔到佢繼續去攞呢個專營權，但係都希望製造一啲條件，等佢做好啲。因為而家佢做得好定唔好，其實即係佢自己睇住盤數，但係對於我哋市民嚟講，或者對於我哋議會嚟講，似乎冇乜嘢可以監督嘅板斧嘅話，我哋覺得引入呢啲懲罰嘅機制，我諗我哋議會裏面即使未必有就住呢個題目嘅發言，但係我相信議會裏面議員都有一個咁嘅希望，就係佢做得唔好，我哋咪罰佢囉，我哋咪要佢承擔番做得唔好嘅後果，呢個就係我哋嘅意見。唔該。

黃碧嬌女士：我都想喺度講幾句嘅，主席。其實我哋去到睇而家香港嗰個嘅巴士嗰個專營權，而佢就係攞咗個專營權之後，政府就係搵運輸署去監管，同埋就係同佢哋開會去制訂不同嘅路線嘅，而我自己覺得運輸署喺呢一面真係放嗰個嘅人力係太薄弱，好似我哋大埔咁樣，我哋係超過一百條嘅巴士路線，同我哋開會嘅就係運輸署一個同事，佢就係睇晒大埔區㗎喇，但係你諗下，超過一百條嘅路線，牽涉到嘅肯定係好多嘅巴士，亦都好多嘅巴士嘅司機，而當中亦都好多嘅乘客，我哋都唔敢喺個區議會嘅會議上面提得咁多，但係呢個事實上係一個民生上面係一個好重大嘅問題嚟嘅，我哋一落街就係要--返工你就係要搭巴士，買餸你又要搭巴士，去醫院亦都要坐巴士。

而特別去機場嘅巴士，我覺得就係喺呢度嗰個專營權--不過而家大埔就多咗一架叫做 A47X，我用呢個舉例，而佢嗰個嘅脫班，你冇一個--而家嗰個嘅--佢睇唔到，即係佢運輸署高層亦都睇唔到，佢嗰個專營權龍運直情唔知道呢一個巴士司機係病咗，而嗰架巴士就喺嗰個嘅站頭冇人開，好喇，我哋嘅尾站嘅乘客等三架車都冇，但係係要去機場嘅。喺呢啲嘅監管裏面都唔能夠係好順暢。而呢一啲嘅時間--我講緊呢啲時間係上晝 6 點至 7 點嘅，我哋去到現場打一個電話，你都搵唔到嘅，但係係去機場。

Transcript by Epiq Hong Kong, Limited

我哋區議會去杭州做咗一個嘅視察，我哋係好讚賞杭州佢哋嗰個嘅公交嗰個嘅監管，可以喺一個控制中心裏面好多部電腦，而一條線，你打一條線嗰個嘅秣巴係我哋睇到二十部嘅電腦係可以睇到成條路線嘅巴士站，呢個站裏面有冇人等客，而個客嘅程度係去到邊度。如果係好多客嘅，佢哋即刻係調動特別嘅巴士去解決呢啲乘客嘅問題，但係香港喺呢一方面冇進步過。係喇，我就係咁講，即係要表達呢個意見。唔該。

黃佩琪女士：（經傳譯員）呢個就係講嘅第四個建議，就係呢一個尾數上第二點，839 頁，就話區議會作為巴士路線規劃同埋服務嘅持份者，同巴士公司嘅合作非常之密切，所以建議係呢一個續牌嘅過程引入評分制度，等區議會可以就於巴士公司嘅表現評分同埋提供意見。我相信呢個就係第四個建議。

黃碧嬌女士：呢度都請任啟邦表達一下。

任啟邦先生：係，唔該。就正如頭先我所講嘅發言裏面講，即係話喺個續牌或者係延續個專營權當中，其實區議會似乎冇乜一個決定，咁嘅話，其實我哋希望未來嘅日子能夠增加區議會作為呢個專營權是否續牌畀邊間巴士公司係可以有一個即係參與，係一個持份者。

極其量，即係你而家可能所謂續牌，可能嚟一嚟區議會，咁就過一過諮詢，但係如果譬如話就住我哋議會能夠係畀到一個意見，或者如果嗰個意見係覺得某個巴士公司做得非常之差，係咪可以係影響到政府續唔續牌畀呢啲巴士公司呢咁。又或者譬如頭先大律師講到，喺呢一段嗰度，喺個規劃上面，正如呢一個聽證會講呢個大埔公路嘅意外，其實議員喺好早時間亦都提咗好多嘅意見，不過我所講嘅就係區議會其實某程度上係主動，但係喺一啲事實上面亦都係被動。

被動嘅就在於我哋提出咗唔同嘅意見，如果大家搜集資料嘅時候可以睇到，尤其是譬如話巴士服務嘅話，我哋大埔區有個叫做巴士服務工作小組，小組裏面係有好多唔同嘅意見，但係巴士公司或者運輸署回應咗有幾多呢？如果我哋區議會能夠係喺呢一個續牌嘅時候能夠去評分，能夠去有一個意見嘅表達，而呢個意見表達真係可以令到政府係決定畀唔畀牌巴士公司嘅話，我相信巴士公司係必須要聆聽同埋履行區議會議員所提出嘅意見。

我諗希望委員會知道就係區議員嘅意見就唔係天方--唔係，應該咁講，即係唔係空談出嚟嘅，其實我哋係收集咗民意，即係點解要搞代議政制呢？就係市民選議員出嚟，議員喺議會反映意見，但係當議員喺議會反映意見嘅時候又得唔到行政部門即係運輸署與及營運者嘅同意嘅話，其實我哋覺得都係好無奈，呢個無奈亦都係一個憤怒，但係我哋仍然要同佢繼續合作，所以我哋會覺得如果喺續牌嘅時候能夠加入區議會作為一個評分，又或者係令到巴士--咁係必定會令到巴士公司係會重視同埋聽取我哋嘅意見。

所以呢個我係覺得未來可能委員會要檢討呢個專營權嗰個--或者整體專營巴士服務嘅時候，呢一個意見我希望能夠納入在內。唔該主席。

黃佩琪女士：（經傳譯員）唔該晒。唔該晒各位，我已經完成提問，唔該。

歐陽先生：（經傳譯員）唔該晒主席，我就想跟進一下黃女士之前講過嘅意見，就話你聽過一啲嘅意見，大埔公路未必適合使用雙層巴士，你會唔會同意咁樣嘅講法呀？

黃碧嬌女士：我聽嘅意見就係其中一個傷者，係喇，其中一個傷者佢就係巴士司機嚟嘅，佢而家已經係--即係同佢傾偈，佢自己就--佢話呢一條路係我哋大埔未有吐露港公路，先有大埔公路嘅，點解會叫 872 呢呢架巴士？就因為大埔公路有條 72 嘅巴士線行嘅，後期有咗馬場，有咗馬場，咁咪要將大埔嘅居民，我哋啲想去馬場嘅，咪車佢哋過去，所以就行呢一條路，就係行 872，但係都係用單層嘅。

後期--應該咁講，就係九巴慢慢將佢嘅「熱狗」巴士--其實佢嘅單層多數都係「熱狗」嚟嘅，佢嘅「熱狗」都冇晒喇，佢就要變雙層巴士，喺呢一個嘅階段，佢哋購入嘅巴士其實就無形中成為咗 872 嘅其中一部。但係我就問番，其實我哋只係需要將我哋大埔嘅居民去馬場啫，我哋咪有條--跟住咪有條吐露港公路囉，如果你話要服務呢一段嘅居民嘅，我哋就冇辦法講，如果你諗住點到點嘅，就好簡單，就係行下面，所以就多咗個 872X。

而家又有 872X，其實仲有 872，係咪有需要繼續呢架 872 用雙層巴士？我講緊呢架 872 呢一度，係咪有咁多客？每次都超過一百個客？如果超過一百個客，你可以用三架單層巴士㗎，你加密班次都得㗎。係，唔該。

歐陽先生：（經傳譯員）唔該晒。

主席：（經傳譯員）呢個係假設要有巴士司機去搵巴士先得㗎。

羅先生：（經傳譯員）黃女士，我想澄清一下，你就講過車速限制就由時速 70 減到 50 嘅，有啲嘅旅遊車司機就顯示佢哋係關注嘅，係關注啲乜嘢？關注啲乜嘢呀？係咪冇減車速限制訂係乜嘢呢？

黃碧嬌女士：佢就係同我講，正話去到最高嗰個地方，佢話佢哋而家點解係要踩 70 時速呢？就係呢架巴士載滿晒客嘅時期，佢一踩落去，佢話控制喺 50 嗰度係唔得嘅，佢問我「如果你有 60 就最好。」我話冇 60，但係喺呢一單意外裏面，我哋面對住呢一條嘅公路，我哋必須係以安全，就冇辦法，我哋一定只會喺區議會裏面我哋多番討論，都係要調低去 50，佢應該講係對呢一個我哋呢個討論係有一個嘅意見畀番我哋。

主席：（經傳譯員）委員會就想多謝黃女士同埋各位人士協助我哋，委員會係有興趣收到區議會嘅意見，所以就邀請你同埋其他兩位嘅議員嚟到，我哋嘅職責就係要就於改善巴士安全，提出建議，就唔係其他嘅議題嘅，所以就係喺呢一方面，我哋邀請你哋嚟講關於唔同路段你哋嘅關注，就係就於車速限制同埋需要安裝呢一個嘅車速攝錄機，我哋而家會休息二十分鐘嘅。劉博士。

劉志成先生：（經傳譯員）會唔會有機會畀我哋去講其他有關巴士嘅議題呀？

主席：（經傳譯員）如果同安全有關，就可以。

劉志成先生：（經傳譯員）應該係關於安全嘅。係休息之後定係點呀？

主席：（經傳譯員）我哋已經係進行咗超過兩個半小時，你預計會用多幾多時間？因為我哋已經係畀機會你哋係畀書面意見。

劉志成先生：（經傳譯員）係講番一啲我收到嘅意見，有關於巴士司機嘅。

主席：（經傳譯員）係，可以。

劉志成先生：（經傳譯員）我會用廣東話講嘅。（直接用本地話說）法官大人，今次大埔尾嗰個車禍係好不幸嘅，就其實就喺呢一個車禍，關鍵嗰--即係都畀人感覺就係個司機嘅不小心駕駛。而作為司機，喺專營巴士嚟講，個司機嗰個責任係好重，因為正如頭先我哋啲同事講，有百幾個乘客喺架車上面嘅時候，佢嗰個駕駛態度同埋嗰個專業嘅知識係好緊要。

我有啲車長朋友知道我嚟呢個委員會，都向我表達咗一啲意見，就係話其實就佢哋覺得即係話呢個其實係成個專營巴士嗰個管理同埋佢嗰個調配人員，即係嗰啲車長調配人員同埋嗰個方面嘅經驗不足可能有關嘅。就其實喺兩、三方面，佢哋表達到個意見就係第一，就係如果調配啲人員去行啲唔熟悉嘅路線，佢畀佢哋一啲比較大嘅壓力，就希望喺嗰個調配新路線之前有一個熟習嘅機會。呢個其實係純粹係巴士公司內部嗰個佢哋對員工嘅培訓，咁嘅時候，如果係能夠即係話保障到佢係即係話正式揸架車，有咁多乘客喺上面嘅時候，佢要去熟習嗰條路線。

另外一方面，就係話揸嗰架車亦都係--如果調配一啲新嘅車可能亦都係需要去熟習嗰架車嘅性能。呢兩方面佢哋係表達即係話都希望能夠喺呢個檢討嚟到去即係話都關注一下呢方面。

第三樣就係呢個喺嗰個行車時間表，佢哋有預設一啲時間可能佢哋有陣時話行車時間不足夠，如果係唔足夠，嗰啲車長就可能會加快嚟到去追番個即係話所失去嘅時間。而喺呢個過程容易即係話因為你要加快，所以可能會係引致一啲嘅比較--可能會係有啲危險嘅情況會出現都唔定。

喺呢三方面，我簡單咁樣喺呢個委員會嗰度表達，代表佢哋，希望委員會係聽到呢一方面嘅意見，可能你哋亦都會去問番有關嘅團體--嘅車長團體嚟到去讓佢哋都表達下意見嘅。好，多謝。

主席：（經傳譯員）就頭先你最後嗰段，劉博士，呢個係一個一般嘅投訴，我哋係聽過行車時間係短，我哋要有個證據顯示個行車時間係長定短，如果你個車長係能夠畀到啲具體嘅例子我哋，譬如話由甲去乙點係定咗一小時嘅行車時間，但係如果事實上經常係要多過一小時，呢個就係我哋委員會需要嘅訊息。

劉志成先生：法官大人，就住呢一樣，喺我個選區，75 號 K，喺我做議員--接手做嗰區嘅議員，係有調整過嗰個巴士行車時間嘅，佢哋當其時就話個時間表大約係應該係三十五分鐘，由大尾督到大埔，佢哋覺得呢個時間係太短，擸屘所以就調整去到大約接近好似係四十五至五十分鐘嘅。咁讓司機即係話喺個駕駛過程，即係佢哋就唔會話覺得你 set 呢個時間係真係--根本對佢哋嚟講，揸車、作為一個司機，係一個好大嘅壓力。呢個係如果你問番九巴講嗰個時間表，呢個係一個事實嚟嘅，係有將呢一方面調整嘅。

主席：（經傳譯員）係呀，咁而家係有問題嗰啲路線，要有人喺呢方面作供，我哋就可以跟進喇。

劉志成先生： Do you mean I need to provide this evidence?

主席：（經傳譯員）有人係需要作供嘅，而家係得一個口頭嘅聲稱，就話啲行車時太短，司機因此就會加速，擔心唔夠足夠嘅休息時間，我哋需要就係證據，唔可以就咁一般性咁描述。

黃碧嬌女士：任啟邦議員。

任啟邦先生：法官閣下，我補充一下。頭先你所講嗰個，即係要求一個實證，其實可以你哋翻查番巴士公司喺過去嘅嗰個平均行車時速，即係咩嘢意思呢？即係話我記得有個數據，不過我唔係好記得喺邊度搵得到出嚟。過去十多年嗰個巴士嘅平均行車時速係每況愈下，即係越行越慢。究竟呢個行車時速越來越慢，亦都同時間有冇擺番足夠嘅巴士司機落去個時間表裏面，即係維持番足夠嘅班次喺裏面呢？因為呢個巴士嗰個行車時速越嚟越慢呢個情況係會令到嗰個行車時間長咗，如果維持現在嘅班次嘅話，佢必定係要加人手、加車，呢個係一個直接嘅一個正比例嚟嘅。

我哋作為議員，我哋梗係覺得你必定要維持番現有班次，唔能夠脫班，但係同時間條路係塞咗嘅，多咗車嘅，運輸署喺呢一方面有冇同巴士公司作出一啲協作，令到佢加番足夠嘅人手，加番足夠車嘅資源呢？呢個我覺得係值得去研究嘅地方。有呢個數據，不過我唔係好肯定喺邊度搵出嚟，係巴士車速平均喺過去十幾年裏面係越行越慢。其實我哋區議會都提議過，譬如話會唔會可以設立巴士專線等等嘅一啲措施，其實都即係呢方面可以去再研究一下。唔該。

主席：（經傳譯員）係，唔該晒。陳先生。

陳灶良先生：主席，我想建議一個--我一分鐘講完㗎喇。個建議因為都係一個安全嘅問題，安全，因為我正話都講到喺鄉村落斜嗰個情況，用一個嗰個眼嚟到去睇一啲嘅交通標誌，一個警示，我覺得係不足嘅，但係如果我哋喺路面有一啲不平嘅，即係我哋揸車嘅人士都 feel 到嘅，一 feel 到佢路面不平，自動會減速，所以我都好希望喺一啲鄉村落斜嘅地方都能夠有一啲減速嘅警示。

而另外一個建議，就係希望喺鄉村落斜附近有巴士站嗰啲，就加一啲防

撞。點解呢？呢個防撞好緊要嘅，例如我上次開會，我都講咗，例如好似許願樹好出名，許願樹對出嚟有一個巴士站，我要求咗幾年，叫佢加一個欄杆畀我哋等巴士嘅人有一個安全感，佢都唔加嘅，但係呢個係必須嘅，因為點解呢？佢一路彎，一路斜落嚟，係好得人驚嘅，尤其是啲雙層巴士一路咁樣落嚟，如果佢係客滿的話，佢唔停站的話，個車速仲快，變咗我哋上唔到車，喺度等車嘅巴士嘅乘客係好驚，呢一個所以我建議都希望能夠加啲防撞欄。

主席：（經傳譯員）好，唔該。如果大家表述完，我哋亦都係邀請咗其他有關人士如果係想作供，係能夠表述你想講嗰個題目，我哋係歡迎佢哋嘅，而家多謝你哋出席係協助我哋，同埋亦都要鼓勵，喺度等待緊作供嘅人，我哋暫時係要休息二十分鐘嘅。

上午11時46分押聆訊押後

下午12時04分恢復聆訊

出席人士如前。

主席：（經傳譯員）我哋而家跟住聽取容溟舟議員，佢係代表沙田區議會嘅嚟畀證供，首先多謝你代表區議會接受我哋嘅邀請嚟出席我哋嘅聽證會。而家黃女士可以問問題。

黃佩琪女士：（經傳譯員）好，多謝容生。我有幾方面嘅問題想問你嘅。首先可唔可以請你睇你哋嗰份嘅討論文件，係2013年1月8號嘅，中文版631頁，英文版637頁。

主席：（經傳譯員）邊一沓文件呢？

黃佩琪女士：（經傳譯員）就係區議會文件夾 2。容生，或者請你花啲時間睇一睇呢一頁，呢度有個問題，我想相信係區議員楊倩紅女士提出嘅，佢係代表沙田區議會提問，係有關脫班同工作時數嘅，即係指車長嘅工作時數。佢話首先佢係聽到居民嘅投訴，就話有咁嘅情況，巴士喺繁忙時間脫班；而第二，就係佢觀察到有啲嘅車長喺兩段長嘅車程之間係冇休息時間。你可唔可以講一講畀我哋聽關於呢啲嘅投訴，再講啲呢？

容溟舟先生：我講番先，因為就楊倩紅係一個前區議員，就我都想睇一睇番，你畀少少時間我睇一睇番當其時嘅會議紀錄，我會睇番中文版，因為我哋嘅中文版嘅會議紀錄係一個經我哋同事確認嘅會議紀錄，而英文版係 for 你哋簡單嘅 reference。我想政府嘅律師就想我哋講番就究竟嗰個休息時間同埋嗰個脫班率嗰個問題，係咪？

黃佩琪女士：（經傳譯員）係嘅。

容溟舟先生：其實因為就楊倩紅女士所講嗰個就係E42，係一條龍運嘅巴士線，據我嘅理解，就因為龍運本身係一個機場對外嘅專營巴士嘅專營權，佢個公司嘅規模係比番佢母公司九巴係為之細嘅，所以可供調動嘅車輛同埋司機會比較少，亦都容易係有呢個車長缺勤導致到有脫班呢個情況。

黃佩琪女士：（經傳譯員）或者想問一問容生，就話嗰個行車時間太短，所以司機就要加速嚟可以賺番啲時間，因為可能話有交通擠塞或者路上有其他嘅問題，所以到佢去到總站嘅時候，嗰個--可以咁講話嗰個行車時間就唔實際，因此佢就要追番啲時間，而咁做，佢就等於佢要加快個車速，我係關注呢個問題嘅，或者你可唔可以再講一講畀我哋聽，你作為區議員嘅時候有冇收到投訴係關於呢方面嘅呢？

容溟舟先生：你所講嗰個行車時間，其實就應該咁講嘅，喺巴士公司，據我嘅理解，喺唔同時段，譬如可能係早上嘅繁忙時間、早上非繁忙時間、晚上嘅繁忙時間同晚上非繁忙時間，理論上佢哋都會有唔同嘅行車時間去制訂，跟住就會有一個行車時間嘅制定之後就會做一個編更表。就喺佢哋嘅術語就係一啲嘅「字軌」，就係可能係一個司機會用一架車或多於一架車去揸唔同嘅路線以達致嗰個服務詳情表所列嘅標準嘅班次。

如果你話因為有一個制度，佢哋係譬如類似叫做--即係術語叫做「跳飛機」，我舉個例子，可能係個司機可能係主力係揸E42，但係有一啲時段，譬如喺馬鞍山有一條路線叫做A41P，係由馬鞍山嘅烏溪沙站去呢個機場嘅呢個GTC，即係呢個機場嘅運輸中心嗰個站，其實係有機會佢哋係需要借用E42嘅車輛去做A41P嘅班次嘅，如果喺A41P個行程--嘅車程嘅時候出現咗問題或者係有啲未能夠預計嘅情況之下，係會令到E42嘅班次都會同一時間係會suffer。

咁會有兩個情況，一，個司機可能係基於呢個原因，佢哋要喺高速公路嘅路段去追回一啲時間，但係據我嘅理解，巴士嘅車速其實係有限制嘅，係會去到接近70公里嘅，應該會有一個系統去截油，令到佢架車唔會再行得快，但係喺其他嘅路段或者係其他標示低於70嘅路段佢行快咗，呢個係冇辦法可以控制到嘅，呢個係第一。

第二，就係佢哋可能就要--如果做唔番--即係趕唔番個--追唔番個時間，係有機會令到下一更車係缺咗更，或者係要採取一啲特別嘅措施去補回部分嘅班次，例如可能嗰架車唔係直接由機場開出，而係由呢個中途站點去開出，而去追番一啲行車時間嘅。咁要視乎佢去到總站嘅時候嗰個時間究竟係損失咗幾多，而我嘅理解，係由當值嘅站長去決定呢架車究竟去邊度或者係佢哋巴士公司嗰個派更系統話畀個車長聽究竟去邊一度站起載咁嘅情況。

黃佩琪女士：（經傳譯員）喺呢一頁，仲有另外一個問題，就關於巴士司機工作時數長嘅問題，運輸署喺2017年9月檢討指引嘅時候，佢哋有冇諮詢你哋嘅區議會

呢，就係話有關嗰個建議嘅修訂係點，有冇諮詢你哋呢？

容溟舟先生：我嘅憶述所及，喺--因為我就係沙田區議會嘅交通運輸委員會嘅副主席，雖然我冇權去審視一個會議嘅議程，但係我憶述所及，喺2016直至到呢一屆--直至到今日為止嘅開嘅區議會，我嘅印象中，係冇同我哋傾過呢一個嘅巴士車長嗰個嘅編更個指引嘅，其實係冇問過我哋嘅意見嘅。

黃佩琪女士：（經傳譯員）你哋區議會對呢個指引有咩嘢睇法呢？

容溟舟先生：因為冇傾過，冇一個 formal--即係冇一個正式嘅紀錄，如果你問我，就個人而言，我哋覺得巴士司機嘅工時係比較長嘅。個原因其實好簡單，以一個保安員最盡嘅工時其實係講緊十二小時，即係行業所講嘅「12 碼」。其實正如頭先亦都有大埔嘅同事講，一日只係得廿四小時嘅啫，如果嗰個工時係超過十二個鐘頭，其實佢變相係佢嘅休息時間同埋佢嘅起居生活嘅時間其實係少嘅。唔好忘記，巴士公司嘅同事係要早出晚歸嘅，佢哋未必有一個好便捷嘅交通可以好迅速由佢嘅工作地點往返呢一個屋企嘅，所以喺咁嘅情況之下，七除八扣，究竟佢有幾多嘅休息時間、夠唔夠至少八個鐘其實係一個疑問嚟嘅。所以你問我，我個人覺得十四小時嘅最高工作時間對一個需要兼顧路面嘅安全同埋掌控緊全車人嘅安全嘅情況之下，個工時係過長嘅。

黃佩琪女士：（經傳譯員）點解我問呢個問題呢？因為如果你睇番你哋區議會嘅會議紀錄TT23/2017，中文版就係709至710頁，英文版就係714至715頁，就係區議會文件夾2，呢個問題係招文亮先生問嘅，就關於係巴士意外。招生嘅意見就係有關於指引裏面提及嘅工作時間太長，所以巴士司機係冇足夠時間休息，佢建議運輸署同埋巴士公司檢討可以減低巴士司機最長嘅工作時間到十個鐘頭。

主席：（經傳譯員）呢個會議日期係幾時呀？

黃佩琪女士：（經傳譯員）主席，我相信個會議日期係2017年3月8號。

主席：（經傳譯員）好，唔該。

黃佩琪女士：（經傳譯員）所以似乎你哋區議會就住工作時數係表達咗一個立場，你哋有冇諮詢職工會話點樣為之--應該最長嘅工時係幾多呢？

容溟舟先生：我係冇問過工會究竟應該係幾多工時係為之恰當嘅，但係作為一個乘客或者作為一個社區人士，我亦都接觸過係我嘅居民，亦都係巴士司機嚟嘅，其實佢哋都普遍係早出晚歸，我舉個例子嚟到講，如果以早上嘅更分嚟到講，其實我嘅選區係大水坑，係富安花園，喺距離最近嘅巴士廠，沙田嘅源順圍，即係榆翠苑對面，其實講緊個車程約莫係大概十五分鐘嘅車程，通常巴士嘅師傅係四點幾鐘就要搭佢哋嘅廠車，就係去到佢哋嘅廠，大概五點零鐘係要報更嘅，然之後就去等，揸佢哋嘅車或者係去再轉乘其他嘅車輛去適當嘅位置攞番佢嘅車輛嘅，但係喺中間嘅時間其實係有機會，可能佢編嘅更次或者編嘅--我

哋叫做俗稱嘅「字軌」，可能係講緊6點、7點，去到嗰個繁忙時間，佢哋先有人出車嘅。喺咁嘅情況之下，其實佢中間嗰個時間係冇辦法係有休息嘅，因為喺嗰個車廠裏面其實未必有一個充足或者理想嘅休息空間，呢個係第一個地方。

第二個地方就係其實有一啲情況，佢哋為咗要準時喺外站開出，其實佢哋要將架車輛係駕駛到去相關嘅總站嘅或者係嗰個分站，其實嗰啲地方未必有一個員工嘅休息室畀佢哋可以喺度休息嘅，變相佢哋可能要逗留喺架車嗰度或者喺架車嘅駕駛室裏面去休息，但係亦都基於呢個環保署嗰個停車熄匙個情況，其實佢哋唔能夠著--即係尤其是夏天，佢哋唔能夠著住架車去令到佢哋嗰個車輛嘅氣溫係下降，即係話其實佢哋喺一個悶熱嘅環境裏面去等候或者待命嘅。

其實喺一個--即係如果我諗可以想像到，就係喺一個咁嘅情況之下，其實佢哋係既唧神，亦都冇地方去休息嘅時候，其實變相係降低咗佢哋嗰個駕駛嘅質素，喺咁嘅情況之下，你問我其實係咪可以增加一啲嘅休息室或者係有一啲地方可以畀佢休息，直至到佢哋出車為止，從而令到佢個精神可以集中呢？呢個係可以研究。

至於嗰個工時嘅時間，確實有兩難嘅，因為喺頭先亦都有大埔嘅同事去闡述佢哋嗰個工時或者係新界區嗰個交通嘅--即係我哋叫佢做 pattern，係其實係比較特別嘅，因為朝頭早係一個單向，由新界區去市區嘅，譬如我諗觀塘、灣仔或者係荃灣一帶，佢係一個傳統嘅工商業區去返工，嗰陣時係需要極集--即係高度集中嘅頻密嘅班次，將啲客流係帶山去呢啲地方嘅。好喇，但係喺調番轉頭，因為車出咗去，都要入番嚟先至可以做到班次吖嘛，如果你話嗰啲車出晒去，又唔需要做咁密嘅班次嘅，喺個司機嚟講，喺個巴士公司喺編更嚟說，咪只能夠去用最多嘅人手去做呢一個嘅班次囉，喺咁嘅情況之下，過咗繁忙時間其實就冇需要咁多司機，好喇，但係問題係另外一個晚黑嘅繁忙時間你又確實又需要呢啲司機將一啲乘客由嗰啲工商業區帶番佢哋去住宅區返屋企。

所以你問我喺咁嘅情況之下，實際嘅揸車嘅工時其實可能未必去到十個鐘頭，但係佢哋返工嘅時間，即係佢嘅揸車時間加埋佢嘅叫做 standby 嘅時間其實係可能超過十個鐘或者去到十四個鐘。喺咁嘅情況之下，其實如果冇一個休息嘅地方，對佢哋嚟到講，其實佢就只能夠可能喺一啲商場去啲，或者喺一啲好迫挾嘅員工休息室裏面去休息。呢個我覺得如果係需要編配一啲特別更嘅更分畀一啲司機，其實巴士公司係要提供足夠嘅休息地方畀呢啲巴士司機，先至可以推行到呢啲特別更嘅情況。

主席：（經傳譯員）容生，你可唔可以講一個地點係冇一個適當嘅休息設施嘅地點呀？

容溟舟先生：法官大人，不如我調番轉講，其實喺現時嘅地方其實並不多一啲嘅員工休息室嘅。個情況喺以我選區為例，就係曾經巴士公司都有問過我哋增設休息室嘅意見，約莫接近係半年前至九個月，但係就其實到而家，我哋初步都覺得

Transcript by Epiq Hong Kong, Limited

冇問題㗎喇，但係到而家其實佢哋--因為員工休息室唔係擺一個間格落去咁簡單，係要申請電或者係一啲流動電話嘅設施嗰啲，其實嗰啲係需要時間，正如電嗰方面可能係需要申請各類紙嘅...

主席：（經傳譯員）係我哋知嘅。

容溟舟先生：所以你問我，其實沙田區所以...

主席：（經傳譯員）容生，容生，我哋知道問題係乜嘢嘅，因為我哋收到好多資料關於設置呢啲休息室，即係排污、電、水嘅問題，你可以講個例子，就係一個地點，等我哋去睇。

容溟舟先生：其實一啲嘅大嘅站，譬如新城市廣場或者沙田火車站，其實都冇一啲呢一類型嘅一啲大型嘅員工休息室嘅，唔好講啲屋邨嘅細站，譬如我自己嗰區富安花園、...

主席：（經傳譯員）沙田火車站？

容溟舟先生：沙田嘅公共交匯處 under New Town Plaza，okay，亦都喺沙田嘅火車站，其實個員工休息室係偏細嘅，只係得一個嘅啫。亦都有--因為嗰度亦都有另外一間嘅巴士公司，叫做城巴，亦都--其實佢哋亦都未有一個好完備嘅員工休息室係畀另外一間巴士公司嘅司機去休息嘅。

主席：（經傳譯員）唔該。

黃佩琪女士：（經傳譯員）你提及其中一間巴士公司，就問你哋區議會嘅意見，係關於員工設施嘅，係書面問呀？

容溟舟先生：佢當其時係以口頭諮詢，跟住我冇記錯，係曾經出過諮詢文件問過佢哋嘅，即係經過運輸署透過民政署嘅諮詢嘅系統去問我哋嘅。

黃佩琪女士：（經傳譯員）係幾時嘅事呀？

容溟舟先生：我諗應該係今年嘅 3、4 月左右，我要啲番份文件出嚟後補番畀番委員會，係可以嘅。

黃佩琪女士：（經傳譯員）唔該，唔該晒。容生，我想問幾個問題係關於意外，呢啲意外就喺幾個地點發生，首先就係鯉魚門道嘅意外，你哋區議會曾經係問過好多問題嘅，想請你睇一睇 709 頁，中文版，英文版就係--133 段嘅中文，英文版係 714。

主席：（經傳譯員）呢份文件嘅日期係幾時呀？

黃佩琪女士：（經傳譯員）我相信都係喺 3 月 17 年。

主席：（經傳譯員）唔該。

黃佩琪女士：（經傳譯員）呢次意外就發生咗，其中一個招...

主席：（經傳譯員）呢個意外係幾時發生㗎？

黃佩琪女士：（經傳譯員）係17年嘅1月。招文亮先生就問咗一個關於呢次車禍嘅問題，其中佢問嘅一個問題就係嗰間公司係咪容許司機係以兼職嘅形式做長嘅時間，即係喺佢哋做完自己正職，就做兼職，佢就提出咗--講咗一啲嘅例子，一啲兼職車長，係即係做巴士嘅兼職車長。睇番運輸署嘅回應就係707頁。

主席：（經傳譯員）第幾段呀？

黃佩琪女士：（經傳譯員）喺頂部，就係運輸署嘅回應，我想睇番其實就係706頁嘅問題嚟嘅，就講咗話17年1月14號嗰次嘅車禍，就係九巴嘅618號，巴士去到鯉魚門道...

容溟舟先生：It is Citybus, not KMB.

主席：（經傳譯員）呢個打錯咗嘅，係呢一個嘅城巴，唔係九巴。

黃佩琪女士：（經傳譯員）就嗰架巴士去到鯉魚門道近藍田巴士站就係撞到路邊嘅石壘嘅，跟住就係翻側嘅，十位嘅乘客就被拋出車外--就係被拋離座位，亦都係困住咗嘅，有關呢件事，有幾件事項，就係話係現場嘅時候傷者嘅情況，同埋巴士公司點樣跟進。我想問嘅就係有關於就係(c)、(d)同埋(e)呢幾項嘅，(c)項就係巴士司機嘅健康狀況係咪符合標準；跟住就係有關於而家呢一個嘅路面同埋係斜台石壘嘅設計；第三，就係本港行駛嘅巴士喺設計上面有冇有效嘅保障到乘客安全。跟住...

主席：（經傳譯員）未講之前，有關我哋工作嘅問題就係(c)，就係話巴士公司係咪容許巴士車長喺正職完咗之後，係做呢一個長時間嘅兼職車長？

黃佩琪女士：（經傳譯員）我哋睇番運輸署嘅回應，喺之後嗰頁，就係707頁嘅，運輸署似乎就冇答到問題嘅第二部分，即係頭先主席讀出嚟嗰個嘅問題，佢就畀咗一個係好一般嘅答案嘅，睇番呢一個嘅707頁英文版，第二段，就話就以車長嘅更分，包括工作、休息同埋用膳食係有指引嘅，肇事巴士車長喺意外當日嘅更分編排同埋上班前嘅作息時間係符合運輸署指引嘅要求等等，佢就冇答到話兼職車長係咪可以喺做完正職之後再係做長嘅時間工作嘅，呢一個議題區議會有冇跟進番運輸署嘅回覆呀？

容溟舟先生：我印象中就喺個會議上面大家嘅焦點喺嗰個嘅交通事故嗰個意外上面，就冇好細緻去商討過呢一個兼職車長究竟係可以容許佢會揸幾多嘅時間。我嘅理解，引入兼職車長嘅原因其實係確實喺幾間巴士公司續專營權時間，社會對佢嘅脫班率係非常關注，結果就巴士公司就引入咗都唔少嘅兼職車長去處理。

兼職車長理論上應該係分兩批嘅，有一批真係可能係日頭有一份工，夜晚揸幾個鐘，我舉個好簡單嘅例子，就係巴士公司裏面嘅行政人員其實都會有巴士

嘅巴士嘅駕駛執照，係可以駕駛巴士嘅。個問題出咗嚟，就係如果運輸署只係針對巴士車長嗰陣時揸嘅時間去處理，佢哋係永遠達標嘅，因為佢哋唔需要計算正職嗰個工作時間，呢個係第一個問題。

第二個問題就係呢個就係如果係同一間公司，都倘有辦法可以記錄到究竟佢做幾多個鐘，但係如果一個情況就係佢可能係打第二--即係喺出面有另外一份工嘅，你叫嗰個出面嘅僱主會唔會容許佢嘅職員去兼職做車長呢？呢個第一個問題。第二個問題就係你容唔容許究竟嗰個車長會唔會如實申報究竟佢日頭嗰份工做咗幾多個鐘呢？

你就算有呢啲資料，你巴士公司都未必能夠可以好清楚計算到究竟佢會唔會超過一個長工時。亦都喺呢一個指引裏面其實係冇針對兼職車長嘅安排，但係運輸署確實容許巴士公司可以請兼職車長。所以呢個係一個雞同蛋嘅問題嚟嘅。

主席：（經傳譯員）其實係有問題，巴士公司係冇問呢啲嘅問題，即係話問兼職車長喺其餘嘅時間做啲乜嘢，呢個係一個問題嚟嘅？

容溟舟先生： Yes.

黃佩琪女士：（經傳譯員）你哋議會係關注呢樣嘢，亦都同運輸署講，你係有冇跟進？

容溟舟先生：我哋嘅同事當然有表達過呢個意見，但係問題係就現時我哋喺會後要求佢後補畀我哋嗰個編更個指引，確實係冇處理到兼職嗰個問題，呢個係重點嚟嘅，佢冇處理過。即係我哋想繼續去追問，其實佢冇處理過，我哋都老鼠拉龜，我哋根本無從入手去追。

主席：（經傳譯員）你有冇用書面去嘗試去追問呀？

容溟舟先生：我哋同事因為喺個會議上面除咗有 motion 以外，如果有 motion，我哋就會畀番一個動議畀番相關嘅部門，私底下其餘嘅同事有冇就呢啲嘅意見畀番巴士公司呢？喺我呢一刻，同事冇畀到任何資料我，我暫時答唔到你究竟有冇以 writing 去講。不過喺我哋唔同--我相信喺唔同黨派嘅同事同運輸署一啲非正式嘅會議其實都有提，以我自己嘅政治嘅組織，都有講過呢一個問題出現過嘅，不論同運輸署、九巴同埋城巴、新巴，我哋都有傾過呢個問題，但係巴士公司究竟有冇去切實去執行或者去處理呢？呢個就要交番畀巴士公司。

主席：（經傳譯員）我哋可唔可以咁樣理解呢，當你同唔同嘅人員去提出呢樣嘢，係口頭去提出嘅，唔係書面提出嘅？

容溟舟先生：（經傳譯員）口頭，係會議上嘅口頭提出。

黃佩琪女士：（經傳譯員）第二個事項，就係呢一個 706 頁，就係關於呢一個石壆同埋行人路嘅路邊嗰個設計會好容易引致有意外嘅，呢個係 706 頁，路政署同

埋運輸署嘅回覆就喺 707 頁，上面就講，由第二行開始，就係話呢個嘅護欄嘅開端係用傾斜式石壆，可以減低失控車輛撞擊護欄開端時對駕駛者同埋乘客嘅傷害。路政署聯同運輸署會繼續檢視現有公共道路嘅防護設施，同埋按實際情況同埋需要係為新建同埋現有嘅公共道路安裝合適嘅防護設施。上面就話運輸署同埋路政署會繼續檢視呢個防護設施，你有冇同運輸署跟進番呀？

容溟舟先生：喺個會議紀錄嘅 135(a)段同埋(b)段，其實當其時我已經有指出呢一個嘅道路設計係並不容許--一個容錯嘅設計嚟嘅。其實我哋都當其時有要求--一路都要求，叫佢哋做番一啲嘅類似一個 U 型嘅，一個撞埋去係會吸咗落去嗰個嘅設計，因為呢個設計其實我嘅理解，係一啲比較高速公路嘅地方或者高速公路嘅分岔位佢哋會裝置呢啲嘅設計。

如果我冇記錯，頭先我睇住大埔嗰個聽證會嘅申述，其中有一幅圖喺新個巴士站嘅設計上面確實係有呢一個嘅設計，但係當日運輸署答我哋就係嗰啲一定要喺高速公路做。如果喺公速公路做個標準係咁嘅話，我哋唔明白點解一條喺觀塘繞道落去呢一個嘅東區海底隧道嘅位置其實係行 70 嘅車速嘅，嗰個位置其實理論上都適合安裝嗰一類型嘅防撞欄，因為嗰個類型嘅防撞欄一撞咗埋去之後，架車就會凹陷咗喺個防撞欄裏--裏面係有一啲嘅設計係將嗰個震嘅物料吸咗落去嘅。所以我哋嘅講法，就係其實應該係要儘快檢視番呢一啲位置嘅。頭先有張工程圖嘅，我憶述頭先有張工程圖，我係睇到喺張工程圖裏面係有一個位置係裝咗嗰個嘢。

黃佩琪女士：（經傳譯員）我哋而家繼續落去，你可能講緊嘅係 TD 文件 5 號 167 頁嘅，...

容溟舟先生：冇錯，我哋就係講緊嗰個防撞欄，其實嗰個位置我哋嘅理解係適合安裝呢一類型嘅，因為而家呢個位置，第一，呢條唔係快速公路嚟，其實呢個係快速公--應該咁講，運輸署嘅道路設計，我嘅理解，係根據 transport design and planning manual，即係佢哋係有唔同嘅 volume 去講述一啲嘅道路嘅設計或者係一啲嘅情況，呢一個其實你問我原本嘅設計合唔合標準，呢個有待專家去講，但係我哋要求咗好耐嘅一啲高速公路或者鄰近高速公路嘅出入口裝置啲防撞欄，係冇裝到嘅，如果裝咗個防撞欄，架車撞埋去，係會凹陷咗喺裏面，就唔會話劏上咗個壆跟住導致反車造成呢個嚴重嘅交通意外。

黃佩琪女士：（經傳譯員）你而家係咪响 135(a)段係建議呢樣嘢呢？

容溟舟先生：（經傳譯員）係嘅。

黃佩琪女士：（經傳譯員）而運輸署我相信喺 138 段嗰度係有佢哋嘅立場，係咪呢？馮家晉，138，英文版係 717 頁，馮家晉先生佢係路政署新界區區域工程師，個回應就話鯉魚門個石壆設計係斜台式嘅，目的係要減低失控車輛撞擊護欄嘅時候對駕駛者同埋乘客造成嘅損害係可以減少嘅。跟住喺下一頁，就話如果 70 公里時速限制嘅高速公路，路政署都會裝設啲風琴式嘅防撞欄嘅，由於鯉魚門唔屬嗰個條件，所以現時嘅石壆設計係符合有關嘅標準嘅，路政署就會同

運輸署按實際情況改善嗰度嘅設施，換句話，佢哋係拒絕咗你嘅要求嘅，啱唔啱呢？

容溟舟先生：係，但係你留意番你頭先講過 TD-5 嗰個 bundle，上址嘅道路速度原本係 70，後屘就係因應呢次交通意外改變咗做 50，即係話一國兩制。路政署喺道路 70 嘅標準冇因應呢一個嘅檢視覆檢呢一個位置究竟係唔係適合去裝設番呢一個嘅防撞欄，其實委員會喺我哋嘅特別會議係有要求所有嘅部門就佢之前嘅回覆畀一個檢視番有冇一個新嘅回覆嘅，我嘅理解，應該路政署係冇就呢一個嘅提問裏面嘅答案做一個 update 嘅回覆，即係話其實基本上我只可以講一句，對運輸署同埋路政署用頭痛醫頭、腳痛醫腳、冇針對整個道路安全嘅情況之下去檢視番道路上面嘅設施或者係增加一啲叫容錯嘅設計去保障道路使用者嘅安全，我極度遺憾嘅。

黃佩琪女士：（經傳譯員）而家我就想亞公角道嘅問題嘅，呢個係有另外一宗嘅意外嘅，個會議紀錄係 2018 年嘅 5 月 8 號，係 TT26 嘅文件，係 2012 年嘅，就喺 610 頁嘅喺英文版，中文版就 607 頁嘅，中文 607，英文 610，喺第二段，楊祥利先生喺交通運輸委員會，係呢個沙田區議會，就提咗啲亞公角道嘅安全問題，第二段佢就指出，就喺亞公角道係發生過好多嘅嚴重交通意外，你知唔知悉呢個咁嘅投訴，楊生所講嘅交通意外，你熟唔熟悉呢？

容溟舟先生：楊祥利先生亦都係一個前沙田區議員，佢冇就一個嘅交通意外就去針對即係去提問，但係喺我嘅記憶所及，係有一個嘅交通意外嘅傷亡人數都比較多嘅，可能都要稍後補充番資料。

嗰個交通意外，我記得就係朝頭早有一架 89D 號嘅巴士就往九龍方向，就因為收掣不及，就撞咗落去之前應該唔記得咗係 85K 還是係 86K 一架巴士度，就造成都有成三十幾人受傷嘅，而當日其實就事發之後，其實我到過現場，係見到傷者嘅情況，亦都有處理過傷者嗰啲嘅索償。我憶述所及，呢個係第一單關於巴士嘅交通意外，亦都斷斷續續喺一啲過路處其實有一啲嘅交通意外係同小巴係有關連嘅，亦都導致過一啲嘅致命交通意外，我相信楊先生問嘅，喺嗰個交通意外同埋傷亡數字其實並不限於係巴士嘅意外嚟嘅，亦都有其他嘅意外集合咗喺嗰度。呢個係我嘅理解。

第二，就初步嘅理由，點解會有亞公角街會較為多交通意外出現呢咁樣，因為亞公角街係一條雙線雙程嘅一條嘅行車路嘅，就途中由我嘅選區富安花園去到石門交匯處就大概係有兩個過路處同埋一支嘅交通燈，我冇記錯嘅話，同埋亦都有三組嘅 T 字路口，分別去梅子林路、入亞公角漁民新村同埋呢個沙田醫院，仲有一個，係上亞公角山路嘅，係有四組唔同嘅路口嘅。呢四組嘅路口全部嘅設計都係一啲讓線嘅設計，啲 priority junction，就唔係 signalized junction 嚟嘅，呢啲讓線嘅設計嘅路口其實係兼顧一啲比較行車流量少嘅地方，但係好多時就可能係駕駛人士喺過呢啲路口嘅時候冇好小心、謹慎去駕駛，而導致到係有交通意外發生嘅，呢個係其中一個我理解嘅原因。

第二個原因就係因為其實亞公角街除咗朝頭早同埋晚黑嘅繁忙時間比較多重型車輛，包括巴士去使用，其實喺其他時間路面嘅車輛其實不多，點解呢？因為喺馬鞍山去呢個嘅石門交匯處其實仲有一條高速公路，叫馬鞍山路，嗰度係一條雙程六線行車嘅一條高速公路嘅，而時速係行緊 70 至 80 公里，即係如果平時嚟到講，冇乜特別嘅--即係私家車其實唔會走入去嗰條街度行呢一個路面嘅，但係喺朝頭早因為可能有機會避免擠塞，所以有少部分嘅私家車會走咗入去，但係通常呢一啲嘅交通意外都好少發生喺朝頭早嘅，通常喺一個好路面暢順嘅地方，因為嗰度既冇測速嘅相機，亦都得一眼嘅交通燈，仲要係手掀嘅控制嘅交通燈，去過沙田醫院嗰個路口，其實相對路面暢順嘅，駕駛者未必係好守規矩揸 50 公里，甚至乎可能係揸超過 50 公里嘅，所以係比較容易出現交通意外，呢條道路嘅設計。

黃佩琪女士：（經傳譯員）如果你睇一睇 611 頁，嗰度就係有警察提供嘅一啲數字嘅，係 07 年到 2011 嘅，就區議會嘅所知，個交通傷亡數字係喺 2012 年之後個傷亡數字係增加咗、減少咗定維持不變呢？如果我哋睇一睇楊先生喺 610 頁嘅提問，佢就問就運輸署有冇啲短期或者長期措施去解決問題，即係解決亞公角道嘅問題，運輸署提咗四點嘅，就响 611 頁，第一，運輸署就話駕駛者個視線係冇障礙嘅；亦都符合道路設計標準；第三，就話已經有考慮會唔會喺呢個路段增加嗰個交通燈嗰個控制，佢哋就話 4 月 16 號嘅交通意外，運輸署已經提醒咗巴士公司要加強車長嘅培訓嘅，同埋要作出更進一步嘅改善，係當警察係作出個報告之後，佢哋要繼續改善。你哋區議會會唔會跟進呢？又或者你對運輸署嘅答案是否滿意？

容溟舟先生：喺我嘅--喺個會議紀錄嘅第 613 頁 paragraph 67(c)同埋 67(d)，我係有啲建議嘅，佢哋話要求做雙白線，避免越線同埋爬頭，我哋當其時係建議佢種一啲膠 bollard 嘅，嗰個膠 bollard 就正如當年喺荃灣德士古道天橋嘅一個致命對頭車交通意外之後，佢哋係裝咗落去嘅，我哋覺得呢個係可以值得借鏡嘅一個交通安全改善嘅措施，其實到而家我嘅憶述其實係冇裝過嘅，即係我哋建議，係冇裝過。

第二，就係(d)嗰度，其實當其時警方嘅回答就係冇鐳射槍--佢話用隱形戰車嘅，其實我嘅理解，警方隱形戰車其實係會係不定時、不定期喺主要嘅主幹道同埋高速公路去做偵查，係好少喺呢啲嘅 local road 喇我哋叫做，即係本區嘅道路裏面去使用嘅，但係喺嗰一次嘅提問之後，警方確實係增加咗喺亞公角街使用鐳射槍去偵測嗰個速度，而擺嗰個位置，我冇記錯，就係大概喺亞公角漁民新村出口往馬鞍山方向個電箱後面，佢哋通常就係測返入馬鞍山嘅車，因為嗰個位置過咗沙田醫院嗰個燈控嘅交通燈其實係一條大直路嘅，車司機係好容易地比較會去揸快咗都唔出奇，所以我記得就係咁。

但係就 TD 其實係避車處嗰度其實係後尷係出咗一個叫做 Works Order 去拓闊咗個避車處嘅，但係因為個避車處就算拓闊咗，因為嗰個上址係因為一間醫院，亦都有唔同嘅探訪者去用或者去排隊，所以其實就算增大咗個避車處，

其實都有陣時啲巴士要等候入站，或者喺條行車線度去作上落嘅，所以個作用係有，不過效用不大。

黃佩琪女士：（經傳譯員）我見到 615 頁係有個臨時動議，係楊先生作出嘅，佢中文版係 73 段，英文版 618，73 段，有個臨時動議，係由楊祥利先生提出，就要求係要對亞公角道係作一個全面檢討，要擴闊佢，同埋要安裝啲攝錄機嘅，運輸署就呢個要求有冇作出回應呢？

容溟舟先生：喺 73 段嘅：

第（一）就其實警察係加強咗執法嘅，因為原本由冇到有吖嘛，咁實加強咗喇。

第（二），就係亞公角街嘅道路設計，包括擴闊亞公角街同埋裝置呢個超速攝影機，我憶述所及，係成立亞公角街到現在呢一刻為止都係冇超速攝影機嘅。另外，包括擴闊亞公角街，因為亞公角街隔籬係條馬鞍山路，馬鞍山路嘅中央分隔，但係就起咗一條馬鐵。其實你問我喺適當嘅位置拓闊條亞公角街，其實係有需要係由富安花園一路去到石門交匯處去拓闊，但係我相信係比較困難去搵一啲適合嘅位置去拓闊條路。

因為拓闊一條嘅行車嘅--因為根據個標準，應該要有 3.6 至到 3.7 米嘅闊度，你先至可以有一個比較合適嘅道路去畀多一條行車線，但係喺我嘅理解，就係行人路最低嘅 minimum width 係要留番 1.5 米，即係話如果喺一啲有限嘅空間，你拓闊條車路，而行人路嗰個闊度不足，佢哋未必會 proceed 去做，因為行人路如果太過窄嘅時候，可能連輪椅都推唔到，運輸署係未必會執行去做呢啲拓闊嘅，所以第二個其實攝影機冇做到，擴闊其實都冇做到嘅。我估可能係擴闊嗰度係因為呢個道路嘅限制，即係道路空間嘅限制，而攝影機其實係相對嚟講，係可行嘅。

黃佩琪女士：（經傳譯員）主席，...

主席：（經傳譯員）我哋可以繼續嘅，而家我哋仲係有排先會講到作出巴士安全嘅建議嘅。

黃佩琪女士：（經傳譯員）仲有一、兩點係需要問，我就可以完成我嘅提問嘅。容先生，你喺會議紀錄 TT 文件 23/2017，如果你睇中文 710 嘅嗰頁，...

主席：（經傳譯員）而家睇嘅係咩嘢文件呀？

黃佩琪女士：（經傳譯員）呢個係會議紀錄嘅，係沙田區議會嘅會議紀錄。TT...

主席：（經傳譯員）唔需要，個日期呢？

黃佩琪女士：（經傳譯員）係 2017 年嘅 3 月嘅。如果睇番 134 段，就有個建議嘅，就巴士公司應該每年係檢查車長有冇...

主席：（經傳譯員）睡眠窒息症嘅。

黃佩琪女士：（經傳譯員）係呀，睡眠窒息，同埋你有冇跟進呢個咁嘅建議呢，或者區議會有冇跟進呢個建議？

容溟舟先生：我要睇一睇番，因為我哋嗰個做法就係我哋有同事提出咗呢一啲嘅意見，喺個會議上面，如果會議上面有一啲動議，部門係會有一個嘅稍後嘅回覆嘅，喺下一次會議嘅續議事項有回覆嘅。如果冇嘅話，其實就我嘅理解，部門係會記錄在案，然之後就去睇番究竟有冇呢一個嘅意見或者係可以點樣去落實嘅，我嘅理解就係咁樣。因為而家我手頭上就冇嗰份嘅文件，即係究竟--嗰個續議事項個文件，我都可能要上去睇番嗰個嘅續議事項究竟有冇講過。

主席：（經傳譯員）或者你如果可以搵到呢份文件，你可以提供畀我哋嘅，如果係相關嘅話。

容溟舟先生：Okay.

主席：（經傳譯員）好，唔該。

黃佩琪女士：（經傳譯員）容生，我已經去到呢個課題嘅最後部分，就係你提到大埔公路，就喺討論文件嗰度嘅，係 727 頁，呢度係姚嘉俊先生提問題，(b)同(c)，個問題就係佢哋提呢個問題就係關於大埔公路沙田段，就話有唔少存在嘅危險位置同埋彎位，中文就係 719 頁，你知唔知點解姚先生有咁嘅睇法，就話特別呢一段係有潛在危險呢，即係沙田嶺段？就有潛在危險同埋彎位係咪因為佢收到投訴定係點，你可唔可以講一講呢？

容溟舟先生：你而家問我係咪即係話番大埔公路嗰個位係點解會覺得係一個危險，係收到投訴吖，定抑或點，係咪？

黃佩琪女士：（經傳譯員）係。

容溟舟先生：因為姚議員就唔喺度，我都要--你畀少少時間我望一望份文件。

主席：（經傳譯員）好，請你慢慢。

容溟舟先生：我相信，睇番份文件，而姚嘉俊議員講嗰個位置因為大埔公路就有唔同嘅位置嘅，嗰度佢講過就喺沙田區裏面嘅沙田段，而佢所指出嘅--應該講緊提問(c)嗰個位置，係咪呀？

黃佩琪女士：Yes.

容溟舟先生：佢所講--因為咁講--因為--係咪提問(c)？（經傳譯員）係咪(c)？

主席：（經傳譯員）我諗係嘅。

容溟舟先生：Yes，okay。因為其實整條大埔公路會有唔同嘅段數嘅，喺沙田嚟講，我冇記錯，有沙田段，亦都有一啲沙田嶺段、琵琶山段咁樣，其實姚議員所指

出就應該係沙田嶺段嘅位置近六合新村嗰個位，其實嗰度曾經都有出現過一啲嘅致命交通意外嘅，亦都有牽涉過巴士嘅，不過就係我冇記錯，就係如果我憶述所及，就應該係巴士畀人撞，就唔係巴士撞人。

黃佩琪女士：（經傳譯員）如果你睇番 728(b)個問題底部個答案嗰度，就係運輸署嘅，佢就講出大埔公路沙田嶺段去到琵琶山段嗰個時速限制係 70 公里，呢段大概係 1.7 公里有兩個急彎，剩番嗰 1.4 公里路段就比較接近沙田，嗰個車速限制係每小時 50 公里，有三個急彎，呢個就喺下一頁嗰度有列出嚟；然後就提到話喺適當嘅地方已經係設立咗一啲慢駛嘅道路標記，特別係嗰個車速限制改咗嘅地方就已經有擺咗出嚟，同埋喺急位之前亦都樹立咗警告性嘅交通標誌同埋喺路面加設咗慢駛嘅道路標記提醒駕駛者喺急彎之前減速。運輸署係知道呢度有啲急彎，亦都知道呢段路嘅車速限制，你係咪滿意運輸署嘅回覆，就話已經足夠，即係話講車速嘅限制同埋話有冇足夠嘅交通標誌嗰方面，你係咪滿意呢？

容溟舟先生：或者我用一個道路駕駛者嘅身分去同你分享，因為嗰個位置其實我有陣時都會係透過大埔公路係往返沙田同埋九龍，所講嗰個位置其實除咗係有急彎以外，其實嗰個--一條路嘅水平唔係直嘅，係可能係會傾斜去某一個方向或者係另外一邊嘅，如果架車係以時速 70 公里去行嘅時候，其實係有機--如果遇著一啲好似今日嘅天氣，落雨天，其實有機會會會“ball out”咗或者係會撞嘅，呢個情況有點兒似一似到大埔公路你哋今次調查嗰個情況，因為條路轉急彎唔係重點，而係個情況係架車你會感受到架車係會有高有低或者會啷嚟啷去，即係駕駛技術稍為遜色嘅朋友係有機會會有交通意外，亦都好容易解釋到點解嗰個位置咁多交通意外嘅原因。因為我冇記錯呢，嗰個位置其實係兩邊都係--睇下先，六合新村嗰個位置出去係行 70，入番嚟係行 50 嘅，我冇記錯嘅話。

黃佩琪女士：（經傳譯員）唔該。最後我想請你睇一份會議紀錄，736 頁中文版，743 頁英文版，都係姚嘉俊先生嘅。

主席：（經傳譯員）呢個會議日期係乜嘢呀？

黃佩琪女士：（經傳譯員）呢個係一個會議紀錄，但係冇顯示個日期，但係就有個文件編號 2/2018，所以我就假設應該係 2018 年 2 月，即係喺大埔公路交通意外之後，中文版就由 735 頁開始，英文版就係 742 頁。如果我哋睇番第 128(c)段，呢度就係姚嘉俊先生嘅意見，佢就話嗰度有三個唔同嘅車速限制喺唔同嘅路段，即係指喺大埔公路，所以對於駕駛者嚟講，就好難適應，佢就問運輸署會唔會檢討呢個情況同埋增加車速偵測機，你睇唔睇到呢段？

容溟舟先生：我睇到，你其實想即係問番我哋究竟運輸署嗰件交通意外，即係喺嗰次嘅提問之後有冇做一啲嘅檢討？

黃佩琪女士：（經傳譯員）或者係可以幫助你去考慮答案，其實喺會議上運輸署都有回應，就係第 133 段，英文版就 746 頁，中文 739 頁。簡單嚟講，佢話嗰段已經有好清晰嘅車速限制嘅標誌，亦都有標誌係提醒司機嘅，你哋區議會有冇跟

進呢或者有冇處理呢個問題，喺呢次會議之後？

容溟舟先生：我都係講番頭先個情況，如果有動議嘅話，其實佢哋會跟嘅，但係如果冇嘅話，就要睇番補充資料有冇回覆，因為呢個 bundle 確實係冇交到一啲嘅討論事項之後嘅一啲嘅補充資料，我暫時睇唔到。

黃佩琪女士：（經傳譯員）可唔可以去查呀？

容溟舟先生：你想我而家 check 吖，定係點呢？

主席：（經傳譯員）唔係，如果你可以搵到一啲相關嘅資料，之後請你以書面提交畀我哋。

容溟舟先生：咁喇，我或者可以咁嘅，我稍後同番你哋嘅調查委員會確認番你哋想交番啲乜嘢嘅意見，即係我會用番--指示番秘書處去就嗰啲意見，執番出嚟，睇下仲有冇相關嘅會議文件可以再補遺番。

主席：（經傳譯員）咁就會好有幫助，唔該。

黃佩琪女士：（經傳譯員）主席，我完成咗我嘅訊問。

主席：（經傳譯員）容先生，多謝你出席嚟協助我哋提供證供，我哋希望可以收到你嘅進一步嘅資料，即係如果你搵到有啲相關嘅資料，請你提供。

容溟舟先生：好，唔該晒。

主席：（經傳譯員）跟住就係深水埗區議會嘅代表，或者請林先生同陳先生係上前，或者畀少少時間我哋改番嗰個名牌，同埋畀新嘅水杯你。林先生同陳女士，多謝你接受我哋嘅邀請，今日出席作證，對唔住，我哋係延誤咗啲時間，或者而家請黃女士向你哋提問。

黃佩琪女士：（經傳譯員）好，多謝林生同陳女士嚟出席，或者首先我可唔可以處理就係關於工作時數呢個課題，即係指巴士司機喇當然。或者請你睇區議會文件夾2嘅986頁，呢個中文版，英文版就係988頁。

主席：（經傳譯員）呢度我哋想睇啲乜嘢呀？

黃佩琪女士：（經傳譯員）我哋係想討論深水埗區議會嘅討論，就係關於話喺深水埗嗰宗致命交通意外嘅，就係長沙灣道近住欽州街，發生喺2017年9月22號晚嘅。

主席：（經傳譯員）呢個係2014年9月22號所發生嘅意外？

黃佩琪女士：（經傳譯員）係喇，係2017年9月22號晚發生嘅意外。

主席：（經傳譯員）2017年呀？

黃佩琪女士：（經傳譯員）係，2017年。

主席：（經傳譯員）好。

黃佩琪女士：（經傳譯員）喺呢份文件其中提到嘅一個問題，如果睇番第3段，就話要加強規管巴士車長嘅工作時數，喺呢份文件就提到話喺其他外國嘅地方，例如歐盟，就會限制司機每日唔可以揸車多過九小時，而香港嘅巴士車長每日最長可以做到十四個鐘頭，每個月即係超過三百六十小時。我亦都想請你睇番第一次特別會議嘅會議紀錄，就係喺呢個深水埗嘅意外之後，就係17年9月28號，中文版就係1026頁，英文版1043頁。

主席：（經傳譯員）邊一沓文件呀？

黃佩琪女士：（經傳譯員）區議會文件夾2。唔好意思，係區議會文件夾3。

主席：（經傳譯員）係。

黃佩琪女士：（經傳譯員）如果我哋睇番168段，楊彧議員補充，佢要求政府修訂個指引，將嗰個工作時數由十四小時減到十二小時，如果我哋睇番170段，譚國橋議員補充相關嗰個規例，規定司機唔可以工作超過十四小時，好多職工會都有提到其實十四小時嘅工作時間都唔人道，而喺201段亦都有譚國橋議員亦都話城巴應該係將所有司機嘅工作時間減到十二個小時或者以下。所以我個問題就係似乎區議會--即係深水埗區議會建議嗰個工作時數係十個鐘頭，你可唔可以講畀我聽點解你哋建議係十個鐘頭？

主席：（經傳譯員）我哋喺邊度睇到？喺邊一段睇到？

黃佩琪女士：（經傳譯員）係喺986頁嗰封信裏面，英文版就係988頁第3段。

主席：（經傳譯員）係，唔該。

黃佩琪女士：（經傳譯員）「我哋要求運輸署規定每日最長駕駛時間係十小時」，你可唔可以解釋點解你哋建議十個鐘頭應該係最長嘅駕駛時間呢？

林家輝先生：喺嗰次意外發生之後，我哋議會就就住呢一個議題就傾咗都相當多嘅時間嘅，因為其實發生交通意外嗰個位置就啱啱喺我哋區議會門口，响個十字路口嚟嘅，如果喺區議會個窗口望出去，見到個慘劇嘅現場嘅，簡直係驚心動魄，係咪呀？同埋嗰個巴士撞過去，唔係可以即刻清走，經過好長時間嘅拯救同埋處理傷者，個巴士撞咗入去個建築物裏面，插實咗，攞番出嚟都係要好多工程人員、工程師喺現場處理。

就我哋議會就要諗下辦法點樣搵到出嚟呢個交通意外嘅成因嘅，呢份文件喺嗰個討論過程之中，綜合而言，我哋整個議會係都覺得其中一個重要嘅原因就係巴士司機喺駕駛個時間係頗長嘅。至於係呢個十四小時，我哋喺嗰個會議上面，冇一位議會嘅議員同事係覺得呢個係一個巴士司機合適嘅服務工作時數嚟嘅。就由十四小時去到十二小時，跟住就係再一路呢份文件所講嘅十小時，其實我哋覺得係一個合適嘅巴士司機嘅服務時數係應該就住佢哋嗰種工作嘅模

式，即係駕駛住一個咁大型嘅巴士同埋係兼顧住乘客嘅上落同埋家居嘅生活，係要作出一個平衡嘅。

我哋覺得喺個平衡裏面，如果係一個車長能夠去到十個鐘頭嘅工作時數，頭先之前有啲議會都提過，其實而家就係就算做呢一個看更，喺一啲公屋上面嘅看更佢哋都係八個鐘嘅啫，我哋呢個全香港嘅公共屋邨嘅保安員嘅服務，喺房委會下面係廿四小時有看更，每一更都係得八個鐘嘅啫，看更同事其實就佢嘅工作嗰個壓力同埋嗰個量同呢一個巴士司機嗰種工作壓力係冇得比嘅，即係換言之，巴士司機個工作壓力同埋量係好大，同埋近年巴士司機都會周時畀啲乘客指責，即係就算今時今日，呢兩個月，巴士上面有毒針添，係咪先？巴士司機譬如受到呢啲咁樣嘅--處理呢啲意外嘅，其實佢哋要好大嘅心力。喺個會議上面討論都覺得係如果係嗰個巴士司機嗰個時數去到十個鐘，呢個係比較理想，同埋我哋覺得會係令到個巴士嘅意外嗰個機率係會減低嘅。

當然我哋其實仲有一樣嘢關注嘅，就係巴士司機十個--即係假設真係去到--由十四個鐘、十二個鐘去到十個鐘，佢哋嗰個薪酬係可唔可以足夠養活佢哋一家人呢？呢個都係我哋關注嘅，因為都係投身車長服務其實都呢個工作都幾艱辛，如果唔係有足夠嘅人工去養妻活兒，我覺得亦係令到呢一個行業越嚟越人手短缺之下，可能係永遠都唔會將個時數減低，因為唔夠人，就車長--即係喺個巴士公司裏面可能就係要用一啲政策令到嗰啲車長係繼續增加佢哋嘅工作時數。呢個我回應。

黃佩琪女士：（經傳譯員）有一份會議紀錄嘅，就係呢一個嘅 2017 年 4 月 28 號嘅，係深水埗區議會會議紀錄，英文就係 1041 頁開始，中文就係 1026 頁開始嘅。

主席：（經傳譯員）邊一段呀？

黃佩琪女士：（經傳譯員）167 同埋係 168 段嘅，呢個會議係 9 月進行嘅，我想你睇番兩項嘅，167 段就係呢一個係鄭泳舜議員就話，就係呢一個嘅過去七年，對於巴士車長工時嘅指引係冇任何嘅修訂嘅。跟住係(i)嗰度，楊彧議員就話車長必須留意路面安全，同埋就要修訂指引，嗰個工作時數由十四減到十二，薪酬亦都要提高，休息時間亦都要增加。

呢一個嘅第 171 段嘅時候，梁昌杰先生回應就話喺呢件意外之後，其實個巴士車長工作同埋休息時間係受到社會關注嘅，運輸署同埋巴士公司係制定咗指引，巴士公司係需要喺編更時候遵行指引。運輸署每季亦都會聘請獨立調查員去睇番車長嘅工作、休息時間等等。

羅馬數字第(iv)，運輸署現正籌備有關指引嘅檢討工作，計劃諮詢巴士公司同埋工會，回應公眾對於車長工時嘅關注。運輸署冇既定立場，會考慮巴士公司、工會同埋公眾喺呢一次檢討嘅意見。

我有兩個問題要問嘅，似乎指引檢討係因為呢一個 2017 年 9 月嘅交通部意

外，仲有公眾人士投訴關於巴士司機嘅工作時數而引致嘅，呢次有檢討工作嘅，同意嘛？

陳穎欣女士：係，唔該主席。或者我都補充一下，其實針對番你而家呢個問題，可能你都睇番我哋嘅會議紀錄第 196 段，喺我哋發言度其實都有講，因為我都係一個工會嘅代表，其實工會一直都有就我哋一啲車長嘅權益同埋工時嘅問題向運輸署同埋巴士公司去反映嘅，但係好可惜，就係正正--回應你呢個問題，係意外發生咗之後，政府與及巴士公司嘅代表先至有意去考慮唔同持份者包括我哋一啲工會代表嘅意見。因為其實呢一個工時嘅問題，我哋見到對上一次我哋有一個真正嘅修訂其實係講緊七年前，即係意外發生之前嘅七年，喺 2010 年嘅時候嘅一個版本。其實呢一個問題，我相信一直以嚟，我哋工會代表都有去反映嘅，但係可惜得唔到一啲正面嘅回應，直至到有不幸嘅事故出現咗之後至願意去做一個修正。

另外頭先有關你嗰個問題，提及到有關十小時工時嘅問題，其實我所知道，一路以嚟工會嘅代表佢哋都希望最高嘅上限嘅駕駛時間其實係唔好超過十四個鐘，亦都希望可以修訂到去十二個小時嘅。至於十小時點樣得嚟呢，就可能係我哋議會其他嘅同事佢自己研究出嚟嘅，但係我哋其實整體個文件，我諗我哋成個議會嘅方向，大家都認為十四小時係太長，而我自己嚟睇，亦都係代表住工會嘅意見，我哋唔應該淨係著眼於個工時嘅問題，因為其實工時嘅問題同佢哋嘅待遇以至薪酬其實都係環環相扣嘅。

我所知道發生意外，其實當時嗰個情況，嗰個車長佢入職咗已經五年多㗎喇，當日其實佢都係應該原定提早咗去開工嘅，個原因就係因為佢要維持生計，如果佢返唔足夠嘅一啲工時，其實佢係唔能夠賺取到佢可以為生嘅工資嘅。即係我哋攞一啲數據嚟睇，其實一路以嚟，九巴佢哋嘅薪金都係一點幾萬，即係萬零蚊，可能新巴就會好少少嘅，佢哋都會去到萬二蚊左右，但係要計埋一啲津貼，先至嗰個薪酬係及得上我哋現時好多同類型，亦都係承受住巨大壓力嘅一啲行業，其實呢一個情況並唔理想，亦都係間接導致到今次呢個意外，我相信如果我哋要去做一個檢討，唔單只係講緊工時嘅問題，其實薪酬嘅問題同樣我哋都要重視嘅。

而至於有關嗰個待遇，其實我哋都講緊提及到休息嘅問題，頭先有其他嘅議會同事我都聽到都針對一啲有關休息室嘅問題去提出意見，其實我唔能夠講話全港有幾多個屋邨或者巴士站係未有休息室，因為呢啲我哋可能部門都畀唔到一啲嘅數據我哋睇到，但係我以我自己邨為例，我麗閣邨其實已經開邨咗三十幾年，但係我哋嘅 6F 巴士站其實都只不過喺去年年底先至可以開始設立一個休息室畀我哋 6F 巴士嘅一啲車長。其實呢個情況係唔理想，我知道其他嘅屋邨，我哋宏觀番睇番甚至乎九龍東，喺樂華邨，我知道係要有立法會議員何啟明嚟介入，先至可以喺屋邨嗰度成功幫到車長去爭取到一個休息室。所以其實成個情況，希望我哋睇嘅唔係淨係著眼於工時，亦都要睇埋佢哋薪金嘅待遇同埋休息嘅情況。唔該主席。

林家輝先生：你頭先問我呢個問題，就...

主席：（經傳譯員）未講之前，林生。陳女士，你話你係工會嘅代表，你嘅意思係指乜嘢呀？可唔可以解釋？

陳穎欣女士：我嘅政治聯繫係工聯會。

主席：（經傳譯員）你喺呢一個工聯會裏面嘅職位係乜嘢呀？

陳穎欣女士：我係一個區議員。

主席：（經傳譯員）我知，但係你話你同呢一個工聯會有聯繫嘅，你意思係乜嘢呀？

陳穎欣女士：（經傳譯員）呢個係我嘅政治嘅聯繫嚟嘅。

主席：（經傳譯員）唔該。唔該，林生，你可以繼續。

林家輝先生：頭先就即係律師問我個問題，就係話呢一次嘅政府嘅部門有關嘅檢討係咪就住啲交通意外或者係我哋議會或者公眾人士係發生咗意外之後就係會做一系列嘅呢個係好似今日嘅公聽會或者檢討，我覺得係嘅。當然喺社區、社會上面係對交通服務或者交通安全、意外等等都一定會有關注嘅，其實交通意外每日都會發生，有輕微嘅，有嚴重，好似今次咁嚴重嘅交通意外等等，但係你話係發生咗一啲重大嘅交通意外嘅事故令到個社區、社會震撼，跟住無論政府、公眾作出積極嘅處理或者回應，呢一種處理嘅方法係常見嘅，但係唔等於話社會一路唔關注嘅，但係今次，就算衍生咗今一次嘅公聽會都係可能係有好幾單好大型嘅不幸所衍生出嚟，所以我覺得--所以我哋係嚟到呢個公聽會係好值得嘅，我哋都要諗辦法令到呢啲意外個規模、傷亡人數唔會重蹈覆轍。

每一個交通嘅意外嘅地點都係可能喺設計上面、設施上面係有所不足嘅，好似我哋發生意外呢一笪地點係我哋深水埗最核心嘅地帶，頭先我提到喺我哋政府合署門口，喺議會嘅前面。呢一啲咁嘅咁人同巴--無論係公共交通服務、普通市民嘅汽車同埋行人過路嗰啲擠逼係好嚴重嘅，每一眼燈轉燈可能係有一千幾百個市民喺呢個十字路口嗰度準備過馬路嘅，同時期亦係有可能係十字路口有幾十架巴士等住去越過呢個十字路口嘅，因為我哋個區有啲特別嘅，深水埗區，法官大人，就係新界同市區嘅一個轉駁嘅區域嚟嘅，即係新界出嚟嘅車又會經過我哋區去其他市區嘅各區，另外其他各區入新界亦係經過我哋嗰區，所以呢個十字路口係我哋嘅交通核心嘅路口嚟，好不幸發生咗呢一次嘅意外。

但係我哋議會不斷都就住呢個交通十字路口佢嘅繁忙係有好多意見畀運輸部門、巴士公司等等，即係運輸部門就係點樣去疏導呢個十字路口令到人、車爭路呢個問題係解決，巴士公司就係希望佢哋將啲巴士唔好集中去呢個路口，其實仲有幾條路可以行，但係因為呢個路口又係好多乘客，所以啲巴士公司就唔肯將啲巴士路線移去第二條路行嘅，因為佢哋要接載乘客，所以就係有啲死結喺度嘅。

但係不幸發生咗呢個交通意外，亦去到今日呢個公聽會，我都希望透過呢個公聽會令到呢啲社會政策係有所改變，即係我哋包括頭先都提出咗譬如喺呢條十字路口會加多啲行人天橋，令到唔使咁多市民企喺呢一個每一次轉燈嗰陣時嗰個等候咁多人口。其實喺個路中心仲有啲位係畀嗰啲人喺路中心嗰度等嘅，...

主席：（經傳譯員）唔好意思，唔好意思，打斷你，可唔可以就係請你講一講關於其他嘅建議，即係關於檢討巴士車長工時、休息嘅指引，我就想問，可唔可以同你講，你就係講咗一啲嘅建議同埋收到運輸署嘅答案，就話佢哋話係會檢討，呢一次係 17 年嘅 9 月 28 號，之後運輸署有冇喺呢一個嘅--喺 2 月 23 號之前係諮詢過你先呢？

林家輝先生：冇。

主席：（經傳譯員）唔該晒。黃律師。

黃佩琪女士：（經傳譯員）請你睇番就係區議會文件 2 嘅第 1054 頁，就係第 302 段，梁昌杰先生綜合回應，就話運輸署會同巴士公司同埋工會持份者檢討指引，即係關於係車長工時、休息時間嘅指引，以達致共識，但係運輸署係冇再同呢一個嘅區議會傾過，問你哋嘅意見嘅，係咪呀？

主席：（經傳譯員）佢應該答咗㗎喇。

黃佩琪女士：（經傳譯員）我想再接住講另一宗意外嘅，2016 嘅 4 月 26 號嘅，係廣利路嘅，如果你 991 頁，中文 990 頁。

陳穎欣女士：唔好意思，我哋喺 move on 之前，其實都想表達一下意見，針對番我哋頭先講緊喺欽州街嗰個意外嘅，因為我知道大家除咗關注有關工時嘅問題，其實有好多巴士司機，即係我哋一啲工會嘅會員都同我哋反映番其實可唔可以喺一個道路設計上其實都可以幫助到巴士司機去減低佢哋可能平時駕駛嘅壓力，特別係我哋提到，其實會議紀錄都有講過嘅，就係有關我哋--其實參考番其他嘅城市，我哋見到都有一個叫做 X crossing 或者 diagonal crossing 嘅，我哋見到日本、英國一啲比較繁忙嘅區域其實都有咁樣嘅一個道路設計嘅裝置响度，頭先輝哥提及到...

主席：（經傳譯員）我哋已經睇咗個會議紀錄嘅，已經有討論。

陳穎欣女士：係，頭先輝哥提到點解有講有關行人天橋嗰個問題，其實正正就係點解會發生意外呢，係因為喺嗰個過路處，大家可能其實經常我哋會係想過斜對面對角嘅，但係市民就應該佢要喺本身嗰個位置停留得比較耐嘅時間，過咗去對面先至可以過到去斜對角，即係可能就係一個 L crossing，佢哋平時停留喺我哋而家嗰個過路處嘅時間變相就會長咗，咁樣亦都係令到意外嘅機會提高咗嘅，所以其實點解我哋提到有關 X crossing 嗰個做法，其實運輸署都要去考慮。

亦都可以考慮下，特別係一啲巴士司機同我哋反映番，佢哋其實都希望可以有一啲倒數裝置喺佢哋嘅過路燈嗰度嘅，其實都係可以提醒到佢哋去作準備究竟幾時要開車、幾時停車。

我哋而家講緊宏觀我哋好多唔同嘅城市其實而家都用咗好多嘅科技去幫助司機去減低佢哋嘅駕駛壓力，但係我哋香港仲係比較落後，而家我哋連 X crossing 呢個做法其實亦都未係嘗試過嘅，我覺得其實委員會應該要考慮呢個意見。唔該主席。

黃佩琪女士：（經傳譯員）可唔可以睇一睇 990 同 991 頁，呢個係 2016 年 4 月 26 有個致命意外嘅，係廣利道嘅。喺下面就提咗一啲要求嘅，其中一個就係九巴同運輸署要作一個詳細嘅調查嘅，同埋要向公眾作出一個詳盡嘅交代嘅，而運輸署應該係負責呢個跟進工作同埋改善廣利道嘅交通，要減少嗰度嘅危險嘅。區議會有冇跟進呢啲要求呢？

林家輝先生：有嘅，...

黃佩琪女士：（經傳譯員）喺你回答之前，係咪以書面形式跟進呢，呢個跟進係咪書面形式跟進呢？

林家輝先生：咁樣嘅，類似呢啲--即係區議會嗰個議政嗰個形式，好似呢一份文件係我哋啲議會同事就寫出嚟，就因為有一個交通意外，呢個蘇屋邨巴士總站呢度，之後就我哋會喺議會嗰度討論，就即席運輸署同事就係就住呢啲文件就係逐點回應，我哋嘅會議嘅常規，我哋就係會完咗呢一次討論，有時就會有動議添嘅，可能呢一次冇，就會擺落去跟進事項嘅，喺下一次--即係呢一次嘅會議嘅往後嘅會議就會有一個明細表嘅，因為將成個區發生或者需要跟進嘅事項就擺落去跟進事項，然之後喺下次又會討論。

喺呢一次嘅會議要求部門係做乜、做乜、做乜，即係佢有啲佢即時答到，有啲未必即時答到，或者有啲會再研究一個新嘅政策係去點樣應對呢件事件呢，下一次會議就有晒所有文件嘅。好似呢一次蘇屋嘅巴士意外，跟住就衍生到個議題，就係話蘇屋邨巴士總站用咗超過五十年，呢個巴士總站無論喺個設計，喺個需求使用，因為不斷會加咗巴士線，以前就得兩條巴士線，而家一路加咗其他好多，就係衍生到話要重建呢個巴士總站，甚至乎再衍生落嚟就係一地多用，就下面做巴士總站，上面可唔可以做社區設施，整一個大廈式嘅巴士總站，上面係可以做其他政府診所或者社會福利署等等。所以係有嘅。

黃佩琪女士：（經傳譯員）主席，我個問題問完，係就呢個區議會嘅問題問完。

主席： Sorry, I missed the first part?

黃佩琪女士：（經傳譯員）我已經問完想問嘅問題。

主席：（經傳譯員）剛才係已經向你提問嘅要求，你已經作出一般嘅回應，你亦都作咗啲個別嘅回應，如果有額外嘅補充，你可以而家講，但係我哋 3 點鐘同一個

德國嘅證人係有個取證嘅，所以我哋希望係有足夠嘅時間準備嘅，但係你可以補充嘅。

林家輝先生：好呀，多謝法官閣下。對於呢個社會上發生呢啲交通意外，一宗都嫌多，我衷心期待我哋呢個獨立嘅檢討委員會由閣下帶領係諗到啲新嘅方法或者係一啲新嘅政策出嚟畀政府，同埋令到呢一個我哋呢個城市就住交通意外、公共交通服務能夠係走向更現代化同埋走向世界前列上面，我有呢個期望，多謝你。

主席：（經傳譯員）多謝。陳小姐。

陳穎欣女士：我想表達嘅就係其實有今日呢一個委員會，我覺得係對未來嘅發展，我哋巴士、任何其實公營嘅交通工具，我相信對未來嚟講都係一件好事嚟嘅，但係我希望其實呢啲定期嘅檢討係可以恆常化嘅，而唔係我哋發生咗事故之後我哋先至去邀請持份者去表達意見。

其實我哋議會同工會嘅角色其實一直都好希望我哋嘅意見可以得到尊重同埋接納，但係好可惜我哋見到因為呢個巴士專營權其實成個議題亦都因為佢有一個模式，所以令到巴士公司其實基本上喺不論我哋講緊巴士路線重組計劃嘅時候係牽涉到市民嘅便利或者大致牽涉到市民嘅安全、司機嘅安全都好，其實我哋嘅意見往往都係唔被接納嘅，因為我嘅理解，其實佢個巴士專營權係唔會因為我哋嘅意見而受到影響嘅，呢一個係好可惜同埋一個唔理想嘅情況。

我哋往往講緊好多嘅巴士線，其實都一直有去表達意見，甚至乎一啲安全嘅指標上其實都有表達意見，但係好可惜我哋因為以往冇呢啲平台，亦都冇一啲恆常可以表達意見嘅一個機會，所以令到以往一直以嚟我哋嘅意見不被接納，我哋都好期望今次之後我哋可以有一啲新嘅做法、有啲新嘅模式喺我哋公營嘅巴士路線上面可以得到改善。唔該主席。

林家輝先生：主席，我...

主席： Yes.

林家輝先生：頭先大埔議會同事都提到一點，我認同嘅，就住係啲巴士政策或者專營權嘅問題，就如果可以十八個區議會都係就住專營權到期嘅時間之前係作出諮詢或者正式畀呢一個專營權續期嘅意見，其實係會令到巴士公司係會更加尊重區議會嘅意見。

其實喺而家政府嘅架構裏面係有呢啲例子嘅，就係城市規劃委員會喺地區裏面，就算市建局、所有嘅--或者其他用地嘅改變同埋發展，城市規劃委員會都要睇區議會支持或者唔支持或者對呢個發展係有其他嘅意見，然之後先至--係一個主要嘅意見，然之後先至係再去決議呢一個轉變或者使用嘅，所以係有先例。

我都希望閣下能夠就住對巴士公司佢嘅服務能夠積極去提高、作出一啲有

力嘅推動嘅方案，令到巴士公司同市民之間透過議會嗰個意見係得到佢哋認真去看待同埋去對我哋嘅意見係多加尊重。

主席：（經傳譯員）我不如咁問你，喺運輸署、運房局佢哋有啲諮詢關於是否應該讓巴士專營權續期，你嘅區議會有冇作出意見呢，去提供你哋嘅立場嘅意見呢？

林家輝先生：當呢個續期嗰陣時，喺而家嗰個政策上面，係唔使諮詢我哋區議會，我哋...

主席：（經傳譯員）呢個我知，但係佢哋一般都會有邀請嘅，我琴日先睇一份文件，九巴要續期嘅時候，一開始就會廣邀市民係作啲表述嘅，區議會，你嘅區議會有冇回應過呢份咁嘅諮詢呢？

林家輝先生：我冇聽到有，但係如果係一個機制係納入咗我哋嗰個議程裏面或者十八區區議會嘅議程裏面，係積極好多嘅，成為一個常規性嘅議程，當然專營權唔係成日會去續期，但係可能五年、十年，喺一年前...

主席：（經傳譯員）好似係每十年。

林家輝先生：係喇，喺第九年嗰陣時，我哋十八個區議會就係放呢個議程喺我哋嘅議會裏面，十八個區議會或者早一、兩個月或者早一年我哋去積極去討論，就會係更加方便去推動巴士服務。

陳穎欣女士：主席，輝哥--我補充林生嘅意思其實就係話其實運輸署同埋巴士公司係應該主動去到我哋十八區嘅區議會嗰度去提交文件，向我哋諮詢嘅，我呢度會有一啲 general 嘅 invitation，但係如果希望可以促進到我哋十八區嘅討論，更加希望佢可以 reach out 去我哋嘅區議會嗰度，向我哋做一啲諮詢。

我簡單講一個例子，其實巴士公司一般不論係專營權又好，抑或佢營運緊嘅時候，講緊巴士路線重組都好，我哋嘅意見係唔被尊重嘅，亦都其實基本上係唔需要聆聽我哋嘅意見。簡單我哋攞一條巴士線為例，當時其實你經常都會問有冇一啲 written 嘅 submission，其實我寫信寫埋去運輸署署長嗰度，就一條巴士線，6F 嘅巴士線去改道嘅問題，因為呢條巴士線佢係途經醫院，所以我哋認為佢唔應該只係考慮盈利，唔應該只係考慮佢當時嘅載客量，因為好多長者係要乘搭呢條巴士線去一啲醫院嘅服務，但係好可惜都係唔會聽我哋嘅意見隨意去做一啲改道，甚至乎削減班次。

喺呢啲層面上，其實我哋嘅區議會完全係冇任何令到佢要聆聽我哋嘅意見嘅一啲誘因，所以點解講到話可以喺個專營權去考慮續期嘅時候係需要考慮到我哋十八區區議會嘅意見先至去再做決定，我認為呢一個係比較恰當，亦都係最合乎公眾利益嘅做法。唔該主席。

主席：（經傳譯員）好，多謝你，我就叫秘書同你溝通，關於我想要嗰份文件，就係關於政府話嗰個專營權到期前嘅公眾諮詢嘅，亦都有一系列嘅文件係會要你要索取嘅。我要多謝委員會--我要代表委員會係感謝你出席嘅，我哋會 3 點鐘繼

續嘅。

下午1時56分押聆訊押後

下午3時16分恢復聆訊

出席人士： Mr JAN Kuliš，系統工程組長（ZF Friedrichshafen AG及其附屬公司Openmatics s.r.o代表）

中倫律師事務所律師許卓傑先生，代表ZF Friedrichshafen AG及其附屬公司Openmatics s.r.o

主席：（經傳譯員）各位，午安。許生，午安。歡迎你哋出席，你哋就係ZF同埋Openmatics嘅律師代表嘅，Kulis先生，感謝你係接納我哋嘅邀請，係幫我哋手，讓我哋係知道係有關嘅技術裝置係點樣運作嘅。我哋係會請陳大律師，係我哋嘅委員會嘅代表大律師係提問嘅，如果你睇唔清楚嗰啲文件或者需要時間去睇嗰啲材料嘅話，請話畀我哋聽，我哋會儘量係幫忙嘅，請問你明白嘛？

MR JAN KULIS：（經傳譯員）係，冇問題，唔該晒。

主席：（經傳譯員）唔該。

陳政龍先生：（經傳譯員）Kulis先生，早晨，我係陳政龍，我係委員會嘅代表大律師，我會係代表委員會向你提問，委員本身亦都可能有問題問你嘅，喺今節嘅聽證會裏面。首先就想感謝你，Kulis先生，感謝你今日係幫我哋作證，你嘅證供對於我哋委員會嘅工作好有用嘅，讓我哋從一個技術嘅角度去睇下現存係對專營巴士喺香港運作有啲乜嘢嘅技術裝置、科技裝置可以用得著嘅。

首先想問你幾個基本嘅問題，關乎係你現時喺你公司裏面你嘅職位嘅，如果得嘅話，我就用“ZF”呢個簡稱嚟到係總括你間公司同埋係附屬公司，包括係Openmatics嘅，所以我以下就會“ZF”嚟到係作一個簡稱。我知道Kulis先生你係ZF嘅僱員，請問你而家公司裏面嘅職位係乜嘢呀？

MR JAN KULIS：（經傳譯員）我目前嘅職位，我就係負責呢個系統工程嘅，我係公司嘅僱員，我係Openmatics嘅僱員，Openmatics就ZF嘅係附屬公司。

陳政龍先生：（經傳譯員）可唔可以係簡單咁講出一下你有啲乜嘢嘅職責呢，你係呢一個系統工程嘅組長，你有啲咩嘢職責，簡單可唔可以講一講？

MR JAN KULIS：（經傳譯員）係，我哋寫字樓負責技術支援，技術支援Openmatics呢一個系統嘅，新、舊嘅客戶我哋都進行呢個支援嘅，我哋工程

師就會開發我哋嘅應用程式，係滿足我哋客戶嘅需要，我哋如果有問題嘅話，就希望能夠搵出個辦法去解決嗰啲問題，係協助我哋嘅客戶，幫佢哋尋求解決方案。

陳政龍先生：（經傳譯員）我知道就係喺電子工程方面就係有個大學嘅學位嘅，係咪呢？

MR JAN KULIS：（經傳譯員）係，冇錯嘅。

陳政龍先生：（經傳譯員）Kulis 先生，呢個委員會之前就同一個律師就係有書信來往，佢就係代表你嘅公司嘅，我哋已經係問咗一啲嘅問題，你嘅公司就係畀咗一啲嘅答案，就通過呢個律師事務所，你知唔知呢件事㗎？

MR JAN KULIS：（經傳譯員）係，我知嘅。

陳政龍先生：（經傳譯員）你自己有冇透過呢個律師事務所提供嘅答案，有冇喺你手頭上面？

MR JAN KULIS：（經傳譯員）有嘅。

陳政龍先生：（經傳譯員）好，主席同埋委員，喺我哋嘅文件夾之中，就係呢一個巴士技術製造商，就係 BM-1 嗰個嘅文件夾之中嘅，呢個中倫律師事務所嘅信件就係第 64 頁開始嘅。Kulis 先生，我可唔可以同你確認我哋係咪讀緊同一個文件呢？你喺你嘅前面就有冇一個中倫律師事務所嘅信件，就係 2018 年 6 月 26 號嘅一個信件，有冇？

MR JAN KULIS：（經傳譯員）有，我哋亦都喺屏幕上面見到。

陳政龍先生：（經傳譯員）Kulis 先生，你睇嗰個文本就喺右下角係咪有個頁數嘅呢？

MR JAN KULIS：（經傳譯員）冇嘅，冇嘅。

陳政龍先生：（經傳譯員）好，明白。Kulis 先生，我就會問你一啲嘅問題嘅，今日，就從兩個角度，咁所以你就知道我究竟係問啲咩嘢問題，第一方面，我就會係問就係關於黑盒嗰方面嘅技術嘅功能，就係已經係你公司係提供畀香港嘅巴士營運者嗰啲嘅黑盒，我希望你能夠澄清同埋解釋到就關於嗰個你答案裏面嘅一啲嘅細節嘅，你間公司就已經提供咗啲答案，呢個就係第一個角度。第二個角度，我就會問關於其他嘅硬件或者軟件嘅功能，你公司係有提供嘅又或者可以提供，可能對於巴士嘅安全係有關嘅，所以從呢兩個角度，我就會去提問嘅。就我就想請你睇一睇就你面前嗰個文件夾，就係第 1 段，你而家睇緊嗰個頁係咪附件 3㗎，上面寫住「附件 3」？

MR JAN KULIS：（經傳譯員）係嘅，冇錯。

陳政龍先生：（經傳譯員）你公司就係提供嘅答案就係藍色，我可唔可以睇一睇第二

段或者係第一段，呢個第三段藍色嘅就係第二段，就話 Openmatics 就係簽約係提供呢個遠程通訊系統畀九巴同埋龍運巴士公司，然後你間公司就話 Openmatics 就係開始提供呢啲嘅遠程系統就係使用第一代嘅黑盒，叫做「莫札特黑盒」，之後就係代替佢，就用一個叫做「巴克黑盒」去代替嘅，然後同時間顧客係可以兩個系統一齊用嘅，就好似九巴咁樣樣。你可唔可以首先話畀我哋聽嗰個莫札特個盒同埋巴克盒係幾時係推出市場嘅呢？

MR JAN KULIS：（經傳譯員）如果我冇記錯嘅，係2011年係莫札特盒。

陳政龍先生：（經傳譯員）巴克盒呢？

MR JAN KULIS：（經傳譯員）2015年嘅夏季嘅時候推出嘅。

陳政龍先生：（經傳譯員）所以巴克盒就相對於莫札特盒係比較先進嘅？

MR JAN KULIS：（經傳譯員）係，冇錯。

陳政龍先生：（經傳譯員）你可唔可以話畀我聽一般嚟講佢哋主要呢兩種嘅黑盒其實係有咩嘢主要嘅分別呢？

MR JAN KULIS：（經傳譯員）可以嘅，係科技越嚟越進步，唔好意思，就呢一個巴克就係第二代嘅，佢係比較外型係細啲、平啲、快啲同埋有更多嘅介面嘅，所以呢個主要分別就喺呢度。

陳政龍先生：（經傳譯員）你話更多介面咩嘢意思呢？

MR JAN KULIS：（經傳譯員）呢個嘅裝置係可以閱讀唔同嘅數據，同埋去到接駁唔同嘅電腦，呢個喺莫札特就可以係同呢一個車嚟去接駁等等；巴克盒就可以接駁去更多唔同嘅介面，譬如好似全球定位系統咁樣嘅。

陳政龍先生：（經傳譯員）而家嚟講，巴克盒其實係咪你間公司裏面最先進嘅一種型號呢？

MR JAN KULIS：（經傳譯員）係，冇錯，而家係最先進㗎喇。

陳政龍先生：（經傳譯員）我可唔可以再睇一睇你哋個陳述書？就係你公司提供嘅陳述書，你嘅公司講就係關於就係司機嘅反饋裝置，係再翻開後面嗰版，呢度就係有一個就呢一個螢幕嘅走出嚟嘅一個節錄，就係關於某一啲嘅界限值嘅，你個公司就講話就個界限起初就係應該係由九巴佢自己制定嘅，就由呢個 Openmatics 就去調校去到一個適合嘅一個界限嘅，我個一般性嘅問題就係話你間公司就係將佢校正咗呢啲界限值之後，嗰個最終嘅使用者，譬如話嗰個巴士嘅營運者，佢哋可唔可以係改變或者係再自己去制訂一啲新嘅價值，還是佢要返番嚟你間公司度呢？

MR JAN KULIS：（經傳譯員）一般嘅諗法就係嗰個嘅顧客可以能夠改變呢啲嘅界限值嘅。

陳政龍先生：（經傳譯員）我哋睇一睇嗰啲每一個個界限值，頭嗰兩個嘅指標，就係關於係加速同埋減速嘅，你可唔可以話畀我哋聽佢嗰個其實講嗰個時間係點樣樣呢？就係點樣去量度個加速同埋減速，就去致使到就話已經係超越咗個界限值呢？

MR JAN KULIS：（經傳譯員）我覺得就已經喺呢度列咗出嚟㗎喇，已經係，係呢個每二次方秒嘅。

陳政龍先生：（經傳譯員）我就講緊呢一個嘅系統就係提供畀香港巴士公司嘅，可唔可以就係裏面係講係唔同嘅時段用唔同嘅方法去量度呢，譬如話係三秒或者五秒，其實嗰個加速嘅情況係點樣樣？喺而家嘅系統底下可唔可以嘅呢？

MR JAN KULIS：（經傳譯員）係可以嘅，呢個係可以嘅，呢個係一個選項嚟嘅。

陳政龍先生：（經傳譯員）呢個咁樣嘅量度加速、減速其實喺莫札特同埋巴克盒嘅制式底下都係可以有咁嘅量度嘅？

MR JAN KULIS：（經傳譯員）係兩個系統，兩個制式都係可以用呢個嘅量度方法嘅。

陳政龍先生：（經傳譯員）如果係咁嘅說話，點解喺呢一個嘅屏幕之中我哋冇清楚表明係咁樣樣呢，如果係可以嘅說話？

MR JAN KULIS：（經傳譯員）唔好意思，我就唔係好明你嗰個問題。

陳政龍先生：（經傳譯員）我再開始，如果我哋睇番呢一個屏幕，屏幕嗰個啱啱摘錄，喺你就頭先就講話嗰個加速同埋減速嗰個量度就係每秒去量度嘅，我問題就係話嗰個加速同埋減速嗰個界限值會唔會就係譬如話三秒、五秒你去量度，而唔係每秒，致使到你就可以睇得更清楚嗰個加速同埋減速嘅情況，係可唔可以嘅呢？或者你需要其他嘅裝置先可以做到？

MR JAN KULIS：（經傳譯員）係可以嘅，但係呢個而家嗰個應用程式其實都唔係可行嘅，就其實嗰個系統都唔係咁樣設計嘅，就唔係畀嗰個客咁樣去調整嘅。

陳政龍先生：（經傳譯員）點解我問呢個問題呢？因為我睇番你嗰個公司嘅網頁，係呢一個嘅車載監察系統之中，其中一個嘅界限值就係三秒之中就係多過或者減少嘅，就係超過百分之五十又或者係喺呢一個每個鐘頭裏面五秒之內就增速咗32 個公里，所以你一個唔同嘅方法去量度突然之間點解會加速或者減速，所以我個問題就係話其實而家有嘅科技底下其實你有一個更加先進嘅方法去量度加速同埋減速嘅？

MR JAN KULIS：（經傳譯員）其實你係講緊呢個 Vivaldi 嗰個單位，呢個就係我哋係畀呢一啲客車嘅，呢個係喺 2017 年嗰陣時我哋製造或者係 2018 年，嗰個軟件就更加嘅先進嘅。

陳政龍先生：（經傳譯員）我明白喇，呢個相對於莫札特同埋巴克係更加先進，我明

白嘅，你其實係咪講緊呢個莫札特或者係巴克嘅盒，其實呢一種嘅量度方法係唔得嘅呢？

MR JAN KULIS：（經傳譯員）其實係可以有嘅，但係就係問題就係話嗰個嘅顧客有冇咁要求嘅，目前為止其實就冇乜顧客係咁樣要求嘅，其實係隨時可以係改變嘅。

陳政龍先生：（經傳譯員）仍然係加速或者減速嗰方面，我哋再睇之後嗰幾頁，...

主席：（經傳譯員）Kulis 先生，唔好意思，你呢度有啲數字就喺呢一個頁數，喺啱啱佢上高，你呢度有一段文字就係解釋點解呢啲數字就係點樣去解釋嘅，我哋係可唔可以係睇一睇呢啲數字呢？呢個我哋想睇嘅就係話嗰個嘅司機反饋裝置，就關於嗰個意外嘅巴士，其實起初就係個界限值就係由九巴自己制定嘅，後來就係由 Openmatics 校正咗，然後就去符合嗰個九巴嗰個要求嘅，你個意思係嗰個牽涉喺嗰個意外嘅車輛係乜嘢意思呢？

MR JAN KULIS：（經傳譯員）呢個喺大埔公路嗰個嘅交通意外嘅，有人命損失嘅。

主席：（經傳譯員）好，唔該晒。

陳政龍先生：（經傳譯員）關於個加速同埋減速嘅方面，我可唔可以睇一睇就之後第 5 段？第 69 頁嘅，喺我哋嘅文件夾之中，第 5 段。

MR JAN KULIS：（經傳譯員）係，見到。

陳政龍先生：（經傳譯員）喺呢個頁嘅中間，再係喇，藍色嗰段就係你哋公司嘅答案，呢一個嘅遠程通訊系統就喺九巴用嘅，就係可以記錄嗰個速度，加速同埋減速嘅啲巴士，但係嗰啲加速或者減速就係持續咁樣去個記錄其實就冇啟動到呢一個功能嘅，你可唔可以再進一步係解釋畀我哋聽呢個係咩嘢意思呢？特別係講就係話持續去記錄嗰啲加速同埋減速，呢個係咩嘢意思呢？

MR JAN KULIS：（經傳譯員）如果我冇理解錯嘅時候，呢個係就係講緊就係話嗰個情況就係呢啲界限值、加速同埋減速就係喺九巴嗰度就係愛嚟實時嘅監察，但係就唔係愛嚟記錄嘅，呢個就係我個理解。冇錯，我哋係有個系統嘅，但係我哋就冇去啟動嘅，我哋所建議--我哋就冇記錄到呢啲加速同埋減速嘅界限值，就冇記錄到一啲數字嘅。

陳政龍先生：（經傳譯員）你嘅理解就係加速同埋減速就冇喺個黑盒系統裏面係有記錄嘅，係咪咁呀？係咪正確？

MR JAN KULIS：（經傳譯員）正確嘅，呢個都係我嘅理解。另外一個功能就係我哋嘅黑盒就有記錄唔同嘅數據嘅，就有二十種唔同嘅界限值嘅，但係就唔係加速同埋減速嘅。

陳政龍先生：（經傳譯員）有冇咩嘢原因冇啟動到話要去儲存呢一啲嘅數據呢？

MR JAN KULIS：（經傳譯員）我相信一定有原因嘅，但係我就唔知道，我覺得就係可能係按住九巴佢個客戶嘅要求究竟係需要啲乜嘢，可能就對於嗰個儲存量都有啲嘅關係嘅，一定有原因，但係我就唔知個原因係乜嘢。

羅先生：（經傳譯員）我有一個關於加速同埋減速嘅問題，呢個係直接去量度吖，還是係根據嗰個時間而去--嗰個嘅動力嚟計出嚟嘅呢？

MR JAN KULIS：（經傳譯員）你可以睇到我哋喺呢一個嘅屏幕嗰度，我哋係我哋第一個嘅指標嚟嘅，喺呢個情況底下，嗰個訊號嘅來源就係嗰個車速，然後喺嗰度，我哋就會計到每一秒嗰個加速同埋減速嘅速度嘅，亦都係可以佢哋係用一啲內置嘅咪錶去使用嘅、應用。

羅先生：（經傳譯員）其實係咪直接去量度還是係以佢嗰個動力嗰個改變去計出嚟嘅呢？

MR JAN KULIS：（經傳譯員）喺我哋呢個嘅系統之中，係用個車速嗰度計出嚟嘅，所以嗰啲嘅訊號...

陳政龍先生：（經傳譯員）對唔住，Kulis 先生，就係嗰啲嘅訊號就係用嗰個量度車速嗰個嘅裝置係攞出嚟嘅，係咪呀？嗰個訊號嘅來源就係由嗰個車嘅車速嗰個咪錶嗰度攞出嚟啲資料，然後嗰個系統就係計到，從呢啲嘅車速計到嗰個加速同埋減速嘅速度嘅，係咪呢？

MR JAN KULIS：（經傳譯員）係，冇錯嘅，正確嘅。

陳政龍先生：（經傳譯員）好，Kulis 先生，我哋就去睇下一個指標，就係關於嗰個嘅傾側嗰個角度，而家呢度就寫係 44 度嘅，從一個技術嘅層面嚟講，你知唔知道點解係用 44 度，而唔係用其他嘅度數？

MR JAN KULIS：（經傳譯員）我諗 44 度你就可以想像呢一架係一架運行之中嘅巴士，佢唔係一個真正嘅數值，即係根據我嘅諗法，呢一個嘅配置就係表示喺呢一個傾斜角度嗰度係會發出警告嘅，如果你想係因為呢個傾斜角度而被通知，你可以將呢個界限值係定喺嗰度嘅，即係喺一個一般嘅營運操作嘅時候。

陳政龍先生：（經傳譯員）另外一個參數，講到呢個傾斜角度嘅，就係呢個嘅配置，就係過速嘅配置，喺呢一幅圖入面，我哋可以見到有兩個嘅參數，一個就係速度，另外一個就係喺地方中嘅速度，呢兩個都係每小時 75 公里嘅，首先一個比較基本嘅問題，睇下我係咪明白得清楚，如果架巴士喺呢個情況之下係超過咗每小時 75 公里，佢就會超過咗個界限，係咪？

MR JAN KULIS：（經傳譯員）係。

陳政龍先生：（經傳譯員）咁有咩嘢唔同呢，就係呢兩個嘅參數，即係速度同埋嗰個地區嘅速度？

MR JAN KULIS：（經傳譯員）呢一個嘅應用就係話有一個司機嘅反饋系統，就可以

去處理一個嘅地方嘅，譬如你係可以喺就住嗰個地方去定立一啲唔同嘅限速，如果你想將佢配置，因為有一啲地方係50，有啲地方係70，如果你配置呢一個應用嘅方法係咁樣做嘅話，喺某一啲地方亦都係有唔同嘅速限制嘅，所以呢一個參數亦都唔同。當然你亦都需要再去配置其他嘅一啲嘅窗口或者係去輸入一啲有關嘅資料入到去嗰個系統度。

陳政龍先生：（經傳譯員）我對於你個答案嘅後半部係比較有興趣嘅。架巴士如果你係想利用呢一個嘅地方速度嘅參數，係首先要知道架巴士喺邊度，就先至話可以觸發呢一個嘅參數嘅，喺技術上係點樣做嘅呢？

MR JAN KULIS：（經傳譯員）呢一個就係而家喺我哋用全球定位系統嘅技術，喺莫札特同埋巴克盒嗰度都係嘅，而喺香港嘅情況，呢一個嘅全球定位系統嘅科技亦都係有供應嘅，呢一個嘅功能就可以幫助我哋知道嗰個位置，咁樣我哋知道嗰個訊號喺邊度。

陳政龍先生：（經傳譯員）呢一個嘅可以訂定唔同嘅速度嘅界限，喺唔同嘅地方，而家喺目前嘅系統嗰度係咪可以用得到呢？即係你供應畀香港呢啲公司嘅呢個系統嗰度，或者定話佢哋要加落去嘅呢，係咪一啲額外嘅嘢嚟嘅呢，如果佢哋用呢一個功能嘅話？

MR JAN KULIS：（經傳譯員）當然佢哋需要去配置或者同我哋合作，我哋要一齊去配置呢一啲嘅地方，就係我哋係可以去界定嘅，喺個系統入面係做得到嘅。

陳政龍先生：（經傳譯員）喺呢個情況之下，我哋亦都係同樣嘅速度就係兩個參數都係75，有一啲咩嘢嘅目的，而家呢兩個嘅速度都係一樣嘅話，係點解呢？

MR JAN KULIS：（經傳譯員）我諗即係話呢一個嘅功能就係冇喺呢一個特別嘅配置入面使用嘅。

陳政龍先生：（經傳譯員）喺香港，我諗你都知道我哋係一個非常稠密嘅城市，有好多嘅高樓大廈，你覺得嗰個穩定性或者嘅可靠性，即係關於呢個全球定位系統係其實喺香港係咪真係咁可靠呢？因為香港有更加多嘅高樓大廈，會唔會影響呢個全球定位系統嘅效率呢？

MR JAN KULIS：（經傳譯員）當然，我哋知道香港嘅環境係會有啲唔同嘅，所以係會有啲影響嘅，因為好多嘅高樓大廈，對於呢個定位嘅準確性係有啲影響嘅，而嗰個效率嗰方面，可能喺呢一個高度，以米數嚟到講，係會有一啲嘅錯誤嘅，比起一啲空曠嘅地方，但係我諗我哋嘅定位系統一般而言，對於客戶嚟講，都係可以接受，因為我哋都經過幾次嘅測試，同埋一啲精準嘅調校嘅。最近，我都係傾過呢一個問題，我哋亦都係進行過一啲嘅計算，令到我哋係可以去輸入嗰個位置、有關嘅數值，同埋如果個全球定位系統嘅訊號消失咗嘅時候我哋可以做啲咩嘢嘅。

陳政龍先生：（經傳譯員）你覺得有幾常見就係話全球嘅呢一啲嘅商業車隊佢哋係去

配置或者去採用唔同嘅一啲嘅速度嘅界限，就係當一架車進入一個較低限速嘅地方嘅時候，佢哋有幾經常使用呢？

MR JAN KULIS：（經傳譯員）根據我哋嘅經驗，佢並唔係咁廣泛被使用嘅，嗰啲營運商佢哋係會喺較高速嘅時候使用，巴士或者係貨車咁樣樣，佢哋都係唔想有一個太複雜嘅系統嘅，對於司機嚟講，可能會係太複雜。

羅先生：（經傳譯員）如果呢個系統係可以去訂定喺唔同嘅地方有唔同嘅限速嘅，就會係更加複雜㗎喇，你首先要去界限嗰個地方同埋嗰個界線，呢一個嘅簡單嘅介面就唔可以去處理唔同地方嘅唔同速度嘅界限嘅，係咪？

MR JAN KULIS：（經傳譯員）喺呢一個介面嗰度，你係可以去訂定兩個速度嘅界限嘅，然後係需要界定嗰個喺下一個窗口嘅地方，呢度係冇顯示出嚟嘅，但係喺嗰個另外呢一個配置嘅窗口嗰度，你就會見到嗰啲嘅細節同埋有關嘅設定以及嗰啲嘅配置，亦都係有某啲地方係可以有唔同嘅配置嘅。

羅先生：（經傳譯員）所以呢個系統就唔係特登設計做呢樣嘢嘅，就係我哋見到呢個介面就冇見到呢一個嘅功能？

MR JAN KULIS：（經傳譯員）係。

陳政龍先生：（經傳譯員）如果我有一個數碼地圖係可以顯示出唔同道路上面嘅唔同嘅限速嘅，我可唔可以去使用佢就去加上埋而家呢一個嘅系統，就去配置、訂定唔同嘅時速嘅限制，就係可以為唔同嘅巴士嘅制訂嘅，定話喺你個系統入面呢樣嘢係不可能嘅呢？

MR JAN KULIS：（經傳譯員）係可能嘅，當然我哋係會需要一啲嘅軟件，佢哋係可以將嗰啲檔案去到編制佢，亦都係可以同嗰個地圖嚟到對接，而喺我哋嘅配置入面，我哋就可以進行一啲檔案嘅改變嘅。

陳政龍先生：（經傳譯員）所以呢一個嘅系統嘅限制只係兩個速度，唔係多種速度？

MR JAN KULIS：（經傳譯員）係嘅，呢個係目前嘅應用嘅限制，但係好容易就可以將佢擴展，去加埋第二啲嘅限制嘅，呢個只不過係個軟件嘅改變嘅啫，但係而家暫時係並不支援嘅，因為佢嗰個速度嗰個頻度係比較低嘅。

陳政龍先生：（經傳譯員）而家我哋係聚焦講下而家你哋係提供畀香港巴士嘅一啲嘅儀器，我咁樣講啱唔啱呢，就係話如果呢一啲嘅界限係多過一個以上係被跨越咗嘅，呢個系統就會即刻嗰啲聲音同埋喺視覺嗰度就係會畀一啲反饋係畀嗰個司機嘅，係咪？即係例如有啲嗶嗶聲咁樣？

MR JAN KULIS：（經傳譯員）係。

陳政龍先生：（經傳譯員）呢度我有興趣嘅就係除此之外，即係除咗去警告嗰個揸緊巴士嘅司機之外，呢一啲嘅界限值，即係你哋公司提供呢一啲嘅儀器有一啲嘅界限值，佢哋有冇一個嘅能力就係話可以自動咁樣樣去發出一啲嘅報告，就係

話如果有人跨越咗呢啲嘅界限值，就係可以通知嗰啲去監察緊嗰個司機行為嘅人就係話而家呢一啲嘅界限值已經係被超過咗？

MR JAN KULIS：（經傳譯員）係，呢一個系統係可以嘅。

陳政龍先生：（經傳譯員）即係話可以自動出一啲報告嘅，係咪呀？

MR JAN KULIS：（經傳譯員）係。

陳政龍先生：（經傳譯員）巴士公司係咪需要一啲額外嘅軟件應用，先至可以去使用呢一個嘅自動產生報告嘅程序呢？

MR JAN KULIS：（經傳譯員）而家係直接支援嘅，喺呢個反饋嘅系統嗰度，而呢個司機嘅反饋系統就唔係話淨係嗰個儀器本身，而係一系列嘅應用程式，其中一啲嘅應用程式就喺呢個巴士上面嘅儀器使用嘅，但係另一方面，就係喺嗰個伺服器嗰度嘅，所以係可以做得到嘅，所以例如喺呢度講到超速嘅問題，你都係可以見到。

陳政龍先生：（經傳譯員）所以就係話嗰個最終使用者，即係個巴士公司想點樣樣去使用嗰啲數據，即係佢點樣使用去收集啲數據，係咪？

MR JAN KULIS：（經傳譯員）係。

陳政龍先生：（經傳譯員）除咗呢一啲基本嘅界限值，我哋喺呢一張圖入面所見到嘅之外，呢個系統會唔會提供其他嘅界限值係同安全駕駛有關嘅呢？

MR JAN KULIS：（經傳譯員）並唔係喺呢個嘅應用程式嗰度，即係話呢個司機反饋系統，但係我哋有其他嘅應用程式，係我哋可以上載去呢一啲嘅盒嗰度嘅，我哋就可以去量度任何嘅參數，喺技術上，我哋係可以去閱讀嘅，亦都可以去分析，我哋就可以去監察呢一啲重要嘅參數，然後可以開始監察。

陳政龍先生：（經傳譯員）我而家想去問另一個題目，就係關於呢個數據嘅傳輸，即係由呢個黑盒收集咗啲數據之後嘅傳輸係去另外一個地方嘅。首先我就想你揭去第 69 頁，喺你嘅文件入面應該係喺第 5 段嗰度嘅，你如果去到正確嗰一頁，喺嗰頁嘅下面應該有一個羅馬數目字嘅(ii)字，藍色嗰啲答案就由你公司提供嘅，就係講到嗰個系統去每一秒鐘收集嘅數據，然後就將呢個數據傳輸去到某一個嘅 FDP 伺服器，每三十秒鐘一次。我第一個問題係呢一個嘅訂定，即係三十秒鐘傳輸數據一次嘅定立，呢個係咪有得選擇嘅呢，定話係呢個你間公司嘅硬件嘅一個限制嚟嘅呢？

MR JAN KULIS：（經傳譯員）呢個係選擇嚟嘅。

陳政龍先生：（經傳譯員）如果個最終使用者係想嘅話，佢就可以去校正嗰個系統，將嗰啲數據係每秒鐘都送去嗰個伺服器嘅，係咪呢？

MR JAN KULIS：（經傳譯員）例如其實我會認為係會有一啲技術上嘅限制嘅，因為

嗰個傳輸嘅方法，即係嗰啲檔案嘅傳輸等等，佢哋需要一啲時間去檢查同埋去建立一個嘅連繫，然後上載嗰啲檔案，我諗呢個 FDP 係有一啲科技上嘅限制嘅，需要兩到三秒嗖，...

陳政龍先生：（經傳譯員）所以係會稍遲嘅，...

MR JAN KULIS：（經傳譯員）...我諗最低嘅使用值係 FDP 嗰度係呢個傳輸係應該係五秒嗖。

陳政龍先生：（經傳譯員）即係講到呢一個數據傳輸嘅速度，呢一個就係我對你嘅問題嘅認知，係咪？即係話係有一啲嘅限制？

MR JAN KULIS：（經傳譯員）係。

陳政龍先生：（經傳譯員）如果呢一個數據係可以傳輸同埋被接收嘅，可能係每五秒鐘一次，你嘅公司有冇提供有關嘅技術呢，無論係硬件或者軟件去支援一個實時嘅監察，即係監察呢一啲黑盒所收集到嘅數據？

MR JAN KULIS：（經傳譯員）有嘅。

陳政龍先生：（經傳譯員）睇下咁樣講啱唔啱喇，你公司提供一個黑盒，佢收集數據嘅，呢個系統就可以傳輸呢啲數據，例如每五秒鐘一次，去到每一個嘅伺服器嗰度，而我作為一個主管，我就坐喺我嘅辦公室入面，我點樣樣去監察個司機呢，喺實時嗰方面，我係咪需要一啲額外嘅軟件，定話你嘅公司就可以提供呢一啲嘅軟件嘅呢？

MR JAN KULIS：（經傳譯員）我哋係其實有兩個選擇嘅，我哋可以提供我哋嘅軟件解決方案，呢一個就係包括 Openmatics 嘅入門嘅門戶同埋一啲其他嘅伺服器上面嘅嘢，係另外仲有一個嘅選擇嘅。有一啲嘅顧客佢哋就係想得到嗰啲數據，佢哋有自己嘅資訊科技系統去做嘅。

陳政龍先生：（經傳譯員）而喺九巴嗰方面，佢哋就將佢--即係佢哋淨係用你哋嘅呢一啲提供嘅儀器呢，定話佢哋有用其他公司所提供嘅一啲嘅實時監察呢？

MR JAN KULIS：（經傳譯員）九巴佢哋有自己嘅資訊科技系統嘅，佢哋就係會處理佢哋收集到嘅數據嘅，但係我哋如果想嘅話，都可以改變嘅。

陳政龍先生：（經傳譯員）根據你嘅經驗，有幾常見呢，喺全世界嚟到講，就係話講到呢一啲商用車隊嘅管理，啲公司佢哋係實時咁樣樣去監察佢哋嘅司機行為嘅，有幾常見嘅呢？

MR JAN KULIS：（經傳譯員）我諗而家係頗為常見嘅，因為都係有安全同埋經濟嘅原因，啲公司係想監察住佢哋嘅司機嘅，有一啲嘅公司喺某一啲嘅地方可能咁樣係同法例係有衝突嘅，因為係要保--但係有時要保障司機嘅安全，喺西歐嘅一啲國家有時係並不容易嘅，要推行呢一個嘅監察系統，但係仍然係有咁嘅需求。

陳政龍先生：（經傳譯員）我而家繼續，去講另一個嘅主題，你較早前提及過或者其實我都提及過，一個叫 Vivaldi 嘅儀器，亦都係由你公司所提供嘅，呢一個嘅儀器最初係幾時推出市場嘅呢？

MR JAN KULIS：（經傳譯員）我諗 2017 年底或者 2018 年頭，我唔係好肯定，佢係比較新嘅一個硬件嚟嘅。

陳政龍先生：（經傳譯員）係咪比起莫札特同埋巴克嗰個係先進定抑或完全不同呢？

MR JAN KULIS：（經傳譯員）呢個係完全唔同嘅，呢個 Vivaldi 就係唔同嘅，係作為係客戶用嘅車輛嘅，呢個就唔係畀巴士嘅。

陳政龍先生：（經傳譯員）就係畀嗰啲客戶車嘅，唔係大巴士？

MR JAN KULIS：（經傳譯員）可以係商用車。

陳政龍先生：（經傳譯員）如果係咁嘅話，我會繼續講其他嘅題目。下一項我想講嘅，想問嘅問題嘅就係係咪可以用軟件分析嚟到去製作一個報告，就睇下嗰個司機嘅行為係可接受定不可接受，即係講到佢係咪安全嗰方面。我想問下，你哋公司有冇提供嗰個軟件，係有咁嘅功能就去評估一下，即係當然係根據黑盒所收集嘅數據，而有咁嘅功能，就可以係做下評估同埋編製一個報告，就係界定嗰個司機嘅行為是否可以接受？

MR JAN KULIS：（經傳譯員）係，係可以有嘅，得。

陳政龍先生：（經傳譯員）你話得係點樣做嘅呢？譬如話我係一間巴士營運商，我嚟搵你，就話我想搵啲嘢就可以係編製一個報告，想知道某一個司機佢個表現嘅，你會講啲咩嘢畀我聽，就話畀我聽點樣做法嘅呢？

MR JAN KULIS：（經傳譯員）咁樣我就會話畀你聽我哋有咁嘅責任就係畀嗰個--話畀你聽我哋有嗰個係司機反饋嗰個程式嘅，同埋一啲係入門嘅--入門戶，咁你就可以睇番我哋剛才睇過嗰啲參數，你亦都可以得到嗰啲資料嘅，最終你就係可以做你自己個分析嘅，譬如話邊一位司機係有最多嘅警告、有冇超速等等，呢個係一個方案；另外亦都可以係認為我哋係淨係收到司機嘅反饋嘅話唔夠，想要啲更加先進嘅話，我哋可以幫你設計一個新嘅解決方案嘅，我哋可以將嗰個駕駛嘅數據嗰啲參數就係輸入、記錄，如果你想係有更加集中咁睇其他嘅數據同其他參數，亦都可以嘅，亦都可以據此嚟到進行分析，咁睇下你想點樣樣嘅，如果你--究竟你係想搵嗰個最佳嘅司機吖，定抑或你係想睇嗰個係負面嗰方面嘅限制嘅，所以都係可以做得到嘅。呢個亦都係要睇番你有啲咩嘢嘅選擇，我哋有更多嘅解決方案嘅

陳政龍先生：（經傳譯員）講到嗰個軟件嘅功能，講到嗰個硬件，硬件純粹就係嗰個黑盒就係收集數據嘅，係咪呀？換句話講，就係如果想做頭先嘅嘢唔需要買新嘅機件，都可以係收到一個報告，編製到一個報告，係關乎一個司機嘅表現嘅，啱唔啱呀？

MR JAN KULIS：（經傳譯員）唔需要。譬如話你係客戶，你有嗰個黑盒嘅數據，你想有啲新嘅功能，我哋可以幫你做嘅，用番同樣嘅硬件都可以做到嘅，我哋就畀啲新嘅軟件你就得喇。

陳政龍先生：（經傳譯員）根據你嘅經驗，我想問，喺世界上嚟講，講到係管理商業嘅車隊，營運商有幾常見係會用呢啲軟件嚟到編製報告去睇住嗰啲司機嘅行為，睇住佢嘅表現呢？

MR JAN KULIS：（經傳譯員）根據我嘅經驗，喺西歐嘅國家，相當之普遍嘅。另一方面，有其他嘅地方佢哋都儘量係簡單嘅，譬如話只係有嗰個司機嘅反饋嘅系統嘅，就係咁，就比較負面嗰方面嘅，即係只係有一個警示，因為就係司機都需要明白佢哋係畀人哋監察啲乜嘢嘅，如果你用一啲好複雜嘅功能嘅話，你亦都需要就係要培訓嗰啲司機嘅，所以嗰個情況係根據不同國家嘅需要，有不同嘅。

陳政龍先生：（經傳譯員）你就剛才講，就話西歐係普遍，係咪呀？

MR JAN KULIS：（經傳譯員）係。

陳政龍先生：（經傳譯員）好喇，除咗係司機嘅報告...

主席：（經傳譯員）或者你未落去第二個報告之前，你就話西歐國家相當普遍，咁樣樣我想問，佢哋用啲乜嘢嘅界限嚟到去監察司機嘅表現呢？即係如果好似話幫啲司機係評分、打分，去評估一下究竟佢係好司機、唔好嘅司機定抑或一般嘅司機。

MR JAN KULIS：（經傳譯員）我可以畀啲例子你嘅，譬如話喺我哋德國嗰度係一啲貨運嘅公司，佢哋就會有嗰啲基本嘅參數嘅，譬如話車速、加速、減速，但係除此之外，佢哋都會睇下佢用嗰個腳掣、剎車掣定抑或少用，佢哋亦都會睇嗰個幾時會用嗰個剎車掣，會唔會話佢哋就好放肆咁樣樣嘅揸車嘅方式嘅，所以亦都可以嚟到去睇下佢哋揸成點嘅。

主席：（經傳譯員）換句話講，最基本就睇到個超速、加速、減速嗰個就係基本嘅型號，係咪呀？

MR JAN KULIS：（經傳譯員）係，同埋空轉，即係如果你將個引擎空轉，你都喺度係浪費金錢嘅，呢個係嗰個基本嘅型號嘅。除此之外，就睇下你用嗰個剎車掣有冇係錫住嚟用咁樣樣。

羅先生：（經傳譯員）講到三十秒嗰樣嘢，你就話每三十秒先至傳輸嗰個數據，係咪逐秒咁樣樣將過去嗰三十秒嚟到去傳送或者將每逐秒逐秒將過去嗰九秒嚟到傳輸，定抑或點呢？

MR JAN KULIS：（經傳譯員）係逐秒逐秒。

羅先生：（經傳譯員）換句話講，你逐秒逐秒咁睇到過去嗰三十秒，之前嗰三十秒？

MR JAN KULIS：（經傳譯員）係呀。

陳政龍先生：（經傳譯員）Kulis 先生，我轉去下一個項目，呢個就關乎就係自動咁樣記錄司機嘅行車同埋休息時間。

MR JAN KULIS：（經傳譯員）係。

陳政龍先生：（經傳譯員）我嘅理解就係你哋公司有咁樣嘅硬件同埋軟件，就係讓司機嘅駕駛時間就係自動咁樣數據化咁樣樣係記錄低嘅，啱唔啱呀？

MR JAN KULIS：（經傳譯員）係，講得清楚啲，即係莫札特同埋巴克嘅盒我哋都會記錄到佢嗰個駕駛時間。我哋有歐洲嘅一啲規定嘅，呢個就符合歐洲嘅法律嘅，如果係根據佢嗰個要求嚟到，就可以有咁樣嘅紀錄嘅。

陳政龍先生：（經傳譯員）讓我睇下我嘅理解啱唔啱，你公司所提供嘅就係提供嗰個軟件，讓大家可以記錄司機嘅駕駛時間，呢一個就係根據你哋係用莫札特或者係巴克盒嚟到收集到嘅數據嚟到作一個紀錄，啱唔啱？

MR JAN KULIS：（經傳譯員）係。

陳政龍先生：（經傳譯員）呢個軟件嘅程式係咪叫做 Digi Tacho Download，英文，定抑或唔同呀？

MR JAN KULIS：（經傳譯員）其實我哋有一個軟件嚟到將佢下載嗰個數據嘅，呢個係要喺車嗰度裝咗先得嘅，喺歐洲係好廣泛應用嘅，呢一個係車速記錄儀嚟嘅。我哋就係強制就係要嘅，就避免就係要人手去下載嘅，因為唔需要人手咁去下載咁大個--龐大車隊嘅數據嘅。

陳政龍先生：（經傳譯員）另外仲有一個駕駛時間嘅流動應用程式，係咪一樣呢？

MR JAN KULIS：（經傳譯員）呢一個係較為先進嘅，亦都係同嗰個電子行車紀錄儀就係連繫咗嘅，但係佢嗰個範圍，你可以喺呢度見到，就係睇到佢剩番嘅駕駛時間，因為你會好快知道邊個司機就係要有人替佢，邊個仲可以繼續駕駛等等。

陳政龍先生：（經傳譯員）如果係香港，我哋冇咁樣樣嘅記錄儀，即係冇好似西歐佢哋嗰一種嘅行車記錄儀嘅。香港係咪可以用呢一啲嘅電子記錄儀嚟到去記錄低司機嘅駕駛時間，而佢個做法就係透過呢個莫札特盒同埋呢個係巴克盒呢？

MR JAN KULIS：（經傳譯員）係，一般嚟講係可以嘅，我哋只需要係知道嗰個司機嘅身分同埋嗰個係速度咁樣嘅資訊，我哋好容易就知道佢揸車揸咗幾耐，我哋就可以自己就係進行嗰個量度，即係計算一下佢係揸咗幾耐。

陳政龍先生：（經傳譯員）我想問呢個喺世界上嘅應用有幾廣泛呢？即係講到話係電子咁樣係記錄低司機嘅駕駛時間，呢個係常見定不常見呢？

MR JAN KULIS：（經傳譯員）我只可以講歐洲嗰度，因為佢有法例嘅規定，但係北美嗰方面或者南美嗰方面，就佢哋而家仲喺度考慮緊要唔要呢一樣嘢嘅，我諗亞洲同埋太平洋呢方面都應該係咁，都仲係喺度研究當中。

陳政龍先生：（經傳譯員）唔該。繼續落去，剛才講咗駕駛時間，下一個想同你討論嘅課題就係嗰個你公司所提供嘅嗰個剎車嘅系統，我知道，我哋見過係有兩種，你哋公司嗰個網站話你哋提供嘅兩個系統嘅，一個叫 intarders，另一個叫做綜合剎車控制系統。首先我就想請你解釋一下係咩嘢嚟嘅？另外喺商用嘅巴士，特別喺香港雙層巴士，用唔用得著呢？或者先請你係逐項逐項解釋一下，首先係 intarder，係咩嘢嚟嘅呢？

MR JAN KULIS：（經傳譯員）Intarders 係一個額外嘅剎車系統，呢一個係嗰個波箱嘅系統之一嚟嘅，譬如話我知道香港亦都係有啲巴士係用嘅，呢個係一般都係喺商用車嗰度用嘅一個剎車系統，係一個額外嘅裝置，躉喺嗰個波箱嗰度，將佢有係嗰個剎車嘅能力嘅。

陳政龍先生：（經傳譯員）等我睇下我理解啱唔啱，呢一個裝置就係用嗰個引擎嚟到去將架車拖慢，定抑或我完全搞錯咗？

MR JAN KULIS：（經傳譯員）唔係，嗰個剎車嘅系統係喺波箱嗰度做嘅。

主席：（經傳譯員）換句話講，就係將佢轉落嗰個低波啲，係咪呀？

MR JAN KULIS：（經傳譯員）唔係去低波啲，而係用另一種嘅波箱傳動嚟到進行個剎車，但係嗰個原則係咁樣樣。

陳政龍先生：（經傳譯員）我想問 intarder 係咪可以事後咁樣裝番喺現有嘅車上面，定抑或一定喺製造架車嘅時候已經係造埋呢？

MR JAN KULIS：（經傳譯員）呢個就係自動波嗰度嘅，如果你係用呢種嘅傳動方法嘅話，就可以嘅，如果話你話事後裝番，唔係話部部都可以。

陳政龍先生：（經傳譯員）Intarder 點樣樣去加強嗰個巴士嘅安全駕駛呢？係咪會喺某啲情況之下幫嗰個司機就係更好咁剎車，係咪可以有助安全駕駛呢？

MR JAN KULIS：（經傳譯員）等我睇一睇，畀我幾秒等我係搵番嗰個資料。

主席：（經傳譯員）好，慢慢。

MR JAN KULIS：（經傳譯員）Intarder 最好嘅好處就係話喺高速啲嘅時候，嗰個制動都係大啲，我要查番嗰啲圖，就係話如果你靠 intarder 嚟到去剎車，你就嗰個剎車嘅能力就喺高速嘅時候都係大啲嘅，就算係低速啲都可以，或者我遲啲可以將我哋正式嘅文件同埋嗰啲圖係交畀大家睇嘅。

主席：（經傳譯員）係，好，唔該，有呢啲資料都好有用嘅。

MR JAN KULIS：（經傳譯員）我可以有畀有關嘅電腦檔案你嘅。

主席：（經傳譯員）好，唔該。

陳政龍先生：（經傳譯員）講到 intarder 點樣係運作，你剛才就應承畀一啲資料我哋，關於嗰個司機反饋嘅流動應用程式，你話亦都可以幫呢個司機出番個報告，好似成績表咁嘅，你可唔可以亦都係提供啲資料呢？

MR JAN KULIS：（經傳譯員）我可以將嗰個手冊係交畀你嘅，嗰個係應用程式嘅手冊都可以畀你嘅。

陳政龍先生：（經傳譯員）好，唔該。我同你問過嗰個 intarder，我就想問下另一個系統就係綜合剎車控制系統，首先想問下呢個係咩嘢嚟嘅呢？同埋點樣樣係有助於呢個安全駕駛呢？

MR JAN KULIS：（經傳譯員）呢個綜合剎車系統，我仲未搵到嗰個資料嘅，對唔住，你要畀機會、畀時間我去搵到個資料嘅，因為我嘅專長唔係呢面嘅。

陳政龍先生：（經傳譯員）如果你可以之後就係畀番啲資料我哋，就會好感謝你嘅。

MR JAN KULIS：（經傳譯員）係，不過麻煩你要畀啲時間我嘅。

陳政龍先生：（經傳譯員）冇問題。主席先生，我想問嘅問題係咁多。

主席：（經傳譯員）陳先生，我哋知唔知道香港邊一間嘅專營巴士公司係有 ZF 所提供嘅裝置同埋係邊一種？

陳政龍先生：（經傳譯員）係，Kulis 先生，首先講到嗰個提供畀香港巴士營運商嘅裝置，想麻煩你睇番呢個第 65 頁，我哋嘅文件夾裏面嘅第 65 頁，即係你哋嘅陳述書嘅第 1 頁嘅。

MR JAN KULIS：（經傳譯員）係。

陳政龍先生：（經傳譯員）你或者起碼你公司就喺呢個陳述書嗰度咁樣講，就話你哋公司就係有一個供應合約，就係同呢個九巴同埋龍運係有呢個供應合約嘅，就係供應係黑盒，分別係莫札特盒同埋呢個巴克盒嘅。我想問，兩者都有提供畀九巴同埋龍運定抑或係點呢？定抑或係每一間公司所得到你哋嘅供稱嘅裝置係略有不同呢？

MR JAN KULIS：（經傳譯員）就我所知，其實佢哋都係有呢一啲嘅裝置嘅，但係我唔好肯定，因為基本上我都唔係呢方面知好多。

陳政龍先生：（經傳譯員）你自己會唔會攞到啲資料，就係話有啲咩嘢嘅設備或者裝置就已經提供畀九巴同埋龍運嘅呢？

MR JAN KULIS：（經傳譯員）你話嘅意思即係話我係邊一種嘅硬件？

陳政龍先生：Yes.

MR JAN KULIS：（經傳譯員）就我所知，我哋都係有提供呢一個莫札特同埋同埋巴克盒嘅，就係因為之後嘅就係巴克就係代替咗個莫札特嘅盒嘅。

陳政龍先生：（經傳譯員）我可唔可以再問一問，我哋嘅文件夾就係第 52 頁嘅，喺你嚟講，就係我睇番，就係我哋個委員會寫畀你公司，就係 2018 年 5 月 25 號嘅，裏面有好多嘅附件嘅，我就想特別睇下附件 2，或者你可以睇一睇嗰個屏幕。

MR JAN KULIS：（經傳譯員）係，可以，睇到。

陳政龍先生：（經傳譯員）呢度個屏幕講到就係講到冠忠呢間公司就係營運巴士嘅，你呢度所描述嘅，你知唔知道呢？

主席：（經傳譯員）陳大...

MR JAN KULIS：（經傳譯員）我之前就冇睇過呢一版嘅，但係呢個係肯定就係冠忠巴士就係我哋嘅客戶嚟嘅，佢哋亦都係用緊呢一個嘅遙訊系統嘅--遠程通訊系統。

主席：（經傳譯員）如果我哋就咁睇謄本嘅時候，我哋就唔係好知道發生咩嘢事，不如或者你讀出嚟，好唔好呀，呢一段？

陳政龍先生：（經傳譯員）好呀。呢個就係關於冠忠巴士，呢個係佢哋嘅被提供嘅一啲嘅系統，喺呢個最後一--「我哋就係話有一個度身訂造嘅呢一個嘅應用系統就係代替嗰個黑盒嘅，我哋而家就係有收集好多唔同嘅資料，呢個 Openmatics 就係已經係加入咗我哋嘅巴士到站嘅宣布系統，所以我哋啲嘅乘客就有更多更新嘅資料，我哋就可以係加強我哋嘅安全性同埋減省成本，我哋希望能夠好快就移去呢個 Openmatics 第 2 個平台，我哋嚟緊就會用更多關於 Openmatics 嘅方案，我哋亦都係考慮緊用緊喺我哋嘅車廠嘅管理，用更多嘅車載嘅系統，尤其是當啲嘅車輛離開同埋駛入啲車廠嘅時候。」你可唔可以講一講冠忠嗰度，你係畀咗啲咩嘢系統佢哋呢？

MR JAN KULIS:（經傳譯員）我哋就係應該畀巴克盒佢哋嘅同埋一啲嘅硬件，同埋一啲電線等等，同埋一啲嘅軟件嘅。

許先生：（經傳譯員）證人其實佢係比較負責嗰個技術嗰方面，而喺商業嗰個生意嗰方面，其實佢未必係好能夠畀好多資料，陳大律師就要考慮下究竟應唔應該繼續問。

主席：（經傳譯員）我就唔係好明白嗰個技術同埋生意嗰方面有咩嘢分別，嗰個問題好簡單，就係話你就話你越嚟越--你會將佢係去做呢一個 Openmatics 第 2.0 嘅平台，呢個咩嘢意思呢？

MR JAN KULIS：（經傳譯員）呢個會係新嘅平台，我哋會希望就有一個新嘅方案，

我哋之前個方案係五、六年之前嘅設計㗎喇，嗰啲嘅科技已經係一啲舊嘅科技嚟嘅，所以 2.0 嗰個方案就會有一啲新嘅伺服器嘅方案嚟嘅。

陳政龍先生：（經傳譯員）唔該晒。我睇下我有冇理解正確，如果係講緊硬件，係提供畀香港嘅巴士營運者嘅時候，你就係講緊巴克同埋莫札特盒，就係會收集資料嘅、數據嘅，嗰啲數據之後點樣用，係一個關於軟件，而唔係一個硬件嘅問題，係咪呀？

MR JAN KULIS：（經傳譯員）正確。

陳政龍先生：（經傳譯員）而你嘅公司亦都係有開發某一啲嘅軟件，就可以好好利用，就莫札特同埋巴克個盒所收集嘅數據嘅，係咪呢？

MR JAN KULIS：（經傳譯員）正確嘅。

陳政龍先生：（經傳譯員）你知唔知道你間公司係有冇提供一啲嘅軟件去分析數據，你嘅公司有冇提供嗰啲嘅軟件畀香港巴士公司？如果係，係邊一啲軟件係被提供嘅，你知唔知道？

MR JAN KULIS：（經傳譯員）我相信--就我所知，我哋就冇提供軟件畀九巴嘅，但係我哋就而家就係同冠忠磋商緊就係開發一啲更好嘅方案去做一啲分析嘅，譬如話特別係關於司機嘅行為同埋其他嘅參數，例如話一啲其他嘅--冇話方面。

陳政龍先生：（經傳譯員）多謝，主席，我所問嘅就係咁多。

羅先生：（經傳譯員）呢度就係講 Openmatics 2.0 平台，呢個係一個硬件吖，還是係軟件嘅應用程式呢？

MR JAN KULIS：（經傳譯員）呢一個係軟件嘅應用程式嘅平台嚟嘅，係喺伺服器嗰度嘅。

羅先生：（經傳譯員）所以呢個係一個軟件嘅平台，就會可以係幫你去分析一啲已經收集咗嘅數據，係作唔同用途嘅，係咪？

MR JAN KULIS：（經傳譯員）正確嘅。

主席：（經傳譯員）多謝 Mr Kulis ，多謝你嘅幫助，呢個對我哋嚟講，都有好大嘅教育意義，我哋希望能夠將你啲資料就係好好咁嘅去利用，多謝你接受我哋嘅邀請去協助我哋嘅調查嘅工作嘅。

MR JAN KULIS：（經傳譯員）係，好，好，唔該晒。

許先生：主席，就係 ZF，我哋最後有一個嘅-- ZF，我就特別想係多謝呢個委員會，其實我哋幫手，我哋就會係自發性就會係幫助呢一個嘅委員會，我哋就係致力係能夠係改善香港嘅道路安全嘅，同埋世界嘅道路安全，我哋希望呢一個

Mr Kulis 提供嘅資料就會有幫助，我哋就會繼續同呢一個秘書處緊密合作嘅。

主席：（經傳譯員）好多謝你剛才嘅陳述，多謝你就係承諾會繼續去幫助我哋嘅。Mr Kulis，多謝你嘅協助。我哋而家嘅程序就係完結，多謝晒，多謝。

MR JAN KULIS：（經傳譯員）唔該晒。

2018年7月14日

(9.07 am)

EVIDENCE FROM COMMUNITY FOR ROAD SAFETY REPRESENTATIVES:

MR KWONG TSE HIN, JULIAN AND DR KOU SIO KEI.

CHAIRMAN: Good morning.

This morning, we thank the representatives of the Community for Road Safety for responding to our invitation to assist the Committee with evidence, and I'm going to ask counsel, Ms Wong, to begin asking questions.

Examination by MS WONG

MS MAGGIE WONG: Thank you, Mr Kwong and Dr Kou for coming.

I will be asking questions as counsel on behalf of the Committee in relation to the safety-related measures for franchised bus service. May I start with some introduction about your organisation.

From your submission, if we look at the letter from Mr Kwong dated 28 March 2018 in the MISC-2-bundle, page 754.

This is a letter addressed to you dated 28 March 2018 inviting you to make submissions, and we can see at page 757, in the first paragraph in your reply to the letter you stated that:

"The Community for Road Safety is an organisation dedicated to road safety since 2004."

And your information, the information on the organisation is also set out in the TD-5 bundle at page 1699 to 1670. At the bottom it has set out the information including the background, the names, the posts held by different persons.

Can you confirm those persons listed there are the same as of to date. You may need to go over to the next page as well.

MR JULIAN KWONG: Yes. That is the case. Except that some of the members are not that active. I need to confirm their interest to be members anymore.

MS MAGGIE WONG: Yes. And Mr Kwong, you also provided your curriculum vitae --

CHAIRMAN: Before we get to that, can you give us some background about your committee, how long have you been in existence, how often do you meet? What is your purpose?

MR JULIAN KWONG: Yes. Chairman.

Well, the organisation is actually a small organisation. We are interested in road safety issues, and we want to have a group of people, actually a small group of people, and working together, and giving recommendations to government, and organising activities, for example organising forums, doing some campaigns, and that is it.

We are not a very -- we are not an organisation which are like a charity, or a major organisation, but we can -- we would sit together from time to time and also we communicate through e-mails.

CHAIRMAN: What is your legal status?

MR JULIAN KWONG: Legal status is a society, registered society.

CHAIRMAN: When were you registered first?

MR JULIAN KWONG: 2004.

CHAIRMAN: Thank you.

How often does the committee meet, if there is a pattern?

MR JULIAN KWONG: We do not meet very often, we communicate more through e-mails.

CHAIRMAN: So you circulate papers by e-mail?

MR JULIAN KWONG: Yes.

CHAIRMAN: Do you have a convener?

MR JULIAN KWONG: We don't have a convener as such. Sorry, do you mean a convener for --

CHAIRMAN: Somebody who organises matters?

MR JULIAN KWONG: Usually it is myself organising the matters.

CHAIRMAN: And the composition of the committee, if that's the right word, how is that determined? The range of skills that you bring to focus on the issues, how did

you come about choosing that?

MR JULIAN KWONG: Chairman, well, the composition, we do not specifically select people who would contribute to our ideas, but basically people or friends of our committee members who are interested in this matter, and we welcome them, especially if they come from a diverse background in road and traffic. And therefore, you can see that our members usually consist of professionals, with interest, or a background in road traffic, or injuries.

CHAIRMAN: Can you just help us with a thumb sketch of the range of skills that your members have?

MR JULIAN KWONG: Yes. The skills we have up to date, include civil engineering, traffic engineering, drivers training, trauma surgeon, and also the landscape architect.

CHAIRMAN: That being relevant to road design?

MR JULIAN KWONG: I would say so.

CHAIRMAN: Yes. Now I interrupted counsel who was asking you to help us with your own CV.

Ms Wong.

MS MAGGIE WONG: Yes. If you look at MISC bundle 2, page 820-4, Mr Kwong, you set out your own curriculum vitae setting out your education, membership and road safety training and also the ongoing projects from 2008

until present.

If we could look at your education, it is set out there that you have a civil and environmental engineering degree, and then you also have a number --

CHAIRMAN: That's from the University of Newcastle?

MR JULIAN KWONG: That's true.

CHAIRMAN: When were you awarded that degree?

MR JULIAN KWONG: Chairman, the first degree in civil and environmental engineering was awarded in 1986.

CHAIRMAN: Thank you.

MS MAGGIE WONG: And then you have, a believe is that a master's degree studying fatal road traffic injuries at the Faculty of Medicine, University of Hong Kong.

MR JULIAN KWONG: Yes, that's true. That was awarded in 2004.

MS MAGGIE WONG: 2004. And I can see that you also have a Highways England Approved Certificate of Competency In Road Safety Audit. Can you elaborate what is this road safety audit?

MR JULIAN KWONG: Yes, road safety audit is a procedure initiated in 1988 in the United Kingdom. And now it has become a very well adopted procedure in many countries. The idea is to have an independent audit team looking at the design of road projects. Traditionally the design of road projects will be the responsibility of

authorities and consultants, or designers, but with road safety audit, we conduct independent audit giving recommendations to the project clients, and also to the consultant.

For the Certificate of Competency, that is a certificate enabling me to be able to participate in highways projects for the Trans-European road network. That is projects funded by the EU and also projects in many other countries.

MS MAGGIE WONG: Yes.

CHAIRMAN: What is the process by which you obtained that certificate?

MR JULIAN KWONG: That certificate requires attendance of training, and also the requirement of evidence that I have participated in an adequate number of audits.

CHAIRMAN: So it is a combination of training and experience?

MR JULIAN KWONG: That's true.

CHAIRMAN: Where was the training conducted?

MR JULIAN KWONG: That training was conducted in London.

CHAIRMAN: At what institution?

MR JULIAN KWONG: That was awarded by a training company called TMS Consultancy.

CHAIRMAN: Is that an acronym for something? TMS?

MR JULIAN KWONG: I'm not aware of that. It is just TMS,

and they give that certificate of competency of course with the accreditation of Highways England, and Highways England is the authority responsible for the highway network in the United Kingdom.

CHAIRMAN: Thank you.

Yes, Ms Wong.

MS MAGGIE WONG: We can see at the road safety training, there are four courses or four trainings that you have undertaken. The first is road safety two-week training in France. Was this course undertaken in France or Hong Kong?

MR JULIAN KWONG: That course took place in Paris, France.

MS MAGGIE WONG: When was that?

MR JULIAN KWONG: That was in the year of 2009.

MS MAGGIE WONG: The two-week training, can you briefly tell us what it entails.

MR JULIAN KWONG: That training entailed all aspects of road safety, including policies in the European Union and also in France, that also include most of the subjects of road safety such as the highway safety on major highways, safety in urban areas, traffic calming, but also in road safety audit.

MS MAGGIE WONG: Yes, and the second one is the Advanced Road Safety Engineering. It is a five-day training in UK by TMS. When was that?

MR JULIAN KWONG: That was in 2007.

MS MAGGIE WONG: Is that the course that you have taken for the Certificate of Competency In Road Safety Audit?

MR JULIAN KWONG: The history was that by year 2007 I started attending courses in road safety engineering in order to be able to conduct road safety audit. And after I have attained adequate experience in road safety audit, in 2016 I attended the course to obtain the certificate of competency.

MS MAGGIE WONG: Yes. And the third one is the International Road Assessment Program training for five days. Who organised this programme?

MR JULIAN KWONG: The training was organised by iRAP, that is the International Road Assessment Program, which is a charity based in the United Kingdom, which is now very well known in the area of road safety throughout the world.

MS MAGGIE WONG: Lastly is the Road Safety Audit that you mentioned, training by TMS. When did you have that training?

MR JULIAN KWONG: That was the training in 2016 preceding the award of the Certificate of Competency. That is the same course.

MS MAGGIE WONG: Yes.

Mr Kwong, if you look further down, it set out the

ongoing projects that you are now undertaking.

And one of them relates to review of potential roadside safety hazards in the Hong Kong road network, an investigation by the Highways Department. Can I take you to a document to see what this is about.

This is in bundle TD-5, page 1653.

If we look at (f), it set out -- it is a paper submitted by the Transport Department in May 2018 attached to the Transport Department's letter dated 28 May 2018. This view stated that:

"The TD and Highways Department have commissioned a consultancy study on 'review of potential roadside safety hazards in the Hong Kong road networks investigation' in mid May 2018 to identify roadside safety hazards of all public roads in the Territory in a thorough and systematic approach taking into account the latest overseas technology, through which suitable road safety enhancement measures would be formulated."

And the consultancy brief, and the scope coverage and objective of the study is at attachment VI, which we can find at page1685.

If we look further down, it sets out the objective of this project.

Firstly, Mr Kwong, are you involved in this very project?

MR JULIAN KWONG: Yes. I have been involved since mid-May this year.

MS MAGGIE WONG: What is your role in this project?

MR JULIAN KWONG: My role is road safety team leader under the main consultant.

MS MAGGIE WONG: Under the main consultancy --

MR JULIAN KWONG: Which is AECOM.

CHAIRMAN: Sorry, the main consultancy is?

MR JULIAN KWONG: The main consultant for this project is AECOM.

CHAIRMAN: Thank you.

MS MAGGIE WONG: According to this agreement, if we look at 2.3, one of the tasks to look at is:

"To minimise the risk of the existing roads, TD and [Highways Department] have been jointly conducting road safety check for identifying and rectifying potential roadside safety hazards on existing roads with speed limit 70 [kilometres an hour] or above."

So is the scope of the project limited to roads with a speed limit 70 kilometres per hour or above?

MR JULIAN KWONG: Yes.

Chairman, as regards to this project, due to the terms of my agreement with the main consultant, I am not able to comment on the project in this hearing.

MS MAGGIE WONG: Thank you.

Can you tell us, when is it likely that the review will be completed, or the expected completion date? Is there a fixed completion date for this review?

MR JULIAN KWONG: Chairman, this consultancy, similar to any work I'm doing, has a limited time. But regarding the exact programme, I think I'm not in a position to provide here.

CHAIRMAN: No doubt the Transport Department are, and we will ask them.

MR JULIAN KWONG: Thank you, Chairman.

MS MAGGIE WONG: Now, Mr Kwong, your Community for Road Safety organisation also has a website posting articles that your members have worked on from time to time regarding road safety; is that correct?

MR JULIAN KWONG: Yes. That's true.

MS MAGGIE WONG: Throughout the years, your organisation has written no less than 11 articles, I believe, to the government, setting out your views on various issues relating to road safety.

If I may take you to, just, for example,TD-5, page 1700.

CHAIRMAN: What are we being taken to?

MS MAGGIE WONG: This is a submission by the Transport Department in May 2018, annex 1, submitted in May 2018 annexed to the Transport Department's letter dated

28 May 2018.

It set out --

CHAIRMAN: Where is the letter dated 28 May?

MS MAGGIE WONG: The 28 May letter is in TD-1 bundle.

CHAIRMAN: Perhaps you could just describe the letter. Is the letter a letter to this Committee?

MS MAGGIE WONG: Yes. This is a letter from Transport Department to this committee, and it was a supplementary written submission. And the reference is at TD-1, page 361. The submission followed on from the oral hearings held on 7 and 8 May 2018.

CHAIRMAN: So you are taking us now to an annex to this submission and we find that at which page?

MS MAGGIE WONG: Page 1700.

CHAIRMAN: Of TD-5?

MS MAGGIE WONG: Yes.

CHAIRMAN: Thank you.

MS MAGGIE WONG: And if you look at paragraph 8, it set out -- I believe there is at least 11 submissions or comments that your organisation made to either the LegCo Panel on Transport or the government, voicing our your views or comments in relation to the public transport strategy study or the renewal of licence of KMB and Citybus. If we go over to page 1701 as well, it sets out the subjects and also the reference links in the

LegCo.

Can you confirm that?

MR JULIAN KWONG: Yes.

MS MAGGIE WONG: Now --

CHAIRMAN: If you wish to follow this in paper form, the lever arch box files are behind you.

MR JULIAN KWONG: Okay.

CHAIRMAN: Then you can always look ahead or behind if you need to do that.

MR JULIAN KWONG: Thank you, Chairman.

MS MAGGIE WONG: In all these articles, I think earlier on you have been asked questions about the circulation of papers and the drafting of documents, and you informed us, normally it is by e-mail. I notice in all the submissions it was written relatively close to each other. For example the 2016, if you see on this page, on comments on the fire alarm system, and also in the same year, 14 April 2016, on the public transport strategy study, and also on 16 June 2016 on the renewal of licence for KMB and Citybus.

Now, in all the submissions, how would you circulate, or how would you draft the comments, or how would your members discuss about the issues and come up with the paper submitted to the Administration or the LegCo?

MR JULIAN KWONG: Yes. Usually for these papers, we would circulate to parties which we think are important. For example, we started off by sending the paper to government, to Transport and Housing Bureau, and later we started sending letters to the LegCo. But in terms of circulation, we are not systematic as such, in that we would not usually circulate to too many parties or to the media. It depends on whether the subject has been raised in LegCo or has been raised by government.

For the compilation of these papers usually that is myself. If any other members are interested they are welcome to participate.

In terms of the discussions, sometimes, admittedly, I have not been able to discuss with the other members in time, but say for the recent report, then we have been discussing the paper.

Sometimes the papers are discussed in advance but sometimes I can only afford to send to them afterwards for comments and if there are more comments and we can resolve them, then we can -- the idea is that we can supplement the information to the parties we were sending to.

MS MAGGIE WONG: Thank you.

Mr Kwong, you just mentioned the submission that you have submitted. I'll take you to this document first,

it is MISC-2-bundle, page 782.

This is a report on bus safety submitted by your organisation in April 2018, in reply to the Committee's request.

And your submission is separated into a summary of five points, and if we look at page 783, it sets out five topics: bus operation, safety risks, current efforts and concerns, and comparison with overseas practices, and lastly conclusion and recommendations.

So can you confirm this is a collective project of all the members of your organisation?

MR JULIAN KWONG: I would like to explain it like this. Due to the time constraint to prepare this document, it is actually me drafting the document, and for some particular issues I did consult one or two members.

But after the submission of this report, I circulated this report to all members for comments. In case they wished to make any additional suggestions or if they do not agree with some points, then I would still have a chance to supplement information to the Independent Review Committee.

MS MAGGIE WONG: Yes. Mr Kwong, if I may take you to your paper at page 785, it sets out the recommendation, in the first paragraph:

"The 'safe System' approach should be adopted to

cover the interactions among vehicle factors, road factors, human factors and management."

So you identify four factors as essential to your safe system approach; is that correct?

MR JULIAN KWONG: Yes. That's true. In the document.

I would like to also add that of course the safe system would also cover policies, which in the report I have opted not to put in, for simplicity reasons.

MS MAGGIE WONG: Yes.

If we look at the first factor that you mentioned, it is the operational protocols and operating systems.

You stated:

"The most important measure is the formulation of new operational protocols for safe driving, and this protocol should cover speed, acceleration, deceleration."

And you set out two primary categories. First is the general protocol and the route-specific protocols.

Could you elaborate on what you meant by general protocol, as to what factors you would take into account in considering general protocols.

MR JULIAN KWONG: Yes. Without an insider knowledge of what at the moment the bus companies are doing with their rules for driving, among the drivers, we have been looking at the issues from the safe system approach,

that we think that the driving of bus would need more regulations or control, and I put it as general protocol here meaning that, for example, driving a bus on a busy urban street, what kind of behaviour, what kind of speeds should be adopted.

And also another example is, for example, driving along a highway, I mean what kind of speeds do we expect from the drivers, and that could be different from the legal speed limit. Because as a road engineer, I'm well aware that road designs are very much diversified, and we cannot rely entirely on speed limit or what we call design speeds. On urban streets, for example, there are always a lot of interactions between traffic and pedestrians, and therefore we need far more stringent control on speeds and also on acceleration and deceleration.

And that is what I meant by general protocols, that I'm not talking about a specific street, but any busy urban street.

MS MAGGIE WONG: Yes.

If we look for the moment at page 817, first, in this MISC-2 bundle. Page 817. If you look at the top, it sets out what you consider as the precise criteria to be further developed in considering general operational protocols. You have divided it into four criteria. The

first is the urban areas; second is the high-speed road; third is the narrow, hilly roads; and lastly, the cyclists.

Now on the urban areas, you advocate a certain speed limit for urban streets as 40 kilometres per hour for urban streets in general. Then you advocate for busy urban streets 30 kilometres per hour maximum.

Can you tell us the logic behind this 40 kilometres per hour speed limit that you are advocating?

MR JULIAN KWONG: Yes. Bearing in mind that these criteria are recommendations at the moment, and subject to further investigation, the idea of having lower speed, lower speed than the legal speed limit on urban streets is based on the safety criteria, safety being the conflict between traffic and pedestrian, and also between one vehicle and another vehicle.

On urban streets, the major risks of conflict come from vehicle and pedestrians, and also vehicles at junctions.

Looking at the speeds, we need to take into account many criteria. For example, how quickly can a driver decelerate, that is to stop, in order to avoid an accident? We also need to look at the tolerance of a human being, for example an elderly person; what kind of speed can he still tolerate before sustaining serious

injuries or fatalities?

These are very important considerations when we talk about speeds in an urban area.

And we looked at many overseas reports, and also the trend in many countries throughout the world, that on busy urban street there has been a trend to adopt lower speed limit, and for example 30 kilometres per hour in a dense, urban area.

Some countries adopt 40 kilometres per hour speed limit, some only 30, some both 30 and 40.

We also need to look at the --

CHAIRMAN: Which countries do have in mind?

MR JULIAN KWONG: Yes. Chairman. I would like to explain that in Europe, in European countries, starting from the Netherlands, for urban streets and residential streets, 30 kilometres an hour; in Scandinavian countries, that is also the case. But in Norway, for example, and Denmark, in addition to 30 kilometres per hour they also have 40 kilometres per hour for the more major streets. In Australia it is quite common nowadays to have 40 kilometres per hour, for example throughout the central business district of Sydney.

MS MAGGIE WONG: Mr Kwong --

CHAIRMAN: And the United Kingdom?

MR JULIAN KWONG: Yes, Chairman. In the United Kingdom they

have been adopting the 20 miles per hour. That is equivalent to 32 kilometres per hour. But in the United Kingdom they do not have the equivalent of 40 kilometres per hour. The next step would be 30 miles per hour, equivalent to 48 kilometres per hour speed limit.

CHAIRMAN: And this is the subject of a paper, to which you referred, from the Department for Transport in January 2013, guiding local authorities about the applicability of such protocols?

MR JULIAN KWONG: Yes, Chairman. In 2013, and actually starting from 2011, we have been advocating this idea as recommendations.

CHAIRMAN: Yes, but I'm referring in particular to the UK Department of Transport's paper entitled "Setting Local Speed Limits". That is when it was formulated, and has been adopted in various cities, in particular in London, in multiple areas; am I correct?

MR JULIAN KWONG: Chairman, yes. In the United Kingdom actually the 20 miles per hour speed limit zone has a long history. Longer than 2013. But in 2013 the document which you mentioned entitled "Setting Local Speed Limit", has been updated. That document, as far as I understand, further confirmed the concept of adopting 20 miles per hour speed limit. Thank you.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Mr Kwong, you mentioned earlier on about advocating this speed limit. If I may take you first to one of the articles --

CHAIRMAN: Before we do that. You are describing this as general protocols that are recommended. I'm looking at the top of page 817. Who do you envisage is responsible for recommending such protocols?

MR JULIAN KWONG: Chairman, during the compilation of this document we have not worked out in depth who should be responsible, but our recommendation is that there should be a general operation protocol, and that is not a legal speed limit, and that is a recommendation of having internal control by the bus company, or as imposed by government.

The idea is that changing speed limit takes time, and that requires the legal process, and also change of the way, how speed limits are defined in Hong Kong. But we think that changing the protocols or changing the driving rules within the bus company can be much faster. Thank you.

CHAIRMAN: We have received evidence that after the accident on the Tai Po Road on 10 February of 2018, by 27 April 2018 the speed limit had been changed from 70 kilometres an hour to 50 kilometres an hour. So in some circumstances it doesn't take all that much time.

MR JULIAN KWONG: Chairman, yes, you are right. I read from the news that for that section of Tai Po Road, the speed limit has been reduced.

As regards our proposal to have 30 kilometres per hour, or 40 kilometres per hour, that is the new concept where the speed limit is applied as a zone, what we call the speed limit zone, and that means that speed limit will be applied in a very wide area in the urban areas.

There are two issues here, the first one being that according to the current design manual, actually 30 kilometres per hour speed limit is not encouraged. The second point is that probably the 40 kilometres per hour speed limit is not yet in the Road Traffic Ordinance, so we cannot apply that directly, but for this point I think I need to further verify.

CHAIRMAN: You are referring to the Guidelines on Speed Limits in volume 6 of the Transport Planning And Design Manual, are you not?

MR JULIAN KWONG: Yes.

CHAIRMAN: That's to be found at our bundle at 820-57, just to remind you. You have quoted there from the two clauses that are relevant to what you have just -- I'll just pause.

MR JULIAN KWONG: Chairman, sorry? TD-1?

CHAIRMAN: This is MISC-2 at page 820-57. Perhaps I can

just quote what you have written:

"In Hong Kong, the standard urban speed limit is [50 kilometres per hour]. Guidelines on speed limits is given in volume 6 of the Transport Planning and Design Manual ... published by Transport Department.

Clause 6.4.2.5 of [that manual] states that 'Generally, speed limits lower than 50 [kilometres an hour] are not recommended for public roads as they require a higher level of enforcement to ensure compliance, and it is doubtful that the lower speed limit imposed will contribute significantly to accident prevention'."

Now that last statement is challenged, is it not, by the modern approach to speed limits?

MR JULIAN KWONG: Chairman, yes, that is the case.

CHAIRMAN: What is the date at which this provision was formulated?

MR JULIAN KWONG: Chairman, you mean the TBDM?

CHAIRMAN: Yes, does it have its origins in the United Kingdom Transport Department's papers?

MR JULIAN KWONG: Chairman, yes. The origin is not from the 2013 edition, as you mentioned, the document entitled "Setting Local Speed Limits", but there are some other references which that document refers to.

CHAIRMAN: Where do we find the first formulation of this

proposition? Does this come from 1974, UK transport provisions?

MR JULIAN KWONG: I do not have the exact references here, but broadly speaking, many of the references I would say are outdated.

CHAIRMAN: Yes, thank you. Sorry for the diversion, Ms Wong.

MS MAGGIE WONG: Yes. One of the papers that you explained about this is we can see that at page 820-57.

This is a paper, I believe you presented at the second United Nations Global Road Safety Week on 7 May 2013, advocating safer and attractive streets in Hong Kong with lower speed limits.

And if --

CHAIRMAN: Where do we see the reference to where it was presented?

MS MAGGIE WONG: If you look at page 820-25, it is at the bottom: "Second United Nations Global Road Safety Week".

CHAIRMAN: I see, the numbers are in the top right-hand corner. Yes.

MS MAGGIE WONG: Yes.

If you look at this paper, did you present this paper for the second United Nations Global Road Safety Week, Mr Kwong?

MR JULIAN KWONG: Yes.

MS MAGGIE WONG: If we look at some of the speed limits that you have been advocating, based on zones, that would be 820-35. We can see that you have set out 20 speed limit, 30 and 40. And then divided into different zones, like new development areas, hospital, housing estate, tourist areas, residential districts and villages, it is not exhaustive, but in effect you have divided it based on zones, in determining which speed limit should be applicable; is that right?

MR JULIAN KWONG: The idea of this slide is a vision. Because I was advocating this idea. So it is a vision that what types of urban developments are we talking about, that these speed limit zones would be able to apply. And that doesn't mean that -- that is not the case at the moment.

The speed limit zone, I would like to just briefly explain. Traditionally, to adopt a speed limit we need to put a sign, a traffic sign stating the speed limit for every street. Unless it is 50 kilometres per hour. That is the default speed limit, we don't need to put any sign. So if it is not 50, if it is 30, then it means that we need to put a lot of signs in the urban areas. The idea to have a 30 kilometres per hour zone with the sign which I propose, that also needs to go through the legal process of defining this sign. And if

we have this sign, meaning 30 kilometres per hour speed limit zone, then we will not need to put such sign on every street. We only need to put the sign at the entrance and the exit of the zone. That is very much the practice, for example in the Netherlands, France and the United Kingdom.

MS MAGGIE WONG: So the idea behind it is of course to promote safe driving, and if we can see an example at page 820-36, for 30 kilometre per hour zones you have explained why you promote this, basically it is applicable to crowded streets, one-way streets, and housing estates where people would frequent those areas.

If we look at 40km per hour on the next page, this is on dual carriageway or for primary distributors, where the roads are wider and people less frequently walk on those roads, and when we come to 50 kilometre per hour zone, 820-38, we can see in the fourth paragraph you are advocating -- it is where there are fewer pedestrians, more footbridges and good visibility.

And then, of course, when you advocate this, if we look at the next page, 820-39, the reason you suggest 20 on this page is because all these areas are, first of all, the road condition is quite different, and it is narrower, and a lot of people walking around, with shopping districts, entertainment, village centre and

open market. So these are the areas that you are promoting 20km per hour, is that the logic behind it?

MR JULIAN KWONG: Yes, that's true. The logic of these slides, they have been especially tailored to the situation in Hong Kong. For example, as I mentioned, a 40 kilometre per hour speed limit is not adopted in all the advanced countries, but in Hong Kong, for the specific situations, I think that would be necessary.

I also wish to mention that for the shared surface, with 20 kilometres per hour, streets like this will only account for a small proportion in the urban areas. Usually in the core areas, say, in Causeway Bay, in Central, but the idea is usually most roads will be covered by 30, 40, or 50 kilometre per hour speed limit. Thank you.

MS MAGGIE WONG: Yes.

And your study is also based on some statistics from the Department for Transport in France, if you look at 820-46, it set out the probability of fatality for elderly pedestrians, and you stated you based this on the sources from the UK Department for Transport 2010, and Certu France 2006.

Can you explain a little bit as to this diagram, what it meant?

MR JULIAN KWONG: Yes. By the year 2010 the Department for

Transport for the United Kingdom published a report summarising and reconfirming some of the previous studies on the risk of injuries, fatal injuries and serious injuries for different groups of pedestrians. I used the information from that document.

As for the information from France, I think that is just general, meaning that I would consider one second of reaction time and 7 metres per second squared of braking, deceleration. That is very much adopted in other documents as well.

Basically what this diagram shows is that if an elderly person is impacted by a small passenger car at 30 kilometres per hour, he would have 4 per cent probability of being killed. But if the same person is collided by the same car at 70 kilometres per hour, then he would have 97 per cent probability of being killed.

The idea is that between 30 and 70, or even between 30 and 60, the difference is very big.

And the relevance of reaction time, as I indicated here, is that when a driver sees a pedestrian coming out from a road, he needs at least one second before he starts to apply the brake. At 70 kilometres per hour speed, that one second already means almost 20 metres. So, during that 20 metres of distance, the driver has not even start braking.

So within that 20 metres, if an elderly comes into that position, he would almost certainly be killed.

To briefly summarise, this diagram shows that on the one hand, having lower speed will be less likely to result in fatalities: this is due to the tolerance of human beings.

The second point is that the higher the speed, the longer the time a driver needs to stop the vehicle completely; and also the time to react is very relevant.

MS MAGGIE WONG: Thank you.

Shall we go back to your report in April 2018, page 786, where we have touched upon the general protocol. Now it is about route-specific protocol.

CHAIRMAN: Before you get there, as far as matters generally are concerned, when I asked you who do you say is responsible for recommending protocols, you said that that hadn't been worked out as yet, but it wasn't something that was applicable to the legal speed limit, what you had in mind was that bus companies could do this, or this could be imposed on them by government.

Have I summarised you correctly?

MR JULIAN KWONG: Chairman, yes, that's true.

CHAIRMAN: So how do you envisage that the bus companies would go about -- because that is what we are tasked to recommend -- measures for bus safety, how would the bus

companies go about recommending drivers drive at lower than the legal speed limit in particular areas?

MR JULIAN KWONG: The legal speed limit is the highest speed which a driver should adopt, but they are also required to adopt appropriate speed at any time, appropriate to the road conditions.

The proposal here is that I presume that the bus company can always produce guidelines for the drivers in respect of certain road conditions and what speeds they should adopt, and that can be in the form, say, of a document or in training, but as I said, the exact speed, whether it is 40, or 35, or 45, that also needs more investigation.

Monitoring is a different story. First of all, we need to have the rules. And then next, we can talk about monitoring. Thank you.

CHAIRMAN: So, for example, we have received some information about how certain black spots were identified by one of the bus companies where difficult bends are involved, and they have come up with a formula for the speed that should be adopted by drivers going around those bends. Is that what you have in mind, as a general indicator of how you might do it?

MR JULIAN KWONG: Chairman, yes, for the general protocols, then it is general. But what you just mentioned, that

can be, say, a particular bend, and that would be referred to the route-specific protocols which I stated in the document.

CHAIRMAN: Yes, Ms Wong, you were moving to that.

MS MAGGIE WONG: Yes, I'm moving on to that.

But following on the question from chairman, on this page at the top, you stated that the purpose here is to promote safer driving. That's the second paragraph after the second bullet. The second line:

"The purpose is to promote safer driving conforming to these protocols rather than being a tool to penalise drivers."

So your idea is to invite the operators to conform to these protocols, rather than being a tool to penalise driver; is that the logic behind it?

MR JULIAN KWONG: Yes, that's true. In the compilation of this report we do not want to talk about too much on responsibility or anyone breaching any responsibility, and for drivers, we understand their difficulties. Our whole idea is to promote safe driving, so that everyone is safe, the management would be happy. So I put that point just to emphasise this. Thank you.

MS MAGGIE WONG: Yes. How do you suggest that monitoring can be used to promote confirmation to these protocols or conforming to these protocols, rather than to

penalise? How do you suggest we can achieve that in the monitoring process?

MR JULIAN KWONG: I would like to say that the purpose of monitoring is to identify those drivers constantly breaking the rules, and also to identify those drivers who consistently break the rules in an excessive way.

I would presume that the second group of drivers would be the ones who contribute to the largest risk among all drivers.

So the idea is not to say if a driver breaks the rule just by a small extent, for example if we set the safe speed as 40 kilometres per hour, and then at some point say he went to 42 or 43, that is not the point -- unless that location is particularly dangerous.

We need to identify drivers who consistently break the rules, and also those who break the rules in a very dangerous way and then to timely rectify their behaviour.

That, I think would be the whole idea. Thank you.

MS MAGGIE WONG: How would you suggest to achieve this, by identifying those who consistently break the rules dangerously?

MR JULIAN KWONG: Thank you. Traditionally I presume that there is -- it has been worked by, say, having plain-clothes inspectors to sit on a bus, or sometimes

it depends on complaints, and they send inspectors. But that is not a very efficient way. As technology has advanced, I believe there can be better ways, and monitoring system based on black box, which can be automated, which can be real time, and that would be I think far more efficient. Thank you.

CHAIRMAN: This is technology that has been available for some years, is it not? The mystery riders and reacting to complaints is not unlike the system that first obtained when cars were driven, and a man walked in front of the car with a red flag. It is a very old system, is it not?

MR JULIAN KWONG: Chairman, yes. I agreed that we should now rely far more on advanced technology. For monitoring. Thank you.

CHAIRMAN: Now, in your report you put it this way, that:

"Monitoring will need to be based on advanced, real time and automated black box systems."

Would you like to speak to those three items?

MR JULIAN KWONG: Chairman, thank you. Well, first of all, I would like to declare that I'm not an expert in black box system, or in the advanced technology they are using. But I am purely --

CHAIRMAN: Was your attention drawn to the evidence we received on Saturday from an engineer from a black box

manufacturer, ZF? Have you seen the transcript of that evidence?

MR JULIAN KWONG: Chairman, yes. I have scanned through the transcript.

CHAIRMAN: You have declared your lack of expertise in this matter, but what is it you had in mind, answering these three criteria: advanced, real time, automated?

MR JULIAN KWONG: Yes, Chairman. I have looked at the current status of these black boxes, well, what I meant was that I am not an expert in the technology and also in how the softwares can be developed. But I look at it in a way that what objectives we want to use this black box system, and on the understanding that they can collect a lot of information that would be of the greatest interest for us; namely acceleration, deceleration, tilting angle, speeds, et cetera.

So in this report actually, given the advanced functions of these technologies, we think that they can be adopted, and we also looked at some other operators which have started to use this for management of their traffic fleet.

So in the compilation of this report we think that it is fair to recommend an advanced, real time and automated system.

CHAIRMAN: What is the advantage of real time?

MR JULIAN KWONG: Chairman, some behaviours, which are grossly inappropriate, need to be identified and regulated in a very timely manner. We cannot rely on, say, passengers making complaints, and then having inspectors to investigate, and then only making recommendations, say, after a few weeks.

That is the whole idea why I mentioned about the importance of real time monitoring.

CHAIRMAN: What is the advantage and significance of automated reports of this kind of inappropriate driving?

MR JULIAN KWONG: Chairman, in my opinion, such black box systems are likely to generate an enormous amount of data, and if we solely rely on manual identification, or processes which are not fully automated, I presume that would require a lot of manpower, to the extent that the process is not sustainable. Thank you.

CHAIRMAN: From the information that we received on Saturday, and you have read, this technology is available, is it not, automated reports of inappropriate driving?

MR JULIAN KWONG: Chairman, yes. That's true.

CHAIRMAN: And it is available on the devices that are currently on the buses.

MR JULIAN KWONG: Chairman, from my reading of the document, I presume yes.

CHAIRMAN: So the effect of this would be, if one was to put a threshold trigger, let's take a 50 kilometre an hour speed zone, if one was to put a trigger of 55, that's a 10 per cent over the limit, that would generate an automated real time alert of driver misbehaviour.

MR JULIAN KWONG: Chairman, yes, I read about this.

The question now I would consider is what criteria we should set, what are the thresholds, and then also about what control we are looking to. An alarm, or reminder is one possible control measure, but there could be others.

So the whole process of how we can use this black box, this technology, to the full extent, and also with respect to the risk of crashes and injuries, I think that would be a focus of any future investigation of using the technology. Thank you.

CHAIRMAN: Are you aware of any direction or mandate from the Transport Department to the franchised bus operators as to how they should use this technology to produce real time automated reports?

MR JULIAN KWONG: Chairman, I have not studied in detail with respect to the question you just asked.

CHAIRMAN: Have you seen it in any of the documents that discuss the renewal of franchises?

MR JULIAN KWONG: Chairman, I have not seen anything like

this.

CHAIRMAN: You have made recommendations, have you not? And I think we are going to be coming to them in due course, about what should be included in franchise documents for renewal?

MR JULIAN KWONG: Yes, Chairman. We made recommendations, but those are more or less general recommendations on the directions.

CHAIRMAN: We will see how some of them are actually quite specific and resonate with what we have just been talking about.

Ms Wong, please resume the questioning.

MS MAGGIE WONG: Yes.

We'll come back to that topic, maybe we will finish this area first.

We are coming to the route-specific protocol. In your submission, you make reference to route-specific protocol. at page 786, in the second black bullet it addresses specific safety risk such as sections of the narrow hillside road lacking a safety barrier. And you elaborate this further at page 817. And you identify some examples at page 817, right above section 5.4, that you would like to formulate the route-specific operational protocol to address particular high risk conditions along specific road sections, including long

steep/exceptionally steep gradient road, sharp bends, risk of falling from heights where existing safety barrier is absent, risk of falling from heights on the basis of tested level of existing bridge and narrow road sections with poor visibility, and road sections with elevated risk of conflicts with pedestrians.

Those are the examples you have given. Are these the examples that is -- apart from the general operational protocol, those are more specifically directed at the specific roads or condition of the road concerned?

MR JULIAN KWONG: Yes. This paragraph explains our whole rationale, that compliance with the legal speed limit, although it is globally important, it is grossly inadequate to address the safety of individual sections, and we understand that certain road sections in Hong Kong, for example the historical hilly roads on Hong Kong Island, they are not designed for heavy bus usage, because they were built a very long time ago, and from my understanding, in my profession, I can tell you that for example there is no safety barriers, or the safety barriers are inadequate to stop a bus travelling at, say, 40 or 50 kilometres per hour.

For this reason, we need to pay particular attention to those identified road sections so that the bus

company and the bus drivers are well aware of that, and those sections can be subject to special control, say a speed, for example, 30, 35 kilometres per hour.

Another example is that on a high-speed road, subject to higher speed limit, a public bus can go at 70 kilometres per hour. However, not all high-speed roads have the same safety level. Say, for example, a particular flyover has the safety barriers not reaching the standards for stopping a bus to travel at -- to impact at 70 kilometres per hour. In that situation then we may need to impose on the bus drivers that they should go a bit slower, say, 60 kilometres per hour.

So the whole idea is actually to tie up the speed, and also other behaviour of bus operation, in conjunction with the road conditions based on engineering criteria and also injury criteria.

Thank you.

CHAIRMAN: But approaching this again, this is to impose controls on the bus drivers, although the legal limit permits them to drive at this speed, as you put it, that's grossly inadequate from a safety point of view, again, is this a control that is to be imposed by the bus companies?

MR JULIAN KWONG: I think in the compilation of this report

as I mentioned, I did not specify who is going to impose that, but I presume that both bus companies and the government can work together to formulate these protocols, and for the bus company to implement.

Thank you.

MS MAGGIE WONG: But presumably identifying all these road sections that have those characteristics as you mentioned earlier on, would it not be easier if the government undertake that task? Because I was wondering if you would know, do you know the Transport Department actually keeps a digital map of the entire territory of Hong Kong. Are you aware of that?

MR JULIAN KWONG: Excuse me, you mentioned about Transport Department keeping --

MS MAGGIE WONG: A digital speed limit map for the entire territory in Hong Kong.

MR JULIAN KWONG: I am not sure whether there is a speed limit digital map, but in my opinion -- yes, sorry, in my opinion, the changes of speed limit in Hong Kong are not excessive, and it shouldn't be that difficult, because most of the roads are subject to a 50 kilometre per hour speed limit, and certain roads are subject to different speed limit, and I'm not sure whether they are already on digital maps.

MS MAGGIE WONG: If I may take you to one document. It is

TD-1, page 368.

That's a letter from the Transport Department dated 12 June 2018, in response to questions raised by the Committee requesting for digital maps on statutory speed limits. If you can read from the second paragraph of that letter, it states that:

" ... we enclose a map showing the whole territory of Hong Kong ... and another one with a larger scale showing the Hong Kong Island only with the roads of speed limits at 70km/h or above ...

For your information, the dataset of speed limits under the road networks managed by the Transport Department ... in the Geographical Information System ... format is already available for downloading from data.gov.hk ... of the Hong Kong SAR government. By using GIS software, members of the public, including the bus operators, can import the dataset of speed limits on to the base map dataset of the [Hong Kong] road network, which is available from Lands Department or alternatively online maps such as Google Map or Open Street Map, to prepare the digital speed limit map of roads in HK."

Over the page:

"The [Transport Department] has put forward the use of the above mentioned GIS datasets on speed control by

the method of 'geo fencing' for consideration by the bus operators. It will be followed up in the Working Group on Enhancement of Safety of Franchised Buses."

So what is suggested in this letter is we have actually the utility of a digital map showing the speed limits, and if you can combine the digital map with the geofencing or the GPS system that the bus operators are working, then you can identify which routes may require special attention.

Do I understand that correctly from -- I believe based on your experience?

MR JULIAN KWONG: Okay. I would like to comment like this.

Yes, if such data is already available on digital maps, then it is very useful. Of course that would help a lot for the geofencing concept. But if we start from the basic concept, the idea is that we need to let drivers be aware of which particular sections of roads they need to slow down, or what speeds they should adopt, and even without advanced technologies we can do that already. We just tell them.

But the geofencing, of course, if it is digitised, then it can be tied up with a monitoring system to remind them. But such kind of system would be very useful in the long term, but in order to give immediate attention to the problem, I think we can start from the

simplicity that we formulate locations for the most dangerous sections, and we can already inform the drivers and train the drivers.

Of course in the long term, that can be far more automated with the systems you just mentioned.

CHAIRMAN: That's the whole point of monitoring, is it not? The easier monitoring is made, the more the drivers are disciplined into driving appropriately, particularly if monitoring is real time and automated? And with a digital map with speed limits, and where it is known where the bus is physically, latitude, longitude, it is possible to put in certain thresholds for driving in certain areas?

MR JULIAN KWONG: Chairman, yes. And I presume that would help a lot. But also we need to understand that perhaps drivers are under stress, and the whole idea is to help them, rather than putting a lot of constraints on them, and how we do that in the most rational way, I think we still need to look into the details.

CHAIRMAN: Are you aware of one of the bus operators in Singapore operates a score card for its drivers, deploying these kind of parameters that you have discussed: that is speeding, deceleration, acceleration, as examples, and the driver who drives his bus without exceeding speed, without braking harshly, without

accelerating harshly, scored a good score, he is a green driver. Then you have the other driver who speeds regularly, brakes harshly, throws the passengers around when he accelerates away from the bus stop, and he is a red driver. And in order to help the drivers, you give the green driver a bonus.

It is a pretty simple system, isn't it?

MR JULIAN KWONG: Chairman, I agree. We need to encourage and to reward those drivers who are driving in a safe way. Thank you.

MS MAGGIE WONG: I believe in the UK that has been the system. Have you heard about the system called "Green Road" in UK? Have you heard about that?

MR JULIAN KWONG: Sorry, I have not heard about this.

CHAIRMAN: I think it is a software that was used both in the United Kingdom by Abellio on their franchise in London, and it is the same one used in Singapore, that I was just describing.

MR JULIAN KWONG: I see, thank you.

MS MAGGIE WONG: In short, the Green Road monitors the harsh braking, harsh acceleration, and excessive engine idle time. So the bus operators in England use this system on peer-to-peer assessments, and drivers are given different score cards, as the chairman stated, green, amber and red score cards, based on the number of events

they obtain.

And drivers with amber and red scores receive further guidance and retraining. And the system is able to pinpoint the location of events so drivers can learn the hot spots, and this system is also used to reward drivers in the form of financial bonus for good driving scores.

So it is used as a way not only to penalise drivers, but also a national measure to measure who are the top drivers being awarded elite status who are then entered into local or national Driver of The Year competition.

So the way they go about it, instead of penalising them, they give them carrots, to reward them, to give them incentive to drive better and more safely.

Have you heard about this system using score cards to reward drivers rather than to penalise them?

MR JULIAN KWONG: Thank you. I have not heard about this, but it seems that this or similar system would be the way to go, provided that it is not too complicated, and sustainable. Thank you.

MS MAGGIE WONG: And we have gone through these protocols, and now may we go to the bus design as set out on page 786 of MISC-2 bundle.

You mentioned a number of safety features that you recommend as priority, and you set out six of them.

One of them is the safer bus front; second, safety seat belts; and using more protective pads; corrugated walls on stair ways in the bus interior; speedometer; improvement on driver's vision; and features to alert pedestrians staying away from a moving bus.

Can I ask something about this improvement to driver's vision, about improved mirrors and CCTV cameras. How do you suggest, or what equipment would you suggest in terms of improvement to driver's vision?

MR JULIAN KWONG: Yes. Large vehicles usually have a lot of problems for vision. For heavy vehicles, heavy goods vehicles, that is a big problem. For the buses we are using today, I presume that they are better, because there is a large window.

Nowadays, I presume many buses or most buses would have a CCTV camera monitoring the rear for reversing safety. But still, occasionally, we have severe pedestrian fatality cases. Apparently the bus driver failed to see a pedestrian crossing, just in front, or just on the side of the bus.

Now there are more CCTV cameras installed on buses, as far as I understand, but I notice that the CCTV monitor displays are positioned on the top above the bus driver, and I'm not too sure whether that location is the best for bus drivers to observe what is happening at

the blind spots. I'm not going to say that it is not going to work satisfactorily, but I'm just suggesting that we should look at the CCTV cameras, the location of the monitor display, whether they really address all the blind spot problems.

But on the other hand, I learned from the Transport for London website that they are also looking at the visibility problems for bus drivers.

I just want to give you an example. For goods vehicles, there is big problems, because drivers cannot see a pedestrian directly in front of the vehicles due to blind spots, and traditionally drivers will rely on the side mirrors, so they need to look at the side before starting the vehicles. But that is not a very natural way of look and driving. And drivers may fail to look at the side mirrors.

The current move in some countries led by London in the United Kingdom is to encourage vehicle manufacturers to make the vehicle far more friendly for the drivers to see what is happening in the front, and also on the side, and they called it a direct vision initiative. And they are already driving changes.

For the buses, as I mentioned, they can be better, because compared to a heavy goods vehicle, the bus drivers usually sit at the lower position.

But gathering the information I collected, as I mentioned, I think there is still room to improve the direct vision for drivers. Thank you.

CHAIRMAN: Of a bus?

MR JULIAN KWONG: Sorry, for bus. For bus drivers.

CHAIRMAN: One of the problems with lorry drivers is the problem looking through the door, as it were, to see the cyclist right next to where the driver is; is that not one of the problems?

MR JULIAN KWONG: Chairman, yes. Yes, to see the cyclist, and also to see someone walking just in front of the vehicle.

CHAIRMAN: And it was the inability to change that requirement on vehicles that led Boris Johnson to determine that "If the EU could not allow me to put windows into truck doors, then I should be leaving the EU"; was it not?

MR JULIAN KWONG: Chairman, I'm not able to comment on this, thank you.

MS MAGGIE WONG: I think you gave us an example by one of your articles, I think it is dated 17 March 2018, "Road Safety at the [heart] of Workability". It is at page 820-78.

This is the first page of the article. If we go to page 820-82, this is an illustration of the "Direct

Vision" initiative that you talked about earlier on. Can you explain a little bit. What is meant by "off-road HGV" and "Direct Vision HGV"?

MR JULIAN KWONG: Yes. Gathering from the information from the source I quoted here, heavy goods vehicles actually are designed for highways, for running on the highways. Meaning that there are few pedestrians, so the vehicles will travel without stopping a lot. I gather that is what is meant by "off-road". But in reality, in many parts of the world, including Hong Kong, we have such heavy vehicles running on virtually every street, including the very crowded residential streets, and central business districts, and that is where the problem comes in.

MS MAGGIE WONG: Yes. If we go back to your report earlier on page 786 where you mentioned all the six factors, one of them relates to features, the last one:

"Features to alert pedestrians staying away from a moving bus."

What features are we talking about?

MR JULIAN KWONG: Here in the report I did not specify the features, but in some countries, for example quoting the Transport for London, they are looking at new features including alarms or flashing lights.

MS MAGGIE WONG: So where would the alarm and flashing

lights be placed?

MR JULIAN KWONG: I have not studied this in details, but I presume that they can be placed, say, around the blind spot areas of the bus, for example just on the side of the bus in the front, where pedestrians can be obscured by the vehicle body of the bus.

CHAIRMAN: Would this be a sensor that sounds an alarm when the pedestrian is picked up as being close to the vehicle?

MR JULIAN KWONG: Chairman, I think that is a possibility, but I presume that those features can be activated even without an accompanying sensor, so, say, as long as the bus is turning. So that needs investigation.

Thank you.

MS MAGGIE WONG: You mention also on this page about safety belts. Can I take to you page 805, where you elaborate on safety belts, in the section where you stated that:

"seat belts are generally available at limited number ... of exposed seats."

And you have calculated 14 exposed seats in a double-decker bus. The bus driver, upper deck front seats, lower deck front seat facing the corridor on both upper and lower deck, and you stated that seat belts are deemed useful subject to detailed evaluation.

Are you aware that actually the new design of the

buses nowadays, so far as the upper deck front seats are concerned, the new buses have already installed seat belts, the upper deck.

CHAIRMAN: At the front?

MS MAGGIE WONG: The front seats, upper deck front seats.

MR JULIAN KWONG: Upper deck front seats. Yes.

As mentioned in the report, I'm well aware that those seats on the upper deck front are already equipped with seat belts.

MS MAGGIE WONG: One of the matters that was discussed with the Transport Department was in relation to this topic. If we can go to TD-5, page 1688.

CHAIRMAN: What are we going to?

MS MAGGIE WONG: It is a document, annex 2 document prepared by the Transport Department in response to the Committee's enquiries, following the oral hearing.

The title of the paper is "Application of New Technologies in Franchised Bus Operation".

CHAIRMAN: Is this paper 8?

MS MAGGIE WONG: That's annex 2. That's an additional supplementary submission.

If we scroll it down, it mentioned something about -- 1693, I think.

Can we go back to 1691, paragraph 12. It is stated that:

"At the [Working Group] meeting held on 13 March ... the TD proposed and all FB operators agreed to install seat belts on all seats for new buses, whilst the feasibility of retrofitting seat belts on all seats on the existing buses is to be ... explored in the technical sub-working group."

So it appears from the discussion that there will be new seat belts installed on all seats for new buses in future. Are you aware of this?

MR JULIAN KWONG: I read from the documents of the previous hearings about this. So I'm aware of that.

CHAIRMAN: I think the overall context, it may be you have read this as well, would help. The Transport Department convened a working group to examine the application of what they called new technology, whether or not that's the right description, in March of 2018. And this was the subject of a paper -- I think I'm right in remembering paper 8; is that right?

MS MAGGIE WONG: Yes, that's paper 8.

CHAIRMAN: Where a whole range of different aspects of technology, but not black boxes or tachomatic devices was considered. And it is this group that has been meeting with bus operators, bus manufacturers, Transport Department, in the last three months, considering at this stage how these devices might be used. Are you

aware of that?

MR JULIAN KWONG: Chairman, I'm aware of that committee, but I'm not aware of the detailed discussions.

CHAIRMAN: That's the context I wanted you to understand. So now seat belts.

MS MAGGIE WONG: If we may go to that paper, TD paper 8, that's in the TD-1 bundle page 94.

It is a paper by TD, Transport Department, setting out the feasibility and desirability of certain features for franchised buses, and at the bottom it states it set up a working group on bus safety following the Tai Po Road bus accident.

Over the page, 95:

"... the TD set up a working group ... with representatives from all FB companies and bus manufacturers in mid March 2018 to review the technical feasibility and desirability of installing some new safety devices ..."

And one of them is in relation to installation of seat belts for all passenger seats, that's at paragraph 5, from paragraph 5 to paragraph 9.

During the hearing, we heard some evidence that some bus operators commented that even if you install seat belts, most of the passengers are unwilling to put on their seat belts. How would you propose to assist the

public to understand this, and use it?

MR JULIAN KWONG: Yes, I understand that even with existing buses equipped with seat belts the usage is very, very low. That is a difficult question. We need to do it in a number of ways. I think requirement by law is certainly one possibility. And another one is that we need publicity. And the contents of the publicity would be really important. Because we are not just trying to impose something on the passengers. We need to explain to them and have them understand, have them understand the importance of having the seat belts fastened, not only to protect themselves, but say in case for those seats where there are passengers facing them, that if they are thrown forward they would injure other people, and even in a rollover, if they do not wear seat belts, they can also injure other people.

So how to translate this technical knowledge to public understanding, I think that is a real challenge, thank you.

CHAIRMAN: That was the formula adopted with seat belts in motor cars, was it not? To start with, it was voluntary, and nobody used them, and then eventually it was made compulsory, and everyone uses them now.

MR JULIAN KWONG: Chairman, yes, I agree. But I think we also need to look at the model of public light buses.

It is compulsory by law to have the seat belt fastened, but today I can see that the compliance rate by passengers is not very high. We certainly need far better ways, I think, to convince and also to require passengers to wear seat belts.

But how to do that, I'm not able to give very definite answer, thank you.

CHAIRMAN: It is illegal to park a vehicle on double yellow lines, but we know from walking around the streets of Hong Kong, that enforcement is the problem.

MR JULIAN KWONG: Yes, Chairman. Enforcement is an issue, but I'm also sympathetic with those charged with the responsibility for enforcement. Because in terms of road safety, every day, everywhere, there is so much violations in one way or another, including seat belts, and it is very difficult to have enforcement conducted all the time. Thank you.

CHAIRMAN: Perhaps some of the time would be beneficial.

MR JULIAN KWONG: Chairman, yes, I agree.

MS MAGGIE WONG: In this paper, it also mentioned other safety devices that have been touched upon in your paper, including, if we look at page 98 of TD-1, the use of technology on the safety devices of franchised buses. It mentioned electronic stability control and roll stability control, which is also mentioned in your paper

at page 818, called the electronic stability programme.

Do you know --

CHAIRMAN: Before you move on, if you are moving to devices, in your piece on bus design, you mentioned at 786, in fact it is the first matter that you address, it is a safer bus front, and you give details of it.

What is it that is unsafe at the moment about the front of a bus, or relatively unsafe?

MR JULIAN KWONG: Yes, Chairman, the upper deck of a bus, at the front, there is very limited space, what we call the concept of crumple zone. Safety belts on the upper deck front seats are beneficial for certain types of incidents, for example a bus braking abruptly, or a bus colliding with a safety barrier, colliding with a small passenger car. But considering that the double-decker bus collides with a container vehicle in the front, or colliding with a bridge pier, then the upper deck front passengers, even if they are restrained by seat belts, they will suffer severe injuries.

And in this respect, maybe I also invite Dr Kou to supplement the information.

CHAIRMAN: Yes, Dr Kou.

DR KOU SIO KEI: Mr Chairman. So in an unrestrained or restrained passenger, if the occupant compartment collapses, say for example in the upper front part of

the bus, it is the interior posterior type of compression that causes serious injuries to the occupant in the chest, which we have all the major organs inside, and also the abdomen and the pelvis, and we know that by this type of compression injuries, especially in the chest and pelvis, it would result in very severe and even fatal internal bleeding.

That's the reason why Mr Kwong noted that the upper front seats of a double-decker bus, the occupants sitting over there, whether they are restrained or unrestrained, they are at a higher risk. Thank you.

CHAIRMAN: It is right, is it not, from the photographs that I have seen and perhaps you have seen, that the front of the bus in the Tai Po Road accident on 10 February, that was severely damaged, was it not, the upper front of the bus?

If you have not seen the photographs, by all means say so.

MR JULIAN KWONG: Chairman. I have seen the photographs.

For that --

CHAIRMAN: Perhaps that's a different cause of damage.

MR JULIAN KWONG: I'm not always sure of the exact mechanism of that incident. When the bus rolls over, or topples, whether the buses topple directly onto the bus shelter, and it is the bus shelter structure intruding into the

bus body that contributes to the high number of fatalities.

And that could be a reason, but I'm not always sure, until there's adequate evidence. As I mentioned in the report, we need to understand injury patterns and mechanisms. Because, say, if we are trying to introduce a particular measure, including seat belt, we need to understand that they can be very helpful for certain kinds of crash and injury mechanisms, but they may be not very useful for certain mechanisms. So that is the precise directions we are advocating, that we need to understand crashes and injuries in a much better way. Thank you.

CHAIRMAN: Thank you.

MS MAGGIE WONG: And on this topic, Mr Kwong, and Dr Kou, may I refer you to your April 2018 paper at page 805, at the bottom. The topic on compartmentalisation, and also the rollover test to UNECE Regulation No. 66 at the bottom.

It referred to a:

"... widely accepted regulation requiring bus superstructures to have sufficient strength to maintain a defined volume of residual space integrity during and after a rollover test with the objective to promote passengers' survival."

Can you elaborate on this? Are you suggesting it is in fact a regulation requiring a bus manufacturer or operator to have a specific material used to ensure there is sufficient space/integrity? Maybe you can elaborate on that.

MR JULIAN KWONG: Okay. While admitting that I'm not an expert in vehicle design, I did try to study a number of documents related to bus superstructure design, and I came to understand that the rollover test to UNECE regulation No. 66, that is required for single-decker buses. The idea is that when a bus rolls over, it is very important that the superstructures does not deform excessively, otherwise the passengers inside will be compressed, and there is a real risk that they come into contact with the road because they are compressed during the rollover.

So they require that the superstructure remains more or less intact. But I also came to understand that this test applies to single-decker buses. There was a proposal in 2009 by an expert to the UNECE that double-decker buses should also be included.

I'm not sure whether the regulations have been updated, and I'm not sure whether double-decker buses have indeed been tested for rollover.

But I would like to add a point, that my

understanding is that this rollover test is a simple rollover test, that means the bus toppling onto one side, without toppling onto objects like a bus shelter, a wall, a safety barrier, and railing, et cetera.

And secondly, the main emphasis is that the objective is to maintain the residual space integrity, passengers are subject to injuries in a number of ways when a bus rolls over. And this test will help a lot. But that is not the entire story. It cannot prevent all kinds of injuries.

In this sense maybe I would also like to see if Dr Kou has something to supplement.

DR KOU SIO KEI: In the case of a toppled double-decker, we need two things. One is that the superstructures remained intact, as Mr Kwong has mentioned. The second thing is we try to prevent the occupants inside the compartment to move excessively, either out of the window of the vehicle, or onto the other passengers inside the same compartment. Because if we know that if a person becomes unconscious but is still breathing, but then if there are two people of similar size on top of him or her, then he or she would very likely suffer from suffocation as a result of that external pressure by others.

That would be some of the points of consideration in

cases of a toppling bus.

MS MAGGIE WONG: If we go back to the TD paper, TD-1, page 98, we were onto the electronic stability control and roll stability control system which is also mentioned in your paper at 786 as the electronic stability programme. Do you know much about this programme?

MR JULIAN KWONG: Again, I would like to say I am not an expert in vehicle design, but having read about the electronic stability control and the rationale, and also seeing that it is actually a mature technology, I consider in the report that it is something we would recommend, at least to be investigated in detail.

MS MAGGIE WONG: Yes, in fact the Transport Department has advocated this. If we look at page 100 in bundle TD-1, still in the same bundle, but in paragraph 15, same paper. If we look at paragraph 15 it stated:

"One of the bus manufacturers have advised that their new and existing buses have already been equipped with the [electronic stability control system]. As such, about 2.8 per cent of the [franchise buses] ... in Hong Kong procured from this manufacturer have been installed with the ESC."

That is the electronic stability control:

"The bus manufacturer further advised that one of

the functions ... [is to use] electronic-controlled suspension for rollover protection ...

Based on the bus manufacturers' advice, their [electronic stability control] could already assist the vehicle back to track before the rollover situation begins. However, the bus manufacturers pointed out that even with the installation, a bus can still lose control due to inappropriate driving behaviour, eg aggressive driving. The bus would roll over if it is being driven off-road and the body angle is too high ... To improve bus safety, all FB operators agree to incorporate the requirement of installing ESC system ... for procurement of new buses."

That's the electronic stability programme. Do you know whether it has been widely used in UK, and in France, and in the programmes that you have undertaken?

MR JULIAN KWONG: I do not have information regarding the current extent of usage and for applications to public buses.

MS MAGGIE WONG: Yes. The other thing that you mentioned in your paper is the autonomous emergency braking system. That is in your paper at page 786. Can you elaborate on what this is.

MR JULIAN KWONG: For this paragraph, I mentioned that these features should be explored. Autonomous emergency

braking system, as I understand, of course it is an intelligent system. When a vehicle detects that a collision is imminent, for example colliding with a pedestrian or colliding with a vehicle in front, then the system will be automatically activated to stop or to slow down the vehicles.

And I recommended this for a number of reasons. Rear-front collision is one of the most serious concerns. A bus rolling over, or falling down a cliff, of course that is a major concern, but rear-front collisions are more common, and that often happen on highways, often resulting in a lot of injuries, and the upper deck front passengers usually suffer severe injuries. Another one is pedestrian collision.

So on the understanding that some bus companies are already introducing such systems, whether definitely or as trials, I thought that that would be a good feature to be explored. Thank you.

MS MAGGIE WONG: And if we go back to the TD paper, page 102, that's TD-1, page 102, on speed display unit --

CHAIRMAN: Before we move on, what was the result of the consideration by the working group on adopting advanced technology as far as this is concerned?

MS MAGGIE WONG: I believe they have not touched on this

subject. Can I go back to ...

CHAIRMAN: Is this addressed under the heading "Collision prevention" at page 103 of TD-1? There are two matters being dealt with there, one is keeping lanes, but the other seems to be dealing with what Mr Kwong has been calling front to tail of a collision.

So one is keeping you in a lane, and the other is avoiding a collision with a vehicle in front because you are too close, or the vehicle has stopped and you have not, and also with pedestrians.

MS MAGGIE WONG: Yes, that's correct. That's page 103 to 104.

If we look at page 103 at the bottom, the last three lines, paragraph 24:

"When the bus gets too close to the vehicle in front, a signal (audible and/or visual) will alert the driver. Some systems offer collision warning with the brake support. If the driver does not react after the collision warning, the brake support function will activate the braking system to react quickly and hence the brakes will be applied. In the event of an imminent crash and the driver has not applied the brakes, some of the new systems that are available in the market would apply heavy braking automatically to help reduce the impact of the crash."

Then it sets out a photo show activation of the collision prevention system. The Transport Department is also mentioning the three bus manufacturers' reaction to this. It is at paragraph 26:

"All the three bus manufacturers advise that there are in-built or third-party lane keeping systems ... However, they have reservation in the installation of such device on the [franchise buses] as the traffic in Hong Kong is heavy and frequent lane changing is required ..."

CHAIRMAN: Isn't this dealing with a separate topic?

MS MAGGIE WONG: Yes.

CHAIRMAN: One is avoiding front-tail collision and the other is lane keeping. Is there any response to avoiding collisions?

MS MAGGIE WONG: I think it is at the last line:

"In sum, the FB operators do not consider that the installation of collision prevention and lane keeping devices are effective for enhancing the safe operation of FB services."

CHAIRMAN: Thank you.

MS MAGGIE WONG: So the FB operators, that's the franchised bus operators, seem to take a different view as to the efficiency of this prevention collision system. That's why I would like your experience in this. Because in

your paper you did raise this as one of the devices that you consider of some use.

How would you respond to this?

MR JULIAN KWONG: Of course, the introduction of any new systems would need to be thoroughly discussed with the bus operators, and also to have the feedback from bus drivers.

It can create problems if we have too many systems causing distractions and difficulty of usage or any unwanted effects.

However, I recommend the study of collision prevention system, that is the autonomous braking system, is based on the prevalence of rear-front collisions, and the implications, and also that a number of operators overseas have introduced the system or are seriously having trials of the system. What I'm not sure from this paragraph is the rationale that the FB operators do not consider them effective.

Whether the discussion is just they do not want it, or they have some good justification of not doing that, or whether they are willing to at least conduct some trials, so I cannot comment on this due to the lack of information. Thank you.

CHAIRMAN: Well, to help you, it is my memory that we received some information from Citybus that they had

conducted a trial of such a system, and they had found it distracting, too many alarms going off, and so on. But perhaps that could be found after we take a break, and you can be taken to what that evidence was so that you can see what the rationalisation was.

If I could ask you to look that up, Ms Wong.

MS MAGGIE WONG: Yes.

CHAIRMAN: It is my memory it came in the oral evidence of Citybus. I know one of these devices is called Mobileye, but there may have been another device that was used by Citybus.

MS MAGGIE WONG: Yes.

CHAIRMAN: We are going to take a break of 20 minutes, and then we will resume with your evidence. Thank you.

(11.17 am)

(A short break)

(11.41 am)

MS MAGGIE WONG: Before the break, we were discussing about a number of issues. In response to the chairman's question about the evidence of one of the bus operators, Citybus, of this collision or lane keeping device, can we go to transcript bundle TSCP-1, at Day 4 of the oral session at page 49.

It should be TSCP-2 bundle, at pages 49 to 51.

The question by Mr Duncan, that's the counsel,

leading counsel for the Committee, at line 19. Mr Chung is representing the Citybus in relation to technological device, and he asked Mr Chung:

" ... if I could then ask to you look at paragraph 26 [which is the paragraph we have looked at]. It records the fact that 'the ... bus operators do not consider that the installation of collision prevention and lane-keeping devices are effective for enhancing the safe operation of franchised bus services', and I believe this for the reasons that you can see earlier in paragraph 26. Is that the case?

MR WILLIAM CHUNG: Correct.

MR DUNCAN: So do I understand correctly then that as far as the company is concerned, it is not proposing to pursue that possible device any further?

MR WILLIAM CHUNG: Let me first of all explain. Such a device, in the year 2014, our company did carry out a test of such devices. This is called Mobileye. Mobileye is a driving assisting device. At that time, it was mainly applied to private cars. What was involved was that they would use the visual aid to detect what is in front and then the system will carry out an analysis and then calculations would be made as to the distance between the subject vehicle and the preceding one and the following one, and then come up

with an idea about the time of collision, then warning signals would be sent to the driver.

At the time we fitted this Mobileye on three of our buses, we carried out a trial scheme for four months. We made arrangements for representatives of different trade unions, that is bus captain representatives, as well as 50-plus bus captains to drive such buses, that is three of them, in their normal service, and after that they were asked to fill out a questionnaire for us, telling us what they think about this device called Mobileye.

So the findings were such that some of the alerts were not quite suitable for use on buses. Say, for example, when the bus pulls up at a bus bay, since it is detected that there are people in front of the bus, as you know there are passengers waiting at the bus stop, so when people are detected then there will be an audio signal. Well, in fact the driver hasn't yet straightened the bus and so a signal would also be sent.

Moreover, when the bus is stopped too close to the preceding bus, this will be a signal to be sent out in the case of when the traffic is slow. As a result, it means that the warning signals are emitted many times during a journey. 46 per cent of the bus captains told us in the questionnaire that there were too many warning

signals and it was causing a nuisance to their driving, and as a result they ignored the signals, and then 50 per cent of the drivers told us that the Mobileye didn't help in their safe driving.

So having considered the functions of this Mobileye and having taken into account the views of our bus captains, moreover there is a high cost involved in the installation, we as a result decided against following up on the idea.

So that's our experience. We shared our experience at the meeting."

So that's the transcript.

And if I may also take you to the report, that it is mentioned in the evidence. That is in CTB-3. Page 601.

That's the first page, that's the Mobileye trial result.

At page 603 it referred to the time when this trial was carried out: Background, second paragraph you can see it was carried out in 2014, and if you look down at paragraph 2, the second paragraph, Mobileye trial:

It was split into two phases, and the second paragraph:

"Questionnaires were sent to 13 union representatives and 54 bus captains who had driven the test buses to collect their feedbacks ..."

And then if we go to page 609, it is setting out the conclusion and recommendation. Paragraph 5:

"Bus captain's acceptance.

50 per cent of bus captains opined that the Mobileye was not helpful for driving safety and 44 per cent of bus captains opined that the alerts of the Mobileye caused usance to driving. The suitability and usefulness of the Mobileye is questionable. Hence it is not recommended to go ahead with the Mobileye."

Lastly, in the recent paper submitted by the Transport Department in May 2018 for completeness, that's at TD-5, page 1691 at paragraphs 12 to 13, you can see at paragraph 12, the fifth line from the bottom of paragraph 12 it mentioned:

"... the collision prevention lane keeping device ... were tabled for discussion at the [working group]. It was agreed at the [working group] meeting that the feasibility and applicability of the ... on-bus devices would be further deliberated in the technical sub-working group."

And paragraph 13, I believe right in the middle. It stated that:

"... no final decisions have been made on the proposals of the new technology. It is expected that a report on the recommended safety-enhancement measures

and facilities to be installed on buses will be released in June/July 2018."

So for completeness, no final decision has been made, but only Citybus has done a trial result, based on the 54 bus captains' experience.

Given the information in front of you, would you like to comment on the information, because in your report you recommended this autonomous braking system, emergency braking system, would you like to make further comments on this area?

CHAIRMAN: I think to be fair to Mr Kwong he recommended that it be tested, not that you gave a blank cheque that it was recommended to be used.

MR JULIAN KWONG: Chairman, yes. We have recommended that it is explored, and everything is subject to evidence and practicality.

CHAIRMAN: Am I right in remembering, Ms Wong, that Mobileye or Mobicon is in use with other bus companies elsewhere in the world? Is it not in use in London?

MS MAGGIE WONG: Yes, it was an equipment used I believe in England, in a study, and that is why it was proposed to be used in Hong Kong.

CHAIRMAN: But has it not been used more recently in London, subject to this 2014 test?

MS MAGGIE WONG: Yes. In a recent report. We will find out

the relevant references for you in due course.

May I move on to another --

CHAIRMAN: One reason it may not be useful in Hong Kong is bus drivers drive centimetres away from the bus in front of them, particularly when they are slow moving, and no doubt that does cause irritating alarms, but presumably one can set a distance setting for the alarm going off, and if you are driving so close that a pedestrian can't even walk in front of the bus as the bus is stationary, it is not surprising there are lots of alarms.

MR JULIAN KWONG: Chairman, yes. I think we need to understand more about the threshold and criteria, and also this equipment will be advancing all the time, the technology, so I recognise that Citybus has done a very good trial, and they did a survey afterwards, and I have no comment on that, but the main reason we are recommending that such systems are explored is based on a need, the need being that we have rear-front collisions which are really serious, and then we also have the risk of collisions with pedestrians, and such systems, if they are matured enough, may be a very good measure to mitigate our problems.

But, of course, everything will be subject to trials, and also we need to prove that it really works. Thank you.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Thank you. And before we move away from this TD paper, may I ask a few questions about some of the proposals suggested by the Transport Department.

One of them is the speed display unit, at page 102 of TD-1. That's the paper 8 in relation to the new technology. At paragraph 21, the last line, it mentioned that the existing speed display unit installed on a public light bus may resemble the installation of the proposed device on a franchised bus is shown in figure 6. And then if we go over the page at paragraph 22, it sets out the response of the franchised bus operators, near the end of paragraph 22:

"In addition, the FB operators are concerned that SDU would create conflicts and arguments between the bus captain and passengers, and impose additional pressure on the bus captains which in turn would affect the safety for bus driving. The FB operators consider that the SDU is not conducive in enhancing bus safety."

We all know that the speed display unit has been installed in public light buses, but what would you say about the response made by franchised bus operators as to the efficiency of this unit in terms of enhancing bus safety?

MR JULIAN KWONG: Thank you. I understand the standpoint,

but from our point of view it would be whether such installation would be really helpful to road safety. That would be our major concern.

May I just point out that in our report submission we did mention about the term "speedometer", but in our submission, we were talking about speedometer in digital display for the driver, as opposed to the current analogue display for the drivers.

That is important because we need to first make sure that drivers are aware of what speeds they are using. Sometimes they may not be deliberately exceeding the speed excessively. But current display, it seems that drivers would find it difficult to read the analogue display, because of the position, and also it is not digital. So that was our recommendation that there needs to be a fairly prominent digital display for the driver at the right position.

But then coming to the second point about speedometer installation for passengers. After we came to know about this proposal, I also had some thoughts.

For passengers to make complaint or to tell the drivers, I'm not too sure whether that will be an effective way. But one possible use of such speedometer display is to enhance inspectors. To quickly gather information where, whether bus drivers have been grossly

violating speed limit, or the pre-defined protocols for speeds at different location or in general.

And that could be a possible benefit. But as I mentioned, relying on passengers to make complaints, from my experience, I'm not too sure whether that would be really effective, given the cost of installation.

So that needs to be -- I think it would be better always to study it in more details, maybe to have some trials. Thank you.

CHAIRMAN: When you say passengers' complaints are not too useful. Do you have in mind passengers complaining to the bus on the stop to the bus captain?

MR JULIAN KWONG: You mean according to my experience?

CHAIRMAN: No, when you say you don't think it would be too useful to enable passengers to complain, do you have in mind that the passengers might complain to the bus captain in real time on the spot?

MR JULIAN KWONG: Yes, Chairman. I would like to say that I would not make a conclusion now, but it is not easy to decide on that, because we have to look at the behaviour, and also to look at how it works in reality. Because most passengers I presume they do not care -- as long as the bus is not going as crazy speeds. They may not be aware that, say, for example, I mentioned that on busy urban street, going at 45 or 50 kilometres per hour

is already dangerous. Passengers may be more interested in getting to their destination in time, and they may not be so sensitive to small variations in speed.

Of course if the bus driver is going at a grossly excessive speed, then that is a problem. That may help passengers talking to the bus drivers, and to stop his behaviour in time.

But that is also going to be difficult, because in that situation the driver would already know very well that he is going at much faster speed than his company, or the legal speed limit would permit: and the passenger talking to him directly whilst he is driving, that could be seen as an aggression.

So these issues could be complicated. So to conclude, I would like to say that if we concentrate on this usage of the speedometers, I am not yet sure whether that is going to contribute a lot to bus safety, but we can always investigate this issue in more detail, thank you.

CHAIRMAN: The Transport Department has a complaint telephone number, does it not?

MR JULIAN KWONG: Chairman, yes. I think --

CHAIRMAN: Have you examined the mechanism for this complaints? How one makes the complaints?

MR JULIAN KWONG: Chairman, as far as I understand, there

are a number of channels.

CHAIRMAN: There is a form, isn't there?

MR JULIAN KWONG: There is a form and you can --

CHAIRMAN: Does that form have a box that says "bus excessive speed"?

MR JULIAN KWONG: Chairman, I'm not aware of that.

CHAIRMAN: I have looked at it, and I can't find it. But perhaps you might consider this scenario: if a passenger was concerned about the speed at which a bus was being driven -- and the manner, because speed by itself is not necessarily dangerous, is it?

MR JULIAN KWONG: Can you repeat?

CHAIRMAN: Speed by itself is not necessarily dangerous.

MR JULIAN KWONG: Yes, it is not only speed, it is the degree of conflict, and in what context.

CHAIRMAN: Yes. Well, since there is a complaint mechanism, would it not assist if the passenger on the bus would have his suspicions confirmed that the bus was actually going, say, 65 kilometres an hour and not 50 in a 50 zone, and all the passenger has to do is use the iPhone that he is already using for other purposes, to take a photograph, and then he e-mails the photograph to the transport complaint unit, and then you have a photograph of the speed, and perhaps also where the bus was.

MR JULIAN KWONG: Chairman, that is a very good idea, and in

that case I think there needs to be some thought on how we position that speedometer display, considering, for example, you take the picture, and together you take the picture of the road ahead, so that there can be a proof of where the bus is, and maybe the display also has the number of the bus, the registration plate, and also that that is positioned at a location where the bus drivers will not be able to see that the bus passenger is taking the photograph, to avoid any direct conflicts between the driver and the passenger.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Mr Kwong, if I may take you to the last proposed device proposed by the Transport Department. It is the driver monitoring device at TD-1, page 105. Paragraph 27.

This was a device that was said to monitor driving performance and alert the driver if it detects a lack of attention or drowsiness, and if we jump a line:

"When the system detect potential unsafe behaviours, such as 'looking aside', 'dozing', 'drowsiness' or 'bad posture', the system will give visual warning and voice alert to the driver."

We go over the page:

"All three bus manufacturers have advised that these systems are third-party system and standalone ... It is

technically feasible to monitor the bus captain's status but will also pose unnecessary nuisance to the bus captain when there is a false alarm. Two FB operators advise that they would install a similar system in four of their buses for a trial of 3 months tentatively starting from early May 2018. The TD, in collaboration with the FB operators concerned, will assess the effectiveness of the system upon completion of the trial."

First, Mr Kwong, have you heard about this driver monitoring device system before?

MR JULIAN KWONG: I am aware of such systems, but I have not gone into the details of such system. Fatigued driving, or inattention certainly is a possible factor for road crashes.

But again, whether such systems would be beneficial, then we need to look at whether such problems mentioned, back posture, inattention, et cetera -- really account for large proportions of our crashes for buses.

So I am open to that, but I cannot give too detailed comments at this stage, thank you.

CHAIRMAN: Is fatigue an issue, a risk, in Hong Kong franchised bus drivers? How do you assess that?

MR JULIAN KWONG: Chairman, I presume that fatigue will be related to the number of hours of driving, rest hours,

but it would also depend on individuals. For one reason or the other, that he is tired. On this topic, in our report we have not devoted a lot of writing on that, because I have not studied this issue. Although in some other parts where I have been working, for long distance driving we need to care a lot about the possibility of fatigue driving. In Hong Kong I think we need to look at that. Because any system we are trying to introduce, that should be tied up with the real crashes we are facing, and also the risks we are facing. So I can only say this for the moment. Thank you.

CHAIRMAN: Are you aware of any attempt to study the risk factor of fatigue driving, in questionnaires? Any surveys? The examination of accidents? Are you aware of anything like that? Empirical data.

MR JULIAN KWONG: You mean in Hong Kong?

CHAIRMAN: Yes.

MR JULIAN KWONG: Chairman, I'm not aware of that.

MS MAGGIE WONG: Prior to the break, Mr Kwong, we are discussing about the structural strengths of the upper deck front of the buses, and the potential hazards to passengers sitting at the front of the vehicle, upper deck of the vehicle.

And I would like to show you a photo of the Tai Po accident which touched on this. May we pull up the

photo. We can see a photo of the incident showing, I think the upper deck, the front portion has been completely damaged. And does this help you to explain your statement about having safer bus fronts as set out in paragraph 5.5 of your April report?

MR JULIAN KWONG: Looking at this picture, I would consider that to be a composite collision. There are many possibilities of crash scenarios. The simple one would be the bus colliding directly with an object, with a tall object like a container truck in the front, colliding with a bridge pier, colliding with a lighting column, colliding with a projected canopy of a building. But for this one it is probably a composite collision. Maybe the bus has collided with the bus shelter, which is high enough to damage the upper deck structure. Maybe it has also collided with a lighting column, but at the same time the bus also rolls over.

As I mentioned earlier, the bus could have rolled over directly onto the bus shelter, and in this process the bus shelter also contributed to the destruction of the bus front and also the side of the bus, or even directly intruded into the bus compartment, directly injuring the passengers inside.

But without further evidence, this is just speculation.

CHAIRMAN: We don't need to speculate. Others can tell us the result of their examinations.

MR JULIAN KWONG: Chairman, yes, hopefully. We consider that understanding crash mechanisms and also injury mechanisms is really important for the formulation of evidence-based strategies and measures. Thank you.

MS MAGGIE WONG: Yes. Mr Kwong, the Committee has made further enquiries after your submission in relation to some of the articles published on your website, because we are on this topic about transport data.

If we look at page 820-1, and if we scroll down, paragraph 8.

It is stated that in your web page there is a section called the "Traffic Speed Data". And you explained that you agreed to publish this on the Committee's website, but due to resources you state this task is intermittent and not systematic at the moment:

"We are doing it ourselves and in partnership with interested parties. Tonight, (11 July ...) we are meeting some interested group of young people to conduct new surveys."

And you have done, I believe, a few selected locations. TST, Sham Shui Po, Route Twisk, and then over the page, Lyttleton Road, and Tai Hang Road, and you stated that:

"In support of the Fourth United Nations Global Road Safety Week with the theme 'Save Lives Slow Down' in May 2017, CRS collaborated with a district councillor and a professional producer to produce a short movie to raise awareness. The target road site is Tai Hang Road. Below is a captured photo of the video. The speed of some vehicles was even well beyond 80km/h at night."

May I first of all ask, Mr Kwong, this is obviously a study you have done on your own initiative in collaboration with other interested parties, yes?

MR JULIAN KWONG: For this Tai Hang Road, yes, we are happy to collaborate with any parties interested in the topic. We make it non-profitable, politically we are neutral. So we just need people to collaborate because we are trying to bring the message out to increase the awareness within the society. And conducting speed limit is very time consuming, it is manual work. So that is why we have not been doing that systematically as we would like.

MS MAGGIE WONG: Yes. What equipment -- we have seen a photo here. Is that a laser gun that you use by your partners in detecting the speed limit of certain vehicles?

MR JULIAN KWONG: That's true, it is a laser gun with the model name Tru Speed, so that is a speed gun which I own

myself.

CHAIRMAN: Who is the manufacturer?

MR JULIAN KWONG: The manufacturer, as I understand, is Laser Technology.

CHAIRMAN: Is this a device that is used by law enforcement organisations either here or elsewhere?

MR JULIAN KWONG: Chairman, as I understand, that is correct, but it also depends on the model.

CHAIRMAN: Is it used in Hong Kong?

MR JULIAN KWONG: Chairman, yes.

CHAIRMAN: What is the model that you were using?

MR JULIAN KWONG: This model, as I mentioned, that would be the Tru Speed model. The exact number I cannot remember, but I understand that this model has been used by the police as well. There are some newer models which they are using.

CHAIRMAN: How old is this model?

MR JULIAN KWONG: Chairman, this model, I purchased probably in the year of 2011.

CHAIRMAN: In this or in any other survey, have you deliberately sought to monitor the speed of franchised buses?

MR JULIAN KWONG: Chairman, we have not conducted speed surveys specifically for franchised buses, although this is ideal, because if we look at bus safety, then I would

really want to look at the speed of buses specifically. But I did conduct some casual speed check for buses from time to time.

CHAIRMAN: Did you choose particular locations to do this at?

MR JULIAN KWONG: Chairman, one location that I would like to quote is that some years ago, I went to Des Voeux Road Central, I looked at the -- because I wished to look at the speed of buses going from the direction from east to west, to see exactly what type of speeds they are using. And this section of Des Voeux Road Central is where many pedestrians cross the road without a pedestrian crossing. And the purpose of my doing this exercise was to see what speed a bus driver will use if they are trying to overtake a bus stopping at the bus stop.

The reason I am interested in this is that the stopped bus will obscure any pedestrian trying to cross in front. If the bus is going at excessive speed it is not going to be able to stop in time, and I compared some guidelines, for example, from Canada, there is a recommendation or a rule saying that if the bus, the transit bus has to overtake a stopped bus or a stopped vehicle, then it should not go beyond the speed of 30 kilometres per hour.

And that was a very casual exercise for me, but then at that time the highest speed I noted was 49 kilometres per hour. But admittedly, I did not check too many buses. I only check five or six buses.

Recently I also did some speed check, because a newspaper reporter invited me to do a filming, an interview on Des Voeux Road Central. So again, I used the speed gun to have a casual check of the buses going buy, and on that occasion many buses will go in the range of 30 to 35 kilometres per hour. That is the buses going freely, they are not obstructed by anything.

One bus, the highest speed I recorded was 42 kilometres per hour.

The rationale of my doing this is not to prove that buses are going at excessive speed. Another main purpose is to see what speeds the sensible drivers will be using.

So from my point of view, 30 to 35 kilometres per hour is sensible. Thank you.

MS MAGGIE WONG: Mr Kwong, thank you for sharing this with us.

About this radar gun, have you maintained it from time to time when you use it, or is it in good maintenance?

MR JULIAN KWONG: Yes. That is in good maintenance. I have

to do calibration from time to time. From my understanding, laser guns -- I mean this one is a laser gun as opposed to a radar gun, normally it does not require calibration all the time, but for accuracy purpose I need to do two tests. If I pass these two tests then normally there shouldn't be any particular problems.

I would usually do these tests from time to time. Thank you.

CHAIRMAN: What is the margin of error of this device, according to the manufacturers?

MR JULIAN KWONG: Chairman, I do not have the exact figures, but my understanding is that laser guns are very accurate. That means the error would be well within the need as far as our purpose is concerned.

CHAIRMAN: Can you put a figure on that?

MR JULIAN KWONG: I would presume that would be 1 to 2 per cent, at most 3 per cent.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Apart from the locations that you have identified in the document at pages 820-1 and 820-2 of MISC-2 bundle, have you in collaboration with the other interested parties considered exploring other locations as well?

MR JULIAN KWONG: I would like to give you an example.

We were referred to by a social worker in Tsuen Wan, that residents were concerned about the safety of a zebra crossing near their village. They considered the traffic speed too high. And at that time I have some free time, so I agreed that we collaborated to do a speed survey at Route Twisk in Tsuen Wan, around the zebra crossing.

The way it worked is I trained the villagers up to use the speed gun correctly, and then they conducted the surveys by themselves.

In the end, for that exercise, they conducted the survey for 800 vehicles.

Normally, at any single location in order to produce a speed distribution graph we need at least 100 vehicles.

MS MAGGIE WONG: Do you have a report of that Route Twisk data, the speed data report?

MR JULIAN KWONG: Yes. That report, I think I have supplied to you. I would like to declare that because of some difficulties of transforming the report from simplified Chinese to traditional Chinese font, and the report I replied to you is in simplified font, but that is still the one I handed into them. Thank you.

MS MAGGIE WONG: Thank you.

If I may go back to your report, and continue with

the third area, which is the road design. That's also at page 786 of this bundle, MISC-2 bundle, the road design.

And you suggested also a number of suggestions, six in total, about the road design and traffic management that are crucial for bus safety. The first is adequate safety barriers; second is the elimination of sloping end terminals or similar features at high risk sites; third is the widening of blind bends on certain old roads; fourth, reduce speed limit in urban areas; fifth, safe crossing facilities; and lastly, better protection of waiting passengers at bus stops on major busy roads.

Can we go to safety barrier first. I think you elaborated on that at page 808. In this section you referred to this as important to contain an errant vehicle from colliding with roadside hazardous objects falling off the slope.

And you use the Tuen Mun bus crash report in 2003, and you make reference to a parapet. And I'm going to refer you to that Tuen Mun report. If we may go to bundle SEC-1, page 1 is the first page, and then if we go to paragraph 16 and 17 at page 10 to 11: if we look first at paragraph 15, it states that:

"Parapets are protective devices designed to reduce the severity of an accident. They provide a passive

line of defence and are not the cause or a contributory factor of an accident.

16. After examining local and international standards, the panel considers that the existing parapet design ... adopted by the Highways Department ... are generally in line with the international practices."

Then if you jump a few lines:

"However, there is room for enhancement at critical locations where penetration of the vehicular parapet may result in catastrophic consequences. The panel advocates a total safety management approach ..."

And if we go to paragraph 17, it mentioned something about:

"... a strong parapet designed to a high containment level may stop a heavy vehicle in the desired manner, but may cause considerable damage to a small vehicle ..."

And then if we jump a few lines:

"For enhancement of parapet design in the long term, the panel recommends that the [Highways Department] expand the range of containment levels, in particular at the high end, and review the parapet height ... The panel also recommends that [Highways Department] continue to monitor the development of multiple containment parapet overseas ..."

If we go to page 109, at paragraph 9.38 it sets out the figures mentioned there for a double-decker bus, the simulation result for a double-decker bus for a speed of 60 kilometres an hour, the angle of impact is 10 degrees.

I believe you stated these figures in your report at page 808, MISC-2 bundle. In this section at paragraph 3 you stated that:

"Some viaducts are not yet equipped with L3 safety barrier. According to the Tuen Mun Road report ... the earlier generation of 'P2' has been verified by simulation to contain a bus at 60km/h at 10 degrees. The significance of such knowledge is to set route-specific operational protocols for bus operation. As an example, where P2 parapets are used, the speed of buses will be limited to 60km/h and travel on the left lane. This will ensure that an errant bus will not exceed the performance of the parapet."

Can you explain this. So if a bus is driving at 70 kilometres per hour, does it mean this parapet is not going to work?

MR JULIAN KWONG: Okay. Thank you. Chairman, first of all I would like to declare that I myself, as put forward right in the beginning of this session, I am involved in this project at the moment for government. But what I'm

going to say, actually relates to what I have been raising all the time since probably at least 10 years ago. So I'm not going to touch on anything related to the project I'm working on. But anything I'm going to quote, I have the knowledge independent of the project I'm working on.

So to answer your question, the idea here is to set protocols or rules for bus driving, we need to understand the capacity of our road design, for example in relation to the capacity of the safety barriers. For this particular case, it is just an example, if the bus is going at 70 kilometres per hour, at the same impact angle, that I think according to the report would be 20 degrees. The report said that it has been tested, but only by computer simulation, at 60 kilometres per hour and 20 degrees. So I would like to see that there is an increased risk that the bus will overcome the barrier.

But of course we need to understand that these tests are often based on a particular speed, particular angle of collision, and also a particular weight of the bus. It depends on the number of passengers inside.

So it means that in the case I quoted, it is not certain that there could be a chance of the bus overcoming the parapet.

I believe that if there is more information about different parapets, and safety barriers on different roads, that would provide a very good indication and good data for the government or the bus operators to formulate better route-specific protocols for their drivers. Thank you.

MS MAGGIE WONG: And on page 808 you identify eight roads where there are no safety barriers at all. That's Repulse Bay Road, Tai Tam Road, Peak Road, Stubbs Road, Pokfulam Road, Tai Po Road, Clear Water Bay Road, Keung Shan Road.

Of course I'm not going to the consultancy brief report, but have these matters been raised by you with the Transport Department before the consultancy brief, or is this the first time you raised this, in this report?

MR JULIAN KWONG: Chairman, these issues and what is stated in this report have been raised for a number of years, and also compilation of this report was prior to my involvement in the consultancy study you just mentioned.

CHAIRMAN: With whom did you raise these concerns?

MR JULIAN KWONG: Chairman, usually we would raise the concern to relevant government departments, such as Highways Department, Transport Department. I have forgotten whether I did raise it, say, to the Bureau.

CHAIRMAN: What response, if any, did you get? We are looking at a road with what looks like a stone wall on a steep slope. What response did you get when you said, "Why isn't there a safety barrier here?"

MR JULIAN KWONG: Chairman, I have forgotten the exact reply I got, but I presume that they understood, and I can remember that there was an interest in that, and that they have done something about that, but then of course the problem is very extensive. And I have to keep on repeating the same message to these departments.

So it is an ongoing issue. My only interest is whether something has been improved. So I do not know exactly what is going on inside government, but I only make the comments out of what I see at the site.

CHAIRMAN: And that's why it is ongoing? Because you see the same thing, year after year?

MR JULIAN KWONG: Chairman, yes. That's true.

But of course there may have been local improvements for some particular sites, but this is one site, the pictures show one site which I would consider to be highly risky. Thank you.

MS MAGGIE WONG: May I just show one specific example of the Tai Po Road section where -- as we have stated earlier, the Tai Po accident happened in February and the Transport Department was able to reduce the speed limit,

make changes to the road traffic signs, and on the road markings within two months.

And if I can show you the Tai Po District Council paper, in TD-1, page 354.

CHAIRMAN: What's the date of this report?

MS MAGGIE WONG: The date of this report is 9 April 2018.

CHAIRMAN: This is the Transport Department paper provided to the Tai Po District Council for their meeting?

MS MAGGIE WONG: Yes, for their meeting.

And we can see this paper, first of all, set out the review of the speed limit, and then right in the middle, they suggested at the subject road section the traffic signs and road markings are set along the road to remind motorists to take heed of road condition by adding warning traffic signs, reduce speed now, bend to right ahead, and some chevrons showing the deviation of route to right.

If we go over the page, 360-2 at paragraph 4(c). It referred to this section of the road -- the current speed limit is 70km per hour, and stated there are developments, et cetera, and if we go over the page, they recommend that the speed limit be lowered to 50km per hour, and then if we go down this page, there are other improvement measures over the page, suggesting about certain improvements, and if we look at some of

the photos concerning some of these measures that have been implemented, as of to date, we see photo 13, we see the first "ahead" sign, photo 14, we see another "ahead" sign, photo 15, speed limit changed to 50km per hour, and then the marking on the road. And then photo 16, the first "Reduce speed now" sign, and then photo 17, the second speed sign, and then we can also see nine chevrons. And then photo 18, showing the location of the chevrons.

So the point that I would like to ask you is, if the Transport Department wants to do something, they can, because within two months they were able to achieve this.

What is your view about all these improvements given your study on this Tai Po Road that you mentioned? Do you think all these measures are enough, or sufficient, or have you explored this?

CHAIRMAN: As I understand it, Mr Kwong, you are working on this particular section of road; am I right?

MR JULIAN KWONG: Chairman, the project, the consultancy study I'm working on, that covers roads in Hong Kong, so I'm not working on these particular improvement works, and I have not studied it in detail.

CHAIRMAN: So you don't have any problem in answering whatever the question was?

MR JULIAN KWONG: Chairman, no problem.

CHAIRMAN: Perhaps you would reformulate the question.

MS MAGGIE WONG: Mr Kwong, we have heard some complaints -- not really complaints, but some of the other concerns expressed by the Tai Po District Council last Saturday, commenting that there are certain improvements that could be done for the latter part of this road section, and if we can pull up the map, if we can see that this road, the brown, or the brown/orange colour section is the section where the speed limit has been reduced from 70km per hour to 50km per hour, and one of the matters they raised in this section is they said that when you change the speed limit from 70 to 50km per hour, around the location of number 15 to 17, you are in effect going slightly uphill -- sorry, it is from 13 to 14, you are in effect still going 70km per hour. So if you change the limit at that point of 15, that is reduced to 50km per hour, in effect it is difficult.

Some of the comments made are because you are going uphill and you obviously have to increase your gear to go uphill, and then when you immediately go down your bus may not be able to immediately shift or reduce the speed to 50km per hour.

CHAIRMAN: Perhaps we could see a photograph of where the new speed limit sign is.

MS MAGGIE WONG: Yes. Maybe we can pull out 15.

CHAIRMAN: Perhaps we could go back to show the photograph before, so one is coming up an incline towards the crest of the hill, and then at the crest that is the view looking down towards what is the downhill, and then the bend where the chevrons are -- and the complaint was?

MS MAGGIE WONG: The complaint was that if your speed is maintained at 70km per hour and then you change to 50km per hour, your vehicle would still be travelling at a speed that is higher than 50km per hour.

So one of the suggestions they made is whether you can pull it -- like, I think, if I understand correctly, is pull it a little bit down before you move up the hill, so that you could reduce the speed before you reach the top of the incline.

I think that's one of the suggestions made by the Tai Po District Council.

I wonder if you have any views on this.

MR JULIAN KWONG: Chairman, largely speaking it is a bit difficult for me to give solid comments on these kinds of improvement schemes. But I would to say that one important concept of highway design is to make the road as self-explaining as possible, so that we can keep the number of signs and markings to a minimum.

The reason is that the excessive use of warning

signs can defeat the whole purpose of the signing system. But whether the signs here would be excessive, I'm not going to give comment.

CHAIRMAN: Perhaps we can have a look at them again. We have two warning signs before you get to the crest of the hill. Can we see that.

So ahead there is a 50 kilometres zone; ahead there is a 50 kilometres zone, and then we get to the crest of the hill, and we are now downhill. What is the problem about braking in those circumstances?

MR JULIAN KWONG: Chairman, I think from 70 to 50 is not a big problem for braking, but whether drivers -- our main interest would be whether drivers will really conform to the speed limit. They need a solid reason. If they can see the danger by themselves they are far more willing to slow down their vehicles.

For these types of roads, personally I would consider that perhaps a good compromise would be to have a speed limit of 60 kilometres per hour. However, we also have the thought that we do not wish to complicate the signing system too much, and that is one reason why I think the best choice which can be 60 kilometres per hour has not been adopted in Hong Kong.

And I have a bit diverged from the discussions, but my main emphasis would be that we want to keep drivers

willing to drive at a speed which is safe. And speed limit of course is a tool which has legal status. We need to monitor the speed of the drivers, and to verify if the comments, say, from the district council, are valid.

What we are going to do, for example, is to conduct speed surveys of the vehicles to see if they truly conform to the speed limit signs. Because we want to help the drivers. We are not trying to impose something which they cannot easily comply with. Thank you.

CHAIRMAN: So what you are saying, perhaps, is demonstrated by the photos we have just seen. If you want the drivers to understand why there has been a change in speed limit, and by changing the speed limit after you have gone over the top of the hill, it shows you why there is a change in speed limit, because ahead of you is an array of chevrons and a bend, down an increased gradient. Isn't that consistent with accommodating the driver's understanding of why there has been a change?

MR JULIAN KWONG: Chairman, your observation, I think, is correct. Basically the whole idea is that any signs or any speed limit, they should appear to the driver to be consistent with an imminent hazard or change of road conditions. Thank you.

CHAIRMAN: Ms Wong.

MS MAGGIE WONG: Another suggestion the Tai Po District Council made is adding speed bumps or adding speed humps on the road beneath. Because they considered that by doing that you would have palpable sensation that you would have to slow down, more effective than a road sign or road markings. What would you say to that?

MR JULIAN KWONG: Okay, Chairman. Speed humps come in all kinds of shapes, and some are more aggressive, and some are more gentle, but usually the adoption of speed humps on a highway has to be very carefully validated.

The main concern is that if drivers are going too fast and they are not aware of the presence of the speed hump, then they may brake abruptly or lose control. Usually speed humps have to be introduced in conjunction with speed reduction measures on the approach. And as I mentioned earlier, drivers have to see a reason why they have to slow down. Usually, according to my experience, for using speed humps on main highways, we have to especially create a zone of speed reduction prior to introducing the speed hump so that drivers' speeds would have slowed down, most of the drivers will have slowed down to not more than 50 kilometres per hour and ideally 40 kilometres per hour. Thank you.

MS MAGGIE WONG: Yes, and another topic I would like to explore with you is ISO 39001, the Road Traffic Safety

Management System referred to in your report, at the top of page 786.

In the third paragraph you stated that:

"It is highly recommended that ISO 39001 'Road Traffic Safety Management System' will be made a requirement for franchised bus operators."

First, this ISO 39001, can you tell us whether it is widely used throughout the world?

MR JULIAN KWONG: Chairman, okay. Let me explain this. The ISO 39001 was introduced in 2012. At this moment, about 500 enterprises have adopted the ISO. Not every country. Certain countries are more enthusiastic, for example the United Kingdom, Sweden, Japan, et cetera.

So this is the fact at the moment.

In Hong Kong, as far as I understand, there have been no certification. We would recommend that this ISO is explored, because at the moment nobody has been using it, but the interesting point of this ISO is that it has been developed by top experts, and the World Bank and the World Health Organisation are supporting it, and it is based on the safe system approach.

I would like to emphasise that this ISO standard is not a technical standard. I would say that it is a high-level framework, encouraging high-level management to work towards no serious injuries and

fatalities in road safety, as far as they can control or influence. And so that is very visionary.

The standard does not specify a particular technical system, it doesn't specify the particular monitoring system or how to achieve that exactly. So the standard itself is not adequate. It also needs to be complimented with technical systems. And that is quite agreeable.

Of course this standard is new to Hong Kong, and compared to other ISO standards worldwide, the number of certified enterprises is admittedly not as numerous. But looking at the standard, and the way it is shaped, and I have the standard here, I would like to say that the important point of this standard is its more visionary and progressive approach, encouraging the enterprises to proactively be engaged in reducing risk and reducing road accidents to the end of having no serious injuries and fatalities as the long-term aim. Thank you.

CHAIRMAN: Can you just help us with this. You say that it has been adopted by about 500 enterprises.

MR JULIAN KWONG: Yes.

CHAIRMAN: Are we to understand the adoption has been done by companies in various countries as opposed to the regulatory authority requiring it to be adopted?

MR JULIAN KWONG: Chairman, in that case, I would like to quote from the ISO standard. My understanding is that it is targeted at any enterprises or companies which have to deal with road transport, whether that is a public transport operator, a logistics company, or any company having a vehicle fleet, a taxi company, a public light bus company.

But from my understanding, in the text, in reading the text of this document, that can also apply to regulatory authorities. But I am not too sure that at this moment whether in reality throughout the world, whether regulating authorities or similar have adopted this standard.

CHAIRMAN: Are you aware of any bus companies in United Kingdom, Sweden or Japan, the countries you mentioned, that have adopted this standard?

MR JULIAN KWONG: Chairman, I'm not aware of a particular name or company, but from some of the information I gathered, that in Japan, probably there are a few companies, but not a lot, engaged in public transport. But I think that needs to be validated. Thank you.

CHAIRMAN: Thank you.

MS MAGGIE WONG: We see from some of the documentation that KMB has been adopting an ISO standard 9001. If I may just refer you to a document. KMB-3, page 676. It is

a 2011 annual report.

If we look at the left column, 1999, the section on 1999:

"KMB became the first public bus company in Hong Kong to receive ISO 9001:1994 certification on a corporate-wide basis for its quality management systems. In fact, KMB is the fourth organisation in Hong Kong to achieve such corporate-wide certification."

Can you tell us what is the difference between this ISO 9001 standard and the 39001?

MR JULIAN KWONG: Thank you. Chairman, while I'm not an expert in management systems, my understanding is that the ISO 39001 has been specifically written to address road traffic safety in the perspective of the safe system approach, which is being advocated by the World Health Organisation, by United Nations, and by a number of advanced countries, very serious with road safety. So this standard is specifically written to address road traffic safety as far as the organisation or enterprises can control or can influence. Thank you.

MS MAGGIE WONG: Mr Kwong, I'm going to another topic. It is about your submissions made in relation to the renewal of the licence, or your comments made in relation to the renewal of the licence --

CHAIRMAN: By "the licence" you mean the franchise?

MS MAGGIE WONG: The franchise, and on the new franchise for bus network for Kowloon Motor Bus, it is your submission on 16 June 2016 at SEC-2, page 777.

Now, Mr Kwong, that's a document in Chinese and I believe the whole report was written in English.

May I read just the first paragraph to explain --

CHAIRMAN: So this begins at 775?

MS MAGGIE WONG: Yes.

CHAIRMAN: Where the purpose is stated to be to provide insight to further improve the performance of Citybus Ltd and New Lantao Bus under the new franchises, and reference is made to the consultation document.

MS MAGGIE WONG: Yes.

CHAIRMAN: What is the date of this document?

MS MAGGIE WONG: The date is 16 June 2016.

CHAIRMAN: Thank you.

MS MAGGIE WONG: In your first paragraph you reacted to a public consultation, and submitted a document commenting on the Administration Paper on New Franchise for Bus Network of KMB, report on the public consultation on the new franchise.

And in the second paragraph you -- I think it is not a complaint, but you made an observation that the administration paper only consists of a short paragraph on safety, with two simplified points, namely to monitor

bus captains' driving behaviour more closely and to improve safety facilities on buses. But then you mentioned that these clearly fail to reflect the much broader issues that you raised.

Can you elaborate on what you meant by the much broader issues you raised?

CHAIRMAN: Which paragraph and which page are you reading from?

MS MAGGIE WONG: I'm reading from 778, second paragraph.

CHAIRMAN: But before we get there, but at some stage, if not now, ought not we deal with the consultation document, and what it is that Mr Kwong had to say about its emphasis? I'm looking at the second paragraph of 775. Maybe you are going to come back to it.

MS MAGGIE WONG: Yes, I will come to it now.

To put it in context, maybe if I refer you to the letter from the Transport and Housing Bureau to the LegCo.

CHAIRMAN: Is this the consultation paper?

MS MAGGIE WONG: Yes. Shall we go to the TD-3 bundle. Pages 661 to 768. This was dated, I think it is the third LegCo paper to update the LegCo on the position of franchise renewal as of February 2012.

And then this is later followed by a brief stating that the decision of the Chief Executive in April 2012

was adopted.

But if we look at this LegCo brief, just to give the background before the 2016 paper, the introduction stated that (a):

"A new franchise ... conferring upon New World First Bus ... the right to continue operation of its bus network ... from 2013 July to 0400 hours on 1 July 2023 ..."

And then:

"A new franchise ... conferring upon Long Win Bus ... from 2013 to 2023."

Then rolling down, a new franchise for Citybus also from the same period, May 2013 to May 2023.

Then if we look over, if we roll down, it sets out all the conditions, and the assessment criteria at paragraph 4:

"To assess whether NWFB, LW and Citybus ... have been providing proper and efficient public bus services, the Transport Department has been conducting regular reviews of ... [a number of factors] through passenger satisfaction surveys, site surveys, vehicle inspections, examination of regular returns and public feedback."

Then it simply stated that in light of the assessment given in paragraphs 5 to 8 below, we consider that they have fulfilled the criteria, and the service

performance in the NWFB include the accidents and the average of lost trips scheduled as against the scheduled buses.

If we turn over the page, the Long Win Bus and Citybus also calculated by the annual average number of complaints per million passengers, or the number of bus accidents per million vehicle-km as a basis to calculate whether the accident rate has been normal or within range or acceptable level.

And I believe you have written a few papers on this as well.

If I may take you to --

CHAIRMAN: May I just enquire this. To what is the document at MISC-2 page 775 a response? To which paper?

MS MAGGIE WONG: MISC-2 is in relation to another paper, but because that paper also referred to Citybus, so I have to put this document in context, because it also referred to the Citybus comments on the Citybus paper.

CHAIRMAN: Well, this document is dated -- 775, as I read the date in numbers by Mr Kwong's name -- 16 September 2014.

Just a moment, let's put it up on the screen.

The question I'm asking is, to which paper is Mr Kwong responding?

MS MAGGIE WONG: He is not responding to this one. This

paper is responding to a document at page 784.

CHAIRMAN: 784 is part of the April 2018 report, is it not?

MS MAGGIE WONG: Yes. That's the 17 June 2016 LegCo report on the updated background brief on the franchise of KMB.

784.

CHAIRMAN: Of which bundle?

MS MAGGIE WONG: Of SEC-2 bundle.

CHAIRMAN: That was the bit that was missing.

MS MAGGIE WONG: I'm sorry, Mr Kwong, can you also -- I think --

CHAIRMAN: Just a moment. Are we perhaps at cross purposes?

MS MAGGIE WONG: Yes.

CHAIRMAN: Page 784 of SEC-2 addresses KMB and its franchise. Page 775 of MISC-2 is addressing Citybus.

MS MAGGIE WONG: I think I might have referred to the wrong document. The chronology is a bit -- I went wrong on this.

Maybe I should refer to this document first. It is SEC-2 bundle, at page 748. It is the consultation paper. The paper is in January 2016. If we go --

CHAIRMAN: Just a moment, please.

MS MAGGIE WONG: Yes.

CHAIRMAN: Yes.

MS MAGGIE WONG: If we go to page 748, and it is for the new franchise for bus network of the new Kowloon Bus

Company. And at 754, paragraph 16 --

CHAIRMAN: Before you move on. 748 is the discussion paper for the -- the government is informing LegCo that it plans to engage with KMB to discuss the granting of a new 10-year franchise for its bus network on the expiry of the existing franchise.

MS MAGGIE WONG: Yes.

CHAIRMAN: Is that right?

MS MAGGIE WONG: Correct.

CHAIRMAN: And at paragraph 4, the -- it is stated -- is this a document from the Transport Department? Transport and Housing Bureau and the Transport Department. Paragraph 4 of this document states this:

"The Government's key consideration in granting a bus franchise is whether an operator is capable of providing a proper and efficient public bus service."

Now, Mr Kwong, that is something you take issue with, is it not, in the report that we looked at some time earlier?

MR JULIAN KWONG: Chairman, I remember that at that time government was inviting the public to give their opinion on the new franchises for KMB and separately for Citybus and New Lantao Bus.

CHAIRMAN: But the sentence I have just read out is a sentence that recurs in these proposal documents by

government, whether or not it is KMB or Citybus.

So the issue you were taking in MISC-2 at 775 is this:

"The consultation by government states that ..."

You then quote what I have just read out:

"The Government's key consideration in granting or extending a bus franchise is whether a grantee is capable of providing a proper and efficient bus service."

Then your observation:

"We are concerned that other important values, notably road safety ..."

The first one you put down:

"... quality of service, environmental friendliness, and social responsibility, are not mentioned."

That's your first response, is it not, to the way in which Government consults on renewal of a franchise.

MR JULIAN KWONG: Chairman, yes. Because we didn't see the word "safety", we were not sure whether the word "safety" has been embedded into the word "proper". We didn't know. But in any case, from what I interpreted from the document, at that time we were concerned that safety may not be a major issue to address, which is why we compiled a number of comments for them to consider. Thank you.

CHAIRMAN: And of course there were the different franchises, on the one hand, if you like, the Citybus group, and then on the other hand the KMB group.

So Ms Wong, which one are we going to?

MS MAGGIE WONG: Shall we go to KMB first now that we are on this document, and I found -- I apologise for that, Mr Kwong. I found your Citybus submission in relation to that, but we'll come to that later. Now that we are on KMB we will deal with KMB first.

If we may go to KMB's submission where you respond to the administration paper in MISC-2 page 770.

The first matter is at 770, below the paragraph: "Road Safety is of Paramount Importance".

And you mention that in clause 6(c) of the consultation document:

"... [it] indicates that KMB's accident rate was 2.95 accidents per million vehicle-km which is lower than 4.16 of the overall industry performance. While this indicate better overall performance of KMB, we consider it grossly inadequate to look at a single parameter ie accident rate ... to conclude on KMB's safety performance. Due to the scale of its operation, KMB accounts for more than half of the bus-related casualties. This justifies a major effort to further bring down the casualty toll.

It will be necessary to analyse the number and rates of KMB buses involved in fatal and serious accidents, pedestrian accidents, multi-casualty accident ... from a much wider perspective. It is also important to identify and address any major safety risks involving KMB's operation."

Now the observation you made is it is not fair, if I put it correctly, to simply look at the accident rates, because it is just a single parameter. You have to look at the broader picture. Is that what you are suggesting here, first?

MR JULIAN KWONG: Chairman, yes. This is the case. And I have demonstrated this in our report, the report on bus safety we submitted to the review committee.

I have compiled some tables in this report, and I have expanded to using other rates, for example crash involvement rate per million passenger trips, for example pedestrian injury rates per vehicle-kilometre, number of serious injuries per million vehicle-kilometres, number of fatalities per vehicle-kilometre or per passenger trip. So the whole idea is if we want to understand the current pictures of road safety we need to look at multiple parameters.

And that is the whole idea. Thank you.

MS MAGGIE WONG: In this report, I think if I would like to

go to a few recommendations that you made. The first is page 772 --

CHAIRMAN: Before you get to that. You expand on why it is necessary to look at multiple parameters, do you not? When, for example, you look at rear-front and junction collisions?

Perhaps, Ms Wong, would you be kind enough to read that out?

MS MAGGIE WONG: Yes. You stated:

"Given the prevalence of bus routes using high-speed roads and expressways, KMB buses are particularly susceptible to rear-front collisions involving multiple casualties. During the three-year period 2011 to 2013, there were over 40 multi-casualty crashes each with 5 or more casualties involving KMB buses. Historically, a single event with more than 100 casualties has been recorded. Such collisions could lead to very severe casualties, especially for passengers taking up certain seats, eg upper floor front row. Furthermore, these events often put enormous strain on the emergency and medical service. Nevertheless, such events would only be classified as a single accident and therefore their severity cannot be reflected in the accident rate. In July 2015 alone, there were at least three multi-casualty collisions involving KMB buses resulting

in 45 casualties."

CHAIRMAN: And that is one of the reasons, is it, Mr Kwong, why you say you must look at multiple parameters?

MR JULIAN KWONG: Chairman, yes. That's true.

MS MAGGIE WONG: You made a few recommendations. The first one is at page 772. You stated that:

"We recommend that past accident data and potential safety risks of bus operation are studied in detail, with a view to identifying opportunities for improvements under the new franchises. Government should take the lead to emphasise the importance of road safety of bus operation. The franchise requirements should incorporate these aspects in addition to proper and efficient service. Consideration could be given to rewarding the bus companies for achieving pre-defined goals, such as reduction of certain accident types by 20 per cent per year."

This first point is that it reinforces that you shouldn't look at one accident data, but look at whether it involved multiple casualties as you mentioned in relation to the rear-front and junction collision; is that correct?

MR JULIAN KWONG: Chairman, that is correct.

In the way I work, I always like to understand issues in a more comprehensive way. Because that is

critical. It is critical to, first of all, understand the overall picture, and secondly, that is crucial to the formulation of strategies and measures. And in this respect, I wrote those recommendations including mentioning something like rewarding bus companies -- that is just a suggestion -- the reason being that in all these letters, or submissions to government, or LegCo, we wish to encourage those responsible or involved in bus operation. We are not trying to make everything negative. We need to encourage the people working in it, we need to motivate them. That would be far more sustainable. Thank you.

CHAIRMAN: How do you envisage that a bus company might be rewarded for reaching a pre-defined target?

MR JULIAN KWONG: Chairman, that is only a suggestion. We have not gone into the details of the mechanism for rewarding. But the whole idea is that we need to encourage bus companies and encourage bus drivers for a good reason.

CHAIRMAN: Do you have in mind a financial reward, or some other kind of reward? Good Citizen of Hong Kong, or something like that. Or money? What do you have in mind?

MR JULIAN KWONG: Anything which is reasonable and which works I think can be considered. Thank you.

CHAIRMAN: The opposite of reward is penalty. Do you consider that that would be appropriate. If you fail to reach a pre-defined target, for example, accident rate?

MR JULIAN KWONG: Chairman, penalty is also a possibility for sure. But I would also like to emphasise that we understand that not every accident is the responsibility of the driver or of the bus company. An accident may be due to third party, or that may be due to a combination of causes which several parties to have bear the responsibility for. So penalties can be useful in certain circumstances, but whether it is fair I think we still need to look at it seriously. Thank you.

CHAIRMAN: Are you aware that in Singapore the Land Transport Authority has a penalty accident rate provision in the franchises they grant?

MR JULIAN KWONG: I'm not aware of that.

MS MAGGIE WONG: If we go on in the middle paragraph, you make reference to the safety performance of bus companies, as to the modern approach to be introduced, how to assess the safety management performance.

And you make two recommendations in this section. It is first to introduce or encourage the bus company under the new franchise agreement to adopt a more advanced system towards the ISO 39001 standard.

And second, the government is to collaborate with

bus companies to study bus accidents and risks in detail with a view of setting targets of accident reduction.

I believe this is not the first time you mentioned this 39001 standard to the government, but in relation to the new franchise to KMB you specifically raised this with the Transport Department to incorporate this requirement to the franchise. Can you confirm that?

MR JULIAN KWONG: Yes. But I think this is not the first time we mentioned about the ISO standard. What I have been trying to do is to encourage them at least to look at it and to study whether that should be adopted. Bearing in mind that, say, if they have an equivalent system then maybe that is fine. But the main reason is that the standard is based on the safe system approach which is the latest thinking in many advanced countries, and also that it is progressive. It looks at the ultimate elimination of serious injuries and fatalities. Thank you.

MS MAGGIE WONG: And the third one is in relation to the black box. And if we go down to the bottom, bus safety, driving standard, if I read the whole section:

"It would be fair to say that many public bus drivers are professionals and are performing reasonably well. However, this does not necessarily imply that risks have been minimised ... a certain proportion of

bus drivers do behave aggressively and dangerously, contributing to undue risks. Clause 8(d) of the consultation document states that KMB has completed retrofit of speed limiters and black box ..."

But then you commented this line:

"There is vast potential of using black box in buses but it is not clear how these are being used."

And then over the page you stated that:

"We wish to point out that the urban speed limit of 50km cannot be taken as the golden rule."

And the weight of the bus. And then there came the recommendations:

"Incorporate into franchise requirement the need to set up a comprehensive standard and driver monitoring system using the installed black boxes. Monitoring systems should be automated with streamlined procedures to educate and retrain drivers."

You stated a number of key monitoring controls. One of them include acceleration and deceleration characteristics. And you refer to a British Columbia Transit Infrastructure Design Guidelines.

Can you first of all explain this? What is meant by acceleration and deceleration characteristic, making reference to this British Columbia Transit Infrastructure Design Guidelines?

MR JULIAN KWONG: Chairman, a driver abruptly accelerating or abruptly decelerating, can cause passengers to lose balance. And another problem is some drivers similarly accelerating or decelerating in a very unpredictable way, and that is something we wish to control.

In the design of, say, the MTR trains, there are certain parameters for train acceleration so that passengers inside will not be so easily destabilised or lose balance. In bus operation there is the problem because theoretically a bus driver can accelerate or decelerate very rapidly, and the idea here is that we need to control that in a reasonable way.

Normally, I would say that there is no need to accelerate or decelerate excessively, but of course in an emergency situation, maybe the bus drivers have to decelerate very rapidly. And that is also related to the recommendation on speeds. If bus drivers are allowed to go at higher speed, then there is more likelihood that he has to decelerate very rapidly, because there are many unforeseeable conflicts, say, on the urban streets. And looking at the guidelines from British Colombia, there are certain objective values which they recommend transit buses should accelerate or decelerate at. Thank you.

CHAIRMAN: Before you move on, Ms Wong, let me ask Mr Kwong

this.

At the outset you say this under the heading "Recommendations", page 773. You have recommended that there be incorporated into the franchise requirement the need to set up a comprehensive standard and driver monitoring system using the installed black boxes.

What did you mean by "a comprehensive standard"?

MR JULIAN KWONG: Chairman, I would presume that what I meant by comprehensive standard in the text means the protocol. That is what type of speed, what degree of acceleration or deceleration bus drivers should adopt, whether that is general or route-specific. Thank you.

CHAIRMAN: And that should be a comprehensive standard, but it also should be incorporated into the monitoring system. You set the standard, and this is what you monitor?

MR JULIAN KWONG: Chairman, yes, that is the case.

CHAIRMAN: For argument's sake, the standard might be set at 0.2G for decelerating or accelerating. That might be set lower, but that's the idea, is it not?

MR JULIAN KWONG: Chairman, yes. We need to set the standard first, based on evidence base, based on the safety problems we are facing and the risk, and then we use the monitoring system to enforce it.

But to what degree we enforce, that is another

question. Whether just occasional violations already trigger disciplinary action, that is not covered. That needs further study. Thank you.

CHAIRMAN: And this resonates with what you were saying earlier, it should be done real time, and it should be automated.

MR JULIAN KWONG: Chairman, the more automation, the more features of real time notification of course is good. But at that time when I wrote this recommendation I think the first step would be, first of all, we need protocols, and the second point is that we need better monitoring. I did not go further into the precise wordings.

CHAIRMAN: But your primary recommendation was that it should find a place in the franchise requirement?

MR JULIAN KWONG: Chairman. Yes. This is exactly our recommendation.

CHAIRMAN: Did it find a place?

MR JULIAN KWONG: Chairman, as far as I understand, probably not.

CHAIRMAN: We can investigate that on another occasion. But I think we have used up our time today.

MS MAGGIE WONG: Yes.

CHAIRMAN: One of our members has engagements that take him elsewhere, so we are unable to carry on sitting.

As I understand it, Mr Kwong, Dr Kou, one or both of you will be available tomorrow morning, have I got that right?

MR JULIAN KWONG: Tomorrow morning it will be only me. Dr Kou has some other engagement.

CHAIRMAN: Very well. In that case, we ought to thank Dr Kou for coming today to help us give evidence on behalf of the Community for Road Safety, and we will welcome you back tomorrow morning.

Can somebody remind me what time we are sitting?

MS MAGGIE WONG: 10 o'clock.

CHAIRMAN: We tried today to get in as much as we could and sitting as early as we did and as late as we did, and it has been most helpful, so we will adjourn now, and we will resume tomorrow at 10 o'clock, Mr Kwong.

Thank you.

MR JULIAN KWONG: Thank you, Chairman.

DR KOU SIO KEI: Thank you, Chairman.

(1.33 pm)

(The hearing adjourned to 10.00 am on Tuesday, 17 July 2018)

EVIDENCE FROM COMMUNITY FOR ROAD 1
SAFETY REPRESENTATIVES:
MR KWONG TSE HIN, JULIAN AND
DR KOU SIO KEI.

Examination by MS WONG 1

2018年7月16日

上午9時07分恢復聆訊

出席人士 ： 鄺子憲先生，道路安全研究小組主席（道路安全研究小組）

高兆祺先生，道路安全研究小組成員（道路安全研究小組）

主席：（經傳譯員）各位，早晨。今朝早上，我哋感謝道路安全研究小組嘅成員佢哋應邀今日上嚟協助我哋委員會佢哋係會係作證㗎。咁我哋會請代表大律師，黃佩琪大律師就係幫我哋提問嘅。

黃女士：（經傳譯員）鄺先生、高醫生，感謝你哋今日出席，我今朝早就係代表檢討委員會就係以律師嘅身分呢就同大家係研究一下專營巴士嘅安全事宜嘅。首先，我想作一個係簡介，就介紹一下你哋嘅組織，從你哋嘅陳述書喇，咁如果睇番鄺先生2018年3月28號係嗰日所交上嚟嘅陳述書，我哋睇到你哋貴會嘅簡介㗎，係754嗰頁㗎。其實呢度係一封係寄畀你哋嘅信，咁日期係2018年嘅3月28號，就係邀請你哋係提交陳述書㗎。

喺757頁嗰度，喺第1頁，喺你嗰個回應嗰度喇，你就係講出咗你哋道路安全研究小組就係一個組織，就自從2004年開始係成立，係一個就係關注道路安全嘅一個組織，而你哋組織嘅資料亦都喺TD-5嗰個文件夾嗰度㗎，大家可以喺1699至到1670呢兩頁嗰度見到㗎，係TD-5嗰個文件夾，1699頁至到係跟住嗰版㗎，喺下面嗰度。嗰度就係列出你哋嘅資料㗎，包括嗰個背景喇、唔同成員佢喺會裏面嘅職位，你可唔可以確認一下呢度所列出嘅成員嘅名字喇--或者你需要睇埋跟住嗰版嘅，係咪今日都係有呢一啲成員喺貴會嗰度？

鄺子憲先生：（經傳譯員）係㗎，啱㗎，除咗有部分嘅成員就唔係話咁活躍㗎，佢有一啲就係唔再係成員喇。

黃女士：（經傳譯員）鄺先生，你亦都係將你嘅履歷交過畀我哋。

主席：（經傳譯員）係，未落去前，係咪可以講講你哋個組織嘅背景呢？成立咗幾耐、你哋幾頻密見面一次，同埋個目的係乜呢？

鄺子憲先生：（經傳譯員）係，好，主席，我哋嘅組織係一個好細嘅組織，我哋嘅興趣係在於道路安全，我哋希望有一班人，其實係一細班人嚟嘅，我哋想一齊做嘢，我哋希望向政府進言，希望係組織一啲活動，譬如話組織一啲論壇、推廣一啲運動，就係咁樣樣喇。我哋唔係一個善慈組織，亦都唔係一個大型嘅組織，不過我哋會時不時走埋一齊，我哋亦都會係透過電郵係互相通訊。

主席：（經傳譯員）咁你嗰個喺法律上面個定位係點呢？

鄺子憲先生：（經傳譯員）我哋係一個組織，一個註冊嘅社團組織。

主席：（經傳譯員）幾時係成立㗎？

鄺子憲先生：（經傳譯員）2004年。

主席：（經傳譯員）好，唔該。咁請問你哋係有冇一個開會見面嘅模式？

鄺子憲先生：（經傳譯員）我哋唔係經常見面嘅，較多就係以電郵嚟到聯絡。

主席：（經傳譯員）咁你哋會透過電郵嚟到傳閱文件，係嘛？

鄺子憲先生：（經傳譯員）係。

主席：（經傳譯員）我想問你有冇一個召集人嘅呢？

鄺子憲先生：（經傳譯員）我哋冇咁樣樣話有一個召集人嘅。對唔住，你嘅意思係咪話...

主席：（經傳譯員）會唔會有人就係負責係組織個會務咁？

鄺子憲先生：（經傳譯員）一般嚟講都係我去進行呢啲組織嘅工作。

主席：（經傳譯員）咁你哋嘅成員係點樣介定嘅呢？咁你哋都想聚焦睇啲有關嘅事宜吖嘛，咁你哋係以乜嘢準則嚟到揀選嗰啲成員嘅呢？

鄺子憲先生：（經傳譯員）主席先生，講到嗰個成員，我哋冇話係特別揀選邊一啲人嚟到係提供意見㗎，我哋自己成員嘅朋友如果佢哋對呢啲都有興趣，我哋都歡迎佢哋加入嘅，特別係如果佢哋嚟自不同嘅背景，譬如話對於道路、交通都有興趣，有咁嘅興趣嘅話都歡迎㗎。所以你見到我哋嘅成員一般都係專業人士喇，佢哋係對道路、道路交通、創傷呢一啲係有咁嘅背景嘅。

主席：（經傳譯員）可唔可以係你講述一下你哋嘅成員有邊一方面嘅專長或技能吖？

鄺子憲先生：（經傳譯員）好，我哋有土木工程嘅人士喇、交通工程喇、駕駛訓練、創傷外科嘅醫生，亦都有園景設計師或者園景建築師。

主席：（經傳譯員）呢個係涉及道路安全，係咪？即係同道路安全有關喇，係嘛？

鄺子憲先生：（經傳譯員）我都係有咁嘅睇法嘅。

主席：（經傳譯員）對唔住，我剛才就係打斷咗黃律師係問緊你嗰個問題，佢就問你嗰個履歷。

黃女士：（經傳譯員）係，或者請你睇番呢一個雜項嘅文件夾喇，就係820-4嗰頁嘅。鄺生，你就係將你自己嘅履歷就列咗出嚟㗎，你講咗畀我哋聽你有咩嘢教育嘅背景喇、你喺邊啲會嗰度有會員嘅身分喇，同埋由08年到而家係進行過啲乜嘢嘅工作或者做過啲咩嘢嘅項目㗎。睇番你嘅教育背景喇，見到你就係有一個土木及環境工程嘅學士學位喇，呢個就係紐卡素大學得到嘅學位，...

Transcript by Epiq Hong Kong, Limited

主席：（經傳譯員）係幾時取得呢個學位呢？

鄺子憲先生：（經傳譯員）呢一個土木及環境工程嘅學士學位我喺 1986 年係取得嘅。

主席：（經傳譯員）好，唔該。

黃女士：（經傳譯員）跟住我相信係一個碩士課程，係嘛？你就係專注研究係致命交通意外，咁就喺港大嘅醫學院嗰度取得呢個碩士嘅學位嘅？

鄺子憲先生：（經傳譯員）係，啱，2004 年係取得㗎。

黃女士：（經傳譯員）係，04 年。我見到你亦都係喺呢一個英國路政方面係有一個證書，就關乎就係道路安全審核嘅，係咩嘢嚟嘅呢？

鄺子憲先生：（經傳譯員）道路安全審核係 1988 年英國開始做㗎，而家就已經係廣泛係喺各國應用嘅。嗰個概念係點呢，就希望有一個獨立嘅審計或者審核，就睇睇一啲道路工程嘅項目，傳統嚟講，道路嘅設計嘅項目都會係政府當局去做同埋係由顧問、設計者去做。但係呢度講到道路安全嘅審核，我哋係獨立咁去做嘅，我哋亦都會提供一啲意見，係讓我哋嘅項目嘅客戶同埋嗰啲顧問係聽到我哋嘅意見嘅。呢度有一個能力證明書，咁呢個就係話有咗呢張證書就讓我可以係參加一啲喺歐洲當佢哋係做道路網嘅呢方面嘅工作，咁呢個就係歐盟同埋好多國家都有推行呢個工作㗎。

主席：（經傳譯員）咁你靠個咩嘢途徑、咩嘢程序係得到呢一個證書嘅呢？

鄺子憲先生：（經傳譯員）嗰個證書係需要出席一啲訓練，係要接受培訓，亦都要有證據證明就係話我係有參與足夠嘅項目嘅審計工作嘅。

主席：（經傳譯員）即係話培訓加上經驗，係咪呀？

鄺子憲先生：（經傳譯員）啱。

主席：（經傳譯員）咁嗰個培訓喺邊度進行？

鄺子憲先生：（經傳譯員）培訓就係喺倫敦嗰度做嘅。

主席：（經傳譯員）係邊一間院校？

鄺子憲先生：（經傳譯員）TMS 顧問公司就係有關嘅培訓嘅團體喇。

主席：（經傳譯員）TMS 係乜嘢嘅簡稱嚟嘅呢？

鄺子憲先生：（經傳譯員）對唔住，我唔知道 TMS 代表乜嘢，只係知道叫做 TMS。佢哋就係會頒授呢一個證書嘅，咁就係由英國嘅路政署就係批准㗎，咁佢就負責英國嘅道路網絡嘅。

主席：（經傳譯員）好，唔該。黃律師。

黃女士：（經傳譯員）我哋落去睇喇，道路安全培訓，見到你係參加咗四個培訓嘅課程嘅，第一個就係法國嘅為期兩週嘅道路安全嘅培訓，咁地方係喺法國定喺香港？

鄺子憲先生：（經傳譯員） 嗰個課程就喺法國巴黎嗰度上堂㗎。

黃女士：（經傳譯員）係幾時嘅事？

鄺子憲先生：（經傳譯員）係喺 2009 年。

黃女士：（經傳譯員）嗰個兩週嘅培訓，可唔可以簡單咁講講就係涉及啲咩嘢內容？

鄺子憲先生：（經傳譯員）道路安全嘅方方面面，包括政策，歐盟嘅交通政策喇、法國嘅交通安全政策喇，亦都涵蓋咗道路安全嘅大部分嘅課程嘅，譬如話喺主要嘅高速公路、市區道路、舒暢交通等等，亦都係同交通安全審核有關嘅。

黃女士：（經傳譯員）咁第二個訓練就係五日嘅訓練喇，係英國嘅高級嘅道路工程嘅，呢個係 TMS 提供，係咩嘢嚟㗎？幾時發生㗎？

鄺子憲先生：（經傳譯員）2007 年係上嘅。

黃女士：（經傳譯員）呢個係咪頭先你講你嗰個能力證書，即係道路審核所進行嘅訓練？

鄺子憲先生：（經傳譯員）2007 年我就開始上堂，即係道路安全--道路工程嘅訓練課程，以便你能夠進行呢個道路安全嘅審計、審核嘅。咁 2016 年我就參加咗呢個課程嚟到攞到呢個咁樣嘅能力嘅證書。

黃女士：（經傳譯員）就三個就係國際道路評估訓課程，係五日嘅，邊個組織者？邊個安排呢個訓練嘅呢？

鄺子憲先生：（經傳譯員）呢個訓練係由 iRAP 國際道路評核計劃機構呢個組織，呢個係英國嘅慈善機構嚟嘅，而家都係好--响道路安全--全世界嚟講，响道路安全方面都係好知名機構嚟嘅。

黃女士：（經傳譯員）最後一個，頭先你講過個道路安全嘅審核嘅訓練喇，呢個係由 TMS 呢間機構提供嘅，其實係幾時進行訓練㗎？

鄺子憲先生：（經傳譯員）呢個訓練係 2016 年嘅訓練嚟嘅，就係响嗰個能力證書發嘅之前，即係都係同一個課程嚟嘅。

黃女士：（經傳譯員）鄺先生，响下面睇到有講過你而家參與嘅一啲進行中嘅項目，其中一個就係審核香港道路網絡嘅潛在嘅路邊安全隱患嘅，咁呢個係由路政署就係負責嘅，我想睇番去第五個文件夾 1651 頁，睇下(f)呢度呢一段，呢度有講過呢個咁嘅顧問，呢份係一份文件嘅，係由運輸署 2018 年 5 月係嗰個運--係一封信嘅附件嚟嘅，2018 年 5 月 28 號，咁你話就路政署就係進行咗呢個顧

問研究，嚟到睇下香港道路網絡有啲咩潛在路邊嘅安全嘅隱患嘅，呢個係一個調查嚟嘅，時間係 2018 年 5 月，嚟到睇睇究竟所有新界嘅--即係喺香港境內所有路邊嘅安全隱患、公共道路嘅安全隱患，同埋要透過一個有系統嘅方法嚟到考慮最新嘅科技、有啲咩改善嘅措施可以係制定嘅。

有關嗰個顧問研究嘅範圍、目的，都係响第--即係附件四嘅，頁數就係 1685 頁。我哋再望過下面嘅一段，你有講番呢個研究嘅項目嘅目的嘅，鄺先生，你有冇係參與呢一個咁嘅研究㗎？

鄺子憲先生：（經傳譯員）係有嘅，我係自從今年 5 月中開始就參與喇。

黃女士：（經傳譯員）咁你係參與嘅時候係咩嘢角色呢？

鄺子憲先生：（經傳譯員）我嘅角色就係一個道路安全嘅一個領導人，呢個係一個大嘅顧問研究之下，係由 AECOM 進行嘅研究--顧問研究之下嘅...

主席：（經傳譯員）嗰個名係點？

鄺子憲先生：（經傳譯員）最主要嘅顧問，主要顧問 AECOM，即係串出嚟就係 A-E-C-O-M。

黃女士：（經傳譯員）下一頁--唔好意思，係同一頁嚟嘅，2.3 呢一段，其中一個要做嘅事就係減少現有道路嘅危險--嘅風險，運輸署同埋路政署就係聯合進行一個道路安全嘅檢查，以便搵出或者係改正番、修正番現有嘅道路，而嗰啲道路嘅嗰個速度限制係 70 公里或以上嘅帶來嘅一啲道路安全嘅隱患嘅。即係話呢度係講明係嗰啲道路係要嗰個安全速度限制係要 70 公里或者以上嘅，係咪？

鄺子憲先生：（經傳譯員）主席，關於呢個研究項目，根據我同個總顧問艾康（譯音）--艾--奕康（譯音）嘅合同，我就唔能夠喺呢個聽證會呢度就提出呢方面嘅意見嘅。

黃女士：（經傳譯員）可唔可以話畀我哋聽，幾時可能--即係呢個研究幾時可能會完呢？你哋預計--或者係咪有一個固定咗嘅完成研究嘅日期嘅呢？

鄺子憲先生：（經傳譯員）主席，呢個顧問研究同我所做嘅其他工作一樣喇，都係時間係有個限度嘅，但係關於實際上有幾多時間，我就--唔好意思，我冇辦法畀到講法㗎。

主席：（經傳譯員）運輸署會嚟嘅，我哋會問佢嘅。

黃女士：（經傳譯員）鄺生，你都係有一個網頁㗎，你擺咗啲文章上去嘅，你啲會員就不時就會係就住道路安全小組提出你哋嘅睇法嘅？

鄺子憲先生：（經傳譯員）係。

黃女士：（經傳譯員）你哋--我諗相信都已經交咗唔少於十一篇文章畀政府嘅，就講

清楚你哋對於道路安全嘅各種嘅睇法嘅，或者我可唔可以舉個例，舉個例喇，即係譬如話TD-5呢個文件夾裏面嘅1705。

主席：（經傳譯員）係咩嘢--關於咩嘢㗎？

黃女士：（經傳譯員）呢個關於嗰個運輸署提交嘅文件嘅，2018年5月提交嘅，即係附件一，佢哋係响嗰一封信嘅附件就係夾咗㗎，佢哋係--嗰封信嘅日子就係2018年5月28號嘅。

主席：（經傳譯員）呢封5月28號嘅文件--嘅信係响邊度嚟㗎？

黃女士：（經傳譯員）5月28號嘅呢封信可以响TD-1呢份文件裏面--呢份文件夾裏面。

主席：（經傳譯員）或者你可唔可以講一講呢封信，呢封信係畀我哋呢個委員會㗎？

黃女士：（經傳譯員）係，呢個係運輸署寫畀檢討委員會嘅，咁裏面係有一個--其實一個附加嘅陳詞嚟嘅，咁裏面有一啲附件嘅，呢個係嗰個5月7號、8號之後嗰個研訊之後提交嘅。

主席：（經傳譯員）咁而家係講緊呢個係運輸署嘅文件嘅一個附件，係嘛？邊一頁？

黃女士：（經傳譯員）1700頁。

主席：（經傳譯員）即係TD-5文件夾1700頁？

黃女士：（經傳譯員）係。你睇番第8段，佢哋係列出咗十一份文件或者係你哋提出嘅十一份嘅意見，一係就係交咗畀運輸--立法會嘅運輸事務委員會或者係政府，即係話提供你哋嘅意見，而意見係有關公共嘅交通嘅研究嘅策略或者係嗰個九巴嘅牌照或者城巴牌照嘅續期。大家亦都可以睇埋第1701頁，呢度有講清楚你哋嗰個意見嗰個題目同埋有關個立法會文件嘅參考。係，睇唔睇到？

鄺子憲先生：（經傳譯員）係，睇到。

主席：（經傳譯員）你可唔可以用文件嘅形式或者你使唔使睇番後面嗰啲印出嚟嘅文件㗎？嗰啲文件夾响你後面嗰度。

鄺子憲先生：（經傳譯員）係，多謝你。

黃女士：（經傳譯員）响呢啲咁嘅文章，之前問過呢啲問題嘅，即係話呢啲文件點樣傳閱、邊個負責草擬文件，你就話畀我哋聽一般係用電郵嘅，我見到呢啲咁樣嘅意見書裏面，似乎佢嘅時間都好接近，譬如話2016年，你可以見到呢一頁，又有啲意見係關於嗰個火警鐘。2016年4月14號，呢個有一個係關於公共運輸策略研究嘅。跟住有一個講九巴嘅，佢哋嘅九巴個牌--專營權要係續期嘅等等。咁呢啲咁樣嘅或者係意見書，你係點樣草擬㗎？點樣係傳閱畀委員呢？咁嗰啲會員係點樣提供意見，等你哋可以寫好呢個交畀立法會或者係政府嘅意見

書嘅呢？

鄺子憲先生：（經傳譯員）係，一般呢啲咁嘅文件，我哋會傳閱畀我哋覺得重要嘅當事人喇，譬如話我哋先首先將文件交畀政府或者係運房局，咁之後我哋又再有交文件畀立法會。咁至於我哋傳閱文件方面，我哋就唔係真係好有規--即係好有制度嘅，我哋通常唔會畀太多人嘅，亦都唔會去交畀媒體嘅，我哋睇下究竟立法會有冇係討論過有關課題，或者政府有冇提出咁嘅課題喇。至於話呢啲咁嘅文件係點樣草擬，通常就係我有份做喇，咁如果其他嘅會員係有興趣，都係歡迎佢哋參與嘅。至於討論方面，有時候我要承認嘅，我係冇辦法同其他會員係响當時討論嘅，但係最近嗰啲報告我哋都有係討論嘅，好多時係事前討論，但係有陣時只能夠喺事後先送畀佢，睇下有咩嘢意見，如果有好多嘅--更多嘅意見，而我哋解決到，咁我哋嘅做法就係話會將嗰個附帶嘅意見就係再交畀有關嘅各方面嘅。

黃女士：（經傳譯員）多謝你，鄺先生。你話你交畀嗰啲意見書、文件，你睇睇呢份係响個雜項二，782 嗰一頁。呢個係關於巴士安全嘅報告嘅，你哋喺 2018 年 4 月提交嘅，呢個係回應委員會嘅要求嘅。你提交嘅文件係有五個--有五個重點嘅總結嘅--摘要嘅。架巴士嘅營運、安全隱患、而家嘅做法同埋同海外嘅做法嘅比較，同埋最後一個結論同埋建議嘅。而家可唔可以話畀--證實呢個係你哋委員嘅集體嘅一個成果嚟嘅，集體編寫嘅成果？

鄺子憲先生：（經傳譯員）由於嗰個時間有限喇，其實係由我草擬文件嘅，有特別嘅課題，我的確係有諮詢一、兩個委員嘅--一、兩個成員嘅。咁交咗呢個報告之後，我就將呢個報告就交畀所有我哋嘅成員，睇下佢哋咩嘢意見喇，睇下佢哋需唔需要有啲額外嘅建議、睇法，或者佢有啲--有冇啲論點佢唔同意，咁我就有機會--可以有個機會可以再向呢個獨立檢討委員會再提交啲附加意見。

黃女士：（經傳譯員）鄺先生，請睇 785 頁，係你呢份文件嘅，呢度係個建議嗰部分。呢度係第一個--建議嘅第 1 段，應該係安全系統嘅做法，嚟到係照顧唔同因素嘅交雜喇，係汽車、道路、人管理，咁呢度你有講咗四個重要嘅因素喇，即係關於安全四個重要因素，啱唔啱？

鄺子憲先生：（經傳譯員）係嘅，係嘅，喺我份文件係咁寫嘅。或者我就補充，當然喇，安全系統嘅呢個模式亦都要照顧埋--要包括埋政策嘅。但係我就選擇--為咗係即係簡化，我就冇擺落去喇，冇寫落去。

黃女士：（經傳譯員）你睇番第一個因素，呢個就係嗰個運作嘅規則、規條同埋監察系統嘅，你話呢個係需要一個新--關於安全--有需要就制定一個新嘅安全嘅駕駛嘅操作方面嘅規定嘅，咁呢度有講明喇，係有速度等等，呢個係一個一般嘅規則同埋有啲關於個別路線嘅規則嘅，可唔可以係解釋一下？譬如話一般嘅規則係咩嘢意思？咁你有冇--你會响呢一方面考慮咩嘢因素嘅呢，一般嘅規則？

鄺子憲先生：（經傳譯員）我如果冇--唔知道究竟巴士公司而家其實佢哋做緊啲咩嘢，譬如話司機駕駛嘅時候應該遵循啲乜嘢嘅規則，我係冇內部嘅消息嘅，我

哋係從一個安全系統嘅角度嚟睇呢個問題嘅，我哋覺得駕駛巴士嘅工作係需要多啲嘅控制呀、管控嘅。我就呢個擺响個--我叫做一般規則喇，即係意思駕駛巴士，响市區繁忙嘅道路駕駛巴士，應該係咩嘢行為或者係速度應該係點樣樣，行為應該係點樣樣。另一個例子就係你响公路度駕駛，咁速度應該係點、我哋預期巴士司機應該係咩嘢速度，呢個同嗰個法定嘅道路嘅限速係唔同嘅。我作為一個道路工程師，我知道道路嘅設計係各種各樣都有嘅，好多元化嘅。我哋唔能夠完全依靠嗰啲道路速度嘅限制或者係設計方面嘅速度嘅限制嘅。如果係市區道路，呢度有好多所謂交通同行人之間嘅一啲互動嘅情況嘅，咁所以我哋需要要有更加嚴謹嘅速度嘅管制嘅，同埋關於加速或減速方面嘅監控嘅，即係呢個就係我所講嘅一般嘅規則，我就唔係講緊某一條街嘅規則嘅，而係所有繁忙嘅市區道路。

黃女士：（經傳譯員）好喇，我哋睇番 817 頁吖，呢個係雜項二呢個文件夾，817 頁，响頂嗰度。你認為係一啲設計嘅準則嘅，要考慮呢個一般營運嘅規則嘅，呢度分開四個準則嘅，第一個就係市區地區；第二，高速嘅道路；第三，就係比較窄嘅山路；最後就係嗰個單車駕駛者嘅。喺市區道路你就建議有一個某一個嘅車速限制，就係最高係每小時 40 公里，咁你亦都話喺一啲繁忙嘅市區道路就係時速 30，最高。咁你可唔可以解釋一下呢個 40 同埋 30 呢兩個嘅時速限制係點解你會有咁樣嘅意見呢？

鄺子憲先生：（經傳譯員）記住，呢兩個準則其實係建議嚟嘅，仲要進一步再研究。一個較低嘅時速限制即係比起法定嘅時速限制較低，其實都係因為安全嘅考慮，安全就係因為行人同埋車嗰個嘅互動，仲有車之間嘅互動。喺市區道路最主要嘅衝突係來自行人同汽車，同埋汽車喺十字路口。咁所以我哋要睇番唔同嘅因素，譬如話司機減速，可以有幾快令到唔會撞車呢？同埋亦都要考慮人嘅忍耐度，譬如話一個老人家，佢係被撞到整親嘅時候，嗰個車嘅時速最高可以係幾多而呢個人係唔會受到傷害或者死亡呢？咁我哋亦都要睇番海外嘅報告喇、世界一啲嘅趨勢喇。一啲較繁忙嘅市區道路，其實有個趨勢就係採納較低嘅時速限制，譬如話每小時 30 公里，呢個講緊嘅係一啲比較密集嘅市區，有啲地方可能就會係採納 40 喇，有啲就係 30，有啲地方就係同時有 30 同埋 40 嘅時速限制嘅。

主席：（經傳譯員）咩嘢國家，你心目中諗緊係？

鄺子憲先生：（經傳譯員）我想解釋一下，喺歐洲，歐洲國家，由荷蘭開始，市區道路同埋住它區就係時速 30 公里，喺一啲嘅北歐國家喇，譬如話丹麥、挪威，除咗係時速 30 公里之外喇，佢哋亦都有採納時速 40 公里。後者就係用一啲比較主要嘅道路，澳洲而家好常見嘅就係每小時 40 公里，譬如話喺中央商業區，悉尼嘅中央商業區就會見到呢個情況。

黃女士：（經傳譯員）鄺生...

主席：（經傳譯員）英國呢？

鄺子憲先生：（經傳譯員）英國就採納呢個嘅係每公里 20 里㗎，即係大約每小時時速 32，喺英國，佢哋冇每小時 40㗎，因為再上就係呢一個嘅 30 英里嘅，呢個就係等如大約 48 公里。

主席：（經傳譯員）呢個就係你考慮到呢一個嘅 13 年 1 月英國道路當局講番就係所適用嘅規則呢方面嘅資訊㗎，係嘛？

鄺子憲先生：（經傳譯員）喺 2013 年，係吖，2013 年。喺由 2011 年開始，我哋一直提倡呢一樣嘢，呢個係我哋建議嚟㗎。

主席：（經傳譯員）但係我提及嘅就係英國道路局--交通局有一份嘅文件就話係制定當地嘅時速限制，咁喺唔同嘅城市都有採納，尤其喺倫敦，唔同嘅地方都有咁做㗎，係嘛？

鄺子憲先生：（經傳譯員）主席，係，喺英國就係每小時 20 英里，呢個嘅區域其實已經歷史悠久㗎，喺 2013 年之前已經有㗎喇，喺 2013 年嘅時候，你提及過嘅呢份文件，即係話訂定當地車速係其實已經係講咗話關於--咁係有更新嘅，咁當時以我理解，其實就係確定咗話採納 20 英里作為時速限制呢一個概念。

黃女士：（經傳譯員）鄺生，你就提及--之前你講過，提倡訂定車速限制，我想請你睇其中一份嘅文件，...

主席：（經傳譯員）未講嗰樣嘢之前，你形容就話一個一般嘅規則--睇番個頂部，817 頁，你其實預期係由邊個負責去建議呢一個咁樣嘅規則？

鄺子憲先生：（經傳譯員）主席，喺制定呢份文件嘅時候，我哋冇深入去釐清究竟邊個負責，我哋建議係應該有一個一般嘅操作規則，呢個唔係法定嘅時速限制，呢個係一個建議，就係話內部監控，係九巴公司內部嘅監控或者由政府向佢哋施加嘅監控條件。咁但係改變時速限制需要時間，亦都係需要經過法定程序，同時涉及係香港點樣去訂定、點樣去解釋呢個時速限制㗎，咁但係如果係公司--即係巴士公司自己內部改變就比較容易。

主席：（經傳譯員）我哋喺關於呢一個嘅係 2 月 10 號，18 年嘅巴士意外嘅時候，咁其實我哋就知道喺 4 月 27 號嗰個路段嘅時速限制已經由 70 減到去 50㗎喇，咁所以其實可以見到需時都唔係太耐。

鄺子憲先生：（經傳譯員）係，你啱嘅，我喺新聞得知關於大埔公路嘅嗰一個路段時段限制已經改變，咁我哋建議係時速 30 或者 40，呢個係一個新嘅概念，就話係以呢一個嘅區域，即係一個時速限制區域咁樣去制定。即係話呢個時速限制係適用於喺市區嘅道路比較大嘅範圍。咁呢個其實係有兩點，一，根據現行嘅設計手冊，其實時速 30 公里係不被鼓勵；第二，時速 40 公里並未係《道路交通條例》嘅其中一部分，所以呢一個我要再進一步印證。

主席：（經傳譯員）你提及嘅就係呢個車速限制嘅部分喇，咁係呢個第 6 章，係《道路交通條例》設計方面㗎，咁可以喺 820-57 頁嗰度搵到㗎。你就引用咗其中

兩部分，就同你頭先所講嘅有關。

鄺子憲先生：（經傳譯員）應該係運輸署文件一號？

主席：（經傳譯員）應該係雜項文件嘅二，係 820-57 頁。或者我係引用番你頭先所講嘅，就係話香港嘅市區道路係時速 50㗎，有呢一方面嘅指引，其實就喺運輸署嘅交通設計同埋交通規劃設計手冊嘅第 6 章裏面搵到嘅，其中一項喺 6.4.2.5 喇，就係話呢一個嘅係建議喺公共道路係嗰個嘅時速限制如果低過 50 公里就唔建議㗎，因為咁樣就係需要加強執法㗎，咁對於再進一步調低嗰個道路限制嘅話，可能係就未必對防止交通意外有太大嘅影響㗎。咁但係呢一最尷嗰句你就質疑喇，係咪呢？

鄺子憲先生：（經傳譯員）冇錯。

主席：（經傳譯員）咁有關呢一部分，呢一個嘅規則係幾時制定㗎？

鄺子憲先生：（經傳譯員）你所講嘅就係交通規則設計手冊？

主席：（經傳譯員）係，咁呢個係會唔會同英國嗰個嘅文件有關呢？

鄺子憲先生：（經傳譯員）其實呢個來自邊度喇，唔係來自 2017 年嘅版本㗎，即係唔係來自 2013 年訂定當地時速限制嘅文件㗎，咁但係仲有其他--呢份文件有提及過其他地方㗎。

主席：（經傳譯員）咁但係我哋可以喺邊度搵到咁樣嘅諗法？係咪來自 1974 年呢一個嘅英國運事局嘅文件？

鄺子憲先生：（經傳譯員）我就唔肯定，咁但係你其實有好多參考資料㗎，好多都已經係過時。

主席：（經傳譯員）唔該晒。唔好意思，我岔開咗，黃律師。

黃女士：（經傳譯員）其中一份你解釋過嘅文件，我哋可以喺 820-57 頁嗰度見到嘅。呢個其實喺--呢一個嘅係第二屆--2017 年第二屆聯合國嘅國際道路交通安全日嗰度提及過嘅。

主席：（經傳譯員）咁我喺邊度可以見得到係邊度提過？

黃女士：（經傳譯員）咁喺呢個 820-25 頁底部嗰度見到嘅，就係第二屆嘅國際道路交通安全週。820-25。

主席：（經傳譯員）係，我見到㗎，我見到嘅，喺角落頭。

黃女士：（經傳譯員）睇番呢一份嘅文件喇，呢個係咪你係交畀呢一個第二屆嘅聯合國道路交通安全--國際道路交通安全週嘅呢？

鄺子憲先生：（經傳譯員）係。

黃女士：（經傳譯員）如果睇番其中你提倡嘅一啲以地區嚟計嘅時速限制，呢個就係 820-35 頁。可以見到有 20、30 同埋 40 呢三個區域，譬如話新發展區、住宅區、遊客區、醫院、鄉村等等，其實你就將佢用唔同嘅區域區分，即係話唔同嘅區域就應該適用唔同嘅時速限制，係嘛？

鄺子憲先生：（經傳譯員）呢份文件其實係我哋嘅願景，我提倡呢一樣嘢，呢個係我嘅願景，即係話市區發展係唔同嘅區域用唔同嘅車速限制，但不代表目前情況係咁。時速限制區域我想簡單解釋一下，傳統嚟講，要採納一個時速限制，我哋需要整個--即係每條街都要有一個嘅車速限制標意誌，譬如話係時速 50 公里，如果係時速 50 公里，咁就唔使擺喇，咁但係如果係 30，就需要擺好多呢一個嘅時速限制標誌喺市區喇。咁我想講話如果係時速限制 30 區域，即係根據我嘅建議，其實都要經過法律程序去界定呢個標誌，如果有呢個標誌就係話譬如時速 30 公里嘅區域，喺呢一個區域裏面就唔需要每條街都擺個時速限制標誌，只需要喺進入呢個區域同埋離開區域嘅時候整個標誌，呢樣嘢喺荷蘭、法國、英國都有咁做。

黃女士：（經傳譯員）即係話係要推動安全駕駛，例子可以係 820-36 可以見到喇，譬如話 30 區域你已經解釋咗點解你推動呢樣嘢喇，因為就你係適用於一啲嘅單程路、雙程路、好多人嘅地方、密集嘅地方。如果睇番 40，時速 40 公里嘅區域，跟住嗰頁喇，就係一啲嘅雙程道路同埋係一啲主要嘅交通幹道，即係話比較少人行嘅地方。去到時速 50 公里區域喇，就係-38 呢一頁可以見到，就適用於--即係你嗰四段，就係比較少行人嘅地方，多啲行人天橋同埋視野比較清晰嘅地方，即係唔會有阻礙嘅地方。再跟住嗰頁喇，-39，你建議時速係 20 適用於呢個區域，因為首先呢啲嘅道路好唔同喇，比較窄同埋好多行人，係一個購物區、娛樂區、一啲嘅露天市場或者係鄉村中心，所以你就建議時速係 20 公里喇，呢個就係你嘅理據，係嘛？

鄺子憲先生：（經傳譯員）係，呢啲嘅理據其實就係特登為香港情況而訂定嘅，譬如我所講，40 公里嘅區域唔係喺所有嘅已發展國家用㗎，咁但係香港喺一啲特定嘅情況係需要咁做。我亦都想一提，關於一啲嘅係 20 公里區域，即係人車都會用嘅街係比較會佔少嘅部分嘅地方，通常係一啲中心嘅地方、核心地方，譬如話銅鑼灣、中環，但係大部分嘅道路都係車速 30、40 或者 50 嘅，唔該。

黃女士：（經傳譯員）你嘅研究亦都係基於一啲統計，即係署方嘅統計，就係呢個法國嘅運輸部嘅，請你睇番一個嘅 820-46 頁，睇番嗰個年長行人致命嘅或然率嘅，咁呢個係來自英國嘅交通部 2010 年同埋法國嘅研究--法國嘅數據，2006 嘅。你可唔可以解釋一下你嘅意思係乜嘢？

鄺子憲先生：（經傳譯員）好，唔該。2010 年嘅時候，當時就係英國嘅交通當局發表咗一份報告，總結咗亦都再次引證咗佢哋之前所做嘅一啲研究，呢個就關乎致命或者係嚴重嘅受傷嘅可能性，即係話喺不同嘅行人組群裏面佢哋嗰個或然率嘅。喺關於法國方面嘅資料比較一般性喇，我咩嘢意思呢？就話譬如我哋睇下一秒嗰個反應時間，同埋係需要幾多時間嚟到去剎掣，呢個喺好多文件嗰度

都回應用呢一個假設嘅，即係話係要7公尺嘅時間。

我哋就睇下喇，如果一部細嘅乘客車，咁而開車嘅速度係30公里，咁嗰個或然率如果係致命交通意外嘅話，或然率係百分之四喇。咁如果但係如果行人--係同一部車，但係佢行緊40公里嘅話，咁樣就唔同喇。咁最後如果佢係70公里嘅話，咁嗰個或然率就去到百分之九十七。咁嗰個就睇下30同70又或者30同60公里，你都可以見到嗰個分別係好大嘅。嗰個反應時間，我呢度已經顯示咗出嚟喇。當一個司機見到有行人喺馬路度行出嚟，佢需要起碼有一秒鐘嘅時間作出反應，佢要一秒然後先至可以踩落嗰個剎車掣嗰度。

咁如果係30公里嘅話都已經差唔多有二十--如果40公里嘅話，佢已經係20公尺喇，即係話喺嗰20公尺嘅時間裏面，如果嗰個行人就係出現嘅話，就差唔多好肯定係會被撞死嘅。咁換句話講，若果係嗰個車速低啲嘅話，就應該就冇咁大可能會引致一個致命嘅交通意外，呢個就係講及人嗰個--係限制人嗰個能力嘅問題嘅。車速越高，咁司機需要更長嘅時間先至能夠將部車完全停得低，而且亦都需要係睇埋嗰個反應嘅時間。

黃女士：（經傳譯員）好，唔該晒。咁或者係講番你係18年4月嗰份陳述書喇，係786頁嘅，咁我哋剛才提及嗰個一般嘅規定，我哋而家可唔可以講埋路線呢？

主席：（經傳譯員）或者我再講番轉頭喇，講番一般嘅事宜，當我問你，你認為邊一個應該負責係建議有啲乜嘢嘅規則，你話就仲未係諗通㗎，咁但係如果講到係法定嘅車速限制，咁究竟係巴士公司去做吖，定抑或係政府係實施嘅一個強制規定呢？咁你話巴士公司可以做㗎，係嘛？咁講啱唔啱？

鄺子憲先生：（經傳譯員）啱㗎。

主席：（經傳譯員）咁你覺得巴士公司會點樣做呢？我哋要建議點樣去提高巴士嘅安全，咁巴士公司方面應該係點樣樣去建議啲司機就係喺某一啲特定嘅地方唔好係揸車揸到去嗰個法定嘅最高嗰個時速呢？

鄺子憲先生：（經傳譯員）法例上面嘅時速限制就係嗰個法定嘅要求，咁司機就要睇住嘅，不過其實司機亦都係有咁嘅責任，任何時候，揸車嘅時候應該係以適當嘅行車速度去行車，即係因應當時個環境嘅。我哋呢個個建議係點呢？我假設巴士公司其實任何時候都可以係制定一啲指引話畀啲司機聽，喺啲乜嘢嘅道路情況之下就應該係以乜嘢嘅車速去行車。咁佢可以係用文件、可以以培訓咁嘅形式去推行嘅。至於話具體係40定35，定抑或45公里，咁呢一方面係需要進一步嘅調查先可以制定嘅，監察就係另一回事喇。首先我哋要有嗰啲規則喺度先，下一步然後先可以講嗰個監察嘅，唔該。

主席：（經傳譯員）好，譬如話我哋有一啲資訊就知道就係其中一間巴士公司就係有一啲交通黑點嘅，咁亦都係有一啲彎位比較急嘅，咁佢係咪可以就係話畀啲司機聽，就喺嗰啲咁嘅彎位行車嘅時候就應該係行咩嘢車速，你大概意思係咪咁？

鄺子憲先生：（經傳譯員）係，以一般嘅規則嚟講，呢個係一般嘅，但係剛才提及嘅就係譬如話可能某一個特定嘅具體嘅一個路彎喇，咁樣就係去到路線--特定路線嘅規則喇。我喺文件嗰度都有提過㗎。

主席：（經傳譯員）黃律師，你係咪諗住係去問嗰方面嘅問題？

黃女士：（經傳譯員）係，主席，因應你問嘅問題。你喺呢頁嗰個頁頭嗰度，你就話嗰個係喺第二點嘅第 2 段第二行嗰度，你就係話就係希望推廣更安全嘅行車，呢個係一個規則，就唔係一個懲罰司機嘅工具，換句話講，你係希望請巴士營運商係可以遵守有關嘅規則，就唔係話用呢一個工具嚟到去懲罰嗰啲巴士司機㗎，你嗰個邏輯係咪咁？

鄺子憲先生：（經傳譯員）係，啱㗎。我喺寫呢份報告嘅時候，我哋唔係話想講太多嗰個責任嘅問題，又唔係講話邊一個係違反咗嗰個--冇盡佢嗰個責任㗎，其實我哋嗰個整體嘅概念都係推廣交通安全，希望大家都係行車安全喇，大家都開心㗎，我係好想強調呢一點㗎。好，唔該。

黃女士：（經傳譯員）好喇，咁你又有咩嘢建議？即係如何去監察？點樣利用監察嚟到去推廣大家都遵守呢一個嘅規則，而唔係用佢嚟到去懲罰啲人？你認為喺監察嘅過程裏面係可以點樣做？

鄺子憲先生：（經傳譯員）我想話監察嗰個目的就係要搵出邊一啲司機係經常都違反嗰個規則㗎，亦都想搵出係邊一啲司機佢係經常係嚴重咁樣違反咗嗰啲規則㗎。第二類嘅司機，我認為就係呢一類嘅司機就係帶嚟極大嘅風險嘅。換句話講，我哋唔係話譬如話有個司機只不過係稍微係超速咗嗰個時速限制，違反咗個規則，譬如話我哋定咗每小時 40 公里，咁喺某一個時候佢就揸到 42、43，就唔係話呢樣嘢有問題，除非嗰個地點係特別危險嘅。我哋要搵出邊一啲司機呢？就搵嗰啲就係經常違反規則嘅司機，同埋佢違反得嚟嗰個程度非常之嚴重㗎，咁如果我哋可以及時搵出佢哋，亦都及時咁樣樣係糾正佢哋嘅行為，咁就最好喇，呢個就係我嗰個概念。

黃女士：（經傳譯員）你認為--你話要搵出邊一啲人係經常好危險咁樣樣去違反啲規則嘅，咁點樣去可以達至你嘅目的？

鄺子憲先生：（經傳譯員）我諗傳統嚟講佢哋就搵便衣嘅人員就上車嗰度去監察喇，有時亦都係靠收到投訴之後就搵稽查去查喇，咁但係我覺得呢一個唔係好有效嘅，其實科技亦都好先進㗎喇，我相信有更好嘅方法去做㗎。有一個監察嘅制度、一個監察嘅系統，如果係以黑盒為本嘅話，係可以自動化，實時。咁樣樣就更加係有效率喇，唔該。

主席：（經傳譯員）呢個科技其實都好多年㗎喇嘛，係嘛？其實另外你講及呢一個神秘乘客嘅計劃，以及就係根據投訴去做嘢。譬如話呢一個係一個好舊--歷史好耐嘅制度㗎喇，譬如有個人行出去就係翕一支紅旗？

鄺子憲先生：（經傳譯員）主席，係，不過我認為今時今日應該更加倚靠一啲先進嘅科技去進行監察。

主席：（經傳譯員）你喺報告嗰度咁講㗎，監察應該係根--係應該係以一啲先進嘅、實時嘅自動化嘅黑盒系統為本嘅，可唔可以講一講？

鄺子憲先生：（經傳譯員）主席，首先我就想講--我就想申報，我喺黑盒系統方面我唔係一個專家，講到佢哋而家所用嘅先進嘅科技我都唔係專家。

主席：（經傳譯員）星期六我哋係做咗聆訊喇，我哋有一位黑盒製造商 ZF 嘅代表就係作證嘅，你有冇係去睇過我哋嗰個紀錄本？

鄺子憲先生：（經傳譯員）有，我都有攞過下嘅。

主席：（經傳譯員）你剛才就話你喺呢方面就冇一啲專業嘅知識，咁但係你可唔可以都答一答呢三點？即係話先進嘅、實時嘅、自動化嘅。

鄺子憲先生：（經傳譯員）係，主席。我睇過呢一啲黑盒而家嗰個情況，當我講過我喺呢方面唔係專家嘅時候，我話我喺科技同埋喺嗰個軟件點樣係開發我唔係專家，不過我哋可以睇睇我哋用呢啲黑盒嘅系統係想達至啲乜嘢目標。我嘅理解就係呢啲黑盒就可以收集好多嘅訊息嘅，對呢方面我就最感興趣喇，譬如話知道佢加速、減速、傾側嘅角度、車速等等。喺呢個報告裏面，由於呢啲科技有好先進嘅功能，我認為係可以應用呢個系統嘅，而且有一啲營運商佢哋已經用咗黑盒嚟到去管理自己嘅車隊，咁所以我寫呢份報告嘅時候，我覺得如果我推薦--我建議話用一啲先進、實時同埋自動化嘅系統，應該都係公道嘅。

主席：（經傳譯員）你所講嘅「實時」係咩嘢意思？係有咩嘢好處？

鄺子憲先生：（經傳譯員）主席先生，有一啲行動係極為不當嘅，係需要係適時咁樣樣去發現同埋糾正嘅，我哋唔能夠話靠乘客嚟投訴，咁然後就係派人去調查，咁然後就係幾個星期之後先作出糾正，咁係唔得嘅，所以我就建議就係話要明白實明監察嘅重要性，唔該。

主席：（經傳譯員）咁你話自動化，自動咁樣編製呢一啲嘅報告係有乜嘢好處同埋重要性喺邊度？

鄺子憲先生：（經傳譯員）主席先生，根據我嘅經驗，黑盒系統係可以產生大量嘅數據嘅，如果我哋單單係靠人手去搵出嗰個問題，又或者有關嘅程序唔係完全自動化嘅話，我相信涉及嘅人手資源好大嘅，咁樣做亦都唔能夠持久，唔能夠持續㗎。

主席：（經傳譯員）我哋喺星期六收到嘅資訊，咁而你亦都睇過㗎，咁其實就係呢一啲嘅功能而家都有㗎喇，即係話自動化嘅監察？

鄺子憲先生：（經傳譯員）係。

主席：（經傳譯員）亦都係而家車上嘅裝置係冇㗎，係嘛？

鄺子憲先生：（經傳譯員）我睇過文件就話係嘅。

主席：（經傳譯員）咁即係話你就係要界定嗰個界限喇，譬如 50 喇，咁然後你就將佢係話 55 就會係一個臨界點喇，咁就係超過咗百分之十佢就會即刻自動、實時咁樣樣係警示嗰個司機喇，係嘛？

鄺子憲先生：（經傳譯員）係，主席，我有睇過㗎，我都睇到呢點㗎。我而家呢度諗嘅就係話究竟應該個準則定喺邊度，係邊一個先至係嗰個門檻，係用邊個界限去促發嗰個警示嘅，或者嗰個警示或者個提示係其中一個控制嘅辦法。至於話我哋點樣用一個黑盒嘅科技去善用、盡用佢，同埋點樣樣去應付呢一個碰撞同埋受傷，我諗應該會喺日後我哋進行調查呢一個科技嘅時候嘅重點㗎。

主席：（經傳譯員）咁你知唔知道運輸署有冇係強制嗰啲巴士公司係點樣用呢啲科技去有一啲實時同埋自動編製報告呢一個程序？

鄺子憲先生：（經傳譯員）主席先生，我冇詳細咁去睇過--關於你問嘅問題，我冇詳細研究過。

主席：（經傳譯員）有冇一啲文件就係講到佢哋新嘅專營權嘅時候，裏面有冇提及呢一個建議？

鄺子憲先生：（經傳譯員）主席先生，我冇，我冇睇過有啲呢方面嘅建議㗎。

主席：（經傳譯員）我諗你自己係有作出建議㗎，我諗遲啲我哋會睇到㗎，我諗你曾經作出呢個建議，就話喺續約嗰個--專營權續約嘅時候應該包括啲乜嘢嘢。

鄺子憲先生：（經傳譯員）係，主席先生，我哋有作出建議，但係嗰啲基本上係一個方向性嘅比較一般嘅建議嘅。

主席：（經傳譯員）但係我又睇過一啲比較係具體嘅建議嘅，亦都同我哋剛剛探討個問題好有關嘅。黃律師，你係咪--你繼續喇。

黃女士：（經傳譯員）係，主席先生，我哋稍後會返番嚟呢個課題嘅，或者先讓我係完成手頭上呢一個問題先喇。我而家講到係嗰啲路線為本嘅規則㗎，你嘅陳述書亦都有呢方面嘅建議嘅，786 頁第二點嘅，咁你講到就話香港就係有啲好窄嘅山路喇，就冇足夠嘅安全嘅防護欄--防撞欄嘅。你就係 817 頁，喺 5.4 嗰段上面剛剛就係--嗰度就係有提及一啲建議嘅，你話希望就係就個別嘅路線就係制定一啲操作嘅規則嘅，譬如話佢哋有啲好高風險嘅路況喇，譬如話長命斜喇、特別陡斜嘅坡道喇、急彎喇，就係會埋去嘅時候--入彎嘅時候好容易係超速喇，又或者係可能係冇呢一個安全防撞欄或者係好唔夠，又驚會跌落去，喺高處跌落去，又或者就係佢係嗰個現有嗰個橋嗰個防護欄就係唔夠喇、路面好窄、視線唔好，又或者係會有路人或者係翻車嘅人士嘅。咁我想問下喇，你講到話有特別嘅路--路線方面，唔同嘅路線應該有特別嘅規則嘅，或者唔同嘅路

況應該有唔同嘅規則，你可唔可以講清楚一啲呢？

鄺子憲先生：（經傳譯員）係，呢一度就係講及我哋嗰個理念嘅，雖然整體嚟講係符合法定嘅速度係重要，但係都仲要講講個別路段嘅安全嘅。我知道香港有啲路段，譬如比較--香港島嗰啲比較傳統--起嘅山上嘅路，佢哋設計唔係畀巴士用嘅，因為起嘅時候好耐喇，咁據我嘅理解，即係喺我本人嘅專業，我可以話畀你聽，譬如話佢冇防護欄嘅，或者防護欄係唔能夠防止巴--即係一個巴士，譬如話佢嘅速度係每小時 40、50 公里，佢係保護唔到嘅。咁我哋要特別留意呢啲，我哋搵到出嚟嘅一啲咁樣嘅路段，咁巴士公司--巴士嘅司機係要好清楚係有咁樣嘅路段，咁呢啲路段應該有一個特定嘅一啲管控嘅、控制嘅，譬如話速度係每小時 30、35 公里。

另一個例子就係响一個高速公路，咁佢個限速係高啲嘅，咁公共巴士又可以係去到每小時 70 公里嘅速度嘅，但係唔係所有高速公路都個安全水準都係一樣嘅--安全水平一樣嘅，譬如某一個天橋，佢嘅防護欄就唔足以就達到一個標準嚟到防護巴士用 70 公里嘅速度撞上去嘅情況嘅。咁响咁嘅情況，我哋可能需要要個巴士司機慢一啲，譬如話係每小時 60 公里，個速度要低啲，咁個意思就係話要處理速度同埋巴士司機嘅一啲行為嘅問題，就我哋要照顧道路狀況，基於即係一啲工程嘅準則或者係引致受傷嘅情況嘅準則嚟到係施加管制。

主席：（經傳譯員）呢個係為咗管制巴士司機嘅行為，即係話法例上准佢有某個速度，咁但係咁樣係唔夠嘅，譬如話安全考慮唔夠嘅時候，咁呢個管控應該係由巴士公司實施吖，啱唔啱？

鄺子憲先生：（經傳譯員）我哋做呢個報告，正如我所講，我就冇指明係邊一個做呢件事，咁我假設巴士公司同埋政府可以合作制定有關嘅準則、規定，等個巴士公司係實施嘅。

黃女士：（經傳譯員）我假設即係辨識呢啲咁樣嘅路段，有啲咁樣嘅特徵嘅路段喇，頭先你都提過又係咩嘢特徵喇，咁會唔會係如果你政府做係咪容易啲？我就係諗緊運輸署係咪有一個--你知唔知道有一個--成個香港有個電子嘅地圖嘅一個資料㗎，你知唔知有呢件咁嘅事？

鄺子憲先生：（經傳譯員）唔好意思，你係講緊係運輸署係有一個...

黃女士：（經傳譯員）哦，佢有一個係數字方面嘅係--道路速度嘅係一個係--好似地圖，全港嘅道路嘅速度限速嘅地圖資料嘅。

鄺子憲先生：（經傳譯員）我就唔知道有一個咁樣關於係道路速度嘅地圖嘅，因為香港就唔係成日改嘅，即係嗰個速度唔係成日改嘅，大部分嘅路就係限速係每小時 50 公里喇，有某啲路係有唔同嘅限速嘅。我就唔知呢啲資料已經係用一個電子地圖嘅方式係保存喇。

黃女士：（經傳譯員）睇番運輸署嘅 368 頁，呢個係由運輸署 2018 年 6 月 12 號寫

嚟嘅，佢係回應我哋委員會提出嘅問題，要求有一個關於係法定限速嘅電子地圖嘅資訊嘅，呢度你睇番呢個信件嘅第 2 段，呢度有講嘅，第 2 段。我哋而家係附交一個地圖，就係全港嘅，另一個係一個關於香港島嘅，淨係涉及 70 公里或者以上限速嘅道路嘅，畀你參考。咁佢就話--我哋想通--話畀你聽呢個有關嘅數據，即係關於限速嘅數據係由運輸署保存嘅，用一個 GIS，就即係話係地理嘅資訊系統嚟到係保存嘅，係可以响嗰個 data.gov.hk 即係呢個咁嘅網站係下載嘅，咁呢個就可以用呢個軟件令到將嗰個速度限制就係覆蓋响地政署嘅一個地圖嘅，或者亦都可以用一個係 Google 地圖或者係其他地圖軟件嚟到係使用，就知道個路段嘅限速嘅情況。

而家我哋--運輸署係建議使用以上嘅地理嘅資訊系統嘅數據庫嚟到畀--交畀--要求巴士考慮使用呢個咁樣嘅數據庫或者地圖嚟到係畀巴士公司嘅，呢個係一個地圖圍欄嘅方法嘅。咁你覺得巴士營運者係咪--如果係用咁嘅方法，你就會知道係响邊啲地方係話--或者邊一個組別嘅路段係可以係要特別處理㗎？呢個--我嘅理解，根據你嘅經驗，係咪適合？

鄺子憲先生：（經傳譯員）或者我有個咁嘅睇法、意見喇，如果已經係用電子地圖嘅方式，有咗咁嘅資料，咁係好有用嘅。呢個地--當然，呢個所謂地理圍欄嘅概念係好有用嘅。但係我哋一定要等司機知道邊一啲路段係需要減速，佢哋或者應該用咩嘢速度行駛，就算冇一啲先進嘅科技，我哋而家都做到㗎喇，可以話畀佢哋聽㗎喇。但係呢個地理圍欄當然係一個數字式喇，可以同嗰個監控系統係結合起嚟喇，嚟到提醒佢哋，咁樣嘅系統喺長遠嚟講會好有用處嘅。但係為咗能夠即時處理有問題，我哋應該可以用一個簡單嘅方法開始嘅，先係講清楚比較危險--最危險嘅位置，我哋應該可以話咗畀司機聽，就提供訓練，當然喇，長遠可以比較自動化，用自動化系統，即係好似你講嗰啲系統。

主席：（經傳譯員）咁當然喇，如果我哋監察--你做得--監察做得好，咁佢哋就--司機嘅行為就應該做得更加好喇，咁特別係實時喇，如果有一個係電子地圖，咁又係速度限制，咁你都知道個司機喺邊度喇，咁你都比較容易監察，係咪呀？

鄺子憲先生：（經傳譯員）我相信咁樣好有幫助嘅，但係我覺得司機都有啲壓力嘅，我哋其實想係幫助司機，而唔係要施加好多唔同嘅限制，點樣用最理智嘅方法嚟到做呢啲嘅事，都需要係考慮細節嘅。

主席：（經傳譯員）你知唔知道其中一間巴士--星加坡嘅巴士公司佢有一個係積分嘅卡㗎，即係個司機嘅行為係有個積分卡㗎，譬如話講緊佢嘅速度或者係減速、加速，如果係司機冇話突然加速、突然減速，佢就會攞到啲高分，咁呢個所謂嘅--佢就係一個所謂綠色積分嘅司機嘅。如果你一個司機就係經常忽然加速、忽然減速，咁將嗰個司機好似就拋出車站外面喇，咁佢就係一個紅色積分嘅司機喇，咁如果幫佢哋，佢哋就畀一個綠色積分司機，司機有獎金嘅。

鄺子憲先生：（經傳譯員）係，我同意嘅，司機如果安全駕駛，應該係得到獎勵嘅，

要得到鼓勵嘅。

黃女士：（經傳譯員）英國佢哋就係咁嘅制度，有冇聽過呢個英國呢個叫做綠色道路嘅呢個措施，有冇聽過？

鄺子憲先生：（經傳譯員）唔好意思，我未聽過。

主席：（經傳譯員）呢個係一個軟件嚟嘅，响英國倫敦嘅一個專營商--亦都係星加坡都有用嘅，我頭先都描述過係點樣做嘅。

鄺子憲先生：（經傳譯員）多謝。

黃女士：（經傳譯員）呢個綠色道路嘅監察，即係話睇下有冇啲突然加速、突然減速，或者係經常令到引擎空轉好長時間嘅，咁响英國嘅巴士就係話佢哋有一個係同偕之間--即係司機之間嚟到係監察嘅，咁佢哋有所謂嘅積分表喇，有唔同嘅顏色嘅，綠色嘅、黃色嘅、紅色嘅，就視乎佢哋究竟有幾多積分喇，或者有幾多--發生過幾多事故喇。咁就視乎佢--如果係黃色、紅色就要額外訓練嘅，咁呢個系統就容許司機知道有啲乜嘢係一啲所謂重要嘅地點喇，咁亦都係如果係佢哋嘅積分良好，係可以有獎金嘅。咁就唔係淨係罰巴士嘅，亦都係一個全國使用一個嘅監察系統，睇下邊個係個最好嘅--即係優質嘅司機，咁佢有個全國嘅每年嘅最佳司機競爭嘅。即係話唔係淨係罰嘅，即係都有獎嘅，即係有個誘因，等佢哋可以即係駕駛態度更加好、更加安全。你有冇聽過呢個用一個積分卡嘅制度嚟到係獎勵司機，而唔係罰佢哋嘅？

鄺子憲先生：（經傳譯員）我未聽過呢個制度嘅，但係我相信一個類似嘅制度都係一個出路嚟嘅，只要唔好太複雜，或者係要能夠持續嘅。

黃女士：（經傳譯員）我哋頭先講過有關嘅規則，或者可唔可以講講 786 頁嘅巴士設計嘅？呢個係响另一個文件夾，係雜項二嘅。呢度有講過一啲安全嘅特徵喇，你建議係作為優先處理嘅，呢度其實有六個特徵嘅，第一個就係前部要比較安全喇；第二就安全帶；就係使用更多係保護嘅軟墊；嗰個樓梯用一啲--牆裏面有凹凸坑紋；亦都係要提警示有冇路人响個巴士嘅某個範圍度出現；同埋改善司機嘅視野，譬如話係鏡同埋閉路電視。你嘅建議係--或者使用乜嘢儀器、設備嚟到去改善司機嘅視線、視野？

鄺子憲先生：（經傳譯員）大嘅車通常好多視野方面嘅問題嚟嘅，重型嘅貨車嚟講，呢個係一個大嘅問題嘅。今日我哋用嘅巴士，我相信佢哋就比較好啲嘅，因為個窗係比較大啲嘅。而家我相信大部分巴士都有閉路電視去監察車後嘅，即係等佢倒車嘅時候安全啲，但係有陣時偶然都係有啲嚴重嘅係涉及路人死亡嘅重大事故嘅，似乎嗰個巴士司機係睇唔到有人响後面、喺前面或者係車嘅側邊過路。而家响巴士，就係照我--據我了解，更多有裝閉路電視嘅。咁嗰個監察器係响上方嘅，即係巴士司機嘅上方嘅，我就唔知道究竟啲咁樣嘅位置對於巴士司機係咪最適合，即係最能夠幫佢哋睇番有關嘅盲點嘅。我就唔打算講話咁樣係唔能夠令人滿意咁樣運作嘅，我只係話建議應該要睇睇呢個咁樣嘅閉路電視

嘅攝影嘅機，同埋嗰個監察嘅監視器係咪能夠處理晒所有盲點引起嘅問題。

另一方面，我從倫敦嘅運輸當局嘅網頁嗰度知道，佢哋都係有喺度研究緊巴士司機嘅視野問題嘅，視線問題。有個例子就係貨車有個大嘅問題，因為巴士司機如果有行人响佢前面直接行過，由於個盲點係睇唔到嘅，一般嚟講，個司機就會利用個側鏡嘅，即係未開車之前睇番側邊嘅鏡嘅，咁但係呢個唔係一個司機好自然嘅行為，有時佢係做唔到嘅，即係佢冇睇到嗰個側鏡嘅。

而家有啲國家，由倫敦作為一個帶頭人喇，英國倫敦就帶頭做一樣嘢嘅，就要求汽車嘅製造廠，即係要啲設計係更加方便司機睇到前面或者側邊係發生咩嘢事，呢個叫做直接視線嘅--直接嘅視野嘅一個要求嘅，咁對於巴士嚟講，咁即係同貨車比較喇，巴士司機坐嘅位置比較低一啲嘅。從我收集到嘅資料，我相信仲係有改善嘅空間嘅，即係等司機有個直接嘅視...

主席：（經傳譯員）哦，你係講巴士司機？

鄺子憲先生：（經傳譯員）係，巴士司機，係。

主席：（經傳譯員）貨車司機嗰個問題就係話佢要睇--要响門嗰邊先見到係咪有一個騎單車嘅人經過，呢個係咪其中一個問題？

鄺子憲先生：（經傳譯員）係㗎，你要見到人踩單車或者係就直接响佢前面--車前面行過都係問題。

主席：（經傳譯員）咁要改變呢樣嘢，我哋要--你係咪要求--或者 Boris Johnson 話--我唔--佢話你就--「歐盟唔准我將一啲巴士嘅窗就裝响貨車度，咁所以我要離開歐盟」。

鄺子憲先生：（經傳譯員）我唔知道有咁樣嘅情形。

黃女士：（經傳譯員）我就想舉一個例子，就來自你嘅文章㗎，咁就係呢一嘅 18 年 3 月 17 號，關於道路安全就係呢一個嘅好難係--即係行人好難就暢道通行呢一樣嘢嘅，頁數係 821-78。

主席：（經傳譯員）乜嘢？

黃女士：（經傳譯員）78。呢個係第 1 頁，我哋睇番 820-82。呢個顯示到就係話直視嘅問題，即係嗰個直視措施，你頭先講過嘅，直接可以睇到嗰樣嘢，可唔可以解釋一下喇，就係話呢一個嘅道路外嘅重型--HGV 或者呢一個嘅直視 HGV？

鄺子憲先生：（經傳譯員）從我搜集嘅資料可以睇到，重型貨車 HGV 其實設計係喺公路上用㗎，意思即係話會比較少啲行人，車可以一路行，唔需要成日停，呢個就係講話呢一個道路以外嘅情況，咁但係喺香港，有好多街道都有好多行人，包括係一啲行人密集嘅地方、中央商業區，呢個就係問題。

黃女士：（經傳譯員）睇番之前嗰頁喇，就係 786 頁，就係嗰六個因素，其中一個

就係講話有關於行人嘅一個嘅特徵喇，就係話行人係可以得到警示，遠離行走嘅車輛，你意思係指咩嘢？

鄺子憲先生：（經傳譯員）喺報告裏面，我冇特登--我冇即係特定講明嗰個特徵嘅。喺某啲國家，譬如倫敦運輸局，佢哋研究緊一啲新嘅做法，包括警示器或者一啲閃燈。

黃女士：（經傳譯員）呢個警示器同埋閃燈會擺喺邊呀？

鄺子憲先生：（經傳譯員）我冇詳細研究，但係我估計可以安裝喺一啲盲點地方，即係巴士盲點、盲區。譬如喺車身近前，行人好多時喺呢啲地方就會因為車身阻擋，司機睇唔到佢哋嘅。

主席：（經傳譯員）咁呢個會唔會係一個感應器話畀--即係觸動咗之後就會係有警示，就話畀人聽話係有人喺車嗰度行過？

鄺子憲先生：（經傳譯員）呢個其實係有可能嘅，不過我預期呢啲嘅功能唔需要感應器都可以做到㗎，即係嗰架巴士轉緊彎嘅時候就會知㗎喇。

黃女士：（經傳譯員）呢一頁你亦都講過話安全帶，可唔可以睇番 805 頁，你喺呢一頁上面就有進一步解釋嘅，係安全帶方面。喺呢一部分你就話喇，一般嚟講，即係安全帶只係喺某部分冇遮擋嘅座位先至有㗎喇，咁即係譬如話十至十四個喇，就係雙層巴士按--司機喇、上層有四個喇，另外就下層嘅前面喇，就係面對住走廊嘅，咁同埋就另外就係下層嘅向前嗰啲座位，咁你就話呢啲其實就係要再進一步研究下先知道佢哋係咪有用。而家嘅巴士設計，有關於上層前座嘅新巴士已經裝有安全帶㗎喇，...

主席：（經傳譯員）講緊係上層，前面？

黃女士：（經傳譯員）係，上層前座。

鄺子憲先生：（經傳譯員）上層前座，係。喺報告裏面有講，我知道呢啲座位喺上層前座已經裝有安全帶。

黃女士：（經傳譯員）其中運輸署研究嘅一個事項，就係有關於呢個議題嘅，可以睇番運輸署五號文件，168-8。

主席：（經傳譯員）咩嘢嚟㗎？

黃女士：（經傳譯員）呢份文件係附件二，由運輸署撰寫㗎，有關於委員會喺口頭證供之後所做嘅文件嘅，關於使用--關於喺專營巴士使用新技術。

主席：（經傳譯員）呢個係邊度㗎？

黃女士：（經傳譯員）係附件二，呢個第-8 頁嗰度嘅，係一啲補充資料。如果我哋睇落去，就提及過就應該就係呢一個嘅 1693 頁嘅。可唔可以睇番 1689 頁？另

外16--睇番1691頁第12段喇，上面就話喇，運輸署喺工作小組，3月13號嘅時候，署方建議同埋所有嘅專營巴士經營者都同意話新嘅巴士所有座位都要有安全帶嘅，咁而現有巴士嘅座位如果要安裝番安全帶就需要再進一步研究㗎。咁似乎喺呢一個討論裏面，就會係新嘅巴士喺將來所有座位都會有安全帶，你知唔知呢樣嘢？

鄺子憲先生：（經傳譯員）我從文件，喺之前嘅聆訊裏面喇，呢方面我都睇到，所以我知嘅。

主席：（經傳譯員）整體嚟講，即係你可能都有睇過喇，我講埋畀你聽上文下理，署方就開咗一個工作小組會議去睇，話使用新技術嘅討論嘅，我唔知咁樣講啱唔啱喇，咁但係喺呢一個18年3月嘅時候就傾過嘅，呢個就係文件所講嘅嗰個會議，呢個係第八，文件八，係嘛？

黃女士：（經傳譯員）係。

主席：（經傳譯員）裏面就係提及過一系列嘅技術㗎，咁就冇考慮黑盒，即係或者行車紀錄儀㗎，咁呢個就係同運輸署專營巴士經營商同埋呢一個嘅製造商係討論過㗎？

鄺子憲先生：（經傳譯員）係，我知道有一個咁樣嘅委員會，但係我就唔知道討論詳情。

主席：（經傳譯員）呢個係我想講畀你聽個背景資料嚟嘅，係關於安全帶。

黃女士：（經傳譯員）想睇番運輸署文件八號，咁就係呢一個嘅第94頁，裏面就--呢份文件係運輸署嘅文件嚟㗎喇，上面就講咗話喇，就係一啲專營巴士嘅一啲措施、一啲儀器嗰個嘅使用嘅可行性同埋可取性嘅，即係喺大埔意外之後嘅事。咁睇番喇，其中一段就講喇，95頁裏面就話係同呢一個3月，經營商同埋製造商係傾過就係--討論番有關於使用一啲新嘅安全設備嘅，咁曾經就係睇過有關於話所有嘅乘客座位要加裝安全帶，呢個喺第5段可以見到。由第5段開始可以一路去到第9段。喺聆訊嘅時候，我哋聽到證供，話有啲經營者講過話就算裝咗安全帶，大部分嘅乘客都唔願意戴安全帶嘅，咁你建議點樣可以幫助公眾理解呢樣嘢，鼓勵佢哋使用安全帶呢？

鄺子憲先生：（經傳譯員）我理解現有巴士就算有裝安全帶，使用率都係好低，呢個係一個好嘅手嘅問題，我哋需要用唔同嘅方法去處理。我認為法例規定係其中一樣可以用嘅措施，另外就係宣傳。咁措施--即係宣傳個內容係好重要，因為唔單只係要令乘客知道呢樣嘢，亦都需要同佢哋解釋，令佢哋明白戴安全帶嘅重要性。戴安全帶唔單只係保護到佢哋自己，如果你坐嘅位置有另外嘅乘客對住你喇，如果佢哋拋出嚟嘅話就會傷到你或者你會傷害到對方。點樣將呢啲技術性嘅資料真係令公眾知道，其實係有難度。

主席：（經傳譯員）咁其實可以跟番同一個做法喇，就好似其他汽車咁喇，開始嘅時

Transcript by Epiq Hong Kong, Limited

候係自願性，冇人做，跟住法例規定硬性要做喇，而家所有人上車都會戴安全帶？

鄺子憲先生：（經傳譯員）係，主席，我同意。但係同時亦都要睇番公眾小型巴士，其實法例規定硬性係需要戴安全帶嘅，但係我今日可以見到乘客真係去符合法例規定有做嘅係好低，所以有其他更好嘅方法說服公眾，要佢哋戴安全帶，但係點做到，我就畀唔到一個好肯定嘅答案。

主席：（經傳譯員）正如好似話雙黃線唔可以泊車，咁但係我哋見到喇，其實喺香港行就見到喇，法律執行係一個問題。

鄺子憲先生：（經傳譯員）冇錯，執行法例係另外一個嘅問題，我其實係同情執法機構或者部門，因為睇番道路安全，無時無刻，喺任何嘅地方都會見到有好多唔同嘅人犯唔同嘅法例，包括安全帶，所以如果係淨倚賴執法係好難㗎。

主席：（經傳譯員）咁其實--但係有時--即係做得到都會有好處--有益處，係咪？

鄺子憲先生：（經傳譯員）係，我同意。

黃女士：（經傳譯員）喺呢份文件裏面，亦都有講過其他嘅安全設備嘅，睇番第 98 頁喇，就係喺專營巴士上使用安全設施，咁呢一啲嘅電子穩定控制系統喇、傾側穩定控制系統喇。同時，喺你文件裏面，818 頁都有見到類似嘅建議嘅，就係電子穩定控制系統，...

鄺子憲先生：（經傳譯員）喺未講設備之前喇，有關於巴士設計嗰部分你提過，喺 786 頁，其實呢個就係你第一樣講嘅，就係話呢一個巴士前面係令佢設計得更加安全，目前喺巴士前方有咩嘢唔安全嘅地方呢，即係比較唔安全喇？

鄺子憲先生：（經傳譯員）上層，巴士上層前方係空間好少，呢個就係嗰個嘅撞擊吸收力區。巴士上層前座有安全帶，其實係對於某啲情況係有用㗎，譬如當巴士突然奪車，或者撞向防撞欄或者係同一啲比較細嘅汽車撞埋，但係雙層巴士如果喺追撞貨車、貨櫃車或者撞橋墩，上層前方嘅乘客就算有戴安全帶都會受重傷。呢方面我或者有請高醫生作進一步嘅解釋。

高兆祺先生：主席，如果--即係就算有冇戴安全帶都好喇，如果嗰個車廂係被壓扁，譬如話係呢一個巴士嘅上層前方，其實就係內部如果冇足夠空間係承受呢一個車廂壓縮嘅話，就會壓到個乘客，令到乘客會內傷。咁通常我哋見到嘅就會係呢一個盤盆骨、胸腔係會有受到呢啲嘅傷害嘅，如果個撞擊力吸收區係唔受的話。所以鄺生提及到就話巴士上層前座嘅乘客有冇戴安全帶都好，佢哋其實受嘅風險係較高嘅。

主席：（經傳譯員）咁從我哋睇到嘅相，大埔交通意外，即係 2 月 10 號嗰宗嘅交通意外喇，係巴士嘅前方係嚴重損毀㗎，係嘛？你冇睇過啲相嘅話，可以出聲。

鄺子憲先生：（經傳譯員）我有睇過啲相。

主席：（經傳譯員）可能呢個係另外一個即係損毀嘅原因。

鄺子憲先生：（經傳譯員）其實對於嗰一次意外，實際係因為咩嘢原因我就唔知㗎，究竟係巴士翻側，直接翻側砸咗落去巴士站上蓋，定係話巴士站上蓋嘅建築物插咗入去巴士車身，因而令到傷亡人數較高，呢個我其實就唔係好肯定㗎，要等到有一啲嘅嘅確實證據先知。咁但係正如喺報告裏面所講，我理解到呢啲傷勢嘅--傷勢喇，咁同埋嗰個嘅機制，咁但係我哋可以就引入一啲特定嘅措施，包括安全帶，咁我哋其實要明白對於某啲嘅安全措施可能係有個特定嘅機制，喺某個特定嘅情況先至會有用㗎，咁所以我哋係需要先理解，要進一步理解係撞擊同埋呢一個傷勢嗰個關係先至知嘅。

黃女士：（經傳譯員）鄺先生同埋高醫生講到呢一點，我就係想睇番第805頁，即係話你哋2018年4月嘅陳述書，底下嗰度講到話係將佢分區，咁同埋嗰個翻側嘅測試，呢一個就係聯合國嘅規則，2006年嘅規則㗎。你就係話嗰個規則就係好多地方都採用咗喇，要求巴士嘅架構就有足夠嘅強度嚟到就係進行咗呢個翻側測試之後，佢嗰個剩餘嘅空間都仲係有去到某一個標準嘅，要確保乘客唔會係死亡㗎。你意思係咪話我哋應該引入呢一個規則，要求巴士製造商或者巴士營運商係要用某一啲物料嚟到去製造嗰架巴士，嚟到確保就係喺相撞之後仲係有足夠嘅剩餘空間，個空間唔會被擠壓呢，可唔可以解釋一下？

鄺子憲先生：（經傳譯員）我唔係巴士設計嘅專家，我嘗試去研究一啲文件，有幾份文件都係關乎巴士嘅上層結構㗎，我知道就係聯合國佢2006年嘅UNECE 66嗰個規則就係講及嗰個翻側嘅測試就係用呢個單層巴士嘅，咁個概念係點呢？就係當架巴士就係翻側嘅時候，至為重要嘅就係佢嗰個結構就唔會就係嚴重變形，否則嘅話，坐喺車上嘅乘客就會被壓扁嘅，咁好容易就佢哋就會係因為喺翻側嘅時候就係個空間收窄喇，佢哋就會撞落個路面嗰度。咁係要求佢哋個空間係唔會被擠壓嘅。

但係我知道嗰個測試係應用於單層巴士嗰度㗎，其實喺2009年嘅時候，曾經有一位專家，係聯合國嘅專家都係有建議，就話應該包括埋雙層巴士嘅。我唔肯定究竟而家嗰啲規則更新咗未，我亦都唔肯定雙層巴士究竟有冇做過呢啲翻側嘅測試嘅。但係我嘅理解就係呢個翻側嘅測試係一個簡單嘅翻側測試，換句話講，就係巴士向一側就係跌落去喇，就唔係講話係會首先跌落嗰個巴士站上蓋或者係跌落一埲牆，又或者係跌落個安全防撞欄嗰度嘅。另一點就係話嗰個重點係在於嗰個測試嗰個目標就係話希望係確保剩餘空間依然係保存到㗎。

乘客，如果佢嗰架巴士係翻側嘅話，佢會受不同程度嘅傷勢嘅，做呢個測試都係有助，不過亦都唔係就係靠咁就得喇，因為係會有各種不同形式嘅受傷㗎，所以或者呢方面想問下高醫生，唔知有冇嘢補充喇。

高兆祺先生：如果雙層巴係翻側嘅話，有兩樣嘢要睇，第一就係佢個上層架構係唔係好似鄺生所講咁樣係保持冇變形喇；第二，我哋要確保車上嘅乘客會唔會就係移動得好利害，即係會唔會喺窗外拋咗出去呢，又會唔會就係衝咗去砸落去第

二啲乘客身上㗎。因為如果一個人佢係昏迷，但係仲係有呼吸，咁但如果佢身上有兩、三個第二啲嘅乘客砸住佢嘅話，其實佢可能就係因為人哋其他乘客嘅重量壓住佢，令到佢係窒息㗎。所以我哋要考慮嘅亦都要考慮埋呢一點，即係話萬一有一架巴士係翻側嘅時候。

黃女士：（經傳譯員）好，唔該。或者等我哋再睇番運輸署嘅文件 TD-1 98 頁，我哋就係講到係電子穩定控制系統同埋傾側穩定控制系統㗎，我諗你自己份文件就係喺 786 頁嗰度亦都有係講過㗎。對於呢一啲嘅系統，你知得多唔多？

鄺子憲先生：（經傳譯員）再一次我想講喇，喺車輛設計方面我唔係專家，不過我係有睇過呢啲電子穩定控制系統嘅資料嘅，我明白佢嗰個理念喇，咁同埋呢一個科技亦都已經相當成熟嘅。我認為--我喺報告嗰度我就認為我哋係會建議係起碼去詳細啲睇一睇呢一個控制系統㗎。

黃女士：（經傳譯員）係，實質上運輸署亦都有提倡使用呢一個系統嘅，或者大家睇一睇呢個第 100 頁吖。

主席：（經傳譯員）邊一個文件夾呢？

黃女士：（經傳譯員）TD-1，我仲係喺同一個文件夾，不過就係想請你睇第 15 段。我哋睇睇第 15 段吖，嗰度就話其中一位係巴士製造商咁有咁嘅建議，就係話佢哋新嘅現存嘅巴士都已經係有呢個電子穩定控制系統㗎。咁香港嘅專營巴士大概百分之 2.8 就係又喺呢一個製造商採購嘅，就已經有埋呢個電子穩定控制系統喇。製造商亦都再進一步講，佢哋嗰個電子穩定控制系統其中一個功能就係傾側穩定控制系統，就係用電子控制嘅懸掛系統嚟到保障呢個翻側嘅，以免翻例㗎。佢就話佢--不過就係話縱使就係有咁樣嘅裝置，係其實如果嗰架巴士駕駛不當，譬如話放肆咁樣駕駛，都依然係難免係翻側㗎，個巴士依然就會係因為佢離開路面--脫離路面同埋嗰個角度--車身角度太高都會翻側嘅，咁所以就唔能--而呢度就係話所有嘅運營商就係同意係有裝埋呢一個系統㗎，即係當佢哋買新車嘅時候。我想問下喇，英國、法國，你話進行話一啲項目研究吖嘛，你知唔知佢哋嗰方面嘅情況係點呢？有冇呢一個電子穩定控制系統？

鄺子憲先生：（經傳譯員）我呢方面冇資料，我知道佢哋用得有幾廣泛，我亦都唔知道佢哋有冇喺公共巴士嗰度用。

黃女士：（經傳譯員）你喺文件裏面亦都有講過，話自動嘅剎車系統，你文件嘅第 786 頁，786 頁你嘅文件嗰度你有提過㗎。你可唔可以進一步闡釋一下？

鄺子憲先生：（經傳譯員）呢一段裏面我就提過話應該係進一度研究呢一個系統㗎，自動緊急剎車系統，當然照我嘅理解係一個智能嘅系統喇，如果係偵測到係好快就要相撞喇，譬如話同行人相撞或者就係同前車相撞，咁部車就會自動啟動咗嗰個系統，就係將車停低或者慢低落嚟㗎。我建議要睇下呢一個研究，因為前後相撞係我哋認為最嚴重嘅事項，最需要關注㗎。另外，巴士翻側同埋巴士喺懸崖嗰度跌落去，當然亦都係要關注喇，不過前後相撞係較常見，亦都往往

喺高速公路嗰度發生，亦都往往引致多人傷亡，而上層嘅乘客往往亦都係受嚴重嘅創傷嘅。所以我嘅理解係話有啲巴士公司已經係引入咗呢一啲嘅系統㗎喇。或者係肯定咁去做，或者係作為一個試驗咁去做。我認為呢個係一個好好嘅一種功能係需要去進一步研究嘅。

黃女士：（經傳譯員）或者我哋又睇番運輸署嗰份文件喇，係102頁，TD-1嘅102頁，呢個就講車速顯示器。

主席：（經傳譯員）我哋未繼續落去之前，我想問下工作小組--有一個工作小組就係睇下嗰個採納先進科技嘅，佢哋嗰個結論係點？

黃女士：（經傳譯員）我相信佢哋未睇呢一個議題嘅。

主席：（經傳譯員）我想問避免相撞，喺103頁底下嗰度係有冇提及呢件事？嗰度就有兩件事情嘅，一個就講保持嗰個行車線，另一樣就係關於--好似鄺生所講喇，即係頭尾相撞嗰樣嘢嘅，一個就係要保持你架車喺嗰個行車線度，另一個就係避免你同前面係太近又或者前車停車你又唔停，咁你又撞埋落去又或者係撞到行人。

黃女士：（經傳譯員）係，啱，103至到104頁。或者我哋睇呢個103頁喇，底下嗰度，當架巴士就係太貼前車--第24段，當架巴士係同前車太貼嘅時候，就會有一個訊號，係聲音同埋影像嘅，就會有個訊號提醒嗰個司機。有啲系統就會有埋嗰個剎車嘅支援嘅，咁若果佢唔係--喺嗰個警告嘅之後都唔作回應，嗰個剎車支援功能就會係啟動嗰個剎車系統嚟到係儘快回應喇，因此嗰個就會踩嗰個腳掣㗎喇。咁若果係就嚟要撞車喇，咁佢又冇去踏個腳掣嘅話，有啲新嘅系統就會就係大力咁樣係自動剎車嚟到去避免--嚟到係等嗰個撞擊力係減弱嘅。

我哋亦都知道嗰三家巴士製造商對呢一個睇法係有咩嘢建議嘅，第26段，佢哋三間製造商都話其實亦有啲已經係有嘅，或者係第三方嘅保持行車線嘅系統，新車、現有嘅車都可以有嘅，不過佢哋有保留嘅，因為香港嘅交通繁忙喇，咁而且經常就會係換線嘅。

主席：（經傳譯員）我哋而家係咪講緊另一個題目？一個就講頭尾相撞，一個就係轉換行車線或者唔轉換行車線，我想問下喇，佢哋究竟嘅睇法係點呢？

黃女士：（經傳譯員）係喺最後嗰段嗰後嗰句嘅，有一啲係--嗰個巴士營運商就唔認為係安裝咗呢個碰撞避免裝置或者係保持行車線裝置係有效咁樣樣，令到佢哋嘅服務更加安全。似乎佢哋就係個睇法係唔同嘅，對於話呢一啲係避免碰撞嘅系統係咪真係有效、有用，佢哋嘅睇法係唔同嘅。我就想問下你嘅意見喇，因為喺你自己嗰份文件嗰度，你又提出呢一個建議嘅，你就覺得有咁樣樣嘅系統就會係有助嘅，咁想問你而家嗰個回應係點喇？

鄺子憲先生：（經傳譯員）當然，引入任何一種新嘅系統首先都需要係用巴士營運商係有一個透澈嘅討論，而且亦都要有巴士司機嘅回饋先至可以做嘅。亦都有可

能就係話太多系統嘅話，就係分散咗佢嘅注意力，又或者因為係好難用，或者有其他唔想要有嘅作用而係帶嚟唔好處嘅。講到呢一個自動嘅緊急剎車系統，呢個建議就係由於我哋真係有好多前後嘅碰撞以及佢引致嘅問題，而且好多海外嘅營運商亦都已經引入咗呢套系統，又或者好認真咁樣樣去考慮係進行呢個試驗。呢度呢一段我唔係太肯定係咪話營運商認為佢係冇乜用、冇乜效，究竟係嗰個討論嘅結果係就話佢哋唔想要吖，定抑或佢哋有一個良好嘅理據，就係覺得唔好用，又或者--定抑或係佢哋起碼都想進行一下一個試驗計劃呢？由於呢度資料不足，我就好難作回應㗎。

主席：（經傳譯員）我幫下你手喇，我喺城巴度有啲資訊嘅，佢哋話就係進行過一個試驗嘅計劃嘅，佢哋就發現呢一個就係太多警號就發出嘅話，就會好分心㗎。或者我哋休息之後係可以再係話畀你聽有邊個部分就可以睇一睇嘅。或者黃律師，喺城巴嘅口述證供嗰度其實係有提過㗎。佢哋係有一啲系統就係可以或者參考番，咁之後你可以係再回應喇。我哋大家都休息一下喇，你休息下，我哋又休息一下，休息二十分鐘，唔該。

上午11時16分聆訊押後

上午11時41分恢復聆訊

出席人士如前。

主席：（經傳譯員）黃律師，唔該晒。

黃女士：（經傳譯員）喺我哋小休之前，講緊關於一系列嘅事項㗎。主席問咗問題關於其中一家巴士營運公司城巴嘅問題，就係話即係呢一個係車輛呢，係保持行道嘅設施。咁請大家睇番呢一個嘅TSCP-1號49頁嘅，咁呢個係當時嗰個嘅聽證會謄本嚟㗎。應該呢就係TSCP文件49至到呢51頁。

咁鄧樂勤資深大律師代表委員會問問題，第19項。鍾先生係代表城巴有關於一啲嘅技術設備，佢就話--我請你睇番26段，呢一段呢就係我哋睇過嘅。上面紀錄話巴士營運商呢係冇考慮到防撞同埋呢係將汽車保持行車線嘅設施係考慮安裝，呢樣嘢其實係會提升巴士操作安全。咁係呢樣嘢喺26段喇，佢話「你係咪睇過呢？」佢話「係。」跟住鄧樂勤律師就話嘞「咁我嘅理解，咁講啱唔啱呢？即係有關於公司嚟睇，係冇準備考慮安裝呢啲設備㗎。」

咁鍾先生就話等我首先解釋喇，係呢一啲嘅設施喺2014年嘅時候，公司當時真係有進行測試㗎，呢個呢其實係叫做神眼。神眼係一個係協助駕駛嘅設備嚟㗎。當時呢主要適用於私家車，其實呢就係會利用視覺嘅幫助，去感應前面有啲

乜嘢，跟住系統就會進行分析，然之後呢計算係汽車同埋前面嗰個物件嘅距離，同埋後面嘅距離，然之後再計下幾耐時間就會相撞，然之後發出一個嘅警號畀駕駛者。咁我哋其實就喺其中三架巴士安裝咗神眼，進行測試咗四個月，咁亦都安排唔同嘅職工會，即係巴士車長代表，同埋係另外五十多位巴士車長係去駕駛呢啲嘅巴士，咁同埋呢就喺呢個正常嘅服務時間就進行，咁跟住就會叫佢填番問卷，畀番意見我哋。咁我哋最後發現呢，其實呢啲設施就唔係咁適用㗎，譬如話如果係車進入呢一個巴士停車處嘅時候，咁咪感應到前面有人，因為你都知道巴士站係有人等車㗎喇，咁所以跟住就會響聲嘞。

但係其實當時嘅巴士車長都未拉直架車，咁所以就會有警號。咁如果架巴士係停得好近前面架巴士嘅話呢，咁其實呢就會係--即係話呢如果交通係行得慢嘅時候，又會響警號嘞，意思即係話呢，成日都會響警號。咁有四成六嘅巴士司機同我哋講，就話咁樣成日響警號，其實就會係滋擾，所以最後佢哋就唔理呢個警號嘞，而有五成嘅巴士司機就話畀我哋聽，神眼係冇幫助到佢哋安全駕駛。咁所以睇番呢個神眼嘅功能，同埋巴士車長嘅意見，仲有就係話安裝價錢非常之貴，所以我哋就決定唔再跟進，呢個係我哋嘅經驗，咁我哋喺會議上面亦都有講到呢樣嘢。

咁想請你睇番嗰份報告，報告就喺證供裏有提到。就係呢一個城巴文件 3 號，係 601 頁。呢個首頁就係神睇嘅試用結果，601 頁。603 頁提及到進行測試嘅時間，背景第 2 段可以見到嘞，喺 2014 年嘅時候進行試用。睇番第 2 段，第 2 段，「神眼試用」咁就係分開兩期。咁第 2 段嘞，問卷就係發出咗畀 13 個員工表同埋係 54 位有駕駛呢一架試驗車嘅巴士車長去收集佢哋意見。跟住繼續睇番 609 頁。寫出咗呢一個試用結論同埋建議嘅，第 5 段。接受率方面嘞，五成嘅車長，意見就話神眼係冇幫助到提升駕駛安全，四成四嘅巴士車長意見就話，神眼警號就會係造成滋擾，咁所以呢對於呢一個成效係存疑，所以決定就唔會再進跟使用神眼。

咁喺最近嘅一份文件，由運輸署喺 5 月，今年 5 月呢就係提交畀我哋嘅文件係 TD 運輸署嘅 5 號文件 1691 頁，咁呢一個第 12、13 段可以見到，13 段呢仍然有提及。由 12 段嘅尾數上第 5 行就話，呢一個防撞同埋呢保持行車線嘅設施，咁其實就係詼呢個工作小組佢有睇過，工作小組嘅意見就係話，喺呢啲車上嘅設施可行性同埋適用性，咁其實就要進一步再研究。

13 段中間就話係冇一個嘅係最後嘅決定，即係關於使用新技術方面，我哋預計係呢一啲提升安全措施同埋設備，安裝喺車上面嘅結果應該喺 2018 年 6、7 月就會詼發布，咁所以為咗完整起見，就咁講番畀你聽，係冇一個最後嘅決㗎，只有城巴係有進行過測試，咁係測試呢就係根據 54 位有駕駛呢一架巴士嘅意見。咁睇番喇，你面前嘅資料，咁你係對於呢即係有關於呢一個嘅自動煞車系統喇，同埋呢一個緊急嘅系統，你嘅意見係咩嘢？

主席：（經傳譯員）鄺生，你嘅意見係唔係話係要試用，而唔係直接話喇，你建議使用。

Transcript by Epiq Hong Kong, Limited

鄺子憲先生：（經傳譯員）主席，我哋建議進一步研究所有嘢都要睇番嗰個證據同埋實用性。

主席：（經傳譯員）我咁樣講啱唔啱呢，我有冇記錯，阿黃律師。神眼或者有關嘅呢一個詼遙距嘅溝通系統，係咪淨係香港呢？倫敦有冇用呀？

黃女士：（經傳譯員）我相信喺英格蘭喇，係喺一個研究裏面有試過，所以就有建議喺香港使用。

主席：（經傳譯員）咁最近喺倫敦係咪有用過，即係呢個 2014 測試之後。

黃女士：（經傳譯員）係，係一個最近嘅報告有，我就會搵番有關嘅參考號碼畀你。或者我想再...

主席：（經傳譯員）香港唔適用其中一個原因，就係巴士司機，其實就係同前車嘅巴士距離呢係非常之近嘅，尤其就係即係行緊車嘅時候，所以就會成日響聲囉。咁其實可以再調查嗰個同前車嘅距離，如果你同前車行得咁近嘅話，咁行人都過唔到嘞，咁尤其就喺呢一個停緊車嘅時候，咁當然就成日會響喇。

鄺子憲先生：（經傳譯員）主席，我哋冇錯，係需要理解多一啲嗰個準備，基準，呢啲設施呢個技術會不停改進，我明白城巴有做咗一個好好嘅測試，之後亦都有做調查，咁呢方面我冇任何嘅意見。我哋建議呢啲嘅系統係需要進一步研究，係基於有需要，因為一啲嘅前後撞車，係好嚴重㗎，咁同埋呢係對於行人有風險，咁如果呢啲系統係夠成嘅熟話呢，係可以解決到我哋嘅問題，但係當然所有事都係取決於試用，同理要證明到真係有效。

主席： Thank you.

黃女士：（經傳譯員）唔該。我哋未講另外一樣嘢之前呢，我想問你幾個問題，就係一啲運輸署嘅建議，其中一個呢就係車速顯示器。就係呢一個連輸署文件 1 號 102 頁，就係 8 號文件嚟嘅，即係關於新技術嘅 8 號文件。21 段最後一行喇，就提及到話現有行車車速顯示器喇就係喺呢一個嘅小巴上面有加，咁其實就喺第 6 圖，圖 6 號嗰度顯示到。

跟住睇番第 22 段嘞，上面就講咗專營巴士經營者嘅意見，喺廿二段最後嗰部分。咁就話有關於呢一個嘅加裝顯示器喇，咁其實佢哋就話會因裝呢個顯示器呢，會引起乘客同埋司機嗰個嘅衝突同埋爭拗嘅，咁所以呢令到巴士司機呢會有更大嘅壓力，安裝呢一啲嘅設備，其實對於提升巴士安全未必有用㗎。咁我哋知道小巴其實已經安裝咗呢個車速顯示器，所以對於專營巴經營商呢，佢哋對於呢方面嘅意見，即係話關於使用呢個設施提供巴士安全有咩嘢意見呀你？

鄺子憲先生：（經傳譯員）我理解佢哋嘅立場，但係就我哋嚟講，就係要睇下安裝呢啲儀器係咪真係提升到安全。我想指出喺報告裏面曾經有提過呢個速度儀嘅，速度計，咁其實就係用呢一個數字顯示畀司機睇，而唔係話呢一個詼模擬嘅形式去顯示畀司機睇，因為我哋要確保司機知道自己揸緊幾快。有啲車長，可能

唔自覺就揸快咗，但係而家我哋覺得如果係而家呢個模擬制式呢，司機係好難睇得到自己揸緊行得幾快，因為唔係數碼化，所以呢方面我哋認為呢如果可以將速度計喺一個適當個位罝用數碼顯示形式出嚟，就話比較好。咁有關於將車速顯示畀乘客睇呢，我哋當知道有咁樣嘅建議之後，其實我有諗過，乘客投訴要話畀司機聽，話佢太快呢，其實我覺得咁樣做就唔係太有效，車速顯示器其中一個用法，其實就係幫助稽查員好快知道呢個巴士司機係咪嚴重超速，或者超過咗既定嘅車速限制，呢個係有好處嘅，不過正如我頭先所講，如果依賴乘客去投訴，就我經驗嚟講，對於係咪真係有效喇，我就有懷疑，因為要睇番安裝其實係有成本，所以我哋需要進一步研究，可能要再試行一下先知，當你話嘞，乘客投訴就唔係咁有用嘞。

主席：（經傳譯員）咁你嘅意思係咪指呢，即係乘客當場向司機投訴呀？

鄺子憲先生：（經傳譯員）主席，你意思指我嘅經驗呀？

主席：（經傳譯員）唔係，頭先你話你覺得呢，用乘客投訴唔係咁有用，你當時諗嘅係咪話，乘客即時同當場向司機投訴佢揸得太快？

鄺子憲先生：（經傳譯員）我唔會而家作出結論，要決定係唔容易，因為我哋要睇番司機嘅行為，同埋實際操作係點，因為好多嘅乘客呢，我假設佢哋都唔理，只要巴士唔係揸到瘋狂地快，佢哋都未必會留意到譬如一啲好繁忙嘅市區道理，可能行緊45、50公里已經好危險，但係乘客可能只係有興趣要準時到達，對於一啲車速細微嘅變化呢，佢哋唔係咁有興趣知嘅，咁當然喇如果司機係揸得嚴重地快，就係問題嘞。如果係喺咁嘅情況，乘客同司機講聲，等佢唔好再揸得咁快，係有用嘅，不過如果係咁嘅情況底下，其實司機本身都知道自己揸得係太快，即係快過佢哋公司或者法例規定嘅限速，如果乘客喺揸緊嘅時候，乘客喺司機揸緊車嘅時候呢，咁樣同佢講可能就會引致有衝突，咁樣會令件事複雜化，所以我想講嘅就係話，如果我哋集中番即係速度顯示器喺呢一方面嘅使用，我就覺得對於提升巴士安全就唔係咁肯定嘞，咁但係不過要詳細再研究。

主席：（經傳譯員）運輸署有一個投訴嘅熱線號碼，係咪呢？

鄺子憲先生：（經傳譯員）主席先生，係呀。

主席：（經傳譯員）你有冇研究過嗰個機制，即係點樣樣係可以進行投訴？

鄺子憲先生：（經傳譯員）主席先生，照我所知，其實有多個途。

主席：（經傳譯員）係呀，有個表格呀，係咪呀？

鄺子憲先生：（經傳譯員）係喇，有個表格喇。

主席：（經傳譯員）嗰個表格有冇一個格仔，就係話係巴士超速行駛？

鄺子憲先生：（經傳譯員）主席先生，我唔知。

主席：（經傳譯員）好，其實我自己睇嗰份表，就搵唔到有咁嘅格仔嘅，或者你哋可以考慮下咁嘅情景，有一個乘客就係擔心就係司機嘅車速，亦都係擔心佢嗰個行為。因為車速本身有陣時都未必一定係危險㗎，係咪吖？

鄺子憲先生：（經傳譯員）對唔住，主席先生。

主席：（經傳譯員）單單車速本身並不一定係就係危險嘅，係咪吖？

鄺子憲先生：（經傳譯員）係呀，主席先生，係唔單單係車速，而係嗰個衝突嘅程度，同埋睇下佢嗰個情況。

主席：（經傳譯員）由於已經係有一個投訴嘅機制，如果車上嘅乘客佢懷疑架車就係行到65，就唔係喺嗰個50公里嗰個區嗰度行50，如果佢有懷疑嘅話，咁嗰個乘客譬如話佢已經用緊個iPhone喇，就係佢可以即時影張相，然後將佢用電郵發送畀運輸署，咁呢或者係投訴嘅熱，咁你就有張係影到嗰個車速，咁咪得囉。

鄺子憲先生：（經傳譯員）主席先生，我諗都好主意嘹㗎，咁係亦都要睇下究竟將一個將係車速顯示器放置喺邊一個位置。你要考慮到你影相，你要影埋呢前面條路，你先至可以證明到架巴士個位置喺邊，嗰個顯示器或者要有埋巴士嘅路線號碼，巴士個車牌號，同埋佢嗰個位置。如果睇唔到嘅話，就可能會司機同顧客之間就有正面衝突，司機又要睇唔到嗰個乘客喺度影緊相先得，如果唔係有衝突。

主席： Thank you.

黃女士：（經傳譯員）鄺先生，我想請你睇埋呢係運輸署所探討過另一個裝置。咁呢就係睇TD-1，105頁，第27段，就關乎呢個司機監察裝置。呢個裝置呢就話呢係愛嘹監察司機嘅表現，咁如果見到佢注意不足嘅話，又或者佢昏昏欲睡呢，就會係警示嗰個司機，咁譬如話見到佢有一啲可能係詼不安全嘅行為，譬如話佢望側邊，瞌眼瞓，昏昏欲睡，姿勢唔好呀，咁你就會畀一啲係聲音，同埋影像警告佢。

你跟住睇後嗰版嘞，3間嘅巴士製造商就話，佢哋呢啲係第三方嘅系統，而且係獨立於巴士系統，喺技術上呢就可行嘅，就可以監察車長嗰個情況，咁但係如果係虛報嘅話，誤報嘅話呢，就會有不必要咁干擾到個司機。咁另外呢係兩間營運商，就話佢哋呢喺佢哋4部巴士嗰度呢，做過3個月嘅係試驗，咁呢就應該會喺2018年5月初嘅時候開始去做，運輸署呢就會同營商呢就係一齊合作，就睇睇呢個系統呢係有冇效嘅，即係話喺試驗完咗之後，睇下有冇效嘅。鄺生，你有冇聽過呢啲係司機監察系統呢？

鄺子憲先生：（經傳譯員）我係知悉有呢啲系統嘅，不過呢我冇研究嗰個詳情。譬如話司機疲勞，或者係注意力不足，呢啲都係可能引致交通意外嘅成因，不過再講一次，究竟呢啲系統係咪有助，我哋要睇番剛才所提及嘅問題，譬話姿勢不

好，注意力不足等等，係咪真係引致我哋香港巴士碰撞以外嘅主要成因，我而家持開放態度，我仲係注意呢聽下大家詳細嘅意見。

主席：（經傳譯員）講到疲勞，如果係一個風險嘅因素，我想問嘞，你認為唔認為係司機疲勞係香港巴士以外嘅主要成因呢？

鄺子憲先生：（經傳譯員）疲勞，就會視乎呢就係駕駛時數，休息時數，亦都係視乎個別人士佢可能有種種原因，引致有咁嘅問題，而令到佢好疲倦。關乎呢個課題呢，我哋喺我個報告嗰度篇幅並唔係好長，我冇寫好多，因為我冇研究呢一個課題，雖然我做嘢嘅工作嘅其他環節，譬如話係揸呢個長程車，我哋都當然係要關注呢一個司機疲勞嘅問題。喺香港呢我哋都要睇，因為如果你引入任何嘅系統，都應該係要睇番我哋喺現實生活裏面，究竟有邊一類嘅係撞車嘅意外，同埋我哋面對嘅係邊一類嘅風險，我諗目前我講嘅就係咁多。

主席：（經傳譯員）你知唔知道有冇人係打算呢就去研究一下，係呢個司機疲勞呢個風險因素呢？有冇人做過研究，有冇人做過呢個問卷調查呢？知唔知呢，有冇呢啲嘅係實證呢？

鄺子憲先生：（經傳譯員）你講喺香港呀？

主席：（經傳譯員）係。

鄺子憲先生：（經傳譯員）主席先生，我唔知有咁樣嘅工作做緊。

黃女士：（經傳譯員）小休之前，鄺先生，我哋呢就喺度講緊就係巴士上層車頭部分嗰個結構，同埋呢對於坐喺上層前排嘅乘客佢嘅潛在風險，我呢度呢係想係將大埔巴士意外嘅一張照片畀你睇，請大家將佢打番出嚟。呢張相你可以見到當時嘅事件，你見到呢係上層車頭全部係毀壞，睇番呢張相，幫唔幫到你去講及話車頭應該更加穩固？你呢就係喺 4 月份交嗰份諗陳述書，有一個部分係咁講。

鄺子憲先生：（經傳譯員）睇番呢張相，我諗呢一個碰撞喇，其實呢當然一架車撞車嘅時候，可能有不同嘅情況，可能有一部車就係撞一個高嘅物件，譬如話前面嘅貨櫃車撞埋去橋躉，又或者係同燈柱相撞，係同突出嚟嘅簷篷相撞，係即係建築物突出嚟簷篷撞埋去喇，但係呢度呢一個個案呢，我諗係一個綜合嘅因素造成嘅撞車，可能架巴士係撞咗落嗰個巴士站上蓋，嗰個上蓋就個高度就係高度呢係撞爛咗佢嗰個車頭上層嘅結構，又或者佢撞咗埋去條燈柱，但同時亦都係㗎巴士係有翻側。正如我所講，架巴士可能係直接呢翻側跌落去個巴士站上蓋度，喺呢個過程，巴士站上蓋本身亦都呢係破壞咗，撞爛咗巴士個車側嘅車身，車頭，或者甚至乎係直接呢係撞擊呢係巴士車箱嘅內籠，直接呢係撞到，係傷害到啲乘客，不過我只能夠作一個揣測。

主席：（經傳譯員）我哋唔需要喺度揣測，其他人可以喺佢哋進行調查之後話畀我哋聽，佢嗰個結果係點樣樣。

鄺子憲先生：（經傳譯員）係嘅，主席先生。我諗我哋要明白嗰個碰撞嘅基理，亦都要明白嗰個受傷基理，咁樣先至可以讓我哋以實證為本，咁樣樣去制定一啲策略同埋措施，好，唔該。

黃女士：（經傳譯員）鄺先生，委員會--你畀咗陳述書之後呢，我哋再向你問過一啲問題，問及呢你喺網上所披露發表嘅一啲文章。820-1 嗰頁，第 8 段，或者我哋將佢掃落去下面，第 8 段，嗰度呢就咁講，你喺你個網頁嗰度係有一個部分就係講及，交通車速數據，你話呢你同意呢就係畀我哋呢係登上呢個網站嗰度，不過你話由於嗰個資源嘅問題，而你呢一個工作呢就唔係有系統嘅，只不過係間中做嘅，同埋你哋自己係有相關嘅人士就去做，你話「今晚」，即係 7 月 11 日號，你就會見面呢就會進行新嘅調查，你話呢就會去做尖沙咀、深水埗、係全錦公路、禮頓道同埋大坑道。咁你呢就係話為咗支援或者支持聯合國全球交通安全周第 4 次咁嘅工作，咁而就係話拯救生命慢車，呢個 2017 年 5 月嘅，你話呢你哋就同一個區議員同埋一個係專業製作人呢，就係做咗一段短片嚟到係提升大家嘅意識。咁嗰度就係大坑道，嗰度就係見到好多車呢，甚至乎夜晚係個車速係超過咗 80 公里。我想問，當然你呢一個係一個研究，係你自己自發咁樣去做，你呢就去同其他有興趣嘅人士一齊去做，係咪呀？

鄺子憲先生：（經傳譯員）講到呢個大坑道呢一個工作，係。我哋係樂意呢同任何同呢個課題有興趣嘅人士合作，協助嘅，我哋呢就係唔係盈利嘅，唔賺錢嘅，喺政治上我哋亦都係中立，我哋只係需要有人幫我哋手一齊去做，因為呢我哋好希望將嗰個信息呢係傳揚出去，希望呢係社會裏面都提高呢一個意識嘅。我哋睇呢啲車速呢，其實係人手嘅工作，係好花資源嘅，所以呢我哋唔能夠好有系統咁樣去做，我哋想做得更多，不過做唔到咁多。

黃女士：（經傳譯員）呢度睇到一張相，我想問係咪鐳射槍，係咪你所用嘅鐳射槍呢？嚟到係去睇睇嗰啲車，去偵查嗰啲車嘅係車速呢，係咪呀？

鄺子憲先生：（經傳譯員）係呀，“Tru Speed”就係嗰個牌子 T-R-U Speed 就係嗰個牌子名，係鐳射槍，咁呢個係車速嘅鐳槍，係我自己擁有。

主席：（經傳譯員）〉製造商係邊間？

鄺子憲先生：（經傳譯員）我諗係 Laser Technology。

主席：（經傳譯員）我想問，執法機構係咪都係用呢一啲工具呢，本港嘅，外海嘅係咪都用？

鄺子憲先生：（經傳譯員）我理解都係㗎，咁亦都不過視乎嗰個型號。

主席：（經傳譯員）香港係咪都用？

鄺子憲先生：（經傳譯員）主席先生，係嘅。

主席：（經傳譯員）你用嗰個型號係邊一種型號呀？

鄺子憲先生：（經傳譯員）呢個就係型號叫 Tur Speed，但係個型號個號碼係咩嘢呢，我就記唔得準確，我嘅記憶呢就係呢一個型號呢，警方都有用，有一啲新啲嘅型號警方都有用。

主席：（經傳譯員）你呢個型號有幾新呀？

鄺子憲先生：（經傳譯員）主席先生，我買嘅時候，應該係 2011 年。

主席：（經傳譯員）喺呢個調查或者喺其他嘅調查嗰度，想問下，你有冇係特登去睇下監察一下專營巴士佢哋嘅車速呢？

鄺子憲先生：（經傳譯員）主席先生，我哋冇專門為專營巴士係進行車速嘅調查，雖然呢個係好應該去做，因為我哋關注呢個交通安全，我哋都應該係專門去睇一啲專營巴士嘅車速。我都耐唔中係會隨時都有去研究過，去睇過佢哋嘅車速。

主席：（經傳譯員）你有冇揀一啲特別嘅地點去做呢？

鄺子憲先生：（經傳譯員）主席先生，有個地點我想講嘅呢，就係幾年之前我去德輔道中，因為我想去睇巴士嘅車速，我想知道呢由東向西行嘅巴士車速，我想知道佢哋係行乜嘢車速，呢一段嘅德輔道中呢，就係好多行人呢係過馬路，就唔喺行人過路線嗰度，就直接喺嗰度過馬路嗰一個路段，咁而我做呢一個工作呢，我做呢個調查呢，就係想去睇下，究竟一個巴士司機若果見到巴士站有架巴士停咗喺度，而佢要越過呢部巴士嘅時候，個司機會行咩嘢車速，其實嗰個停咗喺度嘅巴士，就會係遮擋咗想過馬路嘅行人，如果有架巴士係高速過去嘅話，或者超速咁行過嘅話呢，根本就唔能夠及時係停到車。

我有一啲加拿大嘅指引，嗰度佢哋有咁嘅建議，或者佢有個咁嘅規則，就係咁講，如果佢哋嘅公共巴士係要超越一部停咗喺度嘅巴士，又或者停咗喺度嘅車輛嘅話，佢哋係唔能夠呢行駛呢係快過 30 公里，我只係隨意咁去睇過一下嗰個情況，但當時見到嗰個最高嘅車速呢，就係 49，每小姐 49 公里。當然我必須承認，我冇係調查咗好多部巴士，譬如話我當時只係睇咗五、六部巴士。

但係主席先生，最近我都係做過一啲車速嘅偵查，因為有一份報章嘅記者，係邀請我去接受佢嘅訪問，喺德輔道中嗰度拍條片，我再用呢一個係鐳射槍呢，就係隨意咁樣去睇一睇德輔道中所路過嘅巴士，佢嗰個車速㗎，見到呢好多巴士呢行到 30、35，每小時 30、35 公里，呢啲呢就係冇任何嘢阻礙佢哋，係自由行車嘅情況，有一架車呢就見到呢紀錄到呢就係每小時 42 公里。我點解佢咁做呢，即係嗰個係最嗰個車速，我咁做唔係想話係話啲車係超速行駛，其實另一個主要目的，就係想講，究竟巴士司機應該行幾多先至啱，對我嚟講 30 至到 35 呢，都係一個係理智嘅一個決定嚟，唔該。

黃女士：（經傳譯員）鄺生，多謝你同我哋提供咁多意見，關於呢個鐳射槍呢個速度計呢，你有冇不時咁樣係進行維護，即係係咪有人做好嗰個維修維護？

鄺子憲先生：（經傳譯員）係，呢個係維修同嗰個保養都好，不時都仲會做一啲校

正。呢個係鐳射槍嚟嘅，即係唔係一個雷達嘅設備嚟嘅，正常就唔要成日校正嘅，咁但係為咗要保持個準確度呢，我會做兩個測試，如果兩個測試都通過，即係正常，咁就應該唔會有咩嘢特大嘅問題。我就會不時咁樣做嗰個測試。

主席：（經傳譯員）呢個誤差嘅幅度係幾呢？根據個製造商所顯示，嗰個誤差率係幾多呢？

鄺子憲先生：（經傳譯員）我冇嗰個實際嗰個數字嘅，就我知道鐳射係好準。咁即係話個誤差呢係會係响某一個幅度。係會對我哋要達到目的嚟講呢，係個誤差係絕對係响我哋要求個範圍裏面嘅。

主席：（經傳譯員）可唔可以講一個數呢？

鄺子憲先生：（經傳譯員）我假設大概係百分之一至二，最多最多都係百分之三。

主席： Thank you.

黃女士：（經傳譯員）除咗個地點，你搵到啲某一啲地點，文件 820-1、820-2 呢個係嗰個雜項 2 嘅文件夾所講嘅之外呢，你有冇同其他合作嘅各方嘅人士考慮探討有冇其他嘅位置你哋可以去做測試呢？

鄺子憲先生：（經傳譯員）或者我想畀一個例子，有個社工就喺荃灣，社工就轉介一個市民嘅意見，佢就比較關心佢屋邨附近一個斑馬線嘅安全情況，佢覺得嗰度個車速太高，咁我就同意做一個測速度，呢個荃錦公路，响嗰個斑馬線過嗰附近嘅地點做嗰個速度嘅測試調查，我就訓練咗嗰個邨民，用正確方法使用呢個鐳射槍速度計，咁佢哋就自己去調查嗰個車速，咁最後呢佢哋就測試咗 800 架車嘅速度，通常喺某一個位置呢，如果你係要有一個係速度分布圖呢，我哋起碼要有 100 架車嘅速度。

黃女士：（經傳譯員）你有冇報告，有冇呢方面嘅報告呢？即係呢個全荃錦公路嘅速度數據同埋報告响唔响度呢？

鄺子憲先生：（經傳譯員）個報告呢我諗我已經交咗出嚟畀你哋，我想聲明。因為將簡體轉做繁體字有啲問題，咁所以我就只係提供咗簡體字嘅報告。呢個亦都係我交咗出嚟畀佢哋嘅報告嚟嘅。

黃女士：（經傳譯員）去番呢個雜項，或者你個報告，講緊第 3 部分，就係嗰個道理設計，呢個都係 786 頁，雜項 2 文件夾，關於道路設計。你有幾個建議，諗總共 6 個建係關於係道路設計，交通管理，呢個對於巴士安全你覺得係好重要，事關重要。第一，就有個足夠係安全嘅保護欄，同埋減少嗰個係斜路尾嘅一啲係斜台嘅石壘，咁就減少市區裏面嘅速度，同埋安全嘅過程設施，巴士站附近，同埋對於等候嘅乘客提供更好嘅保障。

你响 827 頁亦都有一個係--807 頁都有一個諗更進一步嘅闡述，808 頁都係，你就提過係重要嘅，即係防止出事嘅車輛係會同路邊嘅一啲製成危險嘅物件

係相撞，或者係响嗰個斜坡度跌落去，你就提過一啲矮牆。我相信喺睇番個屯門個報告 SEC-2 呢一個文件夾，第 1 頁，咁跟住去到 16 段，係 10 至 11 頁，先睇第 16 段。或者係第 15 開始，呢啲矮牆一啲安全保障措施，防止發生意外嘅時候，會有啲係嚴重嘅程度，佢哋一個係即係個被動式嘅防護設施嚟嘅，就唔會係引致交通意外嗰個因素嚟嘅。

咁呀研究過國際同埋本地嘅標準呢，個委員會覺得而家路政署嘅標準呢，都係同國際嘅做法一致，不過我哋响睇落幾行，呢度响啲關鍵嘅位置呢，有改善嘅空間。因為呢詨嗰度如果係撞咗入去嗰個底牆裏面呢，可能會引致啲致命嘅後果，咁佢就要求有個係採取一個全面嘅管理嘅策略嘅。

咁好嘞跟住 17 段嘞，如果一個堅固嘅設計呢，就可以停止--可以令到重型車輛係根據設計，根據我哋想要嘅方法呢去停低，但係對於個小型車輛呢，可能會製造嚴重嘅係損害嘅，咁所以呢個委會建議呢，為咗改善呢個設計呢，佢建議路政署係研究嗰個所謂佢哋係喺邊笪地方停止嗰個撞離嘅車輛，特別係個响高端嘅地方呢，係睇下個高度係點樣設計，考慮到係好多係雙層巴士。

第 109，第 9.38 段，呢度有啲數字嘅，就係撞擊，如果係雙層巴士，有一個係模擬嘅係意外呢，如果係意外嗰個速度呢 60 公里嘅，咁嗰個撞擊嘅角度係 10 度嘅，我相信呢個報告你有提過呢個嘅，你話 808 你個雜項 2 個文件夾提過，喺呢一段係第 3 段。你就話有啲高架道路呢係冇一啲 L-3，即係第 3 層嘅安全屏障嘅，呢度有話嗰度 60 公里 10 度嘅嚟到撞嘅一個模擬，我哋知道呢啲嘢就係個重要性呢，就係話我要有一啲係特定路線嘅運作嘅規則，咁所以有巴士嘅速度可能需要限制响 60 公里嘅，同埋要响左線，咁就會令到嗰啲揸得唔好嘅巴士呢就唔會係超過呢個矮牆所能夠達到嘅效果。你可唔可以講講呢個設計方面係應該要點樣考慮？

鄺子憲先生：（經傳譯員）我就要先聲明，我本人正如我响今次個聽證會講清楚，我係涉及一個研究項目，呢個政府個研究項目嘅，咁呀呢個同我一路都係詨所講嘅，我諗都同十年前開始，我一路都係咁講嘅，我就唔會講任何關於我而家從事嗰個研究項目嘅，不過我係响呢個研究計劃之外呢，我係有一方面嘅知識嘅。咁回答番你個問題，呢度所講嘅意念呢，就係要制定一啲係駕駛巴士嘅規則，响咁做嘅時候呢，我哋要明白，我哋嘅道路設計嘅一個所謂嘅用容嘅能力，譬如話嗰啲係安全圍欄，佢哋有啲咩嘢作用，作用去到邊個程度。如果巴士係嘅速度係每小時 70 公里，咁同一個撞擊嘅角度，根據個報告，即係 20 度。

報告就話曾經做過測試，不過只係用一個電腦模擬嘅，即係佢曾經做過模擬，就係詨速度係 60 公里，角度係 10 度嘅，咁就變咗嗰個巴士可能會撞穿咗個圍欄，但係呢啲咁樣嘅測試呢，好多時候呢根據某一個速度，某一個撞擊嘅角度，同埋某一個車輛嘅重量嚟到係做根據，亦都視乎有幾多乘客裏面應該個重量就。正如我所引述，咁樣係唔確定嘅。咁可能嗰個巴士可能會撞爛嗰個矮牆。咁應該有多啲資訊關於唔同嘅矮牆，唔同嘅圍欄响唔同嘅道路嘅情況，咁呢個就可

以提供一個好好嘅指引，等政府同埋巴士公司制定一啲特定路線嘅駕駛嘅規距，呢個係為巴士司機提供嘅一啲規則嘅。

黃女士：（經傳譯員）呢度提及 808，你提過有 8 條路，係冇安全嘅圍欄嘅，淺水灣道、大潭道、山頂道、司徒拔道、薄扶林道、大埔道、清水灣道同埋羌山路。當然喇我唔係講會提及你嗰個研顧問個報告嘅。即係話你响嗰個顧問研究發出個指示之後，之前有冇同運輸署提過呢啲路呢？

鄺子憲先生：（經傳譯員）响呢個報告提個情況，其實都講咗好多，好幾年㗎嘞，咁同埋呢個報告編撰呢，係早過你頭先所講嗰個係顧問研究嘅時間嘅。

主席：（經傳譯員）你同邊個提你呢方面嘅關注呀？

鄺子憲先生：（經傳譯員）主席，通常呢我哋提出關注呢，我哋會係向有關嘅政府部門提出，譬如話路政署，運輸署，我就唔記得咗有冇同嗰個局方提出。

主席：（經傳譯員）你有冇攞到咩嘢回應呀？我哋睇到一條路，即係好似一個石牆，又斜嘅路，咁政府有咩嘢回應呀，點解嗰度冇一個圍欄嘅呢？

鄺子憲先生：（經傳譯員）主席，我唔係好記得佢哋實際上具體點樣回應，我假設佢哋明白係咩嘢事，我就記得佢哋都對呢件事有興趣知，做過一啲係詼研究嘅，不過呢個問題係廣泛嘅問題，我就要係不斷重複同樣個，即係向嗰啲部門重複我同樣嘅知悉，呢個問題係一個持續嘅問題，我所關注嘅地方呢，就係冇有改進到？我其實唔知道政府內部現在做咩嘢呢，咁我淨係睇住基於我所見到嘅，就係現場睇到，我提出我意見。

主席：（經傳譯員）呢個都係我想做嘅，咁多年都係一樣。你係咪都係話咁多年都係見番同樣嘅情況？

鄺子憲先生：（經傳譯員）係嘅，不過有啲特別嘅地點呢，可能有啲改進嘅，呢個相片呢，我就覺得比較風險比高嘅。

黃女士：（經傳譯員）我想或者係請你睇一睇大埔道呢個某一個路段嘅，作為例子嘅，我哋提過大埔嘅意外係 2 月發生嘅，咁運輸署呢就即係減嗰個速度，就限制速度，同埋將嗰個路嘅標誌改變咗，道路嗰個地下嘅標示都改咗，兩個月內就做咗嘞。咁我想你睇一睇，呢份係大埔區議會文件，係 354 頁，TD-1，354 頁。

主席：（經傳譯員）咩嘢日期呀？

黃女士：（經傳譯員）2018 年 4 月 9 號。

主席：（經傳譯員）呢個係運輸署提供畀大埔區議會嘅文件呀，係為區議會會議提供嘅。

黃女士：（經傳譯員）你可以睇到，首先呢就話檢討過嗰個速度限制，中間佢就話有

關嘅道理呢，嗰個標誌同埋標記呢，就係要提醒--就擺咗响度就提醒司機，即係現在減速，前面有向右嘅彎，前面有個急彎向右等等，同埋要叫佢慢，咁呢個諗 360-2，第 4(c)段。呢度有講呢個路段而家嘅速度限制呢，就每小時 70 公里，咁呀話有啲係新嘅發展項目，佢哋就建議將個速度呢就減到每小時 50 公里。

跟住其他呢有其他嘅改善措施。下一頁，呢度建議有啲改善嘅措施嘅，我哋睇番一啲係相片，就睇一睇佢哋點樣實施有關嘅改善，第 13 張相，相片 13，你見到前面幾多公里，咁呢度有個前面幾多公里，呢度有個就速度變咗做 50 公里嘞，地下有個標記。第 16 張相叫開始減速嘅標示嘞。第 17 有第 2 個開始減速嘅道路標誌，咁呢個有 9 個嗰啲係箭嘴標示。18 亦都有顯示嗰個方向，個箭嘴個展示方向，即係我意思呢，就係運輸署如果想做呢，係可以做到嘞，响呢個個案呢，佢兩個月內就做完嘞，咁所以你覺得呢啲咁嘅改善，同埋你都研究過大埔道，你覺得呢啲咁嘅措施做得夠唔夠呢？足唔足夠呢？有冇研究過呢？

主席：（經傳譯員）鄺先生，你而家做緊關於呢個路段嘅一啲嘢，啱唔啱？

鄺子憲先生：（經傳譯員）呢個顧問嘅研究呢，即係嗰個項目，我參加嘅呢個項目，係涵蓋香港一啲道路嘅，我就唔係涉及响呢一條路段嘅改善措施。

主席：（經傳譯員）所以你回答問題應該冇問題，係嘛？

鄺子憲先生：（經傳譯員）冇嘅。

主席：（經傳譯員）可唔可以請你再重新組織下你個問題呀？

黃女士：（經傳譯員）我哋就聽到一啲投訴喇，未必真係投訴，係大埔區議會提出嘅關注，咁係星期六嘅時候講㗎，佢哋嘅意見就話係可以做一啲改善，係就於呢一個路段嘅尾部，咁可以睇番個地圖。呢條路啡色，就係車速由 70 公里減到 50 公里嗰一段路嚟㗎，其中佢哋提出嘅一個議題就係話，當改車速限制由 70 減到 50 公里嘅時候，即係大約係呢一個嘅號碼 15 至到 17 嗰一段，其實就係上緊斜㗎--唔好意思，係 13、14，其實行緊 70 公里，如果時速限制喺 15 呢個位置改變，由 70 減到 50 公里的話，其實係好難㗎。

其中一啲嘅意見就話因為上緊斜，咁好多時你就要係行高啲嘅波，先至可以做到㗎。咁但係你又要減速嘅話，你好難就係轉波。

主席：（經傳譯員）或者睇番新嘅車速限制標誌喺邊度見到，畀啲相我哋睇下。

黃女士：（經傳譯員）15 號相。

主席：（經傳譯員）或者向番之後，係之前嗰段路段，上緊斜，向呢一個山頂，跟住去到山頂再向下望，跟住就係有個彎位，有啲箭咀嘅標誌㗎。嗰個投訴係咩嘢呀？

黃女士：（經傳譯員）投訴就係話，如果保持車速 70 公里的話，然之後將車速改到

50公里，架車其實行緊嘅車速喇係會高過50公里㗎。

所以佢哋其中一個建議就係話，如果我冇理解錯的話，就係將佢拉落啲，未上斜之前，可以係未上到頂最高嗰段嗰個點，就要要求你將個車速減低，呢個係大埔區議會嘅建議。

對於呢方面，你有冇任何意見呀？

鄺子憲先生：（經傳譯員）主席，大致上嚟講，要我畀一啲確實嘅建議係好難㗎，但係有一個好重要關於公路設計嘅概念就係，道路設計要唔使解釋人哋都明，咁所以就可以將標誌同埋標記減到最低。

如果用太多嘅警示，可能係會將呢一個嘅道路標記系統嗰個作用減低，咁但係我好難即係確實咁講畀你聽。

主席：（經傳譯員）咁或者再睇一睇喇，有兩個嘅警示路牌先至上到山頂㗎。

呢度前面 50 公里，呢個又係嘞，前面 50 公里，跟住去到山頂，跟住就落斜。咁喺呢一個咁嘅情況之下，剎車有咩問題呀？

鄺子憲先生：（經傳譯員）主席，由 70 去到 50 公里，唔係好大嘅問題嘅，喺剎車方面，但係我哋要注意嘅就係司機係咪真係會跟從呢一個嘅限制喇，如果佢哋見到有危險，佢哋係好願意慢車。

咁喺呢一類型嘅道路，我個人意見係話，一個較好嘅做法就係將佢減低到車速 60 公里，但係我哋亦都諗過，唔想將道路標示系統變得太複雜，咁所以較好嘅做法，即係60公里所--因為呢個原因冇採納。

但係咁樣講就可能係扯開咗少少嘞，但係我想強調，我哋係要連到司機願意以安全車速行駛，當然車速限制係法例規定喇，因為有一個法定嘅要求。咁但係我哋需要監察司機嘅車速，先至可以知道區議會所講係咪有根據㗎，咁我哋要做嘅就係做一啲汽車車速嘅調查，睇下佢哋係咪真係跟番標記所示嘅車速限制行駛，唔可以施加一啲佢哋容易跟循嘅要求㗎嘛。

主席：（經傳譯員）頭先睇到嘅相㗎嘞，咁如果要司機知道明白係改車速限制嘞，咁喺過咗山頂之後，咁就係先至改善嘅話，佢就會明白嘞，因為有一個彎，咁同埋係當時係落緊斜，咁同埋係見到有啲箭咀嘅標示嘅，咁呢個就唔係即係其實話令到司機明白點解要改車速限制，令佢哋明白嗎？

鄺子憲先生：（經傳譯員）主席，你嘅觀察係正確㗎。咁但係其實任何嘅道路標誌同埋時速，其實對個司機嚟講，係要同佢哋所見到嗰個危險相乎先得㗎。

主席： Ms Wong.

黃女士：（經傳譯員）大埔區議會另外一個意見就係加一啲嘅限速墜，但係如果咁樣做嘅話，如果你揸得太快，你就會--即係架車就會拋，所以你好自然就會慢番

車嘞。對於呢方面，你有咩嘢嘅意見呀？

鄺子憲先生：（經傳譯員）限速壆其實有好多唔同嘅種類嘅，有啲就即係嗰個--有啲就溫和啲，有啲就會嗰個效果就會大啲。咁喺公路上面，如果要加限速壆嘅話，就一定要好強嘅理據，因為如果行車車速好快嘅話，而司機又唔知道有限速壆，可能就會失控，或者突然間要剎車。

通常限速壆係要聯同一啲限速嘅其他措施一同使用呀。正如我之前所講，司機係要見到有理由要慢車，將架車速減慢先至得。

根據我嘅經驗，如果使用限--喺公路上用限速壆的話，用減速壆的話，我哋就要特別去設計一個區域，係要將個車速減慢，先至可以有呢一個嘅減速壆，等司機知道慢番車，慢到唔會超過 50 公里，最好就係 40 公里，先至過呢一個減速壆㗎。

黃女士：（經傳譯員）另外我想同你講嘅就係，ISO 39001 就係呢個道路交通管理系統呀。

另外就係呢一個，睇番就係 786 頁頂部，第三段呀，你就話：

「ISO 39001 道路交通安全管理系統，將佢變成專營巴士經營者嘅一個要求係最好嘅做法。」

呢個國際標準組織 ISO 39001，你可唔可以同我哋講下，係咪喺世界各地都有廣泛使用呀？

鄺子憲先生：（經傳譯員）首先等我解釋，ISO 39001 係 2012 年引入㗎，目前大概有五百個機構係採納咗呢個標準，唔係每一個國家都有，有啲嘅國家就比較熱心喇，譬如英國、瑞典、日本等等，呢個係目前嘅情況。

喺香港嚟計，以我所理解，係冇一個呢方面嘅認證。我哋建議進一步研究呢一個國際標準組織嘅標準，因為目前香港冇人用。但係對於呢個標準，其實係由一啲頂尖嘅專家研究出嚟㗎，係世界銀行、世界衞生組織都支持，覺得係一個安全系統嘅做法。

我想講，呢個標準唔係一個技術標準嚟嘅，係一個高階嘅框架，鼓勵高層盡力做到道路安全冇傷亡，即係就於佢哋嘅能力可以做到，呢個其實係一個願景嚟㗎。

呢個系統冇講出一套嘅技術，系統，監察系統，或者點樣做得到，呢個標準其實本身係不足，需要有其他嘅技術系統輔助。

當然，呢個系統對於香港嚟講係新嘅，比起其他嘅世界各地嘅國際標準組織嘅標準，認證機構為數不多。睇番標準同埋嗰個標準嘅模式，我呢度有個標準喺度嘅，我想講就係呢一個標準嘅重要性就係，比較前尖同埋有遠--係一個遠景嚟㗎，鼓勵機構企業喇，係主動參與減低風險同埋減低交通意外，做到係冇嚴重受

傷，亦都冇人死亡。

主席：（經傳譯員）可唔可以講下嘞，你話有大概五百個企業係採納咗。

鄺子憲先生： Yes.

主席：（經傳譯員）我想講係咪一啲公司呀，即係唔同國家嘅公司，而唔係一啲嘅監管機構要求企業咁做？

鄺子憲先生：（經傳譯員）我想引用，引番呢一個標準，呢個 ISO 嘅標準。以我所理解，係佢哋嘅目標，就係任何嘅公司或者企業，呢啲公司、企業就係同道路交通有關㗎，無論係一啲嘅公共交通經營者、物流公司，或者任何有車隊嘅公司，譬如話的士公司、小巴公司。

我根據呢啲文件嘅理解喇，呢個其實亦都適用於監管機構㗎。但係我就目前嚟講，唔係咁肯定世界上，喺現實嚟睇，監管機構或者類似嘅機構有冇採納呢個標準。

主席：（經傳譯員）咁你知唔知道有冇任何嘅巴士公司，譬如話瑞典、日本、英國，你提過嘅國家有冇採納呢個標準呀？

鄺子憲先生：（經傳譯員）主席，我就唔知道即係某一間公司唔知道佢哋嘅名，但係從我收集到嘅資料，我就知道喺日本好可能有幾間公司，為數唔多，呢啲公司都係同公共交通有關嘅，不過呢個我要再印證一下，唔該。

主席：Thank you.

黃女士：（經傳譯員）喺一啲嘅文件裏面，我哋就見到公巴有採納 ISO 9001㗎。想請你睇番九巴文件 3 號，767（原文照錄）頁，係一個 2011 年嘅年報。

睇番左邊嗰欄呀，1999 年：

「九巴成為香港第一間巴士公司，係得到 ISO 9001:1994 年嘅認證，呢個係全公司適用㗎，關於質素管理系統方面嘅。咁其實九巴係世界--喺香港係第四間公司，得到呢一個全公司嘅人嘅人嘅認證㗎。」

咁呢個嘅 ISO 9001 同 39001 有乜嘢嘅分別呀？

鄺子憲先生：（經傳譯員）對於管理系統，我唔係專家，我嘅理解 ISO 39001 其實係特登寫嚟改善道路交通安全㗎，咁就係從一個嘅安全系統角度去睇㗎，呢個係世衛喇、聯合國同埋好多已發展國家推薦嘅，咁佢呢啲國家，或者機構，全部對於道路安全係好嚴肅咁去睇㗎。

咁呢一套嘅標準其實特登係寫嚟係畀一啲公司或者一啲嘅機構係去採納，等佢哋可以有一個正面嘅影响。

黃女士：（經傳譯員）咁我就想請你--我就睇番另--睇另外一個嘅項目，就係有關

於九巴嗰個經營專營權續約嘅呢方面嘅事項嘅。我想問你嘅意見...

主席： By "the licence" you mean the franchise?

黃女士：（經傳譯員）...咁就係16--呢個係16年6月16號嘅，咁係777頁呀。

呢份文件係中文㗎，整個報告其實就係英文寫嘅，我知道。

或者首先就係睇...

主席：（經傳譯員）呢份係咪775開始㗎？

黃女士： Yes.

主席：（經傳譯員）呢個其實就係話係想畀一個意見，係對於新嘅專營權嗰個嘅意見㗎，咁同埋係就於一個公眾諮詢文件所畀出嘅意見。

黃女士： Yes.

主席：（經傳譯員）呢份文件嘅號碼係幾多呀？

黃女士：（經傳譯員）6月16號，係2016年㗎。

主席： Thank you.

黃女士：（經傳譯員）喺第一段，你就話係有一個公眾諮詢喇，你就入咗一份嘅意見書，呢個係就於九巴嘅新專營權事宜，咁呢一個嘅諮詢報告結果，你提供嘅文件。

第二段，呢個其實就唔係投訴嚟嘅，咁就話政府嘅文件只係包含一小段關於安全，就有兩個簡述，分別係更嚴格監察巴士車長的駕駛行為，同埋改善車箱內的安全操施。

但係你就提過嘞，呢個其實係冇確實反映呢一啲嘅涵蓋嘅觀點，你可唔可以再詳細解釋一下，就係涵蓋嘅觀點呀？

主席：（經傳譯員）對唔住，係係邊一頁嗰度讀？同埋邊一段呢？

黃女士：（經傳譯員）778頁，第二段。

主席：（經傳譯員）我哋未去到嗰度之前，我諗遲下，即係唔係而家，或者我哋都應該睇番嗰份諮詢文件，就問下。我知道第二段嗰度，鄺先生就話係嗰份諮詢文件個重點係喺邊一度吖嘛。

黃女士：（經傳譯員）係，或者我想請你睇番嗰封信，咁就係房運局係寫畀立法會嘅嗰封信。

主席：（經傳譯員）呢個係咪就嗰份嘅諮詢文件呀？

黃女士：（經傳譯員）係。不如咁喇，我哋睇睇 TD-3 嗰個文件夾，661 至到 768 頁，TD 運輸署嘅文件夾，661 至到 768 頁。

我諗呢個係第三份嘅立法會文件，就係話畀立法會知，究竟最新嘅情況係點嘅，咁就係講到係 2012 年嘅 2 月嘅情況，之後亦都有講及係行政--特首會同行政會議嗰個係決定㗎。

或者我哋先睇一睇呢一份係立法會文件，咁然後我哋先至去睇嗰份 2016 年嘅文件。嗰個引言嗰度就話，第一，就係：

「係有新嘅專營權，亦都係有附加嘅條件就係，向一個新巴就係批一個專營權，去經營呢一個專營巴士服務喇，就係喺 13 年嘅 7 月 1 號至到 2023 年嘅 7 月 1 號。

咁又跟住就係話：

「係批專營權係畀龍運巴士。」個(b)段。

(c)嗰段就係城巴嘞，咁就係 13 年嘅 5 月 1 號至到 23 年 5 月 1 號嘅專營權。

跟住睇後面嗰版，或者落去下啲，嗰度就列出嗰個係條款喇，以及就係嗰個評估嘅係基制嘅。嗰度就係話要評估一下，究竟新巴同埋龍運，以及城巴，有冇提供一個適當有效率嘅服務，咁運輸署就係經常就係檢討佢哋嘅表現嘅，透過幾個方法，第一就係乘客滿意度調查喇，現場調查喇，係檢查車輛喇，檢驗車輛喇，同埋睇番公眾嘅反應㗎。

有鑑於係五至八段，喺下面五至八段嘅嗰個評估嘅結果喇，而見到佢哋已經係滿意嗰個表現嘅。

咁又睇番新巴嘅表現，包括埋嗰個係意外率喇，失--脫班率喇，即係話同定咗嗰個時間表比例一下個脫班率等等喇，咁龍運嗰度，亦都睇番佢哋每年有幾多個係投訴，即係以每百萬個係乘客有幾多宗嘅投訴喇，咁同埋就係每一百萬行車公里嘅巴士意外嘅平均數字喇，就睇下佢係咪正常吖，喺嗰個幅度範圍之內定抑或係超咗--係超出咗嗰個範圍嘅。

我仲想請你睇...

主席：（經傳譯員）我就想問下嘞，問呢一樣嘢，十項文件二，775，嗰個係一個回應嚟㗎？係跟進邊份文件嘅一個回應呢？

黃女士：（經傳譯員）嗰份文件亦都係講呢個城巴嘅，所以我就要講番呢份係咩嘢文件嚟嘅，因為呢度係有講番，回應番城巴嗰份文件嘅。

主席：（經傳譯員）咁呢度係 775 頁喇，咁我睇番嗰個日期，咁嗰度就話 2016 嘅 6--係 9 月 16 號㗎，775 頁，就係 2014 嘅 9 月 16 號。我或者將佢打番出嚟

先。

我問就係問，究竟阿鄺生佢係回應邊一份文件㗎，然後就寫咗呢一度呀？

黃女士：（經傳譯員）佢唔係回應緊呢一份文件㗎。呢份文件就係回應 784 頁嗰份文件嘅。

主席：（經傳譯員）784 係 2018 年 4 月文件嘅一部分嚟㗎，係咪呀？

黃女士：（經傳譯員）2016 年 6 月 17 號會議，係 784。

主席：（經傳譯員）邊一個文件夾？

黃女士：（經傳譯員）SEC-2。

主席： That was the bit that was missing.

黃女士：（經傳譯員）784。

主席：（經傳譯員）等等。

黃女士：（經傳譯員）對唔住，鄺先生。

主席：（經傳譯員）等等先。

黃女士： Yes.

主席：（經傳譯員）我哋而家 SEC-2，784 頁就係講九巴㗎，雜項嘅 775 就講城巴㗎。

黃女士：（經傳譯員）可能我就係講咗份唔啱嘅文件嘞，我諗嗰個時序我可能搞錯咗㗎。

或者我應該首先睇嘅睇呢一份呀，就係 SEC-2 個文件夾，748 頁，嗰個就係諮詢文件嘞，文件就係 2016 年嘅 1 月嘅文件嚟嘅。

主席：（經傳譯員）或者麻煩你等一等，等一等。

黃女士： Yes.

主席：（經傳譯員）係。

黃女士：（經傳譯員）呢頁係 748，講及係嗰個新嘅專營權，就係講九巴嘅巴士服務網絡。754 頁，第十六段...

主席：（經傳譯員）你未落去之前，748 頁就係一份討論文件嚟嘅，政府就係告知立法會，就話打算就係同係九巴係商討就係就佢嘅巴士服務網絡，就係批出一個係十年嘅專營期，因為現有嗰個係專營權就係就嚟係屆滿嘞。

黃女士： Yes.

主席： Is that right?

黃女士： Correct.

主席：（經傳譯員）喺第四段嗰度，嗰度就係話航運局同埋運輸署--第四段咁樣講㗎，就話：

「政府最主要嘅考慮係咩嘢呢，如果要批出個專營權，就係話要睇下個營運商係咪可以提供一個適當有效率嘅公共巴士服務。」

鄺先生，我諗呢個就係你關注點嘞，即係話我哋較早時候所睇嗰份報告，你提出你嘅關注點就係在此，係咪呀？

鄺子憲先生：（經傳譯員）主席先生，我仲記得當時政府就邀請公眾人士係表達意見，對於九巴新嘅專營權同埋之後城巴以及再大嶼山巴士佢哋嘅新專營權，係邀請公眾表達意見嘅。

主席：（經傳譯員）我哋剛才嗰度所讀出嘅，其實亦都政府成日重複一句說話㗎，無論九巴呢個係，城巴都係重複嗰句嘅。

而你係有其他意見嘅呢，喺雜項嗰度 775 嗰度有講嘞，你就話政府嘅諮詢文件就咁樣樣㗎。

而你咁嘅睇法，你話政府嗰個喺批出個係新嘅巴士專營權嘅時候，就純粹只係睇究竟嗰個係專營權公司，係咪可以提供到適當而有效率嘅服務。

而你就話你嗰個係睇法就話，有其他重要嘅事項，譬如話交通安全、道路安全，以及係環保喇，係企業嘅社會責任等等，都係冇提到嘅。

我諗你首先就作出個咁嘅回應，你認為政府喺諮詢係經營權續約嘅時候，政府嘅呢方面係不足。

鄺子憲先生：（經傳譯員）係呀，因為我哋根本睇唔到「安全」嗰兩隻字，我哋係好想確保就呢樣係照顧到，我哋唔知道究竟當政府講話適當服務嘅時候，係咪已經包含咗安全㗎。因為當時我哋所睇嘅文件，我關心嘅地方就係話，安全會唔會就已經係作為一個重要嘅事項，係照顧到呢，我就擔心嗰點，所以我就提出我嘅睇法，就希望佢哋去考慮。

主席：（經傳譯員）當然喇，呢度有唔同嘅專營權喇，一個就係城巴嗰個集團喇，另外就有九巴嗰個係專營權喇。咁黃律師，究竟係邊度呢？

黃女士：（經傳譯員）我哋先講九巴，我哋而家喺呢一份文件嗰度。我要致歉呀，鄺先生，我已經睇到你係講及城巴嘅嗰個意見書嘞，我哋遲啲會講你對城巴所表達嘅意見。而家既然講開九巴，就講番九巴先。

或者我哋先睇九巴嘅陳述書喇，而你就係有回應過政府嘅諮詢文件嘅，喺呢個720頁嗰度嘅--對唔住，係770頁。

咁喺嗰度就話係：

「道路安全係至為重要㗎」。

喺嗰度就提及就係嗰份文件嘅6(c)嗰一個條：

「嗰度就係顯示九巴嘅意外率，就係每百萬行車公里就有 2.95 宗交通意外，呢個就係低於係整個行業嘅4.16。」

呢個一方面就顯示九巴嗰個表現較佳喇，但係我哋就認為，如果只係單睇一個參數，就係十分之不足㗎，唔能夠單睇嗰個每百萬行車公里嘅意外率，就話九巴嘅喺安全表現係點樣樣，由於佢嘅運作嘅規模，咁九巴就係佔咗係超過一半同巴士有關嘅傷亡數字㗎。

所以就係因而就要係更加盡力咁樣去減低嗰個傷亡數字㗎，要分析嗰個係意外率喇，個數字喇，即係如果佢哋係涉及呢個嚴重同埋係致命嘅意外、涉及行人嘅意外、多人傷亡意外等等，應該從更廣嘅角度去睇㗎。你意思係咪話如果單單淨係睇一個意外率，咁就唔公道嘞？因為呢個係一個單一參數，你認為要睇呢個比較全面先至得㗎，你係咪咁嘅意思呀？

鄺子憲先生：（經傳譯員）係呀，主席先生，的而且確係咁。其實我哋喺報告嗰度，亦都已經係寫咗出嚟嘞，我哋交畀你哋嗰個報告裏面，就係有呢一方面嘅分析㗎。

我哋亦都係有一啲表--我覺得應該睇埋其他嘅百分比，其他嘅數字嘅。譬如話每一百萬乘客人次嘅意外率喇，每百萬行車公里嘅行人嘅係涉及意外率喇，以及就每百萬行車公里嘅嚴重意外數字喇，每百萬行車公里嘅致命意外喇等等㗎。所以我哋如果要理解目前嗰個安全嘅情況，我哋要睇多個參數㗎。

即係我概念就係咁樣樣嘞，唔該。

黃女士：（經傳譯員）喺呢個報告嗰度，其實我就想睇一睇你所作嘅數個建議，772頁。

主席：（經傳譯員）喺你未落去之前，你可唔可以再解釋一下，點解係要用多項嘅參數呢？譬如話你有講過，前後碰撞同埋喺路口嘅碰撞，諗黃律師，可唔可以將佢讀出嚟呢？

黃女士：（經傳譯員）前後相撞同埋路口碰撞，呢個由於好多巴士路線都係用呢個高速公路喇、快速公路喇，九巴就特別容易就係涉及喺前後碰撞，而裏面亦都會引致多人傷亡㗎。

喺 2011 至到 2013 年嗰個三年期間，當時係有超過四十宗嘅係撞車事件，

係涉及多人傷亡，裏面係有五個或者多於五人係傷亡嘅，而係涉及九巴嘅巴士㗎。

咁而歷史上，係有試過單一宗事件有超過一百人傷亡㗎。咁樣樣嘅碰撞就會引致就係好多人嚴重受傷，特別就係如果坐某啲位嘅乘客，呢個上層前排。此外，就係亦都對我哋嘅係醫療系統，係急症室就造成好大嘅壓力。呢啲事件就只係會歸類成為一個單一宗嘅意外，所以佢嘅嚴重性就唔能夠單睇意外率就睇到佢幾嚴重。

喺 2015 年 7 月，單單嗰個月就起碼有三宗係相撞嘅事件，係涉及九巴嘅巴士係有多人傷亡，裏面其實總共有四十五人就係受傷或者死亡㗎。

主席：（經傳譯員）鄺生，你就話要睇多個參數，你可唔可以解釋一下，係咪就係因為考慮埋呢一段文字所講㗎？

鄺子憲先生：（經傳譯員）係。

黃女士：（經傳譯員）你有幾個建議㗎，首先就係睇 772 頁。你就講過就話：

「過去嘅係意外率同埋就係一啲潛在嘅安全風險，就係要係詳加研究，睇出有咩嘢機會，喺邊度可以進行改善嘅，即係透過新嘅專營權。政府應該帶頭去重視係巴士運作嘅道路安全。喺專營權嗰度，亦都應該包括埋呢一點，就唔係淨係睇適當同埋有效率嘅服務。亦都應該要睇下，譬如話預先定咗一啲目標，巴士公司係做到嘅話，就應該係得到獎勵，譬如話將某一類嘅意外嘅數字每年減少百分之二十。」

咁你呢度係咪就係話，唔應該淨係睇一類嘅交通意外嘅數字，而係要睇埋就係咪涉及多人傷亡，係咪呀？因為你頭先就講及頭尾相撞嘅時候，都有講及呢一點，多人傷亡嘅意外事件。

鄺子憲先生：（經傳譯員）係呀，主席先生，啱。

我做嘢嘅時候，我總係希望分析一件事，理解一件事嘅時候，都係好全面，好全盤咁去睇㗎。首先，至為重要嘅，你係以整局嘅全局去咁睇喇。另外，到你要制訂一啲策略同埋措施嘅時候，咁嘅角度就更加係緊要嘞。

我係因此寫低咗一啲建議喇，我亦都包括係一啲建議，譬如話獎勵一啲巴士公司喇，當然呢個只係其中一個嘅建議，點解呢，因為喺呢一啲寫畀政府、寫畀立法會嘅文件同埋信件裏面，我哋都希望鼓勵嗰啲負責嘅涉及嘅係人士，係想鼓勵佢哋，我哋唔想樣樣都好負面，好消極㗎，我哋想鼓勵行裏面嘅人士，我哋想係畀啲動力佢哋，係推動佢哋嘅。

主席：（經傳譯員）你有冇諗下，如果巴士公司能夠達到嗰個目標，點樣獎勵佢哋呢？

鄺子憲先生：（經傳譯員）嗰個只係一個建議嘅，我哋未曾睇過有關嘅詳細嘅細節，

Transcript by Epiq Hong Kong, Limited

或者係獎勵嘅基制嘅，不過個意念就係需要鼓勵巴士公司，鼓勵巴士司機，要有個理由就獎勵佢。

主席：（經傳譯員）你有冇諗過係一啲財務呀定係點呢？又或者好市民獎，或者係錢方面，呢啲獎勵係有冇諗過係咩嘢呢？

鄺子憲先生：（經傳譯員）主席，合理嘅或者係行得通嘅，都我覺得都應該加以考慮嘅，多謝。

主席：（經傳譯員）獎勵嘅相反就係懲處喇、懲罰喇，你覺得如果佢哋未能夠達到預定嘅目標，係咪應該都有懲罰嘅呢？譬如話意外率唔達標。

鄺子憲先生：（經傳譯員）主席，當然喇，懲罰都係一個考慮嘅可能性嚟嘅，但係我哋要明白，唔係所有意外都係司機嘅錯，或者係巴士司機--或者巴士公司嘅錯，意外可能係因為第三者引起嘅，或者係一啲唔同嘅成因，或者係有唔止一方面，有幾方面係需要負責嘅。懲罰喺某一啲情況下有用嘅，不過係咪公平呢，就都仲要係驗證--即係仔細考慮。

主席：（經傳譯員）你知唔知道新加坡，佢嘅交通嘅當局，佢哋有個睇交通意外嚟到考慮佢哋嗰個專營權嘅？

鄺子憲先生：（經傳譯員）我唔知道呢方面嘅情況。

黃女士：（經傳譯員）嗰個中間嗰一段，你係提到巴士公司嘅安全表現嘅，同埋要有一個現代嘅係辦--制度呀，現代方式呀，應該引入嘅，咁點樣監--咁樣嚟到監察佢哋嘅表現嘅。

你提過就係引入一啲措施，係根據個新嘅專營權嘅安排，鼓勵佢哋係引入一啲新嘅安全管理措施，即係符合呢個 ISO 39001 嘅標準嘅。

咁就係巴士應該同--巴士公司應該--政府應該同巴士公司合作，嚟到去研究巴士意外，同埋涉及嘅詳細嘅風險嘅，以便係設一啲目標嘅，關於減少意外嘅目標嘅。

呢個你唔係第一次提㗎嘞，ISO 39001 嘅標準喇，不過呢個特別今次就住九巴，你係同運輸署就話提出，希望專營權合約裏面，係要引入呢個標準嘅，係咪你第一次呢，你可唔可以證實呢樣嘢？

鄺子憲先生：（經傳譯員）我相信唔係第一次提 ISO 39001 嘅--ISO 標準嘅。我就其實鼓勵佢哋起碼都要研究下，睇一睇究竟係咪應該採納呢個標準嘅。但係要--如果佢哋--即係我哋都留意到，可能都有個相約嘅標準嘞，都已經係可以嘅。

但係呢個就係根據一個安全系統嘅模式嘅，同埋照顧到先進國家所採納嘅最新嘅一啲概念嘅，同埋係一個--係有個向前望嘅，即係點樣減少個安全意外呀，同埋死亡受傷嘅比率嘅。

黃女士：（經傳譯員）呢個關於嗰個係黑盒喇，去到呢頁嘅底，安全嘅駕駛巴士嘅標準嘅。我睇到，你係話：

「好多嘅巴士公司都係好專業嘅，同埋表現都係良好嘅，但係呢個唔等於話佢哋已經係將個風險減到最低喇，同埋有部分嘅巴士公司，佢哋表現係比較係進取同埋危險嘅。」

咁就呢度個檢討文件--諮詢文件就話：

「即係佢哋已經係加咗個係黑盒同埋個限速器嘅。」

咁你就話：

「响巴士度使用黑盒仲有好大嘅潛質嘅，但係我哋就唔知道究竟呢啲黑盒而家係點樣運用嘅。」

咁就呢度咁講，你話就係：

「我哋唔可以將呢個市區嘅巴士嘅限速 50 公里作為一個黃金標準嘅。」

所以你有啲建議嘅：

「即係將响嗰個係專營權嘅要求，係需要有一個全面嘅標準同埋就監察個司機系統嘅，使用一啲安裝嘅黑盒可以做到呢樣嘢。監察系統應該係自動化，嚟到係令到個程序係順暢，同埋可以教育同埋重新訓練啲司機嘅。」

特別嘅仲關鍵嘅標--監察嘅措施就係第一，加速同埋減速嘅行動嘅特點嘅，咁你需要一啲嘅--你有講過係英屬哥倫比亞嗰個係指引嘅。

你可唔可以講講，有啲咩嘢特質呀，你特別提到呢個英屬哥倫比亞嘅指引？

鄺子憲先生：（經傳譯員）如果佢係好急速，即係好急速咁樣加速，好急速咁樣減速，就令到乘客可能會失去平衡嘅。有啲司機亦都係可能係加速、減速，响個即係大家意料唔到嘅情況之下加速、減速，咁我哋想有啲管制㗎。

譬如話地鐵嘅車箱，佢哋係有訓練佢哋點樣加速嘅，有啲參數嘅，咁就令到個地鐵乘客唔會咁容易失去平衡嘅。巴士方面就有一個問題，因為理論上，巴士司機係可以好快速咁樣又加速又減速嘅，但係我哋就要係用一個--管制呢啲行為，就係响個合理範圍。

一般嚟講，其實係冇需要加速--即係過份加速、過份減速都唔需要嘅，咁當然喇，如果係緊急，咁司機可能要好快速咁樣係減速或者剎車嘅。呢個亦都係同佢哋--同嗰個關於巴士速度嘅建議有關嘅，如果巴士司機可以高速啲嚟到係駕駛，咁就個--佢會有個大嘅可能性係需要係快速咁樣加速或者係減速嘅，因為有啲係未能夠預計嘅，一啲响繁忙嘅道路上，有啲衝突嘅情景嘅。

如果係响英屬哥倫比亞嗰個交通嘅設計嘅指引，佢哋嗰啲係--佢哋有一啲所

謂嘅數值嘅，即係話究竟嗰啲巴士係點樣加速、減速。

主席：（經傳譯員）未曾繼續之前，我想問下鄺先生，一開始嘅時候，你哋嗰個建議773嗰度你係咁講嘅，我哋呢個建議，呢個係擺入嗰個係專營權合約嘅，即係成--設立一個全面嘅標準嘅，同埋監察司機嘅系統，就運用嘅呢就係裝置黑盒嘅。你所謂嘅「全面標準」嘅意思係咩嘢呢？

鄺子憲先生：（經傳譯員）主席，我假設我所講嘅「全面標準」，其實係講緊頭先嗰啲各種規則，即係速度係點樣，加速、減速嘅速率係幾多，司機應該係咁樣喇，同埋一般嘅規則係點樣樣，關於個別路線嘅標準係應該點樣樣。

主席：（經傳譯員）呢個係應該係--呢個標準就係擺哋嗰個監察嘅系統嘞，係咪呀？

鄺子憲先生： Chairman, yes, that is the case.

主席：（經傳譯員）係為咗免--即係我哋可以辯論一下喇，譬如話 0.2G 加速、減速，係咪可以咁樣--係咪咁嘅意思呢？

鄺子憲先生：（經傳譯員）係，我哋要設立咗個標準先，基於證據--基於我哋面對嘅安全同埋風險，跟住利用呢個監察系統去作為一個執行喇。

咁同埋究竟執行到咩嘢程度呢，即係譬如話--咁係另一個問題嘞。即係會唔會話偶然違反，就有係紀律嘅行動，呢個就冇--呢度冇講到嘅。

主席：（經傳譯員）呢個就同你頭先所講嘅都係一樣喇，應該係實時進行喇，同埋自動化嘅。

鄺子憲先生：（經傳譯員）主席，越自動化，或者越係實時嘅監察，就更好嘅。咁當我寫呢個建議嘅時候，我覺得第一步就係，一定要有啲一套規矩喇，另外，需要有更好嘅監察嘅。我就冇再進一步係--當時冇再進一步睇下究竟應該用啲咩嘢字眼嘅。

主席：（經傳譯員）咁你嘅意思即係話，哋個專營權協議，應該有某一個位置畀佢㗎，係咪呀？

鄺子憲先生：（經傳譯員）係，係，呢個係我哋嘅建議嘅。

主席：（經傳譯員）有冇呢？有冇擺到落去呢？

鄺子憲先生：（經傳譯員）主席，照我所知，都應該冇。

主席：（經傳譯員）我哋可以調查一下嘅，哋另外一個場合做喇。咁我呢度--但係今日嘅時間就大概係咁多嘞。

黃女士： Yes.

主席：（經傳譯員）我哋有位委員，佢有其他嘅事要處理嘅，咁我哋唔能夠繼續落去

嘞。

我了解，鄺先生、顧醫生（高醫生？），聽日係晏晝，係咪呀，可以再繼續？啊，聽日上晝。

鄺子憲先生：（經傳譯員）係，聽日上晝嘅，淨係我嘅啫。顧醫生（高醫生？）有其他嘅事。

主席：（經傳譯員）好嘞，多謝顧醫生（高醫生？），多謝你代表呢個道路研究小組。聽日幾點鐘開始呀？

黃女士：（經傳譯員）十點鐘。

主席：（經傳譯員）我哋今日儘量做多啲，咁儘量做好，同埋儘量做多啲，咁我哋而家就暫時休會，我哋聽朝十點鐘復會，多謝你。

鄺子憲先生： Thank you, Chairman.

高兆祺先生： Thank you, Chairman.

2018年7月16日

下午1時33分聆訊押後

Tuesday, 17 July 2018

EVIDENCE FROM COMMUNITY FOR ROAD SAFETY REPRESENTATIVE:

MR KWONG TSE HIN, JULIAN (continued)

(10.00 am)

CHAIRMAN: Good morning.

Mr Kwong, I will ask Ms Wong to resume her questioning on behalf of the Committee.

EXAMINATION BY MS WONG (continued)

MS MAGGIE WONG: Yes. Thank you, Mr Kwong, for coming today.

Yesterday we were on documents concerning the KMB renewal of licence documentation. We are going to continue with this exercise.

If I may refer you back to the document, MISC-2. Page 770. It is your submission in response to the public consultation, dated 16 June 2016. We were on page 773 yesterday.

At the section on recommendations, the first bullet, about incorporating into franchise requirement the requirement to set up a comprehensive standard and driver monitoring system using the installed black boxes.

And can I ask, why do you propose including this as a requirement in the franchise agreement?

MR JULIAN KWONG: Chairman, at that time I thought the

renewal of the franchise would be a very good opportunity for the introduction of any new ideas, and that is why we had made an effort to make as many suggestions as possible in as far as they are reasonably feasible. Thank you.

MS MAGGIE WONG: The point of this is that if it is included in the agreement there can be some sort of mechanism to monitor their compliance. Is that the logic behind the suggestion?

MR JULIAN KWONG: Chairman, yes. I think so. That would also represent -- I would it see as progress. Certainly the bus companies and the government has been making an effort to make bus operation in Hong Kong safe, and we are appreciative of that. But we are not satisfied at any point as long as there are injuries, especially serious injuries and fatalities. So we are always trying to push something which we see as major progress. Thank you.

MS MAGGIE WONG: You suggested in the second bullet, "Key monitoring controls". Who would you suggest this monitoring be done by? Done by whom?

MR JULIAN KWONG: Similar to an operation like this, usually I would assume that would be the bus companies initiating the monitoring system, but the government acting as a regulatory body.

MS MAGGIE WONG: Yes. And you made quite a number of suggestions there. We have gone through the acceleration and deceleration characteristics yesterday, and you make other suggestions concerning speeding through risky hilly roads, and you suggest certain km per hour. Are you suggesting this suggestion be put into the franchise agreement, or it was simply a suggestion that the government should keep control about all these roads?

MR JULIAN KWONG: Chairman, about this specific recommendation, that is the principle, that if we identify certain road sections with exceptional risk, which I would call critical sections, then the logical way would be to specify certain speed, whether it is 25, 30, or 40, through these sections, and make these known to drivers, and because we want to control the safety of these critical sections.

In this recommendation I did not specify which sections, but I am trying to introduce this concept, that they cannot just follow the legal speed limit when we are talking about these critical sections. Thank you.

CHAIRMAN: Who should identify the critical sections?

MR JULIAN KWONG: Chairman, I think that should be identified probably between government and the bus

companies, and also with the help of experts. Thank you.

MS MAGGIE WONG: And the third suggestion --

CHAIRMAN: Sorry. How would this be then regulated by government, if the bus companies identified particular sections of road, they told government, government agreed, and how would this be then monitored and, more importantly, how would it then be regulated?

MR JULIAN KWONG: Chairman, I think, without going into a sophisticated monitoring system, if we are trying to go back to the basics, that would be, first, issue a notice to drivers riding on a particular route which critical sections they should pay particular attention to and what speed they are using. And secondly, they can have their inspectorate to check it, to check drivers from time to time, but of course we are trying to introduce a more sophisticated monitoring system that would be based on the black box data, and then preferably integrated with the GPS so that drivers grossly exceeding the said requirements will be identified automatically and in time.

CHAIRMAN: So the monitoring, rather than using an inspectorate, which is an old-fashioned way of doing it, is it not, would be done by real-time automated reports?

MR JULIAN KWONG: Chairman, yes. That would be recommended.

As far as the technology permits.

CHAIRMAN: That's what you had in mind with these recommendations?

MR JULIAN KWONG: Chairman, yes. That is the case.

MS MAGGIE WONG: In the third bullet you made the recommendation:

"Through systematic and targeted safety training, drivers, should be trained to understand typical accidents scenarios and specific risks."

Who would you suggest to carry out this recommendation?

MR JULIAN KWONG: Chairman, this is a general recommendation. Of course that would need the initiative of government, and possibly inviting experts to join, and organisations such as ours would always be happy to assist government. For this particular point, my original thinking is that drivers may not be entirely aware of what accidents may happen. As I explained yesterday, it is not reasonable -- I mean, at this moment, that drivers know what the capacity of the safety barrier is, or that they understand what speed an elderly pedestrian can tolerate without having serious injuries or fatalities, but we can always translate such information or such knowledge into a simple way, and to make drivers far more aware, so that they know why and

how they can behave better. Thank you.

MS MAGGIE WONG: At 4.4 you set out a vehicle performance, using the Canadian Transit Handbook, with certain guidelines or thresholds set out. Can you explain why you used the Canadian Transit Handbook in the first place, suggesting desirable rates for standard bus and articulated bus?

MR JULIAN KWONG: Chairman, this is one of the handbooks which I obtained with the information of interest to me. As I mentioned, abrupt acceleration and deceleration could be a major factor contributing to the large number of passengers losing balance inside the bus. We also know that the design of the metro, of the MTR, has also some parameters relating to acceleration and deceleration, in order that passengers will not easily lose balance. So that is the same case for buses.

And I see that these parameters are quite reasonable. You may want to refer to the deceleration for emergency condition, as I mentioned. It is specified as 2.7 metres per second squared. As you can see, that is much smaller than the 7 metres per second squared I mentioned yesterday for emergency braking of a passenger car.

The dilemma we are facing is that if a bus driver has to apply the brake in an emergency, in order not to

knock down a pedestrian, he has to decide that very quickly. And whether he would rather have the passengers losing balance, or to protect the pedestrian from being knocked down.

And I think that overall, worldwide, acceleration rate and deceleration rates have been accepted as an important parameter for safety for bus operation.

Thank you.

CHAIRMAN: What are the parameters set in the MTR for acceleration and deceleration?

MR JULIAN KWONG: Normally, Chairman, that would be in the order of 1.15 metres per second squared. There may be some deviation.

CHAIRMAN: Thank you.

MS MAGGIE WONG: And may I just refer you -- because you talked about this deceleration and acceleration rates. Can I take you to BM-1 bundle, page 66.

CHAIRMAN: What are we going to?

MS MAGGIE WONG: This is the submission of the black box manufacturer ZF, the screen capture showing the acceleration and deceleration rates. I will just ask if Mr Kwong can comment on one of the matters. It is the deceleration rate at 2.3 as stated in this screen capture.

Can you comment on this figure, given the suggested

rate in the Canadian code is 2.7.

MR JULIAN KWONG: Chairman, in this regard I have not studied this in detail, but as you can see, the value of 2.3 is higher than, I think, 1.1 for the Canadian Transit Handbook for normal deceleration. I think the exact value has to be determined on the basis of the realistic operation in Hong Kong. Whether in Hong Kong for one reason or the other we would accept a higher deceleration rate, I have not studied this in detail. But what I can say is that, in general, on urban streets if the running speeds of buses is not as high, I mean that we are having bus operation at moderate speed, then there will be far less requirements for drivers to decelerate at excessive rate. Thank you.

CHAIRMAN: The requirement that the Transport Department stipulated for tachograph capabilities in the 2003 requirement was that it be capable of measuring 0.2G. Is that not correct?

MR JULIAN KWONG: 0.2G would be equivalent to 1.96 metres per second squared.

CHAIRMAN: So what is the significance of the fact that the Transport Department required the machine to be capable of measuring that level of deceleration?

MR JULIAN KWONG: Chairman, sorry, do you mean that Transport Department have the requirement that the

mechanism in the bus can measure to the accuracy of 0.2 or --

CHAIRMAN: Perhaps I can ask Ms Wong to put it on up the screen. It is the requirement from 1983 that buses be fitted with a tachograph with various capabilities, new buses by 1 July 2004.

MS MAGGIE WONG: That would be TD-5, page 1598.

If you look at paragraph 3:

"The software for analysing on-board or downloaded data should be capable of reporting the following:

(a) Accident Report -- vehicle speed profile at time interval of 1 second for the 3 minutes period preceding detection of a 0.2G deceleration."

MR JULIAN KWONG: I see, Chairman. I think this clause considers that if the bus is decelerating at 0.2G, that means equivalent to 1.96 metres per second squared, then it would be an event justifying an accident report.

CHAIRMAN: This would be harsh braking, would it not?

MR JULIAN KWONG: I would say so.

CHAIRMAN: So the parameter that you were taken to, 2.3 metres per second squared, is more than 10 per cent higher than this requirement.

MR JULIAN KWONG: Chairman, from what I read from the document, that would be the case.

But I think -- it would be good if we can have more

evidence, and especially based on events involving passengers losing balance, and then we can, say, compare the deceleration rate at that time, and then if we can collect this data in future, then we could fine-tune the values in a more evidence-based -- with more evidence of what the parameters should be. Thank you.

CHAIRMAN: But we can get a pretty good rough idea if the MTR stipulate 1.15. 2.3 is a lot more than 1.15, is it not?

MR JULIAN KWONG: Chairman, I presume that would be the case. But also on the understanding that bus operation is less predictable, but still I agree that we need to have deceleration rates closer to what the MTR is using, although it may not be entirely realistic in emergency situation. Thank you.

MS MAGGIE WONG: Thank you. The other matters of course are the bus safety and the bus fleets. At page 773 at the bottom to page 774, you made some recommendation there in particular the first one about -- 774, at the top:

"Upper deck front seats -- in the absence of any reasonable deformation zone, front row bus passengers could be crushed despite the use of safety belts. This is particularly important with the number of KMB buses using high-speed roads."

And also seat belts, bus door safety, et cetera.

And you made a recommendation to ask for these suggestions to be incorporated into the franchise agreement, to be studied and improved with timetable.

Again, who would you suggest initiates this task to incorporate these suggestions into the franchise agreement?

MR JULIAN KWONG: Chairman, again, we would assume that in the franchise requirement government to specify or to regulate. Government can also study these issues and impose on the bus companies to have a timetable for improvement.

Of course it would also be the responsibility for the bus companies to conduct such studies in conjunction with the bus manufacturers, and what I was suggesting here, of course, we are advocating a far more proactive approach, that both government and the bus companies are interested in these matters, and they would see that they have the responsibility to look at these issues and to make improvements in a very proactive way.

Thank you.

CHAIRMAN: Just anticipating the questions you will be asked later, you say that what you were looking for is that the bus companies and the Transport Department act in a very proactive way. Do they do so?

MR JULIAN KWONG: Chairman, to be fair, they are proactive

in some issues, but for those issues we consider very important, I would say that they are not proactive enough. Chairman, I would say in some cases they would be quite reactive. And we do not wish to see that certain issues are handled in a reactive way, especially for those incidents involving serious injuries and fatalities. Thank you.

CHAIRMAN: By that you mean, presumably, reacting to a catastrophic event, but only after the event. Reactive not proactive. Is that your point?

MR JULIAN KWONG: Chairman, yes. I would like to add to that point that it is not uncommon, not only in Hong Kong, that progress is made after major accidents or catastrophe. From my point of view, if the catastrophe or accident cannot be reasonably predicted, then it may be fair. However, if there is already ample evidence, or ample number of accidents happening, or there have been historic accidents, or theoretically the risk is very high, then we should not act in a reactive way, but we need to be far more proactive. Thank you.

MS MAGGIE WONG: Based on your report, you have highlighted the issues, obviously, that you consider there is ample evidence in which you make these suggestions. Is that correct?

MR JULIAN KWONG: Chairman, I presume that the counsel

refers to those items I mentioned. I would say yes, there is already ample evidence. Of course when we talk about evidence, there can be a number of levels. There would be surface evidence. There could be evidence according to our knowledge, from accident data, or from news reports. And the highest level, of course, the evidence will be academic evidence, that is published conclusions and results in journal papers.

As far as the evidence I am talking about here, that would be at the level that to our knowledge, from news reports, from basic accident data, that, and also from the theoretical point, I think the evidence is clear enough.

MS MAGGIE WONG: If I may just go through the last suggestion, is your mentioning about bus safety, bus stops. In this paragraph you mentioned that waiting passengers at certain roads are left exposed to heavy and fast-moving vehicles. And you suggested or recommended here to incorporate into the franchise agreement that bus companies will collaborate with government to reduce the risk for waiting passengers at bus stops.

Now, how would you suggest a bus company to collaborate with the government to reduce this risk for waiting passengers?

MR JULIAN KWONG: Yes, Chairman. Bus stop safety is a problem worldwide, I would say, not only in Hong Kong. Admittedly, many countries, including the advanced countries, have not been paying adequate attention to the issue.

We have bus stops located along high-speed roads, major roads, such as this, the one in this photograph, on Lung Cheung Road, with a speed limit of 70 kilometres per hour, on Gloucester Road, and on other major roads.

In theory, if we have a large group of passengers waiting at the bus stop and we have such fast moving vehicles running alongside, there is always the risk of an errant vehicle crashing onto the roadside and they will be trapped by the bus stop shelter, and that can lead to severe injuries.

Only a few countries have paid attention to this particular problem and acted seriously. One of the countries is Singapore. They have introduced measures, but whether that measure is effective or is really working well, then I still need to further confirm.

However, theoretically we need protection for the waiting passengers. The bus company has been responsible for introducing these bus shelters, and they do get revenues from that, with the advertisements they place on the shelter. And government is responsible for

the road. So naturally, I would imagine that the bus company should collaborate with the government and to examine the design of bus shelters, and whether there is the need to have ancillary facilities, or equipment to better protect bus passengers.

Admittedly it is not easy, because at the same time we need to have bus passengers being able to get into the bus and to alight, but at the same time we need to have measures protecting them, so we cannot put a continuous barriers at these bus stops. Thank you.

CHAIRMAN: No, but presumably you can construct barriers that have gaps in them so that people can alight and board buses?

MR JULIAN KWONG: Chairman, yes. Although we cannot have a continuous safety barrier, there may be possibility to have safety barriers aligned in a certain angle, or else there is the possibility to install what we call bollards. In Singapore, the solution is to have bollards at these bus stops, and they have installed these at several thousands of bus stops.

However, I would like to point out one thing is that normally for highways design, we need to also protect the occupants of the errant vehicles. That means any safety barriers designed in such a way should not incur severe injuries to the occupants.

If we have discrete sections of safety barriers then the terminal or the ending point of the barriers could become a hazard. The second point is that bollards need to be what we call energy-absorbing. If we just put a steel post or a very heavy concrete post, it is certainly good for the waiting passengers, because it will certainly stop the car. But at the same time the occupants of the errant vehicles will probably suffer severe injuries.

To conclude, I think there are solutions. Ultimately, we may be able to work out solutions which achieve the best balance of this dilemma. Thank you.

CHAIRMAN: In the road works being done on the Tai Po Road accident scene, is there not a barrier being created to protect passengers waiting at that bus stop?

MR JULIAN KWONG: Chairman, sorry, do you mean the remedial works which have been carried out there?

CHAIRMAN: Yes, aren't they creating a barrier to protect the passengers?

MR JULIAN KWONG: Chairman, I see what you mean. There is another solution what we call the protected bus stop. That means the bus stop is shifted away from the road, and the main road is separated from the bus stop with the traffic island.

That is a good solution, and that has been

introduced on the other direction of Lung Cheung Road, and also for the bus-to-bus interchange on Tuen Mun Road. But this solution requires lots of space as well.

So in the end, the starting point will be a review of different types of bus stops, and also to look at different types of roads and speed, and then probably we need to have different solutions, including engineering solutions and non-engineering solutions. Thank you.

MS MAGGIE WONG: The bollards that you mentioned in Singapore, do you know who is responsible for installing these bollards, the government or the operators?

MR JULIAN KWONG: In Singapore that would be the Land Transport Authority, and I have studied some of the design, and they specifically mentioned that in 1998 there was a severe accident involving a vehicle crashing onto the bus stop, and then some more happened thereafter, and they started to introduce these bollards. I'm very interested actually to further obtain information from them regarding the precise design of these bollards.

But at the same time in Australia there is the bollard called the energy-absorbing bollard, which is designed for stopping an errant vehicle at up to 60 kilometres per hour. Not a bus, not a heavy vehicle, but just a passenger car. But the bollard also moves

a bit, so that the occupant of the vehicles will not be excessively injured. This product is quite unique, so I have been doing some search in other countries. So it appears that it is the only one available in the market.

I would also like to point out that at the University of New South Wales, one of the professors also shares this idea. He suggested there should be more research on the usage of bollards at bus stops, and also in urban areas where we cannot put a continuous barrier, because people may need to get out to the road.

I have not discussed with this professor, but I think he shares the same idea, and he thinks that that should be the way to go. Thank you.

MS MAGGIE WONG: Now, Mr Kwong, this is the submission that you submitted in relation to the KMB in June 2016.

Afterwards, the LegCo did make some discussion. I'm going to take you to some of the papers in the LegCo. The first one is in June 2016, 17 June 2016, SEC-2, page 784.

This is an updated background brief on the franchise for the bus network of the Kowloon Motor Bus. It started at page 784.

If I may briefly summarise what this paper is about. It is a paper providing information on the franchise for KMB and it summarises major views and concerns expressed

by LegCo members in the past discussions. And if I may take you to paragraph 12 with the heading "Enhancing standard of bus service", and it made reference to:

" ... the Fifth LegCo, members raised concern over the performance of franchised bus service at the panel meetings, special financing committee meetings as well as the council meetings. They urged the Administration to take the opportunity of franchise renewal to require service improvement by bus companies, including provision of real-time bus service information to passengers, provision of priority seats and barrier-free facilities, improvements in bus lost trips as well as bus service frequencies during peak periods."

It made reference to the real-time bus service information. I believe at this time they have not had this real-time bus information yet. But can you tell us what this idea is about?

MR JULIAN KWONG: Chairman, I believe it is referring to displaying, say, the time of arrival for the next bus, I mean how many minutes before the arrival of the next bus or the bus after, that can also be related to the use of the mobile phones to obtain information about the arrival of the next bus, and I think this would be the main idea.

CHAIRMAN: So there are two ways of communicating the

information. One would be a display panel at a bus stop or a terminus, and another would be by accessing an app on your mobile phone?

MR JULIAN KWONG: Chairman, yes.

CHAIRMAN: And this system had been introduced some years earlier had it not? Step by step?

MR JULIAN KWONG: Chairman, I think so.

CHAIRMAN: By KMB?

MR JULIAN KWONG: Chairman, yes. But also by other companies as well.

CHAIRMAN: Yes.

MS MAGGIE WONG: If we go on to paragraph 17 it stated that:

"Furthermore, an additional clause had been included in the three franchises ... NWFB, [Long Win] and Citybus (Franchise 2), commencing in mid-2013 to empower [Transport Department] to require bus companies to enhance safety facilities and design."

It made a few examples here. Can you see that?

CHAIRMAN: Can you give us the examples, please?

MS MAGGIE WONG: I think the examples are simply referred to, in the next sentence:

"This included purchasing new buses with barrier-free and elderly-friendly design."

And it was suggested in the last sentence:

"The Administration would incorporate a similar

provision to promote barrier-free facilities in the other three bus [companies] ..."

Now Mr Kwong, even though there is such a clause in the franchise agreement it appears there has not been any improvement on the black box design or requirements in terms of the black box.

CHAIRMAN: Before you get involved in that. A barrier-free entry is not a safety feature, is it? Is that not simply a service facility?

MR JULIAN KWONG: Chairman, the barrier-free facility is -- well, that is both for convenience and safety, of course. Anything inside the bus can be unsafe. So I would have wished to see explicit description of other safety facilities. So I hope that has answered your question?

CHAIRMAN: How is a barrier-free entrance a safety facility?

MR JULIAN KWONG: I would presume that for someone who needs more space to enter the bus, the barrier-free facilities would mean probably not to have a handrail on the way, say, at the entrance, so that it is wide enough for example for wheelchairs, or for people with other particular needs, to have adequate space to enter the bus.

So it is not very explicit, but that is, I presume, both for convenience and safety.

But I'm looking of course to a focused description of safety facilities which is not existing here.

MS MAGGIE WONG: Yes, and if I may take you to a document showing what clauses or what specific clauses have been asked to be included in the new franchise in relation to KMB --

CHAIRMAN: Before you get to that, in paragraph 10 of this paper, there is reference to a discussion that had taken place in 15 January 2016 about the franchise network; do you see that?

MR JULIAN KWONG: Yes; I'm reading it.

CHAIRMAN: Ms Wong, do we have the minutes of that meeting?

MS MAGGIE WONG: We only have a letter from THB stating the follow-up actions of the meeting on 15 January, but not the actual minutes.

CHAIRMAN: The minutes appear to have been signed off on 26 August, and they refer to 15 January.

MS MAGGIE WONG: Perhaps if we may refer to the SEC-2 bundle, page 990. This is a document from the Transport and Housing Bureau dated 9 March 2016 to the LegCo, setting out what happened at the meeting on 15 January 2016.

CHAIRMAN: I'm holding a copy of the minutes. May I ask that these be given to you?

I'm told that we can show it as a soft copy on the

screen.

MS MAGGIE WONG: I apologise for that, it should be in the SEC-2 bundle, page 967, it is a new document.

CHAIRMAN: Yes, that's the document I have in mind.

MS MAGGIE WONG: That's the minutes of meeting on 15 January. If you may turn to internal page 5.

CHAIRMAN: I think if we go to paragraph 13, you can see the tenor of the purpose of this real-time bus service information. It is, as becomes clear reading it, a service facility, no doubt to meet the requests of passengers that they get better information of how long they are going to have to wait in the rain before the bus arrives. That seems to have been the driving force behind this development.

Perhaps you would like to have a look at the minutes, Mr Kwong.

MR JULIAN KWONG: Okay.

Chairman, yes, I have read it. Do you want me to comment?

CHAIRMAN: Yes.

MR JULIAN KWONG: To me, real-time arrival information system is always desirable because it will reduce frustration for passengers, and actually it is providing a good service so that passengers can decide whether to wait for the next bus, or for example to access a bus

stop, whether they have enough time, et cetera.

I think that also has something to do with safety, but not directly. Certainly I welcome that. I have no particular comment on this. Thank you.

CHAIRMAN: What does it have to do with safety, knowing when the bus is going to arrive?

MR JULIAN KWONG: Chairman, as I mentioned, I would believe that if a passenger knows when the bus is going to arrive, they will be less stressed. If a passenger does not know when the bus is going to arrive, he will be less relaxed, and there may be more frustration, and he or she may try to stand very close to the bus stop, to the curb, in order to see whether the bus is coming.

So overall, I would say that it is not a direct safety measure. There may be benefits in terms of safety, but of course I do not have any references to prove this point. Thank you.

CHAIRMAN: Of course, one of the consequences of having to provide this information was to provide information to bus companies about where their buses were, and what speeds they were going at. Is that not a consequence?

MR JULIAN KWONG: Do you mean that this system can be used in conjunction with a system for locating the bus, and also for checking the speed of the buses?

CHAIRMAN: In order to come up with information about ETA,

you need to know where the bus is, and you need to know what speed it is doing, don't you?

MR JULIAN KWONG: Chairman, yes.

CHAIRMAN: So by a side wind, it produced access to other information that might be used for another purpose.

MR JULIAN KWONG: Chairman, yes. I would presume that often we should try to utilise the information for multiple purposes, including safety and also level of service.

CHAIRMAN: No doubt Ms Wong will explore with you how this alternative multiple purpose was pursued or not pursued.

MR JULIAN KWONG: Thank you, Chairman.

MS MAGGIE WONG: We have seen the minutes about this real-time information. May I take you to the document itself now, because we have raised the question what has been asked to be included in the franchise agreement, and how the government perceives this facility.

May I take you to the TD-3-bundle.

CHAIRMAN: What are we going to?

MS MAGGIE WONG: It is a LegCo document. It actually starts at 496, but the pages I'm going to is at 542. It is a LegCo brief on new franchise for KMB dated 28 March 2017. It set out the clause and service-related commitment to be added to the newly granted licence. It is the annex C to this paper.

This is the LegCo paper suggesting the clauses and

service-related commitments to the most recently granted franchises placed before the LegCo. If we see the first paragraph:

"KMB will fully take on board the clauses and commitments adopted in the two most recently granted franchises in 2015 (ie the franchises for Citybus ... and New Lantao Bus ... details of which are set out below ..."

So the first is the bus service. So the emphasis is on bus service, and then the first paragraph:

"The new franchise will empower the Commissioner to require KMB to provide facilities and installation for enhancement of bus safety, and provide a barrier-free and elderly-friendly travel environment. Specific initiatives are as follows ..."

The first is service quality. So I believe the clause speaks for itself, it is about service quality.

And the barrier-free and friendly features for the bus design, that's the subparagraph (i), and also the bus stop announcement system, and paragraph (ii) is:

"providing facilities ... to ... enhance safety, such as facilities and installation that can reduce potential fire hazards on all new buses."

So the emphasis is on the fire hazards.

And paragraph (iii) is on:

"Allowing foldable bicycles which ... will not cause ... hazard to other passengers ..."

Again a service facility.

(iv) is about providing passenger seating facilities.

And then over the page it's about passenger information:

"the new franchise will enhance the regulatory power of the Commissioner over the type, form and manner of information to be provided by KMB to passengers to ensure provision of suitable service information to passengers through better means ..."

(ii) Providing real-time bus arrival information through website and smartphone application, and installing display panels at suitable bus stops ... for disseminating such information."

Now these two paragraphs are, again, about service, providing passenger information, and even in provision of passenger information you can see the Commissioner is exerting its regulatory power as to what to convey to passengers.

So even from the agreement perspective, this is not about safety, this is about providing sufficient information to passengers, it is about service.

And the next one is the enhancement of government

regulation. The first one is about publishing the service pledge, the time frame for responding to complaints, and also the achievement rates of passenger service pledge.

The second about is the financial, strengthen control or regulation over the financial and accounting arrangements of KMB.

The third is about conducting open tendering requiring KMB to reluctant open tendering for all material procurement contracts.

Lastly, it is about the improvement in environmental performance, in terms of the air quality, low-emission buses, et cetera.

Now in all these new clauses there was nothing, or there was no clause whatsoever about the enhancement of the black box requirements or black box capability in all these clauses. Do you agree?

MR JULIAN KWONG: Chairman, yes, I agree.

CHAIRMAN: In fact there is only one mention of a safety issue, and that is in relation to fire prevention.

MR JULIAN KWONG: Chairman, yes. Related to fire hazards and also it mentioned that the new franchise will empower the Commissioner to require KMB to provide facilities and installation for enhancement of bus safety, but this clause does not explain what these

facilities are.

CHAIRMAN: The reference to fire hazard is a requirement to isolate the engine, is it not, that had been provided earlier for Citybus? There had been engine fires, and this was a way of reducing the risk from engine fires.

MR JULIAN KWONG: Chairman, I have not studied this. That could be the case, but my interpretation is that when we talk about fire in a bus, we also need to consider the speed of evacuation of bus passengers, and there may be other possibility of having a fire, although it is a bit remote, say, for example, a bus colliding with a dangerous goods vehicle, with combustible materials.

So the whole subject of fire hazards, I think it can be very wide, and of course it is a specialised subject. But certainly this is of interest to us as well as a potential safety risk. Thank you.

MS MAGGIE WONG: Mr Kwong, I know I am a bit out of sequence now, because I have taken you to the clauses that the government proposed to KMB, or requiring KMB to include. But I wanted to show you back a document as to what the government knows or rather what the government set out as to the public concerns, and whether it is properly reflected in the clauses themselves, and if I may take you back to the LegCo file, it is the SEC-2, page 799.

It is a document, a LegCo paper on the new franchise

of KMB, in June 2016. It is the first page. The first page, the first paragraph set out what the paper is about:

"The government invited the public to offer views on the requirements of the new franchise for the bus network of The [KMB] ... This paper briefs members on the views received."

Now the public expressed a lot of views, and we can see at paragraph 4:

"A total of 135 submissions were received during public consultation. 27 of them were from [District Councils], different political parties, individual members of ..."

I'm sorry, it is page 799, paragraph 4.

CHAIRMAN: Thank you.

MS MAGGIE WONG: "A total of 135 submissions were received during public consultation. 27 of them were from [District Councils], different political parties, individual members of the [LegCo] and [District Council], as well as various groups. The remaining 108 submissions were from individual members of the public."

And they set out in five categories what the comments are about, and summarised them in the annex.

I'm going to take you to the annex starting at page 802.

Over the page, in paragraph 4, there is a section on bus safety. And there are two suggestions, one is to monitor bus captains' driving behaviour more closely. Second, to improve safety facilities on buses, such as by installation of additional horizonal bars and stronger materials to build the bus body.

It appears both suggestions are not reflected in the franchise agreement clauses that we have just seen.

MR JULIAN KWONG: Chairman, I think this clause number 4, yes, I did read it at that time, and I would consider the two points very vague, which certainly did not reflect our concern, which I would consider to be more sophisticated. Thank you.

MS MAGGIE WONG: I think we have finished the KMB. And if I may just go back a little bit to the Citybus, for franchise 1 and franchise 2.

I think you have made submissions on Citybus for franchise 1 only. Because in the document you provided us I can only locate one submission in relation to Citybus on 16 September 2014. Is that correct?

That's in the MISC-2- bundle, at page 775.

MR JULIAN KWONG: Chairman. Yes. This was a submission made in 2014. So this was the first time we tried to make suggestions to government, taking the opportunity for the renewal of franchise of bus companies.

MS MAGGIE WONG: If I may --

CHAIRMAN: Give me a moment, please, while I locate the document.

MS MAGGIE WONG: Page 775.

CHAIRMAN: Yes.

MS MAGGIE WONG: This submission is in response to the public consultation paper by the government. And if we look at this document, at the second paragraph:

"The consultation document by government states that 'the government's key consideration in granting or extending a bus franchise is whether a grantee is capable of providing a proper and efficient bus service'. We are concerned that other important values, notably road safety, quality of service, environmental friendliness and social responsibility, are not mentioned."

So you are responding first to the consultation document by the government, and second, you raise concern that the road safety and other issues are not clearly expressed in the consultation document such that you are not sure whether they gave sufficient importance to this issues; correct?

MR JULIAN KWONG: Yes, Chairman, that is the case. Because we interpreted the text in the government document as it was. So it didn't give any reference to safety. So we

have to raise it. But of course they can explain it. If they indeed consider that the word "proper" already covers safety, and they can explain that, I mean we will be happy to accept that. Thank you.

MS MAGGIE WONG: And on that page, paragraph 5, you mentioned that:

"It is understandable that bus companies do not have sufficient incentives for many important initiatives. As stated in clause 17, this could be due to high operating costs and competitions. Yet it will not be acceptable to tolerate certain problems, in particular safety issues. In this respect government should not preclude providing more incentives through subsidies and partnership programmes."

I wanted to explore this paragraph with you. You made specific reference to safety issues that bus companies appear to lack sufficient incentives. And you suggest providing more incentive through subsidy and partnership programme.

So what suggestions are you making? What exactly are you suggesting here?

MR JULIAN KWONG: Chairman, in this clause I pointed out that safety is of paramount importance. It should not be sacrificed for reasons of, say, financial reasons, and I could see that the bus companies have been running

on a commercial basis, and they do not receive any financial subsidies, except for the elderly concession fare scheme in recent years. That is just an idea which -- and as I said, government should not preclude. I have not come to the point that government should, or what types of subsidies they should provide, but in general I'm looking into financial subsidies. But, of course, that means we are suggesting that this issue should be explored. But we have not studied this in more details. Thank you.

CHAIRMAN: What kind of incentives did you have in mind related to safety issues?

MR JULIAN KWONG: Chairman, I think there are many possibilities. For example, to understand what safety measures and what safety strategies we should introduce, we need to have quality data, and studies conducted. As I explained yesterday, we need to study these in details: historic crashes, injury mechanisms. And then also to work with the bus manufacturers, to tell them what kind of safety problems we are having.

Bus manufacturers have been producing buses according to standards. For example the European standards, the UN standards. They may not know what problems we are facing in Hong Kong.

So in order to change the design of a bus, we need

research, the buses can cost more and so this would be areas, for example, where the government can perhaps help to finance, even for a certain -- may not be full subsidy, maybe in partnership, so government finance part of it, maybe the bus company also shared it. Thank you.

CHAIRMAN: But for what kind of safety provision?

MR JULIAN KWONG: Chairman, okay, for research into, say, the problem of the bus front, as I mentioned.

The bus front at the moment does satisfy European standards, or the UN standards, or there is no standard. But as I pointed out, there are safety issues.

So if we want to initiate a programme to redesign the bus front in cooperation with the bus manufacturers, then who would bear the cost? Because the bus would cost more, would be more expensive, and to do the research, it also would incur the cost. So that would be an example.

CHAIRMAN: The buses in Hong Kong are all made, are they not, by European manufacturers?

MR JULIAN KWONG: Chairman, yes. To my --

CHAIRMAN: Franchised buses.

MR JULIAN KWONG: To my understanding, yes. There are probably two dominant manufacturers, European, but based in the United Kingdom.

CHAIRMAN: Alexander Dennis, MAN, and Volvo; are those bus manufacturers?

MR JULIAN KWONG: Chairman, to my understanding, that is true.

CHAIRMAN: And the buses are designed to EU standards.

MR JULIAN KWONG: Chairman, to my understanding, yes, and also the UNECE, United Nations.

CHAIRMAN: Is there any other safety incentive that you suggest consideration ought to be given to government subsidising?

MR JULIAN KWONG: Chairman, for example concerning bus stops, as I mentioned, okay, bus stop -- at the moment they are subsidised by the bus companies, of course with revenues coming from the advertisement. And other changes to the bus interiors, et cetera. I cannot think about any more, but there should be many more which I think would be necessary. The ultimate idea is that we do not want the bus companies to be under unreasonable financial pressure because we want them to be able to make a profit, and to be happy, so that is the idea.

But I cannot provide more information at this stage.

CHAIRMAN: Well, perhaps there is one area you could help us with. The representatives of Citybus spoke about the proposals, considerations that seat belts be fitted for

everybody. Their observation was, "Nobody will use them. If you are going to require us to install them, then government should subsidise them." Do you have anything to say about that?

MR JULIAN KWONG: Chairman, without going into details of this issue, I have read about the response from Citybus, I mentioned yesterday that we need to look at every safety provision in a scientific way, whether the measure does address the important safety issues we are facing, and seat belt certainly is an issue.

It is not incorrect what Citybus said, that passengers may not use them. If passengers do not use them it is not very satisfactory.

There are other measures we have discussed yesterday, such as the electronic stability control, and there are many other measures. However, every measure, if they are applied to every bus, it will cost. We need to select those measures which can help us to reduce the safety problem, especially those causing serious injuries and fatalities.

So the safety belt is certainly a possibility. But I have not studied the real financial implication. So I cannot comment on whether we are looking to devoting all the resources to seat belts. I would say that we should look at all the measures as a whole, and we need

to carefully compare the different measures as regards the merits and the drawbacks, and ultimately the effectiveness. Thank you.

MS MAGGIE WONG: Thank you. And in this paper on page 775 at the bottom, with the heading "Road Safety is of Paramount Importance", you made reference to certain statistics of Citybus at clause 6(c), and you made this observation that the government:

"... appears to quickly attempt to justify the figures by stating that 'This is mainly because most routes ... by Citybus ... are plying relatively [busy] road sections in the urban area. It is thus more [likely] for accidents to happen. Notwithstanding, most of the accidents are mild in nature. They involved, for example, injuries arising from passengers losing balance inside the bus compartment or on the stairway, rather than collision with other vehicles'."

And you state:

"We do not concur with this paragraph given the paramount importance of bus safety. In fact, the consultation document has not included breakdowns, analysis and trends of accidents involving the bus companies to substantiate the statement. We consider it necessary for the document to first provide figures on the number of buses involved in fatal and serious

accidents, pedestrian accidents, multi-casualty accidents etc. Thereafter, risk factors should be discussed and feasible solutions ... and safety improvements under the new franchise."

So you expressed here that again what you have expressed similarly in the KMB, that you shouldn't look at one single parameter, but instead the consultation paper should provide more information on how the figures or the accident rates were arrived at; is that the point you were driving at?

MR JULIAN KWONG: Chairman, yes. This is exactly the point. Because from the consultation document, it is obvious that it is far too simple. In my way of working, we need to look at historic accidents, and to learn from them. We also need to look at risk. Sometimes, for major risk, for example the bus falling off a cliff, these kinds of accidents do not happen all the time, but if it does happen, then the result can be catastrophic. So both historic accidents and risk we need to look at. But obviously the consultation document is far below my expectation. Thank you.

MS MAGGIE WONG: In fact, you made a suggestion at page 776, the recommendation section.

You stated there:

"We recommend that past accident data and potential

safety risks of bus operation are further verified and studied in detail, with a view of identifying opportunities for improvements under the new franchises."

And you stated at the end:

"Consideration should be given to rewarding the bus companies for achieving pre-defined goals, such as reduction of certain accident types by 20 per cent per year."

And can I invite you to elaborate on this rewarding scheme that you are advocating?

MR JULIAN KWONG: Chairman, I think we discussed this point yesterday. It is a crude recommendation, but the whole idea is that we do not always talk about penalties, we also need to motivate and encourage bus companies and drivers to work together to achieve better safety.

As regards, for example, the reduction of certain accident types by certain percentage, I think this is also in line with the ISO 39001 philosophy I quoted yesterday, that we are looking to sustainable improvements of bus safety. In many of the discussions that I followed, it seems that the society, or government appears to be happy so long as the bus accident rates remain stable. For me that is not adequate. We want to look at sustainable improvements,

especially in line with the safe system, and also the current trend globally from UN, from WHO, that we are targeting at no serious injuries or fatalities, rather than having the figure stable, and we are satisfied.

MS MAGGIE WONG: If I may summarise what you have stated in this paper, at pages 777 and 778, you made similar suggestions as you have in the KMB submissions in terms of the bus safety standard, the bus safety bus fleets and also the bus stop, as well as the ISO 39001 standard. Can you confirm that?

First is page 777 at the top, recommendation on the ISO 39001 standard.

In terms of bus safety, in the middle, you made similar recommendation about comprehensive standard and driver monitoring system using modern technologies, including in-vehicle GPS and black boxes to be incorporated into franchise agreements.

And also page 778, the bus fleet bus safety suggestions which are similar to what we have seen in the KMB.

MR JULIAN KWONG: So Chairman, does the counsel want me to confirm these recommendations?

MS MAGGIE WONG: Yes.

MR JULIAN KWONG: Okay, Chairman, yes. These recommendations remain valid. As for the ISO 39001, as

I mentioned yesterday, it is relatively new. For me that is certainly something to explore. My standpoint is always that we cannot impose something, and insist that something must be the right way to go. I would suggest that relevant parties, including government and bus companies explore this possibility, and whether this ISO would acceptable to them, whether they can implement them, or whether they would suggest equivalent standards which are in line with the same principles.

Where I see the value of this ISO is that it is set in a way that we give prominent attention to road safety management system involving the very high level, we look at sustainable improvements towards zero serious injuries and fatalities. It advocates plan, do, check, act cycle in line with other ISO standards.

But I understand there are many certification systems which companies nowadays have to follow, and sometimes I can understand some enterprises would consider that having a lot of certification, they to devote a lot of manpower, and ultimately we recommended this standard because we want to see a good result in terms of road safety.

We are not trying to advocate something which increases the workload, and perhaps it perhaps doesn't have an evident effect.

To conclude, I think these are all recommendations, but whether in the end that is practical, then I would invite the authorities and the bus companies to look at every recommendation in detail. Thank you.

MS MAGGIE WONG: We have seen this response to the public consultation. I'm going to take you to the SEC-2 bundle.

CHAIRMAN: Before you do that, may I just ask you to revisit what is at page 776, your recommendation about considering rewarding bus companies for achieving pre-defined goals.

You went on to say that, understandably, there ought to be incentives for bus drivers, as well as bus companies.

MR JULIAN KWONG: Yes.

CHAIRMAN: We have received evidence that KMB and Citybus reached an agreement with the trade unions with this result, that as of 1 March, the bonuses that they allowed for, amongst other purposes, safety achievements, were amalgamated with what was called basic salary. So the bonuses became the salary.

If it be the case that that means that drivers no longer have a safety bonus incentive, what, if any, comment do you have to make about that?

MR JULIAN KWONG: Chairman, I am not in a position to

comment on this.

In any case, whether this is an explicit bonus, or whether that is a penalty, after all, we want to see drivers voluntarily and happily seeing that it is their responsibility to drive in a safe way, and also according to the safety criteria we are advocating. That is a more complicated question as regard to the exact mechanism of how to reward them -- I can only say that that needs some study into whether we do achieve the results or not.

CHAIRMAN: As I understand what you were saying, is it is worth looking at incentivising bus companies but also incentivising drivers. If that has been removed, the bonus side of it has gone, is that a good or a bad thing? That's a simple enough question, isn't it?

MR JULIAN KWONG: Okay, Chairman. This is the first time I learned about this. Let me have a think.

CHAIRMAN: Well, let me suggest that we take the morning break now, and you can come back to us in 20 minutes.

Is it a good or bad thing, to remove from drivers the incentive of a bonus for driving safely.

20 minutes.

MR JULIAN KWONG: Thank you, Chairman.

(11.29 am)

(A short break)

(11.49 am)

CHAIRMAN: So, Mr Kwong, is it a good or a bad idea to incentivise bus drivers?

MR JULIAN KWONG: Chairman, first of all I would like to say this is a good idea.

Secondly, I would like to point out that the reward will also need to be in other form, for example the status of bus drivers, and we certainly need to increase the status of bus drivers, because they are doing a very good job of providing service for our population, and day by day and year by year.

The last point I would like to make is that any rewarding scheme will need to be carefully worked out. For example, if we just reward drivers for having no accidents, say for the past month or past year, then is it the best way? Having no accidents could be due to luck, or having an accident may not be due to his fault, it may be due to somebody's fault.

So whether the reward should be based on, say, driving most of the time, conforming to the company's -- to the safety criteria we have been advocating, that would be a possible direction. Thank you.

CHAIRMAN: Ms Wong, do we have access to the material relating to, is it GreenRoad?

MS MAGGIE WONG: Yes, we can pull that up on screen. Thank

you.

Mr Kwong, this is an article from the Straits Times that we extracted. And we can see, first of all, the title is "Tracker helps bus drivers to better their performance". I think it is a Singapore system, and if we roll it down, it is:

"The Tower Transit bus driver ... showing how his driving performance can be tracked and collated on a mobile phone app, which he can then review. A colour-coded panel in the bus will flash red, amber or green, according the driver's driving patterns."

So that's what we have discussed yesterday about a system where you can use a driver's app or driving habit to monitor the driving habit of a particular driver.

This is also based on the data extracted from the black box to analyse the data.

If we look at the article itself:

"The ... Anglo-Australian operator Tower Transit was prone to jerky stops and seat-sliding corning. His safety demerit score on the company's GreenRoad vehicle-tracking system was 165 last October -- more than eight times above the recommended 20."

And the system helps drivers -- not only for the company to monitor the driver's behaviour, but also

informs the driver as to how they behave by looking at -- each of them have their own mobile device.

So what do you say to this system?

MR JULIAN KWONG: Chairman, I think this system would be a good reference, but exactly how we do it, then of course that needs further examination. But I think the whole idea is that we -- the system is trying to encourage drivers, and also to make them feel that they are good professionals, and then if they have been driving in a safe way, then they would be very well respected professionals.

I think I have no -- well, I am positive about it, but just that we should explore this in more details. Thank you.

MS MAGGIE WONG: Just for the record, we can see in the middle paragraph it started with the Tower Transit:

"Tower Transit said the GreenRoad telematics system had made the drivers smoother and safer on the road. Between last July and May this year ..."

Actually they have carried on this service for about a year:

" ... the system -- which tracks how a vehicle is driven in real time via GPS and sensors -- has significantly improved safety scores."

So it is not simply a one-off incident, they have

been doing this constantly, so that when I showed you the article I thought I should let you know about this.

The company has 750 drivers, for the record.

And may I go back to your submission on Citybus, at MISC-2, page 779.

We have been through this, but I just wanted to alert you to what you have submitted earlier on. It is the passenger information. And one of the things you suggested in Citybus in that paragraph, Passengers Information", is that most passengers would be content if they know the timetable of their buses.

And jump to the next paragraph:

"Notwithstanding the above progress, bus passenger information ... is not consistently provided."

Then you asked that there be more commitment to develop a modern integrated system:

"The lack of a modern real-time information system, at least for more major bus facilities, is far below the expectation for Hong Kong as an international city."

And you recommended that:

"Government negotiates with the franchisee a programme to initiate pilot projects and to develop a modern bus passenger information system."

So actually, the real-time bus information is part of the thing that you are advocating in relation to the

Citybus, which at that time has not been fully implemented.

And if we may look at your submission on what is the government's attitude towards the public views. And if I may take you to SEC-2 bundle, page 655.

It is a paper, public consultation paper on requirements of new franchises.

This paper was issued in December 2014, setting out the outcome of the public consultation on requirements of new franchises, in relation to Citybus franchise 1.

And at the bottom, paragraph 3, we see the public consultation was between 25 June and 16 September 2014. And the Transport Department invited views from the 18 district councils, the traffic and transport committees of the 18 district councils. Five district councils commented at their meetings. And over the page at paragraphs 4:

"A total of 47 submissions were received during public consultation. 18 of them were from political parties ... remaining 29 ... were from individuals."

They commented on three topics: service quality, fare concessions and government regulation.

And paragraph 5, the annex set out the major comments.

If we go to 657. Paragraph 3, it made suggestion on

bus safety. And one of the suggestions is:

"to introduce monitoring mechanism to strengthen monitoring on the driving attitude of bus captains ...

... to improve on-board safety facilities ...

... to improve the management on ... safety equipment."

That's the major view expressed from the public consultation.

If we go to the minutes of the meeting, that is in SEC-2-bundle at page 93 -- sorry, before I go to that, there is another LegCo paper. It is at page 700.

This is also a paper on the background brief. Summarising the major views and concerns. And if I may just take you to paragraph 16, page 703. The heading is called:

"Driving safety of buses of NLB".

That is in reply in paragraph 15:

"In reply to a question raised by a member at the council meeting of 29 April 2015 regarding the driving safety of buses of NLB [that's the New Lantao Bus] subsequent to an accident happened in early April 2015 ..."

And if you see at the bottom of the footnote this is an accident where the NLB bus nearly fell off the hill on its way from Tung Chung to Tai O. It was suspected

that there was a failure of the braking system.

" ... the Secretary for Transport and Housing ... said that all newly-recruited bus captains ... would receive training for three to five days ... and familiarise themselves with the bus ... routes ..."

And if we go to the next paragraph, it is the Secretary for Transport and Housing stating that:

" ... NLB had installed an electronic tachograph (commonly known as 'black box') on its whole fleet to record the operational data of vehicles to help monitor the bus captains' behaviour and investigate accidents."

So this paper is also touching on this black box requirement, as you can see from the Secretary for Transport and Housing's response.

And if we now go to the minutes of meeting on 17 July 2015, that's at page 937 of the SEC-2-bundle.

That's a minutes of meeting on 17 July. If we go to page 943, if you read from paragraphs 11 to 16, the focus is on the provision of service of real-time bus arrival information, and not so much on the bus safety or other issues explored in the public views.

Can you see that? If you take your time to read that.

MR JULIAN KWONG: Okay.

MS MAGGIE WONG: Can you confirm that it is all about the

real-time provision of service of the real-time information to the passenger, and not on the topic about monitoring of drivers' behaviour as reflected in the public views.

MR JULIAN KWONG: Yes, Chairman, I have been reading it on the screen.

MS MAGGIE WONG: Have you finished reading?

MR JULIAN KWONG: Yes, Chairman.

MS MAGGIE WONG: Can you confirm the statement that I made, that it is all about provision of real-time information, nothing about the bus safety monitoring of drivers' behaviour, in that regard?

MR JULIAN KWONG: Chairman, yes, from what I have been reading, this text is mostly related to the real-time information system.

MS MAGGIE WONG: Yes.

CHAIRMAN: That's nothing to do with monitoring driver behaviour, is it?

MR JULIAN KWONG: Chairman, no. I cannot see any.

MS MAGGIE WONG: Finally, if we go to the LegCo brief setting out the terms and conditions of the new franchise for Citybus, it is in TD-3 bundle, page 570.

This is a LegCo brief setting out the new franchise conditions of the Citybus and New Lantao Bus, and if we go to page 572 --

CHAIRMAN: What is the date of this document?

MS MAGGIE WONG: The date is 22 September 2015.

CHAIRMAN: Thank you.

MS MAGGIE WONG: And if we go to page 572, paragraph 5, it makes reference, first, to Citybus, the service performance, and over the page, NLB. And then at page 574, the public opinion on bus service.

Down at paragraph 8 it sets out the new franchise conditions and commitments. Page 574, paragraph 8.

First, we see "Incorporating Franchise Conditions and Commitments of the Most Recently Granted Franchises".

And at the bottom:

"The government has secured the agreement of Citybus ... and NLB to accept fully the franchise conditions and service/facility commitments in the most recently granted franchises ..."

And in the section or paragraph 9 it sets out the new franchise conditions and commitments.

And it boils down to three. First, provision of real-time bus arrival information; second, fare concessions; and third, enhancement of regulation on bus service.

Paragraph 10 deals with the provision of real-time bus arrival information, but there is nothing there

about bus safety issues.

If you take your time to read that.

MR JULIAN KWONG: Yes, Chairman, I cannot see anything referring to safety here.

MS MAGGIE WONG: The third condition is the enhancement of regulation of bus services at paragraph 15, page 577. Again, there is nothing there about bus safety issues, or monitoring of driving behaviour.

MR JULIAN KWONG: Chairman, yes, that's true.

MS MAGGIE WONG: Mr Kwong, if I may refer lastly, this is the last topic I'm going to take you to, to your document on 12 December 2014. That's in the MISC-2 bundle, page 780.

This is a letter that you wrote to the Secretary for Transport And Housing commenting on the scope of the public transport strategy study. Page 780, at the bottom.

You stated there, first of all, about the safety performance and risk of public transport based on published accident statistics.

And at the bottom you mentioned that:

"... the PTSS [that's the Public Transport Strategy Study] should examine all opportunities afresh to improve safety and quality of service."

You quoted some examples, and one of them is:

"Black box and GPS driver monitoring system ..."

You stated that there should be:

" ... systematic monitoring of driving parameters such as speed, acceleration, braking etc to reduce the risk of all types of accidents. Such system would be operated in conjunction with new protocols eg speed restriction on high risk road sections and urban streets, gentler acceleration/deceleration values etc."

You were advocating there amongst other suggestions about improvement on the black box and GPS driving monitoring system?

MR JULIAN KWONG: Yes, Chairman. That is basically consistent with what we have been recommending in many of the papers we have been submitting to government or LegCo.

MS MAGGIE WONG: Thank you.

Chairman, I have completed my questioning. Unless I can assist further.

CHAIRMAN: Yes, there is one matter.

We have a letter, do we not, that Citybus put in, in which they were asked to confirm their commitment in relation to this franchise. Can you bring that up on the screen?

MS MAGGIE WONG: Yes.

I believe that's CTB-3 bundle.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Page 582 to 585.

CHAIRMAN: Yes, that's what I had in mind.

MS MAGGIE WONG: If you see this, this is a letter from the Transport Department to Citybus concerning its commitment to provide real-time bus information. If you take your time to read this document, from page 582 to 583.

MR JULIAN KWONG: Yes.

Yes.

MS MAGGIE WONG: So this letter made no reference whatsoever to the monitoring of drivers' attitude or the improvement on the black box requirement, or the GPS driving monitoring as you proposed eight months ago, more than eight months ago.

MR JULIAN KWONG: Chairman, I would like to note that, for example, in clause (b)(1) the term "safety enhancement features for new buses", that may be relevant.

CHAIRMAN: Sorry, clause what?

MR JULIAN KWONG: (b)(1), it is the top paragraph you are reading on the screen.

CHAIRMAN: Clause 7?

MR JULIAN KWONG: Clause 7 of the new franchise. The point number (1), that has the words "safety enhancement features". So ...

CHAIRMAN: Set out in annex 2. Do we have annex 2?

MS MAGGIE WONG: I believe that's the document we earlier -- it is not in this bundle, or we have not been provided, but if we cross-reference to the earlier document, in TD-3. Page 614. TD-3, page 614. That's clause 7, provision of the facilities.

CHAIRMAN: Don't we have annex 3?

MS MAGGIE WONG: Not in this bundle, we have not been provided with annex 2 or annex 3. It is just the letter, and also page 586, the undertaking letter by Citybus.

But if we can cross-reference this clause with the TD bundle, we can find the relevant clause.

If we cross-reference to TD-3 bundle at 614.

CHAIRMAN: Yes.

MS MAGGIE WONG: And also 652, together.

Clause 7 is the provision of the facility.

Page 652, under clause 7, it sets out:

"The new sub-clause (1) empowers the Commissioner to require the grantee to acquire, provide, adopt, maintain or modify facilities, installation, fixtures ... on its buses to enhance safety ... including provision of barrier free facilities for the elderly and persons with disability."

So based on what we see, Mr Kwong, it has nothing to

do with the driving monitoring behaviour.

MR JULIAN KWONG: Chairman, I would like to say, these clauses are not precise enough. As far as our comments were made, so it is not something exactly coinciding with our expectations. Although we understand that normally in such a public consultation there are many submissions, and ours is only one of those. Thank you.

MS MAGGIE WONG: That complete --

CHAIRMAN: Do we not have a similar letter from KMB where one has to see what was the commitment that isn't articulated in the franchise agreement, one has to look at the letter that is not a public document that passes between the bus company and the Transport Department?

Yes, it is on the screen now. This is what I had in mind. Can we scroll down to "Enhanced safety features". It is item (iii).

Is that at KMB volume 9?

MS MAGGIE WONG: Yes, that's the extract of the Transport Department's letter to KMB dated 10 March 2017.

Now, in relation to this, we can see that the KMB stated that under the enhanced safety features it simply -- at the bottom, (iii), electronic data processing device, and also the speed limiter, amongst other things.

So, in effect, electronic data processing device is

a black box. But apart from stating there the installation of this device, there is nothing specific about what information should be contained in this device, to monitor the driver's behaviour?

MR JULIAN KWONG: Chairman, yes. These features quoted in the document, of course I appreciate them, they may be very relevant, and --

CHAIRMAN: They could be anything, couldn't they? Because we are not told what the enhanced feature is?

MR JULIAN KWONG: Chairman, yes. Everything can affect bus safety, but some are more important than the others, and I think this probably has not addressed some of our more major concerns.

CHAIRMAN: You were asking that there be real-time, automated monitoring of driving behaviour. And all we are told here is that an enhanced safety feature which this company has committed to is in respect of electronic data processing device, but utterly bereft of any stipulation whatsoever.

MR JULIAN KWONG: Chairman, that is true. That is lacking the reference for a monitoring system in conjunction with the development of safety criteria for bus driving. Thank you.

MS MAGGIE WONG: Thank you.

CHAIRMAN: You have concluded your questions?

MS MAGGIE WONG: I have concluded my questions.

QUESTIONS FROM THE COMMITTEE

MEMBER AUYEUNG: Thank you, Mr Kwong, for coming yesterday and today to give us a lot of opinions.

I have do have two questions to seek your insight further.

The first one is regarding the Hong Kong different types of roads. As you can imagine, driving in New Territories is very different driving from driving on Kowloon side, or even the Hong Kong Island side. My question to you is, do you support further regulation or more clear-cut criteria to determine the type of buses to be driven on different types of road condition?

MR JULIAN KWONG: Thank you, Mr Auyeung. Certainly, different roads will have different safety implications on bus driving. And I believe at this moment already there have been some considerations on which types of buses, the size, and also sometimes the features to be incorporated into these buses for using a particular road.

For example, as I understand, new buses using roads on Hong Kong Island, with the risk of having tree trunks causing damage or injuries, now they have metal bars, like a tree guard. On expressway, only on certain roads, an expressway, is it permitted to use the larger

size of the buses which can carry 148 passengers.

However, I think your question is showing a good direction, that perhaps we should look closer into this issue. Not only that we are looking to the type of buses in terms of size, capacity, and especially the length, we also need to look at it far closer. For example, I mentioned that rear-front collision is one of our major concerns, especially on high-speed road, because the upper deck front seat passengers cannot be protected by the seat belt alone if the bus collides with a container vehicle, for example.

So it seems that there needs to be much more elaborate thoughts on what types of buses should be allowed for certain routes, which is tied up with the risks we identified, both the theoretical risks and also the historic happenings.

Do I answer your question adequately?

MEMBER AUYEUNG: Yes, following similar thought, Mr Kwong, my second question is regarding comments you made earlier, that on narrow and hilly roads in Hong Kong, your recommendation was to reduce the driving speed, and also create more safety barrier. Would installing cameras produce similar results, in your thinking?

MR JULIAN KWONG: Do you mean cameras --

MEMBER AUYEUNG: To sort of deter drivers from

over-speeding, or even catching people for driving over the speed limit?

MR JULIAN KWONG: Theoretically, that is a possibility. I mean we are actually looking to a very simple objective. We want bus drivers to be particularly careful when they are passing through these critical sections of the road, because we cannot afford any bus, say, from falling off the cliff. To that aim, I think a camera can be a suitable measure, but bearing in mind that with current technologies, we can do it in a more efficient way.

So I think that would be my answer.

MEMBER AUYEUNG: Thank you.

Thank you, Chairman.

MEMBER LO: Thank you. We learned a lot from you in these two days. You covered a lot of ground: bus design, road design, management and monitoring systems, and many deserve further investigation.

I'm just wondering in your mind, can you identify one or two items which is a low hanging fruit, if you will, that the evidence is clear, and which is also appropriate for Hong Kong. So what are these one or two things, that are very clear we should do it ASAP?

MR JULIAN KWONG: Thank you, Professor. There are a number of areas which I have expressed I think clearly in all

these documents.

The most imminent danger, as I see, would be the critical sections: some sections say along Peak Road, to give you an example. A cliff of 20 to 30 metres high, and we have so many buses going to The Peak nowadays, and also coaches, school buses, minibuses.

I mentioned yesterday that certainly we need to have a safety barrier. But we also understand that many of these roads are historic roads, and there needs to be funding, adequate investment. The immediate measures would be to raise the awareness of drivers and to set up the controls we mentioned.

The second issue I would like to point out, as I did already, is to reduce the risk of rear-front collisions on highways.

That can also be done immediately, by raising the awareness of drivers. And especially to identify those drivers who have a habit to follow the vehicle in front too closely, especially if their bus route is on a high-speed road, including expressway or other rural roads.

And I think that can help to reduce the risk. Because we know that these would be the accidents usually resulting in multiple casualties.

Other measures, other type of accidents, let me have

a quick look.

CHAIRMAN: Take your time.

MR JULIAN KWONG: Yes. Okay.

Can I refer to my submission which is in bundle MISC-2. It is actually my submission report on bus safety, page 784, because this would remind me of the accidents I am trying to refer to.

Okay, the first one, passenger losing balance, is most frequent.

Raising the awareness of drivers, that could be implemented fairly quickly, I would suppose. We cannot reduce all the risk, but at least we can reduce it reasonably.

The second one, collision with pedestrians.

So again, we have talked about regulating the speed of buses in urban areas, particularly targeting drivers who are habitually going at grossly inappropriate speed.

The last one, I think the Committee would be particularly interested is, in rollover. I would like to point out that there are many scenarios of rollovers. And I would like to draw your attention, in the same document but to page 796. So these are all rollovers.

Rollovers can be due to a number of causes: driving the bus too fast around a bend is only one of the causes. Another cause, of course, is dropping off

a cliff, that is clear enough. But there is another situation that a bus rises up the sloping end terminal of a safety barrier, and that already accounted for a number of bus rollover accidents in the past.

According to this table, the accident happening on 14 January 2017, the Citybus rolled over on Lei Yue Mun Road at Lam Tin, the casualty, yes, it's correct, one fatal and 19 casualties, and the bus actually was launched by the sloping end of the safety barrier.

You can see that there is another situation, similar accident, in 2003, 17 October. On West Kowloon Highway. Again, that is related to the sloping end terminal.

And again, you can see on 12 June 2015, yes, this one again launched by the end terminal of the safety barrier, but there was no passenger, nobody injured, and few people realised this.

So end terminals, we need to look at this issue. And especially on a highway. Because sometimes a bus driver driving too close to the roadside, and accidentally the bus went up these terminals, and it can lead to rollover. So this is another issue which we need to pay attention to fairly quickly. Thank you.

CHAIRMAN: Mr Kwong, if there are any other final matters that you want to address, please do so now, otherwise we will thank you for your evidence.

MR JULIAN KWONG: Thank you, Chairman.

Actually, in the past two days I think what I need to express has been expressed.

I would just like to clarify some of my opinions in order that the concept and the idea is clear.

The first one relates to what I mean by highway, and what I mean by the urban road network.

Also in terms of Chinese, highway is (Chinese spoken), and urban street network, I would call it (Chinese spoken). We talk about having lower speed limit, and mostly we have been talking about the urban street network, or urban road networks, because we are talking about 30 kilometre per hour or 40 kilometre per hour speed limit.

I want to make it clear that yesterday I did not imply that highways should be subjected to such speed limit normally. Highways are roads linking urban areas, so usually there is a higher expectation.

The second point I would like to raise is that speed limits have to be reasonable and be consistent with what drivers expect, and what they perceive the environment.

So it is a very sensitive issue. And I do not wish to give the impression that whenever we find a problem then immediately we turn down the speed limit to a value which may become not quite reasonable.

CHAIRMAN: Perhaps in that context you might like to explain the 85th percentile approach to a speed limit.

MR JULIAN KWONG: Chairman, thank you.

We have a number of concepts in traffic engineering pertaining to speed. The main idea is that the speed of vehicles is not a single value. Usually we have to determine the speed profiles. That means, say, we look at 100 vehicles, and we would obtain the value we call it 85th percentile speed. For example, if the value is 48 kilometres per hour, the meaning is that 85 per cent of the vehicles are going at or below 48 kilometres per hour. And at the same time, 15 per cent of the vehicles go at a speed higher than 48 kilometres per hour.

But I would also like to say that 85th percentile speed is not the only value we are looking at. According to the document which the chairman quoted yesterday, the document entitled "Setting Local Speed Limit, 2013", issued by the Department for Transport of the United Kingdom.

In this document actually they are advocating the use of average speed. Average speed is clear, meaning that, say, we have all the 100 vehicles counted, and we have the average of the speed. So they are not using 85th percentile speed anymore to determine speedy. They are now actually using average speed.

The idea is the average speed probably reflects what the majority of sensible drivers wish to travel at, the speed which they want to travel at.

The significance is that if we use 85th percentile speed, then it may not be in favour of, say, pedestrians. If we use average speed, that can be a better solution.

Up to now I presume that in Hong Kong we have not been discussing this very important point enough. It will have a major implication of how we should set speed limits.

CHAIRMAN: Can you give us the reference to where average speed is addressed in this document?

MR JULIAN KWONG: Thank you, Chairman. Can I first get the bundle.

CHAIRMAN: Can you help us which document you are looking at?

MS MAGGIE WONG: I think it is SEC-3, page 1003.

MR JULIAN KWONG: Chairman, may I draw your attention to page 1014.

CHAIRMAN: Yes.

MR JULIAN KWONG: Clause 35.

CHAIRMAN: Perhaps you would be kind enough to read out the relevant part.

MR JULIAN KWONG: Yes, Chairman. It states that:

"Mean speed and 85th percentile speed ... are the most commonly used measures of actual traffic speed. Traffic authorities should continue to routinely collect and assess both, but mean speeds should be used as the basis for determining local speed limits."

CHAIRMAN: Perhaps you would read on at 36.

MR JULIAN KWONG: Yes:

"For the majority of roads there is a consistent relationship between mean speed and 85th percentile speed. Where this is not the case, it will usually indicate that drivers have difficulty in deciding the appropriate speed for the road, suggesting that a better match between road design and speed limit is required. It may be necessary to consider additional measures to reduce the larger than normal difference between mean and 85th percentile speeds or to bring the speed distribution more in line with typical distributions. The aim for local speed limits should be to align the speed limit to the conditions of the road and road environment."

CHAIRMAN: Thank you.

MR JULIAN KWONG: Chairman, should I continue?

CHAIRMAN: Yes, please do.

MR JULIAN KWONG: Thank you. As you can see, speed limits, it has a lot of considerations based on sound traffic

engineering considerations. I do not wish to go into too much into this, but just to point out that this document would be a particular reference if we want to explore this subject in more detail.

And after that, I would just like to clarify a few other points.

The first one refers to speed humps. I would like to quote the Chinese name. I would consider speed humps to be (Chinese spoken).

Another name is (Chinese spoken). The meaning of this is that speed hump is a physical measure, that it protrudes above the ground. And we have other concepts, like rumble strips, or transverse markings. And these would be more or less visual -- for the markings, they are more or less visual measures. That means the drivers will not actually experience the uncomfortable feeling if they go at too high a speed over a speed hump.

I note that in some of the reporting that the speed hump was translated as (Chinese spoken). So that is in relation to my answer to the counsel yesterday, whether there should be a speed hump on Tai Po Road, and I was more on the conservative side yesterday, because I sensed that you were referring to having a physical measure above the ground, which can be 12 centimetres

high. That would be a (Chinese spoken), or a (Chinese spoken), in Chinese. A speed hump.

But of course I am open to any ideas. I would like to clarify that according to my experience on main highways, usually we do not provide a speed hump as a physical, as such. Because if a vehicle approaches it too fast, then there is safety concern.

But sometimes we do provide speed humps on a main road, subject to certain conditions. Usually we would first convert the main road, the main highway into a special section. Because the main road is passing through a village or residential district. So I only want to clarify that I do not want to dismiss a proposal, say, by a district councillor, in a simplified way in this meeting. I'm open to any ideas. But just that there needs to be study in detail.

Just two more points.

Red light speed cameras can be a possibility in future to enhance road safety in Hong Kong.

In Hong Kong in the urban areas we have a lot of red light cameras. These cameras can only determine if a car jumps a red light. But imagine if the car passes through the signallised junction on Nathan Road, passes through a green light at 80 kilometres per hour. These cameras cannot enforce the law, because they only catch

the drivers who jump the red light.

In countries like Australia, they have combined the function of the red light camera with the speed camera. So the same camera will catch drivers who either jump a red light, or who is adopting excessive speeds.

If the driver jumps a red light and at the same time the excessive speeds, he will get two tickets. In Australia this technology is called red light speed camera.

And I understand that the supplier of these red light cameras in Hong Kong, they already can have the speed enforcement function incorporated into the same cameras. Of course subject to further study, I think that would be a very good solution, in addition to any lower speed limit we propose, to enhance the safety of urban streets in Hong Kong.

The last point I would like to clarify refers to the bundle MISC-2. Page 808.

Referring to this photograph, Chairman was very interested in this, because we have always been discussing about the possibility of vehicles or a bus falling off the cliff. And yesterday, I have expressed the point. We have been raising these questions for a long time, sometimes letters, but sometimes we just post it on our website without notifying anybody. And

I also raised it through the district council.

I believe that government has paid attention to this issue and over the years, there are many similar issues on our roads with safety problems. Some have higher priorities, and some have lower priorities, and I would like to acknowledge that government has been paying attention to many of these issue, especially on bridges. Because after the accident on Tuen Mun Road, many of our bridges have been --

CHAIRMAN: You are referring to 2003?

MR JULIAN KWONG: Yes, Chairman.

That is the continuous programme. I would just like to acknowledge that since then, and over a long time, our bridges, which is also another source of potential catastrophe, have been equipped with safety barriers of adequate protection.

And also we discussed that there is a new consultancy by government on road safety hazard. And our organisation is aware of this consultancy, and it appears it is exactly this consultancy which is going to address this particular problem.

The last point I would like to make is that probably many of these problems are on existing historic roads, and certainly that needs adequate funding for improvements, rather than using the funding for regular

maintenance or small-scale works.

Certainly, I think we would be in a position to continue addressing these issues and to draw the attention to stakeholders and government.

Thank you very much.

CHAIRMAN: If I may say so, Mr Kwong, you have timed your conclusion perfectly. But we thank you for your evidence, we will now adjourn these proceedings, and resume at 2.30, when we will receive the evidence of Mr Alok Jain.

MS MAGGIE WONG: Yes, thank you.

CHAIRMAN: Thank you very much for all the time you spent assisting the Committee in providing your evidence.

Thank you.

MR JULIAN KWONG: Chairman, thank you very much, it is a pleasure, and also thank you to the counsel and all the supporting staff and the members. Thank you.

CHAIRMAN: Thank you. 2.30 pm.

(1.00 pm)

(The luncheon adjournment)

(2.30 pm)

EVIDENCE FROM FORMER KMB EMPLOYEE: MR ALOK JAIN

CHAIRMAN: Good afternoon.

MR JAIN: Very good afternoon.

CHAIRMAN: Thank you, Mr Jain, for accepting our invitation

to attend to give evidence to assist this Committee in its considerations of the factors relevant to our making recommendations to enhance bus safety.

I'm going to ask Ms Wong to begin asking you questions.

MR JAIN: Thank you, Mr Chairman.

Examination by MS WONG

MS MAGGIE WONG: Good afternoon, Mr Jain. Thank you for coming. I'm counsel acting on behalf of the Committee, I'll be asking some questions in relation to the safety features of franchised buses.

May we start off with some introduction.

Mr Jain, you have made two submissions in response to the letters from the Committee to you. The first submission you made is dated 25 May 2018. That is in bundle FE-1, page 39.

The second submission, we can find that also in the same bundle, at page 44, dated 18 June 2018. I'll be asking questions based on the two submissions that you have made.

If I may set out your background, first, Mr Jain, you have provided us with a curriculum vitae, and the curriculum, or the CV, can be found at page 46-1, bundle FE-1.

Mr Jain, you are currently the managing director of

Trans-consult Asia, a management consulting firm, specialising in traffic and transport advisory, new technology, data analytics and clean fuel technologies.

Is that correct?

MR JAIN: That's correct, counsel.

MS MAGGIE WONG: I believe you have worked in the MTR Corporation in Hong Kong, or the KCR Corporation for 12 years.

MR JAIN: That's correct, counsel.

CHAIRMAN: Can we have the time period, please.

MR JAIN: I joined them in 1997 and I left them in 2008.

MS MAGGIE WONG: If I may take you to your CV at page 46-5, it set out, I believe, the period and the work -- and your position at the time you worked for MTRC and the Kowloon Canton Railway Corporation. It is stated there as 2006 to 2008, as general manager, marketing, transport division, correct?

MR JAIN: That's correct.

MS MAGGIE WONG: Over the page, 46-6, you mentioned something about the development of a real-time passenger information display system.

CHAIRMAN: Before we get to that, can we establish Mr Jain's academic qualifications.

MS MAGGIE WONG: Yes.

Mr Jain, can we go to your academic qualifications

at page 46-8.

MR JAIN: Should be in the back, actually.

MS MAGGIE WONG: 46-8. It is right in the middle. Academic qualifications and professional training.

Mr Jain, I believe you obtained a bachelor of engineering, civil engineering, from Indian Institute of Technology in India.

MR JAIN: That's correct.

MS MAGGIE WONG: Then in 1994, I believe you obtained a master's programme, also on transportation engineering from Asian Institute of Technology, Thailand.

MR JAIN: That's correct.

MS MAGGIE WONG: In 2005 you have taken an integrated management course for senior executives, in the Richard Ivey School of Business.

MR JAIN: Correct.

MS MAGGIE WONG: Those are the academic qualifications you have done. I believe you are also a member of the UITP.

MR JAIN: That's correct.

MS MAGGIE WONG: Can you explain a little bit about this organisation?

MR JAIN: Sir, UITP is actually a French acronym for International Association of Public Transport. It is based out of Brussels and it has close to 1,000 members, over 100 countries, and in Hong Kong MTRC, and KMB --

KMB used to be a member, I'm not aware if they are still a member, but MTR is a member of UITP.

MS MAGGIE WONG: If we may go back to the page where we talked about the MTR Corporation, where you referred to the development of a real-time passenger information display system. 46-6. Right above the year 2004 to 2006, there is a paragraph stating that you led the conceptualisation to the implementation of a real-time broadcasting system which was winner in best networking category and best lifestyle category.

That section. Is it in relation to the development of that system for the MTRC?

MR JAIN: This was KCRC at that time, yes. And this was known as Newsline Express.

CHAIRMAN: What information did the system deliver?

MR JAIN: Sir, this was basically in-train on-board television screens which provided infotainment which included programming, news, as well as passenger information.

CHAIRMAN: What kind of passenger information did it provide?

MR JAIN: On a normal operational day it would provide what is the next station, and some educational messages about, you know, watch for the platform gaps, stay away from the doors, and things like that. During non-normal

operations days, when we had an incident, this means was also utilised for directing passengers in the right direction.

MS MAGGIE WONG: That was in 2006 to 2008?

MR JAIN: That was when I was heading the marketing department.

MS MAGGIE WONG: And then if we go to page 46-3 you were the --

CHAIRMAN: 46-3? Thank you.

MS MAGGIE WONG: You were employed as --

CHAIRMAN: Ms Wong, I'm not sure if it is your microphone or the angle you are at the microphone, but the sound is muffled when it comes from your direction.

Can it be moved around? Is it volume sensitive?

MS MAGGIE WONG: Maybe I'll raise my voice. Is that better?

CHAIRMAN: Yes.

MS MAGGIE WONG: Mr Jain, if you look at page 46-3, it relates to your employment at Kowloon Motor Bus, and you were employed as the head of planning and development between June 2013 to December 2015.

MR JAIN: That's correct.

MS MAGGIE WONG: Then you were promoted to be the deputy operations director between January 2016 and December 2016.

MR JAIN: That's correct.

MS MAGGIE WONG: In your CV I believe you also stated that you spearheaded research and development work on implementation of technology, data analysis, and SMART mobility.

CHAIRMAN: Where do we see that?

MS MAGGIE WONG: I think it is --

MR JAIN: Those are the areas I'm working on -- I mean, I these days work on.

MS MAGGIE WONG: Maybe I'll find the reference in due course.

But you were also Associate Professor in institutions in Hong Kong.

MR JAIN: Assistant Professor, yes.

CHAIRMAN: Professor of what?

MR JAIN: I have been teaching in Urban Planning Department in Hong Kong University.

CHAIRMAN: Over what period?

MR JAIN: I started teaching in 2004, and I still do some part-time subjects. Guest lectureship.

CHAIRMAN: What is the ambit of what you teach?

MR JAIN: Public transport operations and planning, primarily.

MS MAGGIE WONG: You set out your academic engagements at page 46-8 at the bottom, stating that you are part-time Assistant Professor, Department of Urban Planning, Hong

Kong University, from January 2007, to present.

MR JAIN: That's what I just mentioned.

MS MAGGIE WONG: The earlier reference, Mr Chairman, is at page 46-1. At paragraph 2. The last line:

"He spearheaded the R&D work on the implementation of new technology, data analytics and SMART mobility."

CHAIRMAN: Before you move on, what is "SMART mobility"?

MR JAIN: Primarily use of technology in transport operations.

CHAIRMAN: Is this in the period 2013 to 2016?

MR JAIN: That's correct. Primarily up to 2015. Yes.

MS MAGGIE WONG: Can you explain a little bit more on the use of technology in transport operations? What does it cover?

MR JAIN: So I was involved in the early discussions for real-time operation management system, the telematics, I also led a contract, which never completed, which was about putting this data analytics platform within KMB. SAP was our consultant at that time, and we were putting the whole data into one platform, creating a data warehouse and data extraction system.

MS MAGGIE WONG: Yes. I believe you are currently a consultant for the Land Transport Authority or undertaking consultancy studies for the Singapore Land Transport Authority; is that correct?

MR JAIN: I have not been directly engaged by Land Transport Authority but I'm working with a consulting firm advising LTA.

MS MAGGIE WONG: Yes, and what is the scope of the advice?

MR JAIN: I'm bound by confidentiality rules there, unfortunately. But it relates to public transport operation and management.

MS MAGGIE WONG: It relates to public transport operation?

MR JAIN: Yes.

MS MAGGIE WONG: And Mr Jain, may I now go to your submissions. Your first submission dated in May 2018, dated 25 May 2018, in FE-1, page 39.

Mr Jain, in your first submission at paragraph 2 -- you started at page 39 explaining your involvement in KMB as head of planning and development department, and the scope of your work. I can see that it includes "technological applications in relation to our activities and data management".

That would include the telematics and real-time monitoring system you referred to.

MR JAIN: Not precisely. Telematics and real-time operations management system had two aspects, one was the hardware part of the services -- three aspects, hardware part, software part and the data handling part. And I was primarily involved from the data handling

perspective.

CHAIRMAN: What was the hardware? What was that?

MR JAIN: The hardware was supplied by Openmatics. This was a telematics device which was being installed on the buses. And then at the back end, the ROM system, which was the software aspects of data extraction from this telematics device, and putting that into a real-time operations management system, and the third part was how to analyse this data and then extract intelligence and knowledge out it of.

CHAIRMAN: Let's deal with them one at a time.

Hardware, Openmatics, what was the equipment? Take it slowly.

MR JAIN: Well, it is commonly referred to as a black box in common parlance. This is --

CHAIRMAN: What was its technical name?

MR JAIN: It is a CAN bus system which is something, as far as I understand, which sits on the engine, connects to the engine, collects all the operational information about the bus, vehicle performance.

CHAIRMAN: What kind of data?

MR JAIN: It has speed-related information, acceleration, deceleration, braking, tilting, fuel consumption, location.

CHAIRMAN: What was the name of the model?

MR JAIN: I can't recall the name of the model.
CHAIRMAN: Software. What was the software?
MR JAIN: The software at that time, the intent was to develop it in house and it was termed as real-time operations management system. ROM for short.
CHAIRMAN: How was it to work?
MR JAIN: So telematics device was supposed to transmit data on a near real-time basis to back end OCC, operation control centre, and this ROM system was supposed to translate this data into understandable or comprehensible format, and then there was a platform for data analytics which will then allow us to analyse all this data and create, put it into our planning parameters when we were doing the bus route planning, scheduling, rostering, and all those things.
CHAIRMAN: Where was the operation control centre?
MR JAIN: The intent was to incorporate it into Lai Chi Kok Centre.
CHAIRMAN: How was the data to be transferred from the telematics to the operation control centre?
MR JAIN: It was over a GSM network using the mobile technology basically, 3G technology.
CHAIRMAN: That's the system that mobile telephones used?
MR JAIN: That's correct, yes.
CHAIRMAN: So that is the software side of things. And then

finally, what was to be the data analysis?

MR JAIN: So until then, a lot of data in KMB was residing in silos in individual departments. They were collecting -- for example, engineering information was available in engineering, operational information was available in the operations department, and they were all in different systems. The plan was to put this all into a single data warehouse and create a single version of truth.

CHAIRMAN: What use was to be made of the data contained in this single data warehouse?

MR JAIN: So there were three stages. The first stage was to establish the static, what is real, what is happening on ground. The second stage was to put into some level of modeling, where we could use it for planning purposes, in short term. And the third objective, eventually, was to take it into a predictive level, where we could apply statistical tools and do some forward projections.

CHAIRMAN: What use was to be made of the first step, the real time?

MR JAIN: That was primarily for management information purposes, as well as for any investigations, reporting, so on and so forth.

CHAIRMAN: Investigations into what?

MR JAIN: For example we used to receive a lot of passenger complaints about services, we could go back and look into the data and verify that information.

CHAIRMAN: So if the complaint had been made that the bus had been driven at an excessive speed and braked harshly, could that be investigated by analysing the data that had been put into this single data warehouse?

MR JAIN: Potentially, yes.

CHAIRMAN: That's a response to a complaint. Was there any plan to use the data proactively?

MR JAIN: So the second stage was where we went into real-time operations management system, because once we built the data models on the historic data we could translate the similar level of information and analyse on a real-time basis, and the idea was of course to monitor the whole operation on a real-time basis using what we normally call an exception management, where anything that goes beyond the threshold of normal operation you start to actively manage it.

CHAIRMAN: How was it envisaged, if it was, that this approach could address the manner in which a bus was doing driven?

MR JAIN: For example, if any bus that was being driven beyond the parameters that were set as normal operation, then it would raise an alert, and normally the

companies, or examples that I have seen around the world, they use this green, amber, red approach. So green is normal operation, anything that goes on the outlines of threshold boundaries it starts to raise the alert as an amber, and then of course once it crosses, it is a red alert. So at that time some intervention is necessary.

CHAIRMAN: Was it envisaged that this alert raised by a parameter being breached would occur real-time?

MR JAIN: The intent certainly at that time was that.

CHAIRMAN: When did discussions about the use of telematics in this way first begin in which you were involved?

MR JAIN: The discussion regarding this started most likely before I joined. But when I joined the company in 2013 in my early part of the involvement we were already discussing this. So I can't remember the exact date when it started.

CHAIRMAN: Who was involved in such discussions?

MR JAIN: At that time -- the senior management was involved, my immediate superior was the transport development director, he was involved. IT department was involved, operation department was involved.

It was done across the company, multiple departments were involved into that discussion.

CHAIRMAN: Thank you, Ms Wong.

MS MAGGIE WONG: You said a lot of people were involved. Can you give us an estimate of how many people?

MR JAIN: I think every different meeting had different number of people. It is not like a constant, but as I said, the departmental representations were -- these were the key departments who were involved in these discussions. There were quite a few, sizeable amount. Sometimes it used to be, depending on the issue, it could have been three or four people, or it could have been 20 people.

MS MAGGIE WONG: In any event, as you said in evidence, it was intended that the Lai Chi Kok Centre to put in all this data to be analysed by different departments' personnel; is that the idea?

MR JAIN: The idea was Lai Chi Kok would be the real-time operation management centre, the operation control centre, the data analysis was not necessarily at Lai Chi Kok Centre, it would be company wide.

MS MAGGIE WONG: So it is simply a centre to keep the information, or do you mean the real-time monitoring would be carried out in the Lai Chi Kok Centre?

MR JAIN: Yes, real-time to be carried out at Lai Chi Kok -- so this was more of screens and visualisations of where the buses are on a real-time basis, and of course data is processed through different servers and different

processes within the organisations so data was meant to be available to a lot more people within the company.

MS MAGGIE WONG: If I can go to page 40, FE-1 bundle, paragraph 2. You mentioned in paragraph 2(a) about this real-time operational management system. And in (a) you mentioned you were:

"... involved in many meetings and discussions about the technical specifications, features, technology selection and so on in relation to ROM right after I joined the company."

But you were not involved in discussions related to funding, tendering and project management.

MR JAIN: Correct.

MS MAGGIE WONG: Is it the case that throughout the time you joined the company until the time you left, you were involved in this ROM project?

MR JAIN: I wouldn't say until the time I left, but during that period when it was being discussed as a part of implementation process, yes, I was involved in the project very actively.

MS MAGGIE WONG: And I notice in (i) of that paragraph (a) you stated that the primary reasons to implement the project were to improve safety through real-time alerts and feedbacks to bus captains.

The feedbacks to bus captains, can you tell us

whether it is intended to be real-time feedback or a reactive feedback to bus captains after the complaint has been received.

MR JAIN: There were two things that happened. The idea was to develop a two-way communication system between the bus itself and the operation control centre, and the bus drivers were supposed to have what we call a DDU, driver display unit, and through this DDU there are two ways to intervene with a driver. One is done at the bus level where the bus, you can pre-programme the parameters that bus -- any time transcends, it creates an alert for the driver.

The second level of alert could be triggered by somebody sitting in the operation control centre. Let's say, for example, if a bus is running too fast, but still within the speed limit, and the on-board device does not detect any anomaly. However, at the OCC, a supervisor detects that on a particular section the bus driver, probably because of weather conditions or because of any accident or road conditions, they should be driving slower, then a supervisor can technically intervene and alert the driver or remind the driver to go slow in that section.

So there are two levels of interventions that can be done.

CHAIRMAN: On the second intervention, that is the supervisor in the OCC, how would he communicate his intervention to the driver?

MR JAIN: So we had many options being discussed at the time. We were talking about just a display system. The second was we were also talking about an audio system.

CHAIRMAN: So there were two possibilities. One was through the display system or otherwise by audio?

MR JAIN: Well, display was almost there, and audio was considered as an additional possibility.

CHAIRMAN: Was audio going to be by radio or by some other means?

MR JAIN: Primarily by radio, or even 3G communication. We had not gone that far, I think, at that time.

MS MAGGIE WONG: You mentioned there were many meetings or discussions about this ROM features. Can you recall if there are minutes or documents recording what was discussed?

MR JAIN: There were a lot of presentations, if I recall, and there were e-mails post meeting summarising what was discussed, the key agenda, or key tasks to be done by respective people. But as formal minutes, as we know them, I cannot recall if they were prepared.

MS MAGGIE WONG: Yes.

CHAIRMAN: These presentations of which you say there were

lots, were they in writing?

MR JAIN: These were PowerPoint presentations.

CHAIRMAN: On computers?

MR JAIN: Yes.

CHAIRMAN: Not on paper.

MR JAIN: Primarily on computer, PowerPoint presentations.

CHAIRMAN: Who made the presentations?

MR JAIN: Sometimes IT department, sometimes operations department.

MS MAGGIE WONG: Can you tell us who in the operations department would be responsible for compiling these presentations or materials?

MR JAIN: Who in the operations?

MS MAGGIE WONG: Or --

CHAIRMAN: If you can't remember say so, but if you do, tell us.

MR JAIN: There was a dedicated team of people in operations who were working on this. They left the company. I can't recall the name immediately. But there was a central team in the operations department, traffic department, which was looking at it.

MS MAGGIE WONG: It is called the traffic department?

MR JAIN: It was called the traffic section.

MS MAGGIE WONG: Traffic section in the operations department?

MR JAIN: Yes.

MS MAGGIE WONG: You mentioned in paragraph (b) in line 3:

" ... the telematics data was still available even after the scrapping of the project, there was some level of monitoring but the real value of ROM system was 'real-time' and that capability was sacrificed."

Now I would like to ask you this. What do you mean by "some level of monitoring" here?

CHAIRMAN: Before we get to it not being implemented, can you tell us how it came about that all this planning stopped? What happened?

MR JAIN: I was not involved in those discussions about scrapping this. But I do understand that ROM, because it was being developed in-house, it was running behind schedule.

CHAIRMAN: Yes.

MR JAIN: And that had caused some level of -- I'm looking for the right word -- some level of frustration within the company why we are not keeping up to the schedule, and then it was later announced that we are not going ahead with it anymore.

CHAIRMAN: Was this technology in any way linked to anything else that was being developed or used on the buses at that time?

MR JAIN: We were talking about a number of things that

could happen on the buses. We were talking about having real-time transmission of fare collection information. We were talking about automatic people counters on board the buses, we ran some trials with some university professors on WiFi detection. Ultimately the idea was we could detect how many people were on board the bus, where they were on the bus, and then we could provide this information in advance to the passengers, so they knew whether they could get on the bus, or whether they can get a seat on the bus or not.

CHAIRMAN: Was there a system developed perhaps prior to when you arrived, of giving estimated time of arrival of buses?

MR JAIN: That capability was developed during my time. Actually the trial was launched in, if I recall correctly, 2014, last quarter, and then eventually it was rolled out in early 2015.

CHAIRMAN: And the equipment that was necessary to develop that system, was it in any way relevant to the ROM system?

MR JAIN: It is actually the same equipment.

CHAIRMAN: Yes. So it was another use of the data that was obtained?

MR JAIN: Correct.

MS MAGGIE WONG: Can you recall who announced or who

conveyed the decision that the project would be scrapped?

MR JAIN: Nobody announced, as such. But when we knew, as I said in my letter, when Lai Chi Kok, the OCC, the facility was converted into office space, then it was kind of -- the message was clear. There was no formal announcement as such.

MS MAGGIE WONG: Okay.

MR JAIN: I cannot recall any formal announcement.

MS MAGGIE WONG: Thank you. About this real-time system, was it part of the function to monitor the driver's behaviour in their performance?

MR JAIN: Among other things, yes.

MS MAGGIE WONG: The reason I mentioned this is you mentioned GreenRoad, about different scorecard system. When you were thinking about this ROM system, or in your discussions, was this one of the ideas that your company at that time initially wanted to implement?

MR JAIN: That was certainly one of the intents.

Sir, in fact, when I mentioned improved fuel efficiency, this was directly linked to what we call eco-driving, green driving. There were a number of names you could call it, it is the same thing.

The idea was you could somehow nudge the drivers to drive in a better way on the road by creating some kind

of a system where we could give them the feedback about how they are driving and whether they are outliers or whether they are falling within the normal pattern, or whether it's good behaviour or bad behaviour, and you could nudge their behaviour in a specific way without penalising them, and that would eventually yield some kind of fuel efficiency, because fuel efficiency is directly linked to acceleration and deceleration.

MS MAGGIE WONG: Yes. You mentioned about penalising them. What about rewarding them?

MR JAIN: At that time we didn't really go into details of this. The idea was not to penalise, that was certainly clear. And that was the kind of conversations we were having, but we were trying to generate the data how we were going to reward or whether we want to monitor. Those mechanisms we had not gotten around to.

MS MAGGIE WONG: Yes, but that idea was certainly conveyed during one of the meetings?

MR JAIN: Yes, we discussed those ideas, we discussed actually many possibilities at that time.

MS MAGGIE WONG: Yes --

CHAIRMAN: Did you discuss what parameters to stipulate?

MR JAIN: Basically we were looking at London as one of the examples at that time, and the way London does it is they basically look at all the -- they call it

incidents, and anything that goes into the outliers of those thresholds, which is behavioural response such as acceleration, deceleration, braking, tilting, then the driver would get an incident on their record. And the less incidents they had, the better performance it would be considered for the driver.

CHAIRMAN: But did you consider stipulating excessive speeds at a certain level, or excessive braking or acceleration at certain levels? Did you condescend to that detail?

MR JAIN: We didn't put in the numbers, but we were trying to do a bit of statistical analysis, and at that time it was still being debated what kind of threshold or parameters or standard deviations we needed to look at.

Some discussions that did happen was about whether we should have a general blanket rule around the whole network, or whether we should define them on a route-specific, road-specific manner. Again, we were having those kinds of discussions.

MS MAGGIE WONG: You mentioned about route-specific manner. How do you pick the routes?

MR JAIN: Every route has different characteristics, whether they pass through traffic junctions, whether they pass through TST urban area, whether they are on highways, so the behavioural responses are different on different type of routes. So there are more chances for a driver

to brake hard on a stop-and-go kind of environment where they are pulling in and out of lay-bys quite often and they have to watch out for other traffic, whereas on a highway those incidents are much less.

We were discussing at that time what is the best equitable way to define these parameters which could meet the expectations of the management as well as deliver real value in the end without upsetting the drivers.

MS MAGGIE WONG: May I go back to your paragraph (b) about there being some level of monitoring even after scrapping the project. What level of monitoring are we referring to?

MR JAIN: As I understand, telematics data are still being used but they are being used most as a post-event, or T plus 1, on the next day, or after the event has occurred.

MS MAGGIE WONG: So reactive rather than proactive?

MR JAIN: You can say that.

MS MAGGIE WONG: It also mentioned that the real value of the system is real time but that capability was sacrificed. So is what you are talking about reactive to the complaint rather than proactive --

MR JAIN: Yes.

MS MAGGIE WONG: -- in that sense?

MR JAIN: So data is available real time, but nobody is analysing this data in real time or reacting to this data in real time or quasi real time.

MS MAGGIE WONG: Yes.

MR JAIN: It is the kind of -- whether you can have a 20-second response or a 24-hour response.

MS MAGGIE WONG: In paragraph 3, starting from line 2, you refer to:

"Even at the time when KMB was drawing up the plans, we were drawing heavily on the experiences from Seoul, Singapore, London ..."

And just on this, what experiences are you drawing from these countries?

MR JAIN: So just before I joined, I understand that KMB senior management went on a study tour and they visited all these cities, they looked at the systems, and when we were designing -- we were having these meetings, we were extensively talking about what Seoul is doing, what London is doing, the best practices, and how we can adopt this best practices to bring to Hong Kong.

MS MAGGIE WONG: Can you quote an example? Like what experience are you deriving from Seoul or Singapore?

MR JAIN: For example, Seoul had done this central traffic management centre, TMC, and that was something that was -- our idea of doing at the OCC level, operation

control centre level. Transport for London were actively managing their drivers' behaviour using telematics advice. That was something we wanted to bring over. So we were looking at different examples and how they could translate for our environment.

MS MAGGIE WONG: Yes. And when you discussed or when you had all these meetings, can you recall if it involved any participation of the Transport Department? Or did you relay the message that you are planning to do this with the Transport Department?

MR JAIN: I cannot recall exactly whether Transport Department was involved in any of this discussions, but I do feel that they were aware of what we were planning to do, because we made in those days a lot of public presentations to various chambers of commerces and all that, and we were talking about the future direction of KMB on how technology is going to transform the company.

MS MAGGIE WONG: You made a lot of public presentations?

MR JAIN: Me as well as other senior management of the company made on lot of presentations and we talked about these things.

MS MAGGIE WONG: "These things" is the ROM system?

MR JAIN: ROM was one of them. Estimated time of arrival, we were talking about, which was all centred around telematics device.

MS MAGGIE WONG: So in all these public presentations, you are saying some Transport Department people were present?

MR JAIN: I can't answer that authoritatively, but I would say this was public knowledge in a way, because we were not really trying to keep it under closed doors, so we were making public presentations.

CHAIRMAN: What you are saying was this was being disseminated widely and you would expect Transport Department might have heard about it?

MR JAIN: Correct.

MS MAGGIE WONG: Before I move on, because you made some references to this centralised management system, can I take to you a document. It is SEC-2 bundle. It is page 822.

CHAIRMAN: Ms Wong, I'm going to ask that we take a short adjournment, I would like to see if we can address the sound system, because we are getting a very muffled sound from Ms Wong, I see Mr Jain has the same difficulty. It may be the location of the speaker or we may need to swap the microphone.

May I ask that we address it and take five minutes. Feel free to leave the room if you want to, Mr Jain, but we will take five minutes. Thank you.

(3.15 pm)

(A short break)

(3.22 pm)

MS MAGGIE WONG: Mr Jain, I'm going to refer you to the Information Note by the LegCo. It is "Franchised Bus Services in Seoul and Singapore", and it is in the SEC-2 bundle at page 822. It starts at page 822.

If we go to page 823, that's the start of the Seoul system. And over the page at page 825, paragraph 2.8 --

CHAIRMAN: Before we get there, what is the date of this document?

MS MAGGIE WONG: This document was made between 2014 and 2015, although it does not actually bear a date. It is a research paper done by the LegCo Secretariat. But you can see the IN05/14-15.

MR JAIN: At the back it is dated 3 February 2015.

CHAIRMAN: Thank you very much.

Yes.

MS MAGGIE WONG: If we look at page 825 it talks about the establishment of the bus management system at 2.8:

"To coordinate bus services on a comprehensive and system-wide basis, the Seoul Metropolitan Government has established a new bus management system ... using advanced intelligent transport system technology ... GPS terminals installed in every bus allow a central bus control centre to monitor all bus locations and speeds,

adjust the number of buses travelling on any given route, communicate with bus drivers, and provide real-time information to passengers waiting at bus stops or checking bus schedules on the Internet."

Mr Jain, is this the system that you were referring to earlier on?

MR JAIN: It was a similar system, but if I may correct some of the things here. GPS terminals can't on their own allow all those things that are mentioned here.

GPS is just a location-based system.

MS MAGGIE WONG: Yes.

MR JAIN: So it has to be more than GPS, which usually is telematics. So I'm not sure whether they are referring to telematics there, but ...

CHAIRMAN: So GPS tells you where you are?

MR JAIN: Just the location.

CHAIRMAN: Then you need telematics to tell you speed or deceleration, acceleration?

MR JAIN: That's correct. The actual vehicle-related performance comes from an on-board device which is usually a telematics system. And telematics systems range from very simple type of devices to complex devices. Openmatics, the one that we are referring to here is quite a sophisticated one. But you can get a much simpler cheaper version of that device which can

just give you basic information about the vehicles. There are a lot of those available in the market too.

CHAIRMAN: Does the Openmatics model Mozart mean anything to you? Openmatics model, telematics, called Mozart?

MR JAIN: The only Mozart I know relates to music. I have not heard of that, Chairman.

CHAIRMAN: What about Bach? He is also a musician. Does that mean anything to you in terms of Openmatics?

MR JAIN: No. At that time we only referred to as Openmatics or telematics.

CHAIRMAN: Have you been invited to read the evidence that we received from the ZF engineer?

MR JAIN: I received it, Chairman, but that was late at night yesterday, and I didn't get much time to go through that.

CHAIRMAN: We have been told about two models that they produce, in the wrong chronological order. The first one was called Mozart, and then the second one was called Bach. In musical terms that is the wrong way around, isn't it?

MR JAIN: I can think of quite analogy to those things. The data they produced looked a lot like musical notes!

CHAIRMAN: Yes, Ms Wong.

MS MAGGIE WONG: Mr Jain, since we are on this Mozart and Bach business, can we go to BM-1, page 64.

This is a letter by a law firm acting for ZF, and Openmatics, to this Committee. It is a submission. The submission starts --

CHAIRMAN: Just give Mr Jain a moment so that the document can be put before him in paper form.

MS MAGGIE WONG: Mr Jain, if you would turn to page 65. This is a reply by Openmatics to the questions raised by this Committee, and black is the question, the answers in blue are the answers provided by ZF and Openmatics.

If you look at the second paragraph it made reference to the fact that:

"Openmatics entered into a supply contract to deliver telematics systems, dated 16th of April 2013 with Kowloon Bus Company ... and Long Win Bus ..."

So we can see the date there is April 2013. I believe that's prior to the time you arrived.

MR JAIN: That's right. I joined in June 2013.

MS MAGGIE WONG: Yes, and they continue by stating that:

"Openmatics starting offering telematics services by using the first black box system called the 'Mozart Box'. Later on ... replaced ... by a successor platform black box called the 'Bach Box'. However, clients can use both systems in parallel as KMB does."

Mr Jain, I know you don't know much about the name of the black box system, but have you seen, during the

time in one of your discussions, one of the black boxes? Was that shown to you? The actual physical black box? Was that shown to you?

MR JAIN: I can't recall, no.

MS MAGGIE WONG: Yes. So would it help if I showed you the photo? Would it remind you --

MR JAIN: But having said, I have seen black boxes. I have seen the device.

MS MAGGIE WONG: Yes.

MR JAIN: Not exactly by Openmatics in KMB context, but I've seen the device.

MS MAGGIE WONG: You have seen one, yes. And if we go to the next page at 66, it made reference to a driver feedback system, and the thresholds set by KMB for that vehicle, and it set out certain acceleration rates, deceleration rates and tilting angle and certain configuration of speed and speeding areas.

Do you know much about thresholds in this telematics system, Mr Jain, or setting up of thresholds?

MR JAIN: Well, one thing that stands out to me is tilting angle here.

MS MAGGIE WONG: Yes, why?

MR JAIN: That it is an outlier.

CHAIRMAN: The bus is already falling down, isn't it?

MR JAIN: That's right. 44 degrees is beyond control.

CHAIRMAN: So it is intended not to give any alarm?

MR JAIN: Possibly.

CHAIRMAN: You set a position that is beyond purpose.

MR JAIN: That's correct, yes.

MS MAGGIE WONG: What about the deceleration rates?

MR JAIN: Is this a global parameter or is this route specific?

CHAIRMAN: I think we are to assume it is global.

MR JAIN: I would assume that 2.3 in a sloping situation would be considered acceptable because that is sometimes needed in Hong Kong. On a flat road possibly this would be too much.

MS MAGGIE WONG: Thank you. And if we go to page 68, right above paragraph 4, there is a reference to the Openmatics -- what the Openmatics system installed at KMB can identify. It states that it can identify records of speeding recorded every second and stored together with the related GPS data. Malpractice of harsh braking --

MR JAIN: I'm sorry, I cannot locate where you are reading.

MS MAGGIE WONG: Page 68 -- I'm sorry about that, Mr Jain, the blue section, if you see the third paragraph:

"The Openmatics telematics system installed at KMB ..."

Do you see that?

MR JAIN: Yes, I have read it.

MS MAGGIE WONG: Thank you. It says:

" ... can identify:

Records of speeding; recorded every second and stored together with the related GPS data;

'malpractice' of harsh braking;

Abrupt acceleration;

The corresponding bus registration numbers with the assistance of other systems

The Openmatics telematics system installed at KMB cannot identify:

Route numbers of certain buses.

The data are collected as defined by the system. Every second, the system collects the defined data and sends that data every 30 seconds -- if connected to Wi-Fi or to ... the defined FDP server. The information is also stored locally on the telemetry unit (black box) for 30 days."

I would like to ask a few questions about this system installed at KMB being able to identify the four matters.

Are these the four matters that in one of your discussions that you have explored as part of your real-time monitoring of the drivers' behaviour?

MR JAIN: As far as I understand, the telematics device

gives you the speeding -- not speeding data, but the speed data.

Also it gives you the braking performance, which you can define as harsh or non-harsh. But what you define them as are configurable parameters, whereas the data generated are the exact data from the device that are performance-related data.

Similarly, acceleration is given by them, but what is abrupt or what is non-abrupt are configurable parameters.

This is my understanding of their device.

CHAIRMAN: Yes, and we have seen that illustrated on a previous page where we see the data parameters that have been put into the machine, including that non-performing tilt angle.

MS MAGGIE WONG: So the clients can choose the parameters?

MR JAIN: So technically, these parameters can be route-specific, can be location-specific, and also you can design your thresholds based on specificity of a particular route or a particular road section, rather than having a global parameter.

MS MAGGIE WONG: Yes.

CHAIRMAN: Yes, so you could define your threshold depending on where the bus is?

MR JAIN: Correct.

CHAIRMAN: In other words, you know where its latitude and longitude is, you know that puts it in a 50-kilometre per hour zone, and you put a threshold at whatever you might decide, perhaps 55, but when it goes into a 70 zone, you put another value, 75, perhaps.

MR JAIN: Absolutely, Chairman.

MS MAGGIE WONG: So in all these meetings you were discussing about these parameters and the capability of what the black box can do?

MR JAIN: That's correct, yes. What we were discussing at that time is how best to utilise this information to improve safety and improve the operation the performance.

CHAIRMAN: As you said, this had a monetary incentive because if you drive in a better fashion, you don't indulge in unnecessary acceleration, you don't brake, you come to a stop gently, then you use less fuel.

MR JAIN: Absolutely, Chairman.

MS MAGGIE WONG: And the second matter I would like to ask is this 30 seconds. According to this information, the data can be collected every second, but in here, the system only collects data every 30 seconds.

So this is also --

CHAIRMAN: No, it transmits data every 30 seconds.

MR JAIN: But that is also a configurable parameter. You

can have a constant stream of data, or you can do every 10 seconds, every 30 seconds, or you can even not have that transmitted.

CHAIRMAN: Yes, that was the effect of Mr Kulis' evidence, which you have yet to read. But that was what he said, that you can configure this as you can the other things.

MS MAGGIE WONG: That's what you earlier said, that's the benefit of the real-time capability that was sacrificed.

If I may go back to your submissions at FE-1, page 40. And we were on to these countries that your company at that time was deriving experiences from.

You also made reference to New Zealand, the GreenRoad.com where reference was made to bus companies having the advantages or benefit of the system and, in particular, halving of incidents of poor driving behaviour. And it also states that the accidents from collisions fell by half, while accidents caused by bus drivers plunged by 70 per cent.

At that time was this matter or this GreenRoad system discussed in one of the group meetings?

MR JAIN: Not exactly. This information is something that came to my knowledge only I think last year.

MS MAGGIE WONG: Last year?

MR JAIN: And I have quoted it here.

MS MAGGIE WONG: If I may show you an article about

GreenRoad.

It is the article dated 12 July 2012, making reference to GreenRoad as "a leader in driver performance and safety management".

And in the second paragraph it states that:

"GreenRoad has already --"

CHAIRMAN: What is the date of this document?

MS MAGGIE WONG: 12 July 2012.

CHAIRMAN: Thank you.

MS MAGGIE WONG: In the second paragraph it states:

"GreenRoad has already reduced driving risk 60 per cent for the 70 buses in London where it has been in use by 110 drivers since 2010."

And then jump to the next paragraph:

"Using mobile and cloud technology, GreenRoad helps drivers self-improve. It provides drivers with instant feedback about their manoeuvres using the traffic light LEDs on the dashboard as well as detailed analysis and recommendations for drivers and depot managers."

This system was set out in your paper, but at that time was this -- because I see the article is dated 2012 but wasn't explored, was it, in one of your meetings?

MR JAIN: Not exactly this company, but I think the concept that is mentioned in this article, we are certainly aligned with these concepts.

MS MAGGIE WONG: If we go back to your submission, FE-1, page 40, paragraph 4. It made reference to the scrapping of the project. And you also stated that:

"One of the fundamental changes in management after 2015 was that instructions and decisions were seldom documented and often reversed arbitrarily without discussion or consultation with other internal stakeholders."

Internal stakeholders, who do you mean?

MR JAIN: I mean people working in various other departments.

MS MAGGIE WONG: Yes. Over the page, page 41. You mentioned at paragraph 2:

"Due to the specific nature of questions ... are specific to KMB, but a lot of what is happening in the franchised bus industry in Hong Kong is also a direct result of systematic problems such as outdated regulatory framework, lack of open competition, lack of adoption of technology, lack of transparency, and a ... [the] relationship between the regulator and the franchisee."

So you have identified five problems here.

CHAIRMAN: Before you get involved in the details, you used the word "systematic "', but in fact do you mean "systemic"?

MR JAIN: Yes, that's correct. Thank you, Chairman.

MS MAGGIE WONG: The first one is the outdated regulatory framework. Can you elaborate on why you consider the current regulatory framework outdated?

MR JAIN: The regulatory framework that is prevalent in Hong Kong at the moment, I think that was adopted decades ago. At that time, the technology for monitoring various things didn't exist. Now, we have obviously gone to a much different level of data that is available from operations. We are talking about artificial intelligence, autonomous buses and all those things. The current regulatory framework in Hong Kong does not really allow for anything that is something that fits into the norm of 20/30 years ago.

For example, autonomous vehicles is a classic example. If any bus company in Hong Kong would like to introduce autonomous buses, the regulatory framework or the legal framework does not even exist, whereas other cities have gone ahead and adopted or they have modified their systems or regulatory frameworks, to allow for these innovative new ideas or innovative practices. Hong Kong still lacks those things.

MS MAGGIE WONG: Which cities are we talking about?

MR JAIN: We are talking about China, Singapore, Dubai, Abu Dhabi, a lot of cities around the world have adopted or

reformed their regulatory systems to adopt open data framework, they have reformed to allow for autonomous test trials, e-bus, electric bus, solar buses --

CHAIRMAN: Just dealing with autonomous vehicles, is the point you are making this, that in Hong Kong you are required to have a person in a vehicle, and it can't be driven by a computer; is that the point?

MR JAIN: That's one. Second is if you want to put any kind of vehicle on road in Hong Kong it has to go through a type approval process, and the type approval process itself does not allow anything beyond, I would say, post-war specifications.

MS MAGGIE WONG: It is more concerned about the nature of the bus. In terms of regulatory framework, what about the black box system? Do you know much about how one or whether one knows anything about what can be installed in the black box system for buses? I think in Hong Kong it is completely lacking. What about, in your experience, in other countries?

MR JAIN: I think it is more of a norm these days, rather than exception. If we go to any of the developed cities, they are very widely adopting a telematics system, places like even Turkey, I was there and Turkey has these things in place. European cities, they all have telematics devices on board. Again, going back to

Singapore, Dubai, Seoul, Tokyo, all these cities which are very comparable to Hong Kong, high public transport usage, they are adopting telematics devices and it has yielded significant benefits in terms of operational performance and efficiency.

MS MAGGIE WONG: Yes, and we have touched on regulatory framework.

The second complaint is about lack of open competition.

Can you elaborate on that?

MR JAIN: For example I would look at Singapore, and quote that example. In Singapore they were running their bus system almost in an identical manner to the way we do in Hong Kong until 2012, 2013, when they started looking at reforming the bus operation in Singapore based on the changing environment of public transport.

And at that time they looked at it and they realised the bus operation in its present form in Singapore was unsustainable, and they completely changed the model and adopted a new regulatory framework, which has now brought in much better services, much better performance, a lot of innovation, and they have, I would say, assumed leadership in bus operation at least in this region at the moment.

That is the kind of thing that has happened because

they have opened the market for international players to come in, and participate in the process, and bring in best practices from around the world.

Once you have no competition in Hong Kong, we have been working with the same operators all throughout without any risk of them being -- there is nobody upsetting the apple cart here, which means that those incentives to bring innovation, incentives to bring efficiency, don't exist. And that is what I mean here with the open competition.

CHAIRMAN: By that, do you mean that Singapore invited tenders to run bus routes, and that produced competition, and new international players, as it were, came in to run buses in Singapore?

MR JAIN: That's correct. I'll give you one example of a company called Tower Transit there. Prior to Tower Transit coming into the market, in Singapore they always complained about driver shortage -- because of the same reasons as we quote in Hong Kong.

Today, Tower Transit has surplus application of people who want to drive their buses.

CHAIRMAN: How has it achieved that?

MR JAIN: Because they have adopted a completely new type of HR engagement, human resource engagement with the drivers, and I have visited their depot, and it is

a very pleasant experience, where literally everybody greets everybody, it is a flat management structure, and drivers consider themselves to be really part of the whole delivery process.

CHAIRMAN: That is Singapore?

By contrast how would you describe Hong Kong?

MR JAIN: In Hong Kong, I would say that it is a very "us and them" mentality. The management thinks the drivers are an entity which is troublemaker, which is always asking for this, and asking for unreasonable things, whereas if you ask the drivers -- and I'm a qualified licensed bus driver, and I can tell you the drivers think that the management people who sit in this air-conditioned office know nothing about bus operation, they are the ones running the whole show.

You can see there is a lack of mutual trust there, and this is what I mean, we need to reform this industry, make sure this industry is attractive, for people to come and join as an employee, and of course also need to understand that this is something which becomes the fabric of the city. Bus operation is moving -- KMB moves 3 million people in Hong Kong, total bus operation is about 4.5 million people.

And if we can't address these issues, this is, if you ask me, we can buy the best buses, but if we can't

have the proper good drivers to run these buses, the whole exercise is futile.

MS MAGGIE WONG: Thank you.

CHAIRMAN: Since you have touched on it, what is your opinion or assessment of the quality of the buses and the way in which they are maintained, generally, in Hong Kong?

MR JAIN: I would rate it quite highly. I think the Hong Kong buses are very well engineered, they run for 17, 18 years, and even at the end of their life they are in a very good condition.

CHAIRMAN: Because they have been maintained properly?

MR JAIN: That's correct, yes.

MS MAGGIE WONG: What about training? The drivers' training?

MR JAIN: There are two aspects of training. One is the classroom training. The second is the motivational aspect of training. And I do feel that, and I have looked at documents that have been submitted in the first lot, which were sent to me last Friday, and it is a fact at that there is a lot of effort people are putting, ticking a lot of boxes in terms of number of hours, this and that, there are enough manuals there, but the motivational aspects of training where people feel part of the company -- one fundamental aspect of

service quality is where the employee considers it's not just his job to deliver a service, but it is his duty to deliver a service. And I think that is the kind of level that one needs to transcend in terms of training, which personally I feel is lacking at the moment.

CHAIRMAN: You spoke of the contrast with Singapore with competitive tendering. What is the position in Hong Kong?

MR JAIN: In terms of?

CHAIRMAN: For tendering for the renewal of franchises. What happens in Hong Kong, compared with Singapore?

MR JAIN: In Hong Kong, there is -- first of all, I have not seen any tendering in last 20 years. And two, whenever there is a renewal, usually the approach that our regulator has taken here is to say: this company has been performing well, hence we should renew their franchise. Whereas they have not really looked at benchmarking the companies on what is happening internationally. Are we up to the speed to the international level of innovation, international level of efficiencies, and can we push or nudge the existing operators into that direction, or bring new players into the market which will eventually uplift the whole game?

MS MAGGIE WONG: And the next complaint you said is lack of adoption of technology.

We have heard one example about telematics. Apart from that, what other comments can you make about this?

MR JAIN: In terms of technology, we are now talking about -- I'm currently involved in a study of artificial intelligence, use of artificial intelligence in public transport, I'm doing that on behalf of UITP, and I can tell you the kind of things people are doing in bus industry are superb. In Singapore SMRT has developed a system called Prolearn. What they do is they have installed cameras in the buses and they collect all the real data points of individual driver behaviour on the road and they predict which driver is going to have an accident.

And then they customise that learning process for that driver, so the driver is retrained and avoids that accident.

So it is an intervention and prevention process in the safety management that has drastically reduced -- now I have the figures with me. If you want I will be happy to provide those, but they have significantly reduced the incidents that the driver would otherwise have on the road because of this training system.

It is just a simple data collection and training system for the driver.

CHAIRMAN: Are these figures compiled by Singapore's Land

Transport Authority?

MR JAIN: This figure was -- I have -- I came to know of these figures in Germany when SMRT CEO was making a presentation.

CHAIRMAN: Perhaps you would be kind enough to provide them to the Secretariat.

MR JAIN: Absolutely.

MS MAGGIE WONG: When was this study carried out?

MR JAIN: The study is ongoing at the moment, as we speak.

MS MAGGIE WONG: And can I understand correctly, is it a system that you have collected all the data, and then making analysis and prediction that certain drivers are prone to accidents, and then that driver will be picked out for retraining?

MR JAIN: Yes. Before they have an accident.

MS MAGGIE WONG: Yes.

MR JAIN: So this is just one example. The second example is predictive maintenance, automation in the depots, so a lot of hazardous processes in the depot could be automated.

So a lot of companies are doing a lot of things around the world to uplift these technological aspects of operations.

MS MAGGIE WONG: Since we are on technology, may I ask you about a few other equipment or technological devices.

One is called electronic stability programme. Have you heard about that?

MR JAIN: Yes, I have.

MS MAGGIE WONG: How do you find that programme?

MR JAIN: I mean, it is something which certainly enhances the vehicle performance, especially on roads where it would have a higher tilting and those things, so it is basically an electronic device which will change the centre of gravity of the bus, or adjust the centre of gravity of the bus. So yeah, it certainly enhances the vehicle performance, no doubt about it.

CHAIRMAN: Perhaps a short way of dealing with this would be to take Mr Jain to the working group paper on this. The Transport Department have told us that in March of this year they convened a group made up of franchised bus operators and bus manufacturers, to consider a range of technological advances. And this is being done at some haste because it is apparently going to be able to report this month. And they set out the various matters being looked at.

MS MAGGIE WONG: That is in TD-1, page 98. That's the Transport Department paper.

Mr Jain, if we look at page 98, it sets out from (a) to (f) certain technology, or safety devices that the working group has been exploring.

CHAIRMAN: If you have the paper version in front of you, if you go to page 94 and have a look, you will see how this is explained by the Transport Department. As you can see, the paper is entitled "Application of New Devices or Technology on Franchised Buses".

Then we get a history of what they have been looking at.

But this working group was set up in the middle of March, I think it was, of this year, to examine these matters, and as I have told you already, they are doing so in some haste.

MR JAIN: Chairman, I think it is a good initiative by Transport Department, but I think what triggered was something that should not have triggered this. They should have done this nevertheless. This is what I mean about being a bit outdated on these aspects, where we are reacting to things instead of acting in advance and being proactive about this.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Thank you.

Paragraph 10 refers to a number of on-vehicle safety devices that have been explored. The first one is the electronic stability control and roll stability control.

At paragraph 12, this particular device is elaborated on. And we can see how the braking system

helps steer the vehicle on its intended track. But in terms of the use of this device, is it widely used in the world so far as your experience is concerned, or at least in Singapore?

MR JAIN: I think in the new buses that they are purchasing, this is certainly there. I'm not very sure whether they have retrofitted the older fleet of that.

MS MAGGIE WONG: If we look at the second suggestion at page 98, it is "Capping the maximum speed at [70 kilometres per hour] on downhill by the speed limiter".

It was elaborated on at page 101 that this is also reactive to the 2003 Tuen Mun accident. And it states at paragraph 17 that:

" ... the speed limiters are in-built systems of modern buses geared to the electronic engine management system. The setting or activation of the speed limitation function is controlled by a software ..."

Then in the last line:

"In a free rolling situation, the vehicle speed is not determined by engine revolutions or gearing but rather by the force of gravity acting against the rolling assistance of the vehicle."

Then:

"The three bus manufacturers have initially advised

that it is technically feasible to engage retarder to slow down a bus when the speed limit is over 70 [kilometres per hour] under the downhill situation."

So my question is this, Mr Jain. Hong Kong's geographical condition is quite unique because we do have a lot of steep downhill roads, and if one is setting, for example, the telematics to 70, configuring the speed limit to 75km per hour, it would mean that when the bus is driving downhill it would be much faster than 75. And this suggested solution by using speed limiter, how would you consider this suggestion, or what is your comment on this?

CHAIRMAN: Before you answer that question, isn't the speed limiter set at 70 kilometres per hour?

MR JAIN: It can be set at any speed --

CHAIRMAN: In Hong Kong, isn't that what is required?

MR JAIN: That is right, yes. 70 is the maximum that is allowed under the Road Traffic Ordinance.

CHAIRMAN: I think the question is this. If you are going down a steep hill the vehicle can go more than 70. Because all that is happening under the current system is your fuel is being starved.

MR JAIN: That's correct. If you asked my opinion this is a device that is of course needed in Hong Kong. Retarders, if I recall correctly, retarder was almost

evented in Hong Kong 20 years ago because of this downhill issue where a double-decker bus was coming down the hill and, if I recall, there was an incident on Hong Kong Island because a bus could not stop in time and it just went into the junction.

Having said that, in these modern times, again, there are systems which can go beyond this, as in not just 70 kilometres an hour, they can be dynamic limiters. Basically you can geofence the areas where the bus speeds can be regulated to the road speeds.

So in a 50-kilometre zone the speed limiter can set itself to 50, whereas in a 70-kilometre zone it would limit itself to 70. So you will not have a situation where a bus can still drive at 70 in a 50-kilometre zone.

MS MAGGIE WONG: I think that's the next proposal suggested by the Transport Department about speed control by GPS, or geofencing.

MR JAIN: Yes, that's what -- yes.

MS MAGGIE WONG: But we know there are certain problems about geofencing or GPS in high rise buildings.

CHAIRMAN: In roads surrounded by high rise buildings.

MS MAGGIE WONG: On roads surrounded by high rise buildings.

Do you know if there is any recent technology where this problem can be solved or rectified or ameliorated?

MR JAIN: Some of these are addressed by having multiple data sources to capture the same information.

GPS is one source. And sometimes in bus operation, because we are running fixed-route operation, you know exactly where the bus is going, and you know the number of turns that the vehicles are making, you can do a process called dead reckoning.

CHAIRMAN: By that you mean the number of revolutions of the wheel?

MR JAIN: Yes, of the wheel. So you know the exact distance of the wheel, you know the exact route, so even if you don't have a GPS position, you can literally work out where the bus is.

CHAIRMAN: By dead reckoning?

MR JAIN: By dead reckoning. That's one way of doing it. The second way is -- because all the buses, because of the telematics device, they already have a 3G device on board, you can also use the GSM network and using your telecom towers to locate the bus.

So GPS is only one point of reference, the second point of reference comes from the GSM device.

And, as I said, dead reckoning could be your third points.

Once you have three data points you can triangulate and you can with a high degree of confidence tell where

the bus is.

MS MAGGIE WONG: You raise a point that with this technology you can actually adjust the speed in the telematics programme. If you have a digital map, if the -- we know that the Transport Department has a digital map of the speed limits of the whole territory in Hong Kong. Can you combine the system of the digital map with the telematics system so that the system itself can automatically adjust the speed limit without the operators configuring it, but automatically it would adjust its speed limit based on the location where the bus is?

MR JAIN: Theoretically the answer is yes. But you will need to built that infrastructure of communication between TD and the bus operators, whereby any changes by the Transport Department on the speed of a particular road would be automatically transmitted and goes into the system.

I would say the possibility goes even beyond that, because bus operation is not always directly correlating to the traffic restrictions imposed, speed restrictions imposed by the Transport Department. There are sections in the bus operation, and I can tell you, where the drivers are trained to slow down because it is a black spot, because the visibility or sight lines are poor.

Even in those sections you can limit the speed of the buses without affecting the rest of the traffic.

CHAIRMAN: So you could fit in variable thresholds depending on where the bus is, depending on, one, the legal speed limit, but two, the exceptional limit that you, the bus company wants the bus to have as a maximum going around a particular bend, or whatever it is?

MR JAIN: If it is a sharp, 90-degree turn, you can actually limit the speed to 20kph or 30kph for those turns.

CHAIRMAN: Then you could generate an exceptional report if there was an infraction of any of those various thresholds?

MR JAIN: That's correct.

There are two ways of doing it, one is you can limit the bus not to even cross it. So even when the driver tries, it just does in the work.

The second is you can allow the driver to drive at a higher speed but you would generate an exception report and then take a post-event action.

CHAIRMAN: Are you aware of this digital map that sets out the speed limits that are imposed in Hong Kong?

MR JAIN: I do understand that that is available in the public domain, yes.

MS MAGGIE WONG: Even before I asked you, you already knew about this digital map?

MR JAIN: Yes, I think it is public knowledge, as far as I know.

MS MAGGIE WONG: Thank you.

The next device they suggested is the collision prevention device, which is at page 103, and Mr Jain, may I refer you to the comments made by the franchised bus operators at paragraph 26, which is at page 105.

The last line:

"In sum, the FB operators do not consider that the installation of collision prevention and lane-keeping devices are effective for enhancing the safe operation of FB services."

And the first question I would like to ask is, Mr Jain, do you know whether it is common to use this collision prevention device in the world?

MR JAIN: The answer is yes, it is common, I think it is a very relative term. But it is used in many places. But I would also say that I would disagree with this statement here.

We are tending -- I mean, what I'm hearing right now, are we are looking at this technology as something which is very static, which means it is a one-size-fits-all, whereas I completely agree, you know, I just had a quick glance at paragraph 26, and I agree that in certain situations in Hong Kong, because

Hong Kong lanes are very narrow, the traffic is very close to each other, these devices would become a nuisance in a way. But today, the technology allows us to customise this device, make them even self-learning devices. If you know how artificial intelligence or machine learning systems work, every road, section by section, you can define parameters and road conditions and you can set the alert levels accordingly.

So you don't have to apply exactly the same alert levels on the highway when a vehicle is travelling at 70 kilometres an hour, to a vehicle when it is running at 30 kilometres an hour in Nathan Road in a stop-and-go situation. So, you can apply different parameters of proximity. Or you can even deactivate at 30 kilometres an hour because you know the type of accidents it would -- even if it has, it won't be fatal, but at 70, the fatalities could be very high.

There are different things you can set, which could be completely dynamic based on the section of the road, the route, the type of the bus, a lot of things you can do, even the number of passengers on board the bus.

CHAIRMAN: We have been referred to a paper produced by Citybus in 2014 after they had a trial of, I think, they called it Mobileye.

MR JAIN: Yes.

CHAIRMAN: Have there been developments since 2014 to date in this kind of technology?

MR JAIN: Chairman, if I can resort to some rhetoric, the world has changed since 2014.

MS MAGGIE WONG: And the last device that was mentioned --

CHAIRMAN: Perhaps we could -- have you been referred to this paper before, the Citybus paper?

MR JAIN: In fact, during my KMB period I -- I have not referred to this paper, but I met Mobileye people at that time. We have had meetings with them. And I have seen at that time -- I think they also did a trial with KMB, but that was prior to when I joined, if I recall correctly.

CHAIRMAN: It might help if you just glance at the report, because -- we take what you say, that the world has changed since 2014, but perhaps we can refer you to where it is.

MS MAGGIE WONG: CTB-3, page 601.

CHAIRMAN: Perhaps the question really I'm inviting you to answer is this. Having seen what the concerns are in that report, are these concerns that are now addressed by the developments in technology?

MR JAIN: I had, again, a quick look at one of the numbers which I would consider the most relevant here. It is

the accuracy of Mobileye. When I look at that table, even the unions say that the accuracy was 69 per cent.

Anything which is 69 per cent accuracy and can save lives, I would look at adopting that system and fine-tuning it instead of abandoning the system.

CHAIRMAN: So your answer really is, as with other devices, you can now configure variable thresholds which would make the technology of use; is that how you would put it.

MR JAIN: Precisely. Because there are two things we look at in these aspects, one is the severity of the collision and the frequency of collision. So, severity at high speed is much higher, the frequency may be lower. Whereas in urban areas, you can have more frequency, because the proximity is higher, but the severity is much less.

This is part of the risk management exercise that a bus company should adopt. So every time you introduce a new route -- and this is the part of safety culture, safety management systems, that the bus companies need to adopt, where they can look at the data which is coming from various devices, as well as the traffic conditions. So it is a part of the risk management in advance.

If it is a more stop-and-go, the number of traffic

lights are more, the speed is less, the risk profiles are different from when the bus is running on a highway, unhindered at 70 kilometres an hour.

So in operating terms these are two different buses, two completely different types of things.

MS MAGGIE WONG: And as you said, the technology has moved on since this report. So now, as far as you understand, this technology has been moved on so that you can customise the fittings to configure it to make sure it is less of an annoyance in busy streets. Is that what you are telling us in terms of this device?

MR JAIN: That's correct. And if you look at the kind of trials that are happening in the autonomous device world -- so in fact there is a journey to autonomous driving, which is called level 1 to level 5. If you look at levels 3 and 4 of autonomy, these are really not autonomous vehicles, these are still driver-on-board, but there are so much assistive technologies to the driver that the driver is really there to do manual overdrive. So he only intervenes in exceptions.

At level 4 the driver is literally basically watching out. He is not driving/driving, the bus drives itself. At level 3, the driver drives, but there is so much assistive technology he has in terms of proximity detection, in terms of any hazards, a lot of

pedestrians, for example. So all these cameras and sensors they are actually providing you the information to adapt to a particular environment.

MS MAGGIE WONG: Yes, and the next device is the driver monitoring device. It appears to be quite a new device in terms of detecting unsafe behaviour. That is at page 105, and it states:

"... unsafe behaviour like dozing, drowsiness, bad posture".

Then we see at page 105, that at least two operators advised that they would install a similar system and do a trial from early May 2008.

Mr Jain, my question is this. We know in Hong Kong that drivers drive a long period of driving hours. This device is intended to detect drivers who are fatigued.

Is this device commonly used in the world? And how effective is this device throughout the world?

MR JAIN: I have not seen a very widespread use of this device yet. But I am aware of a number of trials that are happening.

In my opinion, this technology is still at the evolutionary phase. It will eventually come, certainly, it is not perfected yet. Because there are a lot of false positives that it is generating, which makes, I would say, a situation -- it has the potential to make

a situation worse than making it better. Because it alerts the driver at the wrong time, sometimes, and it distracts them from focusing on driving, because too many false positives can distract you.

Having said that, there are three technologies that are working here. One is a camera-based technology, which is looking at the driver's face and detecting the micro-expressions on his face. The second is one that comes into the category of variables. There are variables which are like glasses, like Google Glass, which look at their cornea, the dilation, and movement of the eyes. And the third is you can wear it like a watch.

So there are multiple types of technologies being tested. I'm pretty sure in a year or two, we would see some convergence, we will see some success there. However, at this moment, I have not seen very widespread operational deployment of this.

MS MAGGIE WONG: Apart from these devices mentioned, do you have any other suggestions --

CHAIRMAN: Before you move on. You will be aware, no doubt, of the tram accident in Croyden in 2016, where the findings were that the driver had fallen asleep having started work early in the morning. Are you aware that Transport for London recommended that one of these

anti-drowsiness cameras be deployed. I think Guardian. Are you aware of that?

MR JAIN: Yes, I know.

CHAIRMAN: So that is one of the deployments of the technology, but there are not very many, is that what you are saying?

MR JAIN: I know this was deployed, but I'm not sure of the success in terms of data that is coming, whether this is really a success story or not. Because if you are dealing with 40 or 50 per cent of false positives, that gives you technology fatigue, so you tend to ignore the technological interventions, which is what I meant, yes, the technology is there, but it has not yet come to a convergence where we can have the confidence of 95, 97 per cent on this.

CHAIRMAN: Thank you.

MS MAGGIE WONG: In terms of the technological devices mentioned in this paper, do you have any other suggestions from your experience that may be useful in terms of ensuring safety of bus driving in Hong Kong?

MR JAIN: There are N number of good examples around the world which are being deployed at the moment, people are testing, trying. Artificial intelligence which is, to me, a progression of good data analytics system. You take it to the next level, machine learning, and then

you take it to the next level, where you bring it to an AI-based system, more predictive.

So basically, what it does, let's say hypothetically in this Tai Po incident, if the bus was tilting -- even before it starts to tilt, driving behaviour, it would detect a very minute level of data and it would create that intervention framework. It would even tell the supervisor what kind of prescriptions, it would provide the prescriptive information to the supervisor on what kind of intervention is necessary.

So what we are doing now is we are removing a lot of human factors from these things. Because many times what happens is supervisors are making split-second decisions and sometimes it is affected by their emotions, personal state, psychological state. Once you have these AI-based systems -- I wouldn't say they are very intelligent systems, but they are very rational systems. So they give you very rational advice and that allows you to act in a much accurate manner, in a way.

This is the new frontier that has opened, and a lot of companies are working in these areas, they are going towards operations, customer interface, engineering, safety, security, all these areas you see very widespread adoption of these technologies now.

CHAIRMAN: So this use of technology would enable

a supervisor to pick up, or rather the data would be presented to him, in exceptional reports, excessive braking, excessive acceleration, speeding, more excessive braking, a pattern would be emerging, and the supervisor could intervene real time.

MR JAIN: Yes, I would go a level ahead of this. Because currently the supervisor in a normal ROM system I described, he sees whether a bus is an outlier, what it does, what the AI kind of system does -- I mean, our human brain can process only a few variables, and mankind has also evolved in a way that we can learn, unlearn and relearn, whereas an AI-based system never forgets anything. We tend to forget, they never do.

So what it can do is it can look at the conditions of the vehicle, the conditions of the road, at that time what kind of weather conditions, prevailing weather conditions are, what kind of traffic conditions are in the surrounding, and what kind of driver characteristics are, and it can bring all these parameters into one framework and customise a response for that situation.

So we are talking about not just bus speeding, we are talking about before a bus even speeds it can do a risk assessment based on all these parameters and create an intervention framework.

MS MAGGIE WONG: Intervention framework in a sense that the

system takes over, or it would simply inform the supervisor?

MR JAIN: It can even tell the driver: be careful today, it rainy, there is a lot of traffic, a water pipe has burst at this particular section, so don't drive above 30 kilometres an hour. You know.

MS MAGGIE WONG: Okay. Got it.

So it is informing you in advance how to drive?

MR JAIN: Correct.

MS MAGGIE WONG: And the next complaint you made is the lack of transparency, and a hand-in-glove relationship between the regulator and the franchisee. That's at FE-1, page 41.

The lack of transparency and the relationship between the regulator and the franchisee, can you explain a little bit on the transparency?

MR JAIN: Lack of transparency, when I wrote that, I meant a lot of data not being in the public domain. I can relate to a personal example. I was standing at a bus stop near my house, it's a reliable bus service, and I had a bus coming on my app in two minutes' time, and the bus came and went on my app, and I never saw the bus.

And there is no way I can go back and check and no way I can verify this kind of information so I can write

a complaint -- and I have written quite a few complaints about bus services in my area, and usually what I receive, and I classify them as cooky cutter responses, they are very standard responses "We are looking into it", "We constantly review it", but nothing is changing, and that is what I mean, that because there is a lack of transparency, what is actually happening is something that as a customer, I am at the receiving end most of the time.

MS MAGGIE WONG: Compared to Singapore, can I ask this: about all these technological devices that were suggested to be put into buses, would the government in Singapore give any subsidy directly or indirectly towards the improvement in adding this new technology to buses?

MR JAIN: So in Singapore the current model is that government buys all the buses. So the asset belongs to the government and it is given to the operator to operate. The operator is held accountable to very stringent KPI, key performance indicators, and if they exceed those indicators there is a mechanism for incentives. So that perpetuates itself into an investment in innovation.

MS MAGGIE WONG: By keeping the asset of the buses, they control the technology or the standards of the buses by

doing that, or are there any reasons behind the Singapore government having all these buses purchased?

MR JAIN: So the reason for them to purchase buses is actually not relevant to technology or anything. They wanted to create a different kind of model and their objective was to at that time run buses more from a social perspective rather than commercial perspective.

I'm not sure whether you want to cover that aspect of their reform. But as far as the technology is concerned, the government defines the baseline technology, which means these are a requirement as a part of the franchise, but then they also offer incentives to the bidders to exceed these parameters, and that's where the innovation comes.

So base line is there. So on-board devices, giving data streams directly to their OCC or central control centre, those things are defined in the contract, those are requirement.

CHAIRMAN: In the franchise agreement?

MR JAIN: Yes.

CHAIRMAN: Is that the case in Hong Kong?

MR JAIN: In Hong Kong the definitions of these are very loose, I must say. We call that a light touch regulation, but which means that the parameters are so wide that there could be a high degree of manipulation,

which is what I mentioned in my letter as well.

MS MAGGIE WONG: At page 41, you mentioned about lost trips, reporting system has gaping holes which allow a very high degree of manipulation. So my question is: how would this lost trips reporting system affect the safety aspect of the operation of buses in Hong Kong?

MR JAIN: This is not related to the safety, I must say.

MS MAGGIE WONG: Okay.

If we go now to your second submission dated 18 June 2018, page 44.

You made reference in the first black bullet about Hong Kong lacking a central traffic command centre --

MR JAIN: Correct.

MS MAGGIE WONG: -- which can monitor the real-time operations of all transport operators. So what you are suggesting is the government itself should have a central traffic command centre. But in what way could it monitor the real-time operations of all transport in Hong Kong given the volume of buses in Hong Kong and the number of operators? How would you suggest it operate?

MR JAIN: Counsel, actually, I would make reference to the paper you have shown earlier about Seoul and Singapore. If you refer to that, there are two levels. One is a bus management system, and then there is a central traffic management centre, they call it GMS or

something, I can't remember.

CHAIRMAN: Yes, perhaps we could refer Mr Jain to that.

MR JAIN: That's exactly what I'm talking about. At the bus operator level you have a bus management system which is looking at the bus assets, whereas at the central traffic control centre you are looking at bus as an asset, but also its interactions with the rest of the transport system, rest of the traffic, traffic lights, the road infrastructure, all kinds of things which is really in the public domain.

MS MAGGIE WONG: If I may refer you to the SEC-2 bundle, page 825, paragraph 2.8 makes reference to a new bus management system, but in this case, it is a central traffic command centre. So what you are suggesting is apart from the -- there are two levels, the first is the bus management system, which is managed by whom, if I may ask?

MR JAIN: By the bus operator.

MS MAGGIE WONG: By the bus operators.

MR JAIN: If you refer to paragraph 2.10 on the same paper, that is a central traffic command centre.

MS MAGGIE WONG: Ah. So it would require the connection between the bus management system and the transport operation and information service system in order to get the data from the bus management system to monitor. Is

that the case?

MR JAIN: That's correct, yes. But it looks at it from a city perspective, looks at the entire transport assets on the road, whether it is a moving asset or a fixed asset.

MS MAGGIE WONG: And is that also the system in Singapore?

MR JAIN: They have a similar system. I'm not exactly sure the extent of it that it entails, but they have a significant number of these functionalities in that system.

As far as I know, one thing that I have recently gathered as a part of my study on artificial intelligence, they are even deploying drones on traffic situations to collect real-time traffic data and then adjusting traffic lights or creating response systems or variable messaging systems to direct traffic and balance the traffic flow on the network.

So there is a very wide-scale application and adoption of these things. Especially -- this is normal operation but if you look at those one in a million eventualities where you have an emergency situation, this is the kind of system which can save a lot of lives.

MS MAGGIE WONG: And I can see in that paragraph, this system appears to be instead of the bus operator giving

information to the public about the real-time information, it would be this central traffic command centre releasing the information from the government source to the public. It appears it works like that. Do I understand that correctly?

MR JAIN: They work hand in hand, they are not discrete entities, they have a relationship between them. If you really want to know which bus has how many people in it, I think it is the BMS which would look at these things, whereas at the higher level, getting the traffic information, getting information about junctions, incidents that have happened, which is beyond the remit of the bus operator, that information would be available from this traffic command centre, which would be then used by the bus companies to verify their information.

So there has to be a two-way flow of information to create a better response in the end.

MS MAGGIE WONG: Yes. Understand.

At page 45 at the first bullet you make reference to the:

"Current regulatory model in Hong Kong where there is a cap on profit without a cap on losses is designed to suit continuity of incumbent operators."

Can you explain that as to what it meant?

MR JAIN: So in the past this regulatory framework when it

was created, the bus companies used to have a guaranteed profit model, in those times. And it was, I think, in the '90s sometime, this was changed to a profit cap model.

I put myself in a bus operator shoes, and this is what happened in KMB up to 2012. Because of the railway expansion, the KMB ridership started to go down and KMB started to lose money. The only way to come out of this, from losing money is either you give up the franchise when it doesn't work, or you start raising fares, which is not the right way.

Because the government controls the topside, regulatory framework controls the ceiling of the pricing, and then it should also give some kind of a floor for pricing. Otherwise for commercial operators around the world it would be of no significance.

So, for example, imagine a scenario where the bus operator cannot make profit in Hong Kong, what will they do? Being a commercial operator, mostly part of listed companies, they would have to terminate the franchises. What are we going to do as a city? Because if the bus operation is not making profit you can't even attract international players to come into the market. So there has to be, I would say, a reasonable degree of commercial framework which covers both the upside and

low side.

Why I'm saying it only favours the incumbent operators is because the incumbent operators they have already incurred a lot of expenses and fixed costs, so they can make the system work for them, whereas a new operator cannot enter this market and have the same level field to operate.

But if you have a sustainable commercial model there, then you can attract international entities because then they will look at the longer-term play of the bus operation.

MS MAGGIE WONG: And the bullet from the bottom at page 45, you refer to:

"Current reporting and monitoring system is archaic and was designed in an era when technology to monitor buses and drivers did not exist."

Can you explain a little bit on this statement.

MR JAIN: This goes back to the regulatory framework. So, for example, now it is increasingly around the world, the bus regulators are managing the bus operation based on what I mentioned. EWT, schedule adherence, and all these things. In Hong Kong we are only looking at when the bus leaves the terminus, and after that we are not monitoring its performance along the journey, so the bunching happens a lot in Hong Kong. There are a lot of

problems because of traffic and stuff and we are not able to address it. As a customer, if you are standing in a stop, intermediate stop somewhere, you may have three buses coming at one time and then for the next 20 minutes or 25 minutes you may have no buses coming.

So what others have adopted, they are using technology to create space between these buses, so if you go to London, the bus may stop at a particular stop for a little while, just to create that separation, and even services to customers. So when you are at a bus stop you are getting continuous even services. So every three minutes, it does not mean zero minutes and then six minutes, it means maybe 3.3, 3.5 minutes. So the variance of those things is reduced. And this is the kind of monitoring that regulatory agencies are doing around the world now.

So Singapore, when I mentioned the KPIs, they are directly related to these kind of parameters, which are exact data points along the journey on a bus route rather than you just start from the depot and that's it, and after that you forget about it.

MS MAGGIE WONG: You mentioned here about excess waiting time, EWT, at stop-by-stop level, and monitor punctuality of each trip end to end with telematics and real-time operation management system making this

possible.

So you have got to have telematics and real-time operations together in order to achieve this excess waiting time. Is that the case?

MR JAIN: Telematics is already there. Real-time operations is a software layer over this hardware. So it is not a very difficult exercise on top of that.

I normally would not -- I would marry these two because most of the people I have seen who have invested in telematics have also invested in real-time operation. So it is a natural progression to telematics. As far as I know, even Openmatics, they supply you a real-time operation management system as a part of their offering.

So most of the system providers they are putting it as a package. At KMB we decided to do it on our own for other reasons.

This is one package, once you have these kind of systems, which in Hong Kong we already have, it allows us to have -- those data points are available, but we are not monitoring or regulating that. We don't have the regulatory framework for those data points.

MS MAGGIE WONG: Yes, understand. Another thing I would like to ask you is the five-year forward planning programme. And you mentioned, if I could go back to your submission at page 39, FE-1. At the bottom, you

said that:

"As the person responsible for coordinating, preparing and submitting 5-year forward planning programme including the route development plan ... to Commissioner of Transport, one of my roles was to vet the coherence of our safety-related plans with the rest of the operational plans."

I would like to ask, were you involved in any way with the forward planning programme for the years 2018 to 2023?

MR JAIN: The one that was submitted recently?

MS MAGGIE WONG: No. Previously.

MR JAIN: So I made the submissions in 2013, 2014, 2015 and 2016.

MS MAGGIE WONG: Okay. But not --

MR JAIN: So 2016 submission theoretically included plans for 1018 and 2019 in a way, but they were not firmed up. They were notional in that sense.

MS MAGGIE WONG: Thank you.

If I may just show you the forward planning programme to see if you have seen or whether you have any input on some of the matters there.

If you go to TD-1, page 180 -- the reason I'm asking is, first is the new KMB licence was discussed in 2016, in the course of 2016, but in fact the actually granting

of the licence was in March 2017. Of course when you planned this forward planning programme you have to look into the accident rates and everything two years before.

So if I can ask you to take a look at this report, in particular -- this was the KMB forward planning programme.

CHAIRMAN: For what date? When was it prepared?

MS MAGGIE WONG: This report was prepared in June 2017, at page 1035. In bundle TD-4.

And may I first of all ask whether you have made any input whatsoever to this report?

MR JAIN: I have not, counsel.

MS MAGGIE WONG: Then I don't need to ask you --

CHAIRMAN: But presumably the topics came up year after year? The same sort of topic?

MR JAIN: That's correct, Chairman. So after 2016 submission I was involved, and I left KMB in December 2016 --

CHAIRMAN: So you were not involved in June 2017.

MR JAIN: That's correct.

CHAIRMAN: But perhaps the point can still be made by reference to a particular topic?

MS MAGGIE WONG: If I can take you to page 187, I am interested particularly on the bus captain training and the monitoring, planning programme.

Perhaps I can do my question this way. If you look at this paragraph, or this particular section, it made certain references to the:

"... KMB dedication to provide safe, reliable and comfortable services ..."

And then they mentioned something about elements of defensive driving, good driving attitude. And then:

"Driving performance monitoring is carried out with systematic checking by driving instructors and followed up with disciplinary actions if required. Moreover, real-time driving indicators ... will also help to identify those bus captains who have a higher incidence of 'harsh braking' on a given route than is normal. This information can be used to ensure that appropriate proactive feedback is given to a bus captain with aim of promoting improved driving behaviour that will in turn serve to prevent/reduce 'loss of balance' cases ... "

It made reference here to real-time driving indicators to help to identify those bus captains that have bad driving habits in a way. And then they emphasise the proactive way or proactive feedback. But without -- when I discussed with you about the lacking of this real-time indicator, or real-time information back to the Lai Chi Kok Centre, is it achievable?

MR JAIN: It is achievable, but I think what it means here

is that they use data generated real time at a later date using in a proactive manner, but using reactive data, to then train the driver.

So this is something that is happening, as I said, it is a T plus 1 response.

CHAIRMAN: This is historic review of real-time data?

MR JAIN: Correct.

CHAIRMAN: But it is historic.

MR JAIN: It is historic, so it is using data generated real time, and then somebody analyses it and then tells the driver, "Last month you have not been driving very nicely", so it is a proactive feedback, yes, but it is based on reactive data.

However, what I referred to is that you can generate it on a real-time basis and real-time response.

MS MAGGIE WONG: And they also mentioned something in 8.3.2 above the first bullet:

"The electronic tachographs are being used to monitor bus captain performance, especially with regard to speeding."

And then the second bullet:

"Real-time driving indicators are installed in all buses which can help bus captains to utilise the driving skills learnt in the Eco-safe Driving Training ... "

And then:

"As denoted above, the benefits of such Eco-safe driving to the bus captains are:

1. Reduce the risk of accidents ...

2. Reduce stress levels ...

3. Increase confidence in vehicle control ... "

Again, this of course is also reactive to the historical data, but not --

MR JAIN: And this eco-driving is actually exactly analogous to green driving, or GreenRoad, what you were referring to. It is just a terminology.

CHAIRMAN: Eco-driving means don't accelerate sharply, don't brake sharply, use the fuel you have already put into the engine to glide you to a stop.

MR JAIN: A lot more coasting, yes, so you burn less fuel.

MS MAGGIE WONG: The next section I am interested in is the 8.3 --

CHAIRMAN: Before you move on, whilst you were with KMB, were there any parameters inputted into creating thresholds for automatic reports of driver misbehaviour, for example speeding?

MR JAIN: Okay. Automatic reports, to --

CHAIRMAN: Were there automatic reports?

MR JAIN: No, as far as I know, there were no automatic reports, but their people were analysing driver data based on their performance. So it was more of

a statistical analysis. People were analysing it.

CHAIRMAN: But the equipment was capable of generating, if you put in the input, an automatic report?

MR JAIN: It could, yes.

CHAIRMAN: But it was not being used to do that?

MR JAIN: It was not being done that way.

CHAIRMAN: Why not?

MR JAIN: I think there are people who are better suited to answer that question.

This "why not" is one question that even I have in my mind why we abandoned that system, which is something that would have benefited immensely to the bus operation in Hong Kong.

CHAIRMAN: Thank you.

MS MAGGIE WONG: I would like to take you to another document. Sorry, there is one more question. In paragraph 8.3.7, where it mentioned:

"As a safety enhancement measure, the company has appointed a professional counseling service provider ... for staff and ... immediate family ... to raise ... problems or difficulties they ... encounter in their daily lives."

I have a question about this.

Is there a system, in perhaps Singapore, for example, to detect drivers that have behavioural

problems or that have psychological problems that are not suitable for driving? Do you have similar system, or do you have a system?

MR JAIN: Psychological state of a driver is one of the biggest challenges in bus operation around the world at the moment. People are trying for different things, again I will resort to artificial intelligence, where people are looking at your biological data, which is micro-expression analysis, your eye dilation, your eye movement analysis, to generate some kind of intelligence on what state of mind you are in. This is still a work in progress, I must say.

So this Prolearn system in Singapore tends to go in exactly that direction. It looks at a driver's response to real-time traffic situations, and predicts the propensity of this driver to cause an accident. And hence it goes into an intervention mode and retrains the driver.

So it is, in a way, a psychological response where either you became too complacent whilst on the road, or you are going through a certain situation.

But if you had, let's say, an argument with your spouse and you turn up for work, I doubt if there is any system at this moment in the market which can detect your state of mind.

MS MAGGIE WONG: There is another document that I would like to refer you to. It is in MISC-1 bundle at page 127-5. It is the letter from the Road Safety Council to this Committee dated 31 May 2018.

MR JAIN: May I know the page number?

MS MAGGIE WONG: Yes, page 127-5. That's the first page of the letter. 127-5. MISC-1.

MR JAIN: I'm on that page.

MS MAGGIE WONG: If I may refer you to one paragraph. It is 127-6. They mentioned about:

"The second system is known as a type of 'telematics' and was installed in vehicles under a pilot scheme to assess the technological interface."

They mentioned RIBAS, which is basically about speeding, idling, harsh braking and harsh acceleration. And the parameters are set for various features, which are considered normal operating limits, and then whatever occurs outside the parameters is flagged automatically by the computer to a supervisor. And then:

"Follow-up action depends very much on management policy but can range from advice, through counseling to retraining and even discipline measures."

So it appears the Road Safety Council is stating that the police is starting to do the system.

Is this a system similar to what you have in Singapore in terms of the use of telematics?

MR JAIN: As I said, most of the telematics systems do these things. There are many suppliers around the world. The functionalities differ a little bit in each of the models and each of the supplier, but fundamentally they are all trying to do the same thing, they are trying to give you the vehicle health and vehicle performance data on a regular, real-time basis at the back end. That allows you to monitor the performance of the vehicle, the location of the vehicle, and basically, as I say, asset performance in general terms.

CHAIRMAN: Now, LKW Parts and Services Limited is a Hong Kong company, is it not? Are you familiar with it?

MR JAIN: No, never had any dealings with them.

CHAIRMAN: We have.

MS MAGGIE WONG: Another topic I would like to ask you is about black box.

If I may take you to the bundle TD-1, page 393.

This is a letter setting out certain responses to issues raised by this committee. This letter is dated 13 July 2018.

If I may invite you to page 394. The question was this. Inviting the Transport Department to:

"Identify the occasions of such communications in

respect of the better management of bus drivers, rather than bus operations. In such communications, has TD given any directions to [franchised bus] operators to explore using any specific new applications? If those communications were in writing, please provide copies of the communications to and from the [Transport Department] and [franchised bus] operators. If the communications were made orally, please describe when, by and to whom the communications were made ... [and] the nature of those communications."

CHAIRMAN: I think it would help Mr Jain if you were to take him to the statement in the Transport Department paper which gives rise to this question. Then he would understand the context.

MS MAGGIE WONG: I think it is annex 2. The TD paper is in TD-5 bundle, page 1688.

Mr Jain, this is a paper prepared by the Transport Department, and the heading is "Application of new technologies in franchised bus operation".

And this note set out the:

"...actions taken by the Transport Department in enhancing safety of franchised bus ... operation in recent years by working with the FB operators in applying new technologies."

And in one of the paragraphs, one of the sections,

if you look at page 1689, it makes reference to black box electronic tachographs. You can see in paragraph 5 it states that:

"Since 1 July 2004, electronic tachographs (commonly known as 'black box ') have been installed on all new [franchised buses] in compliance with the requirements imposed by the [Transport Department] in October 2003. Currently all [franchised buses] are equipped with black boxes."

If you go to paragraph 7 it states:

"While there has been no further formal and written enhanced requirement on the specifications of black boxes from the TD since 2003, during the TD's ongoing contacts with the bus manufacturers and the FB operators, both the TD and the FB operators have been keeping in view the new technological advancement to enhance their existing devices on the buses."

Then they stated at paragraph 8:

"The FB operators have actually started widening the scope of information kept by the black box as early as 2006 such that apart from the basic functions for monitoring the driver behaviour, the black box can also record the operation of braking, opening of doors, the sounding of bells ... to assist the FB operators in managing their fleet."

Then in paragraph 9, it makes reference to:

"Over the years, the TD has been communicating with the FB operators, requesting them to study and investigate the feasibility of applying new technologies and the information kept by the black box to better manage their bus operation and drivers. For example utilising the global positioning system signal received by the black box, coupled with the enhanced capacity for data transfer, the TD has required the FB operators, as a new franchise commitment, to provide real-time bus arrival information through mobile platform ... to better serve the travelling public in the 2015 franchise negotiation exercises ... and subsequently the 2017 franchise negotiation with the Kowloon Motor Bus ..."

It was in context, given their statement about the ongoing negotiations with the franchised bus operators that there was this follow-up question --

CHAIRMAN: No, it is ongoing communication. That's what was claimed.

MS MAGGIE WONG: Yes, ongoing --

CHAIRMAN: The context is this. In 2003 in November the Transport Department stipulated what had to be in a tachograph, and that had to be on new buses from 1 July onwards. The question is, well, what have you done since then in the ensuing 15 years to update the

requirements for tachographs or telematic equipment?

That is what led to this response.

You were working in KMB were you not, responsible for this equipment generally?

MR JAIN: But if I can just add something here. What happened in 2003 is not what we are referring to what is happening today.

CHAIRMAN: No, we understand that. We are trying to fill in the dots. 2003 is the last bit we have in writing. So that was the purpose of the questions from the Committee: What have you been doing since then?

MR JAIN: So the biggest change that happened since 2003 -- so tachograph, having bus generate data about vehicle performance, that existed in early 2000, because buses were generating -- using electronic chips to control the bus systems.

So the moment that happened, the data was available. What was not available in 2003 is a reliable means to bring this data backwards, real time. So the communication system was not available.

CHAIRMAN: Mr Jain, what we are trying to find out is what the Transport Department did to mandate the use of this kind of equipment. That's the purpose of these questions.

MR JAIN: Okay.

CHAIRMAN: And these are the answers that you are now being taken to at TD-1 at page 394.

MS MAGGIE WONG: I think maybe, Mr Jain, should I put it this way, the Transport Department only issued one guideline, it is in 2003. They have not revised the guideline in any written form between 2003 until to date.

And what they are saying is there are ongoing communications between the operators and the Transport Department about adding more functions and technology in relation to this black box.

So we are asking has this happened throughout the years, or is this by your own initiative that the bus operators on their own initiative do this upgrading of the black box?

MR JAIN: I can only speak for KMB what we were doing at that time. A lot of this that was being done at KMB was on its own initiative and it was primarily driven by the commercial reasons. Because if you see KMB's profit and loss accounts in 2012, KMB made a loss, somewhere in the region of $120 million, and the ridership was constantly declining for last 10 or 15 years, since the opening of West Rail line, really, 2002/2003, all the way up to 2012, the ridership was in a constant decline, the company's financial performance was in a constant

decline.

So in 2012, the objective at that time was to either turn around the business or do something drastic with it. Any shareholder's commercial response has to be like that.

So basically, at that time, we started looking at all kinds of parameters, technology, any possible means that could improve performance of the bus operation, performance of the systems, and which can reduce the cost of operation and improve the delivery of operations.

So if you see the data from 2012 to 2015 -- and I think they are available in Traffic and Transport Digest, the bus miles of KMB, I think we managed to reduce something like 22 million miles of bus operation in these two years and we increased the ridership by 3 per cent, so we cut out a lot of unproductive mileage and converted that into productive mileage.

This is the kind of thing that we were doing, telematics was a part and parcel of this whole global initiative we were doing. Because we were not just looking at the bus device, we were looking at route planning, we were looking at driver deployment, scheduling, rostering, all aspects of the bus operation and trying to optimise the bus operation and generate

efficiencies, which did yield results if you look at KMB's performance from 2013, 2014, 2015. From a loss-making company it slowly changed into a profit-making company.

MS MAGGIE WONG: I would like to ask you a particular answer made here in the TD's response at page 394.

MR JAIN: Yes.

MS MAGGIE WONG: If you look at the last line, it makes reference to the fact that the TD also discussed the same, meaning to step up regular checks on the data recorded by the black box to monitor bus driving, bus captain's driving manner and behaviour with KMB at the regular meeting held on 27 June 2016.

Do you recall there was such a meeting?

MR JAIN: I cannot recall to that extent, exact date, but I can only say by this date KMB's entire fleet was already equipped by telematics devices.

CHAIRMAN: The real question is this. Was the Transport Department involved in urging you, KMB, to use your telematic equipment to step up regular checks on data recorded by the black box to monitor bus captains' driving manner and behaviour?

MR JAIN: They possibly could have, but it was already an intent within KMB to do so.

CHAIRMAN: Right.

MR JAIN: I mean --

CHAIRMAN: I think to help you --

MR JAIN: I'm afraid I can't go back and recall every statement from the meetings.

CHAIRMAN: I understand that. But to help you, I think it would help if you were shown the documents that show this was in part, perhaps, related to the renewal of the franchise, because there were papers I think from this month that are part of that; am I right, Ms Wong?

MS MAGGIE WONG: I think there was a paper on this.

MR JAIN: There was a whole slew of measures that were being discussed at that time, and I know this part, fairly confidently, that for the first time this requirement of having a real-time reporting device, and estimated time of arrival, was inserted into franchise documents for KMB for the first time in 2016.

CHAIRMAN: The ETA --

MR JAIN: Appeared before that.

CHAIRMAN: Yes. That was a requirement, but we are trying to find some requirement that bus companies should use the data in the black box to monitor driver behaviour, and we can't find that.

MS MAGGIE WONG: If I may take you to the renewal of licence document as to this matter.

First of all, may I take you to SEC-2 bundle,

page 735. This is a LegCo paper dated 11 January 2016.

It relates to the background brief on the franchise for the bus network of Kowloon Motor Bus.

And if you go to paragraph 11, "Enhancing standard of bus service":

"... members raised concern over the performance of franchised bus service at the panel meetings, special financing committee meetings as well as the council meetings. They urged the Administration to take the opportunity of franchise renewal to require service improvement by bus companies, including provision of real-time bus service information to passengers, provision of priority seats and barrier-free facilities, improvements in bus lost trips as well as bus service frequencies during peak periods."

And then we have the whole section on the provision of real-time bus service information to passengers. That's paragraphs 12 and 13. But none of them relates to the improvements on the black box or any reference to black box.

CHAIRMAN: Well, to the use of black box to monitor drivers.

MS MAGGIE WONG: Yes.

CHAIRMAN: That's the point.

MS MAGGIE WONG: I wouldn't trouble you with the things in the middle. By the time we got to June 2016, that's in

the same bundle, SEC-2 bundle, page 799. That's in June 2016.

It made reference to the public consultation, and the views it received. And one of the issues they raised at page 803 is the bus safety, section 4, bus safety, 4(a):

"To monitor bus captains' driving behaviour more closely ..."

So this is the view, if you look at the previous page, 802, it was the major comments received during public consultation, and in section 4 it summarised their views in terms of bus safety. It is to monitor bus captains' driving behaviour more closely.

So that's what we have reached.

And by the time of the March 2017 licence, I wouldn't take you to the terms, but I will take you to the document that the TD asked the KMB to undertake to perform. If I may take you to the TD-5.

That would be KMB-9 bundle. Pages 3997.

MR JAIN: Yes.

MS MAGGIE WONG: The only reference here to this franchise operation is in relation to enhanced safety feature in subparagraph 3. That is the electronic data processing device.

Not a single word about using it to monitor bus

drivers' behaviour more closely.

So it is very loose term saying, oh, there is this enhance safety feature, but how is it going to be used, it is not specific, or not even spelt out.

So by stating that, it appears that the TD's suggestion that there are ongoing communications about having this to specifically monitor drivers' behaviour, doesn't appear to be reflected in all these documents.

Do you agree with that statement?

MR JAIN: On the face of it, when I look at these documents, you are absolutely right, and it goes back to my assertion that the franchise document in Hong Kong is a very loosely written document in the sense that it is a very wide range of things that you can do within that, which makes it subject to manipulation to some extent.

But having said that, in all my interactions with Transport Department, I mean, I can say that the intent was right. Sometimes the knowledge was not available, sometimes the drive was not there. So that is different from intent. I think the intent was not wrong from Transport Department, in any of the meetings that I have attended.

I have never seen them -- they have asked the right questions, they want to improve things, but it may not have been that specific, it may not have been -- or

that -- I would say prescriptive to bus companies.

MS MAGGIE WONG: Yes.

CHAIRMAN: So not prescriptive and not documented?

MR JAIN: Correct.

CHAIRMAN: Loose?

MR JAIN: Yes. But this is not just this parameter, I can go on, in the whole franchise document, there are a lot of things here which are very loose in that sense.

CHAIRMAN: Just a moment.

But overall you characterise it as not prescriptive, and you acknowledge from what you have been shown, not documented.

MR JAIN: That's correct, yes.

CHAIRMAN: Thank you.

MS MAGGIE WONG: If one considers bus safety is of paramount importance, it would be usual and normal to include it at least in the franchise agreement, would you agree with that statement?

MR JAIN: I think I'll just go back to your statement, if one considers, that should not be part of that conversation. Bus safety is of paramount importance and it should be the top priority both from a regulator perspective as well as operator perspective, because we are here talking about public safety, people's safety, are staff safety, and to me that is uncompromisable.

CHAIRMAN: And the context in Hong Kong is this, that unfortunately over the years, we have had a series of catastrophic bus accidents. That's the context in which the regulator operates.

MR JAIN: It is extremely unfortunate, but yes, that is the reality, and I think the intent of the entire transport system, we run a very good transport system in Hong Kong, and this is one area which needs to be addressed sooner than later.

MS MAGGIE WONG: Thank you.

That leads me to one specific question I would like me to ask you, the annual report.

I wanted to do certain comparison between two particular years of annual report as to why certain things are missing, or appears in 2016 annual report but missing in 2017. If you look first in KMB-5 bundle, page 1719.

MR JAIN: Counsel, may I know the page you are referring to?

MS MAGGIE WONG: 1719.

CHAIRMAN: This is the annual report for which year?

MS MAGGIE WONG: This is the annual report for 2016.

CHAIRMAN: So published in March 2017?

MS MAGGIE WONG: Should be the end of 2016.

CHAIRMAN: I think you will find that if you find the chairman's letter --

MR JAIN: Published in March, I think.

MS MAGGIE WONG: In March, yes, I apologise for that.

If we look at this annual report, page 1719, on the right part, it made reference to two features. One is the bus on-board monitoring system, and the second is the operations communication management system:

"BOM records the driving performance of bus captains for analysis by depot and department with the aim of raising driving standards with a particular focus on safety and passenger comfort."

And second:

"The operations communications management system.

OCM streamlines the handling of real-time information on operational incident such as traffic accidents, road congestion as logged by our radio control section, thus improving the speed and accuracy of message dissemination to the depot and departments."

On this page, it also made reference to a personalised Octopus card introduction of a personalised Octopus card for bus drivers as they report for duty.

That's the terminus management system.

My question is this: if you look at 2017, annual report, at page 1926. If you look at both those pages, perhaps, 1925 and 1926, we cannot find similar

information in the 2017 annual report.

Maybe if you can comment on, first of all, the 2016 annual report, the BOM system. Is this one of the systems that your company at that time was considering implementing as the real-time alerts to drivers, or is this something else?

MR JAIN: In my opinion, this is not referring to any real-time system. This is something -- it is part of this bus operation management which was collecting the data and then using for driver feedback. That is BOM.

MS MAGGIE WONG: But we can't find similar reference in the 2017 annual report. Even though they have a more generalised statement at page 1940, for completeness, 1940.

MR JAIN: Is does mention on-board monitoring system, BOM, but of course the level of detail is much less.

MS MAGGIE WONG: Yes.

CHAIRMAN: This was after you left KMB, was it not?

MR JAIN: That's correct.

CHAIRMAN: Both of these reports?

MR JAIN: Both of the reports were published after I left KMB. 2017 annual report, as a general observation, I would say the level of detail with respect to KMB and Long Win were much less than compared to previous years in annual report.

As an external party, I look at annual reports and try to analyse data and performance for my own satisfaction. And 2017, I did find that a lot of information was not available that was available in previous years. That is a general observation.

MS MAGGIE WONG: Thank you.

Mr Chairman, I have concluded my questions.

QUESTIONS FROM THE COMMITTEE

MEMBER AUYEUNG: Thank you, Chairman.

I have one quick question for you, Mr Jain. First of all, thank you very much for coming to share your views.

We spent a lot of time this afternoon talking about all the technology and all the advances which can improve or enhance bus safety. But one topic I would like to hear your views is on resources.

From your experience, with all this technology and everything we are talking about, from a resource perspective, whether it is monetary or human resources, what is your view? Can we get your sort of assessment on how expensive it is? Do we have the right people in Hong Kong to implement all those technologies that we discussed earlier?

Thank you.

MR JAIN: It is a very interesting question.

This is something that I always talk about. You know, the first time I went to KMB, Long Service Award Dinner, there were roughly 300 people who were getting an award for serving the company for more than 30 years. I had never seen anything like that in my life.

So there was a significant number of people who gave their entire lives to this company.

I'm sure there was something in the company that fostered that loyalty in these people.

So to me that was a fantastic part of the cultural learning for me.

Why now people don't want to join KMB? Now that is the question.

Has it tarnished its image? Is it not providing the same level of family welfare that it used to provide? There could be many factors there which needs to be addressed.

That's the human aspect of it which I think is addressable, if -- I mean, KMB I'm using because I'm familiar with KMB, but when I say KMB it goes all across the bus industry in Hong Kong. And I think there are means and mechanisms whereby you can generate enough conduciveness and attractiveness in the driving, bus driving. I have met a great number of people who are fans of buses, who are dedicated to the bus industry,

they really feel for it from their heart. But they go out and they are criticising the bus companies, if you look at the mood and sentiments, these are die-hard fans and they are still criticising. We need to ask how we can bring them on board and make them part of the process.

That's the human side.

On the technological side we are still stuck with very old style of technological management where we give a key to the driver in the morning and he drives the bus the whole day, literally on the same route up and down, and kind of does not more than that.

There are some bits of interlining and intertiming is being done, but nothing beyond that at the moment.

If you think about it, a driver needs a rest, a vehicle does not need a rest.

If we can optimise in such a way -- if we can separate three layers of resources. So your human resource, vehicle resource and infrastructure resource, and if we can optimise across these three levels, which we are not doing at the moment, or we are doing very little in Hong Kong, but if we can optimise at three levels through modern tools, I personally feel we can do more with less.

My back-of-the-envelope calculation, I think KMB

system can be delivered, the whole system, the existing routes, exactly the same way, can be delivered with about 2 to 3 per cent less buses and less drivers, which would completely solve the manpower problem.

MEMBER AUYEUNG: Thank you.

MEMBER LO: I just have one question. Thank you for sharing your thoughts on technology especially.

I'm just thinking about how come Hong Kong is so slow in adopting new technology for improving safety. Perhaps our technology readiness is something that could sound good on paper but doesn't deliver in practice? Maybe incentive for companies to invest, they don't see value? Maybe regulations not requiring them? I just want to get your thought on what are the major barriers, and how should we go about making Hong Kong more receptive to adopting new technology for safety improvement in our public transport system, as an insider, you worked for KMB and MTR for a long time.

MR JAIN: It is a basket of reasons. I think the biggest reason is the environment we are operating on. I think one way innovation is encouraged in most of the world is where you are allowed to fail. You have to accept failure, and our tolerance in Hong Kong has become extremely low for failure. Innovation only thrives when you allow that kind of environment.

So that is a big environmental issue, it could be a cultural issue, can whatever you want to call it. That is a major reason.

And proven technology that was our mantra until a decade or so, which we very successfully adopted in our public transport systems, unfortunately that worked really well when technology was working slow. Now the technological innovation and adoption is moving at such a rapid pace that by the time you wait for proven technology it is outdated.

So you are always waiting for something new because the proven one has really something that has become historical reference, in a way.

So there is a cost of adoption which then as a company you would say if there is new coming why don't I wait for something new. And that also hinders innovation.

If you look at what China has done, they have taken this leap of faith, they have gone ahead, they have implemented a lot of stuff, they have allowed their companies to fail, if you look at electric bus adoption, every possible configuration of battery and the battery charging that is possible around the world has been experimented.

Now they know what works and what does not, and they

have become global leaders in electric bus manufacturing and operations. This is the kind of environment we need in Hong Kong.

We have been, I think, if you ask me, I would rate the technological know-how for Hong Kong engineers, Hong Kong operators, at really at the top end of the curve. We have been extremely good. So our operational performance within those parameters has been exemplary to the world. But our technological adoption has been pathetic, for want of a better word. It has just been so slow. We have been left behind in many aspects, the data availability that I see is happening in third world countries, is not happening in Hong Kong.

So what can be done? I think we need to create an environment where we have to allow -- we need to incentivise people to innovate and apply these technologies. There are a lot of partnership and collaborate models. There are a lot of Hong Kong start-ups who are doing experimentation in China, Taiwan, in other countries, we should allow these people to come and do experiment and create that partnership model with local companies.

We do hackathons here and all these, I have been part of multiple hackathons as a judge, as an observer, as just an audience, and I see there is no dearth of

knowledge in Hong Kong, there is no dearth of zeal, the entrepreneurship in Hong Kong. What is lacking is an environment to foster them. And that is where these big operators need to create an environment, adopt some of these, create some incubation units, incubation labs, where they come in and they work in their depots, MTR depots, KMB depots, and create new kind of systems altogether. That's where I think we would have something to offer to the rest of the world.

CHAIRMAN: A little while ago you mentioned the need for bus drivers to rest.

Now you worked with KMB for about four years, did you not?

MR JAIN: Yes, I did.

CHAIRMAN: Are you in a position to help us understand better the facilities made available by KMB to allow its drivers to rest, in particular we have in mind the drivers who are doing special shifts and working 14 hours, and allowed to have three hours break in the middle. Are you in a position to help us as to how adequate or otherwise the rest facilities are?

MR JAIN: One is a physical facility for rest, which to me is very easy, you can do lot of driver surveys and ask them whether they are adequate, comfortable, whether they see any improvement areas.

But then there is a second area for resting, and this is one area which I in fact see completely lacking in Hong Kong.

It is that every person is not the same, their fatigue levels, their response to things, their psychological level is not exactly the same. So instead of saying 14 hours is too much, we should reduce it to 10 hours, we need to create statistical framework and look at the reality indicators where what point the driver fatigue becomes an issue, we can use a lot of data points.

In fact if you do an accident analysis, look at the data, look at the drivers, you can create a reasonably good history for each driver and create a parameter that this driver is usually very good for three-hour duty, short routes, not good for long routes, not good for long duties, not good for night duties, and you can then customise your duties that you allocate to the driver, which would then make the duties more palatable to the driver because they think this is something they will do.

Today what happens, you put them in a morning shift this month, next month they go to the evening shift, next month they go to the night shift, and it is an irregular pattern in the name of creating an equitable

framework.

But it is completely ignoring an individual's capability to do something, or their personal performance levels. If we do enough analysis we can create this environment. If you look at a management scenario in a business, we do a performance assessment, we say this guy has a bright analytical capability, hence he should be the analyst. This guy is very good with physical work so maybe he should be doing this. That is the same thing we need to do within the driving work force, we need to customise and personalise those mechanisms.

CHAIRMAN: Would you suggest that the data necessary to make that analysis, for example with a driver, be collated from the driver's performance as recorded in real-time automated reports?

MR JAIN: That is one point of reference.

We could also look at a driver's education level, we can look at their physical performance, their medical visits, there are a number of data points.

So this is -- to me, what we are collecting as a part of real-time operation management from this telematics device is one point of reference, which is their actual driving performance, but this can be then correlated to their personal parameters, and you can

actually create a reasonably decent model for an individual.

And this is a Singapore model, Prolearn that I talked about. They are doing exactly that. The training they give to the driver is not identical to everybody. They customise to that person, because they see his individual performance on certain situations and they customise the training.

This is what needs to be done. The cooky cutter approach is no longer working.

CHAIRMAN: Forgive me if I come back to my question. During the time you were working with KMB can you help us with how adequate or otherwise the facilities were, given that there perhaps was not this analysis that you have described that could happen, how adequate or otherwise the rest facilities were for drivers, particularly those doing split shifts.

Are you in a position to help us?

MR JAIN: Yes, when I joined KMB, I would say these were deplorable facilities at that time.

CHAIRMAN: So 2013?

MR JAIN: At 2013. The facilities were very substandard to any modern work force.

Having said that, there was a concerted effort after that to improve those facilities in many places,

wherever possible. In fact, I remember we submitted a lot of suggestions to Transport Department on creating kiosks, creating facilities for drivers, but Hong Kong has, again, a very unique framework where land is one of our most expensive resources. And many of these public transport interchanges, they are, although available for operating buses, they are owned by private developers, private entities, or Link Reit, or whatever, and they are not willing to provide that space where a driver's resting facility can be created.

I'm sure KMB would probably be in a better position to give you this, but they receive complaints even for drivers using toilets in shopping malls. To me that is a basic human need, how can anybody complain about use of toilet, a public toilet for that matter?

CHAIRMAN: If the facilities were deplorable in 2013, how would you categorise them in December 2016 when you left KMB?

MR JAIN: There was a significant improvement from that baseline. I won't say that they were impressive in any way. But I think there was a significant improvement that was made. There was a management intent to address that issue.

CHAIRMAN: What is the worst facility as of December 2016?

MR JAIN: There are quite a few.

I don't know what happened after that, but 2016 there were many places where the drivers were actually resting inside the buses, they were eating inside the buses because they didn't have any place to sit outside.

I think there was one housing estate near Kowloon City, where it is in a private development, and they refused to provide even a kiosk facility.

CHAIRMAN: Is that the Lok Wah Estate?

MR JAIN: Yes. And there are many examples scattered all around the city.

CHAIRMAN: That's the place where KMB built their own structure and were required to remove it?

MR JAIN: Correct.

CHAIRMAN: So problems encountered because of the inability to require those that had power in places where bus termini were located to provide facilities; would that be one way of putting it?

MR JAIN: Correct. And it could be part of the development rights, it could be part of the land leases, I'm not sure what is the right way to do it.

CHAIRMAN: I'm sure there are multiple reasons why it came about, but for one reason or another the facilities could not be provided, were not provided.

MR JAIN: That's correct. Yes. There are many examples like that where there are no adequate facilities for the

drivers.

CHAIRMAN: Thank you very much for your assistance and your evidence, Mr Jain. We are most grateful to you.

We are also grateful to all those who have been working a long day in transcribing our words, and for those that have been interpreting them. But our hearing is concluded now. We thank you for your attendance, we will have other hearings in due course, and we will give notice in advance of those hearings.

Thank you very much.

MR JAIN: Thank you, Chairman, and my thanks to the whole committee, all the staff, counsel, I think you are up to a great challenge, and I really hope to see something nice coming out of it in the end, and something that transforms our public transport industry.

CHAIRMAN: Thank you.

MR JAIN: Thank you very much.

2018 年 7 月 17 日

上午 9 時 59 分恢復聆訊

出席人士： 鄺子憲先生，道路安全研究小組主席

主席：（經傳譯員）各位早晨。鄺先生，我係想請黃大律師繼續代表我哋委員會向你提問嘅。

黃女士：（經傳譯員）係，鄺先生，感謝你今日繼續上嚟作證，琴日我哋就係講及一啲文件，嗰啲文件就係九巴個專營權續約嘅文件嘅，我今日會繼續係探討呢一方面嘅事宜。想請你睇番雜項文件嘅第 2 個文件夾 770 頁，呢個係你自己嘅陳述書，你就係回應當時嘅諮詢，2016 年 6 月 16 號，琴日我哋就喺 773 頁嘅，喺嗰個建議嗰一欄嗰度，第一點，嗰度就話喺嗰個專營權嘅協議裏面應該係有一個比較全面嘅標準嘅要求同埋係有一啲司機嘅監察系統係使用黑盒嘅，我就想問下你，點解你就建議係要包括呢一個裝置落去嗰個專營權協議嗰度呢？

鄺子憲先生：（經傳譯員）主席先生，當時我認為將專營權續期其實係一個大好機會讓我哋可以探討一啲新嘅構思，所以我哋當時係盡力希望係提供越多嘅意見越好，當然我哋都係提一啲係合理嘅建議同埋一啲係合理可行嘅建議嘅，唔該。

黃女士：（經傳譯員）係咪話如果落咗嗰個專營權協議嗰度就會有一個機制去睇下係是否獲得遵從，嗰個邏輯係咪咁呢？

鄺子憲先生：（經傳譯員）主席，係呀，我諗係呀，呢個亦都對我嚟講，我覺得會係一個提升嚟嘅，政府嗰方面係希望令到巴士更加安全，我哋都好感恩嘅，不過我哋就覺得如果一日都仲係有人受傷，特別係因為意外而嚴重受傷嘅話，都仲未係理想嘅，所以我哋希望大力推動，希望喺呢方面有更大嘅改進。唔該。

黃女士：（經傳譯員）你喺第二段嗰度亦都講及一啲主要嘅監察管控嘅措施，你嘅建議係應該係由邊個去進行呢啲監察呢？

鄺子憲先生：（經傳譯員）類似嘅營運嘅話，我相信應該會係由巴士公司自己係主動提出，而政府當局就作為一個規管當局。

黃女士：（經傳譯員）其實呢度有唔少嘅建議嘅，譬如話喺呢個高風險嘅山路嗰度嘅車速限制等等，我哋琴日亦都探討過，你亦都有講過話如果係山路高風險嘅話，你曾經有建議過嗰個時速應該係幾多嘅，你意思係咪話呢一個咁嘅建議應該加入嗰個專營權協議嗰度，定抑或你純粹係一個建議就係話政府總言之就係應該係要係規管呢一啲咁嘅道路呢？

鄺子憲先生：（經傳譯員）主席先生，我都話具體嘅建議，其實我強調嘅就係嗰個原則，個原則就係如果我哋搵出有某一啲路段佢係特別高風險嘅，我會話呢啲係

Transcript by Epiq Hong Kong, Limited

關鍵嘅路段，合理嘅做法就係應該係講明應該嗰個車速係定喺幾多，25 吖，30 吖，40 吖咁，我哋就希望可以喺呢啲關鍵嘅路段施加控制，令到司機安全駕駛。喺呢度，我冇講明係邊一個路段應該係幾多公里嘅，但係我希望有一個咁嘅概念，希望佢哋唔好淨係單單係睇嗰個法律規定嘅時速限制，因為我哋講緊一啲關鍵嘅路段。

黃女士：（經傳譯員）邊個係去負責搵出邊啲係關鍵嘅路段呢？

鄺子憲先生：（經傳譯員）主席先生，我相信應該係政府同巴士公司係一齊去做，當然亦都係要靠專家去幫手，唔該。

主席：（經傳譯員）對唔住，跟住政府又如何去監管呢？如果巴士公司係搵出某一啲路段，話畀政府聽，政府又同意，之後又如何去監管呢？因為呢樣先至係更重要㗎嘛。

鄺子憲先生：（經傳譯員）主席先生，我諗我哋而家唔會講一啲好複雜嘅監管系統或者制度，譬如講番個基礎，講番啲基本，首先應該發出一個通知，係通知啲司機，如果佢係揸某一條路線，而嗰度就係有一啲咁緊要嘅路段嘅話，佢哋要特別留心同埋要知道自己揸幾多、揸得有幾快；另外佢哋係有巡查嘅人員，有稽查去查核司機嘅表現，佢哋時不時會咁做。當然我哋亦都希望引入一啲更加先進嘅監察系統，呢一個應該係以黑盒搜集嘅數據為本，我諗最好就係同呢個全球定位系統結合，就係如果啲司機過份咁樣係超出嗰個車速嘅話，我哋就可以係自動同埋實時、即時咁樣樣可以搵出個情況。

主席：（經傳譯員）舊時古老嘅方法就係用稽查，你就話與其係咁，就不如要一個自動化嘅、實時嘅報告系統，係咪呀？

鄺子憲先生：（經傳譯員）係呀，主席先生，係呀，我哋會有咁嘅建議嘅，只要嗰個科技上做得到，我哋係咁嘅建議嘅。

主席：（經傳譯員）其實你作呢啲建議嘅時候，心目中就係有咁嘅概念，係咪呀？

鄺子憲先生：（經傳譯員）啱，主席先生。

黃女士：（經傳譯員）嗰度嘅第三點，你嘅建議就係話係透過有系統同埋聚焦嘅安全培訓，應該將啲司機訓練到係明白究竟典型嘅意外情景係點樣樣同埋有邊一啲具體嘅風險，你諗住係邊個會做呢啲嘢呢？

鄺子憲先生：（經傳譯員）主席先生，呢個係一個一般嘅建議，當然係需要政府主動去做，相信亦都要搵專家去幫手，有一啲團體，譬如我哋呢一類嘅組織亦都樂意隨時係幫手嘅。講番呢一點，我原本嗰個構思就咁嘅，司機其實未必係真係好清楚係會出現一啲乜嘢嘅意外，正如我琴日所講，喺呢一個階段，如果話司機知道埋安全防撞欄嗰個防撞能力係幾多，又或者係以咩嘢嘅車速，一個老人家過馬路，如果真係畀車撞又唔會引致嚴重傷亡，佢哋係唔知道嘅，但係呢一啲嘅資訊、呢一啲嘅知識其實可以將佢轉化為一個簡單嘅教材，讓司機更加容

Transcript by Epiq Hong Kong, Limited

易知道--讓佢哋知道點解同埋佢哋可以點樣樣係揸得更好。唔該。

黃女士：（經傳譯員）喺 4.4 嗰段，你就講及車輛嘅表現，你就用咗加拿大公交嘅手冊，嗰度係有指引同埋有一啲界限嘅，可唔可以話畀我哋聽點解你係引用咗加拿大嘅公共交通手冊嚟到提及究竟如果係標準嘅巴士或者係一啲掛接式嘅巴士佢哋應該跟從乜嘢嘅指引？

鄺子憲先生：（經傳譯員）主席先生，呢一份手冊，我就係有好多嘅文件，呢一份係其中一份我覺得我係好感興趣嘅，講到加速同埋減速，加速同減速往往都係乘客失去平衡，喺車廂裏面失去平衡嘅主因嚟嘅，我哋亦都知道地鐵嘅設計係點呢？就佢哋有啲係關乎加速同減速嘅參數，好讓乘客唔會係因此而容易失去平衡嘅，我覺得巴士亦都係應該一樣。

我哋見到佢呢度嘅參數都相當之合理嘅，或者係睇一睇就係如果係緊急情況之下減速，呢度就講咗就係 2.7 米嘅，即係每方秒 2.7 米嘅，其實我琴日就講過，就係如果係一部私家車佢緊急嘅情況之下去剎車係 2.7 米，即係每方秒，個問題就係話如果巴士司機喺緊急情況之下要剎車以免撞到一名行人，佢需要反應好迅速，佢要諗下究竟就係令到車上乘客係失去平衡定抑或係要保障出面嗰位行人，唔好讓佢就係被車撞到。我諗全世界嚟講，加速率同埋減速率大家都接納係一個巴士營運嘅一個重要嘅安全參數。

主席：（經傳譯員）究竟係地鐵喺加速、減速嗰方面佢哋定咗一啲咩嘢嘅參數呀？

鄺子憲先生：（經傳譯員）主席先生，應該係每方秒 1.15 米，不過當然有啲情況之下有啲出入嘅。

主席：（經傳譯員）係，好，唔該。

黃女士：（經傳譯員）我亦都想請你睇一睇，因為你剛才講過加速同埋減速，可唔可以請你睇番 BM-1 嗰個文件夾第 66 頁？

主席：（經傳譯員）我哋係睇緊乜嘢呀？

黃女士：（經傳譯員）呢個係黑盒製造商 ZF 嘅陳述書，嗰度就係有一個截圖，講及加速率同埋減速率嘅。我想問一問，鄺先生，你可唔可以就係講一講呢度嗰個減速率佢就係 2.3，呢度嗰個截圖，你見到係 2.3 嘅，你可唔可以講一講你嘅睇法呢？因為剛才你亦都提過喺加拿大嗰度就係 2.7 米嘅。

鄺子憲先生：（經傳譯員）主席先生，喺呢方面，我冇詳細咁研究過，不過你亦都睇到，呢度 2.3 呢個值就係高於 1.1，呢個就係加拿大嘅公共交通手冊，嗰個就係一般嘅普通嘅減速嘅。至於應該係定喺邊一度呢，我諗係要決定於、取決於喺香港嗰個實際嘅操作環境嘅。喺香港，基於某一啲原因，我諗我哋都會接納一個稍高嘅減速率嘅，我冇詳細研究過，不過我要指出嘅就係話一般嚟講喺市區嘅道路，如果巴士行走嘅速度唔係好高，即係話巴士行走嘅速度係中等嘅話，就會少啲時候係需要個司機好快速咁樣樣去減低個車速嘅。

Transcript by Epiq Hong Kong, Limited

主席：（經傳譯員）運輸署 2003 年有啲要求--係技術方面嘅要求，嗰個係即係要個記速嘅--黑盒嘅記錄速，係咪 0.2G 呀？

鄺子憲先生：（經傳譯員）0.2G 即係等如 1.96 米每平秒。

主席：（經傳譯員）點解佢要求嗰個黑盒係記錄呢方面咁樣嘅減速嘅水平呢？

鄺子憲先生：（經傳譯員）主席，你嘅意思係運輸署係有一個要求嗰個巴士上面嗰個紀錄要係要--準確度要 0.2...

主席：（經傳譯員）或者請黃小姐--1993 年就要求有一個速度嘅記錄儀嘅，即係可以能夠記錄，去到 2004 年 7 月 1 號開始就要生效。

黃女士：（經傳譯員）係 1598 頁，1598 頁，3 段(a)，「呢個嘅軟件應該係記錄一啲--响嗰個意外報告係可以係响一秒之間--三秒期間裏面嘅一秒可以察覺一個 0.2G 嘅減速嘅。」

鄺子憲先生：（經傳譯員）如果巴士係响減速係 0.2G，即係話每平秒 1.96 米嘅，呢個就已經係一個事件，呢個係一個應該要交意外報告嘅事件嚟嘅。

主席：（經傳譯員）係咪即係好緊急咁剎車呀？

鄺子憲先生：（經傳譯員）我都認為係嘅。

主席：（經傳譯員）你頭先 2.3 米，即係每平秒 2.3，就比呢個要求係即係再多過百分之十㗎喎？

鄺子憲先生：（經傳譯員）主席，從文件睇，係，的確係咁。如果我哋有啲證據，係基於涉及乘客失去平衡嗰啲事件，得到一啲資料、證據，我哋可以比較一下當時嘅減速率，跟住同將來可以微調有關嘅數值嘅，就係一個根據證據嚟到進行調查呢個參數應該係點樣制定或者調整。

主席：（經傳譯員）但係我哋都有一個概略嘅睇法，地鐵係 1.15，2.3 就高過 1.15 好多，係咪？

鄺子憲先生：（經傳譯員）我諗係嘅，主席，不過我哋又要了解到巴士嘅營運冇咁可預測試嘅，我同意需要制定一個減速率嘅數據係比較接近地鐵嘅，雖然現實上唔可能响緊急嘅情況之下係應用。

黃女士：（經傳譯員）另一件事當然就係巴士安全，响下面 773 去到 774 頁嗰度，我哋睇一睇，你有一個建議，特別係第一個建議，774 個頁頂嘅，「上層嘅前排座位，因為你冇任何一個配置咗合理嘅嗰個陷塌嘅區域，前排嘅巴士乘客可能雖然有用到安全帶，都可能比較擠壓嘅，呢個特別係九巴嗰啲使用高速公路嘅巴士都係咁樣樣嘅。」你就有一個建議，要求將呢個要求擺番去個專營權嘅協議，跟住有一個時間表嚟到係進行改善嘅，你覺得邊個應該採取主動將呢個建議納入嗰個專營權協議呢？

鄺子憲先生：（經傳譯員）主席，同樣我哋都係假設响專營權協議裏面政府會係指定或者係規定，政府亦都係可以進行研究呢個課題，然之後就係要求巴士公司畀一個時間表嚟到改善，當然呢個亦都係巴士公司有個責任嘅，係進行有關嘅研究，即係佢哋應該可以同巴士嘅製造商聯合進行嘅，我哋建議就應該係要比較--政府同埋巴士公司都應該更加主動進行呢啲研究嘅，我認為佢哋有責任係研究呢啲課題，積極主動咁樣尋求改善。

主席：（經傳譯員）我而家預計你稍後可能會問呢個問題嘅，你就想達到嘅就係運輸署同埋巴士公司就係好積極咁樣做事嘅，佢哋過去有冇咁做呢？

鄺子憲先生：（經傳譯員）主席，要公平起見，佢哋响某一啲課題上面係好積極嘅，但係我哋覺得好重要某一啲課題，我可以話佢哋並不積極主動嘅，主席，响某啲情況下，佢哋都係回應式嘅，我哋唔想有啲課題佢哋只係回應，特別係涉及嚴重傷亡嘅情況。

主席：（經傳譯員）佢哋即係回應譬如一個慘劇，之後佢哋就唔會再係主動，佢淨係回應式嘅，佢哋嘅動作淨係回應式嘅，係咪咁講呀？

鄺子憲先生：（經傳譯員）係。我想補充一點，呢個並非不尋常嘅，即係話唔係淨係香港嘅，我哋要取得進步，好多時候都係有個大嘅意外，先至可以取得嘅。用我哋嘅角度睇，如果嗰個慘劇或者大嘅意外，事情係冇法子預計嘅，可能咁樣做都係合理嘅，但係如果係之前已經有好大數量咁樣嘅意外或者係有歷史數據或者係嗰個理論上嗰個風險程度係高嘅，就應該唔好一個回應事件嚟到做事，係應該要好積極嘅、主動嘅。

黃女士：（經傳譯員）基本呢個報告你就係強調咗呢度有好多好多證據嘅，你做出呢個建議係基於大量嘅證據嘅，你係咁樣講，係咪呀？

鄺子憲先生：（經傳譯員）主席，我假設呢個--頭先我哋提及嗰個事項，我會話係嘅，我哋的確係咁樣嘅，我哋個小組提出，或者有好多證據係睇得到嘅。但係證據有唔同嘅層次嘅，有啲係表面證據，有啲係根據我哋嘅知識，或者從嗰個意外嘅數據，或者係新聞報告所得到，有啲就當然更高一層，就係學界、學術界向一啲係學術期刊進行研究得到嘅結論，我呢度講嘅證據係個層次就係根據我哋嘅知識，根據我哋從新聞報告同埋一啲係意外嘅數據同埋從一個理論出發，嗰個證據都係好清楚明確嘅。

黃女士：（經傳譯員）我想講講最後一個建議，你提及巴士站嘅安全，你話等候巴士嘅乘客喺某啲路段係要暴露啲風險之下，即係有啲重型就行得好快嘅車輛嘅，你就覺得應該响嗰個專營協議要求巴士公司同政府合作減低呢個等候巴士嘅乘客所面對嘅風險嘅，你點樣建議呢？你建議巴士公司可以點樣同政府合作嚟到減低呢方面嘅針對等候巴士乘客嘅風險嘅呢？

鄺子憲先生：（經傳譯員）巴士站嘅安全係全球問題，即係並非只係限於香港嘅，但係我哋要承認好多國家，包括先進國家，都冇足夠咁樣重視呢個問題嘅，我哋

有啲巴士站係喺啲好高速路嘅旁邊嘅，大型嘅路，譬如話呢張相，係龍翔道，嗰個限速係每小時 70 公里嘅，告士打道亦都有，其他嘅主要道路都有，理論上如果有一大群等緊巴士嘅乘客，跟住隔籬就係好多嗰啲好高速嘅車輛，有一架車如果係撞咗上路面，佢哋就會畀嗰個巴士站同埋個車中間夾住，就會係受傷嘅情況好嚴重嘅。只係得幾個國家係重視呢個問題，亦都係採取行動嘅，其中一個就係星加坡，佢哋引入咗一啲新嘅措施，呢個措施係唔係有效或者係有好好嘅效能，都仲要進一步證實嘅。

不過理論上嚟講，我哋應該要保障等車嘅乘客嘅，巴士公司佢哋係起呢啲巴士站嘅，佢哋係從嗰個廣告度係得到收入嘅，即係佢哋從呢方面攞到收入去起呢啲巴士站嘅，而政府係負責個道路嘅，所以好自然我就覺得巴士公司應該同政府合作，嚟到係審視一下巴士站嘅設計同埋係咪需要有啲附屬嘅一啲設備、設施嚟到更好咁樣保障巴士乘客。我承認呢樣嘢唔容易做嘅，因為同一時間我哋都要讓巴士乘客上車、落車嘅，但係我哋需要有啲措施保障乘客嘅。

主席：（經傳譯員）即係嗰面唔可以有一個圍欄咁樣圍住嘅，即係話我哋係咪應該嗰啲圍欄中間係有空隙嘅，等人可以上車、落車，係咪咁嘅意思呢？

鄺子憲先生：（經傳譯員）主席，係，我係咁嘅意思，即係話雖然我哋唔能夠有個安全圍欄係冇空隙嘅，但係有可能係建設一啲有某個角度嘅安全護欄嘅，亦都有可能安裝即係一個圓柱型嗰啲保護裝置嘅，星加坡就係佢哋有啲咁樣嘅護柱，就有幾千個巴士站都有嘅。

我要指出一般嚟講，係公路嘅設計，我哋都要保障嗰個車--即係揸車揸得唔妥當個車上嘅人嘅--失控車輛上面嘅人嘅，即係唔可以令到响嗰個失控車輛上面嘅人受到係嚴重傷害嘅，如果我哋有一個安全嘅圍欄，嗰個尾端可能會對嗰啲車輛上面嘅人造成危害嘅，呢啲護柱應該係吸收能量嘅，如果淨係一個鋼柱，一個鋼嘅護柱或者係三合土嘅護柱，當然對等候嘅巴士乘客係好嘅，因為會停到架車，唔可以向前，但係嗰個失控車輛上面嘅人就可能會係嚴重受傷。

呢個總結嚟講，我相信一定係有一啲解決嘅辦法嘅，最終嚟講，我哋都應該可以搵出一個解決嘅方案，可以係喺兩者之間，喺呢一個矛盾裏面得出一個平衡。

主席：（經傳譯員）大埔公路意外現場嗰度有道路工程，見唔見到係有呢個安全防撞欄起咗喺巴士站嗰度係保護啲乘客避免佢哋被撞到呀？

鄺子憲先生：（經傳譯員）對唔住，主席先生，你意思係咪指嗰度嘅補救工程呀？

主席：（經傳譯員）係呀，就想問下，嗰度有冇起一個安全防撞欄嚟到保護嗰啲候車乘客？

鄺子憲先生：（經傳譯員）主席先生，我明白你嘅意思，我哋有一個解決方案，所謂保護性嘅巴士站，換句話講，個巴士站就會係遠離嗰個馬路嘅，主要嘅道路就

係會有一個交通安全島隔開嗰啲巴士站嘅，呢個其實喺龍翔道嘅相反方向嗰度係有咁樣嘅設計嘅，另外屯門公路嗰個巴士轉乘站嗰度都有咁嘅設計，不過咁係用上好多嘅空間，好多地方嘅，所以最終嚟講，嗰個出發點就應該係研究一下不同巴士站嘅設計，亦都係要睇下唔同類型嘅道路所需要配設嘅唔同嘅車速，然後就係諗出不同嘅解決方案，可以包括一啲工程方案同埋非工程嘅解決方案。唔該。

黃女士：（經傳譯員）你剛才提及嗰啲護柱，你講係星加坡嘅經驗，你知唔知道係邊個負責做呢啲樹立呢啲護柱呢，就政府定抑或巴士呢？

鄺子憲先生：（經傳譯員）喺星加坡，就係陸上交通當局，我研究過佢哋部分嘅設計，佢哋講過就喺1998年佢哋曾經發生嚴重交通意外，係有車輛係剷上行人路嘅巴士站，之後亦都有類似嘅意外，之後佢哋就開始引入呢一類嘅護柱。其實我好有興趣，我好想得到進一步嘅資料嘅，希望佢哋可以話畀我哋聽究竟嗰個護柱嗰個設計係點樣樣嘅。

另一方面，喺奧大利亞，佢哋有一啲吸收能量嘅護柱，個設計就係要可以造到行緊時速60公里嘅車輛撞埋去都可以停到嗰部車，當然就唔係一啲重型車或者係巴士，係一啲普通嘅客車嘅，我哋就希望車上嘅乘客或者司機亦都唔會因而係受到嚴重傷害。呢個產品都相當獨特嘅，我係做緊一啲搜查嘅工作嘅，之前就只係見市場上只係有呢一個產品嘅。

我亦都係想指出喺新南威爾斯大學佢哋其中一位教授亦都係有同樣嘅意見，佢就覺得應該係做多啲研究，去睇下係咪可以喺巴士站嗰度用多啲呢啲護柱，同埋喺市區嗰度如果我哋無法係有一個連續不斷嘅防撞欄嘅時候，係咪可以用下呢啲護柱呢？因為啲人要係行出去個馬路嗰度。

我就仲未係同呢一位教授討論過，不過我相信佢同我嘅意見係相同嘅，佢亦都認為應該係朝住呢個方向去做研究。

黃女士：（經傳譯員）鄺先生，你呢一份陳述書寫嘅時候就係回應係2016年6月係關乎九巴嘅諮詢文件，之後立法會曾經進行過一個討論嘅，我想請你睇番立法會嘅文件嘅，第一份就係喺2016年嘅6月17號，你可以睇SEC嗰個文件夾嘅784頁，呢個就係關乎九巴巴士網絡專營權嘅一個更新咗嘅背景資料嘅，或者我講一講，就呢份文件就有關嗰個專營權係提供一啲背景資料嘅，佢嗰度亦都係總結咗立法會議員喺過往討論嘅時候所提出嘅關注。

我想請你睇第12段，嗰個標題就係話提升巴士服務嘅水準，呢度佢哋係提及係「第五屆嘅立法會嘅會期，嗰陣時議員就關注專營巴士服務嘅表現，喺佢哋嘅委員會嘅會議，特別財委會嘅會議同埋立法會嘅大會嘅會議都有提及嘅，佢哋促請政府就係借呢一個專營權續期嘅機會去要求巴士公司改善佢哋嘅服務嘅，包括就係向乘客提供巴士服務資訊，係實時咁提供，亦都就係有一啲優先座，以及呢個無障礙嘅設施，亦都唔好有咁多脫班，以及係嗰個繁忙時間更頻密嘅巴士服務嘅。」

講到嗰個實時巴士服務嘅資訊，我諗係仲未有嘅，不過我想問下，究竟呢個係乜嘢嘅概念呢？

鄺子憲先生：（經傳譯員）主席，我相信係指下一架到站車輛嘅資訊係顯示出嚟，即係話仲有幾多分鐘下一班車就會嚟到或者再下一班車係幾多分鐘之後嚟到，呢個亦都係涉及使用知能手機嚟到去獲取呢一個係下一班車到站嘅時間，我諗個概念就係咁喇。

主席：（經傳譯員）有兩個方法嘅，一個就係一個係喺巴士站或者總站嗰度有個顯示板，另一個就係喺你嗰個智能電話手機嗰度係靠呢個 app 嚟到去攞嗰個資料嘅，呢個已經幾年前已經陸續咁樣推出，係咪呀？

鄺子憲先生：（經傳譯員）我諗係嘅。

主席：（經傳譯員）九巴做嘅，係咪呀？

鄺子憲先生：（經傳譯員）主席先生，係，不過其他公司都有。

黃女士：（經傳譯員）我哋落去第 17 段，嗰度就話「此外，就係喺嗰三個專營權嗰度有加咗個額外嘅條款，係城巴、大嶼山巴士同埋新巴嘅，就喺 2013 年中開始嘅，就係授權畀運輸署就要求巴士公司去加強佢哋嘅安全設施同埋設計嘅。」係包括一啲要求嘅，睇唔睇到呢？

主席：（經傳譯員）唔該，不如你將個例子讀出嚟。

黃女士：（經傳譯員）我諗佢哋講就係下面嗰句所講，買新巴士嘅時候係要有無障礙嘅設施同埋就係長者友善嘅設計，喺最屘嗰句就係話政府係會係喺其他嗰三家巴士公司嘅專營權嗰度亦都要求係無障礙設施嘅，鄺先生，縱使喺呢個專營權嗰度有一個咁嘅條款，都係唔見就係喺嗰個黑盒嘅設計或者黑盒嘅要求嗰方面有改善嘅，...

主席：（經傳譯員）你未落去嗰度之前，講到話冇障礙嘅車門等等其實唔係一個安全--同安全無關嘅，係咪呢？

鄺子憲先生：（經傳譯員）主席先生，呢個無障礙嘅設施，呢個係方便，亦都係安全，車上任何嘅嘢都可以係一個不安全嘅物件嘅，所以我希望佢哋會清楚咁樣係講出其他嘅安全設施嘅。

主席：（經傳譯員）我想問，你話無障礙嘅上落車門係同安全有咩嘢關係呢？

鄺子憲先生：（經傳譯員）我會咁樣睇嘅，譬如有啲人係需要個門口闊啲先上落到車，如果係無障礙嘅設施，就換句話講，就係喺門口嗰度唔會中間有個扶手處，就讓佢個門口夠闊係讓輪椅或者係其他人士佢有特別需要，佢就有個闊啲嘅門口係上車，所以呢度就唔係話好清楚咁講到出嚟嘅，不過我諗假設佢哋一個就係方便乘客，另一個就係安全起見嘅。我就希望佢哋就係有一個比較專門針對安全方面嘅要求，不過呢度就冇寫到。

黃女士：（經傳譯員）我想請你睇另一份文件，嗰度就係講及究竟係要求喺新嘅專營權嗰度加啲乜嘢嘅條款，呢個關乎九巴嘅，...

主席：（經傳譯員）或者未落去之前，我就想睇番呢份文件嘅第 10 段，嗰度就提及喺 1 月份，2016 年 1 月 15 號曾經係進行討論，呢個係討論巴士公司巴士網絡嘅專營權，睇到嘛？廣生，睇到嘛？

鄺子憲先生：（經傳譯員）係，睇到嘅，主席先生，我而家睇緊。

主席：（經傳譯員）黃大律師，我哋有冇嗰次會議嘅會議紀錄呢？

黃女士：（經傳譯員）我哋只係有一封信，就係嚟自係運房局，就講及 1 月 15 號會議嘅跟進事項，但係我哋冇嗰次會議紀錄。

主席：（經傳譯員）我諗 8 月 26 號係有嗰份會議紀錄，就講及 1 月 15 號嘅事宜嘅。

黃女士：（經傳譯員）或者睇番 SEC-2，990 頁，呢份文件係嚟自運房局嘅，2016 年 3 月 9 號，寫畀立法會，就係講及就係 2016 年 1 月 15 號係討論咗咩嘢事情。

主席：（經傳譯員）我而家手頭上有一份會議紀錄嘅，可唔可以係將佢交畀你呢？有人話畀我聽呢個可以响嗰個螢幕度將嗰個文本顯示出嚟嘅。

黃女士：（經傳譯員）應該係 SEC-2 嗰套文件夾 960 頁，SEC-2，967。

主席：（經傳譯員）係呀，呢個就係我頭先講緊嗰份。

黃女士：（經傳譯員）呢個係 1 月 15 號開會嘅紀錄，佢裏面嘅第 5 頁，大家可以揭去呢一份會議紀錄嘅第 5 頁。

主席：（經傳譯員）如果係第 13 段，你可以睇到呢個嗰個實時嘅巴士資訊系統係咩嘢用途嘅，呢個係一個服務提供嘅一個設施嚟嘅，即係可以等乘客知道究竟要等幾耐先至有一架巴士會到，呢個似乎係背後佢哋點解有咁嘅動機要做呢個實時嘅巴士資訊系統嘅，鄺先生，你可以睇一睇呢度。

鄺子憲先生：（經傳譯員）係，主席，我睇咗喇，你係咪想我係畀個意見呢？

主席：（經傳譯員）係嘅。

鄺子憲先生：（經傳譯員）對我嚟講，呢個下一班車幾時到嘅實時嘅資訊都係可取嘅，因為會減少乘客嗰個不滿、沮喪，當然亦都係一個提供良好服務嘅一個方法嚟嘅，乘客可以決定等唔等，同埋佢哋夠唔夠時間、等唔等。呢個都同安全有關嘅，不過唔係直接有關，我歡迎有咁樣嘅服務嘅，就冇再其他嘅特別嘅評論。

主席：（經傳譯員）如果知道幾時下一班會到係咪同安全有關嘅呢？

鄺子憲先生：（經傳譯員）如果個乘客知道架巴士會幾時到，我諗佢哋壓力係會低一啲，如果佢唔知道巴士幾時到，冇咁放鬆嘅，可能就有啲感到沮喪嘅感覺，可能會想儘量企近嗰個行人路嘅邊緣睇睇架巴士會唔會幾時到、望下。整體嚟講，呢個唔係直接嘅一個促進安全嘅措施，可能有好處，對於安全有好處，當然我冇任何嘅參考資料可以作為證實呢一點嘅。

主席：（經傳譯員）其中一個提供呢個資訊嘅一個後果就係話巴士公司會知道架巴士喺邊度，同埋佢去緊邊度或者幾時到，係咪都有一個成果嘅？

鄺子憲先生：（經傳譯員）呢個系統可以同一啲其他嘢一齊用嘅，即係等你可以知道巴士位置嘅系統或者係監察速度嘅系統一齊用嘅？

主席：（經傳譯員）譬如話你知道幾時到，大概幾時到，你又知道佢喺邊度，亦都會知道巴士嘅速度，係咪？

鄺子憲先生：（經傳譯員）係嘅，係嘅。

主席：（經傳譯員）呢個係一個附加嘅好處就係佢會知道呢個資料，當然係為另一啲目的而設喇？

鄺子憲先生：（經傳譯員）係嘅。好多時候，我哋應該係儘量善用有關嘅數據嚟到為唔同嘅目的運用，包括安全同埋服務水平嘅。

主席：（經傳譯員）我相信黃小姐一定會同你探討呢個多種用途嘅呢個目的，佢哋有冇實施或者有冇嘗試去實行呢？

黃女士：（經傳譯員）呢個關於呢個實時系統，我就想請大家睇睇大家要求嗰個專營權嘅協議裏面加啲咩嘢落去，政府係點樣跟進，我想請睇一睇TD-3 文件夾。

主席：（經傳譯員）我哋會睇乜嘢呀？

黃女士：（經傳譯員）呢個係一個立法會嘅文件嚟嘅，496 頁，不過我想請大家睇嘅係542，呢個係立法會嘅資料文件，係關於九巴嘅，係2017 年3 月28 號嘅，呢度有講嗰個有關嘅條文同埋新嘅嗰個專營權裏面嘅一啲新嘅要求嘅，呢個係嗰份文件嘅附件C，呢個係立法會文件，講番有關嘅協議嘅條文，係根據一個最新嘅專營權加入嘅條文，就係交咗畀立法會。

呢度係咁講，「九巴會全面實施有關嘅條文同埋個承諾嘅，响最近兩份嘅專營權，係2015 年發出嘅，即係話係城巴同埋大嶼山巴士公司嘅專營權協議，以下就係個詳細情況，第一就係巴士服務，個強調嘅地方係巴士服務，第一，話新嘅專營權會授權署長要求九巴提供促進巴士安全嘅設施同埋裝置嘅，亦都要提供一個無障礙同埋對老人友善嘅環境嘅，下面有啲措施嘅：

第(i) 係服務水準--服務質素，呢個係關於服務質素嘅問題，嗰個係無障礙同埋友善嘅設計，呢個係第一個分段。跟住就有一個係巴士站嘅一個資訊嘅系統。

第(ii) 個部分就係加強安全嘅，包括設備、設施、裝置，可以減少巴士上面嘅起火嘅危險，呢個係關於防火嘅。

第(iii) 就係容許嗰啲可以摺疊嘅單車上車嘅，即係話呢啲單車就唔會造成對其他乘客嘅危害，可以上車。

第(iv) 就係有個座位嘅，即係話巴士站要提供一啲座位嘅。」

下一段，關於提供畀乘客嘅資訊嘅。

「呢個新嘅專營權就會係增加署長所享有嘅規管嘅權力嚟到指定九巴為乘客提供嘅資訊同埋佢個形式，以確保乘客得到適當嘅服務嘅資訊，透過一啲更加好嘅方法得到呢啲資訊。

第(ii) 就係提供一個實時嘅巴士到站資訊嘅，透過綱站同埋嗰個智能電話嘅應用程式，亦都會喺巴士站係分期裝一啲指示嘅屏幕嘅。呢個服務係關於提供資訊畀乘客。

講緊資訊，署長都係得到加強嘅規管嘅權力，即係話講明、指明乜嘢資訊要提供畀乘客，從嗰個協議方面，呢個唔係關於安全嘅，而係嗰個提供服務嘅時候，要向乘客提供資訊。」

下一個題目就係加強政府嘅規管：

「第一，係要公布佢哋嘅服務承諾同埋回應投訴嘅合理嘅時間，同埋嗰個係要承諾嘅達到嘅成功率。

亦都有加強規管九巴嘅財務同埋會計安排。

第三項，就係要公開投標，即係九巴响採購啲重要嘅物料嘅時候係要公開投標。

最後一個係個環境表現方面嘅改善、空氣質素、低排放巴士等等。」

喺呢啲新嘅協議嘅條文--冇任何條文係關於加強或者係黑盒嘅能力，呢啲條文都唔涉及呢個巴士黑盒嘅性能嘅，你同唔同意呀？

鄺子憲先生：（經傳譯員）我同意嘅。

主席：（經傳譯員）有提過安全係關於防火嘅？

鄺子憲先生：（經傳譯員）主席，冇錯，即係話會唔會引起火災嘅危害，新嘅協議就係容許署長可以要求九巴提供設施裝置一啲嘢，嚟到改善巴士安全，不過呢個條文就冇解釋呢啲咁嘅設施究竟係啲咩嘢設施。

主席：（經傳譯員）佢有提述防火或者火災嘅，係咪要將個引擎隔離、停閉嘅嗰個，係咪呀？頭先話城巴嗰度，因為之前引擎起過火嘅，呢個係咪為咗防止嗰個引

擎起火帶嚟嘅火災呀？

鄺子憲先生：（經傳譯員）我冇研究過呢個課題，可能係咁樣嘅，我嘅理解，我詮釋呢度，我哋講緊巴士上面嘅火災亦都要考慮疏散乘客嘅快慢、速度，當然有其他嘅火災嘅成因嘅，不過又可能比較冇咁大嘅可能性，譬如話巴士同另一個載運易燃物品嘅車輛相撞，咁起火，所以火災嘅危害可以係一個好多--涉及好多嘢嘅，亦都係另一個專門嘅課題嚟嘅，呢個係一個潛在嘅安全嘅隱患嚟嘅。

黃女士：（經傳譯員）鄺先生，我而家可能就唔係咁順序，因為我係請你睇番政府向九巴建議嘅專營權嘅條文或者要求佢加入嘅條文，我想你睇一睇呢個文件，就係究竟政府點樣回應公眾嘅關注，同埋係咪响條文裏面反映到佢哋嘅做法，我想你睇 SEC-2，799 頁，呢個文件係畀立法會嘅，係講緊九巴嘅新專營權，日期係 2016 年 6 月，799 頁，第一頁嘅第一段就講及文件嘅目的，政府就邀請公眾人士就九巴巴士網絡新專營權嘅要求提供意見，呢份文件就係向議員報告係接收咗啲乜嘢意見嘅。

第 4 段嗰度就話一共係收到一百三十五份嘅陳述書，呢個就喺公眾諮詢期裏面收到嘅，其中二十七份嚟自區議會不同嘅政團以及係立法會，係 799 頁嘅第 4 段，對唔住。

主席：（經傳譯員）791？

黃女士：（經傳譯員）799。

主席：（經傳譯員）799？

黃女士：（經傳譯員）係，799 頁，第 4 段。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）一共係喺公眾諮詢期收到一百三十五份嘅陳述書，其中二十七份係嚟自區議會不同嘅政黨、立法會，以及係區議會嘅個別嘅成員，以及係不同嘅團體，餘下嘅一百零八份嘅陳述書係嚟自公眾嘅人士嘅，下面就分咗五大類，就係話收到啲咩嘢意見，亦都係喺附件嗰度就係羅列咗出嚟。

802 頁就係個附件，我就想請你去睇一睇嘅，喺跟住嗰版，喺第 4 段，嗰度有一項就係叫做「巴士安全」，嗰度有兩個建議嘅，一個就係話要監察巴士車長嘅駕駛行為，要更加緊密咁去監察；第二，就係話要提升巴士車長嘅安全嘅設施，譬如話喺呢個係落車門嗰度係有一條橫杆，同埋巴士車身應該更加堅固。

呢度就係睇嚟，喺專營權協議嘅文件裏面，呢兩項都冇反映到出嚟，我哋剛剛提過㗎嘛。

鄺子憲先生：（經傳譯員）主席先生，呢個 4 段，係呀，我當時都有睇過，我認為呢兩點係太過空泛，亦都反映唔到我哋嘅關注，我覺得我哋所表達嘅意見，我哋

嘅關注就係更為係具體嘅。

黃女士：（經傳譯員）我諗我哋睇完九巴，讓我就講番呢個城巴，講番佢哋嘅係專營權一同埋專營權二，我相信就城巴嗰方面就只係涉及佢哋嘅專營權一你哋表達咗意見，因為喺你哋所提供嘅文件裏面，我就只係搵到一份嘅意見書，2014年嘅9月16號，係咪呀？喺呢個雜項文件夾嘅775頁。

鄺子憲先生：（經傳譯員）主席先生，係嘅，呢份文件我哋就係喺14年嘅時候所呈交嘅，嗰次就係首次我哋嘗試就係向政府係提供意見，我哋希望借呢一個專營權續期嘅機會嚟到提供我哋嘅睇法。

主席：（經傳譯員）畀少少時間我搵番嗰份文件出嚟。

黃女士：（經傳譯員）775。

主席：（經傳譯員）係。

黃女士：（經傳譯員）呢個就係回應一份政府所發表嘅公眾諮詢文件嘅，我哋睇番第二段，「政府嘅諮詢文件就指出『政府喺睇下係批唔批出或者係咪為一個巴士專營續期嘅一個主要嘅考量就係究竟嗰個專營權公司係咪有能力提供一個適當而有效率嘅巴士服務。』我哋感到關注嘅就係其他嘅重要嘅因素，特別係道路安全、服務嘅質素、係咪環保以及企業責任、社會責任，都冇提到嘅。」我想問，係咪你第一次向政府進言呢？第二，你就話喺文件嗰度係道路安全同埋其他事宜都冇清楚咁樣樣係講出嘅，你係咪因此就覺得政府係唔夠重視呢啲因素呀？

鄺子憲先生：（經傳譯員）係，主席先生，啱，我哋嘅詮釋就係政府文件嘅文本，我哋就睇番佢所寫嘅文字，嗰度係冇提及係安全，所以我哋就要提出嚟，當然政府自己可以去解釋一下嘅，如果佢哋認為係適當，已經包括咗安全，我諗政府係可以解釋嘅，我哋亦都係樂意接受嘅，如果佢係咁嘅睇法。

黃女士：（經傳譯員）睇番同一頁第五段，你嗰度就講「有一點係可以理解嘅，就係巴士公司未必有足夠嘅誘因嚟到做咁多重要嘅措施嘅，正如第17款嗰度講咗，呢個可能係由於營運成本高同埋就競爭，不過就係咁樣樣係去容忍嗰啲問題繼續存在，特別係安全事宜，係不可接受嘅，喺呢一方面，政府係提供更多嘅誘因，譬如話透過資助或者係夥伴計劃嘅。」我想同你係探討一下呢段文字，你呢度好具體咁講咗，就係話巴士嘅安全事宜，你就話似乎巴士公司就冇嗰個誘因，你亦都建議或者係透過資助或者係夥伴計劃嚟到提供嗰個誘因，其實你心目中係有啲乜嘢嘢嘅建議呢？

鄺子憲先生：（經傳譯員）主席先生，喺呢度我指出安全係至為重要嘅，不可係因為財政嘅原因而作出妥協嘅，我見到巴士公司都係商業營運嚟嘅，佢哋係冇得到任何財政上嘅資助，除咗就係長者嘅乘車優惠計劃，呢個係近年推出嘅。正如我講，政府係唔應該排除呢一個可能性嘅，我未去到講話政府係應該做啲乜嘢

嘢或者應該係提供邊一類嘅資助，不過一般嚟講，我都係心目中係諗緊一啲財政上嘅資助嘅，當然我哋嘅意思就係話要探討嘅，我哋自己就未有再進一步好詳細咁去研究嘅。

主席：（經傳譯員）你心目中係有邊一啲誘因呢？如果講到安全嘅話，係邊啲誘因呢？

鄺子憲先生：（經傳譯員）主席先生，其實可能性好多嘅，譬如話我哋要理解一下有啲乜嘢係安全措施、一啲乜嘢安全嘅策略係要引入，我哋首先係要有呢一個研究，亦都係要有啲係量嗰方面嘅--對唔住，質量方面嘅數據嘅，譬如話睇番過往嘅意外嘅數字、啲人係點樣會受傷，亦都係要同巴士製造商講，就係話我哋喺香港呢度有啲乜嘢嘅安全嘅問題。巴士製造商佢哋製造巴士嘅時候都係跟一啲標準去做嘅，譬如話跟番歐洲嘅標準同埋聯合國嘅標準，但係佢哋未必知道我哋香港本地係遭遇啲咩嘢問題嘅，所以要改巴士嘅設計，我哋首先要有研究。架巴士可能因而需要成本更高，所以譬如話喺呢方面係咪就可以睇下政府係咪可以幫手係資助一下呢？我哋未必係講緊就係全面嘅資助嘅，可能政府係資助部分，或者係政府亦都作為分擔一部分，一個夥伴計劃咁。

主席：（經傳譯員）咁邊一啲嘅安全要求呢？

鄺子憲先生：（經傳譯員）主席先生，我哋要睇下譬如話巴士車頭，要研究呢，我哋講過㗎喇，巴士車頭的而且確就係符合到歐洲嘅標準或者聯合國嘅標準，或者根本係冇標準，但係我講過，其實嗰個係一個問題嘅，因此如果我哋自己希望推動就話改良車頭嗰個設計，又同巴士製造商攜手嘅話，究竟呢方面嘅成本邊個去負擔呢？因為巴士因而就會更貴，咁做研究亦都係有成本嘅，呢個就係其中一個例子。

主席：（經傳譯員）香港嘅巴士佢哋全部都係歐洲嘅巴士製造商造嘅，係咪呀？

鄺子憲先生：（經傳譯員）係呀，主席先生。

主席：（經傳譯員）我講專營巴士。

鄺子憲先生：（經傳譯員）係呀，我嘅理解就係大概係有兩大主要嘅巴士製造商，係歐洲嘅，就係喺英國為本嘅，就係亞歷山大丹尼斯。

主席：（經傳譯員）巴士嘅設計都係跟歐盟嘅標準嘅，係咪呀？

鄺子憲先生：（經傳譯員）主席先生，我嘅理解係嘅，同埋就係聯合國嘅 UNECE 嘅標準。

主席：（經傳譯員）有冇其他嘅安全誘因你又認為可以係用得到嘅，會唔會係諗下係都係政府可以資助嘅呢？

鄺子憲先生：（經傳譯員）主席先生，譬如話巴士站，巴士站我提過，目前係有資助，當然巴士公司就係靠廣告收入就可以有呢個資助，另外就係巴士內部，車

Transcript by Epiq Hong Kong, Limited

廂裏面嘅情況都可以改動嘅。暫時未諗到其他，不過最終嚟講，我哋唔想巴士公司係受到不合理嘅財政壓力，因為我哋都想佢哋係賺到錢、佢哋開心，呢個就係嗰個概念。除此之外，喺呢一刻，我冇其他嘅資料。

主席：（經傳譯員）或者有一方面亦都可以請問下你嘅，城巴嗰方面就有個咁嘅建議嘅，就係話每個座位都係有安全帶好唔好呢，佢哋就話係唔會個個都用嘅，如果要裝嘅話，就應該政府去資助嘅，你嘅睇法又點呢？

鄺子憲先生：（經傳譯員）主席先生，我唔想講及個細節，不過我有睇過城巴嘅回應，我琴日有講過，就話我哋要好科學化咁樣樣去睇每一項嘅安全嘅措施嘅，究竟係咪佢哋都係可以係解決我哋所面對嘅安全問題，安全帶的而且確係其中一項，城巴話乘客未必用--未必啱嘅--唔啱嘅，如果乘客唔用，當然唔令人滿意，我哋琴日都有討論過其他措施，譬如電子嘅穩定系統同埋其他嘅措施嘅，但係如果你要响巴士度採納有關呢啲設施或者設備，係有成本嘅。我哋要採納嘅就係特別要針對嗰啲會引起嚴重傷亡意外嘅一啲安全措施，安全帶係一個可行、可以採納嘅，因為我就唔係好清楚嗰個財務方面嘅影響係幾大，所以我就畀唔到我嘅睇法、評論，係咪應該將所有資源集中响提供安全帶呢？我會認為我哋應該要整體咁睇所有有關嘅安全措施嘅，要好小心比較唔同措施嘅好處、唔好處同埋有冇成效。

黃女士：（經傳譯員）喺呢個文件，即係 775 頁，呢度有一個標題就係道路安全至關重要嘅，你就提過一啲嗰個關於意外率嘅，第 6(c)條，你有一個咁樣嘅觀察所得，政府「似乎好快想就話呢個意外率嘅原因，即係成因，就係話『城巴大部分嘅路線都係响市區裏面嘅繁忙道路度行走嘅，就所以意外容易發生嘅，但係大部分嘅意外係溫和性質嘅，譬如話响車裏面失去平衡、受傷，或者响個樓梯度失去平衡，而唔係同其他車輛相撞造成意外嘅。』」

你話你哋「唔同意呢個咁樣嘅段落嘅，因為巴士嘅安全至關重要嘅。佢諮詢文件冇講過嗰啲巴士壞或者分析個意外嘅成因、趨勢嚟到係支持呢個講法嘅，我哋覺得一定要首先提供一啲涉及巴士死亡、嚴重意外嘅數目，同埋嗰個行人受傷嘅數目，跟住先至可以再討論一下究竟响個新嘅專營權有啲新嘅建議、可行嘅安全措施改善嘅。」

你嘅意思，我哋唔可以淨係睇一個參數，而嗰個諮詢文件應該其實係提供更加多嘅資訊或者更加多嘅數據，同埋睇下點樣計算嗰個意外率背後有啲咩嘢數據，係咪你嘅意思呢，呢個？

鄺子憲先生：（經傳譯員）係呀，主席，係。因為係諮詢文件，你睇諮詢文件太過簡單，我嘅工作方式係需要睇番歷史上數據--意外嘅數據，從中汲取教訓，亦都要睇風險，如果係重大嘅風險，譬如話巴士响懸崖度跌落去，呢啲咁嘅意外唔會經常發生嘅，不過一旦發生，個後果係會災難性嘅，所以我哋要評估風險，亦都睇歷史意外嘅數據嘅。諮詢文件就遠遠達唔到我响呢方面嘅預期。

黃女士：（經傳譯員）你有一個建議嘅，响 776 頁，關於建議嗰一個部分，你有話

「我哋建議過去嘅意外嘅數據同埋巴士營運嘅潛在安全嘅風險係要係得到核實同埋仔細研究嘅，然之後就搵啲機會响個新嘅專營權係改善嘅，政府應該係考慮下獎勵巴士公司，如果佢哋達到某啲預定嘅目標嘅，譬如話每年減少某啲種類嘅意外係百分之二十。」我想請你係闡述一下你心目中諗嘅呢個獎勵計劃係點樣㗎？

鄺子憲先生：（經傳譯員）主席，我諗我哋琴日都有討論呢個問題，呢個係好初步、粗略嘅建議，不過個概念就係我哋唔好成日話點樣罰人，亦都係要畀啲動力、鼓勵巴士公司同埋司機合作嚟到達成更高水平嘅安全，譬如話某一啲意外率嘅種類，減少某一個百分率，呢個都同嗰個 ISO30091 嘅呢個背後嘅理念一致嘅，關於道路安全嘅討論似乎社會或者政府好似都好滿意，只要嗰個巴士意外率係平穩，我就覺得唔足夠嘅，我哋要尋求持續嘅改善，呢個要符合嗰個安全系統嘅一個理念，同埋世界嘅趨勢，聯合國、世衛，我哋應該係希望達到係冇意外、冇傷亡嘅，就唔係淨係話一個平穩嘅意外率。

黃女士：（經傳譯員）呢度你或者有一個總結嘅，係 777 同埋 778 頁，你都有一個類似嘅建議嘅，即係同嗰個--講關於九巴嘅意見書都係類似嘅，呢個係關於巴士安全系統，個巴士車輛嘅安全同埋嗰個巴士站，同埋 ISO39001 標準嘅，可唔可以證實呢個係你嘅睇法？

首先 777 頁，响頂嘅，建議，呢個關於 ISO39001 標準，巴士安全，中間亦都有建議，有啲類似即係話全面嘅標準同埋司機嘅監察系統，運用現代嘅科技，包括全球定位系統同埋黑盒，呢啲咁嘅要求都應該係納入作為專營權協議嘅一部分。

另外就 778 頁，嗰個巴士車隊有啲建議，都係類似頭先我哋睇九巴嘅情況，係有啲類似嘅建議。

鄺子憲先生：（經傳譯員）你係咪委員會係想我證實呢幾點呀？主席。

黃女士：（經傳譯員）係嘅。

鄺子憲先生：（經傳譯員）呢啲建議而家都仲係有效嘅，至於話 ISO39001，琴日我講過，係比較新嘅一套標準嚟嘅。對我嚟講，我哋值得探究嘅，我嘅睇法就係話我哋唔可以堅持或者係施加某一種嘅要求，就係堅持一定要咁做，我就會建議有關嘅各方，巴士公司同埋政府探索一下係咪可能採納 ISO 呢個標準，對佢嚟講，睇睇究竟可唔可以接受、可唔可以實施，定係佢哋可唔可以提出一啲有相同嘅標準，類似或者係可以差唔多嘅標準。

我哋建議就係我哋要重視或者係小心睇一睇安全系統，要追求就係持續改善，又要循住一個嚴重意外零死亡率嘅目標進發，亦都可以睇下有冇其他嘅 ISO 標準可以同時研究，當然公司有好多符合唔同嘅認證嘅標準嘅，佢哋要遵守唔同嘅認證嘅標準。我都明白有啲企業會認為要有咁多認證嘅工作，要用好多人手，但係我哋最終都係建議採納呢個標準，因為我哋覺得响道路嘅安全係

達到好嘅成果嘅。我哋唔係想建議一啲會增加佢哋嘅工作量或者係冇乜嘢實證支持嘅一啲標準嘅。

總結嚟講 ，呢啲全部都係我哋嘅建議，但係最終是否可行，我就想請有關當局同埋有關嘅巴士公司仔細睇一睇逐項嘅建議都仔細研究睇一睇。

黃女士：（經傳譯員）我哋見到呢個就住嗰個係公開諮詢嘅回應，我而家就想你再睇SEC-2...

主席：（經傳譯員）喺未開始之前，我想你睇番 776 頁，你嘅建議，就考慮獎勵巴士公司嘅，如果佢哋係達到一啲事先定落嚟嘅目標，你跟住又講，都可以理解嘅，亦都需要獎勵嘅，唔係淨係巴士公司，都要包括埋巴士司機嘅，我哋就收到啲證供，即係話九巴、城巴，今年 3 月 1 號開始佢哋同工會有啲協議嘅，佢哋嘅獎金係會係包括達到--即係佢哋响安全方面得到嘅獎金就會係納入嗰個基本薪金嗰度，即係獎金就變咗做底薪，如果係咁樣，即係話巴士再冇就住安全得到獎勵，你喺呢方面有咩嘢意見呀？

鄺子憲先生：（經傳譯員）我諗我冇辦法評論呢個問題，講到底，呢個係一個好明確嘅一種--究竟係獎勵吖，獎金吖，定係一種懲罰呢？我哋希望車長自願好樂意咁樣接納佢哋有一個責任係用安全嘅方法駕駛嘅，亦都係符合我哋主張嘅安全嘅標準，呢個問題就呢個係比較複雜，就係同究竟點樣係畀一啲獎勵佢哋係比較係更加複雜嘅，我就會話應該要有一啲研究，睇下我哋可唔可以取得我哋想要成果嘅。

主席：（經傳譯員）據我理解，應該係提供一啲誘因畀巴士公司，你都建議應該獎勵到車長嘅，而家嗰個獎金冇咗，究竟係好事吖，定係唔好事呢？呢個好簡單嘅問題啫，係咪呀？

鄺子憲先生：（經傳譯員）主席，呢個第一次我知道有件咁嘅事，等我諗一諗。

主席：（經傳譯員）我即係建議下或者上晝我哋都小休一陣。返嚟，二十分鐘之後，得唔得呢？可唔可以話畀我聽究竟係好事定唔好事呢，即係取消咗呢個獎金，即係安全駕駛嘅獎金？我哋停一停，我哋有二十分鐘。

上午 11 時 29 分押聆訊押後

上午 11 時 49 分恢復聆訊

出席人士如前。

主席：（經傳譯員）鄺先生，即係提供獎勵畀巴士司機，咁樣做係咪好定唔好呀？

鄺子憲先生：（經傳譯員）主席，我覺得就提供獎勵係好嘅諗法嚟嘅；第二，我就想指出個獎勵係應該用其他形式嘅，譬如話佢享有嘅地位，應該要令到車長嘅地位提高，因為佢哋做嘅工作、提供嘅服務係為我哋全社會每年每日咁樣付出嘅；最後一點，任何嘅獎勵計劃要小心設計，舉例，如果話淨係畀車長話過去一個月、一年冇意外就獎勵，係咪一個好嘅方法呢？冇意外可能係幸運，可能只係運氣啫，或者有意外都唔係一定佢錯嘅，可能係其他人錯。所以獎勵係咪應該基於大部分時間揸車嘅時候係符合公司嘅安全嘅要求--安全水準達到公司要求呀，呢個就係一個可能考慮嘅方向。

主席：（經傳譯員）黃小姐，我哋可唔可以睇到呢個所謂綠色嘅道路呢個咁樣嘅項目嘅資料呀？

黃女士：（經傳譯員）係，我哋可以响螢幕顯示出嚟嘅。鄺先生，呢個係一個《海峽時報》嘅一篇文章嚟嘅，我哋就而家抽出嚟畀大家睇，你睇一睇，呢個係追蹤器，協助巴士車長改善服務，呢個係星加坡嘅一個系統嚟嘅，我哋就下載咗，呢個係一個車長就係話顯示究竟佢嘅駕駛係點樣可以追蹤，而且係响個智能電話度係收集嘅系統嘅。如果佢有一個會閃紅色、黃色、綠色嘅一個顯示屏，就視乎佢嗰個駕駛嘅行為嘅模式係點樣樣，呢個系統就係你可以用一個應用程式，就知道佢嘅駕駛行為，你可以知道某一個車長嘅駕駛行為，呢個係一個基於嗰個黑盒得到嘅數據，亦都可以進行數據嘅分析嘅。

睇番個呢篇報道本身，英澳嘅一個巴士營運商，叫做 Tower Transit，佢係話有一啲係會容易有一個問題嘅，譬如話嗰個車站會--同埋個車座位邊會蹦落嚟，就係佢個安全嘅績分就係上年 10 月就 165，就係話多過呢個建議嘅 20 嘅八倍嘅，即係話佢哋可以用智能電話嚟到追蹤呢個駕駛行為嘅。

主席：（經傳譯員）呢個係一個好好嘅參考資料嚟嘅。點樣做呢，當然係要進一步睇一睇，呢個系統就係話應該係想鼓勵車長，等佢哋覺得佢哋係專業人士，係一個好嘅專業人士，如果佢哋駕駛嘅行為好，佢係會受到尊重，亦都係有一個响專業上得到回報嘅，我對呢個好正面嘅，我就覺得我哋應該再進一步仔細點樣探索一下。

黃女士：（經傳譯員）為紀錄起見，我哋睇一睇中間呢個 Tower Transit 公司係有一個綠色道路嘅電子數據系統嘅，就令到佢哋司機揸車比較順暢、更安全嘅，响舊年 7 月到今年 5 月，佢哋就會可以利用系統嚟到實時透過全球定位系統同埋個探測器嚟到係追蹤個車輛嘅駕駛嘅情況嘅，就跟住就改善嗰個安全嘅得分嘅，我就想你睇睇呢度，等你知道，嗰間公司有請咗七百五十個車長嘅，呢個為我哋保存紀錄起見，我就提一提。

我哋係睇番你嗰個關於城巴嘅意見書，雜項 2 嘅文件夾 779 頁，我哋睇過㗎喇，不過我想你睇一睇呢個之前嘅意見書，就係為提供乘客嘅資訊呢一個段落，你關於城巴嗰度，你話「如果係好多大部分嘅乘客知道個時間表，佢哋就

已經滿意。」但係下一段，「雖然有咁樣嘅進步，响巴士站，唔係經常都提供資訊畀乘客嘅，應該係佢哋要承諾就發展一個比較現代嘅綜合系統，而家冇一個現代嘅實時嘅資訊系統，特別係主要嘅巴士設施方面嘅資訊系統，係不符香港作為國際城市大家嘅期望嘅。」你就覺得「政府應該同嗰個有關嘅營運商係商討一下可唔可以有一啲係試驗計劃，發展一個現代嘅巴士乘客資訊系統。」呢個就係關於你係倡議有一個實時嘅資訊系統，呢個當時係關於城巴，當時佢哋冇全面實施。

自從你交咗呢個陳述書之後，我哋睇一睇政府嘅取態係點樣樣，對於公眾嘅意見，佢响呢方面有咩嘢取態，我想你睇 SEC-2 呢個文件夾 655 頁，SEC-2 文件夾 655 頁，呢個係一份文件嚟嘅，係公眾諮詢文件嘅，係關於新嘅專營權協議有咩嘢要求，呢份文件係 2014 年 12 月發出嘅，就係列出公共諮詢嘅結果嘅，即係呢個關於新嘅營運權嘅協議，係關於城巴第一個專營權嘅。

第 3 段，你睇到，嗰個公眾諮詢就係喺 2014 年 6 月 25 號至到 9 月 16 號期間係進行嘅，運輸署就係邀請十八個區議會以及就係十八個區議會嘅交運會係提供意見，其中五個區議會就係有喺佢哋會上討論過嘅。

去番第 4 段，嗰度就話總共係有四十七份意見書就喺公眾諮詢期間係收到，十八份係嚟自政黨，其他就係嚟自個別人士，佢哋就係三方面表達意見：服務質素、票價優惠同埋政府嘅規管。另外喺附件嗰度就係列出嗰個主要嘅意見嘅。

我哋睇番呢個 657 頁第 3 段，嗰度就講及巴士嘅安全，其中一個建議就係話要引入一啲監察嘅機制嚟到加強就係監察巴士車長嘅駕駛態度，呢一個就係改善車上嘅安全設施，另外就係話要改善嗰個管理，特別係安全裝置嘅管理，嗰個就係公眾諮詢嘅結果。

又睇番嗰次會議嘅會議紀錄，SEC 嗰個文件夾--對唔住，未去之前，其實有另一份嘅立法會嘅文件嘅，喺第 700 頁嗰度，呢份文件亦都係一個背景摘要，總結咗過往嘅睇法同埋關注地方，或者你可以睇番一個 703 頁嘅第 16 同埋 17 段，個標題就係話巴士嘅駕駛安全，呢個就係新大嶼山巴士公司。

喺第 15 段嗰度，可以先睇一睇嗰度，就話喺立法會會議一位議員提問，當時係 2015 年 4 月 29 號，關乎就新大嶼山巴士公司嘅巴士駕駛安全，係因為 2015 年 4 月初曾經發生咗意外，所以就係提問嘅，嗰個就係附註嗰度就係有講嘅，就係話有一部係新大嶼山巴士公司嘅巴士喺東涌去大澳途中差唔多係跌落山嘅，當時就落緊斜，就係懷疑就係剎掣系統就係失靈嘅。當時運房局局長就話所有係新大嶼山嘅新招聘嘅車長都會係接受三至五天嘅培訓，呢個係新大嶼山巴士公司提供畀佢哋嘅。

跟住嗰段就係運房局嘅局長就指出話新大嶼山巴士公司已經係安裝咗一個電子行車記錄儀，呢個係俗稱叫做「黑盒」，係整個車隊都已經裝置咗，嚟到去記錄低車輛營運嘅數據，以助係佢哋監察車長嘅行為同埋係調查意外。

Transcript by Epiq Hong Kong, Limited

好，呢份文件亦都有提及呢個黑盒嘅，提及呢個要求，相信你剛才睇到呢個局長嘅回應，或者我哋睇番個會議紀錄，呢個就係2015年嘅7月17號嘅，SEC-2嘅937頁，呢個係會議紀錄，就係7月17號2015年開會嘅紀錄嘅，我哋去番呢個943頁，你由第11段嗰度開始睇，一路去到第16段。

個焦點就係在於提供實時巴士到站嘅資訊，個重點喺呢度，就唔係話巴士安全或者其他事宜嘅，呢度就係講公眾提嘅意見就係頭先所講嘅結果呢方面嘅，睇到未呢？或者你可以用一啲時間去閱讀一下嘅。

鄺子憲先生：Okay。

黃女士：（經傳譯員）你可唔可以確認一下呢個都係關乎就係提供一個實時嘅資訊，就為乘客提供呢啲資訊，就唔係話監察就係巴士車長嘅表現，雖然公眾人士嘅一個意見就係關乎嗰方面嘅？

主席：（經傳譯員）我而家喺螢光幕上面睇緊。

黃女士：（經傳譯員）請問你睇完未呢？

鄺子憲先生：（經傳譯員）係，睇完，唔該。

黃女士：（經傳譯員）可唔可以確認我剛才所講嘅，即係話佢哋呢度講嘅全部都係關乎就提供實時嘅資訊，就冇講及就係巴士安全或者係巴士車長嘅駕駛表現。

鄺子憲先生：（經傳譯員）主席先生，係，我剛才所睇嘅呢啲文字大部分都係關乎呢個實時嘅資訊系統。

黃女士：（經傳譯員）係。

主席：（經傳譯員）呢個就係同監察司機嘅行為表現就無關嘅？

鄺子憲先生：（經傳譯員）冇嘅，我睇唔到。

黃女士：（經傳譯員）最後，或者我哋可以睇番呢一份立法會嘅文件，嗰度就係列出新嘅專營權嘅條款，呢個係城巴嘅，就係TD-3，570頁，呢份係立法會嘅摘要，裏面講及係新嘅專營權條款，係城巴同埋新大嶼山巴士公司嘅，我哋可以去572頁，...

主席：（經傳譯員）想問下呢份文件係幾多號嘅呢，邊日嘅呢？

黃女士：（經傳譯員）2015年嘅9月22號。

主席：（經傳譯員）好，唔該。

黃女士：（經傳譯員）唔該你。或者我哋去呢個572頁，第5段，首先呢度就講及呢個城巴嘅表現，跟住嗰版就講及係新大嶼山巴士公司。

喺574頁就講及係公眾對巴士服務嘅睇法，下面第8段，嗰度就係講喺新

嘅專營權嘅條件同埋係佢嘅承諾，呢個 574 頁嘅第 8 段，首先，呢度就係話將新近批出嘅專營權嘅專營權條款同埋承諾係加入去，呢度係政府就係得到城巴同埋大嶼山巴士公司就全部係接納，就係話將最新近批出嘅專營權嘅條款係加入嘅。

喺第 9 段，跟住嗰段，嗰度就講及新嘅專營權條款同埋嗰個承諾嘅，嗰度總共有三項嘅，首先就係提供實時巴士到站資訊，第二，就係提供票價優惠，第三，就係提升巴士服務嘅規管。

喺第 10 段，就講及係提供實時巴士到站嘅資訊，不過嗰度完全係冇提及巴士安全嘅，呢個講緊第 10 段，請你花啲時間去睇一睇。

鄺子憲先生：（經傳譯員）係，主席先生，係呀，我睇唔到有任何地方係提及巴士安全嘅。

黃女士：（經傳譯員）第三個要求就係要求就係提升巴士服務嘅規管嘅。第 15 段，577 頁，再次，呢度冇任何地方提及巴士嘅安全又或者去監察係駕駛嘅表現。

鄺子憲先生：（經傳譯員）係，主席，啱嘅，講得啱嘅呢度。

黃女士：（經傳譯員）鄺先生，呢個我要想請你討論嘅最後一個課題，2014 年 12 月 12 號嘅，喺雜項文件 2 嘅 780 頁，780，呢度係一封信，係你寫畀局長嘅，運輸及房屋局局長，你就提出你嘅睇法，就話關乎呢個係公共交通策略研究嘅研究範圍，係 780 頁，喺底下嗰度，你就話，首先你就講及嗰個安全嘅表現同埋公共交通嘅風險，你就話根據係已發表嘅意外統計數字係有咩嘢睇法。

跟住你呢度就話呢一個公共交通策略研究應該就係再展示所有嘅機會重新檢視嚟到去係提升安全同埋服務嘅質素，有啲例子就話黑盒同埋係全球定位系統、司機監察系統，你就話應該就係有系統咁樣樣去監察一啲駕駛嘅參數，譬如話就係車速、加速、剎車，嚟到係去減低各類意外嘅風險，呢啲咁樣嘅系統應該係用一啲新嘅規矩，譬如話限速，高速公路嘅限速、市區裏面街道裏面嘅限速，同埋應該係溫和咁樣加速、減速嘅一啲數值等等。

你就倡議，即係有一系列嘅倡議，你要求改善嗰個係利用黑盒同埋全球定位系統實施嘅監察系統呀？

鄺子憲先生：（經傳譯員）係，呢個同我哋一路建議都係一致嘅，响好多文件、我哋提交畀政府嘅意見書我哋都係有咁講。

黃女士：（經傳譯員）係，多謝你。主席，我已經完成咗我提出嘅詢問，睇一睇我有冇咩嘢其他嘢可以協助委員會。

主席：（經傳譯員）有一個城巴交畀我哋嘅信件嘅，我哋要求佢哋確定關於呢個協議裏面佢哋一啲承諾嘅，你可唔可以响個螢幕係顯示畀我哋睇呀？

黃女士：（經傳譯員）我相信係 CTB-3，即係第 3 個文件夾，CTB-3 號，即係城巴

3號。

主席：Thank you.

黃女士：（經傳譯員）582到585頁。

主席：（經傳譯員）係呀，我就心目中就係想睇呢封信。

黃女士：（經傳譯員）呢個係一封信嚟嘅，係由運輸署寄畀城巴嘅，呢個就係話係咪叫佢哋確定係咪承諾提供實時嘅巴士到站系統嘅呢個承諾嘅，583頁可以見到。

鄺子憲先生：（經傳譯員）係，我睇到。

黃女士：（經傳譯員）呢封信亦都完全冇提述話監察車長嘅駕駛態度或者係改善嗰個黑盒科技或者係利用全球定位系統嚟到係監察車長嘅駕駛嘅表現，即係冇任何嘢關於你八個月之前提出嘅建議嘅。

鄺子憲先生：（經傳譯員）主席，譬如話(b)(1)呢一段，佢用嘅用字，增進安全嘅一啲特別嘅設施...

主席：（經傳譯員）係邊一段話？

鄺子憲先生：（經傳譯員）(b)(1)，你响呢度讀嘅，而家响個螢幕上第一段。

主席：（經傳譯員）係第7條？

鄺子憲先生：（經傳譯員）係，第7個條文，新嘅專營權協議第7條條文嘅第(1)點，嗰度有講過安全--或者係增加安全嘅一個設施嘅，...

主席：（經傳譯員）呢個係話佢响附件2就列出嚟嘅，有冇附件2可以睇到呀？

黃女士：（經傳譯員）唔响呢個文件夾嘅，但係我哋可以參照之前一啲文件嘅，係响TD-3文件夾裏面第614頁，TD-3，614頁，呢個係第7條嘅條文，提供有關嘅設施嘅。

主席：（經傳譯員）我哋有冇附件3？

黃女士：（經傳譯員）唔响呢個文件夾，即係話冇提供到附件2同附件3畀我哋，淨係得嗰封信，同埋586就係城巴有啲承諾嗰封信，但係我哋可以參照另一份文件，响嗰個運輸署嘅文件夾裏面，我哋係可以睇到有關嗰個條文嘅，如果你參照番TD-3嘅614頁，我哋就可以睇到㗎喇，同埋652頁一齊睇。第7條係關於提供設施等。

652頁係第7條，佢有一個新嘅分段(1)，就係授權署長可以要求個營運商係可以加裝一啲新嘅設施、設備，嚟到係改善安全同服務，包括提供無障礙設施，即係為老人家同埋傷殘人士提供無障礙設施，呢個就係個583頁裏面所

提述嘅有關嘅條文。

基於我哋所見到，鄺生，呢個係同嗰個監察嗰個駕駛表現、行為無關嘅呵？

鄺子憲先生：（經傳譯員）主席，我想講呢啲咁嘅條文唔夠準確嘅，即係唔係完全咁樣係回應番--或者係同我哋嘅期望係唔一致嘅，我哋覺得一般嚟講咁樣嘅公眾嘅諮詢就係好多意見書嘅，我哋只係其中嘅一份。

主席：（經傳譯員）有冇另一封類似嘅信件，係九巴發出嘅呢？我哋可以睇一睇佢有咩嘢承諾，嗰份文件--因為專營權協議就唔係公眾可以睇到嘅文件，呢個係巴士公司同當局之間嘅一份協議。係，而家响嗰個投影嗰度見到，下面可唔可以睇一睇「改善安全設施」，羅馬數字第(iii)點，呢度咁講，係咪响九巴第 9 份？

黃女士：（經傳譯員）呢個係運輸署寫畀九巴嘅，2017 年 3 月 10 號，關於呢個文件，我哋見到九巴就係响呢個加強安全設施方面，佢係指明响羅馬數字第(iii)點，電子數據處理嘅裝置同埋嗰個限速器等等。所以呢個所謂電子數據處理嘅裝置其實即係黑盒，佢哋係會裝置呢樣嘢，就冇講究竟個裝置裏面會係收集啲乜嘢嘅數據嚟到係監察車長嘅駕駛表現嘅。

鄺子憲先生：（經傳譯員）主席，講得啱嘅，呢度文件所講嘅裝置，當然我係想有嘅，我都覺得好嘅，...

主席：（經傳譯員）不過係咩嘢都得嘅，因為佢冇講清楚呢啲嘅加強嘅安全嘅設備其實係咩嘢嚟。

鄺子憲先生：（經傳譯員）呢樣樣樣嘢都係關於安全嘅，不過有啲重要啲，有啲比其他重要嘅，我恐怕我哋比較重大嘅關注係得唔到回應嘅。

主席：（經傳譯員）你要求係實時自動嘅監察車長駕駛表現嘅一個系統，呢度所講佢係一個加強嘅安全嘅設備，呢個公司所講嘅，巴士公司，就係一個電子數據嘅處理嘅裝置，就冇講任何嘅裏面所講嘅配置或者係標準嘅。

鄺子憲先生：（經傳譯員）係嘅，佢就唔係回應話「我哋有一個監察系統，同埋亦都要發展一啲安全駕駛嘅準則嘅。」佢冇講呢樣。

黃女士：（經傳譯員）主席，係。

主席：（經傳譯員）你已經完成咗你嘅提問？

黃女士：（經傳譯員）係，我已經問完。

歐陽先生：（經傳譯員）多謝你，主席，多謝你，鄺生，多謝你琴日同今朝嚟到提供意見畀我哋。我有兩個問題，睇一睇你有咩嘢睇法，第一，香港有唔同類嘅道路，你可以諗到，响新界揸車同响九龍或者係港島揸車係唔同嘅，所以我問你

嘅問題，你支唔支持進一步或者係比較一啲清楚嘅準則去決定使用乜嘢嘅巴士，响唔同嘅道路嘅狀況應該使用唔同嘅巴士係咪應該有啲明確嘅規定？

鄺子憲先生：（經傳譯員）多謝你歐陽先生嘅問題。唔同道路會帶嚟嘅安全嘅問題係唔同嘅，對於揸巴士，而家都已經有考慮究竟使用邊一個種類巴士嘅準則㗎喇，譬如話個尺寸大細同埋佢哋嗰個設備有啲唔同嘅，即係唔同嘅道路可能有啲唔同嘅。

新嘅巴士，我試過，我理解响香港島嘅道路行駛嘅新巴士，譬如話有機會會撞到樹嘅，造成損毀或者係有人受傷，佢哋就有一個好似樹木嘅防護圍欄，即係一條橫杆，响某一啲路度，高速公路，佢哋會用一啲大一啲嘅巴士，一百四十八個乘客嗰啲大巴士。你嘅問題就係話呢個係一個方向或者應該係進一步仔細研究嘅，唔係淨係睇使用邊一種嘅巴士，即係唔係淨係講大細或者係乘客量或者係長度，我哋都要睇一睇其他啲仔細啲嘅嘢嘅。

我亦都有提過，頭尾碰撞都係我哋十分關注嘅，特別喺高速公路上面係頭尾相撞，因為上層前排嘅乘客就係只係有安全帶，都唔能夠係保障到佢哋嘅，譬如話巴士同一部貨櫃車相撞，呢啲乘客都係保障唔到嘅。所以睇嚟，我哋應該要更加慎密咁去考慮，究竟應該喺某一啲路段、某一啲路線派邊啲巴士去行駛，呢個當然就係要配合番我哋所搵到出嚟嘅潛在風險，無論就係理論上嘅一啲潛在風險定抑或係過往已經發生咗意外所鑑別出嚟嘅風險。

我唔知答唔答到你嘅問題呢？

歐陽先生：（經傳譯員）鄺先生，我就係問第二個問題，就係講及，你講過，就係比較窄嘅山路，你就提議將嗰個駕車速度係降低同埋應該係有更多嘅安全防撞欄，我想問安裝鏡頭攝影機，你覺得係咪都可以達致同樣嘅果效呢？

鄺子憲先生：（經傳譯員）你意思係咪指鏡頭攝影機...

歐陽先生：（經傳譯員）去防止司機係超速或者係甚至乎可以有證據捉到邊個人就係超速嘅。

鄺子憲先生：（經傳譯員）理論上，呢個係可以做嘅，我哋其實個目標好簡單，我哋就係想巴士司機小心駕駛，如果佢哋係駛過一啲比較關鍵嘅路段，佢哋係要特別小心，因為我哋唔可以容許有巴士係喺山坡碌落去、喺懸崖嗰度跌落去。有攝影機都係一個恰當嘅裝置，不過目前嗰個科技，我哋其實可以更有效率咁去做嘅，就我嘅回答就係咁。

歐陽先生：（經傳譯員）好，唔該。唔該你，主席先生。

羅先生：（經傳譯員）好，唔該晒鄺先生，呢兩日我哋喺你嗰度就係聽咗好多意見，設計、道路設計、各類嘅安全嘅設施，我哋就值得係繼續去鑽研嘅。我就想問，你認為有邊一、兩項嘅事情係比較容易做得到，即係好似話係嗰個證據比較清楚嘅，亦都係適合香港去做，有邊一、兩項係可以好快、儘快去做嘅呢？

鄺子憲先生：（經傳譯員）唔該晒你，羅教授。有幾樣嘢嘅，我諗我都喺呢啲文件裏面好清晰咁表達咗出嚟嘅，我諗我所見到佢即時嘅危機就係嗰啲關鍵、重要嘅路段，譬如話山頂道有啲路段，呢個係一個例子，我哋有二、三十米高嘅懸崖，但係今時今日有咁多巴士，有咁多旅遊車、校巴、小巴喺山頂嘅馬路行駛，我琴日講過，其實的而且確係需要有個安全防撞欄，但係我哋都知道呢啲馬路都係好耐歷史嘅，而我哋亦都需要係有資金，有足夠嘅投資，我諗首先係就係要提升司機嘅意識，亦都係要引入剛才所提及嘅嗰啲管控嘅措施。

第二點想提嘅，我亦都已經講過，就係將嗰個頭尾碰撞嘅風險減低，特別係喺高速公路上面，呢個亦都可以即時做到嘅，就係透過就係提升司機嘅意識，特別係搵出邊一啲司機係有咁嘅習慣，好鍾意係同前車跟車係太貼嘅，特別係如果佢哋嗰條巴士路線係行駛經過一啲高速公路同埋其他嘅鄉村路嘅。我諗呢一度亦都可以減低嗰個風險，因為我哋知道往往如果係發生交通意外嘅話 ，都會引致多人傷亡嘅。

其他嘅措施，其他嘅交通意外嘅類別，或者畀我睇一睇。

主席：（經傳譯員）唔需要急。

鄺子憲先生：（經傳譯員）係，我會慢慢睇。請大家睇一睇我嘅陳述書，雜項文件夾2，實質上係我嘅陳述書，嗰一個報告係關於巴士安全嘅，784 頁，因為呢個就係讓我想起我想提及嘅嗰宗意外，第一，就係乘客失去平衡，呢個就最常見嘅。提高司機嘅意識，呢個可以好快咁樣樣做到嘅，我哋唔能夠排除晒所有嘅風險，但係起碼都可以喺一個合理嘅範圍將佢減低嘅。

第二點就係話同行人相撞或者撞到啲行人，我都講過，就係話巴士喺市區馬路行走嘅時候將佢個車速係降低，特別係有啲司機往往係駛過呢啲地方嘅時候嗰個車速都係唔適當嘅。

最後一點，我諗你哋會特別係關注嘅，就係巴士翻側，我想指出，其實有好多不同嘅巴士翻側嘅情景嘅。或者大家可以睇番我同一份文件 796 頁，都係翻側，翻側可能係源自不同嘅原因嘅，譬如話入彎位嘅時候車速過高係其中一個成因；另外就可能喺懸崖碌落懸崖，呢個好清楚；另外亦都有其他嘅情況嘅，可能衝咗上嗰個安全防撞欄嗰個末端嗰個斜坡，其實亦都喺過往有多次巴士翻側都係因為咁樣樣而係發生嘅。

你睇番呢一個圖表，你可以睇到 2017 年 1 月 14 號，當時就係城巴喺藍田鯉魚門道就係翻側嘅，係一人死亡、十九人受傷，當時架巴士就係因為去到嗰個安全防撞欄嗰個斜嘅末端嗰度就係上咗去之後就翻側嘅。另外係 2003 年 10 月 17 號，當時就喺西九龍高速公路嘅，亦都因為呢一個安全防撞欄嗰個斜嘅尾端嗰度就係巴士喺嗰度係翻側嘅。另外就 2015 年嘅 6 月 12 號都係喺嗰個安全防撞欄嗰個斜尾端嗰度就係巴士就因而翻側，不過嗰度就係冇人受傷嘅，冇乘客嘅。

所以呢啲安全防撞欄嗰個斜嘅末端我哋要係關注，特別係喺高速公路嗰度，因為有時一架巴士可能佢會係駛得太貼嗰個路邊，咁佢剷咗上去呢個安全防撞欄嘅尾端呢度就會翻側㗎喇。

我諗呢一啲都可以係好快可以做到嘢嘅。唔該。

主席：（經傳譯員）鄺生，有冇其他嘅事宜你想講呢？請你而家講，否則嘅話，我哋就感謝你今日同埋琴日上嚟作證。

鄺子憲先生：（經傳譯員）多謝你，主席先生。實質上，呢兩日我想表達嘅都已經一一講咗，我只不過係想澄清一下我嘅意見，好讓嗰個概念更加清晰嘅。

首先，我講嘅高速公路同埋呢個市區道路網絡係咩嘢意思，同埋以中文嚟講，“highway”就係公路，“urban street network”係市區街道。我哋講到話係要嗰個時速限制係降低，大部時候我哋係講緊市區嘅街道網絡，因為我哋講緊話每小時 30 或者 40 公里咁樣樣嘅時速限制。我想係講清楚，我琴日並冇咁嘅意思話公路都係一般嚟講要降到咁低嘅車速嘅，呢啲公路都係將不同嘅市區分區係連結一齊嘅，所以嗰個期望會高啲嘅。

另外，我就想講嗰啲車速限制係要合理嘅，係要同佢哋嘅期望同埋同周圍嗰個環境係要配合嘅，呢個係一個好敏感嘅一個課題，我唔想讓人係有一個咁樣嘅印象，就話一見到有問題，我哋就立即就係將嗰個時速限制係降低嘅，嚟到係降到去低到係唔合理嘅。

主席：（經傳譯員）或者喺呢方面，你係咪都想講一講嗰個話係第 85 個百分比嗰個概念呢？

鄺子憲先生：（經傳譯員）其實我哋係交通工程嗰度關乎車速有幾個概念嘅，首先，我哋車輛嘅車速唔係一個單一個值嚟嘅，我哋睇番嗰個車速嘅情況，譬如話我哋睇咗一百輛車，我哋會睇呢一個第 85 份，呢個其實話佢嗰個車速就係 48，換句話講，有百分之八十五嘅車輛都係喺呢個數值或者以下嚟到係行駛嘅，另一方面，有百分之十五佢哋係當時個車速係高於每小時 48 公里嘅。

另外，我亦都想講呢個 85 並唔係我哋所睇嘅唯一個值嘅，而根據琴日主席你所提及嘅嗰份文件，即係話 2013 年制定車輛時速限制英國當局所發出嘅嗰份文件。喺呢份文件，佢哋提倡一個係清楚嘅速度限制嘅，係平均嘅速度，佢哋唔係話用第 85 個百分位嘅嚟到決定嗰個速度限制嘅。呢個佢哋覺得要係反映大部分合理駕駛嘅駕駛者希望有嘅速度，佢哋想用咩嘢速度嚟到係駕駛，個重要嘅地方就係話如果用 85 百分位呢個數值可能對行人未必有利，如果係用一個平均值可能更好。香港就冇乜點樣討論呢個重要嘅事項嘅，呢個會有重大影響嘅，就係點樣設立一個速度嘅限制。

主席：（經傳譯員）可唔可以畀一個參考？邊度地方會係講到話要睇平均速度--平均值㗎？

鄺子憲先生：（經傳譯員）我先攞番嗰套文件夾出嚟。

主席：（經傳譯員）可唔可以講一講你係睇緊邊個文件夾？

黃女士：（經傳譯員）我諗SEC-3，第3套文件夾，1003頁。

鄺子憲先生：（經傳譯員）主席，我想請你睇一睇1014頁第34條嘅條文。

主席：（經傳譯員）或者可唔可以請你讀番呢一段？

鄺子憲先生：（經傳譯員）佢話中位數嘅速度同埋85個百分位嘅速度係一個通常使用嚟到係量度嗰個交通速度嘅，當局應該繼續係作為常規係收集呢個數據，但係呢個中位數嘅速度應該係作為一個決定本地或者當地嘅局部嗰個速度限制嘅基礎。

主席：（經傳譯員）可唔可以讀一讀36段出嚟？

鄺子憲先生：（經傳譯員）係，好嘅，主席。36段，「大部分嘅路嚟講，就係話嗰個中位數同埋第85百位數係一個一致嘅關係嘅，但係如果當呢個唔成立嘅時候，最好就話係佢有個決定究竟係用咩嘢速度嘅，我哋覺得應該係用個道路嘅設計同埋個限速係要做一個更好嘅配對嘅，有時需要有額外嘅措施嚟到係減低嗰個差別嘅，即係話中位數同埋85個百位數嘅差別嘅，令到嗰個更加能夠係一個正常嘅分佈嘅狀況嘅，個限速應該係同嗰個道路嘅環境同埋嗰個路況係相匹配嘅。」我係咪應該繼續呢？

主席：（經傳譯員）係。

鄺子憲先生：（經傳譯員）大家見到我哋要考慮好多嘢決定嗰個速度限制嘅，要基於一個穩健嘅、合理嘅工程嘅考慮，我淨係覺得呢份文件係好好嘅參考，如果我哋想詳細嚟到係研究呢啲課題。

最後，我就係想澄清幾點嘅，第一個就係關於嗰個路上嗰個減速嗰個壆，我用中文就會叫做「減速壆」，有另一個名叫做「減速台」，個意思係減速壆係一個响個地上凸出嚟嘅一個壆，一個起出嚟。我哋亦都有啲標記嘅，呢個係一個視覺上嘅一啲標誌嚟嘅，即係話司機如果係揸得太快，唔會話好似經過減速壆咁樣感覺唔到唔舒服嘅。

我見到有時減速壆佢哋譯咗做「減速帶」，呢個係關於我琴日回答委員會嘅問題，就係話响大埔道應該有啲減速壆嘅，我就比較保守一啲喇琴日，因為我就意識到你係講緊一啲真係起咗出嚟嘅，响地下嘅，譬如話12厘米高嘅一個壆，你可以叫「減速台」或者係「減速壆」，即係英文叫做“speed hump”，不過我當然我係開放態度嘅，即係話响主要嘅公路，我哋係唔會有一個減速壆嘅作為一啲真係喺路度嘅一個實體嘅設施嚟嘅，因為如果真係揸得太快，會引起交通嘅問題。

我哋有時响啲大路度有減速壆，當然要符合一啲條件嘅，首先要分開唔同

嘅路段，即係主要嘅道路可能有唔同嘅路段，有一部分可能經過一啲村或者係主要嘅鄉村，我就唔想話咁簡單就話某個建議係唔可行，我其實係願意有開放態度考慮，不過需要進一步詳細研究。

講多兩點。捉紅燈嗰啲攝影機係咪用嚟改善香港交通嘅安全呢？响香港，市區有好多捉衝紅燈嘅攝影機嘅，佢只可以決定究竟架車係咪衝咗紅燈，不過你可以想像下如果架車經過嗰個燈號，譬如話彌敦道嘅路口有燈嘅，佢係綠燈或者係80公里嘅速度經過，呢啲攝影機係唔能夠捉到佢或者係要嚟做執法嘅，因為佢就唔係衝紅燈。

响澳洲，佢哋已經係同衝紅燈同埋捉快車係合而為一嘅，嗰個攝影機就會捉嗰啲衝紅燈或者速度太高嘅車輛都可以影到嘅，如果係同時衝紅燈又再超速，就會收到兩張告票嘅，佢哋叫做「捉衝紅燈及超速嘅鏡頭」。我知道香港呢啲攝影機嘅供應商係可以提供或者係一個攝影機可以同時做兩樣執法工作嘅，呢個如果係做到，係一個好好嘅解決方案嚟嘅，亦都可以配合我哋話減速--即係減低嗰個限速嚟到係改善香港市區環境嘅交通安全。

最後一點我想澄清嘅係關於雜項2呢個文件夾裏面嘅第808頁，係講緊呢幅圖，主席好有興趣研究呢個，因為我哋就討論嘅時候，係咪可能啲車或者係巴士响嗰個懸崖跌咗落懸崖度，尋日我話我哋已經係提出呢個問題都提咗好耐，有時係用信件，有時只係喺我哋網頁度就發布，又冇通知人，我係有向區議會提出嘅。

我相信呢個政府咁多年佢哋都有留意嘅，咁多年有一啲道路都有相類似嘅問題，有啲有高啲嘅優次，我想--即係話我係認知到政府係特別係有留意呢一啲咁樣嘅問題，特別响個關於橋嘅問題，因為自從屯門嗰個意外，...

主席：（經傳譯員）你講緊2003年，係咪呀？

鄺子憲先生：（經傳譯員）係呀，主席。係呀，呢個係一個持續嘅一個問題嚟嘅，自從嗰個時候，到我哋啲橋其實係另一種潛在會製造災難嘅問題嘅，因為佢哋嗰個--而家嗰啲路就已經有足夠嘅安全圍欄嚟到係提供保障嘅。我哋知道政府有一個新嘅顧問報告係關於道路安全嘅危害嘅，我哋知道有呢個咁嘅顧問嘅研究嘅，我哋亦都明白呢個研究係為咗針對呢個問題嘅。

最後一點，就係好多呢啲咁樣嘅問題都係响啲舊、起咗好耐嘅路，我哋需要改善嘅係需要資金、撥款嘅，就唔係撥款做一啲小型嘅改善工程。

我相信我哋係有能力不斷係考慮呢個問題，透過提醒各方面嘅持份者同政府留意嘅。

主席：（經傳譯員）多謝你嘅時間，你已經做咗總結，多謝你提供嘅證供。我而家就暫時休會，去到兩點半再開始。我哋會有位叫做Alok Jain嘅先生提供證供嘅。多謝你係用咗咁多時間協助委員會嘅工作，提供你嘅證供，多謝晒。

鄺子憲先生：（經傳譯員）多謝你，主席，我好樂意咁做，亦都多謝委員會同埋其他嗰啲提供支援同埋委員嘅努力。

主席：（經傳譯員）好，兩點半。

下午 12 時 59 分聆訊押後

下午 2 時 30 分恢復聆訊

出席人士： 程艾樂先生，九龍巴士（一九三三）有限公司前僱員

主席：（經傳譯員）各位下午好。

程艾樂先生： Very good afternoon.

主席：（經傳譯員）唔該晒程先生接受我哋邀請出席呢次嘅聽證會，畀口述證供協助我哋考慮有關事項。我哋要做就係要作出一啲建議，改善巴士安全，咁黃律師會開始問你問題，唔該晒。

程艾樂先生： Thank you, Mr Chairman.

黃女士：（經傳譯員）程生，你好，多謝你嚟到，我係代表委員會嘅律師，我會問一啲問題係關於專營巴士嘅安全設備。首先，我會作一個引言，程生，你係寫咗兩份意見書，係回應委員會向你提出嘅問題。第一份，日期係 5 月 25 號 2018 年。係前僱員文件夾 1，第 35 頁開始。第二份呢，就係由 44 頁開始，日期就係 6 月 18 號，都係 2018 年，我會就呢兩份你寫嘅意見書問問題。

我先想講你嘅背景，程生，你向我哋提供咗你嘅履歷一份，呢份嘅履歷可以喺呢一個 46-1，亦都係前僱員 1 號文件。程生，目前你係 Trans-consult 亞洲公司嘅總監，呢間公司就係一個顧問公司，負責有關於運輸方面，一啲新嘅技術、數據分析，同埋清潔能源科技。

程艾樂先生：（經傳譯員）係。

黃女士：（經傳譯員）我相信你曾經為香港九巴工作過，同埋就係呢一個港鐵，總共就 12 年。

程艾樂先生：（經傳譯員）係。

主席：（經傳譯員）可唔可以講埋邊段時間呀？

程艾樂先生：（經傳譯員）我係 97 年加入，離開嘅時候就係 08 年。

黃女士：（經傳譯員）想請你睇番你嘅履歷，係 46-5，上面就講咗嗰段時間同埋你嘅職位，就係呢一個嘅地鐵，九廣鐵路，咁就係呢一個嘅 06 年至到 08 年，就係呢一個總經理，係市場推廣部。

程艾樂先生：（經傳譯員）係。

黃女士：（經傳譯員）跟住揭一頁，一橫 6，你就提及過有關於發展一個實時車務資訊系統。

主席：（經傳譯員）未講呢個之前，可唔可講一講佢嘅學歷呀？

黃女士：（經傳譯員）係，程生，想請你講一講就係一橫 8 有關於你學歷方面。

程艾樂先生：（經傳譯員）應該喺最屘嗰頁。

黃女士：（經傳譯員）一橫 8，咁喺中間嗰度可以見到，學歷同埋專業訓練。程生，你係一個學士，係工程系，土木工程，咁就喺印度讀番嚟嘅。

程艾樂先生：（經傳譯員）係。

黃女士：（經傳譯員）喺 94 年嘅時候，你就係相信係一個嘅碩士課程，都係有關於為運輸方面，運輸工程方面，咁就喺泰國嘅一間 Asian Institute of Technology。

程艾樂先生：（經傳譯員）冇錯。

黃女士：（經傳譯員）05 年時候，你就係讀咗一個綜合管理課程，係高級管理人員，咁就喺呢一個 Richard Ivey School of Business。

程艾樂先生：（經傳譯員）係。

黃女士：（經傳譯員）呢啲就係你嘅學歷，你亦都係 UITP 嘅會員。

程艾樂先生： That's correct.

黃女士：（經傳譯員）呢個係一個國際公共運輸組織，你可唔可以解釋一下係咩嘢嚟㗎？

程艾樂先生：（經傳譯員）呢個其實係一個法文，咁就係英文翻譯為 International Association of Public Transport，就係呢一個國際公共交通國際組織，咁就係包含好多好多國家，係亞洲等等。我知道其實呢一個港鐵係呢個組織嘅一員，九巴我就唔知係唔係。

黃女士：（經傳譯員）咁想請你睇有關於係鐵路嗰個，係實時車務管理系統，咁係呢一個一橫 6 頁嗰度，有關嘅發展。係喺 2004 至 2006 年上面，嗰度有一段，就話你係帶領執行一個實時廣播系統，係將佢係概念化，呢個係贏咗一個獎，咁就係屬於呢一個最佳生活獎，咁呢個係咪地鐵呀？

程艾樂先生：（經傳譯員）當時係九廣鐵路，呢個我哋叫做 Newsline Express。

主席：（經傳譯員）咁呢一個系統可以發布咩嘢資料？

程艾樂先生：（經傳譯員）基本上嚟講係車上一啲廣播系統，係一個顯示器，有新聞，有啲節目，同埋係乘客資訊。

主席：（經傳譯員）咁係乜嘢類型嘅乘客資訊呀？

程艾樂先生：（經傳譯員）一個正常日子嚟講，就話下一站係乜嘢，同埋一啲教育嘅資料，譬如話係小心空隙，遠離車門。咁喺一啲非正常日子，譬如話有事發生，咁樣你就係可以呢係指導乘客去一個正確方向行。

黃女士：（經傳譯員）呢個係 06 年至 08 年嘅，係嗎？

程艾樂先生：（經傳譯員）係，當時我係呢個市場推廣部主管。

黃女士：（經傳譯員）請你跟住睇番 46-3 頁。

主席：（經傳譯員）一橫咩嘢 3？

黃女士：（經傳譯員）係。

主席：（經傳譯員）黃律師，我唔知道係你個角度問題定係個咪問題，但係由你講嘅話呢，就好似矇矇地啲聲，可能需要人去搞一搞，可唔可以擰下佢呢？係咪嗰個聲量嘅問題呢？

黃女士：（經傳譯員）或者我大聲啲，大聲啲得唔得呀？

主席： Yes.

黃女士：（經傳譯員）程生，請你睇番 46-3，呢度係有關於九巴，受僱九巴嘅時候，當時就係策劃同埋發展部，咁就係呢一個 2013 至到 2015 年。

程艾樂先生： That's correct.

黃女士：（經傳譯員）跟住升咗職，變成呢一個副車務總監，就係 16 年 1 月至到 16 年 12 月。

程艾樂先生：（經傳譯員）冇錯。

黃女士：（經傳譯員）喺你嘅履歷裏面，你亦都講過話帶領研究發展嘅工作，即係就於使用科技，數碼分析同埋呢一個智能系統，智能流動系統。

主席：（經傳譯員）喺邊度可以見到呢個資料呀？

程艾樂先生：（經傳譯員）呢啲其實就係，我係喺某一段時間裏面有做。

黃女士：（經傳譯員）一陣我再畀資料，咁你亦都曾經一段時間喺香港嘅一間教育學

院嘅教授。

程艾樂先生：（經傳譯員）係助理教授。

主席：（經傳譯員）係教乜嘢？

程艾樂先生：（經傳譯員）我係香港大學嘅城市規劃學院嗰度呢，就係教㗎。

主席：（經傳譯員）喺邊段時間呀？

程艾樂先生：（經傳譯員）開始嘅時候，就係 04 年，我仍然係會做一啲兼職嘅工作去教某啲科。

主席：（經傳譯員）咁你教係邊個範圍，係乜嘢？

程艾樂先生：（經傳譯員）主要都係有關於公共交通同埋規劃。

黃女士：（經傳譯員）你就講咗話你呢啲係學術方面嘅參與，咁係呢一個一橫 8 頁，咁就話係香港大學嘅城市規劃學院兼職助理教授，係由 07 年 1 月到而家？

程艾樂先生：（經傳譯員）係，頭先都係咁講。

黃女士：（經傳譯員）我頭先講過嗰個就係 46-1，第 2 段，最屘嗰行，咁就話佢係帶領研發有關於使用新技術，數據分析同埋智能流動系統。

主席：（經傳譯員）係代表乜嘢呀？

程艾樂先生：（經傳譯員）即係喺關於公共交通上面使用一啲智能系統。

主席：（經傳譯員）呢個係咪 2013 至到 2016 年呀？

程艾樂先生：（經傳譯員）冇錯，主要係 2015 年嘅事。

黃女士：（經傳譯員）可唔可以解釋多一啲係交通運作方面使用技術，包括啲乜嘢呢？

程艾樂先生：（經傳譯員）譬如喺早期嘅時候，就係講一啲遠程資料通訊系統，咁同埋有一個合約就冇完成。咁就係關於呢一個九巴數據分析，咁當時呢就係我其中一間受僱嘅公司係有份參與，咁就係關於係存取數據，分析等等。

黃女士：（經傳譯員）你目前係一個顧問，係一個陸上交通部，係星加坡一個政府組織，係咪？

程艾樂先生：（經傳譯員）我唔係直接受僱於佢哋，咁但係我係一間顧問公司嗰度工作，咁呢間顧問公司係畀意見佢哋。

黃女士：（經傳譯員）咁有關於你要畀意見個範圍係乜嘢？

程艾樂先生：（經傳譯員）因為有呢一個保密，所以我唔可以講。

黃女士：（經傳譯員）咁但係同公共交通嘅運作有關？

程艾樂先生： Yes.

黃女士：（經傳譯員）我而家相睇番你嘅意見書，第一份意見書，日期係 5 月 25 號 18 年，就係呢一個前僱員文件裏面第 39 頁。程先生，喺你第一份嘅陳述書第 2 段嗰度，你就咁講，其實你由 39 頁開始解釋，當時你係呢一個策劃及發展部主管，九巴嘅時候，同埋你嘅工作範圍，就包括科技引用，特別係喺你哋運作同埋呢個資料管理方面，其實呢個包括係咪實時車務管理系統，同埋遠程通訊系統？

程艾樂先生：（經傳譯員）唔係，遠程通訊系統同埋實時車務管理系統呢有兩個部分，一個就係硬件部分，其實而家講三個部分，軟件、硬件同埋就處理啲資料，咁我基本上我就係喺處理資料嗰方面呢我有參與。

主席：（經傳譯員）咁嗰啲硬件係指係乜嘢呢？

程艾樂先生：（經傳譯員）就係由 Openmatics 呢間公司去提供，呢個係一個遠程通訊系統，咁就喺巴士上面安裝，咁喺我哋公司嚟講呢，我哋就會開發一啲軟件，咁就希望能夠裝遠程通訊系統嗰啲資料就擺落實時車務管理系統，咁然後處理資料時候，就係點樣處理啲資料。

主席：（經傳譯員）首先，慢慢嚟，我哋首先係硬件，telematics 係大概係牽涉啲咩嘢設備呢？

程艾樂先生：（經傳譯員）我哋通常做黑盒。

主席：（經傳譯員）佢嗰個技術個名係叫乜嘢？

程艾樂先生：（經傳譯員）呢個係一個系統嚟，就係喺嗰個引擎裏面，亦都係連接喺引擎同埋其他部分，特別係睇番嗰個巴士嗰個表現係點。

主席：（經傳譯員）咁大致上係點邊數據可以搜集嘅呢？

程艾樂先生：（經傳譯員）例如關於車速、加速、減速、煞車，或者係使用燃料，傾側，同埋位置等等。

主席：（經傳譯員）咁佢嗰個型號叫做乜嘢名？

程艾樂先生：（經傳譯員）我唔記得嘞。

主席：（經傳譯員）咁軟件方面，係個軟件係啲乜嘢呢？

程艾樂先生：（經傳譯員）喺當時呢，就係喺我哋自己公司開發，咁就係可以提供做實時車務管理系統，ROM 英文簡稱就係。

主席：（經傳譯員）咁點樣去運作㗎？

程艾樂先生：（經傳譯員）咁 telematics 呢，就係遠程訊息系統呢，就係可以實時將呢啲數據就分番送番去營運控制中心嗰度，而嗰個實時車務管理系統呢，就將呢啲數據係變成一啲可以明白嘅數據，咁然後我哋亦都有個平台，就係可以處理啲數據，分析啲數據，擺落我哋嗰啲規劃嘅參數之中，令到我哋可以編更，編時間表，編路線等等。

主席：（經傳譯員）咁嗰個營運控制中心喺邊度㗎？

程艾樂先生：（經傳譯員）本來就原意就係喺荔枝角車廠嗰度設立。

主席：（經傳譯員）咁嗰啲數據係點樣呢，就係由遠程訊息設備系統嗰度傳送去營運控制心？

程艾樂先生：（經傳譯員）係經過一個 GSM 嘅網絡，就用一啲流動通訊 3G，3G 科技就去做㗎。

主席：（經傳譯員）就係基本上係嗰啲流動電話用嘅系統，係咪？

程艾樂先生：（經傳譯員）正確。

主席：（經傳譯員）呢個係關於軟件嗰方面，咁關於處理或者分析數據係點樣嘅呢？

程艾樂先生：（經傳譯員）咁好多數據喺九巴嚟講，都係獨立處理，譬如關於工程部，就有工程部嘅資料，或者車務部，就有車務部嘅資料。咁佢哋就喺唔同嘅系統裏面存儲，咁嗰陣時有計劃，就係將所有呢啲擺落同一個數據庫嗰度，亦都係大家可以一齊共用。

主席：（經傳譯員）咁如果呢個數據庫，你嗰啲資料會點樣用嘅呢？

程艾樂先生：（經傳譯員）有三個部分，三個階段，第一個呢，就係首先，係睇下實時發生緊啲乜嘢。第二個階段，就係希望係擺落一個模型嗰度，我哋至少係幫助我哋可以規劃。第三個目標，就係希望能夠用一啲數據工具，就係做一啲未來預測。

主席：（經傳譯員）咁關於實時嗰方面第一點？

程艾樂先生：（經傳譯員）呢個就係會愛嚟管理啲數據，同埋可能去調查，紀錄等等。

主席：（經傳譯員）咁調查啲乜嘢？

程艾樂先生：（經傳譯員）譬如話有好多嗰啲乘客投訴某一啲情況，然後我哋就會睇番啲數據，確認係咪有類似嘅情況。

主席：（經傳譯員）如果嗰啲投訴，譬如話就係突然之間煞車，或者係超速，咁攞咗呢啲數據，係咪真係可以分析到就係講緊呢個特別嘅呢個數據庫？

程艾樂先生：（經傳譯員）係，可以。

主席：（經傳譯員）如果關於點樣去處理啲投訴，會唔會主動去用呢啲嘅數據呢？

程艾樂先生：（經傳譯員）咁第二個階段呢，就係會係有實時系統，咁我哋就攞咗啲過往數據，咁我哋就會係可以係實時去分析，咁個諗法就係話可以監管成個嗰啲車務係用實時嘅方法，我哋就可以講叫做一啲例外嘅情況嘅管理，如果譬如話一啲界限值已經係超越咗嘅時候，我哋就會主動去管理相關嘅情況。

主席：（經傳譯員）如果真係成立咗嘅說話，咁你睇到呢個咁樣嘅系統，點樣可以去幫到嗰啲司機去揸車？

程艾樂先生：（經傳譯員）譬如話我哋參數，我哋又定咗啲參數，如果係超越咗個參數，咁就會有警示，咁有啲嘅公司，世界各地嘅公司，佢哋就會用一啲係綠色同埋紅色嘅警號，如果綠色呢就代表係正常，紅色就已經係超越咗警戒線，咁如果佢係已經超越咗界限時候，咁我哋就需要積極去干預。

主席：（經傳譯員）你有冇預測到就係呢個警示系統，咁如係參數已經係超越咗嘅時候，會唔會係實時可以去做到警示？

程艾樂先生：（經傳譯員）當其時嗰個諗法確實係咁。

主席：（經傳譯員）咁關於遠程訊息系統話要咁樣用嘅時候，係幾時開始有相關嘅討論？

程艾樂先生：（經傳譯員）呢個討論就喺我加入九巴之前，咁我係 2013 年加入，咁喺我初初開始喺嗰度做嘅時候，咁我哋就已經係傾緊，咁所以我唔知道正確嚟講係幾開始有相關嘅討論。

主席：（經傳譯員）咁當其時有邊個參與相關嘅討論？

程艾樂先生：（經傳譯員）呢個高級管理層，我個老細，佢係呢一個交通發展主管，科技部門等等，咁其實成間公司唔同部門都有參與。

主席：（經傳譯員）唔該晒，黃大律師。

黃女士：（經傳譯員）咁你覺得話有好多人有參與，大概係幾多人呢？

程艾樂先生：（經傳譯員）對唔住，我聽唔清楚。

黃女士：（經傳譯員）你話有好多人都有參與，你可唔可以話畀我聽，大概係有幾多人參與？

程艾樂先生：（經傳譯員）唔同嘅會可能有唔同人數，其實冇一個定嘅數字，咁每一個部門都有佢哋嘅代表參與，咁呢個就係剛才我講嗰啲關鍵嘅部門。咁都幾多人㗎，咁睇下傾緊啲乜嘢，可能係有 3、4 人，有可能係 20 個人。

黃女士：（經傳譯員）你喺呢個陳述書嗰度講呢，就係話嗰個有一個荔枝角嘅營運控制中心呢，就會將呢啲嘅所有嘅據擺喺嗰度，就係有唔同嘅部門可以用嗰啲資料嚟就係分析。

程艾樂先生：（經傳譯員）咁你其實呢嗰個荔枝角就會係一個營運控制中心，就係實時車務管理系統。

黃女士：（經傳譯員）咁其實呢佢係會係服務成個公司嘅，咁呢度基本上呢都係有一個去存儲呢啲數據嘅，又或者呢其實嗰個實時嘅監管，都會喺荔枝角中心嗰度進行嘅。

程艾樂先生：（經傳譯員）冇錯，喺荔枝角中心嗰度。嗰啲我哋知道巴士喺邊度實時嚟講，咁而呢個有唔同嘅伺服器會分析，處理器會分析，咁然後呢就係呢啲數據就會係提供畀好多公司裏面其他唔同嘅人士。

黃女士：（經傳譯員）我哋去睇第 42，就係前僱員文件夾 1，第 2 段。你提到喺第 2 段 A，就關於呢個實時車務管理系統。喺 A 你就話參與好多嘅討論同埋會議，關於係技術規格，功能，選擇相關科技同埋等等等等，就你啱啱加入公司嘅時候就係做呢啲嘢，咁但係你就冇參與關於呢一個招標、款項或者係呢個項目管理嗰度。

程艾樂先生： Correct.

黃女士：（經傳譯員）係咪就係話你加入公司至到你走嗰段時間，你都係有參與呢個系統㗎？

程艾樂先生：（經傳譯員）喺嗰時期，當我哋大家討論點樣去實施嘅時候呢，其實我都有參與。

黃女士：（經傳譯員）咁我亦都留意到喺羅馬數字(I)，喺 A 段，但係你就話其實主要嘅原因，點解去實施呢一個項目呢，就係改善安全，通過實時預警同埋反饋畀一啲車長，咁關於車長方面嘅反饋嗰度，其實呢度會唔會都係實時進行嘅呢還是係之後先至話番，或者反饋畀嗰啲車長，特別係話呢一個嘅收到投訴之後？

程艾樂先生：（經傳譯員）咁其實有兩樣嘢嘅，咁呢個就係一個兩方面嘅雙向嘅一個嘅系統，咁個車長呢就係有呢個叫做司機嘅顯示系統，咁就可以有一個雙向方法，一個就係一個巴士層面，咁我哋就係可以--如果一架巴士就係已經超越咗某個界限嘅時候，佢就要警告個車長。咁另外一個方法呢，就係話又喺個控制中心嗰度有人睇到呢架巴士，或者已經係超速，但係仍然都係喺個車速限制之內，咁呢個如果喺架車上面嘅時候，冇發現有異常嘅情況，但係喺個營運控制中心嗰度嘅時候，個督導睇到，見到可能係因為個天氣問題，或者其他呢一個意外或者係路面嘅情況，佢哋應該係揸得慢啲，咁嗰個嘅督導就係可以喺介入，就係提醒呢一個車長可以揸得慢啲，咁所以呢喺兩個層面嘅一個嘅干預。

主席：（經傳譯員）咁如果係第二層面干預嘅話呢，就係透過營運控制中心，咁係點樣向車長溝通呢個訊息呀？

程艾樂先生：（經傳譯員）我哋有好多唔同嘅選項嘅當時傾過，咁譬如話一個顯示系統，第二就係一個聲音嘅系統。

主席：（經傳譯員）咁即係有兩個可能性，一個就係透過顯示系統，或者呢就係透過聲音？

程艾樂先生：（經傳譯員）係，視像已經有喺度㗎嘞，當時其實就係有考慮埋呢個聲音。

主席：（經傳譯員）咁係用咩方法，係呢個無線電？

程艾樂先生：（經傳譯員）係，主要都冇無線電，或者有其他 3G 通訊系統，但係我哋未傾到嗰度。

黃女士：（經傳譯員）你提及過有好多唔同嘅會議，或者係討論關於呢個實時車務管理系統，可唔可以講下？記唔記得有冇任何文件，有冇會議紀錄係講--傾過啲乜嘢呢？

程艾樂先生：（經傳譯員）有好多唔同嘅講法，有電郵，有傾，有寫低咗究竟係當時講過啲乜嘢，總結講過啲乜嘢，主要嘅議題，職責等等，咁但係正式嘅會議紀錄，我就唔記得有冇嘞。

黃女士： Yes.

主席：（經傳譯員）咁呢啲嘅陳述，你就話有好多，係咪書面㗎？

程艾樂先生：（經傳譯員）呢啲全部都係投影片。

主席：（經傳譯員）係電腦呀？

程艾樂先生：（經傳譯員）係，電腦上面。

主席：（經傳譯員）唔係書面嘅？

程艾樂先生：（經傳譯員）主要都係電腦囉，呢一個係投影片嚟。

主席：（經傳譯員）邊個整㗎呢啲資料？

程艾樂先生：（經傳譯員）有時係資訊管理部，有時就係車務部。

黃女士：（經傳譯員）可唔可以講下喺車務部裏面，邊個負責整呢啲資料，陳述咁㗎？

程艾樂先生：（經傳譯員）車務部入面邊個呀？

主席：（經傳譯員）如果你唔記得話唔記得，如果記得就講係邊個？

程艾樂先生：（經傳譯員）有一組人專門負責係做呢樣嘢，係務部入面嘅人，不過佢哋離開咗，我唔記得佢哋啲名，有一個中央嘅組別嚟㗎，係嘞，咁就負責係交通。

黃女士：（經傳譯員）係屬於車務部，係負責呢一個交通，佢係交通部。

程艾樂先生： Yes.

黃女士：（經傳譯員）你係 B 段嗰度呢就提及過話呢個遠程訊息系統，喺第三行，遠程訊息系統嘅資料，仍然係有，就算係放棄咗呢一個項目之後，都仍然有，咁所以仍然喺某程度上有監察，咁但係呢一個實務--呢一個就系統嗰個真正嘅價值呢，其實係要實時，咁但係呢方面呢就已經犧牲咗。

主席：（經傳譯員）我想講話某程度上嘅監察意思係咩嘢，未講呢嘢之前？你就話冇執行到，冇用到，點解係會停止策劃呢？

程艾樂先生：（經傳譯員）呢方面嘅討論我冇參與，即係話關於話係放棄呢一個系統，但係我理解呢一個嘅管理系統係公司內部，亦都係遲過訂定嘅時間。

主席： Yes.

程艾樂先生：（經傳譯員）咁所以引致某程度--我搵一個正確嘅講法，公司裏面即係覺得即係失望，因為追唔到個時間，唔可以準時做到，咁亦都唔會再繼續進行。

主席：（經傳譯員）呢個技術會唔會係同其他即係喺巴士上面，當時有應用嘅技術呀？

程艾樂先生：（經傳譯員）可能有幾樣，就係巴士上應用嘅，有傾過一啲實時通訊，溝通，即係發收咗幾多嘅車資，亦都係一啲自動數人，亦都係呢可能係選擇一啲嘅大學教授同我哋講關於話呢一個無線上網嗰方面資料，咁但係最後其實，我哋就係會睇下究竟幾多人喺巴士上面，然之後呢事先畀個資料畀佢哋，等佢哋知道我哋幾時應該呢係上車，幾時應該落，即係幾時係可以係有位坐。

主席：（經傳譯員）呢個系統，咁喺你加入公司之前，咁係咪已經有發展到一個系統，就係話畀你聽預計車幾時到？

程艾樂先生：（經傳譯員）呢方面嘅功能，其實喺我加入咗嘅之後做，咁其實就喺呢一個 2014 年最後一季，其實係有試用過，咁但係 2015 年嗰嘅時候，就已經正式啟用。

主席：（經傳譯員）需要用到嘅技術方面，即係發展呢個技術，係同實時車務系統係咪有關嘅呢？

程艾樂先生：（經傳譯員）其實都係用番同一樣嘅嘢。

主席：（經傳譯員）咁即係話收到嘅數據可以有其他用法？

程艾樂先生：（經傳譯員）係。

黃女士：（經傳譯員）可唔可以講番呢？記唔記得係邊個宣布或者決定，係唔再進行呢個項目㗎？

程艾樂先生：（經傳譯員）冇人真係去公布，不過即係正如我喺信上面講，喺荔枝角嘅係營運控制中心已經變成寫字樓，咁嘅訊息都好清楚，冇正式宣布。

黃女士：（經傳譯員）唔該。

程艾樂先生：（經傳譯員）我唔記得有正式宣布。

黃女士：（經傳譯員）有關於呢個實時車務管理系統，係咪佢其中一個功能係咪監察車長嘅行為呢？

程艾樂先生：（經傳譯員）仲有其他嘢。

黃女士：（經傳譯員）我咁樣提呢，因為你講過話係綠色道路，同埋一啲嘅記分卡，咁當你講緊呢個實時車務管理系統嘅時候，其中一個諗法，係咪即係你公司諗嘅用法呢，就係想做嘢呢樣嘢㗎？

程艾樂先生：（經傳譯員）係呀，其中一樣囉。咁我係提過過話即係關於呢一個油耗效率方面，咁其實就係一啲綠色駕駛，咁你可以講係同一樣嘢嚟。其實理想嚟講，就可以話畀司機聽，叫佢揸得好啲，譬如係整一個系統出嚟，講番畀佢聽個反應係點，佢哋揸成點，咁佢哋係咪跟番正常嘅模式，定係唔同咗，咁咪可以即係提一提佢哋，等佢哋揸得好啲，但係唔係罰佢哋。呢樣最終係可以令到慳到油，因為其實慳到油就係同呢一個加速、減速有關。

黃女士：（經傳譯員）你話就唔需要罰佢哋嘅，咁獎勵呢。

程艾樂先生：（經傳譯員）當時我哋其實就冇講詳情嘅，不過呢就係唔係懲罰佢，呢個好清楚，我哋當時傾嘅就係咁。其實我哋就想睇下點樣去搵呢啲嘅資料，去點樣去獎勵或者去監察嘅，咁但係其實就冇講到詳情。咁其實我哋傾過好多唔同嘅嘢，好多唔同嘅可能性。

黃女士： Yes.

主席：（經傳譯員）咁你有冇傾過一啲參數，係定咗啲咩嘢參數呢？

程艾樂先生：（經傳譯員）基本上嚟講呢，譬如話講倫敦，當時我哋有睇過呢個作為參考，咁基本上就係睇一啲嘅事件，即係話如果係喺呢一個嘅門檻，超過咗我哋訂定嗰個嘅門檻，就會係有啲乜嘢情況出現，譬如話加速、減速、傾側、煞車等等。咁如果少啲事件發生，咁即係話佢哋駕駛態度咪好啲，佢哋表現亦都

Transcript by Epiq Hong Kong, Limited

好啲。

主席：（經傳譯員）咁有冇特登講明，有冇考慮到呢而係講明話，如果超速去到一個某個程度，加速到咩嘢程度，呢一個過份嘅煞車咩嘢程度呢？

程艾樂先生：（經傳譯員）我哋冇講明個數字，但係我哋想做嘅就係，做一個統計嘅分析，當時呢仍然係拗緊話究竟我哋擺啲乜嘢嘅即係門檻呢，有啲咩嘢參數呢，同埋一個嘅係即係偏離嘅標準，咁我哋有諗過話係咪要一個一般嗰個規則，定係話要講明喺某情況發生啲咩嘢事呢，咁其實我哋大部分嚟講都係傾緊。

黃女士：（經傳譯員）頭先你就講過話呢，係針對某一個路線，咁你點揀呀？

程艾樂先生：（經傳譯員）每條路線都有唔同嘅特徵，譬如話會唔會係去尖沙咀，去市區公路，咁所以係巴士司機嗰個嘅行為反應都會唔同，咁所以巴士司機呢，譬如話即係某一個情況，可能煞車大力啲，譬如話佢係抽番架車出嚟，入番架車去巴士站嘅時候，咁我哋當時呢就係傾過點樣可以最好，用一個公平個方法去符合到管理層嘅期望，咁同埋同時間係唔會令到司機覺得難受。

黃女士：（經傳譯員）想請你講番 B 段，有關有某程度嘅監察，即係喺放棄咗呢個項目之後，都有某程度嘅監察，你嘅意思係指乜嘢呀？

程艾樂先生：（經傳譯員）以我所理解，遠程訊息系統其實仍然有用，不過使用嗰個嘅個用法呢，就係 T+1 嘅，即係話發生咗事之後。

黃女士：（經傳譯員）即係其實係變咗係反應，唔係預示嘞。

程艾樂先生：（經傳譯員）冇錯。

黃女士：（經傳譯員）同時你亦都提及過話呢一個系統嘅真實價值，咁其實仍然喺度，不過呢實時呢一個功能已經就係犧牲咗，其實你講緊就係話係變成係對事，發生咗事件反應，而唔係預先？

程艾樂先生：（經傳譯員）其實即係講緊係實事嘅資訊，咁但係呢冇人係實時分析當時嘅資料，而係係事後先至反應，咁其實可以話係 20 秒就反應到，定係話 20 個鐘頭之後先反應到？

黃女士：（經傳譯員）第 3 段，由第 2 行開始，你就提及過話，就算喺當時九巴係策劃緊呢個計劃嘅時候，其實我哋好大量依賴韓國、星加坡、倫敦同埋幕尼黑嘅經驗。咁其實講緊你係乜嘢經驗呀？呢啲國家嘅經驗。

程艾樂先生：（經傳譯員）喺我加入之前呢，以我所理解九巴高層，其實就係出國考察過呢啲城市，睇佢哋嘅系統，咁我哋設計嘅時候，就開會係大量討論過話係韓國做過乜嘢，倫敦做過乜嘢，佢哋嗰個嘅良好做法係乜嘢呢，點可以應用喺我哋度。

黃女士：（經傳譯員）可唔可以畀一個例子？譬如話係喺呢個首爾，或者星加坡。

程艾樂先生：（經傳譯員）首爾有一個中央交通管理中心，我哋其實都係想營運控制中心可以做到呢樣嘢，倫敦嘅運輸局亦都係積極去管理司機行為，使用嘅係遠程訊息設施，呢個亦都我哋想係用到，所以睇番唔同例子，同埋點樣可以轉化為我哋用到嘅方式。

黃女士：（經傳譯員）當你傾緊呢啲嘢嘅時候，同埋開咁多會喇，你記唔得有冇牽涉到運輸署？你有冇將你哋計劃做嘅嘢係講畀運輸署聽呀？

程艾樂先生：（經傳譯員）我唔記得實際運輸署有冇參與我哋討論，不過我覺得佢哋知道我哋計劃做啲乜嘢，因為當時我哋係做咗好多公開陳述，就係亦都同商會呀等等有講，有講話即係九巴將來係點使用技術去改變。

黃女士：（經傳譯員）即係你喺公開場合做咗好多陳述？

程艾樂先生：（經傳譯員）係呀，我自己，仲有其他公司嘅高層喺公開場合就做咗好多陳述講呢啲嘢。

黃女士：（經傳譯員）呢啲嘢就係呢個實時資訊系統？

程艾樂先生：（經傳譯員）呢個係其中一樣嘢，仲有係預計到車時間等等，主要都係關於遠程訊息嘅設備。

黃女士：（經傳譯員）你公開場有講過呢啲嘢喇，即係可能係有啲運輸署嘅人員出席呀？

程艾樂先生：（經傳譯員）我答唔到你，咁但係其實我可以話呢係公眾都知，因為我哋唔係想唔畀人知，我哋所以都公開都有講。

主席：（經傳譯員）咁你嘅意思係咪就係話，其實訊息係有分發去畀好多唔同嘅人聽，咁運輸署可能都知。

程艾樂先生：（經傳譯員）正確。

黃女士：（經傳譯員）咁我再繼續之前呢，你就講到關於呢一個中央交通指揮中心，咁我可唔可以睇一睇SEC-2文件冊嗰度，第822頁。

主席：（經傳譯員）黃大律師，可唔可以休息一陣先，因為我想搞一搞嗰個系統，因為黃大律師嗰個聲音就好矇，咁可能或者要轉一轉個咪都未定，咁我哋可唔可以呢就係休息五分鐘，咁如果程先生你想離開間房，都係可以。

下午3時15分聆訊押後

下午3時22分恢復聆訊

出席人士如前。

黃女士：（經傳譯員）程艾樂先生，就係呢個係關於呢個係立法會嘅一個文件嚟嘅，咁呢個係首爾同埋新加坡嘅專營巴士，呢個係SEC嘅第2號文件，就係第822頁開始嘅。

第823頁，呢個就係首爾嗰個系統嘞，呢個開始。咁喺825頁喇，2.8段...

主席：（經傳譯員）可唔可以講呢個文件係幾多--咩嘢日期㗎？

黃女士：（經傳譯員）2014-2015年嘅撰寫嘅，呢度冇一個正確嘅日期，呢個係一個嘅研究部嘅報告嚟嘅，就係由立法會秘書處去編制嘅。呢個可以睇到IO05/14-15年咁樣㗎。

程艾樂先生：（經傳譯員）呢度最後嗰度寫就係「2015年2月3號」㗎，寫咗個日子。

主席： Thank you very much.

Yes.

黃女士：（經傳譯員）我哋睇825頁吖，呢個其實講關於呢個巴士管理系統嘅成立，第2.8段嘞就係：

「去能夠統籌呢個巴士嘅服務，能夠全面嘅方法喇，咁呢一個首爾嘅城市政府就係設立咗個新嘅巴士管理系統，用一啲最新嘅智慧嘅交通系統喇，咁我哋有最球定位嘅系統喇，就令到呢一個嘅中央嘅控制中心就係可以完全監察所有巴士嘅地點喇，佢嘅速度喇，同埋就可以同呢一個巴士司機係溝通喇，同埋即係改變個巴士嘅數字，同埋就係讓呢一個嘅乘客係可以有一啲實時嘅資訊，知道究竟嗰個班次係點樣樣。」

程艾樂先生：（經傳譯員）係其實類似㗎，咁呢個關於呢個全球定位嘅系統，呢個係一個以地點為本嘅系統。

黃女士： Yes.

程艾樂先生：（經傳譯員）所以一定係唔係淨係指係呢個嘅系統為--遠程通訊式系統都係需要㗎，咁我唔敢肯定佢哋係咪會做遠程訊息系統。

主席：（經傳譯員）呢個全球定位話畀你聽嗰個地點？

程艾樂先生： Just the location.

主席：（經傳譯員）然後你就遠程訊息系統就話畀你聽，究竟加速、減速等等？

程艾樂先生：（經傳譯員）咁關於呢個巴士實際個表現，就應該喺個巴士上面有一啲嘅裝置，咁呢個通常就係遠程訊息系統喇。咁佢可能係好簡單，亦都係可以係好複雜㗎。

Openmatics 嗰個系統就係一個好先進嘅系統嚟㗎，但係你同樣喇，其實呢啲嘅裝置都係會比較簡單，亦都係可以好--比較平啲，有啲好基本嘅資料，咁呢啲都係喺個市場上面有㗎。

主席：（經傳譯員）咁 Openmatics 嗰個係冇--喺 2015 年嘅時候係莫札特盒，係咪嗰個，係咪叫莫札特盒呢？

程艾樂先生：（經傳譯員）我淨係識到莫札特係同音樂有關嘅啫，我唔係好...

主席：（經傳譯員）呢個巴赫吖？巴赫都係一個嘅音樂家嚟嘅。咁 Openmatics 都有用呢個型號嘅，咁你有冇--識唔識呢？

程艾樂先生：（經傳譯員）咁當其時我哋淨係講 Openmatics 同埋遠程訊息系統喇。

主席：（經傳譯員）咁其實就我哋係 ZF 嘅陳述書㗎，咁你有冇睇過呢？

程艾樂先生：（經傳譯員）我有尋晚好夜我先至收到，所以我冇乜時間睇。

主席：（經傳譯員）咁我哋其實就--佢哋話佢有兩個型號嘅，咁就第一嗰代就叫做莫札特，第二代叫做巴赫嘅。咁呢個其實如果喺即係音樂史上面，其實係調番轉嘅，嗰個歷史就係。

程艾樂先生：（經傳譯員）咁但係佢哋嗰啲數據睇落嚟都好似好有音樂感咁嘅。

主席： Yes, Ms Wong.

黃女士：（經傳譯員）程先生，有關於呢個莫札特同埋呢個巴赫嘅人，我哋去到 BM-1 文件冊第 64 頁吖。

呢個係一封嘅函件，就係一個律師事務所喇，佢哋代表 ZF 嘅，同埋 Openmatics 嘅。佢哋呢個係提交陳述書畀我哋嘅委員會，咁呢個嘅陳述書...

主席：（經傳譯員）唔好意思，等等，等程先生可以就將個文件帶到佢面前嘅。

黃女士：（經傳譯員）程先生，請你揭去第 65 頁。呢個係 Openmatics 嘅回應嚟嘅，就我哋--向我哋嘅委員會嘅回應嘅。嗰個黑色部分就係問題嚟嘅，而呢一個藍色嘅部分就係 ZF 同埋 Openmatics 嘅回應。

如果你睇下第二段，呢度講到：

「Openmatics 就係同呢一個九巴就係有個供應嘅合約喇，就係喺 2013 年

4 月 16 號嘅，就係提供呢一個遠程訊息系統，就係畀呢個九巴同埋龍運嘅。」

咁呢個係 2013 年 4 月 16 號，咁呢個係你加入之前嘅。

程艾樂先生：（經傳譯員）我係 2013 年 6 月加入嘅。

黃女士：（經傳譯員）咁你--呢度繼續講就話：

「Openmatics 就係開始提供遠程訊息服務㗎，咁就使用第一個嘅黑盒系統，就叫做莫札特盒㗎，之後 Openmatics 就係用一個叫巴赫盒嘅較後--較新嘅型號係代替咗莫札特盒㗎，咁但係係即係好多嘅顧客好似九巴咁，都兩樣亦都有用嘅。」

程生，我知道你就對於黑盒嘅名稱唔係咁熟悉，但係你有冇喺你哋傾嘅時候，即係講黑盒嘅時候，有冇真係將個黑盒攞畀你哋睇呀？

程艾樂先生：（經傳譯員）我唔記得。

黃女士：（經傳譯員）如果我畀相你睇，會唔會幫到你喇？會唔會令你記得起呢？

程艾樂先生：（經傳譯員）雖然咁講，其實我有見過嗰個儀器㗎，有見過個黑盒㗎，不過就唔係即係呢一個有關於九巴或者 Openmatics，但係其實我係有見過嘅。

黃女士：（經傳譯員）我哋睇番之後嘞，66 頁之後嗰頁。呢度提及一個司機嘅反饋系統呀，就有個界限喇，就係由九巴就於嗰架車係訂定㗎，咁就有關於加速率、減速率同埋係傾側角度，同埋有關於車速，一啲其他參數。

咁對於界限方面，即係有關於呢一個遠程訊息系統設定界限呢方面，你有咩嘢嘅認識呢？

程艾樂先生：（經傳譯員）有一樣嘢就係我好記得嘅，就係個傾側角度。

黃女士：（經傳譯員）點解？

程艾樂先生：（經傳譯員）因為--係，因為係其實對我嚟講，就係已經係好危險㗎嘞，因為架車已經係傾側緊喇。

主席：（經傳譯員）會跌㗎嘞？

程艾樂先生：（經傳譯員）已經成 44 度，已經係唔可以再控制到㗎嘞。

主席：（經傳譯員）所以就其實就唔係話係要畀出一個警號嘅，咁簡單嘅？

程艾樂先生： Possibly.

主席： You set a position that is beyond purpose.

程艾樂先生： That's correct, yes.

黃女士：（經傳譯員）咁喺減速率方面呢？

程艾樂先生：（經傳譯員）呢個係一個全球嘅參數定係同路線有關呀？

主席：（經傳譯員）應該係講緊全球。

程艾樂先生：（經傳譯員）2.3 係上落斜的話，其實可以接受㗎，因為有時係--喺香港係有咁嘅需要。如果平路，就太多嘞。

黃女士：（經傳譯員）唔該。想請睇 68 頁呀，第四段對上，有提及過 Openmatics 喺九巴嗰個嘅--設置嘅系統可以搵到啲咩嘢，就話可以係搵到速度嘅紀錄喇，就係每秒㗎，亦都係連同嗰個全球定位系統嘅資料一齊儲存㗎。

程艾樂先生：（經傳譯員）我搵唔到你講邊度呀。

黃女士：（經傳譯員）68 頁呀，唔好意思，程生，藍色嗰部分，第三段，藍色嗰部分，就係關於呢一個係：

「Openmatics 嘅遠程訊息系統安裝喺九巴嗰度嘅。」

見到嗎？

程艾樂先生：（經傳譯員）見到。

黃女士：（經傳譯員）就話：

「可以認出到一個速度嘅紀錄喇，係每秒㗎；

亦都係連同呢個全球定位系統嘅資料一齊儲存喇；

突然間剎車嘅不良做法喇；

突然加速；

同埋呢一樣嘢會連同巴士嘅車牌喇同其他輔助系統。

喺九巴嗰個嘅系統就唔可以認到某啲巴士嘅路線㗎，呢一啲其實就係每秒去認到，亦都就係將呢一啲嘅訂定嘅數據喇，每隔三十秒就會透過呢一個無線傳送或者係透過呢一個網絡傳送喇，咁係傳送去有關嘅伺服器嗰度㗎，即係呢個流動系統。

所以想問，咁就話九巴係可以認到四樣嘅項目㗎，咁你傾嘅時候，係咪有傾過呢四樣就係關於實時監察司機嘅行為呢？

程艾樂先生：（經傳譯員）以我所知，遠程訊息系統嘅設備就唔係話佢超速或者係講緊車速嘅資料，亦都係有關於佢剎車嘅表現，可以知道究竟係咪大力剎車。

但係其實你要係睇下有啲乜嘢嘅--你要界定究竟係一啲乜嘢嘅參數，所以加

速--佢哋話畀你聽喇，咁但係乜嘢叫做突然加速，乜嘢唔係突然加速，就要你自己去界定嘞。

呢個係我嘅理解。

主席：（經傳譯員）係，我喺之前嗰頁已經睇到佢哋嘅解釋，就話呢啲嘅數據參數係要輸入去個機嗰度嘅，但係呢個就係關於嗰個數--關於--關埋個傾側角度㗎。

黃女士：（經傳譯員）咁即係話可以揀㗎？

程艾樂先生：（經傳譯員）係，呢啲係技術方面嘅參數喇，可以係適用於某一個路線，或者唔係即係路線專用喇，位置專用喇，你都可以係界定嗰個嘅一啲嘅界限，就係譬如話係一段路段咁樣嘅，就唔係用全球嗰個。

黃女士： Yes.

主席：（經傳譯員）咁即係話你可以自己去界定嗰個界限喇，即係取決於嗰架車喺邊度喇？

程艾樂先生： Yes.

主席：（經傳譯員）譬如話喺咩嘢嘅經緯度喇，你就係喺咩嘢嘅區域裏面喇，譬如話係咪時速 50 公里喇，或者就係你可以決定--可以自己譬如自己訂定譬如 55 公里就喺一個 70 公里嘅區域裏面，就入 55（原文照錄）公里。

程艾樂先生：Absolutely, Chairman.

黃女士：（經傳譯員）咁當你哋傾緊喇，係可以--嗰啲參數同埋係黑盒可以點用？

程艾樂先生：（經傳譯員）當時我哋傾緊嘅就係點可以最佳使用到呢啲嘅訊息喇，去改善運作喇，改善嗰個表現喇，同埋安全。

主席：（經傳譯員）你講喇，就係話如果揸車揸得好，就唔會唔適當咁樣加速，唔會突然間剎車，唔會突然間停車，咁個油耗就會好好多嘞。

程艾樂先生：（經傳譯員）冇錯。

黃女士：（經傳譯員）我想問嘅第二樣就係呢個三十秒呢樣嘢。根據呢一方面嘅資料，係可以收集資料，每秒就收--逐秒收集，但係呢一度就話系統只係每三十秒收集資料。

主席：（經傳譯員）唔係，係話每三十秒發送。

程艾樂先生：（經傳譯員）呢個其實都係可以自己去改㗎，你可以不斷咁傳輸喇，或者每十秒、每三十秒，甚至唔輸出都得㗎，唔發出都得㗎。

主席：（經傳譯員）呢個其實就係 Kulis 先生所講嘅，係可以自己選擇去唔去訂定呀。

黃女士：（經傳譯員）係，你之前都講過話係實時功能喇，就係有咁樣嘅好處，但係呢一個好處，呢一個功能就犧牲咗嘞。

想睇番，前僱員文件夾 1，你嘅意見書，第 40 頁。我哋講緊係一啲嘅國家，即係你公司嘅當時就希望係從中可以得到一啲嘅經驗㗎。

你亦都提及過紐西蘭，喺嗰個 GreenRoad.com，綠色道路，呢啲就係關於巴士公司使用呢個系統得到嘅好處，尤其就係可以將不良嘅駕駛表現減半，同埋呢一個嘅相撞嘅意外係減半喇，而係巴士司機就係即係架車係撞人哋嘅話，就減少咗係七成㗎。

咁呢個係咪其中有傾過呢？

程艾樂先生：（經傳譯員）唔係呀，呢個資料其實係上年我先知道嘅。

黃女士： Last year?

程艾樂先生：（經傳譯員）咁我亦都有引用㗎。

黃女士：（經傳譯員）我想畀一份關於綠色道路 GreenRoad 嘅文件你睇。

呢個就係 12 年 7 月 12 號嘅文件嚟嘅，提及到：

「綠色道路其實係喺安全管理同埋司機嗰個嘅表現方面喇，係個領先者嚟㗎。」

主席：（經傳譯員）日期係幾時呀？

黃女士：（經傳譯員）12 年嘅 7 月 12 號。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）第二段嘞，嗰度就話嘞：

「綠色道路其實已經係可以喺倫敦將嗰個駕駛嘅風險，就於七十架巴士減低六成㗎，係由 2010 年係已經有一百一十位嘅司機用過㗎嘞。」

跟住嗰段嘞：

「利用流動同埋雲端嘅技術喇，綠色道路可以幫助駕駛者自己去改善㗎。因為會即時係將佢哋駕駛嘅表現，就係透過一個二極管嘅表板上面嘅顯示，同埋一啲詳細嘅分析，建議去畀--即時去話番畀司機，同埋係車廠嘅經理聽。」

當時，因為我睇到呢份文件喇，係 12 年嘅 7 月 12 號，但係喺你哋會議嘅時候，係冇傾過㗎，係咪呀？

程艾樂先生：（經傳譯員）唔係呢間公司喇，咁但係個概念，喺呢份文件裏面所提出嘅概念，其實係同呢啲概念係一致嘅。

黃女士：（經傳譯員）我哋講番你嘅係意見書，就係呢一個 40 頁嘅第四段，提及到將呢個項目係放棄。咁你亦都提過嘞：

「其中一個主要嘅改變，喺 2015 年係管理層嘅改變就係話，呢一啲決定同埋指示喇，係好少用文件記低㗎，有時就係冇乜特別嘅理由，就會將佢係調轉㗎，亦都冇係同一啲內部嘅持份者傾過或者諮詢過。」

「內部持份者」，你指咩呀？

程艾樂先生：（經傳譯員）即係唔同部門工作嘅人囉。

黃女士：（經傳譯員）咁跟住嗰頁嘞，第 41 頁。你提及喺第二段就話：

「由於問題嗰個嘅特定性質，即係指係關於九巴，同埋喺專營權界別方面，其實已經發生咗好多事㗎嘞，咁呢個其實都係由於過時嘅監管框架喇，冇公開競爭喇，冇使用科技喇，低透明度喇，同埋監管者同埋專營者佢哋嘅關係係有一個直接嘅系統性影響。」

主席：（經傳譯員）你講話呢個字係用咗「系統性」，其實你指嘅係一個根本，你用錯咗字，係應該「systemic，根本」，係咪呀？

程艾樂先生：（經傳譯員）係。

黃女士：（經傳譯員）第一個就係話過時嘅監管框架，可唔可以進一步解釋，你覺得而家嗰個嘅監管架構有咩嘢嘅過時地方？

程艾樂先生：（經傳譯員）而家我哋嘅規管架構，喺香港，就係好耐之前嘅。當其時，我哋冇相關嘅科技可以監管，監察一啲唔同嘅操作喇。但係而家，我哋有好多嘅數據可以搜集到，譬如我哋講緊人工智能，或者自動駕駛等等。所以喺香港目前嘅規管架構，就冇--就其實同即係二十、三十年嘅時候已經好唔同嘞，個情況。

例如如果香港嘅巴士嘅公司，如果佢話佢哋係有自動駕駛咁樣，而家我哋嗰個規管架構就冇一個咁嘅相關嘅規管架構，但係其他嘅城市其實佢哋已經係進步咗，佢哋亦都係已經係改革咗佢哋規管架構，致使到有啲創新嘅概念可以得以實施，但係香港就冇。

黃女士：（經傳譯員）你講緊係邊個城市？

程艾樂先生：（經傳譯員）例如中國大陸、新加坡、杜拜、阿布扎比等等，咁佢哋好多嘅城市都已經係改革咗佢哋嘅規管架構，譬如有開放數據，框架，咁同埋做咗好多嘅改革，譬如好似可以有自動駕駛，譬如話電動巴士，呢一個嘅太陽能巴士等等。

主席：（經傳譯員）關於呢一個自動駕駛嘅方面，你係--仍然我哋需要一個人喺架車度㗎，即使係自動駕駛，就唔係純粹係只可以係電腦操作。

程艾樂先生：（經傳譯員）係，冇錯，呢個係第一點。如果譬如你話--有好多時候，我哋又係需要有審批同埋批准，而嗰個批准嗰個過程，就係比較困難㗎。

黃女士：（經傳譯員）關於嗰個巴士嘅性質，你就比較關注，但係關於嗰個總嘅規管架構，關於嗰個黑盒，你知唔知其實喺呢個黑盒嘅巴士--巴士黑盒佢裏面，其實有啲咩資料呢咁樣？咁香港就係缺乏呢方面，咁但係其他嘅城市係點？

程艾樂先生：（經傳譯員）呢個係一個正常嘅情況，譬如你去到一個發展嘅城市，其實好多呢個遠程系統已經係採用，譬如甚至乎係土耳其喇，我就前排去過，譬如其他嘅歐洲嘅城市，全部都係有呢個遠程訊息系統。

譬如話首爾、新加坡、土耳其等等，呢啲城市同香港都係差唔多，咁佢哋都係有好多人用交通工具，咁佢哋有遠程訊息系統，令到佢哋成個嘅表現係即係進步咗好多，改善咗好多。

黃女士：（經傳譯員）我哋就已經講過規管架構，第二個嘅問題，就係話缺乏公開競爭呀。你可唔可以仔細講講？

程艾樂先生：（經傳譯員）譬如我睇番新加坡，新加坡係一個例子，喺新加坡，佢哋就同香港嗰個巴士嘅2012、13年嘅時候，同香港差唔多。

咁但係當其實佢哋開始改革嘞，佢哋開始睇番個唔同嘅環境嘅改變，當其時佢哋睇番個情況，佢知道而家嗰個其實繼續嗰個巴士嘅模式就係唔可以持續，咁佢就有一個新嘅規管架構，而家佢哋嘅服務已經改善咗，佢哋嘅表現改善咗，好多嘅創新，亦都佢哋而家已經成為一個喺呢個區裏面嘅領導者嘞，喺巴士營運方面。

點解會發生咁嘅事，因為佢哋係已經開放咗個市場，有好多嘅國際嘅人士亦都入咗佢哋嘅市場度。

如果喺香港，就冇乜嘅競爭，其實我哋一直都係呢一批嘅營運者，其實基本上冇其他嘅新嘅加入者，其實因此佢哋就缺乏一啲嘅誘因，係創新呀，同埋改善嗰個營運嘅效率等等。

咁呢個就係我所謂嘅缺乏公開競爭嘞。

主席：（經傳譯員）你嘅意思就話新加坡其實係邀請一啲有做招標去營運巴士，咁亦都令到有個競爭，而呢一個國際嘅公司亦都係入到嚟新加坡嗰度，係營運嗰啲巴士㗎，係咪呢？

程艾樂先生：（經傳譯員）係，我--呢個係有個叫易塔通公司喇，喺新加坡。咁喺佢哋入嚟之前，嗰啲人就成日話就係唔夠司機㗎，成日都投訴，咁同香港差唔多情況。

但係今日，呢一個易塔通巴士公司喺新加坡，其實已經有多過佢哋所需要嘅巴士司機嘞。

主席：（經傳譯員）佢哋點樣做到嘅呢？

程艾樂先生：（經傳譯員）因為佢哋用咗一個好嶄新嘅人事管理嘅方法。我嗰日就去探訪過佢哋嘅車廠㗎，非常之舒服，非常之好，呢個係一個好平等嘅一個管理模式，嗰啲司機就覺得佢哋自己係成個嘅系統嘅服務之中嘅一員，重要一員嚟㗎。

主席：（經傳譯員）呢個係新加坡喇。咁相比香港，你會點樣形容呢？

程艾樂先生：（經傳譯員）但係香港，我就會話，就係一個--個管理層就覺得司機成日都係啲好麻煩嘅人，成日都係要求一啲好唔合理嘅要求喇。我自己都係一個持牌嘅司機嚟嘅，咁嗰啲司機就認為，嗰啲管理層坐喺個 office 度喇，佢哋完全都唔知道發生緊啲咩嘢事。

咁佢哋大家係缺乏互信㗎，所以我就話，我哋係要改革呢一個嘅行業，以確保呢個嘅行業啲人可以吸引到新血。

我哋亦都要明白，呢個巴士服務係我哋嘅城市嘅其中一員，重要嘅成員嚟㗎，每一日就係九巴載三百萬嘅乘客㗎，如果我哋唔能夠解決呢啲問題，就--我哋可以買最好嘅巴士，但係如果我哋冇好嘅司機，咁就冇用㗎，成件事係做唔到㗎。

黃女士： Thank you.

主席：（經傳譯員）好，咁既然你提到呢樣嘢嘅時候，咁你覺得我哋香港嘅巴士嘅質素，同埋佢哋嗰個維修嘅情況，你點樣睇？

程艾樂先生：（經傳譯員）我會--我對佢哋有好高嘅評價㗎，香港嘅巴士就係嗰啲工程方面係好好喇，佢哋會十七、十八年喺個路上面喇，即使佢哋就嚟要退休，其實仍然個狀況都好好。

主席：（經傳譯員）因為佢哋嗰個維修做得唔錯？

程艾樂先生： That's correct, yes.

黃女士：（經傳譯員）咁培訓方面呢，司機培訓方面又點呀？

程艾樂先生：（經傳譯員）呢度係有兩方面嘅，一個就係課室嘅培訓喇，另外就係實際路上喇。我哋睇過啲文件，就係委員會送畀委員嘅，咁好多人就用咗好多嘅時間去做培訓，咁佢哋剔呢個盒呀，有好多嘅守則等等，但係究竟啲人有冇有個動力去接受培訓，有個問題。

一個好基本嘅野就係話，關於呢個服務質素，個僱員就唔係睇下呢個就係一個份工，而係佢哋睇到呢個係一個責任嚟嘅，呢個就希望我哋喺培訓能夠達到呢一點。咁目前嚟講，我哋係缺乏呢一點嘅。

主席：（經傳譯員）你提到關於香港同埋新加坡嘅分別喇，咁香港，關於呢個招標嘅

方面，香港嘅情況係點㗎？

程艾樂先生： In terms of?

主席：（經傳譯員）招標，譬如話好似續牌，續呢個專營權續期，咁香港嘅情況同新加坡係點樣對比呢？

程艾樂先生：（經傳譯員）喺香港，其實喺過去二十年都冇任何招標嘞。第二，通常如果佢續經營權嘅時候，咁嗰個規管就係，就會話呢個嘅公司已經做得唔錯嘞，咁所以我哋就應該係續佢哋嘅經營權。

咁但係其實冇睇番有啲嘅基準嘅研究，即係譬如話國際係點樣樣，其實佢哋係咪真係達得能夠國際標準，喺譬如創新方面，喺呢個效率方面呀。其實佢哋可唔可以再叫呢啲目前嘅營運者做得更加好嘅呢？又或者佢哋應該諗下，可以將一啲新嘅人加--新嘅公司加入嚟，就將成個行業嘅水平可以提升㗎。

黃女士：（經傳譯員）你下一個嘅投訴就係話，冇引進一啲技術㗎。你就提過一個例子，關於遠程訊息系統，咁除咗此之外，你仲--喺呢一點上面，你仲可以講啲咩嘢呢？

程艾樂先生：（經傳譯員）關於科技嗰方面，我而家就做緊個研究，關於人工智能㗎，就使用人工智能喺公共交通嗰方面，咁我就係代呢個公共交通國際聯會去做㗎。咁其實而家喺巴士行業裏面都做緊呢啲嘢㗎，譬如新加坡喇，就係發展咗一個系統，叫做 SMRD(SMRT?)㗎。

佢哋就係攞呢一個--收集好多嘅資料喇，譬如話嗰啲司機嘅行為，咁佢哋就會係預測邊一個司機可能會有出意外，然後佢哋就將佢哋呢個司機嘅培訓就係度身訂造，咁個司機就會係再接受再培訓，就唔會有意外㗎嘞，所以其實係加入同埋就係再培訓，咁就係大大咁減低個意外率㗎。

而家我有啲數字嘅，佢哋就已經係大大減低個意外率喇，或者個事故喇，可能出現嘅事故，就因為嗰個培訓--接受咗培訓嘅。

主席：（經傳譯員）係咪由呢一個嘅新加坡嘅陸路交通管理局去制訂--去收集呢啲資料嘅呢--呢啲數據？

程艾樂先生：（經傳譯員）咁就因為 SMRDC(SMART CEO?)喺德國有一個嘅陳述嘅，所以我就攞咗呢啲嘅數據。

主席：（經傳譯員）你可能就畀--將啲數據交畀秘書處，好嗎？

程艾樂先生：（經傳譯員）可以。

黃女士：（經傳譯員）呢個嘅研究係幾時進行㗎？

程艾樂先生：（經傳譯員）而家都進行中㗎，進行中㗎。

黃女士：（經傳譯員）我可唔可以問，嗰個系統你就收集所有嘅數據，然後分析數據，同埋去預測就有一啲嘅司機特別有可能出意外㗎，咁然後嗰個司機，你就會搵佢出嚟，然後就係再培訓嘅？

程艾樂先生：（經傳譯員）係呀，佢哋發生--出意外之前。

黃女士： Yes.

程艾樂先生：（經傳譯員）咁呢個係第一個例子，第二個就係話關於預測性嘅維修，咁好多車廠裏面嘅程序其實都可以自動化㗎，其實好多世界各地好多嘅營運者做緊好多嘢去提供--引入科技，去提高嗰個服務質素。

黃女士：（經傳譯員）你係講過關於個科技，一個你係講緊就係電子穩定系統㗎，你有冇聽過呢？

程艾樂先生： Yes, I have.

黃女士：（經傳譯員）你覺得呢個電子穩定嘅系統點樣樣呢？

程艾樂先生：（經傳譯員）呢個係肯定就係令到嗰個車嘅表現更加好嘅，特別係一啲道路特別傾側嘅說話，呢個係好有幫助嘅。呢個係一個電子嘅裝置，就會令到嗰個巴士嗰個中心點喇，或者個重心係可以改變嘅。

主席：（經傳譯員）或者我哋去睇番嗰個運輸署嗰個陳述書，佢哋話畀我哋聽，3 月嘅時候話畀我聽，佢哋就係成立咗個特別嘅小組，就係裏面嘅成員包括營運者，同埋製造廠商喇，咁佢就係去睇唔同嘅科技嘅。咁樣又好似好趕忙係去做呢個工作嘅，咁佢哋就睇緊一啲唔同嘅課題嘅。

黃女士：（經傳譯員）係運輸署嘅文件冊嘅第 1 號，就係第 98 頁㗎，呢個係運輸署嘅陳述書嚟㗎。

程生，想請你睇一睇就 98 頁喇，(a)至到(f)，就係一啲嘅係安全設備同埋係使用技術方面嘅，佢哋有探討過。

主席：（經傳譯員）咁睇番 94 頁呀，你就會見到運輸署係點樣解釋。你就見到喇，呢一個文件個頂頭喇就係題目就係叫做喺專營巴士使用技術或者一啲--新技術或者新設備㗎。

咁我哋就講番--睇番--睇到佢哋之前係睇過啲咩嘢，考慮過啲乜嘢喇。

但係呢個工作小組係 3 月中成立㗎，今年嘅，係要睇番呢啲嘅事項喇，咁我就知道，其實佢哋都幾匆忙。

程艾樂先生：（經傳譯員）呢個係一個好嘅措施嚟嘅，係運輸署好嘅措施，但係唔應該係因為有意外先至做，應該無論如何都要做。因為呢幾方面，其實我哋已經係好落後嘞，係只係反應，而唔係話事前去做預防，去預視。

主席： Thank you.

黃女士：（經傳譯員）唔該。第十段提及到一系列嘅車上安全設備，係工作小組睇過㗎。第一個就係電子穩定控制系統，同埋傾側穩定控制系統。

第十二段就有呢個特別嘅設備喇，有進一步解釋。可以睇到喇，嗰個剎車系統點樣可以控制到架車，行番佢嗰個既定嘅路線。使用呢個設備方面，係咪廣泛使用㗎喇，全球，即係以你嘅經驗所知，定係話至少喺新加坡有用呢？

程艾樂先生：（經傳譯員）佢哋新買嘅巴士其實係有㗎，但係我就唔知道舊車佢哋有冇加裝番。

黃女士：（經傳譯員）睇番第二個建議，98 頁，就係：

「將嗰個嘅最高速度限喺每小時 70 公里㗎，就適用於係呢一個落山嘅時候，就使用呢一個車速限制器，將佢限制住。」

睇番 101 頁，呢個亦都係就係話呢一個 2013 年--2003 年屯門公路嘅意外之後係考慮㗎。咁就話：

「其實呢啲就係喺--內部已經係有㗎嘞，就利用嗰個波檔，就用軟件去控制呢一個限速器嘅。」

跟住最後嘞，話：

「如果佢係架車流動嘅時候，咁車速就唔係因為嗰個引擎轉動或者波檔係去控--去決定㗎，而係地心吸力，咁所以係車廠，即係製造商咁就建議話，其實如果話即係安裝呢個嘅減慢--裝呢個減慢器喇，其實係可以係技術上可行㗎。」

但係香港係好獨特嘅情況，因為有好多落山嘅非常斜嘅斜坡㗎，譬如話訂定咗係車速 75 公里的話喇，其實如果架巴士落緊山，佢嘅速度係快過 75 公里㗎。

咁最好，如果話建議嗰個解決方法係用慢速器嘅話，你有咩嘢意見呀？

主席：（經傳譯員）你未講之前嘞，其實你講嗰個減速器--個減速器係咪定喺呢個 70 公里呀？

程艾樂先生： It can be set at any speed--

主席：（經傳譯員）喺香港係咪有咁嘅要求呀？

程艾樂先生：（經傳譯員）係，根據呢個道路交通條例，70 係最高㗎嘞。

主席：（經傳譯員）但係如果你落緊山嘅話，架車一定就會快過 70 公里㗎喇，因為其實係根據而家嗰個系統，已經冇注油㗎嘞。

程艾樂先生：（經傳譯員）其實呢個係有需要用呢個設備，喺香港，因為減速器其實好似喺香港幾年前--廿年前嗰發明㗎，因為當時就發生咗一件嘅意外喇，就係雙層巴士落山發生意外，咁喺香港島㗎，因為巴士唔可以係及時停低，所以就係撞咗埋去嗰個嘅交通交界嗰度㗎。

如果講緊話時速 70 係一個動力嘅--即係講番，即係嗰個係地理圍欄等等，同埋道路限制，如果譬如話時速限制 50，可以將佢係定咗喺 50，如果喺 70 公里喇，咁將佢限為 70，唔會有--嗰個情況就唔會話巴士喺 50 係行緊--50 公里限速，但係時速係行緊 70。

黃女士：（經傳譯員）跟住運輸署下一步--下一個嘅建議就係利用地理圍欄去限制速度㗎，使用呢一個嘅全球定位系統。

程艾樂先生： Yes, that's what -- yes.

黃女士：（經傳譯員）但係如果嗰個地方好多高樓大廈，其實用高--用呢一個嘅全球定位系統係比較困難。

主席：（經傳譯員）係呀，啲路係畀高樓大廈包住。

黃女士：（經傳譯員）其實你知唔知嘞，有冇一啲最近嘅技術係可以即係將呢個--解決到呢個問題，或者減緩呢，至少？

程艾樂先生：（經傳譯員）可以從唔同嘅源頭去攞同一樣嘅數據喇。

全球定位系統係其中一種喇，但係其實如果講緊一啲嘅既定嘅路線嘅話喇，咁其實你都知架車會係去邊度㗎喇，同埋轉緊邊度㗎喇，所以你可以係計到㗎。

主席：（經傳譯員）你話係計番嗰個車轆呀？

程艾樂先生：（經傳譯員）係呀，你可以知道嗰個車轆轉動喇，佢嗰個距離喇，其實你可以計到架車去到邊度。

主席：（經傳譯員）咁即係話就咁一路係就咁計算？

程艾樂先生：（經傳譯員）係呀，因為遠程訊息系統已經有 3G，所以我亦都可以用呢一個嘅 GSM 同埋呢一個手機嘅發送系統，所以全球定位系統其實只不過係其中一個知道位置嘅來源嚟嘅。

但係如果你一知道佢究竟喺邊--架車喺邊，你就可以幾肯定，可以計到架車究竟係發生緊咩嘢事。

黃女士：（經傳譯員）咁即係話你係可以透過遠程訊息系統去調校㗎，如果你有一個數碼地圖，我哋知道運輸署係有數碼地圖嘅，咁佢哋會知道成個香港唔同地區有啲乜嘢嘅車速限制。

你可唔可以將數碼地圖同遠程訊息系統，將佢就係結合，等系統可以自動調

校車速限制，而唔使人手去輸入，咁即係話架車會就於佢當時嘅位置，而有個限速？

程艾樂先生：（經傳譯員）理論上可以做到㗎，但係你要將運輸署同埋巴士公司有一個嘅溝通嘅基建，等佢哋可以知道當時嗰個嘅係車速可以自動輸入去系統。

但係其實仲可以做多啲，因為巴士營運唔係直接同交通嘅限制，車速限制係有關㗎，有啲嘅路段喇，我可以話畀你聽，巴士司機係受到訓練，知道當時係要減速，因為可能譬如話視線受阻，係交通黑點。咁所以，其實可以係唔需要喺影響其他嘅交通情況底下，去限制車速㗎。

主席：（經傳譯員）咁你即係話，其實係可以知道架車喺邊度，當時嘅法定限速，同埋就係如果係巴士公司係想喺某一個地點有一個特別嘅地方，有一個特別嘅係限速可以做到，係咪呀？

程艾樂先生：（經傳譯員）譬如話可能係即係 90 度嘅彎位喇，咁你亦都可以將佢設為呢個 20 嘅。

主席：（經傳譯員）咁如果喺呢啲嘅界限係有超越嘅話，你亦都可以做一個嘅特殊報告？

程艾樂先生：（經傳譯員）係，到時係可以做到話巴士唔可以過呢一個界限㗎。第二就係話，容許巴士司機係真係超過呢個嘅界限，不過會即刻會係發出一個特殊報告。

主席：（經傳譯員）咁你知唔知有個咁嘅數碼地圖㗎，係適用於全香港㗎？

程艾樂先生：（經傳譯員）我知，我知道係公眾可以攞到嘅。

黃女士：（經傳譯員）即係喺我未問你之前，你已經知道有呢個數碼地圖嘞？

程艾樂先生：（經傳譯員）係呀，應該公眾都知㗎喇。

黃女士：（經傳譯員）唔該晒。跟住嗰個嘅設備就係防撞設施，即係 103 頁。程生，我想請你睇巴士公司嘅意見呀，咁喺二十六段，你可以睇得到㗎，105 頁第二十六段。最尾嗰段，話：

「總括嚟講，係專營巴士經營者不認為安裝防撞同埋係保持行車線嘅設備，對於提升佢哋嘅服務安全係有任何嘅提升。」

我想問你，程生，你知唔知道，使用防撞設備喺全球上係咪常見嘅呢？

程艾樂先生：（經傳譯員）係，常見，「常見」其實都係即係比較嘅詞語嚟㗎喇，有好多地方都有用嘅，但係我就唔會唔同--我就係--即係我會唔同意你所講嘅呢啲嘢。

其實即係以我所知道，我哋睇緊嘅技術就係非常之固定㗎，靜止嘅，即係話

一個就套用晒所有地方㗎嘞。但係睇番香港，香港道路好狹窄喇，車亦都係好--行車距離亦都係好近，咁所以其實呢啲嘅設施可能會造成滋擾。但係技術係可以容許你去調校，令到佢哋可以識得自己學識應該點樣做㗎，就係人工智能喇。

每一個路段，你可以講佢嘅參數應該係乜嘢，設定界限，亦都可以訂定嗰個即係警示嘅水平㗎。咁譬如話公路行緊 70，咁喺彌敦道成日行下停下，行緊 30 都可以有唔同嘅參數，可以定唔同嘅參數。譬如定--咁你亦都可以話嘞，去到如果架車行到 30，就唔需要有任何嘅--唔需要啟動嘞，因為行得 30 嘅話，出事嘅機會係好低。

所以其實係睇番嗰個路段喇、路線喇、巴士嘅種類喇，同埋你係好多嘢可以做，甚至連乘客數量都可以係加埋落去。

主席：（經傳譯員）咁譬話喺 2014 年，城巴佢哋有用過一個--有一個嘅係試用神眼。

程艾樂先生： Yes.

主席：（經傳譯員）咁 2014 到而家，你知唔知道喺呢一方面有冇任何嘅發展呀？

程艾樂先生：（經傳譯員）其實嗰個數字已經改咗㗎嘞，喺呢個 2014 之後，即係世界已經唔同咗喇嘛。

黃女士： And the last device that was mentioned--

主席：（經傳譯員）或者可以--有冇人畀你睇過呢個文件㗎，即係關於城巴嘅文件？

程艾樂先生：（經傳譯員）喺九巴工作嘅時間，我冇睇過呢個文件，但係當時我同神眼嘅人員係有傾談過㗎，咁同佢哋係開過會喇，當時係知道係可以係即係做一個嘅測試嘅。

主席：（經傳譯員）咁我哋都信你所講喇，世界自從 2014 年已經唔同咗嘞。又或者我哋可以睇一睇呢個報告。

黃女士：（經傳譯員）呢個係 CTB 第 3 號文件冊，係第 601 頁。

主席：（經傳譯員）其實個問題就係咁嘅，你睇到嗰個報告嘅關注係點樣，咁而家就因為科技已經進步咗嘞，咁呢啲嘅關注其實係咪已經係--問題已經係解決咗呢？

程艾樂先生：（經傳譯員）我就好快睇咗一睇，就關於呢個神眼嗰個準確性㗎，個問題。咁嗰啲公會就係講個準確性就係百分之六十九，但係都可以去救人命㗎嘛，我就話唔會應該係擱置呢個計劃，反而應該係改良佢就真。

黃女士：（經傳譯員）唔該晒。

主席：（經傳譯員）所以你嘅答案就係話，就正如其他嘅裝置一樣，你就可以--就會

係設計一啲唔同嘅界限值，令到呢個科技係可以得以善用嘅，係咪咁呢？

程艾樂先生：（經傳譯員）係，正確嘅。我哋睇兩方面喇，就係關於嗰個撞嗰個嚴重嘅程度同埋嗰個頻密程度嘞。

個嚴重程度就係，如果你嗰個好高速嘅時候，就會係比較嚴重，但係如果喺一啲城市嘅區域裏面，可能嗰個數目係會多嘅，但係嗰個嚴重性係冇咁大㗎。

所以每一間巴士公司都要睇呢一方面嘅，佢哋睇番呢一個嘅安全管理系統嘅時候，佢哋就應該睇呢啲嘅數字，就係唔同裝置畀佢哋嘅收集到嘅數據喇，咁同埋睇番當時嘅交通嘅情況呀等等。

其實如果有好多嘅交通燈嘅時候，就可能成日要停下、揩下，咁嘅情況，從一啲嘅高速公路係你 70--行緊 70 公里係好唔同嘅。所以其實係講緊兩種唔同嘅巴士㗎，如果我哋講緊嗰個營運嗰個角度嚟睇。

黃女士：（經傳譯員）正如你所講喇，嗰個--呢個報告發表之後，科技又再進一步嘞。咁就你所知，呢個嘅科技已經係進步到，其實已經可以係度身訂造一啲嘅嗰個參數，令到其實如果喺即使係好繁忙嘅街道裏面，都唔會造成好大嘅滋擾㗎，係咪咁呢？

程艾樂先生：（經傳譯員）正確㗎。如果你睇番佢哋做試驗計劃，特別係嗰啲自動駕駛嗰方面喇，其實係一個--我哋曾經經歷咗一個嘅歷程㗎，就係關於自動駕駛，係呢一個第一至到第五層級喇。

如果第一級喇，其實都唔係咁自動嘅，咁仍然有個人喺度，咁嗰個人仍然都係揸緊架車。但係喺第四級嘅時候，個司機基本上係就係睇緊嗰個嘅機器點樣去開車，咁其實--所以其實越高嘅級嘅時候，佢就有好多嘅輔助嘅駕駛幫佢㗎。

咁仲有好多呢啲嘅感應器呀，啲相機，咁亦都係畀好多嘅資訊你，致使到你更加清楚周圍嘅環境。

黃女士：（經傳譯員）就下一個，就係關於監察司機嘅裝置。呢個似乎係一個幾新嘅裝置嚟㗎，特別係喺監察司機一啲不安全嘅駕駛。喺第 105 頁㗎，譬如話：

「佢恰眼瞓呀，或者係一啲唔好嘅姿勢等等咁樣。」

喺第 105 頁，兩個營運者就話畀我哋聽，佢哋會係喺 5 月，2015（原文照錄）年開始就會係裝置呢啲系統，就係做實驗㗎，做試驗㗎。

我哋知道香港嘅司機，佢哋通常就開車開好長時間㗎。咁呢個裝置就係希望能夠去搵出呢個疲勞、勞損嘅司機。

咁呢個咁嘅裝置喺世界各地，係咪都好常用嘅呢？同埋佢係有幾有效呢，喺世界各地嚟講？

程艾樂先生：（經傳譯員）其實我就睇唔到呢度係有好廣泛嘅應用㗎，但係我知道其實都有啲試驗計劃嘅。

我認為呢個科技仍然都係喺度演變緊，最終都係會出現嘅，但係而家暫時嚟講，都未係好完善，咁可能有好多嘅誤差等等。

其實有可能會令到個情況更加糟糕，而唔係改善相關嘅情況，可能有時候喺個唔適當嘅時間，就係警示個司機咁樣，咁就更加危險嘞，咁可能有啲咁嘅誤差。

而家呢度就係有個攝錄機喇，睇緊個司機個面容，個表情喇。第二個嘅科技就係--就會睇下佢哋嘅--譬如話睇下佢哋隻眼睛呀，佢哋嘅瞳孔等等。咁亦都係可以好似隻錶咁樣帶上去手上㗎。

我覺得喺一、兩年間，我哋會見到其實兩種科技都會融合埋一齊，但係我喺呢一刻，我就話其實都未係好廣泛應用㗎。

黃女士：（經傳譯員）除咗呢個嘅裝置，你仲有冇其他嘅建議呀？

主席：（經傳譯員）喺繼續之前喇，我諗相信你都知道，有個纜車嘅--2016 年，有個電車嘅有個意外，就發現嗰個電車司機就係一早返工，所以佢就係恰眼瞓㗎，咁喺倫敦㗎，呢啲咁樣嘅防恰眼瞓嘅裝置就有人提議應該係使用㗎。

程艾樂先生： Yes, I know.

主席：（經傳譯員）咁呢個係講緊科技都係應用--呢個科技應用，但係就唔係好廣泛使用，係咪呢？

程艾樂先生：（經傳譯員）我知道就有呢一個--有擺呢一個裝置，但係我就唔係好知道其實係咪成功。如果你係百分之四十至五十嘅誤差嘅時候，咁就會令到我哋都好厭倦嗰啲科技，咁我哋就傾向於就唔理佢嘞。我哋就話呢個科技喺度嘅，但係我哋仲未係有信心佢係譬如百分之九十五、九十七係準確㗎。

主席： Thank you.

黃女士：（經傳譯員）關於呢一個嘅科技嘅裝置，喺呢一個嘅文件提到，咁你仲有冇其他嘅意見呢，就你自己個經驗，可能係幫到去確保呢一個巴士司機開車嘅時候係安全呢，特別係香港？

程艾樂先生：（經傳譯員）咁其實有--其實世界各地都有好多好好嘅成功嘅例子，譬如話人工智能方面喇，呢個都係進步緊，就有一啲嘅數據分析呀，然後我哋就等嗰啲嘅機械可以自己去自學，同埋有其他嘅人工智能嘅科技呀等等。

如果係大埔呢件事件嚟講，其實如果佢未傾側嘅時候，而係我哋知道啲數據，咁我哋就會有幫手--可以幫助係防止呢個意外，咁個督導亦都係可以知道有關嘅數據嘅時候，就可以即時去介入嘞。

其實我哋好多人為嘅因素，其實都係可以去剔除嘅。其實好多時候，個督導喺嗰刻，電光火石之間，佢哋就可以做一個嘅決定㗎。好多時候都會有啲人嘅行為會因為佢哋當時情緒所影響，咁人工智能會係一個方法喇，咁就有一個好--有一啲好理性嘅一個嘅意見畀到你哋嘅，亦都係好準確㗎。

呢個係一個新嘅地帶，我哋可以去探討，咁而好多公司其實都係睇緊，譬如話工程呀，同呢一個--同顧客之間嗰種嘅聯繫等等，咁其實呢啲都係人工智能可以做到㗎。

主席：（經傳譯員）就我哋希望就係話，個督導就係話其實睇到嗰啲嘅異常情況嘅報告，然後或者係劇烈嘅剎車、加速、減速等等，然後佢睇到呢啲嘅資料嘅時候，數據嘅時候，佢就可以喺實時嘅時候即時去介入嘞，係咪咁嘅意思呢？

程艾樂先生：（經傳譯員）咁我就會更加--去得更加遠一點。而家嘅督導如果佢實時車務管理系統嘅時候，佢攞咗啲嘅--睇到一啲嘅數據喇，咁但係人工智能喇--人嘅腦其實只係可以處理一定嘅數據嘅啫，我哋係可以學習，但係呢個嘅人工智能永遠都唔會忘記一啲嘢嘅，所以佢可以做嘅就係話，佢睇下嗰個車嘅情況、道路嘅情況、天氣情況，同埋個道--附近嘅交通情況等等，佢係將所有呢啲嘅參數擺落同一個框架嗰度，然後就係有一啲度身訂造嘅一個方案，提供畀當時嘅情況。

我唔係淨係講緊超速，就係個車尾開始超速嘅時候，就已經係可以做到個風險嘅評審，咁亦都係可以有個即時嘅介入嘅框架。

黃女士：（經傳譯員）係咪意思係話由個系統接咗嚟做，還是係話畀個督導聽呢？

程艾樂先生：（經傳譯員）咁可能就係--就話你就可以就勸喻嗰個司機就話「因為今日落雨呀。」或者「有好多嘅單車呀，小心啲呀。」等等，佢可以做呢啲嘅勸喻㗎。

黃女士：（經傳譯員）係，明白。就係喺之前係話畀你聽，你應該點樣去開車？

程艾樂先生： Correct.

黃女士：（經傳譯員）你下一個嘅投訴就係話缺乏透明度，同埋規管者同埋專營權持有人有啲親密嘅關係嘅，呢個就係第 41 頁，就係 FE-1 嘅文件冊嘞，就缺乏透明度同埋規管者同埋專營權持有人嘅親密關係。咁你可唔可以講講，關於「欠缺透明度」係咩嘢意思？

程艾樂先生：（經傳譯員）就係好多嘅數據都唔係公開資料嚟㗎，譬如話我自己有個個人嘅例子喇，其實我就係喺我屋企門口就等架巴士，然後就我個程式話畀我聽，就話兩分鐘架巴士就會嚟到，但係我就從來就冇見到個巴士喎，雖然喺我個應用程式嗰度，佢就已經嚟咗，同埋走咗嘞，但係我就唔知道佢點樣去核實呢啲資料。

我當然可以係投訴喇，但係--呢個係即係佢哋通常佢哋就--我寫畀佢哋，咁佢哋有啲好標準嘅答案畀我，佢話「我哋會檢討呀。」等等，但係冇改變到喎。所以就呢個就係欠缺透明度嘞。我就係冇足夠嘅資料㗎，我作為一個嘅顧客。

黃女士：（經傳譯員）相比新加坡，我可唔可以問呢個，就係話所有呢啲科技嘅裝置，咁呢啲會擺上個巴士上面喇，咁新加坡政府會唔會資助--直接或者間接資助呢啲嘅改善嘅措施，去加裝一啲新嘅科技嘅裝置喺去巴士上面呢？

程艾樂先生：（經傳譯員）喺新加坡現有嘅做法就係，政府買晒所有巴士，所以資產屬於政府，咁係畀經營者去經營㗎。

經營者係有一個非常之嚴謹嘅係主要表現指標去規管佢哋㗎，所以其實即係佢哋唔可以超越咗呢一啲嘅指標，呢個係一個即係方法去鼓勵佢哋咁樣做嘅。

黃女士：（經傳譯員）咁即係話，如果係保留住巴士嘅資產呀，控制技術或者標準嘅話，其實係咪呢啲原因，所以新加坡政府買咗巴士呢？

程艾樂先生：（經傳譯員）佢哋買政府其實同技術或者咩嘢係無關㗎，只不過佢哋想製造另外一個嘅模式，比較--佢哋嘅目標當時就係從一個社會嘅角度，而唔係一個商業嘅角度去經營巴士。

我唔知你想唔想講呢一部分，但係有關於技術嚟講，政府就係定咗基本嘅技術，即係話呢啲係要求嚟嘅，係專營嘅要求一部分，同時亦都有一啲嘅誘因，令到巴士經營者可以去做得更好，等佢哋去創新同埋投資，譬如話車上一啲嘅設施，直接將交通資訊係畀佢哋嘅控制中心，呢啲都係要求，喺合約上面寫咗㗎。

主席：（經傳譯員）喺專營合約上面呀？

程艾樂先生：（經傳譯員）係。

主席：（經傳譯員）香港係咪咁呀？

程艾樂先生：（經傳譯員）香港其實嗰個嘅定義非常之寬鬆㗎，因為個規管係好寬鬆喇，即係話呢啲參數係非常之廣闊㗎，所以係有好多唔同程度嘅變異㗎，即係一個好高程度嘅即係人為嘅操作。

黃女士：（經傳譯員）咁喺 41 頁裏面喇，你就曾經講過話喇，係一啲唔同嘅系統，有好大嘅差異呀。喺呢個脫班嘅情況又係，即係所以好大嘅即係關於脫班有好嚴重嘅情況㗎。咁係呢個同--會唔會影響到香港嘅安全環境呀？

程艾樂先生：（經傳譯員）冇關係㗎。

黃女士：（經傳譯員）咁而家我想睇番，就係呢一個 18 年 6 月 18 號嗰份嘅意見書，44 頁。

你就提及過嘢，第一個黑點就話香港缺乏一個中央嘅交通控制中心...

程艾樂先生： Correct.

黃女士：（經傳譯員） ...呢個中心就可以監管到所有嘅公共交通經營者嘅實時運作㗎。你係咪認為政府其實應該要有一個中央交通控制中心？咁但係係點樣可以監察到所有公共交通嘅實時狀況呀？因為睇番喇，香港嘅巴士量係好多㗎，所以你嘅建議係點做呀？

程艾樂先生：（經傳譯員）其實之前你同我講話關於新加坡同埋首爾我有講過，其實有兩個層面嘅，一就係一個中央嘅控制系統喇，另外一個就係巴士管理系統。

主席：（經傳譯員）可以畀程生睇。

程艾樂先生：（經傳譯員）呢個就係我所講㗎嘞，喺經營者方面，就有個巴士管理系統喇，就係睇番呢個巴士嘅資產，但係另外一個層面，就係中央嘅交通控制中心，就睇番就係呢一個嘅整個交通系統喇，交通喇，交通燈喇，道路基建喇，呢啲就係公開嘅資料嚟嘅。

黃女士：（經傳譯員）咁我想請你睇嘞，SEC-2號文件，825頁，825頁，第2.8段嘞，裏面就提及過一個新嘅巴士管理系統，呢度其實就係一個嘅中央控--交通控制中心，你建議嘅就係除--即係有兩個層面喇，第一就係巴士管理系統，由邊個負責呀？

程艾樂先生： By the bus operator.

黃女士：（經傳譯員） 巴士公司。

程艾樂先生：（經傳譯員）如果你睇番2.10段，同一份嘅文件，一個中央嘅係交通控制中心。

黃女士：（經傳譯員）即係需要連接喺巴士管理系統同埋一個係巴士資訊--車務資訊系統，等嗰個中央控制中心可以監察到，係唔係？

程艾樂先生：（經傳譯員）咁但係從一個城市嘅角度嚟睇，睇晒成個交通運輸嘅資產㗎，無論係有固定資產又好，一啲移動嘅資產都好。

黃女士：（經傳譯員）新加坡係咪有呢個咁樣嘅系統呢？

程艾樂先生：（經傳譯員）有一個類似嘅系統，但我就唔係好肯定嗰個嘅範圍係有幾大，佢哋有大量功能喺系統入面㗎，我最近知道，即係我係研究人工智能方面嘅時候知道，其實佢係甚至用一啲無人機去收集實時交通資訊，然之後就可以做一個反應系統，去調較交通燈，所以係一個整體嚟睇，係等佢可以達到平衡，所以佢適用範圍係好大。如果睇番，即係譬如話係百萬分之一機會會發生嘅情況，其實呢一類型嘅系統可以救到好多人命。

黃女士：（經傳譯員）呢一段就話呢一個系統似乎就唔係巴士公司畀實時資訊，而係呢個中央交通控制中心發放呢啲嘅資料，又即係話由政府係發布畀公眾，操作方

法係咁，係嘛？

程艾樂先生：（經傳譯員）其實係攜手進行，即係佢哋唔係一啲話秘密機構，其實佢哋之間都有一個嘅關係。如果你想知道譬如話嗰架巴士有幾多人，就係巴士管理系統。如果係一啲高層次啲嘅，譬如話一啲交通資料、交匯處嘅資料、事件，就係巴士公司以外嘅資料，就會來自中央控制中心，佢就會將呢啲資料交番畀巴士公司，等佢哋去確認㗎，所以係雙向，等嗰個嘅係溝通會好啲，唔該。

黃女士：Yes，understand。（經傳譯員）45 頁，喺第一點，呢一頁嘅第一個黑點，你就提及到目前香港嘅監管制度呀。你就話，就係有限呢一個嘅利潤，但係就即係冇限到佢嗰個嘅虧損，你意思係指咩嘢呀？

程艾樂先生：（經傳譯員）其實關於巴士方面，喺制訂呢一個嘅規管架構嘅時候，當時係話有呢一個嘅保證利潤，當時可能係 90 年代嘅時候，但係就有改變嘅。喺呢一個 2012 年嘅時候，因為鐵路擴展，所以九巴當時就開始蝕錢。一路蝕錢，一係就唔再做，一係就會加車費，但係呢個唔係一個正確嘅方向。因為政府係控制到呢一個控制監管，亦都係控制車資嘅。如果唔係嘅話，喺世界各地嘅巴士嘅經營者--譬如話，如果香港嘅巴士公司係一個嘅商業機構，佢賺到錢，佢要做咩嘢呢？佢就唔再經營專營。所以就係如果巴士經營係冇錢賺嘅話，其實你係就唔可以話邀請世界各地嘅經營者嚟你嘅城市嗰度經營。

其實所以如果你講嘅就係現有嘅經營者，其實係有佢呢個嘅好處，因為佢哋已經投資咗一大量嘅成本。但係新加入嘅經營者，其實就唔係咁公平，因為佢哋乜嘢都要由頭嚟過。如果有一個可持續經營嘅商業模式嘅話，其實你就可以吸引到世界各城嘅企業嚟經營，因為佢哋睇係睇得好長遠。

黃女士：（經傳譯員）尾嗰一點，45 頁，你又提及過，而家嘅報告系統同埋監察系統就係好古舊，而當時就係設計嘅時候係冇任何嘅技術去監察巴士同埋司機，你可唔可以解釋一下？

程艾樂先生：（經傳譯員）我想講就係話，而家世界各地，巴士嘅規管者其實都係會睇番即係用唔同嘅系統去管理。但係其實香港就要睇番話巴士幾時離開總站，同埋之後就冇理到佢哋嘅表現，所以就發生好多問題。

作為顧客，如果我企喺度等緊巴士，其實即係你可能走咗架巴士，你可能就要等二十分鐘、二十五分鐘都未有下一架嚟嘅。我想講嘅就係話，佢哋其他地方係使用技術去令到巴士之間有間距。譬如話如果你去到倫敦，譬如話你即係嗰架可能去到某一個地方停一停，等佢可以同之前個巴士嘅距離遠啲，所以對於乘客嚟講，嗰個服務就比較平均。就唔會話譬如話即係一架巴士嚟咗，一分鐘之後又嚟一架，跟住廿分鐘之後先嚟另外一架。其實呢個方法，就係而家規管者係做㗎，所以有啲係主要係表現指標。譬如話喺新加坡嚟講，喺巴士路線上面係一路睇住佢，而唔係話淨係睇佢幾時離開個站，跟住就唔理。

黃女士：（經傳譯員）你就呢度提過呢一個過長嘅等候時間，同埋就要監察番即係使

用到呢一個實時訊息，同埋遠程訊息，係佢呢個站與站之間都可以睇到，同埋即係前端、後端都會可以控制到、監察到。其實呢個係咪即係話可以減少到呢個過長嘅等候時間？

程艾樂先生：（經傳譯員）遠程訊息其實已經喺度，實時運作其實即係呢一個硬件上面嘅一個軟件嚟嘅啫，所以其實唔係好難做。我會將呢兩個結合，因為大部分嘅人都係講，就話其實投資喺遠程訊息嘅，都有投資落去實時操作系統。因為係當啲遠程訊息系統，譬如 Openmatics 嚟講，佢哋係會畀埋呢一個實時管理系統你嘅。所以其實你係可以將佢結合埋一齊變成一樣嘢，就係九巴就決定自己去做。其實我哋有咁樣嘅技術，不過就冇監察，亦都係有監管，但係個監管係唔關於呢啲數據事。

黃女士：（經傳譯員）最後我想同你講就係呢個嘅五年發展計劃，請你就睇呢個嘅 39 頁底部，係呢一個嘅五年遠期計劃，前僱員 1 號文件夾。你就話係負責統籌、準備同埋呈交呢個嘅五年遠期計劃，包括埋路線發展計劃去畀運輸署長。其實你其中一個嘅角色，就係要睇番呢一啲同安全有關嘅計劃，同其他嘅車務或者營運計劃係咪一致。你有冇參與 2018 至 2023 年嘅五年遠期計劃嘅制作？

程艾樂先生：（經傳譯員）最近提交嗰個？

黃女士：Previously.

程艾樂先生：（經傳譯員）我喺 2013、14、15 年呢幾年，我都係有提交嗰個計劃。2016 年就係有 2017、18 年規劃嘅，但係都係有個框架嘅啫。

黃女士：（經傳譯員）唔該晒。我睇睇嗰個嘅遠期計劃，其實你有冇睇過，或者你有冇參與過畀意見？

去到運輸署嘅 1 號文件冊 180 頁。點解我會問呢個問題呢？首先就係九巴個經營權，就係 2016 年去討論嘅。嗰個經營權，就係 2017 年 3 月批出。當然你係制作呢個遠期計劃嘅時候，我哋都係要睇下個意外率，同埋之前嗰兩年嘅意外率係點樣樣。我哋睇一睇呢個嘅規劃，呢個係九巴嘅遠期計劃。

主席：（經傳譯員）係邊個日子，幾時去寫嘅呢？

黃女士：（經傳譯員）喺 2017 年 6 月嘅時候，1035 頁有寫到，係呢一個運輸署第 4 號文件冊嗰度寫明。

首先我想問一問，你有冇提供呢個意見，就住呢個報告？

程艾樂先生：（經傳譯員）No，冇。

黃女士：（經傳譯員）如果係咁，我就唔需要去問。

主席：（經傳譯員）但係其實呢啲嘅課題，其實每一年都會係擺落去個報告度。

程艾樂先生：（經傳譯員）2016 年嗰個報告，我就都有畀意見，我就喺 2016 年 9 月離開九巴。

主席：（經傳譯員）或者我哋可以就住某個課題去傾一傾。

黃女士：（經傳譯員）我哋去睇番 187 頁，我就特別有興趣有關於呢個車長嘅培訓同埋監察計劃。我或者咁樣提我嘅提問，如果你睇睇呢個嘅呢一段，呢度有提到就係九巴係好致力係提供安全、可靠同埋舒適嘅服務，呢度係講緊就話啲好嘅駕駛嘅態度，同埋防衛性嘅駕駛。亦都有啲駕車師傅，亦都會去監察呢啲學院，亦都有需要嘅時候，有啲嘅罰則咁樣。我哋都會特別睇一睇喺某一個嘅路線，睇下佢會唔會嗰個司機特別多突然之間煞車。如果係有需要嘅時候，亦都係會將有關嘅建議提番畀個車長，希望能夠減低事故嘅情況。呢個係有實時嘅駕駛提示器，就係特別對於一啲車長佢個駕駛態度唔係咁好，就有幫助。你就話，亦都會有一啲主動去提示咁樣。

但係而家係冇一啲實時嘅駕駛提示器，或者係--嘅時候，可唔可以係有一啲實時嘅數據可以提番畀荔枝角嘅車廠？

程艾樂先生：（經傳譯員）唔可以實時嘅，但係可能係之後幾日。但係佢哋會好主動去提示嗰啲司機，但係就用緊一啲已經落後嘅數據。

主席：（經傳譯員）即係話，其實係有啲實時嘅數據收集咗，只不過係之後先至睇番？

程艾樂先生：（經傳譯員）冇錯，係，嗰啲數據可以實時去收集，有啲人就可以分析。然之後有人講，就話「喂，呢位司機，你上個星期揸得唔係咁好」，我係會主動提出呢一啲嘅提示，但係就係根據係一啲已經過去嘅數據。我提議就係應該係有實時嘅數據收集，同埋實時嘅反映先至係最好。

黃女士：（經傳譯員）喺 8.3.2 段，第一點嗰度，就係話嗰啲電子嘅行車記錄儀，就係我哋使用會係去監察車長嘅表現，特別係超速。第二點就係駕駛提示器，就係喺所有嘅巴士上面有裝置，就幫助車長可以喺佢哋個學習課堂之中嘅技能可以使用。呢啲嘅好處，就係可以減低意外嘅風險，減低嗰個壓力，同埋係增加車長對於控制車輛嘅信心嘅。呢個純粹都係睇番之前收集嘅數據，係咪呀？

程艾樂先生：（經傳譯員）呢個環保安全駕駛，其實唔等如真係環保嘅駕駛...

主席：（經傳譯員）其實呢個嘅意思，即係話唔好話突然之間煞車，唔好突然之間加速或者減速。

程艾樂先生：其實就係話慳油嗰方面嘅啫，所謂個環保。

黃女士：（經傳譯員）第二個部分，我係有興趣...

主席：（經傳譯員）當你喺九巴工作嘅時候，有冇喺個參數裏面，包括譬如超速嘅，有啲自動係會發一啲報告出嚟？

程艾樂先生：（經傳譯員）就冇一啲嘅報告自動發出嚟，但係有啲人就會去分析呢啲嘅數據，睇番嗰個司機嘅表現，呢個係一啲數據嘅分析嘅，有人係做。

主席：（經傳譯員）但係嗰啲裝置，其實就話如果你擺啲數據落去嘅時候，其實係會有一啲自動嘅報告可以發出，但係冇咁樣做喎。點解冇咁做？

程艾樂先生：（經傳譯員）其實有其他人更加適合去回答呢個問題，其實我自己都有個疑問，點解我哋擱置咗嗰個計劃？其實對於香港嘅巴士營運嚟講，係會帶嚟莫大嘅利益，唔該。

主席：Thank you.

黃女士：（經傳譯員）我哋去睇另外一個文件--仲有一個問題，第 8.3.7 段呢度有一個嘅安全嘅措施，其實係有一個輔導服務，就係去幫一啲嘅司機同埋佢哋嘅家庭成員，如果佢哋日常生活有啲咩嘢問題。我想問，呢個喺譬如新加坡嚟講，有冇一個嘅制度或者系統，就係搵出、去識別一啲司機，其實佢哋有心理嘅問題，佢哋唔適合揸車？有冇一個咁樣嘅制度或者系統？

程艾樂先生：（經傳譯員）呢個司機個心理質素，其實對我哋嚟講，或者係呢個世界各個嚟講，都係最主要嘅挑戰嚟。有啲人而家都係用緊呢一個人工智能去解決呢個問題，譬如去睇下你嗰個生物嘅指數，或者你嗰個表情係點樣，就係瞳孔擴大嘅情況等等。呢啲都會話咗畀我哋聽，究竟嗰個司機個心理狀態係點。而家呢個科技都係發展中，喺新加坡有呢一個嘅類似嘅系統，其實係喺呢個方向，睇下呢個司機對於一啲實時發生嘅情況有乜嘢嘅反應，然後就去預測呢一個嘅司機會唔會有意外，然後就去介入，同埋就係去幫呢個司機。呢個呢，一係其實你就太過自在，又或者你係太過大壓力，譬如話你啱啱同你嘅配偶拗咗交，然後你就返工。其實喺而家市場上面，其實都未有一個系統係可以完全偵察到你當其時個心理狀態。

黃女士：（經傳譯員）另外有一個嘅 Miscellaneous 1，就係呢個道路安全議會嘅一個信件，就係日子係 2018 年 5 月 31 號。

程艾樂先生：（經傳譯員）可唔可以話畀我聽係邊一頁？

黃女士：（經傳譯員）呢個係呢封信件嘅第一頁，第 127-5 頁，係呢個 Miscellaneous 嘅第 1 號文件冊。

程艾樂先生：（經傳譯員）係，我睇到。

黃女士：（經傳譯員）我講你睇睇第 127-6 嘅其中一段，佢哋講呢個就係關於一個遠程訊息系統，就係睇下嗰個介面係點樣樣。佢就話佢會監察以下嗰，R、I、B 同埋 A，呢個就係空轉、急劇嘅煞車，同埋加速，同埋超速等等咁樣。呢度其實又有一啲唔同嘅參數，就係喺一個正常嘅參數嘅價值。而佢如果唔係呢啲參數嘅數據以內，就會係自動就會喺個電腦嗰度展示出嚟，然後呢一個督導就會知，然後就會採取呢一個跟進嘅行動，可能係勸喻，或者輔導，或者甚至係再培訓，呢

個似乎係警方係做緊。呢個會唔會同新加坡嗰個遠程訊息系統差唔多？

程艾樂先生：（經傳譯員）佢哋係有關於--有好多唔同嘅供應商，每一個供應商提出嘅產品都有少少唔同，但係佢哋希望所做嘅嘢都係一樣嘅啫，希望知道呢一個嘅車輛嘅情況、表現，同埋就係希望提供實時嘅資訊，讓你可以監察呢個嘅車輛嘅表現，同埋佢個地點係點樣。

主席：（經傳譯員）LKW Parts and Services Limited 係咪一間香港公司？你識唔識呢間公司？

程艾樂先生：（經傳譯員）冇，從來冇同過佢哋有過任何嘅來往。

黃女士：（經傳譯員）另外一個題目，就關於黑盒。去到呢一個運輸署文件冊嘅第 1 號，第 393 頁。呢一封信係寫出咗委員會提出嘅事項一啲嘅回應嚟，呢個係 2018 年 7 月 13 號，請你就係睇番呢個第 394 頁。

問題就係問，即係邀請運輸署去搵出一啲時候，就係關於通訊方面，就係話同巴士司機更佳嘅管理，而唔係巴士經營。喺呢一啲嘅信件來往裏面，運輸署有冇畀任何嘅指示畀巴士公司去講話使用一啲新嘅應用程式？如果呢一啲嘅通訊係書面嘅話，請你將呢啲書面就係交出嚟。如果係口頭講嘅話，亦都要講清楚，就係邊個講、嗰個性質，同埋幾時？

主席：（經傳譯員）或者可以先請佢講呢一個運輸署文件，即係點解會問呢啲問題，你畀咗嗰個背景資料佢先，可能佢就會更加易去理解個內容。

黃女士：（經傳譯員）應該係附件 2，就係運輸署文件夾 5，1688 頁。程生，呢份文件就係運輸署嘅文件。呢度講就係話，喺經營巴士營運上面，使用新嘅技術。呢個就係運輸署嘅文件，就於最近提升專營巴士營運安全方面，呢個就係同專營巴士公司係一齊合作做嘅，關於使用新嘅技術方面。

1689 頁就提及到黑盒，即係一啲嘅電子行車記錄儀。喺你第 5 段可以見到話，由 2004 年 7 月 1 號開始，電子行車記錄儀，通稱「黑盒」，喺所有嘅新專營巴士已經係符合運輸署喺 2003 年 10 月所施加嘅要求，應呢個要求係安裝咗，所以而家所有專營巴士都有黑盒。如果睇番第 7 段，就話雖然係冇任何正式同埋書面嘅提升嘅要求，即係關於黑盒嘅規格方面，即係自從 2003 年。但係運輸署就係不時同巴士製造商，同埋專營巴士經營者，就係一路去傾關於一啲新嘅技術去提升巴士上面現有嘅設備。第 8 段就話專營巴士經營商，其實就係喺呢一個早於 2006 年嘅時候，就係已經開始擴大黑盒裏面儲存嘅資訊，所以除咗話一啲基本上嘅功能之外，仲會睇下個巴士司機個表現，同埋記錄低就係有關於佢煞車、開門、鐘聲等等，去幫助佢哋管理嘅。第 9 段話喺呢幾年間，運輸署同巴士經營商有溝通，要求佢哋去研究，同埋去睇下使用新嘅技術嗰個嘅可行性，同埋就係關於黑盒儲存嘅資料去更佳管理佢哋嘅巴士運作，同埋巴士司機。譬如話使用全球定位系統，連同埋一啲嘅數據轉移。運輸署就要求巴士公司就係提供一個嘅巴士實時到站資訊，呢個就透過一個流動嘅平台去提供，

係可以更佳服務公眾人士，呢個就係 2015 年佢哋同巴士公司傾新嘅專營權--續經營權嘅時候，佢哋所講。

主席：（經傳譯員）呢個就係個背景，喺 2003 年 11 月嘅時候就講過話，巴士係要月 1 號開始，全部都要有黑盒，所以講就係話之後同埋之後嘅十五年，有冇提升黑盒嘅功能，同埋呢一啲嘅訊息功能。你就喺呢段時間，就係喺九巴度工作，負責呢方面嘅。

程艾樂先生：（經傳譯員）我可唔可以講講？喺 2003 年發生嘅事，其實就唔係你所講今日發生嘅事，冇關個喎。

主席：（經傳譯員）不過我哋就想睇番，2003 年係最後一次知道有書面紀錄，所以我哋就想知道，而喺 03 年之後，究竟做過啲乜嘢？

程艾樂先生：（經傳譯員）其實最大喺 2003 年之後嘅改變，就係話行車記錄儀就係一個巴士發出嘅一啲資料，關於巴士嘅表現，其實就喺呢個 2000 年嘅時候已經有，主要都係使用一啲電子化嘅晶片去控制巴士系統。2003 年嘅時候冇嘅紀錄，就係話將呢啲資料變成實時，一係話係冇一個咁樣嘅溝通系統。

主席：（經傳譯員）我哋想知道嘅，就係運輸署做過啲乜嘢，要求係使用呢一個嘅設備。其實個答案就係畀你睇嘅，喺呢一個嘅 TD-1 號文件，即係運輸署嘅 1 號文件 394 頁。

黃女士：（經傳譯員）或者我咁樣講，程生。運輸署只係發出咗一份嘅指引，就係 03 年，冇修訂過，之後，03 年至到今時今日都冇修訂過嘅，得一份嘅啫。其實佢哋話，其實就不斷有同專營商去傾係加多啲功能，加多啲嘅技術，即係就於黑盒方面。我哋要問嘅，就係係咪真係喺咁多年間有做到呢，定係你哋自己主動，即係話巴士公司自己主動去將黑盒升級？

程艾樂先生：（經傳譯員）我淨係可以講關於九巴當時做過啲乜嘢。好多呢啲都係自己主動做，主要係因為商業嘅原因做嘅。因為睇番九巴喺 2012 年嘅損益表，你可以見到佢哋係虧損大約呢一個嘅 1 億 2 千萬嘅。乘客數量喺過去十至十五年，不斷下跌，即係自從西鐵開始之後，即係 2002、2003 年至到 2012 年，乘客量不斷下跌，所以喺 2012 年嘅時候，當時嘅目標就係要將佢轉虧為盈。其實正常公司股東都要要求做呢樣嘢，所以我哋當時就睇下有啲乜嘢嘅參數技術，有冇任何嘅可行方法，可以改善巴士運作嘅表現、系統嘅表現，可以降低成本，同埋提升服務。所以喺 2012 至到 2015 年嘅數據，其實可以喺有關嘅公司文件可以睇到，應該略略就係有呢一個 2200 萬公里嘅行車旅程，就喺即係嗰兩年。當時乘客數量亦都有加咗大約係百分之三嘅。

當時呢個嘅遠程訊息，其實就係我哋整體上面做嘅措施其中一項，即係唔係淨係睇呢啲巴士嘅設備，睇番係好多唔同嘅嘢，路線、規劃、巴士司機編更等等，所以係整個嘅營運同埋效率一齊睇。即係 2013、14、15 年嘅時候，我哋就慢慢轉虧為盈。

黃女士：（經傳譯員）我想問你關於運輸署嘅一個特定嘅答案，就係呢個 394 頁。請你睇番最後一行，提及到運輸署亦都有提過同一樣嘅嘢，即係話黑盒儲存資訊係要提升，以監察車長嗰個駕駛表現。喺 2016 年 6 月 27 號嘅例行會議係同九巴傾過，你記唔記得有個咁樣會議？

程艾樂先生：（經傳譯員）我唔記得咁詳細，即係日期等等。我可以講嘅就係話，到呢一日，九巴整個車隊都已經有呢啲設施。

主席：（經傳譯員）其實個問題就係問，運輸署就係促請九巴使用遠程資訊系統定期監察車長嗰個行為，你用到黑盒嘅資訊。

程艾樂先生：（經傳譯員）可能有，但係其實九巴都有意咁做。我諗唔返當時講過啲乜嘢。

主席：（經傳譯員）係，我明白。不過為咗幫你記，或者可以畀你睇番個文件，呢個可能係同續專營權有關。因為呢個都係當個月發生嘅事嚟㗎，係咪呀，黃律師，係咪呀？

黃女士：（經傳譯員）呢方面其實真係有一份文件。

程艾樂先生：（經傳譯員）當時係有好多一系列嘅措施傾過，我都幾有信心咁講，我哋第一次即係要求一個實時嘅記錄儀器，同埋擬定到車時間，其實係呢一個嘅 2016 年嘅時候係加入去專營文件。

主席：（經傳譯員）我哋其實就係想搵番一啲要求，啲要求就係話，巴士公司係需要使用黑盒裏面嘅資料去監察司機嘅行為嘅，但係我哋就搵唔到。

黃女士：（經傳譯員）我想請你睇番關於續專營權嘅文件，即係關於呢方面嘅。首先想請你睇下 SEC-2 號文件，735 頁。呢份係立法會文件嚟，日期係 16 年嘅 1 月 15 號。呢個係有關於專營權嘅背景資料簡介，係九巴嘅。如果睇番第 11 段，提升巴士服務水平。議員提及關於專營巴士服務水平，就促請政府利用呢次機會要求佢哋提升服務水平，包括就係使用一啲實時嘅資料、巴士嘅服務資料畀乘客，同埋有呢個嘅優先座位，同埋係一啲嘅無障礙設施，改善脫班情況，同埋改善巴士喺繁忙時間嘅班次。另外一段就係講關於實時嘅資訊提供畀乘客，呢個係第 12 同埋第 13 段。呢度就係冇講到關於係黑盒嘅改善，或者冇提過黑盒。

主席：（經傳譯員）或者用黑盒嘅資料去監察司機，呢個係個重點嚟。

黃女士：（經傳譯員）中間我就唔再多講，去到 2016 年 6 月，SEC 第 2 號文件嘅第 799 頁。呢個係 2016 年 6 月，呢度就係講到有一個公眾諮詢，同埋收集到啲咩嘢意見。其中一個佢哋提到嘅問題，就喺 803 頁有見到，就係關於第 4 段係巴士安全，A。就係更加緊密、密切去監察車長嘅駕駛行為，然後再睇番 802，其實喺嗰個公眾諮詢最主要嘅其中一個意見，就喺第 4 段就講到，就係話關於巴士安全，就話更加密切去監察車長嘅駕駛行為。

喺 2017 年 3 月嘅時候，我哋去續專營權嘅時候，運輸署就叫九巴係承諾某一啲嘅東西。我哋就去到運輸署第 5 號嘅文件冊--應該係九巴第 9 號文件夾，九巴第 9 號文件夾，第 3997 頁。呢個唯一有提到嘅，關於呢個新嘅經營權，就喺第 3 段嗰度，關於改善安全功能。呢個就係講到關於電子數據處理裝置，但係冇提到就係點樣用一啲黑盒嘅資料去監察司機嘅行為，呢度係講得好唔仔細。似乎運輸署就話佢哋一直都同你哋有溝通，就係話希望黑盒嘅資料可以愛嚟監察司機嘅行為，其實呢啲就完全冇喺我頭先所講出嘅文件出現。其實你同唔同意？

程艾樂先生：（經傳譯員）係呀，喺開頭我講就係話，喺香港嘅經營權嘅文件，其實都係寫得好寬鬆，係寫得好闊。你就可能喺呢一個經營權底下，你可以做好多嘢。因此雖然係咁講，我同運輸署嘅交往之中，我感覺佢哋嘅意圖係好，但係有時候，佢哋唔夠有足夠嘅知識，亦都冇嗰個動力。所以同佢哋嗰個意圖，其實就唔同嘅。我有同佢哋開過會，運輸署，佢哋問好多問題，佢哋希望改善，但係可能唔係好具體，佢哋啲意見，亦都唔係話好指令地呢個嘅公司界線應該做啲乜、做啲乜。

主席：（經傳譯員）應該冇咩嘢記錄，所以好寬鬆，係咪呀？

程艾樂先生：（經傳譯員）係。其實我都可以講下關於呢個專營權嘅文件裏面嘅其他部分，其實好多都寫得太寬鬆。

主席：（經傳譯員）唔好意思，等等。但係你可以總的嚟講，其實佢唔係話真係好有指令式，或者規範性係好強，係咪？

程艾樂先生：（經傳譯員）係。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）如果我哋覺得巴士嘅安全係非常之重要，其實就好正常就係話，就會係一個嘅清單喺呢方面，喺嗰個專營權嘅文件。你會唔會同意我呢個講法？

程艾樂先生：（經傳譯員）我就會講番，就如果呢個巴士安全，其實當然係十分重要，係首要嘅考慮。無論係個規管者嘅角度，或者係公司嚟講。我哋講緊係公眾嘅安全、乘客嘅安全，同埋呢一個員工嘅安全，就我哋一定唔可以係有任何嘅妥協。

主席：（經傳譯員）其實我哋喺過去好多年，我哋都有好多嚴重嘅巴士意外，呢個係真係好不幸，係咪？

程艾樂先生：（經傳譯員）係非常之不幸，我哋喺香港有一個好好嘅公共交通系統，所以我哋係對於呢啲問題，我哋應該及時去處理。

黃女士：（經傳譯員）唔該晒。我跟住就會有一個好具體嘅問題，關於嗰個年報，我

就係想做一啲比較，係兩年嘅比較。點解某一年某啲嘢就係漏咗，喺2016年出現，但係2017年就唔見咗？你如果睇番九巴第5號嘅文件冊1719頁。

程艾樂先生：（經傳譯員）你可唔可以講係邊一頁？

黃女士：（經傳譯員）就係九巴第5號文件冊，1719頁。

主席：（經傳譯員）呢個係邊一年嘅年報？

黃女士：（經傳譯員）呢個係2016年嘅年報。

主席：（經傳譯員）就喺2017年嘅3月去印製好嘅，係咪？

黃女士：（經傳譯員）呢個係去到2016年年尾。

主席：（經傳譯員）要喺呢個主席來函嗰度講應該係2017年3月印好。

黃女士：（經傳譯員）如果我哋睇下呢個年報，1719頁，喺右面，呢度就有講到有兩個嘅功能，一個係巴士車上嘅監察系統，第二個就係車務溝通管理系統，上面嗰個就係講緊車長記錄佢哋嘅駕駛表現，就係由車廠同埋部門去進行記錄，就希望能夠可以提高駕駛嘅水準，同埋安全水平，同埋乘客嘅舒服速度。下面嗰個就係話令到一啲嘅事故，有一啲實時嘅資訊，特別係喺一啲嘅道路車擠塞嘅情況、天氣唔好嘅情況，然後我哋有相當嘅控制中心，就係可以收集資料，就係能夠改善有關嘅措施。關於呢個，亦都有一個八達通嘅個人卡，就係呢一個巴士司機如果佢哋係當值嘅時候，佢哋就會可以用呢個八達通。呢個就係一個總站管理系統。

如果我哋睇番2017年嘅年報，係1926頁。我哋睇番1926同埋1925頁，我哋就搵唔到一啲類似嘅資訊，喺呢個2017年嘅年報就冇。你可唔可以就講一講2016年嘅時候個年報，即係關於個巴士車上嘅管理系統，係咪嗰陣時候個公司諗住會推出呢個系統，就係實時去警示一啲司機，還是係另外一啲嘅系統？

程艾樂先生：（經傳譯員）呢個都唔係一啲實時系統嚟，呢個係我哋純粹係想搜集資料，然後係希望反饋畀啲司機。

黃女士：（經傳譯員）但係喺2017年嘅年報嘅時候，我哋就睇唔到有一啲類似嘅提述喎。雖然佢嗰度就有--喺1940頁，其實都係有啲類似嘅...

程艾樂先生：（經傳譯員）呢度有講到話車上嘅管理系統，但係就冇咁多細節喺度寫咗出嚟。

主席：（經傳譯員）其實當其時你已經離開咗九巴，係咪？兩個年報。

程艾樂先生：（經傳譯員）冇錯，我係離開咗之後，呢兩個報告先至出嚟。2016年個年報，係龍運同埋九巴嘅，就嗰個細節係比較少啲，2017年嗰個年報。我睇

Transcript by Epiq Hong Kong, Limited

啲年報，我就會睇下，去做下啲分析，同埋佢哋個表現。2017 年，我就發現有好多嘅資訊都冇出現，其實喺之前嗰啲年度就反而有出嚟，有寫出嚟，呢個係我嘅觀察。

黃女士：（經傳譯員）主席，我已經係完成我嘅提問。

歐陽先生：（經傳譯員）多謝主席。我就係一個好快--有一個好嘅問題。多謝程先生你就嚟到我哋呢度。我哋今日下晝用咗好多時間關於呢個科技，就可以幫助我哋可以改善、提升巴士安全嘅。我想聽一聽關於你對於資源問題嘅睇法。我哋講緊好多科技，但係從一個資源嘅角度，無論係錢嗰方面，或者係人力資源方面，你係點睇呢？你有冇點樣去評估其實呢啲嘅科技係幾咁貴？我哋香港有冇一啲足夠嘅人才係可以推動呢啲嘅科技，你剛才提到嘅科技？唔該晒。

程艾樂先生：（經傳譯員）呢個係一個好有趣嘅問題，其實我都成日去傾呢啲嘢。首先我就去咗呢個九巴嘅長期服務獎嘅晚宴，大概有二百人就係已經服務咗三十年。其實我呢一生人都未見過咁嘅場面，有好大量嘅人，其實佢哋係讓佢哋一生貢獻咗畀呢間公司。我相信其實喺公司裏面係有啲嘢令到佢哋咁忠心，所以對我嚟講，呢個即係文化上，對我嚟講係非常之有意義。而家啲人點解唔想加入九巴，其實呢個就係一個好重要嘅問題，係咪因為佢哋嘅形象已經受損？係咪佢哋提供家庭友善嘅政策係已經冇咗？呢啲我哋需要去睇，呢個就係人方面嘅問題，其實係可以處理到，即係如果係九巴。因為我熟悉九巴，但係我所講話「九巴」，其實都適用於其他巴士公司嘅。

其實係有一啲嘅方法，有一啲嘅機制可以令到駕駛呢方面，係可以令得佢更加吸引。我有好多朋友，佢哋都係投身去呢個巴士界，佢哋真係好真心，係有熱誠。其實如果你去睇番，有好多都係一啲嘅巴士迷嚟嘅。其實可以點樣即係將佢哋包含埋一齊，令佢哋有份參與。

另外一方面，技術方面，其實仍然係用一啲好舊嘅問題，我哋只不過將條鎖匙交畀巴士司機，跟住巴士司機全日都係揸嗰架巴士工作。所以其實呢方面冇做到更多--係有好多可以做，而但係冇做到。其實巴士司機係需要休息，但係車就唔使休息。如果可以做得更好，譬如話有三層嘅資源，人力資源、巴士資源，同埋基建資源，如果可以三個層面都可以善用嘅話，就會做得更好。但係而家就係做唔到，可以就利用一啲科技做得到。其實我覺得可以用更少做得更多。如果成日話乜嘢都係要減成本，乜都減，其實可以就係即係巴士司機同埋車少百分之二都可以做到同一樣嘅服務水平出嚟，呢個就可以解決到人力資源嘅問題。

歐陽先生：Thank you.

羅先生：（經傳譯員）我有一個問題，唔該晒，你為我哋分享咗咁多關於技術嘅資料。我諗就話點解香港咁落後呢，喺採納提升安全嘅技術方面，係咪一個嘅意識嘅問題？可唔可以改善得到？譬如話公司，係咪因為公司冇誘因去投資，佢哋睇唔到有任何嘅價值，或者係根本冇法例要求佢哋咁樣做？呢個係一啲好主要嘅障

礙嚟，其實喺呢方面，我哋可以做啲咩嘢更多嘅事，令到整個界別係會更加願意使用多啲嘅技術去提升安全？因為你都係幫九巴同埋港鐵工作過。

程艾樂先生：（經傳譯員）其實係好多唔同嘅原因，我覺得最大嘅就係嗰個環境。其實如果你係容許你失敗嘅話，你就好願意去創新。但係香港嘅情況，就係唔係好鼓勵你去嘗試失敗咁樣，呢個係一個環境嘅問題，一個文化嘅問題。其實主要嘅原因，喺過去嘅十年嘅，其實都有啲嘢證實係用到，但係技術採納方面就用得好慢。但係其實科技發展一日千里，但係你一路等緊用嘅技術就係已經過咗時，所以你永遠都係等緊一啲新嘢。其實採用呢啲嘅技術，其實係有成本，但係公司就覺得「嘩，如果不斷有新嘢，點解我唔等新嘢啫？」

喺中國內地，其實佢哋就真係去勇於嘗試去試一啲新嘢，容許公司失敗，譬如話係用呢一個電動車，你睇番係電池方面，充電方面有好多唔同嘅方法，你試過先至有啲咩嘢得，咩嘢唔得。而家中國大陸就成為呢一個電動車嘅經營同埋製造商嘅主要經營者。香港係需要咁樣嘅環境，即係我睇番香港嗰個嘅技術嘅知識方面，其實香港係非常之行得好前，但係採納技術方面，即係覺得退步得可憐。其實譬如話數據方面，我見到就算喺第三世界國家發生緊嘅，香港都未採納。可以做到啲咩嘢呢？要製造一個環境，即係會提供誘因，等佢哋創新，使用新嘅技術。譬如一啲合作模式，香港好多嘅初創企業都喺台灣，喺世界各地，喺中國內地不停咁樣去嘗試，所以你要容許人去嘗試，去大家合作。

我其實都係擔當過好多唔同嘅角色，觀察者、決定者，同埋係聆聽者。其實香港係需要有一啲企業家精神，即係香港唔係缺乏企業家，只不過就係缺乏一個好嘅環境。譬如可能有一啲嘅孵化、實驗室等等，即係喺裏面工作嘅人可能係九巴嘅人、港鐵嘅人，可以係創造好多嘢出嚟係畀世界各地使用。

主席：（經傳譯員）不久之前，你就提過話巴士司機需要休息。你就喺九巴做咗四年。

程艾樂先生：（經傳譯員）係。

主席：（經傳譯員）你可唔可以講到令我哋更加容易理解，九巴提供畀巴士司機休息嘅設施，我哋講緊嘅就係特別更嘅司機做緊係十四個鐘嘅嗰啲，只不過係中間可以休息三個鐘，你可唔可以講一講即係九巴休息嘅設施係夠唔夠？

程艾樂先生：（經傳譯員）即係呢啲係實際嘅硬件，其實好容易，可以做一啲嘅調查，話佢哋覺得舒唔舒適，有冇地方需要改善，休息足唔足夠。但係你休息，其實仲有另外一個方面。

我見到有一方面香港係嚴重不足，每個人都唔同，佢哋疲勞程度，佢哋嘅心理反應不盡相同。好，十四個鐘係咪太長，要減到十個鐘？其實我哋需要先做一個統計，睇下一啲主要嘅參數、主要嘅指標。係到邊一個程度，巴士司機疲勞係一個問題。如果譬如話你只不過就係睇番個意外分析等等，你睇番即係每一個司機，佢嗰個過去係點樣，你要有一個參數，譬如話三個鐘好唔好，呢個

司機三個鐘就最好，短程就最好，夜晚做唔啱佢咁。你可以將嗰個職責就係度身訂造，令佢更加適合，更加願意做。如果今個月你要去早更，下個月你要做夜晚更，跟住嗰個要做下晝更，你咁不穩定嘅話，其實就好難--你個理由就係話要公平，但係其實係唔適合。如果做足夠嘅分析，其實可以做到呢個環境出嚟。如果你當係一個企業，其實我哋都會睇下佢嘅表現，譬如佢話即係呢個分析能力好好，所以佢就要做分析員；呢個人佢就係手工藝好好，佢又可以適合做呢樣嘢，所以呢樣同揸車都係一樣。

主席：（經傳譯員）你所講就係話需要有數據，譬如話一個巴士司機，其實就係同佢個表現就要記錄低，可以係一個實時記錄，同埋一個自動報告。

程艾樂先生：（經傳譯員）呢個其中一個，譬如我哋可以睇番佢嘅教育程度，佢嘅醫療情況，係好多地方可以攞到唔同嘅資料，所以睇番就係話其實我哋收集嘅資料，其實只係一方面，譬如話佢嘅駕駛表現，但係其實可能呢個就係同佢哋其他啲個人參數有關。如果你將所有資料收集晒，其實就可以砌到成個人出嚟。新加坡嘅模式係一個即係支援學習，就係咁。每一位嘅司機接受嘅訓練都唔同，因為佢哋睇下個司機係點樣，然之後就係訂造一個適合佢哋嘅訓練課程。

主席：（經傳譯員）唔好意思，我要再問番。你係喺九巴做嘅時候，你可唔可以講下佢哋嘅休息設施係夠唔夠？因為對於呢一方面嘅分析，你提過，但係就冇做過。所以譬如話對於車長嘅休息設計，尤其係做一啲特別嘅分開更嘅。

程艾樂先生：（經傳譯員）我覺得係非常之差。

主席：（經傳譯員）喺 2013 年嘅時候？

程艾樂先生：（經傳譯員）係 2013 年嘅時候，啲設施係低於標準，即係完全唔適合一個現代化嘅車隊。但係佢哋之後就係有合作去改善，即係好多唔同嘅方面，即係盡力改善。我記得係向運輸署提供過好多嘅建議，譬如話係多啲嘅休息室，但係香港係一個好特別情況，因為土地非常之珍貴，好多嘅公共交通交匯處，雖然巴士公司可以用，但係其實屬於私人發展商，譬如話領展等等，佢哋係唔願意提供地方，即係可以整一個休息設施畀司機，但係我相信九巴回答會更佳。但係有時可能佢哋就係話，即係司機用商場嘅洗手間都會畀人投訴，但係呢個係一個人嘅基本需要嚟嘅。

主席：（經傳譯員）你就話，2013 年嘅時候，呢啲設施係非常之令人失望。當你走嘅時候，2016 年嘅時候，12 月，情況係點？

程艾樂先生：（經傳譯員）其實如果用番呢一個基準，之後係有大幅改善。但係呢啲改善都唔係太過令人滿意，不過真係有一個大幅嘅改善，管理層真係有心去改善呢樣嘢。

主席：（經傳譯員）最差嘅設施係咩嘢？即係喺呢一個 2016 年 12 月嘅時候。

程艾樂先生：（經傳譯員）都有幾個，即係 2016 年嘅時候，有時就可能巴士車長其

實要喺巴士上面休息同埋食嘢，因為根本冇地方畀佢喺外面坐。應該大坑道有個公共屋邨--唔係，九龍城附近，係一個私人嘅住宅嚟，佢哋係唔願意畀空間去做一個設施。

主席：（經傳譯員）係咪樂華邨？

程艾樂先生：（經傳譯員）係。仲有好多其他嘅例子，成個香港都係。

主席：（經傳譯員）呢個係九巴自己起咗，跟住就要求佢哋整番走，移除。遇到呢啲問題係因為唔能夠要求有權嘅人士提供呢啲嘅設施咁樣講，啱唔啱？

程艾樂先生：（經傳譯員）係，可能就係嗰個發展權或者地契，佢有好多唔同嘅原因嘅。

主席：（經傳譯員）乜嘢原因都好，呢啲設施係冇提供。

程艾樂先生：（經傳譯員）冇錯，好多嘅例子就係唔足夠嘅設施。

主席：（經傳譯員）好，多謝你協助我哋，程先生。我哋亦都好多謝嗰啲人，佢哋係有做謄本嗰啲，同埋嗰啲做傳譯。我哋今日個聽證會到呢一刻為止，多謝大家出席。我哋會安排另外唔同節數嘅聽證會，我哋就住呢啲嘅聽證會，我哋會有公告。

程艾樂先生：（經傳譯員）多謝主席，多謝委員會，多謝律師，我覺得你有一個好挑戰性嘅工作，我希望到最後屘你哋會有一啲好嘅有建設性嘅建議，亦都會為我哋嘅巴士行業帶嚟益處。

2018年7月17日

下午5時46分聆訊押後

Monday, 30 July 2018

(10.00 am)

REPRESENTATIVES FROM MOTOR TRANSPORT WORKERS GENERAL UNION.

MR CHAN KWONG NUNG, MR LAI SIU CHUNG, MR LAM TIN FU, MR CHEUNG TSZ KEI, MR LAU SIN TAT, MR LAM PO KEUNG

(Evidence given in Cantonese; transcription of the simultaneous interpretation)

CHAIRMAN: Good morning.

We thank the Motor Transport Workers General Union for sending their representatives to assist us with their evidence today.

We thank you, Mr Cheung, as the principal vice-chairman, and the other representatives.

The method by which we would take your evidence is to have questions posed of you by Ms Wong, Senior Counsel, who is one of the counsel assisting this Committee.

If at any stage you, Mr Cheung, wish one of your fellow representatives to deal with the question, please defer to him, and we will hear from whoever it is that you wish us to hear from.

I'll ask Ms Wong to start asking questions now.

EXAMINATION BY MS WONG

MS MAGGIE WONG: Yes. Good morning, gentlemen.

I would like to introduce a few remarks first, about

your organisation.

Was Motor Transport Workers General Union established in 1920?

MR CHEUNG TSZ KEI: Yes.

MS MAGGIE WONG: And we can see at TU bundle 1C at page 289-15 showing the membership of your trade union, and -- it is not translated, but I'll read out the actual numbers.

Your organisation currently has membership of 29,670 people, in which 11,868 people are members coming from franchised bus trade union, and 10,436 people are members of bus captains of franchised bus operators.

Is that correct?

MR CHEUNG TSZ KEI: That's right.

MS MAGGIE WONG: And your organisation has five sub-unions. It contains Kowloon Motor Bus, Citybus, New World Bus, Long Win Bus and New Lantao Bus.

MR CHEUNG TSZ KEI: Right.

MS MAGGIE WONG: Before I start questions, may I take you to the terms of reference for this Committee. It is in TU bundle 1C at page 263 in Chinese; and the English can be found at TD-1 bundle at page 3.

In essence, this committee's task is to look at the evidence from the point of view of safety in the light of the fatal accident on 10 February; and it is tasked

to examine the operation and management of bus franchises under the current legislative franchise and other contractual requirements; and to examine the present regulatory and monitoring system for franchised buses; and lastly, to make recommendation to the Chief Executive on safety-related measures with a view to sustaining a safe and reliable franchised bus service in Hong Kong.

So this committee's task is to look at the safety aspects of bus operation, franchised bus operations.

The why I raise this is, I understand that your submission raised a lot of issues concerning work, but this Committee is only tasked to look at safety-related measures in relation to the operation of franchised bus operation.

So I hope you understand that the questions will be focused along that area.

Your organisation previously made a number of submissions to the Committee. The first submission is dated 23 April 2018. The Chinese is at TU-1C page 277 to 289. English at 289-1 to 289-12.

This submission, the first submission, is made in response to the committee's letter to your organisation, to your union, dated 28 March 2018; is that correct?

MR CHEUNG TSZ KEI: Right.

MS MAGGIE WONG: And your submission raised a number of issues. May I first take you to the broad areas first.

CHAIRMAN: Before you move on, Ms Wong, might I say this, Mr Cheung, if it helps you.

There are available to you hard copies of your submissions in the files. They are being brought up on the screen, but if ever you want to have a look at the hard copy, so perhaps you can look at other parts of the document, then just ask to be provided with the hard copy.

Do you understand?

MR CHEUNG TSZ KEI: I understand.

CHAIRMAN: Yes, Ms Wong, what is the reference?

MS MAGGIE WONG: The reference first is 289-14-7, and I'm making reference to the first 10 paragraphs which made reference to abuse of bus captains.

Your submission raised a few experiences, or actual experiences of many members showing that there were uncivilised passengers that ignore the laws and assault the bus captains by physical violence or abusive behaviour. That's the first topic that your submission raised.

And then in your second point that you made, it is about improvements to operational safety of franchised buses, and that's at paragraph 11 at page 289-14-9 in

English. The Chinese is at page 285.

And the improvements you made are in essence three essential improvements.

First, you asked that the traffic lights be improved by having count down timers or flashing device. Second, you asked that there be more yellow squares in bus stops to allow the buses to park into the bus zone. And third, the entry and exit of bus stops.

The third topic you raised in your submission is the working condition, and that is at paragraph 15 in the bundle TU-1C bundle at page 289-14-10, paragraph 15.

In Chinese, it's page 287; in English page 289-10.

And you raised three particular matters, if I may broadly summarise. That's the resting time facilities and training.

So those are the three topics that I'm going to explore with you in this session.

The second submission you made to the Committee is in response to letters from the Committee to you dated 8 and 13 June 2018. And your submission is dated 10 July 2018. The Chinese is at page 289-16 to page 289-23. That's the second submission.

And the English is also in 1C bundle, page 289-23-1 to page 289-23-10.

In this submission you expressed in the second

paragraph that you have gathered the responsible persons of the five branches of franchised buses to convene a taskforce and extensively collected the views of the managers, office, and members, and workers. You will see that at page 289-16 in Chinese, and page 289-23-1 in English. And in this submission you also extensively made submission on the assault or abuse of bus captain by passengers. You cited a number of incidents in the second submission.

You also made the third submission, but before I go to the third submission I would deal with the assault, abuse of bus captain by passengers first. That is the first topic which has been extensively covered in both your first and second submissions.

Mr Cheung, I believe in both of your submissions you mentioned that this complaint about assault has been raised by trade union and bus companies for a number of years.

You quoted a number of incidents in 2016 and 2017 and 2018. If I may go through this with you. Because you have identified nine assault incidents between 3 January 2016 to 29 April 2018. That's Chinese at page 289-16 to page 289-17. And English at 289-23-2.

This assault incidents took place at different places in Tuen Mun town centre, Tai Wai Mei Lam Estate

bus terminus, Eastern Hospital, South Horizons, Airport Ground Transportation Centre bus terminus, Castle Peak Road cafeteria bus terminus, Yat Tung Estate, Mong Kok railway station and Lantau toll plaza.

And you identify in each case that all the bus drivers that you mentioned have suffered injuries and have to take sick leave. Can you confirm those nine incidents were reported to your union and seek your help in liaising with the police or the relevant bus companies?

MR LAM TIN FU: Chairman, we quoted these nine cases, and in our submission we made it clear that these nine members sought help from our staff and then they sought financial assistance from the Occupational Safety And Health Association of the General Trade Union, but we have made it clear in our submission that some members were assaulted and they were widely reported in the media, and they did not seek help from our union.

We couldn't confirm whether they were our members and didn't know where they happened. So none of our staff provided assistance to them. So for the nine cases we have here, because they were seriously injured, and they had to take prolonged sick leave, they had financial difficulties. These were members who we got information from the occupational safety and health of

the union, and in our latest submissions, we supplemented cases reported by the media.

We wanted to talk about a case at number 9 bus of Shek O. A captain was assaulted by a passenger for about three to five minutes, it was widely reported in the media but he did not come to us for help so we could not tell his actual situation. That's what I have to add.

MR LAI SIU CHUNG: May I add too.

Yes, we do have some statistics, but this is just the tip of the iceberg, these nine cases. However, assault against captains have become more serious, on average there are nine cases a day, and we do have some information, the number of cases are increasing. So we have just suggested to bus companies that protective devices be provided. There should be a membrane, or a panel to help us.

So this has always been happening. It is not confined to these nine cases, things have got more and more serious, and the passengers are very uncivilised. They use mobile phones to provoke and assault captains. There is a 230A regulation to protect captains but they have never been enforced.

CHAIRMAN: Ms Wong, before you go on, it might assist you if we were to inform you that we have received on Friday,

I think it was, some information from Kowloon Motor Bus about statistics of complaints that they have received from their bus captains, from the period 2015 through to 2018, and I think I'm right in remembering that there are about 40 complaints that have been made so far this year.

Are you aware of that information? It is on our website.

MR LAI SIU CHUNG: Chairman, if I may tell you that in the past two years, things have been more serious so there should be more than 40 complaints. And it is only very recently that a legal division has been set up in the company to support bus captains.

For cases that came to us for help, we provided assistance, but 40 complaints is not an accurate figure. We should at least have eight or ten per month. So two years, there should at least be 200 cases.

CHAIRMAN: I think you might have misunderstood me.

40 cases in the six months so far this year, seven months this year -- from one bus company.

MR LAI SIU CHUNG: I don't dispute that. But I don't think the figure is reliable.

CHAIRMAN: Well, no doubt you can provide us with reliable figures, but before you do that, the nine cases you described here cover the period from beginning of 2016

until April 2018; is that correct?

MR LAI SIU CHUNG: Yes.

CHAIRMAN: Can you help us as to the bus companies where these nine victims worked?

MR LAM TIN FU: We have to check our information, but most of them were working for KMB.

For most of the cases known, they were from KMB. But for the specifics, we have to check the records.

And some bus captains did not tell us the company they worked for. Because in our form, we only required them to tell us the trade union he is from; we don't require them to tell us which bus company he is working for.

CHAIRMAN: Thank you. Thank you, Ms Wong.

MS MAGGIE WONG: Yes. The chairman earlier referred to a list compiled by the KMB showing assaults on bus captains from January 2015 to 22 July 2018. Can I show you the list. It is at KMB1 bundle, at page 212.

MR CHEUNG TSZ KEI: I'm sorry, Ms Wong.

Chairman, can I have a copy? Can I have a Chinese copy of this?

CHAIRMAN: Yes, that can be provided now.

MS MAGGIE WONG: Yes.

CHAIRMAN: It may be that it was only provided in English.

MR LAI SIU CHUNG: Because we cannot see anything in front

of us.

CHAIRMAN: Of course we will provide it to you.

MR LAI SIU CHUNG: (In English) Thank you.

CHAIRMAN: It may be easier if you look at the hard copy.

Take your time to digest the format. That's probably what you need. Are we able to show the whole page? Yes.

Would you be kind enough to go forward to 2018?

MS MAGGIE WONG: Yes. That would be at page 216.

It should be KMB-1 bundle, page 216.

CHAIRMAN: Gentlemen, are you ready now for questions to be asked?

MR CHEUNG TSZ KEI: Yes.

MS MAGGIE WONG: If you look at the KMB-1 bundle at page 216, item 148 onwards to 188 are the cases that were compiled by the KMB from January 2018 to 22 July 2018. That's just for KMB only.

MR LAI SIU CHUNG: Well, that was reported to you by KMB, but information was received from us that some minor pushing were not reported to KMB. These figures might be true, but we understand that some cases were not reported to the bus company, and that's why we say that these statistics are not very accurate. Some staff did not report to the company, but they told the trade unions.

CHAIRMAN: No doubt you can provide us with the complaints that you have received, that were not provided to the bus company.

MR LAI SIU CHUNG: Chairman, for example, just last week we had a station master who was newly employed. He was punched once by a Pakistani, and he fell to the floor. He reported the case to me and I reported it to the company. And then a report was compiled.

Now, because this is such a big company, if I have to tell each and every time, then you will find it troublesome, Chairman.

CHAIRMAN: We are trying to act on evidence, and unless we are provided with evidence, mere assertions, sweeping assertions don't assist us.

If you can give us complaints that you have received that were not reported to the bus company, please do.

MR LAI SIU CHUNG: Okay, thank you.

MS MAGGIE WONG: If you look at the list we can see, on my count, there were about 41 incidents. But we can see that very few cases result in any prosecution or meaningful result. And only two cases -- we can see at items 162 and 164 -- result in the defendant pleading guilty and fined for a sum. Out of 41, most of them are settled, or with verbal warning, or not pursued by the police.

If I may take this list and cross-reference to some of the cases that were mentioned in your nine assault incidents, I can find five of them.

The first case in your submission is case 2. At page 289-16. It relates to an incident of a Mr Ho on 3 January 2016 the at Tai Wai Mei Lam Estate. And we can see that would be case number 62 in the list compiled by KMB at page 214, case number 62.

MR LAI SIU CHUNG: Yes.

MS MAGGIE WONG: Thank you.

Before I move on, there is in fact another incident which is not recorded in this table, but there was a notice of an incident on 16 May 2016 about an assault. And that's at page 289-114, and the English is at 289-23-2.

We can see there was another incident on 16 May 2016 that was not reported, or cannot be found in the table, but which was issued or a notification issued by your organisation or union, and if I may go back to the list, this is just quoted as one of the examples that would not be in KMB list, nor in your list that we can find.

MR LAI SIU CHUNG: It is the same one as the one with the victim's surname Ho.

MS MAGGIE WONG: Oh. Same as. Thank you.

And the second case is case 5 on your list, at

page 289-17, and that's case 5 on your list, in relation to a Mr Yiu, who was attacked on 8 August 2016. And we can see this incident was also found in the KMB list at page 214 as case number 82.

We can see BC, bus captain, Mr Yiu, the date on 8 August, Long Win Bus, the location at the airport terminus, and the injury he suffered.

And the third incident in your submission is case 8 at page 289-17, concerning a Mr Lee injured on 9 January 2017, at Mong Kok station, where he was injured on the eye and the forehead. This case can also be found in KMB's list at page 215 as case number 113.

Do you confirm that?

MR LAI SIU CHUNG: Yes.

MS MAGGIE WONG: And another example that was found on the list but not in your list, but in the KMB list, is the number 122 incident on 4 June 2017 in Tsuen Wan bus terminus, in which the case was settled. And that's in the KMB list at page 215.

Another case on your submission is case number 9 at page 289-17, in relation to a Mr Yeung, injured on 29 April 2018 at the Tsing Ma toll. And this incident was reported, or compiled in the KMB list as case number 170, at page 217.

Can you confirm that? 170.

MR CHEUNG TSZ KEI: Yes. Yes. The injured bus captain sought assistance from me. At that time he asked questions. He asked why the security officers at Tsing Ma toll plaza let the culprit go, because the culprit forced the door open, alight the bus, walked to take another transportation to leave. The control officers at the toll plaza did not do anything.

MS MAGGIE WONG: Now we can see these incidents, these 41 incidents in the list were reported to the police, and on the most right column we can see some of the remarks stating that the police either requested them to settle, or not pursued by the police, and that was a point made in your submission at page 289-17, English at 289-23-3, at the bottom.

MR LAI SIU CHUNG: I would like to say something, Chairman. There are many incidents. It is impossible that they were all settled voluntarily. You can see that there were only a handful of cases where the law was enforced. There are so many cases, it is ridiculous that so many of them are settled. We have received a lot of complaints that the police did not enforce the law. Bus captains will not provoke passengers. There so many cases. Out of the 40 cases only a handful of cases resulted in prosecution. That obviously is a problem. You can see that from the table. There are

a number of injuries sustained in a lot of these cases, and a lot of them resulted in the case being settled, only a handful of cases resulted in prosecution. Bus captains have been assaulted, and they are asked to settle. That is to show that there is a failure on law enforcement.

MS MAGGIE WONG: Thank you, Mr Lai.

You raised that this matter has been raised a number of times. And one of the examples we can see is in one of the minutes of meeting you had with the Transport Department. That's dated 22 March 2017. We can see it in Chinese at page 289-61, paragraph 2 at the bottom; in English, at page 289-182.

In paragraph 2 you mentioned the attacks on bus drivers, and the verbal abuse and how it affected the driving, the work of the bus captains, and requested the Transport Department to execute the laws in accordance with the regulation.

This is just one of the examples.

If I may refer back to your submission. You made clear the point that the information of other attacks and injuries not reflected to the staff of your union is not collected in your submission. And you made that clear at page 289-18 in Chinese, second paragraph; in English, page 289-23-3.

In paragraph 2 you mentioned about -- in the previous occasion some of the members would come out to assist the bus captains, but because of the incidents that there may be certain implication about public fighting, or fighting in public place. So a lot of people are worried about their own condition, and not willing to offer assistance to bus captains.

And you mentioned an incident on 10 July 2015 about the typhoon incident leading to a number of violent behaviour of passengers. Can you explain a little bit as to how you would assist the bus captains and why you feel inhibited in assisting the bus captains in those circumstances?

MR LAI SIU CHUNG: I remember this case very clearly. At about 8.30, because of the typhoon, bus service ceased. And at that time perhaps passengers were quite anxious, as a result, they assaulted the bus captain. At the end, the passenger was arrested.

MR LAM TIN FU: Well, this is the view of the union. If other union members stepped in to help the bus captain, to stop the perpetrator from assaulting the bus captain, the police would book all parties involved.

That means all these people would be charged with fighting in a public place.

As a result, when union members see that someone is

assaulted, they would not go to help, and that becomes the trend now.

MR CHEUNG TSZ KEI: And I would like to supplement. Verbal abuse, taking videos of bus captains, these all affect the emotions of the bus captain, which in turn affects driving safety, and this will have an implication on public safety. As a result, we do think that these kinds of assaults should be stopped.

CHAIRMAN: Could you just help the committee with the detail of this particular assault? Where did the assault take place? Was it in the bus? Or was it in the bus depot?

MR LAI SIU CHUNG: It is at the bus stop, before the bus pulled off. Perhaps because passengers were quite anxious that typhoon No. 8 would be hoisted. We received an announcement that at 8.30 bus service would cease. My understanding was that passengers saw a bus captain, but the bus captain was about to knock off work. Passengers assaulted the bus captain. Some people helped the bus captain. However, all the people, even those who stepped in to help, were charged.

CHAIRMAN: Was the assault on the bus, or outside the bus?

MR LAI SIU CHUNG: At a bus terminal, outside a rest kiosk of the bus regulator. Do you understand, Chairman?

CHAIRMAN: I do, now. Thank you.

MS MAGGIE WONG: In your further submission dated

10 July 2018, Chinese is at page 289-18, English at page 289-23-3 to 289-23-4, in paragraph 1 you highlighted the problems that you mentioned earlier, and that you have collected from the Internet, other information concerning bus drivers being harassed by passengers, and being unreasonably treated. And you also exhibited the relevant articles or website information on bus captains being abused by passengers.

The articles can be found in Chinese at page 289-24 to 289-30, and there is photographic evidence. And in English, at page 289-141 to 289-146.

And you identified the problem at paragraph 2 of your submission. And you went on to complain at paragraph 3 that you have not heard of law enforcement officers bringing charges against a relevant person under the Public Bus Services Regulations, chapter 230A. We can see that in English, 289-23-4, and in Chinese at 289-19.

MR LAI SIU CHUNG: Can you please respond. Cap 230A is for protecting bus captains, but in most cases it is used to protect passengers and our companies have not asked that protection be given to us. Now, we should enhance the penalty. Because I have not seen any charging of perpetrators under cap 230A.

MS MAGGIE WONG: For convenience, if I may take you to the

regulation to see the penalty. And that's in THB-2, page 131.

Do you have that? I'm sorry that there is only an English version. But we can see in regulation 13, power to remove passengers from a bus, where that person whom he has reasonable cause to believe has contravened these regulations.

And also 13A, at page 13. Regulation 13A states that:

".. no passenger or intending passenger shall:

(a) wilfully ... impede or distract the driver of the bus or any authorised person;

(b) wilfully obstruct the driver's view of the road or traffic;

(c) wilfully do or cause to be done with respect to any part of the bus ... anything which ..."

And then subparagraph (ii):

"causes injury, discomfort, annoyance or inconvenience to any other person ..."

and at (i):

"obstructs or interferes with the workings of the bus or causes damage."

And if we may go to regulation 25(3):

"Any person who without reasonable excuse contravenes any of the provisions of regulation ...

13A(1)" [that's the provision we have just looked at] "commits an offence and is liable to a fine of $3,000 and to imprisonment for six months."

So that's the section you are referring to that was not prosecuted throughout the years. Is that the case?

MR CHEUNG TSZ KEI: Correct.

MS MAGGIE WONG: And if I may invite you to look at paragraph 3 of your submission, further submission. In English it is at page 289-23-5; Chinese is at page 289-19. Do you see that?

Reference was made to civil claims that bus companies have initiated on the bus captains' behalf, but they have not published the results of the claim. So you requested to obtain information on bus captains in which civil claims were lodged. Is that the position? That you would like to recommend the Committee to seek information from the franchised bus companies in relation to this civil claims?

MR LAI SIU CHUNG: A few months ago a female bus captain was assaulted. There was assistance by the bus company, there was a compensation of $5,000 in cash, and also bail, and he was bound over.

Yes, there was assistance, and there was requests for compensation.

MR LAM TIN FU: But as far as we know, bus companies would

only provide personal assistance, because these cases would affect all employees of bus companies and there was no announcement to all staff, the outcome of the assistance.

Some KMB colleagues told us that in their monthly newsletter the case was mentioned, but we haven't seen that. It was in the newsletter for KMB staff.

MS MAGGIE WONG: Would you be able to provide us with the monthly newsletter?

MR LAI SIU CHUNG: We have to find it out from our staff website. Perhaps you can ask KMB on our behalf. In their monthly newsletters for staff, and all the cases are reported, it is not that we cannot find it, but we may not be able to do it very quickly. Perhaps it would be faster if you ask the management of KMB.

MS MAGGIE WONG: We have seen the complaints. Can we look at how KMB responded to some of these complaints in their submission.

If I may take you to KMB-1, page 61 to 62.

It referred to 61 to 62. It referred at page 62 at the top that:

"[Following] the increasing number of assaults ... we have taken the following measures ..."

And they have identified four. First, surveillance cameras, included forward-looking cameras, and a camera

covering the driver seat, have become standard features on all new buses since 2015. Up to February 2018, surveillance cameras were installed in 2,319 KMB buses and 146 LWB buses. The remaining buses will be equipped with surveillance cameras phase by phase. Surveillance cameras capture the behaviour (with audio recording) of difficult passengers. It will protect the interest of [bus captain] in subsequent investigation by the police or legal proceedings."

That's the first measure.

The second is:

"We will install a protective shield near the driver seat [or cockpit] starting from June 2018."

Third:

" ... more on-board announcements to advise passengers not to do ... acts that will affect the [bus captains] and other passengers."

And the fourth:

" ... offer legal support to [bus captains] after they have been assaulted."

Now I would like to ask about these surveillance cameras. We have seen some examples in one of the site visits that these surveillance cameras were installed above the position or above where the driver was seated. And it would capture the driver's behaviour as well, and

it appears some of the drivers previously raised some concerns, as a result of these surveillance cameras.

What is your comment on this matter?

MR CHEUNG TSZ KEI: Yes. Recently, KMB has made these improvements when it comes to assaults against bus captains. The company has helped bus companies -- I mean captains, to provide legal assistance.

MR LAI SIU CHUNG: If I may supplement. Our frontline captains and trade unions have reflected the view that sometimes surveillance cameras can help bus captains, but for minor issues, they will only say that the cases would be handed over to the police. Sometimes surveillance cameras cannot help bus captains. Now, we want to have our own cameras but KMB -- bus companies claim that there would be privacy issues, and when there are minor hiccups, we asked for the footage but we may not be able to have the footage covering the whole incident.

So the surveillance camera may capture minor incidents, but the footage would only be passed to law enforcement departments, but not to frontline captains for support. So we are saying that when we need support, the surveillance cameras may not be able to support us. And according to the company, they hope to complete the installation by the second quarter of next

year. Two thirds of our buses are not yet installed with these cameras. There are over 3,700 or 3,800 buses in KMB's fleet and two thirds of them do not have the surveillance cameras yet.

MR CHEUNG TSZ KEI: Let me supplement, Chairman.

CHAIRMAN: Before you go on. The figure that we are given here is: 2,319 buses as of February 2018 had surveillance cameras. So if there are 3,700 buses, two thirds do not, as you say, have surveillance cameras, that's not right.

MR LAI SIU CHUNG: Chairman, because the company has got buses that will only be used for two more years, and they will not be installed, they will be phased out very soon, and the company has indicated that surveillance cameras will not be installed for them, and the number is quite considerable. Because these vehicles are old, and the company has decided not to install cameras, and some frontline bus captains installed our own cameras, but the bus company use administrative measures to not allow us to do that. We want to protect ourselves.

CHAIRMAN: Can you provide the Committee with information as to that latter matter? The prevention of bus captains using, I take it, their own cameras?

MR LAI SIU CHUNG: Yes, we can provide this. For BCs to install their own cameras they have received written

warnings, and there are announcements to tell BCs that they cannot install their own cameras. We are helpless, because there are many traffic accidents. When the police arrive at the scene they will ask you whether there is any camera. So we accepted these warnings, reluctantly, but we have always hoped that the management would accept the proposal from trade unions, because these cameras can protect BCs. For vehicles with the prefix H and J, they do not have any cameras, because they are over 13 years old and the company will not install cameras for vehicles with the prefix H and J, they are old models, we are told that they will not waste resources to install cameras in these vehicles.

CHAIRMAN: Will you provide documents that allow the Committee to understand how this has been dealt with by the company? You call it "administrative measures". Can you give us those documents?

MR LAI SIU CHUNG: I will try. We have had meetings with the company. They said that we are not allowed to install cameras because of previous issues.

Well, release of footage will have to be done with the consent of all the parties captured. We have had meetings with the company. They said that it involved privacy issues. Release of footage without the consent of all parties captured in the footage is a violation of

privacy. If you ask for documents or letters, or warning letters, I can give them to you afterwards.

CHAIRMAN: That's what we are asking for.

MR LAI SIU CHUNG: Yes, I will submit them to you afterwards.

CHAIRMAN: Thank you.

Moving to another issue, do you support the installation of these surveillance cameras, that capture on audio and video what happens in and around where the bus captain's seat is?

MR CHEUNG TSZ KEI: If it improves the working condition of bus captains without affecting their performance, trade unions will support that.

CHAIRMAN: Can you answer that "yes" or "no"? Do you support it?

MR LAM TIN FU: Chairman, the installation of a device that does audio or video recording may be conducive to evidence collection. However, some bus captains are of the view that if there is a surveillance camera they are being monitored all the time and it will create mental pressure. I have heard cases that for some bus captains with the camera sitting right above their heads, it distracts them and it will not be good for road safety. So there are concerns.

The installation of surveillance camera may be done

with good intentions but you have to take into account the actual conditions of bus captains. If all buses are fitted with such installations, some bus captains may find it difficult to adjust.

So I just say that it may be considered, but not all bus captains can adjust to having a surveillance camera monitoring them all the time.

Bus captains drive or work for about eight hours. If they are under mental pressure it will not be good.

There may be times where bus captains just holding steering wheel with one hand because they want to take a sip of water, and it will be captured on camera, so you will have to be very cautious before considering the installation of a video or audio recording devices.

CHAIRMAN: So do we understand it that the union takes the position that there is no consensus about this? You don't have a view?

MR LAM TIN FU: We think that it should be considered with caution.

Yes, it may help, but trade unions think that you will have to ask our members.

MR LAI SIU CHUNG: I would like to say that seven or eight years ago, at the start of installation of surveillance cameras, we have lodged complaints with the Privacy Commissioner, because we have received a lot of

complaints at our complaints divisions saying that it posed tremendous mental pressure on bus captains.

So, to a certain extent, some of our members oppose any devices that would make audio recording.

About six or seven years ago we went to the Privacy Commissioner to lodge a complaint and to protest. That was done by the General Union.

CHAIRMAN: What is the position now in 2018? Is this supported or not supported?

MR CHEUNG TSZ KEI: Perhaps I will answer.

The installation of a camera, I have at one point discussed it with the senior management of the KMB. Yes, with a camera, bus captains are protected in relation to what happens on the road. However, some administrative officers focus rather on some minor points, say for example a bus captain holding the steering wheel with one hand while trying to take a sip of water. That bus captain would be asked to go to see the management.

With things like that, it would affect the psychological state of bus captains. We have talked to the management of the company, we asked the company to give undertakings that there will not be unreasonable disciplinary proceedings, say, for example, minor incidents like holding the steering wheel with one hand

while trying to take a sip of water.

Of course, on the one hand we would very much like to have a camera to protect us, but if the management uses it to penalise bus captains for minor incidents then we would not like it.

CHAIRMAN: So are we to understand that your position is this: so long as the camera is used for the benefit of the bus captain you are in favour of it, but if it is used against him you are not? Is that it?

MR CHEUNG TSZ KEI: Right. Right. It is about unreasonable Draconian measures taken against us, or just unreasonable requirements.

CHAIRMAN: Thank you.

Ms Wong.

MS MAGGIE WONG: Yes. Mr Cheung, you mentioned about the management would sometimes look at this camera or surveillance footage to check on the behaviour of the bus captains.

In what circumstances would they do that?

CHAIRMAN: I think Mr Cheung provided us with the answer several times. The graphic example of the one-handed steering wheel and the sipping of the water. It is that kind of interference with minor things, as you would categorise them, that you are concerned about?

MR LAI SIU CHUNG: Sorry, Chairman. I would like to say

something about holding the steering wheel with one hand.

Well, that's only done when it is perfectly safe. Say, for example in a very safe situation.

MS MAGGIE WONG: So it is just a random checking, or is it to react to complaints and as a result they look at surveillance footage?

MR CHEUNG TSZ KEI: What we ask for is that the footage would only be viewed where there are incidents or traffic accidents. However, a number of years ago, some officers took the initiative to view the footage and found some bus captains eating biscuits or drinking water, and the bus captains were being chastised by officers. We do think that is unreasonable.

It happens quite often. As a result, bus captains feel that they are offended.

CHAIRMAN: Ms Wong, allow for the translation. Perhaps bear that in mind in future.

I think Ms Wong's question really is this.

When, as you call them, administrators get involved in looking at the surveillance camera in these circumstances, is that because a complaint has been made by a passenger? The bus driver was eating biscuits or drinking water? Is it a response a complaint?

MR CHEUNG TSZ KEI: Chairman, not necessarily. There is one

case, the bus captain has finished his duties driving the bus back to the depot. There were no passengers on board, and that bus captain was being penalised by an administrative officer.

CHAIRMAN: So you infer from that that, on this occasion at least, use was made of the surveillance camera without there being a complaint -- spying on the bus captain, is that it?

MR CHEUNG TSZ KEI: That's correct.

CHAIRMAN: Thank you.

MS MAGGIE WONG: How often was this being conducted by the management? How often, do you know?

MR CHEUNG TSZ KEI: In recent times, such incidents has dropped in number, that's a result of trade unions complaining to the company a number of times, saying that such unreasonable measure would dampen morale even further. As a result, the number of such incidents has dropped.

CHAIRMAN: So has this problem resolved itself, did the bus company listen to you?

MR CHEUNG TSZ KEI: Chairman, well, there can be two interpretations. First of all, there is a shortage of manpower. Two, you can say that they have listened to us, but we don't know what will happen in the future.

CHAIRMAN: What was the last occasion when this kind of

spying took place without a complaint from a passenger? How long ago?

MR LAI SIU CHUNG: I believe that there will be complaints every day. Where there are cameras, the footage would be viewed, and there is also a black box on board. Say, for example, there is -- well, you can view the footage to see if doors have indeed been opened to let passengers on and off, or the bus captain has stopped at the bus stop. There is a black box on board. I believe that there are complaints every single day.

CHAIRMAN: But the question was, can you point to an example where spying took place without complaints? The most recent one, or has it solved itself?

MR CHEUNG TSZ KEI: I believe it was half a year ago since I last heard about something like this.

CHAIRMAN: Thank you.

Yes, Ms Wong.

MS MAGGIE WONG: Yes. The second measure mentioned in page 62 is the installation of a protective shield. Can you tell us how many protective shields have been installed since June 2018? That's in KMB-1 submission, page 62, the second measure, about installing a protective shield near the driver seat, starting from June 2018. How many were installed?

MR LAI SIU CHUNG: I believe one-third of the fleet has been

covered, because there are many demerits. It may look to be some protection, but the opening of the shield is very big, it is not easy for you to switch it on and off, and it is very reflective and then there is a magnet at the very tip, and while the bus is moving there may be noise. And that would affect the bus captain. We have asked the management to improve that, and some bus captains would like that removed, because at night it is very reflective. But we are told that this is a political issue and it could not be removed.

Just last week we took this up with the management.

The protective shield is very problematic. The switching on and off of the shield, and it's reflective, it affects driving safety, and if it is not tightly fastened, then it would affect our driving.

CHAIRMAN: So the short answer, is about one-third of the KMB fleet have had these not very good shields deployed?

MR LAI SIU CHUNG: The protective shield has got a lot of problems. From bus captains it is not that they don't support having a protective shield, but they have reflected the demerits of the protective shield to the trade unions, we have also reflected them to the management. But so far there seems to be no improvement.

We are told it was political issue, the protective

shield could not be removed. Bus captains are under great pressure. This morning I checked with a BC and was told that if the magnet is not tightly attached it would be noisy and your fingers can get caught, and some passengers might knock on the protective shield inadvertently. It is not easy to open the door.

And the protective shield may affect the sight line of bus captains. They cannot see clearly the getting on and off of passengers. At night the shield is reflective.

So if vehicles on the other lane have lights, then it may be reflected. We have reflected that to the management and the answer was it could not be removed. By April next year all vehicles will be installed with a protect he have shield.

I don't know whether Chairman has seen the protective shield himself.

CHAIRMAN: Yes, I have. I have also seen them deployed over the years in New York taxis and elsewhere in the world. There seems to be no simple solution.

MS MAGGIE WONG: And since when did you make these complaints, or since when the bus captains make these complaints?

MR LAI SIU CHUNG: In the past few months, many bus captains have reflected that to trade unions, the last time I met

with Mr Leung of the management I relayed the complaints to them. They are saying that the protective shield was too reflective, and the switching on and off device, and also the shield has distracted bus captains. We have talked about the material, and then the switching on and off device is too tight, and some bus captains may not be strong enough to move it, but they told us that there is a trick you just push the door and it can be opened. But we see more problems.

CHAIRMAN: Ms Wong, I think we have to try a make progress in other areas, because we have spent a lot of time on this area.

MS MAGGIE WONG: Yes.

If I may move on to the second topic on traffic signal.

You mentioned in your submission at page 289-23-5, paragraph 12, Chinese at 289-19, you refer to a proposal about inviting the Transport Department to have flashing signal by numbers be added when a traffic signal changed from yellow to green, so that the driver knows what to anticipate, and to avoid the danger caused by sudden breaking.

And you made that submission a number of times, and if I just make the reference to you, but there is no need to go to those documents.

The first document is a letter submitted to the Transport Department in 1996, at page 289-31, paragraph 4.

The Transport Department did reply on 6 February 1996, and that's at page 289-38. The Transport Department responded at second paragraph that adding a flashing amber may confuse the motorist even more.

And then you made this submission or this proposal again on 15 March 2005. We can see that in Chinese at page 289-47; in English at 289-166.

If you look at page 289-50 to 51, in Chinese; and English at page 289-170.

So having heard the Transport Department's suggestion or proposal, or feedback, what is your view on having, or whether you still insist on having traffic signal counting by numbers?

CHAIRMAN: It is not a question of insisting, it is a question of requesting, is it not?

MS MAGGIE WONG: Requesting. Yes.

Do you still request, or are you satisfied with the reply by the Transport Department, or do you still wish to request the Transport Department to have this system of flashing signals added by numbers?

MR CHEUNG TSZ KEI: Yes, Chairman. With regard to Transport

Department's reply I am not satisfied. Because the department fails to understand the time required for a bus to be stopped. From the green to the red phrase, currently takes about three seconds, but if a bus is running at 50 kilometres per hour, to stop the bus stably, steadily within three seconds is very difficult. Therefore, some buses may rush through a green light, and this gives people the impression that bus captains like to do that.

In fact, at an awkward situation, if a bus captain has to stop a bus smoothly, then he may have to stop at a road junction. If he wants to pass the junction, that will be rushing through the green light, and if he has to stop and it would be very abrupt, that may cause injuries to passengers. These are difficulties associated with bus driving, but many motorists may not understand that. For a private vehicle it may be stopped within three seconds; for heavy duty vehicles it can be stopped abruptly and the goods inside might be disturbed. But we are talking about passengers on buses. So we want a countdown signal. Or at least there should be three to four flashes before the green phase turns to the amber phase to give us preparation. It is just like for passenger signal, there would be flashes when the green phase is going to turn to the

amber phase. This will enhance the quality of service and safety, it will benefit the public. But the Transport Department has time and time again ignored our aspirations.

CHAIRMAN: You are describing the flashing green man at a pedestrian crosses so the pedestrian knows that the green is going to become red soon; is that what you mean?

MR CHEUNG TSZ KEI: Correct, Chairman. We want an extra three to four seconds, so that before turning to the red phase, we can -- amber phase, we can have some preparation to allow sufficient time for bus captains to stop their buses smoothly.

CHAIRMAN: And are there other places in the world that deploy this system that you can point to?

MR CHEUNG TSZ KEI: I saw it in Singapore. They have a flashing of a green arrows. And more common in the mainland. They have countdown figures.

CHAIRMAN: That's the numerical countdown for the change of the phase?

MR CHEUNG TSZ KEI: Yes.

CHAIRMAN: Thank you.

MS MAGGIE WONG: And we have received submissions from the Transport Department about the statistics of all accidents involving franchised buses, that are

non-collision type. If I may take you to the Transport Department's submission at TD-9, filed in April 2018. At TD-1, page 111. Paragraph 6.

And we can see the statistics provided in paragraph 6. And at paragraph 5 and 6. Paragraph 5 states that:

"About 59 to 65 per cent of all the accidents involving FB during 2012 [to] 2017 are non-collision type accidents. These included accidents which typically involved passengers losing balance inside the bus compartment due to various reasons ..."

And if we see the forward planning programme of Kowloon Motor Bus for 2018 to 2022, in the same TD bundle at page 183, paragraph 8.2.7 stated that:

"The majority of the accidents, (51.5 per cent) were due to passengers losing balance while on the bus. More than half of these cases were caused by the bus braking in traffic."

Now, I would like to ask you this. It appears from these statistics, that more than 50 per cent of the injuries to people on or near bus are caused by losing balance.

So if you work back from losing balance, the most perhaps obvious reason given here is due to sharp braking. Would your union be agreeable to installing

a deceleration device, first, a deceleration device, which would retard the car at a certain rate when it reaches, for example, 50km per hour or 70km per hour. Would your union be agreeable to that kind of device?

MR LAI SIU CHUNG: I don't think you are very familiar with mechanics. Well, I don't think you are very familiar with the parts -- yes, there are device with deceleration, well, yes, there is a kind of decelerator, there has always been this device, but if the vehicle is travelling at 70kmp, and the vehicle will stop abruptly, that is impossible. But it can stop steadily, and that device has always been installed on buses.

MR CHEUNG TSZ KEI: Chairman, let me supplement.

More often than not passengers suffer injury on board a bus. It is because, like I said, at a traffic junction, signal traffic junction, bus captains might have to come to a sudden stop, and sometimes there are circumstances on the road forcing the bus captain to stop abruptly. On top of that, there are many passengers who are too busy looking at their phones without holding on to handrails, and some of them might even be thrown off the seat, because they don't sit properly.

MR LAM PO KEUNG: May I supplement.

For Lantau buses, there is this retarder function,

it is supplementary to deceleration. When we travel on hilly roads we use this device to help us go downhill. There are two segments of braking. The first one is deceleration. When we feel that the brake disc is secured and the bus can come to a halt steadily, well, this function has already been installed on buses.

MR LAI SIU CHUNG: Let me supplement, that for Lantau buses they may be single-deck bus, so the device may be different. We have a retarder, they have different device, so it is near the steering wheel, if they turn on that device, then there will be some air being released with that function, the speed of the bus will be reduced.

CHAIRMAN: Mr Lam, is there anything more you wish to say?

MR LAM PO KEUNG: I think that's it, thank you.

CHAIRMAN: Very well. Ms Wong, if that's not inconvenient we will take a morning break now.

How are we with making progress this morning?

MS MAGGIE WONG: We are slightly behind. But I'll pick up the speed after the break.

CHAIRMAN: Very well.

Gentlemen, we are going to take a break, give you an opportunity to have a rest, as well as the Committee.

Take a break for 20 minutes. Thank you.

(11.35 am)

(A short break)

(11.55 am)

CHAIRMAN: Ms Wong.

MS MAGGIE WONG: Yes.

Gentlemen, I'm going to refer to the next topic, resting facilities.

In your submissions, this issue has been raised. Based on the documents provided to us, to the Committee, this issue appears to have been raised as early as 2010. But if I may refer to you the submission relating to the public transport strategy study, dated 9 February 2015, submitted by your union, that's page 289-76 to page 289-80.

CHAIRMAN: Of which bundle?

MS MAGGIE WONG: In the TU bundle.

The English is at page 289-200. It highlights two problems, since we are on this page. It highlights two problems, first is the illegal parking at bus terminus at paragraph 3. That's page 289-79 in Chinese, and English at 289-203.

And then the second problem you raised in this paragraph is paragraph 7, insufficient resting facilities. Chinese is at 289-79; English at 289-203.

Do you see that?

And if I may also take you to a letter of request

from the Committee dated 23 July 2018 at pages 289-331 to 335. It is only in Chinese. It sets out the request for information on insufficient facilities.

And if you look at page 289-333, paragraphs 28 to 29, as to the Transport Department's response on the toilet and resting facilities.

And in your reply, I believe you made a general remark that throughout these years the resting facilities are not sufficient, and you provided a number of documents since 2010.

The first is the notification dated 21 June 2010, Chinese at page 289-90. The second to the third paragraphs.

The English is at pages 289-221 to 289-222.

That's the second to third paragraphs, about the union collecting 139 bus stations, and about 56.5 per cent of the bus stops did not have toilet facilities. And on average, if the bus captain has to go to the washroom it would take about four minutes. And bus captain in fact have to take five minutes. And some even to have take up to 10 minutes or above before they could attend the washroom.

CHAIRMAN: These are observations made in 2010?

MS MAGGIE WONG: Yes, these are observations made in 2010.

And my question is this. Since you have raised this

submission, by providing this documentation to the committee, is this problem still a serious problem, that your union considers it has to attend to? Or has the condition improved?

MR CHEUNG TSZ KEI: Chairman, there has been some improvement, but it is not completely resolved. For a lot of termini, there are still no toilets or rest kiosks available, especially for those in public housing estates. We ask for a rest kiosk and staff toilet. That is very difficult. We have been talking to the Transport Department, saying that for existing termini they have to be retrofitted, and for new ones, it must come with toilets and rest kiosk.

With these facilities, then they are considered to be a complete set of facilities at a terminus. Without such facilities, we would not be able to provide the services we are supposed to.

There has been some improvement in that previously at Lok Wah there was an industrial action, because the Housing Authority removed a rest kiosk from us. We need sufficient rest for us to provide good services. As a result of that incident, we staged an industrial action. There has been some improvement since. However, a lot of district councillors opposed the installation of a septic tank or rest kiosk. They made

things difficult for us. So this problem is not completely resolved.

CHAIRMAN: The Lok Wah kiosk, is that a KMB kiosk?

MR CHEUNG TSZ KEI: That's right, KMB.

MR LAI SIU CHUNG: Chairman, at that time, I was responsible for dealing with the Lok Wah incident. We have received complaints from members that the Housing Authority require the rest kiosk to be removed completely, and they said that it will not be reprovisioned.

So we staged an industrial action by closing down the terminus for half an hour. We have spoken to district councillors and the Housing Authority. We have been subject to opposition from community members.

We are not provided with sufficient facilities. As a result, staff members will have to sit down, rest, eat wherever they can find a space.

We know that some problems can be resolved, however I know that from Citybus and New World First Bus this problem is rather serious.

Well, when it comes to Chi Fu Fa Yuen, I will defer to the representative from Citybus.

MR LAU SIN TAT: For Citybus and New World First Bus at Chi Fu Fa Yuen we have been raising this issue for over a decade. We ask for rest kiosk or toilet facilities. However, owners of Chi Fu Fa Yuen opposed that.

As a result, we still don't have toilets or rest kiosks for our staff.

MR CHEUNG TSZ KEI: Chairman, let's hear from Long Win Bus.

MR CHAN KWONG NUNG: For E34B, from Yuen Long, in 2013, there was the bus route rationalisation. Originally, the route plied between Tin Shui Wai and Yuen Long. After rationalisation it start from Yuen Long to go to the airport.

After the rationalisation, we found that there were no rest facilities provided. We were told by the company that there were opposition from the community. Over a number of years, our staff members were subject to appalling conditions, say, for example, they couldn't find space to eat. In 2016, a female staff member ate some steamed rice rolls on board a bus. Some people took a picture of her, posted the pictures on Facebook, and there was bullying.

The female staff member was subject to tremendous pressure. She was crying her eyes out when relating the incident to us.

Our staff members don't have anywhere to go when they have their meals, and they had to walk a long distance to go to the toilets.

In the evenings or at night, they would have to walk past a very dark path, so there are security concerns

for female staff. And in August 2018, a rest kiosk was eventually provided. It was after a very long time that it was provided.

We have been asking for provision of rest facilities when there is a new bus stop or new terminus so that services can be provided with good quality.

CHAIRMAN: When were the rest kiosk provided? When?

MR CHAN KWONG NUNG: For E43B Yuen Long to airport, it was August 2017. In 2013 this route started. So for about four years, bus captains did not have toilets or rest facilities to use.

CHAIRMAN: Thank you.

MS MAGGIE WONG: In your submission relating to New Lantao Bus, dated 3 January 2018, that's at page 289-140 in Chinese, and English at page 289-317, paragraph 3 refers to the facility in the Sun Yuen Long Centre, Tin Shui Wai Estate. Has the condition still improved or is it still the same. In paragraph 3(i).

MR LAM PO KEUNG: I think several weeks ago a rest kiosk was provided, but I have not visited that place, so I cannot confirm.

MS MAGGIE WONG: Can you provide the information to us later?

MR LAM PO KEUNG: Yes. I can.

CHAIRMAN: Mr Lam, you are the representative of New Lantao

Bus company, are you not? Has this been provided?

MR LAM PO KEUNG: In what respect are you referring to?

MS MAGGIE WONG: The resting facilities.

MR LAM PO KEUNG: For the rest kiosk of Tin Tsz Estate, I will have to go to confirm, because this is Yuen Long area, not the catchment of Lantau. So I did not have a chance to go to have a visit to look.

CHAIRMAN: Thank you.

MS MAGGIE WONG: In your submission you also quoted another example at page 226-25, TU bundle 1A, internal page 24. The Chinese is at page 171.

The location is at Quarry Bay, Yau Man Street, and in that paragraph you stated that there were nearly 10 years' effort, but a small resting place is still not provided.

So has the condition improved?

MR LAM TIN FU: Sorry, it is not a submission from our trade union.

MS MAGGIE WONG: That's the staff rights of KMB Association document.

MR LAM TIN FU: No, not from branches.

MS MAGGIE WONG: Then I won't ask you about this.

So apart from the Lok Wah Estate in Kwun Tong, and the example that you provided, can you give us some other locations that you consider are places where bus

captains are unable to find a suitable resting place?

MR LAI SIU CHUNG: For example, for KMB, they have been putting in some facilities. However, because of space constraint or management issues at some locations, some of the facilities have to be improved. Say, for example, there is a single rest kiosk and there are some double kiosks. For double kiosks, the space available may be bigger, but still not enough. I know that the KMB is striving to improve the facilities. I think that, well, for about 70 per cent of the termini, there are toilets with septic tank and rest facilities. However, there are still 30 per cent of termini that are awaiting for provision of these facilities, subject to negotiations of various parties.

We have been given undertakings that these facilities would be provided, but there are oppositions from the community. Say, for example, for Chuk Yuen Estate, we have been fighting for over 10 years for a rest kiosk to be provided.

MR CHAN KWONG NUNG: I'm from Long Win Bus, let me supplement.

For E33P in 2016, the route runs around the clock, there are about 60 trips. The terminus is at Siu Hong station south. There are no rest facilities nor toilets.

Originally, this route was already in operation, in 2016 it became a full day route. Colleagues had to eat at the bus terminus, and to rest, at special space, location, we had to rest, but there was no rest kiosk.

After repeated efforts, to have one, the result was the local community and the Transport Department had not approved it. So it has been close to two years we have been asking for a kiosk, but still, to no avail.

We have not any notification as to when that can be done.

MS MAGGIE WONG: And about this E33P, was this request made in writing, about the rest kiosk?

MR CHAN KWONG NUNG: Yes.

MS MAGGIE WONG: When was that?

MR CHAN KWONG NUNG: The trade union at our meeting with the company raised that in 2015. The company has been telling us that it is making applications with the relevant authorities, and then in 2016 the district council approved that the route should be a whole-day route to serve the residents of Tuen Mun, and we were saying that without a rest kiosk how can we improve the quality of service? Our views were relayed to the district council and the Transport Department. Even today, we have not heard anything from the parties.

MS MAGGIE WONG: Could you provide us with the documentation

as to the written request?

MR CHAN KWONG NUNG: I can do so later. Today I have not got the document with me.

CHAIRMAN: Thank you, please provide it when you can obtain it.

MS MAGGIE WONG: Is it the case that up until now, the location is still not provided with any toilet or rest facilities?

CHAIRMAN: I think that is the evidence.

MS MAGGIE WONG: Yes.

Can you give us some photographic evidence about the location, if possible?

MR CHAN KWONG NUNG: I can do so later.

MS MAGGIE WONG: Thank you.

May I go to the next topic, illegal parking.

CHAIRMAN: Before you do that, Mr Lai, can you help the Committee in this respect.

KMB operates split shifts, do they not?

MR LAI SIU CHUNG: Chairman, yes. Split shifting. We have three shifts. Morning, and also evening, and special and L shift, and there is also an overnight shift. Morning, evening, special, L, and overnight, there are different shifts.

CHAIRMAN: Split shifts have been operated by KMB for many years, have they not?

MR LAI SIU CHUNG: It has always been the case. Since 1933. KMB has this arrangement. Right from the beginning. Back then there might not be overnight shift or special vehicles, but then in the past few decades it has always been the case.

CHAIRMAN: The revised guidelines that were promulgated as to working hours, meal breaks, rests, and so on, on 23 February 2018, made changes to the existing system, did it not?

MR LAI SIU CHUNG: The system in place has always been the same.

Regarding the new arrangements starting from February of 2018, I don't quite get you. Are you talking about a change in the system? In the past two or three or four decades, it is just the same: morning, evening shift, special shift, and overnight shift.

There have been no changes.

For L vehicles, yes, it was introduced in the last five years.

So it was introduced in the middle, so that there is no need for the bus captain to drive the vehicle back to the depot or to collect it from the depot.

MR LAM TIN FU: I think the Transport Department announced new guidelines, and I don't think there is any change in the shifting arrangement of KMB since.

CHAIRMAN: Ms Wong, could you put up the new guidelines? What I have in mind is the provision to be implemented over a period of time that if a 14-hour duty day was permitted, three hours of continuous break is required.

MS MAGGIE WONG: Yes. That's at CTB-2 bundle, page 2.

MR LAI SIU CHUNG: Now I get it, Chairman.

The guidelines were published in February 2018. Transport Department allowed time for bus companies to implement the guidelines, in the second quarter of 2019. Now I got you, Chairman.

Let me add. For the special duties and L shift, they are for captains to take their meals.

CHAIRMAN: The provision that I would like your help on is the requirement that is to be implemented of providing a rest break of no less than three consecutive hours for a special shift.

MR LAI SIU CHUNG: For no less than three consecutive hours in a special shift duty has always been in place. This is most basic, and the company has followed strictly this guideline from the Transport Department. For a special shift duty there should be a rest break of no less than three consecutive hours. This has always been practised.

CHAIRMAN: Is that a KMB policy? Or is it a Transport Department requirement?

MR LAI SIU CHUNG: This is a policy unique to KMB, may even be to Long Win Bus. But not for Citybus and New World Bus.

This has been in place for a number of times to allow bus captains to take meals and for the morning peak, so there will be a break together with meal, there will be a rest of three hours, and then the bus captain will continue with the second part of the shift.

This is arrangement for special shift duty and has always been in place, the case in the past few years.

CHAIRMAN: Ms Wong, may we see guideline 4, I think it is, at the bottom of the page?

MS MAGGIE WONG: Yes.

CHAIRMAN: Is there not a definition of what a special shift is? That it only can provide for morning and afternoon peaks? That's it. Guideline (1)(b).

Do you see guideline (1)(b), Mr Lai?

MR LAI SIU CHUNG: Yes.

CHAIRMAN: The provision that permits for a 14-hour working day during which you can drive 10 hours is restricted to demand created by morning and evening peaks; the morning rush hour and the afternoon/evening rush hour. Is that a new provision? A new restriction? Or not?

MR LAI SIU CHUNG: Chairman, in the revised edition in October 2010, guideline (b) said that it should be no

more than 14 hours.

And in 2018, there was a revision, may exceed 12 hours, but maximum duty hours should not exceed 14 hours, and there should be a rest break of no less than three consecutive hours, that was a revision.

But we have a fleet of over 3,000-odd vehicles, so there aren't too many vehicles that require more than 12 hours of operation -- maybe 10 per cent of them. But this duty of 14 hours, for two to three decades this has been the case, and bus captains have got used to it. The rest time in between may not necessarily be three. It can be four, or five hours.

So is that what you want to ask, about this 14-hour shift?

CHAIRMAN: No. What I want to ask you is about the places at which these bus drivers working 14 hours' duties come off their buses in order to start their not less than three consecutive hours' break. And I would like you to tell us about the facilities that are provided for resting at those places.

MR LAI SIU CHUNG: That depends on whether there are sufficient facilities at the bus terminus or bus stop. Bus captains may choose routes that are close to homes so they can rest at home, but some may not be the case. For instance, when it comes to the Kowloon Bay bus

terminus, the bus driver may live in Tuen Mun so he has to find a rest kiosk or a rest on the bus or go back to the depot. He will have to choose the location.

Whether the facilities are sufficient, well, maybe around 70 per cent of them. But most bus captains would choose routes near their homes and they might have been driving that route for many years, they have got used to it, they might choose not to be deployed away from these routes, whether there are sufficient rest facilities, not always the case, the rest kiosk may be very noisy, they may go to 7/11, McDonald's to take a rest. We have received such cases from time to time.

Whether there are sufficient rest facilities I will say half/half. It depends on whether the bus captain can make arrangements for him to take a rest.

But because he has chosen to travel on this route, that will depend on whether he can find the right location to ensure he has sufficient time to rest.

CHAIRMAN: Can you suggest a place that the Committee could go to this week to look at facilities that are inadequate for bus drivers who are taking their not less than three hours consecutive break?

MR LAI SIU CHUNG: For example, Chairman, in the past there was no rest kiosks in a bus depot, but there may be a sleeping area, and there may be a rest kiosk at bus

stops or bus terminus, or they may rest at home which is close by. There should be 1,500 such duties.

Now, you are talking about special shift duties, so this is the rough figure I can tell you. For special shift duties there are two sections, and for L vehicles there are also a morning and evening L vehicles. L vehicles serve the same purpose, that is to stand in for bus captains who have gone for meal breaks.

MR CHAN KWONG NUNG: I would like to supplement, for E33P from Siu Hong station south there are no rest facilities at that terminus.

For this route, there is one bus captain who needs to take their rest there. If you would like to visit this terminus, we can make arrangements to go together.

CHAIRMAN: Just a moment, Mr Lai, wait for the translation.

So you suggest that we might go there to examine the fact that there are no rest facilities?

MR CHAN KWONG NUNG: That's right.

CHAIRMAN: Is this a place where drivers taking the not less than three consecutive hours break in a special shift come off their buses?

MR CHAN KWONG NUNG: That's right.

CHAIRMAN: Thank you.

Now, Mr Lai, back to you.

Can you give us an example? Where should we go?

Just try and concentrate on the question. Where should we go to look at inadequate facilities for bus drivers driving 14 hours of duty, taking a not less than three-hour break?

MR LAI SIU CHUNG: It is a depot, well, it is in Mei Foo, some bus captains would take their rests there, sometimes they would have to sleep inside the bus or just find any location suitable for them. I would supplement you with further details later.

CHAIRMAN: Yes, just give us three or four places that we can go and examine. And what we are looking for, if it exists, is to find that there are 10 bus captains having this three-hour break, and there are only three seats. Do you understand what we are looking for?

MR CHAN KWONG NUNG: Let me supplement.

For Long Win Bus, A43, from Luen Wo Hui, Fan Ling, there are rest facilities provided there. However, in that facility only three bus captains will have space to rest there. During a split shift, constantly, there are at least six bus captains during their break time to use the rest facilities. As a result, there is insufficiency.

Chairman --

CHAIRMAN: Repeat the place if you would?

MR CHAN KWONG NUNG: Long Win Bus, A43, the bus terminus at

Luen Wo Hui, Fan Ling.

MR LAM TIN FU: Chairman, we are reminded that there are representatives of bus companies here. So I would like that, Chairman, you can see the actual situation at the location we have suggested.

MR LAI SIU CHUNG: May I suggest you some other locations?

One is the Tsing Yi terminus, one at Tsing Yi station, one at Kwun Tong pier, where there are no facilities provided to us, rest facilities. These are four locations.

Our trade union has been talking to the company, asking for more facilities.

CHAIRMAN: Thank you.

Ms Wong.

MS MAGGIE WONG: About this split shift, you mentioned earlier about KMB always have this special shift arrangement. Can you tell since when you have this special shift?

The reason why I'm asking is, I would like to show you a table in the miscellaneous bundle at pages 897 to 898. Comparison table.

If you look at this table, the guidelines have been revised four times: 2004, 2007, 2010 and the last time is 2018, February.

And this special shift arrangement, if you look over

the page, at page 898, was only introduced in February 2018. If you see the last column, "Special Shift Duty", and the footnote stated that it was arranged specifically to cater for service demand in morning and evening peaks. And this new special shift duty was only introduced in February 2018.

But your earlier answer seems to suggest that this split shift has been introduced a while back ago. Is that correct?

CHAIRMAN: By that you mean the guideline in relation to it?

MS MAGGIE WONG: The guideline in relation to it.

MR LAI SIU CHUNG: I would like to correct what you have said.

It is not the case that there are special shift duties in February, February, 2018. That has been there for a long time. The measures introduced in February 2018 are to be implemented in the second quarter of 2019. It takes time to make preparations and to make arrangements for the three hours of rest. But such arrangement has been in place for a very long time.

MR CHEUNG TSZ KEI: Chairman, may I supplement.

14-hour duty. Under the guidelines of the Transport Department, well, it is always there. Since the traffic accident, some people say that the 14-hour duty creates fatigue, causing the accident. However, there is no

distinction between 14-hour duty and special duty. Because for KMB, this has been taken up by special duty, and there is one-hour meal break and three-hour rest, so there are altogether four hours.

However, the 14-hour duty is not put in one single shift.

So in relation to the latest revision done in 2018, the 14-hour shift has been redefined as a special shift instead of one single shift.

The special shift has been in place for a very long time, mainly used for the morning peak and the evening peak. It usually takes place between 6 am and 6 pm.

For the special shift to cover the two peak periods, then it would be 14 hours, because at 6 o'clock when the bus captain starts the service, the bus captain will have to drive the bus back to the depot. So altogether, it will take about 14 hours to finish all the duties.

According to bus captains who are engaged in this shift, they said that although it is as long as 14 hours, it doesn't cause any fatigue, because it is easier than other shifts. That's what bus captains of special shift said.

There are two of us here who are engaged in special shift. One is from Long Win Bus. May we hear from him?

CHAIRMAN: We can in a moment, but please answer this

question first of all.

Following the accident on 22 September of 2017, the Transport Department initiated a review of the working guidelines, or the guidelines for working times, did it not?

MR CHEUNG TSZ KEI: That's right.

CHAIRMAN: Some trade unions suggested that the working limit for duty hours be limited to 12 hours; correct?

MR CHEUNG TSZ KEI: Duty hours, yes, that is the case.

CHAIRMAN: What was your union's representation to the Transport Department on that issue?

MR CHEUNG TSZ KEI: We keep an open mind. We want improvement on the duty hours of our members, because it will affect their performance. Safety is very important to us.

MR LAM TIN FU: Chairman, when we met Frank Chan, the Secretary for Transport And Housing, we made it very clear that 14 hours is the maximum duty hours. It doesn't mean that all bus captains should have 14-hour duties.

The second point is that for the 14-hour duty to be reduced to 12 hours, it will have a huge impact on income. If there is a reduction by two hours per day, it will translate to a reduction of salary by $5,000 a month. If 14 hours is to be reduced to 12 hours that

means bus companies will have to give those reduced hours to some other staff members with shorter duty hours. Say there are 2,000 staff members with KMB, that means they will need another 2,000 staff members, and they will have to employ another 400 people, which cannot be done within a short time.

If they can't employ additional staff, that means the reduced hours will go to staff members with shorter duty hours.

We think that rest time, rest facilities are more important. This will provide a better working environment for bus captains.

So we should not just look at a 14-hour shift. This should not be demonised. We need flexibility. Bus captains will have to apply to work special shift. They are not just being assigned these duties.

You have to take all factors into account. If you single out the figure and look at it in vacuum, I think this will be a departure of the operation of bus companies.

CHAIRMAN: The meeting that you spoke about with the Secretary for Transport And Housing, was that on 17 October of last year?

MR LAM TIN FU: Yes. It is mentioned by the Transport Department as well.

CHAIRMAN: Yes, you provided us with what you describe as a notice issued by the union, in which your position is stated. Perhaps we could have that on the screen.

In English it is at 289-274. Perhaps you could have the Chinese brought up on the screen.

MR LAM TIN FU: It is wrong, it should be in the latest submission, towards the very end.

MS MAGGIE WONG: 289- 337. Is that the submission dated 26 July 2018?

And if you go to page 289-336, the second-last paragraph. In English it's at 289-337-2.

CHAIRMAN: What I have asked to be put on the screen is the notice that is dated 17 October of 2017 issued by the union in respect of this meeting.

Just the notice. That's all I have asked for.

MR LAM TIN FU: 289-129 and 289-119.

CHAIRMAN: The document, so that we are looking at the same thing, begins:

"On October 17, 2017, the union led five bus branches to meet with Chan Fan ..."

Is that the document?

MR LAM TIN FU: Yes.

CHAIRMAN: The first bullet point is in these terms, is it not:

"It is not advisable to lower the upper limit of the

working hours in the work guidelines within a short period without considering the specific situations. Instead, the problem should be addressed by adopting transitional or interim measures ..."

MR LAM TIN FU: Well, you may say so.

Because Frank Chan, the Secretary -- right.

CHAIRMAN: What I'm trying to find out is this. Was this the union's position? Is this what you advanced?

MR LAM TIN FU: Yes.

CHAIRMAN: So whereas there might have been unions saying 12 hours of duty should be the new limit, you were not supporting that position. You are supporting a continuation of 14 hours of duty.

MR LAM TIN FU: You may say so.

CHAIRMAN: But as you say said, that was to be accompanied by better rest facilities and other measures. Was that your position?

MR LAM TIN FU: Yes, and rest time in between.

CHAIRMAN: And the other matter that you articulated is at the bottom of the English translation, bullet point in these terms:

"If planning to reduce working hours, they should avoid significantly lowering the income level of frontline employees ..."

MR LAM TIN FU: Yes. As I said, if the duty hours are to be

cut from 14 to 12, that may mean around $5,000 drop in monthly salary.

CHAIRMAN: Was this position that you took in 2017 as to changes in the guidelines for maximum duty hours the same position that you had taken in 2015 when the Transport Department asked trade unions about a possible change of the guidelines?

MR LAM TIN FU: Yes.

CHAIRMAN: Were you aware that there was the same, if you like, division between the trade unions in 2015 on this issue -- some advocating 12 hours maximum duty, and the position that you took, 14 hours continuing?

MR LAM TIN FU: We were aware of that only in 2017/18. Previously we rarely heard of such views.

CHAIRMAN: Just help me at least generally. When you met with the Transport Department or the Secretary for Transport And Housing, were there occasions when all of the various unions met in one session? Or were you always in different groups when you met with the Transport Department or the Secretary?

MR LAM TIN FU: We met them in batches. We never met with them together.

CHAIRMAN: Do you know of any reason why that was the case?

MR LAM TIN FU: Because we have irregular meetings, we have been having irregular meetings with the Transport

Department all along. This is our approach. And to reflect problems faced by captains of franchised buses, our general union is the one with trade unions from all five bus companies. And for some trade unions, they have been hostile and confrontational with our general union, so there is no room for cooperation with them.

And thirdly or fourthly, when discussing problems faced by employees of franchised buses, we have different views and positions. So we meet with officials separately, and whenever we meet with officials of Transport Department, we always consult our office bearers, and we also consult members on what to talk about.

And we have employees working in five different bus companies, so we believe we can grasp the situation of employees better.

Our general union has never criticised other trade unions in public, and we don't want this to continue to happen with the Transport Department.

CHAIRMAN: Thank you.

Ms Wong.

MS MAGGIE WONG: Can I take you to an Apple Daily document, which shows the date as to when this matter was canvassed. That is at page 260 of TU-1B. Chinese at 260-257; English at page 260-258-2.

If you look at the highlighted part at the bottom, bold and underlined, it made reference to the Transport Department's current guidelines. But right before that bold paragraph it states that:

"Since 2013, the [Federation of Bus Industry Trade Union] has been requesting the Transport Department to revise the 'guidelines' for reducing the working hours and improving the meal break. However, the Transport Department replied that all bus companies had indicated that revision of the 'guidelines' would affect the existing roster system, and they would also need to employ extra more bus captains, leading to an increase in the long-term operating expenses. A consensus could not be reached."

And at the bottom, the Transport Department indicated that:

"... it was the Motor Transport Workers General Union ... a sub-union of HKFTU ... claimed the 'possibility of reducing the bus captains income' as the ground for refusing the reduction of working hours."

And:
