"The Department has quoted and used the reasoning from MTWGU as an excuse, but has been avoiding the issue of the low basic salary of bus captains who have to incessantly work overtime for earning extra income. The

Department considers that the bus captains' salary is a matter for discussion between the bus company and staff, and to be adjusted by the market."

So it appears that the report quoted your union as the one that lead to the non-reduction of the guidelines to 12 hours.

CHAIRMAN: I'm not sure that is an accurate way of putting it, because the article says that all the franchised bus operators were against it as well.

MS MAGGIE WONG: Yes.

CHAIRMAN: But at all events, this simply confirms what you have told us, that this was your position, was it not?

MS MAGGIE WONG: Can you confirm that's the position recorded in the Apple Daily, that's your union's position, that it is accurately reported?

MR LAM TIN FU: First, Apple Daily, I think is biased in reporting. Secondly, our general union submitted proposals to the TD in a package. You cannot single out one or two points so. What is reported here is not fair.

And thirdly, in devising the guidelines the TD has consulted us and met with us and the final position is to balance different parties. It will not simply listen to the views of the general union. So it is inaccurate to say that our proposal has been fully accepted by the

department.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Thank you. For completeness, there is another article by Oriental Daily --

CHAIRMAN: I think we have had the position articulated by the representatives. We don't need to go to newspapers.

MS MAGGIE WONG: Yes, and if I may go to your submission to the Committee dated 26 July 2018, at page 289-337-2 in English; and 289-336 in Chinese, of the TU bundle.

CHAIRMAN: What topic are we going to now?

MS MAGGIE WONG: I'm just confirming one point is that in your submission, you stated that the Transport Department had not consulted union in launching the revised guidelines between the meetings on 6 and 17 October and before the announcement of the revised guideline on 23 February 2018. So it was --

CHAIRMAN: I think the point can be put like this, very simply. They talked to you, on 6, and 17 October 2017, but they didn't talk to you again until the result was announced on 23 February 2018, when the new guidelines were announced. That's your position, is it not?

MR LAM TIN FU: The paper is very clear. On 6 and 17 October we met with them. We expressed our views on the revised guidelines, and then they were announced on 23 February 2018. There was no communication with us in

between. And that's set out in the paper.

MS MAGGIE WONG: Mr Chairman, I see the time.

CHAIRMAN: Gentlemen, I know you were asked to attend this morning, but obviously we have overrun. Are you able to come back this afternoon to help us for a little while before we move on to other trade unions?

MR LAI SIU CHUNG: Chairman, there is an event that I have promised to attend. I would have to find someone else to replace me in that event. That's my position. I don't know about the others.

MR LAM TIN FU: Yes, I can. Thank you.

MR CHEUNG TSZ KEI: Yes.

CHAIRMAN: You are able to attend as well.

Are you happy to deal with it in that way, Mr Lai? perhaps not happy, are you prepared to do it that way?

MR LAI SIU CHUNG: Chairman, well, we have a lot of duties as members of trade union. There is an event. It is a junk trip with over 50 people attending. I occupy a leadership position in the union. I can stay a bit longer, and I will try to answer your questions as far as possible.

CHAIRMAN: We don't want to hold you up from a junk trip.

But what we are going to do then, would you prefer it if we continue for a little while now, Mr Lai?

MR LAI SIU CHUNG: Yes. If there is an actual point that

you can get at without beating about the bush, that would be good. I will be able to get straight to the point for another 10 or 15 minutes.

CHAIRMAN: As long as beating around the bush stops on both sides then perhaps we will proceed quicker. Yes?

Ms Wong, let's proceed.

MS MAGGIE WONG: Yes. Can I refer you to a document submitted by the Transport Department on 20 July 2018.

CHAIRMAN: What is the document?

MS MAGGIE WONG: It is a document in reply to the Committee's further question dated --

CHAIRMAN: What does it deal with?

MS MAGGIE WONG: It deals with the practice note of the training of bus captains.

CHAIRMAN: Thank you.

MS MAGGIE WONG: If I may take you to page TD-1 page 427. That's the first page.

And the part concerning training of bus captain is at page 435. In the second box it states that:

"The Transport Department has recently issued a practice note to FB operators in respect of the training ..."

And it mentions a practice note.

So my question is, has your --

CHAIRMAN: Since it is in English, perhaps you ought to read

it out so there can be a translation at least.

MS MAGGIE WONG: Yes:

"The TD has recently issued a practice note to FB operators in respect of the training for bus captains to align the training arrangements of different FB operators and to lay down a common framework of the training system for their bus captains for phased implementation from October 2018. Although no similar document was issued on monitoring of bus captains' driving behaviour ..."

CHAIRMAN: I think that's another matter, is it not?

MS MAGGIE WONG: Yes, that's another matter.

And my question is this.

Was this practice note ever issued to your union for comment?

CHAIRMAN: Never mind for comment. Have you been given a copy of the practice note?

MR LAI SIU CHUNG: You mean the training guideline? I don't think we have received anything. At least in relation to KMB, I have not received anything new guidelines.

MR CHEUNG TSZ KEI: Not for the five branches.

CHAIRMAN: Were you consulted as to changes in the way in which training would be delivered to bus captains, how it was going to be monitored, and the other matters that relate to that? Were you consulted?

MR LAI SIU CHUNG: Sorry, I see that it says a 2018 October. But it is now July. Is there a typo? It says that the implementation time is October.

So that means it has not been issued yet?

CHAIRMAN: No, I think the practice note has been issued, past tense; the implementation of the practice note lies ahead, future tense. October.

And the question is: have you been consulted about a revision of training, what is to be training? The modules? How it is to be monitored? How it is to be regulated? Has anyone come and asked you for your views?

MR LAU SIN TAT: For Citybus, yes, there has been consultation.

CHAIRMAN: Perhaps you could give us details of that?

MR LAU SIN TAT: They told us about the method of training, that is bus captains, after training will have to drive the route once by himself. Without training, without anything similar, the captain should not drive this route.

MR LAI SIU CHUNG: From KMB I would like to add. Previously, there was a practice where supervisor will accompany the bus captain. However, there has been some change. If it is Cross-Harbour, there will be three people watching the instructor. For other routes, six

people will be on board the bus watching.

CHAIRMAN: Mr Lau, can I ask you to clarify this. You say that you were consulted. And you said "they told us". Who is "they"? "They told us about the changes".

MR LAU SIN TAT: Management of the company.

CHAIRMAN: That's from Citybus?

MR LAU SIN TAT: Citybus, yes.

CHAIRMAN: But were you consulted by the Transport Department?

MR LAU SIN TAT: No.

CHAIRMAN: Yes, Mr Cheung.

MR CHEUNG TSZ KEI: No. So we don't know whether these measures are from the Transport Department. However, after the traffic accident, a few of the bus companies have introduced some revisions. But we don't know whether these revisions actually came from the Transport Department, because we were not clearly told.

CHAIRMAN: When you say "the traffic accident", are you referring to the 10 February 2018 Tai Po Road accident?

MR CHEUNG TSZ KEI: That's right.

CHAIRMAN: Yes, Ms Wong.

MS MAGGIE WONG: If I may move on to another topic, relating to the speed display unit.

We have heard evidence in this Committee that franchised bus operators are concerned that speed

display units would create conflicts and arguments between bus captain and passengers, and impose additional pressure on bus captain, in turn affecting safety bus driving.

We would like to know whether that view was shared by your union?

MR LAU SIN TAT: Yes, we share this view.

MR LAM TIN FU: We have not discussed about this point. We think, however, that bus captains of franchised bus operators will take into account the limitations and restrictions of each route to drive their -- it is a possibility that there will be disputes and conflicts.

MR LAI SIU CHUNG: I would like to add that when it comes to speed displayed on a minibus, that will just be conflicts between about a dozen passengers, but if it is installed on a bus, there will be over 100 passengers. The bus would not be able to be driven properly as a result. And I do think that experienced bus captains will know how to handle the situation.

MR CHEUNG TSZ KEI: Let me supplement, that on board of buses there are some alerts, alerting device, if it reaches 70kph it would sound, and for some buses the speed is limited to 70kph. So whether it is a straight road or just a flat stretch of road we would not drive above 70kph.

As to whether installation of a speed display, whether it will cause incidents, conflicts, when there is a slight exceedance, we can't tell what will happen.

CHAIRMAN: Alerts at 70 kilometres an hour, are not much use in a 50-kilometre-an-hour speed limit, are they?

MR CHEUNG TSZ KEI: Well, for our buses there is a GPS monitoring whether you are speeding at different sections. So most bus captains would not speed, otherwise they would be reprimanded at the office.

Is it worthwhile to devote the resources on this device? We have doubts. Would it be better spent on other areas? We think so.

CHAIRMAN: Thank you for your views.

I think we are going to have to take the break now.

If you are able to join us, do, Mr Lai, if not, thank you for your attendance.

Gentlemen, may I ask you to come back at 2.30 and we will resume our hearing then. Thank you.

(1.13 pm)

(The luncheon adjournment)

(2.31 pm)

CHAIRMAN: Good afternoon.

Yes, Ms Wong.

MS MAGGIE WONG: Good afternoon. The next topic is about illegal parking.

We have heard evidence that there has been some illegal parking at the bus termini, or bus terminus, which affect the driving of the bus back to the bus terminus, and as a result it caused problems, or safety issues arising from illegal parking.

In relation to your union, do you find illegal parking an issue that has to be raised with the police and the Transport Department?

MR CHEUNG TSZ KEI: Yes, we did. For many times we have reflected to the Transport Department that at the bus terminus some outside cars are stopping, obstructing the boarding and alighting of passengers on buses.

And safety is a concern.

Up to now, the Transport Department has not come up with any solution to address the problem, and our union has made a number of suggestions to the Transport Department.

Number 1, within the bus terminus there should be double yellow markings on the road; number 2, within the bus terminus, there should be installation of CCTVs, to capture images of illegal parking; 3, at bus terminus all the yellow boxes, should be marked, so that buses can go in and out freely. This is all for the public interest.

And we have made reference to Singapore, which has

adopted similar practices. But in Hong Kong the Transport Department has said that the UK does not have any such practice, so they will not consider it here in Hong Kong.

Thank you, Chairman.

CHAIRMAN: This suggestion in relation to Singapore, is this related to bus stops that are in the highway, where --

MR CHEUNG TSZ KEI: Chairman, yes. Bus stops at highways. And there is usually a yellow line, and as long as the buses give the lights, the vehicles behind will stop immediately so that the buses can go out of the bus stops immediately, but in Hong Kong there is no such arrangement. Even if the bus gives the light, the vehicles behind will only accelerate to get past the buses. So it is made buses difficult to get out of the bus stops, and very often accidents occur as a result causing even further congestion on the roads.

There are places where the problem is serious, at Queen Elizabeth Hospital, Princess Margaret Hospital, Mayfair Garden, Yen Chow Street, Un Chau Street, Austin Road, Reclamation Street, Star Ferry, Tin Shing Road South, Chatham Road South, Mody Road, and Mok Cheong Street.

These are places where there is serious illegal parking. And also Hennessy Road, King's Road.

CHAIRMAN: Are you describing illegal parking in bus stops or and/or in the approaches to bus stops?

MR CHEUNG TSZ KEI: Within the bus stop area. Very often vehicles are occupying the bus stops and these are also stopping behind and in front of the bus stop area, and there is only space left for just one bus to park or go into that. So with that kind of limited space it is difficult for the bus captains to go into the bus stop itself. So there can only be double parking. And passengers' safety is at stake.

CHAIRMAN: How do you suggest this be enforced, that is to say to prevent people from feeling free to park in bus stops and in the immediate approach to a bus stop?

MR CHEUNG TSZ KEI: Chairman, in accordance with overseas practices, say, for example, in the US, if you just park near bus stops the penalty is particularly heavy, the fine is particularly heavy. But in Hong Kong the fine is particularly light and the law enforcement has been particularly lax, and there are no double yellow markings on the road near the bus stops, and the drivers feel that they can be allowed to park at the approaches of the bus stops. I think installation of CCTVs will serve as a deterrent. This can be of reference to us.

Thank you, Chairman.

MS MAGGIE WONG: Have you made some footage in relation to

some of the illegal parking problem?

MR CHEUNG TSZ KEI: Yes. Our footage has been submitted to the Secretariat. Let's take a look then.

MS MAGGIE WONG: Now, we are playing footage at the moment. Can you tell us, first of all, can we pause a little bit -- can you tell us first of all where is this, or where the location is this?

MR CHEUNG TSZ KEI: It is northern Lantau near Yung Tung Estate.

MS MAGGIE WONG: So we can now see there are buses in the opposite lane?

MR CHEUNG TSZ KEI: There are double yellow markings, no police officer to manage the situation at all.

CHAIRMAN: When was this video taken?

MR LAM PO KEUNG: That was taken afternoon yesterday. To the left is 37M and 37H, and to the right is another bus stop and taxi stand. And the buffer area is very limited. And as a result, the vehicles cannot get into the Ying Tung Estate car park, and there is another footage showing clearly how the buses cannot stop there --

Now, this bus stops here. It cannot get into the round about. To the right of the bus is a car park. And you can see the private cars at the right, they are preparing to go into the car parks but they cannot get

in, and they have to get -- the bus coming in the opposite direction is actually going in the reverse direction, beyond the refuge island, the safe island there, so it is actually driving in the opposite lane. This problem is serious.

Now, if the artificial island is going to be completed in the future, then more congestion will be caused in the vicinity of this area.

MS MAGGIE WONG: Is this the same location as we have seen earlier, in the earlier footage, or is this a different location?

MR LAM PO KEUNG: The same location. I can also show you a few photos as well.

CHAIRMAN: Please do.

MR LAM PO KEUNG: That's from the Google map, the photo taken from the Google map.

MS MAGGIE WONG: And this photo shown on the left side is the bus stop, is that a bus stop?

MR LAM PO KEUNG: Correct.

MS MAGGIE WONG: Yes.

CHAIRMAN: If we go back to the previous photograph? That one. Is the grey vehicle on the left-hand side parked in a bus stop or immediately outside a bus stop? We can see it is in a bus stop.

MR CHEUNG TSZ KEI: Correct. The lorry opposite it, it is

also within the bus stop area.

MS MAGGIE WONG: And these photographs were taken yesterday as well?

MR LAM PO KEUNG: This is from Google.

MS MAGGIE WONG: This came from Google.

Those two footages, did you take them yourself or who took them?

MR LAM PO KEUNG: Yes, myself. I took it yesterday.

MS MAGGIE WONG: Inside the bus?

MR LAM PO KEUNG: Well, one was taken while I was in a private car, the other was taken while I was on the ground.

CHAIRMAN: I think we can see that from the movement of the camera.

MR CHEUNG TSZ KEI: Chairman, what I want to say is that in Hong Kong, well, this situation is rampant, it is seen everywhere in Hong Kong, and it is because the law enforcers have not been strictly enforcing the law.

MR LAM PO KEUNG: Can I supplement. Because for this particular location, at Ying Tung Estate, outside of it there would be reclamation, and before that is done, the roads have been opened up and built, and the Ying Tung Estate car park has insufficient car parking spaces. As a result, the private cars are lining up outside the car park and causing congestion, and you can see also behind

this photo there is a lorry unloading the goods. Because they can't get into the car park, they are unloading the goods outside the car park on the roads.

MR CHEUNG TSZ KEI: Chairman, may I add here. For any obstruction of the bus stop for whatever reason is unreasonable and illegal.

CHAIRMAN: Do you have any views about the use of forward-looking cameras that are deployed on such bus stops in order to capture illegal parking of this kind?

MR CHEUNG TSZ KEI: Feasible. But the question is when that is being done, will the employer's side hand over the information to the police?

Number 2, and for the law breakers, if they don't think the information will be given over to the police, they will continue breaking the law.

But then, if there is the, say, a CCTV capturing the footage installed on the bus, then that would serve as a deterrent.

Thank you, Chairman.

CHAIRMAN: Can I ask a supplementary question. If in order to mark the time of such an event, it was necessary for a bus captain to press a button, activate something that marks this event, do you have any view about bus captains doing that?

MR CHEUNG TSZ KEI: It is feasible.

CHAIRMAN: It is feasible, clearly, but do you have any objection to it, or would you support it?

MR CHEUNG TSZ KEI: Yes, I support it.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Related to this issue is priority bus lane. Your submission raised the point that the drivers are getting frustrated and irritated as a result of people making their job more difficult, and one of them is illegal parking.

And others, like passenger abuse, all add up to safety issues.

There are certain suggestions, in Singapore, to have priority bus lane; would you support that idea?

MR CHEUNG TSZ KEI: Chairman, I support -- I agree with that. But over the past 10 years or so, regarding the government's attitude towards bus lanes, the government is trying to cut the bus lanes. Instead of having more bus lanes, we are given some very difficult paths to manoeuvre, for example Texaco Road flyover, at 6 in the morning, that is between midnight to 6 in the morning, franchised buses are not allowed to use that flyover. On the other hand, heavy vehicles are allowed to use the flyover, and also non-franchised buses, whereas for franchised buses they are disallowed from using the flyover, such that passengers would need to walk under

the flyover to cross the road.

It shows that the Transport Department is playing favouritism, and I reckon it could be because of noise complaints, and too many heavy vehicles are using the flyover, so they take the right away from franchised buses so that we need to use the road under the flyover.

Thank you.

CHAIRMAN: Is this flyover a bus priority lane?

MR CHEUNG TSZ KEI: Chairman, this flyover isn't a bus lane: it used to be the case that any vehicle could use the flyover, instead of having buses go through the road under the flyover with traffic lights, but the Transport Department is adopting this attitude now. Instead of sticking to the old way, they are asking buses to use the inconvenient road under the flyover instead. Heavy vehicles and non-franchised buses are allowed to use the flyover, so they are putting the cart before the horse. I don't understand their intention.

CHAIRMAN: But concentrating on bus priority lanes, the existing ones, what is your perception of the Transport Department or the government attitude to their development?

MR CHEUNG TSZ KEI: Chairman, I absolutely support the idea. I agree that there should be bus lanes for buses for public interest so that more people would opt for public

transport instead of driving their own cars, because we have too many private cars causing traffic congestion.

If we have smooth lanes for buses, there won't be traffic congestion and then more passengers would opt for public transport. So I hope that the Transport Department would face the issue squarely, and that is about public interest instead of stifling the room for operation of franchised bus companies.

Thank you.

CHAIRMAN: The question is specific. What is your view of how government approaches bus lanes at the moment? Do they stifle them? Is that what you are saying?

MR CHEUNG TSZ KEI: I don't see new bus lanes being added for buses, and I'm not just talking about bus lanes -- and perhaps let me digress a bit. At the moment, for bus termini at housing estates they are poorly designed so that it is difficult for buses to park, and it is really difficult for buses to survive.

CHAIRMAN: Yes, Ms Wong.

MS MAGGIE WONG: The last topic is salary.

We have heard evidence from Citybus operators that they have merged bonus into salary or reclassified it into basic salaries with effect from 1 March 2018, and I would like to explore with you on this system.

The downside from that recommendation appears to be

that there is currently no system of rewards. Can your union confirm that this is the case, as of to date, after the reclassification to basic salaries in March 2018?

CHAIRMAN: By a no system of reward, you mean for safe driving?

MS MAGGIE WONG: For safe driving.

MR CHEUNG TSZ KEI: Chairman, regarding the pay, since 1999 the management has been cutting our pay and our benefits, and in 2004 there was a substantial cut. Between 1999 and 2004, a three-tier system was introduced, and recently, we requested the management to restructure the system of salaries and benefits because otherwise it would deal a great blow on the staff moral.

For new recruits, just earlier, they earn merely 12,000 or less than 12,000. Later on, we requested the company to include the safety award, the service award, to the basic salary, such that the total pay would be $15,360, but the pay is still far lower than the average median wage in the transportation sector.

But regarding the workload of bus captains and their responsibilities, everything falls on their shoulders. We have a bus full of passengers and their lives are in the hands of the bus captains, and such low pay would directly affect recruitment and work attitude of bus

captains.

Very often drivers would come in and hone their skills, get a driving licence for heavy vehicles and then they will move on to driving other heavy vehicles in the sector. And this undermines service quality as a whole, because we have new recruits all the time.

And the pay is too low, so that they don't even care about the job. And this is the attitude they have at work. Very easily traffic accidents happen.

Coming back to the daily wages before 1998, the majority of bus captains care about the job a lot, because they knew that they wouldn't get another job with this pay outside, and they had increments, and with more years of service they would tend to stay in the position instead of moving to another company. They had a sense of belonging.

But since 1999, because of the change in the salary system, their pays were substantially lowered, so the quality of the bus captains deteriorated, which in turn affected public interest.

Thank you.

CHAIRMAN: You say that the union requested a restructuring of the salary structure. When did you request that in relation to the fact that it was changed beginning on 1 March 2018?

MR CHEUNG TSZ KEI: Chairman, we made this request. We have been making this request for 10 years, but our request was never acceded to, because of the circumstances. At the time in Hong Kong we experienced SARS, and the financial tsunami. The management, therefore, had not been willing to make any improvement until the recent two or three years. The management finally agreed to make progressive improvements, but they came in dribs and drabs.

Many employees, therefore, remain unhappy, and some industrial actions also took place. We understand that.

So we urge the management once again that they should substantially improve pay and benefits, and it should be on a par with the level in 1998 for daily paid workers.

This year in the upcoming meeting for pay hikes, the management already verbally promised us that there would be a substantial increase in terms of benefits. However, for salary, it is still below the median wage. New recruits earn $15,360. At the moment the management only agreed to increase the pay by $1,000. That means $16,360 -- still far below the earnings of drivers of heavy vehicles.

And yet we are not just driving heavy vehicles. We are driving buses with passengers. Our pay should not

be lower than other drivers, whereas the reality is our pay is extremely low and it is very unreasonable.

That is why we are still striving for it. We doing our best to strive for more rights for the sector.

MR CHAN KWONG NUNG: Let me also supplement. Long Win.

In January 2018, Long Win union conducted a survey regarding the number of recruits leaving and joining in 2017. 100 recruits joined in 2017 whereas for employees leaving in 2017, there were 120.

So according to our survey, among the 120, 60 per cent of employees left because of low pay.

CHAIRMAN: Mr Cheung, can I just ask you this.

In respect of the merger of the safety bonus and the other allowance into the basic salary beginning on 1 March 2018, was there any event that you attribute to that change by the bus operators?

MR CHEUNG TSZ KEI: Chairman, I can tell you, categorically, that it has nothing to do with any event that happened, or any major accident triggering this pay rise.

Well, last year in May we had a round of negotiations on pay rise. It was in May 2017, and it was then confirmed that there would be a pay hike this year, meaning there would be an adjustment, and that the safety award would be added to the basic salary. The management, however, did not want to discuss it at that

meeting regarding pay hike.

They would only confirm with us about this new arrangement after the pay hike meeting had ended. And in fact, after that meeting, we did pursue it with the management, and the management said they would do it as soon as possible.

As I understand, in December the board of directors already approved an increase of the basic salary and addition of the safety award, and we have been striving for that for a long time.

That's also part of our plan, and that is we should increase the salary or the remuneration package. For the safety bonus and the service bonus, that has to be included in the basic salary, totalling $15,366, and that is the first step. And the second step, we would strive for double pay calculated based on the basic salary.

So this is what we want to achieve.

Well, they have already acceded to our request for double pay, and that is calculated on the basis of this amount, 15,366. If we don't add in the safety and service bonus, we can only get 11,000. So in other words, we have an additional $3,000 for the double pay. So that's our second step.

That has nothing to do with any event or any traffic

accident.

Thank you, Chairman.

CHAIRMAN: So to summarise, this was agreed in May 2017, and as you understand it, the board of directors, as you put it, approved this change in December 2017?

MR CHEUNG TSZ KEI: Correct, Chairman.

In December 2017 the approval was granted.

However, the company didn't tell us then, it didn't give us a Christmas present. It was still putting this on hold yet, and inappropriately they just floated the idea after the accident, so there was a misunderstanding in the community that it is just because of this major traffic accident that this adjustment was made.

CHAIRMAN: Which board of directors approved this change?

MR CHEUNG TSZ KEI: To my understanding, Chairman, it is the KMB board of directors, Mr Leung Nai Pang who actually approved it himself.

CHAIRMAN: No other company?

MR CHEUNG TSZ KEI: Chairman, I don't know.

CHAIRMAN: Mr Lam, New Lantao Bus company didn't effect this change, did it, of merging safety bonuses into basic salary?

MR LAM PO KEUNG: No.

CHAIRMAN: Instead, as we understand from their evidence, there was a bonus payment, a singular payment; do we

understand that correctly?

MR LAM PO KEUNG: Yes, correct, there was. Our basic salary was $6,400. And every day there was a daily allowance. $230. So if you drive for nine hours a day every month and you also work on the Saturdays and Sundays, so we will end up with $16,200.

So compared to KMB, New World First Bus and Long Win we are lower, so our pay at the New Lantao Bus is on the low side compared to the others.

CHAIRMAN: Mr Cheung, can I ask you this, which I think is what Ms Wong was asking you: what is your view of the fact that this restructuring has resulted in there being no incentive payment for bus drivers to drive safely?

MR CHEUNG TSZ KEI: Chairman, I don't agree.

A reasonable salary will serve as an incentive to the colleagues, they can have a stronger sense of belonging, and they will not just use their job as a springboard to find another better job. If they do have that kind of mindset then their working attitude would be very different.

CHAIRMAN: Thank you.

Yes, Ms Wong.

MS MAGGIE WONG: If one were to recommend a system of monitoring drivers' behaviour, similar to perhaps Singapore's system, which has a system of red, amber and

green, based on the driver's driving pattern, and --

CHAIRMAN: I think that's one bus company in Singapore.

MS MAGGIE WONG: That's one bus company. May we pull up the article of Tower Transit. The article is the Straits Times, 29 June 2017.

CHAIRMAN: Do we have a reference for this?

MS MAGGIE WONG: We don't have a reference. Because it is not in our bundle.

We can see on page 2 of the article, the fourth paragraph, it made reference to the driver:

"... who previously worked at SBS Transit, improved his score to 72. By December he managed to hit 20 points, qualifying him for a bonus of $130 for that month."

And there would be a monitoring system like a GreenRoad telematics system. And there will be a reward based on the driving behaviour.

And if one were to recommend such a system, would your union consider that would make sense, or would you support it, or worth pursuing it?

MR LAI SIU CHUNG: Chairman, I would like to add. I am a representative of the KMB branch. I would like to tell the chairman, for our company, the company has never attached importance to the pay and welfare benefits, and only until after the IRC has been

established that the company considered giving us more.

I've worked in this company for 18 years. I do not feel happy working here.

There is no employee-friendly policies. They have not put in the proper remuneration package to boost our sense of belonging. I've worked in this company for 18 years, I have been signing contract after contract.

How come that the trade unions have been striving for the safety and the service bonus to be incorporated into the basic salary? I have insisted on this. I've told the management many times, for the safety and service bonus.

For new drivers, if they don't have enough experience, their bonus may be deducted. The entire safety bonus of 1,200 can be deducted altogether, so there have been many problems with this safety bonus, but then the company has been telling us that the safety and service bonus are in huge amounts. So, before the accident happened, they would like to accede to the trade union's request, and that safety and service bonus be merged with the basic salary.

But, it doesn't mean that after the merging of the amounts our safety will still be upheld. Because we are a professional bus captain. We have to be accountable for what we do, and the safety bonus and service bonus

have been in place for many years, but then the arrangement has not been fair.

And especially to the new drivers, say, in the first half year to one year, they don't have enough experience. Their bonus in safety and service will be cut by the company and their income will not be stable.

So the trade union has considered this as a problem for many years, and we hope that the bonus will not be deducted. Maybe this month you are lucky, you are not involved in a traffic accident, but then in some other months you will be involved in a couple of traffic accidents and your safety bonus will be deducted.

MS MAGGIE WONG: Mr Lai, we are not talking about deduction. It is addition. What I'm suggesting here is not about deduction. It is on top of your basic salary. If you drive well you would receive an extra bonus. That's the system. It's not about deduction.

MR LAI SIU CHUNG: Well, KMB doesn't have such a system.

MS MAGGIE WONG: Not about whether you have the system. If one were to recommend such a system, would you support that?

MR LAI SIU CHUNG: Chairman, we support any type of reward system or incentive system. Right now we are talking to the KMB on another kind of bonus system: there would be a 20-point increment system. So in other words, if you

achieve certain requirements then you will get an increment, an extra point. And that is beyond the annual salary increase. The KMB has verbally promised that there will be a 20-point system, it's calculated based on the performance, safety performance, attendance, discipline. If the bus captain does not achieve the standards then he will not get an extra point.

So that's a kind of bonus system.

Of course, if there are other reward systems we welcome them.

MR LAM PO KEUNG: Can I add?

An appropriate monitor of drivers' performance would not be by way of a penalty, we think. I think if a bus captain falls short of standard we should train him up more so he can drive safely, and that is more important.

If you have a bonus, and the bus captain will try to strive for it, and say, if he is involved in an accident, he would get frustrated. For NLB, there is a safety bonus. Well, if the safety bonus is deducted, we are talking about several thousand dollars. And that affects the livelihood of the family of the bus captain.

Thank you, Chairman.

MS MAGGIE WONG: Chairman, I have completed my questioning.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Thank you.

QUESTIONS FROM THE COMMITTEE

MEMBER AUYEUNG: Thank you, Chairman. I just have a quick question regarding the protective shield that we discussed this morning.

I hear from you gentlemen that you are not very much supporting this idea.

I just want to clarify. The reason why you are not supporting is because the material is not good enough because of creating reflection or squeaking sound, or you are against the concept of having a protective shield?

Thank you.

MR LAI SIU CHUNG: I am not saying that it is not good, but that if you have a protective shield, according to bus captains, when it is installed, well, bus captains say that they do have an independent driving compartment, so to speak, but there is something wrong with the transparent plate of the protective shield, and the management hasn't addressed the issue. And it is distracting for bus captains.

And there are other also issues stemming from it which get more serious. We would like them to improve the plastic plate as soon as possible. As I mentioned this morning, there is glaring, and then at the tip,

there is a magnet which gives off some squeaking sound, and according to the union, although there is a protective shield in a convex shape, if one is to attack the bus captain then one can still do so.

We have reflected the problems to the management many times. They just said that they cannot be taken down. But many drivers would like to have it taken down because you have safety problems, and it also produces glare. And because of the curve there would be a distortion of vision, and not to mention that the shield gives off some noise.

And these are the problems they have not resolved.

MEMBER AUYEUNG: But would you support it if management can come up with a protective shield that would not create any driving hazards?

MR LAI SIU CHUNG: Yes, I would. Previously we submitted some drawings to them. For example, in Korea they have an independent door with two tiny windows that could be opened and closed. We gave them drawings for reference.

But I think that for this kind of protective shield that they have come up with, there are problems. Perhaps they didn't think that there would be so many problems, but then they have to address the issues.

MEMBER AUYEUNG: Thank you.

CHAIRMAN: Mr Lam, at New Lantao Bus do you operate special

shifts, 14-hour shifts?

MR LAM PO KEUNG: Yes.

CHAIRMAN: And are you afforded, or are drivers afforded a minimum rest period during such a duty of three hours or more?

MR LAM PO KEUNG: Yes.

CHAIRMAN: And on the occasions when a driver comes to that time of the day where he has that break, what are the facilities like that are provided at the place where the driver takes his break?

MR LAM PO KEUNG: Nothing so far. They would at most take a break on the bus. They could rest inside the bus.

CHAIRMAN: No facilities?

MR LAM PO KEUNG: Not for the time being.

CHAIRMAN: And where are these places, bus terminus depot, where are they? How many are there where people take these breaks?

MR LAM PO KEUNG: Usually in the street, shopping malls, they would take a rest. If it is close to their home they would go home.

CHAIRMAN: What proportion, if you are able to answer this, of bus captains are in a position to go home when such a break occurs?

MR LAM PO KEUNG: I don't know. A half, I guess. Half of those who are on this kind of special shift, around

half.

CHAIRMAN: Do you do these special shifts yourself?

MR LAM PO KEUNG: Previously I did. But I would go home.

CHAIRMAN: Thank you. You anticipated my other question.

Ms Wong, the material that the Transport Department provided us in the form of a briefing paper to the LegCo transport panel. Could you give me the reference for that and could that be put up on the screen?

MS MAGGIE WONG: Yes. That would be page TD-1, page 403.

CHAIRMAN: Where is the LegCo briefing paper?

MS MAGGIE WONG: The briefing paper should be at page 403, TD-1, page 403.

CHAIRMAN: In English -- the briefing paper is in English, is it not?

MS MAGGIE WONG: Yes, it is in English.

CHAIRMAN: Thank you.

Mr Cheung, this is a paper that was discussed on 25 July in the LegCo council by the Panel on Transport, and it deals with three matters, really: one is training, another is seat belts and another is technological safety advances.

And it is the product of a working group which was constituted by the Transport Department and comprised the franchised bus operators and three bus manufacturers, and they were convened in the middle

of March, and this is the product of their work.

Were your views sought on any of these three matters?

MR CHEUNG TSZ KEI: No. No, Chairman.

CHAIRMAN: Have you had a chance to read the document to see what it is that they propose to do?

MR CHEUNG TSZ KEI: Chairman, I haven't read this paper before. This is the first time I'm reading it.

CHAIRMAN: Mr Cheung, given your answer, it seems to me that perhaps it would only be fair before I ask you any more questions if I suggested that you ought to read the document, and then you can give us your considered responses to some of the questions that I have.

What I would suggest is this: we have other trade union representatives who have been waiting patiently to give their evidence. May I suggest that we interpose them, and then at a later stage when you indicate to us that you are in a position to answer the questions, we will bring you back. Is that a proposal that meets with your agreement?

MR CHEUNG TSZ KEI: No problem.

CHAIRMAN: Very well, in which case, may I ask you to vacate your seats. We will take a short break whilst there is a swap over of personnel, and then we will deal with the federation.

We will take a short break.

(3.25 pm)

(A short break)

(3.35 pm)

REPRESENTATIVES OF THE FEDERATION OF BUS INDUSTRY TRADE UNIONS: MR HO YUI CHEONG, MR CHUNG CHUNG FAI, MR LAM KAM PIU, MR LAU KAI HIM, MR HUI HON KIT, MR KWOK WAI KWONG

(Evidence given in Cantonese; transcription of the simultaneous interpretation)

CHAIRMAN: Mr Chung and gentlemen, we thank the Federation of Bus Industry Trade Unions for accepting our invitation to give evidence to the Committee, and I'll ask Ms Wong to ask questions of you.

Let me just explain this, that if at any stage you, Mr Chung, wish one of your fellow representatives to answer a question, please defer to him and we will hear from him. So it is a matter for you who it is that puts forward your view.

Thank you.

EXAMINATION BY MS WONG

MS MAGGIE WONG: Thank you, Mr Chung, and gentlemen, for coming. And we have your written submissions.

The Committee's primary concern, as set out in the terms of reference, is to make recommendations which go to the issue of safety of franchised buses.

So my questions will be focused on safety aspects rather than the wider aspect of employment issues.

My first question is to go through the background with you about your union.

Mr Chung, I understand that Federation of Bus Industry Trade Unions represents three trade union members; is that correct?

MR LAM KAM PIU: Correct.

MS MAGGIE WONG: That would be Kowloon Motor Bus, New World First Bus and Citybus.

MR LAM KAM PIU: Correct.

MS MAGGIE WONG: And your union currently has 1,660 members.

MR LAM KAM PIU: Correct.

MS MAGGIE WONG: Are these members all bus drivers?

MR LAM KAM PIU: No. Some of them are the regulators and supervisors, mechanics in the depot. They are working as frontline staff.

CHAIRMAN: How many are bus captains?

MR LAM KAM PIU: Over 90 per cent.

MS MAGGIE WONG: Mr Chung, your union has submitted two submissions. The first one is dated 24 April 2018. And that can be found in TU bundle 1A, pages 147 to 226, in Chinese. In English, it is at pages 226-1 to page 226-80.

And you have made a second submission in response to

the letter from the Committee. The supplemental submission is at TU bundle 1B pages 260-28 to 260-67.

And you can see it on the screen. And the English is at TU1B bundle at pages 260-68 to 103.

And Mr Chung, I will just go through the issues raised in your submission by topic.

The first topic is illegal parking.

And we can find that issue was raised in your submission at pages 260-234 to 236.

This is annex 2, and it set out e-mail exchanges that you had about illegal parking problem, which you have provided to the Committee. And you have addressed a problem in particular in relation to Nam Cheong Street and a number of other streets, in your recent submission.

MR LAM TIN FU: Sorry, Ms Wong, are you asking Mr Chung to make a reply or Mr Lam to make a reply?

MS MAGGIE WONG: I apologise. I'm sorry, maybe Mr Chung, you would assign the person that is most suitable to answer the questions raised in this area: illegal parking.

MR LAM KAM PIU: Ms Wong, I am the acting president. Mr Chung is my department. And on behalf of the federation, I'll ask Mr Lau to take the question.

MS MAGGIE WONG: Thank you.

Mr Lau, you provided the Committee with an annex 2, which sets out the correspondence that you had with the Transport Department complaining about the illegal parking problem, and we can see at page 235 that you have annexed photographs, your union has annexed photographs showing the extent of the illegal parking.

And at the bottom we can see the e-mail showing the Transport Department received the photo stating that the colleagues of regional office will follow up.

So my question is: has there been follow-up or has there been improvement on this Nam Cheong Street in terms of illegal parking.

MR LAU KAI HIM: Starting from May 2015 we started discussing with the TD on the illegal parking at Nam Cheong Street, and a couple of months ago we received the final reply from the TD, saying that the situation has improved, and one more marking for bus stop has been added to prevent illegal parking on the bus stop area.

But it took us a very long time to communicate with the police.

And also because of the illegal parking issue a bus captain was attacked at this particular location, and after that, we wrote immediately to the Permanent Secretary for Housing Mr Lai, and the letter was included or appended to our supplementary submission,

and at the same time we have been chasing up the TD on the improvement works at this location. But the TD has been acting slowly, and they really, don't want to deal with it, it seems to us.

MS MAGGIE WONG: Yes, and maybe if we should first look at your submission on illegal parking, your first submission in relation to this issue. It is page 176 in Chinese, and the English is at page 226(30).

On this page we can see your suggestions, or rather your summary of what you have done for this illegal parking.

And we can see in the English version that:

"... the federation wrote to the Transport Department in May 2017 and required arrangements of more policemen to strengthen the enforcement and other feasible measures to prevent the bus stop from being blocked by vehicles illegally parked there. It is suggested that a 24-hour restricted area to be set up, the 'bus stop' road sign should be extended and iron railings should be added to reduce the number of vehicles illegally parked there and prevent the bus stop from being hindered ... after several rounds of [discussions] or communications, the Transport Department finally agreed to set up iron railings only on the grounds of the need for loading and unloading

goods ... however, because the Transport Department paid no immediate attention to this problem, a bus captain was attacked at this bus stop in August 2017, because he was passing the private vehicles illegally parked there and was misunderstood as 'skipping the stop'. This incident was exactly caused by blocking of bus stop by illegal parking vehicles."

And you stated that:

"If the Transport Department had taken the suggestion of the federation seriously and promptly arranged to set up road signs, this incident could have been avoided."

In your recent submission at page -- or second submission at pages 260-89 to 90, that's in English, and the Chinese is at page 260-53.

And your further reply stated at paragraph (d) that:

"The main reply of the Transport Department is to refer the matter to the transport officer of the relevant district for follow up, and to the police to take appropriate actions. Meanwhile, for certain districts, such as Nam Cheung Street as mentioned by the Federation, no only made oral questions, but also maintained communication ... In addition, concerning illegal parking, the Federation also expressed its concern and demanded enforcement at various black spots

in the meeting with Hong Kong police."

And it is stated there that:

" ... the police has in different meetings made verbal commitments to enhance its enforcement efforts, and ... the prosecution figures ... has increased [and] some illegal parking black spots, such as the Reclamation Street in Mong Kok, King's Road, Yee Wo Street and Wang Lung Street Tsuen Wan have not seen much improvement."

And you have also annexed a list of black spots to the police in one of your annexures, showing that there were a number of locations that you have asked the police to follow up -- and I believe that's in annex 14 -- in your letters dated 6 and 27 March 2017. That's at page 260-462, in Chinese, and page 260-468-1.

If we look at the letter, it was addressed to the Commissioner of Police at page 260-468-2 in English.

You have highlighted a number of black spots at page 260-468-5, for Hong Kong Island, New Territories and Kowloon.

So my question is: has there been any follow-up after these two letters?

MR LAU KAI HIM: After these two letters, in our regular meetings with the police and the Transport Department, on every occasion we reflected the problem of illegal

parking with them and regarding what we told the Transport Department, it can be seen in the minutes of the meeting.

As for follow-up action on illegal parking, it should not be done as a one-off exercise. It should be sustainable effort. There should not be follow-up action, just right after we mentioned one black spot. We will continue to follow up with the Transport Department on the black spot list and see if there have been new additions or improvements, but since March 2017 until now, we have not seen a lot of improvements regarding these black spots. But we have been taking follow-up action.

CHAIRMAN: What do you suggest is the way forward to deal with the illegal parking that causes problems for franchised buses?

MR LAU KAI HIM: First of all, the police should take enforcement action. Very often the problem we encounter is illegal parking and the bus captain would call the police for handling and very often the police on many occasions would say that they are unable to handle the situation because of lack of manpower, and previously, we did suggest increasing the number of traffic wardens, as we understand in busy districts such as Yau Tsim Mong district the number of traffic wardens tend to be on the

low side, but the police could engage more traffic wardens to take enforcement action against illegal parking, because it is a traffic offence and the most effective enforcement is to prosecute the offending drivers, and there should also be signage at bus stops, because the signage will have binding effect on offending drivers.

And we also requested that there should be double yellow line. Apart from Nam Cheong Street the problem is also very serious in Fo Tan, et cetera, and there is a need to have yellow lines there. At the moment there is some room for improvement as far as our laws and regulations are concerned to take enforcement action.

CHAIRMAN: There are double yellow lines all over Central, and it does not stop illegal parking, does it?

MR LAU KAI HIM: That's true. Because according to the police they do not have sufficient manpower to take enforcement and it is difficult. We are very passive, we rely on the government to deploy officers to take enforcement action. But since 2017, what we have seen is that although the police figures suggest that they have stepped up enforcement, we don't see a significant improvement.

CHAIRMAN: What about enforcement by the use of CCTV?

MR LAU KAI HIM: We agree. We agree that police manpower is

limited, and it is difficult to deploy substantial manpower to tackle just one issue. We agree that technology can help, and in recent years we understand that the police has been deploying technology such as CCTV to take enforcement.

We support it because police manpower is limited, but police officers do give deterrents. I think deterrent is more important that punishment. If you have deterrents it will be more effective in stopping the problem, because drivers may also know that police officers would not patrol a certain area regularly to take prosecution, whereas CCTV and other similar technology could be deployed for enforcement purpose so that it can serve as deterrent and it would be much more effective.

CHAIRMAN: What about the use of forward looking CCTV cameras on buses in order to capture the fact of illegal parking?

MR LAU KAI HIM: As we mentioned in the supplementary paper, for cameras installed on buses, there are different kinds. For the latest model there are eight cameras showing bus compartments, as well as outside of the buses, and the video clips would be used for the investigation into accidents.

Of course if we are to use the video clips for law

enforcement purpose, the police has the power to retrieve the clips. But we should bear in mind the legal requirements, because there is privacy concern, and because the bus compartment cameras would capture what happens inside, so there is a privacy concern that we need to deal with carefully.

But on the whole, we agree it can be used for enforcement.

CHAIRMAN: I'm not asking you about CCTV inside the bus looking inside. It is forward looking CCTV that captures the problem the bus driver has as he approaches a bus stop and vehicles are parked illegally in it.

MR LAU KAI HIM: Agree.

CHAIRMAN: What, if any, view do you have about bus drivers assisting in enforcement by for example noting, perhaps electronically, the time at which they have captured a particular infringement, so that when the bus returns to the bus depot, someone can view that CCTV, because the time has been noted?

MR CHUNG CHUNG FAI: I am Chung, and I would like to supplement.

About using bus cameras for law enforcement, after the bus returns to the depot, well, the company itself doesn't know. We need to write up a report, telling about the data and time of the incident, the relevant

time period, before somebody would retrieve the card or trip, but it would take two or three days, because of documentation. So it may not be very effective.

And when a bus approaches a bus stop, it is in motion, and even if you capture a vehicle, you have no idea whether that vehicle is in motion or whether it is stationary. So I do think it is difficult.

CHAIRMAN: Do you not think that in Asia's World City we could come up with a technological device where the bus captain simply presses a button which then alerts somebody who views the CCTV to go to a particular time, and then, of course, it is up to that person to determine whether or not the camera captures the stationary vehicle?

MR CHUNG CHUNG FAI: Well, I agree. But -- if it is technically feasible I agree, but I want to add that our federation is very concerned about illegal parking at bus stops. Because we have low floor buses introduced in the past 10 or eight years to serve the wheelchair-bound passengers, and if there is illegal parking at bus stops we can't stop at the bus stop to help passengers in wheelchairs, so there is a safety hazard, and that is why we are rather concerned about illegal parking particularly at bus stops. Because at any moment we can have passengers coming in wheelchairs

and if we can't reach bus stop there will be hazard.

CHAIRMAN: The question is simply this: that if possible, is it the union's view that bus drivers, bus captains could be deployed to assist in enforcement to alleviate those kinds of problems? Pressing a button to capture the time of the infringement?

MR LAU KAI HIM: If this technology is introduced, of course we will be happy to accept. Because bus captains are also affected by illegal parking, so if technology allows us to take enforcement action we will support it.

Bus captains, well, under cap 230A, are sufficiently empowered, that is Public Bus Services Regulations, but it may have to do with the regulations, the bus companies' views as well as the Transport Department's views.

So I think this is something that the Transport Department and the company can consider.

As for bus captains, using technology to assist the police in enforcement actions, of course we welcome that, because by pressing a button we will be able to capture the time but it has to do with technology if it is feasible, and second, whether the franchised bus companies would agree, and whether it is technically feasible.

CHAIRMAN: Ms Wong.

MS MAGGIE WONG: I believe this is a matter that has been raised by the letter from the Democratic Alliance, using the Singapore's practice.

The letter was dated 30 April 2018 in miscellaneous bundle 2, page 644, and in English at 644-2.

If we see the first suggestion about this Singapore practice of installing cameras next to the driver's seat since 2008, and all the bus captain needs to do is press the button, and hand the footage to the police, and the police will send a ticket to the owner who breached the regulation with a fine, or extra fine.

So this is one of the suggestions made by the Democratic Alliance using Singapore's practice. Would you support this idea of enforcing the law in that way?

MR LAM KAM PIU: We support it.

MS MAGGIE WONG: The second topic I wish to explore with you is the special shift, the special shift problem. If I may take you first, to your submission at page 167, in Chinese, and in English at page 226-21.

And you highlighted the new guidelines requires the special shift, for special shift bus captains, they need to have a continuous resting period of three hours, and you stated at page 167 in Chinese, and page 226-20, at the bottom, that:

"... not all bus captains are resident near the

working places. Even if there is a resting period of three hours, they cannot find suitable resting place, finally resulting in fatigued driving in the long run working environment, which may definitely affect the security [I believe that is safety]."

And on the next page at page 226-21, the bottom paragraph, and that's 167 still, at the bottom, you stated that:

"... Kowloon Bus has set up the 'special shift' at present and no pay is provided for the rest time of the 'special shift'. The bus company uses the so-called allowance to substitute remuneration, which is extremely unfair for bus captains of the 'special shift' ... the Transport Department has not made any stance or given any comments in this respect ... the Principal Transport Officer mentioned in a meeting that the Transport Department did not have the power to supervise the ... company to set up the 'special shift'."

And based on your submissions, I believe your submission is against this idea of having long working hours. Throughout your submissions, I believe you have been advocating reducing the working hours from 14 to 12. Is that the position?

MR LAM KAM PIU: Yes, that's our position.

MS MAGGIE WONG: Can you tell us why you would advocate this

position?

MR LAM KAM PIU: Can I ask Mr Lau to answer?

MR LAU KAI HIM: First, we have taken reference from practices of work hours in common law jurisdiction, in EU, US, Singapore, and South Korea, there would not be any special shifts lasting 14 hours. We have given the relevant information for reference, to the IRC, and it is annex 9 in the supplementary paper, and annex 10 also contains the relevant information.

Now, 14 hours are very long. And in between the bus captains get only 10 hours for rest, and you can imagine. Now, the bus captain gets off work, has to go, travel back home, and has to take a shower, et cetera, so we wonder whether the bus captain can sleep for six to seven hours. So it is grossly inadequate.

Bus captains need to have great concentration, and bus captains have to look after the passengers, road conditions, et cetera. Compared to driving an ordinary car, it is much more demanding.

So 10 hours in rest time is not enough.

If you look at common law areas, and also neighbouring cities of Hong Kong they don't have 14 hours. Compared to EU and Singapore, our work hours are long.

I'll see if Mr Chung has anything to add.

MR CHUNG CHUNG FAI: Yes, I would like to say something more.

Why are we against 14 hours, this special shift? First, so far, for the guidelines promulgated by the TD, there has never been any special shift, but this time, in order to accommodate the bus companies' request they told us that the ordinary trips will be cut to 12 hours, but then they have added in this special shift lasting 14 hours.

And they also emphasised that -- the guidelines also say categorically there should be no less than three hours and three consecutive hours in rest breaks should be provided in the special shift. But then the TD will not decide whether this three hours will come with pay or not.

Now the guidelines is that there should be no less than three consecutive hours in rest break. So in an extreme break they can give you six consecutive hours as a rest break. So they are paying you just, say, eight hours pay and 6 hours come without any pay, but then you are still spending 14 hours in that special shift. So that's an extreme scenario.

In other words, on this guideline, issued by the Transport Department, this is something that the bus companies can do, and they are exploiting the frontline

workers here.

And as our submission said, there is no proper facility or rest facility for us to take a proper rest. And the bus captains have to sort of roam around during the rest break, so how can they replenish during the rest break?

That's number 1.

Number 2. We can make some calculation, 14 hours, the bus captains, if they live further away, they will need to spend, say, some time in travelling to and from work, so maybe one hour, two hours, so they maybe spend 2.5 hours in travelling to and from work.

So they get up in the morning, they have to brush their teeth and so on, that takes half an hour, and then when they get off work to home, and they have to take a shower and have meals, so they have only five hours left. Does it mean that they will fall asleep immediately after they get in bed? Not necessarily. So you can imagine whether the drivers get enough rest time.

So we are all against this special shift.

CHAIRMAN: Ms Wong, have we not received evidence from Citybus, who do not, but propose to use split shifts in the future, that they propose paying bus captains at the hourly rate, not an allowance, not a reduced amount, but

at the hourly rate?

MS MAGGIE WONG: Yes.

CHAIRMAN: And secondly, what is the position that KMB have taken for the future on this issue?

MS MAGGIE WONG: KMB's position at the moment, as I understand it, is given the number of people that raise objection, I believe their submission stated that they will explore that -- I'll find the reference -- that they will explore this special shift.

CHAIRMAN: The issue is simply this. Are they going to pay the hourly rate, or are they going to pay this reduced allowance that they have paid in the past?

MS MAGGIE WONG: I will find the reference before I answer that question.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Perhaps Mr Chung, if you could assist, we have heard evidence from another trade union called Federation of Bus Industry --

CHAIRMAN: No, that's the current representatives.

MS MAGGIE WONG: I apologise.

We have heard evidence from the Motor Transport Workers General Union, who also comprise five branches of trade union and bus captains, that they support the special shift. That's the first point.

The second point they said is there are not many

people who are taking special shifts.

And third is if there is a reduction in special shifts, you would need to hire a lot more workers, and it would lead to a reduction of about 5,000-odd income for bus drivers.

So they have voiced out three reasons opposing -- or rather supporting this 14-hour special shift.

What is your reply to those submissions?

MR CHUNG CHUNG FAI: My stance is this: we are now exploring safety of buses. That's most important.

I said going by common sense you would know that the driver in a special shift would not have sufficient time to rest, and that leads easily to driver fatigue. So that's number 1.

So if we are focusing on safety there should not be a 14-hour special shift. That's point 1.

Number 2, so if we cancel special shift, the income will go down, that's very much a cycle. Why a reduction in pay, why do we have to work extra -- a few hours to get a higher income, and that's mainly because our pay is too low? So that's why we have to work several extra hours.

If the pay is sort of linked to the median wage of the government survey, then bus drivers would not like to work that long.

If I remember correctly, the median is already $18,000. But for new drivers they are getting $15,000 only.

That's because of low salaries, our colleagues have a really heavy burden and they need to work extra hours, and in the same vein, does it mean that they need to work 16 hours to earn more? It is impossible to gauge it by working hours.

We can't simply work more hours to earn a bigger pay. Instead we should raise the pay to prevent fatigued driving.

And about breaks, allowance would be given, but this is not the problem with the bus companies. It is the Transport Department. The Transport Department has issued this guideline for bus captains, and the Transport Department therefore is responsible for protecting our pay. The department should not pass the buck onto both of us, otherwise the TD should not have issued the guidelines in the first place.

So I think the Transport Department is being irresponsible.

MS MAGGIE WONG: May I go back to the question that the Chairman raised earlier as to whether the Kowloon Motor Bus are going to pay the hourly rate or are they going to pay this reduced allowance as they have done or paid

in the past for special shifts? And if I may take you to the bundle KMB-1, first is page 111.

If we look at the old daily rate, for (H), special shift duty allowance, we can see the rate, before 1 March 2018, the old daily rate is $21.90, and if we see the new daily rate, it is still no change.

And if we look at table 2 for the monthly rate, at page 109, we can see at (E), split shift duty allowance, the old monthly rate is employed before or after, is the rate of $1,951.50, and there is still no change from 1 March 2018.

May I ask, perhaps you may address this, is the split shift duty allowance per hour still the same for KMB after 1 March 2018?

MR CHUNG CHUNG FAI: Let me invite the KMB representative to take your question.

MR KWOK WAI KWONG: To answer you, in short, $21.90, that's the rate per hour, but the normal rate should be $116 per hour.

CHAIRMAN: So the hourly rate, if that was what was paid, would be much greater, five times greater?

MR KWOK WAI KWONG: Agree.

MS MAGGIE WONG: And that is why in your submission at page 226-21 in English, and Chinese at page 166, of the TU bundle, 1A, you stated that this special shift

allowance is extremely unfair for bus captains of special shifts; is that the reason?

MR CHUNG CHUNG FAI: Agree.

MS MAGGIE WONG: And the next topic is the -- related to this topic on cost, you mentioned in your submission that the bus companies are cutting costs by cutting remuneration and employee welfare benefits. If I may take you to your submission, page 158 in Chinese and pages 226-10 to 226-11 in English.

It refers to the bus company cutting costs by cutting the remuneration and employee welfare. Can you explain how, and in what way?

MR LAM KAM PIU: Mr Lau can take this question.

MR LAU KAI HIM: First of all, regarding remuneration, we have the unfair situation regarding special shift, and bus companies would deploy bus captains to work for long hours to suppress the manpower need, and different companies would have different welfare systems, for example they have employees recruited before a certain time, and after a certain time receiving different benefits. Although the bus companies would like to improve employee welfare as a whole, because of the differential treatment for different employees they have different welfare benefits.

New recruits receive fewer benefits that old

employees.

MR LAM KAM PIU: I'll let Mr Lau supplement.

MR CHUNG CHUNG FAI: For remuneration and welfare benefits for new recruits they earn 15,000 plus; for old employees they earn 18,000, whereas for benefits, for employees under the old system, we have a year end bonus equivalent to one month of pay; new recruits also have a year end bonus, but they are required to meet certain requirements.

Medical benefits, for example, for old employees, they can visit the clinic 20 times for free, whereas for employees under the new system only 10 visits free.

So you see, there is differential treatment. The bus companies try to suppress costs by cutting remuneration and benefits because they always talk about the meagre profit they are making. I don't understand how meagre they mean. They earn $100 million or $200 million of profit. I don't know when they would say it is profitable.

MS MAGGIE WONG: Thank you.

The next topic is about lost trip.

Your submissions, both your first and your supplemental submission made a lot of references about phantom bus, or lost trips, and if I may refer you to the English submission at page 226-22 in TU-1A bundle,

in Chinese, page 168.

In the second paragraph, it made reference to:

"Lost trip is caused by various reasons, such as shortage of bus captains, traffic jam, vehicle malfunction, and so on."

And then you mentioned that:

"... lost trip mainly involves the three problems of manpower, bus and road. The former two problems should be faced squarely and dealt with by bus companies. However, for these problems [you question whether] the Transport Department ... perform its role as a supervisor?"

And you refer to:

" ... the 'Phantom Bus' is a short-distance bus created based on the grey area of the definition of the Transport Department, which travels for several stops to fill up the trips not duly made due to various reasons, and to lower the rate of the 'lost trip'."

Can I ask you something about this lost trip, first of all. Are there a lot of lost trips in Kowloon Motor Bus?

MR LAU KAI HIM: KMB at the moment, the target of lost trips has dropped by 3 per cent. I mean, it is at 3 per cent, because of manpower problem. So it is a long standing problem, but it doesn't just happen to KMB. For Citybus

and New World First Bus, for various reasons they also have the problem of lost trips.

So this is not a problem facing KMB alone. Many bus companies face the same problem.

MS MAGGIE WONG: You make reference here to phantom bus. Can you explain more, what is this phantom bus?

MR LAU KAI HIM: For each bus route, the FB operator signed a schedule of service with the TD, which regulates the journey distance, the fleet number, and the frequency. Basically bus should go from terminal A to terminal B to be regarded as a departure. But sometimes there would be special departure only apply in a few stops. So this would be used to make up for lost trips for various reasons.

And back then, after Oriental Daily, the newspaper, revealed the problem it was termed "phantom buses". In fact, it is making use of the grey area in the TD's definition.

Let me supplement. In terms of deployment of buses, manpower, bus routes, et cetera, the TD should have full knowledge in the schedule of service, and according to the Public Bus Services Regulations, the companies are required to provide the schedule of service so the schedules should be in the hands of the TD, and the TD should have full knowledge of the operation of these

companies.

MS MAGGIE WONG: The reason I ask this is, in your supplemental submission you mentioned how this lost trip would lead to safety issues at page 260-81 in English.

In Chinese, it is at page 260-43 to 44.

If I may read this paragraph at page 260-81. You stated that:

"'Lost trips' or scheduled travelling time set by franchised bus companies being too short to accommodate variations in road conditions always lead to bus captains have insufficient rest during duty or driving hours. Different from 30 minutes break or 60 minutes meal time, bus companies will not issue special directions for the 12 minutes rest time. Therefore bus captains may not be able to fully understand the 12 minutes rest time. Since there are lots of variations on the roads ... travelling time will increase depending on the situation on the road. But the duty of setting travelling time rests on the bus companies."

And then:

"The union has not prepared statistics in terms of the bus captains' shifts where there is insufficient travelling time, but the relevant information can be found in Annex 8."

Can I ask you to elaborate as to why this lost trip

problem would lead to insufficient rest during duty or driving hours?

CHAIRMAN: If I understand it, what you are saying is journey times are set at too short to do the actual journey, and that leads to the bus captain arriving at the destination with insufficient time to have a proper break, is that the point? And lost trips is a consequential device used to deal with the fact that not enough trips have been made; is that it? So that the real issue, for safety, is that journey times are too short. Do we understand you correctly?

MR LAU KAI HIM: That is correct. Let me answer your question in several parts.

First, in the paper, the 12-minute rest time, that is in condition (a), and that is for every four hours of driving there should be a rest break of 12 minutes. But then the bus companies usually do not let the bus captains know about this. As said in our appendix 8, we suspect that there will be only three minutes. So there isn't sufficient time for bus captains to take a rest. And because of the busy road situation, bus captains usually arrive at the bus terminus late, and the passengers are waiting, so they would drive immediately, and they don't have sufficient time to rest.

For the journey time, can I ask Mr Chung to

elaborate more.

MR CHUNG CHUNG FAI: About the driving time or the journey time, we have asked bus companies, New World First Bus and Citybus and also TD how do they come up, or set the travelling time for buses. They come up with the schedule of service not based on scientific data. What they do is they have a bus trying out the new routes, and see how long will it take for the bus to operate.

So that's not a scientific approach.

So we suggest to the TD and Citybus and New World First Bus that in coming up with a travelling time we must allow sufficient rest time for the bus captains, and we should make sure that the bus captains would not speed. Very often, because of insufficient travelling time the bus captains will tend to speed, and that's also very natural, as human behaviour.

We must come up with a scientific approach in determining the journey time. Say, for example, say if a bus travels at 40km per hour, then you come up with the expected journey time.

Now, in the urban areas the speed limit is 50km per hour, so if you set it as 40km or 30km really you should come up with figures like those. That I would call a scientific approach, and then also you have to be mindful about the number of bus stops, so how many

seconds you are allowing the bus captains to have passengers alighting and boarding the bus up.

Third, you have to be mindful about the rest time you would give the bus captains. That's also accountable.

And also in Hong Kong roads the journey time may differ depending on the period of the day. Say, in peak hours, it would take longer, non-peak hours, the journey time would be shorter.

I believe that the bus companies will be able to get information on the situation at peak and non-peak hours from the black box, and then factoring into the congestion situation, then come up with a journey time estimate. I think that's a more specific approach. I wonder whether TD will heed our views.

MR LAM KAM PIU: Mr Lau.

MR LAU KAI HIM: In the earlier hearing, Mr Jain Alok has already said the black box is there to capture the journey information and journey time. And bus companies can be in full grasp of the relevant data, but then the bus companies, because it involves manpower, and the bus fleet, the bus companies would like to use less manpower and less number of buses to meet with the TD's requirements. So as a result, the rest time of the bus captains is reduced. And because there are many

passengers waiting, then very often the bus drivers do not have any rest at all even.

I believe that the bus companies do have sufficient information to help them come up with a more reasonable schedule. But that involves resources, buses and manpower, and in the August 2017 meeting with the TD we have asked the TD to monitor the journey time of bus companies. But then the TD said that they would only just scrutinise and look at the schedule of service, but I have also outlined the details in the schedule of service just now. I won't go into them.

But then information such as journey time is not included in the schedule of service. And very often the TD has not been doing -- its gatekeeping role properly, And the schedule is always so tight, and the bus companies -- I mean, the bus captains are under a lot of pressure so.

Can I ask Mr Hui to elaborate.

MR HUI HOU KIT: Citybus. For some routes of Citybus, N8X which has run for over a decade is an overnight route starting from 12 midnight to 6 am the next morning.

For this route, it runs from Siu Sai Wan in Chai Wan, to the Central ferry pier in Central. So the one hour is the journey time.

Let me give you my background. I used to be an

overnight bus captain. I have been working for over 10 years, and I have been driving N8X for over 10 years, and for the past 10 years the journey time has been set at one hour, so a return trip means two hours.

It is impracticable to finish the journey in one hour. It would definitely go over time. Why? Because for N8X, there are altogether 110 bus stops. Well, in the return trip. So for one way, 50 to 60 stops. So within one hour, it is to finish its trip, it goes through Chai Wan Road, Shau Kei Wan Road, King's Road, Hennessy Road, Admiralty Road, and Des Voeux Road, and then the Central Ferry Pier or the Macau Ferry Pier, so it is from Eastern District to Central District. It goes through all the signallised junctions so it would be quite impossible to finish the journey in one hour. Well, if you have to finish it in one hour, you have to go at great speed. And you even have to speed, in order to finish the journey in one hour. I have not worked on that route for quite some time, so I can't finish it in one hour.

And for the N8X bus captains now, because they have been working on the journey for a long time, and they know the operation of the traffic lights, so they try to manoeuvre a bit so that the journey can be completed in one hour. This is the best example. I'm

a representative of the CTB employees union and I've talked to the management, and I've told them one hour is definitely not sufficient for N8X. I have taken part in union activities for over 10 years.

This is an extreme example that I'm citing. Thank you.

MS MAGGIE WONG: Thank you --

CHAIRMAN: Are you saying that the one-hour journey time was never practical?

MR HUI HOU KIT: Correct.

CHAIRMAN: Thank you.

MS MAGGIE WONG: And if you cannot finish the journey within one hour scheduled time, what would be the consequence?

MR HUI HOU KIT: The colleague will have to continue driving, well, for N8X, the headway is half an hour, so if he arrives at the terminus late, then he still has to depart from the bus terminus 30 minutes later.

Or if there is a traffic accident, causing a delay of 15 minutes or more, then upon the company's instructions, he can try to -- I mean, depart later. But if it is just a delay for five to six minutes he has to continue with the next journey.

And there would not be some sort of interim journeys, in between.

MS MAGGIE WONG: This journey, would there be penalty in

terms of the income if you cannot meet the schedule time?

MR HUI HOU KIT: No.

CHAIRMAN: Only the rest time would be reduced?

MR LAU KAI HIM: (In English) Yes.

MR HUI HOU KIT: Yes. Yes. For N8X, well, sometimes there may even not be any rest break at all.

MS MAGGIE WONG: We have heard --

CHAIRMAN: Just a moment, Ms Wong.

Prof Lo has a question.

MEMBER LO: I am just curious, then how does the company enforce 12 minutes of rest time for the first four hours, if the bus is over run, over time every trip, so in four hours there will be no rest time at all, so how does the company ensure there would be 12 minutes of rest time as stipulated in the guideline?

MR LAU KAI HIM: Let me put it this way. There are several conditions in the guideline. Half an hour rest for six driving hours and one meal break, and in the schedule that is categorically written down, but in the 12 minutes for the first four hours, that is not specified.

Because of the tight schedule or the busy traffic, maybe the 12 minutes would already be cancelled because of the heavy traffic congestion, but the bus captains don't know that there is a 12-minute break within the

first four hours of duty.

But for the other requirements, the bus captains are in the know.

But the busy schedule is also very tight, and the bus captains very often don't know that they have lost this 12 minutes in rest break.

But we have been reflecting our view that there should at least be five minutes' break when the bus gets to the terminus, the bus captains can relax a bit and can go to the washroom. But the bus companies are not taking a humane approach in dealing with the issue.

MEMBER LO: One other question.

So on paper, this 12 minutes does not exist, not to talk about in practice?

MR LAU KAI HIM: And they must implement it. Because there would be random check on the part of the TD, that's what the TD told us.

The TD has been reminding individual bus companies from time to time, and in appendix 8, submitted to the Committee, there is no 12 minutes. But this is a guideline from the TD, but then in the bus captains handbook, there is no specification to the like.

MS MAGGIE WONG: Yes. Related to this topic is the resting facilities. We can see in your submission at page 226-25, in English, that you raised the topic about

insufficient area of lounge room or resting facilities. In Chinese it's at page 171.

You raised a specific problem, at the bottom of page 226-25:

"For many years, the Transport Department has not taken over charge of the lounge room issue, but pushed the responsibility to the Lands Department and the Home Affairs Department. In addition, some government departments have not supported the establishment of lounge rooms, such as the Housing Authority, so that this issue cannot be solved successfully."

And, of course, based on your example that you have given earlier, about this one-hour journey time, can I raise, before I ask, about this one-hour journey time, is there sufficient facility when you reach point B, leaving aside the journey time, from A to B, in relation to the bus route that you mentioned earlier on?

MR HUI HOU KIT: Yes. In Siu Sai Wan, Chai Wan, and for Hong Kong Macau terminal, there are resting facilities, but on the whole, for Citybus, resting facilities are insufficient. Let me give you some examples.

The rest lounge may be very small, and there may only be a temporary toilet, and sometimes there isn't any toilet at all.

Our union strived for a toilet, and then they began

to have toilets.

MR LAU KAI HIM: Well, in the supplementary submission we have provided a list of resting facilities, where facilities are sufficient, where sufficient facilities are not, and you can refer to the list.

MS MAGGIE WONG: I'm going to take you to that document.

I believe that is in annexure 7 of your submission at pages 260-342 to 346, in which you produce documentation showing the follow-up progress report for individual bus terminus. In English, it is in TU bundle, page 260-346-1.

And you produced a table not only showing the progress of application by KMB, Citybus, and NWFB, New World First Bus. You also produced a letter dated 28 June 2017 in which you highlighted the problems in relation to Chai Wan East bus terminal and Sham Shui Po So Uk Estate bus terminal.

Can I ask about this.

I note in particular that some of the applications have been dated back for a number of years. Perhaps if I can quote an example, it is 30 May 2016 at Lai Kok at page 260-346-4. At Lai Kok:

"TD received KMB's application at 30 May 2016 and has conducted site visit with KMB at the said location on 23 June 2016. As the pavement near the relevant bus

stop is relatively narrow, hence TD's engineer has requested KMB to revise the design of the rest room. KMB has not submitted the revised design to TD up till now."

Is that the most up-to-date progress, or rather has no progress been made since June 2016?

MR LAU KAI HIM: As we understand, on setting up of rest lounges, the KMB has been very active in the past two years. At a lot of terminals they have been installed. They may not be of sufficient size, but at least there is a space for bus captains to take a rest.

For the example you mentioned, we are not sure about the progress, but there are some other examples such as Tsing Yi pier, a rest lounge has been installed, and it is now in use. So in terms of this, KMB is fairing better than Citybus or New World First Bus. At least there is a small rest lounge. The space may not be sufficient but there is a lounge for bus captains.

MS MAGGIE WONG: Yes.

Can you give us an example, or, if we have to do a site visit off some of the locations in which the resting facilities are grossly inadequate, which location would you suggest?

MR LAM KAM PIU: I suggest Quarry Bay terminus of New World First Bus. There is no resting facility at all for

drivers. And we have been striving for one for over 10 years.

All along, the Transport Department has been telling us that there is opposition from the local community and there is also dawdling by the Lands Department. So far, we still haven't got any resting facility. Well, the company has in fact given us an update -- it has been 10 years. We proposed the location for the resting lounge, and then we went back and forth, and ultimately they reverted to the original proposal floated by the union regarding location. It took us 10 years. And we have made a little progress so far, and it is said that the proposal will be discussed by the district council, and various government departments will also be consulted.

But we have no idea how much longer we should wait.

Mr Lau would also like to supplement.

MR LAU KAI HIM: The question with rest lounge is that the bus company will have to apply with the TD, the TD will need to approve the application, a lot of government departments will be involved, such as the Lands Department, the FEHD, Police, and Home Affairs Department, they will all have to consulted.

So a resting lounge would have to go through years of application and vetting procedures.

And there may be divergent comments from different government departments.

For the Quarry Bay example, it has taken us more than 10 years with little progress because of divergent views from different government departments. Some government departments might reject the application.

So this is a clear example that we are in such a bad situation.

MS MAGGIE WONG: Did the company do anything about this, like extending the rest time so that the bus drivers can go to the washroom, or go to all these resting facilities, by making certain adjustments on the time, did the bus company do something like that?

MR LAM KAM PIU: On this issue we reflected that to the bus companies because of the long journey time, there is not enough time for bus drivers to rest, and the bus companies said that they would look into the matter, but so far we haven't heard from them whether actually when we arrive at the destination there would be sufficient time for us to rest.

Because of the road condition, and traffic, by the time the driver reaches the destination he would need to drive again. So the first thing a bus captain does is to go to toilet, to answer nature's call, even if the next departure is a bit late. We have reflected this to

the company. So far we have not heard that there is any action.

Mr Hui would like to supplement.

MR HUI HOU KIT: I want to supplement that for facilities at the terminus there are two examples regarding Citybus that I would like to highlight. One is Chi Fu Fa Yuen in Southern district. Ever since Citybus started its operation there has never been any rest lounge, because the Owners' Corporation refuses to allow bus company to install a rest lounge.

We asked the TD to discuss with the Owners' Corporation. But the OC's position remains.

The second example is the bus terminus at Asia World Expo, near the airport.

The airport has been commissioned for so many years. For Asia World Expo it is temporary. Everything is temporary, including the toilet, and the facility has remained temporary for over 10 years.

I don't understand what kind of coordination this government has regarding facilities at a bus terminus. And there is no coordination to speak of among government departments.

When a bus company runs a route we need facilities. There is no coordination. A few years ago, we talked to the Transport Department, if there is a site, if there

is development, and if the TD is going to set up a PTI, public transport interchange, then the TD should inform us in advance how many routes would use the PTI, so that we can give them comments on the facilities to be provided. We mentioned it several years ago, but according to the Transport Department planning matters are not under their purview.

It is actually under other departments such as the Planning Department, the Lands Department, or the LCSD.

So we can see the total lack of coordination among government departments to facilitate the setting up of any facility.

CHAIRMAN: Mr Kwok, I have a question for you, because you are the representative from the branch involving KMB.

KMB runs special or split shifts and have done so for many years, do they not?

MR KWOK WAI KWONG: That's true.

CHAIRMAN: Ms Wong was asking for examples of termini where the resting facilities are grossly inadequate. Are there such facilities that you can identify now, today, such that this Committee might go and visit the facilities, where drivers on these special shifts begin their three or more hours break but the facilities are inadequate. Can you give us places to visit?

MR KWOK WAI KWONG: On the part of KMB, for special shift,

they will drive the buses back to the depot for the first -- after the first half of the shift. And then they will go out to have a meal, and to go to some other places to take a rest. So that's how the operation is like.

It is very seldom that the buses stay at the bus terminus after the first half of the shift. Maybe a few of the bus drivers will end the first half of their shift at the bus terminus, and then they will go back to the bus terminus to begin the second half of their shift.

There are a few people doing that. Well, there would be even less break time for these bus captains. They may travel to some of the places to take a rest, and take a meal, and then they have to travel back to the bus terminus to take on the second half of the shift. They lack rest time more than the others.

CHAIRMAN: So the facilities that I was asking you about, if a bus captain comes to the end of the first half of the shift, and he now has a three-hour break, and he is at a bus terminus, are there places where there are simply insufficient facilities to have a rest at that bus terminus? Has he got to go somewhere else?

MR KWOK WAI KWONG: That's correct. Say, for example, in Tsuen Wan, the Allway Garden. In Tsuen Wan, you can

take a look at the facility in that garden.

CHAIRMAN: Do you recommend that as a place we could look at to see to find inadequate facilities for bus drivers who are finishing the first half of their split shift?

MR KWOK WAI KWONG: Correct.

CHAIRMAN: Anywhere else?

MR KWOK WAI KWONG: No further supplement.

CHAIRMAN: Gentlemen, you would have been present when we asked the Motor Transport Workers General Union to read a document. I see they are now sitting at the back of the hall. They have been here all day, so I'm going to ask if you would permit us to interrupt the proceedings, where we are asking you questions, so they can finish their business.

So we will take a short break and they will swap places with you, if that's agreeable to you.

Thank you.

(5.04 pm)

(A short break)

(5.12 pm)

REPRESENTATIVES FROM MOTOR TRANSPORT WORKERS GENERAL UNION. MR CHAN KWONG NUNG, MR LAI SIU CHUNG, MR LAM TIN FU, MR CHEUNG TSZ KEI, MR LAU SIN TAT, MR LAM PO KEUNG

(Evidence given in Cantonese; transcription of the simultaneous interpretation) (continued)

CHAIRMAN: Ms Wong, can you remind me of the reference to the LegCo briefing paper.

MS MAGGIE WONG: That's at TD-1 bundle at page 403.

The Chinese is at 416.

CHAIRMAN: Gentlemen, have you had an opportunity to read this LegCo briefing document for the transport panel of LegCo?

MR CHEUNG TSZ KEI: Chairman, we have just read through the paper. We have some initial views here.

For paragraph 4(a), the electronic stability system, we don't suggest that it be installed. It is the electronic stability control system. We have query on the system, and we are worried that when there is a harsh braking there will be the blocking of the steering wheel and as a result the bus will get out of control.

And for 4(b) --

CHAIRMAN: Before we move on. Let's just establish some basic material.

Were your views ever sought by the working group that dealt with this matter?

MR CHEUNG TSZ KEI: Chairman, the transport panel of the LegCo has not consulted us, and we have asked many times that our representatives be appointed to the working group. And then the TD has not consulted us on this.

We can only speak based on our working experience.

Thank you, Chairman.

CHAIRMAN: Well, please proceed to address the items you wish to address in this briefing paper where the recommendations are made.

You query the use of the electronic stability control. What about the other matters?

MR CHEUNG TSZ KEI: Thank you, Chairman.

4(b). On paper, as we see it, it is feasible, because it will limit the speed at 70 kilometres, whether uphill or downhill, and this will help us in our work, because for bus captains driving along Tuen Mun Highway, very often because of the unlevel terrain, they would exceed the speed limit, and sometimes be subject to disciplinary sanction.

So if there is a speed delimiter, we find this feasible as it would prevent the bus from travelling at speed downhill.

6(a), bus monitoring and control system.

We don't support it, because this is equivalent to the bus being controlled by the central system. For the speed limit on the road, if it suddenly changes to, say, 50 kilometres, then the bus will change the speed likewise, and for the vehicles that follow the bus, they won't understand why all of a sudden the speed of the

bus will change, and accidents would easily occur, and we do have some concerns that it may be prone to accidents. So we don't recommend this.

CHAIRMAN: Just to interrupt you there. One reason they might understand why the bus has slowed down is because the speed limit has changed, and the bus is obeying the speed limit. Why should that puzzle the driver behind?

MR CHEUNG TSZ KEI: Well, I think it is a matter of driving habit. Say, if we are travelling at 70, and if we reach a 50 kilometres speed limit zone, we will gradually decelerate by slowly lifting the gas pedal.

But according to the system, it is going to decelerate quite rapidly so that vehicles coming from behind may not understand, because of the normal driving habit of buses, and that the vehicle that follows may ram into the bus. That's our concern.

CHAIRMAN: Where do you discern the fact that the deceleration is going to happen rapidly, or quite rapidly? Where do you see that?

MR CHEUNG TSZ KEI: Let's say if we are to decelerate, we would say, step on the brake and there would be a brake light informing the vehicle that follows. But now, we make use of this system with GPS, and once a bus reaches the location, deceleration would take place automatically. If there is no preceding vehicle, the

vehicle that follows may not expect the bus to lower the speed rapidly from 70 to 50. And we are concerned that this may bring a safety hazard.

CHAIRMAN: Very well.

MR CHEUNG TSZ KEI: 6(b), we don't recommend this.

Because the collision alert system and lane keeping device, I mean for drivers who have driven vehicles with these devices, it is really a nuisance, whenever there is an obstacle, the device would beep. Hong Kong is a small place with narrow roads, very often you may have objects on the road, on the side, that may not really affect the vehicle but the vehicle will -- the alert system will still go off causing a great nuisance to bus captains. So we don't recommend this.

CHAIRMAN: All that was being recommended was that there be a trial.

MR CHEUNG TSZ KEI: I think the bus captain of Citybus who drove the bus before can answer this.

MR LAU SIN TAT: I don't remember, two or three years ago, the Citybus put this system to trial. This so-called magic eye system, and during the trial it was all right when the bus was travelling on a highway, but in city traffic the device kept beeping whenever there were people or objects around, and it was a great nuisance.

CHAIRMAN: We received evidence from Mr Alok Jain, a former

employee of KMB, and also from Julian Kwong, to this effect, that one should be alert to the fact that technology that doesn't work very well at one time period may have improved in a few years time, and perhaps this is all that is being addressed; in other words, there have been refinements to the technology.

MR CHEUNG TSZ KEI: Chairman, well, currently, for drivers who used this system before, they found it to be not really appropriate, the system is flawed. So in future, if there is improvement to the system, we will consider afresh making recommendations for installing these devices.

We are practitioners, so we can only give you feedback on practical problems we encountered at work. Thank you.

CHAIRMAN: We are asking you for feedback. You have not been asked before, have you?

MR CHEUNG TSZ KEI: That's true, Chairman.

CHAIRMAN: Please carry on with the other devices.

MR CHEUNG TSZ KEI: 6(c), driver monitoring device. We believe it is feasible because this directly detects whether the bus captain is dozing off. And I can say quite boldly that dozing off is really the enemy of bus captains.

Sometimes a bus captain may close his eyes for just

two or three seconds and he may lose his life. So with this device the bus captain can stay alert and it would be good for drivers on the road, for the bus captain himself as well as passengers. It is a safety measure. So we find this feasible.

However, some colleagues tried this device as well, and agreed that improvement is needed. Say, if the bus captain wears a pair of reflective sunglasses, then the device will not function properly. The device will believe that the driver is dozing off.

CHAIRMAN: Thank you.

MR CHEUNG TSZ KEI: Thank you, Chairman.

Regarding installation of seat belts on passenger seats, we don't recommend the installation, because first of all, we have standing passengers, not all of them are seated. We are not a coach. For double-deckers, after installing seat belts, during an accident, I believe it would be quite chaotic. Let's say if a fire breaks out, it would be difficult for passengers to escape. It would be very difficult for somebody to take off the seat belt during an emergency.

We don't find this very feasible. Unless we are talking about certain front row seats or the middle seat of the back row, more hazardous seats, where seat belts should be installed. Otherwise, we don't recommend

installing seat belts for all.

Training for franchised bus captains. We believe that training should be enhanced. We should revert to the 1998 level. It took about a month to train a bus captain back then. There should be more on-the-road training, so that the bus captain would feel confident when he starts to drive on the road, instead of just having behind-the-wheel road training. We don't really recommend this, we don't think it is feasible, we think that there should be an academy for training bus captains.

CHAIRMAN: And who should operate this academy?

MR CHEUNG TSZ KEI: Thank you, Chairman.

An academy, well, it should be operated by a school, a bus company, with the assistance of the Transport Department.

Thank you, Chairman.

CHAIRMAN: Ms Wong, are there any questions that you wish to put arising from that evidence?

MS MAGGIE WONG: No, Mr Chairman.

CHAIRMAN: Well, gentlemen, thank you very much for the long day that you have spent here assisting us with your evidence. And we thank you for attending.

You are now free to go. We have the other gentlemen from the other union to return now, so we will take

another short break, couple of minutes, and invite you to withdraw. Thank you very much.

(5.28 pm)

(A short break)

(5.35 pm)

REPRESENTATIVES OF THE FEDERATION OF BUS INDUSTRY TRADE UNIONS: MR HO YUI CHEONG, MR CHUNG CHUNG FAI, MR LAM KAM PIU, MR LAU KAI HIM, MR HUI HON KIT, MR KWOK WAI KWONG

(Evidence given in Cantonese; transcription of the simultaneous interpretation) (continued)

CHAIRMAN: Gentlemen, thank you for your patience.

We have been able to deal with your colleagues in the other union, and we can resume now with some of the material left to be dealt with by your union.

But as I understand it, the Secretariat have spoken to you about adjourning these proceedings for you to come back on Wednesday, 1 August, in the afternoon. In those circumstances, I will ask Ms Wong to deal with some of the matters in relation to the LegCo briefing paper, which is what she was dealing with, before we adjourn, and then the remaining questions we would ask her to pose to you Wednesday, if that is agreeable to you?

MR LAM KAM PIU: Agree.

MS MAGGIE WONG: Thank you, gentlemen.

Before you is a briefing paper by the LegCo prepared for the LegCo discussion, and it was a briefing paper prepared by the Transport Department for the enhancement of safety of franchised buses recently discussed in the LegCo on 25 July 2018.

The paper starts in English at page 403 and in Chinese, 416.

It provides a number of topics. The first topic is on retrofitting seat belts. The second topic is on the training of bus captains, which is at paragraphs 18 to 22. The third topic is on the safety technological device, the new technology device in relation to the franchised buses.

Was a copy of this paper ever given to your union to consider and comment on?

MR LAM KAM PIU: No.

MS MAGGIE WONG: We understand this paper is discussed amongst three franchised bus companies, and the Transport Department, and it was to investigate the training and all the safety equipment that they proposed in this paper.

Have you --

CHAIRMAN: Before you go on, I think it more accurate to say this, that this paper appears to be the end result of discussions that took place between the Transport

Department, the three bus manufacturers, and the franchised bus operators. And this was a group that was convened in the middle of March, and reached these recommendations in this paper in late July.

Yes, Ms Wong.

MS MAGGIE WONG: Have you had a chance to read and digest this paper during the break?

MR LAM KAM PIU: We have read through the paper. And we have an initial understanding of the issues discussed in the paper.

MS MAGGIE WONG: Yes. Maybe we deal with the first topic on the safety devices at paragraph 4(a). It relates to the electronic stability control system.

Would your union support the use of this device?

MR LAM KAM PIU: We support.

MS MAGGIE WONG: And what about the second one on retarder for capping the maximum speed of the speed limiters on downhill?

MR LAM KAM PIU: We also support.

MS MAGGIE WONG: If we go to 6(a), in relation to the bus monitoring and control system, giving or maximising the black box capability to provide real-time fleet supervision, bus speed recording and GPS location recording, et cetera.

MR LAM KAM PIU: We also support it. It is already being

used now.

CHAIRMAN: Who is using it? Which company is using it?

MR LAM KAM PIU: New World First Bus and Citybus are already using this system.

MR KWOK WAI KWONG: The same for KMB.

MS MAGGIE WONG: What about 6(b), collision alert and lane keeping devices?

MR LAM KAM PIU: This issue, we support installation. During the trial the colleagues resented it, because whenever a minor problem surfaced and there would be the beeping sound, and bus captains are under certain pressure emotionally. This device is good, but we hope that it can be improved.

MS MAGGIE WONG: Yes. Is that the test conducted by Mobileye --

CHAIRMAN: I think the test was conducted by Citybus and the device is Mobileye?

MS MAGGIE WONG: A device by Mobileye?

MR CHUNG CHUNG FAI: Well, the Citybus and the New World First Bus conducted the trial, but in fact it was not that good.

To our understanding, the company said it will improve on the device. So we will see how the improvement goes, and whether there will be an improvement in the effect.

MS MAGGIE WONG: Because I believe the test was conducted back in 2014, so the technology would have moved on.

And what about 6(c), the driver monitoring device to detect drowsiness?

MR CHUNG CHUNG FAI: In principle, we agree to this; but the question is if the devices are used to monitor the drivers, whether they are dozing off, and they are showing fatigue, I think you are putting the cart before the horse here. Rather we should give more rest time to the bus captains. That should be the best way.

There should not be any driving fatigue -- that matters most. But then the device can be installed.

MR LAM KAM PIU: Mr Lau has something to add.

MR LAU KAI HIM: We should avoid driving fatigue, giving rise to accidents. We should not have devices monitoring the bus captains to make sure that they do not doze off. Well, the drivers should work in a healthy environment, and they should not work for long hours leading to driving fatigue.

We would like to put forward recommendations to prevent accidents. We should not be making proposals only after accidents have happened. I think you are putting the cart before the horse by installing such a device. You are trying to shy away from the problem of driving fatigue. Like air pilots, the airline

operators would be allowing sufficient rest hours for the pilots. Well, air flight is different from bus trip, but I think the consequences of bad driving will be the same.

So I think you are putting the cart before the horse by having this device to monitor the driver's performance making sure that they are not dozing off.

CHAIRMAN: But you agree in principle that there should be trials of this device?

MR LAM KAM PIU: Agree.

MS MAGGIE WONG: What about retrofitting seat belts for all seats in future on buses?

MR LAM KAM PIU: We support the retrofitting of seat belts. I think it is the responsibility of the Transport Department. It should not be the responsibility of the bus companies. It should be the full responsibility of the Transport Department, because the Transport Department knows best.

CHAIRMAN: When you say responsibility, do you mean that they should pay for it?

MR LAM KAM PIU: Well, it is about the law.

CHAIRMAN: I see. So it is their responsibility to arrange with government that the legislation be changed and then also arrange that it should be enforced? They should be fitted, people should be required to wear them, and that

law should be enforced; is that what you mean by responsibility?

MR LAM KAM PIU: That's right.

Mr Lau would like to supplement.

MR LAU KAI HIM: About installing seat belts, of course the purpose is to ensure passenger safety. I think this is beyond any dispute. But we may have installed seat belts and the passengers may not wear them.

So you need enact legislation to require passengers to wear a seat belt. This is the most important point.

For minibuses we see this example. Years ago seat belts have been installed and the legislation was changed to require passengers to wear seat belts, but then for passengers not wearing seat belts no prosecution was taken out. So we need to require passengers to wear seat belts to minimise the injuries when there is an accident.

More importantly, we need to remind passengers to wear seat belts, otherwise it will be close to no protection for passengers. Even if seat belts are installed, very often during bus accidents passengers got thrown out of the bus compartment because passengers sitting on the front row didn't wear a seat belt.

CHAIRMAN: And that resulted in changes. The metal bar on the upper deck at the front and seat belts in those

exposed seats?

MR LAU KAI HIM: That's right.

MS MAGGIE WONG: What about training for franchised bus captains in paragraphs 18 to 22?

MR LAM KAM PIU: Mr Hui can take this question.

MR HUI HOU KIT: Chairman, regarding training, two days ago I attended a two-day class and my company, Citybus, has included the element of emotional management.

For other companies, they all along have this element. But for this part, the company has engaged a non-professional to teach this course, and to my knowledge I don't think this is professional, and I think there is room for improvement.

MR LAM KAM PIU: Mr Lau would like to supplement.

MR LAU KAI HIM: In our supplementary submission we quoted the Singapore example. In November 2016, Singapore set up an academy for training bus captains and they have really comprehensive courses, including maintenance, repair service, quality, et cetera. And they also mandate bus captains to undertake this course before they get a licence.

So in our neighbouring city we have the training courses for bus captains, and there is a need to have emotional management and other elements. I think we are lagging behind, but it is better than nothing.

CHAIRMAN: Mr Hui, you spoke about the course not being conducted by a professional. What kind of professional did you have in mind for an emotional management course?

MR HUI HOU KIT: To my knowledge, he should be somebody from the social worker profession or a psychologist.

CHAIRMAN: Thank you.

Well, Ms Wong, if that's not inconvenient, that's probably enough for today.

MS MAGGIE WONG: Yes. Thank you.

CHAIRMAN: Gentlemen, thank you for attending today, and thank you for agreeing to return on Wednesday.

We look forward to receiving your evidence on Wednesday afternoon. But the proceedings are now adjourned. Thank you.

(5.52 pm)

(The hearing adjourned to 10.00 am on Tuesday, 31 July 2018)

2018年7月30日

上午10時01分恢復聆訊

出席人士： 張子琦先生，汽車交通運輸業總工會第一副主席（汽車交通運輸業總工會（包括各分會，即城巴分會、九龍巴士分會、龍運巴士分會、新大嶼山巴士分會及新世界巴士分會）代表）

林天賦先生，汽車交通運輸業總工會第二副主席（汽車交通運輸業總工會（包括各分會，即城巴分會、九龍巴士分會、龍運巴士分會、新大嶼山巴士分會及新世界巴士分會）代表）

劉善達先生，城巴分會主任（汽車交通運輸業總工會（包括各分會，即城巴分會、九龍巴士分會、龍運巴士分會、新大嶼山巴士分會及新世界巴士分會）代表）

黎兆聰先生，九龍巴士分會主任（汽車交通運輸業總工會（包括各分會，即城巴分會、九龍巴士分會、龍運巴士分會、新大嶼山巴士分會及新世界巴士分會）代表）

陳廣能先生，龍運巴士分會主任（汽車交通運輸業總工會（包括各分會，即城巴分會、九龍巴士分會、龍運巴士分會、新大嶼山巴士分會及新世界巴士分會）代表）

林寶強先生，新大嶼山巴士分會主任（汽車交通運輸業總工會（包括各分會，即城巴分會、九龍巴士分會、龍運巴士分會、新大嶼山巴士分會及新世界巴士分會）代表）

鍾松輝先生，巴職聯會務顧問，新世界第一巴士公司職工會會長（巴士業職工會聯盟（包括各會員工會，即九巴員工協會、新世界第一巴士公司職工會及城巴有限公司職工會）代表）

劉啟謙先生，巴職聯會務幹事（巴士業職工會聯盟（包括各會員工會，即九巴員工協會、新世界第一巴士公司職工會及城巴有限公司職工會）代表）

林錦標先生，巴職聯副主席，新世界第一巴士公司職工會理事長（巴士業職工會聯盟（包括各會員工會，即九巴員工協會、新世界第一巴士公司職工會及城巴有限公司職工會）代表）

許漢傑先生，巴職聯司庫，城巴有限公司職工會理事長（巴士業職工會聯盟（包括各會員工會，即九巴員工協會、新世界第一巴士公司職工會及城巴有限公司職工會）代表）

郭偉光先生，巴職聯秘書，九巴員工協會副理事長（巴士業職工會聯盟（包括各會員工會，即九巴員工協會、新世界第一巴士公司職工會及城

巴有限公司職工會）代表）

何銳昌先生，巴職聯會員，新世界第一巴士公司職工會司庫（巴士業職工會聯盟（包括各會員工會，即九巴員工協會、新世界第一巴士公司職工會及城巴有限公司職工會）代表）

主席：（經傳譯員）早晨，我哋多謝汽車交通運輸業總工會派出代表嚟到幫助我哋今日係提供口述證供，咁我又多謝呢一個嘅張先生，佢係第一副主席，同埋各位代表。我哋就會由黃律師問你哋問題，黃律師係其中一位協助檢討委員會嘅律師。

如果張先生或者你其中一位代表想回答問嘅回題，咁可以就係出聲，我哋就會話畀你聽係可以回答，黃律師就會可以開始問問題㗎喇。

黃女士：（經傳譯員）唔該晒各位，我想先做一個嘅介紹，關於係你哋嘅組織，汽車交通運輸業總工會係喺呢一個嘅 1920 年成立㗎，係咪呀？

林天賦先生：啱嘅。

黃女士：（經傳譯員）咁我哋可以見到，喺一個工會文件 1C，289-15 顯示咗，你哋工會嘅人數--呢個係冇翻譯為英文㗎，不過我就讀出個數目字。

你哋嘅會而家人數係有 29,670 人，其中 11,868 人係專營巴士分會會員，有 10,436 人係任職專營巴士司機嘅，係嗎？

張子琦先生：冇錯。

黃女士：（經傳譯員）你哋嘅總會有五個分會，九龍巴士分會、新世界巴士分會、城巴分會、龍運巴士分會同埋新大嶼山巴士分會，係嗎？

張子琦先生：正確。

黃女士：（經傳譯員）我未開始問問題之前，想先請你睇一睇，你哋嘅職權範圍，咁就係呢一個嘅係文件夾 263 頁，咁就係專營巴士嘅職權範圍嚟㗎，咁係翻譯本可以喺運輸署文件夾 1 號第 3 頁。其實就話--呢度寫檢討委員會嘅職權範圍：

第一，就係要檢視呢一個--咁就係從安全角度而言，鑑於發生喺呢一個 2 月 10 號嘅致命意外，同埋近期嚴重事故，審視巴士專營權喺現行法例專營權同其他合約規定下嘅運作同埋管理模式，同埋檢視現行對專營巴士嘅監管同埋監察制度。

最後，就係就上述事宜向行政長官提出同安全有關嘅建議，維持香港嘅專營巴士服務安全可靠。呢個委員會嘅職權範圍，就係要睇安全方面，即係巴士專營權運作安全角度嘅。

我咁樣講，因為我知道，係你嘅意見書裏面講咗好多關於係工作方面㗎，但

係呢一個委員會佢要睇嘅就係，睇番巴士專營權運作管理方面，安全角度嘅事宜，所以希望你明白，我哋問嘅問題都會集中於呢一點嘅。

你哋嘅工會之前係畀咗幾份嘅意見書畀檢討委員會，第一份就係 18 年嘅 4 月 23 號，中文就係文件 1C，277 頁至到就係 289 頁，英文版就係 289-1 至到 289-12。呢一份即係第一份嘅意見書，係就於檢討委員會發畀你哋工會嗰封信㗎，嗰封信日期係 18 年 3 月 28 號，係嗎？

張子琦先生：正確。

黃女士：（經傳譯員）你哋嘅意見書就提出咗幾個課題㗎，我就想請你先睇一睇啲大部分。

主席：（經傳譯員）未講呢樣嘢之前，張生，如果可以幫助你，其實有一啲係打印本，咁可以喺螢幕上面睇得到。同時，如果你想，亦都可以揭番呢一個嘅文件版本，如果你係需要睇其他部分協助自己嘅話，你就可以問我哋攞嗰個打印本，明白嗎？

張子琦先生：係，明白。

主席：（經傳譯員）黃律師，係，想講一講嗰個頁碼？

黃女士：（經傳譯員）頁碼係 289-14-7。其實我所講嘅就係首十段，就係講關於係即係對呢一個巴士車長一啲不好嘅--一啲唔好嘅對待。

你講過一啲即係話會員裏面親身經歷過好多唔好嘅事㗎，顯示到其實乘客不文明嘅行為，佢哋唔理法例嘅規管，就會係打車長或者鬧車長，呢個就係你意見書第一項有講嘅事宜。

跟住喺你第二點，就係關於改善運作安全，有關於專營巴士方面，係第十一段，頁數就係英文 289-14-9，中文就係 285 頁嘅。

呢啲嘅改善建議基本上就係分三方面：

首先，你就要求交通燈應該要有呢一個嘅倒計器或者閃動裝置；

第二，你就要求增劃黃格，同埋就係希望呢一個巴士可以停喺巴士區，同埋有關於呢一個巴士站方面嘅；

第三方面，你嘅建議書就講話工作環境，第十五段，係工會文件 1C 號，第十五段，289-14-0（原文照錄），中文就係 287 頁，英文就係 289-10。

你嗰度就其實就講咗係三方面：

第一，就係休息時間，設施同埋訓練，呢三樣嘢我會進一步再問你問題嘅；

第二份嘅意見書就係回應委員會寄畀你嘅信，係 18 年 6 月--8 月 8 號同埋 17 號（原文照錄）寄畀你，你回應嘅文件嘅意見書日期係 18 年 7 月 10 號，英文版就係 289-16 至到 23 頁嘅，呢個係第二份嘅意見書。

英文都係喺 1C 號嘅文件，289-23-1 至到 289-23-10，喺呢份意見書裏面，你喺第二段就話，你搜集咗五間專營巴士分會嘅負責人，成立專責工作小組，廣泛收集幹事、工作人員同埋會員工友嘅意見，你可以喺 289-16 見到，另外就英文 289-23-1。喺呢份意見書裏面，你亦都大量講咗有關於係巴士車長被乘客暴力襲擊嘅問題，列出咗一系列嘅個案，呢個就係第二份意見書嘅；

同時，你亦都做咗第三份嘅意見書，但係未講之前，我就先講咗話巴士車長被乘客襲擊嘅問題，呢一部分喺你第一同第二份意見書已經有深入講過。

張生，我相信喺兩份嘅意見書裏面，你提及過投訴被襲擊係工會、巴士公司已經係多年投訴嘅問題嘞，你亦都列出咗幾個嘅事項，幾個個案係 2016 年、2017 年同埋 2018 年發生嘅。

我就想同你再講，因為你就列出咗九個襲擊個案，就係呢一個 2016 年 1 月 3 號至到 18 年 4 月 29 號發生㗎，中文就係 289-16 至到係 17 頁，英文版就係 289-26-2（原文照錄）。

呢個--呢次嘅襲擊事--呢啲嘅襲擊事件係喺唔同地方發生，屯門市、大圍美林邨巴士總站、東區醫院、海怡半島、機場地面運作中心、青山公路巴--咖啡灣巴士站、逸東巴士站、旺角鐵路站同埋呢一個嘅係青馬收費廣場。

每一個個案你都講咗話，係每一位巴士車長都係受傷同埋要放病假。你可唔可以確認呢啲嘅個案係有向你哋工會報告，係要求你哋協助嘅，就係幫你哋同警方同埋係相關嘅巴士公司嚟到係聯絡㗎？

張子琦先生：我哋係--我哋列舉呢九個個案，其實喺嗰個意見書入面都清楚寫咗，呢九個會員佢哋係透過我哋嘅--向我哋工作人員求助，然之後向工聯嘅職安健協會申請經濟援助，所以我哋掌握佢嘅情況。

但係喺意見書入面，我哋講得好清楚，因為有啲會員工友畀人打咗，其實報紙上面都好多，佢哋就冇工會求助，因為事後我哋唔知道究竟呢啲係咪我哋會員；

第二，我哋唔知道係邊度發生，所以我哋冇工作人員向佢哋提出幫手，所以我哋所掌握嗰九個個案係因為佢哋嚴重受傷，要放比較長嘅病假，而經濟上面又出現困難嘅人嘅會員，佢先至--我先至向工聯嘅職安健協會攞番啲資料先知道嘅啫。其他其實我哋喺之後嘅文件入面都補充咗好多喺報紙傳媒報道嘅個案，大家都可以睇到。

其實我哋可--想可以講一個個案，就喺石澳九號巴士，有一個司機畀嗰個乘客打咗好似三分鐘定五分鐘，報紙都賣晒，但係呢個人冇向我哋求助，所以我哋都唔可能知道佢實際嘅情況。

我補充咁多。

黎兆聰先生：我想補充下，我哋掌握嘅數字係有嘅，我哋有我哋李講師（？）。不過呢個係冰山一角九個，但係被打嘅車長係日益嚴重。就係近呢兩年來，我相信平均一個月起碼有幾單呢啲畀人打嘅車長嘅事件發生，我哋係有掌握嘅，不過只係暴力係開始日益增多。所以巴士--我哋有建議過巴士公司設立一啲保護嘅裝置，嗰個保護嘅膜可以保護到我哋嘅前線車長，但係有待改善，呢個係一路都有發生，唔係淨係九個，係呢兩年來日益嚴重。

同埋我可以同主席講，而家乘客係橫蠻無理，用手機挑釁啲車長，打啲車長，同埋有一個 230A 嘅運輸署一個條例保護車長嘅，從來冇執行過，亦都冇一個成功個案告一個打車長嘅乘客。我係講到咁多。

主席：（經傳譯員）黃律師，你繼續之前，如果話畀你聽，我哋收到一啲嘅資料，就係呢個九龍巴士工會，就係話佢哋所收到嘅資料，2015 年至到 2018，即係巴士車長受襲嘅一啲資料，大概係有四十個嘅投訴嘅，你知唔知呢啲資料喺我哋嘅網頁上係搵到嘅呢？

黎兆聰先生：我可以講畀你聽，呢兩年來係日益嚴重，四十單係唔止嘅，每個月都發生，同埋公司一年來先至開始有個法務部，有啲律師去支援下我哋車長，之前嗰啲向我哋求助嗰啲，我哋係有協助，嗄，但係四十單，主席，呢個數字唔正確㗎，每個月起碼閒閒地都十單、八單，咁你同我計兩年來，起碼都二、三百單喇，主席。

主席：（經傳譯員）多謝，可能你誤解咗我嘅意思，四十宗嘅投訴喺今年嗰六、七個月裏面係四十宗，係嚟自一間巴士公司嘅啫。

黎兆聰先生：但係我覺得呢個數字唔可靠。

主席：（經傳譯員）咁或者你可以畀我一啲可靠嘅數字，但係咁之前，呢度正話所講過九個個案就係 2016 年年頭開始至 2018 年 4 月，係咪呀？

黎兆聰：可以。

主席：（經傳譯員）可唔可以幫我哋講下，巴士公司，即係涉及呢九宗嘅受害人，佢哋係同--服務喺乜嘢巴士公司㗎？

林天賦先生：呢個我哋法規可以搵番啲資料，但係大部分所知道係九巴為多，九巴公司為多。

我補充到呢度，大部分嘅我哋所知嘅資料都係九巴公司為多，但係具體嘅情況，真係要睇番佢哋嘅紀錄，但係有部分嘅司機就喺個紀錄入面就冇寫自己巴士

公司嘅，因為我哋實際嘅嗰個表格入面，只係填佢嚟自邊間工會為多，冇填到佢係任職邊間巴士公司。

主席：（經傳譯員）唔該，黃女士。

黃女士：（經傳譯員）主席之前就講到一張嘅清單，係由呢一個九巴講嘅，就係佢哋一啲嘅車長，由2015年1月至到2018年係7月22號嘅一啲個案，喺九巴一，就係第212頁嘅，呢啲資料。

張子琦先生：黃律師，主席，可唔可以我要一份你嗰個中文嘅提案？因為我哋有啲提上嚟嗰啲議題...

主席：（經傳譯員）可以嘅，而家可以畀你嘅。

黃女士：Yes.

主席：（經傳譯員）可能淨係得英文版本。

黎兆聰先生： Because we cannot see anything in front of us.

主席：（經傳譯員）可以畀你嘅。

黎兆聰先生：（經傳譯員）唔該。

主席：（經傳譯員）可能你有一個打印出嚟嘅版本會好--容易啲。慢慢喇，你慢慢用啲時間消化下呢一個嘅表達方式。第幾頁？係嘞，可能將佢咁樣嚟到係投影出嚟好啲。可唔可以去睇一睇2018年？

黃女士：（經傳譯員）係216頁，就係喺呢個九巴一第216頁嗰一份文件。

主席：（經傳譯員）你而家準備好未，準備好回答問題未？

張子琦先生：Yes.

黃女士：（經傳譯員）你睇下KMB-1嗰份文件，喺216頁，148開始，第148項開始到到188，就係九巴嚟到係製備嘅資料，2018年1月開始，去到2018年嘅7月22號，呢個淨係九巴畀--提供嘅數字。

黎兆聰先生：我哋收到有啲資料，有啲同事畀人哋推撞，或者打咗，係冇報畀公司聽嘅，呢個數字佢報畀你，可能係如實報畀你，但係我哋收到有啲個案，啲同事怕事，係冇報㗎，係冇報畀公司啲--所以我就講話，佢個數字可能唔準確，因為有時啲同事係怕事，會同工會啲工作人員講，我哋之後會同公司講，咁佢冇一個紀錄係好正常，好嗎？

主席：（經傳譯員）係，咁如果你有收到咩嘢投訴，你可以交畀我哋，即係如果巴士公司係冇收到，而你收到，可以提供番畀我哋。

黎兆聰先生：主席，舉例，早上個星期，我哋有個站長新入職冇幾耐，畀個印巴籍嘅

人士打咗一拳，跟住掌咗佢落地下，佢冇報喫，佢同我講咗嘅，但係我都冇--我都係了解咗，同公司講咗嘅，咁可能都係寫份報告番去，唔知會唔會--如果我咁大間公司，成日要同主席講，主席你都幾麻煩，係咪呀？

主席：（經傳譯員）黎先生，我哋係要有證據先至可以行事，除非你提供證據畀我哋，如果淨係一啲嘅指稱，就幫唔到我哋嘅，如果你可以畀一啲投訴係冇報畀公司知，你知嘅請你畀我哋。

黎兆聰先生： Okay, thank you.

黃女士：（經傳譯員）如果你睇下呢張清單，我自己數過，大概有四十一次嘅事件。但係我哋睇到，好少嘅個案係最終係有檢控嘅，或者啲比較有意思嘅一啲結果、後果。162、164 呢兩個個案，就係最後就係被告認罪，被罰款。有四十一宗嘅個案，大部分都係和解，或者只係口頭警告，或者警方係唔追究。

如果我將呢張嘅清單就對比一下正話所提到嘅一啲嘅個案，即係你講到有九宗嘅襲擊個案，我就係嗰度搵到五宗：

第一宗，係你嘅個案第二，第 289-16 頁，呢個係關乎一位何（譯音）先生喺 2016 年 3 月 26 號，喺大圍美林邨，呢個就係喺呢一張清單嘅第 62 號嘅個案，就係九巴所提供嘅，喺第 214 頁，第 62 號嘅個案。

張子琦先生：係。

黃女士：（經傳譯員）唔該，我未講第二樣之前，其實仲有另外一宗，就喺呢個表上面冇列出嚟嘅，不過有個通知，話發生咗事故，就係 16 年嘅 5 月 16 號，關於一次襲擊，喺 289-114 頁，英文版就係 289-23-2。

可以見到有另外一次嘅事件嘅，就係呢個 16 年嘅 5 月 16 號，喺呢個表上面搵唔到，但係就我哋知道你哋嘅工會發出咗一個通告。請睇番嗰個表，呢個就話係即係其中一個個案，係冇喺九巴嘅清單上面，但係喺你自己嗰個嗰度，我哋都搵唔到喎。

黎兆聰先生：姓何嗰個 case 一樣嘅。

黃女士：（經傳譯員）哦，同姓何嗰個一樣，唔該。

第二宗，就係第五宗，喺你嘅清單上面嘅，就係 289-17，第五個個案，呢個係你清單上面嘅第五宗個案，有關於一名姚（譯音）生，係喺 8 月 8 號 2016 年嘅時候被襲。

我哋可以見到，呢一宗嘅個案喺九巴清單上面 214 頁就搵得到嘅，呢個係--呢個個案嘅宗數係 82 號。可以見到，一位姚生佢係車長，係巴士司機嚟嘅，8 月 8 號，龍運公司就喺機場總站，同埋佢受咗咩嘢傷。

第三宗，喺你嘅清單上面就係第 8 號，289-17，有關於一位李（譯音）先

生喺 2017 年嘅 1 月 9 號被襲，旺角鐵路站，佢就係隻眼受傷，額頭亦都受傷，呢件嘅個案喺九巴清單上面都可以搵到，215 頁就係第 113 宗，可唔可以確認一下係咪呀？

黎兆聰先生：係。

黃女士：（經傳譯員）另外一個例子就喺清單上面，但係就唔係你嘅清單，但係喺九巴嘅清單上面可以搵到㗎，係 122 宗，日期就係呢一個嘅係 2017 年嘅 6 月 4 號，喺長宏總站，呢宗個案就係和解咗，喺呢一個九巴清單上面，215 頁可以搵到。

另外一宗，喺你嘅意見書裏面，就係第九宗嘅個案，就係 289-17，一位楊（譯音）生，就喺 2018 年 4 月 29 號被襲，喺青馬收費廣場，呢件嘅個案可以喺九巴清單搵到，就係第 170 宗，就 217 頁。可唔可以確認一下係咪呀？二百一十--係呢個第 170 宗？

張子琦先生：係㗎，呢單個案受傷嘅車長係向我求助嘅，亦都當時佢都提出啲問題，點解青馬收費嗰啲管理人員放走咗呢個襲擊者，因為當時呢個襲擊者係強行自己落咗車之後，係自己步去--步入去嗰個轉車站，乘車而去嘅，而嗰啲青馬管理人員係完全冇幫助過呢個車長，協助過呢個車長。

黃女士：（經傳譯員）我哋可以睇番，呢四十一宗就係有向警方報案嘅，呢個由最右手邊可以見到一啲嘅備註，有時就話警方係即係叫佢哋和解，有啲就話警方冇再係跟進，你嘅意見者 289-17 頁上面有講過，英文版就係 289-23-3，係喺底部。

黎兆聰先生：主席，可以睇到咁多個個案，冇可能我哋車長自願和解，你畀人打，會唔會自願和解？你睇下個執法嗰個不力，咁多單都係得幾宗執法，有冇可能一個車長畀人打，唔執法㗎？和解真係啼笑皆非，好唔好？

呢樣嘢我希望--我哋工會收到好多個案，我哋啲前線車長成日就講警方唔執法，冇可能我哋畀人打咗會和解嘅，我哋啲專業車長亦都唔會挑釁乘客，冇可能，你睇下我--我一睇到咁多單，都係--可能四十單，可能幾單先至會畀人哋可以告得入，有冇可能呢個問題衍生到出嚟，希望主席你可以--一睇個表就已經睇到，咁多單都有受傷，表面傷痕，點會和解呢？係咪？

冇去--即係冇去執法，個 230A 冇執法，咁多單都係幾單先至話成功告入，我哋嘅車長同我哋工會反映過無數次，畀人打咗就要和解，呢個係執法不力，好唔好？

黃女士：（經傳譯員）你話呢啲嘅事項已經係提出過好多次嘞，其中一個例子可以係同--係喺同運輸署會面嘅時候，其中一次嘅會議紀錄上面可以見到，係 17 年嘅 3 月 22 號，頁數係中文 289-61 頁，就係呢個底部第二段，英文版就係 289-182。

喺第二段裏面，你提及過話襲擊車長同埋呢一個嘅係言語去鬧車長，同埋影車長--拍攝車長，你就要求署方執法，要跟番有關嘅法例係執法，呢個係其中一個例子。

講番你嘅意見書，你係好清楚指出其他受傷或者襲擊嘅個案係冇向你哋工會係反映到，喺呢一個嘅意見書上面冇收集到嘅，係，可以喺中文版 289-18 頁第二段見到，英文就係 289-23-3。

喺第二段裏面，你提及喺以前，有啲人見到發生事件，會出嚟幫助車長，但係有時可能因為會對涉及嘅人士被控公共地方打鬥，所以令到好多人係唔肯向遇事司機伸出援手。

你提及一個 15 年 7 月 10 號發生嘅一件事，就係一個同颱風有關嘅，令到係即係有啲乘客有暴力行為。你可唔可以講下，你可以點樣幫車長？而點解你會係覺得即係有啲--某啲原因，令到你唔可以幫車長手？

黎兆聰先生：我呢個個案我好有印象，就係因為可能呢個颱風去到八點半冇車，即係會收車㗎嘞，咁可能乘客焦急，言語之間就對呢個車長暴力襲擊，咁亦都之後都捉到呢個人嘅。

林天賦先生：呢件事，我哋工會嘅睇法係咁樣，警察對於呢啲襲擊者，如果係因為所有涉及嘅人士，即係如果我哋嘅會員工友幫呢啲同事，即係佢其他車長阻止呢啲乘客襲擊呢啲車長嘅話，我哋工會--因為我呢度冇資料，但係我哋好多嘅會員工友都話，因為警察將所有涉及呢件個案嘅人都會落案，如果係真係要追究嘅話，變咗係所有人都變咗係喺公眾地方打鬥，即係幫手嗰啲會員工友都係要去到警署，都係畀人落案，畀人告嘅。

所以好多人慢慢地就變咗佢哋唔知道--即係見到其他嘅同事畀人打，其他車長畀人打嗰時，佢哋就唔敢出手去幫手。呢個風氣其實呢幾年都比較嚴重。

張子琦先生：同埋我想補充一下，嗰個言語、嗰個攝影，對住個車長，係一啲用啲暴力嘅言語都係影響到個車長嘅情緒，係會直接影響到嗰個駕駛嘅安全，所以呢個係對公眾嗰個利益係直接受影響，所以應該係要制止呢啲行為。

主席：（經傳譯員）可唔可以講一講，呢一次襲擊事件嘅詳情喺邊度發生，喺巴士上面定係喺巴士嘅即係總站、車廠嗰度發生㗎？

黎兆聰先生：喺個巴士站，未開車嗰度，開始襲擊車長，因為當其時可能大家焦急，當八號風球正式懸掛，我哋公司有個慣例會通知乘客八點半冇車，當其時以我了解，應該係乘客睇到車長上車，但係個車長要收工㗎嘞，咁就襲擊佢咁嘅情況，就喺巴士站嘅外圍襲擊佢。

當其時有啲車長唔夠膽幫手，就係因為之前有啲暴力事件，係幫手嗰啲都告埋公共場所行為不檢，所以呢個問題係喺呢件事衍生出嚟。

主席：（經傳譯員）嗰次襲擊係發生喺巴士上面定係巴士嘅外面？

黎兆聰：巴士站休--站長室外面。明唔明白呀，主席？

主席：（經傳譯員）我而家明白嘞，唔該晒。

黃女士：（經傳譯員）你進一步嘅意見書，呢個 18 年嘅 7 月 10 號，中文就係 289-18，英文就係 289-23-3 至到 289-23-4。

喺第一段嗰度，你就強調話之前提及過一個問題，就係話你從網上收集到一啲資料，就係其他嘅資料，係關於車長被滋擾，即係被乘客滋擾，同埋不合理嘅對待，你亦都係將有關嘅報道，即係從網上攞嚟嘅資料就係話乘客點樣滋擾巴士司機，你係提供㗎。

呢啲嘅文件喺第 289-24 至到 289-30 呢啲嘅中文嘅文件度搵到，亦都有一啲照片，喺英文就係 289-141 至到 289-146 呢幾頁。

你就係喺第二段你嘅文件第二段就係提出呢個問題，跟住第三段就係話有啲嘅投訴，就話冇聽個執法人員對呢啲相關嘅人士，根據公共巴士服務規例嚟到起訴佢哋，呢個就係第 230A 章，喺英文就係第 289-23-4 頁，中文就係 289-19 頁，第 289-19 頁。

黎兆聰先生：回應下，佢 230A 章係保護我哋嘅前線車長，多數警員都係勸和解，公司亦都冇表明及支援我哋嘅，所以要求加強檢控呢啲施襲者，同埋加強個罰則，因為 230A 章，我相信冇一個個案成立過話告呢啲施襲者。

黃女士：（經傳譯員）係嘞，或者我係引述一下嗰啲嘅規例，等你知道個罰則，喺 THB-2 第 131 頁，文件 THB 第 131 頁。

搵唔搵到？對唔住，淨係得英文版本。但係我哋睇到，喺規例第 13，就係移走--將乘客移走巴士，即係如果係有合理嘅理由相信佢違反咗呢啲嘅規例，就可以將呢個乘客係趕落車。

仲有第 38 條就係話，唔可以有一個嘅--第 132 頁，一個嘅乘客或者係準乘客，就唔可以係有意--故意咁樣嚟到係去遮住呢一個車長嗰個嘅視線，唔可以有意嚟到係喺巴士上面做任何嘢，第二段嗰度，就係引致呢一個嘅受傷，不適，或者係引致任何人嘅不便，第一嗰度，就係唔可以嚟到去影響呢一個巴士司機嗰個嘅工作。

第 25--規例 25(3)，任何人士如果冇合理嘅辯解，係違反呢啲 32A(1)（原文照錄）嘅規例，就係我哋正話啱啱睇過嘅，就係即屬犯法，係有可能被判三千元，同埋係入獄六個月。

呢個就係你所指導嘅情況，就係話冇--喺咁多年嚟，都係冇根據呢啲嘅規例係有檢控，係咪呀？

張子琦先生：正確。

黃女士：（經傳譯員）我想請你睇下第三段，你哋文件嘅第三段，即係進一步提交嘅文件第三段，喺英文就係第 289-23-5 頁，第三段，中文就喺第 289-19 頁。睇唔睇到？

呢度講到一啲嘅民事索償，就係巴士公司就係代表車長提出民事索償，但係嗰啲嘅結果就係冇公布，所以你就要求得到呢方面嘅資訊，就係關於一啲巴士車長嚟到係提出民事索償嘅資料，咁就係想委員會係向專營巴士公司索取呢方面嘅資料，係咪呀，民事索償嘅資料？

黎兆聰先生：簡單回應，早幾個月，有位女車長畀人施襲，公司係有協助，得到對方賠償五千釐湯藥費同埋自簽守行為，係最近半年前嘅事嘅，應該，係喺藍田地鐵站畀個女乘客施襲，有協助過，要對方賠償。

林天賦先生：但係據我哋所知，巴士公司可能都係個人個協助，對於呢啲個案嘅影--因為影響所有嘅巴士員工，佢又冇喺個公開場合度向員工講述佢哋嘅對於協助呢位車長嘅結果。

而家我哋都睇到，而家，即係有啲九巴同事就講出，有喺嗰個月刊度有提出呢件事，因為我哋可能冇睇到呢個文件，但係都係近年先有嘅啫，即係喺九巴員工嗰個月刊入面有提過呢件事。

黃女士：（經傳譯員）你可唔可以畀嗰個月刊我哋睇？

黎兆聰先生：要喺員工網慢慢啲，不如你同我問一問九巴啲管理層，佢有呢啲成功爭取個案，喺晒每一個月嘅員工嗰個月刊，畀我哋睇點樣幫啲夥記，點樣追討，係有嘅，如果我哋啲唔係啲唔到，不過可能未必咁快搵到，我諗搵九巴管理層攞可能會快啲。

黃女士：（經傳譯員）我哋睇到呢啲嘅投訴，我哋不如睇下九巴點樣回應，對呢啲嘅投訴，我請你哋睇 KMB-1 第 61 至到 62 頁，九巴文件。

第 61 至到 62 頁，喺 62 頁，喺最頂嗰度，就話因為越嚟越多嘅襲擊，我哋就係採取咗以下嘅措施，我哋就係睇到有四樣。

第一，就係監察嘅呢一個相機，嗰啲係前置，同埋有一個係可以睇到車長座位，就自從 2015 年，所有嘅新巴士都有呢啲嘅設施，係直至 2018 年 2 月，我哋已經喺 2,319 個九巴嘅巴士同埋 146 架嘅龍運巴士就係裝咗呢啲監察嘅影相機嘅，我哋就係有埋一啲嘅加埋聲音嘅錄影，就係一啲比較麻煩嘅乘客，呢個就係保障到我哋嘅車長，如果警察後來有任何嘅調查，或者係法律程序；

另外我哋會喺呢一個車長座位附近，有一個保護罩，就會由 2018 年 6 月開始安裝；

我哋會有多啲係車上嘅廣播，就係提醒乘客唔好去做任何嘢會影響到車長同

埋其他乘客嘅；

另外我哋第四樣，就係如果巴士車長係受到呢一個襲擊，我哋會有法律支援。

講到呢一個監察嘅攝錄機，我哋喺一次嘅實地考察嘅時候，睇到一啲嘅例子，就係喺嗰個車長座位上面左近，就裝咗呢啲攝錄機，就會係影到車長嗰個行為一樣嘅，有一啲嘅車長就係因為裝咗呢啲監察嘅攝錄機，佢哋都係有一啲嘅意見，你覺得係點？

張子琦先生：近年嚟，九巴公司的而且確係改善咗呢啲嘢，對於乘--襲擊車長，佢哋都有去替個車長去討回公道，都會有律師去跟進。

黎兆聰先生：我想補充，我哋前線車長同埋工會有反映過意見，嗰啲攝錄機係有時幫到車長，但係當有時好輕微嘅嘢，佢只係會話交畀警方，咁嗰個攝錄嘅情況就係我哋啲前線嘅車長有時係幫唔到我哋，有啲問題我哋希望自己裝，但係公司話因為用個人私隱問題。

嗰啲鏡頭係好全面，但係有時我哋啲前線當有啲輕微交通意外，有時要同公司攞，亦都未必攞到呢啲整個發生意外嘅攝錄過程，所以佢啲鏡頭係可以睇到個意外發生，但係可能有時有啲輕微，佢只會交畀執法部門去處理，但係唔會攞嚟畀我哋前線可以提供一個支援。

所以我哋經常同管理層講，嗰啲攝錄鏡頭，有時我哋需要嗰時，未必支援到我哋。

但係公司話嗰啲攝錄嗰啲鏡頭，希望喺出年第二季會裝晒，因為始終三分二嘅車都仲未有呢啲攝錄功能嘅車，同埋唔係全面--全部嘅車都有，因為九巴嘅車隊相信有超過 3,700 至 3,800 嘅車，相信三分二嘅車都仲未有攝錄功能。

張子琦先生：我想補充下，主席，個...

主席：（經傳譯員）但係你未補充之前，我哋呢度個數字就係話有 2,319 直至到 2018 年 2 月，就已經係裝咗嘞，如果只係三千幾，咁你話有三分二嘅巴士仲未有呢啲嘅攝錄機，好似唔係幾夾喎，啲數字。

黎兆聰先生：公司有啲車，車齡剩番兩年嗰啲，佢唔裝，嗰度有一批數目㗎，即係佢認為嗰啲就嚟劃㗎嘞，即係唔愛，淘汰嘅車，佢表明係唔會裝呢啲裝置落去嘅，所以係有一定嘅數目㗎，嗰度係唔少㗎，為數，即係佢覺得嗰啲車齡佢認為唔想畀啲設置落去，係表明係唔裝㗎，所以我哋前線嗰啲工友就自己裝個鏡頭保護自己，但係公司都用好多行政手段，唔准我哋啲車長裝，都係想保護自己嘅啫。

主席：（經傳譯員）你可唔可以為我哋提供一啲嘅資料，就係關於呢一點，就係話唔畀車長自己裝自己嘅攝影機呢個問題？

黎兆聰先生：可以提出，主席，我哋嘅車長，前線車長自己裝 cam，係受到警告㗎，

有書面警告，亦都有通告告知過啲車長唔准自行裝呢啲 cam，不過我哋啲車長係無奈，因為而家好多交通意外，警方第一時間到現場就問你有冇 cam，所以我哋啲前線車長就無奈接受呢啲警告信，但係我哋向管理層多次--呢咁多年來都希望佢接納我哋工會嘅方案，因為呢啲 cam 係必切性去可以保護到車長。

同埋主席，喺 J 字頭同埋 H 字頭打後嗰啲年歲嘅車嘅英文字母嘅車牌，多數都冇 cam，嗰啲比較係已經係可能係十三、四年嘅車齡，公司係回應我哋係唔裝呢啲 cam㗎，喺 H 字頭或者 J 字頭都有，係舊款嘅車係唔會裝 cam 嘅，呢個係同我哋講咗係唔會啲啲資源去裝。

主席：（經傳譯員）咁你會唔會提供文件，等我哋理解公司係點樣處理？你就話一啲嘅行政手段，可唔可以畀呢啲文件我哋？

黎兆聰先生：儘量配合，主席，因為我哋同公司開過會，因為佢話點解唔畀我哋裝呢啲鏡頭，因為涉及第三者私隱，因為你攝錄佢，你係要經過呢啲人同意，先可以發放呢啲嘅影像。所以我係同啲工友講過，亦都知道，同私隱公署亦都開過會，佢都回應過，係呢啲係涉及私隱問題，因為攝錄未經第三者同意，你發放出去，係可以犯咗呢個私隱條例。咁呢個受--你話要嗰啲警告書，我可以稍後呈交。

主席：（經傳譯員）係，我哋就係要呢啲嘞。

黎兆聰先生：有呀，主席。

主席：（經傳譯員）唔該晒。咁我哋而家講另外一個事項，你支唔支持安裝監察鏡頭，就係錄音同埋錄影，就裝喺巴士車長坐嘅地方附近，你支唔支持呢個做法？

張子琦先生：對於改善車長嘅工作環境，而唔影響到個車長嘅，我哋工會都係支持嘅。

主席：（經傳譯員）咁可唔可以答支持定唔支持呀？

林天賦先生：主席，因為裝一個具有錄音、錄像嘅功能嘅攝錄機，冇錯，喺某程度上面，係對搜集證據係有幫助，但係喺揸巴士嗰陣時，有部分嘅車長覺得長期畀人一路監視、監察住佢，會造成佢嘅精神壓力，所以唔係個個車長可以接受到呢樣嘢。

我哋都聽過有啲工友因為嗰個攝錄機對正喺佢頭上面，佢覺得對佢揸車會令到佢分神，所以唔一定話即係會對交通安全會有幫助，所以我覺得呢個可能另外一個角度睇，係一種隱憂。

所以呢個裝攝錄機，可能佢個出發點係好事，但係要顧及每一個車長實際嘅情況，所以如果一刀切，所有車都裝晒呢啲 cam 嘅話，可能部分車長適應唔到，所以我覺得委員會提交政府部門建議嗰陣時，應該清楚諗下--諗一諗，唔係所有人都適應到有個 cam 對住你，當你揸車嗰陣時有個 cam 對住你。因為一日揸車嘅時間係可能有--工作時間可能八至十個小時，所以不斷對住你嘅話，可能佢哋

覺得有心理壓力就比較大，尤其喺某程度下面，佢未必係揸緊車，譬如可能飲水，又單手揸車，呢啲全部可能發生嘅，係咪？但係可以畀公司--畀有其他行政上面嘅壓力。

所以我哋覺得，應該係審慎考慮喺裝呢個--所有車上面裝呢個具有錄音同埋錄像嘅設施。我補充咁多。

主席：（經傳譯員）咁我哋嘅理解咁，咁理解啱唔啱喇，工會嘅立場就係話對於呢方面冇共識嘅？

林天賦先生：我哋覺得應該係會審慎去考慮呢件事，唔好淨係覺得可以--喺心理上面覺得係可以幫助到佢，但係我哋工會覺得，係要--真係要問一問啲會員工友接唔接受，係咪？

黎兆聰先生：唔好意思，主席，我補充，我哋喺七、八年前嗰陣時，開始有 cam 嗰陣時，佢係有 cam 對住我哋，有咪嘅，我哋去過私隱公署投訴嘅，因為我哋受到廣泛嘅工友反對，當其時我哋係有申訴過嘅，我哋有個立場係收到好多廣泛嘅會員工友提出反對，令到佢哋心理有--心理壓力好大，所以我哋某程度上，我哋嘅會員係反對有鏡頭同埋有個收咪嘅功能，咁就呢個係我哋係--應該係早六、七年前去過私隱公署同埋議員去過抗議嘅，我哋做過嘅，總工會有做過嘅。

主席：（經傳譯員）咁而家嘅立場係點，即係 2018 年嘅立場，你哋係支持定唔支持？

張子琦先生：我或者喺度再回應下，主席，呢個裝鏡頭嘅問題，就我曾經同九巴嘅高層都商討過，有鏡頭的而且確對住出面街外嗰啲路面嘅情況係保障到車長，但係有啲行政上有啲主任，或者就將一啲好細微嘅嘢，譬如正話第二副主席講過，佢單手扶軑，飲水，咁就可能要被召見，呢啲咁嘅問題會直接影響到嗰個車長嘅駕駛情--嗰個情緒。

呢方面我哋已經同公司管理層反映過，希望公司要喺呢一方面作出一啲承諾，唔好對車長一啲無理採取嘅紀律嘅處分，因為個鏡頭見到佢單手飲水、單手扶住個軑等等呢啲好小節嘅嘢。

呢啲係的而且確我哋係有矛盾，第一，我哋係好希望有個鏡頭，保障到自己，但係如果係一啲管理層攞啲好小節嘅嘢嚟懲罰啲車長，我哋的而且確喺呢度有啲矛盾。

主席：（經傳譯員）我嘅理解啱唔啱？你哋嘅立場就係話，如果鏡頭就係幫助到你哋嘅，就係支持，但係如果對你哋不利，就唔支持嘞，係咪咁呀？

張子琦先生：係一啲係無理嘅，對我哋嘅過份落刻個要求就係不合理。

主席：（經傳譯員）唔該。黃律師。

黃女士：（經傳譯員）張生，你提及過管理層，話有時就會睇番影片去睇車長嘅行為

嘅，係咩嘢情況之下會咁做？

張子琦先生：我--主席，我哋要求...

主席：（經傳譯員）張生已經講咗個答案，講咗幾次㗎嘞，佢即係係詳細咁提話，就係一係單手揸軚，另外嗰隻手就飲啖水，呢個就係呢一啲咁小嘅事，佢哋就去干擾，所以令到工會好關心。

黎兆聰先生：回應，佢單手揸軚，單手飲水，係安全情況下，有時個燈位轉紅燈嗰陣時先會做，唔會話揸緊車嗰陣時去做，好唔好？我回應呢一樣嘢。

黃女士：（經傳譯員）係隨意去檢查定係話有人投訴，所以先至就睇番嗰個鏡頭嘅影片？

張子琦先生：我哋要求就係有投訴或者有交通意外先至去睇番鏡嘅，但係好早幾年前，有啲主任佢哋就主動去睇，發現咗有啲人攞住件餅乾食，就已經係要佢上嚟見。

當然呢啲主任都係畀一啲高層人員都斥責佢嘅，係苛刻咗啲，但係呢啲係好普遍嘅現象，而令到我哋車長真係有啲困境。

主席：（經傳譯員）等等，你要--黃律師，你要等人譯完先可以開始問㗎，要記住呢樣嘢。

黃律師嘅問題其實--呢啲你話係行政手法介入睇影片㗎，喺呢啲情況底下，係咪因為有人投訴--有乘客投訴話車長飲水或者食餅乾，係咪因為有人投訴，所以先睇番影片？

張子琦先生：唔一定，有一個已經係收工，冇載客，只不過係私牌，即係由巴士總站完咗佢個工作之後，揸番部車返廠途中，而被一個主任去檢控佢嘅。

主席：（經傳譯員）即係你從而推斷，喺呢一次，至少呢一次，係有人利用--有人就係冇--唔係因為有投訴，就睇番嗰個影片，即係好似係去監視嗰個車長咁樣，係咪呀？

張子琦先生：正確。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）通常係管理層係會隔幾耐做一次呢樣咁嘅嘢，你知唔知？

張子琦先生：近期呢啲個案就少咗，因為經過工會多次向公司嘅投訴，呢啲苛刻嘅處理方式只會令到車長嗰個工作嘅情緒更加低落，近期係少咗呢啲情況嘅。

主席：（經傳譯員）咁呢個問題係咪自行解決咗㗎？即係公司聽你哋嘅講法？

張子琦先生：有兩種解讀，一就係佢唔夠人手，二或者係聽到我哋嘅訴求，但係未來係點，我哋唔清楚。

主席：（經傳譯員）對上一次發生呢啲咁嘅監視嘅情況，即係冇乘客投訴監視車長，對上一次發生係幾時嘅事？

黎兆聰先生：相信每一日都有人投訴，有投訴有 cam 就睇下係咪事實。同埋車上有個黑盒嘅，譬如例如講舉例講飛站，佢有黑盒會證明到佢有冇埋站，有顯示個頭尾閘有冇開過，係咪事實，有 cam 就配合睇 cam，冇 cam 就睇黑盒，而家嘅黑盒基本上佢會喺辦公室都睇到㗎嘞，每一日都發生嘅，所以個數字我相信每一日都發生。

主席：（經傳譯員）個問題其實係問，可唔可以畀個例子，就話乘客冇投訴，但係管理層就走去睇嗰個影片㗎，就監視個車長，即係最近一次係幾時呢？定係話已經解決咗嘞，呢個問題？

張子琦先生：相信有半年前嘅事㗎嘞，都未曾聽到有呢種情況發生。

主席：（經傳譯員）唔該。黃律師。

黃女士：（經傳譯員）第二樣嘢嘞，就係呢個第 62 頁，就話安裝一個保護罩，可唔可以講下，係安裝咗幾多塊呢啲嘅保護罩，即係自從係 2018 年 6 月？因為講緊係九巴文件夾一號第 62 頁第二個措施就係安裝一啲喺車長座位附近，2018 年 6 月開始安裝保護罩嘅，安裝咗幾多個？

黎兆聰先生：相信個車隊，我諗裝咗三分一嗖㗎咋，因為好多弊處，亦都睇落好似好保護，但係衍生嗰個保護罩開關一個問題，個窿好大，瘐落去未必搵到個開關掣；第二，反光太緊要；第三，就係佢最頂層嗰個尖尖嗰個位有個瘐石，會行車嗰陣時行--瘐得唔實會乒乒嘭嘭，個車長亦都好大壓力，因為有雜聲，令到佢唔可以專心揸車。

所以我哋提議過管理層叫佢改善呢個情況，亦都我哋好多前線希望佢拆咗佢，因為喺夜晚嗰陣時，反光好嚴重㗎，嗰塊保護膜，我哋同管理層提過，但係佢話呢個係政治事件，唔可以拆呢塊板，咁我哋都好無奈。

我喺上個星期都向管理層提出呢個問題，呢塊膠係真係有啲好大嘅問題係衍生咗出嚟嘅，幾樣嘅問題，第一，就係開關問題；第二，就係反光，令到行車安全嘅問題；第三，就係佢呢個裝置係有啲瘐得唔實會發出聲響，呢個問題。

主席：（經傳譯員）即係簡單嚟講，就係九巴嘅車隊有三分一就安咗，但係就唔係幾好嘅，呢啲保護罩，係咪呀？

黎兆聰先生：呢個保護罩好多問題衍生咗，我哋啲前線車長唔係唔支持，起碼有個保護膜，但係個好多弊處係反映咗畀工會同埋我哋啲理幹事聽，個弊處係有幾樣，個重點係同管理層回應過嘅，不過好似就冇乜改善過，就同我哋講就係話政治事件，所以就呢塊板唔拆得。

我哋個前線承受好大壓力，因為我今朝早嚟嗰陣時都坐嗰架車，都問個車

長，佢話嗰個員工位上面個位置個𥑮石𥑮唔實，會發出聲響，同埋會夾到手指嘅，咁都比較危險，因為有時個車長會擰左邊，去問啲乘客嘅問題，有時唔察覺會撞落塊板度，同埋嗰個開關掣都好難去開嗰度門，同埋嗰個弧拱位嘅裝置，如果車長高同埋低，都會不停咁去阻擋視線，有把刀喺自己嘅前面，阻到睇到個乘客上落嘅問題，尤其是夜間反光，啲車長話嗰塊膠膜如果有一啲對面行車線開大燈，直接會映射到嗰塊板，睇落去會反光嗦。

咁我哋有反映過，但係管理層就係話唔拆得，同埋話會出年四月或者五月會裝晒全部嘅呢啲保護裝置，唔知主席有冇睇過呢啲裝置？

主席：（經傳譯員）我見過。喺紐約、德薩斯州同埋其他地方咁多年都有裝過呢啲嘢，但係好似係冇一個簡單嘅答案嘅。

黃女士：（經傳譯員）你幾時係提出呢啲投訴？或者係車長係幾時提出呢啲投訴㗎？

黎兆聰先生：幾個月內都好多車長喺我哋工會反映，我最後接觸管理層都係上個星期接觸嗰個係我哋嘅車務總監梁生，我同佢反映過呢個問題，因為一路反映，都係嗰塊膠膜嘅反光程度同埋個開關程度，同埋呢啲裝置反而令到個車長分神，我哋有反映過，物料上改良嘅設計上，都有反映過，亦都可能佢一個開關一個裝置好實，如果譬如隻手短得滯嗰啲車長可能唔夠力去搵呢個開關掣，但係佢哋話有竅妙，就話叫我哋孿度門就可以開關，但係我睇到個問題多過幫到嘅問題。

主席：（經傳譯員）黃女士，我諗我哋都要講其他嘅問題，因為呢一點我哋都用咗好多時間㗎嘞。

黃女士：（經傳譯員）咁第二個嘅問題，就係嗰啲交通標誌嘅問題，交通信號嘅問題。

你喺 289-23-5 呢一頁第十二段嗰度，有提過呢個問題，中文版就係第289-19頁。

你就提到有一個嘅建議，就係請運輸署有一啲係閃動次數嘅信號，即係話由黃燈轉去綠燈嘅時候，就有呢啲閃動次數嘅信號，等司機有所準備，避免因為突然剎車而造成危險。

你亦都係提出呢一個嘅建議幾次，我可以講呢啲嘅頁數，但係唔需要攞去嗰啲嘅文件，第一份文件就係向運輸署喺 1996 年提交嘅一份嘅信件，喺 289-31頁第四段。

運輸署嘅回應，喺 1996 年 2 月 6 號，喺 289-38 頁，運輸署嘅回應喺第二段就係話，如果加咗一個會閃亮嘅黃燈，可能就係會令到駕駛人士更加混淆。

喺 2005 年 3 月 15 號，你就再次有呢個提出，喺第 289-47 頁，英文就係289-166頁。

如果你睇 289-50 至 51 頁，係中文版，英文就係 289-170 頁。

聽完運輸署嘅回應之後，你嘅睇法係點？你係咪仍然覺得應該係有--關於堅持...

主席：（經傳譯員）其實唔係話堅持，即係要求嗰個問題。

黃女士：（經傳譯員）係，你係咪仍然認為你哋嘅建議係合適？抑或你對於運輸署個回應係滿意？你仍然係想要求運輸署有呢一個係閃動嘅，有埋呢一個即係次數嗰個嘅信號？

張子琦先生：我對運輸署嗰個回應係不滿嘅，因為佢完全唔理解巴士要平穩剎停一架巴士需要幾多嘅時間。

現時由綠燈轉紅燈大約係三秒時間，但係當一架巴士如果行走 50 公里，要三秒時間穩定咁樣樣停定一架巴士係非常之困難，所以造成好多巴士要衝燈尾，而令社會人士都覺得巴士司機係喜歡衝燈。

但係實質上，我哋巴士司機如果喺嗰個尷尬位要剎停一架巴士嘅話，唔衝燈尾嘅話，又要平穩剎停嘅話，佢可能就係擺喺十字路口。如果佢要過埋，就變咗係一個衝燈，如果佢要喺燈位前剎停嘅話，就變咗係急剎，就會造成乘客有機會會受傷，呢啲就係搵巴士嘅困難，但係好多駕駛人士都未必明白。

私家車可以三秒剎停一架車，重型車可以急剎，啲貨物最多都係西歪東倒，冇問題，但係我哋載緊嘅係乘客。

所以我哋一再要求有倒數燈，如果佢唔裝倒數燈嘅話，綠燈轉黃燈前都要眨三至四下，畀多三秒時間我哋，作出剎車嘅準備，亦等同一啲公仔燈行人過路嘅，都會眨下，就通知啲行人即將會轉紅燈。

呢個係對成個服務嘅質素係有提高，對安全有提高，對公眾人士係有益嘅，但係運輸署一再漠視本會提出嘅訴求。

主席：（經傳譯員）你就講到嗰啲行人過路嗰啲綠公仔喺度眨，提醒嗰啲行人好快綠燈轉紅燈嘞，係咪呀？

張子琦先生：冇錯，主席，我都想需要多三至四秒時間綠燈轉黃燈前眨幾下，咁樣提示一啲搵巴士嘅司機即將轉燈，咁令到佢有足夠嘅時間穩定咁停定一架巴士。

主席：（經傳譯員）喺世界其他嘅地方有冇咁樣嘅做法㗎，可唔可以畀啲例子我哋？

張子琦先生：我見新加坡有過，佢都係有啲綠燈箭咀眨。大陸更加多，佢全部都係直情倒數數字。

主席：（經傳譯員）係一啲數字，係咪呀？轉燈嘅時候直頭有數字喺度眨？

張子琦先生：冇錯。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）我哋收到運輸署嘅文件，係關乎一啲專營巴士意外嘅數字，就係唔關乎撞車嘅事件，我想你睇下運輸署嘅文件係 TD-9，就係 2018 年 4 月，喺 TD-1 第 111 頁第六段。

我哋睇到運輸署提供嘅數字，喺第六段，第五段、第六段，第五段就話：

「大概有百分之五十九至到六十五嘅所有意外，係涉及 2016（原文照錄）年至到 2017 年關乎專營巴士，都唔係撞車類型嘅意外，佢哋一般嚟講，就係譬如乘客喺巴士裏面，基於好多原因就失咗平衡。」

如果你睇下佢九巴 2018 至到 2022，喺同一份嘅文件，佢哋嘅展望嘅計劃，遠期計劃，8.2.7 段就係話：

「大部分嘅意外，有百分之五十一點五係因為乘客喺巴士上面失平衡，而呢啲嘅個案超過一半係因為係行車嘅時候，巴士剎掣。」

我想問你，從數字睇到，有超過百分之五十嘅乘客喺巴士上面嘅受傷係因為失咗平衡，所以我哋計番，即係最明顯畀出嘅理由就係突然剎車，引致有意外。你哋工會同唔同意安裝一個減速器，呢個儀器就會幫助架車就會係以某一個速度，就係減慢。譬如話去到呢個每小時 50 公里或者每小時 70 公里，你哋工會會唔會同意呢一類型嘅設備？

黎兆聰先生：我估你對車唔熟悉，車一路以來都有減速，有吹疏，我相信你哋唔熟悉車嘅機件性能，減速係有嘅，一個預期，我哋掂一掂架車，有個吹疏，有個減速器嘅，一路以來，我哋而家嘅車係好先進，一路以來都有減速。但你話要 70 突然之間剎停架車係冇可能，要預期要輕輕掂架車，吹疏，跟住架車會慢慢減速，唔係急剎，呢個減速係一路以來架車都有呢個裝置，好唔好呀？

張子琦先生：主席，我補充一下。啲乘客喺車上好多時受傷，第一，我正話已經講咗嗰個過燈位嘅問題，令到個司機可能要急剎；第二，就係而家好多人嘅揸車嗰種態度都唔係咁好，周時喺啲巴士--cut 咗去啲巴士度，巴士要被逼要急剎；第三，而家亦好多人成日手上攞住部手提電話，係冇把持好扶手，甚至佢坐喺度都有機會跌咗落地下，都仲有，咁就所以就受傷嘅機會係大咗嘅，啲問題。

林天賦先生：黃律師，我補充少少。我哋大嶼山巴士都會有嗰個叫做遲剎嗰個功能，或者叫逆剎，嗰個功能係輔助減速，已經係有咗嘅。咁我哋喺個山路裏面，都會用個叫做遲剎，即係統稱，咁係輔助佢落斜嘅，會係好穩定去停部車。

Brake 裏面有兩段，頭段係減速，第二段就係如果我哋踩 brake 嘅感覺係好實淨，brake 皮同隻碟係夾住咗㗎嘞，咁當刻係可以停車嘅，呢個係已經有㗎。

黎兆聰先生：補充，因為佢哋大嶼山有啲係單層旅遊巴，同巴士可能有啲裝置唔一樣，佢嘅簡稱嗰個係叫排氣剎車，佢嗰個一個裝置同我哋可能雙層巴士嗰個裝置又唔一樣嘅，我哋有個減速，有個吹疏，佢哋有個排氣嘅裝置，佢可以喺個手嘅

軟盤嗰度，一撻起嗰個裝置，就會排風、減速，嗰個係旅遊巴個裝置，好唔好？

主席：（經傳譯員）林生，仲有冇其他嘢想補充？

林天賦先生：得，唔該晒。

主席：（經傳譯員）黃律師，如果可以的話，不如我哋而家即係做小休先喇。今朝進度如何？

黃女士：（經傳譯員）我哋遲咗，不過我會小休之後加快番。

主席：（經傳譯員）我哋而家會小休，等你哋喺一喺，委員會都要喺一下嘞，休息二十分鐘，唔該晒。

上午11時35分聆訊押後

上午11時55分恢復聆訊

出席人士如前。

主席：（經傳譯員）黃律師。

黃女士：（經傳譯員）各位，我想去到下一個嘅題目，就係休息嘅設施。喺你嘅文件就係提過呢一個點嘅，就係基於我哋委員會所收到嘅文件，就似乎喺早於2010年大家已經係提出呢一個問題，但係請睇一睇呢一個交通運輸策略研究，係2015年2月9號貴會畀委員會嘅，咁係文件289-76至到289-80頁。

主席：（經傳譯員）邊一沓呀？

黃女士：（經傳譯員）係TU文件，英文就係第289-200頁。喺呢一頁就有兩點係提出嘅，第一就係非法泊車，喺第3段講到喺一啲嘅巴士總站非法泊車，第289-78頁，同埋英文就係289-203頁，第3段。

而喺呢一份文件第二點，你要指出嘅就係第7段，就係話休息嘅設施係不足夠嘅，中文係第289-79頁，英文係289-203頁，睇唔睇到？我亦都係想你睇一睇委員會嘅一封信，就係7月23號2018年，文件289-331頁至到335頁，淨係得中文嘅啫，就係提出呢一個嘅要求，要求提供進一步資料，就係話設施不足嘅問題。

如果睇289-333頁，28至到29段，睇一睇運輸署嘅回應，講到洗手間同埋休息設施。喺你嘅回應係你有--咁多年嚟，你都話休息嘅設施係唔足夠嘅，你亦都提供咗幾份嘅文件。自從2010年，首先就係2010年6月21號，咁文件

中文就係 289-90 第 3 段，英文嘅文件係 289-221 至到 289-222 頁，呢個就係第 2、第 3 段所講嘅，就係講到公會收集咗一百三十八個巴士車站嘅情況，有大概百分之五十六點五嘅車站都冇洗手間嘅設施，平均車長往返洗手間嘅時間係如果需要嘅話，係需要大概四分鐘嘅。巴士車長事實係上要五分鐘嘅時間，部分車站更加需要十分鐘以上先至可以係夠時間去廁所。

主席：（經傳譯員）呢啲係 2010 年做嘅觀察，係嘛？

黃女士：（經傳譯員）冇錯。我個問題係問你提出咗呢方面嘅意見，咁就係將呢個文件交畀委員會嘅，呢個問題係咪仍然一個嚴重嘅問題，即係所以你哋公會覺得係需要解決，需要處理呀？定係話情況已經改善咗？

張子琦先生：主席，係有啲改善，但係未曾完全改善，好多而家有啲總站係仍然都係未有洗手間同埋一啲休息室嘅。尤其有一啲喺屋邨入面想要求安置一個員工嘅休息室同埋洗手間係非常之困難嘅，所以我哋一再向運輸署反映，舊嘅就一定要同我哋儘快爭取番嚟，新嘅--以後逢係新設嘅巴士總站必須要有洗手間同埋員工休息室，呢個先係一個完整配套嘅巴士總站。如果冇嘅話，我哋係拒絕呢一種提供嘅服務嘅。

咁有所改善都係基於早前樂華嗰個--我哋發起一個事件，嗰個工業行動，因為就係房屋署強行咁樣要我哋吊走個休息室，莫視我哋嗰個休息員工嗰個服務嘅質素，因為有充足嘅休息時間先至可以有一個良好嘅服務。於是我哋工會係喺嗰一次嘅事件係發起一次工業行動員嘅。自此之後，有所改善，但係好多去到區議會度，啲區議員都會反對設立一個化糞池或者係休息室，咁就被諸多刁難，令到呢啲事情未曾完全去解決嘅。

主席：（經傳譯員）樂華嗰次嘅事件係咪九巴嘅休息室嚟㗎？

張子琦先生：冇錯，由九巴主任回應一下。

黎兆聰先生：主席，當陣時我係負責呢個樂華事件嘅，因為我哋收到啲工友，公司就扤咗個休息室入去，跟住房屋署要求廿四小時之內搬走呢個休息室。如果唔係，我哋嗰啲工友反映就話以後都唔准擺，所以我哋第二日即刻就馬上做咗一個行動，就封咗個站半個鐘頭，亦都同啲房屋署嘅官員同埋一啲當區嘅區議員話反映過。但係唔係話今日講今日做，係反映咗好多年，係受到地區人士反對一個設施，係令到我哋啲車長周圍坐，周圍食，周圍瞓。呢啲配套冇畀到我哋，我哋係冇一個充足或者一個真正畀我哋休息嘅配套。所以經過嗰次之後，有啲問題可以解決，但係我知道新巴、城巴頗為嚴重，佢哋可能啲地方配置可能亦都冇。而家講咗十幾年，可能置富花園，我或者畀城巴嗰個主任講下。

劉善達先生：主席，我哋城巴或者新巴，置富花園講咗十幾年，但係因為佢哋嗰邊嘅屋邨嗰啲主席嗰啲就唔畀--反對我哋擺一個休息室或者廁所嗰啲咁嘅設施响度，所以到而家十幾年，我哋都仲係未擺過嗰啲設施响度，等我哋啲員工可以响度休息。

張子琦先生：主席，龍運巴士主任都有啲嘢補充。

陳廣能先生：係，或者我都講下就係龍運巴士呢一度嘅情況。咁喺我哋 E34B，元朗山水樓開出嘅呢一個路線就喺 2013 年係進行咗一個路線重組。當其時呢條路線原本就係由呢個天水圍往機場嘅，咁拆咗線之後，就由元朗直至去機場。喺拆咗線之後，咁喺元朗山水樓設立呢一個總站，就沒有設立員工休息室同埋呢個洗手間嘅設備。喺我哋多番爭取之下，就公司係同我哋講番，原來就係話受到地區嘅人士去反對。

咁變咗就係話喺整個過程之中，我哋同事喺嗰幾年就係受盡呢一個委屈，例如佢哋冇地方食飯，佢哋要喺車上面例如食一啲嘅小食。我亦都記得就係話喺 2016 年，我哋有位女同事喺巴士上面食腸粉而係被地區一啲嘅居民影相，將張相片 post 上去呢個嘅 Facebook，係進行一個嘅公審，讓我哋--令到我哋嘅女同事係非常受到呢個情緒嘅困擾，佢曾經係喊住對我哋講出呢一件事。

喺整個過程之中，我哋嘅同事平時食飯、休息係冇地方，日曬雨淋，去廁所亦都要去好遠，或者去一個比較唔係咁理想嘅設備嘅廁所，一個廁所嘅設備就係要經過一個嘅屋苑先行去入去嘅。當中，例如喺夜晚就會比較漆黑一片，咁變咗就係話佢哋係會有一個安全，即係女同事會有一個安全性嘅困擾。終於就喺 2017 年嘅 8 月先至能夠設立咗呢個休息室，其實當中呢四年其實呢個過程係非常之長遠，我哋一路以嚟都希望就話喺一條新嘅巴士線設立嘅時候，係必須要有一個巴士站車長使用設施嘅配套，而係從而令到我哋服務質素能夠係延續同埋提升。

主席：（經傳譯員）呢個休息室係幾時安裝番畀你哋，係幾時嘅事呀？

陳廣能先生：如果講番 E34B，元朗山水樓呢一個休息室，係喺 2017 年嘅 8 月安裝畀我哋嘅，但係佢喺 2013 年呢條線就已經係開始行，運行緊，當中係--期間係接近四年時間，我哋車長係沒有休息室，沒有呢個嘅洗手間設備係提供畀我哋使用。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）喺你關於新大嶼巴士 2018 年 1 月 3 號交嚟嘅文件，即係話 289-140 頁第 3 段，呢個係中文，英文就係 289-317 頁，就提及到喺新元朗中心、天水圍天慈邨嘅休息設施。咁嗰個嘅情況有冇改善呀，定係話仍然一樣呀，天慈邨？即係講緊呢個第 3 段嘅第(i)分段嗰度。

林寶強先生：應該就好似早幾個禮拜話擺咗個休息室落去，但係我未過過去，就未肯定佢擺咗落去嘅。

黃女士：（經傳譯員）可唔可以之後將個資料交番畀我哋呀？

林寶強先生：好，好，可以嘅。

主席：（經傳譯員）林生，你係代表新大嶼山巴士，咁你可唔可以講下，有冇提供到呀？

林寶強先生：你指邊一方面呀？

黃女士：（經傳譯員）係休息室。

林寶強先生：休息室呢個天慈邨要--我返去睇睇先，因為我係喺大嶼山，呢個喺元朗區，唔屬大嶼山區，所以我冇時間去睇過呢個位置。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）喺你交嚟嘅文件裏面，你亦都提過另外一個例子，就係呢一個工會文件226-25頁，即係呢一個嘅頁數係24，中文係171頁，呢個就係話呢一個鯽魚涌嘅祐民街，你就話已經係經過十年嘅努力，至今一個細小嘅休息空間都未有提供，情況有冇改善到呀？

林天賦先生：唔好意思，呢個係咪我哋工會嘅文件嚟？

黃女士：（經傳譯員）呢個係九巴員工嘅文件嚟嘅。

林天賦先生：呢個唔係我哋工會下面嘅分會嘅文件。

黃女士：Yes, then I won't ask you about this.（經傳譯員）除咗觀塘樂華邨，即係呢一個係你哋提供嘅一個例子，除此之外，可唔可以畀其他嘅地點作為例子，你哋覺得巴士車長喺嗰啲地方係搵唔到一個適合嘅休息設施嘅？

黎兆聰先生：主席，舉例，九巴其實佢而家已經陸續安裝好多裝置，但係有啲裝置係受到嗰個面積同埋一個管理嘅規限，所以有待去改善呢啲設施。佢係有嘅，例如舉例，佢嗰個係單亭，個站長室嘅單亭。雙亭喇，個雙亭即係面積可能大少少，但係係唔能夠供給個車長休息嘅，呢啲例子係有嘅，但係一路係咁改善中，九巴就。

就如果我--嗰啲站頭，咁多個站頭，我相信已經差唔多陸陸續續已經有改善呢啲配套，我諗七、三之比，即係七成已經有呢啲休息室同埋呢啲化糞池廁所。可能有三成仲係要經地區或者經區議員，經工會、公司交涉先至喺度等緊呢啲配置。我哋曾經同公司溝通過，公司承諾係畀嘅，不過只係我哋明白到係真係受到地區人士阻撓，係擺唔到落去，即係淨係竹園邨一個位置，為咗一個廁所，作為籌碼，足足講咗十幾年先可以擺一個休息室，即係我舉例講一個例子畀你哋聽，好唔好呀？

陳廣能先生：就我龍運巴士嘅，咁我都補充少少。我哋龍運巴士嘅E33P就喺2016已經係全日服務，咁每一日來回班次係接近六十個班次。喺呢六十個班次，我哋嘅總站係呢個屯門兆康鐵路站南，係並沒有休息室，亦都並沒有呢個嘅廁所設施。呢條路線原本佢早年就已經係行緊車，咁喺2016年就係全日。咁我哋嘅同事，車長同事會喺呢一個嘅總站，呢個巴士總站嗰度係會食飯，會係休息，同埋

佢哋係會喺嗰個地方--例如係我哋有啲叫做我哋特別車位嗰度，我哋所謂嘅終點休息嘅，但係嗰個地方係竟然冇休息室，咁就我哋係多番爭取，得番--得到嘅結果，回覆嘅結果就係話地區同埋喺嗰個嘅運輸署方面係仲未通過。其實呢一個嘅爭取已經係到到今天已經係接近兩年㗎嘞，但係我哋仍然都仲未係見到有一啲嘅成果係睇得到，亦都未有一啲預見嘅通知係落實畀到我哋。

黃女士：（經傳譯員）關於呢個 E33P 呢一個嘅要求係咪用書面提出㗎，即係要嗰度有個休息室？

陳廣能先生：冇錯。

黃女士：（經傳譯員）幾時提出呢？

陳廣能先生：工會喺 2015 年其實已經係喺我哋工會同公司嘅會議上面係提出，而公司就一路都係話佢同有關方面去申請呢一個嘅設施。咁問題就只係喺呢個嘅 2016 年區議會喺落實咗話要呢條路線全日服務屯門區嘅居民，但係我哋就話如果沒有呢一個嘅休息室，其實我哋嘅服務質素會係能夠可以提升到咩嘢層次呢咁樣，咁公司亦都係將我哋嘅意見係反映番喺區議會，反映番喺運輸署上面，咁到今天，我哋都--我都講多次，係仍然未有一啲絲毫嘅消息係畀到我哋。

黃女士：（經傳譯員）可唔可以畀啲資料我哋，即係你哋書面提出要呢個休息室嘅文件，有冇？

陳廣能先生：我可以稍後提供，遲啲提供畀你哋，今天我未有帶出嚟。

主席：（經傳譯員）好，唔該你，當你有嗰份文件，請向我哋提供。

黃女士：（經傳譯員）係咪話直至到而家，嗰個嘅位置仲係冇洗手間同埋休息嘅設施？

主席：（經傳譯員）佢咁樣嘅證供。

黃女士：（經傳譯員）係。可唔可以有一啲照片畀我哋睇到嗰個位置呢？如果可能嘅話。

陳廣能先生：我都係稍後提供。

黃女士：（經傳譯員）唔該。我想去下一個問題，就係非法泊車。未講之前，黎先生，你可唔可以幫委員會喺呢一方面，九巴就係有一啲分更嘅安排嘅，係咪呀？

黎兆聰先生：分更係有嘅，三更制，早更、夜更、特別更，同埋一個 L 車嘅更份，四個嘅崗位，同埋一個通宵更。早更、夜更、特別車，一個 L 車，一個通宵車，有呢幾個崗位。

主席：（經傳譯員）分更，九巴已經係實行咗好多年㗎嘞，係咪呀？

黎兆聰先生：呢個一路以來，九龍公司 1933 以來都係有咁樣呢個安排嘅更份，呢啲

設置嘅配套，一開始已經係可能--嗰陣時可能未有通宵，可能未有特別車，但係而家呢幾十年來都係用呢種管理模式。

主席：（經傳譯員）嗰啲經過修訂嘅指引就係關於譬如工作時間、食飯嘅時間等等，喺2018年2月23號就係通告咗，就係改變而家嘅制度，係咪呀？有冇呀？

黎兆聰先生：一路以來嘅制度都有嘅，行之已久嘅。你話2018年2月開始，我唔明你指出，係咪改變咗呢個制度？照我所知，呢三十幾、四十年來都嗰個制度冇轉變，係分早更、夜更、特別車、L車、通宵車，呢幾個崗位呢幾十年來都係冇轉變過。轉變係有嘅，L車可能係呢幾--我諗呢五年內係會有呢個L車。呢個L車設置就係喺中段插落去個字軌嗰度，佢係喺個站頭接更，喺個站頭收工，係唔使揸架車返廠入油嘅，呢個...

林天賦先生：主席，我聽我哋黎主任咁講，應該就係運輸署公布咗呢個新嘅工作指引之後，九巴嗰個編更嘅制度應該仲係冇改變嘅。

主席：（經傳譯員）黃女士，可唔可以將嗰啲新嘅指引擺出嚟呢？我心目中諗嘅，就係嗰啲嘅情況係會安排，就係一個十四個鐘嘅當更，中間係會有三小時嘅休息。

黃女士：（經傳譯員）係CTB，即係城巴嘅2號文件第2頁。

黎兆聰先生：我明白主席想講乜嘢，嗰個指引喺2018年2月推出嚟，運輸署係畀時間巴士公司喺2019年嘅第二季度實行佢呢啲指引嘅，我明白你嘅意思，主席。我想再補充，嗰啲特別車同埋嗰啲L車係愛嚟榦嗰啲車長食飯，呢啲字軌，咁可能--唔知呢個補充o唔okay？

主席：（經傳譯員）我想你幫下手嘅，就係話要求提供一段不少於連續三小時嘅休息時間，即係有一啲特別更次呢一點。

黎兆聰先生：呢一點，特別車三小時休息係一路以來都有實行嘅，呢個係最基本嘅，就算係之前運輸署嘅指引，公司係有跟足嘅，特別車嘅更分必須要有三小時休息，呢個係一路以來都有行緊嘅措施嚟嘅。

主席：（經傳譯員）呢個係咪九巴嘅政策嚟㗎，抑或係運輸署嘅要求嚟㗎？

黎兆聰先生：呢個政策，九巴相信係暫時獨有嘅，龍運都可能一樣，我諗新巴、城巴冇呢啲嘅。我哋特別車係呢個崗位係行咗一段時間，佢嘅功能就係愛嚟榦我哋啲車長食飯，同埋行一個繁忙時間，上面一個--朝頭早一個繁忙時間，跟住畀一個break佢，連埋食飯三小時，或者係一個休息畀佢，跟住下一段佢就再去做番下一段嘅時間，呢個係特別車嗰個安排，係咁多年來都係咁樣做。

主席：（經傳譯員）黃女士，可唔可以睇下指引四？喺下面嗰度。

黃女士：Yes.

主席：（經傳譯員）呢度係咪有一個特別更嘅一個解釋，呢個就係要喺朝早嘅時候

嘅，係咪呀？1(b)，睇唔睇到？1(b)嗰度，黎先生，你睇唔睇到1(b)？

黎兆聰先生：我睇到。

主席：（經傳譯員）即係幾時係准許有十四小時嘅當值呢？就話要係揸十個小時嘅車，只係限於喺因應上、下午繁忙時間嘅服務需要，即係朝早同埋下晝嘅繁忙時間，呢個係咪一個新嘅規例呢？一個新嘅規定，定唔係新嘅呢？

黎兆聰先生：主席，喺2010年嘅10月修訂版嗰度，指引(b)嗰度有寫話不應超過十四小時嘅。跟住18年，我了解到就話亦都有個修訂，講緊十二小時至十四小時之間，係不應--即係呢個問題三小時休息嗰度係有修改嘅。不過我可以反映㗎，主席，我哋有個車隊涉及三千七百幾部車，其實呢啲十四小時係唔多嘅，真係唔多嘅，我諗一成都可能差唔多會有呢個問題。但係佢哋呢個崗位十四小時，佢哋係可能作息係做咗幾十年，可能有二、三十年呢啲車長係適應咗呢個崗位，佢嗰個生活作息同埋佢中間可能唔只三小時，可能有五小時或者四小時，因應嗰條路線時間去配合嘅，所以你想問呢個十四小時呢個問題係咪想問呢一點嘅，主席？

主席：（經傳譯員）唔係，我想問嘅係關於呢啲嘅車長如果佢哋要揸十四個小時車嘅話，佢哋落咗車嚟到去休息嗰個不少於三個小時，我想問佢哋呢啲嘅車長喺休息嘅時候有啲咩設施呢？喺邊度搵到呢啲休息設施呢？

黎兆聰先生：都要睇下個站頭設施足唔足夠，可能佢揀一啲路線會迎合番佢自己所住嘅區，等自己可以返到屋企。都有啲例外，有啲係唔係住佢自己嗰區，例如有啲九龍灣廠，佢住屯門，佢都有呢啲問題出現嘅，佢可能唯有喺休息息搵地方休息，或者搵嗰架車休息，或者返廠休息，咁呢個可能佢要自己去選擇一個休息地方。

個設置夠唔夠呢？可能七成夠，可能有三成唔夠，但係大多數嗰啲車長都係用番佢自己所近嘅路線，近自己屋企。同埋或者佢做咗咁多年嗰啲路線，可能佢習慣咗，佢唔想周圍走，佢都會揀嗰條路線，選擇喺嗰條路線，唔會離開嗰條路線。但係你話有休息室配唔配置到，迎唔迎合到佢呢？咁我相信有啲未必迎合到佢嘅，可能有時啲休息室有人飯飯，會嘈呀，咁可能會選擇一啲連鎖店或者麥當勞、大快活，搵啲地方去休息，咁呢啲我哋經常會收到呢啲個案嘅，但係你話佢足唔足夠一個休息嘅設置呢？我可以答你一半一半喇，要睇個車長適唔適合到佢，佢自己安唔安排到呢個時間自己去休息。但係我相信，佢揀得呢個崗位，佢會利用呢啲時間分配好佢自己休息，喺搵邊個地方同埋點樣去令到自己有充足嘅時間休息。

主席：（經傳譯員）你可唔可以係建議一個地點畀我哋委員會呢個禮拜去參觀一下，即係嗰度係唔夠休息嘅設施畀呢啲車長去休息嗰個不少於三個小時嘅時間嘅？

黎兆聰先生：我補充，主席，例如舊陣時，廠係冇休息室嘅，咁佢都整咗啲睡眠區。第二，就有站車嘅休息室。第三，就係佢鄰近佢自己屋企，返屋企休息。咁特別

車崗位應該有一千五百個字軌，涉及可能有千八人嗖喇，呢個特別車，即係你針對十四小時，呢啲係特別更嘅車長，我約莫講呢個數字畀你聽，主席，好唔好呀？咁特別車佢分兩段，我都啱啱重複，同埋 L 車佢都有分早 L 同夜 L 嘅，中間係冇得休息嘅，佢係直落嘅。咁 L 車都係，個功能都係一樣，都係瘐食飯。

陳廣能先生：主席，我想補充一下，就係我剛才都講咗，E33P 兆康鐵路站南呢一個嘅巴士總站係並沒有休息室。喺呢一條路線，佢哋亦都係有一個嘅同事需要係喺嗰度休息嘅。如果主席係想睇一睇呢個嘅總站，可以安排時間一齊去睇。

黎兆聰先生：唔好意思，主席...

主席：（經傳譯員）等等，黎生，你要等一等，要翻譯完先。你建議話我哋可以去睇下，就話嗰度係冇休息設施，係咪呀？

陳廣能先生：冇錯。

主席：（經傳譯員）呢一個地點係咪巴士車長係會因為要返特別更，中間落場嘅時候，喺嗰度要休息不超過--係呢一個不少於三個連續小時嘅地點嚟㗎？

陳廣能先生：冇錯。

主席：（經傳譯員）唔該。黎生，好，到你，你可唔可以畀個例子我哋，可以去邊度去睇呢？集中番個問題，就係話我哋可以去邊度，邊個地點去睇一啲係個設施不足以讓一個返特別更嘅車長喺嗰度休息不少於三個連續小時嘅地點？

黎兆聰先生：一個月輪廠不足休息室嘅設施，月輪廠，嗰度可能有啲車長會泊嗰啲車喺嗰度中段休息嘅，喺美孚嘅。佢如果真係冇呢個休息室，佢可能會喺架車度瞓，或者搵一啲地方適合到自己喺嗰度瞓，呢個係舉例一個例子。如果我有，我或者稍後補充，好唔好呀？

主席：（經傳譯員）係，畀三、四個呢啲地點，等我哋去睇下。我哋想睇嘅，就係譬如話有十個車長就係要中間落場休息三個鐘，但係原來嗰度得三個位嘅啫，你知道我哋想睇啲咩嘢未呀？

陳廣能先生：都補充一下，我哋龍運巴士 A43 喺粉嶺嘅聯和墟係有設立到車長休息室，但係呢個車長休息室只能夠係容納三位嘅車長去休息。我哋喺休息嘅時間，落場嘅時間，即係俗語講落場嘅時間，我哋經常性地係有六位或以上嘅車長需要使用呢一個嘅車長休息室，咁就形成咗有不足設施嘅情況出現。

林天賦先生：主席，我想...

主席：（經傳譯員）你可唔可以再重複一次個地點？

陳廣能先生：龍運巴士 A43，粉嶺聯和墟總站。

主席：（經傳譯員）唔該。

林天賦先生：我哋嘅工作人員提醒我哋，都有巴士公司代表在場，所以我希望主席你睇嗰幾個場地係真實嘅情況，唔係巴士公司安排之下嘅情況。

黎兆聰先生：我想提供多三個畀你睇睇，好唔好呀？主席。一個青衣廠，一個青衣鐵路站，一個觀塘碼頭係冇嗰啲配置畀到我哋嘅，即係嗰啲休息室。咁你睇睇呢四個，或者搵我哋公司有代表，你可以問佢，佢都掌握嘅，應該知道嘅。因為我哋工會一路有同佢溝通嘅，唔係今日講今日做嘅，一路有溝通爭取嘅。

主席：Thank you.

黎兆聰先生：Welcome.

主席：（經傳譯員）唔該。黃律師。

黃女士：（經傳譯員）呢個即係兩味更，要落場嘅，你就話即係呢一種嘅特別更，九巴一直都有咁樣嘅安排，可唔可以講下，係幾時開始你哋會有呢個特別更㗎？我想問，因為我會畀你睇一個表嘅，就係雜項文件 897 至到 898，係一個比較嘅表格嚟嘅，比較嘅表。如果睇番呢個表，呢一個嘅指引其實已經喺四次修訂過嘅，04 年、07 年、10 年，最後一次就係 2018 年嘅 2 月，咁係有關於特別更嘅安排。請你睇 898 頁，呢個其實係喺呢一個 2018 年 2 月先至引入嘅，睇番最屘嗰一欄就話係特別更，備註就話係特登為咗朝頭早同埋放工繁忙時間而定嘅，所以喺 2018 年嘅 2 月先至引入特別更。但係頭先你所講嘅答案似乎就係話呢個咁樣特別更，要分開嘅，即係拆開兩個嚟返嘅，就係一早已經有喎，你所講嘅係話有關--你提過呢個表係有關於呢一個安排嘅指引？

主席： By that you mean the guideline in relation to it?

黃女士： The guideline in relation to it.

黎兆聰先生：我想更正你嗰個講法，唔係 2018 年先有呢啲特別車嘅崗位，係呢三十年以上都有呢啲特別車嘅崗位。你講 2018 年 2 月實施呢啲措施，運輸署係有畀巴士公司於 2019 年第二個季度執行佢呢樣嘢，你要畀時間佢嘅，佢要跟你呢個制度可能要一啲時間，一啲人手，同埋呢三小時休息係一路以來都有嘅，好唔好呀？

黃女士： Yes.

張子琦先生：主席，等我補充一下，十四小時嘅工作喺運輸署嘅指引底下，就一直都有沿用嘅。咁就自從發生交通意外之後，好多人都指責十四小時駕駛係導致疲勞駕駛，但係就冇清楚劃分開一更車同埋特別車呢個區別。因為十四小時喺九巴嚟講，一向都係畀一啲特別車做嘅，中段佢有三小時休息，再加埋一小時食飯，大約四個小時休息嘅，但係就一直都唔會將十四小時擺喺一更車度做。一更車即係話中段冇休息，基本上係直落嘅。所以最新嘅指引喺 18 年呢個修訂案，就將呢個十四小時界定為係特別車，就並非一更車。

呢個「特別車」歷史悠久，主要係用於兩段嘅繁忙時間，一個係返工，一個係放工，亦因為呢兩個時間都係大多數出現喺早上6點至晚上嘅6點，所以呢個特別更車如果做晒呢兩個繁忙時間，就係會有跨幅嗰度要去到十四小時。因為佢六點鐘上完車，車完啲客去到總站，佢仲要揸番部車返廠，所以連出廠，連入廠大約係要有成十三、四個鐘頭嘅工作時間嘅。但係根據做呢啲更份嘅車長反映，佢哋認為做呢啲更份並不導致疲勞駕駛，雖然係十四小時，但係佢哋畀做一更車更加舒服，呢啲係特別更嗰啲車長嘅反映嚟嘅。

或者我哋度都有兩個做呢個特別更嘅，一個就係龍運嘅主任，你可以補充下。

主席：（經傳譯員）你一陣可以嘅，不過請你先答咗呢個問題先，即係喺呢一個嘅17年9月22號發生意外之後，運輸署就做咗一個檢討，整咗一個係工作休息用膳時間指引嘅修訂嘅，係嘛？

張子琦先生：係，冇錯。

主席：（經傳譯員）有啲工會就建議嗰個工作嘅時間係應該限喺十二小時，係嘛？

張子琦先生：嗄，係嘅。

主席：（經傳譯員）你哋工會向運輸署喺呢一個課題上面，你哋嘅立場係乜嘢呀？

張子琦先生：我哋個工會個立場係持開放態度，最主要就係要改善員工嗰個作息係擺喺首位，從而令到服務質素提高，尤其安全問題係擺喺首位嘅。

林天賦先生：主席，我哋喺見運輸及房屋局局長陳帆嗰陣時都講得比較清楚。第一，呢個十四小時係工作嘅時間上限，唔代表所有嘅司機都係要做十二小時工作，因為入面都規定咗揸車時間唔准超過十小時，呢個第一點。

第二點，就喺呢個十四小時，因為如果減到十二小時嘅話，對員工個收入會有比較大嘅影響。因為我哋有啲會員都講，如果十四小時減落嚟嘅話，每日減兩小時嘅話，佢哋嘅收入每個月會減大約5,000鈆，5,000鈆左右，即係佢佔咗家庭收入嘅一大部分。

第三個，如果要十四小時減到十二小時，即係巴士公司需要將呢啲時間畀咗其他人，其他本來工時相對短嘅員工去做呢個負擔，負起呢個駕駛任務。因為呢十四小時如果係簡單--九巴有二千個員工嘅話，佢即係每日要有四千個小時嘅工作時間，起碼要請四百人以上。要聘請一個，訓練好一個專業嘅車長，時間唔係短時間可以得到嘅，所以呢個見到就話如果呢啲工作時間喺短期入面冇可能達成嘅話，呢個變咗--工作時間應該係變咗而家嗰啲工時比較短嘅人要變咗兼負咗。

呢個所以我哋講嘅，所以整體要巴士安全唔係喺個工時嗰度著眼點，反而係休息時間更加重要，休息嘅設施更加重要，比巴士司機，巴士車長有好嘅工作條件，好嘅工作環境，咁呢個就係唔可以單純去睇，將呢個十四小時將佢醜化佢，

因為巴士公司又好，巴士車長又好，佢需要彈性。

頭先黎兆聰提到一點嘅，其實巴士嗰個車長要開特別更嘅，佢哋要申請嘅，唔係話巴士公司安排嘅，即係佢自願，佢考慮自己實際情況去申請嘅，所以呢個結合埋巴士個車長佢實際嘅處境。如果將所有嘢抽離嘅話，單純睇數字，或者單純睇呢個文件嘅話，可能對巴士行業嘅實際操作，我哋覺係有啲脫離呢個巴士行業嘅運作。

主席：（經傳譯員）你頭先提及過係見局長嘅，嗰次係咪舊年 10 月 17 號嘅會面嚟㗎？

林天賦先生：係，運輸署都有見，都有提到嘅。

主席：（經傳譯員）係。你就話係一個通知嚟嘅，通知--係工會發出通告。或者可以將呢一份文件帶出嚟，英文係 289-274 頁，或者你將呢個中文版本打出螢幕。

林天賦先生：錯咗，應該喺最近陳詞，最屘嗰一份最底嗰度。

黃女士：（經傳譯員）289-337 就係 2018 年 7 月 26 日，係咪呀？咁去到 336，289-336 頁，屘二嗰一段。英文就係 289-337-2。

主席：（經傳譯員）而家就係 10 月 17 號 2017 年，總工會關於呢一個會議，我其實就係想睇下嗰一份會議嘅通告啫。

林天賦先生：同埋 289-119。

主席：（經傳譯員）文件就係講喺 2017 年 10 月 17 號，就係總會就同五間巴士分會同局長見面，係咪呢一份文件呀？

林天賦先生：係，yes。

主席：（經傳譯員）第一點，係咪呀？「不能在短期內一刀切地下調工作指引中嘅工時上限，而應制度過渡或階段性措施嚟處理呢個問題」，即係應該要係有一啲過渡或者係階段性嘅措施嚟到去處理嘅，係咪呀？

林天賦先生：可以咁樣理解，因為陳帆局長--okay，係，啱呀。

主席：（經傳譯員）我而家就係想問，呢個係咪工會嘅立場呢？係咪你哋咁樣嘅建議呢？

林天賦先生：冇錯。

主席：（經傳譯員）咁有啲嘅職工就係話十二個鐘頭應該係上限，但係你就話唔係喎，你覺得係應該要繼續十四個小時嘅呢一個當值，係咪呀？

林天賦先生：可以咁理解。

主席：（經傳譯員）但係正如你咁講，呢個要有好啲嘅休息設施同埋其他嘅措施，係

咪呀？呢個係咪你哋嘅立場呀？

林天賦先生：仲有休息時間。

主席：（經傳譯員）另外，喺英文個翻譯最低嗰度就話如果係打算縮減呢個嘅工作時數，就要確保係前線員工嗰個嘅薪酬唔會係大大咁受影響嘅。

林天賦先生：都講咗嗰十四小時減到十二小時，一個員工每一個月大概可能就減少 5,000 蚊左右嘅收入。

主席：（經傳譯員）你講嘅呢個立場，呢個立場，2017 年係咪咁嘅立場？即係關乎嗰個最高當值時間嘅指引，你 2015 年當運輸署問工會，話可能係更改或者修訂呢啲指引，當時你哋係咪同一個立場？

林天賦先生：冇錯。

主席：（經傳譯員）咁你係知道其實 2015 年，其實工會之間係有一啲嘅分歧，有啲就話要最多當值時間係十二小時，而你哋就係話連續當值十四時，你知唔知有咁嘅分歧嘅呢？

林天賦先生：2017 年我哋就知，係 2017 年，應該 18 年我哋先知，以前我哋比較少聽到有人咁樣講。

主席：（經傳譯員）起碼幫下我，一般嚟講，當你同運輸署或者係局長見面嘅時候，有冇呢啲嘅情況，係所有嘅工會喺同一個嘅場合會見，抑或你哋係分批同運輸署或者係局長見面嘅呢？

林天賦先生：我哋係分批見面嘅，我哋冇一齊見面。

主席：（經傳譯員）咁你知唔知點解係咁嘅安排嘅呢？

林天賦先生：因為我哋同運輸署長期都係有一個不定期嘅會面，呢啲係雙方嘅共識。

第二，如果真係要反映專營巴士員工所面對嘅問題，只係得我哋一間工會有五間巴士分會，有齊巴士分會。

第三，有部分工會或者好大部分工會一開始對住我哋工會採取咗敵對，甚至係攻擊嘅態度，呢個令到大家嘅合作空間係冇嘅。

第四，喺大家討論關於專營巴士員工面對嘅問題，大家嘅觀點立場都不一致，所以上到去同官員講，一個一個講。

第五，我哋嘅每一次去到見運輸署官員嗰陣時，我哋都徵詢過我哋嘅啲幹事，或者係開專題會議去討論究竟係討論乜嘢話題。

第六，我哋嘅工會工作人員覆蓋面，即係喺所有嘅五間巴士公司入面，都有唔同嘅工作人員喺各個唔同嘅區工作，所以我哋覺得我哋掌握嘅情況會準確反映到大部分員工嘅意見。

第七，我哋工會從來冇喺即係大庭廣眾去批評其他工會，所以我哋唔希望呢啲事情繼續喺運輸署嘅會議入面發生。

主席：（經傳譯員）唔該。黃律師。

黃女士：（經傳譯員）可唔可以睇下《蘋果》呢一份報紙嘅報道？《蘋果日報》，就係 260...

主席：（經傳譯員）咩嘢，邊一份？

黃女士：（經傳譯員）工會文件 1B，中文就喺 260-257、258。至於英文就係 260-258-2。如果你睇下喺最底嗰度間住嘅，用深色字寫嘅文字，嗰度係提到運輸署現有嘅指引。但係喺呢一段嘅上一段，就係話自從一三年開始，巴職盟向運輸署要求修改指引，減工時同埋改善用膳時間，但係運輸署答覆話所有巴士公司都表示修訂指引會影響現有編更，佢哋需要額外增聘車長，長期營運開支將會增加，於是乎唔能夠係有共識嘅。

下面就寫運輸署日前表示，現時嘅指引係經諮詢專營巴士公司及工會後而制定，就佢哋認為如果而家係去要--運輸署就係用呢個理據，但係一直未正視巴士車長底薪過低，不斷加班增加外快嘅現象，因為署方認為車長薪金由巴士公司同員工商討，並同由市場調節嘅。咁就睇嚟呢，呢一度嘅報道係引述你哋嘅總工會就係其中一個原因引致個指引冇將嗰個嘅當值時間減到十二個鐘。我諗呢個未必係一個正確嘅表達，因為嗰度講所有嘅專營巴士公司都係反對呢一點嘅，呢個只不過係--即係你可唔可以同我哋確認呢個係咪你哋嘅立場呢？可唔可以講《蘋果日報》裏面所表達嘅係你哋總工會嘅立場呢，係咪呢？

林天賦先生：《蘋果日報》對於新聞報道，我哋覺得係有啲偏頗嘅。第二，講我哋工會，我哋係一套方案話畀運輸署聽嘅，唔可以咁樣抽離嚟睇，因為我要考慮巴士安全，就係淨係講工時，呢個係有欠公允嘅。第三，運輸署其實喺嗰個制訂指引嗰陣時，同我哋工會開過會嘅，有徵詢我哋意見嘅。咁佢最後嘅講法都係咩嘢呢？平衡各方，唔係淨係聽晒我哋工會一方面嘅意見，所以淨係講我哋工會提出嘅意見，運輸署全盤接受，呢個係唔準確嘅。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）唔該。為完整，另外，《東方日報》有另外一張嘅報道。

主席：（經傳譯員）我諗代表已經將佢哋嘅立場講得好清楚，我哋唔需要再去講報紙嘅報道。

黃女士：（經傳譯員）咁好，去番你哋向委員會係 7 月 26 號 2018 年嗰個嘅文件，第 289-337-2 咁嘅文件；另外中文就係 289-336，喺工會文件。

主席：（經傳譯員）我哋而家係會講咩嘢嘅話題。

黃女士：（經傳譯員）我想同佢哋確認一點，就係運輸署--喺你哋嘅文件就話運輸署

有諮詢過總工會，然後就係喺10月6號同埋17號之間係有諮詢過你哋，然後就已經係發出2018年2月嘅指引。咁即係話佢哋喺10月6號同埋17號2017年同你哋會面，但係佢哋係等到2018年2月23號公布咗新嘅指引先再同你哋總工會嚟到會面，係咪呀？呢個係咪你哋嘅立場？

林天賦先生：其實文件寫得清楚，2017年嘅10月6號見面，然之後就關於呢個修改--修訂工作指引，就我哋表達意見。然之後喺2018年嘅2月23號，佢就公布，中間就冇同我哋再次溝通，咁呢個就係運輸署同我哋工會喺處理呢件事嘅嗰個內容。

黃女士：（經傳譯員）係，我睇到個時間。

主席：（經傳譯員）係。各位，我知道淨係請你哋今朝嚟嘅啫，不過而家我哋係要嘅時間要多咗喎，你願唔願意食完飯返嚟再講埋其餘嘅部分，我哋先至再聽其他工會代表嘅證供？食完飯再返嚟。

黎兆聰先生：我有個活動應承咗幾十人一個活動，我甩咗底，我要去返西貢會合番啲人，我或者搵番個九巴分會嘅代表替番我其餘嗰啲，我唔知得唔得？

林天賦先生：可以嘅，多謝主席。

主席：（經傳譯員）張生呢？你下晝可唔可以出席呀？

張子琦先生：Yes，可以。

主席：（經傳譯員）黎生咁樣處理，好唔好呢？你願唔願意咁做呢，或者咁樣講？

黎兆聰先生：主席，我哋做工會係有一個好責任性嘅團隊，我今日兼負呢個責任，我一個船河嘅party有五十幾人，我唔參與，佢哋幾乎都要取消。作為工會係負責任嘅，一個活動，一個領導，呢啲活動就必須要去參與。如果我可以應承你，或者我逗留多一陣，你所想講嘅嘢，我儘量解答你，好唔好呀？

主席：（經傳譯員）但係我哋都唔想話因為即係留住你，等你去唔到呢一個船河嘅活動，但係我哋會做嘅。如果我哋而家繼續做多一陣，係咪會好啲呢？黎生。

黎兆聰先生：唔好兜咁多個圈，重點講嗰啲，我相信可以解答到你。如果可能呢，半個鐘或者三個字，你所提出嘅重點，我解釋到畀你聽，我願意留低嘅。

主席：（經傳譯員）咁即係有時講周邊嘅嘢就係會即係妨礙到我哋，令到我哋唔可以準時完成，兩邊都係要咁做。黃律師，繼續。

黃女士：（經傳譯員）可唔可以請你睇一份文件，係運輸署嘅文件嚟嘅，就係呢個18年嘅7月20號。

主席：（經傳譯員）咩嘢文件嚟㗎？

黃女士：（經傳譯員）呢份文件係回應番委員會嘅文件。

主席：（經傳譯員）處理咩嘢課題㗎？

黃女士：（經傳譯員）就係有關於訓練巴士車長嘅一個作業守則嚟嘅，作業備考。或者請你睇下運輸署文件 1 號 427 頁，就係第一頁嚟嘅，有關於訓練車長嗰部分就係 435 頁可以搵到。第二格，上面就話運輸署最近向專營巴士公司--435，係運輸署文件嚟嘅，435 頁。

主席：（經傳譯員）繼續。

黃女士：（經傳譯員）呢度提及話運輸署最近就發出咗一個作業備考畀專營巴士公司嘅營運者嘅，有關於係訓練巴士車長，我想問...

主席：（經傳譯員）英文嚟㗎嘛，所以你需要讀出嚟，可以翻譯畀佢哋聽。

黃女士：（經傳譯員）運輸署最近發出咗作業備考畀經營者，係有關於訓練巴士車長，咁就要將唔同專營巴士公司佢哋訓練嘅安排變得一致。同時係就於巴士車長訓練系統要釐定一個係相同嘅框架，咁分時段就係 2018 年 10 月開始執行嘅。雖然咁--跟住落去嘅就係講另外一樣嘢，我想問嘅問題就係呢份嘅作業備考有冇發出畀你哋工會呀？即係等你哋去評論一下，唔會話係咪評論喇，咁有冇將呢一份嘅作業備考係畀一份你哋呀？

黎兆聰先生：你講嗰個訓練指引，我哋唔知係咩嘢嚟，應該冇收到，即係我講緊九巴吓，我冇收到呢個新指引。

張子琦先生：所有巴士都冇，五間巴士都冇，主席。

主席：（經傳譯員）咁有冇就於呢個嘅改變，即係培訓改變，即係會點樣監察同埋其他嘅事項，有冇諮詢過你哋呀？

黎兆聰先生：唔好意思，主席，我睇到 2018 年 10 月，而家先 7 月，會唔會有啲日子打錯咗呢？佢寫實施日期喎，我哋未收到呢個訊息，咁你打 2018 年 10 月，即係而家現在應該未有呢個通知。

主席：（經傳譯員）唔係，嗰份嘅實務說明已經係發出咗，不過係呢一個實施時段就係將來 10 月，但係已經發出咗實務說明。問題就係問有冇就於培訓嘅修訂，安排包括乜嘢，點樣監察，點樣去規範，有冇人去諮詢過你哋呀？

劉善達先生：城巴方面係有諮詢過嘅。

主席：（經傳譯員）可唔可以畀詳情呀？

劉善達先生：佢同我哋講過嗰個訓練個方法，即係個車長佢跟完線之後，就要去自己揸過一轉，冇問題先至畀佢行嗰條路線嘅。如果係冇訓練過，或者冇跟過嘅話，就唔准許行嗰條路線嘅。

黎兆聰先生：九巴呢度有補充。之前有啲路線可以用跟車住嘅，經工會反映咗之後，意外之後，公司係唔准跟車，要操車，一架車如果普通一個路線就六個人，如果

操過海線就三個人。不過係佢單方面修改，係冇通知過工會嘅，即係講九巴呢度，好唔好呀？

張子琦先生：大嶼山...

主席：（經傳譯員）唔好意思，等等。劉生，我想再進一步問，你頭先講黎生話有諮詢過你哋個喎，佢哋話，佢哋係指乜嘢呀？

劉善達先生：管理層。

主席：（經傳譯員）係城巴呀？

劉善達先生：城巴，係。

主席：（經傳譯員）運輸署有冇諮詢過你哋呀？

劉善達先生：冇。

主席：（經傳譯員）係，張生。

張子琦先生：冇嘅，所以呢啲措施到底係咪運輸署嘅指引，我哋係唔清楚，只不過係自從發生交通意外之後，幾間巴士公司都作出一啲修訂，就唔清楚呢啲修訂、呢啲指引係咪嚟自運輸署，佢冇同我哋清楚交代呢樣嘢。

主席：（經傳譯員）你話交通意外，你係咪指呢一個嘅18年2月10號大埔公路嗰次嘅意外呀？

張子琦先生：冇錯，係。

主席：（經傳譯員）黃律師。

黃女士：（經傳譯員）我想講另外一個課題，就係有關於嗰個車速顯示器嘅。我哋曾經聽過一啲嘅證供，就話專營巴士營運商就關注車速顯示器，話會引起車長同埋乘客之間嘅爭執，因而會令到巴士車長係受到額外嘅壓力，咁就可能會引起呢一個交通安全嘅問題，所以我就想問下，呢個咁嘅觀點，你哋工會係咪同意咁樣嘅講法㗎？

劉善達先生：係。

林天賦先生：呢個問題我哋未討論過，但係我哋覺得專營巴士車長佢會因應住每一條道路實際嘅交通限制，佢會駕駛巴士，但係乘客唔係，所以呢個可能真係會引起誤會，甚至磨擦。

黎兆聰先生：我可以補充，如果你講呢啲車速嗰個顯示器喺小巴，亦都係可能十零個人嘅磨擦。如果你話裝喺巴士嗰度，如果起哄，百幾人起哄，嗰班車唔使行㗎嘞。因為我相信我哋一個專業嘅車長，車速調控係適當嘅，係一個資深或者一個有經驗嘅駕駛者，好唔好呀？

張子琦先生：主席，我補充下，其實而家好多巴士，我哋因為係有一個提示器，佢只要一到七十公里就會響嘅。而且我哋嗰啲巴士完全係鎖死咗七十嘅，喺基本上係直路、平路都係唔會超過七十嘅，所以裝一啲嗰啲顯示器出嚟，會唔會有時或者落斜嗰十秒、八秒過少少，七十一、七十二，又會有乘客出嚟投訴，會產生一啲磨擦呢？我哋真係難以推斷會發生咩事。

主席：（經傳譯員）你講話一啲顯示就話係即係七十，如果其實嗰段道路係限速五十公里嘅話，呢個顯示器都冇乜用㗎喇，係咪呀？

張子琦先生：仲有，我哋嗰啲巴士係而家有GPS，係睇到嚟每一段路會唔會超速嘅，所以我哋絕大多數嘅車長都係唔會超速駕駛。如果唔係，佢就要返公司見，所以呢個資源扰落去係咪值得呢？我哋有個疑問，會唔會擺喺第二啲度仲好啲呢？

主席：（經傳譯員）唔該晒你嘅意見，我哋而家真係要停。如果係黎生你食完飯可以返嚟就即係更好。我想請大家喺兩點半再返番嚟繼續提供呢個口述證供，唔該晒。

下午1時12分聆訊押後

下午2時31分恢復聆訊

出席人士如前。

主席：（經傳譯員）午安，黃大律師。

黃女士：（經傳譯員）第二個我哋想問嘅問題就係關於非法泊車嘅。我哋要聽取你哋嘅證供，就係話係喺呢個總站嗰度有違例泊車嘅，咁就係令到嗰啲嘅巴士返番去總站比較難，亦都有問題嘅，咁亦都有安全嘅問題，因為違例泊車嘅原因。你哋個工會有發現到違例泊車係一個問題，你係需要同運輸署同埋警方係提出呢一個嘅違例泊車嘅問題？

張子琦先生：有嘅，主席，我哋多次向運輸署反映，喺巴士站裏面經常被外來嘅車輛喺度停泊，阻塞巴士嘅上落客，從而令到係會有機會產生嗰個安全問題。但係至今，運輸署係仍然冇想過任何方法去解決嘅。本會亦都向運輸署提出過多項建議，第一，喺巴士站裏面要畫雙黃線；第二，要喺巴士站裏面裝一啲閉路電視，可以錄低違例嘅車輛；第三，喺巴士站畫黃格，令到巴士出入方便，呢啲完全都係為咗公眾嘅利益，亦都參考咗星加坡都係咁樣做法，但係我哋本港嘅運輸署就以佢哋英國冇咁嘅例子而不作考慮。多謝，主席。

主席：（經傳譯員）關於嗰個提議就係星加坡嗰方面，係關於巴士站喺公路上面嘅巴

士站吖...

張子琦先生：係喺--主席，係喺公路上面嘅巴士站，我見到佢哋出面係有條黃線，主要巴士打燈出，後面嘅車輛就主動咁停低，讓巴士出站。咁但係香港就冇咁嘅情況出現喇，你打燈出，後面啲車只會加油嚟頂住你，令到巴士出站都好有困難，周時就係為咗咁樣樣而發生咗一啲交通意外，令到道路上更加擠塞。呢啲情況嚴重嘅地點係有伊利沙伯醫院喇、瑪嘉烈醫院喇、美景花園喇、欽州街、元州街、柯士甸道、新填地街、漆咸道南、麼地道同埋木廠街，違例--呢啲係違例泊車好嚴重嘅地點，仲有軒尼詩道、英皇道。

主席：（經傳譯員）你係咪講緊喺巴士站嘅違例泊車，又或者喺巴士站附近嗰啲道路？係巴士站本身，定係附近嘅道路？

張子琦先生：係。喺巴士站入面，周時都係被一啲外來車輛佔用或者前後停咗車，中間留番個約莫有一個巴士位，但係喺呢啲情況，巴士係冇可能可以入到呢個巴士站上落嘅，係只能夠可以--只能夠 double park，咁呢個完全係令到乘客會有危險嘅。

主席：（經傳譯員）咁你會建議--咁點樣可以令到啲人就係阻嚇佢哋，就唔好喺巴士站附近之前之後嗰啲道路去泊車？有咩嘢建議？

張子琦先生：主席，根據外國嘅慣例，譬如美國，如果你係隨意喺巴士站度上落，嗰何罰款特別重嘅，香港嗰個罰款就特別輕，執法者特別鬆，亦喺巴士站裏面冇畫雙黃線，冇規定佢哋唔畀喺度泊咁樣，佢哋真係以為巴士站可以隨便上落、隨便停泊，而且如果裝閉路電視錄低佢哋，錄低啲違法嘅車輛係會有阻嚇作用，呢啲都係可以參考㗎。多謝，主席。

黃女士：（經傳譯員）你自己有冇拍到一啲嘅帶？就關於違例泊車，有冇攝錄過？

張子琦先生：有片段已經係交咗畀秘書處，而家你可以睇睇。

黃女士：（經傳譯員）我哋而家就係播緊條片嘅。我哋而家停一停先，停一停先，你首先你話畀我聽呢一個地點喺邊度嚟㗎，呢個地點喺邊度嚟㗎？

張子琦先生：呢度係北大嶼山迎東邨。

黃女士：（經傳譯員）我哋而家睇到就有巴士...

張子琦先生：係喇，地下係雙黃線，完全係冇差人去管理。

主席：（經傳譯員）呢個係大概幾時拍㗎，呢段片？

林寶強先生：我講講，就琴日下晝拍嘅，咁而家我哋左手邊就係 37M 同 37H 嘅，咁右手邊--呢條片右手邊都係巴士站同的士站嚟嘅，咁嗰個緩衝區係好少嘅，導致啲車入唔到前面個迎東邨個停車場，我哋仲有一條片睇嘅，係阻礙巴士上落，會睇得好啲嘅。呢架巴士點解停响度？就入唔到去迴旋處㗎呢架巴士，佢

右手邊係一個停車場嚟嘅，咁啲車--喺右手邊見到啲私家車就係準備入停車場，係入唔到嘅，咁要讓一架嘅巴士出番嚟，喺個安全島逆線行車嘅呢個。

張子琦先生：呢架巴士係跨過對面嘅安全島，係逆線行車，現時係。

林寶強先生：嗰個情況係比較嚴重嘅，如果日後呢個人工島開咗之後更加多車喺附近，會導致更加擠塞嘅，呢啲位置都係。

黃女士：（經傳譯員）呢個係咪--呢條片嗰個地點同你哋頭先第一條片嗰個地點係咪一樣㗎，還是係另外一個地點？

林寶強先生：同一樣，同一個位置，仲有幾張相睇到嘅。

主席：（經傳譯員）好，唔該晒。

林寶強先生：呢個喺 Google Map 睇相嘅呢個係，可以喺 Google Map 嗰度睇到嘅，呢啲。

黃女士：（經傳譯員）呢個係左邊嘅圖片喇，就係個巴士站嚟㗎，係咪巴士站嚟㗎？

林寶強先生：係，正確。

主席：（經傳譯員）我哋可唔可以返番去前一張相？呢一張，係。嗰個灰色嗰架車，其實佢係咪巴士站裏面停，還是係喺巴士站嘅隔籬？哦，原來--我睇到喇，喺巴士站個範圍裏面㗎。

張子琦先生：冇錯，佢對面嗰架貨車都係巴士站㗎。

黃女士：（經傳譯員）呢個係咪琴日拍嘅相？琴日影嘅相嚟㗎？

林寶強先生：呢個 Google 嗰啲相嚟嘅，呢張係。

黃女士：（經傳譯員）係 Google 嚟㗎。呢兩條片係咪你自己拍㗎，還是...

林寶強先生：係，琴日拍嘅，琴日下午拍。

黃女士：（經傳譯員）你係咪喺巴士裏面望出嚟咁樣拍㗎？

林寶強先生：有啲落地拍，有條片係坐住㗎私家車拍嘅，坐喺架工程車拍嘅，有一條。

主席：（經傳譯員）其實我哋睇番嗰個錄像機佢嗰個擺動嗰個角度，我哋就知道其實你係點樣拍嘅。

張子琦先生：主席，我想講嘅係呢啲情況喺香港好多處都係咁樣樣嘅情形，主要就係執法者不嚴。

林寶強先生：我補充少少吖，因為嗰個位置，迎東邨嗰邊，出邊將會填海，但係佢未完善之中就開咗呢條路，擺咗好多巴士，加上個停車場--嗰個迎東邨嘅停車場

車位不足，導致佢塞住咗個路口，私家車入唔到去，所以排隊入去嗰個停車場。另外貨車就後面--見到呢張圖嘅後面落緊貨嘅，因為入唔到停車場，導致喺外圍落貨。

張子琦先生：主席，我喺度想補充，任何理由阻塞巴士站都係唔合理、唔合法嘅。

主席：（經傳譯員）咁你就喺巴士上面就可以其實有一個向前睇嘅鏡頭，你就可以睇番或者係擺低--就攝錄咗啲影像，有啲嘅違例泊車，你覺得呢個建議點樣樣？

張子琦先生：可行嘅，主席，但係呢啲拍低咗之後，我哋嘅資方會唔會將呢啲資料會畀警方呢？第一。第二，違例者如果佢冇想到你係會畀警方，佢繼續違例，但係如果喺個巴士站度裝一條攝錄鏡頭，佢就會有阻嚇作用。多謝，主席。

主席：（經傳譯員）我可唔可以問一個補充嘅問題？如果我哋想清楚呢啲咁嘅情況嘅時間，咁可能車長就要可能要撳一個掣，咁然之後就係--就嗰個影--個相機就係可以知道正確係咩嘢時間呢啲事情發生，咁你覺得呢個咁嘅安排又點樣樣？

張子琦先生：可行嘅。

主席：（經傳譯員）係可行吖，當然，但係咁你反唔反對？你會唔會支持咁做？

張子琦先生：支持。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）再講番呢一方面嘅議題喇，我哋講番就係話巴士專線，即係巴士線嘅，咁你嘅書面嘅意見入面就係話即係巴士司機都係因為其他人違泊，咁令到佢哋工作更難喇，其中一個問題就係違泊嘅問題喇，令到啲司機都會沮喪嘅，咁所有呢啲問題都帶嚟一啲安全嘅問題，你會唔會支持呢一個講法？都有啲建議嘅，喺星加坡就譬如話係有巴士專用嘅線，你會唔會支持？

張子琦先生：主席，我係支持同埋認同嘅，但係睇番呢十零年，香港政府對巴士專線 cut 得嘅 cut，不但只唔會畀條專線佢行，仲要畀條好難行嘅路佢行，例如德士古道天橋，佢朝早6點，即係話夜晚12點至到6點，凌晨6點，佢係唔畀巴士--專營巴士行嘅，反而佢係畀一啲重型車行，係畀一啲非專營嘅巴士行，偏偏就唔畀專營巴士行，令到車上嘅乘客係要行天橋底下過，咁樣反映出運輸署處事係避重就輕，我估計應該係有人投訴太多重型車經過嗰條天橋，但係佢就選擇係專營巴士行底下，行天橋底下。多謝，主席。

主席：（經傳譯員）呢條天橋係咪巴士線嚟㗎？

張子琦先生：主席，呢條天橋唔係巴士線，以前係任何車輛都可以喺上面行，但係就唔使喺下面經過幾個燈位，但係而家運輸署嘅處事作風就偏偏就唔係咁樣樣處事嘅--處理嘅，係要啲巴士行一啲唔方便、唔直接嘅路面，要佢哋行橋底過，反而上面就畀重型車、畀非專利過，本末倒置，唔明白佢哋用意何在。

主席：（經傳譯員）但係集中講番--即係而家講緊巴士專用嗰啲路線喇，現有嘅巴士線喇，你嘅睇法係點？幾於政府或者運輸署佢嘅態度，對於發展巴士專用嘅線道你點睇？

張子琦先生：主席，我絕對認同、贊成係開啲巴士專線畀佢哋行，呢個係為咗公眾嘅利益，使多啲人選用交通工具，好過揸私家車出嚟，而家因為私家車太多喇，會堵塞交通，如果你巴士暢順嘅話，唔會塞車嘅話，佢哋會多啲人會選擇公共嘅交通工具嘅，希望運輸署正視呢個公眾嘅利益，唔好去扼殺巴士嘅經營，令我哋產生困難。多謝，主席。

主席：（經傳譯員）個問題就問得好清楚，問你對於政府個睇法係有咩嘢睇法，即係係咪你意思話政府而家減晒啲巴士線，令到你哋經營唔到，定點？巴士專用線。

張子琦先生：我見唔到而家有新開嘅專營巴士路線畀巴士行，不但只係巴士路線，我喺度扯遠少少，就係現今嘅屋邨嘅巴士總站個設計都非常之有問題，令到佢哋泊位難，根本又好似有難以生存嘅空間，令到啲巴士。

黃女士：（經傳譯員）最屘一個問題講薪酬，我哋聽到城巴嘅營運商嘅證供就話佢哋係有薪金同埋--即係其實佢哋改革咗㗎喇，2018年3月開始有個底薪再加埋獎金嘅，咁我就想問下呢個制度，呢個建議有個弊處嘅，就似乎係話而家係冇一個獎勵嘅制度，你可唔可以代理工會確認係咁嘅情況？即係係再將個薪--3月，2018年，將個發薪嗰度...

主席：（經傳譯員）你話之前係咪講話如果安全駕駛有獎？

黃女士：（經傳譯員）係喇，安全駕駛有獎賞嘅。

張子琦先生：主席，講起呢個薪酬，自從1999年開始，資方不斷咁將佢哋嘅薪酬削減、福利削減，去到04年更加又大幅削減，淨係呢個99年到04年都分開三級制。喺近期，我哋要求資方要重整呢個薪酬同福利，如果唔係，對個員工個士氣打擊好大。而家我哋攞緊嘅薪酬，新入職嘅，早前都係$12,000都唔夠，後嚟我哋要求公司將嗰個安全獎、服務獎擺番落去個底薪度，先至係到$15,366，呢個薪酬係遠比運輸署界嘅行業嘅中位數為低，但係呢個車長嘅工作，負嘅責任係非常之重，佢車上嘅全部都係生命，係人。佢咁嘅薪酬偏低，係令到直接影響到聘請，甚至係佢工作嘅態度。好多人入到嚟，都係考咗個牌，操熟嗰個重型車，佢就會出去考其他重型車牌，就會出去其他運輸嘅行業度做。咁係令到成個服務嘅質素就會降低，因為成日都係新人。

仲有，佢哋嗰個薪酬太低，變咗佢哋不在乎呢份工作，帶住咁嘅心情去工作嘅話，就好容易產生交通意外。如果我講番98年之前嘅日薪，佢哋每一個車長絕大多數都係好珍惜呢份工作，因為佢哋知道佢哋出到去搵唔到呢份工，佢哋每年都有個增薪點，佢哋越做得耐，更加唔會跳槽或者離開呢個崗位，對公司有歸屬感。無奈99年之後，嗰個薪酬嘅制度大幅調低，令到呢啲車長嘅質素

顯然係下降，同時影響到公眾嘅利益。

多謝，主席。

主席：（經傳譯員）你話係工會要求嗰個薪酬方面個架構要調整嘅，你係幾時提出呢個要求？即係而喺18年3月嘅時候係的確已經改咗，咁你幾時提出㗎？

張子琦先生：主席，我哋呢個要求已經係有十年多㗎喇，但係一直未被認同，因為當時個環境，香港個環境或者唔係咁好，經歷過SARS、金融風暴，所以資方唔肯願意去改善。直至到呢兩、三年，資方先至肯願意逐步逐步去改善，但係係一啲嘢牙膏式嘅，所以令到好多工友都不滿意，甚至產生一啲工業嘅行動。呢啲我哋係理解嘅，所以再次敦促資方要大幅咁樣樣去改善番嗰個薪酬嘅福利，同以前嘅98年嘅日薪要睇齊，佢哋有嘅嘢，月薪都要有。咁喺而家嚟緊嘅今年度嘅加薪會議，資方而家口頭上應承我哋係大幅係加番畀我哋嗰個福利，但係嗰個薪酬仍然係未曾追得上現時嗰個中位數，因為而家我哋新入職嘅係$15,366，暫時資方只係應承加1,000蚊，加咗1,000蚊都係$16,366，遠比揸重型嘅貨車嘅司機為低。但係我哋揸緊嘅唔係重型--唔係貨車，係重型車，而家載緊乘客，我哋個薪酬唔應該低於任何嘅駕駛者，但係偏偏我哋攞嘅薪酬係非常之低，呢個係非常之不合理。所以我哋仍然係努力之中，儘量為業畀爭取更大嘅權益。多謝，主席。龍運巴士有補充。

陳廣能先生：係，sorry，或者我補充少少，係。我哋龍運巴士分會喺2018年嘅1月做咗一個統計，就係統計我哋喺2017年呢個年度我哋離職同埋入職嘅人數，我哋喺--龍運巴士喺2017年入職嘅人數係一百人，2017年呢個年度離職嘅人數係一百二十人，我哋喺1月份嘅統計就當中呢一百二十人係有--即係呢一百二十人喇，當中係有百分之六十係因為薪酬嘅問題--嘅低薪呢個問題而係離職嘅。

主席：（經傳譯員）鄭生，可唔可以問你呢一樣嘢--陳生。關於安全獎金、其他獎金喺2018年3月係加入去個底薪嗰度，係咪有發生過咩嘢事係令到巴士嘅營運商去有呢個改變？有冇發生咩嘢事？

張子琦先生：主席，我可以好明確咁同你講，係唔關任何發生嘅事情或者某一啲特別嘅大嘅意外先至係會產生呢一個加幅嘅。因為呢個加幅喺上年嘅加薪談判，我哋上年5月，17年嘅5月已經係已經確定咗今年佢會加㗎喇，會調整，將個安全獎、服務獎擺落去個底薪度，只不過資方話佢唔希望喺加薪會議嘅時間傾呢樣嘢，等加薪會議完結咗之後，先至同我哋確實呢樣嘢嘅落實。咁加薪會議完成咗之後，我哋都追過資方「喂，你要找數喇喎」，資方都話儘快㗎喇，據聞佢哋12月董事局已經批准咗將嗰個底薪調高，將安全獎、服務獎擺落個底薪度。呢個我哋係爭取好耐，亦係我哋嗰個計劃嚟，成個將嗰個人工調升一個計劃，點解呢？我首先要將安全獎、服務獎擺咗落個底薪度，令到有$15,366，第一步。

第二步，我就爭取雙糧，雙糧係以嗰個底薪計，咁我哋先至會爭取更大嘅

成績。雙糧佢已經畀咗我哋喇又，係以嗰個$15,366，未計今年嘅加薪。咁嚟講，如果我唔將嗰個安全獎、服務獎擺落個底薪度，我只能夠攞一萬一千幾。即係換句說話，呢個雙糧我係多咗三千幾紋，呢個係我第二步。所以係與發生任何嘅事情、嘅交通意外係無關嘅。

多謝，主席。

主席：（經傳譯員）所以2017年5月你哋已經同意咗㗎喇，咁個董事局已經之前--就喺2017年12月嘅時候同意咗呢個做法，係咪咁樣樣？

張子琦先生：冇錯嘅，主席，喺17年嘅12月已經批咗，但係公司冇即刻拎出嚟，亦都冇講畀我哋知派個聖誕禮物畀我哋，仍然係擺住唔放出嚟，佢好不恰當咁樣樣就係喺意外之後先至攞出嚟，所以畀外界誤會咗，以為係因為有宗大交通意外，先至會畀呢個福利或者調整呢個薪酬畀我哋。

主席：（經傳譯員）你講緊係邊一個嘅董事局係核准呢一個嘅改變，邊一個董事局？邊間公司嘅董事局？

張子琦先生：根據我所知，主席，係九巴董事局梁乃鵬主席親自批嘅。

主席：（經傳譯員）有冇其他公司嘅董事局？

張子琦先生：主席，呢個唔清楚。

主席：（經傳譯員）林先生，呢個大嶼山巴士公司有冇作出一個咁嘅改變，就係話將安全獎金係將佢加埋入底薪嗰度？

林寶強先生：冇嘅。

主席：（經傳譯員）佢哋畀嘅證供話畀我哋聽，就係有一個額外嘅獎金一次過嘅，咁係咪咁樣樣？

林寶強先生：係，有嘅，呢個有嘅。我哋嘅底薪係6,400紋底薪，咁每日有個津貼，就係230紋嘅，一個月開足工，返九個鐘，禮拜六、日要開工，四個禮拜六、日，加埋$16,200，比係九巴、新巴、城巴、龍運少咗錢嘅，人工係偏低嘅，大嶼山係偏低嘅。

主席：（經傳譯員）陳先生，剛才黃大律師都問過--問呢個問題，因為咁樣嘅調整，其實對呢個嘅巴士嘅車長嚟講，佢哋冇任何嘅誘因或者鼓勵佢哋特別注重安全嘅，你覺得呢個調整係咪冇呢個效果？

張子琦先生：主席，唔認同嘅。薪酬--合理嘅薪酬係絕對鼓勵到一個同事對公司嘅認同、歸屬感，而唔係一個過渡式，而唔係一個騎牛搵馬，工作態度就自然不同。

主席：（經傳譯員）唔該晒。黃律師。

黃女士：（經傳譯員）如果你係要提出一啲嘅建議點樣去監察車長嘅表現，譬如話好似星加坡有個系統喇，佢哋係有個紅色、黃色同埋綠色嘅制度㗎，就係話睇番嗰個司機嘅情況，...

主席：（經傳譯員）咁呢個係講緊其中一間公司啫？

黃女士：（經傳譯員）或者我哋睇一睇相關嘅星加坡呢間嘅公司喇，佢就係 Strait Times，海峽兩岸嘅，2017 年呢一個 6 月嘅報導嚟嘅。

主席：（經傳譯員）我哋有冇個頁碼，個頁數？

黃女士：（經傳譯員）其實就唔喺我哋嘅呢一個嘅文件夾嗰度，呢間公司叫做「易塔通」，咁呢個喺文章嘅第 2 版我哋睇到喇，第 4 段喇，就係講到嗰啲嘅司機喇，咁佢哋以前喺--咁佢就將佢嗰--咁佢喺 12 月就係去到二十點喇，咁所以佢就特別喺嗰個月就係可以有一個獎金，130 鈺嘅星加坡紙嘅。咁其實有可能有遠程嘅訊息系統去監察嗰啲司機，咁亦都係根據個司機個表現就係有一個獎金㗎，咁如果我哋建議有一個咁嘅制度，咁你覺得你個工會會唔會去支持或者值得我哋去參考，或者去研究下有一個咁樣嘅獎勵計劃？

黎兆聰先生：我想補充，主席，我係九巴分會嘅代表。我想講畀主席聽，我哋呢間公司一路以來冇重視我哋呢個崗位嘅薪酬福利，直至到呢個意外，早幾日先至開始皇恩浩蕩，開始醒覺，先至畀咗十樣嘢畀我哋。我由開始喺呢間公司做咗十八年，整個過程係好唔愉快嘅，係又冇一個友善或者係一個重視呢個員工一個薪酬方案令佢對呢間公司有歸屬感，第一。

我喺呢間公司做咗十八年，頭八年都要簽約嘅，我只係投閒置散，一個好虛銜嘅工作，而誘因點解工會一路以來要爭取安全獎、服務獎要撥落個底薪？呢個係我個人堅持，我同管理層講過好多次，因為呢個安全獎、服務獎嘅基--嗰個獎金係會扣除我哋嘅，因為我哋有啲新入職嘅車長，佢哋如果經驗唔夠，佢一扣--舉例講，嗰陣時係得 1,200 鈺呢個安全獎，係會扣晒我哋嘅。所以呢個獎金係導致好多問題，工會一路以來都有爭取，不過公司就同我哋講，安全獎、服務獎呢個基數好大，一講緊係數以千計，所以直至到呢個意外發生之前，佢可能亦都想--某一啲人亦都想回應工會嘅訴求，安全獎、服務獎先至撥落個底薪。

但係我要強調，希望主席明白，唔好察覺到話冇咗安全獎、服務獎，就會令致到我哋啲車長亂咁嚟，我哋一個專業車長，相信作為一個駕駛者，佢對自己如果犯錯，係要負上刑責，但係安全獎、服務獎呢個制度恆之以久，佢已經用咗好多年，亦都好唔平等。因為我工會收納好多新人，尤其是未揸過巴士，可能頭半年至一年可能佢會唔夠經驗，賠錢畀對方，又會畀公司扣呢啲獎金，從而冇個穩定收入。工會睇到呢個方法咁多年來都存在問題，希望唔好佢令一個獎金而扣取咗我哋，係影響到我哋一個月嘅收入，哪怕今日呢個月好好彩，冇發生交通意外，可能下個月兩、三單交通意外，扣嘅錢可能扣咗成個月，可能令到佢嘅收入真係會大減。

黃女士：（經傳譯員）呢個唔係講緊扣減喎，講緊就係加畀你，而家就係話一個獎勵，就話喺你嗰個底薪之外，如果你係揸車揸得好，你就會係有一個額外嘅獎金，呢個就係我嘅提議，唔係話...

黎兆聰先生：哦，你呢個係講緊bonus吖嘛，九巴，冇，冇呢個制度。

黃女士：（經傳譯員）我唔係話你而家有冇，如果我哋話建議有一個類似咁嘅獎金嘅制度，你會唔會支持？

張子琦先生：主席，任何有獎勵嘅制度我哋都會支持，但係而家九--我哋同九巴已經傾緊一個另外一個獎勵嘅制度，就係有二十個point，每年加一個point畀佢，即係話如果佢達到公司嘅要求，佢就每年都會有錢再加畀佢，就另外嘅，就唔係一個加薪嗰個幅度，咁以前呢個係冇㗎，月薪係冇，日薪就有。咁佢口頭上已經應承咗㗎喇，可以有二十個，咁呢個係根據佢嘅表現喇、佢嘅安全駕駛喇、佢嘅出勤紀錄喇、佢嘅紀律喇，如果佢達唔到，佢嗰年就冇得升。呢個已經係一個--形式上差唔多係一個獎勵嘅制度嚟㗎喇。咁希望--當然喇，如果有其他嘅獎勵，我哋係歡迎㗎。

林寶強先生：我想補充少少，咁懲罰性係一個唔係恰當去監察司機嘅嘢，如果個司機嘅車長有乜嘢做得唔好，用個培訓制度令佢去走番一個好嘅駕駛良好嘅態度、安全嘅服務，係一個重要性㗎。如果你話畀個獎金落去係幫助佢--點講呢？即係會扣減之中，令到佢壓力仲更加大，如果你話特定咗有個獎金喺度，我要爭取呢個獎金，一有個意外喺度，令佢都冇心機去繼續去駕駛嘅。好似正如我哋大嶼山都係，安全獎，佢扣一扣，扣兩期㗎，好多時扣兩期，扣兩期就幾千蚊，已經對於個家庭生活影響嘅，係。唔該，主席。

黃女士：（經傳譯員）主席，我已經係完成咗我個提問㗎喇。

主席：（經傳譯員）唔該晒。

歐陽先生：（經傳譯員）多謝主席，我有一個問題，關於我哋有個保護罩㗎，今朝早有提到，似乎呢度嘅幾位就唔係都好--唔多支持呢個保護罩嘅呢個嘅睇法嘅，你唔支持係因為可能嗰個材料唔好，或者有啲聲響，或者有反光，或者你根本其實係有一個保護罩呢個咁嘅建議你都覺得唔好嘅？唔該晒。

黎兆聰先生：唔係話唔好，而係個保護罩出咗嚟，係的而且確車長反映，佢係有個感覺到獨立咗呢個駕駛呢個工作環境，但係衍生嘅問題，嗰個保護嗰個--嗰塊膠同埋衍生有啲問題，而家管理層係冇解決到，從而令到我哋駕駛分咗心同埋有衍生到有啲問題會可能嚴重咗，我哋係希望佢改善呢塊膠板。呢塊膠板係衍生--第一，我都講咗，今朝講咗喇，有反光嘅情況同埋佢最尖頭嗰個位個攝石攝得唔實會發出聲響，同埋開關一個問題，同埋我哋有啲工友質疑，就係話就算呢塊膠膜雖然係弧拱形嘅膠膜，但係要襲擊，一樣襲擊到嘅。但係車長係反映話係感覺到就有一個保護罩嘅工作環境，但係對呢塊板就不敢恭維喇。

因為反映過好多次，管理層只係話唔拆得呢塊政治板，但係我哋傾向性好

多工友都希望拆咗佢，因為呢塊板衍生好多問題。第一，就係安全問題，夜晚會反光，同埋一個高度--個車長一個高度唔--可能--而視覺上佢彎，佢睇落個視線會畀個彎度遮咗追車上嚟嘅情況係好嚴重；第二，就係呢個板會發出聲響，咁亦都係一個問題，到而家都未解決得到。

歐陽先生：（經傳譯員）咁你支唔支持如果管理層係用一種保護罩係唔會有任何駕駛嘅危險嘅，你會唔會支持？

黎兆聰先生：支持嘅，我哋之前有畀過啲圖，有譬如韓國，佢都有一啲完全係一個獨立嘅門，係玻璃窗，兩個可以--好細嘅，可以開關嘅，我哋畀過啲圖佢睇過嘅，有參考外國嘅圖畀佢嘅，不過我覺得佢自己諗呢個方法，半月彎嘅保護裝置，可能衍生嘅問題佢真係可能冇諗過咁細緻，衍生咁多問題出嚟，而係淨係答我哋話「呢個係政治板，唔拆得」。

主席：（經傳譯員）林生，大嶼山巴士係咪都有十四個鐘嗰種特別更？

林寶強先生：有嘅。

主席：（經傳譯員）咁司機喺返呢啲更嘅時候，有冇畀三個鐘以上嘅休息時間佢哋㗎？

林寶強先生：有。

主席：（經傳譯員）咁如果司機去到嗰日嗰個鐘數要休息喇，會有咩嘢設施提供畀司機喺當地--即係嗰處都休息？

林寶強先生：暫時都冇，最多喺架巴士度--有啲巴士可以畀佢哋啲㗎咋。

主席：（經傳譯員）即係冇設施嘅？

林寶強先生：暫時未有。

主席：（經傳譯員）係即係會喺邊度？係咪喺巴士總站嗰度吖，喺番個廠嗰度吖，有幾多地方大家可以去休息嘅？

林寶強先生：佢哋會喺街或者商場去啲嘅，如果近屋企就會返屋企嘅。

主席：（經傳譯員）你答唔答到即係有幾多巴士車長到休息嘅時間，有幾多可以返到屋企？

林寶強先生：冇知道嘅呢個，唔--有一半嘍，應該係，即係要做呢啲更嘅，一半都有嘅，約莫一半喇。

主席：（經傳譯員）你自己有冇返特別更？

林寶強先生：之前有，之前有，但係我都係返屋企嘅。

主席：（經傳譯員）唔該。你已經估計到我跟住問你咩嘢喇。黃大律師，運輸署提供

畀我哋嘅資料就係運輸署之前提交畀立法會嘅交通事務委員會嘅一個資料文件喇，可唔可以放上去呢一個嘅螢幕嗰度？

黃女士：（經傳譯員）就係TD1-403頁嘅。

主席：（經傳譯員）咁立法會嗰個嘅資料文件？

黃女士：（經傳譯員）403頁，TD1-403頁。

主席：（經傳譯員）英文？呢個資料文件係咪英文嘅？

黃女士：（經傳譯員）係。

主席：（經傳譯員）陳先生（張先生？），呢份文件就喺7月25號喺立法會曾經討論過嘅，就係交通事務委員會討論過，處理兩個問題喇，其中一個--其中三個問題，一個就培訓喇，同埋安全帶喇，同埋係有啲乜--即係用科技去提高安全嘅。咁就有一個工作小組，係由運輸署成立嘅，成員就有專營巴士公司同埋有三間巴士廠，喺3月中嘅時候就開過會，咁呢份文件就係講番工作小組嘅成果。就呢三個問題有冇問過你意見？

張子琦先生：冇嘅，主席。

主席：（經傳譯員）你有冇機會睇過呢份文件，睇下佢哋提議點樣做，你有冇提過㗎？

張子琦先生：主席，我未睇過呢份文件，今日先係第一次。

主席：（經傳譯員）陳先生（張先生？），你頭先咁答喇，咁我就諗喇，喺我再問你問題之前，應該咁樣公道啲，應該畀你睇咗呢份文份文件先，咁然後你可以考慮下再回答番我問嘅問題。我而家建議--因為我哋仲有其他嘅工會嘅代表都好耐心等候嚟畀證供，我就建議而家先中途就請佢哋畀證供，到你表示你可以睇完喇，回答到問題喇，再請番你過番嚟，好唔好？你會唔會同？

張子琦先生：冇問題嘅。

主席：（經傳譯員）好，咁而家請你離席，我哋而家就休息一陣，我哋換人，先處理職工盟嗰個代表，而家休息一陣。

下午3時25分聆訊押後

下午3時35分恢復聆訊

出席人士如前。

主席：（經傳譯員）鍾先生同埋其他各位，我哋多謝巴士業職工會聯盟就係接受我哋嘅邀請，今日就係嚟到我哋委員會嗰度作供嘅，我就會請黃大律師就會去提問嘅。我哋解釋一下，如果--鍾先生，或者想你哋其中一個嘅成員去作答嘅時候，就可以咁樣指出，你哋可以隨便去提交你意見。

黃女士：（經傳譯員）多謝你鍾先生同埋咁多位今日出席嘅。我哋就已經係有你哋嘅陳述書，委員會就主要嗰個職責就係寫落去職能範圍嗰度就係提意見關於專營巴士嘅安全方面嘅，所以我嗰個問題就係同安全有關嘅，而唔係同其他嘅譬如話嗰個受聘、招職等等有關嘅問題嘅。我第一個問題就係睇一睇嗰個背景，關於你個聯盟嘅背景。鍾先生，我知道巴士業職工會聯盟就係有三個嘅成員嘅，啱唔啱㗎？

林錦標先生：啱。

黃女士：（經傳譯員）首先就係九巴、新世界第一巴士公司同埋成巴有限公司嘅，啱唔啱呀？

林錦標先生：係，啱。

黃女士：（經傳譯員）你哋個聯盟而家有一千六百六十個會員嘅，啱唔啱呀？

林錦標先生：啱。

黃女士：（經傳譯員）呢啲嘅所有嘅會員係咪全部都係巴士司機嚟㗎？

林錦標先生：唔係，有前線車長、站長、車房嘅員工，都係响前線工作嘅伙記嚟嘅。

主席：（經傳譯員）係，有幾多個係車長呢？

林錦標先生：超過九成。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）鍾先生，你哋嘅聯盟就係有提交過兩份陳述書嘅，第一份就係2018年4月24號，就喺TU 文件夾就147至到226頁嘅，中文版本，英文版226-1 就係至 226-80 嘅。你有第二份陳述書嘅，就係就番委員會嘅一封信件，呢個補充嘅文件就係 TU-1B 260-28 就去到 260-67 嘅，喺呢個畫面上面你睇到㗎喇，英文版本就係 TU-1B 文件夾 260-68 去到 103 嘅。

鍾先生，我就想睇一睇你個陳情書裏面提出嗰啲課題，我哋逐個逐個睇，第一個嘅就係關於違泊方面嘅，違例泊車，喺 234 至 236 頁嗰度就係有關呢一方面嘅，呢個係附件二，上高係有一啲電郵，就係關於違泊嗰方面嘅，就係一啲來來回回嘅電郵，你提供畀委員會嘅，你就特別提到就南昌街嘅情況同埋其他一啲街道嘅情況，喺你哋最近嘅陳述書...

林錦標先生：律師，唔好意思，我想問一問，你係叫鍾生答定係林生答呢？因為鍾生係...

黃女士：（經傳譯員）鍾先生，或者你話畀我聽邊一位你哋嘅代表係最適合去答呢一方面嘅問題，特別係違泊嗰方面，邊位最合適呢？

林錦標先生：律師，因為我係代主席嚟嘅，就因為你講鍾生就係我嘅副手嚟嘅，而家我就代表聯盟就搵劉先生解答你呢個問題。劉生。

劉啟謙先生：係。

黃女士：（經傳譯員）唔該晒。劉生，就附件二你提交畀委員會，呢度就係裏面係同運輸署之間嘅一啲電郵來往，係特別係投訴關於違例泊車嘅，喺第 235 頁，你就附上咗一啲相片嘅，就展示到嗰個違泊嘅問題嘅情況嘅。我哋睇到最後嗰度下低嗰度就係話運輸署就係收到呢啲電郵，你就話「我哋嘅分區嘅辦事處嘅同事就會係跟進嘅」，我個問題就係話運輸署有冇跟進到呢？同埋有冇喺南昌街呢個違泊嘅情況改善到呢？

劉啟謙先生：我哋一直由 2017 年嘅 5 月開始同運輸署就南昌街嗰個違例泊車就進行投訴，直到去到 2018 年大約係上兩個月嘅，我哋先收到運輸署最終嘅回覆，就話嗰度已經改善咗同埋加多咗一個巴士站嘅 marking 喺上面，就防止啲車輛喺上面違泊，但係其實成個過程我哋係用咗好長嘅時間同警方溝通，亦都因為呢個違泊嘅問題，喺上址係發生咗一個車長畀人襲擊嘅事件，我哋喺呢個事件之後，我哋即時去信畀運房局嘅常務秘書長黎先生，相關去信嘅喺我哋 supplementary paper 嘅附件係有附件呢封信件嘅。同時間其實我哋一直以嚟都係有追運輸署喺上址進行改善嘅工作，但係其實運輸署都係好緩慢同埋都係用一個唔想處理嘅態度去進行呢個 case 嘅處理。

黃女士：（經傳譯員）係，唔該。所以我哋睇一睇第一個陳述書關於違泊嘅，喺中文就係 176 頁嘅，喺英文係 226-30，括弧--括號嘅。喺呢一頁，我哋見到你嘅建議，又或者咁講，你係簡述番就住違泊嘅問題你哋做咗啲乜嘢嘅，我哋見到喺英文版本就係咁講嘅，就話你哋寫過畀運輸署嘅，「喺 2017 年 5 月嘅時候去信運輸署要求安排警員加強執法工作之外，可以嘗試透過其他可行措施去防止巴士站被違例泊車阻礙。當中建議喺上址設立二十四小時禁區、延長巴士站路面標誌，以及加設鐵欄杆去減少車輛喺上址違泊同埋防止巴士站受到其他車輛阻礙。經過多次嘅溝通之後，運輸署以附近有上、落貨嘅需要為由，最終只係安排加設欄杆，但係由於運輸署對於上址嘅問題未有正視，最終喺 2017 年 8 月喺上址巴士站發生車長被襲嘅事件，被襲嘅原因係車長正係駛過一架違例泊車嘅私家車，而畀人誤會『飛站』而被襲嘅。呢件事件正係因為巴士站畀違例泊車阻礙而引起嘅。」你就話「如果運輸署重視本聯盟嘅建議，及早安排相關嘅道路標誌設置工作，相信呢次事件係可以避免。」

你最近嘅第二份嘅書面嘅陳詞，即係第 260-89 至 90 頁，呢一個就係英文版嚟嘅，中文版就係 260-53 頁，你進一步回應係咁講嘅，就係(d)段，就話

「運輸署主要回覆係轉交所屬地區嘅運輸主任作出跟進，同時轉交警方採取相應行動。同時，就個別地區，如本聯盟所指嘅南昌街等不但作出口頭質詢，同時亦有透過同運輸署保持溝通以跟進嘅。」「就住違泊問題，本聯盟同警方會議亦都有表達關注同埋要求喺各個黑點加強執法。」跟住就話「雖然警方喺唔同嘅會議亦都有口頭承諾表示會加強執法，亦都有指違泊嘅檢控數字有所增加，但係有啲違泊嘅黑點，譬如係旺角嘅新填地街、英皇道、怡和街同埋荃灣橫龍街就未見有太大改善。」

你跟住有一個附件，就係一張黑點嘅清單，係交咗畀警方嘅，就顯示你哋曾經叫過警方去跟進各個黑點，我相信呢個就係叫做附件十四嗰度嘅，喺你封信，係2017年嘅3月26同埋27日，呢個就係喺260-462又或者係260-468-1頁。如果睇番呢封信，呢封信係寫畀運輸署長嘅，喺260-468-2頁，你呢度喺260-468-5，就關於港島區、新界同埋九龍嘅黑點嘅名單，我個問題係自此，呢兩封信之後有冇跟進過呢？

劉啟謙先生：我哋兩--呢兩封信之後，我哋喺恆常同運輸署同埋警方嘅跨部門會議裏面，每一次都有就違例泊車嘅問題反映嘅，而其實相關我哋同運輸署反映嘅內容其實係可以從我哋提交嘅會議紀錄裏面係見得到嘅，而跟進違例泊車嘅問題，我哋唔係話單一次去做，而係一個叫做可持續性嘅工作嚟嘅，即係我哋唔會可能係話就一個地點講完就唔會有任何跟進行動，而我哋同運輸署一直係跟進住每一個黑點嘅問題，或者呢啲黑點可能係自交呢個黑名單之後可能後面有增加或者有啲地方係改善嘅，但係喺我哋過去由呢個17年嘅3月直到今日我哋唔見得太多嘅地點係有改善，而呢啲嘅跟進其實都係一直以嚟係有做嘅。

主席：（經傳譯員）你覺得要處理違泊問題，因為引起專營巴士嘅問題，你覺得應該點樣處理？

劉啟謙先生：第一，最重要係警方執法，我哋好多時遇到嘅問題係見到違例泊車係阻礙，我哋嘗試--車長會報警去處理，但係警方其實多次都係有用警區人手不足呢個理由就話佢哋處理唔到。其實喺過往我哋嘅抗議行動裏面，我哋有建議過增加交通督導員嗰個嘅數量嘅，因為其實我哋了解到有啲繁忙嘅區域，好似油尖旺區，交通督導員嗰個比例係異常地少嘅，其實警方有能力去請到交通督導員去進行呢啲交通嘅執法行動，其實我哋最認為係違例泊車係佢真係違例，而最有效嘅方法其實就係檢控呢個違例泊車，同埋運輸署係應承咗我哋會喺某一啲地區係劃番嗰個巴士站嗰個標誌，因為巴士站標誌喺法律上係有嗰個效力喺度嘅，私家車係唔可以阻礙我哋埋站。

其次，我哋亦都有就唔同嘅地點係要求佢畫雙黃線，除咗南昌街之外，我哋沙田火炭區亦都留意嗰個情況好嚴重，都有去信去要求佢去畫雙黃線嘅，我哋其實覺得現行嘅法例係有足夠嘅空間去保障我哋巴士車長係唔受違泊嘅阻礙，但係何奈我哋覺得執法係有疏忽同埋粗疏嘅地方。多謝。

主席：（經傳譯員）雙黃線喺中環都周圍有，但係都阻礙唔到違例泊車喎？

劉啟謙先生：係，冇錯，因為警方執法上面同我哋講話人手唔夠，佢哋好困難去執法，其實我哋嘅角色係非常之被動嘅，其實好倚賴政府去派人去執法，但係其實咁耐以嚟，由17年去到而家，其實我哋見到嗰個執法，雖然警方話嗰個數字係有上升，但係我哋見唔到有好大嘅改善。

主席：（經傳譯員）用視像鏡頭去執法呢？即係閉路電視。

劉啟謙先生：我哋同意，我哋相信差人嘅人手始終係有限，冇可能派大量嘅警察淨係專注做違泊呢一項工作，呢一樣嘢亦都係唔合理嘅。我哋相信其實科技係有助去執法，我哋其實留意到警方其實近年都開始嘗試去用一啲科技，例如CCTV呢啲方式去執法，其實我哋係支持嘅，因為警方未必有足夠人手，但係CCTV執法的確係有嗰個阻嚇性喺度，即係between呢個懲罰，其實阻嚇性係比懲罰係更重要，你有罰佢，但係如果你阻嚇咗佢，其實比起懲罰係更加好嘅。

其實違例泊車嘅人士其實都知警方都未必會長時間喺某一個地點嗰度巡邏同埋進行檢控，換句話說，其實佢哋違例泊車個成本其實唔高嘅，但係當然引入咗閉路電視或者相類近嘅科技去執法嘅時候，佢哋變相就會知道有一個警剔性同埋阻嚇性喺度，對比起懲罰係更加有效嘅。

主席：（經傳譯員）喺車前，即係巴士前安裝視像鏡頭去拍攝違泊嘅問題，你點睇呀？

劉啟謙先生：正如我哋補充文件嗰度亦都有提過，現時巴士嘅裏面嘅鏡頭其實有分幾種嘅，以最新型嘅巴士為例係有八個嘅鏡頭，分別係拍到車廂入面嘅位置同埋車外面嘅位置，而巴士公司亦都指出呢個鏡頭嘅片段係用作事故調查之用嘅。當然我哋明白改用呢個嘅片段去執法呢係--警方如果要取嗰個片段去執法，其實係可以嘅。亦都要留意番嗰個法例上面嘅要求同相關係咪可以咁樣做，因為有機會係牽涉亦都涉及呢個《私隱條例》，因為部分嘅鏡頭係拍到車廂裏面嘅情況。當然如果用於執法，係法例係有保障，但係呢個問題，我覺得要小心處理。但係前設係我哋係同意係用呢個方法去進行呢個執法嘅。

主席：（經傳譯員）我唔係問緊你嗰個巴士入面嘅閉路電視，我係講緊影出去，向前方嘅鏡頭，係可以影到巴士嘅車長佢哋揸埋去巴士站嘅時候，如果有違泊車輛嘅時候，係可以影到，你點睇？

劉啟謙先生：同意。

主席：（經傳譯員）如果巴士司機協助執法，你又點睇呢？譬如話--譬如用電子方式，佢哋可以捕捉到某一個犯法嘅情況，違泊嘅情況，佢捕捉個畫面，返到個車廠嘅時候，有人可以睇番呢個閉路電視，因為嗰度係記錄咗個時間，就可以執法，咁樣你點睇呀？

鍾松輝先生：唔好意思，我姓鍾，我想補充喺呢個問題。

黃女士：Thank you.

鍾松輝先生：因為如果你話巴士嗰個鏡頭去執法，因為架車返到廠，公司唔知㗎嘛，一定要我哋寫報告，寫報告畀公司，時段、日期，佢先去搵人去攞嗰個晶片，但係問題起碼隔兩、三日㗎喇，因為一來一回嗰啲文件，可能嗰個效果就未必咁好嘅，即係未必做得到喺呢一方面。同埋你巴士，因為你係--就算你埋站都好，因為你係行緊㗎嘛，咁你影--就算你影到架車，嗰架車究竟係行緊定係停喺度喺嗰個鏡頭嗰度係反映唔到出嚟嘅，所以我覺得係有困難，喺呢一方面。

主席：（經傳譯員）你覺得我哋作為亞洲嘅先進嘅城市，其實可唔可以安裝喺架巴士度有個鏡頭，就咁撳粒掣就可以記錄番嗰個時間，然後就等嗰個人決定--睇番嗰個人去決定到底嗰架車係咪靜止嘅呢？即係同唔同意咁樣有粒掣去記錄個時間？

鍾松輝先生：我同意嘅，但係如果嗰個技術可行嘅，我哋係同意嘅。我亦都想補充點解我哋個聯盟咁重視嗰個巴士站違例泊車呢？最主要即係話而家近呢十年、八年，即係有啲低地台嘅巴士，因為低地台巴士就係要服務嗰啲輪倚嘅乘客，如果你個巴士站違例泊車，變咗就會導致我哋埋唔到站去服務嗰啲坐輪椅嘅乘客，亦都導致到嗰個安全問題，所以我哋比較重視--點解我哋重視巴士站違泊，主要嘅原因就係隨時都有輪椅客嘅，變咗我哋埋唔到站，就會構成危險。

主席：（經傳譯員）個問題係咁嘅，巴士嘅車長可唔可以被指派去幫手執法，去減輕呢個問題呢？即係話撳一粒掣，就可以捕捉到嗰個違泊嗰個情況係幾點鐘發生嘅，利用巴士車長協助執法。

劉啟謙先生：如果有呢個技術係引入到，我哋當然係非常之樂意，因為其實我哋巴士車長本身都係受違例泊車影響嘅一群，如果係有呢一個科技係可以協助到執法嘅，我哋當然係支持。其實本身巴士車長喺 230A 呢個《公共服務巴士條例》底下，其實可以賦予嘅權力係有足夠嘅權力嘅。如果要用呢個方法去執法，其實裏面又牽涉到可能法例同埋巴士公司以至運輸署嗰個睇法嘅，我覺得呢樣嘢係可以值得去畀番巴士公司同埋運輸署去考慮同研究嘅，作為車長，當然我哋--如果係有呢個科技去協助警察執法，我哋當然係支持，有粒掣撳到佢捕捉到佢嗰個動態，但係我哋相信話牽涉第一就科技嘅問題，第二就係可能其他政府部門以至巴士公司佢哋同唔同意同埋涉及嘅技術層面，我覺得係可以值得去研究嘅。

主席：（經傳譯員）黃大律師。

黃女士：（經傳譯員）呢個係一個課題係就係一個聯盟係提出嘅，就用--參考新加坡嘅情況，2018 年 4 月 30 號就係 Miscellaneous 第 2 個文件夾 644 中文，係英文就係 644-2 版嘅，如果睇番建議一，新加坡嘅情況，係安裝鏡頭就係喺司機位嘅側邊，呢個 2008 年已經開始咗㗎喇。司機要做嘅嘢就係撳個掣，就將個影片交畀警方，而警方就會係畀個罰款畀嗰個違例者嘅，又要罰款或者特別嘅罰款等等，呢個係其中一個聯盟提議嘅建議，就係參考新加坡嘅做法。你會唔會支持呢個建議呢，就係咁樣去執法呢？

林錦標先生：支持嘅。

黃女士：（經傳譯員）另外一個我想討論嘅問題就係特別更次，特別更次嘅問題，首先我哋睇番你嘅陳述書第 167 頁，呢個係中文版，喺英文版 226-21，你特別提到特別更，就新嘅指引就係話有特別更，佢哋需要有三個小時嘅連續嘅休息時間，你就話--第 167 頁中文版，呢個英文版 226-20，呢度就講，就唔係所有嘅巴士嘅車長都係佢哋喺屋企附近嘅，佢即使有三個鐘嘅休息時間，就好難去搵到一個適合嘅休息嘅地點，令到佢工作疲勞嗰樣嘢，亦都會肯定會影響個駕駛安全嘅，對安全嘅影響不言而喻。

喺 226-21 嗰度，英文版，係下底嗰一段，係中文版仍然都係 167 頁嘅，喺下面，你就話「九巴設有特別更嘅，而特別更嘅休息時間係無薪嘅，巴士公司以所謂嘅津貼代替薪金，此舉對特別更嘅車長係十分之不公平嘅，而運輸署對呢一方面就冇任何嘅立場或者意見，首席運輸主任更喺會面上稱運輸署冇能力監察巴士公司設立特別更。」

你嘅陳述書，我相信就係話唔同意就係一個好長嘅--有長嘅工作時間，你嘅陳述書裏面，你一直都喺度講緊就係將呢一個工作時間係由十四個小時減到十二個小時，呢個係咪你哋立場呀？

林錦標先生：呢個係我哋嘅立場嚟嘅。

黃女士：（經傳譯員）點解你會建議有一個咁樣嘅立場或者點解會有咁嘅立場呢？

林錦標先生：我搵劉生答你呢個問題。

黃女士：Thank you.

劉啟謙先生：其實第一，我哋參考咗類近普通法地區嘅工時嘅情況，我哋發現英國、歐盟、南韓同埋呢個新加坡嗰個工時都唔會話有特別更去到十四小時，其實相關嘅資料我哋已經交咗畀委員會參考，係喺我哋 supplementary paper 嘅附件九嗰度，同埋呢個附件十都有相關嘅資料交咗上嚟。當然十四個鐘其實嗰個工時講緊係好長，車長喺兩個更次之間講緊係得十個小時嘅休息，顯然大家可以試想像一下，車長落咗班，仲要來回返屋企，沖涼作息，其實實際作息嘅時間究竟有冇六至七個鐘，我哋根本睇到係唔夠。

駕駛一架巴士其實需要好大嘅專注能力，其次就係巴士司機兼顧嘅嘢係乘客、路面情況、種種都要兼顧住，其實比起駕駛一架普通嘅車係傷神嘅，顯然十四個鐘裏面，一個更次其實個休息時間係唔夠，嗰十個鐘，你睇咗其他普通法地區同埋香港相類近嘅城市，都係冇十四個鐘呢一個情況出現，對比起歐盟，甚至乎新加坡，嗰個工時其實係長嘅。餘下我哋睇下鍾生有冇補充。

鍾松輝先生：好呀，我補充少少，我哋點解會反對十四小時嘅特別更呢？第一，運輸署咁耐以嚟，嗰個巴士車長指引從來冇特別更嘅，係今次佢為咗遷就巴士公司，所以佢就同我哋講正常嘅班次就縮減到十二小時，但係佢又加咗一個所謂

特別更就十四小時，十四小時，佢仲好強調個指引講到明中段有唔少於三小時休息，但係呢唔少於三小時休息，但係佢就--即係運輸署佢就唔會負責呢三個小時究竟有冇薪酬，如果照運輸署呢個指引，唔少於三小時休息，其實一個極端嘅例子，佢可以畀六小時你休息，係咪呀？咪畀八個鐘頭人工你囉，畀六小時你休息，冇人工囉，但係你嘅時間就用咗十四小時，呢個係極端例子嚟嘅。即係意思話巴士公司就住呢個運輸署呢一個所謂車長指引，佢可以做到呢一點。

其實，第一，就係剝削緊我哋啲前線員工；第二，就更加令到嗰個車長疲勞，正如我哋個建議書有講，我哋冇時間--即係冇地方畀我哋休息。即係好似過街老鼠咁，你叫啲車長何來會可以喺嗰個所謂休息時間可以補充到體力呢？所以呢個第一點。

第二點，大家可以計一計個時間，十四小時，其實個車長得番十小時，十小時，如果佢住嘅地點稍為遠啲嘅，佢來回嗰個返工、放工時間，我哋保守估計，你去--譬如你返新界盛，個零鐘頭閒閒地，我當佢用咗兩個半鐘頭嗰個返工、放工用嘅時間，好喇，朝頭早起身佢洗面刷牙起碼要半個鐘頭，返到屋企食飯、沖涼，其實佢得五個幾鐘頭嘅咋，五個幾鐘頭，佢係咪一瞓落床即刻瞓得著呢？其實大家可以計得到究竟個車長夠唔夠時間充分去休息。所以我哋係非常之反對呢個特別更嘅班次。

主席：（經傳譯員）黃大律師，我哋有冇--城巴有冇畀我哋嘅陳述書？就話佢哋話就係以時鐘去計呢一個嘅巴士車長嘅工資，就唔係話用嗰啲獎金、津貼等等，呢個係城巴。

黃女士：Yes.

主席：（經傳譯員）九巴喺呢方面嘅立場又係點樣樣呢？

黃女士：（經傳譯員）九巴嘅立場，就我所知，就因為有罷工同埋有好多人反對，佢哋就會--就諗下關於呢個特別更次嘅情況。

主席：（經傳譯員）但係而家個問題就係其實佢哋會唔會用--就係用時鐘去計，即係用每小時去計還是就係減低佢哋嗰個津貼呢？

黃女士：（經傳譯員）我諗我要睇一睇，我要再搵啲資料先得。

主席：Thank you.

黃女士：（經傳譯員）鍾先生，我哋就有另外一個協會，就巴士業職工會聯盟...

主席：（經傳譯員）對唔住，呢個就係佢哋喇。

黃女士：（經傳譯員）我哋另外一個工會話畀我哋聽--汽車交通運輸業總工會話畀我哋聽，佢哋嘅陳述書同埋口頭證供我哋就聽取咗，佢哋都係有五個分會嘅，同埋有車長嘅成員嘅，佢哋支持特別更次；第二點，其實就唔係好多人係做呢個

特別更嘅啫；而第三，如果減低咗特別更次嘅說話，就係需要聘用更多嘅車長，就會令到佢哋嘅車長嘅工資係減低咗 5,000 蚊嘅。所以佢哋就提出咗三個理由支持呢個十四小時嘅特別更嘅。你對佢哋嘅講法有咩嘢嘅--點樣睇呢？

鍾松輝先生：我嘅睇法就係咁嘅，而家我哋係講緊--探討緊巴士嘅安全問題，呢個係最重要嘅，正話我所提出如果特別更十四小時，即係普通常識，你識計數，都知道嗰個車長根本就係唔夠時間休息嘅，好容易導致呢個疲勞駕駛，呢個第一點。所以如果根據呢個安全--以安全著想，就唔應該有十四小時嘅特別更，呢個係第一點。

第二點，你話至於話因為少咗呢個特別更，假如取消個特別更，個收入又會少咗，呢個就係一個循環嚟嘅，點解會少咗收入，點解要做多幾個鐘頭去爭取多啲收入呢？主要就係因為我哋薪酬低，薪酬低，我哋先要做多幾個鐘，有啲同事要做多幾個鐘，如果你薪酬能夠以運輸業即係政府統計嗰個，即係新入職嗰啲，有個中位數畀佢，就我相信啲同事唔想做咁多嘅，如果佢薪酬係夠的話。

而家中嗰個--據我了解，如果我冇記錯，而家個中位數已經係一萬八千幾嘅，但係而家巴士公司新入職嗰啲同事都係一萬五千幾，其實我哋因為薪酬偏低，所以啲同事因為負擔重，所以先會做多幾個鐘，如果以呢個邏輯，咪返十六個鐘咪仲賺多啲囉，係咪？冇可能嘅事嚟嘅，唔可以用時間--即係唔可以話揸多啲時間就去賺取微薄嘅薪酬，係應該提高個薪酬，令到減少嗰個疲勞駕駛，呢個第一點。

第二點，正話講咗特別更嗰個中間--中段嗰個休息時間，即係用呢個所謂津貼，呢個唔係巴士公司嘅問題，呢個係運輸署嘅問題，運輸署既然提供得--出得呢一個巴士車長呢個工作指引，佢就有責任去保障我哋嘅薪酬，就唔應該將個責任就推落去勞資關係嗰度嘅。如果係咁，你運輸署就唔應該出呢個特別更，即係我覺得運輸署係非常之不負責任。

黃女士：（經傳譯員）我想講番之前主席問嘅一個問題，就係九巴係咪會畀一個時薪，即係斷時計嘅津貼，就譬如喺特別更過往都有畀過津貼嘅，而家請你睇番有關呢個文件冊，就係九巴嘅 KMB-1 第 111 頁，如果你睇番舊嘅每日嘅計法，就係(H)嗰項嘅，就係特別更嘅津貼，我哋可以見到喺 2018 年 3 月 1 號之前舊嘅津貼就係$21.90，新嘅就寫住話冇改變嘅。如果睇番表 2，每月嘅金額，喺 109 頁，我哋可以見到喺(E)嗰一項，就係特別更嘅津貼或者係分更嘅津貼，就係$1,951.50 嘅，無論喺 2004 年之前入職或者之後入職。喺 2018 年 3 月 1 號開始計，嗰個金額都係冇改變嘅，所以問下你，呢一個分更嘅津貼，斷時計嘅，對九巴嚟講，係咪維持不變呀，喺 2018 年 3 月 1 號之後？

林錦標先生：我搵番九巴嗰個代表答你。

黃女士：Thank you.

郭偉光先生：好簡單咁答，$21.90 嗰個係每個鐘頭嘅，但係如果正常嘅工資應該係 116 蚊一個鐘嘅，佢嗰個相距嘅工資係好誇張嘅。

主席：（經傳譯員）即係時薪計嘅話，應該係五倍以上，如果係當人工計？

郭偉光先生：同意。

黃女士：（經傳譯員）所以喺你第 226-21 嘅意見書，呢個英文版，中文版就係 166 頁，呢個係 TU 文件冊 1A，你入面就話呢個特別更嘅津貼對於巴士車長嚟講係十分之唔公道嘅，係咪就係咁嘅原因呀？

郭偉光先生：同意。

黃女士：（經傳譯員）跟住講番個相關嘅議題，你喺意見書就話巴士公司就要減低成本，做法就係要減低員工嘅薪酬同埋福利，我而家請你睇番第 158 頁中文版，你嘅意見書，同埋係 226-10 至 226-11 頁嘅部分，中文版 158。你提到就係巴士公司削減薪酬、削減員工福利去壓縮成本，可唔可以解釋下點樣--即係咩嘢意思呢？

林錦標先生：劉生代答。

劉啟謙先生：第一，嗰個薪酬問題正如頭先所講，特別更嗰個唔公平嘅情況，其實我哋係留意到巴士公司利用一啲長嘅工時嘅 duty 去壓縮嗰個人手嘅需求嘅；第二，就係員工福利，其實我哋見到巴士公司利用唔同嘅福利制度，分咗新制同舊制嘅員工，新制同舊制嘅員工嗰個福利其實本身係有差別嘅。縱使有部分巴士公司而家希望係改善嗰個福利，但係我哋見到其實新制同舊制嘅兩個制度員工底下，嗰個福利係有唔同嘅，尤其是新制嘅員工--新入職嘅員工有嗰個員工福利其實係比舊制員工少嘅，呢度可能請鍾生有冇補充？

鍾松輝先生：新制同舊制不論係薪酬，甚至連福利都係新制係比舊制少嘅，如果講話新制員工，而家新入職嗰啲一萬五千幾，舊制就係萬八蚊嘅，至於你話福利，例如我哋舊制就有一個月嘅年終雙糧，新制佢就都有，但係佢嗰個所謂年終獎金，佢要符合佢相關嘅條件，先有嘅。同埋不論睇醫生，我哋舊制嘅員工就每年可以有睇二十次嘅公司醫生，新制得十次嘅啫，即係諸如此類。所以新制同舊制係有個差距嘅，呢個就係睇到巴士公司喺度壓縮緊佢嘅成本，公司成日同我哋講營運困難、賺得好微薄，我唔知佢點為之微薄，我哋覺得佢賺一、兩億佢都話微薄，我唔知佢要賺幾多先為之豐厚咁樣。

黃女士：（經傳譯員）唔該。下一個問題講脫班，你第一封嘅意見書同埋補充嘅意見書都提到「鬼巴士」或者係脫班嘅問題，我而家想請你睇番意見嘅英文頁就係 226-22，就係喺 TU 文件冊，即係中文版嘅 168 頁，第二段，就講到話「脫班原因有好多嘅，譬如係欠缺車長開車、交通阻塞、車輛故障等。脫班嘅問題主要涉及人手、車輛同埋道路三個原因，前兩者係巴士公司需要正視及處理嘅，但係喺呢啲問題上，你就問運輸署有冇做個監管者嘅角色呢？『鬼巴士』實際係基於運輸署嘅定義上有灰色地帶，安排車輛行走幾個站嘅短途班次以填補因

為唔同原因而冇正常開出嘅班次，從而令脫班嘅比率下降。」可唔可以問下你呢一個脫班嘅問題，首先係咪有好多脫班呀，喺九巴嘅情況？

劉啟謙先生：九巴現時脫班嘅 target 係低於 3%，其實有主要係脫班係因為人手唔夠，大致上因為人手嘅問題，所以脫班一定係存在，當然唔係淨止九巴，新巴同埋城巴都係會因為唔同嘅原因而存在脫班呢個問題，就唔係話單獨九巴係面對呢個問題，其實每間巴士公司都係有面對緊呢一個問題嘅。

黃女士：（經傳譯員）你亦都有提到「鬼巴士」嘅呢度，可唔可以再解釋一下「鬼巴士」呀？

劉啟謙先生：現時巴士公司就每一條巴士路線係同呢個運輸署簽訂一個服務詳情表嘅，而服務詳情表係規定咗巴士行車嗰個里數、用車嘅數目同埋嗰個班次嘅，所謂嘅「鬼巴士」，其實巴士理論上應該係由總站 A 直接開到總班 B 為之一個班次，但係可能有部分我哋叫做短途班次，可能去某幾個站，中途開始載，都叫做一個計算一個班次嘅，所以「鬼巴士」可能係臨近總站前某幾站開始載，就當一個班次，咁樣出現去填補一啲係因為唔原因嘅失班嘅，畀傳媒發現之後--當然係畀《東方日報》發現之後，就冠以呢個「鬼巴士」呢個暱稱，其實實際上「鬼巴士」係鑽進咗現時運輸署對班次所定義嘅灰色地帶。

我補充一樣嘢，其實運輸署對巴士公司用車、人手以至嗰個班次，其實從每一條路線嘅服務詳情表裏面係有充分嘅掌握嘅，而呢個服務詳情表都係法例--所以巴士條例規定咗要提交嘅。呢啲文件其實喺運輸署手上係存在住嘅，所以其實運輸署對於每一間巴士公司嘅服務係有充分嘅掌握喺手嘅。

黃女士：（經傳譯員）我問呢個問題就係因為喺你嘅補充意見書入面就提到呢一個脫班係點樣帶嚟安全問題，就呢個係第 260-81，呢個英文版，中文 260-43 至 44 頁，請畀我讀出，喺 260 橫畫--即係英文版 81 頁呢一段，即係 43 頁，就係話「因為係巴士車長就喺工作時間或者駕駛時間休息不足嘅，因為巴士脫班或者專營巴士公司編排行車時間太短，無法應對路面不同車輛狀況，不同於三十分鐘嘅小休或者六十分鐘用膳，巴士公司唔會對十二分鐘嘅休息時間作出特別標示，因此車長未必可以完完全全了解十二分鐘嘅休息時間」，要睇下車輛--「行車時間往往因為路面唔同嘅情況有所增加。而編更嘅時間責任係喺巴士公司身上」，「而本聯盟未有就有關行車時間不足嘅巴士車長更分資料作出統計，但係有關詳情可參考附件八嘅資料。」可唔可以請你解釋一下點解脫班問題會令到車長喺工作或者駕駛時間休息不足呢？

主席：（經傳譯員）據我理解，就係話因為行車時間都係好短，令到巴士車長好快已經去到總站，亦都冇乜足夠時間去休息嘅，而脫班就係--個問題就係--即係意思就係話因為個班次不足嘅問題，所以安全方面最終個問題就係話嗰個行車時間本身太短，咁樣理解啱唔啱呀？

劉啟謙先生：冇錯。第一，我諗分幾個部分去答，黃律師，第一，睇番文件，其實十二分鐘休息時間講緊巴士工作指引(a)項嗰度，規定咗巴士車長每四個小時嘅駕

駛其實係有十二分鐘嘅休息時間，但係呢個十二分鐘嘅時間往往喺巴士公司安排上面係唔會畀車長知嘅，而由於嗰個行車時間不足，正如我哋提交附件八嘅更分資料裏面，其中一個更分其實係預計車長係得三分--到站同開車距離得三分鐘嘅啫，根本就冇足夠嘅時間畀車長去休息。由於香港嘅路面繁忙，車長往往可能遲咗到站，遲咗到站，又有乘客候車，佢哋自然就要繼續去行車，第一，嗰個精神就會繃緊，尤其繁忙時間，就冇咗時間休息。而行車時間上面，呢個等鍾生作答。

鍾松輝先生：有關行車時間，我哋都問過巴士公司，新巴同城巴，亦都問過運輸署，究竟巴士嗰個行車時間係如何制定嘅，原來佢哋就冇一個科學嗰個數據去制定呢個行車時間表嘅，純粹只不過係佢哋話搵架車就去試路，即係去行一次嗰啲新路線，睇下用幾多時間，呢個就係非常之唔科學嘅一個制定呢個行車時間表嘅情況。

我哋就建議畀咗運輸署聽，亦都建議咗畀新巴同城巴聽，我哋覺得制定行車時間表，第一，你要有足夠時間畀啲車長休息；第二，你要有足夠時間畀啲車長喺呢一個道路嗰度唔好超速。往往因為時間唔夠，人就好得意嘅，當你趕嘅時間，你自自然然就會揸快啲嘅，呢個係好自然嘅。

我哋覺得應該有個科學嗰個制定呢個行車時間表，例如，我舉例，你每小時究竟嗰架車每小時係行 40 公里吖平均，係咪呀？你先有個數據吖嘛，因為你市區就 50 公里，法律規定，係咪？如果你個平均嗰個時速，每小時究竟係你係制定 40 公里係啱吖，定係 30 公里啱呢，我覺得呢個第一，就係科學數據；第二點就係話嗰個巴士站嘅數量，你巴士公司每一條路線嘅巴士站，你畀幾多秒鐘啲車長去上、落客，呢個亦都需要時間嘅；第三，你畀幾多時間畀車長休息，亦都可以計算到嘅；第四，就係香港嘅馬路就不同時段都唔同嘅，即係個行車時間，因為有繁忙時間就塞啲，非繁忙時間就冇咁塞，我相信巴士公司係有能力喺呢個黑盒嗰度係攞到呢啲繁唔繁忙時間嗰個情況嘅，加埋呢個所謂塞車時間落去，去制定一個行車時間表，我覺得就起碼有個科學數據。但係我唔知道運輸署會唔會聽我哋意見。

林錦標先生：劉生有個補充。

劉啟謙先生：其實較早前嘅聽證會，程艾樂先生都有提到，巴士公司已經有黑盒 係有實時數據去記錄其實巴士行車嘅相關嘅資料嘅，即係其實巴士公司喺技術上已經係可以完全同埋充分掌握行車嘅時間，但係往往巴士公司安排嗰個行車時間緊張，因為牽涉到用車同埋用人嗰個情況，當然巴士公司希望可以用少一架車、用少一個人，而又可以做到運輸署嘅要求去服務乘客，其實往往變相就巴士車長喺每程車次之間嘅休息時間就被剝削，甚至乎因為行車時間不足，去到有大量乘客候車，而緊接下一個車程，呢啲情況其實都常見嘅。其實我哋覺得有呢啲數據，巴士公司本身手上係有足夠嘅數據去幫助佢制定嗰個時間，亦都可以防止車長--車次之間係過於繃緊嘅，但係牽涉就係因為資源、車、人手。

其次，其實我哋都有問過運輸署嘅，喺17年8月嘅會議上面，我哋都要求咗運輸署就住巴士公司安排行車時間呢啲數據上面要作出監管，但係運輸署表示其實佢哋只係會對嗰個服務詳情表作出審批嘅啫，而服務詳情表嘅內容頭先我已經閒述咗，我呢度唔再多講。

但係基於呢啲資料，其實唔可以從嗰個服務詳情表上面係去睇得出嘅，往往運輸署就做唔好把關嗰個工作，巴士公司就不停咁樣安排呢啲繃緊嘅班次，車長就會非常之辛苦，而呢啲情況，我請許生可以補充，因為許生都經常面對呢啲情況。

許漢傑先生：各位好。城巴，城巴有啲路線我講一個十幾年--操作咗十幾年嘅路線就係N8X，N8X就係通宵車，通宵行走，係由凌晨12點去到第二朝嘅06，朝頭早嘅6點，呢條路線係由柴灣嘅小西灣去到中環嘅港澳碼頭，佢畀嘅時間就係一個鐘。

我先講講我個背景，我個背景係之前我都係做通宵嘅車長，我做咗十幾年，而且我對住N8X呢條路線對咗十幾年，亦都係一樣嘢，就話呢條路線十幾年都係維持一個鐘頭一個車程，如果來回計就兩個鐘，但係一個鐘頭嘅車程裏面，我都有做過呢個N8X，但係一個鐘頭，如果實際嚟講，係做唔到，係超時嘅，係點都會超時，點解超時呢？就係N8X來回嘅站係百一個站，大概，來回計，百一個站。

如果一個車程五十幾、六十個站，一個鐘頭，市民--佢嘅行嘅道路就係行，由柴灣行柴灣道、筲箕灣道、英皇道、軒尼軒道、金鐘道、德輔道中去到港澳碼頭，呢條路線係由東區去到中區，全程係行晒所有繁忙--一啲有交通燈嘅路段，一個鐘頭，我自己做過，係好趕嘅時間，係咪真係做到，得，架車要行得快，仲要一樣嘢，係要--咁講，係要超速，先至做到一個鐘頭嘅行車車程。

而家我冇做咁耐，我絕對一個鐘頭我做唔到，而家喺N8X嘅同事因為佢做得耐，知道啲交通燈嘅操作，可以喺嗰度偷一啲時間，而令到呢個車程可以縮短，所以呢個例子係最好嘅例子。而且我作為工會代表，城巴職工會有限公司嘅代表，我喺交流會同公司講N8X呢個行車時間係絕對唔夠，係講咗--我參與工會十幾年，係講咗十幾年。變咗呢個係一個好極端嘅例子，就係咁，唔該。

主席：（經傳譯員）你係咪講緊就係一個小時係永遠都唔可以實現嘅呢？係落實唔到嘅呢？

許漢傑先生：係。

黃女士：（經傳譯員）如果喺一個小時裏面唔能夠係完成，有咩嘢後果㗎？

許漢傑先生：嗰位同事只有繼續嗰個車程，事關點解呢？N8X一個班次係半個鐘頭一班車，所以遲咗，佢遲咗返去總站，都係要開車嘅，遲幾多都要開，除非中間發生交通意外，佢嘅時間係譬如有十五分鐘以上嘅阻延，就佢經由公司指派，

就可以喺半途做番去對站，如果唔係，如果係五、六分鐘，係冇嘅，繼續做，繼續做嗰個--另一個車程，而冇一個我哋叫做所謂中途載嘅做法。

黃女士：（經傳譯員）呢個嘅車程，如果你唔能夠係準時到達嘅時候，會唔會係有懲罰㗎？

許漢傑先生：冇嘅

黃女士：（經傳譯員）只係話你休息時間係縮短咗咁解啫？

許漢傑先生：係，係，點講？N8X 如果過鐘係直情冇，冇休息時間。

主席：（經傳譯員）羅教授有個問題嘅。

羅先生：（經傳譯員）我就想知道，公司點可以落實咗走四個鐘頭有十二分鐘嘅休息時間？個公司點樣可以落實呢？就肯定係譬如話頭四個鐘有十二分鐘嘅休息時間？因為呢個喺嗰個指引裏面有規定㗎喎。

劉啟謙先生：應該咁樣講，指引裏面有幾項嘢，六個鐘有半個鐘休息，同埋一個鐘頭用膳，呢兩樣嘢喺車長嗰個時間表同埋嗰個行程表裏面係明確咁樣寫住嘅，但係呢四個鐘嘅十二分鐘其實係冇清楚咁表示，有機會係巴士公司安排咗，但係可能因為車次嘅繃緊同埋交通擠塞嘅原因，嗰四個鐘頭有十二分鐘可能已經喺塞車嗰度已經令到佢冇咗，但係其實巴士車長本身係睇唔到嘅，四個鐘頭十二分鐘，可能淨係見到可能嗰程車次係特別長，可能多十零分鐘，但係佢哋係唔知道四個鐘係有十二分鐘休息嘅，但係其實(a)項呢一樣喺巴士公司編排嗰個時間表係知道佢係有呢一樣嘢，但係往往安排嗰個 trip 中間係好緊張，往往冇咗，其實車長本身都唔知道係冇咗嗰十二分鐘休息。

但係其實我哋一直都有反映，係希望可以每程車次中間係有五分鐘嘅到站嘅時候係有休息嘅，即係起碼去下廁所、停一停、啲一啲，個人都可以放一放鬆，但係現時暫時我哋見唔到巴士公司係會用一個人性化嘅方向去處理呢個問題。

羅先生：（經傳譯員）好，有一個跟進嘅問題，所以話喺文件上面，根本呢十二分鐘都冇寫到出嚟嘅，唔好講話實際有冇落實，係咪咁呀？

劉啟謙先生：落實就一定要落實嘅，因為運輸署同我哋講係有抽查嘅，而過往我哋知道的而且確係有因為(a)項冇咗嗰個十二分鐘，而運輸署有對個別巴士公司係有作出提醒嘅，但係實際上其實喺我哋交上嚟嘅附件八嘅資料裏面，其實根本睇唔到有所講嗰十二分鐘嘅。當然其實巴士公司係清楚呢十二分鐘，因為呢十二分鐘係運輸署個指引嚟嘅，但係你話白紙黑字喺巴士車長嗰度見到呢，係冇嘅，就正如而家個 mon.打出嚟，我哋見到。

黃女士：（經傳譯員）講番一個類似嘅題目，就係休息嘅設施，我哋可以見到喺你嘅意見書，即係 226-25，呢個係英文版，你就提到就話休息室或者係休息設施不

足嘅，中文頁數就係 171 頁，你就提出一個特別嘅問題，我而家睇緊係 226-25，英文版，你話「多年來喺休息室嘅問題上，運輸署缺乏承擔，將責任推向地政總署同埋民政事務總署身上，加上，有啲政府部門對設立休息室更加持有敵對嘅態度，例如房屋署，令到休息室嘅問題難以解決。」據你頭先講嘅例子，關於呢個一小時嘅行車時間，我喺繼續問問之前，先問你呢樣嘢，一小時嘅行車時間有冇足夠嘅設施呢？即係當你去到目的地嘅時候，就算唔計嗰個行車時間，由 A 至 B，好似你頭先提到嗰條巴士線。

許漢傑先生：係有嘅，柴灣嘅小西灣同埋中環嘅港澳碼頭係有休息設施嘅，但係總體，城巴，城巴嘅休息設施係唔足夠嘅，可能係有啲例子就係個休息室唔夠大，仲有，有啲情況係得個化廁，冇正統嘅洗手間。亦都之前有啲例子就係直情係冇洗手間，係經過我哋工會去爭取，先至由政府部門去--由運輸署帶頭，先至有一個化廁，就係咁。由劉生補充。

劉啟謙先生：黃律師，其實我哋交番嚟補充文件裏面都有一個表係講咗休息室邊啲係齊備、邊啲係唔齊備，甚至乎有啲地方係冇休息室嘅，我哋畀咗個表委員會去參考嘅，你可以望一望。

黃女士：（經傳譯員）我而家會同你睇嗰份文件，我諗應該係喺附件七，你嘅意見書嘅附件七，第 260-342 至到 346，你提到一個跟進嘅進度報告，關於巴士總站嘅情況，喺 TU 文件冊嘅英文版就係 260-346-1 嘅，呢度有個表，你交畀我哋唔單只係申請進度，即係九巴嘅申請進度，城巴同埋係新巴，仲有一封信，日期係 2017 年 4 月 28 號，跟住就 6 月 28 號，你就有講到喺深水埗蘇屋嘅巴士總站嗰個問題嘅，可唔可以問下呢封信，我就留意到有啲申請已經係幾年前㗎喇，可以舉個例畀你聽，2016 年 5 月 30 號麗閣，呢個係 260-346-4 頁，「運輸署就喺 2016 年 5 月 30 號收到九巴嘅申請，並且同九巴喺 2016 年 6 月 23 號到上址進行實地視察，由於有關嘅巴士站附近行人路比較狹窄，因此運輸署工程師要求九巴修改休息室設計，九巴現時尚未向運輸署遞交修訂嘅設計。」呢個係最新近嘅進度呢？即係話係咪喺 2016 年之後其實冇進度？

劉啟謙先生：就我哋了解，其實九巴喺設置休息室嘅問題上面喺呢一、兩年係非常之積極嘅，其實表列裏面大部分嘅地方都已經加設咗休息室，縱使休息室可能未必係好大，但係起碼有一個空間可以畀車長係休息嘅。例如麗閣邨嘅進度，我哋就暫時唔清楚，但係其實表列裏面其他嘅位置，例如青衣碼頭已經係加咗休息室係使用中嘅。所以你話九巴個情況係比新巴同城巴係好嘅，起碼都儘可能都係申請可能放到一個細嘅休息室落去，甚至空間可能未必完全足夠，但係起碼有一個地方係畀車長去休息嘅。

黃女士：（經傳譯員）你可唔可以舉個例子，如果我哋係要去某一啲地點實地視察嘅話，要睇下休息設施嚴重不足嘅，你會提議去邊度睇呢？

林錦標先生：我提議喺新巴嘅鰂魚涌站，即係祐民街，呢個成個就係冇一個休息室畀同事去休息嘅，呢度我哋係爭取咗有超過十年㗎喇，一路都係運輸署就話有地

區人士反對，亦都有啲地政各樣嘅話拖延，到到今時今日仲未有休息室。最新嘅消息，即係由我哋公司提供畀我嘅，兜兜轉轉用咗十年時間，嗰個休息室嘅位置由我哋提出响嗰個位置，卒之係返番嚟，要去番同一嘅位置申請，係足足用咗十年時間，係返番去我哋建議嘅--工會提出嘅建議嗰笪地方去申請，用咗十年嘅時間，到而家先話有少少眉目話會擺上去區議會，同各政府部門去諮詢，但係佢而家都唔知道佢等到幾時先有嘅。劉生就有少少嘢補充，唔該。

劉啟謙先生：其實休息室嗰個問題主要就係第一，巴士公司申請，運輸署要審批，其實個途中係牽涉咗大量嘅政府部門，要每一個政府部門批准，包括地政總署、食物環境衞生署、地政總署、警方，連埋呢個民政事務總署進行諮詢，往往一個休息室可能講緊係用上係幾年嘅時間進行呢個申請同埋呢個審批嘅，往往每個政府部門中間又有唔同嘅意見，好似鯽魚涌咁樣兜兜轉轉，其實超過咗十年嘅時間都係做唔到一個休息室出嚟。每一個政府部門都互相係有唔同嘅意見，甚至乎可能有部門覺得唔係咁妥當，就 reject 咗個申請都有。呢啲情況其實喺鯽魚涌呢個例子就係最清楚可以話到畀各位聽個情況就係咁惡劣嘅。

黃女士：（經傳譯員）巴士公司有冇做過啲咩嘢措施呢，譬如話延長休息時間，等巴士司機可以去洗手間或者去一啲休息嘅設施嗰度呢？即係有冇調整過嗰啲休息、行車時間，巴士公司有冇咁做？

林錦標先生：就呢個問題，我哋有反映過，向巴士公司反映個行車時間令到啲車長唔夠時間休息，但係公司就話會去研究，但係研究到今時，我都睇唔到佢--我哋返到站頭有冇足夠時間去廁所，基本上係因為個路面嗰個情況令到我哋啲車長返到站頭，根本就已經下一轉車就要開出嘅，我哋通常都會--司機就响情況下，都會去咗廁所先，第一件事去咗洗手間先去開車，遲就要遲，遲都要開，但係個生理一定需要嘅，所以其實我哋一路都反映嘅，但係公司方面就仲未見到佢有實質嘅行動。許生有少少嘢補充。

許漢傑先生：我想補充一樣嘢，個站頭設施，城巴，城巴有兩個例子係比較突出，第一，就係南區，個置富花園嗰個總站，由城巴開線到而家都冇一個休息室，問題係乜嘢呢？就係當地嘅業主立案法團係唔畀巴士公司設置休息室，呢個第一；我哋同運輸署--叫運輸署去同業主立案法團傾過，但係業主立案法團都係唔畀設置休息室。

第二個例子就係機場博覽館嗰個總站，機場都開咗咁多年，呢個博覽館總站係臨時嘅，臨時，咩嘢都係臨時，連個洗手間都係臨時，臨時咗十幾年，我唔明運輸署同埋其他政府部門點樣去協調呢啲站頭設施嘅嗰個建設。同埋一樣嘢就係政府部門之間係完全係冇協調去--因為我哋巴士公司要開一條線，要設置休息室、廁所，完全係冇協調。

我想講多一樣嘢，就係喺幾年前，我哋有同運輸署講，如果有笪地方要起樓，而下面運輸署係會準備有一個巴士總站，我哋會同--我哋同運輸署講咗，就係話如果有總站嘅，要預早通知我哋聯盟，話畀我哋聽呢個總站準備嘅路線

有幾多，我哋畀一啲意見畀佢嚟令到嗰個設施更加完善，但係呢個都係幾年前講緊，但係運輸署嘅回答就係話因為呢個規劃唔係佢哋嘅部門所控制，係由其他部門去--譬如政府規劃署或者係地政署咁樣，或者係康文署咁，由此可以睇到運輸署同其他政府部門真係冇一個協調嘅做法去做而令到呢啲設施能夠儘快咁設立。唔該。

主席：（經傳譯員）郭先生，我有一條問題問你，因為你係代表呢一個九巴員工協會嘅。有分更，好多年嚟都係有特別更分更㗎喇，係咪呀？

郭偉光先生：係嘅。

主席：（經傳譯員）黃大律師頭先問緊你一啲問題，譬如話巴士總站，係有一啲巴士總站設施嚴重不足嘅話，你而家可唔可以今日講得出有咩嘢設施、喺邊度，等委員會可以去睇下呢？視察一下喺呢啲行特別更嘅車長佢哋係需要休息超過三個鐘嘅，但係啲設計就嚴重不足嘅，你可唔可以舉一啲地點畀我哋聽呀？

郭偉光先生：九巴方面係咁樣樣嘅，就因為特別更如果佢哋上面收車--收工嘅時候，佢哋係會將架車揸番去巴士廠嘅，由個巴士廠再--離開個巴士廠出去用膳或者係去其他地方休息嘅，大部分都係咁樣運作，而好少話喺站頭嗰度完咗上段而進行一個中段休息嘅。

如果其他有一啲更次就係話有啲特別啲嘅，就係喺個站頭度收上段，而自己離開，而之後再返番去站頭嗰度接下段嘅亦都有，呢啲咁嘅更次係個員工嘅休息嘅機會更加少，因為佢搭車去第二啲地方食飯，跟住再搭番車返番去個巴士站嗰度開下段，中間嗰個一來一回所花費嘅時間更加多嘅，所以佢哋更加缺乏休息嘅時間。

主席：（經傳譯員）我就問緊你關於嗰啲設施，如果站長就係話佢上更完咗，佢就有三個小時嘅休息時間，佢就--佢係泊咗架車喺總站，就係咪個休息設施唔夠，而佢需要去其他地方去休息呢？

郭偉光先生：冇錯，例如喺荃灣嘅荃威花園，你哋可以去睇下呢個地方嗰個設施。

主席：（經傳譯員）你係咪建議就係話呢個地方我哋可以睇下嗰度嘅設施，休息設施好唔足夠嘅，特別係就話嗰啲分更，佢第一更完咗嘅時候，佢去嗰度休息，嗰度休息設施係唔足夠，係咪你嘅建議可以去嗰度睇呢？

郭偉光先生：冇錯。

主席：（經傳譯員）除此之外，仲有冇其他建議？

郭偉光先生：暫時冇補充。

主席：（經傳譯員）如果我哋汽車交通運輸業總工會，其實佢哋今朝早已經嚟，佢哋就請--我哋請佢哋就睇一啲嘅文件嘅，我哋就頭先就話佢哋用一啲時間睇一啲文件，然後我哋就可以向你哋提問。而家就我哋就有一個小休嘅時間先，然後

就我哋再繼續。

下午5時04分押聆訊押後

下午5時12分恢復聆訊

出席人士如前。

主席：（經傳譯員）黃大律師，你可唔可以提一提我就係立法會嘅資料文件？

黃女士：（經傳譯員）TD-1文件夾第403頁，中文版416頁。

主席：（經傳譯員）各位，你哋有冇時間係閱讀呢一個嘅立法會交通事務委員會嘅資料文件呢？

張子琦先生：主席，我哋係剛才啱啱睇過呢份報告嘅，呢份文件嘅咁樣樣。都初步我哋都畀一啲意見，認為嗰個4(a)「電子穩定控制系統」係唔建議裝嘅，因為我哋對呢套系統係有存疑，驚剎車嘅時候會突然間揦死堂軑，仲會令車輛會失控；第4項(b)控制...

主席：（經傳譯員）你繼續之前，我哋想問一問你相關嘅工作小組有冇曾經諮詢過你關於呢方面呀？

張子琦先生：主席，呢個立法會交通事務委員會係冇諮詢過我哋嘅，我哋都曾經多次要求派工會入去做一個--喺委員入面，運輸署亦冇諮詢過我哋關於呢一樣嘢，我哋只能夠用我哋嗰個工作嘅經驗嚟睇呢份報告。多謝主席。

主席：（經傳譯員）請你繼續講番喺呢份資料文件你想講番邊部分，同埋有咩嘢建議。你頭先講到話你懷疑呢個電子穩定控制系統嘅成效，咁其他嘅事項呢，你可以繼續講。

張子琦先生：多謝主席。4(b)，我哋喺文字上睇，係認為可行嘅，因為佢係鎖定咗70公里，不論落斜都係鎖死70公里，呢個對我哋係有幫助嘅，因為我哋好多車長行屯門公路嘅時候，因為又起又落、又起又落，好多時都會超速--都不知不覺會超速，而令到受到一啲紀律嘅處分，所以如果有咁嘅系統能夠限定咗70，落斜嘅時候都唔使驚超速，係對我哋有幫助，所以我哋認為可行嘅。

喺第6項嘅(a)「巴士監察及控制系統」，呢個我哋係唔認同嘅，因為呢個等同架巴士係畀一個控制器控制住，一到到嗰個路段係50嘅，70轉50，佢突然間會改番去50，個時間後面啲車輛會唔會預計你前面突然間冇車嘅，都唔係預計你突然間咁急速剎去到50，會唔會產生交通意外呢？呢個我哋係睇到係

有疑慮嘅，係有啲擔心會發生交通意外，所以係唔認同嘅，唔建議裝呢個嘅。

主席：（經傳譯員）先打斷你一下，其中一個原因點解嗰個巴士會減速，係因為嗰個速度限制減速，即係亦都減咗，然後個巴士於是減速，點解後面個司機會覺得唔明白呢？

張子琦先生：係，係咁樣樣嘅一個駕駛習慣，如果當我哋行緊 70 嘅時間去到一個 50 嘅區域，我哋會慢慢收油，等佢減速，但係如果你呢個系統係比較急速咁樣樣減，就會令到後面啲車輛就會對一向嘅常態，「巴士唔係咁樣揸車㗎喎」，就會發生交通意外，佢會突然間會撞埋嚟，呢個係有擔心嘅我哋。

主席：（經傳譯員）你點樣分辨減速會唔會係突然間發生？你點樣可以知道系統係咁呢，你喺邊度睇到呢？

張子琦先生：因為我哋如果減速，我哋會耷 brake，會有 brake 燈會通知到後面，但係你而家呢個就係有一個控制系統，有一個定位，一去到嗰度，佢就自然同你急速咁減，而又我前面係冇車嘅，後面嗰架車就會預計你唔會突然間咁快去減速減到去由 70 變速到 50，所以我哋係擔心呢樣嘢會引致到安全問題。

主席：（經傳譯員）好。

張子琦先生：6 嘅(b)，呢個同樣我哋都係唔建議裝嘅，因為呢個碰撞嘅警報裝置及保持行車線嘅裝置，曾經有揸過呢一類型嘅車就覺得佢好煩擾，佢一遇到一啲小小嘅障礙物，就會發出響聲，尤其我哋香港都係人多車多、馬路窄，好多時如果你喺條彌敦道度，周時你附近都會出現一啲障礙物，但係呢啲實質上可能唔會對架車會受影響，但係架車就仍然都會發出響聲，嗶嗶聲，咁會令到個車長好大嘅干擾受到，所以唔建議裝。

主席：（經傳譯員）佢建議嘅就係話試行，試驗下。

張子琦先生：我畀城巴揸過呢架車嘅車長講下。

劉善達先生：主席，唔好意思。城巴就响我唔記得三年定兩年前就試過呢個系統，有個叫做類似叫做神眼系統嘅系統，就係我哋試驗嗰陣時，响高速公路係冇問題，但係一到市區，即係有少少人或者車，佢就會不停咁響，就會造成一個滋擾。

主席：（經傳譯員）我哋聽到係前員工，即係九巴前員工程艾樂嘅證供同埋鄺子憲先生嘅證供，就係話大家要留意科技喺呢段時間可能唔係咁啱用，可能喺過兩年有改進，就會啱用㗎喇，即係可能個科技本身都係有改進到嘅。

張子琦先生：主席，真係我哋而家見到揸過、駕駛過嗰啲嘅系統就係有毛病，覺得唔係咁適合，所以日後如果真係有啲系統係改善咗嘅，我哋再作考慮建議裝呢啲系統，因為的而且確我哋係一個從業員，我哋只能夠反映我哋嘅工作直接遇到嘅問題出嚟畀主席。多謝主席。

主席：（經傳譯員）而家問你就係反映，你之前冇人問你畀意見吖嘛？

張子琦先生：係呀，主席。

主席：（經傳譯員）請繼續講其他嗰啲儀器裝置。

張子琦先生：呢個 6(c)「監察司機裝置」，呢個我哋認為係可行嘅，因為呢個係直接監察個司機有冇瞌眼瞓，我可以大膽講句，瞌眼瞓係我哋職業司機嘅天敵，佢有時真係自己瞌一瞌嗰兩、三秒就可能自己條命都冇咗，如果有一個咁嘅裝置提醒個司機「小心啲囉喎，你有啲睡意喎。」不論係對個司機、對乘客、對路面嘅交通使用者，都係一個--提供一個安全一個措施嚟嘅，所以我哋認為可行嘅呢個。不過都呢套系統，我哋都有同事揸過，希望都仍然有啲要改進嘅地方，譬如佢戴一個墨鏡，係有水銀嘅，佢就呢套系統就失效，一路長響，以為你瞌眼瞓㗎喇。

主席：（經傳譯員）唔該。

張子琦先生：好，多謝主席。至於呢個係安全帶，喺乘客座位度設置安全帶，我哋係唔建議安裝嘅。第一，因為我哋都有企位，唔係全部座位，唔係旅遊巴；第二，如果係雙層巴士上層裝咗之後，一下如果有咩嘢事發生，相信都幾混亂，譬如如果突然間發生火警，佢哋會逃生更加困難，人喺危急嘅時間佢要除條安全帶，我相信係非常之困難嘅。所以我哋就認為唔係咁可行，除咗有啲適當嘅位置，譬如係最前排嘅或者係最後座嘅中間位，一啲比較危險嗰啲安裝之外，其他我哋就唔係咁建議安裝安全帶。

去到「專營巴士車長訓練」，我哋覺得係需要加強嘅，要回復番 98 年我哋培訓一個車長出嚟，要用差唔多一個月嘅時間，仲要多啲喺路面度實質嘅操作，咁先至令到一個巴士車長佢出到嚟路面有啲信心，唔係而家成日要靠一啲車長去帶一啲新嘅車長，其實呢個我哋認為唔係可行，亦唔推薦咁做嘅。最好都係由番學校去培訓一個車長。多謝主席。

主席：（經傳譯員）呢個學院應該邊個運作呀？

張子琦先生：多謝主席，學院都係由番學校、巴士公司同學校，同埋運輸署應該要協助嘅。多謝主席。

主席：（經傳譯員）黃大律師，由佢哋畀嘅證供，你仲有冇其他跟進問題？

黃女士：（經傳譯員）冇喇，主席。

主席：（經傳譯員）各位，多謝你哋今日留咗喺度一整日嚟畀證供，我哋感謝你哋出席，而家你哋可以離開，如果其他嘅--另外一個工會嘅其他代表而家可以過嚟，我哋而家稍休幾分鐘，你哋幾位可以離開，唔該。

下午5時28分押聆訊押後

下午5時33分恢復聆訊

出席人士： 鍾松輝先生，巴職聯會務顧問，新世界第一巴士公司職工會會長（巴士業職工會聯盟（包括各會員工會，即九巴員工協會、新世界第一巴士公司職工會及城巴有限公司職工會）代表）

劉啟謙先生，巴職聯會務幹事（巴士業職工會聯盟（包括各會員工會，即九巴員工協會、新世界第一巴士公司職工會及城巴有限公司職工會）代表）

林錦標先生，巴職聯副主席，新世界第一巴士公司職工會理事長（巴士業職工會聯盟（包括各會員工會，即九巴員工協會、新世界第一巴士公司職工會及城巴有限公司職工會）代表）

許漢傑先生，巴職聯司庫，城巴有限公司職工會理事長（巴士業職工會聯盟（包括各會員工會，即九巴員工協會、新世界第一巴士公司職工會及城巴有限公司職工會）代表）

郭偉光先生，巴職聯秘書，九巴員工協會副理事長（巴士業職工會聯盟（包括各會員工會，即九巴員工協會、新世界第一巴士公司職工會及城巴有限公司職工會）代表）

何銳昌先生，巴職聯會員，新世界第一巴士公司職工會司庫（巴士業職工會聯盟（包括各會員工會，即九巴員工協會、新世界第一巴士公司職工會及城巴有限公司職工會）代表）

主席：（經傳譯員）各位，多謝你哋咁有耐性，我哋就啱啱同另外嗰個職工會去傾完，我哋而家可以繼續我哋未完成嘅一啲討論。但係我明白秘書處已經同你傾過，就可能休會，就喺8月1號星期三下晝先至返嚟，所以我就會請黃律師就去討論關於立法會嘅資料文件，我哋先至休會，然後我哋剩番就8月1號星期三下晝先再討論，同唔同意呢？

林錦標先生：好嘅。

主席：Thank you.

林錦標先生：同意嘅。

黃女士：（經傳譯員）多謝你咁多位。呢個就係立法會交通事務委員會嘅一個討論文件嚟嘅，呢個討論文件就係由運輸署所準備嘅，就係為咗加強專營巴士安全嘅，最近係7月25號喺立法會討論咗，就係英文嚟講，就係403頁就開始，

喺中文版就 416 頁嘅。裏面討論咗幾個課題嘅，第一個課題係關於增加加設安全帶；第二個話題就係關於巴士車長嘅培訓，就係第 18 第 22 段嘅；第三個問題就係關於一啲新嘅科技嘅裝置，就喺專營巴士上面點樣可以採用一啲新科技。呢個嘅文件有冇從來交過畀你哋嘅聯盟嘅呢？有冇畀你哋係徵詢你哋嘅意見呢，呢個嘅文件？

林錦標先生：冇嘅。

黃女士：（經傳譯員）我哋知道呢一個文件就三個專營巴士公司都有討論，同埋運輸署都有討論嘅，就係想睇一睇就巴士嘅裝置同埋呢一個嘅巴士培訓方面嘅，...

主席：（經傳譯員）你就繼續之前，呢一個嘅文件就係應該話係運輸署同埋三個巴士製造商同埋巴士專營公司佢哋討論之後所得出嚟嘅成果嘅，佢哋 3 月中就有討論，然後佢哋將佢哋嘅建議就係提交畀立法會，嗰個提交嘅時間就係呢一個 7 月尾嘅。

黃女士：（經傳譯員）你有冇機會係睇過呢個文件同埋係消化呢個文件，特別喺我哋頭先小休時間嘅時候？

林錦標先生：我哋有睇過呢個文件，亦都初步了解過，就知道裏面嘅內容係講啲乜嘢。

黃女士：（經傳譯員）係，首先我哋講第一個問題，關於安全裝置，第 4(a)段嘅，呢個係關於電子穩定控制系統嘅，你哋個聯盟會唔會支持去採用一個咁樣嘅系統呢？

林錦標先生：係支持嘅。

黃女士：（經傳譯員）關於呢個控制下坡時最高速度嘅車速限制減速器，你又是否支持去裝置一個咁樣嘅減速器呢？

林錦標先生：支持嘅。

黃女士：（經傳譯員）我哋去到第 6(a)段，關於巴士監察同埋控系統，就話希望能夠盡用黑盒嘅功能，可以有實時嘅可以監察巴士嘅速度同埋有呢一個全位定位嘅系統等等咁樣。

林錦標先生：呢個係支持，而家已經係用緊㗎喇。

主席：（經傳譯員）邊間公司用緊呢個系統㗎？

林錦標先生：新巴、城巴都已經係用緊呢個系統嘅。

郭偉光先生：九巴一樣。

黃女士：（經傳譯員）6(b)就關於碰撞警報裝置同埋保持行車線裝置。

林錦標先生：响呢個問題上，我哋係支持，但係個實質嘅數據，初初嗰陣時試驗嗰陣

時就啲伙記有個反感嘅，因為一有小小問題，佢就會響，係令到個司機個精神嗰啲嘢就有個困擾响度嘅，所以就呢個裝置就係好，但係希望有改良。

黃女士：（經傳譯員）係咪呢一個神眼嗰個嘅...

主席：（經傳譯員）呢個係--嗰個裝置叫做神眼，就由城巴去測試嘅，係咪呀？

鍾松輝先生：法官閣下，唔好意思，之前公司，新巴、城巴都曾經嘗試過嘅，測試嘅，但係就效果唔係咁好。唔好意思，據了解，公司就話會再去改良呢一個裝置，睇下遲啲改良咗之後，睇下個效果好唔好。

黃女士：（經傳譯員）我知係 2014 年去試驗嘅，科技已經都發展咗嘅。但係第 6(c) 段呢，「監察司機裝置」，就係去睇下車長會唔會瞌眼瞓咁樣。

鍾松輝先生：當然，呢個裝置我哋原則上係同意嘅，但係問題如果你要用呢啲裝置去監察個司機究竟係咪疲勞或者瞌眼瞓，其實本末倒置嘅我哋覺得，我哋應該係覺得就係畀多啲時間畀啲車長休息，呢個先係正式嘅做法，唔好有--個制度唔好有一個疲勞駕駛，呢個先係重要嘅。當然呢一個未嘗不可嘅，我哋覺得都。

林錦標先生：劉生有少少補充，唔該。

劉啟謙先生：其實嗰個問題就係話我哋係要預防車長因為疲勞駕駛而出意外，而唔係話搵啲嘢去監察住佢，等佢唔會瞌眼瞓，呢樣嘢其實係調番轉，我哋工會嘅角色就係希望車長喺一個安全同埋一個健康嘅環境下工作，而唔係一個長時間嘅情況下工作，跟住就疲勞駕駛而發生意外，我哋最終嘅目標係要喺意外之前提出一啲建議去防止意外發生，而唔係等意外發生咗之後先至去諗如何去改善一樣嘢。呢一樣嘢本身嗰個出發點係好，但係如果話安裝喺呢個情況下，有點兒係本末倒置，根本就係逃避咗疲勞駕駛呢一個問題，即係正如民航機機師，民航監管當局都係希望機司係嗰個休息時間係更加長，而唔係話不停咁樣去揸呢個飛機。雖然民航駕駛同巴士係兩樣唔同嘅嘢，但係其實大家嘅嗰個性質都係接載乘客，出意外嗰個後果一樣都要嚴重，咁點解我哋仲要縱容呢個長時間疲勞駕駛，跟住就搵個嘢去 monitor 住個車長唔好瞌眼瞓，會唔會真係有點兒本末倒置咗呢？

主席：（經傳譯員）但係你係咪同意原則上同意就都可以試驗下嘅，呢個裝置？

林錦標先生：同意嘅。

黃女士：（經傳譯員）安全帶呢，所有嘅座位都增加安全帶，你哋又覺得點樣樣呢？

林錦標先生：安全帶我哋都認同嘅，但係就應該係運輸署嘅責任，就唔係畀巴士公司嘅責任，但係運輸署完全應該由佢負責需唔需要，因為最清楚就係運輸署。

主席：（經傳譯員）你話責任即係話佢哋要畀錢，係佢哋畀費用？

林錦標先生：係講法例。

主席：（經傳譯員）明白，即係佢哋有責任去安排--即係同政府安排改變個法律，就然後去執行嘅，係要安裝之後，要乘客去戴，呢個就係要執法，你講個責任係咪呢樣嘢呀？

林錦標先生：係呀，劉生有少少補充。

劉啟謙先生：巴士上面裝安全帶係當然係保障乘客嗰個安全，呢個我諗係毋庸去爭拗嘅，但係重點係乘客如果有安全帶而唔去配帶，其實即係等如裝咗等如冇裝，其實個情況一樣，所以立例去令到乘客去戴嗰個安全帶其實係最重要嘅。而且我哋留意到小巴本身嘅情況就係喺好多年前已經係裝安全帶，都係立例要乘客去戴安全帶，而警方都有對冇安全帶嘅乘客係有檢控嘅，而個效果係理想嘅，因為乘客係記得要戴安全帶，係保障咗佢喺意外嘅時候減低佢可能嚴重受傷嘅機會。如果你話巴士裝安全帶當然係可以保障乘客，但係最重要係立例令到乘客係記得要戴番個安全帶，即使如果話唔記得戴，因為唔同嘅理由冇戴，裝咗對佢哋保障即係冇保障。

其實係有啲巴士嘅交通意外，好多年前有單喺將軍澳嘅意外，就係因為頭排--成頭排嘅乘客冇戴嗰個安全帶，而係拋出車外嘅，係有啲咁嘅情況。所以如果你話戴咗安全帶而唔纜，其實對佢個保障係等如冇保障。

主席：（經傳譯員）就所以係有啲改變，喺上層係有個金屬欄杆同埋係嗰啲危險嘅位就裝安全帶，係咪呀？

劉啟謙先生：係，冇錯。

黃女士：（經傳譯員）培訓，第18段至22段提到畀巴士車長嘅培訓。

林錦標先生：許生作答。

許漢傑先生：主席，至於呢個培訓，我前兩日啱啱上完兩日嘅堂，公司城巴，城巴已經加咗個情緒管理，其他嗰啲就一路以嚟都有㗎喇，情緒管理嗰度就係公司係用一個非專業嘅人士去處理呢個課堂，喺我嘅見解嚟講，我覺得係唔夠，唔夠專業，所以就我覺得係有一個改進嘅必要嘅。劉生有嘢補充。

劉啟謙先生：其實喺我哋交番嚟補充文件嗰度，我哋參考過新加坡一個例子，新加坡喺16年10月成立咗一個專門嘅巴士培訓學院，嗰個課程係非常之全面，除咗係駕駛課程之外，亦都有一啲勞法、車隊管理系統，以至服務水準類似嘅訓練，亦都係安排咗就係車長必須要上呢啲課堂先至可以攞巴士嗰個執照嘅，其實我哋留意到喺其他地區都係有相類似嘅課程提供畀巴士車長去報讀嘅。我當然認為有啲關於情緒管理，以至係法例嘅支援係有需要嘅。呢啲課程其實應該係由專業嘅人士去提供嘅，而家起步其實已經係有點兒遲㗎喇，但係遲好過冇。

主席：（經傳譯員）許先生，你講到就話唔係一個專業人士去教呢一個課程，你認為應該係情緒管理嘅課程由係乜嘢專業人士教？

許漢傑先生：喺我嘅認知嚟講，應該係社工或者係心理學家。

主席：（經傳譯員）唔該。

許漢傑先生：好，唔該。

主席：（經傳譯員）黃大律師，或者今日都差唔多，各位，多謝你哋今日出席，亦都多謝你哋同意星期三再返嚟，我哋都期待喺星期三下晝繼續，而家就休息。

2018年7月30日

下午5時50分聆訊押後

Tuesday, 31 July 2018

(10.02 am)

REPRESENTATIVES OF KMB EMPLOYEES UNION: MR KWOK CHI SHING, MR LEE KIN KEI, IVAN, AND MR WONG KIN WAI

(Evidence given in Cantonese, transcription of the simultaneous interpretation)

CHAIRMAN: Good morning, Mr Kwok, and your colleagues.

We thank you and the other representatives of the Kowloon Motor Bus Employees Union for accepting our invitation, and attending today to give evidence.

In the course of evidence, Ms Wong, Senior Counsel, counsel assisting the Committee, will ask you questions, and it is a matter for you which one of the three of you answers any particular question. But perhaps we could ask you, Mr Kwok, to defer to the others if you want the others to respond, identifying who it is you wish to respond.

But at the outset I understand that you wish to make an opening statement, and we are ready to hear that now.

Please begin with your opening statement.

OPENING STATEMENT BY MR KWOK CHI SHING

MR KWOK CHI SHING: Thank you, Committee. Thank you, Chairman. I thank the two members.

We are glad that finally after a long time waiting we have the opportunity to come here to speak to you

about our voices from practitioners as well as bus captains.

I would like to say that I would ask the Committee to give us ample time to reflect our views.

I have been attending all the hearings. Most of the hearings are devoted on monitoring of bus captains as well as safety issues. I am aware of the statement. I don't expect to find the party to be blamed or to be responsible, and I do know that there will be discussions about safety, about training, I hope that you will take my views into account.

I wonder if we can ask questions of the Chairman, or the Committee. Would you allow us to ask questions?

CHAIRMAN: Well, you are here to give evidence. We are not here to give evidence. We are hear to listen, and we are more than happy to listen to what it is you have to say.

What we are trying to find out are the circumstances that obtain in the operation of the franchised bus system, in order that we can make recommendations to the Chief Executive to enhance safety.

So it is your evidence. We are not involved in the bus industry. We want to hear from you.

MR KWOK CHI SHING: Well, yes, we are in the industry. Every day there are 4 million passengers using bus

services. This accounts for about 31 per cent of the total population using transportation. This is very important to our industry.

I understand that the time given for unions to speak is quite short. We are important stakeholders. We are important parts in the industry. We play a very vital role in safety.

There are a lot of issues we would like to cover. I have given one submission, and two supplementary submissions as per your request, covering a lot of different topics. However, these topics are only briefly touched in these submissions and supplementary statements. If we have ample time to discuss these issues, it will be conducive to the Committee reaching a conclusion. And the public would get a better understanding as well.

I found that the hearing yesterday could only cover a few simple issues without going into details: on training, and understanding of the mechanics by bus captains, the teachings or lectures, whether bus captains are conversant with the functions and mechanics as well as control of the buses they drive. I think our views are neglected.

You just ask us for a simple answer, whether to agree certain people's views, and to state our views.

I don't think that is in depth enough.

The Committee will not be able to reach a comprehensive conclusion. I don't want to repeat what other people have said. Time is precious. We just want to talk about what we are concerned with, issues that are pertinent to public safety.

CHAIRMAN: No doubt you have identified those issues in your written submissions. And that's the purpose of asking counsel to now ask you questions on the matters that you have identified.

If there are supplements that you wish to make, as the questioning goes on, then please make them. But the whole purpose of inviting you to make written submissions was to give you the opportunity to tell us what it is you wanted to say. And the purpose of this oral evidence hearing is so that we can explore the matters that occur to us as relevant.

MR KWOK CHI SHING: We have some questions -- we have prepared for some topics covering black box as well as safety operation of buses, but we have not submitted the information to the Committee yet.

We have just finished compiling the information and we would like to give the same to you.

So I ask for your indulgence for us to give you the information.

CHAIRMAN: Is there any reason why this was not submitted at an earlier stage? We have been asking you, have we not, since 28 March -- am I right, Ms Wong?

MS MAGGIE WONG: Yes.

CHAIRMAN: 28 March. It is 31 July now.

MR KWOK CHI SHING: We have to make preparations, we are not experts. We realise that the Committee has asked questions of the black box company. We have reviewed the information given. We think that based on the replies you have received we should give you our views, I mean us as operators of buses. Is it the case that you give us a black box and we know how to use it?

We have to show or teach our members how to handle a lot of issues, say, for example, when they have been assaulted, how they are going to deal with this situation. Also, verbal exchange after an incident has occurred.

CHAIRMAN: Mr Kwok. I think we are going to make more progress if we begin by allowing Ms Wong to ask you questions rather than receiving a lengthy oral dissertation on matters that change, as you have just done, from black boxes, to assaults.

Let's see what Ms Wong can make by way of progress, and then we will hear from you in due course; do you understand?

MR KWOK CHI SHING: Yes, thank you. Chairman.

I hope that, well, you will allow me to make supplementary information afterwards.

EXAMINATION BY MS WONG

MS MAGGIE WONG: Thank you, Mr Kwok, and gentlemen, for coming.

May I make a brief remark. We have received your written submissions, all three of them. The Committee's primary concern is set out in the terms of reference, and that is to make recommendation which go to the issue of safety-related matters of franchised buses.

So my questions will be focused on safety aspects rather than other areas, or employment issues.

I hope you understand, those questions will be focused on safety aspects.

May I start with your union, the composition of your union.

Mr Kwok, your union was established, if I may invite you to go to TU bundle, at page 112-9. It is only in Chinese, but I will explain the composition.

Your union was established on 14 July 2015, correct?

MR KWOK CHI SHING: Yes.

MS MAGGIE WONG: And as of 15 June, 2018, the membership of your union comprised of 1,400 people.

MR KWOK CHI SHING: That's right.

MS MAGGIE WONG: And they include full-time staff and retired bus captains who continued to stay on to work as bus captains.

MR KWOK CHI SHING: Yes, that's right.

MS MAGGIE WONG: And those 1,300 are all full-time staff?

MR KWOK CHI SHING: That's right.

MS MAGGIE WONG: And your submissions raised a few areas, and I will be focusing on different areas at different times. And the first topic I would like to ask you is concerning about the facilities or the safety aspect which you mentioned with a lot of emphasis in your submission.

If I may take you to TU-1A, Chinese at page 84. English at page 90-3.

CHAIRMAN: What is the document?

MS MAGGIE WONG: This is the first submission --

CHAIRMAN: Thank you.

MS MAGGIE WONG: -- dated 23 April 2018.

Page 93 in English, and page 84 in Chinese.

Under 1, you stated that:

"In order to save repair cost, KMB has, since 2015, inappropriately removed all defog heater installation causing the front window panel to have serious fogging issues under cold and wet weather ..."

And you provided photographs in annex 1, and we can

see that at page 91 in Chinese, and page 91-1 in English.

And you stated in your submission that:

"It is especially dangerous when a bus is driving at a fast speed if the bus captain cannot see the road condition clearly. It affects the safety of driving and the passengers."

Now, my first question is this: did you reflect, or did your union reflect this to the bus company, KMB?

MR KWOK CHI SHING: We did.

MS MAGGIE WONG: When?

MR KWOK CHI SHING: We talked to the management of the company.

MS MAGGIE WONG: When was this?

MR KWOK CHI SHING: I can't recollect the time. Because there was no record. Verbally.

MS MAGGIE WONG: These photographs, can you tell us approximately when did you take those photographs?

MR KWOK CHI SHING: At the middle of last year. WhatsApp photographs taken by colleagues. And this problem has persisted for a long time, and last year it was particularly serious. Our members hoped that our union would speak out for them, and so they sent us a lot of photographs.

MS MAGGIE WONG: When you say you verbally reflected this to

the bus company, did the company reply anything on this issue?

MR KWOK CHI SHING: There was none. They tried to reject our union as far as possible. If I speak to them in the capacity of the chairman of the union, they would ask me to speak to them in my capacity as an employee, the general manager of the Kowloon Bay depot --

MS MAGGIE WONG: And did you reflect or --

CHAIRMAN: I'm sorry, had you finished your sentence there? What about the general manager of the Kowloon Bay depot?

MR KWOK CHI SHING: He frequently stressed that I could only speak in my personal capacity out of political considerations.

CHAIRMAN: And what is the name --

MR KWOK CHI SHING: And I -- it is not convenient for me to speak in my capacity as chairman.

CHAIRMAN: What is the name of the gentleman who is the general manager of the Kowloon Bay depot?

MR KWOK CHI SHING: Yeung Kwok Hung, general manager of the Kowloon Bay depot.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Did the bus captains reflect this to the maintenance staff of the company?

MR KWOK CHI SHING: They did. The maintenance staff had a lot of views, but they dare not speak out. Usually

I was the one who reflected these views. The maintenance staff were unhappy too, but they could not speak out because the company doesn't like that.

CHAIRMAN: What is the present position as far as these defogging devices are concerned?

MR KWOK CHI SHING: With the establishment of this Committee, we submitted a lot of documents and we were interviewed by the press. The company told the public and us that for new vehicles they would be installed with this device. When we reflected this problem, we were interviewed by independent media, and also a professor was interviewed, as I mentioned in my submission. The professor confirmed that defog heater installation is most effective, and then the reply from the Transport Department was it was not a necessary installation. Only 90 per cent of the buses were fitted with this device, that is KMB is the only exception.

KMB did not have this installation for us, hinders the safety of passengers. It did away with this installation to save maintenance cost. The bus company is of the view that there aren't too many days with this problem, and so bus captains are asked to wipe it themselves. How can they do it when they are on a highway? They can only do so when the bus stops in front of a traffic signal. So the reply is

unacceptable.

CHAIRMAN: Do new vehicles have this device fitted?

MR KWOK CHI SHING: As at today, no. All new vehicle, not fitted with this device. Because it was decided back then that it would not be installed. And new vehicles have yet to arrive, and it is promised that the device would be fitted in new vehicles. But this is very undesirable. What about the 9,900-odd buses? Some were commissioned only last year or this year. So do we have to wait until 17, 18 years?

So I think they are just trying to tell the public that they are going to do it. Even if it is not immediately, I think every year at the annual vehicle examination the TD should ask them to retrofit that device regardless of the cost. They should not wait for these 17 years to pass.

Because originally there was such a device, it was only removed by the company. It is about public safety, and --

CHAIRMAN: We have your point.

Yes, Ms Wong.

MS MAGGIE WONG: At page 90-5, in English, and at page 85 in Chinese --

CHAIRMAN: What is the point we are moving to now?

MS MAGGIE WONG: It is the Transport Department's reply to

this defog device.

CHAIRMAN: Yes.

MS MAGGIE WONG: You stated in your first submission that:

"The Transport Department shall not approve KMB to remove defog heater which affects the safety of driving, and it is possible to adversely affect other road users. (The Union) received complaints from many bus captains and confirmed this is true. It is strongly recommended that the Transport Department directs the bus company to re-install the defog heater."

So my question is: was the Transport Department aware of the removal of the defog heater?

CHAIRMAN: Before you answer that question, you told us a moment ago that Transport Department said that this was not a necessary device. Is that the Transport Department's position?

MR KWOK CHI SHING: Because independent media was concerned about this, and it saw interviews of me, and then to be fair it interviewed a professor.

CHAIRMAN: You told us about that.

Did the Transport Department make a decision that it was not necessary to install this device? That's what you told us. Is that correct?

MR KWOK CHI SHING: Yes. Yes.

CHAIRMAN: Thank you.

MS MAGGIE WONG: And did you write to the Transport Department to complain about this defogging device? Did your union write to the Transport Department, complaining about this absence.

MR KWOK CHI SHING: We didn't. We didn't.

MS MAGGIE WONG: If I may go to the next issue which relates to the gear button installation.

At page 84 of your submission, and English at page 90-3, also under section 1, you stated that:

"... the company altered the gear buttons installing for safety driving, cancelled the O/D gear button and manual retarder installations and relies only on computer-controlled singular automatic D-gear to control vehicle speed ... Under [emergency] situation it is very dangerous for there to be no saving devices for the bus captain to use."

You have shown this in your annexure at page 92, and in Chinese at page 92-1.

To complete this point, you further stated at page 90-5 that the hot weather:

"... the temperature within the bus machinery, is even higher), has affected the computer-controlled mechanism or system, and therefore immediate commands to activate the brake system cannot be made (deviated from the bus captain's judgments). Therefore the bus

captains felt that the bus has no brake system to stop the bus, and told the police that if the bus has no brake, it should be inspected (it actually cannot be detected!) because after the bus is cooled down the next day, the computer system will return to normal."

Can I ask you this. From your review, or from your union members' review, how does the removal of manual retarder installation affect bus safety?

MR KWOK CHI SHING: In that regard, I would like to defer to Mr Lee who is more familiar with it.

CHAIRMAN: Yes, Mr Lee.

MR IVAN LEE: Thank you. First, let me introduce myself. Just my brief CV. I have been driving large vehicles for about 20 years, and tractor/trailer vehicles, single-decker buses, double-decker buses, automatic transmission, manual transmission, coaches, modern vehicles. Currently I am an employee of KMB. I have been driving double-decker buses for six years.

Well, when it comes to training, the instructors would only train the trainees on requirements of one of their respective bus companies. And I don't think that training on safety is sufficient.

CHAIRMAN: No. Mr Lee, you have been asked to deal with a specific question, not to make a speech.

The specific question was: how does the removal of

the manual retarder affect bus safety? Could you address that question.

MR IVAN LEE: In the system, there is a device that allows you to select. It includes a manual selection, automatic selection, and a third one is a combination of manual and automatic control.

First, the retarder. There is this function. There are four segments and a lever to control this system. You don't have to use a pedal, you don't have to use the brake system.

Mr Lai explained yesterday, said that when you stepped on the pedal, it is automatic.

And here it says that when it is affected by high temperature it is about the brake system. Well, when there is friction it generates heat and the temperature will rise. If there is a manual control that means the bus captain can control the retarder from 1 to 4, from mild control to a heavier control. This will control the gear box to secure the torque, thereby securing safe control of the brake system.

However, for single or double-decker buses, I don't see many of them with this function. Very few for double-decker buses. There are no selection buttons; only a pedal that is used to activate the retarder.

If there is a stick or a lever, as an additional

device, well, I'm sure that drivers are very familiar with it. However, when it comes to public bus training, instructors don't give trainees this kind of training. They only teach them to use the brake by applying different level of forces, what is a mild force, what is a heavier force.

So when bus captains want to stop the bus, they would just step on the pedal and use the brake pad to stop the bus.

So the system will not be fully utilised to halt the bus. You step on the pedal to activate the brake system to stop the bus. I think the force you use is about a level 3 or 4, but if you use the same level on the manual system it is rather heavy. If you can use the manual system you use level 1 or 2 force, then it is very mild and the bus will come to a steady stop.

So if there is a space of half a bus or even shorter, you can't just step on the pedal to bring the vehicle to a halt. All you can do is just watch the bus ram into the car in front of you. I do think there is inadequacy when it comes to this system on public buses, and the Transport Department is aware of that.

When it comes to vehicle examination and licensing, it covers coaches. You drive the coach in for the examination, so they are fully aware of this system.

You must know that public bus carry a lot of passengers. However, it seems that --

CHAIRMAN: Before you go on. Does it come to this, that the absence of a manual retarder removes from the bus driver a choice of how to retard the vehicle, and therefore it would be better to have it? Is that what it comes to?

MR IVAN LEE: You can put it this way.

I will defer to Mr Kwok.

MR KWOK CHI SHING: Let me answer. Manual retarder is very important, especially when it comes to going downhill.

The Tai Po District Council and Ms Wong said that she has heard from coach drivers saying that they drive the coach at 70km/ph to the top of the hill and then go downhill from there, it is difficult for them to slow the car down to 50km/ph.

I believe the reason is that perhaps the vehicle is rather old, so they rely only on the exhaust retarder which is not as effective. If you reach 70km/ph at the top of the hill, if there is manual retarder and you use it, three to four seconds later then the speed will be reduced to 30 to 40 without using the brake.

This is very effective to reduce speed when you are travelling downhill.

In the past, the KMB will offer once every two or three years advanced driving courses. Bus captains will

have to practise on uphill and downhill sections of Tai Po Road. It was an old model of buses, and there was -- those without air conditioning, and it came with just certain gear, say, gear 1, gear 2, and drive.

Without manual retarders we would use this system by controlling the gear instead of relying solely on the brake. Because if you use the brake and you want to reduce speed, then there is serious friction on the brake pad. There will be heat generated. I think in the most dangerous situation the braking system will be reduced in effectiveness by about 20 to 30 per cent.

CHAIRMAN: Mr Kwok, forgive me for interrupting. But your point is very simple. This is a method of reducing the speed of a vehicle, particularly going downhill, without having to use the brakes, or having to use the brakes in a harsh way. That's the point, isn't it?

MR KWOK CHI SHING: Yes. You only have to touch slightly on the brake pedal. So it is safe for everyone.

CHAIRMAN: Thank you. We have your point.

Ms Wong.

MS MAGGIE WONG: And if I may move on to the second submission that you made.

You make reference to --

CHAIRMAN: What is the date of that?

MS MAGGIE WONG: The second submission is dated

15 June 2018.

CHAIRMAN: Yes.

MS MAGGIE WONG: And the Chinese is at page 112-19, in English, 112-97. It is the third submission. If I may go to --

CHAIRMAN: So it is not the 15 June one. It is 25 July.

MS MAGGIE WONG: 25 July 2018. It is page 112-97 in Chinese and --

CHAIRMAN: Yes.

MS MAGGIE WONG: -- 112-99 in English.

There are two matters I would like to raise with you. It is the use of surveillance cameras at page 112-97 at the top.

You made the point that -- under point 3, you made the point that you support use of surveillance camera to detect illegal parking.

Do I take it from your submission that in terms of surveillance cameras you supported the idea of installation of CCTV or surveillance camera within the driver's seat?

CHAIRMAN: To monitor illegal parking or to --

MS MAGGIE WONG: To monitor, first of all, to monitor illegal parking.

MR KWOK CHI SHING: Do we answer? Well, to monitor illegal parking, yes, that is feasible. I hope that it would be

installed at the front of the vehicle. That I support. Because we need to collect evidence, for everything. So that has to be done.

CHAIRMAN: Before you move on. Is this kind of camera not installed in many KMB buses already?

MR KWOK CHI SHING: Still half of the buses don't have it.

CHAIRMAN: But half do?

MR KWOK CHI SHING: Yes. And sometimes for some reasons the company said that footage is not captured, so there needed to be some enhancements. The effectiveness of the device should be enhanced.

CHAIRMAN: As far as the involvement of the bus captains is concerned with this issue, do you support their involvement in perhaps pressing a button which would flag the fact that this point in time is the one to examine the CCTV to find evidence of the illegal parking?

MR KWOK CHI SHING: Yes, it is a very good idea. I support that.

CHAIRMAN: Thank you.

Yes, Ms Wong.

MS MAGGIE WONG: At page 112-97, paragraph (4.1), and in English, page 112-100, you stated there that:

"It is necessary to pass the relevant regulations by legislation. Otherwise, no one will abide by the rules.

Even in the past, some employee of KMB ... requested in a report a video clip recorded by a bus camera for the purpose of complaining another driver's careless driving, which, however, was rejected by the then general manager of Kowloon Bay depot ... and if the employee really wanted to get it, he had to pay administrative fee of $5,000 (only $600 required by New World Bus and Citybus). It was obvious that the general manager was deliberately refusing the reasonable request ..."

I wanted to ask you this. What do you mean by it is necessary to pass a relevant regulation by legislation? To do what?

CHAIRMAN: Sorry, I don't understand why we are getting involved in this.

MS MAGGIE WONG: Yes --

CHAIRMAN: Because it is perfectly simple to ask for a subpoena to require KMB to come to court to produce the video tape.

This is not relevant.

MS MAGGIE WONG: Yes. Then why would the employee be required to pay a fee in order to get the footage.

CHAIRMAN: I thought I just indicated what the proper route is. The laws of Hong Kong permit someone who is a defendant in a criminal trial to require this kind of

evidence to be produced.

MS MAGGIE WONG: Then I'll move on.

In relation to the black box, you mentioned at the bottom, second last paragraph, at page 112-97, and at page 112-101, that the installation of black box has been installed for many years, but you stated that the black box functions have not been properly used.

Can you elaborate on this?

MR KWOK CHI SHING: First, the Committee asked the German contractor of the black box, there can be a lot of data inside the black box. It has been many years. The Transport Department was not insincere in requiring the installation of black box, because after the accident in 2013 in Tuen Mun, it was under pressure, and the bus company was required to install the black box. For whatever reasons, perhaps to protect itself legally, the company would not want any of the data.

At the Committee hearing -- now, the speed limit is 75, and the acceleration and deceleration mean is 2.3 plus a negative 2.3, and the gradient 44, or the tilting angle 44 degrees.

Can I supplement on this point, Chairman?

Now, the mean, well, the company has been forcing bus captains to speed. If the speed limit is 70 kilometres per hour, to prevent the bus captain from

speeding, perhaps there should be a reminder or an alert at 68. Why should it be that?

So after February and March, a staff member was disciplined for driving at 83 kilometres per hour. So the threshold for asking the bus captain to stop is a problem.

And earlier this year there was a case of a tram overturning. According to press reports, the tram company asked their drivers to drive fast, or quickly. So this threshold of 75 allows a bus to speed. Actually, it is all for buses to speed and at Tuen Mun Highway, for instance, it can reach 100 kilometres per hour. This is irresponsible. And when there is an incident the bus captain is held accountable. And he has to shoulder all legal responsibility.

Now, a bus captain only earns $10,000-odd; for the management, tens of thousands of dollars. So in fact there should be an earlier warning. And how come the speed has reached 83/85, and there is no alert? The threshold required by the company is very low.

I have heard many hearings of this Committee, and some was 1.3 and 2.3, and the tilting angle 44 degrees. By that the bus can roll over. So it is impossible that the thresholds be set at those levels.

CHAIRMAN: Mr Kwok, it is perfectly obvious, is it not, that

in setting the tilt angle at 44 degrees, all that was being done was it was being disabled? It was not intended to operate as an alert, was it, because the bus was falling over?

MR KWOK CHI SHING: Well, if it is disabled, then it will roll over. Take motor cycles as an example, if the torque is sufficient, then the motor cycle can be upright again. But it can also roll over when it is disabled. Because there is no force to upright it again.

So for people who don't know how to drive, may think that it is correct. But when it is disabled it will roll over. When there is a torque, then it will be upright again.

MS MAGGIE WONG: Mr Kwok, sorry to interrupt again.

So can I summarise, the point that the black box has not maximised its capability, is: first, speed, second, the braking system, and the third, stability control; is that it?

Can you first of all answer whether I have summarised correctly?

MR KWOK CHI SHING: Well, the black box should store certain data, so that when there is an incident, the driving attitude of the bus captain, should there be any breaking of rules, we can rectify it as soon as

possible, and it can be of use in investigation. We have listed out all the data that should be included in the black box and the thresholds. For instance, the voltage of electronic devices and anti-slip device of the wheels, of the tyres, and also the pressure, and also the sections of the deceleration.

And the fourth is the figures of the gear, that is the gear being used, and also the revolution, the speed. And the sixth is electronic hanging system, and that is the suspension system. In the past, it was the use of steel plates for shock absorber. Now it is by means of a suspension system.

The pressure of the suspension system and the tilt angle of the vehicle, whether the pressure was sufficient, if it isn't, then the vehicle will tilt. And whether, after tilting, the figure will automatically make the vehicle upright again, and the independent gas compressor, the figure of the pump, and also the figures for, data for acceleration and deceleration.

And nine, the total weight of the vehicle. If the black box is functioning normally, all this data can be found, and it is not expensive to require such functions, it is just that the company doesn't want such data to be available. Because if such data are

available people may be able to tell that maintenance is not done properly.

And because the Transport Department hasn't asked for it the company will not do so. They don't want to be caught.

MS MAGGIE WONG: Yes, Mr Kwok, about this black box, you earlier mentioned the driving attitude, it can detect the driving attitude of bus captains.

Does your union support the real-time monitoring of the driving behaviour of bus captains? Real-time monitoring.

MR KWOK CHI SHING: In principle it is good. We use technology to assist the bus companies, and to assist safety, but are the data correct, or accurate? There is ISO 39001, GPS, and lots of functions, but is the technology mature enough to be used in Hong Kong? As far as I know, it is not very accurate. Take satellite GPS, as an example. When we are in Mong Kok it cannot be accurate, or detected. Because there are too many high rises in Hong Kong, satellite signals are not well received.

The Committee or members of the public may say that a certain kind of technology is good, but is it mature enough? I am of the view that more experimentation should be carried out.

CHAIRMAN: Mr Kwok. You heard the evidence from the Czech Republic of the electronics engineer about how GPS is merely one of a number of systems that allows the position of the bus to be calculated at any one time.

MR KWOK CHI SHING: Yes. That's what is said. But I think it is not possible in Hong Kong. Maybe in the rural areas, but in the urban areas I don't think it can be accurate.

CHAIRMAN: Mr Kwok, with all due respect, you are not an electronics engineer, are you? We will hear from you about buses and driving of buses, but we will listen to our engineers when it comes to that issue.

Ms Wong, yes.

MS MAGGIE WONG: If I may go to the TD-1 bundle, at page 403.

It is the briefing paper of the LegCo on transport, on enhancement of safety of franchised buses in July 2018.

TD-1, page 403, and in Chinese at page 416.

May I ask your views about whether your union supports the use of some of these devices.

CHAIRMAN: Before we get to that -- do you understand, Mr Kwok, how this paper came about?

MR KWOK CHI SHING: I have not heard of this paper.

CHAIRMAN: Let me explain to you the evidence that we have

received.

The Transport Department in the middle of March convened a group made up of the franchised bus operators, three bus manufacturers, and the Transport Department, and they addressed a number of issues.

One was the issue of the training of bus captains, the other was the deployment or installation of technological safety devices on bus, and the third was the issue of seat belts.

That committee met a number of times, and at the end of July, 20 July, it published recommendations which were encapsulated in this briefing paper to LegCo. Do you understand?

MR KWOK CHI SHING: I understand.

CHAIRMAN: Are we to understand this as well, that at no stage was your union asked to make any representations to this working group?

MR KWOK CHI SHING: (Chinese channel playing to the floor).

CHAIRMAN: Yes, Ms Wong.

MS MAGGIE WONG: May I ask in that context whether you support the use of some of this in-vehicle --

MR KWOK CHI SHING: Well, Chairman, what you said, the answer is yes, that's correct.

CHAIRMAN: So no representations, never asked to make any representations? That's correct?

MR KWOK CHI SHING: They perhaps don't have much confidence of our union.

CHAIRMAN: Whether they had confidence in you or not, they didn't ask you for your help. Can you confirm that?

MR KWOK CHI SHING: That is correct. If we send them letters they won't reply to us.

CHAIRMAN: Ms Wong.

MS MAGGIE WONG: Yes, and the first device I'm going to ask is the electronic stability control in 4(a). Have you heard about this device before?

MR KWOK CHI SHING: Well, we only noticed this device after the hearing started.

MS MAGGIE WONG: Does your union support the use of this device?

MR KWOK CHI SHING: Yes, we do. We can't avoid using technology. If there are problems in its use we would reflect our views to ask for improvement, and we will continue to do that.

MS MAGGIE WONG: Can we go to 4(b). The retarder, the speed limiting regard. It is a retarder to cap the maximum speed of the speed limiters on downhill, and it is meant to enhance the speed limiter with a retarder to slow down a bus when the speed is over70km per hour under the downhill situation. Do you support this device? Does your union support the use of this device?

MR KWOK CHI SHING: I haven't looked into this device, but I would like to say that, well, for the speed to be reduced that means you do not accelerate, and you are running to neutral, and that is quite dangerous, if you are travelling on neutral gear. That's why we emphasise that there needs to be a manual system as an assistance, because you only stop the injection of fuel, and for a few seconds you may be running on neutral, and you will lose momentum, and that is dangerous, because without further injection of fuel there won't be any torque, and you can't -- well, by injecting -- allowing injection of fuel to control the vehicle. So you are running on neutral gear, you can't effectively slow the car down. When it comes to manual retarder, it is not something new.

It has always been there for heavy duty vehicles, say, for example, coaches, they are all installed with this. It is just because the Transport Department, tailor made this requirement for bus operators, because it would dispense with maintenance. They thought --

CHAIRMAN: Mr Kwok, you obviously find it difficult to accept this, but we understand your view about the manual retarder. We have got that point, and there is no need to keep repeating it.

Yes, Ms Wong.

MS MAGGIE WONG: Yes, can we go to 6(a), the bus monitoring and control system. In brief, it is -- they rely on the use of the GPS system, or positioning technologies. And the system will --

CHAIRMAN: I think that doesn't represent the position accurately.

MS MAGGIE WONG: Yes --

CHAIRMAN: It says "GPS or" -- and perhaps it ought to say "and other positioning technologies".

MS MAGGIE WONG: Yes. And other positioning technologies, and I'm reading from the document. Under 6(a), and the system will match the legal speed limit at the actual bus location. The real-time speed limit information can then be used to control the enhanced speed limiter, ie speed limiter with two speed ratings, in other words, the bus speed could be controlled or limited within the applicable speed limits depending on the road section.

So Mr Kwok, does your union support the use of this device?

MR KWOK CHI SHING: Yes, I do.

MS MAGGIE WONG: What about 6(b), collision alert and lane keeping device?

MR KWOK CHI SHING: In this regard, well, I think the technology is not matured enough. If they are installed, and when buses pull into bus stops one by

one, as you see the design is that they will be very close together. With this device, that means the alert will go off all the time. And for the lane keeping device, well buses are large in size. We travel in urban areas or when we pull in a bus stop, there may be some obstructions, say for example a cart, or another car parked there. So we would be straddling on two lanes. Sometimes we would be turning, and we would go into the next lane.

Very often, we can't just travel within the space of the lane, sometimes we would be going slightly over the other one.

For the Mobileye, it is only forward looking. Unless the technology evolves to the extent that it will have a 360 degrees view, I don't consider that to be suitable.

MS MAGGIE WONG: 6(c), driver monitoring device to monitor the driver --

CHAIRMAN: I'm sorry, you were talking over the translation, so could you begin again with your question.

MS MAGGIE WONG: Yes.

What about the driver monitoring device? 6(c).

CHAIRMAN: You are talking about the drowsiness technology?

MS MAGGIE WONG: Yes, the drowsiness technology.

MR KWOK CHI SHING: Four buses of the KMB have had this

installed. Bus captains don't support it. Because the camera would be pointing to their faces all the time, and it would put pressure on them.

Another thing is that if you install this, you will have to reduce the working hours of drivers, otherwise I can tell you that 90 per cent of bus drivers, might just doze off from time to time, because they work very long hours.

So don't fool yourself by thinking that with this device installed everything would be well and good. If the company wants to penalise you --

CHAIRMAN: I don't understand this, Mr Kwok. You are saying that 90 per cent of drivers doze off -- is that what you are saying? Because of long working hours?

MR KWOK CHI SHING: Yes.

CHAIRMAN: Wouldn't it be a good idea, then, to have a camera --

MR KWOK CHI SHING: Well, that means they just may be close their eyes for a bit. I won't try to fool you. Because that is a fact.

We have raised this issue a lot, it is because of poor management. We have put forward an idea of taking into account where you live. Say, for example, well, you live in Tuen Mun and you work in Lai Chi Kok, and there is only one company car, so you have to wake up

really earlier --

CHAIRMAN: Mr Kwok, thank you.

Yes, Ms Wong.

MS MAGGIE WONG: And the next one is the installation of seat belts on all buses on all seats.

Does your union support this?

MR KWOK CHI SHING: In order to reduce casualties and fatalities in accidents, yes. Well, it would be like coaches, where it is a 2-point safety belt, not 3-point safety system.

Yes, there will be inconvenience, because it will take longer for passengers to alight because some passengers might struggle a bit to take the seat belt off.

But so far, well, with so many risk factors, without proper or perfect measures we support the 2-point safety belt system.

MS MAGGIE WONG: Thank you. The last topic in this paper is the training for franchised bus captain.

If you go to paragraph 18, it states that:

"The working group has agreed that the Transport Department should promulgate a practice note on training framework for franchised bus captain."

Has your union been given a copy --

CHAIRMAN: There are two steps to that. That is what is

said here. We have received a submission from the Transport Department where we have been told that the practice note has been issued.

The question for you, Mr Kwok, has your union been provided with a copy of this practice note?

MR KWOK CHI SHING: No, we have not.

CHAIRMAN: Were you consulted at all in the review of how training might be provided, monitored, and regulated?

MR KWOK CHI SHING: No. Well, we have a lot of views.

MS MAGGIE WONG: And if you look at paragraph 19, it sets out the structure of the training arrangement for bus captain under the practice note, irrespective of whether they are full-time or part-time bus captain.

It includes regular training, and special purpose training. First of all, do you support this?

MR KWOK CHI SHING: Yes, we do.

MS MAGGIE WONG: And paragraph 20, it provides that the regular training for the bus captains should also include the following modules with relative weightings to be covered -- set out in (a) to (e) -- including safe driving and road safety, cognition of in-vehicle device, handling of incident, customer service and knowledge of company rules, traffic regulations, occupational health and safety.

Do you have any comments on the respective weighting

of these modules?

MR KWOK CHI SHING: I have some knowledge of the programme, but you have to bear in mind that if you just tell bus captains, they may not be able to grasp or understand the information. In the past, when we were trained, instructors told us the answers, so we all scored 100.

And the information would be passed on to the Transport Department, or senior management, and I think the Committee can take a look. Everyone scored 100. So it is not desirable.

In fact, the training programme should provide quantifying, quantitative figures, for instance our speed is usually 50, at most 70, and you should tell them how is it calculated.

So one kilometre is 1,000 metres, so 70 kilometres you multiply it by 1,000, it is 70,000, and you multiply it by 60, and that is the speed per minute, and then you divide by 60, and it is 19.5 metres per second. So you can quantify.

And they will understand the speed, because they have an actual figure of -- by 70km/ph that means you can travel 19.5 metres per second.

If 60km/ph, that is 16.6 metres per second, and 50 is 13 metres per second, 40 metres, 11.1 metres per second, so on and so forth.

It will be easier for them to understand if you give them figures. And you ask them to leave more room, then in Hong Kong there should be a space of three to four seconds between two vehicles.

But you have to let them understand what is meant by travelling speed. And in the past we were taught this way. When you reach the first arrow, you have to remove all fuel, and by the second arrow, well, if the phase is not changed you can add a little fuel, and go through the traffic signal.

And even if the front wheel has exceeded the line to stop, because we are buses, we have some room, we should go ahead. But nowadays they are not taught this at training.

Passengers and the public do not understand. They accuse buses of jumping the amber phase. In fact, it was taught in the past, and you have a flash lights. Sometimes you have this habit.

CHAIRMAN: Mr Kwok, thank you.

Yes, Ms Wong.

MS MAGGIE WONG: The next topic is working hours.

Mr Kwok, in your submission, the first submission, Chinese at page 88, TU-1A, and English at page 90-7, in paragraph 5 you stated there that:

"... the reasonable maximum working hours per day

shall be 12 hours, the maximum driving time shall be 10 hours."

May I ask you your view, or your union's view about split shift, with maximum of working hours, maximum 14 working hours?

MR KWOK CHI SHING: You want me to comment on this issue?

CHAIRMAN: We want you to give us your opinion, that is the union's opinion on the split shift guidelines. 14 hours maximum duty, 10 hours maximum driving, three hours' continuous break. What is your view?

MR KWOK CHI SHING: According to the current guidelines the maximum driving hours is 11. So the committee has been talking about three hours of rest, and 10 hours of driving. It will only happen in the second quarter of next year. In 2010, the guideline was 14 hours maximum and maximum working hours 11, and there is no guideline on the minimum hours of rest in between.

And the new guideline will only be implemented in the second quarter of next year.

CHAIRMAN: That's why --

MR KWOK CHI SHING: And many of us will only have two hours or so of rest including meals, and then in the second quarter of next year there is a window.

CHAIRMAN: Mr Kwok, the second quarter of next year is when these guidelines will be fully implemented. That's the

provision, is it not?

MR KWOK CHI SHING: It is said so.

CHAIRMAN: Let me ask you these questions.

Is the guideline, with a requirement of three hours of a continuous break, implemented at all in KMB now?

MR KWOK CHI SHING: There is no hard and fast rule. It depends on the route. And for some you only have one hour of meal.

So 11 hours, driving hours, is maximised, sometimes even over that. Because there is no hard and fast rule according to TD.

CHAIRMAN: Please concentrate on the question. Has KMB begun to implement the reduced, or rather the requirement for a continuous break of three hours in special shifts where 14 hours on duty is permitted, but there is a maximum of 10 hours driving. Has it begun to implement that at all?

MR KWOK CHI SHING: No. No, they don't have enough manpower. It is 11 hours of driving. 10 hours of driving is our suggestion.

The maximum duty hours are 14 driving hours, and 11.

Then in between, 30 minutes.

Next year, in the second quarter, after continuous driving of six hours, there must be 40 minutes of rest. Right now it is only 30 minutes.

KMB has not implemented this rest of three hours in between. For some, maybe two hours or so. We have a colleague here, driving special shift duties, and he has sent e-mail to the Committee. Perhaps he has sent it to the wrong address. It was not received by the Committee. He talked to us yesterday.

And he is on monthly salary. He is just sitting next to me, and if the Committee permits, he will spend some time to tell you his views.

CHAIRMAN: Is that Mr Wong?

Yes, Mr Wong, did you drive a special shift this week?

MR WONG KIN WAI: I am on sick leave after injury at work. I have been driving there for one year.

CHAIRMAN: When did you last drive a special shift?

MR WONG KIN WAI: 26 June.

CHAIRMAN: And can you recall, if you are able to, what your day was that day? What time you left home, what time you started duty, what time you took your break, where you took your break?

MR WONG KIN WAI: I woke up at 6.15. I left home at 6.30, and I travelled to work at Mei Foo. I took two company cars. At 7.35 I clocked in.

I drove -- I started at 11.40 to Olympic, and there was one hour for a meal, and then the break in between

two hours 47-minutes. I drove again at 15.50.

CHAIRMAN: Mr Wong, we are not in a hurry. Take your time to describe this.

Where do you live?

MR WONG KIN WAI: Kwai Shing West Estate.

CHAIRMAN: And you left Kwai Shing West Estate at 6.30 that morning?

MR WONG KIN WAI: Yes.

CHAIRMAN: And you went to Mei Foo?

MR WONG KIN WAI: Yes.

CHAIRMAN: How did you travel?

MR WONG KIN WAI: Bus number 37.

CHAIRMAN: As a passenger?

MR WONG KIN WAI: Yes.

CHAIRMAN: And when you got to Mei Foo what did you do?

MR WONG KIN WAI: I boarded an engineering car to arrive at Stonecutters Island bus depot.

CHAIRMAN: So this is a KMB car, is it?

MR WONG KIN WAI: Yes.

CHAIRMAN: Car, not bus?

MR WONG KIN WAI: A coach. A coach of 60 seats.

CHAIRMAN: With fellow bus captains?

MR WONG KIN WAI: Yes.

CHAIRMAN: So from Mei Foo, with your fellow bus captains you went to Stonecutters Island?

MR WONG KIN WAI: Yes.

CHAIRMAN: What time did you get there?

MR WONG KIN WAI: Around 7.20 am.

CHAIRMAN: And what facilities are there, at Stonecutters?

MR WONG KIN WAI: It is a KMB bus depot.

CHAIRMAN: And having arrived there, did you clock in, as you called it?

MR WONG KIN WAI: Yes.

CHAIRMAN: How do you clock in?

MR WONG KIN WAI: Use an Octopus card on a computer system, and then I will have a roster for the day. I have a job sheet for the day.

CHAIRMAN: You use your Octopus card, so you are electronically clocked in at 7.35 in the morning?

MR WONG KIN WAI: Yes.

CHAIRMAN: What happens next?

MR WONG KIN WAI: I had the licence number of the bus I was supposed to drive, I went to the car park to find it, and then I drove it to the bus terminus.

CHAIRMAN: What time did you leave Stonecutters bus depot.

MR WONG KIN WAI: 8.35.

CHAIRMAN: Between clocking in at 7.35 and leaving the bus depot at 8.35, what duties did you perform?

MR WONG KIN WAI: I left Stonecutters Island depot at 7.35, I drove to the bus terminus of Kwai Shing East Estate

and then the first departure was at 8 am.

CHAIRMAN: So you had to take the bus from the bus depot to Kwai Shing East, and what is the status of that place, is that a terminus?

MR WONG KIN WAI: Yes, it is a bus terminus at Kwai Shing West Estate.

CHAIRMAN: West?

MR WONG KIN WAI: Yes.

CHAIRMAN: Thank you. And you began driving a route on that bus at around 8 o'clock that morning?

MR WONG KIN WAI: Yes. 8 am is the first departure.

CHAIRMAN: What was the route number?

MR WONG KIN WAI: 37.

CHAIRMAN: What is the destination, the ultimate destination that that route goes to?

MR WONG KIN WAI: Olympic MTR station.

CHAIRMAN: Carry on. Describe your day.

MR WONG KIN WAI: Since I work for the special shift on peak licence, then I would put on the C licence, that is no passenger to go to Kwai Shing West, until 9.31, all the way until 11.40, which is the last trip, driving to Olympic station, then I would finish my morning session, that would be about 12.45.

CHAIRMAN: Where were you when you finished the morning session?

MR WONG KIN WAI: The vehicle will have to be put on a stop service sign, have to drive it to Kwai Shing East Estate to leave it there.

CHAIRMAN: Is that a bus terminus?

MR WONG KIN WAI: Well, it is kind of. It is for bus captains to take their meal break, and before the next driver comes to take the bus, we can leave the bus there.

CHAIRMAN: So what time did you arrive at Kwai Shing East Estate?

MR WONG KIN WAI: About 12.45.

CHAIRMAN: So what time had you finished driving the route 37 route?

MR WONG KIN WAI: Normally it will be 12.40, driving for one hour, which is the journey time, and then I have to add one hour, which is my meal break. So normally, it will take me to eight minutes past 2, including the meal break.

CHAIRMAN: Where did you have the meal break that day?

MR WONG KIN WAI: Kwai Shing East Estate.

CHAIRMAN: And are there rest facilities there? KMB bus rest facilities?

MR WONG KIN WAI: Previously yes. Because of the Housing Authority problems they are removed. Recently I walked past, I see another facility installed. I think it was

some time last week or so.

CHAIRMAN: On 28 June, were there any rest facilities at Kwai Shing East Estate?

MR WONG KIN WAI: I don't really know.

CHAIRMAN: Well, where did you have your meal?

MR WONG KIN WAI: Shopping mall in Kwai Shing East Estate.

CHAIRMAN: What did you do with the rest of the break time?

MR WONG KIN WAI: I would take transportation to Kwai Shing West Estate to the terminus and rest at the rest facilities there.

CHAIRMAN: What transport did you take to do that?

MR WONG KIN WAI: Many modes. 47X, 37M, and 37. They are all buses.

CHAIRMAN: So you took a bus?

MR WONG KIN WAI: That's right.

CHAIRMAN: As a passenger?

MR WONG KIN WAI: That's right.

CHAIRMAN: A regular bus route, not a special bus driving bus captains?

MR WONG KIN WAI: I was a bus captain working for a special shift for a regular route.

CHAIRMAN: I understand that. This is your meal break. And you moved from Kwai Shing East to Kwai Shing West. And you did so as a passenger; is that right?

MR WONG KIN WAI: That's right. Because there were no rest

facilities at Kwai Shing East, and there are only rest facilities for staff at Kwai Shing West.

CHAIRMAN: And you rested at Kwai Shing West?

MR WONG KIN WAI: That's right.

CHAIRMAN: What are the rest facilities there? Are there seats? Are there benches?

MR WONG KIN WAI: There are three benches and some tables.

CHAIRMAN: Are you able to lie down?

MR WONG KIN WAI: There are something like sofa, so I could lean back. But if you are talking about something like a bed, no.

CHAIRMAN: You are able to recline, is that it?

MR WONG KIN WAI: That is right.

CHAIRMAN: When did your break come to an end?

MR WONG KIN WAI: That would be 15.55.

CHAIRMAN: So what was the length of your break that day? When did you start?

MR WONG KIN WAI: Including taking a meal, it is about two hours 47 minutes.

CHAIRMAN: When did it start?

MR WONG KIN WAI: I think my roster started, according to the schedule, is eight minutes past 2, and then until 15.55.

CHAIRMAN: Thank you, and then you resumed your bus driving?

MR WONG KIN WAI: That is right.

CHAIRMAN: Were you on route 37 again, or another route?

MR WONG KIN WAI: Also 37.

CHAIRMAN: And for how long did you ply that route?

MR WONG KIN WAI: About one year.

CHAIRMAN: No, when did you finish driving that route that day?

MR WONG KIN WAI: 20.43. That's the time when I knocked off work. Including going to Stonecutters Island to leave the bus there.

CHAIRMAN: So you clocked out, as it were? Is that right?

MR WONG KIN WAI: That's right.

CHAIRMAN: So you clocked in at 7.35, is that it?

MR WONG KIN WAI: Before 7.35. Before 7.35.

CHAIRMAN: What time did you clock in?

MR WONG KIN WAI: It was about 7.20, when I clocked in after taking the company bus to go to Stonecutters Island.

CHAIRMAN: And that day, having finished and clocked out, clocked off, did you return home straight away, or did you do other things?

MR WONG KIN WAI: I went home straight away.

CHAIRMAN: Can you help us as to what time you arrived at home?

MR WONG KIN WAI: It was around 9.20.

CHAIRMAN: The following day, 29 June, were you on duty?

MR WONG KIN WAI: My last day was 26 June. Because in my

last trip to Kwai Shing West Estate there was a traffic accident.

CHAIRMAN: I beg your pardon, the 26th. Were you involved in that traffic accident?

MR WONG KIN WAI: That is right.

CHAIRMAN: What time was the traffic accident?

MR WONG KIN WAI: 7.20.

CHAIRMAN: What was the nature of the traffic accident?

MR WONG KIN WAI: A taxi travelling on a third lane cut across to the first lane to a smaller road, Beech Street. I was travelling on the first lane, I could not stop in time, and rammed into the taxi.

CHAIRMAN: Were you injured?

MR WONG KIN WAI: Yes.

CHAIRMAN: And is that when your sick leave began?

MR WONG KIN WAI: That is right.

MEMBER AUYEUNG: Thank you, Chairman.

I just want to follow up. When you are talking about the resting places, you had three chairs. Usually, how many drivers are in that location together?

MR WONG KIN WAI: I think about three or four. Because, well, they would not be there for a prolonged period of time. There would be five to six minutes of rest time, they would go in to take a seat.

MEMBER AUYEUNG: So is there enough room for all the drivers

inside the premise?

MR WONG KIN WAI: I think there was sufficient space for seven to eight people.

CHAIRMAN: Mr Kwok, we are going to take a break now. And we will resume at 12 o'clock by that clock. Thank you.

(11.43 am)

(A short break)

(12.03 pm)

CHAIRMAN: Mr Wong, you told us that you were driving that route, or rather the special shift arrangement, for a year; is that correct?

MR KWOK CHI SHING: That is correct.

CHAIRMAN: Can you describe, if you remember it, perhaps going backwards from that week of 26 June, how many days in a row were you driving that special shift without having a break?

MR KWOK CHI SHING: Basically from Monday to Saturday I would be working continuously for five to six days.

CHAIRMAN: Well, was it five, or was it six, or could you change the pattern?

MR KWOK CHI SHING: We are on a roster on the shift, so normally we would be on duty for five or six days, and then there will be one rest day.

CHAIRMAN: And were your hours of work broadly the same -- clocking in time, clocking off time?

MR KWOK CHI SHING: That is correct, it is a fixed time.

CHAIRMAN: If it be necessary, do you consent to KMB releasing to us the data they might have obtained about your work on 26 June when you clocked in, when you arrived at a bus terminus, when your break began, when you clocked off, all of the data that day, do you consent to that being provided to the Committee?

MR KWOK CHI SHING: Yes.

CHAIRMAN: You told us about the rest facilities that were available at Kwai Shing West Estate; were there occasions when you took your rest in this split shift arrangement at other places?

MR KWOK CHI SHING: Sometimes, I would, if it were too noisy, too many people going in and out, I would choose to go home.

CHAIRMAN: The question really is this. Were there other places where you took this break, other than Kwai Shing West Estate?

MR WONG KIN WAI: No. Because there was only rest facilities at Kwai Shing West Estate. When I went to work, there was still no rest facilities at Kwai Shing East Estate.

MR KWOK CHI SHING: I would like to add.

CHAIRMAN: Just a moment, Mr Kwok, your turn will come.

MEMBER AUYEUNG: Thank you, Chairman.

I just want to clarify what you said earlier, Mr Wong.

You did mention about your break is about two hours and 47 minutes, right? That's including meal time. This is the break time, two hours and 47 minutes; is that correct?

MR WONG KIN WAI: That is right.

MEMBER AUYEUNG: You also mentioned that if it is a bit too noisy, you will go home. If you actually have to go home, can you make a guess on actually during that two hours and 47 minutes, really, what kind of rest you can have before you carry on with your work of the day?

MR WONG KIN WAI: Well, there wasn't enough time for a rest, I just closed my eyes, rest my eyes and tried to relax, to keep my shape up.

CHAIRMAN: Mr Kwok, you wanted to say something.

MR KWOK CHI SHING: Yes. For Kwai Shing East, it seems that a rest kiosk has been put in just a few days ago with the help of a trade union, Mr Chow Wai Hung, within a short time, the work was completed. I mentioned that the trade union intervened. We are not affiliated with any political parties. If we want something done we would go to the community to lobby. I think the main objection comes from district councillors. If there are no objections coming from the community, it would be the

problem of the government department.

MS MAGGIE WONG: Mr Wong, may I clarify a few matters.

You said that you clocked in before 7.35, and then you take the meal break at 2.08. On my calculation, it is around six hours 50 minutes before you take the meal break. So, I was trying to find out, do you have breaks or rest time during that six hours and 50 minutes?

MR WONG KIN WAI: The last driving time of mine during the morning was 11.40 for a journey time of one hour.

I could drive the bus to Kwai Shing East Estate to leave it there, and it was earlier than expected because of little traffic. So I arrived there early. My actual -- well, there was no break time at that time.

Perhaps I can give you my timetable or roster for your reference.

MS MAGGIE WONG: Thank you, yes. Because I would like to know how the rest time was arranged during that shift.

I would like to know, during that six hours and 50 minutes, how that rest time was arranged, so it would be great if we could get your timetable.

You referred to the meal break, one hour, included within the three successive hours of break; is that correct?

CHAIRMAN: I don't think it has been acknowledged that the three hour continuous break system is being implemented.

Am I right, Mr Kwok, that it is not being implemented?

MR KWOK CHI SHING: As I said, that it would be implemented in the second quarter of 2019. Well, now the company will have full flexibility. If there is 14-hour duty hours then there won't be more than 11 hours of driving. So strictly speaking, there is little rest time. It is just because of the manpower shortage. Everyone will be used to the fullest. In the past they said that it was about 6 am or 11 am, and then in the afternoon it would be 3 pm or 4 pm. That would be the arrangement.

Now, because of the manpower shortage, well, 3 pm would be late. Some of us would be asked to work on a different route.

CHAIRMAN: The question is very simple, Mr Kwok.

Thank you, Ms Wong.

MS MAGGIE WONG: I think I wanted to ask Mr Wong this question about the allowance in special shift. Is Kowloon Motor Bus paying you the reduced allowance?

CHAIRMAN: Well, it is a number, $21.90.

Is that what you get paid when you have your break in a special shift?

MR WONG KIN WAI: Could you please wait. I think the special shift allowance per day is $69.70.

CHAIRMAN: That's the total allowance, not a hourly rate?

MR WONG KIN WAI: That is the total. That is the total, $69.70 is the total.

CHAIRMAN: For how many hours of break?

MR WONG KIN WAI: Two hours and 47 minutes.

CHAIRMAN: Yes, Ms Wong.

MS MAGGIE WONG: Can you help me with this, about this shift allowance. If you go to KMB bundle 1, Mr Wong, this question is directed at you. If you go to KMB bundle 1, page 109. There is a table showing the allowance.

MR WONG KIN WAI: I would like to add something. The $21.90 is the calculation of a staff on a daily rate. $69.70 is the calculation for someone on a monthly salary.

MS MAGGIE WONG: Do you have that document in front of you at page 109?

MR WONG KIN WAI: Yes.

MS MAGGIE WONG: If I may ask you to look at the left column. "Employed after 2004", the old monthly rate. The basic salary. Are they paying you 11,810, or are they paying you 15,366? Which is applicable in your case?

MR WONG KIN WAI: 15,366.

MS MAGGIE WONG: And then you would be paid the split shift allowance of $1,951.50; is that for the whole month, the monthly rate?

MR WONG KIN WAI: Well, it depends on the number of days.

If you cannot complete 15 days, then you cannot get the full rate of allowance. So it is on a pro rata basis.

MS MAGGIE WONG: So can you tell us what allowance you would receive from (B) to (G).

CHAIRMAN: I think we are being bogged down in a minor detail here. Either way, the figures speak for themselves.

MS MAGGIE WONG: Yes. So maybe I will move on to another topic.

Mr Kwok, I would like to raise another topic with you. It is about the issue you raised in your submission about having a priority bus lane.

And your submission in English is at page 90-7, and it should be in Chinese, page 88.

It states that:

"... where a bus has made a direction signal preparing to exit a station, other vehicles that see it must stop or let the bus exit the station. A safety distance of two seconds is used as the termination distance by which the bus must be allowed to exit the station first ... vehicles are prohibited from cutting in front of buses within 10 metres of their front to prevent the buses from suddenly having to decelerate."

In your submission you provided some examples as to the problems about cutting lanes -- and that is in the

TU bundle at pages 104 to 108 -- at the Hung Hom station.

So are you suggesting by this suggestion that you would like to have the priority bus lane system similar to what they have in Singapore?

MR KWOK CHI SHING: Yes.

MS MAGGIE WONG: Regarding your point about the bus that must be allowed to exit the station first, do you have any view as to how --

CHAIRMAN: By that you mean the bus stop?

MS MAGGIE WONG: The bus stop.

Do you have any view --

MR KWOK CHI SHING: Yes, yes, correct. Bus stop.

MS MAGGIE WONG: Do you have any view as to how it can be enforced?

MR KWOK CHI SHING: Well, we use cameras, for new vehicles they have got cameras, so when the signal is issued for two seconds, if the vehicles at the back do not stop then it can be enforced.

CHAIRMAN: So that would require a camera at the rear of the vehicle?

MR KWOK CHI SHING: Right now, for new vehicles, the rear mirrors on the left and the right there are cameras.

Why did I say two seconds? Because we understand that there should be a distance of two seconds, as

promoted by the government, so that there would be a safe distance, so no emergency halting of the vehicle is required.

In Singapore they draw a line, and that may lead to misunderstanding.

If I have just passed that line and reached that line and you give me a signal, then there may be some misunderstanding.

So two seconds is to quantify the distance. I propose two seconds, you may suggest three. It is just to quantify the distance. It doesn't really have to be two seconds. Because in Hong Kong space is limited and bus stops are numerous, people would not know what the line is about.

In Hong Kong, to have road markings, you have to guess at it, and you have to set up a sign, it is complicated, and the markings may be removed as time goes on. So it is best to use time as a reference. It is safer.

MS MAGGIE WONG: The next topic is on training safety. You mentioned in your first submission at page 84 in Chinese, English at page 90-4 -- you raised the issue about training safety. You stated there that:

"During that time, even when road traffic was relatively simple, and I was familiar with the roads,

I also need to be trained for one month. Within that one month, majority of the time was spent in bus-driving training ..."

And you commented that the training nowadays of 18 days is insufficient.

So did I summarise it correctly, that your union's view is that the current training to newly recruited bus drivers is in sufficient?

MR KWOK CHI SHING: You are correct. You are correct.

MS MAGGIE WONG: What is your proposed duration of training to new recruits?

MR KWOK CHI SHING: It is about the operation of the bus company. One month is about right, unless the new recruit has a bus licence. Now, for those who have to take a licence examination, one month is the minimum. In particular, the recruiting requirements are lower. And it was said at the hearing that a person with one year private car licence can then learn to drive, and after 18 days he can start driving a bus. That is very dangerous, and I think that consideration is immature.

MS MAGGIE WONG: And you commented in your submission, or reply, on 25 July 2018, as to the Transport Department's role in training. If I may take you to the submission.

CHAIRMAN: Perhaps you can just summarise the point.

MS MAGGIE WONG: Yes. The point was that you commented that

the Transport Department should take a more active role on training and supervision of bus captains courses. Is that the point you are trying to make in your later submission on 25 July?

MR KWOK CHI SHING: Yes. Yes, there should be monitoring by the Transport Department, because the training course made by the bus company would only suit its needs without other considerations. The TD should monitor.

And there should be consultation with trade unions, because we are in service, we know the qualifications for professional bus captains, they should be more open in discussing with us. That would be much better.

MS MAGGIE WONG: I have completed my questioning. Thank you.

CHAIRMAN: Thank you, Ms Wong.

Mr Kwok, those are the questions that we have for you. You indicated at the start that there was some other material that you wanted to make available to us. And if you wish us to receive that material, please provide it in writing, and we will consider it.

Is that what you wish to do?

MR KWOK CHI SHING: We will, if we can.

Since the Committee still takes time to complete the whole consultation, and if we can make it we will submit the material as soon as possible for the Committee's

reference.

CHAIRMAN: Well, we look forward to receiving whatever it is that you choose to give us.

But for the moment, we thank for coming to give evidence. Thank you, Mr Wong, for giving us an insight into a day in a life of a bus captain working a special shift. That was most helpful to us.

But we have others from another union who are going to give evidence. So what we will do is take a short break now and invite you to withdraw from the table, and the other representatives can come forward and occupy the table.

We will take a 2-minute break. Thank you.

(12.27 pm)

(A short break)

(12.30 pm)

REPRESENTATIVES FROM STAFF RIGHTS ASSOCIATION OF KMB:
MR CHAN WING HO, MR TAN SHIN HING, MR YIU KWONG CHUN, AND MR LI KWOK WAH

(Evidence given in Cantonese, transcription of the simultaneous interpretation).

CHAIRMAN: We thank you, Mr Li, and your colleagues, representatives of the Staff Rights Association of KMB, for accepting our invitation to come and give evidence today.

I'm going to ask Ms Wong in a moment to begin asking you questions on behalf of the Committee.

Mr Li, if you wish one of your colleagues to answer any particular question, just indicate who it is, and defer to him, and then we will hear from whoever it is that you wish us to hear from, answering a particular question.

MR LI KWOK WAH: I understand.

CHAIRMAN: Thank you.

Ms Wong.

EXAMINATION BY MS WONG

MS MAGGIE WONG: Thank you, Mr Li. This Committee is tasked to review the safety aspects of the franchised bus operations, so my questions will be focusing on that area.

Before I ask a few questions I would like to ascertain some basic facts about your association.

Your association was established in January 2017, correct?

MR LI KWOK WAH: Yes.

MS MAGGIE WONG: And there are approximately 200 members in your association as of 18 June 2018.

MR LI KWOK WAH: That's right.

MS MAGGIE WONG: And your members, 200 members, are all full-time and part-time staff of Kowloon Motor Bus?

MR LI KWOK WAH: That's right.

MS MAGGIE WONG: In what percentage?

MR LI KWOK WAH: There are about 8,600 bus captains. We have 200 members?

MS MAGGIE WONG: What percentage is full-time staff and what percentage is part-time staff?

MR LI KWOK WAH: There is only one part-time member. The others are all full-time.

CHAIRMAN: And they are all bus captains?

MR LI KWOK WAH: There are also some bus regulators, three bus regulators.

CHAIRMAN: And the rest are bus captains?

MR LI KWOK WAH: That's right.

MS MAGGIE WONG: Mr Li, I would like to go to a specific topic on scheduled trips and loss of time.

If we could go to your submission at page 129-4 in English. You have only made one submission dated 23 April 2018. In Chinese it starts at page 117.

And the passage is at page 120.

I think in the bottom paragraph, you stated that:

"... with the continued loss of bus captains, and the need maintain the scheduled trips and avoid cancelling scheduled trips, causing bus captains' entitled rest time during work subject to the situation of lost trips and the road traffic circumstances that

day. For many bus captains who would need to drive various bus routes, in order to have more time for rest during work, will try to complete the bus routes as soon as possible depending on road traffic condition and return to the bus terminals for rest."

Can you tell us or elaborate how the need to maintain scheduled trips would affect bus captains' entitled rest time?

MR LI KWOK WAH: The bus company, say, for example, there is one hour of journey time, it would be compressed to 55 to 58 minutes. Bus captains have little rest time. If you compress journey time even by a few minutes, that means a loss of a few minutes of rest time.

MS MAGGIE WONG: So can you confirm that as to whether, when trying to complete the bus routes with a less scheduled time, would that increase the likelihood of speeding by bus captains?

MR LI KWOK WAH: That is right. Because you have to catch up in order to get more rest time. Yes, buses travel at 70km/ph, in some sections where there is a speed limit of 50, we may be travelling at a higher speed, and there will be pressure, because we would need to make up for the time. As a result they will have to speed, say, for example, travelling at 70km/ph at a section of 50km/ph speed limit.

MS MAGGIE WONG: And we have heard about the system that there is a monitoring system of drivers, and a certain threshold was set in the black box that you cannot exceed a certain speed limit, for example 50km per hour would be set at 55km per hour. In those circumstances, if you are speeding --

CHAIRMAN: Whose evidence you are quoting there?

MS MAGGIE WONG: I'm quoting evidence perhaps from Citybus.

CHAIRMAN: Thank you.

MS MAGGIE WONG: I'm just enquiring, is there a similar system in the KMB buses for road sections that have 50km per hour?

MR LI KWOK WAH: Yes, for KMB there is the black box. It is a tachograph. It records the operations of the bus. You can retrieve the data. Regularly the company would check the black box, say, for example, on a certain date, a particular bus captain sped during a certain section. There is this system with the KMB.

MS MAGGIE WONG: Do you know what threshold has been set for the 50km per hour road section?

CHAIRMAN: By KMB on their tachomatic devices?

MS MAGGIE WONG: By KMB on their tachograph devices.

MR LI KWOK WAH: I don't understand your question.

MS MAGGIE WONG: We have heard evidence -- perhaps I will explain more. We have heard evidence from another bus

operator, Citybus, that for a road section that has a fixed speed limit of 50km per hour they would set at 55km per hour within that black box. And once the bus driver exceeded 55km per hour for a continuous period of time, say, 10 consecutive seconds, it would be automatically recorded in the form of an automatic generation exception report, and certain punishment would be accorded to different bus captains for exceeding certain speed limit.

And we have that particular page there.

A speed of over 55km per hour for 10 consecutive seconds on road sections with speed limit of 50km per hour, and speed of over 75km per hour for 10 consecutive seconds on road sections with speed limit of 70km per hour.

So, as far as you know, as bus captain, do you have a similar system for bus captains in Kowloon Motor Bus?

MR LI KWOK WAH: Yes, there is one. Our understanding is that for KMB black boxes, they would record your speed, say, for example, if you are travelling at 78km/ph, an excess of 8 kilometres per hour, if you do not accelerate within 10 seconds, there won't be any record. But if it is over 10 seconds there would be a record. That's the same for 70km/ph, and 50km/ph. It depends on the duration. 10 seconds. If within that time you do

not accelerate it will not be recorded. Otherwise, there will be a warning letter or reduction of your bonus.

CHAIRMAN: So that I can understand that, are you saying that the vehicle can carry on at 78 kilometres an hour, as long as it doesn't accelerate to a greater speed? Or does it have to come back to 70 within the 10 seconds?

MR LI KWOK WAH: Yes, within 10 seconds it will have to be brought back to 70km/ph.

MS MAGGIE WONG: You mentioned there will be deduction of allowance. In what circumstances --

MR LI KWOK WAH: Bonus. Bonus.

MS MAGGIE WONG: So that would be bonus? In what circumstances would the bonus be reduced, and by how much?

MR LI KWOK WAH: KMB has merged the bonus into our basic salary. Before that there were two types of bonus. One for service another for safety. Each had the value of 1,178.

Now, if it is a serious incident, such as a traffic accident, then the whole month's bonus will be deducted. Usually it will be half a month's bonus should there be an incident. The same applies to good service bonus. If you receive too many complaints, half or one month of good service bonus will be deducted.

CHAIRMAN: But that's all history now, is it not? There is no bonus, there is no deduction.

MR LI KWOK WAH: That's true.

MS MAGGIE WONG: So if a bus driver speeds, or if there is a speed exception report generated, would he receive any penalty?

MR LI KWOK WAH: It depends on the number of violations -- the company will look at that -- and also the gap between two violations. If it is every month, there will be deduction. If there is one month or seven months in between then a warning letter will be issued to remind the bus captain.

MS MAGGIE WONG: So under the current system, there is still a deduction regime depending on how frequent the violation is; is that what you are saying?

MR LI KWOK WAH: Yes.

CHAIRMAN: From what is the deduction made?

MR LI KWOK WAH: Now, there can be no bonus to deduct. Because the bonuses are merged into our monthly salary, there can be no deduction. So every time you have one violation you receive a warning letter. Three warning letters result in dismissal.

MS MAGGIE WONG: So it is not a deduction from salary --

CHAIRMAN: Just a moment, Ms Wong. Please.

Three warning letters result in what, Mr Li?

MR LI KWOK WAH: Dismissal.

MS MAGGIE WONG: So there is not a system of deduction from the salary, but it is simply dismissal following three warning letters; is that the case?

MR LI KWOK WAH: Yes.

MS MAGGIE WONG: The next topic I would like to ask is the training.

If you look at page 129-6 in English, Chinese at page 122. And you mentioned about the 18 day-training and the four-week training.

Can you tell us what is the difference in terms of the modules between the four-week training and the 18-day training provided by Kowloon Motor Bus?

MR LI KWOK WAH: Right now KMB has this system. Those without a bus driving licence, 18 days will cover the training to get a licence, so the module is very similar to the four-week training, but much compressed.

For the 18-day course, we believe the quality of training will drop, because for new bus captains we don't know what vehicles they have driven in the past, or even if any. So they might be goods vehicles drivers, or taxi drivers in the main.

We are heavy duty buses, as a type of mass transport mode. So if training isn't sufficient, will this increase the likelihood of traffic accidents? And I'm

of the view that the training time is insufficient. I have served for 27 years. When I joined, I received four-week training. Although I already had a licence, I had to be trained for four weeks, but for KMB, if a new recruit has a licence then the training is only for seven days, to train them on the basics and also knowledge about the routes, and then he can become a professional bus captain.

There are so many traffic accidents involving buses. Many of them involve buses.

To train a bus captain, there should at least be four weeks covering the lessons and also practical training on the road. Our suggestion is for every driving instructor he can only take two trainees. In the past it was three. We want that to be changed to two, two trainees per instructor.

MS MAGGIE WONG: Yes. Thank you.

May I take you to a document in the TD-1 bundle, at page 403. The Chinese is at page 416.

Mr Li, this is a briefing paper produced by the Transport Department in consultation with five franchised bus operators and three major bus manufacturers. And this is the product of their recommendation.

CHAIRMAN: This was a special working group set up by the

Transport Department in the middle of March, and it was required to report within three months and did so on 20 July, with this, what is now this briefing paper for the transport panel of the Legislative Council.

MS MAGGIE WONG: And this paper covers three aspects: first, the in-vehicle safety devices; second, seat belts; and third, training of bus captains.

My first question is, have the Transport Department or Kowloon Motor Bus consulted your views on any of the topics between March and June 2018?

MR LI KWOK WAH: No, this is the first time I have seen this paper. The company has not consulted my trade union.

MS MAGGIE WONG: And we have been informed recently that the Transport Department has recently issued a practice note to franchised bus operators in respect of the training for bus captains to align the training arrangements of different operators to be implemented from October 2018.

Have you been provided or has your union been provided with a copy of the practice note?

MR LI KWOK WAH: No.

CHAIRMAN: Ms Wong, before you move on.

Last week, did the Committee not ask the Transport Department to be provided with a copy of the practice note?

MS MAGGIE WONG: Yes.

CHAIRMAN: Have we been provided with one?

MS MAGGIE WONG: We have not.

CHAIRMAN: Thank you.

MS MAGGIE WONG: And the last topic, Mr Li, I would like to ask you is this.

Amongst your 200 members -- I know some of them are not actual bus drivers, but most of them are -- how many of them are on special shifts or split shifts, to your knowledge?

MR LI KWOK WAH: Myself, is a special shift duty driver. I have not done formal statistics, but I know about 20 to 30 members who are special shift bus captains.

MS MAGGIE WONG: We have heard evidence that the recent February 2018 guidelines are not strictly enforced or implemented in terms of the rest hours, and the three consecutive hours.

CHAIRMAN: I don't think, Ms Wong, with respect, it is a question of strictly enforced. The agreement was full implementation would not take place until the second quarter of 2019, and the issue is whether any implementation has taken place as of now.

MS MAGGIE WONG: Yes.

MR LI KWOK WAH: Not in KMB. No such arrangement. Many many special shift vehicles don't even provide three hours in between for meals and rest. We have collected

information, many special shift do not provide three hours. According to KMB they have three hours, but according to our survey, no, less than three hours.

CHAIRMAN: When was this survey conducted?

MR LI KWOK WAH: About two weeks ago, we have been asking our members, and many routes had less than three hours.

For some routes, like 258P, 5S, 60X, 256B, many routes do not provide three hours for meals and rest.

CHAIRMAN: Do you have copies of the survey, the results of the survey?

MR LI KWOK WAH: We have printed -- now, here are two. Because the information is in my mobile phone, and for some of the information it is not appropriate for me to pass it to you because it is a document I have taken photo of. They are company documents.

CHAIRMAN: Well, is there some material that you can provide us, redacting it as you feel appropriate so that we can see the extent of your survey and how many bus captains indicated that they were not being given a three-hour break.?

MR LI KWOK WAH: I have a dozen or so routes, and there are special duty routes, and some were given to us.

Now, there is a roster done by the company, and even then, there wasn't three hours for meal and break.

CHAIRMAN: Is there anything you can provide to us to

substantiate what you are saying?

MR LI KWOK WAH: We have printed two timetables. Chairman, if you would like to have a look I can show it to you.

CHAIRMAN: Very well. Perhaps what we will do is this. We have reached the lunch break. If you provide that to us now, we can have it copied and perhaps translated so that we can resume by asking you questions at 2.30 this afternoon on this material.

If there are other matters where you have statements to make to us, we always look for evidence to support the assertion. So if there are things that support you, please provide them to us.

But we will take the lunch adjournment now, and we will resume at 2.30 this afternoon. Thank you.

(1.03 pm)

(The luncheon adjournment)

(2.30 pm)

CHAIRMAN: Good afternoon.

We have a copy of the document that you wanted to hand to us, and we have a translation of part of it.

I'll ask Ms Wong to deal with the matter.

Ms Wong.

MS MAGGIE WONG: Yes. Thank you for providing us with the document. We have extracted an enlarged the part that concerns special shifts.

We see an example of the duty hours of a bus captain currently driving a special shift for route number 258D, and we can see it starts at 6.50 and it ends at 13.43. Then restarts again at 4 pm to 8.15 pm. There was only a rest break of 2 hours and 15 minutes, instead of three hours in between.

Can you tell us when was this -- when was this happened? Or is this a recent --

CHAIRMAN: Do we not see the date on the -- if it is a roster, in the coloured photograph? Isn't that 28 April?

MS MAGGIE WONG: I can't see.

MR LI KWOK WAH: Now, this schedule, or roster was amended on 9 July, 9 July.

CHAIRMAN: Of this year?

MR LI KWOK WAH: Yes. This year. 9 July this year. Because the company made major changes to the schedule, so the date of commencement of the schedule is 9 July.

CHAIRMAN: Is this a photograph that we see in colour on the left-hand side, of something that the company posted?

MR LI KWOK WAH: No. That's taken from the computer screen. It is on the company's computer screen, and a picture was taken of that.

CHAIRMAN: Yes, and when was that picture taken?

MR LI KWOK WAH: I'm not sure. Because it was provided by

some staff members.

CHAIRMAN: The computer screen picture seems to depict a date. 28/04/2018. Do you see that?

Top of the printout.

MR LI KWOK WAH: It is actually provided by staff members, I didn't actually read the small fonts here, up there.

So here it says 23 April 2018.

Now recently, the company has revised substantially the schedules for many routes, since 9 July, but this photo was WhatsApped to me the day before yesterday. Just to point out the problems there. So this was the photo, and that's why I used it as an example.

CHAIRMAN: Yes. Ms Wong.

MS MAGGIE WONG: Was this duty hours applied across the board for special shifts, or specific routes?

MR LI KWOK WAH: Well, these are individual routes, and so-called running number trips, or -- for example this is route 258D, trip number 5 is this schedule, but trip number 6 for instance would be a different schedule.

MS MAGGIE WONG: This schedule was provided by the company, Kowloon Motor Bus?

MR LI KWOK WAH: Yes.

MS MAGGIE WONG: Can you find more examples of this?

MR LI KWOK WAH: For instance, this one. 52X schedule 7. Or S7, in short. The early shift, 7.57, logged in, and

then the early shift finished at 12.07. But then the next shift started at 14.19, and had to go back to Po Tin to collect the vehicle. So in between there were just over two hours. So there are several more such examples.

CHAIRMAN: And the point that you are illustrating is that for maximum duties of, I think the first one is 13 hours and 25 minutes, the rest time was less than 3 hours. Considerably less than 3 hours?

MR LI KWOK WAH: Yes, correct.

MS MAGGIE WONG: Mr Li, you told us earlier on that you are a special shift driver as well.

MR LI KWOK WAH: Yes.

MS MAGGIE WONG: Can you tell us, from your personal experience, a day's work? From your -- from the time you start your duty.

CHAIRMAN: When did you last drive a special shift?

MR LI KWOK WAH: 14 January, because 15 January -- because of a traffic accident I was injured and I have not started work again.

So before 14 January I was driving special shifts.

CHAIRMAN: Are you able to help us with the times that you worked on that last day?

MR LI KWOK WAH: I have to look up the schedule first.

CHAIRMAN: Please do.

MS MAGGIE WONG: How long have you been driving --

CHAIRMAN: Well, he is looking up the schedule, Ms Wong.

MR LI KWOK WAH: On 14 January, I took a special shift in the morning. 7.30 I logged in. And for the morning shift I finished around 11 am. I had one hour for meal and in the afternoon shift I started at 16.11, and finished at 20.29 -- 21.29.

MS MAGGIE WONG: In your example you have given, do you have three hours consecutive hours break?

MR LI KWOK WAH: More than that. More than three hours.

There is four hours 40 plus minutes of break in between for this particular special shift.

MS MAGGIE WONG: Prior to 14 January 2018, how long have you been working as special shift driver?

MR LI KWOK WAH: Around three years.

MS MAGGIE WONG: Is it the occasion that on -- it is -- was 14 January 2018 shift where you have been given over four hours break, frequent occurrence, or can you tell us how you describe four hours break.

MR LI KWOK WAH: I would just like to supplement.

For the design of every route, you know, the timing is different. For this particular route, or the route I drove on, there were six scheduled trips, or -- and there is only one day in the week, on Monday. There is just one scheduled trip with less than three hours of

break. But for all the other scheduled trips there would be at least 3.5 hours of break. But the point I'm trying to make is that for the design of other routes, with less than three hours of break, and there are such cases, and that causes fatigue to the bus captains, because they do not get enough rest in between.

For my route there is sufficient time for a break, but if all routes are designed like the route I took, then I would totally accept it.

But in other routes they don't have such a break. And we have quoted a few examples. Examples is that there are not three hours, but for my route there is enough three hours of break. So the route is different for -- given the different circumstances. And we are just quoting examples of cases where there are not more than three hours of break.

CHAIRMAN: Which route was this?

MR LI KWOK WAH: KMB has many routes. I cannot really provide all the routes, because there are several hundreds of routes of the KMB, I can't give examples of all routes.

CHAIRMAN: The route you drove on 14 January. Which route was that?

MR LI KWOK WAH: 269D.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Can we look at the screen capture at the moment. It referred to the route 258, (Chinese spoken) 5. What is meant by (Chinese spoken), first of all?

MR LI KWOK WAH: Now we use "S", that's called special shift. "S" stands for special shift.

MS MAGGIE WONG: This 258D, can you tell us where this route starts and where it ends?

MR LI KWOK WAH: 258D from Long Mun Oasis to Yau Tong.

MS MAGGIE WONG: Do you mean Po Tin?

MR LI KWOK WAH: No, Po Tin in Tuen Mun to Yau Tong.

MS MAGGIE WONG: Do you know if there are as if facilities for this particular route from --

MR LI KWOK WAH: I'm not certain. But for the Po Tin staff room, it is small. We know that we have already brought this up to the Tuen Mun depot, we have asked for an expansion of the room, but that case is still under application.

MS MAGGIE WONG: You said that you have brought this up to the Tuen Mun depot. In what way? Orally or in writing?

MR LI KWOK WAH: Verbally. Verbally to the depot manager.

CHAIRMAN: Who is the depot manager?

MR LI KWOK WAH: Wan Wai Yin in Chinese.

CHAIRMAN: Is that Ms Debbie Wong?

MR LI KWOK WAH: No, Wan Wai Yin is a male.

MS MAGGIE WONG: Mr Lee, you have, if I understand you

correctly, worked in the Kowloon Motor Bus as bus captain for about 27 years?

MR LI KWOK WAH: Correct.

MS MAGGIE WONG: Do you know a person called Raymond Cheng, or Gary Wong? Raymond Cheng used to be --

MR LI KWOK WAH: No, I don't know them.

MS MAGGIE WONG: And do you know, given your experience in Kowloon Motor Bus, do you know there is a safety quality department in Kowloon Motor Bus, some time in 2010?

MR LI KWOK WAH: Yes. There was. Yes, there was we call this -- I can't remember the full name. There was a department dedicated to safety issues. Safety training of bus captains. That's my understanding.

MS MAGGIE WONG: Were there meetings from time to time for this safety and quality department, with bus captains?

MR LI KWOK WAH: I have never heard they would hold meetings with bus captains. I have never heard that. I have not been invited to such meetings, if any at all.

MS MAGGIE WONG: Then how do you know the existence of this safety and quality department?

MR LI KWOK WAH: When we talked to the managers of depots we heard about that.

MS MAGGIE WONG: Did you know there was a study conducted in around that time in 2010 in relation to the identification of 29 sharp bends with certain criteria

for consideration, or implementation by bus captains. Do you know about this?

MR LI KWOK WAH: No. Never heard of it.

CHAIRMAN: I think to make the point clear, a study the purpose of which was to give advice to bus captains, how they might negotiate certain bends. But you have never heard of that?

MR LI KWOK WAH: No, no, no.

CHAIRMAN: Thank you.

MS MAGGIE WONG: You earlier said that you have talked to the manager of depot and heard about the safety and quality department. Do you know if there are any measures suggested by this safety and quality department around the time in 2010?

MR LI KWOK WAH: I have not even heard about this department. They have not consulted us, and for our association, we have not been invited. But I don't know whether others have been invited. I'm clueless about this matter.

MS MAGGIE WONG: So what have you talked about, about this department, this safety and quality department when you were talking to the depot managers. What topic were you discussing, or talking about?

MR LI KWOK WAH: I didn't know about this department, so we didn't talk about matters related to this department,

the discussions were rather on the daily operations of the depot. No, we have not talked to the manager about safety issues.

MS MAGGIE WONG: I would like to ask the final topic, which is on the training. Can I take you to the KMB bundle 1 at page 120. I'll just briefly explain what this is about. This is a response by the Kowloon Motor Bus to the Commissioner for Transport's letter dated 12 February 2018 regarding certain issues on recruitment and training for full-time bus captain.

This follows from the tragic incident on 10 February 2018.

I would like to ask you about the general training for full-time bus captain candidates.

Mr Li, are you also a full-time bus captain prior to the sick leave, or 14 January 2018?

MR LI KWOK WAH: Right.

MS MAGGIE WONG: And if I may ask you, first of all, the training, before we look at this. Was all full-time bus captain candidates obliged to undergo an 18-day training for 9.5 hours a day?

MR LI KWOK WAH: Correct.

MS MAGGIE WONG: Would there be refresher training once you became a full-time bus captain?

MR LI KWOK WAH: Yes, but in the past decade or so there was

no refresher training. Because previously, once every year -- once every two years there was ancillary driving training. We had to go to the Sha Tin school to receive a one-day training to have some refresher training on training attitude, enhancing our training skills, et cetera. But now, there is no longer such arrangement.

In the past 10 years, there is not this refresher training once every two years.

Now, if you are a captain, and then you are involved in some sort of an accident, then you have to go back to receive training, but if no accident happens then you don't need to have retraining again.

MS MAGGIE WONG: Do you have route-specific training for full-time bus captain?

MR LI KWOK WAH: To my understanding, for some routes there is dedicated training. For example, cross-harbour routes, routes plying through Mong Kok, special training is required. And there is another route, 64K, going through Tai Po Road, and Fan Ling, Fan Kam Road, and Tai Lam Chung, and a three-day training is required.

MS MAGGIE WONG: So this is apart from the general training, the 18-day general training. For specific routes you have to undergo another, or extra three days training?

MR LI KWOK WAH: Correct. On the issue of training can

I defer to Mr Chan to help?

CHAIRMAN: Mr Chan?

MR CHAN WING HO: Mr Chairman, at the transport panel of the LegCo held on 25 July 2018 there was a background brief paper, and on page 4 point number 15 in the Chinese version, there was this quote:

"The KMB said that whether it is the part-time or full-time bus captains, if they have not run on a route for over one month, they need extra training for driving that particular route."

So the KMB made this statement. But that has never been implemented among the bus captains.

CHAIRMAN: Ms Wong, can you help me locate this passage? This is the LegCo briefing paper TD-1, page 403, paragraph 15.

MS MAGGIE WONG: 15.

CHAIRMAN: Paragraph 15 is dealing with seat belts.

MS MAGGIE WONG: I believe this is a separate document, Mr Chairman. It is a background paper.

CHAIRMAN: Is that prepared by the Secretariat?

MS MAGGIE WONG: Yes, the LegCo Secretariat.

CHAIRMAN: What is the reference for that paper?

MS MAGGIE WONG: We are locating it from online.

CHAIRMAN: Is that not in the bundle?

I have certainly read the document. We are just

trying to find it.

Is this in the bundle, does it have a reference, Ms Wong?

May I ask that the document be scrolled up so we can see the context? This appears to be a report of what happened earlier. Perhaps if we go to paragraph 13/14.

So it appears to be a reference to a meeting held on 15 February, and then if we scroll down to paragraph 15, yes, we have the context now, Mr Chan.

Could you repeat your point?

MR CHAN WING HO: Mr Chairman, the point I want to make is that the KMB said that whether it be full-time or part-time drivers, if they have not driven a route for a month or more they would have to practise driving on this route again. On this particular arrangement, since I joined the company, it has never been done.

CHAIRMAN: When did you join the company?

MR CHAN WING HO: March 2015.

CHAIRMAN: This is a Secretariat paper gathering together materials to brief LegCo panel members about what has happened in the past. And this is a reference to a meeting on 15 February. Do we have the minutes of that meeting?

MS MAGGIE WONG: I don't think so.

CHAIRMAN: The minutes will exist, will they not, of that

meeting, so we are in a position to check the accuracy of what is the assertion by the Secretariat of what KMB are supposed to have said?

But perhaps a matter that can be looked into later.

We have your point, Mr Chan. That assertion is one that you challenge on your personal experience.

MR CHAN WING HO: Yes.

CHAIRMAN: Yes, Ms Wong.

MS MAGGIE WONG: Yes. If I may take you to the KMB submission. Page, volume 1, KMB-1, page 120.

CHAIRMAN: What are we being taken to?

MS MAGGIE WONG: We are taken to the response from the Kowloon Motor Bus to the Commissioner for Transport's letter dated 12 February 2018 in response to the request for investigation report, following the tragic incident on 10 February 2018.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Mr Chan, this is KMB's response to the Commissioner's letter setting out the recruitment and training for both full-time and part-time bus captains.

I would like to ask you a few questions about full-time bus captain in terms of general training, and specific training. We can see at page 120 it sets out the full-time bus captain training and details of the

18-day training.

Over the page it states:

"A full-time bus captain candidate will have a total of at least 68 hours of on-the-wheel bus driving training (inclusive of the time for route training) under the supervision of instructors."

Can you confirm if that's the case?

CHAIRMAN: If you are unable to do so, please say -- if you simply don't know.

MR CHAN WING HO: Now for this particular response, what is mentioned there is a bit different from the training I received.

MS MAGGIE WONG: Can you tell us what training did you have in your days?

MR CHAN WING HO: Let's say phase 2, four to five bus types, training on four to five bus types. Now, my own training, I was only trained on two to three bus types.

MS MAGGIE WONG: What about route training? It is stated there "route training for 2 routes".

MR CHAN WING HO: Yes, I also was trained on two routes.

MS MAGGIE WONG: And we have heard some evidence previously from Mr Li about route-specific training for full-time bus captain candidates. We see at page 122 (v), it sets out the:

"Route training for 2 routes with on-the-wheel

driving under the supervision of instructors ..."

And:

"[Bus captain] candidate must attend route training before he/she will be assigned with driving duties."

We heard there would be three days training. Do you know if there has been any change since your days, when you joined the company?

MR CHAN WING HO: Basically there has been no change.

MS MAGGIE WONG: If I may take you to page 123, it specified there is a route-specific training for employed bus captain both full-time and part-time, and there would be additional route familiarisation to be provided for assigning the bus captain after working three to six months, to drive another route.

Has that happened?

MR CHAN WING HO: Yes.

MS MAGGIE WONG: Would that be additional training?

MR CHAN WING HO: From my personal experience, there was a department, duty dispatch department of the company.

Now, this unit would call us up, and then say for a particular route, for example 111, then at the terminus of route 111 I should ask the regulation officer for a schedule, and then I will go on that bus route for two trips, and then once I have learned that trip, the route, then I will tell the department again,

and then there may be a record, the route record here, for route 111 for me.

MS MAGGIE WONG: On page 127, we can see there are some remedial training where there are four liable incidents within one year, new bus captain within two liable incidents within first three months of work. Careless driving or failing to ensure passenger safety, and second careless driving will be termination.

It talks about remedial training for duration of one to 3 days, usually one day, subject to the recommendation of instructors.

Has that happened?

CHAIRMAN: Are you asking whether Mr Chan has had remedial training?

MS MAGGIE WONG: Yes. Has there been remedial training in those situations?

CHAIRMAN: "Have you received remedial training?" Is that the question?

MS MAGGIE WONG: Yes.

MR CHAN WING HO: No, I have never received remedial training.

MS MAGGIE WONG: In your experience with other bus captains, do you know if there are remedial training in those circumstances set out on this page?

MR CHAN WING HO: As far as I know, I have never heard

of it.

MS MAGGIE WONG: Chairman, I believe I have completed my questioning.

CHAIRMAN: Thank you.

QUESTIONS FROM THE COMMITTEE

MEMBER LO: Just a short question. Based on your experience with other special shift drivers, do you get to choose a route close to your home, or would they consider your home location in assigning a route to you?

MR CHAN WING HO: From my experience, if there is a vacancy in a particular route, then we may try to apply -- we submit a report to the scheduling division, and then there will be internal rating for bus captains and then we will see if we are assigned that route. For example, myself, I belong to the Sha Tin depot, I work in the Sha Tin district but I live in Tai Po.

MEMBER LO: So that means you don't get to choose a route. Only if there is a vacancy of that route you can apply for the same?

MR CHAN WING HO: Correct.

CHAIRMAN: Mr Li, you testified that you were a bus captain driving special shifts for three years; is that correct?

MR LI KWOK WAH: Yes.

CHAIRMAN: And during those three years, did you drive different routes?

MR LI KWOK WAH: No. It is the same route, 269D.

That means -- because I, you know, have been assigned to that route, fixed route, sort of, and maybe because of occasional need for redeployment I will be taken away from that route, but it doesn't happen often.

CHAIRMAN: And when you took your break, the long break in the middle of that shift, where did you take it?

MR LI KWOK WAH: Home. Because where the vehicle is parked is close to my home, so I could get home.

CHAIRMAN: And where is that?

MR LI KWOK WAH: Tin Shui Wai. Because in Tin Shui Wai there is a depot. So buses could be parked there in between. So we could just leave the bus there, at the depot, and I can ride a bicycle to get home more quickly. If I walk it will take me 15 minutes to get home.

CHAIRMAN: This was Tin Shui Wai depot that you would park at during these shifts?

MR LI KWOK WAH: Yes, the company arrange for the bus to be parked there.

CHAIRMAN: Were there facilities at Tin Shui Wai depot for people to rest if they didn't live nearby?

MR LI KWOK WAH: Yes, there are some. But bus captains will usually take a meal there. But there is no space for taking a nap. But then you can still take a meal

there -- well, for some bus captains who live far away they can't get home and then they would rest on the bus itself. But for those who can really return home, if we have a rest break of three to four hours we would go back home and take a rest and have a meal there as well.

CHAIRMAN: So were you aware that there were work colleagues that would, as you say, take a nap in the bus because they could not get home?

MR LI KWOK WAH: Yes, that's correct. Because they live too far away. Some of them live in Kam Tin, and, well, it can take them easily two hours to get back and forth.

So the rest break is only three hours and you spend two hours in travelling. So how can you rest? So they then might as well take a rest within the bus, and then within the rest room there is only a space for you to take a meal, and so normally the bus captains will opt to take a rest within the bus.

CHAIRMAN: Yes. Thank you.

Is there any matter that you would like to raise with us in closing? Because we have finished the questions we have for you.

MR LI KWOK WAH: Yes, we would like to raise some suggestions.

On -- that is on work hours. We say that for the morning shift, in the special shift, it should not be

beyond 2100. The starting hours for the morning shift should not be before 0330, because it is -- if we start too early, then when people are having breakfast we are already having lunch. For the latter shift it should not start before 1300.

For many routes the starting hours for the night shift is 11. So how can you call that a night shift? And for newly recruited bus captains, please don't assign them to special shift, because they are not yet familiar with the operation of the company.

CHAIRMAN: When you say 11 o'clock, do you mean 11 pm? 2300 hours?

MR LI KWOK WAH: I'm referring to the 11 am. I mean the night shift should start -- should not start before 11 am.

CHAIRMAN: 11 am. Thank you.

MR LI KWOK WAH: Yes.

CHAIRMAN: You have used terms about naming these shifts. Can you just help me at least: morning, afternoon, night. What do you call the shift?

MR LI KWOK WAH: Well, there is only morning shift and night shift for the KMB. There is no middle shift, so to speak. There is only morning shift and night shift, and then overnight shift. So this is the system in place in KMB. The association is raising this. Because if the

special shift ends after 2100, then people don't have enough time to rest. Because the road conditions are changing all the time, so if the night shift ends at 2100, and maybe because of road congestion, and traffic accidents, the shift may well go beyond 2100. So it is difficult for them to come into the morning shift the next day. So we need at least 10 hours of rest in between.

CHAIRMAN: Please take it step by step.

What are the parameters to commence work for the morning shift? What are the range of times at which you commence work in the morning shift?

MR LI KWOK WAH: What I meant was that when we start the morning shift, the first departure, usually starts at 5 am. And for some routes -- some bus captains have to report duty at 3.30 am, and that may be the last trip of the overnight shift, so that is why it starts so early.

Now, the bus captains if they start too early, well, they may not be ending at 1 or 2, so they are working for at least 11 hours. So if people get up too early, then they become tired easily.

CHAIRMAN: What range of times does the morning shift finish?

MR LI KWOK WAH: It depends on the routes. The earliest is around 12 or so, and for some other routes, 3 to 4 pm,

and then they have to report duty at 5 am. And if you are talking about long-haul buses, then it may end up at 3 to 4 pm, but for short-haul trips the ending hours may be different.

CHAIRMAN: What is the range of time during which the night shift begins?

MR LI KWOK WAH: Let's look at it this way. Well, the timing of the different routes varies. So our suggestion is that the night shift should not start before 1 pm.

So if we are talking about many departures, then the schedule may be different, some start at, say, 11, some start at 1 pm. Some start even later, so it is different for the bus captains.

So if you start at 1 pm, the bus captains don't even have breakfast, they have lunch and then they start work.

And then if the night shift starts too early, then you may have to take your meals earlier, and some night shifts end at around 1 to 2 am. So the bus captains work 12 hours, and they become fatigued easily, tired easily.

CHAIRMAN: What is the range of time when the overnight shifts begin?

MR LI KWOK WAH: Before 7.30 pm.

CHAIRMAN: And what is the range of time when the overnight shifts end?

MR LI KWOK WAH: 7.30 am in the morning. So in other words from 7.30 pm to 7.30 am.

CHAIRMAN: Thank you. That's your point on work hours and your recommendation. Is there anything else you wish to say?

MR LI KWOK WAH: I have two issues to raise. They are about road conditions.

Well, there are skips being placed all the time along bus routes obstructing buses to get into the bus stops, and other road users as well.

So skips, is there a dedicated department to remove them, because the skips are jeopardising the safety of the road users. I don't know whether the law specifies locations where they can be placed, say for example now in Nathan Road some skips are placed and they are obstructing the traffic.

So my suggestion is that if there is a dedicated department responsible for this they should remove such skips, because we are talking about busy roads, and skips will cause traffic congestion. For bus captains, if there is traffic congestion then we may be stuck and passengers are made to wait longer.

So can skips be placed somewhere else? Can we

complain against them, and then the police will follow up?

CHAIRMAN: I'm sure there is an authority or an approval that is required before you can drop a skip off the lorry onto the road. But we will ask the Transport Department about that, and perhaps the police.

MR LI KWOK WAH: Thank you.

CHAIRMAN: Do you have any photographs that you wish to provide the Committee with, to illustrate the difficulty caused by skips in the road? Particularly if they are near bus stops, then please provide them to us.

MR LI KWOK WAH: Understand.

And there is another point on bus stops.

Earlier, we had a meeting with the Transport Department, some vehicles are parked at the bus stops, making it difficult for buses to get into the bus stops.

So our suggestion is that if there is illegally -- illegal parking around bus stops can a point deduction system be introduced to serve as a deterrent, so that vehicles other than buses will not be parked within the bus stop area? Because so many vehicles are parked at the bus stop, and buses have to double park to let passengers alight on board.

And if we go back to the bus terminus and report it to the police, the vehicles would already have gone

away.

So, can we have a point deduction system or demerit point system for vehicles parked illegally within the bus stop?

So that's our suggestion.

CHAIRMAN: On your KMB buses you have forward-pointing cameras, do you not? At least on many of the buses.

MR LI KWOK WAH: Yes, yes.

CHAIRMAN: Now, those cameras would capture vehicles parked illegally in that way, would they not?

MR LI KWOK WAH: Yes, that can be done. But not the majority of the buses are retrofitted with these cameras. Only 1,800 buses are retrofitted with such forward-looking cameras.

Well, instead, why don't we install some cameras on the bus stops themselves. There may be surveillance cameras installed at the bus stops to detect illegal parking. It is better to do that than using the cameras on the buses.

CHAIRMAN: Why not use what we have now? Why not use both?

MR LI KWOK WAH: Because some of the buses are not retrofitted with such cameras, especially some of the old models of the buses. And most of the old buses have not been replaced yet, or phased out yet. So 1,000 or so new models of buses are retrofitted with cameras.

CHAIRMAN: Well, those that have got cameras, would you support bus captains operating a button, perhaps, that flagged on the CCTV the time for someone to look at the CCTV film to be able to see the illegal parking? Would you support bus captains doing that?

MR LI KWOK WAH: Yes. We support it. Well, if buses can get into the bus stops then that would make it easier for the bus captains. Because we are talking about illegal parking here. And passenger safety can be enhanced if the buses really can get into the bus stops. And passengers --

CHAIRMAN: Mr Li, we understand your point. It is a point that is well made. All we are trying to do is find methods to assist you this achieving that aim.

MR LI KWOK WAH: I understand.

CHAIRMAN: Is there anything else?

MR LI KWOK WAH: Mr Chan would like to say something.

MR CHAN WING HO: Mr Chairman, on our bus roster schedules, we would like the Transport Department to make a guideline. Every day, for every bus captain on the same shift there should be just one main route plus a supplementary route. So one plus one. Because for many routes in the same roster, there is a range of one plus two. In other words total of three routes we may have to work on. So we would like the Transport

Department to come up with a guideline, so drivers won't mix up routes and then take the wrong route or make the wrong stops.

CHAIRMAN: So at the moment you might be asked to drive three routes, and you are suggesting it be limited to two?

MR CHAN WING HO: Yes. Correct.

CHAIRMAN: Thank you.

Gentlemen, thank you for attending to give your evidence. We have other representatives of other unions waiting their turn. So we are going to take a short adjournment now so there can be a swap around. Thank you for attending. We will take 2 minutes.

(3.32 pm)

(A short break)

(3.45 pm)

REPRESENTATIVES OF MONTHLY-RATED DRIVERS UNION: MR CHENG HOI YIU, MR SZETO KUEN, MR CHAN HON WA, MS YIP WAI LAM AND MR CHAN CHI FAI, MR YAN KIN MING

(Evidence given in Cantonese, transcription of the simultaneous interpretation)

CHAIRMAN: We would like to thank you, Ms Yip, and your representatives of the Monthly-rated Drivers Union for accepting our invitation to give evidence, and let me explain, if you have not observed already, how matters

will proceed. Ms Wong, who is Senior Counsel assisting the Committee, will pose questions that in part are based on the submissions that you have made, but also on other matters that have arisen.

For your part, if you wish somebody else, other than yourself, to answer questions, would you simply defer to them and tell us who it is who is going to answer the question on behalf of the union.

Is there something you wish to say at the outset?

MS YIP WAI LAM: Yes. Thank you.

Thank you, Mr Chairman.

First, I would like to thank the SAR government for appointing this Independent Review Committee to look into franchised bus services. I would particularly like to thank the Committee members, including Mr Peter Duncan, Justice Duncan, Justice Michael Lunn, Mr Auyeung and Professor Lo, and I know you have worked very hard to look into the issue, and I would like to express my special thanks to the Committee.

We have made a submission. On the first part of our submission, engineering department, which has everything to do with safety, and a very experienced colleague in the engineering department will talk about the difficulties he faces in his daily work.

CHAIRMAN: He won't do that just now, because I'm going to

ask Ms Wong to pose questions first of all, and then if there are areas that Ms Wong has not touched on, and you wish to amplify, we'll come back to you.

So if I can invite you to be patient, we will ask Ms Wong to start first of all.

Ms Wong.

MS MAGGIE WONG: Thank you, Ms Yip, and gentlemen.

MS YIP WAI LAM: Yes, understand.

EXAMINATION BY MS WONG

MS MAGGIE WONG: Ms Yip, this Committee is tasked to make recommendations in relation to the safety-related measures for the operation and management of franchised buses. So my questions will only be focused on this aspect, rather than the wider aspects of employment issues.

So I hope you understand.

For your union, I believe your union was registered in the Labour Department on 28 March 2018; is that correct?

MS YIP WAI LAM: Yes.

MS MAGGIE WONG: And currently, it has 150, 150, full-time staff as of 18 June 2018?

CHAIRMAN: By that you mean members who are full-time employees?

MS MAGGIE WONG: Yes. Members who are full-time employees.

MS YIP WAI LAM: Correct.

MS MAGGIE WONG: And you have set out in your letter in Chinese, dated 18 June 2018, at TU bundle, page 75-3 the composition of the members of your union.

And in that letter you stated that your union have earlier done a consultation and about 800 full-time employees would like to join.

MS YIP WAI LAM: Correct.

MS MAGGIE WONG: May I first of all ask, about the current membership of about 150 full-time employees, from which franchise buses do they come?

MS YIP WAI LAM: Most of them are from KMB. They are the bus captains. Some from New World First Bus, others from Citybus. But the latter two take up a minor portion.

MS MAGGIE WONG: And can you give us an estimate, out of 150 people, how many came from KMB.

MS YIP WAI LAM: And we asked the secretary to deal with the registration of members. And we all go to work, and we have to prepare for our submission to the Committee. So we don't have an exact proportion here. But from other companies, about five. The remaining are all KMB workers.

MS MAGGIE WONG: Thank you. Your submission raised a number of issues, or topics. I'll go to the training of bus

captains first.

Your submission in Chinese at page 68, in English page 72, paragraph 3, you mentioned about a trainee bus captain who passed the competency test for being a bus captain, and he became a bus captain, and later he was involved in a traffic accident, and sustained serious injuries, in less than a week after he worked as a bus captain.

Can you first of all tell us, is he a part-time or full-time bus captain?

MS YIP WAI LAM: He or she is from the same class as mine, same training class, and then we got the licence to drive the bus. Why did I raise this particular incident? At the time, well, each instructor will train one to three trainees on a bus. And based on this instructor's experience, the instructor believed that this trainee should not -- is not suited to join the trade and become a professional driver, and he advised this trainee to find some other jobs. But then this trainee came from Malaysia, and he was in dire need to find a job, so the instructor had done his best, and asked that the trainee should not be allowed to continue with the training. But then because of the acute manpower shortage, and there was heavy traffic congestion on the road, and the company, the instructor,

was under great pressure to train enough bus captains.

So under great pressure -- yesterday, I met with an experienced instructor, and he talked to me about this particular issue. He said that he was unhappy, and they set aside their own conscience, and just to fend for their living --

CHAIRMAN: Before you go on -- forgive me for interrupting you. This particular trainee is someone who passed the Transport Department exam, is that right?

MS YIP WAI LAM: Yes, correct.

CHAIRMAN: When was this class when you were trained? What year is your class?

MS YIP WAI LAM: 2013. 22 April, I joined the trade.

CHAIRMAN: Thank you. The simple point is this, that this trainee having passed the Transport Department exam was employed as a bus captain, and he had an accident. We have that point.

Ms Wong.

MS MAGGIE WONG: Ms Yip, have you been working for the Kowloon Motor Bus since your training in 2013, for five years? Correct? Yes?

CHAIRMAN: Can I ask you to use words, because the stenographer can't write down "head is nodded".

Thank you.

MS YIP WAI LAM: Thank you. Understood. Yes. I have

worked for five years.

MS MAGGIE WONG: We got the point about the trainee. The point I wish to ask you is in your submission you mentioned that the instructor did make certain comments about the character of the trainee, but the company neglects relevant comments under the existing system.

My first question is, how did the company neglect those comments, and what comments were they?

MS YIP WAI LAM: The instructor had reflected the situation to the group leader, and the trainee was asked to go up to the rooftop to try out -- to practise training, to parking, to do some parking. So once he has done that, then we will let him continue with the training.

MS MAGGIE WONG: Was it your view that the training to bus captains provided by the Kowloon Motor Bus is insufficient, even though the trainee has passed the test?

MS YIP WAI LAM: We talked about bus safety all the time. I think that involves a number of factors, including the Transport Department having a role to play. And because when the exam is taken, the Transport Department may believe there would be further training by the company. So maybe the exam standard is relatively lenient. But then if an experienced instructor knows this person is not suited to driving, and he has tried his best to

reflect that, and then he is under pressure that he should train up as many bus captains as possible, and he is not really giving proper regard to safety here.

If I may add, instructors also do assessment.

Now, I recall that vividly on the day that we took the test, the exam, each instructor was rather nervous, as if he is the one taking the test. Because for the trainees, they trained, if there is a high pass rate, then it may be good for the assessment of the instructors. So that's our guess.

That's why the instructors were rather nervous too. They did mention before that it is also about their performance, assessment is one of the criteria.

CHAIRMAN: Their performance assessment is not one of the criteria for passing the Transport Department exam, is it? The Transport Department exam is completely separate.

MS YIP WAI LAM: Yes, yes.

CHAIRMAN: They might -- from what you say, do -- make an assessment for the company. But that's a matter for the company. Transport Department determines that the person, the candidate, has passed the exam and was granted a licence.

So Ms Wong, what is the point of this?

MS YIP WAI LAM: Yes.

MS MAGGIE WONG: And if I may move on to your recommendation. One of your recommendations is that everyday driving enhancement course to be included in the training for bus captains, in paragraph 6, and focusing on accelerator and brake control, turn negotiation, and smooth driving.

Why you see a need to have this extra three days' driving enhancement course?

MS YIP WAI LAM: Yes. Because before we take the bus driving licence exam, we need to have three years of private vehicle licence. So why do we need to strengthen training? Because buses are different from private vehicles in terms of weight. So when it comes to controlling the brake or the accelerator, it is a different kind of skill. So we need to have a better understanding of that.

And for new bus captains, in most cases, where they have involved in accident it is because of emergency braking leading to injuries of passengers or leading to car from behind crashing into the bus. So this is a more common scenario, where new bus captains are involved in accidents.

So the biggest cause is because they don't brake properly, and so passengers are injured as a result. For turning corners, buses of course are different than

private vehicle, so it needs different skills in turning corners, or manoeuvring corners, so if we have three days of additional training, it is for the instructors to assess the performance. If it is not good enough, there could be further training. It is to make sure that the trainee has completely mastered the driving skills before the trainee is allowed to drive a bus on the road and take passengers.

CHAIRMAN: Have you made this recommendation to KMB?

MS YIP WAI LAM: Never had the chance.

CHAIRMAN: In five years of employment, you never had the chance? Five years?

MS YIP WAI LAM: Employees rarely make suggestions. There is not the platform really for us, me, to share the information in such detail.

MS MAGGIE WONG: And you also stated that there should be simulated traffic lights to be installed at driving school with a view to strengthening the bus captain's skill in applying the brake in response to traffic lights.

And my question is this. I understand that there would be an 18-day training for 9.5 hours a day for full-time bus captain candidate. Would that not be sufficient? Because it is based on the real life road condition.

MS YIP WAI LAM: For someone with driving experience, if someone has already got a private vehicle licence for three years, but for many young people they don't even own a private car. So they don't have road experience, and we always say road experience is the most important. Why? Because there are a lot of unforeseen situations on the road.

For an experienced bus captain this is fine. But for someone without any driving experience, then 18 days of training alone is not sufficient, definitely.

MS MAGGIE WONG: Would you suggest to widen the scope of training, by including emotional control, or emotional training on how to handle passengers, behaviour of passengers?

MS YIP WAI LAM: In this respect, when we joined the KMB, if I recall correctly, there was a questionnaire. There would be brief mention of your EQ, or they try to check your EQ. But would there be actual training? Well, there is also training on how we should handle emotions, yes, KMB did do that. But then the problems arose because when you are in an actual duty, and you are humiliated or shouted at by others, that means there is need for more promotion so we can do better.

The KMB has always been doing, that but all I could say, yes, in form, they have done everything, but when

we actually face the pressure, perhaps there could be some more training. It would be fine too.

Because we are always talking about starting afresh. So we need to use some special words to respond. But it is really out of touch with reality.

MS MAGGIE WONG: Can we move on to driving while sick?

CHAIRMAN: Before you do so -- have you experienced verbal abuse yourself from passengers?

MS YIP WAI LAM: Yes. Verbal abuse. Even assault, physical assault.

CHAIRMAN: Did you report these incidents?

MS YIP WAI LAM: Yes. I reported to the police at the time, but because there was not a camera on board, and then the passenger hired a lawyer, and then that passenger was acquitted.

CHAIRMAN: So you report -- this is the assault, is it? You reported an assault --

MS YIP WAI LAM: Yes, I did call the police.

CHAIRMAN: That led to an arrest, and it led to a charge, and it led to a trial, and it led to an acquittal; is that right, what you have just said?

MS YIP WAI LAM: Yes, yes.

CHAIRMAN: And when was this?

MS YIP WAI LAM: It should be two years ago, if I recall correctly.

CHAIRMAN: No doubt you remember the date, having been assaulted on duty? Bus driver? What was the date?

MS YIP WAI LAM: I honestly don't remember. Maybe I can provide the date later.

CHAIRMAN: Yes, if you would be kind enough. Which court was this matter tried in?

MS YIP WAI LAM: Kwun Tong.

CHAIRMAN: And hopefully that was the only occasion when you were assaulted; is that right?

MS YIP WAI LAM: Yes.

CHAIRMAN: What about verbal abuse? On how many occasions have you been verbally abused by passengers?

MS YIP WAI LAM: Before the establishment of the Monthly-rated Drivers Union, it happened often. After the establishment of the union there was not a single occasion.

CHAIRMAN: And how often had it occurred before?

MS YIP WAI LAM: All the time. Every day. As long as there is some traffic congestion, or because there were not enough bus drivers, bus captains on duty, so there were fewer trips, maybe instead of 20 minutes it became 30 minutes frequency, and then passengers became really impatient and angry. And very often they would vent their frustration on us.

CHAIRMAN: Did you report these occasions of verbal abuse to

KMB?

MS YIP WAI LAM: It has actually really become part of our work, so very rarely would we report that to our supervisors. You know, other colleagues just take it as it is.

CHAIRMAN: Could you try a direct answer. Did you report it or not?

MS YIP WAI LAM: No.

CHAIRMAN: Thank you.

Yes, Ms Wong.

MS MAGGIE WONG: Can you tell us on which location this assault took place?

MS YIP WAI LAM: The Cheung Sha Wan playground stop.

MS MAGGIE WONG: This assault was in the bus or around the bus station?

MS YIP WAI LAM: I was driving at the time. So I was in my driver seat, and I was assaulted.

MS MAGGIE WONG: So the bus was in progress at that time?

MS YIP WAI LAM: No, it was stopped. It stopped for alight at the time.

MS MAGGIE WONG: May I assist, if you would look at KMB-1 bundle. It should be case 97.

CHAIRMAN: Do we have a page?

MS MAGGIE WONG: Page 214.

Case 97, it is stated Ms Yip driving 238X, the

incident on 29 September 2016, and you injured on your right arm. Is that the incident?

MS YIP WAI LAM: Yes, yes, correct.

MS MAGGIE WONG: Thank you.

The next topic I wish to ask is driving while sick.

And you mentioned in your submission, your union submission, that a lot of drivers -- I should state correctly by citing what you have said.

You said that because of the number of hours working, the accumulative effect begins to take its toll on their body, but they are reluctant to take sick leave with the appraisal bonus in mind.

I just want to ask you this. We know that the Kowloon Motor Bus has included or merged the good service bonus and the safety bonus into the monthly salary. About this appraisal bonus point, I just want to explore.

Would this be a point that is not that relevant, because the safety bonus and the good service bonus have already been included in the salary, or merged into the salary? Is it still a valid point?

MS YIP WAI LAM: Well, those are two separate parts. You mentioned the safety bonus and the other -- the service bonus being included in the base salary right? But this assessment bonus is a different one. It is not the same

thing.

And in any case KMB has now resolved the matter. Soon this assessment will be abolished and then you won't lose these bonuses because you don't come into work.

And that money has been paid to us. So actually it is more than what they paid before, so this has been dealt with.

MS MAGGIE WONG: And Ms Yip, you earlier mentioned about a very experienced colleague in the engineering department has raised difficulties he faced in daily work.

Are they related to safety issues?

MS YIP WAI LAM: Yes. Directly related. Definitely.

MS MAGGIE WONG: Can I invite your colleague to express his views on how it related to safety aspect?

CHAIRMAN: First of all, do they find a place in your written submissions?

MS YIP WAI LAM: Are we talking about problems in the engineering department?

MS MAGGIE WONG: The point is your very experienced colleague in the engineering department, the problems or difficulties he faced. Are they reflected in your submissions, or have they been written in your submission? Have they been included in your submission?

MS YIP WAI LAM: (Answer not translated).
MS MAGGIE WONG: Is that paragraph 2, about not using the original components of the original bus franchise -- of the original bus? Is that the point?
MR CHAN CHI FAI: Correct.
MS MAGGIE WONG: Thank you. Please explain the problem.
CHAIRMAN: Is it not explained in writing?
MS MAGGIE WONG: Yes. Apart from what is written there, is there anything you wish to add?
MR CHAN CHI FAI: The shortage of components is a major problem. Well, we used not to have a shortage of components, but we don't know what happened to the procurement department. Right now we are running short of many components and what is required is lacking.

Every year there was a period where the braking component was lacking. And then for each depot they have a working capital cash flow and then the depot would try to find a factory in the next industrial building to buy some components for us. Thank you.

CHAIRMAN: Are you describing a shortage of inventory? Is that the problem, that whereas in the past inventory was carried, but now it is not; is that it?
MR CHAN CHI FAI: In the past, we didn't have a shortage, we could make available components whenever needed. And usually we would check on the components, and we found

that if there is a problem, then we will issue an order, and then when the order gets to the store, the component will be given to us.

And for the past two years, we asked for a certain component which could not be provided to us by the stores.

And there was this incident involving the braking component that I mentioned.

CHAIRMAN: When you say "the stores", you mean the stores department of KMB?

MR CHAN CHI FAI: Correct. Yes, within the KMB.

CHAIRMAN: Do you know where the problem lies? Does it lie with KMB not carrying sufficient inventory now, or does it lie in supplier not being able to supply an order?

MR CHAN CHI FAI: We used to have a procurement department. And they press the button of a computer, and they saw that there was a lack of the component in the inventory, then they will order for them. I don't know what happened to them. And then the components got fewer and fewer, and we think that there is a problem. And when we raised the issue it is already too late. And the component that we are asking are lacking.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Yes. Ms Yip, we have heard evidence previously that the Kowloon Motor Bus has, in one of the

papers -- it was stated in one of the background brief papers, issued to the LegCo, in relation to the February 2018 incident, providing background information on safety of franchised bus operation for the panel meeting on 25 July 2018, and if we go to paragraph 15, it stated there that --

CHAIRMAN: Is this in our bundles or not?

MS MAGGIE WONG: No, that's the bundle referred to by the previous --

CHAIRMAN: Can we have it added to the bundles?

MS MAGGIE WONG: Yes. I think it is now put up on the screen.

The English reads this:

"The KMB advised that if bus captains, regardless of full-time or part-time, had not driven a route for a month or more, they would have to practise driving on that route again."

Ms Yip, and the gentlemen present perhaps, can you advise us whether this has happened, where, if a bus captain had not driven a route for a month or more, they would have to practise driving on that route again?

MS YIP WAI LAM: To be frank, if for two years we have not driven a route, a particular route, then we will have to undergo training by the instructor again. So my understanding, two years, but if you talk about one

month, retraining after one month, I have never heard of that.

MR CHENG HOI YIU: Let me supplement.

Now, if you have been driving a certain route within two years, then you can still drive that route, but for two years, if you don't -- haven't driven that route, then your record on the computer has -- will be deleted.

I have driven 496, and given another route, 47X. Now, after I have driven -- I have not driven 47X for one year, maybe all of a sudden you will be asked to drive that route again, and maybe there will be changes in the alignment of the route and the bus stop. You would still be asked to drive that route. So there is a hazard there. Because we never know what changes have happened to the route.

CHAIRMAN: Are you saying that the computer deletes your qualification, if you like, to drive a route, if you have not driven it for two years?

MR CHENG HOI YIU: Correct.

MS MAGGIE WONG: Ms Yip, you talked about "previously". I think it has not been translated on the screen. You said this two years, if you have not driven the route for two years you would be asked to retrain again, but previously there was not such a requirement. What do you mean by "previously"?

MS YIP WAI LAM: Well, I have never heard that you will have to be retrained after one month.

MS MAGGIE WONG: Since when was this requirement in place? That required bus captains --

MS YIP WAI LAM: That's been the requirement all along. From the day I joined the company, I learned that, say, if you have not driven a route for two years, after being trained on that route, that, your eligibility to drive that route will be got rid of.

MS MAGGIE WONG: Ms Yip, do you drive special shift? Or normal shift?

MS YIP WAI LAM: I am on normal shift.

MS MAGGIE WONG: Is anyone present here driving on a special shift?

MR YAN KIN MING: Yes.

MS MAGGIE WONG: Thank you, Mr Yan.

May I ask your experience in driving special shift in terms of we have heard evidence that some of the bus captains who are driving special shifts for Kowloon Motor Bus were not given three hours consecutive -- three consecutive hours of resting. Is this an experience that you have as well?

MR YAN KIN MING: Yes.

MS MAGGIE WONG: May I know which route you are driving?

MR YAN KIN MING: I drive around 10 routes. And we will,

say, follow the orders, and usually on a day we will drive three routes.

MS MAGGIE WONG: For how long did you take up this special shift, in KMB?

MR YAN KIN MING: Around three years.

MS MAGGIE WONG: Can you tell us, did you take the morning shift or the night shift?

MR YAN KIN MING: There is only one shift in special shift, just the morning shift.

MS MAGGIE WONG: Can you tell us since when, perhaps since when did you start work? For a particular day?

MR YAN KIN MING: Around 6 to 7. Am.

MS MAGGIE WONG: So 6 am to 7 pm?

MR YAN KIN MING: (Answer not interpreted).

CHAIRMAN: When did you last drive a special shift? Yesterday?

MR YAN KIN MING: Correct.

CHAIRMAN: Where do you live?

MR YAN KIN MING: Mong Kok.

CHAIRMAN: What time did you get up?

MR YAN KIN MING: (In English) 5 o'clock.

CHAIRMAN: Where did you go then?

MR YAN KIN MING: After I get up, and I will do something, and then I will go to work.

CHAIRMAN: What time did you leave home? The actual fact,

yesterday. What time did you leave home?

MR YAN KIN MING: 6 am.

CHAIRMAN: And where did you go?

MR YAN KIN MING: The bus depot.

CHAIRMAN: Which is where?

MR YAN KIN MING: On Tsing Yi Island, the bus depot there.

CHAIRMAN: How did you get there?

MR YAN KIN MING: I will take the company bus, the first departure, and then I get to somewhere in Tsing Yi, and then change for what we call a works bus or vehicle which will take us to the bus depot.

CHAIRMAN: Which bus depot did you arrive at yesterday?

MR YAN KIN MING: Also Tsing Yi.

CHAIRMAN: What time did you clock on for work?

MR YAN KIN MING: 7.00.

CHAIRMAN: And after you clocked on, what did you do?

MR YAN KIN MING: Then I will find the bus that I have to drive on that day.

CHAIRMAN: Presumably you have to check the bus?

MR YAN KIN MING: (In English) Yes, sir.

CHAIRMAN: And then did you drive the bus somewhere?

MR YAN KIN MING: And then I drove the bus to the Cheung Hong bus terminus.

CHAIRMAN: What time did you leave Tsing Yi on that journey?

MR YAN KIN MING: 7.20.

CHAIRMAN: What time did you arrive at your destination?

MR YAN KIN MING: 7.30.

CHAIRMAN: What time did you begin driving the route?

MR YAN KIN MING: 7.45.

CHAIRMAN: What route were you driving?

MR YAN KIN MING: X42C.

CHAIRMAN: Where does that route take you?

MR YAN KIN MING: To Yau Tong bus terminus.

CHAIRMAN: Did you drive to and from Yau Tong in the morning?

MR YAN KIN MING: No.

CHAIRMAN: Tell us what you did do.

MR YAN KIN MING: I got to the Yau Tong bus terminus, and then I will use my private -- use the private plate. That means a bus without passengers, and then I went to Tsuen Wan, Discovery Park estate, and then I took a 40M. The bus, I drove that route.

CHAIRMAN: So you went from Yau Tong to Tsuen Wan, and then you drove a route; is that it?

MR YAN KIN MING: Yes.

CHAIRMAN: What was that route?

MR YAN KIN MING: 42M.

CHAIRMAN: Where did you go?

MR YAN KIN MING: To Cheung Wang bus terminus.

CHAIRMAN: And then?

MR YAN KIN MING: I did two rounds on this route, so back and forth twice.

CHAIRMAN: Between Tsuen Wan and Cheung Wang bus terminus?

MR YAN KIN MING: Yes.

CHAIRMAN: And then did you have a break?

MR YAN KIN MING: Yes.

CHAIRMAN: What time was the break?

MR YAN KIN MING: Should be 12.30 or so.

CHAIRMAN: And how long was the break?

MR YAN KIN MING: To 3.20 pm.

CHAIRMAN: And where did the break begin?

MR YAN KIN MING: Well, it doesn't matter where I took the break, but rather I would be given a designated parking space, I left my bus there and then the break started counting.

CHAIRMAN: Where did you leave the bus?

MR YAN KIN MING: Tsing Yi airport station.

CHAIRMAN: What did you do in that break time? Two hours 50 minutes?

MR YAN KIN MING: Lunch and an afternoon nap.

CHAIRMAN: Where did you take the nap?

MR YAN KIN MING: At the Tsuen Wan bus terminus there is room for us to take a rest.

CHAIRMAN: What facilities are there for you to take a nap?

MR YAN KIN MING: There are four sofas, and so I could take

a short nap.

CHAIRMAN: You had a sofa?

MR YAN KIN MING: Yes. Sofa.

CHAIRMAN: How many other bus captains were sharing the facilities at the time?

MR YAN KIN MING: Two.

CHAIRMAN: Once you resumed driving at 15.20, or 3.20, where did you travel to and from?

MR YAN KIN MING: It was at 3.35 that I started driving, because at 3.30 I had to get the bus and went to the bus terminus. So at 3.35 I started driving, route 41A from Cheung On bus terminus to Tsim Sha Tsui East.

CHAIRMAN: And then?

MR YAN KIN MING: Then I went back to Cheung On bus terminus.

CHAIRMAN: Yes.

MR YAN KIN MING: And then I did the same trip again. One round.

CHAIRMAN: Does that bring you to the end of your driving or not?

MR YAN KIN MING: Yes.

CHAIRMAN: What time is that?

MR YAN KIN MING: 8.50 pm.

CHAIRMAN: Where were you when your driving duties came to an end?

MR YAN KIN MING: When I finished my duty, I had to take the car back to the bus depot to fill up the gas tank and then I left the car there and finished the day's work.

CHAIRMAN: When you say "car", I take it you mean the bus?

MR YAN KIN MING: Yes, the bus.

CHAIRMAN: What time had you finished doing all of that, refueling the bus?

MR YAN KIN MING: 9 pm.

CHAIRMAN: What did you do after that?

MR YAN KIN MING: After that I took the works vehicle to go to the urban area and then I took another bus to go home.

CHAIRMAN: What time did you get home?

MR YAN KIN MING: 9.40 or so.

CHAIRMAN: So your day had begun at 6 am, when you left home, and it was complete at 9.40 pm; is that it?

MR YAN KIN MING: Yes.

CHAIRMAN: That was yesterday?

MR YAN KIN MING: Yes.

CHAIRMAN: Today is your day off, is it?

MR YAN KIN MING: Yes.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Thank you.

Mr Yan, you said you were on split shift duty for three years, correct? Or special shift yes.

MR YAN KIN MING: Yes.

MS MAGGIE WONG: Have you been driving those three routes for those three years, or there are different routes?

MR YAN KIN MING: Yes, there are other routes as well.

MS MAGGIE WONG: Is it a frequent occurrence that you have to drive three difference routes on the same day?

MR YAN KIN MING: Yes.

MS MAGGIE WONG: How long have you been working for Kowloon Motor Bus?

MR YAN KIN MING: I have been working for about 3.5 years at KMB.

MS MAGGIE WONG: Throughout this period you have been driving special shift?

MR YAN KIN MING: Yes.

MS MAGGIE WONG: Have you been involved in accidents, road accidents?

MR YAN KIN MING: So far, no.

CHAIRMAN: Well done.

MR YAN KIN MING: (In English) Thank you.

MS MAGGIE WONG: Have you come across any assault incidents or verbal abuse?

MR YAN KIN MING: Every day there is verbal abuse.

MS MAGGIE WONG: Assault incidents?

MR YAN KIN MING: No. No assault.

CHAIRMAN: Have you ever reported verbal abuse to the

company?

MR YAN KIN MING: No.

CHAIRMAN: Why not?

MR YAN KIN MING: Because the company knows, all along.

CHAIRMAN: Have steps been taken to help you deal with verbal abuse, as bus captains?

MR YAN KIN MING: You mean the company, helping?

CHAIRMAN: Yes.

MR YAN KIN MING: No. No.

CHAIRMAN: But on the buses you drive, are there now cameras that focus on the bus captain's seat area.

MR YAN KIN MING: Yes. Sometimes, yes, there is the camera, sometimes not, because every day I drive a different bus and a different route. So for the older models there are no cameras. For the new models there are cameras.

CHAIRMAN: These ones with cameras, do they not have an audio track as well, not just video?

MR YAN KIN MING: As far as I know, yes, some have audio recording, because I see some camera has a microphone.

MS YIP WAI LAM: If I may add, the judge asked what could be done to help us.

Well, actually we mentioned in our submission, we asked that bus captains be allowed to install cameras themselves. Why? Because some buses have cameras, but some don't. And if something happens, or if the police

try to obtain the video recording from the company, company will say, "No, we don't have it". We don't know why. But we want to protect our own personal safety, and actually, if a camera is installed, it sort of alerts passengers that they can be seen, and usually they are really smart, when there is a camera they will be a lot more restrained.

So we are not even asking the company to install the cameras, we are just asking the company to allow bus captains to install the cameras, so before the company installs cameras on all buses, we hope they will allow us to install cameras ourselves. And it is important that --

CHAIRMAN: Just a moment, Ms Yip. You are racing ahead. Slow down. Like your buses.

MS YIP WAI LAM: Yes. Got it.

CHAIRMAN: What was the response to the company, to your request that you be allowed to install your own cameras?

MS YIP WAI LAM: If bus captains are found to have installed cameras we would be disciplined.

CHAIRMAN: Have you ever made this request in writing, to the company?

MS YIP WAI LAM: No.

CHAIRMAN: Why not?

MS YIP WAI LAM: Do you think that if we tell them -- we

think if we tell them and it is going to lead to nowhere, then we won't do it. You know, there is no trust.

They won't even let us install the cameras. They would actually discipline us for installing cameras, so you would think they won't install the cameras.

CHAIRMAN: Well --

MS YIP WAI LAM: Now, if you are the senior manager of course we would be happy. If you were the senior management, we would be happy because we can reason with you.

CHAIRMAN: Do you know, and if you don't know say so, do you know why bus captains are disciplined if they install their own cameras? Has the company ever explained?

MS YIP WAI LAM: It is about privacy, they said. It is about privacy.

CHAIRMAN: Is this something they articulated in writing?

MR CHENG HOI YIU: I think at the induction training the instructors would briefly mention that they would ask us not to install the cameras, and there is a circular too, through various channels they would ask all frontline bus captains not to install captains because of privacy issues.

MS YIP WAI LAM: Also, they said, this is illegal retrofitting, that is if we install camera it would be

regarded as illegal retrofitting.

MR CHAN WING HO: Because this is not a part in the schedule of the parts, and so if it is found it is there, then it is considered illegal.

MS MAGGIE WONG: When was this circular issued?

CHAIRMAN: Let's not get ahead of ourselves.

You said that they issued a circular, Mr Cheng. Can we have a copy of the circular?

MS YIP WAI LAM: Well, usually after we read the circular we won't keep it.

MR CHAN WING HO: And it is not -- it's an internal document; we can't make it public.

CHAIRMAN: We are going to have KMB giving evidence in due course. We will ask them the same questions. So why can't you provide a document to us that explains what this position is?

MS YIP WAI LAM: (Answer not interpreted).

CHAIRMAN: There may be a very good reason why they don't allow you to do this, and we are just trying to find out the facts.

MS YIP WAI LAM: Say, for example, for the travelling time the company considers that confidential information too --

CHAIRMAN: Very well, we don't need to trouble you. We will ask KMB.

Yes, Ms Wong.

MS MAGGIE WONG: Can you tell us approximately when this circular was issued?

MS YIP WAI LAM: A year ago.

MS MAGGIE WONG: And you earlier said that if you install these cameras, you would be disciplined. Who said that? Can you tell us, identify the person who said, "If you install this we will discipline you"?

MS YIP WAI LAM: Usually, if a bus captain breached a certain code, you will be given a piece of paper, a memo, telling you why you are really summonsed to meet with the senior management. So previously, the members have sent us such memo so we know that this is the case.

MS MAGGIE WONG: Would you be kind enough to provide us with those documents? I assume they are not KMB documents. It is a request from your members to the company.

MS YIP WAI LAM: It is a company -- it is a document issued by the company.

MS MAGGIE WONG: It is the KMB issuing the notice to members -- to bus captains.

And did they spell out in the letter that "If you install cameras, we will discipline you"? Did they spell in those terms, very specific about those terms?

MS YIP WAI LAM: It is stated in the circular.

MS MAGGIE WONG: Can I take it that your union would support

the use of surveillance cameras to be installed for the purpose of recording verbally or orally and visually events happened in the bus?

MS YIP WAI LAM: Yes, support.

The last topic, Ms Yip, is we have heard evidence, or the Transport Department provided us with a briefing paper, and informed us as a result of a working group study carried out in mid-March 2018 consisting of five franchised buses, and three bus manufacturers, the working group made a recommendation report which set out three areas of concern: the first is the seat belt; second is the technological device; and the third, training of bus captain.

And the Transport Department informed us that recently they have issued a practice note in relation to the training of bus captains.

MS MAGGIE WONG: So my question is: has Kowloon Motor Bus consulted your union's views in relation to the practice note?

MS YIP WAI LAM: No.

MS MAGGIE WONG: Have you been given a copy of the practice note issued by the Transport Department?

MS YIP WAI LAM: We have never received it.

MS MAGGIE WONG: May I ask your view on some of the technological devices, your union's view on some of the

technological devices.

The first, it is at TD-1, page 403. If we look at 4(a), it is the electronic stability control system. Would your union support the use of this system?

MS YIP WAI LAM: On the safety devices, (a), (b), and 5 and 6, and also the other systems on the third page, after our deliberations, we think these are very good devices.

MS MAGGIE WONG: Thank you.

What about seat belts to be installed on all seats in buses?

MS YIP WAI LAM: Well, it is of course a good thing to have seat belts, but there is a problem arising from this.

If the seat belts are damaged, should buses continue to operate, or do the bus captains have the responsibility to ensure that passengers have their seat belts on? And some elderly persons might need assistance in wearing their seat belt. So these are the problems that we envisage and we are worried about that. But, of course, having an extra safety device is always good. And there are so many passengers patronising bus services, we have to make sure the seat belt is not damaged and once it is damaged then passengers' safety will be jeopardised.

I think the overall direction is good. But in terms of actual implementation we see some difficulties.

MS MAGGIE WONG: Have you had a chance to read the section on training of bus captains, from paragraphs 18 to 22?

MS YIP WAI LAM: Yes, we have briefly read through it.

The training mentioned here -- I mean, not many details are given, but of course the more training the better. But we don't see what bus captains should pay attention in our daily work, that nothing is mentioned in that regard is regrettable.

MS MAGGIE WONG: I have completed my questioning, Mr Chairman. Thank you.

CHAIRMAN: Mr Auyeung.

MEMBER AUYEUNG: I want to follow up on the comment that Ms Yip and Mr Yan made earlier about the abuse that you are experiencing on a daily basis, and yet both of you mentioned that there was no point to report to your management.

Can I hear a bit more about the logic behind that? You refuse to report it because you don't think management is going to do anything, or whatever they do is not going to help? I just want to understand a little bit more. Thank you.

MR CHENG HOI YIU: Well, honestly, we face verbal abuse every day. It is something so common.

Why does this happen? You know, Hong Kong people are under a lot of pressure, and people are fast-paced,

and in view of the manpower shortage in the sector, because of road congestion, which is very common, and passengers may have to wait longer than they expect. So they will vent their anger on the frontline staff.

The management in all companies in the sector is well aware of the situation.

Well, for every route, for every bus captain, that happens. And the management will not do too much, because they can't solve the problem.

MR CHAN HON WA: Let me cite an example. Earlier some members have been physically -- I mean verbally abused by the passengers, and they have reflected the problem to the management. And the bus stops in the middle of the road, the passenger hurling the verbal abuse was waiting on the bus, waiting for the police's handling, and the company's handling, and the company tried to water down the matter, and asked the bus captain to continue with the trip.

CHAIRMAN: Just a moment.

MEMBER AUYEUNG: Please.

MS YIP WAI LAM: Every day we encounter this, and there is this performance management group in the company, maybe there are complaints by the passengers, and we tell the management our side of story, but the company always says, well, just be more careful, and they are not of

much actual help.

I was assaulted, and I was injured, and nobody would be able to help us. And we treat all this as part of our job.

MEMBER AUYEUNG: Thank you.

CHAIRMAN: The police helped you, did they not? Because someone was arrested, someone was charged, someone was prosecuted.

The Department of Justice Helped you, because someone turned up to prosecute the case?

MS YIP WAI LAM: That's correct.

But for the legal section of the company, if they can render some help, that would be better.

Well, the police then were very angry too. Because going by the doctor's report, and other documents, the case seems to be established. But whenever a case gets to the court, the witnesses are not willing to come forth. So a camera will help very much.

So that's why we have been advocating for a camera on board all the time. That can also protect the passengers as well. If, say, we do anything bad then the passengers can also monitor us as well.

CHAIRMAN: Yes, thank you.

MEMBER LO: I just have a follow-up question.

In your 18-day training session, have they trained

you about how to handle verbal abuse? Would they advise you to say nothing? Would they advise you to report? What is the procedure to handle verbal abuse during the training section?

MS YIP WAI LAM: They always say that you should use some skills, deploy some skills in your language to deal with the matter.

Now, at a time when you don't even have time to go to the toilet, and then when you get on board the bus people hurl verbal abuse against you, and they will even make comment about "Have all the bus captains died? We were made to wait so long", and so on.

So if we were able to have a longer rest time we would be better able to deal with own emotions.

The problems arise from many factors. If we do have a sufficient rest break we would have a higher EQ, we would deal with such situations better. We hope that improvement can be made gradually so that the relationship between the two parties can be improved.

The company has done that, but in actual fact, I mean, it is not very effective.

CHAIRMAN: How are bus drivers particularly selected for this kind of abuse, or do you see tram drivers, and the Star Ferry coxswains being abused in the same way? Or is it bus drivers that are particularly selected?

MS YIP WAI LAM: For tram drivers, well, usually there is not much congestion on the road for them.

And for members of the public, when they have conflicts with us, they get agitated, because the schedule is not adhered to.

So that's a problem besetting the KMB for a long time, and I don't know why there has not been a solution so far.

We set up this union, we want to safeguard passengers' safety, but we are seeing so many confrontations of conflicts with the passengers, and after discussing with the passengers we know that the main cause of the problem is lost trips.

Well, you can imagine if a passenger waits for half an hour before he can get on the bus, and he would say something like, "Have all the bus captains died or what?" And then maybe the bus captain is stuck in a traffic jam for an hour and he gets only a few minutes break, and he has to get back to work after going to the toilet, and the bus captains will not be in a good mood either. So we can't blame, put all the blame on the passengers.

As what the Chairman said, why are bus captains seeing the worst problem? Because for MTR driver there will not be any lost trips, it happens only two to three

times every year.

I can give you some preliminary figures, for every day, in every depot, some several dozen buses are not being in operation.

So the turnover, the wastage of staff is so very serious, and we are seeing more serious conflicts between the passengers and bus captains.

It has a lot to do with the bus trips, some passengers are nice, and we are under pressure.

Thank you.

CHAIRMAN: Thank you. That gives us a flavour of what we had in mind.

We do have one more union to hear evidence from, so we will thank you for attending. Thank you for your evidence, and for assisting us. If you would provide whatever documentation it is that you have undertaken to give us, we would be grateful.

We will take a two-minute adjournment now and see if we can't resume with the final union, the Part-time Drivers Union shortly. Thank you.

(5.02 pm)

(A short break)

(5.11 pm)

REPRESENTATIVES OF PART-TIME DRIVERS UNION: MR KENNETH MA, MR LEO CHA, MR GARY CHENG, MR KENNETH CHEUNG, MR JASON NG, AND MR ALEX LEUNG.

(Evidence given in Cantonese and English, transcription of the simultaneous interpretation and/or English)

CHAIRMAN: Mr Cheng, and representatives of the Part-time Drivers, we thank you for accepting the Committee's invitation to give evidence to the Committee to assist us with gathering information about how buses are operated so that we are better able to make recommendations to ensure safety in the future.

Ms Wong will ask you questions in a moment, designed to draw out from the written submissions that you have made points that need amplification.

If you, Mr Cheng, wish one of the other members to answer a particular question, please defer to that member, and we will happily hear from that other person.

Ms Wong.

MR ALEX LEUNG: (In English) Thank you, before the questioning starts, can we have two minutes to express a certain view for the part-time bus drivers.

CHAIRMAN: Certainly if you wish to make an opening statement, do so.

MR ALEX LEUNG: (In English) We do indeed.

CHAIRMAN: Bear in mind it is being translated. So if you speak at a speed that allows the simultaneous translator a reasonable chance.

OPENING STATEMENT BY MR ALEX LEUNG

MR ALEX LEUNG: (In English) I'll try to keep it slow.

Thank you for everybody's time today. After the -- well, first of all, the Part-time Bus union as we sit here, we are not a registered union under the union Ordinance. We are a group of part-time bus drivers who got together after the tragic incident on 10 February.

Shortly after that, KMB have stopped duty allocation to us, and we were very upset about this. Because the immediate reaction after the accident was the driver was a part-time bus driver, and as a result, we as a group of part-time bus drivers were under immense unjust, unfounded and untrue attacks from other trade unions, other members of the public, which has led to a suspension of duty allocation to us.

And that's why we have got together as a group.

We think the part-time bus drivers are as professional and as competent as many full-time bus drivers, if not more.

I personally have experience of 15 years as a part-time bus driver. I think we all here are very experienced and professional. We drive with pride, we

serve customers also with pride, and so we are quite upset, even until now still some sort of prejudice exists against us.

When you look at the report by KMB about the accident to the Transport Department --

CHAIRMAN: You are talking about the one that is on our website?

MR ALEX LEUNG: (In English) Yes, which I think was issued one month after the accident. When the Transport Department asked Kowloon Motor Bus if they have identified any kind of deficiency in the recruitment of drivers, the response of KMB is, "We have stopped recruitment of part-time bus drivers immediately".

This is in fact implying that part-time bus captains are inferior, and unprofessional. We are strongly denying that, and we were very, very upset by this kind of reference.

So that concludes our opening remark. And I will pass the floor to Ms Wong.

CHAIRMAN: Thank you.

Before we proceed, it would help us if you could identify which of the various bus companies you work for? Can I invite you to just tell us? Who is KMB? (Indicating).

That's four of you are KMB.

MR LEO CHA: (In English) I am Long Win Bus.

MR KENNETH MA: I was fired by KMB because of this accident.

CHAIRMAN: So you are no longer employed.

MR KENNETH MA: (In English) Yeah.

CHAIRMAN: Because of this accident?

MR KENNETH MA: (In English) Yes, because KMB raised some criteria, for part-time bus driver. I don't accept their criteria, KMB raised -- issued, sent a letter to me. I replied them through e-mail. One copy I cc this IRC Committee.

And after that, I heard from my friend who worked in KMB, I was know that I was fired by KMB because I have not replied them.

But actually I have replied them through e-mail.

CHAIRMAN: Right.

MR KENNETH MA: And I now work for New World First Bus as a part-time bus driver.

CHAIRMAN: So the upshot, Long Win, one of you, you, New World First Bus, you, the other four KMB.

Thank you, Ms Wong.

EXAMINATION BY MS WONG

MS MAGGIE WONG: Thank you, Mr Leung and gentlemen for coming.

As you know, the terms of reference for this Committee is focused on safety aspects or safety related

measures for operation and management of franchised buses. So my question will be focused on those areas. I hope you can understand.

About your union, I believe it is a Facebook group which comprised of over 600 members. Is that correct?

MR LEO CHA: (In English) Yes, correct.

MS MAGGIE WONG: And I believe Mr Cheng was authorised by 100 part-time bus drivers as representative in this union to express views on behalf of them?

MR JASON NG: (In English) That is correct as well.

MS MAGGIE WONG: Do you know which company, or which franchised buses these 100 part-time bus drivers work for?

MR JASON NG: (In English) All these drivers are under KMB but it is affected by the suspension of duty deployment.

MS MAGGIE WONG: And may I know how long you have worked as part-time bus captains for KMB?

MR JASON NG: To whom?

MS MAGGIE WONG: For all of you.

MR ALEX LEUNG: (In English) For KMB, I joined in 2014.

CHAIRMAN: But you have 15 years as a part-time bus captain?

MR ALEX LEUNG: (In English) I previously worked also for other bus companies.

CHAIRMAN: In Hong Kong?

MR ALEX LEUNG: (In English) In Hong Kong, that's right.

MR JASON NG: (In English) Me as well, I started with KMB in 2014 as a part time driver. I personally have driven buses over 10 years, that included driving oversees.

MS MAGGIE WONG: Mr Cheng?

MR GARY CHENG: (Interpreted) I worked in KMB for three years, and I worked in some other bus companies before that.

CHAIRMAN: Franchised bus companies in Hong Kong?

MR KENNETH CHEUNG: (Interpreted) Franchised and non-franchised.

CHAIRMAN: For how many years?

MR KENNETH CHEUNG: (Interpreted) I started driving buses in 2011. I served as a full-timer for three years and after that I served as a part timer.

MR GARY CHENG: (Answer not interpreted).

CHAIRMAN: Is there a problem with the transcription?

INTERPRETER: Sorry, the interpreter forgot to switch the button over to English.

CHAIRMAN: Could I ask Mr Gary Cheng to repeat what he said.

MR GARY CHENG: (Interpreted) My first job was with the New Lantao Bus Company as a part-time bus captain and then thereafter I worked for KMB for four years as a full-timer, and then thereafter Citybus part-time bus captain, and then I returned to KMB and have worked as a part-time bus captain for one year, so I have in total

14 years experience in driving buses.

MR LEO CHA: (In English) I've been working for KMB starting from 2016 at early 2016, and changed to Long Win Bus starting from this April.

MR KENNETH MA: (In English) I've worked for New World First Bus as part-time bus driver for about 5.5 years, and worked for KMB as part-time bus driver for about three years.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Thank you.

Thank you for your submission, I believe you made one submission that is dated 22 April 2018, and that could be found in TU bundle 1C, at page 293 to 294, translation 294-1 and 294-2.

There are two matters I wish to raise arising from this submission.

The first, on page 294-1 at the bottom. You stated at the bottom that:

"Since formation, our union has been emphasising that part-time (or hourly-paid) and full-time bus captains should be given the same treatment."

The "same treatment", are you referring to the pay treatment or the training treatment? In what sense are you referring here?

MR JASON NG: (In English) I am a little -- can you repeat

your question? I'm a little unsure what you are asking about.

MS MAGGIE WONG: Because at the bottom you mentioned that your union has been emphasising part-time and full-time bus captains should be given the same treatment. So "same treatment" of what?

CHAIRMAN: Perhaps you could read out more of what is asserted.

MS MAGGIE WONG: You further stated:

"Regardless of training, supplementary training, remedial training, appointment and requirements for dismissal, the same standards should be adopted by bus companies. During recruitment by franchised bus companies, examiners and driving training instructors perform their gate-keeping role by selecting suitable candidates stringently."

So by referring to "same treatment", are you referring to the fact that you should be given the same treatment in terms of training and appointment and dismissal requirements?

MR ALEX LEUNG: (In English) Ms Wong, I don't want to blame this as a loss in translation, but I think what we were trying to say is it is part-timers and full-timers are already under the same training treatment.

And we would recommend, if possible, for all new

joiners to go through a psychiatric test, or psychology test to make sure they are able to handle the stress of driving and rogue passengers.

MR JASON NG: (In English) I would like to add on. Like what Alex is saying, is, what we are stating is that the company has been providing the same kind of training between the full-timers and the part-timers, from our standpoint we don't see any differences in there, in any kind of training.

Because from what we hear from the public there has been different opinions and voices and, you know, justice regarding the part-time drivers, which, like what we stated, we thought was unjust.

So what we are saying is any kind of training, safety measures, or whatever kind of suggestion, should have been -- sorry, should have been provided or requiring both full-timers and part-timers.

So what we are talking about here should not be focusing -- or there should not be any differentiation between full-timers and part-timers, so to speak.

CHAIRMAN: We have your point.

MS MAGGIE WONG: Yes, and about this same treatment for bus captains, I'm going to take you to a document from the KMB. It appears there is a difference in terms of training for full-time and part-time bus captain. In

short, for full-time bus captain they have to undergo an 18-day training for 9.5 hours a day.

And we can see that in KMB-1 bundle at page 120.

MR ALEX LEUNG: (In English) Ms Wong, I believe those are for drivers who only have class 1 licence before joining, whereas in our cases, we already have class 10 licence before joining KMB.

So inherently they are two different groups of people.

MS MAGGIE WONG: Yes.

That's what I'm trying to drive at. Because technically they do differentiate training between full-time and part-time bus captains.

I understand what you are trying to say, but they do have a difference in terms of training.

And may I just take you to that document, because I just want to see what you say, if certain suggestions are made.

Page 120. We can see, the three requirements for full-time bus captain candidate, and the second one also requires the full-time bus captain to pass a driving test which is a class 17. And class 17 is a public bus franchise driving licence.

So you have to go through the Transport Department to get that licence, quite apart from undergoing

an 18-day training and the driving test administered by instructors.

But for part-time bus captain, if you look at page 121, all that requires, it appears, is that a part-time bus captain with class 10 or class 17 driving licence, and then you can undergo a 2.5-day training for 9 hours a day and pass the driving test.

So it appears the prerequisite is to have a class 10 or class 17 driving licence.

But once you get that, all you need to do is to undergo a 2.5-day training for nine hours, and then a driving test.

MR JASON NG: (In English) Ma'am, if you look at it, it says "pass the driving test administered by instructors".

Now, the instructors, that is an internal exam carried by KMB. So, if you do not pass that, they will not hire us even though we have a class 17 or class 10 licence.

Now, that is very much a -- in fact, it is a higher standard than hiring a full-time driver.

I was sitting here listening to Ms Yip when she was testifying. She said 18 days was not enough. But when we pass the driving test by KMB, we are actually taking the bus on the road. It is a road test, which is even more extensive than the drive test given by the TD.

So the prerequisites, you are right, it is different. In fact, our prerequisite is higher than the full-time drivers.

So you are correct, they are different. But we are higher.

MS MAGGIE WONG: I think your union is the one that suggested to have psychological assessment to be carried out by the government or third party as part of the assessment to be a bus driver, if I understand correctly. Is that your submission, or proposal?

MR ALEX LEUNG: (In English) Yes, that's right.

CHAIRMAN: Where do we find that? 294-1.

MS MAGGIE WONG: Line 4, from the bottom.

Why would you make that suggestion?

MR ALEX LEUNG: (In English) I think when we made that discussion, we were referring to obviously the tragic accident on 10 February. There were news reports which said the driver had some complications with the passengers waiting at the racecourse at the time which have sort of affected his emotion. And -- well, before the conviction, I could not speculate. But it was reported that as a result --

CHAIRMAN: I think you perhaps mean before the trial.

MR ALEX LEUNG: (In English) Well, yes, thank you.

So that's why we make that suggestion, that may be

you never know, there is something in your brain that is just waiting to explode.

MR JASON NG: (In English) May I add on again? In fact, I did some study about bus accidents.

Now, if you recall in 1997 or 1998 there was a bus flipped over in Wan Chai, okay? When you looked at that case, actually, the determine of the route cause was an emotional breakdown or some psychological problem of the bus drivers that was undetectable.

CHAIRMAN: Was this a crash that occurred on an elevated --

MR JASON NG: (In English) Correct, on the flyover, yes.

MR LEO CHA: (In English) Fleming Road incident. Tonnochy Road, I'm sorry.

MR JASON NG: (In English) So anyway, that accident.

So we looked at some documents and reports, and that's what the route cause was for that particular accident, which, similarly, flipped the bus over.

So applying that case to here, that could be one of the cases or one of the reasons or that could -- having a psychological test or some kind of emotional training could help detect that.

So we don't know. Like, what Your Majesty just said or Justice just said, the trial hasn't been carried on. We don't know what was the cause, but you were asking for our suggestion, and when we looked at the past data,

that's what we got.

MS MAGGIE WONG: Yes.

And the second proposal, I believe is in your first paragraph. Your union also supported the use of or installation of video cameras by bus companies on all buses to protect safety of bus captain passengers, and other road users. And so you supported the idea of having surveillance cameras in the bus?

MR JASON NG: (In English) Yeah, we do, 100 per cent yes.

MS MAGGIE WONG: And may I ask another topic.

We have heard evidence from some of the franchised bus operators stating that for part-time bus captains they don't require the bus captains or rather the current regulations or current guidelines don't appear to require the part-time bus captains to declare the working hours prior to their work as part-time bus captain.

So in other words, one of their worries or concerns is that they don't know how many hours part-time bus captains have been working prior to becoming part-time bus captain.

CHAIRMAN: I'm not sure that has been expressed as a worry or a concern of them.

MS MAGGIE WONG: It is not them.

CHAIRMAN: It is a matter that engages our interest.

MR JASON NG: (In English) It don't matter. I do want to answer that. Because let me ask you a question? How do you regulate a full-time driver having enough rest between shifts? You can't.

You see, when I look at it, it is like drunk driving. We expect all drunk drivers when you sit behind a wheel to be completely sober. So we expect all drivers, when they sit behind a wheel, to be completely rested, alert, when they go on a shift.

So I don't understand why we are so hung up on this topic.

CHAIRMAN: We don't require all drivers to be completely sober. We set a threshold, and it is the same thing --

MR JASON NG: (In English) Well, for bus drivers we do.

CHAIRMAN: It is the same approach for looking at part-time captains, or, for that matter, anyone else, to try and do the best one can to -- practically, to better achieve safety, and the real question is this: at the moment it appears prior to this accident in February no information was gathered as to what part-time bus captains did in their other job.

And that is the issue that engages our interest.

MR JASON NG: (In English) Well, I don't know about other bus companies, but at KMB, when we report to a shift or duty, we have to sign -- or in the past, we had to sign

a document or declaration saying we are in good state to operate a bus.

Now, is there something that -- is there something you are looking for? I don't know. Now, is that enough, I don't know --

CHAIRMAN: That's a bland statement with no possibility of an audit check.

MR ALEX LEUNG: (In English) Maybe I can add on it.

Back in 2014, when I first joined KMB as a part-timer, I was required to declare my full-time jobs, and, well, external dealings, and I understand that even for Citybus and New World First Bus they required a part-time bus driver to declare annually the full-time jobs, or other jobs, the hours required, whether they are on shifts for the other --

CHAIRMAN: Citybus have introduced that as a new form, not that they did it in the past.

MR ALEX LEUNG: (In English) Well, I think they did it in the past.

CHAIRMAN: They have given us a form that which is very comprehensive --

MR ALEX LEUNG: (In English) There was a new form. I understand that there was an old form in which part-time drivers were required to declare their full-time jobs.

Of course they have extended the list to cover whether it is shift work, how many hours they work.

So we do -- we did have to declare, it is not something new, but I think we also we are grown up people, we take responsibility of our act, you know, if we are not fit for reporting a duty we just call in sick like the full-time bus drivers do all the time.

CHAIRMAN: Let me ask you gentlemen. You don't have to answer if you don't wish. Let me ask you one by one.

Do you have other work, and if so, is it a driving job?

MR ALEX LEUNG: (In English) Well, I do have other work.

CHAIRMAN: Is it a driving job?

MR ALEX LEUNG: (In English) I work in an office, I have multiple jobs, put it this way.

CHAIRMAN: Is any one of them a driving job?

MR ALEX LEUNG: (In English) Yes, there is one.

CHAIRMAN: Thank you. Mr. Ng.

MR JASON NG: (In English) No.

CHAIRMAN: No other job?

MR JASON NG: (In English) Yes other job, but not driving job.

CHAIRMAN: Thank you. Mr Cheung.

MR KENNETH CHEUNG: (Interpreted) Yes, I have other work, and there is a chance of me having to drive, even when

I go to work myself I drive.

CHAIRMAN: Yeah.

MR GARY CHENG: (Interpreted) Yes, I have other full-time work. I also have a chance to drive.

MR LEO CHA: (In English) I also have another job, and I'm a civil servant in Lands Department.

CHAIRMAN: You are driven to distraction rather than driving!

MR LEO CHA: (In English) Yes.

MR KENNETH MA: (In English) I have other full-time job but no need to drive.

CHAIRMAN: Thank you. That's a useful snapshot for us.

Yes, Ms Wong.

MS MAGGIE WONG: One of the changes made by the Citybus in the new form is to require part-timers to make a declaration as to the number of hours they have worked previously, or prior to becoming part-time or taking up part-time bus captain.

Would you support that idea?

MR KENNETH MA: (In English) I support that idea. The new form used by Citybus and New World First Bus is more comprehensive than in the past.

MS MAGGIE WONG: And would that be a view shared by the entire union or your Facebook members?

MR ALEX LEUNG: (In English) I think we would support

transparency, let's put it this way.

MR JASON NG: (In English) I personally would support it only if they will require the full-time driver to do the same. By that I mean if I need to declare what I've been doing outside of my driving time, wouldn't you worry about if the full-time driver went party overnight before they report to work? I would.

MS MAGGIE WONG: We have seen a table that has been kindly pulled up, showing the requirements that are required to be filled in. If we can scroll it up, because you will see at the top of the form.

CHAIRMAN: Can you give me the reference in the files?

MS MAGGIE WONG: That would be in CTB-571.

CHAIRMAN: CTB1?

MS MAGGIE WONG: CTB-3.

CHAIRMAN: Thank you.

MS MAGGIE WONG: And the translation can be found at page 571-1 and 571-2.

It requires part-time bus captain to sign a declaration form setting out the hours of work in a column, need to work in shift, and with a declaration showing that the information filled in is correct. Otherwise there would be disciplinary consequences.

So by that I mean it requires part-time captain nowadays to declare that.

And similar has been done for, I believe, Kowloon Motor Bus; is that the case?

MR ALEX LEUNG: (In English) Correct.

CHAIRMAN: Do we have a Kowloon Motor Bus form in the same terms?

MS MAGGIE WONG: Yes.

CHAIRMAN: Just give me the reference, if you would. There is no need to turn it up.

MR ALEX LEUNG: (In English) I want to add that this form is an annual declaration, but not every time you start a duty.

CHAIRMAN: Obviously not that.

Ms Wong, is there anything on the form that requires the information to be updated?

MS MAGGIE WONG: No.

That would be at page 128 to 129 of KMB-1 bundle. And the translation at 129-1 to 129-2.

CHAIRMAN: Thank you.

MS MAGGIE WONG: The topic I would like to ask is, I believe Mr Kenneth Ma earlier mentioned that the Kowloon Motor Bus set up a new requirement for part-time bus captains, and it required them to -- it set up a few requirements for part-time bus captain to accept before they can continue.

If I may take you to KMB bundle 1: page 140 to 141.

And that is a submission submitted by the Kowloon Motor Bus to the Commissioner for Transport in response to the incident in February 2018.

And at the bottom it states this:

"In late March 2018 most of those 209 part-time [bus captains] have accepted our requirements. We have assigned driving duty to them after they have met the following requirements:

1. Having made a written declaration that being a part-time [bus captain] does not breach the employment contract of his/her full-time job;

2. Having made a written declaration of illness;

3. Having made a written declaration of criminal record;

4. Having passed traffic conviction record check; and

5. Having attended a full day remedial training if the [bus captain] involved has not been driving a bus for one month or more."

And it set up the latest status of the 209 part-time bus captains.

My first question may be for Mr Ma first. Are those the requirements you mentioned first that you refused to agree to, or are they different?

MR KENNETH MA: (Interpreted) I don't accept point number 1.

(In English) Written declaration that being a part-time bus captain does not breach the employment contract of his or her full-time job.

(Interpreted) I don't accept that.

The KMB had a second meeting with our union that took place in the Kowloon Bay depot, and they first raised this. In the first meeting, the KMB had never mentioned about this point.

So for myself I don't accept that.

As for second requirement, declaration of illness, during my service as part-time bus captain, every time when I try to get a bus from the depot I have to sign a declaration stating that I am fit to drive on that day.

And also we have an Octopus card which enables -- well, as long as we tap the Octopus card into the Octopus card reader at the depot, that means we have made that declaration.

Now, for item 3 and 4, these are reasonable requirements, we don't have a lot of driving points deducted, then we can drive safely.

And that has to do with safety and we think it is reasonable.

And the fifth point about driving a bus for one month or more, we have never heard that before. We have

never heard the saying that if we have not driven a bus for more than one month or more, then we have to attend this training. No, I have never heard about that before.

MR JASON NG: (In English) I know there was a little confusion for item 5. So I think there is a little confusion between route training and driving training.

Now, as far as I know, which has been a practice at KMB for a long time, is that if you have not been reporting -- or if you have not been sitting behind a wheel driving the bus for over 30 days, you are required to attend a driving training and get cleared by the instructor before you can go back on your driving duties.

Now, I think that's what point 5 is referring to. But, the wording in point 5 said if you have not been driving a route, one particular route for 30 days, then you have to retrain for that route. Now, that's something we have not heard of.

MS MAGGIE WONG: Thank you.

That's what I am trying to ask you, because we have received a background paper from the LegCo. We are going to pull that up for you.

I'm sorry we don't have hard copies.

MR ALEX LEUNG: (In English) I think we are aware of the

point you are trying to make. We picked up when Ms Yip was doing her testimony.

Well, the current practice is, if you have not, as Jason has just mentioned, if you have not driven a bus for one month you have to go back to training, and then for a particular route, if you have not driven on that route for two years, then your training record of that route will be erased. That means you will have to go on training again before you can drive on that particular route.

Take an example. If I have done route 2 in 2014 and have not done it since, then I would not be able to drive on route 2 today.

MR JASON NG: (In English) On top of that, in the route training session, if there is certain deviation that it made on the route, for example a route extension, a deviation of route, you will have to be retrained, or your training record will be erased as well. So you will not be -- for example, like, if I have been doing -- if I have gone through training for route 2, and if they have -- for example, one year went by, and they have extended the route, and I have not been retrained again, then I will not be able to drive on that route again.

MS MAGGIE WONG: On this aspect, since we are on this KMB

bundle, can I take you to KMB bundle 1, page 104.

CHAIRMAN: What are we going to?

MS MAGGIE WONG: This is a report of the investigation report filed by the KMB to the Commissioner for Transport following the request by the Commissioner for Transport on 12 February 2018.

This report is dated 12 March 2018. If we may go to page 104 setting out the recommendation of Kowloon Motor Bus, and at paragraph 13 with the heading "Discontinuance of Employment of Part Time [bus captains]

Paragraph 13 states:

"KMB has discontinued the employment of all part time [bus captains] whose working hours fall below 18 hours per week. However, in order to meet the demand for bus services during peak hours, KMB has already offered the previous part-time [bus captains] the option to convert to contract hourly rated [bus captains] or to take up alternative duties in the company."

So my question is, has this happened?

MR ALEX LEUNG: (In English) Yes, it has.

MS MAGGIE WONG: And in what aspect?

MR ALEX LEUNG: (In English) For instance for the six of us sitting here, Mr Ma has not accepted this offer, I personally have opted for a 10 hours week duty, and

I think other members have opted for 18 hours -- more than 18 hours per week arrangement.

CHAIRMAN: So what KMB did was discontinue hiring bus captains who worked less than 18 hours a week, but they permitted you to sign up to 10 hours a week?

MR ALEX LEUNG: (In English) Absolutely.

I think let me -- I can understand your feeling about, because it is counterintuitive. We were working as casual drivers. They are weekends -- I usually work on weekends, usually Saturdays.

It was a time when if I am engaged, I would just call in and say I'm not working this particular weekend, but with this new arrangement, there is some kind of a pressure for us --

CHAIRMAN: You have to 10 hours a week.

MR ALEX LEUNG: (In English) To do 10 hours a week, despite the fact that I really cannot make it most of the time.

CHAIRMAN: Yes.

MS MAGGIE WONG: So if we go to page 141, we can see the numbers of part-time bus captains that have agreed to this arrangement in that table in the first and second row.

"Agreed to work more than 18 hours a week", that would be 78.

And "Agreed to work over 10 hours a week; declare

doing part-time [bus captain] at KMB will not breach the employment contract with their employer ..."

Being 123. So, Mr Leung, you would be in the second category.

MR ALEX LEUNG: (In English) Absolutely.

MS MAGGIE WONG: About this arrangement, do they require you to separately sign a declaration form as to how many hours you have worked, for example on that day, prior to taking up duties as part-time bus captains?

MR ALEX LEUNG: (In English) I'm not aware of that.

MS MAGGIE WONG: About this 10 hours a week, can you utilise it in one go, like you can drive --

MR ALEX LEUNG: (In English) I can do five hours a day for two days, I can do one shift of 10 hours. That's not a problem. It is quite flexible.

MS MAGGIE WONG: As long as you do it within the week.

MR ALEX LEUNG: (In English) As long as I do 10 hours.

MS MAGGIE WONG: If I may ask you to look at page 124 of the KMB submission. It sets out the KMB's policy on part-time bus captains in (i).

Can you look at that and confirm, or rather let us know whether it reflects the KMB's treatment of part-time bus captains before February 2018?

MR JASON NG: (In English) Ms Wong, just glancing through, as I stated earlier, I think the first two bullets, as

I told you, I think our entry requirements are higher than the full-time bus drivers, because we have to have undergone a driving test that was carried out by the instructor at KMB.

And --

CHAIRMAN: So they are not the same, they are higher?

MR JASON NG: (In English) In my opinion they are higher. And I think all six of us can comment on that as well. As far as the other bullet points below, I would have to agree to that.

MS MAGGIE WONG: Thank you.

If one were to suggest that there be a requirement for KMB to require all part-time bus captains to fill in a declaration form declaring the number of hours they have worked before taking up duty as part-time bus captain, would your union be agreeable to this arrangement?

MR JASON NG: (In English) See, I still don't understand why we are still asking these questions. I think it is by law you cannot drive more than 14 hours a day.

Now, if you drive over that, I think that's breaching the law; am I correct?

CHAIRMAN: It is not a question of the law. It is a question of enforcing the law. And you can only enforce the law if you have knowledge of what the person

has done.

MR JASON NG: (In English) And like what Kenneth just said, when we tap card to report to duty we already declare that.

CHAIRMAN: I am sorry, could you repeat that.

MR JASON NG: (In English) When we report to duty with our Octopus card, that is already confirming and affirming that we are complying all the laws and we are capable and suitable of driving the bus that day.

CHAIRMAN: The issue that is outstanding is this: what if you have been driving a coach all night, and you turn up to drive in the morning. How is the bus company to know that you cannot comply with the guidelines? How is it to get that information to enforce the law that you advert to?

There may not be an immediate answer to that. But that's the question.

MR JASON NG: (In English) Well --

MR ALEX LEUNG: (In English) I would just repeat that we are fully aware of the consequences, the particular criminal consequences of fatigued driving. We are all grown up people. We are not here to -- well, there is a popular saying amongst bus drivers, you have one foot in the prison cell, and you have one foot in the mortuary. So we are fully aware of the consequences.

CHAIRMAN: Well balanced drivers?

MR ALEX LEUNG: (In English) Yes, thank you.

MR JASON NG: (In English) Well, let me add on that. I gave some thoughts to that.

So you would rather us to sign a paper saying that I have not been driving for, say, nine hours, on other circumstances, on top of tapping the -- when we report to duty, tapping our card saying "We are going to drive the bus"?

So --

CHAIRMAN: Tapping your card provides no information at all about what you have been doing prior to that.

MR JASON NG: (In English) Well, tapping the card means you are accepting the duty which means you are understanding the consequences that you are not -- if you are not complying to the law.

That also included -- if you say, for example, like what I said earlier, if you have consumed alcohol, by tapping the card I -- my understanding is you are implying you have not been consuming, and you are in good state on driving the bus.

CHAIRMAN: That's why for enforcing alcohol laws we have breathalysers.

MR JASON NG: (In English) Right, but you don't --

CHAIRMAN: You can get in the car, thereby declaring you are

fit to drive.

MR JASON NG: (In English) Right, but the thing is, you don't have to do a breathalyser test every time when we get behind a wheel, or you don't do that on all 3,000 drivers at KMB every day.

CHAIRMAN: Ms Wong.

MS MAGGIE WONG: Yes. Mr Chairman, I've finished my questioning. Thank you.

CHAIRMAN: Gentlemen, those are the questions we have for you. If there is any closing statement that you wish to make, don't feel that you have to, but if there is anything you wish to say, we will give you the opportunity.

MR ALEX LEUNG: (In English) Thank you, Justice Lunn.

I think what we are trying to reiterate is there has been a very unjust perception formed about the professionalism of our part-time bus drivers. I hope today's testimony has changed that perception, and I cannot care more about the public, but I think the three gentlemen in front of me would have a much better understanding of what a typical part-time bus driver would be.

Again, I want to repeat that we take pride in driving, we enjoy driving, we like serving passengers from different areas, all walks of life, and we just

like doing this. And it will be devastating for us if we are barred from working as part-time bus drivers. That will be the most undesirable outcome for us here. And we will be very unhappy about that.

CHAIRMAN: May I ask you this.

How typical are you six gentlemen of part-time bus captains? What I have in mind is, in particular, the New Lantao Bus Company, where I think one-third of the bus drivers are part time? Are you typical of them or are they quite different from you?

MR ALEX LEUNG: (In English) I personally have never worked with New Lantao Bus Company.

It may be for Mr Cheng to give elaboration.

CHAIRMAN: Thank you.

MR GARY CHENG: (Interpreted) Actually, as part-time bus captains, maybe we all do it differently. But I think the primary reason is because there is more flexibility in the working hours. For many part-time drivers, they want to take two days off in the week. That's why they choose to become part-time drivers. Of course, at the expense of certain benefits that full-time drivers enjoy. But then they want freedom, more flexibility. So that's why some people choose to become part-time drivers. That's really the issue.

As for the New Lantao Bus Company, how come

one-third of the bus captains are on a part time basis? I think it is because it is only on weekends they have huge patronage because people will go to Lantau Island on weekends for sightseeing and that's why they need more bus drivers on weekends. So that's why there is a bigger demand for part-time drivers, probably.

So it is all about flexibility.

And, say, when I'm free then I will come and work part time. For me, anyway, it is because it fits in with my schedule, that's why I take up the part-time job.

MR LEO CHA: (Interpreted) Perhaps let me supplement in Cantonese, and I'm free to say what I want to say.

Now, before this tragic accident, for Long Win there is a serious problem of lost trips. I think between 2016 and 2017 because of the expansion of the service for the A series of routes, so that's why for North Lantao Island there is a higher lost trip rate.

So there are relatively more serious problems with some of the routes, and that's when the part-time bus drivers can come in to help remedy the situation.

Going back to the question raised by the counsel earlier, for KMB and Long Win Bus, bundle 1, page 124, it is whether KMB treats part-time bus captains equally, (i). The answer is yes. For both full-time and

part-time bus drivers they are treated equally. Every day, before we start work, we have to tap the Octopus card as a few of my colleagues mentioned already.

We have to tap our Octopus card on the reader in the regulator's office, and that is equivalent to a declaration of our health status, enough rest, that we are fit to serve as a part-time driver on the day.

That's something that the KMB has been doing all along. Anyway, since I joined KMB in 2016 and then I switched to Long Win, all along this has been the practice.

MR GARY CHENG: (Interpreted) Finally, I would like to make this suggestion to the Committee.

All along, we are talking about bus drivers. But what about passengers? Have we considered any measures that could target the behaviour of passengers? You know, Hong Kong people start complaining when they have to wait a long time, and as long as they are not happy they will make a formal complaint, they like to do that. So it is not about monitoring the speed of buses, don't worry, the bus passengers will call and complain.

So there are plenty of channels for passengers to make complaints but there is no channel for bus drivers to complain against passengers. Even if the passenger is in the wrong we can't complain against them because

there is no channel for us to do so.

CHAIRMAN: We are very much alive to this issue, which is why we have been asking so many questions about the use of CCTV with both video and audio function. And why we are interested in forward-looking CCTV on buses so that illegal parking could be picked up, not just picked up, but then enforced, the law enforced. Without being enforced, the law is meaningless.

MR JASON NG: (In English) I completely agree to that.

I think our question, or our point is, if that's the case, we actually already have the ordinance to regulate the behaviour of passengers. Has that been enforced? Has that been enforced? If so, can we put a bigger magnitude on being enforced.

Like what Ms Yip was talking about, or her colleagues, they are all have been verbally insulted. They said they get verbally insult almost on a daily basis --

CHAIRMAN: As I have said. That is why we are looking at how the law can be enforced. Because passengers do not have a God given right to abuse bus captains.

MR JASON NG: (In English) Correct, so what we saw is if we can look at MTR, actually some of the MTR staff are empowered to enforce and fine the passenger that has obsessive behaviour --

CHAIRMAN: I don't want to lengthen the proceedings, but it has been pointed out to us and is obvious really, railway stations are much easier places to enforce things. A bus captain is one man on a bus out in the open. The train driver can bring his train into a station which he has alerted there is a problem to. And people are waiting to help him. That's the big difference. That's been pointed out to us.

MR JASON NG: (In English) Well, it might have been because manpower issue, like there are supervisors that are on the road, if we can increase that number, maybe that can help relieve that, or increasing the patrol on buses? Would that be something we can consider?

CHAIRMAN: Well, gentlemen, thank you very much, for the evidence that you have given us. It has been most informative. As you can tell, we have various factors we have to balance in making these enquiries. What we are trying to do is seek information, and you have been most helpful.

So these proceedings are adjourned, and I would like to thank the long suffering stenographers and the simultaneous interpreters for working such a long day.

We will adjourn then until 10 o'clock tomorrow.

Thank you.

(6.15 pm)

(The hearing adjourned to 10.00 am on
Wednesday, 1 August 2018)

吳振宇先生，兼職車長（兼職車長苦主大聯盟代表）

主席：（經傳譯員）早晨，郭生，早晨，仲有你嘅同事，我哋感謝你同九巴僱員工會代表接受我哋嘅邀請，出席今日嘅聆訊，畀證供。咁就係黃律師會代表委員會問你哋問題，你哋就決定三位之中邊一位去作答。郭生，我就邀請你，如果你想其他人回答，你就要話係想邊一位回答。開始嘅時候，我知道你係想先作一個嘅--即係講幾句說話，而家可以講。

郭志誠先生：多謝委員會，多謝主席，多謝兩位委員，我哋好高興，等咗好耐，就今次有機會上嚟講兩句說話，發表下我哋工會同埋行業車長嘅聲音，就好難得嘅。

其實我想希望委員會就畀充分嘅時間我哋反映，我哋咁多堂嗰個聽證會我都有出席，咁樣嘅意見大多數都係集中喺監管司機嗰個問題嗰度嘅，嗰個安全嘅。

我亦都有留意到主席嗰個聲明嘅，我哋唔係話要結論有一個咩嘢嘅結果，邊個需要負責，我哋只係提供嗰個安全培訓同埋其他應有嘅討論嘅。希望就委員、主席就聽到我嘅意見，就可以參考。

我哋就希望就--唔知我哋可唔可以有問題提問委員會嘅，或者主席嘅？即係會唔會畀我哋有提問嘅？

主席：（經傳譯員）你今日出席就係嚟作證，咁係我哋就唔係回答，不過就係會聽你哋講嘢。我哋想做就係搵出專營巴士運作嘅情況，等我哋可以向特首作出建議，提升安全，所以我哋想聽嘅就係你哋嘅意見，因為我哋唔係從業員。

郭志誠先生：咁就係因為呢個問題，因為我哋就係在職場從業員，呢個巴士行業就每日有 400 萬嘅乘客，佔香港每天嗰個乘客比例就 31%嘅，其實都係--我哋行業都係好重要嘅。

我發覺就委員會就比我哋所屬嘅工會團體嗰個發言就比較短嘅，其實就我哋係重要嘅持份者嚟嘅，亦都係重要嘅一員嘅，亦都係喺個安全問題嗰個主要掌控者嚟嘅。其實就我哋就好多問題要講嘅，即係我有三份嗰個陳--一份陳述書，兩份--三份補充資料，委員會要求，我哋好多個項目都喺裏面嘅。喺陳述書裏面都係好簡短，即係提幾句大概性嘅，如果係得到充分討論，應該就對委員會日後嗰個結論，或者市民大眾亦都會比較清楚嘅。

係嘞，咁我哋就呢個問題，因為就我發覺琴日嗰個委員會只係問咗幾條比較簡單嘅問題，唔得深入。喺個培訓方面，嗰個車長嘅機械認識方面，嗰個教導方面，即係車長嗰個認識，能唔能夠清楚知道佢揸嗰架車嗰個性能，嗰個操控係點樣嘅，咁完全就忽略咗，忽略咗我哋呢方面嘅意見嘅。即係簡單嗰啲要求，我哋畀一個答案委員會，係贊唔贊成、認唔認同某啲人嘅觀點，或者我哋有咩嘢睇法，我係認為唔夠深入嘅，咁委員會係唔可能得出一個好嘅結論嘅。

我哋喺呢方面，希望--我就唔想重複答番人哋嗰個問題，就唔好即係--因為時間好寶貴，我哋希望儘量想講我哋關注嘅嘢，影響大眾嘅嘢。好多情況之下，就係市民或者委員會係唔清楚嘅。

主席：（經傳譯員）冇錯，你都係指出咗呢啲嘅事項㗎嘞，喺你嘅陳述書裏面，所以我哋而家就會係你講咗嘅一啲事項，就於呢啲，我哋會問你問題，如果你想補充，你可以補充嘅。但係請你畀陳述書我哋，係畀機會你哋同我哋講一次你想講啲乜嘢，而口述證供嘅聆訊就係等我哋可以去探討一啲我哋認為有--係有關嘅事項。

郭志誠先生：今日因為我哋準備咗一個黑盒嘅問題嘅，就未--嗰啲資料或者汽車嘅操作嘅安全性問題就未呈交上委員會嘅，我哋係準備到即係臨時啱啱寫好，想喺呢度講畀大家聽嘅，希望委員會就酌情批准，因為未呈交上嚟嘅。

主席：（經傳譯員）有冇咩嘢原因係之前冇交畀我哋？因為我哋由呢個係 3 月--4 月嘅 28 號（原文照錄）喔，已經開始叫你畀資料我哋囉喎。

黃女士： Yes.

主席：（經傳譯員）即係呢一個係 3 月 28 號，今日已經係 7 月 31 號囉喎。

郭志誠先生：咁係我哋因為要準備，因為我哋唔係專家，我哋要--因為發覺就委員會裏面，即係問過黑盒公司，我哋睇番佢嗰個資料，我認為需要因應佢哋嘅答覆，而我哋再提供我哋在職嘅意見，我哋車長認識呢方面嘅機械，即係直接係操作。其實佢係咪話畀個黑盒我哋，咁我哋車長就識呢？就知呢？

咁樣即係我哋成立個會之後，好多嘢要教導啲會員嘅，譬如好似話襲擊車長，點解會唔能夠檢控，因為車長唔識搜證。同埋就喺事發之前，通常就會大家你一言我一語，變咗--其實我哋車長就根據...

主席：（經傳譯員）郭生，其實如果我哋而家開始，等黃律師問你問題，可能進度會比較好，即係比起一路聽你喺度講話由黑盒到畀人--即係發生事，畀人打，可能係黃律師問你問題，個進度會更好，等佢問，跟住我哋先至有機會再聽你講，好唔好？

郭志誠先生：好嘅，多謝主席。希望結論嘅時候可以畀我補充。

黃女士：（經傳譯員）唔該晒郭生、各位人士今日出席。我想簡單講幾句，我哋收到你嘅書面陳述同埋文件，即係三份都收到。委員會主要嘅要做嘅工作，其實喺嗰個工作範圍裏面都已經係寫咗㗎嘢，只要係有關於同安全--即係專營巴士營運安全有關，我嘅問題係會集中於安全呢方面，而唔係其他譬如即係僱員工作方面嘅問--嘅範圍。所以我希望你都要集中番，係回答關於安全嘅問題。

我想--我先開始問一問關於你個會嘅組成。郭生，你個會--我想請你睇番工會文件 112-9，淨係得中文嘅，不過我會解釋一下，係 112-9 呢一頁。

你個會就係喺 2015 年 7 月 14 號成立，係嘛？

郭志誠先生：係，對。

黃女士：（經傳譯員）去到--直至呢一個嘅係 2018 年 6 月 15 號，你哋會員人數係有 1,400 人，係嘛？

郭志誠先生：正確。

黃女士：（經傳譯員）其中包括全職嘅僱員，退休咗嘅車長但係跟住續任嘅人員，佢

Transcript by Epiq Hong Kong, Limited

哋都係繼續做車長嘅，係嘛？

郭志誠先生：係，正確。

黃女士：（經傳譯員）另外仲--其實有1,300位都係全職車長嚟㗎，係嘛？

郭志誠先生：正確。

黃女士：（經傳譯員）你嘅陳述書就提及過幾方面，我都會係唔同時候集中唔同嘅問題。

第一個想問你嘅問題就係關於設施或者係安全方面嘅，就係你提過，其實你嘅文件都係好強調呢幾點嘅，或者去到工會文件1A，84頁，英文就係第90-3頁。

主席：（經傳譯員）咩嘢文件話？

黃女士：（經傳譯員）呢個係工會嘅4月23號第一份嘅文件，2018年，90-3，英文嘅，而中文就係第84頁。

喺第一嗰段，你話為咗嚟到係節省維修嘅開支，自從2015年，九巴都係不合適地咁樣，係攞走晒嗰啲嘅熱風除霞裝置，令巴士喺濕凍天氣嘅情況下，車輛外溫差太大，你亦提供咗一啲照片喺第--附件一嗰度，就係第91頁，中文就係91頁，英文就係90-1。你喺個文件度話，當嗰個巴士係高速行駛，又睇唔清楚路面情況，係非常危險，就會影響咗行車安全同埋乘客嘅安全。

我第一個問題就係，你嘅工會有冇將呢一點向巴士公司反映，九巴嗰度？

郭志誠先生：有嘅。

黃女士：（經傳譯員）幾時？

郭志誠先生：我哋係透過同公司嗰啲管理層講過嘅。

黃女士：（經傳譯員）幾時？

郭志誠先生：時間就唔記得，因為冇記錄，即係口頭嘅。

黃女士：（經傳譯員）呢啲嘅照片，可唔可以話畀我哋聽，大概係幾時拍嘅呢，呢啲照片？

郭志誠先生：係上年年中嘅，透過嗰啲同事喺WhatsApp嗰度轉發嘅。其實呢個問題維持咗好耐㗎，因為舊年特別嚴重，咁我哋啲會員車長好期待我哋嘅工會同佢哋爭取發聲嘅，所以特別踴躍，就掟好多相畀我哋，幾間廠都係。

黃女士：（經傳譯員）公司--當你口頭反映畀公司聽嘅時候，公司有冇咩嘢回應，關於呢一點？

郭志誠先生：冇回應嘅，佢哋即係儘量係想排斥我哋，即係排斥我哋工會，咁樣大多數都係嘞，即係如果我用工會主席身分同佢哋講，佢哋話唔鍾意嘅，一定要我係以僱員車長嘅身分同佢哋反映嘅，咁係當時嘅九龍灣廠總經理，楊國豪先生。

黃女士： And did you reflect or --

主席：（經傳譯員）唔好意思，你講完未㗎？嗰個九龍灣車廠嗰個總經理做咩嘢呀，佢？

郭志誠先生：即係佢經常都係強調，即係我只可以用個人身分，因為政治嘅考慮，佢--係嘞，因為政治嘅考慮，佢就--係嘞...

主席： And what is the name --

郭志誠先生：...即係唔方便我用嗰個主席身分同佢講。

主席：（經傳譯員）佢嘅名係咩嘢，嗰位先生，叫咩嘢名，嗰位總經理？

郭志誠先生：楊國豪，楊國豪，九龍灣廠總經理。

主席：（經傳譯員）好，唔該。

黃女士：（經傳譯員）車長有冇反映畀嗰啲維修嘅員工，公司嘅維修員工？

郭志誠先生：有嘅，咁佢哋--係嘞，其實佢哋都--維修員工都好多意見，但係唔夠膽講嘅，通常都係向我反映下。佢哋其實維修員工都好多不滿，但係就--係嘞，就冇辦法出到聲，因為公司唔鍾意。

主席：（經傳譯員）咁而家嘅情況點，關乎呢啲嘅除霞裝置，而家嘅狀況係點？

郭志誠先生：就呢個委員會成立咗之後，我哋就掟咗好多文件，亦都係有記者訪問過。佢而家就公司對外界，或者對外講係，之後嘅新車會裝番，之後嘅新車會裝番，當時我哋反映嘅時候，佢係--運輸署係唔成--即係獨立媒體訪問過嘅，亦都訪問過一位教授嘅，即係我都有提，喺文件裏面都有提過嘅。即係得呢個教授證實係熱風除霞先係最有效嘅。

當時獨立媒體訪問，運輸署嘅答覆就係話，呢一樣裝置就唔係必須嘅，現時香港嘅巴士只係九成係有裝嘅啫，即係反映淨係九巴冇喇。即係九巴就唔顧乘客同埋車長嘅安全，本身係有嘅，佢都取消，即係慳番啲維修費，佢認為咁嘅情況之下，一年裏面唔會太多日，所以佢要求車長自己抹。咁喺高速公路，點抹呢？咁喺市區停低燈位嘅時候可以抹咋嘛，咁你高速公路點抹呢？咁佢啲答覆真係好難令人接受。

主席：（經傳譯員）新車有冇呢一個裝置？

郭志誠先生：到目前為止，都係未有嘅，所有新車冇嘅，因為佢之前已經決定咗話以後都唔裝吖嘛，就之後--未嚟㗎，應該嗰啲新車未嚟嘅，就話應承咗話之後會

加裝番，但係呢個係好唔理想嘅，咁其實嗰三千九百幾部巴士點樣呢？咁咪仲--有啲都係舊年或者今年先至投入服務嘅，咁佢哋係咪需要十七年、十八年後，都仲係咁嘅情況呢？咁係咪代表咁樣敷衍咗大家「欸，我做番嘞。」咁樣？

我認為就應該--即使唔係即時，應該運輸署喺每年驗車嗰度，要求佢加裝番嘅，無論幾多錢都好，就唔能夠話呢個潛在危險，由佢喇，十幾年後先慢慢換咁樣。本身個設計係有㗎嘛，你係自己取消咗佢咋嘛。呢一個係關乎大眾嘅安全嘅，亦都係符合委員會嗰個安全嗰個要求。

主席：（經傳譯員）好嘞，我哋明嘞。黃女士。

黃女士：（經傳譯員）90-5，英文嘅，中文就係 85 頁。

主席：（經傳譯員）我哋而家會講邊點？

黃女士：（經傳譯員）就係運輸署嘅回應，就係關於呢一個除霞裝置。

主席： Yes.

黃女士：（經傳譯員）你喺你嘅第一份嘅意見書度話，運輸署就唔會批准呢一個嘅九巴去取消呢一個除霞裝置，因為會係影響公司嘅安全。咁你係咪--係收到好多嘅車長嘅反映，就係話強烈要求--運輸署要求九巴係再裝番呢啲嘅除霞裝置。

我想問，運輸署係咪知道係呢啲除霞裝置係除咗落嚟？

主席：（經傳譯員）你未答呢個問題，你正話話畀佢聽運輸署話呢個唔係一個必須嘅裝置，呢個係咪運輸署嗰個立場？

郭志誠先生：嗰個--佢因為個獨立媒體係關心呢件事，咁喺網上可以睇到，有啲訪問我嘅，跟住佢即係持平，搵一個教授訪問，同埋要求運輸署...

主席：（經傳譯員）你已經講咗嘞，我想問，運輸署有冇話表達呢一個嘅--你話畀我哋聽，運輸署話呢個裝置唔係一個必須嘅裝置，係咪呢？

郭志誠先生：係，係，係，喺報道裏面，佢係咁講。

主席：（經傳譯員）好。黃律師。

黃女士：（經傳譯員）你有冇寫信畀運輸署，去投訴關於呢個除塵裝置？你個工會有冇寫信畀運輸署投訴呢件事，關於冇咗呢個裝置？

郭志誠先生：冇嘅。

黃女士：（經傳譯員）咁我去下一個嘅問題嘞，關乎嗰個嘅波段裝置，第 84 頁，英文--中文，而英文版本就係 90-3 頁，都係喺第一段之下，你就話公司係改裝咗安全行車波段裝置，取消限波掣裝置，及手動減速器裝置，只係以電腦控制單一自動 D 波控制車速，喺突發危險情況下，車長係冇任何挽救裝置可用，係非常危

險。

你就喺你嘅附件喺 92 頁，呢個就係中文，跟住 92-1 就係英文，你係畀啲相我哋睇嘅。你亦都係進一步講，喺 90-5 嘅英文版本嗰度話，就話因為喺熱天嘅時候，喺巴士裏面嗰個嘅機器嘅溫度係更高，就係更加會影響呢一個嘅問題，所以就係唔能夠係即時嚟到係改變呢一個嘅狀況，就會影響咗嗰個車長嘅判斷，佢就會覺得好似冇辦法剎到掣，就話畀警方聽，就話畀警方聽，呢架巴士係冇腳掣，其實當架巴士係冷卻，第二日嗰個嘅電腦控制又會返番去正常。

從你自己嗰個嘅檢討，到底取消咗呢一個限波掣裝置係點樣影響交通安全或者巴士安全嘅呢？

郭志誠先生：呢方面我想請阿李建基先生，佢比較熟悉啲，我想請李建基先生回答呢個問題。

主席：（經傳譯員）李生，請回答。

李建基先生：多謝主席，其實可能--首先我介紹我自己，介紹我個人嘅簡短嘅履歷。我揸咗約二十年多，嗰個大型車輛，包括馬鐵車輛、中港兩地車輛，包括單雙層嘅巴士，有波嘅及冇波嘅自動波嘅，包括比較係先進少少嘅旅遊巴我都揸過嘅。現階段嚟講，我就係九巴員工，受僱咗六年，揸咗六年巴士，公共雙層巴士揸咗六年。喺呢方面到我入職，或者喺學校嚟講，包括導師都好，佢所介紹嘅只係單一公司要求佢哋咁樣向學員培訓，整體仲有好多嘅安全嘅裝置，包括駕駛嘅技術係未夠嘅，我係覺得未夠嘅。簡單啲嚟講，睇番而家嘅附件，其實...

主席：（經傳譯員）咪住，咪住，李生，而家問你，其實係講一啲好具體嘅事，唔係叫你畀一個嘅演講嘅。而家就係話，移除咗呢個手動嘅減速器，點樣影響到巴士安全？你只係需要集中答呢方面啫。

李建基先生：喺呢個系統裏面，有一個裝置控制選擇器，包括單一嘅手動、自動，基本係有兩樣，第三樣就係包括手動、自動同一同步去運作。呢個首先我講減速器，減速器都係有呢種情況，有呢個掣喺度。咁我--喺控制呢個減速系統裏面，有四段，亦都有控制桿，係司機可以控制嘅，亦都唔使經過腳踏板呢個剎車器。琴日都有個黎主席都講，話一腳踩落去就有嘅，自動嘅。

而喺個附表度講到話，受到高溫，就係講個剎車系統，剎車系統經常受到 brake 嘅摩擦，就會受到高溫，但係如果有咗呢套手動嘅裝置，係隨司機個手同個段速去畀減速嘅力度，由一至四，輕至重，唔需要加強 brake 嘅負荷，喺呢個位置嚟講，可以帶動到波箱嘅軸心，而可以穩固佢個扭力，咁再落剎車系統，其實係好穩固嘅。但係現階段，我見唔到公共巴士，單雙層都好，唔多嘅，雙層簡直係唔會有嘅，手動控制桿，甚至乎係呢個選擇掣，選擇掣係冇嘅，就只得腳踏板去控制，開啟所謂佢哋而家嘅油壓減速器。

如果喺個呢方面，有個加強個控制桿，現階段，職業嘅旅遊巴司機喺呢一方

面係非常之熟練嘅，但係喺公共巴士裏面嘅車長，係導師都冇任何呢方面會介紹佢哋點樣採用呢套系統，只係教佢用隻腳踩個 brake，咩嘢叫輕少少，咩嘢叫重少少，喺而家咁多公共--我哋嘅專業車長裏面，係冇㗎，受到任何要收車，就一腳就到 brake 皮㗎嘞，咁呀摩擦到個 brake 碟㗎嘞，咁喺--其實個剎車系統一定有損耗，一定亦都唔會有正常可以發揮到停車或者減車嘅效果，就只有帶來每一腳 brake。而加上電腦可以 set 死咗嘅力度，可能就係三級至四級，如果手桿控制，三級、四級嘅力度係好重嘅，但係如果我由一級至四級慢慢發揮，架車係好穩固，而嗰個撳晃力、剳前剳後、減少嘅力度係冇嘅，係好穩固。所以而家好多司機遇到比較係有半架巴士位，或者再短啲，根本唔可以一腳剎停架車，就只有睇住架車向前撞嘅啫。

所以現階段，我覺得公共巴士呢套系統裏面有疏忽，運輸署係應該知道呢一點嘅，因為喺香港運輸驗車牌照部裏面，包括佢都要做埋旅遊巴，會原架係--原架巴士駛入，咁呢套嘢裏面一定有嘅，佢哋應該知嘅，冇可能一架公共巴士載咁多人，連呢個最簡單嘅系統裏面，都係隨心所願，有呀得㗎嘞，唔需要...

主席：（經傳譯員）未繼續講之前，會唔會係變成咁，即係冇一個手動嘅減速器，其實就係剝奪咗巴士車長選擇，減速嘅選擇，係咪咁嘅意思？即係冇咗自動--冇咗個手動系統，就令個巴士車長少咗選擇，喺減速方面，係嘛？

李建基先生：可以咁講，交番畀郭生講。

郭志誠先生：呢方面我回答，其實就手動減速器係好重要嘅，尤其是落斜路，我記得就係話就大埔區議會嗰個黃女士就話有--即係喺個斜--佢哋收到嗰啲旅遊巴司機所講，喺個斜路衝--70 公里嘅時候衝到上頂，再衝落去嘅時候，好難會減到車速去到 50，因為而家改咗 50 公里吖嘛。其實係點解就係，我相信佢嗰架車就可能係比較舊啲，只有一個廢氣剎車，廢氣剎車個效果就冇咁好，如果你去到上頂 70 上到頂，咁你有手動減速器，你拍落去，三至四秒之後就好快減到 50 至 40㗎嘞，咁唔使落 brake，咁會減--好有助嗰個落斜嗰個減速個安全性嘅。

其實就係我哋--即係我曾經就係--以前九巴就兩至三年就會有個叫高級駕駛，或者優質駕駛，咁我就係--嗰啲車長指明要操呢段大埔公路，大埔公路上落斜，我哋嗰陣時仲係熱狗，嗰陣時嗰啲熱狗有個限波掣，限一--限波，二波、三波，即係好似圖--附件二最左手邊嗰個，有限一波、二波、D 波咁樣。嗰陣時如果有啲車係冇手動減速器，我哋用個限波掣嘅，即係拖住個波，就即係比較穩定，唔使靠個 brake。你咁靠個 brake 係咁衝落去，你想佢減速，你係要磨住個 brake 皮㗎嘛，你磨得多，咁去到佢發熱嘅時候，去到最危急嘅時候，嗰個效果會減低，可能減低三成嘅，嗰個剎掣系統會減低三成。

主席：（經傳譯員）郭生，唔好意思，我要打斷你，你個--其實個要點好簡單，即係話減速，尤其係落斜嘅時候，係唔使用剎車系統，唔使係即係好大力咁剎㗎，你其實個意思都係想咁講啫，係咪呀？

郭志誠先生：係嘞，少少掂一掂就得㗎嘞，係嘞，咁各方面都會好，乘客都會安全

嘅，咁樣就話...

主席：（經傳譯員）嗄，我哋知道嘞，我哋聽到嘞。黃律師。

黃女士：（經傳譯員）想請你睇第二份嘅陳述書，你提及過...

主席：（經傳譯員）係日期係幾多號？

黃女士：（經傳譯員）第二份就係 6 月 15 號，2018 年。

主席： Yes.

黃女士：（經傳譯員）中文版係 112 頁，112-19，英文係 112-97，其實係第三份嚟。

主席：（經傳譯員）即係唔係 15 號嗰份，係呢個 7 月 25 號嗰份，係咪呀？

黃女士：（經傳譯員）係，18 年嘅 7 月 25 號嗰一份，係 112-97，呢個係中文。

主席： Yes.

黃女士：（經傳譯員）英文就係 112-99。有兩方面我想同你哋講一講，就係話首先使用監察鏡頭，就係呢一個嘅 112-97 頂部嗰度講。你提及一點--頂部，喺第三底下，你就話，你係支持使用呢一個嘅閉路電視去記錄呢啲違例泊車。從你嘅陳述書，意思係咪話，有關於呢一個係閉路電視，你係支持安裝閉路電視，即係係呢一個嘅駕駛座位嗰度？

主席：（經傳譯員）做咩嘢呀？係監察違例泊車定係？

黃女士：（經傳譯員）去監察首先就係違例泊車。

郭志誠先生：係咪？監察違例泊車係可行嘅，我希望係喺車嘅前方裝嘅，我係贊成呢一點嘅，因為需要舉證，所有嘢都需要舉證，一定要做呢樣嘢。

黃女士：（經傳譯員）呢樣我明白。

主席：（經傳譯員）未講第二樣嘢之前，呢啲咁樣嘅鏡頭，唔係已經喺九巴好多嘅車上面都已經安裝咗嘞咩，呢類型鏡頭？

郭志誠先生：仲有超過一半係冇嘅。

主席：（經傳譯員）但係有一半有，係咪呀？

郭志誠先生：係嘞。同埋佢就有時唔知點解，公司又係影唔到，又話咩嘢，即係要加強少少，即係比較專門少少，可能係--係嘞，即係嗰個安裝要求設備嗰度個效率要提高啲。

主席：（經傳譯員）有關於巴士--牽涉巴士車長方面，如果即係牽涉到巴士車長，你

支唔支持譬如話撳個掣，咁就係顯示到係呢一段就係記錄違例泊車，咁可以愛嚟收集作為證據咁嘅做法？

郭志誠先生：非常之好，我贊成。

主席：（經傳譯員）唔該。黃律師。

黃女士：（經傳譯員）喺112-97，第4.1段，英文版就係112-100，你就話：

> 「有需要係通過法例，如果唔係冇人會遵守規則，即使係過往，九巴有員工都係要求--有報告要求索取巴士錄影片段作為投訴其他駕駛者不小心駕駛，但係就畀當時嘅九龍灣廠總經理係拒絕。而如果員工真係好想要，佢就要畀行政費5,000元。而據知，新巴同埋城巴只需要係畀600元，好明顯係故意阻撓員工合理要求，所以本會認為必須要立法通過相關嘅財政規例先至有效。」

我想問嘅問題就係，咩嘢叫做「必須要係立法通過相關規定」，到底係想規定啲咩嘢？

主席：（經傳譯員）我唔明點解我哋會問呢一個問題。

黃女士： Yes.

主席：（經傳譯員）因為我覺得好簡單，我哋只要傳召傳票要九巴提供有關片段就得喇，我覺得呢點係唔相關嘅。

黃女士：（經傳譯員）咁點解員工係需要畀一個嘅費用，先攞到呢啲嘅錄影？

主席：（經傳譯員）因為呢一個就係香港嘅法例其係--容許喺一個刑事嘅訴訟裏，辯分係可以要求提出呢啲嘅證據㗎嘛。

黃女士：（經傳譯員）咁我繼續落去問。講到嗰個黑盒，你喺屘二嗰段，喺112-97頁嗰度，屘二嗰段話，英文就係112-101頁，就係話嗰個黑盒已經係裝咗好多年，已經指定安裝多年，但係你就話，個黑盒功能冇正確使用，你可唔可以再詳細解釋呢點？

郭志誠先生：第一，嗰個委員會都問過德國黑盒承辦商，其實黑盒裏面可以有好多數據嘅，其實係已經係好多年㗎嘞，其實運輸署要求要裝呢個黑盒，就唔係話敷衍大家，因為有2003年嗰個屯門意外之後，咁受壓力而裝。佢係畀咗--要求巴士公司裝，巴士公司裝咗，咁唔知佢咩嘢原因，可能係保障自己嗰個法律嗰方面問題保障自己，咁佢乜嘢數據都唔愛嘅，乜嘢數據都唔愛。

好簡單咁就係嗰日委員會嗰度，就嗰個車速限制75，同埋嗰個加減速嗰個值就係--界限值就係2.3，同埋傾斜度係44度。就呢一點，我都想補充下，可以嗎，主席？其實嗰個界限值就過往公司成日逼車長係超速，譬如一段路係70公里，咁你如果係想個車長唔超速嘅，係有一個提示嘅，咁你嗰個值係咪應該係

Transcript by Epiq Hong Kong, Limited

68 或者 69 呢？「喂，超速囉喎，你收囉喎。」咁佢點解要去到 75 呢，係咪呀？之後我哋提供咗畀委員會，2 月、3 月之後，有幾樣--公司紀律員工 83 公里，訓練嗰陣時都去到 80 公里，好明顯就係嗰個界限值嗰個截油嗰度係失效，冇用，完全係冇用。

今年初或者咩嘢，好似有一單就係電車反車，咁睇報道，報紙報道就係話，電車公司係有要求車長要快嘅。所以就畀我睇到，佢呢個 75 嗰個界限值其實係可以容許巴士超速，係好贊成巴士超速。快啲喇咁樣，屯門公路，高速公路，快啲喇，人哋 80、100。咁係嘞，容許佢有限度超速嘅，咁呢個係不負責任嘅。好嘞，有事嘅時候，就叫個司機去死，去負責，負責晒所有法律責任。咁司機就萬幾紋，咁佢哋月薪係幾十萬，乜嘢責任都唔使。嗰個車長，你有--你話咗畀大家聽係 70，就會截油，會警報你㗎嘛，點解去到 70、83，佢都好似收唔到呢個警報？收唔到呢個警報嘅，咁佢嗰個界限值裏面，公司嗰個要求係非常之低。喺委員會，因為我八場、九場都有聽過，有啲去到一點幾咋，好似係，咁佢就去到 2.3，個傾斜度 44 度，44 度已經反喇，警乜鬼嘢告啫？係咪呀？咁你冇可能呢個界限值係設喺呢啲咁嘅地方裏面。

主席：（經傳譯員）郭先生，喺定嗰個嘅傾斜度 44 或者 43 度，就係為咗係令到佢係嗰個巴士係唔能夠再運作吖嘛，因為佢唔係為咗要去提醒佢，因為嗰架巴士就會反個囉喎？

郭志誠先生：呢一方面，即係唔可以運作，唔可以運作咪反囉。即係好似電單車咁樣，你瞓彎嘅，你嗰個動力夠嘅，扭力夠嘅，就可以企番起身；如果你嗰陣時係收嘅，或者係耷落去就反嘅，一定嘅，咁你冇咗個動力吖嘛，點帶番起架車呢？佢呢啲咁嘅帶波，係普通市民未揸過車，或者係冇--對車嘅唔夠認識嘅時候，「好似係喎，係喎。」你嗰下停，你嗰下停咪反囉，你應該係有個扭力嘅時候，咪帶番起架車囉。

黃女士：（經傳譯員）唔好意思，我又再打岔，你正話就係話，嗰個黑盒係冇儘量發揮佢嘅功能，首先就係嗰個嘅速度，嗰個剎掣，同埋嗰個穩定方面嘅控制，係咪呀？我正話嘅總結合唔合適呢？

郭志誠先生：我哋可以提供嘅，其實個黑盒係應該係有咩嘢可以儲存或者記錄，令到有咩嘢事起上嚟，或者係個車長駕駛態度，或者係平時有咩嘢犯規，我哋可以及早糾正佢，或者係喺個調查方面，係有好大幫助嘅。咁我哋都列咗黑盒裏面應該有嘅數值，或者係界限值：

第一樣，就係所有電力輸出嘅電子儀器，嗰個電壓嗰個數值；

第二樣，輪軑嘅獨立防滑裝置，系統個數值，佢嗰個獨立剎車氣壓，嗰個壓力數值；

第三，就係減速器嗰個系統嗰個段數值，即係一段段，你減咗速嗰個，應該黑盒裏面有；

第四，就係電子波檔掣嗰個波檔位嗰個數值，即係當時係用緊咩波；

第五，就係嗰個轉數錶，即係轉數嗰個扭力，同埋嗰個速度嗰個數值；

第六嗰樣就係，電力懸掛系統嗰個氣壓，氣壓嗰個數值，即係個氣袋而家就係嗰個氣袋平衡嘅，以前就係鋼片嘅避震嘅，而家係氣袋，氣袋嘅，咁個數--當時嗰個數值係咩嘢嘞，咁第四個懸掛系統嗰個氣壓令到嗰個車身嗰個傾斜度，即係當時嗰個氣壓係咪夠，唔夠佢咪傾斜，即係佢嗰個能唔能夠正常發揮，嗰個回彈，即係佢傾斜咗嘅時候，嗰個數值係會自動撐番起佢嘅；

第七，就嗰個獨立壓縮氣缸，嗰個氣缸嗰個數嘞，係壓縮器叉嗰個氣泵嗰個數值；

同埋第八，嗰個剎車系統，每次使用，即係所謂嘅加減速嗰個數據；

第九，嗰個係應該有個車輛當時嗰個總重量，咁呀計算到當時嗰個情...

應該就如果黑盒正常功能，運輸署叫佢裝，應該有齊呢啲咁嘅數值，就原廠嚟已經--如果加埋落去唔會貴嘅，只係公司可能嗰個責任問題，就唔想有啲咁嘅數值存在，認為如果有，可能佢話「哦，即係你嗰個維修做得唔好嘞。」即係唔達佢嗰個數值，我相信係呢方面嘅考慮，「運輸署冇要求，我咪唔做囉，冇理由畀咁多嘢畀人捉㗎嘛。」係咪呀？

黃女士：（經傳譯員）郭先生講到呢個黑盒，你早前提過嗰個嘅--可以係去偵測到嗰個駕駛態度，你哋工會係咪支持呢個實時監察車長嗰個嘅駕駛態度，實時監察？

郭志誠先生：原則上係好嘅，我哋利用科技係幫助到大家，同埋巴士公司會好安全，但係咁佢嘅數值係咪準呢？

大家都提出過，嗰個 ISO 39001，即係衛星定位，佢好多功能，係咪喺--好成熟，可以喺香港嗰度用到呢？據我所知就應該就唔太準嘅。就以現時嗰個衛星定位，我哋揸車去到旺角，佢好多已經報唔到嘞，停咗或者報錯，即係因為香港高樓大廈多，可能亦都嗰個衛星信號收到唔好。雖然大家委員會或者市民，「好呀，加咩嘢科技，加咩嘢科技。」咁但係嗰個科技係咪成熟呢？其實就我係贊同嘅，但係要多啲實驗嘅。

主席：（經傳譯員）郭先生，你係聽到係捷克嗰度，就係佢哋就係容許喺任何時間，嗰個巴士嘅位置可以計算得到嘅。

郭志誠先生：佢係咁講，但係我覺得喺香港應該喺市區係做唔到，郊區可以，郊區可以嘅，市區可能做唔到嗰個準確嗰個嘅...

主席：（經傳譯員）郭先生，你就唔係一個嘅電子工程師，而家係你都係講緊係巴士嘅駕駛者，我哋都係聽過，我哋會聽一啲電子工程師嘅睇法。黃律師。

黃女士：（經傳譯員）運輸署嘅文件 403 頁，呢個係立法會嘅文件，係畀呢一個交

通事務委員會嘅，喺2018年7月，143（原文照錄）頁，中文版係416頁。

我想問下你，你哋工會同唔同意係使用某啲嘅安全裝置？

主席：（經傳譯員）郭先生，你明唔明白點解會有呢份文件？

郭志誠先生：我未聽過呢個文件。

主席：（經傳譯員）咁我解釋，我哋所收到嘅資料，就係運輸署喺3月中嘅時候，就係召開一個會議，就係包括巴士嘅營運商，有三個嘅巴士製造商，同埋運輸署同埋處理一啲嘅問題。其中一個就係車長嘅訓練，另一個就係要係使用或者係裝置一啲安全嘅裝置喺巴士度，第三就係關於安全帶嘅問題。呢個委員會就開咗幾次會，喺7月尾，喺7月20號就係公布咗一啲嘅建議，就喺呢一份畀立法會文件裏面寫咗出嚟嘅。你明白嗎？

郭志誠先生：明白，明白。

主席： Are we to understand this as well, that at no stage was your union asked to make any representations to this working group?

郭志誠先生：未有傳譯。

主席：（經傳譯員）咁就係喺任何時候，你同你嘅工會都係冇收到任何嘅邀請話要向佢哋去表達意見，係嘛？

黃女士： May I ask in that context whether you support the use of some of this in-vehicle --

郭志誠先生：啱嘅，係對嘅，係。

講者（不能辨別）：翻譯有啲問題。

主席：（經傳譯員）即係冇要求過你哋去向工作小組畀任何嘅意見，咁樣講係正確嘅？

郭志誠先生：佢哋唔知係喺邊度聽，即係好--對我哋個會就唔係咁放心，即係我哋好難...

主席：（經傳譯員）咁係咪--放唔放心都好，佢都冇即係向你哋要求協助，係咪呀？

郭志誠先生：完全冇嘅，係呀，寄信都未必會覆你嘅。

主席：（經傳譯員）黃律師。

黃女士：（經傳譯員）首先我想問嘅就係有關於一個嘅電子穩定系統，喺(a)呢一段，有冇--之前有冇聽過呢一個咁樣嘅系統？

郭志誠先生：呢次委員會聽證會我哋先會--先有留意呢樣嘢。

黃女士：（經傳譯員）你支唔支持使用呢一個嘅設備，即係你哋個工會支唔支持㗎？

郭志誠先生：支持嘅，科技我哋唔能夠逃避，即使用咗有咩嘢問題，我哋咪儘量反映，改善，我哋呢方面係持久咁會做多啲反映。

黃女士：（經傳譯員）我哋請睇 4(b)，即係嗰個減速器，車速限制減速器，4(b)呢個就係話，將係--落斜嘅時候，將嗰個時速係限制咗喺某一個速度，目的就係使用減速品係超過 70 公里落斜嘅時候，就會用減速器去將個車速減慢，咁你支唔支持使用呢一個嘅設備？

郭志誠先生：我就未有好認識呢個設備，但係我想講一樣嘢，即係你減速即係截咗油，意思，截咗油即係空波，空波其實仲危險嘅，即係有一段時間空波，你截咗佢油，佢空波係咁衝嘅啫，所以我哋點解會強調一樣嘢，就係要有個手動減速器，要配合。你嗰個就咁截油，截咗油喺嗰個電腦控制嗰度，佢截咗佢油嗰段時間，有幾秒時間可能係空波，仲危險嘅，仲失去動力。截咗油又失去動力，即係架車係冇扭力，即係你帶--即係你唔能夠--有咩嘢情況之下，你唔能夠畀油帶動番佢，即係個車長控制番架車，你截咗佢油就空波，空波咪由佢衝囉，咁你 brake 耷到咪耷，耷唔到咪由佢囉。

所以就其實手動減速器或者咩嘢係唔係而家嘅嘢嚟，係不嬲都係嘢，你而家所有重型車、旅遊巴，全部都係有嘅，你係運輸署去就住巴士公司個要求，而乜嘢都唔使，唔使維修吖嘛。點解唔使維修，因為佢哋覺得巴士冇用--車長冇用，因為佢冇訓練過。

主席：（經傳譯員）郭生，你可能你覺得比較難接受，但係我哋明白你關於手動減速器嘅意見，我哋明白，所以唔需要再重複呢一點。

黃律師，請繼續。

黃女士：（經傳譯員）我哋而家再睇 6(a)，係巴士監察及控制系統。簡單嚟講，就係使用一個嘅係全球定位系統...

主席：（經傳譯員）但係頭先講咗話呢個係唔會真係確實即係可以講到嗰個汽車喺邊度，即係譬如話係--應該話係其他嘅定位嘅技術。

黃女士：（經傳譯員）係，仲有其他嘅定位技術，我只不過係睇緊文件啫。即係話可以利用呢啲定位嘅系統科技，然之後就去加埋嗰個車速限--當段嘅車速限制，然之後就可以提升到嗰個限速器嘅功能，即係話可以限制喺某一個路段，佢嗰個車速，去制訂應該限到幾時，限到咩嘢嘅速度嘅，你支唔支持使用呢一個儀器？

郭志誠先生：支持嘅。

黃女士：（經傳譯員）咁 6(b)就係一個防撞嘅警--碰撞警報裝置，同埋保持行車線嘅裝置？

郭志誠先生：呢方面就係暫時就唔係好成熟。如果你裝落去，因為我哋啲巴士站，一架黐一架，就埋站嗰陣時大家都睇到，任何地方嘅巴士站，佢嘅設計嘅擺位都係一架貼一架，因為兩架同時上都係貼到好埋嘅，咁你如果有嗰個裝置嘅，就成日會響嘅。同埋你話過線，提示過線，我哋巴士好大型嘅，喺市區或者其他路段行，或者埋站嘅時候，我哋好多時或者有其他阻礙，或者有架車--紙皮車仔，或者有咩，或者有架車泊喺度，咁我哋都係騎住線嘅，咁咪成日響囉。同埋我哋一扭，扭出去，好多時都兩、三條線嘅，或者轉彎嘅時候，所以係好多時候係唔可以喺一個好完整嘅路線，嗰個火位嗰度由頭行到尾嘅，好多時會騎少少位嘅，咁係咪係咁響、係咁響呢？

即係呢方面，所謂神眼，就係佢只係向前嘅，除非就日後嗰個技術係前後左右佢都兼顧到嘅，咁就會好啲。如果而家咁樣，就係暫時唔係好適合。

黃女士：（經傳譯員）跟住 6(c)，監察司機裝置，監察...

主席：（經傳譯員）唔好意思，頭--可唔可以再問一次？因為頭先重疊咗聲。

黃女士：（經傳譯員）關於呢個監察司機裝置，6(c)。

主席：（經傳譯員）即係講緊嗰個係話恰眼瞓嗰個，係咪呀？

黃女士：（經傳譯員）呢一個呢。

郭志誠先生：呢個而家九巴裝咗四架，喺度實驗緊，有啲車長反應就係唔贊成，佢嘅原因就係話，因為個鏡頭係對住佢嘅樣嘅，咁廿四小時，佢好大壓力，好大壓力。同埋有一樣嘢，你裝呢樣嘢嘅時候，你一定係同時係減停車長嘅工作時數，否則的話，可以話畀大家聽，九成司機都有恰眼瞓嘅情況，好短暫嘅，時間太長嘞，咁呢個係無可避免嘅。即係我哋唔好自欺欺人，裝咗就提醒你，咁即係你如果話要裝嘅，如果公司愛嚟懲罰你，即係對工--對車長係...

主席：（經傳譯員）唔好意思，我唔明白你嘅意思，你就話九成嘅司機都會恰眼瞓，你頭先係咪咁講？即係因為工作時數長？

郭志誠先生：係嘞，好多時都--即係唔係話瞓著，即係恰一恰囉，即係...

主席：（經傳譯員）咁即係唔好喇，係咪呀？

郭志誠先生：即係眼簾會垂低囉，呢個係我唔會呃大家嘅，咁你「嘩，你啲司」--即係我哋啲車長咁樣㗎？咁事實係囉。咁係嘞，即係我哋好多其他後面我哋都有提出嘅，其實係巴士公司個管理唔好嘅，即係我哋都有提出嗰個叫做居住為本，咁你而家九巴五、六間廠，佢就屯門廠喺--要你喺九龍灣返，屯門廠出嚟荔枝角廠得一班工程車嘅啫，個個都兩、三點要起身，係咪呀？咁巴士工作嗰個時數你又計佢開工嗰刻，咁呢啲時間--係嘞，即係咁。

主席：（經傳譯員）郭生，唔該晒。

黃律師。

黃女士：（經傳譯員）跟住就係關於安裝係安全帶，喺所有座椅都係安裝安全帶，你哋工會支唔支持呢樣嘢？

郭志誠先生：為咗減低意外嗰個傷亡，我哋係贊成。但係就希望就好似其他旅遊巴或者咩嘢咁，淨係喺打橫嗰度拉埋嚟，就唔係話箍住膊嗰啲，因為嗰啲有好多人唔識纜，好多乘客或者小朋友唔識纜。其實就係會有啲唔方便嘅，落車嘅時間就會慢咗，可能有啲人除唔甩，唔識除。但係為咗安全，就係目前嚟講，未有其他，因為咁多危險因素裏面，未有其他保障乘客方面，我哋係贊成嘅，所有--係嘞，落安全帶希望係用打橫方式嗰個。

黃女士：（經傳譯員）最後就係專營巴士車長訓練方面，請你睇第十八段，呢度話工作小組同意運輸署應該係發出一份實務守則，係關於訓練專營巴士車長嘅，你...

主席：（經傳譯員）呢度其實有兩部分，呢度就話，即係我哋亦都收到運輸署嘅陳述書話畀我哋聽，實務守則已經發出。而郭生，我哋想問你嘅就係，你哋工會有冇收到一份呢啲嘅實務守則？

郭志誠先生：係冇。

主席：（經傳譯員）咁有冇係問過你哋意見，關於檢視訓練車長安排，點樣去監察，同埋係點樣去規管訓練方面？

郭志誠先生：係冇嘅，其實我哋可以有好多意見。

黃女士：（經傳譯員）請睇第 19 段，上面就寫咗訓練安排嗰個嘅架構，喺呢一個實務守則方面，即係佢哋係無論係全職、兼職都好，都係有一啲嘅定期訓練，同埋為特別目的而設嘅訓練。首先，你支唔支持呢樣嘢？

郭志誠先生：支持嘅。

黃女士：（經傳譯員）第 20 段，呢度就話，定期巴士車長嘅訓練應該包括呢啲單元，仲有係比呢啲嘅--同埋比重，咁係由(a)至到(e)，包括安全駕駛同道路安全、認識車內裝置設施、處理事故、顧客服務、認識公司規則、交通規例、職業安全及健康。你對於呢啲嘅係比重--單元嘅比重，有冇任何嘅意見？

郭志誠先生：其實佢呢啲課程，我可能都有--會有啲認識嘅。但係你要記住，啲車長就係，你就咁講，即係你好似讀書咁講畀佢聽，佢好多嘢係掌握唔到嘅，即係唔係好明嘅。即係過往我哋喺訓練學校裏面，就係導師講埋答案畀你剔，咁個個一百分嘅。咁交番運輸署，或者 check 番啲資料，畀高層、管理層、董事監或者係可能委員會去睇下，睇下啲數據，個個都一百分，咁呢方面就唔係好理想嘅。

其實就喺個訓練裏面，我哋啲車長就--嗰個課程裏面，其實我哋應該係用嗰啲數字量化畀佢聽，譬如嗰個距離係點計，譬如我哋車同我哋巴士係 50，最高

去到 70，咁我哋點樣計出嚟嘅，1 公里就 1,000 米，70 公里就係乘番 70，就係等於 70,000 米，再除番 60，咁就等於每分鐘係行咗幾多，再除多 60，等於每秒鐘，咁每秒鐘就係 19.5 米。咁你如果你行緊 70 嘅時候，你要停低架車嘅時候，你就量化到嘞，量化到，佢就認識「我哋去到嗰度，要行幾多。」因為佢有個量，有個數量畀佢知道，70 原來一秒鐘可以行到 19.5 米嘅；60 行到 16.6 米；50 行到 13.8 米；40 公里就每秒鐘行到 11.1 米；30 公里就佢就每秒鐘行到 8.3。因為你量化，咁佢哋容易明啲。你哋成日話兩秒距離，兩秒距離係幾多？你當時行緊幾多？佢成日話遠啲喇，遠啲喇，三秒、四秒，咁喺香港好多環境嘅時候，點會大家個距離係隔到三至四秒呢？但係你要畀佢認識到，知道車速係乜嘢，車速係乜嘢，嗰盞燈我哋應唔應該去衝佢。

其實以前係有教嘅，咁以前係點教，就係去到第一個箭咀嘅時候，我哋就收晒油；去到第二個箭咀嘅時候，如果未轉燈，我哋可以畀少少油，加啲動力過埋佢。即使去到個頭轆過咗第--嗰條停車線，因為我哋係巴士，有企位，嗰個情況之下，我哋係應該係去埋嘅。但係而家嘅訓練就冇講呢樣嘢，「總之你喺條線停喇。」咁好多時嗰啲乘客或者街外人唔明白，「巴士衝黃燈，衝黃燈。」其實以前就都有同交通部或者係訓練學校有教過嘅，我哋點樣會--即係而家又話咩嘢閃燈嗰啲，其實嗰啲閃燈都好，有時啲人你閃咗幾多秒，有啲人會博衝嘅，但係你如果有一個習慣...

主席：（經傳譯員）郭生，唔該。

黃女士：（經傳譯員）另外一個問題就係工作時數，喺你嘅第一份嘅文件，中文就係第 88 頁，係工會 1A 嘅文件，而英文文件就係第 90-7 頁，中文就 88 頁。第五段，你話「車長安全合理工時應該最高都係每日十二小時，而駕駛時數最高就係十小時。」我想問下你嘅意見或者你工會嘅意見，對於呢一個係兩味更，就係話最高嗰個工作時數去到十四小時？

郭志誠先生：即係你想講呢個問題？

主席：（經傳譯員）我哋想你畀我哋嘅意見，或者你公司--或者你嘅工會對於呢個兩味更嗰個指引，話最高就係工作時數十四小時，最多係揸車十小時，最起碼有三個小時嘅休息，你嘅睇法係點？

郭志誠先生：其實而家嘅指引係最高駕駛時數係十一小時嘅，如果根據呢幾日大家個委員會成日提議就話三小時休息，十四小時，係出年第二季先開始嘅，而家就喺 2010 年嗰個指引，就係十四個鐘，最高工時十一個鐘，就冇指定中段休息係要幾多時間，係冇指定。咁係出年第二季先開始實行嘅，其實而家係好多係休息...

主席： That's why --

郭志誠先生：...個零、兩個鐘頭，兩個零鐘頭，包埋食飯，咁佢--點解運輸署會就佢，咁佢而家到到出年第二季，有個空窗期嘅，有個空窗期，佢就儘量用盡...

主席：（經傳譯員）郭先生，唔該。第二年嘅第二季就係話呢啲嘅指引係會全面實施嘅，係咪呀？係咪咁呀？

郭志誠先生：講就係嘞。

主席：（經傳譯員）咁我就問下你，呢啲嘅指引話要起碼連續三小時嘅休息，九巴而家係有冇實行？

郭志誠先生：冇硬性規定，條條路線唔同，咁佢有啲加走直頭冇啱，畀番個鐘頭你食飯，用盡佢十一個駕駛嘅時數，有時超咗少少嘅，即係過鐘咁樣。即你而家就運輸署冇硬性規定，佢咪走呢啲罅囉。

主席：（經傳譯員）你集中呢個問--回答呢個問題，九巴有冇開始實施減低，或者係實施話要連續休息三小時，喺呢啲兩味更嘅安排，即係話當值時數係十四個小時，但係最多只可以駕駛十個小時，九巴有冇喺某啲嘅路線開始呢一個嘅安排？

郭志誠先生：目前唔會，佢而家唔夠人手，係十一鐘頭駕駛，唔係十個，十個鐘頭係我哋建議。目前嚟講，係十四--最高十四小時，就駕駛時間係十一小時，中段而家就係三十分鐘，即係日後，出年嗰個第二季就係，如果一段時間係有連續駕駛六個鐘頭，有四十分鐘，一定要有四十分鐘休息，目前就係三十分鐘嘅啫。九巴就係目前嚟講，係冇執行呢樣嘢，即係中段休息三個鐘，有啲係冇嘅，兩個幾鐘又去唔到邊度。

咁我哋呢度有個同事係特別車，佢其實係有個電郵畀過--發表過意見畀委員會，但係佢可能電郵錯咗，咁委員會收唔到，咁琴日佢同我哋講嘅。我希望如果委員會可以--佢係特別車嘅，月薪嘅，佢如果--佢喺我哋隔籬，如果委員會可以畀少少時間佢講下，等佢發揮--發表下自己特別車嘅心聲，希望委員會...

主席：（經傳譯員）呢個係咪黃先生？好呀，黃先生，你講下，你係咪揸兩味更？呢個星期有冇揸兩味更？

黃健威先生：而家係工傷嘅，唔好意思。我本人就揸咗特別更一年，其實中段嘅休息係...

主席：（經傳譯員）你最後一次揸兩味更係幾時？

黃健威先生：6 月 26 號。

主席：（經傳譯員）咁你可唔可以--你記唔記得你嗰日嗰個工作安排係點？幾多點鐘離開屋企？幾時係當更？幾時休息？喺邊度休息？

黃健威先生：6 點 15 分起身，六點半出門口，跟住返工，搭車，去到美孚之後轉兩程工程車，去到 7 點 35 分拍卡，然後開始開車。直至到上段嘅時間，係開 11:40，開落去奧運站，一個鐘頭嘅食飯，至到中段休息係兩個鐘頭四十七分鐘，下段嘅開始車時間係 15 點 55 分。

主席：（經傳譯員）我哋唔趕㗎，黃先生，或者你慢慢形容。你喺邊度住？

黃健威先生：葵盛西邨。

主席：（經傳譯員）咁你六點半離開葵盛西邨，嗰朝早，係咪呀？

黃健威先生：係。

主席：（經傳譯員）跟住你去美孚，係咪？

黃健威先生：係。

主席：（經傳譯員）你搭咩車去？

黃健威先生：坐 37 號巴士。

主席：（經傳譯員）係乘客，係咪呀？

黃健威先生：係。

主席：（經傳譯員）你去到美孚，你點呀？

黃健威先生：跟住轉工程車，去昂船洲嘅九巴車廠。

主席：（經傳譯員）呢個係咪九巴嘅公司車？

黃健威先生：係。

主席：（經傳譯員）係車--係巴士定係一架私家車？

黃健威先生：一架旅遊巴，六十座嘅旅遊巴。

主席：（經傳譯員）仲有其他嘅車長一齊，係咪呀？

黃健威先生：係，冇錯。

主席：（經傳譯員）由美孚，你同其他嘅車長去到昂船洲，係咪？

黃健威先生：係。

主席：（經傳譯員）你幾多點去到昂船洲？

黃健威先生：大概係 7 點 20 分。

主席：（經傳譯員）嗰度有啲咩嘢設施，昂船洲嗰度？

黃健威先生：係一間九巴士嘅車廠。

主席：（經傳譯員）去到嗰度之後，你係咪打卡？

黃健威先生：係，冇錯。

主席：（經傳譯員）點樣打卡㗎？

黃健威先生：用八達通喺電腦嗰度拍卡，之後會有張當日嘅行車單。

主席：（經傳譯員）你用你嘅八達通就電子咁樣7點35分朝早打卡，係咪？

黃健威先生：係。

主席：（經傳譯員）跟住會點呢？跟住點呀？

黃健威先生：之後會出咗個當日需要揸嗰部車嗰個車牌出嚟，然後就要上去上面停車場嗰度搵嗰部車，然後再開去站頭。

主席：（經傳譯員）幾多點鐘離開昂船洲？

黃健威先生：7點35。

主席：（經傳譯員）打卡番去，7點35，跟住就8點35分離開，咁之間做咗啲咩嘢？

黃健威先生：唔係，7點35分係離開昂船洲九巴車廠，由昂船洲嘅九巴車廠揸車去葵盛西邨嘅巴士總站，開第一班車8點鐘。

主席：（經傳譯員）咁即係你喺巴士總站嗰度，就要揸架車去到葵盛西。咁嗰個係咩嘢嚟，係巴士總站定係咩嘢地方？

黃健威先生：葵盛西邨係個巴士總站。

主席：（經傳譯員）係西？

黃健威先生：係。

主席：（經傳譯員）咁跟住你就揸嗰條路線，係嗰朝早8點開始，係咪？

黃健威先生：係，8點係第一個單。

主席：（經傳譯員）嗰個路線係幾多號？

黃健威先生：37號。

主席：（經傳譯員）個終點站係邊度，嗰條路線？

黃健威先生：奧運鐵路站。

主席：（經傳譯員）咁你繼續講畀我哋聽嗰日嘅事情吖。

黃健威先生：之後--因為係我係做特別更，繁忙時間，之後就會私牌，即係暫停載客，就再私返去葵盛西邨，開9點31分，咁就一直做到去11點40分，係最後一轉，咁開落去奧運站，就上段係完成咗，咁大概個時間係12點45分左右。

跟住...

主席：（經傳譯員）你完咗早上嗰更，你係喺邊度㗎？

黃健威先生：部車要私牌，即係暫停服務，去揸番去葵盛東邨嗰度，擺低部巴士。

主席：（經傳譯員）呢個係咪總站嚟㗎？

黃健威先生：都可以算係總站，係畀巴士食飯，又或者係畀下一個司機去接更，可以暫時停泊嘅位置。

主席：（經傳譯員）你去到葵盛東邨係幾多點？

黃健威先生：約 12 點 45 分左右。

主席：（經傳譯員）咁你完咗 37 號路線嘅工作，係幾多點嘅事？

黃健威先生：正常個工時應該係 12 點 40 分，係一個鐘頭嘅行車時間，但係個時間就另外再加多一個鐘係食飯嘅。咁正常個時間係應該係兩點零八分，計埋食飯時間。

主席：（經傳譯員）咁你喺邊度--當日你喺邊度食飯？

黃健威先生：喺葵盛東邨食飯。

主席：（經傳譯員）嗰度有冇休息設施㗎？即係九巴嘅巴士嘅休息設施？

黃健威先生：之前係有，但係因為房署嘅問題拆咗，咁最近就好似我行過嗰陣時，係已經裝咗一個休息室，應該係一個禮拜嘅事情嘅啫。

主席：（經傳譯員）喺 6 月 28 號嘅時候，喺葵盛東邨有冇任何嘅休息設施？

黃健威先生：呢個我唔清楚。

主席：（經傳譯員）咁你喺邊度食飯㗎，嗰陣時？

黃健威先生：喺葵盛東邨嘅商場嗰度。

主席：（經傳譯員）咁食完飯，食飯時間仲未完，咁你點樣過剩餘嘅時間？

黃健威先生：再坐番車去葵盛西邨個站嗰度，然後喺嗰度嘅休息室嗰度休息。

主席：（經傳譯員）咁你係搭咩嘢車去嗰度？

黃健威先生：有好多架車嘅，嗰度，有 47X、37M 同 37，都係搭巴士嘅。

主席：（經傳譯員）所以你搭巴士，係咪呀？

黃健威先生：係，冇錯。

主席：（經傳譯員）係乘客，以乘客身分？

黃健威先生：冇錯。

主席：（經傳譯員）一個係固定嘅路線嚟嘅，唔係話揸特別更嘅車長揸㗎？

黃健威先生：我係特別更嘅車長，固定嘅路線，因為已經係掛牌嘅車長嚟。

主席：（經傳譯員）呢樣我明，但係而家但係講緊你食緊飯嘅時間，就搭車由係東邨去西邨，你頭先就話，你話你係搭車，以乘客嘅身分，由東邨去西邨嘅，係嘛？

黃健威先生：係，冇錯，因為東邨嗰度係冇休息室可以畀我休息，只有西邨嘅巴士總站嗰度先有員工嘅休息室。

主席：（經傳譯員）你就喺葵盛西邨休息，係嘛？

黃健威先生：係，冇錯。

主席：（經傳譯員）嗰度嘅休息設施係點樣㗎？有冇座位，有冇長凳？

黃健威先生：有三張嘅長凳，同埋有幾張檯。

主席：（經傳譯員）咁可唔可以瞓低㗎？

黃健威先生：淨係好似梳化咁樣，可以挨住。如果你話要完全好似張床咁瞓低，係冇嘅。

主席：（經傳譯員）但你可以挨後挨低嘅，係嘛？

黃健威先生：係，冇錯。

主席：（經傳譯員）咁幾時係完咗你嘅休息時間？

黃健威先生：去到 15 點 55 分。

主席：（經傳譯員）咁你呢一個當日嘅休息時間係幾長？幾時開始呢個休息時間？

黃健威先生：連埋食飯嘅時間，約係兩個鐘頭四十七分鐘左右。

主席：（經傳譯員）幾點開始㗎？

黃健威先生：個行車個時間表就應該係計埋食飯，就應該係兩點零八分開始，至到 15 點 55 分。

主席：（經傳譯員）唔該。跟住你就繼續做呢一個駕駛嘅工作嘞，係嘛？

黃健威先生：係，冇錯。

主席：（經傳譯員）係咪再揸 37 號車定係另外一條路線？

黃健威先生：都係37號車。

主席：（經傳譯員）你揸呢條路線係幾耐？

黃健威先生：一年。

主席：（經傳譯員）唔係，係嗰日，即係嗰日揸呢條路線係揸到幾多點？

黃健威先生：哦，揸到係20點43分，呢個係收工嘅時間，包埋去番昂船洲放低架巴士。

主席：（經傳譯員）所以即係話，即係打--即係嘟卡走嘞，嘟卡離開，係咪呀？

黃健威先生：冇錯。

主席：（經傳譯員）你嘟卡入就係朝頭早嘅7點35分，係嘛？

黃健威先生：7點35分前。

主席：（經傳譯員）咁幾點嘟卡即係返工入去㗎？

黃健威先生：工程車返到昂船洲就係7點20分左右去拍卡嘅。

主席：（經傳譯員）當日，即係完咗嘞，嘟卡走，你係咪直接返屋企定係有做其他嘢？

黃健威先生：直接返屋企。

主席：（經傳譯員）可唔可以講下，返到屋企係幾點？

黃健威先生：大概係九點四個字左右。

主席：（經傳譯員）之後嗰日，即係6月29號，要唔要返工？

黃健威先生：我最後係工作到6月26號，因為我當日最後嗰一轉車返去葵盛西邨嘅時候，發生咗交通意外。

主席：（經傳譯員）唔好意思，26號，你係咪即係都有牽涉喺呢個交通意外裏面㗎？

黃健威先生：冇錯。

主席：（經傳譯員）交通意外幾多點？

黃健威先生：7點20分。

主席：（經傳譯員）嗰次交通意外嘅性質係咩嘢？

黃健威先生：係有一架的士喺三線嗰度，打橫切入嚟一線，入去小路櫸樹街，而我架車因為我係喺一線直行嘅，咁收唔切，咁撞咗落架的士嗰度。

主席：（經傳譯員）有冇受傷呀，你？

黃健威先生：有。

主席：（經傳譯員）係咪由嗰陣時開始就放病假？

黃健威先生：係，冇錯。

歐陽先生：（經傳譯員）唔該晒，我想跟進一下，你就講話休息嘅地方有三張凳嘅，通常就係同時間有幾多位嘅巴士司機會喺嗰度？

黃健威先生：應該有三至四位。因為每--即係佢哋其實係唔會係長時間，就可能係架巴士嚟到，有五、六分鐘咁嘅時--即係休息時間，咁入嚟坐下咁樣。

歐陽先生：（經傳譯員）咁夠唔夠位畀所有嘅司機，即係喺嗰個地方，夠唔夠畀位所有嘅司機同時間去休息？

黃健威先生：係足--應該係可以足夠容納到七至八個人嘅。

歐陽先生：（經傳譯員）唔該，唔該主席。

主席：（經傳譯員）郭生，我哋而家就會休息一陣，跟住 12 點係會繼續，即係跟番呢個鐘，唔該晒。

上午 11 時 43 分聆訊押後

上午 11 時 59 分恢復聆訊

出席人士如前。

主席：（經傳譯員）黃生，你同我哋講話你駕駛呢條路線就係即係揸咗呢係一年㗎，係咪呀？

黃健威先生：係，冇錯。

主席：（經傳譯員）可唔可以，即係如果你記得的話呢，就係描述一下咁呢係 6 月 26 號倒數之前嗰個禮拜，咁你呢就係即係冇休息，連續駕駛呢一個嘅特別更係做咗幾多日呀？

黃健威先生：基本上我係一至六，咁係有陣時係休星期日嘅，即係連續五日到六日。

主席：（經傳譯員）咁係五定係六日呀？定係你其實係可以改變呢個嘅模式㗎？

黃健威先生：係輪班輪休，所以正常係五日或者六日係放一日假。

主席：（經傳譯員）咁你嘅係工作嗰個嘅時間模式，係咪大致都係一樣呢，即係話幾點嘟卡返，幾點嘟卡放？

黃健威先生：係，冇錯，係固定嘅時間。

主席：（經傳譯員）如果有需要，你會唔會同意九巴將佢哋有喺呢一個6月26號嘟卡返工去到巴士總站，你呢就係休息，跟住呢就係嘟卡離開，如果九巴有呢一啲嘅資料，你同唔同意我哋問九巴攞呢個資料呀？

黃健威先生：同意。

主席：（經傳譯員）你同我哋講過休息設施，即係葵盛西邨嗰度嘅休息設施，有冇試過你休息嘅時候，即係喺呢個特別更休息嘅時候呢，要去第二度休息呀？

黃健威先生：有陣時會，因為太嘈嘅話係，太多人進出入，咁可能有陣時我會選擇返屋企嘅。

主席：（經傳譯員）個問題其實係問呀，有冇其他地方你係--即係除咗葵盛西邨呀，有冇其他地方你係真係有去過休息嘅呢？

黃健威先生：冇，因為淨係得葵盛西邨嗰度有休息室，咁葵盛東邨係我之前返工係仲未裝個員工休息室喺嗰度嘅。

郭志誠先生：咁呢度我想補充下呢就好--喺呢一...

主席：（經傳譯員）等等，等等，等等。等等，一陣間會到你。歐陽先生。

歐陽先生：（經傳譯員）係，唔該晒。我想澄清你頭先黃生講嘅說話，你提過話你嘅休息就係兩小時四十七分鐘，包埋食飯嘅時間，即係加埋之後就兩小時四十七分鐘，係嘛？

黃健威先生：係，冇錯。

歐陽先生：（經傳譯員）你亦都提及，如果太嘈，你就會返屋企，所以如果你要返屋企的話呢，可唔可以估下喺嗰兩小時四十七分鐘裏面呢，你可以即係休息到咩程度先至繼續返工呢？

黃健威先生：其實休息個時間係真係唔夠，只係瞇埋隻眼，係養神嘅方式去儘量將自己個狀態去保持到最好。

歐陽先生：（經傳譯員）唔該晒。

主席：（經傳譯員）郭生你想講嘢㗎，係咪呀？

郭志誠先生：係，就係嘞，咁葵盛東嗰度就好似呢幾日已經裝番個休息室嘅，咁呀我哋工會協助嘅，搵過周偉雄議員協助，咁呀好短時間佢哋就完成咗，即係我哋

都有提及過，我哋工會係主動介入嘅，因為我哋工會係冇政治背景，所以呢就想促成嗰啲事情呢，我哋會親身落區遊說當地嗰啲，主要其實反對係區議員，咁如果地方冇反對呢，就係政府部門嘅問題。

黃女士：（經傳譯員）可唔可以呢澄清幾樣嘢呀，黃生，你話呢你就喺呢一個嘅七點三十五分之前呢嘟卡返工，跟住呢就兩點零八分就係食飯，咁即係中間有大約呢個六個鐘頭五十分鐘先至放食飯，咁所以我就想知嘞，你中段時間會唔會有啲小休，即係喺嗰六個鐘頭五十分鐘裏面，會唔會有啲小休㗎？

黃健威先生：因為我最後上段嘅開車係時間係十一點四十分，咁行車時間係一個小時，咁我一個小時，如果我係揸--因為當時個路面其實係暢通嘅，咁我係可以揸埋架車返去葵盛東邨嗰度放低架車。即係比原定個時間係早，因為個交通流量冇咁大，所以係完全暢通嘅，咁可能係提早就返去，咁但係我實質個工作係冇 break time 嘅，當時。或者係我可以提供個時間表去畀大家參考下，咁可能會大家清楚啲。

黃女士：（經傳譯員）好呀，我哋想知道你哋嗰個嘅休息時間係點樣安排，即係喺第一更嘅時候。因為我呢想知喺嗰六個鐘頭五十分鐘裏面，係想知道點樣安排嗰啲嘅小休時間呀，所以如果你畀到時間表我哋就最好嘞。就於你提及過嘅食飯時間一個鐘頭，咁係咪包埋咗喺嗰三個鐘頭連續嘅休息時間，係嘛？

主席：（經傳譯員）佢冇承認話係呢個係有執行呢個連續三小時嘅休息時間，係咪呀郭生？冇執行到呢樣嘢，冇推行㗎，係嘛？

郭志誠先生：我都講咗係，2019 年第二季先實行嘅，而家係完全畀公司一個彈性，總之你當日十四個鐘，就唔能夠超過十一鐘頭係駕駛時間，其他就係任佢，咁呀其實係嚴格嚟講冇乜休息時間，因為佢而家因為唔夠人，佢用盡你，以前呢就係四點--三點、四點，即係我哋報告嗰度都有寫，最初嗰個時候就係上晝六點就至到十一點幾，跟住下晝三、四點先出嚟，咁樣嘅，以前嘅安排就係，咁佢而家就唔夠人嘞，咁變咗佢呢啲已經三點已經係晏㗎嘞，有啲就叫你直頭做第二條線，提早...

主席：（經傳譯員）唔該晒，郭生，問題好簡單。唔該晒，黃律師繼續。

黃女士：（經傳譯員）我想問黃生問題關於特別更嘅津貼呀，咁九巴係咪會畀一個減咗嘅，係咪即係$21.9 呀？

主席：（經傳譯員）係咪如果你--即係你做呢個特別更嘅時候呢，就會有呢個每小時$21.9？

黃健威先生：麻煩你等一等。因為正確佢個特別更津貼，每一日係$69.7。

主席：（經傳譯員）呢個係總數，唔係每小時計？

黃健威先生：呢個係總數嚟嘅，$69.7，係。

主席：（經傳譯員）咁係嗰個嘅休息時間有幾多個小時呀？

黃健威先生：兩個鐘頭四十七分鐘。

主席：（經傳譯員）黃律師請繼續。

黃女士：（經傳譯員）可唔可以再講一講關於呢一個係更嘅津貼，九巴嘅1號文件，呢個係問黃生嘅，請你揭去九巴文件1號，呢一個嘅109頁，有一個表，個表呢就寫咗嗰個津貼嘅。

黃健威先生：主席，有少少嘢想補充，$21.9係日薪員工嘅計法，而我$69.7係月薪員工嘅計法。

黃女士：（經傳譯員）你前面有冇呢份文件呀？109頁。

黃健威先生：有。

黃女士：（經傳譯員）想請你睇一睇左手邊嗰直欄，就係呢一個嘅2004年之前入職嘅底薪，係咪即係話佢哋畀你嘅係$11,810定係15,366欸呀，邊個係適用於你呢？

黃健威先生：$15,366。

黃女士：（經傳譯員）咁跟住你就有一個特別更津貼，就係$1,951.5，係咪成個月㗎？即係畀一啲月薪嘅車長？

黃健威先生：係要計日數嘅，咁如果係返唔足十五日嘅話，係攞唔夠嘅。簡單啲嚟講就係按比例。

黃女士：（經傳譯員）咁你可唔可以話畀我聽，由(b)一路去到(g)，你會收到幾多嘅額外津貼？

主席：（經傳譯員）我諗我哋太過細節嘞，其實睇呢啲數字，我哋都知㗎喇。

黃女士：（經傳譯員）咁或者我去另外一個嘅話題嘞。郭先生，我想同你講另外一個嘅議題，就係你喺文件度有提到嘅，就係有一條巴士專線嘅問題。第90-7頁就係英文，中文呢就係第88頁。

呢度就話，當一個嘅巴士呢係畀咗一個信息係要離站呢，咁其他嘅車輛應該係停咗佢，就畀咗巴士出咗先，咁呢就要有一個呢兩秒，鄰線嘅車輛就係畀巴士切入，咁係禁止巴士喺前方不足十米外切入前方巴士，尾巴士係需要突然間減速而令車輛乘客受傷，喺你嘅文件裏面，你係畀一啲嘅例子嘅，就係講到切線嘅問題。喺工會文件104頁去到108頁。喺紅磡站嗰個嘅問題。你係咪建議呢你希望有一個巴士優先嘅系統，好似類似星加坡嘅咁，係咪呀？

郭志誠先生：係，係。

Transcript by Epiq Hong Kong, Limited

黃女士：（經傳譯員）關於話必須要係畀巴士駛出站先...

主席：（經傳譯員）你係咪講係巴士站嗰度係...

郭志誠先生：係，係呀，係呀，正確，巴士站。

黃女士：（經傳譯員）你有冇咩嘢睇法係點可以執行得到呢？

郭志誠先生：頭先講咗係用一啲鏡頭，即係而家新車嗰啲側邊都有鏡頭嘅，咁我哋發出咗信號，或者兩秒，咁後面架車唔停嘅，我哋呢咁就可以執法。

主席：（經傳譯員）需要喺車嘅後面裝鏡頭，係咪呀？

郭志誠先生：而家係有左右兩邊，新車嗰啲左右兩邊喺個倒後鏡後面有嗰個側鏡鏡頭嘅，影住後面，咁點解話係兩秒呢，大家都清楚兩秒距離，咁呀政府都宣傳，點解要兩秒呢，就畀佢有個安全嘅情況，即係唔使佢突然間緊急停車，咁呀如果好似新加坡嘅做法呢就畫條線呢，咁好可能就大家會有啲誤會嘞，我啱啱過咗條線，或者啱啱到嗰條線你打燈，咁呀會有個誤差喺度，咁兩秒呢大家有個量化，量化兩秒，即係我建議兩秒，你可能可以建議三秒，咁呀即係我係量化畀大家參考，唔係話兩秒就--我話兩秒就兩秒，就冇呢個問題。

香港地方小，你話同埋巴士站多，你個個巴士站畫條線，人哋都唔知係做乜，因為你煩係香港嗰啲道路交通標記呢，你要畫一條線或者係乜嘢呢，你要喺之前要戙牌嘅，同埋要刊憲嘅，每一個咁變咗係好繁複。嗰啲線行行下咁可能甩咗，咁你變咗實行起上嚟就唔係咁好，咁呀用時間嚟做，比較安全。

黃女士：（經傳譯員）另外一個嘅問題呢就係關於安全嘅訓練，喺你第一份嘅文件，中文 84 頁，英文就係 90-4。你係講到安全嘅訓練，你就話當時呢，當以前呢，嗰個嘅交通都係比較簡單，而我亦都係對於路面熟習喇，我哋都需要訓練一個月，而喺呢個月嘅訓練期，大部分嘅時間都係訓練駕駛巴士嘅，你係評論而家嘅訓練呢係十八日係唔夠㗎。我嘅摘要係咪正確呢？你工會嘅意見就係話而家對於新聘嘅巴士車長嘅訓練係唔夠㗎，係咪呀？

郭志誠先生：正確，正確嘅。

黃女士：（經傳譯員）咁你建議訓練要幾長呢，對於一啲新入職嘅車長？

郭志誠先生：其實就都關乎一個經營問題，咁呀一個月係適中，除非佢本身有巴士牌，如果要入嚟巴士公司考牌嘅呢，一個月係唔可以少嘅，尤其是佢而家嗰個聘請個條件愈嚟愈低，咁呀上次聽證會，運輸署就話同巴士公司研究，有一年私家車牌就可以畀佢入去巴士學習駕駛，跟住十八日咁又話畀佢出嚟營業嘞，係非常危險嘅。係即係唔成熟嘅考慮嚟嘅。

黃女士：（經傳譯員）咁你呢度就係評論喇，喺你嘅回應嗰度嘅評論，係 7 月 25 號 2018 年呢就係講到運輸署嘅喺訓練嘅角色...

主席：（經傳譯員）或者你就咁樣摘要個論點喇。

黃女士：（經傳譯員）嗰一個論點就係話，你評論呢運輸署應該係有更積極嘅角色嘅，喺車長課程嘅訓練同埋監察方面，你喺 7 月 25 號嘅意見書係咪咁嘅意思呀？

郭志誠先生：係，係需要運輸署嘅監管嘅，因為你就咁巴士公司整個訓練課程出嚟，佢係就晒佢自己吖嘛，就晒佢自己嘅需要，咁就唔會考慮其他人，咁運輸署係應該係要有監管，咁呀最好同嗰啲工會商討下，因為我哋係在職，知道專業巴士車長係需要咩嘢條件，咁就應該開放啲大家傾下，咁呀會好好多。

黃女士：（經傳譯員）好，我嘅問題問完嘞。

主席：（經傳譯員）唔該。郭先生，我哋今朝畀你嘅問題已經係完成嘞，咁你一開始嘅時候話你呢仲有其他嘅材料呢係想畀我哋嘅，如果你想我哋收到呢啲材料呢，就係請書面畀我哋，跟住我哋就會考慮嘅，你係咪打算向我哋提交多啲嘅材料呢？

郭志誠先生：做得到就會嘅，如果即係委員會仲有啲時間先會完善成個諮詢，咁如果我哋得到，趕到又會儘快提交，咁呀係嘞，等委員會參考下。

主席：（經傳譯員）咁我哋希望收到呢你打算畀我哋嘅資料。目前為止呢我哋多謝你今朝呢嚟到係提供意見，亦都多謝黃先生畀我哋知道呢一個揸特別更嘅車長一日嘅日程係點樣，係對我哋好有幫助㗎。咁我哋而家仲有另外嘅一啲嘅工會嚟到係作供，咁我哋而家呢就係會短暫休息，咁請貴工會呢就係離席，咁我哋就會有其他工會代表係就座，我哋而家會係小休兩分鐘，唔該。

下午 12 時 27 分聆訊押後

下午 12 時 31 分恢復聆訊

出席人士如前。

主席：（經傳譯員）李生同埋你嘅同事，歡迎你哋嚟到，多謝你哋就代表九巴職員權益工會接受我哋嘅邀請，嚟到今日畀口述證供，一陣我會叫黃律師開始問你哋問題，佢哋係代表檢討委員會嘅。李生，如果你想由其中一位同事答的話呢，你就向我哋講係邊一位，咁跟住呢就可以由嗰位同事去答㗎。

李國華先生：明白。

主席：（經傳譯員）唔該。黃律師。

黃女士：（經傳譯員）李生，呢個委員會呢工作係要檢--從呢一個安全角度檢討專營巴士嘅運作，所以我會集中呢方面，喺我未問問題之前呢，我就想先確定咗一啲基本嘅資料，係有關於你嘅工會先。你嘅工會呢係喺 2017 年嘅 1 月成立㗎，係嘛？

李國華先生：係。

黃女士：（經傳譯員）大約有二百位嘅會員，即係截至到 2018 年 6 月 18 號。

李國華先生：冇錯。

黃女士：（經傳譯員）你哋嘅二百位會員呢，全部都係全職或者兼職嘅員工，受聘於九巴？

李國華先生：冇錯，冇錯。

黃女士：（經傳譯員）嗰個比例係幾多呀？即係個百分比？

李國華先生：全九巴有八千六百幾個車長，我哋有二百會員。

黃女士：（經傳譯員）唔係呀，我想講嘅就係話幾多個百分比係兼職，幾多個百分比係全職呀，即係你哋嘅會員嚟計？

李國華先生：我哋得一個兼職嘅會員，其他全部都係全職。

主席：（經傳譯員）全部都係巴士車長，係咪呀？

李國華先生：有站長，有三位站長。

主席：（經傳譯員）其餘都係巴士車長，係嘛？

李國華先生：冇錯，冇錯。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）李生，喺你嘅陳述書裏面呢，我就想睇一睇有關於係呢啲嘅喪失嘅時間同埋一啲訂定咗嘅班次呀，想請你睇呢 129-4 頁，你哋只係呢畀咗一份嘅陳述書我哋，日期就係 18 年嘅 4 月 23 號，咁中文版就係 117 頁。咁有關嗰段呢就喺 120 頁。

喺屘嗰段呢，你就話車長不斷流失，咁仍然要係維持同埋呢係減少脫班嘅情況，所以呢車長就係原有嘅休息時間呢，咁呢就會係因為要兼任其他路線喇，係即係喺呢個期間呢，希望有多啲休息機會呢，會視乎當時路線嘅情況呢，嘗試儘快完成該路線回到總站，爭取時間休息。可唔可以講一講，或者再解釋，或者解釋一下，點解要維持呢一個嘅係即係嗰個巴士嘅程--即係個巴士嘅規劃路線呢會影響到休息嘅時間呀？即係為咗維持班次，影響到休息時間。

李國華先生：係，巴士公司係將嗰個嘅時間表，嗰個--打個譬如，本身一條路線有一

個鐘頭時間行車嘅，咁佢縮到五十八分鐘，或者五十五分鐘畀你行車，咁嗰啲車長咪本身嘅休息時間已經少，但係如果你將嗰個班次嗰個時間更加縮短，縮短幾分鐘，咁佢哋已經係少咗幾分鐘嘅休息時間。

黃女士：（經傳譯員）可唔可以確認一下，要完成路線，但係時間就少咗，會唔會呢引致巴士車長即係更加有機會會超速呀？

李國華先生：會嘅，因為要趕住--趕番啲時間去爭取自己嘅休息時間，咁係咪要將嗰個車速會--雖然架巴士 70 公里啫，但係喺其他路段可能會行 50，佢都可能會行 70，咁呢啲咪導致嗰個車長嗰個壓力嚟囉。佢要追番啲時間吖嘛，追唔到佢咪要喺啲路段嗰度咪要超速行駛，嗰個路段行 50 佢都可以分分鐘要行 70，或者先追得番嗰啲時間。

黃女士：（經傳譯員）我哋聽過一個系統，一個監察嘅系統嚟㗎，係監察車長，就有啲嘅係界限係定咗喺黑盒裏面，就唔可以超過時速限制嘅，譬如可能呢就係呢一個車速限制 50 呢，就會將個界限定咗喺呢一個 55 嘅...

主席：（經傳譯員）你其實係講緊邊個人嘅證供呀？

黃女士：（經傳譯員）我引用嘅證供就係城巴嘅，我就想問嘞，會唔會有一個類似嘅系統應用喺九巴嗰度，即係一啲路段係時速限制 50，會有咁樣嘅設定呢？

李國華先生：有嘅，九巴都有個叫我哋俗稱叫「黑盒」，咁佢哋每一個行車嘅紀錄，我哋叫行車紀錄儀，記錄晒所有架巴士日常嘅運作，都可以喺個黑盒度搵得番嘅。咁公司會定期 check 呢個黑盒呢，就係話某些車長，你當時邊年邊月邊日，嗰日你行嗰個路段，你曾經超速幾多，咁九巴有呢個系統嘅。

黃女士：（經傳譯員）你知唔知道係定咗咩嘢界限呀，即係有關於路段如果時速限制係 50 嘅話...

主席：（經傳譯員）係九巴喺黑盒，即係行車紀錄儀裏面定咗嗰個嘅界限。

李國華先生：我唔係好明你問乜嘢。

黃女士：（經傳譯員）我哋聽過證供，或者我解釋一下，我哋聽過另外一個--即係另外一間公司城巴嘅證供，就係話如果嗰段路段定咗時速限制係 50 公里的話，佢哋就會喺黑盒裏面定一個嘅界限，就係 55 公里，如果巴士車長超過 55 公里的話呢，即係話如果係喺一段時間，譬如話係十秒，連續十秒超過時速 55 公里的話呢，就會自動記錄呢一個嘅資料，然之後會自動發出一個特殊報告，跟住呢就會相應咁係懲罰呢一個車長，因為佢超過咗呢一個限制。

而家螢光幕會見到，咁呢就係話超過咗係時速 55 公里，連續十秒，而嗰段路段呢時速限制係 50 公里，另外如果佢哋係行車超過 75 公里，為時超過十--連續十秒，而該段路段個時速限制係 70 公里，咁你知唔知道呢，即係你--即係作為車長，喺九巴對於九巴嘅車長，有冇一個類似嘅系統呀？

李國華先生：有嘅，有嘅。因為九巴嗰個，我哋理解呢就話佢嗰個黑盒呢，就係記錄你當時嘅車速，你平均嘅你--打個譬如，係行78公里，即係架車超咗8公里，佢就睇你嗰個時間，如果你喺十秒之內，你收油呢，就係冇紀錄嘅，但係你超過十秒都唔收油呢，就係有紀錄嘅。即係50公里嗰度係一樣，70公里嗰度都係一樣，係睇你行幾多，超咗幾多公里，你有到嗰個時間先會有，用個時間去計，十秒就係你收油就係冇事嘅。如果你唔識收油呢，繼續都係咁樣行呢，就會有警告信，或者會扣獎金呀嗰啲嘢嘞。

主席：（經傳譯員）等我理解下，你嘅意思係咪指即係架車係可以一路行78，只要係唔再--即係唔再加快行快啲，即係話要返--收番去，落番去呢個--喺十秒之內落番去70？

李國華先生：係，十秒之內要收油返到去70公里。

黃女士：（經傳譯員）你提及會扣津貼...

李國華先生：獎金，獎金。

黃女士：（經傳譯員）係呢個獎金。喺咩嘢嘅情況之下會扣獎金，同埋扣幾多呀？

李國華先生：我哋而家九巴將嗰兩份獎金合成咗，叫做我哋嘅底薪，咁以前未合成嘅時候，分咗兩個獎金制度，一個就係服務獎，一個叫安全獎，咁呀每一個有一千七百幾蚊一個月嘅，咁呀我哋日薪，一千七百幾蚊一個月呢，咁佢哋呢就嚴重嘅會扣一個月，即係你有交通意外，嚴重嘅，佢就會扣你一個月，如果通常都會扣半個月㗎嘞，即係如果有問題發生嘅時候，服務獎都係一樣，你畀人投訴得多，亦都喺嗰度會畀公司扣錢嘅，都係半個月或者一個月。

主席：（經傳譯員）但係嗰啲都係歷史嘞，係咪呀？而家再冇獎金呀，唔會再有扣獎金嘅問題嘞？

李國華先生：冇錯。

黃女士：（經傳譯員）如果個車長超速，或者呢係有一個嘅報告，就係話佢超速嘞，咁佢會唔會受罰㗎？

李國華先生：睇嗰個佢犯嘅次數喇，公司會睇佢犯嘅次數，同埋嗰個相隔幾久，你個個月都有嘅，一定會扣你錢，如果咁樣我隔咗一年，或者隔咗七、八個月，你先再犯呢，就都係會出警告信提你，提番嘅啫。

黃女士：（經傳譯員）根據而家嘅制度，仲係會有一個嘅扣嘅機制，就係視乎你違例呢係有幾頻密，係咪咁嘅意思呀？

李國華先生：係，冇錯。

主席：（經傳譯員）咁喺邊度扣呀？

李國華先生：而家冇得扣，而家嗰啲獎金喺個底薪，加埋落底薪度，九巴已經冇嗰個扣獎金嘅制度嘞，只係話每犯一次呢，就會警--就會出封信畀你，如果你收咗三封信之後呢，你就會被解僱。

黃女士： So it is not a deduction from salary --

主席：（經傳譯員）黃女士，請等等。三封警告信就係會結果係咩嘢話？

李國華先生：被解僱。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）所以而家再冇話從人工度扣錢呢一個嘅制度，反而呢就係三封警告之後就會解僱，係咪呀？

李國華先生：係，冇錯。

黃女士：（經傳譯員）下一個嘅問題呢就係關於訓練嘅。如果睇下第 129-6 英文版本，中文呢就係第 122 頁。你就係講到十八日嘅訓練課程，中文係--呢一個四個星期嘅駕駛訓練，你可唔可以話畀我哋聽兩者有咩嘢分別呢，喺四個星期同埋十八日嗰個課程呢，裏面嗰個內容有咩嘢唔同嘅呢？

李國華先生：現時九巴就行緊一個叫做由冇牌嘅，就用十八日連考牌嘅一個課程，咁課程入面係基本上同四星期嘅係差唔多，但係會濃縮咗好多，咁十八日嗰度就我哋認為係話嗰個訓練嗰個質素呢會下降嘅，真係佢入嚟做新車長嗰啲呢，我哋唔知佢係以前做--揸過咩嘢車呀，或者有冇揸過車嗰啲人，因為如果就算有揸過車，都係揸貨車，或者運貨呀嗰啲，或者揸的士呀嗰啲人多嘅，咁我哋一個大型巴士，咁呀係會一個叫做集體運輸嘅工具之一，咁佢哋訓練不足嘅時候，係咪會容易有交通意外呢？

同埋佢嗰個訓練嗰個時間，真係我認為係唔夠嘞。如果我哋自己--我本身入職，我做咗二十七年，入職嗰陣時係四個星期訓練，我本身已經有牌，有巴士牌嘅，咁都要訓練四星期，但係而家佢哋有牌嗰啲，即係而家九巴請有牌嗰啲，訓練咗七日咋，即係話係訓練路線呀，同埋嗰個--嗰啲叫做上嗰啲基本嗰啲課程，就七日已經係可以出嚟做一個叫做巴士車長，專業嘅巴士車長。

咁我哋本會呢認為呢就佢而家九巴嗰個訓練嗰個，而家咁多交通意外，牽涉有巴士嘅亦都好多，我哋即係我哋認為就係話，要訓練一個車長，起碼都要有四星期嘅時間去訓練，連埋啲課程呀，連埋嗰啲操路線呀，訓練嗰個路面經驗呀。亦都而家嗰個我哋建議呢就係話，嗰個每一個師傅，駕駛導師只可以帶兩個學員，以前我哋係帶三個學員，而家我哋希望公司嗰度改到係帶兩個學員，每一個駕駛導師。

黃女士：（經傳譯員）好，明白。去睇一睇下一份嘅文件，運輸署 1，403 頁。中文版本第 416 頁。李生，呢一份係由運輸署徵詢過五個嘅專營巴士營辦商，同埋

三間主要巴士製造商之後呢，就有呢啲嘅建議。

主席：（經傳譯員）呢個係一個特別嘅工作小組，由運輸署成立嘅，喺 3 月中，而呢個工作小組係要三個月內呢，有一個嘅建議出嚟，咁佢哋就喺 7 月 20 號有呢啲嘅建議，呢份文件係提交畀立法會交通事務委員會嘅。

黃女士：（經傳譯員）呢份文件係包括三方面，第一，就係喺車輛裏面安裝嘅安全裝置，第二呢就係安全帶喇，第三呢就係車長嘅訓練。我第一個嘅問題就係運輸署或者九巴，有冇提供或者諮詢過你哋就呢啲嘅項目嘅意見喇，喺今年 3 月至到 6 月之間有冇諮詢過你哋呢？

李國華先生：冇嘅，我係第一次見呢份文件，係冇--公司冇諮詢過工會嘅。

黃女士：（經傳譯員）咁我哋獲告知呢，最近就係運輸署係最近係向專營巴士營辦商發出一啲嘅指引，就係關於車長嘅訓練，等到呢不同嘅巴士營辦商嘅訓練係一致嘅，就係要由 2018 年 10 月開始實施。你有冇收到，或者你嘅工會有冇收到一份呢一個指引呢？

李國華先生：冇嘅。

主席：（經傳譯員）黃律師，繼續之前呢，就係話上個星期，我哋唔係問過運輸署有冇呢一份嘅作業守則畀我哋呢，我哋而家有冇呀？

黃女士：（經傳譯員）未有。最後一個問題，李先生我想問你嘅，你有二百幾個會員喇，我知道有部分係--唔係車長，但係大部分都係車長，佢哋有幾多係揸呢個特別更嘅呢？你知唔知？

李國華先生：我本人就係特別更車長，我本人都係。咁我知道，即係我冇認真統計過喇，但係我識嘅都有二、三十個都係特別更嘅車長，即係喺我哋嘅會員入面，都有二、三十個都係特別更嘅車長。

黃女士：（經傳譯員）唔該。我哋聽到嘅證供就係話，嗰個嘅 2018 年 2 月嘅指引呢，係冇嚴格咁樣遵守或者實施㗎，係關乎嗰個嘅休息同埋連續三小時...

主席：（經傳譯員）你嘅問題係咪嚴格遵守，其實嗰個嘅協議就係話，係要等到 2019 年第二季先至全面實施㗎，所以個問題應該係問，而家有冇呢係開始實行緊呢一啲嘅安排？

李國華先生：九巴嗰度未有，未有呢啲安排，就係而家嗰啲時間表呢，就都好多車，好多特別更嘅車，連休息連食--即係中段休息食飯都唔夠三個鐘。呢啲我哋有啲數字喺度嘅，因為我哋收集咗好多資料，關於呢啲特別更唔夠三個鐘頭，即係佢九巴就話夠三個鐘頭嘅，但係我哋係用佢嘅時間去計呢，就唔夠三個鐘頭。

主席：（經傳譯員）呢一個調查幾時做㗎？

李國華先生：兩個禮拜之前，我哋已經係陸陸續續係向嗰啲會員去詢問，咁呀得出嚟嘅結果有成都好多條線，都係唔夠三個鐘頭，好多路線同埋某一條路線嘅一啲我哋叫「字軌」，即係字軌嗰度呢，譬如咁講，258D 呀，嗰架 S5 呀，有啲係 60X 呀，有啲係 265B 呀嗰啲路線好多車都--好多字軌都係唔夠三個鐘頭休息連食飯嘅。

主席：（經傳譯員）你有冇嗰啲調查結果嘅文本可以畀我哋睇下？

李國華先生：我哋而家係印咗，呢個係得兩個先喇，因為我哋印--因為嗰啲資料喺我部手機度，有啲資料我又唔方便畀嘅，因為都係公司嗰個受控文件，我哋影番嚟嘅啫，所以就呢啲我哋唔會傳閱，只有我哋睇到有呢啲咁嘅--部分伙計用呢啲方式咁樣畀我哋。

主席：（經傳譯員）有冇一啲嘅資料你可以畀我哋嘅呢？有需要嘅你可以係油黑某啲嘅資料，等我哋知道你嘅調查有幾廣泛，譬如話有幾多個車長表示佢哋係冇呢個三個鐘頭嘅休息？

李國華先生：而家手頭上都係十幾個嘅路線同埋某一個--即係十幾條路線，中間有啲特別車嘅時間，咁呀佢哋個別畀我嘅，即係駐明係話邊條路線，邊個我哋字軌車，即係就係話呢條路線係寫咗出嚟呢，係公司自己做嘅時間表係寫咗出嚟，係唔足夠三個小時連食飯連休息。

主席：（經傳譯員）有冇任何嘅資料可以畀我哋嚟到支持你嘅講法？

李國華先生：暫時我哋係呢度呢，我哋--呢度得番兩--我哋係印咗兩個時間嘅。如果係想睇嘅，我可以呢度可以畀你望一望。

主席：（經傳譯員）好呀，我哋而家都係午飯嘅時間嘞，或者你而家提供畀我哋，咁我哋可以將佢印咗喇，又將佢翻譯喇，我哋下晝兩點半呢就再復會嘅時候，我哋就問你問題，係關於呢一啲資料嘅。如果仲有其他嘅事情，你係有口供嘅，或者係我哋希望有證據嚟到係去支持，如果你有嗰啲嘅證據呢，請係向我哋提供。咁我哋而家就會食飯，下晝兩點半會繼續開始，唔該晒。

下午 1 時 01 分聆訊押後

下午 2 時 30 分恢復聆訊

出席人士如前。

主席：（經傳譯員）午安。我哋有一份文件係你想交畀我哋嘅，我哋已經係做咗部分

嘅翻譯，或者我請黃女士處理，黃女士，黃律師。

黃女士：（經傳譯員）多謝，多議你提供呢份文件畀我哋，我哋摘錄咗同埋加大咗某一部分就講咗啲特別更嘅，我哋睇到一個例子，就係現時車長揸特別更嘅例子嚟㗎，呢條路線就係 258D。我哋可以睇到開始就係 6 點 50 分，收 13:43；然後又再喺下晝 4 點開始到晚上 8 點 15 分收，中間個休息時間只得兩個鐘頭十五分鐘，而唔係三個鐘頭。咁你可唔可以講畀我哋聽，呢個係幾時發生嘅呢？抑或係最近嘅例子？

主席：（經傳譯員）我哋睇唔睇到個日期，呢度？係咪一個更表嚟㗎，即係顏色嗰部分睇唔睇到？係咪話 4 月 28 號？嗰個有個日期。

黃女士：（經傳譯員）我睇唔到。

李國華先生：呢個時間表就係 7 月 9 號更改咗嘅，就係呢個時間表嚟嘅，係 7 月 9 號。

主席：（經傳譯員）今年？

李國華先生：係，係，今年，今年嘅 7 月 9 號，因為公司嗰度就係大改，就係呢啲我哋叫做「時間表」就大改，呢個係實行嘅日期係 7 月 9 號嘅。

主席：（經傳譯員）呢度係咪一幅相嚟㗎，即係有顏色，左手邊嗰部分係咪一幅相嚟㗎？係公司貼出嚟㗎？

李國華先生：唔係，唔係，呢啲係嗰個電腦--喺電腦嗰度影出嚟嘅，即係我哋公司嗰個電腦影到嘅。

主席：（經傳譯員）好，咁係幾時影呢張相嘅呢？

李國華先生：唔清楚，因為係啲員工提供畀我㗎。

主席：（經傳譯員）呢個電腦屏幕嗰度上面似乎有顯示一個日期，係 4 月--2018 年 4 月 28 日㗎，你睇唔睇到？喺頂嗰度，喺頂部。

李國華先生：哦，咁因為呢啲都係員工提供畀我嘅呢，我冇咁細節睇上面嗰啲細字，咁呢個就應該係 2018 年 4 月 23 號嘅。咁因為我哋公司最近一次大嘅執嗰個我哋叫做「更表」，就係 7 月 9 號好多路線都重新執過一次，但係呢幅相就係前日嘅--有啲員工攞畀--WhatsApp 畀我，話有啲咁嘅問題，咁我就用咗呢個，因為有一幅相，咁我就做咗嗰個例子。

主席：（經傳譯員）係，黃律師。

黃女士：（經傳譯員）嗰啲當更時間係咪所有特別更都適用，定係特殊情況？

李國華先生：呢啲係個別嘅路線同埋個別嘅每一條路線，嗰個我哋叫「字軌車」嘅適用，適用呢個--即係話呢架車--打個譬喻，呢個係 258D 嘅蛇五，咁佢呢個時

間表就係咁樣，如果蛇六又唔同㗎嘞。

黃女士：（經傳譯員）呢個更表係公司提供㗎？即係九巴提供㗎，係咪？你可唔可以再搵多啲例子畀我哋？

李國華先生：例如呢架 52X 嘅蛇七，咁佢哋嘅--喺早更嘅--睇下先，7 點 57 分拍卡，上段就收 12:07，但係佢下段開工就係 14 點 19 分，再要返去寶田攞車，咁中段時間得兩個幾鐘頭㗎咋，即係呢啲可以--呢啲例子都仲有幾個㗎。

主席：（經傳譯員）咁你想即係解釋嗰點就係話，譬如攞番第一個例子喇，一三--兩個鐘頭，13:25，即係嗰個休息時間少過三個鐘頭，你想講係呢一點，係咪？

黃女士：（經傳譯員）李先生，你話--較早時候話畀我哋聽你係特別更司機嚟嘅都係？

李國華先生：係，冇錯，冇錯。

黃女士：（經傳譯員）咁從你個人經驗，你可唔可以講畀我哋聽你一日個工作係點嘅呢？即係由你開始--工作開始計。

主席：（經傳譯員）你上一次係幾時開特別更嘅車？

李國華先生：1 月 14 號，因為 1 月 15 號我就因為交通意外整嘅到而家都未開過工㗎，我 1 月 14 號嗰日都--之前都係返緊特別更。

主席：（經傳譯員）咁你可唔可以幫到我哋，就係喺你最後嗰日你返工嘅時間係點嘅呢？

李國華先生：嗰日我哋--我要搵番嗰個時間表出嚟先。

主席：（經傳譯員）好，請你搵吖。

黃女士：（經傳譯員）你揸車揸緊幾耐時間？

主席：（經傳譯員）黃律師，佢搵緊個時間表。

黃女士：（經傳譯員）唔好意思。

李國華先生：我 1 月 14 號嗰陣時返緊嗰架特別車就上晝，即係 7 點 30 分簽到，咁就上段收工就係 11 點鐘左右就收工㗎喇，咁跟住就有一個鐘頭食飯，咁下段就開 16:11，跟住收工就係 21:29。

黃女士：（經傳譯員）咁喺你啱啱畀我哋嘅例子，你有冇三個鐘頭連續嘅休息時間？

李國華先生：哦，超過，超過三個--因為呢架車有四個鐘頭四十幾分叫做中段休息嘅。

黃女士：（經傳譯員）喺 2018 年 1 月 14 號之前，你做特別更嘅司機做咗幾耐？

李國華先生：三年左右。

黃女士：（經傳譯員）2018 年 1 月 14 號嗰更，你有超過四小時休息，呢啲係咪經常發生嘅呢，抑或--或者你可以話畀我哋聽你會點樣形容呢四個鐘嘅休息？

李國華先生：我都想補充一樣嘢，就係話每一條路線嘅設計嘅時間都唔同，咁有好多--我哋就住呢條--或者我自己本身嗰條路線就有六架蛇車，咁呢六架蛇車之中，係唯一一日，星期日就有一架蛇車少過三個鐘頭休息嘅啫，其他架架一至日都有足夠嘅--起碼超過三個半鐘頭嘅。咁我重點就係話有其他路線嘅設計嗰啲時間就係話少過--低於三個小時嘅休息，即係呢啲係話製造咗嗰個車長嘅疲勞駕駛嘅，佢因為得唔到足夠嘅時間，喺中段嗰度得唔到足夠嘅時間休息吖嘛，咁我點解話唔會話自己條線唔夠，因為佢係夠嘅，係夠時間休息嘅。就如果你個--條條路線都好似--呢個設計好似我哋自--我自己本身做緊嗰條路線嘅時間，我係絕對係接受嘅，但係有啲路線係冇吖嘛。我哋好多--而家舉咗幾個例子都係唔夠三個鐘頭吖嘛。但係我哋自己本身返--我自己做緊嗰架就足夠㗎嘛，啱嘛？咁公司唔會話就條條路線--因為條條路線嘅設計嗰個環境都唔同，咁我哋唔--只係提供就話嗰啲唔夠三個鐘頭嗰啲特別車嘅問題嘅啫。

主席：（經傳譯員）係邊啲路線？

李國華先生：九巴有好多條路線㗎喎，我好難提供到咁多，因為有幾百條路線，咁我都冇辦法提供晒㗎嘛。

主席：（經傳譯員）你喺 1 月 14 號揸嗰條路線係咩嘢路線？

李國華先生：269D。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）你可唔可以睇番而家呢幅圖，你睇番 258D 蛇五，「蛇」點解，首先？

李國華先生：我哋嘅用個 "S" 字嗰啲車就係叫做「特別更」，即係代表特別更嘅意意啫。

黃女士：（經傳譯員）咁呢個 258D，你可唔可以講畀我哋聽呢條路線喺邊度開始，邊度係終站？

李國華先生：258D 係龍門居去油塘，去油塘嘅。

黃女士：（經傳譯員）係咪梅田？

李國華先生：寶田，寶田，即係屯門嘅寶田去油塘。

黃女士：（經傳譯員）咁你知唔知道呢度係咪有足夠嘅設施㗎，呢條路線？

李國華先生：我唔係好清楚，但係寶田嗰個休息室就都好細，我哋知道就係已經--我

哋係喺屯門廠嗰度反映過，叫佢加大嘅，但係而家仲係申請緊，即係加大咗休息室。

黃女士：（經傳譯員）你話你有同屯門車廠提出，係用咩嘢方式？係口頭定係書面？

李國華先生：全部口頭嘅。

黃女士：（經傳譯員）同邊個講？

李國華先生：口頭，口頭嘅，屬廠嘅經理。

主席：（經傳譯員）咁嗰位車廠經理係邊位？

李國華先生：溫惠賢（譯音）。

主席：（經傳譯員）係咪 Debbie Wong 女士？

李國華先生：唔係，呢個溫惠賢先生嚟㗎。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）李先生，如果我冇理解錯誤，你喺九巴嘅時候就係二十七年做車長㗎喇？

李國華先生：係。

黃女士：（經傳譯員）你識唔識得一個人叫做鄭桂興先生同埋或者 Gary Wong 先生？鄭桂興先生...

李國華先生：唔識。

黃女士： You don't know?

李國華先生： I don't know.

黃女士：（經傳譯員）你個--喺九巴嘅工作經驗嚟講，你知唔知道係有冇個安全同埋品質控制嘅部門呢，喺九巴，喺 2010 年嘅時候？

李國華先生：有嘅，2010 年應--有嘅，我哋叫做安全--全名我唔係好記得喇，因為有個部門係叫做專係搞嗰個安全嘅，即係車長嗰啲安全訓練嘅，我就理解就係咁喇。

黃女士：（經傳譯員）你知唔知道呢個安全品質部門係會開會㗎？亦都會同車長開會㗎，有冇㗎？

李國華先生：我未聽過會搵--即係去同車長開會喎，我未聽過，亦都冇接觸過，或者冇被邀請過開呢啲會。

黃女士：（經傳譯員）咁你點樣知道就有呢個安全品質嘅部門？

李國華先生：都係我哋平時喺同屬廠嗰啲主任、經理開會聽過。

黃女士：（經傳譯員）你知唔知道有一個研究，就係 2010 年咁上下進行嘅，就係關於二十九個急彎嘅，咁就係基於某一啲嘅準則就係去辨認出呢啲嘅二十九個急彎，然後就係有一啲嘅措施就係站長係應該係跟隨，你知唔知道有個咁樣嘅研究？

李國華先生：唔知嘅，係未聽過添。

主席：（經傳譯員）或者我哋清楚少少講喇，咁呢個研究嘅目的就係希望建議車長係點樣可以係揸呢啲急彎嘅時候揸得更加好，咁但係你就冇聽過，係咪呀？

李國華先生：冇，冇。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）你之前講過，就係話你話你曾經就同嗰啲車長經理傾過，你就聽過關於呢個安全品質嘅部門，你知唔知道呢個部門有冇建議到一啲嘅措施，大概係 2010 年喇，就係一啲嘅措施去提議嘅呢，有冇聽過？

李國華先生：連有呢個部門我哋都未--即係未聽過呢個部門，會研究呀，研究急彎，佢哋係同我--諮詢過我哋--我都--即係我哋本會就未被邀請，但係有冇人邀請其他人，我就唔係好清楚喇，即係完全有--即係呢件事我係完全--應該講係全不知情。

黃女士：（經傳譯員）咁關於呢個部門，其實你哋傾嘅時候個內容係啲咩嘢，講緊乜嘢㗎？即係當你同個車廠經理去傾嘅時候，咁究竟係關--圍繞呢一個部門嘅時候，你係講緊啲咩嘢話題？

李國華先生：因為我哋好--即係我哋--呢個部門我係唔知，所以我哋冇就呢個部門去圍繞--即係傾內部嘅嘢，咁我哋同屬廠經理傾嗰啲就係圍繞咗我哋車長日常運作嗰啲問題嘅啫，咁關於安全嗰啲嘢就我哋同經理呢啲傾，就係冇傾過㗎。

黃女士：（經傳譯員）咁最後一個題目我想傾嘅就係關於培訓嘅。我哋可唔可以睇睇 KMB1，即係九巴嘅一號文件，咁就係第 120 頁㗎。我會簡單介紹下係關於乜嘢嘅，就係九巴嘅一個回應嚟嘅，咁就係運輸署之前寫封信畀佢，就係 2 月 12 號嘅--2018 年 2 月 12 號嘅一封信件，就係關於招聘同埋培訓呢啲全職車長嘅事宜嘅，咁呢個就係喺 2018 年 2 月 10 號嗰個巴士慘劇之後發生嘅事。咁我就會想問一問關於全職嘅車長佢嗰個培訓係點樣樣嘢。李先生，你係--就係你個病假之前，你都係一個全職車長嚟嘅，就係--即係 2018 年 1 月 14 號之前，係咪？

李國華先生：係。

黃女士：（經傳譯員）咁我就想問你喇，首先就睇呢個之前我就問一問關於培訓方面，係咪所有全職嘅車長佢哋--即係如果要申請嘅--考試嘅人，咁佢哋係咪都

係要係通過一個十八個鐘嘅培訓，咁每--十八日嘅培訓，咁每一日就係 9.5 小時嘅呢？

李國華先生：係。

黃女士：（經傳譯員）咁之後會唔會有一啲嘅重溫培訓㗎？如果你係全職車長之後，咁你入職之後會唔會有一啲重溫培訓？

李國華先生：有嘅，不過近呢十幾年就冇喇，因為之前我哋係話每兩年就會返公司就有一個叫做輔助駕駛嘅，咁就每兩年一次嘅，就要返去沙田學校嗰度就係接受一日嘅訓練嘅，即係溫習下嗰啲即係駕駛嘅態度、提高駕駛嘅技術方面嘅。咁而家就係冇喇，即係近呢十年都冇有呢個叫做嗰個每兩年一次嘅返學校嗰啲喇，即係而家係一個叫做你本身做車長，嗰一年有交通意外，咁就先至要返去嘅啫，如果你冇任何交通意外，係唔需要返去再培訓嘅。

黃女士：（經傳譯員）你係有冇針對特別嘅路線係有一啲特別嘅培訓嘅呢，喺全職車長方面？

李國華先生：以我所知就有啲路線係一定要接受訓練嘅，咁例如過海線喇、行旺角，即係彌敦--旺角一帶嘅路線都要特別去訓練嘅，咁有一條就係--例如 64K 喇，即係行大埔公路嗰啲--唔係，大埔道嗰啲，同埋粉錦公路、林村一帶喇、大帽山嗰條 51 喇，嗰啲係要特登要訓練三日嘅。

黃女士：（經傳譯員）呢個同十八日嘅一般嘅訓練以外㗎，係咪呀？即係係一啲特別嘅路線喇，咁你就會係需要另外三日嘅特別嘅培訓，係咪咁？

李國華先生：係，冇錯，或者關於訓練呢方面，我搵我哋陳生幫幫我手。

主席：（經傳譯員）陳先生。

陳詠豪先生：主席先生，我啱啱之前就喺交通事務委員會就 2018 年 7 月 25 號舉行個會議，有另一份文件嘅，佢就係一個背景資料簡介，裏面嘅中文版本第 4 頁第 15 點佢有一樣嘢就咁樣引述番嘅，「九巴表示不論全職或兼職，巴士車長若果未有行駛某路線一個月或更長嘅時間，將需要再次練習行駛該路線」。咁我想畀主席先生知道，其實呢一個嘅--即係九巴講嘅佢呢番說話，其實就從來都冇喺我哋車長度實行過嘅。

主席：（經傳譯員）黃大律師，可唔可以就幫我手睇下，搵一搵呢一個相關嘅文件？

黃女士：（經傳譯員）就係 TD-1 第 403 頁第五...

主席：（經傳譯員）第 15 段係講關於安全帶㗎喎。

黃女士：（經傳譯員）我相信係另一份文件嚟㗎。

主席：（經傳譯員）呢個係一個背景資料。

黃女士：（經傳譯員）係咪由--係立法會秘書署準備嘅呢？

主席：（經傳譯員）咁嗰個編號係幾多？

黃女士：（經傳譯員）我哋嘗試而家喺網上操緊喇。

主席：（經傳譯員）係咪喺嗰個文件夾嗰度冇㗎？好，我哋--我其實我已經睇過，但係我哋而家嘗試想睇一睇。

陳詠豪先生：係，冇錯，係呢度喇。係，就係呢一度喇。

主席：（經傳譯員）黃大律師，係咪喺我哋嘅文件夾度？可唔可以將嗰個文件碌上啲，等我哋睇到嗰個上文下理係到底幾時話報告過呢件事，或者我哋可以去第 13 段、14 段嗰度。咁呢度似乎有提及喺 2 月 15 號開嘅會議，咁跟住我哋而家可以去到第 15 段。係喇，呢度就有嗰個背景喇。可唔可以請你重複你嗰個論點，頭先，陳生？

陳詠豪先生：主席先生，我想提出嘅論點就係話九巴佢話係「無論全職或者兼職巴士車長，未有行駛某路線一個月或者更長時間，將需要再次練習行駛該條路線」，而呢一樣嘢由我入職到而家，公司都未有做過。

主席：（經傳譯員）你幾時入職㗎？

陳詠豪先生：15 年 3 月。

主席：（經傳譯員）請等一等，唔該。呢份係秘書處嘅文件，就搜集咗各類資料，係畀立法會議員嘅背景資料嚟㗎，就係講過去發生咩嘢事，咁呢個係指喺 2 月 15 號嗰次會議講嘅，嗰次會議有冇個會議紀錄？嗰個會議紀錄--應該嗰次會係有個會議紀錄㗎，係咪？存在㗎，係咪？咁等我哋可以係去再查一查，到底秘書處呢度所講嘅係咪準確，同佢哋九巴實際講嘅係咪一樣。或者呢件事可以遲啲再睇嘅，不過我哋聽到你嗰點喇，陳生。咁即係話你係質疑--根據你個人嘅經驗，係質疑呢個講法？

陳詠豪先生：係，冇錯。

主席：（經傳譯員）係，黃女士。

黃女士：（經傳譯員）或者請你睇九巴嘅意見書第一冊，120 頁。

主席：（經傳譯員）係帶我哋去邊度？

黃女士：（經傳譯員）就係去九巴畀運輸署署長，2 月 12 號，2018 年嗰封信嘅回應嚟嘅，就話要--即係運輸署要求攞個調查報告，就係因為有 2018 年 2 月 10 號嗰宗嘅巴士慘劇。

主席：（經傳譯員）係。

黃女士：（經傳譯員）陳生，呢度就係九巴畀署長嘅回覆嚟㗎，咁就提到招聘同埋培訓全職同兼職車長嘅情況。我想問你幾個問題，關於全職車長嘅，就我講一般嗰個培訓同埋特別培訓。我哋可以喺 120 頁嗰度睇到喇，呢度列出全職車長個培訓，個細字有提到話十八日嘅培訓喇，而喺下一頁就有提到話全職車長申請人會有最少十八小時喺路面駕駛嘅培訓，就會由導師看管下去做呢個練習嘅，你可唔可以證實係咪真係有咁嘅情況？最少六十八個鐘頭駕駛訓練。

主席：（經傳譯員）如果你唔可以答到就請你講，即係你如果唔知，就請你講喇，照講。

陳詠豪先生：因為呢一封嘅內容同我當年上堂就有啲出入嘅。

黃女士：（經傳譯員）你可唔可以指出你接受嘅培訓係點樣？即係當時你接受嘅培訓。

陳詠豪先生：就咁講佢第--即係個 phase 2 嗰度，佢話四至五款巴士車型訓練，根據我個人實際嘅訓練，只係得兩至三款嘅巴士啫。

黃女士：（經傳譯員）咁路線訓練呢？呢度有提到話路線訓練係訓練兩條路線。

陳詠豪先生：係嘅，我都--我當時都係訓練兩條路線嘅。

黃女士：（經傳譯員）咁我哋有之前聽過李先生一啲嘅供述，就關於話係復修訓練，即係全職車長嗰度喇，咁喺另一頁有提到就話有兩條路線，喺導師嘅指導之下做訓練嘅，咁而巴士車長嘅應聘人，首先一定要做過呢個訓練先至可以考試嘅，咁我哋又聽過話有三日嘅培訓喇，你知唔知道自從你嗰陣時開始，有冇啲咩嘢改變過？即係由你入職到而家有冇改變？

陳詠豪先生：基本上都係冇改變。

黃女士：（經傳譯員）或者請你睇 123 頁。呢度提及話聘任嘅車長無論係全職、兼職，都會有路線訓練，咁另外仲會有啲路線等佢哋熟悉咗先至會編派佢哋去揸㗎，可能話過咗三至六個月之後就會揸另一條路線咁樣，有冇發生過？

陳詠豪先生：有。

黃女士：（經傳譯員）咁係會唔會有額外畀訓練？

陳詠豪先生：我當時個人嘅經驗就係我哋公司有個部門叫「派更部」，英文叫"duty dispatch"呢個 unit 嘅，咁佢就會打電話畀我哋，就叫我哋自己就喺站長某一條線，例如叫--即係跟 111 咁計，咁喺 111 嘅站頭裏面就問站長攞一張叫做「跟車紙」，咁然之後就自己坐一啲其他車長揸嘅巴士，揸兩轉--即係坐兩轉，咁坐咗兩轉，若果識嘅話就交番去派更部，咁就有一個 111 呢條路線嘅 record。

黃女士：（經傳譯員）127 頁，我哋可以睇到就有啲嘅修正嘅訓練，即係一年內有四

宗要負責嘅事故，如果係新車長喺頭三個月有幾宗要負責嘅事故，或者係不小心駕駛或者未能夠確保乘客安全，咁如果再有一次嘅不小心駕駛，就會終止服務。咁呢度提到話有一至三日嘅修正訓練喇，通常就係一日喇，就要由導師嚟去建議嘅，有冇發生過？

主席：（經傳譯員）你係咪問陳生有冇接受過修正嘅訓練？

黃女士：（經傳譯員）係，有冇接受過修正訓練吖，喺咁嘅情況之下？

主席：（經傳譯員）或者應該--你個問題係咪問佢有冇接受過修正訓練吖？

黃女士：（經傳譯員）係。

主席：（經傳譯員）係。

陳詠豪先生：我從來都冇接受過修正訓練。

黃女士：（經傳譯員）就你所知，或者其他嘅車長吖，你知唔知道佢哋有冇接受過修正訓練？即係喺咁嘅情況之下，好似呢度所講嘅嗰啲情況，呢一版講嘅。

陳詠豪先生：以我所知，我就冇聽過。

黃女士：（經傳譯員）主席，我相信我已經問晒啲問題喇。

主席：（經傳譯員）好，唔該。

羅先生：（經傳譯員）一個簡短嘅問題，根據你嘅經驗，即係其他特別更嘅司機，你可唔可以揀一條路線係近你屋企㗎？或者佢哋會唔會考慮你屋企喺邊度，然後先至派一條路線畀你？

陳詠豪先生：根據我嘅經驗，只可以--若果嗰條路線有一個空缺，有一個吉位，我哋可以嘗試就入一張我哋叫「簡便報告」就畀一個車務組，然之後再交畀編更組，再根據我哋車長內部嘅評分去--即係畀我哋可唔可以分配到呢一啲嘅路線，而舉例我講我自己就係隸屬於沙田廠，喺沙田區嘅工作，但係我住喺大埔嘅。

羅先生：（經傳譯員）即係你冇得揀嘅？唔可以揀嗰啲路線？即係除非係要有空缺，即係嗰條路線有空缺，跟住你可以去申請？

陳詠豪先生：冇錯。

主席：（經傳譯員）李生，你提及係你揸特別更嘅車長，三年揸咗，啱唔啱？

李國華先生：啱。

主席：（經傳譯員）喺呢三年內，你係咪揸唔同嘅路線嘅呢？

李國華先生：唔係，都係喺原本嗰條路線，即係 269D，即係我哋俗稱叫做「掛咗

牌」，就喺嗰條路線，咁偶然因為調假或者其他問題，咁可能會調走其他路線囉，就係唔多。

主席：（經傳譯員）當你休息嘅時候，即係呢個喺兩更--有分更--中間呢個長休息時間，你會喺邊度去休息？

李國華先生：屋企，因為嗰個擺車嗰度好近我屋企，所以我可以返到屋企嘅。

主席：（經傳譯員）咁係喺邊度？

李國華先生：天水圍，因為天水圍本身有個車廠，咁可以擺到--中段時間啲巴士我哋叫做俗稱「榻車」，就「榻」咗喺嗰間廠入面，咁我自己就係出入都係用架單車，咁樣可以快啲返到屋企，因為就算我行路都係十五分鐘已經返到屋企㗎喇。

主席：（經傳譯員）即係天水圍車廠就喺你兩更之間，你就會泊架車喺嗰度，係咪？

李國華先生：公司安排泊喺嗰度嘅。

主席：（經傳譯員）咁天水圍車廠有冇一啲休息嘅設施嘅呢？

李國華先生：有嘅，但係就通常都係啲車長喺擺車嗰度食飯，就好似嗰啲休息或者例如可以瞓覺嗰啲地方就冇喇，只可以食飯，咁瞓覺通常都係喺架巴士度或者--即係佢哋住得遠就返唔到屋企嗰啲，同埋時間少嗰啲就喺架巴士嗰度休息，就返唔到屋企嗰啲。就我哋呢啲返到屋企，如果有三、四個鐘頭，我哋都係返屋企休息囉，同埋喺屋企食飯。

主席：（經傳譯員）你知唔知道你嘅同事係會唔會--就因為佢哋返唔到屋企，咁所以佢就會喺個巴士上面就即係小休下，瞓一陣咁樣？

李國華先生：冇錯嘅，因為佢哋住得太遠喇，有啲住到錦田，嗰啲即係就算佢返去，一來一回都要兩個鐘頭嘅，咁佢返屋企做咩嘢？佢休息都係三--即係公司時間都係畀三個鐘頭你，但係你一來一回用咗兩個鐘頭囉，咁點樣休息呢？咁就索性喺架巴士度休息囉，咁你車廠入面冇休息室嘅，就只有得個食飯嘅地方，就冇休息嘅地方，咁所以啲車長通常都係選擇喺架巴士度休息囉。

主席：（經傳譯員）係，唔該晒。咁你喺最後呢個部分，你有冇啲特別嘅事項你想提出嘅呢？因為我哋都差唔多要結束㗎喇，呢個環節。

李國華先生：我哋都有啲意見想再提交嘅，因為我哋喺--即係就住嗰個工時嗰啲問題嘅。咁我哋提出就係話早更收工，即係特別更就唔可以超過 21 點，早更接更，即係就係我哋開工嗰陣時候，早更嘅開工時間就唔好少過--即係唔好喺 03：30 嘅之前。因為太早開工，嗰啲時間--即係人哋食緊早晨，我哋已經當係食緊午飯㗎喇。咁夜更我哋就唔可以早過 13 點開工，因為嗰個夜更我唔知佢收幾多點，但係你喺 13 點之前--已經有好多巴士--即係路線係夜更開工係 11 點已經開工㗎喇，咁點為之夜更？咁新入職嗰啲車長就唔好安排兩味車，因為佢哋都

未適應嗰個公司嘅運作。咁仲有兩樣嘢，...

主席：（經傳譯員）你話 11 點鐘，你係講下晚上 11 點，定係早上 11 點？

李國華先生：早上 11 點，就夜更要開工喇。

主席：（經傳譯員）好，早上 11 點，唔該晒。

李國華先生：係。

主席：（經傳譯員）唔好意思，你呢啲嘅係點樣--呢啲咁嘅更係點樣叫呢？係早更、午更，定係晚更？

李國華先生：九巴得早、夜更㗎咋，有早更同埋夜更，冇話中更嗰啲，只有早更、夜更同埋通宵更，即係九巴而家啲更分。咁我哋會提出呢個問題，就係因為如果你啲特別更收超過 21 點，第二日就唔夠十個小時休息嘅，因為路面情況千變萬化，你如果設計一個時間表係收 21 點嘅，咁如果佢返到嚟，因為交通意外、道路擠塞，超過呢個 21 點，就第二朝就返唔到工㗎喇。即係兩更之間就係話有個十小時休息嗰個問題嚟嘅。

主席：（經傳譯員）好，可唔可以逐點該點講？咁早更嚟講，基本上係幾多點鐘至幾點鐘開始嘅呢？

李國華先生：我嘅意思係話早更開工嘅時間就係頭車通常都係 5 點鐘要簽到㗎喇，因為有啲路線係簽 3 點--因為有條路線--因為嗰啲調--公司要嗰架早更嘅車長要兼通宵更收工嗰個時段就要佢簽 3：30 簽到，早更，簽 3：30 要做 N 車，即係做一轉 N 車，所以提早咗嗰個出廠時間，咁就導致啲車長就因為太早開工，嗰個人嗰個精神--因為佢收工未必係收 1 點，可能係收兩點，咁係有成十一個鐘頭嘅工時，但係你太早起身，個人嘅精神會比較容易疲勞。

主席：（經傳譯員）咁喺早更嚟講，其實係大概幾多點至幾點鐘會完更嘅呢？

李國華先生：個別路線嘅時間唔同㗎喎，有啲--如果最早嘅收十二點幾都有，但係有啲就會收到 3、4 點都有，同時係拍 5 點，即係拍卡係拍--即係頭車咁計，同時間拍 5 點鐘，但係佢收工時間--如果長途車嘅，可能兩轉，如果你話比較平均嘅工時，一個鐘頭一個單嗰啲就可能會收到 3、4 點。

主席：（經傳譯員）咁夜更就大概係幾多點鐘至幾點鐘開始嘅呢？

李國華先生：我哋咁樣睇喇，因為嗰個--條條路線個設計嘅時間都唔同㗎，咁如果我哋--因為我哋建議公司就話夜更唔好喺 1 點之前開工，就係咁啫，就係話因為每條路線嘅接更嘅時間都唔同，就即係話車數多嘅，接更嘅時間會拉長咗㗎，咁所以夜更 6 點鐘又開工，有啲就 1 點鐘，有啲 11 點鐘就開工，係啲車長都難適應啲囉，因為你 1 點鐘開工，我一瞓醒就早餐都未食，就已經食午飯喇，咁就開工㗎喇。咁開工嗰個--太早開工嗰段時間就--即係話你夜更太早開工，咁你用膳嘅時間又會提早咗，咁車長一收工就開始--即係有啲車收成點幾兩點

Transcript by Epiq Hong Kong, Limited

幾，咁就成十二個鐘頭工作嘅，咁啲車長容易疲勞，容易咩嘢嘅。

主席：（經傳譯員）通宵更通常係幾點鐘開始㗎？

李國華先生：七點半之前開工，通宵更。

主席：（經傳譯員）咁通宵更通常係幾點鐘至幾點鐘完嘅呢？

李國華先生：夜晚七點半，收朝頭早七點半。

主席：（經傳譯員）唔該晒。咁呢個就係關於你工時方面嗰個建議喇，咁你有冇其他嘢你想提㗎？

李國華先生：我仲有兩個問題關於嗰個道路上嘅問題嘅。咁有啲而家喺街擺啲環保斗，成日擺喺巴士嘅嗰啲路線，即係擺喺條馬路上面，阻礙巴士埋站，阻埋其他道路使用者嘅，咁其實環保斗係咪有個專門部門去吊走佢嘅呢？因為你咁樣妨礙咗嗰個路面嗰個道路使用者安全喎。咁我想提議下就係佢哋有啲--我唔清楚法例有冇規定佢哋擺邊度吖，但係而家好多道路，例如彌敦道或者咩嘢--間中都會擺啲環保斗喺度阻礙嗰個交通嘅。我想建議就係話你專門部門如果見到呢啲情況，點解唔拖走佢呢，因係你影響好--即係嗰條繁忙道路嚟㗎嘛，你擺環保斗，製造一個叫做交通擠塞。咁我哋巴士車長嘅，如果交通擠塞嘅，咁時間，用咗我哋啲時間去塞車，咁啲乘客又等耐咗，咁佢啲環保斗可唔可以擺去第二度，去咩嘢呢？係咪我哋可以投訴佢，跟住就可以由警方去處理？

主席：（經傳譯員）我相信一定係有一有關嘅部門就係需要批准嘅，喺環保斗，咁我哋就會同運輸署傾一傾，或者甚至同警方去傾一傾㗎。

李國華先生：Thank you。仲有一樣...

主席：（經傳譯員）如果你有一啲嘅相片，你就想提供畀我哋嘅，咁可以說明話即係呢啲環保斗喺街道上面造成有啲咩嘢嘅困難、問題，特別係喺巴士站附近喇，咁你可以提供呢啲相關照片畀我哋㗎。

李國華先生：明白。咁我仲有一樣係關於巴士站嘅，咁而家我哋--即係較早前我哋同運輸署開會，即係啲巴士站擺咗啲其他車輛喺度，阻礙巴士埋站，咁我哋會建議話如果--即係話喺巴士站範圍泊車，違例泊車，可唔可以引入一個扣分制度呢？即係等有啲阻嚇性啲，其他外界車輛唔可以泊入巴士站。因為而家好多外界車輛泊入巴士站，好似係合法咁泊咗入去嘅，我哋巴士埋站係需要 double park 嚟落客、上客。咁警方我哋報--返到總站再報警嘅，佢哋都走晒喇，咁我哋想話--即係話引入嗰啲叫做你泊喺巴士站入面嘅違例泊車就需要扣分，有個阻嚇作用，就係咁喇。

主席：（經傳譯員）其實喺九巴嘅--有啲喺--向前方嘅攝錄機嘅，係嘛？有啲巴士係有呢個裝置嘅，係嘛？

李國華先生：有嘅，有嘅。

主席：（經傳譯員）咁呢啲嘅攝錄機其實就可以話係影到一啲前面係非法泊車嘅影像嘅，係咪？

李國華先生：係會影到嘅，但係唔係大部分巴士都有嘛，係得一千八百幾架有咋嘛，即係向車頭前面影嗰啲係得千零架有鏡頭㗎咋。咁我建議就喺巴士--如果你係要鏡頭嘅，不如喺巴士站裝鏡頭囉。即係巴士站嗰度裝啲監控鏡頭咁樣，有冇違例泊車咪--即係好過用巴士本身嗰個 cam.去做囉。

主席：（經傳譯員）但係點解唔用我哋而家已經有嘅一啲裝置呢？又或者可以兩樣都用嘅。

李國華先生：因為仲有啲巴士未裝到鏡頭㗎，因為好多舊式嘅巴士冇鏡頭，因為而家仲存在啲巴士，都仲有--大部分都未淘汰，所以嗰啲未裝--唔會裝鏡頭㗎喇嘛，係嘛？而家新式嘅只有千零部係有鏡頭㗎咋。

主席：（經傳譯員）咁如果有嗰啲嘅攝錄機嘅巴士，咁你會唔會就同意就話如果個車長見到有一個咁嘅違例泊車喺前面，咁佢撳一個掣，咁就知道有個情況，咁就將呢一個嘅閉路電視嘅影像就傳送番去相關嘅人士，咁就大家知道可以制止呢個情況，咁你會唔會支持呢個咁樣嘅做法？

李國華先生：支持嘅，支持嘅，咁其實都係巴士埋到站嘅，咁啲巴士車長揸車比較舒服啲囉，因為你唔使同其他道路使用者--根本你嗰個違例泊車嚟㗎嘛，泊喺巴士站，係嘛？咁嗰啲客又安全，巴士又安全。如果你泊晒喺巴--啲違例泊車泊晒喺巴士站嘅，咁我哋要上客，嗰啲客要喺車與車之間去上客...

主席：（經傳譯員）李先生，我哋明白你嘅論點㗎喇，咁我哋而家希望所做嘅就係搵一啲方法去幫你可以解決你嗰個問題嘅。

李國華先生：明白。

主席：（經傳譯員）仲有冇其他嘅論點你想提出㗎？

李國華先生：陳生有問題。

陳詠豪先生：主席先生，我想關於一個路線，即係而家工作個更表裏面，因為我哋希望運輸署可以做一個指引，每一日一個車長同一個更次最多就係一條主線加一條附加線，即係一加一。因為而家好多路線，即係喺同一個更表裏面需要一加二，即係 total 係做三條線嘅，我哋希望呢個情況就可以--即係運輸署可以做一個指引，就避免啲車長就混淆路線，就行錯路、停錯站。

主席：（經傳譯員）即係而家你可以係會要你哋揸三條線，你就建議話係減到兩條，係嘛？

陳詠豪先生：係，係。

主席：（經傳譯員）好，唔該。好，多謝幾位出席嚟畀你哋嘅證供。我哋仲有其他工

會嘅代表等緊發言嘅，咁所以我哋而家休息少少時間，然後就會繼續嘅，好多謝你哋出席。

下午3時32分聆訊押後

下午3時45分恢復聆訊

出席人士如前。

主席：（經傳譯員）請稍等等，請坐低，請就座，請就座。

葉蔚琳女士：（經傳譯員）唔該。

主席：（經傳譯員）首先我哋想多謝你葉女士同埋月薪車長大聯盟嘅代表就接受我哋嘅邀請就嚟做呢個口頭嘅陳述嘅。我就解釋下我哋嘅程序係點樣樣，首先就係黃大律師，佢就係資深大律師，佢係幫助我哋委員會嘅工作，佢哋就會問你哋嘅問題，主要都係環繞你哋個陳述書嘅，但係都會係就其他嘅方面嘅事宜去問你哋問題。喺你哋嗰方面，如果係你自己以外，希望其他嘅同事係幫你一齊答問題嘅時候，你就可以話請邊個、邊個就代表呢個聯盟去回答，咁就得㗎喇。你係咪起初，即係開始嘅時候，你會想有啲發言呢？

葉蔚琳女士：係，唔該法官大人。

主席： Very well.

葉蔚琳女士：首先感謝特區政府委派呢個專營巴士安全嘅獨立委員會，特別感謝倫明高法官先生、歐陽伯權先生、羅康錦先生以及各位隊團。因為我都得知大家喺呢段時間不斷咁樣日以繼夜，即係 7 點鐘都未收工咁去儘快去將我哋巴士嘅呢個行業嘅問題儘快去解決，特此喺度係非常感謝大家嘅。

或者我哋唔好阻大家太多嘅時間，第一個部分，我哋首先--我哋之前提交咗嘅，關於我哋安全把關嘅第一個重要嘅環素，就係話工程部，以下落嚟有一位資深嘅工程部嘅員工，佢表述下佢日常生活中喺工作上有咩嘢嘅困難嘅，我哋請...

主席：（經傳譯員）你就唔需要咁樣做，我首先會請黃大律師係問你哋問題，如果有一啲嘅問題黃大律師問，又有一啲嘢係冇涵蓋到你哋想講嘅說話，你之後你就可以補充嘅。請黃大律師。

葉蔚琳女士：知道，明白。

黃女士：（經傳譯員）葉女士，我哋呢個嘅委員會就係有個責任係提議--建議有關呢個安全嘅方面嘅建議，就係特別喺呢一啲嘅專營巴士服務方面嘅安全嘅，我嘅問題主要都係集中喺安全，而唔係話聘用員工方面嘅問題，我希望你明白呢一點。

葉蔚琳女士：知道。

黃女士：（經傳譯員）關於你嘅大聯盟，我相信就你哋喺勞工署登記嘅，2018 年 3 月 28 號登記嘅，係唔係？

葉蔚琳女士：係。

黃女士：（經傳譯員）目前就係一百五十個--2018 年 6 月嘅一百五十個嘅成員，...

主席：（經傳譯員）係全部都係全職員工嚟嘅？

黃女士：（經傳譯員）係唔係？

葉蔚琳女士：係。

黃女士：（經傳譯員）喺你哋有一封信就係中文嘅信，係 75-3 頁嗰度有一封信，係中文信嚟嘅，就冇譯到英文嘅，睇到呵？你喺封中文信係咁講嘅，2018 年 6 月 18 號嘅呢封信，就係喺 TU 文件夾 75-3 嗰個頁，就係你講到你哋嘅成員嘅組織係點樣樣，喺呢封信裏面，你個大聯盟就曾經進行過諮詢嘅，就有八百名嘅全職員工係有意加入嘅。

葉蔚琳女士：係。

黃女士：（經傳譯員）我就想首先問一問關於你而家目前有一百五十位嘅會員，佢哋全部都係全職員工，佢哋係嚟自邊一個嘅專營巴士公司嘅呢？

葉蔚琳女士：大部分都係九巴嘅車長嚟嘅，有一啲係新巴、城巴都有嘅，但係佔嘅部分比率係好少嘅。

黃女士：（經傳譯員）你可唔可以話畀我聽一百五十個之中大概幾多個係九巴嘅呢？

葉蔚琳女士：因為我哋喺嗰個審核過程裏面，我哋係交由我哋嘅秘書去處理我哋嘅有關嘅會員嘅，因為其實大家都要上班同埋之前要準備委員會嘅事同埋其他嘅事項嘅時候，其實正確嘅資料，即係話幾多嘅比例就冇，但係我所知道，其他巴士公司大約有五位嘅，其餘都係我哋九巴嘅員工嚟嘅。

黃女士：（經傳譯員）唔該晒。你嘅陳述書就提到好多嘅題目嘅，首先我就會講一講關於培訓--車長嘅培訓，第 68 頁，係中文嘅，係英文嘅第 72 頁第 3 段，你提到關於就有一個嘅車長嘅學員，佢就係已經考核咗，就成為車長，但係後來就係發生交通意外，嚴重受傷嘅，喺不足一星期，佢上班就係發生咗呢個意外，你可唔可以話畀我聽佢係一個兼職還是係全職嘅車長呢？

葉蔚琳女士：佢係我一個同班嘅一個同學，即係一齊入嚟經過訓練之後考一個巴士牌嘅。佢因為其實我都想順便講一講點解會帶出呢個問題出嚟呢？因為其實當時佢嘅導師，因為每一個導師都會帶一至三個學員喺一架車度訓練，其實當呢個導師見到呢個學員，以佢嘅多年經驗，認為呢個學生其實唔係好適宜去做一個專業嘅司機，曾經佢勸喻呢個同學唔好再去繼續呢個學業，不如搵過第二份工，但係當時因為呢個同學喺馬來西亞返嚟嘅，可能佢又急需搵一份工，冇辦法底下，老師都盡最大嘅努力，同咗組長講，希望用公司個--即係可以令到呢個學生即係話覺得佢唔適合，就唔好再畀佢再繼續呢個課程咁樣，但係當時因為都係同而家嘅情況差唔多，因為人手實在太短缺，每日收車實在太嚴重，為咗要交數，即係話佢哋每一個老師或者每一個上司，佢哋一路咁樣上去嘅時候都有一個壓力，就係話每日希望儘量培訓多啲學生可以交數出嚟個呢個真正可以去駕駛呢個巴士咁樣。

所以佢哋喺一層一層壓力底下，無奈就係話--我哋會見到一啲問題就係話其實佢哋有時都會--因為其實我喺琴日裏面都撞到有一個--其中嘅一個駕駛嘅老師，一個好資深，佢都有同我傾到一個問題，就係話其實佢哋有時內心都係好痛苦，同埋有時都要埋沒良心，就係我之前所講嘅，其實我哋香港人又好，每一個行業都好，佢哋為咗自己嘅生活而去埋沒自己嘅良心，明知唔得嘅，但係為咗唔想公司即係...

主席：（經傳譯員）葉女士，你繼續之前，我哋要打斷一下。呢個嘅學員，其實佢係已經係通過咗考試，係咪呢？

葉蔚琳女士：係，係。

主席：（經傳譯員）呢個係邊一年佢係上呢個堂㗎？

葉蔚琳女士：2013 年呢個 4 月 22 號，我開始入嚟--入職嘅，即係喺之前十八日之前。

主席：（經傳譯員）唔該晒，唔該晒。有一個簡單嘅一點，呢個學員佢就已經係通過咗運輸署嘅考試，佢就後來就有交通意外。

黃女士：（經傳譯員）葉女士，係咪即係你培訓完之後，2013 年你就正式就即刻加入咗九巴，就已經係做咗五年，係咪？

葉蔚琳女士：（沒有可聽到的回答）

主席：（經傳譯員）我希望你講出嚟，因為如果你就咁岙頭，我哋就冇辦法係做紀錄嘅，唔該晒。

葉蔚琳女士：明白，係，係做咗五年嘅。

黃女士：（經傳譯員）我哋講到關於學員嘅問題，喺你嘅陳述書裏面，你就話嗰個導師就關於呢一個嘅學員嘅性格有一啲嘅睇法，但係公司就喺目前嘅制度底下就

有理會到呢啲嘅評語嘅，我嘅問題就係話個公司點樣去唔理到嗰啲嘅評語，同埋呢啲嘅評語係啲咩嘢評語嚟嘅呢？

葉蔚琳女士：例如呢個導師佢經過同組長反映之後，組長就叫佢去天台嗰度試行泊車，即係我哋喺個訓練學校裏面，喺上面有泊車嗰個位置，就叫佢試咗，「okay 喇，咁就得喇。」咁樣就繼續畀佢即係呢個課程咁樣。

黃女士：（經傳譯員）你覺得九巴提供畀車長嘅訓練係唔足夠，雖然嗰個學員佢已經係通過咗個考試喇？

葉蔚琳女士：因為最主要嘅原因，即係其實我哋成日講巴士嘅安全或者個把關，其實可能喺各方面都要去配合，包括運輸署喺幫我哋九巴考牌嘅時候，可能佢會覺得我哋仲有一段時間會訓練，可能會比較寬鬆，呢個亦都可以商榷，但係問題一樣嘢，就係話當一個有經驗嘅導師佢覺得呢個學員其實唔係好適合揸車嘅時候，佢都盡佢最大嘅能力去表達嘅時候，因為我哋會睇到就係每一層嘅壓力令到佢哋叫做寧願即係話即係多啲人，即係話有個數字喺度，幾多人入嚟做或者可以經過訓練，而忽略咗嗰個真正嘅安全嗰個把關。

因為我都想補充下，其實佢哋導師都有評核嘅，佢哋評核嗰個標準喺邊度呢？其實每一--其實因為佢哋喺評核當中，因為我哋--當時我好記得嗰個情況，就係我哋當日考試嘅時候，每個師傅都好緊張，佢哋好似自己考牌咁，因為其實點解呢？因為其實呢個佢哋訓練出嚟嗰個學生如果個合格率高嘅話，可能會令到佢哋嗰個評核會高啲，呢個都係我哋見到現場去估計，因為佢哋都好緊張話因為都要--有透露過其實都係因為對佢哋嚟講，係一個表現嘅一個標準，喺駕駛學院，佢能夠--佢帶領學生...

主席：（經傳譯員）佢哋嘅表現評核就唔係通過運輸署考試嘅其中一個考慮因素嚟嘅，係咪？

葉蔚琳女士：係，係，係。

主席：（經傳譯員）即係運輸署嘅考試係完全分開嘅，係咪？

葉蔚琳女士：係，係，係。

主席：（經傳譯員）即係從你所講，佢哋可能會係話成為公司評核佢哋嘅情況，但係呢個係公司嘅事嚟嘅，係咪？運輸署就要決定呢一個嚟考試嘅人係咪通過到個考試，然後發個牌畀佢，所以黃大律師你想問嘅係咩嘢呢？

葉蔚琳女士：係。

黃女士：（經傳譯員）或者我可以去到睇你嗰啲建議，你其中嘅建議就係話要有三日嘅加強訓練嘅課程，就係車長嗰度要做嘅，就係第 6 段有提及，呢三日嘅增強課程，就係重點教授油門、剎車控制、彎位控制同埋行車穩定性，點解你覺得需要有呢額外三日嘅駕駛增強課程呢？

葉蔚琳女士：因為其實我哋去考巴士牌之前都需要有三年嘅私家車嘅駕駛時間，先可以考牌，點解要重點喺呢一個環節裏面要加強呢？因為巴士同一般私家車嗰個重量唔同，所以導致我哋控制個油門同埋剎車系統嘅時候係需要另外一種技巧，即係要去磨合，更加去明白呢樣嘢。同埋你會知道應該有一個數字，就係其實新入職嘅車長，最多嘅交通意外嘅環節裏面，好多都係我哋俗稱「撳骰仔」，就係話緊急剎掣，令到乘客撞傷，或者令到後車會突然之間撞咗埋嚟我哋巴士度，呢個係較為多嘅呢一個情況，即係喺一個新人發生交通意外嘅比率，就係話通常最大嘅意外就係話因為剎車嗰個控制得唔好，而令到乘客受傷。

至於彎位嗰度，就係因為咁大架巴士，同我哋平時嘅私家車係有所唔同嘅技巧，都希望要加強。同埋我後尾都有補充，就係話其實除咗三日之後，再由老師去評核，如果唔 okay 嘅話，應該再 repeat 多一次一個課程，咁樣能夠確保到呢個學生真正能夠可以駕馭呢個駕駛技術嘅時候，先可以畀佢可以喺道路上行走同埋接載乘客。

主席：（經傳譯員）呢個建議有冇向九巴提出過呢？

葉蔚琳女士：冇機會。

主席：（經傳譯員）喺五年受僱嘅期間，你從來都冇機會，五年裏面？

葉蔚琳女士：因為呢個範疇我哋一個職員就好少會去提議一啲問題，所以亦都冇咁嘅即係話一個門檻畀我可以去有機會真係好去細節咁去分析呢啲嘢。

主席：（經傳譯員）黃大律師。

黃女士：（經傳譯員）你亦都提及話應該喺駕駛學校都有模擬嘅交通燈號，就可以加強車長應用嗰個剎車嘅時候個技巧，即係因為個交通燈號，所以佢剎車，嗰方面可以多啲訓練。我嘅理解，其實已經有十八日嘅訓練，每一日係九點五小時，呢啲係全職車長嘅--即係準車長要做嘅，你覺得係咪足夠呢，呢個訓練？因為都係因應實際嘅路面情況做嘅訓練嚟嘅？

葉蔚琳女士：如果喺一個本身有一個駕駛經驗嘅，譬如--因為你三年牌，可能有啲人根本--好多年青人根本唔--即係真正自己嘅私家車都未試過擁有嘅話，佢哋根本冇一個路面經驗，我哋成日講嗰個路面經驗係我哋一個最重要嘅環素，因為點解呢？我哋好多時喺馬路要好多突發、好多問題，就係話如果對一個普通有經驗嘅車長嚟講，okay 嘅，但係如果佢係冇駕駛經驗，而佢只係單單嗰十八日嘅話，係一定唔夠嘅。

黃女士：（經傳譯員）你會唔會建議要擴大訓嘅範圍，包括埋情緒控制呢？或者係情緒嘅訓練，譬如話點樣去處理乘客、行為咁呢？

葉蔚琳女士：喺呢方面，其實我哋喺九巴我哋去入職嘅時候，我記得曾經--如果我冇記錯嘅話，係一份問卷嘅，嗰度都會略略即係話去睇下你嘅 EQ、各方面係點

嘅，但係你話實質上有冇一個實質嘅培訓呢？就都會講下點樣去用咩嘢情緒去處理呢啲嘅問題，呢個確實係九巴有做到嘅，但係當--即係我哋衍生番後邊嘅問題，就係話因為當你真係喺嗰個工作環境裏面去畀人哋辱罵嘅時候，呢啲即係話就靠我哋點樣去推廣，即係喺嗰個部分裏面做得好啲，令到嗰個問題產生出嚟。呢個九巴一向都有做嘅，但係問題就係只可以咁講，喺一個模式上係做晒嘢嘅，但係問題當你真係要去面對呢啲咁嘅壓力嘅時候，其實係可以再加一啲培訓都 okay 嘅。即係成日都講從新出發，係咪？都用--叫我哋要用魔術嘅語言去應對，但係好多時就係因為--即係其實都有啲離地，有時現實同埋...

黃女士：（經傳譯員）葉女士，我哋明白你嘅論點。或者而家講...

主席：（經傳譯員）或者你再講之前，你自己個人有冇畀乘客辱罵過呢？

葉蔚琳女士：辱罵又試過，打都試過。

主席：（經傳譯員）你有冇報告番呢啲事情呀？

葉蔚琳女士：都有嘅，因為當時都有報到警嘅，但係就因為架車冇鏡頭，所以後尷嗰個客用咗律--即係請咗律師去打，後尷就嗰個客就無罪釋放。

主席：（經傳譯員）即係你講係話畀人打嗰個情況，係咪呀？即係你有報告你畀乘客打？

葉蔚琳女士：有報警。

主席：（經傳譯員）然後導致有人被拘捕，跟住被檢控，跟住有審訊，跟住佢就係無罪釋放，係咪呀？你頭先講，係咪咁嘅意思呀？

葉蔚琳女士：係，係。

主席：（經傳譯員）係幾時呢？

葉蔚琳女士：應該係兩年前，如果冇記錯。

主席：（經傳譯員）肯定你都會記得個日期，因為畀--喺返工時候，因為巴士司機返工畀人打，應該都會記得個日期嘅，係咪呀？係幾時呀？

葉蔚琳女士：我唔係好記得，我或者後尷再補番畀你，好唔好？

主席：（經傳譯員）係，好呀，請你事後畀番我哋。係喺邊個法庭嗰度審㗎，呢單案？

葉蔚琳女士：觀塘法庭。

主席：（經傳譯員）希望你只係有一次呢個被襲擊嘅情況，係咪？

葉蔚琳女士：係。

主席：（經傳譯員）畀辱罵，語言辱罵呢，有幾多次畀人係辱罵過呢，只係乘客辱罵你呢？

葉蔚琳女士：喺未呢一次嘅--即係我哋月薪車長成立之前，係經常性，之後可以講，一次都冇。

主席：（經傳譯員）之前係幾常發生呀？

葉蔚琳女士：時常發生，每日都會發生，只要譬如交通有啲擠塞，或者嗰日因為唔夠車長而收車，個時間本應二十分鐘一班車，變咗三十分鐘，嗰啲客就會好躁，就會變到，就會好嬲，佢哋就好多時會將嗰一啲怨氣就發泄喺我哋身上。

主席：（經傳譯員）呢啲被辱罵嘅情況，你有冇向九巴報告呀？

葉蔚琳女士：其實都成為我哋工作嘅一部分，我哋好少會因為咁樣而去報畀上司聽，即係我哋其他嘅同事都係自己承受。

主席：（經傳譯員）你可唔可以嘗試直接答問題呢？你有冇報告呢？

葉蔚琳女士：冇。

主席：（經傳譯員）唔該。黃大律師。

黃女士：（經傳譯員）你可唔可以講畀我哋聽嗰次襲擊嘅事件喺邊個位置發生？

葉蔚琳女士：喺呢個長沙灣遊樂場嗰個站嗰度。

黃女士：（經傳譯員）係喺巴士上面打你吖，定係喺巴士站附近呢？

葉蔚琳女士：喺當時我駕駛緊，喺駕駛嗰個巴士位嗰度被--受襲嘅。

黃女士：（經傳譯員）即係巴士行緊嘅當時？

葉蔚琳女士：停緊燈。

黃女士：（經傳譯員）請你可唔可以睇九巴文件冊第 1 冊，應該係 97 號個案。

主席：（經傳譯員）有冇頁數呀？

黃女士：（經傳譯員）214 頁，214 頁。

葉蔚琳女士：係呀，呢度，九...

黃女士：（經傳譯員）97 號個案，呢度就有提到葉女士揸緊 238X，就係 2016 年 9 月 29 號嘅事件，你右臂受傷，係咪講緊呢次事故呀？

葉蔚琳女士：係，係，冇錯嘅。

黃女士：（經傳譯員）下一個題目我想講嘅，就係喺你嘅文件--陳詞裏面，你提到好

多--即係話帶病駕駛嘅問題，就話好多司機--我係複述你講㗎喇，你話因為工作時間好長，所以日積月累，漸漸令到佢哋身體健康都受到影響，但係佢哋就唔敢貿然請病假，因為佢哋要考慮到嗰個評核獎金。我就想問，我哋知道九巴將嗰個良好服務嘅獎金同埋安全獎金就合併咗入去個月薪嗰度嘅，關於話呢個評核獎金呢一點，我就想探討一下，其實呢點可能係咪都唔係咁相關呢？因為而家已經係將個安全嘅獎金同埋表現獎金都加咗入去嗰個--包括咗入去個月薪裏面，所以呢點係咪仲係成立呢？係咪仲係？

葉蔚琳女士：其實呢個係兩個部分嚟嘅，你頭先嗰個安全獎同埋嗰個--另外一個評核--即係嗰個另外嗰個服務獎同埋嗰個安全獎，擺落去底薪嗰度，係咪？之前嗰度，其實呢個係--我哋講嗰個評核係第二個部分嚟嘅，係另外一個獎金嚟嘅，係同呢個唔相關，但係呢個已經--九巴而家已經解決咗，就係話由今--將會嚟緊就係話會將呢個評核取消，就可以唔需要因為你唔返工而冇咗呢個獎金，而家喺現階段嚟講，九巴即係講好明確咁樣已經表示會取消，嗰個錢亦都出咗畀我哋，係多過之前嗰個錢添仲，呢個已經處理好咗嘅。

黃女士：（經傳譯員）葉女士，你之前講過因為一個好有經驗嘅同事喺呢個工程部方面就面對咗一啲日常嘅困難嘅，呢啲嘅問題同安全有冇關㗎？

葉蔚琳女士：一定有直接關係喇，係呀。

黃女士：（經傳譯員）我可唔可以請你嗰個同事係表達呢一啲嘅問題點樣同安全有關嘅？

主席：（經傳譯員）其實喺你個陳述書裏面有冇提到嘅呢，呢一點？

葉蔚琳女士：即係而家意思講話去表達工程部嘅問題，係咪咁嘅意思？

黃女士：（經傳譯員）你個好有經驗嘅工程部嘅同事，你話佢係面對一啲嘅問題，有冇喺你個陳述書裏面有提到嘅呢？

葉蔚琳女士：關於--冇提到，係，呢個佢可以解說一下嗰個問題，好簡短嘅啫。

黃女士：（經傳譯員）呢個係咪第 2 點呢？

陳智輝先生：第 2 部分？

黃女士：（經傳譯員）就係話冇用原廠嘅零件嘅，係咪原廠零件呢個部分就係呢？

陳智輝先生：係，冇錯。

黃女士：（經傳譯員）你可唔可以簡單介紹下呢個問題係乜嘢？

主席：（經傳譯員）係咪喺陳述書有冇講？

黃女士：（經傳譯員）除咗喺呢度寫嘅嘢之外，你有冇補充呀？

陳智輝先生：大部分都係--零件缺貨呢個問題最嚴重，就之前採購部就未有問題之前，啲零件就好少話缺貨嘅，但係唔清楚佢哋個部門發生咗咩嘢問題，到到而家呢一刻都好多零件都仲係缺貨嘅，我哋想要嗰件零件都係冇嘅，試過曾經有一段--即係每年都會有一段時間，佢就 brake 喉佢係冇貨嘅，就到冇貨，跟住每間廠就會有流動資金，個流動資金用完之後，就開始搵管理層搵錢過去隔籬工廠大廈嗰度搵啲啤喉嗰啲公司製--即係整--買啲零件返嚟。

主席：（經傳譯員）你其實係咪講緊一啲零件係唔夠或者缺乏，以前就係有存貨嘅，而家就冇存貨，係咪咁嘅意思呢？

陳智輝先生：唔會有短缺，佢係--即係我哋隨時要用嗰陣時都可以搦到嚟用，我哋係正常 check 咗件零件，發現有問題，跟住就去開單，張單去到士多嗰度，跟住就畀零件我哋嘅，就近排就開始應該有一、兩年就要嗰件零件，跟住士多供應唔到畀我哋，就曾經有 brake 喉呢單嘢出現過。

主席：（經傳譯員）你講嗰啲士多係你係講緊係九巴裏面嘅士多？

陳智輝先生：係，係，九巴入面嘅士多。

主席：（經傳譯員）你知唔知個問題出喺邊？係咪因為九巴就係唔足夠嘅存貨呢？還是係個供應商佢哋唔能夠去供應呢，即係接到單之後？

陳智輝先生：之前我哋有個採購部，佢撳個電腦就開始--見到有嗰件零件開始冇喇，跟住就會提早落單，可能唔知佢嗰邊發生咗啲咩嘢問題，跟住零件開始少，跟住我哋都開始覺得有啲問題，到到提出已經太遲，因為佢一批批車咁樣返嚟，我哋要嗰件零件就冇。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）葉女士，之前有人講過證供，就係話九巴喺其中一個文件就咁講嘅，就係一啲背景資料文件，就係向立法會發出嘅，就同呢個 2018 年 2 月嘅事件，就喺 7 月 25 號交通事務委員會嘅會議嘅背景資料文件，我哋睇番第 15 段，呢度就咁講，...

主席：（經傳譯員）呢個係咪喺我哋嘅文件夾度呢？

黃女士： No, that's the bundle referred to by the previous...

主席：（經傳譯員）我哋可唔可以加入個文件冊嗰度呢？

黃女士：（經傳譯員）係。

葉蔚琳女士：我有，我有，我有。

黃女士：（經傳譯員）睇到。而家喺個螢幕上面見到嘅，個英文就咁講嘅，中文就係「九巴表示就係無論全職或者兼職嘅，巴士車長如果未有行駛某路線一個月或

者更長時間，就需要再次練習行駛該路線。」葉女士同埋其他幾位，你可唔可以話畀我哋聽有冇咁樣做過呢？有冇呢個安排呢？如果就係話如果巴士車長佢冇揸過某個路線一個月或者更長時間，佢就會再次就住呢個路線就要再進行練習行駛嘅？

葉蔚琳女士：坦白講，我所認知嘅嘢就係話基本上如果我哋兩年之內冇揸過呢條路線，即係譬如我未揸過，兩年都冇嘅話，就需要重新再去--而家嘅制度就係話要重新去師傅訓練，但係以往一路以來--即係我自己個人嘅認知，就係話兩年，你話一個月唔揸就要再去培訓，就應該冇聽過。

鄭凱耀先生：或者我補充一下，佢其實個制度就係你 train 咗一條線之後，你兩年內 keep 住一路有運作呢，就佢就一路都會有機會畀你做番呢條線，如果你兩年都冇做過呢條線，佢哋就所謂會--嗰個電腦會冇咗呢條線嘅 record 咁樣嘅，但係我想 for example，舉一個例子，就係我假設做咗一條 49X 嘅線，做咗一年，我如果手頭我自己個電腦有另外一條 47X 嘅線，我一路都係同一時間 train 嘅，但係我就冇做，我做咗一年 49X，之後可能一年後，佢突然有一日就會叫你去做呢個 47X 嘅，其實可能你已經係成年冇接觸過 47X 呢條線嘅，甚至乎呢條 47X 有--即係中間可能啲站、啲路線有更改，其實你係完全唔知嘅，但係佢可能就會即刻叫你去--第二日就去開工嘅，其實呢個係存在一個隱患嘅問題，根本係完全唔知道條線有甚麼更改嘅。

主席：（經傳譯員）你係咪講就係話就個電腦嘅系統，如果話你兩年冇揸到嘅時候，你就喺相關嘅電腦嘅紀錄會係刪除嘅，係咪咁樣呀？

鄭凱耀先生：係嘅。

黃女士：（經傳譯員）葉女士，你就講過就喺屏幕上面就冇翻譯到，如果你話冇揸一條線係兩年，你就係需要再培訓嘅，但係之前就冇一個咁嘅要求，你嘅意思話「之前」係咩嘢意思呢？

葉蔚琳女士：即係我未試過話你頭先所描述嘅，就係話如果你冇揸一個月就要再培訓，即係冇聽過呢個事。

黃女士：（經傳譯員）講關於兩年，呢個要求係幾時開始㗎？

葉蔚琳女士：一路以嚟都係咁嘅制度嘅，係呀，即係我入嚟到而家都係--即係話如果你兩年都冇--即係我哋之前可以「跟薦」㗎嘛，係咪？唔係淨係訓練，都係一樣嘅形式嘅，總言之你去「跟薦」或者你去訓練咗之後，而兩年，你中間冇揸過呢條路線嘅話，佢自動就會清洗咗，就等於冇嘅。

黃女士：（經傳譯員）葉女士，你有冇開特別更或者普通更㗎？

葉蔚琳女士：我係一更車，普通更。

黃女士：（經傳譯員）有冇呢度出席嘅人士，你係揸特別更嘅呢？

甄建明先生：有嘅，係。

黃女士：（經傳譯員）甄先生，唔該。你可唔可以講一講關於呢個特別更嗰個經驗呢？我哋聽過就係話有一啲嘅車長佢哋喺九巴底下去揸特別更嘅，佢哋就每三個小時嘅連續嘅休息時間嘅，係冇嘅，你自己嘅經驗係咪咁呢？

甄建明先生：係。

黃女士：（經傳譯員）可唔可以話畀我聽你係揸邊條線㗎？

甄建明先生：其實我係揸大約十條線左右喇，但係佢每一條線都唔係淨係揸嗰條線嘅，就會俗稱我哋所謂嘅「做 order」，通常都係揸三條線嘅一日。

黃女士：（經傳譯員）你揸咗呢個特別更幾耐呀，喺九巴？

甄建明先生：大約應該係三年左右喇。

黃女士：（經傳譯員）你係返早更定係晚更嘅呢？

甄建明先生：特別更就只有一個更嘅啫，就係早更。

黃女士：（經傳譯員）你可唔可以話畀我哋聽你幾時開始--即係幾--如果--每一日特別更係通常係幾點鐘開工㗎？

甄建明先生：通常都係六點幾至到七點幾呢個時間嘅。

黃女士：（經傳譯員）即係 6 點至到 7 點--晚上 7 點？

甄建明先生：大約係呢個時間，六點...

主席：（經傳譯員）你上一次係--對上一次揸特別更係幾時呀？係咪琴日呢？

甄建明先生：係。

主席：（經傳譯員）你住喺邊㗎？

甄建明先生：我住喺旺角。

主席：（經傳譯員）你通常要幾點鐘起身嘅呢？

甄建明先生：（經傳譯員）5 點鐘。

主席：（經傳譯員）然後你去邊呀？

甄建明先生：跟住起身，即係做咗自己應該要做嘅嘢，就出門口返工。

主席：（經傳譯員）你幾點鐘出門口㗎？咁琴日呢？

甄建明先生：6 點鐘，6 點鐘出門口。

主席：（經傳譯員）你會去邊㗎？

甄建明先生：我會返去巴士廠。

主席：（經傳譯員）喺邊度㗎？

甄建明先生：青衣島嘅巴士廠。

主席：（經傳譯員）你通常點樣去嗰度㗎？

甄建明先生：我會搭街車，即係我哋公司嗰啲頭班車，然之後再去到青衣某一個位，再轉一架叫做工程車嘅，就會車我哋去巴士廠。

主席：（經傳譯員）你琴日就去到邊度嘅車廠呀？

甄建明先生：都係青衣廠。

主席：（經傳譯員）你係打卡嘅時候係幾點鐘㗎？

甄建明先生：7點鐘。

主席：（經傳譯員）你打完卡之後，你就做乜嘢呀？

甄建明先生：跟住就搵番自己當日要駕駛嗰架巴士。

主席：（經傳譯員）你係咪就會檢查下架車嘅呢？

甄建明先生：Yes, sir.

主席：（經傳譯員）係嘅，你然後係咪揸架車去邊度呀？

甄建明先生：然之後我揸架車去長亨巴士總站。

主席：（經傳譯員）幾點鐘離開青衣呀？

甄建明先生：7點20分。

主席：（經傳譯員）你幾點去到你嘅目的地呀？

甄建明先生：7點30分。

主席：（經傳譯員）幾點鐘開始揸嗰條巴士線呀？

甄建明先生：7點45分。

主席：（經傳譯員）你嗰條係咩嘢路線呀？

甄建明先生：X42號C。

主席：（經傳譯員）嗰條路線會去邊㗎？

甄建明先生：去到油塘巴士總站。

主席：（經傳譯員）你係咪就係朝早就係去油塘，然後返嚟去油塘咁呢？

甄建明先生：唔係。

主席：（經傳譯員）話畀我聽你做咗啲乜，琴日？

甄建明先生：去到油塘巴士總站之後，跟住我就應該係用私家牌，就即係一架冇裝客嘅車，就再去番荃灣嘅愉景新城就做42號M。

主席：（經傳譯員）即係由油塘，你就去荃灣，然後就揸另一條路線，係咪？

甄建明先生：係。

主席：（經傳譯員）嗰條路線係咩嘢話？

甄建明先生：42號M。

主席：（經傳譯員）去邊呀？

甄建明先生：去長宏巴士總站。

主席：（經傳譯員）之後呢？

甄建明先生：我做一條線係做兩轉車，即係一來一回兩次嘅。

主席：（經傳譯員）即係荃灣同埋長宏之間，係咪？

甄建明先生：係。

主席：（經傳譯員）然後之後係咪休息呢？

甄建明先生：係。

主席：（經傳譯員）幾點呀休息？

甄建明先生：應該係十二點半嗖。

主席：（經傳譯員）個休息時間幾長呀？

甄建明先生：個休息時間去到下午3點20分。

主席：（經傳譯員）喺邊度開始休息呀？

甄建明先生：其實佢就冇話邊度開始休息，而係佢會畀一個我指定嘅泊車地點，我就擺低部車，就當我開始休息㗎喇。

主席：（經傳譯員）你將架車擺喺邊度？

甄建明先生：青衣機鐵站。

主席：（經傳譯員）休息嗰段時間你做乜嘢呢？即係兩個鐘頭十五分鐘。

甄建明先生：Lunch 同埋一個午睡。

主席：（經傳譯員）喺邊度午睡呀？

甄建明先生：喺長安巴士總站入面有一個休息室。

主席：（經傳譯員）嗰度有啲咩嘢設施可以畀你午睡呀？

甄建明先生：嗰度有四張梳化，可以--其實可以瞓到一個短嘅午睡。

主席：（經傳譯員）有梳化，係咪呀？

甄建明先生：有。

主席：（經傳譯員）仲有幾多個車長當時同你一齊共用呢個設施呢？

甄建明先生：兩位。

主席：（經傳譯員）一旦你喺 3 點 20 分開始開車，又去邊度呢？揸邊條線呢？

甄建明先生：我係 3 點 35 分開始開車，因為我 3 點 20 分係要攞番部車落去站頭嗰度嘅，我 3 點 35 分開車係做 41 號 A，就係由長安巴士總站就去尖沙咀東部嘅。

主席：（經傳譯員）之後呢？

甄建明先生：之後再返轉頭，即係再去番長安巴士總站。

主席：（經傳譯員）係喇。

甄建明先生：然之後做多一轉同樣嘅路程。

主席：（經傳譯員）係咪跟住就到你收工呢？

甄建明先生：係喇，Yes。

主席：（經傳譯員）係幾點呀？

甄建明先生：8 點 50 分，晚上嘅 8 點 50 分。

主席：（經傳譯員）你喺完成你嘅工作時候喺邊度㗎，嗰陣時？

甄建明先生：我哋完成工作之後，要將架巴士揸番去巴士廠入油，然之後擺低部車，就完成當日嘅工作。

主席：（經傳譯員）你係指巴士，係咪呀？

甄建明先生：係。

主席：（經傳譯員）你做晒呢啲係幾點鐘呀？即係你入埋油咁做晒喇。

甄建明先生：9 點鐘。

主席：（經傳譯員）之後你做乜嘢呢？

甄建明先生：之後跟住就搭工程車返番出去市區，再轉車返屋企。

主席：（經傳譯員）幾點鐘返到屋企呀？

甄建明先生：九點八左右。

主席：（經傳譯員）即係話你嗰日係 6 點鐘開始--朝早 6 點開始，你開始出門口，然後就去到 9 點 40 分晚上就完成嗰日，啱唔啱呀？

甄建明先生：係。

主席：（經傳譯員）係講琴日，係咪？

甄建明先生：係。

主席：（經傳譯員）今日你休息，係咪？

甄建明先生：係。

主席：（經傳譯員）好，唔該。

黃女士：（經傳譯員）甄先生，你話你過去三年都係揸特別更，啱唔啱？或者分更喇叫做。

甄建明先生：係。

黃女士：（經傳譯員）嗰三條路線係咪過去三年都係揸呢三條路線，抑或仲有其他唔同嘅路線呢？

甄建明先生：有其他唔同嘅路線嘅。

黃女士：（經傳譯員）係咪經常都需要揸三條唔同嘅路線呢，同一日裏面？

甄建明先生：係。

黃女士：（經傳譯員）你喺九巴做咗幾耐呀？

甄建明先生：我喺九巴做咗三年半左右。

黃女士：（經傳譯員）即係喺呢段時間，你一路都係揸特別更？

甄建明先生：係。

黃女士：（經傳譯員）你有冇試過遇到交通意外呀？

甄建明先生：暫時冇。

主席：（經傳譯員）做得好。

甄建明先生：（經傳譯員）多謝。

黃女士：（經傳譯員）有冇試過畀人打或者係辱罵呢？

甄建明先生：日日都有畀人辱罵。

黃女士：（經傳譯員）畀人打呢？

甄建明先生：畀人打，冇。

主席：（經傳譯員）有冇向公司報告過有畀人辱罵？

甄建明先生：冇。

主席：（經傳譯員）點解唔報告呢？

甄建明先生：因為公司根本都知道。

主席：（經傳譯員）有冇採取啲咩嘢步驟去幫你哋面對呢啲辱罵呢，即係作為車長？

甄建明先生：你講公司，係咪？

主席：（經傳譯員）Yes. Yes.

甄建明先生：冇，冇。

主席：（經傳譯員）你揸嗰架巴士有冇--即係個攝錄機係影住個巴士司機個位嘅呢？

甄建明先生：有啲有--有時有，有時冇，因為我日日都係揸唔同嘅巴士，揸唔同嘅路線，所以就有啲舊車就冇，有啲新車就有。

主席：（經傳譯員）有攝影機嗰啲係咪亦都唔係淨係影到個影像，仲有埋錄音嘅，係咪？

甄建明先生：以我所知，有啲係有錄音，因為我見到有啲係有個咪收音嘅。

葉蔚琳女士：我想補充一下，就係法官頭先話可以有咩嘢幫到我哋呢個問題，就係話其實我哋喺我哋嗰度已經提到一樣嘢，就係話因為我哋要求就係我哋本身自己車長可以自行安裝 car cam.，因為點解有咁嘅元素喺度呢？因為公司其實有好多車有啲部分有車 cam.，有啲冇，但係當我哋有事發生嘅時候，好多時或者警方向公司攞嗰個錄影嘅時候，「冇呀」咁樣，即係唔知點解冇。

但係為咗保障我哋自己人身嘅安全，亦都其實安裝鏡頭，其實令到乘客可以有一個即係話警覺性，即係話「會可能畀人睇到」，通常佢哋就會好精嘅，你有鏡頭，佢哋就會冇咁--會收斂好多，我哋所以都強烈要求，其實我哋都唔

係話希望公司去幫我哋安，而係希望可以畀我哋車長可以亦都喺未完成實施呢個全面嘅安裝即係巴士裏面每一架都有嘅嘅情況。

同埋嗰個制度完善，即係話你最少有個鏡頭，但係真係錄到出嚟，可以攞到出嚟舉證...

主席：（經傳譯員）請你等一等，葉女士，請你慢啲，慢慢，好似你揸巴士咁慢慢。

葉蔚琳女士：知道。

主席：（經傳譯員）公司對於你哋嘅要求嘅回應係點呢？即係話容許你哋自己安裝攝影機呢點--攝錄機？

葉蔚琳女士：如果發現我哋車長安裝車 cam.呢，我哋係要受到呢個即係處分。

主席：（經傳譯員）你有冇試過書面寫呢個要求畀公司呀？

葉蔚琳女士：冇。

主席：（經傳譯員）點解冇呢？

葉蔚琳女士：你覺得你喺申訴或者你去講嘅時候，即係冇用，你就唔會去做，即係我哋冇咗一種信任，覺得佢連安都唔畀你安，仲要罰你嘅，你諗下你叫佢畀你安係咪都幾搞笑？如果你係九巴嘅高層，我哋咪好開心囉，即係可以有道理可以講。

主席：（經傳譯員）你知唔知？或者如果你唔知，就請你咁講，你知唔知點解車長如果裝咗自己嘅攝錄機會畀公司處分呢？公司有冇解釋過點解呢？

葉蔚琳女士：私隱問題，佢話。你可以講。

鄭凱耀先生：係，私隱問題囉，最主要係。

主席：（經傳譯員）佢哋係咪書面特別咁樣提到講畀你聽嘅呢？

鄭凱耀先生：其實佢喺嗰個培訓，我諗入職嗰陣時，佢導師都會略略同你有機會講過呢樣嘢，就叫你唔好裝啲 cam.呀，因為公司...

葉蔚琳女士：有出通告。

鄭凱耀先生：係喇，或者佢各種渠道都會叫所有前線車長唔好裝呢啲，因為私隱問題牽涉到。

葉蔚琳女士：同埋曾經就係話呢個係屬於非法改裝，如果我哋加車 cam.，佢會當我哋係非法改裝。

陳智輝先生：即係架車原本批 approve 嗰度冇呢件零件，你再外加落去，佢就當你非法改裝。

黃女士： When was this circular issued?

主席：（經傳譯員）唔好咁快住。你話有發過通告，係咪呀？可唔可以畀嗰份通告畀我哋呀？

葉蔚琳女士：因為要--出咗，通常我哋睇完就好少會留底。

陳智輝先生：唔係，基於係內部文件，我哋係唔可以公布出嚟，公司係有啲受控文件。

主席：（經傳譯員）我哋就好快就會九巴畀證供，我哋都會問佢同一個問題嘅，如果係咁，點解你唔可以提供呢份文件畀我哋呢？等我哋知道嗰個情況，解釋畀我哋聽？

葉蔚琳女士：因為一般即係...

主席：（經傳譯員）可能係有好好嘅理由點解佢哋唔容許你咁做嘅，我哋只不過係想去搵出個事實啫。

葉蔚琳女士：因為我哋內部有啲文件，譬如我哋行車嘅時間，公司都視為一個機密嘅，所以本應我--因為本身我哋今次原本想將我哋行車時間嘅困難或者個時間唔夠都希望交畀法官去...

主席：（經傳譯員）如果係咁，我哋會直接問九巴。好，黃大律師。

葉蔚琳女士：多謝。

黃女士：（經傳譯員）你可唔可以話畀我聽呢個嘅通告大概係幾時發出嘅呢？

葉蔚琳女士：一年前嘅。

黃女士：（經傳譯員）你就話如果你自己裝置呢個攝錄機，你就會係被處分嘅，邊個咁樣講㗎？你可唔可以話畀我哋聽係邊個人去講話「如果我哋裝置呢個攝錄機，我哋就被處分㗎喇」？

葉蔚琳女士：因為通常我哋車長，公司會召見我哋或者有啲我哋違咗規嘅事情嘅時候，佢會畀一張--嗰張叫咩嘢紙？即係畀一張紙仔我哋，一張通告，即係一個便條咁樣，即係話明畀你聽因為咩嘢事咁樣而去召你上去見高層咁樣，所以喺個通裏面有時有啲會員即係之前就 send 過一啲咁嘅上嚟，所以我哋就會知道原來係咁樣嘅。

黃女士：（經傳譯員）你可唔可以提供你頭先提過嗰啲嘅文件呢？嗰啲就唔係公司嘅文件，呢個係你哋嘅...

葉蔚琳女士：公司，公司，公司發出畀我哋嘅一個文件。

黃女士：（經傳譯員）係呀，係呢一個嘅九巴公司係發畀啲車長嘅。

葉蔚琳女士：係。

黃女士：（經傳譯員）佢哋喺嗰啲信件之中，有冇講話如果你係裝置啲攝錄機，你就會受到處分，會唔會好清楚咁講明呢？

葉蔚琳女士：通告裏面有寫嘅。

黃女士：（經傳譯員）我就可唔可以咁假設呢，就係話你哋嘅工會就會係贊成我哋係裝置一啲嘅監察攝錄機，可以係有影像，有聲音可以記錄喺巴士上面發生嘅事情，你哋會唔會支持呀？

葉蔚琳女士：好，支持。

黃女士：（經傳譯員）最後一個題目，葉女士，運輸署就畀過我哋一個嘅資料文件，就係話因為工作小組佢哋進行咗--喺 2018 年 3 月中就進行咗研究嘅，嗰啲工作小組就係有成員係包括呢五個嘅專營巴士公司同埋三個嘅巴士廠，佢哋就係有一啲建議，就係有三個範疇嘅，首先就係安全帶，第二就係關於一啲科技嘅裝置，第三就係關於車長嘅培訓。運輸署就最近話畀我哋聽佢哋最近就係有發出關於係巴士車長嘅一啲嘅指引嘅，九巴有冇諮詢到你哋嘅聯盟呢，有關於呢個嘅培訓指引呢？

葉蔚琳女士：冇。

黃女士：（經傳譯員）佢哋有冇畀一份你呀？就係由運輸署發出嘅實務守則，關於培訓嘅。

葉蔚琳女士：從來冇收過。

黃女士：（經傳譯員）我想問一問你就你哋聯盟就對於一啲嘅科技嘅裝置有啲咩嘢嘅意見，首先第一個就係 TD-1 第 1 號文件第 403 頁，我哋係第 4(a)段，就係關於電子穩定控制系統嘅，你哋嘅聯盟會唔會支持係使用呢一個咁樣嘅系統呢？

葉蔚琳女士：其實喺呢個車內安全裝置呢幾部分裏面，去到(a)、(b)、5、6 嗰度，以及第 3 頁嗰個(a)嗰個系統，我哋經過我哋理事嘅研究之後，都覺得呢個係非常之好嘅。

黃女士：（經傳譯員）關於安全帶方面呢？喺所有嘅乘客座位，喺所有巴士上裝安全帶。

葉蔚琳女士：其實有安全帶一定係一件好事嚟嘅，但係衍生有一個問題，就係話會唔會如果安全帶損毀咗，其實巴士應唔應該繼續行車呢？或者我哋巴士司機有冇一個責任去確保每一個乘客受到安全嘅保障，去睇住佢哋有冇去處理好？或者有啲老人家佢哋需要幫助嘅時候，其實呢個衍生嘅問題我哋有少少擔心嘅。你話總括嚟講，其實安全嘅嘢有就肯定好過冇嘅，但係衍生喺一個現實裏面，每一日上落客咁多，或者我哋要確保嗰個安全就係話其實你確保每一個位，你一定要唔好損壞先得，你有一個問題嘅時候，你就會令到人哋會有危險，呢個責

任上即係其實都好多嘢慢慢上嘅，但係方向係好嘅，但係嗰個現實可以推行嘅係比較困難啲咁樣。

黃女士：（經傳譯員）你有冇機會睇過文件上面關於車長訓練嗰一部分呢？就係第 18 段至到第 22 段嘅。

葉蔚琳女士：呢度我哋都有略略係已經睇過嘅，但係就係話佢呢度係一個比較全面啲，即係話唔係好細緻知道佢想要啲究竟咩嘢培訓，其實方向都係好嘅，總言之多就梗係好過少㗎喇，但係即係話佢呢度我冇睇到佢有好實質有效地喺我哋日常生活當中遇到嘅車長嘅問題，要培訓，我哋應該係儘量去留意啲乜嘢，呢度就冇提到，所以就比較遺憾啲咁樣。

黃女士：（經傳譯員）多謝葉女士，我已經係完成我嘅提問。

歐陽先生：（經傳譯員）我有一個跟進嘅問題，甄先生同埋葉女士，你頭先提過就關於每一日你哋都係有遇到一啲辱罵嘅情況，你就兩個都講到就話「其實都冇用嘅，即係向呢一個管理層報告。」你可唔可以講清楚少少畀我哋聽有咩嘢邏輯呢？你唔會報告係因為你覺得管理層係唔會做嘢，還是佢哋做乜嘢嘢都冇幫助嘅，可唔可以解多少少畀我哋聽呢？唔該晒。

鄭凱耀先生：不如咁喇，因為其實好老實講，每日遇到呢啲辱罵嘅情形，我會用四字詞形容「司空見慣」，點解會咁呢？因為--點解會導致呢啲情形呢？就係因為--即係大家都知香港地生活壓力大，其實個個人都好焦急嘅，尤其是如果我哋現行呢一行行業咁缺乏人手，基本上收車或者街道繁忙、塞車啲情形已經係太常見，變咗好多乘客都有陣時佢嘅預算嘅時間達到唔到嗰陣時，佢就會將頭先即係之前都一路講緊，會將佢嘅怨氣發泄喺我哋前線嘅人員身上，所以其實根本上所有呢一行嘅行業嘅公司，我諗所有嘅管理層都好清楚嗰個情形。

基本上太多太多，你每一條線、每一個人都有呢啲情形，講真，你個個去 complain，去同管理層反映，基本上佢都唔會理你，因為佢哋都解決唔到。

陳漢華先生：有多一個小小嘅事例可以提供番，早前有啲會員就都曾經畀乘客辱罵過嘅，亦都當場向番我哋公司嘅管理組反映番個問題，部巴士就停喺當時嘅馬路上面，乘客亦都會喺巴士--即係嗰個辱罵車長嗰位乘客都會喺車上面等候警方嘅處理同埋公司嘅處理。公司嘅處理手法基本上都係大事化小，小事化無，叫個車長息事寧人，繼續行車可以喇。

葉蔚琳女士：因為點解...

主席：（經傳譯員）好，請等一等。

葉蔚琳女士：因為點解，你頭先講「你唔試過，點解你會知道冇用呢？」因為好多時我哋每一日經歷嘅嘢，同埋有好多時公司會有一個表現管理組，因為有啲客佢會投訴你，我哋就去講番事發嘅經過，可能佢企個位唔啱，即係誤會發生，通常公司都係一句「你小心啲喇，你留神啲喇。」咁樣，其實即係實質嘅幫助係

幫助唔到，你諗下我連畀人打，受傷，到最後都因為種種嘅原因，所以你會睇到就係話其實冇人幫到你，同埋我哋都已經係當咗係我哋嘅工作一部分。

主席：（經傳譯員）嗰個警察都有幫你，佢有逮捕一個人，佢哋有起訴佢等等咁樣，亦都有檢控等等，都有人幫你㗎。

葉蔚琳女士：係呀，但係就如果公司法律部門或者各方可能都會支援一下，可能個事情就會好好多，其實當時嗰啲警察都好靚，即係舉證唔到，因為其實醫生嘅報告、所有嘅嘢，但係就係因為冇嗰個實質嘅證供，因為通常香港人就係一話要去法庭，就閃晒，啲證人就唔肯去舉證。如果有個 cam.嘅話，其實即係好多嘢都可以解決到，所以點解我哋成日都講希望有 car cam.可以保障到我哋，或者亦都可以令到乘客都可以有個保障，我哋就算有咩嘢鬧咗佢或者做得唔好嘅，佢都可以就有一個反證，即係咁樣，同反監察我哋，係喇。

主席：（經傳譯員）好，唔該晒。

羅先生：（經傳譯員）仲有一個跟進嘅問題，就關於係嗰十八日嘅培訓，佢哋有冇訓練你點樣去處理一啲辱罵嘅呢？就佢哋會唔會話叫你唔好出聲還是係叫你報告，即係喺個培訓嘅時候有冇提到呢啲，做呢啲嘅培訓嘅呢？

葉蔚琳女士：通常佢哋好流行一句說話，就係魔術語，即係叫你運用一個語言嘅技巧，但係當你即係話每一日去行車嘅時候，連廁所都冇得去，你喺架車度其實即係講真，心情已經好難受，跟住仲要一上嚟，即係等得車耐，就問候你娘親，不由分說，又會可能會話「你啲車長係咪死晒呀？」咁樣，即係你因為其實好多嘢係配合嘅，如果可能我哋嗰個休息時間多啲，可能我哋嗰個處理嗰個情緒問題會好啲，因為其實係一路好多問題衍生出嚟，唔係話淨係話一點位嘅。即係如果我哋有足夠嘅休息時間，個精神好啲，處理嗰個 EQ 可能又會高啲，所以其實好多嘢我哋希望逐步去改善，令到大家嘅關係好啲咁樣。其實有做到嘅公司，但係實質上喺個現實裏面唔係好有成效。

主席：（經傳譯員）你覺得係咪有啲--就係巴士車長係特別係有人辱罵，還是電車或者係其他嘅交通工具嘅車長，佢哋有冇啲咁嘅情況，還是佢哋特別針對巴士嘅車長呢？

葉蔚琳女士：因為電車就基本上喺佢嗰條路嗰度就基本上好少有塞車嘅情況嘅，即係有失班嘅情況，其實我而家主要即係話市民通常同我哋產生一個磨擦或者佢哋瘟癐都係因為班次不正常，呢個問題已經纏擾咗我哋九巴係好耐，但係唔知點解解決唔到。

因為我哋就係講點解我哋--其實我哋喺嗰個出嚟呢一個--搞呢個工會就係原本就係以生命行先，即係希望能夠保障乘客嘅安全，但係其實你衍生落嚟，你會知道點解會有咁多嘅磨擦我哋同市民，我哋會經過好多大家商討嘅時候會發覺原來好多時大部分都係因為脫班，佢哋等得瘟癐，講真心，你諗下，企喺個巴士站度半個鐘頭都冇車，跟住上到去，梗係問你「喂，你啲車而家死

晒？」咁樣，咁嗰個司機又可能去到對站，佢塞咗成個幾、兩個鐘頭，佢只係得幾分鐘休息，去完廁所就要上車，你諗下當時個司機嗰個情緒嗰個處理。

其實又唔可以怪晒啲客㗎喎其實，我哋成日都講其實唔係話我哋去責怪啲乘客唔啱，而係話點解會衍生於--好似頭先法官所提問嘅好好，就係話點解淨係我哋巴士會咁，因為地鐵嘅脫班唔會好似我哋咁會冇車，只係可能一年先嗰兩、三次，我哋係每日--我可以畀一個初步嘅統計，可能之後你可以同九巴嗰度攞番個資料，係每日每一個廠基本上係有幾十部車係冇人揸，即係其實而家我哋員工嘅流失已經係去到好嚴重嘅地步，所以點解會嗰個乘客與司機嗰個磨擦會越嚟越大呢？其實好大嘅因素都係因為脫班。

其實講真心，嗰個乘客都唔係傻嘅，唔通無端端鬧你咩？都唔係咁嘅，其實佢哋都好好，但係問題就係話即係人就係有情緒，每個人都有壓力嘅時候，但係我覺得有時佢哋...

主席：（經傳譯員）多謝葉女士，我大概知道你、明白你嘅意思，我哋仲要聽多一個工會嘅證供嘅，所以好多謝你今日出席，多謝你提嘅證供同埋你嘅協助。你頭先承諾咗會提供一啲嘅文件嘅，請你就提供，我哋就而家會小休兩分鐘，然後我哋就會聽取最後嘅呢一個嘅工會嘅證供，就係兼職車長苦主大聯盟嘅，唔該晒。

下午 5 時 02 分押聆訊押後

下午 5 時 12 分恢復聆訊

出席人士如前。

主席：（經傳譯員）鄭先生同埋兼職車長苦主大聯盟嘅代表，我哋多謝你哋接受我哋嘅邀請嚟呢度提供證供協助我哋搜集資料，知道巴士個運作係點樣樣，等我哋可以作出一啲建議，確保日後巴士嘅安全。黃大律師等一陣就會問你哋問題，目的就係根據你哋嘅陳述書裏面有一啲嘅論點可能佢需要澄清或者請你再進一步解釋，如果鄭生或者你自己或者你想你其他嘅成員答問題，請你提出話請邊一位答問題，我哋都好樂意聽佢回應嘅。好，而家請黃大律師開始。

梁景裕先生：（經傳譯員）多謝倫明高法官，或者開始之前可唔可以畀兩分鐘我哋表達一下我哋嘅一啲嘅意見呢？

主席：（經傳譯員）係，當然可以，你可以作一個聲明先嘅。

梁景裕先生：（經傳譯員）多謝你時間。

主席：（經傳譯員）請記住我哋係有即時傳譯員嘅，所以你發言嘅速度請你都要講得合理啲，畀機構傳譯員可以跟到。

梁景裕先生：（經傳譯員）好，多謝各位，多謝大家今日畀時間我哋，首先兼職車長苦主大聯盟，我哋唔係一個註冊嘅工會，唔係根據工會條例註冊嘅，我哋係一班嘅兼職車長，係因為 2 月 10 號嗰宗嘅慘劇之後就組織起嚟嘅，冇幾耐之後，九巴都拒絕再同我哋聯絡，我哋都係覺得唔開心，因為嗰個意外牽涉嘅司機佢話係兼職車長，而我哋作為一班嘅兼職司機，覺得就受到其他嘅工會不當、冇基礎、失實嘅攻擊，仲有其他公眾人士都係咁攻擊我哋，就懷疑我哋嗰個工作，所以點解我哋會組織起嚟。

我哋認為兼職司機同好多全職司機一樣咁專業、咁有能力，甚至可能比佢更好。我個人就有十五年嘅兼職司機嘅經驗。我哋呢度嘅都係好有經驗、好專業嘅司機，我哋係以我哋嘅職業為傲，我哋亦都係以服務乘客為傲，所以直到而家，我哋都仲係好唔開心，因為似乎對於我哋都仲係有啲嘅偏見。

我哋睇番九巴嘅報告，就係關於話呢宗意外，佢哋向運輸署發...

主席：（經傳譯員）你係講係喺我哋網頁上面嗰個報告？

梁景裕先生：（經傳譯員）係。呢個報告就喺意外發生之後一個月發表嘅。運輸署問九巴佢哋有冇覺得喺招聘司機方面有啲咩嘢不足嘅地方嘅時候，九巴個回應就係話「我哋已經停止招聘兼職司機，係立即停止。」即係話似乎佢係暗示兼職司機係不專業、能力不足，所以對於咁樣嘅講法，我哋係非常之唔高興嘅，呢個就係我哋開場想講嘅說話。而家就交番畀黃大律師。

主席：（經傳譯員）我哋繼續之前，你可唔可以話畀我聽其實你哋係來自邊個嘅巴士公司，邊個係九巴㗎？就四個，四位係九巴嘅。

車啟冬先生： I am Long Win Bus.

主席：（經傳譯員）你係龍運嘅？

車啟冬先生： Yes.

馬景德先生：（經傳譯員）就因為呢個意外，我哋就被辭卻嘅。

主席：（經傳譯員）就係因為咁嘅意外？

馬景德先生：（經傳譯員）係呀，因為九巴就係就於兼職嘅車長就有一啲嘅準則佢要佢哋接受嘅，但係我就唔接受佢哋嗰啲嘅標準，九巴就寄咗一封信畀我，我就用電郵係覆番佢，其中一個--我都有將副本係送交畀呢一個委員會嘅，之後就我有一個喺九巴工作嘅朋友就話畀我聽我就係被九巴辭掉咗，因為佢話畀我聽冇回覆，但係其實我就已經係通過電郵回覆咗，而家我就係新世界巴士公司嗰度就做兼職車長嘅。

主席：（經傳譯員）龍運喇其中一個，你就係新世界第一巴士，另外四個就係九巴嘅，係咪？係，唔該晒。黃大律師。

黃女士：（經傳譯員）係，唔該晒咁多位，多謝你哋出席。你知道我哋嘅職責，委員會都係集中係安全方面嘅事宜嘅，特別係專營巴士嘅管理同埋營運嘅安全，所以我啲問題就會集中呢啲範疇，我希望你哋能夠明白呢一點。關於你哋個聯盟，呢個係一個面書嘅團體嚟嘅，Facebook 嘅一個團體，有超過六百個嘅成員，啱唔啱呀？

車啟冬先生：（經傳譯員）係，啱。

黃女士：（經傳譯員）我相信鄭先生就係獲一百個嘅兼職車長授權就係代表呢個嘅聯盟發言嘅，係咪？

吳振宇先生：（經傳譯員）係呀。

黃女士：（經傳譯員）呢一百個嘅兼職車長係邊幾個公司嗰度嘅車長嚟嘅呢？

吳振宇先生：（經傳譯員）有幾個公司嘅--全部都係九巴嘅。

黃女士：（經傳譯員）你係兼職車長，做咗幾耐呀，喺九巴？四個。

梁景裕先生：（經傳譯員）我係 2014 年加入嘅。

主席：（經傳譯員）但係你就做咗兼職司機十五年喎？

梁景裕先生：（經傳譯員）我之前係同其他公司做嘅。

主席：（經傳譯員）喺香港，係咪？

梁景裕先生：（經傳譯員）喺香港。

吳振宇先生：（經傳譯員）我都係。我都係 2014 年就係兼職車長嚟嘅，我就自己就係揸巴士就揸咗超過十年，包括喺海外都有揸過巴士。

黃女士：（經傳譯員）鄭先生。

張沛棋先生：我响九巴做咗三年，之前都做過其他巴士公司嘅。

主席：（經傳譯員）係咪都係香港嘅專營巴士公司呢？

張沛棋先生：專營同非專營都有。

主席：（經傳譯員）幾多年呀？

張沛棋先生：前後我 12 年開始揸巴士，之後做咗三年全職，之後做咗兼職。

鄭啟祥先生：我係 04 年响大嶼山巴第一份做兼職車長，之後就响九巴嗰度做咗四年嘅全職車長，之後再响城巴嗰度做咗兼職車長，最近就一年嘅就返番九巴做兼

職車長，而...

主席： Is there a problem with the transcription?

傳譯員： Sorry, the interpreter forgot to switch the button over to English.

主席：（經傳譯員）鄭先生，請你再重複你剛才所講嘅。

鄭啟祥先生：我第一份嘅巴士工作就係响大嶼山巴士做兼職車長，之後就去咗九龍巴士嗰度做咗四年嘅全職車長，再之後就响城巴嗰度做咗兼職車長，再之後我响九巴，而家返咗嚟九巴做兼職車長做咗一年，前前後後就十四年嘅駕駛經驗。

車啟冬先生：（經傳譯員）九巴呢，2016 年開始，就係 2016 年頭，跟住就係喺今年嘅 4 月我就轉咗去龍運巴士嗰度做。

馬景德先生：（經傳譯員）就新世界，我喺嗰度做咗五年半，就係兼職嘅，我喺九巴就係兼職做咗大概三年嗖。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）多謝你哋嘅陳述書，你就係 2018 年 4 月 22 號所作出嘅陳述書，呢個係 TU 嘅第 1 號文件，就係第 293、294 頁，翻譯就係喺 294-1 同埋 2 嗰度嘅。我就想同大家討論兩個範疇嘅，就住陳述書裏面所講嘅，第一，喺 294-1 下面嗰度講，你就話自從你哋成立之後，就兼職車長同埋全職車長應該係一視同仁嘅。你講「一視同仁」嘅意思係講緊薪酬還是係培訓方面呢，你係指緊乜嘢呢？

吳振宇先生：（經傳譯員）你可唔可以重複你嘅問題？因為我唔係太清楚。

黃女士：（經傳譯員）因為喺最底嘅部分，你就係話你哋個聯盟就一直都強調兼職同埋全職車長應該係一視同仁，你所謂「一視同仁」係指邊啲範疇呢？

主席： Perhaps you could read out more of what is asserted.

黃女士：（經傳譯員）你亦都講就話「不論喺培訓、補充訓練、提供修正訓練、錄用、要求革職嘅標準亦都係應該係一樣嘅。喺進行招聘嘅時候，專營巴士，有關考官同埋駕駛訓練嘅導師亦都係嚴格把關，挑選合適嘅考生嘅。」所以你講所謂嘅「一視同仁」係咪指喺培訓方面一視同仁，喺錄用同埋要求革職方面呀？

梁景裕先生：（經傳譯員）我就唔想話呢個係同翻譯嘅問題有關，我哋想講嘅就係兼職同埋全職嘅車長其實已經係有相同嘅培訓，我哋就提議--建議，如果可能嘅說話，所以一啲新加入嘅車長就應該有一個心理評估嘅測試，要確保佢哋可以處理一啲壓力，喺駕駛之中嘅壓力。

吳振宇先生：（經傳譯員）我亦都想補充，正如剛才我哋同工所講，我哋公司已經一直係對於兼職同埋全職車長都係提供同樣嘅培訓，對我哋嚟講其實都冇分別，但係公眾人士就係有提出唔同嘅意見、見解，就對於兼職車長嚟講，特別係，我哋覺得係好唔公平、好唔公道。所以無論係任何嘅培訓或者係一啲安全嘅措施等等，都係應該適用於所有嘅兼職同埋全職嘅車長，所以佢哋兩者之間係唔應該有任何嘅不同嘅區別嘅或者有啲區別嘅。

黃女士：（經傳譯員）關於車長，我就會睇一睇九巴嘅一個文件，就喺培訓方面，其實對於兼職或者全職車長係有啲唔同嘅，簡單嚟講，喺全職車長嚟講，佢哋係需要就接受十八日嘅培訓，每日九個半鐘，喺 KMB 第 1 號文件第 102 頁嘅。

梁景裕先生：（經傳譯員）呢個就係佢哋只係有呢個第 1 級嘅牌照或者 1 號牌照，但係對我哋嚟講，我哋已經係第 10 類牌照㗎喇已經有，所以我哋講緊係兩群唔同嘅人。

黃女士：（經傳譯員）所以係呀，我係想講呢一點。所以佢哋喺兼職同埋全職車長方面喺培訓方面真係有區別嘅，喺培訓方面係有啲區別嘅，我哋睇一睇呢個文件，我就睇下你對於我哋有一啲建議嘅睇法，我哋第 120 頁，呢度係有全職嘅車長嘅考生嘅一啲嘅要求，佢哋係需要係第 17 類嘅考試嘅測驗嘅，呢個第 17 類就係一個巴士嘅牌照嚟嘅，你係需要係通過運輸署嘅一個咁嘅測試，就同我哋喺導師嗰啲測試就唔同。

但係如果你係兼職嘅車長，如果我哋睇番 121 頁，需要嘅就係呢個兼職嘅車長係有第 10 同埋第 17 類嘅駕駛牌照，你就係兩日半嘅訓練，係每日九個鐘，你就係需要係通過個測試就得喇。

吳振宇先生：（經傳譯員）如果你有第 10 同埋第 17 類嘅牌照，你就係兩日半嘅訓練，同埋就係通過嗰個測試嘅，就係由導師去做嘅測試。喺九巴，我哋係有一個內部嘅測試嘅，如果你通過唔到，佢哋就唔會請你，即使你有第 10 同埋第 17 類嘅牌照。

其實呢個要求係對於呢個全職嘅車長嚟講，更加高嘅，葉女士就頭先講，佢話十八日係唔夠嘅，但係我哋係通過個測試，其實我哋係一個道路上面測試嘅，呢個相對於運輸署嗰個測試個要求更加高，所以對於我哋嚟講，兼職車長個要求相對於全職車長嚟講，係更加高。

黃女士：（經傳譯員）我諗你哋嘅聯盟就係建議話要做心理測試，由政府或者第三方去做，呢個就應該係對巴士司機評估嘅一部分，如果我理解正確嘅話，呢個係你建議書裏面嘅提議嚟嘅？

梁景裕先生：（經傳譯員）係。

主席：（經傳譯員）喺邊度搵到呀？294-1，係咪呀？

黃女士：（經傳譯員）係，294-1 底部，由底數上去第四行。點解你會提出呢個建

議呢？

梁景裕先生：（經傳譯員）我諗當我哋提呢個建議嘅時候，我哋指嘅係好明顯就係因為2月10號嗰宗交通意外，有一個新聞報道就話個司機同喺馬場等巴士嘅乘客有啲問題，因此就影響咗佢嘅情緒，但係喺定罪之前，當然我哋唔能夠揣測係咪真係好似報道咁嘅...

主席：（經傳譯員）你係講應該話喺審訊之前。

梁景裕先生：（經傳譯員）係，係，啱嘅。咁所以點解我哋就提出呢個建議，就話係或者--我哋都唔知嘅，因為可能我哋自己個腦裏面有啲咩嘢隨時會爆發嘅。

吳振宇先生：（經傳譯員）我想補充，其實我都有研究過巴士意外，喺1997年或者98年，你都或者記得有一架巴士喺灣仔嗰度翻側咗嘅，如果睇番嗰個個案，一個最主要嘅原因就係巴士司機突然間情緒崩潰定係點樣嘅。

主席：（經傳譯員）你係指係上天橋嗰度？

吳振宇先生：（經傳譯員）係呀，上緊天橋嘅時候反咗車。

車啟冬先生：（經傳譯員）喺杜老誌道。

吳振宇先生：（經傳譯員）係喇，總之係嗰一宗意外。我哋就睇番一啲文件，一啲報道，就知道個主因，即係嗰宗意外嚟講，同今次都係個巴士反咗，所以可能--呢個就可能係其中一個理由，或者譬如做一個心理嘅測試或者做一啲嘅情緒嘅訓練都會幫到嘅，我哋唔知呀。好似頭先法官大人所講，因為嗰個審訊仲進行緊，我哋都唔知嗰個成因係乜嘢，但係如果你講話係問我哋攞建議，我哋睇番過去嘅數據，就因此提出呢個建議。

黃女士：（經傳譯員）你第二個建議，我知道就係你個第一段講，就係話大聯盟亦都支持加裝攝錄機，即係巴士公司喺所有巴士都要裝攝錄機，係可以保障到車長、乘客同埋其他道路使用者嘅安全嘅。喺巴士裏面裝呢啲嘅監察攝錄機，你係咪指咁呀？

吳振宇先生：（經傳譯員）係。

黃女士：（經傳譯員）或者我可以講另一個題目，我哋聽到其他專營巴士公司嘅證供提到，就話兼職車長，根據目前嘅規例或者指引，似乎係唔需要兼職車長申報佢哋做兼職巴士嘅職務之前嗰個工作時數係幾多嘅，所以有啲就表示關注，就話佢哋唔知到底嗰個兼職車長喺離開巴士之前到底做咗幾長時間個工作

主席：（經傳譯員）我唔知道當時係佢哋表達一個關注定係擔憂定係點。

吳振宇先生：（經傳譯員）不過唔緊要，不過我係想答呢個問題，因為等我問番你轉頭，一個全職車長，你點可以確保佢喺返更之間都係有足夠休息呢？我諗其實所有嘅司機，如果佢坐上架巴士，佢都係要確保自己係唔會係飲醉酒，即係全

部係頭腦清醒，所以我哋係咪要求所有巴士司機，當佢坐上巴士之後都已經係休息得足夠，係好警覺好強，然後先開始工作，所以我就唔明點解需要講呢個問題。

主席：（經傳譯員）我哋冇話要求所有巴士司機都要頭腦清醒嘅，而係要定一個規定，定一個門檻，同樣嘅事情，...

吳振宇先生： Well, for bus drivers we do.

主席：（經傳譯員）...巴士司機又好，邊個都好，同一個做法，就係話任何人喺實際可行嘅情況之下，都係要儘量確保安全，所以新政嘅問題就係話而家睇嚟，似乎喺嗰宗 2 月嘅意外之前就冇搜集到資料，就話個兼職司機喺其他嘅工作係做啲乜嘢、做咗幾耐，所以呢個都係我哋要研究嘅一點嚟嘅。

吳振宇先生：（經傳譯員）我唔知道其他巴士公司係點，但係如果講喺九巴，當我哋去返工嘅時候，過去我哋要簽一份文件嘅，或者一份申報，就話我哋狀況良好，可以操作一架巴士，你想睇嘅係咪就係咁呢，我唔知，夠唔夠我又唔知。

主席：（經傳譯員）呢個係一個冇力嘅聲明，因為係冇辦法去查證。

梁景裕先生：（經傳譯員）或者我可以咁補充，喺 2014 年我啱啱加入九巴做兼職司機，就要求我要申報我嘅全職工作係乜嘢、係做啲咩嘢嘅職務嘅，我知道城巴同埋新巴都係要求兼職司機要申報，每一年都要做嘅，佢哋個全職工作係乜嘢或者仲有啲咩嘢其他工作、佢哋做嘅工時係點同埋佢哋係咪返更嘅。

主席：（經傳譯員）城巴以前冇咁做嘅，而家係新先有咁做。

梁景裕先生：（經傳譯員）唔係，我諗佢哋以前都有做。

主席：（經傳譯員）唔係，佢哋而家先提交一份新嘅表格。

梁景裕先生：（經傳譯員）係，呢個係一個新嘅表格，我知道，但係之前有一個舊嘅表格嘅，就話兼職司機就要申報佢哋嘅全職工作。當然而家佢哋再加長啲，就係問埋佢哋做幾多工時同埋係咪要返更定係點。所以我哋都係嘅，我哋都要申報嘅，所以唔係話啲咩嘢新事物嚟嘅，因為我哋都係成年人，我哋當然要負責任，為我哋嘅行為，如果我哋知道我哋嗰日唔適合係揸巴士，我哋就應該好似全職司機一樣，就係攞病假。

主席：（經傳譯員）或者我逐一問你哋，各位，你哋仲有冇其他嘅工作？如果係嘅話，係咪同揸車有關呢？

梁景裕先生：（經傳譯員）係，我有其他工作嘅。

主席：（經傳譯員）係咪揸車嘅？

梁景裕先生：（經傳譯員）我喺辦公室嗰度工作，其實我有好多份工作嘅。

主席：（經傳譯員）其中有冇邊一份係揸車㗎？

梁景裕先生：（經傳譯員）有。

主席：（經傳譯員）好喇，吳生呢？

吳振宇先生：（經傳譯員）冇。

主席：（經傳譯員）冇其他工作？

吳振宇先生：（經傳譯員）有其他工作，但係唔係揸車嘅工作。

主席：（經傳譯員）好，張先生？

張沛棋先生：有其他工作，都有機會要揸車嘅，就算平時我返工，我自己都係揸車返工。

主席： Yeah.

鄭啟祥先生：都有全職工作，都係有機會揸車。

車啟冬先生：（經傳譯員）我都有其他工作，我係公務員嘅，喺地政署，地政總署。

主席：（經傳譯員）即係你更加係可能係被分心就多過話揸車。

車啟冬先生：（經傳譯員）Yes.

馬景德先生：（經傳譯員）我係都有其他工作嘅，唔需要揸車。

主席：（經傳譯員）好，黃大律師。

黃女士：（經傳譯員）好喇，城巴喺佢哋新嘅表格其中一個改動，就話要求兼職司機要作一個申報，就話佢哋之前係做咗幾多個鐘頭嘅工作或者佢哋嚟返工做兼職揸車嘅時候之前係做咗幾多個鐘頭工作咁嘅，你會唔會支持咁嘅做法呀？

馬景德先生：（經傳譯員）我支持嘅。城巴同埋新巴嗰個新嘅表格就比過去就係全面好多。

黃女士：（經傳譯員）係咪成個大聯盟都同意呢個意見呢，就係你哋嗰個 Facebook 群組係咪都同意呢？

梁景裕先生：（經傳譯員）我哋係支持透明度嘅，或者可以咁講。

吳振宇先生：（經傳譯員）我個人會支持，但係就係佢哋亦都應該要求全職司機咁做，我講嘅意思就係話如果你要我申報我喺揸車以外嘅時間做啲乜嘢，你又擔唔擔心全職司機可能成晚喺度開派對，然後先至去返工呢？你擔唔擔心呢？我就會喇。

黃女士：（經傳譯員）我哋而家睇到一個表格，就顯示有啲咩嘢要求，要填啲咩嘢資

料，你可以睇到呢個表格上個頂部。

主席：（經傳譯員）可唔可以畀嗰個參考編號我呀？

黃女士：（經傳譯員）就係CTB資料冊第571頁。

主席： CTB-1?

黃女士：（經傳譯員）CTB第3冊。

主席：（經傳譯員）好，唔該。

黃女士：（經傳譯員）個翻譯就喺571-1同埋571-2，呢度就係要求兼職車長簽署一份申報表格，就講出要做幾多工時、係咪需要返更，要申報，同埋要申報佢哋填寫嘅資料係正確，否則就會有處分行動。即係話意思係而家佢哋要求兼職車長要做呢啲申報，而我相信九巴都係而家有類似嘅做法，啱唔啱呀？

梁景裕先生：（經傳譯員）係，正確。

主席：（經傳譯員）有冇九巴嗰個表格喺呢度呢？

黃女士： Yes.

主席：（經傳譯員）如果係，畀個參考編號我哋得喇，唔需要擺上嚟。

梁景裕先生：（經傳譯員）呢份表格係每一年申報一次嘅表格嚟嘅，唔係話每一次你開始揸車之前要申報嘅。

主席：（經傳譯員）係，好明顯喇。黃大律師，有冇話要求嗰啲資料幾時係要更新嘅？

黃女士：（經傳譯員）冇嘅。應該就係九巴資料冊第1冊128至129頁，翻譯就喺129-1同129-2嗰度。

主席：（經傳譯員）好，唔該。

黃女士：（經傳譯員）我想問嘅題目，我相信馬健德先生之前有提到，就話九巴就而家加咗一個新嘅規定係畀兼職車長嘅，應該話係加咗幾個規定，要兼職車長接受，先至畀佢哋繼續做。或者請你睇KMB資料冊第1冊140至141頁，呢個係九巴交畀運輸署署長嘅文件，係回應2018年2月10號嘅事故嘅，喺底部就有咁講，就話「喺2018年3月底，大部分嘅二百零九位嘅兼職車長都接受咗我哋嘅規定，我哋喺佢哋符合咗以下嘅要求之後，我哋都有指派任何畀佢哋嘅：

第1 就話佢哋要聲稱佢哋作為兼職車長，唔會違反佢哋全職工作嘅僱傭合約；

第2 就係已經有書面申報佢哋嘅疾病；

第 3 就係有書面申報佢哋嘅刑事紀錄；

第 4 係已經通過咗無交通罪行嘅紀錄；同埋

第 5 就係參加咗全日嘅矯正培訓，即係話如果係過去亦都冇牽涉喺咩嘢事故裏面。」

或者我第一個問題可以問馬生，就係如果呢啲，頭先你係提到話就係呢啲規定你拒絕接受，抑或係講緊另一啲規定，唔係呢一拃？

馬景德先生：就住第一條，我係唔接受嘅，當初，即係話第 1 點，（經傳譯員）就係話「書面申報咗，就話我作為一個兼職車長，就唔會違反咗我全職嘅另外嘅工作嘅僱傭合約嘅」，（直接用本地話說）我係不接受九龍巴士提出呢一點嘅，佢係--九龍巴士公司係喺第二處同我哋兼職車長苦主大聯盟第二次嘅會議係喺佢哋嘅九龍灣車廠嗰度舉行嘅，當初係佢哋首先提出呢一點嘅。喺第一次會議嘅時候，九龍巴士公司從冇提出過呢一點嘅，喺以我本人嚟講，我係唔接受呢一點嘅。

至於你話第二點，declaration of illness 嘅，其實我哋--以我本人，過往喺擔任九巴兼職車長嘅時間，每一次返廠攞車，都要簽一份聲明，聲明你嗰日係適宜執行駕駛職務，而且我哋係有張八達通開機卡，亦都講到明拍卡落去嗰一個站頭或者車廠嗰個八達通機嘅 sensor 已經代表你係有同樣嘅 declaration 嘅。

就住第 3 點，冇刑事紀錄，好合理。Pass traffic conviction record check，冇問題，你自己清者自清，冇話扣我好多分嘅，好合理，呢個係涉及安全問題，我本人覺得。

跟住第 5 點，話咩嘢 one month or more，我完全未聽過呢樣嘢，甚至無喺我哋朋友或者其他咩嘢巴士迷嗰啲，從來冇人流出過講過話冇揸某一條線一個月，我冇聽過。

吳振宇先生：（經傳譯員）就有少少混亂嘅，特別係第 5 點，呢個講關於個即係究竟係駕駛嘅訓練吖，定係路線訓練有啲混淆嘅。就我所知，呢個九巴就一直有呢個安排嘅，如果你冇揸過呢架車就係三十日或以上，你就係需要就係參加駕駛訓練，然後由導師話認可，你先至可以再揸車嘅。我覺得呢個係第 5 點所談及嘅。但係呢個第 5 點講到就係話如果你係喺呢一個嘅同一個路線冇揸車超過三十日以上，你就再需要接受訓練，呢樣嘢我哋就冇聽過。

黃女士：（經傳譯員）點解我要問呢個點呢？因為我哋曾經--我哋睇過立法會一個嘅背景資料文件，我哋就會係喺呢度打出嚟嘅。對唔住，我哋冇嗰份文件本身。

梁景裕先生：（經傳譯員）我哋明白你所講嘅，因為葉女士佢作供嘅時候，我哋都有聽到關於呢一點。而家個目前嘅做法就係話，Jason 頭先提過，如果係你冇揸車一個月，你就要再訓練，但係如果一個嘅路線，如果你冇揸過一條路線兩年

或者以上，你喺呢一個嘅訓練嘅紀錄就會被刪除，你就會需要再培訓先至可以揸嗰條路線。譬如例子，如果我哋係已經係 2014 年我哋揸過第 2 號路線，但係我而家一直都冇揸嘅時候，我就唔可以再揸呢個第 2 號路線。

吳振宇先生：（經傳譯員）除此之外，關於呢個路線培訓方面，譬如話路線改少少或者申延咗，或者係改咗少少嗰個嘅走線，你哋係要再培訓嘅。同埋你嗰個嘅培訓嘅紀錄都會係被刪除嘅。譬如話我已經係接受過第 2 號嘅路線培訓，就過咗一年，佢哋就將個路線係加長咗，我又冇再接受培訓，我就唔可以就再係揸呢一條線。

黃女士：（經傳譯員）就呢一點，我哋係睇緊九巴呢一個文件冊，就第 1 號文件冊第 104 頁，呢個係一個報告，調查報告，就係由九巴提交畀運輸署署長嘅，之前就運輸署署長要求嘅呢個報告，就係 2018 年 2 月 12 日。呢一個報告就係 2018 年 3 月 12 號嘅，我哋去到第 104 頁，呢度就係九巴嘅建議嚟嘅。

第 13 段，就係講話兼職車長佢哋暫時停職，呢個第 13 段就其實話佢哋係已經係就停職咗所有嘅兼職嘅車長，如果佢哋每一個星期嘅工作時數係少過十八個鐘。「但係我哋為咗係滿足個需求，九巴就已經係提供畀呢一個嘅兼職嘅巴士車長，就係話可以去到一個合約，然後時薪嘅車長，同埋或者係擔當其他嘅職位嘅。」

(In English) So my question is, has this happened?

梁景裕先生： Yes, it has.

黃女士： And in what aspect?

梁景裕先生：（經傳譯員）馬先生就冇接受過呢個咁樣嘅方案。我自己就係話就係選擇咗每一個禮拜十個小時，而其他成員就係選擇咗每個星期工作超過十八個小時呢個方案嘅。

主席：（經傳譯員）九巴就話嗰啲兼職車長佢就係每個禮拜工作少於十八個小時就係停職，但係佢哋就容許你每個禮拜做十個小時？

梁景裕先生：（經傳譯員）其實我明白你嗰個諗法，其實好似似乎唔係好合理，其實我哋係一個可以話係散工嘅車長，我通常就係周末或者係星期六就會工作嘅，如果我係唔得嘅說話，我就會打電話就話「今個周末，我就係唔會嚟返工嘅。」但係喺新嘅安排底下，我哋就有壓力嘅，...

主席： You have to do 10 hours a week.

梁景裕先生：（經傳譯員）...因為我每個禮拜都要做十個鐘，如果係--有時候，我真係做唔到㗎嘛。

黃女士：（經傳譯員）我哋去 141 頁，就我哋睇到兼職車長有幾多個人係同意呢個嘅安排，如果我哋睇番呢個表第一同埋第二行，就同意每一個禮拜多過十八個

小時就有七十八人，就係一個禮拜多過十個鐘，同埋就係申報就係做兼職嘅車長就唔會違反佢哋同僱主寫嘅呢個僱傭合約就有一百二十三人，你就係呢一度裏面，係咪呀？

梁景裕先生： Absolutely.

黃女士：（經傳譯員）如果係咁，佢哋係需唔需要係另外簽一個嘅申報，就係話「你係啱啱返工之前，其實你係之前做咗幾多小時」呀？

梁景裕先生：（經傳譯員）冇，唔需要。

黃女士：（經傳譯員）關於呢個每個星期十個小時呢樣嘢呢？你可唔可以一次過就係做晒十個鐘？

梁景裕先生：（經傳譯員）我可以係一日我係做五個鐘，另外一日五個鐘，或者第二時我哋係一日裏面做晒十個鐘都得。

黃女士：（經傳譯員）都總言之一個禮拜做十個鐘就 okay 喇？

梁景裕先生：（經傳譯員）係，冇錯。

黃女士：（經傳譯員）我哋睇第 124 頁，就都係九巴嘅陳述書，呢度係講呢一個兼職車長嘅九巴嘅政策，喺呢個羅馬數字第(i)，你睇一睇，你可唔可以確認，又或者話畀我哋聽係咪真係九巴真係咁樣去對待--喺 2018 年 2 月之前係咁樣對待啲兼職車長嘅呢？

吳振宇先生：（經傳譯員）黃大律師，我就咁攞一攞，正如我之前所講，第一同埋第二點，正如我頭先所講，我哋嘅入職嘅要求其實仲高過全職嘅，因為我哋係需要通過係九巴導師嘅測試嘅，...

主席： So they are not the same, they are higher?

吳振宇先生：（經傳譯員）佢哋唔係一樣嘅，我哋係仲高啲添，喺我認為，就真係高啲喇，我哋呢度六位成員都可以畀意見，對於之下底嗰幾點，我都會同意嘅。

黃女士：（經傳譯員）唔該晒。如果我哋話建議九巴要求所有兼職車長就係填一個申報表，申報話其實佢哋兼職車長返工之前佢哋究竟已經係工作咗幾多個小時，你哋會唔會同意呢？

吳振宇先生：（經傳譯員）我都唔係好明點解你仍然都問呢個問題，其實喺法例上你就每一日唔能夠超過揸車十四個小時，如果你係超越十四個小時，其實就已經係犯法。

主席：（經傳譯員）其實而家唔係關於個法例嘅問題，而係話執法嘅問題，你係要知道嗰個人做咗啲咩嘢，你先至可以執法㗎。

吳振宇先生： And like what Kenneth just said, when we tap card

to report to duty we already declare that.

主席：（經傳譯員）你可唔可以再重複呢？

吳振宇先生：（經傳譯員）我哋開始報到嘅時候，用我哋個八達通卡去拍一拍嘅時候，其實我哋已經係話畀公司聽我哋係確認我哋係已經係遵守所有嘅法例，同埋我哋都係適合去揸車嘅。

主席：（經傳譯員）個問題係如果你係你成晚就係揸旅遊車，然後早上就去巴士公司返工，巴士公司點樣知道你係有遵守呢個實務守則，同埋你點樣可以去執法呢？可能你唔可能即時提供到答案，但係呢個就係我個問題。

梁景裕先生：（經傳譯員）我要重複，我哋係完全明白會有啲咩嘢嘅刑事責任，尤其是我哋係疲勞駕駛嘅情況底下。啲人就咁講嘅，即係嗰啲車長就一隻腳就喺個監獄度，另一隻腳就喺個殮房嘅。

主席： Well balanced drivers?

梁景裕先生： Yes, thank you.

吳振宇先生：（經傳譯員）你係講緊就話我係要做一個嘅表格，要寫話我之前就係冇做好長時間，我哋會拍嗰個八達通卡，就話我哋係可以揸車。

主席：（經傳譯員）但係其實你就咁拍你嘅卡，其實就冇資料話畀我哋聽你之前做過啲乜。

吳振宇先生：（經傳譯員）我哋拍個卡就係話我哋接受呢個嘅職務，我哋亦都係接受話個講法就係如果我哋唔遵守法例，我哋係要承受後果嘅，亦都包括就係話如果話--就係頭先我講嘅例子，如果我已經飲咗酒，如果你拍咗個卡就表示就係我就係冇飲過酒，我就係可以係有好好嘅狀態去揸車嘅。

主席：（經傳譯員）所以點解要執行醉駕嘅法例就係要你用嗰個呼吸器吖嘛去。

吳振宇先生：（經傳譯員）係呀，但係唔係話每一次我揸車都係要用呢個呼吸器去測試，亦都唔可以話每一日要求九巴咁多千個司機都要咁做㗎嘛。

主席：（經傳譯員）黃大律師。

黃女士：（經傳譯員）我已經完成我嘅提問，唔該。

主席：（經傳譯員）各位，我哋今日想向你提嘅問題就係咁多，請問你哋需唔需要話仲有啲咩嘢想總結講一講呢？唔係一定要，但係有嘢想講，都請你可以講。

梁景裕先生：（經傳譯員）多謝，我哋想重申嘅，就係有啲好唔公道嘅睇法質疑兼職司機嘅專業程度，我希望今日嘅證供就可以改變到嗰個睇法。我當然係好關心公眾，但係幾位成員同埋主席今日應該係更加清楚知道兼職司機嘅工作係點。

我想重複，我哋以駕駛為傲，我哋鍾意揸車，我哋鍾意服務乘客、服務各個階層嘅人士，我哋就係鍾意做呢個工作。如果我哋被禁止做兼職司機，對我哋打擊真係好大，就會對我哋嚟講，係最唔想見到嘅結果，我哋會覺得好唔開心。

主席：（經傳譯員）或者我可唔可以問你呢？六位先生，作為兼職司機嚟講，你哋算唔算係好有代表性呢？特別我諗到嘅就係話新大嶼山巴士公司，因為我知道嗰度三分一嘅司機都係兼職司機，你算唔算係同佢哋屬於係好典型嘅兼職司機抑或好唔同呢？

梁景裕先生：（經傳譯員）我個人就冇喺新大嶼山巴士公司做過，或者鄭生可以解釋一下。

鄭啟祥先生：其實做兼職車長就個個人嘅做法都有可能有好大分別，但係最主要嘅原因就係時間比較彈性，好有多兼職司機就係想一個禮拜放兩日假，就會選擇做 part-time 車長，就放棄佢有一啲福利，即係比全職車長嘅福利就少咗，但係佢哋換取到佢哋嗰啲時間自由啲，所以就會有--即係會多咗人會選擇去兼職呢個職位，其實個問題就喺呢度。

你話至於大嶼山巴士點解會有三分一車長會係兼職呢？其實佢嗰度都係--點講呢？旅遊，即係禮拜六、日嗰個人數就會多好多，佢突然之間有好多人放假，就會入去大嶼山旅遊，佢需要嘅車長就會特別多咗，變咗需要兼職車長嘅需求就會大咗。同埋都係嗰句，個彈性個問題，即係話我得閒，就我可以過嚟兼職幫下手，個原因就會係咁樣，以我所了解，就係咁。同埋我做咁耐，都係因為方便到我時間，我就可以去工作。

車啟冬先生：或者我用廣東話補充多少少，傳神啲。喺反車呢單意外之前，其實據我所知，龍運巴士嗰邊嗰個收車情況都幾嚴峻下嘅，因為自從喺--我諗大約 2016 到 17 年期間，大量 A 線嘅擴充，即係直達機場客運大樓嗰啲路線嘅擴充，變咗 E 車，即係北大嶼山對外路線嘅收車率亦都係比較高，導致到一啲嘅個別嘅更分收車情況係相對嚴重，喺呢啲情況底下，兼職車長就可以發揮到佢哋補班嘅作用。

至於返番頭先大律師問過嘅問題，喺九巴嚟到講，即係喺番 KMB 同 Long Win Bus bundle 1 124 頁所講九巴對嗰個 part-time 車長係咪一視同仁，喺呢個羅馬數字(i)以下嘅要點嗰度，其實係嘅，係一視同仁嘅，全職又好，兼職又好，一視同仁。係喇，我哋每日開工嗰陣時，將我哋個八達通卡--頭先我哋幾位同事都講過，將我哋嘅八達通卡拍喺站長室嗰部機嗰度就已經係代表我哋自行申報咗我哋嘅健康狀況、休息狀況、我哋係適合擔當當天嘅兼職車長工作。九巴一直都有做過嘅，呢一樣嘢，即係自我 2016 年開始加入九巴，跟住轉咗去龍運，一直都有。

鄭啟祥先生：最後我有少少意見想畀番委員會，就其實就講嚟講去咁耐，都係講司機嘅問題，但係有冇向乘客嗰方面，你哋有冇研究下有啲咩嘢措施可以去針對番

Transcript by Epiq Hong Kong, Limited

乘客嘅行為呢？因而其實你見到好多--而家香港人等車等得耐又鬧，唔滿意又投訴，投訴就最方便，其實你做咁多嘢，咩嘢車速監察，唔使嘅，佢哋識得打電話去投訴嘅，根本就係佢哋要投訴嘅渠道係好多、好多，反而司機冇得去投訴個乘客，如果係個乘客唔啱，我哋根本冇得講話個乘客唔啱，亦都冇證據，亦都冇渠道去投訴佢。我就建議，平時點解--即係好簡單一個例子，...

主席：（經傳譯員）我哋係好清楚呢個問題嘅，所以點解我哋先至問咁多問題就關於話嗰啲閉路電視或者係攝錄機，係咪需要有埋收音嘅功能等等嘅，我哋希望見到巴士就有閉路電視，就話啲人非法泊車都係會影得到，唔單只係影到，而且係會執法，因為如果執唔到法，就有法例都係完全冇意義嘅。

吳振宇先生：（經傳譯員）完全同意。我諗我哋想講嘅點就係話如果係咁，根本已經係有咁嘅條例喺度可以處理乘客嘅行為，但係有冇執法呢？如果係冇嘅話，係咪應該更加大力度去執法呢？其實葉女士同佢其他同事都提到話佢哋係幾乎每一日都係受到言語辱罵嘅。

主席：（經傳譯員）所以點解我係話過，個問題就係點樣可以執法，因為巴士乘客都冇權可以去辱罵巴士車長嘅。

吳振宇先生：（經傳譯員）啱嘅，譬如如果我哋睇番譬如地鐵，有啲地鐵嘅職員係有權可以執法，然後--如果話乘客有啲咩嘢不當行為都可以罰款。

主席：（經傳譯員）我唔想再話延長呢一個環節太多，我要指出嘅其實就係根本好顯而易見㗎喇，就係巴士就有一個巴士車長，得佢一個人喺度，而喺地鐵就有--喺個站度有好多職員可以幫手嘅，佢哋等住喺度幫佢添，所以呢個就係最大嘅分別，我就係想指出呢點，係有人指出過呢點，話畀我哋聽。

吳振宇先生：（經傳譯員）講番話人手問題，喺路上都係有啲嘅管工，即係有啲係站長或者車站長嗰啲，係咪可以加多啲呢啲人手都幫到我哋呢？

主席：（經傳譯員）好，多謝各位，好多謝你哋今日嚟向我哋作供，係提供咗好多資料畀我哋，但係你都可以睇到，我哋有好多嘅因素都需要平衡嘅。我哋嘗試想做嘅就係首先係向你哋攞到啲資料先，係今日好有用，所以今日就我要喺呢度完結，多謝各位，想特別多謝嗰啲我哋嘅謄寫員同埋即時傳譯員，今日工作咗好長時間，我哋聽日10點鐘繼續，唔該。

2018年7月31日

下午6時12分聆訊押後

Wednesday, 1 August 2018

(10.00 am)

EMPLOYEE OF KOWLOON MOTOR BUS COMPANY (1933) LIMITED:

MS DEBBY WONG

(Evidence given in Cantonese and English, transcription of the simultaneous interpretation and/or English)

CHAIRMAN: Good morning, Ms Wong.

MS DEBBY WONG: (In English) Good morning.

CHAIRMAN: Thank you for accepting our invitation to give evidence to the committee.

You are a current employee of the Kowloon Motor Bus Company, are you not?

MS DEBBY WONG: (In English) Yes, I am.

CHAIRMAN: The way in which your evidence will be taken is by Ms Wong, Senior Counsel, who is counsel assisting the Committee posing questions to you. If there is anything you wish to amplify, feel free to do so.

You will be referred to documents, you can look at them on the screen, or you can ask for a hard copy, if you want to look ahead or behind where the document deals with things; do you understand?

MS DEBBY WONG: Yes.

CHAIRMAN: Thank you very much.

Ms Wong.

EXAMINATION BY MS WONG

MS MAGGIE WONG: Thank you, Ms Wong, for coming.

My questions will be focused on the resting facilities set out in your submission or reply to the letter of IRC dated 28 June 2018, and your letter of reply was sent on 4 July 2018. That can be found at FE bundle, page 199.

Ms Wong, before I start questioning on this topic, may I know how long have you worked for Kowloon Motor Bus?

MS DEBBY WONG: May I speak in Cantonese?

Yes, for 21 years. I have worked with the KMB for 21 years, and I've been involved in operations, and I have had experience in two depots: Lai Chi Kok and Tuen Mun respectively.

MS MAGGIE WONG: Since when did you take up the current post as operator in charge of the Kowloon Motor Bus Tuen Mun depot?

MS DEBBY WONG: (In English) Since 1997 I work at Tuen Mun depot and then I transferred to Lai Chi Kok depot in 2016. And then I went back to Tuen Mun depot in 2018.

MS MAGGIE WONG: Your reply stated that there were 30 bus stations under Tuen Mun depot. I notice in Mr Kelvin Yeung's submission he stated there are 31 bus termini. May I just ascertain which one is correct? 30 or 31?

MS DEBBY WONG: Well, for some stations, we may not have somebody stationed there as a bus regulator, so when counting the number of bus stations, there may be a discrepancy. It should be between 30 and 31.

MS MAGGIE WONG: Thank you.

And how many bus stations did you manage?

MS DEBBY WONG: Almost 10, because I'm responsible for Tin Shui Wai area. Let me, sort of count them.

CHAIRMAN: Take your time.

MS DEBBY WONG: Well, under me, at Tuen Mun depot I have got four. As the assistant manager of Tuen Mun depot, four for Tin Shui Wai area.

MS MAGGIE WONG: Yes. I understand that Tuen Mun depot is responsible for bus operations of three districts, Tuen Mun, Yuen Long and Tin Shui Wai, and you are responsible for Tin Shui Wai.

MS DEBBY WONG: (In English) Yes.

MS MAGGIE WONG: Is that all bus stations in Tin Shui Wai?

MS DEBBY WONG: (In English) Yes.

MS MAGGIE WONG: So there are four bus stations in Tin Shui Wai?

MS DEBBY WONG: (In English) Yes.

MS MAGGIE WONG: What about the rest? Are they all managed by Kelvin?

MS DEBBY WONG: (In English) Kelvin manage only on Tuen Mun

zone. Yuen Long is under another AM.

MS MAGGIE WONG: Another AM, assistant manager.

MS DEBBY WONG: (In English) Assistant manager.

MS MAGGIE WONG: And who is that?

MS DEBBY WONG: (In English) Amanda Hung.

MS MAGGIE WONG: Thank you.

Now, Ms Wong, in your submission you stated there are two types of rest kiosk. The first is type A, and the second type B.

Now, I notice type B is bigger in size. Can you tell us what is the difference -- apart from size, what is the difference between the two?

MS DEBBY WONG: Other than the size, well, in fact the internal partitioning is different. For the larger kiosk we can place more electrical appliances, like a microwave, as well as the drinks dispenser. For smaller ones, that's mainly for the bus regulator, it is more like their working station.

So the microwave and the drinking dispenser, so they are the things that we kept there.

MS MAGGIE WONG: Would sort of a bench so that you can sleep be provided for either type?

MS DEBBY WONG: Well, this is the working place. At a larger bus station we may be able to provide a rest room, what we call them, for bus captains to take

a rest. The size would be similar to the size of the larger kiosk. The larger kiosk is for both the regulator as well as the bus captains. The size is the same, but then the design is such that we have tables and chairs.

And then we have some offices which are concrete, say, for example, at the PTI, it already provides a concrete office. Then the space will be larger. As I've mentioned, at some locations we have more space, and we are able to provide more chairs. That's because the office is a concrete one.

CHAIRMAN: What is a PTI?

MS DEBBY WONG: (In English) Public transport interchange.

CHAIRMAN: Are any of the four bus stations that you manage, places at which there are rest facilities?

MS DEBBY WONG: (In English) Like Tin Shui Wai town centre there is a concrete office and we provide a rest area for bus captains and another room is for terminus supervisor.

CHAIRMAN: Thank you.

MS DEBBY WONG: (In English) Also in -- what I manage is Tin Yan, Tin Fu and Tin Tsz, they all have two bigger-size kiosk, one is for terminus supervisor and the other one is for bus captain.

Also what I manage, the four bus stations already

provided the rest room.

MS MAGGIE WONG: The four bus stations that you managed, are these stations providing split shifts for bus captains?

MS DEBBY WONG: (In English) Yes.

MS MAGGIE WONG: How many of them provided split shifts?

MS DEBBY WONG: (In English) I don't have the number. But at each bus station we have certain bus routes, and some is long-haul routes and some is short-haul routes, and we have a mix, bus captains, some is split shift that you mentioned, and some is one duty. That means only am shift or night shift.

MS MAGGIE WONG: So in all these bus stations, there are split shifts and are they all provided with rest facilities for all four bus stations?

CHAIRMAN: Are you referring to just the four?

MS MAGGIE WONG: Yes.

CHAIRMAN: Thank you.

MS DEBBY WONG: (In English) Yes, we provided the facility in my managed bus terminus, and also we have a bus depot in Tin Shui Wai, and bus captains can rest during the break inside the depot, Tin Shui Wai depot. Or they can -- if they live close to their home, they can go home, rest, and then return to work. Because we will give around three or more hours for them to rest during the break.

CHAIRMAN: Is Tin Shui Wai a town centre a depot or bus station?

MS DEBBY WONG: (In English) We have another depot, it is Tin Shui Wai depot, it is also in Tin Shui Wai zone.

CHAIRMAN: Do you see on the screen we have a list of bus stations, which one is the depot?

MS DEBBY WONG: (In English) Tin Shui Wai town centre is the bus station and we have another location named Tin Shui Wai depot. That is only bus parking only.

CHAIRMAN: So we don't have Tin Shui Wai depot listed here?

MS DEBBY WONG: (In English) Yes, that's right.

MS MAGGIE WONG: Just to clarify, on that page, page 207, there are two Tin Shui Wai. One is Tin Shui Wai town centre, one is Tin Shui Wai railway station. So they are not the ones that are referred to by you as rest facilities?

MS DEBBY WONG: (In English) Sorry, I missed this one. This is under my management too. Tin Shui Wai station.

MS MAGGIE WONG: So both of them?

MS DEBBY WONG: (In English) This is another one. The station, another bus terminus another bus station under my manage.

CHAIRMAN: You told us earlier that Tin Shui Wai town centre has a rest area; is that right?

MS DEBBY WONG: (In English) We provide rest area there.

MS MAGGIE WONG: And the rest areas, are they type A or type B, or the bigger kiosk that you mentioned?

MS DEBBY WONG: (In English) Type B.

MS MAGGIE WONG: Type B. So in all the four bus stations, are they type B?

MS DEBBY WONG: (In English) Except Tin Shui Wai town centre, this is a concrete office, so we have concrete office for bus captain rest room.

The other is a kiosk, Tin Yan, Tin Fu, Tin Shui Wai station, they are all in kiosk B, type B.

MS MAGGIE WONG: So there would be benches provided for them, for bus captains?

MS DEBBY WONG: (In English) Yes, there is a chair. Not really a bench. It is a chair, and table, for them to take meal and rest.

MS MAGGIE WONG: In your submission you mentioned that there is a long lapse or long lead time to have a placement, even for chemical toilets, during your management of Lai Chi Kok depot, and that is at page 198, paragraph 3D of your submission.

And you mentioned an example of Allway Garden. And can you also refer to a minute, because it appears the trade union have also reflected this to the Transport Department. I just want to ascertain if you know about this.

And that's at TU-260-192 in English. That's minutes of the meeting between the Transport Department, and Legislative Councillor and Mr Cheung Kwok Che, and representatives of the Federation of Bus Industry Trade Unions, and representative of franchised bus unions.

CHAIRMAN: And the date?

MS MAGGIE WONG: The date is 4 March 2015. Page 260-200.

It was under the topic of bus stop facilities, and it is stated there that:

"The unions were discontent that ... most of the bus termini did not have pre-existing fixed restrooms for employees and toilets, and requested the Transport Department to review the planning and management of bus termini. The unions were also dissatisfied with the present complicated procedure for bus companies to apply for the installation of employee rest rooms, mobile toilets and other bus stop facilities and the consultation was very time-consuming. It was suggested that the application and consultation procedure should be simplified and speed up."

It mentioned a number of locations. And one of them is "Allway Garden bus terminus (no toilets)", which is one of the examples given in your submission.

Is that the location, or is Allway Garden bus terminus the location you mentioned in your submission

at page 198?

MS DEBBY WONG: (In English) Correct.

MS MAGGIE WONG: So what is the status today? Has a toilet or rest facility been given at Allway Garden?

MS DEBBY WONG: (Interpreted) The Allway Garden terminus is uncovered and it is some way from a public toilet, and opposite Allway Garden there is a shopping centre, but the rest rooms there are always locked. We would have to borrow keys from the management office if our staff are to use their toilet.

The management office indicated that since we are not tenants they are reluctant to lend us the keys.

As I know, for the Lai Chi Kok terminus or depot, we have made submissions multiple times to the Transport Department to apply for chemical toilets. In January 2017, I submitted an application myself. It was January 2016. Again, we submitted an application to TD for a chemical toilet, and in the process TD rejected our application citing rejection from the public consultation.

It is an outdoor depot or terminus, so residents would be somewhat affected, but we considered the need for our staff to have a toilet, that's why we again applied to the Transport Department for other viable alternative locations, and in July last year we revised

our plan, and again made an application. And eventually TD approved our application last October. The reason was that our staff had no toilet they can use.

And we communicated with district councillors to convince them of the need for our staff to have a toilet. So we received an approval letter last October.

MS MAGGIE WONG: This is only one of the examples. And the examples you gave based on the minutes is from March 2015, and you only managed to get the application approved in last October, which took at least two years to successfully apply for a toilet facility; is that correct?

MS DEBBY WONG: (In English) Actually, more than two years. Before they have some e-mail with our -- my other colleague, but under my management from 2017 for the whole year we have applied again, and again.

CHAIRMAN: How long has Allway Garden been a bus station?

MS DEBBY WONG: (In English) Over 20 years. I'm not quite remember the history, but once the bus terminus was here, the bus -- was there.

CHAIRMAN: How does it happen that a bus station is brought into use and there is not a provision for a toilet?

MS DEBBY WONG: (In English) So --

CHAIRMAN: How does that happen?

MS DEBBY WONG: (In English) Our bus captain obtain need to borrow the commercial centre, their office, with the key, and they change the key if they know we borrowed, and they change the key -- change the lock again.

CHAIRMAN: No, the question is more fundamental than that. Why do you provide a bus service to a bus station if there is not a toilet there? How does it happen that that comes about?

MS DEBBY WONG: (In English) Yeah.

CHAIRMAN: Why do you do it?

MS DEBBY WONG: (In English) So when I manage, I see the problem, so I try to communicate with the TD, Transport Department, and DC -- actually, I know the background is the DC members very unhappy of the chemical toilet placed in the public PTI.

CHAIRMAN: Then perhaps they have a choice. They either have a bus service or they have a toilet. But they -- so how is it that you provide a bus service and you allow them to oppose putting a toilet in?

MS DEBBY WONG: (In English) So they asked us to borrow the commercial centre's toilet. That's what the solution they think it would be.

CHAIRMAN: That's not a solution, is it?

MS DEBBY WONG: (In English) Yeah, it is true.

MS MAGGIE WONG: And the second example you gave is the Lok

Wah issue in August 2017. That's at page 198. And in your submission you stated that the Lok Wah issue was only resolved in October 2017, after several lobbying with the district council.

How long have you applied for a rest kiosk in Lok Wah Estate, since when?

MS DEBBY WONG: (In English) I read from the news it is over five years?. Sorry, this is not under my managed zone, but I read from the newspaper it is over five years we have applied. By KMB.

CHAIRMAN: Is Lok Wah in Kwun Tong?

MS DEBBY WONG: (In English) Yes.

CHAIRMAN: Is it a bus station?

MS DEBBY WONG: (In English) Yes.

MS MAGGIE WONG: And the third example you gave is also at Tuen Mun depot, is the Yuen Long Park.

And you stated that you applied for the resting facility in 2014, and only approved in 2016.

So why did it take so long to provide, or two years to provide a resting facility?

MS DEBBY WONG: (In English) Actually, we don't know the reason. But our procedure is submit our application to Transport Department and they will circulate our application to public, all relevant publics, like police, or DC member, and the residents, near Yuen Long

Park, they will consult them, and I remember they replied that the rejection party is police.

That's very rare from my understanding, it is not their living area, that's police. So we asked police to come out and discuss with them how can we solve this issue. Because providing the kiosk, not only our working station for terminus supervisor, also that was a resting area for our bus captains. If there is really a service providing in Yuen Long Park, we need a station, we need a rest room for them.

So we asked the police to come out to solve the issue, and try to make every party happy.

MS MAGGIE WONG: Do you have written correspondence exchanged with the police about this matter?

MS DEBBY WONG: (In English) Yes. We resubmit the application to Transport Department, and asked them to -- for another round consultation in 2015.

MS MAGGIE WONG: Would you be able to provide us with the documentation in relation to this particular incident concerning Yuen Long Park --

MS DEBBY WONG: (In English) Yes.

MS MAGGIE WONG: -- with the Transport Department and with the police?

MS DEBBY WONG: (In English) Yes, I can provide that.

MS MAGGIE WONG: Thank you.

And may I take you to the TU bundle, as well as. This time it is in relation to -- this is a report compiled by the Federation of Bus Industry Trade Unions. Annex 7 of their submission dated 16 July.

And it listed out --

CHAIRMAN: Page?

MS MAGGIE WONG: Page 260-346-2. 260-346-2.

CHAIRMAN: Thank you.

MS MAGGIE WONG: It is a table setting out the bus terminus and the location, and the progress of the application. I would just like to ask you a few examples here to ask you whether progress has been made, or whether there has been further progress.

On that page, it is under the bus company KMB, and the location is at Tuen Mun Po Tin Estate, and it was stated there that it has been consulted for two years and no reply has yet been received.

MS DEBBY WONG: (In English) I think that is Kelvin Yeung's submission. Po Tin.

MS MAGGIE WONG: I believe that's not. Because that's the document provided to us by Federation of Bus Industry Trade Unions, annex 7. It is not a document by Kelvin Yeung.

MS DEBBY WONG: (In English) Okay.

MS MAGGIE WONG: But in any event, I just want you to

confirm whether that's the position.

We see in the right column, it is stated there that:

"The relevant application has to be approved by the Housing Department. [Transport Department] has already written to the Housing Department requesting KMB's application to be handled as soon as possible, it has also made follow-up call to the Housing Department to further follow up. The Housing Department replied and said it is still handling the relevant matter."

And it was in relation to the Tuen Mun Po Tin Estate.

So is that, first of all, an estate managed by you?

MS DEBBY WONG: (In English) No.

MS MAGGIE WONG: Or the bus station, is that managed by you?

MS DEBBY WONG: (In English) No, it is under Kelvin Yeung.

MS MAGGIE WONG: But you don't know about the status of this application?

MS DEBBY WONG: (In English) Not so familiar.

MS MAGGIE WONG: And what about the rest of the facilities from 260-346-2, if you look through to 260-346-6? Can you look through them and see which one of them may be applicable to you, or an estate managed by you, a bus station managed by you?

MS DEBBY WONG: (In English) No. All is not under my management.

MS MAGGIE WONG: Yes.

And Ms Wong, I'm going to ask you another topic.

You mentioned that you have been working for Kowloon Motor Bus for over 20 years.

MS DEBBY WONG: (In English) Yes.

MS MAGGIE WONG: Do you know a person named Raymond Cheng?

MS DEBBY WONG: (In English) Raymond Cheng, yes.

MS MAGGIE WONG: He used to work for Kowloon Motor Bus between 2010 and 2014 in the safety and service quality department.

MS DEBBY WONG: (In English) Mm-hmm.

CHAIRMAN: Do you know that?

MS DEBBY WONG: (In English) Yes.

MS MAGGIE WONG: And in his submission he mentioned that there was a study conducted during his time, following the accident in Tseung Kwan O in 2009, that there was a study about 29 sharp bends in Hong Kong, and to discuss the possible speed limit that could be applicable.

CHAIRMAN: Perhaps if we were to show the witness the witness statement?

MS MAGGIE WONG: Yes. The witness statement is at page 96.

CHAIRMAN: Of which bundle?

MS MAGGIE WONG: FE bundle, page 96-4.

If you look at the section, buses can overturn

easily --

CHAIRMAN: Give Ms Wong a moment to have a look at the document.

MS MAGGIE WONG: I apologise, yes.

Do you mind looking at the document at page 96-4?

If you look through to 96-6, so three pages.

CHAIRMAN: Take your time. There is no hurry.

Yes, Ms Wong.

MS MAGGIE WONG: Yes, Ms Wong, we can see from this statement that Mr Raymond Cheng stated that he:

"... started the study of safe driving in the sharp turns back in 2013. The Safety and Quality Service Department invited the 4 depot managers, the representatives from Bus Captain Training School and Bus Maintenance Section of Service Department to form a study group looking deeply into all the sharp turns within [KMB] bus route network. The study collected thousands of daily bus turning data and formulated hundreds of potentially dangerous turns within the network. We then narrowed it down to top 29 corner turns that may cause serious overturning [incidents] ..."

And he named a few in Chinese characters there.

May I ask you first, did you know about the study carried out by Raymond Cheng.

MS DEBBY WONG: (Interpreted) Yes, I was aware of the 29 sharp bends. But then I was not within the group making this.

CHAIRMAN: Do you know who was in the group?

MS DEBBY WONG: (In English) As mentioned by Raymond, maybe it is the depot manager plus the training school instructor.

CHAIRMAN: Thank you.

MS MAGGIE WONG: And this study group, it mentioned that -- if you look over the page at 96-6, it referred to the study group carrying out tests of these 29 turns in different road conditions, different speeds, different passengers, load conditions, and they video-recorded the whole study for future reference.

Did you know about this video-recorded study?

MS DEBBY WONG: (Interpreted) No.

MS MAGGIE WONG: If you look, if you follow on at the bottom, it mentioned there was a safety booklet.

I believe subsequently it was clarified as a small printed card, by Mr Raymond Cheng:

" ... for Bus Captains detailing each potentially dangerous turns' exact location, direction, and road nature, road condition, past record, related photos or grimes from Transport Department's document or passenger complaints ..."

Then they have made 31 is safety driving suggestions from a study of over 1,500 studies.

Did you know about this?

MS DEBBY WONG: (In English) I know there is a safety booklet, but I'm not sure of the study.

MS MAGGIE WONG: So there is a safety booklet of these 29 turns; is that correct?

MS DEBBY WONG: (In English) In general. The safety booklet is in general for bus captains to be careful.

MS MAGGIE WONG: Did you know about the outcome of this study?

MS DEBBY WONG: (In English) Not sure.

CHAIRMAN: Do you know if it was disseminated, passed out to bus captains?

MS DEBBY WONG: (In English) Yes, we will pass this safety handbook to bus captains, and we will have a very brief instruction to them.

MS MAGGIE WONG: But in relation to this safety handbook to bus captain, do you know if it contains anything about these 29 sharp bends?

MS DEBBY WONG: (In English) Sorry, I'm not very quite read the details from the booklet, so maybe I have no idea on this subject.

MS MAGGIE WONG: Mmm. During your time in Kowloon Motor Bus, did you at any time discuss with the management

about conducting a study or gathering views from bus captains as to the dangerous road conditions in Hong Kong?

MS DEBBY WONG: (In English) We will give -- I remember during Mr Cheng's -- the period I was not assistant manager, and I am one of the operations staff and we will provide some location that may have potential to have the hazard on the sharp bends. So during that time we provide some location to SSQ session to have more review on this.

CHAIRMAN: That's safety and service session, is it?

MS DEBBY WONG: (In English) Yes.

MS MAGGIE WONG: For which period?

MS DEBBY WONG: (In English) During Mr Cheng's -- 2010 to 2014.

MS MAGGIE WONG: What about after 2014?

MS DEBBY WONG: (In English) After --

MS MAGGIE WONG: After 2014, did you continue to provide information about this?

MS DEBBY WONG: (In English) Yes, continuous.

MS MAGGIE WONG: Would you be able to provide us with some of the documentation concerning your relaying of the concerns about locations about the topic you mentioned about the dangerous road condition that may pose risk?

MS DEBBY WONG: (In English) Maybe I will not have the

black and white, but we will have a focus group to discuss this topic. I remember after the accident in Tseung Kwan O they have a focus group to discuss this topic.

CHAIRMAN: Were there minutes kept of these meetings? Was it documented in any way?

MS DEBBY WONG: (In English) I'm not sure we have the document.

MS MAGGIE WONG: You mentioned a focus group, is it different from the study group?

MS DEBBY WONG: (In English) Similar. Similar, the study group to study the sharp bend location.

MS MAGGIE WONG: But what about the membership in this focus group?

MS DEBBY WONG: (In English) I think they all left KMB. The department -- the depot manager did mention they are all -- some is retired, some is resigned.

CHAIRMAN: So the group of people involved in studying sharp bends either retired or resigned; is that what you are saying?

MS DEBBY WONG: (In English) Mm-hmm.

CHAIRMAN: Thank you.

MS MAGGIE WONG: So when did they retire or resign?

MS DEBBY WONG: (In English) In these few years. I don't exactly remember the date.

MS MAGGIE WONG: So after they retired or resigned what happened to the focus group?

MS DEBBY WONG: (In English) We changed to each depot to keep monitor the safety issue. Not by this section, safety -- SSQ -- the ownership shifted to each depot, operations.

CHAIRMAN: So rather than being centralised it became dispersed to each depot?

MS DEBBY WONG: (In English) Individual. Mm-hmm.

MS MAGGIE WONG: When you mentioned each individual depot, would you discuss with the bus captains that based on their experience that certain road or bends are dangerous, and then to warn the other bus captains that they have to be careful? Would you do something like that?

MS DEBBY WONG: (In English) We will analyse some, the accident location, bus captain experience, in the sharing group, the bus captain experience, and like this. To analyse the -- any hazard in -- on the road, and we need to maybe if that is necessary, we will discuss with training school, the instructor, how to train some bus captain to pay attention to the road.

MS MAGGIE WONG: This sharing group, is this only confined to individual depot, or would there be discussions amongst different depots?

MS DEBBY WONG: (In English) In -- because different location -- it depends on each depot. They will individually discuss with training school, or we have some meeting, maybe with training school we will -- we will provide to the -- any time actually, not specific, not specific in any meeting.

MS MAGGIE WONG: How often you hold this sharing group?

MS DEBBY WONG: (In English) Like what I say. It is -- if we analyse some traffic accident, so it is not time limit to them. So another is bus captains sharing experience, then if we find their location is a hazard, we will talk to the instructor, or make some notice or reminder to remind bus captain to pay attention on some hazard location. So there is no specific meeting or any time to make a promise in that meeting, or what.

MS MAGGIE WONG: You refer to making some notice, or reminder to remind bus captains to pay attention on some hazard location. Are they in writing, or orally?

MS DEBBY WONG: (In English) Both. Mostly it is in writing.

MS MAGGIE WONG: Within each individual depot?

MS DEBBY WONG: (In English) Yes.

MS MAGGIE WONG: Can you provide us with some of these notices or reminders?

MS DEBBY WONG: (In English) I can provide to you later.

I don't it have now.

MS MAGGIE WONG: Thank you.

So about these individual notices, are they reactive to accidents? That's the first question. Are they reactive to accidents? The notice was issued reactive to accidents?

MS DEBBY WONG: (In English) For your first question, yes, sometimes it is react to the accidents. Like a reminder, for the bus captain.

MS MAGGIE WONG: And the second is, are they reactive to bus captains' complaints, or if I put it correctly, is it bus captains' views, initiative to inform you about certain road condition?

MS DEBBY WONG: (In English) Yes, if there is road condition will create some accident we will also issue some reminder for bus captain.

MS MAGGIE WONG: My question is, sorry, are they reactive -- are they study -- is it a study carried out by your company's initiative, or due to the bus captains' voicing out their views about certain road conditions? Which one is that?

MS DEBBY WONG: (In English) If the bus captain voice out that, we will verify the cause, or something we can protect, I mean, prevent any accident appear again, so we will find out the root cause first. If there is

really can prevent, we can do something. Like, maybe, remind them some road conditions have some -- like after the raining, the tree branches always will create some accident, we will remind them to be patient when they drive near the roadside, so we will remind something like "Be careful driving near that road section".

MS MAGGIE WONG: So that's reactive to the experience of the bus captains' views?

MS DEBBY WONG: (In English) Yes.

MS MAGGIE WONG: And not something initiated by the bus company; is that what you are saying?

CHAIRMAN: I think what you have told us is that you reacted to accidents and you also listened to what bus captains had to say?

MS DEBBY WONG: (In English) Yes.

CHAIRMAN: That's how you formulated these cautionary advices?

MS DEBBY WONG: (In English) Mm-hmm. Right.

MS MAGGIE WONG: Thank you.

Can you give us a few examples during your time perhaps in Tuen Mun, as to some of the road that you have identified as dangerous or posed risk?

(Pause)

CHAIRMAN: If you can't, just say so.

MS DEBBY WONG: (In English) Okay. No.

MS MAGGIE WONG: So you can't identify at the moment? Okay.

MS DEBBY WONG: (In English) Yes.

MS MAGGIE WONG: Concerning the last topic, it is about lost trip.

We have heard some evidence that there are a number of lost trips due to the fact that -- they are due to various reasons; sometimes due to road conditions and sometimes due to the inaccurate estimation of the journey time.

Can you confirm if that's what happened --

CHAIRMAN: Before you do that, can you tell us what a lost trip is?

MS DEBBY WONG: (In English) Lost trip will be -- we have a scheduling service that we have gazette -- like gazetted trips that we promise to make a certain service level, in a certain period there is a gazetted schedule. And there is a -- if we cannot follow the scheduling of service, that trip missing was named lost trip.

CHAIRMAN: So, inability to fulfil your gazetted schedule?

MS DEBBY WONG: (In English) Yes.

MS MAGGIE WONG: Does this happen in the Tuen Mun depot that you managed?

MS DEBBY WONG: (In English) Yes, lost trip happened there.

MS MAGGIE WONG: Can you tell us the reasons why there were lost trips?

MS DEBBY WONG: (In English) Basically we will have the crew, the sufficient of crew. Second will be the traffic condition will create -- the bus cannot arrive on time. And the third will be the bus breakdown, we don't have spare buses to replace shortly.

Fourth will be if there is an urgent -- sudden demand happened in other area, we need to redeploy some service from gazetted service to others to make the demand solved.

CHAIRMAN: To meet the demand?

MS DEBBY WONG: (In English) Yes. So there is these reasons will create lost trip. Some -- actually, we are doing some -- actually, we always need to review the -- assess the scheduling of service time and time. Actually, when we create the schedule of service we need to review the -- every area, any changes, if there are changes maybe my during the off peak, the service do not need so frequent, so we will submit the application to Transport Department to reduce some schedule of service, some trips, so make use this time for bus captain for more rest time or to let them have more time to rest.

So we, on and on going, we will apply this to Transport Department and this can also reduce the trips, so we can -- may have less lost trip rates.

CHAIRMAN: Do Transport Department measure your lost trips?

Is this something you have to report?

MS DEBBY WONG: (In English) Yes.

MS MAGGIE WONG: How do you assess the journey time when you gazette all these scheduled trips?

MS DEBBY WONG: (In English) Okay, for the first time we will use our patrol car. Maybe for the first time the timetable issued we will use our patrol car to follow the scheduled trips, scheduled routing to measure the -- estimate the journey time. After the timetable implement, maybe after certain period the environment is changed, we will analyse the previous days of regular service to summarise the journey time to average the journey time to estimate any changes after the timetable implement.

So that is how to generate the journey time.

CHAIRMAN: So if you find that the journey time in fact is taking longer than the scheduled time, what do you do about it?

MS DEBBY WONG: (In English) We will apply to TD to make the scheduling service -- to revise the scheduling of service.

CHAIRMAN: Is that something that you do regularly?

MS DEBBY WONG: (In English) Yes.

CHAIRMAN: When did you last do that?

MS DEBBY WONG: (In English) Actually, last month we also

submit that -- not last month, in May.

CHAIRMAN: Thank you.

How long typically does it take to get a response from the Transport Department?

MS DEBBY WONG: (In English) It will take long, because Transport Department say they will arrange a survey. Actually, not only we add the journey time, if we will, that's necessary, we also review the non-peak hour, the trip may be not that frequent, maybe reduce some trips, and the Transport Department need to make a survey, and then it will take a very long time for the process.

CHAIRMAN: Are you talking about years? How long are you talking about?

MS DEBBY WONG: (In English) Some certain months, maybe a year, Mr Chairman, yes.

MEMBER LO: Have you used the black box information to ascertain that the trip time is actually longer?

MS DEBBY WONG: (In English) Actually, we don't use black box for the journey time. We use -- we have a system, our -- our KMB system, which is the bus captain use their Octopus to report on the bus terminus, bus station, when they reach any bus station they will need to tap the Octopus card so that we can know that they arrive, and if there is some uncertainty, we will use its black box to see their arrival time. Actually, if

the bus arrive, bus captain reach to us report they arrive. So we will actually use our internal system, TER system. Instead of black box.

MEMBER LO: But TD does not look at that as sufficient evidence to change a timetable?

MS DEBBY WONG: (In English) No. I don't know how they do the analysis.

CHAIRMAN: But isn't the equipment that you have, we call it a black box, if you like, isn't it capable of doing this automatically? Or don't you know?

MS DEBBY WONG: (In English) You mean the black box data do it automatically?

CHAIRMAN: Yes. Tell you the journey time.

MS DEBBY WONG: (In English) Actually, we will keep it in a database. Once we need to retrieve the data, we will recall that to see if the bus arrive on time, or something, or the speed of the bus. So not actually we rely on this to monitor journey time.

CHAIRMAN: The system you use is the fact that the bus captain uses his Octopus card on arrival at a terminus, is that it?

MS DEBBY WONG: (In English) Yes.

MS MAGGIE WONG: And what are the consequences for your company if you have lost trips?

MS DEBBY WONG: (In English) It depends on -- "what are

your consequences"? Actually, we try to deploy sufficient crew, bus captain to make a lost trip -- minimise the lost trip. That's what -- our solution. And the other solution maybe what I mentioned, try to reduce the off-peak trips to make less bus captain to use on the road, and that's another solution.

MS MAGGIE WONG: Ms Wong, do you know a person call Alok Jain?

MS DEBBY WONG: (In English) Yes, our planner, ex DOD.

CHAIRMAN: What does that stand for?

MS DEBBY WONG: (In English) Deputy operations director.

CHAIRMAN: Thank you.

MS MAGGIE WONG: During your time, have you been able to have a discussion or meetings with Alok Jain in relation to the safety aspects of franchised buses?

MS DEBBY WONG: (In English) In my understanding, I only -- the planning issue, I will discuss with him. Because he have another --

(Interpreted) He had got another sort of capacity. He was the planner, he was the head of planning.

MS MAGGIE WONG: You mentioned planning issues. What is planning issue?

MS DEBBY WONG: (In English) Because we have a division named "Planning", we will discuss with Planning Department on some routes development, or the bus type

issue with the Planning Department.

MS MAGGIE WONG: In relation to the bus type issue, would you discuss black box?

MS DEBBY WONG: (In English) Not with him.

MS MAGGIE WONG: But during your time did you have meetings with this Planning Department concerning black box?

MS DEBBY WONG: (In English) No.

MS MAGGIE WONG: Mr Chairman, I have finished my questioning.

CHAIRMAN: Thank you.

QUESTIONS FROM THE COMMITTEE

MEMBER AUYEUNG: I just want to follow up on the comment you made earlier, that when a particular spot to be defined as hazardous by yourself or a bus captain, do you also have a procedure to report it to the head office, or the training instructor?

MS DEBBY WONG: (In English) We will discuss with training instructor for the -- any hazard. Something like maybe a -- sharing from experience, maybe we have a terminus, we see there always have accident when bus captain turning into the bus bay, like there is a shelter, maybe a shelter erected there which will create some hazard there, we will discuss with training school how to make more training on bus captain, or do some modification on the shelter issue.

So this kind of review or something experienced from bus captain, we will do, as what I said, we will verify the final, the root cause, and then we will try to find a way out, how to solve that.

MEMBER AUYEUNG: Is this communication in writing, or verbal?

MS DEBBY WONG: (In English) Both. Both will have. Sometimes e-mail, e-mail to training school.

MEMBER AUYEUNG: Thank you.

The other question is during your time working in your particular responsibility, have you ever received complaints from bus captain that the resting facilities are not good enough?

MS DEBBY WONG: (In English) Mm-hmm, yes. We -- sometimes we will receive some bus captain request, maybe a bigger resting area, like the kiosk will be too small, they want one more, or they want more facility. Like they want distilled water, they want hot and cold water, so we will try to use our force to make them happy.

MEMBER AUYEUNG: Thank you.

MEMBER LO: This is just a very open question. I know you are a very experienced frontline manager.

Are there issues that you think the company can do, maybe should do, but has not done, other than the aspects we have already discussed, about safety, that

you observe over the years, that we should be aware of?

MS DEBBY WONG: (In English) I think for the safety issue, not only our company can do everything. Like what I say, some road conditions, and some -- road condition is not -- maybe, the design of the road may have some not -- not good for double-decker bus or something -- so not the company can do, it is the design of the road, or Transport Department maybe can do something on some road design.

CHAIRMAN: Thank you, Ms Wong. Thank you for coming to assist us by giving evidence. But your evidence is now complete, and you can withdraw from the table. You can stay and listen to your colleague if you wish, or you are free to leave.

But we will take the evidence now from Mr Yeung.

EMPLOYEE OF KOWLOON MOTOR BUS COMPANY (1933) LIMITED:

MR KELVIN YEUNG

(Evidence given in Cantonese and English, transcription of the simultaneous interpretation and/or English)

CHAIRMAN: Thank you, Mr Yeung for coming to assist us by giving evidence for accepting our invitation to do so. You have heard me explain to Ms Wong and you have seen how we proceed.

So I'll move straight away and ask Ms Wong to ask you questions.

MR KELVIN YEUNG: Good morning, Mr Chairman, and good morning, members. Could I have your permission to make some opening remarks, thank you.

Good morning, ladies and gentlemen. I would like to thank the Committee for inviting me to today's hearing. Just now, Ms Debby Wong spoke. Like her, I'm also an assistant manager. Others would call us zone head, in Chinese "(Chinese spoken)". I'm also responsible for the operation of Tuen Mun depot. As has been pointed out -- perhaps I should speak slower for the sake of the interpreters.

Now, for Tuen Mun depot, we are responsible for Tuen Mun, Yuen Long and Tin Shui Wai. For zone heads the main duty is such that he or she will take care of the operation of the bus service including bus routes and frontline bus captains, terminus supervisors, as well as other staff members, as well as facilities at the terminus like the rest kiosk. They are within our duties.

We have to closely liaise with the frontline colleagues. Therefore, we have to know what the need, and at the same time other than dealing with the frontline colleagues regularly we have to meet with the management. We have to communicate with them, having meetings with them, telling them or relaying to them

what frontline colleagues have said, and regularly I have to talk about what happens to the individual routes, like what difficulties we have encountered.

So we have to be aware of the directions of the management.

So I can say that for zone heads, we are sort of like a bridge, a very important one, between the frontline colleagues as well as the management.

Allow me to say a few words about myself.

I have been with the KMB for almost 10 years. I started at a junior level. 10 years ago I joined the Sha Tin depot as an inspector, operations inspector. It is an outdoor sort of a duty.

My main duty was to assist the passengers as well as frontline bus captains.

If bus captains encounter any problems then we have to arrive at the scene to provide assistance. I was also responsible for the terminus facilities. So there was a lot for me to take care of.

Two years later I was promoted and I became an officer for operations. So it is an office duty. Not outdoors, but of course I have to go out to pay such visits as well.

For the first two years, as far as the safety and service quality department is concerned, I would have a

close relationship because I was responsible for safety matters.

Two years later, I was deployed to Tuen Mun, Yuen Long, Tin Shui Wai responsible for the operations, and then the company deployed me to take up a ROM project, so that's the real-time operation management.

CHAIRMAN: Very sensibly you admonished yourself that you would take this slowly, but you are not doing it. Can I ask you to slow down.

MR KELVIN YEUNG: (In English) Slow down? Sure, let me slow down. Would you like me to repeat it again --

CHAIRMAN: No --

MR KELVIN YEUNG: (In English) -- or just keep going?

CHAIRMAN: -- but do it slowly.

MR KELVIN YEUNG: (Interpreted) Two years later I was responsible for operations at Tuen Mun Tin Shui Wai. At that time the company deployed me to take up a project called ROM. I gathered from previous hearing sessions that's the real-time operation management. So for ROM and for the SSQ department, I'm experienced.

So I am -- I welcome questions from you on those two topics. This year, unfortunately, there was a very serious bus accident in February and I found that KMB has become the focus point of the media, political parties, trade unions, and even some former colleagues

of the KMB have aired different views regarding the company.

It is not just myself, but my colleagues have also found that quite a lot of the view points or the allegations were untrue. Together with the other six zone heads we believe that such untrue allegations regarding our bus captains' frontline officers, back office colleagues and the management, such untrue allegations are most unfair. Therefore, we have co-signed a letter addressed to our board of directors. We would like to tell them what we have seen, and what actually happened.

So it was a brief one, but we told the board of directors what we saw, and then we forwarded the letter to the Committee for your reference. I know that a few zone heads have had correspondence with you. Today only Debby and myself can find time to attend your hearings. What we want to do is that in the capacity of a zone head we would like to tell you what actually happens.

From my point of view, before the accident, in other words, before February, if you asked the public or residents what they feel about KMB service in recent years, they would say that service has improved, and they are doing rather well in terms of the bus service, and facilities, real-time arrival information,

et cetera. There have been improvements.

Unfortunately, after the accident in February, if you ask the residents again --

CHAIRMAN: Mr Yeung --

MR KELVIN YEUNG: (In English) Yes.

CHAIRMAN: Thank you for making the opening statement, but you have occupied quite a lot of time already --

MR KELVIN YEUNG: (In English) I am nearly finished.

CHAIRMAN: You can make some closing remarks if you like, but we are going to move now to questions.

EXAMINATION BY MS WONG

MS MAGGIE WONG: Mr Yeung, thank you for coming. You mentioned that you joined KMB 10 years ago, that would be around 2008?

MR KELVIN YEUNG: (In English) 2009.

MS MAGGIE WONG: Since when you became the operator in charge of the Tuen Mun depot?

MR KELVIN YEUNG: (Interpreted) Around 2013.

MS MAGGIE WONG: And we can see that in your statement that the -- or rather in your opening statement, Tuen Mun depot is responsible for bus operation of Tuen Mun, Yuen Long and Tin Shui Wai, and you are only responsible for Tuen Mun, correct?

MR KELVIN YEUNG: (Interpreted) In 2013, I once managed the stations in Yuen Long and Tin Shui Wai. I was

responsible for a little more than half a year, and after that, I was responsible for Tuen Mun, and I was the zone head of Tuen Mun. Until July this year -- well, after July I was rotated to Yuen Long and Tin Shui Wai, so I'm very familiar with Yuen Long, Tuen Mun and Tin Shui Wai.

MS MAGGIE WONG: And you mentioned in your submission there are 31 bus terminus with full-day bus services under Tuen Mun depot. So currently, how many bus termini are you managing?

MR KELVIN YEUNG: (Interpreted) For Yuen Long, Tuen Mun and Tin Shui Wai there are a total of 31. Ms Wong mentioned 30, because one terminus only started operation at the end of June. So there might be a discrepancy.

For bus terminals with full day service --

CHAIRMAN: The question was very simple. How many bus stations do you manage? Don't tell us your mental process at arriving at the answer. Just give us the answer.

MR KELVIN YEUNG: (Interpreted) But I must tell you how we ascertain the number of 31.

CHAIRMAN: No, that's not necessary, Mr Yeung. Listen to the question, and please respond directly to the question.

MR KELVIN YEUNG: (Interpreted) There are 31 stations with

full-time service.

MS MAGGIE WONG: How many terminals do you manage?

MR KELVIN YEUNG: (Interpreted) In July I was responsible for stations in Tuen Mun, Yuen Long and Tin Shui Wai.

CHAIRMAN: The question was: how many stations do you manage?

MR KELVIN YEUNG: (Interpreted) 31 terminals with full-day service.

CHAIRMAN: Thank you.

MS MAGGIE WONG: So you manage the station together with Debby Wong for Tin Shui Wai as well, co-manage?

MR KELVIN YEUNG: (In English) Correct, and Yuen Long as well.

MS MAGGIE WONG: But you are of the same rank as Debby Wong, is that correct, or you are of a higher rank?

MR KELVIN YEUNG: (Interpreted) I'm mainly responsible for Tuen Mun terminals, but the company wants me to look at Yuen Long and Tin Shui Wai as well. But for Yuen Long and Tin Shui Wai, Debby and Amanda are chiefly responsible.

MS MAGGIE WONG: And in your opening statement you stated that you take care of bus routes and front line of bus captains, et cetera. Do you know how many bus stations have special shifts?

MR KELVIN YEUNG: (Interpreted) Of the 31 stations, if you

don't mind, I will count them now.

From my recollection, all of them have bus captains on special shifts.

MS MAGGIE WONG: And would resting facilities be provided to all 31 bus stations or bus termini?

MR KELVIN YEUNG: (Interpreted) Yes, there are resting facilities.

MS MAGGIE WONG: All 31?

MR KELVIN YEUNG: (Interpreted) If you need, I would like to elaborate on this. Of the 31 bus stations, there are special shifts, but the bus captains might not end their working days at the same station, so at all 31 stations there would be resting facilities for captains.

MS MAGGIE WONG: Mr Yeung, you mentioned there are two types of rest kiosk. We have heard that, type A and type B, and you stated that for type A, the kiosk is about the size of 17 square feet, and for type B, 50 square feet. And we heard from Debby Wong that there is a bigger kiosk. Can you tell us how much bigger in comparison with type A and type B?

MR KELVIN YEUNG: (Interpreted) For type A it can accommodate a maximum of two staff. For type B, the size is around double of type A. So in other words, if you put two type A kiosks together, they would look around the same size as one type B kiosk. However, if

you place two type A kiosks there would be a wall in between. So the space would be -- would not be able to be used some fully.

CHAIRMAN: Is this designation A and B a KMB designation?

MR KELVIN YEUNG: (Interpreted) Yes. These are our two standard kiosks: type A and type B.

MS MAGGIE WONG: The Transport Department has made no guidelines on provision of rest facilities; is that correct? No guidelines whatsoever.

MR KELVIN YEUNG: (Interpreted) Correct. As far as I know, they do not have guidelines in place. So KMB would decide what kind of facilities to install.

MS MAGGIE WONG: There is another type you mentioned. It is tailor-made kiosk, to cater special need of individual bus terminus. Can you tell us how many of these tailor-made kiosks were under your management?

MR KELVIN YEUNG: (Interpreted) Let me count.

There are two to three. But I would have to verify the exact number of tailored kiosks.

MS MAGGIE WONG: And what is meant by "tailor-made"?

MR KELVIN YEUNG: (Interpreted) Sometimes the applications for certain kiosks were not approved by TD or the Housing Department. For example, the sizes might be inappropriate or they might stand in the way of other facilities such as facilities for the blind. Then we

might have to tailor special sizes to fulfil the department's requirements.

MS MAGGIE WONG: What is the approximate size of this tailor-made kiosk?

MR KELVIN YEUNG: (Interpreted) The total area should be similar to a type B kiosk. If the width is too much, we might narrow it down, but then we might make the kiosk longer. So that is the situation as I know.

MS MAGGIE WONG: Would sleeping sofa or benches be provided in all or some of these resting facilities that you manage?

MR KELVIN YEUNG: (Interpreted) In Yuen Long, there are three locations with sleeping areas with benches for captains.

MS MAGGIE WONG: You mentioned three locations with sleeping areas. Can you tell us where?

MR KELVIN YEUNG: (Interpreted) Tuen Mun depot, Tuen Mun town centre, and Tuen Mun south depot: at Tuen Mun south depot there are no sleeping benches, but there is still space for captains to sleep.

MS MAGGIE WONG: How many sleeping benches were there for each of these locations?

MR KELVIN YEUNG: (Interpreted) I cannot give the exact number now. But there are approximately five benches.

MS MAGGIE WONG: For each of them?

MR KELVIN YEUNG: (Interpreted) Yes, at each location.

MS MAGGIE WONG: And that location would be shared by how many bus captains?

MR KELVIN YEUNG: (Interpreted) For all bus captains, whether or not they are on special shifts, they can use the facilities. I don't have the exact figure on hand.

MS MAGGIE WONG: Can you give us an estimate of the number of bus captains that would use each of these locations?

CHAIRMAN: Are you talking about any one time, or what?

MS MAGGIE WONG: Any one time.

MR KELVIN YEUNG: (Interpreted) From what I see at the stations, most of the time the five benches would not be fully occupied by captains, so at any one time less than five captains would be using the facilities.

MS MAGGIE WONG: At what time did you go down to these locations?

MR KELVIN YEUNG: (Interpreted) Usually in the so-called middle hours, in other words from 11 am to 3 or 4 pm. When I visit in those hours, sometimes benches would be occupied by captains.

MS MAGGIE WONG: How frequently did you go down for these three locations?

MR KELVIN YEUNG: (Interpreted) Well, our duty is such that for every week I have to visit different terminus. So for the three places on a monthly basis I would go at

least one to two times. For Tuen Mun depot I would go more frequently, because my office is right at Tuen Mun depot.

MS MAGGIE WONG: And may I now go to some of the examples that you mentioned in your submission that you stated that there are difficulties in obtaining permission or in obtaining successful application for resting facilities.

It is at page 181-1 to 181-2.

CHAIRMAN: Of which bundle?

MS MAGGIE WONG: Of FE bundle.

And in your statement at the bottom you mentioned three locations that require improvement, and the first one is So Kwut Wat, newly introduced on 25 June 2018, and you state there had that:

"... provision of a type A kiosk and chemical toilet is needed. (application ... is pending since 13 June 2018)."

May I first ask you, how long this So Kwut Wat bus terminus existed?

MR KELVIN YEUNG: (Interpreted) If you talk about full-day operation, it was introduced on 25 June 2018.

MS MAGGIE WONG: So this was a bus stop newly placed, instead of being there for years?

MR KELVIN YEUNG: (Interpreted) Correct.

MS MAGGIE WONG: When you introduced this new bus terminus, with the Transport Department, did the Transport Department require at any stage that your company do provide resting facilities to bus captains?

MR KELVIN YEUNG: (Interpreted) The TD didn't require the provision of such facilities for bus captains.

MS MAGGIE WONG: The Transport Department, when they approved this bus terminus, were there requirements set out in writing?

MR KELVIN YEUNG: (Interpreted) What do you mean? You mean when we introduced the route, whether there is any written correspondence? The answer is yes. We have to formally submit papers to get a formal application, and the TD will formally sort of reply to us, saying that it is approved.

MS MAGGIE WONG: When the Transport Department approves a certain route, would they, in your experience, normally impose certain conditions?

MR KELVIN YEUNG: (Interpreted) What do you mean by "conditions"?

MS MAGGIE WONG: For running that particular route.

MR KELVIN YEUNG: (Interpreted) Yes, the TD would ask for the alignment and the bus stops along the route, and the journey time, the journey distance, the frequency. All such will be clearly stated in their approval letter.

MS MAGGIE WONG: In relation to this So Kwut Wat terminus, would there be special shifts for this particular bus terminus?

MR KELVIN YEUNG: (Interpreted) Yes.

MS MAGGIE WONG: So because you stated there that the application was only made since 13 June 2018, so at the moment there will be no resting facility, is that correct, for that So Kwut Wat bus terminus?

MR KELVIN YEUNG: (Interpreted) Correct, for so Kwut Wat bus terminus we have placed a type A kiosk and a chemical toilet -- we would like to do so, but so far we have not got the approval from the TD.

MS MAGGIE WONG: How many bus captains are working in that So Kwut Wat bus terminus?

MR KELVIN YEUNG: (Interpreted) If you look at the number of bus captains involved, if I remember correctly, I would say three or four of them.

MS MAGGIE WONG: How many of them are on special shifts?

MR KELVIN YEUNG: (Interpreted) One.

MS MAGGIE WONG: Do I take it that the type A kiosk is installed notwithstanding the fact that approval has not been given?

MR KELVIN YEUNG: (Interpreted) This is a fact. We haven't got the approval, but we have already installed it there, because we have commissioned the route. If we

don't have it there, it means that the bus captains can not take a rest there.

MS MAGGIE WONG: And the second example you gave is Po Tin Estate, in which you state there that in order to cater for more bus captains for resting, there is a need to convert type A to type B kiosk, and you applied to the Housing Authority since 24 November 2014.

Can you tell us what is the progress so far as this -- because you are applying on 24 November 2014. Is the current state still type A kiosk, or did you do similar thing as in So Kwut Wat Estate, installing type B nevertheless?

MR KELVIN YEUNG: (Interpreted) For Po Tin terminus, we used to have three type A kiosks. As I have said, well, two of them were merged together, but then the space was not put to maximum use, we reviewed the situation, we found that it wasn't adequate, so we applied to the Housing Department hoping that the two merged type A kiosks can be converted into a type B kiosk, and for the third type A kiosk it should become a type B kiosk. As of this moment, we have not got any approval from the HD, but still, we have already replaced the two type A kiosks by a type B kiosk. So the replacement has taken place. We are yet to convert one more type A kiosk into a type B kiosk.

MS MAGGIE WONG: Why do you see a need to convert type A to type B for Po Tin Estate?

MR KELVIN YEUNG: (Interpreted) We went there, we saw the bus captains were outside the kiosk eating their meal box, because there was not sufficient space within the kiosk. Bus captains have also told us that they didn't have sufficient space, therefore we believe that two type A kiosks would not be adequate.

MS MAGGIE WONG: Are there special shifts for this Po Tin Estate?

MR KELVIN YEUNG: (Interpreted) Yes.

MS MAGGIE WONG: How many bus captains are using the two type A kiosks?

MR KELVIN YEUNG: (Interpreted) I haven't got the detailed figures as to how many bus captains doing special shifts are using the facilities. My understanding is that many of them go home to take a rest.

MS MAGGIE WONG: How many routes are running for this Po Tin Estate?

MR KELVIN YEUNG: (Interpreted) For whole-day routes there are two of them.

MS MAGGIE WONG: What about non-full day?

MR KELVIN YEUNG: (Interpreted) For non-full day service another two bus routes. They have morning service only.

MS MAGGIE WONG: Mr Chairman, I see the time. May we take

a break?

CHAIRMAN: Certainly.

Mr Yeung, we are going to take a break until 12 o'clock by that clock on the wall behind you.

MR KELVIN YEUNG: (In English) Thank you.

(11.41 am)

(A short break)

(12.00 pm)

MS MAGGIE WONG: Mr Yeung, just to wrap this matter up, do you mind providing us with some figures about Po Tin Estate, in terms of how many bus captains are using the kiosk in the Po Tin Estate, in terms of special shifts.

And you have also stated in your submission that it normally requires a long lead time for about five years before your application for resting facilities can be approved, and you cited four examples at page 181-2; is that correct?

MR KELVIN YEUNG: (Interpreted) Correct.

MS MAGGIE WONG: I'm going on to another topic, Mr Yeung.

In your opening statement you said you are experienced in real-time monitoring, ROM device, and also the SSQ, is that correct -- SSQ department, that is safety and service quality department; is that correct?

MR KELVIN YEUNG: (Interpreted) Correct.

MS MAGGIE WONG: And you said that two years later, after

you were assigned to the Tuen Mun depot you were assigned to take up the project concerning ROM. Can you tell us when that was.

MR KELVIN YEUNG: (Interpreted) Regarding the ROM project, I think it was around about 2013 that I started to take part.

MS MAGGIE WONG: Since 2013?

MR KELVIN YEUNG: (In English) Yes.

CHAIRMAN: I am sorry, what was that question? Because you talked over the interpretation.

MS MAGGIE WONG: I am so sorry, since 2013 Mr Yeung was assigned --

CHAIRMAN: We got that one, then you asked another question which produced an affirmative answer, but we didn't hear the question.

Never mind. Move on then.

MS MAGGIE WONG: I think my question is whether it is since 2013, and then Mr Yeung said "Yes".

Do you know a person by the name of Raymond Cheng?

MR KELVIN YEUNG: (Interpreted) Yes.

MS MAGGIE WONG: Can I take you to his statement that he mentioned, something about a study that he conducted for safe driving in the sharp turns back in 2013. That's at page 96-4 of FE bundle.

MR KELVIN YEUNG: (Interpreted) Yes.

MS MAGGIE WONG: Can you read three pages, 96-4 to 96-6.

CHAIRMAN: Yes?

MS MAGGIE WONG: There are a few questions I would like to ask.

First, at page 96-4, Mr Cheng mentioned:

"The Safety and Quality Service Department invited 4 Depot Managers, the representatives from Bus Captain Training School and bus maintenance section of Service Department to form a study group to looking deeply into all the sharp turns within [KMB] bus route network."

Are you part of this study group?

MR KELVIN YEUNG: (Interpreted) At that time I wasn't a manager, so I wasn't on the study group. But then the then manager did ask for my opinions.

CHAIRMAN: Who was that?

MR KELVIN YEUNG: (Interpreted) If you talk about depot managers, at that time it was the general manager for Tuen Mun depot, Mr Woo Kin Keung, who has already retired.

CHAIRMAN: Thank you.

MS MAGGIE WONG: And according to this study they have narrowed it down to the top 29 corner turns that may cause serious overturning accidents. Did you know about these 29 corner turns?

MR KELVIN YEUNG: (Interpreted) Yes.

MS MAGGIE WONG: And did you contribute to the narrowing down to 29 corner turns?

MR KELVIN YEUNG: (Interpreted) As far as I can recall, I think at that time there were more than that. I think they identified certain sharp bends locations as identified by Mr Raymond Cheng. I recall that there were more than 20 plus.

MS MAGGIE WONG: You mentioned that according to Mr Cheng he has identified more than 29 turns. How did you know that?

MR KELVIN YEUNG: (Interpreted) I think from internal communication, for our driving instructors, I did have a discussion with them over such a topic. My understanding was that from our driving instructors, they said that for sharp bends, if it is 90-degrees or almost 90 degrees, they would regard it as a sharp bend. So I understand there were more than such a number of locations.

MS MAGGIE WONG: If you turn over the page at 96-6, at the top it mentioned that:

"The colleagues from the Safety and Service Quality Department accompanied all the colleagues from the study group to test all the 29 turns in different road conditions, different speeds, different passenger load conditions and video-recorded the whole study for future

reference."

Did you know about this video-recorded study?

MR KELVIN YEUNG: (Interpreted) At the time I heard that they invited driving instructors to carry out test runs at such locations. As to whether it was really done, and what extent, and how many was covered I don't know. But I did hear about such a matter, and I was also aware that they had the idea of making a video recording.

MS MAGGIE WONG: You mentioned that you heard from the driving instructors. Are those driving instructors still employed by KMB?

MR KELVIN YEUNG: (Interpreted) My understanding is they are still working with the company, I mean the driving instructors.

MS MAGGIE WONG: Can you tell us who?

MR KELVIN YEUNG: (Interpreted) Well, I don't know who actually had meetings on that day. There were dozens of driving instructors, I can't give you the names of the driving instructors.

MS MAGGIE WONG: And if we read on from that paragraph, it appears that this video-recorded study was carried out. Because it is stated there that important data was collected from these experiments to come up with a set of safety guidelines.

And if we follow on and read from that paragraph, he

further stated:

"From the study, we were able to produce a safety booklet ..."

He subsequently clarified as small printed cards:

" ... for Bus Captains detailing each potentially dangerous turns' exact location, direction, and road nature, road condition, past record, related photos [et cetera]."

And he suggested 31 safety driving suggestions from a study of over 1,500 studies.

Did you know about these small printed cards for bus captains?

MR KELVIN YEUNG: (Interpreted) Yes.

MS MAGGIE WONG: Have you seen one of them?

MR KELVIN YEUNG: (Interpreted) Yes.

MS MAGGIE WONG: Are they still in existence?

MR KELVIN YEUNG: (Interpreted) No longer in use.

MS MAGGIE WONG: Can you retrieve a copy?

MR KELVIN YEUNG: (Interpreted) I'm not sure whether we still get them in our office. Some frontline bus captains and some driving instructors have different views for such cards, so they have not formed part of our training.

MS MAGGIE WONG: So why are those cards no longer in use?

MR KELVIN YEUNG: (Interpreted) As I have said, some driving

instructors and some frontline bus captains think that it is difficult to define what is a sharp bend. The definition could be wide. If you are to set a speed for each and every sharp bend, it may be beyond the capability of the KMB. Probably the rationale behind the study is to enable each bus captain know about the maximum speed to be deployed at each bend. But then for a bus captain, he will be going through different sharp bends and then for the TD, the speed limit is 50, so they believe that it is better to make a judgment on each and every occasion rather than asking the bus captain to remember the maximum speed for each and every bend.

CHAIRMAN: How did you come to know about these different views?

MR KELVIN YEUNG: (Interpreted) Well, the cards had been issued by the bus captains, and they did reflect their views to me. They said that if they didn't follow the suggested speed limit, in fact they did not commit any offence or speeding within the laws of Hong Kong, but then the company would not say the same.

So if an accident didn't happen, is it a risk? We didn't come to any conclusion.

At that time, we raised the point perhaps we should talk to the TD to sort of install the arrows at the

sharp bends or we can put up some warning signs.

MS MAGGIE WONG: You referred to "at that time we raised the point with the Transport Department to install the arrows at sharp bends". When was that?

MR KELVIN YEUNG: (Interpreted) We suggested to the SSQ, but I do not know whether the SSQ eventually applied to the Transport Department.

MS MAGGIE WONG: When?

MR KELVIN YEUNG: (Interpreted) In 2013. I do not know whether they eventually applied to the TD.

CHAIRMAN: When were the cards issued to the bus captains, as you said?

MR KELVIN YEUNG: (Interpreted) I cannot remember the exact dates, it was around 2013 or 2014.

CHAIRMAN: Is that throughout the bus captains in KMB?

MR KELVIN YEUNG: (Interpreted) Yes, we attempted to distribute the cards but having heard the captains' comments we stopped distributing the cards.

MS MAGGIE WONG: Mr Yeung, you also mentioned that you're experienced in real-time ROM device, and can you tell us how experienced are you in knowing the functions and capabilities of black box?

MR KELVIN YEUNG: (Interpreted) Are you referring to ROM or the black box?

MS MAGGIE WONG: Both.

MR KELVIN YEUNG: (Interpreted) For ROM I was one of the staff representing operations in the design phase of this system. I was involved throughout the development of ROM.

For black box I'm not too familiar with the technologies involved. Many of our computer programmes would be supported by the black box, which would provide the necessary data.

MS MAGGIE WONG: You -- ROM is -- stands for real-time monitoring. So is your involvement limited to the provision of real-time data for passengers to know the schedule time of buses? Or is your involvement wider in terms of the safety aspect?

MR KELVIN YEUNG: (Interpreted) As far as I know, the design of ROM did not involve any safety considerations. We relied on black box data in designing the system and we wanted to make use of the data to determine our frequencies, so safety was not among the considerations.

MS MAGGIE WONG: You mentioned that at that time, I don't think it has been translated -- you mentioned that at that time it was not mentioned at any of the meetings about the issue of safety, in terms of the real-time monitoring. I think you also mentioned "at the meetings".

MR KELVIN YEUNG: (Interpreted) Correct.

MS MAGGIE WONG: What meetings?

MR KELVIN YEUNG: (Interpreted) ROM was a new project, and we started from scratch. We made use of existing black box data, so we would meet regularly and everyone would provide input on how we should design the system.

MS MAGGIE WONG: Since when?

MR KELVIN YEUNG: (Interpreted) It should be 2013, I cannot remember the exact month.

MS MAGGIE WONG: Who were present in these meetings?

MR KELVIN YEUNG: (Interpreted) We had representatives from our IT department, representatives from the operations unit of the four depots, and there was a central department known as the traffic department. They were the project managers who would coordinate these meetings.

MS MAGGIE WONG: Was the planning and development department, or were people from planning and development department present in these meetings?

MR KELVIN YEUNG: (Interpreted) No, they were not involved.

MS MAGGIE WONG: Did you know about Alok Jain?

MR KELVIN YEUNG: (Interpreted) Yes, I know him.

MS MAGGIE WONG: Did you have dealings with him during the time of 2013 to 2015?

MR KELVIN YEUNG: (Interpreted) We did have meetings on certain planning issues.

MS MAGGIE WONG: What are the certain planning issues?

MR KELVIN YEUNG: (Interpreted) For example, we planned bus routes for the coming year, they had to be submitted to TD and the district councils, so he and I took part in meetings with the TD and district councils on bus route rationalisation or other changes.

MS MAGGIE WONG: We have heard evidence from Mr Alok Jain that at that time there was an idea, to use Lai Chi Kok as the real-time operation management centre, or so-called, the operation control centre, in which the data analysis would be done company-wide. Have you heard about that?

MR KELVIN YEUNG: (Interpreted) Yes, I heard about it.

MS MAGGIE WONG: And we also heard evidence that ultimately Lai Chi Kok office was not used in that way. It became an office instead of a real-time operation management centre; is that correct?

MR KELVIN YEUNG: (Interpreted) Incorrect.

MS MAGGIE WONG: So up until now is it still being used as real-time monitoring centre?

MR KELVIN YEUNG: (Interpreted) We had a radio control section. It is still exists today.

MS MAGGIE WONG: Can you tell us what is this radio control section?

MR KELVIN YEUNG: (Interpreted) In Chinese we call it the

KMB radio. It operates around the clock. When captains and other staff run into issues on the road they can call this 24-hour number, and staff would be deployed for support. The radio would have direct lines with the police, and they would exchange intelligence with the ETCC of the Transport Department, and police.

CHAIRMAN: What is ETCC?

MR KELVIN YEUNG: (Interpreted) I don't know what the full name is in English. It is something like the Emergency Transport Coordination Centre.

MS MAGGIE WONG: As you said, it sounds like a radio station for emergency situation instead of real-time monitoring using black box; is that correct?

MR KELVIN YEUNG: (Interpreted) Eventually, ROM transformed into another kind of system, and this system is still in use.

But the current system is a bit different from the design of ROM back then.

MS MAGGIE WONG: You mentioned "a bit different". How different?

MR KELVIN YEUNG: (Interpreted) Back then the idea of ROM was to monitor the separation between buses, and if the system realised that a certain bus is too close to the bus in front, prompts might be given to the bus captain so that they would set off later. So if they are going

too slow, again prompts might be given, or issued to bus captains. The idea was to allow more even waiting times for passengers.

So the idea was that ROM could share some work of terminal regulators, and if the Lai Chi Kok depot was turned into a control centre, then most regulators would not be needed anymore. But now we have retained all the terminal regulators and ROM became a system of monitoring the locations and speed of buses and, if necessary, we can use this database to retrieve the past records of buses.

MS MAGGIE WONG: You mentioned that this system was transformed, or rather a bit different from the original design, or idea. Why would there be a transformation of this idea?

MR KELVIN YEUNG: (Interpreted) I'm not sure about the reason for the decision made by the management, but myself and some staff from the project team felt that if we are to use the system to replace the functions of regulators, the idea was not very realistic, that's why we offered comments to the management that there would be certain risk if regulators are dismissed, but I do not know whether this was the reason for the eventual decision.

MS MAGGIE WONG: Can you tell us when this transformation

took place?

MR KELVIN YEUNG: (Interpreted) It took place in around 2014 or early 2015.

MS MAGGIE WONG: So after 2015?

MR KELVIN YEUNG: (Interpreted) Yes, in the subsequent months.

MS MAGGIE WONG: We also heard from Mr Alok Jain that at the time when this real-time monitoring system was considered, one of the ideas was to nudge the driver to drive in a better way on the road by creating some kind of a system where they could give them feedback about how they are driving and whether they are outliers or whether they are falling within the normal pattern or whether it is good behaviour or bad behaviour.

Have you heard about that?

MR KELVIN YEUNG: (Interpreted) Yes.

MS MAGGIE WONG: What happened to this idea?

MR KELVIN YEUNG: (Interpreted) It was implemented. Now on every bus there is a small device with four lights, and it would emit a low beep reminding bus captains of any improper driving behaviour.

CHAIRMAN: Any improper driving behaviour?

MR KELVIN YEUNG: (Interpreted) Right. Say, for example speeding, or sharp braking, or sudden acceleration, or if the engine has been idling, we don't want the engine

to be on and yet the bus remains stationary. So there will be a beeping sound and there will be light signals.

CHAIRMAN: So four areas?

MR KELVIN YEUNG: (Interpreted) Correct.

MS MAGGIE WONG: Since when do you have this system of alerting drivers by using this alert system, or small device, you call it?

MR KELVIN YEUNG: (Interpreted) Sorry? If you ask for an exact date, I can't recall. But I would say that it must have been there for a few years. If you wanted information, I can go back to check it up for you.

MS MAGGIE WONG: And can you tell us more about the system of black box in terms of monitoring drivers' behaviour?

CHAIRMAN: Before you move on, what thresholds are set to cause this device to illuminate a light and to emit a low sound. What is the threshold for speeding?

MR KELVIN YEUNG: (Interpreted) For the details, I don't think I have got them with me. But there will be a speed, and also the number of seconds taken to accelerate or decelerate, or to brake, but I have not got the figures with me now.

CHAIRMAN: None of them?

MR KELVIN YEUNG: (Interpreted) No.

CHAIRMAN: Does what is on the screen now help you? We have received evidence that this information comes from the

black box that was on the Tai Po bus that had the accident on 10 February of this year.

MS MAGGIE WONG: That is, for the record, BM-66.

MR KELVIN YEUNG: (Interpreted) I have come across such figures. I understand that our management would tune the figures so as to see whether there was a need to enhance the warning. As to whether they are the current set of figures, I'm not sure.

MS MAGGIE WONG: You mentioned the management would tune the figures. Can you tell us who are those members in the management that would tune the figures?

MR KELVIN YEUNG: (Interpreted) I think the management of our engineering department, if they want to modify the system, it will be such engineers who would do it. So in my daily work I have not come across such figures.

MS MAGGIE WONG: If we may go to 67, page 67 of BM bundle. Scroll it down.

In the blue section, blue paragraph, the third paragraph, this is the black box, or telematics company, in which your company has a contract to provide telematics system.

It states there:

"Regarding the real-time operations management system we are not aware about any plans by KMB to introduce such a system. Hence, we are neither aware of

any plan by KMB to interface the technograph/telematics system with the ROM system."

It appears --

CHAIRMAN: I think give Mr Yeung a chance to read this.

This is provided by Openmatics and ZF Friedrichschafen.

MS MAGGIE WONG: Have you finished, Mr Yeung?

MR KELVIN YEUNG: (In English) Finished.

MS MAGGIE WONG: Can you confirm that's the position of KMB? Was this accurately recorded there?

MR KELVIN YEUNG: (Interpreted) As far as I know, yes, it is correct.

MS MAGGIE WONG: Have KMB considered interfacing the telematics system with the ROM system in future?

MR KELVIN YEUNG: (Interpreted) I don't know.

MS MAGGIE WONG: Do you know who would know?

MR KELVIN YEUNG: (Interpreted) I think colleagues from the engineering department.

MS MAGGIE WONG: Can we go back to black box. Can you tell us briefly how KMB would monitor the drivers' driving behaviour by using black box?

MR KELVIN YEUNG: (Interpreted) Well, there are two areas here. First of all, the most straightforward one is about speeding. So for us, in the operations, in the depot, as well as the TQD, they would monitor the situation by using the program. The data would be fed

from the black box, so that's about speeding.

And then, we have got alerts from the small device for driving behaviour, so we would also record the number of times that the light was emitted, so it is an area which falls within the responsibility of the TQD.

CHAIRMAN: Where do you get the information about the number of times that the light is lit and the sound is emitted?

MR KELVIN YEUNG: (Interpreted) Our IT department will send a report telling us how many times the light was activated regarding a driver. For harsh braking, when the light is activated it doesn't always mean that the driver is wrong, because if the vehicle in front has braked, then the driver has to do the same. So the department would review to see whether a particular bus captain has more times that the light is activated and we may get a plain clothes assessor to ride with the bus captain to check if there is anything wrong with the driving behaviour.

MS MAGGIE WONG: You mentioned your IT department will send a report telling you how many times the light was activated regarding a driver. How frequent would that be done?

MR KELVIN YEUNG: (Interpreted) A report for every week or two.

MS MAGGIE WONG: So let's quote an example: if a driver had

a habit of harsh braking, and it is recorded in your data, and that report would only be given to you a week later; is that the position?

MR KELVIN YEUNG: (Interpreted) I would say yes, correct. I can't recall how many days later we get the report.

MS MAGGIE WONG: And would the driver know about his harsh braking habit instantly?

MR KELVIN YEUNG: (Interpreted) If he has harsh braking while driving, the light will be emitted and then the beeping would also be activated.

MS MAGGIE WONG: What would be the consequence of a driver who has a habit of constantly having harsh braking within that week?

MR KELVIN YEUNG: (Interpreted) As I've mentioned, therefore, both departments would work on it.

Let me focus on my department. Well, if the light comes up once, we can't, on that basis, say that there is a problem. We would identify those who are repeaters, we would call them by telephone, and give them a gentle reminder, or as I have said, we will get our inspectors to check if there is anything wrong, and then for TQD, as I have mentioned, they would also get someone who is in plain clothes to act as an assessor to be with the bus captain to assess whether their bus captain is jerky, and whether he has resorted to harsh

braking all the time so as to follow up on such bad driving behaviour.

MS MAGGIE WONG: What is the TQD, sorry?

MR KELVIN YEUNG: (Interpreted) Training and quality assurance department. And their responsibility is to train our bus captains and to carry out assessment about their driving skills, and if necessary, to take follow-up action, say, for example, disciplinary action, or issuing warnings. Such will be the responsibility of this department.

MS MAGGIE WONG: You mentioned that you would identify together with TQD those who are repeaters, and you would first call them by telephone and give them a gentle reminder.

How many of those repeaters were there? Perhaps just quote an example for this year.

MR KELVIN YEUNG: (Interpreted) I think there would be one or two every time. It may not be a repeater. If I see that in a particular report the number of times is more than other bus captains, then I will find out from the list who they are, and I will give a reminder. For others, who have had this once or two times only, we will wait for the next time to see whether they have the same again.

Take Tuen Mun as an example. If you ask for the

number, it would be a couple of them, less than 10.

CHAIRMAN: Per what?

MR KELVIN YEUNG: (Interpreted) 900 or so for the entirety of Tuen Mun depot.

CHAIRMAN: So 900 bus captains but less than 10 would fall into this category; is that what you are saying?

MR KELVIN YEUNG: (Interpreted) Correct.

CHAIRMAN: Thank you.

MS MAGGIE WONG: For those 10, how many times did they have that harsh braking? How many times have they had this problem of harsh braking before it triggers or activates your concerns?

MR KELVIN YEUNG: (Interpreted) Usually it would be a single digit, say five times, or six times. And if we think that in this case he has relatively more such occasions, then we will take the action I referred to.

MS MAGGIE WONG: You mentioned five or six times. Within a day or within a week?

MR KELVIN YEUNG: (Interpreted) Within a week. As to the exact figure I need to verify, I'm not sure.

MS MAGGIE WONG: Can you provide us with the information later?

MR KELVIN YEUNG: (Interpreted) Yes.

MS MAGGIE WONG: Now if the person have this habit -- simply referring to those 10, what would you do? If you

noticed that he had a habit of harsh braking, what would you do apart from telephoning him? Would you talk to him and find out the reasons?

MR KELVIN YEUNG: (Interpreted) Yes, I would call him or a face-to-face interview. I may do that as well.

MS MAGGIE WONG: Have you done that to those 10?

MR KELVIN YEUNG: (Interpreted) Yes, either me or my colleagues would make that move.

MS MAGGIE WONG: Have they improved?

MR KELVIN YEUNG: (Interpreted) Some of them did and some of them would not have a relapse of such behaviour. From my recollection, most would not repeat such behaviour. So there has been improvement in most cases.

MS MAGGIE WONG: We have heard also from Mr Alok Jain's evidence that during one of the meetings, they explored the idea of having a scorecard system for drivers, and one of the systems that was explored is the GreenRoad.com system. And what it does is it gives an analysis of the driver's driving behaviour, and it would fall into three different categories, like red, amber and green.

CHAIRMAN: Have you heard of such a system?

MR KELVIN YEUNG: (Interpreted) Yes.

MS MAGGIE WONG: Since when did you hear about this system?

MR KELVIN YEUNG: (Interpreted) The year was around 2013 or

2014. I cannot remember the exact time. It was quite a few years ago.

MS MAGGIE WONG: Has this system been explored or discussed in one of your meetings with other depot managers or other management, or other members of the management?

MR KELVIN YEUNG: (Interpreted) This was not covered in ROM meetings.

MS MAGGIE WONG: What about meetings other than ROM?

MR KELVIN YEUNG: (Interpreted) Yes, a meeting was convened on this issue.

MS MAGGIE WONG: In 2013 and 2014?

MR KELVIN YEUNG: (Interpreted) Yes, around that time.

MS MAGGIE WONG: So who were present in the management?

MR KELVIN YEUNG: (Interpreted) I would have to check which members were present, because we have many meetings with many people in attendance, I was among the attendees.

For the others, quite a few have left KMB or retired already.

CHAIRMAN: Were records made of this meeting?

MR KELVIN YEUNG: (Interpreted) Yes, I believe there are records and there might be a brief e-mail, but I'm not sure whether I still have it in my e-mail account.

CHAIRMAN: Can you look to see if you do?

MR KELVIN YEUNG: (Interpreted) Yes.

CHAIRMAN: Apart of e-mails, were no minutes kept of such

meetings?

MR KELVIN YEUNG: (Interpreted) For many of our meetings we would have e-mail recaps and they would serve as minutes. I cannot really remember whether minutes were taken for this meeting.

MS MAGGIE WONG: And this system was not used. Do you know why?

MR KELVIN YEUNG: (Interpreted) This system should have been deployed. I'm not very sure about the name mentioned by Mr Alok, but from what you described, it is very similar to one of our current systems.

CHAIRMAN: What is that system?

MR KELVIN YEUNG: (Interpreted) As I said, there would be beeps and lights emitted, and lights of three colours would be shown depending on driving behaviour. And these lights would go on when the bus captain beeped the Octopus card at the terminal, the time of the next bus would be shown, and lights of three colours would be shown to represent the performance of the captain. Green is the best, yellow, and red means something to be improved. And this system is still in use.

CHAIRMAN: So when the bus captain comes off duty and he taps his Octopus card, where is this information displayed for him?

MR KELVIN YEUNG: (Interpreted) It would only be displayed

the first time a bus captain beeps his Octopus card in the morning. I'm not sure whether it would show the records for the previous days, but what I'm sure is that the records for the same day would not be shown. So no information is displayed during sign-off.

CHAIRMAN: Are you saying the information is displayed at the time of sign-on?

MR KELVIN YEUNG: (Interpreted) Yes, information is displayed during sign-on.

CHAIRMAN: And the information relates to what with time period?

MR KELVIN YEUNG: (Interpreted) I would have to check the period concerned. But this is not same-day information. It refers to a past period, but as for the range of that period, I have no such information on hand.

CHAIRMAN: And where is the display? Where does the bus captain see this?

MR KELVIN YEUNG: (Interpreted) At each bus terminal there would be a computer. When a captain returns to the terminal he would have to beep his staff card to obtain such information. The computer would be located outside the kiosk at each terminal facing the bus captains.

CHAIRMAN: And the computer screen depicts what?

MR KELVIN YEUNG: (Interpreted) One of three colours would be displayed to the captain, red, amber and green.

CHAIRMAN: What do they signify?

MR KELVIN YEUNG: (Interpreted) For the detailed definitions, I would have to look it up. Green means very good performance, in other words, the captain has performed very well. Amber means that there is room for improvement in terms of driving behaviour, and this is based on the reminding device on board I mentioned. And red means very poor performance.

As I said, the IT department would generate a list and very likely these captains would get a red light.

CHAIRMAN: Is the colour green displayed simply because no alert was signaled in the previous driving period?

MR KELVIN YEUNG: (Interpreted) Yes, as far as I know.

CHAIRMAN: What triggers amber?

MR KELVIN YEUNG: (Interpreted) I would have to look up the exact definition on what triggers amber or red. I don't have the definitions to hand now.

CHAIRMAN: Would you do so and would you provide that information?

MR KELVIN YEUNG: (Interpreted) Yes, it is possible.

CHAIRMAN: Is the information in hard copy?

MR KELVIN YEUNG: (Interpreted) If e-mails or minutes were available the information would be listed. So if I can locate that e-mail, I can disclose the information.

CHAIRMAN: Please do so.

MS MAGGIE WONG: Can you also take a photograph of what was displayed on the screen, the kiosk that you mentioned, about this signal?

MR KELVIN YEUNG: (Interpreted) Yes, it is possible.

MS MAGGIE WONG: Now, what would be the consequence if that driver has a red signal.

MR KELVIN YEUNG: (Interpreted) It is actually a reminder. As I said, if the IT department's list shows repeaters, action would be taken, for example we would call them or the TQD would follow up with them. But as for this computer display, the nature is more of a reminder than to take certain actions against a bus captain.

MS MAGGIE WONG: Have you explored the idea of having that bus captain who has red signal to undertake a remedial training? Have you explored that?

MR KELVIN YEUNG: (Interpreted) Yes. From my computer, I cannot see the colour of the signal, because the coloured lights are reminder to the bus captains themselves.

For the report set out by IT department, if there are repeaters, with a high frequency of relapse, then the TQD would provide training.

MS MAGGIE WONG: What about those with green signal? Has your company considered giving a reward for those who consistently have green signal, good driving behaviour?

MR KELVIN YEUNG: (Interpreted) We do not reward bus captains with a green light because we would assume that good driving is expected. So, as far as I know, we are not doing any such thing.

MS MAGGIE WONG: This system, does it also apply to part-time bus captains?

MR KELVIN YEUNG: (Interpreted) Yes, as far as I know. Because the same devices would emit light and sound as reminders if necessary.

MS MAGGIE WONG: Mr Yeung, I'm going to the next topic. It is on the surveillance cameras.

We have heard evidence from a few trade unions about assaults on bus captains, on frequent assaults on bus captains. And --

CHAIRMAN: I think if you are moving to a new topic, given the time, we will take the adjournment now.

Mr Yeung, we are going to adjourn, and we will resume our hearing at 2.30 this afternoon. Thank you.

MR KELVIN YEUNG: (In English) Thank you.

(1.00 pm)

(The luncheon adjournment)

(2.30 pm)

CHAIRMAN: Good afternoon.

Yes, Ms Wong.

MS MAGGIE WONG: Yes. Thank you.

Mr Yeung, before the lunch break we were on the black box. May I ask a few more questions about this black box? I think you said that about the system of having -- alerting bus captains that they have certain driving, bad driving habits like harsh braking and acceleration was in place a few years ago, but you can't remember the year; is that correct?

MR KELVIN YEUNG: (Interpreted) Correct.

MS MAGGIE WONG: May I just refer you to a few documents from your company's submission to see if it may assist you. KMB-1, page 168.

We can see this is a submission from Kowloon Motor Bus to the Committee dated 18 May 2018. If we look at this page, it refers to what the black box will capture, including records of speeding, harsh braking, and abrupt acceleration.

If we go down and see the third bullet, it mentions that:

"Identification of the [bus captain] of a particular bus is done through our Terminus Management System ..."

This terminus management system, are you one of the personnel involved in this terminus management system?

MR KELVIN YEUNG: (Interpreted) Yes, this is a system that I will use in my work.

MS MAGGIE WONG: If we go back to page 148, this is an

action plan for implementation of the key recommendations, as of 10 April 2018. This is in response to the report on the Tai Po accident, dated 12 March 2018.

CHAIRMAN: This is a redacted version of that report?

MS MAGGIE WONG: Yes, this is the redacted version of that report.

If we look at page 148, paragraph 10 on the right-hand side, it provides that the KMB should -- the topic is, if I read that out:

"KMB should monitor [bus captains'] performance by analysing his driving record from the black box installed on buses and improve the effectiveness and timeliness of follow-up disciplinary actions on [bus captains'] inappropriate driving behaviour and attitude."

And on the right-hand side it appears to suggest there was a system because BOP 207 function in the black box system, and:

"This checking is done on a daily basis for the driving record of the preceding 10 days. Any abnormalities will be dealt with and reported promptly to TQD, which will then commence disciplinary procedures."

So it appears this report would only be generated

after 10 days, if I summarise it correctly; is that the position?

MR KELVIN YEUNG: (Interpreted) To my understanding, for our IT department, we will try to reduce the number of days, bring it to lower than 10 days, but I'm not sure by how many, but if I remember correctly, it would be less than 10 days.

MS MAGGIE WONG: If you look further --

CHAIRMAN: Before you move on, what is BOP 207?

MR KELVIN YEUNG: (Interpreted) BOP 207 is a function within BOM, and BOM stands for bus on-board management, something like that. And for this function, it will capture the speeding records of every bus. And if a bus speeds, exceeding the speed limit of the roads, we will use the BOP 207 function to retrieve the speeding records.

CHAIRMAN: What is the threshold set to determine whether a bus is speeding?

MR KELVIN YEUNG: (Interpreted) For every location, we would identify the statutory speed limit, either it is 50km per hour or 70km per hour, so that's the two standards for buses. So if a bus goes through a certain area, then the system through the GPS location function will match this bus against the speed limit, and if there is an exceedance, then that will be shown on the report.

CHAIRMAN: What is the excess, to determine that there is speeding?

MR KELVIN YEUNG: (Interpreted) To my understanding, there should be some allowance. Because we are afraid that the speeding measurement or the GPS may not be accurate all the time, but as to the range, I don't have the figures with me. And for me, whenever there is a record generated we will verify that this is the right location, then we will hand over the records to the TQD for follow-up action.

CHAIRMAN: And against what do you verify the record?

MR KELVIN YEUNG: (Interpreted) Say if a bus is found to be speeding, then we will check the departure record of the bus, maybe whether there would be an error in the TER system, but then if it is a correct record proving that the bus captain drives the bus, then we would look at the GPS coordinates, the X/Y coordinates, because sometimes there might be interference, and the exact location of the bus cannot be shown.

So if we identify that this is the right location, and we see that, say, the speed limit doesn't match with the actual speed, ie there is speeding, then we will confirm that this is the location where speeding takes place.

CHAIRMAN: Apart from reference to GPS coordinates of

latitude and longitude, do you have any other method of determining location?

MR KELVIN YEUNG: (Interpreted) No, to my understanding we just use X/Y coordinates of the GPS, no other method.

CHAIRMAN: By that you mean latitude and longitude?

MR KELVIN YEUNG: (Interpreted) I -- well, we mainly use X and Y coordinates to confirm. I'm not aware of the longitude and latitude. I press the coordinate button and a map will show up, and the map will show the current location of the bus and then we will look at the location to see whether the bus has indeed driven through that area and the speed it is being driven at.

MS MAGGIE WONG: Yes, and if we see in that box, we can see a milestone as to the IT department. It is stated there that:

"IT [department] is in the process of enhancing the presentation of the Bus Performance Reports to facilitate monitoring speeding, harsh braking and abrupt acceleration. After the enhancement ... Operation Sections will analyse the data of preceding 8 days twice a week to provide driving records of [bus captains] with irregularities. The reports will be passed to TQD twice a week. Immediate actions will be taken to alert respective [bus captains] to deter them from committing the same faults."

This is the submission filed to the Transport Department which appears to suggest --

CHAIRMAN: This is an accident report, is it not?

MS MAGGIE WONG: Yes.

CHAIRMAN: Not a submission.

MS MAGGIE WONG: Yes, this is an accident report and this is an action plan for implementation of key recommendations as of 10 April 2018. It starts at page 145.

So Mr Yeung, according to this milestone, what is improved is the generation of the report will be reduced from 10 total days, correct?

MR KELVIN YEUNG: (Answer not interpreted).

CHAIRMAN: Before you move on, the existing system monitors speed only; is that right?

MR KELVIN YEUNG: (Interpreted) BOP 207 function only monitors the speed.

CHAIRMAN: And the change is to monitor not only speed but also harsh braking and abrupt acceleration. So that's one of the changes.

MR KELVIN YEUNG: (Interpreted) For BOP 207 function, that does not cover harsh braking and a sudden acceleration. It only focuses on speeding.

CHAIRMAN: So the supposed change is to monitor not only speeding, but harsh braking and abrupt acceleration. That's what is stated here, is it not?

MR KELVIN YEUNG: (Interpreted) Correct. We need to generate another kind of report which was mentioned before lunchtime, and that speeding, acceleration and braking will be reviewed. That was covered previously.

CHAIRMAN: So what is meant when it says that there will be an enhancing of presentation of the bus performance report -- presumably that's what the acronym "BOP" stands for -- to facilitate monitoring, speeding, harsh braking and abrupt acceleration. Are you saying that already exists?

MR KELVIN YEUNG: (Interpreted) I'm not sure whether the action plan on improvement has been implemented. But as of today, I'm still using BOP 207 to monitor speeding, and as I said, the IT report will be monitoring speeding, harsh braking and abrupt acceleration.

I'm not sure what I'm doing now matches with the action mentioned in this milestone.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Yes. About this report that you talked about this morning about receiving reports about harsh braking. Since when did you start to receive these reports?

MR KELVIN YEUNG: (Interpreted) I started seeing such a report in 2017. But I don't have the exact date now. I can find it out for you if needed.

CHAIRMAN: Yes, please do.

MS MAGGIE WONG: Moving on to the next topic about surveillance cameras, Mr Yeung, we have heard from a number of unions, and particularly KMB, that there were increasing assault incidents on bus captains by passengers, and one of the measures that would help the police to enforce the law is to use surveillance cameras to capture both audio and visual images -- audio recording and visual images of what happened.

And we have heard some evidence that -- or at least from your KMB submission, that currently, there are only 2,319 KMB buses, and 146 Long Win Bus buses that have these surveillance cameras. Can you tell us, to your knowledge, what about the remaining buses?

MR KELVIN YEUNG: (Interpreted) Well, according to the figures you mentioned, my knowledge is this. With the procurement of new buses and replacement of old buses, at the time of procurement CCTV systems are already installed on new buses. So the actual figures should be more than what you just quoted.

As for remaining buses, I understand that the company plans, by the end of this year, to -- well, I'm not sure about the exact figure, but to retrofit 600 to 700 buses with CCTVs. That's what I know about the management's plan in 2018.

MS MAGGIE WONG: And about this management's plan in 2018, does that cover all buses, all KMB buses, even though they are old models?

MR KELVIN YEUNG: (Interpreted) Judging from the figures, I don't think they are all covered. I think there will still be a minority of buses to be replaced, that will not have the CCTV installed. It doesn't cover all.

But I'm not sure whether in 2019 this will still be their plan. I'm not sure.

MS MAGGIE WONG: We have heard some suggestions from some of the union members, that they wish to install some of the -- they wish to install their own surveillance camera, because some of the old model buses did not have surveillance camera. So they consider it as a measure to protect their own safety and also the passengers' behaviour, but that was a measure vetoed by the KMB.

And a circular was issued. Does that happen, to your knowledge?

MR KELVIN YEUNG: (Interpreted) To my knowledge, yes. We don't allow bus captains to install their own surveillance cameras.

MS MAGGIE WONG: Did you issue a circular --

CHAIRMAN: Why not?

MR KELVIN YEUNG: (Interpreted) Let me answer Chairman's question.

As far as I know, it has to do with some limitations under the PDPO as to how this video --

CHAIRMAN: What is that an acronym for?

MR KELVIN YEUNG: (Interpreted) Sorry, Personal Data Privacy Ordinance. Exactly which clause, I'm not sure, but from what I heard, this is to protect the bus captain, because previously in some cases, the KMB bus captains took some video clips and posted them onto the Internet, and subsequently we received complaints about invasion of privacy of the other persons.

So, to my understanding, the bus captains would be told that because of the requirements under the Personal Data Privacy Ordinance bus captains are not allowed to install their own cameras. That's my knowledge.

CHAIRMAN: Thank you.

MS MAGGIE WONG: In your opening statement, you said that you have a very important role in the sense that you are the very important bridge between the frontline colleagues as well as the management.

Did you express or voice out this bus captains' concerns or requests to the management?

MR KELVIN YEUNG: (Interpreted) Yes, I did. Well, there were some bus captains who reflected that they preferred not to have cameras installed on board. And I once told the management that if you install many cameras on buses

some captains would like the protection, but some captains would not prefer it, because they would be put to great pressure since they would be under constant surveillance, and I did tell the management that.

MS MAGGIE WONG: About these assault incidents, we see from the KMB submission that they would provide some psychological support --

CHAIRMAN: Before we leave this subject, Ms Wong began to ask you about the issue of a circular and I interrupted her. Was a circular issued telling bus captains that they could not deploy their own CCTV cameras?

MR KELVIN YEUNG: (Interpreted) In my recollection -- I mean, I don't have any recollection of ever seeing such a circular. I don't know whether I have forgotten, but I myself have not seen this circular.

CHAIRMAN: How was the information passed to the bus captains that they were not permitted to install their own CCTV cameras?

MR KELVIN YEUNG: (Interpreted) Well, in fact, we understand the bus captains' positions. If they wish to install their own device we understand their position. Usually we would very gently tell them that "If you install cameras, of course you are protecting yourself but you could be breaching certain laws", and I would recommend that they take down the CCTV cameras they installed

themselves, and if they are not willing to cooperate we would refer the matter to the TQD, but we won't disallow bus captains to drive simply because they are not willing to take it down.

CHAIRMAN: So it is a recommendation, and not a prohibition?

MR KELVIN YEUNG: (Interpreted) Well, this is my role. I give recommendations to frontline staff asking them not to do it. As for the TQD, after the case had been referred to the TQD, further action may be taken so that an explanation be given to the bus captains as to the pros and cons of installing their own cameras.

CHAIRMAN: But again, a recommendation and not a prohibition?

MR KELVIN YEUNG: (Interpreted) Well, that's the role I play. In front of frontline staff, that's what I do. I give recommendations.

CHAIRMAN: And TQD as you call them, do they give recommendations or do they issue prohibitions?

MR KELVIN YEUNG: (Interpreted) I'm not sure.

MS MAGGIE WONG: Can you find that out from TQD?

MR KELVIN YEUNG: (Interpreted) No problem.

MS MAGGIE WONG: For those frontline staff who wish to have surveillance cameras installed, but didn't have one, did you pass on their message to the management that those who wish to have surveillance camera installed should

have them? So they don't have -- in that sense, the bus captains wouldn't have to violate the so-called Privacy Data Protection Ordinance? Have you voiced that out?

MR KELVIN YEUNG: (Interpreted) Yes, I did on various occasions. I would receive feedback from bus captains during formal or informal visits, bus captains would tell me and I would tell the management the wishes of bus captains.

MS MAGGIE WONG: So what is the response from the management?

MR KELVIN YEUNG: (Interpreted) The response I got from the management is that they would like to do it as soon as possible. That is, of course, new buses would come with CCTVs; as for old bus they would also be retrofitted. At the time I was told that the management also understood the need of bus captains.

MS MAGGIE WONG: We have heard from union members that because of these increasing assault incidents, they treat it as part of their daily lives, and your KMB submission mentions assistance, psychological assistance or support to be given to these staff.

In your view, did the bus captains make any discussions as to how this condition can be improved from the company's perspective?

Can you see from that page, I believe that's

page 149-113, which set out:

"The taskforce will engage a professional consultant to provide a comprehensive view of the current practice and make recommendations in areas including ... recruitment on [bus captains'] emotional intelligence, and stress tolerance, training, counseling and performance management."

Did you participate in this process?

MR KELVIN YEUNG: (Interpreted) KMB engages a third party in collaboration to set up a hot line for bus captains, and it is an independently run hot line. As for paragraph 38, on page 113, I understand this is what the management is doing now.

At one of the meetings I also attended, and a university in Hong Kong, was also invited to conduct a review and make recommendations to KMB. One of the meetings involved meeting the psychologists where I would tell them the plight faced by bus captains.

MS MAGGIE WONG: And moving on to another topic, it is about lost trips.

We have heard evidence from your colleague, Ms Debby Wong, that lost trips appear to be a frequent occurrence, and it affects driving behaviour because of the inaccurate estimation of scheduled journey time. And also it would, in turn, affect the rest time period.

What is your view on this matter?

MR KELVIN YEUNG: (Interpreted) From my perspective, lost trip is due to various reasons.

First, we may lose a trip because of shortage of bus captains, there may be traffic jam in Hong Kong, there may be emergency situations, public events, demonstrations, rallies, or special traffic arrangements, inclement weather, and vehicles breaking down on the road. All these contribute to the problem of lost trips. But we try our best not to affect the rest periods of bus captains, because we have a schedule of journey time, we have provided that to the bus captains, and about 96 per cent of these, or 90 per cent of these trips allow bus captains to have sufficient rest periods.

As for 90 per cent, well, it varies. But on the whole, of 10 trips, bus captains could have sufficient time for operating the bus for nine trips with sufficient rest time. As for the remaining one trip, it may be due to the reasons I mentioned.

But we would not deliberately shorten the journey time to make up for the lost trips.

MS MAGGIE WONG: Can you quote an example? And you mentioned in the morning about the Po Tin Estate having split shifts; do you recall?

MR KELVIN YEUNG: (In English) Yes.

MS MAGGIE WONG: And in Po Tin Estate, I've checked your KMB website, there are a number of routes, and one of them is 258D. It is a route from Po Tin Estate to Lam Tin. I believe the estimated journey time is about 1.5 hours; is that correct?

MR KELVIN YEUNG: (Interpreted) Roughly. Yes. That's the journey time. Roughly.

MS MAGGIE WONG: And we have heard some evidence about this particular trip, 258D, that the scheduled trip does not provide sufficient rest time, three hours rest time, for bus captain on split shifts.

Can we pull up the supplementary information that we received from the union yesterday.

We received information about this 258D (Chinese spoken) which is split shift 5, and it specified the start time as 0650 to 1343, and another period is 1600 to 2015. So the rest hours, the one in the middle, only provides 2 hours and 15 minutes, and not the three hours rest time.

And this appears to be a schedule devised by the company, KMB.

What is your answer to this?

MR KELVIN YEUNG: (Interpreted) I don't have the schedule with me now. I was involved in formulating the

timetable here. If my memory serves me right, for the first section, the end time should be 12.43 and not 13.43. We have a meal break, we give our pay -- the pay for the meal break for the bus captain. So on a normal day without congestion, the bus captain should be able to take a rest, starting 12.43, and then he will ask to drive again at 4 pm.

So it would be longer than the guideline of the TD, which will take effect in 2019.

CHAIRMAN: Are you able to confirm that this is a mistake, 1343, that in fact the break starts at 1243, by reference to records?

MR KELVIN YEUNG: (Interpreted) Yes, I can.

CHAIRMAN: Please provide that information.

MS MAGGIE WONG: Moving on to another topic.

One of the union members expressed that you can actually calculate the journey time by using black box data, rather than having someone who drove the route and without the actual scientific data.

And one of the suggestions is to get information on peak or non-peak hours and then factor in the congestion situation, then come up with a journey time estimate which is a more scientific approach.

What is your view on this?

MR KELVIN YEUNG: (Interpreted) Well, we are already doing

that. We have a scheduling section which is responsible for reviewing all timetables and bus captains' duties. So this department is responsible for that. My role is to provide input to them.

Now, if I receive any feedback I would tell this section, say, bus captains would tell us that there is not enough journey time, and on and off, they will use a system to review the journey time. Maybe we can use a bus to do the actual trial of the route. We don't do that frequently. We will do that when a new route is being put in operation. We don't have any historical data, so we will ask a bus to conduct a trial and then simulate the journey time.

And then when sufficient data are gathered for a route then the scheduling section will use two ways to review the journey time. One, is the departure and arrival time of the bus captains, which is recorded in the TER mentioned before, that whenever a bus captain arrives at the terminus at the regulator's room he will tap the staff card and his arrival time will be recorded, and of course the regulator will also input the departure time from that bus terminus. So, having the departure and arrival time, we will know the exact journey time.

The other method is using the GPS location function.

These two methods are valid, we believe, because they can reflect when actually the bus will arrive at the terminus.

So when will we review the journey time? Let me cite an example. Po Tin is a very good example. We talked about 258D. The other route is 260X, from Po Tin to Hung Hom railway station. And it will go through a very congested area, where the XRL is being built near Jordan, and because of the construction of the XRL there is major diversion of traffic there, and when the construction work started then the journey time for 260X was very insufficient. So in that kind of scenario, we will review the journey time and we lengthen the journey time substantially as a result.

And up to now, there is now an underpass built already, so Jordan is not so congested and we found that this journey time is excessive now, so much so that there are not enough parking spaces at the terminus for buses because they arrive too early. Also then we will review the journey time based on the actual situation.

CHAIRMAN: And you do this by seeking the approval of the Transport Department to alter the journey time; is that it? The schedule.

MR KELVIN YEUNG: (Interpreted) Well, if we don't -- if we don't have to alter the frequency, if we revise the

timetable, we don't need to apply from the TD.

So if the schedule is a frequency of 10 minutes, and then we have to increase the journey time, maybe we use different methods, for example redeploying buses to run this route or maybe we can add in a new bus, and based on the actual situation we will see whether that can be done.

So if, say, if that can be done, if there is talking about drastic changes in journey time, and we can't cope with it with our own existing resources maybe we have to adjust the frequency then.

So if we have to adjust the frequency then we will have to apply to the TD for doing so, and we need the TD's approval before we can adjust the frequency.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Thank you.

Going to another topic, we heard this morning from your colleague Ms Debby Wong about having a focus group to discuss some of the roads that may pose a dangerous risk to bus captains or to passengers. So, as far as Tuen Mun is concerned, do you have similar focus group where you would discuss with bus captains about certain road conditions that bus drivers have to pay more attention or sharp bends, or -- along that line?

MR KELVIN YEUNG: (Interpreted) Yes. Yes, we do that.

We have some examples of that.

MS MAGGIE WONG: Can you provide us with some of the examples?

MR KELVIN YEUNG: (Interpreted) Say, we resort to two channels to solicit information on hazards. First is from the bus captains themselves, because they have first hand experience on potentially dangerous areas. For example in July and August there may be heavy downpour, and on some road sections maybe pot holes will appear because of the downpour. Private cars may not encounter problems, but it will be a bumpy ride for the buses, and as a result maybe the passengers will lose balance, and if bus captains tell us so, we will notify the relevant department in the first instance, and if we find that the problem is really serious we will tell the regulator who should then tell all the bus captains who will drive along that route maybe they should slow down, or they should try to divert, or what. So this is the first way that we collect information.

Second way, say, in during the rainy season, our field staff will inspect regularly the road conditions. In Tuen Mun and Yuen Long there would be a number of rural routes, and trees, after heavy downpour they may tilt, and it may be dangerous. So the trees may crash into the glass windows of the buses, and if the problem

is identified to be serious we will notify the police and we will seek the Fire Services people to cut the trees or we will approach the TD to prune the trees, if the problem is not serious.

MS MAGGIE WONG: You mentioned few staff will inspect regularly. How regular?

MR KELVIN YEUNG: (Interpreted) In Tuen Mun depot we have a list of black spots where there will be a lot of trees actually branching out into the carriageway, so the field staff will do that, especially during the rainy season.

So the field staff will inspect all the black spots in the area once a month, and if the rain fall is really heavy, we will ask them to step up the frequency of inspections. Say, if a period is a sunshine period there might not be much of a problem with the trees, then they will really inspect the road condition.

Their duty is to continuously observe and raise safety concerns and report the same to us.

MS MAGGIE WONG: And the last topic is, we have been informed recently by the Transport Department that they have issued a practice note in relation to the training of bus captains. Have you seen a copy of this practice note?

MR KELVIN YEUNG: (Interpreted) I don't know which one you

are referring to. Can you refer me to exactly which one you are talking about.

MS MAGGIE WONG: Yes, if I may refer you to TD-1 page 403. If we go to paragraph 18 -- paragraphs 18 and 19 make reference to the practice note.

CHAIRMAN: If this helps you at all, this was something that was issued apparently in the last 10 days or so.

MR KELVIN YEUNG: (Interpreted) Well, we have enhanced our training several months ago. I don't know whether the paper talks about is what I know of.

MS MAGGIE WONG: In what way did you enhance some training?

MR KELVIN YEUNG: (Interpreted) Well, there are two phases of training, phase 1 and phase 2. And for phase 1, if the bus captains have only class 1 and class 2 private car licences then they will have to go through phase 1 training. They have to pass the TD's bus exam and that's phase 1. After they pass the TD test --

CHAIRMAN: Did you enhance phase 1 in the last several months? Can you answer that "yes" or "no".

MR KELVIN YEUNG: (Interpreted) I don't see an enhancement for phase 1.

CHAIRMAN: Did you enhance phase 2?

MR KELVIN YEUNG: (Interpreted) Yes.

CHAIRMAN: How did you enhance it?

MR KELVIN YEUNG: (Interpreted) If need be -- that's the

instruction from the management. If need be, we won't allow the bus captain to complete the course. Only when the bus captain himself is confident or the mentor is confident, then we will allow him to complete the course. That means originally he may be required to train a number of days, but if there is no confidence we would extend the training before we allow the bus captain to graduate.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Thank you.

Mr Chairman, I have finished my questioning.

CHAIRMAN: Thank you.

Mr Yeung, thank you for coming here to assist us by giving your evidence. That is now complete, and you are free to leave, but equally you are free to stay. We have other people to give evidence. Thank you.

MR KELVIN YEUNG: (In English) Thank you.

CHAIRMAN: We will take a short break while Mr Yeung leaves the desk. Two minutes.

(3.16 pm)

(A short break)

(3.21 pm)

FORMER EMPLOYEE OF KOWLOON MOTOR BUS COMPANY (1933) LIMITED:

MR RAYMOND CHENG

(Evidence given in Cantonese and English, transcription of

the simultaneous interpretation and/or English)

CHAIRMAN: Mr Cheng.

MR RAYMOND CHENG: (In English) Yes.

CHAIRMAN: Thank you for responding affirmatively to our invitation to give evidence, and thank you for waiting patiently all day whilst the other evidence was adduced, but now we come to you.

You will have seen the method by which we adduce evidence. I'm going to ask Ms Wong to start asking you questions.

Yes, Ms Wong.

MR RAYMOND CHENG: (In English) Yes, Chairman, corporate members, you are all welcome. It is my pleasure to attend this hearing. But first of all, before the Q&A, I want to declare the interest. May I use Chinese?

CHAIRMAN: Of course you may.

MR RAYMOND CHENG: (Interpreted) In relation to the bus accident occurred on 10 February, I have no relationship or affiliation with any persons injured or died in the bus accident.

In relation to the KMB directors, or the management, I have no affiliation or no relationship with them.

Before 2015, I had a working relationship with the managing director and the board of directors of KMB.

EXAMINATION BY MS WONG

MS MAGGIE WONG: Thank you, Mr Cheng, for coming.

And Mr Cheng, you were the senior manager in safety and quality department --

MR RAYMOND CHENG: (In English) Yes.

MS MAGGIE WONG: -- for the period of 1 May 2010 and you retired on 12 September 2014?

MR RAYMOND CHENG: (In English) Correct.

MS MAGGIE WONG: At that time, Mr Edmond Ho was the KMB managing director?

MR RAYMOND CHENG: (In English) Yes.

MS MAGGIE WONG: Mr Gary Wong was your supervisor at that time.

MR RAYMOND CHENG: (In English) Yes.

MS MAGGIE WONG: I'm going to focus on a few areas. The first is the identification of 29 sharp bends for internal analysis that you have explained and produced documentation in your submission to the committee.

If I may invite to you look at FE bundle, page 96-4 to 96-6.

On this page, 96-4, if we go down the section "Buses can overturn easily", the second paragraph, it referred to you starting a study of safe driving in the sharp turns back in 2013. And:

"The Safety and Quality Service Department invited the 4 depot managers, the representatives from Bus

Captain Training School and Bus Maintenance Section of Service Department to form a study group looking deeply into all the sharp turns within [KMB] bus route network.

Can you tell us who the four depot managers were at the time?

MR RAYMOND CHENG: (Interpreted) Those four managers were respectively from Tuen Mun, Lai Chi Kok, Sha Tin -- and Lai Chi Kok, Sha Tin, Tuen Mun and Sha Tin depot managers. For these four depot managers, we formed a taskforce, and apart from these four depot managers, there were also representatives from bus captain training school. And the representative was in the rank of assistant manager, Richard Lee, and he was the school principal of the training school, and we also had representatives from the bus maintenance section, who was an engineer, and had already left the post, and he is called Henry So, and this study group looked into all the sharp turns involved in the bus routes in Kowloon and New Territories in particular proposed by the depot managers.

As for the study method, the criteria, first of all, were, a reduction of speed limit from 70 to 50; number 2, the curvature; and number 3, number of passengers for these bus routes, plying the sharp turns, because if these buses are usually fully loaded, the weight would

increase.

And next point, we also took into account the actual situation at the sharp turns, and then we conducted an assessment on over 1,000 sharp turns from all the data collected in Hong Kong, Kowloon, New Territories, and we narrowed them down to 29 sharp turns.

And we also used actual buses to ply these routes and you can see we also made use of cameras on board to record the situation of these buses manoeuvring the 29 sharp turns.

We conducted tests on all these 29 turns at different speeds, 20, 30, 40, 45, 50 kilometres, and we repeated the test a number of times.

We also made use of the black box you mentioned. It is BOM, the acronym. That is bus-on-board monitoring system to calculate the safe speed that buses should use in manoeuvring the turns without affecting traffic flow. We then put forward a recommendation to the senior manager.

I would like to pause here.

Any further question from you?

MS MAGGIE WONG: Thank you, Mr Cheng.

May I ask who initiated this study?

MR RAYMOND CHENG: (Interpreted) Back then, the managing director, Mr Edmond Ho instructed my then supervisor

Mr Gary Wong, and then Mr Gary Wong talked to me and my team members.

CHAIRMAN: What position did Gary Wong hold?

MR RAYMOND CHENG: (Interpreted) Head of SSQ.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Did you have meetings with the colleagues you mentioned earlier on from time to time in relation to this study?

MR RAYMOND CHENG: (Interpreted) Yes.

MS MAGGIE WONG: When was that?

MR RAYMOND CHENG: (Interpreted) Around end of 2013 and early 2014.

MS MAGGIE WONG: Were there minutes of these meetings?

MR RAYMOND CHENG: (Interpreted) I believe there were. There might not be formal minutes, but there may be exchanges of e-mail, like what Mr Yeung said. We would try to confirm everything through e-mails. Because we had to put in a lot of arrangements later on, maybe we needed a bus captain to drive the route, we needed to arrange for engineers, and the instructors of training school to fix the dates to do all these.

My e-mail account was closed so I couldn't retrieve any information, but for other colleagues who were involved in the work, they might be able to retrieve the relevant e-mails.

MS MAGGIE WONG: Mr Cheng, do you know of any persons who are currently working in KMB but were involved in this study that we can ask?

MR RAYMOND CHENG: (Interpreted) Well, it has been four years on. To my understanding, most of the colleagues left.

MS MAGGIE WONG: About this video cam of those 29 sharp bends you mentioned?

MR RAYMOND CHENG: (Interpreted) Before I retired, after I finished with the project, I handed the footage in person to the principal of the bus captain training school, Mr Richard Lee. As to the whereabouts of the footage, I don't know.

MS MAGGIE WONG: Who took the footage of these 29 sharp bends? Or who drove the car so that the video cam could record these images?

MR RAYMOND CHENG: (Interpreted) The car cam, who hand-held the camera? It was fixed on the front part, the front, or the handrail of the front seat in the upper deck, so it did not need to be hand-held, all we needed to was to turn it on, or turn it off. So this was done by myself.

As to the question of who stored the footage, it was I who stored the footage. And then I handed the footage to my then supervisor, Mr Gary Wong. We should first take a look at the footage to make sure it is done in

the correct way.

And we took many footages. And the footage was handed to the principal of the bus captain training school who edited the video, and then he handed back the footage to us. Well, some of the footage was useful, others not. And after the editing we handed the footage to the training school which stored it.

On one or two occasions, Mr Gary Wong showed it to the then MD, Mr Edmond Ho for viewing. That was just for viewing. We didn't study in depth as to say whether a particular speed was right or not. We didn't discuss this at the occasions I mentioned.

MS MAGGIE WONG: Yes. Mr Cheng, in your paper at page 96-6, you stated that at the bottom that:

"From the study, we were able to produce a safety booklet for ..."

I think you later clarified it as small reminding cards:

" ... for Bus Captains detailing each potentially dangerous turns' exact location, direction, and road nature, road condition, past record, related photos or diagrams from Transport Department's document or passenger complaints. There were 31 safety driving suggestions from a study of over 1,500 studies."

Are those 1,500 studies the test that you have

undertaken in short-listing those 29 sharp bends?

MR RAYMOND CHENG: (In English) Yes.

MS MAGGIE WONG: Can you recall what those 29 sharp bends were? Are you able to still remember?

MR RAYMOND CHENG: (Interpreted) It has been five years on. I forgot the majority of them.

I do remember individually some of them.

The four quoted in my paper were the ones I remember. As I said, for the 29 sharp bends, they are mostly in the rural areas. In urban areas there are so many traffic lights and there is congestion, and bus captains usually do not speed. But in rural areas when bus captains ply through highways, they may speed, or they may display incorrect driving behaviour, especially when we talk about going down from highway to the downtown area.

Well, for the four examples that I cited, it is about a highway having a speed of 70km, and then suddenly they have to reduce the speed to 50km in order to go into the downtown area. So that's where the danger lies.

For the 29 sharp bends, sorry, I don't have records on hand what these bends are.

So I try to recollect what these are so I can remember only four.

But I do remember the number is 29 in total. The sharp bends.

MS MAGGIE WONG: Thank you, Mr Cheng.

In your paper you stated this study followed on from the Tseung Kwan O bus accident in 2009. May I refer you to a LegCo paper that mentions --

CHAIRMAN: Before you move on, if we are leaving the four areas that Mr Cheng remembers, can you describe to us what these four areas are, the four places that you do remember?

MR RAYMOND CHENG: (Interpreted) Yes, I can. Say, for example, from Kwun Tong Road near the Choi Hung PTI, there are two highways with four lanes, and then all of a sudden there are just two lanes going to To Kwa Wan, and two lanes going to Sai Kung, and the curvature is around 230 degrees. And if a bus goes at 70km in Kwun Tong Road, and it has to go uphill through a ramp, and the ramp has a curvature of 230 degrees, and it has to make a certain turn to go to the Choi Hung roundabout, and then it can choose to go to either San Po Kong or Sai Kung.

But then this bend is only one lane, and there are no trees, this is an elevated highway. But then sometimes obstacles were left behind by lorries, and there were oil stains left over by motorbikes and cars,

and there is this film of oil which would lead to skidding. If you drive at 50km and the way ahead is smooth, if you use 50km you would not be able to negotiate the 230 degrees bend, because the road surface may be slippery, and the curvature is so big, and especially for double-deckers, it comes with a loading, and if there is acceleration, and then if you go to the apex of the bend, there will be a G force created.

The heavier the bus, the faster the bus, the greater is the G force, and as a result, the chances of a bus overturning will also increase.

CHAIRMAN: Is this an example of where a road, or a vehicle on a road is moving from a 70 kilometre an hour limit to a 50 kilometre an hour limit?

MR RAYMOND CHENG: (In English) Yes.

CHAIRMAN: Thank you.

That's one of them. What are the others?

MR RAYMOND CHENG: (Interpreted) To my recollection it is Ma On Shan, from the Tate's Cairn Tunnel going in the direction of Ma Liu Shui, and if you pass through Ma On Shan around the housing estate Kam Ying Court, there is a left turn bend and the curvature of that bend is above 180 degrees, and again it is from 70km switching to 50km, turning left down to the Ma On Shan town centre.

This bend is similar to the one that I mentioned

from Kwun Tong Road to Choi Hung Road. From Kwun Tong Road to Choi Hung Road the bend is turning right, and then there is a sharp bend of 230 degrees down to the Choi Hung roundabout, and for Ma On Shan, from the Tate's Cairn Tunnel Highway to Ma On Shan is a left turn: the curvature and the carriageway, they were similar to the previous example.

And there is also the noise barrier, and the view of the bus captain was not that good compared to the previous example. In other words, the view was worse here in this latter example.

CHAIRMAN: Thank you.

MS MAGGIE WONG: That's the second example. Can you provide the remaining two that you can recall?

CHAIRMAN: I think all you need to do is tell us where the place is and what the curvature was, if that is the relevant fact.

MR RAYMOND CHENG: (Interpreted) For the curvature --

CHAIRMAN: What is the place, first of all?

MR RAYMOND CHENG: (In English) Okay.

(Interpreted) The first one is Tseung Kwan O/Kwong Ming Road roundabout. The second one is Cha Kwo Ling Road northbound, left turn to Lei Yue Mun Road westbound. The third one, as I described, Tate's Cairn Tunnel Highway northbound down to Shek Mun, and then to

Ma On Shan. Number 4, Kwun Tong Road westbound, and then turning to Clear Water Bay Road. I explained the last one.

Let me first explain the one about Kwong Ming Road in Tseung Kwan O.

In 2009, November, there was a bus accident involving two fatalities and numerous injuries.

The MD then already gave me a mission when I took office that I should look into this roundabout to see whether there was room for improvement. So after I assumed office, I visited the roundabout in Kwong Ming Road in Tseung Kwan O to inspect the site, and there was a highway that went to the roundabout with a left turn to Kwong Ming Road/Kwong Ming Estate, I don't actually remember the name. But the curvature of the bend, it is -- I mean, it is a roundabout, so it is 360 degrees. If you go the wrong way, you can just follow the roundabout for another round to choose the exit you want.

So for Kwong Ming Road, say if you are travelling at 50 kilometres, or below 50, there is not much problem. But when it is raining, or at night, when the sight line is poor, then you shouldn't exit the roundabout at 50 kilometres, which is the speed limit, because it would be prone to accident.

The other one is Cha Kwo Ling Road northbound, left turn to westbound of Lei Yue Mun Road. This is in Kwun Tong, off the Kwun Tong post office, there is a bend. Again, there is a highway, one takes a left turn downhill to Kwun Tong and the speed limit also drops from 70 to 50 kilometres.

This carries the same characteristic. It is single lane traffic, and as I explained just now, if you travel at 50, you could be speeding. Although the Transport Department provides signage reminding drivers that there is a bend ahead, sometimes drivers may not be very attentive all the way. But we have professional drivers, but in the lapse of moment, the driver may forget, or that he may be pressing the gas pedal in a way that he can exceed 50 kilometres and then at that junction it would be dangerous.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Mr Cheng, I would like to invite you to look at a document following on the accident. It was a LegCo paper --

CHAIRMAN: Which accident?

MS MAGGIE WONG: The accident, the traffic accident on Tuen Mun Road in 2012.

This LegCo paper can be found at page 260-443-20.

CHAIRMAN: Of which bundle?

MS MAGGIE WONG: Of TU bundle.

CHAIRMAN: Which number?

MS MAGGIE WONG: TU-1B.

CHAIRMAN: Thank you.

MS MAGGIE WONG: 260-443-20.

It is a LegCo paper for the special meeting on 27 November 2012. It is stated as "Background brief on safety of franchised bus operation and safety of long downhill roads".

If you go to paragraph 6, it made reference to the fatal traffic accident on New Hiram's Highway in May 2008 resulting in a total of 18 fatalities and 44 injuries.

And drop a few lines, we see that:

" ... [Transport Department] had also conducted a territory-wide review of long steep downhill roads and had identified a total of 29 downhill road sections in the territory."

The list can be found in appendix 1, which is also in this bundle at page 260-443-29.

Mr Cheng, would you mind taking a look at these 29 sections or locations and see whether the four locations you mentioned can be found in this list?

MR RAYMOND CHENG: (Interpreted) On the first page, that's 29, these road sections are in Hong Kong Island, and

then for 330, number 15, Clear Water Bay Road, Ngau Chi Wan in Kowloon. That's the one that I personally checked. But it is not the same as the one I studied. Because one is upstream, the other is downstream, and for New Territories, none. I can find none.

But I want to supplement. In 2008, I hadn't assumed office as senior manager of SSQ.

MS MAGGIE WONG: I understand, Mr Cheng.

So the exercise you conducted is a valuable one? Because you have undertaken a detailed task of looking at how many roads -- how many roads have you looked at in terms of New Territories?

MR RAYMOND CHENG: (Interpreted) A lot. But I can't tell you how many now, because my responsibility relates to safety and driving, and I would get on board a bus for inspection at least once a month.

I mean, I would be in plain clothes, without any advance notice, I would board a bus of my company. From the very beginning, like I said, in rural areas, very often drivers would neglect safety, so I would say it is very frequent, at least once or twice a month I would take these buses from Yuen Long, I would take 968 to Tin Hau, and then in Tin Hau I would take another bus back to Tuen Mun. It is a working trip. And I would record details relating to the dangerous road sections, and

I would report back to the then supervisor, Mr Gary Wong.

Therefore, in identifying the 29 sharp turns, I provided a lot of comments which were accepted.

MS MAGGIE WONG: If I may invite you to look at page 96-6 of the FE bundle, your submission, in that paragraph you stated you made 31 safety driving instructions, suggestions from that study.

Do you recall what those safety driving suggestions were, or what it related to?

MR RAYMOND CHENG: (Interpreted) Most of these suggestions related to driving demeanour. Some of them related to driving speed.

CHAIRMAN: What do you mean by "driving demeanour"?

MR RAYMOND CHENG: (Interpreted) For driving demeanour I mean whether the bus captain would be very attentive in driving, or whether all of a sudden he would accelerate or brake abruptly, or make a sharp turn abruptly as mentioned by the previous witnesses. Because if the driver makes a sharp turn all of a sudden, it may affect the centre of gravity of the bus. Let me give you one example.

When negotiating a bend of 30 degrees, if the driver manoeuvres the bend, normally it may take one second or one to five seconds. However, if the driver drives at

speed such that the bend of 30 degrees is manoeuvred with just 0.1 seconds, then the bus would slide. I don't know what it is called in Chinese, but it is some kind of drifting of the tail of the bus, such that passengers seated or even standing passengers would tend to fall.

Do you get my meaning? That is to manoeuvre a bend with 0.1 seconds, it is very different from manoeuvring a bend in 1 second. That's about driving demeanour.

CHAIRMAN: Thank you.

MR RAYMOND CHENG: (In English) Welcome.

MS MAGGIE WONG: When you talked about some of them related to driving speed, when you made that suggestion, did you recommend to the bus captains for some of the sections of the road that have 70km per hour, the driver should drive below the speed limit permitted for that road section? Did you suggest that in that handbook?

MR RAYMOND CHENG: (Interpreted) First of all, buses have now been equipped with a device limiting the speed at 70. Even if he floors the pedal, when the bus reaches 70 kilometres it won't go faster.

However, if the bus is going downhill or perhaps -- well, coming back to driving demeanour, the bus could go beyond 70 kilometres if he uses the neutral gear. And my answer is, no, because my answer is about safety

driving, and the driver must not exceed the speed limit.

So if he drives below 70 or 68 kilometres, I would appreciate that, but we also need to consider sight line and driving demeanour. Maybe the driver is in a bad mood, or he may have something on his mind, and then he drives at 25 kilometres, then I won't recommend it.

MS MAGGIE WONG: And page 96-7, you mentioned small reminding cards printed and readily available to be issued to all bus captains -- all concerned routes' bus captains.

Did you participate in drafting the small reminding cards?

MR RAYMOND CHENG: (Interpreted) No, but I can supplement.

Mr Yeung said that the cards were printed in 2013/2014. That's not correct. The card's dimension is 2 inches by 3-inches and they give a summary of the locations of the 29 sharp bends, the direction, the safe driving speed, and all these are in the card. But unfortunately, the cards were printed after I retired. And I knew from Mr Gary Wong, my then supervisor --

CHAIRMAN: Just tell us what you know yourself, not what others have told you that happened. Do you understand the difference?

MR RAYMOND CHENG: (Interpreted) I got it.

CHAIRMAN: So did you ever see any printed cards?

MR KELVIN YEUNG: (Interpreted) No, no.

CHAIRMAN: Thank you.

MS MAGGIE WONG: And if I may go over to page 96-6.

In answer to question 7, you stated there that:

"I was very disappointed upon hearing that SSQ study" --

CHAIRMAN: Ms Wong, I only want evidence to be led of what this witness knows personally.

MS MAGGIE WONG: Then I won't pursue this.

Mr Cheng, do you know a person by the name of Alok Jain?

MR RAYMOND CHENG: (Interpreted) Yes.

MS MAGGIE WONG: In your study, in relation to this 29 covered turns, did you have a chance to work with Mr Jain?

MR KELVIN YEUNG: (Interpreted) No.

MS MAGGIE WONG: During the time when you were working with KMB, did you have a chance to work with Mr Alok Jain in relation to the safety aspects of franchised buses?

MR RAYMOND CHENG: (Interpreted) No.

MS MAGGIE WONG: Mr Chairman, I've finished my questioning.

CHAIRMAN: Mr Cheng, thank you very much for coming to assist us, for agreeing to give evidence, and giving us the evidence you have. We are grateful.

Your evidence is concluded, and we have more

evidence to receive, so we will take another short adjournment and then I think we are ready to receive the representatives of the Federation of Bus Industries.

So we will take a short break. Thank you.

MR KELVIN YEUNG: (In English) Thank you.

(4.05 pm)

(A short break)

(4.16 pm)

REPRESENTATIVES OF THE FEDERATION OF BUS INDUSTRY TRADE UNIONS: MR LEUNG KAM KEUNG, MR CHUNG CHUNG FAI, MR LAM KAM PIU, MR LAU KAI HIM, MR HUI HON KIT, MR KWOK WAI KWONG

(Evidence given in Cantonese; transcription of the simultaneous interpretation) (continued)

CHAIRMAN: Gentlemen, good afternoon, apologies for the delay in reaching you. As you will have seen, we have been taking evidence from others but we are now ready to resume with your evidence.

Ms Wong.

EXAMINATION BY MS WONG (continued)

MS MAGGIE WONG: Thank you so much, gentlemen, for coming.

Yesterday, I have asked some questions about the resting facilities in relation to your submission dated 16 July, annex 7, in relation to Lai Kok Estate.

I understand that Mr Lau has dug up further information about the progress of this Lai Kok Estate and would like

to supplement on this.

CHAIRMAN: Yes.

MR LAU KAI HIM: Thank you, Chairman.

Regarding the locations in annex 7, take Lai Kok as an example as mentioned by Madam Wong, the resting lounge has been installed.

I want to supplement that regarding resting facilities, KMB has been more proactive than other bus companies. At other locations KMB has striven to install resting facilities and it is not only Lai Kok, but Tsing Yi Pier, Kowloon City Pier, and also another bus terminus in Cheung Wang, so you can see that KMB is more proactive than Citybus and New World First Bus, because for the other franchised bus companies, take Quarry Bay as an example, over the years they have failed to install the resting lounge.

This may be due to various reasons, but I can say, on the whole, KMB is more proactive.

Of course, the facilities, or the size of the lounge may not be perfect, but at least they are providing resting facilities for use by staff of KMB.

I would also like to supplement that there is one resting lounge that may be demolished soon, that is TST terminus. We received a paper from the Harbourfront Commission suggested that the bus terminus at Tsim Sha

Tsui ferry pier would be demolished. But this terminus involves a lot of bus routes. The Harbourfront Commission already discussed the topic and we also wrote to Transport Department requesting the department to explain a number of things: after demolition where will the bus routes be accommodated and also, after taking down the bus terminus, there would be no resting facility for KMB drivers. And it is also very crowded, and so far the Transport Department has not been able to answer our questions.

Because for Tsim Sha Tsui ferry pier terminus the facilities are very good. If the terminus is demolished, as the proposal goes, it will turn into an ordinary bus stop without resting facilities for KMB bus captains.

I also have another paper for reference. And this is from the Hong Kong Institute of Landscape Architects.

Thank you, Chairman.

CHAIRMAN: Is that a document you wish us to receive?

MR LAU KAI HIM: (In English) Yes.

CHAIRMAN: Do you have copies of it? We will have it copied.

MR LAU KAI HIM: (In English) Here is my copy. (Handed).

CHAIRMAN: Very well, we will have it copied now.

MR LAU KAI HIM: No need to photocopy.

MS MAGGIE WONG: Thank you, Mr Lau.

In one of your annexures, annexure 18, can I summarise one of the points you made in your submission?

CHAIRMAN: What is the reference?

MS MAGGIE WONG: The reference, it is annex 18 of the supplemental document filed by the union on 16 July 2018, and the document itself contains a minute, a letter dated 28 June 2007. In Chinese it is at page 260-522; in English page 260-523-22. It is a letter --

CHAIRMAN: Which bundle?

MS MAGGIE WONG: In TU bundle, I apologise.

CHAIRMAN: Which one.

MS MAGGIE WONG: 1C.

CHAIRMAN: Thank you.

MS MAGGIE WONG: That is a letter dated 24 November 2016 from your union to the Transport Department. I'm only interested in one topic. It is paragraphs 1.1 to 1.3. In relation to this topic, your union requested, or invited the Transport Department to consider having three-party negotiation or meeting in relation to the design and facilities of newly built bus terminus.

And at 1.3 you stated that you would like the department to consider to arrange for regular meeting to

be attended by the government, bus company, and labour union. That's at page 260-523-8. Regular meetings to be attended by bus company and labour union so as to facilitate discussion on matters including the design of facilities in old and new bus terminus.

And we can see in one of the replies of the Transport Department, at page 260-523-22, that they appear to consider that this request should not be three-party, but instead they invite you to go through the bus company.

It would be at page 206-523-22, second paragraph:

"When designing a new bus terminus, in addition to referring to the usual design standards, our Department would also take into account the circumstances of the terminus, including the number of expected routes, number of passengers, direction of the flow of people, environmental limitations, operational needs of the buses, et cetera. We would also consult the relevant bus companies for their opinion on the design in concern. Therefore, if staffs have any suggestions on the design and facilities of the bus terminus, the staffs may reflect them to their company. Our department believes that the current mechanism is effective."

So the Transport Department appeared to reject your

request to have three-party negotiation. Is that the position?

MR LAU KAI HIM: Correct.

MS MAGGIE WONG: May I now go to another topic, on year-end attendance bonus.

May I invite you to your second submission, at page 260-94 in English, and Chinese at page 260-57.

Now, have you got the document, Mr Lau?

MR LAU KAI HIM: (In English) Yes.

MS MAGGIE WONG: May I ask you this. You mentioned something here about the year-end bonus. Is that on top of the safety and good service bonus that the KMB is currently offering to bus captains?

MR LAU KAI HIM: Let me put it this way. For safety award and attendance bonus, these are incorporated into the basic salaries of bus captains. For (a), on this page, it refers to a year-end bonus, and in 2018 KMB already undertook to scrap the year-end bonus, and that double pay would be implemented. As for the year-end bonus, an assessment would be conducted and staff would be graded from 1 to 5, or not available. And then award would be -- or bonuses would be given according to the grading.

So these are two different things.

CHAIRMAN: When in 2018 did KMB agree to scrap the year-end

bonus?

MR LAU KAI HIM: Around May or June they undertook to scrap the year-end bonus system, and a double pay system would be implemented. And the actual announcement date was in June.

CHAIRMAN: Do you have a copy of the announcement?

MR LAU KAI HIM: You mean a notice issued by the company? We can get a copy from KMB. If the Committee would like to have a copy I can provide a copy to the Committee.

CHAIRMAN: Thank you, please do so.

MR LAU KAI HIM: Mr Lam would also like to supplement about the bonus system for New World First Bus.

MR LAM KAM PIU: For New World First Bus and Citybus they share the management, and for safety bonus, attendance award, since March this year they have been incorporated into the basic salaries. But I want to supplement regarding bonuses.

Many years ago we already reflected our view to the company. For the bonuses, allowances, they should be part of the salary and they should be incorporated into the basic salaries as a remuneration package. But for various reasons the company had all along rejected the idea.

But ever since the tragedy happened, the company claimed that in light of the market situation they would

include the bonuses and allowances in the remuneration. So it is just a consolation prize. It is just better than nothing. But over the years we have been striving for this. We didn't just start after the tragedy happened. Because we understand that this problem has affected staff all along, because our staff all along have been given very low basic salary.

So we have been reflecting this to the company.

MR LAU KAI HIM: Ms Wong, the New World First Bus staff union has reflected to the management, and that was in annex 17, and in 2017 our trade union has asked for the attendance bonus to be incorporated into the basic salary. We have been striving for it for a long time already. But we have lost the older minutes of meetings. But in appendix 17 it shows that they have been talking to the management all along about this.

Mr Chung would like to supplement.

MR CHUNG CHUNG FAI: I would like to supplement.

Mr Lam talked about safety bonus, attendance bonus, et cetera, being incorporated into the basic salary and that started in November, and there were two bus tragedies, and the company told us that because of the pressure from the community and our salary is on the low side, all these allowances would be incorporated into the basic salary.

Mr Lau referred to the year-end bonus, and for us, there are the new systems and the old systems. In the old system it is in the form of a double pay without any conditions attached. So an extra month of pay will be disbursed. But for those under the new system, they have to meet with certain conditions stipulated by the company. Say, for example, if you take sick leave you will be given less. So the number of sick leave days you have in a year will be factored in. Maybe if you are complained against, your year-end bonus will also be deducted.

So for the frontline bus captains, especially the new recruits, they are not willing to stay long. They will just work for one year or half a year, and then they quit.

MR LAM KAM PIU: Mr Hui would also like to supplement.

MR HUI HOU KIT: Citybus and New World First Bus, our year-end bonus is different from the New World First Bus. We have three systems under Citybus. The first system covers the most experienced staff members, we call that double pay, and for the second batch, for myself I'm in that, we call that remuneration in a sense, and that comprises three parts.

The first is the basic salary, the other, the second is the -- your OT pay for the whole year divided by

one-third, and that is your bonus.

And the third batch is the contract bus captains.

So that means one month's basic salary for them.

And there is also a grading system.

If in one year you do not have full attendance, then your bonus will be deducted. So your basic salary will be divided by 365, say, if you are absent for one day of work, then you would get your bonus deducted by that amount, and then if it is sick leave and all that, then it would be deducted in the same manner.

And if you receive warning letters, well, if it is a final warning letter, then your bonus will also be deducted. If you receive a final warning letter, then you will only get 75 per cent of your basic salary as the bonus.

So that's how it works in Citybus.

Starting 2005, Citybus has started hiring contract bus captains. Initially, there was no year-end bonus, but we have been striving for it all along. And now that is being given.

But for new recruits, and the year-end bonus, there is one thing we object strongly against. Say, if they are on leave, and they do not have a full attendance, then their year-end bonus will be deducted. We don't think it is reasonable.

Maybe the person is taken ill or he suffers injury at work, maybe he applies for leave because of marriage or he has to attend a funeral or something like that. This is something beyond his control.

So if the pay for the colleague is being deducted for those reasons, that would be very unreasonable. That's all I wanted to say as a supplement.

CHAIRMAN: Yes. Ms Wong.

MS MAGGIE WONG: And we have heard about a system that was in place in Kowloon Motor Bus. Maybe Mr Kwok can assist.

We heard about the bus having a small device with four lights which would inform the driver immediately when there are four conditions, speeding, harsh braking, abrupt acceleration -- I think those are the three conditions.

CHAIRMAN: And engine idling.

MS MAGGIE WONG: Yes. Engine idling.

Mr Kwok, do you remember when these lights were put in place in buses?

CHAIRMAN: Could we bring a photograph of -- there it is. Thank you.

MS MAGGIE WONG: That's, for record purpose, BM-65.

CHAIRMAN: This is a document provided by Openmatics describing to us this alert system with the four LED

lights.

MS MAGGIE WONG: We have been informed by one of the depot managers, Tuen Mun depot manager, that in fact there was this LED light system that would signal the driver immediately when one of these situations happened.

So my question is, do you recall when was this LED light implemented in buses in Kowloon Motor Bus?

MR KWOK WAI KWONG: 2013. 2013.

MR LAU KAI HIM: We tried that out in 2013, and that was installed.

MR KWOK WAI KWONG: 2013.

MS MAGGIE WONG: Thank you.

And they also talked about a system where whenever you go to work you put the Octopus card on the kiosk, there was an Octopus card where you can put on the reader, and it will automatically show whether you are a green driver, amber driver, or red driver.

Can you confirm if that was the system in place in Kowloon Motor Bus?

MR KWOK WAI KWONG: Yes.

CHAIRMAN: How does this work? You put your Octopus card on the reader and what display do you see?

MR KWOK WAI KWONG: When I go into work, and when I tap the card, then there will be this display. Usually it is a green light.

MR LAU KAI HIM: Chairman, I have something to supplement.

There are the red, amber and green lights, so that, well, based on the information collected from this box, then that shows the driver's driving behaviour, so if you have a green light then you are okay. If you have an amber light you need improvement. Red, of course, is not good, and there is also an incentive programme launched.

So if the drivers have the green light, then a reward is given to the driver. But for some time I don't see any information regarding this bonus or reward scheme. But this Octopus reader is still in operation at KMB, and the system pointed out by Ms Wong still exists.

Now, bus drivers will tap the card and then the relevant lights will come on. This system is connected to the GPS to monitor the bus driver's performance, and then information collected can then classify the bus drivers into amber, red and green drivers.

CHAIRMAN: Do you know what period of driving is reflected by this colour display, red, amber, green? To which period of driving does it relate?

MR KWOK WAI KWONG: Well, it is from the start of work to the end of your duty.

CHAIRMAN: So when you come on duty, you tap your card, and

this is displayed, is that right, Mr Kwok?

What does the display refer to? Yesterday's driving, the month's driving, a week's driving?

MR LAU KAI HIM: It is a kind of sustainable performance on your part, and every time when you tap the card you will be reminded on your performance as indicated by the colour. Well, we don't have a specific period, say, for assessing your performance -- well, that's a reminder on a sustainable basis. Every time when you tap your card, the relevant colour will show up to tell you your actual performance.

It doesn't cover a specific period. I wonder whether Mr Kwok has anything to supplement.

CHAIRMAN: We have been told that it does. If you don't know, please say so.

MR KWOK WAI KWONG: Well, as far as I can recollect, it is usually about the performance in the previous week. Yes, indeed there is a period.

CHAIRMAN: Thank you.

Now we can see on the screen that there are these four thresholds that trigger some kind of alert. Do you know whether triggering one of the alerts, for example that the engine has been idling too long affects the colour that you have given for your record? In other words, if you left the engine idling at the bus station

do you get a red signal?

MR KWOK WAI KWONG: There will be also a beeping sound, and the light will also come on.

CHAIRMAN: I understand that.

Does the fact that you left the engine running too long, and the light flashed, and you got a beeping sound as you sat waiting in the bus station, does that result in a day or two, or a week's time later, you getting a red indicator when you tap your Octopus card, or not?

MR KWOK WAI KWONG: They will take the average statistics. We would not have that kind of consequence. Only if it happens one or two times. If that happens frequently then the reminder will come on.

CHAIRMAN: Have you ever been provided with details that tell you exactly how it works, or not?

MR KWOK WAI KWONG: No. Well, no explanation has been given.

CHAIRMAN: Do you know what the threshold values are for triggering the audio and visual alert in the bus captain's cockpit? Do you know what the thresholds are? Speed, acceleration, deceleration?

MR KWOK WAI KWONG: I have driven many different buses, and different buses have different devices that give different effect. Some are very sensitive. Some would be triggered very easily, say if you press on the gas

pedal quite hard, or when you brake hard, or when you take a turn too sharply, some devices are sensitive, some are not.

So I have the impression that this system is not very consistent among the buses.

CHAIRMAN: For example with speed, do you know what speed the alert is triggered at?

MR KWOK WAI KWONG: It will beep if it goes above 70.

CHAIRMAN: So if you are in a 50 kilometre an hour speed limit and you are doing 60, it doesn't beep?

MR KWOK WAI KWONG: If it is 50, well, I haven't heard any beeping sound so far.

CHAIRMAN: In the five years that this system has been working, no beep in a 50-kilometre zone?

MR KWOK WAI KWONG: That's right.

CHAIRMAN: Thank you, Mr Kwok.

MS MAGGIE WONG: About the Octopus card reader system showing the green, amber, red colour of the drivers. When was it implemented?

MR KWOK WAI KWONG: Five years ago -- 2013.

MS MAGGIE WONG: So the same time when you have this LED illuminating light system?

MR KWOK WAI KWONG: I suppose so.

MS MAGGIE WONG: Thank you.

And since we are on this topic, may I ask your view

on this, Mr Lau earlier mentioned that you used to have a reward system based on the driving performance, but now it appears that the system did not exist. Is that what Mr Lau is saying?

MR LAU KAI HIM: That's right, yes.

MS MAGGIE WONG: So what is the reward?

MR LAU KAI HIM: First of all, because of lapse of time, I really cannot remember very clearly, but when it was first implemented, there was a poster. Some sort of a poster, which I had seen that there was this scheme reminding drivers to drive in an environmentally friendly manner in a safe manner, and if you reached the target you would get a reward.

As for the actual details, I no longer remember. But I do have the recollection that there was some sort of reward coming from data of the box, but since then I have not heard anything about the reward or its details.

CHAIRMAN: Mr Kwok, have you ever received a reward?

MR KWOK WAI KWONG: Yes.

CHAIRMAN: Yes? And what was the reward? Money? Fruit? Balloons? What was it?

MR KWOK WAI KWONG: Do you mean the red, amber, green performance related one?

CHAIRMAN: Yes.

MR KWOK WAI KWONG: I think it related to a promotion, or star bus captain.

CHAIRMAN: So not monetary, not immediately monetary?

MR KWOK WAI KWONG: No, no. Not monetary.

CHAIRMAN: Thank you, Mr Kwok.

Mr Auyeung, yes.

MEMBER AUYEUNG: Mr Kwok, I want to ask a question about -- as a bus captain, do you find this system helping your work?

MR KWOK WAI KWONG: Do you mean this LED surveillance or monitoring system? Yes.

MEMBER AUYEUNG: Thank you.

MS MAGGIE WONG: Mr Kwok and Mr Lau, do you remember when this reward system was first implemented? Would it be around the time when you have this red, amber, green system?

MR LAU KAI HIM: First of all, regarding the LED system, I remember very clearly that it was in 2013. When I was at work I first got in touch with the LED system and I was told by other bus drivers that they didn't get used to the LED system because it kept beeping and the lights kept going on, and it was in 2013. But I do not remember whether the reward system was also implemented around the same time.

I only have the recollection that I saw a poster

about this incentive, if the performance was good, but I no longer remember details.

I can tell you very clearly, however, that this system was implemented in 2013 and the black box with four LED lights are still being used at the moment.

MS MAGGIE WONG: If this system was re-implemented, that there would be reward, or bonus --

CHAIRMAN: Well, what we have been told is that insofar as there is a reward, it might have been promotion, but it was not monetary.

MS MAGGIE WONG: Yes.

If one were to suggest that there be a reward in the form of bonus payment, based on the colour of the system, that is if you consistently have green colour, being good driving behaviour, you would receive a bonus --

CHAIRMAN: A monetary bonus?

MS MAGGIE WONG: A monetary bonus, would you find it helpful, or useful in enhancing the safety awareness of driving?

MR LAU KAI HIM: First of all, whenever there is an incentive or reward system, I think psychologically speaking it would be helpful. It would be positive.

But let's say if you are given a bonus if you have green colour, then it serves as an incentive for bus

captains to improve his performance. But I need to make it clear, that the awareness of safety will not be enhanced simply by having a bonus. If the driver's safety awareness isn't high, then even if there is a bonus I don't know whether certainly this will help improve the safety aspect of driving.

These are two different concepts.

Of course, if you have a bonus, it will be helpful, it will be an incentive, but about enhancing safety awareness, I don't think the black box with four LED lights would really substantially improve the safety awareness of drivers. It only serves as a reminder, and the bonus would be an incentive for them to improve their performance, but their awareness will not be enhanced simply by the black box with four LED lights and bonuses.

MR KWOK WAI KWONG: Let me supplement.

As I mentioned just now, different buses have different devices that give off different responses. Some are responsive, some are not. So if this is used to assess the work performance of bus captains, I think this is substandard. I think we should assess the performance with other means.

MS MAGGIE WONG: In your experience, have you come across a driver who consistently has red signal, or red colour

in terms of this system, this Octopus card system?

MR KWOK WAI KWONG: I have not seen one.

MS MAGGIE WONG: We have heard evidence from KMB former employee that there was a small reminding card that informed bus captains about 29 sharp bends and providing some safety driving tips.

Do you recall receiving a small printed card?

MR KWOK WAI KWONG: No.

MS MAGGIE WONG: Yes, Mr Lau.

MR LAU KAI HIM: Let me supplement.

For this small card, I have not received it, I never saw it, but the company does provide information on the intranet regarding these road sections, and previously the company also reminded colleagues to read the notice about dangerous road sections on the intranet. That would remind them about the road sections and the information came with pictures and text.

As for the small card, I have not seen it myself.

As for safety information about road sections, the information is on the intranet as I can see on the screen.

CHAIRMAN: When you say "the company", you mean KMB?

MR LAU KAI HIM: That's right.

MS MAGGIE WONG: Can you tell us when did you start to have this intranet information about these road sections?

Since when?

MR LAU KAI HIM: The information, when I joined in 2013, I could already access this information. So all along, they are on the website, and about two or three years ago they were still updating and collecting data about potentially hazardous road sections, and they would update information on the intranet.

MS MAGGIE WONG: You mentioned two or three years ago they were still updating; what about now?

MR LAU KAI HIM: I don't know whether there has been any update now.

MS MAGGIE WONG: May I go to the next topic, on assault of bus captains.

Your union has made a lot of emphasis on this by providing us with minutes of meeting, and also in your submission. If I may take you to your submission only, that's at page 260-93 in English; Chinese is at page 260-56.

And it refers to your union:

"...always followed up with incidents where bus captains were attacked."

And you also stated that your record would not be complete because only those union members who informed you would you have support them.

"However, in the past, the Federation has always

been communicating with the Police on bus captain safety."

And you produced a Transport Department minutes of meeting on 30 June 2017 in annexure 15. That's at page 260-473 in English.

Now, is this a recent occurrence about assaults on bus captains by passengers which led to you having these meetings with the Transport Department and the police, and the Department of Justice?

MR LAU KAI HIM: (In English) Correct.

MS MAGGIE WONG: Can I ask about your views on installation of surveillance cameras? We have heard evidence from different unions that most of them support the use of surveillance cameras being installed in the driver's cockpit in order to protect the bus captain as well as to record in video form and in audio recording the incident.

Does your union support this, the installation of surveillance cameras?

MR CHUNG CHUNG FAI: We agree to the installation of CCTVs, not just to protect the bus captains but also the passengers as well. With CCTV, then the facts can be known.

MR LAU KAI HIM: I have something to supplement.

In our meetings with the police, the police have

emphasised the importance of producing evidence. In assaults on bus captains, evidence is important. If we have CCTV footage, then we will know how the incident happened. It can protect bus captains, and passengers alike. If we have footage serving as evidence of bus captains being assaulted then that will help in presenting the case in the court.

MS MAGGIE WONG: Yes, thank you.

Related to this topic is the installation of protective --

CHAIRMAN: Before you move on -- do any of you gentlemen have any experience of CCTV being used in this way in the courts -- taken from a bus showing an assault on a bus driver?

MR CHUNG CHUNG FAI: No.

CHAIRMAN: Yes, Mr Hui?

MR HUI HOU KIT: Yes, I have a case.

But that happened before we had the installation of the CCTV. At that time there were human witnesses. I mean, there were people who served as witnesses telling the court that I was assaulted, I was beaten up, and there was a fine imposed on the culprit.

But then if we had footages, then we don't have to rely just on the witnesses. Because passengers are worried, and they sometimes they don't want to be

witnesses, so if we have such CCTV then it can help show that passengers actually beat up the bus captains and then there is a higher chance of a conviction. And that will help the bus captains.

MR LAU KAI HIM: I would like to supplement.

The union has been emphasising to the DoJ and the police that Hong Kong is a common law jurisdiction and the burden of proof lies with the prosecution, and if we have CCTV footages, the prosecution will be more effective.

And we have expressed our worry about bus captains being assaulted and at the court we must emphasise the seriousness of such a problem, because it will have an adverse impact on not just the bus captains, but other road users and passengers.

We don't want to interfere with the ruling of the court, but we notice that every time the penalty meted out is not deterrent enough and the message for the community seems to be that this is a sort of low court criminal offence, I mean the passengers assaulting the bus captains. I don't think bus captains should be assaulted by passengers, and under cap 230A the passengers should not be assaulting the bus captains.

And we haven't seen the DoJ emphasising to the judiciary the seriousness of the problem and, as

a result, people think that this is just something common place, and how can the law protect the safety of bus captains, if this is the case?

CHAIRMAN: You have made this submission to both the police and the Department of Justice, have you not?

MR LAU KAI HIM: Yes, in the meeting on 30 June 2017, we reflected our views, and we made two major points.

First, in the prosecution process the DoJ must tell the court the seriousness of the problem of assault on the bus captains, and the harm it does to this society. And also because the sentencing is always very light, and is not deterrent enough. And we have asked the DoJ that after the prosecution they should also actively follow up, maybe they should appeal against the sentencing. So we have mentioned all these.

We have been talking to the DoJ, we said that we are not interfering with the court's ruling, we respect such a ruling, but we think the rule of law is the foundation or the cornerstone of Hong Kong success, and this is something that the DoJ is also proud of.

But then what the DoJ does does not really bring out the seriousness of the problem, so the bus captains are not adequately protected under the law.

If some of the sentencing can be harsher, then it will be deterrent.

We also notice that in dealing with such cases the police may not know too well about the actual situation, and in some cases the police will ask the bus captains to settle the case by conciliation, and we have emphasised to the police that the power given to us under cap 203A is very big, but then many frontline police officers don't know about the content and how 203A operates.

MR HUI HOU KIT: At the hospital, my injury was examined, and the police was not notified yet, but then the witness has not come forth yet, and the police would advise me to resort to conciliation. And then, after I know that there was a witness I said to the police that I would like to have prosecution.

I have served in a trade union for over 10 years, and I have seen cases of colleagues whereby the police have advised the bus captains to conciliate, "because you don't have a witness, and even if there is a conviction, well, only a fine will be imposed. So why don't you just resort to conciliation?"

We had meeting with the police, and with the DoJ, and we emphasised that the police's role is to protect the rights of the underprivileged. The bus captains have been beaten up, so there is no reason why you should ask us to resort to conciliation.

CHAIRMAN: Mr Hui, when were you attacked? What was the date?

MR HUI HOU KIT: Over 10 years ago. When I was working as an overnight bus captain.

CHAIRMAN: Very well. We have some statistics going back three years, but -- we have particulars going back three years, but we don't have anything going back that far.

Yes, Ms Wong.

MS MAGGIE WONG: Yes. Mr Chairman, for record purpose, the minutes of meeting, 30 June 2017 mentioned by Mr Lau and gentlemen is in TU bundle, at pages 260-474 to 477.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Related to this topic, gentlemen, is about the use of protective shield.

We have heard one union expressing that there are problems relating to the use of protective shields. May I enquire, Mr Kwok, perhaps, in relation to Kowloon Motor Bus, because I believe that's the step taken by KMB. Do you have any issues about the use of protective shield installed near the cockpit, driver's cockpit?

MR KWOK WAI KWONG: There is no problem with the installation of protective shield, but the way it is installed is undesirable.

MS MAGGIE WONG: Can you tell us why?

MR KWOK WAI KWONG: Well, the protective shield covers too

small an area. And the location is undesirable, and it blocks the sight line and there is also a sound, a noise.

There is a suggestion, that it should not be half a panel, but the entire panel. Even if the passengers want to beat us they can still do so. So it should go all the way from the bottom to the top.

MR LAU KAI HIM: Mr Lam and Mr Chung would like to supplement.

MR LAM KAM PIU: On the bus captains being assaulted, and the installation of protective devices, we have made a suggestion to the Transport Department. I went to the UK myself, and I took some buses in the UK. Well, Hong Kong bus models are similar to the UK's, but at the driver's cabin, in the UK buses, well, a full enclosure is being put in place made of plastic. It is like a room, so to speak. And the passengers will not be able to get in touch with the bus captains, whereas the bus captains would be able to view the roads and the external situation. I wonder whether this kind of device is suited to Hong Kong.

But we have made the suggestion to the TD for their consideration.

On the KMB's device, it is only a pilot programme, and there is still room for improvement.

Well, as users, we can make suggestions on improvement to the bus company. The engineering staff of the bus company do not know how it works. Only the users will know how well it works so we should reflect our views to the engineering staff of the company. And improvement or enhancement can then be made.

This device can help bus captains, but Citybus and New World First Bus are against the idea.

The management of these two companies said that if the bus captains do not offend the bus captains then the passengers won't beat you up.

So in other words, we are prepared to be beaten up.

So for Citybus, New World First Bus, our colleagues have seen KMB's device and we have given our feedback to our company, and they have given us a response.

CHAIRMAN: Where were you in the UK when you encountered this full protective cover? Where were you? Which place?

MR LAM KAM PIU: London. Even Birmingham.

CHAIRMAN: Do you know which bus company in London was using this device?

MR LAM KAM PIU: I really don't know which company, but I saw that a number of bus operators had this system installed.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Thank you.

Your union also expressed concerns about the use of 12.8 metre bus that have rear wheel steering function, and the Transport Department has replied to your union that they will review the suitability of each route and require the bus company to conduct road testing to ensure safety for driving.

And the letter of reply from Transport Department was dated 11 September 2017.

That's TU bundle, page 260-2 to 260-4.

Does your union still have concerns about the use of this particular kind of buses?

MR LAM KAM PIU: True. Because for 12.8 buses in light of the road conditions in Hong Kong, because we have narrow roads, and heavy pedestrian flow, and there is a hazard using very long buses.

As for 12.8 bus with the rear axle steering function, when manoeuvring a bend of course it would be very good for the driver. But for other vehicles they may not know that the bus comes with this rear wheel steering function, and the Transport Department would issue something to let the driver know that it has the function, but other drivers may not know. So when the rear axle steers during a bend, when another vehicle approaches very closely the back of the bus, the wheel

would actually go outside its own lane, causing danger to the vehicle next to it.

We may not have the statistics at the moment, but at certain locations such as bus termini, or different road sections, we had instances of the rear wheels grazing vehicles next to it. But, of course, we would be in a disadvantageous position, because we grazed the other vehicle, and at the moment, because of the width of the lanes in Hong Kong, we have a width of 9 feet but for buses it has a width of 8.5 feet. So the bus itself is fully occupying the whole width.

Imagine if there is another large vehicle making a turn at the same time, for the 12.8 bus, definitely the rear would graze the other vehicle, and then once you turn the vehicle, the tail of the bus would go into the next lane.

KMB used a 12.8 bus for trial, and they set up cones, to check how the 12.8 bus makes a turn, and in fact, the tail went 3 feet off its own lane.

So we told the Transport Department that when the 12.8 bus is tested, there should be union representatives attending the test, and, well, traffic cones should be set up, so that when the bus negotiates the bend of 90 degrees we could see whether the tail would touch other vehicles.

However, the Transport Department replied by saying a test had been conducted and union representatives would not be invited to another test.

We requested once again recently, that the union should be invited to give comments as well, and we proposed the location, Fleming Road flyover, turning into Hennessy Road on Hong Kong Island, because at that road junction vehicles can either turn left or right, so we can test the 12.8 bus there, because Citybus and New World First Bus both have 12.8 buses. So if two buses turn at that junction, definitely there will be an accident.

At the moment other motorists do not understand the rear axle --

CHAIRMAN: Mr Lam, we do have a shortage of time. We have your point. You still have concerns that these buses are not safe in Hong Kong. We have that. Thank you.

MS MAGGIE WONG: Thank you. If you would not mind, can you give us the request in writing that you wrote to the Transport Department requesting for a retest for that particular section. If you can supply it to the Committee later.

Now --

MR LAU KAI HIM: Chairman. I'm sorry to say that the Federation received a phone call from a top official of

Transport Department expressing deep dissatisfaction that we passed three documents to the Committee which are minutes of meetings. But we do believe that these documents would help the work of the Committee.

So we are going to provide the minutes of meetings in the past, but for the August 2017 meetings onwards, the Transport Department would not provide minutes to us.

CHAIRMAN: Who was it that spoke to you on the telephone expressing deep dissatisfaction that you had passed documents to this Committee? Who was it?

MR LAM KAM PIU: Well, that day it was I who rang the Transport Department with a view to asking them to return documents to us, because we have been asking for meeting minutes for a long time, and they have been telling us that other departments have not forwarded documents to them, et cetera. So I just asked them to give us as soon as possible.

And the other side then told me that, "Well, we didn't provide document even if the Committee asked us. That's because we respect the privacy of the union."

And then I told -- and then I told them that if the minutes of the meeting are passed on to others we definitely would not do that.

But if this is for helping the enquiry, we

definitely will submit the minutes, and that's our position. Because the other official is in the directorate grade, I don't want to disclose his identity, I don't know whether there would be some problem. I can just say that he is a directorate grade officer.

MR LAU KAI HIM: We hope --

CHAIRMAN: When was this conversation? When?

MR LAM KAM PIU: In June, no --

CHAIRMAN: Take your time.

MR LAM KAM PIU: It was in July, mid July when I asked for documents, as we knew we were awaiting the Commission's invitation to attend the hearing.

MR LAU KAI HIM: I would like to apologise to you, Chairman, on behalf of the Federation. We tried to look for documents, but unfortunately we have not been able to submit documents to the Committee, and we are sorry, and we can't think whether there would be further minutes received by the Federation.

CHAIRMAN: Thank you for the documents that you have supplied us.

MS MAGGIE WONG: Thank you.

CHAIRMAN: Ms Wong.

MS MAGGIE WONG: Thank you, gentlemen. My last topic is about practice note, a recent practice note issued by

the Transport Department.

We have recently been informed that the Transport Department has issued a practice note to franchised bus operators in respect of the training for bus captains to align the training arrangements of different operators, and to lay down a common framework of the training system for their bus captains. And this is supposed to be implemented from October 2018.

This practice note was issued in the context of a working group set up as a result of the February 2018 Tai Po accident.

This working group comprised five bus operators, three bus manufacturers, and the Transport Department. And recently, they have informed us that they have issued a practice note.

So my question is, has your union been supplied with a copy of the practice note?

MR LAM KAM PIU: No.

MR LAU KAI HIM: (In English) Excuse me.

(Interpreted) We received a reply from the Transport Department and we read the reply. As to whether the practice note -- I want to know whether it comes in the form of a booklet or otherwise? We never received any booklet. We did receive a letter from the Transport Department regarding training of bus captains, but not

other documents.

MS MAGGIE WONG: Thank you, Mr Lau. We have not received it either.

So may I also ask, about this practice note. Have you ever been consulted about this practice note in terms of training of bus captains? Has Transport Department or each of the bus operators consulted your union about the topic of future training of bus captains?

MR LAU KAI HIM: First of all, we only learned about that from the Commission, that a working group had been set up by the Transport Department comprising representatives from the bus manufacturers and FB operators.

We only learned about this working group through the Commission, and in May during our meeting with the Transport Department we requested the Transport Department to allow a representative of the union to join the working group because we are related. Of course, the Transport Department did not agree. And for the practice note, from its drafting to its issuance, we had no participation. We only learned from the Commission that there is this working group. So we have never been consulted.

When we knew about the working group we were

concerned. We said that we should be consulted, but we were never consulted.

CHAIRMAN: When you made this request of the Transport Department, did you do so in writing?

MR LAU KAI HIM: In May, we had an inter-departmental meeting together with the Transport Department. That was on the next day after the TD came to the hearing here. And we had a meeting, and we asked to be included in the working group.

The Administration's response is that, well, we have certain members already, and they have not responded directly as to whether we would be included. And they have not mentioned anything about the practice note and they have not consulted us.

And as to the minutes of that meeting, we don't have the minutes, as I said.

CHAIRMAN: So the request was not made in writing, it was made at a meeting and was made orally; is that the position?

MR LAU KAI HIM: Yes. Correct.

CHAIRMAN: Do you not have your own minutes of the meeting?

MR LAU KAI HIM: Our colleagues had recorded the discussion, but every time it is usually the Transport Department who drafted the minutes. We have jotted down some notes ourselves, but these are not formal meeting minutes.

But we have jotted down the salient points, and every time the TD has special staff who worked on the minutes, which would then be distributed to us.

CHAIRMAN: Perhaps you could provide us with what notes you have got of the meeting.

MR LAU KAI HIM: Mr Chairman, I have to talk to the colleagues and try to compile something, and then supply it to the Chairman afterwards. Can that be done?

CHAIRMAN: If you would, that would help us. Thank you.

MR LAU KAI HIM: (In English) Thank you very much. Thank you very much.

MS MAGGIE WONG: Mr Chairman, that will be all my questioning.

CHAIRMAN: Well, gentlemen, that concludes the questions that have been asked. Are there any concluding remarks that you wish to make -- short remarks? You don't have to, but if you wish to we will listen to them.

MR CHUNG CHUNG FAI: Chairman, the union would like to emphasise this position. On the TD's guidelines on bus captain working hours, the guidelines are not law, but then they do sort of regulate or govern the bus companies' operations. And they will also directly affect our colleagues, because the stakeholders, our colleagues are affected.

Now, on this special shift, so this special shift is

still at 14 hours and driver fatigue is created. And not only that, on the three consecutive hours of rest, there is still no further guideline. I think we should get paid for that as well. And the Transport Department is being irresponsible by not specifying that. We spend 14 hours in our shift, but we don't get paid for 14 hours.

It says that a rest break of not less than three consecutive hours. That means it can be more than three hours, according to the guidelines.

Well, in accordance with the guidelines they can give six consecutive hours of rest. So that means we get paid only for eight hours.

Now, as we said, we get $21.90 per hour. I think the TD, Transport Department is very irresponsible.

(Chinese spoken) --

CHAIRMAN: Just a moment, Mr Chung.

Ms Wong, have we not been told by Citybus that they propose paying, when they introduce the special shift, they propose paying not this allowance rate, but the normal rate for working hours?

MS MAGGIE WONG: Yes, they do, in their submission.

CHAIRMAN: It is Kowloon Motor Bus that apparently are paying a different rate.

MR CHUNG CHUNG FAI: I would like to supplement. I am

talking about the guidelines of the Transport Department, and not on individual bus companies' way of calculating the pay. According to the guidelines, the bus companies can choose not to pay the bus captain during the rest breaks.

CHAIRMAN: Mr Chung, the Transport Department's approach and the guidelines don't address the issue of pay at all, do they? Is that your complaint, that they should address the issue of pay?

MR CHUNG CHUNG FAI: Yes, correct.

CHAIRMAN: So the Transport Department say, "Pay is a matter between the bus companies and the bus drivers, not us." That's their approach as we understand it.

MR CHUNG CHUNG FAI: Yes, correct. The guidelines are compiled by the Transport Department. They should have the responsibility. And also franchised bus services are public services, and public interest is at stake. If you don't handle the issues properly, all people of Hong Kong would be affected.

Let me cite an example.

Back then, the government was launching anti-corruption measures, so that public interest would not be undermined. But then TD is being irresponsible, it is trying to meet with the demands of the bus companies, and it is disregarding our livelihood. And

14 hours, well, we don't have enough rest breaks for a 14-hour shift.

CHAIRMAN: We have your point now.

Mr Lau, was there something you wished to say on that point?

MR LAU KAI HIM: Thank you, Chairman.

CHAIRMAN: A concluding remark.

MR LAU KAI HIM: (In English) Two minutes. Two minutes, okay?

(Interpreted) Well, electricity, water supply, bus services are all public services and public interest is involved, I understand the Chief Executive appointed the three gentlemen to serve in this Committee because public interest is at stake, but then the TD is not bearing public interest in mind. It is condoning fatigued driving, it is allowing excessively low pay.

The Transport and Housing Bureau know about the accounts of the bus companies, and they are actively involved in the income and laws of the bus companies, and if they want to have a fair hike the CE in Council's approval has to be obtained.

And the TD is coming up with guidelines only on the working hours and they are not, they are disregarding the pay, and we work long hours with low pay, and we have made suggestions to the TD on pay rise based on

very good grounds, and we can only provide good service if we have enough manpower, so everything is related.

If you just focus on working hours and you don't say anything about pay, low pay, then that's no good. Because it is all related to safety.

We can only provide good service if we have enough bus captains, and if we get paid reasonably, then we would not have driver fatigue and we can drive safely.

We regard it as a responsibility. This is not a job, so to speak. But the bus companies regard it as a kind of job, and don't see it as a trade coming with great responsibility.

That's all I want to say. Thank you, Chairman.

CHAIRMAN: Thank you for your closing remarks, and thank you for abiding by your promise that it would take two minutes.

These proceedings are now adjourned, and we will resume again -- I think it is on Tuesday, when we have other evidence to receive.

Thank you, gentlemen, for attending, and we apologise for the inconvenience and having to ask you to come back. Thank you for being patient and waiting until we could reach you. But we are now adjourned.

(5.40 pm)

梁錦強先生，巴職聯組織主任，新世界第一巴士公司職工會副理事長（巴士業職工會聯盟（包括各會員工會，即九巴員工協會、新世界第一巴士公司職工會及城巴有限公司職工會）代表）

主席：（經傳譯員）黃大律師，早晨。

黃女士：（經傳譯員）早晨。

主席：（經傳譯員）黃小姐，係，早晨。感謝你今日就係接納我哋嘅邀請上嚟作證，你而家現時係九巴嘅現有職員，係嘛？

黃綺玲女士：（經傳譯員）係。

主席：（經傳譯員）我哋就會請黃大律師，佢就係協助我哋獨立檢討委員會嘅大律師，佢會問問題。咁就係向你提問，就用咁嘅方式向你取證，咁你可以作補充，你亦都可以就係睇番我哋嗰個投影器上面打出嚟嘅文件，又或者如果想嘅話亦都可以攞番嗰個印冊本，明白嘛？

黃綺玲女士： Yes.

主席：（經傳譯員）好，唔該，黃律師。

黃女士：（經傳譯員）黃小姐，感謝你今日出席，我今日就想係先睇係嗰個休息嘅設施。咁你曾經係回應咗我哋獨立檢討委員會嘅函件，咁嗰個日期就2018年6月28號嘅信，咁至於話你嗰個回應就喺2018年7月4號就係畀我哋，大家可以睇番呢個FE嗰個文件夾，199頁。

黃小姐，我未向你問問題之前--未就呢個題目係問問題之前，先問下係你喺九巴度係工作咗幾耐呢？

黃綺玲女士：可以，我有廿一年喺九巴工作，亦都係喺車務嗰方面嘅 operations 嗰方面，亦都係喺兩間唔同嘅車廠工作過，一間係荔枝角廠，另一間係屯門廠。

黃女士：（經傳譯員）你係幾時係開始係擔任現時嘅職位呢？就話係九巴屯門車廠嘅車務主管，係幾時開始呀？

黃綺玲女士：（經傳譯員）你問題係幾時呀？係幾時？自從 97 年我就喺屯門車廠嗰度做，咁然後就轉咗去荔枝角廠，咁就係喺2016年嘅事，然後我又返番去屯門車廠，2018年嘅事。

黃女士：（經傳譯員）你喺你個回覆嗰度就講及就係有三十個車站，呢個就屯門嘅車廠底下，有三十個係總站。我留意到就係喺楊晉瑋先生嘅陳述書嗰度，佢就提及有三十一個總站，想問下邊個先啱呢？係三十定三十一呢？

黃綺玲女士：總站我哋未必係有站長，即係有人 station 嘅，咁可能喺嗰個 counting 方面，可能 Kelvin Yeung 同我可能有少少出入，應該係都 between 30、31。

黃女士：（經傳譯員）好，唔該。我想問下，你係負責打理幾多個車站？

黃綺玲女士：有十個如果 under，因為我係負責天水圍區，咁差唔多有--我要數下先。

主席：（經傳譯員）係，慢慢。

黃綺玲女士：如果而家 under 我屯門廠，而家喺呢個 as on assistant manager，我係有四個總站係 under 天水圍區。

黃女士：（經傳譯員）係。我明白喺屯門車廠嚟講呢，佢就負責三個區嘅車，屯門、元朗同埋天水圍，你就係負責天水圍？

黃綺玲女士：（經傳譯員）係。

黃女士：（經傳譯員）係咪天水圍所有嘅總站？

黃綺玲女士：（經傳譯員）係。

黃女士：（經傳譯員）總共有四個總站，係咪呀？

黃綺玲女士：（經傳譯員）係。

黃女士：（經傳譯員）咁其他呢？係咪都係由楊生負責？

黃綺玲女士：（經傳譯員）楊生就只係負責屯門區，元朗就係喺另一位係助理經理管理嘅。

黃女士：（經傳譯員）係，助理經理邊位？

黃綺玲女士：（經傳譯員）佢係 Amanda Hung。

黃女士：（經傳譯員）黃小姐，喺你嘅陳述書嗰度，你講過你係有兩種嘅休息室，首先第一種叫做係 A 類，第二種就叫 B 類或者 B 型。B 型我知道個大細嚟講就大啲，你可唔可以講出就除咗嗰個大細之外，兩者仲有咩嘢分別呀？

黃綺玲女士：除咗個 size 之外，其實裏面嘅間隔都有少少唔同，如果係大啲 size 嘅 kiosk，我哋係可以放多啲 electrical，譬如微波爐、雪櫃、飲水機都可以放埋喺個房裏面，如果係細嗰啲主要就係 for 我哋站長，佢哋 working station 嚟嘅，咁另外一啲嘅 kiosk 就係 for 頭先所講嘅微波爐、雪櫃，淨係 for 啲死物。

黃女士：（經傳譯員）會唔會係有個地方佢哋可以係瞓喺度呢？即係兩者...

黃綺玲女士：呢啲係工作地方，另外仲有啲--如果有啲地方個總站 bus station 比較大，我哋可以提供一個我哋叫 rest room，就 for 車長一啲嘅休息，咁佢個 size 等於我哋講嘅另外一個大啲 kiosks，其實嗰隻大啲嘅 kiosks 有 for 站長，或者係 for 車長休息，咁個 size 係一樣，但係裏面嘅設計係會有啲枱，有啲凳嘅設備。咁另外我哋仲有一啲 concrete 嘅 office，可能係個 PTI 本身係 provide 嘅 concrete 嘅 office，咁就會嗰啲地方會大啲。正如我 mention 過，亦都有啲地方點解係可以有多啲空間，或者可以多啲凳，嗰啲就係 concrete 嘅 office。

主席：（經傳譯員）你話 PTI 係咩嘢意思呢？

黃綺玲女士：（經傳譯員）公共運輸設備。

主席：（經傳譯員）你所打理嘅，有冇呢啲咁樣嘅地方就可以休息嘅設施呢？

黃綺玲女士：（經傳譯員）好似係天水圍市中心就有一個呢係石屎嘅地方，咁我哋就可以提供到係車長休息嘅地方，咁另外一個房呢就係畀嗰個係站長。

主席：（經傳譯員）唔該。

黃綺玲女士：（經傳譯員）對唔住，請你講。喺天恩、天富同埋天慈，佢哋都有兩個大啲嘅房，一個就係畀站長，一個就係畀車長，同埋我所管理嘅嗰四個站，都已經係有嗰個嘅休息。

黃女士：（經傳譯員）你所管理嘅四個站，我想問下呢四個站係咪有一個係安排，就係車長係要係分開嗰更嚟到做？

黃綺玲女士：Yes.

黃女士：（經傳譯員）有幾多個係咁㗎？

黃綺玲女士：（經傳譯員）我冇嗰個數字，但每一個站頭我哋都有唔同嘅路線，有啲係長程車，有啲係短程。咁我哋即係會混合，咁我哋就會即係混合，咁有一啲更就係混合更，有啲就係一氣呵成，即係話只係早更或者係夜更。

黃女士：（經傳譯員）好嘞，咁若果喺對方，就係車長要分開兩次嚟到做嘅話呢，佢哋係咪都係有休息嘅設施？

主席：（經傳譯員）你係咪就係講嗰四個呀？

黃女士：（經傳譯員）係。

主席： Thank you.

黃綺玲女士：（經傳譯員）係，我哋有提供，我哋有提供嗰啲設施，喺我管理嘅車站嗰度係有㗎。咁同埋喺天水圍嘅車廠，車長呢都可以喺休息嘅時間，就係喺天水圍車廠裏面休息。如果佢哋住得近自己屋企嘅話呢，亦都可以返屋企休息，然後呢係再返嚟做嘢。因為我哋係畀兩、三個鐘頭呢畀佢係喺中間休息。

主席：（經傳譯員）想問下天水圍市中心係一個車廠定抑或係車站呢？

黃綺玲女士：（經傳譯員）我哋另外有一個車廠叫天水圍車廠，都係喺天水圍嗰個區。

主席：（經傳譯員）你睇番呢個螢光幕，嗰度有好多站，咁邊個喺天水圍？

黃綺玲女士：（經傳譯員）天水圍市中心就係一個係站，咁另外我哋應該仲有一個叫天水圍車廠，咁嗰個只係畀巴士停泊。

主席：（經傳譯員）即係話呢度冇列出天水圍車廠。

黃綺玲女士：（經傳譯員）啱，你講得啱。

黃女士：（經傳譯員）207 嗰度，你就係講到一個天水圍市中心，一個係天水圍鐵路站。呢啲都唔係你所講嘅休息設施？

黃綺玲女士：（經傳譯員）對唔住，我漏咗，係呀，天水圍鐵路站都係。

黃女士：（經傳譯員）兩者都係？

黃綺玲女士：（經傳譯員）呢個係另一個站，天水圍鐵路站，另一個呢都係屬於我管嘅係總站㗎。

主席：（經傳譯員）你較早時候講過，天水圍市中心嗰個站都有休息嘅設施？

黃綺玲女士：（經傳譯員）係呀，嗰度呢係提供個休息設施。

黃女士：（經傳譯員）呢啲休息嘅地方，係屬於 A 類，定係 B 類，係咪嗰啲大啲嘅呢？

黃綺玲女士：（經傳譯員）係 B，B 型，大啲嗰個。

黃女士：（經傳譯員）咁喺嗰四個車站嚟講，係咪都係 B 型呢？

黃綺玲女士：（經傳譯員）除咗天水圍係市中嗰嗰呢係石屎做，咁所以有一個係石屎嘅地方。咁就係畀嗰啲車長休息。另一個就喺天富，天水圍鐵路站，佢哋都係 B 型嘅。

黃女士：（經傳譯員）咁即係話亦都會有啲長凳畀佢哋，係咪呀？係畀車長？

黃綺玲女士：（經傳譯員）係呀。唔係真係長凳，係椅同埋檯，讓佢哋食飯同埋休息。

黃女士：（經傳譯員）咁喺你嘅陳述度，你就提到即係如果要安裝一啲即係用化學劑嘅廁所呢，即係個需時係比較長嘅，即係當時你係管理緊荔枝角嘅巴士車廠，咁呢個就係喺第 198 頁所講嘅，喺你嘅陳述，咁你就提到荃威花園。我想你睇番呢一個會議紀錄，因為工會亦都係有向運輸署反映呢一點，咁我就係想確認你係咪知道，咁呢個就係喺 TU 嘅文件夾，或者係 192 段，咁呢一個就係張國柱當時立法會議員，同埋呢一個巴士業職工會聯盟，同埋其他工會發出嘅。

主席： And the date?

黃女士：（經傳譯員）日期係 2015 年 3 月 4 號。呢個就係第 260 頁，192 嘅編號，咁呢就係喺上面呢一個部分，咁呢個即係講緊巴士站嘅設施。咁而上面就話，工會係不滿，因為大部分嘅巴士總站都係冇一啲固定洗手間去畀員工去用，同埋佢哋係要求運輸署係去檢討巴士總站嘅安排。

咁而現有嘅程序係非常之複雜，即係如果巴士公司係想安裝呢啲員工嘅廁

所，同埋其他嘅巴士站設施，咁諮詢過程呢亦都係非常之費時，咁而建議就係申請同埋諮詢嘅過程呢，係應該簡化同埋加快，而工會亦都係要求以下嘅巴士總站係應該加快去安裝設施，咁呢就係呢度提呢一個荃威花園嘅巴士總站，呢個就係你喺198頁提到嘅荃威花園站，係咪呀？

黃綺玲女士：（經傳譯員）係。

黃女士：（經傳譯員）咁而家個情況係點呢？荃威花園嘅巴士站係咪有廁所呢？

黃綺玲女士：（經傳譯員）係。

黃女士：我用番中文，Allway Garden 嗰度其實係一個露天總站喇，咁嗰度其實個廁所呢係要行得好遠先至有一個政府嘅公廁，咁另外喺呢個總站嘅對面呢有個商場，係個商場有個廁所，但係鎖住嘅，咁所以長期我哋係要向嗰個管理處呢係借鎖匙先可以去到㗎我哋啲員工。咁嗰個管理處呢亦都曾經講過，因為我哋唔係租客，所以就唔想借畀我哋，所以基於呢個原因，以我所知，荔廠喺舊年亦都知道--我哋曾經申請過好幾次，已經都 submission 過畀 Transport Department 去申請啲 chemical toilet，咁亦都喺舊年，我係喺--等我睇下，2017年1月嘅時候，我亦都係入過一個 application，等我睇番先。

係2016年1月嘅時候呢，我哋亦都再次向 TD submit 嗰個 chemical toilet，咁亦都喺中間嘅過程呢，TD 亦都係 reject 咗我哋嘅 application，基於話 public 嘅 consultation 嘅 rejection，咁跟住我哋亦都再探討個位置，因為其實一個露天嘅總站，其實附近一定會有少少係影響居民，但係我哋都以一個角度，係員工都需要洗手間嘅角度去同運輸署，甚至係當區嘅議員再去申請一啲比較可以接受嘅位置，咁喺再中間嘅過程再探討，咁亦都終於喺舊年嘅7月我哋再次 revised 我哋嘅圖再去 submit，亦都最後運輸署係喺10月嘅時候批，係基於因為我哋嘅員工真係冇得用，同埋中間有個過程我哋係亦都係同嗰啲當區嘅議員，都係再同佢好多次嘅溝通，令到佢理解我哋呢個員工嘅生理需要，係要擺一個 chemical toilet，所以終--終於喺舊年嘅10月有一個 approval letter 返咗。

黃女士：（經傳譯員）呢個只係其中一個例子，咁根據會議紀錄，你畀嘅例子只係15年3月。咁你係等到去年嘅10月先至收到呢一個申請嘅批准，咁即係話係用咗起碼兩年先可以成功申請到安裝呢個廁所，係咪呀？

黃綺玲女士：（經傳譯員）其實係超過兩年，咁因為再之前呢我係同其他嘅同事有其他嘅電郵來往，咁但係喺我負責嘅期間，都係整整係用咗兩年。

主席：（經傳譯員）荃威花園嘅巴士站係有幾耐歷史？

黃綺玲女士：（經傳譯員）超過二十年，我唔係好記得嗰個歷史係點。

主席：（經傳譯員）咁即係一有呢個總站都係已經開始有巴士路線係行駛㗎嘞？咁點解係係即係當時係有呢個總站而係冇廁所呢？

黃綺玲女士： So --

主席： How does that happen?

黃綺玲女士：（經傳譯員）我哋嘅車長呢係需要係從商場嘅管理處借廁所鎖匙。因為佢知道我哋會借呢啲鎖匙，所以佢哋就換咗啲鎖。

主席：（經傳譯員）咁如果係冇安裝廁所呢，點解當年係可以興建呢一個總站嘅呢？點解會咁樣做嘅呢？

黃綺玲女士：（經傳譯員）即係喺我負責嘅期間，我就見到呢個問題，所以我就嘗試同運輸署同埋區議會去傾嘅，咁區議員呢據我所知，佢哋係唔想喺呢一個公共交通交匯處係安裝一啲用化劑嘅廁所。

主席：（經傳譯員）咁佢哋有得揀嘅，即係究竟如果有一個廁所，點解釋會決定去興建呢個巴站呢？

黃綺玲女士：（經傳譯員）佢哋就即係要求我哋係去借用商場廁所，呢個就係個解決嘅方法。

主席：（經傳譯員）呢個就唔算係一個方法嚟㗎，係咪？

黃綺玲女士： Yeah, it is true.

黃女士：（經傳譯員）你畀嘅第二個例子，就係樂華，咁就係 17 年 8 月就喺 198 頁，咁喺你嘅陳述度呢，你講到呢一個樂華嘅問題，係到咗 17 年 8 月先至係解決嘅，即係你經過同區議會周旋之後。你喺樂華邨嗰度幾時已經係申請去興建一個休息室呢？

黃綺玲女士：（經傳譯員）咁我睇番報導呢，係超過五年，咁但係呢個就唔係我負責嘅範圍，咁但係我根據新聞報導，就係超過五年前呢九巴已經係作出申請。

主席：（經傳譯員）樂華邨係咪喺觀塘？

黃綺玲女士：（經傳譯員）係。

主席：（經傳譯員）係咪一個巴士站嚟？

黃綺玲女士：（經傳譯員）係。

黃女士：（經傳譯員）咁你畀嘅第三個例子呢，都係喺屯門嘅車廠，就係元朗公園。咁你就指出你係 14 年係申請引入呢個休息設施，但係 16 年先去批准，咁點解要足足兩年先可以引入呢個休息嘅設施呢？

黃綺玲女士：（經傳譯員）其實我哋唔知道係咩嘢原因，咁但係個程序呢就係我哋向運輸署申處，然後佢哋就會向公眾呢係去分享一啲--同埋佢會同相關嘅人士，包括係警方，區議員，元朗公園附近嘅居民等等，佢哋全部都有諮詢。我記得

佢哋答覆入面講，就係警方係否決呢個申請，咁但係我就覺得好奇怪，因為唔係居反對，而係警方，咁我哋係要求警方--即係我哋希望呢同警方去傾下點樣可以解決呢個問題。因為休息室唔單止係畀呢啲站長用嘅，亦都係可以畀我哋嘅車長用，即係如果要喺元朗公園提供服務呢，我哋係要有間休息室嘅，所以我哋係要求警方去解決呢個問題，同埋希望各方都係滿意。

黃女士：（經傳譯員）你同警方有冇書信來往呢，就住呢個問題？

黃綺玲女士：（經傳譯員）有。我哋係呈交咗資料畀運輸署，要求佢哋進行另一輪諮詢，就係喺 2015 年。

黃女士：（經傳譯員）你可唔可以即係向我哋分享呢個事件嘅相關嘅書信來往呢，即係喺元朗公園。

黃綺玲女士：（經傳譯員）係。

黃女士：（經傳譯員）就係你哋同運輸署同警方之間嘅書信？

黃綺玲女士：（經傳譯員）可以，可以提供。

黃女士：（經傳譯員）咁我就想你睇番 TU 文件冊，咁呢一份就係一份報告，就係巴職聯呈交嘅，就係 17 年 7 月 16 號。

主席： Page?

黃女士：（經傳譯員）就係第 260 頁橫格 346-2。

主席： Thank you.

黃女士：（經傳譯員）呢個表呢就列出咗巴總站嘅位置，同埋申請嘅進度，咁我就想同你講講幾個例子，同埋我想知道呢個佢哋相關嘅進度係點嘅。咁喺呢一頁呢就係巴士公司係九巴，總站嘅位置呢就係屯門寶田邨。咁呢就話已經係諮詢咗呢條邨兩年，但係就冇收到回應。

黃綺玲女士：（經傳譯員）呢個應該係楊晉瑋先生呈交嘅資料嚟嘅。

黃女士：（經傳譯員）我相信唔係咁樣嘅，因為呢個係巴職聯向我哋呈交嘅文件嚟嘅，喺附錄七，就並唔係楊晉瑋先生呈交嘅文件嚟。

黃綺玲女士： Okay.

黃女士：（經傳譯員）咁無論如何呢，我就想同你確認一下情況係咪咁樣，咁喺右面嗰一欄，就話相關嘅申請呢係必須要得到房屋署嘅批准，運輸署呢係已經去信畀房屋署係要求呢儘快處理九巴嘅申請。佢呢亦都係即係有打電話畀房屋署去跟進，而房屋署呢就回應表示呢佢哋仍然係處理緊相關嘅事項嘅。咁呢個就係即係關於屯門嘅寶田邨，首先呢個屋邨嘅範圍係咪你管轄㗎？

黃綺玲女士：（經傳譯員）唔係。

黃女士：（經傳譯員）即係嗰度嘅巴士站係咪你管轄㗎?

黃綺玲女士：（經傳譯員）係楊晉瑋先生負責。

黃女士：（經傳譯員）咁你係咪唔知道呢項申請嘅進度呀？

黃綺玲女士：（經傳譯員）係，我唔知道。

黃女士：（經傳譯員）咁其餘嘅設施呢？即係 260-346-2，咁如果你去番 260-346-6 呢，你可唔可以睇一睇究竟邊一個項目係同你有關呀？或者係即係嗰度嘅屋邨嘅巴士站係由你管理？

黃綺玲女士：（經傳譯員）冇，全部都唔係我管理嘅。

黃女士：（經傳譯員）黃小姐，我就想問你另一個課題，你提過呢就話你係為九巴工作咗超過二十年嘅。

黃綺玲女士：（經傳譯員）係。

黃女士：（經傳譯員）我想問嘞，你認唔認識一位人士叫做 Raymond Cheng？

黃綺玲女士：（經傳譯員）係，我識。

黃女士：（經傳譯員）佢呢就係以前都係九巴嘅工。2010 至 2014 年期間呢就喺九巴度工作，就係呢一個安全及服務質量部，你知唔知呀？

黃綺玲女士：Yes.

黃女士：（經傳譯員）喺佢鄭桂興先生嗰個陳述書嗰度呢，佢就提過呢就係曾經呢研究過，即係喺佢就職期間，就係喺將軍澳係巴士意外 09 年出咗意外之後，佢哋進行過一個研究，咁呢就係研究過二十九個係香港嘅一啲急彎，咁呢亦都呢係有討論過，究竟應該呢嗰個係時速限制應該係定係邊一度。

主席：（經傳譯員）或者我哋係畀證人睇一睇相關嘅陳述書。

黃女士：（經傳譯員）係，相關嘅陳述書係 96 頁。

主席：（經傳譯員）喺邊一個文件夾呀？

黃女士：（經傳譯員）係 FE 嗰個文件夾嘅 96-4。如果你睇番嗰段就係嗰個標題就話巴士容易係翻側。

主席：（經傳譯員）或者係畀少少時間佢睇睇。

黃女士：（經傳譯員）係，你介唔介意而家呢先係睇一睇呀？即係 96-4 嗰一頁嘅文字。或者係請你一路睇到去 96-6，即係總共 3 版。

主席：（經傳譯員）你慢慢，唔需要急。

黃女士：（經傳譯員）係，黃女士，喺呢份陳述書嗰度呢，可以見到就係鄭桂興先生呢佢呢就係話佢喺 2013 年嘅時候呢，就開始研究呢一啲係彎位嘅，咁佢就係搵咗係四個車廠經理，同埋係車長、訓練學校，同埋係維修部門嘅代表呢就成立一個研究小組，係深入咁去睇下佢哋巴士網絡嗰度所有嘅急彎，咁就有收集咗係數以千計嘅係轉彎嘅數據，咁同埋呢就係睇番係數以百計嘅可能有危險風險嘅係呢一個彎位，然後將佢係最後就係收集到頭嗰二十九個，咁就容易產生嚴重因為係翻側車輛嘅意外，咁呢有一啲中文嘅例子喺度，咁你知唔知呢？

黃綺玲女士：Sharp bend，但係我唔係一個喺個 group 裏面嘅 for make 呢樣嘢囉。

主席：（經傳譯員）你知唔知邊個係嗰個成員呀？

黃綺玲女士：（經傳譯員）正如鄭先生所講，係呢個車廠嘅經理可能，咁同埋呢就係訓練學校嘅導師。

主席：（經傳譯員）好，唔該。

黃女士：（經傳譯員）呢一個研究小組，呢度提過嘅研究小組，或者你揭去跟住嗰版，或者跟住嘅第 3 版，即係 96-6 嗰度，嗰個呢就提及呢就係一個係研究小組，就進行咗測試，測試晒所有二十九個係彎位，喺不同嘅道路情況，係不同嘅車速，不同嘅係載客量嘅情況底下嘅情況，亦都將佢呢拍攝咗錄影帶嚟到作日後參考，你知唔知道係有咁樣樣係要拍咗錄影帶去研究呢？

黃綺玲女士： No.

黃女士：（經傳譯員）或者繼續就睇落去，去到下面嗰度，呢度提及呢就係話有一份呢係安全小冊子，我諗後嚟呢就係澄清咗，就唔係小冊子，咁係鄭桂興先生就講咗，就話係一啲細細張嘅卡仔，咁就詳細咁話咗每一個係危險彎位嘅正確嘅位置、方向、道路嘅情況、道路性質、過往嘅紀錄，以及係運輸署嘅文件或者係乘客投訴所得到嘅最新嘅相片或者係圖，咁呢就總共有三十一個就係安全駕駛嘅貼士，咁就總共做咗一千五百個研究，你知唔知㗎？

黃綺玲女士：（經傳譯員）我知道有一個安全小冊子，咁但係對於嗰個研究我就唔係太肯定。

黃女士：（經傳譯員）換句話講，就係就呢二十九個彎位，就有一本安全小冊子，係咪呀？

黃綺玲女士：（經傳譯員）係，大體上係咁，咁就促請司機或者係車長係要小心。

黃女士：（經傳譯員）關於呢個研究結果，你知唔知悉呀？

黃綺玲女士：（經傳譯員）唔太肯定。

主席：（經傳譯員）你知唔知就即係將佢集中起嚟，咁同埋呢就係印發咗畀啲車長呀？

黃綺玲女士：（經傳譯員）係呀，呢啲安全小冊子呢係會畀嗰啲車長，我哋亦都係簡單咁樣畀咗啲指示佢哋。

黃女士：（經傳譯員）關乎一個安全小冊子係畀車司，咁你知唔知裏面係有冇講及呢二十九個急彎呢？

黃綺玲女士：（經傳譯員）對唔住，我冇乜睇過嗰個手冊嘅細節，咁所以對於呢個課題，我唔係太清楚。

黃女士：（經傳譯員）你喺九巴嘅時候，我想任何時候有冇同係管方呢就係討論過要進行一項研究，又或者呢係收集車長嘅意見，就睇下佢哋對於呢一啲係香港係危險嘅道路情況嘅睇法呀？

黃綺玲女士：（經傳譯員）我記得我當時就唔係嗰個助理經理，我當時就負責車務，咁我都有提供係話邊一啲地方可能係有潛在嘅危險，即係講到嗰啲係急彎，喺當時嚟講，我哋提供咗一啲地點，咁呢就係畀安全及服務質素部門，讓佢哋就係進一步跟進。

主席：（經傳譯員）係嗰個安全及服務呀，係唔係？

黃綺玲女士：（經傳譯員）係。

黃女士：（經傳譯員）係邊段時間呀？

黃綺玲女士：（經傳譯員）係鄭先生嘅時間，係2010至到2014年。

黃女士：（經傳譯員）咁2014年之後又點呀？

黃綺玲女士： After --

黃女士：（經傳譯員）14年之後又點呢？你有冇繼續呢就係提供呢一方面嘅資料？

黃綺玲女士：（經傳譯員）係，繼續。

黃女士：（經傳譯員）可唔可以畀番一啲文件我哋呢？你話你呢就係提供咗一啲地點嘅，即係你係顧慮嘅地點，就話有啲地方呢可能嗰個路面情況就係有潛在嘅風險嘅。

黃綺玲女士：（經傳譯員）我未必須呢係有白紙黑字寫低咗，咁但係呢我記得就喺將軍澳意外發生之後呢，咁呢係有一個焦點小組嚟到係研究呢一個課題。

主席：（經傳譯員）有冇係開會嘅時候係做咗呢個會議紀錄或者其他嘅文件？

黃綺玲女士：（經傳譯員）我唔太肯定有冇咁嘅文件。

黃女士：（經傳譯員）你講嗰一個係焦點小組，係咪同嗰個係研究小組唔同㗎？

黃綺玲女士：（經傳譯員）類似，類似一個小組嚟到去睇下嗰啲急彎嘅地點。

黃女士：（經傳譯員）咁呢一個焦點小組嘅成員又係邊個呀？

黃綺玲女士：（經傳譯員）我諗佢哋全部都離開咗九巴，有關嘅車廠經理，有啲呢就係退咗休，有啲就已經辭咗職。

主席：（經傳譯員）有關嗰個小組，即係睇嗰啲急彎小組嘅成員呢，一係呢就已經係離職，一係呢就已經退休，你係咪咁嘅意思呀？

黃綺玲女士：（經傳譯員）係。

主席：（經傳譯員）好，唔該。

黃女士：（經傳譯員）佢哋係幾時退休或者係幾時離職嘅呢？

黃綺玲女士：（經傳譯員）最近呢幾年，但我記唔清楚嗰個日期。

黃女士：（經傳譯員）佢退休或者辭職之後，咁嗰個焦點小組又點呀？

黃綺玲女士：（經傳譯員）我哋就改變咗，就每一間車廠呢就會就係關注嗰個安全問題，但係呢就唔喺呢一個安全及服務部門。

主席：（經傳譯員）個焦點就反為就係轉向每一個車廠個別去睇，就唔係中央，就係分散咗係畀番個別車廠？

黃綺玲女士：（經傳譯員）係。

黃女士：（經傳譯員）你提過係個別車廠，你有冇同車長係傾下，就問下根據佢哋嘅經驗，有冇邊啲路段或者邊啲彎位呢係危險，好讓你哋可以提醒其他車長，請佢哋係要小心，有冇係做過咁嘅嘢呢？

黃綺玲女士：（經傳譯員）我哋會分析一啲嘅意外發生嘅位置，我哋會有一啲分享小組去分享巴士車長嘅經驗等等，咁我哋係會分析道路嘅潛在危險，咁如果有需要呢我哋係會同訓練學校嘅教師去傾，點樣可以提醒車長係去小心呢啲道路情況嘅。

黃女士：（經傳譯員）咁呢個分享小組呢，係咪即係只係喺某啲嘅車廠度去做，定係唔同車廠之間亦都係會討論呢？

黃綺玲女士：（經傳譯員）咁呢個係視乎個別嘅車廠而定嘅，佢哋可能係個別會同訓練學校去傾。咁我哋有時係會同訓練學校去會面，其實我哋任何時候都可能會同佢哋傾，就未必須一定係要等開會先傾。

黃女士：（經傳譯員）呢個分享小組嘅舉行頻率係幾多呢？

黃綺玲女士：（經傳譯員）即係正如我所講，如果我哋係要分析一啲交通意外呢，其實係冇一個特定嘅頻率嘅，咁如果係巴士車長之間分享經驗呢，如果佢哋覺得某個位置係有危險，佢哋係會同呢個教師去講，同埋亦都係會發出一啲通告去提醒車長去小心，咁就未必有一個特定嘅會議或者係時間。

黃女士：（經傳譯員）咁你提到係發出一啲通告去提醒車長去小心某一啲位置，呢啲係咪書面發出嘅通知，定係口頭？

黃綺玲女士：（經傳譯員）兩種都有嘅，咁但係多數呢都係書面通知。

黃女士：（經傳譯員）係咪每個車廠都有？

黃綺玲女士：（經傳譯員）係。

黃女士：（經傳譯員）可唔可以畀一啲例子我，我哋睇下即係呢一啲通告係點樣？

黃綺玲女士：（經傳譯員）我而家冇帶，可以遲啲提供。

黃女士：（經傳譯員）好，唔該晒。至於呢啲個別嘅通知信，其實係咪就住個別嘅意外而發出嘅呢？係咪有發生咗意外先至會係發出呢啲通告呢？

黃綺玲女士：（經傳譯員）你第一個問題，答案係，係嘅。有時如果出現意外，我哋係會提醒車長某啲嘅事項。

黃女士：（經傳譯員）第二個問題呢，就係會唔會就住車長嘅投訴而發出通告呢？或者應該咁講，係咪即係必須係要有車長去即係提出某啲道路嘅情況呢？

黃綺玲女士：（經傳譯員）如果某啲道路情況係會產生危險，我哋係會向車長發出提醒或者通告。

黃女士：（經傳譯員）我嘅問題係，係咪你哋公司自發去進行一啲研究呢，定係因為某啲嘅車長提出一啲意見，先至會去做嘢呢，係究竟邊一個描述係啱啲？

黃綺玲女士：（經傳譯員）如果車長係表達意見，我哋係會即係搵出呢個原因去避免意外再次發生，咁所以我哋係先會搵出呢一個原因，咁去睇下我哋可唔可以做一啲預防嘅措施，例如提醒佢哋道路嘅情況，譬如話落雨之後一啲樹枝呢，或者樹木可能係會引起危險，咁我就會提醒佢哋係要有耐性地駕駛，即係我哋就會提醒佢哋喺嗰個路段係要小心啲駕駛。

黃女士：（經傳譯員）咁換句話講，即係你會因應車長嘅意見係去作出反應嘅。

黃綺玲女士： Yes.

黃女士：（經傳譯員）而唔係由巴士公司去主動進行嘅，你入咪咁嘅意思？

主席：（經傳譯員）我諗佢所講呢就係佢係就住意外作出反應，而佢哋亦都係會聽車長嘅意見。

黃綺玲女士： Yes.

黃女士：（經傳譯員）咁而佢就住呢啲情況呢，就會係發出一啲嘅通知嘅。

黃綺玲女士： Mm-hmm. Right.

黃女士：（經傳譯員）你可唔可以畀啲例子我哋，即係喺你負責屯門車廠嘅時候，即係當時你係認為有邊啲嘅道路係可能引起危險嘅呢？

主席：（經傳譯員）如果你係畀唔到例子呢，你可以講嘅。

黃綺玲女士：（經傳譯員）冇嘅，我講唔到。

主席：（經傳譯員）黃大律師。

黃女士：（經傳譯員）即係你而家係講唔出例子，係唔係？

黃綺玲女士： Yes.

黃女士：（經傳譯員）咁呢就另一個問題，就係脫班嘅問題。咁我哋係聽取咗一啲證供，就係出現咗一啲脫班嘅情況，就係有各種原因，包括係道路嘅情況，咁有時係因為行車時間預測係唔準確，你可唔可以確認係咪即係發生咗呢啲情況？

主席：（經傳譯員）首先你可唔可以解下咩嘢為之脫班呀？

黃綺玲女士：（經傳譯員）咁我哋有一個行車嘅時間表，係一啲即係刊憲咗嘅班次，係我哋承諾嘅服務嚟嘅，咁喺某啲嘅時間係有一啲刊憲嘅時間表，咁如果我哋唔能夠係去履行呢個時間表呢，咁就係會視為脫班。

主席：（經傳譯員）咁即係話係為咗係即係履行呢個刊憲時間表，係唔係？

黃綺玲女士：（經傳譯員）冇錯。

黃女士：（經傳譯員）咁呢個情況喺你管理嘅屯門車廠有冇出現呢？

黃綺玲女士：（經傳譯員）係有嘅。

黃女士：（經傳譯員）可唔可以同我哋講講點解係出現咗脫班呢？

黃綺玲女士：（經傳譯員）基本上係我哋係有足夠員工，或者唔足夠員工；第二呢就係交通情況可能會令到巴士唔能夠如常係到站；咁第三個原因呢就係可能係巴士故障，而我哋係唔可以喺短時間內係搵一啲其他巴士去替代。另外就係如果喺其他地區突然間有一個需求，我哋可能要重新去調配我哋嘅服務。

主席：（經傳譯員）即係去解決或者去滿足其他嘅需求？

黃綺玲女士：（經傳譯員）咁呢啲原因都係會引致脫班。其實我哋係要一直去久不久係檢討我哋嘅時間表，咁當我哋訂立呢一個服務時間表嘅時候，我哋係要檢討

每個地區睇下有冇出現變化，咁例如譬話喺非繁忙時間，即係服務需求唔高呢，我哋係會向運輸署去申請，可能去即係減少呢個班次。咁呢個時間呢就可以畀車長呢係休息下，即係畀佢哋有多啲嘅休息時間。咁所以我哋耐唔耐都會向運輸署申請。咁呢個亦都可以係減少班次，咁可能就會令到脫班率係下降。

主席：（經傳譯員）運輸署有冇係去即係去檢視你有幾多脫班嘅班次，你係咪要匯報㗎？

黃綺玲女士：（經傳譯員）要。

黃女士：（經傳譯員）你點樣去評估行車時間呢？即係當你將呢一個服務時間表刊憲嘅時候？

黃綺玲女士：（經傳譯員）咁第一次呢我哋係會用一啲巡邏車，咁我哋第一次呢就會用一啲巡邏車去行一次呢一個行車路線，去估計呢個行車時間。咁當我哋訂立咗時間表之後，過咗一段時間，即係如果環境嘅情況有變，我哋係會分析一啲即係之前行車嘅日子，然後就歸納出呢一個行時間，或者計算一個平均嘅行車時間，咁我哋亦都係會預計喺訂立咗時間表之後，嗰個時間有乜嘢嘅改變，咁呢個就係我哋喺計算行車時間嘅方法。

主席：（經傳譯員）咁如果你發現行車時間比你預計嘅時間長呢，你會點做呢？

黃綺玲女士：（經傳譯員）我哋係會向運輸署申請去更新我哋嘅行車時間表。

主席：（經傳譯員）你係咪定期都會咁樣做？

黃綺玲女士：（經傳譯員）係。

主席：（經傳譯員）你上一次做係幾時呢？

黃綺玲女士：（經傳譯員）上個月呢我哋係有遞到申請嘅，都唔係上個月，係5月。

主席：（經傳譯員）通常運輸署會幾耐覆？

黃綺玲女士：（經傳譯員）好耐嘅。運輸署就會話佢哋係要做一個調查，我哋唔單只係檢討呢個行車時間，我哋亦都係會檢討喺非繁忙時間班次可能唔需要咁頻繁，我哋可能會減少班次，咁而運輸署就會係進行一個調查，咁就需要好長時間。

主席：（經傳譯員）你講緊係咪以年計嘅呢，要幾耐呀？

黃綺玲女士：（經傳譯員）可能幾個月到上年計都有可能。

羅先生：（經傳譯員）你有冇用到黑盒嘅資料，去睇下究竟行車時間係咪有出入呢？

黃綺玲女士：（經傳譯員）我哋冇用黑盒，我哋有一個系統，就係九巴嘅系統，車長就係會用八達卡去向總站匯報，即係當佢哋到咗一個巴士站嘅時候，佢哋係要

即係嘟張八達通卡，咁我哋先知道佢係到咗。即係我哋可以用黑盒係去睇呢個抵站時間，咁當長到嘅時候，我哋係要求佢哋匯報佢哋已經到站，咁我哋會用我哋內部嘅系統，叫做 TER，就唔係用黑盒嘅。

羅先生：（經傳譯員）咁但係運輸署會唔會認為呢一個係足夠嘅理據，即係畀你去更改呢個時間表呢？

黃綺玲女士：（經傳譯員）我唔知道佢哋係即係點樣分析。

主席：（經傳譯員）即係如果呢個所謂嘅黑盒唔係會自動去進行呢個工作嘅咩，你知唔知道呀？

黃綺玲女士：（經傳譯員）你意思話黑盒嘅數據可以自動做到呢樣嘢？

主席：（經傳譯員）係呀，就話到畀你聽嗰個車程係幾長。

黃綺玲女士：（經傳譯員）係，我哋都會將佢放喺個數據嗰度，如果我哋需要呢係搵番啲資料出嚟，我哋就會將佢攞出嚟，咁去睇下巴士有冇準時到達，亦都可以睇埋呢係個車速，所以呢我哋就唔係用呢個嚟到去監察嗰個係行車時間。

主席：（經傳譯員）所以你呢就係靠車長就係去到譬如總站呢，就嘟嗰個八達卡，係咪呀？

黃綺玲女士：（經傳譯員）係。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）我想問，如果你哋有脫班，咁對你哋公司嚟講有咩嘢後果嘅呢？

黃綺玲女士：（經傳譯員）有咩嘢後果，我哋嘗試呢就係調派足夠嘅車長嚟到去儘量減少嗰個係脫班情況，呢個就係我哋個解決方案，其他嘅解決方案呢就正如我所講，譬如話非繁忙時間嘅班次係減少，咁呢就係少啲車長喺路上駕駛，呢個都係解決方法之一。

黃女士：（經傳譯員）係，黃女士，你認唔認識一位叫做 Alok Jain 嘅人士呢？

黃綺玲女士：（經傳譯員）係，我哋嘅係以前嘅 DOD 嚟嘅。

主席：（經傳譯員）DOD 你即係咩嘢意思呀？

黃綺玲女士：（經傳譯員）係呢個車務總監。

主席： Thank you.

黃女士：（經傳譯員）喺你嘅時候呢，你有冇機會係同 Alok Jain 係同傾過一啲安全方面嘅事宜呢？關於專營巴士嘅安全事宜，有冇同佢係傾過呀？

黃綺玲女士：（經傳譯員）我嘅理解就係，我只係就規劃嘅事宜係同佢傾，因為--係planner嘅head，係囉，planning。

黃女士：（經傳譯員）你講及一啲規劃嘅事宜，呢啲係咩嘢嘅事情呢？

黃綺玲女士：（經傳譯員）我哋有一個部門，就係負責做計劃，我哋就係會同規劃部門呢係傾，係講及呢個路線嘅發展，亦都會講及呢就係巴士嘅係車種，亦都會同呢個規劃部門傾。

黃女士：（經傳譯員）講到係巴士嘅型號，你會唔係傾到係黑盒嘅事情呢？

黃綺玲女士：（經傳譯員）唔係同佢講。

黃女士：（經傳譯員）咁喺你工作期間，你有冇係同呢個規劃部門就開會有講及黑盒嘅呢？

黃綺玲女士：（經傳譯員）冇。

黃女士：（經傳譯員）主席先生，我要問嘅係咁多。

主席：（經傳譯員）好，唔該，唔該晒。歐陽先生。

歐陽先生：（經傳譯員）唔該主席。黃女士，感謝你今日出席。我就係想跟進一下較早時候你所講嘅，你就話如果有某一個地點，你要係將佢界定為係一個潛在風險，或者係車長界定佢係有潛在風險，有冇一個程序就話要同總部係匯報番，又或者係同一個係訓練嘅導師係匯報㗎？

黃綺玲女士：（經傳譯員）我哋係會同訓練導師就係討論，即係如果冇潛在風險嘅話。譬如話講番我個經驗，譬如話當車長係入去總站，埋去條線嗰度嘅時候，可能嗰度呢就係起咗個巴士站上蓋，嗰度呢可能有潛在風險，我哋就會同係訓練學校導師係傾，就點樣可以減少嗰個風險，又或者係就嗰個巴士站上蓋就作一個修訂，將佢係改動。呢啲嘅事情呢，我哋都會係會檢討，我哋亦都會睇車長嘅經驗，正如我所講過，我哋會搵出嗰個問題嘅根由，然後就嘗試搵一個解決嘅方案。

歐陽先生：（經傳譯員）你哋咁樣嘅溝通，就係書面定抑或口頭嘅呢？

黃綺玲女士：（經傳譯員）兩者都有，有時係用電郵，有時電郵畀呢個訓練學校。

歐陽先生：（經傳譯員）好，唔該。仲有一個問題，你喺工作期間，以你嘅職責嚟講，我想問車長係有冇投訴過話佢哋嘅休息設施就唔夠好呀？

黃綺玲女士：（經傳譯員）係，有時我哋都會收到係車長有一啲要求，譬如話想要一個大啲嘅休息地方，譬如話係 B 型太細嘅話，佢哋想要多個，佢哋想有多啲嘅設施，譬如話蒸餾水，佢哋想有熱水、凍水，咁所以我哋就會儘量就係以我哋所能夠做嘅事情呢，係讓佢哋係滿意。

歐陽先生： Thank you.

羅先生：（經傳譯員）仲有一個係問題，我知道你係一個好有經驗嘅前線嘅經理，我想問下你，公司有啲咩嘢可以做或者係應該做，但係又冇做到呢？即係除咗我哋剛才已經係講過，呢個係指多年嚟係你留意到關乎巴士安全方面有啲咩嘢係應該做又未做？

黃綺玲女士：（經傳譯員）講到安全嘅問題，我諗唔單單係我哋公司，我哋公司自己做唔得晒所有嘅嘢，譬如話道路嘅情況。有啲道路嘅情況，譬如話道路設計，可能係不利於係雙層巴士行駛，呢啲亦都唔係巴士公司可以做，或者運輸署可以就道路嘅設計係做一啲嘢。

主席：（經傳譯員）好，黃女士，多謝你，感謝你呢今日係上嚟作證，協助我哋，我哋而家就完成嘞，你可以呢係坐番落去下面嗰度聽你嘅同事作證，又或者你可以選擇離開㗎。我哋而家想請楊晉瑋先生上嚟係作證。楊晉瑋先生，感謝你今日接納我哋邀請，係今日上嚟作證，剛才你已經係聽到係黃女士作證，相信你係理解我哋嗰個程序，咁而家直接就係問問題。

楊晉瑋先生：係，早晨，主席同埋兩位委員，或者可以畀我做一個開場白，可唔可以呀？係，好，咁早晨喇咁多位。咁首先我好多謝委員會邀請我出席今日呢個嘅聽證會，咁其實我就同剛才 Debby Wong 一樣呢，都係我嘅 assistant manager，咁其實其他同事會叫我哋做 zone head，或者我哋中文叫做車務主管。咁我同 Debby 都係負責屯門廠嘅一啲車務運作嘅，咁屯門廠頭先剛才講過，我應該要講慢少少，係咪呀？佢個翻譯可能趕唔切，係。咁屯門廠主要負責係屯門、元朗、天水圍三區嘅車務運作，咁而 zone head 呢佢主要個工作範圍就係去管理巴士嘅營運，包括巴士路線，前線車長，站長或者其他同事，同埋一啲站頭嘅設施，例如車長嘅休息設施等等，都係由我哋 zone head 去負責。

咁我哋嘅工作呢其實就需要同前線嘅同事非常之緊密聯繫，咁所以呢我哋一定要好需要知道所有前線同事佢哋嘅實際需要。咁同時間我哋除咗前線同事之外呢，我哋亦都要定期同管理層去溝通，同佢哋開會話番畀佢哋聽，我哋見到或者前線同事話畀我哋聽佢哋有啲問題，我哋都要話番畀管理層知，咁當然亦都要定期話番畀佢聽我哋每條路線個營運情況有啲困難。咁所以無論係佢哋管理層嘅處事方針，或者佢哋方向其實我哋都要好清楚。咁所以我可以咁講，我哋 zone head 係前線同事同埋管理層中間嘅一個好重要嘅一個橋樑。

咁或者我簡單介紹一下自己，咁我喺九巴都大概做咗將近 10 年，咁我就由低做起嘅。咁我 10 年前我就先加入沙田廠，就負責做呢個車務督察，咁車務督察其實係一個外勤嘅工作，咁主要佢係去協助乘客，提供服務，或者協助前線嘅車長，當車長遇到任何問題嘅時候呢，我哋即時第一個反應就要去到現場幫佢手，咁同時間車務督察都要去管理呢啲班次，站頭啲設施等等一系列大大小小嘅事，都係車務督察去負責管理。

咁兩年之後，咁我就升咗去車務主任，咁呢個係一個 office 嘅工作嚟嘅，就唔係外勤嘅工作，咁當然都要好多時間要出去出面 site 嗰度去工作。咁我頭嗰兩年，我就同安全及服務質量部就有一個好緊密嘅聯繫，因為我係負責 safety 呢樣嘢。咁兩年，即係再兩年之後，咁我就調派咗去元朗、屯門、天水圍呢三笪地方去做一個車務運作嘅管理。

咁其後公司都委派我去負責做一個 ROM 嘅 project，咁 ROM 就應該係叫做 real-time operation management，咁我留意到...

主席：（經傳譯員）楊先生，其實你頭先講咗話要講慢啲，不過你就冇講慢到，想請你講慢啲。

楊晉瑋先生：（經傳譯員）好，我會講慢啲。你想唔想我再繼續，再重複定...

主席：（經傳譯員）唔需要重複，不過慢啲。

楊晉瑋先生：咁我再講番喺個兩年之後，咁我就喺屯門、元朗、天水圍負責車務運作，咁當時公司就委派咗我去做一個 ROM 呢個 project，做一個研發。咁其實之前聽證會我都有留意過，應該有講過，real time operation management 呢個 project。咁所以就住呢個 ROM 同埋安全服務質量部，咁我都有經驗，所以我都好歡迎委員會如果需要問我任何關於呢兩笪地方嘅問題，我都好樂意去提供畀你哋。

咁就住今年即係好不幸，喺今年 2 月發一個嚴重一個交通意外，咁我發覺到即係九巴都成為咗各大傳媒嘅一啲焦點。咁無論係唔同嘅政黨，唔同嘅工會，甚至乎一啲我哋嘅舊同事，佢都會對我哋公司有好多唔同嘅意見，咁我發覺其實都唔只我嘞，我其他同事都發覺。

咁其實當中係有好多失實嘅報導，咁我就同埋另外六位 zone heads，咁我哋都覺得其實呢啲失實嘅報導，對於我哋而家嘅所有同事，無論車長又好，我哋前線管理人員又好，或者我哋後勤嘅管理人員，甚麼乎我哋嘅管理層都好，呢啲失實報導都係非常之唔公平，咁所以我哋最後就聯署一封信就寫畀我哋個董事局，我哋希望將我哋見到，我哋實際做緊嘅嘢，就將呢啲嘢一五一十就話番畀個--當然好簡短，就話畀董事局聽。咁最後我哋都將呢封信，就 forward 畀委員會呢邊去做一個參考。

咁我知道之前都有同幾位 zone head 有啲來往，咁今日可能淨係得我同阿 Debby 可以抽時間嚟到呢度，咁我都希望我哋可以即係用我哋 zone head 嘅身分去話番畀大家究竟實際嘅情況係點嘅。

咁其實喺我自己個角度睇，係意外發生之前，即係 2 月之前，咁當你問好多廣大市民，或者一啲街坊呢問佢關於九巴，你覺得近呢幾年佢服務如何呀？以我所知佢哋都應該都會答話「佢嘅服務都唔錯，進步咗好多。」例如喺巴士車型、設施，或者我哋啲預報到站時間等等一系列進步，我哋都有。

咁不過好可惜，就發生咗 2 月呢單意外之外，咁可能你問番啲街坊，佢都會覺得九巴個服務好差...

主席： Mr Yeung --

楊晉瑋先生： Yes.

主席：（經傳譯員）楊先生，好多謝你即係進行一個陳述，但係你已經用咗好長時間。

楊晉瑋先生：（經傳譯員）我差唔多講完。

主席：（經傳譯員）你最後可以有一個最後嘅陳詞，咁但係而家我哋要進入一個問答嘅環節。黃大律師。

黃女士：（經傳譯員）楊先生，多謝你出席。你提到你 10 年前係加入九巴，咁即係大概係 2008 年。

楊晉瑋先生：2009 年，冇錯。

黃女士：（經傳譯員）你幾時係開始出任元朗車廠嘅車務主管？

楊晉瑋先生： Around 2013.

黃女士：根據你嘅陳述，或者你啱啱所講，屯門車廠係負責屯門、元朗、天水圍嘅車站，咁而你淨係負責屯門，係咪呀？

楊晉瑋先生：喺 2013 年嘅時候，我就曾經管理過元朗同埋天水圍，應該大概管理咗大半年，咁之後我就負責屯門區嘅車務主管，咁其實直至到 2018 年 7 月，即係其實係上個月嘅時候，咁我哋會有啲 rotation 嘅，咁我就 rotate 番去元朗同埋天水圍，咁所以我係對屯門、元朗、天水圍三區，我都可以講話非常之熟悉嘅。

黃女士：（經傳譯員）喺你陳述度你講到係有三十一個巴士總站，就係即係喺屯門車廠轄下，咁你現時係管理緊幾多個屯門巴士總站？

楊晉瑋先生：如果成個屯門、元朗、天水圍呢，就總共有三十一個，咁可能頭先我聽到阿黃小姐，可能佢三十個，因為有一個新嘅巴士站，係喺 6 月尾先啟用，咁所以最後就有咗一個數字嘅出入，咁我點樣去釐定呢啲巴士站呢？我哋就會用一個--如果佢有一個 full day service 嘅路線，咁我先會叫呢個做一個真正嘅巴士總站。

主席：（經傳譯員）楊先生，個問題好簡單，你管理幾多個巴士站呀？即係你唔需要同我哋講話即係你中間個過程，點樣諗。

楊晉瑋先生：但係我需要話畀你知三十一個總站，我哋點樣去 consider 31，如果你講所有譬如淨係朝早淨係開一班...

主席：（經傳譯員）係唔需要嘅楊先生。

楊晉緯先生：Okay.

主席：（經傳譯員）你回答個問題就可以㗎嘞，你直接回答問題就可以。

楊晉瑋先生：三十一個 full day service 嘅總站。

黃女士：（經傳譯員）即係你管理三十一個？

楊晉瑋先生：係，我喺 7 月嘅時候，屯門、元朗、天水圍我都有負責。

主席：（經傳譯員）問題係你管理幾多個車站？

楊晉瑋先生：三十一個 full-day service 嘅總站。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）你係咪同黃綺玲女士一齊管理天水圍嘅車站，係唔係？

楊晉瑋先生：（經傳譯員）冇錯，同埋元朗嘅車站嘅仲有。

黃女士：（經傳譯員）你同黃綺玲女士嘅職級係一樣，係咪？定係你係高級啲？

楊晉瑋先生：我主要係屯門，但係公司想我睇埋元朗同埋天水圍，所以三區我都會睇晒，但係個主力係 Debby 同埋 Amanda 就係元朗同天水圍。

黃女士：（經傳譯員）你喺開場發言嘅時候，你講到你係負責啲巴士嘅路線同埋車長，你知唔知道有幾多個巴士站係有特別更？

楊晉瑋先生：喺三十一個裏面，介唔介意我數一數呀？

黃女士： Please do.

楊晉緯先生：以我嘅印象，exactly 我個 number 應該係全部都會有一啲特別更嘅車長。

黃女士：（經傳譯員）係咪全部嘅三十一個巴士站都有休息設施？

楊晉瑋先生：係會有休息設施。

黃女士：（經傳譯員）係咪全部三十一個站都有呀？

楊晉瑋先生：如果需要，我可以再解釋多少，咁三十一個總站可能有一啲佢係有特別更喺嗰個站度，但係佢未必係喺嗰度收工，可能佢會去第二度收工。咁我哋三十一個站裏面都會有，即係無論佢喺唔喺嗰度收工，都會有車長嘅休息設施喺嗰度。

黃女士：（經傳譯員）楊先生，你提到係兩種嘅休息，即係有 A 類同埋 B 類，咁你表

示A類休息室就大概係17平方呎，咁而B類就係50平方呎，咁我哋聽到黃綺玲女士就話有一種大啲嘅休息室嘅，咁究竟呢啲即係大啲嘅休息室，同A類同B類比係大幾多呢？

楊晉瑋先生：係，type A大概可以坐最多坐到兩個同事，同一時間，咁type B其實佢個size係大概兩倍of呢個type A嘅，即係如果你將兩個type A放埋一齊呢，你喺出面個外觀望落去呢就大概等於一個type B，咁但係當然佢因為中間有埲牆如果你擺兩個type A，咁佢會冇咁實用，咁呢個一個最大嘅分別。

主席：（經傳譯員）咁呢個A同B類嘅呢個分類係咪由九巴去分類？

楊晉瑋先生：係，呢個我哋本身係有兩隻standard嘅size，type A或者type B。

黃女士：（經傳譯員）運輸署呢係冇制定任何嘅指引，即係就住呢一個休息嘅設施，係咪呀？

楊晉瑋先生：係，以我所知係冇guideline嘅，係KMB自己決定擺邊隻size。

黃女士：（經傳譯員）你提到呢有另外一種度身定做嘅休息室，係去符合某啲嘅巴士站嘅特別需要嘅，你可唔可以同我哋講，喺你管理嘅巴士站底下，有幾多個呢一啲特別製造嘅休息室呀？

楊晉瑋先生：應該大概有兩至三個，個exact number我要返去verify，究竟嗰個係咪tailor made。

黃女士：（經傳譯員）度身定做係咩嘢意思呢？

楊晉瑋先生：可能我哋同運輸署或者其他譬如房署申請嘅一啲kiosks佢哋唔批准，可能佢哋個feedback返番嚟係個size唔啱，或者會阻住其他行人，行人路或者其他嗰啲盲人設施，咁我哋就要將個size稍為改一改嚟到fulfil番有關部門嘅request嘅。

黃女士：（經傳譯員）呢種即係度身定做嘅休息室，大概係幾大呢？

楊晉瑋先生：應該唔會同一個type B睇得太遠，即係如果可能係太闊嘅，即係有關部門覺得太闊，可能我哋將佢窄少少，但係我哋就會喺個長度嗰度加番啲，咁呢個係我認知嘅tailor made嘅動作。

黃女士：（經傳譯員）喺全部或者某啲嘅休息室入面，會唔會提供一啲可以瞓覺嘅長凳或者係梳發？

楊晉瑋先生：有三笪地方係會有一啲我哋所謂嘅叫做瞓覺嘅凳，一個sleeping area畀車長去休息用嘅。

黃女士：（經傳譯員）你提到有三個位置係有一個瞓覺嘅區，你可唔可同我哋講下喺

邊度呀？

楊晉瑋先生：屯門車廠，屯門市中心，同埋屯門南車廠，咁屯門南車廠就嗰啲凳就相對冇另外嗰兩筲咁--即係咁瞓覺凳，但係一個大啲嘅 area 都係喺個車廠度。

黃女士：（經傳譯員）每個位置有幾多張可以瞓覺嘅凳？

楊晉瑋先生：Exact number 我呢一刻畀唔到，大概有五張咁上下。

黃女士：（經傳譯員）係咪每個位置都有。

楊晉瑋先生：每一個 location，係。

黃女士：（經傳譯員）咁每個位置大概有幾多位車長使用呀？

楊晉瑋先生：其實所有車長，無論佢係特別更或者唔係特別更，佢都可以使用，咁實際嘅數字我而家冇掌握到。

黃女士：（經傳譯員）你可唔可以即係同我哋講，大概即係喺每個位置有幾多位車長使用呀？

主席：（經傳譯員）你係咪講緊同時間呀？

黃女士：（經傳譯員）冇錯，喺同一時間。

楊晉瑋先生：喺我落去呢啲站嘅時候，見到大部分時間佢哋係呢--即係頭先我講大概五張呢，都會有空位喺度，車長冇咁多個車長用，即係應該係少過五個車長 at any one time 喺我落去嘅時候見到。

黃女士：（經傳譯員）你幾時係去呢啲嘅位置？

楊晉瑋先生：最主要係一啲中段嘅時間先會有車長用，即係 around 朝早 11 點至到下晝 3 點、4 點，咁如果我呢啲時候落去，就會見到有車長用。

黃女士：（經傳譯員）你落得去有幾密呀，即係呢三個地點你落得去有幾密呢？

楊晉瑋先生：我哋嘅職責係每個禮拜都要去唔同嘅總站，咁如果三筲地方呢，我哋 at least 每個月我都會去 1 至 2 次。如果屯門車廠就會更加多，因為我個 office 就係喺屯門車廠，係。

黃女士：（經傳譯員）係，我而家係想講及一啲例子，你喺你嗰陳述書嗰度有提過。你有講過就係話喺取得批准嗰方面呢，就係有困難 181-1 同埋 181-2 嗰度。

主席：（經傳譯員）邊度呀？

黃女士：（經傳譯員）對唔住，係 FE 嗰個文件夾嘅 181-1，181-2。喺你嘅陳述書，你睇番嗰版嘅下面嗰度，你提及三個地點就話需要就係改善。第一個地方就係掃管笏。你就話係喺 2018 年 6 月 25 號新生係加入，你提到就係話係需要

就係提供一個A型嘅休息設施，同埋一個係化學廁所，咁你就話自從2018年6月13號就已經申請，咁但係仲未批。首先想問你，掃管笏嘅巴士總站係有咗幾耐呢？

楊晉瑋先生：如果有全日嘅巴士服務就係6月25號開始正式投入服務。

黃女士：（經傳譯員）換句話講，呢個係新建議嘅巴士站，就唔係話已經存在咗多年呀？

楊晉瑋先生：冇錯，正確。

黃女士：（經傳譯員）你引入呢個新嘅巴士總站，我想問運輸署任何時候有冇要求過你公司係要提供一啲休息嘅設施畀車長用呢？

楊晉瑋先生：運輸署冇要求我哋要擺呢個facilities畀車長。

黃女士：（經傳譯員）運輸署佢哋批准一個巴士總站嘅時候，會唔會書面係列出一啲要求？

楊晉瑋先生：你嘅意思係呢條線開辦嘅時候，有冇一啲書面嘅來往？有，我哋要正式入文件向運輸署申請呢條線，咁運輸署亦都會正式覆番畀我哋，confirm佢哋approve我哋呢條線。

黃女士：（經傳譯員）當運輸署係批准某一條路線嘅時候，根據你嘅經驗，佢哋會唔會一般都係列出一啲要求？

楊晉瑋先生：你嘅意思係乜嘢conditions？

黃女士：（經傳譯員）譬如話你要提供某一條路線嘅時候。

楊晉瑋先生：有，佢會定我哋嘅路線嘅走線，即係沿途嘅車站，同埋譬如journey time，journey distance，個frequency都會列明喺佢個approval letter度。

黃女士：（經傳譯員）關乎呢個掃管笏嘅巴士總站，會唔會喺呢一度呢係有啲特別更嘅呢？

楊晉瑋先生：有。

黃女士：（經傳譯員）因為你有講過，嗰個申請就只係18年6月13號係遞入去，所以目前係咪冇休息設施喺嗰度，咁講啱唔啱呀？即係以掃管笏嘅巴士站嗰度就冇？

楊晉瑋先生：係for呢個掃管笏，我哋係有擺咗一個type A嘅kiosk，同埋一個chemical toilet，咁但係喺呢個moment我哋未收到運輸署嘅approval，係嘞。

黃女士：（經傳譯員）喺掃管笏總站嗰度係有幾多車長喺嗰度工作？

楊晉瑋先生：如果用每一日嘅車長嘅人次，如果我冇記錯大概係三至四位車長。

黃女士：（經傳譯員）有幾多就係做特別更嘅呢？

楊晉瑋先生：一位。

黃女士：（經傳譯員）我咁講啱唔啱呢？呢個A型嘅係休息設施，係已經躉咗喺嗰度嘞，縱使你哋未攞到批准？

楊晉瑋先生：呢個係事實，我哋係未收到approval，就放咗落去，因為我哋即係條線就開咗，我哋如果唔放落去，車長就冇得休息。

黃女士：（經傳譯員）你畀咗第二個例子，就係寶田邨，嗰度你就話為咗係讓更多車長可以喺嗰度休息，係有需要就係將嗰個休息設施由A型轉做B型，咁你哋就係向房屋委員會就係申請，咁就2014年11月24號就申請，咁可唔可以話畀我哋聽，就呢一個設施嚟講，而家嗰個情況係點樣樣呀？因為你14年11月24號就已經申請，我想問而家係咪仲係一個A型嘅設施，定抑或係你好似喺掃管笏嗰度係躉咗嗰個B型嘅設施喺嗰度，縱使係未有批准？

楊晉瑋先生：寶田總站，咁佢原本就係有三個type A kiosks喺度，咁正如我剛才講過，有其中兩個type A佢係黐埋一齊，咁即係佢個間格係唔夠實用，咁我哋都review過覺得佢唔足夠嘅，咁所以我哋就同房署去申請，將兩個黐埋嘅type A將佢變做一個type B，另外將第三個嘅type A亦都將佢變做type B嘅，咁係喺呢一刻都未收到房署嘅approval，咁但係我哋都將兩個type A replace with一個type B，係已經replace咗，即係而家outstanding係賸一個type A我哋未convert去做type B。

黃女士：（經傳譯員）點解你認為係有需要將A型係轉做B型嘅休息設施呢？即係以寶田邨呢個例子嚟講？

楊晉瑋先生：因為無論係我哋落去見到啲車長，佢哋係揸住個飯盒要喺出面嗰個kiosk出面食飯，因為入面唔夠坐，又或者其實車長本身都會同我哋去反映番佢哋唔夠坐，咁所以我哋都覺得兩個type A係唔足夠。

黃女士：（經傳譯員）寶田邨呢度又有冇人做特別更？

楊晉瑋先生：有。

黃女士：（經傳譯員）有幾多位車長係用呢兩個係A型嘅休息設施呢？

楊晉瑋先生：我冇詳細數字喺手係幾多個特別更嘅車長會用，因為以我所知佢哋好多都會返屋企去休息嘅。

黃女士：（經傳譯員）寶田邨有幾多條巴士線呀？

楊晉瑋先生：如果全日線呢，就有兩條。

黃女士：（經傳譯員）非全日線呢？

楊晉瑋先生：Not full day就有另外兩條，係淨係朝早有特別班次。

黃女士：（經傳譯員）主席先生，我睇到個時間，你會唔會想而家係有一個小休呢？

主席：（經傳譯員）當然。楊先生，我哋小休至到12點鐘，即係話背後嗰個鐘到12點鐘再恢復。

楊晉瑋先生：Thank you.

主席：（經傳譯員）唔該。

下午11時41分聆訊押後

上午11時59分恢復聆訊

出席人士如前。

主席：（經傳譯員）黃律師。

黃女士：（經傳譯員）係，主席，或者係講埋呢一個課題，想問下，你可唔可以係畀啲數字我哋，關乎呢個寶田邨呢個站嘅，有幾多巴士車長就係用寶田邨呢個車站嘅設施？即係我專注就係呢個做特別更嗰啲嘅。

另外你喺陳述書亦都有提過，就話一般嚟講都需要一個好長嘅籌備時間，即係差唔多五年嘅時間，你嗰個係關於呢個休息設施嘅申請先至係批到，亦都係提過一啲例子嘅，就181-2嗰度嘅，有啲例子嘅，係咪呀？

楊晉瑋先生：正確。

黃女士：（經傳譯員）我而家轉去另一個課題，楊先生。你喺開場白嗰度就講過，你對於呢個實時嘅監察係非常之有經驗，即係呢個係ROM好有經驗嘅，另外呢個SSQ都係即係話安全及服務質量部，你都係好有經驗，係咪呀？啱唔啱？

楊晉瑋先生：正確。

黃女士：（經傳譯員）你都有講過，兩年之後，即係話你係兩年之後，就係去--即係做咗屯門車廠之後兩年，你就係做一個特別嘅項目嘅，可唔可以講係幾時？

楊晉瑋先生：ROM呢個project，應該大概喺2013年左右開始，我有份參與嘅。

黃女士：（經傳譯員）2013年開始，係咪呀？

楊晉瑋先生：（經傳譯員）係。

主席：（經傳譯員）你剛才嘅問題係問咩嘢？

黃女士：（經傳譯員）自從2013年開始，楊先生...

主席：（經傳譯員）係，我嗰個聽到，因為你問佢嘅時候，咁佢就話係，但係就聽唔到個問題。唔緊要，繼續。

黃女士：（經傳譯員）我諗我問題就係話，係咪自 2013 年開始，然後楊先生就話係。你認識一位人士，佢個名叫做係鄭桂興先生？

楊晉瑋先生：認識。

黃女士：（經傳譯員）我想請你睇番佢嗰份嘅陳述書，佢就係有提過，就係話佢進行過一個研究，呢個研究就係講及喺急彎嗰度係安全駕駛，2013 年，咁就係想請你睇番呢個 FE 文件夾嘅 96-4，嗰度有三頁紙，96-4 一路去到 96-6，有三頁㗎，請你睇睇。

主席：（經傳譯員）係。

黃女士：（經傳譯員）係，我諗你睇完嘞，係咪呀？呢度有幾條問題想問下你，首先就係 96-4，嗰度鄭先生有提過，呢個安全及服務質量部，呢個部門就係邀請係工廠--車廠嘅經理，以及就係巴士訓練學校嘅代表，以及係服務部嘅係巴士維修部門嘅代表就係成立呢一個研究小組，咁仔細去睇嗰啲巴士網絡裏面嘅急彎嘅位置。你有冇加入呢個小組？

楊晉瑋先生：當時我未係 Manager，所以我唔喺呢個 study group 入面，但係我當年嘅 Manager 有問我嘅意見。

主席：（經傳譯員）嗰位係邊位？

楊晉瑋先生：如果佢 refer Depot Manager 嘅，就應該當年我屯門廠嘅總經理，胡堅強先生，而家已經退咗休。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）根據呢度嘅研究，佢哋就係將佢收窄做係廿九個彎位，就話嗰啲地點可能引致嚴重嘅車輛翻側嘅意外，你知唔知道有呢廿九個彎位？

楊晉瑋先生：知道。

黃女士：（經傳譯員）你有冇份係幫手係將嗰個彎位嘅數目，將佢收窄到係廿九個？有冇？

楊晉瑋先生：以我嘅記憶，當時應該係唔止呢啲數目嘅，可能佢係 identify 咗有

一啲 Raymond Cheng 先生覺得係一啲 sharp bends 嘅 location，都有 identify 到嘅，以我嘅印象，應該唔止呢二十幾個。

黃女士：（經傳譯員）你係咪話根據鄭先生，佢就係搵出係多過廿幾個嘅彎位，你點知？

楊晉瑋先生：呢個係我哋一啲 internal 嘅 communication，可能，因為我都有同當其時嘅訓練導師，即係我哋嘅教車嘅導師去討論過呢啲問題，咁當時，我--以我所知，個導師就話，其實 sharp bends 就--即係其實你逢嚟 90 度角，或者將近 90 度角，都可以 sharp bends 嘅，所以我就知道應該唔只呢啲 location 嘅。

黃女士：（經傳譯員）請你揭去後面嗰版，96-6，頭頂嗰度，嗰度就話：

「安全及服務質量部嘅同事就係陪同係研究小組嘅同事就去測試嗰廿九個彎位，就係以不同嘅道路情況，不同嘅車速，不同嘅載客量嘅情況去測試，咁亦都係將佢拍咗錄影帶，列做作日後參考之用。」

你當時知唔知道係有咁樣樣係拍做錄影帶，去進行研究？

楊晉瑋先生：我當年係有聽過佢哋會邀請訓練導師去做一啲 test run，去試呢啲 location，但係最後有冇做到，或者佢做咗幾多個，我唔清楚，但係我都有聽佢哋講過有呢回事，同埋會有拍片嘅呢個想法嘅，當年。

黃女士：（經傳譯員）你提過話你聽聞，喺訓練導師嗰度係聽聞呢啲事，我想問，有關嘅導師而家係咪仲受聘於九巴？

楊晉瑋先生：以我所知，仲有喺公司做嘅，嗰啲 driving instructor 係。

黃女士：（經傳譯員）可唔可以講係邊一位？

楊晉瑋先生：我唔清楚當日如果話同佢哋開會係邊一個，因為佢 driving instructor 都有好幾十個，我唔--exactly 邊個，或者個名，我呢一刻畀唔到你。

黃女士：（經傳譯員）如果喺呢段跟住睇落去，睇嚟就係呢一個錄影嘅研究係的而且確有做㗎，因為跟住嗰度就講咗，係收集咗一啲好重要嘅數據，而佢哋亦都因而制訂咗一啲安全嘅指引。或者大家係--你繼續睇埋呢一段文字，嗰度繼續講就係話，從呢個研究嗰度，我哋就係得以編制咗一部係安全小冊子，後嚟佢就澄清，就話呢啲係卡仔，咁呢啲小冊子就係讓車長係知道--詳細咁知道邊度嘅彎位係會有--係存在風險，佢嘅具體嘅位置、方向、路嘅情況、性質等等。咁佢話做咗一千五百個嘅研究，咁就有三十一個就係安全駕駛嘅建議嘅，你知唔知悉係為車長係製備咗呢啲小卡？

楊晉瑋先生：知道。

黃女士：（經傳譯員）有冇係見過？

楊晉瑋先生：有。

黃女士：（經傳譯員）而家係咪仲有？

楊晉瑋先生：已經冇用嘞。

黃女士：（經傳譯員）可唔可以搵番一份畀我哋睇？

楊晉瑋先生：我唔肯定 office 仲會唔會有，因為即係無論駕駛導師或者前線嘅車長都有啲意見，對於呢張卡，咁所以我哋都冇再成為我哋 training 嘅其中一 part 嚟嘅，呢個。

黃女士：（經傳譯員）點解呢啲卡仔唔再用？

楊晉瑋先生：因為頭先我講過，有導師或者有一啲前線嘅車長，佢哋覺得即係 sharp bends 呢個定義係好廣泛，如果每一笪地方，即係每一個 sharp bends，你要定一個車速畀佢，咁其實未必係九巴我哋可以自己做到。咁我明白可能佢背後嘅 study 可能係想畀一個 reference 畀車長們，佢哋知道每一個 sharp bends，佢哋最高速係行幾多，但係你好難叫佢哋記住每一--即係佢揸，譬如每一次巴士行過咁多 sharp bends，每一個位都唔同，而運輸署個 speed limit 係 50，所以大家都覺得應該係按番個實際情況去評估番嗰個彎佢個速度係要幾多，rather than 你叫個車長記住每個彎背後應該 maximum 係幾多。

主席：（經傳譯員）你點知佢哋有唔同嘅意見？

楊晉瑋先生：當時，因為呢張卡都有曾經出過畀啲車長嘅，咁啲車長都有同我反映過，話即係如果佢真係唔跟足呢一個 suggested 個 speed 去做，咁喺香港法例係冇超速嘅，但係佢--可能公司覺得佢唔應該揸咁快，咁係咪一個危險嘅情況呢，如果佢冇任何意外發生？咁呢個係我哋冇一個 conclusion 嘅，即係反而我哋嗰陣時都有 raise 番，會唔會係同運輸署講番即係喺一啲路譬如設立番一啲急彎嗰啲黑白嗰啲箭咀，或者其他嘅警告字眼。

黃女士：（經傳譯員）當時你向運輸署表示係想即係喺呢一啲嘅急彎入面就加呢啲箭咀嘅標誌嘅？

楊晉瑋先生：應該呢個係我哋提議番畀 SSQ，咁最後 SSQ 有冇去同運輸署申請，我就唔清楚嘞。

黃女士：（經傳譯員）係幾時？

楊晉瑋先生：應該都係 2013 嘅時候，我係唔清楚有冇--最後有冇向運輸署申請嘅。

主席：（經傳譯員）呢啲卡係幾時係發畀啲車長？

楊晉瑋先生：個 exact 日期我已經冇乜印象，應該 around 13、14 咁上下。

主席：（經傳譯員）係咪所有嘅九巴車長都有收到呢張卡㗎？

楊晉瑋先生：係，冇錯，我哋係有嘗試將佢派，但係好快大家個 comment，所以我哋就--即係收到大家嘅意見，就冇再去派呢張卡。

黃女士：（經傳譯員）楊先生，你提到你喺呢一個實時營運管理嘅裝置都係有經驗嘅，你對黑盒嘅運作同埋功能有幾熟悉？

楊晉瑋先生：如果你嘅意思係針對 ROM 呢樣嘢定係唔關 ROM 事，淨係講黑盒？

黃女士：（經傳譯員）兩樣都係嘅。

楊晉瑋先生：如果 ROM，我當其時係其中一位代表 operation 嘅同事去畀 input，去設計呢個新系統嘅，應該由 day one 至到--去到最後期，我都有份參與 ROM 呢個研發。

至於黑盒，就你話本身個黑盒個技術，我就唔會十分清楚，但係我哋公司背後好多程式，或者好多電腦嘅 program，背後佢都會由黑盒 support 去畀呢啲 data，畀啲 data 畀嗰啲程式嘅。

黃女士：（經傳譯員）ROM 係代表實時營運管理，咁你嘅角色係咪為乘客提供一啲實時嘅資訊，令到佢哋知道巴士到站嘅時間？定係話你係負責一個比較廣闊嘅安全嘅範疇？

楊晉瑋先生：以我嘅認知，當其時 ROM 呢個設計係冇任何安全嘅因素擺咗落去嘅，咁我哋當時就係 based on 我哋嘅黑盒有嘅 data，點樣去將呢啲 data 去設計一個程式，嚟運用呢啲 data 去有效咁樣管理我哋嘅班次，同埋點樣去調配我哋呢啲巴士嘅，當年係冇任何嘅 safety 嘅因素喺我哋個會嗰度 discuss 過。

黃女士：（經傳譯員）你提到當時係冇喺任何嘅會議度提到安全呢一個議題，即係喺呢一個實時管理方面，你亦都係有會議度提及，係咪？

楊晉瑋先生：正確。

黃女士：（經傳譯員）係喺咩嘢會議？

楊晉瑋先生：我哋定期--因為其實呢個 ROM 係一個新嘅 project，係由零開始嘅，即係我哋係 based on 我哋有嘅 black box 嘅 data 去做，咁所以我哋定期會有會議去--大家去畀 input 點樣去設計呢個新系統。

黃女士：（經傳譯員）幾時開始？

楊晉瑋先生：都係應該喺 2013 年，月份我唔記得咗。

黃女士：（經傳譯員）嗰啲會議度有邊個出席？

楊晉瑋先生：有 IT，我哋電腦部嘅代表，有我哋四個唔同車廠嘅車務組嘅代表，咁亦都有當年嘅一個中央嘅部門，我哋叫做交通部，traffic department，咁佢哋會有--即係佢哋就個角色就係一個 Project Manager 去統籌呢個會嘅。

黃女士：（經傳譯員）規劃與發展署嘅同事有冇出席呢啲會議？

楊晉瑋先生：冇參與過，planning 嘅 department 嘅同事。

黃女士：（經傳譯員）你識唔識程艾樂？

楊晉瑋先生：認識。

黃女士：（經傳譯員）你喺 2013 至 15 年期間，有冇同佢合作？

楊晉瑋先生：有喺一啲我哋 planning 嘅 issue 上面同佢有開過會嘅。

黃女士：（經傳譯員）你所謂嘅某啲嘅規劃嘅議題係包括啲咩嘢？

楊晉瑋先生：譬如我哋去計劃來年嘅巴士路線計劃，要提交畀運輸署或者區議會，咁佢係同運輸署同我都開過啲會嘅，係去策劃番個巴士路線嘅改善，或者提升，或者其他改動。

黃女士：（經傳譯員）咁我哋係聽取咗程艾樂先生嘅作證，當時係有一個諗法，係想用荔枝角車廠做一個實時營運嘅管理中心嘅，或者一個所謂嘅控制中心，就會係全公司都係會分析數據，你有冇聽過？

楊晉瑋先生：有聽過。

黃女士：（經傳譯員）根據程生嘅證供，最後荔枝角嘅辦公室就冇咁樣做到，佢就冇成為一個實時營運嘅管理中心，係咪呀？

楊晉瑋先生：唔正確。

黃女士：（經傳譯員）咁到而家，佢係咪都仍然係作為一間實時營運中心？

楊晉瑋先生：我哋有一個叫做 radio control section，而家係喺當年我哋呢個位置嗰度，而家仲存在嘅。

黃女士：（經傳譯員）你可唔可以同我哋講下，呢一個電台控制中心係咩嘢？

楊晉瑋先生：我哋中文簡稱叫呢個做電台（九巴電台），咁佢係二十四小時運作，佢係無論車長或者其他同事，喺路上面遇到有啲咩嘢問題，佢都會即時打畀呢個電話，廿四小時有人接聽，咁佢哋會分析件事，再派同事去幫手嘅。咁同時間，呢個電台，佢會同運輸署或者警察有一個聯繫，佢哋有個直線電話，同番運輸署嘅 ETCC，即係緊急協調中心，就如果有啲咩嘢事，佢哋互相會交換番一啲資料。

主席：（經傳譯員）咩嘢係 ETCC？

楊晉瑋先生：英文嘅全寫，唔好意思，我冇資料喺手，應該係緊急協調中心，類似咁樣嘅。

黃女士：（經傳譯員）根據你所講，似乎呢個電台係應付一啲緊急嘅情況，而唔係一個實時管理，即係用黑盒進行實時管理，啱唔啱？

楊晉瑋先生：其實最後個 ROM 呢樣嘢，係演變咗去另外一個系統，咁佢哋而家都有用呢個系統，但係同當年嘅 ROM 呢樣嘢係有少少出入嘅。

黃女士：（經傳譯員）你話係有少少唔同，究竟有幾唔同？

楊晉瑋先生：其實 ROM 當年係想類似參考一啲譬如鐵路，咁佢會 monitor 呢啲列車，或者即係我哋 monitor 啲巴士，佢哋嘅同--譬如同前面架車，或者同後面架車，嗰個差距有幾多，咁可能佢會--個系統如果 identify 到可能某班車行得太--即係黐得太--前面嗰架車太前--太密嘞，咁佢可能會 prompt 一啲 message 去提個車長，你個--可能喺下一個站就要停一停先，唔好開住；或者調番轉，可能佢係開得太慢，咁可能會 prompt 個 message 去畀啲資訊畀個車長，「你距離前面嗰架巴士幾遠」，咁希望喺巴士站等車嘅乘客，佢哋嗰個 waiting time 係會平均啲嘅，咁呢個係當初成個 ROM 背後嗰個原意。

其中一個範疇就係話，佢哋可以代替咗站長呢個角色，即係如果成立咗 ROM 呢個 program 之後，咁喺荔枝角車廠就做咗呢個中央控制中心，咁其實大部分站長個角色都可以唔需要嘞，因為中央處理。去到現在，我哋係冇--我哋係會 keep 番所有站長，但係只係用呢個 ROM 呢個系統，而家我哋將佢演變咗係淨係監察架車嘅 GPS 嘅 location，監察佢嘅 speed，或者如果有需要嘅話，我哋可以用呢個 data base 去 retrieve 番佢個 past record 嘅。

黃女士：（經傳譯員）你提到呢個系統係同原有嘅設計係有啲唔同嘅，點解係即係呢個系統嘅功能係有呢個演變？

楊晉瑋先生：最後個原因我唔肯定 management 個決定係點解，但係我自己同埋好幾位嘅當時嘅 project team，我哋都覺得，即係如果你要用呢樣嘢嚟取締晒個巴士總站嘅站長，其實係有啲--我哋覺得有啲唔 realistic 嘅，所以我哋都曾經畀過 comment 畀 management，話畀佢聽「可能會有啲風險，如果你唔用站長。」但係最後係咪因為呢個原因，有一啲改變，咁我就唔肯定。

黃女士：（經傳譯員）你可唔可以同我哋講講，呢個系統幾時出現呢個演變？

楊晉瑋先生：大概 2014 或者 15 年初咁樣囉。

黃女士：（經傳譯員）即係話喺 2015 年打後，係咪？

楊晉瑋先生：係嘞，around 嗰啲月份。

黃女士：（經傳譯員）程艾樂先生表示，當考慮使用呢個實時管理系統嘅時候，其中一個目標係令到司機係駕駛得好啲，因為呢一個系統係可以畀車長--即係就可

以反映下車長係點樣去駕駛，究竟即係佢地嘅駕駛行為好唔好，係咪符合標準等等，你有冇聽過呢個講法？

楊晉瑋先生：有。

黃女士：（經傳譯員）呢個諗法最後係發生咩嘢事？

楊晉瑋先生：其實係有做到呢樣嘢嘅，應該我哋而家每一架巴士上面，都會有個device，好細個，咁佢係有四盞燈，同埋會發出好細聲嘅一個「吆」一聲，去提示番個車長，如果佢有一啲唔好嘅駕駛行為。

主席：（經傳譯員）不當嘅駕駛行為？

楊晉瑋先生：冇錯，係譬如超速，或者佢突然間急速剎車，或者突然間acceleration，突然間加速，同埋如果佢個引擎開咗架車，個空轉，即係我哋唔想佢開咗架車，但係架車又唔郁，擺咗喺個站度，咁都會發出「吆」一聲，同埋有燈去顯示嘅。

主席：（經傳譯員）有四方面，係咪呀？

楊晉瑋先生：係，正確。

黃女士：（經傳譯員）由幾時開始，你哋有呢一個咁嘅係系統，就係用呢啲方法去警示嗰啲車長，即係提醒佢哋，你話呢個細嘅裝置？

楊晉瑋先生：唔好意思，如果 exact 嘅日期我已經唔記得咗嘞，但係應該都有好幾年嘅時間，呢個如果需要，可以之後我去搵番資料。

黃女士：（經傳譯員）關於呢個黑盒，你可唔可以講多啲畀我哋聽？點樣用佢嚟到去監察車長嘅表現？

主席：（經傳譯員）你未落去之前，我想問，你哋嗰個係限值係定喺邊度，係定個限值喺邊度，然後嗰啲燈先會係發光，同埋幾時先會作一個細聲嘅「吆吆」響？譬如話超速，咁個限值喺邊度？

楊晉瑋先生：詳細嘅數據我冇喺手，咁佢係會有個速度，同埋佢喺幾多秒鐘剎車或者加速，都會有呢樣嘢，有嗰啲 standard 喺度，但係我哋--我呢一刻冇嗰個數據掌握。

主席：（經傳譯員）一啲都冇？任何一項都冇？

楊晉瑋先生：冇。

主席：（經傳譯員）而家呢度打出嚟嗰個資料會唔會幫到你手？呢個就係黑盒，就係大埔巴士，即係話今年2月10號嗰部巴士嘅資料嚟嘅。

黃女士：（經傳譯員）係喺BM-66嗰頁。

楊晉瑋先生：我有見過呢啲數字，但係最後係--因為我知道，我哋 management 佢會 tune 呢啲數字，去睇下會唔會需要加強嗰個 warning 嘅，咁喺呢一刻，係咪用緊呢一 set 嘅數字，我唔肯定。

黃女士：（經傳譯員）你又提過係管理階層就係會調整嗰啲數字嘅，咁意思係指管理階層嘅邊一啲人士係會去作出呢個調整？

楊晉瑋先生：應該我哋工程部嘅 management，佢哋要去呢個系統，如果要 modify 呢個系統，一定要係佢哋去做呢樣嘢，所以喺我嘅日常工作，就冇接觸到呢啲數字嘅。

黃女士：（經傳譯員）或者我哋可以落去第 67 頁，喺 BM-67。或者係落去下面嗰度，喺藍色嗰個部分，藍色嘅第三段，呢一個就係 Openmatics 呢間公司，而你哋公司就係同呢個 Openmatics 就係有合約，就由佢哋提供呢個遠程測量，咁呢度就講到話，關乎呢個實時營運管理系統，我哋係唔知道九巴係有計劃係引入一個咁嘅系統，所以我哋係唔知道九巴有任何嘅計劃，去同嗰個係黑盒，或者係遠距離嘅系統就係將佢係有一個連繫嘅。

主席：（經傳譯員）或者你讓楊生一個機會去睇一睇先，呢個係 Openmatics ZF 就提供畀我哋嘅。

黃女士：（經傳譯員）鄭生，睇咗未？

楊晉瑋先生：（經傳譯員）睇咗嘞。

黃女士：（經傳譯員）你可唔可以就確認一下個情況係咁，九巴係？呢度所講嘅係咪屬實？

楊晉瑋先生：以我所知，應該正確。

黃女士：（經傳譯員）九巴有冇諗過係將呢一個遠距離通訊嘅系統，係同呢個實時營運管理系統，喺日後將兩者係連接起嚟？

楊晉瑋先生：呢個我唔清楚。

黃女士：（經傳譯員）你會唔會知邊個人會知道呢件事？

楊晉瑋先生：應該都係 engineer 嗰面嘅同事。

黃女士：（經傳譯員）而家我哋又想講番黑盒，可唔可以簡單咁同我哋講一講，九巴係點樣樣去監察車長嘅駕駛行為，點樣用黑盒去監察車長嘅駕駛行為？

楊晉瑋先生：其實有兩個範疇，第一個就係最 straightforward 嘅 speeding，無論我哋車務組，即係我哋而家 depot，或者係我哋嘅 TQD 嗰個 department，佢哋都會去 monitor，用我哋個 program，咁嗰個 program 背後就係喺個 black box 嗰度畀 data 佢嘅，呢個係 speeding。

另外就係頭先我講嘅嗰個駕駛提示器嗰個盒仔，咁其實背後都會 record 咗嗰個佢著燈響嗰個次數，呢個範疇就會由 TQD 去負責。

主席：（經傳譯員）你話嗰啲燈著燈嘅次數，係你邊度得到嗰啲資料？有響聲又點呢？

楊晉瑋先生：我哋嘅 IT 嘅部門，佢會 send 一個 report 出嚟，就去話番畀我哋聽，個車長嗰盞燈佢著過幾多次。咁當然譬如你話 harsh braking 咁計就，佢著燈又唔一定代表係佢唔啱，即係譬如如果前面有架車突然間停車，咁佢一定要剎車㗎喇，咁呢盞燈著咗，亦都未必代表個車長唔啱，所以 TQD 個部門可能佢會 review 番，會唔會係某一個車長特別多燈著，咁樣佢--或者佢會搵一啲便裝嘅一啲 assessor，去跟個車長，睇下佢個 driving behavior 有冇問題嘅。

黃女士：（經傳譯員）你提及你哋嘅資訊科技部門就會出一個報告，話畀你哋聽就係盞燈著過幾多次，即係會以某一個車長嚟計。咁我想問，會幾頻密一次？

楊晉瑋先生：大概一星期會有一個 report 出嚟，一至兩星期會有個 report 出嚟。

黃女士：（經傳譯員）不如舉個例子，如果個車長佢有咁嘅係習慣，就成日係大力剎車，咁亦都係喺呢個數據嗰度記錄低，咁呢個報告就只會係一個星期之後先畀到你嘅，係咪咁？

楊晉瑋先生：應該正確，冇錯。佢 past 幾多日我冇印象，即係佢個 report 出嚟係幾多日之前，我冇印象。

黃女士：（經傳譯員）車長會唔會知道佢自己有咁樣樣嘅係話急劇剎車嘅習慣，會唔會即時知？

楊晉瑋先生：佢個--佢如果揸車嘅時候，佢 harsh brake 嘅話，嗰盞燈係會著同埋會響嘅。

黃女士：（經傳譯員）咁個後果係點，如果個車長佢有咁嘅習慣，就係時常都會急劇剎車，即係一個禮拜之內成日咁做，有咩嘢後果？

楊晉瑋先生：所以我頭先 mention 過，我哋兩個部門都會一齊做，咁我講番我自己個部門先喇，咁我哋見到，因為你好難就住話佢響咗一次燈，就代表佢有問題嘅。咁我哋會搵一啲 repeater，即係經常會有燈著嗰啲，我哋會去--打電話去同佢做個溫馨提示，或者我哋會搵番我哋嘅一啲外勤，即係頭先我講嘅車務督察，會睇下--跟下佢車，睇下呢個車長有冇問題。咁同另一邊箱，TQD 嗰面，佢哋亦都--頭先我 mention 過，佢哋會搵一啲可能便裝嘅 assessor 去跟佢，睇下佢，去評估番佢個駕駛係咪經常好剖，成日急剎，跟車太貼之類呢啲咁嘅唔好嘅 behavior。

黃女士：（經傳譯員）你所講嘅 TQD 係咩嘢？

楊晉瑋先生：TQD 其實係我哋一個 training 同埋--training and quality assurance department，咁佢個職責係去培訓我哋車長，同埋去評估佢哋嘅駕駛技巧，或者如果需要嘅話，進一步行動，譬如去有啲紀律行動，或者一啲 warning，都會由呢個 department 去負責嘅。

黃女士：（經傳譯員）你講過，你就同呢個部門 TQD 係一齊睇下有邊啲人就係經常咁做，咁就首先會打電話，就畀個溫馨提示。我想問，就有幾多人係咁樣樣經常咁做？或者你畀個例子，譬如今年嚟計，有幾多人係咁樣重複咁去做？

楊晉瑋先生：大概可能每一次係會有一個、兩個，其實我未必係 repeater 嘅，可能係我見佢嗰個 report，佢個次數係高於其他嘅車長，咁我就會搵一啲比較喺個 list 裏面好高嗰啲車長，就會去 remind 佢。咁其他可能一啲可能係一次、兩次嗰啲，可能我哋就會再睇下佢下一次會唔會再出現咁樣。咁你話個數目，以我屯門嚟計，其實就幾個咁樣，係 less than ten 咁樣。

主席：（經傳譯員）「少過十個」係咩嘢意思？

楊晉瑋先生：成間屯門廠大概九百幾個車長。

主席：（經傳譯員）有九百個車長，但係少於十個就屬於呢個類別，係咪咁嘅意思？

楊晉瑋先生：係，冇錯。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）呢十個，佢哋係急劇剎車係有幾多次？佢哋係會急劇剎車幾多次，然之後先至係引發你係關注？

楊晉瑋先生：通常嗰個數字都係個位數嘅，即係可能係五次、六次咁樣，咁我哋就會覺得佢係比較多，我哋就會去做我哋頭先個行動。

黃女士：（經傳譯員）你講「五、六次」，係一日五、六次定抑或一個星期五、六次？

楊晉瑋先生：應該一個禮拜嘅，但係個 exact 數字我要 verify，我唔可以 sure，呢度。

黃女士：（經傳譯員）可唔可以提供嗰啲資料畀我哋，日後？

楊晉瑋先生：可以。

黃女士：（經傳譯員）如果有個人有咁嘅習慣，即係講番嗰十個，你又會採取咩嘢行動，如果你留意到有個人成日都有呢個急劇剎車嘅習慣？除咗係打個電話畀佢，你仲會做啲咩嘢？會唔會同佢傾下，就問下佢咩嘢原因？

楊晉瑋先生：會打電話，或者面對面嘅 interview 都會有機會做嘅。

黃女士：（經傳譯員）你有冇對呢十個人咁樣做？

楊晉瑋先生：有，一係我或者我其他嘅同事都會去做呢個動作。

黃女士：（經傳譯員）佢哋有冇改善？

楊晉瑋先生：有一啲會嘅，你下一次會見唔到佢出現，咁可能個別嗰啲，佢哋--我印象唔多會--下一次會見到佢，大部分都會有改善嘅，以我印象裏面。

黃女士：（經傳譯員）程艾樂先生嘅作供嘅時候亦都表示，喺其中一次會議之中，佢哋傾到用一個評分卡嘅制度，即係針對車長嘅，咁考慮其中一個系統，就係一個GreenRoad.com 嘅制度，就係針對駕駛嘅行為嘅。咁有三大類，包括係紅、黃同綠嘅。

主席：（經傳譯員）你有冇聽過呢套系統？

楊晉瑋先生：有。

黃女士：（經傳譯員）你幾時開始聽過呢一套系統？

楊晉瑋先生：年份大概應該都係 13 或者 14 咁上下，exact 我都係唔記得嘞，都好幾年前。

黃女士：（經傳譯員）喺你哋其中一個會議上面，有冇探究或者討論過呢個系統，即係同其他嘅車廠嘅代表或者管理層？

楊晉瑋先生：你嘅意思係，ROM 嗰啲 meeting 就冇 cover 呢樣嘢嘅。

黃女士： What about meetings other than ROM?

楊晉瑋先生：有，如果專係針對呢樣嘢，有曾經有個 meeting 開過。

黃女士：（經傳譯員）係咪喺 2013 至 14 年？

楊晉瑋先生：係嘞，應該 around 嗰啲時間，真係幾年前嘅時間。

黃女士：（經傳譯員）有邊個出席，即係喺管理層方面？

楊晉瑋先生：如果你話當時嘅 member，我真係要 check 番有邊個喺度，因為我哋有好多唔同嘅會，有唔同人參與。咁我當時我有份嘅，我有份開嘅，呢個會。咁其他人我--應該有好幾位都已經離開咗九巴，或者退咗休。

主席：（經傳譯員）呢個會議有冇紀錄㗎？

楊晉瑋先生：應該有 record，但係 e-mail 可能會有個 brief 即係 send 番出嚟，但係我要--我唔肯定我 e-mail 仲有冇 keep 到呢啲 record。

主席：（經傳譯員）你可唔可以去檢查一下有冇呢個紀錄？

楊晉瑋先生：可以。

主席：（經傳譯員）除咗電郵之外，呢啲會議有冇會議紀錄？

楊晉瑋先生：我哋可能好多會都會用 e-mail 做一個 recap 嘅，咁嗰個已經 serve as 個 minute，我唔肯定--我唔記得嘞，呢個會有冇 minute take 過，我唔肯定。

黃女士：（經傳譯員）呢套系統係冇被採用嘅，你知唔知點解？

楊晉瑋先生：呢個 system 應該有用到喎，我唔肯定係咪 Mr Alok 講嗰個名，但係頭先你嘅 description，同我哋而家有個 system 係非常之相似。

主席：（經傳譯員）嗰個系統係咩嘢？

楊晉瑋先生：佢會 based on 個車長嗰個--其實背後都係頭先我講嗰個盒，嗰個燈，同埋個發出嘅聲，嚟 based on 佢嘅駕駛表現，嚟出三種顏色嘅燈話畀佢知嘅。呢個燈係幾時會出，就係佢喺返工嘅時候，佢要喺個總站拍佢個個人八達通，個 staff card，佢個電腦就會顯示畀佢聽，畀佢睇，下一班車佢要開幾多點。咁喺嗰個螢幕度，佢會有三種顏色出嚟，去話番畀個車長聽，佢個駕駛表現係屬於綠色最好，黃色係中間，定係紅色係需要改善嘅。咁呢個 system 到到呢一刻，我都仲見到會有用緊。

主席：（經傳譯員）當車長係落班嘅時候，佢嘟佢哋張八達通，呢個資訊會喺邊度顯示出嚟？

楊晉瑋先生：佢應該只會喺佢每日返工第一轉車，即係第一次 tap 卡嘅時候，佢會話番畀佢聽，佢個--exact 嗰個 period 我唔知，佢係話番畀佢聽，係上個禮拜定係幾日前嘅 record，我唔肯定，但係唔係同日嘅 record 嚟嘅，所以主席你問嘅，佢 sign off 嘅時候，係冇 display 到畀佢。

主席：（經傳譯員）你嘅意思係咪話，即係喺簽到嘅時候，會顯示資訊，係咪呀？

楊晉瑋先生：係，冇錯，佢 sign on 嘅時候。

主席：（經傳譯員）所顯示嘅資料係針對邊段時間？

楊晉瑋先生：呢個我要 check 番佢個 period 係 refer to 幾時，但係唔係 real time，即係唔係講緊即日話番畀佢知嘅，係對上一個 period，但係呢個 period 係幾多，就我呢一刻冇個資料喺手。

主席：（經傳譯員）資訊喺邊度顯示出嚟？即係車長會喺邊度見到呢個資訊？

楊晉瑋先生：喺每一個巴士總站都會有一部電腦，就個車長佢每一次返到個總站報到嘅時候，佢都要用自己嘅 staff card 去拍卡，去攞 information，咁嗰個電腦就會喺個巴士總站嗰個 kiosk 出面對住個車長嘅。

主席：（經傳譯員）電腦嘅螢幕係會顯示啲咩嘢？

楊晉瑋先生：佢會用三種顏色嚟話畀個車長聽，正如我剛才講嘅紅色、黃色同埋綠色。

主席：（經傳譯員）佢哋分別代表啲咩嘢？

楊晉瑋先生：詳細嘅 definition，我要 check 番背後嗰個 definition，但係綠色就係佢個表現係非常之好，係個車長做得好好，佢個 performance；黃色嘅，就應該係可能佢有一啲地方可能個 behavior，driving behavior 需要更改，其實都係 based on 頭先我講嗰個提示器，喺架巴士度；咁當然紅色嘅，就會係好差嘅，咁應該紅色嘅差，就係我哋--頭先我講 IT 會 send 畀我個 report，我 gen 到出嚟嘅人，most likely 都係應該呢啲人會收到紅色嘅。

主席：（經傳譯員）如果顯示綠色燈，係咪代表喺即係之前嗰段嘅行車期間，就冇出現一啲即係警告嘅信號，係咪？

楊晉瑋先生：以我所知，係。

主席：（經傳譯員）咩嘢情況先至出現黃色燈？

楊晉瑋先生：佢個 definition 我真係要 check 一 check，即係究竟點樣先會出到 amber 或者 red 嗰個 signal 出嚟，背後個 definition 我呢一刻冇喺手。

主席：（經傳譯員）你可唔可以提供呢個資料？

楊晉瑋先生：可以。

主席：（經傳譯員）呢個資訊係咪有一個列印嘅版本？

楊晉瑋先生：其實就係頭先主席你問我嘅，如果有 e-mail 或者 minute，就會喺嗰度 list 咗出嚟嘅，所以如果我搵得番嗰個 e-mail，我就可以 disclose 畀你。

主席：（經傳譯員）好，麻煩你。

黃女士：（經傳譯員）就住螢幕上面顯示嘅資訊，你可唔可以影一啲相，即係喺呢一個休息室外面嘅顯示屏？

楊晉瑋先生：可以。

黃女士：（經傳譯員）如果有個車長係得到紅色燈，咁會有咩嘢後果？

楊晉瑋先生：其實佢係一個提示嘅性質，如果--我哋做嘅 action 其實就係頭先我講，如果 IT department 收到嗰個 file，我見到佢哋係 repeater，或者佢係特別高過其他車長，我哋就會 take 我頭先嗰個 action，打電話畀佢，或者 TQD 個部門會搵人跟佢。但係喺最前面嗰個 screen，即係頭先主席想問我攞嗰

個螢幕，其實係做一個提示嘅動作，rather than 係有一啲 action 要去against 個車長嘅。

黃女士：（經傳譯員）你有冇探討過，係要求一啲得到紅燈嘅車長係去即係接受一啲補救性嘅培訓？

楊晉瑋先生：我印象我有試過，如果--因為我部電腦，我係唔會睇到個車長係咩嘢顏色，綠色、黃色、紅色，因為嗰個係畀車長佢自己一個 remind，reminder 畀佢，反而我係 based on 我頭先講過嗰個 IT send 嗰個 report，如果真係有一啲 repeater 係出現嘅話，而個次數係高，咁 TQD 嗰邊係要畀 training 佢嘅。

黃女士：（經傳譯員）咁得到綠色燈嘅車長，又會係點？你哋公司有冇考慮過係即係畀一啲獎勵，即係畀一啲係長期都得到綠色燈，而駕駛行為良好嘅車長？

楊晉瑋先生：我諗綠色，我哋冇刻意去做一啲動作去讚賞佢哋，因為我哋 assume 應該佢揸車好係正常嘅一個表現嚟嘅，以我所知，我公司應該冇做呢樣嘢。

黃女士：（經傳譯員）呢套系統係咪同時都適用於兼職嘅車長？

楊晉瑋先生：以我所知，有，因為佢哋喺架巴士，嗰個盒仔都會提佢哋，都會響，都會著燈。

黃女士：（經傳譯員）楊先生，我就會去講另一個議--話題，就係呢啲閉路電視嘅。我哋聽取咗一啲證供，係嚟自一啲嘅工會，佢哋講到一啲襲擊車長嘅--即係經常--即係車長經常受到襲擊嘅。

主席：（經傳譯員）我諗你係即係講一個新嘅議題，因為時間有限，我哋而家會暫停，咁個聽證會就會喺兩點半繼續嘅，唔該晒，楊先生。

楊晉瑋先生： Thank you.

下午 12 時 58 分聆訊押後

下午 2 時 30 分恢復聆訊

出席人士如前。

主席：（經傳譯員）午安。黃大律師。

黃女士：（經傳譯員）係，唔該晒。楊先生，喺午餐之前，我哋就係講緊關於黑盒嘅，我可唔可以再問一問關於黑盒嘅事呢？你話就關於就有一個警示車長嘅制

度，譬如如果佢哋係有突然之間剎車等等，幾年前其實就呢個系統已經係有安裝，但係就唔記得咗係邊一年？

楊晉瑋先生：正確。

黃女士：（經傳譯員）我哋而家睇幾份文件，就係你公司嘅陳述書嚟嘅，睇下會唔會幫到你，就 KMB 九巴第 1 號文件，第 168 頁，呢個係九巴嘅陳述書，2018 年 5 月 18 號嘅，如果我哋睇番呢一頁，呢一度就係講到就係關於黑盒，佢可以記錄啲乜嘢，關於係超速或者急劇嘅剎車或者係突然加速。

第三點，就係話一個呢個車長，我哋點樣去識辨佢，就係透過我哋個總站管理系統嘅，呢個總站管理系統，你係咪其中一位係有參與呢個系統嘅一個人呢？

楊晉瑋先生：就呢個係一個日常我哋會用--我係會用嘅一個系統嚟。

黃女士：（經傳譯員）我哋返番去第 148 頁，呢個係一個行動計劃嚟嘅，就係話點樣去落實一啲 2018 年 4 月 10 號提出嘅，就係一啲主要嘅建議，呢個就係關於係 2018 年 3 月 12 號關於呢個嘅大埔嘅意外嘅一個報告，...

主席： This is a redacted version of that report?

黃女士：（經傳譯員）...呢個就已經係刪減咗啲某部分嘅。我哋睇番第 148 頁第 10 段，右邊嗰欄，呢度就講就話--個題目就係，呢個九巴就應該係監察車長嘅表現，就特別係分析喺黑盒裏面嘅佢哋嘅紀錄，同埋就睇下如果佢哋車長有一啲不恰當嘅行為，就應該係有紀律處分嘅。

喺右面，我哋就有一個叫做“BOP 207”嘅功能就喺黑盒裏面嘅，但係呢個咁嘅，就係每一日就睇番嗰個駕駛嘅紀錄，其實係睇番之前十日嘅，如果有發現有一啲異常嘅情況，就會係由呢一個嘅培訓同埋管理質素部門就會係去處理嘅，然後佢哋就會係作出處分嘅程序，基本上係咪睇番之前十日嗰個嘅紀錄呢？

楊晉瑋先生：以我嘅認知，應該我哋 IT Department 係嘗試去將十日呢個日數係減低嘅，但係我手頭上，我唔係好肯定佢減低到幾多日，應該如果我冇記錯，應該佢係少過十日嘅。

黃女士： If you look further...

主席：（經傳譯員）你繼續之前，“BOP 207”係咩嘢意思呢？

楊晉瑋先生：“BOP 207”其實係我哋一個叫做“BOM”，B-O-M，嘅一個 programme 裏面嘅其中一個 function，B-O-M 應該係 stand for bus on-board management，something like that，佢呢個 function 佢係會幫我 capture 每部巴士佢嘅超速紀錄嘅，每逢有巴士會超速，即係個路面嗰個車速限制，我哋會用呢個 BOP 207 可以 retrieve 到呢啲 speeding 嘅

record。

主席：（經傳譯員）我哋嗰個界限值係乜嘢係為之超速呢？

楊晉瑋先生：每一個 location 我哋都會 identify 咗佢係個法例嗰個限制車速，一係 50 公里每小時或者係 70 公里每小時，巴士一係 50，一係 70 嘅，當個巴士行經嗰一笪地方嘅時候，呢個 system 就會透過個 GPS 個 location 去 match 番呢架巴士究竟有冇同個限制有出入，如果有嘅話，佢就會喺呢個 report 度出番嚟嘅。

主席：（經傳譯員）通常係--你通常係超咗幾多先至話有超速呢？

楊晉瑋先生：應該以我所知，係會有一個 allowance 喺嗰度，因為驚嗰個 GPS 或者個 speeding 會唔準嘅，但係嗰個差距係幾多，我哋呢一刻冇嗰個數字喺度。我哋會做嘅，即係喺我嘅角色，總之逢嚟佢有呢個 record 出咗嚟，我哋 verify 番嗰個 location 係正確呢，我哋就會交畀我哋嘅 TQD 嘅 department 去做 follow-up action。

主席：（經傳譯員）你會係點樣去核證嗰啲嘅紀錄呢？

楊晉瑋先生：首先佢個--如果有架巴士出現咗佢話佢超速，我哋就會對番佢個 departure record，究竟呢架巴士會唔會有人入錯車牌，喺頭先嗰個叫做 TER 嗰個 system 嗰度，如果啱咗嘅話，證實咗係呢個車長負責駕駛呢架巴士嘅，我哋就再睇一睇佢個 GPS coordinators，個 X、Y 嗰個 coordinate 係咪正確，因為有時可能會受到干擾，會架車可能唔能夠正確顯示佢嘅位置嘅，當我哋正確見到個位置係啱，而見到嗰個車速限制係唔 match with 嗰個實際車速，即係如果佢超咗速嘅話，我哋就會確認呢個位置超速。

主席：（經傳譯員）除咗呢一個衛星定位系統嗰個嘅 X、Y 嗰度，你有冇其他嘅方法就去確定個地點？

楊晉瑋先生：以我所知，係冇嘅，我哋係用 X、Y coordinate 個 GPS。

主席：（經傳譯員）你係咪意思係經瑋度呀？

楊晉瑋先生：我唔知道有用其他呢兩樣嘢，我會最主要係用 X 同埋 Y 去做呢個確定嘅。即係我撳咗落去個 coordinate，佢就會彈咗一個地圖出嚟，個地圖就會顯示當時架巴士嘅位置，我哋就用呢個地圖個位置嚟確實睇下架巴士係咪真係行過嗰度、個車速係幾多。

主席：（經傳譯員）係，唔該晒。

黃女士：（經傳譯員）我哋睇番呢個表格，我哋睇到一個「里程碑」嘅，呢度寫住，呢一個資訊科技部就話佢哋而家做緊就係能夠改良緊巴士表現嘅報告，希望能夠更加好監察嗰個超速同埋緊劇剎車同埋突然加速嘅，但係跟住就係 改善之後，嗰個車務部就會係分析有關嘅數據，就係一個禮拜兩次，就係之前八日嘅

數據，就係話畀啲車長聽有咩嘢異常嘅情況，嗰啲報告就會係一個禮拜兩次就係畀呢一個培訓部，然後就會即時採取一個行動，希望佢哋唔會再重蹈覆轍嘅。呢個就係畀運輸署嘅一個陳述書。

主席：（經傳譯員）呢個係咪一個意外報告？呢個唔係陳述書嚟㗎喎。

黃女士：（經傳譯員）係，冇錯。呢個係意外報告嚟嘅，呢個係一個嘅行動計劃，點樣去落實一啲相關嘅主要嘅建議，就係2018年4月10號，由145頁開始嘅，楊先生，根據呢個嘅「里程碑」呢一度，就其實個改善就係話由十日去到八日即係去做嗰個報告？

楊晉瑋先生：正確。

黃女士：（經傳譯員）你...

主席：（經傳譯員）而家個系統係咪淨係監察個速度呢？

楊晉瑋先生：如果BOP 207，呢個function係淨係對車速做一個監察嘅。

主席：（經傳譯員）個改變就話唔係純粹就係監察嗰個速度同埋嗰個急劇剎車同埋急劇加速嘅。

楊晉瑋先生：如果你針對住BOP 207呢個function，佢係冇包括頭先你講嘅harsh braking或者係sudden acceleration呢兩樣嘢，係淨係focus on speeding。

主席：（經傳譯員）所以話佢哋個建議就係話我哋監察，就唔純粹係超速，就係同埋急劇剎車同埋突然加速，呢度係咁講嘅，係咪呀？

楊晉瑋先生：係，冇錯，即係就係要用另外一種report，就係頭先即係lunch之前講嗰個report，係會review埋speeding、acceleration同埋braking嗰兩樣嘢，呢個就係頭先喺之前cover咗嘅。

主席：（經傳譯員）呢度講就話呢度要改善嗰個嘅巴士表現報告嗰個，就希望能夠更加好監察超速、急劇剎車同埋急劇加速嘅，你係咪已經有嘅呢？

楊晉瑋先生：我唔肯定佢而家呢個“Milestone”呢度mention嘅improvement個action plan而家implement咗未，但係as of今日，我係繼續用緊BOP 207去monitor個speeding同埋頭先剛才講嗰個IT會send畀我嘅report就係monitor speeding、harsh braking同埋個acceleration嘅，我唔肯定我而家做緊嘅嘢係咪等於“Milestone”講佢嘅action嘅。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）關於呢個報告，今朝早你提到嘅報告，就關於急劇剎車等等，你幾時開始係有收到呢啲報告嘅呢？

楊晉瑋先生：呢個 report 應該我喺 2017 年嘅時候已經有見過呢個 report 嘅，已經我哋已經開始要做㗎喇，exactly 我要--如果你需要，要再搵畀你。

主席：（經傳譯員）好，唔該搵喇。

黃女士：（經傳譯員）好，我哋講下一個題目，就係監察攝錄機。楊先生，有好多嘅工會話畀我哋聽，特別係九巴嘅工會就越嚟越多一啲辱罵車長嘅事情，係乘客去辱罵車長嘅，其中一個可以幫警方去執法嘅方法就係用一啲監察嘅攝錄機去影低無論係聲帶或者係影像，就係知道發生緊咩嘢事，我哋又睇一啲證供話畀我哋聽起碼就係--即係最少就係九巴，而家係有二千三百一十九嘅九巴巴士、一百四十六個龍運巴士就係有呢啲嘅監察攝錄機嘅。咁可唔可以講下據你所知其餘嗰啲巴士呢？

楊晉瑋先生：Okay，剛才你講嘅數字，以我嘅認知，應該--因為隨住我哋啲新車不斷買入，啲舊車退役，所有新車買嘅時候就已經 installed with 呢個 CCTV 嘅呢個 device，所以應該而家實際嘅數字係比剛才你 mention 嘅為多嘅，至於餘下落嚟嘅車，以我所知，公司會有計劃喺今年嘅年底之前，再為應該大概--exact 個 figure 我唔肯定，但係應該大概六百零、七百架車再去幫佢拉線，再裝個 CCTV 上去嘅，呢個係我知道 Management 2018 年會做嘅一樣嘢。

黃女士：（經傳譯員）2018 年管理層嗰個計劃有冇包括所有九巴呢？雖然有啲係舊車。

楊晉瑋先生：如果我就咁睇個數字，就未 cover 得晒，應該剩番好少數將會就嚟退役嘅車冇包含，即係如果我計番我哋個 bus fit 出嚟嘅話，就應該未 cover 晒。我唔肯定佢會 2019 年係咪會繼續有 plan 呢個，呢個我唔清楚。

黃女士：（經傳譯員）我哋聽到有啲投訴，或者唔好講「投訴」，係有啲建議，就係工會嘅成員佢哋建議就安裝自己嘅一啲攝錄鏡頭，因為有啲舊嘅巴士型號就係冇攝錄鏡頭嘅，佢哋覺得裝咗都可以有個措施可以保障到佢哋安全同埋係即係睇番乘客嘅行為嘅，但係九巴係否決咗呢個建議嘅，亦都出咗一個通函，係咪咁呀？據你所知。

楊晉瑋先生：以我所知，係，我哋係唔容許車長去裝自己嘅攝錄系統嘅。

黃女士：（經傳譯員）你係咪發咗個通函...

主席： Why not?

楊晉瑋先生：我答主席嘅問題，我知道嘅，就應該關於一啲個人私隱條例裏面可能有一啲限制公營巴士嘅點樣去應用嗰個片嘅。

主席： What is that an acronym for?

楊晉瑋先生：個人私隱條例，exact 佢係邊個 clause 講，我唔肯定嘅，但係我知道，我聽番嚟嘅，就係因為其實係保障番個車長，因為之前試過有一啲 case 係

我哋車長--即係 KMB 嘅車長佢可能影咗一啲片，跟住放咗上網，之後我哋係收到一啲投訴係關於個人私隱，係侵犯咗對方嘅。所以我哋--即係我嘅認知，就我哋都會同車長講「因為係保障番車長嘅利益，有個人私隱條例規定咗某一啲嘢，令到就唔可以畀你哋自己裝嘅。」呢個係我嘅認知。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）喺你嘅開場發言，你就提到過話你嘅角色就好重要嘅，意思就係話你係作為一個好重要嘅橋樑嘅，係管理層同埋前線員工之間嘅橋樑，你有冇提出過巴士車長嘅關注呢，或者佢哋有咁嘅要求，有冇向管理層講呢？

楊晉瑋先生：有嘅，其實另一方面我都有收過有一啲車長佢哋嘅反應，佢哋係唔鍾意我哋裝個鏡頭喺架車上面嘅，所以呢一方面我都曾經同管理層講過話「你裝咁多喺架車上面，其實有一啲車長係覺得保障佢哋，但係有一啲車長都唔係好鐘意，好似有樣嘢去 monitor 住佢，好似好大壓力咁。」呢個我都 express 畀管理層知嘅。

黃女士：（經傳譯員）關於襲擊車長嘅事件，我哋就見到九巴嘅書面...

主席：（經傳譯員）我哋講第二個範圍之前，黃大律師頭先問你通函，然後我頭先打斷咗佢嘅，個通函係咪有發出過，係同巴士車長講話佢哋唔可以自己裝自己嘅監察鏡頭，有冇咁樣通函？

楊晉瑋先生：喺我印象裏面係--我冇印象見過呢一個通告嘅，唔知係咪我忘記咗，但係我冇印象見過呢個通告。

主席：（經傳譯員）呢個資訊點樣畀巴士車長知道，等佢哋知道佢哋唔可自己裝閉路電視或者監察鏡頭呀？

楊晉瑋先生：即係其實我哋明白車長有--如果佢自己選擇裝上去嘅車長，我哋係明白佢個立場嘅，所以通常我哋都會用一個比較柔軟嘅方式去同佢哋講話「其實你咁樣裝，有機會--當然你保障咗自己，但係你有機會都違反咗某一啲條例嘅。」我哋就建議佢去拆番呢個 CCTV 落嚟，即係拆番佢自己裝嘅 CCTV 落嚟，如果勸咗佢唔聽嘅話，我哋都會交番畀 GQD 嗰面去跟進嘅，但係我哋係唔會話即刻要佢拆咗佢，如果唔係，就唔畀佢開車，我哋冇做呢樣嘢嘅，即係會比較柔軟啲嘅。

主席：（經傳譯員）即係建議啫，唔係話完全禁止？

楊晉瑋先生：喺我哋嘅角色，我哋喺前線同事，我畀佢哋嘅 instruction 都係 recommendation 畀佢哋唔好咁做，至於 TQD，我哋--即係如果個車長佢唔拆，我哋 pass 畀 TQD，可能佢哋會再進一步嘅行動去解釋番畀個車長聽，其實有啲咩嘢弊處係存在住咁樣。

主席：（經傳譯員）但係都係建議，但係唔係話禁止嘅？

楊晉瑋先生：喺我個角度--喺我嘅角色，喺我前線嘅團隊嘅角色，我係做一個recommendation嘅動作。

主席：（經傳譯員）你叫TQD，培訓及質數保證部，佢哋係咪又係建議吖，定係直頭禁止吖？

楊晉瑋先生：呢個我唔清楚。

黃女士：（經傳譯員）你而家可唔可以同TQD問下？

楊晉瑋先生：冇問題。

黃女士：前線員工如果想裝監察鏡頭，但係自己冇嘅話，你有冇將佢哋嘅訊息去上--即係講畀管理層聽就有巴士車長係想裝監察鏡頭嘅時候應該幫佢裝，等佢哋--即係話車長自己本身唔需要違反呢個嘅私隱條例呢，你有冇同管理層講？

楊晉瑋先生：有，喺唔同嘅場合，都會收到車長嘅一啲意見，即係一啲formal嘅visit或者一啲informal，我落去同啲車長傾偈，佢哋都有同我反映，我都會同番管理層講番車長嘅意願嘅。

黃女士：（經傳譯員）管理層個反應係點？

楊晉瑋先生：我收到管理層嘅回覆，就係佢哋已經儘快希望將我哋啲巴士就裝--即係新車固然之會有，舊車都會儘快裝呢個系統嘅，佢哋--當時佢應該同我講係佢哋知道、明白車長嗰個需要。

黃女士：（經傳譯員）我哋聽到有工會成員就話因為有越嚟越多襲擊車長嘅事件，佢哋就當係平常事，喺你嘅意見書入面就提過就會畀一啲心理輔導或者係支援畀有關員工嘅，你嘅意見，巴士車長有冇咩嘢提議，即係點樣可以改善，喺呢一部分，喺公司應該點樣改善。呢一頁我哋都見到，就應該係149頁--對唔住，113頁，就提到專責小組就搵咗個顧問去全面檢討現行嘅做法，然後就提出一啲建議，包括要評估巴士車長佢嘅情緒智商同埋係處理壓力咁樣，你有冇...

楊晉瑋先生：本身KMB係有同一間第三者嘅機構去合作，提供一條熱線去提供畀啲車長，嗰條叫做「傾心線」，係一個獨立運作嘅一個hotline嚟嘅。至於我見到而家paper 3第38段講嘅呢樣嘢，我都知道管理層係做緊呢樣嘢，佢哋當中其中一個meeting我都有出席過嘅，佢哋係委派咗或者邀請咗一間--應該香港一間大學輔導系或者心理系，個名我唔肯定，去幫佢做一個review或者睇下有啲咩嘢recommendation可以畀到九巴嘅，其中一個meeting就係同呢啲心理學家去--我會話番畀啲心理學家聽究竟而家我哋啲車長有啲咩嘢面對緊嘅。

黃女士：（經傳譯員）繼續講另外一個問題，講巴士脫班，我哋聽到你嘅同事，即係黃綺玲女士佢畀嘅證供就話脫班係常見嘅情況，亦都會影響駕駛嘅態度，因為預定嗰個嘅行車時間唔準確，亦都會影響車長休息嘅時間，你對呢件事有咩嘢

睇法？

楊晉瑋先生：其實喺我嘅角度，lost shift 其實有好多嘅因素會導致嘅，首先就係我哋車長唔夠人，我哋會冇咗一個班次，我哋香港嘅交通可能塞車或者有啲特別事故，引致到架車開唔到，就冇咗一個班次，另外有啲可能一啲公眾活動、遊行或者一啲特別改路措施都會令到架車冇咗一個班次，當然仲有天氣或者一啲壞車嘅影響都會令 lost shift 嘅出現嘅，但係我哋喺 lost shift 嗰度，儘量我哋都唔會影響到車長嗰個 journey time 嗰個休息時間。因為其實個 journey time 我哋提供咗畀個車長，我哋嘅 schedule，journey time 係大概 90% of 佢個 trips 係可以有足夠嘅時間行車，90%呢個係一個 index，可能會高啲，可能會低啲。

咩嘢叫做 90%呢？就即係佢十個 trip 裏面可能會有九個 trip，佢都會有足夠嘅 journey time 去 operate 嗰架車，之後返嚟仲會有休息時間嘅，剩番嗰 10%，即係剩番嗰一個 trip，可能就係因為頭先我講嘅其他問題，令到可能大塞車，佢返唔到去。而喺 lost shift 嗰度，我哋係唔會刻意去減咗個車長個 journey time 係令到佢追番我哋唔見咗嘅 shift 數嘅。

黃女士：（經傳譯員）我哋可唔可以舉個例子，你朝頭早提過寶田邨嗰個站，就有特別更次，你都記得嘅。喺寶田邨，我就睇過你嘅九巴網站，就有幾條巴士線嘅，其中一條就係 258D，係由寶田邨去藍田，我相信估計嘅行車時間係個半鐘，啱唔啱？

楊晉瑋先生：大概應該係呢個 journey time，係。

黃女士：（經傳譯員）亦都有證供話畀我哋聽，就關於呢個特別嘅呢個 258D 呢個路線，嗰啲我哋嘅行車時間就係--嗰啲車長如果做呢個特別更次嘅時候，佢哋就冇足夠嘅休息時間，我哋可唔可以將琴日工會嗰個陳述書嘅部分我哋可以喺個畫面嗰度睇一睇？呢個係 258D 嘅路線，「蛇」5，呢個就係分更第 5 號，呢度講就係話開車時間係 06:50，然後就 13:43，跟住就係 16:00，至到 20:15 嘅，所以嗰個休息時間就係中間嗰段，就係只係有兩個鐘十五分鐘，就而唔係三小時嘅休息時間，呢個係公司定出嚟嘅行車時間表嚟嘅，你對呢個嘅回應係點樣呢？

楊晉瑋先生：我而家就冇 schedule 喺手，但係呢條線我都有份去做個 time table，以我嘅 memory 記得，呢一個 duties 佢第一段，即係 first session 嗰個 end time 應該係 12 點 43，唔係 13 點 43 嘅，因為其實有一個鐘頭，我哋係畀個食飯--我哋畀一個 meal break 嗰個錢畀個車長，即係其實佢 12 點 43 分，如果 on normal day，冇塞車，應該喺 12 點 43 分之前，佢都已經係可以休息，下一次開車就係 4 點嘅，應該係多過三個鐘頭嗰個運輸署新嗰個 guideline，應該係 2019 年生效嗰個。

主席：（經傳譯員）你可唔可以確定下呢個係其實真係一個寫錯咗呢？其實就係 12:43，你可唔可以畀番啲紀錄我哋睇番呢？

楊晉瑋先生：可以，可以。

主席：（經傳譯員）如果係咁，就請你提供番相關嘅資料。

黃女士：（經傳譯員）其中一個工會成員，就係用呢一個黑盒就可以知道個行車時間，計出嚟，就而唔係話有個人佢揸車，佢就話畀你聽，而唔係用一啲科學嘅數據，其中一個建議就喺繁忙同埋非繁忙時間嘅時候攞咗一啲資料，然後就加入一個因素，就係話可能塞車，然後先至係計出嗰個行車時間，呢個係比較科學嘅講法嘅--做法嘅，你點樣睇？

楊晉瑋先生：其實我哋係有做嘅，我哋本身有一個 scheduling section，佢哋專係負責去 review 所有 time table，所有車長嘅 duties 都係由呢個 department 去 review 嘅，我嘅角色就會協助畀啲 input 佢，譬如我收到啲意見，會話番畀呢個 section 聽啲車長邊度可能唔夠 journey time 或者佢哋有啲咩嘢要求。佢哋會 on and off 佢哋會用一個 system 去 review 個車長嘅 journey time 嘅。其實剛才你所講嘅，我哋用一架車或者用一架巴士去實地去試，其實呢個我哋唔係成日用，幾時會用到呢，就係可能開一條新線，因為我哋本身冇一啲 historical data 我哋可以 review 嘅，所以我哋可能真係搵一架車，用番一個巴士嘅速度去模仿一次佢嘅 journey time 出嚟。

但係當一條線係已經有一定數量嘅 data 嘅時候，我哋係會用兩種方法，應該話嗰個 schedule section 佢哋會用兩種方法去 review 個 journey time，一，就係個車長嗰個到站同埋開車時間，就係記錄咗喺嗰個 TER，頭先 mention 過嘅，每逢個車長到站嘅時候，佢就會喺嗰個站長室嗰度就拍自己個 staff card，我哋就會記錄咗佢嘅到站時間，當然個站長就會喺嗰度 input 佢個下一次嘅開車時間，從而我哋將兩邊個--一個 departure time 再加一個 arrival time，兩個減起嚟，就知道佢實際用咗幾多嘅 journey time。

另外一個所講嘅，就係用番嗰個 GPS 嗰個 location 去定，其實呢兩個，無論邊個 method 都好，其實都係--我哋都覺得係 valid 嘅，因為真係反映到架車幾時到咗站，佢會不時佢去 review 呢個 journey time，就如果我--可以畀我舉一個例子，其實寶田係一個好好嘅例子嚟嘅。頭先講過 258D，另外一條線係 260X，佢係由寶田去紅磡火車站--紅磡鐵路站嘅，佢中間係途經過一笪非常之塞車嘅地方，就係而家起緊高鐵，近住佐敦嗰個附近。因為佢起高鐵嘅關係，佢嗰度有一個大型嘅改路，令到佢開頭一開始呢個工程嘅時候，我哋 260X 係非常之唔夠行車時間，因為佢係未起高鐵突然間要改路，我哋就 review 個 journey time，跟住然後就將嗰個 journey time 係加咗好多畀呢條線嘅車長嘅。去到而家呢一刻，其實而家最新嗰度有條地下隧道--行車隊道開咗，佐敦嗰度都已經比較冇咁塞車，我哋發覺呢條線佢嘅 journey time 而家係多得滯，係多到架車返到總站係唔夠位泊車，因為啲車長佢太早返到站，所以我哋都會 review 個 journey time，可能 adjust 番，according to 佢個事實。

主席：（經傳譯員）你係咪需要係向運輸署去攞個批核嘅呢？

楊晉瑋先生：如果我哋自己可以 revise 到個 time table，係唔需要改任何嘅 frequency 嘅話，我哋係唔需要同運輸署申請嘅，即係假設佢個 schedule of service 係規定我哋十分鐘一班嘅，260X，如果因為行車時間唔夠，我哋要加一個行車時間，可能我哋會用好多種方法，譬如係 deploy from 其他巴士線去行呢條線，又或者甚至乎加一架新車，加一架新線落去，呢啲我哋會按實際情況，睇下可唔可以做到，但係唔係喇，做唔到喇，因為一個好大幅嘅一個行車時間調整，我哋冇辦法可以憑我哋現有嘅 resources 去做呢，我哋惟有就睇下可唔可以將嗰個 frequency 稍為調整，當我要調整個 frequency 嘅時候，我哋一定要向運輸署去申請嘅，要等運輸署 approve 咗，我哋先可以去調整。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）我哋而家去傾第二個題目，今朝早黃綺玲女士就今朝早講，就係話有一個聚焦小組--焦點小組，就係去傾下究竟有啲邊啲路段就對於車長或者係乘客嚟講，都係比較危險嘅，如果喺屯門嚟講，你有冇啲類似嘅聚焦小組㗎？你就會同啲車長或者去傾去呢個嘅--邊一啲路段係都要特別小心或者一啲好急嘅彎等等咁樣？

楊晉瑋先生：有嘅，有呢啲例子可以提供。

黃女士：（經傳譯員）你可唔可以提供啲例子呢？

楊晉瑋先生：係，譬如我哋會--我哋有--通常用兩種途徑去收集呢啲 hazard 嘅，第一嘅，就係車長佢直接同我哋反映，因為佢哋係第一身，佢哋知道邊笪地方係有潛在嘅風險嘅，例如--譬如可能呢排 7 月、8 月佢落雨落得好緊要，有好多地可能嗰啲馬路會因為大雨嘅關係，會出現咗一個個嘅窿嘅。架巴士--如果私家車行，可能未必有問題，但係架巴士行，佢就會好撳，有機會乘客因為咁樣而 lost balance 嘅，車長如果話咗畀我哋知，我哋第一時間當然要通知番有關嘅政府部門；第二，就係如果我哋發覺係好嚴重，我哋會即時同站長，通知站長去話畀所有會途經嗰個路段嘅車長聽，話畀佢聽去到嘅時候可能佢要慢速，甚至乎可能佢係咪要出一條線去避開咗嗰個窿呢，呢個就係第一個我哋可以攞到嘅意見。

第二，就係我哋其他同事，我哋有一啲外勤嘅同事，佢哋其實--尤其是喺雨季，佢哋要定期去巡查個路面嘅，佢哋主要就係針對去巡--尤其是我因為屯門、元朗嗰面就比較多一啲郊區嘅線，好多啲樹嗰啲，佢一落完雨，佢會因為可能水嘅關係，會髡咗落嚟，甚至乎有少少傾斜嘅危險嘅，嗰啲情況都係我哋主動發現到，因為佢有機會撞爛個巴士嘅玻璃，所以我哋都會即時--如果真係好嚴重，我哋會報畀警察聽，可能佢哋會搵消防員去 cut 咗個樹佢，但係如果可能好輕微掂到架車嘅，我哋就會話畀運輸署聽，等佢哋安排去做一啲修剪嘅工程。

黃女士：（經傳譯員）你就話你哋嗰啲外勤人士就會係定期去巡查，幾定期呢？

楊晉瑋先生：我哋本身--我哋自己屯門廠就有一個叫做類似黑點嘅地方，即係我哋會話到邊啲地方其實有比較多嘅樹木係會伸出嚟嘅，我哋--佢係要 keep 住去做呢樣嘢嘅，尤其是喺呢個雨季嘅時候，佢大概一個月時間嘅，佢就會成個區--我哋成個區嘅所有 black spot 會巡一次嘅，我哋其實會視乎實際情況，譬如如果真係落雨大啲，我哋可能再要求佢會加密少少，但係如果嗰一排可能係冇乜雨，係陽光普照咁樣，可能樹嗰個問題又唔係咁大嘅，但係其實平時佢哋巡路面--即係佢哋日常，譬如佢由呢個站去呢個站，佢哋嘅職責都要去不斷去 observe，睇下有冇啲 safety 嘅 concern 係佢哋見到，佢哋會報囉。

黃女士：（經傳譯員）最後一個題目，運輸署最近話畀我哋聽佢哋就係發出咗一個實務守則，就係關於車長嘅培訓方面嘅，你自己有冇睇過呢個實務守則呢？

楊晉瑋先生：唔好意思，我唔清楚係 refer 緊邊個，有冇得可以畀我參考？

黃女士：（經傳譯員）TD-1 第 403 頁，我哋睇第 18 段，第 19 段，呢度就咁講，就係講關於--第 18 同埋第 19 段就講到呢個實務守則嘅。

主席：（經傳譯員）呢個喺其實過去十日之內先至發出嘅啫，呢個實務守則。

楊晉瑋先生：應該我哋嘅 practice 唔係呢排發生嘅，即係而家佢 refer 緊我哋嘅 training，我哋 enhance 咗好幾個月㗎喇，以我所知，但係我唔知呢個 paper 佢 refer 緊嗰樣嘢係咪我講緊嗰樣嘢。

黃女士：（經傳譯員）你係點樣改善你哋嗰個培訓嘅呢？

楊晉瑋先生：我哋 training 裏面其實佢分開兩個 phase 嘅，一個叫做 phase 1，一個叫做 phase 2，phase 1 就係如果佢係冇任何--即係佢淨係得 1 或者 2 牌私家車咁樣，佢入嚟想做我哋嘅車長，佢就要透過 phase 1 呢個 training，就去向運輸署去考取呢個巴士嘅駕駛執照嘅，呢個就係 phase 1。當佢 pass 咗運輸署呢個駕駛考試之後，佢攞到嗰個真係個巴士駕駛執照...

主席：（經傳譯員）你有冇喺過去幾個月可唔可以改善第 1 期呢？

楊晉瑋先生：Phase 1 我見唔到有 enhance 嘅動作。

主席：（經傳譯員）第 2 期呢？

楊晉瑋先生：Phase 2，有。

主席：（經傳譯員）點樣加強？

楊晉瑋先生：如果有需要嘅話，即係呢個係 management 畀我哋嘅 instruction，如果有需要嘅話，我哋係唔會畀個車長去完成呢個課程嘅，一定係等佢自己有信心或者導師對佢有信心，我哋先會畀佢完成嘅，即係換句說

話，原本可能佢係要 train 咁多日嘅，但係冇信心，我哋寧願都係希望佢再畀多啲 training 佢，先可以畀佢畢業出嚟嘅。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）主席，我問晒喇。

主席：（經傳譯員）唔該。楊先生，多謝你嚟呢度作供協助我哋，你而家係作供完畢，你而家可以離席，但係你可以留喺度，我哋會請下一位作供，唔該。

楊晉瑋先生： Thank you.

主席：（經傳譯員）而家稍為休息，楊生可以離席，休息兩分鐘。

下午 3 時 16 分押聆訊押後

下午 3 時 21 分恢復聆訊

出席人士如前。

主席：（經傳譯員）鄭先生，多謝你接受我哋邀請上嚟作供，亦都多謝你耐心全日咁樣等候，因為我哋之前係聽緊第二啲證供，而家輪到你，你應該有睇到我哋個程序，我哋而家會請黃大律師開始問你問題。可以開始。

鄭桂興先生：（經傳譯員）主席、委員，我好榮幸能夠出席呢一個聆訊，首先喺開始問答之前，我要申報利益。可唔可以用中文？

主席：（經傳譯員）當然可以喇。

鄭桂興先生：本人同 2 月 10 號巴士災難十九位死難者及六十六位傷者完全沒有朋友或者親屬嘅關係，亦都同現時九巴董事總經理及管理階層沒有朋友或者親屬關係，只係同 2015 年前嘅董事總經理及管理階層有工作夥伴關係，okay。We can start。

黃女士：（經傳譯員）唔該晒鄭生。唔該鄭先生今日出席。鄭先生，你係安全及服務質素部嘅經理，係咪？鄭先生，你係安全及服務質素部嘅經理，係咪呀？即係高級經理？

鄭桂興先生：（經傳譯員）係。

黃女士：（經傳譯員）講緊係 2010 年嘅 5 月 1 號開始，你其實就係 2014 年 9 月退休嘅，係咪呀？

鄭桂興先生：（經傳譯員）冇錯。

黃女士：（經傳譯員）當時何達文就係九巴嗰個嘅總裁，係咪呀？

鄭桂興先生：（經傳譯員）冇錯。

黃女士：（經傳譯員）Gary Wong當時係你上司，係咪？

鄭桂興先生：（經傳譯員）係。

黃女士：（經傳譯員）我哋而家集中講幾個部分，第一，就係點樣係找出二十九個嘅急彎，係一啲內部分析嘅用途嘅，你其實喺提交畀委員會嗰個書面嘅文件入面亦都提到過，而家首先請你睇番FE文件冊嘅96-4至96-6頁，响呢一頁，即係96-4頁，如果我哋睇下嗰一段，就係話巴士好容易會翻側，即係第二段，入面提到係關於安全駕駛，你就喺2013年開始做一個研究嘅，喺急彎方面，而安全及服務質量部就邀請四個站頭嘅經理，同埋係培訓嗰度嘅代表，同埋係維修部就做一個嘅研究小組去深入研究喺巴士路線網絡入面嘅急彎，可唔可以講下嗰四個經理係咩嘢人呀當時？

鄭桂興先生：嗰四份係分別屯門廠、荔枝角廠、沙田同埋呢個荔枝角廠--荔枝角、沙田、屯門及沙田廠嘅depot manager，咁樣呢四位manager，我哋組織咗一個taskforce，除咗以上四位嘅depot manager，連同巴士訓練學校嗰個校長，佢個grade係assistant manager，名就叫做Richard Lee，咁樣再連同呢個Service Department，即係維修部，佢哋嘅工程師，咁因為工程師就係而家亦都離咗任嘅，就係呢個Henry So，咁樣我呢個小組就搜羅晒所有由四個depot提供畀我哋全香港、九龍、新界，或者集中啲講，就係九龍同埋新界各線巴士日常所經過嗰啲急彎。

點樣去define急彎呢？就係我哋嘅criteria就係，一，就係嗰個時速限制，由70轉50；二，就係個急彎個弧度；三，亦都係嗰啲經常日常經過嘅巴士線嘅載客量，因為如果佢日常都係好滿嘅，即係換句話講，個車重會加重咗；第三，就係我哋亦都係考慮到嗰個急彎嗰個實際嘅情況去作出個評估，由九龍、新界，甚至乎香港所搜集返嚟大約千幾個嗰啲急彎，我哋篩選到為二十九個，而呢二十九個，我哋制定咗嘅方針，我哋係用巴士實地去行駛。

喺嗰個test嗰個途中，我哋亦都利用嗰啲video，car cam.喇所謂，去錄影當時嗰架巴士行經嗰二十九個嘅急彎，呢二十九個我哋全數有做過嘅，係用唔同嘅速度嘅，包括由20 km、30 km、40 km、45 km、50 km去反覆來回去測試嘅。咁樣亦都利用咗頭先你哋所講嗰個black box嘅，即係我哋嘅簡術語就BOM，BOM就bus on-board monitoring system去計算番我哋行駛邊個速度係可以安全，亦都唔會影響到個交通流量嗰個速度，就做一個建議畀我哋嘅senior management。

我想喺呢度停一停，你有啲咩嘢問題想再問？

黃女士：（經傳譯員）唔該你，鄭生。我想問邊個係帶頭發起話要做個咁嘅研究嘅呢？

鄭桂興先生：當時就係我哋嗰個 MD，Mr Edmond Ho，就轉述咗--指示我時任嘅 supervisor Mr Gary Wong，咁樣 Mr Gary Wong 就同我、同我哋個 team member 一齊去傾嘅。

主席：（經傳譯員）Gary Wong 佢係咩嘢職位呀？

鄭桂興先生：佢係 Head of SSQ。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）你頭先提到有一啲嘅同事，你會唔會同佢哋不時都開會係講關於呢個研究嘅呢？

鄭桂興先生：有。

黃女士：（經傳譯員）幾時㗎？

鄭桂興先生：大約係 2013 年尾、2014 年初。

黃女士：（經傳譯員）呢啲會議有冇會議紀錄？

鄭桂興先生：我相信係有嘅，就我哋唔會話一個 formal 嘅 minute，而係用 exchange of e-mail，好似頭先楊生咁樣講，係有通過電郵去作實嘅，因為其後我哋要好多安排，包括安排車長，即係一個特別職務嘅車長去駕駛架巴士，要安排工程師，要安排呢個駕駛學院--駕駛訓練學校嘅導師去定出個日期去做嘅，我相信呢啲 minute 喺九巴--我嗰個 e-mail account 就 close 咗，就完全我係搵唔番，咁樣或者其他有參與呢個工作嘅同事可能會搵得番相關嘅 e-mail。

黃女士：（經傳譯員）鄭先生，你知唔知道佢哋而家仲喺九巴就職嘅，佢哋亦都係有參與呢個研究，我哋可以向佢哋問嘅呢？

鄭桂興先生：因為已經事隔咗四年，以我嘅認知，大部分嗰啲同事已經離咗職。

黃女士：（經傳譯員）關於呢個車上嘅攝錄機，就關於呢二十九個急彎你提到嘅呢...

鄭桂興先生：嗰啲影片係我當時退休前，我做完呢個 project，係親身交畀當時嘅巴士訓練學校嘅校長 Mr Richard Lee 嘅，而家嘅去向喺邊度呢，我答唔到你。

黃女士：（經傳譯員）邊個去--二十九個急彎，邊個去拍攝嗰啲嘅短片嘅呢？同埋邊個去揸嗰啲車嘅呢，致使到嗰個攝錄機可以去拍低呢啲片呢？

鄭桂興先生：首先講嗰個攝錄機嗰個--邊個 hand held 呢個攝錄機呢，係 fix 咗

喺個巴士第二層嘅頭位嗰個 barrier 嗰個 handrail 度嘅，係唔需要搽嘅，只係開關、開關，呢個工序係由我本人去做嘅。咁樣另外，你嗰個問題，黃小姐，你所講嘅問題，係呢個邊個去儲存呢？喺拍攝完，係我本人儲存，我係交番畀我時任嘅 supervisor Mr Gary Wong，因為我哋要先睇下我哋所錄影返嚟嘅片段係唔係 correct。

另外我哋將所有二十九個試過嘅急彎，其實唔止一個片嘅，係好多個片嘅，係交番畀去巴士駕駛訓練學校嘅校長，由佢做一個剪輯，然後剪輯完就交番畀我哋，因為大家都知喇，好多 footage，嗰啲 footage 有啲係有用，有啲係冇用，咁樣我哋 edit 咗，就再交畀駕駛訓練學校，駕駛訓練學校去儲存，當中我哋有一、兩個 occasion，由 Mr Gary Wong 或者我，我唔係好清楚，係交番畀時任嘅 MD Mr Edmond Ho 睇嘅，咁樣我哋都係 just for viewing 啫，冇深入再去研究下「呢個速度係唔正確㗎喎」，呢樣嘢就冇喺嗰啲 occasion 去討論。

黃女士：（經傳譯員）鄭先生，第 96-6，喺下面個部分，你講就喺呢個嘅研究之中，我哋就能夠係印製一個叫做「安全小冊子」，你後來就係話呢個唔係小冊子，呢個係一啲提示卡咁樣。你喺呢度就講每一個嘅危險嘅彎佢哋嘅地點、佢個方向、佢個路面同埋相關嘅相片，就係你有一千五百個嘅路段有研究過嘅提議，你就係提出咗三十一個嘅建議。呢個一千五百個所謂嘅研究，係咪就係喺你呢一千五百個研究裏面，你就搵出呢個二十九個最有問題嘅彎位呢？

鄭桂興先生：Yes。

黃女士：（經傳譯員）你可唔可以話畀我哋聽嗰二十九個彎位係邊二十九個？你記唔記得呢？

鄭桂興先生：已經事隔咗成年，咁樣大部分都係忘記咗，只有個別，例如我喺個 paper 寫嗰四個，我就好清楚，可以 list out 出嚟，而我頭先較早之前，就我作供就有解釋過，我哋大部分嗰啲彎位，呢二十九個彎位都係集中喺郊區，因為市區日常都好塞車、好多紅綠燈，咁樣嗰啲車長就冇機會去超速，但係喺市區之外，即係郊區，佢哋通常行嗰啲 highway，就有機會會發生呢個超速或者駕駛態度不正確嘅行為出現，尤其是由嗰個 highway 落番個市鎮，好似我以上提供嗰四個地點都係一個 highway 行緊 70 或者 80，突然間要減速去番 50，落番嗰個市中心呢，就多數個危險就會出現。

呢二十九個，對唔住，我因為冇晒紀錄，我一啲紀錄都冇喺個手度，我只係憑記憶記到四個，以及二十九個呢個急彎嘅數字，我就好清晰可以回答到你個問題。

黃女士：（經傳譯員）唔該晒你，鄭先生。你嘅陳述書就係講話呢個研究就係同呢個 2009 年將軍澳嘅巴士意外有關嘅，我就想睇一睇一個立法會嘅文件，...

主席：（經傳譯員）你繼續之前。就鄭先生，你可唔可以描繪一下呢四個地方，你記

得嗰四個地方，嗰個有急彎嘅地方，你可唔可以描繪一下？

鄭桂興先生：我可以舉例，就由觀塘道近住彩虹交匯處，佢有兩條天橋係四線行車，突然間佢會 cut 做兩線，出番土瓜灣，兩線就上番西貢嗰個道路，佢個弧度係大約 230 度喽，大約 230 度喽，如果架巴士喺觀塘行緊 70 公里嘅，佢要上條 ramp，即係 uphill 上嗰個 ramp，嗰個 ramp 係一個弧度 230 嘅，佢要急轉彎，落番去呢個彩虹交匯處，然後先至可以選擇去新蒲崗或者選擇去西貢，呢個彎係單線行車嘅，咁樣嗰度係冇樹木嘅，因為佢係高架橋嚟嘅，但係個路面就經常性就有啲雜物，即係嗰啲貨車遺留咗啲雜物喺嗰個路面度，亦都包括有啲油跡。

咩嘢為之油跡呢？就係啲電單車或者私家車佢燒唔完嘅偈油會遺留咗喺個路面度，就溝成一個薄膜，呢個薄膜就會令到嗰啲車行駛時間好容易蹦呔，如果用安全嘅速度 50 去行，如果前面係好暢通無阻，你會有機會用 50 呢個限速係過唔到呢個 230 度嘅彎，因為一，佢係地面可能會有蹦，二，佢亦都個弧度咁大，尤其是雙層巴士你有個重量嘅，亦都喺個行駛個--加速嗰陣時行駛，有個 acceleration，有 acceleration 呢，去到個彎嗰個心嗰度，我哋叫“apex”，嗰個 apex 嗰個彎嘅中心，佢會產生一種離心力嘅，我哋叫做“G force”，嗰個 G force，你架車越重，你架車行得越快，個 G force 就越大，就令到你架巴士反側嘅機會亦都會大。

主席：（經傳譯員）呢個係咪講緊一個嘅例子，就話架車如果由 70 轉到去 50 嘅公里行車，就會有出現呢個情況，係咪一個咁嘅例子呢？

鄭桂興先生： Yes.

主席：（經傳譯員）呢個就係其中一個例子，另外嗰啲呢？

鄭桂興先生：另外一個，以我記憶，就係喺呢個馬鞍山，就由呢個大老山隧道一路向住馬料水方向，佢去到呢個馬鞍山呢個錦英苑咁上下嘅屋邨，佢有一個左轉嘅彎嘅，佢個左轉嘅彎嘅弧度係超過 180 度，咁樣亦都係由 80 公里或者 70 公里，70 公里轉番 50 公里，佢左轉嘅彎落番去呢個馬鞍山市區，嗰個彎其實同我頭先講，喺呢個觀塘道上呢個彩虹嘅彎位，佢係大同小異，只係一個彩虹道去呢個--觀塘道去彩虹道嗰個彎就係向右急轉 230 度落番去呢個彩虹交匯處，而馬鞍山，即係大老山公路去呢個馬鞍山，佢就係左轉，咁樣佢嗰個弧度、個行車嘅路同呢個頭先以上表述係差唔多，唯一佢亦都有個隔音屏，呢個落馬鞍山嗰度佢有個隔音屏，個視線就有機會就冇好似喺觀塘道落去彩虹交匯處嗰個視野度係咁好，換句話講，係差啲。

黃女士：（經傳譯員）唔該。呢個係第二個例子，其餘嗰兩個可唔可以都解釋埋呀？你記得嘅。

主席：（經傳譯員）我諗你要講嘅其實就係話嗰啲地點喺邊，嗰個彎度係幾多就得㗎喇，呢啲先係有關嘅即係我哋想知嘅嘢。

鄭桂興先生：嗰個彎度嘅弧度，我哋唔係用GPS...

主席：（經傳譯員）首先你講個地點先。

鄭桂興先生：Okay，okay，第一個地點就係將軍澳廣明道（原文照錄）迴旋處，第二個就係茶果嶺道北行左轉鯉魚門道西行，第三個就係我頭先描述過，就係大老山公路北行落石門就上馬鞍山方向，及第四個，觀塘道西行轉上清水灣道急彎。咁樣頭先尾嗰兩個我講咗，咁樣我首先先講一講呢個將軍澳廣明道（原文照錄）嗰個，就因為2009年11月發生一個兩死幾傷嘅車禍，時任嘅MD，就當我上任，已經畀咗一個mission我，就係話要研究下呢個迴旋處有啲乜嘢改善嘅空間。

咁樣我上咗任之後，我自己親身都去過呢個將軍澳廣明道（原文照錄）嗰個迴旋處去實地考察，佢嗰個情況亦都係一個highway，即係高速公路，經過一個迴旋處，就左轉入番呢個廣明道（原文照錄）嗰個屋邨，我忘記咗個名，而呢個彎道係一個360度嘅，佢係一個迴旋處嚟嘅，你如果行錯咗方向，你可以沿住嗰個迴旋處再行多360度再選擇你所入嗰個駛入道嘅。咁樣嗰個廣明道（原文照錄）嗰個就其實如果你喺50公里或者低過50公里去入去，係個問題唔大嘅，但係如果你喺個雨天或者夜晚黑嘅視野冇咁好，你就唔能夠用番50公里呢個限速去進入，因為會好容易產生危險。

咁樣另外一個就係茶果嶺道北行左轉鯉魚門道西行，呢個就喺觀塘嘅，觀塘郵政署對埋去嗰個彎位嘅，亦都係一個highway，左彎落番去呢個入觀塘嘅通道嘅，佢亦都係由70公里轉為50公里，咁樣佢亦都嘅特性又係呢一個單線嘅，即係單線嘅行車，好似我以上咁樣表達，如果你利用到50公里，係有機會係會超速嘅，雖然運輸署講到有晒路牌、有晒啲箭咀話前面彎路，但係有時我哋嗰啲司機未必真係全程咁專心，我哋嗰啲司機係好專業嘅，但係突然之間有一刻佢忘記咗或者踩嘅油門嘅協調嗰度唔係咁好，就有機會超過50公里，會駛入一個路口就會產生危險。

黃女士：（經傳譯員）唔該。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）鄭生，而家請你睇番一份文件，係意外之後，就立法會有一份文件。

主席：（經傳譯員）邊一個意外呀？

黃女士：（經傳譯員）屯門公路意外，2012年，呢份立法會文件就喺260-443，係而家TU文件冊嘅。

主席：（經傳譯員）再講多次個號碼。

黃女士：（經傳譯員）係1B文件冊，260-443-20。呢份係一個2012年11月27

號交通事務委員會嘅特別會議嘅文件，呢個就係講緊話專營巴士營運嘅安全同埋係好長嘅落斜嘅路上面嘅安全嘅背景資料，如果大家睇下第 6 段嘅話，就有提到喺西沙公路 2008 年 5 月 1 號嘅致命交通意外導致十八名嘅乘客死亡、四十四人受傷。再睇落幾段，就係話運輸署亦都做咗一個全港性嘅檢討，就係睇下有乜嘢好長叫做「長命斜」呢啲落斜嘅路，總共就發現喺全港係有二十九個咁樣嘅落斜嘅路段嘅，然後喺附件 I，就見到呢一度呢啲路段嘅一個表，喺 260-443-29 頁就見到喇。鄭生，請你睇下呢二十九個地點嘅路段，睇下你提到嗰四個路段可唔可以喺呢個表度搵到？

鄭桂興先生：喺嗰個 260-443-29 嗰度，第 1 頁全部都係集中香港嘅，喺呢個 260-443-30，其中有一個就係 15，Clear Water Bay Road 牛池灣，呢個係我本人有睇過，就係同我頭先睇嗰個--我研究嗰個係唔同，大家一個係 upstream，一個係 downstream 嘅。咁樣再睇落呢個新界嗰度，係冇嘅，係冇嘅。另外我想--我補充，2008 年我仲未職呢個 Senior Manager SSQ。

黃女士：（經傳譯員）我明白嘅。鄭生，即係你做嘅研究都係好寶貴，因為你就做咗一個好仔細嘅研究，呢個工作就睇下喺新界其實你係睇咗幾多道路呀？

鄭桂興先生：係好多，但係個數目係答你唔到，因為我嘅職責係喺關於安全--駕駛安全嗰度嘅，咁樣我嘅 frequency 去跟車係每個月起碼一次，我嘅跟車嘅方式就係用便裝，不預先通知嘅情況下去乘搭我哋公司嘅車輛，尤其是我 from the very beginning 我都講，喺郊區嗰個安全係好容易被我哋啲車長忽視，所以我個 frequency 係好頻密，我每個月起碼一次、兩次去搭嗰啲車，包括由元朗搭呢個 968 去到天后，喺天后再搭車搭番去屯門，咁樣其實我呢個屬於係 working trip，我會記低有關嗰啲危險嘅路段，咁樣亦都回報番畀我時任嘅 supervisor Mr Gary Wong，所以喺篩選嗰二十九個急彎，我係提供咗好多意見，亦都被接納嘅。

黃女士：（經傳譯員）唔該。而家請你睇下 96-6，呢一頁係你嘅意見書，你呢段你就話有三十一個安全駕駛建議嘅，就係嚟自呢個研究，你記唔記得呢啲安全駕駛建議即係乜嘢？又或者係關於咩嘢，大概？

鄭桂興先生：大部分都係牽涉到呢一個駕駛態度嘅問題，亦都有部分就牽涉到行車嘅速度問題。

主席：（經傳譯員）駕駛態度咩嘢意思呀？

鄭桂興先生：駕駛態度就係嗰個車長會唔會好專心去揸車，會唔會突然之間好似以上嘅作供者所提及嘅突然加速、突然間剎車、突然之間攞軚，因為佢突然之間攞軚，有機會會影響架雙層巴士嘅 centre of gravity，如果--我舉一個例子講，一個彎，一個大約 30 度嘅彎，如果佢用一秒或者一秒以上去順住嗰個彎位去攞軚，佢所需可能一秒、一點五秒或者兩秒，但係如果嗰個車長駕駛嗰陣時佢用零點一秒過同一個 30 度嘅彎，就會令到架車就會好 sliding，我唔知中文叫咩嘢，係「西」，會甩尾，會「西」，會 sliding 咁樣出去嘅，咁樣令到

坐喺車嘅乘客或者甚至乎企喺度嘅乘客佢會失去重心。你 get 唔 get 到個意思？零點一秒轉一個彎同一秒去轉一個彎係唔同嘅，呢個係一個駕駛態度嘅問題。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）你講到話有一啲係同駕駛速度有關，你咁樣畀建議嘅時候，有冇建議某啲路段係時速 70 公里嘅嗰啲巴士車長係應該駕駛嘅速度係低過法定許可嗰個駕駛速度呢，你有冇咁樣建議呀？

鄭桂興先生：首先，我哋而家巴士就已經 equip 咗一個 devices，就係 70 公里嘅限速，佢行到 70，佢再踩油，佢都唔會超越 70，但係如果佢嗰架車係落緊斜，或者甚至乎個駕駛態度，回歸番駕駛態度，佢 off 波咁樣行，嗰架車速就有機會超越咗 70 公里，咁樣如果你問我係咪建議啲車長行到 70 呢，我嗰個答案係 no，因為我哋係要小心安全駕駛，一定唔能夠超過嗰個法定限速，如果佢低過 70 或者 68，我係好 appreciate 嘅，但係你唔好因為個駕駛態度或者其他嘅事，行 70 公里呢，佢可能心情唔好或者有啲嘢煩擾住佢，咁樣佢行到 25，我就唔 recommend。

黃女士：（經傳譯員）第 96-7，你就話有一啲嘅提示卡，就已經印製咗，就可以分發畀所有相關路線嘅車長，你有冇參與係製作呢啲嘅細小嘅提示卡嘅呢？

鄭桂興先生：冇，但係我可以補充，頭先楊生佢提供就話印製啲小卡係 2013 或者 2014，個答案係唔啱嘅，印製呢個小卡，個小卡嘅 size 就係兩吋闊、3 吋高，一張卡仔嚟嘅，係 summarise 咗嗰嗰二十九個急彎嘅道路位置、嗰個方向、個行車嗰個安全時速，就喺張卡嗰度，但係好不幸，呢張卡係我退咗休、離咗職先至去預備、去印，我亦都同我時任嘅上司 Mr Gary Wong 口中聽到，係已經準備晒，印好...

主席：（經傳譯員）好，你就不如話你自己知道啲乜嘢嘢，而唔好話人哋話畀你聽啲乜嘢嘢，你明唔明白個分別呀？即係你...

鄭桂興先生：明白，明白，understand。

主席：（經傳譯員）你自己有冇見過呢啲嘅小卡呢？

鄭桂興先生：冇。

黃女士：（經傳譯員）96-8，第 7 條問題，你就係話--你話「我好失望，因為我聽到安全」...

主席：（經傳譯員）就我希望就係話佢呢個證人佢自己知啲乜嘢就好喇，就唔好再問其他。

黃女士：（經傳譯員）鄭先生，你識唔識一個程艾樂先生？

鄭桂興先生：識。

黃女士：（經傳譯員）喺你嘅研究裏面，就關於呢二十九個急彎嘅研究之中，你有冇同程艾樂先生一齊合作過呢？

鄭桂興先生：冇。

黃女士：（經傳譯員）當你喺九巴在職嘅時候，你有冇機會同程艾樂先生一齊工作呢？就住專營巴士安全嘅事宜？

鄭桂興先生：冇。

黃女士：（經傳譯員）主席，我已經完成我嘅提問。

主席：（經傳譯員）唔該晒。鄭先生，好多謝你今日就嚟協助我哋，同埋提供個證供，我哋非常之多謝你，而呢個部分已經係完成，我哋會有另外一個啲證供人，然後我哋而家暫時係小休嘅，唔該晒。

鄭桂興先生：唔該。

下午4時05分押聆訊押後

下午4時15分恢復聆訊

出席人士如前。

主席：（經傳譯員）各位，午安，唔好意思，我哋晏咗先開始做你呢部分，不過你都應該見到我哋頭先係聽取其他證人嘅證供，而家我哋係恢復聽你嗰方面嘅證供，黃大律師。

黃女士：（經傳譯員）唔該晒各位今日嚟嘅。尋日我就問咗一啲問題，關於休息設施嘅，喺你嘅意見書有提過，就係7月16號交嚟嘅，係附件七，就講麗閣邨嗰個休息設施，我知道劉先生就攞到啲新嘅資料，關於麗閣呢一個嘅休息設施，而家可以補充嘅。

劉啟謙先生：多謝主席，我哋根據番我哋附件七嘅地點，都有做過一啲 review 嘅，其實發現即係以黃律師嗰個例子麗閣邨，係已經裝咗呢個休息室㗎喇。我想喺呢度指出一點，就係九龍巴士公司喺處理休息室呢個議題上面係較新巴、城巴積極嘅，大部分嘅地方其實都有盡過佢哋嘅努力去安裝呢個休息室。不下於所講嘅麗閣邨，喺個表列裏面嘅青衣碼頭、九龍城碼頭同埋呢個長宏總站等等嘅地方，都係有裝咗休息室嘅。

我哋見到其實嗰個積極性係較新巴、城巴係好嘅，其實新巴、城巴，我哋見到多年嚟，好似鯽魚涌呢啲個案係長久以嚟都仲未裝到休息室，涉及當然好多唔同嘅因素嘅問題，但係我哋如果對比起兩間公司嚟講，九巴嗰個情況係較新巴、城巴係積極嘅。當然嗰個休息室嘅面積或者嗰個可能設備未去到最完善，但係基本，微波爐、雪櫃、飲水機呢啲基本嘅休息設施其實係有提供到畀巴士嘅員工去使用嘅。

另外我想補充多一點，就係休息室嗰個問題上，我哋有一個位置面臨緊一個清拆嘅危機，就係尖沙咀碼頭巴士總站，我哋收到海濱事務委員會園境師學會有一份文件，就話就提議就話將尖沙咀巴士碼頭嗰個總站就清拆，而嗰個總站本身牽涉嘅路線係十分之多嘅，而呢一個建議已經喺海濱事務委員會討論咗，而我哋亦都已經去信畀運輸署，要求運輸署解釋幾樣嘢嘅，嗰個總站拆咗之後邊度擺嗰個巴士；第二，就係個總站拆咗之後，員工係冇休息嘅地方嘅，而嗰個總站本身人流以至到車流量係十分之多嘅。

呢啲問題運輸署到而家係未解答到我哋，而我哋都十分之擔心，就係尖沙咀碼頭巴士總站嗰個設施其實係十分之完善嘅，如果佢被清拆的話，第一，嗰度大量路線佢哋個 propose 就係話變做普通嘅巴士站，就肯定冇足夠嘅休息地方畀員工㗎喇。我哋好擔心就係話遲啲會唔會再有其他嘅例子會係咁樣。而我手上有一份係園境師學會嘅文件可以呈畀委員會參考嘅。多謝主席。

主席：（經傳譯員）係咪一份你想我哋睇嘅文件呀？

劉啟謙先生：（經傳譯員）係。

主席：（經傳譯員）你有冇副本？

劉啟謙先生：（經傳譯員）呢個就個副本。

主席：（經傳譯員）而家我哋去影印。

許漢傑先生：唔使影印㗎喇。

劉啟謙先生：我畀咗你。

黃女士：（經傳譯員）唔該晒劉先生。喺你其中一份附件，附件十八，我可唔可以簡述一下你提過啲乜嘢呢？喺你嘅意見書係咁講嘅。

主席：（經傳譯員）首先講頁數。

黃女士：（經傳譯員）係附件十八，係補充文件冊，由工會提交嘅，2018年7月16號提交嘅，入面就有一封信，就係2007年6月28號嘅，中文版本就喺522，應該係260-522，英文就係260-523-22。

主席：（經傳譯員）邊個文件冊？

黃女士：（經傳譯員）係TU文件冊。

主席：（經傳譯員）嘅邊個？

黃女士：（經傳譯員）1(C)。呢封信日期就係2016年嘅11月嘅24號，由你嘅會寫畀運輸署嘅，我淨係有一個問題我有興趣嘅，就係第1.1至1.3段，你就邀請運輸署考慮有一個三方嘅磋商會議去傾下新建巴士總站嘅設計同埋配套問題；喺1.3段，你就話希望署方就有啲常設會議，有巴士公司同埋係工會代表，呢個就係260-513-8頁嘅，即係話有常設會議係有署方、巴士公司同埋工會嘅參與，有恆常會議去溝通、協商巴士業相關嘅事項，其中包括新、舊站頭設施嘅設計。

喺其中一個運輸署嘅回覆，260-523-22，就見到似乎佢哋考慮呢一個建議就唔應該係三方嘅，而係建議你透過巴士公司提出嘅，呢個260-523-22嘅第二段，「喺考慮新嘅巴士總站設計，喺用新嘅意見之外，運輸署亦都會考慮到嗰個情況，譬如係話有幾多條路線、人流方向、有幾多乘客同埋係巴士嘅運作需要咁樣，亦都會係諮詢有關巴士公司嘅意見，睇下佢哋對於個設計有咩關注，如果職方有任何意見嘅，對於巴士總站設計同埋設施嘅話，職方係可以向公司反映，而署方認為現行機制係有效。」

似乎運輸署係拒絕你嘅要求有三方嘅協商嘅會議，係咪咁呀？

劉啟謙先生：冇錯。

黃女士：（經傳譯員）而家講下另一個題目，係年終嘅勤工獎金，我想請你睇番你嘅意見書，第二份，260-94頁，呢個英文版，中文260-57頁，你睇到個文件未呀？

劉啟謙先生：（經傳譯員）睇到。

黃女士：（經傳譯員）而家問你呢個問題，你提到年終勤工獎，係唔係除咗安全同埋良好表現獎之外，九巴係而家提供勤工獎畀車長㗎？

劉啟謙先生：應該咁樣講，安全同埋呢一個叫安全獎金、一個勤工獎金呢啲其實已經係納入咗巴士車長嗰個底薪入面，而文件上面(a)嗰度講緊嗰個係年尾有一份獎金嘅，而呢份獎金九巴已經喺18年承諾咗取消咗呢個年終獎金嘅制度，就改以一個雙糧嘅形式向員工發放。而呢個之前所謂嘅年終獎金係要需要經過一個評核，去評定員工分呢個一、二、三、四同埋無法評級去釐訂嗰個獲取嗰個金額，其實本身係兩樣唔同嘅嘢嚟嘅。

主席：（經傳譯員）2018年九巴係幾時同意取消年終獎金嘅呢？

劉啟謙先生：大約係5月至6月期間係承諾咗取消呢個年終獎金嘅制度，改以一個雙糧嘅制度，而實際通告發出畀員工嘅日期係6月份嘅。

主席：（經傳譯員）你有冇嗰個通知嘅副本呀？即係通知員工。

劉啟謙先生：副本係公司出嘅通告嚟嘅，係喇，可以問到九龍巴士公司攞到，如果委員會係想要一份嘅，我可以提供到畀委員會。

主席：（經傳譯員）唔該。

劉啟謙先生：另外林生佢想補充埋新巴嗰個獎金嘅情況。

林錦標先生：係，新巴同城巴因為同一個管理層，所以就個獎金，安全獎、勤工獎、服務獎就响今年嘅 3 月就已經將佢歸納咗落個底薪裏面，但係响--我再要補充一下，呢個獎金嘅嘢，我哋已經响多年前已經向公司反映嘅，就話呢啲獎金、津貼就係薪酬嘅一部分，係應該係要放落去底薪嗰度去一併去計呢個薪酬嘅，但係奈何新巴、城巴係好--一路都用種種嘅理由就拒絕咗嘅。自從發生咗一件慘劇之後，公司就係話因應個市場先去將呢啲津貼先肯擺落去，我哋對呢個遲來嘅安慰--我當佢安慰獎，即係好過冇喇，因為我哋係多年已經係去爭取㗎喇，唔係話發生事先去爭取，因為我哋係睇到呢個問題係困擾咗啲同事，因為同事個底薪一路都係咁低嘅，所以我哋係希望不斷咁向公司去反映，呢個係我哋嘅補充。其他有冇補充？

劉啟謙先生：黃律師，相關新巴職工會同資方談判提過相關資料，其實附件十七已經有一份會議紀錄詳列咗出嚟，新巴職工會其實喺 17 年已經有同資方提出話將勤工同埋安全獎金納入底薪嗰度，其實已經唔係話一段短時間去爭取，而係長時間去爭取，但係較舊嘅會議紀錄，新巴職工會已經遺失咗，暫時未提供到，但係暫時附件十七嗰份係證明咗佢哋一直以嚟係有同資方係有講呢一樣嘢嘅。

林錦標先生：鍾生有少少補充。

鍾松輝先生：主席，唔好意思，我都想喺呢個問題嗰度補充少少。今朝林生所講嘅，就每個月嗰啲甚麼勤工獎、安全獎嗰啲撥晒落去而家嘅底薪，由 3 月份開始，主要嘅原因就係基於因為大家都知，發生咗兩宗嘅巴士慘劇，公司同我哋講，就係因應嗰個社會個輿論個壓力非常之大，因為我哋底薪係偏低嘅，所以佢就將呢個所有津貼就撥落呢個底薪嗰度。

除咗呢一樣嘢，正話劉生就講緊話年尾獎金，我哋嘅年尾獎金就係有--應該新制同舊制嘅，舊制嘅就係雙糧嚟嘅，就冇任何條件，就雙糧，就係發放一個月呢個年尾雙糧。如果新制嘅同事，佢就要符合公司嘅條件，例如如果你請病假就會畀少啲嘅，根據你全年請咗幾多日病假，係因應你嘅病假、請假或者你有其他被投訴嘅，佢都會扣減你嗰個年尾獎金，所以呢樣嘢就形成對嗰啲前線嘅車長，好多新嘅車長所以就留唔得得耐，有啲做咗一年半載就走㗎喇。

林錦標先生：許生仲有一個補充，唔該。城巴嘅。

許漢傑先生：城巴同新巴有個年尾獎金有啲唔同嘅，城巴有三個制度，第一個制度就係最耐嘅員工，做得最耐嘅員工，嗰啲叫做雙糧；第二批就好似我呢批就係叫做酬金，酬金嘅包含裏面就係有三樣嘢，第一樣嘢係底薪，第二樣嘢就係個

OT，全年嘅 OT 嘅除番 12 嘅三分一，呢個係酬金，呢個係第二批。

第三批就係新，我哋叫做合約車長呢批，就係相當於而家改咗制之後，就變咗一個月嘅底薪。呢個佢哋有評級嘅，其中一個評級就係因為如果佢一年裏面個出勤嗰度會扣，會扣咗譬如係缺勤一日就扣一日，佢個底薪除三百六十五日，就扣一日嘅人工，如是者推論，就係病假好、工傷假好、事假好，佢都係咁樣扣㗎喇。仲有一個扣，就係佢如果喺日常工作有簽--有 warning，有警告信，唯一一個警告信會扣嘅就係最後警告，就會扣。點樣扣法呢？就係如果有一個最後警告佢只係收嗰個年終特別獎金嘅七五折，係底薪嘅七五折，就大致上城巴就係咁樣。

至於呢個年終特別獎金，合約方面，事關城巴由 05 年開始請合約員工，初初係冇年終獎金嘅，但係一路我哋爭取以嚟，到而家都有一個規模，但係喺呢個年終--即係新人嗰個合約個年終特別獎金呢度，我哋有一樣嘢係好反對，就係如果佢因為缺勤而導致要減呢個年終特別獎金嘅人工，我覺得喺我哋城巴職工會嚟講，係覺得唔合理。

點解唔合理呢？就係因為佢有事、佢病或者工傷或者係婚假或者係白事假，佢先至請假，呢個問--有啲呢啲假唔係佢可以控制到。我覺得如果咁樣扣合約同事呢啲人工，我覺得--喺我哋工會立場，更加係唔合理。大致補充完畢。

主席：（經傳譯員）黃大律師。

黃女士：（經傳譯員）我哋有聽過一個制度，係九巴嘅制度嚟嘅，或者郭先生可以幫幫手，就有一個嘅裝置係有四眼燈嘅，就會話畀嗰個司機聽，有四種嘅，譬如話你係超速，就係突然之間剎車、突然之間加速，即係有三個呢啲咁嘅情況出現，...

主席：（經傳譯員）同埋空轉嘅。

黃女士：（經傳譯員）...引擎空轉。郭先生，你記唔記得呢個咁嘅裝置喺巴士上面幾時裝置呀？

主席：（經傳譯員）可唔可以我哋去睇一睇嗰個相關嘅照片？

黃女士：（經傳譯員）係 BM 文件冊第 65 頁。

主席：（經傳譯員）呢個係一個 Openmatics 呢間公司提供嘅文件嚟嘅，佢話畀我哋聽呢個就預警系統係點樣樣，係有四眼嘅紅色燈嘅。

黃女士：（經傳譯員）一個屯門車廠嘅經理話畀我哋聽呢個就係個 LED 嘅燈嘅系統嚟嘅，就會話畀個司機聽如果呢啲其中一種嘅情況出現，佢哋個司機就會通知佢㗎喇。你記唔記得呢個 LED 系統嘅燈光系統喺九巴幾時安置喺個巴士上面嘅呢？

劉啟謙先生：2013年，2013年安裝，開始試驗。

郭偉光先生：2013年。

黃女士：（經傳譯員）唔該晒。佢哋都講到另外一個嘅系統，就如果你就去返工嘅時候、開工嘅時候，你就喺休息室嗰度就拍你個八達通卡，就喺八達通卡嘅讀卡器嗰度就拍一下，佢就會自動就話畀你聽你係一個綠色、黃色或者係紅色嘅司機，你可唔可以確認其實喺九巴就係用緊呢一種系統呢？

郭偉光先生：係嘅。

主席：（經傳譯員）點樣運作嘅呢？你拍卡，其實你通常就會見到啲乜嘢嘢㗎，喺個讀卡器嗰度？

郭偉光先生：通常我開工，去到站頭拍第一下卡，就會有呢個顯示嘅，通常都綠色嘅。

劉啟謙先生：主席，我有補充，其實紅色--有紅色、黃色同綠色，就係根據呢個box所收集嘅數據去評估個車長個駕駛嘅安全情況，而綠色就會同佢哋講話佢哋嗰個駕駛係安全、環保都達標嘅，需要改善就當然係黃色，而唔理想就當然係紅色。

但係我所觀察，之前係出過一個獎勵計劃嘅，就就住呢個盒子出咗一個獎勵計劃，就係統計番車長如果做得駕駛係環保、係達標嘅話，其實係有獎勵嘅，但係呢一個獎勵我已經一段時間都見唔到有呢個獎勵嘅資料出嚟。但係呢個盒子而家係仍然喺九巴嘅巴士係有運作，而頭先黃大律師所講嗰個系統仍然係亦都係存在。

車長其實每一次用佢哋嘅八達通卡去總站報到嘅時候，個電腦螢幕都會顯示個顏色，去提示番個車長個駕駛個表現係咪理想。而我所知，呢個黑色嘅四個燈嘅盒子，其實本身係駁住一個全球衛星定位系統嘅，藉以去監察車長嗰個駕駛嘅表現，從而就得出嗰個黃色、紅色同綠色嗰個數據出嚟。

主席：（經傳譯員）你知唔知道呢個咁樣嘅紅、綠、黃就係指譬如你喺駕駛嘅邊一段時間嘅資料嚟嘅呢？意思即係你係駕駛嗰個日期或者係邊一段嘅期間嘅資料就係...

郭偉光先生：係由開工至到收工嘅工作表現。

主席：（經傳譯員）但係首先你開工嘅時候，你就拍卡，你就會係有呢啲咁嘅燈出現㗎嘛，係咪？

郭偉光先生：係，係。

主席：（經傳譯員）呢個咁嘅展示其實係咪講緊你琴日吖，係過一個星期或者過去一個月嘅表現呢？

劉啟謙先生：其實呢個表現係一個--我認為係一個可持續性嘅表現，因為你每一次其實拍嗰個八達通卡都係會有顯示提醒番你嗰個駕駛係屬於咩嘢顏色嘅，而呢個咩嘢顏色就冇話一個好籠統咁指定一個日子去評核嘅--即係評估，我認為係一個可持續性嘅提示嚟嘅，即係每一次你拍八達通卡喺嗰度報到嘅時候，其實都會顯示嗰個顏色話畀你聽你係乜嘢嘅表現。咁樣呢個表現其實都唔會話特定一個日子或者時間畀你睇到嘅。郭生，有冇補充？

主席：（經傳譯員）有人話畀我哋聽其實係有，係有一段特定嘅日子，如果你唔知道嘅時候，你就話畀我哋聽唔知喇。

郭偉光先生：係，自己個人嘅記憶之中，就係應該係大概一個禮拜，佢提示一個禮拜之前嘅表現嘅日期嘅，有嘅。

主席：（經傳譯員）唔該晒。我哋喺個螢幕上睇到，呢個有四個嘅條件，可能就會係有一啲嘅預警嘅情況，你知唔知道譬如話其實如果個引擎空轉得太耐，就會可能影響到你嗰個顏色嘅，譬如話你喺呢一個巴士站或者嗰個有空轉嘅情況，會唔會有一個紅色燈畀你呢，你知唔知道大致上嘅情況係點呢？

郭偉光先生：係有個聲響提示嘅，同埋有個著燈嘅。

主席：（經傳譯員）我明白嘅，我明白嘅。譬如話你引擎空轉太耐，有燈光，然後同埋有個聲響，會唔會--因為咁嘅時候，你一個星期之後，當你去拍嗰個卡嘅時候，你就會睇到一個紅色嘅燈，係會唔會咁樣發生呢？

郭偉光先生：佢係攞一個平均嘅數據嘅咋，唔會話因為一次半次而會有呢個後果嘅，即係你經常性咁樣發生，佢先至會有一個提示。

主席：（經傳譯員）有冇人話畀你聽其實實際成個系統係點樣去運作嘅呢，嗰啲細節有冇人講過畀你聽？

郭偉光先生：唔知。劉生有冇補充？細節。唔知道，冇呢個解釋嘅。

主席：（經傳譯員）你知唔知道嗰啲數值係幾多，個限值，即係去到幾多就會令到佢有聲響或者會著燈，喺巴士車長嗰個駕駛室嗰度，你知唔知道譬如話係加速或者減速個限值去到幾多就會著呢？

郭偉光先生：我揸過好多唔同嘅巴士，唔同嘅車佢嗰部機嘅反應同埋出嚟嘅效果都唔同嘅，有啲係好敏感嘅，啲啲都會響嘅，例如大腳啲油，例如重少少 brake 或者掂到 brake 嘅時間嘅問題，或者係扭軚過急，佢--有啲車係特別敏感，但係有啲車就冇乜反應，呢個系統嘅效果係反應不一嘅，我嘅感覺係。

主席：（經傳譯員）舉個例，車速，你知唔知道行到咩嘢車速，嗰度個警示就會響？

郭偉光先生：超過 70 係會響嘅，70 公里係會響。

主席：（經傳譯員）即係話你喺一個 50 公里嘅路段，你行緊 60，佢就唔會響，係咪

Transcript by Epiq Hong Kong, Limited

咁呀？

郭偉光先生：行緊50，佢唔會--我未見過佢響囉。

主席：（經傳譯員）呢個系統裝咗五年，即係喺個 50 公里嘅限速嘅路段，佢係冇響嘅？

郭偉光先生：係嘅。

主席：（經傳譯員）唔該晒郭生。

黃女士：（經傳譯員）講番八達通卡個讀卡嘅系統，顯示番紅、黃、綠色，即係司機嗰個顏色係幾時實施㗎？

郭偉光先生：五年前，2013。

黃女士：（經傳譯員）即係當你有呢一個嘅 LED 嘅燈光系統嗰陣時，一齊裝嘅？

郭偉光先生：應該係。

黃女士：（經傳譯員）唔該。講番呢個題目，我有一個問題問你，劉先生頭先就提到你以前有一個獎金嘅計劃，就係根據駕駛表現嘅，而家就似乎就冇呢個制度，係咪劉先生係咁嘅意思呀？

劉啟謙先生：係，冇錯，yes。

黃女士：（經傳譯員）即係個獎勵係點樣㗎？

劉啟謙先生：第一，由於個時間都隔咗好遠，個實際嗰個內容，我個印象已經唔清晰，但係初期推行嘅時候係有個海報--類似海報嘅東西我係見過，就話呢個係一個計劃係提示啲車長去駕駛係環保嘅--個出發點係環保嘅，同埋安全，如果達標嘅話，係會有獎勵嘅，但係就冇--實際嗰個操作同埋嗰個相關 details 嘅內容，我已經忘記咗，但係我係有印象同埋記憶係有提過係話有獎勵呢一個東西喺嗰個盒子入面嘅，但係之後我已經唔再聽見話有獎勵同埋相關嘅內容㗎喇。

主席：（經傳譯員）郭先生，你有冇收過呢個獎？

郭偉光先生：有嘅。

主席：（經傳譯員）個獎係乜嘢呀？係畀錢定係生果，定係咩嘢，畀汽球你？

郭偉光先生：你係講緊係咪個紅、綠、黃燈個表現嗰個？

主席：（經傳譯員）係。

郭偉光先生：應該係一個--同一個即係升級車長嗰個有啲關係。

主席：（經傳譯員）即係唔係金錢，唔係即刻話畀錢你嗰種獎金？

郭偉光先生：唔係畀錢嘅，唔係畀錢。

主席：（經傳譯員）唔該晒郭生。歐陽先生。

歐陽先生：（經傳譯員）郭生，我想問一條問題，你作為車長，你覺得呢個制度對於工作有冇幫助？

郭偉光先生：即係你講而家監察嗰個燈嗰個制度？

歐陽先生：（經傳譯員）係呀。

郭偉光先生：都有。

歐陽先生：（經傳譯員）唔該。

黃女士：（經傳譯員）郭先生、劉先生，你記唔記得呢個嘅獎勵制度係幾時實施㗎？會唔會係你開始有呢個紅、黃、綠嘅制度嘅時候？

劉啟謙先生：第一，嗰個燈號裝嗰個年份，我可以好肯定係 2013 年嘅，因為喺 2013 年我工作期間係初初接觸過呢個燈號，我收到車長有反映過畀我聽話初初佢哋唔習慣呢個盒仔，個聲響好嘈同埋不停咁樣著燈，所以佢哋就係話有唔慣，所以我就好肯定當時裝呢個盒係 2013 年嘅。但係係咪隨住--伴隨住嗰個獎勵制度一齊呢，呢個我已經冇咗嗰個記憶，但係我係有印象係見過係有海報係話有一個獎勵嘅制度，如果佢做得好，係會有獎勵嘅，但係實際嗰個內容同埋獎勵啲乜嘢，我已經冇咗印象。

但係有一點我可以好清楚話到畀主席聽，呢個盒子係 2013 年開始係同我哋講話開始使用，去到而家都仍然係繼續係有用呢個黑色四盞燈嘅盒子。

黃女士：（經傳譯員）如果呢個系統係再實施嘅，就係話有...

主席：（經傳譯員）我哋頭先聽到係咁嘅，講緊有個獎勵可能係升級個問題，但係唔係金錢嘅獎勵。

黃女士：（經傳譯員）如果話有人建議就話係當獎金咁樣發放，係根據司機車長嗰個顏色，如果你持續攞到綠色嘅，即係話你駕駛良好嘅話，就會有獎金，...

主席：（經傳譯員）而家講緊係獎金。

黃女士：（經傳譯員）...錢，如果咁樣建議嘅話，你覺得有冇幫助，有冇用，對於加強車長嘅安全意識，有冇用，有冇幫助？

劉啟謙先生：第一，逢係有獎勵計劃--即係有獎勵嘅嘢，其實喺心理學嚟講，都係一個正面--對車長係有正面幫助。你話會唔會--分兩樣嘢嚟講，首先，如果你話有呢個盒子，個達標綠色而有獎金嘅，車長當然嗰個表現有機會可能係因為有

獎金呢個誘因而令到佢個表現係會提升。

但係有一點我諗要講清楚，就係安全意識係唔會隨住呢個獎金而增加嘅，即使有獎金嘅誘因喺度，如果假設個車長個安全意識係唔足夠嘅，呢個獎金亦都未必有一定嘅肯定同埋幫助改善佢哋駕駛嗰個安全性嘅，但係因為係兩樣唔同嘅概念嚟嘅，一個獎勵當然我覺得一定係有正面嘅鼓勵同埋一個幫助，但係你話會唔會提升佢哋嗰個安全意識呢，其實個人認為單靠呢四盞燈係唔可能完全改變一個人駕駛嗰個安全意識嘅。呢個燈號純粹只係一個提醒同埋一個警剔畀佢哋，而呢個獎勵計劃係有助佢哋可能係會做好少少，但係個意識絕對係唔會因為呢四盞燈同埋有獎勵而提升，不外乎錢或者係其他嘅獎勵。

郭偉光先生：想補充少少，因為我頭先都講過，因為唔同嘅車嗰個設備，係會有唔同嘅反應嘅，有啲車好敏感，有啲車係冇乜反應嘅，如果用呢個嚟鑑定嗰個車長佢個工作表現係有啲粗疏嘅，我覺得應該從其他方面去評核，比較滿意啲。

黃女士：（經傳譯員）郭先生，喺你嘅經驗，有冇遇過有一個車長一路都係紅色嘅呢？即係喺個制度底下，拍八達通卡，一路都係顯示紅色呢？

郭偉光先生：我冇見過。

黃女士：（經傳譯員）我哋聽到九巴一個前僱員嘅證供，就係話有一張好細嘅卡仔係提醒通知啲巴士車長係有二十九個急彎，然後就提供一啲安全駕駛嘅貼士，你記唔記得有冇收過呢張卡仔呀？

郭偉光先生：係冇嘅。

黃女士：（經傳譯員）劉生。

劉啟謙先生：我有補充，卡仔就的確係冇，亦都唔見過有呢啲卡仔，但係其實公司係有相關路段嘅安全提醒係放咗喺公司個內聯網上面嘅，而早期公司對員工係有要求佢哋係睇嗰個安全駕駛提示，係要去番內聯網嗰度睇番，提醒佢哋有啲特定嘅路段可能有危險，要提番佢哋要小心嘅，而嗰啲資料其實包含咗有圖片同埋文字嘅解釋嘅。

如果你話卡仔--話急彎卡仔，我都冇見過，但係路線嘅安全嘅資料其實放咗喺內聯網嘅，係，而家 screen 放出嚟嘅資料就係放咗內聯網裏面，車長係可以查得到、睇得到。

主席：（經傳譯員）你話公司係講緊九巴，係咪呀？

劉啟謙先生：係，冇錯。

黃女士：（經傳譯員）你講唔講到你幾時開始係接觸到呢啲路段嘅喺內聯網嘅資料，係幾時有㗎？

劉啟謙先生：呢啲資料喺我入職大約 13 年嘅時候開始我已經有接觸到呢啲資料，已

經係有，有，一直係有上載，同埋其實大約係兩、三年前嘅，其實都仍然係有更新去搜集番一啲有安全問題或者隱患嘅路段，去擺番喺嗰個內聯網上面進行更新嘅。

黃女士：（經傳譯員）你提到兩、三年前佢哋都仲係更新緊啲資料，而家呢？

劉啟謙先生：而家有冇更新，我唔清楚。

黃女士：（經傳譯員）而家講另外一個問題，襲擊車長，你工會就都好重視呢一個問題，就提供咗好多嘅會議紀錄，喺你嘅意見書亦都有強調嘅，而家請你先就睇番你嘅意見書，就係 260-93 頁，呢個係英文版，中文版就係 260-56 頁，就提到話你哋嘅聯盟一路都有跟進車長被襲擊事件，你就話你嘅紀錄可能唔係齊全嘅，因為只係你嘅聯盟嘅成員通知你，先至會去支援嘅，但係過去聯盟對於巴士車長安全問題，一直同警方進行溝通，然後你就提供咗一個同運輸署嘅會議紀錄，2017年嘅6月嘅，呢個就喺附件十五嗰度。

就喺英文版係 260-73 頁，呢個就係關於乘客襲擊車長嘅，因此你就同運輸署開會同埋警方開會，同埋律政司嗰面開會？

劉啟謙先生：（經傳譯員）係，對。

黃女士：（經傳譯員）我想問一問，你對於譬如話啲監察嘅鏡頭有啲咩嘢嘅意見呢？有啲唔同嘅工會話畀我哋聽，大部分都係同意係就喺司機位嗰度裝置嗰啲嘅監察鏡頭，就可以保護車長同埋可以錄音同埋錄影就係相關嘅事件，你哋嘅工會就會唔會支持，就係話裝置呢啲嘅監察嘅鏡頭？

鍾松輝先生：我哋係同意嘅，同意就裝嗰啲閉路電視嘅，其實就係唔單只保障車長，甚至乎保障埋乘客添，因為有呢個 CCTV，咁可以證明到嗰個事實嗰個真相。

劉啟謙先生：我有少少補充，其實喺警方嘅會議裏面，其實警方都好強調舉證嗰個重要性，好多時車長襲擊呢啲事情都好依靠嗰個舉證，當然有閉路電視嘅片段，當然就可以將個經過可以還原得一清二楚，其一就可以保障到車長，亦都係保障乘客嘅，如果有呢啲閉路電視嘅片段去佐證車長被襲嘅話，我哋相信無論喺檢控，以至去法庭表達嗰個嚴重性上面，係會更加清晰同埋全面嘅。

黃女士：（經傳譯員）唔該。相關嘅...

主席：（經傳譯員）你繼續之前，咁多位，你哋有冇以前試過就喺法庭上面其實就有一啲閉路電視嘅片段就係展示到車長被襲嘅情況，有冇一啲個案你自己親身有經驗㗎？

鍾松輝先生：冇。

劉啟謙先生：冇，no.

主席： Yes, Mr Hui?

許漢傑先生：我有個案嘅，不過就係未有閉路電視嗰陣，不過就係有人證，嗰陣時係有人證證明嗰個乘客打我，就個結果就係佢罰款、留案底咁樣，但係喺我嘅經驗嚟講，如果有鏡頭嘅話，我哋可以唔使依靠去搵證人，事關其他乘客係比較怕事，就唔想去做證人，如果有呢個鏡頭，係會幫到我哋去有佐證，能夠證明嗰個乘客打車長，佢檢控嘅機會我覺得係高，同埋又係對我哋車長嚟講，一個好大嘅幫助。

劉啟謙先生：我有少少補充。我哋其實聯盟一直都同律政司同埋警方強調，我哋相信香港係一個行普通法、有法治嘅地區，舉證嘅責任喺控方嗰度，如果有CCTV作為襲擊車長做檢控的話，當然嗰個效果會更加好。我哋亦都多次同警方同埋律政司表達咗我哋對車長被襲嗰個擔憂，亦都要求咗律政司喺檢控嘅過程必須要同法庭強調車長被襲嗰個嚴重性不下於車長自己本身，乘客，以至其他道路使用者身上。

我哋一直都強調就我哋冇話要干預法庭嘅判刑，但係我哋留意到好多時車長畀人襲擊之後，往往施襲者嗰個判刑係冇阻嚇性，變相帶出一個好壞嘅訊息畀社會知道其實襲擊車長係一個低成本嘅犯法嘅刑事罪行。但係我哋覺得我哋巴士車長係冇理由，亦都經常係不合理地被襲擊嘅，呢樣嘢我覺得係唔應該。

而且法例亦都--230A，《公共巴士服務條例》亦都賦予咗車長有啲職權係法例上容許，亦都係我哋擁有嘅權力嚟嘅，但係調番轉我哋經常都係被施襲嗰一個，而我哋見唔到律政司有同司法機構有強調到打車長呢件事嘅嚴重性，亦都畀社會帶出一個好錯誤嘅訊息，就係其實打車長係一個好平常嘅事，亦都唔需要負刑責，調番轉，法例又如何可以保障到我哋車長嘅安全呢？

主席：（經傳譯員）你係咪同司法機關同埋--對唔住，係律政司同埋警方方面係有反映過你哋嘅意見㗎？

劉啟謙先生：冇錯，喺2017年6月30號嘅會議上面有反映過，我哋反映左兩個重點，第一，就係律政司喺檢控嘅過程裏面必須要同法庭同埋司法機構講得到襲擊車長嗰個嘅嚴重性，同埋對社會嗰個危害嘅問題；第二，就係我亦都同律政司指出，由於呢啲判刑都係輕，同埋車長都攞唔--嗰個帶唔到嗰個阻嚇性出嚟，我哋亦都要求過律政司係話檢控完成之後，應該要積極嘅跟進工作，包括就係同法庭講要上訴覆核刑期，呢啲都係喺我哋個會議紀錄裏面有提過嘅，我哋聯盟其實一直有同律政司重申我哋唔係話要干預呢個法庭嘅判決，我亦都每一次好尊重法庭嘅判決，但係我哋相信法治係香港最成功嘅基石，亦都係一個行普通法地區，呢樣嘢係我哋引以自豪，但係最大嘅問題係律政司嗰個工作上面，我哋見到佢帶唔到嗰個罪行嘅嚴重性出嚟，變相其實車長根本嗰個喺法律上嘅保障其實唔足夠，變相。如果你話係有啲例子，係可以係帶出嗰個嚴重性，判刑係話嚴重嘅，我哋相信係有一個好大嘅阻嚇性。

同埋仲有一點，我哋留意到警察喺處理呢啲被襲嘅案件嘅時候，其實好多時都唔清楚嗰個情況，有好多時車長可能又有嘢手嘅，被誤以為呢個打鬥；亦

都有啲情況下，嗰個警方會主動勸車長「不如息事寧人，和解喇。」我哋亦都有同警方強調過，230A 賦予我哋嘅權力其實係好大，滋擾車長其實係可以將嗰個乘客係移離個車廂度，呢啲係法例賦予咗畀我哋，但係警方好多前線嘅警務人員係唔清楚 230A 個實際嗰個操作嘅情況同埋個內容。

許漢傑先生：我有嘢補充。頭先就住我親身經驗，劉生講咗個情況，就係我喺醫院驗傷嗰陣，當未有人通知警察嗰陣，有證人嗰陣，佢就同我講，警察同我講「你不如和解，唔好搞咁多嘢，和解喇。」當我知道有證人嗰陣，我就同個警察講我要告。

好多時我作為工會理事長，做咗十幾年工會，我見到好多同事遇到呢啲咁嘅情況，警察係真係有叫佢哋「你不如和解，你又冇證人，好難舉證，好難告得佢入，就算告得入，都係罰款了事，對佢冇太大嘅阻嚇性，你不如和解算喇。」但係我覺得呢個情況喺我哋同律政司開會，同警察嘅代表、刑事部門嘅代表開會嗰陣，我哋有強調呢樣嘢，就係話警察本身係要維護一個弱勢社群，一個社群嘅--好似我哋車長畀人打完，你冇可能叫我哋和解。

同埋一樣嘢，就係去到上法庭，律政署嗰邊...

主席：（經傳譯員）許先生，你被襲嗰日係邊一日呀？日期係幾時呀？

許漢傑先生：好多年--十零年前，當我仲做緊通宵車長嗰陣。

主席：（經傳譯員）喺三年前嘅數據，我哋就有--或者有啲相關嘅資料係三年前，但係如果你話咁耐之前就冇喇。黃大律師。

黃女士：（經傳譯員）主席，就為咗紀錄嘅原因，2017 年 6 月 30 號嗰個會議紀錄，佢哋提到嘅，劉生提到，就喺 TU，就係 TU 260-474 至到之後嗰幾頁嘅。呢個就係跟住就係講關於呢個保護罩嗰方面。有一個工會話畀我哋聽就用保護罩其實係有啲問題嘅，我就想問一問郭先生，就特別係九巴方面，我相信呢個係九巴嘅措施嚟嘅。你喺使用保護罩方面，你覺得有冇問題呢？就喺司機位附近裝置呢個保護罩有冇問題呢，你覺得？

郭偉光先生：裝置保護罩係冇問題，但係佢而家所裝置嘅情況係唔理想嘅。

黃女士：（經傳譯員）可唔可以話畀我哋聽點解呢？

郭偉光先生：因為嗰個保護罩涵括嘅範圍太過少，同埋佢太過--嗰個位置唔理想，同埋會有個阻礙視線嘅情況，另外一樣嘢就係個聲音，都有個聲音喺度，有個嘈吵嘅聲音喺度。另外一樣嘢就係有個建議，就應該係成幅過，唔好係得一半，得一半其實保護唔到我哋嘅，佢要打我哋，一樣打到，真係嘅，應該係由上至下會比較理想啲。

劉啟謙先生：呢一個問題林生同鍾生都有補充。

林錦標先生：其實我哋都有關於呢個車長被襲同埋裝呢個防被打嘅裝置，其實我哋响

運輸署都提咗一個意見嘅，因為我本人就曾經就去過英國，睇到英國嘅巴士，就因為我哋香港嘅巴士亦都係個型號亦都係英國嘅，但係英國巴士就係司機位嗰度全部裝晒呢啲--一啲膠片嘅形式嘅，係全部封密晒嘅，即係個司機好似一間房咁嘅，就完全啲乘客係接觸唔到個車長，但係個車長亦都可以睇到出面嘅環境，同埋睇到路面嘅。但係我唔知道呢個系統--即係呢個裝置適唔適合香港，但係我哋响會議提出過建議畀運輸署同巴士公司去考慮。

就九巴呢個裝置，其實佢都係一個試驗性質，其實應該係仲有改良嘅方向嘅，視乎於我哋係用家，提出嘅意見畀番巴士公司去改善佢呢個裝置，因為你巴士公司裏面嘅工程人員係唔知道你哋嗰個情況嘅，只有個用家先知道係嗰個裝置係點樣，將個意見反映番畀佢嘅工程人員或者係反映番畀公司聽，然後去作出改良，可以做到一個良好嘅效果。

其實呢個裝置係幫到司機嘅，不過新、城巴就已經反對咗話做呢一個裝置，因為以新、城巴嘅管理層講就話「你哋司機唔好得罪啲乘客，啲乘客就唔會打你哋㗎喇。」我哋惟有--冇辦法喇，我哋準備畀人打㗎喇已經。即係我哋新、城巴同事見到九巴有咁嘅嘢，我哋都希望，亦都同公司反映，已經公司係答咗㗎喇。我呢度嘅補充就係咁多。

主席：（經傳譯員）喺英國，你話見到咁樣全面嘅一個保護罩，係喺英國喺邊度見到呀？

林錦標先生：响倫敦，甚至係伯明翰。

主席：（經傳譯員）你知唔知道邊間巴士公司呀？倫敦邊間巴士公司用呢一個裝置呢？

林錦標先生：因為我真係唔清楚佢邊間公司，但係我見過佢嗰度就有好多--幾間巴士公司全部都係裝到呢個系統嘅。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）你嘅工會亦都有表達關注，就係用 12.8 米長嘅巴士，佢個後軸有呢一個嘅轉向嘅功能，而運輸署都有回覆嘅，就話會考慮下每個路線係咪適合，同埋要求巴士公司去做路試去確保駕駛係安全嘅，呢封信就係由運輸署回覆嘅，日期係 2017 年 9 月 11 號，即係 TU 文件冊第 260-2、橫劃 4 至橫劃 6 嘅。你嘅工會係咪對於呢一種嘅巴士嘅使用係咪都係仲有關注呢？

林錦標先生：係嘅，因為 12.8 米其實响香港現行個道路方面，因為香港就路窄人多，而用到咁長嘅巴士其實佢個隱憂一定响度嘅。仲有一樣嘢，因為呢個 12.8 米尾輪轉向，當佢轉向嗰陣時，轉彎無疑司機係揸得好舒服，但係因為佢有咁長，其他車輛唔知道你架車會尾輪轉向嘅，只有司機先知有個--運輸署要巴士公司要黏一張紙話畀司機聽呢個係尾輪轉向，但係其他嘅道路使用者係唔知道呢架巴士係尾輪轉向，當佢轉向之下，同一時間有其他嘅車輛貼近咗個巴士，

Transcript by Epiq Hong Kong, Limited

一轉彎，巴士個尾嗰部分就會過咗對方嘅行車線而產生危險。

响情況下，因為正式話交通意外數字暫時可能影響--即係冇咁多數字，但係响一啲位置嗰度，例如一個巴士總站，有啲路面係曾經試過尾輪轉向係掃到其他車嘅，但係--梗係冇辦法喇，一定係輸就輸在我哋，因為我哋過咗對方個火位線。

仲有，而家個道路個路面嗰個闊度根本而家嘅巴士响嗰條行車線裏面，即係每側得半吋位嘅啫，佢因為個--而家係畫咗係 9 呎嘅，而巴士已經係 8 呎半吋，你可想而知我哋架車已經係佔用晒嗰條行車線㗎喇，如果有隔籬有一架大車一齊轉彎的話，一個轉左，一個轉右，同一時間一轉，我哋嗰架 12.8 米就一定掃過隔籬，冇得講嘅，因為嗰條線係咁多，嗰條行車線咁多，一轉之後，個尾就會拂到過去。

因為九巴亦都攞咗一架 12.8 米响一個安全情況下去試，哋咗雪糕筒，去試呢啲 12.8 米轉彎嘅情況，足足响嗰條行車線嗰度係過咗 3 呎位嘅，所以响情況下，我哋同運輸署講，响 12.8 米要試路嗰陣時係希望邀請埋我哋工會，我哋一齊去試，而且用哋咗一啲--即係我哋唔好用其他車輛去試，用一啲雪糕筒擺响度，等佢轉嗰個 90 度彎之下，佢會唔會係撞到其他車輛各樣，但係奈何運輸署就話「因為巴士公司去試咗，唔會叫你哋工會去再試嘅。」

我哋亦都响近期都要求再多一次，關於試路嘅問題，如果去到咁長嘅車，希望同埋工會去畀意見，我哋提出咗一個地點，我哋提咗一個地點嘅，就係响香港灣仔嘅菲林明道天橋轉呢個軒尼詩道，因為嗰個路口一個係左轉，一個係右轉，响嗰度就嚟試呢個 12.8 米，因為同一時間係城巴同新巴都有 12.8 米，如果同一時間有兩架 12.8 米一齊去嗰個彎位，一定出事嘅，因為大家都唔知道--即係响現時嚟講，其他道路使用者係唔知道我哋嗰個 12.8 米個尾輪轉向，所以我哋一路都要求運輸署...

主席：（經傳譯員）林生，我哋就唔係好夠時間，我哋明白你想講咩嘢㗎喇，即係你哋仍然都係關注呢一種長巴士喺香港使用係唔安全，我哋其實明白㗎喇，唔該晒。

黃女士：（經傳譯員）你唔介意嘅話，可唔可以你頭先講話你書面再要求運輸署去做一個重新測試嘅嗰份文件，如果你可以提供畀我哋，就唔該你遲啲提供畀委員會喇。

劉啟謙先生：主席閣下，非常之唔好意思，我哋聯盟就收到運輸署首長級嘅官員來電，就話對於我哋畀咗--一開始畀咗三份會議紀錄委員會非常之唔高興，亦都覺得非常不滿我哋將啲會議紀錄畀會議紀錄，但係我哋覺得畀會議紀錄委員會係有助委員會嘅工作，我哋一樣將過往嘅會議紀錄提交畀委員會，但係 2017 年 8 月之後嘅會議紀錄，運輸署就話佢哋唔會再畀我哋㗎喇。

主席：（經傳譯員）係邊個同你喺電話咁講呀？即係話好不滿你畀咗啲文件畀呢一個

Transcript by Epiq Hong Kong, Limited

委員會呢？係邊個咁講呀？

林錦標先生：當日係我打電話去運輸署，希望佢哋交番啲文件畀我哋嘅，因為我哋仲有--已經係追咗好耐呢啲會議嘅文件，佢一路都話仲有啲部門未交，仲有一啲其他嘢，仲未可以畀到我哋，我話「你儘快畀我哋喇。」佢就--對方其實都講咗，佢話「你哋--委員會叫我哋交，我哋都冇交到，呢啲係我哋尊重你哋工會嗰個私隱，就唔會交畀委員會。」我亦都同佢講，因為如果係畀其他人嘅，我哋係唔會畀會議紀錄，但係如果係畀--係有助調查嘅問題，我哋一定會交，呢個係我哋個立場嚟嘅。

因為我都想講，因為對方係首長級，我亦都唔想公開佢係邊個，因為我唔知會唔會係對佢個前途有問題，所以我真係唔夠膽講，因為我知道對方嗰個真係首長級。

劉啟謙先生：我哋其實好希望委員會係諒解我哋...

主席：（經傳譯員）呢段對話係幾時講㗎？

林錦標先生：响6月嗰陣時--唔係，...

主席：（經傳譯員）你慢慢諗吖。

林錦標先生：响 7 月，今個月嘅--係响 7 月中嗰陣時我去追嘅，因為我哋亦都知道要係等緊委員會叫我哋上嚟嘅。

劉啟謙先生：我代表我哋聯盟再一次向主席你講抱歉，我哋好盡力去搵主席所要求嘅文件，但係何奈我哋真係得唔到，交唔到畀委員會參閱，我哋真係非常之抱歉同唔好意思。而之後我哋仲會有會議紀錄收到--我哋都唔敢想會唔會再有會議紀錄收到。

主席：（經傳譯員）唔該晒，你已經提供過畀我哋嘅會議紀錄。黃大律師。

黃女士：（經傳譯員）唔該晒。各位，最後我要問嘅就係呢一個嘅實務守則，即係最近運輸署發出嘅實務守則，我哋最近就知道運輸署係發出過一份實務守則，就畀專營巴士公司，係畀巴士車長培訓，就係唔同嘅公司統一嘅培訓方式嘅，同埋就有一個框架係點樣培訓巴士車長嘅，就話擬定喺 2018 年 10 月會實施，就有個工作小組，係因為喺 2018 年 2 月大埔巴士意外之後成立而提出，所以有個咁嘅框架嘅。呢一個工作小組就有五個嘅巴士公司代表、巴士廠代表同埋係運輸署嘅官員嘅，而最近佢哋就通知咗我哋已經係發出咗實務守則。

我個問題係咁嘅，有冇畀過一份呢個實務守則畀你個會呀？

林錦標先生：冇。

劉啟謙先生：Excuse me，我哋收過委員會其中運輸署嘅回覆--運輸署答回去嘅信件我哋係有睇過，但係如果你話有冇嗰個實務守則，可以--係一本吖，定係--

如果係一本的話，我哋就冇收過，我哋只係收過委員會畀我哋運輸署有關車長培訓嘅回覆嘅信件啫，其他資料我哋冇收過。

黃女士：（經傳譯員）唔該劉生，我哋都冇收過。我再問下呢一個實務守則，之前有冇諮詢過你哋所有呢個實務守則嘅內容呢，關於係培訓巴士車長嘅，譬如話運輸署或者巴士公司有冇諮詢過聯盟將來培訓巴士車長有咩嘢題目咁，有冇諮詢過？

劉啟謙先生：第一，我哋都係從委員會得知運輸署原來係成立咗一個工作小組係有巴士製造商同埋巴士公司嘅持份者，我哋都係從委員會嘅作供先得知有呢一個嘅工作小組，而我哋其實喺 5 月份有同運輸署一次會議裏面，要求過運輸署將我哋工會係加入嗰個工作小組入面，因為其實講嘅內容都同我哋工會係有關係嘅，但係運輸署當然就冇答應我哋話將我哋加入去喇。而呢份所謂實務守則其實由制定以致個內容，我哋一直都冇參與過，而所謂嘅工作小組都係從委員會嘅作供先至得知有呢一個工作小組嘅存在，其實所有佢哋嘅工作都係冇諮詢過我哋。

我哋得知之後，其實已經好緊張話「你哋唔可以話唔諮詢巴士工會㗎喎。」但係何奈佢一個諮詢、一個問題都冇同我哋講過，冇問過我哋任何意見。

主席：（經傳譯員）你向運輸署提出呢一個要求嘅時候，你係咪用書面提出㗎？

劉啟謙先生：我哋喺 5 月份有同運輸署進行一次跨部門會議嘅，就係喺運輸署嚟完聽證會嘅翌日，我哋係有同佢係開過一次會，就就住嗰個工作小組，其實我哋即時有同佢哋講話「可唔可以加埋我哋入嗰個工作小組入面呀？」其實署方嘅回應都係話「工作小組都係工作都係嗰啲成員」，就冇正面回應過會唔會加我哋入去，而實務守則其實喺會議上亦都冇任何提過話有呢一樣嘢，亦都冇諮詢過我哋，我哋係喺嗰個會議，而嗰個會議嘅會議紀錄正如頭先所講，我哋係冇嘅。

主席：（經傳譯員）所以你唔係用書面提出嘅，你就係一個會議嗰度提出，就係用口頭提出嘅，係咪咁呢？

劉啟謙先生：係，冇錯。

主席：（經傳譯員）你自己有冇寫低啲會議紀錄㗎？

劉啟謙先生：我哋有--同事係有記錄低個內容，其實呢啲會議每一次都係由運輸署負責畀番個會議紀錄我哋，而我哋自己其實有一個手--即係 write down jot notes 嘅紀錄喺度，但係唔係一個 formal 嘅會議紀錄嚟嘅，但係有 jot 低啲重點嘅內容，而每一次其實都係運輸署會派員去記錄同埋做個會議紀錄畀番我哋。

主席：（經傳譯員）你呢個會你寫低咗啲咩嘢重點，或者你都可以提供畀我哋，得唔

得呢？

劉啟謙先生：主席，我要返去同同事整理一下，可唔可以事後補番畀主席閣下睇番呢？

主席：（經傳譯員）如果你咁做，就會對我哋有幫助嘅。

劉啟謙先生： Thank you very much. Thank you.

黃女士：（經傳譯員）唔該晒，主席，我嘅提問就到此為止。

主席：（經傳譯員）各位，就我哋就係完結㗎喇，提問嘅部分，你有冇啲最後嘅一啲結語？如果你冇乜特別嘢講，都可以唔需要嘅。

鍾松輝先生：我哋聯盟想強調一個立場嘅，就住運輸署制定嗰啲巴士工作指引，嗰個工作指引，呢個指引當然唔係一個法例，但係就對巴士公司係有一個規範嘅，而呢一個指引亦都係對我哋啲員工亦都有直接嘅影響，因為佢嘅指引就都牽涉到我哋啲持份者、啲員工嘅，如果運輸署就住今次嗰個指引，就住嗰個特別更呢個指引，而呢個指引佢仍然係維持十四小時，繼續令到我哋啲車長疲勞駕駛不特只，佢仲係將中間嗰三個小時休息，而冇作出任何嘅指引落去，即係意思就係話應該係薪酬直落計，但係運輸署就不負責任，就唔提供呢一個指引，變相我哋時間就用咗十四小時，但係我哋就收唔到十四小時嗰個薪酬，佢個指引所講話唔少於三小時，即係意思可以多過三小時，根據指引。

如果個巴士公司--其實根據指引，佢可以畀夠六個小時你休息嘅，多過三小時吖嘛，咁就變咗我哋啲前線車長就得番八小時嘅薪酬，其他嗰啲就正如前日咁講，$21.90一個鐘，呢個我哋覺得運輸署就非常之不負責任。

其實我最想強調，因為呢個專營巴士公司係牽涉到一個公共服務嚟...

主席：（經傳譯員）唔好意思，鍾生。就黃大律師，城巴係咪講過就話有特別更，佢哋建議就唔係話純粹係一個津貼嘅呢一個嘅工資，而係話真係一個正式嘅時薪嘅？

黃女士：（經傳譯員）係，佢哋係真係咁講。

主席：（經傳譯員）好明顯九巴就係嗰個工資就係唔同喇。

鍾松輝先生：我想補充少少嘅，而家我所講就係運輸署嗰個指引嗰個內容，就唔係個別巴士公司去提供嗰個薪酬計算方法，而因為根據嗰個指引，巴士公司係完全可以唔畀薪酬㗎，嗰個休息時間，就算新巴、城巴今日應承咗我...

主席：（經傳譯員）呢個運輸署嘅指引其實就唔係話針對關於個工資個問題，係咪你建議就話呢啲指引應該都係涵蓋工資嘅呢個範疇呢？

鍾松輝先生：冇錯，我想...

主席：（經傳譯員）運輸署就話「工資嗰方面其實就係巴士公司同埋呢一個司機之間嘅問題，就唔係我哋嘅責任嚟嘅。」佢哋就係咁講嘅。

鍾松輝先生：係，冇錯，我覺得指引係佢哋制定嘅，佢哋係有責任嘅。我仲想強調一樣嘢，因為專營巴士服務係屬於一個公共服務嚟嘅，係牽涉到--係影響到呢個公眾利益，因為如果你處理得唔好，係全香港嘅市民都受到影響嘅。我舉個例，當年香港政府就住公務員貪污，佢都高薪養廉，佢都有個政策令到唔可以有影響到呢個公眾利益，你運輸署制定嘅指引，但係佢就不負責任咁淨係符合巴士公司嗰個所謂要求，就唔理到我哋嗰個生計，我哋對呢個非常不滿。同埋十四小時絕對係唔夠時間休息嘅。

主席：（經傳譯員）我哋明白㗎喇。劉先生，你係咪都係就呢一點想講多少少呢？

劉啟謙先生：其實我哋...

主席：（經傳譯員）係總結嘅。

劉啟謙先生：兩分鐘。其實好簡單，巴士、電同水呢啲都係公營事業，牽涉到公眾利益，當然我哋明白特首委任三位做委員會，就係因為牽涉到重大公眾利益，但係運輸署仍然都唔將呢個公眾利益放喺首位，仲縱容呢個疲勞駕駛，仲縱容唔理嗰個工資低嘅問題，其實巴士公司嘅生意嘅數目，其實政府運房局係有監察同監控，政府係全權咁介入緊專營巴士嗰個收入、支出，加價都要政府批准，都要經過交諮會、行政會議，政府早已經係完全咁樣插入咗巴士公司嘅管理入面。我哋睇唔到理由畀運輸署推搪，淨係整個指引，但係就唔理薪酬，容許我哋仍然係長工時、人工低呢個慘況。

而我哋同事亦都提過工資指引畀運輸署參考，用一個科學同埋一個實際嘅數據去釐訂個薪酬，保障巴士嘅員工。巴士業要有足夠嘅人手，先至可以提供到適切嘅服務，每一樣都係唇齒相依嘅，如果遺漏，淨係講工時，唔講嗰個人工低，其實冇用嘅，同安全呢樣嘢係完全談唔上，係掛鈎嘅呢樣嘢。有足夠嘅車長工作，先至提供到服務，車長先至會有足夠嘅薪金，就唔會長時間駕駛，唔會疲勞，唔疲勞，其實安全嘅問題就減低。

我最後想補充一樣嘢，就係我哋看待呢一個係一個責任，唔係一個工作，而家就調番轉，我覺得巴士司機就係一個工作，接載乘客啫，但係背後個責任其實好大，所以我希望主席會明白。

多謝主席。

主席：（經傳譯員）多謝你嘅總結嘅，就多謝你，你兌現咗你嘅承諾，就係用兩分鐘就夠喇。好，我哋就暫時停止，我哋會休會，應該係下個星期二會繼續嘅，我哋就會聽取其他嘅證供，多謝咁多位今日出席，唔好意思，就你哋要再一次返嚟，多謝你哋嘅耐性，我哋而家就係休會嘅。

EVIDENCE FROM KOWLOON MOTOR BUS CO (1933) LTD AND LONG WING BUS CO LTD: DR NORMAN LEUNG, DR JOHN CHAN, MR ROGER LEE, MR GODWIN SO, MR LEUNG KIN WANG, MR PATRICK PANG, MR JAMES WONG

(evidence given in Cantonese; transcription of simultaneous interpretation unless otherwise indicated)

CHAIRMAN: Dr Leung, gentlemen, thank you for helping the invitation of the committee to give evidence to assist us in our duties. I understand, Dr Leung, that there is an initial statement that you wish to make, so we will hear from you then, after which I will ask Mr Duncan, who is one of the counsel assisting the committee, to pose questions to you.

It may be that one or other of your colleagues is better equipped to answer questions, and I leave it to you to indicate if that's the case and to give way to that colleague. If you can nominate who it is, that would assist us. But perhaps I could invite you first of all to make your opening statement.

Opening statement by DR NORMAN LEUNG

DR NORMAN LEUNG: (In English) Thank you.

Good morning, Mr Chairman and members of the committee. May I say from the outset that we were and still are very sorry about the tragic incident that

occurred on Tai Po Road on 10 February 2018.

On 11 February 2018, I took chairman's action to form a special committee of the board of directors comprising Dr John Chan and Mr Andy Tsang as members and I as the chairman, to conduct an investigation into the incident and to come up with recommendations on bus safety.

The special committee has held a number of meetings with KMB/Long Win management, representatives of two trade unions two bus manufacturers, ADL and Volvo.

The special committee produced a report on 12 March 2018, setting forth therein a number of recommendations to enhance bus safety. This report was submitted to the Commissioner for Transport on the same date and the same has also been submitted to this committee.

On 10 April 2018, we reduced into writing our action plan to implement the recommendations set out in the report dated 12 March 2018, and yesterday we submitted to this committee an update on the action plan, stating therein actions taken by our management to execute the recommendations up to the end of July 2018.

Mr Chairman and members of the committee, my colleagues and I have come before you this morning with a humble heart and with proactive attitude. We know that we are duty-bound to offer safe bus services to our

passengers and we welcome any recommendations that would enhance bus safety. Subject to technological and financial feasibility, we would be glad to implement your recommendations.

Thank you, Mr Chairman.

CHAIRMAN: Thank you, Dr Leung.

Yes, Mr Duncan.

Examination by MR DUNCAN

MR DUNCAN: Thank you, Mr Chairman.

Good morning, Dr Leung, and gentlemen.

I would firstly like to echo the chairman's remarks by thanking you for your attendance today, and also for providing a very significant amount of written material to the committee for its consideration.

There are some areas where clarification or further assistance would be appreciated, and it is in that respect that I have a number of questions for you.

I appreciate that you are representing both the Kowloon Motor Bus (1933) Ltd and also Long Win Bus Company, but if it is in order and just to ease matters, I will refer generally to both entities as "the company"; it will make things easier.

If, however, at any point you wish to distinguish between the two entities, please feel free to do so.

If I could firstly raise one point, just from your

opening remarks, Dr Leung.

DR NORMAN LEUNG: (In English) Yes.

MR DUNCAN: I am looking at the fifth paragraph of those remarks, where you referred to the production by the special committee of 12 March this year, following the tragic accident at Tai Po. It is said in your remarks that that report was submitted to the Commissioner for Transport on the same date, and that the same has also been submitted to the committee.

Are you aware that certain portions of that report were withheld from the committee?

DR NORMAN LEUNG: (In English) Yes, the redacted portion, relating to the traffic accident, yes.

MR DUNCAN: Thank you. Could you perhaps turn to the copy of the report that is in the bundles. We will find this in file KMB-1 at page 98.

You will see at that page the front --

DR NORMAN LEUNG: (In English) What page are we on, Mr Duncan?

MR DUNCAN: I'm just taking you to the report itself.

CHAIRMAN: Page 98.

DR NORMAN LEUNG: (In English) Yes.

MR DUNCAN: You will see the cover of the report, and then if you turn the page through to page 99, you will see a table of contents. You will see the table of contents

at page 99.

DR NORMAN LEUNG: (In English) Table of contents, page 99, yes.

MR DUNCAN: The portions which are of interest to the committee, which are being withheld, are part 2, accident regulation report, and part 3, issues relating to bus captains.

Issues relating to bus captains is obviously a matter of central importance to the operation of this inquiry, and I'm simply going to make a request of you as to whether you would consider releasing to the committee both parts 2 and 3 for the committee to consider, of course within the confines of its terms of reference.

You may wish to discuss that with your colleagues, but I'm simply making that request of you and ask you to consider that, please, perhaps after the hearing today.

DR NORMAN LEUNG: (In English) Specifically you are referring to part 2, accident investigation report?

MR DUNCAN: Correct.

DR NORMAN LEUNG: (In English) As well as part 3, issues relating to bus captains?

MR DUNCAN: Correct. If you look at pages 102 and 103 of the bundle, you will see that that information is being withheld.

DR NORMAN LEUNG: (In English) Yes.

MR DUNCAN: And no doubt a position was taken on that.

DR NORMAN LEUNG: (In English) Yes.

MR DUNCAN: But I am asking you to reconsider that with your colleagues, not right now but during the course of these proceedings.

DR NORMAN LEUNG: (In English) In that connection, may I please ask whether this information would be submitted for the consideration of this committee or would it become public information? I have to know that.

CHAIRMAN: All information that this committee receives is on the basis that it becomes public, if the committee deem it appropriate.

DR NORMAN LEUNG: (In English) Thank you, Mr Chairman, for that clarification.

I will consider your request.

MR DUNCAN: Thank you, Dr Leung.

Sticking with this file, KMB-1, could I ask you to go, please, to page 31.

DR NORMAN LEUNG: (In English) Page 31. Yes.

MR DUNCAN: Just to put this page in context, this is an extract from the initial submission made by Kowloon Motor Bus, by the company, in response to the committee's request for information.

DR NORMAN LEUNG: (In English) Yes.

MR DUNCAN: If you just want to put it in context, if you go back to page 1 of the bundle.

DR NORMAN LEUNG: (In English) Page 1?

MR DUNCAN: Yes.

DR NORMAN LEUNG: (In English) Yes.

MR DUNCAN: You will see a letter from the secretariat of the committee dated 28 March 2018.

DR NORMAN LEUNG: (In English) Yes.

MR DUNCAN: If you go through the following pages, you will see that the committee has asked for information relating to a number of specified matters.

DR NORMAN LEUNG: (In English) Yes.

MR DUNCAN: Then if I take you to page 31, you will see at the top of the page one of the questions which was posed by the committee:

"Please identify and supply copies of:

(iv) any codes of corporate and social responsibility published by your company."

DR NORMAN LEUNG: (In English) Yes.

MR DUNCAN: I am interested in the first of the three components, which appears in paragraph 2 of the answer. Do you see the component described as a key component, "Safety"? Perhaps I can just read that out for the record. You have said:

"The three key components of our [corporate social

responsibility] have been listed on the corporate website:

KMB and LWB are committed to providing customers with a safe, reliable and comfortable bus service, which gives value for money. KMB and LWB continue to invest heavily in improving the safety of its bus operations by providing intensive training to its staff, strengthening performance monitoring procedures, implementing reward schemes, improving bus design and promoting passenger safety both internally and to the public."

What I want to do, Dr Leung, is, concentrating on the implementing of reward schemes --

DR NORMAN LEUNG: (In English) Maintenance?

MR DUNCAN: Reward schemes. Do you see the reference to "reward schemes"?

DR NORMAN LEUNG: (In English) Yes.

MR DUNCAN: I want to ask you a few questions, please, with regard to what schemes currently exist relating to the safety performance of bus drivers. Do you understand that?

DR NORMAN LEUNG: (In English) Reward schemes, improving bus design -- okay.

Godwin, would you please answer the question.

MR DUNCAN: I haven't really asked the questions yet. I'm just indicating the matters I'm going to pursue. That's

the topic I am going to pursue with you and your colleagues.

CHAIRMAN: And mr So will be dealing with the questions?

DR NORMAN LEUNG: (In English) Yes.

CHAIRMAN: Thank you.

MR DUNCAN: In that respect, can I ask you to turn to page 108 of the bundle.

DR NORMAN LEUNG: (In English) 108?

MR DUNCAN: Yes.

DR NORMAN LEUNG: (In English) Yes.

MR DUNCAN: We see at paragraph 29 on that page that on 21 February 2018, KMB and LWB announced that safety bonus and good service bonus would be incorporated into basic salary, effective from 1 March 2018. There is reference then to table 2, table 3 and table 4, which set out the pay structures before and after the salary optimisation.

DR NORMAN LEUNG: (In English) Yes.

MR DUNCAN: And you will see the tables by turning the page, finding those at 109 and 110.

I notice that this change was announced on 21 February, which was just 11 days after the accident in Tai Po. My question is: was the occurrence of the accident a factor in the announcement of this change?

DR NORMAN LEUNG: (In English) Thank you, Mr Duncan. Thank

you for your question. I'm glad I have an opportunity to make a clarification on this point. In fact, last November, when there was unfortunately a traffic accident happened in Sham Shui Po, involving casualties and injury to a number of passengers, I noticed from the newspaper report that our monthly rated bus captains at the time were earning a salary of less than $12,000 a month. It was just under $12,000. Then -- in fact, this is my initiative -- I said to myself that something had to be done about it.

So I examined the pay structure of the monthly rated bus captains, and I noticed each month that apart from the basic salary and safety bonus of $18,000, as well as --

CHAIRMAN: 1,800?

DR NORMAN LEUNG: (In English) 1,800, I beg your pardon, 1,800 -- thank you for your correction -- as well as a safety performance bonus of another 1,800, were paid.

Then I decided that we can perhaps enhance the remuneration structure. So at the board meeting in December, the board approved that the safety bonus as well as the performance bonus totalling $3,600 be incorporated into the basic salary. That's the first thing.

And the second thing, because the overtime payment

was formerly based -- was made by reference to the basic salary at the then rate of less than $12,000 per month, so, as a result of incorporating this bonus amount into the basic salary, the overtime payment would likewise be increased by reference to the new basic salary rate. That was another reason.

So, to cut a long story short, after this enhancement, the monthly rated bus captain will receive a basic salary of about $15,400 a month, and likewise the overtime payment will be increased accordingly. Thirdly, the annual bonus which was previously set at $12,000 per year would likewise be increased to the new level of over $15,000.

So that really enhanced the pay of our bus captains.

The decision was made in December with a view to implementing such new rate of pay in March, on 1 March, but unfortunately this tragic incident happened in February, so it was misinterpreted by some people that we adjusted the pay because of the traffic accident. It had nothing to do with it. It was actually decided at my own initiative at the board meeting in December, Mr Duncan.

MR DUNCAN: Thank you, Dr Leung.

CHAIRMAN: Dr Leung, you referred to the Sham Shui Po accident as having occurred in November. Do you have in

mind the accident that occurred on 22 September 2017?

Mr So.

MR GODWIN SO: That accident that happened on 22 September was in Cheung Sha Wan.

DR NORMAN LEUNG: (In English) I stand corrected.

CHAIRMAN: Well, perhaps you are not corrected. Was it the November accident and, in which case, what was the date?

MR GODWIN SO: There was no accident in November. Our action was in response to the accident that took place in September in Cheung Sha Wan.

MR ROGER LEE: Sham Shui Po.

CHAIRMAN: 22 September?

MR GODWIN SO: (In English) Yes.

CHAIRMAN: Thank you.

MR ROGER LEE: I would like to add, talking about bonuses, at that time we felt that bonuses were actually a pressure on bus captains. We did not think that bonuses was a kind of incentive. Bus captains would be under a lot of pressure if they were given bonuses and it might not be appropriate. That is why the board decided that the bonuses be incorporated into basic salary.

As the chairman said just now, there will be a points system for paying salaries. I think that has been covered, and I think Mr So will tell you more about

the present situation.

MR GODWIN SO: Our company does have rewards to encourage bus captains to pay attention to bus safety. We used to have safety bonuses, and in 2016 we changed it to a kind of star bus captain reward. Within a certain period of time, if there is no accident record and if there is any compliment from passengers, then the bus captain will receive different rewards. If they are within 15 years, it would be one star. If it is 15 to 29 years, if there is another good record, they will be given another star, and then in the end they will be given a grand star.

Also, in December each year, we have an annual gathering in order to give recognition to bus captains with good safety records. This is the star bus captain scheme.

CHAIRMAN: Does this scheme still operate?

MR GODWIN SO: Yes, it is still operating. It is going on.

CHAIRMAN: Thank you.

MR DUNCAN: Thank you, Mr So. I'm going to ask you a few more questions about that reward scheme in a few moments. It's something which has been included in the information you provided us.

Just keeping with the removal of the safety bonus for a moment, Dr Leung, you told us that the announcement -- the new scheme was resolved at a board

meeting in December. Is there any reason why it wasn't announced until 12 February?

DR NORMAN LEUNG: (In English) Well, it was approved by the board in December, I think 22 December, and then the management would take time to implement the new pay structure. In fact, I understand from the managing director the proposed day of implementation would be 1 March of this year.

MR DUNCAN: Prior to this change, during the time when the safety bonus existed, how was the awarding of the safety bonus determined in any particular individual case?

MR GODWIN SO: In the old safety bonus scheme, we looked at a few indicators. First, whether there was any accident that was committed by the bus captain, whether it was liable, and whether there was unsafe driving. Then there would be the safety bonus of $1,700. Then, if he performs well within half a year, the bonus which was withheld because of a poor record will then be disbursed and this is controlled by the operations department.

MR DUNCAN: Do I understand from that that it was restricted to whether or not the person had been responsible for an accident?

MR GODWIN SO: The company also has plain clothes inspection and we also rely on complaints from passengers. From these channels, we will know whether the bus captain has

engaged in unsafe driving, and then the safety bonus will be used as a kind of disciplinary action, to discipline bus captains who commit unsafe driving.

MR DUNCAN: Prior to this change, when the bonus system was in place, what proportion of your drivers received the full bonus?

MR GODWIN SO: When we had the safety bonus, 90 per cent of our colleagues would get a full bonus. Those who would have the bonus deducted or delayed, they would account for less than 10 per cent.

MR DUNCAN: During the course of the committee's deliberations, and no doubt taking up some of your management time, we have learned that technology can detect such things as speeding, excessive braking, excessive acceleration, those sorts of factors. Were any of those factors taken into account when the old safety bonus was in existence?

MR LEUNG KIN WANG: At that time, the safety bonus only focused on the disbursement of the bonus after an accident. The daily performance is covered by other bonuses, like the good service bonus.

MR DUNCAN: Thank you. Can I refer you now, please, to page 77, where these reward schemes to which you have already referred are set out. The question that the committee posed, at the top of page 77, is this,

"Remuneration packages":

"Is there any reward system for bus captains with good performance (and/or with low accident records)?"

The first of these is described as the "Safe Driving Award". Can I ask: how long has this been in place?

MR LEUNG KIN WANG: The safe driving award has been there for many years. It was like one or two years ago we replaced it with the star bus captain scheme.

MR DUNCAN: Does it no longer exist?

MR LEUNG KIN WANG: We have replaced it with the star bus captain scheme so it no longer exists.

MR ROGER LEE: Let me explain clearly. This scheme still exists but it was like a sheet of paper, it is a kind of certificate, but now we call it the star bus captain and we use gold and silver, real gold and silver to reward the bus captains, so they feel it more strongly because this can be tagged to their lapel.

MR DUNCAN: Is the safety aspect of this award restricted solely to responsibility for accidents or otherwise?

DR NORMAN LEUNG: (In English) The criteria for the award?

MR DUNCAN: The criteria, yes. Is anything taking into account apart from the fact that the driver is accident-free, so to speak?

MR GODWIN SO: In the past, yes, you are right. The award was about zero liability. In other words, the bus

captain does not have to bear any responsibility in accidents. In other words, for five consecutive years, if the bus captain did not get himself involved in any liable accidents, he would be sort of commended in the form of a certificate.

MR DUNCAN: And there is no financial reward involved in this award; is that correct?

MR GODWIN SO: You are correct, no bonus.

MR DUNCAN: Could I then turn to the outstanding service award. Does any component of the outstanding service award depend on safety performance?

MR GODWIN SO: Perhaps. You may want to turn to annex 9c. So, other than the bus captains, all other staff members are covered by this outstanding service award.

MR DUNCAN: You are saying it's not restricted to bus drivers? Thank you. My question, though, is in the context of a bus driver, is whether he drove safely or not a matter which is taken into account in deciding whether he should be awarded an outstanding service award?

MR GODWIN SO: Well, in the case of an outstanding service, say for example he has helped a passenger, then he will be given this award. But prior to giving him this award, we will also check whether he has a safe driving record. If he has, and if he served passengers well,

then he will get this outstanding service award.

MR ROGER LEE: In other words, this is mainly about the service, say what he has done, say how he has helped a passenger, his attitude towards passengers. Of course, it may also be related to his safety performance, but it is mainly about service, because bus captains, in the course of driving, they are very good in terms of their attitude towards the passengers. So this is about outstanding service and it covers not just bus captains but also terminus supervisors, regulators, as well as the bus stop assistants.

MR DUNCAN: So keeping with the bus driver and reflecting the fact that he might have been helpful to a passenger, that aspect of bus safety, would the fact that he had driven without any accident for which he was responsible also be taken into account?

MR GODWIN SO: Well, let me say this. For his driving behaviour, he will be given the safe driving award, so it is a matter of zero accident and depending on the duration involved. Then, for the outstanding service award, for BCs and non-BCs, if they put up a good service, they will be awarded. But prior to giving the award for bus drivers, there is a prerequisite, that is he must have a good driving record, because, after all, it is an award.

I gave an example of helping the passengers. I was sort of citing an example. I just wonder if you can go to the document annexed as annex 9c. I think it would be illustrative.

MR DUNCAN: Certainly. If we go to 9c-2. You find that at KMB-9 at page 3853. Is that what you are referring to?

DR NORMAN LEUNG: (In English) Outstanding service award. Okay.

MR GODWIN SO: As I think you can see from the screen, this is to recognise staff members' contribution and outstanding performance. Nomination is by directors and department heads. So this is for everyone.

MR DUNCAN: A few moments ago, you mentioned that it would depend on a good driving record. Do you mean by "good driving record" accident-free?

MR GODWIN SO: Let me clarify. For the first one, that's the safe award, we have to check the accident record. For this one, this is about the outstanding service. When it comes to outstanding service, we will also check whether he has got a good driving record before he would be nominated to be given this award which is outstanding service award.

MR DUNCAN: Thank you. My question is does "good driving record" mean no accident for which he was responsible?

MR GODWIN SO: Not all.

MR DUNCAN: What else?

MR GODWIN SO: Other than accidents, there may be complaints by passengers, and then of course internally we have got plain-clothed inspectors checking on the drivers to see if they have a good driving record.

MR DUNCAN: Thank you. Does this outstanding service award carry with it any financial reward?

MR GODWIN SO: No, no financial reward.

MR DUNCAN: This is simply again a certificate, is it?

MR GODWIN SO: Correct, a certificate, sort of a commendation.

MR DUNCAN: Thank you.

Now let's turn to the next one on page 77, star bus captain, about which you have already given very clearly some information this morning.

What criteria are taken into account in the award of a star to a bus captain?

MR GODWIN SO: Maybe the secretary can go to annex 9c-3.

MR DUNCAN: KMB-9/3858. Thank you.

MR GODWIN SO: Please go to another page.

Yes, this is the right one; please stop here.

Under this scheme, first of all, a good service record and a good accident record.

DR NORMAN LEUNG: (In English) Page 3864.

CHAIRMAN: In which page of the bundle is this to be found,

Mr Duncan?

MR DUNCAN: The original, which is in Chinese, is at 3864.

DR NORMAN LEUNG: (In English) Page 3864.

MR DUNCAN: The translation?

DR NORMAN LEUNG: (In English) In Chinese.

CHAIRMAN: 3865-1?

MR DUNCAN: 3865-7, I think.

CHAIRMAN: Thank you.

DR NORMAN LEUNG: (In English) There's an English version on page 3865-7.

MR DUNCAN: Thank you.

We have that. Is there anything you want to bring to our attention there?

MR JOHN CHAN: (In English) If I may supplement, this is a scheme which was devised to recognise in particular good bus captains, and the number of awards every year was very limited; it was only two or three every year.

This was a very specially designed scheme for recognition and incentivising of good bus captain performance.

MR DUNCAN: Thank you. Did this contain any financial reward?

MR JOHN CHAN: (In English) No.

MR DUNCAN: Let's go to the next matter on page 77 and back to KMB-1, "Career path for [bus captains] with

outstanding performance".

If I could just ask this question. The promotion from bus captain to bus captain II, would that involve an increase in a bus captain's salary?

MR GODWIN SO: Yes.

MR DUNCAN: Likewise, from bus captain II to bus captain I, would that also result in an increase in the salary of the bus driver?

MR GODWIN SO: Yes.

MR DUNCAN: I think the details of that we can see on the earlier pages to which you referred us when looking at the bonus. I won't take you back there.

I think we can see from the bottom of page 77 the criteria which are invoked for that particular career path, so no accident or disciplinary warnings and good attendance in the past two years.

Is that correct?

MR GODWIN SO: Correct.

MR DUNCAN: Thank you.

Let's go then to the last of these matters, on page 78, the annual performance bonus. It is said on this page that the bonus is paid twice a year and it is linked with BC's performance. Just now is it linked with the bus captain's performance?

MR GODWIN SO: It covers a number of points. First of all,

the driving record and whether he has been disciplined, and then his attendance record. By "attendance", I mean he hasn't had any record of absent without permission, because that would affect the service stability.

So there are three main elements.

MR ROGER LEE: If I may also supplement. Just a few months ago, we made a change. We have got a 13th month salary. In the past, there was an assessment once every six months; there was an annual performance bonus. Now we have got the 13th month bonus. In other words, we haven't got this assessment.

MR DUNCAN: Are you saying the annual performance bonus does no longer exist?

MR ROGER LEE: (In English) Correct.

DR NORMAN LEUNG: (In English) Correct. Mr Duncan, I mentioned earlier in the hearing that no only did I incorporate the safety bonus and performance into the basic salary; at the same time, at the end of the year, this annual performance bonus will become the 13th month pay to the bus captains.

In other words, formerly they were getting at most an annual bonus of $12,000 per year, payable in two instalments. Now, at the end of the year, they will be getting annual pay --

MR ROGER LEE: (In English) Just like double pay.

DR NORMAN LEUNG: (In English) A 13th month pay, a double pay. They will be getting double pay by reference to the new rate of basic pay, which is now $15,400.

MR DUNCAN: Do I understand correctly that the extra month's pay is not performance-based?

DR NORMAN LEUNG: (In English) No, no. Mr Duncan, you are correct.

MR DUNCAN: So before the change which was approved by the board last year, a person could receive first of all a safety bonus, and that applied to 90 per cent of your captains, if I understood correctly before, and would also qualify for an annual performance bonus?

DR NORMAN LEUNG: (In English) Yes.

MR DUNCAN: What proportion of your bus captains would have received a grade 1 performance bonus each year?

MR GODWIN SO: About 90 per cent, almost 90 per cent.

MR DUNCAN: Do I understand that the annual performance bonus was done away with then by virtue of the decisions made at the December board meeting so that from 1 March this year you have the new pay structure?

DR NORMAN LEUNG: (In English) Since 1 March, yes. Yes, Mr Duncan.

MR DUNCAN: So is the situation at present then that there is no specific financial reward for a bus driver depending on his safety performance?

DR NORMAN LEUNG: (In English) Well, there are other safeguards to ensure that our bus captains will drive properly and safely.

Perhaps I should mention at this stage that apart from the remuneration enhancement which became effective on 1 March, I am also proposing, with the blessing of the board, other enhancements.

For example, just now, you referred to bus captains, there are three grades of bus captain, bus captain, bus captain II and bus captain I, and I have the support of the board of directors that these three grades will soon be expanded into five grades. And also the annual increment point, it will be expanded from the current eight increments to 20 increments. So this will be, you know ...

This, for example, promotion to the next grade, as well as the award of the annual increment, will not be automatic. This will be subject to performance of the bus captains. But more importantly, I think, and I believe I'm correct in saying, that the bus captains will not be less responsible in their behaviour, because the safety bonus was done with. I think they are professional drivers and they have their own safety to safeguard, apart from the safety of the passengers.

So my principal objective is to enhance the

remuneration of the bus captains as a whole and hope that not only would I be able to recruit new bus captains but to retain the serving bus captains as well. That's my intention, Mr Duncan.

MR DUNCAN: Thank you, Dr Leung.

With regard to those matters for which you have the support of the board, if you are changing the pay structure at all, is that something which as a matter of practice you would discuss with the unions before they were implemented, or would you implement it and then tell the unions?

DR NORMAN LEUNG: (In English) Yes, I did. In fact, as you know, I met with representatives of the trade union personally a few months ago.

And apart from the remuneration incentive that was executed on 1 March, I indicated to the trade union further enhancements would be coming, and they know that. For example, they know that instead of three bus captain grades there will be five grades; instead of eight annual increments, there will be 20 increments. And there are other incentives too.

But I am always willing to listen to the views of the bus captains. Really, how should I say, I find that because, personally, my governance philosophy is people first. People always come first. Of course passengers

come first, they are very important to us, and our staff are equally important to us, and of course at the same time I have to be accountable to my shareholders as well. So I am doing my level best to enhance the remuneration of all staff, not just bus captains, other frontline staff, in the hope that we can recruit and retain quality staff members for our services.

MR ROGER LEE: I would like to add one point here. Actually, we have communicated with many other members of staff.

MR GODWIN SO: I can also say something here. We have heard these aspirations in the past. They also thought that if money is pegged to safety, they would experience pressure when they drove, and also the annual performance bonus, they also had the aspiration about this. When I met with bus captains and also when I talked to depot staff, they wanted this to be changed. So we heard them, and as the chairman said, he met unions' representatives, and so there is this change.

MR DUNCAN: Thank you.

I want to refer you, Dr Leung, to the evidence of one of the persons from whom the committee has heard. This was Mr Lai Siu Chung who came from the Motor Transport Workers General Union. Do you know Mr Lai?

DR NORMAN LEUNG: (In English) Mr Chung, yes, I met him as

a representative of one of the trade unions, I met with him, yes.

MR DUNCAN: I'm going to ask to be turned up the transcript at Day 9 at page 98.

CHAIRMAN: What is the reference in the bundles?

MR DUNCAN: It's the page on the screen now, and in the hard copy of the transcript, it will be Day 9, page 98, line 13.

CHAIRMAN: Which of the four transcript bundles is it to be found in?

MR DUNCAN: Number 4.

CHAIRMAN: Thank you.

MR DUNCAN: If I could just explain the commencement of this dialogue, Dr Leung, at line 13, there is an entry attributed to Ms Maggie Wong, my colleague, one of the counsel for the commission, and she asked this question of Mr Lai:

"Mr Lai, we are not talking about deduction. It is addition. What I'm suggesting here is not about deduction. It is on top of your basic salary. If you drive well you would receive an extra bonus. That's the system. It's not about deduction."

And Mr Lai replies:

"Well, KMB doesn't have such a system."

And Ms Maggie Wong says:

"Not about whether you have the system. If one were to recommend such a system, would you support that?"

And what I am interested to bring to your attention is the reply of Mr Lai, which follows:

"Chairman, we support any type of reward system or incentive system. Right now we are talking to the KMB on another kind of bonus system: there would be a 20-point increment system. So in other words, if you achieve certain requirements then you will get an increment, an extra point. And that is beyond the annual salary increase. The KMB has verbally promised that there will be a 20-point system, it's calculated based on the performance, safety performance, attendance, discipline. If the bus captain does not achieve the standards then he will not get an extra point.

So that's a kind of bonus system."

Now, the 20-point system to which Mr Lai referred I think is something that you referred to in your evidence; correct?

DR NORMAN LEUNG: (In English) Yes.

MR DUNCAN: The system that you have in mind, will it depend at all on safety performance?

DR NORMAN LEUNG: (In English) Yes. As I said earlier on too, the award of this increment, as well as promotion

to the next grade, will not be automatic, but the safety performance as well as other performance will be taken into account. Yes.

MR DUNCAN: Have you yet decided how you would assess safety performance in that context?

DR NORMAN LEUNG: (In English) Yes. We do have a quality assurance department, Mr Duncan, and they are responsible for monitoring the performance of all bus captains.

At this point in time, perhaps I can ask the head of our quality assurance department --

MR ROGER LEE: Perhaps I would like to add something here.

DR NORMAN LEUNG: (In English) Wait, wait -- and he can tell you how we monitor the performance of the bus captains, and after that, Roger, you can supplement.

MR JAMES WONG: Good morning. I am James Wong; I am the head of training and quality assurance department of KMB. I am responsible for training bus captains. I also monitor their behaviour and integrity. Within my area of responsibility, we regularly monitor the behaviour of bus captains. Whether there is speeding or whether there is any unsafe driving, this is monitored by the black box.

On the other hand, if we receive complaints from passengers or even prosecution by the police, we will

know that there is undesirable behaviour on the part of the bus captain or that he has broken traffic rules. In this regard we also have plain-clothed inspection. If we get a complaint from any passenger, we will arrange for our plain-clothed driving inspector to go on board to look at the driving behaviour of the bus captain personally in order to decide whether his attitude or techniques are correct.

Just now you asked how we monitored whether there is any irregularity on the part of bus captains. We have done a lot in this regard. Our objective is to achieve safe driving. In our Bus Captain Training School, we have different kinds of driving training. Let me talk about with about basic training. There are two phases. Phase 1 is to allow the bus captain to achieve the standard to get a driving licence of the right class from the TD, Transport Department, and in phase 2 we will allow the bus captain to achieve the standards of training with KMB so he can serve passengers.

In the case of poor behaviour, we will rely on other ways to monitor.

MR ROGER LEE: As has been pointed out, there are many channels. We will have more communication with the bus captains. As to whether bus captains would regard it as a way of further monitoring before he gets a promotion,

certainly we will heed your advice. This is our initial suggestions. That's the way for the future. We are going to have more communication with the bus captains.

MR DUNCAN: Thank you. The monitoring of the bus drivers is a matter I will ask further questions about later on when we come to the black box situation, but I appreciate your remarks. Thank you.

Leaving the question of awards and so forth, I want to move to a different matter, still connected with safety, by taking you to another bundle. This time, KMB-6, at 2110.

You should be looking at a copy of the Kowloon Motor Bus management structure supplied to the committee by the company.

DR NORMAN LEUNG: (In English) Yes.

MR DUNCAN: We will see at the top of the management structure Mr Roger Lee, who is here today. We then have a line which includes the operations director, Mr Kin Wang Leung, who is also here today. On that same line we have the general manager, corporate planning and business development, Mr So, who is also here today.

Underneath the operations director, we have the deputy operations director, Mr Patrick Pang, who is with us as well, and under the human resources director we have Mr James Wong, who has just answered one of the

questions, in the box of training and quality assurance.

I want to go from that management structure to another entry in the bundles which have been provided by you. That's at KMB-3 at page 708.

This is an extract from the annual report of the holding company, Transport International Holdings Ltd, and it's the annual report for 2011.

I want to pick up on page 708 one of the paragraphs. It's under the general heading, if we go back to a few pages, to 705, "Operational review", "Care for customers".

Then we have, on pages 706 and 707, a number of headings, and we come to 708 and an entry which is headed, "Safety Management System". If I could read the first of the paragraphs under that section:

"As stated in its corporate safety policy, KMB is firmly committed to striving for continual improvement in safety performance. Robust safety governance is the backbone of our safety management system. A rigorous safety governance framework ensures that the highest levels of safety performance and sustainable operations are achieved. Established in 2010, the safety and service quality department focuses on enhancing our safety performance and delivering high quality services."

Then there's a reference in the following paragraph, you will see, to the development and implementation of the Occupational Health and Safety Assessment Series 18001, and it continues.

So did there, in 2011, exist a safety and service quality department? Is that the position?

DR NORMAN LEUNG: (In English) It has been replaced by the quality and assurance department.

MR DUNCAN: Right. We will come to its replacement, but I just want to first establish that back in 2011 it was called the safety and service quality department; is that correct?

DR NORMAN LEUNG: (In English) Yes.

MR DUNCAN: Thank you.

Can you then go, please, to page 774 of the same bundle. We are still with the 2011 report. You will see on that page "Key Corporate Executives"; do you see that?

DR NORMAN LEUNG: (In English) Yes.

MR DUNCAN: Then if you go down the list, one of the key corporate executives is a Mr Gary Wong, head of safety and service quality department. Do you see that?

DR NORMAN LEUNG: (In English) Yes.

MR DUNCAN: If we go to the annual report for the following year, 2012 -- we can find that, I believe, at page 995

of the same bundle, and on that page, we will see again, under the heading of "Key Corporate Executives", the name of Mr Wong included as the head of safety and service quality department. Is that correct?

DR NORMAN LEUNG: (In English) Yes.

MR DUNCAN: Let's move from bundle 3 to bundle 4 of KMB, and go firstly to page 1202. If you would take it from me -- at page 1202, do you see the reference again to Mr Wong as the head of the safety and service quality department?

DR NORMAN LEUNG: (In English) Yes.

CHAIRMAN: Which year is this annual report?

MR DUNCAN: This is, if you could take it from me, the 2013 annual report.

At this point, I would like to go back to a reference that we have already seen this morning, KMB-9/3855. This is the reference of the outstanding service award.

DR NORMAN LEUNG: (In English) Outstanding service award.

MR DUNCAN: Do you see that?

DR NORMAN LEUNG: (In English) I see it on the screen, yes.

MR DUNCAN: The distribution includes a distribution to the head of the safety and service quality department. You will see that on the right-hand side of the distribution list --

DR NORMAN LEUNG: (In English) Yes.
MR DUNCAN: -- about six down from the top.
DR NORMAN LEUNG: (In English) Yes.
MR DUNCAN: Thank you.

Then back to bundle 4, this time, please, at page 1410, you will see at page 1410 the key corporate executives as they are listed in the 2014 annual report.

On this occasion, there is no reference, is there, to any head of the safety and service quality department; is that correct?

DR NORMAN LEUNG: (In English) Yes.
MR DUNCAN: In fact, I think you have said earlier in your evidence that this department was replaced at some point; is that correct?
DR NORMAN LEUNG: (In English) Yes.
MR DUNCAN: The committee has received evidence -- I'm not sure whether you've seen this or not -- to the effect that the employment of Mr Gary Wong was terminated during the year of 2015. Is that correct?
MR LEUNG KIN WANG: Correct.
MR DUNCAN: Did that coincide with the safety and service quality department no longer existing?
MR LEUNG KIN WANG: No.
MR DUNCAN: Please continue.
MR LEUNG KIN WANG: Regarding the work of this particular

department, at that time, Mr Owen, head of the operations, didn't know much about the past and the communication with the bus captains was poor. So there was a decision to enhance the work, so as to let it be taken up by the two deputy heads of operations, one of them being me, myself.

In terms of the hardware, I am very familiar with it. I've been with KMB for a long time, most of the time with the engineering department. So regarding bus hardware and engineering and safety, I can do more.

Earlier on, the department's knowledge about those parts, it wasn't adequate, and for this department, as to its earlier communication with bus captains, it was poor, and in fact bus captains were not satisfied and in fact it could have been done better. Say, for example, at a specific bend there were certain suggestions and many bus captains found them unrealistic or impractical. Say, for example, they would like to specify certain speeds for entering a bend and the speed would be recorded on a card and ask the bus captains to remember the speed. For professional bus captains, it is just not practicable and in fact it would cause confusion. This is one of the examples.

When the function was incorporated with the operations director, the function would be strengthened

within the compartment of the bus, and in terms of hardware, we have done a lot, like on-board facilities. At that time many bus captains had a lot of views about demisters, they were not happy with the demisters. We did a series of matters in order to provide a long-term solution. And there were new black box monitoring reports which were generated, and on-board stickers were also placed in a more proper manner.

With regard to CCTV, we also strengthened it. Of course, we faced a lot of difficulties with regard to the installation of CCTV. We had to communicate with the bus captains and we had to do it step by step.

In terms of hardware, there is a lot more, including how we could have facilities to help bus captains, and in the past half-year or so we had a lot of discussion with the sector and the manufacturers. We talked to bus manufacturers to see how our buses could become more safe. All in all, in terms of hardware, we enhanced it. We placed emphasis on the hardware. Anything that could be enhanced in terms of hardware would be attended to by an open mind on our part. And in terms of hardware, and especially with regard to safety, there has been a lot of enhancement in the past few years. We will continue to go in that direction.

As for operations, we have another deputy operations

director who is looking over our operations and including road safety. Bus captains face their work environment every day and safety is important, including facilities, road facilities, terminus facilities, road congestion. All these are related to safety, and rest time is also an important element.

We hope we will adopt a human approach in communicating with bus captains with regard to operations, so we can enhance bus safety.

As for monitoring, safety training and also discipline, in September 2017 we set up a new department. That is the quality assurance department. It is responsible for training bus captains, training of new bus captains, safety training, remedial training, monitoring, discipline, et cetera. Hopefully we can enhance hardware and software in the area of safety, so we can perform better. We can also see that when the department is enhanced to the level of deputy operations director, the injury rate resulting from traffic accident has been improved. We hope we can continue to work hard in this regard.

Thank you.

MR ROGER LEE: All in all, basically, we are talking about the same staff. It is just that the head is not there, and we are talking about an interdepartmental approach

to tackle safety and quality control. I think that is what Mr Leung has been doing in the past few years.

MR DUNCAN: Thank you for that.

So the safety and service quality department was, if I understand it correctly, established in 2010, and ceased to exist, at least in its former form, in 2015; would that be correct?

MR LEUNG KIN WANG: That's correct.

MR DUNCAN: We have seen from the 2011 annual report that that was a department which focused on enhancing the company's safety performance and, as it said in the report, delivering high-quality services.

Apart from Mr Gary Wong, how many other staff were in that safety and service quality department between 2010 and 2015?

MR LEUNG KIN WANG: Fewer than 10.

MR DUNCAN: Is there any person in the management structure now who carries the responsibility for the matter of safety across the company?

MR GODWIN SO: At present, the company structure is such that every department has some responsibility for safety. In September last year, we set up a department which is under the human resources department. It is called the training and quality assurance department. My colleague sitting next to me is the head of that

department. He is responsible for different matters, but he trains bus captains. And as for hardware, this is left to the engineering department, because safety has to do with the stability and the facilities of the vehicle, and then on the human side it is the driving technique.

In the training and quality assurance department, we have done a lot of enhancement with software in terms of training and staff performance. I think I can hand over to Mr Wong to introduce that to you.

MR JAMES WONG: Actually, safety should not be the responsibility of just one person in the company. Rather, everyone in the company should ensure safety, whether it is occupational safety or driving safety. In my department, I am mainly responsible for driving safety of bus captains. From the training stage, we would require them to place emphasis on safety. In terms of bus captains, first of all they must have safe driving techniques. Secondly, they must have a safe driving attitude. Then, they must have good knowledge about the company and Hong Kong's roads so that he can be safe.

First of all, I place emphasis on driving techniques, because if he doesn't have driving techniques he just cannot manoeuvre such a big bus.

From joining KMB, we have increased driving instructors from 65 to 81. The 81 driving instructors have to have certain qualification. They must have ten years of experience in driving a bus and they must have not committed any serious or liable traffic accident, and of course they must perform well because they would be responsible for teaching new bus captains.

Now that we have 81 driving instructors, we place emphasis on achieving standards for bus captains. In phase 1 of training, we make sure that they would have the qualification to get a driving licence for driving a franchised bus, that would be issued by the Transport Department, which would confirm that our school has achieved that standard. After the bus captain has got a driver's licence, he will continue with training to achieve KMB standards, meaning that he will have to understand the routes and he will have to know the roads, the road situations in Hong Kong.

Then I also mentioned driving attitude, which is also important. Very often, this will be affected by the stress that they experience and it also depends on their mental state. In order to do something about this, in May we signed an agreement with the psychology department of the Chinese University of Hong Kong in order to do a consultancy to help us to understand the

stress suffered by bus captains when they drive, so that we can enhance the psychological state of bus captains, for them to achieve a safe driving attitude. This is going on, and the psychologists of the Chinese University of Hong Kong have talked to our frontline staff and bus captains to understand their work difficulties. We hope that in the future our driving instructors will be able to train our bus captains in such a way that the psychological state of our bus captains will be enhanced.

As for knowledge, we require bus captains to know the operations of KMB so that they can drive safely.

MR ROGER LEE: I would like to add something. As I said, safety is an interdepartmental matter. Our training school has to do more with bus captains, but then we also look at the hardware. Hardware installation is an important part. In the past year, together with Mr Leung, we went to bus fairs overseas, to understand better safety installations for buses. In autumn last year, we had an exchange with Queen's University in Belfast and another organisation. We sent our staff to learn there, to understand how we can enhance driving safety. There were professors and research personnel who also came to Hong Kong, to KMB, and there will be more cooperation between us later on, in order to

research into hardware of buses, to see whether it can be done so that we can help bus captains to have more support when they drive.

This is already starting, and I believe that in future the driving school and the hardware aspects will be enhanced so that there will be better driving safety.

CHAIRMAN: Are there any specific devices that you have considered with Queen's University?

MR ROGER LEE: There are many aspects but there are mainly two aspects. First, in terms of bus operation, how we can allow it to be steered in a more smooth way. This is one aspect. Another aspect is when we purchase hardware in the market, we are procuring them from a third party, and when it is applied on board there will be some difficulty, because especially with double-deckers, we only have two to three companies supplying the devices and there is a lack of competition. We must look for technological institutes. I think Belfast has almost the only university which does research into the mechanics of double-deckers.

At this stage, maybe I can ask Mr Leung, our operations director, to explain things to you.

MR LEUNG KIN WANG: Let me show you a paper, that's paper 190.

CHAIRMAN: Yes.

MR LEUNG KIN WANG: This is what Mr Lee has been referring to. That is that KMB together with the Queen's University in Belfast, have come to a cooperation. W-Tech is a sort of institute under the university. We have got a project. We have got an engineer, Mr Lo, just the end of last month, went to visit this university. We have a cooperation. So he is acting like a visiting researcher so as to take part in the project.

We have researchers from this university in Northern Ireland. For the guiding professors, there were two of them who came to visit KMB last month. We talked to them. They were aware of the bus operations in Hong Kong. We told them about our safety issues and we talked about ways to improve the hardware, so when we talk about the content of the cooperation, it is a holistic way to take a look to see what can be done in terms of hardware, say for example in reminding the bus captains, say for example, whether the bus captains are attentive, and we talk about the traffic conditions, the driving attitude. We want to alert the bus captains.

Then, further on, we would like to see the following. We want to know whether we can rectify certain improper behaviour of the drivers. So this would be part of the project. A lot will be covered.

Please refer to the paper itself. A lot will be covered in terms of the hardware and software. As to why we are cooperating with this university and how it is to be done, as Mr Lee has said, we are going to cover all the facilities on board the bus, so it would be comprehensive.

So in terms of bus design, I think a lot of things can be applied in the situation of Hong Kong, and then we may come up with certain standards. I think I can say that currently we haven't got any standards, quite unlike the case of private cars.

For private cars, we have got many safety facilities, but then for double decked buses we encounter a difficulty here. We do want certain facilities. We do want new technologies. We want to have them on our double-deckers. But then usually it is not easy to achieve.

I joined in 2015. Almost on a yearly basis, I went to Europe, so as to talk to the two bus manufacturers. I shared views of Mr Leung. Unlike private cars -- well, in the case of private cars, there are many facilities that cannot be available on double-deckers. It is difficult to persuade the bus manufacturers to do so. Maybe this is due to the lack of cooperation. I won't elaborate. But indeed it is difficult.

I went to Northern Ireland. I firmly believe that for the researchers in Queen's University as well as the company called Wright, I think they are really passionate about buses. I believe that KMB's cooperation with them will produce a product in which I will be confident. I think this will help KMB. It will also help the trade as a whole so we can achieve improvements. It is going to be a very meaningful initiative. I believe that KMB has a lot of expectation about this project. We have got some young engineers within KMB.

When we talk about safety, in the past we have a lot of research, say for example a solar facility based on the roof of the bus. In fact, this has helped many bus captains. During hot weather, when they return to the bus -- of course, when you park a bus during hot weather, the temperature of the bus is high, it is acting like a greenhouse; it will be up to 50 degrees under the sun. He has to switch on the engine, he has to cool down the temperature before he can start driving. It takes time; it is very hard on them. So having installed the solar panels, and in fact we have entered phase 2. We believe that after parking a bus the solar panels can reduce the temperature of the bus substantially. After his rest break or after a meal

break, it will be easier for him to switch on the engine and start again. It may be something small but we hope this will become a standard feature.

In other words, for our new buses, we hope we can ask our bus manufacturers to fit the solar panels on the roof. Hong Kong is really too hot. In the coming year, 2019, the new buses will get the solar panels on the roof. This can reduce the air temperature. We have succeeded in bringing down the temperature.

CHAIRMAN: I think we have got your point. You have made it a few times.

May I ask this, and then we are going to take a 20-minute break: may I ask that you provide to the committee a legible version of the document that we have at page 190 in the bundle, W-Tech. I think perhaps the problem is that it's coloured ink and it hasn't come through properly. If you could provide a copy we can read, then we can follow your suggestion and read the paper.

But we will take a 20-minute break now.

(11.37 am)

(A short adjournment)

(12.00 pm)

CHAIRMAN: Yes, Mr Duncan.

MR DUNCAN: Thank you, Mr Chairman.

Dr Leung, could I have you and your colleagues, please, at KMB-1 at page 188. You should be looking at a copy of a letter from KMB to the committee dated 23 May 2018. Do you see that?

DR NORMAN LEUNG: (In English) Yes.

CHAIRMAN: Does that refer to the matter about which evidence was given just before the break, the collaboration with a company called W-Tech?

MR LEUNG KIN WANG: Correct.

MR DUNCAN: If I could bring your attention page 188 and the letter two-thirds of the way down:

"The purpose of the ... meeting was to discuss implementing a series of advanced driver assist systems ... in the fleets of KMB and LWB."

And it goes on to say:

"The objectives of the said collaboration with as follows", and we can see them outlined: 1, 2 and 3:

"1. To complete a technology viability assessment of pre-commercial/commercial ADAS technologies applicable to the Wrightbus Streetdeck configuration;

2. To recommend ADAS appropriate for implementation within the KMB and LWB fleets of Wrightbus vehicles on the basis of this assessment; and.

3. To deliver a roadmap for ADAS implementation to KMB and LWB."

Now could I ask this question: does the KMB fleet at the moment include a number of Wrightbus vehicles?

MR LEUNG KIN WANG: Currently, there is one undergoing prototyping. For the bodywork for Wrightbus, we have got many bus bodies on Volvo chassis, hundreds of them.

MR DUNCAN: Apart from the Wrightbus, who are the other manufacturers of the buses in the Kowloon Motor Bus fleet?

MR LEUNG KIN WANG: Sorry, please repeat your question.

MR DUNCAN: Who are the vehicles in the KMB bus fleet manufactured by -- I think there's a series, a number of different manufacturers; is that correct?

MR LEUNG KIN WANG: Other bus -- Volvo, MAN, mainly ADL and Volvo.

MR DUNCAN: So Volvo, MAN, ADL, that's Alexander Dennis; is that correct?

MR LEUNG KIN WANG: (In English) Correct.

MR DUNCAN: So basically three types within the bus fleet?

MR LEUNG KIN WANG: (In English) Correct.

MR DUNCAN: Now, the bus that was involved in the Tai Po accident, was that a Wrightbus?

MR LEUNG KIN WANG: With Volvo chassis, with Wrightbus bus body. It's a double-decker.

MR DUNCAN: So how many of your buses have this configuration, a Volvo or a MAN or an ADL base with

a Wrightbus configuration?

MR LEUNG KIN WANG: I don't have the exact figure, but I would say roughly 800 to 900 of them.

MR DUNCAN: What is the total number of your fleet?

MR LEUNG KIN WANG: Together with LWB, almost 4,300, for both KMB and LWB.

MR DUNCAN: Can you explain again what the Wrightbus prototype is, please?

MR LEUNG KIN WANG: The chassis and bodywork have been manufactured by Wrightbus. It's a two-axle double-decker.

MR DUNCAN: And the collaboration agreement that you have reached with W-Tech, does that anticipate that the company will be purchasing a number of Wrightbus vehicles of that nature?

MR LEUNG KIN WANG: No.

MR DUNCAN: What does it anticipate? On what buses would the possible ADAS system be installed?

MR LEUNG KIN WANG: This is a research to see what will be of assistance in relation to enhancing bus safety. We want to find out what can be available and achievable on Wrightbus, and then we will take into account bus operations in Hong Kong. We also hope that the outcome, if feasible, will be applied and benefit the buses in Hong Kong, but after all this is a research. This is

too early to talk about implementation. So it is an academic research. We have deployed a colleague to Queen's University in Belfast to carry out a one-year project, which is a research, to see what would be possible, so that in future they can be applied to double-decker buses, in this particular case Wrightbus, but we are not ruling out any possibilities, and we also hope that in future such safety features will become standard safety features. We hope that all other bus manufacturers will also take part or will use such measures to enhance bus safety.

MR DUNCAN: Could you just kindly explain for the committee what is the use of, say, the Volvo chassis with the Wright-tech [sic] body, as I understand you? Could you explain that, please?

MR LEUNG KIN WANG: For the chassis, we have to (unclear word) three of them, and the engine, and the transmission system and the driver's cab. For the bus body, that's on top of the chassis, including the bodywork, the flooring, the seats, the air-conditioning. So they will be regarded as the body.

For the bus body, it is by Wrightbus. For the chassis, that's by Volvo.

CHAIRMAN: Where are the two joined together, the chassis and the bus body?

MR LEUNG KIN WANG: It can take different ways at different points. As to the one I mentioned, I suppose it should be in the UK, at Wrightbus, manufactured by Wrightbus.

(In English) Just to clarify, a chassis can have different kinds of bus bodies.

CHAIRMAN: Yes, I understand that. My question is simple: where are they put together?

DR NORMAN LEUNG: (In English) They can be put together either in the original manufacturer's facilities or they can assembled elsewhere. In the past, KMB did our own bus assembly. We also had buses assembled in China and there are buses assembled in different places.

CHAIRMAN: Thank you.

MR DUNCAN: When you say it could be done by the original manufacturer, in this case would that be Volvo or would it be Wright Group?

MR ROGER LEE: Well, for the chassis, if it is by Volvo, and if the body is Wright, then there are two functions. First of all, the chassis can be transferred to Belfast and then the body, the bus body, would be fitted onto the chassis. It is complicated because both would undergo a lot of research. We talk about the torque, et cetera. Then in Malaysia, Wright has got a plant in Malaysia, to carry out bus assembly work. So for the Volvo chassis, and in fact we have got it for Gemilang,

Wright is for body, Volvo is for the chassis, and Wright has also researched and developed its own chassis but we have only got one, that is the one being tested. Now, a bus has got the chassis as well as the body. You need both. Before you can research into the ADAS, you must have a bus physically to do it. After we have got the ADAS, it means it can be used in any bus.

MR DUNCAN: What's the advantage of having the Wrightbus body, over just having the complete Volvo bus?

MR ROGER LEE: For Wrightbus, let me supplement. Today, their chassis cannot have three axles, because in the UK they have got many Wrightbus bodies and Wrightbus axles but they can only accommodate two, but in Hong Kong we are mainly having three axles, because this has a larger capacity and we carry a larger air-conditioner at the back, and for Hong Kong for each axle, we have this standard; the loading cannot exceed a particular limit.

So, in the case of Hong Kong and for us, KMB as well, we usually use the three axles. For Wrightbus, it has got a chassis as well as body, it's similar to ADL. ADL has both chassis as well as the body, but before Wrightbus has got three-axle buses, the only one we have got from Wrightbus is only two-axle, for Volvo, three; that is why we have got their bodywork fitted on to Volvo chassis.

MEMBER AUYEUNG: Thank you very much. Mr Duncan asked my question already. Thank you.

MR DUNCAN: Just going back to the management structure -- we don't need to go to the document -- Mr Wong, when you were giving your answer before, you mentioned a lot about responsibility for training, and that's clearly in the training and quality assurance department.

Who in the company carries the responsibility of monitoring not the training of the drivers but the actual performance of the drivers, in particular their safety performance? Where does the responsibility for that sit?

MR PATRICK PANG: Mr Duncan, let me answer this question. As far as the monitoring of the safety of bus captains is concerned, it is done at different levels by different colleagues. For each bus, we have got the so-called black box, we have got this tool. On a weekly basis, we have monitoring reports. We get the data.

Three main sets of data would be available. First of all, speeding; second, abrupt acceleration, sudden acceleration; third, harsh braking.

For our depots, for our management at the depots, on a weekly basis we take a look. Currently, what we can achieve is that we can look at the data collected by the black box for the preceding four days.

In fact, every day we start with the following. That is we will analyse the data, in particular speeding beyond the limits covering beyond the 50km per hour and beyond the 70km per hour limits. For sudden acceleration and abrupt braking, we have got data to tell us the case of individual bus captains. This is because we do generate exception reports, and we can find out whether the driving behaviour of certain bus captains should warrant our attention.

If we see that for a particular bus captain over a particular period of time, his driving attitude is such that it warrants our attention, then we will first of all advise the bus captain and will get our frontline staff to talk to the bus captain to find out whether there is a special reason for that. And then regarding the over-speeding, we will refer the cases of speeding to our training and quality assurance department immediately, to take follow-up action. And then for speeding, maybe Mr Wong can also supplement.

What I would like to say is that the black box data will be kept, will be reviewed and will be followed up.

MR DUNCAN: The question really was who has the responsibility. So you have talked about the depots carrying out work. What staff are at a depot?

MR PATRICK PANG: Mr Duncan, who should be responsible,

I can answer you --

CHAIRMAN: "Who is", not "should be"; "who is". And please can I ask you to speak more slowly.

MR PATRICK PANG: (In English) Okay.

(Via interpreter) The management at depot starts with our operations officers. The operations officer, in every depot or zone -- overall speaking, at KMB, we have four main depots, including the one at Lai Chi Kok, the one in Kowloon Bay, another one in Sha Tin, and the one in Tuen Mun, and of course we have Long Win Bus. At every depot, there are boundaries delineated for them. They are responsible for different zones. There is an assistant manager or manager responsible for every zone. We call them managers or assistant managers. Every manager or assistant manager has different numbers of operation officers under them. On a daily basis, when operations officers come to work, the first thing they do is to look at the black box information for the preceding four days, including speeding, sudden acceleration, and harsh braking.

Assistant managers and operations officers do this every day.

MR DUNCAN: So how many operations officers would there be at each of the four depots?

MR PATRICK PANG: Altogether, at every depot, depending on

the size of the depot, some may have six to seven operations officers, some may have three to four operations officers, and altogether there are about 37 colleagues dealing with the data analysis.

CHAIRMAN: Do you have a graphic or a map that shows the zones that are applicable in each of the four depots?

MR PATRICK PANG: Chairman, can I be allowed to supply -- absolutely, yes, definitely.

CHAIRMAN: Can you answer "yes" or "no" -- thank you. Try answering "yes" or "no" to this as well.

MR PATRICK PANG: (In English) Okay.

CHAIRMAN: Can you provide a copy of such a map or plan to us, "yes" or "no"?

MR PATRICK PANG: (In English) Yes.

CHAIRMAN: Will you do so, "yes" or "no"?

MR PATRICK PANG: (In English) Yes.

CHAIRMAN: Thank you.

Yes, Mr Duncan.

MR DUNCAN: Now, the operations officers presumably report to the depot manager; would that be correct?

MR PATRICK PANG: Correct.

MR DUNCAN: And who do the depot managers report to?

MR PATRICK PANG: At every depot, there will be an experienced general manager or manager who will coordinate the operation of the four depots and Long Win

Bus. These five experienced general managers or managers directly report to me.

MR DUNCAN: I'm going to come back to the black box in a few moments, but there are just two other matters I want to explore with you before I do that.

Can I ask you to have in front of you, please, bundle FE-1, and could you go, please, to page 96-1 of that bundle. At that page, you should be looking at a copy of a document sent by email by the committee to a Mr Raymond Cheng. Are you looking at that? Do you see that?

Do you recognise Mr Raymond Cheng as being a former employee of the company? Is he known to you as a former employee?

MR ROGER LEE: He left when I joined the company. He left in 2014.

MR DUNCAN: Right. You will see that one of the matters that the committee has enquired into is under the heading "Employment by KMB"; do you see that?

Can you just read to yourself, please, paragraphs 1, 2 and 3 of that email letter from the committee to Mr Cheng.

Have you been able to read that? Thank you.

Could you then please turn to page 96-4. Have you seen this response previously, Mr Lee?

MR ROGER LEE: No.

MR DUNCAN: Could you take the time, please, just to read to yourself what appears at page 96-4, 96-5, and there's also an extract on page 96-6. Just read that to yourself, please, to familiarise yourself with it.

Thank you. Then at page 96-7, you will see a further response from Mr Cheng, where he addresses again question 1 and question 2. I wonder if you would be good enough, please, just to read those entries to yourself, at page 96-7.

Thank you. Now, on page 96-7, just under the heading "Answer to Q2", Mr Cheng refers to the matter of 29 sharp bends, and it talks about information being in an Excel format. Do you see that?

MR ROGER LEE: (In English) Yes.

MR DUNCAN: Does that information still exist within the company?

MR ROGER LEE: I joined the company in 2015. I have not seen such information. In the past few months, however, I sought an understanding with people who have worked in the company for a long time and how these 29 sharp bends came about. I can supply the record to the committee. According to the information, at that time, Mr Edmond Ho, the managing director, said that the operations director of that time should approve it

before it would be implemented. According to the records, in 2014, the proposal of the 29 sharp bends was not implemented, and in the record papers it was seen that many bus captains and frontline staff had a lot to say about the implementability, and in 2015, when I took over in early 2015, I knew nothing about that recommendation, but the present operations director, Mr Leung, or the head of the training school, can supplement.

MR DUNCAN: I don't want to labour this point. All I'm asking is whether the information in the Excel format is available, and I think you've said that you could make the record available. Are you saying that it is available?

MR LEUNG KIN WANG: I cannot answer the question now. I can find out.

MR DUNCAN: Thank you.

CHAIRMAN: And if you are able to locate it, would you provide it to the committee?

MR LEUNG KIN WANG: Yes.

CHAIRMAN: The other records that I think Mr Lee was making reference to was the explanation for why the scheme was not implemented.

MR ROGER LEE: (In English) That's right.

CHAIRMAN: Could you make those records available?

MR ROGER LEE: (In English) Yes.

CHAIRMAN: So there are two records. One is the Excel format with the 29 bends and whatever else went with it, and then the records that go to why it was not implemented.

MR ROGER LEE: (In English) Yes.

MR DUNCAN: Just to supplement that, if you look down at the bottom of the page, 96-7, there is reference to small reminding cards with exact locations of sharp bends and safe speeds having been printed. Could you also enquire into the company's records as to whether a sample of the printed card is available?

MR LEUNG KIN WANG: I haven't seen that.

MR JAMES WONG: In fact, in relation to this matter, I have looked it up. According to the information, I think at that time there was a proposal for the KMB to identify the sharp bends so that the bus captains would slow down the speed. I've got the minutes for that meeting, and as our MD has already said, at that time it would require the approval of the MD before it could be implemented.

According to the agenda of that meeting --

CHAIRMAN: Mr Wong, do these cards exist or not? Could you just answer that question directly?

MR JAMES WONG: (In English) Because I want to add some more

information.

CHAIRMAN: By all means add more, but tell us directly: do they exist or not?

MR JAMES WONG: (In English) I don't have.

CHAIRMAN: They don't exist, as far as you are concerned?

MR JAMES WONG: (In English) No.

CHAIRMAN: I don't want to cut you off so tell us what it is you want to tell us.

MR JAMES WONG: According to the documents, it said that it would require the approval of the OD to implement it. According to the record, at that time it was obstructed by many staff members so it was not implemented and therefore I think that this didn't go into the staff members telling them about the sharp bends.

For the sharp bends, KMB came up with safety guidelines, but it is not about those 29 sharp bends. In fact, for our website for staff members, we have provided road sections, including sharp bends and others, carrying with them the driving tips. They are available from the website for staff members. So, for an employee who has to drive a particular route, he types in the route and then, covering the starting point and the ending point, there will be things that would warrant the attention of the bus captains, including the bends. So, when he drives, he will follow the

guidelines and drive carefully.

That's all I want to supplement.

CHAIRMAN: Yes, Mr Duncan.

MR DUNCAN: Thank you, Chairman.

Could you go back now, please, to KMB-1 at page 30. We are back on the initial submissions to the committee, and in this particular respect you have been asked, you can see at the top of the page, to "identify and supply copies of any codes of practice established by your company"; do you see that?

Under the codes of practice, there are two standards referred to, together with the Occupational Health and Safety Assessment Series. Do you see those references?

The first of those is the International Organization for Standardization. Do you see that?

MR ROGER LEE: Yes.

MR DUNCAN: Would it be fair to say that there is nothing within that standard which applies directly to the matter of safety, applicable to bus captains?

MR ROGER LEE: (In English) Yes.

MR GODWIN SO: (In English) Yes.

MR DUNCAN: Likewise, if we go to the second of the standards, the International Organization for Standardization -- ISO 14001 -- again, would there be nothing within that standard which is applicable to the

safety procedures which should be undertaken by a bus captain?

MR GODWIN SO: For ISO 14001, nothing, but ISO 9001, that's all about quality management. It does involve safety.

MR DUNCAN: Yes, but the question I'm asking is does it concern safety with regard to the manner in which a bus captain drives?

MR GODWIN SO: For this question, I would like to ask you to look at the second bullet above, "Staff Handbook". The fifth item, there is this safe driving manual for bus captains, and that involved the safety measures. Perhaps Mr Duncan would like to talk about this one.

MR LEUNG KIN WANG: Let me supplement. Back to ISO. For OHSAS 18001, that is the Occupational Health and Safety Assessment Series, we do mention safety, one of them being that for each depot, we have to set up a depot safety committee with two elements. First, maintenance, that is maintenance carried out within the depot. Then another committee is for operations.

For each depot, it has to set up a structure, and it is an occupational safety committee. The majority of the members are from the operations section, including Mr Pang. For the depot safety committee, for the part concerning operations -- now, for bus captains, at the bus termini, and for bus captains driving on the road,

for bus captains moving around in the depot, we talk about their working environment. For the depot safety committee, it also examines the traffic accidents of the depot. So it is under ISO 18001. We do have a "plan, do, check, act", and that takes care of driving safety matters. We do have it.

MR DUNCAN: What I'm asking you is whether 18001 dictates how a driver should drive. It doesn't descend to that detail, does it?

MR LEUNG KIN WANG: I would like to say that this is not the only thing to govern the driving of bus captains. As Mr So has said, for ISO 9001, there are measures relating to the safe driving of bus captains.

What I want to say is that there are different systems, and each will have its own functions, and in different ways it can contribute to the training, with monitoring, enforcement of our bus captains. For 18001, we talked about the depot safety committee. That takes care of matters at the depot level. But then for the Bus Captain Training School and then for the human resources department, we have to look at it from the corporate perspective.

So it isn't a matter of just having a single element. We have to take a holistic view.

MR DUNCAN: Yes, I understand that. My simple question is:

there is nothing in the corporate safety manual, OHSAS 18001 which dictates how a driver is to drive safely? That's my simple question.

MR GODWIN SO: If you want to know how a bus captain should drive safely, then you should refer to what I have talked about. That is the one found at annex 1837, that is the safe driving manual for bus captains. That's from the corporate.

MR DUNCAN: Yes, the bus captain safety handbook; we are aware of that.

What I want to refer you to is miscellaneous file 2 at page 769. You should be looking at a copy of the letter apparently to the chairman of the LegCo's Panel on Transport, dated 16 June 2016. Do you have that in front of you?

MR GODWIN SO: (In English) Yes.

MR DUNCAN: And it appears to be from an organisation called the Community for Road Safety; do you see that?

MR GODWIN SO: (In English) Yes.

CHAIRMAN: Is the heading of the letter, "Administration's paper on new franchise for bus network of the Kowloon Motor Bus Company Ltd -- report on the public consultation on the new franchise"; is that the heading?

MR GODWIN SO: (In English) Yes.

MR DUNCAN: Now, if you read the letter itself, you will see

it refers to the submission of a document on 18 April 2016 to the government, which you can see on the following page, 770. Is the company aware of this organisation called the Community for Road Safety?

MR GODWIN SO: I became aware of this organisation as a result of this submission. Prior to that, I didn't.

MR DUNCAN: Have you read this document then, the document which commences at page 770, "New Franchise for Bus Network of the Kowloon Motor Bus Co Ltd"? Have you already read it?

MR GODWIN SO: (In English) Briefly.

MR DUNCAN: Thank you. Can I take you, please, to page 772. Do you see a heading on that page, "Bus Safety -- Road Safety Management System"?

MR GODWIN SO: (In English) Yes.

MR DUNCAN: Could you read the contents of that section, please, to yourself.

MR GODWIN SO: (In English) Okay.

MR DUNCAN: Are you aware of that standard, ISO 39001?

MR GODWIN SO: Yes, from this submission.

MR DUNCAN: Were you not aware of this prior to reading this submission?

MR GODWIN SO: No, not before that.

MR DUNCAN: Have you read the standard since reading this submission?

MR GODWIN SO: (In English) Briefly.

MR DUNCAN: And do you think there is some merit in the standard as far as your company is concerned?

MR GODWIN SO: Well, let me say this. First of all, for this report or for this submission, I don't think they have carried out any site visit at our company, nor did they consult us. Then, for this standard, this is not the only safety standard. For the author writing this report, I think he also said that the bus operator should come up with a safety system so as to achieve this particular ISO standard, namely 39001.

In our company, there is a safety system. We built it on the premise of ISO 9001, and ISO 39001 is actually evolving from ISO 9001. It has covered four main pillars: plan, do, check, act. And we have also got renewed accreditation under ISO 9001. And recently we engaged a transport expert from the UK to the company to look at our operation, our maintenance, in order to conduct a health check on us, so as to enhance our internal safety standards. That is our own safety standard. It might not have to be pegged to ISO 39001. Nevertheless, it is a very high quality standard.

MR DUNCAN: When you say "recently", when was that?

MR ROGER LEE: I would like to add, I think it was in March/April this year, our board of directors hoped to

engage a overseas expert to look at our operations. Whether it is about maintenance of our fleet or duty despatch for bus captains and even training, we would like to see how we can enhance our service in this regard.

Actually, there is more than one expert. Actually, yesterday they started to work.

MR LEUNG KIN WANG: Well, yesterday they came to Hong Kong. They came to our depots to start working.

CHAIRMAN: And who are they?

MR ROGER LEE: I don't have the name of the company. Can I supplement it afterwards?

CHAIRMAN: Yes, please do so. Do none of your colleagues know the name of this consultant?

MR ROGER LEE: Actually, it was in spring this year that I went to London. I met a few consultants. Some worked at London Transport. Some worked at large bus operators in the UK. Most of them are experienced operators in the UK. The company's name is Direx Solutions Ltd. It is a consultant company. Most of the consultants have been experienced in large bus operation in the UK.

CHAIRMAN: Thank you.

MR DUNCAN: So do I understand there is an investigation underway; there is no report available as yet?

CHAIRMAN: I think you said they began yesterday.

MR ROGER LEE: (In English) Yes.

(Via interpreter) Actually, a lot of information was submitted beforehand but the actual work just started. The consultant will certainly submit reports to our board after he has reviewed our operations.

MR DUNCAN: When do you expect that that report would be available?

MR ROGER LEE: Within the year.

MR DUNCAN: You mean within 2018 or within 12 months?

MR ROGER LEE: It will be in stages. The first stage is for them to do a body check, to see where we can improve. This is difficult because, first of all, he has to get to know our colleagues, so this will be done in stages. I believe there should be an initial report by the end of the year.

MR DUNCAN: Right. I'm now going to turn to the topic of the black box, which has been referred to on a number of occasions already this morning.

Can we start by picking up KMB-1 at page 50. Again, this page is part of the initial submission made by the company to the committee back in April of this year.

At page 50, the question that was asked, question number 2:

"Are electronic recording device eg tachographs/blackboxes and speed Limiters installed on

all buses? What information from these devices pertaining to monitoring the driving performance of bus captains is captured, and how is the collected information used to enhance driving safety? Are the buses equipped with forward-looking cameras that record and retain the progress of the vehicle?"

I'm particularly interested in the second sentence, "What information from these devices pertaining to monitoring the driving performance of bus captains is captured, and how is the collected information used to enhance driving safety?"

You will see the answer which has been provided to the committee, the first bullet:

"All KMB and LWB buses are equipped with black boxes and speed limiters."

Secondly:

"The black boxes capture the information of vehicle speed and vehicle location.

Operations sections of KMB and LWB monitor bus speed daily for the driving record of the preceding 10 days to monitor BCs' driving performance. Information will be passed to performance managers to commence disciplinary action within 14 working days from the time of the contravention."

Do you see that answer?

MR ROGER LEE: (Nodded head).

MR DUNCAN: Now, there are a number of matters I want to explore with you with regard to these black boxes. Let me make it clear at the outset what I'm interested in finding out on behalf of the committee. In particular, I'm interested in finding out what data these black boxes in your buses are capable of capturing, firstly; and secondly, what do they in fact capture, as opposed to what they are capable of capturing. And there's a third aspect, the use to which that data is actually put.

I just make that all clear to you so you can understand why I'm asking these questions.

I'm going to cover those matters in four areas, to try and make it simple for everybody concerned.

First of all, I'm going to ask you what requirements, if any, the Transport Department has laid down for the installation and use of black boxes. So what obligations do you have by virtue of the Transport Department requirements? That's number one.

Number two, I'm going to explore with you the data which is actually collected by the black boxes in the company's buses.

Thirdly, I'm going to cover what use is actually made of that data to provide real-time alerts to the bus

drivers as they are driving the bus.

Then, finally, I'm going to ask questions to find out what use is made of recorded black box data in order to facilitate the assessment of driving behaviour and also the monitoring of the driver as he is driving the bus.

So those are the areas, I think, that the committee will be interested in, and we will go through those one by one; okay?

MR PATRICK PANG: (In English) Yes.

MR DUNCAN: So the first of those topics is what requirements, if any, what obligations you have under the franchise agreement, or otherwise, to the Transport Department in respect of the installation and use of these black boxes.

So can I take you in that context first of all to TD-5, and ask you to turn up, please, page 1597.

Are you looking at a note from the Transport Department?

MR ROGER LEE: (In English) Yes.

MR DUNCAN: And is it addressed to a number of bus companies, including your own? And does it carry the heading, "Installation of Electronic Data Recording Devices on New Buses"? Is that the heading?

MR ROGER LEE: (In English) Yes.

MR DUNCAN: And is that a reference to a black box, an electronic data recording device?

MR LEUNG KIN WANG: Yes.

MR DUNCAN: Thank you.

MR LEUNG KIN WANG: In reality, in November 2003, we started the installation. That was in November 2003. And before --

MR DUNCAN: Right.

MR LEUNG KIN WANG: (In English) Sorry.

CHAIRMAN: Mr Leung, be patient. Mr Duncan will ask you questions. If there's something you wish to add because his questions aren't good enough, feel free to do so.

MR DUNCAN: And does that contain the requirement, namely that buses first registered after 1 July 2004 should be installed with a black box complying with the stated technical specification? Is that the requirement?

MR LEUNG KIN WANG: Correct.

MR DUNCAN: Thank you. If you turn the page, are the requirements set out there in items number 2 and 3?

MR LEUNG KIN WANG: (In English) Correct.

MR DUNCAN: And the first of those, item 2, does that demand that, "The device should sample the following data at 1 second intervals, and store data every 30 seconds for a period of 2 weeks"?

MR LEUNG KIN WANG: (In English) Correct.

MR DUNCAN: And does it refer to two aspects, first of all the operation times?

MR LEUNG KIN WANG: (In English) Correct.

MR DUNCAN: And, secondly, vehicle speed?

MR LEUNG KIN WANG: (In English) Correct.

MR DUNCAN: In item 3, there is further reference to the software for analysing on-board or downloaded data should be capable of reporting two matters; is that right?

MR LEUNG KIN WANG: Correct.

MR DUNCAN: First of all, with regard to an accident report, the vehicle speed profile, at a time interval which is then set out.

MR LEUNG KIN WANG: Correct.

MR DUNCAN: Then, secondly, the over-speeding report: the frequency, maximum speed attained and over-speeding duration for speeds over 70 kilometres per hour?

MR LEUNG KIN WANG: (In English) Correct.

MR DUNCAN: So was that the first requirement issued by the Transport Department with regard to the installation of black boxes and what they should be able to provide?

MR LEUNG KIN WANG: Correct.

MR DUNCAN: We can perhaps come back to that further after the lunch break.

CHAIRMAN: Yes. Gentlemen, we will take our lunch break now

and resume the hearing at 2.30 this afternoon.

2.30. Thank you.

(1.02 pm)

(The luncheon adjournment)

(2.30 pm)

CHAIRMAN: Good afternoon, gentlemen.

Mr Duncan.

MR DUNCAN: Thank you, Mr Chairman.

Gentlemen, we had seen before lunch the requirements from the Transport Department with regard to the use of black boxes in October 2003.

The next document I'd like to take you to, to be found in KMB-1, and perhaps we can go to page 159 firstly.

This is the second submission that the company made to the committee dated 18 May. If I could take you, please, through to page 175. You will see at the top of the page a question (5), in which the matter of the franchise requirements is mentioned.

You will then see question (6), a question posed by the committee:

"Please identify those franchise requirements. Are the requirements imposed by the Transport Department? Are they expressed in writing? If so, please provide copies of those documents."

And in the company's response, there is reference to clause 7(1) of the franchise, and then an explanation which reads as follows:

"During the discussions of the new franchise, the government has requested KMB to commit to adopt a list of enhanced safety features including but not limited to on-bus electronic data processing device (also known as black box), speed limiter and surveillance cameras, as the standard provisions when acquiring new buses (please refer to extracts of the letter from [the department] dated 10 March 2017 ...). KMB has given its undertaking to TD to implement these commitments under the new franchise."

The letter from TD is referred to in an annex, which I'll ask you to turn up. That would be at KMB-9 at page 3997. It's the second-last page of the bundle.

If you look at that page, it's headed, "Provision of on-bus facilities", and it is introduced by saying, "Pursuant to clause 7 of the new franchise, KMB has committed", and there are set out under that sentence item (a), and then an item (b) on the second page.

The one which is relevant for our purposes is under (a) and under the heading, "Enhanced safety features", as referred to in the previous document.

If you just go down the list of safety features, you

will see, I think, eight of them, numbered (i) through to (viii). The third one of those refers to the electronic data processing device, ie the black box.

Is it correct that the department has not stipulated any requirement with regard to any particular use of the black box? It has simply said that that is a safety feature which the company should have? Is that correct?

MR LEUNG KIN WANG: (In English) That's correct.

MR DUNCAN: So to the extent that the explanation suggested that that was an enhanced use of the black box, that would be not the correct way to read this document at page 3997; is that correct?

MR LEUNG KIN WANG: It's a bit complicated.

CHAIRMAN: It's complicated?

MR LEUNG KIN WANG: (In English) Yes.

CHAIRMAN: What's complicated?

MR LEUNG KIN WANG: (In English) I try to explain.

CHAIRMAN: Yes.

MR LEUNG KIN WANG: (Chinese words not interpreted) ... there's a commitment that we are going to do, but is it an enhanced feature? It's difficult to comment. But we have undertaken to do that.

MR DUNCAN: As I read it, you have undertaken to utilise the device?

MR LEUNG KIN WANG: That's correct.

MR DUNCAN: And that's all?

MR LEUNG KIN WANG: Of course, that device would be used, as said, but we will make it as helpful as possible to the company. But is it an enhanced safety feature? We are of the view that it would be helpful for safety purpose.

CHAIRMAN: Mr Duncan's question was: there is no stipulation by the Transport Department of any enhanced use of the device, is there?

MR LEUNG KIN WANG: (In English) No.

CHAIRMAN: Nor is there any stipulation as to any enhancement of the capabilities of the device.

MR LEUNG KIN WANG: (In English) No.

CHAIRMAN: Thank you.

MR DUNCAN: I am grateful, Mr Chairman.

Apart from these two documents which we have seen, the one in 2003 and this one in 2017, has the Transport Department at any time required the company to make any particular type of use of the black box?

MR LEUNG KIN WANG: (In English) No.

MR DUNCAN: Just before I leave the document at page 175 of bundle 1, it is said in the last sentence that KMB has given its undertaking to the Transport Department to implement these conditions under the new franchise.

In what form was that undertaking given?

MR GODWIN SO: Maybe I should answer this question, because

I played an important role in the franchise renewal. It's an undertaking, according to page 3997, it was the content of a letter, it was signed by the company, representing the commitment to implement these, so that the matter, the franchise, can be granted by referring the matter to ExCo. That's a commitment on our part.

MR DUNCAN: Would you be able to provide a copy of the letter to the committee?

MR GODWIN SO: (In English) Yes.

MR DUNCAN: Thank you.

CHAIRMAN: This is a standard letter that is issued very close to the time when the franchise is renewed? We've seen these before.

But you're undertaking to do nothing, because there was no enhanced safety capability of the black box that had been stipulated and there was no enhancement of the use that was to be made of it. This was a puff, was it not?

MR LEUNG KIN WANG: That's the requirement from the Transport Department, enhanced safety feature. It's the term used in the paper. We would see how we can make the best use of these features. It's not just about the wording. For example, electronic data processing device is mentioned, and they have certain specifications, and we would take the opportunity to enhance safety.

CHAIRMAN: The only specifications were dated November 2003. Nothing had changed since then.

MR LEUNG KIN WANG: Apart from this undertaking, we would do more. That's the minimum.

CHAIRMAN: Mr Leung, it's not a criticism of you. If the Transport Department, for their own reasons, invite you to undertake to commit to do nothing, you had agreed to it, hadn't you?

MR LEUNG KIN WANG: (Chinese words not interpreted).

CHAIRMAN: Mr Duncan.

MR DUNCAN: Thank you, Mr Chairman.

I want to move on to the second of the areas I indicated I would cover with regards to the black box, and that is asking questions with regard to what data the black boxes in the KMB boxes are capable of collecting and what data they do actually collect. Do you understand that?

MR LEUNG KIN WANG: (In English) Yes.

MR DUNCAN: Thank you. I think you are aware that the committee have heard evidence from a Mr Kulis who is a representative of Openmatics, the company that supplied the black boxes to the company.

MR LEUNG KIN WANG: (In English) Yes.

MR DUNCAN: You are aware of that?

MR LEUNG KIN WANG: (In English) Yes.

MR DUNCAN: Have you had the opportunity of reading his evidence?

MR LEUNG KIN WANG: (In English) Briefly, yes.

MR DUNCAN: What about the written documentation that he provided to the committee? Have you had the opportunity of reading that?

MR LEUNG KIN WANG: (In English) Yes.

CHAIRMAN: I think you are referring to the documentation provided by Openmatics' solicitors?

MR DUNCAN: Indeed, it came through the solicitors. Thank you, Mr Chairman.

In that respect, can I take you to one of the other bundles, BM-1. If you would be good enough, please, to turn up page 64 of that volume, you will see there that the law firm that the chairman obviously had in mind writing with regard to the services provided by the company referred to in that letter. Do you see that letter from the law firm?

MR LEUNG KIN WANG: (In English) Okay.

MR DUNCAN: Then if you turn to page 65, you will see the information with which the committee has been provided from page 65 right through to page 72.

The questions are in black and the answers have been provided in blue. I think that's the correct way of reading that letter.

The first matters I wish to bring to your attention are on page 65. You will see in item 1:

"In written submissions provided to the committee, dated 24 April 2018 ... KMB stated that ...

'Since 2015, KMB has taken the initiative to equip its buses with speed limiters, black boxes and surveillance cameras to monitor the driving performance of the bus captains as well as to assist in accident investigation."

If I could bring your attention, please, to the response in the next three paragraphs:

"Please note that the Openmatics portfolio does not consist of the aforementioned speed limiters and surveillance cameras. However, the black box is part of the Openmatics telematics system as explained below.

Openmatics entered into a supply contract to deliver telematics systems, dated 16th of April 2013 with Kowloon Bus Company ... and Long Win Bus Company ...

Openmatics started offering telematics services by using the first black box system called the 'Mozart box'. Later on, Openmatics replaced the Mozart Box by a successor platform black box called the 'Bach Box'. However, clients can use both systems in parallel as [Kowloon Motor Bus] does."

First of all, I will ask you to confirm that what is

said in those three paragraphs is correct.

MR LEUNG KIN WANG: (In English) It is correct.

MR DUNCAN: Thank you.

I now want you, please, to turn to page 68 of the letter. If I could bring your attention to the second paragraph on that page which is coloured blue, and which reads this:

"What does the term 'BC' stands for?"

Then the following paragraph:

"The Openmatics telematics system installed at KMB can identify", and then four bullets:

"records of speeding; recorded every second and stored together with the related GPS data;

'malpractice' of harsh braking;

Abrupt acceleration;

The corresponding bus registration numbers with the assistance of other systems".

Are you able to confirm that that sets out what data the systems on the KMB bus are capable of identifying?

MR LEUNG KIN WANG: (In English) Yes.

MR DUNCAN: Thank you. Before I go to the next page, there is one matter I would like to take up with you. If you would look down to the next entry:

"The Openmatics telematic system installed at KMB cannot identify:

Route numbers of certain buses".

But then the next paragraph is the one I am now interested in:

"The data are collected as defined by the system. Every second, the system collects the defined data and sends that data every 30 seconds -- if connected to WiFi or other cellular network or via USB -- to the defined FDP server. The information is also stored locally on the telemetry unit (black box) for 30 days. But data from the telemetry unit can be lost if it is not downloaded correctly."

If you look at the bottom of the page, the very last paragraph, there is a repetition of that entry, and it refers to the data being sent to the server every 30 seconds.

Could I then take you, please, to KMB-1 again, at page 72. This again, if I could remind you, is the response of 24 April this year of the company to the committee, the first response.

Could I bring your attention, please, to the last paragraph on that page:

"Black boxes are installed in all buses to capture the real-time information, such as speed, route, door open or close status and Global Positioning System (ie GPS), but there is a delay of about 10 seconds for

transmitting the information to bus headquarters. The data will be kept in the computer under the bus on-board monitoring system ..."

Now, there would appear, at least on the face of those two documents, to be a difference in that, according to the letter from the law firm, the data is sent every 30 seconds, whereas according to the return from the company it seems that the delay or the time at which the data is sent is every 10 seconds. Would you be able to comment on what appears to be a difference?

MR LEUNG KIN WANG: (In English) Yes.

(Via interpreter) Currently, the delay is 30 seconds. We hope to achieve a delay of 10 seconds, and we hope to achieve this by enhancing our servers, and technically we want to enable data to be committed to be transmitted more frequently. So currently the delay is 30 seconds.

MR DUNCAN: So what steps are you taking to achieve a 10-second delay?

MR LEUNG KIN WANG: We will look to enhance server technologies in order to achieve our target of 10 seconds.

MR DUNCAN: When do you expect that to happen?

MR LEUNG KIN WANG: We have no concrete timeline now but we are moving towards that direction.

CHAIRMAN: Can you help me at least by explaining what you mean by "enhance server technology"?

MR LEUNG KIN WANG: The current delay is 30 seconds mainly due to server capacity, and the flow of data would increase. So this is an issue we have to solve.

CHAIRMAN: What server? Whose server?

MR GODWIN SO: I would like to add to what I just said about the difference between 10 seconds and 30 seconds and how we can reconcile the difference.

10 seconds referred to a delay when an incident is triggered, data would be sent after 10 seconds, and if the delay is 30 seconds, data would be transmitted to our headquarters every 30 seconds. So 10 seconds refers to a data delay, whereas for 30 seconds data would be sent to the headquarters every 30 seconds. So the two are referring to different procedures or processes.

CHAIRMAN: I'm asking for an explanation as to what this server is. Whose server is it? Where is it? What function does it perform?

MR GODWIN SO: The server is located in the data centre of our Kowloon Bay depot and the function is to store the data for analysis, to explain certain exceptions.

CHAIRMAN: So its capacity is not sufficient at the moment to produce a 10-second transmission; is that it?

MR GODWIN SO: (In English) Correct.

CHAIRMAN: Thank you.

MR DUNCAN: Are you aware of the fact that whether it's a 30-second gap or a 10-second gap or even a 5-second gap is a matter of choice for the user of the black box?

MR GODWIN SO: For the transmission gap of 30 seconds, that would not affect our analysis of data from the black box. As suggested in another paper, no bus route data is provided, so we would have to store this data and we would have to identify from other systems what the routes are and who the relevant bus captains are, before we can take warning or disciplinary action.

These reports are generated daily, so whether or not the transmission delay is 10 seconds or 30 seconds has no bearing on the task of analysis.

CHAIRMAN: Because there is no real-time analysis; is that it?

MR GODWIN SO: For real-time, yes, correct, we do not perform real-time analysis.

MR DUNCAN: Just if I could have an answer to my question, please.

CHAIRMAN: Mr Duncan, perhaps Prof Lo could ask a question.

MEMBER LO: I just want to clarify. There's this 10-second delay, and then you send the data 30 seconds later, so the total delay is 40 seconds, right? Is that correct?

MR LEUNG KIN WANG: (In English) Let me correct it. At the

moment, every 30 seconds the data, for that 30 seconds, are transmitted through the internet to our server. The 10 delays are equivalent to 30, I mean in terms of meaning. So existing is 30. Our intention is to shorten it to 10. That's the situation.

CHAIRMAN: Thank you.

Mr Duncan, your question.

MR DUNCAN: Yes. The question I'm asking is this. Do you realise that it's a matter of choice for the user of the black box as to what the time delay should be: 30 seconds, 20 seconds, 10 seconds or 5 seconds? It is just a matter pertaining to the parameters; are you aware of that?

MR LEUNG KIN WANG: This is a decision. It depends on technical consideration, resources, and whether we feel that this is conducive to our work on how data can be transmitted to the system sooner.

MR DUNCAN: Technically, it's feasible?

MR LEUNG KIN WANG: It should be.

CHAIRMAN: What are the financial implications for increasing the capacity of the server to permit transmission in 10 seconds rather than 30 seconds, in broad terms?

MR LEUNG KIN WANG: We haven't looked into that but it would not be a small sum. We hope with the technological

advances we can achieve that goal sooner. It has to do with data volume and data traffic and data storage.

MEMBER AUYEUNG: Could it be just a matter of having a much more powerful server? Could that be the solution?

MR LEUNG KIN WANG: Not necessarily. We are looking into ways to improve or increase the speed of traffic.

MEMBER AUYEUNG: Thank you.

MR DUNCAN: Could you look, please, at page 69 of BM-1, again the same enclosure to the law firm's letter. If you look at the second portion in blue on that page, and the second paragraph:

"The telematics system installed at KMB is capable of recording deceleration and acceleration of the buses. However, the deceleration and acceleration of the buses as feature recording this on an ongoing basis is not enabled."

If I could just supplement what is said there by taking you to the oral evidence of Mr Kulis, who was a representative of Openmatics. You will find this in the transcript for Day 6, transcript volume 3, Day 6, page 146.

Can I bring your attention to line 21, please. Line 21 starts with the words "Mr Derek Chan" who is the gentleman sitting beside me, one of the counsel for the committee, and he asks this question:

"In the middle of the page, again, in blue, that is the answers from your company, it is stated that ..."

And he has referred to the same passage I just referred you to, where it is said that the deceleration and acceleration is not enabled, and the question he asks is this:

"Are you able to elaborate or explain to us what is meant by this paragraph, especially the part about recording acceleration and deceleration on an ongoing basis?"

Mr Kulis responds as follows:

"Yes, I'm also not sure if I will get the point of this sentence correctly, but I think the sentence is referring to the situation that these values, acceleration and deceleration, for the KMB we are using to raise realtime warnings, not for recording them to the data. This is my understanding of this declaration. So we have the system, the driver feedback device, which is warning the drivers in the realtime if they [are] accelerating too much or decelerating too much. For this propose we are using the values of acceleration and deceleration, we are not storing these values for the historical data. That's my understanding of this sentence declaration.

MR DEREK CHAN: I see. Okay.

So your understanding is that the acceleration and deceleration are not recorded in the black box data systems?

Is that correct, Mr Kulis?

MR KULIS: Yes, that's my understanding. Because another function of the -- our box is the record, the several data, as the black box feature. There are maybe 20 different values, but not the acceleration and deceleration."

So we will pause there. So what Mr Kulis seems to be saying is that although the KMB black box is capable of storing the data pertaining to acceleration and deceleration, that facility has not been enabled for KMB. Now, I would ask whether the company would wish to comment on that, in the light of the evidence given this morning by one of you that the deceleration and acceleration data is in fact stored and is in fact accessed in the context of monitoring driver behaviour.

MR LEUNG KIN WANG: It's correct to say that it is not stored, data are not stored, on the black box, but the information on acceleration and deceleration will be transmitted back to our server, so it's there.

MR DUNCAN: So are you saying it's stored in the server?

MR LEUNG KIN WANG: Correct.

MR DUNCAN: Once it is stored in the server, how would the

persons in the company get access to that data, in a practical sense?

MR LEUNG KIN WANG: The information in the server would tell us the information on acceleration and deceleration, and then we can see whether there is any exceedance of standards or norms, extreme acceleration and extreme deceleration, leading to improper driving behaviour, as an example. We will use the information to identify the relevant bus captains so that we can review the driving behaviour by some other department in my company. That's how we use the information stored.

CHAIRMAN: Mr Duncan's question was: how does the person access that information? What happens; what steps are taken? That was the question.

MR LEUNG KIN WANG: The information is in the computer. We have some computer software to deal with such information, which would mean that some reports would be generated through such software. The information is only about information of that black box in question, acceleration/deceleration, et cetera. But there is no information on the bus routes or the bus captains concerned. So we have to process the information before the reports can be generated and some other departments in my company can then take follow-up action.

CHAIRMAN: So the person requests the computer to give

information about a particular black box? Is that what you are saying?

MR LEUNG KIN WANG: It's not that.

CHAIRMAN: Then I missed it. Try again.

MR ROGER LEE: Let me supplement. The information in relation to a black box, that is the information on acceleration and deceleration, will be transmitted to the server from the black box, and in that server we can tell the entire journey from the start to the end. We can check information on the entire journey, and also the position of the relevant stops --

CHAIRMAN: Forgive me for interrupting. Is this done by going to a particular black box, "We want information from this black box"? Presumably, you can tie up the black box with a bus number; is that how it's done?

MR ROGER LEE: That's correct.

MR LEUNG KIN WANG: (In English) At the back end we can --

(Via interpreter) Yes, we can match the two. The number of black box, it is connected to the number of the bus. We know which bus has got this particular black box. You know the number of the black box and you know the number of the bus.

CHAIRMAN: So the operator who is searching the server is asking for data in respect of a particular black box and therefore bus; is that it?

MR LEUNG KIN WANG: (In English) Yes. Yes.

CHAIRMAN: Before I ask Mr Duncan to resume, let me ask you this. Why, if the black box is capable of storing the data of deceleration and acceleration, is it not stored there as well as being transmitted to the server?

MR LEUNG KIN WANG: Let me explain. The black box records on a second-to-second basis the location, the speed of the time, the coordinates, and we compare the speed of this second with that of the last second. If the acceleration is over a pre-set value, it's 4km at present, if it exceeds the value of 4km, then there would be an alert for the bus captain, by a light and also by a sound alarm.

If, for this second, the alarm has been triggered, then the data of the fact that the alarm has been triggered would also be recorded. If, for a particular second, the speed compared with that of the last second is lower than a set value 7km -- it used to be 8km -- that is to say it is a very abrupt deceleration, likewise, the warning device would be lit and a beep will come off and the warning for abrupt braking would also be recorded at that moment.

So all these warnings during that second or moment would be transmitted back to our server, so we can check whether warnings were issued in that second. So the

number of reminders or warnings are stored in our server, so we know when warnings were issued to bus captains and for what reason. All this information is available in our servers.

CHAIRMAN: So does it come to this, that whereas speed is recorded on a black box every second, as is required by the Transport Department, deceleration is only recorded if it crosses the thresholds you have just identified, namely an increase in speed of 4 kilometres per second and a decrease of 7 kilometres? Is that it?

MR LEUNG KIN WANG: I would like to supplement. I forgot to mention speeding. Likewise, if the speed exceeds a pre-set value, that second, right now our threshold is 70kph, if the speed exceeds 70kph, the device would go off, and in that second the warning given by the device would be recorded if the speed of the vehicle exceeds 70 kilometres per hour. So in case of harsh braking or sudden deceleration, if it exceeds the pre-set value, it would be recorded, and the second-by-second record would be transmitted to our servers.

CHAIRMAN: When was the speed excess set at 70 kilometres per hour?

MR LEUNG KIN WANG: On 23 February, we adjusted the speed threshold to 70. It used to be 75.

CHAIRMAN: That's 2018?

MR LEUNG KIN WANG: Yes.

CHAIRMAN: Yes.

Mr Duncan.

MR DUNCAN: Thank you, Mr Chairman.

Just so I understand this completely -- I want to take you back to the information that you provided the committee in your first submission and then what was provided in the second submission.

Could I take you to your first submission at page 50. I've taken you to this page and indicated that I was interested in the second sentence of the question:

"What information from these devices pertaining to monitoring the driving performance of bus captains is captured, and how is the collected information used to enhance driving safety?"

In your answer, with regard to the capturing of information, the only matter which is mentioned is vehicle speed and vehicle location. There is no mention there of acceleration or deceleration. Is there any reason for that?

MR LEUNG KIN WANG: Vehicle speed is available second-by-second, and I explained the difference between speed at this moment and the next equates to acceleration or deceleration. That's why we do not have another device to record deceleration or acceleration,

because we can calculate this based on the difference in speed.

CHAIRMAN: This answer is not a complete answer to the fact, is it, as Mr Duncan is suggesting to you? The question is why.

This is 12 words, that was the answer, to what was an open-ended question, seeking assistance from your company.

MR LEUNG KIN WANG: I can only say that the black boxes capture vehicle speed.

CHAIRMAN: Amongst other things.

MR LEUNG KIN WANG: (In English) Among other things, yes.

CHAIRMAN: The question is why didn't you mention the other things. I'm asking you the question because you are the person answering. I don't know who made this submission but somebody wrote this and I'm asking why it's less than complete.

MR LEUNG KIN WANG: There are more than 20 parameters including time, date, vehicle speed, engine, the number of revolutions per minute.

CHAIRMAN: So why are they not mentioned here?

MR LEUNG KIN WANG: These are the two main data to monitor bus captains.

CHAIRMAN: Mr Duncan.

MR DUNCAN: I'm going to move now to the third area which

I indicated I was interested in and -- we've touched on this already but -- sorry, we haven't touched on this yet. The third area is what use is made of the data being collected to provide real-time assistance to the bus captain? That's the area I'm now interested in.

I'm going to ask you, with respect, to go to page 65 of BM-1 again, the letter from the law firm. Halfway down the page, in blue, it is stated:

"The telematics system consists of the three main parts".

The first part he has referred to is the driver feedback device. There's an introduction:

"This device provides visual and acoustic feedback to the driver about four basic threshold values (engine revving, speeding, idling, and acceleration). It is placed in the driver's cabin and connected to the Openmatics on-board unit.

Driver feedback overview means the driver will be informed about the information by beeping and illuminating four LED lights if the - calibrated - thresholds will be reached."

Then you have further details of the engine, the speed, the idling and the acceleration set out on that page.

Does this accurately reflect the real-time driver

alert system which is installed in the KMB buses?

MR LEUNG KIN WANG: Correct.

MR DUNCAN: If you would then be good enough, please, to turn the page, so I can ask questions about thresholds. At the top of page 68, the writer of this document says this:

"To our knowledge, the driver feedback system was installed in the accident vehicle."

Referring to the Tai Po accident.

"The driver feedback thresholds for the accident bus were initially defined by KMB and then calibrated by Openmatics to fit KMB's defined parameters."

Do you confirm that to be correct?

MR LEUNG KIN WANG: Yes, it's correct.

MR DUNCAN: "According to the history, the four thresholds on the accident vehicle were defined by KMB and then calibrated by Openmatics latest at [24 July] 2017."

Is that correct?

MR LEUNG KIN WANG: I would like to add one point. Yes, for acceleration and deceleration, for tilting angle, it says 44 here, 44 degrees. We never had any defined threshold. We did not provide any value because we could not identify any reference values and it wasn't provided to ZF.

CHAIRMAN: Sorry, by KMB? By KMB? It wasn't provided by

the company?

MR LEUNG KIN WANG: (In English) By KMB.

CHAIRMAN: Yes. Were you aware that this threshold had been inputted into the Tai Po bus, 44 degrees?

MR LEUNG KIN WANG: Yes, we are aware of that.

MR DUNCAN: Are you aware that Mr Kulis explained that that is really a default provision, which means there is no provision for a tilting parameter at all?

MR LEUNG KIN WANG: Yes, I understand.

CHAIRMAN: In effect, it disabled this function? Would that be fair?

MR LEUNG KIN WANG: Correct.

MR DUNCAN: The document continues to say:

"According to our best knowledge at the time of the accident, the thresholds were", and they are there set out; we can read them for ourselves.

CHAIRMAN: Perhaps, for the record, you would read them out for us, Mr Duncan.

If I can help, acceleration is set in metres per second, is it not, 1.15?

MR LEUNG KIN WANG: (In English) 1.15 metres per second squared.

CHAIRMAN: Squared, yes.

Deceleration set at 2.3 metres per second squared.

Speed, set at kilometres per hour, 75; is that

correct?

MR LEUNG KIN WANG: (In English) Yes.

CHAIRMAN: And there is a second threshold configuration, speed in areas.

MR LEUNG KIN WANG: (In English) Yes.

CHAIRMAN: As opposed to speed, and that is also set at 75?

MR LEUNG KIN WANG: (In English) That we are not aware of.

CHAIRMAN: I should say 75 kilometres per hour. But you are not aware of the second one?

MR LEUNG KIN WANG: (In English) No.

(Via interpreter) Correct.

CHAIRMAN: Thank you.

Mr Duncan.

MR DUNCAN: Then there's a configuration of idling values and engine values; do you see that?

CHAIRMAN: 3,000 revs per minute, isn't it?

MR LEUNG KIN WANG: (In English) Yes.

(Via interpreter) Yes.

MR DUNCAN: Were these the thresholds that existed not just in the bus which was involved in the Tai Po accident but on all Kowloon Motor Bus buses at that time?

MR LEUNG KIN WANG: (In English) Yes.

CHAIRMAN: And they will been defined by KMB and calibrated by Openmatics; is that correct?

MR LEUNG KIN WANG: (In English) Yes.

MR DUNCAN: Just dealing with the two matters pertaining to speed, if I understand things correctly, if any of the particular buses exceeded a speed of 75 kilometres per hour, the driver would experience a beeping sound and also a blinking light in the cabin; is that correct?

MR LEUNG KIN WANG: (In English) Correct.

MR DUNCAN: What about the situation if the bus was travelling at, say, 60 kilometres per hour in a 50 kilometre per hour speed limit zone? Would there be any sort of alert to the captain?

MR LEUNG KIN WANG: (In English) Not at the moment.

MR DUNCAN: Would it be desirable that such a system existed?

MR LEUNG KIN WANG: Yes, yes, absolutely.

MR DUNCAN: Could I in this respect take you to the evidence of Mr Kulis, at Day 6, volume 3, at page 150.

If I could bring your attention to line 7 on page 150, where Mr Chan has introduced the subject by saying:

"The next parameter under tilting angle is the configuration of excessive speed values.

In this screenshot we can see two parameters under that. One is speed and one is speed in areas, and [in] this case, both are set at 75 kilometres per hour.

Now, firstly, a more basic question. Just to see if

my understanding is correct. So if the bus in this case exceeds 75 kilometres per hour, the threshold would be considered crossed; is that correct?"

Then at line 17, Mr Chan asked this question:

"What is the difference between these two parameters, speed and speed in areas?"

Perhaps you would be good enough to read to yourself what follows, from line 19 right through to page 155 at line 9. Just take your time to read that through, please.

Have you been able to read that through?

MR LEUNG KIN WANG: (In English) Yes.

MR DUNCAN: If I understand that evidence correctly, Mr Kulis is suggesting two different ways whereby there may be the two different speed limits set up. Is that your own understanding?

MR LEUNG KIN WANG: (In English) Yes.

MR DUNCAN: Thank you. The first is what we can see on page 151. This is at line 2:

"... you need also to configure the areas in some other window, or enter some geo-fencing into the system."

And at line 7, Mr Chan's question:

"Obviously the bus, if you wish to take advantage of the speed in areas parameter, the system would have to

know where the bus is to trigger that parameter."

Then it concludes at line 23, in that part:

"Of course they need to configure or in cooperation with us, we need together to configure the areas, we need to define results, the rules, then the system is capable."

So the commission has heard -- I'm not sure whether you are aware of this -- that Citybus engaged that system, where they have defined, I think, 25 areas and there is provision for feedback for those 25 areas. Are you aware of that?

MR LEUNG KIN WANG: (In English) Yes.

MR DUNCAN: So that's one.

The second one, in which I'm a little bit more interested, is the utilisation of the digital mapping. You can see, I think, mainly from page 154, from line 8, where Mr Chan poses this question to Mr Kulis:

"If I have a digital map that is able to show different speed limits on different roads, would I be able to use that combining with the system currently available here, to configure to set different speed thresholds depending on where the bus is on the digital map? Or is that not possible under the system?"

Mr Kulis responds:

"Definitely it is possible."

And he then proceeds to give an explanation.

Now, as I understand it, there is available in Hong Kong digital mapping of our roads; is that correct?

MR LEUNG KIN WANG: (In English) Yes.

MR DUNCAN: So given what you said a few moments ago, that it would be desirable to have a system whereby speeds in excess of 50 in a 50 zone would be detected, what is your reaction to the possible implementation of either of these two possible routes suggested by Mr Kulis?

MR LEUNG KIN WANG: We are glad to learn about this, and, well, because of the IRC, we will be able to have access to official digital maps.

The speed limit is an important matter, in respect of different road sections. If the information is incorrect, it would have grave consequences. So we have been talking to different parties on how we may know the speed limits in different locations, different areas, so that when the vehicle reaches a certain location, we will know that it is 70kmh or 50kmh as the limit, because right now we can't tell one from the other, so we set it at 70kmh.

If we know that in that particular location the speed limit is 50kmh, then the alarm will be triggered. We have conducted a test drive, by incorporating the road speed limits into the black box, so that the road

speed limit is known by the system, and the test drive tells us that it's a possible solution.

We will explore on how this may be taken forward, and if it is tested to be feasible it will be incorporated into our fleet, so that when the speed limit, whether it's 50kmh or 70kmh, is exceeded, an alarm will be triggered. That would represent a great improvement over the current situation.

MR ROGER LEE: The map is important, because the speed limit can change from time to time. For example, if there is an accident or if there is a road excavation, the limit may be changed very quickly. So we need to have a so-called live map. We have just received the digital map and the Openmatics have helped us to incorporate that into the system. We have a vehicle fitted with this new system and we have conducted a test drive. So there will be real-time information provided to the bus captain that the limit has been exceeded.

But geo-fencing, it will take a lot more time, because that would have to do with the control over acceleration. We have one vehicle fitted out for that trial so far.

MR DUNCAN: Why did you say that "because of the IRC we would be able to have access to the digital maps"?

MR LEUNG KIN WANG: That's just my gut feeling. Maybe it's

just a coincidence.

CHAIRMAN: Where did you get the digital map from?

MR LEUNG KIN WANG: (In English) From government.

CHAIRMAN: From which department of government?

MR LEUNG KIN WANG: (In English) Transport Department.

CHAIRMAN: Have you asked them before?

MR LEUNG KIN WANG: (In English) Not really.

CHAIRMAN: When did you ask them?

MR LEUNG KIN WANG: (In English) I didn't ask.

CHAIRMAN: How did you come by it, then?

MR LEUNG KIN WANG: (In English) I don't know. I just received a letter from them.

CHAIRMAN: So the Transport Department informed you that it was available?

MR LEUNG KIN WANG: (In English) That's correct.

CHAIRMAN: When was that?

MR LEUNG KIN WANG: (In English) In June, the letter dated June 7.

CHAIRMAN: June 7?

MR DUNCAN: So no information from the Transport Department prior to June of this year that digital mapping was available?

MR LEUNG KIN WANG: (In English) No.

CHAIRMAN: Would you be prepared to provide us with a copy of this letter?

MR LEUNG KIN WANG: (In English) Yes.

CHAIRMAN: Thank you, in which case, let's have it copied now. Somebody can come and take the letter and physically copy it. It's not marked in any way, is it? We'll just photocopy it and we can return it to you. Yes, Mr Duncan.

MR DUNCAN: Thank you, Mr Chairman.

It would be fair to say, wouldn't it, that Kowloon Motor Bus vehicles put up far greater mileage on 50 kilometre per hour roads than 70 kilometre per hour roads?

MR LEUNG KIN WANG: I can't answer this question because I need more data.

CHAIRMAN: You can take solace from the fact that Citybus were unable to answer that question as well, but we have maps with the speed limits of the roads of Hong Kong, and we've got them coloured, so we can tell at a glance that there are many more roads that are 50 kilometre per hour roads than 70 kilometre per hour roads.

MR LEUNG KIN WANG: (In English) I think it's about the roads that our buses run on.

CHAIRMAN: No, we understand that as well. We have that as well. We can put your bus routes on top. But broadly speaking, I'm sure you can answer the question: there are many more 50 kilometre per hour roads that the buses

drive down than 70 kilometre per hour roads, are there not? If you still can't answer, please feel free to say so.

MR DUNCAN: Can I help you out: do Kowloon Motor Bus vehicles regularly travel on roads which have a speed limit of 50 kilometre per hour?

MR LEUNG KIN WANG: (In English) Yes, but you know, the number of trips that you go on that journey, on that road, may be different. You may have buses very frequently running on ... So, you know, I'm an engineer. I have to get the facts before I can tell you.

CHAIRMAN: I think perhaps you ought to be a politician.

MR DUNCAN: Can I just ask this before I leave the topic: what steps prior to the formation of the committee had KMB taken to explore whether it could have an alert system on buses which exceeded the 50 kilometre per hour speed limit?

MR LEUNG KIN WANG: When the speedometer reaches 50 kilometres per hour, we once prompted the captain, we would not know which route the captain was on, we once reminded the captain that he reached 50 kilometres per hour. But since we could not identify the locations of the buses, we still wanted to prompt captains that they have exceeded 50 kilometres per hour when they are in urban areas, but in some cases, some bus captains might

find these alerts unnecessary. So after pilot testing this approach for a short time, we discontinued the practice because we could not determine whether the bus was on a 50 kilometre zone or 70 kilometre zone.

CHAIRMAN: So, as I understand what you are saying, you tried a pilot test where you had an alert go off whenever you went over 50 kilometres per hour but that annoyed the bus drivers because presumably they were driving quite a lot of the time in 70 kilometre per hour areas and you gave up?

MR LEUNG KIN WANG: (In English) Yes, Correct.

CHAIRMAN: When was that?

MR LEUNG KIN WANG: (In English) Some years back. I can't remember.

(Via interpreter) So this was not from the telematics system or the black box.

CHAIRMAN: This was from the speedometer?

MR LEUNG KIN WANG: (In English) That's right, yes.

CHAIRMAN: We are going to take a short break at some stage in the afternoon because it's a long time for everybody, to stretch your legs and have a drink. If this is convenient, please say so. If you want to finish a topic, say so.

MR DUNCAN: Just one question, Chairman, if I may.

The system was purchased from Openmatics in 2013,

I think.

MR LEUNG KIN WANG: (In English) Correct.

MR DUNCAN: And it would have been at that time that the parameter of 75 kilometres per hour would have been installed into the system.

MR LEUNG KIN WANG: KMB established this value and they informed Openmatics.

MR DUNCAN: So, between 2013 and the time the committee was formed, did you look into the possibility of this system capturing speeds in excess of the 50 kilometre speed limit, with the help of the GPS system? Did you investigate that at all during that period?

MR LEUNG KIN WANG: I am not sure, but I believe that we once discussed this issue with the manufacturer.

MR DUNCAN: Can you give us any idea as to when that was?

MR LEUNG KIN WANG: (In English) Not that I can recall.

CHAIRMAN: Can you recall who was involved from the company side of things?

MR LEUNG KIN WANG: (In English) I can't recall.

CHAIRMAN: Mr Duncan, we will take a break now. We will take 15 minutes. Thank you.

(3.53 pm)

(A short adjournment)

(4.08 pm)

CHAIRMAN: Yes, Mr Duncan.

MR DUNCAN: Thank you, Mr Chairman.

Gentlemen, would you please have in front of you the transcripts bundle for Day 11, that will be bundle number 4, and I'd like you to turn up, please, page 73 of that transcript.

If I could pick it up, please, at line 14, where Ms Maggie Wong, counsel for the committee, is asking questions of Mr Kelvin Yeung. I think, gentlemen, you will recognise Mr Kelvin Yeung as being a current employee of the company. Is that correct?

MR ROGER LEE: (In English) Yes.

MR DUNCAN: So at line 14, Ms Wong poses this question:

"We have heard also from Mr Alok Jain's evidence that during one of the meetings, they explored the idea of having a score card system for drivers, and one of the systems that was explored is the GreenRoad.com system. And what it does is it gives an analysis of the driver's driving behaviour, and it would fall into three different categories, like red, amber and green."

Then if we could jump, please, to page 75, at line 8, where we have Mr Kelvin Yeung saying:

"This system should have been deployed. I'm not very sure about the name mentioned by Mr Alok, but from what you described, it is very similar to one of our current systems."

The chairman then asks:

"What is that system?"

Mr Kelvin Yeung then gives this answer:

"As I said, there would be beeps and lights emitted, and lights of three colours would be shown depending on driving behaviour. And these lights would go on when the bus captain beeped the Octopus card at the terminal, the time of the next bus would be shown, and lights of three colours would be shown to represent the performance of the captain. Green is the best, yellow, and red means something to be improved. And this system is still in use."

The chairman asked the question:

"So when the bus captain comes off duty and he taps his Octopus card, where is this information displayed for him?"

Mr Kelvin Yeung replies:

"It would only be displayed the first time a bus captain beeps his Octopus card in the morning. I'm not sure whether it would show the records for the previous days, but what I'm sure is that the records for the same day would not be shown. So no information is displayed during sign-off.

Chairman: Are you saying the information is displayed at the time of sign-on?

Mr Kelvin Yeung: Yes, information is displayed during sign-on.

Chairman: And the information relates to what time period?

Mr Kelvin Yeung: I would have to check the period concerned. But this is not same-day information. It refers to a past period, but as for the range of that period, I have no such information on hand.

Chairman: And where is the display? Where does the bus captain see this?

Mr Kelvin Yeung: At each bus terminal there would be a computer. When a captain returns to the terminal he would have to beep his staff card to obtain such information. The computer would be located outside the kiosk at each terminal facing the bus captains?

Chairman: And the computer screen depicts what?

Mr Kelvin Yeung: One of the three colours would be displayed to the captain, red, amber and green."

So having taken you through that, my question is: do you confirm that this green/Yellow/red system currently exists?

MR LEUNG KIN WANG: (In English) Yes.

MR DUNCAN: Could you describe, please, what the basis of this scheme is, how it works?

MR LEUNG KIN WANG: It's an appraisal system of the bus

captain's performance. It gives you -- it's based on some scores. Four things are assessed under this system. First, excessive idling, that is prolonged idling; second, harsh braking; thirdly, sudden acceleration; finally, speeding.

For these four conditions, each bus captain has to engage in multiple trips per day, so these four criteria would be assessed over the week, to assess the captain's performance. For the criteria I mentioned, we have certain standards. If a captain performs well, the bus would operate more smoothly and passengers would be more comfortable and the fuel consumption of that bus would be more satisfactory and the bus would be greener. In other words, the driving experience would be equal to safe.

According to the assessed scores, the best captains would be given green, and there would also be an amber class and red class. So there are three classes. So scores would be given on a weekly basis. When bus captains report duty at termini, when they sign in, their scores for the seven days preceding the period ten days ago would be displayed. Red and amber performance classes would not be shown, but there would be reminders displayed to the captain.

For the screens at the termini, they might be

visible to other people sometimes. In other words, certain information is displayed to the captains. When a bus captain accesses our staff site, he can check his scores for the past eight weeks. So, when they report duty at the bus terminus, the screen would show their score, and as for details, the bus captain can check the information on the staff website. This way, the bus captains can know more about their driving performance and they can seek to make improvements as appropriate.

So this is the purpose of our design. It was launched in November 2015.

MR DUNCAN: So it's there for the benefit of the bus captain, primarily?

MR LEUNG KIN WANG: (In English) Yes, and for the benefit of the company and the passengers as well.

MR DUNCAN: On what data is the classification of red, amber or green based?

MR LEUNG KIN WANG: I have no data on hand on how the colour is classified, but most of the time it's green; there is a formula.

MR ROGER LEE: (Chinese words not interpreted).

MR LEUNG KIN WANG: (In English) Sorry, I misunderstood. I repeat --

(Via interpreter) There are four categories including excessive idling.

CHAIRMAN: There is no need to repeat the categories; you were very clear about that. Perhaps Mr Duncan's question is this. What is the threshold that is set for these four categories?

MR LEUNG KIN WANG: There are two thresholds, one for excessive idling, no more than 15 minutes. No more than 15 minutes. For harsh braking, the threshold is based on the black box setting. For sudden acceleration, it follows the black box setting. For speeding, again it follows the black box setting. In other words, for speeding, the threshold is 70; for sudden acceleration, 4 kilometres per hour per second.

MR DUNCAN: It seems that the information is communicated to the driver when he signs on for the day; is that correct?

MR LEUNG KIN WANG: For each journey or trip, at the start and end of the journey, the captain would tap his card at the terminus. So every day the information is displayed twice to the captain. If the information is displayed all the time, the captain might feel annoyed, so twice a day the score of the captain would be displayed.

MR DUNCAN: Is he tapping on the screen with his card, is that how it works, or does he insert a card or something?

MR LEUNG KIN WANG: When the card is tapped, the information is shown on the screen.

MR DUNCAN: Does the classification of red, amber or green have any impact with regard to the sorts of awards we were discussing this morning?

MR LEUNG KIN WANG: (In English) No.

(Via interpreter) No. It was only true at the beginning phase, for a short period of time. So, basically, the system serves to inform the captains of their performance so they can improve their driving techniques.

CHAIRMAN: Can I ask you to help me further about the criteria that apply. You've told us about the four categories. You have given us the thresholds. What if one was to have one speeding in excess: does that stop you having a green score? Or what if it was one excessive acceleration? How does this work?

MR LEUNG KIN WANG: (In English) There's a formula for that.

CHAIRMAN: Are you prepared to tell us what the formula is? Do you know what the formula is?

MR LEUNG KIN WANG: (In English) There's a formula for that.

(Via interpreter) Can we share that with you later?

CHAIRMAN: Certainly. No doubt the formula is rendered into writing. Is it something that is on the staff website so that the bus captains also know what the formula is?

MR LEUNG KIN WANG: On the website, bus captains can see their own performances, so only green, amber or red would be displayed, and there are four categories being displayed. So the captain would see the colour for the respective category. The actual scores would not be displayed but only the colours.

But if the bus captain is in the red, we would remind them to be gentle when they accelerate or brake, they should also minimise idling time, et cetera. So we would remind them of the respective improvements needed.

CHAIRMAN: Please provide this formula. Thank you.

Mr Duncan.

MR DUNCAN: Is there a circular or a document of some sort which explains to the drivers what the purpose of this scheme is and how it works?

MR LEUNG KIN WANG: Yes. We issued notices and posters.

MR DUNCAN: Would you be able to provide some samples of those as well, please?

MR LEUNG KIN WANG: (In English) Okay. Yes.

MR DUNCAN: Have you received any feedback from the drivers or from the unions as to how they regard this particular score card system?

MR LEUNG KIN WANG: No formal feedbacks were given, but from communication with captains we were aware of their feedbacks. They also knew that this is not an award

scheme. This is an exercise to inform captains of their driving performances.

MR DUNCAN: What proportion of captains would consistently get a green rating?

MR LEUNG KIN WANG: According to preliminary figures, most captains would receive a green rating. The percentage -- about 1 per cent of the captains would get a yellow and few captains would get a red.

MR DUNCAN: Hardly any would get a red if only 1 per cent get yellow; would that follow?

MR LEUNG KIN WANG: For example, for the week of 15 to 22 July, there were nearly 90,000 records of green, or rather 69,000, 69,824 cases of green, 800-plus cases of amber, and eight cases of red. For the week before that, from 8 July to 14 July 2018, 61,010 cases of green; for amber, 768 cases; for red, two cases.

MR DUNCAN: If I could take, perhaps, a relatively extreme example: what about a driver who had been constantly speeding in a 50 kilometre speed zone but travelling less than 70 kilometres per hour, and driving into roundabouts with the bus tilted? Under this scheme, he would still command a green rating, would he not?

MR LEUNG KIN WANG: We do not know what the location is or whether the bus captain is in a 50 kilometre zone, so it cannot be determined. So only speed is displayed.

MR DUNCAN: So he'd end up a green?

MR LEUNG KIN WANG: (In English Yes.

MR DUNCAN: Do you have any feedback as to whether the drivers really take any notice of this scheme?

MR LEUNG KIN WANG: This is only one of the ways to tell how captains drive. There are four other criteria, including excessive idling, harsh braking, sudden acceleration and speeding. We can see other reports. This is just a colour classification of red, amber and green, to inform captains, but we have other reports in place to assess drivers.

So for certain captains on red, we would know about the details, and if they speed in a 50 kilometre zone we can deal with it through other reports. So the management would look at the situation.

There are officers responsible for monitoring their performance. This green/amber/red system is a straightforward system to inform the captains of their performance, just one of them.

CHAIRMAN: Mr Duncan's question was not what notice you take about how drivers drive; it was whether they take any notice of this green/amber/red system.

MR LEUNG KIN WANG: Every day, when they tap their card, they have two opportunities to be informed of their performance, and they can also see their own performance

through the website. So the captain is aware of the grade that they have got.

MR ROGER LEE: It's just provided as a reminder, a gentle reminder, but it is very individual. Bus captains have individualistic driving behaviour. We are just telling them the basic information so that they at least know how they are assessed, how their performance is assessed. Of course, we can provide more information, as the next step. We can provide more detailed information in the future. We also have plain-clothed inspectors and also complaint investigation. This is something designed to give space for self-improvement by captains.

CHAIRMAN: Mr Duncan.

MR DUNCAN: Does it function effectively, efficiently? I mean, does it work in a technical sense? Are there any problems with it?

MR LEUNG KIN WANG: It can be better. If the data are more real-time in nature and if it can more accurately reflect the driving behaviour. As this example given suggests, if he is speeding in a 50kmh road section, the system won't be able to tell. And if there's a digital map to indicate that the driver is speeding in a road section with 50kmh as the speed limit, the scores will be very different.

At present, that's the best we can do with the current system, but if there's a better way to reflect the actual situation, we will certainly strive to make improvement along that line.

MR DUNCAN: My question was more related to accepting the current system. Does it work efficiently, in the sense the drivers know the system works and they utilise the system and if they tap their card it actually works? So in a practical sense does it work efficiently?

MR LEUNG KIN WANG: (In English) Yes.

MR DUNCAN: I ask that because of what appears in a miscellaneous bundle, number 3, at page 899. Could you turn that up, please.

CHAIRMAN: I think it's to be found in miscellaneous bundle 2, still. At least it is in my version.

MR DUNCAN: Page 899.

You probably have not seen this document, gentlemen, so I will take you through the relevant parts in a moment, but I think Mr Lee at least will be aware that the chairman and members of the secretariat of the committee visited a number of the termini and depots last Friday, 3 August, and if I can explain, these are the notes that were drawn up after the meeting and after the visit.

The first one which is documented on page 899 is

a visit to the Sha Tin New Town Plaza terminus, and I'm interested in the last entry on that page. Perhaps I should start off with the reference under "Photos are at annex A". There's a reference during the visit the committee also talked to three bus captains and learned certain things. So there was a discussion between the committee and three of the bus captains.

Then resuming at the last dash on the page:

"The same bus captain subsequently demonstrated [to the committee] the use of the October/staff card terminal at the bus regulator's office."

Then there's a reference to what Mr Kelvin Yeung had said at the hearing; we have just been through. If I could pick it up in the second-last line of the page:

"The bus captain having tapped his Octopus staff card ... the computer screen displayed a white screen with a message in blue-coloured letters, reminding the captain to drive carefully within the rainy conditions of the day. The screen then showed the details of the next bus trip that the bus captain was assigned to drive. No colour-coded messages, boxes or screens were noted. When asked about whether [the captain saw] colour-coded messages displayed on the screen when he first reported for duty that day, the captain gave a negative response".

So we have that report. Then if I could take you to page 902, which refers to the visit to the Luen Wo Hui bus terminus, and the last entry, the captain was also asked about the colour-coded boxes or screens, and the answer was also negative. The committee observed "that when a bus captain tapped his Octopus/staff card at the bus regulator's office, the same white screen with a reminder message in blue-coloured letters, followed by details of the driving duties of the bus captain was displayed."

Then item (E), the Tuen Mun depot, page 903, the reference halfway down there, during the visit the committee also talked to a bus captain resting in the sleeping room and learned from the KMB staff present at the depot that, and it's the second bullet, that the bus captain was aware of the colour-coded messages, boxes or screens and he described it as a monitoring mechanism on whether the bus captain had practised eco-driving. He was aware that green colour generally signalled everything was fine, amber meant that a captain would need to improve, while red generally depicted problems with the bus captain.

Then finally, the Shan King bus terminus, page 904. We have reference to the committee talking to three bus captains at the terminus and learning from the bus

regulator and the bus captain that, and the third bullet down, the other two bus captains were invited to show the effect of tapping their Octopus/staff card at the bus regulator's office when reporting for duty. The same white screen with a reminder message in blue-coloured letters, followed by details of the driving duties of the bus captain was noted. No colour-coded messages, boxes or screens were noted. When one of the bus captains was asked whether there was a screen which refers to their Octopus/staff card on the day of the visit, the bus captain replied that she could not remember as she did not really care about the screen.

I appreciate of course that you weren't present and it's not fair to ask you to comment on that, but are you able to offer anything with regard to the screens apparently being tapped but then simply reminding the captain to drive carefully and showing details of the next trip, but apparently not showing the green, amber or red? Are you able to comment on that at all?

MR LEUNG KIN WANG: Well, there may be a reminder of the rainy conditions on that day. Yes, that's a reminder.

The amber message is not displayed every time. We don't want to give too many reminders, especially when they have to make frequent trips and they will have just

spent a little bit of time at the terminus, and then the message is not shown on that occasion. But I cannot rule out technical problems of individual terminus. We have to look into whether there is any technical hiccup, and also whether, in terms of publicity, some bus captains are not really fully aware of this three-colour message system. We may have to do more. But we still think that this is a good way to tell bus captains how they have performed.

As for how we calculate the scores and whether the scores should be fine-tuned to more accurately reflect the performance, I think we should have to work harder on that.

MR DUNCAN: Are you able to tell us when the bus drivers were last informed about the significance and purpose of the system?

MR LEUNG KIN WANG: I can't tell.

MR DUNCAN: I think you have indicated to the committee that you will make some documents available with regard to the formula and also the description of the scheme for the staff.

MR LEUNG KIN WANG: (In English) Yes.

MR DUNCAN: Thank you.

I move now to the last of the aspects of the black box that I wanted to ask questions about. That is the

use that's made of the data captured by the black box in order to facilitate the monitoring and the assessment of the driving behaviour.

We have seen already that one of the functions of the black box is to capture the speed of the bus. I'm going to ask you, please, to look at the second submission to the committee, again, of the company, this time at page 167.

There are two reasonably long questions asked at the top of page 167. I don't believe I need to go through those, but what I would simply do is bring your attention to the second paragraph of the response. It is stated as follows:

"There is a dedicated computer programme in generating suspected speeding cases for the officers to check and verify. After examination, confirmed speeding cases will then be forwarded to performance managers of bus captain performance management section for taking further action."

If I could then ask you to turn to page 170, please. The committee has there asked, at the top of the page, the company to "provide some copy samples of the data obtained illustrating driving at inappropriate speeds and/or speeds in excess of the speed limit at particular locations", and amongst the answers, the first bullet,

the response is that:

"A sample of the data retrieved from black boxes (in the form of a report known as BOP 207) is annexed ..., which shows speeding cases (personal data withheld). It shows the date, time, bus registration number, route number, and concerned [bus captain's] information."

We will find that annex at KMB-9 at page 3993. There is a translation at page 3995-1. I have a couple of questions with regard to this report, please. If you look at the very first row, there's an entry towards the right-hand side of the document which has the duration, it says in seconds, and a maximum speed of 67.9, which I assume is kilometres per hour. Would that be correct?

MR JAMES WONG: Yes, I can read.

MR DUNCAN: Thank you. So is a correct reading of that that a bus was found to be travelling over 67.9 over the whole 32 seconds; under 67.9, about 67.9? What exactly is it that that chart tells you?

MR JAMES WONG: According to the table, for this bus TW5352, on 1 May 2018, 0000 hours, 00:00, and the time 20:07, at this time, for the duration of 32 seconds, the maximum speed was 67.9 kilometres per hour.

MR DUNCAN: Throughout that period it was 67.9?

MR JAMES WONG: In the duration of 32 seconds, that was the speed.

MR DUNCAN: Throughout the 32 seconds?

MR ROGER LEE: (Chinese words not interpreted).

MR JAMES WONG: In the 32 seconds, the maximum speed occurred was 67.9.

CHAIRMAN: But why choose 32 seconds? Why not choose 90 seconds or 10 seconds?

MR JAMES WONG: The black box display would be updated every second. Once a vehicle reaches a particular speed, the black box would show the maximum speed of the bus within a certain duration.

CHAIRMAN: What I'm trying to understand is why 32.

MR LEUNG KIN WANG: This is an exception report and there are certain settings. When a certain setting is exceeded, information would be displayed. In other words, for a duration of 32 seconds, the setting was exceeded, but the maximum speed was 67.9. So over this period of 32 seconds, our pre-set setting was exceeded. So apparently this is a 50 kilometre per hour zone.

If this is a 70 kilometre zone, this entry should not exist. So for a duration of 32 seconds the bus exceeded the limit for this speed zone and the maximum speed was 67.9.

CHAIRMAN: Thank you.

MR DUNCAN: So is the duration pre-set?

MR LEUNG KIN WANG: No. It would depend on the duration in

which the bus exceeded the threshold. It depends on the duration within the bus trip. It is an accumulative value. It is not a continuous duration. It refers to the total duration of all the trips that day, and this shows the number of seconds in which the bus had exceeded our threshold.

MR ROGER LEE: For this example, the area is a 50 kilometre per hour zone, so for a duration of 32 seconds the bus exceeded the speed limit of 50 and within the 32 seconds the bus once reached 67.9. So, in other words, during the 32 seconds, the speed of the bus exceeded 50 but the maximum speed was 67.9.

CHAIRMAN: Am I correct in understanding that an exception report would not be generated unless you exceeded the speed limit for more than 10 seconds?

We can all do the exercise of doing down to find if there are any single digits, but this is a matter of principle. Is that a correct understanding, that an exception requires a continuous excess of speed limit of 10 seconds or more?

MR JAMES WONG: I will answer this question. In a computer programme, we will set certain thresholds, and when a bus reaches certain speed it will be displayed.

I would like to share some figures.

CHAIRMAN: Can you try answering the question? Is that

a wrong understanding? If so, just say, yes, it's wrong.

MR JAMES WONG: It's not 10 seconds.

CHAIRMAN: What is it?

MR JAMES WONG: That's why I would like to tell you about the situation for different durations --

CHAIRMAN: Why not try answering the question directly first and then give an explanation. What is the threshold?

MR JAMES WONG: Between 56 and 65 kilometres per hour an entry will show up if the duration is more than 30 seconds. This is on roads with a speed limit of 50.

And between 66 to 70 kilometres per hour, in a 50 kilometre zone, if the duration is more than 15 seconds, it will show up on the computer screen.

CHAIRMAN: Why is this information not in the thousands of pages that you have provided us in these reports? Why do we have to ask these questions in an oral hearing? It's perfectly clear what the committee were seeking when we asked these open-ended questions.

Carry on with your explanation, if you would be kind enough.

MR JAMES WONG: In 50 kilometre roads, for speeds from 76 to 79 kilometres per hour, information would be displayed if the duration lasts more than two seconds. This is for areas with a 50 kilometre speed limit.

CHAIRMAN: That's most helpful. Is there a similar pattern with speed limits of 70 kilometres per hour?

MR JAMES WONG: At 70 kilometre speed zones, if the speed is between 76 to 79kph and the duration is more than 30 seconds, the occurrence would show up on the screen.

MR LEUNG KIN WANG: If it's over 80, two seconds would be the threshold.

CHAIRMAN: Thank you.

Yes, Mr Duncan.

MR DUNCAN: Let us go back, please, to KMB-1 at 168.

In the first bullet answer that you've given the committee -- this is the second submission of the company -- you have stated that:

"By means of a computer programme, black boxes will ... capture records of speeding ... malpractice of harsh braking, and/or ... abrupt acceleration for analysis. Further information ... corresponding bus registration numbers and route numbers, can be retrieved with the assistance of other systems", which are then described. "It takes about 10 days to retrieve such data for analysis, where necessary, further disciplinary actions will be taken."

Why does it take as long as 10 days to retrieve what might be quite significant data?

MR LEUNG KIN WANG: It's four days now. Four days is still

too long. We would like to make it faster. The data in the server will be the black box number, the bus number, the data, from second to second the location, where there is speeding, harsh braking, abrupt acceleration. These are the data, but we have to relay the data to individual bus captains. For that, we will rely on a lot of information, including TER, terminus management system.

For this TER, terminus management system, it requires the sign-on or sign-in of bus captains, when the bus captain starts the journey, the bus number, the route number, and at the end of the trip the bus captain will sign off. So the system knows when the journey starts, when it ends, and the system would capture the information of the bus captain, the information of the bus and of the journey.

For this system, TER, it captures such data on a daily basis with more than 200 termini, and all of the information would then be transmitted to the server, to our servers. There are also data on the bus on-board system. We need to provide the interface between the systems so that we can tell the bus driven by a particular bus captain, the relevant locations and the performance.

Then we need to do more processing, to know which

zones are 50kmh road sections. So we need to have the FMI, the fleet management information system, which can tell the journey, the locations, and which road sections are 50kmh and which are 70kmh. So we need to know the route, the bus captain, the data of the journey, and so on. That's why it's complicated.

So if we have a digital map and everything is stored in the black box, we can do it much more quickly, and we will be able to produce the same report in one day.

CHAIRMAN: This technology has been available for a long time, has it not?

MR LEUNG KIN WANG: (In English) Yes, I know.

CHAIRMAN: You can answer "yes" or "no" and then you can explain.

MR LEUNG KIN WANG: (In English) Yes. Yes, I know.

CHAIRMAN: If you want to explain, the obvious next question is: why haven't you done it before?

MR LEUNG KIN WANG: I have tried to look into the same issue. I have asked the same questions. I would say we will do whatever we can as an operator, and the resources available to us, the influence that we can exert, and we hope this will present an opportunity, this time, so that we can make things move more quickly.

CHAIRMAN: Thank you.

MR DUNCAN: At the committee's request, you have provided

the data which we see in the form of the table in respect of excessive speed. Are you able to provide a report which has reflected instances of harsh braking or excessive acceleration?

MR LEUNG KIN WANG: We have a weekly report on these conditions. This weekly report will look back at the past week in respect of a bus captain and how many seconds of exceedance in those three areas: harsh braking, sudden acceleration and speeding. We have a weekly report to reflect these matters.

When these weekly reports are generated, relevant departments in my company would take follow-up action. Sometimes, harsh braking and sudden acceleration are unavoidable because of road conditions, and it may not reflect a problem on the part of the bus captain because the road conditions can change suddenly, you have pedestrians crossing, suddenly there are other vehicles, and we understand the tremendous pressure faced by bus captains and sometimes they may make some undesirable or unsatisfactory moves, but we need to tell them what they have done. Sometimes, our colleagues would arrange an interview or would talk to the bus captain over the phone, and if necessary we would have to send some plain-clothed officers to do some on-spot inspection.

Otherwise, we cannot really tell whether it's

a problem of bad or poor performance.

MR JAMES WONG: Maybe I can supplement. This morning, when we talk about the black box, we said there are four lights to provide the feedback to the bus captain -- I won't repeat the details -- which will provide an instantaneous reminder to the bus captain so the performance can be rectified, and also there is the three-colour system, when the bus captain taps his Octopus card, when he signs on, all these messages are meant to remind the bus captain of the need to improve, if appropriate. And on top, there's the weekly report which would record the speeding, acceleration and deceleration data.

And the data in the past kept are not as detailed here. We only got accumulative data. There's a performance management group under my department, and they would inform the operation, the depot, not to issue warning but to remind bus captains that certain speeding episodes have been recorded, so that they would improve.

As for the harsh braking or sudden acceleration, we would send plain-clothed driving instructors to check on the bus. They will observe how the bus captain drives, so whether it's unsafe driving, as reflected by the data, and then the inspector or the instructor would report back to us so that we can take appropriate

action.

CHAIRMAN: Mr Leung, can I bring you back to the question Mr Duncan asked some minutes ago now: are you able to provide the committee with a report that evidences harsh braking or harsh acceleration? We've got one on the screen which enables us to understand, now it's been explained to us, how you look at speeding. Are you able to give us a similar document that deals with harsh braking and acceleration?

MR LEUNG KIN WANG: (In English) Yes.

CHAIRMAN: Would you please provide us with that?

MR LEUNG KIN WANG: (Nodded head).

CHAIRMAN: Thank you very much.

MR DUNCAN: I'm now going to ask you to look again at the transcript, please. Day 6.

CHAIRMAN: Whose evidence is this, Mr Duncan?

MR DUNCAN: This is the evidence of Mr Kulis, Mr Chairman.

CHAIRMAN: Thank you.

MR DUNCAN: At page 161.

CHAIRMAN: Of which bundle?

MR DUNCAN: This would be bundle number 3, Mr Chairman.

CHAIRMAN: Thank you.

MR DUNCAN: I mentioned earlier on the concept of a score card for the drivers' driving behaviour, the bus captains' driving behaviour, and I just want to ask

a few questions of you in relation to this part of Mr Kulis' evidence.

If I could pick it up, please, on page 160, at line 22. Mr Chan says:

"The next item that I'm interested in, or I am going to ask questions on, is the ability or the capability of using software analysis to provide a report on acceptable or unacceptable, safe or unsafe driving behaviour."

And he asks this question:

"Does your company provide the software that is capable of assessing, based on the data collected by the black box, capable of assessing or coming up with a report of what is acceptable or unacceptable driving behaviour? Is that possible?"

And he says, "Yes, it is possible."

Mr Chan asks:

"How is that possible ... If I'm a bus operator and I come to you and say I want something that allows me to generate a report of a particular driver? How would you tell me that can be done, how can that be done?

Mr Kulis: In that case, I will introduce you to our application driver feedback, together with the portal parts, together with the software solution which we are providing, so then you can regard the parameters as we

were talking about, then, and you can get also the statistics, so then at the end of the day, or some period, you can make your own analysis, for example, which driver have most warnings, thresholds, speeding events, and so on.

This is one option.

And then we can also design the solution for you, if you are not satisfied with the driver feedback only, if you want to have more sophisticated calculations, we can log the driving data, the parameters, into the database and make the analysis relevant for you. If you are more focused on different inputs, maybe some other parameter is concerning you, we can make analysis and score it on that.

It depends how you feel the logic. If you want to calculate the bonus points and evaluate the best driver, or if you want to introduce, let's say, the negative restriction, it is just check they are better drivers, or better behaviour, and so on. There are multiple ways to achieve it.

Also depends what the drivers are open for, or the unions, it can have more solutions.

Mr Derek Chan: So it is just the software capabilities. Because the hardware itself is just the data collected by the black boxes. Is my understanding

correct? I don't need to buy new equipment? In order to come up with such a score card of a driver's behaviour?

Mr Kulis: No, you don't need new equipment. If, for example, now you are the customer, and you already have our boxes we can just talk about new possibilities and we can give you the new software and you will use the same hardware for that.

Mr Derek Chan: In your experience, how common is it around the world in commercial fleet management for the operator to use software to come up with a score card of the driver's driving behaviour? How common is it around the world?

Mr Kulis: It is -- based on my experience it is relatively common in the West European countries. On the other hand, in some other regions, they want to keep the system simple, like is the driver feedback negative. Only a simple warning, and that's it. Because still we need to consider that drivers need to understand what they are scored for. So if you introduce more complex calculation, to evaluate the score cards, we need to provide the training of the drivers, need to understand it. So it differs by the countries and regions."

Mr Chan at line 18:

"Moving on then from this driver score card --"

Mr Chairman interposes:

"Before you move on. If it is quite common in Western European countries, what thresholds do they use to monitor driver behaviour if they are scoring the driver 'good' or 'bad', or 'average'. Whatever the score card might be?

Mr Kulis: To give you the example, for example the truck companies in Germany, they are using the parameters as we have here, the basic parameters, so the speeding events, acceleration, deceleration, but on top of that they are, for example, evaluating if the driver is using the [something] for the driving, so he is saving the brakes, or they even have the analysis of the speed value shape in time, and the brake application. So if they are not using the aggressive driving style or if they are not -- how to say, if they are driving more effectively. There are multiple analyses for this.

Chairman: So the basic model would be to start with analysing speeding, acceleration and deceleration, that's the basic model?

Mr Kulis: Yes. Also the idling, if you keep the engine running, if you are standing, then you are wasting money obviously. That's the basic model. And then on top of that, maybe saving of the brakes and so on."

Now, you can see the approach that Mr Kulis is suggesting in that part of his evidence. Given that the software is clearly available, does that sort of approach have any appeal to you, rather than approaching it from, "Well, you have exceeded the speed and that's bad", so it's going to be negative, converting it to some sort of positive, from the way in which the driver is generally approaching his duties?

MR LEUNG KIN WANG: Their approach is the same as ours. We are doing the same thing. We would look at it from a safety perspective. We would look at the items that need to be considered. Of course, the black box would capture many data, including fuel consumption, braking patterns and other scenarios. I believe that there is an application. They are talking about -- the document mentions a transportation committee, for commercial drivers, they might be driving the same vehicle all the same, so from a commercial perspective, it can find out whether a vehicle is idling for too long and whether there would be breakdowns and they can tell whether or not the air-conditioning is switched off. So this is commercially useful.

But for bus captains, they might not drive the same bus every day, they might not be driving the whole day, and a bus would be driven by different captains, and

a captain can drive different buses on different days.

So the assessment considerations might be different from consideration from just a safety perspective. So we would assess safety aspects. So we are mainly thinking about safety.

If you include other factors, we might not be able to conduct the analysis within four days. We might need five, six or seven days or even more.

MR DUNCAN: I'm going to ask to be put up on the screen a short article which the committee has seen which appeared in the Straits Times on 16 July this year.

Have you seen this particular article before?

MR LEUNG KIN WANG: (In English) No.

MR DUNCAN: I just ask the secretariat to scroll down and I invite you to read the contents of it.

CHAIRMAN: I think the date of the article is July last year.

MR DUNCAN: Oh. I beg your pardon, yes. It was published June 29, 2017. Thank you, Mr Chairman.

Have you been able to finish reading that?

MR LEUNG KIN WANG: (In English) Yes.

MR DUNCAN: Thank you. You can see that it refers to something called a GreenRoad vehicle tracking system, and you may recall earlier this afternoon we saw GreenRoad.com, I think, referred to in the transcript.

Do you recall that?

MR LEUNG KIN WANG: (Nodded head).

MR DUNCAN: So are you familiar with this GreenRoad vehicle tracking system?

MR LEUNG KIN WANG: (In English) No.

MR DUNCAN: Do you have any sort of immediate reaction to what is contained in this article? Assuming its content to be true, do you think this would be of any value for the company to consider?

CHAIRMAN: By that, are you referring to a bonus system of rewarding good driving?

MR DUNCAN: Yes.

MR LEUNG KIN WANG: This is something that can be considered.

MR DUNCAN: Has it been considered to date?

MR LEUNG KIN WANG: (In English) Not to date.

MR DUNCAN: So your reaction is that this is worthy of consideration by the company?

MR LEUNG KIN WANG: (In English) Can you repeat the question?

MR DUNCAN: Is your reaction that this is something worthy of consideration by the company?

DR NORMAN LEUNG: (In English) I think I can confirm that, yes, we will consider -- we will study and consider the recommendations mentioned in this article. Thank you.

MR DUNCAN: Thank you, Dr Leung.

DR NORMAN LEUNG: (In English) May I have a copy of this?

CHAIRMAN: Of course we can provide you with a copy.

DR NORMAN LEUNG: (In English) Thank you.

MR DUNCAN: Chairman, that would be a convenient moment, if it suits the committee.

CHAIRMAN: Yes.

Gentlemen, we have reached the end of our working day. The consequence is that we will adjourn shortly and I would ask you, or those of you who are available, to return to carry on giving evidence on Friday, that's Friday, 10 August, at the same venue.

Mr Leung, before we do adjourn, there is one matter I would seek your help with. You spoke of having conducted a test drive with a vehicle that had been fitted with a system to enable you to, as I understand it, differentiate between being in a 50 kilometre speed limit and a 70 kilometre speed limit, and you say that Openmatics had assisted you in incorporating devices in order to do that. That is something that the committee would like to hear more about. Is this documented in any form that you can provide to us?

MR LEUNG KIN WANG: (In English) You mean the test itself?

CHAIRMAN: The various steps that you have taken, how the vehicle has been fitted up, so we can understand what it

is that you are examining.

MR LEUNG KIN WANG: (In English) We will prepare that for you.

CHAIRMAN: Thank you, and obviously somebody who can speak to it orally at the hearing. But it would help us if we could have something in advance so we can try and digest what steps you have been taking. That would help us.

MR LEUNG KIN WANG: (In English) Yes.

MR ROGER LEE: (In English) Do you mean provide those information before Friday?

CHAIRMAN: Yes, if you can, whatever you have available, and then someone who can speak to it and answer our questions on Friday, because this is obviously a most interesting development.

MR ROGER LEE: (In English) Yes.

CHAIRMAN: Mr Auyeung has a question.

MEMBER AUYEUNG: Thank you, Chairman.

I just want to follow up on two questions, both of them addressed to Mr Lee.

In the morning, Mr Lee, you did mention about, on the compensation side, that the leadership team decided to merge the driving bonus into the base salary, and you did mention that it puts pressure on the bus drivers, because of that bonus. Then later on, I think you mentioned that you have introduced this 20-point system

which would also generate some sort of monetary reward.

My question is, this 20-point sort of measurement, also would that generate any kind of pressure to the bus drivers? If not, why?

MR ROGER LEE: (In English) I think the actual bonus, as far as the bus captain is concerned, the bonus I think is deserved. They think it's part of their pay. Let's imagine if because there is an accident, whether they are liable or not, somehow that so-called bonus would be deferred, it creates some unnecessary pressure.

If you can imagine, the bonus should be part of their salary, and every year there are increments, judging on their performance, so it doesn't feel like you take something away, so that is some kind of, if you like, assessment or benchmarking and you say, okay, you performed well this year, you deserve an increment, or something further, you are actually talking about they move to another grade. So it's not like it's completely different.

MEMBER AUYEUNG: Thank you. Then I will move on to the second issue which is on safety. I also heard comments this morning that from your leadership team's perspective, safety is the responsibility of all departments, henceforth there is no single department responsible for risk or safety.

In the past year or two, have the team run into situations in which the departments have misunderstanding, thinking that the other department are handling certain safety issue and it ended up with nobody addressing the issue at all?

MR ROGER LEE: (In English) Every Monday morning, we actually, myself and my operation directors and all the other directors, have a couple of hours, we sit down, and we talk through, no matter it's a bus hardware issue, and the bus captains, their performance, and also the facilities at the terminus and depot, we actually basically work as a team to ensure safety will not just simply apply for just the bus captain.

Presumably, Mr Leung, you ...

MR LEUNG KIN WANG: For example, there is a case where the bus captain had a conflict with a passenger, so we install the protective shield to protect the bus captain. So it's the job of not just the operations department but also the procurement, the engineering department, so everyone will have to look into this. Whether it would be possible resource-wise, it cannot be determined by one single department.

Another example is the retrofitting of CCTV. No single department can make a decision on when this can be done and how quickly this can be done is also

a matter for all the departments and whether the procurement can speed up the process. It's all teamwork.

MR ROGER LEE: You have to be responsive whatever you do, and you have to make sure that it's comprehensive. And you cannot really do anything which is not amenable to the hardware, the bus. And of course the operations department have their needs. So it must be interdepartmental in the nature of these works.

MEMBER AUYEUNG: Thank you, Mr Chairman.

CHAIRMAN: Thank you. In which case, gentlemen, we will adjourn now until 10 o'clock on Friday. Thank you.

(5.36 pm)

(The hearing adjourned until 10.00 am on Friday, 10 August 2018)

2018 年 8 月 7 日

上午 10 時正恢復聆訊

出席人士： Hon Mr Justice Michael Lunn（倫明高），
香港專營巴士服務獨立檢討委員會主席

歐陽伯權先生，香港專營巴士服務獨立檢討委員會委員

羅康錦教授，香港專營巴士服務獨立檢討委員會委員

Peter N. Duncan（鄧樂勤）資深大律師、黃佩琪大律師及陳政龍大律師由高露雲律師行委聘，代表香港專營巴士服務獨立檢討委員會

梁乃鵬博士，主席（九龍巴士（一九三三）有限公司及龍運巴士有限公司代表）

陳祖澤博士，副主席（九龍巴士（一九三三）有限公司及龍運巴士有限公司代表）

李澤昌先生，董事總經理（九龍巴士（一九三三）有限公司及龍運巴士有限公司代表）

蘇偉基先生，總經理（企業策劃及業務發展）（九龍巴士（一九三三）有限公司及龍運巴士有限公司代表）

梁健宏先生，車務總監（九龍巴士（一九三三）有限公司及龍運巴士有限公司代表）

彭樹雄先生，副車務總監（九龍巴士（一九三三）有限公司及龍運巴士有限公司代表）

黃祥明先生，培訓及服務質素管理部主管（九龍巴士（一九三三）有限公司及龍運巴士有限公司代表）

主席：（經傳譯員）梁博士，各位先生，感謝你哋今日接納咗我哋嘅邀請，上嚟作證，協助我哋履行職責。我明白梁博士係會作一個開場白，so 梁博士，等陣間你講喇，之後我會想請係鄧樂勤大律師，佢係其中一位我哋嘅代表大律師，佢會向你提問。可能你哋其中一位同事或者係會係覺得係由佢哋答問題係會比較好啲，冇問題㗎，或者你可以先話畀我哋聽你係請邊一個同事係答某一條問題嘅，你都可以作一個開場白。

梁乃鵬先生：（經傳譯員）好，唔該你，主席。主席，委員會嘅委員，早晨，讓我開宗明義講出我哋當時同埋而家都依然係深感遺憾，呢個係指喺 2018 年 2 月 10 號，喺大埔公路所發生嘅交通事件。

Transcript by Epiq Hong Kong, Limited

喺2018年2月11號，作為主席，我作咗一個決定，去成立一個董事局嘅特別委員會，成員係有陳祖澤博士，同埋曾偉雄先生，我係擔任主席，去就事件進行調查，並且就巴士安全提出建議。呢一個特別嘅調查委員會係開咗數次嘅會議，會見咗九巴同埋龍運巴士嘅管理階層，亦都會見咗兩個工會嘅代表，以及係兩家巴士製造商，分別係亞歷山大丹尼士同埋富豪。調查委員會喺2018年嘅3月12號提交咗份報告，裏面羅列咗多項嘅建議，以提升巴士安全。呢份報告喺同日亦都提交咗畀運輸署署長，同一份報告亦都交咗畀你哋獨立檢討委員會。喺2018年4月10號，我哋以書面嘅形式寫低咗我哋一個行動計劃嚟到去落實2018年3月12號嗰份報告所列出嘅建議。而琴日，我哋向獨立檢討委員會更新咗我哋嘅行動計劃，裏面係列出直至2018年7月尾，管理階層所採取嘅行動，去落實呢一個建議。

主席先生同埋委員，我同我嘅同事今日嚟到席前，我哋係懷住謙卑之心同埋一個積極主動嘅態度，我哋知道我哋責無旁貸，係向乘客提供安全嘅巴士服務。任何可以提升巴士安全嘅建議，我哋都係歡迎，視乎技術上同埋財政上是否可行，我哋係會樂意去落實你哋嘅建議嘅，唔該主席先生。

主席：（經傳譯員）唔該晒，梁博士。係，鄧樂勤大律師。

MR DUNCAN：（經傳譯員）唔該晒。早晨，梁博士同埋各位先生，首先，我亦都係想係重複係主席所講，今日多謝你哋係出席，亦都感謝你哋係提交咗相當大量嘅書面嘅材料畀委員會，等我哋去研究同埋考慮。一啲部分我哋係需要係同你哋係澄清，又或者係希望你哋係進一步協助我哋，所以就此，我就有啲問題向你提問。我知道你係代表九龍巴士(1933)有限公司，同埋龍運巴士有限公司，或者為求係簡便起見，我會就係講「公司」，雖然就係我意思係包括咗九巴同埋龍運，咁樣就比較簡單。喺任何時候，如果你想係特別指名係兩間公司嘅其中一間嘅話，請你隨便係話清楚畀我哋聽就得嘞。或者首先，我先係就你嘅開場白嗰度係提問一句。

梁乃鵬先生： Yes.

MR DUNCAN：（經傳譯員）我睇番第五段，你嘅開場白嘅第五段，你當就提及係你哋呢一個特別調查委員會，喺2018年3月12號有一個報告，呢一個就係喺2月大埔係交通意外之後所成立。你就話就喺同日，3月12號同日提供咗嗰份報告畀運輸署署長，亦都係將同一份報告交咗畀呢一個係獨立檢討委員會。我就想問，你知唔知道嗰一個部分係有--嗰個報告嘅有某啲部分就係冇交畀係檢討委員會？

梁乃鵬先生：（經傳譯員）係，關於係嗰個報告，關於嗰個事件，係有部分就係塗黑咗嘅。

MR DUNCAN：（經傳譯員）我哋喺文件夾嗰度，喺 KMB-1 呢個文件夾嗰度，第98頁，我哋可以睇番你哋嘅報告。

Transcript by Epiq Hong Kong, Limited

梁乃鵬先生：（經傳譯員）對唔住，鄧大律師，係邊一頁？

MR DUNCAN：（經傳譯員）我想請你睇番嗰份報告，第98頁。

主席：（經傳譯員）第98頁。

梁乃鵬先生： Yes.

MR DUNCAN：（經傳譯員）你會見到係報告嘅係封面，跟住請你揭去第 99 頁，嗰度有一個係目錄表嘅，第99頁，係目錄表。

梁乃鵬先生：（經傳譯員）係，係，目錄表99頁。

MR DUNCAN：（經傳譯員）我哋呢個委員會係想知道嘅地方，但係嗰度就係冇提交，譬如話係第二部就係嗰個意外調查報告，第三部就係關乎車長嘅事宜。關乎車長嘅事宜，當然呢個對於我哋進行嘅調查係相當之重要，所以我想向你提出個請求喇，咁就睇下你願唔願意就係將呢兩個部分，即係第二部同埋第三部都係交畀我哋係檢討委員會去考慮，當然要符合我哋嘅職責範圍，或者你係想同你嘅同事商量一下，不過我想而家提出呢一個要求，就想請你就係今日--譬如話今日聆訊之後去考慮一下。

梁乃鵬先生：（經傳譯員）講到係特別係第二部分，呢一個意外調查報告，以及...

MR DUNCAN：（經傳譯員）啱。

梁乃鵬先生：（經傳譯員）...係第三部係關乎係車長嘅事？

MR DUNCAN：（經傳譯員）啱，你講得啱。或者你睇番第102頁同埋103頁呢個文件夾度。

梁乃鵬先生：（經傳譯員）103，係。

MR DUNCAN：（經傳譯員）嗰度寫住就係資料冇係提交㗎。

梁乃鵬先生：（經傳譯員）係呀。

MR DUNCAN：（經傳譯員）我就而家係想請你重新考慮，我唔係想你即時作一個決定，我係想請你就係喺我哋進行呢個研訊期間，都同同事係研究一下。

梁乃鵬先生：（經傳譯員）關乎呢一點，我想問下，呢啲資料係咪會畀呢一個係檢討委員會定抑或會成為公開資料？

主席：（經傳譯員）我哋呢個檢討委員會所收嘅資料，我哋嘅基礎都係話，係都會就係會交畀公眾㗎，如果認為係適當嘅話。

梁乃鵬先生：（經傳譯員）我會--唔該晒，我會考慮你嘅要求嘅。

MR DUNCAN：（經傳譯員）好，唔該你，梁博士。我哋仲係睇緊呢一個 KMB-1 呢個

文件夾，我就想請你係揭去第31頁。

梁乃鵬先生：（經傳譯員）第31。

MR DUNCAN：（經傳譯員）31。

梁乃鵬先生：（經傳譯員）31，係。

MR DUNCAN：（經傳譯員）或者我講番嗰個上文下理，呢一個就係九巴，即係你哋公司回應係委員會向你哋索取資料嘅一個部分嚟嘅。

梁乃鵬先生： Yes.

MR DUNCAN：（經傳譯員）咁或者想請你睇番呢個文件夾嘅第1頁。

梁乃鵬先生：（經傳譯員）邊頁呀？

MR DUNCAN：（經傳譯員）第1頁。

梁乃鵬先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）你呢度見到就係秘書處就係--委員會嘅秘書處 2018 年3月28號寫嘅信。

梁乃鵬先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）或者你一路揭去後面嗰幾頁，你見到就係委員會就係--就多項係特定嘅課題係要求索取啲資料嘅。

梁乃鵬先生： Yes.

MR DUNCAN：（經傳譯員）我想請你睇第31頁。

梁乃鵬先生：（經傳譯員）31。

MR DUNCAN：（經傳譯員）喺嗰頁嘅頂頭嗰度，嗰度就係睇到我哋委員會所問嘅問題，呢度就係話，請你係找出同埋就係提供以下文件嘅副本，就係你哋公司嘅係管治同埋社會責任嘅守則。

梁乃鵬先生： Yes.

MR DUNCAN：（經傳譯員）喺你哋答案嘅第二段嗰度，有三個係元素㗎，你就話呢啲係三個關鍵嘅元素，分別係安全。或者我將佢讀出，作為一個紀錄。你呢度就咁講，你話三個關鍵嘅元素，即係話我哋嘅係企業社會責任有三個關鍵嘅元素，喺我哋嗰個企業嗰個網站嗰度有寫，安全。九巴同埋龍運都係話，係要向乘客提供一個安全、可靠同埋舒適嘅巴士服務，應該係物有所值嘅服務。九巴同埋龍運就係會繼續係大量投資，去改善佢嘅巴士服務嘅安全，咁方法就透過係向職員提供密集嘅訓練，係加強呢一個表現嘅監察程序，以及有一個獎勵計劃，以及係改

善嗰個巴士嘅設計，以及係提倡係推廣係巴士乘客嘅安全，呢一個係內部去做，同埋向公眾去咁樣做。

我而家想做嘅就係，梁博士，我想首先就係講嗰個獎勵計劃。

梁乃鵬先生： Maintenance?

MR DUNCAN：（經傳譯員）獎勵計劃，你呢度就係有見到嗰度寫到就係「獎勵計劃」，係咪呀？

梁乃鵬先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）我就想問你幾個問題，究竟目前你哋有啲咩嘢嘅計劃，係關乎係巴士司機嘅安全，你哋有啲咩嘢獎勵計劃，明唔明白我嘅問題？

梁乃鵬先生：（經傳譯員）我同事就係會係答呢個問題，係蘇生會問。

MR DUNCAN：（經傳譯員）我仲未問問題嘅。

主席：（經傳譯員）蘇偉基先生會負責呢條問題，係咪呀？

梁乃鵬先生： Yes.

主席：（經傳譯員）好，唔該。

MR DUNCAN：（經傳譯員）喺呢方面，我就想請你揭去 108 頁。

梁乃鵬先生：（經傳譯員）108，108。係。

MR DUNCAN：（經傳譯員）喺第廿九段，嗰頁嘅第廿九段，嗰度就話 2018 年嘅 2 月 21 號，九巴同埋龍運就宣布安全獎金同埋良好表現獎金就會將佢併入去嗰個底薪嗰度，咁而生效日期就 2018 年嘅 3 月 1 號。呢一度就係講到第三個表同埋第四個表，就係講出咗嗰個--喺呢一個薪酬嘅優化之後，嗰個薪酬嘅結構。

梁乃鵬先生： Yes.

MR DUNCAN：（經傳譯員）咁你去到第 109 頁同埋 110 頁就睇到嗰個詳情㗎嘞。我就留意到，呢一個宣布係喺 2018 年 2 月 21 號係作出，當時就係意外發生之後第十一日。我嘅問題就係，呢一個意外嘅發生同呢一個改變嘅宣布，嗰個係咪一個因素嚟嘅呢？

梁乃鵬先生：（經傳譯員）多謝你嘅問題，我好高興有一個機會係喺呢一方面作出澄清。實際上，喺去年嘅 11 月，當時喺深水埗亦都發生咗一個好不幸嘅巴士意外，有多位乘客係傷亡。我喺報章嘅報道係留意到，我哋月薪嘅巴士車長當時係賺取緊少於每月 12,000 元，即係啱啱係少過 12,000 元。其實係由我提出，我就當時同自己講，要做啲嘢，要對呢件事做啲嘢，因此我就係檢視咗月薪巴士車長嘅薪酬結構，我就留意到，每一個月除咗佢哋嘅底薪之外，同埋一萬...

主席：（經傳譯員）1,800 紋？

梁乃鵬先生：（經傳譯員）係，對唔住，1,800 紋嘅安全獎金，係，多謝你糾正我，對唔住。另外，仲有另外一個獎金，都係 1,800 紋。咁我就決定，我哋或者可以係提升佢哋嘅薪酬結構。喺 12 月嘅董事會會議，董事會就係批准嗰個安全同埋表現嘅獎金總共係 3,600 元，就將佢哋係納入底薪裏面，呢個係第一點；

第二點，因為呢一個逾時工作嘅薪金之前嗰個基礎就係要參考底薪，當時嗰個每一個月係少過 12,000 元，但係我哋將呢一啲獎金加入咗底薪之後，呢一個逾時工作嘅薪金亦都係會增加㗎嘞，因為係以新嘅底薪去計算。呢一個就係另外一個理由，咁長話短說，咁我哋做咗呢一個提升之後，月薪巴士車長底薪大概每一個月係 15,400 元，同時佢哋逾時工作嘅補償亦都係會相應增加。

第三，每一年嗰個花紅，之前就係每年 12,000 元，而家亦都會增加㗎嘞，增加到多過 15,000 元嘅。咁樣係會增加咗巴士車長嘅收入，呢一個決定係 12 月作出，我哋係打算呢一個新嘅薪酬制度會係 3 月 1 號係實施。不過好不幸，就發生咗 2 月嘅不幸嘅事件，因此有啲人就係錯誤咁樣詮釋咗，就話係因為有交通意外，我哋先至去調整嗰個薪酬，但係其實兩者係冇關係，當時係喺 12 月，喺董事會嘅會議，由我提出去決定。

MR DUNCAN： Thank you, Dr Leung.

主席：（經傳譯員）梁博士，你係講到深水埗嗰個意外，就係 11 月發生，咁你記唔記得喺 2017 年 9 月 22 號亦都係發生過一個意外？

蘇偉基先生：即係個意外其實係 9 月 22 號長沙灣嘅意外。

梁乃鵬先生：（經傳譯員）係，對唔住，對唔住，我等你糾正我，我以為係 11 月。

主席：（經傳譯員）其實唔係㗎，你係咪講緊...

蘇偉基先生：係冇 11 月嘅意外嘅，當時個舉措係回應 9 月 22 號新巴喺長沙灣嘅意外。

梁乃鵬先生：深水埗。

主席：（經傳譯員）9 月 22 號？

蘇偉基先生：（經傳譯員）係嘅。

主席：（經傳譯員）唔該。

李澤昌先生：回應多少少就係，頭先講到嗰個獎金嗰樣嘢，其實我哋當其時我哋覺得獎金其實係會畀到啲車長好多嘅壓力，所以係我哋唔覺得係用獎金好似係一種即係好似利誘咁嘅感覺，所以其實車長佢本身嘅壓力應該好大，如果用一個

bonus 咁樣嘅去畀佢，我覺得係未必一個恰當，所以當其時董事會就決議將嗰啲獎金就撥咗落去個薪金嗰度。其實喺--啱啱主席都講咗，我哋未來而家嗰啲薪酬有嗰啲級數，同埋升嗰啲 point 嗰啲已經講咗。咁我諗仲有一樣嘢，就係其實我哋--我諗蘇生會講多少少而家嗰個情況。

蘇偉基先生：我哋公司亦都係有設立一啲獎項，去鼓勵車長嗰個行車嘅安全，以往我哋有啲安全獎。咁喺 2016 期間，公司就將呢個獎項就改咗，叫做一個星級車長。喺呢個計劃入面，如果車長佢喺某段時間達致一個行車安全，冇意外紀錄，或受乘客讚許，佢就可以頒授唔同嘅獎項。佢分好多嘅年期，十五年之內會係一個星，如果十五至二十九年又多一個良好紀錄，又會有另外一個星，去到最高亦都有個大星。我哋每年喺 12 月亦都有個週年嘅聚會，係表揚同埋獎勵安全良好嘅車長，咁呢個就係一個叫做星級車長嘅計劃。

主席：（經傳譯員）呢一個計劃而家係咪仲運作緊？

蘇偉基先生：係，生效緊，亦都每年係恆常做緊。

主席：（經傳譯員）好，唔該。

MR DUNCAN：（經傳譯員）多謝你，蘇生。我想請問你多幾個問題，係關於--一陣間再問你呢啲獎勵嘅計劃，因為喺你畀我哋嘅資料裏面都有講到。不如我哋而家講番呢一個安全獎金嘅問題。梁博士，你就話畀我哋聽，新嘅計劃就係喺 12 月嘅時候，董事會嘅會議係當時決定嘅，點解要係喺 2 月 21 號先至宣布？

梁乃鵬先生：（經傳譯員）係呀，咁係董事局就係 12 月決定咗，我諗好似係 12 月 22 號，然後管理層係需要時間去實施新嘅薪酬架構，實際上，董事總經理係向我告知，係建議實施嘅日期係 3 月 1 號，係今年 3 月 1 號。

MR DUNCAN：（經傳譯員）咁喺呢一個改變之前，當我哋仲有安全獎金嘅時候，咁呢一個安全獎金係點樣發放？喺任何一個個別嘅個案，係點樣去決定？

蘇偉基先生：喺呢個舊有嘅安全獎嘅計劃，我哋係會睇幾個指標，首先就係個車長會唔會喺有意外嘅發生，喺意外發生，究竟佢係咪需要負責，佢有冇不良嘅駕駛，咁我哋罰，有機會係半個月或者係一個月嘅安全服務獎，嗰個數係講緊一千七百幾蚊。但係如果佢喺半年行為表現良好之後，相關嘅獎金係會發放番畀嗰位車長嘅。而呢個咁嘅管理，就係由車務組去負責。

MR DUNCAN：（經傳譯員）咁個意思係咪即係話，係要限制於嗰個人係咪要負責嗰個意外？

蘇偉基先生：亦都公司自己本身有一啲便衣嘅巡查，或者乘客嘅投訴，我哋喺呢方面都知道車長佢有冇不良駕駛嘅行為，從而就利用呢個以前嘅安全獎係去紀律處分我哋不良駕駛嘅車長。

MR DUNCAN：（經傳譯員）喺呢個改變實施之前，即係仲有呢個獎金嘅時候，你哋

嘅巴士車長當中，有幾多嘅比例係可以得到全面嘅獎金？

蘇偉基先生：喺以往呢個安全獎，其實我哋有九成嘅同事係會攞足一個全額嘅，咁被扣或者褪遲咗出呢個安全獎，係少過一成嘅。

MR DUNCAN：（經傳譯員）喺委員會嘅商議嘅時候，當然亦都係向你嘅管理人員係聽過一啲意見。我哋知道有一啲嘅科技可以係記錄譬如話係有超速，或者係大力剎車，或者係過度加速，呢一類咁樣嘅因素，咁呢啲嘅因素會唔會都考慮埋㗎，即係喺有呢一個舊嘅安全獎金嘅時候？

梁健宏先生：當其時嗰個安全獎金淨針對意外後嘅發放，針對意外後嘅考慮，至於佢平常嗰啲表現，就喺其他嘅獎金嗰度，就係嗰個總服務安全獎金嗰度係去處理嘅。

MR DUNCAN：（經傳譯員）好，唔該，請你而家去睇第 77 頁，係，77 頁。呢一啲嘅係你剛才講到嘅獎勵計劃。委員會當時提嘅問題就係咁講，係關於薪酬嘅制度。咁如果巴士車長係表現良好，同埋甚至係冇任何嘅意外紀錄，或者係好少嘅意外紀錄，會唔會有任何嘅獎勵？咁首先，有一個就係所謂安全駕駛獎嘅，我想請問，已經係實施咗幾耐？

梁健宏先生：呢個安全獎嘅設立都好多年㗎嘞，咁就去到大約係一、兩年前，就我哋用另外一個星級計劃去取締。

MR DUNCAN：（經傳譯員）咁即係而家唔存在嘞？

梁健宏先生：我哋用個星級計劃去取締嘞，而家就唔存在。

梁乃鵬先生：存在，係咪呀？

李澤昌先生：存在，我諗解釋清楚，呢一個計劃仍然都係存在嘅，不過以前係用一張好簡單嘅一張紙之類嘅嘢，係一個獎狀，但係而家叫做星級計劃，其實係用一啲即係金，即係係黃金嘅金，同埋一啲銀，係真係 silver 嘅銀，咁樣去獎勵個車長，咁就令到佢個感覺會更加強烈，可以擺咗佢自己個心口裏面嗰啲嘅。

MR DUNCAN：（經傳譯員）咁呢個獎嘅安全嘅方面，係咪限制於對於意外有冇責任呢一樣嘢？

梁健宏先生：（經傳譯員）即係個準則？

MR DUNCAN：（經傳譯員）係呀，準則。呢啲會考慮啲咩嘢嘅事情？除咗話司機就係冇涉及意外，即係可以咁講。

蘇偉基先生：以往呢個獎項--講得啱，其實佢係淨係計 zero liability，即係話車長係唔需要負責嘅意外。咁即係變句說話，如果個車長喺連續五年，佢冇發生佢自己需要負責任嘅意外，我哋就會有個嘉許，個嘉許係一張證書嚟嘅。

MR DUNCAN：（經傳譯員）冇呢個金錢嘅獎勵㗎，係咪呀？

蘇偉基先生：正確，呢個係冇一個獎金。

MR DUNCAN：（經傳譯員）咁我而家又想講下，嗰個係良好服務獎勵，我就想問下，會唔會係有邊一部分就係好視乎佢嗰個係安全表現嘅呢？

蘇偉基先生：呢個可以大家睇睇佢有個 annex 9c-2 嗰度，咁就呢個除咗車長，其實所有員工都會係畀呢個表現獎蓋範。

MR DUNCAN：（經傳譯員）你就話唔係單係限於係車長，係咪呀？

蘇偉基先生： Correct.

MR DUNCAN：（經傳譯員）好，唔該，咁不過我問題就問，講到車長嗰方面，巴士司機方面，佢安唔安全駕駛，係咪你哋都會考慮埋呢一點，然後先至睇下佢攞唔攞到呢個傑出服務獎㗎？

蘇偉基先生：佢係咁樣講，如果佢係一個 outstanding service，舉例如佢係幫助咗乘客，咁佢係會獲呢個獎，但係喺獲呢個獎之前，我哋都會睇睇佢嘅駕駛紀錄係咪良好，如果佢駕駛紀錄良好，而因為佢一個幫助乘客而獲獎，我哋就會頒呢個表現良好獎畀佢。

李澤昌先生：即係其實換言之係，佢主要係喺嗰個服務方面，佢做咗啲咩嘢嘢，譬如係點樣幫助啲乘客，點樣係對啲乘客嘅態度，當然有可能會係因為佢個安全係其中一分，但係主要都係講佢嗰個服務嗰方面，因為有啲車長喺嗰個整個嗰個揸車嘅過程裏面，佢係真係對啲乘客個態度係非常之好，咁呢個係一個即係outstanding 嘅 service award，其實呢個係包含除咗車長之外，有啲即係站長，有啲站務助理，有啲即係我哋嘅稽查，其實都會喺呢度裏面嘅，所以係比較係即係概括嗰個面係闊好多。

MR DUNCAN：（經傳譯員）講番巴士司機，你講就話可能佢對啲乘客係服務得好好，好幫到手，我就想問，會唔會都要係佢揸車安全，就冇係涉及呢一個係需要負責嘅係意外，呢一啲會唔會都考慮埋㗎？

蘇偉基先生：或者可以咁樣講，如果佢個駕駛行為，我哋係用頭先第一個講緊嗰個良好駕駛獎去獎勵，嗰個係冇意外，咁我哋就睇番個年份去獎勵。咁第二嗰個表現獎就係無論係車長或者非車長好，如果佢表現良好就會獲呢個獎。咁呢個--但係獲呢個獎之前，如果係車長都有個前設，就係佢嗰個駕駛都係有一個良好嘅紀錄，因為係一個獎項，而呢啲獎項良好表現，頭先我舉一個例子，譬如話幫助乘客，可以係一個例子。咁我想秘書可唔可以去一去 annex 9c-2 嗰份文件，我相信會係有個好清楚嘅講到。

MR DUNCAN：（經傳譯員）可以，我哋可以去 9C-2，九巴 3853 頁。我想問你剛才係咪提及嘅就係呢一份？

梁乃鵬先生： Outstanding service award. Okay.

蘇偉基先生：咁大家都睇到，螢光幕嗰度，佢就係話去表現員工，如果佢係有貢獻，或者個表現良好，咁就會由佢嘅主管去提名，然之後我哋就會頒發呢個良好表現獎，咁呢個係 for 所有嘅同事嘅。

MR DUNCAN：（經傳譯員）冇幾耐之前，你話都會視乎佢有冇良好嘅駕駛行為，你剛才係咪講呢個安全駕駛獎，即係話係冇意外嗰個？

蘇偉基先生：我要即係澄清，第一個，嗰個係安全獎，嗰個係會睇佢嗰個意外紀錄，呢一個就係睇佢嗰個表現良好，但係喺表現良好嗰度，我哋都會睇睇佢係咪一個有良好駕駛紀錄先至可以提名佢獲取呢個表現良好獎。

MR DUNCAN：（經傳譯員）好，唔該晒。我就想問，良好駕駛紀錄係咪就係唔需--即係佢冇一啲需要負責嘅係交通意外嘅紀錄？

蘇偉基先生：並非所有，因為除咗意外...

MR DUNCAN：（經傳譯員）邊啲呀？

蘇偉基先生：顧客嘅投訴，或者我哋自己內部亦都有一啲嘅便衣巡查，都會去睇到一個車長，其實佢嗰個駕駛紀錄係咪良好嘅。

MR DUNCAN：（經傳譯員）唔該晒。呢一個傑出服務獎有冇係金錢嘅獎勵㗎？

蘇偉基先生：係冇嘅，冇一個獎金包含嘅。

MR DUNCAN：（經傳譯員）係咪都係一張證書咁，都好似頭先講嗰樣？

蘇偉基先生：一張證書，冇錯，一張表揚。

MR DUNCAN：（經傳譯員）唔該。好，跟住落去嘞，就係呢個星級車長計劃，我諗你剛才都係畀咗少少資料我哋㗎嘞。我而家想問，喺頒呢個獎嘅時候，係畀粒星佢嘅時候，係用啲咩嘢準則？

蘇偉基先生：呢個秘書可唔可以幫我去一去呢個 annex 9c-3 嗰度？

MR DUNCAN：（經傳譯員）KMB-9，3858 頁，唔該晒。

蘇偉基先生：去一去後一頁，有一個介紹嗰個--係嘞，呢個，停喺呢頁。喺呢個計劃入面，首先就係具備良好嘅意外同埋服務紀錄。

梁乃鵬先生：（經傳譯員）3864 頁，第 3864 頁。

主席：（經傳譯員）係呢度嘅第幾頁呢？

MR DUNCAN：（經傳譯員）佢原文就中文嚟嘅。

梁乃鵬先生：（經傳譯員）第3864頁。

MR DUNCAN：（經傳譯員）我而家睇緊嗰個--想搵埋嗰個翻譯本。

梁乃鵬先生：（經傳譯員）呢個係中文。

主席：（經傳譯員）3865/1？

MR DUNCAN：（經傳譯員）唔係，3865/7。

主席：（經傳譯員）好，唔該。

梁乃鵬先生：（經傳譯員）3865-7嗰頁有一個英文嘅翻譯本。

MR DUNCAN：（經傳譯員）係，而家打咗上嚟嘞，咁樣有咩嘢特別嘅嘢係想同我哋講下？

陳祖澤先生：（經傳譯員）或者讓我補充一下，呢個計劃嗰個目的就係表揚嗰啲係良好嘅車長。其實我哋每年頒出嘅獎就係唔多嘅，係兩、三個嘅，咁就係一個特別嘅計劃，嚟到去表揚佢哋，亦都希望係鼓勵佢哋就係有個良好嘅表現嘅。

MR DUNCAN：（經傳譯員）唔該，呢度裏面有冇呢一個係金錢嘅獎勵㗎？

陳祖澤先生：（經傳譯員）冇㗎。

MR DUNCAN：（經傳譯員）好，去番第77頁嘞，就係KMB-1嗰度，講到話係如果嗰啲車長就表現良好嘅話，佢哋嗰個係職業嘅晉升嘅階梯係點樣樣嘅。我想問一個問題，由車長升去車長二，我想問，會唔會係增加佢嘅薪酬？

蘇偉基先生：有㗎。

MR DUNCAN：（經傳譯員）同樣，車長二升去車長一有冇？亦都係咪會係讓佢就係有加人工？

蘇偉基先生：係有嘅。

MR DUNCAN：（經傳譯員）講番啲細節嘞，我諗可以睇番係之前，你係話畀我哋聽嘅，係關於獎金嗰頁嗰度嘞，我諗而家唔需要去嗰度睇嘞。呢度喺77頁底下嗰度，你見到係有咩嘢準則嘅，係睇咩嘢準則，然後先至可以係一級級上去嘅，即係話係冇意外，冇呢個紀律警告，同埋過往兩年都係出勤嘅紀錄係好嘅，啱唔啱？

蘇偉基先生： 正確。

MR DUNCAN：（經傳譯員）唔該。好嘞，就呢個課題係最後一項，第78頁，嗰個就係週年嘅表現獎金。喺呢版嗰度佢就話，呢個就一年係出兩次嘅，咁亦都係同嗰個車長嘅表現掛鉤。我就想問，點樣同係車長嘅表現掛鉤？

蘇偉基先生：呢個包含幾方面，第一，就係嗰個駕駛紀錄有冇曾經被紀律處分，佢嘅出勤嘅紀錄，「出勤」嘅意思係講緊係不假不到，即係 absent without permission，因為你呢個影響嗰個服務嗰個穩定性嘅，咁最主要係綜合呢三大嘅指標。

李澤昌先生：呢度亦都可以有少少補充，喺啱啱我哋前嗰幾個月，呢個已經係轉咗係一個十三個月嘅雙糧，即係換言之即係話，過去每六個月係評核，然後畀呢個所謂叫做 annual performance bonus，亦都轉咗係十三個月糧，即係換言之，呢個評核嘅基制已經係冇咗嘞。

MR DUNCAN：（經傳譯員）你意思係，年度表現獎金已經唔再存在？

李澤昌先生：（經傳譯員）正確㗎。

梁乃鵬先生：（經傳譯員）我想補充，我剛才喺研訊都提過，我唔單只將安全獎金同埋係服務獎金納入底薪，同時喺年尾嘅時候，呢一個年度表現獎金就會變成第十三個月嘅糧係畀車長嘅。換句話說，之前佢哋最多都會係每年係攞到獎金就係 12,000 元嘅，就係分兩次畀。但係而家，到咗年尾嘅時候，佢哋就會攞到...

李澤昌先生：（經傳譯員）即係好似雙糧咁樣，攞多一個月嘅糧。

梁乃鵬先生：（經傳譯員）咁就係跟番新嗰個底薪去發放嘅，而家就係 15,400 元。

MR DUNCAN：（經傳譯員）我咁樣嘅了解啱唔啱，就係話呢一個第十三個月糧就同服務係無關嘅？

梁乃鵬先生：（經傳譯員）你係正確嘅，係無關嘅。

MR DUNCAN：（經傳譯員）咁係舊年 12 月，董事局批准呢一個改變之前，一個人首先就會係得到一個安全嘅獎金，就係你九成嘅車長都攞到㗎喇，即係如果我之前嘅理解係正確嘅。咁佢哋亦都仍然可以係有一個年度表現獎金？

梁乃鵬先生： Yes.

MR DUNCAN：（經傳譯員）咁有幾多嘅巴士車長係會得到首先呢一個每年嘅年度表現獎金？

蘇偉基先生：約莫九成，接近 90%，以往。

MR DUNCAN：（經傳譯員）我嘅理解啱唔啱，就係呢一個年度表現獎金而家取消咗嘞，就係因為舊年 12 月董事局嘅一個決定，就係話由今年 3 月 1 號起，你係開始新嘅薪酬架構？

梁乃鵬先生：（經傳譯員）係啱嘅。

MR DUNCAN：（經傳譯員）咁而家嘅情況係咪咁樣，就係已經冇咗具體嘅一啲金錢

上嘅獎勵，即係呢一個巴士車長就算有安全嘅駕駛紀錄，都唔會有一啲金錢上嘅獎勵？

梁乃鵬先生：（經傳譯員）我哋有其他嘅保障，去確保我哋嘅巴士車長係會好正確同埋好安全咁樣駕駛。或者我都應該喺呢一個階段提及，除咗提升佢哋嘅薪酬之外，即係而家已經實施咗，係 3 月 1 號，我亦都係建議緊，希望董事局係同意係有其他方面嘅改善。譬如剛才我哋講到，巴士車長嗰度係有三個級別，就係車長、車長二、車長一。我係得到董事局嘅支持，就係呢三個級別，就將會係擴展到五個級別，同埋每年嘅增薪點亦都係會擴大，由而家八次嘅增薪點，係會增加到二十個增薪點。譬如話要晉升去下一個級別，同埋要得到--每一年嗰個增薪點其實係唔會係自動，係要視乎佢哋巴士車長嘅表現。但係更加重要嘅，我相信，我相信我咁樣講都係正確嘅，就係巴士車長喺佢哋嘅態度上，並唔會變成更加不負責任，即係話唔會因為冇咗安全駕駛獎，就會冇咁負責任，因為佢哋係專業司機嚟㗎，佢哋自己都要保障自己嘅安全，除咗乘客安全，都有自己嘅安全要保障，因此我最主要嘅目標就係要去增加、提升巴士車長總體嘅收入。我希望我唔單只可以招募新嘅巴士車長，我仲可以係挽留現職嘅巴士車長，呢一個係我嘅意向嚟㗎。鄧律師。

MR DUNCAN：（經傳譯員）多謝你，梁博士。講到你剛才話得到董事局支持嘅事情，如果你而家係改變嗰個薪酬架構，你會唔會係好似慣常咁樣，都會同呢啲員工嘅工會去傾，抑或係就咁實施咗，先話畀佢哋聽？

梁乃鵬先生：（經傳譯員）我哋會㗎，其實我自己係親自同工會嘅代表喺幾個月見過面。除咗係關於薪酬方面嘅新嘅架構喺 3 月 1 號實施咗之後，我亦都係向工會進一步係表示就話，將會有進一步嘅改善，佢哋係知道。譬如話佢哋知道與其有三個級別嘅車長，將會係有五個級別；與其有八個增薪點，將來會有二十個增薪點，同埋仲有其他嘅薪由。不過我係時時都好願意聽巴士車長嘅意見。我應該點講呢？我發現我自己個人嚟講，我嘅管治哲學就係話以人為先，首先要注意啲人，當然，乘客對我哋好重要，佢哋係首要，但係我哋嘅員工同我哋--對我哋嚟講同樣重要。同埋我都要向我嘅股東負責，所以我係盡我嘅所能去提升我所有嘅員工，唔係淨巴士車長，即係包括埋前線嘅車--其他嘅人員佢哋嘅收入，等我哋可以招募同埋挽留優質嘅員工。

李澤昌先生：呢度有點補充嘅，其實我哋都有同好多其他嘅員工即係都有溝通到，喺呢方面。

蘇偉基先生：呢度我亦都可以講一講，其實呢啲訴求喺以往公司都有聽到嘅，佢哋亦都覺得將金錢同個安全綑綁，佢哋行車嗰陣時會有個壓力，咁就年尾嗰個 annual performance bonus 係要評核，亦都係有訴求，我自己同車長接觸，或者經廠務嘅同事亦都有反映，佢哋係對呢樣嘢係希望有個改變，所以我哋係聽到員工嘅聲音，再頭先主席係接見咗工會嘅代表，係作出一個改動。

MR DUNCAN：（經傳譯員）唔該。梁博士，我而家想請你去睇番我哋見過嘅一位證

人嘅證供，佢係黎兆聰，佢係代表一個工會。

梁乃鵬先生：（經傳譯員）佢係我哋工會嘅一個代表嚟嘅，我都有見過佢。

MR DUNCAN：（經傳譯員）或者我哋可以睇番第九日研訊，喺第 98 頁嗰度嗰個謄本。

主席：（經傳譯員）請問喺我哋嘅文件夾裏面嗰個編號係幾多？

MR DUNCAN：（經傳譯員）而家喺螢幕上面，大家係可以睇到一頁嘅紙，咁大家可以睇番第九日嘅研訊，睇第九行（原文照錄）。

主席： Which of the four transcript bundles is it to be found in?

MR DUNCAN：（經傳譯員）係，第四個。

主席： Thank you.

MR DUNCAN：（經傳譯員）或者我解釋一下當時呢一個對話，喺第十三行，就係由黃律師，即係我嘅同事，係委員會嘅其中一位律師，佢就問一個問題問黎生，佢就話「我哋唔係講緊一個減扣㗎，呢一個係增加㗎，我而家意思就係話，唔係增加咗你嘅底薪，如果你駕駛良好，你會係得到另外一個獎金，呢個唔係關於減咗你嘅人工。」咁黎生就話「九巴就冇一個咁嘅制度。」咁黃律師就話「唔係話關於你有冇呢個咁嘅制度，如果有人想建議一個咁嘅制度，你會唔會支持？」

我想你留意嘅就係黎生呢一度嘅答案，佢就咁講「主席，我哋係支持任何獎勵或者激勵嘅制度，而家我哋係同九巴講緊係有另外一種獎金制度，就會係有一個二十個增薪點嘅制度。」

梁乃鵬先生：（經傳譯員）呢個就係我剛才提及㗎嘞。

MR DUNCAN：（經傳譯員）係呀，呢個就係你提及㗎，唔該。咁意思就係，如果你係達到某啲嘅表現，你就會係得到另外一個增薪點，呢個係唔單只每一年嘅增薪，咁九巴就已經係口頭答應咗，會有一個二十個增薪點嘅，就會係講到表現、安全表現、出勤同埋係紀律。咁如果巴士車長係達唔到呢啲標準，就唔會得到呢一個額外嘅增薪點。

梁乃鵬先生：（經傳譯員）係，頭先我係講到增薪點㗎。

MR DUNCAN：（經傳譯員）你而家心目中嗰個制度，會唔會都係要視乎安全表現㗎？

梁乃鵬先生：（經傳譯員）會㗎，好似我剛才都有講過，呢一個增薪點同埋係晉升去下一個級別唔會自動，要係考慮安全表現，同埋其他方面嘅表現，係會㗎。

MR DUNCAN：（經傳譯員）咁你決定咗你會點樣去評估安全表現未，即係喺呢一個

制度之下？

梁乃鵬先生：（經傳譯員）有㗎，我哋係有一個服務質素管理部，佢哋就係負責去監察所有巴士車長嘅表現嘅。咁喺呢一個時候，或者我可以請我哋有關嘅主管。

李澤昌先生：或者呢度可以補充少少先。

梁乃鵬先生：（經傳譯員）咁佢呢一個主管就可以話畀你聽，我哋點樣去監察巴士車長嘅表現嘅，咁之後就李生可以補充。

黃祥明先生：早晨，大家好，我係 James Wong，係呢個九巴嘅培訓及訓練部質素嘅主管，咁我係負責係訓練巴士車長嘅訓練，兼且係要監管佢哋嗰個行為同埋操守。咁喺我嘅管理範圍裏面，我哋係會有不時係恒常嘅監測車長嘅行為，包括佢係喺行車上面有超速，或者係駕駛唔穩妥，呢方面我哋有黑盒嘅監管。

另外一方面，我哋係會有接到啲乘客嘅投訴，甚至無係個警察嘅控訴，從而知道呢個車長係有啲唔好嘅行為，或者係不遵守呢個交通規則嘅事件。喺呢方面，我哋係有呢個便衣嘅巡查，當我哋接到有乘客嘅投訴嘅時候，我哋係會安排我哋嘅便衣導師係上車，係親身去睇下呢個司機嘅駕駛行為，從而決定佢嗰個駕駛態度，或者個技巧是否正確。咁喺頭先問我哋點樣去監管呢個車長嘅違規，咁我哋喺呢方面都係盡咗好多嘅努力，喺度做，我哋目標都係希望能夠達到安全駕駛。

其實我哋嘅駕駛訓練學校係有好唔同嘅，好多嘅方向嘅駕駛訓練。咁喺呢個基本訓練裏面先，我哋基本訓練就係會有分兩個階段嘅訓練，第一個階段就係令佢可以達得到呢個運輸署嘅駕駛執照；而第二個駕駛訓練，第二個階段，我哋係令佢--訓練到佢可以達到我哋九巴嘅訓練目標，可以出嚟服務呢個乘客。至於佢哋有啲唔好嘅行為嘅時候，我哋係會用唔同嘅方法去監察。

李澤昌先生：正如頭先講，其實我哋有好多渠道，到其時會同個車長多啲溝通，頭先你所講嘅，究竟係咪車長覺得呢一樣嘢係咪另外一種嘅監察佢嗰個駕駛技術，從而有冇呢個所謂升職。咁我諗係--呢啲係我哋一定會聽取嘅意見，呢個都係我哋即係初步嘅提議，係向呢個方向行。咁日後，我哋應該同啲車長喺呢方面多啲溝通喇，呢啲意見最後都係一個綜合嘅意見。

MR DUNCAN：（經傳譯員）唔該晒，你講到嗰個監察巴士車長，我之後會繼續多問一啲問題，或者當我哋去到係呢個黑盒嘅時候，我哋會再問多啲呢方面嘅問題，感謝你剛才所作嘅回應。剛才就講呢個安全獎金，安全獎，嗰個就講完嘞，我而家係想落去係另一樣嘢，但係都係同安全有關嘅，我就想請你係睇另一個文件夾，今次就係想睇呢個 KMB-6，2110 頁。你而家睇緊嘅應該係九巴嘅係管理架構，係你哋公司交畀委員會嘅。

梁乃鵬先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）喺頂頭嗰度見到就係管理架構，上面嗰度就係李澤昌先

生，佢今日都係在席㗎；跟住就係見到就係呢個車務總監，就係梁健宏先生，佢今日亦都在席嘅；喺同一行，我哋就係有總經理，就係企業策劃同埋業務發展嘅蘇偉基先生，佢今日亦都在席嘅；喺車務總監下面，就有副車務總監，就係彭樹雄先生，今日亦都在席嘅；喺人力資源總監下面嗰度，係有黃祥明先生，佢剛才亦都答咗其中一條問題嘅，咁嗰度就係寫，嗰個部門就係培訓及服務質素管理部。

我就係想睇文件夾嘅另一頁，亦都係你哋提交嘅，呢個就係 KMB-3，708頁。呢個係嚟自週年報告，呢個就係載通國際，你哋嘅控股公司嘅週年報告嗰度係摘出嚟嘅，呢個係 2011 年嘅週年報告。708 頁裏面嘅其中一段，或者去番 705 頁嗰度，就會見到佢嗰個標題，嗰度就講及就係嗰個車務嘅檢討，呢度就講係話照顧乘客，或者照顧你哋嘅係顧客。706、707 嗰度都有多個標題，去到 708 嗰頁，嗰度有一個安全管理系統呢一個咁嘅標題。或者先睇一睇呢度嘅第一段，嗰度就話喺九巴嘅企業安全政策嗰度講咗嘞，就九巴就係好希望係喺安全表現嗰度係持續係精益求精，而呢一個係安全嘅企業文化，就係你哋嘅係重點，你哋有一個非常之嚴謹嘅安全管治框架嚟到確保，係可以達致最高嘅安全表現水平，喺 2010 年成立，安全及服務質素部就係集中就係睇如何去提升呢個安全表現，同埋提供一個高質素嘅服務。跟住就係有提及如何就係去有呢一個職業健康同埋安全管理系統，就係呢一個 18001。

我想問，喺 2011 年嘅時候，係咪當時有一個安全及服務質量部？當時嘅情況係咪咁？

梁乃鵬先生：（經傳譯員）佢已經取代咗㗎嘞，係由培訓及服務質素管理部取代咗㗎。

MR DUNCAN：（經傳譯員）係，不過我哋而家想講番 2011 年，當時就係叫做係安全及服務質量部，啱唔啱？

梁乃鵬先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）請你去到同一個文件夾嘅第 775 頁，對唔住，774。我哋而家仲係睇緊呢個 2011 年嘅係報告㗎，你喺呢度你會見到就係主要嘅企業，係行政人員。

梁乃鵬先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）你睇番呢個名單，其中一位係關鍵係企業係行政人員，你會見到係一位 Gary Wong 先生，佢就係負責呢一個係安全及服務質量部。

梁乃鵬先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）好，我哋又睇番跟住嗰年，2012 年嘅週年報告，我相信就可以喺同一個文件夾嘅第 995 頁嗰度係見到，喺嗰一頁亦都可以見到就係話關鍵嘅係企業，行政人員，黃先生就係有個名係寫咗喺度㗎，佢就係安全及服務

質量部嘅主管，係咪呀？

梁乃鵬先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）我而家去九巴嘅第四個文件夾嗰度，首先去 1202 頁。1202 頁。1202 頁，喺呢度可以再見到就係黃先生個名，咁佢都係安全及服務質量部嘅主管？

梁乃鵬先生： Yes.

主席：（經傳譯員）我就想問，呢個係邊一年嘅週年報告？

MR DUNCAN：（經傳譯員）2013 年，即係我話畀你聽係 2013 年嘅報告。我想睇番我哋今朝已經睇過嘅一頁嘅，係 KMB 文件夾 9 嘅 3855 頁。呢個就係講傑出服務表現獎。

梁乃鵬先生： Outstanding service award.

MR DUNCAN：（經傳譯員）係，睇到嗎？

梁乃鵬先生：（經傳譯員）係，我喺螢光幕上面睇到嘞。

MR DUNCAN：（經傳譯員）呢度就係分發嗰個名單，就包括係安全及服務質量部嘅主管，你可以見到就係嗰個係分發畀邊一個嗰個名單嗰度，係右手邊嗰欄。

梁乃鵬先生： Yes.

MR DUNCAN：（經傳譯員）大概係數落嚟第六行喽喇。

梁乃鵬先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）好，而家就去文件夾嘅四，今次麻煩你去睇 1410 頁，1410 頁，呢度都係關鍵嘅企業行政人員，呢個係 2014 年嘅週年報告嘅資料嚟嘅。今次就睇唔到係有提及安全及服務質量部主管，啱唔啱？

梁乃鵬先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）我諗你較早時候，作證嘅時候講過嘞，就係呢一個部門就係喺某一個時候就係有其他係取代咗，係咪呀？

梁乃鵬先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）委員會就係聽取咗啲係證供嘅，唔知你知唔知，就關乎 Gary Wong 先生，黃嘉峰（譯音）先生，佢喺 2015 年嘅時候，佢係解僱咗，啱唔啱？

梁健宏先生：冇錯。

MR DUNCAN：（經傳譯員）呢個係咪亦都同呢個安全服務質量部唔再存在，個時間上係一樣？

梁乃鵬先生：講喇，繼續講。

梁健宏先生：呢個部門嗰啲工作就當其時嘅車務總監，Mr Owen Eckford 就因為當其時呢個部門嘅做，對於個巴士機件係唔識嘅，對於個車長嘅溝通係做得唔好。咁有個決定，就將呢個部門嘅工作就提升畀兩位車務副總監去處理嘅，其中一位就係我本人。喺硬件嗰方面，就我好熟悉，我喺九巴做咗好多年，都係喺工程部，喺巴士嗰度，所以變咗巴士硬件，巴士嘅安全嗰方面，我可以做多啲嘢嘅。咁之前嗰個部門對於巴士嗰個認知係冇嘅，係唔足夠嘅，至於呢個部門之前同車長嘅溝通係不好嘅，亦都收到好多車長嘅不滿嘅聲音嘅，應該可以再做得好啲。例如有啲個別嘅彎位，佢提議有啲咁嘅建議，好多車長亦都覺得係不切實際嘅，呢個就其中一個例子，佢提議有啲彎位就指名一啲咁嘅轉彎嘅速度，咁個速度就記住喺張卡嗰度，咁令啲車長就記住嗰個速度，咁呢樣嘢對於一個我哋嘅專業車長，係不切實際，比較混亂啉，呢個其中一個例子。咁取消咗，或者將呢個功能併入咗車務總監之後，就會強化咗個功能。

喺車箱嗰方面，喺硬件嗰方面，我哋做咗好多嘢，車箱設備，當其時好多車長對於除霧設施或者防霞氣，英文就 demister，就好多嘅意見嘅，就不滿嘅，咁當其時亦都做咗一系列嘅東西，去令致到點樣長遠咁解決呢個問題。亦都有啲新嘅黑盒嘅監察報告，亦都可以做到出嚟，車箱入面嘅貼紙亦都更加條理，整理好。CCTV 嗰度，我哋亦都會加強去裝，當然係安裝呢個 CCTV 亦都面對好多嘅困難，亦都要同車長溝通，咁我哋呢度慢慢、慢慢咁樣做。當然個車嗰個硬件嗰度仲有好多嘢嘅，包括有啲點樣用可以幫助到車長嘅設施，我哋亦都喺呢一年、半年亦都同業界，同製造商好多嘅商討，我哋亦都同一啲學校，一啲巴士製造商，點樣樣令致到我哋巴士安全更加可以做好啲。總總而言，硬件嗰方面，就提升咗好多，我哋注重硬件嗰方面。喺硬件嗰方面，任何可以提升嘅，我哋都會保持一個開放嘅態度去考慮。喺呢一方面，硬件嗰方面，呢幾年就住安全嗰部分係提升咗好多，我哋亦都會繼續朝住呢個方向係做嘅。

至於喺營運嗰方面，亦都有副車務總監，另外一位副車務總監係去睇住營運嘅，咁就住營運嗰方面，道路嘅安全都好重要。車長每日面對嘅工作環境，喺點樣安全，多多方方面面都緊要嘅，包括設施，路面嘅設施，站頭嘅設施，路面嘅擠塞情況，呢啲都對安全係有好大嘅關連嘅。休息時間亦都係一個好重要嘅元素，我哋亦都希望人性化處理，就住營運嗰方面，同車長嘅溝通，去喺呢方面提升駕駛安全。

至於監察同埋安全培訓紀律嗰方面，我哋喺 2017 年 9 月就成立咗個新嘅部門，當其時有新嘅部門，就係質量及服務質素管理部，咁佢就負責車長嘅訓練，新車長嘅訓練，安全嘅培訓，remedial training，監察，紀律等等嘅工作，希望全面提升包括硬件、軟件，喺安全嘅範疇嗰方面嘅表現。咁亦都睇到，喺呢個部門提升到喺副車務總監層面嘅處理之後，喺交通意外受傷率都有改

善嘅，咁我哋都希望呢個工作，我哋可以繼續努力咁再做好啲，再做落去，多謝。

李澤昌先生：即係總括而言，其實就係基本上嗰啲員工都係同一班人嚟嘅，只不過可能嗰個 head 係唔喺度嘅啫，咁仲有都係主要都係講緊一個跨部門嘅方式，係處理呢個 safety 同埋 service，呢個 quality 方面，咁其實過去呢幾年，我諗阿梁生就主要講咗呢樣嘢。

MR DUNCAN：（經傳譯員）好多謝你，咁即係話，如果我理解正確，安全及服務質量部係 2010 年成立㗎，佢以呢一個方式存在，係直至 2015 年，咁樣正唔正確？

李澤昌先生：冇錯。

MR DUNCAN：（經傳譯員）我哋睇到 2011 年嘅週年報告，呢一個部門就係集中去提升公司嘅安全表現，就好似喺個報告裏面講，就希望係提供有質素、高質素嘅服務。除咗黃嘉峰先生之外，呢一個安全及服務質量部多時有幾多人手？係 2010 年至到 2015 年嘅時候？

李澤昌先生：少過十個人。

MR DUNCAN：（經傳譯員）有冇任何一位，即係喺你而家呢個管理架構裏面，就係要負責安全呢件事？即係公司嘅安全，係邊一位，喺你而家管理架構負責？

蘇偉基先生：而家公司個架構其實基本上每一個部門當然都有佢嗰個安全個意識，亦都有佢安全個責任。咁我哋亦都喺舊年 9 月成立咗個部門，其實佢喺人事部嗰度係分拆出嚟，嗰個部門就叫做培訓及質量保證部，咁隔籬位同事就係我哋當時個--而家個主管，咁佢係負責多方面嘅，但係佢都係講緊培訓車長，硬件嗰方面，正如頭先梁生講，都係留番畀工程部去睇住嘅，因為安全係有分硬件就係架車嘅設施、穩定性；人嗰方面，就係佢駕駛嘅技術咁樣嘅。咁喺嗰個培訓及品質保證部亦都係提升咗好多喺軟件、培訓、員工表現嗰方面嘅，咁呢度我就交畀阿黃生去介紹番。

黃祥明先生：咁其實安全就並非一個公司、一個人去負責，而係我哋公司每個人都要確保自己個工作安全，包括係個職業安全，或者佢嗰個車長嘅駕駛安全。咁喺我個部門，我主要就係管理啲車長佢嘅駕駛安全，咁由佢哋受訓開始，我哋已經係開始係要佢著重呢個駕駛安全。咁我睇呢個訓練係有三--車長嘅方面，佢首先一定要駕駛技巧安全；第二，就係駕駛嘅態度安全；再而，就係佢嘅駕駛嘅認知，即係話佢對公司，或者香港嘅道路要熟悉，呢個安全。咁我首先著重就係個駕駛嘅技巧，因為如果佢冇呢個技巧，根本上佢唔能夠操控一部咁大嘅巴士。

咁由我加入呢個九巴到而家，九巴已經由六十五位導師，增加到而家有嘅八十一位嘅導師。咁呢八十一位嘅導師就佢哋要做導師嘅資格並非簡單，佢要喺十年就係有呢個駕駛巴士嘅經驗，就並無干犯一啲嚴重，需負責任嘅違規嘅駕駛

嘅意外。同時當然佢要表現良好，因為佢負責日後要教導一啲新嘅學員。咁我而家增進咗有八十一位導師之後，我哋個駕駛係著重喺個學員嗰個達標嘅訓練，咁喺佢頭嗰段嘅訓練嘅時候，我哋要確保佢係能夠有個資格，係獲得運輸署嘅發畀佢嘅一個專利巴士嘅駕駛執照，所以呢個係由運輸署嗰邊係確認我哋學校能夠做到呢個目標。喺佢獲得呢個駕駛執照之後，佢係會繼續進行我哋嗰個九巴嘅訓練，目的就係佢要認知我哋喺九巴個行駛路線，同埋點樣配合番香港嘅道路嘅運作。

頭先我講過，佢哋嘅駕駛態度亦都係一個重要嘅範疇之一，咁喺呢個駕駛嘅態度，好多時都係來自車長本身嘅壓力，或者佢哋嘅心理質素。咁由於我哋要提升佢嘅心理質素，其實喺 5 月嘅時候，我哋已經係同呢個中大嘅心理專家，已經係達成咗一個合約，有合作性，就係我哋就搵佢哋協助我哋去了解車長喺工作上面嘅壓力，從而減省佢嗰--減低嗰個受壓嘅心理質素，然後提升佢嘅心理質素，令佢能夠有個安全嘅駕駛態度。呢個計劃我哋係繼續進行緊，咁呢段期間，中大嘅心理專家已經係向我哋車長或者前線嘅同事，係探討咗佢哋工作上嘅困難，我哋希望喺呢度日後會有個好啲嘅結果，可以令到我哋嘅導師可以根據佢哋嘅方向，去訓練我哋嘅車長，而提升佢個心理質素。

至於個認知方面，我亦都係需要佢係認識我哋九巴嗰個運作，了解我哋有啲乜嘢可以幫到佢，從而提升喺駕駛方面嘅安全。

李澤昌先生：咁有啲要補充嘅，就係頭先講到係喺安全嗰個方面係跨部門，咁除咗係即係車長嗰方面，我哋嗰個駕駛學院要做多啲工作之外，仲有係一個車嘅硬件方面，喺個車個硬件嘅配置，其實都確確實實係一個即係好重要嘅一環嚟嘅。

過去嗰一年，即係我同梁生本人嗰兩年都去咗即係喺嗰啲車嘅--喺外國嗰啲巴士嘅車展，都認識多啲關於巴士嘅安全嘅配置。喺上年嘅秋天，我哋亦都同咗一啲即係喺呢個 Belfast 嘅 Queen's University 同埋一間 Wright 嘅一間 manufacturing，就作為一個--有一個交流性嘅一啲嘅行動，就我哋就派咗我哋自己嘅員工去嗰邊學習，係點樣可以做多啲，研究多啲，點樣可以幫--喺架車裏面，喺架巴士裏面，幫到駕駛嘅時候嘅安全，咁佢哋都有佢哋嘅 professor，同埋佢哋嘅 research 嘅人亦都過咗嚟九巴，亦都會--將來都會係多啲同我哋一齊喺呢方面嘅合作，就研究一下，喺個車個硬件方面，可唔可以做多啲，更加多啲嘅工作，喺呢個未來，可以幫到個車長行駛嘅時候有更加多嘅支援。呢個東西其實已經係展開緊㗎嘞，咁我相信喺未來，喺硬件方面，同埋配合埋頭先我哋嗰個駕駛學院，係可以會喺呢方面會做多啲安全嘅嗰方面嘅工作。

主席：（經傳譯員）有冇一啲特別嘅裝置，你係同皇后大學係講過嘅？

李澤昌先生：有好多方面嘅，主要係兩方面，第一方面就係基本上就係喺個車個運作裏面嘅時候，有啲咩嘢方式可以令到架車更加係行得順暢一啲，呢個係一方面；另外一方面就係，點樣諗一啲方法，譬如而家好多喺坊間我哋買嗰啲硬件都係喺個即係第三者嗰度買番嚟，好多時候係唔係喺個巴士裏面，係應用嘅時候有一個

難度。因為巴士本身佢係--特別係雙層巴士，係只有得兩至三間嘅公司係做，所以佢嘅競爭能力即係係非常之唔大嘅，所以我哋一定要搵一啲--即係係一啲有技術性嘅 institutes，其實 Belfast 係差唔多係唯一一間大學，係做呢個雙層巴士嘅研究，喺個機械工程裏面。佢有幾個工作做嘅，或者我呢個時候畀梁生，我哋個營運總監，車務總監解釋一下。

梁健宏先生：或者希望大家睇睇有個 paper，就 190 嘅。

主席：（經傳譯員）係。

梁健宏先生：咁呢度就講到頭先李生所講嘅，我哋九巴同呢間 Queen's University，喺 Belfast 嘅，咁同呢間 Queen's University 嘅有個合作。W-Tech 就係呢間 university 同個 Wrightbus 轄下有個 technology 個 foundation 去做嘅。咁佢有個 project，咁我位同事，我哋個工程師，我哋有位盧（譯音）生，啱啱上個月月尾就去咗呢間 university，同佢哋合作，佢就 as 一個 visiting researcher 去參與呢個 project 嘅，咁呢個 project 亦都有佢北愛爾蘭呢間 university 嘅 researcher 一齊去做嘅。咁 guiding 嗰啲 professor 亦都喺上個月，有兩位嘅，亦都嚟過九巴，亦都同佢傾談過，佢亦都知道香港嘅巴士運作，佢亦都知道--我哋都介紹畀佢知我哋面對嘅情況，喺安全問題，點樣樣可以喺硬件嗰方面可以做好啲。

所以講番呢個合作嘅內容，基本上就係一個 holistic，一個整體嘅去睇一睇有咩嘢嘢，喺硬件嗰方面，無論喺提點車長，包括個車長係咪--佢嘅注意力，或者其他方面，交通狀況，當其時個駕駛態度，會唔會可以令到個車長知悉，呢樣就係一個比較 alert 佢嘅。咁亦都有啲就係更加再進一步，有啲咩嘢嘢可以架車嗰方面，雖然佢個車長，有啲咩嘢嘢可以令到--糾正番佢個可能有啲唔係幾好嘅行為，咁呢樣嘢咁就同嗰個 project 喺度再做。嗰度包括好多樣嘢嘅，有啲又睇番文件本身，就好多樣嘢，硬件、軟件都有。

但係點解同呢間公司合作，或者點樣樣參與呢個 project，正如頭先李生所描述，呢樣嘢就真係成架車內容包含嘅設備，咁佢就一個整體嘅設備，咁好多設施都可以喺設計嗰方面，可以應用到喺我哋香港嘅。當然做完咗之後，呢樣咁嘅設施，或者呢個咁嘅規格，或者定咗咁嘅標準，所謂，因為其實而家就冇標準嘅，唔係好似私家車咁，好多啲安全設施，好多私家車而家其實好多都有㗎嘞，但係唯獨是雙層巴士，我哋面對一個困難，亦都有時都希望有啲嘢設備，有啲新嘅技術，睇下我哋雙層巴士可唔可以有，但係好多時都唔係咁容易可以做到。

李澤昌先生：或者咁，我即係喺 2015 年入行，我基本上每一年都會去歐洲同嗰兩間巴士公司係有傾偈，我個人感受就係，其實即係好似梁生講，佢同私家車係好唔同，好多私家車嘅設施，其實喺雙層巴士係好難說服嗰啲巴士嘅製造商去做呢樣嘢，可能因為佢嗰個競爭性嘅問題，佢或者唔需要做定係點樣喇，我唔會詳談呢度，但係係真係有個好大嘅難度。我去過呢個北愛爾蘭，我亦都好深信 Queen's University 呢班即係研究嘅學院，同埋 Wright 呢間公司係好有呢

個做巴士嗰種心，好有 passion，我相信即係九巴同佢喺呢個合作，我好希望呢一個嘢做咗出嚟之後，我一定會係有信心㗎嘞，希望呢件嘢可以除咗幫助九巴，亦都可以幫助我哋呢個業界未來喺呢方面做得好啲，呢個係非常之有意義嘅一個舉措嚟㗎，我哋九巴真係喺呢方面係即係呢個 project 係寄予厚望。

但係與此同時，其實九巴自己本身都有一班即係年青嘅工程師，喺啱啱講到嘅 safety 方面，其實過去我哋都研究咗好多嘅嘢，例如呢個太陽能嘅東西，放喺個巴士嗰個頂嘅上邊，咁呢個其實係真係幫助到好多車長，佢喺天時熱嘅時間，係返到架車嗰度，係因為佢要--你講緊天時熱泊低架巴士嘅時間，其實架巴士嘅溫度係相當之熱，因為好似一個即係 greenhouse 咁樣，即係曬到成 50 度。咁巴士司機好多時係要著嗰個引擎，然後佢要等到架車凍到某一個溫度，佢先至可以行得，咁個時間係長，亦都係非常辛苦，亦都我哋覺得佢哋要諗多少少嘢。咁嗰個太陽能嗰個板擺咗去之後，而家已經去到一個即係第二個階段，咁我哋相信，因為泊低架車嘅時候，用個太陽板係令到嗰架車個溫度係減低咗好多，當佢去休息，或者食完飯返嚟嘅時間，佢著番架車個時間就會短咗好多，即係佢冇咁疲累。雖然呢啲少少嘅研究，其實已經我哋下一次，呢個已經係未來九巴嘅標準安置，即係話我哋新嘅巴士已經係同我哋啲生產商，希望佢擺嗰個太陽能板喺上邊，因為香港嘅天氣實在太熱，我覺得如果呢樣嘢係--呢樣嘢會嚟緊 2019 年所有嘅雙層巴士都會有個太陽能板喺上邊，係減低咗呢個溫度，會係--呢個係成功咗，係減低咗好多，我覺得呢啲咁嘅...

主席：（經傳譯員）李生，我諗我哋明白你嘅，我諗我哋明白你嗰個論點，或者我係等間會小休二十分鐘。而家我首先想係請你就係畀番一份係可以睇得到嘅文件，即係呢個 190 頁，嗰個係 W-Tech，可能係原本係用顏色嚟到打印，所以就睇得唔係幾好，或者就可唔可以畀一份容易啲睇嘅文件我哋睇睇？

而家首先係休息二十分鐘，唔該。

上午 11 時 37 分聆訊押後

中午 12 時正恢復聆訊

出席人士如前。

主席：（經傳譯員）鄧樂勤大律師。

MR DUNCAN：（經傳譯員）好，唔該你主席先生。梁博士同埋你嘅同事，想請你睇番 KMB-1，188 頁。應該睇緊就係九巴寫畀委員會嘅一封信，日期係 2018 年 5 月 23 號，睇到嘛？

梁乃鵬先生：（經傳譯員）係。

主席：（經傳譯員）呢個係咪就係剛剛我哋小休之前所提及嘅證供，就係你哋話同公司從呢個 W-Tech 嘅合作？

梁健宏先生： Correct.

MR DUNCAN：（經傳譯員）或者我想請你睇一睇第 188 頁嗰封下面三分二嗖，你呢度就話該次會議嗰個目的，就係希望係討論係咪可以喺九巴同埋龍運嘅車隊嗰度就係有一啲係高級嘅協助司機嘅系統，跟住你就有講到呢個合作有啲咩嘢嘅係目標，有三點。

第一，就係話係完一個技術可行性評估，就評估一下佢嗰個係商業應用或者商業應該之前一啲係協助司機嘅技術，而係可以跟番呢個 Wrightbus Streetdeck 框架。咁另外就係話建議一個適用高級協助駕駛，或者係車長制度嚟到喺九巴同埋龍運嗰度係去，咁係跟番呢個評估。第三，就係有一個係路線圖嚟到去落實呢一點。我想問目前九巴嘅車隊有冇呢一啲係 Wrightbus 車輛呢？

梁健宏先生：現時有一部正進行 prototype，至於車身嗰方面 Wrightbus 喺我哋嗰度有好多 bus body on Volvo chassis，就有幾百個。

MR DUNCAN：（經傳譯員）除咗係 Wrightbus 之外，我想問喺九巴嘅車隊仲有啲乜嘢係巴士製造商嘅巴士呀？

梁健宏先生： Sorry, please repeat your question.

MR DUNCAN：（經傳譯員）我想問係有啲係乜嘢嘅巴士車廠製造巴畀你哋係組成你哋嘅車隊呀？係邊啲巴士製造商？

梁健宏先生：有其他製造商，包括 ADL、Volvo 同埋 MAN，至於最主要都係 ADL 同 Volvo。

MR DUNCAN：（經傳譯員）富豪、猛獅同埋 ADL，ADL 就亞歷山大丹尼斯，啱唔啱？

梁健宏先生：（經傳譯員）啱。

MR DUNCAN：（經傳譯員）基本上係有三類，係咪嘞？車隊裏面基本上係呢三間廠，係咪呀？

梁健宏先生：（經傳譯員）啱。

MR DUNCAN：（經傳譯員）喺大埔意外所涉及嘅巴士，係咪 Wrightbus 嘅車嚟㗎？

梁健宏先生：嗰㗎係一個 Volvo 底盤配 Wrightbus bus body 嘅 double-decker。

MR DUNCAN：（經傳譯員）你哋嗰度有幾多部巴士就有咁樣樣嘅配置呀？富豪或者猛獅丹尼斯嘅底盤，咁而車身呢就係 Wrightbus 嘅車身呢？

梁健宏先生：確實數字我冇喺手，不過大約有接近八百、九百架。

MR DUNCAN：（經傳譯員）你車隊總數係幾多呀？

梁健宏先生：我哋總共連埋龍運、九龍巴，總共接近四千三百個。

MR DUNCAN：（經傳譯員）可唔可以再解釋一下 Wrightbus 嘅原形 prototype 係乜嘢嘢？

梁健宏先生：嗰架一架係底盤同埋車身都係 Wrightbus 嘅製造嘅，係一架 two-axle 兩車軸嘅雙層巴士。

MR DUNCAN：（經傳譯員）你哋呢個合作嘅協議，即係你哋同 W-Tech 係達成一個合作嘅協議，我想問係咪你哋打算公司就係會買咁樣樣形式嘅 Wrightbus 嘅巴士呢？

梁健宏先生： No.

MR DUNCAN：（經傳譯員）咁唔係嘅話，係打算係有啲乜嘢嘅成果呢？又或者你哋係會有啲係乜嘢巴士呢係會安裝一啲高級嘅係咩嘢司機協議制度呢？

梁健宏先生：呢個係一個睇睇有咩嘢設施，將來有啲咩嘢嘢，對於幫助到巴士安全係有咩嘢嘢可以喺佢哋嘅 Wrightbus 嗰度可以做到，而呢樣嘢係因應番，考慮番香港嘅巴士運作，亦都希望將來呢個成果如果係做得到嘅話，將來香港嘅巴士都可以受惠，但係呢個只不過係一個研究，正式落實嘅呢都言之尚早。

呢個係一個係同學術嘅研究，我哋派咗位工程師同 Queen's University 喺 Belfast，就做一個 research，一年嘅 project，去睇睇有啲咩嘢嘢係可能將來係適用到喺雙曾巴士，in this particular case 就係 Wrightbus，但係亦都唔排除呢樣嘢我哋亦都好希望，將來呢樣咁嘅安全設備變成一個標準嘅安全設備，希望所有其他嘅巴士製造商都會參與或者利用呢個咁嘅提升巴士安全。

MR DUNCAN：（經傳譯員）你可唔可以幫我哋手解釋一下，你就話用呢個諗富豪嘅底盤，咁而嗰個係 Wright-tech（Wrightbus？）嘅車身，可唔可以解釋一下呢？

梁健宏先生：底盤就係真係即係有車軸，三個車軸，咁就引擎，有全動系統，咁就有個 driver's cab。咁至於個 bus body，就係 on top of 個 chassis，包括車身、flooring、seats、air-conditioning，呢啲就係個 bus body。嗰個 bus body 就係 by Wrightbus，而個底盤 chassis，個底盤就係 by Volvo。

主席：（經傳譯員）咁兩者喺邊一度結合呢？嗰個底盤同個車身。

梁健宏先生：可以喺唔同方法，喺唔同哋方，咁呢架如果頭先所提及到嗰架，就應該係喺英國，喺 Wrightbus 嗰度，喺 Wrightbus 製造嘅。

陳祖澤先生：（經傳譯員）主席，如果容許嘅話，我想係澄清一下，嗰個底盤可以呢係有不同嘅車身。

主席：（經傳譯員）係，我明，我個問題係喺邊度呢係結合埋一齊呢？黐埋一齊呢？

陳祖澤先生：（經傳譯員）可以喺原本個車廠嗰度，巴七製造商嗰度，又或者可以喺第二度組裝，喺過往我哋九巴有我哋自己嘅巴士組合嘅工作，我哋亦都有喺中國嗰度係組裝啲巴士，亦都有喺唔同嘅地方組裝過啲巴士。

主席：（經傳譯員）好，唔該晒。

MR DUNCAN：（經傳譯員）你話可以由原廠去做，咁今次嚟講就屬於係富豪定抑或係 Wrightbus 去做呢？

李澤昌先生：其實佢嗰個底盤，如果係譬如一個 Volvo 嘅底盤，如果嗰個 body 係 Wright 嘅呢，佢有兩個可能性，一，佢就會將呢個底盤 ship 咗去北愛蘭 Belfast，佢就會將佢個殼就嵌咗，bus body 就嵌咗喺個底嗰度。咁其實呢個係一個好複雜嘅工作，因為佢個底盤同埋佢嗰個 bus body 係要做好多嘅研究，因為佢嗰扭力同埋等等嘅嘢。

亦都有啲情況，佢就喺馬來西亞，Wright 有個 plant 喺馬來西亞，就做呢個 bus assembly 嘅工作。咁即係其實 Volvo 嘅底盤亦都嵌咗喺 Gemilang 都有嘅，有幾隻牌子都有嘅。咁好嘞底盤 Volvo 係主要做底盤，咁 Wright 係一個 body 嚟，咁但係 Wright 佢本身有自己研發嘅底盤，Wright 都有自己研發嘅底盤，但係暫時我哋就只有一架，就係而家做緊測試呢架。

咁因為有一架巴士有底盤，同埋有一個 body，你先至可以研究到呢個 ADAS 呢個 system。因為你有實際架車你先可以咁做，但係呢個如果研究咗呢個 ADS system 之後，其實呢個 system 可以喺任何一架巴士都會係一個東西係用到。

MR DUNCAN：（經傳譯員）個好處係咩嘢呢？Wrightbus 嘅車身用佢而唔係用晒成部富豪有咩嘢好處？

李澤昌先生：我或者再補充少少，其實 Wrightbus 今日，佢嗰個底盤係做唔到三軸，因為佢喺英國好多都係 Wrightbus 嘅 body，亦都有 Wrightbus 嘅底，但係佢只能夠做到兩軸，而香港嘅巴士係三個軸為主，因為三個軸因為佢載個量比較大，同埋佢後面有一個好龐大嘅冷氣，佢就壓嘅重量好犀利。即係香港個道路有個標準，就係每一個 axle 佢盛載嘅重量係唔可以超過咁多，所以香港嘅巴士大部分我哋九巴都用一個三軸。

咁 Wrightbus 佢有 body 亦都有佢嘅底盤，呢個有啲似 ADL，ADL 就 complete 係一個 body 同底盤都係佢自己嘅嘢嚟嘅，咁唯獨是 Wrightbus 未研發到有三軸嘅時候呢，我哋而家香港唯一有嗰架試緊 Wrightbus 有個底盤嗰個係兩軸嘅，咁但係 Volvo 有就三軸，所以 Wrightbus 個 body 就嵌咗喺 Volvo 嗰個底盤上面。

歐陽先生：（經傳譯員）我諗佢問咗我嘅問題，唔該你主席先生，鄧生已經問咗我嘅問題嘞。

MR DUNCAN：（經傳譯員）講番呢個係企業架構，我哋唔需要睇番嗰個文件，黃先生你剛才係提過好多係關於訓練培訓嘅責任。當然呢一個係屬於培訓及服務質量管理部，我想問公司裏面邊一個係負責係監察，唔單單係車長嘅培訓，係睇埋車長嘅表現，特別係車長嘅安全表現呢，邊個嘅責任嚟嘅呢？

彭樹雄先生：係，Mr Duncan，或者我回答呢個問題，其實喺監察嗰啲車長嗰個安全，其實我哋係分咗唔同嘅 level，或者唔同嘅同事係去處理嘅。咁其實我哋每一輛嘅巴士裏面呢，我哋都有一個俗稱所謂黑盒嘅一個工具。咁我哋係每一個禮拜我哋都係會有一個我哋所謂嘅 monitoring report，一啲嘅數據出咗嚟，咁佢主要就包括咗有三樣嘅主要數據。

第一，就係超速；第二，就係一啲突然嘅加速，sudden acceleration，同埋最後就係一啲突然嘅減速，我哋叫做 harsh braking。咁我哋車廠嘅管理人員，佢哋係會每個星期就睇番，其實而家我哋做到就係話，我哋可以睇番黑盒前四日嘅數據，咁呢一樣嘢呢，其實我哋嘅同事呢係每一日第一樣嘢做嘅呢，就係會去分析，特別係 speeding 我哋嗰個超速，咁呢個超速呢我哋係包括超速 50 公里，同埋 70 公里。

另外喺嗰個突然加速或者突然煞車嗰度，其實我哋亦都有個數據，就係可以睇得到個別車長，因為我哋會出一啲叫做 exception reports，咁我哋亦都睇到有冇啲個別車長，嗰個駕駛嗰個嘅行為係值得我哋關注，咁我哋車廠管理如果睇到有某個車長，喺某個時段嗰個駕駛態度可能覺得值得我哋關注，我哋第一時間我哋就係會勸喻呢個車長，我哋搵一啲前線嘅督導人員，亦都係會同啲車長傾偈，睇下有冇啲咩嘢特別嘅嘢。

另外就住嗰個超速，咁我哋亦都係會將一啲超速嘅案件，我哋係會即時交畀我哋嗰個 training and quality assurance department，佢哋亦都係會作出嗰個跟進，或者稍後喺超速嗰度，或者黃生可以有多啲嘅補充。咁我想講就係呢啲黑盒嘅數據，係我哋會保存，我哋會檢視，同埋我哋亦都係會跟進。

彭樹雄先生：其實個問題呢，就係邊個有責任？你就講咗嗰啲車廠就做咗啲乜嘢，咁有啲咩嘢人員喺嗰度？

主席：（經傳譯員）個問題就係邊個係，唔係邊個應該。同埋唔該你可唔可以講慢

啲。

彭樹雄先生：Okay，我哋車廠個管理層，就由邊度開始呢？就係由我哋嗰個車務主任嗰個嘅層面開始。我哋車務主任呢，我哋叫做 operations officer，咁就係每一個屬廠，同埋每一個屬區，我哋叫做 zone。整體嚟講，我哋 KMB 我哋有四個主要大嘅車廠，咁包括荔枝廠、包括九龍灣廠、包括沙田廠，同埋屯門廠。

當然仲有龍運巴士，咁呢啲每一個廠，我哋其實都係有啲 boundary，即係一啲界限嘅劃分，佢哋負責唔同嘅區域，咁每一個區域，我哋係會有一個助理經理，或者經理級嘅同事係去負責，咁我哋叫呢啲做 manger 或者係 assistant managers，咁佢每一個經理或者助理經理嘅下面，佢亦都有唔同數量嘅車務主任，operations officer。

咁我哋亦都係呢啲 operations officer 佢哋每一日返工做第一樣呢，佢就係會睇番之前諗四日嗰個黑盒嗰個嘅資料。咁剛才我講咗嘞，就包括超速，突然加速，或者係突然咁煞車。咁呢個責任亦都係我哋個車務主任，同埋啲助理經理每日都會做嘅。

MR DUNCAN：（經傳譯員）咁有幾多位呢啲車務主任呢？喺每一個車廠嗰度有幾多位呢？

彭樹雄先生：我哋總體嚟講，我哋每一個嘅廠，視乎嗰個廠嗰個嘅大細，可能有啲有六至七個嘅車務主任，亦都可能有三至四個嘅車務主任。整體嚟講，去處理呢啲數據，其實約莫有大約三十七個同事呢，係會處理呢啲嘅數據嘅分析等等。

主席：（經傳譯員）你有冇一個圖表或者一個地圖，可以畀我哋睇到每一個車廠負責嘅區分呢？

彭樹雄先生：主席，容誰我可唔可以喺會後或者喺個今日...

主席：（經傳譯員）你可唔可以答得定唔得？

彭樹雄先生：可以，絕對可以。

主席：（經傳譯員）好，唔該晒。請你儘量回答得或者唔得。

彭樹雄先生：好，主席。

主席：（經傳譯員）你可唔可以畀一個咁樣嘅圖或者圖表，或者地圖嘅副本畀我哋，你會唔會咁做？

彭樹雄先生：（經傳譯員）我會。

主席：（經傳譯員）好，大律師。

MR DUNCAN： Now, the operations officers presumably report to

the depot manager; would that be correct?

彭樹雄先生：係，冇錯。

MR DUNCAN：（經傳譯員）咁呢啲車廠經理又向邊個報告呢？

彭樹雄先生：我哋其實每一個 depot，都會有一個資深嘅總經理，又或者經理佢係去負責統籌呢四個車廠，同埋龍運巴士嗰個嘅運作。咁而呢五個資深嘅總經理，又或者經理呢係直接向我負責。

MR DUNCAN：（經傳譯員）之後我會再講番黑盒嘅問題，但係而家有兩樣嘢我都想同你探索一下，然後先講黑盒。我想請你睇一睇 FE-1 號。請你去第 96-1 嗰一頁。你而家應該係睇到一份用電郵傳送嘅文件嘅一個副本，就係畀鄭桂興先生嘅，你睇唔睇到呀？請問睇唔睇到呀？你會唔會睇到鄭桂興先生其實係九巴嘅前僱員呀？

李澤昌先生：我嚟嘅時候佢已經走咗，佢應該係 2014 年走嘅。

MR DUNCAN：（經傳譯員）好，你就到本委員會曾經研訊或者調查過嘅事件，就係九巴嘅僱用嘅情況，或者你自己睇一睇第一同埋第二段，請你自己睇一睇，同埋都睇埋第三段。睇一睇就係本委員會寫畀鄭先生嘅一封電郵。

請問你睇咗未？好，唔該。咁而家想請你睇睇第 96-4 嗰一頁。你之前有冇睇過呢一回應呀？李生。

李澤昌先生：未睇過。

MR DUNCAN：（經傳譯員）或者你而家用少少時間自己睇一睇。係第 96-4 嗰一頁，同埋 96-5 同埋 96-6 呢幾頁，請你而家慢慢睇一睇，等你熟習一下。

李澤昌先生： Okay.

MR DUNCAN：（經傳譯員）好，唔該晒，喺 96-7 嗰一頁，你會見到進一步嘅回應，係鄭先生，佢再一次係回答第一同埋第二條問題，或者都請你都自己睇一睇呢一啲，就係 96-7 嗰一頁。

好，唔該，喺 96-7，即係話回答第二條問題嗰度下面呢，鄭先生就係講到廿九個急彎。佢就講到就係 Excel 呢一個形式儲存嘅一啲資料，你睇唔睇到呢？

李澤昌先生： Yes.

MR DUNCAN：（經傳譯員）呢一啲資料，仲喺唔喺九巴內部係存在呢？

彭樹雄先生：我 2015 年 join 呢間公司嘅時候，其實我係真係未見過呢啲資料嘅，但係喺呢幾個月，我亦都同啲喺度做咗好多年嘅同事，亦都了解過呢啲研究同埋呢二十九個 sharp bends 係點樣走出嚟。咁啲記錄亦都可以畀番你哋去睇

睇，據嗰個資料顯示呢，就係當其時佢哋嘅 managing director 嗰陣時 Edmond Ho 先生，就話需要當其時嗰個 operation director 要 approve 咗佢先至會執行呢樣嘢。

咁睇番啲記錄喺 2014 年嘅時候，呢一個二十九個 bend 呢個建議，係並冇執行過，亦都喺嗰啲佢哋記錄嘅文件，亦都睇到有好多車長同埋佢前線嘅員工，都有好多聲音係關於嗰個執行性方面，係咪可以做到？

我喺 2015 年初接任嘅時候，係完全係唔知道有呢一個咁嘅建議，咁或者而家嗰個 operation director 梁生或者係我哋個 head of 嗰個 training school 可以喺呢度補充。

MR DUNCAN：（經傳譯員）或者我都唔會想講好耐嘅呢一點，我只係想問一問有關嘅 Excel 認識儲存嘅資料，係咪仲喺度，我相信你話你係會畀個記錄我哋係咪，即係有，係咪呀？

梁健宏先生：我而家答唔到你，我可以去 find out。

MR DUNCAN：（經傳譯員）好，唔該。

主席：（經傳譯員）如果你真係搵到，你會唔會可以交畀委員會？

梁健宏先生： Yes.

主席：（經傳譯員）另外頭先李生所講記錄，就係講到話點解呢一個計劃係冇實施，有關呢一啲嘅記錄，可唔可以都畀我哋呢？咁即係話有兩種嘅記錄，一個就係關於廿九個急彎嗰啲嘅記錄，另外就係點解呢一個建議係冇實施嘅？好，唔該晒。

我都想補充，如果你睇一睇 96-7 呢一頁嘅底部，有一個就係講到一啲細嘅提示卡，講到就係話嗰啲急彎吧具體嘅地點，同埋係有啲乜嘢安全嘅車速，呢啲都印咗喺度，麻煩你翻查公司個記錄，睇下仲有冇呢啲卡嘅樣本？

梁健宏先生：我未見過。

黃祥明先生：其實我喺呢方面都有做過啲參考，咁睇番以前嗰個文獻，我知道係當時有提議過我哋九巴去搵一啲嘅急彎，等我哋啲車長去知道之後呢，喺嗰個地區就個車速去減慢，咁喺嗰個--我手頭上有一個當時嘅開會會議記錄，咁正如我哋個 MD 所講，係當時係需要一個 MD 去同意咗呢個執行先至可以做到，咁但係我睇番當時嗰個會議嘅議程呢，就並冇得到呢個...

主席：（經傳譯員）黃先生，我想問呢啲卡，有定冇？不如你直接回答呢個問題？

黃祥明先生：（經傳譯員）因為我係想補充。

主席：（經傳譯員）你可以係提供多啲資料，不過直接，究竟仲存在嗎？

黃祥明先生：（經傳譯員）冇。

主席：（經傳譯員）即係照你所知，就不再存在？

黃祥明先生： No.

主席：（經傳譯員）我唔係想截停你講嘢，咁你而家可以繼續補充你想補充嘅事情。

黃祥明先生：咁嗰個文獻裏面就係話係需要 OD 去同意執行呢樣嘢嘅，咁但係當時喺個記錄上面，係受到好多同事嘅意見阻擾，咁變咗係冇執行到，咁所以我相信呢份文件係當時係冇流出去畀前線嘅同事去做參考，邊啲係啲急彎嚟。

咁其實喺講急彎呢樣嘢，我哋而家九巴係做嗰個安全嘅所謂指引畀啲同事亦都有繼續做緊，就唔係當時所講呢二十九個急彎，而係我哋喺我哋嘅誒員工網站上面，就有提供我哋所有路線，如果有急彎或者有危險情況嘅時候發生，我哋一個叫駕駛貼士，咁呢個駕駛貼士係員工網站裏面可以睇得到。

咁員工係當佢要駕駛一條路線嘅時候，佢主要係上個網嗰度呢，就打入佢嗰個要行駛嘅網，嗰條路線，嗰條路線就會有個起點至到終點，就會顯示出沿路有咩嘢危險或者咩嘢要留意，甚至係急彎嘅情況。咁當呢個員工要駕駛條路線嘅時候呢，咁佢就可以依照呢個咁嘅指引呢去小心行駛有關嘅路段，咁呢個就係我嘅補充。

主席：（經傳譯員）係，鄧律師。

MR DUNCAN：（經傳譯員）係，唔該主席先生。你而家不如幫我哋睇下呢個 KMB-1 第 30 頁。而家就講番你嘅第一次提交嘅文件，或者你睇番頂頭嗰度，就係請你睇一睇，究竟你公司係有乜嘢嘅守則，同埋就提供啲係副本，睇到嗎？

喺嗰個實務守則嗰度，呢度提及兩行嘅標準。呢個就係有職業健康及安全之外，就仲有兩項嘅標準嘅，睇到嘛？首先，就係國際標準組織，睇到嗎？

李澤昌先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）我咁講啱唔啱呢？喺嗰行標準嗰度，係冇一樣嘢係專門係同巴士車長安全有關。

李澤昌先生：（經傳譯員）係。

蘇偉基先生： Yes.

MR DUNCAN：（經傳譯員）一樣嘞，如果你睇番下面嗰行嘅標準，國際標準組織 ISO 14001，一樣嘞，我咁講啱唔啱呢？就係嗰行標準底下，係冇一樣嘢呢係具體關乎巴士車長嘅安全要求。

蘇偉基先生：喺 ISO 14000 係冇嘅，但係喺 ISO 9000 嗰度佢係成個品質一個嘅管理，個系統呢係有牽涉到 safety。

MR DUNCAN：（經傳譯員）係，但係我要講嘅呢，就係話即係我頭先問，就係話係咪同車長駕駛表現嘅安全有關？

蘇偉基先生：呢個問題我哋可以睇睇上面第二個 bullet Staff Handbook 第五位嗰度呢，有個叫做車長安全駕駛手冊，咁呢個就釐定咗我哋車長需顧及嘅安全嘅措施，呢個係我想 Mr Duncan 你想指係兩樣。

梁健宏先生：我想補充一樣，就係講番我哋個 ISO，喺呢個 OHSAS 18001，即係 Occupational Health and Safety Assessment Series 嗰度呢，我哋有提及到 safety 嘅，咁其中有一樣嘢就係每間廠都要成立一個 depot safety committee，咁有兩個組成份嘅每間廠。

有一個成份呢就係維修，即係喺廠內做維修保養工夫，咁亦都有另外一個 committee 就係 for 車務嘅，每間廠佢都有一個成立個結構呢，就係 operations safety committee，呢個 safety committee 嘅組成，就絶大部分都係車務營運同事嘅團隊嘅，包括彭生在內。

咁佢哋呢個 depot safety committee，如果我哋講車務嗰部分呢，亦都牽涉到呢譬如話嗰啲車長喺 bus termini，啲車長喺路面，啲車長喺廠內嗰個工作環境，而呢個 operations safety committee 亦都檢視番佢嗰間廠佢哋嗰啲交通意外嘅，咁係喺 under 呢個 ISO 18001 呢，係有一套系列係 plan、do、check、act 呢，去睇番就住駕駛安全嘅事宜嘅，我哋係有。

MR DUNCAN：（經傳譯員）其實我問嘅就係 18001，有冇指明一個巴士車長係點樣去駕駛呢？佢冇去到咁嘅細節，係咪呢？

梁健宏先生：我想講呢套唔係淨係一樣嘢去管理車長嗰個行車嗰個方面，正如頭先我哋位同事蘇生描述，ISO 9001 亦都係有啲規範，係可以涉及到巴士車長嗰個駕駛安全嘅守則。其實我想講呢就係唔同制度，唔同嘅 system，都會有佢自己本身嘅用處，亦都喺唔同嘅方面，亦都可以 contribute，可以貢獻到點樣樣可以令到我哋巴士車長喺培訓，喺監控，喺檢討，點有一個整體性去做。

因為呢度頭先所講，18001 頭先所講 depot safety committee，喺 depot 嘅層面，但係喺其他 department 譬如喺車長培訓學校，譬如喺 human resources 嘅層面，亦都要一個成間 corporate 去睇成件事情嘅，唔係話單單一個睇一樣嘢，係整體嚟睇。

MR DUNCAN：（經傳譯員）我明白，但我問個問題好簡單，其實就係喺嗰個 OHSAS 18001 嗰度呢，冇一樣嘢係講明話個巴士車長係如何安全駕駛，呢一個係最主簡單嘅問題。

蘇偉基先生：如果想睇一個車長如何駕駛安全，係應該參考頭先我講嗰個呢車長安全駕駛手冊，喺 annex 1A-37 嗰個，呢個係公司對車長嘅駕駛安全，駕駛手冊。

MR DUNCAN：（經傳譯員）係，呢一個係車長安全駕駛手冊，我哋知。我而家想請你睇就係雜項嘅文件夾2，769頁。睇緊嘅呢應該係一封信，佢就係寫畀立法會交通事務委員會嘅主席，2016年6月16號嘅一封函件，睇到嗎？

蘇偉基先生： Yes.

MR DUNCAN：（經傳譯員）睇嚟嚟自己一個組織，咁就係道路安全研究小組，係咪呀？

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）嗰封信嗰標題，就講及係政府當局嘅文件，呢份文件就係關於九龍巴士一九三三有限公司嘅巴士網絡新專營權嘅公眾諮詢嘅報告，嗰個標題係咁咪，係咪呀？

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）你不如自己睇一睇呢封信，你就會見到佢提及係有一份文件，2016年4月18號嘅文件，咁你跟住嗰版你就會睇到。咁係770頁，就係佢哋係提交畀政府嘅一份文件。我想問，公司知唔知道有一個咁嘅組織，叫做道路安全研究小組？

蘇偉基先生：喺佢交畀呢個委員會嘅文件嗰度，我得悉有呢個機構，之前我不得悉。

MR DUNCAN：（經傳譯員）咁你有冇睇過呢份文件呢？即係 770 頁開始嘅呢份文件，講及呢就係九龍巴士公司巴士網絡嘅新專營權？

蘇偉基先生：（經傳譯員）簡單咁睇過。

MR DUNCAN：（經傳譯員）係，唔該。咁而家就想請你睇呢個 772 頁。喺嗰度見唔見到就係講及巴士安全管理系統。

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）可唔可以睇番嗰個內容呢？睇番呢一段個內容，請你自己睇一睇。

蘇偉基先生：可以。

MR DUNCAN：（經傳譯員）呢個 ISO 39001 嘅標準，你知道嘛？

蘇偉基先生：從佢呢個 submission，我得悉。

MR DUNCAN：（經傳譯員）未睇呢份陳述書之前唔知？

蘇偉基先生：之前我唔知。

MR DUNCAN：（經傳譯員）自此之後，即係睇咗佢呢份陳述之後，有冇睇過呀？

蘇偉基先生：（經傳譯員）簡單咁睇過。

MR DUNCAN：（經傳譯員）你認唔認為呢個標準裏面有啲嘢係有用嘅呢？對於你公司嚟講係有用嘅呢？

蘇偉基先生：呢個我要咁樣講，首先呢份報告，我所睇到佢係冇喺公司做一個實地嘅考察，或者係對我哋有個諮詢，咁另外呢個 standard 亦都唔係安全一個唯一嘅 standard，咁呢位編配呢份報告嘅作者，亦都話希望巴士嘅承辦商係有一個安全系統達至呢個 ISO 39001 嘅。

咁公司今日自己本身其實亦都係有一個安全嘅體系，我哋亦都建基於一個 ISO 9000 嘅體系，咁呢個 ISO 39001 其實都係喺 ISO 9000 嘅基石之下演變出嚟，覆蓋住四個大嘅 pillars，就係 plan、do、check、act，咁我哋喺 ISO 9000 嗰度，亦都最近呢係獲得相關機構係有個 review 嗰個嘅 accreditation。

咁我哋覺得呢方面我哋自己點做呢？我哋最近亦都喺英國聘請咗一位交通嘅專家嚟我哋公司嗰度，係睇睇我哋嘅營運，我哋嘅車務，維修，做個 health check，從而提升番我哋自己內部嘅一個 safety standard，呢個 standard 係我哋自己，係未必需要同 ISO 39000 去掛鉤，但係都係一個高水準嘅 standard。

MR DUNCAN：（經傳譯員）你話最近，係幾時呀？

李澤昌先生：我想補充，我呢度補充少少，大概我諗喺今年嘅 3、4 月嘅時候，我哋個董事會就好希望我哋搵一啲即係外國嘅專家，想睇睇我哋喺嗰個 operation 喺營運方面，無論車佢嗰個維修，同埋喺嗰個車長佢嗰個點樣派更營過，甚至乎喺個 training 嗰邊，想去睇下即係喺外國有啲乜嘢嘢我哋可以將我哋呢方面嘅服務係提升，咁其實都多過一位專家，咁其實就應該喺呢一、兩個禮拜已經開，尋日其實已經彩取緊工作。

梁健宏先生：琴日已經喺香港，嚟咗㗎嘞，我哋喺我哋嘅廠嗰度呢開始工作。

主席：（經傳譯員）佢哋係邊位呀？

李澤昌先生：我因為我冇佢間公司嗰個名喺度，我後補番呢個資料。

主席：（經傳譯員）好吖，唔該你。你各位同事係咪都唔知道呢個顧問嘅名？

李澤昌先生：其實我係喺今年嘅大概係春天嘅時候，就過咗去倫敦，咁就見過好幾個 consultant，係同佢見過面，咁有啲係以前喺嗰個 London Transport 做過又有，有啲係喺英國喺嗰啲大嘅 bus operator 做過都有。

咁呢啲大部分都係喺即係英國經驗嘅 operator，諗佢間公司名就叫 Direx Solution Limited，係個 consultant 嚟，但係嗰啲 consultant 呢大部分都係喺英國裏面，喺嗰啲 bus operator 係好有經驗。

主席：（經傳譯員）好，唔該晒。

MR DUNCAN：（經傳譯員）咁係咪即係話，而家係進行緊個調查，暫時未有報告？

主席：（經傳譯員）我諗佢哋話琴日先開始做。

李澤昌先生：佢其實係之前都有攞咗好多資料，咁但係佢真正工作，係而家先至開始工作，佢一定會即係呈交一啲報告畀我哋嘅董事會，係睇睇而家嗰個運作係點樣？

MR DUNCAN：（經傳譯員）你認為嗰個報告幾時會有呢？

李澤昌先生：喺今年之內。

MR DUNCAN：（經傳譯員）係咪即係2018年之內抑或係一年之內。

李澤昌先生：係分階段，首先係第一個階段係佢哋做一個--我哋叫做一個即係檢視一下，有邊啲地方我哋可能要有啲地方要做番好啲，咁就困難嘅，因為佢先要認識我哋啲同事等等，咁我哋係分階段去做，咁今年嘅年尾應該有一個初步嘅檢討report。

MR DUNCAN：（經傳譯員）好，我而家呢就想講下黑盒嘅問題。今朝都提過好幾次。我哋開始嘅時候呢睇睇KMB-1嘅檔案，第50頁。咁呢一頁亦都係最初提交文件之內嘅，係由九巴向委員提交嘅初步嘅文件嚟嘅，就喺今年四月嘅時候提交嘅。

咁第50頁呢一度，我哋問嘅係第二條問題嚟嘅，就係話有冇一啲電子記錄嘅裝置嘅呢？譬如話車速記錄儀，黑盒或者係車速限制器係裝置喺所有巴士上面呢？呢一啲置裏面有啲咩嘢嘅資料係關於巴士車長嘅駕駛表現嘅監察，係會可以收錄到嘅呢？咁同埋收集到嘅資料點樣用嚟係提升駕駛嘅安全呢？巴士有冇一啲前置鏡頭嘅攝錄機，係可以睇到呢一架車輛嘅行駛嘅呢？

我自己最有興趣呢就係第二句嘅，究竟喺呢一啲裝置裏面收集到嘅資料，即係話係關於車長駕駛嘅表現，係收集到啲咩嘢資料呢，而有關嘅資料點樣用嚟去加強或者提升駕駛嘅安全呢？咁我哋大家可以睇番交畀委員會嘅答案。

第一點，所有九巴同龍運巴士，都係裝置咗黑盒同埋車速限制器嘅。第二點，黑盒就係會收集到車速同埋車輛位置呢一啲資料。九巴同龍運巴士嘅車務組，就會係每日監察車速，係睇番之前十日嗰個駕駛嘅記錄，咁樣就可以監察到巴士車長嘅駕駛表現㗎，有關嘅資料呢就係會交畀車長表現經理，咁如果係有任何違反規則嘅事情，就會喺十四日內開始呢個紀律嘅行嘅。你睇到呢個問題嘛？

李澤昌先生：(Nodded head).

MR DUNCAN：（經傳譯員）咁呢一方面呢我有好幾條問題想問下，即係關於黑盒嘅

問題，咁一開頭我想講清楚呢，就係我有興趣嘅呢即係代表委員會去調查嘅呢，就係究竟有啲咩嘢資訊係你嗰啲巴士上面嘅黑盒呢係可以收集到嘅，呢個係第一條問題。

第二就係，實際上就收集到咩嘢資料呢？即係嗰啲黑盒係有能力收集到啲資料，但係實際上又實上又收集到啲咩嘢資。第三呢就係有關嘅資訊係點樣利用呢？咁我而家就好清楚話咗畀你聽，我係想調查呢幾樣嘢，因此你就會明白點解我會問以下嘅問題。

咁我就會就四個範疇去發問，咁大家都會比較容易啲。第一，我就會問你，有啲乜嘢嘅係運輸署已經寫出咗嘅要求，就係話黑盒嘅裝置同埋使用，運輸署有啲咩嘢嘅要求，即係話你有啲咩嘢嘅責任係去符合運輪署嘅要求？呢個係第一點。

第二，就係我會同你探索一下，實際上呢啲黑盒收集到嘅數據，即係喺你嗰啲公司嘅巴士上面，實際上呢啲黑盒係收集到啲咩嘢數據呢？咁然後我就會睇下究竟呢啲數據實際上係點樣利用呢？去提供實時嘅警示畀車長，即係當佢哋駕駛緊嘅時候，點樣去提供實時嘅警示畀佢哋呢？

到最後呢我就會問一啲問題去找出究竟呢一啲記錄咗嘅黑盒數據，係點利用嚟去便利你去評估佢哋嘅駕駛行為，同埋點樣可以呢係監察到車長實時嘅駕駛行為。咁我呢就會一條一條咁樣問呢啲問題嘅。

彭樹雄先生： Yes.

MR DUNCAN：（經傳譯員）好嘞，首先第一個範疇，有啲乜嘢係喺呢一個專營嘅協議裏面，你有啲咩嘢嘅責任係關於使用呢啲黑盒係要向運輸署負責呢，即係運輸署有啲咩嘢要求，咁喺呢一方面，我想你睇運輸署文件夾第 5 個。我想請你去睇 1597 頁。係 1597 頁，請問你係咪睇緊由運輸署發出嘅一封短嘅信呢？

李澤昌先生： Yes.

MR DUNCAN：（經傳譯員）佢係寫畀好幾間巴士公司，包括你哋嗰間。咁佢個題目係話喺新巴士上面呢係裝置電子數據記錄裝置。

李澤昌先生： Yes.

MR DUNCAN：（經傳譯員）咁呢度亦都係講到黑盒同埋喺巴士上嘅電子數據記錄系統。

梁健宏先生：現實上我哋呢樣呢，我哋 2003 年 11 月已經開始裝嘅，2003 年 11 月開始裝呢個 electronic data recording device。

MR DUNCAN： Right.

梁健宏先生：再之前...

主席：（經傳譯員）梁生，等一等，大律師會問你問題嘅，咁如果你有啲嘢想加，因為佢問得唔夠好，咁一陣間可以再講。

MR DUNCAN：（經傳譯員）咁呢度有冇一項要求，就係話2004年7月1號之後註冊嘅巴士都應該係有一個符合有關技術規格嘅黑盒呢？

梁健宏先生：正確。

MR DUNCAN：（經傳譯員）請你揭下一頁，呢一啲其他嘅要求呢寫出咗，喺第二點同埋第三點嗰一啲嘅要求。

梁健宏先生：（經傳譯員）係正確。

MR DUNCAN：（經傳譯員）喺第二段嗰度，係咪就係話要求呢一個裝置，應該係每一秒呢就係收集數據，然後呢喺兩個禮拜之內每三十秒呢就係儲存有關嘅數據？

梁健宏先生：（經傳譯員）正確嘅。

MR DUNCAN：（經傳譯員）佢係咪講到兩方面呢，第一即係嗰個操作嘅時間？

梁健宏先生：（經傳譯員）正確。

MR DUNCAN：（經傳譯員）第二，車速。

梁健宏先生：（經傳譯員）正確。

MR DUNCAN：（經傳譯員）第三段，嗰度呢進一步講及就係要有一啲軟件嚟到分析呢係車上，或者係下載咗嘅數據，咁呢個亦都應該係有以下嘅功能嘅，啱唔啱呀？

梁健宏先生：正確。

MR DUNCAN：（經傳譯員）首先，就講及係意外報告，要睇番嗰個車輛嘅車速，咁嗰度嗰個係頻密嘅程度亦列出嘅。

梁健宏先生：正確。

MR DUNCAN：（經傳譯員）第二點，就係講超速嘅報告，有幾頻密，係去到最高嘅車速，以及就係如果係過咗係70公里嘅話，究竟佢係持續咗幾耐？

梁健宏先生：（經傳譯員）啱。

MR DUNCAN：（經傳譯員）我想問運輸署當時係咪首次去發出咁樣嘅要求，就係話要係安裝一個黑盒同埋黑盒裏面應該有啲乜嘢嘅功能？

梁健宏先生：正確。

MR DUNCAN：（經傳譯員）或者我哋呢係可以係午飯之後再繼續，係咪呀？

主席：（經傳譯員）係，各位先生，我哋而家呢就會係休息，係午飯，我哋會喺今日下晝兩點半再繼續，兩點半，唔該晒。

下午1時02分聆訊押後

下午2時31分恢復聆訊

出席人士如前。

主席：（經傳譯員）下午好，Duncan先生。

MR DUNCAN：（經傳譯員）响食午飯之前我哋就睇到咗運輸署嘅呢一啲要求，即係使用黑盒嘅要求，時間就係2003年嘅10月，而家我哋想睇另一份文件嘅，就係KMB-1 159頁，呢個係該公司係2018年5月交嘅第二份陳述書，我想大家睇175頁。响個頁頂大家可以見到係寫住係第--有提過話嗰個係專營權嘅一啲要求嘅，第五條問題。跟住有第六條問題，委員會提出嘅問題，「請指出專營權有啲咩嘢要求，呢啲要求係唔係運輸署施加嘅呢，係咪用書面表達嘅呢，如果係，請提供有關文件嘅副本。」

公司嘅回應，佢就提過話條文第7條，7(1)，即係話專營權合約嘅第7(1)條，跟住有一個解釋，响討論新嘅專營權嘅期間，政府要求九巴要係承諾採取一啲係加強嘅安全措施，包括但不限於响巴士上安裝啲電子嘅數據嘅處理嘅裝置，有啲人就叫做「黑盒」喇，同埋限速器同埋個監察嘅鏡頭，作為一啲標準嘅設備，當買新嘅巴士嘅時候，就將呢啲納入為標準設備，請睇2017年3月10號由運輸署發出嘅文件嘅一個係摘錄，九巴就係承諾係--向運輸署承諾，就會係响根據新嘅專營權實施有關嘅要求嘅。

咁呢個運輸署嗰個信件係一個附件嚟嘅，請大家睇一睇KMB-9呢度嘅一份附件，3997頁。呢個係嗰個文件夾裏面嘅倒數第二份文件。睇番呢頁，呢度係關於係巴士上嘅設施嗰個標題，呢個話根據新專營權合約嘅第7條，九巴應承就做某啲嘢，由(a)，跟住就(b)，第2頁就有(b)一系列，對我哋嚟講，有關就係(a)，下面寫住「加強安全嘅設備」，呢個就係之前我提及嘅文件所引述嘅有關設施，咁就睇番呢個安全嘅設施總共有八樣，第一項就係羅馬數字(i)，一路去到羅馬數字(viii)，八項。第三項就係話電子數據處理設備，即係嗰個黑盒，係咪咁講啱呢，運輸署係冇講清楚係點樣使用呢個黑盒㗎，佢只係話呢個係一個安全嘅設備嚟嘅，公司應該有呢個設備，咁樣講啱唔啱？

梁健宏先生：（經傳譯員）係啱嘅。

MR DUNCAN：（經傳譯員）咁所以根據你嗰個解釋，呢個係一個加強嘅用途，即係如果當呢個係一個加強安全，3997 頁咁樣講，就唔當一個--唔係一個加強安全嘅設備嚟嘅，係嘛？

梁健宏先生：有少少複雜嘅，呢個問題，因為...

主席：（經傳譯員）有咩嘢複雜？

梁健宏先生：（經傳譯員）我解釋下。（證人直接用本地話說）Okay，因為一個咁嘅 requirement 佢就 carry forward 嘅，佢將之前嗰啲 franchise 有啲其他啲嘢佢都加埋落去，即係變咗呢個係咪 enhance 呢，就可能同對上一次係咪有分別？呢個係一個 commitment 嚟嘅，喺一個 feature 我哋會做嘅，但係係咪 interpreted as enhance 呢，就我都比較難去 comment，但係我哋係會做呢樣事情嘅。

MR DUNCAN：（經傳譯員）根據我嘅理解，你哋應承咗係用呢個咁樣嘅設備...

梁健宏先生：正確。

MR DUNCAN：（經傳譯員）咪就係咁多呢？

梁健宏先生：當然我哋會呢個 device 嘅，咁當然我哋會盡量令到佢係幫到我哋喇，咁我哋係會用嘅，但係答你個問題係咪一個 enhanced safety feature 呢，我哋係覺得係幫到 safety 嘅。

主席：（經傳譯員）咁 Duncan 先生嘅問題就係話運輸署冇要求--冇講清楚究竟係點樣嚟到呢個設備嚟到係即係所謂加強嘅用途，亦都係冇講明係要將呢個設備嘅用途係要加強嘅。

梁健宏先生： No.

主席： Nor is there any stipulation as to any enhancement of the capabilities of the device.

梁健宏先生： No.

主席： Thank you.

MR DUNCAN：（經傳譯員）好多謝你，主席，幫手。除咗呢兩份文件呢，我頭先都--我哋睇咗喇，2003 年嘅一份同埋呢一份 2017 年嘅，咁除咗呢兩份，運輸署有冇响任何時間要求公司係就住呢個黑盒運用有冇話指定用--要嚟做某一種用途？特定用途嘅呢？

梁健宏先生：（經傳譯員）冇嘅。

MR DUNCAN：（經傳譯員）我未--我哋睇第二份之前，我想睇番 175 頁，即係文件夾第一份，175 頁，嗰度最後一句話九巴承諾--向運輸署承諾嚟到係實施呢個-

-即係根據新嘅協議實施呢啲咁樣嘅要求嘅，咁乜嘢形式嘅呢，請問係用咩嘢形式嘅呢，呢個承諾係？

蘇偉基先生：呢個問題或者可以等我答喇，因為我喺嗰個 franchise 個 renewal 嗰度我有個扮演個重要嘅角色，咁個 undertaking 意思即係話公司佢係--頭先大家睇到第 3997 頁，其實係一封信嘅一個 content 嚟嘅，咁呢封信要係公司簽署，簽署即係代表 commit 去 implement 呢啲嘢，咁然之後佢就可以提請去行政會議去 grant 一個 franchise 畀我哋，咁所以呢個係 commitment 嚟嘅。

MR DUNCAN：（經傳譯員）你可唔可以畀呢封信嘅副本畀委員會？

蘇偉基先生：（經傳譯員）可以嘅。

主席：（經傳譯員）呢個係標準信件？係咪當你嗰個要--嗰個專營權要更新--差唔多限期就係要寫咁嘅標準信，係嘛？咁但係你冇話任何嘅所謂加強嘅用途㗎喎，你冇應承要有呢個黑盒嚟到係做所謂加強一啲用途嘅，所以只係一個虛張聲勢㗎咋，係咪呀？得個「講」㗎咋？得個「講」字嘅？

梁健宏先生：（經傳譯員）呢個就係運輸署即係要求我哋做，“enhanced safety feature”呢個 term 係喺個 paper 度係咁寫嘅，咁我哋 read 佢，當然我哋亦都會睇番呢啲 item，我哋點樣樣可以盡量咁利用到佢，幫助嗰啲 safety 嘅，我哋唔係睇字面嘅，我哋唔係睇個 wording 點寫，譬如講頭先嗰度“electronic data processing device”，咁佢或者之前個 specification 就係嗰樣嘢，但係其實我哋都希望如果係有啲嘢係可以更加 enhance 到，我哋都會轉用其他啲幫到我哋增加嗰個安全嘅，我哋係會唔會淨係喺字面嗰度做，我哋會自己（聲音重疊）...（聽不清）

主席：（經傳譯員）唯一嗰個 2003 年嘅 11 月所講嗰啲係要求㗎，冇嘢--跟住之後冇變㗎喇喎？

梁健宏先生：我哋除咗 undertaking 呢樣嘢之外，我哋仲會再做多一啲囉，this is the--呢個係最 minimum。

主席：（經傳譯員）我唔係批評你，梁先生，如果運輸署要求你應承--乜都唔做，咁你都同意咗喇，係嘛？乜都唔使點做嘅，你係同意㗎，係嘛？

梁健宏：...（聽不清）

主席：（經傳譯員）鄧樂勤先生。

MR DUNCAN：（經傳譯員）我想去第二個範圍，我就想係涵蓋嘅，呢個就關於黑盒嘅另一個範圍。即係話呢個關於個數據，呢個黑盒，即係九巴裝咗嘅黑盒究竟可以收集啲咩嘢數據呢？咁同埋實際上又收集咗咩嘢證據呢？即係可以收集同埋實際收集咗啲咩嘢數據呢？

梁健宏先生：Yes。

MR DUNCAN：（經傳譯員）我諗你都知道喇，委員會有聽過一啲證供，呢個叫做Kulis先生，佢哋係一間叫做Openmatics嘅公司嘅代表，即係佢係嗰個黑盒嘅供應商嘅，你知道有件咁嘅事喇？

梁健宏先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）你有冇機會睇番佢嗰個證供？

梁健宏先生：好簡要咁睇過喇。

MR DUNCAN：（經傳譯員）咁至於佢嗰個書面嘅文件呢，佢向委員會提供嘅書面文件，有冇機會睇過？

梁健宏先生：（經傳譯員）係嘅。

主席：（經傳譯員）我諗你係指稱嗰個代--其實係嗰個律師代表佢交嘅文件？

MR DUNCAN：（經傳譯員）係，冇錯。好喇，我想你睇另一個文件夾，BM-1，請你睇番--或者係而家請顯示番第64頁，係喇，呢份文件裏面嘅64頁。你會見到呢間律師行就係即係主席所提及--即係呢個係嗰封律師行嘅信，咁封信就係關於相關公司所提供嘅服務嘅，你見唔見到？呢個就係律師行嘅信件，你見唔見到？然後就請你揭去65頁，你就會見到提供咗畀委員會嘅資料嘅，咁就係由65頁去到72頁嘅。咁問題就係用黑色字，而答案就係用藍色字顯示嘅。

首先我想你睇嘅就係第65頁，咁喺第一個問題，就係有個書面陳述，就係喺2018年4月24號呈交咗畀委員會，咁就由2015年起，九巴就係喺佢哋嘅巴士度安裝一啲限速器喇、黑盒喇同埋一啲監察鏡頭去監察車長嘅駕駛表現，同埋協助調查意外嘅，咁我希望--我想你睇一睇之後嗰三段答案嗰部分。咁Openmatics嘅服務就並不包括上述嘅限速器同埋監察鏡頭，但係黑盒就係Openmatics嘅遠程監察系統嘅一部分嚟嘅，Openmatics就係喺13年嘅4月16號同九巴同堆龍運巴士有限公司係簽署咗一個供應嘅合約，去提供一個遠程系統嘅，咁Openmatics就開始去提供一啲遠程服務，咁而亦都係使用咗第一個叫做「莫札特盒」嘅黑盒系統。其後，Openmatics就係即係用一個--另一個叫做「巴哈盒」嘅黑盒代替咗呢個莫札特盒，咁但係客戶係仍然可以同時使用嗰兩套系統，咁而九巴都係有咁做嘅。咁而呢一個遠程系統就係有三個部分，以上所講係咪準確？係咪正確？

梁健宏先生：係嘅。

MR DUNCAN：（經傳譯員）我就想你睇第68頁，都係信件嘅一部分嚟嘅，請你睇下呢一頁嘅第2段，就係藍色字嘅部分。究竟呢個英文字母“BC”係代表啲咩嘢？咁而之後嗰一段就講Openmatics嘅遠程系統即係係安裝咗喺九巴嘅系統係可以顯示以下四項嘅，第一就係超速嘅紀錄喇，紀錄每一秒嘅數據同埋同相

關嘅呢一個全球定位系統嘅資料係一齊儲存嘅；咁第二就係急停去剎車嘅一個不當嘅行為；第三就係突然加速；第四，相關嘅巴士登記編號，咁就係喺即係使用其他系統配合嘅情況下都可以得出呢個資料嘅。你可唔可以確認以上就係包括咗九巴巴士嘅系統係可以即係得出嘅資料？

梁健宏先生：係嘅，可以。

MR DUNCAN：（經傳譯員）或者能夠收集嘅資料。咁我哋去下一頁之前，我就想同你去了解一個問題，咁如果你睇番下一段，喺九巴安裝嘅 Openmatics 遠程系統，係唔能夠得出某啲巴士嘅路線嘅號碼嘅，咁而之後嗰一段就話系統係會收集資料嘅，咁而每一秒政府--呢個系統係會收集一啲呢啲指明嘅資訊喇，咁而係每三十秒就係會傳遞呢啲資料嘅，如果係即係已經接連咗去呢一個 WiFi 網絡或者其他嘅資料網絡，或者係透過 USB 去傳遞去指定嘅 FTP 嘅伺服器嘅，咁而相關嘅資料亦都係有喺呢一個遠程系統度--一個本地遠程系統儲存嘅。咁而下一段亦都係有即係重複到呢一段嘅資料。咁佢就話呢個數據就係會每三十秒係傳遞去伺服器度嘅。咁我想你睇番 KMB 文件冊一嘅，第 72 頁。呢個就係今年 4 月 24 號由九巴公司交畀委員會嘅第一次回應嘅，咁我想你睇下呢一頁嘅最後嗰一段。咁佢就話所有巴士都係有安裝黑盒去收集一啲實時嘅資料，包括速度、路線、車門係咪係開定係關喇同埋一個全球定位系統，咁但係即係要將呢啲資料傳遞番去巴士嘅總公司，係會有大概十秒嘅延誤嘅，咁而呢個資料就會係喺呢一個巴士嘅監察系統，即係透過呢個系統係儲存喺電話度嘅。咁根據律師行嘅信件，就係唔一致嘅，咁而根據律師行就係每三十秒傳遞系統，但係根據九巴公司，係每十秒就會傳遞呢個資訊嘅，你可唔可以評論一下即係呢個--即係似乎--呢個差別？

梁健宏先生：Yes，thank you。現時就係三十秒，我哋亦都希望係做到十秒嘅，快啲嘅，我哋而家係做緊嘅，咁最主要點做呢？係加大個 server，加大個 server，技術上點樣樣可以令到啲數據可以早啲傳送，呢樣嘢我哋係朝住嗰個方向做，係做緊嘅，係諗住係十秒。再 repeat，existing 而家係三十秒。

MR DUNCAN：（經傳譯員）咁你係採取一啲咩嘢步驟係去達至一個十秒嘅延誤？

梁健宏先生：我哋就會研究睇下點樣樣可以加大啲 server，一啲技術問題，我哋可以做到三十秒。

MR DUNCAN：（經傳譯員）你預期幾時係會實行？

梁健宏先生：暫時未有一個確實嘅時間表，不過我哋亦朝住嗰個方向做，希望盡快可以收集到啲數據。

MR DUNCAN：（經傳譯員）你可唔可以解釋一下咩嘢為之「改善一個伺服器嘅技術」？

梁健宏先生：喺三十秒嗰度，覺得最主要係個 server 嘅容量，咁變咗--同埋嗰個

flow會快咗，會密咗㗎喇，咁呢樣點樣技術問題去解決，要處理嘅。

主席：（經傳譯員）乜嘢嘅伺服器？邊個嘅伺服器？

蘇偉基先生：呢度我想補充番究竟頭先講十秒、三十秒，how reconcile the difference。十秒係講緊嗰個 delay，即係話發生之後，佢喺第十秒呢個data就ready to send，三十秒就係every 30 seconds interval佢就將呢啲data傳送去我哋headquarters個server嗰度。10 seconds the data delay ready to send and then every 30 seconds interval就會send去個headquarters嗰度，咁所以呢度解釋番十秒同三十秒係講緊唔同嘅嘢嚟嘅先。（經傳譯員）我需唔需要重複？

主席：（經傳譯員）我係問緊呢個係乜嘢伺服器，係屬於邊個嘅呢，佢嘅功能係乜嘢呢？

蘇偉基先生：嗰個server而家喺我哋九龍灣車廠個data centre嘅入面嘅，佢個function就係store呢啲data，然之後去做分析，去identify一啲exception。

主席：（經傳譯員）咁係咪即係話現時嘅容量係唔足夠，咁所以就係有一個十秒嘅傳達嘅延誤，係咪？

蘇偉基先生：（經傳譯員）係，正確嘅。

MR DUNCAN：（經傳譯員）即係你認為究竟延誤嘅時間係十秒、五秒或者三十秒就係呢一個使用黑盒上面嘅一個選擇嚟嘅呢？

蘇偉基先生：講緊頭先嗰三十秒嗰個傳遞，其實對我哋去分析嗰個黑盒嘅數據係冇影響嘅，因為點解呢？我哋收咗個raw data，正如頭先另外一份paper都咁寫喇，佢未有嗰個車嘅路線嘅，咁我哋係要措起佢呢啲數據，喺其他嘅system嗰度係要搵番究竟邊條路線、邊個車長，我哋先至可以去做一啲勸喻或者紀律嘅行動嘅，咁呢啲咁嘅報告其實都係每日去generate一次，咁所以你話個數據究竟係十秒send上嚟定係三十秒send上嚟，對嗰個做exception report個process其實係冇影響嘅。

主席：（經傳譯員）即係冇實時嘅分析，係咪呀？

蘇偉基先生：Real-time我哋係用另外一個alert，我哋係--正確，冇real-time analysis。

羅先生：（經傳譯員）鄧律師，我想澄清一下嘅，即係首先就有個十秒嘅延誤，跟住要用多三十秒去傳遞呢個資料去總部，啱唔啱？即係總共要四十秒，係咪呀？

梁健宏先生：（經傳譯員）我想去澄清一下嘅，現時每三十秒，資料就會係傳遞去我哋嘅伺服器嘅，經過互聯網，咁而十秒嘅延誤就個意思其實同三十秒一樣，咁現時嘅延誤就係三十秒，我哋嘅目標就係將佢縮短到十秒，而家個情況就係咁

嘅。

主席：（經傳譯員）唔該晒，鄧律師。

MR DUNCAN：（經傳譯員）我問嘅問題就係你認唔認為即係黑盒嘅使用者係可以決定嗰個延誤究竟係幾長呢，係五秒、十秒、廿秒、三十秒喇，即係你知唔知道呢個情況？

梁健宏先生：呢個係一個決定，亦都視乎技術上同埋資源上同埋係咪幫到件事情，我哋覺得係有機會幫到件事情嘅，就點樣樣可以令啲數據更加可以快脆啲去到嗰個系統嗰度。

MR DUNCAN：（經傳譯員）策略上係可行嘅，係咪？

梁健宏先生：應該係。

主席：（經傳譯員）咁如果係將嗰個伺服器嘅容量增大，等你可以十秒鐘就傳送嗰啲資料，就唔係三十秒喇，咁嗰個開支方面有咩影響？

梁健宏先生：未估量過，不過應該都--數字都唔細嘅，不過我期望科技發達，呢啲嘢就比較可以快啲達到喇，因為牽涉到嗰個 data traffic、data volume、data storage。

歐陽先生：（經傳譯員）會唔會其實係有個比較更加強--即係能力更加強嘅伺服器就得㗎喇？

梁健宏先生：都未必㗎，所以一路係我哋都係研究緊點樣樣可以加快呢個--嗰個流程。

歐陽先生： Okay, thank you.

MR DUNCAN：（經傳譯員）可唔可以請你睇第 69 頁，BM-1 69 頁，都係嗰個律師樓發出信件嘅呢個附件，你睇到第二部分，藍色嘅嗰第 2 段，同一頁，咁第 2 段，第 2 個段落，「呢個遠程嘅資料系統係响九巴安裝嘅呢個系統係可以記錄速度、減速、巴士嘅減速同埋加速，不過巴士嘅加速，即係話持續咁樣嚟到係記錄巴士加速、減速嘅呢個咁樣嘅功能係冇啟動嘅。」

可唔可以就係補充一下就係關於呢個--我嘅意思就係想請你睇下 Kulis 先生嘅口頭嘅證供，佢係代表 Openmatics 公司作供嘅，請大家睇第六日嘅謄本。謄本嘅第三冊，第六日嘅聆訊，146 頁。「好喇，我想請你睇睇第二十一行，呢度第廿一行，係一位叫做 Derek Chan 先生，佢係委員會嘅大律師，坐喺我隔籬，佢話中間嗰度--佢話嗰個文件中間個--頁個中間係你哋間公司提供嘅答案喇，佢話呢個咁樣嘅講法，頭先我已經講咗喇，加速、減速，就係呢個功能係冇啟用到嘅。我想問嘅問題，你可唔可以解釋下或者係講一講，究竟呢一段嘅意思係咩嘢意思？特別係話記錄嘅加速、減速，即係持續咁樣嘅記錄加速、減速資料呢個講法。」

Kulis 嘅回應係咁樣樣嘅「係呀，我都唔知道，我明白嗰個--佢句子講咩嘢嘅，不過我諗佢係講緊一個情況，呢啲咁嘅數據、數值，加速、減速嘅數值係畀九巴嚟講就係要嚟即係實時提出警告嘅，就唔係喺度記錄，做數據紀錄嘅，呢個係根據我嘅理解喇，即係佢哋嘅一個聲明所講嘅呢件事嘅，我嘅理解喇，所以話我--即係話有咁樣嘅系統裝咗喇，即係嗰個司機嘅回饋嘅設備就會警告嗰個司機喇，實時警告，究竟係咪加速太快、減速太快咁樣。咁所以我哋就係用緊啲加速、減速嘅數值，但係就唔儲存有關嘅數據嘅，即係呢啲係叫做歷史數據喇，呢個就係我嘅理解呢個陳述書所講嘅係咁嘅意思。」「咁陳生，我明白你嘅意思喇。咁所以你嘅理解就係話响嗰個黑盒嘅數據嘅紀錄系統就唔會係記錄加速、減速嘅數據嘅，啱唔啱？」

咁 Kulis 先生話「係㗎，我都係咁樣理解嘅，因為嗰個我哋嘅黑盒有另一個功能嘅，就係記錄功能嘅，因為呢個有唔同嘅數據嘅，可能有二十個唔同嘅數據、數值可以記錄嘅，不過就唔包括加速、減速嘅」，咁呢度就我哋等一等，停一停，睇一睇，Kulis 先生嘅意思好似係咁講喎，雖然九巴使用嘅黑盒係有能力係可以儲存加速、減速嘅數據嘅，但係你冇啟用到呢個功能嘅，即係九巴就冇啟用到呢個黑盒呢啲功能嘅，我想請公司可唔可以提供下你哋嘅意見呢？即係鑑於你哋之中其中一個人今朝都作證都話加速、減速嘅數據係其實係有儲存到嘅，亦都會係--佢話係用嚟監察司機嘅行為嘅。

梁健宏先生：係嘅，我哋冇儲存喺個黑盒度，但係呢啲所有嘅資料，加速、減速嘅資料亦都會喺我哋嘅伺服器嗰度嘅，所以啲資料都會傳送番去我哋個伺服器嗰度，係有嘅。

MR DUNCAN：（經傳譯員）你嘅意思你話係個伺服器度儲存咗個數據？

梁健宏先生：對。

MR DUNCAN：（經傳譯員）咁嗰個响伺服器就措咗呢個數據之後，咁公司嗰啲人點樣佢係接觸到呢啲嘅數據嘅呢，實際上係點樣做嘅呢？

梁健宏先生：我哋喺個 server 度呢啲紀錄我哋會睇番呢啲加速、減速嘅資料，從而制定一啲--睇睇有冇啲係超過一啲標準，譬如話佢加速得太快或者減速得太快，從而衍生啲比較唔係好 proper 嘅駕駛行為，咁喺呢一度我哋可以利用呢啲咁嘅資料係搵出一啲有關嘅車長去再檢討下佢哋嗰啲行為，就交畀我哋其他部門去處理，呢啲就係用呢啲資料嘅情況。

主席：（經傳譯員）鄧先生問，啲人點樣可以接觸到呢，要有啲咩步驟先可以睇得到呢個資料呢，呢個就係佢頭先問嘅問題。

梁健宏先生：呢啲資料就係喺電腦嗰度嘅，咁就我哋會有啲電腦程式去處理呢啲咁嘅資料，就出咗一啲 report 出嚟，一啲報告出嚟，咁嗰度亦都因為黑盒度啲資料只係紀錄低嗰個盒嘅資料、時間、速度、加速、減速嘅情況，咁亦都冇嗰條路線嘅資料，亦都冇嗰個車長嘅資料，所以變咗我哋喺背後，喺個伺服器，喺

呢啲咁嘅數據，我哋經過一輪嘅處理，先至可以出到一啲報告出嚟，令到我哋其他部門啲同事可以去跟進。

主席：（經傳譯員）所以嗰個人要求電腦就攞到嘅資訊就係某一個黑盒嘅資訊嘅啫？

梁健宏先生：嗰度係冇嘅。

主席：（經傳譯員）或者可唔可以再講一講？我聽唔到。

李澤昌先生：或者我補充少少，嗰個黑盒嗰啲資料嗰個速度，佢嗰個加速同埋減速呢啲資料就會傳送去嗰個 server 個攝錄器嗰度，而呢個 server 嘅攝錄器裏面，佢會好清楚知道架車由起點去到終點，佢成個車嘅車程，佢亦都可以查到呢架車程裏面佢行嘅位置，咁所以嗰個攝錄器就會有一個好精準知道佢喺邊一個位置係...

主席：（經傳譯員）唔好意思，李生，我要講一講，你係咪去某一個黑盒，先至攞到嗰個資料？即係譬如話你可以將嗰個黑盒同嗰個巴士嘅編號係聯繫起來㗎，係咪呀？

梁健宏先生：Yes，At the back end we can--係呀，有配對㗎，嗰個盒嘅秎巴同我哋架巴士秎巴係有個 connection 嘅，所以知道呢個盒嘅秎巴對番邊架巴士秎巴，係有個 index 嘅，你知道個盒秎巴就知道邊個巴士秎巴。

主席：（經傳譯員）嗰個要求呢啲資料嘅人就係話佢係講緊某一個黑盒或者即係某一架巴士嘅資訊喇，佢要求見到嘅就，啱唔啱？

梁健宏先生：（經傳譯員）啱嘅。

主席：（經傳譯員）我想--我叫鄧先生繼續之前，我想問一個問題，點解個黑盒係有能力係記錄個加減速嘅數據，點解唔响嗰度措起佢，然後另外亦都係傳送番去個伺服器呢？

梁健宏先生：等我解釋吖，個黑盒就記錄低每一秒鐘地點，即係經緯度喇，嗰一秒鐘架車嘅速度。咁如果呢一秒鐘嘅速度去比較番上一秒鐘嘅速度，佢加速超過一個 pre-set value，而家就係 4 公里，4 公里，如果超過而家我哋定咗 4 公里，佢就會車速嘅提示器就會著燈，亦都會響嘅。如果佢呢一秒鐘響過嘅話，呢一秒鐘佢亦都記錄低咗呢個提示器佢響過嘅，亦都有紀錄嘅。如果佢呢一秒鐘佢嘅速度相對佢一秒鐘係細過，而家就係 7 嘅，之前就係 8 嘅，7 公里每小時，即係話佢剎車比較快喇，係急剎喇。

咁同樣地，個提示器亦都會著燈同埋「呲」聲提醒個車長嘅。而呢個急剎嘅提示亦都喺嗰一秒鐘記錄低嘅，記錄低嘅。咁嗰一秒鐘佢所有冇提示或者冇提示，呢啲咁嘅紀錄，就一秒鐘嘅紀錄都會傳送番我哋嘅伺服器嘅，所以佢嗰秒鐘有冇提示過佢，喺我哋資料就知道晒㗎喇，所以儲存喺嗰個盒嗰啲數據需唔需要幾多次，我哋嘅伺服器都有㗎喇。我哋嘅伺服器掌握晒呢個車長被提示過多少

次、因為咩嘢原因提示佢，我哋個資料喺個伺服器嗰度係有㗎。

主席：（經傳譯員）咁換句話講，黑盒就會每秒係記錄速度喇，呢個就係運輸署要求嘅，咁但係減速率就只係會喺超越咗你嗰個即係上限嘅時候，即係每秒 4 公里或者係下降咗 7 公里先至會記錄喇？

梁健宏先生：我再補充多一點，我漏咗一樣，就係 speeding，同樣地，如果佢個速度係超過某一個我哋 pre-set 嘅 value，嗰秒鐘，而家我哋定咗就係 70，如果佢嗰秒鐘佢超過 70，個提示器就會響㗎喇，而嗰秒鐘亦都會記錄低個提示器響過佢嘅，如果係超過 70。即係換句說話講，speeding，即係 speeding sudden deceleration、harsh braking、超過嗰啲 pre-set value，都會提示個車長，亦都喺嗰秒鐘如果係有呢啲提示，會記錄低，而所有呢啲咁嘅紀錄，每秒鐘嗰啲紀錄係會傳送去我哋個電腦伺服器嗰度。

主席：（經傳譯員）幾時係定下呢一個每小時 70 公里呢一個嘅數值㗎？

梁健宏先生：我哋今年 2 月 23 號就將嗰個提示嘅 value 就改做 70 嘅，之前係 75。

主席：（經傳譯員）你講緊 2018 年，係咪呀？

梁健宏先生：對。

主席：（經傳譯員）鄧律師。

MR DUNCAN：（經傳譯員）多謝，主席。咁我想你睇番你向委員會提供嘅資料嘅，咁喺你第一份嘅即係陳述入面，我想你睇番第 50 頁，你第一份嘅陳述嘅。咁之前我提過，即係我對問題嘅第二部分係有興趣嘅，即係話呢啲嘅裝置即係會收集啲乜嘢資料去監察司機嘅表現，而呢啲收集到嘅資料點樣可以改善駕駛安全，咁根據你嘅答案，你只係提到車速同埋車輛嘅位置，你冇提到加速或者減速嘅，咁點解呢？

梁健宏先生：因為我哋每一秒鐘都有個速度嘅，正如頭先解釋喇，呢一秒鐘同下一秒鐘個速度嘅分別就等如加速或者減速嘅，所以變咗我哋就唔需要另外一個計時器計佢加速或者減速，我哋就係用每一秒嘅速度去計番佢個加速係點樣樣。

主席：（經傳譯員）咁但係似乎即係呢個唔係一個完整嘅答案，即係唔係完整咁樣回應咗鄧律師嘅問題喎，個問題係「點解」。呢個即係只係得十二個字嘅啫，呢一句嘅答案，即係你係只係用咗呢十二個字去回應呢一個問題。

梁健宏先生：我只係可以講，個黑盒 capture 咗嗰個車嘅速度。

主席：（經傳譯員）亦都有其他嘅嘢，係咪？

梁健宏先生： Among other things，對。

主席：（經傳譯員）個問題係點解你冇提到其他嘅資料呢？咁我點解問呢個問題，因為係你負責係回答呢個問題嘅，我唔知邊個係呈交呢份嘅陳述，咁我只係問點解係唔完整呢。

梁健宏先生：我哋有二十幾項數據嘅，有時間、有日期、有 vehicle speed、有引擎嘅轉數。

主席：（經傳譯員）咁點解冇喺呢度提到呢？

梁健宏先生：可能就係呢兩樣最主要嘅數據就係 for monitoring of bus captain。

主席：（經傳譯員）鄧律師。

MR DUNCAN：（經傳譯員）我而家想講第三個範疇嘅，我之前亦都係表示我係有興趣呢個範疇，咁我哋之前都有提過--唔好意思，我哋係未經過呢個問題嘅，咁第三個範疇就係呢啲收集到嘅資料係會點樣使用，嚟以一個實時嘅方式可以協助車長呢，呢個就係我有興趣嘅範疇喇。係請你睇第 65 頁，就係 BM-1 嘅文件冊嘅，呢個就係律師行發出嘅信件。咁喺呢一項中間藍色嘅部分，佢就話遠程嘅通訊系統係有三個主要部分嘅，咁而第一個部分就係司機回饋裝置，咁喺個介紹度就話呢個裝置係提供一個視覺同埋聲音嘅回饋畀司機嘅，就係就著四個基本嘅門檻嘅數值，包括係引擎嘅轉數、超速、加速同埋即係閒置嘅狀態嘅，咁佢係喺呢一個司機箱嗰度同埋係接駁到去呢個 Openmatics 嘅系統，咁而車長嘅回饋系統就係表示如果即係相關嘅數值達到去門檻嘅話，咁車長就會係得到一個資訊，包括係透過呢一個「呲呲」聲同埋會有盞燈亮起嘅，咁呢個就係包括係引擎、速度、閒置嘅狀態同埋加速嘅，咁呢一頁度就顯示咗呢啲資料㗎。咁呢個情況係咪即係已經充分咁樣去即係描述咗九巴上面嘅車長嘅警告系統？

梁健宏先生：正確。

MR DUNCAN：（經傳譯員）咁而家就請你--我想問一啲問題嘅，就係關於呢一啲嘅界限數值嘅。咁 68 頁嘅頁頂，咁就話「根據我哋所知，司機回饋系統就係有喺意外中相關嘅車輛度安裝嘅」，係講緊大埔嘅意外，咁而司機回饋嘅限值，即係喺相關嘅意外入面嘅巴士係最初係由九巴去訂立，然後就由 Openmatics 去調校，去即係切合九巴嘅指定嘅數值嘅，你可唔可以確認？

梁健宏先生：正確。

MR DUNCAN：（經傳譯員）根據相關嘅歷史，咁而意外中車輛嘅四個限值就係由九巴去訂立，而後來係由 Openmatics 就喺 17 年 7 月 24 日係調整嘅，係咪正確？

梁健宏先生：想補充一點，acceleration 同 deceleration，係嘅。Tilting angle 嗰度，嗰度 44，我哋從未有任何嘅設定嘅，亦都搵唔到一個

reference 嘅設定，所以係冇提供畀 ZF 嘅。

主席：（經傳譯員）即係九巴冇提供，係嘛，你嘅意思係？

梁健宏先生：By KMB，冇提供嘅，我哋...

主席：（經傳譯員）咁據我哋所知，呢啲限值係有即係入咗落嗰個意外嘅巴士，係嘛？即係 44 度。

梁健宏先生：我哋知道嘅。

MR DUNCAN：（經傳譯員）你知唔知道 Kulis 先生係解釋呢個就係預設嘅安排？

梁健宏先生：明白，係。

主席：（經傳譯員）咁即係--有取消...

梁健宏先生：正確。

MR DUNCAN：（經傳譯員）咁呢個文件就講到根據喺意外嘅期間，我哋嘅所知，當時嘅限值就係咁樣嘅，咁大家可以睇到。

主席：（經傳譯員）咁或者可唔可以讀出嚟，鄧律師？即係方便我哋記錄。

梁健宏先生：（經傳譯員）即係加速率就係以每秒幾多米嘅，就係 1.15，每秒 1.15 米。

主席：（經傳譯員）呢個係每平方--秒 1.15 米嘅，咁而減速就係 2.3，速度就係 75 公里嘅，每小時，啱唔啱？

梁健宏先生： Yes.

主席：（經傳譯員）咁就係喺某啲嘅區域嘅速度，咁同樣係每小時 75 公里嘅？

梁健宏先生：（經傳譯員）我哋係唔知道呢一個數值。

主席：（經傳譯員）即係你係唔知道第二項數值，係嘛？

梁健宏先生： No.

主席：（經傳譯員）多謝鄧律師。

MR DUNCAN：（經傳譯員）咁然後就係一個閒置嘅數值同埋引擎嘅數值嘅，睇唔睇到嗰個數值？

主席：（經傳譯員）3,000 轉。

梁健宏先生： Yes，yes.

MR DUNCAN：（經傳譯員）呢啲就係嗰啲有關嘅限值，唔係淨係個大埔意外個巴

士，而係所有九巴嘅巴士上都有啲咁嘅數值嘅，當時係有啲咁嘅數值嘅？

梁健宏先生：（經傳譯員）係嘅。

主席：（經傳譯員）咁啲數值係由九巴制定嘅，同埋 Openmatics 就調校嘅？

梁健宏先生：（經傳譯員）係嘅。

MR DUNCAN：（經傳譯員）再睇番兩件有關速度嘅事喇，如果我冇理解錯嘅，如果我理解係正確嘅話，如果任何一架巴士超過咗每小時 75 公里嘅速度，嗰個車長就會聽到啲「呲呲」聲嘅，同埋個燈會閃下嘅，即係响架車駕駛艙會發現兩樣嘢嘅？

梁健宏先生：（經傳譯員）啱嘅。

MR DUNCAN：（經傳譯員）咁如果個巴士譬如話每小時 60 公里，而當時嗰個道路嘅限速係 50 公里，有冇任何嘅提示嘅呢？即係車長會收到提示呢？

梁健宏先生：而家係冇嘅。

MR DUNCAN：（經傳譯員）會唔會有好啲呢，如果係咁樣嘅提頁系統？

梁健宏先生：係，absolutely。

MR DUNCAN：（經傳譯員）咁响呢方面我想請你睇睇 Kulis 先生嘅證供。請翻到第六日聽證會第六日，我哋嘅第三冊，頁數係 180--唔好意思，係 150。請你特別留意第七行，第 150 頁第七行。咁陳先生就係話「嗰個校好嗰個角度或者校好個數值就係超速，呢度有兩個數值嘅，一個就係速度，另一個就某啲區域嘅速度，兩個都係定咗每小時 75 公里。咁首先有個基本嘅問題，睇下我理解有冇正確，如果係超過每小時 75 公里，咁就即係已經過咗界喇，啱唔啱？」咁就話第 17 段佢話「啱嘅」，17 段話。咁佢呢兩個數值有乜分別呢？速度相對於某區嘅速度，可唔可以請你--你自己睇番第十九行，一路去到第 155 頁第九行。請你用啲時間去睇一睇呢幾行。係咪可以睇晒呢？

梁健宏先生： Yes.

MR DUNCAN：（經傳譯員）如果我冇理解錯呢個證供，Kulis 先生嘅講法有唔同嘅地方嘅，有唔同嘅--制定兩個唔同嘅限速嘅數值嘅，你嘅理解係咪一樣？

梁健宏先生： Yes.

MR DUNCAN：（經傳譯員）第一個我哋見到嘅 151 頁嘅呢個第二行，你要制定究竟係咩嘢區域，即係話譬如嗰個地理嘅界限或者係其他嘅資料，如果你係想某啲區域有唔同嘅速度嘅限制嘅一啲數值，咁嗰個系統要知道佢响幾時先至會觸動到呢個咁樣嘅限數值嘅，咁即係話要係制定有關嘅數字，我哋需要調校嘅，要制定究竟有啲乜嘢嘅地區、有咩嘢數值。委員會聽到喇，我唔知道你知唔知

喇，我哋所聽到嘅就係城巴係有咁樣嘅系統嘅，佢哋有制定㗎，廿五個唔同嘅區域嘅。咁喺呢廿五個區域就會提供一啲回饋畀車長嘅，你知唔知道有咁嘅事？

梁健宏先生： Yes.

MR DUNCAN：（經傳譯員）咁第二樣我就更加有興趣嘅，就係使用呢個咁樣嘅電子嘅系統嘅--電子地圖嘅，154 頁第八行開始，咁陳先生，陳正隆（譯音）先生就向 Kulis 先生提出呢個問題「如果我有一個數碼嘅地圖可以顯示唔同嘅路段，有唔同速度嘅限制嘅，咁我可唔可以將呢個系統同而家呢個系統就合併，嚟到係制定唔同嘅所謂嘅速度嘅限值嘅，就視乎嗰架巴士响嗰個電子地圖顯示嘅咩嘢地方，定係話根據呢個系統咁樣合併做唔到嘅？」Kulis 嘅回覆就係話「肯定係可行，係可以做到嘅」，咁我哋需要做一啲嘢，想需要一啲軟件嘅。香港都已經係有電子地圖㗎喇，係嘛？你知唔知？

梁健宏先生： Yes.

MR DUNCAN：（經傳譯員）頭先你講過喇，最好係有咁樣嘅系統，即係話如果你話嗰度係限度 50 公里，如果你超出 50 公里，最好就有個警示畀個車長喇，咁你對於呢個可行性，呢度有兩個可能嘅改進嘅方法，Kulis 建議有兩個方法，你有咩嘢睇法？

梁健宏先生：我哋係好高興知道可以咁樣做，亦都因為呢個 IRC，咁我哋可以得到一啲 map，政府嘅 digital map，因為呢度講緊係一個官方嘅紀錄嚟嘅。一個 road speed limit 係一個好嚴重嘅事情嚟嘅，如果嗰啲數據係唔正確，係會好危險，所以我哋而家點做呢？我哋其實喺不--同 Openmatics 商討呢件事情，點樣可以做到唔同嘅區可以知道佢嗰個速度嘅 limit，架車去到嗰度，佢知道呢個 limit 係 70 抑或係 50，而家因為我哋唔知道邊度係 70、邊度係 50，所以我哋就定咗係 70。咁利用呢個方法，架車嗰個位置，知道嗰個位置係 50 嘅話，佢超過 50 就會響佢㗎喇，呢樣嘢我哋就同 Openmatics 亦都 test drive，7 月 31 號。

我哋會有架車將個 digital map 嗰啲 road limit 嘅 condition 就畫咗喺嗰架車嗰個黑盒入面，從而令致到嗰架車去到邊個位置佢就知道嗰個地點嘅 road limit 係幾多，速度係幾多。咁我哋 7 月 31 號試過，就覺得係 positive 嘅。再進一步我哋就睇到點樣樣可以再 further implement，如果係 possible 嘅，我哋就會所有嘅車隊都會有呢樣嘢嘅措施，從而架車去到 50 嘅地方，超過 50 佢就會提示個車長，去到 70 嘅地方，超過 70，就會提示個車長。相對而家就會大大咁改善。

李澤昌先生：即係有點補充嘅，因為嗰個地圖嘅重要呢，因為其實香港每一日個道路個速度都可以改變嘅，例如有啲掘咗路、例如有交通意外，其實個即時嗰個道路嗰個速度係可以直接影響到我哋嘅車速，所以個地圖係其實一定要係一個 live 嘅地圖嚟嘅，所以咁--即係我哋係有一個突破，就係喺過去一段好短嘅時

間，嗰個地圖終於係我哋收到喇，咁 Openmatics 亦都即係擺咗喺個黑盒裏面。咁我哋其實喺第一階段就係頭先講 70、50 都好喇，而家我哋有架車係已經嘗試緊㗎喇，咁如果我哋係試到係得嘅話，就會有個即時嘅 alert，個 system 睇番嗰個車嗰個 desk board 嗰度 real-time 咁話畀個車長聽「你係超咗速度」，咁但係 geo-fencing 嗰個係需要更加長嘅時間，因為 geo-fencing 嗰個係因為係會--嗰個 black box 收到呢個訊息之後就會即係控制番嗰架車嗰個即係加油、踩 brake 嗰啲，嗰個可能要時間長啲，但係起碼第一階段嗰個 70 同 50 嗰個喇，有咗個 map，嗰度就會行得會快啲，但係而家都係一個--即係我哋試咗大概都係--一架車，試咗都係嗰幾個星期嘅啫。

MR DUNCAN：（經傳譯員）點解因為呢個委員會你就攞到嗰個電子地圖呢？

梁健宏先生：呢個係我自己嘅 gut feeling 啫，不過即係事情可能咁巧合喇。

主席：（經傳譯員）你喺邊度攞到呢個地圖？

梁健宏先生：（經傳譯員）政府。

主席：（經傳譯員）邊個部門？

梁健宏先生：（經傳譯員）運輸署。

主席：（經傳譯員）之前有冇問過？

梁健宏先生：（經傳譯員）冇嘅。

主席：（經傳譯員）幾時問？

梁健宏先生：（經傳譯員）我之前冇問。

主席：（經傳譯員）咁點解會攞到？

梁健宏先生：我就收到封信。

主席：（經傳譯員）即係運輸署就話畀你聽係可以攞到咁嘅地圖？

梁健宏先生：係咁，啱。

主席：（經傳譯員）幾時發生嘅事？

梁健宏先生：6月嘅，6月7號。

主席：（經傳譯員）個信件係寫住「6月7號」？

MR DUNCAN：（經傳譯員）即係6月之前係運輸署就冇表示係有呢啲數碼地圖嘅？

梁健宏先生：（經傳譯員）冇錯。

主席：（經傳譯員）你可唔可以畀一份即係呢封信嘅副本我哋？

梁健宏先生： Yes.

主席：（經傳譯員）咁麻煩而家就去影印呢封信，可唔可以有人去幫手影印呢封信？即係上面冇寫到字，係嘛？咁只係影印就可以喇，跟住我哋會還番畀你嘅。鄧律師。

MR DUNCAN：（經傳譯員）多謝，主席。可唔可以咁講，九巴公司喺即係一啲限速 50 嘅路段，即係嘅行駛嘅里數係比起限速 70 嘅地段嘅里數係多好多嘅？

梁健宏先生：答唔到你，can't answer you，我要去攞多啲數據。

主席：（經傳譯員）咁可能--其實城巴都答唔到呢個問題，可能你係可能會感到安慰喇，如果你聽到咁樣。咁香港嘅路段嘅速度限制就係有用顏色去分嘅，即係大部分嘅路都係限速 50 嘅，咁我哋就可以顯示埋你嗰啲巴士路線嘅，咁但係即係一般地講都可以答呢個問題嘅。咁喺限速 50 嘅路段嘅巴士行駛係多過制速 70 嘅巴士好多嘅，如果你仍然係答唔到，你可以話我知。

MR DUNCAN：（經傳譯員）或者我幫一幫你吖。九巴嘅巴士係咪經常去行駛一啲路段限速 50 嘅地帶？

梁健宏先生：（經傳譯員）係嘅，但係即係嗰個有幾多程車--即係車程嘅數量可能係唔同嘅。即係我係工程師嚟嘅，所以我係想知道啲事實先去回答你。

主席：（經傳譯員）或者你都可以去從政。

MR DUNCAN：（經傳譯員）我就想問多一個問題嘅，就住呢一個範疇，咁喺成立獨立檢討委員會之前係有採取到啲咩嘢步驟，即係就住一啲超過咗時速 50 公里限制嘅巴士，究竟係做咗啲乜嘢？

梁健宏先生：我哋曾經試過呢，我哋曾經試過個咪錶去到 50 嗰陣時就 prompt 個車長，個咪錶去到 50，當其時架車係唔知道佢行緊咩嘢路段嘅，我哋曾經試過佢超過 50 就提一提佢「喂，你超過 50 喇」，但係啲車長--因為我分別唔到架車喺邊個位置，但係我哋都想提嗰啲車長，如果佢行緊市區嘅道路，就話畀佢知「喂，你超過 50 喇」，但係有啲情況就係嗰啲車未必真係--行開又 50，又 70 嘅話，變咗有啲車長就覺得就有啲 unnecessary 嘅 alert 喇。所以變咗試咗一段好短嘅時間，我哋都唔可以再做，因為其實我哋判斷唔到架車實情係喺 50 路段吖，抑或 70 路段。

主席：（經傳譯員）即係根據我嘅理解，你係想去試驗一下，即係當車速一超過 50 公里就去有一個嘅訊號，但係啲車長就覺得好煩，因為即係好多時佢哋都喺一啲限速 50 嘅區域嘅？

梁健宏先生： Correct.

主席：（經傳譯員）究竟係咩嘢時候？

梁健宏先生：（經傳譯員）都好一段日子之前喇，我唔記得實際嘅時間。（證人直接用本地話說）but 呢個就唔係 telematics 出嚟嘅，唔係個黑盒嗰度嘅。

主席：（經傳譯員）呢個就係車速器，係咪呀？

梁健宏先生：（經傳譯員）冇錯。

主席：（經傳譯員）我哋稍後就會去休息一下，因為即係已經進行咗一段好長嘅時間，咁大家可以去放鬆一下。即係你係可以嘅話，即係可以去小休嘅話，你可以話畀我知嘅。

MR DUNCAN：（經傳譯員）或者可以完埋呢一個議題。呢套系統就係 13 年係向 Openmatics 去購買嘅，係咪？

梁健宏先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）咁當時，即係限速 75--即係 75 車速呢一個數值有冇係輸入咗去系統度？

梁健宏先生：嗰個設定係 KMB 話畀 Openmatics 知嘅，係 KMB 定嘅。

MR DUNCAN：（經傳譯員）咁喺 2013 年直至到委員會成立呢段期間，你有冇檢討過即係呢個系統有冇去即係透過呢個全球定位系統去記錄一個超速超過 50 嘅情況，你有冇即係探討過呢個情況？

梁健宏先生：（證人直接用本地話說）我唔可以肯定，但係我相信我哋曾經都會同製造商討論過呢個話題。（經傳譯員）我唔肯定嘅。

MR DUNCAN：（經傳譯員）可唔可以話畀我哋知係幾時？

梁健宏先生：（經傳譯員）我唔記得嘅。

主席：（經傳譯員）你記唔記得即係喺公司入面係咩嘢人士係參與？

梁健宏先生：（經傳譯員）我唔記得。

主席：（經傳譯員）鄧律師，我哋而家係會小休十五分鐘，唔該。

下午 3 時 53 分聆訊押後

下午 4 時 08 分恢復聆訊

出席人士如前。

主席：（經傳譯員）鄧生，請繼續。

MR DUNCAN：（經傳譯員）多謝你，主席。各位先生，請睇番嗰個謄本嘅文件冊，係第 11 日嘅聽證會嘅謄本，請睇番 73 頁，請睇番第 14 行，佢係委員會嘅黃律師問呢個 Kelvin Yeung 楊先生，大家都知道楊先生係公司嘅現在嘅僱員，啱唔啱？

李澤昌先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）第 14 行呢度，即係黃小姐，黃佩琪大律師，「我哋同 Alok Jain 收到--其中一次見面嘅時候收到嘅證供，就佢哋考慮過有個積分表嘅一個系統嚟嘅，即係計積分嘅系統嚟嘅，其中一個考慮過嘅系統就係呢個叫做 GreenRoad.com 嘅系統嘅，佢呢個作用就係會知道嗰個司機嘅駕駛嘅行為，呢個車長，有三個類別嘅，紅色、黃色、綠色。」

跟住我哋跳一跳，去 75 頁，睇番 75 頁，第 8 行，楊先生講「我唔係好清楚 Alok 先生所講嗰個名，不過應該係採用呢個制度嘅，呢個其實好似我哋現有嘅制度。」

主席問「嗰個制度係乜嘢制度呀？」楊晉瑋先生 Kelvin Yeung 就話「正如我所講，會有聲，會有燈著咗，有三隻顏色嘅燈嘅，視乎個車長嘅駕駛行為，就會著三盞燈嘅一種燈。呢啲燈就佢响嗰個車長總站，拍咗個八達通卡，就會著㗎喇，跟住個燈就會視乎嗰個係車長嘅表現嚟到著個燈，綠色最好，黃色同埋紅色即係話有啲嘢需要改善，呢個系統現在仍然响度使用嘅。」

主席就問一個問題「當嗰個車長係落班嘅時候，佢就再點一點佢嗰個八達通卡，呢個响咩嘢地方會顯示呢個資料畀佢睇呢？」楊生就話「只係話佢第一次拍個八達通卡嘅時候，朝頭早嘅時候先至會顯示呢個資料嘅，我唔知道佢會唔會顯示番前一日嗰個資料嘅燈號，但係我知道同一日嚟講，就唔會畀番個車長睇嘅，即係話佢落班嘅時候冇資料嘅。」

「你嘅意思即係上班嘅時候就係有資料嘅？」「係嘅，上班嘅時候就顯示資料嘅。」

「呢個資料係關於咩嘢時段㗎？」「我要睇番嗰個有關嘅期限嘅，不過就唔係講緊同一日嘅資料嚟嘅，係關於過去一段時間嘅，至於話呢個期限係個範圍，我就而家冇資料。」

「咁樣嗰個顯示响邊度顯示呀？嗰個巴士車長喺邊度見到㗎？」「每個巴士總站都有一個電腦嘅，個車長返到去總站，佢就要將佢嘅職員卡嚟到係拍一拍，咁先攞到呢個資料嘅，個電腦就响嗰個亭外面嘅，即係巴士總站對住巴士車長個亭外面嘅。」

「即係你意思話...」「有三種顏色，就會其中一種就會向個車長顯示出嚟，就係紅色、黃色、綠色。」

好喇，我睇番頭先個證供，我有個問題，你可唔可以證實呢個三色系統，綠色、黃色、紅色係現在都仍然响度使用㗎？

梁健宏先生：（經傳譯員）係嘅。

MR DUNCAN：（經傳譯員）你可唔可以形容一下呢個系統個基礎係點樣㗎？

梁健宏先生：呢個係一個車長駕駛嘅評估嚟，一個 score 嚟嘅，一個分數，就有四樣嘢去評估佢嘅，第一樣就係 excessive idling，即係怠速太長；第二樣嘢就係 harsh braking，即係急剎；第三樣就係 sudden acceleration，加速得太快；最後一樣就係 speeding，超速。如果就住呢四個項佢嘅表現，喺每一位車長佢一個 trip，佢每日咁多個 trip，一個禮拜嘅表現，我哋就攞呢四樣嘢去作為一個準則去評估下佢嗰個駕駛嘅表現。

當然我哋有啲準則就係頭先所講嗰幾個內容，嗰幾個類別，佢做得好嘅話，架車就會比較柔順一啲，乘客坐喺架車度會安全啲，架車嗰個 fuel consumption 亦都會環保啲，個 fuel consumption 會好啲嘅話，就即係等如環保啲，所以變咗呢樣嘢就係一個 eco-safe driving，eco-safe。

評估咗有個 score，就會分為最好嗰啲就綠色，另外就有 amber 同埋 red 嘅，即係分三個級別，呢個就係每一個禮拜嘅 score 嚟嘅，呢個 score，佢去到 termini 嗰度去 report duty，佢 sign in for duty 嗰陣時，佢就會話畀佢知佢十日前嗰七個 week 嘅--七個日，十日前之前嘅七天嗰個 week 嗰個 score，show 到佢係綠色，黃色、紅色就冇 show 出嚟嘅，不過就會 show 一啲 wording 提醒佢要注重啲乜、注重啲乜。

意思就係點解呢？其中一樣嘢因為車長喺站頭去拍嗰個卡，個 screen 唔多唔少有時有其他人會睇到，即係變咗呢樣嘢就令到個車長就知道佢係咩嘢 score，但係嗰個內容就係咁樣樣顯示。同一時間，佢如果上番去我哋嘅員工網，個車長上個員工網，佢亦都可以睇番佢過往嗰八星期佢個分數嘅。呢啲咁嘅提點亦都喺佢喺站頭、bus terminus report duty 嗰陣時，嗰個畫面亦都會話畀佢知佢嘅分數之餘，詳情佢亦都係可以上番個員工網，知道佢嘅駕駛表現，呢個係一個比較佢自己知道佢自己嘅駕駛行為，呢啲就自己去改進喇。

呢個設計個目的就係咁樣樣。我哋就係應該係 2015 年 11 月 launch 嘅。

MR DUNCAN：（經傳譯員）換句話講，個系統係可以幫助到車長，係咪呀？

梁健宏先生：（經傳譯員）係嘅，亦都係可以幫助到乘客同埋巴士公司。

MR DUNCAN：（經傳譯員）究竟紅、黃、綠嘅呢個分類係基於乜嘢嘅資料或者數據去訂定嘅呢？

梁健宏先生：我暫時就冇呢個分類嗰個數據，不過絕大部分都係 green，嗰個 score 係有個 formula，有個程式嘅。

李澤昌先生：佢問黑盒有啲咩嘢數據。

梁健宏先生：（經傳譯員）唔好意思，我誤解咗個問題，我重複一次。（直接用本地話說）有四個item嘅，有四個類別嘅，excessive idling...

主席：（經傳譯員）唔需要重申呢一啲嘅類別㗎喇，你講得好清楚。鄧律師嘅問題就係究竟定立嘅限值係幾多，即係就住呢四個類別？

梁健宏先生：（經傳譯員）唔係咁簡單嘅，（直接用本地話說）佢有兩個threshold嘅，第一個就係excessive idling就係唔好超過十五分鐘，唔好超過十五分鐘；Harsh braking就係跟番我哋黑盒嘅setting；Sudden acceleration跟番黑盒嘅setting；Speeding亦都係跟番黑盒嘅setting。即係換句說話講，speeding就係70，sudden acceleration就係4 km per hour per second。

主席：（經傳譯員）似乎呢個資料係有傳遞，即係當車長每日去簽到嘅時候就會見到呢個資料，係咪呀？

梁健宏先生：佢每一日拍卡，佢每一個journey、佢每一個trip，start or end the journey佢會tap his -- tap佢個卡喺嗰個terminus嗰度嘅，每日就有兩次會話畀佢知嘅，因為你次次都話畀佢知，佢就覺得好煩擾嘅，所以變咗每日佢拍卡就會話畀佢兩次知，就話畀佢知，show到佢個score係幾多嘅。

MR DUNCAN：（經傳譯員）係咪即係要拍張卡定係要插張卡入部機度？

梁健宏先生：係，佢拍佢個卡，個screen就會show出嚟。

MR DUNCAN：（經傳譯員）呢個紅、黃或者綠嘅分類會唔會影響一啲某一啲獎項呢？正如我哋今朝所講。

梁健宏先生：No，淨係喺開始launch有個promoting scheme嗰時先至有短暫試過呢樣嘢啫，otherwise就冇，純粹一個等個車長知道佢自己嗰個performance，知道佢自己嘅表現，等佢從而佢自己去改進佢嗰個駕駛技巧。

主席：（經傳譯員）關於嗰四個類別，你就同我哋講過啲限值係幾多，如果譬如話喺個速度嗰度係超過咗限值，車長係咪唔會得到呢個綠色嘅分類呢，或者如果係加速率太高，又會係點呢？

梁健宏先生：（經傳譯員）係有一個嘅方程式嘅。

主席：（經傳譯員）你可唔可以同我哋講下方程式係乜嘢？或者你知唔知道究竟條方程式係點樣？

梁健宏先生：（經傳譯員）係有一條方程式嘅，（直接用本地話說）之後再交畀你，可以嘛？

主席：（經傳譯員）可以嘅，即係希望係用一個書面嘅形式係分享呢個方程式嘅，會唔會係喺網站度都有呢條方程式，令到車長知道呢？

梁健宏先生：The formula，佢嗰度有--喺個 website 嗰度，佢自己先睇到佢自己嗰個 performance 嘅，淨係即係 show 到綠色、黃色同埋紅色嘅啫，佢自己睇到嘅，亦都分番嗰四類別嘅，佢自己知道嗰四類別嗰個 score 係咩嘢色嘅啫，actual score 就冇嘅，係 by colour。但係我哋有啲提示，如果佢係紅色嘅話，就提示佢要踩油門就柔順啲，踩 brake 就緩慢啲，空轉嗰陣時就少啲，會提點番佢邊一類別需要改進。

主席：（經傳譯員）請你提供呢條方程式，唔該晒。鄧律師。

MR DUNCAN：（經傳譯員）有冇任何嘅通告或者係文件係去解釋畀車長知道究竟呢個計劃嘅目的係點呢，同埋點樣運作嘅呢？

梁健宏先生：有嘅，我哋有呢啲通知嘅，我哋有 poster 嘅，有...

MR DUNCAN：（經傳譯員）你可唔可以提供一啲嘅例子呢，呢啲嘅資料？

梁健宏先生：（經傳譯員）可以嘅。

MR DUNCAN：（經傳譯員）你有冇從車長或者工會收到任何嘅意見，即係佢哋點樣去睇呢一個嘅評分制度呢？

梁健宏先生：唔係一個好 formal 嘅 feedback，亦都--但係亦都有啲同事同啲車長去溝通，都知道呢樣事情嘅，佢哋亦都知道呢個唔係一個獎賞嘅計劃嚟嘅，呢個係一個希望啲車長知道佢駕駛表現嘅方法。

MR DUNCAN：（經傳譯員）有幾多百分比嘅車長會長期都有一個綠色嘅評級呢？

梁健宏先生：初步數據有啲顯示絕大部分都係得到 green 嘅 rating 嘅，佔咗有大約1個 per cent 嗰就會黃色嘅，紅色就比較少。

MR DUNCAN：（經傳譯員）如果只有百分之一係得到黃色，係咪即係好少--即係少於百分之一係紅色呀？

梁健宏先生：For example，譬如講番最近7月15號至7月22號呢個禮拜，有接近九萬個 record 係 green 嘅--六萬九千-- 69,824 係 green 嘅，有844係 amber，red 就係8個 record。至於再之前嗰個禮拜，2018年7月8號至到2018年7月14號有61,010個紀錄係 green 嘅，amber 有768，red 係有兩個。

MR DUNCAN：（經傳譯員）或者講一個比較極端啲嘅例子，如果有一個司機係經常都係喺一個 50 限速區度係經常超速，但係車速係低過 70，而喺一啲迴旋處就翻側咗架巴士嘅，根據呢個嘅制度，佢仍然都會得到綠色嘅評級，係咪呀？

梁健宏先生：因為呢個佢唔知道佢喺咩位置嘅，所以佢就唔知道你喺 50 路段，呢個就分辨唔到嘅，呢個分辨唔到，佢淨係個速度。

MR DUNCAN：（經傳譯員）所以就會畀一個綠色評級佢？

梁健宏先生：淨係速度，係，yes。

MR DUNCAN：（經傳譯員）你有冇收到一啲意見究竟啲車長係有冇為意有呢一個制度呢？

梁健宏先生：睇番有啲情--呢個就係只不過其中一個即係想知道佢點樣樣揸車嘅，亦都有其他呢啲佢頭先所講嗰四樣嘢，包括 excess idling、harsh braking, sudden acceleration 同埋 speeding，我哋都有其他啲 report 可以睇到嘅，呢個只不過頭先所講嗰個綠色、黃色、紅色，個車長自己知道，但係其他我哋有啲報告亦都可以睇番佢呢幾樣嘢嘅表現，我亦都知道有啲紅色嘅同事，我哋知道佢嗰個駕駛內容，我亦都知道佢哋係 50 會超速，我哋亦都會有其他嗰啲 report 可以知道，去處理呢個情況，嗰個係管理層會睇嘅，正如頭先彭生所講，佢有啲車務主任就會喺其他啲 report 去睇呢啲同事嘅表現。

而家呢個綠色、黃色、紅色只不過一個好簡單，但係亦都有啲啟發性，等啲車長知道佢個表現。

主席：（經傳譯員）鄧生問就唔係話你點樣知道佢哋嘅駕駛表現嘅，就係佢哋有冇留意到有呢個制度？佢哋為唔為意呢？

梁健宏先生：每一日佢有兩個機會佢會睇番佢哋個 screen，佢自己嘅 performance 嘅，亦都佢可以上員工網嗰度睇到，呢樣嘢就個車長會知道嘅，車長係知道嘅。

李澤昌先生：其實呢一樣嘢係一啲幾溫馨提示嘅嘢，當然要尊重番大部分嘅車長佢自己都有佢自己嘅駕駛嗰個態度同精神，呢個唔係一個 discipline 或者係咩嘢嘅態度嚟，所以其實呢一個係亦都要尊重個車長佢本身應該係有個正確駕駛態度，呢個係最基本等佢有一個知道自己係揸成點，亦都係希望佢哋自己可以喺嗰度係得到啲改善。當然下幾步可以係話多啲資料係咪可以令到我哋可以深入咁知道佢係咪轉彎等等嘅嘢，呢個係有其他嘅方案去做，例如係有啲便衣巡查、有人投訴，呢個會再做。但係呢一樣嘢係真係係希望佢哋尊重啲車長，佢自己畀番啲空間畀佢哋自己咁解嘅啫。

主席： Mr Duncan.

MR DUNCAN：（經傳譯員）究竟有冇效呢？或者效率好唔好呢？呢個制度有冇咩嘢問題呢？

梁健宏先生：我覺得係可以再好啲嘅，如果嗰啲數據係更加可以實時反映到個車長嗰個駕駛態度、方法，正如頭先所描述，佢行緊個 50 路段，講 speeding，如果

佢行緊 60，佢都唔會喺個分數度反映到出嚟，但係如果--正如上一次講話如果我有個 digital map，可以 indicate 到佢喺 50 路段超速嘅話，咁樣嗰個分數就可能又好唔同，呢度亦都會反映到出嚟嘅，所以而家個 score 係我哋現時個情況下可以做到嘅，但係如果係有啲更加好嘅反映到實際嘅情況，我哋就會跟進，會希望再做好啲。

MR DUNCAN：（經傳譯員）我個問題就係關於--係咪究竟呢個系統有效率呢？即係巴士司機知道有個咁嘅系統，佢哋有利用到，同埋拍完卡就知道，究竟呢個系統係咪有效，係咪有效率咁樣運作緊嘅呢？

梁健宏先生：（經傳譯員）係嘅。

MR DUNCAN：（經傳譯員）我問呢個問題，因為從嗰個關於雜項事件嘅文件冊第 3 冊 899 頁嘅，可唔可以請大家揭去嗰一頁呀？

主席：（經傳譯員）呢個雜項文件冊第 2 冊，即係我呢個版本就應該係第 2 冊。

MR DUNCAN：（經傳譯員）你可能未睇過呢份文件嘅，各位先生，我就想向你逐部分係簡介，我諗李先生會知道委員會主席同埋秘書處嘅人員就曾經去探訪一啲車廠、總站，係 8 月 3 號，即係上個禮拜五，我解釋下，呢個就係探訪完之後做嘅一啲紀錄嘅，即係開完會，探訪完之後做嘅紀錄。

第一個係關於 899，係去沙田新城市廣場嗰個總站嘅紀錄嚟嘅，我有興趣就係最後一個記項，呢一頁嘅最後一項，個附件 A 有啲相片嘅，委員會都同三個車長傾過偈嘅，都係了解一啲事項，就即係委員會同嗰三個巴士車長傾完之後，跟住你睇最後一點，同一個巴士車長之後就示範點樣嚟使用八達通卡或者係員工卡响嗰個係稽查嗰個辦事處嗰度點用。

呢度有個備註嘅，8 月 1 號聽證會嘅時候 Kelvin Yeung，係一個九巴嘅僱員就作咗證嘅，去到跟住下面嗰行，佢就係拍咗卡，跟住嗰個電腦就有個白色嘅畫面，跟住有個藍色字體嘅訊息，就叫佢小心駕駛，因為今日就個天氣就落雨，跟住就話畀佢聽下一個巴士嘅個路程係乜嘢，冇見到任何有啲分顏色嘅訊息或者係有啲--或者一啲訊息嘅窗口、盒，我問佢究竟有冇見過嗰個分顏色嗰個訊息，佢話冇，因為佢今日第一日係報到上班嘅。

跟住 902 頁，呢個去聯和墟巴士總站嗰度嘅探訪嚟嘅紀錄嘅，最後一項，呢度呢一頁嘅最後一項，亦都係問番嗰啲巴士車長究竟有冇喺個螢幕度有啲係顏色嘅訊息呢，個回答都係冇嘅，委員會就觀察到當佢拍卡嘅時候係有個白色嘅訊息，綠色嘅字就講清楚今日佢呢個負責嘅路線嘅一啲訊息。

跟住就去到屯門嗰個總站--車廠嗰度，屯門車廠，903 頁。一半嗰頁嘅中間嗰度，探訪期間，委員會都同一個車長傾偈嘅，佢响嗰個休息室度嘅。

第二點，個巴士司機就知道係有呢個分顏色嘅訊息顯示响個螢幕嘅，當佢擺嗰個係八達通卡就會見到，佢就話呢個係一個--係咪一個綠色嘅駕駛行為嘅

Transcript by Epiq Hong Kong, Limited

一個監察系統嚟嘅，佢知道如果係綠色，即係話一切都可以嘅；如果係黃色，係需要改善嘅；如果係紅色，一般嚟講，即係話個巴士司機嘅駕駛係有啲問題嘅。

最後，山景嘅巴士總站，904 頁，呢度就引述委員會同三個巴士車長嘅傾偈，就知道嗰個係稽查，呢個有啲咩嘢睇法，第三點呢度，其他兩個巴士車長就即係顯示佢哋上班嘅時候就拍卡，都係見到一個白色嘅同埋有一啲係藍色嘅字嘅訊息，就講明佢嗰個巴士司機今日嘅駕駛嘅分派嘅職務，見唔到有啲有顏色嘅訊息嘅。其中一個巴士司機就話佢第一日--即係啱啱上班嘅時候就係會見到個訊息嘅，有啲就話--有另外一個就話佢唔知道，冇留意，佢就冇留意嗰個螢幕有啲咩嘢嘅訊息嘅。

我就想你畀啲意見，你可唔可以講下呢個拍完卡之後，嗰個訊息就話叫佢小心駕駛同埋下一個路程係點樣樣，就冇話咩嘢紅或者綠、黃、紅，可唔可以講一講你嘅睇法呢？

梁健宏先生：佢嗰個提示嗰日，譬如天氣係不穩定，係濕呢，就會提示嘅。Amber 嗰個，佢就唔係每次都提示嘅。點解咁呢？亦都唔想令到個車長覺得太多，尤其是有啲 trip 係好 frequent 嘅，佢嗰個埋站時間比較短，就設計到就唔會 show 嘅，亦都唔排除主席當日喺個別站頭會唔會有啲技術問題，我哋要去睇一睇，睇到咩嘢原因 show 唔到出嚟。

第二樣嘢，宣傳嗰方面，係咪啲車長唔係咁充足去了解呢個咁嘅紅、黃、綠呢樣嘢呢？我覺得我哋都要做番好少少，但係我想覺得呢個都係一個好嘅方法，等個車長知道佢自己嘅駕駛，等佢自己知道。

至於嗰個 score 係點計法、可唔可以計好啲、精準啲、準確啲反映到佢嗰個駕駛狀況或者宣傳好啲，我諗我哋真係要加培努力。

MR DUNCAN：（經傳譯員）可唔可以話畀我哋聽幾時你最後一次話畀巴士車長呢個咁嘅系統有啲咩嘢重要性？

梁健宏先生：我唔知道。

MR DUNCAN：（經傳譯員）你同委員會講，你又話有啲文件你可以畀我哋嘅，係咪呀？即係關於嗰個方程式同埋點樣計，同埋你向員工點樣係通知佢哋呢個計劃嘅？

梁健宏先生：（經傳譯員）係嘅。

MR DUNCAN：（經傳譯員）我而家就係想去講黑盒上嘅另一個範圍，我就想問一啲問題嘅，即係話呢啲黑盒嘅數據去點樣使用先至可以去協助監察車長同埋佢哋嘅駕駛表現嘅，我知道黑盒嘅其中一個用途就係收集巴士嘅車速，我係想請你睇下你呈交畀檢討委員會嘅第二份陳述，呢個就係 167 頁嘅。

呢度有兩題比較長嘅問題，就係喺呢一頁嘅上方嘅，就係 167 頁，我諗我都唔需要係逐一講，但係我希望你係想睇一睇回覆嘅第二段，就話呢個就係有一個特有嘅電腦程式去匯報一啲疑似嘅超速個案，係畀一啲主任去檢查同埋確認嘅。喺確認之後，一啲已經確認嘅超速個案就會交畀呢個巴士車長表現管理組嘅表現經理係去進一步採取行動嘅。

我而家想請你睇睇第 170 頁，委員會即係喺上方就話公司係被要求去提供一啲資料同埋樣本去說明喺咩嘢位置係會有司機係以一個不適合嘅速度去駕駛，而喺回應方面，第一段就話由黑盒收集嘅數據嘅樣本就係以一個 BOP 207 號報告嘅形式係去程交嘅，就係喺附件度夾附，就顯示咗一啲超速嘅個案，而係遮掩咗一啲個人資料，佢係顯示咗日期、時間、巴士登記編號、路線號碼同埋相關車長嘅資料。

我哋就會睇番呢一份嘅附錄，就係 KMB-9 文件夾嘅第 3995 頁，係第 3995-1 嗰度都係有一個翻譯本。我就有一啲問題就係關於呢份報告嘅，如果你睇番第一行，喺右面就有一項資料，嗰個長度就係以秒去代表，有個最高速度就係 67.9 嘅，我假設呢個係每小時幾多公里，係咪？啱唔啱呀？

黃祥明先生：（經傳譯員）係，我見到嘅。

MR DUNCAN：（經傳譯員）個正確嘅理解係咪代表當時架巴士嘅速度係喺嗰三十二秒嘅期間速度都係超過 67.9，究竟係多過 67.9 吖，大概 67.9 吖，定係低過 67.9 呢？即係究竟應該點樣解讀？

黃祥明先生：呢個圖表顯示呢架巴士 TW5352，喺呢個時間 2018 年 5 月 1 號嘅 0 時 00、十九-- 20:07 嘅呢個時間有三十二秒嘅時間係最高車速係 67.9 時速公里。

MR DUNCAN：（經傳譯員）係咪即係喺整段嘅期間都係速度 67.9 呀？

黃祥明先生：喺呢個顯示嘅時間嘅三十二秒都係呢個時速嘅速度。

MR DUNCAN：（經傳譯員）即係係咪整段期間都係呢個速度呀？

黃祥明先生：喺呢三十二秒裏面，佢係有延續性嘅呢三十二秒裏面係出現過最高嘅車速係 67.9。

主席：（經傳譯員）點解你係要揀呢一個三十二秒嘅期間，而唔係六十秒或者九十秒呢？

黃祥明先生：因為嗰個黑盒嗰個顯示係每秒出現嘅，當佢係一個達到一個我哋指定咗嗰個嘅車速限制嘅時候，佢就顯示出嚟，就會顯示到呢架車喺當時行咗幾耐嘅時間裏面係行幾高--最高嘅車速係幾多。

主席：（經傳譯員）即係我想了解，就係點解三十二秒？

梁健宏先生：呢個係一個 exception report 嚟嘅，呢個係一個 exception report 嚟嘅，佢有啲 setting 嘅，佢有啲 setting 嘅，佢 exceed 某一個 setting 呢，就會 show 出嚟，換句說話講，三十二秒鐘佢都 exceed 咗嗰個 setting，不過最高速就係 67.9，呢三十二秒佢都係超過我哋定嗰個速度。似乎呢個路段應該就係 50 路段，因為如果 70 路段，佢就唔應該出嚟嘅。呢個 50 路段，佢有三十二秒鐘係超過呢個路段嘅 setting，而超過呢個 setting，其中最高佢係去到 67.9。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）究竟呢一個時間呢個長度係咪預先定嘅？

梁健宏先生：Duration 就唔係 pre-set 嘅，係睇到有幾多秒鐘佢係超過嗰個速度，佢個 journey 其中有幾多秒鐘，佢措埋，accumulated，唔係 continuous 嘅，喺佢成個當日嗰個--佢當日嗰個 journey time，佢總共有幾多秒係超過--個速度係超過我哋特定嘅...

李澤昌先生：假設為例，take 呢一個秣巴，即係話嗰條路段係 50 公里嘅個時速，即係話佢三十二秒係超出咗嗰個 50，而呢三十二秒裏面，佢有一個車速係去到 67.9，即係其實呢三十二秒都係超過嗰 50，但係佢最高係去到 67.9。

主席：（經傳譯員）我咁理解啱唔啱呢，喺呢啲特殊情況嘅報告，如果巴士唔係超速超過十秒嘅話，就唔會產生呢一項嘅紀錄，啱唔啱呀？即係當然我哋大家可以搵下究竟係咪有一啲嘅時間嘅長短係少過十秒，但係呢個係原則嘅問題，究竟即係係咪要起碼係連續十秒超速先會有紀錄呢？

黃祥明先生：呢個問題可以等我回答，其實我哋喺個電腦度係 set 定咗一啲嘅指標，等架車去到某個時段，某個車速嘅時候，會顯示出嚟嘅，或者我簡單啲，將個數字話一話畀大家聽，我哋定咗係 56 至到 65 嘅...

主席：（經傳譯員）你可唔可以答咗我問題先？我理解啱唔啱--係咪錯誤呀？

黃祥明先生：唔係十秒鐘。

主席：（經傳譯員）係幾多呢？

黃祥明先生：所以我而家就將個情況講出嚟，因為唔同車速嘅時段，我哋 set 嘅時間係唔同。

主席：（經傳譯員）點解你唔直接答個問題，跟住先解釋呢？

黃祥明先生：Okay，對唔住。

主席：（經傳譯員）究竟個限速係幾多呢？

黃祥明先生：喺 56 至到 65，我哋係超過三十秒嘅時間呢，我哋就會將--喺個電腦

就會彈出嚟，而家講緊限速 50 嘅道路。第二個我哋訂定嘅就係 66 至到 75 呢個速度，如果喺一個限速 50 公里嘅道路，超過十五秒，我哋都會喺個電腦度彈出嚟。

主席：（經傳譯員）點解呢個資料就冇喺呢幾千頁嘅資料度出現呢？點解我哋要喺一個聆訊度問先至會得出呢啲資料呢？當我哋問呢啲問題嘅時候，即係委員會想知道嘅事情係好清楚嘅。好，請你繼續解釋。

黃祥明先生：另外喺--如果喺個道路限制 50 公里嘅道路，佢係由 76 去到 79 呢，我哋訂定咗兩秒鐘就會顯示出嚟，呢個係 50 公里嘅限速嘅情況。

主席：（經傳譯員）咁係非常有用嘅資料。喺限速 70 嘅地段情況係咪都類似呢？

黃祥明先生：喺 70 公里嘅道路，如果佢係喺 76 至 79 公里嘅範圍裏面超過三十秒，就會亦都係出現出嚟。

梁健宏先生：如果係超過八十公里嘅話，兩秒鐘就會出嚟。

主席：（經傳譯員）唔該晒。鄧生。

MR DUNCAN：（經傳譯員）我哋睇番 KMB-1 168 頁，第一點嗰度，即係嗰個圓點嘅第一項嘅答覆，呢個係你哋嘅第二份--公司嘅第二份陳述書，你就講清楚，呢度就話利用一個電腦嘅程式，黑盒就會係記錄速度同埋啲急剎車、過快咁加速同埋有其他嘅資料係需要嘅，就會响嗰個其他嘅管理嘅系統會係記錄嘅，就大概要十日，先至可以攞到呢啲咁樣嘅數據嚟分析，跟住可能有紀律行動嘅。點解啲咁重要嘅數據要十日先至可以處理到呢？

梁健宏先生：而家就四天，四天都長嘅，我哋亦都想希望再快啲。個資料純粹係--喺嗰個伺服器嗰啲資料純粹就係個盒、個秝巴，不過就即係跟個巴士秝巴，每一秒鐘嘅數據、速度、經緯度呢啲咁嘅數據，有冇超速、有冇大油、有冇急剎，呢啲數據，咁多一架車嘅數據，但係我哋點樣樣去 relate 番去到個別車長、個別路線呢，呢啲亦都係要成個好多唔同嘅系統嘅 interface 嘅，包括 TER、站務管理系統。

站務管理系統係咩嘢呢？就係每一位車長佢去站頭 sign in，即係等如主席去睇到佢拍卡，佢 sign in，就話畀佢知呢個車長 start 呢個 journey、咩嘢車牌、咩嘢路線，去到 the other end of the route，佢就會 sign off，即係變咗佢就知道佢幾時開始呢個 journey、幾時 end 呢個 journey，喺呢個系統就 capture 咗嗰個車長嗰個資料、個巴士嘅資料、路線嘅資料。

呢個 TER 呢個 system，TER，每日措埋咁多嘅資料，每一個站，我哋有二百幾個站，而呢啲咁嘅資料全部就去晒我哋個 server 嗰度，呢啲咁多嘅資料，呢啲咁嘅資料亦都同 bus on-board monitoring system，就係頭先我所講架巴士每秒鐘嗰啲資料，點樣樣可以 interface 去搵番出嚟某啲車長當日揸過咩嘢車、佢當日個駕駛狀況、經緯度，即係 location。

有咗呢啲資料，點樣樣去判斷佢係 50 路段呢？亦都要再要 process，因為亦都要 match 番 FMI，FMI 就 fleet management information system，呢個 system 有咩嘢呢？有嗰架車經過嗰個地點，知道係行邊段係 50、邊段係 70，從而知道嗰架車有車長、有路線、有佢行車嘅情況，加埋 FMI 嗰段路佢係 50 抑或 70。

所以點解呢個事情咁複雜，所以點解--即係如果頭先所講有個 digital map，我乜嘢資料已經喺個黑盒嗰度有晒嘅話，咁樣樣就更加快捷，我相信--我敢講，個 report 一日就可以有。

主席：（經傳譯員）呢啲咁嘅科技已經有咗好耐㗎囉嘞喎，啱唔啱呀？

梁健宏先生：Yes, I know.

主席：（經傳譯員）你可以話係定唔係嘅，跟住解釋。

梁健宏先生：（經傳譯員）係，我知道有嘅。

主席：（經傳譯員）你想解釋，好明顯，咁點解之前唔做呢？

梁健宏先生：亦都嘗試去理解呢個問題，亦都嘗試去問呢個問題，我哋儘量做喇，我哋嘅範疇以內，as an operator，我哋可以掌握到嘅資源、可以運用到嘅影響力，希望借住今次呢個機會，令到啲嘢可以行快啲。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）委員會就係要求咗你提供嗰啲數據嘅，頭先我哋見過一個表裏面即係譬如超速嗰啲數據嘅，你可唔可以畀一個報告就反映，即係譬如話係剎車或者加速太過突然、太快嗰啲咁樣嘅情況嘅呢？

梁健宏先生：我哋有個 weekly report on 呢幾個狀況嘅，呢個 weekly report 就係睇番過往嗰星期個車長佢嗰個駕駛情況，有措埋有幾多秒鐘係 exceed 超過我哋嘅特定指標嘅喺三個範疇，harsh braking、sudden acceleration 同埋 speeding 嘅，我哋有個 weekly report。

呢啲 weekly report 出咗嚟之後，就會交畀我哋有關部門就跟進嘅，當然有時 harsh braking 或者 sudden acceleration 有時亦都係因應交通狀況係有時無可避免，亦都未必真係完全係車長嘅駕駛問題，睇番路面而家個狀況千變萬化，行人過馬路、其他車輛、交通狀況唔多唔少車長面對嘅壓力好大，所以有時無可避免佢都會做啲所謂唔係幾好嘅動作，但係我哋都希望知道佢所面對嘅係咩嘢情況。

收到呢啲 report，我哋啲同事亦都會跟進嘅，包括可能畀個電話佢，約見下佢，或者嚴重嘅，情況係許可嘅話，就可能要便衣去跟跟佢，睇下佢實際嗰個駕駛狀況係點樣樣，呢啲就係呢份 report 最主要嘅功能，而唔係去--因為亦都 identify 唔到佢係咪真係駕駛不良。

黃祥明先生：或者我可以補充少少，我哋今日全日講緊個黑盒，今朝我哋曾經講過佢嗰個車嘅顯示器，即係話我哋個車長喺車廂裏面有即時嘅顯示嗰四盞燈，我唔再重複喇，嗰個係即時畀個車長一個認知，等佢知道佢駕駛嘅時候有問題嘅，希望佢從而能夠即刻改善或者改好佢嘅駕駛方法。

跟住我哋亦曾經講過，拍卡有黃、綠、紅呢三種顏色嘅儀器，呢個我哋希望個車長係自我檢討，佢見到自己嘅駕駛技巧之後，就係希望佢可以自我檢討，就改進佢嗰個駕駛態度。

而家我哋講緊呢一樣嘢係我哋每個星期都會有一個嘅報告出嚟，呢個報告會包括車長嘅超速、車長嘅加速同埋急剎嘅資料，呢個資料喺呢個初步嘅時候係未好完善，唔係而家我螢光幕見到嗰個資料咁多嘢，只係見到一個累積嘅數字。

喺呢啲車長超速嘅累積數字，我哋見到嘅時候，我下面嘅一個叫做表現管制組嘅同事，即係 performance management 個 section，就會通知番廠務嘅同事，等佢哋通知呢個車長，呢個並非一個嘅懲罰，而係一個提醒，通知啲車長喺呢個階段已經知道佢有一啲超速嘅情況，等佢要小心駕駛。

另外頭先講到一啲急剎同埋突然加速呢啲咁嘅情況，我係會派一啲嘅便衣巡查，呢啲便衣係我哋嘅駕駛學校嘅一啲嘅導師，佢哋穿著便裝嘅衣服去上呢個巴士度，直接觀察呢個車長嘅駕駛情況，從而得知佢係咪真係好似電腦嘅顯示有急剎或者令到車輛嘅行動唔安全，然後向我匯報，等我哋可以採取呢個紀律嘅行動。

主席：（經傳譯員）梁先生，我想講番頭先鄧生幾分鐘前問嘅問題，你可唔可以畀一啲報告畀我哋呢個委員會呢？而家我哋螢幕見到一個報告，你可唔可以講一講嗰啲係剎車太過急、突然譬如加速，你可唔可以畀一個類似而家螢幕見到嗰個報告，就係關於嗰個加速、減速、太過突然、太快嘅？可唔可以呀？

梁健宏先生：Yes.

主席：（經傳譯員）多謝晒。

MR DUNCAN：（經傳譯員）我想請你再睇嗰個謄本嘅，係第六日嘅--聽證會第六日嘅謄本。

主席：（經傳譯員）邊一個嘅證供呀？

MR DUNCAN：（經傳譯員）係 Kulis 先生嘅。161 頁。

主席：（經傳譯員）邊一個文件冊㗎？

MR DUNCAN：（經傳譯員）第 3 份嘅。之前我提過嗰個積分卡呢個咁樣嘅講法同埋巴士車長嘅駕駛嘅表現、駕駛嘅行為，我就想問一問關於 Kulis 先生呢個證供所講嘅事嘅，我想問幾個問題，先睇第 3 行，161 頁第 3 行，我哋先要去番

159頁先嘅，唔好意思。係160，第160頁，第22行。

陳律師就話「我下一項有興趣嘅題目，就係我會問一啲問題，就係關於用一啲軟件分析去擬備一個報告，就係關於安全或者不安全嘅駕駛行為嘅。」佢就問「你間公司有冇提供軟件，就係根據黑盒收集嘅數據，就可唔可以提供一個軟件係可以製造一啲報告去顯示乜嘢係可接受或者不可接嘅駕駛行為嘅呢？係咪有可能嘅呢？」Kulis先生嘅回答就係可以嘅。

而陳律師就係問「係點樣做呢？要點樣做呢？如果我係巴士嘅營運商，而我係嚟問你『我點樣可以係製造一啲某位司機嘅報告？』你會點樣同我講呢？即係你會同我講可以點樣做呢？」而就係有一啲--「我就會向你介紹一啲我哋嘅司機嘅回饋資料同埋一啲相關嘅部分同埋連同呢個軟件，你就可以去考慮一啲相關嘅數據，而最後，你係可以得到你自己嘅分析，而你就會可以見到邊個司機會有最多嘅警告或者超速嘅情況，呢個係其中一個選項，然後我哋可以為你去設計一個方案。如果你係唔只係想要司機嘅回饋數據，咁都係睇下你究竟你嘅諗法係點，如果你想係計一啲嘅分數去決定乜嘢係--邊個係最好嘅司機或者用一啲負面嘅數據嘅分析，其實係有唔同嘅方法係可以達成呢個目標嘅，亦都係視乎司機或者工會嘅意見。」

而陳律師就話「呢個只不過係軟件嘅功能嘅啫，因為硬件就只係個黑盒嘅啫，我嘅了解係啱唔啱呢？我係咪唔需要買一啲新嘅設備，先至可以得出呢個司機嘅分數呢？」個回答就係「你唔需要新嘅設備嘅，如果你係顧客嘅話，你已經係有我哋嘅盒，我哋只需要傾下有啲咩嘢嘅可能性，我哋可以畀一個新嘅軟件你嘅。」

「究竟全球係幾咁--即係呢個情況係有幾咁普遍呢？究竟喺全球係有幾常用嘅呢，即係用呢個嘅積分制度？」Kulis先生就話「根據我嘅經驗，係喺歐洲係幾常見嘅。而喺有一啲嘅地方，佢哋想係用一個簡單啲嘅制度，即係一個負面回饋嘅制度，例如一個簡單嘅警告，就係咁多嘅啫，因為我哋要明白司機亦都係要明白呢啲分數係點樣運作，如果你係用一啲比較複雜嘅計算，你係要培訓啲司機嘅。」

而陳律師就話「好喇，咁唔再講呢一個計分呢個制度。」主席就話「喺你繼續之前，如果喺一啲西方嘅一啲歐洲國家係非常普遍嘅話，佢哋係用啲咩嘢嘅數值去評核駕駛嘅行為係好定係唔好或者係普通呢？」「係一啲德國嘅公司，佢哋用嘅數據同我哋一樣，一啲基本嘅數值，例如係一啲超速、加速、減速，而另外佢哋亦都係會睇下司機係咪會比較克制，佢哋係呢一個係踩 brake 嘅時候。佢哋亦都係有分析佢哋嘅速度嘅變化，同埋呢個剎掣嘅情況嘅。」

主席就表示「基本嘅模式就係分析呢一個速度加速、減速，係咪？」回答就係「係嘅，而喺一個怠速嘅--如果有個怠速嘅情況，即係你係嘥緊錢嘅。呢個就係個基本模型。而喺呢個之上，或者亦可能會睇下佢哋會唔會係克制地去剎掣嘅情況嘅。」

Kulis 先生就喺呢一部分嘅證供入面即係係咪顯示其實係有呢一個就軟件提供，對你有冇任何嘅吸引力呢，呢一個嘅方案？即係而唔係話你超咗速，所以--即係呢個係一個比較負面嘅做法嚟嘅，相反就係用一個比較正面嘅做法，係會比較受司機歡迎。

梁健宏先生：佢哋嘅做法其實同我哋一樣嘅，我哋都係做緊同樣事情，我哋就以安全去睇嘅，純粹以安全嘅角度，去睇番佢邊啲 item 係需要計嘅，當然而家嘅黑盒 capture 到好多唔同嘅數據，包括佢嗰個耗油量，包括佢踩 brake，包括佢其他嘅情況，我相信有啲 application，尤其是睇番嗰個內容，佢講緊一個 commercial，講緊一個 truck transportation company，一個車長或者一個司機，嗰啲商業嘅車長、商業嘅司機，佢可能揸緊一架車，固定都係嗰架車，佢可以知道嗰架車嗰個表現，喺一個商業個角度嚟睇，個 economic 嚟睇，佢知道佢有冇 idling 太耐，佢知道佢會唔會唔死火，佢知唔知道佢冇熄冷氣，呢樣嘢係有用嘅，commercially。但係作為巴士車長，佢未必每日都揸嗰架巴士，佢未必全日都揸一架巴士，嗰架巴士亦都唔係一個車長揸晒，明天佢亦都揸第二架巴士，所以喺呢個角度嚟睇，有啲嘢如果你係點樣樣去評估嗰個價值，我相信就同而家我哋講緊嗰個安全就未必聯繫得上。

所以我覺得有啲咩嘢係要安全嗰部分我哋要攞嚟睇，我哋淨係最主要係應用到安全，如果你用埋其他嘅元素去再計，唔多唔少，我未必做到四日，可能要五日、六日或者七日。

MR DUNCAN：（經傳譯員）喺個螢幕上，就係我會顯示一篇嘅文章，委員會亦都係睇過，係7月16號嘅今年。你之前有冇見過呢篇報道呀？

梁健宏先生：（經傳譯員）冇嘅。

MR DUNCAN：（經傳譯員）我就想請秘書處去向下去顯示呢份報道嘅，就請你睇一睇。

主席：（經傳譯員）呢篇報道係舊年7月嘅。

MR DUNCAN：（經傳譯員）唔好意思，係2017年6月29號嘅呢篇文章係，唔該主席。請問你係咪睇完喇？

梁健宏先生：Yes.

MR DUNCAN：（經傳譯員）你見到佢哋有一個所謂嘅綠色路嘅一個監察制度，之前我哋睇到 GreenRoad.com，就係喺個謄本度入面有提及嘅，你有冇印象呀？

梁健宏先生：（沒有可聽到的回答）

MR DUNCAN：（經傳譯員）你對呢一個 GreenRoad 嘅道路監察系統熟唔熟悉呢？

梁健宏先生：（經傳譯員）唔熟悉。

MR DUNCAN：（經傳譯員）即係你對呢篇報道嘅--即係即時嘅反應係乜嘢呢？你覺得對於你哋公司嚟講，有冇價值呢？

主席：（經傳譯員）你係咪講緊呢個獎賞或者花紅嘅制度？

MR DUNCAN：（經傳譯員）係呀。

梁健宏先生：可以考慮嘅。

主席：（經傳譯員）到目前為止，有冇考慮過呀？

梁健宏先生：（經傳譯員）未嘅。

MR DUNCAN：（經傳譯員）咁所以你嘅反應就係你哋公司可以考慮嘅，係咪？

梁健宏先生：（經傳譯員）你可唔可以重複個問題呀？

MR DUNCAN：（經傳譯員）你嘅反應係咪就係呢個係你哋公司值得考慮？

梁乃鵬先生：係，我確認我哋係可以考慮，我哋係會考慮呢篇報道嘅建議嘅，我可唔可以要一份嘅副本呀？

主席：（經傳譯員）當然，我哋係可以影一份畀你嘅。

梁乃鵬先生：唔該晒。

MR DUNCAN：（經傳譯員）大概係咁多喇。

主席：（經傳譯員）係，各位，我哋今日嘅工作就到此為止，我哋係好快就會係休會。如果可以星期五返嚟嘅事，我哋就會星期五去繼續，即係 10 號，我哋喺同一個地點度繼續嘅。

梁先生，喺我哋完結之前，你之前係進行咗一個嘅測試嘅駕駛，就係比較咗 50 同埋 70 限速區嘅分別，而 Openmatics 就係有採用咗一啲裝置嘅，委員會係希望了解多一啲嘅，呢個係有冇任何嘅文件紀錄，喺呢一方面。

梁健宏先生：（經傳譯員）你係講緊個測試？

主席：（經傳譯員）即係你係相關嘅程序係點呢，就住呢啲車輛？

梁健宏先生：（經傳譯員）我哋係會預備呢啲資料嘅。

主席：（經傳譯員）希望有人可以用口頭作供，但係最好可以事前畀一啲資料我哋，等我哋係了解一下你哋嘅程序係點。

李澤昌先生：你嘅意思係咪星期五之前提供啲資料？

主席：（經傳譯員）係嘅，如果你可以嘅話，即係儘量提供你可以提供嘅資料，同埋係提供一個可以--即係提供可以口頭作供嘅人士，因為呢一個議題係會比較有

興或者有用嘅。歐陽先生係有一個問題。

歐陽先生：（經傳譯員）主席，我係想跟進兩個問題嘅，兩個問題都係同李先生有關嘅，今朝李先生係提到賠償嘅問題，管理層就係決定將呢一個嘅駕駛花紅就納入埋薪金度，你提到就會為車長帶嚟壓力嘅，因為嗰個花紅。之後你提到你係引入咗呢一個 20 分嘅制度，亦都係會有包括某種嘅獎賞，就住呢一個 20 點嘅制度會唔會為車長帶嚟任何嘅壓力呢？如果會嘅話，點解呢？

李澤昌先生：（經傳譯員）我諗嗰個實際嘅獎賞對車長嚟講，佢哋認為佢哋值得去攞到嘅，因為係佢哋嘅薪水一部分嚟嘅，就算有個意外，關唔關佢事都好，佢需唔需要負責都好，呢個獎金就會係押後咗先畀嘅，就會製造一啲不必要嘅壓力，你可以想像到，如果嗰個獎金係佢哋嘅薪金一部分，咁咪每一年佢哋都有加薪嘅，就係根據表現加薪嘅，佢就覺得好似你攞走佢啲嘢咁樣，佢就想有啲係評核、有啲基準，話「好喇，你值得係有咁嘅加薪嘅。」或者你係--譬如話「你可以升一個職位嘅。」咁就唔同。

歐陽先生：（經傳譯員）我想講第二件事，就關於安全嘅。我都收到今朝有啲講法，就因為安全係最重要嘅，所有部門都要處理嘅，所以冇一個特別嘅部門處理安全問題嘅，過去一年，你哋個團隊有冇發現有啲部門係有啲誤會，以為其他嘅部門處理緊安全，而係實際上冇任何一個部門係處理緊安全？

李澤昌先生：（經傳譯員）每一個禮拜一嘅早上，我本人同埋嗰個營運部嘅董事、其他嘅董事都會有幾個小時就坐低傾嘅，會講一講啲硬件問題、巴士或者係巴士司機嘅表現同埋設施、總站、車廠嘅問題，我哋係有一個團隊工作嘅，即係我意思即係話唔係話安全淨係講緊道路嘅問題或者淨係講緊巴士司機嘅問題。或者梁生可能有嘢補充。

梁健宏先生：好似嗰個車長咁，畀--啲乘客有啲衝突咁樣樣，咁要做一樣嘢去做，包括安裝 CCTV，包括裝嗰塊 protective shield，唔係淨係一個 department 做，亦都需要 procurement 去配合，所以唔係單單一個部門，亦都係需要工程部，需要 procurement，都要 finance，去整體去睇呢件事情，夠唔夠資源、要做得幾快呢？呢啲唔係一個 single department 就可以做。譬如話就住 CCTV retrofit 或者點樣樣，唔係一個部門就可以決定幾快、做唔做，係一個成公司嘅決定，點樣做起上嚟？亦都係全公司要配合，procurement 去幫手，要儘量去啲嘢可唔可以掌握快啲到，所以呢樣嘢在在都係全個團隊。

李澤昌先生：因為做嗰樣嘢嘅時候，你要係好 responsive，同埋要 comprehensive，你基本上係唔離得開個車個硬件、嗰班工程師、維修部門佢係咪真係可以配合到，當然喺個車務部亦都有佢嗰個需求嘅，仲有當然就係有好多 incident 你係唔離得開係--唔係--即係整體性、跨部門嘅。

歐陽先生： Thank you very much. Thank you, Mr Chairman.

主席：（經傳譯員）多謝你，好喇，我哋會係暫時休息，休會直至到星期五上晝10點鐘再續會。

2018年8月7日

下午5時36分聆訊押後

Friday, 10 August 2018

(10.00 am)

EVIDENCE FROM KOWLOON MOTOR BUS CO (1933) LTD AND LONG WING BUS CO LTD: DR NORMAN LEUNG, DR JOHN CHAN, MR ROGER LEE, MR GODWIN SO, MR LEUNG KIN WANG, MR PATRICK PANG, MR JAMES WONG

(simultaneous interpretation used only where indicated)

CHAIRMAN: Good morning, Dr Leung and gentlemen. Thank you for returning to continue to give evidence. I'll ask Mr Duncan to begin questioning.

Dr Leung, is there something you would like to say first of all?

Statement by DR NORMAN LEUNG

DR NORMAN LEUNG: Yes. Good morning, Mr Chairman. May I have two minutes, please?

Mr Chairman, I refer to the request made by Mr Duncan on Tuesday for the disclosure of part 2 and part 3 of our special committee's report dated 12 March 2018.

Mr Chairman, I have had the opportunity of studying both part 2 and part 3 of the report. I am satisfied that part 3 of the report, namely issues relating to bus captains, would not in any way prejudice the investigation conducted by the police. I also feel that the report should have been submitted to this committee sooner, so that the committee will have better

understanding of our recruitment, training and performance monitoring of our bus captains.

Mr Chairman, please accept my apology that part 3 of the report has not been submitted to you sooner.

As to part 2 of the report, ie the accident investigation report, I am of the opinion that it is not appropriate to disclose the contents thereof to the public. I am also of the opinion that such report is not relevant to the terms of reference of this committee.

I would also like to take this opportunity to thank the committee for drawing to my attention the GreenRoad vehicle tracking system. I have directed the management to find out more about Tower Transit, the bus operator in Singapore, with a view to visiting them in due course to learn more about the GreenRoad vehicle tracking system.

Also, I have got inspiration from this news article that perhaps I should reconsider the award of safety bonus to our good performance bus captains. It doesn't have to be a significant amount, but some sort of recognition to our bus captains would serve to promote bus safe driving.

Thank you, Mr Chairman.

CHAIRMAN: Thank you, Dr Leung.

Mr Duncan, may I invite you to make enquiries into what Dr Leung has said to us now in relation to the parts of the report that are disclosed and are not to be disclosed, in view of what is said in the last paragraph of the letter that was sent to the committee on 9 August?

MR PETER DUNCAN: Mr Chairman, yes, we will do that.

I think, Mr Chairman, if I might say, with regard to part 3, which we find now at page 377 of the KMB-1 bundle, it would seem to me, with respect, that part 3 really is no more than an introduction to or request for the details which we have already received at annex 5.

CHAIRMAN: So we have received annex 5?

MR PETER DUNCAN: That's right, we received that earlier. So I don't think there is any particular issue which arises with regard to part 3.

Part 2, Mr Chairman, I have heard your remarks and we will consider the matter accordingly.

CHAIRMAN: Because the likelihood is that part 2 contains material of different nature. We know nothing about what it contains. Opinions and views are irrelevant to the committee, but empirical data may well be relevant. I invite you to consider that and deal with the matter in due course, whenever you feel it is appropriate.

MR PETER DUNCAN: We will do that, Mr Chairman.

Examination by MR DUNCAN (continued)

MR PETER DUNCAN: Thank you, Mr Chairman, and good morning, Dr Leung and gentlemen.

DR NORMAN LEUNG: Good morning.

MR PETER DUNCAN: We have since the last hearing received two letters from the company and I would like to go to the second of those letters, please, which we will find at KMB-1 at page 297.

I wish to bring your attention, please, to the bottom paragraphs on page 297, where there is reference to item (2), which concerns the matter of the 29 sharp bends which were the subject of questioning on Tuesday.

The letter states:

"In respect of item 2 [which was the item requested], the following are enclosed as appendix B".

Then from (i) through to (vi), there is reference to a number of matters.

Ultimately, at paragraph (vi), this statement is made in the letter:

"a series of emails indicating that Mr Owen Eckford, the then operations director ('OD') did not endorse this safety enhancement programme."

I wish to explore that a little with you, please. In that respect, can I take you to the same bundle at page 309. At page 309 through to page 311, you will see

item 1 as the letter identifies it, which are described as "Meeting Notes for Review on Safe Speed Limit for Identified Sharp Bends". You will see that it's dated 31 July 2014, a meeting which apparently lasted for some two and a half hours and was attended by a number of people.

We can see the details of that for ourselves, pages 309 through to 311.

Then at page 312 we see item (ii) in your letter, as identified in your letter, which is a table which sets out details of the 30 sharp bends. That runs from 312 through to page 314.

Then at page 315, item (iii) is identified in your letter, a communication plan which had been referred to in the first item, the meeting notes. One can see the details of the communication plan, running from page 315 through to 316, with what might be described as very detailed proposals with regard to the communication of the plan, as it then was.

Then at page 318, there commences a series of photographs of the relevant bends. One can see those right through to page 351.

Then at page 352, we have item (v) identified, which is said to be, according to the letter, a draft safety speed card in contemplation in September 2014. We see

that card there at page 352.

Then finally, at (vi), from pages 353 to 355 we have the series of emails described in your letter as indicating that Mr Eckford did not endorse the programme.

I just want to pause for a few moments, if I could, with regard to the contents of these emails. They start, I think, with the email which can be seen on page 354. There's an email from Gary Wong, whose name has already been mentioned in the hearing as the head of the then safety and service quality department. It is an email sent on 14 August 2014 to Mr Edmond Ho, who I understand was the managing director of the company at that point.

Is it correct that Mr Ho was then the managing director?

DR NORMAN LEUNG: He was at the time, yes.

MR PETER DUNCAN: When did he cease to be the managing director?

DR NORMAN LEUNG: Roger should say.

MR ROGER LEE: He ceased on 1 January 2015.

MR PETER DUNCAN: Thank you.

CHAIRMAN: That's when you began your tenure?

MR ROGER LEE: Yes.

MR PETER DUNCAN: Did he then leave the company?

DR NORMAN LEUNG: No, he stayed on as a non-executive director of the board until the last AGM, last year.

MR PETER DUNCAN: Thank you.

Back to the email, we can see it's from Mr Wong to Mr Ho, and I won't read out the email but if you go through it quickly, you will see that it informs Mr Ho and those copied on the email with what it described as the field operational tests on safe speed limits for 30 identified sharp bends and roundabouts having been completed on 12 August.

CHAIRMAN: Mr Duncan, before you move on, might I suggest you might read out the first paragraph.

MR PETER DUNCAN: Yes.

CHAIRMAN: Because there are some questions that might usefully arise, given that these are public hearings and it is difficult for the public to follow things unless they are given a context.

MR PETER DUNCAN: I understand, Mr Chairman.

Let me read the first paragraph to you:

"I am pleased to inform you that field operational tests on safe speed limits for the 30 identified sharp bends and roundabouts were completed on 12 August 2014 (Tuesday). Attached please find the Excel file showing the calculation of safe speed limits carried out by EO, validation of calculated safe speed limits performed by

DI of BCTS (SSQD's staff as observer) and the result of final review jointly conducted by EO, BCTS, depots, [Long Win Bus Company] and [the service and quality department]."

CHAIRMAN: Mr Duncan, that might be an entry for the Guinness Book of Records for acronyms, but perhaps we can explore what these acronyms mean with the representatives of KMB.

MR PETER DUNCAN: Would you gentlemen be able to help us, first of all, with the reference to -- if we go back to those copied, first of all, Evan Auyeung DMD, what would that be?

MR ROGER LEE: He was the deputy managing director.

MR PETER DUNCAN: HR, would I assume correctly that's human resources?

MR ROGER LEE: That is correct.

MR PETER DUNCAN: OD?

MR ROGER LEE: Operations director.

MR PETER DUNCAN: Is that a position that exists today, operations director?

MR ROGER LEE: Yes.

MR PETER DUNCAN: Is that Mr Leung's position?

MR ROGER LEE: Yes.

MR PETER DUNCAN: DOD?

MR ROGER LEE: Deputy operations director.

MR PETER DUNCAN: And SSQ?

MR ROGER LEE: Safety and service quality department.

MR PETER DUNCAN: Then in the substantive part of the email, the first paragraph, "EO"?

MR ROGER LEE: Engineering officer.

MR PETER DUNCAN: "DI"?

MR ROGER LEE: Driving instructor.

MR PETER DUNCAN: "BCTS"?

MR ROGER LEE: Bus Captain Training School.

MR PETER DUNCAN: I believe we've covered the acronyms in the first paragraph.

Is there then reference to the file which has been enclosed, the Excel file, at the beginning of the second paragraph; do you see that?

Does the email continue to say this:

"With respect to the theoretical calculations and validation of safe speed limits for the 30 identified locations where the risk of bus roll-over is deemed to be high, it would be very difficult for all concerned [bus captains] to remember different speed limits due to different turning radius of roadway curves. [Bus captains] can make errors (ie lapses of memory/memory errors) no matter how well trained ..."

And it's difficult to read but I assume that's "briefed they are".

"The consequences of such human errors can be severe if the BC [bus captain] gets wrong memory and drive the bus at a speed for what's that supposed not to be. This may lead to a serious 'bus roll-over' accident and the hazard presents significantly greater risk than other types of traffic accident. The risk is 'unacceptable' and cannot be tolerated. Therefore, we recommend stronger risk controls to minimise the intolerable risk caused by the human errors.

In view of above, we simplify the variety of safe speed limits into '15 [kilometre per hour', '20 kilometres per hour' and '25 kilometres per hour'] for the 30 identified sharp bends and roundabouts so as to make it easier to understand and remember. Based on the final review shown in the attached Excel file, the recommended safe speed limits are listed as follows ..."

You will then see a paragraph which is devoted to the particular limits.

If I pick it up again at page 355:

"The management of speed through appropriate safe speed limits is an essential element of road safety. As a rule of thumb, the recommended safe speed limits are not higher than the calculated roll-over speeds within the same depot area. Take for an example, if the [bus

captain] of KBD gets wrong memory and drive [s] the bus at a speed of 20 [kilometre per hour] instead of 15 [kilometre per hour, this may not lead to a 'bus roll-over' accident as the calculated roller-over speed limit for Hiram's Highway flyover to Clear Water Bay Road (shown in road section no 20 in the attached Excel file) 24.9 [kilometre per hour]. This principle can also be applied to other depots."

If I just pause there, "KBD" there presumably would be a reference to one of the depots?

CHAIRMAN: Is that correct?

MR ROGER LEE: Kowloon Bay Depot.

CHAIRMAN: Thank you.

MR PETER DUNCAN: Thank you.

Then to continue:

"To conclude, action [plans] are summarised as follows:

(a) Identify the locations of sharp bends and roundabouts where the risk of bus roll-over is deemed to be high; (Completed on 6 June 2014 for the first 29 identified locations)

(b) Calculate safe speed limits for all identified sharp bends and roundabouts based on technical assessment; (Completed on 27 June 2014 for the first 29 identified locations and on 13 August 2014 for the

thirtieth location at Pui Oi Interchange (Yuen Long direction))

(c) Validate the calculated safe speed limits by test drive; (Completed on 29 July 2014 for the first 29 identified locations and on 12 August 2014 for the thirtieth location at Pui Oi Interchange (Yuen Long direction))

(d) Review the safe speed limits based on the results of calculation and test drive; (Completed on 31 July 2014 for the first 29 identified locations and on 13 August 2014 for the thirtieth location at Pui Oi Interchange (Yuen Long direction)) and

(e) Develop communication plan so as to convey safety message on safe speed limits to all relevant [bus captains] (see the attached Communication Plan) and conduct speed checks."

Then there is reference to the file and then the email continues to say this:

"It is expected that the implementation of safe speed limits can take effect in October 2014 upon completion of action items addressed in items 1 [to] 3 of the communication plan."

The email which is addressed to Mr Edmond Ho, the managing director, and copied to a number of people, asks the managing director for his approval. So the

last entry is, "For your approval please".

We then see, at page 353, a response email from Mr Ho the very next day.

CHAIRMAN: Before you go on, Mr Duncan, one of the matters that the committee asked for in its letter of 8 August to the companies was the Excel soft copy, if it was available.

Has that been addressed in KMB's response?

MR PETER DUNCAN: My reading of the email is that it has been addressed, but I will ask the members directly.

CHAIRMAN: Can we have a direct answer? Were you able to locate this Excel file or not? If you would like to be referred to the question, I can ask that that be brought up on the screen. It's in the annex to the letter and it's at page 234, and is item 2. The general request made in the letter itself was if you've got them, please provide, and then this is the shopping list, as it were. Item 2 is the Excel soft copy and/or any hard copies.

MR LEUNG KIN WANG: Yes.

CHAIRMAN: Do you have it?

MR LEUNG KIN WANG: We have it.

CHAIRMAN: And are you going to provide it?

MR LEUNG KIN WANG: Yes.

DR NORMAN LEUNG: Chairman, I understand that hard copies have been provided to the committee.

CHAIRMAN: And by that, everything that's on the Excel soft copy we now have in hard copy? Do I understand you correctly?

MR GODWIN SO: We have printed out and provided on page 312 and 313. It's the print-out of the Excel file mentioned.

CHAIRMAN: Thank you.

MR PETER DUNCAN: So if we go back, please, to the emails, at the bottom of page 353 there's a response from Mr Edmond Ho, which is addressed to Mr Gary Wong, the sender of the earlier email, and also to Mr Owen Eckford, who was then the operations director.

Is Mr Eckford still employed by the company?

MR ROGER LEE: No.

MR PETER DUNCAN: When did he leave the company?

MR LEUNG KIN WANG: He left at the end of 2015.

MR PETER DUNCAN: Did that coincide with Mr Edmond Ho ceasing to be the managing director?

MR LEUNG KIN WANG: No.

CHAIRMAN: Edmond Ho had ceased to be the managing director at the end of 2014/beginning of 2015?

MR LEUNG KIN WANG: Correct.

MR PETER DUNCAN: Was the email copied to a number of persons, many of whom had been copied to the email from Gary Wong through to Edmond Ho? Do you see the ccs on

that?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: Thank you.

If we turn the page to page 354, does the response read as follows:

"Thank you and your team for the effort in coordinating this safety enhancement programme. Your proposed actions look fine with me. For formal approval, please ask [operations director] to check and endorse.

Many thanks!"

And there is a postscript to the message:

"By copy of this email, would [operations director] please check HSSQD's documents and communication plan, and then issue formal approval as you see fit. Thanks!"

Just to be clear, what is "HSSQD"?

MR LEUNG KIN WANG: Head of safety and service quality department.

MR PETER DUNCAN: Thank you.

Thank you. The next email --

CHAIRMAN: At that time, was that Mr Gary Wong?

MR LEUNG KIN WANG: Correct.

CHAIRMAN: Thank you.

MR PETER DUNCAN: The next email with which the committee has been provided is one sent some time later, on

6 April this year, and it's from a person called Aman Fong TQD to Louisa Leung IA. The heading is the same heading as was contained in the two emails I've previously referred to, namely "Safe Speed Limits for the 30 Identified Sharp bend and Roundabouts".

Now, what is the position of Mr Aman Fong?

MR LEUNG KIN WANG: She is a manager.

MR PETER DUNCAN: A manager of what department?

MR LEUNG KIN WANG: She is a manager of training quality assurance department.

MR PETER DUNCAN: Thank you. And Louisa Leung?

MR LEUNG KIN WANG: Louisa Leung is head of internal audit department.

MR PETER DUNCAN: This request -- the email reads as follows:

"Dear Louisa,

[Please] note.

Regards,

Aman."

Do you see that?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: It would appear that Louisa is being asked to note the emails to which I have just referred. Would that be a proper interpretation?

MR LEUNG KIN WANG: (Nodded head).

MR PETER DUNCAN: Then there is a subsequent email to which the committee has been referred 11 days later, on 17 April, from Louisa to Aman, the same heading, and this time the email reads:

"Dear Aman

It was noted that Edmond Ho asked Gary Wong to obtain [operations director's] formal approval for the exercise. Did you receive any subsequent email that suggest Owen have given formal approval to Gary on this topic?"

We have at the top of the page then another message from Aman to Louisa in response and a one-word answer, "No".

So it would appear from that that no subsequent email was received.

I'll take you back, if I could, to the construction of these events as it appears in the letter, at page 297. The author of this letter seems to have concluded that Mr Owen Eckford did not endorse this safety enhancement programme, but the committee, as I read it, has not been provided with any document which positively says that Mr Eckford did endorse it or did not endorse it or may even have failed to consider it.

Is there any further information available to the committee within the company's records which would

assist the committee in understanding what happened, particularly with regard to the actions of Mr Eckford, after the email of 15 August 2014 was sent by Mr Edmond Ho?

MR LEUNG KIN WANG: Not that I am aware of.

MR PETER DUNCAN: Has the company searched its records with regard to what may have happened between 15 August 2014 and 6 April 2018 which, according to the information we have been provided, is the critical period? Has the company looked for this information?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: Are you telling us that there is no written information available?

MR ROGER LEE: (Via interpreter) Let me put it this way. We have an internal audit unit. We have asked our head of internal audit to look at the safety and service department's work on such bends. The internal audit's report up to this date -- well, you have seen the relevant emails -- they are the information -- the latest information we have got.

MR LEUNG KIN WANG: (Via interpreter) We can take a look again but as Mr Lee says, that's all we have got so far.

CHAIRMAN: On its face, this is rather strange, is it not? The managing director of the company responds to the head of the safety department, he copies it to the

operations director, and he asks that he be asked to give formal approval, and the managing director doesn't leave the company for four months, at the end of the year, and you are saying that there is nothing that evidences the operations director doing anything, either endorsing it, not endorsing it? There's nothing at all?

It's a bit puzzling, isn't it? You agree? But you will look, will you?

MR LEUNG KIN WANG: (Via interpreter) Mr Owen Eckford left at the end of that year, 2015.

CHAIRMAN: Not the end of that year; it's the end of the following year.

MR LEUNG KIN WANG: (Via interpreter) Before he left, he didn't give any indication as regards this plan. I took up the safety section's work in April as the deputy operations director in 2015.

CHAIRMAN: I understand all of that. The only matter that I'm drawing to your attention is, on its face -- there may be some explanation -- when a managing director copies into an email the operations director, who is asked to give formal approval to what has obviously been an extensive research into a safety programme, and you tell the committee that there is nothing that evidences what he did, either way, endorsing it or rejecting it?

MR LEUNG KIN WANG: (Via interpreter) You might have noticed

that at that time, the MD, in replying to the email, mentions that it's subject to the endorsement of a communication plan. There was a communication plan worked out by us. Many officers of our companies talked to the bus captains in different termini. It was not warmly received. They had strong views, bus captains had strong views. I believe that's one of the reasons that the OD would have taken into account. Whether this was the cause of this rejection, it was not formally recorded.

CHAIRMAN: Yes. Mr Duncan.

MR PETER DUNCAN: Did you yourself, Mr Leung, participate in those discussions with the bus captains?

MR LEUNG KIN WANG: No.

MR PETER DUNCAN: Was this before your time as operations director?

MR LEUNG KIN WANG: Before my participation.

MR PETER DUNCAN: So in that respect you are telling the committee what your understanding is of the situation?

MR LEUNG KIN WANG: Correct.

MR PETER DUNCAN: Is there anybody in the group who was there in 2014 who can speak to what happened?

MR LEUNG KIN WANG: Not in --

CHAIRMAN: Yes, of the seven of you.

MR LEUNG KIN WANG: Somebody else.

CHAIRMAN: Well, if it's appropriate, and if you wish, Dr Leung, for that person to speak to the matter, we will gladly receive evidence from him or her.

MR LEUNG KIN WANG: Kelvin.

MR PETER DUNCAN: As a matter of interest, is Mr Eckford still resident in Hong Kong, as far as you know?

MR LEUNG KIN WANG: No.

MR KELVIN LEUNG: (Via interpreter) Thank you, Chairman. As I replied to some other questions in the previous meeting --

CHAIRMAN: For the record, please identify yourself. We know who you are but the record doesn't.

MR KELVIN LEUNG: Kelvin Leung, assistant manager of operations.

(Via interpreter) From Tuen Mun depot.

CHAIRMAN: This is a matter that you dealt with in your evidence before, is it not?

MR KELVIN LEUNG: (Chinese words not interpreted).

CHAIRMAN: Sorry, I didn't get a translation of that. Would you repeat your answer?

MR KELVIN YEUNG: (Via interpreter) I'm Kelvin Yeung, assistant manager of operations at the Tuen Mun depot.

CHAIRMAN: The question that you were asked by me was: this is a matter that you dealt with in your evidence before, was it not; and your answer?

MR KELVIN YEUNG: (Via interpreter) Correct.

MR PETER DUNCAN: At the risk of repetition, Mr Yeung, could you assist us as to why it might have been that apparently this plan was not carried through?

MR KELVIN YEUNG: (Via interpreter) At that time, I received a document which was shown in the PowerPoint. It showed the locations of the 29 bends and the suggested speed limits. At that time, I was involved in talking to bus captains in the bus termini. As part of my day-to-day communication with them, there was --

MR PETER DUNCAN: Just to interrupt you, what was your position at that point exactly?

MR KELVIN YEUNG: (Via interpreter) I was a senior operation officer. I was responsible for the Tuen Mun depot as well. So I went to the bus termini to talk to bus captains.

The message I received from them was that it was not feasible, the plan was not feasible; they could not remember the speed limits of different bends in performing driving. That would bring a lot of pressure to them. If they remember things incorrectly they might be subject to punishment. That's what they told me.

I also relayed the message to my supervisor at that time.

MR PETER DUNCAN: Thank you. Who was your supervisor?

MR KELVIN YEUNG: (Via interpreter) The general manager of Tuen Mun depot, Mr Woo Kin Keung.

MR PETER DUNCAN: Is he still with the company?

MR KELVIN YEUNG: (Via interpreter) He has retired.

MR PETER DUNCAN: It is apparent from the material that the committee received that this plan was at some point discontinued; it was not carried out. Are you able to assist the committee as to who made the decision not to continue with the plan?

CHAIRMAN: And if you don't know the answer, don't speculate.

MR KELVIN YEUNG: (Via interpreter) I do not know.

MR PETER DUNCAN: Thank you.

CHAIRMAN: Thank you, Mr Yeung.

MR PETER DUNCAN: Leung, if I can go back to you, do I understand there is going to be a further search among the company's records --

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: -- in order to assist the committee to find out who apparently made a decision to discontinue with this plan and the reasons for that discontinuance?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: As a matter of interest, would there not be, on the company's computer, copies of all emails sent or received by Mr Eckford in the course of his work at

the company in 2014? Would you expect that information to be available?

MR LEUNG KIN WANG: I'm not too sure.

MR PETER DUNCAN: Thank you.

CHAIRMAN: Perhaps that's another matter that you could provide an answer to when you do this search, if those that would know what your record preservation system is could provide us with that information.

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: Thank you, Mr Leung. I am going to move to another topic now, but I am going to go back to one matter which was dealt with on Tuesday. This relates to the speeding report that we have been provided with, which we will find in KMB-9 at page 3993.

The translation appears at page 3995-1.

I think it was Mr James Wong who assisted the committee with regard to this report on Tuesday. There are just some matters I would seek some clarification upon, if I could, Mr Wong.

During your evidence on Tuesday -- and we can see this, I will just give you the reference for everybody's benefit; it's Day 12 and the transcript reference is pages 134 to 135 -- you provided the committee with thresholds relating to the generation of this report.

So breaking it up between the 50-kilometre zones and

the 70-kilometre zones, you told us that for the 50-kilometre zones, the report will capture those buses that were travelling at three different speeds and different durations. The first speed was speeds between 56 and 65 kilometres per hour for 30 seconds; then 66 to 70 kilometres per hour for 15 seconds; and then 76 to 79 kilometres per hour for 2 seconds.

Then we had a similar sort of breakdown for the 70-kilometre zones. The report would capture those buses which were travelling at, first of all, 76 to 79 kilometres for 30 seconds; secondly, over 80 kilometres per hour for 2 seconds. They are the thresholds that you gave us.

I also understand from your evidence that the black box was at that time not capable of identifying different speed limits on different roads in generating real-time alerts to the drivers. In other words, the black box could not tell whether the speed limit on a particular road was 50 kilometres per hour or 70 kilometres per hour, so therefore the threshold for the driver to be alerted was simply set at 75 kilometres per hour, and then you also told us that that had been reduced to 70 after the accident at Tai Po.

So is my understanding correct so far?

MR JAMES WONG: Correct.

MR PETER DUNCAN: Thank you. One of the explanations given, I think, was that this was because, at that time, in fact before 7 June 2018, the company did not possess the digital mapping which was available through the Transport Department?

MR JAMES WONG: Correct.

MR PETER DUNCAN: Thank you.

With all that in mind, and going back to this report, if the black box data does not tell you whether the bus is in a 50-kilometre zone or a 70-kilometre zone, how is it that this exception report is able to distinguish or pick out a bus which is speeding above the limit in a 50-kilometre zone?

MR JAMES WONG: (Via interpreter) This is exactly why we needed time in order to make available this report. We would know the additional information, but our depot would have to use another computer program to check whether that is a 50-kilometre zone or a 70-kilometre zone, so that we could know whether the bus was in a 50-kilometre zone or 70-kilometre zone, so that we would have this report which you have now, so that I can check which bus captain, at what time, at what location, sped.

MR PETER DUNCAN: So do I understand correctly this report has only been prepared very recently?

MR JAMES WONG: (Via interpreter) This is a report formulated on 1 May 2018. It was rather recent.

CHAIRMAN: By what means is the place at which the bus is identified doing a particular speed identified?

MR LEUNG KIN WANG: (Via interpreter) At present, we look at the route of the bus. We, on our own computer system, have mapped the places for every route. How can we identify the location? We will look at the time, at the material time, and also the hourly speed of the bus. That is why this takes time for our staff to use the relevant software to tackle it.

MR PETER DUNCAN: How long have you been able to produce this sort of report? Since when?

MR LEUNG KIN WANG: (Via interpreter) We started to have this kind of black box in 2013 and we already had this kind of report; we use the same way to do it.

MR PETER DUNCAN: You said that this report was produced on 1 May this year. Were these sorts of reports being produced at the time of the Tai Po accident?

MR LEUNG KIN WANG: (Via interpreter) This report was done on 1 May, but then this type of report, this type of exception report, had always been produced. We started to have this kind of exception report in 2013, and we could know whether the bus captain sped in 50km or 70km zones.

MR PETER DUNCAN: How long after --

CHAIRMAN: Would you just give me a moment, Mr Duncan.

MEMBER LO: Can I ask you a question?

MR LEUNG KIN WANG: Sure.

MEMBER LO: Now, if the bus is speeding at 67.9, you should know that it was speeding beyond 50; right?

MR LEUNG KIN WANG: (Via interpreter) Correct.

MEMBER AUYEUNG: So in your company record, you should have a record of this segment is set a speed limit of 50; right?

MR LEUNG KIN WANG: (Via interpreter) Correct.

MEMBER LO: So you didn't need the TD's digital map to know that you have different speed limits for different sections of your routings?

MR LEUNG KIN WANG: (Via interpreter) That is what we judged according to our own knowledge. So we judged which zone was 70km or 50km. Our staff had to do this manually that this particular section was 50km or another section 70km and we had to do it every day. If there are new road sections, we will have to update our own records, and if there are new routes or if there is diversion, we will have to update the records ourselves. This is what we have to do. Even if we have these speed limits for different road sections, we will still have to verify that with the black box data so that we know

whether speeding happened in 50km or 70km zones.

MR ROGER LEE: (Via interpreter) Maybe I can supplement. Actually, black box data will let us know the speed of the vehicle and the locations, but we will not know whether there has been speeding. From the start to the end of the journey, the black box will record the time at any X, Y, Z location and the speed that was used, and when this comes back to the company we have a system: knowing the speed limit of a particular road section, we superimpose the black box data on that, so we will know whether there has been speeding.

But it takes a long time because we have over 400 routes and you have two directions for each route and there are many, many buses running on these routes. That is why it takes a long time.

As to your second point, the black box is two systems. The black box company can use a physical map and they can take the speed at any X, Y, Z location. This is what they can do but this was not done at that time.

Secondly, the black box companies have suggested that if there can be a digital map, a live map, like the one from TD, if it has been installed, then the time could be much shortened. I think this is what Mr Leung was trying to say.

CHAIRMAN: Perhaps I can recapitulate. The black box that we can see, looking at it now, tells you the latitude and longitude. I think you call that X and Y.

MR ROGER LEE: Correct.

CHAIRMAN: The latitude and longitude is what it's described by a short form.

That tells you where the bus is. At that point in time, because you get every one second a report of speed, you know what the speed of the bus is. The third step you take is to work out what the speed zone or limit is for that area.

MR ROGER LEE: Yes.

CHAIRMAN: So location, speed and then speed limit, and that is done manually because you hadn't found out about digital maps.

MR ROGER LEE: Yes.

CHAIRMAN: How many people have you been employing doing this manual job when it could have been done by digital map automatically?

MR ROGER LEE: 37.

CHAIRMAN: There's your cost-cutting.

Yes, Mr Duncan.

MR PETER DUNCAN: Just to clarify, at the risk of some repetition: when did the company start producing these sorts of reports, that distinguished between the 50 and

the 70 kilometre per hour?

MR LEUNG KIN WANG: (Via interpreter) We had it since an early time. I have been told by some colleagues that we started to have this in 2007, but at that time the black box data were not as detailed, and in 2013, with this latest type of black box, we gathered more data and therefore we can conduct a more detailed analysis.

MR PETER DUNCAN: So, if a bus driver exceeded a 50-kilometre speed limit on the first of the month, when would the report be compiled in order for you to conclude that? How much later?

MR LEUNG KIN WANG: (Via interpreter) At present, it would take four days for the report to be produced, and Mr Wong would have received the same report, and Mr Wong would deal with it.

MR PETER DUNCAN: Previously, how long did it take?

MR LEUNG KIN WANG: (Via interpreter) Ten days, and in the more distant past, 14 days. In 2007, it would take even longer. At that point, the data from the black box were not transmitted through the server, and the physical downloading was required, so the time taken would be even longer.

MR PETER DUNCAN: This is what the 37 people have been working on?

MR LEUNG KIN WANG: (Via interpreter) Maybe more, if for

downloading of data, you will have to do it on board individual vehicles, so it may involve thousands of buses and many people at the repair/maintenance section. It's a very tedious task. So more than 70 people would have been involved. More than 37 people would be involved.

MEMBER LO: Let me ask a question. So this 14 days or four days' delay would prevent basically real-time operations; right? If a driver taps in using his ID and the record is put into the black box, so this information is instantaneous, there's no need to go back 14 days or four days to match it. Isn't that a very simple solution to fix it?

MR LEUNG KIN WANG: Correct, correct, (Chinese words not interpreted).

MEMBER LO: Why isn't that done?

MR LEUNG KIN WANG: (Via interpreter) We are moving towards the same direction so we can have the black box data transmitted by the bus captain. One of the items in our submission to the committee is on this geo-fencing element. That is we will store the information of the bus captain in the black box as well. So we have a record pertaining to the bus captain and we will know on a second-to-second basis which bus captain is driving the vehicle.

CHAIRMAN: That is not done at the moment?

MR LEUNG KIN WANG: No.

CHAIRMAN: The black box does not record the fact of the Octopus card of the captain logging on to take charge of that bus?

MR LEUNG KIN WANG: No.

MR ROGER LEE: That's why it takes at least ten days previously.

CHAIRMAN: If you can do it briefly, how is the identity of the bus captain established? You've got the bus number, you've got the speed, you've got the location, you manually work out the speed limit. How have you been and do you at the moment establish the identity of the driver?

MR LEUNG KIN WANG: (Via interpreter) It's not currently done, so we need to match the black box data with the terminus records, because through the terminus records we know which bus captain drove whatever bus in respect of whatever route at the particular time. Then we match the time of the records with the black box data, because the black box does record time, and then we know at a particular time that that bus was driven by a particular bus captain.

MR ROGER LEE: (Via interpreter) Simply put, you have some data from the black box and you have some records from

the terminus which is a separate system. Then we have the fleet management records. The terminus records are about the bus captains, the fleet management records about the vehicle, and then we would have to match the three sets of data to make the identification. So it takes a long time.

CHAIRMAN: Is the terminus record done automatically through a computer by use of the Octopus card of the captain?

MR LEUNG KIN WANG: (Via interpreter) Yes. That's one of the inputs.

CHAIRMAN: Yes, Mr Duncan.

MR PETER DUNCAN: Thank you, Chairman.

I want to move slightly onwards now to another topic, not unrelated to this. That's the topic of real-time monitoring of the bus captains.

Just so it's understood what I mean by this, can I take you back to the evidence of the gentleman from Openmatics, Mr Kulis, which we will find on Day 6 at page 158.

That would be bundle 3, Mr Chairman.

CHAIRMAN: Thank you.

MR PETER DUNCAN: If I could ask you to turn to line 14 on that page, where Mr Chan, counsel for the commission, asks Mr Kulis this question:

"Now if the data is capable of being transmitted and

received at, say, 5-second intervals, does your company provide the technology either in hardware or software to facilitate real-time monitoring of the data collected by the black box?"

And his answer is, "Yes".

Just to put this in context, you have told us at the moment, I think, that the data is provided at 30-second intervals, but it can be reduced down to 5 seconds? Is that a correct understanding?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: Thank you.

Mr Chan continues:

"So let me see if I get this right. Your company supplies the black box, it collects the data, and the system is able to transfer that data, say, every five seconds, to a defined server?

Mr Kulis: Mm-hmm.

Mr Derek Chan: So as a supervisor, I'm sitting in my office, how do I monitor the driver, real-time? Do I need additional software, or does your company already provide the software for me to do so?

Mr Kulis: There are two options, we can provide our software solution, which consists of the Openmatics portal and additional applications on the server side. That is one option, but some customers they are

preferring just to get the data, and they have their own IT systems behind. In that case we are just the data provider and we don't care about the utilisation or operating of that. Utilising that.

Mr Derek Chan: In this case, KMB, is it the case that ZF only works as, as you describe it, a data provider, or are you aware of any more advanced use by [Kowloon Motor Bus] of your company's real-time monitoring capabilities?

Mr Kulis: I think in this case [Kowloon Motor Bus] is the customer, at the current moment, they are using their own IT system to handle the data and work with the data. But, yes, it's by agreement, we can also change it if we want.

Mr Derek Chan: I see. In your experience, how common is it around the world in terms of commercial fleet management for the company to monitor the driving behaviour of its drivers real-time? How common is that?

Mr Kulis: I think this is quite a common request. Both from the safety and economic reason, the companies usually want to monitor the drivers. In some countries there is the conflict with the law regulation and protecting the driver safety, like in the West European countries, sometimes it is not so easy to introduce monitoring system, but the demand is always there."

So that's the context in which I want to explore this matter a little further with you, if I may. I want to take it further firstly by referring you to KMB-4, at page 1202. This is an extract from the 2013 annual report. We have seen one of these before.

CHAIRMAN: Of KMB?

MR PETER DUNCAN: I think the holding company, first of all.

CHAIRMAN: Yes.

MR PETER DUNCAN: And then Kowloon Motor Bus Company and in fact a number of other subsidiaries also of the listed company.

CHAIRMAN: Thank you.

MR PETER DUNCAN: So if we look down the list of key corporate executives in the Kowloon Motor Bus Company, you will find the name of one Alok Jain, head of planning and development department. Is that a name which is known to some of you?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: We can see the position that he held at that time.

Are you aware that Mr Jain has provided evidence to the committee?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: In that respect, I'm going to ask you to turn up, please, bundle FE-1 at page 40. In fact, the

document I wish to show you commences at page 39 of that bundle, and it's a submission that the committee has received from Mr Jain.

Have you had the opportunity of reading this submission?

MR LEUNG KIN WANG: Briefly, yes.

MR PETER DUNCAN: Thank you.

If you have read it just briefly, perhaps I could bring your attention, please, to page 40, paragraphs 2 and 3. Perhaps for the benefit of others than you and me, I will read those paragraphs out.

Mr Jain says in paragraph 2:

"Real-time Operational Management (ROM) System was a by-product of installation and telematics devices on board the buses, which has been ongoing by the time I joined the organisation.

a. I was involved in many meetings and discussions about the technical specifications, features, technology selection and so on in relation to ROM right after I joined the company. I was not involved in discussions related to funding, tendering and project management. I also cannot remember when exactly the decision to implement was undertaken but was aware that project implementation was in progress. The primary reasons to implement the project were --

(i) Improve safety -- through real-time alerts and feedbacks to bus captains;

(ii) Improve fuel efficiency -- through enhanced driving behaviour and performance management; and

(iii) Deliver reliable bus services -- through active management of deployment and incident/disruption management.

b. There were extensive discussions on type of vehicle and driver performance parameters that will be monitored through this ROM system including their potential benefits. As the telematics data was still available even after the scrapping of the project, there was some level of monitoring but the real value of ROM system was 'real-time' and this capability was sacrificed. This was analogous to a port mortem ..."

I will leave out that sentence.

Then item (c):

"I was not much involved in the discussions pertaining to exact cost implications of the project but through meetings and discussions, was under the impression that the project was planned to deliver a positive ROI.

3. Many, if not the most, of the bus companies in the developed world today deploy same or similar functionalities as [Kowloon Motor Bus] had envisioned in

the ROM system. Even at the time when KMB was drawing up the plans, we were drawing heavily on the experiences from Seoul, Singapore, London and Munich. Media reports or company announcements from other cities have shown clear benefits of such systems in terms of safety, fuel efficiency and driver behaviour. In New Zealand [and the source is the GreenRoad.com website] bus companies achieved 4 per cent reduction in fuel consumptions and 81 per cent reduction in speeding infringements. Tower Transit in Singapore achieved more than 7 per cent fuel savings, and halving of 'incidents' of poor driving behaviour. Accidents from collisions fell by half, while accidents caused by bus drivers plunged by 70 per cent."

So that's the information that Mr Jain provided in writing to the committee. Mr Jain has also given evidence to the committee -- I will simply give you the reference in the bundles; it's transcript bundle 8, and on this topic --

CHAIRMAN: I think it's bundle 3, is it not?

MR PETER DUNCAN: I see. It's Day 8 -- bundle 3, I beg your pardon -- and it runs for some pages, 81 to 98.

By the way, have you had the opportunity of reading that evidence, Mr Leung?

MR LEUNG KIN WANG: Yes, in Chinese.

MR PETER DUNCAN: Thank you. So I won't take you through it, but it amplifies what Mr Jain had said in this submission, which was to the effect that the company had considered a project which would involve real-time monitoring, but according to Mr Jain, that project was scrapped.

So what I would like to ask first of all is: do any of you recall discussions pertaining to the possibility of real-time monitoring?

MR LEUNG KIN WANG: (Via interpreter) ROM means real-time operations management system. It's not a real-time monitoring system.

MR PETER DUNCAN: So it doesn't live up to its name?

MR LEUNG KIN WANG: (Via interpreter) It is an operations real-time management system. It is about bus operations management. It has nothing to do with driving safety.

MR PETER DUNCAN: First of all, was there a real-time monitoring system considered by the Kowloon Motor Bus Company at some point, referred to by Mr Jain?

MR LEUNG KIN WANG: (Via interpreter) This is what we have now. This is the on-board driver's alert and driver's feedback. On board buses, there is a real-time alert to bus captains.

(In English) Speeding, when he applies brakes suddenly or with sudden acceleration.

MR PETER DUNCAN: Right. Are you aware that the company at one stage considered the type of system that Mr Kulis referred to in his evidence?

MR LEUNG KIN WANG: (Via interpreter) I had knowledge that there was this intention. I knew about it and I also asked ZF that we should have real-time alert to bus captains, that there should be a two-directional communication in order to have real-time alerts sent to bus captains about their behaviour. But at that time, the starting point is not about safety but about keeping distances between vehicles. This is just really for bus operation.

MR PETER DUNCAN: So you can see what Mr Kulis has referred to, and that's the concept of somebody receiving information, seeing that a driver is speeding or seeing that he's braking sharply or that he's accelerating, and then making instant communication to the driver as to his driving behaviour. That's what Mr Kulis is referring to.

Has the company had a project to consider that sort of facility?

MR LEUNG KIN WANG: (Via interpreter) No.

MR PETER DUNCAN: Never?

MR LEUNG KIN WANG: Never.

MR PETER DUNCAN: So your understanding of what Mr Jain was

saying in his letter and his evidence, what is your understanding of what he was referring to?

MR LEUNG KIN WANG: (Via interpreter) I believe he was talking about our real-time operations management system.

MR PETER DUNCAN: I think, in that case, I will have to refer you to some of Mr Jain's evidence explicitly.

Could I refer you, please, to Day 8, bundle 3 of the transcripts, at page 86.

Can I bring your attention, please, to line 9 of page 86.

CHAIRMAN: May I suggest that we begin at the top of the page, because this might explain the marriage between the two, the bus grouping and another use that might be made of the data.

MR PETER DUNCAN: Certainly, Mr Chairman. So we go to line -- is Mr Chairman referring to page 85 or page 86?

CHAIRMAN: You might begin at page 85. I think that puts it into context.

MR PETER DUNCAN: Yes.

So line 2, Mr Leung, at page 85, Mr Jain says this:

"So until then, a lot of data in [Kowloon Motor Bus] was residing in silos in individual departments. They were collecting -- for example, engineering information was available in engineering, operational information

was available in the operations department, and they were all in different systems. The plan was to put this all into a single data warehouse and create a single version of truth.

Chairman: What use was to be made of the data contained in this single data warehouse?

Mr Jain: So there were three stages. The first stage was to establish the static, what is real, what is happening on ground. The second stage was to put into some level of modeling, where we could use it for planning purposes, in short term. And the third objective, eventually, was to take it into a predictive level, where we could apply statistical tools and do some forward projections.

Chairman: What use was to be made of the first step, the real-time?

Mr Jain: That was primarily for management information purposes, as well as for any investigations, reporting, so on and so forth.

Chairman: Investigations into what?

Mr Jain: For example we used to receive a lot of passenger complaints about services, we could go back and look into the data and verify that information.

Chairman: So if the complaint had been made that the bus had been driven at an excessive speed and braked

harshly, could that be investigated by analysing the data that had been put into this single data warehouse?

Mr Jain: Potentially, yes.

Chairman: That's a response to a complaint. Was there any plan to use the data proactively?

Mr Jain: So the second stage was where we went into real-time operations management system, because once we built the data models on the historic data we could translate the similar level of information and analyse on a real-time basis, and the idea was of course to monitor the whole operation on a real-time basis using what we normally call an exception management, where anything that goes beyond the threshold of normal operation you start to actively manage it.

Chairman: How was it envisaged, if it was, that this approach could address the manner in which a bus was [being] driven?

Mr Jain: For example, if any bus that was being driven beyond the parameters that were set as normal operation, then it would raise an alert, and normally the companies, or examples that I have seen around the world, they use this green, amber, red approach. So green is normal operation, anything that goes on the outlines of threshold boundaries it starts to raise the alert [is] an amber, and then of course once it crosses,

it is a red alert. So at that time some intervention is necessary.

Chairman: Was it envisaged that this alert raised by a parameter being breached could occur real-time?

Mr Jain: The intent certainly at that time was that."

Now, that's the passage that I was referring to. What sort of system do you understand Mr Jain to be referring to in that respect?

MR LEUNG KIN WANG: (Via interpreter) This is not in our present system.

MR PETER DUNCAN: Is that something which you understand to be the equivalent of the real-time monitoring system that Mr Kulis was referring to?

MR LEUNG KIN WANG: No.

MR PETER DUNCAN: What's the difference?

MR LEUNG KIN WANG: (Via interpreter) ROM is real-time operations management. It is about deployment of buses. This has nothing to do with driving safety of bus captains.

MR PETER DUNCAN: It would seem that Mr Jain understood it differently. Is that correct?

MR LEUNG KIN WANG: (Via interpreter) I agree.

MR PETER DUNCAN: When he says that the project, as he understood, was scrapped, do you recall a project being

started but then being scrapped?

MR LEUNG KIN WANG: (Via interpreter) It was never scrapped. This project started in October 2014. It has never been terminated. It's ongoing.

MR PETER DUNCAN: In that context, just to be absolutely clear, what do you say "this project" is?

MR LEUNG KIN WANG: (Via interpreter) This is about the real-time operation management system by using the black box and the availability of real-time location information, so that we can be more efficient in bus deployment.

CHAIRMAN: In what way?

MR LEUNG KIN WANG: (Via interpreter) For every route, the buses at different locations, frontline people, including the regulator, the officers, will know the locations of the buses at any time. When there's traffic congestion, some of the buses might be stuck in certain location. Such information will allow us to do a better deployment, because we would know that some of the buses might not be able to return very quickly, so deployment can be arranged in a more efficient manner.

That's the core of the facility of this real-time management system which would facilitate the work of our officers.

MR PETER DUNCAN: Just before we take a break, if I could

return to Mr Kulis and what he was referring to in the earlier passages to which I brought your attention. That's Day 6, page 158, the same bundle 3.

Are you there, at page 158?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: I brought this to your attention earlier, but at line 25, Mr Chan is asking him questions about this situation:

"So as a supervisor ... [sitting in his office monitoring the driver real-time] ..."

And implicitly in that, if he sees a problem, communicating with the driver, he says, "You need to change the manner in which you're your driving", that sort of system.

First of all, that sort of system is quite different, is it not, to what you had just been adverting to?

MR LEUNG KIN WANG: (Via interpreter) Correct.

MR PETER DUNCAN: I don't want to confuse terms. If I could refer to that as "real-time driver monitoring". Mr Kulis has referred to the fact that this is quite commonly used in other parts of the world. Have you seen that in his evidence?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: Is this something which Kowloon Motor Bus

has given consideration to?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: What is its position with regard to this? Because obviously Kowloon Motor Bus does not apply this system at the moment. What is the company's position?

MR LEUNG KIN WANG: Not practical.

MR PETER DUNCAN: So you have considered it and decided against it; is that the position?

MR LEUNG KIN WANG: Correct.

MR PETER DUNCAN: Could you explain to the committee why it is not practical?

MR LEUNG KIN WANG: (Via interpreter) It would mean a lot of pressure for bus captains, and we may not have a system that can deal with so many bus captains at the same time. We have also consulted ZF and Openmatics, and the conclusion was that it was not practicable.

CHAIRMAN: When were these consultations?

MR LEUNG KIN WANG: (Via interpreter) They were some time ago.

CHAIRMAN: Try and help us a bit more than that. When?

MR LEUNG KIN WANG: (Via interpreter) It is not very formal discussion. We did talk to them, especially to Openmatics.

CHAIRMAN: When?

MR LEUNG KIN WANG: (Via interpreter) It is not by me. My

colleagues discussed the matter with them. We were aware of that.

CHAIRMAN: Who?

MR LEUNG KIN WANG: I can't recall now.

CHAIRMAN: Let me give you some time to recall while we take a break.

MR LEUNG KIN WANG: Okay.

CHAIRMAN: We will take a break for 20 minutes.

(11.36 am)

(A short adjournment)

(11.58 am)

CHAIRMAN: Yes, Mr Duncan.

MR PETER DUNCAN: Thank you, Mr Chairman.

Mr Leung, do you have any further information for us as to who it was who spoke to Openmatics on this issue and when that was?

MR LEUNG KIN WANG: (Via interpreter) I asked my colleagues to try to understand the situation. It was proposed that a supervisor could use a software to monitor the performance of each bus captain. We found that it was not practical. We will not take this further. We talked to ZF about another thing. In other words, having one supervisor watching over bus captains, we think that is not practicable because we have 4,000 bus captains. We cannot have that number of supervisors to

watch over 4,000 bus captains.

CHAIRMAN: What did you talk to ZF about?

MR LEUNG KIN WANG: (Via interpreter) Our design with ZF was how to transmit the real-time data to our company and how our company's data can produce real-time maps of where our bus captains are at any time so that we can have more efficient real-time operations management. That is the objective of designing the ROM at that time.

MR ROGER LEE: (Chinese words not interpreted).

CHAIRMAN: When were these discussions?

MR LEUNG KIN WANG: (Via interpreter) It was in 2013. When we started to install black boxes, we were aware of how these black boxes would function.

MR ROGER LEE: (Via interpreter) I would like to supplement here to what the operations director has said. There are two views on how to manage the fleet real-time. One is that there would be a central management system knowing how the vehicles are doing on the roads and then a central control room can communicate with the bus captains so that the buses would be at a suitable distance from one another to ensure smooth operation.

But there is a big problem here. The real situation on the ground, unless you have very accurate information about the road conditions with a lot of CCTV monitoring the journey, because we are not a railway company, and

the communication with the bus captain would be a problem because they are already facing a lot of pressure on the road. So that's a worry.

Now we have the data, and then at the back end we have the TER system, involving the regulators, the frontline staff at the bus termini. These people know the road conditions on the ground. When the bus captain reaches the terminus, of course the staff there know to what extent there has been a delay, then maybe something has to be done to catch up. It's more people-oriented as a management approach.

Bus is different from railway. It would be difficult to have a central control system to manage 4,000 bus captains on the roads. But the data provided by Openmatics can facilitate the work of the back-end operation, but it is not about a system of managing 4,000 bus captains.

CHAIRMAN: Yes. I think we've got that point; you have made it about three times.

Thank you, Mr Duncan.

MR PETER DUNCAN: Thank you, Chairman.

Mr Lee, I am sorry, but I had the impression before the break that with regard to the real-time driver monitoring system that Mr Kulis was talking about -- I had the impression from you that somebody in the

company had spoken to Openmatics about that. Are you saying that that has actually not happened?

MR LEUNG KIN WANG: (Via interpreter) We did discuss with Openmatics about their black box. As regards the software that would enable a supervisor to manage the fleet, that was not discussed and we will not consider doing that.

MR PETER DUNCAN: So you have decided against a real-time driver monitoring system because it is not practical?

MR LEUNG KIN WANG: (Via interpreter) If we have a system whereby a supervisor would be monitoring the bus captains, we are of the view that it is not practicable. If you take a look at ZF's reference to Western countries, and then also for safety or commercial reasons some of them have done this. We have had some internal discussions. It's about whether we can retrofit some vehicles to do the same, for example vehicles to transport the coins or fueled vehicles, we will consider whether those can be refitted to do the same.

But we are not talking about buses, and he was also talking about much smaller bus companies, not the bigger ones like us.

CHAIRMAN: Who is "he"?

MR LEUNG KIN WANG: (Via interpreter) It's in the evidence,

the representative of Openmatics.

CHAIRMAN: I see. You are referring to Mr Kulis, are you?

MR LEUNG KIN WANG: Correct.

CHAIRMAN: Thank you.

MR PETER DUNCAN: I'm sorry to have to go back to Mr Jain's evidence, Mr Leung, but with regard to the project that he described and in respect of which you seem to have a different understanding from Mr Jain, were you involved in that project to which he refers?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: I need, I think, to take you to another part of his evidence, at Day 8, which will be in bundle 3, and this time at page 89.

Before I take you to the evidence, perhaps you could just describe to members of the committee what your involvement in this project was.

MR LEUNG KIN WANG: (Via interpreter) This project was considered in 2013. I was responsible for bus maintenance at that time. I participated in some of the presentations. It's because of the availability of black box as a technology to help the company to develop the bus operations. At that time, the company also engaged a consultancy firm, and some recommendations were made to KMB. I was responsible for managing people in maintenance and repair, but I was also involved in

some of the presentations and I knew about the concepts behind and how real-time information could be made use of to facilitate operations.

After I took over as operations director, I knew the relevant programme in much more detail, and in 2016, when I formally took over as head of operations, I knew that there was a real-time operation management system which was ongoing. I realised at that time that there were real-time maps to show the locations of buses which would facilitate the deployment of our fleet. It was in January 2016 when I took over as head of operations.

At the same time, I realised that the project would involve another function, that is a substitute for TER, a substitute of the function of the TER system. The TER is about the operations at the bus termini. When a bus captain arrives, he would report for duty and start the driving duty and then when he returns he also reports to the terminus and we will know the time of arrival and then the regulator can do the deployment duties based on the information collected.

One of the proposed ROM functions was to replace the TER, in that there will be a central control room to remotely deploy bus captains and assign duties to different routes and to adjust the headways, the frequency of service, and also to receive reports from

bus captains regarding breakdowns, accidents, and matters relating to passengers. Under the proposed design, it would be centrally managed.

MR PETER DUNCAN: Thank you, Mr Leung.

I want to bring to your attention, please --

CHAIRMAN: Before you do that, Mr Duncan, before you pose that question -- Mr Leung, in the course of your answer, you said that the issue of the availability of black box data was considered and consultants had been engaged. What were they asked to do?

MR LEUNG KIN WANG: (Via interpreter) He was asked to look into service delivery and service enhancement and to make recommendations.

CHAIRMAN: Would that include avoiding, for example, bunching up of buses? Is that what he was engaged for?

MR LEUNG KIN WANG: It's consultant services for operations transformation.

CHAIRMAN: But dealing with service issues like bunching up of buses?

MR LEUNG KIN WANG: Yes.

CHAIRMAN: Thank you.

Yes, Mr Duncan.

MR PETER DUNCAN: Thank you, Chairman.

The portion of Mr Jain's evidence to which I wish to bring your attention, Mr Leung, is at page 89 of the

transcript, Day 8. I think you have that in front of you.

At line 14, Ms Wong, counsel for the committee, asks this question of Mr Jain:

"Is it the case that throughout the time you joined the company until the time you left, you were involved in this ROM project?

Mr Jain: I wouldn't say until the time I left, but during that period when it was being discussed as a part of implementation process, yes, I was involved in the project very actively.

Ms Wong: And I notice in (i) of that paragraph (a) you stated that the primary reasons to implement the project were to improve safety through real-time alerts and feedbacks to bus captains.

The feedbacks to bus captains, can you tell us whether it is intended to be real-time feedback or a reactive feedback to bus captains after the complaint has been received.

Mr Jain: There were two things that happened. The idea was to develop a two-way communication system between the bus itself and the operation control centre, and the bus drivers were supposed to have what we call a DDU, driver display unit, and through this DDU there are two ways to intervene with a driver. One is done at

the bus level where the bus, you can pre-programme the parameters that bus -- any time transcends, it creates an alert for the driver.

The second level of alert could be triggered by somebody sitting in the operation control centre. Let's say, for example, if a bus is running too fast, but still within the speed limit, and the on-board device does not detect any anomaly. However, at the OCC, a supervisor detects that on a particular section the bus driver, probably because of weather conditions or because of any accident or road conditions, they should be driving slower, then a supervisor can technically intervene and alert the driver or remind the driver to go slow in that section.

So there are two levels of interventions that can be done.

Chairman: On the second intervention, that is the supervisor in the OCC, how would he communicate his intervention to the driver?

Mr Jain: So we had many options being discussed at the time. We were talking about just a display system. The second was we were also talking about an audio system.

Chairman: So there were two possibilities. One was through the display system or otherwise by audio?

Mr Jain: Well, display was almost there, and audio was considered as an additional possibility.

Chairman: Was audio going to be by radio or by some other means?

Mr Jain: Primarily by radio, or even 3G communication. We had not gone that far, I think, at that time.

Ms Maggie Wong: You mentioned there were many meetings or discussions about this ROM features. Can you recall if there are minutes or documents recording what was discussed?

Mr Jain: There were a lot of presentations, if I recall, and there were e-mails post meeting summarising what was discussed, the key agenda, or key tasks to be [borne] by respective people. But as formal minutes, as we know them, I cannot recall if they were prepared."

Now, you see that evidence, Mr Leung. It would appear that Mr Jain's description of the project is totally at odds with your understanding of the project. Is that correct?

MR LEUNG KIN WANG: Correct.

MR PETER DUNCAN: Do you have any idea of any project that was being undertaken in the company with regard to the type of response to the drivers to which Mr Jain was referring?

MR LEUNG KIN WANG: (Via interpreter) Right now we don't have any such project going on. At present, the ROM does not have this function.

CHAIRMAN: You were asked about at that time, when Mr Alok Jain was in the company. Was there any such project going on that you are aware of, perhaps not the one you've told us about?

MR LEUNG KIN WANG: No.

MR PETER DUNCAN: Mr Jain at line 19 on page 91 has referred to "presentations". You also had referred to presentations, I think, in your evidence earlier, with regard to the same ROM project. Do those presentations still exist?

MR LEUNG KIN WANG: I have to find out.

MR PETER DUNCAN: I would be grateful if you could look further into that, so the committee can view presentations, emails, and so on, regarding the ROM project at the time that Mr Jain was at the company. Could you have somebody explore that for us?

MR LEUNG KIN WANG: Yes.

CHAIRMAN: Thank you.

MR PETER DUNCAN: Just before we leave this --

CHAIRMAN: Before we move on, Mr Duncan.

MR PETER DUNCAN: Thank you.

CHAIRMAN: In that context -- this was a matter that arose

earlier -- would you provide us with information as to the company system of the preservation of these kinds of records? Mr Duncan has already mentioned the preservation of emails, but of other records. In this case, we are talking about presentations. Could we have some information about what the company policy is? Not necessarily now but when you come back to us.

MR LEUNG KIN WANG: (Via interpreter) I would like to add one point. With regards to ROM, we do have the entire ROM proposal for October 2014. We have it here. It talks about what the ROM is for. Some parts are about using the central control room to replace regulators, but it was not done because I thought that it was not practical. And it was not discussed by the board of directors.

So if you are talking about the ROM, the information is here. What the ROM is, it is here. I can submit it to the IRC so you will know what the ROM is. As I was saying, ROM is real-time operations management system, which has nothing to do with driving safety.

CHAIRMAN: We understand your evidence. We also have Mr Alok Jain's evidence, and clearly he speaks about what you are talking about, but he also speaks about another allied use of the data. The data is generated for one purpose but could be used for another. That's

what we are asking about. But we will happily receive the material that you have.

Mr Duncan.

MR PETER DUNCAN: Thank you, Mr Chairman.

Just before I leave this topic, Mr Leung -- and I'm talking about real-time driver monitoring, you understand; that's the system that Mr Kulis was referring to -- I understand your position, that you say it's just not practical. What I do want to have clearly understood is how far the company has looked into this.

You mentioned some discussions with Openmatics but with regard to other sorts of vehicles. Has the company undertaken any study at all as to how this system is engaged, for example, in Western European countries as per the evidence of Mr Kulis?

MR ROGER LEE: (Via interpreter) Let me answer the question. Yes, on Tuesday, we said that some colleagues went to Northern Ireland to learn about this, and talking about Openmatics and real-time systems.

In the past, when bus captains drove, they knew whether they were speeding, and today, when the speedometer points to 70 kilometres, he will be reminded. At present, Openmatics and our company are doing a study. There will be speed limits set on the map; whether it is 50km or 70km, it will be seen. In

other words, on the dashboard, there will be an audio alert if there is speeding beyond 50km or 70km.

This was started on 31 July. That is, a trial was started. And on the day before yesterday, we submitted papers to explain to you that this was being done.

MR PETER DUNCAN: Yes. That covers speed. What about excessive braking, excessive acceleration, other aspects of the driver's behaviour that might constitute unsafe driving?

MR ROGER LEE: (Chinese words not interpreted).

CHAIRMAN: Forgive me, are you putting your question in the context of real-time information?

MR PETER DUNCAN: Yes, real-time driver monitoring.

CHAIRMAN: May I invite you to rephrase it with that included?

MR PETER DUNCAN: Certainly.

Has the company taken any steps in respect of real-time driver monitoring with regard to matters other than speed, specifically matters such as harsh braking, excessive acceleration?

MR ROGER LEE: (Via interpreter) Today, on board the buses, sudden acceleration and harsh braking are already subjects of alert sent to bus captains. We already have it today. But in this past period, we discovered that apart from Openmatics, passengers should be alerted as

well because we have found that apart from elderly people, young people may be using their handphones and they may have accidents caused to them when there is sudden acceleration or harsh braking.

We have done a lot in order to avoid those accidents. My colleagues, say along Cheung Sha Wan Road, we have done something to distribute leaflets there to remind people that they should not concentrate on their mobile phones when they travel on buses.

As for Openmatics, we have done something as well and we are working on geo-fencing. We are testing it out on our fleet. But this is a little complicated, because the vehicle itself has a speed and then the black box would identify the location of the bus and what the speed should be, and number three, it is geo-fencing. This will feed the information back to the vehicle. This is electronic. Say, for example, the brake, the gas pedal, and how this is controlled -- well, we are going in that direction.

We can give you supplementary information but this is being done.

MR PETER DUNCAN: Yes. I think we understand that, Mr Lee, and thank you for that. But my question is specifically aimed at the system that Mr Kulis was describing, where there is active supervision within a central control

unit of a driver's speed and other aspects of his driving.

I have asked Mr Leung about that and he says, "No, it's not practical; it's been considered and we are not doing it."

My question is what investigations, if any, has the company conducted with regard to how that system is incorporated in other jurisdictions and whether, therefore, it might be suitable in Hong Kong?

MR LEUNG KIN WANG: (Via interpreter) Let me say something else about this issue. Technological advance is such that if we can have data to know whether a bus captain is speeding and if the information can be seen real-time and can be transmitted real-time and so we can identify the bus captains -- well, we will be able to take care of all the problems we thought we might have. So it depends on technological advance. We hope technology can help us. That is why now we have the 30-second interval. We hope it will be reduced to 10 seconds and maybe down to 2 seconds, 1 second. This is about technology. We wait for this to happen.

MR PETER DUNCAN: I don't think you have answered my question, but I conclude from that that you have done very little about what I had asked about, because you believe there are better ways of achieving it through

different technology. Is that a fair summary of the situation?

MR LEUNG KIN WANG: (Via interpreter) What I mean is if technology will allow us to have real-time monitoring -- you are talking about monitoring -- not real-time assist or real-time alert but real-time monitoring, that someone can be watching over the bus captains. Just now we talked about Western countries where a supervisor will be watching over a bus captain, for safety reasons, for commercial reasons. But talking about our buses, we have 4,000 of them. 90 per cent of the bus captains are competent and safe drivers. Do we have to have 3,999 people watching over 4,000 drivers? That is a technical issue.

If technology can help us, say two persons can watch over 4,000 bus captains and if every bus captain drives well, then I will be embracing that system.

MR PETER DUNCAN: So because of those matters, the matter has not been explored; is that the situation? You have simply concluded it is not practical so it would be a waste of time exploring it?

MR LEUNG KIN WANG: (Via interpreter) We have an open mind.

MR PETER DUNCAN: I'm sorry but when you say you have an open mind, is it something that is on the table for your consideration, or have you concluded that it's just

not practical?

MR LEUNG KIN WANG: (Via interpreter) At that time, the decision not to do it was based on the fact that it was not practicable, but later on, if there is a practicable real-time monitoring system, we will be very happy to adopt it.

MR PETER DUNCAN: But it is not something which the company is currently considering; is that correct?

MR LEUNG KIN WANG: (Via interpreter) For the time being, we cannot see a practicable solution. If there is one, we would be very happy to adopt it immediately.

MR PETER DUNCAN: Mr Lee, a few moments ago, mentioned the matter of passengers on the bus. I'm going to move to an aspect of passengers. That's the question of passenger behaviour on your buses.

I think you are aware that the committee has heard that it is a daily occurrence almost that your drivers will be subjected to verbal and sometimes even physical abuse. Is that a fair summary of the present unfortunate situation?

MR ROGER LEE: Yes.

MR PATRICK PANG: (Via interpreter) Let me respond to this question. Yes, indeed it is.

MR PETER DUNCAN: I'm going to ask you, please, to turn to bundle KMB-1 at page 203.

At this page, we will see a letter from the committee to the company, dated 20 July this year. If I could remind you that the letter seeks further information with regard to physical assaults on bus captains. In paragraphs 2 to 4, which you will see on page 204, you are requested to supply details pertaining to five particular assault cases. Do you see those references?

MR PATRICK PANG: (Via interpreter) Yes, I can see them.

MR PETER DUNCAN: Thank you.

If you then turn to page 212 of the bundle, you will see the response from the company, and the number of statistics relating to assault cases which occurred between the period of January 2015 to 22 July 2018.

At page 218 -- I'm looking at the translation -- you will see particulars of the five cases to which the committee have referred in its letter. Those cases having existed -- the dates were all in the month of April of this year.

Are you at page 218?

MR PATRICK PANG: Yes.

MR PETER DUNCAN: Thank you. Of those five cases, if we look at the "Penalty/Imprisonment" column there, we see that the first two are classified as "Not pursued by police", and we see the last referred to as "Still under

investigation".

MR PATRICK PANG: (Via interpreter) That's correct.

MR PETER DUNCAN: At items 3 and 4, we have the defendant having pleaded guilty in each case, and having been fined $3,000 and $1,000 respectively.

Are you aware that the maximum term of imprisonment, maximum term of sentence that a magistrate can award for a case of common assault is a fine of up to $100,000 and imprisonment for six months? Are you aware of that?

MR PATRICK PANG: (Via interpreter) Yes.

MR PETER DUNCAN: It would be fair to say, would it not, that in the light of those maximum sentences, these particular sentences seem to be rather light; would you agree with that?

MR PATRICK PANG: (Via interpreter) I agree.

MR PETER DUNCAN: Is this something of a problem that -- is this seen by the company as something of a problem, the lightness of these sentences?

MR PATRICK PANG: (Via interpreter) This is, to us, one of the problems and one of our concerns.

MR PETER DUNCAN: I wonder, please, if you could look at page 293 of the same bundle. This is a translation of a document which you will see, I think, around about page 286.

MR PATRICK PANG: (Via interpreter) I can see that.

MR PETER DUNCAN: Reading from the translation at page 293, is this a letter which is dated -- you can see the date under the signature of the Kowloon Motor Bus legal department -- 8 March 2018, under the heading, "Multiple Cases of Assault on Bus Captains"?

MR PATRICK PANG: (Via interpreter) Correct.

MR PETER DUNCAN: Is it addressed to the police force and in particular to the Commissioner of Police?

MR PATRICK PANG: (Via interpreter) That's correct.

MR PETER DUNCAN: Does the second paragraph of the letter read this:

"In May last year, we wrote to the Police expressing that our bus captains had been assaulted one after another. Upon considering the relevant cases, we found that certain offenders not only committed the offence of common assault but were also likely to be in violation of section 13A(1)(c) of the Public Bus Services Regulations ... no passenger or intending passenger shall wilfully do or cause to be done with respect to any part of the bus or its equipment, anything which -- (i) obstructs or interferes with the workings of the bus or cause damage: or (ii) causes injury, discomfort, annoyance or inconvenience to any other person.

As such, our company had specially sent our staff to the police station to provide evidence for the following

cases, and requested that the Hong Kong Police may prosecute the suspects in accordance with section 13A of the Regulations (the relevant statements are attached herewith for your reference) ..."

And the various cases are set out. I pick up the letter again on page 294:

"Subsequently, our company had written to the Hong Kong Police to enquire the developments of the above cases, but were told by the Hong Kong Police that the offenders involved in the cases were only prosecuted for common assault (the relevant letters exchanged with the Hong Kong Police in respect of the cases ... are attached herewith).

Recently, when our company met with the frontline bus captains, the captains have repeatedly indicated their wishes that the Hong Kong Police would strictly enforce section 13A of the Regulations to warn people who affect bus service operations, or even the offenders who attack our staff.

In this regard, we now earnestly request that the Hong Kong Police do, in future cases of assaults on bus captains, seriously consider charging the offenders under section 13A of the Regulation, in addition to the charge of common assault. Our company will definitely cooperate with the Hong Kong Police to offer our

assistance. If you have any enquiries concerning the above matters, please feel free to contact our Counsel ..."

Then at page 296 do we see the response from the police dated 17 May:

"I acknowledge receipt ...", the first paragraph, then the second paragraph:

"Regarding the follow-up action of the meeting with your company on 28 March, you are hereby notified that the division has notified the regions in writing to remind the frontline staff to be fair and professional when handling the cases of assault or harassment of bus captains, and shall understand the nature of the case and the injury of the injured to properly categorise the case and seriously consider whether Public Bus Services Regulations ... of the Laws of Hong Kong should apply."

A few questions arising from that correspondence, if I may. First of all, with regard to assaults on your drivers, have the police instituted any prosecutions since 17 May this year?

MR PATRICK PANG: (Via interpreter) Not that I'm aware of.

MR PETER DUNCAN: So we don't know as yet whether the police have heeded the request to charge under the regulations; we have yet to find that out?

MR PATRICK PANG: No.

MR PETER DUNCAN: But do I understand that to date that has not been the practice at all?

MR PATRICK PANG: Sorry, you mean prosecution under 230A?

MR PETER DUNCAN: Yes.

MR PATRICK PANG: (Via interpreter) From the records of the company, I would say there has never been a case invoking Cap 230A for a prosecution.

MR PETER DUNCAN: Are you aware that the maximum penalty provided for by the regulations is a fine of $3,000 and six months' imprisonment?

MR PATRICK PANG: (Via interpreter) I know that.

MR PETER DUNCAN: So what is the point of asking the police to prosecute under a section which carries a maximum penalty less than that for common assault?

MR PATRICK PANG: (Via interpreter) The company is of the view that in respect of cases like common assault, the investigation by the police is a difficult process. If Cap 230A is invoked in the investigation or in the prosecution, it would be relatively easier to prove the offence or the offending act.

We also hope that those who abuse or attack our bus captains, those passengers would be made known that there is this regulation, Cap 230A, in regard to passengers' behaviour, and it doesn't take physical abuse or physical contact to constitute a breach, and

the spirit behind Cap 230A is that the behaviour of passengers can sometimes go against the law.

MR PETER DUNCAN: So are you of the view that it would be easier to establish an offence under the regulations than it would to prove common assault?

MR PATRICK PANG: (Via interpreter) I think we have to leave this question to the police, but as a public bus service provider, since we have a piece of legislation which is there to protect the bus company and our frontline colleagues, then why don't we try to use this regulation to institute prosecutions?

MR PETER DUNCAN: I'm going to ask for that regulation to be pulled up, just so that we understand exactly what it contains. The regulations are in the bundles.

CHAIRMAN: Whilst that's being done, Mr Pang, the offence is wider, is it not, under the regulation? The conduct that it catches is wider?

MR PATRICK PANG: Yes, Mr Chairman.

MR PETER DUNCAN: I think we've found them, Mr Chairman, at THB-2, page 132.

CHAIRMAN: Thank you.

MR PETER DUNCAN: So 13A(1)(c), which is the regulation you have in mind, reads:

"No passenger or intending passenger shall --

...

(c) willfully do or cause to be done with respect to any part of the bus or its equipment anything which:

(i) obstructs or interferes with the workings of the bus or causes damage; or

(ii) causes injury, discomfort, annoyance or inconvenience to any other person."

Is that the regulation you have in mind?

MR PATRICK PANG: (Via interpreter) Yes, Mr Duncan.

MR PETER DUNCAN: Just going back to the question of assaults, have you at any stage asked the police to bring to the attention of the magistrates the prevalence of this behaviour of passengers?

MR PATRICK PANG: (Via interpreter) Yes, we did, Mr Duncan. That is why, on 28 March, Mr Leung, our head of the legal department, myself and another colleague responsible, another manager, responsible for traffic accident and investigation, we initiated to go to the police headquarters to meet with a chief superintendent and his superintendent. We discussed for an entire morning, to express what our company and other public bus operators are concerned about.

At that meeting, we gave a lot of figures to the police, because we felt that if you just looked at the figures, we would be concerned.

Allow me to use a little time. With regard to

assault on bus captains, in 2017 there were 35 cases only, but in 2018, up till 27 July, there were 41 cases already. We could see that the situation is deteriorating. That is why we hope the police could seriously conduct in-depth investigations into such cases, so as to allow our bus captains to drive in a safe environment.

CHAIRMAN: Are the figures that you gave the chief superintendent at this meeting the same figures that you've given us for those periods, 2017, 2018?

MR PATRICK PANG: (Via interpreter) Mr Chairman, on 28 March, our figures were only up to the month of March but --

CHAIRMAN: We are aware of that. But in other respects, were they the then current figures that we've got?

MR PATRICK PANG: (Via interpreter) That is correct, Chairman.

CHAIRMAN: Did you give them the same data, in the same format, that we've got?

MR PATRICK PANG: (Via interpreter) I should have done so.

CHAIRMAN: And did you go back -- because we asked you to provide these figures -- as far as 2015, in the figures you gave the police?

MR PATRICK PANG: (Via interpreter) Yes, we did.

CHAIRMAN: One looks at those figures. No one has been

imprisoned in all that time, have they?

MR PATRICK PANG: (Via interpreter) That is correct, according to our records.

CHAIRMAN: Yes, Mr Duncan.

MR PETER DUNCAN: What sort of response did you receive from the police?

MR PATRICK PANG: (Via interpreter) At that meeting, on 28 March, I could see that the police were also concerned. The chief superintendent promised at the meeting that he would issue guidelines to the frontline policemen to first allow them to seriously investigate into all alleged assaults, and he would remind his frontline staff to see whether there would be cases where Cap 230A could be applied for investigation and prosecution.

MR PETER DUNCAN: By bringing these matters to the attention of the police, what were you trying to achieve?

MR PATRICK PANG: (Via interpreter) Our objectives are simple. We don't want our frontline bus captains to continue to be subject to excessive abuse. This is our objective.

Or, Mr Duncan, if you would allow me, Mr Chairman, to respond to your question: actually, common assault and Cap 230A -- now, why do we also want to bring in Cap 230A? Please allow me to cite an example.

CHAIRMAN: It's obvious, looking at it. It's very wide, is it not?

MR PATRICK PANG: (Via interpreter) Chairman, can you please allow me to mention a case which is very recent? If Cap 230A was applied, our bus captains' work would be made more safe and more efficient.

CHAIRMAN: Certainly. Please do so.

MR PATRICK PANG: (Via interpreter) The case happened on 29 July. I can tell you the gist of what happened. It was around 11 pm. Four male passengers who were in their 20s boarded a bus. They did not pay the full fare. At that time, the bus captain asked them to pay up the full fare, but the four men did not pay any regard to the bus captain. The bus captain continued with his driving because there were other passengers. When he was at Festival Walk and Yau Yat Chuen, where passengers disembarked, these four men also wanted to disembark, and then the bus captain asked them to pay again.

The four men paid no regard to the bus captain and they disembarked from the bus. Then the bus captain -- at that time, the engine was running but the bus captain suddenly found that the bus broke down; the engine was in an off position. The bus captain immediately alighted from the bus and he saw the four men running

away. The bus captain suspected and in fact he heard some kicks against the bus body, and the bus captain suspected that, one, the men switched off the "off engine" button near the end of the bus body, but the four men ran away, and since there were passengers on the bus, the bus captain boarded the bus again and re-started the engine and then he continued with the journey.

Then, about 15/20 minutes later, after he went to the terminus and then he went back to the traffic light at Tat Chee Avenue in Yau Yat Chuen, the bus driver stopped because of the traffic lights, and then suddenly the bus company discovered that the engine was switched off. Then, from his rear view mirror, he saw those four men again. The bus captain alighted from the bus again, and again he found that the engine button was pushed so it was switched off, and then the four men ran away; he could not apprehend them. The bus captain immediately informed our inspector on duty and reported to the police.

After the police came on the scene to understand the incident, that policeman classified the case as "dispute". The bus went back to the depot and that was it for the day.

I would like to point out that cases like this one

showed clearly, very clearly, that Cap 230A could have been contravened, but in the end, the case was just classified as "dispute".

I therefore very much hope that in protecting the personal safety of bus captains and in ensuring the provision of efficient service to the public, I really hope and I do earnestly hope that the relevant authorities can seriously consider applying Cap 230A.

Thank you, Mr Duncan.

MR PETER DUNCAN: Have you asked the police to bring to the attention of the Magistrates' Courts the prevalence of the behaviour to which your drivers seem to be subjected? Have you asked them that?

MR PATRICK PANG: (Via interpreter) Absolutely, yes.

MR PETER DUNCAN: Have they done that? Have they stood up in court and said to the magistrate, "This is a very prevalent offence which we think requires a deterrent sentence"? Has that step been taken?

MR PATRICK PANG: (Via interpreter) We did say this to the police, but, Mr Duncan, I hope you understand, with regard to 2017 and up to 22 July 2018, there are altogether 76 common assault cases against bus captains, but only ten of those were convicted. Six were resolved and seven were not pursued by the police. Another one, the police said they issued a verbal warning. So there

were ten convictions.

Whether the case officer of the police told the court about the seriousness of the offence or whether the magistrate meted our sentences according to the mention of seriousness of the case, I don't think I can answer that here. Perhaps you can ask the police whether they did it.

MR PETER DUNCAN: Have you considered taking this issue up with the Secretary for Justice?

MR PATRICK PANG: (Via interpreter) Whatever we can do to protect our bus captains, we will do. We have even considered if we can bring follow-up civil claims in these cases, and also to inform the public that such cases seriously affect bus operations and safety.

CHAIRMAN: Could you answer the question?

MR PATRICK PANG: (Via interpreter) We haven't thought about talking to the Secretary for Justice, at this time.

CHAIRMAN: What about the Director of Public Prosecutions?

MR PATRICK PANG: (Via interpreter) No, not at this moment. We don't intend to do this now. We hope by talking to the police we can achieve what we want.

CHAIRMAN: In view of the time, if that's convenient, Mr Duncan --

MR PETER DUNCAN: Certainly, Mr Chairman.

CHAIRMAN: -- we will take the lunch adjournment and we will

resume at 2.30 this afternoon. Thank you.

(1.01 pm)

(The luncheon adjournment)

(2.30 pm)

CHAIRMAN: Good afternoon, gentlemen.

Mr Duncan.

MR PETER DUNCAN: Good afternoon, Chairman.

Gentlemen, I wonder if you could have in front of you, please, bundle TD-2, at page 1.

Here we have a copy of the Public Bus Services Ordinance. If you could go through, please, to page 58 of the bundle, you will see there section 36, which is concerned with the question of by-laws. Subsection (1) of section 36 states:

"Subject to this ordinance and its franchise, a grantee may make by-laws for all or any of the following matters ..."

And we see them set out -- (a), (b), (c), (d) -- and (e) has a number of subparagraphs; and there are also subsections (2), (3) and (4) on the following page.

Of particular relevance with regard to the discussion we were having before lunch is perhaps (1)(e), in that a grantee has the power to make by-laws for the purpose "generally as to the conduct of passengers while using grantee's buses".

The question is: has KMB passed any by-laws?

MR GODWIN SO: (Via interpreter) No.

MR PETER DUNCAN: Has it ever considered passing by-laws?

MR GODWIN SO: No.

MR PETER DUNCAN: Has the company given any consideration to whether the passing of a by-law may offer some assistance with regard to the current situation that its drivers face with regard to passenger behaviour?

MR GODWIN SO: (Via interpreter) My understanding is that if we are to pass by-laws, then the company will have the responsibility to enforce the by-law. We need to consider whether the company has got the resources, the capability, to do so.

Moreover, in the case of contravention of the by-laws, when it does take place, do we have staff on site to deal with it immediately? That's our consideration.

Currently, what happens is that Cap 230A is being enforced by the police, they have the resources, they are professional and that's much better than the case of a franchised bus company.

MR PETER DUNCAN: So does the company have any intention to consider this aspect?

MR GODWIN SO: (Via interpreter) Not for the time being.

MR PETER DUNCAN: We have received evidence from the company

that in some buses, cameras have been installed to assist the detection and hopefully the prosecution of offenders.

Could I take you, in that context, to KMB-1 at page 82. We can see the question that was posed by the committee, as follows:

"Is there any customer services training provided to bus captains to equip them with the relevant skills to handle difficult passengers?"

The company's answer, which was contained in the first of the submissions, included the following, and I'm referring to the third bullet on that page:

"Apart from training, we have taken the following measures to assist [bus captains] in handling difficult passengers:

...

-- Surveillance cameras, including forward-looking cameras and a camera covering the driver seat, have become standard features on all new buses since 2015. Up to February 2018, surveillance cameras were installed in 2,319 KMB buses and 146 [Long Win] buses. The remaining buses will be equipped with surveillance cameras phase by phase. Surveillance cameras capture the behaviour (with audio recording) of difficult passengers. It will protect the interest of [bus

captains] in subsequent investigation by the police or legal proceedings."

So my first question is: have these cameras resulted in evidence which has yielded successful prosecutions against offenders?

MR GODWIN SO: Yes.

MR PETER DUNCAN: According to what I have just read out, 2,319 KMB buses have had the cameras installed. That leaves how many at the moment without cameras?

MR LEUNG KIN WANG: (Via interpreter) As of now, almost 2,800 buses are equipped with the cameras. The entire fleet is 4,300.

MR GODWIN SO: (Via interpreter) Among the KMB buses, about 1,800 are not yet equipped, and then for Long Win, 70 to 80 buses haven't got the CCTV cameras.

MR PETER DUNCAN: Have there been occasions when the drivers themselves have endeavoured to capture these unruly passengers by use of their mobile phones?

MR GODWIN SO: (Via interpreter) Bus captains are not allowed to use their own mobile phones while they are driving.

MR PETER DUNCAN: I suppose while they are driving it is pretty obvious why that would be, because of the effect on their safety. What about when the bus is stationary, are they permitted to use their phones in those

circumstances?

MR LEUNG KIN WANG: (Via interpreter) We do not allow bus captains to use their own recording devices to carry out the recording.

MR PETER DUNCAN: One of the witnesses who gave evidence from the unions to the committee -- I will simply give everyone the reference; I won't go to his evidence, but it's at Day 10, pages 128 to 130 -- was effectively complaining to the committee that bus drivers were not allowed to use their phones.

CHAIRMAN: Did he say phones or cameras?

MR PETER DUNCAN: I think he mentioned cameras.

CHAIRMAN: Yes, because there's a distinction, is there not, between the kind of camera that one often sees in taxis and a camera on a telephone?

MR PETER DUNCAN: Yes. I will rephrase that.

One of the union representatives, I think it was from the Monthly-rated Drivers Union, stated that some of the drivers wanted to use a camera, but there was a circular which had been issued prohibiting such use. Are you aware, first of all, of that evidence?

MR GODWIN SO: (Via interpreter) Yes, correct.

MR PETER DUNCAN: Is there a circular?

MR GODWIN SO: (Via interpreter) We do have it.

MR PETER DUNCAN: I wonder if that can be provided to the

committee, please.

MR GODWIN SO: (Via interpreter) Yes. May I explain the reason?

MR PETER DUNCAN: Certainly.

MR GODWIN SO: (Via interpreter) My understanding is that as far as the Commissioner of Personal Data is concerned, he has got guidelines concerning the use of cameras to collect personal data, including images. First of all, there must be a notice to tell others that they are being captured on camera. There must be an intention policy.

Moreover, if someone would like to get the information, there should be guidelines as to how to deal with that, and if it is no longer of use it has to be destroyed.

For individual bus captains, if they are to set up their own CCTV on board, I don't think they have ways to ensure that they can meet the three guidelines that I have just referred to.

As far as the company is concerned, the company can do so. Clearly, there is a notice to say that there is a CCTV on board and the bus company has the policy to retain or retrieve the images already captured.

So we won't stop at 2,400 buses as I referred to. Before the end of the year, 90 per cent of the buses

will be equipped with the CCTV facility. For the remaining 10 per cent, they are not getting it for the moment, and but then they will be retired from the fleet in the coming year, 16 to 18 years old, they will be replaced by new buses.

In other words, within the year, all the buses will be equipped with the CCTV facility.

CHAIRMAN: So the rights of privacy transcend the rights of protecting your own safety; is that it?

MR GODWIN SO: (Via interpreter) We have to strike a balance.

CHAIRMAN: It's not your balance; it's a legislative balance, isn't it?

MR PETER DUNCAN: Is this something on which you have taken legal advice?

MR GODWIN SO: (Via interpreter) I think the guidelines are clear and comprehensible. For this circular, by this circular, we do not allow the bus captains to have install their own devices, but I can't answer this question because I hadn't joined the company at that time. But surely I can ask for advice again, because there is still time before the end of the year.

MR PETER DUNCAN: Has it been a matter which the company has raised with the privacy commissioner?

MR GODWIN SO: Yes.

MR PETER DUNCAN: You had discussions with the privacy commissioner?

MR GODWIN SO: (Via interpreter) No, I mean I have read the guidelines and the guidelines have already set out those points.

CHAIRMAN: Have you raised with the privacy commissioner whether or not the use of cameras by bus captains, who intend to record people abusing them or physically assaulting them, would contravene the legislation.

MR GODWIN SO: (Via interpreter) No, I didn't.

MR PETER DUNCAN: I'm going to move to the matter now of protective shields for the drivers. In this respect, could I ask you to turn, please, to page 62 of KMB-1.

In one of its answers in its initial submission, the company said the following:

"In response to increasing number of assaults against [bus captains], we have taken the following measures ..."

And the third-to-last paragraph:

"We will install a protective shield near the driver's seat starting from June 2018."

Has that process started?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: And what sort of numbers now of buses have installed the protective shield?

MR LEUNG KIN WANG: (Via interpreter) 1,500.

MR PETER DUNCAN: What is the intention with regard to the remainder of the fleet?

MR LEUNG KIN WANG: (Via interpreter) We will complete the installation by the end of the year.

MR PETER DUNCAN: I want to take you to another bundle, miscellaneous number 2, at page 913.

At the right-hand-bottom corner, do we see one of the installed protective shields?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: Who was responsible for designing the shield?

MR LEUNG KIN WANG: (Via interpreter) Our engineering section.

MR PETER DUNCAN: Who was responsible for manufacturing the shield?

MR LEUNG KIN WANG: (Via interpreter) It was designed by KMB itself. It is procured by KMB. We carried out the installation and we submitted it to the TD for approval, and upon their agreement they were installed in June.

MR PETER DUNCAN: When you say you procured these, you procured them from whom?

MR LEUNG KIN WANG: (Via interpreter) From an overseas supplier.

MR PETER DUNCAN: From which country?

MR LEUNG KIN WANG: (Via interpreter) I don't have the information on hand.

MR PETER DUNCAN: Would you be able to obtain that information?

MR LEUNG KIN WANG: Yes.

CHAIRMAN: Please provide that.

Was this design based on protective shields that one finds elsewhere in the world in buses or not?

MR LEUNG KIN WANG: (Via interpreter) For other countries, especially those in UK, might not be suitable for us. First of all, our buses are air-conditioned, so the design cannot be a full enclosure. For our bus captains, they are not covered to their left. So the design offers protection to the bus captains on their left. You might see that there is an opening which could be -- allows the shield to be opened. That's why we designed our own shield, to offer protection to our bus captains, and hopefully they are happy with the design.

When we carried out the design, there were some teething problems during installation and we are dealing with these. In some cases, the magnets were loose, and we found out a way to carry out the installation properly. There were views that there is light reflection and we served to solve that as well.

MR PETER DUNCAN: Are you aware that representatives from two of the unions have indicated to the committee that they are not entirely happy with the design?

MR LEUNG KIN WANG: (Via interpreter) I received comments from some unions on this issue. There was dissatisfaction. I also received some views from unions that we should speed up the installation.

MR PETER DUNCAN: I will simply give you the references and then I will take you through the issues which seem to have arisen. There was a representative from the Motor Transport Workers General Union who gave evidence on Day 9. If you want to see his evidence, you will find it at pages 33 to 36. Then on Day 11, there was a representative from the Federation of Bus Industry Trade Unions who gave evidence, and that can be found at pages 150 to 151.

CHAIRMAN: Also of Day 9?

MR PETER DUNCAN: Sorry, that's Day 11.

CHAIRMAN: Thank you.

MR PETER DUNCAN: Have you read that evidence, Mr Leung?

MR LEUNG KIN WANG: I should have.

MR PETER DUNCAN: I am not asking if you should have, if you have.

I will just take you to it quickly. First of all, Day 9, bundle 4, page 33.

If you commence to read to yourself from line 18 on page 33, you will see reference to the installation of a protective shield. Then, at the top of page 34, I bring your attention to this:

"It may look to be some protection, but the opening of the shield is very big, it is not easy for you to switch it on and off, and it is very reflective and then there is a magnet at the very tip, and while the bus is moving there may be noise."

There seems to be three complaints in that sentence: reflection, the magnet, and noise. Have those complaints been communicated to the company?

MR LEUNG KIN WANG: (Via interpreter) Yes.

MR PETER DUNCAN: Is anything being done about that?

MR LEUNG KIN WANG: (Via interpreter) We dealt with most issues and we are dealing with the problem of reflection.

MR PETER DUNCAN: So reflection remains an outstanding issue; correct?

MR LEUNG KIN WANG: (Via interpreter) Correct, but our intention is to protect the bus captains. As for the reflections, the shield is located on the bus captain's left, and normally we feel that this would not affect the bus captains in their driving, but we are still looking to get around the issue and hopefully we can

improve upon that.

MR PATRICK PANG: (Via interpreter) Mr Duncan, I would like to add something. The reason for installing these protective devices in June was that, as I said before the lunch break today, in the year 2018, the number of assaults on our bus captains rose sharply, which was why our management felt that this issue should be dealt with immediately. Therefore, in terms of design, procurement and installation of the device, we made a decision within a very short period of time.

After installation, we realised there were some teething problems. For example, the magnets might be too tightly attached. And when bus captains get on or off, in an environment with a high light contrast, there might be reflections. However, some bus captains strongly welcomed our decision.

As I said, our bus captains were victims of assaults and we felt we had to address the sentiments of our bus captains. We hoped the police would make more prosecutions and we would speed up the installation of CCTVs. Apart from installing the protective shield in April, next to the driver's cabin we also put up a warning message, saying that disturbing the bus captain is a criminal matter or a criminal offence. We try to offer a safe driving environment for our bus

captains.

That said, we are still rectifying the protective shield in order to do even better. For example, for reflections, is there something we can do? On each bus, we have an arrival reminding device, and on that device we added a message that if our bus captains are disturbed, we might stop the vehicles. And with our bus captains being disturbed or possibly being disturbed, we hope to do something for our bus captains, in order to help them.

Apart from these protective devices, the arrival reminding device and the slogans, our legal department has also been very down-to-earth in offering help to assaulted bus captains. For our frontline inspectors and terminus supervisor, they are offering plenty of support to our captains. If a captain is assaulted, our inspectors would arrive on site immediately and they would accompany our bus captains to a doctor, and our legal department colleagues might take statements from our captains if necessary. So these are things we are doing.

So in terms of protecting our bus captains, I feel that our company has a responsibility, and I hope that the police would offer as much support as possible. We have a string of measures in place.

CHAIRMAN: Mr Pang, could you provide the committee with a photograph of the warning that you say is being displayed on buses, and also the warning, if it's in visual form, about the bus captain stopping the bus if there is a disturbance?

MR PATRICK PANG: (Via interpreter) Yes, it is certainly possible. For the reminding device, the bus captain would have a button to press. So let's say if the next stop is on Nathan Road or a certain building or park, when the captain presses the button, it would show that the bus captain is being disturbed. I would offer that photograph.

Thank you, Mr Chairman.

MR PETER DUNCAN: The arrival reminding device, is that something in writing or is that audio?

UNIDENTIFIED SPEAKER: Both.

MR PETER DUNCAN: If you turn up, please, miscellaneous file 2, page 913, the photograph we had open before.

Are you able to see the warning device in that photograph, the warning sign?

MR PATRICK PANG: (Via interpreter) Mr Duncan, yes, indeed, there's the sticker we have put up: it is a criminal offence to cause nuisance to bus captains.

MR PETER DUNCAN: Thank you.

With regard to these issues that the representatives

from the union raised, what is the current situation between the company and the unions? Are the unions supportive of what you are doing? Are they objecting to what you are doing?

MR PATRICK PANG: (Via interpreter) Mr Duncan, are you saying that whether they are in support of the installation of the protective shield, or are you referring to something else?

MR PETER DUNCAN: I'm referring in particular to the problems which they identified: the magnets, the reflection, the noise, and so forth, which you say are being addressed. What's the status of the communication between you and the unions on these matters?

MR PATRICK PANG: (Via interpreter) They are aware of the fact that the company is in the process of dealing with the problems. They are satisfied. But of course, in future, as to what the end product will be like, we will not just talk to the trade unions. We will also listen to the views of all the bus captains.

MR PETER DUNCAN: Can I bring your attention, please, to page 35 of the transcript that you have in front of you. That's Day 9. There's another issue which one of the representatives raised at line 7. There was concern that the protective shield might affect the sight line of the bus captains, and that they cannot see clearly

the getting on and getting off of the passengers. Is that something which has been communicated to the company?

MR PATRICK PANG: (Via interpreter) Mr Duncan, let me answer your question like this. I also have a driving licence for buses. I had experience of getting on board a bus with the protective shield. For the driver's cabin, to the left-hand side we have the protective shield. For this protective shield, it is transparent. Unless we have a major contrast in terms of the lighting, the sight line would not have been affected substantially.

But of course we do appreciate individual bus captains may have concerns and therefore, in the course of it, we tried to modify the protective shield. We are working on it.

MR PETER DUNCAN: Are you satisfied yet that the protective shield will not materially affect the sight line?

MR PATRICK PANG: (Via interpreter) Well, I won't say it would affect substantially, but of course, in the past, there was nothing at all. Now you have got a transparent plastic panel to your left-hand side. As far as habits are concerned, maybe bus captains may find they are not yet used to it.

MR PETER DUNCAN: I wonder if you can pick up now, please, file KMB-1 again, at page 83.

Perhaps just before I leave that subject of the plastic protection shields, when was consideration first given to the installation of the shields?

MR LEUNG KIN WANG: (Via interpreter) It was July last year, 2017. There was an increasing number of bus captains being assaulted. So we decided that we had to act on it, to help the bus captains, and in fact some bus captains did make such a suggestion. So it was last year that we started to think about it and we started to have our own designs.

MR PATRICK PANG: (Via interpreter) Mr Duncan, let me give you a response. From my contacts with the bus captains, I think the majority of them are happy to see that the bus company has taken a step forward. But of course, as to whether we can fine-tune the details, and with hindsight, if you put this question to me, of course we could have done better. However, at least we have taken the first step. When we have taken the first step, there will be a second step. By the second step, we are here sourcing some materials which can avoid the problem of reflection, and we will try to see if we can source another magnet.

What I want to say is that, after all, we need to make the first step forward and for the bus captains at the front line, they are aware that the company has

taken the first step.

Thank you, Mr Duncan.

MR PETER DUNCAN: I understand that the company, in the context of bus drivers, has to deal with something like seven different unions; is that correct?

MR ROGER LEE: (Via interpreter) For the time being, we mainly communicate with two trade unions, but in fact we do communicate with every colleague via different channels.

CHAIRMAN: In the capacity of trade unions, two unions who constitute 90 per cent of your bus captains; is that right?

MR GODWIN SO: Yes.

CHAIRMAN: And when you communicate with the others, it's not in any capacity as a trade unionist; it's as an employee?

MR GODWIN SO: (Via interpreter) Well, we don't count the capacity. Other than the two unions I have referred to, for each bus captain, we do have a channel for them to speak up, and we will also take the initiative to listen to them. Say, for example, as Mr Pang has said, our depot officers, inspectors at the front line, and even Mr Pang himself, are regularly at the depots and at the terminus during the course of duty, and after they have knocked off will listen to them.

We have got a JCC, joint consultation committee. It holds meetings on a monthly basis. We listen to the suggestions of the bus captains as far as work is related, and if the suggestions are relevant and appropriate, they will be taken on board. This is a regular arrangement.

CHAIRMAN: The question was simply this. I'm sure you understand the question. Do you deal other than with the two main unions you have described as unions, not as bus captains but as unions?

MR GODWIN SO: Yes.

CHAIRMAN: And which unions do you deal with then, other than the two main ones?

MR PATRICK PANG: (Via interpreter) Mr Chairman, in our company, we have two so-called major unions. In addition, we have also liaised with the other so-called unions. Say, for example, in this hall, we have got Mr Kwok Chi Shing, a retired bus captain. He is sitting right here in the audience. I have personally talked to Mr Kwok for more than two hours.

CHAIRMAN: If my memory is correct, you told him that you'd deal with him as a bus captain but not as an unionist. That's why I am raising the question, not you personally, the company.

MR PATRICK PANG: (Via interpreter) In my context, whether

somebody is a union member, that's not the main reason.

CHAIRMAN: Yes, Mr Duncan.

MR PETER DUNCAN: Thanks, Chairman.

I think we actually have a list of the unions on a slide. I wonder if that can be brought up, please, just while we are on this topic.

We see there the names, I believe, of seven unions whose representatives have given evidence to assist the committee. Which are the two major unions?

CHAIRMAN: By that you mean the two major unions that KMB deal with?

MR PETER DUNCAN: Correct.

CHAIRMAN: Yes.

MR GODWIN SO: (Via interpreter) Well, you are showing the English name. I think it should be the Motor Transport Workers General Union, the KMB branch. Is it possible to show the Chinese names of the unions?

MR PETER DUNCAN: Certainly. We will arrange for that and bring it up later on.

CHAIRMAN: Mr Duncan, perhaps Mr Chan could just deal with that orally.

MR DEREK CHAN: The Motor Transport Workers General Union, the Chinese for that is "(Chinese spoken)".

MR GODWIN SO: (Via interpreter) Yes, right, that's correct. That's one of the two.

CHAIRMAN: Thank you.

I think it is now being displayed in Chinese characters for you.

And the other one?

MR GODWIN SO: (Via interpreter) It so happens that I found the submission. KMB Workers General Union.

CHAIRMAN: What is the reference page number for the submission where this is dealt with?

MR GODWIN SO: TU-1(A), page 130 to 131, and their submission is 133.

CHAIRMAN: Thank you.

Could that page that Mr So has referred to be put up on the screen, please.

MR GODWIN SO: Yes.

CHAIRMAN: Thank you.

MR PETER DUNCAN: So did I understand you to say that 90 per cent of the bus drivers belong to one of the unions?

CHAIRMAN: One of the two unions?

MR PETER DUNCAN: It could be one of the two unions or one of the seven unions.

CHAIRMAN: No. My memory -- it's either in a submission or in oral testimony -- is that it was identified that KMB dealt with two unions.

I see Dr Leung nodding. If someone can find me that

reference, then we can put that up.

MR PETER DUNCAN: Thank you, Chairman. We will find that and come back.

Did I understand you to say correctly -- would it follow from what you have said that it is just about 10 per cent of the drivers who do not belong to any union?

MR GODWIN SO: (Via interpreter) First of all, each captain can take part in more than one union, so the total might not equate to our total number of bus captains, at 8,600.

As for the number of members cited by each union, the information is provided by the unions themselves, but we would judge whether or not the numbers cited are reasonable. According to the numbers reported by the two unions, they make up about 90 per cent of our total number of bus captains.

MR PETER DUNCAN: Do I understand correctly that those two unions that you've identified are the unions that you deal with most?

MR GODWIN SO: (Via interpreter) Correct, but may I add something?

MR PETER DUNCAN: Yes.

MR GODWIN SO: (Via interpreter) As I said, some bus captain do not belong to any union, so on the request of unions

we would discuss some matters with them. But regardless of which unions they belong to, we would listen to our staff and we would consult them actively.

MR PETER DUNCAN: So, if I understand you correctly, what you are saying is that your contact with the bus drivers is sometimes directly and is sometimes through the unions?

MR GODWIN SO: Correct, but both simultaneously happen.

MR PETER DUNCAN: Thank you.

Now, I had directed you towards page 83 of KMB-1.

CHAIRMAN: Are we moving to another topic?

MR PETER DUNCAN: Yes, we are.

CHAIRMAN: Before we do that, can I ask that KMB-1, page 218-1, be put up on the screen.

You will see at paragraph 2 there was a request that -- in paragraph 3: Please provide a copy of what is called the "CCTV brief finding report".

That related to the document that is at page 218, two of the five cases in which KMB described what had happened, and it's cases 3 and 4 where there is reference to that phrase, "CCTV brief finding report".

Have you provided us with a copy of that?

Can you give me the reference?

MR GODWIN SO: Yes.

You may turn to page 300.

CHAIRMAN: Yes. Thank you.

The question I wanted to ask, arising out of this issue, is: in your experience, how good is the quality of the video and audio recordings when it comes to examining verbal or physical assaults on bus captains?

MR PATRICK PANG: (Via interpreter) Mr Chairman, I can say that the quality of the CCTV recordings are adequate to identify the persons involved. So the quality is acceptable. It can also help the police roughly identify the assailant.

CHAIRMAN: And what of the audio track in capturing, for example, the verbal abuse that might lead up to the physical assault?

MR PATRICK PANG: (Via interpreter) Mr Chairman, it depends on how far you are from the microphone. Usually, sound from the driver's cabin can be captured.

Chairman, I want to add that each bus is equipped with nine CCTV cameras. So the CCTVs do not just capture the driver's cabin. They can capture what happens elsewhere on the bus as well as what happens outside. We have a total of nine cameras.

CHAIRMAN: Are there occasions when you transcribe what is captured on the audio track so that you can present that to the police, or do you leave that to them to do?

MR PATRICK PANG: (Via interpreter) It's not just for

assault cases. For traffic accidents, et cetera, we would submit CCTV footage to the police.

CHAIRMAN: I'm asking about the audio track. Do you ever transcribe that so that the nature of the abuse can be identified, or do you just hand it over to the police?

MR PATRICK PANG: (Via interpreter) Usually, we will send the whole set of information to the police.

CHAIRMAN: By that you mean the CCTV?

MR PATRICK PANG: (Via interpreter) Yes. We would submit both the video and audio recordings to the police.

CHAIRMAN: The second matter that is dealt with in that schedule of those five unfortunate cases on 4, 5 and 6 April -- page 218 of KMB-1 -- the second issue is the provision of information coming from the Octopus card used by the passenger.

MR PATRICK PANG: (Via interpreter) Yes.

CHAIRMAN: That's case 1; do you see that?

Now, case 1 was marked as not being proceeded with, "No further action", despite the fact that KMB had already provided the police with Octopus card records of the assailant.

MR PATRICK PANG: (Via interpreter) Yes, Chairman.

CHAIRMAN: Had the Octopus card records been provided to the police?

MR PATRICK PANG: (Via interpreter) For this case, I think

we had submitted the records. But, Mr Chairman, I want to stress that if the Octopus card was not a personalised card, if it was non-personalised, the follow-up work might be difficult. However, if the card carries an identity --

CHAIRMAN: We understand that, because we have asked the police about the information that is obtainable.

In your letter, which I think is at page 297 of KMB-1, in the reply to this letter of request, the second paragraph, you refer to case 1 and you say this in the last sentence:

"In or around end of April 2018, we had a telephone conversation with the police concerning the Octopus card records and informed them to collect our written reply."

Were they collected? Try "yes" or "no" on that, if you can.

MR PATRICK PANG: No, they didn't come and collect.

CHAIRMAN: Did you then supply them to the police, "yes" or "no"?

MR PATRICK PANG: No, but --

CHAIRMAN: By all means explain, but what happened was the Octopus card information never reached the police?

MR PATRICK PANG: (Via interpreter) This is an assault which happened in Tin Shui Wai. As I recall, since I was on this case personally, in early April we received a fax

from the police, requesting the Octopus card records, and on 24 April we had the letter ready, and we also had the Octopus card records ready.

Our colleagues followed the guidelines. Since the police faxed a memo to our company we had to verbally ask them to send someone to collect it themselves, or else we would not be able to identify the identity of the sender.

We made a phone call to Tin Shui Wai district of the police; we asked them to come and collect the reply. But the police never came and the letter is still with us and the Octopus records are still with us.

So that's what happened, Mr Chairman.

CHAIRMAN: Since you were personally involved in this case, what was the nature of the assault?

MR PATRICK PANG: (Via interpreter) I remember that on B1 station, it is a cross-boundary route, it involved a male bus captain, it was in Lok Ma Chau.

CHAIRMAN: What was the nature of the assault -- a punch, a bottle on the back of the head -- what was it?

MR PATRICK PANG: (Via interpreter) Please give me some time. We have too many of these assault cases, excuse me.

CHAIRMAN: Yes, please take your time.

MR PETER DUNCAN: Mr Chairman, just while that's being

looked for, Mr Chan has brought my attention to page 101 of bundle 1 --

CHAIRMAN: Thank you.

MR PETER DUNCAN: -- in regard to the 90 per cent representation, and he suggests that that may be the evidence to which Mr Chairman was referring, paragraph 4 on that page.

CHAIRMAN: Yes, that is what I had in mind.

Yes. Nature of the assault.

MR PATRICK PANG: Mr Chairman, it should be page 216.

CHAIRMAN: Yes. Just tell me the nature of the assault, that's all.

MR PATRICK PANG: The bus captain was pushed onto the ground and then sustained injuries to his hip and the head.

CHAIRMAN: And any medical treatment?

MR PATRICK PANG: I'm sorry, it doesn't contain any medical checkup, et cetera, et cetera, here.

(Via interpreter) It's not indicated here. I'm sorry about that.

CHAIRMAN: What I'm concerned about is that the ball has been allowed to drop between the police and KMB, involving one of your bus captains pushed to the ground and injured on his head and his hip, and the situation, you tell us, is that the information on the Octopus card is sitting in an envelope in KMB. How does this happen?

MR PATRICK PANG: Mr Chairman --

CHAIRMAN: If you are trying to protect your bus captains, how does this happen?

MR PATRICK PANG: (Via interpreter) Mr Chairman, I did ask this question, when I became aware that the Octopus card records are not been collected. It was the end of last month that I became aware of it. So I'm sorry, perhaps the follow-up work should have been done better. I think that's the case, that it should have been done better.

CHAIRMAN: Mr Pang, am I correct in thinking that you were formerly a gazetted officer of the Hong Kong Police?

MR PATRICK PANG: (Via interpreter) Correct.

CHAIRMAN: Is this something that both in your current job and with your former occupation you would be able to deal with so that the information does get where it should get?

MR PATRICK PANG: (Via interpreter) Certainly, I can do that.

CHAIRMAN: Thank you.

Mr Duncan.

MR PETER DUNCAN: Thank you, Chairman.

I was asking you now, please, to turn to page 83 of KMB-1. The question that you were asked and to which you responded in your initial submission was:

"Is there any counselling service provided to bus captain [s] in need?"

The second bullet answers that question in the following way:

"A task force comprise KMB's deputy operations director, depot heads, head of training and quality assurance department, head of communications and public affairs and manager, talent acquisition of human resources department has been formed to look into enhancing the provision of emotional support for [bus captains] and frontline staff. The task force will engage a professional consultant to provide a comprehensive review of the current practice and make recommendations in areas including but not limited to recruitment, assessment on [bus captains] emotional intelligence and stress tolerance, training, counselling and performance management. It is expected that the recommendations will be implemented phase by phase to address immediate concerns."

Could I ask, firstly, when was that task force formed?

MR JAMES WONG: (Via interpreter) Around about the end of May of this year.

MR PETER DUNCAN: And what prompted its formation?

DR NORMAN LEUNG: Mr Duncan, this is an initiative from me,

because when I learned that our bus captains are often abused, I thought that we should seek professional advice on how to handle the situation and how to offer, in particular, counselling service to our bus captains in need of counselling.

I happened to learn from the vice-president of the Chinese University that they had previously offered consultancy service to the police some years back, during the occupation movement, and I thought that this might be useful to our bus captains who are often abused by passengers. As a result, because we are a utility company, we have to invite tender from different interested parties, and in the end the Chinese University of Hong Kong was selected. I did not take part in the selection exercise, to avoid any conflict of interest, because I happen to be the council chairman of the Chinese University of Hong Kong.

They are now working on a proposal that hopefully will assist us in the recruitment exercise and to offer emotional support to our bus captains, if in need. That's basically how it comes about, Mr Duncan.

MR PETER DUNCAN: Thank you, Dr Leung.

Can I ask you please to refer to page 229 of this same bundle.

CHAIRMAN: Before we move to that, Dr Leung, can you assist

us if you have any indication so far as to how it is that you might be assisted by this advice, professional advice, in the recruitment of bus captains?

DR NORMAN LEUNG: Basically in the recruitment exercise, they will make an assessment of the emotional attributes, if I may use the word, of any candidates. So basically their advice would be in assisting us in the assessment of their emotional attributes.

CHAIRMAN: Thank you.

MR PETER DUNCAN: Could I ask you please to go to page 220 of bundle 1. At page 220, you will see a letter from the company to the committee, dated very recently, 6 August, and it refers to the action plan for implementation of the key recommendations.

You can see that action plan commencing from 221, and what I wish you to do, please, is to turn to page 229. At page 229, can we see reflected, first of all, on the left-hand side of the page, the position at the initial stage of this psychological support proposal? Is that correct? Does that show the initial proposal?

DR NORMAN LEUNG: Yes.

MR PETER DUNCAN: Then, in the middle of the page, do we see the action plan with milestone dates as at 10 April?

DR NORMAN LEUNG: Correct, yes.

MR PETER DUNCAN: Are we then provided, on the right-hand

side, with the current situation, which I will read out:

"The consultancy team from the psychology department of a local university was appointed on 31 May 2018. In June 2018, the team has kicked off its review of the current practice in relation to the provision of emotional support through visiting depots, BCTS and hotline centre, and meetings with deputy operations director, depot staff, zone heads, driving instructors, recruitment team and employee relations team of HR department."

"BCTS" would be?

MR ROGER LEE: Bus Captain Training School.

MR PETER DUNCAN: Thank you.

Continuation:

"In July 2018, the consultancy team has shared their initial observations with the task force. Both parties have worked out the general approach in delivering the project and the key activities in the coming months, namely to set up some focus groups to collect views directly from [bus captains] and frontline staff on their needs in terms of psychological support and wellbeing, to plan the training of driving instructors which was scheduled to start in September 2018, to further review the recruitment process so as to maximise its effectiveness, and to develop supporting activities

for building a balanced and healthy work life."

Are you able to provide any more information as to when the results of this enterprise are likely to bear some fruit?

MR JAMES WONG: (Via interpreter) According to information from CU Hong Kong, the project is ongoing. Soon, we are going to make arrangements to let bus captains of different experiences and frontline staff members to form focus groups so that zero Hong Kong can understand the stress of frontline staff as well as the difficulties that they face. According to our plan, we are going to carry out a questionnaire/survey for all frontline staff of the company so as to find out further from them about the difficulties and then CU Hong Kong will formulate a programme so that we know how to tell bus captains ways to ease their stress, and it will start with the driving instructors of BCTS.

The instructors will soon be given courses so that they know how to relieve their work stress, so that they can in turn teach the bus captains.

So we start with the driving instructors and the instructors will teach the bus captains.

As far as timing is concerned, it is ongoing. In August, we are going to have the focus groups. In September, it is hoped we can finish the questionnaire

and then we can train the driving instructors. It will continue and we hope that by the end of the year we are able to complete the whole exercise.

The target is we want to train the trainers, that is the driving instructors. We hope they will stay with the company and they will continue to train the frontline staff members.

DR NORMAN LEUNG: Mr Chairman, perhaps I should add that my initiative goes beyond that. I am hoping we are going to set up a department consisting of professional industrial psychologists and they will form part of the set-up of the company, so that they can stand ready to offer whatever might be needed by other colleagues in the company. So there would be a new department. You know, I don't know, subject to the consultancy recommendation, there might be, say, one unit in one of the four major depots. There might be someone posted to the recruitment department. It all depends. I am working on that. It's not just an ad hoc project, no.

MR PETER DUNCAN: Thank you, Doctor.

CHAIRMAN: Forgive me, Mr Duncan.

Dr Leung, when, if you have any idea, do you hope that this advice could be acted on in the recruitment process? What timescale do you have for that?

DR NORMAN LEUNG: I don't have a ready answer to that,

Mr Chairman, I'm sorry.

CHAIRMAN: No, I understand.

DR NORMAN LEUNG: But I hope that it can be done as soon as possible. Basically, I want to set up this new department as soon as possible and to have in place professional psychologists working as colleagues in our company.

CHAIRMAN: Thank you.

MR JAMES WONG: (Via interpreter) I have something to add with regards to your question. I am the project manager for this project. During recruitment, we consider the fact that bus captains are a professional role, so the work nature is closely related to work attitude. So, with the help of psychologists, we hope to identify the right candidates during recruitment, and in turn they can help fulfil the roles of bus captains.

Thank you.

CHAIRMAN: Mr Duncan.

MR PETER DUNCAN: Thank you, Chairman.

Could you go, within the same file, please, to page 185. This is an extract from the second submission by the company to the committee.

I just want to bring to your attention the third of the questions that was asked at that stage. That is:

"Please describe what part, if any, of an assessment

of the emotional intelligence and stress tolerance of a candidate played and plays in the previous and existing system for the recruitment of bus captains. In such previous recruitment and in the current system of recruitment are any enquiries directed at an assessment made of a prospective bus captain's ability to 'handle difficult passengers'? If so what was ... the nature of those enquiries and the related assessments?"

I just want you to confirm for the record that we will find the answer to that question on page 185 and 186. Is that correct?

MR GODWIN SO: Yes.

MR PETER DUNCAN: Just one aspect of that I would like to confirm, please. Page 186, the second bullet:

"A sample [bus captain] candidate interview evaluation form is annexed ..."

And you have given the annex reference. We might just take a quick look at that. We will find that at KMB-10 at page 4439.

Is that the form, at KMB-10/4439, which is currently used at the evaluation form in this context?

MR GODWIN SO: Yes, but some columns are no longer applicable.

MR PETER DUNCAN: Please explain.

MR GODWIN SO: (Via interpreter) We can look at the next

page, 4440. You can see there is a box called "DISC Test Evaluation". This is a personality check. A professional firm would conduct some questionnaires for the candidates. The candidates can make choices. For example, the candidate can describe their own personality as outgoing or any other adjective. The candidate can tick the most applicable or the least applicable boxes that describe them.

After review in 2014, the form was deemed to be ineffective, so this field was no longer included. The rest are still in use now.

CHAIRMAN: Although it's been discontinued, can you help me at least with the acronym, "DISC"?

MR GODWIN SO: (Via interpreter) "DISC" is an acronym. It refers to a form; I can provide that after the meeting.

CHAIRMAN: Thank you.

MR GODWIN SO: Can I continue?

CHAIRMAN: Please do.

MR GODWIN SO: (Via interpreter) Even without the DISC test, there was still something to assess the EQ and tolerance of the candidates. Currently, our interviewers would interview the bus captain candidates. There would be more questions. For instance, "If you face rude passengers or difficult passengers", we would assess how the candidate would react. So we would offer

hypothetical scenarios to see how candidates would react. That way, we can assess the candidate's EQ, their attitude, whether they are polite, et cetera. So we currently use interviews as a way of assessment.

Apart from interviews, each candidate would have to undergo an on-the-wheel test. Our assessors would embark on a 30-minute trip together with the candidate on the road, and we can assess the personality of the candidates and in turn we can make a holistic assessment on whether a candidate is fit for the role of bus captain.

CHAIRMAN: Mr Duncan.

MR PETER DUNCAN: Thank you, Chairman.

Having touched now on the matter of recruitment, I'm going to ask you, please, to look at page 60 of KMB-1.

Again, this is an extract from the initial submission of the company to the committee on 24 April.

The first of two questions asked on that page is this:

"What are the problems encountered in recruiting and retaining bus captains?"

If you could just read to yourself the first two paragraphs on that page. You have brought to the attention of the committee the issue of the shortage and aging problem of commercial vehicle drivers generally in

the transport industry in Hong Kong. Do you see that?

MR GODWIN SO: Yes.

MR PETER DUNCAN: Is this a matter, the shortage, that has existed for some years?

MR GODWIN SO: Yes.

MR PETER DUNCAN: I would like you to turn up, please, KMB-9, at 3840.

Has the company from time to time raised this shortage issue with the authorities in Hong Kong?

MR GODWIN SO: (Via interpreter) The shortage of bus captains started in 2016 and TD was aware of the situation.

CHAIRMAN: Thank you, Mr So.

MR PETER DUNCAN: At page 3840 of the bundle, do you see that there is a press release with regard to the matter having reached the attention of the Legislative Council; do you see that?

MR GODWIN SO: Yes.

MR PETER DUNCAN: Is it introduced by saying:

"Following is a question by the [honourable] Frankie Yick and a reply by the Secretary for Transport and Housing, Professor Anthony Cheung Bing Leung, in the Legislative Council today (June 29) ..."

We can see that's 2016. I won't read out the

question in full, but is it concerned with this matter of the manpower shortage?

MR GODWIN SO: Yes.

MR PETER DUNCAN: If we go down to the bottom of the page, do we see the reply from the Secretary for Transport and Housing?

Can I read the first paragraph of the answer:

"The Government is mindful of the manpower situation of the transport industry. Different transport trades have repeatedly relayed that the labour market has become tighter in recent years. Staff recruitment is not easy and there are signs that the workforce of the industry is aging. In response to the situation, the Government will formulate strategies together with the industry and will work with the trades at policy level if it is feasible and desirable. We also hope that the trades will strive to improve working environment and remuneration and help young people understand more about the trades through different platforms, thereby attracting new blood."

If I could just pause there, could I ask you this: has the government in fact formulated strategies together with the industry to address this problem?

MR GODWIN SO: (Via interpreter) Personally speaking, I don't think I have got any such information.

From the guidelines of the THB in the IRC bundles, it has been said that they encourage the recruitment of sufficient bus captains, but as to whether the government has got strategies, I don't think I have seen any.

MR PETER DUNCAN: If I could move to the next page, 3842, and the third full paragraph on that page, if I could bring that to attention, the secretary says this:

"In terms of staff qualifications, drivers of franchised and non-franchised buses, PLBs, taxis and container trucks have to hold the relevant driving licences of commercial vehicles. The law requires that an applicant of these driving licences must hold a valid licence to drive a private car or light goods vehicle for at least three years ... [Transport Department] is reviewing whether it is possible to shorten the requirement with a view to attract more new entrants. The target is to strive to complete the review within this year."

My question is: has the law been changed in that respect so that the period is shortened?

MR GODWIN SO: No.

MR PETER DUNCAN: Has anything happened in that regard?

MR GODWIN SO: No.

MR PETER DUNCAN: Is the company supportive of such

a change?

MR GODWIN SO: (Via interpreter) I think we need to carry out consultation and I want to know about the compensation. If somebody has only got one year's experience as a holder of a private car, I just doubt whether he can drive a franchised bus carrying 150 passengers. There is a safety consideration. Somebody gets a driving licence but it's not the same as having driving experience.

As to whether a year's duration is adequate, I think we need to study the matter and discuss about it.

MR PETER DUNCAN: Has the Transport Department come to you and said, "Look, let's discuss this, see what the issues are"?

MR JAMES WONG: (Via interpreter) The Transport Department did invite different franchised bus companies to discuss the matter, but no decision has been made. I think it was sometime last month. But no conclusion has been reached.

At that time, there was no clear position being stated. They merely tried to consult the different franchised bus operators.

MR PETER DUNCAN: Had they approached your company before last month on this issue?

MR JAMES WONG: (Via interpreter) No, not before that.

MR PETER DUNCAN: Can you look now, please, at KMB-9, page 3844. I think it will be 3855 that I want you to look at. I will be working off the translation at page 3847-1.

You should be looking at a document which is headed, "2018 [to] 19 audit", "Expenditure budget".

MR GODWIN SO: Yes.

MR PETER DUNCAN: I believe this to be a record regarding a discussion at a meeting of the Legislative Council earlier this year on 20 April.

MR GODWIN SO: Yes, but the data is on page 3847-3?

MR PETER DUNCAN: Yes. I want to take you through the questions first that were apparently asked of the government regulatory officer, who in this case seems to be the Commissioner for Labour.

The first question, reading from page 3847-1:

"Request is made to the concerning authority to inform us about the followings:

(a) Please provide the following statistics on the aging issue of drivers for public transport services and container trucks."

That's question (a), and then question (b), on the translation 3847-2:

"For job vacancy in (a), please provide the following statistics."

Then (c):

"The shortage of manpower in drivers for public transport services and container trucks has remained for a long time. Will there be any supplementary for whether the position of driver be included into the programme by the Labour Department? If yes, what's the plan? If not, what measures to help the industry in employing drivers effectively and also the relevant staffing arrangements and expenditure budget?"

If we go through the three answers, at item (a):

"From 2013 to 2017, the age distribution of drivers for franchised buses is as follows".

One will see the figures there, with in particular the age of 25 to 29-year-olds, 2013, 341; 2017, 449. At the other end of the scale, 60 to 69, in 2013, 1,167; and in 2017, 2,022 in that category. The previous category, 50 to 59, in 2017, 5,886 in that category.

Then (b):

"From 2013 to 2017, the number of job vacancies for drivers of franchised buses is as follows".

Then we can see a job vacancy in 2013 of 192, and a vacancy last year, 2017, of 366.

Then at 3847-4 we have the answer to the third question, item (c):

"Pursuant to the Transport Department, as of the end

of 2017, there were more than 370,000 holders of effective 'commercial vehicle' (note) driving licence" -- Commercial vehicles refer to private light buses, public light buses, taxis, private buses, public buses, franchised public buses, medium truck, heavy truck, articulated vehicles and special purpose vehicles -- "but only more than 90,000 commercial vehicles with the licences, therefore the key is how to attract qualified individuals to join the industry. In view of this, the government should not make a hasty consideration on the proposal of importing drivers for commercial vehicles but must take into account the livelihood of local drivers."

Now, you can see that a point which has been raised is the possibility of persons from outside Hong Kong being allowed to come in in order to alleviate the situation which appears to exist generally in the transport industry as far as drivers are concerned.

Does the company have any particular position on a proposal such as this?

MR GODWIN SO: (Via interpreter) No. May I explain?

CHAIRMAN: Yes.

MR PETER DUNCAN: Nothing to explain or ...?

MR ROGER LEE: I think so.

MR PETER DUNCAN: So you are neither for this nor against

it; is that the position?

DR NORMAN LEUNG: May I say this: this is a very political issue. I can anticipate that there would be strong objection from the trade unions in Hong Kong to introduce import of labour. In Singapore, they do it. SBS, they have drivers imported from the mainland of China, thereby solving the problem of driver shortage. They do that in Singapore. But I doubt if we can do it in Hong Kong, in view of the current political situation.

CHAIRMAN: Didn't they have a lot of trouble with striking imported labour drivers?

DR NORMAN LEUNG: I think sometime -- yes, a few months ago, perhaps sometime last year, because of the differentiation of remuneration package, but I think the problem was solved eventually.

CHAIRMAN: But you identify this as a political issue?

DR NORMAN LEUNG: Here in Hong Kong.

MR ROGER LEE: (Via interpreter) I think, in reality, there is also another point. Hong Kong is a unique city. It is quite unlike the case in Shenzhen or Shanghai or in Taipei. In those cities, they have a larger context, and in Hong Kong we have got double-decked buses and we have the right-wheel drive. So it is quite different and this is the difficulty. For the roads in Hong Kong

and for the passengers in Hong Kong, when compared with other cities and when compared with the mainland, I think we are very different.

CHAIRMAN: Mr Duncan, I propose taking a break to give everyone a little rest, and I propose taking 15 minutes. Is this a suitable moment?

MR PETER DUNCAN: Indeed it is, Mr Chairman.

CHAIRMAN: Very well. We will take a break for 15 minutes.

(4.13 pm)

(A short adjournment)

(4.29 pm)

CHAIRMAN: Yes, Mr Duncan.

MR PETER DUNCAN: Thank you, Mr Chairman.

Mr Wong, you assisted the committee in respect of the suggestion that one of the measures that might be taken to ease the manpower shortage would be to reduce the time that a person has to hold a licence before applying for a heavy duty licence from three years to one year. I think you expressed some reservations about that.

Do you have some reservations?

MR JAMES WONG: (Via interpreter) Just now, I said that TD approached the trades to discuss this issue.

MR PETER DUNCAN: Did you agree that reducing it would be a good idea or did you express some reservations?

MR JAMES WONG: (Via interpreter) We would have to look into the issue. The current requirement is that someone must hold a private vehicle licence for three years. If the requirement is shortened, we may have to consider passenger safety and driving safety. I have no personal stance on this, but our company would have to look into this before replying to the TD.

CHAIRMAN: When do you expect to reply to the Transport Department?

MR JAMES WONG: (Via interpreter) This is in process. There is no fixed deadline for us to give a reply.

MR PATRICK PANG: (Via interpreter) Mr Duncan, when we approach this issue, I think we need to strike a balance among a number of factors.

First of all, there is no compromise on safety. If we are to reduce the requirement of three years, if you simply look at the duration or the number of years, you are losing sight of the whole picture. Can we reduce the number of years required but at the same time requiring the candidate to give us information that for two years he has been driving all the time or he has such driving skills that it is up to a particular standard, or maybe we can consider having another test so that he doesn't need three years, he can have a shorter duration, but he must pass a particular

test -- can such be considered?

Of course I know that the industry, not just KMB, suffers from driver shortage, but still the prerequisite is as follows. First, we give priority to safety, and then for the other factors we have an open attitude.

Thank you, Mr Duncan.

MR PETER DUNCAN: I want you, please, to have in front of you the transcript bundle for Day 1, at page 66, so that will be bundle 1. Day 1 at page 66.

At page 66, line 8, you will see that I have asked a question of Mr Joseph Lai:

"Does that reflect the Government's position accurately with regard to the manpower shortage?"

And there is a response from Mr Lai, Mr Joseph Lai, who I can tell you was a representative from the Transport and Housing Bureau, permanent secretary.

If I can just bring to your attention, please, the answer which he provided to that question, and if I could pick it up at line 16:

"The other part of our position, regarding the chronic problem of shortage in commercial drivers, is that we are taking steps to try to -- a full legislative amendment, and I would be happy to elaborate on that in a moment or two -- full legislative amendment to relax the licensing requirement for commercial drivers.

So, basically, what happens is that, at present, if you want to apply for a licence, a driving licence, to be a commercial vehicle driver, you will have to have had a private ... driving licence for three years before you are eligible to make the application public ie the application for a driving licence for commercial vehicles.

Because of the chronic manpower shortage, we have proposed, and the trade as well as Legislative Council have agreed, that the three-year period could be reduced to a one-year period. So in future, all you need is to have a private car driving licence for one year before you can apply for a driving licence for a commercial vehicle. Commercial vehicles include, of course, buses, and that includes of course franchised buses.

We are drafting the amendment legislation, and we hope to be able to introduce that into the Legislative Council before the end of this year. If that is passed by the Legislative Council, that should also go some way towards relieving the private shortage problem. It may not provide a total answer, but hopefully it will provide some relief.

On our part, that's what we have been doing. But yes, having said that, we do also think that it's part of the franchised bus companies, as the franchisee, to

take all reasonable measures to ensure that they have the necessary number of drivers to provide service."

So you can see from that extract that apparently the government is firmly advocating reducing the three-year period to a one-year period and is drafting legislation accordingly.

Before I read this extract to you, was the company aware of this?

MR ROGER LEE: (Via interpreter) Well, what is clear is that -- well, first of all, I know it -- now, regarding the three years' driving experience, I think that requirement, to one extent or other, has discouraged some candidates from applying. Cutting it from three years to one year means that more people can go to the school to sit for the bus driving licence exam. Ultimately, you need to take the exam for class 17 and then you will qualify as a bus driver.

Now, if you reduce it from three years to one year, it means that more people will be going to the bus training school, but ultimately the threshold is whether you can pass the driving examination. It helps, because people, some people, do have the ability to do so. Whether it's three years or one year, it is still being discussed; we haven't got a timetable.

CHAIRMAN: Were you aware that the trade supports this

training, as Mr Lai states?

MR ROGER LEE: (Via interpreter) Half-half. Some in the trade of course would think about their interests, and then for the other half, fewer and fewer people are driving commercial vehicles. I think the most important threshold is whether you can pass the bus driving licence exam. For KMB, we have got two parts. The first part, you sit and pass the bus driving examination and there's a licence from the Transport Department. With this licence, basically, you can drive a bus and you can also drive vehicles like tourist coaches. So there will be more for the industry -- there would be more applicants. So I would say half-half.

CHAIRMAN: Thank you.

MR PETER DUNCAN: So, Mr Wong, when you indicated before that the government had discussed this with you, was this something which was discussed with KMB alone or was it discussed with other interested parties as well?

MR JAMES WONG: (Via interpreter) With all the bus companies together.

MR PETER DUNCAN: How many meetings were held?

MR JAMES WONG: (Via interpreter) I recall there was only one meeting. One.

CHAIRMAN: That was last month, as you put it?

MR JAMES WONG: (Via interpreter) Correct. I said it was

last month. I need to look up my schedule before I can recall the exact date.

CHAIRMAN: But you went on to say no clear position was stated.

MR JAMES WONG: (Via interpreter) We were told about what they generally have planned to do. If the number of years required is to be reduced, then there is a requirement for passenger service cost. But then such were preliminary ideas. Therefore, we have yet to get the overall picture as to what would be done.

CHAIRMAN: Mr Lai was giving evidence three months ago, telling us that the trade supported it, and you say he was asking the bus companies last month about the same issue?

MR JAMES WONG: (Via interpreter) Correct.

CHAIRMAN: Thank you.

MR PETER DUNCAN: In February this year, the new guidelines with respect to shifts and rest times, and so forth, were issued. Has the issue of those guidelines affected the ability of the company to recruit staff for bus driving positions?

MR PATRICK PANG: (Via interpreter) Mr Duncan, if I am to answer your question directly -- well, maybe first of all let me say this. The Transport Department revised the guidelines this year, but then the revised

guidelines are supposed to be fully implemented in the second quarter of next year. But our initial assessment is that -- and in fact we are already carrying out some system modifications; in other words, we are upgrading the computer programs so as to tie in with the revised guidelines. Well, for the new guidelines --

CHAIRMAN: Mr Pang, this was not an open-ended question. The question was simply this: has it affected the recruitment of bus captains? You can probably answer that "yes" or "no".

MR PATRICK PANG: (Via interpreter) If you only talk about recruitment, yes, it will be affected.

CHAIRMAN: That was Mr Duncan's question.

Yes, Mr Duncan.

MR PETER DUNCAN: In what way has it been affected?

MR PATRICK PANG: (Via interpreter) We have done some calculations. If we are to follow the revised guidelines, we need to recruit an extra 200 bus captains. Then, under the revised guidelines, we have the special shift, and for this special shift, in future, if we are to do away with it and if we have a strict shift, then we need another extra 1,000 bus captains.

MR PETER DUNCAN: I will come to the ramifications of the extra shift somewhat later, but I'm sorry I haven't made

myself clear. Since February, has the issue of the guidelines made it easier or made it harder, or has it had no effect, on the company's ability to recruit people to the position of a bus captaincy?

MR GODWIN SO: (Via interpreter) This depends on how candidates respond to the new guidelines. The company did a lot in February when the guidelines were revised. I do not feel that candidates knew or cared much about these guidelines, or the new guidelines.

MR PETER DUNCAN: So I infer from that that it has had no effect; the position is much the same now as it was in January; is that correct?

MR GODWIN SO: (Via interpreter) We did not feel that there was an effect.

MR PETER DUNCAN: Now, you have indicated that in order to comply with the new guidelines, you are going to have to engage something like 200 additional captains.

Since the Tai Po accident, it is true, is it not, that you have altered your policy with regard to the work of part-time captains and to the engagement of part-time captains?

MR ROGER LEE: (Via interpreter) Yes.

MR PETER DUNCAN: Does the figure you have given us, the extra 200, take that into account?

MR ROGER LEE: (Via interpreter) No.

MR PETER DUNCAN: The decision you have made with part-time captains, does that mean that number of 200 will actually increase?

MR GODWIN SO: (Via interpreter) The 200 extra bus captains to deal with the new guidelines, we were referring to full-time captains. In February, we made a change to our policy on part-time captains. The percentage of part-time captains in terms of the total captains of our captains was only 3 to 4 per cent before -- after that change in February.

MR PETER DUNCAN: Thank you. I'm going to ask you to go to page 58 of KMB-1, please.

The question you are asked -- again, this is the first submission:

"Does your company have adequate full-time bus captains to provide proper and efficient service? Is there a need for your company to continuously employ bus captains on a part-time basis to make up for the manpower shortfall and/or to augment the core staff complement to cover special events and absences? Please also furnish the number of bus captains on different employment terms and the extent to which the current staff complement can meet your operational requirements?"

If I could go to the last bullet on the page. You

have said there that:

"[bus captains] are employed in the following types of employment based on [the] date of appointment:

-- Daily-rated [bus captains]: those who were employed before May 1999."

Forgive me for asking this, but does that mean these are bus captains whose salary is based on so much per day?

MR GODWIN SO: Yes.

MR PETER DUNCAN: And equally, monthly-rated bus captains, they are paid by the month, a monthly amount; is that correct?

MR GODWIN SO: Monthly amount, yes.

MR PETER DUNCAN: Then the third group, the retired bus captains who are engaged for re-employment, they can be paid either on a monthly rate or a third way, on the basis of so much per hour; is that correct?

MR GODWIN SO: (Via interpreter) This depends on the employment mode. If they choose an hourly rate, they would be rostered and paid on an hourly basis. For monthly-rated BCs, they would be rostered and paid on a monthly basis.

MR PETER DUNCAN: Thank you. We can see the numbers, at least as they were at the time of the return, 24 April, on page 59. Those on a daily rate, 2,105 for KMB; those

on a monthly rate, 5,201; retired folk who are re-employed, rated on an hourly basis, 577; retired who have come back on a monthly basis, 383; and then external hourly-rated bus captains, 371.

Do I infer correctly that external hourly-rated bus captains would all be part-time?

MR GODWIN SO: (Via interpreter) Correct.

MR PETER DUNCAN: Then you have the figure of bus captain vacancies at the end: 28 February, 280.

MR GODWIN SO: Yes, at that moment.

MR PETER DUNCAN: If we go back then to page 58, and if I could bring to your attention the second-last bullet on that page, concerning part-time bus drivers:

"Since mid-February 2018, KMB has stopped recruiting new external hourly-rated [bus captains] who work short hours (ie below 18 hours per week)."

Is a consequence of that that KMB will still engage new part-time workers as long as they work more than 18 hours per week?

MR GODWIN SO: Yes.

MR ROGER LEE: (Via interpreter) I have something to add. Part-time and full-time captains are different. With a threshold of 18 hours per week, we would have to know any employment of the bus captains prior to their work and we know whether they were engaged with other

vehicles, et cetera. So it might be hard to define part-time or full-time work by the threshold of 18 hours per week, so that's why we drew the line at 18 hours per week for part-time drivers.

MR PETER DUNCAN: I do infer from that that you consider it is more likely that people who work more than 18 hours will not have another job which interferes with their driving? Is that the rationale?

MR ROGER LEE: Yes and no.

(Via interpreter) Yes, if someone works continuously more than 18 hours every week, we would ask if the bus captain has other work. If the answer is yes, we must understand the nature of such work and whether their employers allow them to drive. This is very important.

Let's assume the bus driver also drives a taxi. If he drives 18 hours at KMB, we might not know the total number of hours spent driving. We have rules in place. That is, we have to find out about the other employment of the driver or else we won't be able to understand their profile.

MR PETER DUNCAN: And what's the perceived problem with respect to a person, say, who wanted to work for you just 12 hours a week?

MR ROGER LEE: No. Simply just reject.

MR PETER DUNCAN: Yes, but why do you have no interest in

that sort of person?

MR GODWIN SO: (Via interpreter) If the applicant does not provide the information, we cannot take the reasonable step to concern -- to find out about their total number of work hours or the possible problem of fatigue. We require applicants to make several declarations. First of all, their work outside, and from our records, for the 300-odd captains, 40 per cent are clerical post workers, and the remaining 30 per cent have no other employment and about 25 per cent are engaged in other driving duties or employment. They have to assure us that their work does not contravene with the work at KMB and there is no objection from their other employers.

So we want to make sure that there will not be driving fatigue from captains engaging in two driving jobs. For those who work below 18 hours per week, it would be hard for them to provide such information. For part-time captains, even though they are part-timers, they must take their work seriously. If they have to work 18 hours per week, we have to make sure that their driving skills are sharp.

So this is one of the factors we would consider.

MR PETER DUNCAN: But the bottom line with that system, if I may observe, is the quality of the information you are getting back with regard to the other employment of the

individual. The quality of that will not necessarily depend on whether a person works for you for 12 hours or whether he works for you for 20 hours. Do you understand my point?

MR GODWIN SO: (Via interpreter) I do not agree.

MR PETER DUNCAN: Why do you not agree?

MR GODWIN SO: (Via interpreter) We know that a lot of people love driving buses of different models, that's why they become part-time captains. But do they have the right mindset? This is something I will not comment on. As I said, our company has guidelines in place, so we must apply these standards.

So, for continuous employment of someone who works 18 hours per week, we can ask them what other jobs they have outside. That's why we set the threshold at 18 hours. We feel that we would not recruit less bus captains on shorter hours, which would affect our productivity, so the threshold of 18 hours is the right trade-off between productivity, and that's why we set this threshold.

MR ROGER LEE: (Via interpreter) If you do not set such threshold, even if a captain has great driving skills, if the captain only works one or two hours, it would be very difficult to roster them. So this is something we must bear in mind.

CHAIRMAN: Mr Duncan, do you propose taking the representatives to the declarations?

MR PETER DUNCAN: I do ultimately, but not at this point.

CHAIRMAN: Thank you.

MR PETER DUNCAN: We will come to those later, in a different context, Mr Chairman.

CHAIRMAN: Of course.

But whilst we are on this topic -- you have given some overall statistics for the jobs -- the fact they don't have jobs, and those that have driving, 40 per cent clerical, 30 per cent no other employment, 25 per cent engaged in driving. Can you provide those statistics to the committee?

MR GODWIN SO: (Chinese words not interpreted).

CHAIRMAN: And in particular details of the other driving jobs?

MR GODWIN SO: (Via interpreter) Yes, it's possible.

CHAIRMAN: For example, presumably --

MR GODWIN SO: (Via interpreter) Like driving goods vehicles or chauffeurs.

CHAIRMAN: Yes, that's what I have in mind: coaches, chauffeurs, taxis, PLBs, and so on. If you could provide that, that would be helpful.

MR GODWIN SO: Yes.

CHAIRMAN: Thank you.

MR PETER DUNCAN: Was this change prompted by the accident at Tai Po?

MR GODWIN SO: (Via interpreter) Yes, triggered by this incident. This is because at that time, in the society, there was this idea; that is, we as a bus company had been engaging part-time bus captains. We weren't talking about the skills of the part-time bus captains. The question was maybe the bus captain had started with us in the evening, we didn't know about his daytime job, whether he was very tired. At that time, we thought we could have done better, so we paused and then we fine-tuned the arrangements and then we came up with the criteria that it should be drawn at 18 hours, and we have got 300-plus bus captains, we offered them the chance to convert and the new policy has been in place since then.

MR PETER DUNCAN: Prior to the Tai Po accident, how many part-time bus captains did you have working less than 18 hours a week?

MR GODWIN SO: (Via interpreter) Among the 300-plus bus captains, I can't give you the exact figure, 200-plus could work for more than 18 hours. Less than 100 worked less than 18 hours.

MR PETER DUNCAN: Could I take you, please, to page 104 of the same bundle. This is the part 4 of the report sent

to the Transport Department following the accident at Tai Po, so it's actually earlier in time. It's dated 12 March. Part 4 is concerned with recruitment, and the first heading is, "Discontinuance of Employment of Part Time [bus captains]". What is said in this paragraph is, firstly, that:

"KMB has discontinued the employment of all part-time [bus captains] whose working hours fall below 18 hours per week."

So you will see it's slightly differently expressed from what is at page 58, in that 58 talks about stopping the recruiting of new hourly-rated BCs, whereas this mentions the discontinuance of all part-time BCs whose working hours fall below 18 hours per week.

Leaving aside how it is expressed, are you conveying the same message in each of these communications?

MR GODWIN SO: (Via interpreter) The two are consistent. They all talked about those working short working hours, that is less than 18 hours per week. First of all, there won't be recruitment of new candidates in this category. Second, for the one shown on the screen, for the existing employees -- now, the two are different. Just now I talked about stop recruiting new candidates, and then here we talk about the existing staff; we talk about discontinuing the employment. We weren't talking

about dismissing them because they are hourly-rated, it's just that at that time we stopped rostering them, we didn't assign jobs with them, and then we discussed with them, as mentioned in the second paragraph, that is we persuaded them to convert into contract hourly-rated. That is whether they could work longer hours. Because some of them didn't have an alternative job or their income would be affected. So at that time we said, "You have been working shorter hours, maybe you would like to take up another role, say for example being an assistant at the terminus."

So we are talking about different things. For that, we didn't want to affect their income.

MR PETER DUNCAN: I understand. Thank you very much.

What is meant by "convert to contract hourly-rated BCs"? Would they not have been contract hourly-rated before this change?

MR GODWIN SO: (Via interpreter) Correct. In the past, we just called them part-time BCs. Since February, for the newly recruited, they would fit the arrangement of four weeks in a row, 18 hours a week, and we talk about continuous work. So it would be confusing to use "part-time", and that's why we use the term "contract hourly-rated BC".

For this group of employees, they worked for less

than 18 hours in the past, then we talked to them. If they could take up more work, then that means they would drive for more than 18 hours. That's one way out. Another way is they could take up other posts.

MR PETER DUNCAN: Thank you.

Could I take you through to page 145, please. This is the first of two action plans which you have provided. This first one was provided to the Transport Department on 10 April. I am sorry, I should have referred you to page 138. You can see the letter there at 138, and the second paragraph refers to an action plan.

Do you have page 138?

MR GODWIN SO: Yes.

MR PETER DUNCAN: Thank you. This response of 10 April -- so again, it was before the first submission to the committee -- contained the action plan and I am asking you to turn up, please, page 145.

We can see the first of the topics there, consistent with what you have told us, number 1:

"To discontinue the employment of part-time [bus captains] whose working hours fall below 18 hours per week."

The action plan:

"No more new employment of part-time [bus captains]

with working hours below 18 hours per week since 15 February 2018."

So that was done?

MR GODWIN SO: Yes.

MR PETER DUNCAN: Secondly, number 2:

"To offer the previous part-time [bus captains] the option to convert to contract hourly-rated [bus captains] or to take up alternative duties in the company."

Then the action plan states this:

"Status of the 209 previous part-time [bus captains]:

Agreed to work [more than] 18 hours a week: 78.

Agreed to work over 10 hours a week; declare doing part-time [bus captains] at KMB will not breach the employment contract with their employer", and then a third row, "Quitted".

So if I could concentrate on the middle classification, do I read that correctly that some of the previously employed part-time bus captains are now permitted to work more than 10 hours a week but less than 18 hours a week, provided they are not breaching the employment contract with their employer?

MR GODWIN SO: Yes. Can I supplement?

MR PETER DUNCAN: It is not universally more than 18 hours?

If you have been previously employed by the company, you can work, say, for 12 hours a week, provided there is a declaration that the employment contract with other employer is not breached?

MR GODWIN SO: Yes.

MR PETER DUNCAN: What about those who agree to work more than 18 hours a week? There is nothing in this particular box which suggests that they have to make a declaration with regard to whether or not they are breaching their employment contract. So what is the position with those who agree to work more than 18 hours a week? Do they have to make a declaration?

MR GODWIN SO: Can I one by one to explain slowly?

MR PETER DUNCAN: Please.

MR GODWIN SO: (Via interpreter) Someone was previously a part-time BC, now he opted to become a BC with more than 18 hours; he signed a new contract, and he is regarded as a contract hourly-rated BC. He has to disclose his outside employment. He has to disclose his outside employment. So this is the first category: agreed to work for more than 18 hours.

For the second group, they are still part-time BCs. This is because at that time there was a group of part-time BCs, they have been working for us, and all of a sudden they haven't been assigned work. They talked

to us. They have expectations of us. We have been employing them. We have stopped new employment. We know about their driving skills. So we tried to do something which is a compromise to both parties. They can continue to drive, but then, as Mr Lee has said, we don't want them to drive an hour or two. At least they should drive 10 hours. And they have to declare that doing so would not breach the employment contract of the other job, because I know that for some employment contracts part-time work would not be allowed and they shouldn't have been working for us.

CHAIRMAN: Before you go on, Mr So, we have received evidence from drivers in this very category, Part-time Drivers Union.

Carry on.

MR GODWIN SO: (Via interpreter) I have finished.

MR PETER DUNCAN: I'm just wondering why, in the first category, there is no reference to the requirement for a declaration.

MR GODWIN SO: (Via interpreter) We have omitted -- well, in fact, the 78 of them did declare, they did report to us about their alternative employment.

CHAIRMAN: So was this done in a form?

MR GODWIN SO: (Via interpreter) Yes, and I can supply a copy.

CHAIRMAN: Please do.

MR PETER DUNCAN: So whether you work more than 10 or whether you work more than 18, you have to sign the same declaration; is that correct?

MR GODWIN SO: (Via interpreter) They are two different documents, but I can provide both to you.

MR PETER DUNCAN: Thank you.

While we are on the subject of these sorts of documents, I don't believe in the bundle we have any example of an employment contract with the bus captain. Is there a standard letter of employment that is entered into?

MR GODWIN SO: Yes.

MR PETER DUNCAN: Could you also provide that, please?

MR GODWIN SO: I will.

MR PETER DUNCAN: Is there just one form for all bus captains or are there different forms depending on their status?

MR GODWIN SO: (Via interpreter) For the new recruits, one form, and then there is another one. That's for the re-employment of retired BCs. So two types.

MR PETER DUNCAN: Thank you. We would be grateful if you could make available the two types. Thank you.

MR GODWIN SO: Yes.

MR PETER DUNCAN: Now, if we could go back, please, to

page 124. I have a few more questions about part-time bus drivers, bus captains.

In fact, I think if you start with page 117 in the bundle. This I think is the first letter which was written by the Transport Department to the company after the Tai Po tragedy. The letter is dated 12 February, and there are a number of -- (a), (b), (c), (d) -- questions, and the first of those questions we can see at (a). At the moment, I'm concerned with question (b):

"KMB's policy on part-time bus captains and details of these captains, including the number of part-time captains, deployment and working hours, et cetera".

If you then turn to page 124, you will pick up the question at the top of that page.

KMB's response is described to issue (b), as we can see it in (i):

"KMB's policy on part-time [bus captains]".

If you go through the bullets, there are seven of them, they basically say that part-time bus captains are treated in the same way as full-time bus captains in each instance, save for the third, which is concerned with training. So the first bullet:

"Part-time BCs have the same entry requirements as full-time BCs ..."

The second requirement:

"Part-time BCs are subject to the same assessment of instructors ..."

Then we get the third one:

"Part-time BCs receive appropriate training before passing out for duty ..."

So it's not "the same training", it is "appropriate training".

If I could just try to identify any differences which existed at least at this time, that's February 2018, between the training which was provided to full-time bus captains and the training which was provided to part-time captains respectively.

In that respect, can I take you, please, to page 120. I think the first difference -- sorry, is there a difference in the qualification and recruit requirements in that for a full-time candidate, the alternative requirement is the holder of a private car licence for at least three years, or the holder of a valid class 10 or class 17 licence, whereas for a part-time candidate, in (ii), you must have either the class 10 or the class 17? Is that the first difference?

MR GODWIN SO: Yes.

MR PETER DUNCAN: Thank you.

CHAIRMAN: Presumably, that's because you weren't prepared to bear the cost of training someone to be a part-time

captain if all he held was a driving licence; would that be it?

MR GODWIN SO: Yes.

MR PETER DUNCAN: Thank you.

The second matter to which I wish to bring your attention is (iii), "General training", and for full-time candidates, I refer to the bullet under (iii), he is required to "undergo an 18-day training (9.5 hours a day) (subject to extension based on assessment of the candidate's performance by instructor)."

And if we turn the page to page 121, we will see the comparable requirement for the part-time bus captain. Under (iv), he or she is required to undergo a training of 2.5 days, as compared to 18 days, of 9 hours a day. Is that the difference?

MR GODWIN SO: Yes, but I mention that for the (vi), this part-time BC with class 10 or class 11 driving licence.

MR PETER DUNCAN: Yes. There is still a difference, is there not, between the length of the training, in that the full-time bus captain has to undergo an 18-day training, whereas the part-timer has to undertake only a 2.5-day training?

MR GODWIN SO: Yes, at the moment.

MR PETER DUNCAN: Then a third difference, if I understand this correctly, if you look at page 121, "Phase 2", the

route training at the bottom of that box is conducted on two routes; whereas if you look at the part-time position at page 122, the route training is for one route. Is that a difference?

MR GODWIN SO: Yes.

MR PETER DUNCAN: Then a further difference, if I understand this correctly, at page 121, the full-time -- I'm looking at the bullet just above (iv):

"A full-time [bus captain] candidate will have a total of at least 68 hours of on-the-wheel bus driving training (inclusive of the time for route training) under the supervision of instructors."

And the equivalent at page 122, just under the box:

"A part-time [bus captain] candidate will have a total of at least 16 hours of on-the-wheel bus driving training (inclusive of the time for route training) under the supervision of instructors."

So is that a fourth difference?

MR GODWIN SO: Yes.

MR PETER DUNCAN: Do you consider that the difference in the training between full-time captains and part-time captains is justified?

MR JAMES WONG: (Via interpreter) First of all, during the time of -- that was the training situation at that time around the incident, but not the current training

situation now.

Mr Duncan just now cited a number of training requirements or factors. For training on full-time captains, for the 18 hours, each instructor would train two candidates. For part-time BCs, the training would be one-to-one. So in terms of direct guidance and education for bus captains, the time allocated would be greater. At that time, the thinking was that this could achieve the objective of enabling them to drive. So that was the situation at the time.

Meanwhile, the requirements of 18 days and 2.5 days refer to general training -- if a captain cannot fulfil the requirements within 18 days, the period might be extended, and likewise, for part-time captains, if the training cannot be completed within 2.5 days, the training would be extended.

MR GODWIN SO: (Via interpreter) I would like to add to that. In terms of justification, in the past, the 18 days of training was provided in two phases. With the first phase, the driver can secure a driving licence. The captain would have held a licence already, ahead of the training. So the direct comparison should be between 2.5 days and nine days.

Secondly, for full-time captains, the ratio of instructors to candidates is two to one, whereas for

part-time captains it would be one to one, and for full-time captains they would train on four to five bus types, whereas for part-time bus captains, they would be trained on two bus types. For the number of routes trained, for full-time BCs, two, and for part-time BCs, only one.

So the scope of education would be less diversified for part-time captains because they are likely to only operate one to two routes, and the training given by instructors would be on a one-to-one basis.

CHAIRMAN: So is the short answer to the question "yes"?

MR GODWIN SO: Yes, it's satisfied.

CHAIRMAN: Yes.

MR PETER DUNCAN: Do the full-time drivers and part-time drivers drive the same buses?

MR GODWIN SO: Yes.

MR PETER DUNCAN: And leaving aside the number of routes, the number of different routes that drivers drive on, do they drive on the same routes?

MR GODWIN SO: (Via interpreter) It's hard to give a direct answer. We have more than 400 routes. For our new bus captains, whether or not they are full-time or part-time, at the beginning they would drive the easier routes. As to whether all captains would drive the same routes -- well, we have four depots, but at the

beginning drivers would drive the easier routes.

MR PETER DUNCAN: I know you have reviewed the training provisions in recent times, and we will come to those in the morning, but can I just ask you this question. Under the new proposals -- leave aside the practice note but just your new proposals -- will the training for bus captains be the same whether they are full-time or whether they are part-time?

MR GODWIN SO: Yes.

CHAIRMAN: Mr Duncan, thank you. If that's a convenient moment, then we have reached the end of our day, tiring no doubt as it was for everyone, not least the stenographers.

We will adjourn now and we will resume tomorrow at 10 o'clock. Thank you.

(5.30 pm)

(The hearing adjourned until 10.00 am the following day)

2018年8月10日

上午10時01分恢復聆訊

出席人士如前。

主席：（經傳譯員）梁博士，各位早晨，歡迎大家嚟到繼續出席我哋嘅聆訊。梁博士有咩嘢你想講一講呢？

梁乃鵬先生：（經傳譯員）係，主席，各位早晨。我想用兩分鐘講一講。主席，我係講關於鄧樂勤先生响4月提出嘅要求，要求星期二要求一個報告，2018年3月12號。主席我有過一個機會係睇番個報告嘅第二、第三部分，我係信納第三部分嘅報告，即係話關於巴士司機嘅事項呢部分，係唔會影響呢個警方進行嘅調查，唔會受到影響。

我都覺得呢個報告應該儘快交畀呢個獨立檢討委員會，等委員會更加明白我哋點樣招聘，點樣做訓練，同埋係點樣監察巴士司機嘅表現。請你接納我嘅道歉，即係話我之前冇提交呢個報告嘅第三部分畀委員會，至於話報告嘅第二部分，即係有關意外調查嘅報告，我認為內容向公眾公告，係並不適宜。我亦都認為呢個報告係同呢個委員會嘅職權範圍，並不符合。

我亦都想多謝委員會就提醒我，呢個綠色駕駛監察系統嘅事項，我已經同管理層傾過，即係話究竟喺星加坡呢個 Tower Transit 公司，即係話响星加坡佢哋係點樣實施呢個綠色駕駛嘅監察系統。我亦都從中得到一啲啟發，上次所講呢份報導文章，或者我哋應該要重新考慮畀表現良好嘅司機係一個獎金嘅制度，應該安排，唔需要一個係好大額嘅獎金，但係都係一種對於巴士司機係一種獎勵，亦都可以係鼓勵安全駕駛同埋綠色駕駛嘅行為。

主席：（經傳譯員）多謝你梁博士。我想問一問關於嗰個報告嘅各個部分，有部分就要求公開，有部分唔公開，咁上次你嘅信件佢响 8 月 9 號呢係信件嘅最後一段，係向我哋提出一啲睇法，鄧生，你有咩嘢睇法？

MR DUNCAN：（經傳譯員）報告第三部分，我哋喺响377頁，九巴文件冊裏面377頁。我就覺得第三部分只係一個簡介，就即係要求係附件 5 嘅一啲要求資料嘅一個簡介。

主席：（經傳譯員）係，我哋收到回覆？

MR DUNCAN：（經傳譯員）係，收到，所以冇乜特別關於第三部分事項係需要再睇。

主席：（經傳譯員）即係根據你嘅意見，第二部分我哋會採取跟進行動，第二部分有一啲材料係唔同性質，而家我哋都唔知道佢有咩嘢內容。意見或者係睇法，對委

Transcript by Epiq Hong Kong, Limited

員嚟講係無關重要，但係嗰個係有關記錄，可能對我哋嘅工作有關係。正如你所講，我哋可以稍後再跟進。

MR DUNCAN：（經傳譯員）我哋會咁做，主席。多謝你主席，梁博士各位，早晨，上次研訊完之後，我哋收到公司嗰兩封信，我想睇第二封先。呢個係 KMB-1，297 頁。我想請大家睇睇最底 297 頁第一段，佢就提述到第二項個項目，呢個係關於嗰啲好急彎，二十九個嘅，我哋响星期二都講過。

信件就話關於第二項，即係話呢個我哋要求嘅第二項事項，佢哋就有啲附件作為信件附件 B，咁就有羅馬數 I 去到第 VI 項，就提述一啲事項。跟住去到第 VI 項羅馬數字，呢個係一個陳述書，有啲係電郵嘅紀錄，呢個 Owen Eckford，當時係營運董事，就唔贊成呢個咁樣安全改進計劃。

我想喺呢度探討一下，喺呢方面我可唔可以請你亦都同時睇一睇同一套嘅文件 309 頁。309 頁去到 311 頁，第一項就係嗰個信件提過，呢個係一個會議記錄，即係話關於係辨析出嚟嘅急彎嘅安全速度限額嘅檢討，呢個 2014 年 7 月 31 號，呢個會議總共維持兩個半鐘頭，有啲人出席咗呢個會議。我哋可以自己睇番個 309 到 311 頁就可以睇到個會議記錄嘅內容，312 就係第二項文件，正如你文件所講第二個事項。

其實呢個係一個表格嚟，表格就列出嗰三十個急彎，312 頁到 314 頁，去到 315 頁，呢個第三個事項，即係個文件所講嘅第三個事項，呢個係一個係通訊嘅計劃，睇到即係打算點樣通知各方計劃，由 315 頁開始去到 316 頁，我認為呢個係一啲好詳細提議，即係關於點樣溝通嘅，即係將當時嘅計劃點樣係通告有關嘅方面。

318 頁，呢度就見到有一啲相片，好多張相片，就係有關嗰啲彎道，彎位，一路可以去到 351 頁。352 頁就係所提出嘅信件第五項，呢個係一個係所謂係草擬本嚟嘅，係嗰個安全速度嘅一張卡，352 頁見到呢個係草擬本，安全速度嘅卡嘅草擬本；跟住第六項 353 頁到 355 頁，呢啲係一啲電郵嘅信件。

Eckford 先生，你首先喺信件講，就話佢並不贊成，並不通過呢個咁樣嘅計劃，我想你睇睇呢啲係電郵嘅內容。首先開始嘅時候，就係有一份電郵 354 頁開始，呢個係 Gary Wong，咁頭先我發出，我哋都已經知道佢係當時安全服務組別嘅主管，2014 年 8 月 14 號發出畀 Edmond Ho，何先生，當時係公司嘅董事總經理。啱唔啱呢？何生係咪當時嘅董事總經理？

梁乃鵬先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）佢幾時就唔再做董事總經理呀？

梁乃鵬先生： Roger should say.

李澤昌先生：（經傳譯員）2015 年 1 月 1 號開始唔做。

MR DUNCAN： Thank you.

主席：（經傳譯員）咁你開始就你嘅任期，係咪呀？

李澤昌先生： Yes.

MR DUNCAN：（經傳譯員）佢係咪離開公司呀？

梁乃鵬先生：（經傳譯員）佢留低嘅，就作為一個董事局嘅非執行董事，我諗做咗過去八年都係咁樣，都係做呢個職位。

MR DUNCAN：（經傳譯員）好，睇番呢份電郵，呢個係由黃生發出嘅電郵畀何先生，我就唔係成封電郵讀出嚟，不過你可以快快咁攞一下，你就見到，佢就話畀何生，同埋有啲副本有送交到其他人。佢就講到一個係現場嘅一個測試計劃，就關於係嗰三十個急彎嘅安全速度嘅一個測試，就 8 月 12 號完成咗。

主席：（經傳譯員）鄧生，你未講之前，可唔可以建議下，你可唔可以讀第一段出嚟？

MR DUNCAN： Yes.

主席：（經傳譯員）因為嗰度可能會引起一啲對我嚟講，有用嘅一啲問題，因為呢個係公共嘅研訊嚟嘅，因為除非佢哋有啲係背景佢哋好難明究竟發生咩嘢事？

MR DUNCAN：（經傳譯員）好，我而家讀出第一段「能夠好高興通知你，關於安全車速，即係關於嗰三十個識別咗嘅急彎同埋迴旋處嘅現場測試，就已經喺 2014 年 8 月 12 號星期二完成咗，你可以睇番夾附喺呢一度嘅 Excel 嗰檔案呢，就可以睇到我哋嘅 EO，佢計出嚟嗰啲安全嘅車速，咁同埋訓練學校嗰啲授權嘅人員，就係點樣計出嚟，然後就係將佢核實嘅，咁之後 EO 有關嘅訓練學校、車廠、龍運巴士公司同埋安全及服務質量部，佢哋係一齊做咗一個最後嘅檢討嘅。」

主席：（經傳譯員）大律師，呢度用咗好多簡寫，你可唔可以話畀我哋聽呢啲簡寫係咩嘢意思？請你通過九巴嘅代表，睇下呢啲簡寫係咩嘢意思？

MR DUNCAN：（經傳譯員）請各位幫係我哋睇一睇呢啲簡寫係咩嘢意思，我哋睇下已經係抄寫咗喺度嘅呢啲，咩嘢叫做 DMD，呢個 Evan Auyeung？

李澤昌先生：（經傳譯員）佢就係副董事總經理。

MR DUNCAN：（經傳譯員）HR，係咪即係人力資源部？

李澤昌先生：（經傳譯員）係，啱。

MR DUNCAN：（經傳譯員）OD 呢？

李澤昌先生：（經傳譯員）車務總監。

MR DUNCAN：（經傳譯員）呢一個嘅位置，今日係咪都仲係存在呢？

李澤昌先生：（經傳譯員）有。

MR DUNCAN：（經傳譯員）係咪就係而家呢位梁生？

李澤昌先生：（經傳譯員）係，冇錯。

MR DUNCAN：（經傳譯員）DOD 呢？

李澤昌先生：（經傳譯員）副車務總監。

MR DUNCAN：（經傳譯員）SSQ 呢？

李澤昌先生：（經傳譯員）安全及服務質量部。

MR DUNCAN：（經傳譯員）好嘞，嚟番個電郵個本體。第一段 EO 呢？

李澤昌先生：（經傳譯員）工程主任。

MR DUNCAN：（經傳譯員）DI 呢？

李澤昌先生：（經傳譯員）駕駛導師。

MR DUNCAN：（經傳譯員）BCTS？

李澤昌先生：（經傳譯員）巴士車長訓練學校。

MR DUNCAN：（經傳譯員）我諗我哋都處理咗第一段嘅簡寫。咁之後仲有提述到一個檔案，就係夾附喺呢一度，就係用 Excel 嘅方式寫嘅一個檔案。咁第二段開頭嗰度都有講，你睇唔睇到呀？咁呢個電郵繼續咁講，佢話關於嗰啲理論嘅計算，同埋嗰三十個已經識別出嘅地點，安全車速嘅核實。

同埋如果係好可能令到巴士有翻側嘅風險嘅話，咁同埋有時就係轉彎嘅時候，嗰個半徑係有唔同，令到車長可能會有錯誤，譬如話佢哋會記錯咗，即係無論你畀幾好嘅訓練佢，呢一度就係打咗窿，咁就係比較難睇，我相信呢個意思係話即係你對佢哋簡介咗幾多次，佢哋都可能會唔記得。

但係如果有咁樣嘅人為錯誤，嗰個結果就係會好嚴重，即係如果巴士車長係記錯咗，然後佢用嘅車速係唔應該用嘅車速，就會有大問題，就會導致嚴重嘅巴七翻側意外，係會比其他嘅交通意外造成嘅風險係更加大嘅，呢一個風險呢係不能接受，不能忍受嘅，因此我哋就認為係應該有更強嘅風險管理，去儘量減低人為錯誤造成嘅不能接受嘅風險。

因此我哋就會係將安全車速嘅不同種類將佢簡化，變成係每小時 15 公里，每小時 20 公里，每小時 25 公里，就去處理呢三十個我哋識別咗嘅急彎同埋迴旋處，咁樣就令到車長更加容易明白，同埋記得。跟番我哋夾附嘅 Excel 嗰個檔案裏面，我哋講最後檢討，我哋而家喺下面就係表列咗我哋建議嘅安全車速。

你就會睇到呢一段，就係講到唔同嘅車速限制。喺 355 嗰度佢仲會係繼續講，我哋用安全速去處理車速，係對道理安全嚟講一個好基本嘅原素，我哋係認為安全車速係一定唔可以喺同一個車廠區係高過我哋計過可能導致翻側嘅車速。有一位車長佢係記錯咗嗰個安全車速應該係 15 公里，但係佢行咗 20 公里，咁樣未必係會導致翻側。

因為我哋計過喺嗰個檔案裏面第二十段嗰度，就如果喺清水灣道，有關嘅翻側嘅車速應該係 24.9 公里先至巴士會翻側，呢一個原則亦都係會適應該於其他嘅車廠。呢一度你就係會講到有關其中一個車廠。你呢個 KBD 係咪即係話九龍灣車廠。

李澤昌先生：係，冇錯。

MR DUNCAN：（經傳譯員）我哋結論嘅時候，下低就係一啲行動嘅計劃。

第一，我哋係要搵番呢啲彎位同埋迴旋處嘅地點去睇下邊度呢有最高嘅令到巴士翻側嘅風險，呢一啲嘅做法首廿九個，就已經喺 2014 年 6 月 6 號做好咗。

第二，就去計算一下所有呢啲識別咗嘅彎位，同埋迴旋處嘅安全車速，我哋係根據技術嘅評估，咁呢個開頭嗰廿九個識別嘅地點，就已經喺 2014 年 6 月 27 號完成咗，而第三十個，就喺 2014 年 8 月 13 號完成咗，呢個就喺元朗方向嘅博愛交匯處。

(c) 應該用實際駕駛測試去核實我哋計算出嚟嘅安全車速，咁開首嗰廿九個識別嘅地點，就已經喺 2014 年 7 月 29 號完成咗，而第十三個喺元朗方向博愛交匯處嗰個，就喺 2014 年 8 月 12 號係完成咗。

(d) 就係要去檢討安全車速，個基礎就係要跟番駕駛測試嗰個計算結果，就喺廿九個識別地點就已經喺 2014 年 7 月 31 日完成，第三十個喺元朗方向博愛交匯處嗰個，就 2014 年 8 月 13 號完成咗。

(e) 就係要發展一啲溝通計劃，就可以將安全信息係傳遞出去，呢啲信息就係關於安全車速，令到佢哋可以交畀所有車長。

請大家睇下我哋夾附嘅溝通計劃，同埋我哋要去進行一啲車速嘅查核，然後跟住下一個有一個提述，就係講到嗰個檔案，個電郵就繼續講，我哋認為實施咗呢一個實施安全車速，應該可以喺 2014 年 10 可以實施，即係話處理咗溝通計劃第一至三項嗰啲行動之後，就可以實施。

個電郵就係寫畀何達文先生，當時嘅董事總經理，就係副本係交畀其他人，就係請董事總經理係批准，所以最屘就係話「請你批准」。然後喺 353 頁，就會有一封電郵係何生回應。

主席：（經傳譯員）你繼續之前大律師，委員會其中一樣要求，就係 8 月 8 嗰封信嗰度寫到嘅，就係一個呢個 Excel 檔案嘅軟件，請問九巴嘅回應有冇處理呢一點呀？

MR DUNCAN：（經傳譯員）我睇呢一個電郵，我就認為應該係處理咗，咁但係我就會請佢哋直接回答。

主席：（經傳譯員）請你直接回答，你搵唔搵到呢一個 Excel 嘅檔案？如果你想睇番有關嘅問題，我可以喺屏幕畀大家睇，就係一封信嘅附件嗰度，係 234 頁第二頁。呢一個係問題本身，即係話如果你有，請你提供，咁呢一個就係所謂購物表咁樣；第二點就係話希望你提供 Excel 嗰個檔案嘅軟件，...

梁健宏先生： Yes.

主席：（經傳譯員）...或者有任何嘅確都畀我哋，即係有冇一啲實體嘅覆本？

梁健宏先生： We have it.

主席：（經傳譯員）你有嘅，係唔係？你會唔會提供呢？

梁健宏先生：（經傳譯員）會。

主席：（經傳譯員）唔該晒。

梁乃鵬先生：（經傳譯員）主席，我理解，嗰啲實體嘅本，已經係交咗畀委員會。

主席：（經傳譯員）係咪所有喺軟件嗰度嘅嘢，係咪已經用實體文件提交咗呢？咁嘅理解正唔正確？

蘇偉基先生：（經傳譯員）我哋係印咗出嚟嘅，亦都係提供咗係 312 至 313 頁嗰度，係我哋將呢一個提述過嘅 Excel 檔案係印製咗出嚟。

主席：（經傳譯員）好，唔該。

MR DUNCAN：（經傳譯員）或者我哋而家返番去嗰啲電郵嗰度。353 頁個底部，就係何達文先生嘅回應，佢係寫畀黃嘉峰（譯音）先生，就即係話頭先嗰封電郵嘅發出人，同埋 Owen Eckford，佢當時係車務總監。而家 Eckford 先生係咪仲係受聘喺九巴呢？

李澤昌先生：（經傳譯員）冇。

MR DUNCAN：（經傳譯員）咁佢幾時離開？

梁健宏先生：佢 2015 年年尾離職。

MR DUNCAN：（經傳譯員）咁係咪啱啱係可以同何達文先生做完董事總經理嘅間時間係脗合嘅呢？

梁健宏先生：（經傳譯員）並不是。

MR DUNCAN：（經傳譯員）何達文先生係 2014 年尾或者係 2015 年初嘅時候，係冇再做董事總經理嘅。

梁健宏先生： Correct.

MR DUNCAN：（經傳譯員）咁呢一封電郵亦都係抄錄畀其他人嘅，咁同黃嘉峰先生寫嗰個電郵呢都係一樣，大家睇唔睇到嗰個抄錄嘅表嗰度嗰啲人名？

梁健宏先生： Yes.

MR DUNCAN：（經傳譯員）好，我哋而家睇 354 頁，就係咁樣回應嘅「多謝你同埋你嘅團隊係盡力去統籌咗呢一個家強安全嘅計劃，你建議嘅行動，我覺得冇問題，如果要取得正式批准，請車務總監去查核同埋係批准同支持，好多謝你。」後面係有一個加註，就係話呢一封電郵亦都係抄錄咗畀其他，「請車務總監去查核一下，安全及服務質量部主管嘅文件同埋溝通計劃，然後正式由你決定係發出正式嘅批准，多謝。」我同你查核一下，“HSSQD”係咩嘢意思？

梁健宏先生：（經傳譯員）就係安全及服務質量部嘅主管。

MR DUNCAN：（經傳譯員）好，唔該。下一份嘅電郵，喺當時...

主席：（經傳譯員）係咪即係黃嘉峰先生？

梁健宏先生：（經傳譯員）係。

主席： Thank you.

MR DUNCAN：（經傳譯員）下一份電郵，我哋收到就係一封電郵之後發出嘅 2018 年 4 月 6 號，就係由一位叫 Aman Fong 嘅人士發出，就係培訓及服務質素管理部嘅，佢就係發出畀 Louisa Leung IA 嘅，嗰個題目就係一樣嘅，就係同之前嗰兩份電郵嘅題目係一樣。即係話有三十個辨析嘅急彎同埋迴旋處嘅安全速度限制，呢個 Aman Fong 係做咩嘢職位？

梁健宏先生：（經傳譯員）係經理嚟嘅。

MR DUNCAN：（經傳譯員）邊個部門嘅經理？

梁健宏先生：（經傳譯員）係培訓同埋服務質素管理部嘅經理。

MR DUNCAN：（經傳譯員）Louisa Leung？

梁健宏先生：（經傳譯員）內部稽核嘅主管理。

MR DUNCAN：（經傳譯員）呢個電求佢咁講嘅個電郵「Louisa 請留意呢個信件」跟住就係話 Aman 發出嘅。即係話 Louisa 就收到呢個信件，就要求佢注意頭先嘅電郵，係咪啱呀？係咪咁樣解釋定係啱㗎？

梁健宏先生： Yes.

MR DUNCAN：（經傳譯員）咁之後仲有一封電郵，我哋都曾經睇過，十一日後，4月17號發出，由Louisa畀Aman，嗰個標題一樣嘅。呢度就咁講「Aman，我哋知道何達文先生要求黃嘉峰先生要搵營運總監嘅正式嘅批准，進行有關嘅計劃嘅。」你有冇收到其他嘅電郵，就即係Owen先生係曾經就住呢個咁嘅事，畀過正式嘅批准呢？

我哋睇到有另一個Aman去Louisa有一個回應，佢就「冇」，即係似乎電郵發出之後，冇再收到其他電郵。我哋重組番呢個信件所講嘅事件，297頁。發出信件嘅人，似乎佢有個結論Owen Eckfordh先生並冇批准呢個安全改進計劃，但係委員會就冇收到任何嘅--你冇提供任何嘅文件，就話好正面咁講話，Eckford先生係冇批准呢個計劃，係佢冇批准到或者冇考慮過呢個計劃。

有冇其他嘅資訊可以提供畀委員會？即係你哋公司有冇其他記錄可以提供？協助委員會了究竟發生咗咩嘢事，即係關於呢個Eckford先生佢有啲咩嘢行動，自從2014年8月15號何達文先生發出電郵之後，佢有咩嘢行動採取過，等我哋比較Eckford先生？

梁健宏先生：（經傳譯員）我唔知道裏面嘅情況。

MR DUNCAN：（經傳譯員）公司有冇睇番佢嘅紀錄？即係話2014年8月15號到2018年4月6號之間可能發生咩嘢事？即係呢個關鍵嘅期間，有冇咩嘢事發生，有冇睇番你哋公司紀錄？

梁健宏先生：（經傳譯員）我哋有睇。

MR DUNCAN：（經傳譯員）即係意思冇任何書面嘅材料可以搵到出嚟？

李澤昌先生：可唔可以咁講，我哋公司有個internal audit嘅部門，我哋就搵咗我哋個internal audit嗰個head，睇過成個嗰個呢個之前嗰個safety service部門，做過呢一個彎位嘅設計嘅嘢。我哋嗰個internal audit嗰個報告到今日為止，頭先你睇到嗰啲e-mail，應該係最接近嘅，不過我諗我哋個OD係咪可以再返去再仲有啲咩嘢補充。

梁健宏先生：我哋可以再去再睇睇，但係正如李生頭先所講，我哋而家就係我哋手頭上嘅資料。

主席：（經傳譯員）表面睇起上嚟就比較奇怪，因為董事總經理就回應嗰個安全部門嘅電郵，佢就將呢個電郵就抄送咗嗰個營運總監，請營運總監畀一個正式嘅批准，跟住四個月之後，呢個董事總經理先至離開公司。你係咪即係話冇任何證據就話嗰個係營運總監就住呢件事做過任何事，批准，唔批准，都冇任何資料？係咪令人有啲疑惑，你同唔同意？不過你會搵㗎嘞。

梁健宏先生：Owen 佢年尾辭職，佢年尾離，2015 離開。

主席： Not the end of that year; it's the end of the following year.

梁健宏先生：2015 離開，佢離開之前呢個計劃佢亦都冇任何表示過，我 4 月呢個--（經傳譯員）喺 2015 年做咗副嘅營運總監。

MR DUNCAN：（經傳譯員）我明白你講嘅，不過我想你留意，就係話就咁表面睇嚟，可能有得解釋，嗰個董事總經理將呢個電郵抄送畀營運總監，如果你需要正式嘅批准，即係呢個係一個新嘅安全嘅計劃，你話即係話冇任何證據，你話畀委員會聽佢冇做過任何嘢，即係不論係批准，唔批准定係冇資料？

梁健宏先生：你留意到當其時個 MD 覆番個 e-mail，佢喺下低嗰度亦都係話喺 subject to 一個 communicataion plan，咁當其時亦都做咗一個 communication plan，好多車務嘅同事，車務主任亦都去到各個站同車長去溝通，當其時嘅反應就係不理想嘅，啲車長係有好多嘅意見。我相信呢個係其中一個原因，當其時嘅 OD 佢會考慮嘅，至於係咪呢個佢唔批准嘅原因，就冇正式披露出嚟。

主席： Yes. Mr Duncan.

MR DUNCAN：（經傳譯員）你有冇同嗰啲係巴士司機自己有溝通呢？

梁健宏先生：（經傳譯員）冇嘅。

MR DUNCAN：（經傳譯員）呢個只係你上任前？

梁健宏先生：（經傳譯員）係，我未參與呢個工作。

MR DUNCAN：（經傳譯員）你即係話畀我聽，就係你個理解嘅情況？

梁健宏先生： Correct.

MR DUNCAN：（經傳譯員）有冇任何人當時係參與 2014 年，可以同我哋講當時發生咩嘢事呀？

梁健宏先生： Not in --

主席：（經傳譯員）有冇其他人？

梁健宏先生：（經傳譯員）有其他嘅。

主席：（經傳譯員）梁博士，可唔可以請有關嗰位人士，我哋可以從佢嗰度攞到啲口述嘅證供？不論係男士，邊位男士或者女士，如果喺度。

梁健宏先生： Kelvin.

MR DUNCAN：（經傳譯員）我想了解下，Eckford 先生而家仲喺唔喺香港呢？

梁健宏先生：（經傳譯員）唔喺香港嘅。

楊晉瑋先生:係，多謝主席。正如我上一次個 hearing，我回覆過，當時我係有見過頭先其中一張紙嘅，裏面係有...

主席：（經傳譯員）或者係記錄上係顯示究竟你係邊位？

楊晉瑋先生: （經傳譯員）我係 Kelvin Yeung（證人直接用本地話說）屯門車廠。

主席：（經傳譯員）呢個係你之前都係响呢個作過證，處理過嘅事項，啱唔啱？

楊晉瑋先生: （經傳譯員）啱。

主席：（經傳譯員）我聽唔到，可唔可以再將你嘅答覆再講多次？

楊晉瑋先生: 係，我係 Kelvin Yeung，楊晉瑋，assistant manager 助理經理，operations of Tuen Mun depot，車務組嘅，屯門廠。

主席：（經傳譯員）我頭先問你嘅問題，呢件事你係之前作供嘅時候處理過，啱唔啱？

梁健宏先生：正確。

MR DUNCAN：（經傳譯員）我可能都會重複嘅，不過請楊生你幫我哋講講點解嗰個有關嘅計劃係冇實行到？

楊晉瑋先生：喺當其時我收到一份文件，頭先喺個 PowerPoint 嗰度都見到有顯示過嘅，就係顯示當其時嗰二十九個急彎裏面嘅 locations，同埋建議嘅車速。我當其時就有份去落去同其他同事去唔同嘅車站去搵一啲車長，做我哋日常嘅溝通嘅時候，就同佢哋傾過呢樣嘢。我收到車長嘅信息，就係佢哋覺得呢張紙...

MR DUNCAN：（經傳譯員）停一停，你當時係咩嘢職位？

楊晉瑋先生：嗰陣時我係一個 senior ooperation officer，高級車務主任，係，我都係負責屯門嘅車務組。

MR DUNCAN： Thank you.

楊晉瑋先生：係嘞，咁我就喺嗰啲車站做，就同車長去做溝通，我收到車長嘅信息，就係佢哋覺得呢一張紙裏面嘅信息，係唔可行，佢哋冇辦法就住每一個彎去記住每一個彎嘅車速嚟行駛，咁樣會令到佢哋會有壓力，如果佢哋記錯嘅話，會唔會公司有一進一步嘅懲罰，呢個係當其時佢哋提出嘅一啲問題嚟嘅，我亦都有將當其時呢個情況轉達番畀我當其時嘅上級聽。

MR DUNCAN：（經傳譯員）你嘅上司係邊位呀？

楊晉瑋先生：係，當時嘅屯門廠嘅總經理，胡堅強先生。

MR DUNCAN：（經傳譯員）仲喺唔喺公司做？

楊晉瑋先生：佢已經退咗休。

MR DUNCAN：（經傳譯員）從呢個委員會收到嘅材料，就睇到你某一個階段，呢個計劃就終咗，就冇實行到，你可唔可以幫委員會了解下，邊個決定唔再實施呢個計劃？

主席：（經傳譯員）如果唔知道呢一個答案，就唔需要猜測。

楊晉瑋先生：我唔了解。

主席：（經傳譯員）好，唔該。好多謝你楊生。

MR DUNCAN：（經傳譯員）梁生，咁個理解啱唔啱，係咪應該會喺公司嗰度再進一步搜查你哋嗰啲記錄...

梁健宏先生： Yes.

MR DUNCAN：（經傳譯員）...去協助委員去找出係邊一位決定咗唔繼續呢一個計劃，同埋唔繼續嘅理由？

梁健宏先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）我都有興趣知道，喺公司個電腦嗰度，係咪都應該有呢啲電郵嘅副本嘅呢？即係 Eckford 先生收到同埋係發出嘅電郵，喺 2014 年佢喺公司工作嘅時候，係咪佢啲電郵都有副本喺你哋嘅電腦嗰度？你認為有關嘅資料係咪應該會有嘅呢？

梁健宏先生：（經傳譯員）我唔係好肯定。

MR DUNCAN：（經傳譯員）好，唔該。

主席：（經傳譯員）呢樣嘢亦都係你進一步搜集嘅時候，可以為我哋找出答案，如果有人知道邊一位係負責公司嘅記錄保存嘅呢，請你都話畀我哋聽。

梁健宏先生： Yes.

MR DUNCAN：（經傳譯員）多謝你梁生，而家我去講另外一個題目，不過我就會去番一件事，就係星期二處理過嘅，就係關於超速報告，你係交過畀我哋嘅，喺 KMB-9 號，3993 頁。翻譯本喺 3995-1。

應該係黃祥明先生係協助過委員會講過呢一個報告，係星期二嘅時候。我只係想澄清一啲事情啫黃生。喺你作供嘅時候，星期二，或者我畀番個參考嘅數目你，嗰個謄本嘅頁數 134 至 135，你就畀咗一啲關於呢一個報告，就一啲嘅限額，就係一啲 50 公里嘅區同埋 70 公里嘅區。

你就話如果係揸 50 公里車速嗰啲嘅地點，你嘅報告就會係記錄到一啲巴士係行緊三種唔同嘅車速，而且係有唔同嘅時限。第一個就係 56 至 65 個公里，如果係行咗三十秒呢，就係會記錄㗎；然後 66 至 70 公里，即係每一個鐘頭就會行咗十五秒就會記錄；如果係 75 係兩秒都會記錄，跟住關於 50 公里嗰啲，如果有關嘅速度係去到 76 至 79 公里，就會多過兩秒都會係記錄到，如果係高過 80 公里就係兩秒都會係記錄到，呢一啲就係你畀我哋嗰啲限值。

由你嘅證供我亦都明白到嗰個黑盒，當時就係未能夠識別出不同道路嘅車速限制，就係未能夠實時向車長發出警示，意思就係話個黑盒係唔能夠知道某一條路嘅車速限制，唔知道係每小時 50 定係 70 公里，因此對於嗰個車長嚟講，好多時個限值就係設定喺每一個鐘頭係 75 公里，但係喺大埔嘅意外之後，就將佢變成 70 公里嘅，咁我嘅理解到而家嚟講啱唔啱？

黃祥明先生：（經傳譯員）啱。

MR DUNCAN：（經傳譯員）咁其中一個解釋就係話，因為喺當時 2018 年 6 月 7 號公司係未有擁有運輸署畀嘅數碼地圖嘅。

黃祥明先生：（經傳譯員）正確。

MR DUNCAN：（經傳譯員）我哋記住呢一點，然後睇番呢一個報告。如果黑盒嘅數據話唔到畀你聽，巴士係喺 50 公里嘅地區定係 70 公里嘅地址，呢一啲例外報告點樣可以幫你識別出一架巴士係咪喺 50 公里嘅地區嗰度超速？

黃祥明先生：其實就係呢個正正就係原因，點解我哋需要一啲時間先至可以做到呢一個嘅報告。因為當一個初步嘅資料得悉之後，我哋喺廠嘅同事，就需要喺我哋另外一個可能叫做電腦程式，就係睇睇呢啲嘅道路，是否係 50 嘅限速道路，或者係 70 嘅限速道路，從而喺嗰度就搵出佢究竟呢一架車係喺 50 嘅超速道路行緊，定喺 70 嘅限速道行緊，我哋先至可以得到你而家手頭上呢個報告，咁我先至可以對證睇睇邊一個車長、喺邊一個時段、喺邊一度係有超速嘅行為。

MR DUNCAN：（經傳譯員）咁我嘅理解啱唔啱呢？就係話呢一個報告係最近先至做好？

黃祥明先生：呢一個係 2018 年 5 月 1 號嘅報告，都係近期嘅。

主席：（經傳譯員）係用咩嘢嘅方法去知道嗰架巴士係喺某一個地區嗰度係超速緊，用咩嘢方法知道？

梁健宏先生：而家係根據嗰條路線，架車行嗰個 route，我哋自己就將嗰架車嗰條路線就自己就喺自己嗰個電腦系統嗰度就有地點嘅。點樣 identify 個地點，就係當其時個時間同埋佢行車時速去定嘅，所以呢樣事情係真係需要啲時間，我哋同事我哋嗰個軟件去處理。

MR DUNCAN：（經傳譯員）呢一類嘅報告，你係幾時開始能夠做到出嚟？

梁健宏先生：我哋 2013 年開始有呢樣黑盒，都已經有，用呢個方法去做。

MR DUNCAN：（經傳譯員）但係你話呢一個報告係今年 5 月先至做好，呢一類嘅報告當時大埔意外嗰陣時，係咪已經係有呢啲報告呢？

梁健宏先生：就 5 月 1 號嘅，但係呢款咁嘅 report，呢啲咁嘅 exception，我哋之前不嬲都有，我哋 2013 年都開始有呢啲咁嘅 exception report，睇到個車長係喺 56 段超或者係 76 段超速。

MR DUNCAN： How long after --

主席：（經傳譯員）鄧大律師，等一等，畀啲時間我。

羅先生：（經傳譯員）我會問你一個問題。

梁健宏先生： Sure.

羅先生：（經傳譯員）如果嗰架巴士超速係 67.9，你應該知道佢應該係超速咗，過咗 50 公里，係咪呢？

梁健宏先生：係。

歐陽先生：（經傳譯員）喺你公司嘅記錄，你應該有一個咁樣嘅紀錄，你應該係定 50 公里呢一個時速？

梁健宏先生：係。

羅先生：（經傳譯員）咁你喺運輸署嗰個數碼地圖，你唔需要一定有嗰個地圖先知道你每一條線嗰啲嘅區？

梁健宏先生：嗰啲係我哋自己根據我哋自己個認知去判斷話邊段路係 50，邊段係 70 嘅。即係我哋啲同事要 manually 去喺嗰個自己個記錄嗰度，呢段路至到呢段路就 50，呢啲路去到邊度係 70，變咗呢個係一個過程，我哋每日都要去做，變咗有啲同事有啲有啲新嘅路段，我哋要 update，update 我哋自己嗰個記錄。咁有啲路段，有啲新嘅路線，或者改路，我哋要自己去 update 嘅，呢樣又係我哋要做嘅事情，就算有呢啲唔同路段嘅距離，50 好，70 好，亦都要同我哋而家嗰啲黑盒嘅數據又要擺番落去先至 compare 到佢係咪超 50 或者超 70。

李澤昌先生：或者我補充少少，其實個黑盒嘅數據就會講咗嗰架車行駛嘅速度，同埋佢嗰啲 X、Y、Z 嗰啲位置，咁就絕對唔知道嗰段路係咪超速，佢架車由開始去到終點嘅時候，個黑盒係有個時間，係呢個 X、Y、Z 嘅位置同埋佢當其時行嘅速度。

返到嚟公司嘅時候，我哋有一套系統，嗰個系統係知道 X、Y、Z 嘅位置嗰段路嗰個 speeding limit，咁然後將黑盒嗰個東西 superimpose 落去嘅時候，就睇到佢有冇超速定係唔超速，係非常長嘅時間，因為我哋有成四百幾條

線，每一條線有來回嘅方向，仲兼夾好多班，所以係一個好長時嘅時間，呢個係咁嘅情況，但係你頭先講第二就係，個黑盒本身佢有兩個系統可以做到嘅。

一個系統就係黑盒嗰間公司可以 physically 有個 map 裏面，佢喺嗰度就可以 dictate 咗個 X、Y、Z，有個速度，呢個佢哋係可以做到嘅，咁嗰陣時就未做嘅；另外一個方法，就個黑盒嘅公司呢有提議到，如果有個 digital 嘅 map，係一個 live 嘅 map，就好似你講政府個 install 咗裏面嘅話，以上講嘅情況就可以大大縮短好多，我諗呢個係梁生想講嘅嘢。

梁健宏先生：冇錯。

主席：（經傳譯員）好，或者係我係重複一下，嗰個黑盒，而家睇番轉頭就會話到你聽有關嗰啲軸，即係 X 軸、Y 軸。

李澤昌先生： Correct.

主席：（經傳譯員）就話到聽某一個地點喺邊度，咁樣就話到畀你聽嗰個巴士喺邊度，咁喺嗰個時候喺當時，因為你係每隔一秒都會係記錄個車速，所以你係知道巴士車速嘅，咁你做嘅第三個步驟，就係要睇下嗰一啲有關嘅地區當時嘅車速，所以就地點，然後車速，然後車速限制，然後你就要手動咁樣去做嘅，因為你當時冇數碼地圖？

李澤昌先生： Yes.

MR DUNCAN：（經傳譯員）你係聘請咗幾多人去做呢一個手動嘅工作呢？即係其實數碼地圖都可以自動做到。

李澤昌先生：（經傳譯員）係三十七位。

主席：（經傳譯員）呢啲係咪慳錢嘅一個做法？係，大律師你可以繼續。

MR DUNCAN：（經傳譯員）我想澄清少少頭先重複嘅嘢，究竟公司係幾時開始提出呢啲報告？即係可以分到每小時同 50 同 70 公里嗰啲地區？

梁健宏先生：其實我哋好早已經有嘅，有啲同事同我講 2007 年已經開始咁做，不過當其時嗰個黑盒啲數據就冇咁詳細嘅，到 2013 年而家呢款嘅黑盒資料仲多啲，變咗就可以做得更加仔細少少。

MR DUNCAN：（經傳譯員）如果係超出咗 50 公里，譬如話一個月嘅第一日超速，咁嗰個報告會幾時出到嚟，等你可以即係有個咁嘅結論就發生咗呢件事，要幾多日？

梁健宏先生：而家就四日就出咗個 report，同一時期黃生嗰度就會收到呢啲報告，黃生就會處理。

MR DUNCAN：（經傳譯員）之前要幾耐？

梁健宏先生：之前就十日，再之前就十四日，再之前如果係2007年嗰陣時，可能仲耐。因為當其時嗰個電腦記錄喺個黑盒嗰度，就唔可以經 server 經 internet 去傳送嘅，係需要係 physically 去 download 嘅，所以當其時就比較時間可能仲長。

MR DUNCAN：（經傳譯員）呢三十七個人就喺度做緊呢啲嘢？

梁健宏先生：可能仲唔只，當其時因為如果講 downloading 嗰啲 data，你每人要走去架車嗰度就 download，可能牽涉到維修組，每月月檢，我哋講緊幾千部車嘅話，就一個好 tedious 嘅工夫，肯定就遠遠多於三十七人，但係我哋都有做當其時。

羅先生：（經傳譯員）呢個十日或者十四，係咪即係要需要咁多時間？剛個車長拍卡，咁個記錄係响個黑盒度，即係唔需要再去睇番十四日前或者四日前，如果係咁樣做，係咪可以揀番呢？

梁健宏先生：正確。

羅先生： Why isn't that done?

梁健宏先生：而家我哋亦都循住呢個方向亦都係再做，就將個車長嘅資料會唔會攞咗落去個黑盒嗰度，呢度係我哋會做嘅。我哋琴日畀 IRC 嗰個報告嗰度，其中一樣 item 就講 geo-fencing 嗰度，我哋亦都加埋呢個元素落去，就係話將個車長個資料擺埋喺個黑盒資料落去，變咗每一秒嗰個資料都有埋嗰個車長嗰個記錄，咁就知嗰一秒鐘邊一個車長揸，呢樣嘢我哋就會去做。

主席：（經傳譯員）但係而家仲未做到呀？

梁健宏先生：No.

主席：（經傳譯員）而家嘅黑盒呢冇記錄，嗰個車長嘅八達通，即係佢拍卡開始揸車，係記錄唔到呢個資料嘅？

梁健宏先生：冇。

李澤昌先生：咁所以需要有十日時間處理。

主席：（經傳譯員）可唔可以簡單啲講，你點樣知道嗰個巴士車長嘅身份？你有巴士嘅編號、有速度、有位置，你可以計出嗰個，你都知道嗰個係限速係幾多，而家你係點做，係點樣去搵出嗰個有關嘅司機嘅身份，點樣辨析？

梁健宏先生：而家就未做到，咁變咗我哋就要將嗰啲黑盒資料同我哋個站務記錄要去相併，因為我哋站務記錄就知道邊個車長喺邊個時間揸緊邊架車同埋咩嘢路線，時間同埋個車牌對番黑盒嘅資，因為黑盒資料就有時間同埋個車，咁就去對番嗰啲資料就知道邊個時間就係嗰個車長揸，所以變就係用呢個...

李澤昌先生：唔係，簡答你，其實今日佢係個黑盒有個資料，跟住佢有一個站務嘅資料，就另外一道系統，跟亦都有一個就叫做嗰個車嗰個行駛嗰個 fleet management 個資料。即係佢個站務個資料係印嘅，車嗰個行駛嗰個資料個 fleet 喺車，再加埋黑盒個資料，佢將嗰三套嘢併埋一齊先至答到法官嗰個問題，所以係真係好長嘅時間。

主席：（經傳譯員）嗰個車站紀錄，係咪用一個你拍卡就會自動記錄？

梁健宏先生：係，呢個其中一個 input。

主席：（經傳譯員）鄧生。

MR DUNCAN：（經傳譯員）多謝你主席，我想向前睇睇其他另一個事項，就係嗰個實時嘅巴士監察系統，即係巴士車長嘅監察系統。可唔可以請你睇番 Openmatics，Kulis 先生嘅證供。係研訊嘅第六日，158 頁。

主席：（經傳譯員）唔該。

MR DUNCAN：（經傳譯員）好，請睇第 14 頁。陳正隆（譯音）先生，即係代表委員問 Kulis 先生呢個問題。如果係可以係即係譬如話嗰啲數據，就每隔五秒鐘就可以傳送接收，佢哋公司有冇提供呢個服務，即係一係就硬件，一係軟件嚟到係協助可以實時監察嗰個黑盒嘅數據。個答覆係「可以」，我呢個係背景。你話畀我聽，而家有關嘅數據係用每隔三十秒就係傳送嘅，就唔可以減到每五秒做傳送，有冇理解錯誤？

梁健宏先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）陳先生，睇下我有冇理解錯誤，陳生就話貴公司係提供個黑盒，黑盒就收集數據，呢個系統係可以每五秒鐘傳送資料去一個指定嘅伺服器。佢嘅答覆就「唔嗯」

作為監察人員，我响寫字樓我點樣係實時監察司機，我需唔需要額外嘅軟件，定係你間公司已經係提供咗有關軟件畀我做到呢樣嘢？Kulis 先生話有兩個方法，可以畀我哋一個軟件嘅解決方案，呢個就係我哋有個 Openmatics 嘅門站網路，同埋額外嘅一啲係軟件，但係有啲公司佢哋就淨係需要個數據，佢哋背後有其他嘅資訊系統，我哋只係一個數據嘅提供者，我哋就唔理會佢點樣利用有關嘅數據。

陳生問「响個九巴嚟講，你哋公司正係作為一個數據嘅提供者，咁你知唔知九巴有冇利用你嗰啲數據，用一啲比較先進嘅用途嚟到做實時監察？」我諗你响咁嘅情況之下，Kulis 先生話咁嘅情況之下，「九巴係個客戶，而家佢哋係用佢哋嘅資訊系統嚟到處理嗰個數據，咁當然如果有協議，我哋可以改變呢個方法。」

你覺得個世界上管理商業嘅車隊公司係點樣實時監察佢哋嘅司機嘅系統，

呢個普唔普遍？通常佢哋都普遍有咁樣嘅要求，佢哋係要去考慮到安全同埋經濟嘅原因，有關嘅公司呢通常都希望係監察司機嘅表現，有啲國家就呢個會同嗰個法律方面嘅規管嘅一啲衝突，要嚟保障佢哋安全，有啲係西歐國家，就唔容易咁樣引一啲監察系統，不過呢個需要，呢個要求就一向都有。

我就想再進一步探討，不過第一先講一講嗰個背景脈絡。首先我想你再睇番KMB-4號檔案，第1202頁。呢個係2013年年報，我哋都之前見過。

主席：（經傳譯員）係九巴㗎？

MR DUNCAN：（經傳譯員）呢個係嗰個控股公司嘅。

主席： Yes.

MR DUNCAN：（經傳譯員）然之後有九巴嘅同埋佢其他嘅附屬公司，有啲係上市公司。

主席： Thank you.

MR DUNCAN：（經傳譯員）呢度有講過九巴嘅主要嘅人員，一個叫做Alok Jain，係嗰個規劃及發展部門嘅主管，你識唔識呢個人，呢個人當時佢嘅職？呢位Jain先生曾經向委員會提供過證供，你知唔知？

梁健宏先生：（經傳譯員）係，知嘅。

MR DUNCAN：（經傳譯員）想你睇FE-1，第40頁。我想你睇番由39頁開始嘅呢份文件，委員會從程艾樂，Jain呢位先生收到嘅陳述書，你有冇機會睇東呢份陳述書？

梁健宏先生：（經傳譯員）簡要咁睇過。

MR DUNCAN：（經傳譯員）我想你留意第40頁，第二段、第三段，為咗方便其他人同埋你哋各位，我就讀出嚟嘞，佢喺第二段就話「實時嘅營運管理系統，係將嗰啲黑盒裝咗上巴士之後嘅一個副產品嚟，呢個就係响我加入呢個公司嘅係一個持續嘅工作，我就涉及有好多嘅會議同埋關於嗰個技術嘅指標，個特色同埋點解選擇科技，同埋加入咗公司之後我就涉及呢方面嘅工作，我就冇涉及嗰個撥款，管理同埋招標嘅，我亦都唔記得當時係幾時係邊決定，但我知道嗰個係計劃係當時係進行緊，目的就係要改安全，希望有即時警示同埋對巴士車長嘅一啲回饋。

第二，就係改善現有嘅效率，就係希望可以改善駕駛嘅行為去咁樣做；第三，就係希望可以更積極咁樣去處理任何嘅事件或者係嗰啲有問題嘅事件，就可以提供更可靠嘅巴士服務，咁我哋可以用呢個ROM系統，就係可以處理咗呢啲事情，帶嚟好多嘅得益。我哋係廣泛咁樣係討論咗呢件事。

因為巴士信息系統嘅數據，當時仲有嘅，就算我哋冇咗呢一個計劃都仲可以有，我哋就唔可以冇咗呢一個實時監察，呢一個你可以話就係好似一個驗屍嘅

做法咁樣。然後(c)嗰度，我就冇乜參與一啲嘅討論，就係講關於話呢一個計劃實際嘅成本，不過通過開會同埋討論，我有一個印象，就係呢一個計劃係可以帶嚟一個正面嘅 ROI。

好多巴士公司，即係喺已經發展嘅世界，都係用相同或者咁上下嘅呢一啲嘅功能，就係好似九巴睇到 ROM 嘅制度裏面有嘅功能，當時九巴係制訂緊計劃，我哋其實都係大大去學習首爾、星加坡、倫敦同埋幕尼黑嘅經驗。傳媒嘅報告或者係一啲係公司嘅宣布，即係呢一啲嘅城市都話畀我哋聽，喺安全巴士司機嘅行為同埋燃料效率方面，都有好多得益。

喺紐西蘭，佢其中一個嘅網站嗰度，巴士公司係可以減低百分之四嘅燃油嘅耗用，同埋係超速係減低百分之八十一；星加坡嘅 Tower Transit，就係可以慳油百分之七，然後就係因為不良嘅駕駛行為造成嘅事件係減半。關於碰撞嘅意外，就減咗一半，而巴士司機造成嘅意外甚至係減咗七成。」

呢一個就係程艾藥先生書面畀委員會嘅一啲意見，程生亦都係喺呢一度作過供，或者我又畀番有關嘅謄本嘅頁數畀你。

主席：（經傳譯員）應該係第 3 號文件。

MR DUNCAN：（經傳譯員）係，唔好意思，我講咗第 8，即係第 8 日研訊，3 號文件，係由第 81 頁至到第 98 頁。同埋梁生，你有冇睇過有關嘅作供。

梁健宏先生：（經傳譯員）有，我用中文睇過。

MR DUNCAN：（經傳譯員）好，我而家唔係話要詳細同你講，但係佢就係進一步闡釋程艾樂喺剛才佢嘅書面意見所講嘅嘢，講出嗰個效果就係話，公司係考慮過一個計劃，係會處理實時嘅監測，但係根據程生所講，嗰個計劃就係被取消。

首先，我想請問你哋任何一位有冇記得有一個咁樣嘅討論，就係講到話可以實時監察？

梁健宏先生：ROM 係 real-time operatons management system，呢個就唔係一個 real-time monitoring systme。

MR DUNCAN：（經傳譯員）即係話佢個名唔係講出佢真正嘅功能？

梁健宏先生：呢個係一個車務實時嘅管理系統，係車務管理系統，係同駕駛安全係冇關嘅。

MR DUNCAN：（經傳譯員）首先，九巴有冇考慮過即係以前，即係程生講嗰啲，實時嘅監系統，有冇考慮過？

梁健宏先生：呢個就係以前我哋有嘅喺車廂入面嘅 driver's alert，driver's feedback，喺個車嗰度有個 real time alert to bus captain（經傳譯員）係畀實時嘅警示畀車長，當佢係超速，大力煞車或者係突然加速。

MR DUNCAN：（經傳譯員）係，咁你知唔知道喺某個階段，公司係考慮過 Kulis 先生喺佢作供嘅時候講嗰一類嘅系統呢？

梁健宏先生：呢個我曾經知悉過係有咁嘅念頭嘅，亦都曾經知悉過，亦都問過 ZF 呢個 real-time 提示啲車長用一個雙向嘅通訊去提示啲車長，即時提點佢呢個車長嘅行車態度，不過當其時嘅出發點就係，唔係叫佢安全嘅，係叫佢保持嗰個行車間距，純粹係 for 車務嗰個運作。

MR DUNCAN：（經傳譯員）你睇到 Kulis 先生所講嘅嘢，就係話有一個概念，就係有人收到資料知道巴士車長係超速，大力煞車，或者係突然加速，然後就係即時同車長溝通，話畀佢聽佢嘅駕駛行為係咁樣，Kulis 先生所講就係咁樣咁公司有冇一個咁樣嘅計劃，去考慮呢一種嘅設施？

梁健宏先生：冇。

MR DUNCAN：（經傳譯員）從來冇？

梁健宏先生：從來冇。

MR DUNCAN：（經傳譯員）咁即係你個理解關於程生所講嘅嘢，即係喺佢嗰封信頭先講嘅嘢？咁你嘅理解係乜嘢，其實阿程係講緊係啲乜嘢？

梁健宏先生：我相信佢就係話，我哋而家講緊嗰個實時車務管理系統 ROM，real-time operations management systme。

MR DUNCAN：（經傳譯員）如果係咁，我就要請你睇番程生其他嘅證供。我想請你第 8 日嘅研訊，第三套文件，係謄本嘅文件，第 86 頁。我想請你留意第 9 行，86 頁第 9 行。

主席：（經傳譯員）我建議我哋由呢一頁嘅開頭開始，因為程生就係解釋到兩件事嘅好處。一，就係將啲巴士組合；第二，就係點樣用嗰數據。

MR DUNCAN：（經傳譯員）好，主席。請問主席你係講 85 頁定係 86 頁？

主席：（經傳譯員）不如你由 85 頁開始，因為咁樣我哋知道成件事。

MR DUNCAN：（經傳譯員）梁生，第 85 頁第 2 行，Jain 先生就話到到嗰陣時之前，好多九巴數據都係喺個別嘅部門嗰度，咁佢哋喺度收集一啲工程嘅資料，然後車務嘅數據就喺車務嘅部門同埋係用唔同系統。嗰個計劃就係要全部將佢擺喺一個單一嘅數據庫嗰度，主席就係問「究竟會點樣用如果有一個單一嘅數據庫？」

程生就話「會三個階段，第一，就係要睇下當時靜態實際上發生緊咩嘢事；第二個階段就係要有一啲模擬，等我哋可以喺短期將佢做一個即係計劃出嚟；第三個目標就係話將佢帶到一個可預測嘅水平，等我哋可以用一啲數據或者統計嘅工具去做一啲向前嘅推算。」「咁如果係第一步驟，係咪即係話實時？」

「呢一個就係完全係愛嚟做管理信息嘅，就亦都可以做調查喇，報告。」「咩嘢叫調？調查乜嘢呀？」「譬如話我哋好多時都會收到乘客對服務嘅投訴，我哋就可以返去睇啲數據，然後去核實有關嘅資料。」

「如果個投訴已經係話呢架巴士係超速，同埋係突然大力煞車，會唔會係用數據分析，然後將佢去調查，即係如果已經有一個單嘅數據庫？」Jain 話「理論上可以。」

好嘞，呢一個就係去回應嗰個投訴，「咁你會唔會好積極咁樣自己自動咁樣用嗰啲數據？」「喺第二個階段，我哋就用呢一個實時嘅車務管理系統，當我哋有咗呢一啲嘅數據之後，我哋就將佢可以傳去一個另外一個水平，就可以分析有關呢啲實時嘅數據，我哋就可以用實時監察整個車務嘅營運，我哋呢個就叫佢做例外管理。」「即係話如果有任何嘢係超出咗一般嘅車務做嘅嘢，你而家就可以積極咁樣即時去處理佢？」

「你點係考慮到可以處埋巴士嘅駕駛態度呢？」「譬如話如果係有任何嘅巴士超出咗一般車務應該有嘅參數，我哋就可以發出一個警示，全世界就會用紅、綠、黃呢三種嘅警示，綠就係正常嘅車務，但係如果有任何嘢係超出有關嘅限值範圍，就會有一個黃嘅警示，然後再進一步就會紅嘅警示。有時就係要即時去干預。」主席就問「你會唔會認為如果係超出咗參數，就會發出警示，係咪應該即時發出？」實時發出？程生就話「嗰個目的就當然係要喺當時做。」

呢個就係嗰一段，係我想提出，照你理解程生當時喺一方面講緊嘅系統係咩嘢系統？

梁健宏先生：我哋現時嘅系統係冇嘅。

MR DUNCAN：（經傳譯員）呢樣嘢照你嘅理解，係咪等於一個實時監察系統，就係 Kulis 先生所講嗰個呢？

梁健宏先生：（經傳譯員）唔係。

MR DUNCAN：（經傳譯員）個分別係咩嘢？

梁健宏先生：我哋個 ROM 係實時車務管理，係講番一啲車務調動同個車長個駕駛安全係完全冇關係。

MR DUNCAN：（經傳譯員）似乎程生個理解唔一樣，係咪呀？

梁健宏先生：同意。

MR DUNCAN：（經傳譯員）當佢話佢理解嗰個計劃係被取消，你記唔記得係曾經開始過一個計劃，然後就取消咗？

梁健宏先生：係未有取消過嘅，呢個 project 係 2014 年 10 月開始做嘅，仲未停止，仲繼續做緊。

MR DUNCAN：（經傳譯員）個背景搞清楚先，你講嘅計劃係咩嘢計劃？

梁健宏先生：呢個就係一個實時車務管理系統，因為有呢個黑盒，有呢個巴士嘅實時地點，就可以令到車務調動更加有效率。

主席：（經傳譯員）用咩嘢方法？

梁健宏先生：每一條路線嗰啲巴士亦都知道佢喺唔同嘅地點，個前線員工包括站長、督察、車務主任，佢每一刻都知道嗰條路線嗰啲車輛嘅位置。有啲情況交通擠塞，啲車輛可能塞埋喺某一個地點，呢啲咁嘅資料，就令到我哋個車務調動更加容易掌握，知道邊啲地方可能係邊啲站啲巴士可能好耐都返唔到嚟，變咗佢喺調動巴可以更加有效率，呢個就係嗰個實時車務管理系統最核心嘅方面，可以畀到我哋嘅車務同事。

MR DUNCAN：（經傳譯員）我哋未曾小休之前，我想再睇番 Kulis 先生嘅證供，同埋佢所提述過之前嘅段落，我引述過佢提出嘅一啲，就响第 6 日提出嘅睇法，第 158 頁都係第 3 號文件冊。搵到未？158 頁。

梁健宏先生：（經傳譯員）係，搵到。

MR DUNCAN：（經傳譯員）之前我都提過，係第 25 行，陳律師問，咁你喺咁嘅情況之下，如果作為一個即係監督人員，坐喺寫字樓，可唔可以實時監察嗰個車長？佢即係暗示就話如果有問題，可唔可以同個車長嚟到溝通？就話你要改變嗰個駕駛行為，咁呢個就係佢個問題，當然呢個系統同你頭先所啱啱講嘅係好唔同。

梁健宏先生：正確。

MR DUNCAN：（經傳譯員）我想講呢樣嘢作為實時嘅車長嘅監察系統，以免混淆，我就話呢個係一個實時嘅車長監察系統，Kulis 先生就話呢個都好常見嘅，世界其他地方常見嘅，你見唔見到佢呢方面嘅證供？

梁健宏先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）九巴有冇考慮過做呢樣嘢？

梁健宏先生：（經傳譯員）有。

MR DUNCAN：（經傳譯員）你哋關於呢個咁樣嘅系統，有咩嘢立場，因為而家九巴未實施嘅，而你哋嘅立場係咩嘢？

梁健宏先生：（經傳譯員）唔現實嘅。

MR DUNCAN：（經傳譯員）你覺得即係決定就唔做，係咪呀？即係你哋決定就係唔採納？

梁健宏先生：（經傳譯員）講得啱。

MR DUNCAN：（經傳譯員）可唔可以同委員會解釋點解係唔現實？

梁健宏先生：對啲車長會好大壓力，亦都未必有咁嘅系統可以處理到咁大量嘅車長同一時間，亦都曾經徵詢過 ZF Openmatics 呢個情況，覺得個結論都係不可行。

主席：（經傳譯員）你啲諮詢係幾時做？

梁健宏先生：一段時間㗎嘞。

主席：（經傳譯員）可唔可幫下我哋，幾時呀？

梁健宏先生：就唔係一個好 formal 嘅討論，不過亦都有啲傾談過，尤其是喺 Openmatics 嗰部分。

主席：（經傳譯員）幾時？

梁健宏先生：就唔係我去傾談，我啲同事同佢討論過，知道有啲咁嘅嘢。

主席：（經傳譯員）邊個做？邊個同佢哋傾？

梁健宏先生：（經傳譯員）我而家唔記得。

主席：（經傳譯員）或者畀啲時間你諗一諗，我哋而家就小休二十分鐘。

上午 11 時 36 分聆訊押後

上午 11 時 58 分恢復聆訊

出席人士如前。

主席：（經傳譯員）係，大律師。

MR DUNCAN：（經傳譯員）多謝主席。梁生，你仲有冇進一步嘅資料可以畀我哋，就係話邊一位係同 Openmatics 講過呢一件事，同埋係幾時嘅事？

梁健宏先生：我問番啲同事，咁就了解番個情況就，呢個佢所提出嘅用一個 supervisor，經過一個軟件，睇住每一個車長嘅表現，其實呢個情況，我哋係覺得唔可行嘅，所以變咗喺呢一方面，我哋亦都唔會再處理嘅，其實我哋同 ZF 講嗰樣嘢就第二樣嘢嚟嘅。換句說話講，頭先嗰個一個 supervisor 睇住一個車長，呢個咁嘅做法，我哋覺得唔可行，因為我哋有成四千個車長，我哋唔可能有咁多個 supervisor 去睇住四千個車長。

主席：（經傳譯員）你同ZF講嘅係咩嘢？

梁健宏先生：我哋同 ZF 嘅設計就係點樣樣將嗰啲實時數據可以傳遞到畀我哋公司，咁而我哋公司嗰啲數據點樣樣可以做到一啲實時嘅地圖，啲車長喺唔同路線嘅地點，可以從而令到我哋嗰個車務嗰個實時管理係做得更加有效率嘅，呢個就係當其時我哋設計呢個 ROM 嘅目的。

李澤昌先生：或者我呢度補充少少。

主席：（經傳譯員）幾時討論㗎，呢件事？

梁健宏先生：呢個應該係 2013 年我哋開始裝黑盒，當其時我哋知道有黑盒嗰個用途。

李澤昌先生：我想喺呢度補充多少少 Operation Director 頭先講嗰啲嘢，其實今日有兩個睇法，去點樣去實時去管理嗰個車隊嗰個狀況，一個睇法就係，佢嗰個所謂 real time，佢有個中央嘅控制室，然後就可以知道路面啲車點樣行法，咁從而由個中央嘅控制室就同個車長去同佢溝通，就令到嗰架車行嘅速度同前車嘅距離唔好太近或者太遠，令到個運作上會係順啲嘅。當然呢樣會有個好大嘅問題，一，實際上車長喺路面嘅真正嘅情況，喺個控制室裏面，你除非你嘅資料係非常之準確，你知道路面嘅情況，即係話好多 TV 影住之類嘅嘢，即係佢唔係一條鐵路嚟嘅；第二個問題，就係同個車長之間嘅溝通，呢個今日嚟講可能係唔理想嘅，因為個車長喺個路面嘅壓力都相當之大，所以呢個溝通嘅時間亦都係--呢個頭先梁生係憂慮嘅一點。另外，而家我哋做緊嘅，就係用咗嗰啲數據，然後我哋自己喺個 back end 嗰度，有一個叫做 TER 嘅 system，T-E-A-R（原文照錄），我諗你大家都知道，呢一個就會係同我哋喺地勤嗰啲督察，同埋喺站頭嗰個站長嗰個，係比較即係有拿捏到嗰個交通擠塞嘅情況資料。當嗰啲車長去到個巴士總站嘅時候，而個站長同埋嗰個督察係好清楚呢架車係遲咗幾多。當然，有啲情況係可能要個車長要做快少少，要追番嗰班，或者係知道情況，咁呢個我哋當其時覺得係比較人性化多少少。實際上，因為即係巴士同鐵路有少少唔同，佢個中央控制去管理四千個巴士喺路面，係有個難度，咁呢個我諗就相信頭先我哋講緊就係嗰個分歧就喺呢度，但係 Openmatics 畀嗰啲數據畀番我哋個 back end，都係做緊呢一樣嘢，不過就唔係一個中央去控制四千個車長。

梁健宏先生：多謝李生補充。

主席：（經傳譯員）我諗你都講咗三次嘞，我哋都明白嘅。大律師。

MR DUNCAN：（經傳譯員）梁生，我哋小休之前，我有個咁嘅印象就係話，關於呢個實時嘅司機，巴士車長嘅監察系統，呢個係 Kulis 先生嘅講法，我嘅印象就係，你話你間公司係同 Openmatics 講過呢樣嘢嘅，你其實而家係咪話，即係冇講過呢件事？

梁健宏先生：我哋有同 Openmatics 商討佢嗰個黑盒嘅，就住佢個軟件，話有個

supervisor睇住個車長去管理嗰度，嗰部分我哋係唔會考慮，亦都應該冇討論過。

MR DUNCAN：（經傳譯員）即係話你決定唔做一個實時嘅車長監察系統，因為唔實在？

梁健宏先生：我哋覺得如果係用一個 supervisor 睇住一個車長呢個方法去處理，係不可行嘅，因為你睇番 ZF 佢嗰度，佢就 refer to 喺一啲 Western country，佢 refer 番有啲個別嘅情況，因為安全嘅理由，因為商業嘅理由，咁就用呢個方式。其實我哋亦都曾經自己內部討論過，有啲--我哋自己有啲車，我哋有啲車可唔可以會裝啲呢啲咁嘅設施去監察佢，不過嗰啲車就唔係巴士，譬如係我哋運 coin box 嗰啲車，或者我哋運 fuel 嗰啲 tanker，咁呢啲車會唔會係一個 security reason 去做呢樣事情，就唔係我哋巴士，所以我覺得佢 refer 番一啲 case，就未必就係 City bus 嘅，或者我哋咁大車隊嘅 application。

主席：（經傳譯員）你係講邊「佢」？邊個係「佢」？

梁健宏先生：我講緊就係喺個 exhibit--喺個 evidence 嗰度，你哋 Openmatics 嗰個代表。

主席：（經傳譯員）係，你係講緊 Kulis 先生？

梁健宏先生：（經傳譯員）係嘅。

主席：（經傳譯員）唔該。

MR DUNCAN：（經傳譯員）唔好意思，我就想講番程生嘅證供。梁生，關於佢描述嗰個計劃，你似乎個理解同程生嘅理解係有啲唔同嘅，你有冇涉及佢講嗰個工作計劃？

梁健宏先生：（經傳譯員）有嘅。

MR DUNCAN：（經傳譯員）我想你睇番佢證供嘅另一部分，係研訊第八日，係文件冊第三號，89 頁。未睇呢個佢嘅證供之前，或者想同委員會--你可唔可以同委員會講一講，你參與係點樣參與法？

梁健宏先生：呢個 project 就 2013 年，咁就當其時我就係負責 bus maintenance，咁亦都有啲參與一啲 presentation，因為有黑盒呢個工具，可以幫助到公司嘅車務嘅發展，當其時亦都有公司搵過個顧問公司，幫 KMB 喺呢一方面有啲建議嘅。當其時對於車務，我就本人就唔係好參--我最主要係維修嘅啫，但係都有參與呢啲咁嘅簡介，個 involvement 就係咁樣樣，知道嗰個 concept，車務點樣樣可以更加有效率，利用實時嘅資料。

到到我正式接任車務總監，我先至認認真真知道呢個情況，到到我知道呢個情況之後，我 2016 年接任車務總監，知道有 ROM，real time

operation management system呢個project進行中，我留意到有啲實時嘅地圖，知道架車喺條路線喺邊度，呢樣嘢就幫到我哋站長督察去點樣調配車輛，呢度係做咗嘅，當其時係2016年1月，我接任車務總監呢個職位嗰陣時。但我亦同時發覺到呢個project，原來係包含一啲另外一個功能嘅，就係代替我哋TER站務管理系統嘅功能嘅。站務管理系統就係講bus termini嘅運作，包括車長嚟到個站，佢去報到，開車，跟住到站，佢會report duty，知道架車幾時到站，車長亦都喺要接受站長個車務調動，呢個就係站務管理系統TER，當其時就係TER。頭先我講番呢個ROM其中一個功能就係代替TER，「代替」嘅意思就係佢會成立一個中央控制室，係遙控咁樣樣，remote咁樣樣去調派車長嘅工作安排，調派車輛喺唔同路線嗰個班次嘅調動，亦都遙控咁樣樣收到車長嘅報告，就住任何事情，包括壞車，包括意外，包括乘客嘅種種狀況。呢樣嘢就係嗰個設計就係中央去負責所有喺...

MR DUNCAN：（經傳譯員）唔該晒，梁生。我想你留意...

主席：（經傳譯員）未做呢樣之前，大律師，我想問一個問題，梁先生，你頭先答我哋嘅時候，你話當時有黑盒嘅數據係你考慮過，你又請咗顧問，咁顧問要求--你要求顧問做咩嘢？

梁健宏先生：佢負責就住service enhancement、service delivery嗰度畀啲意見嘅。

主席：（經傳譯員）包唔包括防止譬如話呢啲巴士去埋同一笪地方，即係堆埋一堆咁？

梁健宏先生：（經傳譯員）呢個係顧問係即係--係服務嘅。

主席：（經傳譯員）譬如話啲巴士太集中一笪地方都包括，係咪呀？

梁健宏先生：（經傳譯員）係。

主席：（經傳譯員）大律師，請繼續。

MR DUNCAN：（經傳譯員）程生嘅證供，我想你睇一睇89頁，謄本嘅89頁，係第八日嘅會議嘅，第14行，黃律師代表委員會問咗一個問題，問程生，「係咪你加入公司到到你離開嘅呢段期間，你係涉及呢個ROM實時管理系統嘅計劃？」

「我唔敢講話我離開嘅時候都係參與，不過當時係討論嘅時候，即係實施嘅時候，我係就好積極咁參與有關嘅計劃嘅。」

黃小姐話「我知道有個段落就係主要要實施呢個計劃嘅原因，係要通過實時嘅警示，同埋畀巴士司機嘅提示，係改善安全。咁可唔可以--關於嗰個將訊息回饋畀巴士司機，你可唔可以話畀我聽，呢個係一個實時、回饋定係一個畀人投訴之後事後先至去向巴士公司提供個資訊？」

程生就話「個概念就係要係希望同巴士公司同埋嗰個控制中心，車務員控

制中心有一個雙向嘅溝通系統，咁巴士佢哋有一個叫做 DDU，即係話司機嗰個顯示系統嘅，咁透過呢個系統，就可以有兩個方法嚟到去干預嘅。第一，就根據預先設定嘅限值，就如果超出，就有個警示；第二個就係話，有啲人可以向控制中心嚟到係提示個車長嘅。咁我哋假設，譬如話有人坐咗响個車務控制中心，咁而家有架巴士太快，不過都仲係响嗰個車速限制嘅範圍之內，嗰個車上嘅設備就發現唔到咩問題，不過嗰個控制中心嘅控制人員發覺譬如有笪地--有某個路段，天氣，或者其他嘅意外等等，應該係慢一啲嘅，咁呢個督導人員就可以係介入，就請嗰個司機响呢個路段特別小心，咁呢個係有兩個方法嚟到--兩個水平嘅干預嘅。」

「咁响第二個層面，嗰個係控制中心個督導人員，你點樣可以係同個司機嚟到係聯絡？」

「我哋係經過好多唔同嘅選擇，我哋係講緊一個顯示系統。第二就係，我哋都講過一個係聽力方面嘅做法。」

「咁即係話有兩個可能性，一個就係用顯示系統，另外就係用一個聲音嘅系統？」

「係呀，如果已經有顯示，就另外一個可能性就係加埋嗰個聲音。」

「咁會唔會係用無線電，抑或用任何嘅方法？」

「應該係可以用無線電，或者用 3G 嘅溝通系統，當時我哋冇講到咁遠。」

黃律師就話「你就講過話有好多嘅會議，同埋好多討論係講到呢一個實時車務控制系統，你記唔記得有冇一啲會議嘅紀錄，或者係一啲文件，係記錄咗呢啲嘅討論？」

「如果我記得，係有好多嘅簡介，亦都有好多嘅電郵係做咗啲摘要，即係話我哋主要嘅議題，主要要做嘅工作咁，但係如果你話正式嘅會議紀錄，我記唔到話有冇準備過。」

你睇到呢一個證供，梁生，似乎程生描述呢一個嘅計劃，完全係同你對於呢一個計劃嘅理解係截然不同，你覺得係咪咁？

梁健宏先生：（經傳譯員）係，正確。

MR DUNCAN：（經傳譯員）你有冇知道任何嘅計劃，係喺公司嗰度進行緊，係關於程生講到話點樣講番畀啲巴士車長聽？

梁健宏先生：現時係我哋冇咁樣樣嘅 project 進行中，現時我哋個 ROM 就唔係做呢樣事情嘅。

主席：（經傳譯員）頭先係問你喺嗰陣時，程生仲喺公司嘅時候，有冇一啲咁樣嘅計劃係你知道嘅呢？即係唔係話你講嗰個。

梁健宏先生：（經傳譯員）冇。

MR DUNCAN：（經傳譯員）喺第 91 頁 19 行嗰度，程生就講到一啲簡介。你都有講過一啲簡介，你頭先作供嘅時候，都係講番 ROM 呢個實時車務控制系統，咁而家呢啲嘅簡介嘅資料仲喺唔喺度？

梁健宏先生：（經傳譯員）我要查一查先知。

MR DUNCAN：（經傳譯員）我哋會好希望你進一步睇一睇，等委員會可以睇番呢一啲嘅簡介資料、電郵，係關於呢個實時車務控制系統，而係當時程生喺公司嘅時候呢一啲嘅資料，你可唔可以搵人幫我哋搵下？

梁健宏先生：（經傳譯員）我哋會嘅。

主席：（經傳譯員）好，唔該晒。

MR DUNCAN：（經傳譯員）我哋...

主席：（經傳譯員）對唔住，大律師，等一等。

MR DUNCAN： Thank you.

主席：（經傳譯員）喺呢一方面，就住先前嘅一件事，我想請你提供一啲資料，係關於保存呢一啲紀錄嘅公司嘅制度，大律師都已經講過話保存電郵，仲有就係其他嘅紀錄，譬如今次呢啲就係簡介會嘅資料，我哋可唔可以都有一啲資料就係關於你公司呢一方面嘅政策？唔係一定而家，而係你返轉頭可以畀我哋。

梁健宏先生：想補充一點，就住嗰個 ROM，我哋其實就係有一套 2014 年 10 月嘅成份 ROM 嘅 proposal 係點做，就係喺度嘅，咁呢度講番呢個 ROM 係做啲咩嘢嘅，其中有部分係關於用中央控制室去取替站長呢一方面，我就暫停冇做嘅，我覺得呢樣嘢係唔可行嘅，亦都未經過我哋公司尤其是董事會嘅討論嘅，所以如果講 ROM 呢個系統，嗰啲資料就喺度㗎嘞。ROM 係乜嘢嘢，就係呢啲嘞，我亦都可以交畀 IRC 去了解下實際係呢個 ROM 係咩嘢嘢。正如我頭先所講，“ROM”係 real time operations management system，係同駕駛安全冇關。

主席：（經傳譯員）我哋理解你嘅證供，我哋都有程艾樂先生嘅證供，好明顯佢係講述一啲你有講嘅嘢，但係佢亦都講到用數據嘅另外一個輔助方法，即係嗰個數據產生係為咗一個目的，但係其實亦都可以愛嚟做第二啲嘢嘅，我哋而家就係問呢樣嘢，不過我哋好希望都睇到你而家有嘅一啲材料。大律師。

MR DUNCAN：（經傳譯員）多謝主席。我離開呢個題目之前，梁生，我哋就係講緊實時車長監察系統，你都知，呢個就係 Kulis 先生所講嘅系統。我明白你嘅立場，咁你就話唔實際，不過我希望你好清楚--我好清楚明白就係，究竟公司係考慮咗幾多。你就話同 Openmatics 討論過，係講到其他嘅車輛，公司有冇做過任何嘅研究，係呢一個系統可以點樣用？譬如話喺西歐啲國家，即係好似 Kulis 先生提過咁，公司有冇考慮過，考慮咗幾多？

李澤昌先生：等我答你呢個問題，有，星期二已經講咗，我哋已經係有一啲同事去咗北愛爾蘭係學習緊。咁講番即係 Openmatics 嗰樣嘢，嗰個即時 real time 嗰樣嘢。過去就個車長喺嗰個行走嘅時候，佢知道佢係咪超速，今日嘅情況就係，其實當嗰個油針去到 70 公里嘅時候，咁個車長就會提示佢。而家 Openmatics 同我哋公司已經開始係做緊一個研究，就係將佢嗰個地圖係放咗一啲所謂叫做車速嘅限制，喺香港嘅地方，無論係 70 同 50 都會睇到嘅話，咁即是話，嗰個所謂 real time，喺嗰個車長嗰個 dashboard 嗰度就會響起超過 70 同埋超過 50，呢個係進行緊嘅。其實呢個亦都喺 7 月 31 號已經開始我哋啲車隊係試緊呢樣嘢，咁亦都喺尋日我哋入咗啲文件--前日入咗啲文件畀你，都解釋緊呢個係進行緊。

MR DUNCAN：（經傳譯員）係，呢個講到車速，如果大力剎車，突然加速，其他巴士車長嘅行為係會導致不安全駕駛嘅行為？

李澤昌先生：有。

主席：（經傳譯員）唔好意思，你而家問嘅問題係咪都同實時嘅監察有關？

MR DUNCAN： Yes, real-time driver monitoring.

主席：（經傳譯員）如果係咁，你可唔可以再問一次，係包括埋實時監察？

MR DUNCAN：（經傳譯員）係，公司有冇採取任何嘅步驟，係關於實時巴士車長嘅監察，就係除咗超速之外？具體嚟講，就係譬如話大力剎掣，剎車，突然加速。

李澤昌先生：今日其實喺嗰個 real time，喺架巴士上，個 sudden acceleration 同埋個 harsh braking 已經有提示到個車長㗎嘞，今日已經有㗎嘞，但係我哋過往呢一段時間都發覺到，其實除咗係個 Openmatics 之外，其實車長--車裏面嘅乘客都要提醒佢哋，因為我哋發覺好多車嘅乘客，除咗係老人家提醒佢之外，一啲年青人佢用手機，佢令到佢--有個 harsh braking 同埋個 sudden acceleration 令到佢喺車裏面發生意外都有。我哋都喺而家特別啲路段發覺呢一個--我哋俗語叫做因為呢樣嘢而有嘅意外，都做咗好多工作，喺--我相信有啲同事呢一段時間喺嗰啲譬如長沙灣道，我哋喺幾個月前都做咗啲工作，就派啲 leaflet 就提醒一啲人喺坐巴士嘅時候唔好掛住睇手機咁多，或者提醒啲老人家，呢個我哋繼續做。

去到嗰個 Openmatics 嗰度，我哋之後亦都有啲工作做緊嘅，就係我哋講緊嗰個 geo-fencing 嗰樣嘢，geo-fencing 嗰樣嘢，其實我哋已經開始有啲車隊係試緊呢樣嘢嘅，但係呢樣嘢係比較複雜，因為點解，其實係除咗個車佢本身有個速度，架車本身有嘅，然後個 black box 係搵到個 location，知道嗰架車個位置應該行嘅速度。咁第三樣嘢就 geo-fencing，個 geo-fencing 就駁番入去架車裏面，嗰個用電子控制嘅，例如嗰個 brake，例如嗰個油門，例如嗰個減速器，即係有個 gearbox，係點樣控制番佢呢樣嘢，呢個我哋係向呢個工作行緊。我哋可以即係畀番啲補充少少，呢個係做緊嘅。

MR DUNCAN：（經傳譯員）係，我哋明白嘅，李生，多謝你。我頭先個問題係具體講到 Kulis 先生描述嗰個制度，就係話好積極主動嘅監測，即係話喺中央控制室嗰度係講到佢嘅速度，同埋其他駕駛嘅行為，咁你就話「係冇嘅，係唔實際嘅，我哋考慮過，但係唔做。」我個問題就係，你有冇做過任何嘅調查，如果即係喺公司裏面，去睇下究竟其他嘅國家司法管轄區係點樣用呢一個系統？咁而因此可能喺香港都啱用呢？

梁健宏先生：或者我想再就住呢個問題再講多少少，科技嘅發達，科技嘅進步，如果嗰啲資料係好容易咁知道呢個車長係咪超速，如果啲資料係咪即時可以睇到嘅話，同埋嗰啲資料點樣傳送到，同埋點樣樣可以分辨到邊一位車長，我相信以前我哋覺得有問題嗰啲，都可能會解決，所以變咗，都係視乎嗰個科技嘅發展，我哋亦都希望科技係可以做到。所以點解我哋而家有 30 秒，希望去到 10 秒，或者會唔會去到兩秒、1 秒，呢樣嘢就真係科技，呢樣嘢就真係科技，我哋都期望，期望呢樣嘢可以做到。

MR DUNCAN：（經傳譯員）我諗你冇答到我問題，不過由你嘅答案，我可以有一個結論，就係其實你做咗好少我問關於嘅嘢，因為你相信有其他好啲嘅方法，用其他嘅科技可以做到，咁我咁樣講係咪公道？

梁健宏先生：我意思就係話，如果嗰個科技可以令到嗰個 real time monitoring，而家你講緊 monitoring，就唔係 real time assist 或者 real time alert，而係 real time monitoring，係有人睇住個車長嘅表現。之前所講及到，西方國家有個 supervisor 睇住個 driver，安全理由，商業理由，但係如果我哋講緊我哋巴士，四千個巴士，99%個巴士都係--車長都係一個好稱職，好安全駕駛嘅車長。我哋係咪要用三千九百九十九個人睇住呢四千呢個車長呢？呢個係一個技術上嘅問題，如果科技上係可以做到，幫到我哋，可以由兩個人睇住四千個車長，而每個車長都係駕駛好嘅話，我相信我哋會極之採納。

MR DUNCAN：（經傳譯員）就係因為呢一啲嘅事情，咁你就冇進一步探索呢個問題嘞，係咪呢，呢個情況係咪咁？因為你個結論就係唔實際吖嘛，係唯時間？

梁健宏先生：我哋係保持開放嘅態度。

MR DUNCAN：（經傳譯員）唔好意思，你話保持開放態度，係咪即係話仲喺檯面，你仲會考慮嘅呢？抑或你已經係有一個結論就係唔實際？

梁健宏先生：當其時我哋覺得嗰個決定，或者當其時個決定冇做到，係基於不可行，如果將來有個情況，real time monitoring，係 practical 嘅話，我哋極之開心咁採納。

MR DUNCAN：（經傳譯員）但係就唔係公司而家考慮緊嘅嘢，咁樣講啱唔啱？

梁健宏先生：暫時我見唔到有一個 practical 嘅方向畀到我哋，如果有嘅，我哋極

之樂意即時去採納。

MR DUNCAN：（經傳譯員）李生頭先講即係巴士上面乘客嘅一個嘅事項，我就想請講到嗰一啲關於乘客嘅事項嘞，呢個係講緊係乘客嘅行為，即係巴士上乘客行為。我相信你都知道，委員會聽過啲證供就話，差唔多每日你哋嘅車長都會受到人口頭上，甚至有時係肢體上嗰啲係侵襲嘅，咁樣係咪一個合理嘅一個對事情嘅簡述？

李澤昌先生： Yes.

彭樹雄先生：或者我回應呢個問題，確實係嘅。

MR DUNCAN：（經傳譯員）我想請你睇 KMB1 號文件冊，203 頁。呢一頁係一封信，係由委員會發畀公司嘅，日期今年嘅 7 月 20 號。我想提醒你，就係呢封信係希望攞到啲進一步嘅資料，呢個關於即係襲擊巴士車長嘅資料。第二到第四段，即係 204 頁可以睇到呢兩段，我哋要求你提供一啲詳細嘅資料，就住五個襲擊嘅事件提供資料嘅，你見到呢度有關嘅要求嘞。

彭樹雄先生：係，睇到。

MR DUNCAN：（經傳譯員）唔該晒。請你睇番 212 頁，係同一個文件冊，呢個係公司嘅回信，你有提供啲統計嘅資料，關於襲擊嘅個案嘅，就從 2015 年 1 月 1 號到 2018 年 7 月 22 號期間嘅一啲統計數字嘅。218 頁，我係睇緊一個翻譯本嘅，你有睇到，呢度有五宗個案嘅詳情，即係委員會就係請你就住呢五宗係提供資料嘅，全部都係今年四月發生嘅事件嘅，請你係咪揭到已經 218 頁嘞？

彭樹雄先生：（經傳譯員）係嘅。

MR DUNCAN：（經傳譯員）唔該。呢度有五個個案，你睇番嗰個懲罰或者係入獄嘅刑期嗰度，你見到第一項第二個就係話，警方唔進一步處理，最後一個個案就仍然係調查緊。

彭樹雄先生：係，冇錯。

MR DUNCAN：（經傳譯員）三、四呢兩個個案，個被告就係認罪嘅，就罰款 3,000 鈆，另一個就罰款 1,000 鈆，即係分開就兩個被告就分別就係罰款嘅。你知唔知道最高嘅入獄嘅懲罰或者係裁判官關於襲擊，最高可以係罰幾多呢？就係 100,000 鈆嘅罰款，同埋六個月入獄嘅，你知唔知道？

彭樹雄先生：係，知道。

MR DUNCAN：（經傳譯員）咁樣可唔可以咁講，既然有咁高--呢啲咁嘅高--最高刑罰，咁呢幾個個案嘅懲罰似乎都係比較輕微，咁樣講公唔公平呢？

彭樹雄先生：我同意嘅。

MR DUNCAN：（經傳譯員）呢樣嘢係咪一個問題？公司認唔認為係一個問題，即係話懲罰係輕微？

彭樹雄先生：呢個係我哋其中覺得一個嘅問題，亦都係我哋其中一個嘅 concern，可以咁講。

MR DUNCAN：（經傳譯員）我想請你而家睇睇 293 頁，同一個文件冊，293 頁。呢個係一個文件嘅翻譯本嚟嘅，文件大概會响 286 頁嗰度睇到㗎嘞。

彭樹雄先生：係，睇到。

MR DUNCAN：（經傳譯員）咁而家我睇 293 頁呢個信件嘅翻譯本，呢封信你可以睇到係嗰個簽名，九巴嘅法律部門嘅簽名下面嗰度，即係 2018 年 3 月 8 號，呢度即係話係巴士車長受到多宗襲擊嘅個案。

彭樹雄先生：係，冇錯。

MR DUNCAN：（經傳譯員）呢個係寄畀警方嘅，特別係即係寄畀警務處處長嘅？

彭樹雄先生：係，冇錯。

MR DUNCAN：（經傳譯員）第二段呢度咁講嘅，「舊年嘅 5 月，我哋寫信畀警方就係表示關注我哋個巴士車長一個接一個受到襲擊嘅。咁考慮過有關嘅個案，我覺得有啲人根本就唔淨只係襲擊嘅，而係一個係違反咗公共巴士服務規例嘅第 13A(1)(c)條，即係話乘客或者係打算搭巴士乘客就唔應該影響到巴士或者係巴士嘅設備嘅，或者影響到造成干擾或者造成損害嘅，或者係造成任何人嘅受傷，或者係唔舒服，或者係受到唔方便，或者係滋擾嘅。所以我哋請咗我哋嘅職員，就住上述個案向警方提供資料嘅，希望警方可以控告呢啲--根據有關規例嘅 13A 條，控告呢啲嫌疑犯嘅，咁我哋有關嘅陳述書證供就已經係附錄响本信件嘅。」

跟住去到 294 頁，就係繼續嗰封信喇，跟住我--「本公司就寫咗畀係香港警方就係考--查詢呢個發展嘅，我哋得到通知就係，佢哋淨係告呢啲人係--警方淨係告呢啲人係普通襲擊嘅。我哋有同--呢度亦都有啲其他同警方嘅通信嘅副本嘅，我哋就同--本公司最近同前線嘅巴士車長就見面，佢話香港警察就--佢哋希望警方會根據規例嘅第 13 條例嚴格執法，去到警告嗰啲人會影響我哋巴士車務嘅人，或者係襲擊我哋職員嘅人。我哋希望」--跟住咁寫，「我哋希望香港警方將來將呢啲襲擊嘅巴士車長會係考慮下根據規例嘅第 13A 條控告佢，即係再附加上嗰個普通襲擊嘅罪名嘅，我哋會同警方合作，嚟到係提供協助嘅。如果你有咩嘢需要查詢，請隨時係接觸我哋嘅律師。」

296 頁就係嗰個警方回信嚟嘅，係 5 月 17 號，佢即係話「收到你嘅信，關於嗰個係同你哋公司嘅見面--3 月 28 號見面之後嘅跟進行動，我哋已經係通知咗總區，嚟到提醒前線嘅人員，就係要處理嗰個係襲擊或者係滋擾巴士司機嘅個案，要係公平同埋專業處理，我哋明白到呢個情況嘅性質，我哋都知道呢個係一

個應該要考慮下係咪根據香港法例第 203A 條（原文照錄），將公共巴士服務採取行動嘅。」

關於襲擊車長，警方有冇試過，即係今年 5 月 17 號之後，有冇試過提出過檢控？

彭樹雄先生：呢個我暫時收唔到個訊息，應該就冇嘅。

MR DUNCAN：（經傳譯員）所以我哋唔知道究竟警方係咪接受你哋嘅要求，根據個規例嚟到係檢控，我哋仲未知㗎？

彭樹雄先生：（經傳譯員）唔知嘅。

MR DUNCAN：（經傳譯員）咁到目前為止，一向個做法都唔係咁，係咪呀？

彭樹雄先生：（經傳譯員）你意思根據 230A 章提出檢控，係咪呀？

MR DUNCAN： Yes.

彭樹雄先生：從我公司嘅紀錄，我哋睇得到係從未有一單嘅案件係用 230A 係作出檢控嘅。

MR DUNCAN：（經傳譯員）你知唔知道，規例裏面最高嘅罰則係 3,000 蚊罰款，入獄六個月？

彭樹雄先生：係，我知道嘅。

MR DUNCAN：（經傳譯員）所以要求警方根據呢度嚟到規例控告，係有咩嘢用途呢？因為佢比起普通襲擊嘅罰則係低啲嘅。

彭樹雄先生：其實我哋公司嘅睇法，因為就住一啲嘅譬如話普通毆打等等，好多時嗰個警方指出嗰個檢控，或者個調查，相對地係困難嘅，而喺--如果喺用 230A 作出調查甚至檢控，可能相對地，去證明嗰個違法行為係會比較係容易啲。兼且，我哋亦都希望一啲毆打我哋車長，又或者“abuse”，我用個字，我哋車長--abuse 我哋車長嘅乘客亦都能夠得知到，其實係有一條嘅 230A 係監管住乘客嘅行為，有啲唔一定係話要 physically，即係要係郁手郁腳接觸到，有身體接觸，其實 230A 嘅精神就係話，一個乘客嘅態度其實都係可能會觸犯到法律嘅。

MR DUNCAN：（經傳譯員）你覺得比較容易係成立嗰個控罪，係咪呀？就唔係--即係比普通襲擊容易啲，係咪咁嘅睇法？

彭樹雄先生：當然，呢個我諗我哋都要交番畀警方去回答，不過站喺我哋一個公共巴士服務營運者，既然有一條法例係能夠我哋叫做保障到我哋巴士公司，保障到我哋前線嘅同事，點解我哋唔嘗試，試下用呢條條例去作出檢控呢？

MR DUNCAN：（經傳譯員）我唔係好記得，請佢哋打出呢一條規例出嚟，等我哋知道實際上佢係點寫嘅，我哋或者而家顯示嗰個規例。

主席：（經傳譯員）當我哋咁樣做嘅時候，彭生，嗰個喺規例之下嗰個罪行好似係寫得闊啲，係咪？即係佢包括嗰啲行為，係比較闊啲，係咪？

彭樹雄先生：（經傳譯員）主席，係㗎。

MR DUNCAN：（經傳譯員）我哋搵到嘞，係 THB 第 2 號文件夾，第 132 頁，13A(1)(c)，就係你諗到嗰個規例嘅部分，佢係咁講㗎，「乘客或已成為乘客嘅人，對巴士嘅任何部分或其設備故意作出或故意安排作出任何事情，而該等事情阻礙或干擾巴士的操作，或引致損壞；或第二，導致他人受傷、不安、煩擾或不便。」你係咪就係諗緊呢一方面嘅規例？

彭樹雄先生：（經傳譯員）係，鄧樂勤大律師。

MR DUNCAN：（經傳譯員）講番嗰個襲擊嘅問題，喺任何階段，你有冇要求過警方要讓裁判官留意，乘客呢一方面嘅行為其實都頗普遍嘅？

彭樹雄先生：係有，Mr Duncan，所以點解我會喺 3 月 28 號，其實係由我同埋我哋個 head of legal，梁律師，另外同一個負責交通意外或者調查嘅經理，我哋係主動去警察總部，police headquarters，同一位總警司同埋佢嘅警司，我哋係傾咗一個上晝，係表達我哋公司，甚至乎其他公共巴士服務營運者嘅 concern，我哋嘅關心。喺會上面，我哋亦都畀咗好多嘅數字警方，因為我哋覺得，其實如果純粹睇嗰個數字，我哋會覺得係比較擔心，點解呢，容許我用少少時間，其實喺襲擊車長，2017 年只係得三十五宗，但係 2018 年直至到 7 月 22 號，已經有四十一宗。我哋睇得到個情況係越嚟越差，所以係我哋希望警方能夠可以真係確確實實，認認真真，好深入咁去調查呢一啲嘅案件，令到我哋嘅車長可以喺一個安全嘅環境裏面去工作。

主席：（經傳譯員）你剛才畀嘅數字，即係你喺嗰個會議畀嗰兩位警司嘅，係咪同你今次畀我哋嘅數字係一樣嘅呢？

彭樹雄先生：Mr Chairman，我哋 3 月 28 號嘅時候，我哋嘅數係去到 3 月嗰個數嘅啫，呢個 7 月 22 號...

主席：（經傳譯員）我當然明白，但係喺另外一方面，我哋而家有嗰啲數字？

彭樹雄先生：係，冇錯，冇錯，主席。

主席：（經傳譯員）你係咪用同一個方式，同一個寫呢一啲日子嘅方法畀警方？

彭樹雄先生：係，應該係。

主席：（經傳譯員）你有冇返去，因為我哋係請你畀呢啲數字我哋，你有冇喺畀警方嘅數字嗰度包括係去到 2015 呢？

彭樹雄先生：有嘅。

主席：（經傳譯員）咁我哋--當我哋睇呢啲數字嘅時候，冇人係被監禁？

彭樹雄先生：根據我哋紀錄，係嘅，冇錯。

主席：（經傳譯員）大律師。

MR DUNCAN：（經傳譯員）咁警方嘅反應係點？

彭樹雄先生：其實喺嗰個會面裡面，3月28號個會面裏面，其實我睇得出警方都係關注嘅，咁嗰個總警司，個Chief Superintendent，佢亦都係喺個會度，亦都承諾佢會出一啲嘅指引畀佢哋前線個車長--Sorry，對唔住，畀佢哋前線嘅警員就係去第一，係會好認真咁去調查呢啲所有嘅alleged assault，同埋佢亦都會係提點佢前線嘅同事，睇下有冇一啲嘅案件係能夠適合用230A係去調查，甚至檢控嘅。

MR DUNCAN：（經傳譯員）你請警方留意呢啲事情，其實你個目的係咩嘢呢？你想達到啲咩嘢目的？

彭樹雄先生：其實我哋想達致就好簡單嘅啫，我哋唔想我哋啲前線車長係繼續受到一啲即係係--我用個字係“excessive”，一啲excessive嘅abuse，呢個就係我哋想咁樣做嘅啫。又或者Mr Duncan，如果你容許我都回應番又或者Mr Chairman個問題就係話，其實common assault同埋230A，我哋點解會想有230A呢？或者都容許我舉一個剛剛喺...

主席：（經傳譯員）咁好明顯，好明顯㗎嘞，一睇就知道嘞，因為佢好廣泛吖嘛？

彭樹雄先生：主席，你可唔可以畀我講一講啱啱有一單發生咗嘅事件，其實如果用230A，係可以令到我哋嘅車長嘅工作更加安全，更加暢順？

主席：（經傳譯員）哦，好呀，當然可以喇，唔該。

彭樹雄先生：或者我想帶大家，其實呢一單事件發生係喺7月29號，7月29號，咁我好簡單咁概括講一講就係，我哋喺夜晚差唔多11點鐘嘅時間，咁有四個二十幾歲嘅男乘客，咁佢上車，佢就係冇畀到足夠嘅車資嘅。當時個車長就曾經追問佢哋，叫佢畀足夠嘅車資，但係呢四個男子就完全冇理會個車長。咁個車長就繼續行車，因為有其他乘客。當佢去到又一城又一村落客嘅時候，呢四個男乘客就想落車，咁個車長就再一次追討。咁呢四個男乘客就完全冇理會，就落咗車嘞。

好嘞，跟住個車長就發覺，因為嗰架車當時個engine仲係應該suppose係行緊㗎嘛，但係個車長突然之間發覺架車死咗火，個engine off咗。咁個車長即刻就落車睇，就發覺呢四個男乘客就一路跑住咁走咗。好嘞，咁個車長於是乎就懷疑，同埋佢亦都聽到一啲踢我哋個車身嘅聲音㗎，有啲碰撞嘅聲音，其實我哋嘅車長就懷疑，第一，佢就係將我哋車尾有個死火掣就係熄咗，於是乎個engine就off咗。但係嗰四個男子就跟住就跑走咗嘞，好嘞，咁個巴士車長

因為有乘客喺車，佢於是乎上番車，再重新 start 過個 engine，咁繼續行車嘅。

好嘞，架車就喺大約十五、二十分鐘之後，佢就去完總站，再返番轉頭，去到又一村達之路個燈位，當時個車長係因為燈位所以停咗車嘅，但係突然之間，嗰個車長又發覺，個 engine 又熄咗，然後佢喺倒後鏡，又見番嗰四個男子，咁車長再落車睇嘅時候，就發覺個車又係熄咗個 engine。咁於是乎個車長追唔到喇，因為嗰四個男子走咗嘞。車長就即刻通知我哋當值嘅 inspector，咁我哋報咗警嘅。但係警員到場了解事件之後，當時嗰個警員就將呢件事作為一個糾紛咁樣處理，佢哋當呢個係一個 dispute case。然後巴士返番廠，咁就收工。

我想指出，其實好似呢一個咁嘅案件，其實係好明顯地，好明顯地，230A 係有可能係有人干犯咗嘅，但係結果呢個案件係作為一個糾紛咁樣處理。所以即係我都好希望就係話，喺保障我哋車長嗰個人身安全，保障我哋能夠提供一個適切嘅服務畀市民大眾，其實我真係好想懇請有關當局能夠認真考慮 230A 嘅檢控。

係，多謝 Mr Duncan。

MR DUNCAN：（經傳譯員）你有冇問過警方，去讓裁判官法庭去留意呢一類行為嘅普遍性呢？似乎你嘅巴士車長係要受到呢啲...

彭樹雄先生：有，絕對有，absolutely 有。

MR DUNCAN：（經傳譯員）咁佢哋咁做呢？佢哋有冇喺法庭度企喺身，話畀裁判官聽「呢一個係好常見，好普遍嘅罪行，我哋認為應該判得重啲，係可以有阻嚇作用。」有冇採取咁嘅步驟？

彭樹雄先生：呢一方面，我哋係有同 police--即係有同警方係提出過嘅，但係 Mr Duncan，我都希望你明白，就住 2017 年至到 2018 年 7 月 22 號，我哋總共係有七十六宗嘅普通襲擊車長嘅案件，但係當中只有十單係被定罪嘅啫，convicted 十單；有六宗就係和解咗；有七宗警方就係唔追究㗎，not pursuable--即係或者 not pursued；另外一單警方係話佢哋畀咗口頭警告。所以到底嗰十宗定罪，有冇喺法庭度，嗰個調查嘅警員係同法庭講咗嗰個嚴重性呢？又或者個法官有冇因為呢個嚴重性，而去考慮判刑呢？咁呢個我諗我喺呢度我答唔到，或者可以問一問警方有冇咁樣做法。

MR DUNCAN：（經傳譯員）你打唔打算同律政司司長提出呢件事？

彭樹雄先生：其實任何嘢可以保障到我哋嘅車長嘅，我哋都會做嘅，呢個其實我哋甚至乎都考慮，會唔會可以有一啲所謂 follow up 嘅 civil claim，可以令到市民大眾知道，其實呢一樣嘢係好影響到個巴士安全，好影響到個巴士運作。

主席：（經傳譯員）可唔可以請你回覆個答--問題呢？

彭樹雄先生：我哋喺呢刻就話，Secretary for Justice，我哋就--我哋冇--喺呢個階段，我哋冇諗過。因為我哋都想其實...

主席：（經傳譯員）嗰個係檢控專員呢，刑事檢控專員呢？

彭樹雄先生：冇呀，對唔住，主席，我哋冇--喺呢個階段，我哋係冇咁嘅打算，因為我哋始終都係覺得，我哋同警察嘅溝通，我哋希望都能夠真係做到我哋想做嘅嘢。

主席：（經傳譯員）唔該晒，睇個時間...

MR DUNCAN： Certainly, Mr Chairman.

主席：（經傳譯員）而家我哋可以係小休食午餐，咁晏晝就係從兩點半開始嘅。

下午1時01分聆訊押後

下午2時30分恢復聆訊

出席人士如前。

主席：（經傳譯員）各位，午安。鄧大律師。

MR DUNCAN：（經傳譯員）主席，午安。各位，希望大家就係攞出TD-2嗰個文件夾，第1頁，呢度我哋有《公共巴士服務條例》，想麻煩你睇一睇呢個第58頁，文件夾嘅第58頁，你睇下呢個第36條，嗰個係關乎呢個附例嘅，嗰度就係第(1)，喺嗰度嘅36就係話任何專營公司喺符合本條例同埋佢嘅專營權嘅規例下面，可就以下所有或任何事宜訂立呢個附例嘅，嗰度就係有(a)、(b)、(c)、(d)、(e)各項嘅，而(e)底下仲有一啲分段嘅，另外亦都係有第(2)、(3)、(4)條，跟住嗰版嗰度就見到喇。

而大家可能覺得同我哋喺午飯之前所傾嘅嘢最有關嘅應該就係(1)(e)嗰度，嗰度就係話專營公司有咁嘅權力係制定一啲附例嘅，就係關乎乘客一般嘅行為嘅，即係話如果啲乘客係搭呢啲專營公司嘅巴士，我想問九巴有冇制定過任何嘅附例呢？

蘇偉基先生：（經傳譯員）冇嘅。

MR DUNCAN：（經傳譯員）從來有冇考慮過話自己要制定附例呢？

蘇偉基先生：（經傳譯員）冇。

MR DUNCAN：（經傳譯員）想問公司有冇考慮過制定附例可能喺某程度上可以處理到目前個情況，即係話你哋而家嘅車長係要處理乘客行為嘅問題？

蘇偉基先生：我理解，如果係成立 by-laws 嘅話，公司就係有個責任去 enforce 呢個 by-law，就要考慮公司有冇咁嘅資源、有冇咁嘅能力，同埋就係話當嗰啲違反呢個 by-laws 嘅行為，佢喺嗰個地方嘅出現，公司係咪有員工可以即時去處理得到呢？呢個係一個考慮。現有嘅情況就係 230A 就係由警方去執法，佢喺個資源同埋嗰個嘅專業程度係比一個專營巴士嘅服務商嘅為大，同埋亦都更加專業。

MR DUNCAN：（經傳譯員）想問下，公司有冇打算去考慮呢？

蘇偉基先生：暫時冇。

MR DUNCAN：（經傳譯員）我哋就係有聽取過一啲證供，就話喺某啲巴士嗰度就係已經裝咗一啲鏡頭嚟到協助偵查嘅工作，亦都希望最後如果需要檢控一啲違例人士嘅話，就有助嘅。我就想請你睇呢個 KMB-1 嗰個文件夾嘅，就係喺第 82 頁嗰度嘅，呢度就係委員會向你哋問咗一啲問題。

當時問嘅問題就咁嘅，「就想問下，向呢個車長有冇提供過一啲顧客服務嘅訓練嚟到幫佢哋就有嗰個技巧去處理一啲麻煩嘅乘客？」

你哋提供嘅答案，其實就係喺第一份提交嘅陳述書嗰度有咁嘅答案，就包括下者嘅，我而家想睇番一個係第三點，呢度就話：

「除咗培訓之外，我哋亦都採取下列嘅措施嚟到協助車長去處理一啲難搞嘅乘客嘅」，其中就係話有一啲「監察嘅鏡頭，包括係方向向前嘅鏡頭，同埋有一個係影到車長個位嘅鏡頭，自從 2015 年開始，所有新巴士都係有一個標準嘅裝置。去到 2018 年嘅 2 月監察鏡頭就係已經係喺二千三百一十九部九巴嘅巴士同埋一百四十六部龍運巴士上面係裝咗嘅。其餘嘅巴士亦都會裝呢一啲監察嘅攝影機嘅鏡頭就係逐步咁去做嘅，呢啲監察鏡頭就可以影到嗰個行為，亦都可以有錄音，就可以影到嗰啲難搞嘅乘客，就會係喺日後警方進行調查或者係有法律訴訟或者程序嘅時候保障到車長嘅利益。」

我第一條問題就想問，呢啲嘅鏡頭或者係攝影機有冇讓你哋係有證據嚟到係促成係成功咁檢控到嗰啲違例者呢？

蘇偉基先生：（經傳譯員）有。

MR DUNCAN：（經傳譯員）根據我剛剛所讀出嘅二千三百一十九部九巴就已經有呢一啲嘅相機，呢啲攝影機，目前有幾多部係未有呢啲鏡頭嘅呢？

梁健宏先生：有二千--接近二千八百部車係有 camera，我哋成個車隊就有四千三百嗖，換句說...

蘇偉基先生：喺九巴嘅車隊大約係有一千一百部係未有裝，喺龍運，我諗大約係有七

十至八十部係未有裝呢個CCTV嘅。

MR DUNCAN：（經傳譯員）有冇話出現過咁嘅情況，車長自己就係嘗試去影呢一啲粗魯嘅乘客嘅行為，用佢哋自己嘅手機，有冇車長嘗試過呢？

蘇偉基先生：行車期間，車長係唔可以用自己嘅手提電話。

MR DUNCAN：（經傳譯員）我諗佢揸緊車嘅時候，好明顯呢個當然係咁嘅情況，因為會影響安全，但係巴士停低落嚟嘅時候又點呢？准唔准佢哋用手機呢，喺咁嘅情況之下？

梁健宏先生：我哋唔容許車長佢用自己嘅攝錄器材就擺喺個車廂度去攝錄嘅。

MR DUNCAN：（經傳譯員）有一位證人係工會代表，佢曾經就係作證嘅，或者我畀番大家係嗰個有關嗰個係頁碼，第10日嘅聆訊，係128至130頁嘅，講到就係佢哋嘅投訴，就係話車長就唔可以用手機嘅。

主席：（經傳譯員）其實佢係講手機定係相機呢？

MR DUNCAN：I think he mentioned cameras.

主席：（經傳譯員）因為嗰度有分別嘅，因為好多時譬如的士，我哋見到有呢個相機，同手機嗰個相機又唔同嘅。

MR DUNCAN：（經傳譯員）係，等我再問過個問題。有一位工會嘅代表，我諗係月薪車長聯盟嘅，佢哋就講過，就話有啲車長就係想用相機，但係出過通告係發畀佢哋，就係禁止係咁樣用呢啲相機嘅，首先你有冇聽過呢啲咁嘅證供呀？

蘇偉基先生：正確。

MR DUNCAN：（經傳譯員）係咪出過份通告？

蘇偉基先生：有喺度。

MR DUNCAN：（經傳譯員）可唔可以係交畀我哋委員會睇呢？

蘇偉基先生：可以。我可否解釋原因呢？

MR DUNCAN：（經傳譯員）可以，講。

蘇偉基先生：我理解，而家私人專員喺用CCTV，佢係有個指引去收納呢啲牽涉到個人私隱嘅數據，包括影像，首先就係要有個告示話畀人聽佢係被攝錄，然之後亦都有個指引，佢係要有一個retention嘅policy，同埋如果有人去索取，佢有個指引佢點樣去處理，亦都不需要嗰陣時，係要銷毀。

如果個別車長佢自己裝佢嘅CCTV喺個車廂入面，其實佢係冇辦法係保證到佢係符合到頭先嗰三樣嘅指引嘅，而家公司其實喺呢三樣嘢係明確做到，佢喺個巴士個車廂，上車嗰陣時係有個告示我哋呢架車係有個CCTV，公司亦有政

策去處理、保留或者 retrieve 嗰啲嘅錄咗嘅攝錄。公司唔係話停咗喺今日頭先講緊二千四百架車嗰度，我哋會喺年底之前，會將我哋嘅車隊九成係裝番 CCTV，餘下嗰一乘唔裝原因，其實佢都相繼喺一年之內會係退役，因為佢亦都架車老喇，十七、八歲，畀一個新車取替咗。變咗成件事就係話喺年底之內，我哋嘅車隊係會有配置 CCTV。

主席：（經傳譯員）係咪保障私隱就緊要過保障你哋嘅安全呢？

蘇偉基先生：我哋要取個平衡。

主席：（經傳譯員）唔係你嗰個係平衡，呢個係講到法例上面要有一個平衡，係咪呀？

MR DUNCAN：（經傳譯員）你哋係咪有徵求過法律意見呢？

蘇偉基先生：佢個指引其實係清楚、明白嘅，當時呢張嘅 circular 係唔畀車長自行裝，我唔可以答，因為係我未加入公司。但係我可以今日去再問一次，因為由而家到年底都仲有一個時間。

MR DUNCAN：（經傳譯員）公司有冇同呢個私隱專員係提過呢？

蘇偉基先生：（經傳譯員）有。

MR DUNCAN：（經傳譯員）你有同呢個私隱專員傾過？

蘇偉基先生：No，I have read --佢有個指引出嚟，而個指引亦都係列咗呢幾點。

主席：（經傳譯員）你有冇同私隱專員係傾過就係話如果係車長用呢一啲相機，希望就係影到啲人係襲擊佢哋嘅，...

蘇偉基先生：冇。

主席：（經傳譯員）...如果係咁樣嘅話，會唔會係違反法例，有冇問過呢？

蘇偉基先生：冇。

MR DUNCAN：（經傳譯員）我哋而家就講到係嗰個保護車長嘅嗰個保護屏或者係保護罩，我就想請你就係落去呢一個你哋第一份陳述書嘅第 62 頁，呢一份係第一份嘅陳述書，公司就講過以下嘅說話嘅，你話「鑑於就越嚟越多人襲擊呢個車長，我哋因應就係採取咗下列嘅措施」，或者你睇一睇呢一個第三至到最屘嗰段。「我哋就會裝一個保護板就係近住喺嗰個車長個位嗰度嘅，由 2018 年嘅 6 月開始咁做。」呢個過程係咪已經開始咗？

梁健宏先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）而家有幾多架巴士係有裝呢一個保護罩呢？

梁健宏先生：直到目前為止，一千五百部。

MR DUNCAN：（經傳譯員）車隊餘下嘅巴士會點樣做呢，有咩計劃呢？

梁健宏先生：我哋預計年底內完成呢個裝置。

MR DUNCAN：（經傳譯員）我想你睇另一個文件冊，就係雜項嘅文件冊2，第913頁，喺右下角，我哋見唔見到呢一塊嘅保護板？

梁健宏先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）邊個係負責設計呢一塊板嘅呢？

梁健宏先生：本公司嘅工程部，工程部。

MR DUNCAN：（經傳譯員）邊個負責製造呢塊板嘅呢？

梁健宏先生：KMB自行設計，就去採購，亦都係試裝，亦都交過畀運輸署去檢視，佢哋覺得同意，我哋先至大量今年6月開始安裝。

MR DUNCAN：（經傳譯員）你話你採購咗呢啲裝備，你係同邊一個買㗎？

梁健宏先生：外國嘅供應商。

MR DUNCAN：（經傳譯員）係邊個國家㗎？

梁健宏先生：我而家冇資料。

MR DUNCAN：（經傳譯員）你可唔可以攞呢個資料呢？

梁健宏先生：（經傳譯員）可以嘅。

主席：（經傳譯員）請你提供呢一個資料。呢個係咪根據世界其他地方巴士嘅保護板嚟設計㗎？

梁健宏先生：其他外國，尤其是英國，有部分嘅設計都未必啱我哋用嘅，因為我哋嗰啲，首先第一，我哋有冷氣，我哋唔可以係一個full enclosure嘅，變咗呢個亦都因應番我哋嗰啲車長，最主要個情況就係佢左邊係冇遮擋嘅，所以個原意設計都係喺左邊，希望有個保障畀我哋嘅車長。亦都有啲--你留意有啲位，有啲窿，其實係畀嗰度開車門嘅，所以變咗呢個protection shield純粹係我哋自己設計，希望個車長又用得開心，亦都可以做到保養--保護佢嗰個功能，希望--所以變咗係我哋設計。

當然我哋設計開始嗰陣時亦都安裝過程之中有少少teething problem，而家我哋都喺度處理中，有啲情況話個攝石嗰度係鬆嘅，我哋都搵個方法安裝得企理啲。有啲投訴或者覺得意見話係反光嘅，我哋都諗有咩嘢方法去處理。

MR DUNCAN：（經傳譯員）你知唔知道有兩個工會嘅代表係有同委員會表示佢哋並

唔滿意呢個設計？

梁健宏先生：我收到有部分工會嘅意見，就住呢樣事情唔係幾理想，我亦都收到有啲工會嘅意見，係覺得希望我哋加快啲裝。

MR DUNCAN：（經傳譯員）我就會畀一個資料你參考，係嚟自汽車交通運輸業總工會，係喺第9日提供咗證供嘅，你可以睇番第33至36頁，而喺第11日，係有巴士業職工會聯盟作證嘅，呢個就喺150至151頁。

主席：（經傳譯員）係咪都係第9日㗎？

MR DUNCAN：（經傳譯員）唔好意思，呢個係第11日，11日嘅。梁先生，你有冇睇過呢部分嘅證供呀？

梁健宏先生：（經傳譯員）應該有嘅。

MR DUNCAN：（經傳譯員）如果你已經睇過，我就想畀番你睇，首先第9日，文件冊4，第33頁，你可以由第18開始睇嘅，你就會見到提到一個安裝保護板嘅事宜，而係第34頁嘅頁頂，我就想你睇一睇嘅，佢就話似乎有一啲保護，但係個保護罩嗰個窿係好大嘅，而亦都係唔容易係開關嘅，同埋佢係反光，非常之反光，而喺嗰個端端嗰度就有磁石，而當巴士行駛嘅時候，可能係會產生噪音嘅，似乎喺呢一句有三項嘅不滿，首先就係反光，第二就係有磁石，第三就係有噪音嘅。有冇人向公司反映咗呢啲問題呀？

梁健宏先生：有嘅。

MR DUNCAN：（經傳譯員）有冇做過任何嘢？

梁健宏先生：大部分我哋都處理咗，反光嘅問題，我哋亦都係在處理中。

MR DUNCAN：（經傳譯員）即係話反光仍然係一個未解決嘅問題，係咪呀？

梁健宏先生：正確，但係我哋覺得最主要嘅出發點就係希望畀個車長一個保障，反光嗰度係喺左手邊嘅，亦都係喺佢駕駛嗰個視線係左手邊，所以正常嘅行車，絕大部分時間都--我哋覺得係可以嘅，但係亦都希望睇下有咩嘢方法可以解決呢個問題，希望儘量做到最好。

彭樹雄先生：Mr Duncan，我有嘢想補充少少。其實點解我哋6月會裝呢啲嘅保護嘅裝置呢？正如我喺午膳休息之前都講，因為今年2018年，我哋車長被襲擊嘅數目係急升得好犀利，所以我哋管理層覺得有需要係要即時係要處理呢個問題，所以我哋喺嗰個設計、做procurement購物、裝置，其實我哋喺好短時間裏面係去做個決定嘅，裝咗之後，我哋明白係有啲啲嘅teething problems，所謂一啲嘅問題，例如攝石可能會實得滯，又或者有--當嗰個車長進出一啲光或者暗，即係比較大對比嘅地點嘅時候，可能會有啲反光，呢個其實我哋知道嘅，但係裝咗之後，確實我有好多前線嘅車長係非常之歡迎我哋公司呢一個嘅舉措嘅。

當然，我都咁講，我哋去決定嘅時候，因為實在嗰個我哋車長畀人襲擊，我哋車長個 sentiment，我哋車長嗰個感覺、個感受，我哋覺得我哋一定要 address 嘅。當然我哋去同警方傾，我哋希望警方做多啲檢控，我哋儘快裝我哋嘅 CCTV，我哋亦都係喺 4 月除咗裝呢個保護嘅裝置之外，我哋亦都喺我哋嘅司機駕駛室嘅隔籬亦都新裝咗一個嘅標語，就係話「滋擾車長乃刑事罪行」，呢個其實亦都係一連串我哋係真係好想畀到一個安全嘅駕駛環境我哋嘅車長。

呢個當然喺個過程裏面係咪可以做得好啲呢？我哋其實而家都仲係喺度係去 rectify 緊呢一個 protective shield，譬如有啲咩嘢特別嘢，例如反光，我哋可以點樣處理呢等等。

另外，我哋亦都喺我哋每一架車，我哋有個叫做報站器嘅，我哋亦都喺個報站器度，我哋亦都加入咗一個嘅告示，大致上就係話我哋嘅車長係受到滋擾，我哋可能會停車處理。呢個亦都係幫助到我哋嘅車長去處理呢一樣畀人滋擾或者可能發生畀人滋擾嘅情況底下，我哋都希望我哋儘量可以做多少少嘢，就去幫得到我哋嘅車長。

另外，除咗呢啲保護裝置，除咗嗰個報站器，除咗嗰個標貼提醒乘客，我哋公司嘅法律部嘅同事亦都係好貼地咁樣、好 down to earth 咁係去幫助一啲我哋被襲擊嘅車長，我哋前線嘅督察、前線嘅站長亦都係畀晒所有支援我哋嘅車長，有車長被襲擊，我哋啲 inspector，我哋啲督察第一時間會到場，陪同我哋嘅車長睇醫生，法律部嘅同事會陪同個車長，有需要嘅，畀口供等等。呢個亦都係我哋會做緊嘅。

所以就住保護我哋車長方面，我覺得我哋公司係責無旁貸嘅，當然我哋都希望警方可以儘量幫多啲手，但係我哋自己本身亦都係有一連串嘅工作係做緊嘅。

主席：（經傳譯員）彭先生，你可唔可以向提供嗰句警告字樣嘅相片呀？即係喺車上面嗰一句嘅字句，同埋就話嗰句「如果車長受到滋擾，架車就可能會停落嚟。」可唔可以提供呢個字句？

彭樹雄先生：絕對可以，Mr Chairman，係可以嘅。主席，我想補充，嗰個報站器就係個車長佢有個 button 會撳嘅，其實嗰個就係譬如話到到某個站，如果大家有搭巴士，譬如下一個站係彌敦道幾多號或者係咩嘢大廈或者係咩嘢公園，佢撳，佢就會 show 到個車長被滋擾等等嘅。主席，我會提供嘅，主席。

主席：（經傳譯員）唔該晒。

彭樹雄先生：多謝主席。

MR DUNCAN：（經傳譯員）你話有個報站器嘅，嗰個就係文字表述吖，定抑或係聲音廣播呢？

講者（不能辨別）：Both.

MR DUNCAN：（經傳譯員）麻煩你打出嚟就係呢一個雜項 1，913 頁--對唔住，應該就係雜項 2 嘅文件夾 913，我哋呢張相之前係打過出嚟睇㗎喇，913 頁，喺呢度我哋睇唔睇到嗰個警告嘅字眼㗎？

彭樹雄先生：Mr Duncan，而家係喇，冇錯，呢個就係嗰個我哋嘅標貼「滋擾車長乃刑事罪行」。

MR DUNCAN：（經傳譯員）唔該。關於係工會代表提過嘅事情，我想問下，而家公司同工會方面係個情況係點樣樣呢？工會係支持你哋嘅做法定抑或係反對呢？

彭樹雄先生：Mr Duncan，你意思係咪話佢哋係咪支持裝呢一塊保護板定係啲乜嘢呢？

MR DUNCAN：（經傳譯員）我係講緊佢哋話有個問題，即係話反光、有聲噪同埋嗰個攝石鬆，你就話已經處理緊，我想問下，而家你哋同工會就呢啲事情上面個溝通個情況而家係點呀？

彭樹雄先生：佢哋知道我哋公司正在係處理緊個問題，佢哋係感覺到滿意嘅，不過當然，嗰個 end product，即係將來嗰個製成品會係點樣呢？我哋其實都會再--唔係淨係同工會，我哋亦都會聽所有車長嘅聲音嘅。

MR DUNCAN：（經傳譯員）而家又想請你睇一睇呢一個第 35 頁，呢一個係謄寫本或者紀錄本嘅第 35 頁，應該喺你前面，呢個係第 9 天嘅，其中一位代表就係喺第七行嗰度有提過嘅，呢度佢哋就話擔心係嗰個保護板就會妨礙咗車長嘅視線，佢哋就無法就係睇清楚上車、落車嘅乘客，呢樣嘢係咪佢哋都已經同公司講過㗎？

彭樹雄先生：Mr Duncan，或者我可以咁樣答你，因為本身我都有巴士牌嘅，本身我都試過坐上一架有保護裝置嘅巴士度嘅，因為我哋個駕駛室嘅司機位--車長位嘅左手面就係嗰個 protective shield，呢個 protective shield 其實係透明嘅，除非有一個好大好大嘅 contrast，即係光同埋暗嘅對比，否則的話，其實個視線係冇受到太大嘅影響嘅，但係當然我哋都明白個別車長嘅擔心，所以其實我哋都係喺個過程裏面就係話去睇下點樣可以 modify 到呢一個嘅 protective shield，呢個我哋係做緊嘅。

MR DUNCAN：（經傳譯員）而家呢一個保護板係唔係大程度上係唔阻佢嘅視線呢？

彭樹雄先生：我可以講佢唔係好大嘅影響，當然，你始終喺你嘅駕駛室--以往係完全係冇遮擋嘅，但係當然，你有一塊透明嘅膠板喺你嘅左手面，當然喺個習慣上係可能會突然之間啲車長可能會有啲啲咁多唔習慣。

MR DUNCAN：（經傳譯員）而家又想請你睇一睇呢個 KMB-1 呢一個文件夾，再睇番呢個文件夾，83 頁，或者仲係講緊呢一個係塑膠嘅保護板，幾時係第一次係諗起要裝呢一個保護板呢？

梁健宏先生：呢個就係舊年 2017 年有車長襲擊嘅事件多咗，就決定要做啲嘢去幫助車長，亦都有啲車長就提議過，係舊年我哋諗住做呢一樣嘢，自行設計。

MR DUNCAN：（經傳譯員）唔該晒。

彭樹雄先生：Mr Duncan，我都想最後都有少少嘅回應，我同車長嘅接觸，其實大部分嘅車長其實都係高興公司係行前咗一步，當然呢一步會唔會可以喺嗰個細節上可以做得好啲呢？即係 with hindsight，你問番，當然我哋係可以做得好啲嘅，但係我哋始終係行緊第一步出嚟，我哋有第一步，就會有第二步，我哋第二步，而家就係 source 緊有冇一啲物料係完全係唔會有反光，又或者嗰啲 magnetic 我哋係咪可以係 source 過另外一種類型呢咁樣，我想講嘅就係我哋係都需要行出第一步嘅。亦都我哋前線嘅車長亦都知道公司係行出呢一步嘅，多謝 Mr Duncan。

MR DUNCAN：（經傳譯員）我理解到，講到巴士司機方面，巴士公司係需要面對七個不同嘅工會嘅，係咪呀？

李澤昌先生：我哋暫時係主要同兩個係有個溝通，但係其實每一個同事，我哋都有同佢哋有唔同嘅渠道溝通。

主席：（經傳譯員）係唔係工會就係有兩個工會，呢兩個工會就包括咗百分之九十嘅車長，係咪呀？

蘇偉基先生：（經傳譯員）係。

主席：（經傳譯員）你同其他人係溝通嘅時候，就唔係以工會嘅身分，就以僱員嘅身分？

蘇偉基先生：我哋唔係話睇佢有冇 capacity，我哋除咗同頭先所講嗰兩個工會，其他每一個車長，其實我哋都有一個渠道畀佢去發聲，或者我哋去主動聽取佢嘅聲音。舉例如，正如頭先彭生講，我哋車廠嘅主任、前線嘅督察或者彭生本人都定期性，喺站頭、廠嘅上班、下班、中段時間去主動去接觸佢哋，聽取佢聲音。

而我哋公司亦有一個叫做 JCC，joint consultation committee 嘅組織，係每月定開會，聽取佢哋對工作上有啲咩嘢建議，而相關嘅建議我哋亦都係合適嘅，會採納，呢一個係一個恆常嘅措施嚟嘅。

主席：（經傳譯員）其實個問題好簡單嘅，我諗你係明白嗰個問題嘅，除咗嗰兩大工會，你就稱佢哋為工會，除此之外，你會唔會有其他嘅組織，你都係同佢哋係打交道，唔一定係叫做工會嘅，有冇呢？

蘇偉基先生：（經傳譯員）有嘅。

主席：（經傳譯員）除咗嗰兩大工會之外，仲有邊啲工會你係有同佢哋傾嘅？

彭樹雄先生：Mr Chairman，或者--其實我哋公司係除咗有兩個所謂我哋嘅主要大嘅 union，其實我哋都有同其他佢哋嘅所謂 union，我都有聯絡嘅，例如其實喺呢個 hall 裏面有一位郭志成（譯音）車長，一個退休嘅車長，坐咗喺嗰度嘅郭車長，其實我亦都親自同郭車長係傾談咗超過兩個鐘嘅，其實我係歡迎公司任...

主席：（經傳譯員）我諗你話唔係以呢個工會代表嚟到係同佢講，係車長身分，所以我就問你呢個問題。

彭樹雄先生：喺我嘅接觸裏面，其實係唔係工會喺我嘅接觸裏面其實唔係一個最主要或者係第一個嘅因素。

主席：（經傳譯員）鄧大律師。

MR DUNCAN：（經傳譯員）其實我估我哋其實有一個工會嘅名單，不如將佢打上嚟，而家既然係講開呢個課題，可以將佢哋個名貼咗出嚟嘅。我哋見到啲名，我諗係有七個嘅工會嘅，而佢哋就係已經上嚟作證，協助呢個委員會嘅。我想問，你所講嘅兩個主要嘅大嘅工會係邊兩個呢？

主席：（經傳譯員）即係話九巴會係同佢哋傾嘅嗰兩大工會？

MR DUNCAN：Correct.

蘇偉基先生：因為呢個係個英文譯名，我哋記得應該就係汽車工會嘅九巴分會，我想睇下會唔會有中文，我易認啲？我相信應該係第 9，有個工會...

MR DUNCAN：（經傳譯員）係，我哋可以嘅，可以等陣間安排，就畀個中文名你。

主席：（經傳譯員）鄧律師，或者你可以口頭上講一講。

陳政龍先生：（經傳譯員）汽車交通運輸業總工會。

蘇偉基先生：呢個係，正確，我哋係其中一個。

主席：（經傳譯員）唔該晒。我諗佢哋而家都將嗰個中文名係打咗出嚟畀你睇。另一個呢？另一個係邊一個呢？

蘇偉基先生：咁啱我搵到，佢曾經 submit 嗰封信，我好肯定個名喇而家，係九龍巴士職工總會。

主席：（經傳譯員）頁碼係邊個呢？即係等我哋可以睇一睇。

蘇偉基先生：（經傳譯員）TU-1(A)，130 至到 131 頁，而佢哋嗰個陳述書就係 133 頁嘅。

主席：（經傳譯員）好，唔該晒。我哋可唔可以顯示蘇先生所講嘅嗰一頁呀？

蘇偉基先生：（經傳譯員）係，可以嘅。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）據我理解，有九成嘅司機都係屬於呢兩個工會嘅。

主席：（經傳譯員）其中一個？

MR DUNCAN：（經傳譯員）可能係兩個工會其中一個或者七個工會其中一個。

主席：（經傳譯員）據我所記得，喺口頭或者係書面證供嘅時候就講過--即係佢哋講過，就佢哋會同兩個工會去交涉嘅。似乎梁先生係點頭，或者我哋之後可以睇番嗰一部分。

MR DUNCAN：（經傳譯員）係，我哋之後會處理呢個問題。我咁樣理解正唔正確呢，只有一成嘅車長係唔屬於任何嘅工會？

蘇偉基先生：首先呢度每一個車長可以參加多一個工會，所以加埋晒個數係未必等於我哋車長嘅總人數八千六百位；第二，每一個工會講佢有幾多會員嘅人數，其實係由個工會自己去提供，當然我哋日常都會有個知悉，係咪一個合理嘅估算，我哋從頭先嗰兩個工會報告出嚟嘅數字，確實係佔我哋公司嘅車長數目大約九成。

MR DUNCAN：（經傳譯員）我咁樣理解啱唔啱呢，你所講嗰兩個工會就係你最常接觸或者係交涉嘅工會，係咪？

蘇偉基先生：正確。但係可唔可以補充？

MR DUNCAN：（經傳譯員）可以。

蘇偉基先生：正如頭先所講，有車長佢係不屬於任何工會，所以我哋一方面應工會要求同佢溝通，我哋亦都會同員工--我哋唔會理佢本身係邊個工會，我哋亦都會聽取佢意見，主動問佢嘅意見。

MR DUNCAN：（經傳譯員）如果我理解冇錯，你嘅意思就係你係會同巴士司機接觸，有時係會直接同佢哋接觸，有時就會透過同佢哋接觸嘅？

蘇偉基先生：（經傳譯員）但係兩者係會同時發生嘅。

MR DUNCAN：（經傳譯員）我之前就請你睇 KMB-1 文件冊嘅第 83 頁。

主席：（經傳譯員）我哋係咪講另一個話題喇？

MR DUNCAN：Yes, we are.

主席：（經傳譯員）我哋去另一個話題之前，我就想先顯示 KMB-1 文件冊第 218-1 頁嘅，喺第 2 段，你就會見到有一項要求，第 3 段就話「請提供嗰兩份閉路電視大綱調查報告嘅拷貝本」，同埋喺 218 頁有其中兩宗個案就有一個描述，呢個就係個案 3 同個案 4，就係有講到有一個閉路電視嘅扼要報告嘅，你有冇提供

過呢個資料，可唔可以畀番個頁數我參考？

蘇偉基先生：（經傳譯員）可以嘅。你可以睇番第 300 頁。

主席：（經傳譯員）好，唔該晒。我想問嘅問題，就住呢個問題，根據你嘅經驗，閉路電視嘅錄像同埋聲音嘅質素係好唔好嘅呢？就住對車長作出言語上面或者係身體上嘅襲擊？

彭樹雄先生：Mr Chairman，我可以講其實嗰啲 CCTV 嘅質數係足夠可以睇得到嗰啲人士嘅外貌嘅，個質素係都 okay 嘅。同埋亦都係可以幫到警方係好粗略咁認到個 assailant，即係個施襲者嘅。

主席：（經傳譯員）而聲音或者錄音嘅質素係點呢？例如係如果有一啲口頭上面嘅滋擾同埋身體嘅侵襲。

彭樹雄先生：Mr Chairman，咁又要視乎佢係距離嗰個咪有幾遠，如果一般喺嗰個駕駛室嘅，其實都可以聽到嘅。同埋，主席，我都想補充，我哋架車總共係有九個嘅 CCTV 嘅，九個鏡頭，所以唔係淨係嗰個我哋嘅 bus captain 嗰個駕駛室，其實係有唔同嘅角度都係可以影到車內嘅情況嘅，與及車外嘅情況都可以影得到嘅，我哋總共有九支嘅鏡頭。

主席：（經傳譯員）有冇一啲情況係--即係你有冇嘗試將呢個錄音就抄錄成謄本，然後就再將呢一個謄本交畀警方呀？

彭樹雄先生：其實唔係淨係呢啲毆打嘅案件，其實一般嘅交通意外等等，我哋好多時都係會--我哋係會交個閉路電視嗰個影像等畀警方。

主席：（經傳譯員）我係問緊個錄音，你有冇試過將個錄音嘅內容係抄寫出嚟，去顯示呢一個襲擊嘅性質呢？定係你純粹就會交畀警方呀？

彭樹雄先生：我哋通常做法，我哋係一套咁樣交晒畀警方嘅，係聲音...

主席：（經傳譯員）你係咪指閉路電視嘅錄像呀？

彭樹雄先生：係，冇錯，聲音，即係嗰個 video、audio 都係會交畀警方嘅。

主席：（經傳譯員）第二個問題就係喺 4 月 4 號、5 號同 6 號嘅幾宗個案，就係 KMB-1 文件冊嘅第 218 頁，第二個問題就係就住乘客所用嘅八達通卡嘅問題，...

彭樹雄先生：係，Mr Chairman，係。

主席：（經傳譯員）...呢個就係個案 1，你見唔見到？個案 1 就上面寫住「冇去跟進，冇再進一步採取行動」，雖然係九巴已經向警方提供襲擊者嘅八達通紀錄。

彭樹雄先生：係，Mr Chairman。

主席：（經傳譯員）有冇將相關嘅八達通紀錄交畀警方呀？

彭樹雄先生：我睇呢個案件，我哋係應該有交到出嚟嘅，我哋交咗出嚟嘅，不過 Mr Chairman，我想強調，如果呢個八達通卡佢唔係一啲 personalised 嘅，即係佢係非記名嘅，呢個如果佢係非記名嘅，其實嗰個跟進就可能會有啲困難嘅，但係如果當然佢登記咗，即係有個 identity 嘅，警方...

主席：（經傳譯員）我明白嘅，我哋明白，因為我哋有問過警方係攞到啲咩嘢資料嘅。喺你封信就應該係 KMB-1 嘅 297 頁，喺呢個回覆信入面，喺第二段你就講番個案 1，而你最後嗰句就係咁嘅，就話係「大概喺 2018 年嘅 4 月尾，我哋係同警方通過電話，就住呢個八達通紀錄同埋通知佢哋係收我哋嘅書面回覆嘅。」究竟佢哋有冇收到呢個回覆呀？或者你可以嘅話，你答有或者冇。

彭樹雄先生：（經傳譯員）冇，佢哋冇嚟收嘅。

主席：（經傳譯員）你有冇提供到呢個回應呀？

彭樹雄先生：（經傳譯員）冇，...

主席：（經傳譯員）請你解釋一下--你可以解--但係呢一個八達通嘅問題係從來都冇畀警方知道。

彭樹雄先生：呢個我哋講緊係一單喺天水圍發生嘅一單毆打案件，我記得因為我親自睇過呢一個案件，我哋 4 月初就收到警方一個 fax 傳真，就嚟就想攞呢一個嘅八達通紀錄，我哋喺 4 月 24 號，其實我哋已經準備好嗰個嘅 letter，同埋亦都係有八達通嗰個紀錄，我哋嘅同事跟番個指引，因為警方係 fax 嗰張 memo 嚟畀我哋公司，所以我哋一定要 verbally，即係口頭上叫佢搵人親自嚟攞嘅，否則的話，我哋係唔能夠證實到對方嘅身分。

我哋嘅同事係畀過電話天水圍警區，叫咗佢嚟攞，但係一路警方都冇嚟攞嘅，嗰封信仍然喺我哋公司度，嗰幾個八達通嘅紀錄仍然喺我哋公司度。Mr Chairman，嗰個詳情就係咁樣嘅。

主席：（經傳譯員）你話你自己有參與呢個個案，究竟個襲擊嘅性質係乜嘢呀？

彭樹雄先生：呢個我記得係喺一個 B1 嘅車站，即係喺一個過境嗰個車嚟嘅，有個男車長嘅，我記得，喺落馬洲。

主席：（經傳譯員）襲擊嘅性質係咩嘢呀？即係係咪有人打佢塊面或者係用樽扑佢個頭等等？

彭樹雄先生：主席，或者你容許我--畀少少時我睇一睇，因為--唔好意思，因為實在太多呢啲 assault case。

主席：（經傳譯員）好，你可以慢慢睇。

MR DUNCAN：（經傳譯員）主席先生，當佢哋搵緊嗰啲資料嘅時候，剛剛就係有人話畀我聽就係文件 1 101 頁就講過話代表百分之九十嘅車長，或者呢度就可以就係睇番，可能你剛才就問我哋啲證供係喺幾時提出嚟嘅，可能喺呢度，係嗰一頁嘅第 4 段。

主席：（經傳譯員）係，係，我心目中都係諗緊呢一段。係，嗰個襲擊嘅性質係點呀？

彭樹雄先生：Mr Chairman，it should be --佢係（經傳譯員）216 頁，216 頁。

主席：（經傳譯員）講個性質。

彭樹雄先生：（經傳譯員）車長就畀人推咗落地下，就受傷，臀部同埋頭部就受傷。

主席：（經傳譯員）有冇需要接受治療呀？

彭樹雄先生：（經傳譯員）對唔住，呢度係冇講話係咪驗傷。（直接用本地話說）冇，喺度冇表示到，sorry，對唔住。

主席：（經傳譯員）我關注嘅就係似乎件事就不了了之嘅，九巴同警方之間，但係呢件事係涉及你嘅一位車長畀人推咗落地下，臀部、頭部受傷，你話畀我聽就係話八達通嗰啲資料，你就入咗信封，就喺九巴公司嗰度就係不了了之，點會咁發生嘅呢？

彭樹雄先生：Mr Chairman...

主席：（經傳譯員）你係咪真係保護你啲車長㗎？點會容許呢啲事發生呢？

彭樹雄先生：其實我想講，其實我都有問過呢個問題，當我知道嗰個八達通紀錄係冇攞嘅時候，其實係上個月底，所以喺呢一方面，對唔住，係我哋可能跟進上面係咪可以做得好啲呢等等，我哋係覺得係可以做得好啲嘅。

主席：（經傳譯員）彭生，我咁講啱唔啱呢？其實你以前都係香港警隊嘅成員嘅。

彭樹雄先生：係，冇錯，主席。

主席：（經傳譯員）你而家份工同埋你以前嘅職業，其實你係咪都應該處理到--係即係應該個紀錄去到應該收到紀錄嘅人嗰度呢？

彭樹雄先生：我絕對可以嘅，主席。

主席：（經傳譯員）唔該晒。鄧樂勤律師。

MR DUNCAN：（經傳譯員）唔該主席先生。我就係想請你睇番第 83 頁嘅，呢個係九巴文件夾 1，83 頁，委員會問，而你喺呢個初步嘅陳述書所回應嘅，就係話你哋已經係有一啲係輔導嘅服務提供畀有需要嘅車長，呢個第二點，你就咁樣樣

Transcript by Epiq Hong Kong, Limited

回答呢個問題嘅，即係當時問你哋有冇提供呢啲服務，你就話有一個專責小組，成員包括係副車務總監、係車廠嘅主管、係培訓及服務質素管理部門、通訊傳訊以及係人力資源部嘅成員組成一個專責小組，就係睇下點樣樣為車長同埋前線員工提供呢個情緒支援，你哋會係搵一個專業嘅顧問，幫你哋全面咁樣樣去檢討目前嘅做法，而且就係睇下有邊啲地方可以提供建議，其中包括就係招聘車長同埋就評估車長嘅情緒智商，佢哋能否就係抵禦呢一個壓力，培訓、輔導同埋表現管理嘅；你哋預期就會係逐步咁樣樣去落實呢一啲建議嚟到去處理嗰個即時嘅問題。

我想問，就係呢個專責小組係幾時成立㗎？

黃祥明先生：喺5月尾左右，今年嘅5月尾。

MR DUNCAN：（經傳譯員）係咩嘢事促使你哋係成立呢個專責小組呢？

梁乃鵬先生：（經傳譯員）律師，可唔可以等我答呢？其實呢個主意係嚟自我嘅，因為當我知道我哋嘅車長經常畀人襲擊，我就覺得應該係尋求專業嘅意見，睇下我哋可以點樣去處理嗰個處境，同埋特別係就如何去搵我哋嘅車長，如果佢哋有需要嘅話，提供一個係輔導嘅服務嘅。

咁啱我就係識得中大嘅校長，佢哋之前係提供過一啲顧問嘅服務係畀警隊嘅，其實係幾年之前嘅事，就喺佔中嘅時期，佢哋有提供過咁嘅服務，我就諗下，可能對我哋嘅車長嚟講都有用嘅，因為我哋嘅車長經常都係有被乘客襲擊嘅，作為一個公共服務嘅營運商，我哋係需要招標，睇下有邊間公司或者組織係有興趣嘅，最後就係揀選咗中文大學。嗰個遴選工作我冇參與嘅，因為咁樣係要避免呢一個利益衝突嘅，因為咁啱我係認識中大嘅校長嘅。

而家佢哋係喺度制定緊一啲建議，希望可以幫到我哋手，幫我哋進行招聘嘅工作，亦都可以為我哋提供呢個情緒嘅支援，如果我哋有車長係有需要呢一方面嘅協助嘅話，所以就係咁樣樣嘅一個背景係形成嘅。

MR DUNCAN：（經傳譯員）唔該晒。而家想請你睇一個229頁...

主席：（經傳譯員）未落去之前，梁博士，想問一問，你知唔知道佢哋係專業嘅顧問，而家嚟講，你知唔知佢哋喺招聘工作方面喺邊度可以幫到手？

梁乃鵬先生：（經傳譯員）基本上喺呢個招聘工作嗰度，佢哋會做一個評估嘅，評估一下嗰個應徵者佢喺情緒方面嘅特性，如果我可以咁樣講，換句話講，佢哋嘅建議就係讓我哋就可以評估一下嗰個車長應徵者佢嗰個係情緒個表現嘅，或者佢個能力嘅。

主席：（經傳譯員）唔該。

MR DUNCAN：（經傳譯員）而家想請你睇呢個 219 頁，其實想請你揭去跟住嗰版220頁，220頁，就見到係你哋公司寫畀委員會嘅一封信，近期寫嘅，係8月

6 號嘅，呢度就講及一個行動計劃去落實一啲主要嘅建議。221 頁開始就係嗰個行動計劃。

我想請你係去 229 嗰頁嘅，229 嗰度，就係嗰版嘅左邊，就係嗰個關乎係心理支援嗰方面嘅情況，啱唔啱呀？呢個就係講及最初嗰個建議係點，係咪呀？

梁乃鵬先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）中間嗰欄就見到係 2018 年 4 月 10 號嗰個嘅行動計劃係有啲咩嘢里程碑同埋有啲咩嘢日期呀咁？

梁乃鵬先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）跟住喺右邊嗰欄，就知道目前個情況，我而家會將佢讀出嘅，係「一所本地大學嘅心理學系嘅顧問團隊就係 2018 年 5 月 31 號獲委任嘅，喺 6 月份就係開始咗係檢討目前嗰個做法，係睇下點樣樣提供呢一個情緒支援，就係透過去參觀車廠、車長訓練學校同埋一個熱線中心，同埋係同呢個副車務總監、車務嘅職員、分區嘅主管等等就見面嘅。」BCTS 係咩嘢意思？

梁乃鵬先生：（經傳譯員）就係呢一個車長訓練學校嘅。

MR DUNCAN：（經傳譯員）就係喺「2018 年 7 月，就話顧問團隊就係同呢一個專責小組講及佢哋初步嘅觀察，雙方就係制定咗一個係一般嘅方向，即係點樣去做嗰個項目，同埋喺嚟緊嗰幾個月會有啲咩嘢主要活動，就話會成立一啲焦點小組嚟到直接向車長同埋前線嘅員工係收集佢哋嘅睇法，睇下佢哋就喺呢個心理支援方面有咩嘢需要，同埋就係去睇一睇就點樣去培訓嗰個駕駛嘅老師，就會係 18 年嘅 9 月開始嘅，亦都再去睇一睇嗰個招聘嘅程序，嚟到係希望儘量就係奏效嘅，亦都希望就係有一啲支援嘅活動，就希望佢哋最後身心平衡同埋工作、生活都係好健康嘅。」

呢樣嘅工作，你知唔知道大概幾時會有啲成果呢？

黃祥明先生：根據中大畀我哋嘅資料同埋消息，其實我哋一定要係--呢個計劃係運作緊嘅，嚟緊我哋將會安排唔同資歷嘅車長同埋前線嘅站長同埋 inspector，就組成一啲嘅 focus group，等中大嘅同事可以了解到前線同事嘅工作壓力同埋困難。根據我哋嗰個計劃，將會做一個全公司嘅前線同事嘅問卷調查，進一步了解有關嘅困難，然之後中大就會制定一個嘅方案畀我哋，係點樣可以去教導有關嘅車長去減壓或者舒緩壓力嘅情況。

呢個亦都會由駕駛學校嘅導師開始，佢哋將會接受一啲課程，就等佢哋係點樣將呢啲咁嘅舒緩工作壓力嘅或者情緒壓力嘅工作係點樣去教導呢啲車長，從而我哋由呢個導師開始就教導呢個車長，等佢哋可以喺工作上獲得呢個舒緩。

時間就係而家其實一路行緊嘅，嚟緊嘅 8 月，我哋就會有呢個 focus group，9 月就係希望可以完成到嗰個問卷之後，就進行呢個導師嘅教導，一路做落去，我哋希望喺嚟緊嘅年尾能夠完成到成個計劃。

目標就係話我哋要訓練有啲導師，一個 train the trainer 嘅模式，等佢哋日後可以留喺九巴度繼續訓練有關嘅前線同事。

梁乃鵬先生：（經傳譯員）我就想補充我呢個提議其實並唔係得咁少嘅，我希望我哋可以成立一個部門，係有一啲專業嘅心理學家同埋佢哋都會成為我哋公司嘅一部分，咁樣佢哋就可以隨時支援公司其他嘅員工，所以換句話講，就會有一個新部門，呢個就要睇顧問嘅建議。可能佢哋就會建議喺四大嘅車廠度可能成立一個部門，或者可能喺全部嘅部門都有一個單位等等，但係呢個就並唔係一個臨時或者即興嘅工作嚟嘅。

主席：（經傳譯員）梁博士，你覺得幾時先至可以喺呢一個招聘入面係加入呢個嘅考慮？

梁乃鵬先生：（經傳譯員）我就而家畀唔到一個答案，主席。

主席：No, I understand.

梁乃鵬先生：（經傳譯員）但係我希望可以儘快做。基本上我係想成立--即係儘早成立呢一個新部門，同埋係邀請一啲專業嘅心理學家加入，成為我哋員工嘅。

主席：（經傳譯員）唔該。

黃祥明先生：主席，我有嘢補充，關於你嘅問題嘅，因為呢個 project 係由我做個 project manager，喺呢個招募嘅時候，其實我哋考慮番每個車長，當佢做一個九巴車長，都係一個專業嘅工作嚟嘅，佢哋嗰個工作嘅性質同埋嗰個佢個工作態度係好成正比，我哋所以搵心理專家嘅協助，就係希望喺佢招募嘅時候已經可以搵啲正確嘅人去協助我哋日後執行呢個車長嘅工作，唔該。

主席：（經傳譯員）鄧律師。

MR DUNCAN：（經傳譯員）多謝主席。我想請你睇 185 頁，喺同一份嘅文件冊，呢個亦都係喺最初嗰份文件嘅一個--應該係第二份呈交文件嘅一部分嚟嘅，即係你哋公司呈交畀委員會。我想你睇下嘅一頁嘅第三個問題，請你形容一下喺分析一個候選人嘅情商或者係抗逆能力嘅時候，呢一個評核係扮演咗一個咩嘢角色呢，喺聘請車長嘅時候？同埋喺以往同埋現有嘅招聘系統底下，會唔會係問一啲問題，即係就住呢一個相關人士佢哋處理一啲比較哦手乘客嘅能力，呢個問題就係喺第 185 頁同埋 186 頁嘅，正唔正確呀？

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）我想確認其中一點嘅，就係第 186 頁，喺第二點，一個車長面試評核表嘅樣本，就係喺呢一個附錄入面嘅，或者我哋可以睇下個附

錄，呢個就係 KMB-10 文件冊，就係第 4439 頁，呢個就係嗰份--係咪就係而家用嘅評核表格就係呢個情況？

蘇偉基先生：（經傳譯員）係，但係有一啲欄就已經係唔再適用。

MR DUNCAN：（經傳譯員）你可唔可以解釋一下？

蘇偉基先生：Okay，我哋可以睇一睇後面嗰頁嘅 4440 嗰頁，中間下低，你會睇到“medical check”上面有個 box，叫做“DISC Test Evaluation”，其實呢一個係一個 personality check，係外面一啲嘅 professional firm 就做一啲問卷，個問卷就係話畀個投考人就去選擇，譬如話一條題目就係話點樣去形容你嘅性格，你可以話你自己開朗、其他嘅形容詞，由個投考人自己去剔邊個係最合適形容你、邊個最適合不形容你。呢一個嘅表格喺 2014 年已經係檢討過，話嗰個成效係低，所以呢個係冇用到嘅，其他嗰啲其實就係現時係有用緊嘅。

主席：（經傳譯員）即使係冇再用嗰個欄，或者你可唔可以解釋下 DISC 係代表乜嘢？

蘇偉基先生：DISC 係一個 short form，會後我畀番出嚟，佢係一張表格嚟，我可以會後畀番。

主席：（經傳譯員）唔該晒。

蘇偉基先生：（經傳譯員）我可唔可以繼續？

主席：（經傳譯員）可以。

蘇偉基先生：冇咗呢個 DISC，唔係話任何去睇下嗰個投考人嗰個 EQ、tolerance 嗰啲嘢，我哋而家嘅方式就係由我哋嘅 interviewer，我哋嘅面試官係同投考嘅車長進行一個面試，喺面試嗰度會有啲模擬嘅題目，舉例如，就係當你揸車，有啲乘客好不禮貌地、好刁難地，就睇下嗰個投考人究竟佢會點樣反應，作為一啲咁嘅假設性嘅過案，就等個投考人去睇番，「如果咁樣發生，你會點樣做？」就睇到佢嗰個人個情緒、待人係咪禮貌、個和善，用一個面試嘅形式係做一個評估嘅。

亦都除咗話做面試之外，其實每位考生亦都要係有個試車，即係話喺一架私家車嗰度由我哋嘅駕駛嘅考官同佢一齊行大約三十分鐘嘅車程，就睇到佢喺路面上遇到其他嘅道路使用者，其實已經係睇得到一個人嗰個嘅性格各方面嘅嘢，綜合，我哋就可以評估到究竟呢個嘅考生係咪適合做一個職業嘅車長。

主席：（經傳譯員）鄧律師。

MR DUNCAN：（經傳譯員）多謝主席。我哋而家就講到招聘嘅問題，請你攞去 KMB-1 文件冊嘅第 60 頁，呢個就係你哋公司第一次呈交文件嘅一部分嘅，就係 4 月 24 號呈交畀委員會。第一個問題就係咁樣嘅，喺招聘同埋保留車長嘅時候遇到

啲咩嘢問題，或者你自己可以睇一睇頭嗰兩段嘅答案，你就向委員會表示呢一個短缺嘅問題同埋車長--或者商用車輛司機老化嘅問題嘅，喺香港整體嘅運輸業嚟講，你見唔見到呀？

蘇偉基先生：（經傳譯員）係，見到嘅。

MR DUNCAN：（經傳譯員）呢個司機短缺嘅問題係咪已經存在咗好多年㗎喇？

蘇偉基先生：係。

MR DUNCAN：（經傳譯員）我想你睇 KMB-9 文件冊，第 3840 頁嘅，Has the company from time to time raised this shortage issue with the authorities in Hong Kong?

蘇偉基先生：首先公司出現車長短缺係喺 2016 年嘅，我哋係有提出嘅，呢個我哋運輸署亦都得知我哋個車長係短缺嘅。

主席：（經傳譯員）頭先就聽唔到有傳譯嘅。

蘇偉基先生：車長短缺嘅問題喺 2016 年開始，而呢個問題運輸署係知悉嘅。

主席：（經傳譯員）唔該晒蘇先生。

MR DUNCAN：（經傳譯員）文件冊嘅第 3840 頁，你見唔見到呢度有一份嘅新聞稿呀？

蘇偉基先生：Yes.

MR DUNCAN：（經傳譯員）就係關於呢件事情就去到立法會，你見唔見到呀？

蘇偉基先生：（經傳譯員）係，見到嘅。

MR DUNCAN：（經傳譯員）呢個就係易志明議員嘅一個問題，就係運房局局長張炳良教授就係喺 6 月 29 號喺立法會回應嘅，呢個就係 2016 年，我就唔會將問題讀晒出嚟，但係呢個係咪同人手短缺嘅問題係相關嘅呢？

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）呢一頁嘅底部，我哋就見到運房局局長嘅回應，我就想將呢一個答案嘅第一段讀出嚟。

「政府係知道運輸業嘅人手短缺嘅人手問題嘅，唔同嘅運輸業界亦都係多次提出喺近年嘅勞工市場係越嚟越緊張，招聘員工係唔容易嘅，同埋似乎係有跡象顯示業界嘅勞動人口係老化緊，就住呢個問題，政府係將會係訂立一啲嘅策略，同業界一齊，而亦都係會喺政策上同業界去合作，如果係可行同埋係有幫助嘅。我哋希望業界係會努力改善工作嘅環境同埋待遇，同埋幫助年輕人去了解多啲呢啲行業嘅，透過唔同嘅平台，咁樣就可以吸引多啲新血加入。」

我就讀到呢一度，我想問，政府其實有冇制定過任何嘅策略即係話同運輸業係聯手去到應付呢個問題呢？

蘇偉基先生：我個人就冇收到，我喺個 IRC THB 嘅指引，佢就話鼓勵專營巴士嘅服務商係聘請足夠嘅車長，至於有冇一啲 strategies，我冇睇到。

MR DUNCAN：（經傳譯員）落去下面嗰頁，3842，喺嗰一頁嘅第三、第四段，我想請你睇番，局長當時就咁講嘅，就講到就係「從業員資格方面，專營同埋非專營巴士、公共小巴、的士同埋貨櫃車司機，都需要持有相關嘅商用車輛駕駛執照，現時法例上面就規定呢一啲嘅駕駛執照嘅申請者必須係持有有效嘅私家車或者係輕型貨車駕駛執照最少係三年嘅，運輸署正喺度檢討係咪可以縮短呢個要求嚟到吸引更多新人去入行嘅，個目標就係爭取今年裏面完成。」

我要問嘅問題就係，我想問下，法例有冇改到呢，就呢一方面嚟講，法例有冇改呢？

蘇偉基先生：（經傳譯員）冇。

MR DUNCAN：（經傳譯員）即係話將嗰個要求個期間係減短，係有冇發生過咩事呢？

蘇偉基先生：（經傳譯員）冇。

MR DUNCAN：（經傳譯員）公司支唔支持咁嘅改變呢？

蘇偉基先生：呢個就真係要諮詢同埋佢有咩嘢 compensation，因為如果你話揸咗--獲得 private car licence 只得一年，其實有冇足夠嘅經驗可以駕駛一架專營巴士，載一百五十位嘅乘客呢？喺安全嗰度係有個考慮。當然，你話攞咗牌係咪等於佢有個駕駛經驗呢？可以未必成正比，但係你話一年嘅牌係咪呢？我相信都要討論去研究。

MR DUNCAN：（經傳譯員）想問下運輸署有冇搵過你哋「我哋可唔可以傾下呢件事？睇下關注啲乜嘢嘢？」咁呀？

黃祥明先生：運輸署曾經就邀請各個嘅專營巴士就係討論呢個問題，但係未有一個結果嘅，應該係上個月嘅時候就討論，但係未有呢個結果。當時佢都冇一個清晰嘅立場係點樣，只係徵詢各個專營巴士嘅意見。

MR DUNCAN：（經傳譯員）有冇搵過你哋公司，喺上個月之前，有冇呀？

黃祥明先生：冇，之前係冇嘅。

MR DUNCAN：（經傳譯員）而家想麻煩你睇睇 KMB-9 呢個文件夾，其實同一個文件夾嚟嘅，3844 頁，其實就想你睇 3855，我頭先就睇緊呢一個翻譯本，就係 3847-1，你睇緊嘅就應該嗰個標題係咁嘅，「2018 至到 19 年審計開支預算」。

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）我相信係一個紀錄嚟嘅，呢個應該係立法會開會嘅一個紀錄，今年較早時候嘅一個會議紀錄，係4月20號佢哋開會嘅一個紀錄。

蘇偉基先生：係。不過嗰啲資料就係喺3847-3。

MR DUNCAN：（經傳譯員）係。我首先想請你睇睇嗰個問題，我諗就係問政府嘅管制人員，相信就係有關嘅管制人員就係勞工署嘅，我睇3847，嗰度就係請相關當局提供以下嘅資料，第一就係話關於就係公共運輸服務同埋貨櫃車呢啲行業嘅司機嘅老化嘅問題，嗰個(a)嗰個問題。(b)就係問-- 3847-2，就係想問下嗰個空缺個情況，要求提供嗰個統計數字。(c)就係話講到係公共運輸業同埋呢個貨櫃車嘅司機短缺嘅情況已經係存在一段長時間，會唔會係勞工處就係將佢納入作為呢個輸入勞工嗰度呢？如果冇嘅話，係會有啲咩嘢措施嚟到幫業界可以有效咁樣請到司機呢，同埋相關嘅人手同埋嗰個開支嘅。

講到嗰個回覆，(a)嗰個部分，2013至到17年，專營巴士司機嗰個聯營分佈就係如下，大家可以睇到，嗰度有啲數字嘅，特別就係講到25至29歲，係2013年嘅時候341位嘅，2017年係449位；另一邊，60至69歲嘅，2013年就係1,167位，2017年嘅時候係有2,022位，就係屬於呢一個年齡組別；對上一個年齡組別係50至到59歲，2017年就係5,886位就係屬於呢個年齡組別。

跟住(b)嗰個答案，講到係嗰個職位空缺嘅，講到係專營巴士嘅司機嘅職位空缺嘅數字係咁嘅，13至到17年，2013年就係192個空缺，去年2017年空缺嘅數字係366個。

3847-4，就係有(c)項嗰個答案，根據呢個運輸署喺2017年年尾，係有超過三十七萬人就係持有呢一個有效嘅商用車輛，下面有一個註釋，嘅駕駛執照，即係話的士、私家巴士、專營巴士、小巴、掛接車同埋係貨車等等，但係只係有多於九萬部商用車輛就係有牌照嘅，所以個問題就係話點樣樣去吸引嗰啲合資格嘅個別人士就去加入嗰個行業嗰度。有鑑於此，政府唔應該倉卒咁樣去考慮係話為商用車輛就係輸入司機，係應該就係考慮埋本地司機佢個生計。

你呢度可以睇到，呢度有一個提議，就話考慮搵外來嘅人士，輸入外來嘅司機，讓佢哋嚟香港嗰度就係做嘢，就係去舒緩嗰個運輸業面對司機不足嗰個情況。我想問你哋公司就呢一方面，就一個咁嘅建議，你哋有咩嘢立場呢？

蘇偉基先生：冇，我可唔可以解釋？

主席：Yes.

蘇偉基先生：呢一...

MR DUNCAN：（經傳譯員）有冇嘢解釋？冇嘢解釋定點？

李澤昌先生：I think so.

MR DUNCAN：（經傳譯員）你一係支持，一係反對嘅，係咪？個情況係點呢？

梁乃鵬先生：（經傳譯員）可否讓我直接咁講呢？呢個係一個高度政治性嘅問題嚟嘅，我可以預計會有強烈嘅反對嘅，即係話香港個工會一定會大力反對嘅，如果話係要輸入勞工，喺新加坡佢哋有咁做嘅，喺新加坡嘅巴士公司佢哋有來自中國大陸嘅司機，因而係可以解決人手不足嘅問題，喺新加坡佢哋有咁做，不過我懷疑喺香港係咪可行嘅，有鑑於目前嘅政治氣氛。

主席：（經傳譯員）佢哋有冇話係抗議、示威反對呢一個輸入司機呢？

梁乃鵬先生：（經傳譯員）我諗係因為呢一個係薪酬不同嘅問題，但係呢個問題最後解決咗嘅。

主席：（經傳譯員）你就將佢定性為一個政治嘅問題。

梁乃鵬先生：（經傳譯員）講喺香港。

李澤昌先生：其實都仲有少少輕微嘅實際上嘅，因為香港呢個城市好獨特，其實佢周邊嗰個駕駛環境好唔同，即係唔似深圳或者上海或者喺台北，佢有好大嗰一個國家，佢嗰個駕駛嘅技術好相似，即係香港係零零舍舍喺成個區，佢除咗係個雙層巴士同埋佢嗰個右軚嘅揸法係非常之唔同，變咗係有一個困難嘅一點，所以亦都係香港啲道路同埋香港嗰啲乘客都係比較係比其他嗰啲一個整個內地係好唔同，所以係有少少唔同嘅。

主席：（經傳譯員）鄧律師，我打算而家就係小休一下，讓大家稍事休息，我就打算就係休息十五分鐘，呢個係咪一個啱嘅時候呢？

MR DUNCAN：（經傳譯員）係嘅，主席先生。

主席：（經傳譯員）好，我哋而家係休息十五分鐘。

下午4時13分聆訊押後

下午4時29分恢復聆訊

出席人士如前。

主席：（經傳譯員）鄧律師。

MR DUNCAN：（經傳譯員）多謝主席。黃先生，你向委員會表示就即係你講到有一

個措施係去解決人手短缺嘅，就係將呢一個攞到牌照嘅要求由三年縮短到一年，你對呢個建議有冇保留？

黃祥明先生：剛才我講係運輸署係有搵過我哋嘅業界去討論呢個問題。

MR DUNCAN：（經傳譯員）你同唔同意縮短嗰個持牌年數嘅建議係有用嘅呢？

黃祥明先生：呢個我諗我真係要深入探討先得，因為而家嘅要求係需要有三年嘅私家車駕駛執照，如果將佢降低嘅時候，我哋都係始終考慮佢嗰個乘客安全同埋駕駛安全，所以呢個我冇個人嘅立場，我諗係需要公司再詳細去探討，然之後去回應畀運輸署。

主席：（經傳譯員）你幾時係回覆運輸署㗎？

黃祥明先生：呢個商討係進行中嘅，就未有一個最終嘅確定回覆日子。

彭樹雄先生：我諗，Mr Duncan，我哋睇呢個問題嘅時候，我哋相信要平衡好多方面嘅考慮，第一，我覺得有一樣嘢唔可以妥協嘅，就係嗰個所謂 safety。到底我哋如果將三年嗰個年期去減短，如果純粹就咁講個年期，我相信我哋就唔係睇緊一個大 picture，會唔會係譬如話我哋將個年期可能會縮短，但係可能嗰個投考者佢可能要有其他提供到畀我哋資料佢原來係可能兩年佢係不停咁駕駛又或者佢本身係嗰個駕駛技術都係有一定嘅水平，咁又會唔會有一啲額外嘅測試，可以唔使三年，可以係一個短啲嘅時間，但係經過一個--我哋一個所謂合格嘅測試，會唔會可以考慮呢等等。

我哋其實喺呢一方面，當然我知道成個業界唔係淨係 KMB，都係缺車長嘅，但係問題就係我哋嘅前設就係第一，safety 係行先，然後其他嘢我哋係完全係持一個開放嘅態度係去處理嘅。多謝 Mr Duncan。

MR DUNCAN：（經傳譯員）我想請你睇番嗰個紀錄本，係第 1 天嗰個聆訊嘅紀錄本，66 頁，文件夾 1 號，第 1 天嘅聆訊，第 66 頁，第 66 頁第 8 行，呢度你見到，我當時有問一個問題嘅，我就問黎以德先生「究竟嗰個係咪正確咁反映政府嗰個立場，即係關乎人手短缺？」

黎先生回應嘅時候就咁講嘅，佢係黎以德先生，佢就話「我就係作為呢一個運房局嘅代表，我係上任秘書長」--或者我將佢嗰個答案係打出嚟，我想請你睇呢個第 16 行嘅。

「我哋嘅立場嘅另一個部分，即係關乎係商業司機嘅長久存在嘅短缺問題，就係我哋已經採取步驟去係有一個全面嘅立法嘅修訂，我就可以講下嘅，就係話要將商用車輛司機嘅牌照要求就係放寬，即係話基本上就咁嘅，目前如果你想攞個牌照，想攞駕駛執照係揸商業車嘅話，你就需要有一個私家車嘅執照，要擁有咗三年，然後先至可以有資格係進行申請嘅，即係話係申請就係攞個駕駛執照，揸呢個係商業車輛。

由於長期都係人手短缺，我哋就已經作出咗一個建議，而業界以及立法會亦都同意咗，就係呢一個三年期係可以將佢縮減到一年期嘅，所以喺日後你只需要係有一個係私家嘅駕駛執照一年，然後就已經可以係申請攞呢個商用車輛嘅駕駛執照，商用車輛當然就包括巴士，亦都包括埋係專營巴士嘅。

我哋而家草擬緊相關嘅法例嘅修訂，我哋希望就可以喺今年年尾之前係將佢提交畀立法會，如果立法會係通過嘅話，應該喺某程度上都可以舒緩到呢一個短缺嘅問題。未必可以全部解決個問題，但希望都可以提供一啲舒緩嘅，喺我哋嘅度，呢個就係我哋所做緊嘅工作。

不過正如我講過，亦都要講埋，我諗亦都係專營巴士公司作為一個專營權嘅獲授權者，係採取一切合理嘅步驟，去確保佢哋有所需嘅司機嘅數目去提供個服務。」

好，呢度你見到喇，睇番呢一個紀錄本，睇嚟就係政府係立意就係要將個三年期就係縮減到一年嘅，而且已經係草擬緊嘅個法例嘅修訂。我喺未將呢一段文字讀出嚟畀你聽之前，之前你哋公司知唔知悉呢件事㗎？

李澤昌先生：呢一樣嘢就好肯定清楚就係因為每一次--知道嘅，佢三年嘅個駕駛經驗係唔多唔少係減少咗一啲有機會投考做巴士司機嘅個機會，將三年去 relax 到一年嘅時間，其實變咗有多啲人可以入到個學校裏面去考呢個巴士牌。最後，最重要都係考個巴士牌，我哋所謂叫做 17 牌，就係有資格揸巴士，係嘅個先至為目標。

當然如果你將三年去到一年嘅時候，變咗佢入去個學院嘅人數就可能會多咗，變咗都係最後嘅個關卡都係考到嘅個巴士牌為基準。咁係幫到嘅，因為喺無論你三年又好，兩年都好，有啲真係有能力去做，呢個我哋係知道嘅。好似我哋頭先有個同事講緊，就係而家仲係喺度討論緊，就未有一個我哋嘅時間表。

MR DUNCAN：（經傳譯員）你知唔知道業界係支持呢個改變㗎？因為呢度黎秘書長係咁講嘅。

李澤昌先生：一半一半，一半一半，有啲係當然覺得有啲 trade，當然覺得某啲因素會對佢自己嘅個嘅利益嘅關係；從另外一半，有啲真係覺得而家係喺嘅個揸商業車越嚟越少人，嘅個門檻最重要都係考到巴士牌。今日我哋九日有兩個門檻嘅，一個就係頭一 part，就係令到佢入嚟個學校嘅時候就考到嘅個巴士牌，呢個巴士牌係政府運輸署批出嚟嘅，如果有咗呢個牌之後，佢基本上就已經可以揸得巴士，同埋其他嘅好似例如嘅啲旅遊巴士嘅啲咁嘅東西，對個業界係多咗，因為你入嚟嘅 applicant 係多咗。一半半囉，可以咁答你。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）黃生，你話政府係有同你哋商討過嘅，係淨係同九巴傾

叮，定抑或係同其他持份者傾？

黃祥明先生：係同所有嘅呢個巴士公司係一齊商討。

MR DUNCAN：（經傳譯員）開過幾多次會呀？

黃祥明先生：我印象中係記得只係一次啫，只係一次啫。

主席：（經傳譯員）呢個係上個月嘅，係咪呀？你講過。

黃祥明先生：冇錯，係，剛才我講過係上個月，但係日子我要 check 番我個行程表先記得番邊一日。

主席：（經傳譯員）但你頭先亦都講過就話係冇清楚嘅立場顯示嘅？

黃祥明先生：講咗一啲嘅佢哋嘅大概預算嘅做法，包括其中一樣就話要啲--如果係改低嗰個有駕駛執照嘅年份嘅時候，就要佢哋進行一啲叫做商業駕駛嘅訓練，佢英文叫做 passenger service course，但係呢啲都係好初步同我哋講，所以而家都未有一個好大嘅 picture 知道佢哋係點樣做法。

主席：（經傳譯員）當時黎先生係三個月之前作證嘅，佢當時就話業界係支持嘅，你而家就話只係上個月先同巴士公司係問呢個問題？

黃祥明先生：係，冇錯。

主席：（經傳譯員）唔該。

MR DUNCAN：（經傳譯員）喺今年嘅 2 月份，有新嘅指引，呢個就關於就係佢哋嘅當值時間、休息時間，呢個新嘅指引就發咗出嚟嘅，呢啲新嘅指引，我想問有冇影響咗你哋係招募員工、招募車長嘅工作呢？

彭樹雄先生：Mr Duncan，我如果直接答你，如果我哋係要--不過首先我想講，運輸署今年嗰個修訂本嗰個 revised guidelines 係要到到出年嘅第二季先係全面咁樣去落實嘅，但係我哋初步嘅估計，其實我哋而家開始做緊一啲嘅 system modifications，就係一啲電腦程式嘅 upgrade，就去 fit 番呢一個新嘅 guideline，我哋估計，如果呢個新嘅工時指引係完全行嘅時候...

主席：（經傳譯員）彭生，其實呢個問題唔係一個開放式嘅問題，好簡單嘅咋，有冇影響到你哋係招募車長呢？有定抑或冇？

彭樹雄先生：如果純粹講 recruitment，係會有影響。

主席：（經傳譯員）我諗鄧律師要問嘅問題就係咁嘅。

MR DUNCAN：（經傳譯員）你話有影響係喺邊方面受影響？

彭樹雄先生：如果--我哋計過，用呢個新指引呢，我哋要額外請多二百個車長，同埋新指引底下有一個所謂特別更，呢個特別更，

如果我哋係將來取消呢個特別更，一更過，一個straight shift，我哋更加額外要請多一千個車長。

MR DUNCAN：（經傳譯員）對於嗰個特別更嗰個影響，我哋遲啲先至講。或者我頭先講得唔清楚，唔好意思。自從2月份，我想問，呢個指引係令到你容易啲吖，定抑或難啲，定抑或係冇咩嘢影響，即係對於你哋招募車長方面係難咗吖，易咗吖，定抑或冇影響呢？

蘇偉基先生：呢個其實可以喺番投考人佢點樣respond呢個新嘅guideline去決定，因為公司喺2月呢個新guideline期間做咗好多嘢，呢個我哋好focus講個guideline，我就唔感覺到招聘人其實對呢啲嘅guideline有幾大嘅認識或者關注。

MR DUNCAN：（經傳譯員）即係據我嘅理解，即係話冇影響？

李澤昌先生：唔係好嚴重。

蘇偉基先生：暫時未反映。

李澤昌先生：唔係好嚴重。

黃祥明先生：暫時未反映。

MR DUNCAN：（經傳譯員）你表示為咗符合新嘅指引，你係要請多二百名嘅車長，喺大埔意外之後，你係已經係更改咗你對兼職車長同埋聘請兼職車長嘅政策，係咪呀？

李澤昌先生：係。

MR DUNCAN：（經傳譯員）你就話要請多二百個車長係咪已經反映咗呢一個新嘅政策？

李澤昌先生：冇。

MR DUNCAN：（經傳譯員）你哋就住兼職車長嘅決定係咪即係意味住呢個數字係會唔止係二百？

蘇偉基先生：二百個車長係需要增加去配合呢個新指引，其實講緊嗰個係全職嘅車長嚟嘅。我另外都想答一答，就係話我哋2月喺嗰個part-time嗰個嘅改變，我哋要了解到其實part-time車長2月前或者2月後對公司成個車長嗰個勞動力，佔嗰個比例其實都係講緊3至4%嘅啫。

MR DUNCAN：（經傳譯員）明白，唔該晒。我想你睇58頁，KMB-1文件冊，個問題--呢個亦都係你第一份呈交嘅文件之一，問題就係你公司有冇聘請足夠嘅全職車長去提供有效同埋有效率嘅服務呢？你公司需唔需要持續咁樣去聘請一啲

兼職嘅車長去解決呢一個人手短缺嘅問題，或者係去輔助一啲核心嘅員工去處理一啲特別嘅活動同埋處理一啲缺席嘅問題呢？請你提供唔同聘請條件嘅車長數目同埋現有嘅員工能唔能夠係符合你嘅運作需要呢？

我想你睇番呢一頁嘅最後一段嘅，你回應指車長聘請嘅招聘類別就係根據佢哋嘅招聘日期去分類嘅，而以日薪嘅車長嚟講，就係 1999 年嘅 5 月之前嘅，呢個意思係咪即係話如果以日薪去聘請--即係呢啲係咪指以日薪去計算薪金嘅車長？

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）而月薪車長嘅意思即係話佢哋每月去支薪嘅，正唔正確？

蘇偉基先生：（經傳譯員）每月支薪嘅，係。

MR DUNCAN：（經傳譯員）第三類就係退咗休嘅車長，佢哋就係重新被聘請，佢哋可以係每月支薪或者係用一個第三個方法，即係用月薪嘅。

蘇偉基先生：呢個係跟佢個 employment 而定嘅，唔係話佢選擇嘅，即係如果佢係一個揀咗時薪 hourly rate 嘅，我哋就計佢每一個鐘頭去編更，就計佢每一個鐘頭嘅工資，如果佢揀係一個月薪車長嘅，我就以一個每個月嘅形式去編更，佢收嘅就係月薪嘅工資。

MR DUNCAN：（經傳譯員）唔該晒。我哋睇到啲相關嘅數字，就係 4 月 24 號嘅情況嘅，就係第 59 頁，就有日薪嘅車長，2,105 名就係九巴嘅，月薪車長就係 5,201，退咗休嘅車長而係重新聘請，如果以時薪計就係 577 名，一啲退咗休而再聘請嘅車長，以月薪計就有 383 名嘅，另外就係有啲外來嘅時薪車長就係有 371 名嘅。據我嘅了解，外部嘅時薪車長全部都係兼職車長嚟㗎嘛？

蘇偉基先生：正確。

MR DUNCAN：（經傳譯員）然後你就列出咗巴士車長空缺嘅數目，直至喺 2 月 28 號就係有 280 個空缺嘅。

蘇偉基先生：（經傳譯員）係嘅，當時係。

MR DUNCAN：（經傳譯員）我哋睇番第 58 頁，喺屘二嗰一點，呢個係關於兼職車長嘅，「自從 18 年嘅 2 月中開始，九巴已經係停止招聘新嘅外來時薪車長，如果佢哋嘅工時係短嘅（即係話每星期係少過十八小時）。」因為咁樣，九巴係會繼續去聘請兼職車長嘅，只要佢哋每星期係工作超過十八個鐘？

蘇偉基先生：Yes.

李澤昌先生：呢個有點補充，我哋覺得 part-time 同埋 full-time 呢樣嘢有一個好唔同嘅，其實十八個鐘頭每一個星期或以上其實係令到我哋好清楚可以同嗰

個員工知道佢之前如果有其他嘅工作，我哋一定要清楚知道佢嗰份咩嘢工作，兼夾佢揸車嘅時候可以知道佢之前有冇揸過其他車或者個身體嘅狀況，所以其實好難定論一個 full-time 佢工作嘅時間係咪十八定十九，有啲人嘅 full-time，其實佢每日係工作四個小時都係叫做 full-time，所以其實我哋將呢個 part-time 呢個字係清楚地用「十八個鐘頭以上」，係我哋畫咗一條線喺度嘅，每個星期。

MR DUNCAN：（經傳譯員）根據我嘅了解，即係話每星期工作超過十八個鐘嘅人就唔會--即係再有其他工作係影響佢哋嘅駕駛工作嘅，係咪？

李澤昌先生：Yes or no，係，我哋覺得如果佢連續性每一個星期都做十八個鐘頭，我哋就會問嗰個車長佢有冇其他嘅工作，如果有其他嘅工作嘅話，我一定要了解清楚佢嗰份工作係咩嘢工作，而佢嗰個工作嘅僱主容唔容許佢揸車，呢個係一個好重要嘅問題嚟嘅，因為有啲情況，譬如假設一個車長佢喺出面揸緊的士嘅，佢嚟到我呢度佢揸十八個鐘頭，其實我有機會唔知嘅，十八個鐘頭樓下，所以我哋係好肯定地，我哋想 draw 十八個鐘頭就--其實呢個係我哋一條例係畀自己，就我哋係一定要令嗰架車入嚟嘅時候係知道佢嗰份工作--另外嗰份工作係咩嘢工作。呢個重要嘅，因為相反，如果我哋唔知道嘅話，我哋就唔知道佢個情況。

MR DUNCAN：（經傳譯員）如果有人係淨係想幫你係工作十二個鐘，有咩嘢問題呢其實？

李澤昌先生：No. Simply just reject.

個問題係點解，個問題係點解，即係你點解會有興趣知道呢？

蘇偉基先生：如果嗰個投考人佢冇提供，其實我哋都做唔到我哋可以一個 reasonable step 證明佢嘅工時或者佢另外有招聘，有個疲勞嘅考慮。佢如果而家過十八個鐘，我哋就要佢有幾個嘅 declarations，首先就係佢喺出面有啲咩嘢職業，我知道佢做緊咩嘢職業，我哋而家個紀錄就係我嗰三百幾個車長，其實四成係文員工人，其他三成就係冇職業嘅，餘下大約 25%就係佢從事其他駕駛嘅工作。

佢亦都要向我哋講佢做九巴呢個兼職係冇抵觸同埋佢嗰個僱主係知悉，佢自己講得㗎喇，一個 in good faith 嘅 system，起碼我知得到佢唔會打緊兩份工，而做到有個駕駛疲勞，呢個我可以做到嘅嘢，我做咗，自己。如果你話佢係一個少過十八個鐘嘅，基本上佢好難提供呢啲嘢畀我嘅，亦都我哋覺得 part-time 車長雖然係 part-time，但係佢都要對佢嗰個職業係有一個著緊，seriousness，你一個禮拜你揸得十八個鐘頭，就唔係話揸兩、三個鐘頭，我都知道佢個駕駛技術唔好有生疏咁樣盛，係一個考慮嚟。

MR DUNCAN：（經傳譯員）但係呢個系統嘅底線，根據我嘅了解，就係你收集返嚟嘅資料，就係關於嗰個人士嘅其他嘅工作，而你收集返嚟嘅資料就係視乎究竟

嗰個員工係幫你工作十二個鐘定係二十個鐘嘅，你明唔明我嘅問題呀？

蘇偉基先生：唔認同呢個，我。

MR DUNCAN：（經傳譯員）點解你唔認同呀？

蘇偉基先生：我哋睇得到好多坊間都有講好多啲人佢好喜愛揸巴士，揸唔同嘅型號，所以佢就做兼職巴士車長，但係佢有冇個 mindset 呢？呢個我唔敢去喺呢度批評。正如頭先所講，公司一定係有個 guideline，一定係有把尺嘅，我就要擺呢把尺喺度，而呢把尺我哋參考就係話今日香港連續招聘十八個鐘頭就係一個連續招聘，佢可以係我嘅員工，我可以問佢「究竟你出面有啲咩嘢職業呀？」咁樣做。我哋就係擺咗呢十八個鐘喺度，我哋亦都覺得擺咗十八個鐘嗰度，唔會因為咁樣而招聘少一啲短工時嘅車長而令到我嗰個車長個團隊個勞動力少咗，所以其實我十八個鐘以上係安全同勞動力中間一個嘅 trade-off 嚟，我就擺十八個鐘喺呢度。

李澤昌先生：或者你試下可以想像一下，如果你冇十八個鐘定咗喺度，就算佢個駕駛技術點咁好都好，一個鐘，返兩個鐘，聽日又或者唔返，下個禮拜就唔知去咗邊度，喺嗰個編更同埋喺嗰個人事安排係非常之後困難嘅，我諗呢個都係一個我哋比較都要諗一諗嘅一點。

主席：（經傳譯員）鄧律師，你會唔會建議講番呢一個申報嘅問題？

MR DUNCAN：（經傳譯員）遲啲會，不過而家就暫時未住。

主席：（經傳譯員）喺呢個議題上，你係提供咗一啲整體嘅數字，就係關於呢啲工作嘅情況，譬如話四成就係做一啲文書工作，然後有三成就係冇工作，另外有兩成半就有其他嘅駕駛職務，你可唔可以提供呢啲嘅數據畀委員會呀？

蘇偉基先生：可以。

主席：（經傳譯員）特別就係其他駕駛職務嘅資料。

蘇偉基先生：可以。

主席：For example, presumably...

蘇偉基先生：貨車或者係私人嘅司機等等。

主席：（經傳譯員）係，我都喺心目中諗嘅，即係揸旅遊車、的士、公共小巴或者私人司機，請你畀多啲資料我哋，係會有用嘅。

蘇偉基先生：Yes.

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）你有咁嘅改變係咪都係大埔嘅車禍之後促成嘅呢？

蘇偉基先生：係由嗰件事而引起嘅，因為當時社會上係有個聲音，就係話作為一個巴士公司，你招聘咗 part-time 車長，大家唔係討論 part-time 車長嘅技術，而係覺得作為個巴士公司，你點知道呢個 part-time 車長佢返你份工，可能佢黃昏返工，佢朝頭早做份咩嘢工、有幾勞動，呢個係要知嘅，我哋嗰陣時亦都係醒覺到係可以再做好啲嘅，就停咗先，跟住我哋就優化佢，所以我哋就跟住就係話做一個十八小時嘅一個 criteria，當時剩咗喺度嗰三百幾，我哋亦都有一啲轉職嘅安排係畀佢哋，就變咗嗰個新嘅 policy 亦都係沿到今日都喺度做緊。

MR DUNCAN：（經傳譯員）喺大埔車禍之前，想問下，你哋當時係有幾多車長每周係工作少於十八小時？

蘇偉基先生：其實喺嗰三百幾個車長入面，之前--我 exactly 唔記得，約莫喇，二百幾個係做十八個工時以上嘅，百幾個係十八個工時以下。

MR DUNCAN：（經傳譯員）我想請你睇呢個 104 頁，同一個文件夾嘅第 104 頁，呢一個就係報告嘅第 4 部分，呢個係你哋交畀運輸署嘅報告，呢個係喺大埔車禍嘅報告，個日期就係 3 月 12 號嘅，第 4 部就關乎係招聘嘅。你呢度就講話喺停止係聘用呢個兼職車長，喺呢一段裏面所講嘅就係首先，你就話九巴已經不再係聘用工作時間低於每周十八小時嘅兼職車長，所以呢度嗰個表達嘅形式係少少唔同嘅，即係對照番呢個第 58 頁，58 頁就係話停止係招聘新嘅時薪計嘅車長嘅，但係你呢一度就講停止聘用佢哋係少過十八個鐘一個星期。兩者有啲唔同，其實你係咪兩者想講嘅係同一樣嘢嚟嘅呢？

蘇偉基先生：係一致，兩個講法，都係話對短工時，每個禮拜返少十八個鐘嘅人，第一，係不再新招聘，唔再招聘新嘅，第 13 點，而家大家螢光幕見到嗰個，就係話現有，當時已經請落嘅，兩個唔同嘅，頭先我第一次講就係不再招聘新嘅，而家呢度提，就係喺現有嗰陣時我哋點呢？呢個“discontinued the employment”唔係講緊解僱住，因為呢班 part-time 車長佢係 hourly rate 做，我哋只不過嗰陣時係停止咗派更畀佢，然之後去同佢商討一個方法，正如第二段講，係勸誘佢轉去一個 contract hourly rate，即係話「你短工時，可唔可以做多啲，做長工時呀？」可能有啲根本佢係無職業嘅，或者可能係影響佢收入，當時我哋亦都話「你以往做開短工時，不如你就做其他嘅崗位。」舉例如，一個站務嘅助理，起碼唔好因為咁樣係影響佢個收入。所以係講緊唔同嘅嘢嘅。

MR DUNCAN：（經傳譯員）好，明白，唔該。轉為呢個合約嘅時薪係咩嘢意思呢？佢哋唔係呢個合約嘅時薪嘅車長，以前唔係都已經係嘅喇咩？

蘇偉基先生：冇錯，以前我哋統稱叫做“part-time BC”，喺 2 月之後，我哋就再請嗰啲就係符合連續性每周工作十八個小時，呢啲其實我哋叫做“continuous employment”，長工時。其實係咪再用個“part-time”嗰個字呢，有啲混淆，所以呢啲我哋叫做「合約時薪車長」，“contract

hourly rate BC”，呢班同事以往佢係少過十八個鐘嘅，所以正如頭先我講，我哋同佢商討，如果佢可以返多啲更分，返多啲工嘅，佢咪揸多過十八個鐘囉，呢個係一個方法。或者就係 take other 嘅 posts。

MR DUNCAN：（經傳譯員）唔該。我想請你睇呢個第 145 頁嘅，你哋就提交咗兩份嘅行動計劃，呢個係第一份嘅，第一份就係你提交畀運輸署，呢一個就係喺 4 月 10 號所提交嘅，其實應該請你睇呢個 138 頁先嘅，因為嗰度係有封信嘅。喺第二段嗰度就係提及一個行動計劃嘅，138 頁，睇到嘛？

蘇偉基先生：（經傳譯員）係嘅。

MR DUNCAN：（經傳譯員）唔該。呢個就係 4 月 10 號嘅回應，亦都係第一次提交陳述書畀委員會嘅文件嘅，想請你睇番呢個 145 頁，因為之前嗰度，138 嗰度提及一個行動計劃。呢度睇到第 1 個項目，就係符合你剛才所講，就話「不再係聘用兼職車長，而佢嘅每周工作時數係低於十八小時。」呢個行動計劃就話兼職車長如果佢工時間係每周少於十八小時嘅話，自 2018 年 2 月 15 號開始就唔再有新嘅聘用，係咪呀？呢個就做咗喇？

蘇偉基先生：（經傳譯員）啱。

MR DUNCAN：（經傳譯員）第 2 點就話「之前嘅兼職車長就佢哋係有一個選擇，將佢轉做呢個合約時薪嘅車長，又或者係喺公司裏面擔當其他嘅職責嘅。」嗰個行動計劃就咁講嘅，就話「209 位係之前嘅或者前兼職嘅車長佢而家個情況係點，第一就係話同意每周係工作超過十八小時就有 78 位；同意就係一周工作超過十小時，申報就係話喺九巴嗰度做兼職車長係不會就係違反佢哋原本僱主同佢嘅僱員合約嘅；最後一項就係離職。」

讓我就係集中睇中間嗰個類別，我咁嘅理解啱唔啱呀，就係有一啲你哋以前就係請佢做兼職車長嘅，而家畀佢哋就係做超過十個鐘，不過就少過十八個鐘嘅，只要佢哋咁樣做係唔會違反佢哋另一份工嘅僱主同佢個合約嘅，係咪呀？

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）所以就唔係全部人都係超過十八個鐘，如果你之前已經公司請咗你嘅，你都仲係可以譬如話一周就係工作十二小時嘅，只要你作出咗聲明，就話你同另一個僱主嘅僱傭合約就係全部都遵守到條款，冇違反，係咪呀？

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）如果係願意係做多過十八個鐘呢？呢個表格呢一欄嗰度冇講話佢哋都要作一個聲明㗎嘛，冇講話要求佢哋聲明就話唔會違反另一份工嘅僱傭合約嘅，究竟個情況係點呢？嗰啲願意係做多過十八個鐘嘅情況又點呢？要唔要作一個聲明呢？

蘇偉基先生：（經傳譯員）或者我逐個逐個係慢慢解釋。

MR DUNCAN：（經傳譯員）好，好，唔該你。

蘇偉基先生：之前佢係 part-time 車長，佢揀咗轉去一個多過十八小時嘅，佢係簽過一份新嘅 contract，叫做 contract hourly rate 嘅 contract，佢係需要 disclose 佢嘅 outside employment，佢係需要 disclose outside employment，呢個就係第一個行講，“Agreed to work more than 18”個鐘頭嗰組。

第 2 嗰組就係其實佢仍然係 part-time 車長，我哋當時因應有一班 part-time 車長佢繼續喺度工作，突然間唔派更分畀佢哋，佢哋有訴求同我哋講，因為我哋已經係招聘咗佢哋，我哋冇再請新嘅，佢嘅駕駛技術我哋知嘅，佢有個紀錄喺度，我哋就做一啲大家都可以 compromise 嘅嘢，就係話佢可以繼續駕駛，但係都唔好--正如頭先李生講你返一個鐘、兩個鐘，你一個禮拜都返番十個鐘，亦都需要佢 declare 佢唔好同佢現有嘅工作嘅合約係違反嘅。因為我哋所知悉有啲嘅僱傭係唔畀你做 part-time 嘅，你如果喺我哋做 part-time，其實就唔應該嘅。

主席：（經傳譯員）蘇先生，未繼續之前，其實有呢一類嘅巴士車長嘅，佢哋嘅陳述書有畀我哋，你可以繼續。

蘇偉基先生：我完㗎喇呢度。

MR DUNCAN：（經傳譯員）我就想知道第 1 類，你就冇提及就話佢哋要作一個聲明，要申報。

蘇偉基先生：呢度係寫漏咗，其實佢有做嘅，呢七十八位同事，係有報告佢喺 outside employment 嘅資料畀我哋。

主席：（經傳譯員）係咪用一張表格嘅形式？

蘇偉基先生：有，可以提供。

主席：（經傳譯員）麻煩你畀一個副本我哋睇。

MR DUNCAN：（經傳譯員）即係話無論你係做多過十個鐘定抑或多過十八個鐘，你都係要簽署同一份嘅申報嘅表格去作一個聲明嘅，係咪呀？啱唔啱？

蘇偉基先生：兩份唔同嘅文件嚟嘅，我都可以分別提交。

主席：（經傳譯員）唔該。

MR DUNCAN：（經傳譯員）唔該你。我哋講緊呢一類嘅文件嘅時候，我諗我哋手頭上嘅文件夾就並冇任何嘅僱傭合約嘅樣本嘅，有冇一份標準嘅合約㗎？

蘇偉基先生：（經傳譯員）有，有。

MR DUNCAN：（經傳譯員）可唔可以亦都係畀份我哋睇呢？

蘇偉基先生：（經傳譯員）係，我可以嘅，我會嘅。

MR DUNCAN：（經傳譯員）我想問下係咪得一種表格畀晒所有嘅車長，定抑或係有唔同嘅呢？好視乎佢哋嘅身分呢？

蘇偉基先生：喺現有新招聘，我哋係用一款，另外一款就係話退咗休之後續聘，暫時係用緊兩款。

MR DUNCAN：（經傳譯員）唔該，希望你都畀埋我哋睇，兩款都畀我哋，唔該晒。

蘇偉基先生：Yes.

MR DUNCAN：（經傳譯員）我哋而家睇番第 124 頁，就住兼職車長，我仲有一啲問題嘅，或者由第 117 頁開始，第一點就係由運輸署--呢封信就係喺大埔意外之後，運輸署畀九巴嘅第一封信，日期係 2 月 12 號，就有幾個問題，有(a)、(b)、(c)、(d)項，而第一個問題，你就見到喺(a)嗰度，我而家就比較關心係問題(b)，就係話九巴對兼職車長嘅政策同埋呢啲車長嘅詳情，包括係兼職車長嘅數目、佢哋嘅工作嘅時數同埋調配。

而家我哋睇番 124 頁，你就會見到喺頁頂有呢個問題嘅，九巴嘅回應，就住問題(b)，你見到呢個羅馬數字(i)段，就係九巴對兼職車長嘅政策，如果你睇番下面嗰幾點，就有七點嘅總共，基本上意思就係兼職車長嘅佢對待嘅方式同全職車長係一樣嘅，除咗第三點，第三點就係講培訓嘅。

第一點就係兼職車長同埋全職車長嘅入職要求係一樣；第二點就係兼職車長接受嘅評核同全職車長係一樣嘅；而第三點，兼職車長就係會接受合適嘅培訓先至會係開始工作嘅，即係佢講到係要接受合適嘅培訓。我就嘗試去搵究竟兩者之間有咩嘢分別，呢個係講緊 2018 年 2 月嘅，就住對全職車長提供嘅培訓同埋對兼職車長提供嘅培訓。

就住呢一點，想你睇一睇第 120 頁，首先喺資歷同埋招聘條件方面，全職嘅申請人，即係一個另外嘅要求就係持有私家車牌照三年或者持有第 10 類或者第 17 類嘅駕駛執照嘅，呢個係全職嘅申請人；而兼職嘅申請人就喺第(ii)段，羅馬字(ii)段，你就係要有第 10 類或者第 17 類嘅駕駛執照嘅，呢個係咪第一個嘅分別呀？

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）唔該晒。

主席：（經傳譯員）我假設就係你唔會花錢去培訓一個兼職嘅車長，係咪？

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）唔該。我想講嘅第二個議題，就係羅馬字(iii)段，就係一般嘅培訓，全職嘅申請人就係必須接受十八日嘅培訓，每日係 9.5 小時，係有可能係延長嘅，根據駕駛導師嘅表現評核。而我哋睇番第 121 頁，我哋係見到對兼職車長嘅相應要求，就係羅馬字(iv)段嘅，呢個車長係必須接受 2.5 日嘅培訓，同全職車長嘅十八日每日九個鐘係唔同，呢個係咪有個分別呀？

蘇偉基先生：（經傳譯員）係。但係正如我提到羅馬數字(vi)段，就係呢一個兼職車長嘅申請人就係有 10 號或者 17 類嘅駕駛執照，

MR DUNCAN：（經傳譯員）但係培訓嘅長度仍然係有分別，係咪呀？全職車長係必須接受十八日嘅培訓，而兼職車長只需要接受 2.5 日嘅培訓。

蘇偉基先生：（經傳譯員）係，當時係咁嘅。

MR DUNCAN：（經傳譯員）第三個分別，以我嘅理解，你睇番第 121 頁，第 2 階段，喺嗰一個表嘅最後嗰一個部分，就話就會喺兩條路線進行嚟講嘅訓練，但係如果你睇番 122 頁兼職車長嘅要求，路線嘅培訓只係會係就住一條路線進行培訓嘅啫，呢個係咪有個分別呀？

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）另一項嘅分別，正如我理解，就係睇番第 121 頁，我哋睇番就係羅馬字(iv)段上面嗰一個部分，「全職嘅車長申請人就會係接受起碼六十八小時嘅駕駛訓練，包括係路線訓練嘅，就會喺導師嘅指導下完成。」

而第 122 頁，兼職車長方面，喺呢一個表下面就講「兼職車長嘅申請人就會接受總共起碼十六小時嘅駕駛訓練，包括係接受路線培訓嘅時間嘅，係喺駕駛導師嘅指導之下完成嘅。」呢個係咪就係第四項分別呀？

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）就住全職車長同埋兼職車長之間培訓要求嘅分別係有原因或者係合理嘅呢？

黃祥明先生：首先剛才我哋喺度睇嗰啲就係喺之前，即係喺呢個事件發生之後，即係嗰段時間發生嘅訓練情況嚟嘅，就非係而家嘅訓練情況。剛才 Mr Duncan 都舉出咗好多唔同嘅訓練元素喺度，我想舉出多一樣，就係話如果係一個全職嘅訓練，即係十八日--所謂十八日嘅訓練裏面，當時係導師一對二嘅訓練嚟嘅，而喺呢個 part-time 嘅訓練嘅導師係一對一嘅，即係話喺個導師嘅直接監管同埋嗰個學習車長嘅駕駛亦都係時間會多咗嘅。呢個喺當時嘅安排係咁樣樣，當時亦都嘅諗法係可以達到佢哋嗰個出嚟駕駛目標，所以呢個係當時嘅情況。

同時呢個所謂十八日同埋兩日半係一個正常嘅訓練，如果一個車長喺十八日唔能夠達標，我哋係會延長佢嗰個訓練期，同樣地，一個 part-time 車長，如果佢兩日半唔能夠完成--唔能夠達標，佢亦都會延長個訓練期。

蘇偉基先生：呢度我補充，即係頭先講過 justification，因為喺以前嗰十八日係分開兩個階段，第一個階段嗰個嘅後果就係話佢可以攞到嗰個駕駛執照，喺 part-time 車長，其實招聘嗰陣時佢已經領有駕駛執照，所以如果 like-to-like 嘅比較，就應該九日同兩日半，呢個先至做一個 adjustment。

第二，正如頭先黃生講，喺個導師同嗰個學員以一比二，呢個就一比一，所以又一半；第三，正如文件所講，如果全職，佢學嘅車型，學四至五款，但係兼職學嘅車型就係兩款；再者，就係話全職學嘅路線就兩條，兼職學嘅路線就係一條。所以雖然時間係短，但係佢學嘅嘢冇咁 diversify，佢係兩個車型、一條線，因為佢做兼職，佢就係可能淨係揸嗰兩個車型，就揸嗰一條線嘅啫。亦都導師係一對一。

主席：（經傳譯員）簡單嘅答案係咪就係「係」呢，就住呢個問題？

蘇偉基先生：（經傳譯員）係嘅。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）全職同埋兼職嘅車長係咪駕駛同一啲巴士㗎？

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）如果我哋唔考慮路線嘅數目或者唔同路線嘅數目，啲司機係咪都係揸同一啲路線嘅呢？

蘇偉基先生：呢個好難去直接答你呢個問題。我哋有四百幾條線，我哋嘅新同事，無論佢係全職車長或者兼職車長，佢開首都會揸一啲容易啲駕馭嘅線，至於你話會唔會全部都係揸同一條線呢？因為我哋起碼有四個廠，就一定唔會大家都係揸同一條線，但係大家都會開首係嘗試一啲容易嘅線。

MR DUNCAN：（經傳譯員）我知道你有檢討過呢個培訓嘅安排喇最近，我哋今朝亦都傾過，但係我有一個問題想問嘅，喺呢一個新嘅建議底下，即係如果我哋唔考慮呢一個實務守則，我哋只係講呢個新嘅安排，就全職同埋兼職車長嘅訓練要求係咪一樣呀？

蘇偉基先生：（經傳譯員）係。

主席：（經傳譯員）鄧律師，呢個會唔會係一個適當嘅時間就係結束今日嘅聆訊呢？我諗大家都係好辛㗎喇，起碼負責記錄嘅都係喇，係咪呀？我哋而家會就係暫停，就聽朝早 10 點鐘再繼續，唔該晒。

2018 年 8 月 10 日

下午 5 時 30 分聆訊押後

(10.01 am)

EVIDENCE FROM KOWLOON MOTOR BUS CO (1933) LTD AND LONG WIN BUS CO LTD: DR NORMAN LEUNG, DR JOHN CHAN, MR ROGER LEE, MR GODWIN SO, MR LEUNG KIN WANG, MR PATRICK PANG, MR JAMES WONG

(simultaneous interpretation used only where indicated)

CHAIRMAN: Good morning, Dr Leung and gentlemen.

DR NORMAN LEUNG: Good morning, Mr Chairman.

CHAIRMAN: Mr Duncan.

MR PETER DUNCAN: Thank you, Mr Chairman.

DR NORMAN LEUNG: Before that, Mr Chairman, may I have a few minutes, please.

CHAIRMAN: Yes.

Statement by DR NORMAN LEUNG

DR NORMAN LEUNG: Mr Chairman, after the hearing yesterday we submitted to the committee further documents in relation to the action plan for the speed limit on 29 bends.

If I may briefly refer to the summary of documents submitted before the committee. First of all, I have to say, Mr Chairman, you have asked a very fair and valid question as to why the proposed plan -- the proposal submitted by Mr Gary Wong was not acted upon by the management. I had to agree that I have the same doubt, you know, as to why it was not acted upon.

If I may just refer to the summary of documents submitted before the committee. On 31 July 2014, the action plan -- it says that the action plan will be submitted to operations director and managing director for endorsement.

Then on 14 August 2014, an email was sent by Mr Gary Wong to Mr Edmond Ho, stating that "For your approval, please." Then on 15 August 2014, an email was sent by Edmond Ho to Gary Wong, "Please ask the operations director for formal approval after checking and endorsement."

Then came 2 February 2015. There was an email sent by Mr Gary Wong to all the general managers of the depots, saying that "it is now the right time to reconsider the implementation of the speed limits on these identified bends."

And on 5 February, another email was sent by Gary Wong to all the general managers of depots, "I will submit them to operations director and operations and planning director for final approval."

If I may refer the chairman to exhibit 5 of this bundle.

CHAIRMAN: Yes, I have that.

DR NORMAN LEUNG: Thank you, Mr Chairman. This is a circular sent by Mr Gary Wong to all the general

managers and managers of the operations department as well as other departments. It is stated in this memo:

"A meeting with [operations director] this morning regarding the above captioned subject. We have a new approach" -- and I repeat, "a new approach" -- "to manage this issue and the actions are summarised as follows:

(1) SSQD [namely his department] will prepare a safety poster 'Safety driving through sharp bends' for the month of April. Depots are required to place and display the safety posters at prominent places inside the depot areas and all [bus terminals] and [driving instructors] are required to conduct safety briefings to [bus captains] at all [bus terminals] as normal practice;

(2) SSQD will prepare an internal notice which to be issued by Traffic Department to enhance the safety awareness among [bus captains] and to remind all [bus captains] to watch a safety video by means of e-learning (same approach for bus fire handling).

(3) SSQD will liaise with [Bus Captain Training School] to post a safety video on staff website to specify the general safety guidelines/precautions when driving through sharp bends. The sharp bend 'Po Shun Road onto Tong Ming Street' will be selected as

an example for the 30 second safety video. All [bus captains] are required to log in or make use of other means to watch the safety video and their names should be captured/recorded.

(4) [Bus Captain Training School] to quote Tseung Kwan O toppled over incident as a lesson learnt for all new [bus captain] trainees and all other [bus captains] through appropriate safe driving training."

At the end of the paragraph, it is stated:

"Please note that there is no need to issue the safe speed limits cards" -- no need to issue the safe speed limits cards -- "and the speed limits will not be specified" -- will not be specified -- "in the safety video and internal notice. It is expected that we will start to take the above ... actions in April 2015. I will keep you informed of the updated progress."

Mr Chairman, I just want to point out that all the proposals set out in this memo have all been acted upon. The management has taken action to implement all these proposals.

CHAIRMAN: Thank you.

DR NORMAN LEUNG: Thank you, Mr Chairman.

CHAIRMAN: Mr Duncan, have any steps been taken to paginate this material? Because it's likely to be referred to, and it would help if we were to paginate it.

MR PETER DUNCAN: Mr Chairman, we will arrange for that. These pages just arrived on my desk a few moments ago.

CHAIRMAN: I appreciate that. If somebody could perhaps start doing that, then we can write the numbers in ourselves.

MR PETER DUNCAN: Certainly.

Dr Leung and gentlemen, good morning. Thank you for your homework overnight and thank you for that explanation this morning.

DR NORMAN LEUNG: I have to apologise on behalf of the management. So much time was spent on this topic yesterday. If our management had done their job better, you know, the whole thing could have been explained clearer yesterday. Please accept my apology.

CHAIRMAN: Yes, thank you for that gesture, Dr Leung.

Examination by MR PETER DUNCAN (continued)

MR PETER DUNCAN: Dr Leung, I just have a couple of questions arising from the material we received overnight.

If you look at exhibit 1, this is the email from Gary Wong of February 2, 2015:

"Following the clearance of protest areas in December 2014, it is the right time to reconsider the implementation of speed limits for the identified sharp bends/roundabouts."

So the word "reconsider" would suggest that this matter had already been the subject of consideration.

We don't have any documentation with regard to what happened subsequent to the email of Mr Edmond Ho on 15 August 2014, which sought formal approval from the operations director, Mr Eckford.

Has the management been able to find any information as to what happened after August 2014 and before February of 2015 with regard to that request for formal approval?

DR NORMAN LEUNG: We have to look up the file. The documents submitted before the committee are all we have got, the relevant material we have got, from our file.

CHAIRMAN: We understand that, but the question is very simple: where are the records of what was being considered between 14 August 2014 and 2 February 2015? Where are they?

Mr Lee, perhaps you can help.

MR ROGER LEE: I will try to help but I joined the company in January 2015.

CHAIRMAN: Yes.

MR ROGER LEE: And no doubt I will go back to the office and find out a bit more.

CHAIRMAN: Yes, but you weren't the managing director at the time this decision was taken on 13 February 2015,

because you told us previously that this was something that had been decided when Mr Edmond Ho was the managing director. That's not the case, is it, from the documents you have provided today?

MR ROGER LEE: Can you just let me to get back to the office to find out more information?

CHAIRMAN: Yes. Thank you.

DR NORMAN LEUNG: Chairman, perhaps if I may make a point of clarification, because I raised the same question with our management.

It started with:

"Following the clearance of protest areas in December 2014 ..."

They were referring to the Occupy --

MR PETER DUNCAN: Occupy Central, yes.

If I could raise another matter, please, that we addressed yesterday. This is the matter of the exception reports that we were provided with yesterday.

I am referring to two types of reports, one relating to speeding and the other relating to harsh braking and sudden acceleration which we saw yesterday. Just so there is no misunderstanding here, can we look first of all at KMB-9 at page 3993.

You will recall that we spent some time on this document in the last couple of days. That's the first

type of report I'm referring to.

And the second type of report is that which we can find at KMB-1 at page 362.

CHAIRMAN: What kind of report is that?

MR PETER DUNCAN: This pertains to speed, and then also acceleration, and then also harsh braking.

You will recall that sort of report?

MR JAMES WONG: (Via interpreter) Yes.

MR PETER DUNCAN: Thank you.

With regard to the accident in Tai Po on 10 February this year, can I ask this question: was the bus involved or the driver of that bus identified after the incident in any of these two types of reports generated for 10 February?

MR JAMES WONG: (Via interpreter) At that time, we did not identify the bus through these reports because, at that time, we looked at the specific incident and bus involved without having to wait for these reports.

MR PETER DUNCAN: So were the reports ever produced for 10 February?

MR JAMES WONG: (Via interpreter) At that time, the focus was on the bus itself. I did not realise or pay attention to the occurrence of this bus in these reports.

MR PETER DUNCAN: So this type of reports had never been

produced for 10 February?

MR JAMES WONG: (Via interpreter) These reports are regular reports. In other words, for buses that contravene our guidelines, they would show up on these reports. So these are regular reports.

For the Tai Po incident, it was an exceptional incident, which was why we looked at that bus specifically. I cannot recall whether the bus was covered in these reports.

MR PETER DUNCAN: Could you undertake a check as to whether there were such reports issued for 10 February?

MR JAMES WONG: (Via interpreter) Yes. I can check whether such reports appeared at that time.

CHAIRMAN: And having done so, will you provide them to the committee?

MR JAMES WONG: (Via interpreter) If I am able to identify the records, of course I would provide them to the committee.

CHAIRMAN: Thank you.

MR PETER DUNCAN: Had the bus been travelling in excess of 70 kilometres per hour -- had that bus been travelling -- would a report such as the two types we have seen automatically have been produced?

MR JAMES WONG: (Via interpreter) First of all, for the table we see right now, the speed threshold was

75 kilometres per hour. If the bus succeeded 75kph, it should show up on this table.

As for another, shorter table, it depends on the road speed limit at that time before we ascertain whether a bus was speeding. If there was speeding, again, it would show up on the report.

MR PETER DUNCAN: If there was harsh braking or extreme acceleration, would that have automatically generated the second type of report?

MR JAMES WONG: (Via interpreter) Yes.

MR PETER DUNCAN: If those reports were not generated at that time, would the system today allow for the production of those reports?

MR JAMES WONG: (Via interpreter) If there was harsh braking or sudden acceleration, there would be such record. If there was such occurrence, it would show up on the report. So if I am able to identify that report, I will share that with the committee.

MR PETER DUNCAN: My question is a little different. If the report does not exist, can you produce a report today from what consists in the company's records, in its computers?

MR JAMES WONG: (Via interpreter) I don't quite understand the question. If there was harsh braking or sudden acceleration, it should have shown up on the report

already.

MR PETER DUNCAN: I see. Thank you.

MR LEUNG KIN WANG: (Via interpreter) It should be possible, but since the records or figures were from half a year ago, they were already archived in other systems, so we might need to identify the data involved. So we have to study the feasibility, but I believe it's possible.

MR PETER DUNCAN: Thank you.

CHAIRMAN: Yes, Mr Duncan.

MR PETER DUNCAN: We moved, at the end of yesterday, to the matter of training. Before I resume with that, I just want to ask a few more questions about the issue of manpower shortage.

As a comment, it would seem that given the likely effect of the new guidelines, the problem of the shortage of bus drivers is going to get worse rather than better. Is that a fair comment?

MR PATRICK PANG: (Via interpreter) Yes, I agree, Mr Duncan.

MR PETER DUNCAN: Has the company developed any recent initiatives with regard to how the situation might be improved?

MR ROGER LEE: (Via interpreter) This is a diverse issue. First of all, something must be done on recruitment, and the company also needs to promote staff morale. In terms of the recruitment of bus captains, something must

be done by way of remuneration. Our chairman mentioned some measures this Tuesday, and in terms of recruitment, in different districts and different types of roles, we hope to do something.

These days, not many staff are prepared to stay in the job for a very long time, unlike in the past, so we suggest recruiting different types of people to our company. In terms of promoting a sense of belonging for staff, we have also done a lot. We would enhance depot facilities. We are providing different services and facilities such as resting areas and hairdressing service. We have also introduced gym rooms and ping-pong tables and at bus termini a lot has been done to enhance comfort for bus captains. So we have done quite a lot.

In terms of lifestyle, we implemented recreation clubs, including football activities. Most bus captains are males, so we want to allow them to take part in various facilities or activities after work; for example, singing events. And at the instruction of the chairman, we also set up a scholarship. This way, we can do something for the children and kids of our bus captains or staff. So hopefully this can help us retain staff and attract new blood in the recruitment of bus captains. The work is certainly not easy. This is

something we would continue in light of the shortage.

MR PATRICK PANG: (Via interpreter) Mr Duncan, our managing director, Mr Lee, talked about our work in terms of staff retention and recruitment. So in terms of software and bus operations, I would like to share what we have done to address the crew shortage.

Mr Lee talked about hardware, including rest kiosks, et cetera, so I won't repeat what he said. Meanwhile, in terms of bus operations, we want to adopt a more people-based approach. This way, we can improve a sense of belonging for our bus captains and boost retention rates. We also took out a number of encouraging measures to facilitate the application of sick leave for bus captains, and we would also streamline our journey times or durations and hopefully we can provide for adequate journey time and resting time.

In terms of application of leave, redeployment, application for rest days, et cetera, by bus captains, we hope to be adopting a people-based approach or people-oriented approach.

And for applications for bus captains on redeployments, leave, et cetera, this is something we will deal with. In April, we conducted a questionnaire, to allow BCs to choose their preferred work arrangements. The need of each BC might be different.

Some might work eight hours while others might want to work ten hours, and we would try our best to accommodate or facilitate their request.

(Chinese words not interpreted) ... like they have been harassed and I have talked about my measures yesterday. We have also stepped up our training for frontline staff. In June, 200 operations officers and instructors at all levels have been trained for two days and altogether eight courses were arranged. During the training, what we were doing was to enhance ways to give support to frontline bus captains when they encountered difficulties.

In addition -- Mr Chairman, well, a number of points here. A bus captain may get involved in a traffic accident. A bus captain may encounter what I said yesterday, incidents of abuse. So we have enhanced the ability of our operations officers and inspectors, so that they can arrive at the scene to help BCs to deal with a traffic accident.

We tried to enhance our frontline capacity to provide appropriate assistance to the bus captains. Our company has also got dedicated people to deal with traffic accident investigation. We have also got the legal department. We have also got the Road Safety Unit from the Hong Kong Police Force to give us talks. It's

a two-hour talk, to talk about road safety.

So in June that was done and I believe that it was well received by our staff members.

So we would like to enhance the frontline management so that we are able to provide assistance to our frontline bus captains. For bus captains, they face a lot of problems on a daily basis, like the traffic is getting more and more congested, the number of vehicles on the road is not in proportion to the sort of road network. More and more vehicles are illegally parked. More and more of them are illegally parked in bus bays or at bus stops. Then, as a result of traffic congestion, as a result of illegal parking, our bus captains find that they have to get a longer journey time, and what is worse is that the journey time is such that bus trips have been lost, and in fact our bus captains are facing huge pressure.

Well, we have got verbal abuses, quarrels and sometimes physical abuses arise from such external factors.

As to illegal parking, especially illegal parking at bus stops -- I hope you would understand that there are wheelchair-bound passengers and buses have to be stopped right at the bus stop before the wheelchair passenger can make use of the specific point along the kerb to

board the bus.

CHAIRMAN: Mr Duncan's question was not an open-ended enquiry into everything you might choose to tell us about what had been done. He was asking what initiatives have been taken.

You have told us about stepped-up training. Is there anything else you want to describe?

MR PATRICK PANG: (Via interpreter) I just want to summarise and say that the bus captains face many difficulties and in fact we are trying to solve the problems one by one, gradually.

As to the question of retention, Mr Chairman, I hope you will understand the pressure on the bus captains has a lot to do with retention and recruitment.

CHAIRMAN: You have told us repeatedly about what the pressures are. The question is what initiatives have been taken. You have probably told us all of the ones that exist.

Mr Lee wants to say something.

MR ROGER LEE: (Via interpreter) Mr Pang was saying that while a bus captain is driving, even if the bus is stationary, say for example caught in traffic congestion, the bus captain suffers from a huge mental stress. Many bus captains have been complaining that it is hard for them to be trapped in a traffic jam, so it

is a difficult job.

Mr Pang is saying that we have been reminding being departments that traffic congestion is serious and the road conditions are bad. We hope that by raising this point, we are able to ease the traffic congestion and we hope that we can improve the road congestion. So such are our initiatives.

CHAIRMAN: Thank you.

Mr Duncan.

MR PETER DUNCAN: To which government departments have those complaints been issued?

MR ROGER LEE: (Via interpreter) You refer to the road conditions?

MR PETER DUNCAN: Yes.

MR ROGER LEE: (Via interpreter) A number of them.

Of course, first of all, the police force. Say, for example, because of illegal parking and also the loading and unloading activities blocking our access to the bus stop and we can't park right at the bus stop and we are not able to get the wheelchair passengers on board. Other passengers also find it difficult to get on board. And you recall the incident in Central on Connaught Road.

CHAIRMAN: I think you are repeating yourself.

MR PETER DUNCAN: So one is the police. What other

department?

MR ROGER LEE: (Via interpreter) The other is the Transport Department.

CHAIRMAN: Anyone else?

MR PATRICK PANG: (Via interpreter) Highways Department as well, because the conditions on the road may not be that satisfactory, and then the FHD, Food and Environmental Hygiene Department --

CHAIRMAN: What conditions? Road surface or ...?

MR PATRICK PANG: (Via interpreter) Uneven road surfaces or obstacles on the road.

CHAIRMAN: Any other departments?

MR PATRICK PANG: (Via interpreter) The Food and Environmental Hygiene Department, FHD. The trees, especially in the rural area, after the rainy season, the branches are blocking or obstructing.

CHAIRMAN: Yes, so the trees need pruning, obstacles on the road, congestion and illegal parking, that's Police and Transport Department. Anybody else?

MR PATRICK PANG: (Via interpreter) I think basically those are the departments. Thank you, Mr Chairman.

CHAIRMAN: What's the overall response been from government? Perhaps Mr Lee can sum this up, shortly, if you can. Satisfactory or not?

MR ROGER LEE: (Via interpreter) Could have been quicker,

faster.

CHAIRMAN: So it has been done, has it, but it could have been done quicker?

MR ROGER LEE: (Via interpreter) Sometimes we have to take our own efforts to do so.

CHAIRMAN: Has the problem of illegal parking at and around bus stops and elsewhere been solved?

MR ROGER LEE: Not all of them, especially at night.

CHAIRMAN: Thank you.

Mr Duncan.

MR PETER DUNCAN: Has the problem of traffic congestion been resolved?

MR ROGER LEE: No.

MR PATRICK PANG: No.

CHAIRMAN: Sorry, what was the answer to that?

MR ROGER LEE: No.

CHAIRMAN: Thank you.

MR PETER DUNCAN: What proportion of the company's bus drivers are women?

MR GODWIN SO: (Via interpreter) 6 per cent, roughly.

MR PETER DUNCAN: Does the company have any initiatives to attract more women to this position?

MR GODWIN SO: (Via interpreter) We do, and we have been studying the matter. In particular, for the Tuen Mun Depot, we have been working harder on it because it is

a mainly residential area. During our recruitment exercise, of course we observe equal opportunities but still we want to attract more female candidates.

We have considered whether we can have facilities to cater for the needs of the females. Say, for example, someone may be a housewife, and if we can have nursery facilities for childcare, if we can set up such a facility within our depot, I believe it will be helpful.

But then, of course, land use is a restriction and we are not able to do that yet.

MR PETER DUNCAN: Have these considerations led yet to any particular initiatives undertaken by the company to attract women?

MR GODWIN SO: (Via interpreter) In addition, as far as the post or the job design is concerned, we have the so-called half-time bus captains. In other words, they work shorter hours or the number of days that they work in the week would be fewer, so as to cater for mothers who have to take care of their children.

MR PETER DUNCAN: Has that resulted in any significant increase in the number of women who are employed?

MR GODWIN SO: (Via interpreter) Yes, it does help with the number of applicants. As I have said, we try as much as possible to provide separate toilet facilities at our

terminus. We will try as much as possible to have different toilets for different sexes.

MR PETER DUNCAN: I want to ask that a slide be brought up on the screen now which summarises the profits of KMB and Long Win Bus in recent years, I think for the years 2011 to 2017. This has been gleaned from the reports in the bundles. So if I could just explain this chart, the top heading is "Profit for the years of 2011 to 2017 for [Kowloon Motor Bus]", and the references you will see across the top are all from the bundle KMB-6.

And the profits after taxation are shown across from the year 2011 up until the year 2017.

We can see from this chart that losses were made in the years 2012 and 2013. Do you see those losses recorded as 51 million and 21 million respectively?

MR ROGER LEE: Yes.

MR GODWIN SO: Yes.

MR PETER DUNCAN: It would be fair to say that since 2013, the profits of the company have increased quite steadily; is that a fair comment?

MR ROGER LEE: Not fair comment.

DR NORMAN LEUNG: I agree, but there is a reason for that. Mr Duncan, perhaps I can explain better the financial position of the company by referring to KMB & Long Win-1 submissions, page 93, if I may have that, please.

Yes, Chairman. May I say that we have been, and still are, labouring under very difficult position to operate a franchised bus business. If I may refer to this table, yes, Mr Duncan, you rightly pointed out that in 2012 we made a loss of $51 million, and in 2013 we made a loss of $21 million.

But when you say that, we had been making steady profit from 2014 to 2017.

May I please point out one thing. Please look at the profit of 2016. We made a profit of $618 million. But if you look -- if I may draw your attention to the fuel costs. In 2012, the fuel cost was $1.46 billion. In the year 2013, the fuel cost was $1.4 billion. Then it comes down to $1.2 billion in 2014, thereby giving us a profit of $197 million.

If you look closely at the profit of 2016, we made a profit of $618 million, but if you look at our savings of the fuel costs, in that year we spent only $624 million on fuel costs.

So it tells us that while in 2016 there was a marginal increase of our revenue, our profit was not resulted from the rise in revenue but rather because of the savings from the fuel costs.

The same applies to the year 2017. The amount of profit equals to the amount of fuel costs we saved.

That is important to note.

More importantly, I would like to point out that in last year, 2017, our staff costs amounted to $3.6 billion, and this equals to roughly 60 per cent of the total operating expenses. These staffing costs will continue to rise from year to year because of the annual pay increase exercise. So you will see that, in the case of fuel costs, we have completely no control whatsoever over such expenditure. So that's why I would like to bring out to the attention of the committee that I have been doing my level best to promote the wellbeing of our staff. They are very important assets of the company. We are here to serve people; we have to keep them.

I would say that within my level best -- I will do my level best to improve the wellbeing of our staff and to care for their wellbeing, so hopefully we can recruit new bus captains and to keep our serving bus captains in the company. But on that point, I have to say that I am painfully aware of the fact that we have been running short of bus captains for a number of years, but we have got to look at the larger issue, the market situation in Hong Kong. But right now the unemployment rate of Hong Kong is 2.8 per cent. This is virtually full employment in Hong Kong. But there is nothing -- well,

you know, we talked about imported labour -- there is not too much we can do about it. But what I have been trying to do, at least I have a strategy, to improve the remuneration of our bus captains, in the hope that other commercial drivers will come over to join our company, and basically a movement of drivers from other transport sector to KMB and Long Win. That's my strategy for attracting bus captains.

I appreciate and fully recognise that it is difficult to get new bloods, new recruits, into bus captains, as explained by the management, because of the working conditions, the abuse of our bus captains by passengers, et cetera.

But I will continue to look after -- you have my assurance that I will continue to do my level best to promote the wellbeing of our staff, in the hope that the bus captain shortage problem can be addressed.

Thank you, Mr Duncan.

MR PETER DUNCAN: Thank you, Dr Leung.

If I could just pick up one of the matters you mentioned. You said a few moments ago that you have a strategy to improve the remuneration of the bus drivers. Are you able to disclose what that strategy is?

DR NORMAN LEUNG: Basically, we are talking about the

remuneration of the bus captains. I did that, you know, at the board meeting of December last year, to incorporate the bonuses into the basic salary, and I told you at the Tuesday hearing that there will be further upgrades -- I will be expanding the grades of the monthly bus captains, and also to expand their annual increment from eight to twenty; I told that at the hearing.

But basically money, I'm talking about money, and the working conditions of our bus captains. No efforts will be spared in attracting, if I may say so, new bloods to our staff force, I would say that.

MR PETER DUNCAN: We will come to the starting salary of new recruits later today, but in the light of what you have told us about price of fuel and so forth, what scope is there to increase the basic remuneration of your bus captains, in order to attract more people to this position?

DR NORMAN LEUNG: Apart from -- well, let's say we want to recruit a new bus captain. After the implementation of all the initiatives that I mentioned, plus the annual increment of pay in 2018 being implemented later in the year, subject to agreement of the trade unions, I work out that a new bus captain would be earning about $23,000 per month, roughly, for 10 hours of working.

Working on a 10 hours basis, it would be about 23,000.

MR PETER DUNCAN: That's 10 hours a day, six days a week?

DR NORMAN LEUNG: Yes, six-day week, and as I say, in the hope that perhaps some commercial drivers may consider to join our company as well as new bloods might consider joining our company.

MR PETER DUNCAN: Has the company developed any particular initiatives to attract young people to the position? We saw the statistics yesterday and saw that the number of young people is much less than the number of middle-aged people.

MR ROGER LEE: (Via interpreter) Yes, we did. I will talk about our HR initiatives. In terms of male bus captains, and as Mr Leung said, the labour productivity is limited, so in terms of remuneration -- well, many staff, including frontline staff, would not only consider salary; they would consider the working conditions, and we have enhanced the arrangement of family cards for staff, and family members of our staff can take the bus for free, and we are creating an ideal environment. As I said, the proportion of female drivers is 5 to 6 per cent, whereas in Hong Kong the proportion of males and females are comparable.

In terms of what we will do, perhaps I will defer to Mr So.

MR GODWIN SO: (Via interpreter) We strive to hire young drivers.

MR PETER DUNCAN: I am particularly interested in the young people.

DR NORMAN LEUNG: Young people.

MR GODWIN SO: (Via interpreter) Yes. In terms of recruitment channels, apart from the traditional medium of newspapers, we have been using social media in order to reach out to the younger generation.

And in terms of benefits, there is something we can do. As we said, we have recreation clubs which might be appealing to younger people. We have sports activities such as soccer, basketball, badminton, or singing activities. As Mr Pang said, in terms of rostering, we would try to cater for the young people and their lifestyle, and at depots we have introduced recreation facilities to appeal to young people.

And in terms of shuttle service to depots, we have expanded our service so that people who live far would not be discouraged from joining the company. In terms of promotion, we have been proactive and in the past half a year we have organised multiple open days and recruitment days, and we have sent outreach teams to our depots in order to reach out to younger prospects.

So this is what we have been doing.

MR PETER DUNCAN: Have you noticed any improvement in regard to young people?

MR ROGER LEE: (Via interpreter) KMB has four depots and when we open our depots, apart from -- well, we encourage young people to bring their family members to visit the depots so that the family members of our captains can understand the working environment, and this is rather appealing.

MR PATRICK PANG: (Via interpreter) Mr Duncan, I have something to add to what Mr So said.

MR PETER DUNCAN: I am only interested in whether these initiatives have actually resulted in any improvement. Or is it too early to say?

MR PATRICK PANG: (Via interpreter) I can only say that we are gradually achieving improvements. We do not want our young captains to feel that they become captains only because they are at a dead end or they have no choice. In the last nine months, some captains have been promoted to inspectors or operations officers. We hope to motivate young people to join the bus trade. This is something we want to do.

Thank you, Mr Duncan.

MR ROGER LEE: (Via interpreter) In the past, captains were seldom promoted to inspectors or to clerical grades, but this is something we are trying to do.

DR NORMAN LEUNG: Basically we are saying that we have accelerated promotion policy for the talented young men.

MR PETER DUNCAN: Thank you.

Is there a minimum age before you will engage a bus captain?

MR GODWIN SO: (Via interpreter) Can you repeat the question, please?

MR PETER DUNCAN: Yes. Is there a minimum age which applies to persons who can join your company as a bus captain? Do they have to be 20 or 25 or 30?

MR GODWIN SO: (Via interpreter) So long as the applicant holds a private vehicle licence for three years, they will be considered.

MR PETER DUNCAN: Thank you.

Dr Leung, you touched, in one of your answers a few moments ago, on the matter of fare increases.

When was the last fare increase approved by the Administration?

MR GODWIN SO: (Via interpreter) 2014.

MR PETER DUNCAN: The committee has heard of the mechanism by which fare increases are considered. Has the company applied for any fare increase since 2014?

DR NORMAN LEUNG: No, we have not. Again, to explain our position better, may I please refer to page 95 of this same file.

CHAIRMAN: Yes. Thank you.

DR NORMAN LEUNG: We have to apply for fare increase in accordance with the formula as set out in paragraph 33(vi). There is a formula stated there: 0.5 times increase in wage index plus 0.5 times increase in Consumer Price Index minus 0.5 times productivity gain.

If the result of this formula equals to or exceeds 2 per cent, then we can apply to the government for a fare increase. That's the trigger point for it. But as in the last two years, because our profit -- also, there was another cap -- if our profit reaches the level of 9.7 per cent of our net asset value --

DR JOHN CHAN: Net average fixed assets.

DR NORMAN LEUNG: -- net average fixed assets, we can't apply for any increase. This is the case for 2016 and 2017, so we couldn't apply for any increase, according to this formula.

So unlike our big brother, MTRC, they have a formula, but the increase is automatic; they don't have to apply for it. But in our case, we have to make an application for fare increase, and more often than not we never get the rate of increase that we apply for. That's the situation.

MR PETER DUNCAN: Thank you.

The obvious question, Dr Leung, is this: are you

content with the current formula?

DR NORMAN LEUNG: Sorry?

MR PETER DUNCAN: Are you happy with regard to the current formula?

DR NORMAN LEUNG: Of course not. Why would I be happy? Of course not. Mr Duncan, how can I be happy with such a formula?

MR PETER DUNCAN: Do you have any particular suggestions as to what formula should be applied?

DR NORMAN LEUNG: I think we have been talking to the Transport Bureau for a number of years, and so far we have achieved nothing. We just have to keep on talking with them, to convince them that it is time for a revision of the formula.

MR ROGER LEE: (Via interpreter) The biggest problem with this formula is it is looking at what happened in the past, and then on that basis you apply for a fare adjustment. We talked about the staff costs as well as the fuel costs, and they are about the future costs. Say, for example, recently, the fuel prices have gone up. In the past year or two, prices have come down. So it's a matter of the time-lag and we are not able to reflect the situation.

DR NORMAN LEUNG: Mr Chairman, I missed out one important issue. The oil price is not included in this formula.

We know how much we spend on gas, but this is not included in the formula. A very significant cost factor of our operation is excluded from this formula.

CHAIRMAN: Fuel is not a part of Consumer Price Index?

DR JOHN CHAN: No.

MR PETER DUNCAN: Could you have in front of you, Dr Leung, the file THB-2, and in particular page 23.

Perhaps if I go back to the commencement of the document. It's actually at page 1. It is a document issued by the Transport and Housing Bureau and it's called, "Public Transport Strategy Study", dated June 2017.

Are you familiar with the fact that this report exists?

DR NORMAN LEUNG: Yes.

MR PETER DUNCAN: Could you go, please, to page 23 of the bundle.

DR NORMAN LEUNG: Yes.

MR PETER DUNCAN: Do you see a heading on that page, "(d) Fare adjustment arrangement"? Do you see that?

DR NORMAN LEUNG: Yes.

MR PETER DUNCAN: And in paragraph 4.25, you will see the formula which you have included in your submission at page 95. Do you see that?

DR NORMAN LEUNG: Yes.

MR PETER DUNCAN: If I can take you over the page to page 24, and bring your attention to paragraph 4.28:

"The aforesaid existing arrangement was put in place in 2006 after consultation with the LegCo. The arrangement was subsequently fine-tuned having regard to the outcome of the review in 2009."

Then at 4.29:

"In this regard, the government has conducted a review of the FAA. The initial findings indicate that the arrangement should be kept intact, while the data could be updated on two fronts".

Then you can see those fronts there described, "(a) Productivity gain value" and then the "Passenger reward arrangement". I think you will see in the "Passenger reward arrangement" reference to the 9.7 per cent, which I think you have touched on during the course of your evidence this morning.

DR NORMAN LEUNG: Yes, the annual fixed assets, that's right.

MR PETER DUNCAN: Yes.

Then at 4.30 we have this statement:

"The government has initiated discussion with the franchised bus companies on the initial review outcome and the details of the above two data updates. We will announce the discussion outcome and expect to implement

them in the first half of 2018 upon approval by the Chief Executive-in-Council."

Have you heard anything from the government on this matter?

DR NORMAN LEUNG: Not on -- basically, I have been talking -- I have had discussion with the government, you know, on the passenger reward arrangement, and we haven't come to --

MR GODWIN SO: (Via interpreter) May I supplement?

DR NORMAN LEUNG: No, no, no. Let me finish first.

I have been, you know, talking to the government. I have had discussion with the government on this, on the passenger reward arrangement, and no definitive agreement has been reached between us.

MR PETER DUNCAN: There is reference to the fact that this matter was going to be considered by the Executive Council, and then an implementation in the first half of 2018.

Have you had any news in that respect?

DR NORMAN LEUNG: No, no implementation as of today.

MR PETER DUNCAN: If the recommendation which is described at the top of page 25 is accepted, will that ease your concerns with regard to the fare adjustment arrangement?

DR JOHN CHAN: Mr Duncan, we, as of today, have not been told of the outcome of the review and of any submission

to Executive Council. This has not happened.

If you look at what this says here, if we may go to the next page. Yes, the sentence at the end of paragraph 4.29, it says:

"The consultant recommended that the triggering threshold of 9.7 per cent should be adjusted downwards slightly ...", et cetera.

Just looking at that figure --

CHAIRMAN: Sorry, where are you reading from?

DR NORMAN LEUNG: 25.

DR JOHN CHAN: 25, I think, paragraph 4.29 of the document.

CHAIRMAN: Yes, I have it, thank you.

DR JOHN CHAN: If the triggering threshold of 9.7 is reduced, purely from a financial point of view that is bad news for KMB.

MR PETER DUNCAN: So, as matters stand, from the perspective of KMB, it does not appear that there is any imminent likelihood of an improvement in the fare adjustment process? Is that a fair summary of the situation?

DR JOHN CHAN: That's right.

MR PETER DUNCAN: So the comment that Dr Leung had with regard to being the younger brother of the MTRC would remain; is that fair?

DR NORMAN LEUNG: We are the poor little cousin!

MR PETER DUNCAN: Right. I now wish to return to training.

MEMBER LO: I just have a question on the cost structure. You mentioned that the fuel cost is a big part of the variation, fluctuation of your business.

DR NORMAN LEUNG: Yes.

MEMBER LO: Have you thought about a scheme to stabilise the variation over time, over the years, maybe with the government?

DR NORMAN LEUNG: The government will leave this matter to KMB and us only, and in fact, at one time, in previous, many -- some years ago, we discussed with the government the possibility of having a surcharge, you know, for our fares, arising from the increase, significant increase, in fuel costs. It came to nothing because the government would not agree to that.

Of course, we have considered all sorts of options for cost-saving in this aspect, but we made a conscious decision not to do any oil hedging. We find that it's not advisable to hedge against oil -- you know, the gas oil price, because we learned the unfortunate experience of Cathay in that aspect. You know, they got a substantial loss as a result of hedging.

So what we have done is to talk -- we have in fact reached an agreement with the oil supplier. That's what we are doing today. Then we have agreed that they will supply gas oil to us, for a number of years, normally

for three years. Then we agree the capped price for the gas oil.

Currently, we have a capped price of US$85 per barrel. That's what we are doing now. If the gas oil price goes up, goes beyond US$85, we are still paying $85. But, on the other hand, if the gas oil price comes down, say comes down to $40, $45, we don't have any floor on the price and we just pay the market price --

MR ROGER LEE: (Chinese words not interpreted).

DR NORMAN LEUNG: Yes, the floor is US$45.

MR ROGER LEE: (Chinese words not interpreted).

DR NORMAN LEUNG: Currently, we don't have such floor.

MR ROGER LEE: (Via interpreter) We do not conduct hedging against oil, because oil costs are a major cost component. We agreed with the oil suppliers that the cap is US$85 per barrel, which is the crude oil cost plus a margin, and we would have a spot rate and we would add a premium on top. Of course I cannot disclose the exact figure. It's meaningless to have a floor price. Coming up, we will have a floor price of about US$45 and we have shifted the risk to the oil suppliers.

And, like the chairman said, we are trying to come up with our own way to protect ourselves against fuel costs. Fuel once made up 20 per cent of our costs, which was significant.

As for the toll charges, they are rather high. Most people do not know that KMB is paying the full toll charges, even for government tunnels.

So these are crucial cost components which we are monitoring.

MR PETER DUNCAN: Back to the question of training, gentlemen. Can I have you, please, at page 145 of KMB-1.

We are looking here at the action plan as of 10 April 2018, which was submitted to the Transport Department on that date, and at paragraph 3 on page 145 through to paragraph 7 on page 147, we see the action plan for training.

If I could pick it up at item 3, the statement is made there -- and this is the point we reached at the end of yesterday's hearing -- that henceforth "all newly recruited bus captain candidates should be subject to the same standard of training".

MR JAMES WONG: (Chinese words not interpreted).

MR PETER DUNCAN: Whether they are full-time or part-time, they will receive the same standard of training; is that correct?

MR JAMES WONG: (Via interpreter) Since that time, we no longer recruited part-time captains, so we applied the same standards to all.

MR PETER DUNCAN: Will there be part-time captains who perform for more than 18 hours a day -- will they be recruited in the future?

MR PATRICK PANG: (Via interpreter) A week?

MR PETER DUNCAN: 18 hours a week, yes.

MR GODWIN SO: (Via interpreter) Yes.

MR PETER DUNCAN: And they will receive the same form of training as any bus captain who is proposing to work on a full-time basis?

MR GODWIN SO: Yes.

MR PETER DUNCAN: Thank you.

Now, we can read for ourselves the contents of the new training programmes, as set out in items 3, 4, 5, 6 and 7.

I just ask, with regard to item 7:

"The number of ... driving instructors should be increased to a total of 110."

And in the action plan, it is stated that the canned:

"The ... candidates would complete all training and necessary exams before 30 June 2018... to form a cadre of 81 [driving instructors]."

Has that been completed?

MR JAMES WONG: (Via interpreter) This is already completed. We have now a cadre of 89 DIs.

MR PETER DUNCAN: I would like now to refer you to another bundle, which is TD-1, at page 403.

You should be looking at a document dated July 2018, issued by the Transport and Housing Bureau and Transport Department, for discussion in the Legislative Council on 25 July. Do you have that paper in front of you?

MR JAMES WONG: (Via Interpreter) Yes, I see that.

MR PETER DUNCAN: Now, in the portion on page 403 with regard to the background, it refers to the setting up of a working group following the accident on 10 February. Do you see that?

MR JAMES WONG: (Via interpreter) Yes, I see that.

MR PETER DUNCAN: And we see that the scope of the work is described in paragraphs (a) and (b)? And was one of the scope of work described as the reviewing of the training arrangements adopted by the franchised bus operators?

MR JAMES WONG: (Via interpreter) Yes, that's described in paragraph (b).

MR PETER DUNCAN: At the bottom of the page, there is a footnote which describes the composition of the working group, to include the five franchised bus operators, together with the bus manufacturers and of course the representatives of the Transport Department itself.

May I ask whether any of the gentlemen present were

members of this working group?

MR GODWIN SO: (Via interpreter) For KMB and LWB, myself, Godwin So, Mr Leung Kin Wang, operations director, and Mr James Wong, the head of the training and quality assurance department, represented our company.

CHAIRMAN: Was there not also a subgroup dealing with technical matters?

MR GODWIN SO: (Via interpreter) Yes.

CHAIRMAN: And what was the KMB representation on the subgroup?

MR LEUNG KIN WANG: (Via interpreter) Technically speaking, myself and another engineer represented the company.

MR JAMES WONG: (Via interpreter) For the relevant training, I attended the meeting.

CHAIRMAN: What was the name of the other engineer who attended the safety device subgroup?

MR LEUNG KIN WANG: Ivan Ho.

CHAIRMAN: And, Mr Wong, were you the only representative on the training group?

MR JAMES WONG: (Via interpreter) Yes, I was the representative. I was the lone representative for the training subgroup.

CHAIRMAN: Thank you.

MR PETER DUNCAN: On page 403 --

CHAIRMAN: Sorry, before we move on, Mr Duncan, would you

explore who the representatives of the Transport Department and the other franchised bus companies were?

MR PETER DUNCAN: Certainly, Chairman.

Who on the working group represented the Transport Department?

MR GODWIN SO: (Via interpreter) In the past, TD was -- the group was chaired by Rachel Kwan, the Assistant Commissioner for Transport, and after she went on retirement leave Macella Lee, the Deputy Commissioner, chaired the group.

MR PETER DUNCAN: Did the Transport Department have other representatives?

MR GODWIN SO: (Via interpreter) Yes, they had plenty. I cannot name each one of them. They had a senior transport officer, et cetera, and they were from a bus and railway unit as well as a road engineering unit, but I cannot remember all the names.

CHAIRMAN: Were minutes not produced of these meetings?

MR GODWIN SO: (Via interpreter) Yes.

CHAIRMAN: Can you provide them to us?

MR GODWIN SO: (Via interpreter) Yes.

CHAIRMAN: Thank you.

MR PETER DUNCAN: I would ask you, please, to turn up one of the other bundles, CTB --

CHAIRMAN: Before we do that, can we pursue the other

franchised bus company representatives, or will they be reflected in the minutes that you are going to provide us?

MR GODWIN SO: (Via interpreter) Yes, their names are present on those minutes.

CHAIRMAN: Thank you.

Yes, Mr Duncan.

MR PETER DUNCAN: Thank you, Chairman.

CTB & NWFB-3, please, at page 588. Do you see a document headed, "Working group on enhancement of safety of franchised buses" dated 13 March?

MR GODWIN SO: Yes.

MR PETER DUNCAN: Is it followed by a document which is described as an annex, and the heading, "Working group on enhancement of safety of franchised buses"?

MR GODWIN SO: Yes.

MR PETER DUNCAN: If you go to page 590, do you see a heading, "Membership"?

MR GODWIN SO: Yes.

MR PETER DUNCAN: Does that assist with regard to those persons from the Transport Department who worked on the working group?

MR GODWIN SO: Yes.

MR PETER DUNCAN: Was it the same people at each meeting?

MR GODWIN SO: Almost.

MR PETER DUNCAN: Right. It would appear that this document does not include the names of any of the bus manufacturer representatives.

MR GODWIN SO: (Via interpreter) For bus manufacturers, they attended the meeting of the technical subgroup. Here, this is about the main meeting; they did not attend.

MR PETER DUNCAN: Thank you.

Did members of the Transport Department attend the subgroup meetings?

MR JAMES WONG: (Via interpreter) Yes, within the subgroup, some of the Transport Department representatives and representatives from franchised bus operators, including myself, hold meetings together.

MR PETER DUNCAN: Who chaired the subgroup?

MR JAMES WONG: (Via interpreter) If I remember correctly, it should be Amy Tse.

MR PETER DUNCAN: From the Transport Department?

MR JAMES WONG: (Via interpreter) Correct. Yes, she is responsible for training.

MR LEUNG KIN WANG: (Via interpreter) For the technical subgroup, a number of them were involved, David Tsang, once, and I think he retired and he was replaced by others, and at the last meeting it was chaired by Assistant Commissioner, a Mr Chan Ying Kit.

MR PETER DUNCAN: I notice on page 403 of TD-1 that the

major bus manufacturers were invited to join the technical meetings. Did they actually attend the technical subgroup meetings?

MR LEUNG KIN WANG: (Via interpreter) Yes, they did.

MR PETER DUNCAN: And which of the bus manufacturers named there -- Alexander Dennis, Volvo, and Regal-MAN -- which of those were represented at the subgroup meetings?

MR LEUNG KIN WANG: (Via interpreter) For Alexander Dennis Ltd, it was represented by Andrew Boulton. Volvo, by Julia ...

(In English) I forgot the first name. And Jacky Chan of Volvo.

MR PETER DUNCAN: Julia for Volvo and Jacky Chan for?

MR LEUNG KIN WANG: Volvo.

MR PETER DUNCAN: Two for Volvo?

MR LEUNG KIN WANG: Two for Volvo.

MR PETER DUNCAN: And what about Regal-MAN?

MR LEUNG KIN WANG: Rex Wong for Regal.

MR PETER DUNCAN: Are these all local representatives of those companies, or are they resident overseas?

MR LEUNG KIN WANG: Local resident engineers.

MR PETER DUNCAN: Thank you.

MR LEUNG KIN WANG: Julia Lu, L-U.

MR PETER DUNCAN: The chairman asked whether minutes of the working group meetings were retained, were kept, and you

indicated yes and you are going to supply those.

Were there minutes of the subgroup meetings kept?

MR LEUNG KIN WANG: The minutes are distributed by the working group chairman and they sent the minutes to us.

MR PETER DUNCAN: Do they include the minutes of the subgroup as well as the main working group?

MR LEUNG KIN WANG: Different meeting minutes, yes.

MR PETER DUNCAN: When you provide the minutes, could you provide the minutes not just of the working group but also of the subgroup?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: Thank you.

CHAIRMAN: Mr Duncan, if the hiatus suggests that you have in mind a break, that is certainly welcome.

We will take a 20-minute break, gentlemen. Thank you.

(11.36 am)

(A short adjournment)

(11.58 am)

CHAIRMAN: Yes, Mr Duncan.

MR PETER DUNCAN: Thank you, Mr Chairman.

We were at page 403 of TD-1, the paper which briefed members of the Legislative Council on the recommended measures to further enhance safety of franchised buses.

Could I ask this question. As the first sentence of

the document indicates, these are recommended measures. Does the company regard itself as being bound by these measures, or is the company going to regard these measures as recommendations only, as is stated in the paper?

MR GODWIN SO: (Via interpreter) On page 413, which is annex A, there would be a target time frame for each recommendation, and this is for the trade's consideration. So these are technical bus features.

In terms of the training of bus captains, there are practice notes which the trade has to comply with, and in the last paragraph of the practice note there is a requirement for a monitoring and audit system to be in place for each company, and they must ensure that the practice note is complied with and the matter must be reported to the board.

MR PETER DUNCAN: So with regard to the technical matters, do I understand your answer to mean that you go through the trials and then make a determination as to what can be implemented?

MR ROGER LEE: (Via interpreter) As far as engineering is concerned, a lot is ongoing. They are recommendations but from the perspective of the company, we will certainly try our best to enforce them vigorously.

MR PETER DUNCAN: Without going into the detail of the

document yet, it is apparent from this document that if many of the recommendations are adopted, this will have quite an impact on the way in which bus captains are trained and also on how bus captains carry out their duties. Do you agree with that?

MR GODWIN SO: Yes.

MR PETER DUNCAN: We notice that neither the unions nor the bus captains were represented on the working group. What consultation has taken place with the bus captains and/or the trade unions during the period that this working group has operated?

MR GODWIN SO: (Via interpreter) Allow me to elaborate on this. For this working group, the Transport Department hasn't invited any trade unions. When the discussion reached the third meeting, as you know, then we got the guidelines for the training of bus captains. It was suggested that individual operators, according to our needs, should consult the trade unions.

Now, for our company, that is KMB and LWB, read the guidelines. In fact, it is a matter of setting out all the practices among all the bus operators, and then the TD grouped them together and produced the practice note. For this practice note, our company is able to meet all the requirements, and in fact this is what we have been doing, and what we are doing. Therefore, we haven't

consulted our trade unions or our staff members again. This is because they are already in place. Nothing new there, as far as KMB is concerned.

MR PETER DUNCAN: What about the technology devices which have been recommended; what consultation, if any, has taken place with the trade unions with regard to those matters?

MR GODWIN SO: (Via interpreter) Again, as I have said, they would defer to the bus companies to carry out the consultation. We have to look at the broad suggestions made. First of all, for newly acquired buses, there should be seat belts. As of today, 44 of our buses in the fleet are fitted with seat belts for all, and bus captains have had the experience of driving such buses. So it isn't something new.

Then, as to the second recommendation, it is said that we should have real-time speeding alerts. Well, two days ago, you know that we do have the real-time alerts. We have got it already.

The TD is saying other than the 70km per hour, we should also cover 50km per hour. I have covered that so I don't want to repeat.

Then there should be another feature to alert bus captains who are sort of falling asleep. We have got four buses on a pilot basis. It is merely a matter of

reminding them. There won't be a record and we are not going to resort to disciplinary actions. We want to ask bus captains to try them and then they can tell us whether such a device would be helpful to them.

Therefore, as far as the bus features are concerned, the first one I have covered, we have the seat belt; second, the drowsiness alert, we have got four on trial to get views from the bus captains; and then the other one, we have also got it in our company as well.

MR PETER DUNCAN: Thank you.

You have mentioned the practice note, and I wonder if we could turn the practice note up. I believe it would be at 470.

CHAIRMAN: This was provided on 9 August; am I correct?

MR PETER DUNCAN: Yes. If you look at page 463 of the bundle, you will see a letter from the Transport Department of 9 August, which was in response to a letter from the committee of 23 July.

You will see at page 471 to 473 a practice note which bears the date August of 2018. Do you see that?

So if you look at the practice note --

CHAIRMAN: Sorry, which page is this, the practice note?

MR PETER DUNCAN: 471.

CHAIRMAN: Thank you. But we were told, were we not, by a submission of the Transport Department, that this had

been promulgated in July?

MR PETER DUNCAN: Indeed, that was the position, Mr Chairman.

If you go to page 427, please.

CHAIRMAN: That gives us the date.

MR PETER DUNCAN: Yes. There is a letter from the Transport Department dated 20 July, which provides an attachment, and then you will see the attachment running from page 428, and at page 435 there is reference, in the first complete box, to the fact that the TD had recently issued a practice note to franchised bus operators in respect of the training for bus captains, et cetera.

What date did the Transport Department issue the practice note to Kowloon Motor Bus?

MR GODWIN SO: (Via interpreter) 6 August.

(In English) Through a fax.

MR PETER DUNCAN: Had you received any practice note from the Transport Department prior to 6 August?

MR GODWIN SO: Yes.

(Via interpreter) Well, for the practice note, it's an output from the working group. On 25 July, they went to the Transport Panel of LegCo, but they didn't have that paper, as you can see. Then, on 6 August, we received a fax, telling us that it would be formally launched and we were expected to implement it.

MR PETER DUNCAN: Yes. My question is whether before 6 August the Transport Department had issued a practice note to Kowloon Motor Bus.

MR LEUNG KIN WANG: Not a formal one.

CHAIRMAN: Were you issued an informal one?

MR GODWIN SO: (Via interpreter) Please ask the question again; I don't quite grasp the question.

CHAIRMAN: Well, the Transport Department are telling the committee in a written submission that they have recently issued a practice note to the franchised bus operators and they told us that on 20 July, and then, when they provide us with a practice note, it is dated August, and you tell us that you've got one that's dated 6 August. Were you given any earlier version of the practice note, one that is consistent with what the Transport Department are telling us?

MR GODWIN SO: (Via interpreter) I can provide what I have received, so we have attachments to a discussion paper for meetings before that.

CHAIRMAN: What was the date that you received that practice note?

MR GODWIN SO: (Via interpreter) 6 August.

CHAIRMAN: Nothing prior to that, in any form?

MR GODWIN SO: (Via interpreter) Yes, there's an attachment to a discussion paper of the working group's meeting.

CHAIRMAN: And what's the date of that document?

MR GODWIN SO: Mid or early July.

(Via interpreter) I can't recall the exact date.

CHAIRMAN: Do you have a copy of the document?

MR GODWIN SO: (Via interpreter) Yes.

CHAIRMAN: Can you provide it to the committee?

MR GODWIN SO: (Via interpreter) Yes.

CHAIRMAN: Thank you.

Mr Duncan.

MR PETER DUNCAN: Thank you, Chairman.

Let's have a look at the practice note itself. TD-1/470. We will be able to read for ourselves the general content of the document, but one matter I would like to bring to your attention, please, is paragraph 4 on page 471, and the minimum requirement.

The working group, with regard to the induction course, has suggested a certain period of time for classroom training and then a certain period of time for behind-the-wheel road training, and the working group has drawn a distinction between full-time and part-time drivers.

What is the intent of the Kowloon Motor Bus Company in the light of the earlier evidence on the action plan that it's your intention in the future to treat all bus drivers in the same way whether they be full-time or

whether they be part-time?

MR JAMES WONG: (Via interpreter) When this item was discussed, the other FB operators were also present. As far as training is concerned, different companies have different arrangements and needs. Therefore, in the light of the different circumstances of different operators, the TD came up with the minimum requirement. So you can see that the topic is called "minimum requirement". In other words, for some companies, they would still be engaging part-time bus captains, and I clearly stated that for KMB, we have stopped recruiting part-time bus captains, but then the TD has to take into account the other operators when they drew up the guidelines. That's why they have included this point about part-time bus captains, but it doesn't apply to KMB.

MR PETER DUNCAN: Does the company envisage any changes in its training programme, as set out in the action plan and in the other documentation provided to the committee, as a result of this practice note?

MR JAMES WONG: (Via interpreter) No, no need to change or revise. This is because we have made our suggestions and the TD came up with this in the light of our submission.

MR PETER DUNCAN: Thank you.

I would like to leave training now and turn to another matter.

Could you in this respect, please, turn up KMB-1 at page 129.

The original documentation here is at page 128 to 129, and I'm working off the translation at 129-1.

This is a document headed, "Declaration". What is the purpose and what is the use of this document?

MR GODWIN SO: (Via interpreter) In February or March, the company set up an investigation committee in the aftermath of the Tai Po accident, and the idea was that we had to know more about our employees, in a process known as "know our employees", and we wanted to find out whether their other employments outside might affect their work and whether our employees have significant medical history which might affect their work, and also whether they have been convicted of dangerous driving in the past and also criminal conviction records.

And during recruitment, we would look at the information submitted by the applicants when considering whether they would be hired.

MR PETER DUNCAN: So, prior to the Tai Po accident, was there any form such as this required to be set out when a potential bus driver joined the company?

MR GODWIN SO: (Via interpreter) It wasn't that detailed but

there was still similar work. For example, in terms of dangerous driving, we would ask them to give their records. For medical history, no declaration was needed, but there would be a medical check upon induction.

MR PETER DUNCAN: Did the form enter into the position of what other employment a person was undertaking, the old form?

MR GODWIN SO: (Via interpreter) No, not before.

MR PETER DUNCAN: Do you happen to still have a copy of the old form which was in use?

MR GODWIN SO: (Via interpreter) Yes, we can provide that.

CHAIRMAN: Please do.

MR PETER DUNCAN: Who was required to fill out this declaration?

MR GODWIN SO: (Via interpreter) The applicant for the post concerned.

MR PETER DUNCAN: So this form is signed upon the applicant being engaged in employment; is that correct?

MR GODWIN SO: Yes.

MR PETER DUNCAN: On an ongoing basis, what checks does the company undertake to understand what an employee might be doing outside his working hours, both part-time employees and full-time employees?

MR GODWIN SO: (Via interpreter) We rely on the candidates

to make their own declarations in good faith and they would provide the information.

MR PETER DUNCAN: So there's a check when a person commences his employment. What, say, he's been working with the company for five years or so: is there any ongoing declaration such as this, or any other measure to understand what, for example, a part-time driver might be doing in other forms of employment?

MR GODWIN SO: (Via interpreter) Internally, we have a staff handbook, and there is a requirement that if a staff member engages in part-time work outside, it must be declared.

MR PETER DUNCAN: So it depends solely on what an employee would choose to tell you; is that the situation?

MR GODWIN SO: (Via interpreter) Our staff are obliged. The rules are there in the staff handbook and they must be complied with.

MR PETER DUNCAN: What measures are taken to audit and enforce the rules which are in the handbook in this respect?

MR GODWIN SO: (Via interpreter) If the rules are not followed, and if we find that a staff member engages in work outside, there would be sanctions, and in the past there were cases in which bus captains were dismissed for this reason.

CHAIRMAN: Is there any checking mechanism, due diligence, as it were?

MR GODWIN SO: (Via interpreter) No.

CHAIRMAN: Thank you.

MR PETER DUNCAN: Do you have any initiatives to change this situation whereby the company undertakes some sort of checking system as to what other employment activities an employee may be involved in?

MR GODWIN SO: (Chinese words not interpreted).

MR PETER DUNCAN: We requested yesterday --

CHAIRMAN: We didn't get a translation of the answer.

MR GODWIN SO: Yes, we will consider, actively consider.

CHAIRMAN: Thank you.

MR PETER DUNCAN: We did not receive last evening -- this is by way of a reminder -- a copy of any employment contract. Is that still to come?

MR GODWIN SO: (Via interpreter) Yes, we will provide that.

MR PETER DUNCAN: I want to ask you to turn now, please, to page 109.

CHAIRMAN: Before you do that -- are you moving away from this topic?

MR PETER DUNCAN: Yes, I am.

CHAIRMAN: You mentioned the staff handbook, and certainly I've seen the provision you're talking about. Do you happen to know the reference for it in our bundles, or

Mr Duncan, do you happen to know, just so we can have a quick look at it?

MR GODWIN SO: (Via interpreter) If I can find that, I would provide the page number.

MR PETER DUNCAN: I've got the annex number but not the page number. It's annex 1a-iii-7, I think. Sorry, that would be the outdoor operations staff handbook; is that it?

MR GODWIN SO: (Via interpreter) In bundle KMB-8, page 3072, point 1.

(In English) In English version, 3042.

CHAIRMAN: Yes, thank you.

This of course refers to full-time employees, does it not?

MR GODWIN SO: Yes.

CHAIRMAN: So is there a provision that applies to part-time employees?

MR GODWIN SO: (Via interpreter) As we said, our bus captains who work 18 hours a week for four continuous weeks would be considered full-time employees. That's why they have to follow the requirement under 1.8.

CHAIRMAN: But prior to the Tai Po accident, when you were recruiting part-time captains, was there a requirement that they declare their employment elsewhere, if they engaged in that after they had first been employed?

MR GODWIN SO: (Via interpreter) No.

CHAIRMAN: Thank you.

MR PETER DUNCAN: What about the former employees who are now allowed to work between 10 hours and 18 hours? Are they regarded as full-time employees or are they part-time employees?

MR GODWIN SO: Full-time.

MR PETER DUNCAN: So would they be aware of this, if they read this provision? Full-time employees, et cetera, et cetera, would they regard themselves as full-time employees if they read this handbook?

MR GODWIN SO: (Via interpreter) They were once our employees, after they retired they were re-engaged, and therefore they were aware of the provision 1.8.

MR PETER DUNCAN: Do you have any intention to amend 1.8 to reflect these new employment arrangements?

MR GODWIN SO: (Via interpreter) Yes.

MR PETER DUNCAN: If I could take you back, please, to KMB-1 at page 109. We have here considerable detail with regard to the remuneration of bus captains, and the first thing I would bring to your attention with regard to the monthly rates is the distinction between those employed before 2004 and those employed after 2004.

Could you just amplify why there is this distinction?

MR GODWIN SO: (Via interpreter) First of all, some history. In 2003, Hong Kong's economy took a hit because of SARS, and in 2003 the company did not recruit new bus captains and the bus operations declined that year. After 2004, we started hiring bus captains again. Based on the market pay level at that time, we adjusted the remuneration of new bus captains to reflect market changes.

So, for monthly-rated captains, there were two types. The first type, BCs employed before 2004, their remuneration would not change, but for those employed after 2004, based on the job market and economic environment, we paid remuneration based on market prices. So there are two types of BCs.

MR PETER DUNCAN: Thank you.

If we move down to item (E), the split shift duty allowance, does this reflect an allowance paid in respect of the split shifts which are now provided for in the 2018 guidelines?

MR GODWIN SO: (Via interpreter) If you pause here, the 2018 guidelines are to be implemented in the first quarter of 2019. Currently, we are following the government guidelines talking about 14 hours a day, out of which 11 hours for driving duties; in other words, three hours for rest. Currently, we have got colleagues on split

duties. When somebody is assigned split duties, he will be drawing an allowance measuring $1,950-plus. In between, he has three hours' rest, and we cover that period by using this allowance.

CHAIRMAN: So currently you are following the 2010 guidelines?

MR GODWIN SO: (Via interpreter) Correct.

CHAIRMAN: Thank you.

MR PETER DUNCAN: Do you envisage having split shift duties once the new guidelines are implemented?

MR GODWIN SO: (Via interpreter) We will consider as to how it will be revised. Since there will be the need to consult the staff -- well, we will certainly consider, but it is difficult to tell how it would be revised. Yes, there will be.

MR PETER DUNCAN: There will be some split shifts?

MR GODWIN SO: (Via interpreter) Yes.

MR PETER DUNCAN: And will that allowance be the same or will that change?

MR GODWIN SO: (Via interpreter) We will consider enhancement.

MR PETER DUNCAN: How is that calculated -- when you say $1,951.50 a month, a driver would not be on a split shift for a whole month, would he?

MR GODWIN SO: (Via interpreter) No, because in the case of

a monthly-rated BC, and if he is on a split shift duty, he will be on such a duty for the whole month.

MR PETER DUNCAN: So how many days in a month would you expect a driver to work? Say, would it be 27 days out of 30 or 31?

MR GODWIN SO: (Via interpreter) A rest day for every six days. So assuming that we haven't got a public holiday, then for a 30-day month he has to work 26 days.

MR PETER DUNCAN: And that would entitle him to $1,951.50 in addition?

MR GODWIN SO: Yes.

MR PETER DUNCAN: Right. Would you have drivers who work split shifts for less than the whole month, say for five days or for ten days?

MR GODWIN SO: (Via interpreter) It's possible.

MR PETER DUNCAN: So what sort of allowance would they receive? Do they get the whole 1,951 or is there a proportion?

MR GODWIN SO: Proportion.

MR PETER DUNCAN: Is that based on a daily proportion or what? How is that calculated?

MR GODWIN SO: (Via interpreter) Depending on the number of days worked for that month and then for how many days he has been doing split shift duty and then that would be multiplied by the figure of 1,950-plus, and then that's

the amount of his split shift duty allowance.

MR PETER DUNCAN: So approximately how much per day does that amount to, approximately?

MR GODWIN SO: (Via interpreter) Roughly $70.

MR PETER DUNCAN: If we go over to page 111, we can see at table 3 the daily-rated salary provisions, and we see the split shift duty allowance here at item (H). That is a sum of $21.90, and I notice at (H) it's provided for on an hourly basis. So if a person is on a split shift for one hour, presumably he gets paid an extra $21.90; if he is on a split shift where he has a rest time of three hours, presumably he gets $60. Is that the way it's calculated?

MR GODWIN SO: Yes.

MR PETER DUNCAN: So there is a difference in the treatment between the monthly-rated and the daily-rated bus drivers with regard to the split shift duty allowance; is that correct?

MR GODWIN SO: (Via interpreter) You have to take a holistic view. You can't just look at the split shift duty allowance. For daily-rated BCs, they have a higher basic salary. So it is right to say that there is a difference, but then you have to look at the whole picture.

MR PETER DUNCAN: In the event that the company utilises the

new guidelines and engages in split shift duties, will this allowance also be reviewed, will this be a matter of review?

MR GODWIN SO: Yes.

MR PETER DUNCAN: I wonder if we could turn up the new guidelines, please. We find these in KMB-2 at page 61.

And in fact the previous guidelines, those currently in force, are happily on the previous page, at page 60. You can see the two together.

Currently, what is a typical shift as opposed to a split shift, currently?

MR PATRICK PANG: (Via interpreter) If I may talk about it briefly. There are usually two types of shifts: first of all, what we call the straight duty or the straight shift. So maybe you work for eight hours or ten hours, or it could be 12 hours. So I'm talking about the working hours.

Then we have about 23 per cent of our BCs who are on special duties, so the split duty that Mr Duncan referred to, the working hours would not exceed 14.

MR PETER DUNCAN: So with regard to the new guidelines, are you able to indicate to the committee whether there is likely to be any material change to what you have just described?

MR PATRICK PANG: (Via interpreter) Under the new

guidelines, for straight duties, the working hours will not exceed 12, out of which the driving hours should not exceed 10 hours. There isn't any obvious difference.

But then for the split duties, I think relatively speaking the difference is greater. This is because, according to the Transport Department's guidelines, for the special duty, that is the split duty, the working hours should still be no more than 14 hours. But then, for the driving hours, the driving hours must not exceed 10 hours.

So, when compared with the current guidelines, for the current guidelines, not exceeding 11; under the revised guidelines, the driving hours would be one hour short.

Then there is another feature. Under the new guidelines, for the split duty BCs, the bus captains must have a rest break of no less than three hours and on a continuous basis.

So that's the main difference.

MR PETER DUNCAN: What are the dynamics? Are there persons who want to work the split shifts as they are at the moment, in order to earn more money, or is it a situation where the company has to order drivers to work those split shifts?

MR PATRICK PANG: (Via interpreter) For our company, we

would never force any colleagues to take up any special or split shift duties. All bus captains who are on such split shift duties do so on a voluntary basis.

MR ROGER LEE: (Via interpreter) If I may add a point. The dynamics are such that as far as KMB is concerned, we cover a large catchment area. During the morning peak hours, by 6 or 7 am in the morning, it is already the start of the morning peak and the demand is huge, and then the peak will come up again at about 6, 7 or 8. So it's like two humps for the peak periods. Someone may live in Tuen Mun. After the morning peak period, the bus captain can go home and then come back for the evening duties. So there is this geographical factor.

So some of them are like that, and that's the minority, and they do have such a need.

MR PATRICK PANG: (Via interpreter) All in all speaking, for BCs on split shift duties, as Mr Lee has pointed out, we need to cover the morning peak as well as the evening peak.

KMB is in a unique position because we do cover a large area, and we have got four main depots, and we have also got satellite depots. For BCs on split shift duties, well, indeed, they may go home to take a rest in the middle of their shift, for those few hours involved.

MR PETER DUNCAN: Given the remuneration rates that we have

seen, will the new guidelines, if they are adopted, with reduction in the maximum working hours and the requirement for rest times -- will they result in some of your drivers receiving less by way of remuneration?

MR PATRICK PANG: (Via interpreter) To answer your question, if we don't consider the remuneration -- in other words, if the remuneration package is the same, if we simply look at the driving hours -- it may be the case that some BCs may have a reduced take-home pay. But then, as Mr So has said, in fact we are actively considering measures, in particular how we are able to enhance the allowance covering the rest break, so that for BCs, especially those on split shift duties, they have more rest time but more -- they would not be suffering from a reduction in their take-home pay. The management and chairman asked us to consider this.

DR NORMAN LEUNG: Mr Duncan, the board has made a direction to the management to the effect that in respect of the split duty shift drivers, although they would be working 10 hours instead of 11 hours per day, their remuneration should not be less favourable, let me put it that way.

MR PETER DUNCAN: Has that been communicated to the bus captains?

DR NORMAN LEUNG: In fact, this is stated in our action plan for the recommendation, and I think the management has

already talked to the trade unions.

Perhaps Mr Pang can elaborate on that.

MR PATRICK PANG: (Via interpreter) Mr Duncan, I touched base with representatives of staff unions, and the depots also convey such messages to the bus captains, that our management would actively look to optimise the remuneration package so that even with the new guidelines the take-home salaries of bus captains would not be less. So the captains are positive about this.

DR NORMAN LEUNG: May I also add that if their working hours are reduced from 11 to 10, then we may also consider whether it is necessary to have 14 hours a day, when it can be changed from 14 hours to 13 hours. Although this is permitted by the Transport Department, to have 14 working hours per day, we will review that, and our intention is to reduce the working hours from 14 to 13.

CHAIRMAN: Thank you.

Mr Duncan, am I correct in recalling that that is what we have been told in evidence that Citybus will be doing, that the split shift which they don't operate at the moment but which they will implement will only be a maximum of 13 hours?

DR NORMAN LEUNG: Yes.

MR PETER DUNCAN: I believe that is a correct recollection, Mr Chairman.

If I could just have that confirmed through the action plan, Dr Leung. If I can refer you, please, to KMB-1 at page 149. Is that reflected in item 12 on page 149?

MR PATRICK PANG: (Via interpreter) Yes, Mr Duncan.

DR NORMAN LEUNG: On the right-hand side.

MR PETER DUNCAN: That is what is meant by that last paragraph; is that correct?

DR NORMAN LEUNG: Exactly.

MR PETER DUNCAN: Yes, thank you.

DR NORMAN LEUNG: Thank you, Mr Duncan.

MR PETER DUNCAN: I have just been handed a note, Mr Chairman, that that evidence from Citybus appears at Day 4 of the transcript, page 75, lines 1 to 6.

CHAIRMAN: Thank you.

MR PETER DUNCAN: Moving on, gentlemen, to page 180, please, this time of TD-1.

CHAIRMAN: Before you do that, before you move on -- Mr Lee, you told us about the rest pattern of bus captains working split shift hours, where they take that longer period of rest. You said that a minority of them are able to go home.

MR ROGER LEE: Yes.

CHAIRMAN: Can you help us with, in rough terms, the proportion of bus captains driving these split shifts

who begin their rest period at a bus station rather than a depot? I ask that question because the secretariat and I have visited bus stations and the Tuen Mun Bus Depot and we are aware of the difference in the facilities available.

So the question is what proportion of bus captains working special shifts commence their period of rest at a bus station.

MR ROGER LEE: (Via interpreter) We will come back and identify these figures. We do have such figures. They take their rest at three places: one, at home; two, at bus stations; and three, at bus depots.

CHAIRMAN: Thank you.

MR PETER DUNCAN: Thank you.

Page 180 of TD-1, please. You will see at this page an extract from the forward planning programme for the years 2018 to 2022, submitted by the company to the Transport Department. If I understand correctly, this is one of the requirements of the franchise, that such a programme be provided each year to the Transport Department, and I believe this is the latest one that is available. Is that correct?

MR GODWIN SO: (Via interpreter) The latest forward planning programme was for 2019 to 2023, and it will be submitted on 17 August. It is ready for submission by early next

week. So this is the latest programme submitted.

CHAIRMAN: So when was this submitted, the one we are looking at?

MR GODWIN SO: (Via interpreter) It was submitted in June 2017.

MR PETER DUNCAN: This portion of the forward planning programme concerns the matter of bus safety.

CHAIRMAN: Before we move on, you are going to be submitting one on or by 17 August of this year; is that right?

MR GODWIN SO: Yes.

CHAIRMAN: Would you please provide the relevant chapters of that report to the committee?

MR GODWIN SO: Yes.

MR PETER DUNCAN: Thank you.

If we look at bus safety -- it is referred to as clause 8 of the forward planning programme, and I wish to bring your attention, please, to paragraph 8.2, which is concerned with the analysis of bus accidents in the past two calendar years.

If I could bring your attention in particular, please, to page 181, and the "Accident rate by bus captain age". Have you made the point in that paragraph that the results show that younger bus captains are more prone to higher accident rates, mainly due to the fact that these bus captains have relatively less bus driving

experience and they are more prone to accidents in their first few months of service? Is that a point which is made on page 181?

MR GODWIN SO: Yes.

MR PETER DUNCAN: Then if you turn the page to 182, is there a similar point made in clause 8.2.4?

"The results of an analysis on accident rate by experience in terms of years of service ... are shown in figure 8.3. As mentioned above, the likelihood of an accident occurring in the first year immediately following recruitment is relatively higher."

CHAIRMAN: Is that what's stated there?

MR PETER DUNCAN: Is that what's stated?

MR GODWIN SO: Yes.

MR PETER DUNCAN: Are there any particular provisions made to meet what seems to be this trend with regard to what happens at the commencement of the career of a bus captain?

MR GODWIN SO: (Via interpreter) I do not quite get what you mean.

MR PETER DUNCAN: If I could give you something from my own experience. When I was a young boy and travelled regularly to school on a bus, the bus driver often had a co-bus driver with him, sitting with him, giving him tips and so forth. Is there any sort of provision like

that within the company?

MR GODWIN SO: (Via interpreter) Yes. We realise the figures you pointed out. The new bus captains are often younger, and in the initial period there would be a buddy bus captain to accompany them, to reinforce their confidence and familiarise the bus captains with the roads, and so that they know how to deal with passengers. At around the third month, there would be a workshop for bus captains so that they can share their experience as a bus captain. We hope that new bus captains would be able to familiarise themselves with the work environment and minimise occurrences of accidents, or accident rates.

MR PETER DUNCAN: How long have these buddies been operating?

MR PATRICK PANG: (Via interpreter) Mr Duncan, perhaps I would briefly introduce these buddy drivers or buddy inspectors and their work.

For all full-time bus captains and half-time bus captains, for example, the housewives as mentioned by Mr Duncan, they might work four hours a day and five or six days a week, they are considered half-time drivers. After the bus captains complete two phases of training at our captain training school, we would assign buddy drivers on a full-time basis for the first and second

days of work, and on the seventh and 16th day, the buddy drivers would accompany these new bus drivers in their driving duties.

For our part-time captains, again we would assign buddy drivers, but for part-time captains recruited in the past, they all held class 10 and class 17 licences, in other words licences for buses and franchised buses. So our buddy drivers would accompany them on their first day of work.

Earlier this year, we introduced a buddy inspector programme. For each new bus captain we would assign a designated inspector who would liaise with the bus captain and we also prepared cue cards, containing the contacts of our inspectors as well as the phone numbers of depot managers, assistant depot managers and operations officers.

So apart from driving skills, our buddy inspectors can provide holistic support, so you can consider them mentors. If bus captains run into any questions or doubts, they can approach the buddy inspector. That way, we hope the new bus captains can familiarise themselves in the job as soon as possible, and like Mr So said, for all our new bus captains, after they are on the job for three months, we would arrange a workshop for them, and all depot managers, driving instructors

and myself would attend the workshop to check with the bus captains to identify the difficulties they encountered in the first three months.

Then every time we would invite a very experienced bus captain to share tips as to how to cope with the daily work. So, for a new bus captain who has three months' experience, he will certainly go through such a process.

MR PETER DUNCAN: Yes. My question was: when did these buddies first start operating?

MR GODWIN SO: (Via interpreter) For the concept of the buddy driver, it was conceived in the year 2013 and it has undergone enhancement all the time.

MR PETER DUNCAN: Thank you.

CHAIRMAN: Mr Duncan, if that's not inconvenient, we will take our luncheon adjournment now.

MR PETER DUNCAN: Thank you, Chairman.

CHAIRMAN: Gentlemen, we will adjourn now and resume at 2.30 this afternoon. Thank you.

(1.01 pm)

(The luncheon adjournment)

(2.30 pm)

CHAIRMAN: Good afternoon, gentlemen.

Mr Duncan.

MR PETER DUNCAN: Thank you, Mr Chairman.

Gentlemen, could I ask you please to be at page 180 of TD-1.

Before the lunch break, I had taken you through to page 182. Could you now please turn to page 183, where we have analysis by the company of accidents by nature.

If I could just ask you a few questions, please, arising from table 8.1. We have the first column, referring to "Passenger loss of balance"; percentage, 51.5 per cent.

There is another heading further down the table, "Injury to passenger inside bus". What is the distinction between those two headings?

MR GODWIN SO: (Via interpreter) For "passenger loss of balance", it means the passenger doesn't hold the handrail and he loses balance. And "injury to passenger inside bus" means there is an accident and the passenger is inside the bus, and the passenger is injured just sitting there, not loss of balance, and he is injured due to the accident.

MR PETER DUNCAN: How would a passenger just sitting there receive an injury? How does that happen?

MR GODWIN SO: (Via interpreter) Let's say there's an accident, a collision, and the passenger is sitting there inside the bus, and let's say the bus rolls over, and then the sitting passenger is injured, so that would

mean injury to passenger inside bus.

MR PETER DUNCAN: I don't want to be pernickety but we have a different percentage for a bus which rolls over, the last heading. Would it not be covered under that?

MR JAMES WONG: (Via interpreter) Maybe I can give you another example. A passenger can still get injured while sitting inside bus. For example, when the bus brushes against some trees or tree branches and the passenger is injured. So it's a different category from the passenger loss of balance category.

MR GODWIN SO: (Via interpreter) Last month, there was a case in Central, the bus was on the road and suddenly the bottom of the bus deck was hit by protruding concrete.

MR PETER DUNCAN: So do I understand correctly that the company has set out these categories and in the case of an accident there will be a classification according to the categories which are here listed?

MR GODWIN SO: Yes.

MR PETER DUNCAN: Thank you.

The passenger loss of balance, 51.5 per cent. At 8.2.7, there is a reference to the fact that more than half of these cases were caused by bus braking in traffic. Do you have any information for the committee with regard to the other half or so of these cases as to

the cause of those accidents?

MR JAMES WONG: (Via interpreter) Passenger losing balance can be due to a number of reasons. One of them might be that the driver is not quite aware of the passenger situation, whether he has already been standing there properly or has taken a seat, or maybe the bus captain is not driving the bus properly. We talked about acceleration or harsh braking a few days ago, and that can be another cause. Sometimes, after alighting a bus, the passenger doesn't -- boarding the bus, rather, after boarding the bus, the passenger doesn't hold the handrail and when the driver has to take some evasive action of driving, the passenger then loses his balance.

MR PETER DUNCAN: The second item, "Head on/tail collision", 13.5 per cent --

CHAIRMAN: Before you move on, Mr Duncan -- when there is an incident where a passenger loses balance and becomes part of these statistics, over half of the injuries involving buses, do you investigate the data available to you as to deceleration and acceleration?

MR JAMES WONG: (Via interpreter) In the case of a passenger losing balance, we would investigate into whether there is an acceleration or deceleration on the part of the bus captain. So the short answer is yes. And also the CCTV can also capture what happened on board the bus.

CHAIRMAN: Do you do the investigation -- let me ask the question neutrally. What data do you use to investigate deceleration or acceleration?

MR JAMES WONG: (Via interpreter) As we have discussed, the black box will record the relevant data, and we can have access to such data on our server, and then we know whether the bus captain suddenly accelerates or brakes, decelerates the bus harshly.

CHAIRMAN: Do you have statistics that are the result of these investigations, for example the rate of deceleration or acceleration?

MR JAMES WONG: (Via interpreter) We don't have formal statistics on this issue.

CHAIRMAN: Why not?

MR JAMES WONG: (Via interpreter) If there is a case of this nature, we would handle the irregular driving behaviour of the bus captain, but no record is kept about the analysis.

CHAIRMAN: But half of the injuries on your buses are caused by this factor alone.

MR GODWIN SO: (Via interpreter) I agree that records should be kept, but it's in relation to 2015/2016, we cannot provide any statistics for that period. But I will check that if in the new system, we would see if we can keep statistics about acceleration or deceleration in

respect of cases involving passengers losing balance.

CHAIRMAN: Are you doing that at the moment, 2018?

MR GODWIN SO: (Via interpreter) We can do it.

CHAIRMAN: But have you done it, past tense?

MR GODWIN SO: (Via interpreter) I don't know at this moment.

CHAIRMAN: But you can do it?

MR GODWIN SO: Yes.

CHAIRMAN: Do you know how many passengers have been injured by loss of balance so far this year, approximately?

MR GODWIN SO: 300.

CHAIRMAN: Thank you.

Presumably, when you investigate the circumstances in which a passenger has been injured through loss of balance, you have available the data from the black box which you can obtain on the server, but you also have the data from your various cameras on the bus?

MR JAMES WONG: Correct.

CHAIRMAN: So by a combination of the technological devices you have available, you can determine reasonably, perhaps, whether or not the braking was justified?

MR JAMES WONG: Correct.

CHAIRMAN: Do you keep any statistics as to that?

MR JAMES WONG: (Via interpreter) As I said, we would investigate into such cases, but the records, the data

of the investigation, are not kept.

CHAIRMAN: You don't keep a simple statistic like 445 persons injured but the braking was justified in 300 cases? Nothing as simple as that?

MR JAMES WONG: (Via interpreter) Well, we have the data but we don't transform such data into so-called statistics.

MR LEUNG KIN WANG: (Via interpreter) Maybe I can supplement here. All accidents will be looked into, and we would categorise cases into whether the bus captains should be held responsible or not, and whether the sudden braking is justified by the traffic conditions. Of course we can carry out more analysis.

CHAIRMAN: But presumably, when you do that, you must keep statistics?

MR LEUNG KIN WANG: (Via interpreter) I believe the data are there, but of course we can go back and do some analysis to seek further improvement.

CHAIRMAN: Well, isn't it an important tool, to monitor the behaviour of bus drivers, to know whether or not the deceleration was harsh, and from your investigation it was unnecessary?

MR LEUNG KIN WANG: (Via interpreter) I agree with you.

CHAIRMAN: Yes, Mr Duncan.

MR PETER DUNCAN: Thank you, Chairman.

Just leaving table 8.1 for a moment and going down

to table 8.2, we have again the same "Accidents by nature", but this time not percentages, actually the number of accidents.

Now, the chairman asked with respect to "passenger loss of balance" whether the number of passengers affected is recorded, and my understanding is that you said that so far, for 2018, the passenger loss of balance number would be 350. Is that correct?

MR GODWIN SO: (Via interpreter) It's 300, approximately 300. I'm speaking from memory.

MR PETER DUNCAN: Approximately 300, yes, thank you.

Is it possible for you, from your records, to go down the columns and indicate the numbers of persons affected by each of these accidents?

MR GODWIN SO: (Via interpreter) We are talking about the number of cases here, the data are not kept in this table.

CHAIRMAN: No. Table 8.2 simply describes the number of accidents. There might have been 1,000 passengers who lost their balance; is that what you are saying?

MR GODWIN SO: I agree. I know what you mean.

(Via interpreter) Yes, I agree, but there is no number for the passengers, but we can have the figures for 2018.

CHAIRMAN: Both of the number of accidents, 300,

approximately, and you can then also provide us with the number of passengers who lost their balance?

MR GODWIN SO: (Via interpreter) Yes, I can do that.

CHAIRMAN: It might have been all of those standing up who might have lost their balance?

MR GODWIN SO: Yes.

CHAIRMAN: Would you please provide us with that information, for 2018?

MR ROGER LEE: Yes.

MR GODWIN SO: (Via interpreter) Yes, we will do that.

MR PETER DUNCAN: Can you do that for each of the columns thereunder?

MR GODWIN SO: (Via interpreter) I will try, but I may have difficulty, because these have to do with 2015-2016, but we can provide case numbers and also passenger numbers for 2018 with regard to loss of balance accidents.

MR PETER DUNCAN: Yes. I'm only concerned about 2018. But say -- you've got a heading there, "Bus overturn/topple", there's just one accident -- can the number of passengers injured by that be easily ascertained?

MR GODWIN SO: (Via interpreter) Yes. There is only one case. Certainly we can look up the figures.

MR PETER DUNCAN: And likewise, hit a street object or a vehicle or an animal, there are 27 accidents, is it

possible for you easily to retrieve the number of persons injured by that?

MR GODWIN SO: (Via interpreter) Yes, we can do that.

MR PETER DUNCAN: I would be grateful if that can be supplied when you supply the records for 2018.

MR GODWIN SO: (Via interpreter) Yes.

MR PETER DUNCAN: Thank you.

Just going back to get a further understanding of these charts, the second heading is "Head on/tail collision". We have another heading further down the chart, "Collision with other vehicle (rolling back/forward/reversing)". What is the distinction between those two? I notice the first one is responsible for 13.5 per cent of accidents. What is the distinction?

MR JAMES WONG: (Via interpreter) For head-on/tail collision, usually we look at static objects, and if there is head-on/tail collision then we classify it as this.

The second collision column, very often it is because we changed lanes and that leads to collision between vehicles, and then we would classify it as collision with other vehicles in lane-changing.

MR PETER DUNCAN: So that's the distinction between the second heading and the third heading?

MR JAMES WONG: (Via interpreter) Correct.

MR PETER DUNCAN: What about the heading further down, "Collision with other vehicle (rolling back/forward/reversing)"; what's the distinction with that?

MR JAMES WONG: (Via interpreter) Sometimes vehicles would reverse and that leads to collision, then it would be classified as this one.

MR PETER DUNCAN: Going back up, "J/O collision" at 6 per cent and 48 incidents in 2016. What is a "J/O" collision?

MR JAMES WONG: (Via interpreter) This means junction, junction collision.

MR PETER DUNCAN: Thank you. And further down, "Entering R/A collision"; what does that refer to?

MR JAMES WONG: (Via interpreter) It's a roundabout, entering roundabout collision.

MR PETER DUNCAN: When you supply the statistics with regard to 2018 with regard to the number of passengers affected, could you also distinguish between persons injured and fatalities?

MR JAMES WONG: (Via interpreter) Yes.

MR PETER DUNCAN: Thank you.

I wish to turn to another subject now, and that is a matter which has been referred to this morning by at

least two of you, I think, and that's the subject of illegal parking.

The committee has heard not only from you but also from previous witnesses that this is very much a safety hazard, and I think this morning one of you gentlemen assisted the committee by indicating what steps you had taken with regard to this, in particular reports to different government departments, but without any apparent improvement in the situation.

Could you look, please, at miscellaneous bundle number 2, at page 644. In fact, I think the document starts at page 643, and runs into page 644, and with a translation at 644-1, which continues on page 644-2.

You will see this is a document received by the committee from the persons from the Democratic Alliance, and if I could turn to the second page of the translation -- in fact, I think at the bottom of the first page of the translation, 644-1, we have this opinion expressed:

"To eradicate illegal parking at bus stops, it must be dealt with from its roots and by formulating suitable policies, revising the outdated laws. The problem can only be resolved by multipronged measures."

It continues to say:

"Suggestion 1: Following Singapore and installing cameras on all bus fleets. Singapore has since 2008 installed cameras on buses and the cameras are installed next to the driver's seats. When drivers discover cars parking inside the bus stop, they can press the button and record a video of 5-10 minutes. The bus companies will then hand the recording to the police, thereafter the police can review the recording and in around two weeks' time the ticket will be sent to the car owner's home. Each penalty ticket costs nearly [$800], there is additional charge of [$5,000] and imprisonment of 3 months for late payment of penalty.

For the first year, Singapore has recorded 2112 incidents of drivers driving into the bus lanes or bus stops to pick up and drop off customers. For 2014, the number of cases of driving into the bus lanes and illegal parking has already reduced to 886, it has successfully deterred most drivers not to stop at the bus stops."

Now, we have heard evidence already that the company installs a camera which is I think directed towards the driver's seat, and there is also a camera which is a forward-looking camera, described I think in the submissions as a surveillance camera.

Could I ask, first of all, presently, are either of

those cameras used to record cars which are illegally parked or vehicles which are illegally parked, at the moment?

MR PATRICK PANG: (Via interpreter) Mr Duncan, my short answer is no. However, if you would allow me, I can supplement.

MR PETER DUNCAN: Please.

CHAIRMAN: Yes, please do.

MR PATRICK PANG: (Via interpreter) Regarding the recorded clip being given to the police for the purpose of prosecuting against illegal parking, in October/November last year I started to do it, because I was responsible for Lai Chi Kok Depot at that time, and it was a pilot scheme that was agreed with the police, and we took that approach in order to report cars that were illegally parked at bus stops.

CHAIRMAN: So what did you do?

MR PATRICK PANG: (Via interpreter) What we did was, I used one trial location and that is in Tsim Sha Tsui, on Canton Road, at bus terminus 271, we used that route which travels from Lai Chi Kok Depot to Sha Tin Depot, because at that terminus there was always illegal parking, and also, at Canton Road, you call it the luxury shop street, actually there is a high traffic volume there, and at that time I was the general manager

of Lai Chi Kok Depot and I had a meeting with the police.

I myself wrote a standard statement, a statement, and then I asked my frontline inspectors that if they should see illegal parking, we should use our mobile phones to record a footage which, together with a standard pro forma -- well, we will just record the date and time. The location is already known because that is the only trial location, and we would give it to the traffic section of Kowloon West of the police for prosecution.

We found that it was very effective, because when prosecutions started I could see that on some social media there were reports of this and that if you park at bus stops, you might be prosecuted. And on Canton Road, very often there is illegal parking, we would call the police, but when the police come the cars would have gone, and then the police would go and then the cars would come back. So it was only tackling the symptoms but not the root of the problem.

Therefore, we used our own initiative. We joined hands with the police and we found that it was effective, and you can see that recently the police have also carried out two pilot schemes, and now the pilot scheme has been expanded to all five land-based police

regions, and the police is doing that now.

Therefore, Mr Duncan, my short answer is we do not use our on-board CCTV for prosecution, but in our pilot scheme, together with what the police are doing, and also we can see that there is more prosecution and fines being meted out for illegal parking at bus terminus.

Thank you.

CHAIRMAN: Why don't you use the on-board, rolling-all-day, CCTV cameras?

MR PATRICK PANG: (Via interpreter) Well, we can do that, but in that pilot scheme, it would be more convenient, because our inspectors would be driving a patrol vehicle to patrol the area, and if they use their mobile phones it would be more convenient.

But of course, Chairman, if -- well, in the on-board CCTV we can also do recording, we can do that.

CHAIRMAN: Presumably, it would be very simple to have a button that would keep a log of the time at which someone should view the CCTV?

MR PATRICK PANG: (Via interpreter) You are correct, Chairman. If we can reduce illegal parking, we will certainly do that.

CHAIRMAN: Yes, Mr Duncan.

MR PETER DUNCAN: So I take it from the scheme that you have described, this has brought some improvement to the

illegal parking problem?

MR PATRICK PANG: (Via interpreter) If we are talking about the terminus of 271 at Canton Road, then I would say a significant improvement has been made.

MR PETER DUNCAN: Just with regard to that terminus?

MR PATRICK PANG: (Via interpreter) Because the police have just launched the scheme, the full scheme, we have to monitor the effectiveness now.

But as of yesterday, on the whole, illegal parking has not really been improved significantly. That's not what we have seen.

MR PETER DUNCAN: Is there any correspondence between KMB and the police with regard to the pilot scheme that you have described?

MR PATRICK PANG: (Via interpreter) We have some emails, and also we use the so-called standard pro forma, the statement, in respect of the terminus of 271 at Canton Road. I can hand over the information to the committee.

MR PETER DUNCAN: Thank you.

CHAIRMAN: Please do so.

MR PATRICK PANG: (Via interpreter) We will do that.

CHAIRMAN: That's the emails, communication with the police, and your standard form.

MR PATRICK PANG: (Via interpreter) No problem.

CHAIRMAN: Thank you.

MR PETER DUNCAN: Do I understand correctly from your evidence that you will pursue the possibility of the system which is described as being in use in Singapore?

MR PATRICK PANG: (Via interpreter) We do have an open mind. We agree that we should do that.

MR PETER DUNCAN: Sorry, when you say you have an open mind, are you going to look into it or not?

MR PATRICK PANG: (Via interpreter) Yes, yes, we will follow up. We will look into that.

CHAIRMAN: You are complaining on the one hand of having a problem. This is a beyond belief simple way of solving it, is it not?

MR PATRICK PANG: (Via interpreter) Chairman, the pilot scheme we launched for Canton Road last year was carried out when there was no precedent of basing a prosecution on just video footage. That never happened before the trial scheme.

CHAIRMAN: There are lots of prosecutions that are based on the use of video, CCTV evidence, are there not?

MR PATRICK PANG: (Via interpreter) Yesterday, Chairman, you said I had worked for the police, and I have also worked in the traffic section of the police. So in respect of illegal parking, in the past there was no prosecution based on video footage. There might be prosecution for

jumping a red light and things like that.

CHAIRMAN: That might be a limitation of the police force or the Department of Justice, but there is no barrier in law to using that evidence.

MR PATRICK PANG: (Via interpreter) I agree. Earlier this year, I learned from the press reports that the police had started to do this based on video clipping, to prosecute illegal parking vehicles, and I'm talking about stationary vehicles, not those vehicles in motion involved in speeding or jumping red light, et cetera.

DR NORMAN LEUNG: Mr Pang, I think we should do it on our own, take our own action, and see how the police respond to our action.

I think, Mr Chairman, that's the action I'm going to direct my management to take.

CHAIRMAN: Thank you, Dr Leung.

Yes, Mr Duncan.

MR PETER DUNCAN: Gentlemen, could you turn up, please, the transcript for Day 11.

CHAIRMAN: In which bundle do you find that?

MR PETER DUNCAN: Bundle 4.

CHAIRMAN: Whose evidence are we going to?

MR PETER DUNCAN: This is the evidence of Mr Lam Kam Piu, who is a representative of the Federation of Bus Industry Trade Unions.

If I could direct your attention to line 2 on page 153, Ms Wong has brought the witness's attention to the fact that his union had expressed concerns about the use of 12.8-metre-long buses that have a rear wheel steering function in Hong Kong.

At line 13, you will see that Mr Lam Kam Piu makes this statement:

"Because for 12.8 [metre] buses in light of the road conditions in Hong Kong, because we have narrow roads, and heavy pedestrian flow ... there is a hazard using very long buses."

At line 17, he says this:

"As for 12.8 [metre] bus[s] with the rear axle steering function, when manoeuvring a bend of course it would be very good for the driver. But for other vehicles they may not know that the bus comes with this rear wheel steering function, and the Transport Department would issue something to let the driver know that it has the function, but other drivers may not know. So when the rear axle steers during a bend, when another vehicle approaches very closely the back of the bus, the wheel would actually go outside its own lane, causing danger to the vehicle next to it."

And Mr Lam continues right through to the middle of page 155.

Could I ask this question: to what extent are 12.8-metre buses used in Hong Kong; and secondly, does the company share the concern of Mr Lam that these may pose a hazard in some of the regions of narrow streets?

MR LEUNG KIN WANG: (Via interpreter) 12.8-metre buses? We have them. KMB has these buses. Most are not rear-wheel steered. There are advantages. We did try such buses. We had some concerns, so we converted them to ordinary 12.8-metre buses. They are not rear-wheel steered.

Of course, 12.8 metres means that these buses are longer, with a higher passenger capacity. We will use them for busy routes, especially long-haul routes, so that we can carry more passengers. That's helpful, to improve our services.

It's longer than the 12-metre-long buses, but we would try them out first on the routes. The routes for which we would deploy such buses would be determined after carrying out tests in conjunction with the Transport Department. The deployment will come after the trials.

So far, for KMB, we have some 200 buses, 12.8-metre-long buses.

MR ROGER LEE: (Via interpreter) Maybe I can supplement. What is meant by the rear-wheel steering -- most are

front-wheel steering vehicles. They have three axles. So, when the bus makes a turn into a bend or when there's a sharp bend, the outward displacement would be less serious. For the first batch, we only got one with rear-wheel steering and our colleagues don't think highly of that, so we stopped the use of this kind of buses with rear-wheel steering.

CHAIRMAN: Mr Leung, you said you had some concerns about rear-wheel steering. What were those concerns? Are they the ones Mr Lee has just told us about?

MR LEUNG KIN WANG: (Via interpreter) The concerns are the bus captains' concerns. The turning circle would be smaller. But the characteristic of outswing would be different. The outswing is bigger. That is, when you negotiate a bend, you have to make some adjustment to adapt to it. If you drive a rear-wheel steering this day, and then tomorrow you drive another one which is not rear-wheel steering, you need to do some adjustment yourself. So that's the concern of bus captains.

MR ROGER LEE: (Via interpreter) It's not related to safety. It's about the adaptability.

CHAIRMAN: Thank you.

MR PETER DUNCAN: So, if I understand correctly, there are no rear-wheel 12.8-metre buses now in the fleet?

CHAIRMAN: Rear-wheel steering.

MR PETER DUNCAN: Rear-wheel steering, yes.

Is that correct?

MR LEUNG KIN WANG: Correct.

MR PETER DUNCAN: With regard to the 12.8-metre buses that do exist in the fleet, how many are there?

CHAIRMAN: I think you have told us about 200?

MR ROGER LEE: Yes, 200.

MR PETER DUNCAN: When you say you would deploy them on certain routes after contact with the Transport Department, has that already happened?

MR LEUNG KIN WANG: Correct.

MR PETER DUNCAN: And are these buses simply used on defined routes?

MR LEUNG KIN WANG: Correct.

MR PETER DUNCAN: Do you have any concerns about their use, given what the committee was told by the trade union representative?

MR LEUNG KIN WANG: No.

MR PETER DUNCAN: Do you have any concerns that when the vehicle goes around a bend, it might end up going outside the lane, causing a hazard to other vehicles? Is that a concern at all?

MR ROGER LEE: (Via interpreter) First of all, in deciding which route would be suitable, we will talk to the Transport Department. For some routes, it would not be

appropriate to deploy such buses, and the bus captains would have to learn to drive 12.8-metre-long buses, before they really drive these buses.

So we would do it only if it is not a rear-wheel steering 12.8-metre-bus and only when the bus captain has been properly trained.

MR PETER DUNCAN: So are you aware of any particular issue with any of the unions at the present time with regard to this matter?

MR LEUNG KIN WANG: (Via interpreter) No.

MR PETER DUNCAN: I want you to go to another volume now, this time TU-1(A). At page 84, you will see a copy of a submission received by the committee from the KMB Employees Union. The translation of that commences at page 90-1. I am working on the translation and I wish to refer you, please, to page 90-3, which refers to the matter of facilities safety.

Do you have that?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: Thank you. The union has said this to the committee:

"In order to save repair cost, KMB has, since 2015, inappropriately removed all defog heater installation, causing the front window panel to have serious fogging issue under cold and wet weather (when the difference

between external and internal temperature is big) ..."

And they have referred to annex 1 which I think you will find at page 91, the original, and 90-1 as the translation.

The question I would like to ask is: is it correct that since 2015, the company has removed all defog heater installations?

MR LEUNG KIN WANG: (Via interpreter) That is not correct.

MR PETER DUNCAN: Do you know what the union may be referring to here?

MR LEUNG KIN WANG: (Via interpreter) I believe they were talking about some demisters. We have two models. Some used heated air, and then in 2010 we changed it to using cold air ones. The bus shown in annex 1 with the plate UF 2751, it had a cold air defog installation.

I believe this bus was two years old.

Why is it that we changed from hot air to cold air defog installation? Before 2010, all the defog installations were heaters, and the heated air would use the coolant at the end of the bus and then it would be heated up, and then the hot water would travel from the end of the bus through pipes to the front of the bus, and it runs throughout entire bus for 12 metres, and a two-way pipe would measure 24 metres. The hot water would be travelling along the 24-metre hot-water pipe.

The defog heaters would use such hot water to generate hot air, so that the windscreen will not see any condensation, especially when the weather is wet and cold.

However, that installation was not reliable. Very often, the pipes might burst. If the pipes burst, the very hot water, which is of a very high temperature, and in certain cases some hot water travelled into the bus itself, and in 2010 we changed it to a cold air installation in order to resolve that problem.

But whether we use hot air or cold air defog installation, you have to turn it on for five to ten minutes before you can remove the condensation.

In 2010, we started to use cold air defog installation to replace the heaters, but the bus captains did not welcome it because it was already cold and there was cold air blowing onto the windscreen. So, by 2015, we heard those views from bus captains and we had to resolve the problem, because this might affect the driving situation of the buses, and then we found some anti-fog coating to remove the fog. This would be painted onto the windscreen. It sounded old-fashioned but it was effective. You paint it on the windscreen, there would be no condensation.

At the same time, we looked for other ways to deal

with the problem. At the same time, we researched into other demisters together with bus manufacturers. We discussed with Volvo to see whether we could find anything, and then we found two things. One, heated windscreen. There would be heated wires within the windscreen. That is very common for private cars, but if you don't ask, if the manufacturer doesn't do it for you, you cannot do it yourself. But was it immediately available? No. It was not as simple as buying it from a supermarket. This had to be particularly manufactured for buses, and we tried it on 25 buses in 2016, and the situation is still the same now.

Then, at the same time, together with ADL, another manufacturer, we researched into another thing, and that is to use electrical demisters. We would use heated wires to generate hot air to remove condensation.

Many trials were done because it involved heating elements and we had to resolve other possible problems, and in the end we resolved the problem this year, and functional electrical demisters that can be installed now.

So, at this moment, we have electrical demisters, we have heated windscreens. These are the two options for now. And the bus company has decided that these two will be installed on buses without heaters. We will

retrofit those buses with these installations. We will do this on the cold air demisters so that the entire fleet can be provided with proper demisters so the bus captains will welcome using them. And in future, we are inclined to use heated windscreens in our new buses.

MR ROGER LEE: (Via interpreter) Let me add something here. From this picture, we actually know -- well, actually, with regard to the coating, the anti-fog coating, there would be different problems because bus captains did not know there was this coating and they might remove it, and at the depot we had to rely on our staff to do the anti-fog coating, and the staff did not like it. Now, we have posted notices to say that some windscreens have had anti-fog coating painted on them.

And in the past, we have always been trying to research into new ways to deal with the condensation, and even in future, if we embed demisters within the windscreens, we would be the first in the whole wide world.

We have spent over a year with the manufacturers. As Mr Leung was saying, buses are very different from private cars. We have to do so much more.

MR PETER DUNCAN: Can I ask you, please, to turn to KMB-1 at page 98. You will see that this is the commencement of the report which was sent to the Commissioner for

Transport on 12 March after the accident. I want to bring to your attention page 115 of the bundle.

At paragraph 46 is the question, this issue of condensation, addressed and communicated to the Transport Department. Is that where you can see that?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: The second sentence:

"Prior to the incident, for the sake of defogging, anti-fog coating would be applied to the windscreens of buses that were without hot air demisters. Having reviewed the mechanism, either hot air demisters or heated windscreens will be adopted, for more effective and faster dehumidification."

Does that statement recognise that before the incident, ie the accident on 10 February, the defogging provisions were not satisfactory?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: Can I ask you, please, to turn to the action plan, the first of the action plans, at page 151. At item 20, is the matter of condensation addressed?

MR ROGER LEE: Yes.

MR PETER DUNCAN: Thank you. The second of the bullets indicates that the existing buses, as opposed to new buses, will be retrofitted with hot air demisters or heated windscreens by phase within the next 12 months.

So how far through this programme are you at the moment?

MR LEUNG KIN WANG: As I said, we have already started some of the retrofit and we are already ordering most of the components.

MR PETER DUNCAN: How many buses will require to be retrofitted?

MR LEUNG KIN WANG: (Via interpreter) A total of about 2,700.

MR PETER DUNCAN: And how many have been done already?

MR LEUNG KIN WANG: Probably ten, as at today.

MR PETER DUNCAN: Is the union aware of this programme?

MR LEUNG KIN WANG: (Via interpreter) They do.

MR PETER DUNCAN: Are you aware of any disagreement between the company and the reason why presently with regard to this matter?

MR LEUNG KIN WANG: (Via interpreter) There is none.

MR PETER DUNCAN: Could I go back to the union submission, that's the KMB Employees Union submission, again at page 90-3 -- that's the translation -- in bundle TU-1(A).

In the paragraph which immediately follows that to which I referred previously, we have this information that the union has brought to the attention of the committee:

"Besides, the company altered the gear buttons installation for safety driving, cancelled the [overdrive] gear button and manual retarder installations and relies only on computer-controlled singular automatic D-gear to control vehicle speed ... Under emergent situation it is very dangerous for there to be no saving devices for the bus captains to use. For example (such as aeroplane, mass railway transit, Express Rail Link and cruises) all adopt computer navigation, but during emergency, manual operation mode is used to avoid danger. This is like all automatic-transmission private vehicles are equipped with ... [plus or minus] M gear ..."

There are references then to annexes 2 and 3 in the bundle, which one can find on pages 92, 92-1, 93, and 93-1.

The representative of the union spoke of this during the hearing, during an earlier part of this hearing. The reference is Day 10, pages 13 to 18.

Have you had the opportunity of reading his evidence?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: Could I just ask, first of all, was there a time when there was what the document described as a manual retarder available to the captain?

MR LEUNG KIN WANG: (Via interpreter) All buses are equipped with a retarder. All retarders are handled by the foot pedal in automatic mode. But for specific routes, we have manual retarders. Those running on Tai Mo Shan with long, steep slopes, they will use hand-retarders. All buses are equipped with retarders.

MR PETER DUNCAN: The written submission seems to imply that the manual retarder was cancelled. Is that correct?

MR LEUNG KIN WANG: (Via interpreter) It's not correct.

MR PETER DUNCAN: Let us have a look at what was said to the committee on Day 10. Bundle 4.

At page 13, line 6, Ms Wong says this:

"If I may go to the next issue which relates to the gear button installation."

She then refers to the section that I have just read out:

"... the company altered the gear buttons installing for safety driving, cancelled the O/D gear button and manual retarder installations and relies only on computer-controlled singular automatic D-gear to control vehicle speed ..."

Then further on, on page 14, line 25, the chairman brings Mr Kwok to this question:

"The specific question was: how does the removal of the manual retarder affect bus safety? Could you

address that question."

And Mr Ivan Lee replies:

"In the system, there is a device that allows you to select. It includes a manual selection, automatic selection, and a third one is a combination of manual and automatic control."

Then at page 17, again the chairman intervenes and asks this question:

"Before you go on. Does it come to this, that the absence of a manual retarder removes from the bus driver a choice of how to retard the vehicle, and therefore it would be better to have it? Is that what it comes to?

Mr Ivan Lee: You can put it this way."

Mr Kwok at line 9:

"Let me answer. Manual retarder is very important, especially when it comes to going downhill."

Then at page 18, line 5.

"Without manual retarders we would use this system by controlling the gear instead of relying solely on the brake."

So there is no further information from the witnesses as to the cancellation -- direct evidence as to the cancellation of the manual retarder. It seems to be implicit in those replies that at some stage the manual retarder device has been cancelled. Do you know

what he getting at here, Mr Leung?

MR LEUNG KIN WANG: (Via interpreter) Let me try to say this. We have not cancelled any retarder. If you may refer to appendix 2.

MR PETER DUNCAN: Of ...?

MR LEUNG KIN WANG: (Via interpreter) Annex 2 of the union submission.

CHAIRMAN: Yes?

MR LEUNG KIN WANG: (Via interpreter) If you take a look at the gear selector -- that's not a gear selector as such. That's a gear inhibitor. To limit the gear, you can engage, for old buses, we have this gear inhibitor. In 2008, we switched to automatic gear, so there is no need to have this gear inhibitor anymore. The design of the gear inhibitor is that when you go up a slope, and the power is not sufficient, then the bus captain can choose not to go beyond number 2 gear or number 3 gear, because if you don't have the power to go up, you may have to -- the gear would go up and then down, so that would be the selection allowed for the bus captain to ensure a smoother journey. That's the gear inhibitor. That would mean they would limit the gear from going up to a certain level.

If it's pressed when it goes down a slope, it will not drop from a higher gear to a lower gear instantly.

If you press number 2 gear and you are travelling at gear number 4, you will not drop to gear number 2, as in the case of a private car. So this gear inhibitor is not for the purpose of deceleration or slowing down the speed. We are talking about a very big bus with passengers, a number of passengers. So to ensure safety we have pneumatic decelerator. It's within the gearbox. It's in the annex. It's in every bus. This pneumatic device is operated like this. It's in the brake. What it requires is to press the brake lightly, to trigger the pneumatic braking, to slow down the vehicle. It's used by exerting -- it's operated through pneumatic transmission, and you would not damage the brake, and the brake lining would not be damaged. The brake is not subject to additional loading. It's a safety device. It has been a safety device, a standard safety device, on every bus for a long time, and it cannot be dismantled by us.

In 2008, when we adopted the automatic gear, there would be no need for this inhibitor. So it's D, N, R, the three buttons, and we don't have that gear inhibitor button anymore. So that's already the smart gearbox that we have adopted since 2008. And the gearbox would be able to tell whether the journey is uphill or downhill or whether the bus captain is stepping on the

accelerator and also whether he's trying to accelerate or decelerate and to what extent, and a suitable gear would be automatically set or selected. If it's an uphill journey, the gearbox knows that and it would not allow the gear to go up a higher level, and the bus captain doesn't have to expend a lot of effort to try to reduce the gearing, and the bus captain can pay more attention to traffic conditions. That's the advantage of this smart system.

We have never dismantled any safety device on the buses, and we are here talking about standard installations or devices.

MR PETER DUNCAN: So are you aware of any issue at the moment with any of the unions with regard to the manual retarder system?

MR LEUNG KIN WANG: (Via interpreter) I repeat, we don't have manual retarder system now. And we haven't heard views on this subject from other unions.

MR PETER DUNCAN: There is one other matter raised by the unions with the committee which I wanted to give you the opportunity of commenting on. That is the number of routes that any one driver might be asked to travel on during the course of one shift.

The committee heard evidence from representatives of two unions who said that some drivers would be required

to drive up to three routes in a day, and this was regarded as too much of an onus on the drivers.

First of all, are some drivers required to drive on three different routes in the course of one day's work?

MR PATRICK PANG: (Via interpreter) Mr Duncan, yes, that happens. So yes.

MR PETER DUNCAN: And the union takes the view that it's too much of an onus on the drivers. What is the company's position with regard to this?

MR PATRICK PANG: (Via interpreter) We have an internal guideline on this issue. In a day's work, a bus captain is not to be asked to drive on more than three different routes, and also our duty despatch staff know this. If individual bus captains say they may drive on three routes in a day -- well, it can happen. This is within the scope of our guidelines.

MR PETER DUNCAN: Have the unions raised with you the fact that the view is that three routes is too many?

MR PATRICK PANG: (Via interpreter) This really depends -- well, if you are only talking about the unions, they have not really mentioned that three routes are too many. Very often, many bus captains are equipped to drive on a number of routes, but our guidelines are there to ensure that within any shift on a day, there will not be too much change, because they may have

difficult remembering the stops.

But all the routes must be despatched to drivers only when they have been trained on those routes, but we don't want them to drive on too many routes because they have to remember the stops, and to a certain extent this may be difficult for them.

MR PETER DUNCAN: Sorry, I don't quite understand your answer. I asked you whether any of the unions had complained three routes are too many, and your answer was "have not really mentioned". Either they have mentioned it or they haven't.

MR PATRICK PANG: (Via interpreter) Individual bus captains, a minority of bus captains, mentioned that, that is a fact. So the company said that it should be three routes or fewer in any shift.

MR PETER DUNCAN: Those who have mentioned to you that three routes is too many, is that a very large majority of -- a large number of the bus drivers or is it a small number? Can you give the committee some idea of that?

CHAIRMAN: I think Mr Pang has already said it was a minority, but can you give us an idea of the number you are describing?

MR PATRICK PANG: (Via interpreter) At this moment, I cannot give you an exact figure, but we can go back and take a look. We can look at one particular day and -- we can

look at that.

DR JOHN CHAN: (Chinese words not interpreted).

CHAIRMAN: Thank you, Mr Chan.

MR PATRICK PANG: (Via interpreter) Sorry, Chairman, to my knowledge there are not many, as far as I know. As to how we can quantify it and what is regarded as a majority or what is regarded as a minority, but to my knowledge there are not too many.

CHAIRMAN: Thank you, Mr Duncan.

MR PETER DUNCAN: Mr Chairman, this would be a convenient time for the afternoon break, if it suits the Chairman.

CHAIRMAN: Yes, certainly.

Gentlemen, as we have done on previous days, we will take an afternoon break to give everyone a rest.

15 minutes, please.

(3.49 pm)

(A short adjournment)

(4.04 pm)

CHAIRMAN: Yes, Mr Duncan.

MR PETER DUNCAN: Thank you, Mr Chairman.

Gentlemen, would you be good enough, please, to turn up TD-1 at page 477.

You should be looking at a copy of a letter from the Transport Department to the franchised bus operators, dated 7 June 2018, the date of course after the

committee was set up and commenced its deliberations.

Do you see that letter?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: Prior to receiving this letter which informs the receivers of the availability of digital road mapping, prior to receiving this letter dated 7 June 2018, was KMB aware of this facility?

MR LEUNG KIN WANG: You mean geo-fencing?

MR PETER DUNCAN: Yes. Digital road mapping, rather.

MR LEUNG KIN WANG: (Via interpreter) Yes.

MR PETER DUNCAN: When did you first become aware that digital road mapping was accessible?

MR LEUNG KIN WANG: (Via interpreter) I thought you were talking about geo-fencing. The map was only available -- well, we only knew about the map after receiving this letter, 7 June.

MR PETER DUNCAN: Right --

CHAIRMAN: There are two matters here, are there not? It's a digital map but it also contains speed limit information, and that's the question: did you know that this was available before the letter of 7 June 2018?

MR LEUNG KIN WANG: No.

CHAIRMAN: Thank you.

MR PETER DUNCAN: In the second paragraph, the writer of the letter says that the speed limits managed by the

Transport Department in the geographical information system format is "already available", do you see that, "already available"?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: Do you know now when that information actually became available?

MR LEUNG KIN WANG: (Via interpreter) We have since talked to our suppliers, and we have tried to access the information through the data set. We have to deal with the format in some way, but we are in the process of accessing the information.

CHAIRMAN: No. The question is simply this: do you know at what date the information was available? Because it's said to be "already available". Do you know now when it was available?

MR LEUNG KIN WANG: I only learn from this letter.

CHAIRMAN: No, I appreciate that. You have been given the good news that there is a digital map of Hong Kong and it's got speed limits on it, and you can redeploy your 37 people who are involved in tracking this information.

Did you then find out when it was that this was first available?

MR LEUNG KIN WANG: (Via interpreter) I don't quite get the question.

DR JOHN CHAN: (Via interpreter) We know that it's

available; not when we knew about this, when it was available.

MR LEUNG KIN WANG: (Via interpreter) It was available for a long time.

CHAIRMAN: That's what I'm trying to find out, and that's what Mr Duncan is asking you. It's been available for quite a long time. Do you know when it was -- not "quite", it was available for a long time. Do you know when it first became available?

MR LEUNG KIN WANG: I don't know.

CHAIRMAN: What did you mean when you said it was available for a long time? What's the time period?

MR LEUNG KIN WANG: Sorry about the confusion. I was not aware that the government is releasing this information to us freely.

CHAIRMAN: No, we understand this, but having -- as I've tried to put it -- received the good news that this digital map with speed limits is available, have you troubled to find out for how long it has been available, for how many years, for example?

MR LEUNG KIN WANG: I think our IT department is able to get one last year, so I know this exists.

CHAIRMAN: Are you suggesting that they didn't tell you about it?

MR LEUNG KIN WANG: You mean TD?

CHAIRMAN: Yes. No, your IT department, "I think our IT department was able to get one last year".

MR LEUNG KIN WANG: But that is not a live map. I know that --

CHAIRMAN: Mr Leung, they are very simple questions. You are being told by this letter that there is a digital map available and it has a function which allows you to know speed limits, and the question is, subsequently, have you found out how long this has been available? "How long have we been missing out on this device?" Have you troubled to find that out?

DR JOHN CHAN: Sorry, Mr Chairman.

(Via interpreter) Not when we were told by the government about it but when was it available first on the part of the government?

MR LEUNG KIN WANG: (Via interpreter) Sorry about this. The answer is I don't know.

MR ROGER LEE: (Via interpreter) GIS, that is something in the last couple of years. The geographical information system has been around for a long time on the part of the government.

CHAIRMAN: Thank you.

Yes, Mr Duncan.

MR PETER DUNCAN: Prior to the receipt of the letter of 7 June, had the company made any enquiries of the

government to ascertain whether this digital mapping system was available?

MR LEUNG KIN WANG: No.

CHAIRMAN: Are you aware that, for example, in London, a digital map with speed limits on has been available since at least 2008-9; are you aware of that?

MR LEUNG KIN WANG: No.

CHAIRMAN: Yes, Mr Duncan.

MR PETER DUNCAN: Thank you, Chairman.

If you could look, please, at KMB-1 at page 279. Perhaps we should start with page 235, just to see what this document is. You can see there your letter of 8 August, which is addressed to the committee, and addresses items 1, 3, 6 and a poster plus a circular under item 4. It's the second paragraph of the letter. Do you see that?

DR NORMAN LEUNG: Yes.

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: Then if we try to find out what item 6 is, we have to go back one page to the annex to the committee's letter of 8 August. We see there, it's:

"Copies of the documentation that describe and evidence the steps taken, including the involvement of Openmatics, to enable data to be obtained in real-time to distinguish between speeding in speed limits of

50 kilometres per hour and speeding in speed limits of 70 kilometres per hour and the documents describing and evidencing the results of those tests ..."

You kindly then provided an amount of information, and that which I am interested in is at page 279, item 6.

If I could bring your attention there to paragraphs under the heading "Works undertaken":

"A number of initiatives have [been] carried out to improve the above.

Openmatics has manually defined 50 ... and 70 [kilometre per hour] zonings (please refer to annex). KMB had started a conceptual trial on 31 July 2008 by comparing the above speed limits with the actual speed. Such [speed] is to verify whether the real-time on-board speed alert would notify the bus captains upon the actual speed of the trial bus exceeds the speed limit of the road. The result of the initial trial is so far positive. Further testing will be carried out. We are prepared to introduce the government's digital map into the Openmatics black box, which will take three to four months. However, the government's digital map does not contain live information, and can only be updated every 6 months."

The question is, what deficiencies do you regard

there as being with regard to what you have identified in the last sentence, "The government's digital map does not contain live information, and can only be updated every 6 months"; what's the problem there?

MR ROGER LEE: (Via interpreter) By "live information", it means if there is a road situation which may affect the speed to be used, the information should be sent to the digital map. This is what we mean by "live information". Say, for example, tonight a tunnel will be closed, and another tunnel, there would be just one tube for both directions, then the speed would have to be reduced, and within a very short time the map should tell us the new speed limit in a tunnel.

But right now the digital map is updated only every six months. In other words, if the time period is shortened, it will become more like a live situation.

CHAIRMAN: Is that accurate, that it is updated every six months, or is that what it says on the website?

MR LEUNG KIN WANG: (Via interpreter) We discussed this with government officials. We hope we can be given a live map. But so far, it is still only updated every six months, and they only update the permanent road speeds.

CHAIRMAN: With whom did you have this conversation?

MR LEUNG KIN WANG: This is an email message between our staff and TD.

CHAIRMAN: Do you have that with you?

MR LEUNG KIN WANG: Yes, I bring it with me.

MR ROGER LEE: August 8.

CHAIRMAN: Can you provide a copy of it to us?

MR LEUNG KIN WANG: Yes.

CHAIRMAN: Can you do it now? We can copy it -- it's not marked, is it? Thank you very much.

Can we have multiple copies.

You were answering my question when I interrupted you. With whom did you have the conversation? Perhaps, now the document has been taken away from you, you can't answer.

MR LEUNG KIN WANG: It was an email to the TD engineer, my email to Mr Danny Chan.

MR PETER DUNCAN: We will find out when we get it.

Prof Lo, please.

MEMBER LO: It seems to me the speed limit will not change every day. Once in a while, certain segments will change speed limit, maybe construction sites, maybe certain kinds of scenario. So it's not going to change every day; is that correct?

MR LEUNG KIN WANG: Depending on the road conditions, because sometimes you have a temporary construction site.

MR ROGER LEE: Accident.

MR LEUNG KIN WANG: So you may have some shortened.

CHAIRMAN: But these are all gazetted, are they not, government gazette?

Well, let's approach this step by step. There is a system, is there not, so that speed limits can be changed legally, and that involves the government posting gazettes, saying such and such a section of road, the speed limit which is 70 will change for the next three months and become 50? Are you familiar with that system?

MR ROGER LEE: Yes, I do.

CHAIRMAN: And that system of gazettes deals with both changes for months, or some of them are even for a year, and it also deals with short-term changes?

MR ROGER LEE: Yes.

CHAIRMAN: Sometimes it deals with changes that are for a certain hours of the day for a few days or a month?

MR LEUNG KIN WANG: Yes.

MR ROGER LEE: Like tunnel or accident.

CHAIRMAN: So what I am asking you about, these are all gazetted, are you saying there is another system of changing speed limits legally that are not gazetted?

You are not saying that? So they are all gazetted.

If one looks back at the 2018 gazettes, I think you will find there are 22 gazettes that deal with this

issue. Some of them are temporary and some of them are long term.

Perhaps we had better wait for the document.

Mr Duncan, are there some other matters you can deal with?

MR PETER DUNCAN: I was simply going to ask whether the Transport Department has yet responded to your email.

MR LEUNG KIN WANG: The TD hasn't replied to last reply yet.

CHAIRMAN: Well, don't hold your breath.

MR PETER DUNCAN: I'm going to turn now to a number of the technology devices that have been referred to in the submissions to the committee, possible technology devices which are available and which relate to safety matters.

Could I start, please, by asking you to look at KMB-1, page 114. This is an extract from the report sent to the Transport Department on 12 March, and on this page we see part 5, "Other measures to enhance bus safety", and what I wish to bring to your attention is paragraph 43, which is under the heading of "Tilt alarm". What is contained under that heading is the following:

"A tilt alarm will be installed on every bus on the entire fleet. Upon reaching a specific inclination, the alarm will be triggered to alert the driver."

Do you see that entry?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: Thank you.

We heard on Tuesday -- in fact, we saw the statement of Mr Kulis that the black box that was supplied by Openmatics contained a provision for a tilt parameter. Do you remember that?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: And I think it was you, Mr Leung, who explained on Tuesday that the company did not provide any value for this parameter because you could not identify any particular reference values. Do you remember saying that?

MR LEUNG KIN WANG: Yes, I did.

MR PETER DUNCAN: Can we go back to page 114, that paragraph 43. Would it be fair to say that that statement was made in reaction to what had happened to the bus involved in the Tai Po incident?

MR LEUNG KIN WANG: This is after the incident.

MR PETER DUNCAN: Yes. Was it a reaction to it, because that bus had in fact tilted and it in fact overturned?

MR LEUNG KIN WANG: This is the recommendation of the committee, so this is after the incident.

MR PETER DUNCAN: Well, this was very shortly after the incident, wasn't it?

DR NORMAN LEUNG: Yes.

MR PETER DUNCAN: 12 March.

DR NORMAN LEUNG: Yes.

MR PETER DUNCAN: What do you mean by "the committee"?

DR NORMAN LEUNG: The special committee of the board of KMB.

MR PETER DUNCAN: Thank you.

If you could then go, please, to page 150.

CHAIRMAN: Before you move on, the context in which this statement is made at paragraph 43 is paragraph 39, under the heading, "Other measures to enhance bus safety", specifically this, the last three lines:

"The special committee has considered these issues, in consultation with KMB's bus suppliers, and made various recommendations which KMB's management will be implementing or further examining."

That's the context, is it?

MR LEUNG KIN WANG: That's the context.

(Via interpreter) With regard to the tilt alarm and the tilt angle, we would decide on the angle. Before that, we did not know how to do it. Together with ADL and Volvo, we discussed this, and their advice was that they could not give us any specific recommendation. They could not recommend any particular tilt angle. Their recommendation was that it would be difficult to decide on an angle, because if the angle was too narrow

it would not be meaningful, and the bus captains would be receiving a lot of misleading information, and if the angle is too broad, it may be dangerous and the bus captains will either steer the bus or apply the brake.

Therefore, ADL and Volvo both did not recommend a tilt angle. Rather, they proposed to deal with this with ESP or ESC, in order to deal with this matter of tilting, and in fact we could not take reference from other countries. We could not find any relevant tilt angle for reference.

CHAIRMAN: Did you raise this with Openmatics, since it is in their equipment, whether or not it is used anywhere?

MR LEUNG KIN WANG: We did, we did.

CHAIRMAN: What was their response?

MR LEUNG KIN WANG: There isn't any relevant -- they didn't recommend anything for us.

CHAIRMAN: Did they indicate to you whether or not they knew that this alert was used by anybody?

MR LEUNG KIN WANG: Not any double-decker that is relevant to us, no.

CHAIRMAN: By that, is it to be inferred it is used by vehicles other than double-decker vehicles? Is that what you are saying?

MR LEUNG KIN WANG: They are referring to some coaches, presumably.

CHAIRMAN: So it is used on coaches; is that what Openmatics told you?

MR LEUNG KIN WANG: Not exactly. We asked them any relevant double-decker for reference. They didn't -- they come up with a figure but that presumably is not double-decker, so we still awaiting for their confirmation but it is not double-decker.

CHAIRMAN: Was this done in writing?

MR LEUNG KIN WANG: Yes, in writing.

CHAIRMAN: Are you in a position to provide us with copies of this exchange?

MR LEUNG KIN WANG: Yes, I try to, yes.

CHAIRMAN: When was this done, approximately?

MR LEUNG KIN WANG: One or two weeks ago.

CHAIRMAN: Thank you. So please provide the exchange of correspondence that addresses this issue.

MR PETER DUNCAN: Mr Leung, having regard to what you have just said, if I can go back to page 114, the statement at paragraph 43 seems to be quite unequivocal:

"A tilt alarm will be installed on every bus of the entire fleet. Upon reaching a specific inclination, the alarm will be triggered to alert the driver."

Was that in fact the resolution of the company at this point, 12 February 2018?

CHAIRMAN: Well, it's 12 March I think when this report was

made. The accident was on 10 February.

MR PETER DUNCAN: 12 March, I beg your pardon, yes.

There's a positive statement there at paragraph 43 that the company will install a tilt alarm on every bus in the entire fleet.

MR LEUNG KIN WANG: (Via interpreter) That should be in the black box, and we are talking about triggering the alarm, the one in the black box, not that we would install another alarm, another tilt alarm.

CHAIRMAN: No, that's understood, but perhaps if one stands back, this was a recommendation from the special committee. It was recommended that:

"A tilt alarm will be installed on every bus of the ... fleet. Upon reaching a specific inclination, the alarm will be triggered to alert the driver."

Now, that's 12 March. Since then, you have carried this forward, from what you have said. You have spoken to ADL and Volvo and you have spoken to Openmatics.

MR LEUNG KIN WANG: Right.

CHAIRMAN: So what is the result of that? Just summarise it because I think I understand what the result is.

MR LEUNG KIN WANG: Volvo, ADL --

CHAIRMAN: There is no need to go through the details. What is the end result?

MR LEUNG KIN WANG: (Via interpreter) There is no suitable

angle. They cannot specify any particular angle.

CHAIRMAN: So is the result this, that although this is a recommendation of the special committee, it's not one that you are able to enforce or put into practice?

MR LEUNG KIN WANG: That's correct. Thank you very much.

MR PETER DUNCAN: So if we look at the second action plan, at page 231 of the same bundle -- this is the action plan provided to the committee on 6 August -- have you summarised in writing what you have just told the chairman --

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: -- in the right-hand column on that page?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: So the upshot is there will in fact be no tilt alarm; is that correct?

MR LEUNG KIN WANG: That's correct.

MR PETER DUNCAN: Now, you mentioned in the course of those remarks the electronic stability control system.

Could you go, please, to page 114 of KMB-1. Do we see there what was contained in the report to the Transport Department on 12 March, and to put into proper context it was said that the special committee had considered the issues which had been described in consultation with the bus suppliers and it made various recommendations with KMB's management will be

implementing or further examining.

There is then reference at paragraph 41 to the electronic stability control system, and it is described as follows:

"[It is] an important safety feature available for buses. It is a mandatory safety feature on coaches in Europe. ESP reduces the risk of skidding and rolling over. Installation of ESP in Euro V and Euro VI buses is under testing and verification with the suppliers. Upon confirmation by the suppliers, ESP will be installed in the entire fleet phase by phase."

Now can I ask this question: prior to the incident, had the company considered the application of this system?

MR ROGER LEE: Yes.

MR PETER DUNCAN: When did it first consider the application of the electronic stability programme?

MR ROGER LEE: (Via interpreter) It is between 2014 and 2015. We tried to approach a German company, MAN, they had this ESP programme. In 2016 we purchased 20 buses with ESP system. We used them on the road. 21 altogether, 21 buses altogether.

CHAIRMAN: From MAN?

MR ROGER LEE: Yes.

MR LEUNG KIN WANG: Double-decker.

MR PETER DUNCAN: So these had been in use for some time prior to the accident on 10 February?

MR ROGER LEE: Correct.

MR PETER DUNCAN: Had any decision been made by the company as to whether the use of this system should be extended beyond that's MAN buses?

MR ROGER LEE: Yes.

MR PETER DUNCAN: What was that decision?

MR ROGER LEE: (Via interpreter) All new buses that we are going to purchase, all Euro VI new buses will be equipped with ESP.

CHAIRMAN: But when was that decision made?

MR LEUNG KIN WANG: (Via interpreter) Volvo and ADL, we need some time. We have to talk to them further as to when these will be available. So those buses will be available after that happen.

DR NORMAN LEUNG: Mr Chairman, if I may, this was actually reported in the updated action plan as of 1 August 2018.

CHAIRMAN: Can you give us the page reference? 235, something like that?

MR PATRICK PANG: 230, should be.

CHAIRMAN: Yes. Thank you.

I think the context of Mr Duncan's question was this. From 2016, you had 21 buses, double-decker buses, supplied by MAN which had ESC. Had you made any

decision whether or not to go ahead with installing ESC on new buses prior to the Tai Po accident?

I see you are shaking your head, Mr Leung.

MR ROGER LEE: (Via interpreter) Well, it was still on trial. We wanted to get more data. We only had 21 buses at that time. But we found out that ESP could help us in preventing skidding and rolling over, so we wanted to speed up the programme.

CHAIRMAN: So the decision to act in the way that is set out at page 230 of KMB-1 is a consequence of, firstly, the 10 February accident and, secondly, the investigation of the special committee, and thirdly its recommendation?

MR ROGER LEE: Yes.

CHAIRMAN: Thank you.

MR PETER DUNCAN: Could you describe the current position then with regard to the retrofitting of the ESP programme? It is said on page 114 that:

"Upon confirmation by the suppliers, ESP will be installed in the entire fleet phase by phase."

Have you received any confirmation by suppliers that this is feasible?

MR LEUNG KIN WANG: (Via interpreter) They are still developing their own equipment. The new buses will arrive in 2019 and these will be equipped with this system then the next step will be for the retrofitting

of the same device or system to our existing buses.

The initial response is positive; the initial indication is positive.

MR ROGER LEE: (Via interpreter) For Volvo it's 18 to 24, but for ADL, we don't have a timetable for the retrofitting programme.

MR PETER DUNCAN: Have ADL indicated whether it is feasible?

MR LEUNG KIN WANG: (Via interpreter) Yes. It can be done. It can be retrofitted.

MR PETER DUNCAN: So does that then cover the entire fleet by referring to --

MR LEUNG KIN WANG: (Via interpreter) We are restricted to Euro V buses.

MR ROGER LEE: (Via interpreter) Pre Euro V vehicles, there is no electronic braking system.

MR PETER DUNCAN: So does that mean some of the fleet will not have this system?

MR LEUNG KIN WANG: Correct.

MR PETER DUNCAN: What numbers?

MR LEUNG KIN WANG: (Via interpreter) Euro V or newer buses account for more than half of our fleet.

CHAIRMAN: So just under or some figure under half will not have this fitted --

MR LEUNG KIN WANG: Correct.

CHAIRMAN: -- when retrofitting has been complete?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: Is that correct?

MR LEUNG KIN WANG: That is correct.

MR PETER DUNCAN: Just to complete the picture on this, could we go to TD-404 again, please.

CHAIRMAN: Which bundle is that in?

MR PETER DUNCAN: TD, I beg your pardon, TD-1.

Has the working group recommended that all franchised bus operators, in paragraph 4, have committed that all new double-deck buses procured from July 2018 onwards will be incorporated with that device, the electronic stability control device?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: And does that contain, in paragraph (a), a description, full description, of the nature of that device?

MR LEUNG KIN WANG: (Via interpreter) For KMB, all new buses starting from 1 January 2019 will be fitted with this.

MR PETER DUNCAN: While we are on page 404, do you see the reference in paragraph (b) to ""Retarders for capping the maximum speed of the speed limiters on downhill ('speed limiting retarder')"? Do you see that reference?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: Could I ask you just to keep that open,

but to refer again to the report to the Transport Department after the accident, at page 115, please.

CHAIRMAN: Of KMB-1?

MR PETER DUNCAN: KMB-1, yes.

Can you read paragraph 45 to yourself, please.

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: Does it finish by saying this?

"A retarder is a hydraulic system that slows down the gearbox. Speed limitation systems could be offered on new buses after a period of engineering and testing."

Who supplies these sorts of devices?

MR LEUNG KIN WANG: The bus manufacturer.

MR PETER DUNCAN: How long have they been available?

MR LEUNG KIN WANG: They will become available on our new buses for ADL in early next year.

CHAIRMAN: I think Mr Duncan's question is more general than that. How long have they been available to buy or fit, purchase?

MR LEUNG KIN WANG: Not at the moment.

MR PETER DUNCAN: Let me ask it -- I haven't made myself clear, I'm sorry -- were these devices available prior to the Tai Po accident?

MR LEUNG KIN WANG: No.

MR ROGER LEE: No.

MR PETER DUNCAN: When did they become first available?

MR LEUNG KIN WANG: They will become available.

MR ROGER LEE: Maybe the first one in KMB.

CHAIRMAN: They are not available elsewhere in the world?

MR LEUNG KIN WANG: For double-decker, no. I'm not sure. I'm not sure.

CHAIRMAN: By all means be cautious.

MR LEUNG KIN WANG: I'm not sure.

MR PETER DUNCAN: Let's go back to square one. Before the accident, were you aware of the existence of these device?

MR LEUNG KIN WANG: We did, we did, but not with ADL. We did go to Wrightbus, we did go to Belfast, we did go to Queen's University to talk about a lot of new features, safety features. Yes, we know this technology. We know this technology, especially on vehicles.

CHAIRMAN: Are you saying that this was a technology that was offered on Wrightbuses?

MR LEUNG KIN WANG: Not at that moment.

MR ROGER LEE: (Via interpreter) Actually, after the accident, we talked to ADL and Volvo in order to explore whether retarders can be fitted onto buses. At that time they spent some time to think about the possibility and we can only say this, because it was not readily available.

CHAIRMAN: Yes, Mr Duncan.

MR PETER DUNCAN: Presumably, before the incident, before February this year, you would have been aware of the fact that the retarder mechanism that you had to keep buses below 70 would not be effective on a downhill slope; you must have known that? Would that be correct?

MR LEUNG KIN WANG: Yes.

CHAIRMAN: Because that system simply works by starving the engine of fuel, doesn't it, reducing the amount of fuel?

MR LEUNG KIN WANG: Correct.

MR PETER DUNCAN: So given that you were aware that the system did not retard a bus going in excess of 70 downhill, had you before the incident made any enquiries into whether there was available in the market any device which would offer assistance in that respect?

MR LEUNG KIN WANG: (Via interpreter) There should have been but I don't know where we mentioned this.

If the buses use hand-retarders, this can be done. The speed going downhill can be limited.

MR PETER DUNCAN: That's not quite the question. Had you considered with the bus manufacturers before the incident anything in the nature of what you discovered since the incident with regard to inhibiting the speed downhill?

MR LEUNG KIN WANG: (Via interpreter) Not that, from my memory, nothing.

DR JOHN CHAN: May I try to explain what is a slightly technical question. We had referred earlier to a system of hand-retarders on certain bus routes coming down Hiram's Highway, because it is particularly steep. In the context of Mr Duncan's question, yes, those buses and those hand-retarders had been in use for a long time before the Tai Po accident. So to that extent, yes, we knew.

But this particular type of speed retarder that we are talking about here, that's something that has occurred to us only since, after the February accident.

MR PETER DUNCAN: Thank you, I understand.

CHAIRMAN: By that you mean the hydraulic system?

DR JOHN CHAN: Yes.

MR PETER DUNCAN: Can we go to the action plan, please, the first action plan, to understand the situation here. I think this can be found at page 150.

Is that the reference, "Speed limitation -- speed limitation system which will automatically activate the brakes to slow down the gearbox should be installed on new buses after a period of engineering and testing"?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: And the action plan as at 10 April:

"Both ADL and Volvo are studying how this system could be implemented on new bus. Feasibility will be

updated in due course."

Then if we follow this through to action plan no. 2, item 19.

CHAIRMAN: Which page?

MR PETER DUNCAN: This will be at page 232, Mr Chairman.

CHAIRMAN: Thank you.

MR PETER DUNCAN: We are informed that:

"ADL's Euro VI new buses will come with this feature. Volvo will have this feature available in July 2019 and their Euro VI new buses delivered before this time will have the feature retrofitted."

Does that cover all the new buses that you will be acquiring in the future, just ADL and Volvo?

MR LEUNG KIN WANG: Yes, all new Euro VI buses.

MR PETER DUNCAN: So are you going to be acquiring new buses apart from Euro VI buses?

MR ROGER LEE: All the new buses will be Euro VI.

MR PETER DUNCAN: And they will be restricted to ADL and Volvo, will they?

MR ROGER LEE: So far, only these two manufacturers.

MR PETER DUNCAN: If we go back to the working group's recommendations, are we able to see those in detail at TD-1, pages 404 and 405?

Do you see those entries?

MR LEUNG KIN WANG: Yes.

MR PETER DUNCAN: With regard to retrofitting, you will notice that the working group recommends that the operators and the bus manufacturers start the development of these two add-on devices for existing buses with a working target to commence the tests of the devices and trials of the retrofitting work in about 12 to 18 months. That's the second half of 2019.

Could you just confirm for us, please, what the company's intentions are with regard to retrofitting with regard to this device?

MR LEUNG KIN WANG: (Via interpreter) We will do it.

MR PETER DUNCAN: And will you do that in accordance with the working group's recommendations?

MR LEUNG KIN WANG: (Via interpreter) We will do that accordingly.

MR PETER DUNCAN: I would now like to move to the next device referred to by the working group. This is under the heading of page 405 of "Trials of new safety technology".

If I could just introduce this by reading the introductory paragraph:

"In order to enable the [franchised bus] operators to step up their management and control of their bus fleet, and reduce the potential risks arising from human errors or effect of unsafe driving behaviour, the

[working group] considered that new safety technology which can assist the [franchised bus] operators in monitoring and controlling bus safety should be actively explored. Generally, the [franchised bus] operators have committed to further exploring sources of supply of various latest safety devices/technology and launch trials with a view to establishing the technical feasibility and cost-effectiveness of their application in [franchised buses]".

The first matter to which the working group has referred is what is described as the "bus monitoring and control system". Could I just read out, please, what this is said to contain:

"In view of the latest technological development in bus fleet management system and black box with functions on real-time fleet supervision, bus speed recording, Global Positioning System ... location recording, et cetera, the [working group] considered that it should be a medium-term goal for [franchised bus] operators to develop a comprehensive BMCS with positioning function, operational information monitoring function, and variable speed limiting function with geo-fencing technology. In brief, by making use of GPS or other positioning technologies, the system will match the legal speed limit at the actual bus location. This

real-time speed limit information can then be used to control the enhanced speed limiter (ie speed limiter with 2 speed settings). In other words, the bus speed could be controlled or limited within the applicable speed limits (50 [kilometre per hour] or 70 [kilometre per hour] depending on the road section). The system will also enable the [franchised bus] operators to monitor their bus fleet more closely and to take appropriate management action against overspeeding and other unsafe or improper driving behaviour such as heavy braking or inappropriate speed during cornering or downhill. To this end, [franchised bus] operators have agreed to proceed with developing the system and conducting trials in two phases ...:

(i) Phase 1: a BMCS with positioning function, operational information (such as vehicle speed, brake status, deceleration, et cetera) monitoring function and geo-fencing technology for fleet management will be put on trial to achieve detection of speeding and provide real-time alert to the bus captains; and

(ii) Phase 2: Subject to the successful development of the phase 1 trial, the BMCS so developed will be incorporated with additional application of enhanced speed limiter being developed by bus manufacturers so as to limit the bus speed in accordance with the

corresponding speed limit of various road sections."

If we go there to the company's action plan --

CHAIRMAN: Before you do that, Mr Duncan, may I interrupt -- and this is a question for you, Mr Leung.

If you go back to page 402, where the Transport Department provided the committee with information relating to progress of the working group's meetings, you will see that in the final two lines it says that:

"... the report of the working group will be provided the soonest possible for the committee's reference."

Now, this letter is dated 19 July. You are a member of the working group. When might we expect to receive the working group's report?

MR LEUNG KIN WANG: (Via interpreter) I haven't received it.

CHAIRMAN: I appreciate that. Can you help us as to when we might all expect to receive it?

MR LEUNG KIN WANG: (Via interpreter) The working group is still in session.

CHAIRMAN: I understand that. It's obviously gone over the time that we were told by the Commissioner for Transport was to be its reporting time, when she gave evidence in May, but I'm trying to get some indication from you, as a member of the group, nothing more than that, when we might expect to receive the report.

MR LEUNG KIN WANG: (Via interpreter) There are minutes of meeting, and all I've got are the minutes of meetings.

CHAIRMAN: You misunderstand me. At the end of the day, the working group is going to produce a report. When might we expect to get the report?

MR LEUNG KIN WANG: (Via interpreter) I have to ask the chairman of the working group.

CHAIRMAN: I understand that, but you are a member of it. Are you close to the end? Is it about to be signed off or not?

MR LEUNG KIN WANG: I think it's close to the end.

CHAIRMAN: Thank you.

Sorry, Mr Duncan.

MR PETER DUNCAN: That's perfectly in order, Mr Chairman.

Is it proposed to have any more meetings of the working group, or has the working group fulfilled its function?

MR GODWIN SO: (Via interpreter) According to the agenda, there have been three general meetings on training and fleet management. We have made some progress. We expect a report to be written up. And there will be a fourth meeting. The agenda will be on bus training and the monitoring mechanism of bus captain training. It will be convened in mid-September.

CHAIRMAN: Thank you.

MR PETER DUNCAN: Thank you. Let us go to the action plan, the first of the two action plans, at page 150 of KMB-1.

Is it at paragraph 16 on that page that this matter, that is to say BMCS, is reflected?

MR ROGER LEE: (Via interpreter) We are working towards this objective. We have talked about digital map and black box, and these are being worked out. We have a timetable. If we achieve that goal, then the next stage -- there will be a second stage. In the future, we will be able to give alerts to the bus captain instantaneously, real-time, whether it's a 50km speed limit or 70km speed limit.

But geo-fencing is more complicated. There will be information fed into the black box and the black box will identify whether there is speeding, and then the CAN system will be provided with the input so as to reduce the speed, to reduce the fuel supply. We have to be very careful because this will mean taking over the captain's driving.

We have a bus being tried for this new system but it is still on trial.

MR PETER DUNCAN: So is it at item 16 of the action plan which reflects the work to be done on the bus monitoring and control system?

MR ROGER LEE: Yes.

MR PETER DUNCAN: Thank you. For a further update on that, can we go to the second action plan, at page 231 of KMB-1, please. Do we see on page 231 the action plan, as of 1 August 2018, and in the first paragraph, does it refer to the test drive which you mentioned a few moments ago?

MR ROGER LEE: Yes.

MR PETER DUNCAN: So going back to the recommendations of the working group, according to the Transport Department, where is KMB exactly with regard to phase 1 and phase 2 respectively?

MR LEUNG KIN WANG: (Via interpreter) Phase 1 will involve giving alerts only. Only alerts would be given.

MR PETER DUNCAN: Yes. What stage has been reached? Is phase 1 completed? Is it halfway done? What's the situation?

MR LEUNG KIN WANG: (Via interpreter) We are still doing the trials. We haven't reached the stage where we can have the findings.

MR ROGER LEE: (Via interpreter) We have to install the digital map in the black box so that we can tell between 50kmh and 70kmh, and this test drive is about finding out whether this will work, the digital map will work, this can be done in the short term.

MR LEUNG KIN WANG: (Via interpreter) Let me supplement. We

have manually installed information on some road sections in the black box. That is to say for certain GPS coordinates, it is subject to -- it is a 50-kmh zone, we have manually inputted the information to the black box. But if we have a live map, the entire map would be installed and then we can carry out a more comprehensive test.

CHAIRMAN: And how many road sections have you dealt with by installing that manually, the distinction between a 50-kilometre zone and a 70-kilometre zone?

MR ROGER LEE: (Via interpreter) The manual input is done this way. If the section is 70kmh zone, we would manually install or input the map, and then we can actually test all buses but we are just doing this for one bus. Then, if the alarm doesn't go off when it exceeds 70kmhkmh we know whether it works.

If it works on one bus, it will work for all 4,000. This is done manually now. If we can install the digital map, of course we need to verify the format first, and if that can be done then we can comprehensively do this for both 50kmh zones and 70kmh zones.

CHAIRMAN: But the question was, in this manual trial, how many sections of road have you installed with these latitude/longitude parameters?

MR ROGER LEE: In fact all of them.
CHAIRMAN: Thank you.
MR PETER DUNCAN: Are you able to provide any sort of indication to the committee as to how long it might take for these two phases to be totally trialled?
MR ROGER LEE: (Via interpreter) We have given you the indicative information.
CHAIRMAN: Yes. Can you remind us where we can find that in the bundles? You have given us a bar chart, haven't you?
DR NORMAN LEUNG: 279 to 281.
CHAIRMAN: Thank you very much.
Can you help us then as to what is meant by the first heading, "Incorporate speed limit into black box by Openmatics", end of November 2018?
MR LEUNG KIN WANG: (Via interpreter) This is about the government's data set.
CHAIRMAN: Digital map with speed limits?
MR LEUNG KIN WANG: Yes, right.
CHAIRMAN: Installed by Openmatics into all black boxes?
MR LEUNG KIN WANG: All black boxes. But for the trial, it may be one or two, but ...
CHAIRMAN: This is what you hope to achieve, presumably?
MR ROGER LEE: Yes.
MR LEUNG KIN WANG: Correct.

CHAIRMAN: But going through the steps, what is meant by "Validate the speed limit accuracy"?

MR LEUNG KIN WANG: (Via interpreter) We hope the system can operate normally. We would like to try whether, at a certain location, that it can really fulfil the requirement.

CHAIRMAN: So cross-check; is that it?

MR LEUNG KIN WANG: Cross-check.

MR ROGER LEE: (Via interpreter) Chairman, sometimes it relies a lot on the GPS for positioning. Sometimes certain road sections, even if the map speed limit is accurate, the bus speed as fed into it might not be accurate, because if you only rely on GPS it may not be accurate and it needs to be adjusted.

MR LEUNG KIN WANG: (Via interpreter) One of the considerations is whether the signals of the GPS are stable and accurate. That has to be adjusted.

MR ROGER LEE: (Via interpreter) Say, for example, on Tuen Mun highway, we have a bus speed at 70 kilometres per hour, but then if you rely on GPS for positioning, sometimes they would tell you that the bus is on Castle Peak Road and the speed limit is 50km there. Therefore, sometimes the roads can be very close and we have to adjust the positioning.

CHAIRMAN: This is a problem that occurs when one road is on

a flyover and the other road is beneath?

MR ROGER LEE: Yes, and also the parallel one.

CHAIRMAN: Yes.

Just going through the steps here -- so you are going to carry out an internal trial. What is meant by that?

MR LEUNG KIN WANG: (Via interpreter) Well, it may be a test drive by our own staff, or a trial on a specific route. We need to carry out the trials to see whether the operation will meet expected results.

MR ROGER LEE: (Via interpreter) Because today, if the light would be activated at 70km, there will be a light on the speedometer. But later on, the 50km and 70km alert will be done by the system. So it is totally different. From the angle of the bus captain, today there will be a light, it is because today he is reminded that it exceeds 70km, but later on, whether it is 50km or 70km, we will have to rely on the system to check it against the speed limit of the road section, and bus captains have to adapt to this and we have to give them some time to tell them that this is the incentive behind the change of the system.

CHAIRMAN: You have another bar here, "Consultation with frontline staff"; I suppose that speaks for itself.

"Implementation to full fleet", by the end of

January of 2019.

MR ROGER LEE: Yes.

CHAIRMAN: Then in terms of time, if one goes to the bottom of this bar chart, you repeat the matters that you have set out earlier: carry out internal trial, consult frontline staff. Why is that repeated?

MR ROGER LEE: (Via interpreter) They are different. This is phase 2, Chairman. The first one is that on the dashboard there will be two real-time indicators, telling the bus captain that he has gone beyond 50km and he will be alerted, or whether he is exceeding 70km so we alert him. But the one that is below, it is about phase 2. When the bus captain exceeds the speed limit or is driving at a high speed, then the geo-fencing system will take over the bus captain's driving, and to tell him that he has to cut the fuel supply.

We have left out 70km here. In other words, when it comes to phase 2, if the bus captain goes beyond 70km, say for example when he goes downhill, then the bus will use geo-fencing technique in order to cut the fuel supply. We will not just alert the bus captain. This is about phase 2.

CHAIRMAN: So phase 1 will be complete on this timeline by the end of January 2019?

MR ROGER LEE: We hope.

CHAIRMAN: Yes.

Yes, Mr Duncan.

MR PETER DUNCAN: Thank you, Chairman.

TD/406, please. TD-1/406, please, leads on to the next device to be trialled. This is the collision alert and lane-keeping devices. It is said that:

"The collision alert system is an add-on device which will give an alert to the bus captain in the event of a possible crash. The lane-keeping device is also an add-on device to alert the bus driver when the bus starts moving away from the lane other than proper steering. Both devices are available in the market. Thus, trial of using the devices in [franchised buses] to assess their applicability and effectiveness is recommended."

We saw earlier today in the accident statistics that head-on and tail collisions, and collisions involving a changing of lane, were responsible for something like 25 per cent of bus accidents.

CHAIRMAN: Remind me, if you would, Mr Duncan, where those figures are to be found.

MR PETER DUNCAN: Yes. That's at page 183, Mr Chairman, of the same volume, TD-1.

Had the company given any consideration to the application of these devices prior to the accident in

Tai Po in February?

MR ROGER LEE: (Via interpreter) Yes, we did.

MR PETER DUNCAN: Could you please describe what consideration was given and what the outcome of that consideration was.

CHAIRMAN: Before you answer that question, I'm looking at 183. Lane collision seems to be 11 per cent, does it not? Are you including some other figures?

MR PETER DUNCAN: Yes, I'm sorry, Mr Chairman. I should have broken it down. I was combining "head on/tail collision" with "collision (changing lane)", giving approximately 25 per cent.

CHAIRMAN: Yes. Thank you.

I'm sorry, please put the question again.

MR PETER DUNCAN: Yes.

What consideration had been given to the engagement of these sorts of devices prior to the accident in February?

MR ROGER LEE: (Via interpreter) Actually, in 2017, our engineering department -- well, myself and our operations director, Mr Leung, together with some young engineers in the company -- we thought of new ways to help those two things that you mentioned, and because of that, as I said, in the spring or actually in the autumn of last year we went to Northern Ireland to go to

Queen's University in Belfast, exactly to look into these two matters.

KMB in-house has a group of engineers who actually have been sent to Northern Ireland to do this, and Queen's University sent professors to Hong Kong to look at our buses.

These are two main projects. The first one is collision alert. We would like to know the distance between our bus and the vehicle in front of the bus, because we have found that direct collision on long-haul routes can be fatal, and we want to do something to see whether our bus can be a distance away from the vehicle in front, and if the braking distance is not sufficient we will have to alert the bus captain and we have been doing this internally. Now we have engaged a university in Belfast so that we can develop this together.

If you look at the W-Tech document, you will see that when there is a change of lanes, when the bus captain engages in lane changing but he doesn't do proper steering, there will also be alerts. We are researching into this now.

But today, I can only tell you that we are still doing the research. We don't even have initial conclusions or results.

MR LEUNG KIN WANG: (Via interpreter) I would like to add

one point. In the market, we will be watching out for third-party products. Later on, we are going to address driver monitoring device. We don't know whether the device would be applicable, but we hope so.

MR PETER DUNCAN: According to the Transport Department's account of the working group's deliberations at page 406, there are already devices available on the market. Do you see that reference?

MR LEUNG KIN WANG: Yes.

MR ROGER LEE: (Via interpreter) That's right, for (c), on drowsiness.

MR PETER DUNCAN: No, for (b).

MR LEUNG KIN WANG: (Via interpreter) I know that some other bus companies are also trying this out. We will be keeping a close watch. We will try it out again. We will do that.

Talking about lane-keeping devices and the alert, I remember many years ago we tried out something, but the results were not satisfactory. But given present technology, we will be keeping watch and we will be doing further trials.

MR PETER DUNCAN: I'm just wondering why you are entering into this research project with the overseas university if there are in fact already devices available on the market.

MR LEUNG KIN WANG: (Via interpreter) Mr Duncan, even if some products are available, you may try them out and you don't know whether they are good for your buses.

MR ROGER LEE: (Via interpreter) I would like to say something more here. Actually, a product may be very good for a particular place, but we drive on different roads. We have long-haul routes. We have urban routes. We have routes where there are many people and many vehicles. The situation is complex. There is no one third-party product that can be applicable to our buses. We are talking about very congested and sometimes long-haul routes. It is very difficult to find one product. We can only try them out. But at the same time we should also try to seek a way out for ourselves.

CHAIRMAN: Mr Duncan, we have reached the close of play and it's been a very long day for everyone, as always for the stenographers the longest, but that's why it's time to close.

Gentlemen, it's clear, as was obvious during the day, that you have much information to provide us. We will go through the transcript, as no doubt you will, and we will identify exactly what it is that you are to provide to us, which is most helpful. We would ask you, if you could, to make that available to us within two weeks of today, because it is clear that we will need to

have another oral session. But it is helpful to everyone if we can get the documents in good time, have them paginated. You can then digest them and so can our counsel.

So can I ask that you provide the information that you have undertaken to provide within two weeks and we will fix another hearing thereafterwards.

Thank you very much for attending. I know these have been long days but it has been helpful to the committee.

So we will adjourn now and the hearing will resume when we are able to fix a date. Thank you.

(5.32 pm)

(The hearing adjourned to a date to be fixed)

EVIDENCE FROM KOWLOON MOTOR BUS CO (1933) LTD AND LONG WIN BUS CO LTD: DR NORMAN LEUNG, DR JOHN CHAN, MR ROGER LEE, MR GODWIN SO, MR LEUNG KIN WANG, MR PATRICK PANG, MR JAMES WONG (simultaneous interpretation used only where indicated) 1

Statement by DR NORMAN LEUNG 1

Examination by MR PETER DUNCAN (continued) 5

[Blank Page]

2018年8月11日

上午10時01分恢復聆訊

出席人士如前。

主席：（經傳譯員）梁博士同埋各位先生，早晨。

梁乃鵬先生：（經傳譯員）早晨，主席，早晨。

主席：（經傳譯員）鄧律師。

MR DUNCAN：（經傳譯員）唔該你主席。

梁乃鵬先生：（經傳譯員）主席先生，或者等我先講，可唔可以畀幾分鐘我？

主席：（經傳譯員）當然可以。

梁乃鵬先生：（經傳譯員）主席先生，琴日聆訊之後，我哋向委員會係提供進一步嘅文件，呢個係關乎行動計劃嘅，就關於二十九個彎位嘅時速限制。另外我講一講提交畀席前嘅提交文件總結。

或者讓我講一講，主席先生，你問咗一個問題，就係都好公道嘅同埋好切題嘅，你就問過點解王家豐先生所作嘅建議，我哋管理階層係未有係落實嘅，我一定要承認，我自己心中亦都有咁嘅疑問，就想知道點解係冇加以實施嘅。

或者我哋睇一睇嗰個提交文件嘅一覽，喺2014年嘅7月31號，嗰度就係話行動計劃就會提交畀車務總監同埋總經理，以供佢哋係通過嘅。跟住就係喺2014年嘅8月14號，當時就係王家豐先生就係寫電郵畀何文達先生，就話請你係批准嘅。跟住就係14年嘅8月15號，當時就何先生就係畀電郵就係黃生，就叫佢就係請車務總監就係去正式批准，當然事先就係查核咗同埋通過咗先。

跟住就係喺15年嘅2月2號，當時就係有一封電郵嘅，就係王家豐先生就係發出係畀所有車廠嘅總經理，嗰度就話「而家就係適當嘅時候去再考慮係落實車速限制呢項事情嘅」，即係只針對嗰啲已經係搵出嘅嗰啲急彎。

喺15年嘅2月5號，王家豐先生就發電郵畀所有車廠嘅總經理，佢就話「我會將佢呈交畀車務總監同埋另一位總監，就等佢哋作最後嘅批核嘅。」

主席先生，我想請你哋睇番呢一個證物5號，即係呢一個文件夾嘅證物5。

主席：（經傳譯員）係，好，我有喇。

梁乃鵬先生：（經傳譯員）好，唔該晒主席先生。呢一份就係一個通函，就係王家豐先生就係發畀所有有關嘅部門嘅主管。喺呢一份便箋嗰度，就話「今早係同車務總監開過會，係關乎上述嘅題目嘅，我哋而家係有一個新嘅做法」，我要強調，呢度就講話係「對於點樣處理呢個事宜就有新嘅睇法，新嘅做法。嗰個行動就會係總結如下：

第(1)，就係嗰個安全服務及質量部就會預備一份安全嘅海報，一張咁嘅海報就係話駛過急彎嘅安全駕駛，就會 4 月嘅時候做，車廠就需要將呢一啲安全海報係擺放喺同埋展示喺一啲當眼嘅地方，喺車廠嘅地方同埋所有嘅總站嗰度，係駕駛訓練導師就需要向所有嘅車長就係進行呢個安全嘅提示，作為一個正常嘅做法；

第(2)，就係安全及服務質量部就會擬備一份內部通告，呢個就會由交通部就係發出嘅，就加強車長嘅安全意識，亦都提醒所有嘅車長就係要觀看一個安全嘅錄影帶，就係透過呢個電子學習嘅方法，呢個就 1 月就好似處理巴士火警一樣；

第(3)點，就係安全及服務質量部就會同車長訓練學校商討喺職員嘅網站嗰度上載一個安全嘅短片，就講明如果佢哋係駛過呢啲急彎嘅時候，一般嘅安全指引同埋預防措施係乜嘢嘅，而嗰個寶順路轉入去唐明街呢一個急彎就會被揀選作為一個例子，呢個就係三十秒鐘嘅安全短片嘅。所有嘅車長都需要登入或者用其他嘅方法嚟到觀看呢一個安全嘅短片同埋佢哋嘅名就會係記錄低，會有紀錄嘅；

第(4)點就係巴士車長訓練學校，就會引呢一個將軍澳巴士翻側意外作為一個教訓，就係要所有嘅新入職嘅車長、學員同埋其他嘅車長就係知悉嘅，就透過適當嘅安全駕駛訓練。」

跟住嗰段就話「請留意，而家係唔需要係發出嗰個安全車速限制卡嘅，而嗰個安全短片嗰度係唔會」，係唔會，「講明嗰個安全車速嘅限制嘅，嗰個內部通告都唔會咁樣嘅，預計就會喺 2015 年 4 月嗰度採取上述嘅行動。我會係適時咁樣將嗰個進展向你匯報。」

主席先生，我想講，就係所有嘅建議、所有嘅行動，即係話喺呢份文件嗰度所列出嘅行動全部都已經係做咗，管理層亦都採取咗行動嚟到去落實呢一度所有嘅建議嘅。

主席：（經傳譯員）好，唔該晒。

梁乃鵬先生：（經傳譯員）唔該你，主席。

主席：（經傳譯員）鄧律師，我相信都會成日講番呢份文件，我諗要係編番個頁碼，做咗未呢？

MR DUNCAN：（經傳譯員）我哋會安排㗎喇，呢幾頁就只不過係剛剛係嚟到我面前

嘅。

主席：（經傳譯員）我都明白嘅，會唔會係搵人幫我哋做咗呢樣工作，就等我哋自己去填番個頁碼。

MR DUNCAN：（經傳譯員）係，肯定可以嘅。梁博士，各位先生，早晨，多謝你哋做咗功課，琴晚做咗功課，交畀我哋，亦都感謝你剛才作嗰個解釋。

梁乃鵬先生：（經傳譯員）我要致歉嘅，我要代表管理層就係致歉，琴日大家花咗咁多時間，如果我哋嘅管理層早啲做好呢樣工夫嘅話，其實就一早已經係喺琴日係清楚解釋咗個事情，請接納我嘅道歉。

主席：（經傳譯員）唔該晒你，梁博士。

MR DUNCAN：（經傳譯員）梁博士，我係因應就係你哋交畀我哋嘅新嘅文件，係有啲問題要問嘅，請一請你睇番呢個 1 號證物，呢個就係王家豐喺 15 年 2 月 2 號發出嘅電郵，呢個就係話「喺 2014 年 12 月示威區嗰度清咗場之後，而家係適當嘅時候再考慮係落實嗰啲已經係搵出嘅急彎同埋迴旋處嘅車速限制。」你呢度就話再考慮，我睇呢個字眼就係意味住你呢一個課題之前已經係考慮過嘅。

我哋冇任何嘅文件係關乎究竟何先生喺呢一個 2014 年 8 月 15 號發出電郵之後究竟係有啲乜嘢事做過嘅，當時就話希望就係得到車務總監嘅批准嘅，你可唔可以話畀我哋聽究竟 14 年嘅 8 月 15 號之後一路去到 2015 年嘅 2 月之間就係做過啲咩嘢，而係希望得到佢正式嘅批准呢？

梁乃鵬先生：（經傳譯員）我哋要搵番有關嘅文件，我哋呈交畀委員會嘅文件就係我哋手頭上嘅所有，即係相關嘅文件就係咁多，喺我哋嘅手頭上就係咁。

主席：（經傳譯員）係，我都明白，我哋就係 14 年 8 月至到 15 年嘅 2 月 2 號之間係有啲咩嘢紀錄、有啲咩嘢文件，關乎呢件事？李生，或者你係咪會知道呢？

李澤昌先生：（經傳譯員）我嘗試去幫手。我係 15 年 1 月先加入公司嘅，但係我肯定可以返去公司睇下有冇嘅。

主席：（經傳譯員）但係當時 15 年 2 月 15 號落呢個決定嘅時候，當時你就係個總經理，你之前同我哋講過呢樣嘢就係喺何達文先生係總經理嘅時候就已經落咗個決定嘅，係咁樣嘅，係咪呢？根據你今日所畀嘅資料就係顯示個情況係咁嘅。

李澤昌先生：（經傳譯員）可唔可以讓我返去寫字樓再搵嗰啲資料出嚟呢？

主席：（經傳譯員）係，唔該，好。

梁乃鵬先生：（經傳譯員）等我係澄清一下，因為我都同管理層就問過呢個問題嘅，呢度就係話喺 2014 年 12 月係示威區清咗場之後，呢度講嘅就係佔中嘅。

MR DUNCAN：（經傳譯員）呢度所指嘅就係佔中。或者我亦都想問另一件事，跟進琴日所講嘅，呢個就係講到嗰啲係例外嘅報告嘅，琴日都有提過嘅，我就係講緊兩類嘅報告，一類就係關乎超速嘅，另外一類就係關於突然剎掣或者係加速，我哋琴日都睇過，我就想澄清呢一點。

首先，我哋講下KMB-9文件冊第3993頁，你應該記得我哋過去嗰幾日係講過呢一份嘅文件嘅，呢個就係我所講嘅第一類報告；而第二類報告就係喺KMB-1文件冊第362頁。

主席：（經傳譯員）呢一類係咩嘢報告呢？

MR DUNCAN：（經傳譯員）呢個就係同車速有關嘅，同埋亦都關乎加速同埋突然剎掣嘅問題。你應該記得呢份報告，係咪呀？

黃祥明先生：係。

MR DUNCAN：（經傳譯員）就住大埔嘅意外，就係今年2月10號嘅意外，我想問一個問題，涉事嘅巴士或者嗰架巴士嘅司機喺意外之後有冇喺呢兩類嘅報告中嘅任何報告係顯示出嚟，就係喺2月產生嘅呢啲報告？

黃祥明先生：當時就並冇喺呢兩個報告裏面去留意有冇嗰單案件嘅車長或者架車嘅情況出現嘅，因為其實喺當時我哋係獨立咁去睇番嗰架車發生情況嘅事件，就無需要等呢一個報告嘅出現。

MR DUNCAN：（經傳譯員）當時有冇擬備呢啲報告，喺2月10號？

黃祥明先生：由於當時係集中喺即時搵呢個報告嘅--呢架車當時嘅情況嘅報告，我冇留意，亦都唔記得有冇喺呢個報告裏面再出現嗰個車嘅情況。

MR DUNCAN：（經傳譯員）即係話喺2月10號就從來都冇產生過呢啲報告，係咪呀？

黃祥明先生：呢啲報告係一個恆常性嘅報告嚟嘅，即係話所有車當佢係違反一個我哋指定嗰個指引嘅時候，就會喺呢啲報告就出現，所以呢個係恆常性嘅報告，但係當時你講大埔案件嗰單事件嘅時候，係因為佢係獨特嘅事件，我哋係獨特咁樣去睇嗰個車嘅情況，就我唔記得有冇喺呢個報告再睇番。

MR DUNCAN：（經傳譯員）你可唔可以承諾去檢查一下究竟有冇發出過呢啲報告呢，喺2月10號？

黃祥明先生：可以嘅，我可以再查番，睇下當時有冇呢個報告出現。

主席：（經傳譯員）你可唔可以同委員會分享呢份報告呀？

黃祥明先生：如果我check到，我當然會提交畀呢個committee。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）當時巴士有冇係以超過時速 70 嘅速度行駛，如果巴士以超過 70 嘅時速行駛，會唔會嗰架巴士--即係會唔會自動係產生呢兩類嘅報告呢？

黃祥明先生：首先而家喺我哋螢光幕見到呢個表，當時我哋 set 嘅車速係 75 公里，如果佢超過 75 公里，應該就會係喺呢個表嗰度出現。至於另外一個比較細嘅圖表，就要睇下當時嘅道路嘅限速係幾多，我哋先至會睇下架車有冇超速，如果有超速，同樣都會係喺嗰個報告度走出嚟。

MR DUNCAN：（經傳譯員）如果係有急速剎車或者係急速嘅加速嘅情況，會唔會自動產生咗第二類嘅報告呀？

黃祥明先生：會嘅。

MR DUNCAN：（經傳譯員）如果當時係冇產生呢啲報告，現時嘅系統可唔可以產生番嗰啲報告呢？

黃祥明先生：因為呢個紀錄係當時如果佢係有一個 harsh braking 或者 excess acceleration 嘅時候，已經係記錄在案㗎喇，如果係有嘅時候，已經喺個報告裏面會出現咗，我會搵到嘅時候，我提交番畀委員會。

MR DUNCAN：（經傳譯員）我個問題有少少唔同嘅，如果係不存在呢個報告，你可唔可以喺今日去--即係根據你哋公司電腦系統嘅紀錄產生報告呢？

黃祥明先生：我唔係好明白個問題，因為如果佢係當時有 harsh braking 或者有 excess acceleration，就應該已經喺個報告度出現咗㗎喇。

MR DUNCAN：（經傳譯員）明白，唔該晒。

梁健宏先生：應該係可以嘅，但係嗰啲數據因為都半年前，我哋所有嗰啲數據已經係擺咗喺 archive 去第二啲系統入面嘅，我哋可能要攞番當其時半年前嘅數據，所以變咗我哋要睇一睇個可行性，我相信係可以嘅。

MR DUNCAN：（經傳譯員）唔該晒。

主席：（經傳譯員）鄧律師。

MR DUNCAN：（經傳譯員）琴日我哋最後講到培訓嘅問題，喺我繼續講呢個話題之前，我就想就住人手短缺呢個問題再問一啲問題，喺新嘅指引底下，巴士車長嘅短缺就似乎會更加係加劇，而唔係會改善嘅，咁樣講合唔合理呢？

彭樹雄先生：係，Mr Duncan，我同意嘅。

MR DUNCAN：（經傳譯員）你哋公司最近有冇推出過一啲措施去改善呢個情況呢？

李澤昌先生：其實呢個係多方面嘅，首先一，就係喺嗰個招聘方面做啲嘢，另外一方面就係喺公司裏面點樣提高嗰個員工之間，佢嗰個對嗰間公司嘅嗰種 morale。

喺聘請車長方面，除咗喺個薪酬要做一啲工夫，主席星期二已經講咗一啲舉措。我哋亦都係好希望喺請人方面，喺唔同嘅類型、唔同嘅性質，喺唔同嘅區域，我哋都係想做啲工夫，因為而家大部分呢個世代嘅人做工作，有啲未必真係好似以前嗰種長時間咁嘅，我哋而家喺呢個情況裏面都做緊一啲工夫。我哋個人事部嗰度都有一啲建議，係請唔同類型嘅人嚟呢間公司。

至於喺嗰個公司裏面令到啲員工個歸屬感強啲，其實亦都做咗好多工作，無論喺佢哋嗰個廠嗰個 depot 裏面優化佢哋嗰個設施，令到佢喺休息同埋譬如我哋做咗一啲有啲畀佢買嘢方便啲，或者幫佢哋剪頭髮，或者有啲休息嘅地方可以有啲譬如打乒乓波、gym room 嘅嘢。亦都喺佢哋喺個站頭裏面過去呢段時間亦都做咗好多嘅工作，令到佢喺個站頭亦都舒適啲，呢個係做咗都幾多。

仲有就喺佢個生活方面，個 lifestyle 方面，我哋亦都做咗好多 recreation 嘅 club，好似係足球，令到好多--因為車長嘅數目都係比較多係男性，就希望佢哋喺工作以外都有啲活動令到好多大家啲同事可以聚埋一齊，唱歌會等等嘅嘢。

亦都我哋嘅主席吩咐我哋成立咗呢個獎學金，希望好多啲公司嗰啲員工啲家屬都可以有個機會可以幫--有啲嘢幫到佢啲細路仔可以讀大學等等，好多嘢都希望可以挽留一啲同事之餘，亦都可以希望吸引一啲新嘅人做我哋嘅車長。

呢個工作係知道唔容易，亦都知道因為個短缺嘅問題，我哋向呢個方向會繼續做。

彭樹雄先生：Mr Duncan，或者我哋個 managing director 李生都講咗我哋嗰個喺招募或者喺嗰個挽留人才方面做咗啲工夫，我想係集中講一講我哋有啲乜嘢嘅軟件，喺行動上，喺嗰個車務運作上，我哋係過去係做咗，而係去 address 呢啲 crew shortage 嘅問題。

正話李生講咗一啲嘅硬件，例如休息室等等，我就唔再補充，不過喺另一方面，我哋而家嗰個車務運作，我哋係希望儘量做到係人性化啲啲，我哋就希望係可以加強嗰啲車長嘅歸屬感，減少佢哋個離職嗰個比例、比率，亦都係做咗好多鼓勵嘅工作，就去針對有啲車長嗰個病假嘅申請。另外，我哋亦都係不時咁樣去優化我哋嗰個嘅行車時間，亦都係極力希望能夠提供一啲充足嘅行車時間同埋一啲休息嘅時間。

就住車長申請假期、調更、調假、崗位嘅調配、休息日嘅申請，我哋全部都係儘量做到人性化，我哋亦都係會接受車長，譬如話口述又或者正式入申請去做一啲調更、調假、調崗位等等。我喺 4 月亦都係做咗一個問卷，就畀啲車長去選擇一啲嘅工作嘅安排，因為每個車長，其實佢哋可能嗰個需要都係有啲唔同，有啲可能要八個鐘頭嘅工時，有啲可能佢想做十個鐘頭嘅工時等等，我哋亦都係儘量係去--我用個字就係用「儘量去遷就」或者「儘量去 facilitate」，facilitate 佢哋嘅 requests 嘅。

另外，琴日我都講咗我哋嘅車長面對好多嘅問題，有啲係客觀嘅問題，例如佢哋受到滋擾，我哋琴日都講咗，盡咗好多工夫。另外，我哋亦都係加強咗前線督導人員嘅訓練，喺 6 月我哋係同我哋有二百位嘅車務主任同埋各級嘅督察，我哋做咗一個訓練課程，係兩天嘅，總共我哋係搞咗八個 courses。喺個訓練課程裏面，其實我哋都係強化點樣可以支援到前線車長，當佢哋遇到困難嘅時候，我哋點樣去處理。

另外，我哋亦都同其他政...

主席：（經傳譯員）有啲乜嘢嘅困難？你話佢哋面對困難。

彭樹雄先生：主席，佢哋主要係幾樣嘢嘅，第一，車長可能會遇到一啲交通意外，車長可能會遇到一啲我琴日所講嘅 abusive 嘅事件。我哋就係強化咗我哋嗰啲車務主任同埋嗰啲督察點樣去現場協助車長處理交通意外，點樣可以強化到我哋前線嘅督導人員點樣能夠提供一個適切嘅幫助畀車長。

我哋公司亦都係搵咗我哋內部，我哋搵咗一啲專職交通意外調查、法律部嘅律師，甚至乎我哋都請埋香港警務處道路安全小組亦都係嚟講咗--每一次都嚟，就兩個鐘頭嘅安全駕駛、道路安全等等。我哋係 6 月舉行，就呢個我哋覺得啲同事嗰個評價，睇得到係非常之高。呢個亦都係我哋希望強化我哋嗰個嘅前線管理，從而令到我哋畀到前線車長嗰個幫助係更加多。

另外車長每日面對嘅問題其實都係好多，例如交通越嚟越擠塞，道路嘅車輛嘅數目同道路嘅增長完全唔成一個正比，違例泊車亦都多，違例泊喺巴士站裏面嘅車亦都多，因為正正呢個問題，好多時交通阻塞，好多時違例泊車令到我哋嘅車長不但只行車時間係要加長，更甚嘅就係好多時因為行車時間又或者因為咁樣脫班，其實我哋車長係面對一個好沉重嘅壓力。好多嘅言語上嘅衝突，甚至乎肢體上嘅衝突，其實正正就係因為嗰個客觀嘅因素而引致到有所發生。

交通個違泊，違例泊車，特別係巴士站，大家應該要明白我哋好多嘅輪椅客，我哋嘅巴士一定係要停正喺嗰個巴士站，嗰啲輪椅客先至能夠有一個 curb 位係可以上到車，但係正正就係因為有某啲違例嘅泊車...

主席：（經傳譯員）彭生，鄧律師就唔係一個開放式嘅問題就係讓你選擇係你想答晒你想講嘅嘢嘅。我哋想知道就係有啲咩嘢設施，你就講咗加強呢個培訓，除此之外，仲有啲咩嘢想講呢？

彭樹雄先生：其實我想總結，就係話其實我哋車長面對好多嘅困難，我哋其實係每一個困難喺度慢慢去同佢哋解決，所以其實呢個對於嗰個所謂 retention，其實，主席，我想你--希望你明白，呢個其實對於車長嗰個嘅壓力，其實同佢嗰個 retention 或者佢留任係有一個直接影響。

主席：（經傳譯員）我哋明白，...

彭樹雄先生：多謝主席。

主席：（經傳譯員）...其實你重複講咗佢哋有咩壓力。我哋其實剛才問題就話你用啲咩措施，我諗你已經講咗你係現有㗎喇，李生想講，係咪呀？

李澤昌先生：彭生講嗰樣嘢，譬如車長佢行車嘅時候，佢喺嗰個--佢架車唔啷呢，佢喺架車--即係等如好塞車嘅時候，對佢嗰個精神壓力係好大，好多車長而家係經常都講緊係好辛苦，因為塞車嘅關係，因為車塞車係辛苦過揸車，我諗好多人都知，所以彭生嘅意思就話我哋做嘅嘢就係好多時同啲政府--提點佢啲道路擠塞或者啲道路係嗰啲路面嘅條件好差，我哋係做緊呢啲 initiative 嘅嘢，呢個可以從而幫到個車長喺塞車嘅時間，或者嗰啲路面嗰個 condition 可以有啲改善，令到佢嗰個舒服啲，我諗呢啲都係我哋嘅 initiatives。

主席：（經傳譯員）唔該晒。鄧律師。

MR DUNCAN：（經傳譯員）你哋係向邊一個政府部門係提出呢啲投訴呢？

李澤昌先生：你講緊係關於嗰啲路面嗰啲，係咪呀？

MR DUNCAN：（經傳譯員）係。

李澤昌先生：我諗有幾個嘅，一個就當然係警務處，因為有啲違例嘅泊車或者係啲 loading and loading 嗰啲，會擋住個巴士站，令到個巴士司機泊唔到站，就好似頭先彭生講搞個輪椅嗰個板嘅時候又搞唔到。有啲乘客就會要好辛苦咁上車，呢個我記得係上年有一件事就係喺中環干諾道發生嗰件事。另外有個情況就係當...

主席：（經傳譯員）我諗你重複緊你講嘅說話。

MR DUNCAN：（經傳譯員）一個就係警隊，另外呢？

李澤昌先生：一個就係運輸署。

主席：（經傳譯員）係，唔該。有冇其他部門？

彭樹雄先生：我哋個別都有路政署，因為嗰啲路面嗰個 condition 可能冇咁好，另外 FEHD，食環署...

主席：（經傳譯員）你話個路面情況，係個路面...

彭樹雄先生：係，冇錯，路面譬如話凹陷，路面有一啲嘅障礙物。另外我哋喺雨季...

主席：（經傳譯員）有冇其他部門？

彭樹雄先生：食環署，食物環境衞生署，一啲樹喺嗰啲路，特別係郊區，雨季之後好多樹伸咗出嚟係撞到我哋啲巴士。

主席：（經傳譯員）嗰啲樹就需要係修剪、路上嘅障礙物，另外就係塞車同埋就係違

例泊車就警方？

彭樹雄先生：係，冇錯，冇錯，主席。

主席：（經傳譯員）仲有冇其他部門呀？

彭樹雄先生：大致上都係咁，主席。

主席：（經傳譯員）整體嚟講，政府有咩嘢回應呢？或者李生就可以總結一下，就簡單咁講，係滿唔滿意呢，你哋？

李澤昌先生：可以快啲。

主席：（經傳譯員）即係都有做，不過你話佢哋應該係做得快啲？

李澤昌先生：有啲係靠自己去做嘅。

主席：（經傳譯員）違例泊車，喺巴士站違例泊車同埋其他地方違例泊車解決咗未？

李澤昌先生：（經傳譯員）未全部解決晒，特別係夜晚。

主席：（經傳譯員）唔該。鄧律師。

MR DUNCAN：（經傳譯員）交通擠塞，呢個問題解決咗未呢？

李澤昌先生： No.

彭樹雄先生： No.

主席：（經傳譯員）對唔住，你點答呀？

李澤昌先生：（經傳譯員）冇，未呀。

主席：（經傳譯員）唔該。

MR DUNCAN：（經傳譯員）車長裏面有幾多個百分比係女性呢？

蘇偉基先生：大約6%嘅。

MR DUNCAN：（經傳譯員）公司有冇措施就係吸引更多嘅女性嚟到係擔任呢個崗位呢？

蘇偉基先生：呢個係有嘅，我哋亦都係有啲探討，呢個特別喺我哋屯門嘅車廠，我哋會做得多啲，因為嗰度係住宅區多啲，我哋招聘嗰陣時都係會 equal opportunity，但係我哋真係想吸納多啲女性嘅車長。呢度我哋有諗過就有啲設施可以配到畀我哋女性嘅車長，舉例如，佢可能係一個 housewife 主婦，如果有一啲育兒、nursery 嘅設施，我哋可以喺個廠某啲地方撥到出去，我相信係有幫助，但係確實而家我哋用地嗰度係有個限制，我哋係未做到。

MR DUNCAN：（經傳譯員）呢啲嘅考慮有冇引致你哋就係做咗啲咩措施嚟到係吸引佢哋申請呢？

蘇偉基先生：另外我哋亦都喺嗰個崗位嗰度設計到有啲叫做半職嘅車長，意思即係話佢工時短啲或者佢每周返嘅工作天會短啲，就適合一啲需要照顧小朋友嘅母親去擔崗。

MR DUNCAN：（經傳譯員）咁樣樣有冇令到你哋大大咁增加咗女性擔任車長呢？

蘇偉基先生：喺申請嗰度係有幫助，頭先我哋亦都講多一樣，就係話儘可能我哋喺我哋巴士總站嘅設施嗰啲嘅洗手間就係男、女廁係分開，如果我哋喺--儘可能做得到。

MR DUNCAN：（經傳譯員）我就而家想請大家係攞張投影片出嚟，呢個就會係總結咗九巴同埋龍運巴士嗰個喺近年嚟嗰個盈利嘅，去到 2011 至到 2017 年嗰個情況嘅，呢啲就係喺你哋嘅報告嗰度就係抽出嚟嘅，或者我解釋一下呢啲圖表，首先就係 2011 年至到 2017 年九巴嘅盈利，你呢度見到係頂頭嗰度亦都有講咗佢喺邊一個文件夾嗰度攞出嚟，就係 KMB-6，喺呢個稅後嘅盈利，你呢度就可以睇到，就由 2011 年一路去到係 2017 年嘅。

喺呢個圖表嗰度大家可以睇到喺 2012 年、2013 年係有虧損嘅，嗰度見到就係五千一百萬同埋二千一百萬嘅，分別係。

李澤昌先生：（經傳譯員）係。

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）我咁講公唔公道呢，自從 2013 年到而家，公司嘅盈利就係都穩步咁樣樣上升嘅，咁講啱唔啱呢？

李澤昌先生： Not fair comment.

梁乃鵬先生：（經傳譯員）同意，不過呢度有原因嘅，鄧律師，或者我可以解釋一下公司嘅財政狀況，我想講番九巴同埋龍運第一份嘅陳述書嘅第 93 頁，或者借用嗰份文件就可以更好咁解釋一下我哋公司嘅財務狀況。

MR DUNCAN：（經傳譯員）係，唔該晒梁博士。

梁乃鵬先生：（經傳譯員）主席先生，我想講就係我哋而家都仲係喺好困難嘅情況底下係營運專營巴士嘅服務嘅，我想請大家睇一睇呢個圖表，係，鄧律師，你講得啱嘅，喺 2012 年我哋有一個虧損，就係五千一百萬，喺 2013 年，我哋個虧損就係二千一百萬元嘅，當你哋話我哋之後係穩步咁樣係有呢個盈利，即係話由 2014 年至到 2017 年有咁嘅情況，不過我想指出一點嘅。

請你睇一睇 2016 年嗰個盈利嘅，我哋就係有六億一千八百萬，我請你睇睇嗰個燃油嘅成本，喺 2012 年嘅時候嗰個燃料嘅成本係十四億元嘅，喺 2013

年就係十四億，然後去到十二億，呢一個就2014年，因而讓我哋係可以有一個盈利嘅，盈利就係一億九千七百萬元。

如果你睇番2016年嘅利潤，我哋嘅利潤係6.8億，但係如果你睇番我哋喺燃油度慳到嘅開支，嗰一年我哋只係花咗6.24億喺燃油度嘅。換句話講，喺2016年，我哋嘅收入係輕微上升，但係我哋嘅利潤上升唔係因為收入增加，而係因為我哋喺燃油度慳到嘅錢係多咗。而到2017年，利潤就同我哋慳到嘅燃油成本係相等嘅，我就想指出呢一點。

我亦都想指出喺舊年，即係2017年，我哋嘅員工開支就係達到三十六億，呢個大概係等如營運開支嘅六成，員工嘅開支係會繼續上升，每年都會上升嘅，因為每年都會有一個工資調整嘅。你見到我哋完全係控制唔到呢一類嘅成本嘅，所以我就想向委員會指出我係一直係致力係促進我哋員工嘅福祉，因為佢哋對公司係非常重要，我哋係希望服務大家，所以我會竭盡所能去改善我哋員工嘅福祉，希望我哋係可以請多啲巴士車長同埋係可以挽留我哋現有嘅車長。

但係我都好明白我哋已經面對咗車長短缺多年，但係我哋要睇番香港嘅市場情況，現時香港嘅失業率係百分之二點八，幾乎係一個全民就業嘅狀態，我哋講過輸入勞工，呢方面我哋係冇嘢可以做到嘅，但係我哋嘅策略就係改善我哋巴士車長嘅薪酬，而我哋希望其他--即係揸其他商用車輛嘅司機亦都係會加入我哋嘅，我哋係希望將業界其他嘅司機吸引嚟加入九巴同埋龍運，呢個就係我哋就住車長嘅策略。

我非常明白係好難係吸引新血去成為車長，正如管理層亦都講過，關於因為呢個工作嘅環境、乘客嘅態度等等，但係我可以向你保證，我會繼續竭盡所能去提升我哋員工嘅福祉，希望我哋可以解決車長短缺嘅問題，多謝主席。

MR DUNCAN：（經傳譯員）多謝梁博士。你提到一點就係你有一個策略去改善車長嘅薪酬，你可唔可以透露一下呢個策略嘅詳情？

梁乃鵬先生：（經傳譯員）基本上我哋係講緊車長嘅薪酬，喺舊年12月嘅董事局會議，我哋傾過，我哋決定就將呢一個花紅納入為呢一個底薪之中，而我哋亦都向委員會透露我哋會進一步提升車長級別嘅薪酬，我哋會將個增薪點由8個增加到20個嘅，所以我哋係講緊薪酬同埋我哋車長嘅工作環境嘅。我哋係會繼續努力去吸引新血加入我哋嘅公司。

MR DUNCAN：（經傳譯員）我哋今日稍後會講到你哋新車長嘅起薪點嘅。你提到呢一個燃油嘅成本等等，有乜嘢計劃去提升你哋車長嘅起薪點或者係底薪去吸引多啲人入嚟呢？

梁乃鵬先生：（經傳譯員）假設我哋要請一個新車長，當時我哋實質我啱啱提到嘅措施之後，再加上每年嘅增薪點，喺2018年稍後實施新措施，即係當工會同意之後，我預計新嘅巴士車長嘅薪金大概月薪係23,000鈲，大概23,000鈲，呢

個係講緊工時十個鐘，大概收入係$23,000。

MR DUNCAN：（經傳譯員）係咪即係每日十個鐘，每個星期六日呀？

梁乃鵬先生：（經傳譯員）冇錯。正如我所講，我哋希望有一啲嘅商業車輛嘅司機係會考慮加入我哋公司，同時係希望可以吸引到新血，呢個就係我哋嘅策略。

MR DUNCAN：（經傳譯員）你哋公司有冇引入任何嘅措施去吸引年輕人加入呢？我哋琴日睇到一啲數據，我哋見到年輕人嘅數目係比中年人係少好多嘅。

李澤昌先生：有嘅，有嘅，我會畀少少時間我哋嘅 HR 嗰邊傾一傾。嗰個問題係其實今日，如果你講一個男性嘅車長，佢係喺個--頭先啱啱講咗嗰個實際嗰個勞動量其實係有限，所以除咗係個人工之外，好多工作嘅人其實--就算係前線嘅員工，唔係單講個人工，亦都講嗰個環境、待遇，其實巴士公司，我哋都提升咗譬如係嗰啲家屬卡，即係佢可以坐巴士係免費或者係有一啲喺我哋巴士公司可以做到嘅--營造個環境畀佢，相反個問題就係問，即係頭先你講緊譬如嗰啲女性車長係 5 至 6%，其實香港嘅男性同女性其實嗰個量唔係相差遠嘅，嗰度係一個好大嘅市場我哋去諗。

就你講緊我哋仲有啲乜嘢嘅要諗去做嗰樣嘢，或者蘇生可以補充少少。

蘇偉基先生：唔該，我哋係致力請一啲年輕嘅車長，...

MR DUNCAN：（經傳譯員）特別係年輕人。

梁乃鵬先生： Young people.

蘇偉基先生：Young people，冇錯，首先我哋就喺招聘嘅途徑嗰度，我哋除咗傳統用報章，我哋用啲社交嘅媒體，social media，因為呢啲就先可以接觸到younger generation，我哋亦都可以喺我哋公司嘅福利嗰度考量，正如頭先所講，我哋嗰啲康樂會，我相信對一啲年青一代會吸引啲，舉例如，係有啲係體育嘅活動，踢波、籃球、羽毛球或者係唱歌呢啲。

我哋亦都喺嗰個--頭先彭生講，編更嗰度係適合佢，佢哋有佢自己日常嘅作息，亦都喺個廠嗰度設立一啲康樂嘅設施吸引一啲年輕嘅人，我哋亦都喺廠車嘅接送嗰度，我哋做得更加滲透啲，就算佢住得遠啲，亦都唔好因為有所考慮係唔走入嚟。

我哋亦都喺 promotion 嗰度儘量主動，舉例如，我哋過往嗰半年嚟亦都舉辦多次嘅招聘日、開放日，喺車廠或者喺個巴士總站嗰度有我哋外展嘅招聘員工團隊去接觸一啲稍為年青嘅，希望佢哋新入行，呢啲就係我所講嘅舉措。

MR DUNCAN：（經傳譯員）你見唔見到有任何改善，就住年輕人嘅方面？

李澤昌先生：有嘅，我哋譬如啱啱想講嗰個係個車廠，我哋九巴有四個車廠，我哋開放個車廠嘅時候，就個車廠裏面除咗係有一啲車廠嘅設施，就吸引多啲年青

人，特別帶埋佢啲仔女嚟一齊參觀個車廠，等佢一家人知道如果佢爸爸或者佢媽媽做呢個職業嘅時候，嗰個環境係吸引到嘅，呢過去呢幾個月。

彭樹雄先生：另外，Mr Duncan，我想補充一個點啫，就係正話蘇生講咗，我哋為咗吸引年青啲嘅...

MR DUNCAN：（經傳譯員）我只係想知道呢啲嘅措施係咪有實際係得到任何嘅改善呢？

彭樹雄先生：我可以講係慢慢、慢慢有啲成效，特別係我哋希望我哋唔想一啲年青嘅車長覺得佢哋做車長係好似一啲所謂 dead end 嘅一種工種，我哋過去嗰九個月，我哋亦都係有好多嘅升級，包括直接由車長升督察，車長甚至升車務主任，其實我哋一路都做緊。我哋希望真係可以鼓勵到，亦都能夠真係可以 motivate 到一啲年青人加入我哋巴士嘅行列，呢個就係我哋真係好想做嘅。多謝 Mr Duncan。

李澤昌先生：過往係比較少一啲車長係升做 inspector，然後再去寫字樓，而家我哋係希望喺呢度--即係呢個 internal 個公司會做緊呢樣嘢。

梁乃鵬先生：（經傳譯員）基本上我哋對於一啲有才華嘅年輕人係有一個特快嘅晉升機會嘅。

MR DUNCAN：（經傳譯員）成為你哋車長有冇一個最低嘅年齡限制？

蘇偉基先生：可唔可以重複個問題？

MR DUNCAN：（經傳譯員）要加入你哋公司做車長，有冇一個最低嘅年齡要求？會唔會係二十幾歲或者三十歲？

蘇偉基先生：只要求職人佢有三年嘅私家車嘅駕駛執照，我哋都會考慮。

MR DUNCAN：（經傳譯員）唔該晒。梁博士，你喺稍早之前就係講過嘅，就係講及呢個加票價。我想問，政府當局對上係幾時批准過你哋加車費嘅呢？

蘇偉基先生：2014年。

MR DUNCAN：（經傳譯員）委員會有聽過有個乜嘢嘅機制係可以係增加呢個票價，或者係點樣去考慮呢個票價增加嘅申請嘅，我想問你哋公司有冇喺2014年之後申請過加價呢？

梁乃鵬先生：（經傳譯員）我哋冇嘅，或者亦都要解釋一下我哋嗰個立場嘅話，或者係想請你哋睇番呢個第95頁，同一個文件夾嘅第95頁。

主席：（經傳譯員）係，好呀，唔該。

梁乃鵬先生：（經傳譯員）第 95 頁，我哋係要申請嘅，我哋要根據一個方程式去申請加價嘅。喺第 33 段嗰度，第(vi)--唔係十六，對唔住，係第(vi)小段嗰度

列咗有一個方程式出嚟嘅，嗰度就講咗，0.5 去乘工資指數嘅改變，再加 0.5 係乘呢一個係消費物價指數嘅改變，然後就減 0.5 去乘嗰個係生產力嘅增長。如果用呢條算式計咗出嚟，而見到佢係等如或者係超過百分之二嘅話，我哋就可以向政府申請就係加價嘅。呢個就係嗰個觸發點。

不過喺過去嗰兩年，由於我哋嘅利潤，你知喇。當然另外仲有一樣嘢嘅，如果我哋嘅盈利係去到百分之九十七，呢個係以我哋嗰個資產淨值嚟到計嘅--平均資產淨值嚟到去計算嘅，如果超過嘅話，我哋亦都唔能夠申請加價嘅，所以 2016 年同埋 2017 年嘅情況就咁，我哋就不能係申請係調整票價嘅，因為就係唔可以根據呢個公式去申請加價嘅。

好唔同嗰個大哥，係地鐵，佢哋係自動可以加價，唔需要申請嘅，我哋嚟講，就唔同我哋係要申請去調整價格嘅，往往都係唔能夠加足我哋所申請嗰個幅度嘅。

MR DUNCAN：（經傳譯員）好，唔該。好明顯我跟住就想問呢個問題，梁博士，你對於呢一條方程式，你滿意唔滿意呢？

梁乃鵬先生：（經傳譯員）對唔住？

MR DUNCAN：（經傳譯員）你對呢條方程式你滿意唔滿意呢？

梁乃鵬先生：（經傳譯員）當然，如果你問滿唔滿意，梗係唔係喇，你點可以係期望我會話係滿意呢？

MR DUNCAN：（經傳譯員）你有冇咩嘢提議呢？即係應該係嗰個方程式係點寫呢？

梁乃鵬先生：（經傳譯員）我哋同運房局已經傾咗幾年㗎喇，到而家我哋都唔成功，我哋只能夠繼續同佢哋講，希望可以說服到佢哋就係話而家係時候要去檢討同埋改變嗰個方程式。

李澤昌先生：呢個 formula 有一個最大嘅問題就係佢係睇緊過去嘅情況，然後你先至 apply 一個 fare，其實啱啱講緊人工同埋油價，其實好多都係將來嘅情況。呢個 picture 如果永遠都係好似啱啱--好似而家我哋嘅油價係升咗，但係過去嗰一年、兩年，個油價係跌嘅，其實係有少少我哋滯後嘅，即係反映唔到，可以咁講。

梁乃鵬先生：（經傳譯員）主席先生，對唔住，我漏咗一個好重要嘅一點，呢一個油價，油價其實喺呢個方程式嗰度冇加埋落去嘅，我哋知道係譬如話用咗幾多錢係買呢個汽油，但係就呢度方程式反映唔到嘅，一個咁重要嘅元素，但係呢個方程式嗰度就係冇嘅。

主席：（經傳譯員）燃料唔係喺嗰個消費物價指數嗰度計算埋㗎？

陳祖澤先生： No.

MR DUNCAN：（經傳譯員）梁博士，請你睇番呢一個 THB 運房局嘅文件夾 2 號，特別係想請你睇呢個第 23 頁，THB-2 運房局 2 嘅第 23 頁，其實第 1 頁就係呢份文件嘅第一版，呢個係運房局發出嘅文件，嗰個標題就叫做「公共交通策略研究」，嗰個日期就係 2017 年嘅 6 月，你知唔知道係有份咁嘅文件？

梁乃鵬先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）「公共交通策略研究」。你去睇一睇呢個第 23 頁，呢份文件嘅第 23 頁。

梁乃鵬先生：（經傳譯員）你講 23？

MR DUNCAN：（經傳譯員）23，係。

梁乃鵬先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）你見到(d)嗰度就係話「票價調整安排」，見到嘛？

梁乃鵬先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）喺呢個 4.25 段，你就會見到嗰個方程式，而實質上，你亦都係喺你個陳述書，喺第 95 頁嗰度亦都係包括咗呢啲文字嘅，不如我請你睇跟住嗰版第 24 頁，就想請你就係睇第 4.28 段，嗰度就話之前所講嘅現有嘅安排就係喺 2006 年嘅時候就係引入嘅，呢個就係同立法會諮詢過之後做嘅，就係睇過 2009 年嘅檢討之後，呢一個安排係有將佢微調嘅。

2009 年就係政府係就呢一個票價調整嘅安排就係檢討過嘅，不過就基本上係保留嘅，不過個數據喺兩方面就係要加以就係調整嘅，呢度就講咗，第一，就係嗰個生產力嘅增長同埋嗰個乘客嘅優惠或者回贈計劃。呢度就有講就話百分之九點七，我諗剛剛你亦都係提過呢一個數字嘅。

梁乃鵬先生：（經傳譯員）係，就係嗰個固定資產平均淨值回報。

MR DUNCAN：（經傳譯員）政府就係有同專營巴士公司就係展開過商討嘅，亦都有講過就係有嗰兩項數據嘅更新嘅，政府就佢話會就預期喺 2018 年上半年就會將嗰個討論結果公布同埋將佢落實嘅，當然首先就係要得呢個特首會同行政會議嘅批准。喺方面，有冇聽過有啲咩進展、有咩嘢消息？

梁乃鵬先生：（經傳譯員）我係有同政府討論過呢個乘客嘅優惠計劃嘅。

蘇偉基先生：我可以補充...

梁乃鵬先生：（經傳譯員）唔好，唔好，等我講埋先，我有同政府係傾過嘅，我有香港政府講過嗰個乘客嘅優惠或者回贈計劃嘅，但係我哋仲未係達致一個共識嘅。

MR DUNCAN：（經傳譯員）呢度就講話係會交由行政長官會同行政會議去考慮嘅，

同埋亦都講過話係預期2018年嘅上半年係落實嘅，呢方面有冇咩消息呢？

梁乃鵬先生：（經傳譯員）冇，直到今日都係冇實施嘅。

MR DUNCAN：（經傳譯員）呢度所講及嘅建議，即係睇番第25頁頂頭嗰度嘅建議，如果係獲接納嘅話，會唔會就係釋除你嘅疑慮呢？即係關乎呢一個票價調整安排方面你嘅擔心嘅地方？

陳祖澤先生：（經傳譯員）鄧律師，直到今日，我哋都仲未知道嗰個檢討嘅結果，亦都唔知道佢哋係有上到去行政會議嘅，呢個應該未發生嘅，你睇到呢度所講嘅就係--或者不如咁，我哋睇番另一版，4.29段最尾嗰度就話嗰個顧問建議就係百分之九點七呢個觸發點就應該稍為向下微調嘅。

主席：（經傳譯員）對唔住，你讀緊係邊一段呀？

梁乃鵬先生：（經傳譯員）第25頁。

陳祖澤先生：（經傳譯員）4.29段。

主席：（經傳譯員）係，我搵到喇，唔該晒。

陳祖澤先生：（經傳譯員）嗰個百分之九點七嘅觸發點，嗰個觸發嘅水平，如果係要改嘅話，純粹從財務嘹到計，對九巴嚟講，係壞消息嚟嘅。

MR DUNCAN：（經傳譯員）以而家嘅情況嚟到計，亦都從九巴嘅角度，睇嚟，就係即時嚟講，就唔會係喺呢一個票價安排方面係有啲乜嘢--對你嚟講係一個改善，咁樣嘅總結啱唔啱呢？

陳祖澤先生：（經傳譯員）啱。

MR DUNCAN：（經傳譯員）梁博士，剛才就講到地鐵就係大佬，你哋係細佬，個情況就係會繼續。

梁乃鵬先生：（經傳譯員）我哋係窮親戚。

MR DUNCAN：（經傳譯員）我而家想講番嗰個培訓。

羅先生：（經傳譯員）我有一個關於成本嘅問題，你提到燃油嘅價格係會影響你哋公司嘅收入，你見到咁多年嚟個情況有冇穩定過呢？

梁乃鵬先生：（經傳譯員）政府會係叫九巴去自己處理呢個問題嘅，喺多年前我哋係同政府去討論即係徵收一個附加費嘅可能性嘅，即係喺我哋嘅車費當中，呢個附加費就係因為燃油價格大幅上升嘅，但係最後政府就不同意，所以就冇實行到。

當然我哋考慮過好多唔同嘅方案，喺呢方面係節省成本嘅，但係我哋就決定就冇採納任何對沖嘅安排，因為我哋認為就住油價去對沖唔係一個好嘅選擇

嚟嘅。不幸地，我哋見到國泰航空嘅例子，佢哋係因為對沖而係虧損咗好多嘅。

我哋同期油嘅供應商係取得共識，佢哋係會以某一個年期，譬如話三年，向我哋供應燃油，然後我哋就同意咗呢個汽油價格嘅一個上限，我哋同意嘅上限就係每桶 85 美元嘅。如果汽油嘅價格係超過 85 美元，我哋仍然都只需要係畀 85 美元一桶嘅啫。

另一方面，如果汽油嘅價格下降到每桶 40 或者 45 美元，我哋亦都係只需要畀呢一個市價嘅啫，即係最低嘅價格係 45 美元一桶嘅，暫時我哋冇一個咁嘅最低價格。

李澤昌先生：或者我喺呢度補充，其實我哋就冇 hedge 到 oil 嘅，因為油價係佔我哋個基礎好大，主席頭先講咗，就係我哋其實係同啲油公司有一個協議，就係我哋係 cap 咗佢嗰個 gas oil，即係個 crude oil，你睇下個牌價，加多辣個十零蚊嘅就係 gas oil，咁 cap 咗 85 蚊。85 蚊以上嘅我哋就唔會再畀多過，但係以下，我哋畀緊佢嘅 spot rate，然後再加一個 premium，即係當然呢個係我哋之間一個 trading 嘅銀碼，我唔方便講，即係話喺個 floor -- 其實我哋頭嗰兩年都冇-- floor 都冇乜意思，因為 gas oil 唔會變零嘅，大概都係三十五、四十蚊嘅，我哋而家嚟緊都有一個 floor，大約係四十零蚊嘅，我哋就會 trade 緊喺嗰個之間裏面，咁係為咗保護自己。

就我哋其實就將嗰個 risk 就畀咗個油公司去做，我哋發覺呢個係--即係好似主席講，呢個係自己係諗方法去 protect 番我哋喺油 cost 係佔都差唔多--曾經佔過 20%我哋嗰個 expenses，都相當之犀利。

另外有一個都要講嘅，就係我哋嗰個 toll charge 嗰個都相當之高嘅，因為好多人都唔知道其實我哋 KMB 係照畀足過海隧道費，無論係政府嘅隧道，我哋都畀足，呢個都係相當之高嘅，所以我哋係呢幾個大嘅數據我哋係睇得都幾緊。

MR DUNCAN：（經傳譯員）講番呢個培訓嘅問題，請大家搋去 KMB-1 文件冊嘅 145 頁，我哋睇緊 2018 年 2 月 10 號嘅行動計劃，係呈交咗畀運輸署嘅當日，喺第 3 段，即係第 145 頁嘅第 3 段至到第 147 頁嘅第 7 段，我哋就見到培訓嘅行動計劃，我就想先講第 3 段，入面就講到個問題就係琴日我哋都有提過嘅，「所以所有嘅車長嘅申請人係會有同樣嘅要求嘅」...

黃祥明先生：同意。

MR DUNCAN：（經傳譯員）...「無論佢哋係全職或者係兼職都好」，啱唔啱呀？

黃祥明先生：其實喺嗰個時間之後，我哋已經冇再招聘 part-time，所以全部都係用呢個準則去聘請嘅。

MR DUNCAN：（經傳譯員）會唔會有一啲兼職車長每日係--或者每日工作--或者每

星期工作超過十八小時呢？

蘇偉基先生：（經傳譯員）有嘅。

MR DUNCAN：（經傳譯員）佢哋係會接受相同嘅訓練，係咪呀？即係同全職車長去比較。

蘇偉基先生：（經傳譯員）係嘅。

MR DUNCAN：（經傳譯員）唔該晒。就請你自己睇睇呢個新培訓計劃嘅內容，就係喺第3至6段列咗出嚟嘅，同埋第7段，就住第7段，佢就話「九巴嘅駕駛導師數目應該係增加到110名」，而根據行動計劃，呢啲申請人必須喺18年嘅6月30日前完成所有嘅培訓同埋考試，先至可以完成一個有八十一位駕駛導師嘅團隊，Has that been completed?

黃祥明先生：已經係完成咗，而家我哋已經係有八十一位嘅訓練導師。

MR DUNCAN：（經傳譯員）我而家想你睇另一份嘅文件冊，就係TD-1，第403頁。呢份文件就係今年7月由運房局發出嘅，呢個就係7月25號係呈交畀立法會嘅，你見唔見到？

黃祥明先生：有，見到。

MR DUNCAN：（經傳譯員）喺403頁就係一啲背景資料，佢係關於成立一個工作小組嘅，就係就住2月10號嘅嗰一宗意外嘅，你見唔見到呀？

黃祥明先生：係，見到。

MR DUNCAN：（經傳譯員）你見到喺(a)同(b)段，就係描述咗嗰個覆蓋嘅範圍或者工作範圍，其中一項工作就係去檢討專營巴士營運商嘅培訓安排。

黃祥明先生：係，喺(b)項嗰度有咁寫。

MR DUNCAN：（經傳譯員）喺頁底就係有一個註釋就講到呢一個工作小組嘅組成嘅，就包括咗五個專營巴士營運商同埋巴士製造商同埋運輸署嘅，我想問在座各位有冇人係呢一個工作小組嘅成員？

蘇偉基先生：如果講番九巴同埋龍運巴士，係由我本人蘇偉基、我哋車務總監梁健宏同埋我哋培訓部嘅主管黃先生呢三位係代表呢兩間公司。

主席：（經傳譯員）係咪仲有個--即係另一個--轄下嘅小組係處理一啲技術嘅問題？

蘇偉基先生：係。

主席：（經傳譯員）九巴係邊個去代表呢一個小組呢？

梁健宏先生：技術層面嗰度就係我本人同埋我另外一位工程師。

黃祥明先生：有關訓練就係由我去出席呢個會議。

主席：（經傳譯員）另外一位工程師嘅名字係乜嘢呀？即係出席個小組。

梁健宏先生：（經傳譯員）佢叫做 Ivan Ho。

主席：（經傳譯員）黃先生，喺呢一個培訓小組，你係咪唯一嘅代表呀？

黃祥明先生：訓練係由我嘅，就喺呢個訓練方面係我一個人去出席嘅啫。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）喺第403頁。

主席：（經傳譯員）喺我哋繼續之前，鄧律師，你會唔會去了解一下其他嘅專營巴士公司同埋運輸署嘅代表係邊個？

MR DUNCAN：（經傳譯員）係嘅，會嘅。邊個係代表運輸署出席呢？

蘇偉基先生：之前係由一個助理署長 Rachel Kwan 去做 chairperson，之後佢退休休假，就由副署長 Macella Lee 係喺嗰個 call meeting 係做 chairman。

MR DUNCAN：（經傳譯員）運輸署有冇其他嘅代表？

蘇偉基先生：好多，當然我未可以喺而家逐一去記起佢哋嘅名字，分別係有一啲 principal transport officer、transport officer、senior transport officer，佢分別係來自--佢入面有個 floor 叫做係巴士及鐵路小組嘅，亦都有一啲係一個 road 嘅 engineering 嘅小組嘅出席，但係個別名稱我記唔到。

梁健宏先生：亦都有啲係...

主席：（經傳譯員）呢啲會議有冇會議紀錄㗎？

蘇偉基先生：有嘅。

主席：（經傳譯員）你可唔可以向我哋提供？

蘇偉基先生：可以。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）我就請你睇另一個文件夾，就係 CTB...

主席：（經傳譯員）首先，我哋可唔可以都得悉其他嘅專營巴士公司有派咗邊個代表定係你提供呢個會議紀錄度會顯示出嚟？

蘇偉基先生：可以，嗰度都見到佢嘅名字。

主席：（經傳譯員）唔該晒。鄧律師。

MR DUNCAN：（經傳譯員）多謝主席。想大家睇 CTB 同埋 NWFB-3 號文件冊嘅，喺 588 頁嗰度，你見到佢就係講及加強專營巴士安全工作小組，嗰個日期就係 18 年 3 月 13 號。

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）嗰度就有個附件嘅，附件嗰個標題就係「加強專營巴士安全工作小組」。

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）去到 590 頁，見到嗰個標題就係話「成員」？

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）呢度有啲人名嘅，包括就係運輸署嘅代表，呢個幫唔幫到你呢？

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）每次開會係咪都係同一班人呢？

蘇偉基先生：（經傳譯員）差唔多都係。

MR DUNCAN：（經傳譯員）係，睇嚟呢度就係冇巴士製造商嘅代表名喺度嘅。

蘇偉基先生：喺 bus manufacturer，佢哋係出席嗰個叫做 technical subgroup 嘅 meeting，呢個係一個 main meeting，佢哋係冇出席嘅。

MR DUNCAN：（經傳譯員）唔該。講到運輸署嘅代表，佢哋亦都有出席嗰啲下面嘅小組嘅會議嘅，係咪呀？

黃祥明先生：佢亦都喺呢個 subgroup 裏面就將呢度部分嘅運輸署同事就同其他，包括我在內嘅，專利巴士公司嘅同事係一齊開會。

MR DUNCAN：（經傳譯員）嗰個下面嘅小組係邊個擔任主席呢？

黃祥明先生：如果我冇記錯，應該係 Amy Tse。

MR DUNCAN：（經傳譯員）運輸署嘅，係咪呀？

黃祥明先生：係，冇錯，佢係負責呢個 training 嗰面嘅。

梁健宏先生：Technical 個 subgroup 有幾個人都做過嘅，David Tsang 係做第一次嘅，之後亦都有佢--因為佢應該係退休，有其他佢啲代替者，包括最褸屘嗰次有個 Assistant Commissioner 陳英傑先生。

MR DUNCAN：（經傳譯員）喺TD-1嘅403頁，嗰度就話主要嘅巴士製造商，都有邀請佢哋出席呢一個技術嘅小組嘅，有冇佢哋出席過呢啲技術小組嘅會議呢？

梁健宏先生：有嘅。

MR DUNCAN：（經傳譯員）嗰度就有亞歷山大丹尼斯、富豪、猛獅，啲名就有喺度，邊一個有出席呢一個下面嘅工作小組嘅會議嘅？

梁健宏先生：Alexander Dennis就係Andrew Boulton，Volvo就係Julia，（經傳譯員）唔記得咗佢個姓，Jacky Chan就係都係代表富豪嘅。

MR DUNCAN：（經傳譯員）富豪就係Julia，Jacky Chan係邊度？

梁健宏先生：（經傳譯員）Jacky Chan都係富豪嘅。

MR DUNCAN：（經傳譯員）猛獅呢？

梁健宏先生：（經傳譯員）Rex Wong係猛獅嘅。

MR DUNCAN：（經傳譯員）呢啲係咪都係本港佢哋嘅代表呢，定抑或佢哋係主要喺海外嘅呢？

梁健宏先生：（經傳譯員）係當地--我哋香港佢哋嘅工程師。Julia Lu，佢個姓英文係L-U。

MR DUNCAN：（經傳譯員）剛才主席就問過，呢一啲工作小組係有冇會議紀錄嘅，你就話有嘅，亦都會提交嘅，至於底下工作小組--下面嘅小組個會議又有冇紀錄嘅呢？

梁健宏先生：（經傳譯員）由主席嚟到係分發畀小組嘅成員嘅，交畀我哋嘅。

MR DUNCAN：（經傳譯員）包唔包括埋下面嘅小組嘅會議紀錄呢？

梁健宏先生：（經傳譯員）係有不同嘅會議紀錄嘅，係有嘅。

MR DUNCAN：（經傳譯員）你畀會議紀錄嘅時候，可唔可以唔係淨係畀工作小組，係底下嘅小組嘅都畀我哋，好唔好呀？

梁健宏先生：（經傳譯員）可以。

主席：（經傳譯員）會唔會你就好似係暗示而家係小休呢？我哋而家係休息二十分鐘，剛才你唔停，又冇出聲，二十分鐘。

<u>上午11時36分押聆訊押後</u>

上午11時58分恢復聆訊

出席人士如前。

主席：（經傳譯員）鄧律師。

MR DUNCAN：（經傳譯員）多謝主席。我哋頭先講到TD-1文件冊嘅403頁，呢個文件就係呈交畀立法會嘅，內容就係關於點樣改善專營巴士嘅安全。我有一個問題，正如文件第一句指出，呢啲係建議嘅措施嚟嘅，你哋公司認唔認為你哋係必須要採取呢啲措施呢，定係你哋公司係覺得呢啲只係建議嘅措施，即係正如文件所講？

蘇偉基先生：可以喺文件嘅413頁，annex A嗰度，佢每一個嘅recommendation都會係有一個time frame係畀業界去考慮，呢一個就係technical嗰方面嘅bus feature，如果係巴士車長培訓嗰個，佢有一個實務守則，業界係需要遵循，亦都喺個實務守則最屘嗰段就係加入咗公司本身係要有一個監控嘅程序，審計嘅程序，係要肯定嗰個實務守則係有遵從，亦都去番公司嘅董事會匯報。

MR DUNCAN：（經傳譯員）講番嗰啲技術事宜，我嘅理解啱唔啱呀，就係你哋就會做試驗，然後就作一個決定，就睇下有邊啲係可以落實嘅，係咪咁呀？

李澤昌先生：喺工程方面其實就已經好多都係進行緊㗎喇，佢係recommend，但係其實喺我哋公司角度嚟講，都係一定會係盡努力去嚴格去執行緊呢方面嘅嘢。

MR DUNCAN：（經傳譯員）唔需要講嗰個文件嘅細節住嘅，不過睇份文件，你都會知道如果呢個建議全部都係落實嘅話，應該對於巴士車長嘅培訓以及巴士車長如何去履行佢嘅職責都會有好大影響嘅，同意嘛？

蘇偉基先生：（經傳譯員）同意。

MR DUNCAN：（經傳譯員）我哋留意到工會同埋車長都冇代表喺呢一個工作小組嗰度嘅，我就想問你哋有冇諮詢呢個巴士車長，又或者有冇諮詢工會呢？即係當呢個工作小組開會嘅時候有冇咁做呢？

蘇偉基先生：呢個我要講多少少，喺個working group入面，運輸署係冇邀請工會代表，喺個談-- discussion去到第三次會議，大家都知道有一個嘅guideline，就係個bus captain嘅training嘅guideline，就提議係由巴士公司自己個別按需要去同工會係有一個consultation，公司--我講緊係九巴、龍運睇到呢個guideline，其實佢係將當時所有巴士公司各自對巴士車長嘅培訓，大家就講晒然後你點樣做法，然之後運輸署就將佢融會，然之後就出咗一個實務守則。

喺呢個實務守則入面嘅嘢，公司係達到所有佢所講嘅要求，亦都係現時做緊嘅，所以我哋係冇同我哋嘅工會或員工去諮詢，原因係已經現有持之以恆執行緊，係冇新嘢嘅，對於九巴嚟講。

MR DUNCAN：（經傳譯員）嗰個技術裝置嗰方面，呢度係有一啲建議係加啲咩嘢技術嘅裝置嘅，又想問下，同工會方面有冇咩諮詢呢？

蘇偉基先生：都係頭先所講，佢係交番畀公司去做個諮詢，我哋要睇番佢提議嘅幾個大點，佢第一個大點就係話全車--喺新添購置嘅車係有安全帶，今日喺九巴嘅車隊其實已經有四十四架車係全車有安全帶，有大部分嘅車長都有機會係駕駛過呢啲車輛㗎喇，好耐㗎喇，所以呢個唔係新事物。

第二樣嘢，佢嘅舉措，就係話要有一個實時嘅超速提示，咁呢樣喺早兩日嘅聽證會大家都知道，公司而家係有個實時嘅車速提示，亦都係現有㗎喇。運輸署可探討就係話除咗70咪，就要做埋50咪，我哋講咗好多，我唔重複喇。

第三個，喺嗰個 bus feature，就係話提示有睡眠嘅一個裝置，呢個公司用一個方式，就係話我哋就搵四部，用一個先導嘅形式，我哋純粹提示，我哋唔會記錄，亦都唔會因為咁而做一個紀律處分，就係希望車長真係試過，佢先至可以表達到究竟呢件裝置對佢哋有冇幫助。

所以其實喺 bus feature 嗰度，一，講咗，安全帶係現有㗎喇；提示睡眠，我哋用四部去吸納員工嘅意見；至於即時一個超速嘅提示，公司亦都係現有㗎喇。

MR DUNCAN：（經傳譯員）唔該晒。你講番嗰個實務守則，或者我哋可以係打番出嚟，我相信喺470嘅。

主席：（經傳譯員）係8月9號畀我哋嘅，係咪呀？

MR DUNCAN：（經傳譯員）係。請你睇番463頁，就係呢一個文件夾嘅463頁，你會見到就係運輸署8月9號嘅函件，嗰度就係回應我哋專責委員會喺呢個7月23號發出嘅信件嘅，你喺471頁嗰度，至到473頁，嗰度就係有呢個實務守則，嗰個日期就係2018年嘅8月嘅，睇到嘛？

主席：（經傳譯員）對唔住，實務守則係邊度呀？

MR DUNCAN：（經傳譯員）係471。

主席：（經傳譯員）係，唔該晒。我諗運輸署就話畀我哋聽呢個係7月就落實㗎喇，係咪呀？

MR DUNCAN：（經傳譯員）係，的而且確係有個情況係咁，主席。去四七--對唔住，係435頁--對唔住，應該去427頁，唔該。

主席：（經傳譯員）嗰個就睇到個日期，係咪呀？

MR DUNCAN：（經傳譯員）係呀，嗰個就係運輸署嘅信嚟嘅。日期就係7月20號，嗰度亦都有個附件嘅。喺附件，你就係由428頁開始去到435頁嘅，嗰度第一個格嗰度就係話運輸署最近係發出咗一份實務守則係畀專營巴士營運商，呢個關乎係巴士車長嘅培訓等等。我想問運輸署係幾時係發出呢個實務指引畀九巴嘅？

蘇偉基先生：（經傳譯員）係8月6號。

MR DUNCAN：（經傳譯員）運輸署有冇畀到嗰個守則你呢？即係喺8月6號之前有冇呢？

蘇偉基先生：（經傳譯員）有嘅。（直接用本地話說）嗰個practice note係嗰個working group嘅output嚟嘅，佢喺7月25號上立法會個Transport Panel，佢係冇嗰個文件嘅，大家睇到。之後喺8月6號，我哋就收到一個傳真，佢就話正式係推出，要我哋執行。

MR DUNCAN：（經傳譯員）8月6號之前係咪已經向運輸署發出咗畀你哋呢？

梁健宏先生：（經傳譯員）唔係正式嘅。

主席：（經傳譯員）你話非正嘅，係咪之前有個非正式嘅畀你呢？

蘇偉基先生：可唔可以再問多一次？我掌握唔到個題目。

主席：（經傳譯員）運輸署就話畀委員會聽，書面陳述就話佢哋最近就係出咗個實務守則，佢哋就話畀我哋聽就係發畀呢一個專營巴士營運商嘅，就話係7月20號咁講嘅，所以佢哋亦都係提供咗一份文件，就日期係8月嘅，你話你哋係有一份日期係8月6號，有冇一個早啲嘅版本嘅實務守則呢？而佢哋嘅內容亦都同運輸署所講嘅係符合呢？

蘇偉基先生：我可以提供番我收到嘅乜嘢，之前嗰啲係嗰個會議嘅attachment，係一個discussion paper。

主席：（經傳譯員）你邊一日係收到嗰一個實務指引？

蘇偉基先生：8月6號。

主席：（經傳譯員）再早啲就冇？咩嘢形式都好，再早啲有冇呢？

蘇偉基先生：有，係一個attachment落嗰個-- as an attachment of呢個discussion paper of嗰個working group嘅meeting。

主席：（經傳譯員）嗰份文件日期係幾時呢？

蘇偉基先生：（經傳譯員）8月中或者8月初。（直接用本地話說）我而家記唔到。

主席：（經傳譯員）你有冇文件副本？

蘇偉基先生：有。

主席：（經傳譯員）可唔可以交畀我哋委員會呢？

蘇偉基先生：會。

主席：（經傳譯員）唔該。鄧律師。

MR DUNCAN：（經傳譯員）唔該主席。好喇，我哋睇番呢個實務守則，TD-1 嘅 470 頁，我哋自己都睇到究竟嗰個內容係啲咩嘢嚟嘅，不過有一樣嘢就想問你嘅，係第 4 段，睇番 471 頁，講到嗰個最低要求，工作小組講到話入職培訓嘅時候就講咗，就話喺課堂培訓方面係有啲乜嘢嘅要求嘅，應該要幾多時間嘅，另外就係路上駕駛嘅培訓又應該有幾多時間嘅，呢度亦都係分開全職同兼職車長嗰個要求係點樣樣。

我想問，九巴--我哋係知道你哋較早時候有講過嗰個行動計劃，你就話打算所有嘅車長你都會無論佢係全職定抑或兼職都會係一視同仁，你哋係點睇呢？

黃祥明先生：喺討論呢個事項嘅時候，係其他嘅專營巴士公司都係出席嘅，每個公司因為佢個訓練方面都有唔同嘅條件或者佢哋嘅需求，所以運輸署就因應各個巴士公司嘅唔同情況，就訂定咗呢個最低嘅要求，我哋睇番呢個事項係寫「最低嘅要求」。所以有啲巴士公司佢哋係會仍然係聘請一啲嘅叫做 part-time 嘅車長，而我好清楚咁表示咗我哋九巴公司已經係停止咗聘請呢個 part-time 嘅車長，但係運輸署係需要因應其他嘅同行去制定呢個指引，所以訂定咗有埋呢個 part-time 車長嘅範疇喺裏面，但係呢個並不適用於九巴嘅。

MR DUNCAN：（經傳譯員）我想問，公司喺自己嘅培訓嘅計劃裏面，即係你喺嗰個行動計劃已經列出你嗰個培訓計劃喇嘛，同埋喺其他交畀我哋嘅文件嗰度都有提過嘅，會唔會因而受影響要改呢？

黃祥明先生：冇嘅，我哋無需要更正或者更改，因為呢個提議係我哋九巴提出之後，佢運輸署因應而係制定。

MR DUNCAN：（經傳譯員）唔該晒。我而家就唔再講培訓呢個話題，我就想講另一個議題嘅，請你睇 KMB-1 文件冊 129 頁嘅，原有嘅嗰份文件就係第 128 頁嘅，我就會睇番個翻譯本，就係 129-1 嗰一頁嘅，呢份就係聲明書，呢份文件嘅目標同埋作用係乜嘢呢？

蘇偉基先生：呢份 declaration 其實係喺 2、3 月，公司成立咗一個調查委員會，就著嗰個大埔意外之後嘅一個建議，個理念就係“know our employees”，我哋招聘車長，但係我哋確認要對我哋招聘嘅員工多啲認識，所以就喺幾個範疇嗰度透過呢張 declaration 去認知，第一，佢有冇喺外間係有其他嘅僱用，會唔會影響佢工作；第二，就係佢有冇一啲嚴重病歷，係會影響佢嘅工作；第三，佢有冇一啲過往違例駕駛嘅紀錄；去到第四，就係有冇一啲刑事嘅

紀錄。我哋喺做招聘嗰陣時就會睇嗰個投考人佢填嘅資料而作出一個嘅考慮係咪去招聘佢。

MR DUNCAN：（經傳譯員）喺大埔意外之前，有冇任何嘅好似呢份咁嘅表格係要畀一啲申請人去填寫呢？

蘇偉基先生：冇咁仔細，但係相對嘅工作係有做嘅，舉例如，就係查佢嗰個違例駕駛，我哋係有做嘅，病歷，雖然唔使佢自己 declare，但係亦都係有入職前嘅驗身。

MR DUNCAN：（經傳譯員）嗰份表格有冇包括係即係要填寫申請人有冇其他嘅工作呢？

蘇偉基先生：之前係冇。

MR DUNCAN：（經傳譯員）你有冇嗰份舊表格嘅版本可以提供呢？

蘇偉基先生：可以提供。

主席：（經傳譯員）係，請你提供。

MR DUNCAN：（經傳譯員）係邊個需要填寫呢份聲明書呢？

蘇偉基先生：申請職位嗰個投考人。

MR DUNCAN：（經傳譯員）呢份表格係咪喺聘請申請人嘅時候需要簽署㗎？

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）公司係持續去進行啲乜嘢嘅檢查去睇下究竟全職同埋兼職員工喺外面有啲咩嘢工作呢？

蘇偉基先生：我哋係有賴嗰個投考人佢自己做一個 declaration，佢係一個 in good faith 去填佢嘅資料。

MR DUNCAN：（經傳譯員）換句話講，當有人係開始工作嘅時候，即係譬如話如果有個員工係為你工作咗五年，有冇任何持續嘅聲明要求呢，或者有冇其他嘅措施去了解譬如話一名兼職嘅車長喺外面有冇其他嘅工作呢？

蘇偉基先生：我哋自己入面有個員工嘅手冊 staff handbook，入面亦都有規定員工如果係從事外間嘅兼職，係需要申報嘅。

MR DUNCAN：（經傳譯員）換句話講，你係完全依賴員工去申報啲咩嘢資料畀你，係咪呀？

蘇偉基先生：佢係有責任，因為嗰個員工手冊係所有好多規矩都擺晒喺度，佢係需要遵循嘅。

MR DUNCAN：（經傳譯員）你哋採取咗啲咩措施係去執行員工手冊入面嘅規矩呢？

蘇偉基先生：如果發覺佢冇遵從，而我哋發覺外面有兼職，我哋會有紀律處分，亦都過往我哋發覺我哋有車長係做啲咁嘅嘢，係解僱咗嘅，嗰個同事。

主席：（經傳譯員）但係有冇任何檢查或者盡職審查嘅工作呢？

蘇偉基先生：冇。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）你有冇任何措施去改變呢個情況呢？換句話講，即係公司會唔會有一啲嘅檢查嘅安排去了解員工可能參與嘅其他嘅工作呢？

蘇偉基先生：會。

MR DUNCAN：（經傳譯員）琴日...

主席：We didn't get a translation of the answer.

蘇偉基先生：（經傳譯員）係，我哋會主動考慮。

MR DUNCAN：（經傳譯員）我哋冇收到任何嘅聘用合約嘅，會唔會係提供呀？

蘇偉基先生：我哋會提供。

MR DUNCAN：（經傳譯員）我請你揭去第109頁。

主席：（經傳譯員）首先係咪完成咗呢個議題喇？

MR DUNCAN：（經傳譯員）冇錯。

主席：（經傳譯員）你提到員工手冊，你知唔知係喺文件冊入面嘅頁數係幾多呀？鄧律師，你知唔知道係邊一頁呀？我哋就可以好快咁睇一睇。

蘇偉基先生：如果我搵到，我提供。

MR DUNCAN：（經傳譯員）我哋有嗰個附錄嘅頁數，就係附錄 1a-iii-7 嘅應該係。呢個就係戶外車務嘅員工手冊嘅，係咪呀？

蘇偉基先生：喺呢個 bundle KMB-8, page 3072，第 1 點。（經傳譯員）英文版，就喺3042頁嘅。

主席：（經傳譯員）唔該晒。呢個就係關乎全職嘅員工嘅，係咪呀？

蘇偉基先生：（經傳譯員）係。

主席：（經傳譯員）就住兼職員工，有冇任何安排呢？

蘇偉基先生：正如頭先所講，而家我哋嘅車長係符合每周十八小時，連續四周，係一個持續性嘅僱用，我哋當咗佢根本係一個 full-time employment，所以佢都要受呢個 1.8 嘅條款係約束。

主席：（經傳譯員）喺大埔交通意外之前，當你聘請兼職車長嘅時候，有冇一個要求係要求佢哋申報其他嘅工作，喺聘請佢哋嘅時候？

蘇偉基先生：冇。

主席：（經傳譯員）唔該。

MR DUNCAN：（經傳譯員）至於你哋嘅前員工又係點呢？佢哋而家可能係可以工作十個鐘或者十八個鐘，你會當佢哋係全職員工定係兼職員工呢？

蘇偉基先生：（經傳譯員）全職員工。

MR DUNCAN：（經傳譯員）如果佢哋有睇呢個要求，佢哋知唔知道--即係佢哋會唔會當自己係全職員工，當佢哋睇呢本員工手冊嘅時候？

蘇偉基先生：佢哋係我哋曾經嘅僱員，佢哋退休之後，從事--退休再續聘，所以佢哋係得悉呢個 1.8 嘅條款。

MR DUNCAN：（經傳譯員）你有冇計劃去修改條款 1.8 呢，就住呢啲招聘安排？

蘇偉基先生：會。

MR DUNCAN：（經傳譯員）請睇番 KMB-1 文件冊第 109 頁，呢個就係有一啲嘅詳情，就住車長嘅薪酬，首先想你睇下呢一個月薪水平，喺 2004 年之前聘請嘅員工同埋 2004 年之後聘請嘅員工，就有一個比較，你可唔可以解釋點解兩者之間有區別？

蘇偉基先生：呢度要講啲歷史，因為喺 2003 年，大家知道香港嘅經濟唔係好，當時係有個 SARS，喺 2003 年，公司係冇招聘新嘅車長，當然當時亦都個車務係有個萎縮喺度。喺 2004 之後，我哋再請番新嘅車長，因應當時嗰個勞工市場，當時個市場嘅工資水平，我哋對新入職嘅車長係有一個嘅調節，反應番當時市場，所以同係月薪車長，我哋分咗兩組，一組就係 2004 前佢哋現有--嗰時嘅薪酬我哋唔會改變佢，但係喺 2004 之後，就因應番當時嗰個嘅就業市場經濟環境，我哋係按市場水平係畀咗個工資出嚟，所以分開兩組。

MR DUNCAN：（經傳譯員）唔該晒。我哋睇番(E)項，就係呢一個分更嘅津貼，喺 2018 年嘅指引度有提到呢一個分更嘅津貼嘅。

蘇偉基先生：幾樣嘢要講一講先，2018 年嗰個 guideline，正如之前我哋講，係喺 2019 年第二季實行嘅，現時公司遵循政府嗰個嘅 guideline 就係每日十四小時，其中十一就係可以做駕駛職務，即係話有三小時係休息，公司而家係有同事係行走呢個叫做 split duty，當 assign 呢個 split duty 畀佢，佢就

會申領有個 allowance，就一千九百五十幾紋，佢中間大約係有三個小時係休息，呢三個小時，我哋用呢一個 allowance 畀佢。

主席：（經傳譯員）換句話講，你目前就係跟番 2010 年嘅指引？

蘇偉基先生：係。

主席：（經傳譯員）唔該。

MR DUNCAN：（經傳譯員）呢個分段更嘅派更，你新嘅指引落實之後，仲有冇呢個分段更嘅呢？

蘇偉基先生：呢個會考慮，但係究竟係點樣改法呢，因為會牽涉到同員工會溝通，我哋會係考慮，但係你話怎樣，我唔可以講，會有。

MR DUNCAN：（經傳譯員）即係仲會有分段更？

蘇偉基先生：有。

MR DUNCAN：（經傳譯員）嗰個津貼係咪一樣定抑或會改呢？

蘇偉基先生：會考慮優化。

MR DUNCAN：（經傳譯員）呢個點樣計嘅呢？你話$1,951.50 係一個月，司機唔係話成個月都做分段更嘅，係咪呀？

蘇偉基先生：呢個係唔會嘅，因為我哋派更，如果嗰個係月薪車長，佢係返 split shift duty，佢會整個月都係返 split shift duty。

MR DUNCAN：（經傳譯員）一個月有幾多日司機係要做嘢呢？二十七日？三十日裏面--三十一日裏面二十七？

蘇偉基先生：每六日有一個休息日，如果假設當個月係冇公共假期，佢應該係三十天嘅月份就返二十六天。

MR DUNCAN：（經傳譯員）就會讓佢係收到$1,951.50，即係額外嘅？

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）我想問，分段更嘅車長，你會唔會安排佢哋就係一個月唔需要返足全個月呢？就譬如五日或者十日。

蘇偉基先生：有咁嘅機會嘅。

MR DUNCAN：（經傳譯員）如果係嘅話，就唔係全個月，佢哋又幾多錢嘅津貼呢？係咪千九定係點呢？

蘇偉基先生：（經傳譯員）係按比例。

MR DUNCAN：（經傳譯員）係日計嘅比例吖，定抑或點樣計算出嚟嘅呢？

蘇偉基先生：睇番佢當月返工嘅日子，然之後睇番佢喺呢段日子有幾多日係做split duty，就乘番頭先講嗰個一千九百五十幾蚊嘅數字，就得出佢當月享有嘅split shift duty嘅allowance。

MR DUNCAN：（經傳譯員）大概係計起上嚟，一日有幾多錢呀？

蘇偉基先生：約莫70蚊嘅。

MR DUNCAN：（經傳譯員）落去111頁，表3，日薪嘅待遇，我哋見到個分段更嗰個津貼，喺(H)嗰項，個數字就係$21.90，我見到(H)嗰度係逐個鐘頭計嘅，如果一個人就係做分段更，佢做咗一個鐘，換句話講，係咪即係會多收$21.90？佢會有三個鐘頭嘅休息嘅，即係話係有60蚊，係咪咁計？

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）即係話嗰個待遇唔同，月薪同日薪嘅待遇就不同？即係如果淨係睇呢個分段更嘅津貼，佢哋嘅待遇唔同喇？

蘇偉基先生：要睇整體，唔可以淨係睇一個split duty allowance，因為其實日薪佢哋嘅員工佢個底薪亦都係比月薪高，所以首先兩者有差異，正確，但係差異原因係要睇整體嘅。

MR DUNCAN：（經傳譯員）公司會用嗰個新嘅指引，如果你亦都推行呢個分段更嘅話，我想問，呢一個津貼係咪都會去檢討呢？

蘇偉基先生：（經傳譯員）會嘅。

MR DUNCAN：（經傳譯員）或者我哋將嗰個新嘅指引嗰度打出嚟，呢個喺KMB-2嗰度會有嘅，61頁，而家目前仲係有效嘅，就係舊嘅指引，就喺前面嗰版，就係60頁嗰度就有個資料嘅，亦都可以將兩者一齊睇嘅。目前，一般正常嘅更分係點呢，即係對比起呢個分段更？

彭樹雄先生：或者我簡單啲講，其實我哋嗰個shift就我哋大致上有兩種，一種我哋叫做straight duty或者係straight shift，就返可能係八個鐘頭或者係十個鐘頭，又或者可能會係十二個鐘頭，個工時，呢個講緊工時。另外一個我哋特別嘅，我哋每日約有二十三個百分比嘅車長就係返緊一個叫做特別更，正話係Mr Duncan所講嘅split duty，就係佢嘅工時係唔會超過十四個鐘嘅。

MR DUNCAN：（經傳譯員）講到新嘅指引，可唔可以同我哋講下會唔會有重大嘅改變呢，對於你剛才所提及嘅安排，有冇重大嘅改變㗎？

彭樹雄先生：如果喺新嘅指引底下，我哋一個直更，straight duty，一個working hours，工時係唔會超過十二個鐘，而當中嗰個駕駛時間係唔應該超

過十個鐘，另外有--其實分別就同而家係冇一個比較明顯嘅分別，但係反而嗰個 split duty 個分別就會相對地比較大啲，點解呢？因為運輸署嘅指引底下，呢個所謂特別更 split duty，佢嘅工時仍然係唔應該超過十四個鐘，但係佢當中嘅駕駛時間就係唔會超過十個鐘，對比番而家嘅指引，我哋係唔應該超過十一個鐘，新指引底下，嗰個駕駛時間係少咗一個鐘頭。

另外一個特色--特別嘅地方就係喺新嘅指引底下，呢個 split duty 嘅車長佢一定要有一段唔少過連續三個鐘頭嘅休息時間，一定係連續唔少過三個鐘頭嘅休息時間，呢個就係最主要嘅分別。

MR DUNCAN：（經傳譯員）有冇人係會想做呢個特別更，即係分段更，好讓佢可以有多啲收入，定抑或唔係咁嘅，而係你要下令先至叫到啲人去做呢一個分段更或者特別更呢？

彭樹雄先生：我哋公司係絕對唔會強逼啲同事係去返啲乜嘢嘅特別更分，split shift，所有返呢啲所謂特別更嘅車長係全部都係自願咁去返嘅。

李澤昌先生：補充一點，嗰個 dynamic 就其實因為九龍巴士佢 cover 嗰個地區太大，譬如假設你朝頭早繁忙嘅時間，佢凌晨六、七點鐘已經係繁忙時間，佢早上嘅繁忙係好高嘅，去到夜晚黑個繁忙就會五、六、七，七、八點又上番嚟，好似成個駱駝咁兩個峰喺度。有啲車長其實佢係長喺譬如話屯門咁嚟計，佢朝頭早揸完嗰個繁忙嘅時候，佢返到去，有一段時間，佢可以返番去自己屋企休下息先，然後再返番去晏晝嗰段繁忙時間，其實佢係有一個地理嗰個問題--嗰個因素，或者一個車長本身佢有一個--即係佢個工作環境嘅因素，呢個係比較少部分，呢個係佢哋有呢方面嘅需要，係咁樣。

彭樹雄先生：其實整體我哋有特別更嘅車長，因為正如李生講，因為我哋係要 cover 嗰兩個 peak，即係 morning peak 同埋 evening peak，正正我哋九巴嘅特色就係因為我哋--即係我哋嗰個函蓋嘅範圍實在都頗大。同埋我哋有四個主要嘅大廠，亦都我哋有啲叫做衛星廠，satellite depot，我哋好多車長做呢個特別更，佢係可以喺中段嗰幾個鐘頭，其實佢真係可以返屋企休息等等咁樣嘅。

MR DUNCAN：（經傳譯員）睇番呢度，剛才亦都睇過嗰個待遇，個薪酬，我想問，新嘅指引如果係採納，亦都會減少嗰個總嘅時數，亦都有呢個休息時間嘅要求嘅，會唔會令到你哋部分嘅車長嗰個收入係會減少呢？

彭樹雄先生：我答你嘅問題，就係如果我哋唔去諗嗰個 remuneration 嗰個，或者係維持不變，確實如果純粹睇番個駕駛時數，可能有車長係真係嗰個所謂 take-home salary 係會少咗嘅。不過正話蘇生都講咗，我哋其實都係積極考慮點樣可以將嗰個--特別係嗰個休息時間嗰個 allowance 嗰個津貼點樣可以優化佢，從而令到我哋返--特別係特別更嘅車長，佢駕駛時數少咗，休息時間多咗，而希望佢嗰個所謂 take-home salary 都唔會減少嘅，呢個就係我哋管理層，主席亦都係責成咗我哋會去考慮嘅。

梁乃鵬先生：（經傳譯員）鄧律師，董事局係指示咗管理層就住特別更嘅司機，雖然佢哋係會每日工作十個鐘，而唔係十一個鐘，佢哋嘅薪酬唔應該係會少咗嘅。

MR DUNCAN：（經傳譯員）有冇同車長講過呢一個訊息呀？

梁乃鵬先生：（經傳譯員）事實上喺我哋嘅行動計劃下嘅建議中係有提及嘅，我相信管理層係已經同工會溝通過。或者彭先生可以補充。

彭樹雄先生：好呀，主席。Mr Duncan，我其實亦都初步同啲工會嘅代表，亦都係我哋同廠嗰個嘅管理層亦都係已經將個訊息帶咗畀啲前線車長，我哋管理層係會認真咁樣去優化呢一個嘅 remuneration package，希望佢哋嗰個 take-home salary，唔會因為個新指引實行而少咗嘅，呢個我哋係完全正面，車長亦都係完全正面嘅。

梁乃鵬先生：（經傳譯員）我想補充，如果車長嘅工時係由十一個鐘減少到十個鐘，我哋亦都會考慮係咪需要--即係個要求係咪需要由十四個鐘減低到十三個鐘。雖然運輸署係容許可以每日有十四個工時，但係如果我哋嘅目標係想由每日嘅工時由十四降至到十三，我哋都會考慮。

主席：（經傳譯員）鄧律師，如果我冇記錯，之前作供嘅時候，城巴係會咁樣做嘅，即係佢哋而家係冇特別更，但係佢哋之後係會實施，而嗰個每日嘅工時規定係十三個鐘嘅。

梁乃鵬先生：Yes.

MR DUNCAN：（經傳譯員）我相信係正確嘅，主席。梁博士，我想你睇番 KMB-1 文件冊嘅第 149 頁，喺第 12 項，即係喺第 149 項嘅第 12 項係咪已經反映咗呢一點？

彭樹雄先生：Yes, Mr Duncan.

梁乃鵬先生：（經傳譯員）喺屘二嗰一段，喺右面嗰一欄。

MR DUNCAN：（經傳譯員）係咪就係最後一段所講呀？

梁乃鵬先生：（經傳譯員）冇錯嘅。

MR DUNCAN：Yes, thank you.

梁乃鵬先生：（經傳譯員）唔該晒鄧律師。

MR DUNCAN：（經傳譯員）城巴作供嘅時候，即係喺第 4 天嘅謄本入面，第 75 頁 1 至 6 行嘅。

主席：Thank you.

MR DUNCAN：（經傳譯員）我哋而家睇第 180 頁，呢個係 TD-1 文件冊嘅。

主席：（經傳譯員）首先，李先生，你同我哋講過返特別更嘅車長嘅休息時間，佢哋嘅休息時間係會長啲嘅，你講有部分係可以返屋企，你可唔可以大概話我哋知返特別更嘅車長之中有幾多車長係喺巴士站開始佢哋嘅休息時間，而唔係喺車廠呢？因為我哋係參觀過屯門嘅車廠，我哋明白呢啲設施係有啲分別嘅，所以我哋嘅問題就係大概有幾多嘅車長會喺巴士站開始佢哋嗰個休息時間呢？

李澤昌先生：我要返去畀呢啲數據你，我有嘅，我哋有嘅。主要佢哋係三個地方休息，一個就係返屋企，一個就係喺巴士站嗰度，一部分就係喺嗰個巴士嗰個depot嗰度嘅。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）TD-1文件冊嘅第180頁，呢一頁就係喺2018年至到2022年嘅遠期計劃嘅一部分嚟嘅，呢個就係你公司呈交畀運輸署嘅，如果我冇了解錯，呢個係巴士專營權嘅其中一項要求嚟嘅，係必須要提供一個遠期計劃，就係每年要呈交畀運輸署嘅，我相信呢一份係最新嘅計劃嚟嘅，係咪？

蘇偉基先生：最新嗰份係由2019年去2023，就我哋需要喺8月17號，淨係呢個section，section 8 bus safety提交，嗰份亦都係ready to submission，我哋應該係下個禮拜初係可以ready，呢個現時submit咗最latest version。

主席：（經傳譯員）呢一份，我哋而家睇緊呢份計劃係幾時呈交㗎？

蘇偉基先生：而家我哋見緊嗰份應該喺2017年嘅6月十幾。

MR DUNCAN：（經傳譯員）遠期計劃嘅呢一部分就係關乎巴士安全嘅，...

主席：（經傳譯員）首先，你話你會喺今年8月17號呈交一份新嘅計劃，係咪？

蘇偉基先生：（經傳譯員）冇錯嘅。

主席：（經傳譯員）你可唔可以提供嗰一份報告嘅相關章節畀委員會呀？

蘇偉基先生：（經傳譯員）可以。

主席：（經傳譯員）唔該。

MR DUNCAN：（經傳譯員）就住巴士安全，就係喺呢一個遠期計劃嘅第8章嘅，我想你睇一睇8.2段，就係分析過去兩年嘅巴士意外，我想你睇第181頁，呢個就係以巴士車長嘅年齡係分類呢一個意外率嘅，呢一段就講，結果顯示，一啲年輕嘅車長就會同一啲更加高嘅意外率有關，因為主要係呢啲車長嘅駕駛巴士嘅經驗係比較少，而佢哋喺頭嗰幾月嘅期間就會遇上更多意外嘅，呢個就係第181頁所講嘅。

然後喺第182頁亦都有一個相似嘅論點，就喺8.2.4段，「如果以服務

嘅年期去將呢個意外率去分析，結果就係顯示喺 8.3 呢個表嘅，就喺招聘後嘅第一年發生意外嘅機會係相對地高嘅。」

主席：（經傳譯員）係咪呢度所講嘅係咪咁樣呀？

蘇偉基先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）有冇任何嘅措施去針對呢一個現象呢，即係話針對頭一年服務嘅車長？

蘇偉基先生：唔係好掌握到你問乜嘢。

MR DUNCAN：（經傳譯員）根據我嘅經驗，當我細個嘅時候，我都成日搭巴士，啲車長通常有一個副車長喺旁邊，然後就畀一啲指示或者係提示佢哋嘅，你哋公司有冇類似嘅安排呢？

蘇偉基先生：有，我哋亦都有留意到頭先你所指出嘅數字，新入職嘅車長通常都係年輕啲，我哋而家喺佢揸車開首，我哋係有一個夥伴車長係陪伴住佢，等佢可以個信心，嗰個對路面嘅實習、對乘客嘅處理係更加有信心。我哋亦都喺車長第三個月嗰係有個工作坊，同佢分享佢開首做巴士車長嘅經驗，從而希望對一啲新入職嘅車長儘快熟習嗰個工作環境，減少嗰個交通嘅意外率。

MR DUNCAN：（經傳譯員）呢啲夥伴車長呢個安排係開始咗幾耐？

彭樹雄先生：Mr Duncan，或者我簡單咁介紹呢啲所謂嗰啲叫做 buddy driver 或者 buddy inspector 嗰個嘅工作。所有全職嘅車長同埋一啲嘅我哋而家有啲叫做半職車長，就正話 Mr Duncan 所講嘅，譬如會唔會有啲家庭主婦佢每日可以做四個鐘，一個禮拜做五日或者做六日，我哋嗰啲叫做半職車長？我哋個 buddy driver 就係會喺佢完成咗我哋駕駛訓練學校嗰兩個 phases 嘅 training 之後出嚟，我哋就會全日有個夥伴車長陪住佢，係包括佢第一日、第二日嘅工作，然後就再喺第七日同埋十六日係會完全陪伴住呢個新車長嘅駕駛嘅。

另外我哋嗰啲兼職車長，我哋亦都係會有夥伴車長嘅計劃，但係大家要明白因為呢啲以往我哋所請嘅兼職車長佢哋全部係有 10 牌同埋 17 牌，即係換句話講，佢哋亦有巴士牌同埋有專利巴士牌，我哋嗰個夥伴車長係會陪佢第一日。

另外，我哋喺今年年初，我哋亦都有一個所謂夥伴督察嘅計劃，每一個新加入嘅車長，我哋會有一個指定嘅督察，就會同佢聯絡，我哋亦都做咗一啲所謂 cue card，一啲嘅 card 仔，裏面有晒我哋嗰啲督察嗰啲聯絡嘅方式，有晒所有屬廠嗰啲經理同埋嗰啲助理經理同埋車務主任嘅電話。

呢個夥伴督察就會係一個除咗駕駛技術方面，都係一個全面嘅支援嘅，好似一個 mentor 咁，係喇，你可以用一個字，就係“mentor”咁樣，個車長有

Transcript by Epiq Hong Kong, Limited

啲乜嘢疑難，有啲咩嘢困難，有咩嘢困惑，佢都會直接搵呢個夥伴督察，呢個就係我哋希望就係能夠可以令到個新車長儘快融入嗰個工作裏面。

另外，蘇生講咗，我哋所有新車長，當佢工作咗三個月之後，我哋會搞一個工作坊，就係會所有車廠嘅管理、駕駛導師，甚至我都會出席，同嗰啲車長傾偈，睇下佢哋有啲乜嘢--過去嗰三個月遇到啲咩嘢困難。同埋我哋每一次我哋都會請一個資深嘅車長喺度同大家分享點樣可以處理日常工作等等。呢個我哋每一個新出嚟三個月，我哋一定會做嘅。

MR DUNCAN：（經傳譯員）我個問題就問呢個咁嘅計劃，即係夥伴計劃係幾時開始呢？

蘇偉基先生：Buddy driver 呢個概念喺二零一三-- 12 年已經有，但係我哋係不停去優化佢。

MR DUNCAN：（經傳譯員）唔該；

主席：（經傳譯員）會唔會方便就而家開始我哋就係小休係午飯？

MR DUNCAN：（經傳譯員）好。

主席：（經傳譯員）各位，我哋而家休息，就兩點半再繼續，唔該晒。

下午 1 時 01 分押聆訊押後

下午 2 時 30 分恢復聆訊

出席人士如前。

主席：（經傳譯員）各位午安。大律師。

MR DUNCAN：（經傳譯員）多謝你，主席。各位先生，請你而家翻去 180 頁，嗰個文件冊係 TD-1。响我哋食午飯之前，我就叫你睇咗 182 頁嘅。而家或者你都係請翻到 183 頁。呢度一個分析，即係公司進行一個分析，意外嘅性質嘅分析。我呢度想就住表格 8.1 問幾個問題。

第一行呢度講係乘客失去平衡百分率就係百分之五十一點五。另一個項目响個表格中間下面嗰度，巴士內嘅乘客受傷嘅。呢個係--你有咩嘢分別？

蘇偉基先生：“Passenger loss of balance”，我哋係講緊一啲意外個乘客跌倒，或者係冇緊握扶手，而架車箱係移動緊嗰陣時嘅。“Injury to passenger inside bus”，就係因為有意外，而個意外個乘客喺個車箱本身

入面，因為外來嘅意外而導致乘客坐喺架車入面受傷，佢係坐喺度，佢唔係loss of balance，但係意外會造成佢有個損傷。

MR DUNCAN：（經傳譯員）你意思就坐住响嗰度，點解會受傷嘅，點解會有咁樣嘅事？

蘇偉基先生：假設有個意外係碰擊，佢坐咗喺個車箱嗰度，假設我當番一個意外翻側，佢坐咗喺度，佢係因為一個意外而受傷，佢就係“Injury to passenger inside bus”。

MR DUNCAN：（經傳譯員）呢度有另一個百分比嘅，嗰度係巴士翻側，最後嗰個。會唔會嗰度都已經包括咗？

黃祥明先生：或者另外一個例子可以話畀你聽，有啲乘客坐喺架車度都會有受傷，就係有時我哋啲巴士經過啲樹突咗出嚟嘅地方，棵樹打落個巴士度係啲玻璃碎，就會引致呢個乘客喺車裏面受傷，呢個同嗰個乘客喺車跌嚫嗰個受傷係兩樣嘢嚟嘅。

蘇偉基先生：亦都最近有個例子，就係上個月喺中環，架車行行下，條路突然間有個石屎撞爛咗個車底，嗰次就冇乘客受傷，但係有機會就係咁樣，呢個咪意外。

MR DUNCAN：（經傳譯員）我冇解釋錯--即係話公司係定咗呢啲唔同嘅類別，如果係意外就會分類，根據呢個各種嘅分類，就係將佢定為邊一種，啱唔啱？

蘇偉基先生：（經傳譯員）係嘅。

MR DUNCAN：Thank you. （經傳譯員）呢度就乘客失去平衡就百分之五十一點五。

8.2.7 佢話就超過一半因為係嗰個巴士向行駛中需要煞車，引致失去平衡嘅。有冇其他一半嘅嘅事件，佢哋係咩嘢原因造成？

黃祥明先生：呢個乘客喺車箱失平衡而跌嚫有好多個原因嘅，其中一個原因好可能係啲車長駕駛嘅時候，就唔係太過為意呢個乘客是否係已經企好或者進入咗呢個車箱。另外一個可能性，就係個車長本身佢嗰個操控架車嘅時候，就唔係咁妥當。即係我哋幾日前曾經討論過嘅一啲叫“acceleration”，或者佢嗰個“harsh braking”，亦都會引致呢啲情況。另外一啲情況我哋睇到有好多時啲乘客本身就係上車之後，就並冇緊握扶手，因而喺架車行駛期間，或者需要有啲車進入佢嘅路線，亦需要閃避期間，呢個乘客係會失平衡而跌倒嘅。

MR DUNCAN：（經傳譯員）呢度第二行，撞頭、撞尾，相撞嘅事項...

主席：（經傳譯員）我想問一樣嘢先，如果有意外，乘客就失去平衡受傷，成為呢度統計涵蓋嘅一個事件，就有一半係乘客失去平衡嘅。你有冇研究你哋嘅數據，即係話加速、減速嘅情況，你有冇研究？

黃祥明先生：喺有啲乘客跌嚟嘅案件裏面，我哋係會喺調查呢架車嘅車長操控呢架車是否有加速或者減速，所以答案係有，我哋有睇到。另外，我哋喺呢個車嘅 CCTV 亦都可以睇得到當時個車嘅情況。

主席：（經傳譯員）或者我再問，你用咩嘢數據嚟調查加速、減速？

黃祥明先生：我哋都討論過個黑盒係會記錄當時個車嘅情況，呢啲情況我哋喺個 server 嘅資料嗰度係能夠睇得到，亦都可以鑑別得到呢個車長當時操控架車嘅時候係咪有突然加油或者突然減速呢樣嘢。

主席：（經傳譯員）有冇咩嘢統計數字，即係研究完之後，調查完之後個結果有冇統計？譬如話係減速佔幾多，加速佔幾多？

黃祥明先生：冇一個實質嘅統計數字。

主席：（經傳譯員）點解冇？

黃祥明先生：我哋遇有呢啲情況嘅時候，就會處理嗰個車長嘅違規，但係我哋就並冇將呢啲數字綜合做一個嘅記錄。

主席：（經傳譯員）但係呢度佔咗你哋--呢個因素佔咗意外成因一半喎。

蘇偉基先生：同意係要有呢個記錄，因為呢個係講緊 2015/16，而家我哋係提供唔到。但係正如頭先所講，我哋做緊新嗰個，我要睇清楚係咪有個記錄，loss of balance 有幾多，harsh braking 幾多，係 acceleration 做咗，我呢刻我答唔到。

主席：（經傳譯員）而家係咪做緊，2018 年你有冇做呢樣嘢？

蘇偉基先生：可以做番。

主席：（經傳譯員）你係咪做咗，過去式？

蘇偉基先生：我唔清楚呢一刻。

主席：（經傳譯員）不過係可以做到嘅？

蘇偉基先生：（經傳譯員）係嘅。

主席：（經傳譯員）今年有幾多個乘客係因為失去平衡受傷，大概有幾多人？

蘇偉基先生：三百嗖。

主席：Thank you. （經傳譯員）你調查嗰個乘客因為失去平衡嘅情況，你係有一啲黑盒嘅數據，你响個伺服器有嘅，同埋你都有巴士上面嗰啲閉路電視嘅資料嘅？

黃祥明先生：（經傳譯員）係。

主席：（經傳譯員）所以你將你嗰啲科技嘅設備一齊睇，你就可以有一個合理嘅推斷，究竟當時嘅煞車係咪一個合理嘅原因？

黃祥明先生：Correct.

主席：（經傳譯員）有冇任何嘅統計數字？

黃祥明先生：我剛才講過，我哋有調查呢樣嘢，但係我哋冇將呢個記錄做一個數字。

主席：（經傳譯員）你冇話簡單嘅統計數字，譬如話四百四十五人受傷，有三百宗個案佢煞車係合理，有冇啲咁簡單嘅統計數字？

黃祥明先生：呢啲數字係有記錄嘅，但係我冇將佢歸納做一個統計，喺呢方面嘅。

梁健宏先生：或者我嘗試補充一點，所有呢啲意外都會分析嘅，所有啲意外都分番開係咪嗰個車長係負責任嘅。如果個車長唔係負責任嘅話，佢可能真係就住當其時個交通狀況，佢需要 sudden braking 嘅。所以如果我哋睇番個車長要負責任嗰啲個案，我相信嗰度應該我哋再做多數據分析。

主席：（經傳譯員）但係假設當你做，你一定要有個統計嘅數據嘅。

梁健宏先生：我相信嗰啲資料喺度嘅，我哋應該返去做啲數據分析，從而睇睇有咩嘢我哋可以再做好啲。

主席：（經傳譯員）呢個唔係一個重要嘅監察嘅工具，即係監察你個司機、車長嘅行為，即係話係咪突然煞車？但係你調查，你又覺得冇需要咁樣睇嘅？

梁健宏先生：同意。

主席：（經傳譯員）大律師。

MR DUNCAN：（經傳譯員）多謝你，主席。我哋暫時唔睇表格 8.1，睇番表格 8.2。呢度亦都係從個意外性質做分類嘅，今次就唔係百分率，而係實際有幾多宗嘅意外。

主席問過你乘客失去平衡嘅呢個類別，呢度受到影響嘅乘客數目係咪有記錄？你話 2018 年，到目前為止三百五十個乘客因為咁受傷。

蘇偉基先生：係，約莫呢個而家記到嘅數係。

MR DUNCAN：Approximately 300, yes, thank you. （經傳譯員）有冇可能睇睇呢個記錄，根據呢個一行、一行睇落去，根據呢度乘客嘅數字、受影響嘅人客數字，每一種類別嘅意外逐個睇？

蘇偉基先生：呢個係冇數據，嗰個係講緊個個案嘅宗數嚟。

主席：No. （經傳譯員）8.2.8 就只係好簡單咁樣描述咗呢一啲意外嘅性質，係咪有可能有一千個咁嘅乘客係失去...

蘇偉基先生：I agree. I know what you mean. （經傳譯員）但係呢個報告係冇個乘客嘅數喺度。如果你話2018年，我哋可以提供番乘客嘅數字。

主席：（經傳譯員）係咪即係話三百個以外，同埋你都話畀我哋聽有幾多乘客係失去平衡？

蘇偉基先生：可以。

主席：（經傳譯員）有可能所有企喺度嗰啲人都失去平衡個喎，你可唔可以畀呢一個資料我哋，係2018年嘅？

蘇偉基先生： Yes.

主席：（經傳譯員）可唔可以呢一度每一欄嘅數字，你都畀埋乘客嘅數字我哋？

蘇偉基先生：我嘗試，但係我相信有困難嘅。因為嗰個數據講緊2015、2016，但係喺2018年，我哋可以提供番個案同埋涉及嘅人數，係關於loss of balance嘅意外。

MR DUNCAN：（經傳譯員）係，我都係知道你係諗緊2018。不過譬如話有一個題目，就係話呢架巴士係翻側或者係直情翻車嘅，可唔可以有乘客數字？

蘇偉基先生：呢個可以，呢個一單個案當然可以。

MR DUNCAN：（經傳譯員）同埋如果係撞到啲動物或者其他人廿七宗嘅，你會唔會都好容易搵到受影響嘅乘客或者係受傷嘅乘客？

蘇偉基先生：可以。

MR DUNCAN：（經傳譯員）好多謝你，當你畀2018年嘅數字我哋嘅時候，畀埋呢啲就好嘞。

蘇偉基先生：可以。

MR DUNCAN：（經傳譯員）好，唔該。

講番轉頭，睇番呢一啲表，我想理解多啲。第二個就係話追撞，另外低啲就係同其他嘅車輛碰撞，就係有向後、向前。呢兩個有咩嘢分別？第一個就係13.5個百分比，呢兩者有咩嘢分別？

黃祥明先生： Head-on/tail 嘅 collision，通常我哋係會睇一啲停定咗嘅物件係頭尾相撞，呢個我叫做head-on/tail 嘅collision。第二個collision好多時係因為一個轉線而引致有車輛嘅碰撞，我哋要斷為呢個classification，就係collision with 呢個changing lane 嘅vehicle。

MR DUNCAN：（經傳譯員）呢個就係第二個標題同埋第三個標題之間嘅分別？

黃祥明先生：冇錯。

MR DUNCAN：（經傳譯員）再低啲，「同其他車輛碰撞」嗰個括號裏面，就係話向後溜或者向前溜，或者係倒後，有咩嘢分別？

黃祥明先生：有時啲車輛嘅褪後而引致呢個碰撞，就係會喺呢個 classification 裏面。

MR DUNCAN：（經傳譯員）好，上番去“J/O collision”就係百分之六，有四十八宗，呢個係咩嘢意思？

黃祥明先生：呢啲係喺啲 junction 位，路口嘅 junction 位嘅碰撞。

MR DUNCAN：（經傳譯員）好，唔該。下低係「進入 R/A 碰撞」咩嘢意思？

黃祥明先生：呢個係一個進入迴旋處引致嘅碰撞，roundabout。

MR DUNCAN：（經傳譯員）當你提供 2018 年嘅統計數字，即係關於受傷乘客嘅數字嘅時候，請問你可唔可以都幫我哋區分一下，傷同亡嘅數字？

黃祥明先生：可以。

MR DUNCAN：（經傳譯員）好，唔該。我而家想講另外一個題目，今朝早都講過，我相信你有兩位人士係提過，就係關於非法泊車嘅問題。委員會唔係淨係由你哋各位，由其他嘅以前嘅證人都聽到，就係話呢個安全嘅隱患嚟。

我諗今朝早其中你哋一位都協助委員會，就話畀我哋聽你哋喺呢一方面採取咗咩嘢步驟。尤其是係向唔同嘅政府部門係舉報或者報告，就令到個情況有所改善。請問你可唔可以睇下雜項文件套第 2 號，第 644 頁。呢一度就係由 643 頁開始，一路去到 644，然後係有翻譯本，644-1，佢係繼續去到 644-2 嗰一頁。

你會睇到呢一份文件係委員會收到，係來自一個民主聯盟咁樣嘅組織。我哋睇番翻譯嘅第 2 頁嗰度，係民主陣線，應該係去番第 1 頁嘅底部嗰度，644-1 嗰度。我哋睇到係有一個意見，就係話可以喺巴士站嗰度永遠停止有非法泊車嘅時候，就話應該係有正確嘅政策，同埋係要睇下啲法律係咪已經過咗期，一定係要多管齊下咁樣去處理。

佢就話第一個建議就係跟番新加坡喺成個巴士車隊嗰度係安裝攝錄機，新加坡自從 2008 年就係喺巴士上面安裝攝錄機。呢一啲攝錄機就係裝置喺巴士司機個位側邊，當司機發現係有車停喺巴士站，佢哋就可以撳一個掣，就可以錄影五至十分鐘，巴士公司就會將有關嘅攝影帶交畀警方，警方就可以檢討，睇番嗰個錄影帶，然後大概有兩個禮拜之內就會將告票寄畀車主。每一張告票就係香港 800 元，另外如果係遲交嘅話，就會額外收 5,000 元，同埋甚至係監禁三個月。

喺第一年，新加坡就記錄咗二千一百一十二宗嘅情況，就係啲司機入咗係巴士線，或者係喺巴士站嗰度畀佢哋嘅乘客上落客嘅。2014 年，喺巴士站同埋係該巴士線裏面非法泊車，就已經係降到八八六宗，就係好成功可以阻嚇啲司機唔好再喺巴士站嗰度停車。

我哋聽到一啲證據，就係公司係裝置攝錄機，就係向住巴士個司機位，另外仲有一個攝錄機，就係有一個前置鏡頭，就好似話係一個監察嘅攝錄機嚟嘅。想請問你而家呢一啲嘅攝影機有冇其中一部係用嚟去攝錄喺巴士站嘅非法泊車嗰啲車輛，而家有冇？

彭樹雄先生：Mr Duncan，我簡單嘅答案係冇嘅。不過如果你容許，我可以有啲嘅補充。

MR DUNCAN： Please.

主席：（經傳譯員）請你講，請你講。

彭樹雄先生：其實就住呢一個，我哋將個錄影片段交畀警方作出違例泊車嘅情況，我舊年嘅 10 月、11 月開始。因為我負責荔枝角廠，我有一個先導計劃同警方係大家協調咗，就係正正用呢一個方式係去檢舉一啲嘅喺巴士站裏面嘅違例泊車。

主席：（經傳譯員）你做咗啲咩嘢？

彭樹雄先生：我哋嘅做法就係我用咗一個嘅試點，就係我哋喺尖沙咀廣東道 271 巴士總站嗰條線係去沙田廠嘅，由荔枝角廠去沙田廠嘅。因為嗰個巴士總站經常係泊滿違例泊車。另外廣東道，大家俗稱嗰個「名店街」，其實嗰個車嘅流量非常之高嘅。

我當時我係荔枝角廠嘅總經理，我就同警方開會。我自己寫咗一張 standard 嘅 statement，即係一個 statement，然後就我叫我啲前線嘅督察，如果見到違例泊車，我哋就用我哋嘅手機影低嗰個嘅片段，然後我哋將呢個片段加埋一張我哋叫做“standard pro forma”，其實好簡單，我哋淨係寫日期、時間，因為地點已經係--我哋係用咗嗰個做試點。我哋就畀西九龍交通就作出檢控。

呢個做法，我哋發覺非常之有效嘅。因為我哋開始檢控嘅時候，我亦都睇到有啲社交媒體開始報導，就話「咦，泊喺巴士站原來會畀人告」咁樣。因為我哋曾經喺廣東道，我哋好多時有違泊，我哋報警。但係因為實在差人嚟到，啲車走咗，and then 差人走咗，啲車又返轉頭。呢個其實係一個治標但係唔治本嘅方法。所以我就用我哋嘅 initiative，我哋同 police 夾埋發覺係有效嘅。大家都應該睇得到，最近警方亦都做咗兩個先導計劃，而家佢將個先導計劃係擴充晒去五個陸上嘅警區，警方其實而家都係做緊呢一樣嘢。

所以 Mr Duncan，簡單答，我哋係冇用我哋嘅車上面裝嘅 CCTV 檢控，不

過我哋嘅先導計劃，加上而家警方嗰個做法，同埋最近嗰個違泊嗰個罰款喺巴士站，亦都係增加咗，呢個係我嘅答案，Mr Duncan。

主席：（經傳譯員）你點解唔用車上面嗰啲時時開著嘅閉路電視嚟用？

彭樹雄先生：其實呢個我哋都可以咁樣做，不過只不過我哋當時用嗰個先導計劃，就係好多時我哋比較方便，就係我哋啲 inspector，我哋啲督察，佢哋本身會揸住架巡邏車去巡邏嘅。如果用佢哋嘅手機，其實嗰個便捷度可能會快啲。當然，主席，呢個係我哋下一步，我哋如果車上面嗰個 CCTV，其實我哋有錄像，其實我哋都可以咁做嘅，主席，多謝。

主席：（經傳譯員）假設其實好簡單，你撳一個掣，然後就可以記錄咗嗰個時間，到時有人睇嘅時候都睇到。

彭樹雄先生：冇錯，主席，冇錯。如果可以令到違泊減少，我哋一定會做嘅，主席。

主席：（經傳譯員）大律師。

MR DUNCAN：（經傳譯員）我諗從你所描述，呢個做法就令到個非法泊車嘅情況有改善？

彭樹雄先生：如果用番我哋廣東道 271 線嗰個巴士總站，我可以答係有好大嘅改善嘅。

MR DUNCAN：（經傳譯員）淨係嗰個總站？

彭樹雄先生：因為警方嗰個全面先導計劃，其實啱啱先至正式開始。我哋都要一啲時間睇下到底嗰個成效係咪真係咁好，不過我可以答你，直至到琴日為止，嗰個違泊嘅情況都唔係--整體嚟講，我講，都唔係一個好大嘅改善，我哋睇唔到。

MR DUNCAN：（經傳譯員）警方同埋嗰個九巴，關於呢個咁嘅試驗計劃，有冇咩嘢通訊嘅記錄？

彭樹雄先生：我有一啲嘅電子郵件，我哋亦都有一啲嘅 standard pro forma，即係我嗰個 statement，就有關於尖沙咀廣東道 271 總站，我可以畀到個委員會嘅。

MR DUNCAN：（經傳譯員）唔該晒。

主席：（經傳譯員）請你交畀我哋。

彭樹雄先生：冇問題，我哋會 provide。

主席：（經傳譯員）嗰個電郵，即係同警方，同埋你用嘅標準表格。

彭樹雄先生：冇問題，主席，冇問題。

主席：（經傳譯員）唔該晒

MR DUNCAN：（經傳譯員）如果冇理解錯誤，你會係即係睇下可唔可以採納類似新加坡嘅制度或者做法？

彭樹雄先生：如果--我哋絕對係持開放態度，我哋絕對係同意咁樣做。

MR DUNCAN：（經傳譯員）你話你開放態度，你係咪會研究？

彭樹雄先生：我哋會跟進，我哋會 look into it。

主席：（經傳譯員）你投訴有問題，有好簡單嘅方法嚟解決，係咪？

彭樹雄先生：主席，我想講一講，其實喺我哋呢一個舊年喺廣東道呢一個先導計劃之前，其實係冇試過淨係基於一個影像去作出交通違例嘅發出嘅定額罰款通知書嘅，呢個係以前冇試過用影像嘅。

主席：（經傳譯員）係有好多控告都係靠嗰啲閉路電視好多錄影嘅片段嚟到進入，啱唔啱？

彭樹雄先生：主席，容許--其實你喺琴日嘅聽證會都講咗，我都係一個喺警務處工作過，我亦都喺交通部工作過。就住違例泊車，我淨係講違例泊車，illegal parking，以往係冇用影像去做檢控。佢用影像檢控嗰啲可能係超速、衝紅燈等等，主席。

主席：（經傳譯員）呢個可能係警察或者係律政司嘅一個限制，但係法律上冇規定你唔可以用呢啲做證據。

彭樹雄先生：所以今年年初我知道從報章得悉，警務處開始就係用影像去檢控一啲 illegal parking，即係我哋俗稱，即係或者 police 俗稱，呢啲叫「死車」，即係 stationary 嘅 illegal parking，就唔同一啲嘅 moving vehicle，such as speeding、jumping red light、crossing double white line，et cetera，主席。

梁乃鵬先生：（經傳譯員）彭先生，我諗我哋應該係要自己做一個我哋應該做嘅行動，睇下警方有咩嘢回應。我諗我哋會係做番我哋嘅本份。

主席：（經傳譯員）係，唔該晒。大律師。

MR DUNCAN：（經傳譯員）請你而家睇第十一日嗰個聆訊嘅謄本。

主席：（經傳譯員）邊一個文件冊？

MR DUNCAN：（經傳譯員）第 4 號。

主席：（經傳譯員）邊個嘅證供？

MR DUNCAN：（經傳譯員）係 Lam Kam Piu，佢係巴士員工嘅工會嘅代表嚟。

請睇 153 頁嘅證供，工會就有啲關注嘅。佢話就係關於使用呢個 12.8 米

長嘅巴士，係用後輪驅動嘅巴士，佢哋對於喺香港使用呢種巴士有啲關注嘅。見到第 13 行，呢個林錦培（原文照錄），佢話「由於香港嘅路面嘅情況，即係道路比較窄，好多行人使用呢個 12.8 米嘅巴士係會帶來一啲危險嘅」，去到第 17 行，佢話「呢個 12.8 米巴士係後輪驅動嘅。响嗰個過彎嘅時候，對個巴士嚟講當然好，但係其他嘅車可能唔知道呢個巴士係後輪嚟到驅動。即係話運輸署都係出過一啲嘅通知，就等其他司機知道嘅，但係其他司機未必知道嘅。因此會對隔籬行駛嘅車輛造成一個危險」。林先生就一路講，講到呢一頁，155 頁嘅。

我想問一個問題，12.8 米嘅巴士，香港應用得有幾廣泛？同埋巴士公司係咪同意林先生嘅睇法，就係呢啲巴士响某啲窄嘅路會造成危險？

梁健宏先生：12 米 8 嘅車，香港有嘅，絕大部分所以都係冇尾輪轉向嘅。尾輪轉向亦都有佢嘅好處，我哋舊年有一部試過，不過就有啲擔心，所以變咗嗰架車我哋都改番做普通嘅 12 米 8 嘅車，就冇尾輪轉向。

講番 12 米 8 嘅車，佢就個長度係長咗，不過就當然，嗰個乘客載客量就會多咗嘅。呢啲係一啲繁忙嘅或者載客量高嘅路線，尤其是係長程嘅路線係的而且確係幫到個服務。呢啲路線或者呢啲咁嘅 12 米 8 長嘅車，相對 12 米車係長咗，但係啲路線都係特定要試過嘅，唔係話普通一條路線。呢啲 12 米 8 嘅車可以行邊啲路線，係會同運輸署一齊試過路，知道呢架車係安全可行，我哋先至可以將呢啲 12.8 米嘅車係 deploy 落去嗰啲路線嘅。暫時目前為止，九巴接近有大約二百部呢啲咁嘅 12 米 8 車。

李澤昌先生：或者補充少少咩嘢叫尾輪轉向，其實佢因為大部分嘅巴士而家都係頭輛轉嘅。因為如果你--因為後面佢係三軸嘅關係，佢後面有一個軸都係可以一齊轉，所以個車轉彎嘅時候，或者係行一啲路比較即係急少少，轉啲急彎嘅時候，佢入啲彎就冇擺得咁犀利。當然即係香港其他好多公司都仲係有用緊，我哋第一批初初出嚟嘅時候，就係冇呢個尾輪轉向，所以我哋嚟咗試咗一架。嗰架其實試咗啲同事，啱啱就講緊都對佢有啲唔係好舒服，我哋都停用咗。

主席：（經傳譯員）梁生，你有啲嘅關注即係後輪嚟到係轉向。你有啲咩嘢關注，係咪頭先李生講？

梁健宏先生：我啲 concern 係車長嘅 concern，因為尾輪轉向，佢嗰個 turning circle 會細啲嘅，但係佢揸起上嚟嗰個 characteristic 就有啲唔同，個 outswing 就同普通嗰啲冇尾輪轉向嗰啲車嗰個 outswing 係大咗啲，所以變咗喺嗰個習慣個問題嗰度要適應嘅。有個問題嘅，如果你今日揸一架有尾輪轉向，而跟住你揸架冇尾輪轉向，可能適應--就要少少要適應，呢啲係有少少係車長可能會 concern 嘅。但係就對於安全嗰部分...

李澤昌先生：關於安全係冇關，係揸車嗰個適唔適應到，嗰度比較係我哋要處理。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）如果我冇理解錯誤，你係冇後輪轉向嘅 12.8 米嘅巴士？

主席：（經傳譯員）我諗已經講咗，大概二百架。

梁健宏先生：Correct.

MR DUNCAN：（經傳譯員）你係會即係响某啲路線就係用呢啲巴士，你會同運輸署接觸咗先。係咪已經發生咗，呢樣事？

梁健宏先生：（經傳譯員）啱嘅。

MR DUNCAN：（經傳譯員）呢啲巴士係咪有啲指定路線度使用？

梁健宏先生：（經傳譯員）係，冇錯。

MR DUNCAN：（經傳譯員）你會唔會擔心--鑑於工會同我哋講嘅嘢，你有冇任何嘢關注？

梁健宏先生：（經傳譯員）冇嘅。

MR DUNCAN：（經傳譯員）你有冇關注到啲巴士轉彎嘅時候，會唔會係出咗條線，令到對其他嘅車輛造成問題？

李澤昌先生：首先兩樣嘢先，一，嗰條路線係一定係運輸署、政府係大家同意咗條路線行得先。因為有啲路線係行唔到 12 米 8。第二樣嘢係個車長，其實九巴嘅車長揸 12 米 8，佢必先之前去咗我哋個學院嗰度係學習過揸 12 米 8 嘅車，佢先至可以揸 12 米 8 嘅。所以其實路線同埋個車長嘅訓練，兼夾如一架車尾輪轉向都冇埋嘅，其實基本上嗰三件嘢係齊備，我哋先至行緊嘅。

MR DUNCAN：（經傳譯員）你知唔知道工會而家關於呢件事有咩嘢關注？

梁健宏先生：我哋冇。

MR DUNCAN：（經傳譯員）我想請你睇另一份文件 TU-1(A)，84 頁。你會見到呢份意見，就係委員會收到嘅。嚟自九巴僱員工會，嗰個翻譯就喺第 90-1 嗰一頁。我就係會倚賴呢一份翻譯本，我想請你睇 90-3 嗰一頁，就係講到安全嘅設施。搵唔搵到？

梁健宏先生：Yes.

MR DUNCAN：（經傳譯員）唔該。委員會就係聽到工會咁講「為咗減低維修嘅費用，九巴自從 2015 年開始就係不適當地係拆除咗所有啲防霧嘅熱氣裝置，令到前面嗰塊嘅玻璃就有好多霧化嘅情況，如果個天氣係凍同埋濕嘅時候，即係當外部同埋內部嘅溫差係大嘅時候」。佢哋就係講到附件 1，我諗應該喺原本嘅 91 頁同埋 91-1 頁，就係睇到個翻譯。

我想請問係咪啱嘅，自從 2015 年開始，你就拆除咗所有嘅除霧器喺巴士上面？

梁健宏先生：不正確。

MR DUNCAN：（經傳譯員）你覺得個工會當時係講緊乜嘢？

梁健宏先生：我相信佢係講緊我哋有啲除霞器係有兩款嘅，我哋 basically。以往有啲係暖風，去到 2010 年，我哋就轉咗用啲冷風嘅。喺附件 1 嗰架車車牌 UF2751 係一個用冷風除霞器嘅裝配嘅，呢架車我相信大約係接近兩歲嘅。

點解我哋由暖風變做冷風，2010 年之前所有嗰啲巴士嘅除霞器都係用暖風，啲暖風就由我哋喺車尾個引擎嗰啲冷卻水，經過引擎加熱，啲熱水就由車尾沿住水喉接駁去到車頭嘅，嗰度長度有一架巴士咁長，係 12 米咁長，來回就有 24 米嘅。呢 24 米嘅熱水喉，啲熱水就係喺度流轉嘅。暖風除霞器就係用呢啲咁嘅熱水，就產生啲熱氣，就令致到嗰個車長嗰個駕駛螢光幕，個 windscreen 就唔會有 condensation 嘅，尤其是喺比較天氣凍同埋潮濕嘅日子。

但係呢個咁嘅裝置就唔係好可靠，好多時啲水喉可能會爆。如果爆水喉嘅話，有啲好熱嘅水，嗰啲水熱呢，就溫度相當高。亦都有啲個案，有啲熱水就真係流入到個車箱入面。去到 2010 年，我哋公司就將呢樣嘢就換咗做吹乾嘅冷風，去解決咗呢個情況。不過係無論係暖風好、冷風好，你開著咗佢都需要五至十分鐘先至可以將嗰啲 fog，嗰啲 condensation 去 remove 嘅。

呢個冷風除霞器 2010 年我哋開始代替個暖風，但係呢樣嘢，車長就唔係好歡迎，因為天時凍，仲吹啲冷風。所以變咗去到 2015 年，2015 聽到啲車長有啲咁嘅意見，就要搵啲--要解決。因為你唔多唔少都可能影響到嗰個駕駛狀況，我哋就搵到啲 anti-fog 嘅 coating，除霞膏，搽喺嗰個 windscreen 上面。似乎就好 old-fashion，不過亦都係好 effective 嘅。你搽咗上去之後，condensation 就唔會發生。

同一時期，我哋覺得都可能要搵其他方法。同一時期，我哋亦都同嗰啲巴士製造商去研究其他啲 demister。我哋同 Volvo 去傾傾，睇睇會唔會有啲東西。有兩樣嘢可以走咗出嚟，其中一樣就係 heated windscreen，個 windscreen 入面係有啲發熱線嘅，呢啲其實都好 common 喺私家車，但係喺 double-decker 其實就--即係你唔問佢，佢唔幫你做，都做唔到。但係係咪即刻有，亦都唔係咁簡單。你唔係喺超級市場就可以買到，要特登為巴士去做。我哋 2016 年就試裝咗上去，有廿五部車有 heated windscreen 嘅，至到而家。

亦同一時期，我哋亦都同 ADL，第二間巴士製造商，就同佢研究第二樣嘢，就係用 electrical 嘅 demister，同發熱線製造啲暖風去 remove 嗰啲 condensation。而呢樣嘢亦都經過一輪嘅測試，因為呢度牽涉到有啲

heating element，唔多唔少亦都要解釋嗰個甚麼可能有啲其他嘅問題。所以亦都卒之都今年亦都解決咗個問題，卒之都有個可行嘅 electrical demister 可以安裝。

所以去到呢個 moment，我哋有 electrical demister、有 heated windscreen 呢兩個 option。而公司亦都決定將呢兩樣嘢裝喺我哋嗰啲冇暖氣嘅、冇暖風嘅巴士度，冇暖風嘅 demister 嗰度，我哋會 retrofit 呢啲咁嘅 equipment 去到用冷風除霞器嘅巴士上面，從而令到希望所有嘅車隊都可以提供一個好 proper 嘅 demister，令到車長係樂於使用嘅。我哋將來嘅新車都傾向採用 heated windscreen。

李澤昌先生：呢度補充一句，其實塗呢個塗液，其實過往我哋都知道有好多即係技術性嘅問題。因為好多時啲車長佢唔知道，佢塗咗，佢用佢嘅過往嘅方法，佢抹咗，可能係甩咗。亦都係好倚賴我哋去到廠嘅時候，係靠一啲員工係塗上去。其實係喺嗰個人手方面係有啲--即係唔好聽啲，有啲囉唆。我哋而家就都已經黐咗啲告示牌話呢架車係塗咗。

但係你睇到成個過程，呢啲前面車嗰啲除霞嘅嘢，其實過往我哋係冇停過手係諗緊啲新嘅方法去做。就算你講緊今日嗰個前面 windscreen，未來我哋嘅新車安咗嗰啲，即係已經佢裏面 embed 咗嗰個 demister 係全世界嘅雙層巴士第一架，即係我哋同啲製造商都已經差唔多花咗超過一年嘅時間，即係好似梁生話喺巴士嗰度，係真係同私家車好唔同，做嘅嘢係要多。

MR DUNCAN：（經傳譯員）我可唔可以請你睇番 KMB-1 文件冊，第 98 頁？你會睇到呢一個係交畀運輸署嘅報告嘅第一頁，呢個係 2018 年 3 月 12 號係交畀運輸署，呢個係巴士意外之後交畀運輸署嘅報告。請大家睇第 15 頁，即係呢一個文件冊嘅 115 頁。

第 46 段就係講到話有霧氣呢個問題，你有同運輸署係報告過關於呢個霧氣嘅問題，睇唔睇到？

梁健宏先生：（經傳譯員）睇到。

MR DUNCAN：（經傳譯員）第二行嗰度就話喺呢一個事件之前，我哋就係會有呢啲塗層係髹上去嗰個擋風玻璃嗰度，如果佢哋冇熱氣嘅除霧器，我哋檢討咗個機制之後，無論熱氣嘅除霧器，或者係加熱嘅擋風玻璃，我哋都會採納，咁樣係會更加有效，更加快咁樣除霧。

係咪即係話喺嗰個 2 月 10 號嘅巴士意外之前，嗰啲除霧嘅做法係並不令人滿意？

梁健宏先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）我可唔可以請你去睇番行動計劃，即係第一個，151 頁？第二十項就係講霧氣嘅問題。

李澤昌先生：（經傳譯員）係。

MR DUNCAN：Thank you. （經傳譯員）喺第 2 段嗰度就話現有嘅巴士，即係唔係新巴士，就會係加裝熱氣嘅除霧器或者加熱咗嘅，或者暖化咗嘅擋風玻璃。你就話喺未來十二個月係分期咁樣做，你而家係做到邊個階段？

梁健宏先生：（經傳譯員）而家我哋係跟到個時間表，我哋已經開始咗加裝，我哋而家已經係訂咗大多數嗰啲組件。

MR DUNCAN：（經傳譯員）有幾多架巴士係需要咁樣加裝？

梁健宏先生：（經傳譯員）總共係大約二千七百個。

MR DUNCAN：（經傳譯員）而家做咗幾多架？

梁健宏先生：（經傳譯員）大概做咗十架，今日為止。

MR DUNCAN：（經傳譯員）工會知唔知道呢個計劃？

梁健宏先生：佢哋知道嘅。

MR DUNCAN：（經傳譯員）你知唔知道公司同埋工會喺呢一方面有冇任何意見分歧？

梁健宏先生：冇。

MR DUNCAN：（經傳譯員）我咪講番九巴僱員工會嗰個意見書，係 90-3，呢個係一個譯本嚟嘅，嗰個文件冊係 TU-1(A)。

跟住頭先我讀過嗰段下面緊接嘅，下一段我哋得到啲咁嘅資訊，工會就向委員會提出呢個睇法嘅。「此外，公司改咗個變速器嘅按鈕，呢個係為咗安全駕駛設備嘅。佢將呢個超檔嘅掣同埋人手嘅減速嘅裝置就係取消咗，淨係靠嗰個由電腦嘅 D 波嘅控制器嚟到控制車輛嘅速度。响嗰個緊急嘅情況之下，就因為冇任何嘅安全裝置畀巴士司機用，係好危險嘅。例如好似飛機、地鐵或者係高鐵，或許係遊船，佢哋都係用電腦嚟到航行嘅。但係响緊急嘅時候，就會係用一個人手嚟到控制嘅模式，嚟到防止避免危險嘅，呢個就等如全自動波嘅私家車都係會有一個加減波嘅設備嘅。」

佢就話响有附件 2 同附件 3 嘅一啲資料嘅，你可以睇到呢一啲相片，92、92-1、93 同 93-1。

工會代表响較早前嘅研訊就第十日，佢都有講過嘅，係 13 頁到 18 頁。你有冇機會睇過佢哋陳述嘅？

梁健宏先生：係有嘅。

MR DUNCAN：（經傳譯員）首先我問一問係咪曾經有段時間，即係文件所講嘅，即

係話人手減速嘅一個裝置，即係車長可以使用呢個裝置？

梁健宏先生：我哋所有嘅巴士都有 retarder 嘅，我哋所有嘅巴士個 retarder 都係自動波箱，有腳掣去控動嘅。唯一 hand retarder 就係我哋有特別嘅路線 which is 大帽山嗰條路線係好長、好斜，就有個特別嘅配置係需要特別嘅，係用 hand retarder 嘅。我哋所有嘅巴士都係配置 retarder 嘅。

MR DUNCAN：（經傳譯員）佢哋嘅意見書就暗示似乎話有個人手嘅減速呢個掣就取消咗，啱唔啱？

梁健宏先生：完全不正確。

MR DUNCAN：（經傳譯員）我哋睇睇佢哋响第十日向委員會講咗啲咩嘢，文件冊第 4 號，第 13 頁第六行。黃小姐就話「呢個講講嗰個係變速器嘅按鈕」，我頭先讀咗出嚟，「公司改咗嗰啲係變速嘅按鈕，就係為咗安全駕駛，就取消咗 O/D 呢個減速，同埋人手減速嘅裝置嘅，就淨係靠嗰個由電腦控制嘅自動波控制系統嚟到控制速度。」

就去到 14 頁，第廿五行，問郭生呢個問題，「就話取消咗呢個人手減速裝置，點樣會影響巴士安全？你可唔可以回應？」呢位 Ivan Lee 先生講「呢個裝置，就等你可以選擇一啲做--嘅行動嘅，可以有個自動嘅選擇--即係你可以選擇自動操控，或者係混合自動人手操控，同埋人手操控，唔同嘅方法嘅。」

去到 17 頁，主席就係問一個問題話「你未繼續之前，我想問，係咪即係呢個情況其實係冇咗呢個人手嘅減速器，就即係話巴士車長冇機會揀點樣減慢個車速，最好就有，係咪咁嘅意思？」Ivan Lee 先生話「可以咁講嘅。」郭先生喺第九行就話「等我答覆，人手減速好重要，特別你係落山嘅情況。」十八行「如果冇嗰個人手減速，我哋就係利用嗰個變速器嚟到減速，唔係淨係靠煞車掣。」證人就再講「冇咗呢個人手嘅減速器」--似乎佢哋嘅回覆就暗示某個階段，你哋即係取消咗呢個人手減速嘅裝置。你明唔明白佢究竟想講咩嘢？

梁健宏先生：或者我嘗試咁樣答，我哋係冇取消到任何 retarder 嘅。或者你睇番 appendix 2。

MR DUNCAN：Of...

梁健宏先生：Annex 2 of 僱員工會嗰個，唔好意思。

主席：Yes?

梁健宏先生：你留意番佢講緊嗰個就係“gear selector”，其實嗰個唔係 gear selector 嚟，嗰個係 gear inhibitor，嗰個就係限波掣嚟嘅。舊款車係有限波掣嘅。我哋 2008 年就轉咗用智能波箱，就唔需要限波掣。限波掣係咩嘢，限波掣嘅設計，就等你架車，尤其是你上斜路嗰陣時唔係好夠力，就唔想個車長可以揀咗唔好上三波，唔好轉上二波。因為如果你上咗某個波段，跟住唔夠

力，又會跌番落嚟，跟住又上番去，又跌番落嚟。所以當其時呢個限波掣，就令致個車長一個選擇，等架車嗰個 journey 就比較順暢啲，呢個就限波掣，佢限住個波箱，就唔好跳上去高一個波。

調番轉頭，如果呢個限波掣，佢落斜路嗰陣時佢撳，佢唔可以由一個高波即刻變做一個低波嘅。For example，如果佢行緊四波，你撳個限波掣二，佢唔會好似私家車咁轉咗落去個二波度嘅，係唔會嘅。呢個 gear inhibitor 係唔係好似大家所想像中係愛嚟減速嘅，呢個完全唔係嘅。

呢架車，呢架巴士，一個咁重型嘅巴士，尤其是載客嘅，安全個系數係點樣樣去保持，就係用減速器。每一架巴士，我哋都有油壓減速器，而呢個油壓減速器就係一個全動箱，喺個波箱入面，或者係附件嚟嘅。我哋每一架巴士已經有嘅。呢個油壓減速器係點操作，就係喺嗰個逼力掌嗰度，當佢想啟動呢個減速器，佢只要輕輕咁喺個腳掌，喺個逼力掣嗰度壓落去，就會啟動呢個減速器。個減速器其實就係一個油壓嘅減速器，佢就利用嗰啲油壓嘅 friction 去減速。但係呢個油壓減速器亦都唔會對嗰個逼力皮有損耗嘅，佢純粹係減速，令到架巴士減速，但係唔會令致到嗰個逼力系統係受 loading 嘅，呢個係安全嘅設備，係好多年已經係巴士標準嘅裝備嚟。所以我哋係完全冇--亦都係拆唔到嘅。

至於我哋去到 2018（原文照錄）年，2018（原文照錄）年智能波箱，呢個限速器就唔再需要。所以變咗你見到有啲相片，就係冇一、二咁嘅，淨係 D、N、R，就冇呢個 gear inhibitor 嘅 button。因為 2008 年嗰啲波箱已經係智能波箱，你呢啲波箱，佢亦都知道架車係上緊斜或者落緊斜，佢知道個車長佢係咪踩緊油，佢知道個車長踩油踩得幾深，或者佢踩 brake 踩得幾多，從而個波箱會自自然然就住架車喺咩嘢狀況，喺咩嘢波段，令到入到一個適合嘅波段嘅。譬如如果佢上緊斜，個波箱知道佢上緊斜，佢就唔會咁容易畀佢跳上一個高啲嘅波段。所以呢啲其實就係一個智能波箱，就唔需要車長花太多嘅 effort 去兼顧去揀邊一個波段，從而希望減輕喺駕駛嗰陣時嘅壓力，集中精神留意交通狀況，呢個係智能波箱帶嚟嘅好處。我哋從沒有拆除任何安全嘅裝置。而呢啲亦都係大部分嘅標準裝置嚟。

MR DUNCAN：（經傳譯員）你知唔知道而家工會有冇呢方面--人工減速器有冇咩嘢意見、睇法？

梁健宏先生：I repeat，我哋冇 manual retarder system 嘅。我哋亦都聽唔到其他工會就住呢個課題有咩嘢任何嘅意見。

MR DUNCAN：（經傳譯員）個工會亦都向委員會提出過另一個事項，我想畀你一個機會嚟到回應嘅。即係話司機要揸嘅路線--即係話一更要揸幾條路--就一條路線嘅問題。我哋收到兩個工會嘅代表嘅證供，佢話有啲司機某一日可能需要揸三條路線，佢哋覺得對於司機嚟講負擔太大。

首先係咪有啲司機需要一日嘅工作要揸三條唔同嘅路線？

彭樹雄先生：Mr Duncan，係有嘅，係有嘅。

MR DUNCAN：（經傳譯員）工會認為呢個對於巴士車長就太大負擔，你哋有咩嘢回應，公司有咩嘢回應？

彭樹雄先生：其實我哋公司亦都係有一個內部制定嘅指引，每一位車長喺每一日嘅更分裏面，佢係唔可以揸多過三條唔同嘅路線，亦都係喺我哋嘅派更組嘅同事，佢哋係會知道呢一樣嘢嘅。所以有個別同事車長講，佢哋可能會揸三條線，係可能會發生嘅，呢個亦都係喺我哋嗰個指引嘅範圍裏面嘅。

MR DUNCAN：（經傳譯員）工會有冇同你講過，就係佢哋話個意見，一日三條線太多？

彭樹雄先生：呢個真係好視乎--如果純粹講工會，呢個其實佢哋比較少提及三條線係多。其實好多時，我哋好多個車長，佢哋手頭上佢可以揸到嘅線路，其實都係有一定數量嘅。但係我哋呢個指引，其實就係想確保佢哋喺每一日嗰個 shift 裏面係唔會有太多唔同嘅變化。因為可能要記啲站等等，可能會有啲困難。不過呢個歸根究底，佢所有嗰啲嘅路線，佢一定要有相關嘅路線操練嘅，呢個就絕對係肯定嘅。只不過我哋唔想佢揸咁多條線，就係因為可能有啲站等等佢要記，某個程度上可能佢哋會覺得辛苦啲。

MR DUNCAN：（經傳譯員）唔好意思，我唔係好明你個答案。我問你有冇任何嘅工會係投訴過話三條線係太多，你嘅問題就話，佢哋真係冇乜提過。即係佢真係有冇提過，係完全冇提過？

彭樹雄先生：佢哋有個別少數嘅車長有提出過，呢個係事實嚟嘅，所以我哋公司都制定喺三條線或者以下，每一個 shift。

MR DUNCAN：（經傳譯員）嗰啲同你提過話三條線太多嗰啲車長，係咪大多數，抑或係少數，你可唔可以話畀委員會聽？

主席：（經傳譯員）我諗彭生頭先就已經講咗話係少數，佢係講咗少數嘅。你可唔可以畀啲數字我哋？

彭樹雄先生：我諗我即係喺呢一刻，我好難畀到個好確實嘅數字，不過我哋可以返去睇一睇，譬如我哋可以攞一日嘅 example 可以睇一睇。

主席： Thank you, Mr Duncan.

彭樹雄先生：Sorry，對唔住，主席。喺我認知裏面，其實唔係好多，即係我 personally 唔係好多。即係當然，你話點樣 quantify 或者點為之多，點為之少，其實喺我嘅認知裏面，就唔係太多嘅。

主席：（經傳譯員）係，得，大律師。

MR DUNCAN：（經傳譯員）或者而家可以小休，好唔好，主席？

主席：（經傳譯員）好呀，當然。各位，就好似以前咁多日，我哋下晝都會有一個小休，等大家休息一下，十五分鐘。

下午3時49分聆訊押後

下午4時04分恢復聆訊

出席人士如前。

主席：（經傳譯員）大律師。

MR DUNCAN：（經傳譯員）多謝你，主席。各位請你揭去TD-1，477頁。大家見到呢係運輸署發出嘅一封信，係發畀專營巴士公司嘅。日期呢係2018年6月7號，係委員會成立之後嘅，亦都開始咗討論㗎嘢。大家睇到？

梁健宏先生：（經傳譯員）睇到。

MR DUNCAN：（經傳譯員）喺未收到呢封信之前呢，咁嗰封信呢，就通知收信人就有呢個係數碼嘅地圖嘅，喺呢封信，收到呢封信前呢，九巴知唔知道有咁樣嘅設備，有咁樣嘅方便嘅呢？

梁健宏先生：（經傳譯員）你係話地理圍欄呀？

MR DUNCAN：（經傳譯員）我講緊係電子地圖。

梁健宏先生：知道。

MR DUNCAN：（經傳譯員）你幾時開始知道呢個電子道路嘅地圖係可以--你可以搵到嘅，攞到嘅？

梁健宏先生：對唔住，我以為你講geo-fencing，如果你個map係accessible to openly呢就係呢封信先至知嘅，係6月7號。

MR DUNCAN： Right --

主席：（經傳譯員）呢度有兩樣嘢嘅，一係就數碼地圖喇，亦都係有講嗰個限速嘅資料呢件事嘅，咁個問題就係話，你知唔知道晌6月7號之前喇吓，收到信之前呢，知唔知道有呢兩件事㗎？

梁健宏先生：（經傳譯員）唔知嘅。

主席： Thank you.

MR DUNCAN：（經傳譯員）第二段，發信嘅人呢，呢度就咁寫，運輸署所用呢個地理嘅資訊系統嘅係一個道路嘅限速呢，已經係有㗎嘞，佢就咁講，已經係有㗎嘞。而家呢你知唔知道，呢個資訊呢係幾時係有嘅呢，幾時可以--幾時開始你係有嘅呢？

梁健宏先生：而家就我哋同啲我哋嗰啲供應商，亦都嘗試去經過呢個佢畀我哋嘅資料呢，係攞呢啲資料嘅，喺 data set 嗰度，咁雖然嗰個 format 就要需要處理，但係係攞緊嘅。

主席：（經傳譯員）個問題就係，你知唔知道呢啲資料，第一次開始係幾時有，呢度講話，封信就話已經有㗎嘞，咁而家你知唔知道係幾時開始有嘅呢？

梁健宏先生：（經傳譯員）只係從信件先知嘅。

主席：（經傳譯員）呢度佢就話好消息，香港有一個係數碼地圖嘞，咁當然喇已經係有㗎喇，一段時間喇，你可唔可以睇睇呢個三--可以用呢個嚟去睇睇你嗰三十七個地點嘅資料呢，嗰三十七個人點樣安排工作呀，你幾時知道有咁樣嘅資料嘅呢？你幾時知道呢個資料係可以攞到嘅呢？

梁健宏先生：唔明。

陳祖澤先生：唔係我哋而家知唔知道呢個 system 喺政府，佢話有呢個 system，係幾時？

講者（不能辨別）：我哋幾時知嘅？

陳祖澤先生：唔係我哋幾時知，政府幾時有呢個 system。

梁健宏先生：政府有好耐已經有呢個 system㗎喇。

主席：（經傳譯員）係，我就想知。等鄧生--大律師問呢，即係話已經有咗一段時間㗎嘞，好長時間，咁即係話呢個資訊係幾時第一時係有嘅呢？

梁健宏先生：（經傳譯員）唔知。

主席：（經傳譯員）你話都好耐之前已經有㗎嘞，咁你講緊係咩嘢時間呀？

梁健宏先生：（經傳譯員）唔好意思，嗰個有啲混亂嘞，我係唔知道政府係會免費提供呢個資訊畀我哋嘅。

主席：（經傳譯員）我明白，你收到呢個好消息，有數碼地圖，有速度限制嘅資料畀到你嘞，你有冇嘗試搵已經有咗幾多年喇，咁樣呢個資訊其實？

梁健宏先生：（經傳譯員）我哋嘅資訊科技服務部門呢就係舊年攞過嘅，咁所以我當時都知道係有咁樣嘅資訊嘅。

主席：（經傳譯員）你係咪你意思話佢哋冇通知你話有呀？

梁健宏先生：（經傳譯員）你係講運輸署呀？

主席：（經傳譯員）係呀，係呀，你嗰個資訊科技部門㗎，你話舊年就試過搵過一次㗎嘛。

梁健宏先生：（經傳譯員）不過呢個唔係嗰個即時嘅地圖。

主席：（經傳譯員）梁先生，其實呢好簡單嘅個問題，當時呢通過呢封信話畀你聽有數碼地圖嘞，咁嗰個有個功能呢，等你知道嗰個係速度嘅限制係乜嘢嘅，咁我哋問嘅問題呢，之後，收到信之後，你有冇試圖搵出究竟第一次幾時開始有呢個資訊呢？即係話我哋隔咗咁耐先--幾耐先至收到呢個消息呢？

陳祖澤先生：Sorry，我哋而家政府話畀我哋聽有呢樣嘢，但係我哋知唔知佢政府有呢樣嘢有咗幾耐。

講者（不能辨別）：幾耐，係嘞，係。

講者（不能辨別）：你知唔知？唔知就唔知。

梁健宏先生：我唔知，我唔知，sorry about that，I don't know。

李澤昌先生：但係 GIS 呢樣嘢呢，係即係根本上我諗好多--已經唔係一件即係呢一、兩年間嘅事嚟嘅，呢個係一個即係係政府嘅--係一個 geographical 嘅 information system 呢，呢個係有咗一段好長嘅時間。

主席：（經傳譯員）唔該晒。大律師。

MR DUNCAN：（經傳譯員）你未收到呢封信，即係話 6 月 7 號之前，你哋公司有冇詢問過政府，嚟到確--即係問一問，究竟有冇呢個數碼地圖，係咪可以攞到呢個數碼地圖，有冇問過呢？

梁健宏先生：冇。

主席：（經傳譯員）你知唔知道譬如話倫敦呢，數碼地圖有埋嗰個速度嘅限制嘅資料呢，自從 08 年、09 年都已經係有㗎嘞，你知唔知呢件事呢？

梁健宏先生：（經傳譯員）唔知。

主席：（經傳譯員）大律師。

MR DUNCAN：（經傳譯員）多謝你，主席。請你睇 KMB-1 號，279 頁。我哋首先睇 235 頁，等我哋知道呢份文件係關於咩嘢嘢嘅。你可以睇到呢日子係 8 月 8 號，呢一封信呢係交畀委員會嘅。係處理第 1、3、6 項，同埋第 4 項嘅一個海報，同埋一封通函㗎，你睇唔睇到呢？係第 2 段嗰度咁寫。

梁健宏先生：（經傳譯員）係，睇到。

MR DUNCAN：（經傳譯員）咁我哋呢就要睇下第 6 項係乜嘢呢，我哋就要上番去一

頁喇，睇番委員會寫嘅信呢，就係 8 月 8 號寫嘅。我哋可以睇到呢，就係一啲文件，係去描述有關嘅證供喇，同埋關於嗰啲嘅步驟，係講到 Openmatics 點樣去處理即時嘅呢一啲數據，就係話譬如每 50 公里，或者每 70 公里嗰啲咁嘅地方點樣有人超速咗，係超速咗幾多，同埋係做過啲咩嘢嘅測試㗎。

咁你呢就好好喇，就畀咗一啲嘅資料我哋嘞，咁喺呢一方面呢，我有興趣嘅呢就係 279 頁嗰度。呢一個係關於第 6 項。咁我呢想你睇一睇，做咗嘅工作嗰一度嗰幾段。就話呢係做咗好幾樣新嘅措施呢去改善以上嘅情況，Openmatics 呢就係用手動去分開咗 50 公里同埋 70 公里嘅區份㗎。九巴呢就喺 2018 年 7 月 31 號呢開始咗一個概念嘅測試，就係將上面嘅車速同實際嘅車速呢去比較㗎，咁呢一個呢就係要去核實一下呢一個即時嘅車上車速警示，係咪可以通知到巴士車長，就話佢已經係超速嘞。

咁而家嗰個開頭嘅測試嘅結果係正面㗎，我哋會再進一步做其他嘅測試，我哋係會準備引進政府嘅數碼地圖呢入去 Openmatics 嗰個黑盒嗰度，係需要三至四個月㗎。不過呢政府嗰個數碼地圖就冇包含即時嘅資訊㗎，而只係每六個月呢先至會更新一次嘅啫。

個問題呢就係，你覺得喺過去，即係最屘嗰一行嗰度呢，你認為有啲咩嘢嘅不足之處呢？你話政府嘅數碼地圖呢係冇即時嘅資訊，只係每六個月先至更新一次。

李澤昌先生：Live information 嘅意思即係話當個路面將會發生嘅情況，好快會影響到嗰個路面嗰個車速，而呢個訊息會好快傳遞到去嗰個 digital map 個 information 裏面，咁呢個就喺我嚟講，係一個 live 嘅，即係例如今晚嗰條隧道會封閉，或者另外一條隧道變做單管雙程行車嘅時候，個速度會大大減低，咁好短嘅時間呢，嗰個 map 就會知道嗰條隧道嘅 speed limit。今天呢個 digital map 呢就係每六個月會 update 一次嘅，咁即係話，換言之即係話，如果嗰個時間愈嚟愈縮短嘅話呢，咁呢就愈嚟愈接近嗰個 live 嘅情況。

主席：（經傳譯員）咁係咪真係準確呢，係咪真係每六個月先至更新一次，抑或係好似佢網站咁講呢？

梁健宏先生：我哋亦都同嗰啲政府官員討論過，希望佢畀個 live map 我哋，但係 so far 都仍然係--都係六個月 update 一次，同埋 update 嗰啲係永久 permanent 嘅 road speed。

主席：（經傳譯員）你係同邊個講呢啲呀？

梁健宏先生：（經傳譯員）有一個電郵嘅，係我哋嘅人員同運輸署。

主席： Do you have that with you?

梁健宏先生：（經傳譯員）有嘅。

主席：（經傳譯員）你可唔可以畀一個副本我哋？

梁健宏先生：（經傳譯員）可以嘅。

主席：（經傳譯員）我哋而家可唔可以攞到呢？未編號嘅，咁你可唔可以複印畀我哋呢？唔該。我哋印多幾份喇，唔該。你剛才答緊我問題，但係我呢就係打岔咗你嘅，就係你同邊個講呢一個對話呢？唔好意思，而家你冇嗰份文件喺手，拎咗去影印，咁你就答唔到嘞。

梁健宏先生：（經傳譯員）其實係同運輸署嘅工程師呢，我哋通過電郵。

MR DUNCAN：（經傳譯員）我哋一陣間睇番個文件就知。

羅先生：（經傳譯員）似乎呢其實係個限速，唔係個車速，係有時呢同一日之內呢，譬如話喺路上面有啲建造工程呀，都有可能變速㗎每一日，咁但係佢就唔係每一日去更新㗎？

梁健宏先生：（經傳譯員）咁呢個係要睇番個道路情況，有時呢係有啲臨時嘅建造工程，咁有啲路係縮短咗喇。

主席：（經傳譯員）咁但係呢啲都係刊憲嘅道路嚟㗎嘛，係咪呀？不如我哋一步一步咁講喇，應該有一個制度㗎，等呢一啲嘅速度限制可以合法咁樣改變，呢一個呢就係政府要喺憲報嗰度刊登，就話呢一段嘅路，原本係每小時 70 公里呢，喺未來三個月呢就會改到去每小時 50 公里，你知唔知有咁樣嘅制度？

梁健宏先生：（經傳譯員）我係知道。

主席：（經傳譯員）而呢一個刊憲嘅制度呢，係處理以月計、以年計嘅改變，但係甚至係短期嘅改變都會係刊憲處理㗎，有時呢處理嘅改變呢，只不過係幾個鐘，或者係幾日。

李澤昌先生：（經傳譯員）即係譬如話隧道有意外。

主席：（經傳譯員）咁我而家問你呢就係，呢啲全部都係刊憲嘅，你係咪話畀我聽有另外一個嘅制度都可以合法咁樣改變道路嘅車速，而唔係通過刊憲嘅呢？我哋冇咁講，咁全部都係刊憲嘅。咁如果而家睇番轉頭，2018 年嘅憲報，你就會發覺呢應該有廿二份呢啲憲報呢係處理呢一個問題嘅，有啲係臨時嘅，有啲係長期嘅。或者我哋等一等，等下嗰份文件先。大律師你有冇其他嘅嘢想處理先？

MR DUNCAN：（經傳譯員）我就想問呢運輸署有冇回覆你嘅電郵？

梁健宏先生：（經傳譯員）運輸署並未回覆。

主席：（經傳譯員）唔緊要，照直講。

MR DUNCAN：（經傳譯員）而家呢，我想講一啲關於科技嘅裝置，係有一啲意見書交畀委員會嗰度呢提起㗎，即係話而家已經有嘅，有可能用到嘅科技裝置，而係

同安全有關嘅。咁或者我呢，可以咁樣開始，請你睇一睇 KMB-1 號文件冊，114 頁。呢一個畀運輸署嘅報告嗰度係抽出嚟㗎，係 3 月 12 號㗎，喺呢一版呢，你可以睇到第 5 部分，其他提升巴士安全嘅措施，我想請你留意呢就係 43 段，就係話傾側嘅警示。跟住佢係咁講，「全個車隊每一架巴士都會裝置傾側警示，當巴士係達到一個指定嘅傾斜度，警示就會係引發，就會係向司機發出呢個警示」，你睇唔睇到？

梁健宏先生：（經傳譯員）睇到。係，睇到。

MR DUNCAN：（經傳譯員）星期二呢我哋聽到--我哋睇到 Kulis 先生嗰個證供，嗰個黑盒呢，Openmatics 提供嗰個呢，就係包括一個條文，就係有一個傾側嘅參數㗎，你記唔記得呀？

梁健宏先生：（經傳譯員）記得。

MR DUNCAN：（經傳譯員）梁生，我諗係你呢，星期二解釋過，公司呢並冇為呢個參數呢係講出一個價值，因為呢你識別唔到任何參照嘅價值，你記唔記得你講過？

梁健宏先生：（經傳譯員）我記得，係，我講過。

MR DUNCAN：（經傳譯員）我哋可唔可以睇番 114 頁，第 43 段。咁樣講公唔公道呢，就係話呢一句，係因為巴士發生嘅事，因為有大埔嘅意外，呢一個係一個反應嚟㗎，咁樣講係咪公道呢？

梁健宏先生：（經傳譯員）係呀，的而且確係事件之後。

MR DUNCAN：（經傳譯員）咁係咪對嗰件事嘅一種反應呢？因為實際上係有傾側，而實際上係翻車嗦。

梁健宏先生：（經傳譯員）呢一個係委員會嘅建議嚟，係嗰件事之後。

MR DUNCAN：（經傳譯員）咁唔係喺件事發生之後好耐，3 月 12 號，「委員會」即係咩嘢意思呀？

梁乃鵬先生：（經傳譯員）九巴董事局嘅特別委員會。

MR DUNCAN：（經傳譯員）咁而家唔該去睇 150 頁。

主席：（經傳譯員）你繼續之前，喺 43 段呢一度嗰句，嗰個背景係咪第 39 段呢？就係其他提升巴士安全嘅措施，最屘嗰三句係咁講嘅，「特別委員會考慮過呢啲問題，就係同九巴嘅巴士供應商係諮詢過，咁呢就係作咗一啲建議，就話九巴嘅管理層呢就會係實施，或者係進一步去考慮㗎」，呢一個係咪個背景？

梁健宏先生：（經傳譯員）係，冇錯。（證人直接用本地話說）哦，我哋就住呢個 tilt alarm，tilt 呢個 angle 呢去點樣樣定一個 angle，因為之前我哋唔

知道點定。咁呀同 ADL 呀，同 Volvo 亦都商討過，佢哋亦都嘅 advice 呢就亦都冇一個建議畀到我哋，佢就建議呢就係，佢哋冇一個角度嘅建議畀到我哋。佢哋嘅建議呢就係，好難定到一個 angle 呢，因為佢哋覺得，定個 angle 如果係太細嘅話，其實就冇乜意思嘅，咁呀變咗啲車長呢就收到好多啲錯誤嘅信息。

咁如果定個 angle 係接近太危險嘅話，亦都唔知道個車長點 react，唔知道個車長會踩逼力，抑或會攞軚。所以變咗 Volvo 同埋 ADL 呢都唔建議嘅，都唔建議呢個 tilt angle 嘅，反為佢哋建議呢就係會唔會 ESP 呀，或者 ESC 去處理呢個 tilt 呢個 issue。而亦都冇其他嘅 reference 可以參考，包括其他巴士公司，或者其他國家有啲咩規定，就住呢個 tilt angle 嘅 alarm，亦都搵唔到任何相關嘅作為參考。

主席：（經傳譯員）你有冇同 Openmatics 講過呢件事呀？因為係睇番佢哋嗰個器材㗎。

梁健宏先生：（經傳譯員）我哋有呀。

主席：（經傳譯員）咁佢哋個反應係點呀？

梁健宏先生：（經傳譯員）佢哋都話呢係冇任何相關嘅嘢，佢哋冇建議任何嘅數字。

主席：（經傳譯員）咁佢哋有冇向你顯示話知唔知道呢一個咁樣嘅警示，係任何人用得過嘅呢？

梁健宏先生：（經傳譯員）冇任何關於雙層巴士，即係同我哋相關嘅資料。

主席：（經傳譯員）咁你意思係咪即係話，如果唔係雙層巴士，就有一啲嘅汽車係用過呢？

梁健宏先生：（經傳譯員）佢哋有講過一啲好似大嘅旅遊巴嗰啲咁。

主席：（經傳譯員）係咪即係話 Openmatics 話畀你聽係喺嗰啲旅遊巴，佢哋有用過呢？

梁健宏先生：（經傳譯員）咁又唔係，我哋問佢有冇任何相關雙層巴士嘅嘢可以畀我哋參考，佢哋畀咗個數字，不過呢具體上呢唔係關於雙層巴士㗎，我哋仲等緊佢哋係確認一個資料。

主席：（經傳譯員）係咪係書面嗰度咁樣講㗎？

梁健宏先生：（經傳譯員）係呀。

主席：（經傳譯員）你可唔可以將呢一個對話嘅副本可以交畀我哋？

梁健宏先生：（經傳譯員）我哋可以。

主席：（經傳譯員）係幾時嘅事呀，大概？

梁健宏先生：（經傳譯員）一、兩個禮拜前。

主席：（經傳譯員）唔該提交有關嘅通訊，關於呢件事嘅通訊嘅資料畀我哋。

MR DUNCAN：（經傳譯員）梁生，鑑於你頭先所講嘅事呢，我想你睇114頁，第43段呢，似乎呢講得好實在嘅，即係我哋會係裝置一個係即係傾斜嘅警報嘅，係所有巴士都會裝嘅，咁呀達到某一個傾斜角度呢，嗰個警示呢就會響嘅，嚟到係提醒個司機。呢個係咪公司當時有咁樣嘅決議呢？係我講緊2018年2月12號嘅時候。

主席：（經傳譯員）我諗係3月12號嘅，當呢個紀錄，做呢個紀錄嘅時候。

MR DUNCAN：（經傳譯員）唔好意思，係3月12號嘅。呢個係一個好正面嘅，43段呢講得好正面嘅，公司呢會喺個總--你哋車隊呢所有巴士都裝呢個警報器嘅。

梁健宏先生：呢個就應該係個黑盒嗰度嚟㗎嘞嘞，就係個意思就應該係trigger嗰個alarm，喺個黑盒嗰度trigger嘅，就唔係話要再裝一個tilt alarm嘅。

主席：（經傳譯員）我哋明白嘅。不過我哋企番後睇睇呢，呢個特別委員會嘅一個建議嚟㗎，佢建議我哋有一個--要裝一個傾側嘅警報器嘅，咁呀去到某一個傾側嘅角度呢，咁就會響喇，係提醒嗰個巴士車長，呢個係3月12號嘅。好嘞，跟住呢你就之後呢，你就同ADL呀，同埋Volvo呀，兩間公司，同埋亦都同Openmatics講呢，咁呢個有咩嘢結果呢，可唔可以畀個即係簡述我呀？我哋知道發生咩嘢事呢？

梁健宏先生：Volvo, ADL --

主席：（經傳譯員）唔需要詳細，即係講個結果得㗎喇。

梁健宏先生：冇一個合適嘅angle，定唔到一個angle。

主席：（經傳譯員）咁個結果就係咁樣，雖然係特別委員會有咁嘅建議呢，咁就你係冇辦法係真係實際上施行嘅，咁樣講啱唔啱？

梁健宏先生：（經傳譯員）係，咁係啱嘅，唔該晒。

MR DUNCAN：（經傳譯員）我哋睇番第二個個行動計劃，同一個文件冊嘅231頁。呢個係一個8月6號提交畀委員會嘅一個工作或者行動計劃，呢度有一個簡述，用書面簡述咗頭先你同主席所講嘅說話，即係喺右手邊嗰一欄，咁呀講到底就係話，即係話唔會有個傾側角度嘅警報器嘞。

梁健宏先生：（經傳譯員）咁講係啱嘅。

MR DUNCAN：（經傳譯員）你响嗰個意見嗰度，即係嗰個備註呢，呢個電子嘅穩定系統，有提過嘅。請你去番KMB-1號文件冊嘅114頁。我哋見到呢度係報告，

即係向運輸署提交嘅報告，即係 3 月 12 號嘅報告嘅內容呢，咁呀呢度就配合番有關嘅背景呢，即係話特別委員會呢考慮過呢件事，呢度就描述，咁呀亦都同巴士製造公司呢就商討過，咁有個建議呢，咁嗰個巴士公司呢係會實施，或者係進一步研究嘅。

咁呢度第 41 段呢，就講到係電子嘅穩定嘅系統嘅，咁佢係咁樣描述嘅，呢個咁嘅系統係一個重要嘅巴士安全嘅裝置嚟，喺歐洲嚟講，所有旅遊巴士係一個必定要裝嘅安全設備嚟嘅，呢個係防止嗰個跣胎同埋係翻車嘅危險，喺歐盟 V 同埋歐盟 VI 巴士裝置呢個電子穩定系統呢，而家係正在測試緊，亦都會同--供應商呢亦都係喺度做緊核實嘅過程。咁呀供應商證實咗可以做呢，我哋就會响--按一個分期嘅方法，將成個車隊嘅巴士就裝呢個電子穩定系統嘅。响呢件事件發生之前呢，你哋公司有冇考慮過採納呢個咁樣嘅系統呀？

梁健宏先生：（經傳譯員）有嘅。

MR DUNCAN：（經傳譯員）第一次係幾時考慮使用呢個電子穩定系統呀？

梁健宏先生：喺 14、15 年之間，我哋係嘗試搵一間廠，佢叫做 MAN，喺德國，咁就有呢個 ESP 呢個 system，咁我哋喺 16 年嘅時間，就買咗二十架 MAN 嘅車，佢就配置咗呢個 ESP 嘅 system，係已經喺個路試緊，即係用緊，咁總共二十一架。

主席：（經傳譯員）MAN 嗰度畀你嘅？

梁健宏先生：（經傳譯員）係嘅，係雙層巴士。

MR DUNCAN：（經傳譯員）咁响 2 月 10 號發生意外之前，都用咗一段時間㗎嘞，呢啲巴士？

李澤昌先生：（經傳譯員）係嘅。

MR DUNCAN：（經傳譯員）公司有冇決定究竟用呢個--應該係除咗 MAN 呢個巴士之外，其他都要運用呢個系統呢？

李澤昌先生：（經傳譯員）而家我哋買嘅全部嘅新車，歐 VI 嘅新車，全部都會配置呢個 ESP 嘅 system。

主席：（經傳譯員）決策係幾時做㗎，幾時決定㗎？

梁健宏先生：因為嗰啲 Volvo 同埋 ADL 呢，佢要一段時間同佢傾，佢幾時開始有，咁就我哋磋商咗一段時間，佢哋可以 supply，所以先至係有嘅。

陳祖澤先生：（經傳譯員）我哋其實响嗰個更新嘅工作計劃，即係 8 月 1 號嗰個工作計劃，2018 年 8 月 1 號裏面有講嘅。

主席：（經傳譯員）可唔可以講邊一頁呀？等我哋可以參考嗰一頁。

彭樹雄先生：（經傳譯員）230。

主席：（經傳譯員）唔該晒。我諗呢鄧先生問嘅問題就係話，2016 年呢你有二十一架呢啲雙層巴士，係由 MAN 提供畀你嘅，有呢個電子穩定系統，咁猛獅公司，咁你可唔可以幾時決定話新巴士呢就要有呢個系統嘞，即係响嗰個大埔意外之前，你幾時決定話要咁做呢？

李澤昌先生：嗰陣時仲試緊呀，所以即係想攞多啲數據先，因為嗰陣時得二十一架。但係我哋發覺到其實個 ESP 係可以幫助到，當架車 skidding，特別係佢 rolling 嘅時間呢，我哋就即刻將個速度會加快啲想做咗佢嘅。

主席：（經傳譯員）咁呢個決定話要咁做，即係話 230 頁呢個行動呢，你嘅決定係因為 2 月 10 同埋有個特別委員會嘅調查，有個咁樣嘅建議，所以你決定咗要咁做？

李澤昌先生：（經傳譯員）係嘅。

MR DUNCAN：（經傳譯員）可唔可以形容一下而家嘅情況係點呢？即係話從加裝呢個電子穩定系統嘅現時嘅進展呢？即係 114 呢，你話巴士供應商證實做到嘞，咁我哋就會係分期呢加裝呢個系統落去巴士度嘅，所有巴士度嘅，你有冇收到供應商話證實係做得到嘅？

梁健宏先生：佢哋都仲係喺度發展緊佢而家嗰套設備嘅，咁新車嚟到呢就係 2019 年嘅新車就會有，咁到期時佢就會下一步就睇睇點樣樣，呢啲咁嘅設備呢係去 retrofit 落我哋嘅舊車度，初步嘅 indication 呢就係 positive，咁就個時間可能需要時間，但係嗰個 indication 係 positive。

李澤昌先生：即係正如呢度講咗喇，Volvo 係大概 18 至 24，但係 ADL 就未有一個確實嘅時間表，嗰個 retrofit。

MR DUNCAN：（經傳譯員）咁 ADL 有冇講過可唔可行呢？

梁健宏先生：係嘅，可以嘅佢哋覺得，係可以 retrofit。

MR DUNCAN：（經傳譯員）咁係咪即係成個車隊都包括在內？

梁健宏先生：淨係 restricted to Euro V 嗰啲車呢，係有電子逼力系統嗰啲車先至可以。

李澤昌先生：因為歐 V 之前呢係冇電子逼力系統嘅。

MR DUNCAN：（經傳譯員）即係話有啲車隊裏面有啲巴士就冇嘅？

梁健宏先生：（經傳譯員）冇，係啱嘅。

MR DUNCAN：（經傳譯員）咁有幾多架呢？

梁健宏先生：我諗我哋歐V以上嘅，佔我哋而家係超過一半嘅車隊。

主席：（經傳譯員）即係話有一半係冇個囉喎？即係重新安置，就住做完都係有一半冇嘅？

MR DUNCAN：（經傳譯員）咁講啱唔啱？

梁健宏先生：（經傳譯員）係嘅。

MR DUNCAN：（經傳譯員）或者全面起見，我哋想睇睇TD-404。

主席： Which bundle is that in?

MR DUNCAN：（經傳譯員）TD-1。工作小組有冇建議所有專營巴士公司响新嘅雙層巴士，即係話2018年開始都係會裝呢個電子穩定嘅系統，係咪要咁樣做呢？

梁健宏先生：（經傳譯員）係㗎。

MR DUNCAN：（經傳譯員）喺(a)嗰一段，係咪就係話可以全面咁樣描述呢一個裝置嘅性質呢？

梁健宏先生：九巴就會係2019年1月1號嗰啲新車就會有。

MR DUNCAN：（經傳譯員）當我哋仲睇緊404頁嘅時候呢，你喺(b)嗰一段呢，係睇到一個參照呢就係講到減速器嘅，就係話你可以限制最高嘅車速，尤其是係落坡嘅時候，就係有一個限速嘅減速器。你睇唔睇到有呢一個提述呀？

梁健宏先生：（經傳譯員）有嘅。

MR DUNCAN：（經傳譯員）我想請你呢記住呢一點，然後呢再去睇番交畀運輸署嗰個報告，即係意外之後，喺115頁。

主席： Of KMB-1?

MR DUNCAN：（經傳譯員）KMB-1號文件冊。可唔可以你自己睇一睇第45段呀？

梁健宏先生： Yes.

MR DUNCAN：（經傳譯員）佢就係咁講，佢話呢一個咁嘅減速器呢，就係一個水壓嘅設施嚟㗎，佢就話呢，做完一啲工程同埋測試之後呢，就可以喺新巴士嗰度裝上呢一啲嘅限速系統㗎。係邊一啲人會供應呢一類嘅裝置嘅呢？

梁健宏先生：（經傳譯員）係巴士製造商。

MR DUNCAN：（經傳譯員）已經有咗幾耐呢？

梁健宏先生：（經傳譯員）喺新巴士嗰度就會有㗎嘞，出年呢就有㗎嘞，就係ADL嗰啲，即係亞歷山大丹尼斯車廠。

主席：（經傳譯員）我諗頭先大律師所問呢就係話，究竟嗰啲供應商幾時開始有？

梁健宏先生：（經傳譯員）而家就冇。

MR DUNCAN：（經傳譯員）唔好意思，我諗我問得唔清楚，呢一啲嘅裝置，喺大埔意外之前係咪已經有嘅呢？

梁健宏先生：（經傳譯員）冇㗎。

MR DUNCAN：（經傳譯員）佢哋係幾時首先出現嘅呢？

梁健宏先生：（經傳譯員）將會有。

李澤昌先生：（經傳譯員）第一個呢就會喺九巴嘅巴士嗰度出現。

主席：（經傳譯員）即係話世界其他各地都冇？

梁健宏先生：（經傳譯員）對雙層巴士嚟講係冇。我唔係好肯定。

主席：（經傳譯員）咁你要小心啲答，要謹慎啲。

MR DUNCAN：（經傳譯員）去番最開頭先。喺意外之前，你知唔知道有呢一類嘅裝置？

梁健宏先生：（經傳譯員）我哋有去過皇后大學，就係貝爾法斯特嘅，我哋就唔去亞歷山大丹尼斯車廠，我哋知道有咁樣嘅科技㗎，尤其是係車上可以用到㗎。

主席：（經傳譯員）你意思係咪即係話呢一個嘅裝置呢，呢一個科技呢喺 Wright 嗰啲巴士嗰度有？

梁健宏先生：（經傳譯員）而家係冇㗎。

李澤昌先生：其實今次呢個交通意外之後呢，我地同咗呢個 ADL、Volvo 呢兩間公司呢，係同佢傾嘅時候呢，我哋都係同佢探討緊呢，呢個 retarder 呢個東西呢，係咪可以呢係喺個巴士裏面安裝，咁佢哋當其時呢，都係花咗一段時間呢，係諗下呢個嘅可行性，咁我哋只能夠係講到呢度，因為即係唔係嗰件嘢，佢係好 readily available 咁樣畀我哋嘅感覺囉。

主席：（經傳譯員）大律師。

MR DUNCAN：（經傳譯員）喺今年二月嘅意外之前呢，其實你可能都知道你有嗰個減速器嘅裝置呢，就係令到你啲巴士係 70 公里內，咁係唔會喺巴士減坡嘅時候係受到影響，係咪？

梁健宏先生：（經傳譯員）我知道。

主席：（經傳譯員）因為你嗰個系統就係話會減少燃油供應落去嗰個引擎嗰度吖嘛？

梁健宏先生：（經傳譯員）係呀，啱。

MR DUNCAN：（經傳譯員）既然你係知道呢一個系統就算巴士係落坡嘅時候超過 70 公里，佢都唔會將佢減速嘅，咁喺意外之前呀，你有冇查詢過喺市場上面，有冇任何嘅裝置，喺呢一方面會向你提供到協助嘅呢？

梁健宏先生：應該有，但係我唔知道喺邊一個情況講過。我哋有啲車係用 hand-retarder 嗰啲車就有，落斜路我地會 restrict 咗嗰個車速嘅。

MR DUNCAN：（經傳譯員）呢個唔係問題嚟，你有冇考慮過，即係同巴士供應商喺意外之前，即係話自從意外之後，你發現咗有嘅嘢，你喺之前有冇傾過，即係話呢係可以喺落坡嘅時候限制車速？

梁健宏先生：我記憶中係冇。

陳祖澤先生：（經傳譯員）或者我嘗試處理呢一個有少少技術嘅問題。之前我哋係講過一個某啲要喺西貢公路落斜嗰一啲巴士嗰度，可以有一啲手動嘅減速器，咁要答大律師嘅問題呢，係有㗎。呢一啲有手動減速器嘅巴士呢，喺大埔意外之前呢，好耐都有用㗎嘞，所以呢，你咁樣講就話我哋係知道，但係講到好似呢一類咁樣嘅限速減速器呢，即係我哋而家講緊呢啲呢，只係喺個意外之後，我哋先至知道有㗎。

MR DUNCAN：（經傳譯員）好，明白，我明嘞。

主席：（經傳譯員）咁你意思即係呢一個水壓嘅系統？

陳祖澤先生：（經傳譯員）係。

MR DUNCAN：（經傳譯員）我哋可唔可以睇番個第一個行動計劃，等我哋可以明白呢一個情況。我相信呢應該係 150 頁㗎。係咪講呢一度呢，就係話有一個限速嘅制度，就可以自動咁樣係可以剎車，等佢可以減低嗰個波箱嘅操作。

梁健宏先生： Yes.

MR DUNCAN：（經傳譯員）咁嗰個行動嗰度就話，喺 4 月 10 號，亞歷山大同埋富豪呢，都係喺度探索緊點樣可以喺新巴士嗰度裝置呢一啲嘅設施㗎，咁就話喺適當時間亦都更新資料。然後我哋去第二個行動計劃。第 19 項。

主席：（經傳譯員）第幾頁呀？

MR DUNCAN：（經傳譯員）應該係 232 頁喇，主席。

主席：（經傳譯員）唔該。

MR DUNCAN：（經傳譯員）我哋係收到資料呢，就係話亞歷山大丹尼斯歐盟 VI 型嘅新巴士呢，就會有呢一個裝置，富豪呢就會係 2019 年 7 月呢就會有呢一種嘅設施，而佢哋新嘅歐盟 VI 型巴士，如果喺呢一個時間之前，係交付嘅話呢，就可

以加裝呢一個設施㗎。咁樣係咪包括晒你將來會買嘅新車呢，即係從亞歷山大丹尼斯車廠同埋富豪？

梁健宏先生：（經傳譯員）係㗎，所有新嘅歐盟 VI 型車呢都會包括晒。

MR DUNCAN：（經傳譯員）咁你會唔會將來買嘅車都會係歐盟 VI 型嘅呢？

李澤昌先生：（經傳譯員）所有嘅新巴士呢都會係歐盟 VI 型。

MR DUNCAN：（經傳譯員）係咪即係限制於亞歷山大丹尼斯車廠同埋富豪呢？

李澤昌先生：（經傳譯員）到而家為止都只係有呢兩間嘅製造商係製造歐盟 VI 型嘅巴士。

MR DUNCAN：（經傳譯員）或者我哋睇番工作小組嘅建議嘞。我哋可唔可以睇到啲細節呢，就係 TD-1，404 頁同埋 405 頁。你睇唔睇到呢一度寫嘅嘢呀？

梁健宏先生：（經傳譯員）係嘅，睇到。

MR DUNCAN：（經傳譯員）講到加裝呢，你就會發現呢，工作小組嘅建議就係話，就係呢兩個新裝嘅裝置呢，就都要喺現有嘅巴士嗰度去加裝㗎，咁就係話呢，你應該喺十二至十八個月之內，即係話 2019 年嘅下半年，就開始嗰啲試行嘅計劃㗎，你可唔可以同我哋確認一下公司對於呢一個加裝嘅工作，你打算點樣做呢？加裝呢一個裝置。

梁健宏先生：我哋會做嘅。

MR DUNCAN：（經傳譯員）咁你會唔會係根據工作小組嗰個建議咁樣去做呢？

梁健宏先生：我哋會跟進。

MR DUNCAN：（經傳譯員）我而家呢想睇工作小組講嘅另外一個裝置。就係 405 頁，嗰度講到話一啲測試嘅，一啲新嘅安全科技嘅測試，或者呢，我而家係讀咗嗰個引旨嗰一段出嚟先，就係話令到專營巴士商可以更好咁樣管理同埋控制佢哋嘅車隊，同埋呢係防止一啲不安全嘅駕駛行為造成嘅潛在風險。工作小組呢就認為有啲新嘅安全科技呢，係可以協助專營巴士商係去監察同埋控制巴士嘅安全。呢一啲應該係積極咁樣去探索嘅，一般嚟講呢，專營巴士商呢就係願意去睇下最新嘅安全裝置，或者係科技嘅裝置，去睇下邊度有呢一啲嘅供應，同埋願意呢係去測試佢哋嘅技術可行性，同埋呢係佢哋嘅--係咪物有所值㗎。

咁第一個建議就工作小組提出嘅就係所謂巴士監察同埋控制系統。我就可以讀出呢度嘅內容，由於有最新嘅巴士管理系統嘅技術進步，技術發展呢，有黑盒喇，亦都有即時嘅監察嘅功能，包括埋係速度呀，地球位置呀，同埋嘅紀錄呀，咁嗰個工作小組覺得呢一個中期嘅目標，專營巴士公司呢，應該設立一個，發展一個全面嘅巴士監察同埋個控制系統喇，有定位系統喇，亦都有啲係營運嘅資料可以進行監察喇，同埋有唔同嘅限速，包括係地球圍欄嘅科技喇，

會使用地球定位系統，或者其他嘅定位科技，呢個系統就會係即係將嗰個實際嘅巴士所在嘅位置，同埋嗰個法定嘅速度呢結合起嚟嘅。

咁跟住呢個實時嘅資料呢，限速資料就可以用嚟控制嗰個係限--加強個限速器，即係話限速器係有兩個唔同速度嘅設定嘅，即係話巴士嘅速度呢，係可以响嗰個速--即係譬如話每小時 50 公里、70 公里嚟到進行限制嘅，就視乎路段喇。呢個系統亦都可以容許個專營巴士公司嚟到係監察佢哋嘅巴士車隊喇，更加緊密咁樣去監察喇，亦都可以就住超速就採取適當嘅管理。就住超速同埋唔安全，或者唔妥當嘅駕駛行為，譬如話大力剎車呀，或者係上山或者轉彎嘅時候速度不當呢，進行一啲適當嘅管理行動。

咁呢方面就專營巴士公司同意呢係發展咁樣嘅系統，咁就會响另外一個階段進行測試嘅。第一個階段就會有一個咁樣嘅管理系統，係有定位嘅功能嘅，亦都有車務嘅資料嘅，例如車輛嘅速度呀，嗰個係剎車嘅狀態呀，加速等等，減速等等喇，有啲咁樣嘅監察系統，同埋個地理圍欄嘅科技呢，就要嚟管理個車隊，咁我會試用，嚟到係可以察覺到有冇超速，亦都可以即時提供實--警示畀巴士車長嘅。

第二個階段呢，視乎第一個階段嘅測試係如果係成功嘅話，咁呢個新嘅系統呢，即係巴士監察管理系統呢，就會有啲額外嘅裝--應用嘅功能嘅，咁就係一個加強版嘅增加，即係改進版嘅限速嘅功能嘅，呢個會由巴士製造商發展出嚟嘅，所以可以決定嗰個巴士嘅速度呢，就會係符合番唔同路段嘅相應嘅限速嘅。咁而家我哋睇睇巴士公司嘅行動計劃。

主席：（經傳譯員）未去嗰度先前呢，我就想問梁生一個問題，請你睇番 402 頁。運輸署呢提供咗啲資料畀委員會。呢個關於嗰個工作小組工作嘅進展，佢哋嘅會議喇，你見到最後兩行，「工作小組嘅報告呢，我哋會提交--儘快提供一個副本畀委員會參考嘅。」呢個係 7 月 19 號嘅信件，咁幾時可以收到，我哋幾時可以收到工作小組嘅報告呢？

梁健宏先生：我未收到過。

主席：（經傳譯員）你可唔可以幫我哋呢，我哋幾時可以收到呢，你大概可以...

梁健宏先生：Working group 仲係開緊會。

主席：（經傳譯員）我明白嘅，可能亦都係過咗我哋之前即係運輸署講嘅時間嘅限度喇，佢哋喺 5 月畀證供呀，我就想你可唔可以指示一下呢，即係作為你都係工作小組嘅一個成員喇，可唔可以畀我哋講一講大概我哋幾時可以收到報告呢？

梁健宏先生：有會議紀錄嘅，嗰啲我就收到會議紀錄嘅啫，Chairman。

主席：（經傳譯員）你唔明白我嘅講法，去到尾呢，個工作小組有個報告㗎，我哋幾時，大概幾時可以攞到呢個工作小組報告？

梁健宏先生：我要問番嗰個 working group 嘅 chairman。

主席：（經傳譯員）我都明白嘅，係咪差唔多完喇，差唔多即係做晒喇，就可以最後簽字？

梁健宏先生：（經傳譯員）差唔多做完㗎喇。

主席：（經傳譯員）唔該。大律師。

MR DUNCAN：（經傳譯員）係咪工作小組仲有其他會議要開呀？係咪已經做晒佢哋嘅工作㗎喇？

蘇偉基先生：個 working group 呢，根據頭先講嗰兩個 agenda，一個 bus fleet，一個就係 training 呢，係開咗三次嘅大會呢，係叫做有一個階段性嘅進展嘅，咁我哋都 expect 佢有個 report㗎，咁出 report 就確實係主席、副署長去處理，佢跟手就召開咗第四次嘅會議，嗰個 agenda 最主要係講 bus captain training 入面有啲乜嘢嘅 monitoring mechanism，咁就係 9 月，我冇記錯係 9 月中開嘅。

MR DUNCAN：（經傳譯員）唔該晒。跟住講下嗰個工作計劃嘞。150 頁，呢個係 KMB-1 嗰個文件冊嘅。呢個係第 16 段喇呢一頁，係關於呢件事嘅就係呢一段，係 BMCS，即係巴士管理及控制系統，係咪呢？

李澤昌先生：而家我哋係有向呢個方向做緊嘅。首先我諗頭先都講咗嗰啲 digital map 同埋嗰個 black box 嗰樣嘢，咁嗰樣嘢係而家係進行緊，有個時間表，咁如果嗰樣係做得到嘅話，第一個階段就可以將車長今日佢嗰個 70 公里，而呢個 70 公里今日淨係架車本身係 set 咗出嚟。咁呀未來呢係真係可以 70 同 50 呢都係提醒個車長，係即時呢，喺個 dashboard 嗰度見到嘅。

咁第二個階段就係講緊嗰個 geo-fencing，geo-fencing 嗰個其實係比較複雜，係首先一，就由個車本身佢嗰個 CAN system，輸入個資料喺個 black box，然後 black box 分析完佢嗰個 location 係咪超速，然後就叫個 geo-fencing 嘅 system 呢，就去番落去個 CAN system，即係架車本身嗰個系統嗰度，做呢個動作，究竟係收油吖，抑或將佢嗰個速度，去番嗰個 speed limit 嘅速度吖，或者係逼力呢，呢個呢係比較要小心啲，因為我哋係 overtake 咗，我哋 takeover 咗車長嗰個行為。咁呢個我哋亦都有一架車行緊係試緊呢樣嘢，但係就仲係喺試緊嘅階段嚟嘅。

MR DUNCAN：（經傳譯員）呢個係咪第 16 段呢度所講㗎？就反映嗰個需要做嘅工作，即係話呢個巴士管理同埋控制系統。

李澤昌先生：（經傳譯員）係嘅。

MR DUNCAN：（經傳譯員）咁有啲進一步嘅更新呢，我哋睇番第二個工作計劃，231 頁，都係 KMB-1 文件冊。大家睇唔睇到 231 頁，2018 年 8 月 1 號嘅情況，呢

個係一個駕駛測試，頭先我哋提過呢件事嘅。

李澤昌先生： Yes.

MR DUNCAN：（經傳譯員）咁褪番後喇，我哋睇番工作小組嘅建議，根據運輸署所講呢，咁九巴就住第一個階段，第二個階段，而家嘅情況係去到邊呢？

梁健宏先生：Phase 1 呢就淨係畀 alert 嘅啫，淨係畀提示嘅。

MR DUNCAN：（經傳譯員）係，我哋達到邊一個階段呀？做咗一半，第一階段定係第二階段？

梁健宏先生：未㗎，我哋仍然都係喺度試驗，都未曾去到一個即係有結果嘅階段。

李澤昌先生：今日呢仲係嗰個，因為要個 digital map 呢，即係裝咗喺嗰個黑盒裏面呢，先至係可以完成咗 50 同 70，但係今日我哋試緊呢一架車呢，係試緊呢一個 50 同 70 嗰個情況裏面呢，個系統係 work 唔 work 嘅啫，咁即係話其實個 digital map 嚟咗之後呢，第一個階段呢，應該喺短期內應該可以做到。

梁健宏先生：補充一點喇，我哋而家就 manually 將有啲 location 呢就擺咗喺個黑盒度，manually 即係話邊一啲 GPS location 係個 zone 係 50 公里限制嘅，我哋就係 manually 就已經 put 咗落去嗰個黑盒嗰度，即係如果有個 live map 呢，我哋就成個擺咗落去呢就到期時就可以再認認真真再去試。

主席：（經傳譯員）有幾多路段呢，你哋人手即係分辨 50 公里嘅路段，70 公里路段，要涵蓋幾多路段呢？

李澤昌先生：我哋而家用手入嗰個係咁樣嘅，我哋將我哋行嘅車嘅路段係 70，咁呢就 manually 就 digit--我哋自己 manually install 落去 70 嗰啲地方，咁其實 install 70 嗰個 map 之後呢，即係 manual 嗰個，咁呢然後我哋就--其實呢就全部車都可以試得㗎嘞，但係我試咗一部，嗰一部車試咗佢行，喺 70，佢唔響，如果佢超過 70 嘅時候，50 佢係咪響，如果超過 50 嘅時候，而家我哋試緊一部，即係如果你可以想像呢，如果一部 work 嘅時候呢，其實我哋四千幾部車都會成功嘅。

但係另外個問題就返番去，就係而家呢啲係我用手去做呢個動作，咁如果嗰個 digital map，政府佢入咗去之後呢，咁嗰件事情呢，即係當然要 verify 啲 format 喇，咁呢就應該可以係實際可以好全面性就變咗一個 50 同 70，都會係做到嘅。

主席：（經傳譯員）個問題我問，頭先問呢就話，人手做呢個階段呢，你涵蓋到幾多個路段呢？即係譬如話呢啲咁樣嘅參數呀，嗰啲定位系統嘅參數。

李澤昌先生：（經傳譯員）係所有嘅路段都得嘅。

主席： Thank you.

MR DUNCAN：（經傳譯員）你可唔可以同委員會講一講大概呢兩個階段呢，要做晒啲測試要幾耐呢？

李澤昌先生：我哋畀咗你哋嘅，呢個係一個好 indicative，plan 咗邊啲路係 70，就係做 70。

主席：（經傳譯員）可唔可以提一提醒我哋响邊度搵到呢，文件度，係咪有一個好似係條狀嘅圖表畀我哋呀？

梁乃鵬先生：（經傳譯員）279 至到 281。

主席：（經傳譯員）好，唔該晒。你可唔可以協助下我哋呢，第一個係咩嘢意思呢，就係 Openmatics 呢將有關嘅限速呢，係擺入去黑盒裏面嘅。

梁健宏先生：呢個就係將政府嗰個 live data set，就係嗰啲 road...

主席：（經傳譯員）即係話嗰個數碼地圖係有限速嗰個？

梁健宏先生：（經傳譯員）係，啱嘅。

主席：（經傳譯員）係由 Openmatics 去裝置落去黑盒，係咪所有黑盒呢？

梁健宏先生：（經傳譯員）係。咁喺測試嗰陣時可能係一、兩個。

主席：（經傳譯員）呢個係你希望可以達到嘅，係咪？

梁健宏先生：（經傳譯員）係呀。

主席：（經傳譯員）睇番唔同嘅步驟，呢度話核實嗰個限速嘅準確性，咩嘢意思呀？

梁健宏先生：亦都希望嗰套系統真係正常咁去運作呢，咁就真係要試試佢係咪去到嗰個地點，係真係做到嗰個要求。

主席：（經傳譯員）係咪即係話交叉咁樣查核？

梁健宏先生： Cross-check.

李澤昌先生：有時呢，因為其實佢係好依靠嗰個 GPS 話番你嗰個定位嘅，有陣時啲路段呢，其實就算你嗰個 map 嗰個 speed limit 係準呀，但係實際上嗰個車嗰個彈上去嗰個未必係準嘅，因為你靠 GPS，嗰個位置會未必係準，嗰度要做少少調較㗎。

梁健宏先生：其中一個要考慮嘅就係嗰個 GPS 訊號係咪穩定，同埋係咪準確，呢樣嘢都要去 validate 嘅，Chairman。

李澤昌先生：即係譬如你喺屯門公路，我哋係個巴士車速係可以去到 70，其實當佢行緊屯門公路嘅時候，因為你靠 GPS 定嘅位呢，有陣時呢，佢會係度咗你行咗青山公路，咁嗰度就會 50㗎嘞。所以我哋要係即係有一段時間，因為有好多呢

啲路，佢唔同嘅車速，但係佢好近㗎，咁所以喺嗰度要做啲工夫。

主席：（經傳譯員）呢一個問題就係，係咪一條路係一條天橋，或者另外一條就唔係？

李澤昌先生：（經傳譯員）佢哋平行嗰陣時都有問題，平行嘅兩條路都會有問題。

主席：（經傳譯員）我而家呢就再睇番呢度嘅步驟嘞，咁你就會進行內部測試喇，咩意思呢？

梁健宏先生：可能就係一個自己同事嘅 test drive，或者一個特別嘅路線嘅測驗呀，呢啲係要去試下實際嗰個運作係咪達到預期嘅效果。

李澤昌先生：因為今日呢佢 70，佢響嗰盞燈嘅時候呢，係真係喺架車，佢本身嗰個 speedometer 嗰度呢，cut 咗個 70，佢響燈嘅，未來呢佢個 70 同埋佢個 50 alert 呢，係靠呢一個系統 alert，係完全兩樣唔同嘅事嚟，所以喺個車長嘅角度，佢今日 70 響燈呢，係因為佢係一個車速裏面呢，就提醒佢一過 70 響燈，未來 70 同 50 呢，都會靠呢一個系統呢，係同佢個實際上嗰個路面嗰個 limit 去響燈，咁即係同事呢，即係車長呢，佢可能要適應呢一樣嘢，所以要一段時間，等佢知道嗰個改變咗嗰個系統嗰個背後嘅誘因囉。

主席：（經傳譯員）呢一度仲有另外，就係話同前線人員諮詢喇，咁我哋都顧名思義嘞，咁然後就係 1 月，就係全個車隊要實施㗎，即係 2019 年 1 月。

李澤昌先生：（經傳譯員）係。

主席：（經傳譯員）咁關於時間嗰度呢，我哋去睇下最屘嗰一行，你又重複嘞，就係之前所講嘅嘢，就係話進行內部測試，諮詢前線人員，點解要重複呢？

李澤昌先生：（經傳譯員）呢個同呢個唔同嘅。呢個係 phase 2，係兩樣嘢嚟嘅，主席，phase 2 嗰個呢就係，頭嗰個就係佢嘅車喺嗰個 dashboard 裏面呢，有兩個 real-time 嘅，有個 real-time 嘅指示，就話畀個車長聽，你係超過 50 嘞，嗰個 speed limit，你要提醒佢，或者超過 70，你提醒佢。

下邊嗰個就唔同嘅，下邊嗰個呢，就係第二階段嚟㗎嘞，就係話當你嗰個車長係超過某一個 speed limit，或者某一個更加高嘅速度嘅時候，就由 geo-fencing 呢個 system，係 takeover 嗰個車長嗰個行為，就即係話畀你聽叫佢收油，咁呢一個呢，我哋係先做呢，呢個第一階段我哋寫漏咗係 70 公里嗰個啫，50 嗰個未做住嘅。咁如果即係話換言之呢，即係話當第二階段呢，就話如果個車長超過 70，有陣時落斜呀，等等嘅情況呢，咁個車就會係用 geo-fencing 呢個系統呢，就幫架車去收油嘞，就唔會再依賴提醒車長咁簡單，呢個係第二階段嚟。

主席：（經傳譯員）咁第一階段係咪即係話 2019 年 1 月就完成呀？

李澤昌先生： We hope.

主席：（經傳譯員）係，大律師。

MR DUNCAN：（經傳譯員）多謝主席。請大家睇運輸署文件 1 號文件冊，406 頁。就係講到下一個要測試嘅裝置㗎，就係話呢，碰撞嘅警示同埋維持行車線嘅裝置㗎。就係話呢一個係附加裝置嚟，就係會令到巴士車長呢係得到警示，就有可能會撞車嘞，咁呢個維持行車線嘅裝置呢，都係一個附加裝置喇，就係當巴士離開佢係應該轉向嗰條線嘅時候呢，就會係警示個巴士車長㗎。

咁兩個裝置呢都係市場會有㗎，因此呢喺專營巴士嗰度去試用呢一啲嘅裝置係應該㗎，我哋係會建議㗎。今日較早嘅時候呢，我哋睇番啲意外統計數字嘅時候，追撞同埋係迎頭嘅相撞呢，同埋因為轉線而有嘅意外呢，都係有成百分之廿五㗎。即係佢哋呢係總意外嘅百分之廿五㗎，呢幾種嘅相撞。

主席：（經傳譯員）鄧律師，你可唔可以話畀我聽呢啲嘅數字喺邊度呀？

MR DUNCAN：（經傳譯員）係第 183 頁㗎，係 TD-1，183 頁。公司有冇考慮過係去應用呢一啲咁樣嘅裝置呢？大埔嗰個意外之前，有冇考慮過應用呢啲裝置？

李澤昌先生：有。

MR DUNCAN：（經傳譯員）你可唔可以形容一下你哋考慮過啲咩？咁考慮過之後嘅結果係點？

主席：（經傳譯員）你未答呢個問題之前呢，我睇緊第 183 頁，因為轉線而造成嘅碰撞呢係百分之十一，係咪呢？抑或你係包括咗其他嘅意外呢？

MR DUNCAN：（經傳譯員）唔好意思，主席，我應該係講嗰啲分項㗎，我呢係將迎頭相撞、追撞同埋係轉線相撞呢，加埋係百分之廿五。

主席：（經傳譯員）好，唔該。唔好意思，請你再問嗰個問題喇。

MR DUNCAN：（經傳譯員）係嘅。公司有冇考慮過使用呢一啲嘅裝置呢？即係喺 2 月個意外之前。

李澤昌先生：其實喺 2017 年呢，就我哋個工程部，我本人同埋我哋嗰個車務總監梁生，咁就喺公司裏面呢，我哋都有一班即係年青嘅工程師，一齊諗一啲即係新嘅方法，係可以係幫到你頭先講嗰兩樣嘢，亦都正正係咁樣，我哋喺正話我之前講過喇，喺上年嘅春天呢--秋天呢，我哋就去咗呢個北愛爾蘭，就搵咗呢間大學，Queen's University 喺 Belfast，咁呀正正就係研究緊呢兩個工作。

咁呀其實我哋自己 KMB in-house 都有個即係自己嘅一班工程師呢，都會一齊同--我哋 send 咗啲工程師，去咗呢個北愛呢，都係做緊呢一樣嘢，咁亦都北愛嗰啲，北愛爾蘭 Queen's University 亦都 send 啲 professor 過嚟香港一齊睇下我哋啲車係點樣。咁呢兩樣係兩個主要大嘅工程，一個就係你頭先講嗰個，即係 collision alert 嗰樣嘢，就話前車同我哋架巴士嗰個距離，咁呀呢個我哋察覺到呢，特別係嗰啲即係長途車呢，係嗰個意外呢，嗰個

direct嘅collision呢，係可以好fatal㗎。

咁我哋係，即係我哋自己都做緊一啲嘢，係可唔可以將嗰架車，同前車距離嘅時間係去到某一個距離，而你嘅車速亦都度咗你嘅braking distance呢係遠遠低過嘅時候呢，就應該要alert嗰個車長，咁呢個我哋自己裏面呢都不停做緊呢個工作，咁但係呢又有一間，而家我哋又搵到一間學校呢，喺Belfast呢，將呢樣嘢係一齊共同去發展。咁如果你睇下呢個VTech呢份文件裏面呢，亦都有介紹到呢，當佢轉線嘅時候呢，當個車長轉行車線嘅時候，而佢冇做到佢基本嗰啲嘅動作呢，個steering點點嘅話呢，亦都有啲提示，咁呢個而家我哋係研究緊嘅，不過係今日只係講畀你聽，係喺嗰個，即係我哋嗰個研究之間，係冇一啲即係實際上一啲即係初步嘅結論呀，或者結果出嚟。

梁健宏先生：補充一點喇，市面上喺可以搵到嘅third party嘅product呢，我哋都會密切留意嘅，咁就正如稍後都會講到嗰啲driver monitoring device，咁呢啲device有時都即係係咪真係啱使呢，有時都我哋都希望係嘅，我哋都希望係。

MR DUNCAN：（經傳譯員）根據運輸署，就講到工作小組嗰個商議嘅時候，喺406頁呢，其實市場已經有呢啲裝置㗎，你睇唔睇到呀？

李澤昌先生：(c)嗰點係喇，drowsiness嗰啲，yes。

梁健宏先生：（經傳譯員）睇到。

MR DUNCAN：（經傳譯員）唔係呀，(b)。

梁健宏先生：我知道有啲巴士公司都試緊嘅，咁我哋都會密切留意，咁我哋亦都會去再去睇睇，再試嘅，我哋會嘅。咁其實講番呢個lane-keeping devices嗰個alert呢，我記得亦都我哋嗰個神眼（原文照錄）我哋亦都試過嘅，好多年前，咁就呢啲產品，咁就當然以前試過係效果不如理想，但係而家嘅科技我哋會繼續留意，我哋會繼續再試。

MR DUNCAN：（經傳譯員）我想問點解你要進行呢一個研究計劃呢？仲要同一間海外嘅大學去做，因為市場已經有呢一啲嘅裝置。

梁健宏先生：Mr Duncan，即係有時有啲product available呢，有時都試咗之後係唔係合用呢，都要真係要試過嘅。

李澤昌先生：因為呢度呢，其實即係要講多啲咁多多，其實每一件product呢，佢係喺佢當地嘅地方呢，可能呢係好適用，但係因為九巴佢涉及嗰個唔同嘅路呀，長途嘅路有喇，市區嘅路有喇，人多擠迫嘅路亦都有喇，即係好複雜㗎，所以即係冇一個好零零舍舍嘅一個即係third party嘅產品呀，可以係真係即係apply咗喺我哋身上，因為正正我哋就係講緊咁多人數呀，喺啲咁擠迫嘅路呀，或者一啲長途嘅路呢，係好難係搵一個呢，只能夠去試，但係當然試嘅同時呢，我哋都要自己呢，要搵一個自己嘅出路囉。

主席：（經傳譯員）大律師，我哋差唔多去到尾嘞，咁今日都係好長嘅，用咗好多時間嘞，咁我就唔打算呢要大家再留多啲時間。各位先生，今日好明顯呢你哋要再提供好多資料畀我哋嘅，我哋會睇個謄本喇，我相信你亦都會喇，你會睇睇究竟嗰度點樣講喇，你要提供啲咩嘢資料畀我哋喇，希望提供嘅資料我哋覺得會好有用。

我想請你可唔可以兩個禮拜，即係今日開始計，兩個禮拜內請你提供資料，因為我哋都需要另一個係口頭取供嘅環節嘅，咁如果我哋可以攞到，即係及時攞到個文件喇，編咗個號碼，咁呀會有幫助嘅，我都會請大律師都係喇，同樣係咁樣。好嘞，我就想請你兩個禮拜提供你哋要提供嘅文件，跟住我會再定一個日期做一個研訊嘅。

好，多謝大家出席，我知道今日都時間好長，咁亦都係大家都幫咗委員會好多，而家我哋暫時休會，到我哋定咗日期呢，我哋會復會嘅，唔該晒。

2018年8月11日

下午5時32分聆訊押後

Wednesday, 12 September 2018

(10.00 am)

EVIDENCE FROM KOWLOON MOTOR BUS CO (1933) LTD AND LONG WIN BUS CO LTD: DR NORMAN LEUNG, DR JOHN CHAN, MR ROGER LEE, MR GODWIN SO, MR LEUNG KIN WANG, MR PATRICK PANG, MR JAMES WONG

(simultaneous interpretation was used where indicated)

Examination by MR PETER DUNCAN (continued)

CHAIRMAN: Good morning, Dr Leung, gentlemen.

DR NORMAN LEUNG: Good morning, Mr Chairman.

CHAIRMAN: Mr Duncan.

MR PETER DUNCAN: Thank you, Mr Chairman.

Good morning, Dr Leung and gentlemen. Could I first acknowledge receipt of a considerable amount of material from the company since the last day of the hearing. Thank you for providing the committee with that information.

At the end of Day 14, I was asking you questions about the possible engagement of collision-alert and lane-keeping devices, and through Mr Leung we were informed that the company was undertaking research with Queen's University in Belfast, that had commenced last autumn, which is now about a year ago. Also, we were informed that in the market, you will be watching out for whatever third-party products might be available.

The committee has been made aware that there are devices of that nature available under the trade name of Mobileye, and I would like to ask the company whether you are aware of those sorts of devices.

MR LEUNG KIN WANG: (Via interpreter) Yes, we were.

MR PETER DUNCAN: Have you considered the engagement of those devices?

MR LEUNG KIN WANG: (Via interpreter) Yes, we will.

MR PETER DUNCAN: Have you not done so as yet?

MR LEUNG KIN WANG: (Via interpreter) In year 2014, we did try it out with Mobileye. In 2014, we had a similar trial scheme with Mobileye, but then the result wasn't that satisfactory, but of course technology does progress and in fact we have started to liaise with them again.

MR ROGER LEE: (Via interpreter) If I may add to that. As of today, we have already got something from Australia, and in fact we have something similar to Mobileye device, so that when a bus captain is driving, if he is to sort of doze off, then we will alert him. So we are carrying out a trial, and in fact at the same time we have also got help from Japan. For the past two years, we are looking for something similar, so that when the signs of fatigue are detected from the driver, then we can try to do something to help them.

It is difficult because in Hong Kong, for long-haul trips and short-haul trips, especially during peak hours, the bus captain will have to move his head very frequently, so it will be difficult to be precise. He has to liaise with passengers and he has to watch out for the road conditions.

So, to tackle the problem of fatigue, it will be difficult to get a third-party product. Currently, for Queen's University from Belfast, we are now tackling a number of points. First of all, a driver, for no particular reason, tries to change lanes, we would like to alert him. We would also like to alert him if he is keeping too close to the preceding vehicle. So we are carrying out technological research.

For the Japanese product, later in the year, we will have the chance to try it again. The Australian product is being tried. Then, for Mobileye, we did try it but for the time being it is not suitable for us.

CHAIRMAN: You are conflating a number of different devices there, are you not? Mobileye 6, for example, has a forward-looking anti-collision device. It picks up the speed limits, because it reads speed limits. But you are talking about an anti-dozing device as well.

MR ROGER LEE: (Via interpreter) Yes, basically, they are two different products. For Mobileye or the two

products being experimented by us, we are trying to check the facial expression of the bus captain or his visual -- his eyes, so as to alert him, so as to wake him up. Then there is a sensor on board. Then it measures the distance between the bus and the preceding vehicle, and it is aware of the speed of the vehicle.

We have the braking distance, that is, at a particular speed, you need to have a reasonable distance from the preceding vehicle to brake in time. So, if we know that it is very close to the preceding vehicle, and if the speed is such that it is not rational, then it is about something else, so it is entirely a different product.

We are having a trial of both kinds of products.

MR PETER DUNCAN: Just so that we don't get confused by any sort of conflation, can we just, for the moment, keep to the collision-alert and the lane-keeping device, and then I will ask some questions about the anti-dozing device in a moment.

MR LEUNG KIN WANG: (Via interpreter) Yes.

MR PETER DUNCAN: So, with regard to the collision-alert and lane-keeping devices, I understood you to say a few moments ago that you have re-engaged the possibility of the Mobileye device; is that correct?

MR LEUNG KIN WANG: (Via interpreter) We will make

reference. In particular, I understand that the other operators are also trying this out. So we will try to look at the results of their pilot schemes. On top of our work with Queen's University, we have an open attitude as to the functions, the current functions, of Mobileye, although the previous experience was that it wasn't quite suitable, but I'm sure we can look at it again.

MR PETER DUNCAN: Right. Have you started yet to go back to Mobileye?

MR LEUNG KIN WANG: (Via interpreter) Not yet.

MR PETER DUNCAN: Is it your intention to do so?

MR ROGER LEE: (Via interpreter) For the time being, it is a matter of reading the literature. We haven't yet started any dialogue with Mobileye. This is because there are similar products in the market, and maybe they are better. So we are looking at a few other products and we are also carrying out our own research.

MR PETER DUNCAN: Right. Have you commenced any sort of engagement with any supplier of collision-alert and lane-keeping devices?

MR ROGER LEE: (Via interpreter) Indeed. An Australian company, we are now trying their Australian product. For a Japanese company, we have had direct dialogue with them, and they are developing a particular device. And

on our own, we are also having an anti-collision device. It is different from Mobileye's product and it is being carried out in Northern Ireland.

MR PETER DUNCAN: Thank you. Are you prepared to provide the name of the Australian company?

MR ROGER LEE: (Via interpreter) Yes.

MR PETER DUNCAN: What is it?

MR LEUNG KIN WANG: (Via interpreter) Guardian.

MR PETER DUNCAN: And are you prepared to provide the name of the Japanese company?

MR LEUNG KIN WANG: Denso.

MR PETER DUNCAN: Thank you.

CHAIRMAN: Could you repeat that?

MR LEUNG KIN WANG: (Via interpreter) Denso. It's called Denso.

MR PETER DUNCAN: Thank you. Perhaps you could spell that for the committee.

DR JOHN CHAN: D-E-N-S-O.

MR PETER DUNCAN: Thank you. Going back to the research with Queen's University, this, as you told us on the last occasion, started about a year ago. What is the stage that has been reached with that research?

MR ROGER LEE: (Via interpreter) First of all, the professor, if I recall -- if I recall, the professor from Queen's University came to visit KMB last month and

he looked at the operation on board. We also sent one of our engineers to Northern Ireland. I think he has already started to study the matter together with them. I think soon, in a month or two, the university's researcher will also come to Hong Kong to base themselves here, so as to look at the road conditions. On my part, in the next month or two, I am going to go to Queen's University to have a look of the update.

MR PETER DUNCAN: When do you expect the research will be completed?

MR ROGER LEE: (Via interpreter) I think we only have a tentative timetable. Summer of next year. But of course it depends on the progress.

MR PETER DUNCAN: At this stage of the research, are you able to provide the committee with any indication as to what outcome you would expect?

MR ROGER LEE: (Via interpreter) I need to go back to check the progress. Of course the outcome can be shared with the committee.

MR PETER DUNCAN: Yes. My question really is: is the research at the moment such that you are hopeful or expecting of a particular outcome?

MR ROGER LEE: (Via interpreter) Well, I think, in our documents, we have already told you about the nature of the product ADAS. I think it's in the paper, in the

documents.

MR PETER DUNCAN: Are you optimistic that this research will result in an effective collision-alert and lane-keeping device? Are you optimistic or are you not optimistic?

MR ROGER LEE: (Via interpreter) Well, the most that I can say is as follows. For Queen's University, I think for their mechanical faculty, I think it is such that few other universities are interested in carrying out double-decker buses related research, so it is quite unique. Then, in the UK, they are in the UK, so it would be good for them to look at it from an European perspective.

I think we can claim ourselves to be a very large bus company. Of course, I have high expectations of them.

MR PETER DUNCAN: Let us move then from the collision-alert and lane-keeping device, and move to the anti-dozing device, if I might call it that, or the driver monitoring device, in respect of which you have already made certain remarks this morning.

In this respect, can I first take you back to one of the files, KMB-1, and ask you to go to page 115.

Now, at page 115, you will find the penultimate page of the report that the company provided to the transport authorities following the Tai Po accident.

CHAIRMAN: The investigation report?

MR PETER DUNCAN: The investigation report, that's indeed it, Mr Chairman.

At page 115, paragraph 47, you will see the heading, "Drowsiness of bus captain":

"KMB is conducting a trial with a supplier on monitoring drowsiness of bus captains while they are driving. The trial test will detect the level of alertness of a driver to give an early warning of the driver experiencing a 'microsleep'. If the trial results are satisfactory, such system will be installed in KMB buses."

If I could also just ask you to leave that open but also have in front of you one of the recommendations of the working group. We will find that at TD-1, page 406.

If I can just read into the record this recommendation of the working group:

"Driver monitoring device -- such device monitors the bus captain's behaviour on-board and alerts him/her if it detects a lack of attention or drowsiness. When the system detects potential unsafe behaviours such as 'looking aside', 'dozing', 'drowsiness' or 'bad posture', the system will give visual warning and voice alert. Such device is available in the market, and trial of using it in franchised buses to assess its

applicability and effectiveness is recommended."

Now, could I ask this: with regard to paragraph 47 of the investigation report, who was the supplier with whom this trial was being conducted? Are you able to reveal that?

MR LEUNG KIN WANG: (Via interpreter) The company name is Seeing Machines, and the name of the product is Guardian.

MR PETER DUNCAN: Can you inform the committee with regard to the progress of that trial?

MR PATRICK PANG: (Via interpreter) Mr Duncan, if I may talk about the process of the trial. Towards the end of June this year, the system of Guardian was installed on four buses from different depots. This is because we have got long-haul trips for different depots, two for Sha Tin Depot, one for Tuen Mun Depot, and also one from Long Win Bus.

The initial trial results are such that it is effective, and we are able to detect, say for example, if the bus driver closes his eye longer than winking, and there is a voice alert, then the back of the seat will vibrate. I myself also tested it on two buses, one from Tuen Mun Depot, the other from Sha Tin Depot. Initially speaking, we believe that it is effective.

However, this system is such that it will scan your

five sensory organs. I know it and I have been told by the depots that since it is an Australian product, and the Australian company also shared our opinion, that is sometimes, say for example, if the bus captain tilts his head to look at passengers, then the facial detection may be lost, and then it will lead to the vibration.

We understand this point, but all in all, my understanding and the feedback of the employees are both positive. So, for this trial, we are going to extend it so as to engage more bus captains to carry on with the trial.

Thank you, Mr Duncan.

MR PETER DUNCAN: When do you expect the trial will be completed?

MR PATRICK PANG: (Via interpreter) In mid-August -- well, at the end of June, we trial tested with the first batch of bus captains and then we tested with the second batch of captains. We already prepared a questionnaire to gauge the reactions of captains, and by the end of this month we will decide whether we will conduct more tests at different depots, and then we will look to implement it by phases.

MR PETER DUNCAN: Do I infer from what you have said that the likelihood is that this device will be implemented?

MR PATRICK PANG: (Via interpreter) According to results of

the tests so far, we find it positive.

MR ROGER LEE: (Via interpreter) I would like to add something. Any device that can facilitate road safety is something we will try. We will move with the times and we would certainly make a start on this.

CHAIRMAN: This device, Guardian device, is one that is used in Singapore, is it not?

MR PATRICK PANG: (Via interpreter) Chairman, I know that it's in use in Australia, but as far as I know, it is not deployed in Singapore.

MR ROGER LEE: (Via interpreter) Singapore has not properly started using it.

CHAIRMAN: Well, we can look at that, because it is certainly my memory that Singapore has been using it for some years.

But also, this was the device that was recommended after the investigation into the Croydon or Sandilands tram accident, was it not? It was recommended to be installed and was installed after the investigation was concluded? Transport for London.

Well, we have the report. We can make that available to you.

MR ROGER LEE: (Via interpreter) Two or three years ago, we were actively looking into this issue. For trains and big coaches the device was already deployed. For train

drivers, the captains, and also truck drivers, they might doze off and in many cities the device is in common use already. So, for metro or city buses, for long-haul routes, for example airport routes, I feel that this device has a key role to play and there are benefits.

For busy areas or roads, since some captains would have to tilt their heads quite a lot to look at pedestrians and traffic lights, so we must be very careful not to cause nuisance to the captains. That's why, for the research in Northern Ireland and the work done by Denso in Japan, I think the Guardian system can be deployed in some routes. And, as we said, we should have different strategies or treatments for different routes.

MR PETER DUNCAN: Why would the different routes have an impact on this?

MR ROGER LEE: (Via interpreter) In busy urban roads, since the bus captains would likely move or tilt their heads quite a lot to assess the road conditions or traffic lights and there are a lot of bends, this would be very different from road sections that are straight. For example, for an airport route, the bus would often use the highway, and the bus captains are unlikely to tilt their heads quite as much. So the situation is

different from cities that deploy big trucks or buses.

MR PETER DUNCAN: I am going to move now from these anti-dozing devices to the question of seat belts.

Could I introduce this by referring you again to the investigation report -- sorry, first of all, to the recommendations of the working group. We will get this again at bundle TD-1, this time at page 407.

CHAIRMAN: These are the recommendations that were expressed in the paper made available to LegCo for discussion on 25 July of this year; is that correct?

MR PETER DUNCAN: That's correct, Mr Chairman. We see that reference on page 403.

CHAIRMAN: Thank you.

MR PETER DUNCAN: The section on seat belts starts at the bottom of page 407, and it runs through to page 410.

If I could just bring your attention, please, to paragraph 16, which contains the recommendation and the proposed way forward. If I could quote from paragraph 16:

"Having regard to the points mentioned in paragraphs 10 to 15 above, the working group has arrived at the following recommendations with a view to giving extra protection to seated passengers:

(a) seat belts should be provided for all seats in future procurement of new bus; and

(b) subject to further assessment on the technical, operational and financial feasibility, consideration may be given to retrofitting all seats in the upper deck with seat belts on buses deployed for specific bus routes, ie long-haul routes which are operated via expressways with relatively fewer bus stops."

So we see there those recommendations, and could I also ask you in this context to look again at the investigation report which was referred to earlier this morning, this time at page 114. If I quote from paragraph 40, under the heading, "Other measures to enhance bus safety", the report states as follows:

"KMB has already requested its suppliers to install safety belts on all [buses] as a standard feature for new buses ordered after 5 March 2018. As for buses that are currently in service, where certain routes so require, safety belts will be installed on the upper deck of KMB buses phase by phase."

So, if I understand things correctly, what has been said in the investigation report is consistent with the recommendations of the working group.

Now, has the retrofitting of these seat belts yet commenced?

MR ROGER LEE: (Via interpreter) To install safety belts on the upper deck, technically speaking, we would have to

consider the issue of gravity. The government and ourselves -- well, the government has consulted us for certain information and our supplier conducting a technical assessment, and the progress has been positive so far. The safety belts are relatively heavy. If they are to be installed on the upper deck, the government would have to conduct tilt tests. If this is technically feasible, it won't be an issue to install them. Whereas for the two main suppliers, Volvo and ADL, the progress has been very positive, however we would still have to wait until the tilt tests are completed.

MR PETER DUNCAN: Can you give the committee some idea as to the financial implications of the retrofitting of the seat belts?

MR ROGER LEE: (Via interpreter) This is not cheap, or should I say, in the beginning of this year, a special committee of our company issued clear instructions. Our buses procured in 2019 and after would be fitted with safety belts. As for the retrofitting of safety belts, where possible, especially on long-haul routes, we would install safety belts on the upper deck. We do not want to see further accidents, so cost is not our main consideration. We have not considered the financial implications yet. Retrofitting of safety belts would

cost about $200,000 per bus.

CHAIRMAN: That is on the upper deck?

MR ROGER LEE: (Nodded head).

MR LEUNG KIN WANG: (Nodded head).

MR PETER DUNCAN: Thank you. Approximately how many buses do you expect would be retrofitted, how many buses in your fleet?

MR LEUNG KIN WANG: (Via interpreter) I think nearly 3,600 long-haul buses.

MR PETER DUNCAN: I'm trying to do the maths.

MR ROGER LEE: (Via interpreter) I would like to add something. Currently, we have 4,200 to 4,300 buses. That is for KMB and Long Win Bus combined. Some buses are fully equipped with safety belts. For some others, as they will retire in the next years -- for buses that will retire in two or three years, they might not need to be retrofitted. For long-haul buses, I do not have the exact figure, but about one-third of our buses would go on long-haul routes, so that comes to about 1,000.

MR PETER DUNCAN: Do I understand that the new buses will have seat belts --

CHAIRMAN: Before you move on, Mr Duncan -- earlier, Mr Lee, you said this involved retrofitting 3,600 long-haul buses. Are you now correcting that statement and in fact it involves 1,000?

DR NORMAN LEUNG: Yes.

MR ROGER LEE: Yes.

CHAIRMAN: Thank you.

Yes, Mr Duncan.

MR PETER DUNCAN: I'm just trying to do the mathematics.

1,000 buses at $200,000 per bus?

DR JOHN CHAN: Yes.

MR PETER DUNCAN: $200 million?

DR NORMAN LEUNG: Yes.

MR PETER DUNCAN: Is the cost of that something that has been discussed with the government?

MR ROGER LEE: No.

CHAIRMAN: Sorry, Dr Leung --

DR NORMAN LEUNG: May I just add. Recently I had a meeting with the government official and in fact I talked to him and requested the government whether they can offer any assistance to us in retrofitting these safety belts, and the response was quite positive, if I may put it this way.

CHAIRMAN: Can you identify with whom you had these conversations?

DR NORMAN LEUNG: Yes, Mr Chairman. Mr Joseph Lai, permanent secretary for transport, and his deputy, Mr Kevin Choi, deputy secretary for transport.

CHAIRMAN: Thank you.

DR NORMAN LEUNG: Thank you, Mr Chairman.

MR PETER DUNCAN: Has the company ever in the past approached the government with regard to some assistance, let's call it a subsidy, with regard to the need to, I'd like to say, modernise its fleet?

DR NORMAN LEUNG: Never. Specifically this was the first time I talked to him about subsidy for retrofitting the seat belts.

MR PETER DUNCAN: Now, do I understand correctly that the new buses will have seat belts upstairs and downstairs?

MR ROGER LEE: Correct.

MR PETER DUNCAN: Has the company given any consideration as to whether -- or does the company have any view as to whether the public will actually utilise the seat belts?

MR ROGER LEE: (Via interpreter) We conducted a rough assessment on how the public would see safety belts. For short-haul routes safety belts are unlikely to be used, especially on the lower deck. For long-haul routes, safety belts would be more popular.

But they are not hugely popular with passengers because it is somewhat a hassle to put them on. But, in our view, especially for long-haul routes, the trend is that safety belts would be more and more important. For passengers that want to have a nap on the bus, they can choose to put on safety belts. I hope more and more

passengers would use them in the future. At the moment, they are not very popular. But KMB should follow the trend. At the end of the day this is a safety device.

MR PETER DUNCAN: Does the company have a view as to whether there should be any legislative backup for the use of seat belts, in other words to make it compulsory that persons utilise seat belts where they are provided?

MR ROGER LEE: (Via interpreter) This is somewhat difficult because passengers can stand on buses in Hong Kong. So, by way of legislation, this is a challenge. And the second challenge is enforcement. Bus captains are often harassed these days. KMB has not set up any rules to enforce this, but we find it positive to allow passengers the choice of putting on safety belts.

MR PETER DUNCAN: Thank you. I'm going to leave the subject of safety belts now.

Can I move to something else, which I will introduce by asking you to turn up KMB-4.

Can I ask you to turn, please, to page 1182 of the bundle, which is an extract from the annual report of the listed company, that's Transport International Holdings Ltd, for 2012. On that page, you will see the members of the board of directors, and in particular you will see the names of the independent non-executive directors.

We can see those listed as Dr Leung and Dr Chan, present this morning; Dr Eric Li Ka Cheung, Mr Gordon Siu Kwing Chue, and Prof Liu Pak Wai. We see the list of the independents.

If I could then ask you to go to KMB-5, at page 1896. This is the list of the company directors, as set out in the annual report for the year 2016. We can see by reference to the asterisk the independents, the independent non-executive directors. Again, the name list: Dr Leung, Dr Chan, Dr Eric Li, Mr Siu and Prof Liu.

I won't take you through each of the reports between 2012 and 2016, but you will, I think, confirm that there were no changes in the independents during the course of those years; is that correct?

DR NORMAN LEUNG: Correct, Mr Duncan.

MR PETER DUNCAN: Thank you.

Then if I could take you, please, to KMB-6 at page 2108. This is a list of directors for the year 2017. We can see, at that page, 2108, that the directors have changed, in that Mr Gordon Siu is no longer an independent director.

DR NORMAN LEUNG: Correct, Mr Duncan.

MR PETER DUNCAN: And Mr Tsang Wai Hung has been appointed as an independent non-executive director.

DR NORMAN LEUNG: Correct, Mr Duncan.

MR PETER DUNCAN: Now, I'm going to ask a couple of questions about the independent non-executive directors, and please understand I am asking these questions with the utmost respect to those who have served and continue to serve as independent non-executive directors.

Firstly, is it a correct observation that none of the independent non-executive directors have a background of safety matters?

DR NORMAN LEUNG: Well, specifically safety matters -- well, you can say that we know -- personally, I have been involved with bus operation for a number of years. In fact, I have been a director of KMB since year 2000, so for 17 years. And of course we care about the new buses, you know, for example, we have to upgrade our buses with the latest model, with the latest, you know, technology. And very often the new buses incorporate what we call the safety features. So we spend money in upgrading our buses, say from Euro IV and then to Euro V and now to Euro VI. All this is buses with the latest technology.

In that aspect, we ensure that the best available buses are purchased by KMB and Long Win, in that aspect.

MR PETER DUNCAN: I think we are all aware of the fact that new people bring new ideas to organisations.

DR NORMAN LEUNG: Yes. Yes.

MR PETER DUNCAN: Does the company have any policy with regard to how often the benefit of new ideas and therefore new people as independent non-executive directors might be appointed? Is there any particular policy in that respect?

DR NORMAN LEUNG: We have a number of board committees, and different directors serve on different committees, with regard to their expertise, so to speak. That's why you will see that Mr John Chan, for example, was formerly the managing director of Kowloon Motor Bus and Long Win Bus, and that's why he has been requested to serve on the standing committee of the board, which is really the executive committee of the board, and he also serves on the nomination committee, and the remuneration committee as well; whereas Prof Liu Pak Wai, for example, is a very distinguished economist, he serves on the board to offer strategic development of our bus company, just to name them as an example, Mr Duncan.

MR PETER DUNCAN: Thank you, Dr Leung.

I want to now go back to a matter which was raised at one of the previous hearings. I think it was actually Day 13. This was the subject of real-time monitoring. You recall this issue that arose on Day 13, in particular when I raised with you, with the

representatives from KMB, the evidence that the committee had heard from a Mr Alok Jain; do you remember that issue coming up?

You will recall that Mr Jain's evidence -- I will give everybody the reference just for the record; it's Day 13 at page 41 -- but his evidence was to the effect that in 2014 -- sorry, Day 13, page 41 is a summary of his evidence, but as I put it to you, his evidence was that in 2014, the company had considered a project which had involved the real-time monitoring of driver behaviour, but this project had been scrapped.

Do you remember that was the nature of the evidence that I raised? Do you recall that? Do you recall my raising that?

MR LEUNG KIN WANG: (Via interpreter) Yes.

MR PETER DUNCAN: Thank you. And your response -- and this was by Mr Leung -- if I understand it correctly, was that the project to which Mr Jain had been referring was a real-time operations management system, and that had nothing to do with driving safety. Do you recall that was what Mr Leung told us?

MR LEUNG KIN WANG: (Via interpreter) We were talking about giving a real-time alert to the bus captain, over-speeding or sudden acceleration or harsh braking.

MR PETER DUNCAN: Yes, and your recollection was that what

Mr Jain's project, if I could put it that way, entailed was not that; it was, rather, a real-time operations management system. Correct?

MR LEUNG KIN WANG: (Via interpreter) Correct.

MR PETER DUNCAN: Again, just for the record, I will give members the appropriate references in the transcript. It's Day 13, page 41, lines 10 to 14, and then page 42 at line 23.

In the light of that apparent difference, the chairman invited you to provide to the committee some of the presentations which had been made during the course of consideration of the project to which Mr Jain had been referring. Amongst the material that the bus company has provided since the last hearing have been a number of presentations. Do you recall that those presentations have been provided?

MR LEUNG KIN WANG: (Via interpreter) We have provided some information to the committee, I believe.

MR PETER DUNCAN: Thank you. I just want to refer to some of those presentations and raise some matters with you in this context, if I may.

First of all, could you turn up KMB-11, please. Could you go to page 4492, please.

Page 4492, you will see the cover of a particular document, "The Kowloon Motor Bus Company (1933) Ltd,

system specifications for real-time operations management system (ROM)", and this is a document which runs from page 4492, and it goes through to page 4530, if I understand it correctly.

Now, at page 4493, we will see the table of contents in this presentation. Part II is referred to as the introduction and the scope of work.

If we then go to page 4495, we will see some of the details with regard to the introduction and the scope of work, and you have, under part II, item 1, "Introduction" -- if I could bring your attention, please, to item 1.4:

"The main functions of ROM are to assist dispatchers from operations control centres and terminus supervisors from bus termini to:

Manage bus departures and bus trips.

Handle special situations that cause disruptions to bus services."

Then this is the one which I would bring your particular attention to, 1.4.3:

"Communicate with drivers, via voice, text and sound recordings for any information or special messages that needs driver's attention and action."

So do I conclude from that that the system did envisage real-time contact between the system at the bus

headquarters and the individual drivers?

MR LEUNG KIN WANG: (Via interpreter) The one that we developed subsequent to this did not have this feature.

MR PETER DUNCAN: Mr Jain's evidence I think was that this was one of the aspects that was being considered, but it was scrapped. So was real-time communication with the drivers at least part of the consideration?

MR ROGER LEE: (Via interpreter) Last time, our operations director said it clearly. This function would involve a central control centre, to remind bus captains over the speed of the bus, and also the need to pause at some bus stops so as to have a proper distance between buses.

Of course, in this course of action, there could be communication with bus captains. But, as we said last time, it would not be proper to distract the bus captain while he is driving. Also, this function may take the place of the function discharged by the dispatchers or the management people at the bus termini.

So we did not think there would be the need to have real-time verbal communication with bus captains while they are on duty and it would be better to enhance the functions discharged by the personnel, management personnel, at the bus termini.

MR PETER DUNCAN: Yes. I'm not asking at the moment questions with regard to the conclusion. All I'm asking

is whether, in the project that was being considered by Mr Jain, which I understand to be part of this presentation, there was, as part of that programme, consideration as to whether there should be real-time communication with drivers with regard to their behaviour, including of course speed excesses.

So do I understand correctly from paragraph 1.4.3 that this was at least part of the project which was being considered? Leave aside the conclusions.

MR ROGER LEE: (Via interpreter) Well, it is put down here. Of course, there was such consideration. It was back in 2013/2014. At that time, the view taken was that something should be done centrally so that the real-time operation management should be more comprehensive, so that, by some means, the central controls should be able to communicate with bus captains.

But we are now actually talking about the black box and geo-fencing, and the alert would be given to bus captains on board the bus and that would cover the behaviour of the bus captain. We are at this stage now.

MR PETER DUNCAN: Yes. Thank you. If I could just, before I leave this particular document, refer you to some other passages which also seem to refer to this real-time communication with drivers. I think you will see at page 4497 -- you see under the heading,

"Functional requirements" a heading, "Operations control centre system", and at 1.1.4:

"Allow dispatcher to draw a certain area on the map so that buses within the boundary of the drawn area are:

a. Highlighted for sending text and voice messages.

b. Used for speed calculation so that the average speed of highlighted area are displayed."

If I could also bring your attention to the next heading at page 4497, "Core system functions", that's item 1.2, and then we have a subheading, "Operations management", and at (a)(7), which you actually find on the following page, 4498, we have this entry:

"Regulation of bus departures are done automatically based on a set of rules with elements of the rules configurable. The configurable items should include but not limited to the followings".

Then item (iv) mentions "driver working guidelines". So that would cover, would it not, the driving behaviour of drivers; yes?

MR ROGER LEE: (Via interpreter) Well, the regulation here refers to the distance between the vehicles from a safety perspective.

Allow me to say the following. On any one day, we have at its peak over 3,000 buses running on the road at

any one time, and they can be found all over Hong Kong, including outlying islands, that is Lantau. If you have a central control system to control all the 3,000 buses, of course, if we want to have precise information about them, it will mean it is quite a difficult task.

But here it is quite clear this is about the safe distance from preceding or following vehicles.

MR PETER DUNCAN: If I could then refer you, please, to --

CHAIRMAN: I'm sorry, could you elaborate what you mean by "the safe distance"? Is this to do with the bunching of buses?

MR ROGER LEE: Yes.

CHAIRMAN: That's nothing to do with safety, is it?

MR ROGER LEE: (Via interpreter) Well, in fact, bus drivers do not know how far he is away from the preceding bus, so he will just be following his speed. For passengers, buses departed at different times, but then roads get congested and, as a result, the preceding bus and the following bus will have a longer and longer headway. It means that passengers would have to wait in such a way that he has got a bunch of buses arriving. This is quite similar to the case of train service, but then trains have to stop at platforms. Many passengers would have to board and alight, and so they would stop there for a longer time, and you can more easily control the

distance between trains. This is not the same for buses.

This is because we don't want to have the bunching together of the buses. That's not desirable. Now, of course, we have got something on mind to inform the passengers about the arrival time, so it's not safety-related.

CHAIRMAN: No, this is the efficient delivery of service, nothing to do with safety.

MR ROGER LEE: Correct. Correct.

CHAIRMAN: Thank you, Mr Duncan.

MR PETER DUNCAN: Thank you, Mr Chairman.

Finally in this document, can I just bring your attention to page 4501, and the heading, "Driver communication system", under the overall heading of "Functional requirements". At 2.1:

"A driver console will be installed on each bus. The driver console will provide the following functions:

2.1.1 Display colour graphics and text data".

Then at item (c):

"Display real-time indicators showing driving behaviour of the driver with information available from the OBD. For abnormal driving behaviour, different beep sounds shall be prompted to the driver. A global parameter shall be provided to activate or deactivate

this function."

So, at least for consideration, was there suggested a real-time system whereby abnormal driving behaviour would be detected and would be communicated to the driver?

MR LEUNG KIN WANG: (Via interpreter) Well, I think this is what we call the on-board driver feedback device. We are in the process of installing such a system. Previously, the design was such that it would be incorporated into the driver console, but today, in fact, we have got a separate feedback device and the real-time indicators are such that we have got lights as well as audio alerts. That's for every bus.

MR PETER DUNCAN: Right. I'm going to move now to another matter which came up at the last hearing -- this is on Day 14 -- when the committee heard from the representatives of the company that contrary to its earlier intention, the company had decided not to incorporate a tilt alarm in the buses.

Do you recall that evidence?

MR ROGER LEE: (Nodded head).

MR PETER DUNCAN: I will again give the committee a reference to the transcript. It's Day 14 at pages 126 to 130.

If I understand Mr Leung's evidence correctly, the

reason for that was that neither ADL nor Volvo could recommend a particular tilt angle. Is that a correct recollection?

MR LEUNG KIN WANG: (Via interpreter) Correct.

MR PETER DUNCAN: And if the angle was too narrow, it would not be meaningful; it would mean nothing. And if, on the other hand, the angle was too broad, it would be dangerous. Is that a correct recollection of what was said?

MR LEUNG KIN WANG: (Via interpreter) Yes.

MR PETER DUNCAN: Thank you.

Now, I want to refer you to something which I was alerted to only yesterday, and I'm not sure whether you had a chance to look at it, but it's a document which we can find at bundle MISC-2 at page 916.

Have you had a chance of looking at this document yet, Mr Leung?

MR LEUNG KIN WANG: (Via interpreter) Not yet.

MR PETER DUNCAN: Thank you. In that case, I will perhaps take you through it very slowly.

It seems to be notes of a lecture or presentation which was given at a seminar very recently -- sorry, a long time ago -- 29 August 2008, and it is headed, "Seminar on safety aspects of double deck buses in Hong Kong", and the subheading is, "Regulatory (Safety)

Requirements of double-deck buses", and the presenter appears to be a gentleman called Mr Steven Tse, an engineer in the bus safety department of the Vehicle Safety and Standards Division of the Transport Department.

This may be too much to ask, but do any of the members from the company here this morning have any recollection of attending such a seminar?

MR LEUNG KIN WANG: (Via interpreter) I don't recall.

MR PETER DUNCAN: Thank you. I go straight to the page in which I am interested. It's page 936. I will simply go to that and then give you the opportunity of reading through the slides which precede it.

At that page, there is this heading, "Tilt angle", and on the left, "Regulatory requirement/directive", and then on the right, "Tilt angle (DD bus)", which I infer is double-decker bus, and the reference to "United Nations -- Economic Commission for Europe, 28 degrees"; "EC -- European Union, 28 degrees"; and "Hong Kong, 28 degrees".

Does this mean anything to you, Mr Leung?

MR LEUNG KIN WANG: (Via interpreter) Well, for each vehicle, in particular for double-decker buses, for them to be allowed to run on the road, they have to meet this test requirement, namely the tilt test. It is a static

test. In other words, the bus is static when it is tested for tilting. If the bus can tilt at an angle 28 and it won't topple, then it means that it can meet the test requirement, it can get the type approval, it can be registered for running on our roads. That's my understanding.

MR PETER DUNCAN: I think the static test has been referred to in previous documentation provided to the committee; is that correct?

MR LEUNG KIN WANG: Correct.

MR PETER DUNCAN: Thank you.

I am going to move now to the subject of journey times and lead up to the issue of what are known as -- what are described sometimes as "lost trips". I think you know what I mean by that.

Can I start by taking you to the evidence of one of the representatives that we heard from one of the unions, I think it was the Staff Rights Association of KMB, Mr Li Kwok Wah. We will find that at the transcript for Day 10, if I could take you to that, please, at page 62.

If I could just read you a passage from Mr Li's evidence. He has been asked questions by Ms Wong for the commission at line 14, and Ms Wong asks this:

"Mr Li, I would like to go to a specific topic on

scheduled trips and loss of time."

And a few lines down:

"And the passage is at page 120."

At line 20:

"... you stated that:

'... with the continued loss of bus captains, and the need [to] maintain the scheduled trips and avoid cancelling scheduled trips, causing bus captains' entitled rest time during work subject to the situation of lost trips and the road traffic circumstances that day. For many bus captains who would need to drive various bus routes, in order to have more time for rest during work, will try to complete the bus routes as soon as possible depending on road traffic condition and return to the bus terminals for rest.'

Can you tell us or elaborate how the need to maintain scheduled trips would affect bus captains' entitled rest time?"

Mr Li's answer is:

"The bus company, say, for example, there is one hour of journey time, it would be compressed to 55 to 58 minutes. Bus captains have little rest time. If you compress journey time even by a few minutes, that means a loss of a few minutes of rest time."

Can I ask you this: if a journey does take longer

than the scheduled time, does that have a potential effect on the driver's rest time?

MR PATRICK PANG: (Via interpreter) Mr Duncan, my answer is it may. It may. However, in each and every terminus, we have got a terminus supervisor on duty. It is exactly because of this the supervisor will make corresponding adjustments, so that the bus captains, though affected by the traffic congestion or owing to other reasons come back late to the terminus, they would still get rest time. So we will make arrangements.

MR PETER DUNCAN: Are there circumstances such that sometimes bus drivers do have to forfeit their rest time?

MR PATRICK PANG: (Via interpreter) Sometimes, this may happen, but I just want to emphasise that for each bus captain, when he returns to the terminus, he will certainly have time. He will have a pre-scheduled rest time. But then if this is being affected owing to one reason or another, we will still give him a water break, a toilet break -- he can have a sip of water, he can go to the toilet -- before he commences the next revenue trip to take on passengers.

MR PETER DUNCAN: How does the company actually calculate the length of time that is necessary for a particular route?

MR PATRICK PANG: (Via interpreter) We do. When we draw up the journey time for each route -- well, there are two types. First of all, we have got existing bus routes. We do have a mechanism, and it is subject to regular reviews. So once every three months we will look at each bus route. We have got 380-plus routes under KMB. So, on a quarterly basis, we have to re-examine each and every route once every three months.

Then, secondly, in the light of special traffic conditions, in the light of sudden changes of passenger volume, and in the light of the increase or decrease of express routes, and in the light of feedback from frontline bus captains, inspectors and supervisors, we also have ad hoc arrangements. We won't wait until the next quarterly review. We will carry out a review of the journey time instantly.

MR PETER DUNCAN: What does the review entail?

MR PATRICK PANG: (Via interpreter) Well, a number of elements would affect the journey time. Say, for example, changes in the traffic conditions. Say, for example, in West Kowloon, in Jordan and Nathan Road, traffic was congested because of the construction of the XRL, and so we have to make adjustments about the journey time.

Then another factor that would prolong the journey

time would be changes in the number of passengers. It will have a direct bearing on the time taken. Say, for example, more passengers boarding, more passengers alighting. In other words, you have to stop at a bus stop for a longer time. Then there may be road diversions or we have to deroute a bus service. Say, for example, the main route is the same but there are slight changes to its side routes, then we have to re-examine the journey time.

MR PETER DUNCAN: I'd like to refer you, please, to the evidence of Mr Kelvin Yeung, who gave assistance to the tribunal on Day 11. He I think is a current depot manager within KMB. We find his evidence on Day 11 at page 94.

In fact if I can take you by introducing the question of him at page 93, line 19, again Ms Wong asking the question. Ms Wong asks this of Mr Kelvin Yeung:

"And moving on to another topic, it is about lost trips.

We have heard evidence from your colleague, Ms Debby Wong, that lost trips appear to be a frequent occurrence, and it affects driving behaviour because of the inaccurate estimation of scheduled journey time. And also it would, in turn, affect the rest time period.

What is your view on this matter?"

Mr Yeung responds as follows:

"From my perspective, lost trip is due to various reasons.

First, we may lose a trip because of shortage of bus captains, there may be traffic jam in Hong Kong, there may be emergency situations, public events, demonstrations, rallies, or special traffic arrangements, inclement weather, and vehicles breaking down on the road. All these contribute to the problem of lost trips. But we try our best not to affect the rest periods of bus captains, because we have a schedule of journey time, we have provided that to the bus captains, and about 96 per cent of these, or 90 per cent of these trips allow bus captains to have sufficient rest periods."

Now, a lost trip, I assume that that means there is a bus which is supposed to leave from A and arrive at B but in fact, perhaps for one or more of these reasons, it just doesn't happen.

Could you give the committee some idea as to how frequent this occurrence occurs?

MR PATRICK PANG: (Via interpreter) The Transport Department assigns a value to all franchised bus operators. In terms of the lost trip rate, in the context of our

schedule of service, the benchmark is no more than 3 per cent of the trips.

MR PETER DUNCAN: I'm going to ask in that respect for you to look at one of the Transport Department documents. Again, we will need to go to TD-1 for this, at page 34.

At page 34, we have a document which was provided by the transport authorities to the committee for the purposes of this hearing. This document is headed, "An overview of the regulatory and monitoring regime of franchised bus[es]". You can see the purpose of the paper, at page 34: "to give an overview of the regulatory and monitoring regime under which the government regulates the operation of franchised bus services in Hong Kong."

Then there are a number of sections. The part I would like to refer to at the moment can be found on page 44, and it's paragraph (e). It's under the heading, at page 41, of "Other measures and requirements through exchange of letters and issuance of guidelines", and there are a number of paragraphs -- (a), (b), (c), (d) -- and we get to (e) on page 44. If I could read that out quickly:

"In 2015, the Transport Department put forward a revised sanction mechanism in respect of the bus lost trips made by the franchised bus operators. The

mechanism sets out the procedures and steps on the issuance of letters of different degrees of gravity (including reminding letter, advisory letter, warning letter and serious warning letter) depending on the frequency, level of lost trips incurred and rectification actions taken by the FB operators. The warning letters will make way for initiating further statutory sanctions under section 22 of the Public Bus Services Ordinance, such as financial penalty, revocation of operating right of a particular bus route or of its franchise in the event that no apparent improvement is made by the bus operator concerned without providing any reasonable explanations. See appendix K on a sample of TD's letter to FB operators on the promulgation of revised sanction mechanism."

Unfortunately, I was unable to find appendix K, but reading on:

"Since the implementation of the above mechanism in 2015, the Transport Department has been closely monitoring the lost trip situation of the franchised bus operators and sent reminding letters, advisory letters and warning letter to franchised bus operators for rectification action and making service improvement. These ... operators provided explanations to the Transport Department and took prompt actions, including

deploying more standby bus drivers to fill up the shortfall, to improve the lost trip situation. Given the actions taken by the franchised bus operators, no further penalty actions were imposed on them."

Just before I ask you a couple of questions on that, could I ask you, please, to go through to page 117 of the same bundle.

CHAIRMAN: Before you do that, Mr Duncan, the missing appendix K, is that not at TD-2, page 291?

MR PETER DUNCAN: Thank you, Mr Chairman. I couldn't find it.

CHAIRMAN: Don't let me divert you. It may not be directly relevant.

MR PETER DUNCAN: I'm happy to go to that volume, if members from the company can see that, at page 291.

Thank you, Mr Chairman.

Appendix K.

I think that is a general letter regarding the subject, with respect to promulgating the revised sanction mechanism. You will see that.

Thank you, Mr Chairman.

What I want to do before just asking you a couple of questions on this topic is to take you through to another of the Transport Department's papers, at page 117, referred to as Transport Department paper 10,

which is headed, "Operation of franchised bus service -- route scheduling, fleet deployment and designation of speed limit", and the purpose:

"This paper gives an account of the role of the Transport Department in route scheduling, fleet deployment and designation of speed limits on roads for operation of franchised bus service."

Then if you go to page 122, you will see what's described as a sample of the schedule of service of a particular bus route. There's an example which is described as the air-conditioned Kowloon urban route no. 2.

Now, going back to the question of these possible sanctions and letters, could you give the committee some idea as to how many warning letters the company may have received, say in the last six months?

MR GODWIN SO: (Via interpreter) Mr Duncan, in the past six months, the company did not receive warning letters due to lost trips, but for particular routes we received advisory letters or reminder letters.

MR PETER DUNCAN: What were the advisory or reminder letters about?

MR GODWIN SO: (Via interpreter) For certain routes, for example during certain hours, for example at night, the letters would remind us that the lost trip rate was over

3 per cent, and the letter reminded us to make improvements and asked why these lost trips occurred.

MR PETER DUNCAN: Has the company received any warning letters in the last 12 months?

MR GODWIN SO: (Via interpreter) We did not receive any warning letters in the last 12 months.

MR PETER DUNCAN: Is it necessary, from time to time, given the circumstances that might give rise to lost trips, to approach the department and ask for amendments to the schedule for a particular route?

MR PATRICK PANG: (Via interpreter) Our company often contacts the Transport Department to report the specific issues we encounter on certain routes. When the TD calculates the lost trip rate, they would calculate it based on four time periods, namely the morning peak hours, morning non-peak hours, the evening peak hours and evening non-peak hours. Based on road and traffic conditions, including congestion and illegal parking, we would often reflect to TD requesting a review of the schedule of service, et cetera.

MR PETER DUNCAN: Does the Transport Department often grant those review applications?

MR PATRICK PANG: (Via interpreter) I can only say that it is very difficult. We have a lot of low utilisation routes. Very often, due to change in passenger volume,

for example due to railway developments, our service demand might drop. Very often, during the non-peak hours -- we have repeatedly made written requests as well as face-to-face requests that the TD would lower the frequency of service for non-peak hours. These applications are made based on certain guidelines, and according to the guidelines, we are entitled to certain journey reductions.

Even if we fulfil the guideline requirements, to be very honest, if we need to increase our service frequency, the TD would often want us to get it done immediately, on the request of district personnel. But if we want to reduce our service, it is very difficult.

Our manpower resources are limited, but at times we would have to invest our resources on low utilisation routes. I don't think this is a healthy development.

Very often, we communicate with TD, but progress is relatively slow.

CHAIRMAN: So, although you have reduced usage, passengers, and you ask for a reduced service to be permitted, you don't get approval? And there are various forces involved in impeding your request?

MR PATRICK PANG: (Via interpreter) Correct.

MR PETER DUNCAN: Just one more question before we break. Who issues these guidelines?

MR PATRICK PANG: (Via interpreter) TD.

MR PETER DUNCAN: Do you have a say in the formation of the guidelines?

MR GODWIN SO: (Via interpreter) The guidelines were in place for a long time. They have proved effective. So this is about the execution of the guidelines and we agree with those guidelines.

MR PETER DUNCAN: Could you supply the committee with a copy of the guidelines?

MR GODWIN SO: (Via interpreter) I think the guidelines are already included in the bundles. I will tell you where they are during the break.

MR PETER DUNCAN: Thank you.

CHAIRMAN: Thank you.

MR PETER DUNCAN: Sorry, one more question. So the problem which seems to have been identified is not in the guidelines, it is in the way in which the guidelines are applied; that would be correct?

MR PATRICK PANG: (Via interpreter) I totally agree. The guidelines are very clear. But in terms of enforcement, I realise there is a lot of resistance, so I hope that resources can be invested on the significant or useful routes.

Thank you.

CHAIRMAN: Gentlemen, we will take a 20-minute break now,

and if you can locate the reference, we would be grateful.

20 minutes. Thank you.

(11.38 am)

(A short adjournment)

(12.00 pm)

CHAIRMAN: Yes, Mr Duncan.

MR PETER DUNCAN: Thank you, Mr Chairman.

I think you were going to find a reference for us to those guidelines.

MR PATRICK PANG: (Via interpreter) We do have it. KMB Long Win Bus bundle 2, page 73, item (IV), "Frequency reduction". Yes, it has been turned up on the screen.

MR PETER DUNCAN: Thank you very much.

Just while we are on the subject of references, Mr Chairman raised the matter of the anti-dozing device being utilised in Singapore. If a reference is needed for that, it can be found at CTB-1 at page 63.

I now wish to move on to the issue of toilet and rest facilities for bus captains. Can I commence this by taking you to the volume TD-1 at page 438, please.

To introduce this particular page, we need to go back to page 427, which is a letter from the Transport Department to the committee of 20 July 2018, where the Transport Department has provided a number of answers to

questions raised by the committee.

At 438, you will see question 28:

"Provision of toilet and rest facilities at bus termini.

Has the Transport Department issued any guidelines to franchised bus operators on provision of toilet and rest facilities at bus termini? If so, please let us have the details. If not, the underlying reasons for not doing so. Does the Transport Department assume an active role in facilitating the respective franchised bus operators to pursue with relevant departments for provision of the facilities?"

I will go through quickly the response of the department to that question:

"The Transport Department has all along encouraged the bus companies, being good employers, to provide suitable toilets and rest facilities at bus termini for their staff. When relevant departments/authorities consider and vet the applications for setting up these staff facilities, the TD has been providing appropriate coordination so as to facilitate early installation of such facilities.

There are no specific guidelines issued to the franchised bus operators on the provision of toilets and rest facilities. It is because toilets and rest

facilities are generally part of the basic facilities to be considered when new bus termini are designed. Requirements and comments from the franchised bus operators on toilets and rest facilities would be incorporated in the design of the bus termini as appropriate. At bus termini where toilets are not within reasonable walking distance, or rest facilities are not provided or insufficient, the franchised bus operators are active in applying for placement of these facilities to meet their latest operational needs. As at 31 March 2018, nearly all of the 295 bus termini over the territory are provided with toilets [within] a walking distance of 3 to 7 minutes, and about 86 per cent of the bus termini (ie 255 bus termini) over the territory are provided with rest facilities in the form of regulator's kiosk/office or rest kiosk for bus captains. It is therefore considered not necessary to issue specific guidelines to the franchised bus operators on provision of toilet and rest facilities at bus termini.

The Transport Department has been proactively liaising with the relevant departments/authorities as appropriate to resolve any difficulties encountered by the franchised bus operators in applying for the facilities, and to let the departments/authorities and

the ... operators understand the procedural requirements with a view to smoothening the application process for timely provision of the facilities. The successful case of provision of a rest kiosk at the bus terminus on Ma Wan Road outside Shan Shui House of Shui Pin Wai Estate as mentioned in TD's paper 05 'Franchised bus captain -- working conditions and environment' is one of the good examples. Each department/authority may have its own statutory power and considerations in processing the FB's application for placement of toilets and rest facilities under their jurisdiction. That said, the Transport Department will continue to facilitate the franchised bus operators if necessary to actively cater for the needs of bus captains on provisions of toilets and rest facilities, and endeavour to provide the necessary assistance to the franchised bus operators in this respect."

Then there was a second question that was asked by the committee:

"Despite repeated and longstanding requests made by franchised bus operators, the committee was informed that some bus termini are still not provided with adequate toilet and rest facilities. Please identify these bus termini and whether they are major termini serving a number of bus routes and whether any of those

routes are manned by bus captains employed by Kowloon Motor Bus working on special shift who require adequate rest facilities to take rest break no less than 3 consecutive hours. Please explain the constraints in providing such facilities, particularly the reasons for rejecting franchised bus companies' request for provision of such facilities by the relevant departments/authorities."

The answer provided by the department was as follows:

"As at 31 March 2018, nearly all of the 295 bus termini over the territory are provided with toilets with a walking distance of 3 to 7 minutes, and about 86 per cent of the bus termini (ie 255 bus termini) over the territory are provided with rest facilities in the form of regulator's kiosk/office or rest kiosk for bus captains. Among the remaining 14 per cent of the bus termini without rest facilities, the franchised bus operators have not applied for provision of rest facilities at most, if not all of the bus termini.

On the other side, the franchised bus operators may apply to relevant departments/authorities for additional/enlarged rest facilities at bus termini to meet their operational needs. A list of the bus termini with toilets and rest facilities, to our best knowledge,

that were requested by the ... operators and were rejected in the past 3 years or under processing by relevant departments/authorities is attached at annex 3 for reference. We are afraid that the Transport Department does not have the information on the duty shift records of individual bus captain on each bus route which may be subject to changes from time to time and hence the information as to whether any of those routes operating at these bus termini were manned by bus captains employed by KMB working on special shift.

As shown in annex 3, the major reasons for rejecting the franchised bus operators' request for provision of toilets and rest facilities by relevant departments/authorities are mainly because of the physical constraints at individual sites (eg the bus terminus is located on a narrow sidewalk) or because of the views expressed by the community in the neighbourhood. As the proponent of the facilities, the franchised bus operators would explore feasible solutions to overcome the physical constraints and address the concerns from the locals for setting up toilets and rest facilities at those bus termini for bus captains. The Transport Department would assist the franchised bus operators in canvassing support from the locals by conducting site visits/meetings with them to

explore feasible solutions for erection of the rest facilities in order to expedite the implementation plans as and when necessary for the benefits of bus captains and passengers."

Annex 3, we will have to go to another bundle for that. It's to be found at TD-5 at page 1723.

You will see, at 1723, there is a heading, "List of bus termini with toilets and rest facilities requested by the franchised bus operators":

"(A) List of bus termini with toilets and rest facilities requested by the franchised bus operators under processing by the Transport Department.

(B) List of bus termini with toilets and rest facilities listed by the franchised bus operators under processing by the relevant departments/authorities.

(C) List of bus termini with toilets and rest facilities rejected by the Transport Department and relevant departments/authorities in the past 3 years."

Now, I will ask some questions later with regard to some of the points that the Transport Department has sought to make. It may well be that the company would wish to respond, in any event, to some of those assertions. But before I do that, before I come back to the information provided by the department, I have some questions of my own relating to the actual facilities or

the lack of the same. Then I will come back to the Transport Department position.

My understanding is that KMB has four depots, as they are called, and then a large number of termini; would that be correct?

MR ROGER LEE: Yes.

MR PETER DUNCAN: So, if we look at KMB-1, at page 252, do we see there the company's own map of depots and zones, for the company's use, which sets out the locations, or identifies, rather, the four depots that the company has: one at Lai Chi Kok, the Kowloon Bay Depot, the Tuen Mun Depot, and a Sha Tin Depot.

Just for the avoidance of any doubt, what exactly is a depot?

MR ROGER LEE: (Via interpreter) Within a depot, we have two functions. First of all, every night, buses return to the depot for maintenance, refuelling and cleansing. Some maintenance and repair work is being carried out there.

Another major function is as follows. Bus captains get their duty rosters and bus captains take a rest there. Bus captains go there every morning to get their duty list. There are four. At Tuen Mun Depot, it has the specific function of carrying out annual inspection and maintenance, and then at another one, Sha Tin,

training school. At Lai Chi Kok Depot, that's the centre for dispatching to cater for special circumstances, like a typhoon. For Kowloon Bay Depot, that's our backup office.

MR PETER DUNCAN: So does each bus captain start his day by going to a depot?

MR ROGER LEE: (Via interpreter) Most of them are, but some of them would just report to a terminus. Most of them will go back to the depot to get his duty list for the day.

MR PETER DUNCAN: Do I understand correctly -- you touched on this a couple of moments ago, I believe -- that the depots do provide toilet and resting facilities for the captains?

MR ROGER LEE: (Via interpreter) Certainly. Within a depot -- well, in fact the depot is larger in size -- we have got showering facilities, we have toilets. And for each depot, we have got a clinic for bus captains who are not feeling well; they will be given a quick check before deciding whether they should resume their duties. There are also rest facilities for bus captains.

The chairman reminded me that in fact we have got a barber's shop for bus captains to have a haircut.

CHAIRMAN: That's certainly true in Tuen Mun, but is that

true in all four of the depots?

MR ROGER LEE: (Via interpreter) All four of them. All four of them. There is even a grocery shop so that they can buy basic groceries. The majority of the bus captains would regard the depot as a place that they have essential belongings.

MR PETER DUNCAN: May I refer you, please, to file MISC-2 at page 902. You will see this is part of the document which is headed, on page 899, as a report on KMB's bus termini and the Tuen Mun Depot, visited by the chairman and members of the IRC staff on 3 August.

There is reference at paragraph (E) on page 902 to the Tuen Mun Depot.

If I could bring to your attention, please, just the second bullet point at the bottom of page 902: on the 1st floor, there is "a recreation area with two table tennis tables, a water dispenser, a locker and a soft drink vending machine, a barber's shop; a convenience shop; a restroom with A/C, four tables, 16 chairs, a refrigerator, a microwave oven and a television; and a small dark room with couches, which permitted bus captains to sleep in a horizontal position. One bus captain was sleeping in that position".

Then on the 2nd floor:

"a clinic, male and female toilets, storage room

(uniform) and offices."

Then we're assisted by annex E, which we will find on page 912, and 913, which contain photographic images of what is being described there in those paragraphs.

So that's the position with regard to depots.

Turning to the issue of termini, how many termini does KMB have?

MR ROGER LEE: (Via interpreter) 217.

MR PETER DUNCAN: Can we go to KMB-1 at page 201, please.

You will see, at this page, a letter from the committee dated 19 July 2018 to the company, and in the second paragraph it asks the company to provide information as to the location and address of the bus termini, and the bus depot responsible for that bus termini, at which KMB and Long Win bus captains working a "special shift", permitted under the guidelines, commence the minimum of a three-hour break which they are required to be afforded on such a shift, and the company is asked to describe in detail the resting and staff facilities available at the terminal.

Then we can see the answer to that letter at page 205, a letter dated 26 July:

"We refer to your letter ... dated 19 July ... by which you requested us to provide details of the resting and staff facilities available at bus termini that cater

for 'special shifts'.

The details are set out in the enclosed table."

And so on. Then we see the table at pages 206, 207 and through to 211.

Before I ask some questions with regard to that schedule, this of course concerns termini which are used for the special shifts. Do I infer correctly that there are some termini which are not used for special shifts?

MR PATRICK PANG: (Via interpreter) Yes, Mr Duncan. Some termini might not be used by captains on special shifts.

MR PETER DUNCAN: Now, approximately how many of those would there be?

MR PATRICK PANG: (Via interpreter) Perhaps I can provide a figure to reflect the situation.

As for the number of termini with bus captains resting, this is something we have to look at or find out. Perhaps I can provide the number of captains on special shifts that would take rests at depots, how many would take a rest at termini and how many of them would take a rest back home.

MR PETER DUNCAN: Yes. I probably haven't made myself clear, but this table would set out all the termini at which captains may be at when they commence their special or take their special shift and then have a rest.

MR PATRICK PANG: Yes.

MR PETER DUNCAN: If I understand things correctly, there would be some termini that would fall under that category, they would not be used for resting in a special shift situation. Is that correct?

MR PATRICK PANG: (Via interpreter) Perhaps I would put it this way. According to the timetable, some termini are not being used by bus captains on special shifts for resting. However, even if a terminus has resting facilities, operationally there might be different arrangements or deployments.

MR ROGER LEE: (Via interpreter) Mr Duncan, KMB has 217 termini and at each terminus there are basic facilities. As for terminus facilities, the kiosk approved by the government is about 40 square feet in area, and these are needed by bus captains, even those not on special shifts. We do not make a distinction for those on special shifts.

I have looked at all 217 termini. We are talking about kiosks of 40 square feet. This is not a place to sleep.

MR PETER DUNCAN: Sorry, when you say you looked at all 217 termini, did they cover termini used in a special shift situation and also termini not used in a special shift situation?

MR ROGER LEE: Yes.

MR PETER DUNCAN: So that's the total number of termini, irrespective of the special duty situation?

MR ROGER LEE: Right.

MR PETER DUNCAN: If I understand your answer just a few moments ago correctly, when you're considering facilities you don't distinguish between the two?

MR ROGER LEE: Right. (Via interpreter) Yes.

MR PETER DUNCAN: I want you to go, please, to KMB-1 at page 206.

We see, amongst other things, in this table, which of the termini rely on the use of a public toilet, as opposed to a chemical toilet, and as opposed to a KMB toilet.

MR ROGER LEE: (Via interpreter) Of the 217 termini, we have 50 termini with purpose-built toilets, and we have 66 termini with chemical toilets and about 100 would rely on surrounding facilities, including shopping malls. One terminus has no toilet facilities.

MR PETER DUNCAN: Now, given -- the number of public toilets -- if I could ask about that -- according to the Transport Department document I showed you a few moments ago, these toilets might be three to seven minutes away from the terminus. Is that a correct reflection of the situation?

MR ROGER LEE: (Via interpreter) I have not paid visits myself, but many of them can be reached within ten minutes' walk. Some termini rely on shopping malls, and when the shopping malls are closed the captains might have to walk further. This is possible.

MR PETER DUNCAN: Does the company consider that to be a satisfactory state of affairs?

MR ROGER LEE: (Via interpreter) In the past year, we added 26 new chemical toilets, and now there is only one terminus left. I think we are reaching a level that is acceptable. By captains one year ago, the situation might not be acceptable. For chemical toilets, since there is a lack of power supply, ventilation and other aspects might be worse than a complete toilet. But this is being improved upon and more will be done.

CHAIRMAN: When you say there is one terminus left, what do you mean exactly by that?

MR ROGER LEE: (Via interpreter) That is a terminus in Yuen Long. So the situation is like what you heard a few days ago: the footpath is rather narrow, and district councillors do not find that location appropriate, so it is still under application, so we are yet to install chemical toilet in one of our termini, and that terminus is in Yuen Long, in Yuen Long Park.

MR PETER DUNCAN: So, after the installation of those

27 chemical toilets, in how many instances will the company be dependent upon public toilets?

MR ROGER LEE: (Via interpreter) For these 100 termini, the situation is difficult because we have to rely on public toilets. Some public toilets are located in parks. Or let me put it this way: toilets are a complicated issue, because the applications for toilets require communication with government departments and district councillors and a lot of time is needed, and there is very little within our control on what we can do.

MR PETER DUNCAN: Assuming you did have control of the situation, what would be the ideal outcome for the company?

MR ROGER LEE: (Via interpreter) Personally, I often visit the termini, and I want our captains and frontline staff to know that we are listening to their challenges. I think the main challenge today is not on toilets but on the rest kiosks. Last autumn, there was an incident, the rest kiosks are important to our staff. The locations and sizes of the kiosks are an important part of our work coming up for new termini in the future; more should be done in terms of facilities, and this should be our area of focus.

MR PETER DUNCAN: We will come to the rest facilities in a moment, but assuming the way was much clearer than it

appears to be at the moment, what outcome would you want with regard to the provision of toilet facilities other than not relying on public facilities?

MR ROGER LEE: (Via interpreter) For our chemical toilets, very often power supply could not be connected in many of them. I once asked our engineering department to supply batteries and connect them to the toilets so that 24-hour ventilation and lighting would be possible. So this was the first step we conducted.

Next, for all venues with no power supply, we have installed solar panels on top of the chemical toilets, in order to enable lighting and ventilation for our bus captains. Within my ambit, we have done our best in terms of chemical toilets. As for facilities in shopping malls or parks, would we be allowed to install more chemical toilets? This is something we would try to do. But, as we said, there is involvement of government departments and district personnel, so there is some difficulty.

MR PATRICK PANG: (Via interpreter) Mr Duncan, I would like to add something. I would like to thank you for raising this issue of toilets.

The issue has bothered our captains. Sometimes, our bus captains are rejected when they want to visit toilets in shopping malls, and they might have to walk

eight or ten minutes to reach a toilet. Their rest time might be jeopardised as a result, and this issue has bothered our bus captains.

I am quite surprised that some termini have no toilets. Even we can add chemical toilets, but for new termini, I am quite surprised that they have not factored in a permanent toilet.

Let me give you some examples. For example, the West Kowloon XRL Station bus terminus. It's a sizeable bus terminus but there is no toilet. For Hung Luen Road in Hung Hom, there is a new terminus to replace the Hung Hom Pier terminus. It is a public transport interchange; again, there is no toilet, there is no rest kiosk. For the Hong Kong-Macau-Zhuhai Bridge terminus, as we see now, there will be no toilet.

So again I would like to thank you for raising this issue for these resting facilities, including toilets. They should be included, or they should include the basic facilities.

CHAIRMAN: So is the root cause of the problem a failure of the planning system? How can you have new termini set up with new routes and have no regime that requires that suitable toilets be made available?

MR PATRICK PANG: (Via interpreter) Thank you, Chairman. I do not know whether this is a design failure. For

termini built in the past, there are permanent resting facilities, including kiosks and toilets, but surprisingly, for some new termini, there are no such facilities.

For new termini, apart from a lack of resting facilities, there are design deficiencies as well. For the West Kowloon Station and Hung Luen Road termini, after they were commissioned, the Transport Department invited the bus operators to conduct trials, but we found that the designs do not suit certain models of buses, and eventually wholesale modifications must be made at the termini before our buses can use these termini.

For older termini, they weren't designed with 12-metre-long buses in mind. This is something we understand. But for new termini, we are rather surprised.

MR PETER DUNCAN: Could I ask you, please, to turn up file FE-1B, and go to page 199-7. Do you see there a letter dated 21 January 2016, addressed to the Commissioner for Transport from the company, under the heading, "Application for placement of chemical toilet on/over government land at Allway Gardens bus terminus, Tsuen Wan, New Territories."

Do you see a copy of that letter?

MR PATRICK PANG: (Via interpreter) Yes.

MR PETER DUNCAN: Does it constitute an application for the placement of a chemical toilet at the Allway Gardens bus terminus?

MR PATRICK PANG: (Via interpreter) Yes.

MR PETER DUNCAN: If you go through, please, to page 199-10, do you see a copy of a response from the Transport Department in April 2016?

MR PATRICK PANG: (Via interpreter) Yes, I see it.

MR PETER DUNCAN: Does it say in the second paragraph:

"This department has circulated your proposal to all relevant government departments for comments and sought Tsuen Wan District Office's assistance to conduct local consultation on the subject matter. I would like to advise that strong objection from local resident's representative to the placement of the proposed chemical toilet at Allway Gardens bus terminus were received due to hygiene concern and proximity of toilet facilities nearby. The details of the reasons for objection are listed in annex A for your reference, please.

As such, we regret to inform you that the application in relation to the placement of the chemical toilet is not supported. You are advised to reconsider the need and location of chemical toilet placement and resubmit application, if necessary."

Then, at page 199-13, there is another letter from the company to the Commissioner for Transport, on this occasion saying, in the second paragraph:

"Please note that the chemical toilet has been upgraded with better design and ventilation."

Et cetera, et cetera; do you see that?

MR PATRICK PANG: (Via interpreter) Yes.

MR PETER DUNCAN: We understand that Allway Gardens has been a bus station, bus terminus, for more than 20 years.

MR PATRICK PANG: (Via interpreter) That's correct.

MR PETER DUNCAN: Then a further letter, which is dated 29 September 2017, at page 199-18, a resubmission of the application.

MR PATRICK PANG: (Via interpreter) Yes.

MR PETER DUNCAN: Then finally, at 199-26, a letter from the Transport Department of 29 September 2017, so almost two years after the original application:

"With reference to your application for placement of one chemical toilet ... I am pleased to inform you that permission is hereby given ...", with attached 32 conditions pertaining to the installation of one chemical toilet.

Is that the situation?

MR PATRICK PANG: (Via interpreter) That's correct.

MR PETER DUNCAN: If I may make an observation. This seemed

to have taken a long time to achieve?

MR ROGER LEE: Yes.

MR PATRICK PANG: (Via interpreter) That's correct.

MR PETER DUNCAN: Is this a unique case or does this reflect the sort of situation that often occurs with regard to applications for chemical toilet installations?

MR ROGER LEE: (Via interpreter) You can see that the date is September 2016. That's after the Lok Wah incident. During that period, within a short period of time, we secured approval for 26 chemical toilets to be placed. It was a very long process. As I have said, for another 100 termini, we have to rely on nearby facilities such as parks and shopping malls. Much remains to be done. But we are talking about an application time of something couched in years.

MR PATRICK PANG: (Via interpreter) For this Allway Gardens example, I was also involved. Why did we put in the application in the first place? Well, as you observed, the termini has been around for many years. All the time, we had been relying on shopping malls. They allow bus captains to use it, and suddenly they said no, and our bus captains had to walk a long distance to use a toilet.

Therefore, for the first time, we submitted an application on 21 January 2016, and there was

correspondence, residents objected, the district councillor said no and the Transport Department said, "Sorry, the application is not accepted." Then, in September 2017, I went on a visit to the terminus. The I talked to the bus captains; the bus captains had strong views. Then I told my manager that we had to resubmit an application. And as Mr Lee has said, in the middle of 2017, at Lok Wah Estate, we wanted to place a kiosk there and it took years to get it approved. Then the pace quickened. As Mr Lee has said, we are talking about years in getting things done. Toilets have been a source of nuisance or trouble for bus captains for many years.

MR PETER DUNCAN: If we could go back, please, to KMB-1 and the information that you provided to the commission with regard to staff facilities and toilets.

It would seem, from analysis of these references, that there are some seven termini which do not appear to have any toilet facilities at all. If I look at page 208, the third and fourth on that page, Handsome Court and Sun Tuen Mun Centre, and then at page 209, the Central (Macau Ferry), the Cheung Sha Wan -- maybe that's just one, Cheung Sha Wan; Cho Yiu; and then, second from the bottom, the Kwai Tsing Central terminus.

So how do your drivers get on at these termini?

MR ROGER LEE: (Via interpreter) They went to toilets in the shopping malls.

MR PETER DUNCAN: Would that not be recorded as "public toilet"?

MR ROGER LEE: (Via interpreter) Some are government public toilets that can be reached within ten minutes.

MR PETER DUNCAN: When you've got a number of references here to public toilets, and there's a great number -- about 100, I think you said -- some of those include shopping malls?

MR ROGER LEE: Yes.

MR PETER DUNCAN: So why are these blank, these seven? That implies they are not even available in shopping malls.

MR PATRICK PANG: (Via interpreter) It could be that they relied on toilets in shopping malls, but the shopping malls will close during certain hours and the toilets would be locked up during those hours. I would have to check and then I will come back later with an answer.

MR PETER DUNCAN: So let's move from toilets to rest facilities. In this context, can I start by referring you to the evidence of one of the union representatives that the committee heard from, on Day 9, please, at page 50.

This is the evidence of a Mr Chan Kwong Nung from Long Win Bus. He was one of the representatives from

the Motor Transport Workers General Union. He gave evidence on Day 9. I want to pick it up, if I could, at line 20 on page 50:

"Mr Chan Kwong Nung: I'm from Long Win Bus, let me supplement."

So he is supplementing a statement previously made.

"For E33P" -- which as I understand it is one of the routes -- "in 2016, the route runs around the clock, there are about 60 trips. The terminus is at Siu Hong Station South. There are no rest facilities nor toilets.

Originally, this route was already in operation, in 2016 it became a full day route. Colleagues had to eat at the bus terminus, and to rest, at special space, location, we had to rest, but there was no rest kiosk.

After repeated efforts, to have one, the result was the local community and the Transport Department had not approved it. So it has been close to two years we have been asking for a kiosk, but still, to no avail.

We have not any notification as to when that can be done.

Ms Maggie Wong: And about this E33P, was this request made in writing, about the rest kiosk?

Mr Chan Kwong Nung: Yes.

Ms Maggie Wong: When was that?

Mr Chan Kwong Nung: The trade union at our meeting with the company raised that in 2015. The company has been telling us that it is making applications with the relevant authorities, and then in 2016 the district council approved that the route should be a whole-day route to serve the residents of Tuen Mun, and we were saying that without a rest kiosk how can we improve the quality of service? Our views were relayed to the district council and the Transport Department. Even today, we have not heard anything from the parties."

Just before I ask questions about that, could I also take you back to MISC-2. This is the report of the chairman's visit. This time, at page 899.

From page 899, could you go, please, through to page 902, where the observation of the visits is as follows:

"There was no rest facility at the bus terminus.

It was noted that a bus captain driving bus route E33P could only take a nap inside the bus compartment between two bus trips as there was no rest kiosk at this open-air terminus. According to another bus captain driving the same route, there was a locker stand at the terminus, in which bottles of water were occasionally placed. An Octopus card was available for access to the toilets inside the Siu Hong Station, but it took at

least seven to eight minutes to go to the toilets in the station and return."

Then at annex D we have some photos. That's page 911. So we have photos of the terminus but no rest facility; a locker stand; and then the toilets inside the Siu Hong Station.

So you, I think, anticipate my question, which is: how could a terminus be approved and be installed without, apparently, any provision for either a toilet or a rest facility?

MR ROGER LEE: (Via interpreter) I think, as the chairman has said, this is a core problem. I don't have an answer for you. The latest situation is that the Transport Department has approved some facilities for this terminus. Of course, there is still work to do, in that we need to apply for power supply. This is the procedure: we need to get the approval from the government first, before we can apply for power supply, and that takes time.

So the next step for us is to do our best to get power connected to the rest facilities there.

MR PETER DUNCAN: Without going back to the Transport Department's submission, I think you will understand the tenor of what they say is that they will facilitate these sorts of applications and liaise with other

government departments.

MR ROGER LEE: That's right.

MR PETER DUNCAN: Is it your experience that that is effective in any way?

MR ROGER LEE: Personally, I think some departments -- we may not need to contact some of these departments. These facilities are temporary structures, and they ask those departments which have to do with permanent structures. So they ask all those departments dealing with permanent structures.

Then the other point is about power supply. We need to get the approval before the power company would entertain an application for power supply. We have failed to make any headway about these procedures. I have asked CLP to expedite the process. You can well imagine that certain things can certainly be done much quicker.

MR PETER DUNCAN: So how long ago was it that you first made an application for a kiosk and a toilet at this particular venue?

MR ROGER LEE: (Via interpreter) I need to check, but it is not a short while ago, not like in terms of months. It may well be over a year. Even for power supply application, it would at least take a few months.

MR PETER DUNCAN: So it hasn't been granted as yet?

MR ROGER LEE: (Via interpreter) Not the power supply.

MR PETER DUNCAN: When do you expect all of the approvals will have been obtained?

MR ROGER LEE: (Via interpreter) Maybe after this meeting, things will gather pace, but it is not very complicated. We are talking about four to six months and nothing less than that.

MR PATRICK PANG: (Via interpreter) For the termini, we need a lot of time to apply for the rest facilities, and application for power supply equally takes a long time. So our colleagues would ask why they could not use the kiosks, but it's because we need to get the green light from other departments, including the DSD, Drainage Services Department, and some other formalities have to be complied with first.

CHAIRMAN: Gentlemen, we have reached 1 o'clock. We will take our lunch break now. We will resume this afternoon at 2.30. Thank you.

(1.00 pm)

(The luncheon adjournment)

(2.30 pm)

CHAIRMAN: Good afternoon, gentlemen.

Yes, Mr Duncan.

MR PETER DUNCAN: Thank you, Mr Chairman.

MR PATRICK PANG: (Via interpreter) Sorry, Mr Duncan, prior

to the lunch break, we talked about the facilities at the termini. Do you mind if I try to give you a reply first?

Can we go to KMB Long Win Bus bundle 1(A), page 208.

CHAIRMAN: Yes.

MR PATRICK PANG: (Via interpreter) First of all, in relation to the third as well as the fourth one, Handsome Court as well as Sun Tuen Mun Centre, we were talking about special buses. There was only service in the morning, and therefore we don't have toilets, and bus captains do not take a rest there.

In addition, if you may go to page 209, Central (Macau Ferry) -- sorry, but there is an omission here. In fact, there is a public toilet.

(Chinese words not interpreted) --

CHAIRMAN: Just a moment, please. So that's a mistake or an omission?

MR PATRICK PANG: (Via interpreter) Correct. Sorry for the mistake.

CHAIRMAN: That's the Shun Tak Centre, is it?

MR PATRICK PANG: (Via interpreter) Correct. You are right, Mr Chairman.

CHAIRMAN: Yes?

MR PATRICK PANG: (Via interpreter) Further down, Cheung Sha Wan, Kom Tsun Street South, we haven't got a chemical

toilet there, because we are looking at the chemical toilet at Kom Tsun Street North, so the two termini share one chemical toilet.

Then further down, second-last one, Kwai Shing Central -- I'm sorry, again, there was a slip, and in fact there is a KMB permanent toilet.

Then page 210, the last one, Yau Yat Chuen, for Yau Yat Chuen we haven't actually got a bus terminus, because route 203C goes to Tai Hang Tung. So there isn't a toilet; there isn't a rest facility for bus captains, as they don't rest there.

In addition, earlier on, some trade union representatives talked about Long Win Bus E33P, in particular Siu Hong South. Mr Duncan, you asked us when we started to apply for the facility. For Siu Hong South, it was August 2017 that we submitted our application to the TD to ask for a rest kiosk as well as chemical toilet. In July 2018, approval was given. Currently, we are now applying for power supply.

Thank you, Mr Duncan.

Thank you, Mr Chairman.

MR PETER DUNCAN: Yes. Thank you, Mr Pang.

Can I ask you now to be at MISC-2, at page 899, which, as we saw them this morning, is the report on the visit to the bus termini, the depot, and ask you,

please, to go to the second page of the report, that's page 900.

I notice the reference in line 3 under paragraph (B), the Sha Tin Railway Station bus terminus", that this contained the new style rest kiosk with an air-conditioner, an exhaust fan, five chairs, and then the reference at the bottom of the page to the fact that "on an average day, there can be more than 10 drivers resting at the terminus at the same time."

If I read the report correctly, this seems to be a situation which is not peculiar to the Sha Tin Railway Station bus terminus. So if you look at page 901, which refers to the Luen Wo Hui bus terminus, we have in the second bullet in the first paragraph reference to a small restroom with three chairs; and then, in the second paragraph on that page, the fourth bullet:

"on the day of the visit, there were around 6 or 7 drivers resting at the terminus during peak hours".

I think if we go then to page 903 for the Shan King terminus, we have five chairs, although there is no reference on this occasion to the number of drivers who might be in that kiosk at any one time.

I think there are two points here. We heard that at the depot, there's actually a dark room with facilities which enable the bus captain to have a sleep in

a horizontal position. That doesn't seem to be the case for the kiosks at the termini. Do you believe that to be a satisfactory situation?

MR PATRICK PANG: (Via interpreter) This may happen. What I want to emphasise is that for the so-called kiosks, there are two sizes, one smaller, the other larger. If we would like to place a couch which is horizontal, it takes up certain space. In fact, we have been doing our best, and depending on the usage, for certain termini, bus captains may not use the facilities at that particular terminus during the three-hour break, but whenever possible and if permitted we will try to place a larger kiosk.

MR ROGER LEE: (Via interpreter) If I may also add to the answer. Within a depot, yes, indeed, there is something for you to lie down. For a purposely built terminus, we aren't actually talking about a chair, but then it is a lower chair that allows the employees to take a rest more comfortably. They may not be able to lie down on something like a bed, but still it is quite a comfortable facility.

As to the point you are making, the kiosk is of such a size that it is only 40 square feet, we can only accommodate five or six chairs, and we believe that there is a need. Very soon, at larger termini, we are

going to have two types of chairs, one for you to sit upright, the other for you to be more comfortable. We are already working on this at many locations.

MR PATRICK PANG: (Via interpreter) Mr Duncan, this morning, during the hearing, I tried to provide some figures for the committee. For us, the KMB, for bus captains doing special shifts, what I want to say is that about 9 per cent of bus captains doing special shifts, that is 134 of them, they will take their rest at the four depots. As Mr Lee has said, we do have horizontal beds. So 134 of them would have their rest breaks at the depots. For others taking their rest at the bus termini, 17 per cent of them, in other words 262 of them. Then for those who go home for the three-hour rest break, in fact they account for 74 per cent of the special shift bus captains, 1,117 of them. 74 per cent of them can go home to take their rest.

So, relatively speaking, for us in KMB, we are in a better position, because we have got differently distributed depots, and bus captains can go home within a short period of time so as to take their break.

Thank you, Mr Duncan.

MR ROGER LEE: (Via interpreter) If I may also add to the answer. Of course, we have given you the figures. For the rest facilities at the termini, we will continue to

work on them: better chairs, more comfortable chairs. So they are not just for special shift bus captains. Even for those doing straight duties, we will still try to improve the facilities for them.

MR PETER DUNCAN: At the larger kiosks, is there room for horizontal sleeping facilities?

MR PATRICK PANG: (Via interpreter) I don't think they can actually lie down in a horizontal position, but then we have something like an armchair for them to recline. Of course, I'm not talking about a bed that is horizontal, but then it is like an armchair that they can sit more comfortably. Soon we are going to provide more and more chairs like this.

So we do have them, and we are working on them, and as long as their size allows, we can provide more such chairs.

CHAIRMAN: Has anyone stipulated the maximum size of a kiosk?

MR PATRICK PANG: (Via interpreter) Every time when we apply to the TD to install the kiosk, there is a size restriction. I think we are already talking about the best size within the current framework.

CHAIRMAN: Is that an indirect answer that the Transport Department impose a limit on the size?

MR PATRICK PANG: (Via interpreter) Yes, indeed. Not

necessarily the TD but in fact there is.

MR ROGER LEE: (Via interpreter) This is a size stipulated by the government. So we have an open attitude towards the size. It can certainly be bigger.

MR PATRICK PANG: (Via interpreter) Well, on many occasions, we try to convert to another type of kiosk from type A.

CHAIRMAN: Which department of government stipulates a maximum size of kiosk?

MR PATRICK PANG: (Via interpreter) The Transport Department.

MR ROGER LEE: (Via interpreter) The Transport Department.

CHAIRMAN: For how long has it stipulated these two sizes?

MR ROGER LEE: (Via interpreter) Five years.

CHAIRMAN: Really? No longer than that?

MR ROGER LEE: I'd probably say at least five years.

CHAIRMAN: And have you asked to have bigger kiosks, perhaps saying, "Look, we need somewhere for drivers to lie down to sleep?" Have you asked the Transport Department?

MR ROGER LEE: (Via interpreter) Usually we will ask for two 40 square foot kiosks. Usually, that's what we try to do. Usually we only get one, we are only given permission to do one. If we ask for a size which is larger than 40, I'm afraid we have never tried.

CHAIRMAN: So you don't know what the answer might be?

MR ROGER LEE: (Via interpreter) Correct.

CHAIRMAN: But you infer from the fact that they refuse you to have two 40-foot ones, that they would refuse a 100 square foot kiosk; is that it?

MR ROGER LEE: (Nodded head).

CHAIRMAN: Yes, Mr Duncan.

MR PETER DUNCAN: The armchairs you refer to, are they visible in any of the photos that are attached to the report?

MR ROGER LEE: (Via interpreter) No, not shown in the photographs, but then for many bus termini we do have these kind of chairs.

MR PETER DUNCAN: The second point which arises from those descriptions that I read is the fact that you may have, say, three to five chairs, but at any one time there may be seven to eight people having a rest. Is that a satisfactory state of affairs?

MR ROGER LEE: (Via interpreter) Of course, there is always room for improvement. Personally speaking, I don't think this is quite satisfactory. So, as I have said, we have never stopped liaising with the government and applying to the government. So, for the rest kiosk, it isn't a problem that has been resolved; we are not satisfied with the situation.

MR PETER DUNCAN: So, going back to, if I could, TD-1, where we started this conversation this morning, at page 438,

where we saw the two questions of the department and their responses. If I could bring your attention to page 438, the second sentence of the first bullet:

"When relevant departments/authorities consider and vet the applications for setting up these staff facilities, the TD has been providing appropriate coordination so as to facilitate early installation of such facilities."

Is that in fact your experience of the situation?

MR ROGER LEE: (Via interpreter) Yes, they do play the role as a coordinator. For applications like this, there are two major departments involved. Generally speaking, the Transport Department will deal with cases other than the Housing Department or the Housing Authority. For those cases falling within the Housing Authority, the Housing Authority will be the coordinator. So we are mainly talking about two different authorities dealing with the applications.

MR PETER DUNCAN: Does the Transport Department's coordination result in the facilitation of early installation of the facilities, in your experience?

MR ROGER LEE: (Via interpreter) As an operator, I would say that they could have done more quickly.

MR PETER DUNCAN: The second bullet, third sentence:

"Requirements and comments from the FB operators on

toilets and rest facilities would be incorporated in the design of the bus termini as appropriate."

Is that the situation, in reality?

MR PATRICK PANG: (Via interpreter) Actually, it is very difficult for me to give you either "yes" or "no". Some would be known to us, but others, the information is not known to us. So sorry, Mr Duncan, I cannot give you a clear "yes" or "no".

MR PETER DUNCAN: Who's responsible for the design of a bus terminus?

MR ROGER LEE: (Via interpreter) There are several types of termini. Some termini are on government land or government property. When they were built, the government might not have decided which bus operators would operate the routes there, and they seldom invited the operators for comment. The TD would have their own team of consultants to design the termini. So, over the years, we were never consulted on where the toilets should be installed.

MR PETER DUNCAN: So it is the Transport Department which designs each bus terminus?

MR ROGER LEE: (Via interpreter) If it is on their land. For termini on public transport interchanges, that might have to do with the railway company, and we are unaware of the property ownership situation, but we were never

informed.

MR PETER DUNCAN: So, when the Transport Department designs a terminus on government land, do they incorporate in the design the provision for a toilet and a rest facility?

MR ROGER LEE: (Via interpreter) If they call it a bus terminus, then terminus facilities should be incorporated. But from what I see now, these facilities are absent in some termini, so I cannot say or comment on their standards.

MR PETER DUNCAN: Going down to page 439, the first bullet on that page:

"The TD has been proactively liaising with the relevant departments/authorities as appropriate to resolve any difficulties encountered by the franchised bus operators in applying for the facilities ..."

Is your experience that the Transport Department has effectively resolved difficulties encountered by your company?

MR ROGER LEE: (Via interpreter) Mr Duncan, I would only say that it can be done better. This bullet point is actually very broad. There is no way for me to gauge what is meant by "proactively".

Or let me put it this way. The TD does not object in principle the installation of rest kiosks and

chemical toilets at the termini, but whenever there is district consultation, and it is also about whether these facilities -- or whether there is space for these facilities at the actual site. I feel that we have no major differences with the TD and I see that they have certain difficulties.

MR PETER DUNCAN: Page 440, the last sentence on that page:

"The Transport Department would assist the franchised bus operators in canvassing support from the locals by conducting site visits/meetings with them to explore feasible solutions for erection of the rest facilities in order to expedite the implementation plans as and when necessary for the benefits of bus captains and passengers."

Has the company experienced that sort of assistance?

MR PATRICK PANG: (Via interpreter) When we file an application, I know that the TD would communicate with the district council as relevant for the example of Allway Gardens in Tsuen Wan, the TD said that there was opposition from the residents and they asked us to apply on another site. So this is a common problem we run into.

MR PETER DUNCAN: I now want to conclude by asking you a series of clarification matters, or matters that have already been the subject of the assistance you have

given the committee.

First of all, with regard to the drivers actually coming to work to start their shifts -- now, do I understand correctly that, currently, drivers are not provided with any special transport to enable them to get to the start of their work? They have to use their own resources, their own devices, to get to work?

MR PATRICK PANG: (Via interpreter) We do provide crew bus service. The service is provided for morning shifts and the scope is pretty wide. We do not have any depot on Hong Kong Island, but we would provide crew bus service on Hong Kong Island every morning to take captains to work at their respective depots.

MR PETER DUNCAN: Right. Can you provide just a little more detail about that so the committee knows the extent of that crew bus service?

MR PATRICK PANG: (Via interpreter) No problem. We do have routes for our crew bus, and the timetables, et cetera, we can provide them.

For those on morning shifts, commuting is an issue, whereas for those on night shifts, the captains can often use the bus, and they can reach the depots they need.

MR PETER DUNCAN: Can I ask you to go to KMB-12 at page 5010.

This is one of the documents that you supplied after the last hearing, and which provide statistics to which you referred in different context just a few moments ago.

It shows the statistics regarding what proportion of the drivers will take their midday rest respectively at the depot or at the terminus or at home. I think the earlier point that you were making was the high proportion -- I think you mentioned about 70 per cent -- who actually took their break by returning home.

MR PATRICK PANG: Mmm.

MR PETER DUNCAN: Is there any provision for transport assistance with regard to taking the drivers home or back from home to resume their duties?

MR PATRICK PANG: (Via interpreter) We have an inherent advantage, in which we have a high number of termini, so every bus captain who has completed training at our company would be deployed somewhere near where they live.

So you can see that 74 per cent of the bus captains on special shifts are within walking distance of home, and very often they would just live next to the termini, so it is easy for them to go home.

MR PETER DUNCAN: Now, during the hearing, on the last occasion -- if I could just give the members reference:

Day 14 at page 112 -- we were informed that drivers might be required to drive up to three routes in a day. Do you recall that evidence?

MR PATRICK PANG: (Via interpreter) Yes, I remember.

MR PETER DUNCAN: What would be the financial implications if that was reduced to two routes a day, or would there be financial implications?

MR PATRICK PANG: (Via interpreter) Financially, I do not see any substantial difference, but in terms of operation, there might be some impacts. For the so-called interlining or the cap of number of routes at three per day, we are not the only company with such practice.

As far as I know, all franchised bus operators in Hong Kong adopt this approach of interlining. In the last hearing, as Mr Lee said, we asked a British consultant to look at the maintenance and operation of our bus routes, and from my experience with those consultants, in other countries, sometimes more than three routes are included in the interlining.

So, to answer your question, Mr Duncan, financially there is no substantial difference, but in terms of operation, you must understand that the passenger volume might be different every day and some bus captains might be on sick leave. If we allow them to drive no more

than three routes, there would be more operational flexibility and for each bus route, there would be bus route training, or else we would not deploy the captains.

MR PETER DUNCAN: Are there any complaints from unions or drivers that driving three routes is too many?

MR PATRICK PANG: (Via interpreter) I did not hear major complaints, but for certain drivers there might be some complaints, if they have to drive two routes a day. I think there is a need not to drive more than three routes a day and this is a common practice.

MR PETER DUNCAN: We have heard evidence with regard to what happens when a driver is required to drive on a new route. When he is required to try out a new route, does he have the assistance on board of another captain?

MR PATRICK PANG: (Via interpreter) Captains must have received route training for all routes. If they are to drive a new route, they must receive route training at our training school.

MR ROGER LEE: (Via interpreter) I think we are looking at two issues here. For bus captains trained at our Bus Captain Training School, at the beginning, the driver would be accompanied by another person on board; whereas for an experienced captain picking up a new route, the captain would receive training from the training school.

MR PETER DUNCAN: When he drives that new route for the first time, does he have the assistance of another driver on board?

MR PATRICK PANG: Yes, buddy driver.

MR PETER DUNCAN: Buddy driver, yes?

MR GODWIN SO: (Via interpreter) It depends on the number of years of experience for the bus captain. For an experienced captain picking up a new line, that route would not be completely new for him, so he can handle it alone. For a new captain who has freshly graduated, we would assign a buddy driver who is experienced, who would give confidence to the new driver and provide the information necessary.

MR PETER DUNCAN: Dr Leung mentioned the proposal to introduce a 20-point increment instead of the current I think eight-point increment. Are you able to indicate to the committee when it is likely that this will be introduced?

MR GODWIN SO: (Via interpreter) It was in effect from 1 September.

MR PETER DUNCAN: It has already been introduced?

MR GODWIN SO: Yes.

DR NORMAN LEUNG: In fact, Mr Duncan, for your information, with effect from 1 September, if a new recruit joins KMB or Long Win as bus captain, he will be earning about

$23,000 a month, inclusive of the double pay at the end of the year. That is a substantial increase over the previous remuneration.

MR PETER DUNCAN: Thank you.

CHAIRMAN: You have provided us with this information in a recent submission, have you not?

DR NORMAN LEUNG: I think we are happy to make -- Godwin, will be happy to submit to this committee a comparison; all right? The remuneration package before 1 September and after 1 September. Compare the daily rate of bus captains and the monthly captains -- provide those figures to this committee, please.

MR GODWIN SO: (Via interpreter) We will provide it as soon as possible.

CHAIRMAN: Yes. Thank you.

MR PETER DUNCAN: Does it sometimes happen that a driver will fall ill during the course of his duties? Does that sometimes happen?

MR GODWIN SO: (Via interpreter) Yes, it does happen.

MR PETER DUNCAN: Does the company have any procedures or protocols as to what should happen in that situation?

MR GODWIN SO: (Via interpreter) First of all, in the recruitment of captains, according to our agreement, if a bus captain falls ill, he or she should apply for sick leave, and we have our own clinic at each depot, and

when captains are deployed, when they check in at the terminus, we would remind them that they can only work that day if they are healthy, and they are allowed to apply for sick leave otherwise.

MR PETER DUNCAN: What of the particular situation, though, that during the course of driving a route a particular driver falls ill? Is there any particular policy or protocol or procedure that is required to be undertaken?

MR PATRICK PANG: (Via interpreter) If a bus captain feels unwell during the course of driving a route, the captain can pull over and call our inspector. We have inspectors who make inspections, and the bus captain simply has to pull over and our inspector would arrange another bus so that the passengers can be transferred, and then we would take the bus captain to a clinic. This is our practice.

MR PETER DUNCAN: KMB-12 again, if I may, this time at page 5063. This again is some of the material that you provided the committee with since the last hearing, and it contains a description of the regular training for new bus captains, page 5063, and then the regular training for serving bus captains at page 5064.

Does the company provide any training with regard to fatigue management? And when I mention "fatigue management", what I mean, if I can try and explain

this -- recognising fatigue, knowing what to do about fatigue and knowing how better to take rest. That's what I mean about "fatigue management". Is there anything of that nature covered in the course of driver training?

MR JAMES WONG: (Via interpreter) As Mr So has said, when they join the company, we will remind them that if they are not well, they should see a doctor; they should not drive.

As for fatigue, we think this is covered by the point on not being well.

MR GODWIN SO: (Via interpreter) On fatigue management, the company has done a few things. First of all, the Transport Department has issued Guidelines on Working Hours. If we comply with the guidelines, then at least we can ensure that there is sufficient rest taken by the bus captains. We also have a chapter in the training manual that as a driver, they should manage their health properly. When they discover that they are not feeling well, they should inform the company and do not work in that particular shift that they have been deployed to work. There are also facilities at the depot -- at the terminus.

Every six hours, the bus captain has a coffee break, and there is also a water break, a layover break and

toilet break, for them to take a rest, and that's for the purpose of keeping them healthy.

MR PETER DUNCAN: So do I understand correctly from those answers that there is nothing specifically aimed at fatigue management; that these are general matters that are covered during the course of the training?

MR GODWIN SO: No.

MR PETER DUNCAN: Now, we have heard a lot at the last hearing that it was in early June this year that the company first learned from the Transport Department that digital road mapping was available in Hong Kong. Do you remember that evidence at the last hearing?

(People nodding)

Has the company yet started to make use of the digital road mapping?

MR LEUNG KIN WANG: (Via interpreter) We have talked to the black box manufacturer. We are working on it. We hope we can make good use of the map. We are doing it.

MR PETER DUNCAN: When do you expect to commence making use of the digital mapping facility?

MR ROGER LEE: (Via interpreter) We are doing this under a two-pronged approach. For ZF, there are two systems, one based on digital map; the other is an approach based on manual input of information and data. We are doing both. We hope that in January next year or so, we can

try to provide some information on the black box. For example, speeding, or a speed limit for that particular road section. We hope to achieve this by January next year.

MR PETER DUNCAN: At the hearing on Day 13 -- I will give everybody the reference just for the record: it's page 31 of line 12 -- the committee was informed that, at that time, that's earlier this month, or last month, in August, it took four days for the speeding report to be generated.

Then, in answer to a question from Prof Lo, Mr Leung agreed that if the driver tapped in using his ID, and that record was put in the black box, the information would be instantaneous; you wouldn't have to wait for the four days.

So what is the current situation? Do we still have to wait for the four days or is it instantaneously available?

MR LEUNG KIN WANG: (Via interpreter) Still four days now, but we are working towards that particular direction.

MR PETER DUNCAN: When will you reach that direction?

MR LEUNG KIN WANG: (Via interpreter) We hope we can achieve it as soon as possible.

MR PETER DUNCAN: What does that mean, a few weeks, a month?

MR ROGER LEE: (Via interpreter) We were talking about the

black box and the digital map. We can reduce it from ten to four days because of the technology. We have to merge the two sets of data, and it will take four instead of ten days.

If we can further integrate the digital map into the black box, we can certainly reduce the time taken from four days to something less. Maybe it can be reduced to one or two days. We don't know yet. But next year, the real time taken -- the time taken will be much shortened.

MR PETER DUNCAN: Thank you, gentlemen. I have, personally, no further questions, but the committee may have some questions for you.

MEMBER AUYEUNG: Thank you, Chairman.

You spent a lot of time today talking about how to improve the working conditions of all the bus captains. Can you give us some description on the hiring successes of bus captains so far, using say the last month versus three months ago to six months ago? Are you having much success hiring bus captains?

MR GODWIN SO: (Via interpreter) At present, on a weekly basis, we can recruit 20 to 30 new bus captains. Compared with what it was six months ago, we were only able to recruit 10 to 15 bus captains. But it has to do with the market. But, at the same time, the company has

done certain things. First of all, pay and remuneration. As our chairman has said, there was an enhancement in March, and then in August there was a pay increase. So altogether we are talking about 15 per cent increase in one year. With higher pay, we can attract more bus captains.

Secondly, we were talking about the conditions, more facilities for rest, and so on, and also in our recruitment we have stepped up our efforts. We have organised more open days and reaching out activities. We would take the initiative to reach the target of prospective bus captains so we can make up the shortage, shortfall.

MR ROGER LEE: (Via interpreter) As for the target recruits, and also we have to bear in mind different local characteristics in different districts. For example, Tuen Mun is very different from Lai Chi Kok, so we will have to adopt a targeted approach. In Tuen Mun, we may want to target more women. They might not be able to work a full eight-hour day; they may only work half of that. But we know that certain hours, they will be able to work, and they don't want to have an assured working shift designated.

So we will also look into child-care service so that these bus captains can take care of their children when

they are off duty. Some of these people are in their early 50s. They may have the driving licence; they may not want to take up a full-time job.

So we will have to look at the district characteristics and the people in different districts.

Also, we have gone to different districts, including Lantau Island and Tung Chung, and we need to use some new approaches.

MEMBER AUYEUNG: A second question I may have is to follow up on the question Mr Duncan asked earlier about the design of the bus terminus.

I get the impression from your feedback that it's like you have no chance to ask for a toilet or whatever. Is the arrangement all or nothing, either you do it or you don't get the route? Is that how it works in the system?

MR PATRICK PANG: (Via interpreter) Not that the design of every terminus is without a rest kiosk or any toilet. Some termini would factor in this in the design, but somehow, in some of the termini, these facilities are not taken on board.

MR ROGER LEE: (Via interpreter) I think Mr Auyeung was asking about our role in the design of new termini. Usually, the design of the new terminus is completed before the award of new bus routes. So they would build

the termini first before they make a decision on which operator, bus operator, should be granted the right to run the routes.

For example, in respect of the Hong Kong-Zhuhai-Macau Bridge, they have been talking about offering bus service for a long time, but they haven't made a decision on who, which company, to run those routes. So they have no way to ask us about our ideas or proposals in the design. So they would complete the hardware first, before finding an operator, because when the design is done we don't know whether we will run those routes.

MEMBER AUYEUNG: You have no chance to go back and request such facilities as a toilet?

MR ROGER LEE: (Via interpreter) In respect of the Hong Kong-Zhuhai-Macau Bridge, we did try that, but the hardware is already completed so that's a difficult point.

MEMBER AUYEUNG: Thank you.

Thank you, chairman.

CHAIRMAN: You have provided the committee with redacted versions of the notes or the minutes of various minutes that were held in several different parts of the working group that was convened in March 2018 and addressed training and the use of technological devices to enhance

safety.

In response to the agenda being sent out, you sent your own shopping list of what you would like to address, and can I invite you to go to that. It's at KMB-12 at page 4939. I think the agenda had been sent out on 13 March, so this was an immediate response, and no doubt what you were doing was taking the opportunity to put down matters that you had had difficulties with, for them to be discussed. This was an opportunity for you.

Am I correct in that assumption?

MR GODWIN SO: Yes.

MR ROGER LEE: Yes.

CHAIRMAN: What you asked them to address was, first of all, illegal parking and loading and unloading activities at bus stops; traffic congestion is perhaps a broader matter; but more specifically, bus captain assaults and traffic black spots.

Two of those matters are matters that we have received evidence on from various parties: illegal parking, particularly at bus stops, and assaults on bus captains.

The response from the Transport Department came in the letter at page 4941, dated 26 March 2018. You will see, in the second paragraph, reference is made to the

limited time span of the working group and the need to focus on submitting a review report on the outcome in three months' time. Then the response to your request:

"As for the four subjects that you have raised, we would handle them separately outside the working group."

The question I have for you is this. This is now five months later. Have these matters, illegal parking at bus stops and assaults on bus captains, been handled at all?

MR GODWIN SO: (Via interpreter) Perhaps I can answer this. At that time, the working group under the Transport Department focused on safety belts on buses and the training of bus drivers. After the two priority agenda items were completed, we wrote to the Transport Department, as you can see in page 4945, and we reiterated the four subjects.

Illegal parking, as we mentioned in earlier hearing, Mr Pang told you that the company took the initiative to liaise with the police in an attempt to do something about this.

As for traffic congestion, we all understand there is very little we can do.

The third one, harassment of bus captains, or bus captain assault, we understand that the Transport Department is conducting a campaign involving a number

of operators, railway operators and bus operators. This is a publicity campaign on polite passengers.

And the fourth one, traffic black spots, we have a fleet of 3,000 buses. We understand the road conditions well. Some roads are uneven or the levelling is not good, and also the marking may also affect -- may cause traffic accidents. From time to time, we write to the Transport Department. They have regional offices responsible for road safety and design, road design. We will relay the views collected from our bus captains and our frontline people.

According to this letter, the department said the matters would be dealt with outside the working group. So we subsequently wrote to the Transport Department, listing out all the 300 cases that we have gathered over the period.

CHAIRMAN: Has anything at all been achieved about illegal parking at bus stops in the five months since March? Perhaps you can answer "yes" or "no", and then go on to explain.

MR PATRICK PANG: (Via interpreter) The simple answer is no. There has been no substantial improvement.

CHAIRMAN: Has anything been achieved about the issue of assaults on bus captains?

MR PATRICK PANG: (Via interpreter) After the last hearing,

the police communicated with us, and we once again provided detailed information about past bus captain assault cases. So the information has been passed to the police.

As I said last time, there was a case at Yau Yat Chuen, four men twice pressed the emergency button on the bus and the police took the initiative to talk to us and also the police have contacted the bus captain concerned.

CHAIRMAN: That's the total of the achievement, is it?

MR PATRICK PANG: (Via interpreter) I think in respect of illegal parking or traffic congestion, we cannot expect much to be done within such a short period of time. There's the so-called "polite passenger" campaign organised by the Transport Department to promote mutual trust and politeness, and I think this would help our bus captains in the long run.

CHAIRMAN: The other matter I would like your help on, if I can ask for it, is -- and I give you an example -- the way in which the minutes have been redacted, the minutes of the meetings of the working group.

Now, the working group has been addressing issues of training, issues of safety-related technological devices. Those are very much matters that this committee is concerned with in discharging its duties in

examining the system, regulatory system, the operation of buses, as required by the Chief Executive in the terms of reference. These are parallel, if you like, enquiries into the same issue.

Can I ask you to go to page 4926. I'm just taking this as an example. We are not dealing with a censor in wartime, blacking out material that the enemy might get hold of, are we? But when we come to the prosaic item of "Installation of seat belts for all passenger seats", page 4927, we've got half a page of black ink, and then on the next page we've got another half-page of black ink.

The more general question I would ask you is this: on what basis have these minutes been redacted? What is the logic behind it?

MR GODWIN SO: (Via interpreter) Well, it involves the remarks made by other bus companies, so, in the absence of their consent, we have to redact the relevant parts.

CHAIRMAN: So that is the basis? You have just taken out what other people have said? You are happy to tell us what you have said but you have taken out what others said? Is that it?

MR GODWIN SO: (Via interpreter) Yes, you may say so.

CHAIRMAN: So what you have taken out is what Citybus have had to say, what the Transport Department have had to

say, is that it?

MR GODWIN SO: (Via interpreter) We haven't redacted anything spoken by the Transport Department because we have asked them about it.

CHAIRMAN: So it's Citybus?

MR GODWIN SO: (Via interpreter) Yes, in my version of the minutes, that's it.

CHAIRMAN: So did you ask Citybus if you could put in what it is they said at these meetings?

MR GODWIN SO: (Via interpreter) I think it is better, more appropriate, for the Transport Department to do this.

CHAIRMAN: So the answer to my question is you haven't asked Citybus whether or not you can include what it is that they had to say so that we would get a full version of the minutes? You haven't even asked them?

MR GODWIN SO: (Via interpreter) After today, I will ask them. If they give us the permission, we will give you the full set.

DR NORMAN LEUNG: Sorry about that. The straight answer is that, Mr Chairman, we have not asked Citybus and New World First Bus for their consent to have the full text presented before you. Sorry about that, Mr Chairman.

CHAIRMAN: Thank you, Dr Leung, but, Mr So, you will now ask Citybus. If Citybus decline, please tell us, because

then we will ask them ourselves, because we might be able to save quite a lot of ink.

One final question is this. You have told us about four depots that Kowloon Motor Bus have: Tuen Mun, Sha Tin, Lai Chi Kok and Kowloon Bay. Of those four depots, are any or all of them owned by Kowloon Motor Bus or its subsidiaries?

MR ROGER LEE: (Via interpreter) Well, among the four depots, for Sha Tin Depot and Tuen Mun Depot, they are owned by the KMB. We bought it at an auction. For Kowloon Bay Depot, it has been granted to us under private treaty grant. So we paid the premium for using it as a depot. For Lai Chi Kok Depot, it is under the arrangement of a short-term tenancy with the government.

CHAIRMAN: And, as to the meaning of "short-term", can you give us some indication?

MR ROGER LEE: (Via interpreter) This is true, for the KMB Citybus and New World Bus, the government offers a site under a short-term tenancy arrangement. It depends on the duration. For Lai Chi Kok Depot, we have it renewed automatically every year. We have to pay a rent for the use of it.

CHAIRMAN: So it's an annual renewal?

MR ROGER LEE: (Nodded head).

CHAIRMAN: Yes. Thank you.

Mr Duncan, are there any matters arising from the questions asked by the committee?

MR PETER DUNCAN: Just one matter. If I may follow up the issue of women drivers, Mr Chairman.

CHAIRMAN: Yes, please do.

MR PETER DUNCAN: Thank you.

Previously, we were alerted or apprised of some of the issues that surround women drivers, and a few moments ago there was further information given with regard to how to approach that topic.

Has there been any appreciable increase in the number of women applying for positions in recent times?

MR ROGER LEE: (Via interpreter) Well, for female bus captains, it is slightly over 5 per cent as of now. Of course, it depends on the local factors. In Hong Kong, I think we have sort of half male and half female in our population. So I see a huge potential here.

Just now, to follow up on Mr Auyeung's question, we use Tuen Mun as an example, we hope that at Tuen Mun Depot, we can do something about it, and the chairman has also referred to the case in Sweden. I have also noticed that in many European countries, they are providing nurseries so that female drivers can drive. They may not be working full-time for us, but still they

can spare some time and help us out as bus captains in the short term.

MR PETER DUNCAN: Have you seen any fruits from your endeavours?

MR ROGER LEE: (Via interpreter) Indeed, there is. Personally speaking, I think in terms of stability and in terms of passenger interaction, I have a high level of hope for the women bus captains. But of course we have to get approval from the government to allow us to set up a nursery within our depot before we can move on to that.

MR PETER DUNCAN: I think my question was a little more specific. Has there been any increase, as yet, in the number of applications by women?

MR ROGER LEE: (Via interpreter) Steady. Not really an increase.

MR PETER DUNCAN: Thank you.

MR ROGER LEE: (Via interpreter) But many people did ask us about that.

MR PETER DUNCAN: Yes. Thank you, Mr Chairman.

CHAIRMAN: Mr Lee, I understand that there is a concluding statement that you wish to make at the end of the evidence. Or is Dr Leung going to make it?

DR NORMAN LEUNG: Yes, Chairman and members of the committee, I just want to say that we are grateful for

your time to receive representation from us. As I said at the outset of the hearing we came before you with a humble and receiving heart. We welcome any recommendation that will safeguard bus safety for our passengers. It has been a very educating experience to us, and in particular to our management, and so with that I ask our managing director, Mr Roger Lee, to say a few words to wrap up our representation before you.

Thank you very much, Chairman.

CHAIRMAN: Thank you, Dr Leung.

Mr Lee?

Closing statement by MR ROGER LEE

MR ROGER LEE: (Via interpreter) Mr Chairman and members, I would like to thank everybody. We fully understand, over the past period of time, that the public in Hong Kong have high expectations in relation to bus service.

In our daily operation, there are many, many challenges, in terms of recruitment of bus captains, road congestion, and then there are many social changes, and we have seen bus captains being assaulted. So in fact it is a major challenge. But still we believe we have to discharge our duty properly. We shall continue to enhance our service.

In particular, in relation to safety, I am sure

nobody from our team would give up our efforts.

For the traffic accident in Tai Po Road in February this year, it was a huge blow to everybody in the KMB, both in the senior management as well as at the frontline. No words can describe how heart-breaking it was for us. Personally speaking, ever since, I have not been able to let it off. We won't allow the accident to happen again and we don't want this to happen again. This is one too many.

Since the accident, we come to recognise that there are inadequacies in our work. We haven't stopped in making improvements.

In the process of giving evidence, we come to realise that KMB must progress with the times. We have to do more in this regard to enhance our service. Say, for example, in terms of the use of technologies, we need to be comprehensive, and we have to aim at precision and we have to work more on our safety system, and we need to catch up with the times.

Now I turn to the bus captains. The management of bus captains, the training of bus captains, are areas that we need to improve. And in terms of our facilities -- and in fact just now we have talked about the rest facilities as well as the toilets -- well, in fact we haven't stopped making improvements in such

areas. The KMB has been serving the Hong Kong citizens for 85 years as a bus company. Indeed, it is our duty to be fully dedicated in serving the public.

Whatever that our passengers or staff need, it is our duty to meet their requirements, but at the same time it takes more than the KMB on its own to do the job. We need the support and coordination of the government departments, and then we can be effective in service enhancement.

Finally, our team as a whole are most grateful to the committee for your past work as well as your work in the future.

As our chairman has said in the opening remarks before you, with a humble heart and with the greatest sincerity, the KMB team will be open to different recommendations and suggestions.

Thank you.

CHAIRMAN: Dr Leung and Mr Lee and gentlemen, thank you for attending now for four days to assist us with your evidence. We are grateful for that, but these proceedings are now concluded. We have other evidence to take on Saturday, typhoon willing. Thank you for your attendance.

(3.43 pm) (The hearing adjourned until 10.00 am on Saturday, 15 September 2018)

Examination by MR PETER DUNCAN (continued) 1

Closing statement by MR ROGER LEE 112

[Blank Page]

2018 年 9 月 12 日

上午 10 時正恢復聆訊

出席人士如前。

主席：（經傳譯員）各位早晨，梁乃鵬博士早晨，各位先生早晨。鄧樂勤大律師。

MR DUNCAN：（經傳譯員）多謝你，主席。早晨，梁博士，早晨，各位先生。首先我想講一講就係我哋係確定係收到大量嘅材料嘅，呢個係嚟自你哋公司，就係自從上次召開聆訊之後，你哋一直都畀咗好多文件我哋嘅，亦都多謝你哋係提供咗呢啲資訊。喺第十四日結束嘅時候，我當時係問咗你哋一啲問題嘅，呢個係關於就係話一啲裝置嘅，譬如話係提醒唔好撞車同埋係保持喺行車線嗰度呢一啲裝置，當時就梁先生話畀我哋聽就係公司當時係有做過呢一個研究嘅，就係貝爾法斯特嘅 Queen 大學嘅，呢個就話係去年嘅秋天所做嘅事，即係話到而家大概有一年嘅時間。當時你哋亦都同我哋講過，就話你哋會留意市場個情況，睇下有冇一啲第三方嘅產品係可以用得著嘅。

委員會係知道市場係有咁樣嘅性質嘅產品嘅，佢個名--即係個產品個名叫做 Mobileye，我就想問下你哋公司知唔知道係有呢一類嘅裝置呢？即係叫做神眼嘅呢個 Mobileye。

梁健宏先生：我哋知悉嘅。

MR DUNCAN：（經傳譯員）想問下，你哋有冇諗過係用呢一啲咁樣嘅裝置呢？

梁健宏先生：會嘅。

MR DUNCAN：（經傳譯員）係咪仲未開始做呀？

梁健宏先生：其實我哋 2014 年同 Mobileye 亦都試過㗎喇，2014 年我哋就同 Mobileye 亦都試過一個類似嘅計劃，試過嘅，當其時嘅成果就唔係幾理想，就當然技術會改善嘅，我亦都係開始聯絡--再聯絡佢哋嘅。

李澤昌先生：呢度都有少少可以補充，其實我哋今日其實已經採用緊一間公司，一間澳洲嘅公司就喺我哋嘅車上面都做緊一啲近乎 Mobileye，即係其實係等於車長喺行駛嘅時間，如果係有啲瞌著眼瞓咁，就會提醒佢。呢個喺我哋係喺呢個做緊個 chart 嘅，亦都同一時間，我哋亦都搵咗一間日本嘅公司，過去嗰兩年係都同--睇緊有咩嘢即係近似合適嘅嘢，喺車長行駛嘅時間有咁嘅狀況，即係我哋所謂叫“fatigue”，就希望可以幫到佢哋，過去嗰兩年其實係頭嗰年就係困難嘅，因為喺香港嘅道路上邊其實行長途嘅時間同埋行短途，特別喺繁忙嘅路段，車長佢嗰個頭嗰個轉動比較多，所以好難好精準睇到佢嘅眼，例如同啲乘客有交流或者喺轉彎嘅時候，其實係困難。

所以其實香港嘅道路係搵一個好第三者嘅一間公司去做到呢個 fatigue 呢個係困難，所以我哋亦都喺--而家喺 Belfast 喺北愛爾蘭嗰個 Queen's University，我哋都好斟酌研究嗰幾樣嘢，一，就係喺車長喺無意中轉線嘅時候而係冇一個好合理嘅理由，呢個提醒佢，或者喺同前車太近個速度去提醒佢。我覺得呢個係一個整體上嘅研究嚟嘅，當然日本嗰個牌子我哋應該喺今年或者下年年初有機會再試，澳洲嗰個牌子而家試緊。

Mobileye 我哋曾經睇過，好似梁生講，但係呢個--暫時呢個我諗係唔適合。

主席：（經傳譯員）你講緊好多不同類型嘅裝置㗎嘛，同埋係譬如話你話 Mobileye 6 同埋佢係咪一個係防撞--另外仲有一啲係防碰撞嘅裝置？因為佢會睇你個車速㗎嘛。另外你亦都係話有一個裝置係避免啲人係瞌眼瞓嘅。

李澤昌先生：Okay，呢個基本上有兩樣唔同嘅嘢嚟嘅，Mobileye 就係--或者係我哋試緊嗰兩隻係望住個車長佢嗰個眼神或者個面部有啲咩嘢令到佢覺得係可能係瞌著咗，就然後有一啲方法係搞醒佢。另外嗰種就係喺架車裏面有個 sensor，而呢個 sensor 係同你前車之間個距離有幾遠，而佢可以知道你當其時你架車嘅車速，因為每一架車嘅車速，佢有一個既定嘅所謂叫做“braking distance”，即係話你行緊某一個公里嘅時間，你如果喺嗰陣時急剎，你同個前車有一個合理嘅距離仲係安全嘅，如果佢量度前車嘅距離係好近，而你嘅車速去到某個階段，係基本上係即係唔係好理性嘅，呢個就係一個--即係喺另外一樣嘢，其實係整體上一套嘢嚟嘅。我哋係喺研究喺呢兩套，我哋都會做。

MR DUNCAN：（經傳譯員）希望我哋就唔會係有乜嘢混亂，我就想講下，不如先集中就係防碰撞同埋保持行車線呢一啲產品，然後之後先至再係睇嗰啲係防止瞌眼瞓嘅裝置。

梁健宏先生：可以。

MR DUNCAN：（經傳譯員）講到話係避免碰撞同埋保持行車線呢啲裝置，我諗你較早時候有講過嘅，就話再睇番係咪可以搵番呢個 Mobileye 呢個裝置嘅，咁講啱唔啱？

梁健宏先生：我哋會參考尤其是我知道其他啲 operator 都係試緊佢嘅，我哋都理解下對方嗰個試驗個情況如何，除咗我哋喺 Queen's University 嗰個研究之外，我哋都會保持開放嘅態度，理解下 Mobileye 而家嗰個功能係點樣樣。雖然之前嗰個經驗就未必啱用，但係我覺得都可以去睇下佢嗰個狀況。

MR DUNCAN：（經傳譯員）我想問開始咗未呢？搵番呢個 Mobileye 未呢？

李澤昌先生：未。

MR DUNCAN：（經傳譯員）你係咪打算咁做呀？

李澤昌先生：暫時我哋係都係喺純粹喺文件裏面睇緊佢個發展，係冇直接同Mobileye呢間公司有任何嘅對話，因為頭先都講咗其實Mobileye嘅公司佢做嘅嘢市面上都有好多係可能比佢適合我哋嘅，所以我哋係睇多幾款嘢，就亦都我哋自己亦都研究緊。

MR DUNCAN：（經傳譯員）好，想問有冇同任何嘅供應商係傾談緊就係關乎呢啲防碰撞嘅設施呢？

李澤昌先生：有，有一間澳洲公司，正正講咗我哋已經係研究緊㗎喇，用咗佢嘅產品係試驗緊，喺一間日本公司，我哋亦都有同佢哋已經有直接係有對話，係發展緊係做緊佢嗰套新嘅儀器，亦都頭先都講咗，我哋自己亦都研發緊嗰個collision，嗰個同Mobileye有少少唔同嘅嘢，亦都係啱啱講緊喺北愛爾蘭我哋亦都做緊。

MR DUNCAN：（經傳譯員）唔該。係咪可以講畀我哋聽澳洲公司嘅名？

李澤昌先生：（經傳譯員）可以嘅。

MR DUNCAN：（經傳譯員）邊間呢？

梁健宏先生：嗰間就係Guardian嚟嘅。

MR DUNCAN：（經傳譯員）日本公司個名呢？

梁健宏先生：Denso。

主席：（經傳譯員）可唔可以重複你個名？

梁健宏先生：日本間公司就係Denso，D-E-N-S-O，Denso。

MR DUNCAN：（經傳譯員）請你再串一次個名。

陳祖澤先生：D-E-N-S-O。

MR DUNCAN：（經傳譯員）講番呢個Queen's大學嘅研究，其實你上次都有講過㗎喇，就話大概一年之前開展嘅，我想問而家去到咩嘢階段呢？

李澤昌先生：首先，佢哋Queen's University嘅professor應該--我記得係應該上個月，上個月就佢哋亦都過咗嚟我哋九巴，就睇過我哋公司一啲我哋喺嗰個營運上嗰啲，即係喺架車裏面嗰個營運嘅情況，我哋亦都派咗我哋一個工程師去咗北愛爾蘭，喺--應該係已經開始同佢哋一齊研究緊，好快嘅將來，應該係呢一、兩個月，佢哋亦都會有啲即係做research，喺個university嘅research亦都會base喺我哋呢邊一段時間，係睇緊香港嗰個道路嘅情況，而家暫時去到呢個階段，我自己個人都會喺下一、兩個月會去一去呢個Queen's University睇下佢哋個update。

MR DUNCAN：（經傳譯員）你預期幾時會做完個研究？

李澤昌先生：暫時個時間表係好 tentative，係出年嘅 summer，但係就當然係要睇嗰個進展嘅情況。

MR DUNCAN：（經傳譯員）喺呢個階段講到嗰個研究，可唔可以話到畀我哋聽你預期到時會有啲咩嘢嘅結果呢？

李澤昌先生：我要返去 check 一 check 佢發展到咩嘢階段，當然絕對嗰啲出嚟嗰啲結果係可以同呢個 committee 一齊分享嘅。

MR DUNCAN：（經傳譯員）但其實我個問題就問你而家做緊研究，你覺得係你都抱有希望定抑或你有啲乜嘢係預期嘅結果呢？

李澤昌先生：其實喺文件裏面，我哋應該係交咗呢一個研究，呢個 ADAS 呢個東西係咩嘢嘅東西，其實已經係文件上係有嘅。

MR DUNCAN：（經傳譯員）你是否樂觀呢？即係今次嘅研究係會得出一個有效嘅裝置，避免碰撞同埋保持行車線，你樂觀定唔樂觀呢？

李澤昌先生：我只可以咁講，Queen's University 佢嗰個 mechanical 嗰個部門係好少一間大學係願意做一啲同雙層巴士或者 city bus 有關係嘅研究，呢個其實都係比較係一啲好特殊嘅，亦都正正喺英國，亦都有好好嘅環境畀佢從一個歐洲嗰個角度去睇呢樣嘢，我哋作為一個全世界都算係一啲大嘅 bus operator，我當然對佢好大嘅期望。

MR DUNCAN：（經傳譯員）好喇，我哋不如唔講呢個防止碰撞同埋保持呢個係行車線，而家就講話防止就係呢個巴士司機就係瞌眼瞓嘅，你剛才就係講咗少少呢一方面嘅情況㗎喇。喺呢方面係想請你睇番 KMB 文件夾 1，想請你睇番 115 頁，喺 115 頁嗰度，你見到呢個就係你哋公司提交畀運輸當局嘅一份報告嘅最屘嗰頁嚟嘅，就係其實--屘二嗰頁嚟嘅，其實就係大埔車禍之後你哋提交嘅調查報告，屘二嗰頁嘅，喺第 47 段，115 頁，嗰度個標題就係話車長係瞌眼瞓，你呢度就話九巴目前就進行緊一個測試嘅，就係有一個供應商就係有一啲係會監察車長嘅昏昏欲睡嘅情況，如果係揸緊車係有咁嘅情況，就會睇下佢哋就係有幾警覺，會唔會佢哋有呢個微睡眠嘅情況，如果係成績係滿意嘅話，就個系統就會安裝喺九巴嘅巴士上面嘅。

我就係想請你睇一睇工作小組其中一項嘅建議，呢一個就係 TD-1 嘅文件夾嗰度嘅，運輸署嘅文件夾 1，係 406 頁嗰度嘅。為咗紀錄起見，我就將佢讀出嚟，呢個係工作小組所提出嘅一個建議嘅，就係監察司機嘅裝置，呢一啲裝置就會係監察車上嘅車長嘅情況，就睇下佢係咪警覺嘅，如果佢就唔留意又或者譬如話佢係周圍望、瞌眼瞓、係昏昏入睡或者係姿勢唔好，個系統就會就係有啲視覺嘅警告同埋亦都會有個聲音嘅警示嘅，呢一個市場係有嘅，用佢嚟到去進行一個試驗計劃，睇下佢有冇效係運輸署嘅建議嚟嘅。

我就想問，講番呢個係調查報告嘅第 47 段，我想問，你呢度講話供應

商，究竟係邊一家嘅供應商呢？因為你進行緊呢個試驗計畫，可唔可以講呢？

梁健宏先生：個公司名就係 Seeing Machines，佢個 product 個名就叫做 Guardian。

MR DUNCAN：（經傳譯員）好，唔該。可唔可以話畀委員會聽就係你呢度所講嗰個測試究竟而家進展如何呢？

彭樹雄先生：Mr Duncan，或者我講一講我哋嗰個測試嗰個嘅進程，我哋喺今年嘅6月底，我哋就將呢一個 Guardian 嘅 system，我哋就裝咗落四架巴士裏面，其實就唔同廠嘅，因為我哋唔同廠都有啲比較長途嘅巴士線，當中包括沙田廠有兩部、屯門廠有一部、龍運巴士亦都有一部，初步嘅測試嘅結果都係有效嘅，係有效嘅，亦都係可以偵測到譬如話個車長係如果佢瞇埋眼係比較眨眼長嘅，其實嗰個 system 係會 alert 到嘅，有聲同埋喺個耳背後面會震動嘅。

我自己本身都測試過兩部巴士，一部就係屯門廠嘅，一部係沙田廠嘅，我哋初步覺得有效嘅。但係因為呢一個嘅系統佢係會掃瞄你嘅五觀嘅，亦都我都知道廠亦都同我哋講，因為呢個 product，呢個係喺澳洲嘅，澳洲其實同我哋初步嘅發現都係就係喺某啲情況底下，如果個車長，舉個例係側頭同啲乘客係去有眼神接觸嘅時候，佢嗰個 facial detection，即係嗰個就可能會有少少係 detect 唔到，佢就會有少少會震動嘅。呢個其實我哋明白嘅，但係總整嚟講，我嘅接觸我哋嘅車長，我哋啲工會嘅工友其實對呢一樣嘢都係正面嘅。我哋亦都將呢一個嘅測試就再擴展到搵多啲嘅唔同嘅車長係繼續咁測試嘅，Mr Duncan，多謝。

MR DUNCAN：（經傳譯員）你認為個試驗會幾時完成呢？

彭樹雄先生：我哋而家啱啱喺 8 月中--我哋由 6 月底就試咗一班嘅車長，我哋而家試緊第二班嘅車長，好 likely，好大可能我哋會喺今個月底做埋呢一輪嘅測試，我哋其實係準備咗一啲嘅問卷嘅，即係睇一睇嗰啲車長嗰個嘅反應，然後我哋喺月底，我哋會做一個決定，我哋會唔會再--除咗呢四部，我哋再訂多啲，喺唔同廠繼續咁樣測試，然後 by phases，睇下點樣可以推到出嚟。

MR DUNCAN：（經傳譯員）根據你所講，呢個裝置就將會係被採用嘅，係咪？

彭樹雄先生：如果睇番而家我哋嗰個測試嘅成效，我哋覺得係 positive 嘅，正面嘅。

李澤昌先生：呢度有少少補充，其實每一件可以幫到嗰個交通路面嗰個安全，我哋一定都會去嘗試，與時並進，我諗每一件新嘅嘢都會越嚟越好，我諗我哋一定會係有啲開始嘅。

主席：（經傳譯員）Guardian 呢一個裝置都係有喺新加坡採用嘅，係咪？

彭樹雄先生：主席，我知道澳洲係有用緊嘅，但係新加坡就應該就我嘅認知就應該

未。

李澤昌先生：新加坡應該係未正式開始用嘅，不過就...

主席：（經傳譯員）我哋可以再睇呢一點，因為根據我嘅記憶，新加坡已經係用咗呢個裝置好幾年㗎喇，呢個就係喺呢個 Sandilands 嘅電車嘅意外之後就係建議採用呢一個裝置嘅，完成嗰個調查之後，就係開始用咗呢一個裝置。

李澤昌先生：嗰個係火車，呢個唔知。

主席：（經傳譯員）我哋有嗰份報告嘅，都可以同你去分享。

李澤昌先生：但係有一點想講，係因為其實我哋喺兩、三年前都係好積極睇緊呢樣嘢，但係因為喺火車又好，喺啲大嘅 coach 又好，其實係用緊嘅，火車--搽火車嘅時候，有啲人係會仍然瞌眼瞓，搽大貨車亦都好多人容易瞌眼瞓，其實喺好多城市，呢啲已經係好 widely 用緊嘅，其實 metro--即係 city bus 今日面對嘅問題，就係長途嘅巴士，即係譬如去機場嗰啲，我覺得呢一套嘢係應該係--應該有一個好重要嘅功能我哋一定會係睇到佢個好處，但係喺好繁忙嘅地方，因為佢成日要睇交通燈，睇啲路面嘅行人過馬路，因為佢個頭比較郁得多，所以呢一個我哋係要好小心處理，否則嘅話，就會令到啲車長好受滋擾，所以我點解講係喺北愛爾蘭做緊個研究同埋喺日本 Denso 做緊嗰個嘢，正正就係處理緊呢一個問題。

我相信呢個 Guardian 係應該係某啲路線係用到嘅，所以我正正講就話我哋一定會喺唔同--即係唔同嘅嘢放喺唔同嘅身上去處理今日九巴嗰個問題裏面。

MR DUNCAN：（經傳譯員）點解唔同嘅路線會影響到你嘅決定呢？

李澤昌先生：因為喺啲--譬如喺市區嘅繁忙嘅路段，因為個車長個頭部個郁動比較大，而佢要睇紅綠燈，睇唔同嘅路面嘅情況，特別又多彎位，佢嗰個情況係同走一條大直路好唔同，譬如假設你去機場，行一條機場嘅公路，其實佢行緊嗰 50 公里，基本上架車係一條行車線上邊，佢個頭嘅郁動基本上係冇嘅，連埋站嘅機會都好少嘅，所以有啲相似火車，有啲相似嗰啲長途嘅大嗰啲 coach，或者嗰啲貨櫃車。

MR DUNCAN：（經傳譯員）我而家就唔再講呢啲防打瞌眼瞓嘅裝置，我而家想講下安全帶嘅，我想你睇番呢一個調查報告嘅，或者我哋先睇工作小組嘅建議，呢個就係 TD-1 文件冊，就係 407 頁嘅。

主席：（經傳譯員）呢啲就係呈交畀立法會，喺今年嘅 7 月 25 號嘅一啲建議嚟嘅，啱唔啱呀？

MR DUNCAN：（經傳譯員）（經傳譯員）正確嘅，主席，403 頁係有提到呢一點。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）首先就係呢一個講安全帶嘅部分，就係 407 頁嘅頁底，然後一直去到第 410 頁嘅，我想你睇下第 16 段，呢一段就係有啲建議，同埋未來嘅路向，然後第 16 段就話「根據以上第 10 至 15 段所講，工作小組就係得出以下嘅建議，目的就係去更加--即係為一啲坐低嘅乘客提供更加多嘅保護嘅：首先，所有嘅--即係以後一啲新買嘅巴士必須要喺所有座位提供安全帶；而第二點，就係之後進一步嘅技術，營運同埋財務嘅可行性研究之後，可以考慮喺上層嘅所有座位係安裝安全帶嘅，呢個就係講緊係某一啲嘅巴士路線。」

呢個就係一啲建議。我而家就請你睇番調查報告，就係今朝早前有提到嘅，呢個就喺 114 頁，第 40 段就係其他改善巴士安全嘅措施，根據報告，就話九巴已經係要求佢嘅供應商係喺所有喺 2018 年 3 月 5 號之後訂購嘅新巴士入面係所有座位都安裝安全帶嘅，而一啲現有巴士方面，如果某啲嘅路線有要求嘅話，喺九巴巴士嘅上層座位係會局部去安裝安全帶嘅。

如果我冇理解錯，根據調查報告佢所講，係同工作小組嘅建議係一致嘅，首先喺呢一啲現有巴士安裝安全帶嘅工作係咪已經開始咗？

李澤昌先生：因為其實喺上層要安置呢個安全帶最主要嘅問題就係嗰個技術性，係嗰個 gravity 嘅問題，政府已經開始同我哋係做緊一啲--問一啲資料，亦都係嗰個供應商亦都做緊呢個技術嘅研究，到今日為止，其實都仲係正面嘅，係正面嘅，因為佢最擔心就係因為嗰啲安全帶係比較重，佢擺咗喺上邊嘅時候，因為嗰啲係 retrofit 嘅關係，佢--因為佢個政府要做嗰啲叫 tilt test，將架巴士係可以嗰個重心嘅問題，其實個技術性如果係做到嘅，就應該絕對唔係一個問題，但係而家喺主要嗰兩大嘅供應商，Volvo 同埋呢個 ADL，就暫時都係好正面嘅，就當然係要 subject to 到最後係擺咗上去，做咗個 tilt test 嗰個為準。

MR DUNCAN：（經傳譯員）你可唔可以同委員會講一講，喺財政上如果要安裝一啲--即係喺現有巴士安裝安全帶會有啲--成本係幾多呢？

李澤昌先生：其實係一個唔平嘅一個嘅東西嚟嘅，應該可以咁講，喺今年嘅年頭，我哋公司個 special committee 已經好清楚畀咗個指引畀我哋，我哋 2019 年嘅新車係全車安裝呢個安全帶，同埋 retrofit 裏面，我哋儘量配合政府，可以嘅話，特別係長途車，我哋會喺樓上係配置安全帶，因為我哋個 special committee 清楚嘅就係話交通意外係比我哋使任何嘅費用係更加高昂，所以我哋係--暫時我哋係冇從呢個角度去睇，因為我哋就係想--唔想再見到有啲意外。

Financial 嘅 implication，我諗我哋係--暫時我哋係冇睇到呢樣，但係當然一條安全帶大概係二十萬一架巴士，喺 retrofit 嗰度，二十萬。

主席：（經傳譯員）呢個係講緊上層嘅，係咪？

李澤昌先生：（沒有可聽到的回答）

梁健宏先生：（沒有可聽到的回答）

主席：（經傳譯員）唔該。

MR DUNCAN：（經傳譯員）大概會喺幾架現有嘅巴士度安裝安全帶呀？

梁健宏先生：我諗接近有三千部喽喇。

李澤昌先生：長途巴士喎。

MR DUNCAN：（經傳譯員）我係想計一計啫。

李澤昌先生：唔係，唔係，我想補充少少先，而家我哋現在有大概係四千二百部--四千二至四千三，即係話九巴再加埋龍運，其實佢裏面已經有一部分嘅巴士已經配置晒安全帶㗎喇，亦都有啲巴士係嗰個--即係隨住退役嘅關係，嚟緊呢幾年，其實我哋因為退役嘅車，如果有架新嘅車到，嗰啲未必係需要係配置安全帶，即係話兩、三年退役嗰啲，嗰啲未必需要。如果你睇長途嘅巴士，我喺呢度冇一個好準確嘅數字，大概有三分一嘅線係跑長途嘅，你即係當佢係大概一千鬆啲左右。

MR DUNCAN：（經傳譯員）喺新嘅巴士...

主席：（經傳譯員）鄧大律師，喺你繼續之前，李先生之前就話會喺三千六百架長途巴士度安裝安全帶，而家你係咪更正個數字應該係一千呢？

梁乃鵬先生：Yes.

李澤昌先生：（經傳譯員）冇錯。

主席：（經傳譯員）鄧大律師。

MR DUNCAN：（經傳譯員）我都係想計番啱啲數啫。一千架巴士，每架二十萬？

陳祖澤先生：Yes.

MR DUNCAN：（經傳譯員）就係總共要二億嘅，係咪？

梁乃鵬先生：Yes.

MR DUNCAN：（經傳譯員）有冇同政府傾過呢個成本嘅問題呢？

李澤昌先生：No.

主席：（經傳譯員）：梁博士。

梁乃鵬先生：（經傳譯員）我想補充一下，最近我係有同政府官員見面，我同佢哋講--即係我問政府可唔可以為我哋提供任何嘅補助，即係就住呢個加裝安全帶，個反應都係頗正面嘅。

主席：（經傳譯員）你同邊個係有呢個對話？

梁乃鵬先生：（經傳譯員）主席，呢個就係運房局常任秘書長黎以德，另外就係有呢一個運輸署嘅副署長嘅。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）你哋公司之前有冇聯絡過政府係要求一啲嘅資助或者係津貼呢？目的就係為咗現代--令到你哋嘅車隊更加現代化。

梁乃鵬先生：（經傳譯員）我哋有同佢哋講過加裝安全帶嘅問題。

MR DUNCAN：（經傳譯員）我咁理解啱唔啱呢？係新嘅巴士係會係上層同埋下層都安裝安全帶嘅，係咪？

梁乃鵬先生：Correct。

MR DUNCAN：（經傳譯員）你哋有冇考慮乘客會唔會真係用啲安全帶呢？

李澤昌先生：其實我哋做咗一啲有啲即係好比較係籠統嘅--即係啲大眾點樣睇呢個安全帶，喺坐短途嗰啲，其實就唔係特別多人用，特別係樓下嗰層，長途嗰啲係比較受歡迎嘅，但係都唔係話講緊一個好多人特別覺得係好接受，明白嘅，因為其實係比較係麻煩嘅。但係我哋個睇法就係呢個個趨勢係--特別係長途嘅巴士線係會越嚟越重要嘅。因為每一個人上巴士嘅時候佢有個選擇就係話如果佢想瞌一瞌嘅時間，特別係長途，佢有條安全帶係畀佢一個選擇。當然我希望呢個數字會越嚟越多，今日個數字唔係一個太過受歡迎，但係我覺得係嗰個越嚟越呢個趨勢嘅話，我哋覺得我哋作為九巴，應該係好接受嗰個改變呢樣嘢，因為最後都係講緊一個安全嘅一個裝置嚟。

MR DUNCAN：（經傳譯員）九巴有冇考慮過喺使用安全帶可能會係需要立法呢？即係換句話講，係強制乘客係使用安全帶呢？即係如果係有提供嘅話？

李澤昌先生：呢個係有個難度嘅，因為香港嘅巴士係有企位嘅，所以如果你喺有一個法例上要做呢樣嘢，一，佢企位係一個問題，第二，就係嗰個 enforcement，因為個車長亦都今日係同乘客之間亦都好多滋擾。我自己公司就冇一個特別即係係咪呢個立例去做，但係就我覺得今日嚟講，我哋一定好覺得係安置安全帶有呢個選擇畀市民大眾係一件正面嘅嘢，呢個係我哋嘅睇法。

MR DUNCAN：（經傳譯員）唔該晒。而家我哋就唔再講呢一個安全帶嘅問題，我就想講另一個話題，我就請你攞去 KMB-4 文件冊。我就請你攞去 1182 頁，呢個就係文件冊嘅 1182 頁，呢一個就係上市公司全年報告嘅一部分，呢個就係 2012 年，呢個就係載通國際控股有限公司嘅，然後呢一頁你哋見到就係董事嘅名單，你就會見到呢個獨立非執行董事嘅名單，然後你哋就會見到梁博士同埋陳博士同埋李家祥博士嘅，同埋蕭炯柱先生，同埋廖柏偉教授嘅。

我想請你而家睇一睇 KMB-5，請睇 1896 頁，呢個係有個董事嘅名單，呢

個 2016 年年報列出嚟嘅名單，我哋可以睇到呢度有打咗粒星嗰啲名，嗰啲係獨立非執行董事嚟嘅，梁博士、陳博士、李先生、蕭先生同埋廖教授，我就唔會逐個年報睇，即係 2012 到 2016 年嘅唔同嘅年報，我諗你可以證實係冇變到嘅，即係話獨立非執行董事响嗰幾年係冇改變嘅，啱唔啱？

梁乃鵬先生：（經傳譯員）冇錯嘅，冇錯嘅，鄧生，冇錯嘅。

MR DUNCAN：（經傳譯員）而家我想請你又睇到去 KMB-6 2108 頁，呢度係董事嘅名單嚟嘅，2017 年嘅名單嚟嘅，我哋睇到呢一頁 2108 頁，董事有改變喇，蕭岡柱先生就唔再係獨立非執行董事。

梁乃鵬先生：（經傳譯員）講得啱嘅，係，冇錯。

MR DUNCAN：（經傳譯員）曾偉雄就做咗係獨立非執行董事。

梁乃鵬先生：（經傳譯員）係，冇錯嘅。

MR DUNCAN：（經傳譯員）我想問幾個問題嘅，關於呢啲獨立非執行董事嘅委任，我希望你明白，我係非常之尊重嗰啲過去擔任過或者而家仍然擔任過獨立非執行董事嘅各位董事嘅，咁樣講啱唔啱呢？冇任何一個獨立非執行董事係有安全嘅事務方面嘅背景嘅呢？

梁乃鵬先生：（經傳譯員）如果淨係講安全方面嘅背景，我哋--我個人就參與咗呢個巴士嘅運作好多年㗎喇，我係做咗九巴董事好多年，自從 2000 年，即係十七年，做咗十七年，當然我哋係好關心新嘅巴士，我哋知道我哋要為改善嗰個巴士，採用最新嘅型號，採用最新嘅科技，好多時候新嘅巴士係會有我哋所講嘅即係安全嘅裝置，我哋就唔會係節省我哋呢方面嘅開支，我哋不斷咁樣嚟到係改善，由歐盟 4 型、5 型，而家去到歐盟 6 型，即係話用一啲最新科技嘅新巴士，我哋就會採用嘅。我哋就要保證我哋採用嘅係可以搵到嘅最好嘅巴士，九巴、龍運，我哋都會採用呢啲新嘅巴士嘅。

MR DUNCAN：（經傳譯員）我哋都知道有新人士加入，就有一啲新嘅意念。

梁乃鵬先生：（經傳譯員）冇錯，冇錯。

MR DUNCAN：（經傳譯員）公司有冇咩嘢政策係關於你要幾耐就要有新人委任，希望有啲新嘅諗法、新嘅意念，即係點樣委任新嘅董事呢？有冇咩嘢政策嘅呢？

梁乃鵬先生：（經傳譯員）我哋有啲係董事局嗰啲委員會嘅，唔同嘅董事就响唔同委員會嚟到係參與工作嘅，特別係我哋就住佢哋嘅專長，所以你見到陳生之前係董事總經理，係九巴嘅同埋龍運嘅，所以我哋要求佢就响呢個董事局嘅常任或者係執行嘅委員會做事嘅，佢亦都喺一個提名委員會度工作嘅，同埋嗰個係薪酬委員會，佢都係成員嚟嘅。廖柏偉教授，佢係一個係好出名嘅經濟學者嚟嘅，佢就响董事局係向董事局提供一啲關於公司嘅策略嘅發展嘅意見，呢啲我係作為一啲例子咁樣提出嚟嘅，鄧生。

MR DUNCAN：（經傳譯員）多謝你，梁博士。我想講番之前提過嘅一件事，或者之前一個第十三日嘅研訊嗰日提過嘅，有關嘅課題就係話實時監察嘅系統嘅，第十三日我哋提過呢件事嘅，當時我個具體嘅就係同你提出，同埋向九巴嘅代表提出，我哋同呢個係程艾樂先生收到一啲證供嘅，你記得程生嘅證供，或者畀一個參考編號，呢個第十三日嘅，41 頁，佢提出嘅證供就係話 2014 年--呢個其實係一個係佢證供嘅摘要嚟嘅，佢所講嘅 2014 年公司曾經考慮過一個工程嘅，呢個係話會用實時監察巴士車長嘅行為嘅，跟住呢個計劃就取消咗，你記唔記得當時我同你提過佢有咁樣嘅作供㗎，你記唔記得？你記唔記得我提過呢件事呀？

梁健宏先生：有。

MR DUNCAN：（經傳譯員）你當時嘅回應，梁先生回應，如果我冇理解錯，理解得正確嘅話，程生所講嗰個計劃係一個實時嘅營運嘅管理系統嘅，呢個同安全駕駛係冇關係嘅，你記唔記得？當時係梁先生話畀委員會聽嘅。

梁健宏先生：嗰度係講緊有個 real-time alert 畀嗰個車長，就住佢嗰個 speeding 或者 sudden acceleration 同埋 harsh braking。

MR DUNCAN：（經傳譯員）冇錯嘅，你記得喇，當時即係話呢位程生所講嘅嗰個計劃係其實係一個實時嘅營運嘅管理系統嚟嘅。

梁健宏先生：係嘅。

MR DUNCAN：（經傳譯員）為我哋嘅紀錄清楚，呢個我係講清楚，係第十三日，第 41 頁，第 10 到 14 行同埋 42 頁第 23 行，呢方面有啲分歧，好明顯，當時主席要求你提供--向委員會提供你哋有冇啲講解嘅材質，即係响考慮呢個項目、呢個計劃，即係程生所講呢個工作計劃或者工程嘅時候，有冇咩嘢講解嘅使用嘅呢？同埋係你自從上次我哋開完會之後，你就記唔記得係有冇呢啲咁樣嘅材料畀到我哋呀？

梁健宏先生：我哋係畀咗一啲資料畀個 board 嘅，我知道。

MR DUNCAN：（經傳譯員）我就想就住呢啲咁樣嘅資料，就講一講嘅，同埋澄清一下嘅，如果可以嘅，請大家睇 KMB-11，請大家睇 4492，4492 呢一頁你見到嗰個封面，呢個文件嘅封面，九龍巴士公司（一九九三）有限公司係嗰個系統嘅標準，呢個係為嗰個 ROM，即係實時營運管理系統，呢份文件就由 4492 呢一頁一路可以去到 4530，如果我冇理解錯誤嘅話，响 4493，呢個係嗰個目錄，係呢個係呢份材料嘅目錄，第 II 部係簡介同埋工作嘅規模、範圍。

跟住我哋睇下 4495 有啲詳細嘅資料，就係話簡介同埋嗰個工作嘅規模或者係範圍，就第 II 部，1，簡介，我想你請睇 1.4 呢一段，主要嘅呢個係實時管理系統就係幫助嗰啲控制室嘅人嚟到係响嗰個巴士總站營運、操作嘅時候係調配嘅，調配啲巴士幾時離開同埋處理特別嘅情況同埋服務有冇受到需要終止

嘅情況點樣處理。1.4.3 就係話同司機嚟到係溝通，通過係語音、文字或者聲音嘅錄音嚟到係發布一啲畀巴士車長知道需要嘅資訊或者特別嘅訊息嘅。

呢度係咪有一個實時同車長--即係話同响你哋嘅總部同巴士車長有冇實時溝通，有冇呢個咁樣嘅部分㗎？

梁健宏先生：呢個係我哋稍後做咗 ROM，係冇呢個--冇呢樣嘢嘅。

MR DUNCAN：（經傳譯員）程先生就係話，佢話當時有考慮過呢個做法，但係之後就取消，佢話實時同車長溝通係咪當時嘅考慮要做嘅一部分呢？

李澤昌先生：或者等我講，我諗上次我哋個 Operation Director 都講得好清楚，佢呢個咁嘅功能係主要係一個中央有一個控制嘅中心，係提示個車長佢行車嘅速度，甚至乎喺一啲巴士站嘅時間佢係要停一停，隔番喺前面行車之間嘅距離，令到嗰個 management 嘅 fleet 係會嚟得比較--唔會一堆嚟，一堆走，當然呢個溝通裏面亦都可以作出咗一啲同個車長之間嘅提示。

上次都講咗，係我哋覺得喺當車長行駛嘅時間，實在令佢分心亦都係唔係一件恰當嘅事；兼夾呢個系統亦都可以係作嚟係取替咗喺巴士站頭裏面嘅站長嘅功能，呢個我哋覺得係亦都確實係有個難度嘅，最後我諗喺 2014 年嘅時候，就呢個計劃係擱置咗。所以亦都冇一個中央嘅系統同嗰個車長喺行駛嘅時間有呢個對話，就變咗採用番，update 番喺巴士站頭嘅站長個功能，會令到佢更加完善同埋妥善咗。

MR DUNCAN：（經傳譯員）我而家唔係講緊嗰個結論，我係想問有冇--當程先生當時考慮--佢話佢負責埋呢方面嘅考慮個工程，係咪其中一部分就話應該有實時同巴士司機--巴士車長嘅溝通，嘅溝通嘅內容係關於佢哋嘅嗰啲行為，就包括有冇超速，我有冇理解錯誤呢？呢度 1.4.3，起碼呢度--响呢一部分係當時曾經考慮嘅一部分，先唔好講咩嘢結論。

李澤昌先生：當然呢度寫得出，我諗應該喺嗰段時間，係有咁嘅考慮嘅，當然嗰陣時做呢個 project 嘅時候，我諗應該 back date 番去 2013、2014 嘅時候，喺當其時，嗰個睇法應該係用一個比較喺中央嘅形式，令到呢個所謂叫做 real time operation 嘅 management 係全面啲，係令到車長同埋嗰個中央嗰個方法，我唔知係咪因為--或者嗰陣時嘅時候係有咁嘅睇法，但係因為而家我哋講嘅 real time 同車長已經係講緊個黑盒，講緊個 geo-fencing，嚟緊嘅，同埋係直接喺嗰個車裏面係提示佢嘅 behaviour 同埋佢速度，呢個我哋已經係去到呢個階段。

MR DUNCAN：（經傳譯員）我哋去睇第二啲嘢之前，我想睇番呢份文件嘅其他嘅段落，似乎都係有提過同呢個同巴士車長嘅實時嘅溝通嘅，4497 頁，嗰個頂部講緊--即係嗰個標題有講功能方面嘅要求，呢個有一個係中央嘅控制系統嘅，1.1.4，容許嘅調派嘅人係嚟到係可以响嗰個地圖畫出某一個部分，可以有啲地方係可以標示嚟到係送出一啲文字或者係聲音嘅訊息嘅，亦都可以計算速度，

嗰個標示嘅地區計出嚟嘅速度可以展示出嚟，或者個平均速度可以展示出嚟。

呢度亦都有講嗰個核心嘅功能嘅，跟住就係有講呢個營運嘅管理，就係對下嘅標題嚟嘅。喺個 a(7)，即係跟住嗰一頁，4498 頁嗰度，嗰度就係話巴士離站全部都自動咁樣去調節，根據就係一啲可以改變嘅一啲規則嘅，就係應該包括但係唔限於以下各項，第 iv 項度就有提及車長嘅工作指引，我就覺得係應該包括咗嘅，係咪呀？包咗係車長嘅行為嘅，係咪呀？

李澤昌先生：我睇呢個 regulation 講嘅，佢主要係想緊同行車之間個距離多過從一個安全嘅角度去睇嘅，但係我都想提點一樣嘢，其實係我哋每日同一時間喺路面，我哋講緊係接近，最高峰嘅時間係超過三千幾部車喺路面行緊，三千幾部車遍佈全香港、九龍、新界同埋離島，即係我指係大嶼山，其實如果你有一個中央嘅系統控制嗰三千多部車喺路面，當然佢有好精準嘅資料、路面嘅情況，呢個係有佢嘅難度。但係睇番呢度，佢係講緊--好清晰係講緊佢同行車之間嘅距離多過同呢個安全方面係有一啲好清晰嘅掛鈎。

MR DUNCAN：（經傳譯員）或者等我再...

主席：（經傳譯員）對唔住，等等。你可唔可以講講話即係安全行車距離係咪話啲車係逼埋一齊，係唔想啲車堆埋一齊定抑或係同安全有關？

李澤昌先生：Yes，yes，唔係，佢做嘅時候好多時因為啲車長佢係唔知道佢前面架車個距離有幾遠，佢就跟住個速度係咁樣行，對乘客嚟講，好多時因為佢出車嘅時間可能係唔同嘅時間出，但係因為去到某一啲擠塞嘅道路嘅時間，就前面架車同後面架車就個距離可能越嚟越拉近，對乘客嚟講，一等就會變咗就會一拃車嚟，所以如果你可以同個車長溝通，即係有啲似今日嘅火車，火車都係有呢啲咁嘅情況嘅，但係當然火車係因為埋站嘅時候多人上落，而令到架火車停咗喺站嘅時間長，你要控制後邊架車唔好行得咁快，但係巴士就好難嘅，巴士就好難，所以呢個系統係令到佢唔好有個好似你話 bunching 呢個情況，即係好 clustered，一班車嚟到，令到個客嗰個等車嘅時間就比較好啲。

但係而家我哋都有一個網上，有一個--即係做緊一個行車嘅到站嘅時間幾長都幫到個客，但係呢個同當其時個 safety 係有少少未必係完全掛鈎嘅。

主席：（經傳譯員）呢個係有效咁樣樣去提供服務，就唔係同安全有關，係咪呀？

李澤昌先生：Correct. Correct.

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）我又想請你睇睇呢個 4501 頁，個標題就係司機溝通系統，呢個就係喺功能要求底下嘅，2.1 嗰度就係話喺每部巴士可以安裝一個巴士嘅控制板嘅，就會提供以下嘅功能嘅，2.1.1 就係話可以顯示一啲有顏色嘅圖表同埋一啲文字嘅數據嘅。嗰度係就話可以係睇一睇就係有一啲顯示一啲實時嘅標誌，就睇下嗰個司機嘅駕駛行為，如果係有不正常嘅駕駛行為就會有不

同嘅嗶嗶聲就係提示嗰個司機嘅，同埋就會有一啲嘅全面性嘅參數嚟到去啟動或者係停止呢一個功能嘅。

我想問，係咪話當時諗住有一個實時嘅系統就睇到一啲不正常嘅駕駛行為，就偵察到，就同埋就係會話番畀個車長聽「你呢啲行為係唔啱嘅」？

梁健宏先生：呢個就變咗我哋而家裝咗喺車上面嗰個 driver feedback device，而家我哋係裝咗一個嘅，之前佢個設計就係話將呢啲嘢就係喺埋嗰個 driver console 嗰度嘅，但係而家個情況實情就係我哋另外一個 feedback device，亦都將嗰啲 real time indicator 喺嗰度有啲燈、有啲聲音提示啲車長嘅，而家我哋每一架巴士都有。

MR DUNCAN：（經傳譯員）好，我而家就想講另一個課題，係上次聆訊嘅時候出現嘅，係第十四日嘅聆訊，當時委員會聽到你哋公司嘅代表所講，就係同之前嗰個打算係有所不同，就係你哋最後就係決定唔會安裝一啲係巴士傾側嘅警示系統嘅，你記唔記得有咁提過呀？不如咁，我亦都等大家睇番我哋嗰個紀錄本，係第十四日嘅聆訊，係 1620 到 1030 頁嘅，當時梁先生就話點解係有咁嘅決定呢？就係因為呢個丹尼斯同埋呢個富豪都係無法建議係應該用一個乜嘢嘅傾側角度，啱唔啱？

梁健宏先生：係嘅。

MR DUNCAN：（經傳譯員）唔該。如果個角度太窄嘅話，就冇意思，因為都冇意義嘅，但係另一方面，如果嗰個角度太廣嘅話，就會危險喇，啱唔啱呀？我所記憶嘅啱唔啱呀？係咪咁呀？

梁健宏先生：係嘅。

MR DUNCAN：（經傳譯員）好，唔該。只係昨日先至有人提一提我要睇呢樣嘢嘅，我唔知道你有冇機會睇過，呢一個就係喺雜項文件夾 2 嗰度嘅一份材料嘅，係第 916 頁，我唔知你有冇機會睇過呢份文件呢？

梁健宏先生：未有嘅。

MR DUNCAN：（經傳譯員）好，唔該。我諗就要慢慢咁樣同你一齊睇呢份文件。睇嚟，就係有個講解，又或者係一個演講嘅一啲筆記嚟嘅，當時就係好近嘅--唔係喎，其實係好耐，係 2008 年 8 月 29 號嘅一個講座，嗰個講座個標題就話香港雙層巴士安全事宜嘅講座，佢嗰個題目就係話雙層巴士嘅安全規管要求，似乎就係一位謝先生 Steven 嘅演講嚟嘅，佢就係負責巴士安全嘅工程師，就係嚟自運輸署係車輛安全及標準部嘅。

我咁問可能係問得太多，不過我唔知道在座各位先生有冇邊一位係有記憶話當時曾經係出席過呢一個講座呢？咁樣問法可能要求你哋太多，不過都想問一個問題。

梁健宏先生：我唔記得。

MR DUNCAN：（經傳譯員）好，唔該。我想直接去番我有興趣嘅嗰一頁，936 頁，我陣間先畀機會你去睇番之前嗰幾頁，不過喺嗰一版嗰個標題就係話傾側嘅角度，喺左手邊就話有咩嘢規管嘅要求或者有咩嘢規管嘅指示，右邊嗰欄就講呢個傾側嘅角度，「DD 巴士」我相信應該即係代表係雙層巴士咁解，呢一個簡寫。就講及呢個聯合國係歐洲經濟委員會就係 28 度，同埋歐盟 28 度，香港都係 28 度。我想問呢啲資料對你嚟講，你知唔知佢講緊乜嘢呢？

梁健宏先生：呢個係每一架車，尤其是雙層巴士佢需要喺--可以喺香港行走，就要經過測試嘅，要符合到呢個傾斜嘅測試嘅，呢個測試就係架車就係 static 嘅，係 static 嘅，架車係試傾斜嘅，當架車係可以傾斜到 28 度都唔會 topple，先至可以合格嘅，先至會出到嗰個 type approval，先至可以註冊喺路面行走嘅，我知道。

MR DUNCAN：（經傳譯員）你話嗰個 static test，即係話嗰個靜止嘅測試，就都係之前提供嘅材料都係有包括呢點嘅，係咪呀？

梁健宏先生：係。

MR DUNCAN：（經傳譯員）唔該。我而家就想講呢個行車時間，呢個就關乎所謂脫班，即係好多時都有人咁講㗎喇，行車時間同埋脫班呢一個關係，我想首先請你睇一睇，我哋之前就係睇過係一個工會代表佢嘅證供嘅，就係李國華先生，我諗你可以喺呢個第十日嗰個紀錄本嗰度係睇到嘅，第 62 頁，或者我將李先生嘅證供嘅一部分將佢讀出嚟畀你聽，當時就係黃律師代表委員會就喺第 14 項嗰度就向佢提出個問題嘅。

當時黃小姐就咁問嘅，「李先生，我就想講及一個係比較特定嘅題目，就講及就係所編排嘅車程同埋一個係脫班。跟住就係喺第 120 頁嗰度嘅，你當時就話由於係流失咗好多車長，亦都有需要維持嗰個係行車時間表，亦都避免取消咗嗰啲定咗嘅班次，就令到就係車長本來應得嘅休息嘅時間就係受呢個脫班嘅影響嘅，好多巴士嘅車長係需要行唔同嘅路線，為咗係有更多嘅休息時間，佢哋會儘快咁完成嗰個路線嘅服務嘅，當然呢個亦都視乎係路面嘅交通情況，然後就係將車揸番去總站嗰度休息。你可唔可以同我哋講一講點樣樣去維持咗嗰個定咗嘅班次呢個咁嘅需要就影響咗車長佢應得嘅休息時間呢？」

當時李先生就咁講嘅，「巴士公司就話--譬如話就係有一個鐘頭嘅行車時間嘅話，就應該將佢壓縮到係五十五至到五十八分鐘，巴士車長就會有少少嘅休息時間嘅，如果你再將嗰個行車時間係再壓縮多幾分鐘，就會係少咗休息時間嘅幾分鐘。」

我就想問，如果有一個車程真係長過原本所編排嘅時間，會唔會係影響到車長嗰個休息時間嘅呢？

彭樹雄先生：Mr Duncan，我嘅答案係可能會嘅，不過正正因為我哋其實每一個總站裏面都有站長當值，所以個站長係亦都會作出一啲相應行動上嘅調整，就係去令到我哋嘅車長，就算因為交通阻塞，就算因為其他嘅關係佢係遲咗返個總站，我哋一定都係有時間畀個車長去休息嘅，我哋係會作出行動上嘅安排。

MR DUNCAN：（經傳譯員）有時車長都係會唔會有咁嘅情況，就係車長係冇咗休息時間㗎？

彭樹雄先生：我哋有情況可能--我想強調，就係每一個車長佢返到嗰個總站裏面，佢係一定有時間可以有個--即係有個預先安排嘅休息，但係如果呢個休息係因為某啲嘅理由而影響到，我哋一定都會有一個所謂 water break、toilet break，佢可以飲啖水，可以去洗手間等等，然後佢先至會開始佢下一程個 revenue trip，即係嗰個下一程嗰個嘅載客嘅。

MR DUNCAN：（經傳譯員）公司其實係點樣樣計算係需要幾多時間去完成嗰個車程嘅呢？

彭樹雄先生：我哋係有嘅，其實喺我哋制定每一條線嘅行車時間，呢個有兩種嘅，一種就係一啲現有嘅行車線，其實我哋係有個機制，我哋係會有定期嘅檢視嘅，呢個就係第一個機制，就係我哋每三個月，每三個月，我哋係會將每一條嘅路線，舉例，我哋 KMB 有三百八十幾條線，我哋每一季每三個月一定會將個 journey time 要重新檢視嘅；第二個可以或者可能會檢視嘅就係話因應一啲特殊嘅交通環境，因應一啲特殊嘅客量嘅改變，因應一啲特別嘅路線或者特快線嘅增加、減少，同埋我哋前線嘅車長嘅反映、我哋前線督察嘅反映、我哋前線站長嘅反映，我哋都有啲 ad hoc 嘅，即係所謂--唔係話三個月，我哋唔會等三個月，我哋都會即時去檢視嗰個嘅行車時間嘅。

MR DUNCAN：（經傳譯員）你嗰個檢視會係涉及啲咩嘢呢？

彭樹雄先生：其實我哋有幾個情況係會影響到個行車時間嘅，正如我講，例如一啲嘅交通嘅情況嘅改變，例如舉個例，西九龍佢喺起高鐵嘅時候，譬如佐敦、彌敦道一帶其實就擠塞咗嘅，於是乎我哋就會喺嗰個行車時間裏面係酌量去調整。又或者其實另外一個令到行車時間加長嘅理由就係其實客量嘅多少，其實呢個都會直接影響到嗰個行車嘅時間嘅，譬如話多客上車，多客落車，即係你埋站嗰個嘅時間其實相對地亦都會多咗嘅。另外有一啲另外一啲比較交通嘅改道，或者嗰條線要我哋俗稱叫做 deroute 咗，即係有啲新嘅路線，佢條主線係一樣，但係有啲支線改咗嘅，其實我哋都係會檢視嗰個行車時間嘅。

MR DUNCAN：（經傳譯員）我想你睇下楊先生嘅證供，佢就喺第十一日係作供嘅，佢就係現時嘅車站經理，九巴嘅車站經理，呢個就係第十一頁，呢個就係喺第94頁嘅，第十一日。佢嘅問題就係喺第93頁第19行嘅，就係黃佩琪大律師係問呢一個問題，佢就係問咗楊先生呢條問題，「我哋而家講另一個話頭，就係脫班，我哋係從你嘅同事 Debby Wong 就係聽取咗證供，就似乎係經常有脫班嘅情況，而佢係會影響到駕駛嘅行為嘅，因為就無法係準確地預測呢一個行車

時間，而你嘅睇法係點呢？就住呢個問題。」

楊先生嘅回應就係「對我哋嚟講，係有唔同嘅原因導致脫班嘅，首先，如果巴士車長不足亦都係會脫班，香港亦都係會塞車，可能有一啲嘅緊急情況，公眾嘅集會、活動同埋一啲特別嘅交通安排、惡劣天氣，喺路上係有車輛係故障等等，呢啲都係會引致脫班嘅，但係我哋會儘量唔影響車長嘅休息時間，因為我哋有一個嘅行車時間表，而我哋係會提供呢個表畀我哋嘅車長，而喺96%或者係90嘅車程之中，我哋嘅車--或者嘅行車之中，我哋嘅車長都會有足夠嘅休息時間嘅。」

脫班嘅定義就係有架巴士係本身應該由A去到B，但係最後就冇去到嘅。你可唔可以話畀委員會知道係有幾頻密呢，出現得，脫班嘅情況？

彭樹雄先生：其實運輸署就畀所有嘅專利巴士公司其實都有一個嘅數值，就係嗰個所謂脫班率，如果比較起整個我哋叫做schedules of service，嗰個行車時間表，嗰個benchmark就係唔應該多過3%，唔應該多過3%。

MR DUNCAN：（經傳譯員）我就想請你睇一睇運輸署呢一份文件，呢個就係TD-1文件冊第34頁嘅，喺第34頁，呢份文件就係由運輸當局提供畀委員會，而呢份文件就係叫做專營巴士嘅整體規管同埋監管制度，喺第31頁，你就見到呢份文件嘅目的就係提供一個政府規管香港專營巴士服務嘅整體規管同埋監察架構，我就想你先睇睇第44頁嘅部分，就係(e)段嘅，呢一個標題就係第41頁其他措施同埋發出信件同埋指引，就有唔同嘅段落，有(a)至(e)，(e)段就係喺44頁嘅，我就係想讀出嚟。

「喺2015年運輸署就係提供咗一個更新咗嘅懲罰機制，就係就住專營巴士商嘅巴士脫班嘅情況嘅，呢一個機制就係包括咗係發出唔同--即係根據嚴重嘅程度發出信件，包括係一啲提示信、警告信、嚴重警告信等等，就係根據脫班嘅頻密程度同埋佢嗰個嚴重程度嘅，同埋有相關嘅解決--即係營運商所採取嘅解決措施。呢啲警告信就係可能係會引起進一步嘅法定嘅懲處，根據呢一個專營巴士服務嘅條例第22章，包括係罰款，係撤銷呢一個某條巴士線嘅營運權，同埋如果係營運商係冇改善嘅話，即係或者冇一個合理嘅解釋嘅情況，都會出現嘅。

而喺2015年引入咗呢個制度之後，運輸署就係有監察呢個專營巴士商嘅脫班情況，同埋係發出一啲嘅提示信件同埋警告信等等，等佢哋係採用修補嘅措施同埋改善服務嘅。而呢啲營運商亦都係向運輸署提供解釋同埋採取行動，包括就係調派多一啲嘅後備車長去解決呢一個短缺嘅問題同埋改善呢個脫班嘅情況嘅。而根據呢個營運商採取嘅情況，佢哋就冇進一步遭到係懲罰嘅。」

我想你睇第117頁，就係同一份文件冊。

主席：（經傳譯員）鄧大律師，呢一個附錄K就係喺KMB-2文件冊嘅217頁--或者291頁。

MR DUNCAN：（經傳譯員）我就想畀大家睇下呢一個附錄 K 嘅第 291 頁，呢個就係一封一般嘅信件，呢個就係關於實施呢一個新嘅懲處機制嘅，主席，你會喺呢度見到呢封信。

我就先想問幾個問題嘅，就住呢個話題，我想你睇另外一份嘅運輸署文件，就係 117 頁，呢個就係叫做運輸署文件 10 號，呢個標題就係專營巴士服務嘅營運、安排路線、車隊嘅調配同埋設立呢一個車速限制嘅，呢份文件就係介紹運輸署喺規劃路線、調派車隊同埋制定呢一個車速嘅角色，就係就住呢個專營巴士服務嘅。

我想你睇番 122 頁，呢一份就係服務時間--即係某條巴士路線服務時間表嘅樣本，呢個例子就係有空調嘅九龍市區巴士路線 2 號，如果我哋講番呢個可能或者潛在嘅懲罰，你可唔可以話畀委員會知道九巴係喺過去嗰六個月係收到幾多封警告信呢？

蘇偉基先生：Mr Duncan，喺過往六個月，因為 lost trip，公司係冇收過 warning letter，但係個別嘅線我哋係收--另外頭先所講嘅，advisory letters，或者係 reminder letters。

MR DUNCAN：（經傳譯員）呢啲嘅提示信係關於啲乜嘢呢？

蘇偉基先生：佢會係講述我哋某啲線喺某一個時段，假設係夜晚嘅繁忙時間，佢嗰個 lost trip rate 係大約多過 3%，就會提--我哋要係做一個檢討，改善，同埋佢亦都會問我哋究竟原因點解會出現呢個 lost trip。

MR DUNCAN：（經傳譯員）九巴喺過去十二個月有冇收過任何嘅警告信呀？

蘇偉基先生：Warning letters，過往十二個月係冇收過，公司。

MR DUNCAN：（經傳譯員）基於呢個脫班嘅情況，你哋需唔需要定時係要求運輸署改變某一啲路線嘅行車時間表呢？

彭樹雄先生：其實我哋公司係不時都有聯絡番運輸署，係主要就係闡述番我哋喺嗰個特別某啲線上面遇到啲乜嘢嘅問題，因為運輸署計嗰個嘅所謂脫班率，其實佢係分開四個時段嘅，譬如話早上嘅繁忙時間、跟住就係早上嘅非繁忙時間、晚間繁忙時間同埋非繁忙時間等等嘅。就住唔同嘅路面情況，就住路面可能嗰個交通阻塞、違例泊車等等，其實我哋好多時都有同運輸署係反映，然後就話可唔可以譬如話檢視下嗰個嘅 schedule of service，即係嗰個行車嗰個時間表等等。

MR DUNCAN：（經傳譯員）運輸署通常會唔會批准呢一啲檢討嘅申請呀？

彭樹雄先生：我只可以答係好困難，我哋其實有好多我哋嗰啲叫做 low utilisation，我想解釋，因為好多時有啲客量嘅改變，例如有啲鐵路嘅發展，我哋嗰個服務可能嗰個需求係冇之前咁多嘅，好多時我哋就特別喺非繁忙

時間，我哋都係好多次、好多次都作出書面嘅同埋會議嘅要求，希望運輸署係可以酌量咁樣去某啲非繁忙時間嘅班次係作出減少嘅。

其實我哋作出呢個申請，我哋係會依據一啲嘅--我哋有啲 guidelines，有啲指引，其實我哋係跟番個指引，其實我哋係可以用一個字叫做--我哋應該 entitle 一啲嘅 journey reduction 嘅，但係就算我哋係達到呢個指引呢個係可以減班次，但係往往--即係我要好老實咁講，如果需求我哋加班次嘅，往往運輸署就想我哋即刻做嘅，因為可能地區嘅人士或者議會嘅人士，但係去減班次，呢個我哋真係遇到好大嘅困難嘅。

我哋人手嗰個餅都係咁大㗎喇，但係問題就係我哋有時真係好無奈地，我哋要將一啲嘅資源係擺咗落一啲我哋所謂 low utilisation 嘅線裏面，我覺得呢個就其實就係個發展係唔健康嘅，我覺得。我哋好多時同運輸署我哋都有溝通，但係就始終嗰個進展相對地係緩慢嘅。

主席：（經傳譯員）換句話講，雖然你係要求一啲減少嘅服務班次，但係通常都係冇獲得批准嘅，係咪？即係有唔同嘅原因係影響到你嘅申請。

彭樹雄先生：係，冇錯，主席。

MR DUNCAN：（經傳譯員）喺午飯前，我哋再問多一個問題，邊個係發出呢啲指引㗎？

彭樹雄先生：運輸署。

MR DUNCAN：（經傳譯員）喺議定呢個指引，你有冇一個角度嘅呢？或者你有冇參與？

蘇偉基先生：嗰個 guideline 本身都係出咗好耐，亦都持之有恆，而家係執行個 guideline，個 guideline 本身我哋係認同嘅。

MR DUNCAN：（經傳譯員）你可唔可以向委員會提供指引呀？

蘇偉基先生：應該喺啲 document 有，我講番喺邊頁喇，我小息嗰陣時講番畀大家聽。

MR DUNCAN：（經傳譯員）唔該晒。仲有一個問題嘅，即係呢個問題就係點樣去實施呢個指引呢？

彭樹雄先生：絕對同意，係個 guideline 就好清晰嘅，但係問題喺執行上始終我都明白有好多嘅阻力嘅，呢個就係我哋都希望可以真係可以將啲 resources、將啲資源用喺一啲有需要嘅路線上面，多謝 Mr Duncan。

主席：（經傳譯員）各位，我哋係會小休二十分鐘，如果你可以搵出嗰個指引喺邊度，會好大幫助嘅，唔該。

上午11時38分押聆訊押後

中午12時正恢復聆訊

出席人士如前。

主席：（經傳譯員）鄧樂勤大律師。

MR DUNCAN：（經傳譯員）好，唔該你，主席先生。唔知你哋搵到嗰個係材料未？

彭樹雄先生：有，Mr Duncan，就喺KMB Long Win Bus bundle number two，page 73，73頁，係第(IV)，“Frequency reduction”。係嘞，冇錯，就係螢光幕呢一個。

MR DUNCAN：（經傳譯員）唔該晒。我哋講緊嗰啲係有關嘅材料，主席亦都有講過話喺新加坡亦都有啲係防止瞌眼瞓嘅裝備，如果大家想參考嘅話，就係CTB-1，63頁，就可以搵到相關嘅材料，CTB城巴1號文件夾63頁。我而家係想講另一樣嘢，關於嗰啲洗手間，同埋就係車長嘅休息嘅設施。我開始問問題嘅時候，首先係想請你睇番呢個運輸署，TD-1，438頁。講番嗰個背景，咁先睇番427頁，呢個係一封信嚟，係運輸署發出嘅信件，係寫嚟畀我哋委員會，日期係2018年7月20號。運輸署就係回應咗委員會嘅一啲問題，提供咗啲答案。喺438頁嗰度，你會見到問題第28號，就係講及係喺巴士總站提供洗手間同埋休息嘅設施，就問運輸署有冇發出任何嘅指引畀嗰個專營巴士營運商，亦要提供巴士總站嘅洗手間同埋休息設施，如果有，係畀個詳情，如果冇嘅話，就要解釋點解。運輸署有冇積極咁樣樣去便利係有關嘅專營巴士營運者，去同有關嘅部門去跟進，好讓可以提供到咁嘅設施？

我而家好快咁講一講，係部門嗰個回應，「運輸署一直都係鼓勵巴士公司，因為佢哋要作為一個良好嘅僱主，應該係喺巴士總站嗰度為僱員提供適當嘅洗手間同埋休息設施，相關嘅部門同埋有關當局去考慮同埋批核呢一啲係申請嘅時候，即係呢啲都係員工嘅設施嚟嘅，運輸署都有提供適當嘅協調，嚟到係儘早可以安裝到。但係對於話提供呢個洗手間同埋休息設施，係冇一啲具體嘅指引發過畀營運商，因為休息嘅設施同埋係洗手間，一般都係喺設計新嘅巴士總站嘅時候，作為基本嘅設施，考慮埋㗎嘞。有關嘅營運商嘅要求，同埋嗰個意見，都會係入咗落去嗰個巴士總站設計嗰度，如果係適當嘅話。如果洗手間唔係係合理嘅步行距離之內，又或者休息設施係冇或者唔足夠，咁樣佢哋就係會好積極咁樣去申請係有呢啲設施嚟到符合佢哋嘅營運要求。

2018 年 3 月 31 號，二百九十五個巴士總站差唔多全部都有洗手間，就係步行三至七分鐘。百分之八十六，即係二百五十五個就係有休息嘅設施，就係站長室，或者站長辦公室，又或者係車長嘅休息站或者休息室。因此就係考慮過，就認為唔需要就係向呢一個營運商係提--發出一個具體嘅指引，講及呢啲總站係需要呢一啲嘅設施。我哋就係會係積極就係同有關嘅部門就去係協調，咁亦都會係讓相關嘅部門同埋當局明白，就係有關嘅程序嘅要求。咁最終目的都希望係履信嗰個申請嘅過程，希望及時可以有嗰啲設施。咁譬如話係呢個係水邊圍邨山水樓呢個馬灣道（媽橫路？）出面嗰個巴士總站嘅休息室，正如 05 號文件嗰度就係所載就係一個好好嘅例子，每一個部門同埋當局都有佢自己嘅法定嘅權力，同埋就係有佢自己嘅考量，嚟到決定批唔批佢嘅申請，嚟到有洗手間同埋休息設施。雖然係咁講，運輸署會繼續便利營運商，如果有咁嘅需要嘅話，嚟到去積極咁樣去跟進，係回應同埋係滿足車長對於洗手間同埋休息設施呢一個嘅需要，亦都會致力就係提供所需嘅援助畀營運商係跟進呢件事。」

咁跟住下面嗰度，就問題就問「縱使就係專營巴士營運商係時常同埋長久以嚟咁嘅要求，我哋就知悉有一啲總站仲係未有足夠嘅洗手間同埋休息設施，請話畀我哋聽，係邊一啲係總站，同埋係咪有一啲主--係咪一啲主要嘅大嘅站，有好多巴士線嘅？同埋佢哋有冇係一啲車長就係返特別更，而佢哋特別需要足夠嘅休息設施，嚟到去有一個不少於連續三小時嘅休息嘅時間？解釋就係有咩嘢掣肘，特別係就係點解佢哋係拒絕你哋係要求係提供咁嘅設施？即係話政府當局係有啲咩嘢理由係提咗出嚟？」

當時部門所提供嘅答案係咁，「喺 2018 嘅 3 月 31 號為止，差唔多所有全港九嘅二百九十五個巴士總站，都有洗手間，只需要行三至到七分鐘，而大概百分八十六嘅巴士總站，換句話講二百五十五個巴士總站，即係遍佈全港九，就係有休息室，咁佢嘅形式就一係站長嘅休息室，或者站長嘅辦公室，又或者係車長嘅休息室，其餘嘅百分之十四嘅巴士總站，佢冇休息設施，專營巴士嘅營運商就冇申請到提供休息設施，係要設立喺嗰度。大部分係咁，就算唔係全部都係，另一方面就係，營運商就係可以向有關嘅部門或者當局就係申請額外或者係擴大嗰個休息嘅設施，係符合佢哋喺總站嘅營運要求。咁照我哋所知，係有一個名單，就係巴士總站係有洗手間同埋休息設施，咁就係營運商要求，就但係喺過去嗰三年，就係被拒，或者係仲係部門或者當局係處理緊。咁我哋相信就係冇嗰個係個別車長佢嗰個當更嘅紀錄，因為係逐條逐條線嚟講，就好難，因為佢哋時不時有改變。至於話佢哋有冇係要返特別更，就唔知。

咁喺附件 3 所顯示，主要嚟講，點解會拒絕佢哋嘅要求，話設立洗手間同埋休息室，部門同埋當局主要拒絕嘅原因都係因為地理上面嘅掣肘，譬如話係個巴士總站喺一個好窄嘅行人路側邊，又或者係當區係社區人士就係有意見。至於話係嗰個營運商，佢哋係提出申請想有呢啲設施，佢哋係可以係搵出一啲可行嘅解決辦法嚟到去克服呢一啲實際嘅困難。咁運輸署就會協助巴士公司，就係取得當地人士嘅支持，譬如話進行一啲實地嘅視察，又或者係同當區嘅人士就係去開會，去搵下有啲咩嘢可行嘅解決方法，嚟到去係設立呢啲設施，亦都希望可以加

快落實呢一啲規劃。即係話如果咁嘅需要，而且亦都為咗車長同埋乘客嘅便利，同埋嘅好處。」

附件 3，附件 3，我哋就要去另一個文件夾，咁就係 TD-5，運輸署 5 號文件夾，頁碼就係 1723 頁。1723 頁，嗰度就係個標題就話，係有個清單就巴士總站係有休息設施同埋係洗手間，就係巴士公司申請，但係運輸署仲處理緊。咁就係運輸署仲處理緊佢哋嘅申請；咁而(B)嗰度就係話，營運商係要求係有呢啲係洗手間同埋休息設施，但係由其他嘅相關嘅部門同埋係當局係處理緊佢嘅申請，嗰個就(B)嘞；(C)嗰個標題就係話，係有一個清單，巴士總站就係運輸署已經同埋其他嘅部門喺過去嗰三年拒絕咗佢哋申請，係安呢個洗手間同埋休息設施嘅個案。

我稍後會問你一啲問題，呢個就係關乎運輸署係所作出嘅解釋，咁或者巴士公司你哋都想作一個回應。不過我未講嗰度之前，我又想睇番一啲問題，我就係想睇下究竟係呢方面嗰個問題喺邊一度。我嘅理解就咁嘅，九巴有四個車廠，你哋係咁樣叫，係有四個車廠，咁另外亦都有好多嘅巴士總站，係咪？

李澤昌先生：（經傳譯員）啱。

MR DUNCAN：（經傳譯員）如果我哋睇番呢個九巴士文件夾 1，喺 252 頁，你睇到嘛？就係你哋公司自己嘅車廠同埋分區嘅地圖。你呢度就係將嗰四個車廠，同埋啲分區，係標示咗出嚟，你有荔枝角廠，有九龍灣車廠，屯門車廠，同埋係沙田車廠。為免生疑問，其實所謂「車廠」，即係咩嘢意思？

李澤昌先生：佢嗰個車廠裏面，主要有兩個大嘅功能，一個就係嗰啲車每晚返到去，做一啲維修、入油、清潔嘅工作，咁佢有一啲維修喺嗰度；另外一個功能，另外一個大嘅功能就係，啲車長佢嗰個--嗰啲派更嘅時間表，同埋啲車長好多時候喺嗰度休息，每朝返到去，係攞佢嗰個更紙嘅嗰個功能。咁有啲其他嘅，四個唔同車廠，有四個唔同嘅另外功能，喺屯門廠，就會做嗰個每年嘅年檢大維修；喺沙田廠嗰個，就係我哋訓練車長嗰間學校；喺荔廠，就係我哋嗰個即係中心，係調配嗰啲車輛，例如打風落雨，特別嘅情況；喺九龍灣廠，就會係我哋嘅 backup office，大部分都會喺個九龍灣廠。

MR DUNCAN：（經傳譯員）咁係咪車長每朝返工都係先去車廠？

李澤昌先生：絕大部分都會係，有啲就會去個站頭嗰度去攞車，不過好大部分都去個 depot 嗰度係攞佢嗰個當天嗰個派更嗰張紙。

MR DUNCAN：（經傳譯員）我咁嘅理解啱唔啱？你其實係較早時候有提過下，我嘅理解啱唔啱，車廠係有洗手間同埋有休息嘅設施畀車長用？

李澤昌先生：絕對會有，佢個 depot 裏面，亦都係一個相當大嘅一個車廠嚟嘅，咁佢裏面係有一啲沖涼嘅設施，有一啲呢個洗手間，有呢個甚至乎每一個 depot 都有一個 clinic，係會係畀啲車長如果唔舒服，喺嗰度驗一驗，先至係咪決定

返唔返去--返唔返工。咁仲有一啲休息嘅地方，等啲車長喺嗰度休息一下。主席提一提，嗰度係甚至乎有間剪頭髮，係畀啲車長係剪頭髮。

主席：（經傳譯員）喺屯門肯定就啱，係咪所--四間都係？

李澤昌先生：四間都有，四間都有，四間都有，佢甚至乎有個 grocery shop，係畀佢買啲一般基本嘅雜貨，都喺嗰度，咁其實基本上大部分嘅車長都會當嗰個係佢一個即係地方，佢哋係有個歸宿嘅地方。

MR DUNCAN：（經傳譯員）我想你睇睇呢一個雜項文件夾 2，902 頁。899 頁嗰度就係講及就係，九巴嘅係巴士總站同埋屯門車廠，就係主席同埋委員喺 2018 年 8 月 3 號去參觀嘅一個報告。咁其實就喺 902 頁嗰度，(E)嗰個係標題底下，就係見到係關乎屯門車廠。我就想請你睇一睇，第二點，902 頁底下嗰度，就話「一字樓，一字樓嗰度有一個康樂地方，咁就有兩張乒乓波檯，有呢個飲水機，有係儲物櫃，同埋一個係汽水販賣機，有理髮店，有便利店，有一個係休息室，就有冷氣嘅，四張檯，十六張凳，有雪櫃，係微波爐同埋電視機，同埋一個細嘅黑房，就係有啲係休息嘅凳，就係讓車長可以躺下，即係瞓平咁樣喺度休息。咁而當時就係有一位車長就係用咁嘅姿勢喺度瞓緊。」跟住下面嗰度，「二字樓就係有一個診所，有男廁、女廁，係一個制服嘅儲存室，同埋係辦公室。」嗰啲相就喺呢個附件 E 嗰度係包括咗喺度，912 頁嗰度就有嗰啲相，913 頁亦都係有嗰啲照片，就係反映番剛才文字所講嘅情況。呢個就係車廠嗰個情況，我哋而家就講番呢個車站嘅情況，九巴有幾多個車站？

李澤昌先生：二百一十七個。

MR DUNCAN：（經傳譯員）二百一十七個。我哋而家睇下 KMB-1 文件冊，201 頁。咁呢一頁就係委員會喺 18 年 7 月 19 號發畀九巴，咁第二段就提到要求公司係提供一個巴士車站嘅位置同埋地址，同埋係由邊一個車廠係負責嗰個車站，而係有九巴同埋龍運嘅車長就係返特別更，就係根據呢一個巴士車長工作休息及用膳時間指引，就係喺 18 年 2 月係更新，就係開始就係有一個最少三小時嘅休息。咁呢封信就係--嘅回覆就係 205 頁，就係 7 月 26 日嘅，咁就講到「我哋就回應你喺 18 年 7 月 19 號嘅信件，咁你係要求我哋提供車站，照顧呢啲特別更車長所提供嘅休息同埋員工設施。咁就喺下表就係有詳情。」咁跟住我哋就見到個表，就係 206 頁、207 頁，一直去到 211 頁。咁就住呢個表，我問問題之前，呢個表就係列咗一啲有特別更嘅車站，咁我咁樣理解啱唔啱？某一啲嘅車站係冇特別更，即係係特別更都冇使用嘅，啱唔啱？

彭樹雄先生：係，冇錯，Mr Duncan，有個別嘅車站就未必會有啲特別更嘅車長嘅使用。

MR DUNCAN：（經傳譯員）大概有幾多個咁樣嘅車站？

彭樹雄先生：或者我可以--不如我用一個數字可以--即係咁樣容易表達啲出嚟，因為邊個站有，或者有幾多站有特別更嘅車長喺度休息，我哋都要睇一睇，但係或

者容許我畀一個數就係話，我哋啲特別更嘅車長，譬如話有幾多會係喺嗰個 depot 休息，有幾多個特別更嘅車長係會喺個站頭，即係 bus termini 休息，又或者有幾多個佢哋係可以返屋企去休息嘅。

MR DUNCAN：（經傳譯員）或者我可能頭先講得唔係太清楚，呢個表就係列出咗一啲車長開始特別更，然後休息嘅時候，可能會喺呢啲車站度。

彭樹雄先生：係。

MR DUNCAN：（經傳譯員）咁如果我理解啱嘅話，某啲車站係唔會被車長使用嚟休息㗎嘛，即係返緊休息--返特別更嘅車長？

彭樹雄先生：我或者可以咁--係，我或者可以咁樣答，因為我哋如果跟番嗰個時間表，timetable，確實就某啲站頭，佢哋係冇一啲嘅特別更車長嘅休息，但係有可能喺行動上，譬如話嗰個站頭就算有一啲嘅 resting facilities 咁計，佢可能未必--因為嗰個行動上，即係個車務上嘅調配，佢可能會有唔同嘅，呢度。

李澤昌先生：我可唔可以咁樣補充，Mr Duncan？其實我哋九巴有二百一十七個站頭，或者佢哋講嗰個 bus termini，其實每一站頭都基本上有一啲好--我哋講緊啲基本嘅設施，而家你講緊嗰--呢一個站頭嘅設施，其實佢即係最大，而家政府批一個 kiosk，佢哋講緊係大概係 40 呎，40 平方呎咁大㗎咋。即係就算係咪特別更，或者係一般嘅車長嘅休息嘅設施，都係需要，而家我哋係冇刻意話邊一個係特別更先，因為其實如果我哋--我就睇過嗰二百一十七個站頭，其實每一個二百一十七個站頭裏面，佢嗰個設施係基本上我哋講緊係一個 40 呎嘅一個--平方呎嘅一個東西嚟㗎咋，即係唔係一個可以瞓覺嘅地方。

MR DUNCAN：（經傳譯員）你話你睇晒二百一十七個車站，佢哋包唔包括一啲即係返特別更車長所用嘅車長--即係係咪包括晒呢啲車長用同埋冇用嘅車站？

李澤昌先生：有，有可能係。

MR DUNCAN：（經傳譯員）咁即係話呢一個係車站嘅總數，就無論係有冇特別更車長用，係咪？

李澤昌先生：冇錯，冇錯，冇錯。

MR DUNCAN：（經傳譯員）咁如果我冇理解錯，你啱啱就話當你即係考慮呢啲設施嘅時候，你就唔會特別係分係畀一啲特別更或者唔係特別更嘅車長用嘅？

李澤昌先生：冇錯。

MR DUNCAN：（經傳譯員）我就想你睇番 KMB-1 文件冊嘅 205 頁，或者係應該係 206 頁。咁呢個表我哋就會見到，邊個車站就係要即係依靠呢一個公廁，而唔係一個化學廁所，或者係用一個九巴廁所。

李澤昌先生：其實今日二百一十七個站裏面，我哋叫做即係 purposely-built 有一個 toilet 喺度，係五十個；而佢有化廁嘅地方，係有六十六個；咁跟住有一百個左右，係倚賴周邊嘅設施畀個車長，例如係一啲即係 shopping mall，或者啲商場嗰啲咁嘅地方，咁今日仲有一個係冇洗手間嘅設施。

MR DUNCAN：（經傳譯員）咁關於呢個公廁嘅問題，根據運輸署文件，即係我頭先畀你睇嘅文件，呢啲廁所可能要即係行四至七分鐘先至去到，即係喺車站行四至七分鐘，咁樣講啱唔啱？

李澤昌先生：我冇親身行過，但係就有住大部分係可以去--係大概十分鐘之內左右，因為有啲係好倚賴個商場，咁有時商場佢係閂咗，咁佢可能會行得更遠，呢個係有呢個情況發生。

MR DUNCAN：（經傳譯員）九巴認為呢個情況理唔理想？

李澤昌先生：我哋喺過去一年裏面，我哋係添置咗個化廁係二十六個，二十六個，而家係剩番一個，咁基本上，已經去到一個我覺得係慢慢啲員工覺得係接受到嘅水平。一年前你問我呢個問題，可能係我接受唔到。但係仲有一樣嘢，我哋需要係要處理，就係因為化廁其實佢點都係缺乏咗一啲電嘅關係，所以好多時喺個通風同埋嗰啲即係等等其他嘅設施，係冇一個完整一個廁所咁好，所以呢個係--我哋仲係改善之中，咁我相信會越嚟越--即係喺呢個方面會做多啲工夫。

主席：（經傳譯員）你話「剩番一個車站」，係咩嘢意思？

李澤昌先生：嗰個喺元朗，咁因為嗰個即係同近期你聽到，前嗰幾日個差唔多個情況，因為佢嗰個--本身嗰個路，行人路係比較窄，咁亦都係當區嗰啲區議員亦都係覺得嗰個位置同埋嗰個環境唔係咁適合，咁呢個仲係喺個申請之中，而家係仲有一個我係仲未可以即係處理到嗰個化廁，喺元朗，exactly 嘅位置係元朗公園。

MR DUNCAN：（經傳譯員）喺安裝咗呢二十七個化廁之後，即係仲有即係幾多--仲有啲咩嘢情況，你哋係要靠公廁？

李澤昌先生：呢個比較--呢一百個站頭係困難，因為佢係倚賴個 public toilet，咁有啲 public toilet 係其實係譬如係周邊係一啲公園嘅設施，係因為申--應該咁講，洗手間係複雜，因為洗手間係佢申請嘅過程，係要同好多啲區議員，唔單只政府部門，個時間係好長，所以係--我哋係即係掌握唔到呢方面即係可以做得啲咩嘢囉。

MR DUNCAN：（經傳譯員）即係假設你可以控制到呢個情況，即係對公司嚟講，理想嘅情況係點樣嘅？

李澤昌先生：我自己個人就係經常都落站頭，係同啲車長，前線員工，係畀佢感覺我哋係多啲聽佢嗰個困難，其實今日佢個困難都未係個洗手間，其實佢個困難係嗰個休息室，因為休息室，我諗上年嘅秋天，大家都記得呢個樂華事件，其實休息

室係員工嘅一個幾重要嘅問題嚟，因為個休息室嗰個位置同埋佢嗰個大細係呢個需要我嚟緊嘅重要嘅工作，特別係未來香港--未來政府起嗰啲新嘅站，喺嗰個設施裏面，應該要做多少少，呢個先至係我哋覺得應該要做多啲嘅工作。

MR DUNCAN：（經傳譯員）一陣間我哋會講呢個休息室嘅問題，即係就住呢個提供廁所嘅問題，即係呢個理想嘅情況會係點？

李澤昌先生：我自己--Okay，我哋自己做咗啲咩嘢，今日啱啱我想講就係，我哋啲洗手間、化廁，其實佢係好多地方係申請唔到電，我哋大部分嘅化廁今日，我曾經係叫我哋啲工程部提供一啲電池，然後托個電池去嗰度，畀佢哋廿四小時有燈，同埋廿四小時有抽氣嘅設施。咁呢個第一步我試完，而家第二步，我哋差唔多係全部冇電到嘅地方，我哋係安置咗個太陽能嘅板，喺嗰個化廁上高，而提供啲電畀我哋啲車長可以有燈同埋有抽氣扇。我哋--即係喺我自己嘅範圍裏面，我諗我哋喺嗰個化廁嘅工作，已經我覺得係儘量去做㗎嘞。咁你話當然，即係你話係咪喺其他商場或者公園嘅設施嗰度，佢即係可以再畀多啲機會我哋係裝多啲化廁，我哋願意去做，但係即係正如頭先講，有好多地區同埋其他嘅部門，即係我真係確實係有個難度。

彭樹雄先生：Mr Duncan，其實我想少少嘅補充，即係我好多謝 Mr Duncan 你提出呢個洗手間嘅問題，其實呢個洗手間嘅問題，其實都係--都幾困擾我哋前線啲車長，因為往往個洗手間嘅問題，令到我哋啲車長去到商場，可能佢哋即係所謂食閉門羹，畀人趕番出嚟。正正因為冇洗手間，佢哋可能真係要來回--淨係來回個步程都可能要八分鐘、十分鐘，佢哋嗰個休息時間相對地係因為咁樣而係有所減少，呢個係其實都幾困擾我哋啲車長。同埋我亦都有啲驚奇就係，一啲現有嘅總站，你冇一個永久嘅洗手間，我覺得即係呢個當然我哋可以逐步做，我哋公司譬如話我哋會加自己嘅化廁等等，但係一啲啱啱起好嘅新嘅巴士總站，我覺得都頗為詫異就係，佢完全冇 factor in 到一啲 permanent 嘅洗手間喺裏面。我舉幾個例，例如西九龍高鐵巴士總站，一個係好有規模嘅巴士總站，但係完全係冇洗手間嘅安排；紅磡嘅紅鸞道，啱啱使用，佢係要嚟取代嗰個紅磡碼頭，亦都係一個好大嘅 PTI，我哋所謂 public transport interchange，亦都係冇一個洗手間嘅設備，冇站長室，冇休息室；港珠澳大橋，我哋初步睇，亦都係冇一個洗手間嘅設備。咁呢個其實正正多謝 Mr Duncan，我哋覺得係咪應該呢啲 resting facilities，包括 toilet 等等，係咪應該喺包含咗一啲基本嘅設施裏面？嗄。

主席：（經傳譯員）咁問題嘅根本係咪即係係規劃上嘅問題，點解會有一啲新嘅路線同埋新嘅設施，但係就冇一個制度去確保呢啲設施入面係有合適嘅廁所？

彭樹雄先生：多謝主席，我唔知道呢個係咪一個 design failure，但係有一啲以往即係建造嘅巴士總站係有一個 permanent 嘅 resting facility，有洗手間，有站長室，但係就好奇怪，就係--正正就係有啲新落成嗰啲，就完全係冇呢一樣嘢。同埋除咗--呢個新落成嘅巴士總站，除咗 resting facilities，其實喺個設計上，其實都有問題。正正我講，紅鸞道、西九高鐵站，呢兩個站喺

落成咗之後，Transport Department 就邀請我哋巴士公司落去試路，但係先發覺，原來佢個 design，佢個設計根本係對某啲嘅車種係唔適合，結果呢兩個站係需要做一啲好大型嘅 modifications，先至可以令到我哋嗰啲巴士係轉得到，又或者係能夠出到嗰個出口。因為佢--即係嗰個--我相信一啲舊式嘅巴士總站設計，當時係諗唔到會有十二米車，十二米八㗎，呢個我哋可以諒解。但係一啲新嘅巴士站，呢個我哋覺得係比較驚奇，嗯。

MR DUNCAN：（經傳譯員）而家請你搋去 FE-1B 嘅文件冊，199-7 頁。你見唔見到呢度有封信，2016 年 1 月 21 號，呢個係寫畀運輸署署長，公司發出，有關於就係話擺一個化學廁响政府土地，一個荃灣嘅--新界荃灣嘅巴士總站，見唔見到？

彭樹雄先生：見到。

MR DUNCAN：（經傳譯員）呢個算唔算係一個申請擺一個化學廁嘅，呢個就係荃灣嗰個呢個地方？

彭樹雄先生：係，冇錯。

MR DUNCAN：（經傳譯員）請你睇 199-10，呢度就係响 4 月，運輸署--2016 年 4 月，運輸署一封回信嚟。

彭樹雄先生：係，見到。

MR DUNCAN：（經傳譯員）响第二段，「部門將你個建議畀有關嘅政府部門，係發--睇下佢哋有咩嘢意見，亦都要求荃灣民政處就喺當地係諮詢啲人。我想同你講，當地居民嘅代表係有強烈反對，擺呢個响個荃威花園嘅巴士總站擺化學廁，因為佢哋關心衞生，同埋仲要附近亦都有洗手間，咁詳細嘅反對原因就係擺咗响附件 A，請你參考。咁我哋好遺憾話畀你聽，你申請擺個化學廁呢個建議，係我哋唔能夠支持，我哋想請你重新考慮下，係咪需要响呢個地方擺個化學廁，再重新提交申請嘅，如果需要嘅話。」

咁跟住 199-13，係另一封信，係公司發去畀運輸署署長，今次第二段，「請你--請留意化學廁已經係有更好嘅設計，同埋通風嘅等等一啲情況。」見唔見到？

彭樹雄先生：見到，有。

MR DUNCAN：（經傳譯員）大家知道荃威花園即係已經有二十年係做巴士總站。

彭樹雄先生：係，冇錯。

MR DUNCAN：（經傳譯員）咁另一封信，日期 2017 年 9 月 29 號，係頁數 199-18，係即係重新申請嘅。

彭樹雄先生：係，見到。

MR DUNCAN：（經傳譯員）咁 199-26，係 2017 年 12 月 29，即係話第一次申請之後，差唔多兩年之後發生嘅事嚟，「關於你嘅申請化學廁，我好高興話畀你聽，我哋而家批准等等，咁我哋夾附咗」--有三十二個條件，即係關於呢個化學廁，你要遵守呢啲條件？

彭樹雄先生：係，冇錯。

MR DUNCAN：（經傳譯員）我睇嚟嘅，似乎用咗好多時間嚟到申請喎？

李澤昌先生： Yes.

彭樹雄先生： Yes，係，冇錯。

MR DUNCAN：（經傳譯員）係咪一個好獨特嘅個案，定係呢個反映一般嘅經常發生嘅情況？即係話你申請擺化學廁，係咪經常都係咁嘅？

李澤昌先生：我可以咁樣講，你睇--你留意到嗰個日子係 2017 年 12 月，呢個就係樂華事件之後嘅事嚟。我頭先都講過，其實呢個化廁，我哋喺呢段時間，係有二十六個係好短時間去得到呢個 approval，係一個非常之漫長，你頭先--我哋頭先都講咗，你話仲有一百個係要倚賴周邊嘅設施，好似話公園同埋商場，我哋仲有好多工作做，但係真係係基本上申請一個化廁，係講緊係用年作為一個單位去計算，係真係有個難度。

彭樹雄先生：Mr Duncan，其實呢個--你 quote 呢個例子，呢個荃威花園，其實我都有參與。我哋第一次申請，點解我哋--首先我哋點解會申請，正如阿 Mr Duncan 講咗，呢個站其實係好多年㗎嘞，一路我哋都係用喺個總站對面一個商場嘅洗手間，佢哋係畀我哋啲車長用。但係唔知點解，佢突然之間就話「我唔會再畀你哋車長用嘞。」咁於是乎我哋嘅車長就要行好遠。咁我哋就喺 2016 年 1 月 21 號，就第一次申請，咁一路就係來來往往，咁就基於居民嘅拒絕，區議員嘅反對，咁運輸署就同我哋講就對唔住，佢就唔會申請。咁直至到我 2017 年 9 月，我落去呢一個站頭度去 visit，即係同啲車長傾偈，咁啲車長個反應非常之大，咁於是乎我就同我哋個經理講就話「唔得嘞，我哋一定要再寫信去畀運輸署。」咁正如李生講，因為大家都記得 2017 年年中，樂華邨，我哋想等一個休息室，搞咗好多好多年。咁 eventually，結果我哋就成功爭取咗。咁之後就都睇得到，嗰個步伐係快咗，但係都同阿李生咁講，我哋係用年做單位，申請一個化廁，呢個我哋其實都話，我都想強調，對於我哋前線車長，前線同事，洗手間呢個問題係真係好困擾，呢個係。

MR DUNCAN：（經傳譯員）請我哋大家睇番 KMB-1，同埋你提供嘅資訊、資料，係你提供畀委員會嘅資料，就係關於員工嘅設施、廁所等。根據呢啲分析，有七個總站似乎完全冇廁所，冇呢啲設施。如果大家睇 208 頁，第三、第四個記項，新屯門中心同埋另一個喺屯門嘅，係跟住 209，港澳碼頭、長沙灣，咁呢度有個係長沙灣、葵盛中、祖堯，呢啲總站，咁佢啲巴士車長點應付？

李澤昌先生：佢哋去嗰啲商場嘅洗手間度。

MR DUNCAN：（經傳譯員）算唔算係公廁？

李澤昌先生：佢有啲係，有啲 public toilet 係嗰啲政府嗰啲嚟，但係佢周邊喺十分鐘之內，佢哋去得到㗎嘞。

MR DUNCAN：（經傳譯員）呢度你講嘅公廁，你話有一百個，大部分有都包括係商場？

李澤昌先生： Yes.

MR DUNCAN：（經傳譯員）咁有啲點解空白㗎，呢七個係完全冇任何嘢寫低？係咪即係話就算係商場嘅廁所都冇？

彭樹雄先生：Mr Duncan，我再去睇一睇，有個可能性就係，佢係倚賴一啲商場嘅洗手間，但係因為商場洗手間佢係有時間限制，即係佢商場閂門，嗰個洗手間就會鎖，咁呢個我可以再睇一睇，我再--或者我稍後回覆 Mr Duncan。

MR DUNCAN：（經傳譯員）咁先暫時唔睇廁所，睇番休息設施。响咁樣嘅情況，我想睇番工會嘅提供嘅證供，我哋聽到佢哋嘅喺第九日嘅--第九日嘅時候，聽到佢哋嘅一啲證供。第九日，第 50 頁，呢個係陳先生，龍運嘅，陳廣龍（陳廣能？），佢係其中一個巴士總工會嘅代表嚟，佢响第九日作證。

我想就去番--睇番第 50 頁嘅第 20 行，佢就話--陳生就話「我係龍運嘅，我想補充一句。」即係佢話之前講過，而家就補充，佢話「响 E33P 呢條線」--我相信係路--我相信--我理解呢個係路線，「2016 年，咁就係廿四小時咁樣營運，呢條線，咁就大概就有六十程，有六十程，咁個巴士總站喺兆康南站，嗰度係冇休息室，亦都冇廁所。原本，佢已經有一條線㗎嘞，去到 2016 年，變咗全日線，咁我哋就要响嗰個巴士總站嗰度食飯，同埋喺特別嘅地方就係休息，不過就冇休息室。咁我哋不斷嘗試過之後，最後有一個，咁當地同埋運輸署就唔批准，咁而家呢個--我哋呢個亭就停咗，關咗兩年，咁我哋一路都要求有個休息亭，不過始終都做唔到，亦都未收過通知話幾時可以提供到。」

咁黃小姐問「咁關於呢 E33P，你幾時申請要求有咁樣嘅休息亭，係咪用書面？」

佢話「我哋响 2015 年同公司見面嘅時候提出，即係工會同佢見面，咁公司話畀我哋聽，佢一路就向唔同嘅當局申請，不過 2016 年，區議會就話應該係呢條全日線嘅嚟到係服務屯門居民，我話我哋如果冇一個休息室，我哋點能夠佢改善個服務嘅質素？我哋嘅意見就轉達咗畀區議會同埋運輸署，就算係到到今日，到今日為止，都未再收到佢哋有咩嘢回應。」

咁我未問我呢個問題之前，我想你去番雜項 2，呢個係嗰個主席去探訪嘅紀錄嚟，899 頁。由 899 頁，一路去到 902 頁，咁呢度觀察--即係探訪者嘅觀察

所得就係咁樣，「嗰個巴士總站就係冇休息室，咁嗰啲駕駛 E33P 嘅車長只能夠响兩程之間，就係响個巴士車箱裏面休息，因為嗰度冇--呢個係個露天嘅總站，冇休息室，根據另一個車長講，同一路線嘅，嗰度有一個係儲物櫃嘅地方，咁可以擺水，咁另外兆康站係你可以用八達通去到裏面嘅廁所，不過要去，就要來往要起碼七、八分鐘。」咁有啲相片，911 頁，即係呢個係總站，我哋就有個擺儲物櫃嘅，就冇廁所，咁廁所就响兆康站裏面。咁你都可以估到我想問乜嘢，點解個總站--咁你批准設立總站，但係冇提供廁所或者係休息嘅設施？

李澤昌先生：我諗頭先主席都講咗，呢個係一個好核心嘅一個問題嚟，即係呢個我答你唔到，但係就而家呢個最新嘅情況，就其實運輸署就已經係批咗佢呢個站頭嗰個設施，咁當然批咗之後，仲有一個工作要做，就係申請電。咁因為佢嗰個程序上，就係要申請咗，有咗個政府嘅 approval，然後先至可以申請電，咁申請電都要一段時間，所以係我哋而家跟住嘅工作就係努力咁樣申請嗰條電線，駁到呢個休息嘅設施。

MR DUNCAN：（經傳譯員）就唔想--我哋如果唔返番去嗰個運輸署嗰啲申請文件嗰度，你明白佢哋嘅講法就係話，佢哋會協助方便你同其他嘅政府部門溝通。

李澤昌先生：係，冇錯。

MR DUNCAN：（經傳譯員）呢個係咪就係你嘅經驗？就係咁--有冇效？

李澤昌先生：我自己個人覺得有啲部門，有啲係可能係真係未必需要，因為呢一個所謂休息室嘅設施，其實呢一個都幾係一個 temperate，一個好臨時式嘅一個建築物，咁佢有啲部門，佢問嗰啲部門其實同一啲即係永久性嘅建築物，係接近乎係一模一樣，咁呢一個過程係我覺得有啲比較長。另外一樣嘢就係，嗰啲申請電，咁因為佢個制度係通常我哋係批咗之後，然後啲電嘅公司先至有批文，先至可以接受你個申請嗰條電線入嚟，咁嗰度亦都有啲程序上，我哋都冇辦法可以即係有個突破，咁所以而家就算等到申請咗之後，我係問緊中電可唔可以加快申請條電，咁即係我可以--你可以想像到，其實係有啲嘢係可以做得快啲嘅。

MR DUNCAN：（經傳譯員）幾耐之前，你申請呢個咁嘅地方有個係亭同埋嗰個廁所，係幾時申請？

李澤昌先生：我要即係返去 check check，但係唔係一個短時間，即係唔係用月嚟計，可能已經遠遠超過一年㗎嘞。就算申請電，都要一段即係起碼要好幾個月，最快都要。

MR DUNCAN：（經傳譯員）就未批准㗎，係咪呀？

李澤昌先生：電未。

MR DUNCAN：（經傳譯員）你覺得幾時可以攞晒啲批准？

李澤昌先生：可能開完呢個會就會快啲，但係即係我相信係，如果唔係好複雜，都要

講緊係四至六個月，係冇得少。

彭樹雄先生：其實 Mr Duncan，我哋有好多嘅--其實有好多嘅站頭，我哋用咗好多時間去申請嗰個休息室，但係好多時，個休息室擺咗喺度，我哋申請電，真係一個--都係一個好漫長。同埋我哋最慘就係，啲同事就會講「喂，你都--休息室都擺咗喺度，點解唔用得？」咁，但係查實就係，因為真係要等埋其他政府部門，有啲甚至乎要睇埋渠務署等等，即係好多好多即係有啲要經過嘅程序。

主席：（經傳譯員）各位，而家已經 1 點鐘，我諗我哋而家係食午飯，咁今日下晝兩點半繼續，唔該晒。

下午 12 時 59 分聆訊押後

下午 2 時 30 分恢復聆訊

出席人士如前。

主席：（經傳譯員）各位午安。係，鄧樂勤大律師。

MR DUNCAN：（經傳譯員）唔該你，主席。

彭樹雄先生：喺我哋嘅 lunch break 之前，就我哋會 check 一啲嗰啲站頭嗰啲設施，或者介唔介意我匯報番先？我哋去--麻煩你去番 KMB Long Win Bus bundle 1(A)，就係 Long Win Bus & KMB bundle 1(A)208 頁。

主席：Yes.

彭樹雄先生：首先我第三個同埋第四個站，一個叫做 Handsome Court 同埋新屯門中心。因為我哋嗰啲車係特別車嚟，即係淨係朝頭早有服務，所以嗰度係冇一個洗手間嘅設定，同埋啲車長唔會喺嗰度休息嘅。

另外就去到 209 頁，嗰個 Central (Macau Ferry)，對唔住，呢度我哋有少少遺漏，其實嗰度係有 public toilet 嘅，有公共洗手間嘅。然後落去...

主席：（經傳譯員）麻煩你等一等。搞錯咗，就唔係話遺漏？

彭樹雄先生：係，冇錯，冇錯，對唔住，我哋係有啲粗疏㗎，呢度...

主席：（經傳譯員）信德中心，係咪呀？

彭樹雄先生：係，冇錯，係，冇錯，主席。

主席：（經傳譯員）係。

彭樹雄先生：好，另外落去，就有個長沙灣，Cheung Sha Wan，有個甘泉街South，甘泉街南，嗰度我哋係冇一個化廁嘅，個原因就係我哋用對上嗰個總站，甘泉街北嗰個嘅化廁，即係兩個站係share一個化廁嘅。

好嘞，然後落去屘二嗰個，葵盛中。咁嗰度，對唔住，呢度又係我哋有啲粗疏，其實係有一個嘅KMB嘅toilet嘅，嗰個係permanent，嗰個係永久嘅toilet嚟。

然後去到第210，最褸屘嗰個又一邨。其實又一邨我哋係冇巴士總站嘅，因為我哋嗰條203C嗰條線，就係去大坑東嘅，不過係經又一邨，所以嗰度係冇一個洗手間嘅設備，因為亦都冇車長喺嗰度休息嘅。

好嘞，另外就睇番亦都先前有工會嘅代表講，就係龍運巴士嗰個E33P嗰個兆康南。正話Mr Duncan你就問我哋係幾時開始申請，嗰個兆康南站，我哋係2017年嘅8月係入紙同運輸署申請站長室、休息室同埋化廁嘅。而運輸署喺2018年嘅7月，2018年嘅7月係已經批咗嗰個嘅approval，我哋而家就係喺度申請緊電力嘅供應嘅。

多謝，Mr Duncan。多謝主席。

MR DUNCAN：（經傳譯員）唔該晒你，彭先生。而家想請你睇呢一個雜項文件夾2，899頁。今朝睇過嘅，呢個係一個報告，就係報告番委員就係去巴士總站同埋車廠參觀。

請你睇呢個報告嘅第2頁，即係第900頁。喺第三行，即係(B)嗰度嘅第三行，沙田火車站巴士總站，嗰度嘅第三行就咁講，就話有新型嘅休息設施，有冷氣嘅，有空調嘅，有抽氣扇、有五張椅。然後喺底下嗰度，就話平均嚟講，一日就會有多過十位司機喺嗰個巴士總站同一時間係休息嘅。

如果我理解得正確嘅話，似乎係咪就話呢個情況都唔係淨係沙田鐵路站嘅巴士總站唯一係有咁嘅情況？因為你睇番901頁嗰度，就係講及聯和墟巴士總站喺第2點嗰度，第1大段嘅第2點嗰度就提及一個細嘅休息室，裏面有三張椅。

然後喺嗰一版嘅第2段，第4個大點嗰度，就話喺探訪嗰日，大概有六、七名司機喺總站嗰度休息，當時就係繁忙時間。

落到去903頁，就係山景巴士總站，有五張椅，但係今次就冇提及話究竟係任何時間，同一時間裏面，總共會有幾多位司機喺度休息。呢度有兩點，我哋聽到喺車廠嗰度，車廠有個係所謂暗啲話「黑房」，就係有設施係讓車長可以攤平咁樣瞓喺度。但係如果喺巴士總站嚟講，嗰啲休息室就冇同樣嘅情況

喎，你覺唔覺得咁樣係理想嘅呢？

彭樹雄先生：呢個係會發生嘅。我想強調其實我哋 呢啲所謂 Kiosks，休息室，我哋 有兩種唔同嘅 size 嘅，一種係細啲，一種係比較大啲。我哋 好多時因為嗰張--如果要真係擺一張 horizontal 嘅椅喺度，其實佢佔用嗰個嘅空間都有--即係會有一定嘅空間係會佔用到。其實我哋 都儘量就係話視乎嗰個使用個 usage，因為有一啲嘅總站，其實車長未必會喺中段休息會使用--即係嗰三個鐘頭未必一定會使用嗰個站頭嘅設施嘅，但係儘量如果我哋 可以，我哋 都會申請，如果容許的話，我哋 都會擺個比較大啲嘅 kiosk 喺度。

李澤昌先生：呢度有少少補充嘅，其實喺嗰個車廠裏面，有啲真係好似瞓低喺度嗰啲咁樣。但係而家我哋 有啲係本身係 purposely built 嘅 terminus，其實佢有啲就唔係一張凳嚟嘅，佢有張比較低少少可以坐得舒服啲嘅凳，畀嗰啲員工休息。咁個數量就係我今日手上冇嗰啲巴士總站，嗰啲係真係畀嗰啲員工，雖然唔係坐低，可以橫--好似張床咁瞓，但係嗰啲都好舒服。而家你所講嗰啲，因為佢本身嗰個 kiosk 嘅 size 係正正係得嗰 40 平方呎，咁就其實係擺得五、六張凳。我哋係確確實實覺得係有呢個需要，嚟緊我哋係好希望喺好多站頭裏面，都比較大嗰啲站係有兩個形式嘅凳，一種就係坐直嗰啲凳，另外一種係坐低，比較舒服少少嗰種。而家我哋 都已經係好多係做緊呢樣嘢。

彭樹雄先生：係，Mr Duncan，今朝早喺個聽證會度，我都想提供一啲數字或者畀呢個 Committee 參考嘅。我哋 九巴嗰啲特別更嘅車長，其實我想講就係我哋有大約九個 per cent 嘅特別更嘅車長，即是一百三十四位嘅特別更車長，佢係會喺嗰四個廠裏面休息嘅，即係換句話，正話李生講嗰啲，我哋 會有一啲 horizontal 嘅床等等，呢一百三十四位同事就會喺廠休息嘅。

另外喺各個站頭休息嘅，就佔咗十七個 per cent，就係二百六十二位。而返屋企呢三個鐘頭或者以上嘅休息，其實佔嘅總數係所有特別更嘅車長係七十四個 per cent，係一千一百一十七位同事，七十四個 per cent 嘅同事係佢哋可以返到屋企休息嘅。

正正我哋 KMB 相對地比較好嘅，就係因為我哋車廠嘅分佈比較多，同埋亦都可以真係就到一啲車長，佢哋係可以係短時間裏面係能夠返到屋企休息。多謝你，Mr Duncan。

李澤昌先生：即係但係嚟緊個將來，我想補充，即係當然呢啲係一個數字，但係即係嗰個 terminus 休息嗰個設施，我諗我哋都會再做緊啲工夫。我諗嗰啲凳，同埋可以坐得舒服嗰啲，其實唔係淨係畀一啲特別更，我諗有一啲一般嘅值更嘅同事，我諗我哋都要喺嗰度會做啲嘢喺度。

MR DUNCAN：（經傳譯員）大啲嘅休息室，我想問有冇個房係畀佢哋可以瞓平呢？

彭樹雄先生：佢就唔可以係完全 horizontal，但係好似一啲 armchair，安樂椅咁呢，佢係可以係躺臥到嘅，但係就唔係--完全唔係--即係都係當然，唔係一張

床咁，係 horizontal，但係都係一張安樂椅咁斜斜地，咁可以休息到。其實我哋開始越嚟越我哋會擺得多啲呢種嘅椅嘅。其實係有，做緊㗎，不過我哋會繼續--即係如果可以--喺個面積上面容許，其實我哋可以擺得更加多添。

主席：（經傳譯員）有冇人規定過嗰個休息室嘅大細？

彭樹雄先生：我哋每一次呢啲 kiosk 去畀運輸署申請，其實有個 size 嘅限制嘅，呢個已經係最好嘅 size，即係喺而家嘅規架底下，呢個已經係最好嘅一個 size。

主席：（經傳譯員）呢個咪間接咁講，就係運輸署係限制咗個大細？

彭樹雄先生：有呀，有㗎，我諗唔一定係運輸署嘅。因為有啲地方...

李澤昌先生：係有嘅，係有嘅。

彭樹雄先生：係有嘅，係，但係個...

李澤昌先生：呢個 size 係政府 stipulate 咗，所以其實我哋係呢個 size 係絕對開放，係絕對希望可以係大啲嘅。

彭樹雄先生：其實我哋都好--係申請即係由 A 亭會轉個大--我哋都有咁樣做。

主席：（經傳譯員）邊一個政府部門係規定咗呢個休息室嘅大細？

彭樹雄先生：運輸署。

李澤昌先生：運輸署。

主席：（經傳譯員）佢規定咗嗰個呢兩種尺寸已經實施咗幾耐？

李澤昌先生：五年。

主席：（經傳譯員）真係？唔係仲多過五年咩？

李澤昌先生：（經傳譯員）我會話起碼五年囉。

主席：（經傳譯員）你有冇係申請過大啲嘅休息室？譬如話話畀佢哋聽，就係話我哋想佢哋瞓低，躺平咁瞓，有冇咁問過？

李澤昌先生：我哋通常咁做，我哋係申請兩個 40 呎嘅，呢個我哋通常都會咁做，咁得到嘅通常都係一個返嚟。如果你話即係可以係申請大嘅，大過 40 嘅，我哋應該係未試過嘅，未試過。

主席：（經傳譯員）所以你冇試過，亦都未必知個答案？

李澤昌先生：啱。

主席：（經傳譯員）但係你就推論，就係你想擺兩個 40，即係話如果要 100，應該

佢哋唔會批准，你係咪咁樣推論？

李澤昌先生：(Nodded head)

主席：（經傳譯員）律師。

MR DUNCAN：（經傳譯員）你講嘅嗰啲好似安樂椅嘅椅，我想問下報告裏面有冇相？

李澤昌先生：呢度冇影到，但係我哋有好多我哋啲總站嗰啲呢，係有呢一種凳嘅。

MR DUNCAN：（經傳譯員）第 2 點亦都係源至剛才我讀出嚟嘅嗰啲描述，你有時就話有三至到五張椅，但係同一時間就可能有七至八個人就係喺嗰度休息緊，咁嘅情況滿唔滿意？

李澤昌先生：當然即係永遠都可以做好啲嘅，我個人覺得唔係好滿意，所以我頭先都講咗，我哋會係未停過係繼續同政府係再繼續申請，所以休息室嗰個問題，我哋係仲未解決嘅，所以我哋係未滿意嘅。

MR DUNCAN：（經傳譯員）好嘞，而家讓我講番運輸署嘅文件夾，即係今朝早我哋展開呢一段對話嘅時候，就已經係睇緊運輸署嘅文件，就係運輸署嘅 1 號文件夾，438 頁。嗰度睇到有兩條問題嘅，就問運輸署兩條問題，佢哋亦都答咗嘅。咁想請你睇番 438 頁。第 1 點嘅第二句，就係相關嘅部門或者當局考慮同埋係審核嗰個申請，睇下畀唔畀你哋有呢啲員工設施嘅時候，運輸署一直都有提供適當嘅協調工作嚟到係便利係早日可以安裝到咁嘅設施。

我想問，你哋嘅經驗係咪都係咁樣樣？

李澤昌先生：佢係做一個協調嘅工作，但係申請呢啲嘢，其實佢係有兩個最大嘅部門嘅。運輸署佢通常係處理一啲係 Housing Department 或者 Housing Authority 以外嗰啲，嗰啲係佢哋去處理。但係喺一啲 Housing Authority 嗰啲範圍裏面，就會由番 Housing Authority 去做 coordinate。所以係基本上係兩個唔同嘅單位去處理。

MR DUNCAN：（經傳譯員）想問下，運輸署嘅協調工作有冇令到你哋早日係得到批准去造嗰啲設施，即係從你嘅經驗嚟計？

李澤昌先生：即係如果作為一個--即係我哋一個營運者，我覺得佢可以快啲囉。

MR DUNCAN：（經傳譯員）第二個要點，第三句「專營巴士營運商佢哋嘅要求同埋意見，即係關乎洗手間同埋休息設施都會係喺適當嘅時候，加入咗巴士總站嘅設計嗰度。」

喺實際嘅經驗嚟講，係咪真係咁？

彭樹雄先生：其實我好難答 yes 或者 no，因為有啲可能我哋會知悉嘅，但係有啲我

哋冇知悉。所以我對唔住，Mr Duncan，我真係畀唔到一個好 yes or no 嘅答案畀你。

MR DUNCAN：（經傳譯員）邊個負責設計呢啲巴士站？

彭樹雄先生：運輸署。

李澤昌先生：我覺得有幾種嘅巴士總站嘅，有啲巴士總站係應該屬於政府嘅地，或者政府嘅產業，佢去做。咁喺做嘅時候，其實佢都未必決定咗係邊一間公司入嚟行嗰條巴士線，其實就確實佢就好少係搵咗邊一間公司畀意見。佢哋運輸署亦都係有一班專業嘅團隊，或者佢有佢自己嘅顧問係設計個巴士站。所以我就喺我過去咁多年，我就應該就未有人諮詢過我哋嗰啲洗手間喺邊度，呢啲問題。

MR DUNCAN：（經傳譯員）換句話講係運輸署設計每一個巴士總站，係咪呀？

李澤昌先生：如果係佢哋嘅地方，但係當然譬如好似係--即係我頭先想講嗰啲 bus transport interchange，即係可能同鐵路嗰啲有關係，我諗當然個業權，呢個我唔係好清楚。但係我哋本身就真係冇喺嗰個諮詢裏面係有知會。

MR DUNCAN：（經傳譯員）當運輸署設計巴士總站嘅時候，即係如果係喺政府土地上面嘅巴士總站，佢哋喺設計入面，有冇包括埋廁所同埋休息設施？

李澤昌先生：即係我覺得係應該如果佢叫呢個叫做“bus terminus”，佢係應該有一啲 terminus 嘅設施喺裏面，但係就我眼見，而家暫時有啲係真係冇，我答唔到佢哋本身嗰個標準係點樣。

MR DUNCAN：（經傳譯員）439 頁，第 1 點，「運輸署係有積極咁樣同相關嘅部門同埋單位，就係聯絡去解決任何專營巴士公司喺申請設施嘅時候遇到嘅困難。」

根據你嘅經驗，運輸署有冇有效咁樣解決你公司所遇到嘅問題？

彭樹雄先生：Mr Duncan，我嘅答案，我只可以話可以做得好啲嘅。即係因為佢呢一個 bullet，其實好 broad，即係我完全唔能夠 gauge 到到底即係佢所謂“proactively”嗰個程度係去到邊度。

李澤昌先生：即係或者我咁樣講，其實運輸署係冇原則上係反對個站頭個設施係有呢啲咁嘅休息室，或者廁所、化廁嘅東西。但係因為即係每一次去到做啲地方上嗰啲咁嘅諮詢，或者喺個土地上有冇足夠嘅地方令到佢可唔可以擺到嚟嘢，佢係真係面對咗好多呢啲咁嘅疑難。當然，處理呢啲嘢其實唔係咁容易，我好明白，但係就我哋感覺到，我哋同運輸署係冇一個好大嘅分歧，但係亦都睇到佢哋有一個難度喺呢方面。

MR DUNCAN：（經傳譯員）第 440 頁最後嗰一句，「運輸署就會協助專營巴士公司去得到當地或者當區嘅支持，就會透過做一啲實地嘅考察，或者係同佢哋會面去搵出一啲可行嘅方案，咁呢去加快呢一個實施嘅方案，就可以幫助到車長同埋乘客。」

你公司有冇即係得到咁樣嘅協助？

彭樹雄先生：呢個我可以答呢，就係當我哋入咗一個申請嘅時候，我都知運輸署係會聯繫當區嗰啲區議員等等。如果真係有反對，大家都睇到，好似正話荃灣荃威花園嗰個個案，運輸署嘅回覆最褸屘嗰段就係話「當區居民反對，你哋巴士公司搵過個位置再申請喇。」咁樣。呢個就係我哋好多時都會遇到呢一個咁嘅問題嘅。

MR DUNCAN：（經傳譯員）最後我就想問一啲問題去澄清一啲嘅事宜嘅，即係之前你都已經向委員會講過呢啲議題。首先呢啲車長，即係返工，開始上班嘅時候，即係以我所知，即係而家冇提供任何嘅交通工具畀啲車長去佢哋返工嘅地方，係咪呀？佢哋要用自己嘅方法去到返工嘅地點，係咪？

彭樹雄先生：其實我哋公司係有提供到一啲我哋所謂嗰啲叫“crew bus”，我哋嗰啲廠車。我哋嘅廠車就係早更，其實就基本上個涵蓋面都幾廣泛，甚至乎，雖然我哋冇廠喺香港島，我哋香港島都會有朝頭早嘅 crew bus 廠車係接送啲同事返番去個屬廠度開工嘅、工作嘅。

MR DUNCAN：（經傳譯員）你可唔可以提供多啲嘅詳情？咁樣委員會就會知道呢一個員工巴士服務係點嘅。

彭樹雄先生：冇問題，其實我哋有嗰啲 Crew bus 嗰啲嘅路線，幾多點鐘開等等，我哋都可以提供到嘅。早更，因為早更嗰個交通嗰個問題，有啲同事返夜更，咁又點呢？其實同事--因為我哋嗰啲同事係可以自己搭巴士等等，佢哋好多時都係用番我哋當日中午嗰啲巴士嘅服務，亦都係可以返到去個站頭度攞車工作嘅。

MR DUNCAN：（經傳譯員）我想你揈去 KMB-12 文件冊嘅第 5010 頁，呢份就係你喺上次聆訊之後提供嘅，將份文件。呢度就係一啲數據，就係你啱啱有提到呢啲數字嘅。呢啲數據就係關於有幾多嘅車長會喺車廠、車站或者屋企，即係佢喺下午度休息嘅。你提到大概係七成嘅車長係會返屋企休息嘅，即係喺佢哋落更嘅時候。

會唔會有任何協助幫呢啲車長返屋企，或者係由屋企返嚟去恢復工作？

彭樹雄先生：其實我哋有個叫做先天性嘅優勢，就係我哋屬廠比較多。我哋如果個車長佢加入我哋嘅公司完成受訓，基本上佢哋係會派番去佢住嗰個地方嘅附近嘅。所以正正就咁樣，你睇得到所以好多同事，74 個 per cent 嘅特別更嘅車長，其實佢哋根本就係 walking distance，可以返屋企，有啲甚至乎住喺個巴士總站樓上嘅屋邨等等，所以佢哋其實就係好容易地就可以返到屋企。

MR DUNCAN：（經傳譯員）喺上次嘅聆訊嘅時候，即係第十四日，就係喺 112 頁，我哋知道車長一日可能會係揸三條路線嘅巴士嘅，你記唔記得？

彭樹雄先生：係，我記得係。

MR DUNCAN：（經傳譯員）即係如果係每日揸嘅路線係減少到兩條嘅話，即係喺財

政上會有咩嘢後果？

彭樹雄先生：我諗財務上，我唔覺得會係一個好大嘅分別，不過可能即係反而個車務運作上可能會有啲影響。因為其實我哋所謂呢啲 interlining，或者每日唔揸多過三條線，其實我想講就唔係淨係我哋嗰間公司係會有呢一個做法。

其實我嘅理解，我哋香港所有嗰啲專利巴士嘅 bus operator，其實都係有呢一種 interlining 嘅方法，甚至乎李生喺上一次嘅聽證會都講咗，我哋啱啱搵咗英國一間嘅顧問公司嚟睇我哋嗰個巴士嘅運作，包括維修，包括嗰個車務。其實我同嗰啲 consultant 嘅接觸，overseas 嘅國家，即係外國，其實嗰個 interlining，有啲甚至乎比我哋多過三條線添，即係佢哋都係一個幾普遍嘅一個做法嚟嘅。

咁所以答番你嘅問題，Mr Duncan，financially 我諗嗰個差別唔會太大，但係可能嗰個運作上，因為你要明白每一日嗰個客量，又或者我上一次都講咗，可能有啲同事攞病假、攞咗假，可能即係嗰個調配上，嗰個彈性，如果我哋容許佢唔多過三條線，其實嗰個運作上會暢順啲。同埋我都強調，佢哋每一條線，佢一定要有個路線訓練嘅，冇路線訓練，我哋絕對唔會派車佢揸嗰條線嘅。

MR DUNCAN：（經傳譯員）即係車長同埋其他嘅工會有冇向你投訴過要揸三條線係太多？

彭樹雄先生：我大部分我認知嘅，其實我冇聽到啲好大嘅聲音，當然可能個別有啲--即係可能嗰日佢要揸兩條線，佢可能會有啲聲音，但係整體嚟講，我覺得係okay。同埋佢哋亦都明白到嗰個運作上，唔揸多三條線，其實係有個咁嘅需要，同埋即係基本上呢個都係一個幾普遍嘅一個運作嘅做法嘅。

MR DUNCAN：（經傳譯員）我哋聽到即係如果一個車長係要揸一條新嘅路線嘅時候會發生咩嘢事，如果一個車長需要揸一條新嘅路線，會唔會有另外一位車長喺車上面協助佢？

彭樹雄先生：所有車長，佢所有揸嘅路線一定要有嗰個路線訓練嘅。如果佢要係揸一條新嘅線，佢一定要經過駕駛訓練學校，即係我哋 KMB 駕駛訓練學校裏面嘅路線訓練，先至會揸嗰一條線嘅。

李澤昌先生：我諗呢個問題有兩個，第一個就係如果啱啱出嚟，喺我哋嘅駕駛學院出嚟，佢初初接觸嗰盤軚嘅時間，佢側邊會有一個人陪住佢一段時間嘅。另外你講嗰個，就話如果佢係一個有經驗嘅車長，然後再學一個新線嘅話，嗰個新線係一定要經過嗰個駕駛學院教佢，咁係咁樣。

MR DUNCAN：（經傳譯員）當佢第一次揸呢條新線嘅時候，係咪有另外一位嘅車長喺車上面協助佢？

彭樹雄先生：Yes, buddy driver.

MR DUNCAN：（經傳譯員）即係夥伴車長，係咪呀？

蘇偉基先生：睇睇嗰個車長佢入職幾耐，如果佢係一個好資深嘅車長，佢再學咗一條新嘅路線，其實呢啲路線對佢嚟講唔係算新嘅，咁就佢就可以駕馭得到。但係如果一個新嘅車長，我哋喺佢出去學 until 一段短時間，我哋係有一啲 buddy driver，一啲資深嘅車長，就喺佢嗰個駕駛艙側近嗰度，畀到佢一啲信心，同埋有啲需要，有啲支援佢嘅。

MR DUNCAN：（經傳譯員）梁博士就提到，即係引入一個二十個增薪點嘅制度去代替現有嘅八點增薪點嘅。你可唔可以話畀委員會知道，即係呢一個建議幾時會實行？

蘇偉基先生：喺 9 月 1 號開始實行。

MR DUNCAN：（經傳譯員）即係已經係實施咗，係咪呀？

彭樹雄先生：係。

梁乃鵬博士：（經傳譯員）鄧大律師，由 9 月 1 號開始，如果即係有新車長加入九巴或者龍運，佢嘅薪金就會係月薪--即係佢每個月大概係會賺 2 萬 3000 蚊，係包括年中嘅雙糧嘅，所以比起之前嘅薪酬係大幅上升嘅。

MR DUNCAN：（經傳譯員）唔該晒。

主席：（經傳譯員）你喺最新呈交嘅文件都係有分享過呢個資訊嘅，係咪？

梁乃鵬博士：我哋好樂意係向委員會係呈交一個比較圖，即係喺 9 月 1 號之前嘅薪酬同埋 9 月 1 號之後嘅薪酬嘅，我哋可以比較一個每日嘅薪酬，或者日薪車長同埋月薪車長嘅薪酬。

蘇偉基先生：我哋會儘快提供番。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）有冇發生過呢，即係車長喺執行職務嘅時候就病咗，會唔會發生？

蘇偉基先生：會有機會㗎。

MR DUNCAN：（經傳譯員）公司有冇任何嘅程序或者指引，即係如果發生呢個情況嘅時候會點做？

蘇偉基先生：首先喺招聘車長嗰陣時，我哋嗰個招聘書提醒，如果車長係身體不適嗰陣時係應該申請告假。我哋亦都喺每個廠嗰度係有自己嘅 clinic 係可以畀佢睇醫生，亦都喺派更嗰陣時，佢喺嗰個站頭拍卡，亦都會係提醒佢，「你係要當日嗰個身體良好，你先至可以揸車。」佢就可以係申請病假。

MR DUNCAN：（經傳譯員）如果即係車長揸緊某條路線嘅時候病咗，有啲咩嘢嘅程序或者政策係會執行？

彭樹雄先生：如果有車長喺駕駛途中，佢感到唔舒服，其實車長會知道--佢係可以點，佢停低架車，然後畀電話我哋當值嘅 inspector。因為我哋有啲督察，佢哋係會做嗰個所謂巡邏嘅，佢哋會揸車巡邏嘅。佢哋只要擺低架車，然後我哋督察就會安排另外一架車，就等嗰啲客過咗另外一架車，然後我哋會車個車長去睇醫生，呢個係一向都係咁樣做緊嘅。

MR DUNCAN：（經傳譯員）KMB-12 文件冊，5063 頁嘅。呢個就係你喺上次嘅聆訊之後向委員會提供嘅文件，呢度就係描述咗新車長接受嘅訓練，就係 5063 頁。另外就係現有車長嘅訓練，就係喺 5064 頁。

公司就住駕駛疲勞，有冇提供任何嘅訓練？我所謂講話即係點樣處理疲勞，我或者解釋下。我哋指即係佢哋點樣辨識，即係知道係有疲勞--唔係，知道點樣防止，或者點樣休息，所謂嘅管理疲勞狀況，有冇呢啲咁樣嘅訓練？即係你哋車長訓練有冇呢？

黃祥明先生：我相信頭先蘇生講咗喇，啲車長入職嘅時候，我哋都會提醒佢哋，如果係有唔舒服，就需要睇醫生，直情唔好繼續揸車。Mr Duncan，你剛才講嘅 fatigue，我哋當佢係一種唔舒服嘅時候，佢都應該係跟番我哋呢個守則去做。

蘇偉基先生：基於一個疲倦嘅管理嗰度，有幾方面公司係做咗東西。第一，就當然運輸署佢有個指引，對於車長嗰個工時。咁符合呢個指引，就起碼都有一個足夠嘅休息。第二，就係喺車長嗰個安全手冊嗰度，亦都有個章節係提醒佢哋作為一個專業車長，佢係要管理佢自己嘅健康。當佢發覺係身體不適嗰陣時，佢係應該唔好去做嗰個更次，更加通知公司去停止。呢點，我哋係有提佢。

再者就係話，頭先我哋講咗好多站頭嘅設施。我哋都希望佢而家就係話每六個小時，就會有個 coffee break。每一個車與車之間，亦都頭先講咗有個叫 layover 嘅 break，等佢有個 water break 或者有個 toilet break，等佢可以啱一啱，去管理番佢自己嗰個嘅身體同埋疲倦。

MR DUNCAN：（經傳譯員）根據呢個回覆，我理解啱唔啱呢，即係冇話特別提過話管理疲勞嘅，即係呢啲一般性嘅訓練內容，就唔係特別提過疲勞管理嘅，啱唔啱？

李澤昌先生：冇。

MR DUNCAN：（經傳譯員）上次聽證嘅時候，聽咗好多人講，今年六月初公司第一次從個運輸署知道係有個電子數碼嘅地圖，香港有咁嘅地圖。記唔記得上次聽證係曾經提過？

梁健宏先生：係。

MR DUNCAN：（經傳譯員）公司已經係咪開始運用咗呢個電子數碼嘅地圖？

梁健宏先生：我哋同黑盒製造商喺呢一方面係做緊工夫，係希望可以用到嗰張 map，亦都係做緊嘅。

MR DUNCAN：（經傳譯員）你預期幾時真係可以運用到呢個電子數碼嘅地圖？

李澤昌先生：我哋雙線做緊嘅，我哋同 ZF 之前同你哋 嘅 committee 都傾過，就係佢有兩個系統，一個就用 digital map，另外一個就係用即係人手咁樣放一啲資料入去。佢哋 兩樣嘢都一齊做緊嘅，我哋期望就希望下年嘅 1 月左右，應該就可以將呢一套系統可以嘗試喺即時喺嗰架車個 dashboard 嗰度可以睇到佢嗰個超速同實際上路面個速度，就反映番喺嗰個顯示屏嗰度。我哋 期望係下年嘅 1 月。

MR DUNCAN：（經傳譯員）第十三日我哋聽證嘅時候，呢個係關於記錄嘅，31 頁第十二行，當時上一個月，8 月，嗰陣時都要四日先至可以編制到嗰個超速嘅報告。

跟住回答羅教授嘅問題，佢話司機就用佢嗰個證件嚟到拍卡，跟住就你就唔使等四日，呢個就可以即刻知道嘅。而家個情況係點，而家仲使唔使等四日，定係可以即刻知道？

梁健宏先生：而家都仲係四日嘅，但係循住嗰個方向，我哋係努力緊，希望縮短個日子。

MR DUNCAN：（經傳譯員）幾時你能夠答到嗰個方向嘅目標？

梁健宏先生：我希望可以儘快。

MR DUNCAN：（經傳譯員）咁係咩嘢意思？

李澤昌先生：其實頭先講緊嗰個黑盒同埋嗰個 digital map，呢樣嘢係幫到點解由十日變四日。因為十日變四日，因為佢個 black box 個 information，我哋自己嗰啲資料嵌埋一齊，就由十日變咗四日。而嗰個黑盒，即係個 ZF 嗰個東西，再加埋 digital map 係可以成功做到嘅話，相信呢四日嘅時間一定會縮短，但係縮短幾多，可能係一至兩日，我哋唔知。但係如果你咁樣睇，我哋應該嚟緊下年嘅一月，嗰個 real time 同埋嗰個縮短嘅時間係同一時發生嘅。

MR DUNCAN：（經傳譯員）我就冇其他嘅問題，唔知委員會嘅成員有冇嘢想問？

歐陽先生：（經傳譯員）多謝你，主席。我哋用咗今日好多時間，就講緊點樣能夠改善車長嘅工作環境。你可唔可以描述一下你請司機嘅成功率，譬如上個月同六個月之前比較，係咪容易咗，就成功率係高咗？

蘇偉基先生：唔該委員。而家嘅情況，我哋大約每個禮拜係請到有二十五至三十個嘅新嘅車長，比對我諗半年前，三個月都係短嘅時間，當時係請緊十至十五個嘅。

呢個當然係市場供應一個考慮，我哋自己公司喺期間亦都做咗幾樣嘢。

第一樣嘢就係嗰個薪酬嗰樣，正如頭先主席講，我哋係喺今年 3 月一次嘅優化，跟住喺啱啱 8 月嗰陣時，亦都係做咗今年嘅加薪，接近其實全年都有十五個 per cent 嘅增幅。呢個人工高咗，就多啲人吸引咗。

第二就係嗰啲嘅 condition，頭先我哋講即係多啲嘅休息設施，...（說話含糊）

第三就係我哋喺招聘嗰度，亦都係即係加大力度，我哋做多咗一啲招聘日、開放日，我哋更加係--英文用“reaching out”，主動去接觸我哋嘅群眾，即係一啲 target 嘅 driver，就從而去追番嗰個車長嘅短缺。

李澤昌先生：仲有一點想補充嘅，就係請人嗰個類別，同埋每一個區，因為你知道我哋有四個唔同嘅廠。每一個區，佢嗰個人嗰個類型係好唔同嘅，譬如喺屯門區同喺荔枝角廠區，或者九龍灣區係好唔同。

我哋可能會用一個對症下藥嘅方法，譬如屯門區，佢會係多啲比較女性，佢有一啲時間可能未必足夠做到八或者十個鐘頭每日，可能做到嘅時間係一半，但係最低限度可以知道佢邊個時間好穩定去返工，邊個時間好肯定係會放工，呢度呢，我哋朝住呢啲方向去做啲工夫。你可能會喺個站嗰個 depot 裏面做啲設施，呢個我哋都係同緊政府係傾緊可唔可以做一啲托兒嘅服務之類，係令到佢可以--即係做完嗰幾個鐘頭，可以湊番啲細路仔。

咁有啲地方，譬如有某一啲工種佢係退休嘅時候，就係五十零歲頭，佢未必係想工作一段好長嘅時候，佢同樣地，佢希望有份工作，佢可能又有車牌嘅。我哋都向呢個方向做緊，即係變咗而家去招聘，唔只與時並進，係同個地區性都要扣上關係。因為我哋涉及嗰個區域比較大，譬如你甚至乎去到大嶼山、東涌都有，咁變咗即係嗰個類型係要有啲新嘅環...（說話含糊）

歐陽先生：（經傳譯員）呢個同鄧大律師頭先問嘅有關嘅，就係嗰個總站嘅設計。我得到嘅印象，你嘅回覆，我得到嘅印象，即係話你冇機會係要求有個廁所嘅，你哋 係冇辦法，定係--如果唔係咁做，嗰啲路線就唔提供到？

彭樹雄先生：我諗答呢條問題，其實我諗要好搞清楚，就係其實唔係每一個巴士站都係會喺個設計上冇個洗手間，或者冇站長室。其實有好多站，佢係 factor in 咗呢一樣嘢，但係只不過就係話 somehow 喺某啲嘅站嘅設施裏面，呢一樣嘢就冇包含咗落去。

李澤昌先生：我諗歐陽先生嘅意思係話，即係佢設計新站嘅時候，我哋個角色喺邊度。我可以講畀你聽，佢設計新站，佢通常係先過係批咗條線畀邊個做，所以佢通常佢係設計完個站，如果假設呢個新嘅巴士站，佢然後先至再決定畀邊一間公司入去行呢條線。舉個為例，港珠澳大橋，佢會有一個巴士站喺嗰度。呢個巴士站佢做嘅設計已經講緊好多年前嘅事嚟嘅，但係佢開條標畀邊一間公司入嚟行呢

條線係之後嘅事嚟嘅，所以前後嘅問題，佢都唔知搵邊間公司入去同佢傾個巴士站嘅設計。如果你叫我入去同佢傾個巴士設計嘅時候，我就問「你條路線係咪畀我行先？」咁，即係變咗有個前後嘅問題。所以佢有少少係佢做咗個硬件，然後佢先至落標係搵一個 operator 入嚟做嗰條線。咁所以呢度有少少好似你話，我哋個角色未必喺佢設計時間，佢搵得我哋入去，因為我都未必知道我有機會行呢條巴士線。

歐陽先生：（經傳譯員）即係話你冇辦法之後要求佢啲額外設施嘅？

李澤昌先生：喺港珠澳大橋，我哋嘗試做咗嘅，但係好多嘢已經係--即係個硬件已經喺度，咁變咗係有啲困難。

歐陽先生：（經傳譯員）唔該晒。

主席：（經傳譯員）你提供咗畀委員會唔同嘅會議嘅會議記錄，即係工作小組 3 月--同埋啲訓練、使用科技嗰個記錄係有部分遮蓋咗嘅。响回應嗰個議程，你就有另一個你嘅所謂購物清單，KMB-12，4939 頁。即係話 3 月 13 號就寄咗個議程出去，呢度即刻有個回應，你就利用呢個機會，就寫低或者你哋遇到嘅困難，希望討論嘅。因為呢個有個機會畀你哋可以討論，啱唔啱？

蘇偉基先生：Yes.

李澤昌先生：Yes.

主席：（經傳譯員）你要求佢哋睇嘅，就係非法泊車，响巴士站非法上落客貨嘅活動，交通阻塞，呢個比較闊嘅問題。比較具體就係襲擊你哋嗰啲車長，同埋交通黑點。其中呢兩件事，我哋從唔同各個團體收過啲證供，巴士站非法泊車同埋襲擊車長嘅問題。

運輸署嘅回應，4941 頁嘅一封信，2018 年 3 月 26 號嘅一封信，你見到第 2 段咁講嘅，佢就係講緊嗰個工作小組嘅時間有限，同埋要將嗰個報告要三個月內交，同埋有埋嗰個結果，同埋建議。至於話你嗰四個課題，我哋會响個工作小組以外另行處理。

我所以問你嘅問題，就係而家都五個月嘞，呢個問題，巴士站非法泊車、襲擊嗰個巴士車長，有冇處理過？

蘇偉基先生：呢個我可以答一答先，佢頭先講咗三個月，佢就當時個 working group 喺運輸署嘅領導下，focus 就係一啲 bus 嘅 safety belt，同埋一個 bus driver 嘅 training。喺完結咗呢兩個 priority 嘅 agenda，我再去信去運輸署，你會見到喺第 4945 頁嗰度係再次重提呢四件事。

喺第一點，illegal parking。其實正如早幾時嘅會議，彭生都有講，公司都主動地係同警方做一啲嘢，希望喺度做到啲工夫。

第二樣，traffic congestion，我諗大家都理解，真係可以做到嘅嘢真

係不多嘅。

第三樣嘢就係話呢個騷擾車長，我得悉運輸署佢係做緊一個運動，就幾間公交具公司，包括埋巴士公司、鐵路公司，就係宣傳一個叫做乘客禮貌嘅運動，就係開咗兩次嘅會議，我都有啲進展嘅。

第四樣，就係 traffic black spots，咁了解到公司其實三千幾車，任何時間喺個路面嗰度，其實我哋係好熟習個路面嘅，有啲路可能佢嗰個 levelling 唔平，會影響交通意外。或者劃線，會影響交通意外。我哋呢啲其實係久不久就會去信畀運輸署，佢有一個叫做 regional office，運輸署除咗監管我哋之外，個 regional office 仲係睇埋嗰個道路嘅 design 同埋安全。我哋會同佢反映呢啲我哋嘅車長會反映畀我哋聽，我哋前線嘅員工反映畀我哋聽，就會講畀佢聽。

因為佢封信同我哋講，就係話喺呢個 working group 以外處理，所以我都有去信咗運輸署，詳列咗我哋曾經係接近三百個呢啲咁嘅個案去畀佢研究。

主席：（經傳譯員）有冇咩嘢實際上係處理到--即係嗰五個月，處理到巴士站非法泊車？可唔可以就咁答話有處理到，定係冇？

彭樹雄先生：我簡單答你就係 no，即係冇一個好大嘅進展。

主席：（經傳譯員）有冇任何進展，即係佢哋話滋擾、襲擊車長嗰啲，有冇咩嘢處理到？

彭樹雄先生：喺上一次嘅聽證會之後，其實警方亦都主動再聯絡咗我哋，我哋亦都係提交咗過去嗰啲我哋車長被襲擊嗰啲案件，嗰個詳細資料亦都係已經畀咗蒼方。例如我喺上一次嘅聽證會講，我哋有架車喺又一邨就畀四個男子係兩次撳熄我哋嗰個 emergency button，其實聽證會之後，警方亦都主動聯絡咗我哋，亦都係同我哋個車長接觸咗嘅。

主席：（經傳譯員）呢個進展就係咁多，係咪呀？

彭樹雄先生：我諗有啲嘢係譬如話違例泊車、交通阻塞，即係好難話係喺咁短時間裏面有一個好大嘅成效。例如正話蘇生講咗，我哋亦都知運輸署會做一個禮貌乘客運動，就希望可以教育啲乘客點樣可以大家互相尊重，我希望呢個長遠係真係幫到整個業界，幫到我哋啲車長。

主席：（經傳譯員）另一件事我想你幫幫手嘅，我畀個例子你，如果係遮蓋咗嘅會議記錄，即係工作小組嘅。工作小組一路都係處理緊訓練，關於安全嘅技術嘅裝置，科技裝置，呢個都係我哋委員會需要關注嘅。我哋要睇嘅嗰個係規管巴士營運嘅制度，呢個係我哋嗰個職權範圍，即係特首畀我哋嘅職權範圍，呢個可以話係--我哋似乎大家同時都係睇緊差唔多嘅課題。

我想你睇番 4926 頁嘅，即係呢個作為一個例子嚟嘅。我哋唔係話好似喺

打仗嘅時候，就係要將啲重要消息或者點樣樣遮蓋咗，就避免敵人得知嗰個情報。呢度我想講，就係話呢度提及嘅，就係為所有嘅乘客座位安裝安全帶，4927頁，半版紙都係塗黑咗，跟住嗰版又係有半版紙都塗黑咗。

我要問一個比較一般嘅廣泛嘅問題，就係話係根據乜嘢準則去將呢一啲部分係塗黑咗、遮蓋咗，究竟背後嘅邏輯係乜？

蘇偉基先生：呢個其實係牽涉到其他嘅巴士公司嘅發言，所以我哋就未有佢同意下，我哋就遮咗。

主席：（經傳譯員）即係話總之係人哋講嘅嘢，你就係塗黑咗佢，你哋自己講嘅說話，你就係唔介意話畀我哋聽，嗰個情況係咪咁？

蘇偉基先生：可以係咁講。

主席：（經傳譯員）所以你攞走咗嗰啲就係運輸署所講嘅嘢，或者係城巴、新巴...

蘇偉基先生：Transport Department係冇扠尸，因為我有問過佢。

主席：（經傳譯員）即係主要係呢個城巴？

蘇偉基先生：Citybus係刪去咗，喺我版本嗰度。

主席：（經傳譯員）你有冇問下城巴係咪可以將佢哋講嘅說話扒上去？

蘇偉基先生：我覺得運輸署做呢個角色恰當啲。

主席：（經傳譯員）你回應，就係你冇問過城巴，係咪呀？即係冇問過佢哋，係咪你可以將佢哋所講嘅嘢都係包括在內？如果包括咗，就讓我哋嗰個會議記錄比較全面。

蘇偉基先生：我會後問佢，如果佢準許我，全set交畀委員會。

梁乃鵬博士：（經傳譯員）對唔住，其實主席先生，直接回答，我哋係冇問過城巴或者新巴。我哋冇問佢哋攞同意去將嗰個整份嘅會議記錄交畀你哋睇，對唔住。

主席：（經傳譯員）唔該你，梁博士。你而家就會去問下呢個新巴，如果新巴拒絕，話畀我哋聽，我哋咪自己直接問佢哋，因為咁樣都可以慳番墨水。

梁乃鵬博士：唔該。

主席：（經傳譯員）最後有一個問題係咁嘅，你哋有問我講過係有四個車廠，九巴有四個車廠，屯門、沙田、荔枝角同埋九龍灣。喺呢四個車廠嗰度，我想問有冇邊一個或者全部都係你哋九巴所擁有，或者你哋嘅附屬公司所擁有？

李澤昌先生：其實喺呢四個車廠裏面，九巴有沙田廠同埋屯門廠係owned by九巴，嗰陣時auction site買番嚟嘅。九龍灣廠係under一個private treaty grant，基本上係畀咗地價係作為一個車廠嘅用途。荔枝角廠係一個

short-term tenancy嘅arrangement with政府嘅。

主席：（經傳譯員）你講話短期，有幾短期？

李澤昌先生：基本上而家包括即係城巴、新巴同九巴都有好多嘅，就係政府係畀筲地方出嚟，係用一個短期租約，佢裏面其實係視乎你個年限幾長、幾短。荔枝角廠今日係每一年automatically續，要交租。

主席：（經傳譯員）就係每年都續期？

李澤昌先生：(Nodded head)

主席：（經傳譯員）唔該。鄧大律師，我哋問咗之後，你有冇嘢想跟進？

MR DUNCAN：（經傳譯員）如果得嘅話，我想跟進一下，係講一講女司機，係如果畀嘅話。

主席：（經傳譯員）好，你問。

MR DUNCAN：（經傳譯員）之前我哋都有講過係女車長呢件事，之前你哋亦都有進一步嘅資料畀我哋，就話點樣樣去招聘女車長。我想問下，喺女車長嘅數目嗰方面，或者申請人方面個數目，最近有冇大增？

李澤昌先生：而家嗰個女性嘅車長係已經微微超過五個per cent，當然係好視乎個地區性。當然即係喺香港，其實男同女嗰個比例，其實基本上係差唔多一半、一半，我覺得呢個係一個好大嘅空間，所以頭先同歐陽先生講，我哋好想用屯門係一個例子，希望喺嗰個屯門嘅廠裏面可以做啲工夫，亦都Mr Chairman之前都有講過，喺瑞典，我都留意過係有好多歐洲嘅地方都做緊一啲呢啲咁嘅提供nurseries嘅東西，係令到有啲女性嘅車長可以騰空一啲時間，未必係一個全職，但係都有個穩定性嘅時候係一定幫到車長短缺嗰個情況。

MR DUNCAN：（經傳譯員）有冇成果，你哋呢方面嘅努力有冇成果？

李澤昌先生：有嘅，因為我自己個人覺得女性車長可能希望喺嗰個穩定性，同埋對客方面，呢個都係公司嚟緊一個方向嚟，我對呢個係寄於厚望。當然係要政府批咗我哋嗰個廠可以做呢個nurseries嘅工作先。

MR DUNCAN：（經傳譯員）我諗我問嘅問題比較具體嘅，有冇增加到嗰個申請者嘅數目，即係女性嚟申請？

李澤昌先生：平穩，冇特別向上，冇特別向上。

MR DUNCAN：（經傳譯員）唔該。

李澤昌先生：但係好多人問過我。

MR DUNCAN：（經傳譯員）好，唔該晒。唔該晒你，主席。

主席：（經傳譯員）李先生，我明白你係想作一個總結嘅發言，喺作證完畢之後，係咪呀，定抑或係梁博士會講？

梁乃鵬博士：（經傳譯員）係，主席先生，主席同埋委員，我係想講㗎。我哋非常感謝你哋畀時間我哋係作證，正如我一開頭嘅時候所講，我哋嚟到你哋嘅席前，我哋以一個謙虛嘅心同埋一個開放嘅態度，我哋係歡迎你哋所提出嘅建議，如果能夠係加強乘客嘅安全。今次呢個經驗，對我哋嚟講係非常有啟發，特別係對我哋嘅管理階層，所以我就會請我哋嘅董事總經理，李澤昌先生就係發言，係總結我哋今日到嚟嘅作證。

主席：（經傳譯員）好，唔該你，李先生。

李澤昌先生：首先喺度即係多謝大家，我哋好深深明白到，其實睇到呢段時間，真係香港嘅市民對呢個巴士嘅服務同安全係一個好大、好大嘅期望。亦都雖然你睇到，喺營運方面係有好多、好多嘅挑戰，例如請車長、路面嘅擠塞，呢個社會有好多啲情況發生喺譬如打車長等等嘅嘢，係一個非常大挑戰。我哋都覺得我哋一定係做好我自己嘅工作，係繼續提高、提升我哋嘅服務，特別喺安全方面，我好肯定我哋呢班同事係一定唔會放棄，做得差。

今年 2 月呢個交通意外，大埔公路呢個交通意外，其實對我哋公司上上下下嘅員工嗰個打擊係非常之大，即係甚至乎可以講，唔可以用說話去形容。我哋絕對覺得--即係我個人由嗰日開始到而家，都對呢件事都冇辦法可以忘記呢個日子。我哋絕對係唔會容許，亦都唔會畀呢個意外係會再發生。因為一次已經其實係太過足夠。我哋喺呢個意外之後，我哋真係好承認到自己有好多地方係做得唔足夠，我哋係未停過係喺呢方面改善。

喺呢個聽證會裏面，呢件過程，我哋已經深深感覺到九巴一定要與時並進，要喺呢方面做多啲工夫去提升我哋嘅服務。例如喺我哋個科技方面係要做得全面，同埋係真係喺個準確性，同埋嗰個安全嘅系統係要真係與時並進，做得要更加好。

至於喺車長方面，我哋喺嗰個 management 控制，喺個管理同埋喺嗰個培訓方面係要做得更加要好，喺佢個設施，啱啱頭先講咗休息室同埋佢嗰啲洗手間嘅服務，其實我哋係未停過。

九巴其實喺香港已經服務咗超過八十五年嘅一間巴士公司，根本上我哋係絕對係應該要盡心盡力繼續服務呢個社會。如果我哋嘅員工、我哋嘅乘客要嘅嘢，我哋一定會盡力去做好佢。不過呢度有一點要提及，其實九巴好難係一間公司單方面可以做到，我好希望唔可以缺少各界同埋政府嘅部門嘅支持同配合，先至令到呢啲方面可以有效咁樣去提升個服務。

最後我哋成個團體好感激呢個委員會過去呢段日子，同埋佢未來嘅工作。正如我哋九巴嘅主席喺聽證會之前講過，我哋九巴嘅團隊一定以一個謙虛、誠懇，同埋一個開放嘅態度接受唔同嘅意見，同埋建議，多謝大家。

主席：（經傳譯員）梁博士、李先生，同埋各位先生，感謝你哋係出席咗四日嘅聆訊係提供證供協助我哋，我哋亦都感謝你哋。今日嘅聆訊到此為止，我哋喺星期六就會聽其他嘅證供，希望唔受颱風影響。今日多謝你哋出席。

2018年9月12日

下午3時43分聆訊押後

Saturday, 15 September 2018

(10.01 am)

EXPERT EVIDENCE OF PROF JOHN STANLEY

CHAIRMAN: Good morning, Prof Stanley, and welcome to Hong Kong.

PROF JOHN STANLEY: Thank you, Chairman.

CHAIRMAN: Thank you for assistance you have already given this committee with the two reports that you provided us with, and thank you for agreeing to come and give us oral evidence so that we can explore the ambit of your report, in particular, of course, its relevance to Hong Kong, with questions which are going to be posed to you, at least in the first place, by counsel Mr Derek Chan, and I ask him to begin that questioning.

Mr Chan.

Examination by MR DEREK CHAN

MR DEREK CHAN: Thank you, Mr Chairman.

Good morning, Mr Stanley. Can I start by asking you a few matters by way of background and start by asking questions about your own background by going firstly to your curriculum vitae which is at page 107 of our expert bundle.

CHAIRMAN: Yes.

MR DEREK CHAN: We see in your CV that you started your career in 1969, and in 1980 to 1999 you were the

principal of John Stanley & Associates Pte Ltd.

PROF JOHN STANLEY: (Nodded head).

MR DEREK CHAN: Can you tell us a bit about the work that your company did during that period?

PROF JOHN STANLEY: Yes, Mr Chan. We did a lot of consulting/advisory work in particular to governments at the federal level in Australia, but also at the state level, in particular in the transport space, for example the National Road strategy, the Victorian government's contribution to projects like that. We have undertaken reviews of ports in Tazmania for the Tazmanian government, work also for a range of local authorities, local councils, about their road systems, not too much work to that point about public transport. Until about the early 1990s, I was primarily in the road space in terms of transport. So I worked for the federal government earlier on in that road area and did a lot of consulting work around road economics in particular.

MR DEREK CHAN: And in 1991 to 1999, you were the deputy chairman of the National Road Transport Commission, and in 1999 to 2008, you were the executive director of the Bus Association Victoria.

Can you tell us a bit about what you did there?

PROF JOHN STANLEY: Yes. The National Road Transport Commission was set up in 1991 as one of the primary

initiatives in the microeconomic reform in programme in Australia to try and improve the productivity, safety and environmental performance of road transport in Australia. Those responsibilities are in fact state government responsibilities, so that the states got together with the federal government to set up this commission to propose nationally consistent laws for everything essentially that happened on top of the road system. So that was things like mass limits, it was things like driving hour regulations and loading regulations and law as well. Fatigue was an important part of that, fatigue management.

Then the Bus Association, I had several roles there. I was obviously, in a formal sense, to represent my members, of whom there were 500, who held together at that time contracts with the state government to a worth of around about A$900 million a year. So I was the primary person responsible for negotiating their contracts with the state government.

As part of that process -- and this is a point I made in the submissions -- the bus industry receives considerable subsidy from the state government in Victoria, so a lot of the work I did as executive director was on trying to identify the value of public transport in general, but buses in particular, to the

Victorian community. So that involved work, for example, on trying to look at the role that buses play in social inclusion, and in fact I work very closely with my wife, Prof Janet Stanley, who is here today also, in that area; congestion reduction, the roles that buses can play there; the roles that buses can play in terms of improved environmental outcomes. These are really important positions to develop, in the policy sense, when you are going to government, looking for so much support.

We also had a range of businesses that we did in the association, and for example one of those businesses operated at arm's length is Road Safety Inspections, which is the largest bus tester in Victoria, bus testing since about the 1980s has in fact been a privatised industry in Victoria. The association actually took over the state government's previous vehicle inspection and testing business, and so we were the biggest bus tester and, in fact, remain so today.

CHAIRMAN: Who are the members of the bus association?

PROF JOHN STANLEY: Yes, they are essentially operators, Chairman, so they are route bus operators in Melbourne and regional Victoria, as they are school bus operators. In fact, the largest number of them, primarily because they tend to have only a small number of vehicles each,

are school bus operators, but they are also charter and tour operators. So we cover the whole range of those market areas. The largest contract values are far and away, though, in the route service area.

CHAIRMAN: How many such members are there?

PROF JOHN STANLEY: There were at the time over 500. The number has come down a bit since I left them, because there's a fair bit of consolidation going on among some of the businesses.

CHAIRMAN: Can you give us an idea of the size of the staff of the association?

PROF JOHN STANLEY: The staff -- the association had 50 staff when I finished my time, and that included, for example, about 10 or 12 staff in the vehicle inspection company. We had a range of people employed at the time also as ticket inspectors, so we had our own ticket inspectors; the state government provided us money to employ ticket inspectors to work on buses. We had a little marketing group as well and a group who looked after member servicing, so they spent a lot of time talking to members and looking at contract issues they may have had with the government or with the Public Transport Victoria, which is the government's responsible organisation for programme delivery.

CHAIRMAN: And who in Victoria are the beneficiaries of the

fares received by the bus companies?

PROF JOHN STANLEY: The fares are collected by government, go to government.

CHAIRMAN: So this was ticket inspection on behalf of government as the recipient of the revenue?

PROF JOHN STANLEY: Yes.

CHAIRMAN: Thank you.

MR DEREK CHAN: Professor, you mentioned, during your role in the National Road Transport Commission, you were involved in driving hour regulations.

Did those driving hour regulations relate to heavy vehicles?

PROF JOHN STANLEY: They did. The ambit of responsibility of the National Road Transport Commission was vehicles of 4.5 tonnes and above, so it was essentially heavy vehicles, and the freight side of the business, trucks if you like, was much more dominant than bus. So the truck agenda tended to dominate the work of the commission.

But in the process, the bus agenda got very much linked to it, and one of the major issues in Australia at that time was the distance between the major capital cities, Melbourne and Sydney, Sydney and Brisbane, required, if a truck was going to do it in one sitting, fairly long driving hours. So the issue of what is

an acceptable length of drive and what kind of rest provisions are needed for trucks became really important in that process. But buses got vacuumed up in it at the same time.

CHAIRMAN: Was this commission a federal commission?

PROF JOHN STANLEY: It was a national commission, so it was established under federal legislation, but, if you like, the people we were responsible reporting to were the federal minister and all the state ministers.

So, Chairman, in my eight years on that board, I had 45 different ministers that I reported to.

CHAIRMAN: Thank you.

MR DEREK CHAN: Professor, in 2008 you became an adjunct professor and a Bus Industry Confederation senior research fellow in sustainable land transport, Institute of Transport and Logistic Studies, the University of Sydney.

Did that post involve touchings in public transport or bus-related topics?

PROF JOHN STANLEY: It involved -- I taught the final unit in the masters programme in transport management. The institute is one of the top-rated transport institutes in the world, and we run a number of master's programmes, and at that time I taught the final subject that everybody had to do, and then taught transport

policy as well, and the transport policy involved a lot of bus policy work.

MR DEREK CHAN: And, in 2012 to 2016, you were a member of the Ministerial Advisory Council advising Victoria's planning ministers in two governments on long-term Melbourne metropolitan planning strategy. I assume that involved transport planning as well?

PROF JOHN STANLEY: Not as much as it should have. The main focus in that work was in fact on land use planning. The intention -- and in fact this is mentioned also in the first report I did -- we had a 2010 Transport Integration Act in Victoria that requires government to produce an integrated land use transport plan. Six of us were appointed by the planning minister to form a ministerial advisory council and advise him on what Victoria's long-term land use plan should be, and that included some work on transport strategy. I have to say I tried to write a transport strategy in that, but it was taken out three times, so for some reason the government did not want to include a transport strategy within the long-term land use planning strategy. There was a change in government in the middle of that period, and the new government appointed us again to continue doing our work.

MR DEREK CHAN: You list out a number of directorships at

the bottom of page 107.

PROF JOHN STANLEY: Yes.

MR DEREK CHAN: Can you please tell us which one of these directorships are relevant to transport or bus policies?

PROF JOHN STANLEY: Yes. The work -- when I was Commissioner of the Victorian State Services Authority, the government of Victoria gave me that appointment to look at the governance arrangements in land transport between roads and public transport. So I produced a report for the government, recommending new governance arrangements between public transport and the road authority at that time.

Metlink was the public transport marketing body for Victoria's tram, train and bus systems, at the time that I was in that role there. So we produced system-level marketing campaigns to promote, if you like, the brand of public transport, and the individual operators did their own campaigns as well.

At that same time, I was on the board of the public transport ombudsman representing bus, where complaints from dissatisfied customers, if they are not adequately dealt with by the operators, get sent to the ombudsman. So there was a role there as well. And --

MR DEREK CHAN: Excuse me, how long were you in that role as public transport ombudsman?

PROF JOHN STANLEY: I'm guessing a bit, but I think about four years.

MR DEREK CHAN: Between which years, approximately?

PROF JOHN STANLEY: Between about 2000 -- sorry, 2008 it would have finished, so 2004 to 2008.

MR DEREK CHAN: Sorry, I interrupted you; please continue.

PROF JOHN STANLEY: That's okay. I'm currently on the board of Road Safety Inspections, which as I indicated earlier is a bus testing company which is run at arm's length from the Bus Association to conduct the annual inspection that all heavy vehicles, or buses in particular, have to go through. We do about 5,000 of those inspections a year, which is around about 75 per cent of the relevant bus fleet in Australia.

CHAIRMAN: Is that in respect of the mechanical side of buses?

PROF JOHN STANLEY: It is, Chairman.

MR DEREK CHAN: How long have you been a board member of that company?

PROF JOHN STANLEY: That would be about seven years.

MR DEREK CHAN: Seven years counting from today, counting back from today?

PROF JOHN STANLEY: Yes.

MR DEREK CHAN: Just going to page 108, where you list out across several pages a number of reports, articles,

journals, books or book chapters, in which you have written or contributed towards. I don't intend to go through all of them, because there are quite a few, but can you perhaps point out a few as examples that relate to bus policies?

PROF JOHN STANLEY: Sure. If you look -- there are mainly two or three particular topic areas. The first one is a number of papers there are around, for example, the value of public transport. So the book that Prof Janet Stanley and I wrote with Prof Hanson came out about a year or two ago, which is called "How Great Cities Happen", which is "2017 books", that includes quite a lot in it about public transport and the role that public transport can play.

The issue of -- the next paper that appears under that, "Getting the Prices Right", which is here, also includes work on public transport policy.

If you scroll down further, you will see reports for 2017, "Moving People: Solutions for Policy Thinkers -- Improved public transport services supporting city productivity growth". We have done quite a lot of research on what role does public transport play in enabling a city to be productive. So there are a number of papers through here in that particular topic.

The journal articles: 2016, Stanley J and Levinson,

"Workshop 3 report: Sustainable funding sources" -- this is a report of a workshop from a conference that was held about three years ago, a conference series called the Thredbo conference series which is held every second year internationally, and the main topic of that conference is competition and regulation in public transport. I'm a member of a group of about eight who chair workshops as part of that conference series. So that particular workshop, and in fact another one that I've just published an article that will be available in the next couple of weeks, looks at what are the benefits of public transport and how can you turn those benefits into monetary flows to help fund services. So there are quite a few services in that particular space.

Two underneath that, you will see, "Moving People: Solutions for Policy Thinkers -- National Guidelines: Bus services procurement and bus service contracts". That is a paper that explores in some depth the sorts of issues involved in deciding on bus contracting regimes. It talks about questions, for example, of competitive tendering versus negotiation, which one of the issues I referred to in the report. It looks at things like contract length, KPIs that you might see in contracts as well.

The next one, "Equity in Transport", focuses very

much on the role that public transport plays in social inclusion in contributing to a fairer society.

If we continue going on down, the next one, "Reports", 2015, at the top of the page, "Moving People: Solutions for Policy Thinkers -- Connecting Neighbourhoods". One of the ideas that we came up in the land use strategy work for Melbourne was trying to shape the city in such a way that everybody could live within 20 minutes' access to most of the things you need for a good life by walking, cycling or public transport. We are a very car-dependent city. This was is about to try to reshape the land use in the city to enable public transport to play a bigger role.

The next paper talks about the role of public transport, in particular in promoting better development densities in middle suburbs of Australian cities. The report after that looks at governance arrangements which includes how you integrate transport and land use in the government sense.

In 2014, my book called, "Introduction to Transport Policy", has quite an extensive discussion of public transport issues in that.

MR DEREK CHAN: Perhaps can I summarise in this way: many of the articles concern issues of policy?

PROF JOHN STANLEY: Particularly policy, but policy has been

my main focus, and strategic planning to help implement that policy.

MR DEREK CHAN: Having regard to your background, the various posts that you have had, the articles that you have written and the research that you have done, how would you describe your area of expertise?

PROF JOHN STANLEY: In terms of the subject matter of this particular hearing --

MR DEREK CHAN: Yes.

PROF JOHN STANLEY: -- I think the expertise I would most bring to this question is issues of public transport governance and policy in a context of governance for integrated urban planning and transport planning, so it's really positioning public transport in a wider setting.

Then, when you think about bus, it's really governance and institutional arrangements with respect to bus service delivery and planning for that delivery and policy arrangements that are going to make it happen to enable bus, if you like, to best achieve the goals that government has for society. That's really the level I tend to operate, rather than vehicle operations. It's really the role that these modes play in terms of delivering value for society and how can you set up your governance arrangements, your institutional

arrangements, to maximise that value.

MR DEREK CHAN: And I think you have fairly stated in your second report, at the start of it -- perhaps I will just give the reference to the committee. That's page 56 of the expert bundle.

CHAIRMAN: Yes.

MR DEREK CHAN: Mr Chairman, I'm looking at page 56, about the third full paragraph down, so that's just past the middle of the page.

Professor, you have fairly accepted there that you are not an expert in bus operation, but have expertise in matters to do with the institutional --

CHAIRMAN: Would you read out what you are referring to?

MR DEREK CHAN: I'm sorry, I'm reading from --

CHAIRMAN: Just read out the relevant part.

MR DEREK CHAN: Yes. You say, at this part of your report, that you are not an expert in bus operation but have expertise in matters to do with the institutional environment within which bus operates and how this can impact performance.

PROF JOHN STANLEY: Yes, Mr Chan.

CHAIRMAN: Thank you.

MR DEREK CHAN: Thank you, Professor. Unless you've got anything to add to the background employment, I will next introduce the background of the brief, which you

had been provided with, in writing these two reports.

PROF JOHN STANLEY: Thank you.

MR DEREK CHAN: For that purpose, can I please take you to the expert bundle at page 4 where -- it's on the screen -- at the second full paragraph of page 4, you set out the task with which you have been provided in writing these two reports.

In the first bullet point, you were asked to describe the operations and management of the bus system in Melbourne together with the regulatory and governance arrangements, in particular with regard to the monitoring of bus safety. So that's the first task, and I believe that's covered by your first report which has been included in the expert bundle.

In the second bullet point, you were asked:

"Having been provided with such information about the franchised bus services of Hong Kong, if so required, to summarise the system and, having regard to the bus system in Melbourne, give an opinion of the adequacy of the regulatory and monitoring systems in Hong Kong, making recommendations as to any changes to those systems, as in your opinion, are warranted to enhance the safety of the franchised bus system in Hong Kong".

I believe that's included in your second report,

which has also been is included in this bundle.

PROF JOHN STANLEY: Yes, Mr Chan.

MR DEREK CHAN: Can I start then with some simple practical comparisons between the bus system in Melbourne and the bus system in Hong Kong. Can I perhaps start with page 5 of that same report, in the same expert bundle.

The first point of difference is the population of Melbourne and Hong Kong. I can see that you state in the first paragraph of page 5 that Melbourne has a population of 4.8 million in 2017, and in the second paragraph you say that Melbourne is a relatively low-density city.

Do I understand that to mean there's a metropolitan area and a large suburban area?

PROF JOHN STANLEY: We would call the whole lot a metropolitan area. The function of the outer parts is very suburban, yes.

MR DEREK CHAN: And in terms of annual bus trips in Melbourne, we can pick that up at the fourth full paragraph of that page, that's towards the bottom of the page, where you say this:

"Victorian government budget papers ... indicate that Melbourne's trains currently have around 240 million passenger boardings annually, trams 205 million and buses 120 million, giving a total ...

metropolitan public transport task of about 565 million annual boardings."

So the bus takes up about 21 per cent of public transport trips annually.

PROF JOHN STANLEY: Yes.

MR DEREK CHAN: I think, just to put that figure by way of contrast to the Hong Kong context, we have about 1.4 billion annual bus trips.?

PROF JOHN STANLEY: About one month. Melbourne is about one month of Hong Kong.

CHAIRMAN: Where do we get the 1.4 billion figure from, Mr Chan?

MR DEREK CHAN: That's from the aggregate figures provided by the Transport Department.

CHAIRMAN: In which submission?

MR DEREK CHAN: Perhaps I will come back to the committee with a reference for that figure.

CHAIRMAN: Thank you.

MR DEREK CHAN: Perhaps a quick reference to that would be at page 58 of the expert bundle, which is the first part of your second report.

It may be convenient, Professor, to have the expert bundle in front of you, because I will be going to it repeatedly, basically nonstop throughout the day.

PROF JOHN STANLEY: I have a very good helper here.

MR DEREK CHAN: At page 58 of the bundle, which is the start of your second report, in the middle of the first paragraph, you say:

"The Hong Kong Public Transport Strategy Study -- July 2017 ... describes the role performed by each public transport mode within the public transport system and the passenger tasks involved. It notes that the public transport system caters for 12 million passenger trips daily, of which franchised bus services carry just over 4 million ..."

And that's per day.

Mr Chairman, I will give the committee another reference a bit later, but 4 million times daily for a year would be about 1.4 billion trips annually.

CHAIRMAN: Thank you.

MR DEREK CHAN: Professor, roughly how many buses are operating in Melbourne?

PROF JOHN STANLEY: About 1,700 as part of the route service.

CHAIRMAN: How is the term "route service" defined?

PROF JOHN STANLEY: These are contracted services that provide regular, scheduled -- daily, essentially -- service that's determined by the state government and laid down in the operator's contract.

CHAIRMAN: Thank you.

MR DEREK CHAN: So it would not include school buses, coaches --

PROF JOHN STANLEY: It doesn't include coaches and it doesn't include dedicated school buses, but schoolchildren often travel on the route services.

MR DEREK CHAN: Yes. Just by way of general comparison, can I then talk about the contractual framework under which the Melbourne buses operate, to contrast that with Hong Kong. For that, can I please take you to page 7 of the expert bundle. The third full paragraph of the page, which is close to the bottom, you say there:

"Current route bus services in Melbourne are a mix of competitively tendered services (about a third of the network) and negotiated services, the former being the previously government-provided services and the latter those started by private operators (including extensions/additions to those services)."?

PROF JOHN STANLEY: Correct, Mr Chan. There's also, in the services that are competitively tendered, an element which is called the SmartBus system, which is a system of a couple of circumferential services that provide long-distance trunk services around the middle suburbs of Melbourne. So they are also part of the tendered regime, but they are a small part of it.

MR DEREK CHAN: Right. So I take it a third of the

contracts are competitively tendered and two-thirds of the contracts are negotiated services?

PROF JOHN STANLEY: No, it's not contracts. There's actually one contract that's competitively tendered. That's about a third of the task.

MR DEREK CHAN: Perhaps you can give us a very general description of how that competitive tender process works.?

PROF JOHN STANLEY: Yes, sure. I have to say, as an introduction to this, that I was not part of that competitive tendering process, so I don't know the contract in detail. The roles that I've had in contract negotiation in detail have been the negotiated contracts, which are the two-thirds rather than the one-third.

However, the general process, as you ask for, is that the government would invite people to express interest in submitting a tender for a service, and the government would nominate what it was looking for in terms of those services, the kinds of routes that are going to be involved, the frequency, if you like. It would lay down the timetable and invite operators to put in a price that they would require in terms of, if I use the word, subsidy, to provide those services. So then it becomes a case of the operators who are bidding,

bidding, if you like, the lowest price to government.

Now, government may also take things other than price into account. It might take what it thinks is the operator's capacity to provide a good service into account as well. But that's essentially a bid to run a series of services across a spatial area. So they are essentially area-based services, apart from those couple of circumferential trunk route services that I talked about.

CHAIRMAN: Apart from the routes, presumably the government would stipulate the schedule that it wishes the service to be provided?

PROF JOHN STANLEY: Yes, Chairman. Frequency, the headways, and so on, and start/finish times, yes.

And then government gets the fare revenue and the government assumes profit risk but --

CHAIRMAN: Before we move on to that detail, perhaps I could ask this: how many routes are tendered on how many different occasions?

PROF JOHN STANLEY: Only one tender, and that's for a large number of routes together. So it's in fact a franchise area, if you like, a contract area, and all the routes that are in that area. So it's a fairly large chunk of Melbourne, given it's one-third of the routes in total. I wouldn't know the absolute number of routes involved,

it could be a couple of hundred or more. But it's essentially area-based.

CHAIRMAN: And over what period of time is the franchise, if one uses that term, awarded?

PROF JOHN STANLEY: Yes, they are mostly seven years. The negotiated contracts have been ten; they come back to seven under the new contracts that are starting in about --

CHAIRMAN: So the government offers one contract. Does it receive multiple bids and then accept multiple bus operators, or does it --

PROF JOHN STANLEY: Just a single operator, Chairman.

CHAIRMAN: Single?

PROF JOHN STANLEY: Yes.

MEMBER LO: What is the difference between negotiated and tendered? Who negotiates with whom and how?

PROF JOHN STANLEY: Yes. The negotiated contracts essentially relate to services that were started by the private sector, often 50, 60, 70 years ago, and for a long time ran out of the fare box, as yours still do, but in around about 1970 that ceased, and there was a requirement for service subsidies to come in at that time.

There has been negotiation, though, between the operator, at the start of those services, and government

to continue providing those services throughout the process. Now, government at one stage tried to take on the operators who have those negotiated contracts and put their services out to competitive tender. That ended up in the Australian Federal Court and the operators actually won, probably more to do with an issue of legal detail than much else.

But negotiation is still the way those contracts are dealt with, but each time they are dealt with, the contract is silent about what will happen at the end of the contract period. So the next lot of contracts that have just started now are seven-year contracts, they are silent. Then what happens at the end of that seven-year period, the industry could confidently believe they would sit down for another negotiation. The government probably wouldn't agree with that.

MEMBER LO: So the negotiation would involve changing the operator at the end or not?

PROF JOHN STANLEY: No. It essentially involves determining a price to provide those services, and agreeing on, for example, key performance indicators that will lead to incentive and penalty clauses that will be in those contracts. Also things like driver training is a provision of those contracts as well.

CHAIRMAN: When you say the essential factor being

negotiated is price, that is the price that the government will pay the bus company to run the service, the subsidy?

PROF JOHN STANLEY: Yes, correct. Essentially, it's the total cost of the service. The government actually pays the total cost to the operator --

CHAIRMAN: Because the government keeps the revenue in the fare box?

PROF JOHN STANLEY: Correct. So there's a process that's gone through which actually involves benchmarking, quite detailed benchmarking, of operator costs across all the operators, to try and identify, if you like, whether there are outliers in some particular areas, whether particular operators are low-cost or very high-cost. That leads to a discussion about what would be a reasonable band for those costs to fall within, and operators sometimes have their remuneration reduced because they look like they are too expensive relative to their peers.

CHAIRMAN: Are there occasions when agreement is not reached with the incumbent operator and the service then is offered to other operators or not?

PROF JOHN STANLEY: I'm not aware of any such instances so far, Chairman.

CHAIRMAN: And this is a system that has been developed

since the 1970s?

PROF JOHN STANLEY: Well, there's been a subsidy since the 1970s. The focus on the negotiated contracts, probably 30 or 40 years. I'm not aware of the history of the 1970/early 1980s period, but it's certainly been going since the early 1980s, the way I've described it to you.

CHAIRMAN: Thank you.

MR DEREK CHAN: In terms of the competitive tendering contractor, who is the current bus operator in Melbourne that won the competitive tendering?

PROF JOHN STANLEY: It will come to me. Just give me -- Transdev, which is a French company.

CHAIRMAN: Could you spell that for me?

PROF JOHN STANLEY: T-R-A-N-S-D-E-V.

MR DEREK CHAN: And how long has that operator been operating the competitive tender part of the system, bus system?

PROF JOHN STANLEY: They have -- they have held it once. So the contract was held by another company before that, called Ventura.

MR DEREK CHAN: Can you spell that as well?

PROF JOHN STANLEY: V-E-N-T-U-R-A, was the previous holder of the competitive contract, then Transdev won the tender the last time that came around, and I think that comes up again in the next 12 or 18 months.

MR DEREK CHAN: So the competitive tendering process actually resulted in a change in the operator?

PROF JOHN STANLEY: Indeed.

CHAIRMAN: You describe Transdev as being a French company.

PROF JOHN STANLEY: Yes.

CHAIRMAN: Do they operate bus services elsewhere in the world?

PROF JOHN STANLEY: Yes, a huge number in France, Chairman, and they also I think operate services in other parts of Australia as well.

MR DEREK CHAN: We have talked about one change in operator. Have there been many changes -- talking about the competitive tendering part -- in the operators?

PROF JOHN STANLEY: There have. If I can just go back. In about 1998, I think Melbourne was the first city in the world to privatise its train service. In fact we put the train, tram and the competitive one-third of bus routes that I've talked about before -- they all got put out for tender at the same time. There were two tenders let for train, two for tram, and one for bus. One British company called National Express, one of the train contracts, one of the tram contracts and the bus contract, they surrendered that contract within about three years, so that contract changed at that time, and the holder of the other train and tram contract then got

full train and tram service at that time.

So we have had two changes in the operators.

CHAIRMAN: So who got the bus contract in 1998?

PROF JOHN STANLEY: That was National Express. They won that contract in 1998.

CHAIRMAN: Was that a seven-year contract?

PROF JOHN STANLEY: I don't remember, Chairman.

CHAIRMAN: Was Ventura the successor?

PROF JOHN STANLEY: I would need to come back to you on that, what time they took on that contract.

CHAIRMAN: So you have identified for us three different contractors for the bus tender.

PROF JOHN STANLEY: Yes.

CHAIRMAN: Transdev, Ventura and National Express?

PROF JOHN STANLEY: Correct.

CHAIRMAN: Might there be a fourth?

PROF JOHN STANLEY: There might be something between National Express and Ventura, which probably was other operators taking over those services after National Express fell through until it could be reconstituted for a tender. But I will come back to you on that.

CHAIRMAN: Yes, if you could.

Am I understanding you correctly to say that National Express services didn't run the length of the contract; they fell out prematurely, is that the point?

PROF JOHN STANLEY: Yes, indeed. I think --

CHAIRMAN: Then someone took over?

PROF JOHN STANLEY: Yes, correct. I think there was a feeling that -- and we will probably come to this later, Mr Chan -- one of the challenges of competitive tendering is that sometimes it encourages operators to go in too low with their bid, perhaps hoping they can encourage government to negotiate the price upwards later on. In the case of the National Express rail one -- one of my papers I wrote earlier on was about this situation -- they did have one upward negotiation in their remuneration with government, but only one, and that's when they decided that they weren't going to continue.

CHAIRMAN: But all events -- as far as the bus contract was concerned, there was no successful negotiation that resulted in National Express staying on?

PROF JOHN STANLEY: No.

CHAIRMAN: They pulled out of the contract?

PROF JOHN STANLEY: Yes.

CHAIRMAN: Thank you.

MR DEREK CHAN: Mr Chairman, in relation to the reference for the 4 million bus trips per day in Hong Kong, which works out to about 1.4 billion bus trips per year.

CHAIRMAN: Yes.

MR DEREK CHAN: That would be at THB-2 at page 103.

CHAIRMAN: Thank you.

MR DEREK CHAN: That's a figure as of December 2017.

Professor, that's the competitive tendering side of it.

Can I then move briefly to the negotiated contract.

CHAIRMAN: Before we leave the competitive tendering side of it, what are the key features of the competitive tendering contract?

PROF JOHN STANLEY: I think it's to do with incentive and penalty clauses, but as I said, Chairman, I wasn't part of that negotiation process, so I can't express an opinion on the detail of what those incentive and penalty clauses are.

CHAIRMAN: Are these documents not made public?

PROF JOHN STANLEY: They tend to be heavily redacted when they are.

MR DEREK CHAN: So you can't say, or can you, whether those penalty and incentive clauses are related to safety performance or not?

PROF JOHN STANLEY: I would expect that they aren't. I think it's pretty unusual to have incentive and penalty clauses that relate to safety. That's unfortunate, but they aren't in an Australian setting, to the best of my knowledge, in the operator, certainly

not in Victoria, clauses that relate safety as one of the incentive/penalty components.

MR DEREK CHAN: So I assume it would relate to performance indicators more than specific --

PROF JOHN STANLEY: They very much seem to relate to operational performance, things like on-time running, service cancellations, they tend to be where most of the public transport systems around the world put their focus, sometimes also on customer satisfaction survey results, what customers think of the services. They tend to be the elements you see in those incentive and penalty clauses.

MR DEREK CHAN: Sorry, I think I might have interrupted you. You were responding to the question from the chairman about the key terms of the competitive tendering contract.

PROF JOHN STANLEY: Yes. I'm saying that the main focus is -- I think otherwise, on most of the elements, the contracts are not vastly different between competitive tendering and negotiation. I think it's really just a matter of how that right to operate is provided. A lot of the detail of the contracts is fairly similar between the two.

CHAIRMAN: And the negotiated contracts are lengthy compared with the franchise agreements of Hong Kong? I think you

have made that point.

PROF JOHN STANLEY: They are unbelievably long, Chairman. My recollection is that I think the Hong Kong franchise agreements are 31 or 32 pages. The comparable Melbourne negotiated contract is 160 pages, plus a bunch of schedules as well.

CHAIRMAN: Yes.

MR DEREK CHAN: Thank you. Professor, I think you have talked a lot about negotiated contracts, but perhaps I can just go through a couple of things, perhaps by way of summary.

You have mentioned that the negotiated contracts would be quite similar to the competitive tender contract.

PROF JOHN STANLEY: Yes.

MR DEREK CHAN: Can I just confirm that under these negotiated contracts, it's also the government who collects the fares?

PROF JOHN STANLEY: Yes, Mr Chan.

MR DEREK CHAN: And the operator is basically paid to run the service?

PROF JOHN STANLEY: Correct. The contracts are what we call gross-cost-plus contracts, so they are gross cost contracts, but they do have incentive and penalty clauses as well. So the operator gets paid an agreed

amount to run the service, but then there's an at-risk component that's tied up in those incentive and penalty clauses, which is not huge but, relative to the margins on the contract, it's enough to make you focus on achievement.

CHAIRMAN: Can you estimate, if you can, the percentage of the variable?

PROF JOHN STANLEY: Yes, Chairman. There are essentially two main components that are operative in this space at the moment. The first one is a patronage incentive, and in a sense that's only got upside. So if an operator grows patronage faster than a benchmarked rate, then they are entitled to a patronage incentive.

Then there's an operational performance regime which covers, as I said before, things like on-time running, service cancellations. You put those sorts of things together, you are talking about 2 or 3 per cent.

CHAIRMAN: That's the benefit side of it?

PROF JOHN STANLEY: That's the kind of swinging margin.

CHAIRMAN: So benefit and penalty?

PROF JOHN STANLEY: Yes. So you could go up by that or down by about that. So it's not huge, but contracts like this probably have margins of around about 10 per cent on them.

CHAIRMAN: Thank you.

MR DEREK CHAN: Approximately how many operators would there be under this negotiated contract system?

PROF JOHN STANLEY: There are 15 contracts and 12 operators. When I was negotiating the contracts, about ten or so years ago, there were a lot more; there were about 26 then. So there's been consolidation in the last decade.

CHAIRMAN: How has consolidation occurred?

PROF JOHN STANLEY: It's essentially occurred through operators buying out other operators. So one of the companies that I talk about a little bit in this paper is a company called ComfortDelGro Cabcharge, CDC, who operate also in Singapore, for example, and I think in London as well. They have bought a substantial share of the market. Ventura, whose name I mentioned before, have absorbed another very large company in Melbourne as well. Some of the smaller companies have been taken over by slightly larger ones. So we have seen about half of the operators disappear in the last decade, and I expect we will see some continuing contraction.

MR DEREK CHAN: From a policy perspective, can you attribute a purpose or reason to the expectation that there will be market contraction amongst the number of operators?

PROF JOHN STANLEY: Yes. I think that it does create benefits to particular companies in terms of cost base. Some getting a little bit larger can help you with your

cost base, some of these operators have been quite small and some of the larger ones are keen on buying market share, they are really after a substantial share of the market where they can give them a chance to grow their business further.

MR DEREK CHAN: When you talk about creating benefits, do I understand that to be benefits in economies of scale?

PROF JOHN STANLEY: Yes. There's also a part of it, Chairman, that -- these are family companies, and sometimes the next generation don't want to continue on in the business. We had an interesting example a few years ago where the Grenda Corporation, who are one of the two or three largest bus operators in Melbourne, a couple of generations in the family, the next generation decided they didn't want to continue in the business, so they sold the business, and in fact in that sale process they gave one-third of the revenue to their staff, which was an amazingly generous thing to do.

CHAIRMAN: So, as an overview, 1,700 franchised buses in Melbourne, the pie is divided up one-third to the current successful operator, Transdev?

PROF JOHN STANLEY: Transdev.

CHAIRMAN: Then the other two-thirds are divided up by 12 operators?

PROF JOHN STANLEY: Correct.

CHAIRMAN: So what is the largest number of buses that any one operator operates?

PROF JOHN STANLEY: There would be about 500.

CHAIRMAN: About 500?

PROF JOHN STANLEY: Mm-hmm.

CHAIRMAN: Would that be Transdev?

PROF JOHN STANLEY: Transdev would probably have 500, and I suspect that Ventura would have sort of around 300 or 400 as well. CDC would have a large number, around about 400. I can get those numbers back to you.

CHAIRMAN: So if the tendered process takes up 500, that leaves 1,200 to be divided by the 12 operators, and from what you are saying, two of them occupy most of those bus --

PROF JOHN STANLEY: In fact, three of them would account for a very large proportion of that.

CHAIRMAN: Thank you.

MEMBER AUYEUNG: Professor, can you give us some idea about the size of the smaller one, how many buses a small operator would have?

PROF JOHN STANLEY: I'm thinking around 30 to 40, but there would only be one or two.

MEMBER AUYEUNG: 30 to 40 buses only?

PROF JOHN STANLEY: (Nodded head).

MEMBER AUYEUNG: Thank you.

MR DEREK CHAN: In the Melbourne context, what happens to the infrastructure -- the buses, the depots, the repair facilities -- when one contractor moves on to the next contractor as a result of the competitive tendering process?

PROF JOHN STANLEY: Sure. The contract specifies how those assets need to be handled in the process, and in fact that also applies for the negotiated contracts. So holding the depots in particular puts you in a very powerful position as a bus operator. It's very hard to build a new depot, particularly in highly built-up areas.

But one of the ways -- government is concerned about this, because government wants the opportunity to make sure there is some competition in the process, and it's hard to get competition if you've got a negotiated contract. But given that the operators, with the negotiated contracts, have a little bit of concern about whether their services might at some point be put out to tender, they have agreed with government to a process whereby their assets -- and the same thing applies for the competitively tendered ones -- are made available to a successor operator on particular terms.

MR DEREK CHAN: Basically, the old operator sells the infrastructure to the new operator?

PROF JOHN STANLEY: Yes.

CHAIRMAN: Including the buses?

PROF JOHN STANLEY: Yes.

CHAIRMAN: So the depots, the bus stations, the buses themselves?

PROF JOHN STANLEY: Yes.

CHAIRMAN: So that's what would have happened with National Express and Ventura and the other one?

PROF JOHN STANLEY: Correct. The three. They just change the logo on the buses.

MR DEREK CHAN: In general terms -- and my question covers both the competitive tendering part and the negotiated contract part -- does the fare revenue that the government receives cover the cost of running the bus routes?

PROF JOHN STANLEY: It covers probably in the order of 20 per cent plus. So it's around about a dollar in five or a little bit better than that.

Now, if fare concessions were added, that government requires the operators to give fare concessions to certain sorts of customers, and if the government compensated the operators specifically for that, it might get up to 30 per cent, but fare box recovery, as it is, off the top, sort of just low 20s or 20 per cent.

MR DEREK CHAN: So, in that context, the bus operations are

heavily subsidised by the government?

PROF JOHN STANLEY: They are. In fact, one of the reasons why, when I was running the association, we put a lot of effort into defining or trying to measure the value that the community got from those services. In fact, in the paper that I wrote with my colleague, Prof Hensher, I estimated that the value of Melbourne's route bus services to the Melbourne society, Melbourne community, is about ten times the financial cost recovery rate.

The main benefits are particularly social inclusion. In other words, if you didn't have those buses, particularly in the outer suburbs -- and Melbourne has very extensive low-density outer suburbs that are growing very fast -- if you didn't have those bus services, a lot of those people would not be able to participate in the range of activities that our society makes available. We have estimated that alone is worth more than the cost of the bus services. And the bus services are also a very significant contributor to congestion reduction. Those two benefits in particular are more than double the cost of the subsidy.

MR DEREK CHAN: So that's an economic justification to giving subsidy to those services?

PROF JOHN STANLEY: Precisely, Mr Chan, yes.

MR DEREK CHAN: Would it be fair to say that this subsidy

part would be a big point of difference between Hong Kong and Melbourne, in the sense that in Hong Kong, the operators keep the fares and they run the profit risk of patronage?

PROF JOHN STANLEY: They are a huge difference. I guess the corollary of that is probably Melbourne knows what the societal worth of its bus services is, but Hong Kong doesn't, because we have done the exercise, because we have needed to do to say what it is that we are doing for society that should make it worthwhile for government to think about paying so much money. I would think, if there's a really useful exercise to be done in Hong Kong, it's trying to define more precisely and measure the value to the Hong Kong society of the bus services that are provided.

CHAIRMAN: But Hong Kong operates a "use pay" system that works?

PROF JOHN STANLEY: It does indeed, Chairman, but there are also other people who benefit from the services and other people who incur costs.

CHAIRMAN: Yes.

PROF JOHN STANLEY: For example, the subject of the inquiry is safety, and safety is a major externality of transport operations. So, if you have an interest in externalities, as I do, then trying to understand the

benefits and the costs that are associated with providing bus services, and if you had, for example, half the people who are travelling on the franchised buses every day getting in cars instead, you would have much poorer safety outcomes.

CHAIRMAN: Yes.

PROF JOHN STANLEY: So those sorts of things, I think, need to be understood.

CHAIRMAN: Does the Hong Kong model work simply because of the number of people who use our buses?

PROF JOHN STANLEY: I would have said yes, Chairman, and the density that supports that.

CHAIRMAN: Yes.

Thank you, Mr Chairman.

MR DEREK CHAN: Professor, can I move on to a related topic, but the focus a little bit different, and under this topic I want to discuss with you the advantages and disadvantages between competitive tendering and negotiated contracts. So I want to assess not necessarily which is better --

PROF JOHN STANLEY: Sure.

MR DEREK CHAN: -- but the good and bad of each system, if I can use that term.

PROF JOHN STANLEY: Yes.

MR DEREK CHAN: Can I start that topic by taking you to

page 20 of the expert bundle, which will be your first report.

Excuse me, Mr Chairman, that may be a wrong reference.

CHAIRMAN: Yes. Take your time.

MR DEREK CHAN: I'm sorry, Mr Chairman, it ought to be at page 20 of your second report, which is at page 73 of the expert bundle.

CHAIRMAN: Thank you.

MR DEREK CHAN: On page 73, the topic that you are discussing there is the franchises and the method of allocating the rights for service provision.

If I can draw your attention to the second paragraph from the bottom, starting with the word "However" -- I will just read it out:

"However, Melbourne also tendered about one-third of its route bus services, which adds an element of performance pressure to the whole route bus system, both tendered and negotiated. The tendering element has the effect of creating a lingering concern among incumbent operators with negotiated contracts that their services are not guaranteed: there is always a risk that their services might be tendered if they do not perform. The absence of tendering in Hong Kong for the last two decades suggests that this risk is likely to be lower in

Hong Kong than in Melbourne."

So that's the where you deal with the advantage of competitive tendering.

Can I also, in the same vein, take you to a second reference.

CHAIRMAN: Before you move on, you identify this as a risk, but it's a risk that is not eventuated: no incumbent negotiated contract operator has lost its contract.

PROF JOHN STANLEY: Yes. I think there are two ways of looking at this, Chair. One is the risk in terms of the pressure on the costs of providing the service. The real point of competitive tendering is to sharpen the pencil in terms of what the costs are for running services, and the people who've -- the jurisdictions around the world that have gone into competitive tendering, it's almost always where you have had a government providing the service, not a private company, and the government has decided that it can't afford the cost, subsidy, if you like, to continue those services, and so it's said, "Let's see if we can get this done more cheaply by going out to tender." And the international evidence I think is that competitive tendering, if you are putting a private operator in to replace a public operator, tends to give you savings between 10 and 50 per cent.

Now, if you've got a private operator who's already operating, and operating commercially in a viable way, the rights to operate are very valuable. The government has essentially given that operator a free run in terms of a market area on which they can earn a return by providing a good service. It may well be, if they tendered, that somebody would pay the government some money to actually have the right to run that service.

CHAIRMAN: Yes.

PROF JOHN STANLEY: This is pretty unusual, Hong Kong. There aren't many places where you could mount that argument, but I think it's the case here. Because your services are so successful, in that commercial sense, at the end of the day, it's the government that has given the operator the right to run a service and make a profit, and it's a possibility that if that was a contested service, the price would be lower and an operator might pay the government some money to provide the service.

CHAIRMAN: Thank you.

MR DEREK CHAN: The second reference to the issue of performance pressure arising from tendering is at page 87 of the expert bundle. The relevant paragraph is at the top of that page. I will just read it out:

"Melbourne's route bus operators seem likely to be

under relatively greater performance pressure than Hong Kong's franchised bus operators because of: (1) the ever-present threat of competitive tendering in Melbourne, in the event of unsatisfactory operator performance; (2) the inclusion of specific (albeit small) incentive/penalty provisions in contract remuneration arrangements; and, most importantly from a safety perspective, (3) the existence of safety duties ..."

I'm going to explore with you the second and third part a bit later, but the first part refers to the benefits from the existence of competitive tendering in Melbourne.

To some extent, you have explained bits of it already, but can I test with you the concept of competitive tendering and how that fits within the Hong Kong environment where the bus operators collect the fares and assumes the profit risk from the provision of route bus services. I think you have already started on that topic during your previous answer to the chairman.

I understand there are a number of options available, but perhaps I can get you to explain some of those options. So you have talked already about -- because the route bus operator collects the profit from

patronage, and that's valuable, so you have talked about the possibility of a contractor or bidder actually paying the government a sum for the right to operate this franchised area or franchised bus routes.

What about the option of no bidding price, so the government opens up the right to run a certain franchise area? What would be the bidding be based upon then, if there's no price?

PROF JOHN STANLEY: I'm not sure if I'm understanding you precisely, but let me answer what I think you are asking. If the government is going to do that, it would say, "Okay, in area X we are going to get rid of all existing franchises for that and we are going to invite anybody who wants to provide a service to put in a bid to provide a service for that area."

Now, the bid might be to provide a particular timetable, as we talked about before, Chairman, where the government might specify fully what it wants the services to look like, and then it invites an operator to bid for that service. Now, you would expect those bids would be pretty low, you know, in the sense of it's not going to cost the government a lot of money, in that sense. But the real issue is, I think, can the government make some money out of it; will an operator be prepared to accept a lower return, for example, than

he might be getting at the moment, and transfer some of that margin back to the government, to hold the right to run that service?

I think, in the evidence you have received from London, they talk about quite low margins on the services there because of the competitive tendering process, and I think the way London do it, they have relatively small contracts, they have short contracts, and they have performance pressure coming through that, and that pushes the returns down. So an operator might say, "I'm prepared to put in a bid, I'm not going to drop my margin", so they would put in a particular price. Another operator might think, "I'm prepared to pay the government some money for this contract because I think I can make money out of it and so can the government."

I think it's hard to know how that would go, but -- and let me be clear, I'm not saying Hong Kong should competitively tender. I wouldn't say that at all. But if you wanted to hypothetically think how might you do, then what I would do is I would pick a number of routes and I would actually choose some routes and I would deal with them. I would put some routes out to competitive tender. Now, it would be a fairly messy process in terms of assets and buses that need to get dealt, I mean

how you deal with the equity that's invested in those sorts of assets; it could be a very difficult thing to do, but presumably in principle you could do it, for a price. Then it's up to how big you want that area and how many routes you want to think about putting out for bidding.

CHAIRMAN: You referred to the London contracts as being "short". As I understand it, the system in London is the tender is for a five-year contract --

PROF JOHN STANLEY: Correct.

CHAIRMAN: -- with a two-year extension possibility, but that after seven years, it's re-tendered.

PROF JOHN STANLEY: Yes.

CHAIRMAN: The seven years is the same as Melbourne; is that right?

PROF JOHN STANLEY: Ours isn't a five plus two, it's seven.

CHAIRMAN: I follow that.

PROF JOHN STANLEY: They are also smaller contracts. They tend to be route-based contracts, I think, in London.

CHAIRMAN: Yes, as I understand it, that is the case.

MR DEREK CHAN: So, if I understand your answer correctly, there can be a number of possibilities, obviously. One is a bidder proposing to pay the government a sum for the operation, for the right to operate an area or a number of routes. The second possibility is the

bidder offering to share part of the margins with the government, as part of the bid.

PROF JOHN STANLEY: Yes.

MR DEREK CHAN: So that's what you call a bidding price.

PROF JOHN STANLEY: Okay.

MR DEREK CHAN: I suppose a third possibility exists that there is no bidding price and the competition is based entirely on an assessment of the quality of the service expected to be provided. Would that sort of tendering be logical or not?

PROF JOHN STANLEY: Absolutely. I mean, normally the criteria that are taken into account in competitive tendering -- price is one, obviously, but quality of service is very important, and often you will find jurisdictions don't offer the contract to the lowest bidder; they put more emphasis on quality of service in that process.

So quality of service would certainly be a very high priority in terms of determining what qualities you would want the operator to bring to providing that service.

CHAIRMAN: Presumably, another way in which it might be negotiated is the prospective new operator might say, "I can do these routes for 10 per cent less than the fares that the incumbent is doing it"?

PROF JOHN STANLEY: Exactly, lower fares.

CHAIRMAN: There would be no payment to government, "but we are providing better value to the public"?

PROF JOHN STANLEY: Absolutely. That's the kind of degree of freedom is what happens to fares.

MR DEREK CHAN: So that's the advantages of competitive bidding --

PROF JOHN STANLEY: Mm-hmm.

MR DEREK CHAN: -- generally. Are there any perceived advantages that competitive tendering brings about that relate more specifically to the safe operation of buses?

PROF JOHN STANLEY: I think the risks are the other way with competitive tendering, that you might find situations where operators go in low with their bids and find out, "Gee, we are not making the margins we thought we were going to make; we will see where we can cut some corners." That might lead, for example, to deferred maintenance, which is a risk in this situation.

One of the things I mentioned in my first report was that Road Safety Inspections, the bus testing company that I'm a director of, was concerned about the condition of the number of the buses that were providing Melbourne's competitively tendered service. We drew that to the attention of the regulator. The reason we did that is that we operate under chain of

responsibility legislation in Melbourne for our bus services, and as a bus tester, if we know that an operator's buses are not up to standard, then we would be seen, we believe, as part of the chain of responsibility if something untoward was to happen as a function of one of those vehicles.

So I think that's a risk, and how would you deal with that? I think you have to deal with that by specifying quality criteria into your bidding document that says what your expectations are about fleet condition, for example, and how the maintenance is undertaken.

MEMBER LO: In the tendering process, competitive bid, if it were to make safety an explicit item, how would you pull it into the tendering process? So, if safety becomes an explicit item that somebody can bid for, what would that be?

PROF JOHN STANLEY: I think you would be nominating things like the condition of the vehicles, the maintenance schedules that need to be done. You would be setting limits on defects that operators would need to come up to, and then they would be in default under the contract if they didn't actually achieve those outcomes. So I'm not essentially -- I'm not a lawyer, but I think that's how you would deal with it. You would actually be

setting benchmark targets for performance that the operator needs to meet, and if those targets aren't met, then you would go through a cure regime.

MEMBER LO: Is it common to put accident rate as part of the bidding?

PROF JOHN STANLEY: Part of the bidding criteria?

MEMBER LO: I don't know. If you were to use safety explicitly as a measure, do people use accident rate as a --

PROF JOHN STANLEY: If you were to --

MEMBER LO: If you don't keep your promise you pay a fine or something?

PROF JOHN STANLEY: I'm not aware of too many people who actually have incentives or penalties that relate explicitly to safety provisions, but if you were to do that, then accident rate would be a really good place to start, but you would need to take that a fair bit further, I think.

CHAIRMAN: Is that not a provision in Singapore, a penalty if the accident rate reaches a certain level?

PROF JOHN STANLEY: I think it is, Chairman, but I don't know enough about it.

CHAIRMAN: It's quite a high level, is my recollection, higher than is experienced in Hong Kong.

PROF JOHN STANLEY: Okay.

MR DEREK CHAN: Yes, as a possible downside risk to competitive tendering, you have mentioned in your answer something about deferring costs. Let me try to flesh that out a little bit more.

You gave an example of maintenance costs.

PROF JOHN STANLEY: Deferred maintenance, yes.

MR DEREK CHAN: Is that a consequence of the contract length being only a specified period of time, so as long as you keep up your performance within that period, you don't care what happens after, or is that a wrong way of looking at it?

PROF JOHN STANLEY: No. I think -- again as I said earlier on, I'm not aware of the full detail of the competitively tendered contract, but the usual practice for government in this would be to put some requirements in the contract about the condition of the vehicles at the end of the contract period, so that you would avoid that problem.

MR DEREK CHAN: But in terms of the general concept of deferring costs as a downside risk of competitive tendering -- I think you mentioned the operator going in low -- what do you mean by deferring costs? If I understand correctly, I go in low, I operate with low cost, I cut corners here and there because of the length of the contract, I don't look at the long term, I look

at the short term -- is that the idea you are trying to express or am I getting it wrong?

PROF JOHN STANLEY: Yes. I think, during the process, if you are in that position you have a serious discussion with the government about whether they might be prepared to help you out a little bit in terms of giving you a higher rate of remuneration. I mean, that's a thing that happens. You will find operators do that. They actually go to government and try to renegotiate their contract if they feel they have gone in too low.

In the particular Melbourne case, as I say, we identified a real problem that we believe was an example of that situation. That's been dealt with and the operator's fleet is now in a much better condition. I don't know whether there was any payment from government or not in that process.

MR DEREK CHAN: Perhaps -- I'm sorry for going back on this issue, but I just want to make it absolutely clear I'm understanding it properly. I've heard a lot about advantages commercially for a competitive tender, but are there any advantages that relate specifically to safety that arise out of competitive tendering?

PROF JOHN STANLEY: I can't think of any, Mr Chan, but others may be able to.

CHAIRMAN: You point to the fact that there is a risk.

PROF JOHN STANLEY: I think there's a risk.

CHAIRMAN: The operator finds that he's underbid and so he doesn't replace the tyres every 50,000 kilometres; he says they will last 60,000 --

PROF JOHN STANLEY: They will go a bit further, yes, exactly.

CHAIRMAN: -- so that's a risk to safety?

PROF JOHN STANLEY: That's the risk, I think.

MR DEREK CHAN: I note that one-third of the Melbourne routes are competitively tendered. Have you seen how that introduction of competitive tendering -- has that brought about any benefits in terms of the safe operation of the buses?

PROF JOHN STANLEY: I don't think there's any evidence of that. I think, if you look at the transport ombudsman's report about complaints against bus operators, you will find that the company that holds the contract for the competitively tendered service tends to rate relatively high in terms of complaints from customers to the transport ombudsman, and I gave you the other example of the maintenance problem that we identified as well.

CHAIRMAN: Which of the competitive tendered companies was that?

PROF JOHN STANLEY: The current holder, Transdev.

CHAIRMAN: Transdev?

PROF JOHN STANLEY: Mmm.

CHAIRMAN: I know from London that they have had experiences where a maintenance problem is in fact brought about by a lack of strategic planning, where all the fitters and engineers retired at the same time and they were unable to recruit. Was the Melbourne problem of that kind of origin or was it perceived to be a cost-cutting problem?

PROF JOHN STANLEY: No, I think it's really more to do with bus -- we've got an incredibly high population growth in Melbourne at the moment. It's growing about 2.5 per cent per annum. So the buses are being worked much harder, and I think it's partly to do with that, that the buses are doing more kilometres, they are being kept a bit longer so they are getting a bit older. That's I think probably what's been going on there.

CHAIRMAN: Thank you.

MR DEREK CHAN: Professor, can I then move on to look at the pros and cons of a negotiated contract concept. Can I start first by taking you to your second report, that is the expert bundle at page 86. I am interested in the bottom paragraph of that page.

Can I just read that passage out. You say at the bottom of page 86:

"Route bus operators need to feel a certain amount of performance pressure when they are essentially

operating under a renewable negotiated franchise/contract regime. The author supports the negotiated approach to allocating the rights for route service provision, provided this includes mechanisms to ensure that operators are under pressure to perform across a range of outcome areas. This needs opportunities for a bonus for good performance but penalties for poor performance and a plausible risk of loss of franchise in the event of particularly poor performance public definitions of which should be embedded in the franchise agreement."

Can I first start with a general question: why do you support the negotiated approach over a competitive tendering approach?

PROF JOHN STANLEY: Yes. We have done a lot of work on this in Melbourne, and I think the major benefit is that what you can do with a negotiated contract, if you determine that you want to do this, is develop a really strong relationship between the operators and the government, in terms of how best to develop the system as a whole. Our experience would be that there are limited skills in government, and limited skills in the operators, in terms of things like system design and how to actually get the best out of your public transport. And if there's an opportunity to get government, the government

experts in this space, and the industry working together, you get a situation of one plus one equals three.

That's really what we've tried to do, through -- I've written about this in some of my papers -- developing what we call a trusting relationship between the government and the operator, but not to the point of what some people call regulatory capture, where the operators try to capture the regulator. That's completely anathema to what I'm talking about. But we are talking about really trusting partnerships between the two, so there's really strong and open collaboration, and that means that the contract or the franchise can vary through the period of the contract. It's an evolving thing. It's a live document. It's not set in stone at the start, as competitive tender documents tend to be, but you recognise going into it that you are trying to improve the value of the service all the way through that period, on the basis of a trusting partnership between those players who are in it.

I think we were able to do that in Melbourne at the time when I was running the Bus Association, where we achieved a very substantial increase in patronage and service delivery because of the nature of the

relationship we put in place with the government, that hadn't been done for 30 or 40 years before that.

So I think there is evidence from our experience that if you seek to develop a trusting partnership between government and the authority, without regulatory capture, but a partnership that holds accountability is really important -- so the operator's got to perform; he is not being given a licence just to receive money -- then you can get really good outcomes. That's why performance pressure is important to guard against this risk, if you like, of regulatory capture under a negotiated arrangement.

CHAIRMAN: Could you expand on what you describe as "regulatory capture"?

PROF JOHN STANLEY: Certainly, Chairman. This is the thing we have talked about a little bit before, if you like, where the operator might go into a tender, bid too low, works very hard on the government to try and become their best friends, and then seeks to ratchet up the price of the contract later on.

People would often criticise negotiated contracts for just that point, that they say that the operators have captured the government, and negotiation just lets them continue on in what could be said is a rent-seeking behaviour. So we are really strong on the importance of

performance pressure to mitigate that risk, because it is a risk.

CHAIRMAN: And another way it might manifest itself would be where the bus operator is able to resist any suggestions made by the government about how to improve, for example, safety devices on the bus.

PROF JOHN STANLEY: Sure.

CHAIRMAN: Never actually doing what is discussed, never coming up with an actual change.

PROF JOHN STANLEY: If you have captured the regulator, you can do that.

CHAIRMAN: That's the risk.

PROF JOHN STANLEY: It's a risk. That's why you need performance pressure, and the performance pressure needs to be seen for what it is, as genuine performance pressure.

CHAIRMAN: Could you give some examples of what you regard as performance pressure? In what areas?

PROF JOHN STANLEY: Yes. In particular, the safety performance pressure. We approach that very much in Melbourne through seeing -- and I think this may be one of the things that we are pretty unique in -- we see safety as a shared responsibility. All the parties in what we call the chain of responsibility that can impact bus safety have safety duties, and that requirement sits

underneath our accreditation system and it sits underneath our negotiated contracting arrangements.

So all of our operators are highly aware that they are liable to be put in a position where they might find themselves in court, if safety circumstances turn out to be such that they can be shown to not have taken due care and done all that is, so far as is reasonably practicable, to reduce safety risks.

That's a really important element of performance pressure, that chain of responsibility provision. I would say the lower-level performance pressure, not as significant as that, is to do with incentives and penalties that we talked about before, things like on-time running, and so on, but also, as Prof Lo talks about, whether you can have some incentives as well with respect to safety.

CHAIRMAN: Yes, because on-time running is a service incentive for penalty, but safety, as Prof Lo has mentioned, might be measured in accident rates?

PROF JOHN STANLEY: Absolutely.

CHAIRMAN: What other ways can one measure safety?

PROF JOHN STANLEY: I think accident rate is a really good starting point, and if you look at some of the reporting that has been done I think in the safety plans of the five-year forward plans, there's information on

fatalities, collisions, non-collisions -- "slips, trips and falls" types of involvement involvements as well -- and in my view, if you are going to go down the path of developing safety as an incentive or penalty provision, I would drill down into where are the safety problems. So you wouldn't use accident involvement rate in total; you would look at the fatality rate, you would look at "slips, trips and falls". And you would form a view, I think, on what is the relative importance of those two things.

I think one operator I saw, for example, had an increase in the "slips, trips and falls" type accidents, but a drop in fatalities. So, if you add them up together, and say one incident is an incident, you are missing that nuance. So I would be trying to decompose it a bit and look at the major areas of safety concern and make sure that there are KPIs, if you like, or incentive/penalty clauses that relate to those. That means you are going to really end up with a bundle, I think, of measures. I don't know how many elements are in that bundle. That's something that needs to be settled by negotiation between government operators with advice, for example, from committees such as your own, about what the components are.

But I would start with what are the main sources of

safety problems and start to target those.

CHAIRMAN: I think London have identified 42 components of some measure of approaching safety in that way.

PROF JOHN STANLEY: That sounds too many for me.

MR DEREK CHAN: You focused on performance pressure. Can I just put this to you, to see what observations or comments you have.

In a situation in Hong Kong where the bus service is in one sense also competing with other modes of transportation for patronage -- for example the rail, public light buses, taxis -- do you think that type of competition also creates the type of performance pressure that you are envisaging?

PROF JOHN STANLEY: It creates an element of performance pressure, but I don't think it's anywhere near as strong as the performance pressure that you get, for example, under competitive tendering, because the consequences of poor performance are much more severe under competitive tendering than they are under the context that you describe.

So, for example, you might lose some passengers if you are not competing well against MTR, for example. But that's different to losing your business. I don't see the need for performance pressure to necessarily go as far as losing your business, you know, probably as

commonly as it does under competitive tendering, but that needs to be a plausible proposition.

I think, for performance pressure, there needs to be a plausible threat that if your performance is so bad, then your negotiated franchise/contract finishes.

I guess the other thing I would say, Chairman, is that the fare adjustment mechanism that exists under your franchise agreement here provides a little bit of slack in the sense there's a formula for adjusting the fares, changes in operating costs and revenue, for example, are one of those things, but the need to provide the bus operator with a reasonable rate of return is one element to be taken into account in fare adjustment.

So plausibly somebody who's losing the sort of business that you talked about in competition could make an argument against a clause like that.

CHAIRMAN: We have received evidence from the bus operators -- and I think it's fair to categorise it in this way -- that they are not very happy with this fare adjustment mechanism, and they have reached the extent in which they don't even make applications because they anticipate them being rejected.

PROF JOHN STANLEY: I think it's really important that a franchise or a contract has a clear and unambiguous

means of adjusting fares. In our case, it's not so much fares as the return to the operator that gets subjected to the same sort of formula. So you would look at what's happening to wages, you would look at what's happening to fuel costs, you would look at what's happening to other elements of costs in the cost structure, and we would take those into account in changing the remuneration or the subsidy level, if you like, that the operator receives from government; whereas here it gets built into the fare-setting process as the medium that you use to achieve the same outcome.

CHAIRMAN: Having said what I did about the bus operators' views as a fare mechanism adjustment, I ought to add that they have overcome their misgivings by both making applications which are being considered by government at the moment.

Mr Chan, if that's a convenient moment.

MR DEREK CHAN: Yes, I was actually going to move on to the next topic, so that's very convenient.

CHAIRMAN: Prof Stanley, we are going to take a break now, to give all of us a break, for 20 minutes, and resume after that.

PROF JOHN STANLEY: Thank you, Chairman.

(11.35 am)

(A short adjournment)

(11.56 am)

CHAIRMAN: Professor, before we resume, might I just mention two matters. One is, as you know, we have simultaneous interpretation being performed for us. So, for the benefit of those that are listening to the interpretation, might I invite you to slow down in your answers, perhaps even making pauses, so that they can follow up with you.

The other is that perhaps you could speak more closely to the microphone which enables all of us to hear you better. It's no doubt adjustable. You will find whatever is a comfortable distance.

PROF JOHN STANLEY: Thank you.

CHAIRMAN: Mr Chan.

MR DEREK CHAN: Thank you, Mr Chairman.

We had been talking about incentivising safety just before the break. I am going to focus more specifically on that topic now.

Before the break, you have talked a little bit about what possible indicators to focus on if you want a safety-related incentive. Can I just ask a general question: how do you envisage this working in an environment where the bus operator already assumes the risk of profit from the bus operation, so they themselves depend on patronage? Do you envisage this

sort of incentive being a direct cash payment or a cash deduction, a fine of some sort? Is that what's being envisaged, or is that something different?

PROF JOHN STANLEY: No, that's exactly what I envisage, Mr Chan.

MR DEREK CHAN: So you would have targets or benchmarks, so to speak, and if you don't make them, there will be a penalty clause, and if you go over them, there will be a bonus payment as such?

PROF JOHN STANLEY: Indeed, and I would imagine you would set that up in bands, so you might fall short by a little bit, or fall short by a big bit, or you might accomplish the target by a small amount or by a large amount, and that the level of the incentive or penalty would reflect those thresholds, if you like.

I would just make a few comments which -- I talked before the break about, for example, fatalities, "slips, trips and falls", and so on, being some of the sorts of things you might take into account. In terms of developing KPIs or performance indicators, there's a number of criteria that you would expect them to meet. They need to be specific. You've clearly got to be able to measure them. They ought to be achievable. They clearly need to be relevant. The data, and so on, needs to be available on a timely basis. And all of those

KPIs need to be something that the operator can affect. There's no point having a KPI if the operator is not able to, by their performance, influence the outcomes of them. So they are really important.

But I also go back to the point I said before about we see safety as a shared responsibility, and I think it would be a real shame if those KPIs focused excessively on the bus captains and not enough on other people who are also, I believe, part of the chain of responsibility for bus safety. So you would look at particular sorts of safety performance indicators, which might be things like fatalities and "slips, trips and falls", and so on. But you would also try and see if there's a way in those indicators to target a range of people who can affect safety outcomes, not just the bus captains. Bus captains often tend to be the kind of target for a lot of this sort of work and that's probably a bit unfair.

MR DEREK CHAN: By your previous answer, do you have in mind actually a bonus system from the government that not only extends to the operator but employees of the operator or --

PROF JOHN STANLEY: I think that would be a matter for the companies to work out, how they think they are going to get the best result in terms of the objectives that they've got. But I had initially envisaged that this

would be a bonus or a penalty at the company level, and then the company would make a judgment about whether it would like to reward, for example, particular people who have contributed to that outcome.

MR DEREK CHAN: We have talked about at a general conceptual level. Can I take you to a specific example that we have come across during the inquiry -- there are a number of examples but I will just pick one of them.

PROF JOHN STANLEY: Thank you.

MR DEREK CHAN: Just to illustrate how the concept may or may not work, and ask for your observations on that example.

Can I first take you to the TD-1 bundle at page 192. Just so you know what this document is, it is a KMB forward planning programme, and this particular page is one page of the section on bus safety for 2018 to 2022.

So this document, at page 192, would have been submitted by KMB to the Transport Department in around mid-2017.

So, at paragraph 8.8.1 of this document:

"KMB proposes to use the 3-year average of 2014 to 2016 actual accident involvement rate of 2.71 (defined as the number of buses involved in accidents per million kilometres operated) as a target for the purpose of this five-year plan period. It represents a 6 per cent

reduction from the accident rate in 2014, the highest record among 2014 to 2016."

So here we have the setting of a target or benchmark, so to speak.

So this is the target that KMB set for themselves as one possible safety indicator. This is in 2017.

If I can fast-forward one year and see what happens in mid-2018, and for that can I invite you to go to TD-5, page 1729.

Sorry, can I just go back a page, to 1728, just to give the document some context. So, at 1728, you see a letter from the Transport Department dated 21 May 2018, and it's from the Transport Department to KMB. The first paragraph of the letter says:

"This is to provide you with a set of guidelines and requirements covering the following aspects for your compliance in preparation of the five-year forward planning programme (2019 to 2023) ..."

So we are one year on, and we are on the topic of the same forward planning programme.

Over the page, on 1729, you will see the Transport Department's comments on bus safety. In the first paragraph, the Transport Department says:

"We note that there was an increase in the number of KMB buses involved in accident per million

vehicle-kilometres from 2.74 in 2016 to 3.04 in 2017, which was at a high level."

In the next paragraph, I will just read the last sentence:

"Also, the actual accident involvement rate, which is 3.04 in 2017, was higher than the proposed target accident involvement rate in your FPP" -- that's the one we saw earlier" -- which was 2.71."

And you can see in the table below that the accident rate per million vehicle-kilometres has been increasing, 2015, 2016 and 2017.

The paragraph below the table also notes that:

"In terms of number of traffic accidents/number of cases involving KMB buses as shown in the table below, it has also shown an increasing trend from 362 in 2015 to 423 in 2017."

From the passages I have just read, we see that KMB did not meet the accident target rate that it set for itself. You can also see an increasing trend in KMB's accident rate per million vehicle-kilometres.

In this context, where KMB has failed to meet the target it set for itself, do you see your suggested incentive/penalty system operating in a situation like this?

PROF JOHN STANLEY: Yes, but I wouldn't apply it the way

it's been applied here.

If you look through the rows in the table that's headed, "Number of KMB buses involved in traffic accidents", you will see the number of fatalities has gone from 11 to 5 to 3; the number of serious injuries has gone from 122 to 110 to 11; and the number of slight injuries has gone from 737 to 787 to 889.

Now, to quote an accident rate per million vehicle-kilometres that treats each of those rows as equally weighted is, to me, an error if you are trying to develop a performance indicator.

I would say fatalities are far and away more important than serious injuries, which are a lot more important than slight injuries. So you need a weight to apply to reflect the significance of those types of accidents, if you are going to come up with a KPI, if you like, that measures accident safety performance.

And accident rates per million vehicle-kilometres are a very blunt and, I believe, a misleading measure.

MR DEREK CHAN: You would need a more nuanced indicator or set of indicators?

PROF JOHN STANLEY: Absolutely. You need a set of more nuanced indicators. These should form part of it, but it should be the components, not the total.

And the components need to be weighted in some way

to reflect -- I mean, as an economist, I would use the cost of those different sorts of accidents, which we regularly measure in Australia and I'm sure you do here in Hong Kong: you have a value for a typical fatal accident, you have a value for a typical serious injury accident, and you have a value for a typical slight injury accident. I would use those weights to come up with a weighted, if you like, accident rate per million vehicle-kilometres.

Have in mind also, though, there would be other things you would want to include as well.

MR DEREK CHAN: If you go on to the next page, 1730, at the bottom, section 3, the Transport Department proposes a safety-related plan, or KMB proposes a safety-related plan. I will just read the first paragraph under that heading:

"With a view to lower accident involvement rate of buses and further enhance the safety of bus services provided to the passengers, your company is required to propose respective plans/proposals", and there are a number of them.

If you go over the page to 1731, the Transport Department required KMB to propose a target accident rate for the coming FPP, and proposed target reduction of accident involvement rate.

Again, your opinion would be that these targets are too blunt, even as a target?

PROF JOHN STANLEY: Absolutely, Mr Chan. They need to be more nuanced than that.

I would have thought targets like that ought to be the outcome of a negotiation between the Transport Department and the operator, rather than something that the operator is going to propose to the department. I think this is the sort of thing that really should be the subject of a discussion where both parties can put their cards on the table and come up with a feasible programme.

MR DEREK CHAN: Professor, I notice from your report that the Melbourne bus contracts do not specify safety performance as being subject to incentive and penalty provisions under contract.

Can I first take you to the reference and then ask for your opinion on that.

PROF JOHN STANLEY: Yes.

MR DEREK CHAN: Can I take you to page 26 of the expert bundle. That should be in your first report.

Are you on page 26?

PROF JOHN STANLEY: Yes.

MR DEREK CHAN: Can I read the second full paragraph, paragraph 3.4:

"Under the ten-year metropolitan route bus service contracts that expire in mid-2018, incentive/penalty provisions relate to patronage growth ... and on-time running/service cancellations. The contracts that will replace those contracts generally retain this focus. Safety is not a KPI [key performance indicator] under the contracts and safety performance is not subject to incentive/penalty provisions under the contracts but poor safety performance could result in the safety director removing an operator's accreditation, which would mean loss of contract. The new contracts are understood to provide for a passenger experience regime, which is about the operator's performance with respect to number, response and resolution of passenger complaints that fall within the operator's control. Relevant KPIs are yet to be developed but the focus is wider than safety."

Now, my question is a very simple one. If the incentivising safety concept is important, why is it not being incorporated in the Melbourne contracts?

PROF JOHN STANLEY: Yes. Mr Chan, the reason for that is that we rely very strongly, in our Melbourne contracts, on the legislative base of safety duties and chain of responsibility to achieve safety outcomes. So that essentially makes all the parties who are able to

influence safety outcomes responsible for and accountable for their performance in that regard.

I personally believe that is the primary reason why our services are held in a high regard from the safety point of view. The Transport Safety Director, who I've met many times during the preparation of the submissions to your hearing, is firmly of the view that Melbourne's route bus services are safe, and I believe that the fundamental reason that that's the case is that people can be held to account for their performance in the event that it's not safe.

So we've really got a very strong underpinning of the contract regime by safety duties and chain of responsibility in the law.

MR DEREK CHAN: Just to give a very general understanding of the concept that you just raised -- so you have legal duties in Victoria to promote safety insofar as reasonably practicable, but perhaps the peculiar feature of that is that that duty is not just on the bus operator but also on the employees that come under the bus operator?

PROF JOHN STANLEY: Yes, Mr Chan. The Bus Safety Act, which is the relevant legislation in Victoria, legislates safety duties. The primary safety duty, if I can read the line from the legislation, is an obligation to

eliminate or minimise potential harm or risk by doing all that is reasonably practicable to ensure safety.

Then, if you take an example, it talks about:

"An operator of a bus must, so far as is reasonably practicable, ensure the safety of the bus service."

Now, the legislation then designates safety duties that apply to a range of people, and it mentions --

CHAIRMAN: Just pause there, if you would, Professor.

Do we have this available so it can be displayed on the screen?

MR DEREK CHAN: Yes, we have. It would be in, probably, the professor's first report.

CHAIRMAN: But is it not in an annex to -- or one of the documents to which reference is made in the report? Are those documents available? Do we have the Bus Safety Act?

MR DEREK CHAN: Perhaps the professor can assist on that, but not as far as I can see from the references attached to the --

CHAIRMAN: I must say, I have downloaded this myself and I have it in my own bundle. Is this not available for all of us?

MR DEREK CHAN: Yes, we can perhaps make it available.

CHAIRMAN: But is it not already available on the screen? Is there a reference number -- I have three volumes of

references to Prof Stanley's report on my right-hand side -- is it one of those?

PROF JOHN STANLEY: Pages 22 and 23 of my first report contain most of the relevant bits of the legislation.

MR DEREK CHAN: Mr Chairman, the references annexed to the professor's report contain articles and publications that describe the chain of responsibility, but not the Act itself.

CHAIRMAN: Then we need the Act.

MR DEREK CHAN: Perhaps I can make that available over our next adjournment. Then we can come back to that issue.

CHAIRMAN: Yes. But, at all events, we have an excerpt from it at page 23?

MR DEREK CHAN: Yes, we have.

CHAIRMAN: You were about to go on, Professor, to describe upon whom these duties are imposed.

PROF JOHN STANLEY: Thank you, Chairman. The legislation actually talks about, if I use your language, bus captains. It talks about schedulers. It talks about service procurers, maintenance staff, and so on.

There is a concept in the legislation called bus safety workers, and these safety duties apply to bus safety workers as well as to particular designated people such as drivers or bus captains.

So there is an extensive range of parties who can

affect safety, and the two -- or a fundamental principle on which the legislation sits is the principle of shared responsibility which I talk about at the bottom of page 22 of the report.

CHAIRMAN: Does this duty extend to the public?

PROF JOHN STANLEY: It's not designated as such, no.

CHAIRMAN: I thought I had seen that in the legislation.

PROF JOHN STANLEY: I've missed that, if that's the case.

CHAIRMAN: I'm sure you are more familiar with it than I am. I was a bit taken aback, if my memory is correct.

But, at all events, a chain of people who have duties?

PROF JOHN STANLEY: Who can affect safety outcomes. It's really, I think, to remind people that this isn't just the bus drivers. You know, there are a lot of people who can affect safety outcomes, and they all need to be held accountable for their performance.

CHAIRMAN: So how are they held accountable; by being taken to court?

PROF JOHN STANLEY: That can happen. The provisions essentially have monetary fines that I --

CHAIRMAN: And there are different levels depending on whether it's the company, the scheduler, the bus captain, and so on?

PROF JOHN STANLEY: Yes.

CHAIRMAN: With the highest level reserved for the upper echelons of the company?

PROF JOHN STANLEY: Correct, and in the new national law that's about to come into play on 1 October -- which, in a sense, sets the background for the Victorian law -- they have introduced a category of "reckless behaviour" as well, which can lead to prison as a possible consequence.

CHAIRMAN: Yes.

PROF JOHN STANLEY: That's in the National Heavy Vehicle Law update, but that will get reflected through shortly into, if you like, the penalties that can apply under this legislation. At the moment, they are mainly monetary penalties.

CHAIRMAN: Before you go on, we've now got the Act. Which section tells us about who's got the public duty?

PROF JOHN STANLEY: Clause 15 was where I was talking -- so the duty of an operator, for example:

"An operator of a bus service must, so far as is reasonably practicable, ensure the safety of the bus service."

Then, if you go down to clause 16, it has similar language for a procurer.

CHAIRMAN: What is a procurer?

PROF JOHN STANLEY: A procurer is somebody who buys a bus

service, and there's a really interesting discussion going on at the moment in Victoria about whether the public transport authority, which buys and determines the schedules, is a procurer and might in fact be one of the chain of responsibility.

CHAIRMAN: Why would it not be?

PROF JOHN STANLEY: That would be my view, Chairman.

So this continues, going down, in that way.

Then, in section 14 of the Act, it talks --

CHAIRMAN: Can we just scroll down the list for the moment, if we may. So we were going to 17. 17 is a bus safety worker.

PROF JOHN STANLEY: 17 is a bus safety worker. Now, the "bus safety worker" is defined up in the definitions at the front part of the legislation.

CHAIRMAN: What does that encompass, broadly?

PROF JOHN STANLEY: I suggest it would be better to look at that than to rely on me to remember it, Chairman.

CHAIRMAN: Very sensible. Can we go to the definitions section, which is normally section 1.

"Definitions", section 3. Yes, "bus safety work". Is there "bus safety worker"? There we are.

PROF JOHN STANLEY: So a bus safety worker means:

"... a person who has carried out, is carrying out or is about to carry out, bus safety work", which is

defined in the previous point, "including a person who is --

(a) employed or engaged by a bus operator to carry out bus safety work;

(b) engaged by any other persons to carry out bus safety work;

(c) a trainee;

(d) a volunteer".

So this is quite broad, and, Chairman, this is where we as bus testers in road safety inspection -- that's why we were concerned, because we do testing of vehicles, and we saw that this provision could pick us up.

CHAIRMAN: Yes. Can we go to "bus safety work", the previous definition.

PROF JOHN STANLEY: It means:

"... an activity that may affect the safety of bus services including --

(a) driving a bus or activities associated with driving a bus;

(b) designing, constructing, supplying, repairing, modifying, maintaining, monitoring, examining or testing a bus ..."

CHAIRMAN: That's the section that applies to you.

PROF JOHN STANLEY: That's us.

"... (c) designing, constructing, supplying, installing, repairing, modifying, maintaining, monitoring, examining or testing equipment in or on a bus;

(d) setting or altering a schedule or timetable for a bus service;

(e) a prescribed activity"; I'm not sure what that means.

But this is pretty comprehensive, and it's really important, I think, to understand that the managers in the bus companies know this. They are very conscious of it. And, for example, in discussions about bus driver working hours, this is really front of mind in terms of what they will accept. So, for example, our bus drivers or bus captains on average would work 44 to 46 hours a week. They can, under the regulations, work more than that. They don't, because the operators are concerned about the safety implications of so doing.

In fact, the CEO of one of the larger operators, when he took on that role in 2008, had an average of about 48 hours, and he brought that down to within the 44 to 46 range over the subsequent four or five years. And most of the Melbourne operators are running at around about 45, in round terms, hours' driving a week.

CHAIRMAN: What are the maximum permitted hours of driving

per week?

PROF JOHN STANLEY: They could do 72, Chairman, which we wouldn't think very favourably on.

CHAIRMAN: And is it your evidence that it is, because regard is had to this safety duty, one of the reasons that these hours have been reduced?

PROF JOHN STANLEY: Yes. The operators are very conscious of the scheduling requirements, and, for example, one operator builds 35 minutes' I think slack into a five and a quarter hour shift to allow for traffic congestion affecting their run times because they don't want to go beyond the five and a quarter hours which, under our regulation, is the maximum you can drive without having a break.

And if you talk to them, they have absolutely front of mind that this is the potential safety consequences and implications for them if, for example, somebody was killed by a driver driving an excessive amount of time.

CHAIRMAN: Yes, Mr Chan.

MR DEREK CHAN: And the point that you were making, going into this chain of responsibility topic, was that because you have this underlying layer of legal obligations and duties, that explains why you don't need to specifically incentivise safety in the bus contract itself?

PROF JOHN STANLEY: Yes.

MR DEREK CHAN: So, in Hong Kong, where we don't have that sort of underlying legislative regime of duties and obligations on safety, would you say that it makes it more important to incentivise or focus on safety in other ways?

PROF JOHN STANLEY: I think it's a good way to increase the focus on safety, but not nearly as powerful or compelling as the safety duties and chain of responsibility provisions that we have. But I would also say that if you were to use safety penalties and incentives then, to go back to a point I made earlier, try and ensure that those incentives and penalties encompass a number of parties who are able to affect safety outcomes. In a sense, it's a de facto way of trying to do chain of responsibility.

CHAIRMAN: Could you give us some context for the Bus Safety Act? Is this the Act that brought into Victoria safety duties of this kind?

PROF JOHN STANLEY: Yes. The way the law works, Chairman, is that -- essentially, it is driven by the national law that I was involved in when I was at the National Road Transport Commission. We now have a National Road Transport Commission, and Heavy Vehicle National Law is set through that national process and it gets applied at

the state level.

Now, not all states have a Bus Safety Act like this. Victoria and New South Wales, which are the two biggest states that have gone the furthest in this regard, and in fact the Bus Safety Act here got a bit ahead of the national legislation by introducing this idea of "so far as is reasonably practicable". The national legislation until I think 1 October this year is still based on "all reasonable effort" type of concepts. But this Victorian Act has had "so far as is reasonably practicable" as its basis since 2009, and the national law is picking that up on 1 October. So, in a sense, the national law is catching up a little bit to what the Bus Safety Act is saying.

CHAIRMAN: But how many years in the making has this process involved?

PROF JOHN STANLEY: Probably about three or four. It happened when I was CEO of the Bus Association. The law was in 2009 and I had that role from 1999 to 2008. So, you know, the legislation and putting the industry's views on the development of legislation was something that I was involved in through that time.

And I think I said in my first paper that partly because the industry receives a substantial amount of financial support from government, we wanted to be seen

as very proactive in terms of safety, that we are good corporate citizens. So, in a sense, we were very proactive or keen to see safety legislation of this kind to which we thought we could confidently say we would comply.

CHAIRMAN: That, of course, is not the factual circumstance of Hong Kong.

PROF JOHN STANLEY: Indeed. I would say that if you look at simple indicators like fatality rates per million vehicle-kilometres, Hong Kong and London are not as good as Melbourne, and one possible reason for that is the fact that we've got this legislation. Another possible reason is our bus operating circumstances are probably a bit easier than they are in Hong Kong, in a physical sense, and London too.

MR DEREK CHAN: Correct me if I am wrong, but I suppose one factor in play here is that because you have a heavily subsidised system, and a cost-plus-profit contract structure, any increased costs that relate to safety can in that sense be passed on to the government?

PROF JOHN STANLEY: Absolutely. But it also means that the government then looks very closely at any potential additions to cost that may be from a safety perspective.

An example would be we've had concerns for a number of years, but more particularly in the last three or

four years, with abuse and assault of bus drivers, and so installing security screens, closed-circuit television, and so on, to deal with problems like that have become a basis for sharing. So the operators are in fact meeting part of the cost of that and the government is meeting part of the cost of that.

So it's a negotiated outcome.

MEMBER LO: In proposing and enhancing this Bus Safety Act, who are the possible resistance and opposition against it? Who might be that?

PROF JOHN STANLEY: Who would be against it?

MEMBER LO: Yes. I mean, is it a straightforward thing or --

PROF JOHN STANLEY: I can't think of anybody. The people who might be opposed to it, you would think, would be bus operators, because it really makes them accountable, but our bus operators in Melbourne are very much behind this legislation and the accreditation system, that is one of the key elements to implement it, because they know, or they believe, that it improves the safety outcomes that they can achieve.

So, for example, it makes them a better place for someone to go and work because they think their drivers are more likely to be safer than in a system that doesn't have this same level of focus.

So I don't see anybody really opposed to this, because the most likely candidate is one of the strongest components for having it.

MEMBER LO: Yes, but it is imposing duties and obligations and liabilities upon them, and they welcome it?

PROF JOHN STANLEY: They think they can perform to an extent where they can meet their obligations to a satisfactory level. In that event, they see that it can enhance their standing as an industry that is a responsible industry. So it has really been approached as an industry, and I think that's one of the benefits that we have in Melbourne from having a very strong operator association, that we can speak as an industry rather than as individual operators.

CHAIRMAN: Of course, there is an economic advantage to enhanced safety, because accidents cost money.

PROF JOHN STANLEY: Indeed.

CHAIRMAN: That's a benefit to the bus operators.

PROF JOHN STANLEY: Indeed, Chair.

MR DEREK CHAN: In the same context, the committee has received, in the form of a written report, some opposing views to the concept of incentivising safety. Can I invite your observations on that?

PROF JOHN STANLEY: Mm-hmm.

MR DEREK CHAN: Can I do that firstly by going to the expert

bundle, page 153.

Just to give this report some context, it is a report prepared by Mr Mike Weston, who is a passenger transport consult, and he specialises in the London bus system.

The page is at page 153 at the bottom right-hand corner, and the passage that I'm interested in is under the heading, "Incentivisation of safety improvements". I will just read that paragraph:

"As referred to in section 6.1 one of the recommendations from the Greater London Assembly Transport Committee was 'Revise its senior staff bonus scheme to introduce a direct link between bus safety and performance-related payments'. Also, within the body of the report, there is a recommendation that 'TfL's [that's Transport for London's] contracts with bus operators do not incentivise safety and should be revised'. During discussions with the London bus operators it was clear that operators do not support the direct incentivisation of safety within the route agreement. Operators were concerned that direct financial incentivisation might drive the wrong behaviours, especially at lower levels within the company, including potentially encouraging underreporting. Also, operators felt that linking

safety performance to financial payments could lead to a reluctance to collaborate with other operators on safety-related issues as it now had a competitive and commercial benefit. Overall options to incentivise safety within the bus contracts were not seen as a positive move."

So he's identified two possible risks. First, the underreporting of issues, and secondly, reduces collaboration between bus operators.

Do you have any observations or comments to make in respect of these two potential risks identified by Mr Weston?

PROF JOHN STANLEY: Yes. Look, I acknowledge that there is a risk that you could incentivise underreporting, but I think that's a case of trying to design monitoring systems and compliance assurance systems that make sure that doesn't happen.

For example, in our setting, the Transport Safety Director is the system auditor. He is an independent person, organisation, with a statutory brief to accredit operators and to ensure that they are complying with the provisions of that accreditation regime, and they include things like reporting.

So I think, if you are going to design incentives and penalties, you need to make sure that you do guard

against that risk. Now, that may be hard to do, but that's something you've got to "suck it and see", I think, try to find a system that deals with that risk.

As I say, our existence of a Transport Safety Director as the system umpire or auditor I think is a way that you can help to do that.

The issue of reluctant --

MR DEREK CHAN: Before you go to the next issue, can I just flesh out that first issue, underreporting?

PROF JOHN STANLEY: Sure.

MR DEREK CHAN: Your evidence is that the risk of underreporting can be met with putting in place a reliable system that ensures that the data is accurately collected and recorded? Am I understanding your evidence properly?

PROF JOHN STANLEY: Yes. That would be where I would be looking for the solution and, you know, that is something that you would need to work through and see that you can achieve that outcome. But the intention would be to use that sort of process to try and deal with that problem.

MR DEREK CHAN: So, to some extent, provide some automation in the data collection and remove the human element?

PROF JOHN STANLEY: That, but also maybe trying to link up databases because incidents or accidents come you

through various sorts of channels. Those --

CHAIRMAN: Yes. I am puzzling as to how one could under-report accidents, because so many different parties would be involved; it wouldn't just be -- it would be the bus driver, it would be the passenger, it might be the police, it would be ambulance. How do you under-report that?

PROF JOHN STANLEY: Just thinking out loud, Chairman, we have a problem in Melbourne sometimes of children throwing rocks at buses on a freeway as the bus goes underneath. If you were the operator and you were on an incentive that's based on involvements of potentially accident-type incidents, you might decide, "We will ignore that, we won't report that", whereas in fact if it had broken the window, hit the driver, you could have killed X people.

CHAIRMAN: That would be a system where your fault doesn't come into the equation. This is someone else's criminal act and you might be penalised that.

PROF JOHN STANLEY: It is.

CHAIRMAN: There must be ways of getting around that.

PROF JOHN STANLEY: I think, when we were talking about the criteria for indicators, it needs to be something that you've got control over.

CHAIRMAN: Yes.

PROF JOHN STANLEY: So I think you've nailed that one well. Thank you.

CHAIRMAN: I think, if my memory is correct, the 42 components of the London assessment contain the fact of the bus driver being abused. How on earth that should redound to the detriment of the bus company is difficult to understand.

PROF JOHN STANLEY: It is important information to have, but it's not something that you would want to be judging a safety penalty on.

I think this needs some really creative thinking, Mr Chan. This is not easy. But, you know, if you are looking at it as an alternative to safety duties and chain of responsibility, then I think the challenge needs to be tackled to make sure you don't encourage underreporting.

If I could deal with the second issue.

MR DEREK CHAN: Sorry, I interrupted you there. Please continue to deal with the second issue.

PROF JOHN STANLEY: I think, in a competitive tendering situation, if you are an operator who has good safety processes, you would think the inclination would be that you would use that to back your pitch, and you probably would not share information with other operators.

So I'm not quite sure about this. A reluctance to

collaborate, I think that's more to do with the problem of competitive tendering than it is to do with the challenge of safety KPIs. I think one of the things we've found is that in a competitive tendering environment, there's a general reluctance of operators to collaborate because they don't want to give away their competitive advantage, and if safety was one of your competitive advantages, then you would keep that to yourself.

So I don't really get that solution. I think one of the other points that was made by the London report -- and I think it's a really important point to make -- is the need for greater collaboration between the operators, and between the operators and government, on safety matters. That's something that I had a recommendation of in my second report too.

CHAIRMAN: Whilst there might be a risk of lack of collaboration between operators directly -- if, for example, in the London system you have Transport for London as the government side of things -- the fact that one operator, for example, because he's using Mobileye 6, has reduced the front and rear shunts in accidents, that would be something that the bus authority would pick up and be able to say, "We've had some striking results from operator A", and they would

disseminate that information to the other bus operators?

PROF JOHN STANLEY: You would hope so, Chairman. You would hope so. In fact, in a situation where you've got incentives and penalties, they can all put in the same technologies and all get a benefit from it.

CHAIRMAN: Yes.

PROF JOHN STANLEY: So I find that point a bit hard to understand, the second point.

CHAIRMAN: Yes, Mr Chan.

MR DEREK CHAN: So that's the incentive to the operator side.

Can I see if I can test the possibility of the further benefit of incentivising safety. So would a safety performance-related penalty/bonus system also have the potential to motivate the government to monitor safety-related performance indicators more closely, because there is now an additional focus and financial consequence that relates specifically to safety?

PROF JOHN STANLEY: You would expect that that would be one of the consequences of this process, particularly if, as I said earlier, there's quite a task to be gone through first in actually devising what those incentives and penalties are going to look like.

So the authority, the Transport Department, if you like, has to involve itself in a pretty deep and

meaningful conversation with the franchised bus operators in the development of those KPIs, which brings up questions of how you would do that monitoring in the process, and that's likely to therefore vest in a much more rigorous process of monitoring and assessment.

MR DEREK CHAN: Yes, Professor. I am going to move on now to a different topic, and that is the topic of accreditation.

PROF JOHN STANLEY: (Nodded head).

MR DEREK CHAN: In the general sense, I understand from your report that bus operator accreditation forms a central part of bus safety in Melbourne. Basically, a bus operator cannot operate unless it is first accredited, and there is a possibility of that accreditation being taken away.

Can I go to two places in your report where you talk about that, to start off the topic.

The first page I would invite you to go to is page 9 of your first report. So that's expert bundle page 9.

Again, I introduce the topic by reading out the first three full paragraphs of page 9:

"Bus operator accreditation, as a programme, was intended to ensure that a person could provide a safe, efficient and effective bus service. It started with three elements:

1. A transport management course for bus and coach operators run by Monash University, the scope of which depended on the type of service an operator wanted to provide. One senior representative of each contracted route service operator needed to complete the course, which included four units, one of which was 'safety risk management for bus operators', but also included units on the legal/regulatory framework, financial management and business development.

2. Management information systems.

3. Maintenance management systems.

As discussed in section 3.3 below, these three elements remain as key regulatory requirements for accredited route bus operators. The safety focus of accreditation more broadly has been substantially enhanced over the decade or so since inception, to focus increasingly on building what can be best described as a safety risk management culture, as discussed in section 3.3.

The bus operator accreditation system forms a major focus of this report because the author sees it as potentially the single most significant point of difference between the Melbourne safety regime and that in Hong Kong. As elaborated above, the institutional setting of Victorian route bus operation was

particularly receptive to the development of this safety agenda at the time of its inception."

So, as I understand it, the accreditation system focuses on the general running of the bus operation, of which safety forms part?

PROF JOHN STANLEY: (Nodded head).

MR DEREK CHAN: Now, I see a reference to the importance of management information systems and maintenance management systems in this accreditation programme. On those two topics, can I invite you to go to page 25 of this report, which refers back to those systems.

At the bottom full paragraph of page 25, I will just read the first half of the bottom paragraph:

"BusVic has played a very active role in establishing the implementing bus operator accreditation in Victoria. For example, it has contributed substantially to course content in the Monash University training programme that accredited operators must complete. Importantly, it has developed template responses to the requirements for management information systems (MIS) and maintenance management systems (MMS), based on ISO 39001, which should enable its members to develop and implement safety risk management systems that meet the requirements of the accreditation regime, provided they are diligently applied."

Now, I see the link between the accreditation system and ISO 39001, to which I will come back. But, firstly, can you describe generally what you see as the major advantages for bus operator accreditation that relate specifically to safety?

PROF JOHN STANLEY: Bus operator accreditation in Melbourne is very much about safety. Essentially, that's the fundamental rationale that sits behind the operation of the accreditation system. It's really about ensuring that the operator can provide a safe service, and it's no surprise then that the accreditation is provided by the Transport Safety Director. So the Transport Safety Director is the person who has to say, "Yes, this person can be an accredited operator", which then means they are eligible to have a contract with the government.

And the maintenance management system and the management information system, the scope of those two systems is in fact determined by the Transport Safety Director. So, under the relevant legislation -- and I think I may have referred to the clauses somewhere in my submission -- the Transport Safety Director tells the operators what they need to -- what he's expecting to see or they are expecting to see, in terms of their maintenance management systems and management information systems.

I've referred in my evidence to some of the documents. For example, this is "Maintenance Management Systems: For Accredited Bus Operators"; "Management Information Systems: For Accredited Bus Operators"; "Managing the Risks to Bus Safety" -- these are publications by the Transport Safety Director which are intended, firstly, to leave operators in no doubt as to what is expected of them if they are to become accredited, but it also helps them through the process of meeting those requirements. And then the Bus Association, as I have referred in the bit that you've got highlighted on the screen, has actually developed template responses for its members to go through and customise, to meet the expectations of those maintenance management systems and management information systems.

The larger operators do a lot of particular tailoring of that to their own circumstances, but for some of the smaller operators those templates may get them almost all the way there.

MR DEREK CHAN: Please correct me if I am wrong, but my understanding is that the accreditation system, insofar as the safety aspects are concerned, focuses a lot on the risk management, and the setting up and running of systems to ensure safety.

Now, what I'm interested in is the comparison of

that focus to ISO 39001. We've already seen a reference to 39001 in this paragraph. Can I also take you to your second report at page 78 of the expert bundle. I'm looking at the paragraph in about the middle of the page, just above the heading "Bus Captain Training". Again, I will just read it out and ask you questions on it:

"Final Transport Department" -- and I think that's a reference to the Transport Department in Hong Kong -- "Road Traffic Management System, pointing out that this has been adopted by some fleet management companies and logistics companies but is not commonly adopted by the Transport Authority. It is noted in the first report on the current project that Victoria's operator accreditation system mirrors ISO 39001, and all route bus operators must achieve accreditation, but does not involve formal certification under that standard."

Now, my question is this. In the Hong Kong context where we do not have an accreditation system and we do not yet have competitive tendering, would requiring bus operators to achieve ISO 39001 have the same type of benefits on safety that can arise under the Melbourne accreditation system?

PROF JOHN STANLEY: You would expect that that would take you a fair distance in that direction. I think the

difference that you would also need to think about is the role of the Transport Safety Director, what mechanism you use, if you like, to assure compliance, as it particularly applies to bus operations in Hong Kong. So you would have the accreditation authority that does the ISO accreditation or certification, if you like, being sure that its expectations were met.

We don't have that, but we've got something like that, but we do also, though, have this Transport Safety Director who, in a sense, is the guardian of the system. So I would be looking to say, if you are going to do that, I think it's a really good idea.

I would think about, then, is there a role as well for somebody like the Transport Safety Director as an independent and accountable guardian, if you like, of system safety.

MR DEREK CHAN: Yes. In Melbourne that guardian of system safety, ensuring that the operator has the appropriate risk management systems in place, would be the Transport Safety Director?

PROF JOHN STANLEY: Correct.

MR DEREK CHAN: In an ISO 39001 context, that task would fall on the accreditation company to perform the annual audits?

PROF JOHN STANLEY: Yes.

MR DEREK CHAN: So that they can have the certification?

PROF JOHN STANLEY: Yes.

MR DEREK CHAN: Mr Chairman, I'm about to move on to the next topic of a standing committee on bus safety. Would that be a convenient moment?

CHAIRMAN: Yes, certainly.

Professor, we will adjourn now for our lunch break, and we will resume again at 2.30 this afternoon.

PROF JOHN STANLEY: Thank you, Chairman.

(12.57 pm)

(The luncheon adjournment)

(2.30 pm)

CHAIRMAN: Good afternoon.

Yes, Mr Chan.

MR DEREK CHAN: Thank you, Mr Chairman.

Prof Stanley, I am about to move on to the next topic. That is the standing committee on bus safety, and also the Transport Safety Director. I'm going to deal with these together.

You have already talked about, this morning, the role of the Transport Safety Director in enforcing the chain of responsibility and duties arising under the ordinance. So I will be focusing on this different aspect, if I may.

I am going to look at these two recommendations in

the context of being able to promote a more proactive approach to safety and issues, rather than a reactive approach.

Can I start first by going to places in your report where you talk about these two recommendations. Can I start first with going to page 100 of the expert bundle, where you set out your main recommendations in bold, in about the middle of the page.

The second bullet point there talks about your recommendation for "the creation of the independent position of Transport Safety Director, whose role is to be responsible for administering matters related to safety duties, ensuring compliance and enforcement".

So that is the context in which you are recommending a Transport Safety Director, in the context of the recommendation about setting out duties and chain of responsibility and that sort of thing.

But what I am also interested in is an observation that you made at the bottom of page 99, so the previous page of the expert bundle. At the bottom of page 99, you say:

"The independence of the Transport Safety Director both elevates safety as a desirable policy outcome and provides an independent source of accountability and transparency on safety processes and outcomes that

exceed what is likely to result if ... bus safety was left solely to the public transport regulatory agency and/or a governmental department to manage. The Transport Safety Director's audit processes and industry engagement has led the agency to the conclusion that Melbourne's route bus services and practices are safe and that the safety focus should be on developing a proactive and forward-looking safety ... management culture, as distinct from practices that react to safety concerns after they happen."

So that's the context of the safety director. In the same vein, can I then take you to the passage in your report where you talk about the standing committee on bus safety as another recommendation of yours. For that, can I please take you to --

CHAIRMAN: Before we move on, could you help us understand a bit more about the independent Transport Safety Director?

PROF JOHN STANLEY: Yes, Chair.

CHAIRMAN: What support services does he have? Who is he? Where does he come from?

PROF JOHN STANLEY: He was a position created by the Transport Integration Act, which is a 2010 act of the Victorian Parliament, that essentially reorganised a lot of the institutional arrangements for delivery and

planning of transport in Victoria. So it created an organisation, essentially, to be the peak policy body, and then it created two agencies in terms of where public transport is going that in fact are responsible, if you like, for various elements of system planning.

The first one is Public Transport Victoria, who are essentially the contract administrator and the system planner. But it also created the independent position of Transport Safety Director and Transport Safety Victoria, because it wanted to put a significant focus on safety improvement in the transport space, and it felt that to do that, creating a separate entity with a statutory duty to perform that role, was probably the strongest way to do it.

An alternative, for example, might be to just make that another responsibility of the public transport agency, but I think the feeling at the time was that safety is sufficiently important to benefit from an independent, more arm's length approach, and so that was the reason, I think, that it was done in that way.

CHAIRMAN: What support does he have to discharge his duties?

PROF JOHN STANLEY: He has his own organisation with a staff, I don't know the actual number, but they have research staff; they have staff who do field audits, for

example.

I'm guessing -- I'm simply guessing -- their staff numbers are probably around about 30 or 40, but I'll come back to you with an answer on that.

CHAIRMAN: Thank you.

What qualifications does he have, the occupant at the moment?

PROF JOHN STANLEY: He is an expert in safety risk management, I think in aviation was his experience background. So, essentially, because the focus has been on safety risk management, I think the feeling was that he would be a good person to come into that space and apply those lessons, if you like, that he had been learning and applying in the aviation field into the land transport area.

CHAIRMAN: And land transport encompasses buses, trains, trams?

PROF JOHN STANLEY: Yes, but he's also -- he's the director of bus safety as well.

CHAIRMAN: Thank you.

MR DEREK CHAN: So does the government still have any role to play in mandating safety behaviour, or is that all down to the Transport Safety Director?

PROF JOHN STANLEY: I'm sorry, could you repeat that?

MR DEREK CHAN: Does the government still have a role to

play in ensuring bus safety, or is that all left to the Transport Safety Director?

PROF JOHN STANLEY: No, the government's role is essentially in setting the policy framework and attaching the priority to safety, and then it's the safety director's role to in fact implement and deliver on that policy objective for government.

I included, I think it was in my second report, a diagram that compared the structure of arrangements, at page 71, in Hong Kong and Melbourne. I split that up into three categories, which we often use to talk about institutional design: strategic or policy level, tactical or system design level, and the operational level. And in terms of the way that Hong Kong's organised and the way Melbourne's organised, you have your Transport and Housing Bureau at the policy level; we have an organisation called Transport for Victoria. At the operational level, you have franchised bus operators and we have contracted bus operators. Then in the middle, you have the Transport Department; we have Public Transport Victoria but we also have Transport Safety Victoria, and probably in terms of institutions, that's perhaps the biggest gap or the biggest difference between the two sets of arrangements.

MR DEREK CHAN: Along the same vein --

CHAIRMAN: If you will excuse me, I have a nose bleed so I'm going to adjourn for a short while. Excuse me.

(2.39 pm)

(A short adjournment)

(2.50 pm)

CHAIRMAN: Apologies for the interruption, but I think normal services have been restored.

Yes, Mr Chan.

MR DEREK CHAN: Thank you, Mr Chairman.

Professor, just before the break, you were comparing the institutional structure in Melbourne and contrasting that with Hong Kong, and the observation being that Hong Kong does not have a dedicated safety department or body.

Along that same vein, at page 70 of the report, which is the previous page from this chart, in the third full paragraph you made some observations about the Hong Kong system, and in the last sentence you make the remark that:

"However, the absence of an independent safety regulator in Hong Kong seems likely to lessen the relative focus on safety matters."

Is that the point that you were making before, about the benefits of having such an independent regulator?

PROF JOHN STANLEY: Yes.

MR DEREK CHAN: Turning, if I may, then to the recommendation on the standing committee, which is at page 94 of the expert report. At the bottom of page 94, at point 6, you recommend establishing "a standing committee on bus safety", and you suggest "meeting at least twice yearly to review and evaluate the latest technology that may impact on bus safety, particularly for route bus operation, and advise government on desirable safety inclusions in the franchised bus fleet and other bus systems. The newly formed Working Group on Enhancement of Franchised Bus Safety could form the basis for this committee but membership should be broadened to include other bus operators."

Again, do I understand it correctly that both these approaches -- a standing committee on bus safety and a transport director -- would assist in promoting a proactive approach to bus safety issues?

PROF JOHN STANLEY: Mr Chan, I believe that's the case, yes. The standing committee is really about trying to ensure there is an ongoing dialogue between the respective parties who have an influence in this bus safety area, such as the bus manufacturers, the after-market equipment providers, the government, the universities that have a role in this place as well. It is really about trying to have a mechanism for collaboration which

I also noted was an important point made by Mr Weston about the London arrangements. We have those kinds of arrangements at the national level in particular in Australia as part of the process, going through the National Heavy Vehicle Law, and it's working out in relation to bus. That's been a good way of "open door" all the way through and making sure there is knowledge throughout the field about what is possible.

I noticed in some of the evidence that was submitted, oral evidence to this committee, one of the smaller operators, franchised bus operator, commenting that perhaps he or she didn't have the information about some of the technologies that they might have liked to have had. This is really about trying to make sure that everybody's got access to a lot of the better information on a reasonably prompt basis so that you're actually ahead of the game rather than responding once an accident's happened.

CHAIRMAN: So this is to be proactive rather than reactive?

PROF JOHN STANLEY: Yes, Chair --

CHAIRMAN: Which is perhaps what this working group is, reacting?

PROF JOHN STANLEY: Yes. I think if you get a major catastrophe of the kind you had here in February, you can expect some kind of reaction.

CHAIRMAN: Reaction is better than no action.

PROF JOHN STANLEY: Indeed.

CHAIRMAN: And best of all is proaction.

PROF JOHN STANLEY: That's really where I'm seeing this going, that you use that as a basis to grow into a more proactive approach, which could emerge from the working group, but in my view it needs to have a wider membership. I note that the working group started with a relatively narrow range of issues that it was going to look at, and that, I think, again is perfectly understandable, in view of the reaction to the February situation, for example.

But, going forward, at least to stand back from that and say what are the most significant areas that we can make enhancements, and I've talked here particularly about technology, because I also think that you need to focus much more on the working/driving/fatigue question and dealing with that as well, so this is particularly focused on bus safety, on the technology side.

CHAIRMAN: When you say "include other bus operators", all of the franchised bus operators are members of the working group.

PROF JOHN STANLEY: Yes. I'm thinking about the smaller bus operators as well, not just the big ones.

CHAIRMAN: Not the franchised bus operators?

PROF JOHN STANLEY: Well, they would be franchised, but not the big ones, the one who run the minibuses and so on.

CHAIRMAN: I see. We use the term "franchised buses" to describe the six franchises and the five franchised bus operators. They were all representatives on this standing committee. But certainly minibus organisations were no part of it. Do you have in mind including them?

PROF JOHN STANLEY: I do, Chair. They are a significant part of your market. My recollection is it's 1.5 or 2 per cent, in terms of millions of passengers per day, compared to 4 million with the franchised bus operations. So they are significant in the marketplace, and I think they also need to be a part of this process, because if someone is going to catch a bus, any bus, it seems to me they have the right to expect the same level of safety, no matter who is providing that service.

CHAIRMAN: But, as you will perhaps be aware, we impose different safety features on minibuses compared with our franchised buses.

PROF JOHN STANLEY: Yes. That doesn't mean that the conversation about what is the best technology that's available for those different categories of vehicle is not a conversation that should be had. That would be the point I'm making, that the floor needs to be lifted across the board if you are going to have these

conversations, not just at the big end of town.

CHAIRMAN: The working group does not include any representatives of unions. Do you have any suggestions or views on that, for the proposed standing committee?

PROF JOHN STANLEY: Prima facie, I would be in favour of that. That would be certainly part of the way we would approach this in Australia.

CHAIRMAN: Thank you.

MEMBER LO: Is the standing committee advisory, or does it have any statutory power to enforce implementation?

PROF JOHN STANLEY: Prof Lo, no. I see this as being an advisory committee to government, in particular to the responsible minister, but it wouldn't have powers of those kinds.

But ideally, it's findings, it's deliberations, any research that it supports would all be made public.

MEMBER LO: So what difference does it make if, let's say, our Transport Department has a division or a branch called transport safety, versus what you have in Victoria, where it's a separate, parallel agency or body? What difference does it make?

PROF JOHN STANLEY: They are different roles. The Transport Safety Director, his role is essentially to do with implementation of particular legislation. This standing committee idea is about trying to improve knowledge and

awareness and understanding across the industry of the sorts of technologies that are available, so that they are in people's minds, when they are going through vehicle purchase decisions, for example. You know, this is about awareness raising, collaboration, trying to develop a stronger industry level understanding, as distinct from implementing an administrative mechanism to ensure that legislation is meeting its purposes.

MEMBER LO: I guess my question is why you want a separate transport safety as a separate entity, rather than part of public transport?

PROF JOHN STANLEY: Public transport, or in your case the Transport Department, have multiple purposes that they try to achieve, and safety is one of those but it is only one. It's the question of the priority that you put on safety, whether you are happy to see it dealt with at that level, where it might get put down at a lower level of priority than operating commercially, for example. I'm not saying that's happening. But I'm simply saying that if an authority has multiple objectives, then it gets involved in doing trade-offs that may mean that safety suffers.

If you think safety is a serious issue, then the best chance of elevating it in a priority sense for treatment, I think, is to give it a separate entity,

responsible for looking after its administration.

CHAIRMAN: Separate and independent?

PROF JOHN STANLEY: Especially independent, Chair.

MR DEREK CHAN: Just now, Professor, you talked about the scope of the working group as well. Perhaps I can put that in context by going to actually the document that shows what the scope of the working group is.

Can I refer you to KMB-12, page 4867. Here, we have the document which tells us the scope of work of the Working Group on Enhancement of Safety of Franchised Buses. In the first paragraph, it says that the working group was set up after a traffic accident involving --

CHAIRMAN: Perhaps you could put this document in context.

MR DEREK CHAN: Yes. This document is an annexure to the minutes of the first meeting of this particular working group, and the first page of the document is at page 4859, and it's the notes of first meeting of the group.

CHAIRMAN: Was the starting point not an agenda, which was issued on 12 March?

MR DEREK CHAN: Yes.

CHAIRMAN: I would like you to be familiar with the chronology of what was involved in the setting up of this group, the speed at which it met, and the speed at which it made decisions, because I would like your views

on that, in the context of the benefits of proactive as opposed to reactive decisions.

We were given the agenda at an early stage by one of the bus operators, and gradually we have managed to obtain the minutes, now unredacted, are they not?

MR DEREK CHAN: Yes, the minutes are now unredacted.

Ms Wong has drawn my attention to the Citybus bundle at page 588.

CHAIRMAN: Is that CTB-1, 1A, or B?

MR DEREK CHAN: CTB-3.

CHAIRMAN: Just put it on the screen, if you would.

MR DEREK CHAN: Page 588.

What we see on the screen is the agenda for the first meeting of the working group to be held on 13 March 2018, and part of the agenda was the discussion of the scope of works --

CHAIRMAN: Does this document have a date other than the one at the top, 13 March?

MR DEREK CHAN: This document itself does not have a date.

CHAIRMAN: Thank you. My memory was incorrect then. So 13 March is when the agenda comes into being, but that also is the first meeting, and that's what you were taking us to at 4867, is it not?

MR DEREK CHAN: Yes, 4867 is a document that defines the scope of the working group.

CHAIRMAN: Perhaps for purposes of the transcript you could read out passages that are relevant to the questions you are going to ask from this "scope of work" document.

MR DEREK CHAN: Yes. The first paragraph of this document says:

"After a traffic accident involving a bus of Kowloon Motor Bus Co Ltd took place on Tai Po Road on 10 February 2018, a working group is proposed to be set up to review and study measures to further enhance bus safety."

So, Professor, the first point to note is that the working group is reactive to a serious accident happening. And the scope of the working group includes -- the first item is about enhancing training arrangements; the second item is about seat belts; and the third item is to explore technical feasibility, cost-effectiveness, applicability and other issues relating to installation of on-vehicle safety devices.

Professor, in the context of a proactive approach, would you expect these issues to be discussed in advance, or rather as a reaction to an accident happening?

PROF JOHN STANLEY: These are the sorts of things that would come up as a matter of course on the agenda of a proactive set of circumstances. But given the situation

at the time and the concerns around, you can understand these sorts of issues being put on the agenda straightaway, recognising that it is reactive, but you can't do much else in that circumstance, but going forward, you would want to have this stuff on the agenda on an ongoing basis so that you are ahead of the problems.

MR DEREK CHAN: In a committee that is adopting a proactive approach, would you expect the scope of the committee to cover other aspects of bus safety, in addition to the three mentioned here?

PROF JOHN STANLEY: Certainly. I think I have suggested in my report that you have a technology-oriented committee, but another one also focusing on training, which is the first point there. But I think the technology committee could really write its own agenda in terms of what are the forward-looking initiatives we are going to see and should anticipate and plan for that will be most effective in terms of improving bus safety.

Now, there are a range of measures that are listed here. The European process that they are going through at the moment to look at their next set of mandatory requirements has other elements as well that it's including. I would imagine that your proactive, forward-looking committee would be all over that sort of

European agenda and assessing its relevance to Hong Kong going forward, for example.

There were some notes at the back of my first report on some of the elements in that ongoing European agenda. I just wrote them as notes for your information. But they are the kinds of issues, for example, the kinds of technologies, that you would expect a forward-looking committee would be looking at and saying, "Have these got a role in Hong Kong now? Will they have a role in Hong Kong in three years' time?", with all the key players being at the table.

CHAIRMAN: So you would expect such a proactive committee to be examining what others are doing in other jurisdictions?

PROF JOHN STANLEY: Absolutely, Chair.

CHAIRMAN: And you mention the European Union as an example, but we also know, because we have a report from Mr Weston, that that has been underway in London as well, for Transport for London?

PROF JOHN STANLEY: Indeed. Transport for London have a lot of investigations for themselves. Their Standard Bus, I think they call it, looks a really good initiative to me. But at the end of the day, London/Hong Kong/Europe/Australia, we all tend to get caught up in the UNECE standards.

CHAIRMAN: Transport for London are going to promulgate a bus safety standard, which I think is the term they use for it.

PROF JOHN STANLEY: Yes, which is a really good initiative too.

CHAIRMAN: So you would expect such a committee to be proactive, ongoing, monitoring what is happening in other jurisdictions?

PROF JOHN STANLEY: Yes, Chair, and looking in particular at the kinds of safety problems that Hong Kong is facing, and saying, "Which of these technologies are going to be most useful here in the time frame that they might be available?" And are there any areas of research that need to be done for problems that we've got that maybe nobody else has got to the same extent, because your operating environment is pretty challenging in some places.

CHAIRMAN: Would you expect such a committee to not only monitor remotely, as it were, what is happening in other jurisdictions, but to have exchanges of personnel so that such developments are discussed in person between the people involved, in Hong Kong and the EU, Australia, Singapore, London?

PROF JOHN STANLEY: Certainly, and I think a lot of the original equipment manufacturers, for example, would be

falling over themselves with delight at the opportunity to participate in a process like this, if you think about the Volvos, the Scanias, and so on; they have got a lot to contribute to this process and I'm sure would be delighted at the opportunity to be involved in an ongoing basis with that sort of deliberation.

CHAIRMAN: Thank you.

MR DEREK CHAN: Moving on, if I may, Professor, to the next topic I want to cover with you, and that's the issue of seat belts. We saw from the working group agenda just now that installation of seat belts or retrofitting seat belts was a major item on their agenda. Can I start with this question: are seat belts required to be installed --

CHAIRMAN: Just pause for a moment. The reference to seat belts at 4867 is not in either the context of retrofitting or fitting on new buses. It's general, is it not?

MR DEREK CHAN: Yes.

CHAIRMAN: "The installation of seat belts on all seats".

MR DEREK CHAN: Yes, the discussion started with installation of seat belts on all seats, and I will show you in a moment the documents that show the progression of the discussion to a point where the retrofitting issue arises.

So can I just start with a general question, that is are seat belts required to be installed on urban buses in Australia?

PROF JOHN STANLEY: No.

MR DEREK CHAN: Is there a reason for that?

PROF JOHN STANLEY: The belief is that the mass of the vehicle itself is normally going to provide sufficient occupant protection in the event of an accident, such that seat belts are not going to add much more on top of that. There is also a challenge with existing vehicles of retrofitting and the cost of so doing.

The way that we would approach this sort of question in Australia -- and I don't know whether you might do exactly the same thing -- is we have a process called a regulatory impact statement, and if we were looking, for example, to require seat belts to be mandatory on route buses, that would probably need to go through the process of a regulatory impact statement that would look at the cost of various ways of going about undertaking that work, and then do an assessment of the probabilities of various sorts of incident types being reduced, putting a dollar value on that, and coming up with a view as the basis of that assessment. That's the normal way we do this kind of assessment.

CHAIRMAN: And who does the regulatory impact statement?

PROF JOHN STANLEY: It would be done by the relevant government department. A lot of these sorts of things would happen at a national level in Australia, so they would be done by the National Transport Commission which is the successor body to the National Road Transport Commission that I was deputy chairman of for nine years. We did multiple regulatory impact statements into various aspects of vehicle requirements.

CHAIRMAN: Has such a study been done on the impact of seat belts being installed on buses?

PROF JOHN STANLEY: I'm not sure if there's been a formal one done at national level, but I know it's been looked at many times at state level in terms of seat belts. Probably the main pressure in Victoria that we get for installation of seat belts is actually on school buses in country areas, where the vehicles tend to be operating at higher speed, you have younger children sitting in the seats. But again that's not been mandatory at all; it's not a requirement.

The only requirement for seat belts on our buses is for coaches that are travelling interstate, usually at high speed.

CHAIRMAN: Yes. As I understand it, that is the distinction drawn in the United Kingdom. Seat belts have to be provided on coaches, and the issue is speed.

PROF JOHN STANLEY: Yes.
MR DEREK CHAN: Just so that I understand the context of that, when you talk about high speeds, interstate travel, what speed do coaches travel at?
PROF JOHN STANLEY: These would be travelling at 100 kilometres per hour, most of the time.
MR DEREK CHAN: So that I understand the comparison being drawn, are double-decker buses common in Victoria?
PROF JOHN STANLEY: We don't have double-decker buses providing route service, but we do have a double-decker bus that runs from the Melbourne CBD to the airport in Melbourne and -- my wife and I were just discussing during the lunch break -- we think that has seat belts. In fact, Janet told me that I continually tell her to put it on, so that suggests that they do.
MR DEREK CHAN: At what speed does the bus travel?
PROF JOHN STANLEY: It's mostly on a freeway so it would be travelling at 100 kilometres per hour.
MR DEREK CHAN: What I am going to do now, Professor, if I may, is just to take you to the stage at which the working group has reached in terms of the considerations that it has on seat belts and retrofitting seat belts. Then I'm going to go back to take you to some discussions leading up to that and ask for your views and observations on some of the matters raised, if I

may.

PROF JOHN STANLEY: Thank you.

MR DEREK CHAN: If I can start at the end, so we know where the end-game is. Can I take you to TD-1, page 403.

Just so you know what the document is: it is a document drafted by the Transport Department for discussion by the Legislative Council Panel on Transport. That discussion was to take place on 25 July 2018.

So this, as it were, is a summary of what the working group has arrived at in terms of recommendations and considerations.

CHAIRMAN: I think the letter on the previous page is useful in explaining what it is.

MR DEREK CHAN: Yes. Perhaps --

CHAIRMAN: You could go to that.

MR DEREK CHAN: Yes. Perhaps I can read that out. That's a letter from the Transport Department to this committee, and the Transport Department says in the body of the letter:

"As you are aware from our previous submissions, the Transport Department has set up in mid-March a Working Group on Enhancement of Safety of Franchised Buses which comprises members from all franchised bus operators and major bus manufacturers to consider and study possible

measures to further enhance bus safety. Whilst the report of the working group is being compiled, the findings and recommendations of the working group will be reported to the Legislative Council Panel on Transport at its meeting on 25 July 2018."

So that's the context in which this paper was prepared. If I can go directly to the passage on seat belts, which is at page 407, that's where the section on seat belts starts, and if I may go straight to paragraph 11, over the page, the Transport Department notes that:

"As confirmed with the bus manufacturers, it is technically feasible to supply all new buses with seat belts for all passenger seats conforming to relevant international standards. In this regard, all FB operators have agreed that all passenger seats of all new buses ordered from July 2018 onwards will be installed with seat belts."

So that's in respect of new buses.

Paragraph 12 talks about retrofitting. I won't trouble you with the details about that. The long and short of it is that retrofitting seat belts on lower decks was considered to be impractical or not feasible.

At paragraph 13:

"However, it should be more feasible to retrofit

seat belts on all passenger seats of the upper deck only in some vehicle models of the existing double-deck fleet. If all passenger seats on the upper deck are retrofitted with seat belts, it is expected that the weight of the bus will be increased by 300 to 400kg and consequently the passenger-carrying capacity may need to be reduced by 7 to 8 passengers."

So that's the consideration that has been reached at this stage, just the upper deck.

Paragraph 14, the last sentence on that page:

"Some bus operators have expressed concerns that the retrofitting of seat belts would not only incur significant financial implication, but also considerable time and manpower resources, not to mention the need to redeploy or procure additional buses to maintain the existing bus service level during the whole process."

Now, the "incur significant implication" part, there's a footnote 5 to it, and if you look at the bottom of the page, footnote 5:

"With the absence of detailed study on the technical details for retrofitting seat belts on all seats in the upper deck, a rough estimate on the costs of retrofitting a bus is about HK$200,000 (excluding manpower and overhead costs)."

So that's what we are looking at.

Paragraph 15 talks about overseas experience and practices, and it's similar to what you have told us about Melbourne.

CHAIRMAN: Perhaps you would be kind enough to read that out, because this is relevant.

MR DEREK CHAN: Certainly, Mr Chairman.

Paragraph 15 talks about overseas experience a practices:

"The working group has reviewed the prevailing overseas practices or requirements on the installation and wearing of seat belts on buses. Currently, for inter-cities or cross-boundary routes, some overseas jurisdictions (eg United States, United Kingdom and Netherlands) have mandated the provision of seat belts for all passenger seats, while others (eg United Kingdom, Netherlands, and Australia (Victoria)) have imposed mandatory requirement of wearing seat belts. Nevertheless, for buses serving urban routes buses or buses allowed to carry standing passengers, none of the overseas jurisdictions that the working group has reviewed thus far have statutory requirements for the provision of seat belts on passenger seats. According to the transport authorities of those jurisdictions, the urban buses are typically used for short journeys, in terms of both time and distance, and undertaken at

moderate speeds on urban routes. Thus, no seat belt requirement at passenger seats on these urban buses has been imposed. A summary of the findings is at the annex B."

Paragraph 16:

"Having regard to the points mentioned in [the paragraphs above], the working group has arrived at the following recommendations with a view to giving extra protection to seated passengers:

(a) seat belts should be provided for all seats in future procurement of new buses; and

(b) subject to further assessment on the technical, operational and financial feasibility, consideration may be given to retrofitting all seats in the upper deck with seat belts on buses deployed for specific bus routes, ie long-haul routes which are operated via expressways with relatively fewer bus stops."

That's the Transport Department's summary of the position that it has reached, so the recommendation is, in terms of retrofitting, upper deck and long-haul routes.

CHAIRMAN: Well, as qualified.

MR DEREK CHAN: Yes, as qualified.

CHAIRMAN: Long-haul routes which are operated on expressways.

MR DEREK CHAN: Expressways, yes.

We've got examples at footnote 6 as to what those expressways are expected to be, and in footnote 7, according to the franchised bus operators, this would apply to around 2,000 buses currently being deployed on those routes.

What I want to do is then go to some examples -- not all of them, just certain examples -- of the concerns or observations made by the bus operators during discussions, and then I'm also going to refer you to one passage in Mr Weston's report that talks about the same thing, and then I'm going to ask you for your observations on this topic.

PROF JOHN STANLEY: Thank you.

MR DEREK CHAN: So if I may refer you to some of the minutes of the discussions of the working group. The first one that I want to take you to is at KMB-12 at page 4869-1.

What you should be looking at, Professor, is the first page of the notes of 1st meeting held on 13 March 2018, and you can see the parties present at that meeting on the first and second pages. On the issue --

CHAIRMAN: Do we have unredacted versions of this document?

MR DEREK CHAN: Mr Chairman, 4869-1 ought to be unredacted in my copy, and it's also unredacted on the screen copy.

CHAIRMAN: Thank you. I must have had the wrong page.

MR DEREK CHAN: I'm sorry, Chairman, 4869-1.

CHAIRMAN: Yes.

MR DEREK CHAN: If I can take you directly to the seat belt passage, which is firstly at page 13.

CHAIRMAN: I think it's important perhaps to help Prof Stanley with this: there was a division, was there not, in the way in which the working group addressed these issues? So the working group met generally; there was then a technical group which dealt with safety devices; and then there was a group that dealt with training, a subgroup, I think that's called.

PROF JOHN STANLEY: Yes.

MR DEREK CHAN: And what we're looking at is the main group meetings. I will be taking you to two parts in the main group meetings, so we see the observations made by some of the bus operators. I will also be taking you to a minute of the subgroup, which includes bus manufacturers, so you can see what the bus manufacturers were saying on the same issue.

PROF JOHN STANLEY: Okay.

MR DEREK CHAN: If I may take you to page 4869-6, starting at paragraph 13, which is a section on the installation of seat belts.

I'm still on KMB-12, Mr Chairman.

CHAIRMAN: Yes. I was looking for the version, as with most

of the documents in this inquiry, I work on an unpaginated version because they are given to me the night before, and then I come into this hearing and I have a paginated version which has none of my notes on it. So I'm going to try and work from both.

Thank you.

MR DEREK CHAN: Mr Chairman, I'm looking at paragraph 13 the 1st meeting note. That is the section on the installation of seat belts.

In paragraph 13, it introduced:

"At present, all exposed seats on franchised buses have been installed with seat belts. Taking the technical feasibility into account, the Transport Department proposed to install seat belts on all seats for new buses and retrofit seat belts on all seats on the existing buses."

At paragraph 16:

"Citybus/New World First Bus queried the practicability of installation of seat belts on all seats to enhance passenger safety because it would be difficult for the bus captains to ensure passengers on buses wearing seat belts. Besides, Citybus/New World First Bus also raised concerns on the need of wearing seat belts by standees who could not be provided with seat belts. The Transport Department advised that there

were requests for a comprehensive review on seat belts installation on bus after the traffic accidents. It had been more than a decade since the last review on the installation of seat belts on buses. The objective of the prevailing discussion should focus on the technical feasibility, cost-effectiveness, applicability and other issues relating to installation of seat belts on all seats other than exposed seats."

So the two issues identified by Citybus here are the enforcement issue and also those standing wouldn't have the benefit of seat belts.

CHAIRMAN: Before you move on, if that's what you are going to do, there is a statement in the notes of this meeting that the TD, as they are called, the Transport Department, advised that "there were requests for a comprehensive review on seat belt installation on bus after the traffic accident". Do we have any information as to that?

MR DEREK CHAN: Perhaps I will have to get back to you on that, Chairman.

CHAIRMAN: I was wrong to call it "accident" singular. It says "accidents". That begs the question: from whom were these requests made, to whom were they made, when were they made, and in respect of which traffic accident?

MR DEREK CHAN: Yes. It certainly calls for that to be considered. Perhaps I can come back to you, Mr Chairman, on that.

CHAIRMAN: Well, good luck.

MR DEREK CHAN: Anyway, that's the observations from Citybus.

If I can take you then to a 3rd meeting. The notes of the 3rd meeting are at page 4908-1, and the 3rd meeting was held on 21 June 2018. Again, I am focusing firstly on the main group meetings.

I want to focus your attention at paragraph 25 of that meeting note, at page 4908-7.

CHAIRMAN: This is now 21 June?

MR DEREK CHAN: That's correct, Mr Chairman.

CHAIRMAN: Thank you.

MR DEREK CHAN: You see, Professor, at paragraph 26, that the discussion about retrofitting has focused on the upper deck, for the reasons that we've already covered, about it being impractical to fit it on the lower deck.

At paragraph 26 -- I will just read it out:

"As for existing buses, the meeting noted that retrofitting seat belts on all passenger seats of the upper deck of some existing double-deck bus models should be feasible. Kowloon Motor Bus/Long Win advised that they would retrofit seat belts on all passenger

seats of the upper deck or deploy buses with seat belts on all passenger seats on routes which serve long-haul passengers or are operated on expressways with limited boarding or alighting activities at the enroute stops."

At paragraph 27:

"In the light of [that] initiative, the meeting had discussed and come to the views that having regard to the technical feasibility in retrofitting seat belts on existing buses, operation of franchised buses in Hong Kong which were mostly deployed on urban routes with standing passengers; and the costs and downtime incurred to retrofit seat belts on all existing buses, as well as overseas experiences, that there were insufficient justifications to make it a mandatory requirement for all buses to be fitted with seat belts on all passenger seats. Nevertheless, members reckoned that in the case of exposed seats and in bus compartment with no standees allowed, seat belts might give extra protection to seated passengers to prevent passengers from falling out from those seats."

Just to give you some context, the upper deck of buses in Hong Kong would have no standing room on them; standing room only applies to the lower deck.

In paragraph 28:

"In this regard, Citibank/New World First Bus was

requested to consider retrofitting seat belts on all passenger seats on the upper deck for the buses operating selected bus routes for long-haul passengers or operating on expressways with limited boarding and alighting activities along the routes. Citybus/New World First Bus indicated that it would be difficult for their companies to allocate their buses to solely operate specific routes as their buses would serve a number of routes in a day under their existing operations. In addition, Citybus/New World First Bus observed that very few passengers would make use of seat belts, it would not be financially feasible to retrofit existing buses with seat belts on all passenger seats."

So two points to note there. One is the narrowing down of the retrofitting target to upper deck and expressways/long-hauls. Secondly, you have observations about financial viability and doubts about whether it is actually useful.

CHAIRMAN: To give Prof Stanley the context, we have received oral evidence from Citybus, have we not, and they have spoken in strident terms about their views about the deployment of seat belts on buses?

MR DEREK CHAN: Yes, they have.

CHAIRMAN: Are you going to take the professor to that transcript, or are you in a position to summarise it?

It's 8 May, I think.

MR DEREK CHAN: Perhaps I will ask Ms Wong to locate that part of the transcript.

In the meantime, perhaps I can take you to Mr Weston's report, so we can complete the picture about the various observations and views that this committee has received on this issue.

Mr Weston's report, the relevant passage is at page 134 of the bundle.

At page 134 of Mr Weston's report, the relevant part on seat belts starts in the middle of that page. Again, I will just read it out:

"Currently bus driver or passenger seat belts are not a legal requirement in the UK on scheduled bus services.

In terms of passenger seat belt the Department for Transport guidance note makes the following statement:

'General requirements. Since 1 October 2001, seat belts have been required to be installed in each forward and rearward facing seat in all new buses. The use of an approved and properly fitted restraint system can help prevent death or serious injury, not only by restraining the occupant from forward motion but also by preventing their ejection from the vehicle, particularly in accidents where the vehicle rolls over.

The only exemption from this requirement is for buses that are designed for urban use with standing passengers. An exemption is permitted for these vehicles because they are typically used for short journeys, in both time and distance, undertaken at moderate speeds on urban routes. Although we are aware that vehicles equipped with seat belts are used by some operators for urban fare paying services, ultimately, it is for the operator to choose the type of vehicle used to provide a service'.

At present no London operators fit passenger or driver seatbelts on buses contracted to TfL. Historically First Group did fit driver seat belts but sold out their London operations to Tower Transit and Metroline ... in June 2013."

I think we have also located the passage from the Citybus transcript. Can I just turn that up?

CHAIRMAN: Yes. Thank you.

MR DEREK CHAN: The transcript bundle, Day 3, page 6.

CHAIRMAN: How does that translate in the Augustinian calendar, rather than the North Korean calendar? What is Day 3?

MR DEREK CHAN: Tuesday, 29 May 2018.

CHAIRMAN: Yes.

MR DEREK CHAN: At line 15, Mr Samuel Cheng for Citybus

says -- the question was:

"... has the Commissioner required any specific safety features to be installed on any of your bus?"

That's the question.

Mr Cheng then says:

"Let me cite two examples. The Transport Department did ask the bus operators -- allow me to use English to talk about this term -- in relation to exposed seats, seat belts must be fixed.

In addition, a small number of our buses had a straight and long flight of steps, so the Transport Department asked us to fix an additional handrail."

I'm sorry, Mr Chairman, I think the more appropriate reference to be the evidence of the following day, the following hearing day. That is Wednesday, 30 May 2018., at page 58.

CHAIRMAN: Yes. Thank you.

MR DEREK CHAN: At line 19, Mr Duncan, that is counsel for the committee, focused the witness's attention to "Feasibility of installation of seat belts on (a) all seats and (b) all seats on the upper deck on new buses".

CHAIRMAN: To what was Mr Duncan referring?

MR DEREK CHAN: Mr Duncan is quoting a statement made in the Citybus forward planning programme, and if I could just read it out:

"'It is feasible to install seat belts on all seats or on all seats on the upper deck. However, our observation shows that very few people wear the seat belts currently available at the exposed seats. Without any legislation to mandate the wearing of passenger seat belts on a franchised bus and the enforcement authority to strictly enforce the legislation, installing seat belts on all seats will be a waste of resources because vast majority of passengers will not wear seat belts even though they are provided.'

That was a statement that you made in the latest forward planning programme for Citybus."

Mr Duncan then draws his attention to another passage in the Transport Department about the seat belt issue. At page 60, Mr Chairman raised specifically this issue of retrofitting and whether it's a waste of resources. At page 60, line 17, this is a question from the chairman:

"Before you embark on retrofitting, might I ask this question. In your earlier answers, you said that it was a waste of resources to fit seat belts because the vast majority of passengers simply wouldn't wear them, so that it required enforcement. Given that you have now indicated that you have agreed to incorporate them, what view do you have about whether or not this is a waste of

resources if there isn't enforcement?"

Mr Cheng has this to say:

"If it is not mandated by law, then it is impossible to enforce the law. Currently, there is no requirement that when you are on a bus you have to put on your seat belt. Even if it is mandated by law, in the absence of law enforcement, I'm afraid it is also a waste of resources. We maintain the same view."

Chairman: Have you raised this view with the Transport Department?

Mr Cheng: We did. Our colleagues did raise it with the TD."

So you've seen actually Citybus raising that observation in the minutes that we've just read of the working group.

Before I ask you for your observation on that issue, I can also inform you that the expressways on which the buses operate, speed limits can go up to 80, but the speed limiter is fixed at 70. So that's the speed at which the franchised bus can go on expressways.

CHAIRMAN: Well, the expressway to the airport is 110, is it not?

MR DEREK CHAN: The airport is 110, but the franchised bus limiter will still be the same, at 70.

CHAIRMAN: The legal speed limit for a franchised bus is

70 kilometres per hour?

MR DEREK CHAN: Yes, also. So that's the speed at which buses would travel along the expressways.

With all that information in mind, what is your observation or comment on the installation of seat belts, firstly on all the seats, and secondly focusing on the upper deck, where there is no standing passengers.

PROF JOHN STANLEY: Thank you. This really takes me back to an answer I gave maybe half an hour ago about the notion of a regulatory impact statement. I think there are two levels to this particular question. The first level is: is it technically feasible to fit seat belts in certain kinds of positions on buses, for example on the upper deck of new buses, on retrofitting for older buses. That's a technical question of feasibility.

The second level then is: if it is technically feasible, what is the cost/benefit ratio of doing that installation? In other words, what will it cost? That is the probability of particular kinds of accidents being reduced if those seat belts are installed? Will people wear them, is one of the questions that needs to be addressed in that setting?

I don't have a view in any particular circumstances whether it is a good idea or not. What I would say is

that that's exactly the kind of problem that you should submit to a regulatory impact statement. There will be information around on the probabilities of accidents, these different varieties. You can put monetary values on the probability of those sorts of accidents being reduced. You probably can form a view too on the probability of wearing seat belts, which would affect the effectiveness of the wearing thereof.

So I think this is an exercise that needs a serious piece of cost/benefit analysis done on it. Now, government may decide it wants to make a policy decision to install seat belts where it is technically feasible. That's fine. As a matter of course, the way I would approach this, though, is to say you need to go through that cost/benefit analysis first, and I think that's what should be done in this situation.

So, rather than taking it on the basis that people think it's going to be this or going to be that, the kinds of concerns that have been raised by the various parties are really genuine and legitimate concerns and they affect the values of the potential installation, but until you have actually done that proper cost/benefit analysis, it's just speculation.

If I had a gut feel, it's going to be that probably it's not going to be worthwhile, with extensive seat

belt fitting, but that would be no more than a gut feel, and ideally this needs to go through a proper evaluation.

CHAIRMAN: Because a gut feel is not good enough; you should do a cost/benefit analysis?

PROF JOHN STANLEY: Exactly, Chair.

CHAIRMAN: And in doing that, you would look at the various components that you have described?

PROF JOHN STANLEY: Exactly. In principle, it's a pretty straightforward cost/benefit analysis. Getting some of the values or the probabilities you need will need a bit of serious research, but the process and the sorts of things you need to look for are very much encapsulated by a lot of the responses that you have read out in the various submissions.

CHAIRMAN: What parties ought to be involved in a proper and effective cost/benefit analysis on this issue? Who would you go to? What information would you want from them?

PROF JOHN STANLEY: Firstly, you've obviously got to talk to the equipment suppliers, the bus manufacturers, to get a solid view of what's technically feasible with new and older vehicles. That includes with the seat manufacturers as well. You probably need to be talking also to people who do customer survey work on the

vehicle, to get a sense of what are the sorts of factors that would be influencing the probability of these seat belts being worn. In that case, you might want to go and look at vehicles where it is currently mandated, to see if the seat belts are being worn in those situations or not. For example, in Australia, you would have a look at the coaches and see whether people are actually wearing their seat belts there, and if they are what are the sorts of reasons that they are; have they been responding to some sort of market awareness campaign? What is it that's actually encouraged them to go through that process?

It's unlikely to be the fact that an inspector will get on the bus and fine them if they don't do it. It's more likely to be because they have thought about the consequences of not doing it.

So I think that's the sort of process that you need to go through there. There are a range of technical --

CHAIRMAN: Before you go on, if I might interrupt -- so in Hong Kong, we've got seat belts on vulnerable seats, as they are called, the top seats on the upper deck, for example, at the front. So it would be simple enough to survey whether or not people are actually prepared to use them.

PROF JOHN STANLEY: Absolutely.

CHAIRMAN: Even though this has been identified as a dangerous or vulnerable place on a bus; are they actually using them?

PROF JOHN STANLEY: Absolutely, Chair, and I have to say that my wife and I wore ours yesterday in the front seat coming from Victoria, which was the first place in the world to make seat belt-wearing compulsory.

CHAIRMAN: Am I right in understanding that that was a journey coming to and from Stanley?

PROF JOHN STANLEY: Exactly, Chair.

CHAIRMAN: That's no doubt a good reason to wear a seat belt.

You were going on to describe the people from whom one would seek assistance and the kind of information you would want from them to do this cost/benefit analysis.

PROF JOHN STANLEY: Thank you. On the cost side, we have talked about the vehicle suppliers, the manufacturers of the vehicles. When it gets to the question of retrofitting, you would need to talk to people who do that sort of work on buses, who actually -- I mean, we have vehicle body builders in Melbourne who I would go to, if I was doing this particular type of study in Melbourne, to get an opinion from them. It's probably going to be technically feasible to retrofit, it's just

going to be very expensive. I think they are the sorts of things you would need to look at. So it would require a fairly major rebuild of the bottom part.

But then it's a case of what are the benefits, so then you need to look at what are the sorts of accidents that are happening in the vehicle, and, for example, is this happening to people who are standing; is it happening to people who are sitting; what is the probability that exposure to those sorts of accidents will be reduced in the event that seat belt-wearing is required, and what do you need to do to encourage that seat belt-wearing?

If I was doing that kind of exercise, I would probably be talking to psychologists about how you would get through the message about wearing seat belts, about getting people to take this seriously. The point you make, Chair, about looking at what happens in those seats that are currently required to do it in Hong Kong, very important in terms of forming a view on the probabilities that will happen. I would be talking to whoever are the custodians of the values or the costs of different sorts of accidents. So, in other words, what is the cost of a fatal accident in Hong Kong, what is the cost of a serious injury accident, what is the cost of a minor injury accident, those sorts of things,

because they will be the sorts of unit values you need to apply to the reductions in the probability of an accident of a particular kind taking place.

CHAIRMAN: In finding out what is happening in accidents, how it is that people are injured, where they are injured, why they are injured, no doubt you would wish to consult the police, perhaps; the bus companies?

PROF JOHN STANLEY: You would certainly do both of those things, Chair. Also, if I was doing that kind of exercise in Australia, I would talk to Monash University Accident Research Centre, where they specialise in that kind of analysis. So certainly the police, and I think some of the data that I saw, I think it was from the Transport Department, on fatal accidents here in Hong Kong, looked good data, and I suspect there's a lot more available behind that than what I read in some of the summaries. But certainly those sources of information are really important.

But also, if there are university knowledge hubs that focus on safety in vehicles, then they would be an important inclusion in an exercise like this.

CHAIRMAN: Thank you.

MR DEREK CHAN: As a matter of interest, Professor, in Melbourne, when you've talked about urban bus routes with standing capacities, excluding the route to the

airport, at what speeds do the buses operate? Do you have a 70km zone in your urban areas?

PROF JOHN STANLEY: We have a 60km general speed limit, but on freeways it is 100 kilometres per hour. One of the major transport corridors that the competitively tendered service runs on is on the eastern freeway in Melbourne, which has a bus lane, and that bus lane would operate at up to 100 kilometres per hour. You know, in part of the day, at the peak time, it wouldn't be able to operate at that speed all its length, but because it is a bus lane, they can operate at 100 kilometres per hour for a good part of the day.

No most of the network, the average speed is about 22 kilometres per hour. If you look at the timetable and the sort of implied speeds built into the timetable, they average about 22 kilometres per hour, which means the bus probably gets up to 60 for a short part, between stops.

MR DEREK CHAN: Let's just make sure I'm not mistaken. So some of the urban buses where there are no seat belts can travel up to 100 kilometres per hour?

PROF JOHN STANLEY: Correct, Chairman.

MR DEREK CHAN: Now that we have discussed the costs involved of retrofitting, it may be a good point to then move on to my next topic, which is the case for subsidy,

which is a topic mentioned --

CHAIRMAN: Before you do that, might I raise with you the issue of speed limit. What is the minimum speed limit that's enforced -- I'm phrasing that badly. You say 60 kilometres per hour is the general speed limit. Are there lower speed limits?

PROF JOHN STANLEY: There are, Chair. There are down to 40 kilometres per hour, for example, past schools. There are areas where 50 kilometres per hour is common. There is also a push from a number of municipal authorities or local councils to try and reduce speed limits to 30 kilometres per hour, particularly on local streets.

CHAIRMAN: And how widespread is that amongst those communities?

PROF JOHN STANLEY: Not very, Chair. It's in a few inner metropolitan municipalities where there are a lot of cyclists.

CHAIRMAN: But that hasn't resulted in those kind of reductions?

PROF JOHN STANLEY: No, Chair. 60 is the most common. There's a bit of 50 and then there's 100 on expressways.

CHAIRMAN: And 40 past schools?

PROF JOHN STANLEY: 40 past schools. Between certain hours, in the morning, but I think it's between 8.30 and about

9.30; in the afternoon --

CHAIRMAN: So that's a variable speed limit?

PROF JOHN STANLEY: Yes. It would be 40 past the school, that school opening and closing time, and then probably revert to 60 in most cases.

CHAIRMAN: Is that signalled by an electronic sign as it is in London --

PROF JOHN STANLEY: Yes.

CHAIRMAN: -- telling you that the speed limit now is different for this stretch of road as you go past the school?

PROF JOHN STANLEY: Yes, there would be a red circle sign with a 40 lit in it.

CHAIRMAN: Has any study been done in Melbourne in respect of the link between speeds of vehicles and the damage done to people in collisions or on buses?

PROF JOHN STANLEY: Funny you should ask that, Chair. There was an article that appeared in The Melbourne Age. It's not about buses per se but it's about speed and the risk of pedestrian death, and it shows how that probability or the risk of pedestrian death increases dramatically beyond about 40 kilometres per hour. This is based on reserve that was undertaken by the Monash University Accident Research Centre. I'm happy to leave this little piece of paper with your committee.

CHAIRMAN: Monash Accident Research Centre?

PROF JOHN STANLEY: Monash University Accident Research Centre.

CHAIRMAN: Thank you for your offer, which we will gladly take up. This is a matter you no doubt know about is being looked at in London, Transport for London, where they have correlated the risk of fatal injury to various levels of speed.

PROF JOHN STANLEY: Yes.

CHAIRMAN: You will have noted the significant drop in the risk of fatalities if the vehicle is doing, for example, 20 miles an hour rather than 30 miles an hour.

PROF JOHN STANLEY: Indeed, but the really big jump in Melbourne at least happens beyond about -- getting towards 40 kilometres per hour, so you have a relatively flat curve up to there, then it climbs very steeply, with a much higher probability of pedestrian death.

CHAIRMAN: Yes. When you say "pedestrian deaths", so that's deaths outside a vehicle?

PROF JOHN STANLEY: Yes, walking in front of.

CHAIRMAN: Or being driven into.

PROF JOHN STANLEY: Yes. Thank you.

CHAIRMAN: Mr Chan.

MR DEREK CHAN: Thank you, Mr Chairman.

Can I then move on to the topic of subsidy.

I think, in your report, you do look at the possibility of subsidy, and your recommendation that the Transport and Housing Bureau in Hong Kong should be looking at it from the angle of societal benefits that a bus operation brings, and I think you have explained a bit of that this morning to us as well.

Can I first take you to page 92 of your report, where you deal with that issue, and can I just read the second full paragraph out:

"Hong Kong's public transport system would generate large societal external benefits each year, some of which may be captured by the PT provider through land value increase, where the PT operator is a land owner. This would apply to rail more than bus. Franchised bus services will certainly produce more value to society than operators can collect in fares, particularly through easing road congestion levels, increasing social inclusion and improving road safety outcomes. If fares need to increase to find money for staffing needs, then there will be some loss of these societal benefits. This loss may be sufficient to justify government providing some financial support to operators, such as would enable them to retain/attract sufficient bus captains. Franchised bus operations can still operate commercially but on the basis that government is now

remunerating the operator a sum for the societal benefits that their service provides, benefits that the operator is not able to capture through the fare box."

I think that's consistent with what you have been telling us this morning.

PROF JOHN STANLEY: Yes.

MR DEREK CHAN: In the next paragraph, you suggest:

"The Transport and Housing Bureau and the Transport Department should assess in economic terms the societal benefits of Hong Kong's franchised bus services, to enable them to evaluate the case for some financial support to those services, should such an issue be raised. It is noted that the matter of possible subsidy in respect of added remuneration was raised by counsel in discussion on the first day of committee hearings ... The safety consequences of bus captain working/driving/rest provisions are a classic example of where this public policy trade-off may need to be faced, given difficulties of attracting bus drivers and particularly if this was to be compounded, in future, by working hours greater than 12 per day being ruled out or limited more than at present. The author is not arguing for a 12-hour limit, Melbourne experience suggesting that 12-14 hours can be safe, provided the institutional setting has a strict focus on safety. However, without

such a strict safety regime, there should be some nervousness about working days exceeding 12 hours."

So here you are tying the case for subsidy to the issue already experienced here about the hiring of bus captains. In the same vein, can I take you also to Mr Weston's report, who says also much the same thing. Can I invite you to go to page 152 of the expert bundle. I am focusing on the first two paragraphs under paragraph 8.3. If I can just pick this up in the middle of the first paragraph, where Mr Weston noted that there is no public subsidy in Hong Kong, and he remarks in the middle of the paragraph:

This is an exceptional achievement; however, the question must be asked whether the emphasis on operating a commercial network without public subsidy is sustainable and potentially drives either the wrong behaviours or lack [of] focus on certain aspects of the operation. Also does this overly restrict the investment the franchised operators can make in the network especially in terms of developing and introducing new technology and initiatives."

He then goes on to say:

"Consideration could be given as to whether certain safety initiatives, such as the uptake of new ... technology and bus driver training targeted specially at

safety might need to be funded by the Transport Department as direct grants outside of the franchise agreements with specific outcomes linked to these grants. Providing funding outside of the franchise agreements is also justified especially if the benefits accrue to the wider society."

Just two points, if I may pick up from those two passages. The second part, Mr Weston links the provision of subsidy to technology and training, whereas you pick up the hiring. Is there any difference conceptually to the cases that you are both making for subsidy?

PROF JOHN STANLEY: None at all, Mr Chan. I think the key point that we are both really making here is that public transport in general and franchised buses in particular, through their operation, generate external benefits to the wider society, and those benefits have a value to the community beyond just what's involved in the commercial returns that are available to the operator who's providing the service. And if there are -- and I think it's really important to understand the value of those external benefits. I think Hong Kong to me should be having a look at what is the societal value of its public transport services. I think the numbers are going to be very big.

Then, when you've got that sort of background, you can look at particular policy initiatives, such as initiatives in technology, initiatives with training, to test whether they do have external benefits that flow from them, and whether the changes in the safety environment that you're going to generate, for example, either through technology or through training or through remuneration, if that's a link there too, is going to be such as justifies the government putting some money in to support that. In other words, the external benefits are bigger than the costs involved, but they don't accrue to the operator.

I think that's the key, really. The key concept of an externality is it's accruing to the wider society and it's not able to be captured through the fare box, or land value in some cases.

MR DEREK CHAN: In the first paragraph that I read out in Mr Weston's report, he refers to a concern that if you don't have public subsidy, it may potentially drive wrong behaviours or a lack of focus, or restriction on the investment into new technologies and initiatives.

Would you share that concern or do you have any additional comments on that?

PROF JOHN STANLEY: No, absolutely. I think the kind of argument in, if you like, welfare economic terms, is

that if you ignore the external benefits that are available, then the level of service provision will be not enough; that you should in fact, in terms of trying to maximise the benefits to society, provide a larger volume of service than will flow from solely a commercial operator making a decision on commercial criteria.

I mentioned earlier on in the day the Thredbo conference that's held every two years, discussing competition and regulation in public transport, which is a forum that involves academics, operators in public transport, and governments. I chair the workshop strand in that and have done for probably the past ten years, that looks at trying to value public transport services. So there's an active conversation happening there in the academic/public transport operation/government area, through that forum, and it would be terrific if the Hong Kong Transport Department and interested academics from Hong Kong could participate in that forum, which is, as I say, every two years, the next one being in Singapore next year.

CHAIRMAN: Which other jurisdictions send representatives to this conference?

PROF JOHN STANLEY: Chair, I think at the last one there were 22 different countries present. Around about

a third of the participants would be academics; a number of public transport operators participate. I notice when we were reading previously you talked about Tower Transit in London -- Neil Smith, the principal of that business, is a regular in this forum; South Africa, South America are strong participants; a lot of European countries participate in the venue; Australia is well represented as well, new Zealand -- 22 countries -- and senior-level representation from government, from the universities, and also from operators.

CHAIRMAN: I take it, if the next one is in Singapore, Singapore is also a participant?

PROF JOHN STANLEY: Yes, Chair.

CHAIRMAN: Is that government and bus operators?

PROF JOHN STANLEY: The Land Transport Authority will be hosting the next event. I suspect that some of the operators might be sponsors.

CHAIRMAN: When is that to be held?

PROF JOHN STANLEY: I think it's September next year. Maybe August. I will send you that information.

CHAIRMAN: Thank you.

Does it publish information that is available publicly?

PROF JOHN STANLEY: It does, Chair. In fact that's really the most important part of the whole process. It's all

published, and so --

CHAIRMAN: Is it available on the internet?

PROF JOHN STANLEY: A lot of it is. Some of it gets actually published as journal papers, which means it's not available on the internet necessarily but you can get copies of those papers. Sometimes it appears as books. But publication is the essence of the process.

In fact, it's an unusual conference in the sense that it takes you -- it extends over four days, three days of which is based on a workshop format in which participants choose one topic only and spend three days working through that topic, and that topic might be, for example, how do we get more competition into public transport operation, and they would spend three days discussing that with colleagues. The workshop I chair spends three days talking about what are the benefits of public transport and how can we value them and can we convert them into cash flows to help pay for services.

CHAIRMAN: Thank you.

PROF JOHN STANLEY: Chair, my wife points out the next conference is Sunday, 25 to Friday, 30 August 2019.

CHAIRMAN: Thank you.

MR DEREK CHAN: Mr Chairman, may I then move on to the next topic, which is working hour guidelines.

CHAIRMAN: You were dealing with the topic of subsidies,

where government might play a role in addressing the issues that Mr Weston has identified. This is an issue that's been raised, has it not, by the bus operators in respect of the cost of implementing the decision, if that's what it is, to install seat belts on franchised buses?

MR DEREK CHAN: Seat belts. We have heard evidence from Kowloon Motor Bus, Dr Leung, I think it was, who said that he had one discussion with a government official.

CHAIRMAN: Yes. Perhaps if you can turn up that reference in the transcript. It is also dealt with, is it not -- and I'm working from my unpaginated bundle -- but the sub-working group on vehicle safety devices, 12 June 2018, paragraph 8. Perhaps we could draw that to Prof Stanley's attention.

You have already been told, Prof Stanley, of the anxiety being expressed by Citybus of being involved in an operation of installing seat belts at their cost on buses where it is their experience that the passengers won't use them and government won't mandate it and won't even enforce it. It's a futility, I think is what they're saying, the whole exercise.

Perhaps if we could go to paragraph 8 of those minutes.

MR DEREK CHAN: Yes. Can I start first then by going to the

second meeting notes of the sub-working group.

CHAIRMAN: Yes.

MR DEREK CHAN: It starts at KMB-12, page 4932-1. That's the first page of the meeting note.

CHAIRMAN: What's the date of this meeting?

MR DEREK CHAN: 12 June 2018.

CHAIRMAN: Thank you.

MR DEREK CHAN: The relevant passage that Mr Chairman referred to is at 4932-3, paragraph 8.

Perhaps I can just read that out:

"Citybus ... mentioned that the exposed seats on the existing buses were already fitted with 3 point seat belts. From their day-to-day operation experience, most passengers sitting on exposed seats did not wear seat belts. The retrofitting work with huge cost would be a waste of money if nobody uses them. It was agreed that promotion and education to passengers should be conducted to promote the use of seat belts. Citybus said that they had about 1,100 bus registered in or after 2013 which might be feasible [for] retrofitting seat belts to the upper deck. The estimated cost of retrofit would be in the magnitude of about HK$240 million which is almost impossible for the company to afford. Citybus requested the government to provide funding or subsidy to such retrofit projects if

that is really required. Therefore they have no plan to retrofit seat belts on their own. It was agreed that the issue of financial implication would be brought up in the working group for discussion."

Just to complete the picture in respect of the other two companies, at paragraph 9:

"Kowloon Motor Bus ... emphasised that they supported the seat belt installations for all new buses", and in a phase-by-phase approach.

At the end of that paragraph:

"New Lantao Bus objected to such installation due to low utilisation rate and huge cost. New Lantao Bus had no plan to retrofit seat belts."

That's the position in respect of the three providers.

CHAIRMAN: So KMB might consider to retrofit seat belts; is that the point being made there?

MR DEREK CHAN: Yes.

CHAIRMAN: They were prepared to fit them on new buses but they would only consider retrofitting them on existing buses.

MR DEREK CHAN: Yes. We also saw in a previous meeting note that we went through that it was KMB who came up with the initiative or proposal about retrofitting upper deck and on specific routes that are long-haul or go on

expressways.

Perhaps just to complete the picture about the evidence from Dr Leung in the last hearing, can I refer the committee to the transcript for 12 September 2018. That should be at transcript bundle 6. The relevant part of it is at page 18, line 14. Again, maybe I will read out Dr Leung's evidence:

"May I just add. Recently I had a meeting with the government official and in fact I talked to him and requested the government whether they can offer any assistance to us in retrofitting these safety belts, and the response was quite positive, if I may put it this way."

And the person was Mr Joseph Lai, permanent secretary for transport, and his deputy, Mr Kevin Choi.

CHAIRMAN: Now, this is ground that we have covered, in a sense, already, but it is actually a real issue in Hong Kong. So that we understand what you are saying, this is what calls for an analytical cost/benefit analysis. You say, on the one hand, government can make a decision, "As a matter of policy, that's what we are going to do", but even when government makes policy decisions, surely it has regard to cost/benefit analysis?

PROF JOHN STANLEY: You would hope so, Chair, but the

evidence is that's probably not always the case. But in a situation like this, you would hope that government would go through the process of doing that cost/benefit analysis and identifying the benefits, and if those benefits look substantial, they are very much externalities. These aren't benefits that are going to be captured for the operator. So they are a case for looking at subsidy as a means of helping this process to happen.

CHAIRMAN: There might be benefits for the operator. If accidents are prevented so the passenger doesn't get injured when the bus brakes or hits something, that's a benefit for the operator.

PROF JOHN STANLEY: It is, that's true.

CHAIRMAN: They don't have damages to pay.

PROF JOHN STANLEY: That's true. The larger component of these will be externalities that are not able to be captured by the operator. So you would make the argument for a sharing on the basis of the cost between the government and the operator.

CHAIRMAN: But when government is disposing of taxpayers' money, it behooves government to have regard to what the benefit and the cost is, does it not?

PROF JOHN STANLEY: Absolutely, to do the quantification and to work through the exercise we were talking about

an hour or so ago.

CHAIRMAN: Yes, Mr Chan.

MR DEREK CHAN: Mr Chairman, I have three more topics. One is the issue of guidelines, the second being transparency of safety data, and the third, bus captain training. I suspect I will need about 20 minutes or half an hour to finish that. Does Mr Chairman want a break now or do you want me to head straight through?

CHAIRMAN: I am conscious that you have been on your feet and the professor has been in the hot chair, as it were. Shall we take ten minutes?

PROF JOHN STANLEY: I'm happy to go either way.

MR DEREK CHAN: Thank you, Mr Chairman.

CHAIRMAN: Ten minutes then.

(4.21 pm)

(A short adjournment)

(4.38 pm)

CHAIRMAN: Yes, Mr Chan.

MR DEREK CHAN: Thank you, Mr Chairman, and Professor.

If I may then go directly to the issue of working hour guidelines. I think the biggest point you make there is the difference between Melbourne and Hong Kong, in the sense that in Melbourne, working hour guidelines are embedded within legislation, whereas in Hong Kong, we have them in the form of just guidelines.

Can I take you to the relevant passage in your expert report on that issue, and that is at page 91 of your expert report. I'm looking at the middle paragraph of page 91, and if I may read it out:

"Two notable differences between Hong Kong and Melbourne with respect to working/rest hours are that (1) the Melbourne (Victorian) requirements on work/driving/rest are set out in a regulation (the National Heavy Vehicles (Fatigue Management) National Regulations 2013), with (2) a safety duties/chain of responsibility link, whereas in Hong Kong they are the subject matter of a Guidelines document" -- and you can take reference to that -- "without specific legislative reference to safety duties or chain of responsibility. The Hong Kong Public Bus Services Ordinance (Cap 230) provides for regulations of working/driving/rest hours but this has not been taken up."

Pausing there, Mr Chairman, the reference to that is section 35J of the Ordinance, and the page number, without going to it, if I may --

CHAIRMAN: You are going to go into it?

MR DEREK CHAN: I don't propose to go to it.

CHAIRMAN: I'm familiar with the provision.

MR DEREK CHAN: The page reference is TD-2, page 56.

Professor, you go on to say in your report that:

"This difference in mode of establishing working/rest hour requirements between the two jurisdictions seems likely to mean that there will be a stricter focus by operators on compliance in Melbourne, since the consequences of non-compliance involve a breach of the law, which could have legal consequences for a number of people in the business, and others (possibly also including the government service procurer), because of chain of responsibility."

The last part is a reference to the Bus Safety Act that we already looked at this morning. And one of your key recommendations is for our guidelines to be embedded within some sort of regulation.

Mr Chairman, the reference for that is page 94 of the expert report, which I won't go to. It's simply a one-line reference to that.

CHAIRMAN: Yes, I see that. Thank you.

MR DEREK CHAN: Professor, it may be obvious, but can I still ask you to elaborate on the advantages of incorporating the working hour guidelines into regulation and giving it the force of law.

PROF JOHN STANLEY: Thank you, Mr Chan. In the Melbourne situation, and I think I have included in my first report some examples of the potential consequences of not complying -- this was at page 27 of my first report,

which is ...

CHAIRMAN: I think the numbers marry up.

PROF JOHN STANLEY: So it will be page 27 also. They are just some examples of the penalties that are there for some of the problems that might occur for a breach.

CHAIRMAN: Yes. It's from that page that I got the feel of how it is that the higher up the chain you are, the more the penalty is.

PROF JOHN STANLEY: Yes. The consequences have potential monetary amounts involved with them for a range of parties, as I think I also indicated earlier today, and the new revisions of the national law that are coming in on 1 October, potential for imprisonment as well for reckless behaviour and substantially increased penalties at the top of end of this scale.

So this is taken very seriously because it has that sort of embedding. I think maybe the police have criticised the application of this possibility to date, saying they don't think enough heavy penalties have been imposed. This is primarily in trucking rather than in the bus area. These provisions are mostly in infringements coming up in terms of trucking. But certainly the provisions are there, and from the conversations that I have with our bus operators, they are very conscious of these provisions and the

consequences for themselves, as management, but also for other potential players in that chain of responsibility.

Chair, I would also make the I think important point that our regulation is embedded in something that's called "fatigue management regulation". So it's Heavy Vehicles (Fatigue Management) National Regulations, as distinct from the Hong Kong approach which is guidelines that refer to working.

CHAIRMAN: Yes.

PROF JOHN STANLEY: So it's quite a different focus, and I think that's quite important. We have been on a fatigue focus for quite some time.

CHAIRMAN: Forgive me for interrupting. May I ask that somebody enquire why we are now being visited by a bright flashing red light? Thank you.

MR DEREK CHAN: Can I ask the question in this way: can you, Professor, see any downside in making the working hour guidelines a matter of legal requirement under statute?

PROF JOHN STANLEY: No.

MR DEREK CHAN: Can I also ask you to consider the Transport Department's explanation for not putting the working hour guidelines into regulation, and the evidence from the Transport Department I will ask you to have a look at is on the first day of the evidence, which is on 7 May 2018, so it's the first set of transcripts in the

first transcripts bundle, and can I please refer you to page 121, starting at line 4.

CHAIRMAN: Who is giving evidence?

MR DEREK CHAN: This would be Ms Mable Chan, the Commissioner for Transport.

CHAIRMAN: Thank you.

MR DEREK CHAN: If I go forward a page just to give some context, Mr Duncan, in the middle of the page at line 13, page 120, says:

"Ms Chan, you were present this morning, I think, when I asked representatives from the bureau as to why these guidelines with regard to working hours are simply guidelines, as opposed to regulations, given that the ordinance expressly stipulates that this topic can be the subject of regulation.

Are you able to assist the committee as to the reason why this has not been a regulation or has not even achieved the status of a direction or a requirement?"

The response or the explanation of Ms Mable Chan, the Commissioner for Transport, was this:

"Because I was present at this morning's session and the context in which this issue was raised was on whether or not it should be better implemented or enforced under the law or as a franchise requirement.

First perhaps I can express my view from an operational and monitoring point of view. As I see it, the history of the working hours guidelines is long and it is an ongoing process. As revealed from the few times that the guidelines are revised, the beauty of the requirements as set out in the guidelines is that it could be reviewed and revised in a more timely basis as compared to if it is stipulated as the ordinance or in the regulation; though I must admit that as and when necessary, we should not spare ourselves from the effort in reviewing the legislation or taking it through the Legislative Council.

The fact remains that, being guidelines, it can be more flexible and it can be sort of enhanced in the light of the prevailing circumstances. Franchised bus service is a very labour-intensive service. There are also highly prescriptive requirements on the service levels of franchised bus. So I think from the government perspective, we are trying to strike a balance in ensuring the delivery of bus service according to franchise requirement on the one hand and the enhancement of the working environment of bus captains on the other."

So there is the explanation from the Transport Department, for convenience, if I could sum it up in

that way.

CHAIRMAN: Reviewed and revised in a more timely way, and more flexible.

MR DEREK CHAN: Yes.

CHAIRMAN: Just remind me, prior to the February 2018 revision, when was the last revision of the guidelines?

MR DEREK CHAN: 2010.

CHAIRMAN: So eight years?

MR DEREK CHAN: Yes.

CHAIRMAN: And prior to that, 2010?

MR DEREK CHAN: 2004.

CHAIRMAN: So six years?

MR DEREK CHAN: Yes, and I think the evidence previously was that the 2018 amendment kicked off because of the September 2017 accident.

CHAIRMAN: Yes. That was when a review of the guidelines was commenced, in consequence of that.

MR DEREK CHAN: Again, in reaction to that accident.

CHAIRMAN: Yes. So six and eight years?

MR DEREK CHAN: Yes.

CHAIRMAN: Timely? A more timely way?

MR DEREK CHAN: Perhaps I can just give the reference to that table of amendments. It's at MISC-1, page 897, just for the reference of the committee.

CHAIRMAN: Thank you. That's helpful. This details the way

that the guidelines have been changed.

MR DEREK CHAN: Exactly. 2004, 2007, 2010, 2018.

CHAIRMAN: Yes.

MR DEREK CHAN: Professor, do you have any observation --

CHAIRMAN: Before you ask the more general question, we have seen that there are penalties available for infractions. Given the work that you have done over the years with buses in Victoria, how often are people prosecuted, presumably, for this kind of infraction?

PROF JOHN STANLEY: Very rare, Chair, and not in fact in relation to route bus operation. It's much more likely to occur in the longer distance running.

CHAIRMAN: Yes. I can understand the different demands there.

PROF JOHN STANLEY: Yes.

CHAIRMAN: But very rare in buses?

PROF JOHN STANLEY: Yes, in route buses, yes.

CHAIRMAN: In route buses?

PROF JOHN STANLEY: Yes. And if I might comment on that issue of convenience. It seems to me that you have to decide whether the guidelines or a regulation are about convenience to the authority or whether they are about outcomes to the public, and coming as a consequence of compliance with whatever it is you are putting in those guidelines. So my personal view would be it is more

important to put weight on -- emphasis on compliance than it is on administrative convenience.

CHAIRMAN: Is the fact that prosecutions are very rare for infractions of this working hours legislation for route buses because there is a high level of compliance?

PROF JOHN STANLEY: I believe so, Chair, yes. In fact the scheduling and rostering processes that the operators use have very much the provisions of the regulation sitting behind them, and they build a little bit of margin for error in there, so that they don't bump up against the boundaries that are created with respect to the lengths of time before they need to take a break.

CHAIRMAN: Yes.

The figures of compliance with working hour guidelines in Hong Kong, have you looked at them?

PROF JOHN STANLEY: I think my recollection was 96 per cent.

CHAIRMAN: Yes. That accords with mine, 97, perhaps, something like that.

PROF JOHN STANLEY: Yes. My concern there would be that there's 4 per cent non-compliance, and why is that, what is the consequence of that.

CHAIRMAN: Thank you.

Yes, Mr Chan.

MR DEREK CHAN: Thank you, Professor.

Can I move on then to the next topic, which I hope

is more straightforward. That is the transparency of the safety data.

You make that point at page 69 of your expert report. At the first bullet point of page 69 you say:

"There are solid arguments favouring publication of the bus safety chapter of the five year forward planning programmes, because of the wider societal costs of accidents."

I think you were referring to a number of analytical statistics that relate to safety issues.

PROF JOHN STANLEY: Yes, Mr Chan. I thought that the discussion in some of those bus safety chapters was really informative, and it is the sort of information that I believe, in the public interest, should be more widely available.

I'm referring, for example, to the kinds of analysis that was presented on the driving our links and how that affected accident performance, I think it was.

CHAIRMAN: Yes, and non-links, as I think it was established, between the number of hours you drive, the age of the drivers, that sort of comparison?

PROF JOHN STANLEY: Exactly, Chair. Accident rate by years of service, accident rate by hours on duty before the accident. I mean, I think this is really good analysis, and it shouldn't be stuck in documents that are only

available to a few select people. It's really important information in the public interest, in my view, and it shows that there's some really good research being done, trying to come to grips with the challenges that are being faced in the safety sense and it would give people confidence in what the industry is trying to do.

CHAIRMAN: The committee obviously agrees with you, because initially we were denied access to this material, and by a series of steps over several months we have managed to obtain a great deal of this material by people being willing to give it to us, perhaps recognising that it is data of relevance.

PROF JOHN STANLEY: Indeed, and it is data that can inform you on areas that are unique to focus the effort.

I drew attention in fact to a little jump in the kind of six to eight-hour period after the start of shift in which the accident rate seemed to go up a little bit, and I didn't see that actually commented on in the paper in which the evidence was presented, but it just shows that the sort of analysis and the data presentation can lead you into asking questions that might be able to help better safety outcomes.

CHAIRMAN: Mr Chan, there is one matter -- I mention it now so that perhaps Ms Wong can find it -- you raised or you drew attention to the fact that the Transport

Department, in the letter it wrote requiring KMB to address why there had been an increase in accident rates -- we now have the KMB forward planning report. Presumably, that gives us an explanation. The latest report was given to us during August 2018, again at our request, when one of the members of the KMB representatives told us that they were going to provide it to the Transport Department, my memory is, on 18 August.

MR DEREK CHAN: Yes. The latest version has made it into our bundles. I will ask Ms Wong to marry it up with what the Transport Department asked for.

CHAIRMAN: Yes, that's what I'm inviting you to do: what was the explanation for why the rate had gone up? You don't have to do it immediately. Carry on with your list.

MR DEREK CHAN: Yes. Mr Weston also makes a similar point, on the transparency of this sort of data. Can I quickly take you to that at page 153 of the expert bundle, and if I can just read you --

CHAIRMAN: Can you give me the paragraph number, because I'm working from the set that I've marked up.

MR DEREK CHAN: That would be page 39 of the internal pagination of Mr Weston's report.

CHAIRMAN: Thank you. I've got that open.

MR DEREK CHAN: Paragraph 84, under the heading, "Safety

data transparency/performance". If I can read it out:

"It is clear from London's experience that greater transparency of data in relation to the safety performance of the bus network not only leads to greater stakeholder and public scrutiny [but] it also leads to a sharper focus from both the transport authority and its contracted bus operators on the safety agenda. An open approach to incident data leads to accountability.

Consideration should be given to what safety data in relation to the Hong Kong franchised bus network could be placed into the public domain."

Professor, do you agree with that or do you have any other observations in that regard?

PROF JOHN STANLEY: I agree fully with that, Mr Chan. My view generally on the Greater London authority and Transport for London is they are almost without peer in terms of availability of data and information, in a global sense, and they don't try and hide things, they try and put it out there, and warts and all are prepared to confront the sorts of challenges that that shows.

I think that really leads to a lot of confidence in that process, so I'm very supportive.

CHAIRMAN: In fact this material is available on the internet and they publish it every quarter.

PROF JOHN STANLEY: They do, yes.

MR DEREK CHAN: Yes, Mr Chairman. Can I then move on to the last topic in my notes, and that is bus captain training.

In page 78 of the expert bundle, which should be the second report, you have a section on bus captain training. I think the point here is that the driver training requirement is specifically required under the Melbourne contracts.

PROF JOHN STANLEY: (Nodded head).

MR DEREK CHAN: And in Hong Kong, recently, the Transport Department has recently promulgated a practice note in respect of this training guideline, so I won't take you to the details of that.

But there is one matter arising out of the captain training that I would like to ask you about, and that is on fatigue management training, which you expressly mention at page 90 of your report. At page 90, can I perhaps read from the second full paragraph, where you deal with your recommendation that fatigue management training should be part of our training programme. You say in here that:

"Working for 13-14 hours in Melbourne or Hong Kong puts a major focus on the question of how drivers use their remaining hours, whether they are getting

sufficient rest/sleep to avoid fatigue and on the importance of including fatigue management training in driver training programmes. Within the various bus captain training materials included in the annexes to the Transport Department submission at pages 1448 and following, and also in the briefing paper to the Legislative Council Panel on Transport on Enhancement of Safety of Franchised Buses ... the author did not see any mention of training in fatigue management. This is an important part of bus driver training in Melbourne, including attention to related matters such as diet and exercise. The training also extends to supervisors, to try to ensure that they do not roster drivers who may be fatigued. More broadly, the idea of the Transport Department developing a practice note on the training framework for franchised bus captains is a good idea, as outlined in the paper to the Legislative Council Panel. This will help to ensure that all operators are aware of desired standards and have a means of conveying these standards to their bus captains. The training framework that is developed needs to include a specific component on fatigue management, which could form part of an occupational health and safety module and should extend to supervisors."

Professor, can you elaborate on what would be

involved in this type of fatigue management training?

PROF JOHN STANLEY: Yes. The operators in Melbourne, when they're training new drivers or when they're running retraining programmes, refresher programmes, fatigue management is an important component in that programme.

It is interesting, in our national legislation, that is then adopted into Victorian law under an Act called the Heavy Vehicle National Law Application Act, which I talk about on pages 33 and 34 of the first report, that legislation lists a whole bunch of signs of fatigue. That's how seriously fatigue is taken in this area in Victoria.

So if you go to page 34, you will see -- this is a quote from the legislation that embeds the national law in Victorian law -- it talks about:

"Signs of fatigue means that a person was or will be fatigued when driving a fatigue-related heavy vehicle on a road (whether the sign manifests itself before, during or after the driver drove the vehicle)."

Then it gives a range of a dozen or so examples of signs of fatigue. Those sorts of signs then would be incorporated into that training programme, but a lot of our operators will introduce dietitians, for example, exercise people into their driver training courses, with sitting on your backside for 10 or 11 hours a day

driving a bus is probably not great health-promoting exercise. So those sorts of things form a really important part of driver training, because of the nexus between understanding what causes fatigue and the risks of safety associated therewith.

MR DEREK CHAN: I think your overall recommendation is that this sort of training should form part of the practice note that the Transport Department issued.

PROF JOHN STANLEY: It is, Mr Chairman, I think the practice note is a really good idea in terms of raising the bar on a common base level of training. But I think it is important that fatigue forms part of that. In terms of application, I think I commented that the guidelines, if they are adhered to as they stand at the moment, if anything, marginally tighter than the comparable provisions in Melbourne. The main difference in fact is in terms of how they are applied in practice, where I talked earlier today on about 44/45 hours being our norm, but I understand that it's a much bigger number than that in Hong Kong, based on some of the evidence that I've seen presented to the committee before.

CHAIRMAN: Yes, very significantly more than that.

PROF JOHN STANLEY: Yes. So that would make the issue of fatigue management even more important here.

CHAIRMAN: And that's missing from the practice note?

PROF JOHN STANLEY: (Nodded head).
CHAIRMAN: Sorry, a nod doesn't go on the transcript. Do you agree?
PROF JOHN STANLEY: I haven't seen the practice note yet.
CHAIRMAN: Perhaps we can put it up, since we are on training.
PROF JOHN STANLEY: Apologies. I have read that, Chair.
CHAIRMAN: Do we have a reference for that in the bundles?
MR DEREK CHAN: TD-1, page 470, is currently being shown on the screen. The contents of the practice note are at page 471.
CHAIRMAN: Thank you.
MR DEREK CHAN: Across the page at 472 as well, and I think the point simply is that there is no reference to any fatigue management training.
CHAIRMAN: There is no specific reference to it, is there?
PROF JOHN STANLEY: Chair, my suggestion was that it could be picked up under the occupational health and safety component of item (e), which is only 5 to 10 per cent, I think you would need to beef that up if you were going to do it that way, but it is part of occupational health and safety but it needs a specific focus.
CHAIRMAN: Thank you.
MR DEREK CHAN: Mr Chairman, those are the questions that I have arising from the professor's report. It remains

for me to follow up on two matters that Mr Chairman raised with me during the course of the questioning.

CHAIRMAN: Yes.

MR DEREK CHAN: The first relates to the requests that the Transport Department received --

CHAIRMAN: Yes.

MR DEREK CHAN: -- in respect of the seat belt installation.

I think Mr Chairman remembers the passage but I will just give the chairman the page reference for that. That was mentioned during the 1st meeting of the working group which was held on 13 March 2018, and the page reference for that in our bundles is KMB-12/4869-1, at paragraph 16. I see it up on the screen now.

At paragraph 16, Citybus was querying the practicality and raising the concern that standees could not be provided with seat belts. Then the passage goes on to record:

"TD advised that there were requests for a comprehensive review on seat belts installation on bus after the traffic accidents."

CHAIRMAN: Just a moment. Let me read that again.

"... comprehensive review on seat belts installation on bus after the traffic accidents."

MR DEREK CHAN: Yes. Mr Chairman, the date of this meeting was 13 March 2018, and there was actually a relevant

discussion on this in the LegCo Panel for Transport on 15 February 2018, and with the assistance of the very helpful staff of the secretariat and Ms Wong, we have actually located the relevant LegCo meeting minutes that discuss this.

CHAIRMAN: Yes.

MR DEREK CHAN: I think that is now being shown on the screen.

On the first page, we can see that it is the minutes of a special meeting of the Panel on Transport in LegCo, held on Thursday, 15 February 2018.

Can I direct Mr Chairman's attention to page 19.

CHAIRMAN: Yes.

MR DEREK CHAN: If I just go back a page to 18, at the bottom of page 18, at paragraph 78, Mr Chairman can see the context in which this happened. So:

"Mr Chan Hak Kan moved the following motion which was seconded."

At page 19, you can see the motion being proposed:

"This panel expresses deep sorrow and regret at the occurrence of a serious traffic accident on Tai Po Road on 10 February resulting in 19 fatalities and 66 injuries and, in order to prevent the recurrence of such a tragedy, this panel urges the administration to:

1. Request franchised bus companies to review the

staffing establishment of bus captains, provide reasonable working hours, rest time, meal breaks and remuneration packages for bus captains, and provide on a compulsory basis regular training on a safe driving attitude for full-time and part-time bus captains to ensure that bus captains are equipped with the qualities of a good driver."

So, Mr Chairman, that forms part of the working group.

CHAIRMAN: Yes.

MR DEREK CHAN: "2. Apply anti-skid surface dressing, erect additional deceleration warning signs and install speed enforcement cameras on the subject road section immediately, and review the 'high-risk' road sections across the territory and expeditiously enhance the relevant safety measures to safeguard the safety of road users."

Thirdly --

CHAIRMAN: Just a moment, please. So, in context, the reference to "the subject road section" is to the Tai Po Road, the scene of the accident?

MR DEREK CHAN: Yes, according to the date of the panel meeting, that must be the case.

CHAIRMAN: Yes.

MR DEREK CHAN: And:

"3. Explore ways to further strengthen the safety installations on buses, including enhancing the protection for high-risk seats, retrofitting seat belts on more seats and making it compulsory in phases for passengers to wear seat belts ..."

It goes on to talk about other devices. So that's the context in which the seat belt request had been made by the LegCo Panel.

Over the page at paragraph 79, you can see that the motion was carried.

CHAIRMAN: Yes.

MR DEREK CHAN: I hope that answers at least part of Mr Chairman's concern. We will probably raise it with the Transport Department again.

CHAIRMAN: We will do, because they haven't told us what it was, but this appears a logical explanation.

MR DEREK CHAN: Possibly, yes.

CHAIRMAN: But this refers to one accident. They refer in the plural to "accidents".

MR DEREK CHAN: Yes. We have in the bundle documents dating back to 2003 and 2006 in which this issue had been raised, but perhaps it is more properly an issue that we can take up with the Transport Department when they come back.

CHAIRMAN: Well, I think it's a matter -- you are referring

to discussions, papers --

MR DEREK CHAN: Yes.

CHAIRMAN: -- where the Transport Department have considered whether or not to require seat belts to be provided on buses, but dismissed it.

MR DEREK CHAN: Yes, which also --

CHAIRMAN: I think it might help if you were to tell Prof Stanley about that, and perhaps you can also tell us which jurisdictions they looked at when they decided it wasn't a good idea.

This is a matter that was considered 15 years ago, was it not?

MR DEREK CHAN: Yes. I think the point -- I'm not going to go to the document but I think the point is they have consistently looked at it and consistently decided that it wasn't going to be very useful, having regard to the experience in overseas jurisdictions.

CHAIRMAN: Yes. Perhaps you can turn up a couple of those in that journey towards the conversion on the road to Damascus, which happened in April this year.

MR DEREK CHAN: Can I refer the committee to bundle SEC-1. Page 274 is where one paper starts.

CHAIRMAN: Whoever makes these lever-arch files has failed to make one that doesn't break whenever it is transferred to the auditorium.

MR DEREK CHAN: Yes. Does Mr Chairman have the document at page 274?

CHAIRMAN: Thank you. I do.

MR DEREK CHAN: The date of this document is January 2007. You can find the reference to the date at page 280.

CHAIRMAN: And what is it?

MR DEREK CHAN: It is a briefing paper prepared by the Transport Department.

CHAIRMAN: "Environment, Transport and Works Bureau", of the Transport Department?

MR DEREK CHAN: Yes. And the purpose would be for a LegCo Panel on Transport meeting. It's a progress report on measures to enhance safety of the franchised bus operation.

CHAIRMAN: Thank you.

MR DEREK CHAN: Mr Chairman, you can see at page 274, paragraph 3, the immediate reference to retrofitting seat belts on franchised buses. And the reference to overseas data, we can find that at paragraph 4 on page 275:

"We have collected information from other countries on the requirements of fitting and fastening of seat belts on buses. So far, we have not found any country that have legal requirements for the provision of seat belts on passenger seats of buses designed for urban use

and are allowed to carry standing passengers. According to the transport authorities of these countries, the benefit of imposing a seat belt requirement in their buses is uncertain. A summary of the findings is at annex I."

And annex I can be found at page 281.

CHAIRMAN: Yes.

MR DEREK CHAN: So that's January 2007.

CHAIRMAN: So the jurisdictions concerned are the United States of America, Canada, the United Kingdom, the state of Victoria in Australia, New Zealand, Netherlands and Singapore?

MR DEREK CHAN: Yes. And we have seen references to those similar countries in the 2018 briefing paper to the LegCo Panel on Transport as well, which we have already looked at today.

CHAIRMAN: This paper appears to be a response -- I'm looking at page 274 -- to an earlier discussion in the LegCo Panel on Transport in 2006.

MR DEREK CHAN: Yes. That can be found just before this document. The 2006 document starts at page 266.

CHAIRMAN: Was it couched in a similar way to the note that we just looked at in February or March of this year, a request that there be a comprehensive review; is that the same language?

MR DEREK CHAN: Yes, very much the same language.

CHAIRMAN: Perhaps you can read that out, at 266.

MR DEREK CHAN: 266 is the start of the document.

CHAIRMAN: Yes.

MR DEREK CHAN: The relevant part the document, which is the one dated October 2016, is at paragraph 19.

If I can just read a little bit at the end of paragraph 18.

CHAIRMAN: Yes.

MR DEREK CHAN: Because it has the phrase "traffic accidents", which Mr Chairman picked up on, in the minutes. I'm reading from the bottom half of paragraph 18 on page 271:

"In the light of recent traffic accidents, TD has been reviewing with the franchised bus operators on retrofitting of seat belts on the existing buses, taking into account of the technical difficulties such as the structural strength of the seats, adequate anchorage points and design of the bus, et cetera."

So we have the same process repeating itself.

Paragraph 19:

"We have conducted a research on overseas practices regarding the fitting and wearing of seat belts in buses. A summary of the corresponding seat belt requirements is at annex."

Again, the same reference to no overseas jurisdiction having this requirement.

CHAIRMAN: Yes. Thank you. So that's 2006, 2007.

MR DEREK CHAN: Yes, and we can't find anything between 2007 and 2018, when the issue raised its head again at the moment.

CHAIRMAN: Yes. Thank you.

MR DEREK CHAN: The second issue that Mr Chairman raised with me is the request --

CHAIRMAN: Perhaps having taken Prof Stanley through this material -- this obviously is a matter for the Transport Department to help us with -- on its face, it looks as though this review has been conducted in the past and it's been decided by reference to other jurisdictions, including Victoria, that it's not necessary for Hong Kong.

Is there any general reason -- you perhaps wouldn't know any specific reason in Hong Kong -- but any general reason that you can see for this I called it the conversion on the road to Damascus moment?

PROF JOHN STANLEY: I think the findings from places like Australia -- and we were involved in some of these exercises when I was with the National Road Transport Commission back in the 1990s -- the major benefit from buses in terms of collision comes from the mass of the

vehicle, not from seat belts, and the question then becomes what marginal value on top of that does a seat belt generate for you?

Certainly, at the time this paper was written, that would very much have been the result of cost/benefit analyses, if you had done them on this circumstance.

Why might it be different now in Hong Kong? I think it probably goes to the question of people seated upstairs -- is there a possibility that the probability of an accident is much higher in that circumstance? I don't know the answer to that. But that's what I would be looking for. Is there a higher risk, for example, of injury associated with travelling in the upper deck of a double-decker bus than there might be on a single-level platform vehicle like we have in Melbourne that might justify the use of seat belts upstairs, so to speak? I don't think downstairs would be much different to our buses.

CHAIRMAN: But, to come back to the way you have analysed things, one would need empirical data to make this judgment, what is the accident data, how many people are thrown out of the bus, how many buses fall over --

PROF JOHN STANLEY: Exactly, Chair. It's exactly the kind of analysis that should be done to resolve these kinds of questions.

CHAIRMAN: Yes. Thank you.

Mr Chan, you were moving to your last point, I think.

MR DEREK CHAN: Yes, and I think Mr Chairman raised with me that in the 2018 letter from the Transport Department --

CHAIRMAN: Yes.

MR DEREK CHAN: -- they noted increase in certain things and asked KMB to --

CHAIRMAN: Yes, increased accident rate, broadly speaking.

MR DEREK CHAN: If I can go quickly to that document. TD-5, page 1729, just to see the context of it again.

CHAIRMAN: So this is the letter from the Transport Department in advance of the annual update of the five-year forward planning, spelling out what it is that they want the company, KMB, to address, and stipulating the increased accident rate, using that term broadly.

MR DEREK CHAN: That's correct. The request is at the bottom of page 1729. Again, if I can just read it out:

"Your company is required to:

(a) conduct an analysis on the traffic accidents involving KMB in 2017, in conjunction with the situation in 2015 and 2016 ... The analysis should include the trend, the nature and causes of the accidents, as well as the reasons for the increases."

The answer we can find at KMB-12, starting at

page 5011. That's the start of the most up-to-date bus safety section.

Can I just remark, Mr Chairman, that there is no one easy place where you can find the reasons for the increase. What we see is --

CHAIRMAN: It's not addressed specifically; is that what you mean?

MR DEREK CHAN: Not directly. It's a similar format in that they analyse the accidents by route, by bus type, by hours and all that. But there are a couple of passages which Mr Chairman may find relevant.

For example, at 5025, the analysis here is "Accidents by type", and at 8.2.6.7, which is over the page at 5026, you can see:

"Driving attitude of other road users is one of the key in preventing accidents not blameworthy to bus captains."

So that seems to attribute part of it to driving attitudes of other people.

CHAIRMAN: Yes. I see your point.

MR DEREK CHAN: Then, in a similar vein --

CHAIRMAN: Just a moment, please. So, "It's not our fault; it's other drivers", is that what it comes to?

MR DEREK CHAN: Yes. We also see other references in a similar vein, for example at 5028, which is

paragraph 8.2.7.5. Again, if I could just read it out:

"Illegal parking at bus stops is one of the cause of improper stopping of buses, by which road users' safety will be jeopardised as passengers have to board and alight on the roadway instead of using the bus stop. [They] increased the chance of traffic accidents. Buses and other vehicles overtaking illegally parked vehicles pose safety concerns for boarding and alighting passengers, as well as other road users."

So again other contributory factors are highlighted.

Perhaps just one reference for Mr Chairman and the committee's reference. At 5031, again we find something similar. At 5031, again we have an analysis of "Accidents by district", and at paragraph 8.2.9.3, which is at the bottom of that page, you see KMB saying:

"Traffic congestion is one of the causes of the high percentage of accidents noted in the busy districts. The company recommends that proactive measures should be taken to resolve the congestion problem. We will discuss with the government."

And over the page, they talk about bus priority as a possible counter to that problem. So, again, it talks about other contributory factors to the accident rate.

CHAIRMAN: Not entirely clear how traffic congestion causes accidents. It may cause drivers to drive badly and

gives them more vehicles to hit. Is that perhaps what is meant?

MR DEREK CHAN: Perhaps other vehicles hitting them is probably what they are trying to say.

CHAIRMAN: Yes.

MR DEREK CHAN: Mr Chairman, I hope that assists the committee.

CHAIRMAN: Yes.

You haven't seen this data before, have you, Professor?

PROF JOHN STANLEY: No, Chair, but in terms of traffic congestion being associated with accidents, I think there are a number of studies that show one of the correlations between accidents is with traffic volume.

CHAIRMAN: Yes.

PROF JOHN STANLEY: So the higher the volume you have, the more accidents you are going to have, and congestion is an example of that.

CHAIRMAN: There are more targets to hit, aren't there?

PROF JOHN STANLEY: Indeed, and closer together, so your chances --

CHAIRMAN: The more you have to be aware, if you've got people on the inside, outside, front. So to that extent traffic congestion has a correlation to accident increase; is that the point?

PROF JOHN STANLEY: Yes.

CHAIRMAN: Thank you for that.

I suppose the first point, driver attitude of other drivers, speaks for itself. If other drivers are the ones causing the accidents, then that's why there are more accidents.

Is there no figure that breaks down their assessment, KMB's assessment, of who was responsible for the accidents?

I think in Hong Kong what we have learnt is, at least with KMB, that this kind of assessment of the accidents, I think I am right in saying, began with the insurance department, and of course they attribute culpability as, "Is this one we are liable for; is this one where we are not?" I think this has been the approach.

MR DEREK CHAN: At page 5020 we have a section on "Accidents by cause", and the table is an analysis of the accidents caused by bus captains' blameworthy factors.

PROF JOHN STANLEY: Chairman, the most frequent one in that table is traffic congestion, "Failing to keep safe distance from front vehicle".

CHAIRMAN: Yes. You can do that when there is no congestion, though, can't you?

PROF JOHN STANLEY: It's a bit harder.

CHAIRMAN: I have looked at a Mobileye 6 collision, in fact of course being an advert for the product collision was avoided, but there is not much traffic around and the danger is still there.

PROF JOHN STANLEY: Indeed.

MR DEREK CHAN: Unless there is anything else I can assist the committee with --

CHAIRMAN: No. Thank you for that endeavour.

MEMBER LO: I just have two questions. Thank you for all the information.

One question regarding the -- given all the context in Melbourne, perhaps we can learn something in Hong Kong. Who are the main drivers of new initiatives, technologies or otherwise, that would have an implication for bus safety? Are they operators, government committee, or who are the people driving?

PROF JOHN STANLEY: I would say that comes from two sources. One is from the vehicle manufacturers, companies like Volvo, Scania, Mercedes. I think they are very conscious of trying to get an edge in the safety space at the moment, and really looking for that.

The other then is particular operators, and I quote the example in my report of ComfortDelGro, who is a Singaporean operator who operates in Melbourne, who have installed the Mobileye technology, Chair, you just

mentioned on their buses in Melbourne and in Singapore, and they are really consciously looking out for ways in which they can improve safety and their attitude is very much, "If it's not good enough for our own family, then it's not good enough for our business". So they judge safety decisions on that basis.

So it's both. It's the operator sometimes, more for retrofitting or after-market solutions. But it's the manufacturers in terms of what's embedded in new vehicles.

MEMBER LO: Even though there's no explicit safety-related KPIs in their system, they do it voluntarily?

PROF JOHN STANLEY: Yes.

CHAIRMAN: But presumably in that calculation -- and this is a matter I suggested earlier on -- there is a cost to bus operators having accidents, is there not? The bus is out of operation, they may be left out of pocket from the damages, never mind the loss of use of the vehicle, and so on?

PROF JOHN STANLEY: Certainly. In terms of fitting of after-market equipment, that's certainly true. I think it's about the safety of their customers, but it's also about business costs and part of the same process, and I think one of the benefits of that technology like the Mobileye technology is it's -- I think the cost in

Melbourne is something like A$1,500 per vehicle to install that equipment, and you would think that's a pretty good investment in terms of --

CHAIRMAN: Yes, because that would easily be exceeded by the cost of an accident, and damages you have to pay for the person injured --

PROF JOHN STANLEY: Indeed.

CHAIRMAN: -- damages to the vehicle, loss of the use of the vehicle.

PROF JOHN STANLEY: Indeed, and my view is you will see that being built into the new vehicle, it's starting to already, because it is such a sensible thing to do.

CHAIRMAN: Yes.

MEMBER LO: The other question I have is given a public entity like Transport Safety Victoria, how would we ensure that it will perform its best and it's not just another bureaucracy that looks at numbers? Are there targets given to them to achieve, or is there any incentive or motivation for them to do their best?

PROF JOHN STANLEY: I don't know whether there are any targets that have been set to them. I will have a look at that and come back to you on that, Professor. But rest assured that because they are regulating bus operators, the bus operators will be doing all they can to make sure that the Transport Safety Director is

performing the task in a vigilant way and not becoming just another bureaucracy.

So I think there's accountability in the sense to the customer, and the customer will be doing all that they can do to make sure that the authority is genuinely serving the role that it's supposed to be serving.

At the moment, there is a very good relationship between the Transport Safety Director and the operators, because I think they both understand that their interest is in trying to build a stronger safety risk management culture and that they can do that better together. But as for specific KPIs on the organisation, I will speak to the director when I get back to Melbourne, provided the storm lets us out, and come back to you on that one.

MEMBER LO: Sure. Thank you.

CHAIRMAN: Mr Chan, is there anything arising from those questions?

MR DEREK CHAN: Not from me, Mr Chairman.

CHAIRMAN: In which case, Professor, although we have gone slightly over time, the estimate has been rather accurate as to the time we required.

It remains for us to thank you very much for the assistance you have given us, in particular in this oral session where, having had the benefit of your report, we have been able to establish what, to our mind, are the

matters that are particularly relevant, having regard to the evidence that we have received, to Hong Kong, and that's been of considerable assistance, and we look forward to receiving whatever else it is that you might feel is appropriate for us to receive.

With those words, we thank you for your assistance and wish you a safe travel home.

MR DEREK CHAN: Thank you, Chair and members.

CHAIRMAN: Whenever that might be.

PROF JOHN STANLEY: Thank you very much.

CHAIRMAN: Thank you.

(5.38 pm)

(The hearing adjourned to a date to be fixed)

EXPERT EVIDENCE OF PROF JOHN STANLEY 1

Examination by MR DEREK CHAN 1

[Blank Page]

2018 年 9 月 15 日

上午 10 時正恢復聆訊

出席人士： Hon Mr Justice Michael Lunn（倫明高），香港專營巴士服務獨立檢討委員會主席

歐陽伯權先生，香港專營巴士服務獨立檢討委員會委員

羅康錦教授，香港專營巴士服務獨立檢討委員會委員

陳政龍大律師及黃佩琪大律師，由高露雲律師行委聘，代表香港專營巴士服務獨立檢討委員會

Professor John Stanley，悉尼大學商學院運輸及物流研究學院客席教授（委員會委任的專家）

主席：（經傳譯員）早晨，Stanley 教授，歡迎你嚟香港，多謝你向委員會提供協助，交咗兩份報告畀我哋，亦都多謝你同意嚟呢度做口述證供，等我哋可以探討你報告嘅內容，特別當然就係同香港相關嘅，我哋會向你提問題，由我哋嘅律師陳律師向你提問嘅，請佢而家開始，就係陳政龍律師。

陳先生：（經傳譯員）係，唔該主席，早晨，主席。首先，可唔可以講一講你嘅背景呢？就係你個人嘅背景，就去你嗰個嘅履歷嗰度，喺我哋嘅專家證人文件夾嘅第 107 頁。我哋睇到喺你嘅履歷嗰度，你係 1969 年開始你嘅事業，喺 1980 至 1999 年，你就係 Principal John Stanley and Associates Pty Ltd 嘅主事人，請問你可唔可以講一下你公司當時係做啲咩嘢工作？

MR JOHN STANLEY：（經傳譯員）我哋係做一啲顧問嘅服務嘅，就特別係畀政府嘅，喺聯邦政府同埋喺州政府嘅層面都有做，主要就係講話運輸嘅，譬如話域多利州政府關於嗰個載重嘅規定等，我哋都提意見嘅，同埋港口亦都係塔斯曼尼亞州政府，我哋都做咗啲關於港口嘅諮詢工作，同埋向當地嘅議會，亦都會係畀啲意見係關於話道路系統係點嘅，唔係話做咁多關於公共運輸嘅，直至去到 1990 年代，當時就係講話運輸嗰方面嘅道路空間嘅問題，嗰陣時就做好多嘅諮詢工作係關於道路經濟學嘅，特別係呢方面嘅工作。

陳先生：（經傳譯員）喺 1991 至 99 年，你就係國家道路運輸委員會嘅副主席，而 1999 至 2008 年就係維多利亞巴士協會嘅執行董事，請你可唔可以介--講一講你喺嗰度做啲咩嘢工作，執行總監？

MR JOHN STANLEY：（經傳譯員）係，我哋係 1991 年成立呢個國家道路交通委員會，就主要係想改革澳洲嘅道路運輸嘅安全同埋各個方面，嗰啲職責主要就係州政府嘅職責嚟嘅，即係話係州政府同埋聯邦政府共同成立呢個委員會，就可

以喺全國施行一啲一致嘅法例，就除咗係本州自己嘅道路系統之外，就定一啲譬如話嗰個汽車嘅重量嘅限制，嗰個載重嘅規定等等，都係即係話做管理方面，呢個係重要嘅一環嚟嘅。

同埋亦都我要代表我哋嘅業界嘅代表，就我哋個成員就有五百人，就要講話佢哋同州政府嗰啲合約，當時嗰個價值每年係有九億澳元嘅，我就係主要負責同--即係要同州政府去商討佢哋嘅合約嘅，而喺我嘅報告裏面都有提到，巴士業喺澳洲嚟講，係接受州政府嘅大量嘅資助嘅，我作為執行總監，主要就係要整體咁樣評估運輸嗰個價值，同埋亦都係牽涉一啲工作，就話睇下喺巴士喺社會融合方面扮演咩嘢嘅角色嘅，我太太其實都係做呢方面嘅工作，咁又睇下點樣可以減少擠塞同埋巴士喺改善環境方面又可以扮演咩嘢角色等等嘅，呢個都係話喺要制定政策嗰方面，就要確保係一致。

我哋亦都係協助啲商業公司，譬如其中一位嘅巴士營辦商就係做道路安全嘅檢查，即係喺維多利亞嗰度譬如係檢測嗰啲巴士嗰啲等等同埋類似其他嘅活動，其實我哋亦都係已經係本來由政府做嘅巴士檢測嘅工作嘅，而家係由我哋嚟做。

主席：（經傳譯員）呢個巴士協會有啲咩嘢成員呀？

MR JOHN STANLEY：（經傳譯員）佢哋就係嗰啲定線巴士嘅服務營辦商，咁就維多利亞喇，亦都有學校巴士嘅營辦商，其實大部分都係嗰啲嘅，因為通常如果巴士--即係學校嘅承辦商通常都係得好少量巴士，所以嗰個數目係比較多嘅、大嘅。但係當然如果講話合約價值大嘅，就係定線巴士服務。

主席：（經傳譯員）總共有幾多個成員呀？

MR JOHN STANLEY：（經傳譯員）就有五百名成員，我走之後，就係降咗少少，因為有啲嘅業務佢哋整合咗。

主席：（經傳譯員）可唔可以講一講協會有幾多職員呢？

MR JOHN STANLEY：（經傳譯員）我哋有五十個職員，當我離職嘅時候，就包括例如話十至十二名職員就係嗰間做檢驗車輛嘅公司，我哋亦都有自己嘅稽查主任，就負責係僱用稽查喺巴士上面工作。同埋我哋亦都有一組係服務成員嘅，即係佢哋會花好多時間同成員傾偈，即係處理佢哋嘅事或者係幫佢哋聯絡政府等等，就係因為佢哋負責係提供呢啲服務。

主席：（經傳譯員）如果係巴士公司收到車資，邊個係得益嘅？

MR JOHN STANLEY：（經傳譯員）係畀政府嘅。

主席：（經傳譯員）即係話做稽查工作係代表政府做，因為政府係最終接收嗰啲車資嘅人，係咪呀？

MR JOHN STANLEY：（經傳譯員）係。

陳先生：（經傳譯員）教授，你提到話喺你做國家道路運輸委員會嘅時候，你就係講到話係駕駛一啲--你會負責處理一啲駕駛規例，我相信係駕駛時數，係咪呀？包唔包括埋重型車輛呀？

MR JOHN STANLEY：（經傳譯員）國家道路運輸委員會處理嘅車輛就係 4.5 公噸以上嘅車輛嘅，可能係一啲嘅貨車，其實貨車嘅數量係比巴士多好多嘅，所以通常委員會主要處理都係關於貨車嘅問題，但係亦都可能同巴士有啲關連，當時澳洲最大嘅問題就係各個主要嘅大城市，譬如係悉尼、墨爾本，如果啲貨車要一次咁去，佢嗰個其實揸個距離係好長嘅，所以我哋就要睇下應該係點樣為之安全嘅駕駛距離等等，所以呢個過程好重要，但係同時都會一併就睇埋巴士嘅情況嘅。

主席：（經傳譯員）呢個委員會係聯邦委員會嚟㗎？

MR JOHN STANLEY：（經傳譯員）係一個國家委員會，全國委員會，其實係根據聯邦法例成立嘅，我哋要負責嘅就係聯邦嘅部長同埋所有州嘅部長，即係話所有四十五個部長，我哋要向佢報告嘅。

陳先生：（經傳譯員）教授，喺 2008 年你做咗客席教授，亦都係巴士業聯盟嘅高級研究人員，又喺悉尼大學嗰度，即係呢個係悉尼大學嘅工作嚟嘅，咁又會做一啲研究生嘅教學同埋研究工作？

MR JOHN STANLEY：（經傳譯員）係，我係負責一個運輸管理嘅碩士學位課程嘅，我哋其實有都當時有唔同嘅呢類嘅碩士課程，我就係教其中一科，就係關於運輸政策，亦都係牽涉關於到巴士政策嘅。

陳先生：（經傳譯員）2012 至 16 年，你就係部長諮詢議會就係向維多利亞嘅規劃部長，即係兩個政府，就係向佢哋提供意見係關於墨爾本都會規劃策略問題？

MR JOHN STANLEY：（經傳譯員）其實主要更多嗰個係講話土地用途嘅規劃，喺第一份報告我都有提及嘅。我哋有二十--當時就係有一啲嘅運輸規劃嘅，需要整合嘅，有一個--所以有一個部長嘅諮詢委員會，就向佢提供意見話維多利亞長遠嗰個土地規劃應該係點樣做，亦都包括一啲嘅運輸策略嘅，我係嘗試想制定一份嘅運輸策略，但係當時唔知咩理由，政府就唔想包括--即係喺呢個長遠嘅土地規劃裏面包括埋呢個運輸策略，喺新嘅政府又再次委任我哋而家係繼續做呢個工作嘅。

陳先生：（經傳譯員）你就列出喺 107 頁呢度第一部你列出你有一啲嘅董事嘅工作，可唔可以講一講邊一啲嘅--呢啲工作係同運輸或者係巴士政策有關㗎？

MR JOHN STANLEY：（經傳譯員）我係維多利亞嘅國家服務委員會嗰陣時候，佢哋就叫我哋睇番道路同埋公共運輸政策之間嗰個關係，我就做咗一份報告，就建議有一個新嘅管治嘅安排，就係關於道路同埋公共運輸嘅。而另外仲有一個機構，Metlink 就係關於係公共運輸嘅推廣嘅，我哋就係一啲系統層面做一啲推

廣工作，由個別嘅營辦商就會做自己嘅推廣運動，當時我亦都係公共運輸申訴專員嘅辦事處嗰度嘅，就話如果有啲乘客佢哋覺得有啲咩嘢投訴係關於啲承辦商嘅，就會去到呢個申訴專員嗰度。

陳先生：（經傳譯員）你做呢個工作，即係喺申訴專員方面嘅工作做咗幾耐？

MR JOHN STANLEY：（經傳譯員）我要估一估，但係我諗係大概四年喽。

陳先生：（經傳譯員）大概喺邊段時間呀？大概喺邊段時間，邊幾年呀？

MR JOHN STANLEY：（經傳譯員）應該係 199--2004 至 2008 年，應該係，而家我就係道路安全檢查嘅委員會嗰度嘅，就係同嗰個巴士協會係保持一個距離，可以咁講，就係佢哋就係每年為所有嘅重型車輛同埋巴士做檢驗嘅，每一年都會佔咗維多利亞整個巴士數量百分七十五都係我哋檢驗嘅。

主席：Is that in respect of the mechanical side of buses?

MR JOHN STANLEY：It is, Chairman.

陳先生：（經傳譯員）你做咗呢間公司嗰個董事協會成員做咗幾耐？

MR JOHN STANLEY：（經傳譯員）大概七年。

陳先生：（經傳譯員）七年即係由今日數番轉頭七年，係咪呀？

MR JOHN STANLEY：（經傳譯員）係。

陳先生：（經傳譯員）好喇，再落下一頁 108 頁，你就列出你有好幾頁嘅一啲報告、文獻或者係書本嘅章節等等，係你寫嘅，我就冇打算全部去睇，因為好多。你可唔可以特別指一指出一啲例子，就係同巴士政策有關嘅呢？

MR JOHN STANLEY：（經傳譯員）當然，可以。主要有兩、三個課題嘅，第一，就有寫過一啲文章，就係關於公共運輸嘅價值，就係 2017 年，呢本書就係“How Great Cities Happen”嗰度，就係講話公共運輸可以扮演啲咩嘢角色，跟住喺知道--下一個文章，跟住下面呢份就話嗰個價格要定得啱，即係使用道路嘅代價要定得啱。然後亦都有一份 2017 嘅報告，就係話點樣係令人可以流動到，即係要做制定政策者要考慮嗰啲解決方案，呢個有“Moving People: Solutions for Policy Thinkers”。

又有睇下公共運輸點樣可以令到一個城市生產力能夠好呢，佢個扮演角色係點，亦都係有提及。然後 2016 年，Stanley J and Levinson 嗰份文獻就係話可持續嘅資助嘅形式，因為當時三年前有一個嘅會議係每兩年開一次嘅，係國際嘅，當次就係講話公共運輸嘅競爭同埋規管嘅，我係其中負責主持一個工作坊嘅，喺嗰次嘅國際會議裏面，所以呢度我亦都係有發表一份文章。就睇公共運輸嘅好處喺邊度，同埋可以點樣去資助呢啲服務，所以喺嗰度係特別有提。

再落去兩張，就係話令人流動呢？即係點可以令到啲人可以流動嗰方面，決策者要考慮嘅解決方案等等。同埋比較深入咁探討就係巴士嗰個合約嘅制度係點樣處理，譬如話係公開投標吖，定係通過商討去定個合約，亦都係睇話有啲乜嘢嘅主要嘅表現、指標要定呀咁樣，即係關於巴士服務。同埋又話公共運輸喺社會融合同埋推動更公平社會方面扮演嘅角色。

再落，有份 2015 年嘅報告，亦都係繼續話即係點樣令人流動，決策者要考慮嘅方案等等。就係講話墨爾本佢想定一個策略令到所有人都可以嚟佢哋最需要常去嘅地方都只係二十分鐘嘅，可以係行路、踩單車或者係用公共交通嘅方式等等，就令到公共運輸可以--呢個文章就講話點樣可以公共運輸扮演一個大啲角色。

下一份文件就係講話公共運輸嘅角色係點樣可以推動發展密度做得更加好，特別係喺澳洲城市嘅一啲中部嘅市郊地方。就係亦都講埋嗰個--睇埋嗰個嘅管治嘅安排，就係點樣係從政府角度睇，點樣係運用個土地等等嘅。

陳先生：（經傳譯員）或者我可以咁樣總結，你好多嘅文章都係講政策嘅？

MR JOHN STANLEY：（經傳譯員）特別係講政策，因為政策主要係我嘅關注嘅地方，同埋策略規劃，點樣可以去執行嗰個政策嘅。

陳先生：（經傳譯員）睇番你嘅背景，你所寫過嘅文章，你所做嘅研究，你點樣會形容你嘅專才係乜嘢呢？

MR JOHN STANLEY：（經傳譯員）講到話今次嗰個委員會要睇嗰個課題，我諗我可以畀嘅專才，就係關於話公共運輸政策同埋管治，就係講到城市嘅規劃，當然亦都牽涉到運輸，譬如你講話巴士，其實就係話嗰個管治同埋架構上嘅安排就可以令我哋提供到巴士服務，同埋有啲嘅政策嘅安排令到真係可以提供呢啲服務，可以話係令到巴士能夠最好咁樣達到政府所定嘅目標，係為公眾利益、社會利益嘅，所以我主要就喺呢方面。你話講到運作，就係點樣可以去設立嗰個架構等等嚟做到呢樣嘢。

陳先生：（經傳譯員）喺你第二個報告都係寫得好清楚，喺一開始嘅時候，或者我想講一講，係第 56 頁嘅，係專家文件，主席，我睇緊第 56 頁，大概中段嗰度。教授，你嗰度就講話喺巴士嘅營運方面你唔係專家，但係你嘅專才就係喺嗰個架構方面，不如你係讀...

主席：（經傳譯員）你指邊一段？

陳先生：（經傳譯員）唔好意思，我係讀緊...

主席：（經傳譯員）讀佢出嚟，即係將相關嗰一段讀出嚟。

陳先生：（經傳譯員）你喺呢度就話你唔係巴士營運方面嘅專家，但係你有一啲關於嗰個嘅架構嗰個環境，就係關乎巴士點樣運作同埋點樣能夠影響嗰個表現，呢

Transcript by Epiq Hong Kong, Limited

方面你係有專才嘅？

MR JOHN STANLEY：（經傳譯員）係。

主席：（經傳譯員）好，唔該。

陳先生：（經傳譯員）唔該你，教授。除非你喺你嘅背景方面仲有啲咩嘢補充，如果唔係，我就進去下一步。就係你所收到嘅要寫呢兩個報告嗰個指引嘅背景，我想請你睇第 4 頁，專家嘅文件第 4 頁，喺第二段，第 4 頁，第二段，你就係睇到你寫呢兩份嘅報告係要個範圍係乜嘢，喺第二點嗰度話我哋邀請你去描述墨爾本嗰個嘅巴士服務嗰個嘅制度同埋管治嗰個嘅安排，特別就係喺去監察巴士安全呢方面，呢個係你第一份報告個範圍嘅，喺我哋嘅專家文件夾裏面有嘅，喺第二點嗰度，我哋請你--我哋已經畀咗關於香港專營巴士服務嘅文件你，如果係需要嘅話，就係同我哋嚟到去總結一下嗰個制度。

考慮到墨爾本嗰個巴士制度，就係畀啲意見，我哋香港嗰個嘅規管同埋監察制度係咪足夠呢？亦都畀我哋一啲建議，係有邊啲需要改善，你認為係可以係必須要做到去改善香港專營巴士服務嘅安全嘅，呢個係你第二份專家報告嗰個嘅內容？

MR JOHN STANLEY：（經傳譯員）係，冇錯。

陳先生：（經傳譯員）我就首先係想做一啲比較實務嘅簡單嘅比較，就係墨爾本同埋香港嗰個巴士制度嘅比較，想由第 5 頁開始，係同一項嘅專家嘅報告，第 5 頁，第一樣，大家嗰個不同就係墨爾本同埋香港嘅人口嘅不同，喺第一段，第 5 頁，你就話墨爾本嘅人口係有四百八十萬，喺 2017 年嘅時候，喺第二段，墨爾本係一個相對低密度嘅城市。我嘅理解係咪正確呢？呢個係咪一個都會區抑或大嘅市郊區呢？

MR JOHN STANLEY：（經傳譯員）我哋會係叫佢做一個都會區嘅。另外其他嗰個亦都係有近郊嘅地區。

陳先生：（經傳譯員）講到乘搭巴士嘅次數，我哋睇到最低嗰度，你話域多利政府嘅預算顯示而家墨爾本嘅火車就每年有二億四千嘅人次，電車就二億零五百嘅人次，巴士一億二千萬嘅人次，即係話喺墨爾本公共運輸係每一年都係有五億六千五百萬嘅人次，而巴士係佔百分之二十一次嘅乘客次嘅，係咪？

MR JOHN STANLEY：（經傳譯員）係。

陳先生：（經傳譯員）我就係想用呢個數字同香港方面對比下，香港每年有十四億...

主席：（經傳譯員）呢度十四億喺邊度得番嚟㗎？

陳先生：（經傳譯員）呢個係由運輸署畀我哋嘅總數字嗰度搵出嚟嘅。

主席：（經傳譯員）喺邊一份嘅文件呀？

陳先生：（經傳譯員）稍後我會畀番呢一個參考畀委員會嘅。

主席：（經傳譯員）唔該你。

陳先生：（經傳譯員）咁個參考，係，58 頁，即係你第二份報告書嘅第一部分，或者你攞住嗰個嘅專家文件夾係會好嘅。

MR JOHN STANLEY：（經傳譯員）係呀，非常之好。

陳先生：（經傳譯員）好，第 58 頁就係你第二份報告嘅開頭，喺第一段嘅中部分嘅，就係話「香港嘅 2017 年嘅公共運輸研究就係睇下香港嗰個嘅交通--總括交通運輸嗰個情況，而嗰個嘅專營巴士每一日係有四百萬嘅人次嘅，呢個就係每一日嘅人次，每一年係有一千二百萬嘅，呢個就係四--每一日係四百萬」，將佢乘咗出嚟，成年就係大概十四億嘅人次。

主席：（經傳譯員）唔該。

陳先生：（經傳譯員）教授，墨爾本大概有幾多架巴士喺度營運呀？

MR JOHN STANLEY：（經傳譯員）大概一千七百架嘅，就係有路線嘅服務。

主席：（經傳譯員）點樣界定咩嘢叫路線服務？

MR JOHN STANLEY：（經傳譯員）呢啲係合約嘅服務，係有定班嘅，每一日嘅就係由州政府決定，而且係寫咗喺營運嗰個嘅合約度。

主席：（經傳譯員）唔該。

陳先生：（經傳譯員）咁會唔會包埋，譬如校巴或者係旅遊巴。

MR JOHN STANLEY：（經傳譯員）係唔包旅遊巴，又唔包係一啲特定嘅校巴，但係好多嘅學童都會搭呢啲嘅路線服務嘅。

陳先生：（經傳譯員）好，而家一個一般嘅比較，可唔可以睇下嗰個合約嘅架構，即係墨爾本巴士服務嗰個合約框架同我哋香港係點樣比較。想請你撥去專家文件夾嘅第 7 頁，第三段就係好近尾㗎喇，你嗰度話「而家墨爾本嘅路線巴士服務其實係有一啲係有啲競爭性嘅投標服務嘅，亦都有一啲係經恰商而有嘅服務，有一啲--前者就係政府所提供嘅服務，後者就係開始由一啲私人嘅營辦商，包括呢啲服務嘅延伸或者係增加。」

MR JOHN STANLEY：（經傳譯員）冇錯，陳生，亦都喺呢一個服務裏面，有一啲係叫做係有競爭性嘅投標，我哋叫佢做智慧巴士系統，係長途嘅服務，就喺我哋墨爾本一啲市郊嘅地方，佢哋亦都係成個投標嘅機制嘅一部分，但係係佔好少部分。

陳先生：（經傳譯員）好，大部分--有三分一嘅合約就係經過有競爭性嘅投標，而三分二就係經過恰商之下就有合約。

MR JOHN STANLEY：（經傳譯員）唔係，唔係合約嚟嘅，佢哋其實係一份合約，唔係幾份合約，都係經過有競爭性嘅投標，大概係佔三分一嘅。

陳先生：（經傳譯員）可唔可以好概括咁樣係描述下呢一個有競爭性嘅投標係點樣運作㗎？

MR JOHN STANLEY：（經傳譯員）做一個嘅引子，我就唔係呢一個有競爭性嘅投標，我冇參與嘅，我就唔知道嗰啲合約嘅細節，我喺合約協議方面個角色就係--我就知道嗰啲經洽商嘅合約係點嘅，就係佔咗三分二，唔係三分一。但係嗰個一般嘅程序，如果你問我，就係會政府會請人嚟到表達佢嘅興趣係咪想係投一個服務，而政府就係會指出佢希望呢啲服務裏面有啲咩嘢呢？係有啲咩嘢嘅路線、嗰個嘅班次，如果你咁講，亦都會將嗰個嘅時間表列出，就請一啲營運商就係畀一個價格，佢哋係要求幾多呢，亦都可以話係要補貼去提供呢啲嘅服務，就係嗰啲嘅營辦商去投標，如果你鍾意用呢個字，最低嘅價格去畀政府嘅。

佢亦都--政府可以除咗價格之外，會將呢啲嘅事項係考慮在內嘅，呢個就係營辦商有冇能力提供好個服務同埋係能唔能夠喺一個相當廣闊地方提供種種嘅服務，其實係以一個地區為主嘅服務，除咗就係話我正話講過嘅嗰個一筆嘅或者係比較整體嘅路線服務。

主席：（經傳譯員）除咗呢啲路線之外，係咪話政府係可以定嗰個嘅班次㗎？

MR JOHN STANLEY：（經傳譯員）係，應該係嗰個嘅班次，即係幾耐一班等等、幾時開始、幾時結束服務。

主席：（經傳譯員）我哋未去講呢啲細節嘅時候，我想問有幾多嘅路線係畀嚟投標嘅呢？同埋係幾多次呢？

MR JOHN STANLEY：（經傳譯員）其實只係有一次投標，就包括好多嘅路線嘅，好似係呢一個嘅專營區咁樣，一個嘅合約地區，包括所有呢個合約區裏面所有嘅路線，所以都係相當多嘅，可能三分一嘅路線，我就唔知道總共有幾多個路線，但係可能都有好幾百嘅。呢個就係以地區為本嘅。

主席：（經傳譯員）通常一次嘅專營期係幾長呀？如果可以用呢個字嘅話。

MR JOHN STANLEY：（經傳譯員）通常都係七年嘅，嗰啲洽商嘅合約就可以去到有係七、八個合約--就係可以係有七個嘅。

主席：（經傳譯員）政府就係提供一個合約，會唔會係接受多個嘅投標，亦都接受多個嘅巴士營運商一齊運作？

MR JOHN STANLEY：（經傳譯員）唔會嘅，只係有一個單一嘅營運商嘅？

主席：（經傳譯員）一個，單一？

MR JOHN STANLEY：（經傳譯員）係。

羅先生：（經傳譯員）嗰個經洽談嘅合約同埋嗰個投標嘅有咩嘢唔同㗎？

MR JOHN STANLEY：（經傳譯員）嗰啲要經過洽商嘅合約就係五十、六十年係私人嘅營辦商已經開始咗有㗎喇，佢而家都係仲有嘅，大概係1970年就停咗，當時有一個嘅服務嘅改變，一路有一啲嘅洽商，就係由服務開始同埋政府去繼續係成個過程裏面提供服務嘅，佢某個階段，政府就係想接收咗呢啲洽商嘅服務，而將佢哋去有競爭嘅投標，結果就係去到澳洲嘅聯邦法庭，最後營辦商係勝訴嘅，即係關乎嗰啲嘅法律細節，但係而家仍然喺度談判之中。但每一次佢哋處理就係每一次嗰個合約都冇講到合約圓滿之後係點樣做嘅，下一組嘅合約就係啱啱開始咗，都係七年期嘅，佢哋亦都冇講過七年期滿之後會點嘅，業界就係好有信心佢哋可以繼續再有另外一次嘅談判，政府又可能亦都唔同意嘅。

羅先生：嗰啲嘅洽商會唔會係換咗嗰個營辦商？

MR JOHN STANLEY：（經傳譯員）唔會嘅，其實呢個係關乎決定嗰個價格、點樣嚟提供呢啲服務，譬如話係大家要同意一啲主要嘅服務指標同埋有啲咩嘢誘因，又有咩嘢懲罰嘅條款喺呢啲合約裏面，亦都有關於車長嘅訓練咁樣。

主席：（經傳譯員）你會唔會話嗰啲主要喺度恰商嗰個因素只係嗰個價格嘅啫，就係話政府要畀幾多錢呢間公司去提供呢個服務，呢個所謂補貼？

MR JOHN STANLEY：（經傳譯員）冇錯，呢個就係成個合約嗰個嘅價格，政府就係畀所有嘅錢畀晒呢一個嘅營辦商...

主席：（經傳譯員）因為政府就係--即係嗰啲車資嘅收入可以保留，係咪？

MR JOHN STANLEY：（經傳譯員）冇錯，呢個就係呢一個點樣嚟到定出個基準，有啲好詳盡嘅基準，嗰個營辦商嘅成本，亦都試下睇下喺某啲嘅地方，係咪有啲嘅營辦商係特別係成本高或者特別低，佢哋就去討論下乜嘢叫做合理嘅幅度嚟到去計算呢個成本，因為有時嗰個營運商係會減嘅，因為減低呢個薪酬，因為可能佢哋嘅成本相對其他嘅同業係太高嘅。

主席：（經傳譯員）有冇試過係同一個做緊嘅營辦商達唔到協議，就要將嗰個合約畀另外一個營辦商呢？

MR JOHN STANLEY：（經傳譯員）我就唔知道有咁嘅情況。

主席：（經傳譯員）呢個制度係咪自從1970年代已經開始？

MR JOHN STANLEY：（經傳譯員）自從1970年代已經係呢個補貼，嗰個焦點就係嗰啲經洽商而出嘅合約，大概有三、四十年㗎喇，我就唔係好知道1970年代或者1980年代嘅早期嘅歷史，不過應該自從1980年開始都係咁，好似我正話去向你描述咁樣嘅。

陳先生：（經傳譯員）關於嗰個競爭嘅投標，而家墨爾本嗰個嘅巴士營辦商係得到呢一個嘅合約，係咪呀？

MR JOHN STANLEY：（經傳譯員）等我諗下先，諗下，應該係法國嘅公司，係叫做...

主席：（經傳譯員）點樣串呀？

MR JOHN STANLEY：（經傳譯員）T-R-A-N-S-D-E-V。

陳先生：（經傳譯員）呢個營辦商係經營呢一個競爭性投標得到嘅合約已經幾耐㗎喇？

MR JOHN STANLEY：（經傳譯員）佢哋做過一次咁樣嘅投標，之前由另外一間公司係贏取嘅。

陳先生：（經傳譯員）就係可唔可以串出嚟嗰間咩嘢公司？

MR JOHN STANLEY：（經傳譯員）V-E-N-T-U-R-A，就係之前喺競爭性投標嗰度中標嗰間公司，跟住 Transdev 就中咗標，我諗就喺嚟緊十二個月又會有另外一次嘅投標㗎喇。

陳先生：（經傳譯員）就係其實一個競爭性嘅投標程序就令到係個營辦商換咗？

MR JOHN STANLEY：（經傳譯員）冇錯。

主席：（經傳譯員）你就話 Transdev 係一間法國公司，係咪呀？

MR JOHN STANLEY：（經傳譯員）係。

主席：（經傳譯員）佢哋喺世界其他地方有冇提供巴士服務？

MR JOHN STANLEY：（經傳譯員）好似大部分都係法國嘅，我諗喺澳洲其他地方佢哋都有提供巴士服務嘅。

陳先生：（經傳譯員）好，而家講番嗰個競爭性投標嗰度，本身專營商有冇轉過手？

MR JOHN STANLEY：（經傳譯員）去番 1998 年，墨爾本市係世界上首個城市去私有化個火車服務，我哋嘅火車、電車，同埋有三分之一嘅競爭性投標路線同時間係公開投標，本身係有兩個標做火車，兩個標做電車，一個做巴士，一個英國公司叫做 National Express 係其中一個重要火車中標經營商，其中一個三年內就交回嗰個合約。而另一個火車同電車嘅中標者，本身就攞晒--同時間營運火車同電車。

主席：（經傳譯員）喺 1998 年係邊個中標呢？

MR JOHN STANLEY：（經傳譯員）應該係 National Express，佢哋係嗰年中標嘅。

主席：（經傳譯員）係咪七年合約呢？

MR JOHN STANLEY：（經傳譯員）唔記得喇，主席。

主席：（經傳譯員）Ventura 係咪嗰個繼承營運商呢？

MR JOHN STANLEY：（經傳譯員）我要再查番佢哋幾時去接手嗰個合約。

主席：（經傳譯員）所以你辨認咗巴士方面有三個唔同嘅營運者？

MR JOHN STANLEY：Yes.

主席：（經傳譯員）Transdev、Ventura 同 National Express？

MR JOHN STANLEY：Correct.

主席：（經傳譯員）有冇第四個呢？

MR JOHN STANLEY：（經傳譯員）可能 National Express 同 Ventura 之間可能中間有另外一個經營者，可能係其他經營，National Express 交換牌照之後，喺未重新投標前可能有其他營運商臨時接手嘅，我會之後答覆你嘅。

主席：（經傳譯員）我有冇理解錯誤，就係 National Express 佢嘅服務冇法履行佢成個合約期？

MR JOHN STANLEY：（經傳譯員）係。

主席：（經傳譯員）然之後有其他人接手？

MR JOHN STANLEY：（經傳譯員）係。我喺之後會講番其中一個競爭性中標嘅制度就係佢哋鼓勵--就係個入標價就太低，就係希望佢哋--希望政府之後可以同佢哋再協商個價格。喺個 National Express 嘅情況，嗰個--我哋之前嘅文件講過就話 National Express 佢哋同政府商量過，至今方面就係淨係得一個，同埋佢哋決定唔會再繼續。

主席：（經傳譯員）有關於個巴士嗰方面，就係個 National Express 本身就冇成功協商到，令到 National Express 留低？

MR JOHN STANLEY：（經傳譯員）冇。

主席：（經傳譯員）佢哋係咪終止合約？

MR JOHN STANLEY：（經傳譯員）係嘅。

陳先生：（經傳譯員）有關嗰個香港每日四百萬人次，大約每年十四億嘅巴士人次，呢個係嗰個運房局，第 103 頁，係 2017 年 12 月嘅數字，教授，呢個就係嗰個競爭性投標制度，而家睇番嗰個...

主席：（經傳譯員）或者喺離開呢部分之前，呢個競爭性中標嘅特點係乜嘢？競標制度嘅特點係乜嘢？

MR JOHN STANLEY：（經傳譯員）主要係嗰個鼓勵同埋罰則條款。主席，我本身冇參與過協商過程，所以我無法評論嗰啲罰則同埋獎勵條款。

主席：（經傳譯員）呢啲係咪公眾文件呢？

MR JOHN STANLEY：（經傳譯員）當佢公開嘅時候，大部分都係刪走嘅。

陳先生：（經傳譯員）所以你冇辦法講番譬如嗰啲鼓勵同埋懲罰條款會唔會同安全又係有關呢？

MR JOHN STANLEY：（經傳譯員）我唔可以講話係咪同安全直接，主要係有個澳洲背景，就係話冇喺維省，就話有啲條款係直接係關於巴士安全嘅有關罰則同埋獎勵條款方面。

陳先生：（經傳譯員）呢啲係主要係表現指標？

MR JOHN STANLEY：（經傳譯員）主要係關於營運嘅個表現，譬如話準時、取消班次，呢啲係主要世界上嘅交通系統嘅重點，有陣時會擺一啲嘅乘客滿意度調查，譬如話乘客嘅意見，呢啲係通常係鼓勵同埋懲罰條款方面常見嘅。

陳先生：（經傳譯員）我可能我唔覺意去中斷你，你係回答番主席有關於嗰個競標制度嘅主要特點喇。

MR JOHN STANLEY：（經傳譯員）個主要重點，大部分嘅合作元素，其實兩--協商同埋競標個制度大部分都一樣，主要係嗰啲佢哋啲條款都比較相似。

主席：（經傳譯員）而嗰個協商合約相比喺嗰啲香港嘅專營巴士協議係比較詳盡嘅？

MR JOHN STANLEY：（經傳譯員）佢哋係無法置信咁長嘅，我嘅記憶嚟講，香港嘅專營巴士協議大約有三十一、三十二頁嘅，相比墨爾本嘅協商協議大約係一百六十頁，仲有其他嘅附表呀咁樣。

陳先生：（經傳譯員）教授，你講番嗰啲協議合約，想探討下，不如少少總結，你睇番嗰啲協商合約都同嗰啲競標制同合約都好相似嘅，可唔可以肯定就話嗰啲協商合約，政府亦都係會負責收取車資呢？

MR JOHN STANLEY：（經傳譯員）係。

陳先生：（經傳譯員）而個營運商係畀錢去營運呢啲服務？

MR JOHN STANLEY：（經傳譯員）呢啲合約主要係嗰啲成本就附加，本身係有啲所謂鼓勵同埋罰則條款喺度，所以營運商根據議定嘅款項去營運呢個服務，然之後仲有呢啲鼓勵同埋罰則條款本身個金額唔係咁大，但係主要係嗰個分別就會令到你會有動力去達標。

主席：（經傳譯員）你可唔可以估計嗰個變數方面個百分比？

MR JOHN STANLEY：（經傳譯員）主要係有兩個元素，第一個就住嗰個乘客人數鼓勵，如果個人數係比個指標率高過，就會係有獲得個獎勵，然之後就有個營運表現制度，譬如話準時、班次取消等等，你擺呢啲嘅因素一齊，就要係大約百分之二至三--百分比二至三。

主席：（經傳譯員）呢個係個獎勵喇？

MR JOHN STANLEY：（經傳譯員）係，即係有獎有罰，可以上落百分之二至三，唔係好多，但係呢啲合約本身個盈貿率大約有百分之十左右。

主席：（經傳譯員）唔該。

陳先生：（經傳譯員）大約喺呢啲協商制度度入面有幾多個營運者呢？

MR JOHN STANLEY：（經傳譯員）大約有十五個合約，十二個營運者，我擬定合約嗰時，十年前就會多好多營運商嘅，以前有二十六，所以係過去十年係有啲行業整合嘅。

主席：（經傳譯員）佢哋點樣整合嘅呢？

MR JOHN STANLEY：（經傳譯員）主要係佢哋營運商互相收購，其中一間我提及嘅公司，有一間叫做 CDC ComfortDelGro 係本身喺新加坡都有營運嘅，好似倫敦都有，佢哋收購市場份額，Ventura，之前提及喇，本身亦都收購咗一間比較大嘅營運商，而有啲小型嘅營運商亦都係畀比佢大嘅公司收購，所以大約一半嘅營運商係過去十年畀人收購咗，我哋都會繼續睇到個營運商數目會持續減少。

陳先生：（經傳譯員）响個政策角度睇，你睇唔睇到係有咩嘢原因就話會令到個營運商個數目會減少呢？

MR JOHN STANLEY：（經傳譯員）本身對某啲公司嚟講，成本方面係會有益處嘅，如果擴大規模，就會個控制成本有幫助，有啲營運商比較細，有啲大型，本身佢嘅購買市場份額，等佢哋可以再擴展業務。

陳先生：（經傳譯員）當你講番創造利益，就係話主要係個規模效益呢？

MR JOHN STANLEY：（經傳譯員）一部分都係歸因於--呢啲如果係家族企業，譬如話下一代唔想繼承，有個幾有趣嘅例子，一個叫 Grenda Corporation，本身喺墨爾本一間比較大嘅公司，本身係都係幾代人做㗎喇，亦都下一代決定就話唔想繼續營運，所以就將佢賣咗，喺個出售過程，佢哋將三分之一嘅營運收入畀佢哋嘅職員，呢樣係非常之慷慨嘅。

主席：（經傳譯員）總括嚟講，一千七百架專營巴士本身係由三分之一畀個目前成功嘅營運商，其他嘅就係...

MR JOHN STANLEY：Transdev.

主席：Then the other two-thirds are divided up by 12 operators?

MR JOHN STANLEY：Correct.

主席：（經傳譯員）譬如話最大一間嘅營運商本身係營運幾多間巴士呢？

MR JOHN STANLEY：（經傳譯員）大約五百架左右。

主席：（經傳譯員）Transdev？

MR JOHN STANLEY：（經傳譯員）可能大約五百嗖，我懷疑 Ventura 都大約有三、四百架嗖，CDC 本身大約都有四百架左右。我可以之後回覆番個數字。

主席：（經傳譯員）如果個投標過程大約五百，本身有一千二百架就有其他營運商瓜分，但係兩間大約係佔大部分路線。

MR JOHN STANLEY：（經傳譯員）大約三間嚟講，都佔一個好大比例。

歐陽先生：（經傳譯員）教授，可唔可以話畀我聽一間細嘅營運商本身會有幾多架巴士嗖呢？

MR JOHN STANLEY：（經傳譯員）大約三、四十架。

歐陽先生：（經傳譯員）三、四十架巴士？

MR JOHN STANLEY：（經傳譯員）然之後有啲淨係得一、兩架--係一、兩個營運商。

陳先生：（經傳譯員）講番墨爾本，譬如話嗰個基建、車廠同埋嗰個維修設施，如果將嗰個營運商轉換嘅時候，喺個競標制度轉換嘅時候點做呢？

MR JOHN STANLEY：（經傳譯員）個合約會指明就話呢啲資產係點樣會處理嘅，而亦都安排亦都係嗰個協商合約方面，本身擁有車廠本身係畀一個有利位置，因為係喺特別市區係好難起一個新車廠。而家政府亦都比較關注，因為有機會就話有確保競爭，如果你協商合約方面就比較難啲有競爭，由於嗰啲協商合約嘅營運商比較關注就話佢哋嘅服務--路線會畀咗出嚟投標，所以佢哋同政府講，就話佢哋嘅資產同埋對於競標制嘅人，就會根據某啲條款，係會畀嗰個成功中標者，基本上就會將呢啲設施就賣畀嗰個新中標嘅營運商。

陳先生：（經傳譯員）包括巴士？

MR JOHN STANLEY：（經傳譯員）係。

主席：（經傳譯員）巴士站、車廠、巴士本身？

MR JOHN STANLEY：（經傳譯員）係。

主席：（經傳譯員）所以就 Ventura 同埋 National Express 嘅情況係咪咁樣？

MR JOHN STANLEY：（經傳譯員）係，佢哋就淨係轉換巴士上面嘅標誌。

陳先生：（經傳譯員）一般而言，我嘅問題係同時關於競標同埋協商合約方面。譬如嗰啲車，政府所收嘅車資可唔可以收回營運巴士成本呢？

MR JOHN STANLEY：（經傳譯員）大約係百分之二十幾，主要一欽收番兩毫幾子或者再好少少。政府要求營運商畀啲車價優惠，而如果根據番啲特定津貼嚟講，就會百分之三十幾，但係如果一般車資嚟講，大約二十至三十左右。

陳先生：（經傳譯員）喺咁背景下，政府係個津貼巴士營運商都幾大？

MR JOHN STANLEY：（經傳譯員）主要係當我個營運嗰個行業，就會啲力度就話去衡量番社會嘅得益，而我哋嘅同事係估計就話巴士路線對於墨爾本社區嘅利益大約係嗰個所收回成本嘅十多倍，主要係嗰個社會共融，如果你冇一啲近郊區嘅巴士服務，因為呢啲區增長好快，冇呢啲服務嘅話，好多人就冇辦法去參與社會提供嘅一系列嘅活動，我諗淨係呢樣嘢就主要係抵銷番呢啲嘅成本，而巴士亦都係對減少擠塞係好有幫助，呢兩樣嘢絕對係比起津貼嘅效益嘅兩倍。

陳先生：（經傳譯員）呢個係嗰個經濟嘅理據去提供補貼？

MR JOHN STANLEY：（經傳譯員）係，正正係咁。

陳先生：（經傳譯員）可唔可以咁講，呢個補貼部分就係香港同墨爾本嘅分別就係香港就係營運商收車資同埋佢哋負責嗰個財務風險？

MR JOHN STANLEY：（經傳譯員）墨爾本本身知道個社會效益，因為我哋之前係做過一啲計算，就因為我哋計番對社會嘅效益同埋值唔值得係政府去畀咁多錢，呢個係一個可以--香港嚟講，都應該係有用嘅，去量化對香港社會嘅價值，有關於個巴士服務。

主席：（經傳譯員）香港嗰個用者自付制度係有效嘅？

MR JOHN STANLEY：（經傳譯員）係，係嘅，但係亦都係有其他人去受益，譬如話嗰個安全，呢個安全係一個巴士營運嘅一個重大嘅外部因素，所以對我哋嚟講，外部因素都幾緊要去了解嗰個成本同埋個效益，譬如話有一半人去坐專營巴士而轉去坐私家車，本身個安全結果會比較差，所以呢啲係需要去明白嘅。

主席：（經傳譯員）香港模式有效係咪如果個人數呢？

MR JOHN STANLEY：（經傳譯員）我會話係，同埋個密度係支持到嘅。

主席：（經傳譯員）唔該。陳律師。

陳先生：（經傳譯員）係，教授，跟住我哋去講一個相關嘅課題，但係個焦點就會有啲唔同，喺呢個課題下面，我想同你討論嘅就係競標同埋協商合約兩者個優

劣，我唔係話邊一樣係好啲，而係想講每一--探討下每一種方式嗰個優劣。我可唔可以開始就係請你睇一睇專家文件夾嘅 20 頁？即係你第一份報告。主席，唔好意思，講錯咗。

主席：（經傳譯員）係，慢慢喇。

陳先生：（經傳譯員）主席，應該係你第二份報告嘅 20 頁，即是專家文件夾嘅 73 頁。

主席：（經傳譯員）好，唔該。

陳先生：（經傳譯員）喺第 73 頁，你呢度講嘅題目就係專營權同埋係用咩嘢方法去分配服務提供嘅權利，請你睇由尾數上去屘二嗰段，就係開始第一個字係“However”，我會讀出嚟，「但係墨爾本亦都將大概三分之一嘅定線巴士服務用招標方式判出去，就會令到喺表現方面增加咗個壓力嘅元素，對成個定線巴士系統都係，而呢個投標嘅元素就會造成一個效果，就係令到現有嘅營辦商喺--都一直有一個擔心，就話佢哋嗰個協商嘅合約唔係得到保證嘅，所以亦都有個風險可能將來佢哋嗰條線嘅服務係會用投標方式判出去嘅，即係如果佢哋表現得唔好嘅話。而喺香港就冇一個競標嘅制度，即係過去二十年都冇，就顯示喺呢方面個風險，香港可能就係低過墨爾本。」然後請你睇...

主席：（經傳譯員）或者你繼續之前，你就覺得呢個係一個風險，就即係話現有嘅服務承辦商從來都未試過喺協商合約嘅時候係冇咗份合約嘅，係咪呀？

MR JOHN STANLEY：（經傳譯員）係，我諗就有兩方面去睇呢個問題嘅，一方面就要睇嗰個風險同嗰個壓力，即係提供服務嗰個成本嗰度，而真正係競標嘅話，就會令到人會警覺啲，即係要睇下佢嗰個營運個成本係點樣。喺全世界嘅好多地方佢哋都係用競標個方式嘅，就但係好多時候都係由政府提供個服務，就唔係私人公司，而政府決定佢可能係負擔唔到嗰個成本補貼，跟住就要繼續服務，咁就點做，咁睇喇。而我哋如果用競標，通常由一個私人營辦商代表咗公營營辦商，可能嗰個成本就會節省百分之十五至二十嘅。

如果係私人營辦商係一路都係有效咁樣經營緊、提供緊一啲服務，因為營辦權係有值錢嘅，政府基本上就係畀營辦商--畀佢哋自由點樣去營辦，但係佢哋可以賺到一個合理利潤，提供一個好嘅服務，但係如果係競標嘅話，即係有人畀錢政府，可以攞到呢個營辦權。

香港就比較唔尋常，就因為唔係好多地方就可以用呢一個論據嘅，因為呢度嘅服務真係做得咁成功，完全係商業營辦嘅，即係話政府就畀咗個權畀營辦商去經營，咁都係一個可行嘅方法嘅，就嗰個費用會低啲，而營辦商可能亦都會畀啲錢政府去提供個服務咁樣，都可以係咁嘅。

主席：（經傳譯員）好，唔該。

陳先生：（經傳譯員）第二個我哋想睇嘅，就關於話係表現壓力嗰度，就係第 87

頁，即係用競標形式就會有表現壓力，第87頁，相關嗰段就係第一段，嗰頁嘅第一段，就係話「墨爾本嘅定線巴士營辦商，睇嚟係有可能會承擔比較大嘅表現嘅壓力，就係相對於香港嘅專營巴士營辦商，原因就係第(1)，就喺墨爾本經常都存在呢個可以有競標嘅威脅，即係如果佢表現唔理想就會出現；第(2)，就會包括一啲具體嘅獎勵或者罰則條款喺合約裏面；而最重要，從一個安全角度睇，第(3)點，就係有存在安全嘅職責等等。」

或者我先講番第一部分，就係因為有競標喺墨爾本佢個好處係乜嘢，首先講呢點，某程度上，你都解釋咗一部分，或者我可唔可以再問一問你？關於呢個競投或者競標嘅概念，喺香港環境點樣可以用到呢？即係因為香港就係巴士營辦商就收嗰個車費嘅收入嘅，你其實頭先已經開始講咗嘅，之前嘅答案裏面都開始講呢一部分㗎喇，即係頭先你係答主席嘅問題，我知道係有唔同嘅方案可以考慮嘅，你可唔可以解釋下各個方案呢？

因為定線巴士營辦商佢就從乘客嘅車資嗰度就收到佢嘅收入，呢個係個價值好大，你又提到有個可能性就係由承辦商畀錢政府攞得呢個營辦權去提供譬如巴士服務喺一個專營地方咁樣，香港就冇一個競標，但係政府係可以考慮係咁樣做就開放畀人去競投嗰個營辦權，如果係咁競投嘅話，而家因為冇一個價格定咗喺度，點樣用咩嘢基礎去做呢？

MR JOHN STANLEY：（經傳譯員）我未必完全明白你想問乜嘢，但係等我嘗試答。如果政府係咁做，就會話「好喇，而家喺 X 呢個區將現有嘅專營巴士權全部整走，我哋就會邀請邊個想提供服務就嚟入一個標，就話要喺呢個區度提供服務。」而呢個競投可能係講話有一個時間表，即係個班次時間表，政府就可能亦都具體講明話佢哋希望個服務係點樣嘅，然後邀請公司嚟去競投，可能會預計嗰個競標價係會好低，因為政府喺呢方面係唔需要話花啲乜嘢錢，政府係咪最終可以賺到錢呢？譬如可能就係睇佢哋嗰個回報率，然後將其中一部分嘅利潤係交番畀政府，等佢哋可以擁有呢個經營權。

譬如話喺倫敦咁樣，佢哋講緊嗰個利潤--個利率都係好低嘅，即係個回報率好低嘅，而喺倫敦，佢哋嘅做法，佢哋嗰啲合約都係規模細啲，年期短啲，因此就將佢嗰個回報率係撳低咗，所以可能個營辦商就會話「好喇，我而家就係要投標，不過我都唔會降低我個利潤。」而另外一個競投嘅人就可能話「我係會準備--我係願意畀番啲錢政府嘅，即係從呢個合約，因為我就可以賺到錢。」所以政府都會畀佢賺啲錢。所以好難知道話最終嗰個結果係點。

我要講得好清楚一點，我唔係話香港都應該用競投或者競標呢個制度，但係用個假設嘅情況話我哋可以做啲咩嘢呢？畀我呢，我就揀幾條路線，然後就處理，就話呢啲路線我就拎出嚟畀人競投，就會令到個過程都會簡單啲，容易嘅，就係譬如你要點樣處理已經係投放咗嘅資產、投資啲資產等等點樣處理當然係困難，但係原則上其實係做得到嘅，即係畀錢之嘛，就可以買到嗰啲資產，然後嗰個區幾大，又當中有幾多條路線你攞出嚟競投，就係咁考慮。

主席：（經傳譯員）你講話倫敦嗰啲合約個年期好短嘅，我知道倫敦佢哋個招標個合約期係五年，...

MR JOHN STANLEY：Correct.

主席：（經傳譯員）...而有可能延展兩年，但係七年之後就要重新招標㗎喇。

MR JOHN STANLEY：Yes.

主席：（經傳譯員）即係同墨爾本一樣，係咪呀？如果你講七年就。

MR JOHN STANLEY：（經傳譯員）係喇，墨爾本都係五加二--倫敦係五加二。

主席：（經傳譯員）係，我知道。

MR JOHN STANLEY：（經傳譯員）而且佢哋嗰啲合約規模係細啲嘅，我都知道倫敦個情況係咁，就係以路線為本嚟定嗰啲合約嘅。

陳先生：（經傳譯員）我知道當然亦都可以有其他嘅可能性，一個方法就係競投人就建議向政府畀某一個數目金額，就等佢可以營辦咁多條路線喺某個區咁樣，而另外一個可能性就係競投人係提出同政府分享嗰個利潤。

MR JOHN STANLEY：（經傳譯員）係。

陳先生：（經傳譯員）而我諗仲有可能有第三個可能性，就係唔係用競投價，而係完全去評估佢哋可能將會提供個服務嘅性質係點樣樣，如果咁樣去競投，係咪都合邏輯呀？

MR JOHN STANLEY：（經傳譯員）係一般去考慮，即係做競標呢個方式吖，抑或考慮--價格當然係其中一個因素，但係質素係非常重要嘅，而好多時候你會發現好多地方佢哋唔會將個合約畀最低投標價嗰個人，而佢哋睇番個服務，所以服務質素肯定係一個好高嘅要考慮嘅因素嚟嘅，一個重要嘅考慮因素嚟嘅，就係話要睇番嗰個競投人佢能夠提供啲咩嘢服務，呢一點係重要。

主席：（經傳譯員）可能亦都有其他嘅方法，即係個準新營辦商，佢就會話「我比現任嗰個--而家嗰個承辦商，我會將嗰個票價降低百分之十。」從政府嘅角度考慮，就當然會令到公眾得益，咁都可以係一個方法，係咪呀？

MR JOHN STANLEY：（經傳譯員）係呀，絕對可以係嘅。

陳先生：（經傳譯員）好喇，講番嗰個好處，即係競標呢個方式嘅好處，一般嚟講，競標一般可以提供啲咩嘢嘅優勢，即係譬如話係改善到巴士服務嘅安全呢？

MR JOHN STANLEY：（經傳譯員）我諗競標，你哋可能會見到一種情況，佢嗰個競投價係低嘅，然後可能賺唔到錢，可能佢哋個承辦商就話「如果係咁，睇下邊度可以慳到錢。」譬如話係遲啲先做維修、保養，呢個係一個例子。

我喺第一份報告都有提到其中一樣，就係道路安全嘅檢驗，當時都係關注到話有啲巴士嗰個狀況好唔好咁呢個問題，所以我哋當時就話喺競標嘅方式就有呢個問題，當時我哋係向規管當局提出咗呢個問題，個原因就係如果用責任鍊呢個方式，喺墨爾本個法例係咁定嘅，作為檢驗巴士嘅人，我哋就知道如果佢嗰啲營辦商嘅巴士唔合標準，就我哋相信就要喺呢個責任鍊嗰度去處理，如果唔係，就會出問題。

所以我覺得係會有風險嘅，就係你點樣處理，就係話你可能喺做嗰個招標文件嘅時候就好明確訂明嗰個質素嘅準則係點樣樣，同埋要講明嗰個譬如巴士車隊個狀況要維持喺邊度。

羅先生：（經傳譯員）如果我哋係特別明確講出安全係一個考素，應該喺個招標過程裏面加落去呢？即係要講明要安全呢個因素，點樣寫落去等啲人競投嘅時候考慮呢？

MR JOHN STANLEY：（經傳譯員）我諗要講明話嗰個車嘅狀況係點、維修保養係點樣做同埋營辦商需要保持到咩嘢狀況，咁可能喺合約裏面都要講明如果佢哋達唔到嗰啲成效嘅時候就要點樣處理，我唔係律師，肯定你寫合約，你就會講到定到一啲嘅基準嘅表現嘅指數，而呢啲基準表現目標達得到，就冇問題，如果達唔到，就要處理。

羅先生：（經傳譯員）你話喺競投嗰個準則嗰度點樣呢？即係如果我哋好明確講明話安全係一個因素，會唔會用意外率呢？即係話如果你做唔到，你要罰款咁樣呢？

MR JOHN STANLEY：（經傳譯員）我就唔知道有人會有啲獎勵或者係罰則係特別同安全有關嘅，如果真係咁做，我就會覺得意外率都係一個好嘅起點嚟嘅。

主席：（經傳譯員）新加坡有冇一啲規定，就話如果個意外率達到某一個水平，就會有個罰則咁樣呢？

MR JOHN STANLEY：I think it is, Chairman, but I don't know enough about it.

主席：（經傳譯員）但係我知道嗰個意外率係定得好高嘅，高過香港現有嘅意外率嘅。

MR JOHN STANLEY：Okay.

陳先生：（經傳譯員）喺競標，你提到話可能有一個壞處，就係個成本嗰方面嘅問題或者係要遲啲計算，你又提到話保養嘅成本，會唔會係同嗰個合約年期有關呢？譬如話只限定一段時間，只要你保持到你嘅表現，喺嗰段時間就得喇，之後發生咩嘢事你就唔理㗎喇，如果咁講，係咪錯呢？抑或係調番轉呢？

MR JOHN STANLEY：（經傳譯員）正如我之前講過，我唔知道嗰啲競標合約嗰個全

部細節係點嘅，但係通常做法，政府就會喺個合約定一啲規定，就話去到個合約完嘅時候嗰啲汽車應該保持喺乜嘢嘅狀態嘅。

陳先生：（經傳譯員）嗰個一般個概念，即係話要延遲支付一啲成本，就會係競標嘅一個弊端嚟嘅，你其實指話延遲成本係咩嘢意思呢？即係我理解，就係話因為我要保持成本低，我就係呢度慳、嗰度慳咁樣，你想講嘅係咪係想講呢個觀點呢？所以因此佢哋延遲支付某啲成本？

MR JOHN STANLEY：（經傳譯員）我諗就係你同政府當然會進行一連串嘅協商，睇下政府會唔會係有啲情況幫到你一啲，譬如話畀多啲錢你去營辦咁樣，有啲承辦商佢哋會咁做嘅，佢哋會嘗試去同政府重新再商討佢哋嘅合約嘅，如果佢哋發覺佢哋個利潤太低嘅話，譬如喺墨爾本，我哋就睇到真係有一個問題存在，所以嗰個情況最後就處理咗㗎喇，而家營辦商佢嗰個車隊嘅狀好咗好多，但係我唔知道嗰次政府係咪有畀到幫助佢哋或者畀咗錢佢哋。

陳先生：（經傳譯員）唔好意思，我要講番返去呢個問題，因為我要確保我係好清楚明白你講乜嘢嘢。即係從商業嘅競標就有弊端，但係又有好處，係同安全相關嘅，係會因為競標係會提供咗呢個好處？

MR JOHN STANLEY：（經傳譯員）我就諗唔到，陳生，或者係有嘅。

主席：（經傳譯員）你就係指出話有風險？

MR JOHN STANLEY：（經傳譯員）係，我覺得係有風險嘅。

主席：（經傳譯員）所以你就覺得競標，譬如話--譬如每咁多公里，佢唔換嗰啲車呔，就係因為想慳錢，呢個就係個風險，係咪呀？

MR JOHN STANLEY：（經傳譯員）係，就係呢個風險，類似呢啲。

陳先生：（經傳譯員）我知道三分一嘅墨爾本嘅定線巴士服務都係競標嘅，你覺得自從引入咗競標之後，對於巴士安全運作有冇帶嚟好處呢？

MR JOHN STANLEY：（經傳譯員）我就唔認為有咩嘢證據，如果你睇番運輸申訴專員嘅報告，就係講話針對嗰啲巴士營辦商，你就會睇到嗰啲競投嘅服務，佢哋通常即係話如果呢方面服務，佢哋去到申訴員嗰個投訴都係屬於排得比較高嗰啲公司嚟嘅，就主要係保養問題。

主席：（經傳譯員）有啲邊啲嘅競投嘅營辦商？

MR JOHN STANLEY：（經傳譯員）就係現有嗰個，Transdev。

主席：Transdev？

MR JOHN STANLEY：（經傳譯員）係。

主席：（經傳譯員）我知道倫敦佢哋一啲嘅可能就係因為冇策略性嘅規劃，就令到佢

啲保養有問題，好多嘅工程師同一時間係退休嘅，佢哋又請唔到人，墨爾本嗰個問題係咪都係因為咁嘅原因呢，抑或係同想節省成本嘅問題？

MR JOHN STANLEY：（經傳譯員）我諗應該係因為墨爾本而家都係有一個好快速嘅人口增長，就係差唔多每年係百分之二點五，嗰啲巴士就要運作得頻繁啲，我諗呢個係其中嘅原因佢哋要行多啲嘅里數，又要每日喺路上係用長咗，又老化，我諗呢個就係墨爾本嘅情況。

主席：（經傳譯員）唔該。

陳先生：（經傳譯員）好，教授，我可唔可以去睇下一個協商嘅合約有咩利弊，首先，想請你睇你第二份嘅報告書，第 86 頁，喺嗰一頁嘅最底嗰一段，我讀呢一段出嚟，你就話，86 頁下面，「定線巴士營辦商係需要感覺到某啲嘅表現方面嘅壓力嘅，如果佢哋係一個可以係唔續約嘅，協商出嚟嘅專營權嘅話，作者就係支持呢一個協商嘅方式嚟到去批呢一個定線服務嘅營辦權利，但係呢一個嘅制度必須要確保呢一個營辦商係有一啲嘅壓力，要喺一啲嘅可以量度嘅嗰啲嘅表現方面係表現得好嘅，就有機會如果佢做得好，就有獎勵，如果佢做得唔好，就有刑罰嘅，就係可能引致佢係會甚至損失咗呢個專營權嘅，呢啲就係要全部擺晒落去嗰個嘅專營合約裏面。」點解你覺得呢一個比起競投方式更加好呢？

MR JOHN STANLEY：（經傳譯員）我自己喺呢方面喺墨爾本做咗好多工夫，我覺得一個協商嘅合約主要嘅好處，就係話你要決定如果你真係想用呢個方法，你就要喺政府同埋營辦商之間有一個好牢固嘅關係，就係話到底呢一個制度點樣可以發展得最好嘅，我哋就覺得政府方面係佢技巧方面有限，營辦商方面亦都係，嗰個嘅制度嘅設計同埋點樣能夠最好咁樣得到你公共運輸嗰個嘅利益，就有一個機會畀政府喺呢方面嘅專家同埋業界就一齊努力，就希望一加一係大過二嘅結果，呢個我哋而家就係試緊咁樣做，喺呢方面我寫咗好多嘅文章，就係話政府同埋營辦商要有一個互相信任嘅關係，就唔係講到話--即係唔係話規管方面係做唔到，而係要嗰間公司--唔係話嗰間公司好似係控制咗個營辦商，而係兩方面係有一個互相嘅信任嘅協作，嗰個嘅合約或者營辦商就係可以喺期內有所變更嘅，係一路喺度更新緊嘅，係一份活嘅文件，就唔係話係已經係鐵板一塊，開始係點就唔能夠改變嘅。就一路嗰個營辦期一路運作，就可以改善呢個服務嘅，就係基於大家有一個相互嘅信任。

點解墨爾本佢哋做得到呢？因為我亦都係去經營呢個巴士協會嘅，我哋喺呢一個乘客量同埋服務表現方面都有好大嘅改善，就係基於我哋同政府有呢一個嘅關係，以前三、四十年都係做唔到嘅，從我哋嘅經驗，我哋睇到如果你--政府同埋相關嘅機構有呢一個嘅互相信任嘅關係，呢一個制度亦都係需要雙方都係負責嘅，咁嗰個營辦商就可以有好嘅表現。如果佢唔係話畀個牌照佢賺錢就算嘅，佢係要有好嘅表現，點解？就係話要有一啲表現方面嘅壓力係擺喺呢個人身上嘅。

主席：（經傳譯員）你可唔可以解釋乜嘢叫做規管方面嘅即係一個嘅--大家困咗喺呢一個嘅局裏面？

MR JOHN STANLEY：（經傳譯員）即係話有時可能嗰個嘅標係太低，政府就覺得好難，如果佢哋大家唔太過親近嘅時候，就可能嗰方面又會想嗰個合約價格係升高嘅，好多時候大家就會批評協商嘅合約就係話好似而家嗰個營辦商就已經係俘虜咗政府㗎喇，政府冇辦法，惟有畀佢繼續嚟到去做。我哋其實就係要有一個壓力，要佢有好嘅表現嚟到處理呢個風險，因為其實有個風險嘅。

主席：（經傳譯員）即係話可能係巴士營辦商就係可能抗拒政府有一啲嘅建議話叫佢哋點樣改善，係咪咁呀？譬如話加一啲巴士上一啲安全嘅裝置。

MR JOHN STANLEY：（經傳譯員）係呀，係呀。

主席：（經傳譯員）就係有講，但係就唔做，就係冇一個實質嘅改變，係唔係呀？

MR JOHN STANLEY：（經傳譯員）如果真係嗰個營辦商俘虜咗嗰個嘅規管者，就可能會咁嘅。

主席：（經傳譯員）呢個係一個風險。

MR JOHN STANLEY：（經傳譯員）所以點解你要有一個喺表現方面有壓力嘅，就係係一個真正嘅壓力。

主席：（經傳譯員）你可唔可以畀一啲舉例例子，點樣叫做表現方面畀啲壓力佢呀？喺邊方面呀？

MR JOHN STANLEY：（經傳譯員）特別係安全表現嘅壓力，我哋喺墨爾本就係覺得安全係一個共同承擔嘅責任，呢個係好獨特嘅，所有相關嘅各方都係有一個嘅責任鍊，呢個都可以影響巴士嘅安全，佢哋都安全嘅責任。呢一個就需要我哋喺我哋嘅認證制度之下有一個洽商嘅合約安排，所有嘅營辦商都相當知道佢哋如果做得唔好，佢可能係會被告上法庭嘅，如果證明佢哋冇盡佢哋嘅力嚟到去盡佢嘅責任保障安全，就會咁喇。所以呢個係一個非常之重要嘅表現壓力，呢個就係責任鍊方面。我哋覺得如果有一個太過低程度嘅表現壓力，呢個就係關乎賞罰，我哋都講過喇。

主席：（經傳譯員）即係話喺佢哋可唔可以營辦係有一個服務嘅有獎賞，而係安全方面，可唔可以用呢一個意外率嚟到量度？

MR JOHN STANLEY：Absolutely.

主席：（經傳譯員）有咩嘢其他方法去量度呢？

MR JOHN STANLEY：（經傳譯員）意外率係一個好嘅起點，如果你睇下一啲嘅報告，我哋喺安全計劃同埋呢一個五年嘅計劃，你就提供一啲資料關於傷亡率、撞車、非撞車，譬如話係蹦倒、絆倒、跌倒等等呢啲嘅意外。如果你係發現一

啲安全--你將安全變做一個可能係有懲罰嘅條件，我哋就會去處理嗰個安全嘅問題，如果你唔去將嗰個意外率嚟到一齊嚟去睇，你就咁睇嗰個傷亡率，你就會睇埋譬如話蹦嘥、嘰嘥、跌倒呀咁，我覺得呢兩點都係重要嘅。

我覺得有一個嘅營辦商就係見到越嚟越多係蹦嘥、嘰倒同埋跌嘥呢一類嘅意外，呢一方面處理咗，就減低咗嗰個傷亡，如果你將佢哋全部加起上嚟，一件事件就係一個事件，你就睇唔到嗰個整體嘅情況，如果你將佢哋分析下，睇下一啲安全嘅大嘅範疇，就係確保有一啲主要服務指標，你就可以有一條嘅條款，可能係賞罰嘅條款，即係話你就係會有一系列嘅設施喇。

我唔知道呢一個一籃子嘅設施有幾多個元素，但係係要喺大家洽商，即係政府同埋營辦商或者係委員會洽商之後嗰個結果嘅，我覺得呢個就係主要呢個安全嘅問題同埋你要去處理嘅。

主席：（經傳譯員）我諗喺倫敦，佢哋有四十二個元素係關於安全嘅問題。

MR JOHN STANLEY：（經傳譯員）我就覺得好多。

陳先生：（經傳譯員）你正話就係重點講咗表現方面嘅壓力，我就想問下你，喺香港呢個情況，巴士服務其實都係同其他公共交通模式去競爭嘅，譬如話火車、小巴、的士等等，你覺得呢一類型嘅競爭會唔會都喺營辦商方面有壓力，要佢表現得更好嘅呢？

MR JOHN STANLEY：（經傳譯員）係有嘅，都有一個程度嘅，但係就唔夠我哋正話講到競投所造成嘅要佢表現得好嗰啲嘅壓力，因為嗰個嘅後果係比較嚴重嘅，喺競投嘅情況之下，佢哋係例如話你如果競爭得唔好，你就可能少咗啲乘客，你同呢一個地鐵方面，但係呢個唔同，係完全冇咗你成檔生意嘅，我諗我哋係需要嗰個壓力係去到一個地步，如果你表現得唔好，你可能冇得做生意，冇得做嘅，呢個就係競投一般嘅情況。亦都要有一個好可能嘅一個情況，就係話呢個好可能嘅威脅，就係如果你表現好差，你會成個嘅合約或者專營權係冇咗嘅。

我諗另外一點，就係票價嗰個調整機制亦都喺你嘅專營合約裏面係容許有呢方面可能係畀佢哋表現得冇咁好，因為有一條方程式嚟到去調整價格，改變咗營運嘅開支同埋收入就係其中一樣嘢我哋畀呢個巴士營辦商係有一個合理嘅回報率，呢一個喺票價調整方面係考慮埋嘅。我哋要畀佢睇到好可能，真係好可能你如果係做得唔好，你冇咗呢個專營權嘅。

主席：（經傳譯員）我哋而家就係聽到一啲嘅證供，嚟自巴士營運商，佢哋話咁樣嚟到係分類係唔公道嘅，佢哋對於呢個嘅價格調整機制唔係好開心，佢哋就話佢哋有時去到一個地步，都費事申請加價，因為通常都係被拒絕㗎喇。

MR JOHN STANLEY：（經傳譯員）我諗一個合約或者專營權係要寫得好清晰，冇含糊嘅地方，關乎票價嘅調整，我哋呢一度就唔係睇個票價，反而係營辦商嗰個

嘅回報，我哋都係有類似嘅方程式嘅。我哋會睇下譬如工資、燃油價格、其他嘅營運成本嗰啲嘅元素係點呢，我哋會將呢啲全部考慮在案，嚟到去計算我哋嘅補貼水平，即係話營辦商同政府收到幾多，佢就會將佢擺晒落去嗰個價格嘅釐訂嗰個情況裏面嘅。

主席：（經傳譯員）你即係話巴士營辦商就係認為價格調整機制就係令到佢哋唔係幾開心，佢哋就唔提出申請嘅。我諗而家都係一個合適嘅時間我哋係有一個小休，我哋會休息二十分鐘，一陣間會再返嚟嘅。

MR JOHN STANLEY：（經傳譯員）唔該。

上午11時35分押聆訊押後

上午11時56分恢復聆訊

出席人士如前。

主席：（經傳譯員）教授，喺我哋繼續之前，有兩樣嘢嚟講，我哋同時間提供即時傳譯，為咗方便聆聽傳譯嘅人，我希望你喺回答嘅時候可以放慢少少，同埋適當時候停頓，可以令到佢哋可以追到你。同埋你或者可以或者會對準啲個咪去回答，我哋大家都會收聽得清楚啲。希望你搵到一個合適嘅距離去回答。

陳先生：（經傳譯員）我哋之前提及到將安全列為獎勵嘅一部分，我想特別針對呢個題目嘅，喺小息之前，你有提及到有啲咩嘢指標可以去聚焦嘅，即係作為獎勵嘅一部分，想問一個一般性問題，喺有個環境，譬如話個營運者已經本身係靠個乘客人數去獲利，你預計話呢啲嘅獎勵會唔會成為一個係直接嘅獎金或者係扣錢？

MR JOHN STANLEY：（經傳譯員）呢個就係我係正正會預計到。

陳先生：（經傳譯員）本身係會有啲指標，係咪？如果你唔設定嘅話，就會係有個罰則條款，如果你符合嘅話，就會有一個額外獎金？

MR JOHN STANLEY：（經傳譯員）我諗係會設定一個範圍，如果你稍為唔符合或者你超過少少或者你係可以達標或者超過幾多，呢啲獎罰本身係會有個最高低範圍。喺我小息前講過，譬如話嗰啲死亡、滑倒、絆倒、跌倒呢啲亦都會考慮到。

去建立嗰啲表現指標，本身係有啲要求去符合，本身你要係具體，可量度同埋可以達到，同埋明顯要有關，同埋嗰啲數據本身係要及時供應到，呢啲嘅主

要即效指標，主要係要營運商係可以去同佢嘅表現去--係影響個結果。

我哋認為安全係一個共同責任，我認為如果呢啲嘅主要即效指標傾斜於個責任喺個車長方面，而唔去涉及其他人還是本身係做個巴士安全責任鍊嘅一部分，特別係嗰啲有關呢啲巴士安全嘅指標，譬如話死亡、滑倒、絆倒、跌倒個案。

亦都睇番呢啲嘅指標本身可唔可以針對可以影響呢啲指標嘅一批人，因為呢啲係牽涉到只係車長，就唔係咁公平。

陳先生：（經傳譯員）根據你之前嘅答案，你諗緊係咪一個獎金制度？即係譬如話政府設定嘅，唔係淨係畀營辦商，可能營辦商嘅僱員都可以有呢？

MR JOHN STANLEY：（經傳譯員）我諗呢個就要公司自己去決定，即係佢點樣做到最--得到最好嘅效果，我就會覺得可能係有一個獎金制度或者一個罰則嘅制度，係公司層面嘅，由佢哋去判斷，到底佢哋想獎勵邊個，特別係嗰啲都一齊努力導致嗰個成果做得到嘅人。

陳先生：（經傳譯員）譬如我哋講過呢個概念層面，可唔可以講一個具體嘅例子？即係頭先講咗概念層面，而家可唔可以講個具體嘅例子？其實有好多例子，但係我淨係攞一個，等我哋嚟睇下到底呢個概念係咪行得通，然後就請你就住呢個例子畀啲評論，首先可唔可以請你睇 TD-1 文件夾 192 頁？

等你知道呢份係咩嘢文件，呢份就係九巴嘅遠期規劃嘅文件，呢度有一節就係特別講巴士安全嘅，就係 2018 至 2002 年嘅，呢份文件 192 頁就係九巴交畀運輸署嘅，就係大概 2017 年中左右，8.8.1 段，九巴建議用三年嘅平均數字，係 2014 至 16 年嘅實際牽涉交通率，就係 2.71 呢個數，個定義就係話每一百萬營運里數嘅牽涉喺交通意外嘅巴士數目，就比起 2014 年個意外率其實就係減低咗百分之六嘅，喺 2014 至 2016 就係最高嗰個紀錄嚟嘅，就用呢個目標做五年計劃期嘅目標，即係話佢定咗個基準喺呢度喇，可以咁講。呢個就係九巴自己定嘅目標，就係其中一個可以用嘅安全指標。

然後我哋往前去，2017 年去到 2018 年，你就可以睇 TD-5 文件夾 1729 頁，唔好意思，可唔可以返番一頁先，1728 頁，等我哋知道呢份係咩嘢文件，1728 頁，你就睇到有一封信，係運輸署，日期 2018 年 5 月 21 號，係由運輸署畀九巴嘅。

第一段，「呢封信就講話係提供你一套嘅指引同埋規定，就係涵蓋下面嘅部分，就係要你喺五年嘅規劃計劃裏面就遵循嘅，所以你準備嘅時候就要睇喇。」

好喇，即係一年前，即係講緊同一個，就係話佢嗰個未來五年嘅規劃工作。然後去番 1729 頁，你睇到運輸署嘅評論，關於巴士安全嘅，第一段，運輸署就話「我哋備悉喺九巴每百萬行車里牽涉交通意外嘅巴士數目就 2016 年嘅 2.74

就增加到2017年嘅3.04，係屬於一個高水平。」

第二段，我淨係讀最後嗰一行，「仲有，實際嘅牽涉交通意外率就係2017年3.04，就係比喺你2018至2022年規劃計劃裏面所建議嘅2.71呢個水平係高嘅。」

就呢度就睇到，每百萬行車公里牽涉意外嘅巴士數目，嗰個2016、17嗰啲數字你睇到晒，15都有。

然後喺呢一個表下一段就話「如果講到話牽涉到九巴巴士嘅交通意外數目，喺2015年362宗增加到2017年嘅423宗，就有一個上升嘅趨勢。」

喺我頭先讀嗰段，我哋睇到九巴並冇達到意外率嘅目標，呢個目標係佢自己定嘅，你可以睇到九巴嘅意外率，即係按每百萬行車公里計，係達唔到，係高咗嘅，即係話九巴自己達唔到佢自己設定嘅目標。

你覺得如果個獎罰嘅機制喺咁嘅情況，點樣做呢？

MR JOHN STANLEY：（經傳譯員）我就唔會好似喺呢度咁樣嚟應用嘅，如果你睇番嗰個表，題目就係話九巴巴士牽涉喺交通意外個數目，你會睇到嗰個致命意外由11降到5，再降到3；嚴重受傷就由122降到110，再降到11；而輕微受傷就由737升到787，再升到889；如果你淨係講話每百萬行車公里嘅意外率，就即係話將所有唔同程度嘅受傷都有平等嘅對待，咁係一個錯誤嚟嘅。當然致命意外嘅考慮係最重要，跟住嚴重受傷都係重要，然後輕微受傷可能又冇咁重要，所以係應該要反映到各種唔同意外所造成嘅傷亡程度嘅。即係話就係有一個主要表現指標，咁先至可以係量度到嗰個安全表現，如果淨係按每一百萬行車里數嚟計嗰個意外率，咁可能會誤導嘅。

陳先生：（經傳譯員）即係你意思應該仲有另一套嘅數字？

MR JOHN STANLEY：（經傳譯員）係喇，你要有一整套嘅指標，呢一度就會係嗰套指標嘅一部分，但係應該係其中一個元素，唔係佢嘅全部。係應該有其他指標能夠反映到，如果我係作為經濟學家，我就會反映嗰個交通意外嘅總體成本，譬如某一種嘅意外，譬如話嚴重受傷，輕微受傷或者致命意外，佢嗰個成本係點樣，就變咗有個加權嘅因素加咗落去，就先至可以睇到每百萬行車里數嗰個意外率點樣比較。

陳先生：（經傳譯員）好喇，如果睇下一頁1730頁，底部，第(3)節，運輸署建議--或者應該係話九巴就建議相關嘅計劃，為咗要減低巴士牽涉喺交通意外嘅比率同埋進一步加強巴士服務嘅安全，照顧到乘客，我哋要求你間公司要建議以下嘅計劃嘅。然後我哋去睇1731頁，運輸署要求九巴提出一個建議，係個目標意外率，即係喺下一期嘅長遠巴士服務計劃嗰度要提及，就係呢個都係講話巴士牽涉喺意外個比率嘅。你就頭先都提到話呢個意外率就唔足夠嘅，太粗疏？

MR JOHN STANLEY：（經傳譯員）係呀，佢哋應該係要再仔細啲，我會覺得咁樣個

目標應該係佢哋協商個結果嚟嘅，就即係話運輸署同埋營辦商之間去協商到嘅結果，唔係應該由營辦商向運輸署建議。以呢一啲嘅課題其實應該係雙方都去協商嘅題目嚟嘅。

陳先生：（經傳譯員）教授，喺你個報告度，我睇到墨爾本即係訂價加呢個合約模式就冇具體講明嗰個安全指標同埋有啲咩嘢獎罰嘅，或者我首先我講緊邊一頁，然後就請你評論，請你睇第 26 頁，就係專家文件夾嘅第 26 頁，即係你嘅第一份報告。你而家係咪揭到去第 26 頁呀？

MR JOHN STANLEY：Yes.

陳先生：（經傳譯員）我可唔可以讀出第二段？即係 3.4 之下嘅第二段，「根據十年嘅都會區定線巴士服務合約就會喺 2018 年中到期，獎罰條款就係同乘客人數增長有關，亦都係同係咪能夠按時提供服務或者取消班次有關，而呢個合約就會取代之前嘅合約，就一般都係包括埋呢個焦點。但係安全就唔係一個主要嘅表現指標嚟嘅，根據合約，所以安全表現亦都冇獎罰嘅條款規定，如果係安全表現惡劣，就可能只係會導致安全總監就係取消有關營辦商個認證，就即係話佢會冇咗份合約。而喺新嘅合約，據理解，就會提供一個乘客體驗嘅機制喺度，就係話係要根據營辦商嗰個表現，睇下相關嘅乘客投訴嘅數目、佢嘅回應同埋解決嘅方法，就會成為一個考慮嘅指標。」

你提到話安全係咁重要，所以點解唔會加咗入去墨爾本嗰啲合約裏面呢？

MR JOHN STANLEY：（經傳譯員）係，原因就係我哋好大程度係倚賴墨爾本嘅法例，就關於佢哋嘅安全責任同埋義務，就導致佢哋可以達到安全嘅要求，即係話要所有有關能夠影響到安全嘅人士都要負上責任，我個人猜測呢個就係主要嘅理由點解我哋嗰個服務係咁受到讚賞，就係因為安全嘅考慮，而運輸安全署長，我都自己見過好多次，佢喺--我喺準備你今次嘅聆訊嘅時候，我就係見過佢好多次，佢都係深信墨爾本嘅定線巴士服務安全就係因為我哋最基本理由就係要所有相關人士都要負責，所以就係喺法例裏面有關於安全嘅規定，亦都有係責任鍊嘅規定。

陳先生：（經傳譯員）你頭先所講嗰個概念，嗰個一般理解就即係話喺維省係有法律上嘅責任，要確保安全，係咪呀？呢個責任嘅特點就係唔係淨係巴士營辦商，而係就算喺營辦商下面嘅僱員都要付上責任，係咪呀？

MR JOHN STANLEY：（經傳譯員）係，佢哋有巴士安全法，就係維省嘅法例，就係就住安全責任立法嘅。即係話喺根據法例，有關有時有責任要儘可能去減少或者係消除會威脅到安全嘅因素，確保安全，譬如一個例子，就係話巴士營辦商要喺儘量合理可行嘅情況之下確保巴士服務嘅安全，而法例亦都訂明嗰個安全責任係適用於一連串嘅人嘅。

主席：（經傳譯員）有關呢個文本，可唔可以喺個畫面度打出嚟呀？

陳先生：（經傳譯員）呢個應該係教授第一份報告嘅。

主席：（經傳譯員）唔係喺個附件或者另一份文件嗰度？即係佢提及呢份文件，嗰份文件有冇呢？有冇就係巴士安全法，即係有冇呢份文件？

陳先生：（經傳譯員）或者教授可以喺呢度幫一幫手，就我所知，我就喺附夾嘅文件嗰度冇見到嘅。

主席：（經傳譯員）我自己就有下載到，喺我自己嗰沓文件就有嘅，係咪其他人唔係都有㗎？

陳先生：（經傳譯員）係呀，或者可以畀所有人。

主席：（經傳譯員）即係話係咪喺個螢幕上係咪有呢已經？有冇一個參考編號呀？就住 Stanley 教授嘅報告就有三個文件夾嘅參考編號嘅，係咪喺呢度？

MR JOHN STANLEY：（經傳譯員）係有 22、23 頁，我第一份報告就有提到部分相關嘅法例，嗰個文本喺嗰度有。

陳先生：（經傳譯員）主席，個參考編號就係教授報告裏面嗰啲文件，即係佢提過啲文件，但係就冇嗰個法例本身。

主席：（經傳譯員）我哋需要嗰份法例本身。

陳先生：（經傳譯員）或者下一次研訊，我哋會提供，然之後再返嚟講嗰個部分。

主席：（經傳譯員）我哋喺 23 頁就有一個摘錄。

陳先生：（經傳譯員）係，冇錯。

主席：（經傳譯員）教授，你正想繼續講話邊啲人就有呢啲責任。

MR JOHN STANLEY：（經傳譯員）多謝主席。嗰個法例其實提及嘅，就係話用你哋講法，就係巴士車長、嗰啲編更嘅人員、採購服務嘅人士、維修保養嘅職員等等，即係喺個法例裏面嘅概念就係呢啲叫做巴士安全工作人員，佢哋就有安全嘅責任，而指定嘅人員就會包括例如係車長，牽涉嘅人係好多類嘅，佢哋就可能影響到個安全嘅情況嘅，所以嗰個根本嘅原則就係話共同嘅責任呢個概念，喺 22 頁報告底部嗰度有解釋。

主席：（經傳譯員）呢個責任會唔會延展到去公眾人士？

MR JOHN STANLEY：（經傳譯員）係冇嘅。

主席：（經傳譯員）我覺得好似喺法例嗰度睇過喇。

MR JOHN STANLEY：（經傳譯員）如果係嘅話，我諗可能我睇漏咗。

主席：（經傳譯員）但係我肯定你係比我熟悉嘅，我睇到，因為我當時就記得就係覺

得好怪喇，即係講到話嗰個責任鍊有邊啲人似乎有提。

MR JOHN STANLEY：（經傳譯員）就話邊個會影響到個安全嘅成效嘅。我諗值得提醒人--即係主要係想提醒人唔係淨係巴士司機嘅，仲有其他人都要負責嘅，因此佢哋需要承擔責任。

主席：（經傳譯員）佢哋點樣承擔責任呀？係會係法庭告佢哋？

MR JOHN STANLEY：（經傳譯員）係呀，係可以㗎，因為有關嘅條文就有一啲嘅罰款嘅。

主席：（經傳譯員）即係話如果係公層面，就可以係編更人員、巴士車長，而最高層嘅就係公司嘅高層，係咪？

MR JOHN STANLEY：（經傳譯員）係喇。而新嗰個全國法律好快就會喺 10 月 1 號生效嘅，嗰度就係定出維省法律嘅背景，就係講話有啲咩嘢行為可能會引致有啲咩嘢後果嘅，甚至係監禁嘅，呢個就係更新咗嗰個全國法例，係根據呢個法例，而家嗰個罰則主要就係罰款嚟嘅，但係將來就會改。

主席：（經傳譯員）你未繼續之前，想講嗰條法例，邊一部分係講話公眾嘅責任㗎？

MR JOHN STANLEY：（經傳譯員）第 15 條嗰度就係講緊營辦商嗰個責任，譬如話巴士營辦商一定要喺儘可能嘅情況之下確保嗰個巴士服務係安全嘅。第 16 條亦都係類似咁講，一個採購商...

主席：（經傳譯員）邊個叫做採購人？

MR JOHN STANLEY：（經傳譯員）即係嗰啲購買巴士服務嘅採購人。而呢度都係喺維省嘅一個好有趣嘅辯論係講緊嘅，就係講到係公眾嘅運輸當局就係購買同埋決定呢啲嘅服務班次就有一個採購人，可能係其中服務鍊一員嘅。

主席：（經傳譯員）點解唔係呢？

MR JOHN STANLEY：（經傳譯員）我覺得，就主席，呢個應該係嘅。咁繼續，就係去到第 14 條，...

主席：（經傳譯員）我哋可唔可以睇一睇，第 14 條一路去到第 17 條，第 17 條就有一個「巴士安全工作者」，係咩嘢嚟嘅呢？

MR JOHN STANLEY：（經傳譯員）個定義就係喺法例嘅前部係定咗嘅。

主席：（經傳譯員）邊啲係嗰啲巴士安全工人呀？

MR JOHN STANLEY：（經傳譯員）我諗最好都係睇番嗰個定義。

主席：（經傳譯員）好合理。可唔可以睇番釋義嗰部，應該係第 1 條，第 3 條，「定義」喺第 3 條，法例第 3 條，喺呢度，啱唔啱？「巴士安全工作」，係喇。

MR JOHN STANLEY：（經傳譯員）巴士安全工作者就係一個人係將會或者已經係做緊一啲巴士安全嘅工作，包括一個人係由巴士營辦人係聘用嚟到係做一啲巴士安全嘅工作，或者有其他人所聘用嚟到去做巴士安全工作，係一個受訓嘅人士或者一個自願工作者，所以嗰個定義都好闊嘅，可能係巴士嘅測試，一啲嘅監察。其實我哋就係負責驗車嘅，所以呢條條款都可以包埋我哋嘅。

主席：（經傳譯員）去番上面「巴士安全工作」嗰度。

MR JOHN STANLEY：（經傳譯員）指「一個活動可能影響到巴士服務嘅安全，包括駕駛巴士，或者係同一啲駕駛巴士相關嘅活動、設計、建造、供應、維修、改裝、驗車」或者係--等等。呢啲嘅喺巴士上面嘅設備，或者係去定出或者係改變巴士服務時間表個班次，或者一個指定嘅服務，呢個係範圍好廣闊。

即係話巴士公司嘅經理佢哋係知道嘅，佢哋都係好認識呢一點嘅，譬如話曾經有討論到巴士司機嗰個嘅工作時間，其實就係佢哋係點樣可以接受。譬如舉例，我哋嘅巴士司機或者係車長平均一個星期工作四十四至四十六小時，喺法例之下佢哋可以工作長啲嘅，但係佢哋唔會，因為營辦商都係關心到咁樣做對安全嘅影響。

其實做一間大嘅營辦商嘅總裁，當佢喺上任嘅時候，2008 年就係將當時嗰個嘅平均工作時數，四十八降到去四十四至到四十六，喺後來嗰四、五年之間做得到嘅，而大部分嘅墨爾本承辦商都係大概一周就係定四十五駕駛小時嘅。

主席：（經傳譯員）最高可以容許嘅，每個星期駕駛幾多小時呀？

MR JOHN STANLEY：（經傳譯員）佢哋可以去到七十二嘅，我哋覺得就唔係幾好。

主席：（經傳譯員）你嘅證供就係話因為關乎到安全嘅職責，所以佢哋認為應該駕駛小時係下降？

MR JOHN STANLEY：（經傳譯員）冇錯。營辦商都係非常之明白嗰個編更嗰個要求嘅，譬如話有一個嘅承辦商就係喺一個五又四分一小時嘅更裏面係畀多咗三十五分鐘，因為就都會計可能有交通阻塞，就會影響行車時間，佢哋就唔想佢超過五又四分一嘅小時，根據我哋嘅法例，因為呢個係你最高冇休息之下連續揸車嘅時數，如果同佢哋講，佢哋一定最關心嘅就係可能導致對於安全嘅影響、一啲嘅後果，如果有一個人因為揸車時間太長，會唔會係會撞死另外一個人呢咁。

陳先生：（經傳譯員）好喇，講到責任鍊呢個問題，你當然下面係有好一層嘅法律責任同義務，就解釋點解你係唔需要特別嚟到話係有啲乜嘢嚟到去獎勵、鼓勵佢哋係注重安全嘅？

MR JOHN STANLEY：（經傳譯員）係。

陳先生：（經傳譯員）喺香港，我哋就冇呢啲嘅法例嚟到--喺法律方面係冇要求到確

保安全嘅責任嘅，你覺得係咪更加重要應該係喺其他嘅方面嚟到去獎賞安全呢？

MR JOHN STANLEY：（經傳譯員）我覺得呢個係一個好嘅方法嘅，but 就應該唔夠好似我哋咁有一個責任鍊同埋有一啲嘅法例規定安全方面係咁有效嘅。我就覺得如果你係想用一啲賞懲嘅制度嚟到促進安全，就會去番我正話所講，要確保呢啲嘅賞罰都係會適用喺好幾方面嘅，凡係有機會影響安全表現嘅人應該都要受制，呢個就係其實想建立一個嘅責任鍊。

主席：（經傳譯員）可唔可以話畀我哋聽喺嗰個法例方面係點樣嚟到令到維省係有安全嗰個嘅職責？

MR JOHN STANLEY：（經傳譯員）係呀，嗰個法例嘅做法，就係主席，全國嗰個嘅法律就係我自己係有份參與嘅，就係嗰個嘅國家道路安全委員會，我哋而家有一個國家道路安全委員會，亦都有一啲重型車輛嘅全國法律，就係會喺省嗰個嘅層面係實行嘅。

唔係所有嘅省都有一個巴士安全法好似我哋咁嘅，維省同埋新南威爾斯，呢兩個最大嘅省就係喺呢一方面就係行得最前嘅，喺 10 月 1 號今年就會係開始㗎喇。我諗喺儘可能嘅情況之下，自從 2009 年呢個國家嘅法律已經係會開始嘅，我哋 10 月 1 號會開始，我覺得而家嗰個全國嘅法律已經係追上咗我正話所講嘅巴士安全法呢一方面嘅水平。

主席：（經傳譯員）用咗幾多年先至可以達到呢個嘅程度呢？

MR JOHN STANLEY：（經傳譯員）我諗就都要三、四年。當我係呢一個巴士協會嗰個總裁，2009 年有呢個法例，當時我 1999 年至 2008 年係擔任呢個角色，呢一個嘅法例同埋係將嗰個業界嘅意見就擺埋落去去發展呢一個嘅法例，就係我自己當時有份參與嘅。

喺我第一份嘅文件，我就話主要或者係部分原因係業界接受政府好大程度嘅財政資助，我哋亦都係想更加係主動咁樣喺安全方面令到佢哋成為好嘅企業公民，我哋係好主動嘅，亦都希望呢一類型嘅安全法例係可以係繼續，亦都希望佢哋係符合嘅。

主席：（經傳譯員）香港就情況唔係咁喇。

MR JOHN STANLEY：（經傳譯員）冇錯。但係如果你睇下啲好簡單嘅指標，譬如每百萬行車公里嘅意外率，我哋香港同埋倫敦都冇墨爾本咁好，其中一個原因可能係因為我哋有呢一條嘅法例；另外一方面，亦都可能係個經營嘅環境，喺香港同埋倫敦係--佢哋係好過香港同埋倫敦嘅。

陳先生：（經傳譯員）呢度係有另外一個因素，如果我講錯咗，你可以更正。就係你哋有一個係好大嘅補貼，另外係成本增加亦都係可以增加佢哋嘅利潤嘅，任何嘅成本增加都可以轉嫁畀政府嘅？

MR JOHN STANLEY：（經傳譯員）冇錯，你講得啱。不過亦都--即係話政府係可以好緊密咁樣監察任何可能係增加成本嘅一啲事情，呢一個可以從一個安全嘅角度去睇嘅，譬如話喺過去三、四年，我哋都係有一啲人係譬如襲擊或者係辱罵司機嘅，喺呢一方面就引致我哋就加咗一啲安全嘅罩，亦都有一啲嘅閉路電視，去處理呢個問題，政府同埋呢一個承辦商都係大家作負擔咗部分嘅成本嘅，呢個都洽商出嚟嘅結果。

羅先生：（經傳譯員）去建議同埋改善呢一個呢一個巴士--增強呢個巴士安全法會有啲咩嘢人係抗拒嘅呢？有啲咩嘢反對呢？

MR JOHN STANLEY：（經傳譯員）即係邊個會反對呢啲嘅法例呀？

羅先生：（經傳譯員）係。

MR JOHN STANLEY：（經傳譯員）我就諗唔到有咩嘢人會反對嘅，可能巴士營辦商或者會反對，因為喺呢個法例之下佢哋就要問責。但係我哋嘅墨爾本嘅巴士營辦商就好支持呢個法例，佢哋亦都係支持認證嘅，呢個認證制度。我諗一啲主要嘅因素就係佢去實行咗呢啲嘅要求之後，佢哋知道或者佢哋相信就可以改善到佢哋嘅安全表現，譬如話佢令到墨爾本成為一個大家去工作、出行都係更加好嘅地方，因為巴士司機駕駛係會更加嘅安全，我睇唔到有咩嘢人會反對嘅，因為嗰啲最可能反對嘅人可能係佢哋都係會有好處嘅。

羅先生：（經傳譯員）但係嗰啲變咗要係有多啲嘅責任同埋義務嘅人，佢哋會歡迎咁嘅制度咩？

MR JOHN STANLEY：（經傳譯員）因為佢哋諗佢哋可以嘅表現只要達到呢啲嘅責任，佢哋就係好滿意㗎喇，所以佢哋可以加強佢哋喺業界嗰個嘅地位，就亦都畀人哋睇到佢哋係一個負責任嘅業界，所以其中一個好處就係我哋有一個非常之強嘅業界協會，我哋可以係代表業界嚟發聲，唔係個別嘅營辦商發聲。

主席：（經傳譯員）當然呢度亦都係有一個經濟嘅利益，因為加強咗安全之後，因為意外都係會引致有金錢損失嘅。

MR JOHN STANLEY：（經傳譯員）係呀。

主席：（經傳譯員）呢個對於巴士營辦商都有好處嘅。

MR JOHN STANLEY：（經傳譯員）冇錯，主席。

陳先生：（經傳譯員）喺呢一方面，我哋就係收到一份嘅報告，就係話有人反對係用獎勵嘅制度嚟到去促進安全嘅，可唔可以請你喺呢一方面表達下意見？

MR JOHN STANLEY：Mm-hmm.

陳先生：（經傳譯員）我哋而家就去專家報告嘅第 153 頁，呢個就係 Mike Weston 先生嚟到做嘅一份報告，佢就係一個交通乘客嘅顧問，佢就係個專長就係倫敦

嘅巴士制度。153 頁嘅最底嗰度，我想講嘅就係用獎勵嘅形式去改善安全，呢一段嗰個大題目，8.5。

我讀一讀，「喺 6.1 段其中一個大倫敦嗰個嘅運輸委員會就係有一個建議，就係去『改善佢高級員工嗰個獎賞制度，就係有一個嘅直接嘅連繫，就係巴士安全同埋表現有關嘅付款。』喺嗰個嘅報告書裏面就有建議，就係『而家嘅巴士營辦商就係冇用錢嚟到去獎勵安全，呢個應該係要修改嘅。』咁同呢一個倫敦嘅巴士營辦商傾過之後，好明顯營辦商係唔支持直接用錢嚟到去獎勵安全嘅，即係喺嗰個合約裏面，承辦商就覺得直接咁樣用金錢嚟到去獎賞就會係引致一啲錯誤嘅行為，特別喺比較低層嘅--公司嘅低層，包括就係會鼓勵佢哋係唔匯報或者係唔舉報一啲嘅意外嘅，就覺得如果將兩者相連，就會令到佢哋唔願意同其他嘅營辦商喺安全嘅問題上面係嚟到合作，因為呢個係會有一個喺競爭喺商業方面嘅利益考慮嘅，咁即係話如果用錢嚟到去獎勵安全，佢哋覺得唔係一個積極嘅行為。」

佢就話有兩個可能嘅風險，第一，就係變咗有關嘅事就係會唔舉報，有一個趨向；另外就係會減少咗巴士營辦商之間嗰個合作，你呢一方面又有咩嘢嘅睇法呢？

MR JOHN STANLEY：（經傳譯員）我都承認呢個係有一個風險嘅，如果你可能係會鼓勵人哋有事唔報嘅，但係我諗亦都係可能佢哋會設計一個嘅監察制度同埋合規嘅保證嘅制度，確保唔會咁樣發生，例如喺我哋呢一度，運輸安全署署長就係嗰個成個制度嘅批核者，佢係一個嘅獨立人士或者係機構，佢會有一個嘅法定嘅指引，要佢係幫承辦商認證，亦都確保佢哋符合呢一個認證規度裏面嘅條款，包括係有事係需要匯報嘅。

如果你設計一啲賞罰嘅制度，你要確保你係預防到呢個風險，可能係好難做到嘅，但係我哋都係要去試下嘅，咁去試下呢個制度，去睇下可唔可以處理到呢個風險，我哋有呢一個咁樣嘅署長就係好似我哋呢個制度嘅一個裁判或者係批核人咁樣。而家話唔願意...

陳先生：（經傳譯員）唔係，你未講下一個事項嘅時候，我哋想再講多啲第一個事項，就係遇事不報。

MR JOHN STANLEY：（經傳譯員）係。

陳先生：（經傳譯員）你嘅證供就係話遇事不報或者係傾向唔報嘅呢一個風險就可以有一個--你點樣處理呢？就係有一個可靠嘅制度去確保呢啲嘅數據係能夠係準確咁樣係收集得到同埋記錄得到，我理解啱唔啱？

MR JOHN STANLEY：（經傳譯員）係，我哋就要睇下有咩嘢方法，你要睇下可唔可以達到呢一點，而我哋可以用一啲嘅程序去處理呢個問題嘅。

陳先生：（經傳譯員）某個程度嚟講，係咪話喺呢個數據收集方面係儘量機械化同埋

減少人嘅參與呢？

MR JOHN STANLEY：（經傳譯員）呢個亦都可以將一啲嘅數據庫同事件同埋意外嚟到連貫起嚟，可以係有唔同嘅渠道嘅，...

主席：（經傳譯員）我就係諗緊點解可以話係唔報呢啲意外呢？因為有好多方係涉及㗎嘛，譬如話司機、乘客、警方等等，甚至乎係呢一個救護車嘅，你點可以話大家聯合唔報嘅呢？

MR JOHN STANLEY：（經傳譯員）你諗下譬如有一啲細路仔向一架巴士掟石，掟啲石頭，如果你係嗰個嘅營辦商，你會喺一個有賞罰為基本嘅制度，即係關於意外方面嘅事項，你就會諗「我哋就唔好理呢件事，我哋唔去匯報。」其實佢已經掟爛咗窗或者係傷咗，甚至係令到嗰個司機死亡，或者係可能係令到某啲嘅人死亡。

主席：（經傳譯員）呢個嘅制度就係你嗰個嘅錯誤係唔擺落去個方程式嗰度，有一啲嘅人係可能有--呢個可能係刑事嘅行為，你可以懲罰佢。

MR JOHN STANLEY：（經傳譯員）係呀。

主席：（經傳譯員）呢個係有辦法去處理嘅。

MR JOHN STANLEY：（經傳譯員）我哋而家係講緊一啲嘅準則，我哋係要點樣控制。

主席：（經傳譯員）係。

MR JOHN STANLEY：（經傳譯員）你講到呢點啱喇。

主席：（經傳譯員）如果我記得啱呢，有四十二個元素喺倫敦嗰個評估裏面，就係話嗰啲嘅巴士比欺凌或者係凌辱嘅，點解將佢--點解話唔會報畀巴士公司聽或者點解係會嘅呢？

MR JOHN STANLEY：（經傳譯員）呢個係好重要嗰個嘅訊息，如果你唔去做呢啲，你就會畀人哋係喺安全方面係有一個罰款嘅。我哋要有一啲嘅創意思巧，呢個係唔容易嘅，但係如果你睇下其他嘅安全制度方面其他嘅方法，有一個責任鍊嘅問題，就係有冇一個係遇事不報嘅問題。

陳先生：Sorry, I interrupted you there. Please continue to deal with the second issue.

MR JOHN STANLEY：（經傳譯員）譬如話喺一個競投制度入面，有個營運商本身有個好嘅安全步驟，你會認為就係話佢會有傾向就係話支持你所講嘅，而係唔會去分享呢啲資訊畀其他營運商。呢啲我唔認同，我諗譬如話呢啲係同個競投制度有關，而唔係同呢個安全指標有關。喺個競投制度下面，呢啲營運商一般都唔想合作，因為就唔想畀人知道佢嘅競爭優勢。而如果安全就係一個佢哋嘅競

爭優勢，就更加唔想同人哋分享。

要解決問題嘅方法，倫敦嘅報告，我認為有一項好重要嘅，其中一個要點就係需要唔同營運商更大合作，同埋政府同埋營運商更多合作喺個安全事宜方面，喺我嘅報告第二部分方面亦都係有提到嘅。

主席：（經傳譯員）雖然就係話營運商之間可能冇咩嘢直接合作，譬如話倫敦方面係有嗰個 Transport for London 就從個官方嗰方面，譬如話有個營運商，譬如話嗰個神眼系統，本身係去減少咗個追撞嘅意外，呢啲係個監管當局會留意到，我哋營運商 A 有個好好嘅結果，然之後就會將呢啲嘅資訊畀其他營運商？

MR JOHN STANLEY：（經傳譯員）我哋希望係咁，主席，譬如話情況就係有獎有罰嘅情況，都要可以安裝呢啲科技，然之後從中得益嘅。我哋就唔係話好明個第二點。

陳先生：（經傳譯員）講番個營運商嘅獎勵方面，講到譬如話睇番有冇獎勵安全措施嘅延伸利益，如果嗰個安全表現係有關嘅獎勵制度，會唔會係有潛質可以去鼓勵政府去留意番嗰個安全有關嘅係即效指標？因為而家係有一個額外嘅焦點同埋個財政後果。

MR JOHN STANLEY：（經傳譯員）你認為會係作為一個步驟嘅後果，首先就係已經係需要去決定嗰啲獎勵同罰則係點樣，所以嗰個運輸部門本身係需要去深入去同啲專營巴士營運商去討論去建立呢啲嘅即效指標，就延伸到個問題，就係話你點樣去過程上監察，同埋需要有一個更強力嘅監察同埋評估制度個步驟。

陳先生：（經傳譯員）教授，而家我哋去另外一個範圍，就係個認證呢方面，一般嚟講，喺你嘅報告入面，巴士營運商認證係墨爾本巴士嘅中央重要部分，基本上如果佢未認證嘅話，就唔可以去營運嘅，而家係可能就係話呢啲認證就可能要改變。

而家我哋係去睇番文件夾方面，第 9 頁，你嘅報告第 9 頁，第一部分嘅第 9 頁，我首先會提及番嗰三段，「巴士營運商認證，作為一個制度去確保就話某個人係可以提供一個安全有效率嘅巴士服務，就有三個元素，係畀巴士同埋旅遊巴、營運者嘅運輸管理課程，由 Monash 大學舉辦嘅，個範圍主要係譬如話嗰個營運商提供嘅服務同埋一個每個合約嘅定線服務，高級員工就需要去完成個課程，就有四個單元嘅，其中一個就係巴士營運商安全風險管理，其中包括課題就係規管同法律架構、財政管理同埋商務擴展，另外一個就係管理資訊系統，第三個就係維修管理系統。

喺 3.3 部分提及，呢三個元素係獲認證，巴士營運商嘅主要規管元素，而個安全嘅重點係主要係過去十年係大大加強，主要集中喺去建立認為係一個安全風險管理文化。

而呢個巴士營運認證系統主要係個報告嘅主要焦點，因為作者認為主要比起

Transcript by Epiq Hong Kong, Limited

墨爾本同埋香港之間係一個最重要嘅單一分別，喺上文提及，維多利亞嘅定線巴士運作個機制係一個特別對呢啲嘅安全議題發展特別重視嘅，所以就睇番呢啲嘅一般營運。」我就對於嗰個管理資訊系統同埋維修管理系統嘅重視。

而家我哋去第 25 頁，去提及呢兩個嘅系統，最後嗰段，我就讀番上半段，「BusVic 係好積極咁樣去建立維省嘅巴士營運商認證制度，例如佢--個課程內容係提供咗畀 Monarsh 大學方面，就係嗰啲認證--營運商一定要去完成嘅，最緊要就係佢有一啲嘅範文回應佢關於管理資訊系統同埋維修管理系統嘅要求，係根據 ISO 39001 嘅，因佢令到佢嘅會員能夠建立同埋執行安全風險管理系統去符合認證制度嘅要求，只要佢係盡力去應用。」

我見到嗰個認證系統同埋 ISO 39001 嘅聯繫，之後我會再提及番。首先，你可唔可以總括嚟講，你可唔可以形容嗰啲巴士營運商認證系統嘅主要好處，特別係關於巴士安全呢？

MR JOHN STANLEY：（經傳譯員）呢個營運商認證主要係關於安全，主要就係佢哋就係個認證系統嘅背後根本理據，就係確保就係營運商佢提供安全嘅服務，同埋就唔會有--所以意外就係呢啲認證係由嗰個運輸交通總監提供嘅，所以佢就「係，嗰個人就話係呢個人係可以係成為一個認證合格營運商。」所以就可以合資格去同政府建立合約。

而呢個維修嘅管理系統同埋嗰個管理資訊系統，呢兩個系統嘅範圍本身係由嗰個運輸署安全總監去決定。睇番嗰啲相關法例嘅條款，我本身啲文件都有提及到嘅，本身呢個運輸安全總監本身係會話畀個營運商佢哋要做啲乜嘢同埋佢對佢哋嘅期望係乜嘢，同埋佢要睇到啲乜嘢，譬如話喺佢哋嘅管理同埋維修系統方面，同埋個管理資訊系統方面，譬如話我睇番我文件入面所提及嘅，譬如話呢啲嘅管理資訊系統，呢啲譬如係佢巴士安全嘅管理方面，呢啲係由運輸安全總監去出版嘅，就係令到佢哋嗰啲營運商確認，就係話佢哋有咩嘢期望，同埋如果佢哋認證咗之後，就係佢哋去引導佢完成個認證過程。

而之後個巴士行業協會，我哋之前擺喺個螢幕上，就基本上係會建立一啲範本回應畀佢哋會員去睇，同埋去定制，令到佢哋符合佢哋嘅維修管理系統同埋管理資訊系統，就係呢啲比較大嘅營運商，佢哋會度身訂度一啲，根據佢哋嘅營運情況，但係如果細嘅營運商，佢哋就基本上都會夠用嘅呢啲範文。

陳先生：（經傳譯員）如果我錯，你指正我，就係話呢啲嘅認證系統，就關於安全方面，主要係集中於嗰個風險管理方面同埋設立同埋去營運呢個系統去確保安全。其實點解我會去比較番嗰個譬如係 ISO 39001，可以睇番 39001 喺呢一段，我睇番你第二個報告，第 78 頁，喺中間嗰段，喺巴士車長訓練對上嗰段，我會讀一讀，然之後再問一問。

「最後運輸部」--呢個係運輸局--「運輸署去參照番 ISO 39001 道路安全管理系統指出，就係話呢啲係有啲嘅車隊管理公司同埋物流公司，但係唔係畀個運輸監督採納。亦都係留意到，就係話維省嘅營運商管理系統亦都係參照

番 ISO 39001，然後所有嘅定線巴士營運商需要獲得認證，然之後但係就冇話要去，根據呢個個標準，然之後獲得呢個證書。」

喺香港，我哋就冇呢個認證系統，同埋亦都係冇一個競標系統，例如我哋要--如果我哋要求巴士營運商去達到 ISO 39001 會唔會好似墨爾本咁樣達到相同嘅安全利益呢？

MR JOHN STANLEY：（經傳譯員）你會期望就係話應該會令你去相當嘅改進，我認為就係話--要諗就係話嗰個交通安全嘅總監嘅角色、你要咩嘢機制，同埋你想嘅話，去確保合規，特別係應用香港嘅巴士營運，所以你會有嗰個認證當局就會做嗰個 ISO 認證，同埋頒發證書，如果你鍾意嘅話，去確保就係話個符合期望。

我哋冇呢啲咁嘅嘢，但係我哋有啲類似嘅嘢，但係如果我哋做嘅話，就會有一個運輸安全總監，就會去作為成個制度嘅監察者。我哋如果睇番就係話，做係一個好嘅提議。我會諗就係話如果有個角色，譬如話好似問責同作為一個獨立同埋一個問責嘅守護者去確保個系統有效。

陳先生：（經傳譯員）喺維省，嗰個系統安全嘅守護者去確保個營運者係有合適嘅風險管理系統就係嗰個運輸安全總監？

MR JOHN STANLEY：（經傳譯員）啱嘅。

陳先生：（經傳譯員）喺個 ISO 39001 嘅背景之下，呢個責任就係由嗰個認證公司去處理，去進行一個年度檢查--審查？

MR JOHN STANLEY：（經傳譯員）係。

陳先生：（經傳譯員）佢哋而家係會得到嗰個證書？

MR JOHN STANLEY：（經傳譯員）係。

陳先生：（經傳譯員）主席，而家我想去另一個題目，就係巴士安全嘅常設委員會。而家會唔會係一個合適嘅時間呢？

主席：（經傳譯員）而家會進行午膳，而家我哋會兩點半先返嚟繼續。

下午 12 時 57 分押聆訊押後

下午 2 時 30 分恢復聆訊

出席人士如前。

主席：（經傳譯員）下午好。係，陳律師。

陳先生：（經傳譯員）多謝主席。Stanley 教授，我就會開始去下一個題目，就係巴士安全常務委員會同埋運輸安全總監嘅問題，我會兩樣一齊處理。你今朝早都有提及運輸安全總監嘅角色就係點樣可以負責執行嗰個責任鍊嘅，我就會而家集中講各個方面。

首先，我哋睇番呢兩個建議，就係話可以變咗促進更加積極嘅做法去達致巴士安全，就唔係話比較被動咁做。或者首先，睇番你個報告有提及呢兩項建議嘅，首先，去到第 100 頁，就係專家文件夾嘅 100 頁，呢度你就列出你嘅主要嘅建議，大概喺頁嘅中間，第二點，嗰度第二點，你建議「設立一個獨立嘅運輸安全總監，佢嘅工作就係負責管理同安全責任，確保遵守同埋執行嘅事宜嘅」。即係話你建議設立一個運輸安全總監，就係確保安全責任鍊得以落實。

你亦都有講一點觀察，就係 99 頁底部嗰度，喺 99 頁底部，你就話「運輸安全總監，如果係獨立嘅話，就既可以提升安全，將佢成為一個係可取嘅政策成果，同埋亦都係提供一個獨立嘅問責嘅機制，亦都係有透明度去處理安全嘅程序同埋成效，就會超越一個政府部門或者係公共運輸管理機構所能夠做到嘅，而運輸安全總監佢嗰個審查嘅程序，同埋佢可以接觸到業界，就令到佢哋都達成一個結論，就係話譬如墨爾本咁樣，佢個定線巴士服務嘅做法係安全，咁就係可以達致到呢一點。」

呢個就係運輸安全總監可以做到嘅嘢，根據同一點，我哋又可以睇埋你另外一個建議，就係關於話巴士安全常務委員會，...

主席：（經傳譯員）或者喺你繼續之前，可唔可以幫我哋再認識多啲，就係運輸安全總監佢會得到啲咩嘢嘅支援服務，佢係咩嘢人？佢應該喺邊度嚟㗎？

MR JOHN STANLEY：（經傳譯員）喺墨爾本，就係 2010 年有一條嘅公共運輸整合法，喺嗰度出嚟就有呢個職位嘅，主要就係重組番嗰個架構嘅安排，可以喺維省嗰度就係提供到運輸服務同埋做規劃嘅，呢個法例亦都係設立咗一個機構，主要就係一個政策機構嚟嘅，佢之下面就成立咗兩個處理機構，就係處理公共運輸，同時亦都有一個獨立嘅職位就係運輸安全總監，即係維省嘅，因為佢哋想特別聚焦睇改善運輸空間嘅安全，要做到呢一點，就需要成立一個獨立嘅組織，所以呢一個方法就係最有力可以做到嘅方法嚟嘅，同時佢亦都有其他--即係變咗佢係喺譬如好似其他嘅方案以外嘅一個選擇嘅，譬如好似一個係公共運輸局咁樣，而且佢有獨立地位，亦都係會令到佢有空間可以去做到佢嘅工作。

主席：（經傳譯員）佢有啲咩嘢支援呀？

MR JOHN STANLEY：（經傳譯員）佢自己有一個機構，有職員嘅，我唔知道有幾多職員，但係有做研究嘅，亦都有做實地審查嘅，我純粹係估嘅啫，應該佢哋嘅職員人數大概係三、四十人，但係我之後可以畀番個答案你嘅。

主席：（經傳譯員）好，唔該。佢有啲咩嘢資歷呢？即係而家現任嗰位？

MR JOHN STANLEY：（經傳譯員）佢係安全風險管理嘅專家嚟嘅，佢嘅背景同埋經驗就係咁，主要就係因為個焦點係放喺安全管理嗰方面，所以佢就會係一個好適合嘅人選去做呢個工作，就可以應用佢喺--佢原本係喺航空界嗰方面做安全管理嘅，但係亦都可以將佢呢方面嘅經驗同知識應用喺呢度，即係陸路交通嗰度。

主席：（經傳譯員）陸路交通係咪包括巴士、電車同埋火車？

MR JOHN STANLEY：（經傳譯員）係，但係佢亦都係巴士安全嘅總監嚟嘅。

主席：（經傳譯員）好，唔該。

陳先生：（經傳譯員）政府呢方面有冇咩嘢角色嘅呢？即係話係要要求嗰個安全行為，抑或係由呢個總監負責？

MR JOHN STANLEY：（經傳譯員）你可唔可以重複你個問題？

陳先生：（經傳譯員）就話政府有冇啲咩嘢角色扮演嘅呢？

MR JOHN STANLEY：（經傳譯員）政府主要就係定立呢個政策，制定嗰個政策框架，就係關於處理安全嘅，然後就由安全總監去執行有關嘅政府嘅政策。

我喺我嘅--我諗係我第二份報告裏面，就我有加一幅圖，就顯示到嗰個架構嘅，應該係第 71 頁，就係喺香港同埋墨爾本，我將佢分為三類，因為好多時候，我哋講話架構設計都係咁樣睇呢三類，就第一，就係嗰個政策層面--即係或者策略層面，第二個就係執行層面，第三就係營運嗰個層面。

喺香港同墨爾本，如果喺執行層面，香港就有運輸署，澳洲就有一個公共運輸署，然後去到--而喺最頂，即係策略層面，就係香港就係運房局，墨爾本就係有維多利亞運輸局。中間嗰層，跟住最底嗰層營運嘅層面，香港就係專營巴士營辦商，墨爾本就係合約巴士營辦商。

主席：（經傳譯員）唔好意思，我流鼻血，要暫停一陣。

下午 2 時 39 分押聆訊押後

下午 2 時 50 分恢復聆訊

出席人士如前。

主席：（經傳譯員）對唔住，唔好意思。不過我哋而家就可以係恢復正常喇。

陳先生：（經傳譯員）好，教授，未小休之前，你就係比較緊香港同埋墨爾本嗰個嘅架構嘅，你嘅觀察就係香港冇一個嘅特定安全部門，即係冇一個專責嘅安全部門，同一個話題，喺第 70 頁，即係喺呢一個圖表嘅前一頁，喺第三段，你就係做咗一啲觀察嘅，就香港嗰個嘅制度，喺最後一句，你就話「但係因為冇一個獨立嘅安全規管機構喺香港，就似乎就係相對嚟講，係減低咗大家對於安全問題嗰個嘅注重嘅。」呢個係咪你嘅觀察呢？

MR JOHN STANLEY：（經傳譯員）係。

陳先生：（經傳譯員）而家講到呢個常務委員會嘅建議，就係第 94 頁，專家報告嘅 94 頁，喺 94 頁最底嗰度，第 6 點，你就建設成立一個常務委員會，係關於巴士安全嘅，就起碼一年要開會兩次嚟到去覆檢同埋去評估最新嘅關於巴士安全嘅技術，特別就係定線嘅巴士營運，就建議政府一啲應該採用嘅安全需求嘅，關於巴士嘅車隊同埋其他巴士系統，新成立嘅加強專營巴士安全嘅專責小組就可以成為呢個基礎，但係裏面嘅成員可以係擴闊啲去包括埋其他嘅巴士經營者嘅。

我明白呢兩個嘅做法，即係要建立一個常務委員會同埋呢一個嘅運輸總監就係會係令到我哋更加主動積極咁樣去處理巴士安全嘅事？

MR JOHN STANLEY：（經傳譯員）係，我相信喺咁嘅情況，係嘅，呢一個常務委員會就係去確保有一個恆常嘅對話，就係有關嘅方面都可以係對巴士安全有一個影響嘅，都可以繼續係討論，譬如話巴士嘅製造廠、售後嗰個嘅零件供應、政府、大學等等都有一個角色，呢個就係要建立一個協作嘅架構，我就覺得呢個好重要嘅，我哋就係倫敦嘅 Mr Weston 先生所講嘅。

我哋喺墨爾本有呢一個國家層面嘅安排，就係有呢一個國家嘅重型車輛法，亦都可以適用於巴士，呢一個係一個好好嘅、開放嘅做法去確保成個嘅業內都係知道可以有咩嘢可能性嘅，我都係注意到有一啲嘅證供話，特別係口頭嘅證供，就係有一啲細啲嘅營運商，專營嘅巴士營運商就話佢冇咁樣嘅資訊，即係關於有啲咩嘢最新嘅技術可以改善安全，我覺得呢個就係確保到每一個人都可以得到好啲嘅資訊，喺一個好快速，即係相當迅速嘅時間得到呢啲資訊，就唔好要等到有意外發生先至回應嘅。

主席：（經傳譯員）係應該係要主動，而唔係被動形式？

MR JOHN STANLEY：（經傳譯員）冇錯。

主席：（經傳譯員）呢個就係可能呢個工作小組係咪就係一個只係因為有嘢而要去應對？

MR JOHN STANLEY：（經傳譯員）係嘅，要咁大型嘅災難，好似 2 月咁，你就知道有咁樣嘅反應。

主席：（經傳譯員）但係有反應都好過冇反應吖。

MR JOHN STANLEY：（經傳譯員）冇錯。

主席：（經傳譯員）最好就係可以係積極主動咁。

MR JOHN STANLEY：（經傳譯員）冇錯，我覺得要持續咁樣有一個積極主動嘅做法，由呢個工作小組，我覺得需要擴闊佢嘅成員，我見到工作小組就初初處理嘅事項個範圍係比較窄嘅，我覺得呢個都係可以理解嘅。因為喺呢個 2 月嗰個事件嗰個嘅回應，但係向前望，我諗我哋可以褪後一步話邊啲係最重要嘅關鍵嘅位置，就係要去改善。我哋特別講到係技術，因為我哋要喺多啲關注無論係營運、工作、揸車、疲勞呢個問題，特別係巴士安全，係點樣用技術嚟到去處理。

主席：（經傳譯員）當你話其他嘅巴士營運者，係咪話所有嘅巴士營運者都係呢一個工作小組嘅成員？

MR JOHN STANLEY：（經傳譯員）係，我諗唔係淨係嗰啲大嘅經營者，係細嘅經營者。

主席：（經傳譯員）即係佢哋會唔會係專營巴士營運商？

MR JOHN STANLEY：（經傳譯員）係，但係唔只淨係嗰啲大嘅營運商，細嘅都要包埋。

主席：（經傳譯員）我哋香港有六個嘅專營權，有五個嘅專營經營商，佢哋全部都係有代表坐喺呢個常務委員會嘅，但係有一啲嘅細啲嘅機構或者係小巴嘅機構好似係冇包括，你係咪應該加埋佢哋？

MR JOHN STANLEY：（經傳譯員）我覺得係，譬如百分之零點一至到二嘅，都係佢哋佔咗呢個市場佔有率嘅，因為你有幾百萬嘅乘客嘅，每一日，比起呢一個專營嘅巴士經營商，我覺得佢哋喺嗰個市場都係有一定嘅位置，所以佢哋應--即係譬如如果佢哋想去搭巴士，佢哋都應該係有權利係表達佢哋對於安全水平嗰個期望嘅，無論係邊個提供服務都好。

主席：（經傳譯員）可能你都知道，我哋對於小巴要求嘅安全水準係同專營巴士有唔同嘅。

MR JOHN STANLEY：（經傳譯員）係，但係都唔代表我哋唔可以用最好嘅技術嚟到畀不同類型嘅車種，等大家有個持續一個對話，我就覺得應該成個業界裏面都有呢啲嘅對話，唔係淨係嗰啲大嘅經營商先至係參與其中嘅。

主席：（經傳譯員）但係而家呢個工作小組就冇包埋嗰啲工會嘅，你覺得我哋係咪應該要加埋落去呢？

MR JOHN STANLEY：（經傳譯員）表面上嚟睇，我覺得我係支持嘅，當然我哋喺澳

洲係都有咁樣嘅方向嚟到去處理嘅。

主席：（經傳譯員）唔該。

羅先生：（經傳譯員）呢個常務委員會，你覺得係咪應該係諮詢性質呢？應唔應該有咩嘢法定嘅效力呢？

MR JOHN STANLEY：（經傳譯員）我覺得應該係對於政府係諮詢性質係好喇，特別係嗰個嘅負責嘅--問責局長，但係就冇咩嘢法定嘅權力，不過最好佢嘅研究、佢嘅討論、佢嘅一啲嘅結論都係可以公開嘅。

羅先生：（經傳譯員）如果話我哋嘅運輸署有一個嘅部門，可以叫做運輸安全，同你哋維省嗰個係分開嘅或者一個平衡嘅，兩者有咩嘢分別呢？

MR JOHN STANLEY：（經傳譯員）佢哋嘅角色係唔同嘅，呢個運輸安全總監，佢嘅角色主要就係要去實施一條特定嘅法例，而常務委員會就係去改善有關嘅知識、意識，係等業內裏面更加知道有不同嘅科技就可以應用，等佢哋大家都係喺買車嘅時候可以去考慮，譬如，呢個都係提高意識、協作同埋係喺業界係提高佢哋嘅認知，呢個就唔同話係去實行一個行政嘅架構去確保呢一個嘅法律係達到佢嘅目的嘅。

羅先生：（經傳譯員）我諗我問題就係問你點解要一個獨立嘅運輸安全嘅總監，而唔係公共運輸嘅一部分？

MR JOHN STANLEY：（經傳譯員）公共運輸喺你呢度就係運輸署，就係有多重嘅目的嘅，佢哋要有好多嘅目標要達到，安全係其中之一，但係唔係唯一，所以而家個問題就係優次嘅問題，可能佢未必會將安全擺喺最高嗰個嘅次序，例如話--我唔係話而家個情況係咁，但係我只係話如果我哋有一個嘅總監或者一個機構係要有多種嘅目的嘅話，佢就會有時有啲取捨，可能令到安全係有所犧牲，如果你覺得安全係一個好重要嘅問題，最好就係將佢提高到去一個非常之高嘅優先處理嘅位置，就係有一個獨立嘅機構嚟到係負責任嘅，係獨立，而且係--...

主席：（經傳譯員）真係要獨立嘅，分開嘅？

MR JOHN STANLEY：（經傳譯員）係，特別重要係要獨立嘅。

陳先生：（經傳譯員）正話，教授你就講到嗰個工作小組嗰個嘅範疇，或者我而家就係想睇一睇嗰份嘅文件，係講到嗰個工作小組嘅範疇嘅，我想請你睇九巴文件 12 第 4867 頁，呢份嘅文件就話畀我哋聽呢個工作小組嘅工作範疇，佢係要係改善專營巴士嘅安全，呢一段就話呢個工作小組係喺一宗交通意外之後...

主席：（經傳譯員）或者你講番呢一份文件嗰個背景。

陳先生：（經傳譯員）呢份嘅文件係一個附件嚟嘅，係佢哋呢一個工作小組第一次會議嘅會議紀錄嘅附件，第一頁就係喺 4859，呢個就係佢工作小組嘅第一次會議嘅會議紀錄。

主席：（經傳譯員）唔係應該講一講個議程咩？個議程係咪第一次會係 3 月 12 號。

陳先生：Yes.

主席：（經傳譯員）因為我想你知道啲事情發生嘅時序。呢個工作小組佢就係好快咁樣就係開咗會，好快咁做咗一啲嘅建議，呢個就係一個採取主動嘅做法定係被動嘅做法嗰個嘅分別，同埋係主動嘅做法嗰個好處。

喺好早期，我哋就其中一個巴士營運商畀咗一個議程我哋，我哋而家就係睇到佢哋嗰個冇經刪減嘅會議紀錄。

陳先生：（經傳譯員）黃女士係向我提出城巴文件 588 頁。

主席：（經傳譯員）城巴 1、1A 定 1B 呀？

陳先生：（經傳譯員）城巴 3，城巴 11--係第 588 頁。

主席：（經傳譯員）擺佢上網。

陳先生：（經傳譯員）我哋而家喺屏幕上見到第一次會議嘅議程，呢個工作小組係第一個會議，2018 年 3 月 13 號舉行嘅，而部分嘅議程就係去討論呢個工作小組嗰個嘅範疇同埋委員...

主席：（經傳譯員）除咗 3 月 13 號嗰度，呢一份文件有冇日子㗎？

陳先生：（經傳譯員）呢份文件冇嘅。

主席：（經傳譯員）3 月 13 號就係嗰個嘅議程，亦都係佢哋第一次嘅會議，跟住就會帶到我哋去第 4867 頁，係咪呀？

陳先生：（經傳譯員）係，4867 頁嗰個文件，就係工作小組嗰個範疇。

主席：（經傳譯員）為我哋謄本嘅緣故，或者你去讀出嗰啲同你嘅問題相關嘅段落，好唔好？

陳先生：（經傳譯員）第一段就話「喺 2018 年 2 月 10 號大埔道涉及一宗九巴公司嘅交通意外之後，就建議成立一個工作小組去檢討同埋研究一啲嘅措施去進一步改善、加強巴士嘅安全。」呢一個工作小組嘅範圍或者工作範疇就係要回應一啲嘅意外嘅，呢一個工作小組嘅範疇，第一，就係要去檢討同埋加強訓練嘅安排，第二，就係研究安全帶嘅問題，第三，就係去探討一啲技術嘅可能性，成本效益，是否可以應用嘅，同埋其他嘅事項，就係包括喺呢個車上面安裝一啲安全嘅裝置。

如果你話係一個主動嘅做法嚟講，你會預期呢啲嘅事項應該係意外之前吖，抑或係之後嚟到去發生嘅呢？

MR JOHN STANLEY：（經傳譯員）呢啲嘅嘢係應該係理所當然喺議程上面出現，就

係回應當時嘅情況嘅，但係當時嗰個嘅回應同埋種種嘅關注，你可以明白呢啲嘅事項係會即刻擺喺議程上面嘅，因為佢係要回應當時發生嘅事，但係喺呢一次嘅事，即係單一嘅會議就係唔能夠做得太多，應該係要持續嘅。你會想呢啲嘅事項係持續擺喺議程上面，嚟到係可以係預防某啲嘅問題嘅。

陳先生：（經傳譯員）如果喺一個會議係用一個積極嘅做法，你會唔會期望委員會嘅工作範圍要包埋呢啲嘅嘢嘅呢？巴士安全同埋嗰啲三項提到嘅呢？

MR JOHN STANLEY：（經傳譯員）係呀，我覺得我已經建議--喺我報告嘅建議有一個以技術為本嘅委員會，另外一個就係要專注訓練嘅，呢個就係呢度第一點。我認為技術委員會就其實可以係有佢自己嘅議程，就係到底向前望要有啲咩嘢嘅措施我哋應該要預期同埋要計劃下點樣係最好嘅方法去改善巴士安全，當然亦都係有一系列嘅措施喺呢度列咗出嚟，歐洲嗰個嘅過程就係佢哋係而家係睇緊下一輪應該有啲咩嘢強制性嘅要求，同埋要包括啲乜嘢嘅項目，我覺得如果你係要積極、主動、向前望嘅委員會，應該係要處理晒，加埋呢個歐洲方面嘅議程，去評估一下佢對香港係咪適用。

亦都喺我第一個報告，我都係有提到其中一啲嘅項目係關於而家喺歐洲進行緊嘅討論，我就寫低晒作為資料畀你參考，亦都有其他嘅項目，例如一啲嘅技術，你期望一個委員會係可以話「呢啲喺香港係咪有冇角色嘅呢？喺嚟緊三年有冇角色嘅呢？」就同所有嘅持份者嚟到傾嘅。

主席：（經傳譯員）你會唔會期望一個積極、主動嘅委員會就會係喺其他嘅司法管轄區會做緊啲咩嘢呢？

MR JOHN STANLEY：（經傳譯員）係會咁做嘅。

主席：（經傳譯員）你話譬如歐洲嗰方面，我哋知道嘅，就係有一個嘅報告，係 Weston 先生都係做緊，喺倫敦，係咪都係倫敦㗎？

MR JOHN STANLEY：（經傳譯員）係呀。倫敦嘅運輸署就係自己做咗好多嘅調查嘅，佢哋嘅「標準巴士」，我諗佢哋咁樣叫喇。我覺得我睇嚟幾好嘅。最後，香港、澳洲、歐洲都係應該要追番上 UNECE 呢一個標準嘅。

主席：（經傳譯員）倫敦運輸似乎就係想制定，公布一啲嘅巴士安全水平，就同佢哋而家用緊嘅係相似。

MR JOHN STANLEY：（經傳譯員）係喇，呢個係一個好好嘅措施。

主席：（經傳譯員）你會唔會期望一個咁嘅委員會係積極嘅、持續嘅，一路監察其他地方發生緊咩嘢事？

MR JOHN STANLEY：（經傳譯員）主席，係嘅，特別要睇下其他嘅地方係要面對咩嘢嘅安全問題，香港就應該問呢啲嘅設施係咪喺香港都用得到、係咪可以適用、要做啲咩嘢嘅研究去處理我哋而家嘅問題，因為你哋呢個環境比起其他地

方都係好有挑戰性嘅。

主席：（經傳譯員）你會唔會期望一個咁嘅委員會唔單只係遠程咁樣去監察其他地方發生緊咩嘢事，而係同佢哋喺人事方面都有一啲嘅交流，睇下佢哋有啲咩嘢新嘅發展，即係香港、歐洲同埋澳洲、新加坡同倫敦咁呢？

MR JOHN STANLEY：（經傳譯員）係呀，因為有好多嘅原材料嘅製造商，例如都係會好高興有機會參與成個過程嘅，譬如話富豪、Scania，呢啲車種，佢哋都喺呢一方面可以有好多嘅貢獻，我諗佢哋都好開心有呢個機會係參與嘅。

主席：（經傳譯員）多謝。

陳先生：（經傳譯員）我哋去下一個題目，就係嗰個安全帶嘅問題，我睇番嗰個工作小組嘅議程，就係個加裝安全帶係一個重要嘅議程嚟嘅，可唔可以用呢個題目開始呢...

主席：（經傳譯員）停一停先，就關於安全帶嘅參考，喺 4867 嗰面就唔係關於嗰個加裝或者係新巴士上面，呢個係比較一般性嘅問題，呢個係關於喺所有座位安裝安全帶嘅。

陳先生：（經傳譯員）我一陣間就會就睇番喺所有嘅座位安裝安全帶同埋睇番嗰個相關文件，睇番嗰個文件嗰個討論嘅進展。所以我想開始一般性問題，就係澳洲都市巴士嗰邊係咪規定咗安裝安全帶呢？

MR JOHN STANLEY：（經傳譯員）唔係嘅。

陳先生：（經傳譯員）有冇咩嘢原因呢？

MR JOHN STANLEY：（經傳譯員）就係覺得嗰個巴士嘅重量本身係會有畀乘客有足夠嘅保護，喺意外發生嘅時候，而安全帶所帶嚟嘅額外保障未必太多，同埋喺加裝亦都係會有啲困難，同埋個成本會關注。

可能我哋對澳洲呢個問題，就係我唔知你哋會唔會做，就係我哋會有個過程，叫做規管影響陳述書，如果我哋譬如話想探討就話要求巴士強制性安裝安全帶，佢哋就會可能要去有一個過程就係整一個規管影響陳述書，然之後去探討譬如話呢啲嘅相關成本同埋去評估嗰個唔同意外嘅可能性同埋可以減少幾多機率同埋睇番一個量化一個價值。呢啲係我哋通常都會做㗎喇。

主席：（經傳譯員）通常會邊個進行草擬呢個規管影響陳述書呢？

MR JOHN STANLEY：（經傳譯員）通常會由嗰個相關政府部門做嘅，好多嘢嘅話，澳洲全國做嘅，佢哋會通常由嗰個國家運輸委員會，呢個本身係繼承嗰個國家道路運輸委員會，我係喺嗰度做咗九年嘅副主席嘅。我哋亦都係做咗好幾次嘅呢啲嘅陳述書，關於唔同嘅車輛規定。

主席：（經傳譯員）有冇一個關於巴士嘅規管影響研究呢？

MR JOHN STANLEY：（經傳譯員）我唔知道全國有冇正式做過，但係我知道喺省嗰方面都做過好幾次嘅，所以維省個主要壓力就係我哋係校巴安裝安全帶，喺嗰啲鄉郊地方，因為嗰啲車通常都會個車速比較快，然之後你有啲好細嘅小朋友坐喺個位嗰度，但係呢個唔係強制嘅，呢個唔係一個規定嘅，唯一嘅要求就係我哋過州，嗰啲嘅旅遊巴係要安裝安全帶。

主席：（經傳譯員）我嘅理解就係呢個就係英國方面係有分別嘅，就係旅遊巴係要安裝安全帶，個問題係個速度嘅問題喇？

MR JOHN STANLEY：（經傳譯員）係。

陳先生：（經傳譯員）所以我個理解嘅話，個背景就係話你講緊係個高車速，過州行程，同埋嗰啲旅遊車咩嘢速度呀？

MR JOHN STANLEY：（經傳譯員）大約會係每小時100公里，大部分時間。

陳先生：（經傳譯員）我明白就係話個比較就係維省本身有冇雙層巴士呢？

MR JOHN STANLEY：（經傳譯員）我哋本身係冇雙層巴士提供個定線服務，但係我哋有定線巴士由墨爾本市中心去機場，我同我妻子剛剛係都午膳時間討論到，就認為就話應該係有安全帶嘅，後來 Janet 話畀我聽就係我成日叫佢戴安全帶，就應該就係佢係有安全帶嘅。

陳先生：（經傳譯員）佢哋呢啲巴士係咩嘢速度呢？

MR JOHN STANLEY：（經傳譯員）通常公路嘅話，大約係每小時100公里。

陳先生：（經傳譯員）教授，我而家想做嘅就係去睇番有關係安裝安全帶討論嘅進展，然之後就去睇番個討論點樣，同埋問你關於嗰方面嘅意見同埋一啲嘅觀察。

MR JOHN STANLEY：（經傳譯員）係嘅。

陳先生：（經傳譯員）如果我睇番最後，睇番 TD-1 第403頁，畀你睇番呢份文件，呢個係由運輸署草擬嘅文件，作為畀立法會運輸事務委員會喺2018年7月25日討論文件。呢個係嗰個工作小組嘅有關於建議嘅總結。

主席：（經傳譯員）我認為嗰封信之前嗰頁嘅話，係對於解釋比較有用。

陳先生：（經傳譯員）我諗我會讀番佢，呢個係由運輸署寫畀呢個委員會嘅，而信入面亦都提到，就話「喺我哋之前嘅陳述書提到運輸署喺3月中嘅時候係建立咗一個有關改善專營巴士安全嘅工作小組，主要係由所有專營權營運商嘅成員組成，同埋主要嘅巴士製造商去考慮同埋去探討係咪可以改善巴士安全嘅可行措施，雖然呢個工作組係進行緊，而佢嘅推薦同埋佢嘅結果要係响2018年7月25號向立法會匯報。」

有關係文件嗰度，就係睇番相關段落，譬如 407 頁，呢個就係關於安全帶嘅段落，而家直接去到 11 段，個運輸署留意到就係「同嗰個製造商確認就係所有新嘅巴士係可以安裝安全帶去符合國際水準，喺呢方面嚟講，所有新嘅新巴士自 2018 年 7 月就會安裝安全帶。」呢啲係新嘅巴士。

而第 12 段就講番喺現有巴士加裝，我唔會再講詳細。簡單嚟講，就係加裝安全帶喺下層係認為係不實際或者不可行嘅。

第 13 段就講番，就係話「喺某啲嘅型號嘅上層巴士，現有雙層巴士係可行去加裝嘅。如果上層嘅所有乘客座位都加安全帶，其實就話個增加嘅重量會大約係 300 至 400 kg，然之後嗰個容納人數就會減少七至八個。」

第 14 段，就係最尾一段，就係話「有啲巴士營運商就關注到喺舊巴士加裝安全帶唔單只會有重大財政影響，亦都可能會利用好多時間同埋人力資源，唔單只就係需要去重新調動或者去購買額外巴士去維持現有巴士服務，喺成個過程入面。」

而家睇番最後一段，附註 5，喺譬如話喺嗰個--如果--「由於冇一個關於去加裝安全帶嘅詳細報告，喺上層，主要係一個好粗略嘅估計，就係話每加裝安全帶喺一架巴士大約係二十萬左右，就唔計呢個人力同埋嗰啲雜項開支。」

第 15 段講番呢啲海外經驗同埋做法。

主席：（經傳譯員）不如你讀開嗰一段，因為呢個係相關嘅。

陳先生：（經傳譯員）第 15 段，講番海外做法同埋個經驗，「嗰個工作小組亦都係檢視番目前嘅海外做法同埋規定有關於巴士安裝同埋穿戴安全帶，喺跨城同埋跨界巴士，譬如有啲海外管轄區，譬如美國、英國同埋荷蘭係規定所有乘客座位需要安裝安全帶，譬如話有啲國家，喺英國、荷蘭同埋澳洲維省係有呢個強制規定要穿戴安全帶，然而有啲市區路線嘅巴士，同埋巴士佢有企位嘅話，冇一個海外管轄區，工作小組睇過嘅，就係有關法例規定乘客座位需要提供安全帶，有關呢啲司法管轄區嘅交通當局，呢啲市區巴士通常係比較係短程嘅，無論係個時間同埋個里程，同埋個速度亦都唔係咁快，所以佢哋唔會強加於呢啲路線加安全帶規定嘅，而係附錄 B 嘅方面都係有個建議嘅總結。」

而去第 16 段，「參照番 10 至 15 段，然之後工作小組有關於畀乘客更多保障，佢有以下建議，就係所有新巴士購買時候應該提供安全帶；同埋視乎有關於技術、營運同埋財政可能性，可能會考慮就有關舊巴士方面，就會有啲雙層巴士入面嘅上層所有座位，只要係特定嘅巴士路線，就譬如話行快速公路嘅長途路線，本身就唔係咁多停站嘅。」

呢個就係運輸署嘅建議總結，所以個建議就係話如果舊嘅巴士加裝安全帶就主要就係長程路線。

主席：（經傳譯員）主要係有啲要求，主要就係行快捷公路嘅長途路線。

陳先生：（經傳譯員）而我哋亦都有啲附註 6 講明就話呢啲係咩嘢嘅快速道路。附錄 7 主要係講，就話目前嗰啲專營巴士營運商大約涉及二千架目前調動嘅巴士。

而家我會舉啲例子，去提及番巴士營運商佢嘅關注同埋觀察，然之後我就會叫你去睇番 Weston 先生報告入面其中一段，然之後佢亦都講番同樣嘅嘢，然之後就問番你對關於嗰個題目嘅觀察。

而家就睇番嗰個工作小組討論嘅紀錄，而家就我想睇一睇番就係 KMB-12 第 4869-1 頁，而我想你睇番嗰個會議紀錄嘅筆記部分，你睇番個出席者。

主席：（經傳譯員）我哋有冇一個冇刪節嘅版本㗎，呢個文件？

陳先生：（經傳譯員）主席，4869-1 本身係冇刪節，同埋擺喺個螢幕上亦都係冇刪節嘅。

主席：（經傳譯員）我似乎唔係喺同一頁。

陳先生：（經傳譯員）唔好意思，係 4869-1。而家我哋直接去到安全帶嗰個段落，係第 13 段。

主席：（經傳譯員）可以幫一幫教授，個工作小組係咪呢方面係咪有少少嘅分歧？所以佢哋有一個技術小組去講一啲安全裝備同埋細分有一個小組係講個培訓嘅。

MR JOHN STANLEY：Yes.

陳先生：（經傳譯員）而家我睇番個小組嘅會議，所以睇番呢啲巴士營運商嘅觀察，同埋想睇番佢轄下嘅小組嘅紀錄，本身係有製造商參與嘅，所以可以喺呢度直接睇番製造商對呢方面嘅睇法。而家我哋睇番 4869-6，由第 13 段起係關於安全帶安裝嘅，我而家仍然喺 KMB-12。

主席：（經傳譯員）我一路睇緊個版本，又同其他嘅文件一樣，因為我本身係一個冇編號嘅版本，因為佢哋之前咁樣畀我，然之後我嚟到呢個研訊，然之後我有呢個有編號嘅版本--頁數嘅版本，然之後我完全係冇我所做嘅筆記，所以而家我而家想兩個版本同時都去睇。

陳先生：（經傳譯員）主席，我而家就睇番第一次會議嘅筆記第 13 段，呢個係關於安裝安全帶嘅，「而家目前所有專營巴士嘅暴露座位都已經係安裝安全帶，考慮到嗰啲技術嘅可行性，運輸署建議就喺所有新巴士同埋喺目前嘅巴士入面喺所有座位安裝安全帶。」

第 16 段，「城巴同埋新巴第一巴士質疑話有關於喺所有座位安裝安全帶嘅可行性去增加顧客安全，因為係好難地由個車長去確保所有乘客穿戴安全帶，同時巴士公司亦都係關注到企位，企喺巴士入面穿戴安全帶嘅需要，因為佢哋本身畀唔到安全帶畀佢哋，運輸署建議就係話喺交通意外之後有要求就會進行呢個全面嘅檢討嘅呢方面，而上次檢討之後已經係過咗十年，而呢啲嘅目標就喺目前嘅討論係應該集中喺嗰個技術可行性、成本效益、應用性同埋其他相關

問題，係關於所有座位安裝安全帶方面嘅。」

主席：（經傳譯員）好，呢個會議紀要嗰度就有一份陳述書嘅，就係話運輸署就提到就話，係有要求--即係喺嗰次交通意外之後，就做一個全面檢討講安裝安全帶嘅，呢方面有冇咩嘢資料呀，而家？

陳先生：（經傳譯員）或者我要之後話番畀你聽，主席。

主席：（經傳譯員）我話「一宗交通意外」就錯，應該係眾數，係「多宗交通意外」。就係因為呢度就引出一個問題，係邊個提出要求，幾時提出要求同埋講緊係邊幾宗嘅交通意外？

陳先生：（經傳譯員）係，或者我肯定係需要去考慮嘅呢點，或者我之後再話番畀你聽。

主席：（經傳譯員）好，祝你好運。

陳先生：（經傳譯員）好喇，呢個就係城巴嘅觀察。跟住我就請你睇第三次會議嘅會議紀要，4908-1，就喺 2018 年 6 月 21 號開嘅會，呢個亦都係工作小組嘅大會會議，唔係分組，我想請你睇第 25 段，即係呢個會議紀要 25 段，4908-7。

主席：（經傳譯員）而家就係去到 6 月 21 號，係咪呀？

陳先生：（經傳譯員）係，主席。

主席：（經傳譯員）好，唔該。

陳先生：（經傳譯員）教授，你可以睇番第 26 段，就有討論到加裝安全帶，都係集中講上層嘅，因為原因頭先我哋都講咗喇，就話如果要下層安裝安全帶就不切實際，所以呢度 26 段就提到話「有關於現有嘅巴士會議嘅得悉係喺某啲現有嘅雙層巴士型號，喺上層所有乘客座位加裝安全帶都係可行嘅，而城巴、龍運就提出就話佢哋就會喺上層所有嘅巴士乘客座位安裝安全帶嘅，然後呢啲巴士就用喺啲長途會上高速公路嘅巴士嗰度，即係話意思中間上落嘅站係少嘅相對。」

「之後，會議之後，就話考慮所有嘅技術可行性」，即係下一段，即係 27 段，就提到話「而家就係大部分佢哋嘅巴士都係用喺市區路線嘅，就有乘客站立嘅，如果話要強制規定所有嘅巴士乘客座位都要安裝安全帶，就唔係切實可行嘅，而且有啲係外露嘅車位，譬如話有啲車廂又唔畀企位嘅，本身嗰個安全帶先至會畀到額外保障畀坐咗喺度嘅乘客嘅。」

喺香港，而家就喺樓上係唔准企嘅，就喺樓下先至可以企嘅。即係巴士裏面，「呢方面城巴同埋新世界第一巴士就話要佢哋考慮喺啲長途巴士上面，就上層所有嘅乘客座位加裝安全帶，城巴同埋新世界第一巴就話如果佢哋有啲巴士只限於用特定嘅路線，根據現時佢哋嘅操作模式就有困難嘅，而且城巴同埋新一巴士就話好少乘客--佢哋留意好少乘客係有用安全帶嘅，所以喺財政上未

必係可行嘅，即係要加裝啲安全帶。」

所以呢度有兩點，第一，就係將嗰個加裝安全帶嘅範圍縮窄到會行長途高速公路巴士嘅上層，第二，有提出一點，就關於嗰個財政上係咪可行，同埋係咪有用。

主席：（經傳譯員）或者要講畀教授聽，我哋已經聽晒所有城巴嘅證供，係咪呀？佢哋對於話喺巴士裝安全帶，佢哋亦都係表達咗好清晰、強烈嘅立場。

陳先生：Yes, they have.

主席：（經傳譯員）或者可以請教授睇番相關嗰個謄本，公聽會謄本，就係 5 月，等佢睇番。

陳先生：（經傳譯員）係，或者我哋而家可以搵番出嚟，但係等緊嘅時候，就可以睇番 Weston 先生個報告嘅，因為佢都有提及呢一點嘅，Weston 先生嘅報告就喺 134 頁，即係個文件夾 134 頁嗰度，134 頁係 Weston 先生嘅報告，相關部分講安全帶嘅就係嗰頁嘅中間。

「目前巴士司機或者乘客安全帶喺英國唔係一個法律規定嚟嘅，有關於安全帶嗰度，佢哋嘅運輸署嘅指引就提到話：

『自從 2001 年 10 月 1 號向前或者向後嘅所有新嘅巴士嘅座位，即係新巴士裏面都要安裝安全帶嘅，就有助防止死亡或者嚴重嘅傷害，唔單只話因為個乘客可能會向前，而係架巴士如果係翻側嘅時候亦都係有幫助嘅。

唯一可以豁免嘅就係如果巴士係有企位嘅，容許豁免就係因為呢啲巴士主要係用嚟短途，而且喺時間上同埋行個距離嗰度，同埋考慮到佢嗰個喺市區路線，佢個速度唔會太快，所以先至可以容許豁免，但係我哋都明白首先就要營辦商決定揀選邊啲巴士嚟要安裝呢啲安全帶。』

目前倫敦嘅營辦商係有裝到安全帶嘅，但係有一間公司傳統上，以前一間 First Group 就係有裝到安全帶，但係之後佢哋賣咗佢哋嘅倫敦嘅業務畀 Tower Transit and Metroline，呢個就係 13 年 6 月。」

而家又或者睇番城巴嗰度，搵到喇，我哋搵到嗰個謄本，謄本紀錄第 3 日。

主席：（經傳譯員）第 3 日係咩嘢，我唔知你講緊，用緊咩嘢日曆，係北韓日曆定咩嘢日曆呢？第 3 日係指乜嘢呢？

陳先生：（經傳譯員）係星期二，2018 年 5 月 29 號。

主席：（經傳譯員）係。

陳先生：（經傳譯員）第 15 行，鄭生係城巴嘅代表，問題就係「運輸署署長有冇要

求喺你巴士上面安裝任何具體嘅安全設備？」佢鄭生回答，佢就話「等我講兩個例子，運輸署就有要求巴士營運商就係喺一啲外露嘅巴士就要裝安全帶嘅，另外，我哋有少數嘅巴士因為嗰個樓梯係比較直同長，所以運輸署都要求我哋加裝額外嘅扶手，即係嗰啲冇遮擋嘅座位。」

唔好意思，主席，更加合適嘅參考紀錄應該喺下一日嘅證供，即係 5 月 30 號 2018 年，係星期三嚟嘅，第 58 頁。

主席：（經傳譯員）好，唔該。

陳先生：（經傳譯員）第 19 行，Duncan 先生就係委員會嘅律師，佢就想證人睇一點，就係關於話「喺所有座位；同埋(b)，喺所有新巴士上層所有座位安裝安全帶嘅可行性」。

主席：（經傳譯員）Duncan 先生提緊嘅係乜嘢？

陳先生：（經傳譯員）佢係引述一份聲明，就係城巴嘅遠期計劃裏面嘅聲明嚟嘅，或者我可以講番，就話「可以喺上層所有座位都安裝安全帶嘅，不過我哋嘅觀察顯示而家如果已經有--即係嗰啲譬如冇遮擋嘅座位而家其實已經有安全帶，因為法律冇規定一定要戴安全帶，所以好少人係會戴安全帶，而規管當局亦都冇執行，所以要加裝安全帶其實即係浪費資源嘅，因為絕大部分嘅乘客都唔會戴安全帶嘅，就算你提供咗都好。」呢個就係 Duncan 先生喺佢哋講到城巴嗰個遠期計劃時候就有作出一個咁嘅陳述。

然後 Duncan 先生就請城巴嘅代表睇另一段文字，就係運輸署提到關於安全帶嘅問題嘅，然後喺第 60 頁，主席，就特別問到加裝安全帶嘅問題到底係咪真係浪費資源，第 60 頁 17 行就係主席問嘅問題，就話「你之前答就話要加裝安全帶都係浪費資源，因為絕大部分嘅乘客都唔會纜嘅，就因為唔係一個要求執行嘅，你既然有咁提及，如果唔係法例規定，你係咪覺得佢哋浪費資源呢？」

鄭先生亦都有問，「因為而家法例冇咁規定，你話巴士唔規定一定要纜安全帶嘅，就算真係法例有咁規定，但係如果冇人去執法，我都擔心會係浪費資源嘅，所以我哋係維持原來嘅睇法。」

主席就問「你有冇同運輸署提出呢個觀點？」鄭生就話「我哋有，我哋同事係有同運輸署提過嘅。」所以係城巴就有表達咁樣嘅睇法，同佢哋喺工作小組嘅會議紀要所提嘅係一樣嘅。

好喇，喺我問你對呢件事嗰個觀察之前，我亦都想講畀你聽我哋嘅巴士所行嘅高速公路係點嘅，個時速限制可以去到 80，但係巴士係有個時速限制係定喺 70 公里嘅啫，所以喺高速公路，巴士最多都係行 70 公里。

主席：（經傳譯員）但係去機場嗰個高速公路嗰個時速限制係 110 公里？

Transcript by Epiq Hong Kong, Limited

陳先生：（經傳譯員）係呀，但係喺巴士上面嗰個時速限制亦都係限咗喺 70 公里嘅。

主席：The legal speed limit for a franchised bus is 70 kilometres per hour?

陳先生：（經傳譯員）所以巴士喺高速公路所行駛嘅速度都係咁。好喇，你聽晒所有呢啲資料之後，你有咩嘢觀察或者評論，即係對於安裝安全帶呢點？首先，係咪所有座位都安裝？第二，係咪淨係集中睇上層，巴士上層？上層就冇企位嘅。

MR JOHN STANLEY：（經傳譯員）好，多謝。或者咁係講番返去半個鐘頭時候我畀一個答案，就話嗰個規管嘅問題，其實呢度，個規管嘅影響呢度係有兩個方面，第一，就係技術上係咪可行，係咪可以喺巴士嘅某啲地方安裝安全帶？例如話新巴士嘅上層，或者係所有現有巴士都係加裝呢？第一個問題，首先就係技術上係咪可行？第二，就係如果係技術上可行，嗰個成本效益嘅比率係點樣呢？即係裝咗呢啲安全帶，會係點呢？即係意思安裝安全帶要幾多錢，然後減少意外嘅程度又會係點樣？同埋裝咗安全帶，啲人會唔會纜呢？又係要考慮。

喺任何具體情況，我都冇咩嘢意見話纜安全帶係好定唔好，但係我諗就係應該要做一個規管影響嘅陳述，就會睇下嗰個或然率，譬如話唔同嘅種類嘅意外嘅影響係點呢？你亦都可以畀一個金額佢，就話以金額嚟計算，可以減少幾多意外，同埋亦都睇下如果纜咗安全帶係咪可以減少傷害嗰個或然率亦都可以計算，因此就需要先做埋嗰個成本效益嘅分析，政府先至可以能做到一個政策決定，到底係咪需要裝安全帶，係咪可行，係咪值得。

所以我對呢個問題嘅睇法就係首先要做一個成本效益嘅分析，就唔係淨係話啲人覺得會咁或者又係咁樣，唔係咁，而係既然有人提出一啲關注，即係唔同方面都提出關注，呢啲亦都係真實，係合情合理嘅關注，因此就要睇下係咪真係需要安裝，但係直至你做好個成本效益分析之前，所有呢啲睇法都只能夠當成係揣測。

如果你問我嘅直覺，可能就係唔值得嘅，即係要大規模咁樣去加裝就唔值得，但係呢個係一個直覺嚟嘅，肯定係需要做一個全面嘅評估先得。

主席：（經傳譯員）係喇，就正正因為憑正覺唔夠好，所以就要全面做一個成本效益嘅分析？

MR JOHN STANLEY：（經傳譯員）係喇，冇錯，主席。

主席：（經傳譯員）然後先至可以--咁做嘅時候，就要睇番各個唔同嘅元素，係咪呀？你頭先提到嗰啲。

MR JOHN STANLEY：（經傳譯員）係喇，正正係咁。原則上，做一個成本效益分析係好直截了當嘅啫，就可以攞到一啲或然率或者計到個價值係點樣，睇下呢個

過程係咪值得嘅。同埋你喺呢個過程就會一定睇到各種嘅因素，係頭先即係你提到嗰啲各人嘅睇法，就可以去從咁嘅角度去分析。

主席：（經傳譯員）應該有邊啲人係參與做一個成本效益嘅分析呢？你會嗌啲咩嘢人做呢？你會想佢哋畀到啲咩嘢資料你呢？

MR JOHN STANLEY：（經傳譯員）好明顯，首先你要同嗰啲提供設備嘅人，即係嗰啲製造商，佢哋就會可以畀到啲好實際嘅資料同埋意見畀你，話技術上咩嘢可行、咩嘢唔可行，新嘅車、舊啲車款可行定唔可行；咁又包括埋就係做安全帶嘅製造商；可能你亦都會想問下其他做一啲譬如話顧客嘅調查，就係話有啲咩嘢因素會影佢哋係咪纜安全帶，如果係纜安全帶，係咪大部分情況都會咁做呢？

譬如話喺澳洲，你會睇番嗰啲巴士，旅遊巴，睇下啲人係咪會纜安全帶，如果佢哋係有纜嘅，到底佢哋因為咩嘢理由、點解會纜安全帶呢？係咪因為佢哋有啲市場嘅認知嘅運動，所以佢哋之後就會咁做呢？所以嗰個過程係點，係乜嘢鼓勵到佢哋會咁做呢？可能唔係因為話巴士上面有稽查，所以佢哋就會罰佢哋，佢唔纜安全帶。

所以你就要睇下有咩嘢原因，呢個過程...

主席：（經傳譯員）你未繼續之前，我想打個岔嘅，喺香港，我哋喺一啲冇遮擋嘅位置係有安全帶，譬如話喺上層嘅最前排，要做一個嘅調查，就咁係咪可以好簡單咁睇到大家會唔會用安全帶呢？

MR JOHN STANLEY：（經傳譯員）絕對係。

主席：（經傳譯員）雖然呢個已經係認為一個危險嘅位置，喺巴士度，但係佢哋係咪真係用緊嘅呢？

MR JOHN STANLEY：（經傳譯員）係，絕對係，主席，我覺得我哋喺話我太太同埋我自己都琴日係有戴安全帶嘅，我哋嚟自呢一個維省，我哋係即係話第一次去見到一個地方係話必須要戴安全帶嘅。

主席：（經傳譯員）即係話據我所知，你係去赤柱，係咪呀？

MR JOHN STANLEY：（經傳譯員）冇錯。

主席：（經傳譯員）所以呢個係一個好嘅理由嚟到去戴安全帶嘅。你正話又去形容到底邊啲人我哋係應該向佢求助同埋邊啲嘅資料係想問佢哋攞嘅，去做呢一個分析嘅時候？

MR JOHN STANLEY：（經傳譯員）冇錯，就係嗰啲喺成本方面，我哋係講緊車輛、供應商同埋製造商嘅，去到事後安裝，我諗我哋要問下嗰啲事後安裝嘅人員，即係譬如我哋喺悉尼，喺墨爾本就有一啲係車輛--車身嘅安裝嘅人，我哋就會特別做呢樣嘅工作嘅，我就會問佢，就係睇下有冇辦法係事後安裝㗎？係咪好

貴㗎？我諗呢啲你都要全部要考慮嘅。

亦都會要求一個相當大嘅改裝嘅，喺個底部，如果真係咁，有啲咩嘢嘅好處呢？你需唔需要睇下有啲咩嘢類型嘅意外呢？同埋係咪嗰啲企喺度嘅人受傷，定係坐喺度嘅人受傷呢？到底喺呢啲意外嘅時候，如果真係坐喺呢啲冇遮擋嘅位置嘅人戴咗安全帶，係咪就會減少咗意外呢？同埋要做啲乜嘢去鼓勵大家戴安全帶？

如果我係做呢一類嘅工作，我會同啲心理學家傾下，點樣係將嗰個訊息係傳遞到畀人，即係知道戴安全帶係重要嘅。呢一點你就要睇下喺坐呢啲位置嘅人佢哋做啲咩嘢呢而家，喺香港？我覺得要睇下嗰個或然率，我哋應該同所有嘅呢一方面嘅持份者同埋香港不同嘅意外帶嚟嘅成本，即係話一個致命嘅意外喺香港嘅成本係幾多？一個有嚴重受傷嘅意外嘅成本又幾多？一個輕微受傷嘅意外又有咩嘢成本呢？睇下呢啲個代價係乜嘢，然後就係睇下減少咗意外嘅或然率嗰個好處係咩嘢喇。

主席：（經傳譯員）去搵意外發生嘅時候詳情係點、啲人係點樣受傷、喺邊度受傷、點解佢哋有受傷，我相信你係會想諮詢警方或者係巴士公司？

MR JOHN STANLEY：（經傳譯員）一定會，如果我喺澳洲係做呢啲嘅工作，我會係同呢一個大學嗰個嘅意外研究中心，佢哋就係專做呢一類嘅分析嘅，當然要問埋警方，佢哋會有一啲資料嘅，喺香港，就問埋運輸署，因為致命嘅意外都係有相當之好嘅數據，我諗仲有，去睇呢啲嘅資料嘅撮要應該都有好多嘢可以睇得到嘅。資訊嘅來源亦都係好緊要，如果係有大學嘅知識樞紐，即係一啲中心，大學嘅研究中心，係專門做車輛安全嘅，我諗佢哋都係應該要參與嘅。

主席：（經傳譯員）唔該。

陳先生：（經傳譯員）我想問下，教授，喺墨爾本，當你講到市區嘅巴士路線如果係有企位嘅話，佢哋嘅車速係幾多，我哋唔好計佢去機場嗰個嘅車速，會唔會係有 70 公里呢一個限制㗎？

MR JOHN STANLEY：（經傳譯員）我哋一般個時速限制係 60 公里，但係喺一啲高速公路係可以去到時速 100 公里嘅，一個主要嘅運輸嘅走廊就係有競投嘅服務嘅，呢個喺我哋東面嘅走廊，係墨爾本，嗰度有一條嘅巴士線，佢啲巴士可以去到 100 公里嘅個時速，喺一日嘅某啲嘅時間，但係如果喺呢一個交通嘅高峰期就唔可以嘅，但係呢條係一條巴士線，佢哋可以喺一日裏面大部分時間行到 100 公里，喺其他嘅網絡，平均嘅時速 22 公里，如果你睇下嗰個嘅時間表，佢哋嘅時速限制平均係 22 公里嘅，有啲可能喺一個短嘅路段可以去到 60 公里。

陳先生：（經傳譯員）我想澄清一下，即係喺有啲嘅市區巴士係冇安全帶，都可以行到 100 公里嘅，時速？

MR JOHN STANLEY：（經傳譯員）係，可以嘅。

陳先生：（經傳譯員）我哋已經講咗事後安裝安全帶嗰個嘅成本，或者我哋而家可以去下一個題目，就係補貼嗰個問題嘅，...

主席：（經傳譯員）未講呢一點之前，我想同你講一講時速限制呢一方面，車速，嗰個最低嘅時速，或者我講清楚啲，嗰個一般嘅嗰個嘅時速限制，就係 60 公里，咁有冇一個下限嘅呢？

MR JOHN STANLEY：（經傳譯員）有嘅，可以係 40，例如經過學校就係咁，另外就係一般嚟講，係 50 公里，當然有一啲嘅市政府或者係地區議會就係想係略為提高，或者甚至係減到係時速 30 公里嘅，特別喺一啲當區嘅街道。

主席：（經傳譯員）有幾常見嘅呢？

MR JOHN STANLEY：（經傳譯員）唔係太多嘅，喺一啲嘅大都會區嘅內面，內街，就譬如有好多係踩單車人士就有呢啲要求。

主席：（經傳譯員）但係就冇去到咁低，係咪呀？

MR JOHN STANLEY：（經傳譯員）冇，一般嚟講係限速 50 公里，喺高速公路係 100。

主席：（經傳譯員）經過學校就係 40？

MR JOHN STANLEY：（經傳譯員）係呀，喺朝早某啲嘅時段，不過應該係朝早八點半至到九點半，係下晝嘅...

主席：（經傳譯員）咁即係嗰個嘅時速限制係有變嘅？

MR JOHN STANLEY：（經傳譯員）係呀，因為學校朝早返學同埋放學嘅時候，就跟住去番 60 嘅，之後。

主席：（經傳譯員）會唔會有一個電子嘅標示，好似係訊號，好似係倫敦咁樣，就會話畀人聽「而家呢度經過學校，你嗰個嘅時速限制有變嘅」？

MR JOHN STANLEY：（經傳譯員）有嘅，會有一個圓圈，話裏面寫住“40”嘅。

主席：（經傳譯員）喺墨爾本，關於呢一個車速同埋一啲係巴士喺撞車嘅時候對於人嗰個傷亡有冇一個連繫嘅呢？

MR JOHN STANLEY：（經傳譯員）你問呢一點好有趣，呢一個係有一份嘅文章，係喺 Melbourne Age 呢一份報紙上面，呢個就唔係真係我講於巴士，but 係講車速同埋呢一個行人死亡嗰個風險，就係講緊點樣路人嗰個死亡嗰個或然率係會大大咁升高嘅，如果係超過咗 40 嘅話，呢個係基於 40 公里嘅，呢個係基於呢一個大學做嗰個研究嘅，如果你鍾意，我會畀嗰份文件你睇嘅。

主席：（經傳譯員）呢一個大學嘅意外研究中心？

MR JOHN STANLEY：（經傳譯員）係呀，係喺一個嘅意外研究中心。

主席：（經傳譯員）多謝你，我哋都好樂意要睇到嘅。呢個我諗你亦都係睇到，喺倫敦，佢哋嘅倫敦運輸就係將不同嘅時速同嗰個致命傷亡嗰個風險係有一個連繫嘅？

MR JOHN STANLEY：（經傳譯員）係嘅。

主席：You will have noted the significant drop in the risk of fatalities if the vehicle is doing, for example, 20 miles an hour rather than 30 miles an hour.

MR JOHN STANLEY：（經傳譯員）你會睇到喺墨爾本，由 20 去到 30 係比較平嘅，但係去到 40 嘅時候係大幅咁樣增加，所以嗰個嘅風險去到 40 之後係大幅咁樣攀升嘅，就即係多咗呢個機會係行人會係死亡嘅。

主席：（經傳譯員）你話係行人死亡，即係佢哋喺車外面嘅，唔喺車上嘅？

MR JOHN STANLEY：（經傳譯員）係喇，佢哋譬如喺車前行過。

主席：（經傳譯員）或者係畀架車撞到呀咁。

MR JOHN STANLEY：（經傳譯員）係喇。

陳先生：（經傳譯員）而家我想講一講補貼呢個問題，喺呢個報告，你有睇過係提供補貼呢個可能性嘅，你嘅建議就係香港嘅房運局從呢一個社會嘅利益去睇一睇，為巴士公司提供補貼呢個問題嘅。想請你睇下你自己嘅報告嘅第 92 頁，就係關於呢一點嘅，我想讀第二段：

「香港嘅公共運輸系統就係每一年有好大嘅社會對外嘅效益嘅，有啲就係譬如嗰個嘅承辦者就係會有土地嘅增值，如果嗰個嘅營運者係一個地主，亦都係適用於鐵路嘅，多過係巴士嘅。專營嘅巴士服務就係對於社會係提供多啲嘅利益，就佢哋提供嘅利益係多過佢哋所收到嘅車資嘅，特別係減少道路擠塞，係增加一啲社會共融同埋改善呢個道路安全嘅表現。如果係需要用收費嚟到係譬如請人，呢個社會效益係會降低，呢一個嘅損失係足夠係有理據叫政府為呢啲嘅營運商提供一啲嘅財政資助嘅。」

下一段，就係「房運局同埋運輸署就係應該要評估喺經濟方面，香港嘅專營巴士帶嚟嘅社會效益，去確保佢哋去評估係咪有理由為呢啲嘅服務提供一啲嘅財政支援，即係如果呢件事係提出嘅話。我哋亦都睇到有關嘅資助一定要係睇下第一日呢一個委員會律師方面嗰個嘅意見。呢個對於安全嘅影響就係更加好嘅，我哋就話將每一個嘅車長如果每日要揸車超過十二小時呢樣嘢係完全排除嘅，我哋而家唔係話將十二個鐘頭就係一個限制，其實墨爾本嘅經驗，就係話十二至十四個鐘都可以安全嘅，但係必須要有一啲制度性嘅安排，就係要著重呢個安全嘅，如果真係有一個嚴格嘅安全嘅規管嘅話。如果冇咁樣嘅安排，要

司機揸過十二個鐘一小時就係令人擔心㗎喇。」

我想請你睇下 Weston 先生嗰個嘅報告，都係講緊類似嘅事情嘅，掟去 152 頁，專家報告，頭一、二段，就係喺 8.3 之下嘅，喺大概中間--第一段中間開始讀起，Weston 先生就話香港係冇呢一個補貼嘅，喺中間就話：

「佢話呢個係一個非常之難得嘅成就，但係呢條問題就要問嘅到底係營運一個商業嘅網絡而冇公眾補貼係咪可持續嘅，同埋長遠嚟講，係咪會引致一啲錯誤嘅行為或者對於營運嘅某啲方面，就係失咗焦嘅。呢個過分咁樣限制呢個營運商嗰個嘅投資，就會令到呢一個嘅網絡就冇咩嘢發展，就唔能夠發展一啲新嘅科技同埋措施嘅。」

「其實有一啲新嘅安全措施，譬如使用新嘅安全呢一個嘅一啲嘅技術同埋巴士訓練係可以改善安全嘅。從佢哋呢個營運權之外，提供一啲支援其實係有幫助嘅，而且對公眾嘅利益嚟講，係有好處嘅。」

我想講下呢兩段嘅，Weston 先生就係講到提供一啲嘅資助，就係要嚟做科技嘅應用同埋訓練嘅。你覺得你哋兩個人係咪有一啲唔相同嘅睇法呢？

MR JOHN STANLEY：（經傳譯員）我覺得我哋睇法係冇分歧嘅，而家重點就係話我哋大家都係話公共交通一般嚟講同埋專營巴士，特別嚟講，喺佢哋營運嘅時候，其實對於社會整體係有一啲嘅界外利益嘅，而呢啲嘅利益對社會係有價值嘅，而嗰個價值係超過嗰個營運商所得到嘅商業回報嘅，我覺得呢點好重要，我哋要明白呢啲界外利益嗰個價值。香港，我覺得需要睇下呢一方面，佢即係公共運輸服務嘅一啲社會嘅價值，我覺得嗰個嘅利益都係相當龐大嘅。

如果我哋睇番呢個咁嘅背景，你應該睇下會唔會有一啲嘅政策措施，例如係鼓勵用科技、訓練去測試下佢哋係咪有一啲嘅界外利益，咁樣就如果係嘅話，亦都可唔可以係改善到呢個安全嘅環境，我哋可以透過使用技術同埋訓練或者透過一啲嘅錢，如果中間真係有關係嘅，都係有理據政府係用一啲錢資助呢啲項目嘅。換句話講，如果嗰個界外利益係高過所涉及嘅成本，佢哋唔應該係由營運商去出資嘅。

我覺得呢個就係重點，重點就係要睇下係對於整體社會嚟講，嗰個界外利益係咪話單單係靠呢個車費嘅收入或者佢哋發展土地嗰度係收番嚟嘅。

陳先生：（經傳譯員）喺第一段，就 Weston 先生嘅報告就話，佢就係關注如果你唔提供一啲公眾嘅補貼，有可能就係會引致一啲錯誤嘅行為，或者大家就係唔會重點睇下有咩嘢技術、有啲咩嘢措施可以改善安全嘅，呢個係咪都係你嘅關注呢？

MR JOHN STANLEY：（經傳譯員）我覺得呢度嗰個嘅論據就係一啲嘅福利、經濟嚟講，即係如果你完全係漠視個界外利益，嗰個服務本身嘅提供係唔夠嘅，你應該睇下，你要儘量增加對社會嗰個效益，提供多啲嘅服務，就唔好單單係從一

個商業嘅營運角度去考慮嘅。

我早前係提過嘅，喺每兩年有一個嘅大會，就係講到公共運輸嘅競爭同埋規管嘅，就係有一個嘅論壇係有好多學者同埋營運者嚟到去參與嘅，政府又有參與，我自己就係主持呢個論壇，就講到我哋過去十年喺呢方面所做過嘅嘢，亦都睇下公共運輸服務帶嚟嘅價值。當時係學界公共運輸營運者、政府都有一個非常好嘅對話，喺呢個論壇，我覺得如果香港嘅運輸署同埋有興趣相關嘅學者都能夠參與呢個兩年一次嘅論壇應該係非常之好嘅，下一次就會係出年喺新加坡舉行。

主席：（經傳譯員）有邊個司法管轄區同埋代表參與個會議嘅？

MR JOHN STANLEY：（經傳譯員）主席，我諗上一次嚟講，有二十二個唔同國家，但係有三分之一嘅與會者係學者嚟嘅，有一部分就公共運輸營運商參與，我留意到個文章，之前你提及到就係話嗰個 Tower Transit in London，而 Neil Smith 嗰個東主係經常參與呢個會議嘅，喺南非、南美亦都係好積極咁參與，有好多嘅歐洲國家都有參與，而澳洲亦都係會有好多代表團同埋紐西蘭，二十二個國家--政府、大學同埋營運商嘅高層代表亦都係有出席嘅。

主席：（經傳譯員）我亦都睇到就係下一個嚟講，會喺新加坡度舉行，新加坡本身亦都會有參與？

MR JOHN STANLEY：（經傳譯員）係嘅。

主席：（經傳譯員）而政府同埋巴士營運商？

MR JOHN STANLEY：（經傳譯員）新加坡嘅陸地運輸局本身會係主持呢個會議嘅，我認為有啲嘅營運商本身會係贊助人。

主席：（經傳譯員）幾時舉行呢？

MR JOHN STANLEY：（經傳譯員）我認為係下年9月嘅，或者8月，我會補充呢啲資料畀你。

主席：（經傳譯員）多謝。有冇啲公開嘅--有冇會出版一啲資料畀公眾參閱呢？

MR JOHN STANLEY：（經傳譯員）有嘅，最緊要就係成個過程嚟講，係會公開嘅，...

主席：（經傳譯員）網上有冇呢？

MR JOHN STANLEY：（經傳譯員）好多都有嘅，有啲最新就係嗰啲學術期刊嘅文章，所以就唔係話互聯網好容易搵到，但係你可以攞到呢啲文章嘅副本，有時佢哋係以書籍形式出版，但係而且出版就係成個過程嘅最重要嘅部分，呢個係一個好唔尋常嘅會議，就係話佢喺四日間，三日就會有一個工坊嘅形式，然之後與會者就揀單一嘅題目，然之後用三日時間去探討，而個題目可以係譬如點

樣可以喺公共運輸運作嗰度有更多嘅競爭，或者而且用三日嘅時間同同行去討論，呢啲嘅我主持嘅工作坊，譬如話用三日睇番公眾運輸嘅益處，同埋我哋點樣去評價同埋可以令到佢成為現金流去支付呢啲嘅服務嘅。

主席：（經傳譯員）多謝。

MR JOHN STANLEY：（經傳譯員）主席，我嘅太太指出，就話下次嘅會議係星期日，8月25號，去到星期五。

陳先生：（經傳譯員）而家我哋去另一個範圍，就係去草擬呢啲嘅指引。

主席：（經傳譯員）我哋而家講番補貼，或者政府或者係有角色去解決Weston先生所指出嘅問題，呢個之前都係提及過，就係由巴士營運商有關於呢啲去實施呢啲決定嘅成本，就係話係有關喺專營巴士安裝安全帶。

陳先生：（經傳譯員）係安全帶，我哋聽到九巴嘅作供，係梁乃鵬博士，我認為就話佢曾經同一個政府官員討論過一次嘅。

主席：（經傳譯員）或者我哋可以睇番相關會議嗰個對話紀錄嘅相關段落，就睇下--唔係，就我而家睇番嗰個係冇頁數嘅嗰沓文件，嗰個有關於車輛安全裝置一個轄下小組喺2018年6月12號第8段，我想特別針對嗰段畀教授睇一睇。教授，你之前亦都係知道，就係話你對於城巴，由於關於譬如話關於安裝安全帶要自負成本，然之後有啲關注，然之後佢哋嘅經驗就係話佢哋嘅乘客本身唔會用佢哋，然之後政府係唔會強制去執行，呢啲係冇用嘅。大約係佢哋嘅大意係咁講。或者我睇番第8段。

陳先生：（經傳譯員）如果我哋睇番嗰個會議嘅紀要，KMB-12，第4932-1，呢個係會議紀要嘅第一頁。

主席：（經傳譯員）咩嘢日期呀？

陳先生：（經傳譯員）2018年6月12號。

主席：（經傳譯員）唔該晒。

陳先生：（經傳譯員）就相關嘅段落，梁乃鵬博士講番嘅就係4932-3，第8段，或者我就咁讀，「城巴講過就係話現有嘅巴士嘅暴露嘅座位本身有三點式嘅安全帶，由佢哋嘅日常營運經驗，大部分坐喺嗰啲位嘅乘客都唔戴安全帶，而呢啲嘅加設安全帶係成本好高，同埋如果冇人用嘅話就會啲錢。同意就係話向乘客嘅教育同埋推廣係應該係進行去推廣用安全帶，而城巴就話佢哋大約2013年之後有一千一百架巴士可能係安裝上層座位安全帶係可行嘅，而預計個成本係二億四千萬，係公司係負擔唔到，城巴要求政府去提供資金或者補貼畀呢啲加裝安全帶嘅項目，如果係規定嘅話。所以目前佢哋係唔會自資去加裝安全帶，同意就係話呢個財政嘅問題會係喺工作小組入面討論嘅。」

「而睇番九巴嗰面，佢哋強調就係話佢哋支持喺新巴士安裝安全帶，而視乎

係嗰個技術細節同埋嗰個巴士製造商嘅加裝計劃書，佢哋考慮就係話係以分期數嚟去安裝特定路線嘅安全帶，因為嗰啲路線就啲乘客傾向會用佢哋嘅。而新大嶼山巴士係反對，因為低使用率同埋高成本，佢係目前冇計劃去加裝安全帶。」

主席：（經傳譯員）基本上佢係預備喺新巴士安裝，同埋喺現行路線巴士裏面都會考慮安裝。

陳先生：（經傳譯員）睇番之前嘅會議紀要，就係九巴就係有呢個提議，就係話喺安裝上層座位嘅安全帶同埋喺啲特定嘅長途路線或者係行公路線。

提供一個完整嘅圖畫，就話梁博士嘅作供，喺上次嘅聆訊入面，我睇番嗰個聆訊紀錄，喺 2018 年 9 月 12 日，呢個係第 18 頁，第 14 行。

主席：（經傳譯員）等少少，等佢喺個螢光幕上面顯示。

陳先生：（經傳譯員）第 14 行，「我都想補充嘅，最近我同政府官員會晤，而我同佢講，就係話要求政府睇下佢哋可唔可以關於喺安裝安全帶嗰面可唔可以提供援助，而個答案係正面嘅，如果我可以咁講嘅話。」

「你可唔可以講下你同邊個討論過？」

「係運輸署常秘 Mr Joseph Lai 同埋佢嘅副手 Mr Kevin Choi 先生，運輸署副秘書長。」

主席：（經傳譯員）呢啲係我哋本身係討論過嘅範圍，但係佢本身喺香港係一個實質嘅問題，所以我哋明白你嘅意思就係要求去進行一個成本效益分析，你一方面講到話政府係可以作一個政策決定，所以我哋就會係咁做，但係當政府作呢個政策決定嘅時候，佢通常都要去進行呢個--參照呢個成本效益分析？

MR JOHN STANLEY：（經傳譯員）你希望會咁做喇，主席，證據就係唔一定成日經常咁做，譬如話喺呢個情況嚟講，你會希望政府會進行成個步驟，呢個成本效益同埋辨悉嗰個效益，如果呢啲效益本身係明顯，呢啲係好大嘅界外因素，但係呢啲嘅效益本身係唔會由個營運商去獲取嘅，所以絕對係有理據去探討下用津貼嚟去促成呢個過程。

主席：（經傳譯員）呢個可能係對於營運商有利，但係如果能夠避免意外，令到乘客唔會受傷，當個巴士撞到唔知--作故障嘅時候，呢啲係對個營運商亦都係相應都係有利嘅。

MR JOHN STANLEY：（經傳譯員）係，呢啲係啱嘅。

主席：（經傳譯員）但係佢哋唔使咩賠償喎。

MR JOHN STANLEY：（經傳譯員）係，大部分嚟講，亦都係呢啲界外嘅利益唔係由營運商去獲取嘅，所以你而家就建議就係話個成本係由個營運商同埋政府分

擔。

主席：（經傳譯員）係，但係如果政府係使用納稅人公錢嘅時候，政府係咪需要去睇番嗰個利益--界外效益同埋成本呢？

MR JOHN STANLEY：（經傳譯員）係嘅，如果係去進行呢個承辦，我哋會--佢嗰個過程都係之前一個鐘頭前講過。

主席：（經傳譯員）係嘅。陳生。

陳先生：（經傳譯員）主席，我而家有三個題目未講，主要係個指引嘅問題，第二個就係安全數據透明度，同埋嗰個巴士車長嘅培訓，我預大約多二十分鐘至半個鐘頭去做完嘅，你想唔想休息一下，然之後之後返嚟繼續？

主席：（經傳譯員）我而家明白就係話你都企咗好耐，同埋教授亦都作供好耐。

下午 4 時 21 分押聆訊押後

下午 4 時 38 分恢復聆訊

出席人士如前。

主席：（經傳譯員）係，陳律師。

MR JOHN STANLEY：（經傳譯員）多謝主席。教授，或者我就直接去講嗰個工作時數指引，我諗你提嘅最重要嗰點就係話墨爾本同香港嘅分別，喺墨爾本，工作時數指引就係喺入咗法例裏面嘅，而香港我哋就純粹只係一個指引。

或者可唔可以請你睇你個專家報告嘅相關段落呢？就係 91 頁，你嘅專家報告 91 頁，我睇緊中間嗰段，91 頁，或者我讀出嚟：

「香港同墨爾本兩個主要嘅分別，就係指話同工作時數或者休息時數有關嘅就係第(1)，墨爾本（維省）嘅規定對於工作／駕駛同埋休息時間嘅規定就係寫咗入去規例嗰度嘅，就係全國重型車輛（疲勞管理）全國規例 2013；而第(2)點就係有關嗰個安全責任同埋責任鍊都係有提及嘅，而香港就純粹只係一個指引文件，就冇任何具體法律嘅支持嘅，《香港公營巴士服務條例》香港法例第 230 章就規定要調節工作／駕駛同埋休息時數，但係有關呢點就係冇特別有要求點做。」

或者而家我可以講下...

主席：（經傳譯員）你係再詳細講？

陳先生：（經傳譯員）你唔需要講...

主席：（經傳譯員）係呀，我好熟悉嗰個條文，所以唔需要特別睇㗎喇。

陳先生：（經傳譯員）就係畀番嗰個頁數畀你，就係 TD-2 第 56 頁。教授，你喺你報告裏面提到話呢度即係話「點樣去確立工作時數同埋休息時數個規定，兩個管轄區就有唔同嘅地方，似乎喺墨爾本要守規就係重要，因為如果唔遵守，就會違反法例，就會有法律上嘅後果嘅，即係對嗰啲有關公司嘅人士，（甚至包括埋採購服務嘅政府人員都有），因為佢哋係有一個責任鍊嘅制度。」

最後另外提到就係話巴士安全法，今朝都睇過，你其中一個主要嘅建議，就係話將我哋嘅指引變成某啲嘅規例，呢度就係專家報告第 94 頁有提及嘅，我唔會特別揭過去，因為只係有一項提到嘅啫。

好，教授，可能都係好明顯嘅，但係可唔可以請你都詳細再解釋一下，將工作時數指引擺咗入去規例嗰度，等佢有法律效力嘅個好處係點呢？

MR JOHN STANLEY：（經傳譯員）多謝主席。喺墨爾本個情況，或者我喺第一份報告其實都有畀咗啲例子，就話如果唔遵守，嗰個後果係點，就係我嘅第一份報告嘅 27 頁，可能--應該係 27 頁，...

主席：（經傳譯員）我諗嗰度第一份報告嗰個頁數係一樣嘅。

MR JOHN STANLEY：（經傳譯員）係喇，第 27 頁嗰度就畀咗啲例子，就話會有啲咩罰則，即係如果違反咗，會點樣。

主席：（經傳譯員）係喇，呢一頁我都睇到喇，就睇到嗰個罰款會係點樣樣嘅，即係上面。

MR JOHN STANLEY：（經傳譯員）係，所以嗰個後果就可能會導致罰款，就係有好多方面嘅人士嘅，今朝早我都提過㗎喇。而最新會喺 10 月 1 號修訂嘅全國法例亦都有講話大幅咁增加嗰個罰則嘅，即係喺呢個表嗰度，同埋處理埋嗰啲魯莽行為，甚至可能會有監禁嘅，所以係好認真對待呢個問題嘅。

我知道警方嗰方面都批評話呢個政策到目前嗰個應用個情況係點樣，佢哋就話冇足夠嘅刑罰，特別係講到話貨車就多過講巴士嘅。而呢啲條文主要都係講話貨車違反嘅時候情況係點嘅，但係肯定嗰啲條文係喺度嘅，而喺我同巴士營運商嘅傾談當中，佢哋亦都係好清楚知道有呢啲嘅條款同埋對佢哋可能會有啲咩嘢後果嘅。

我亦都要講一點，我覺得好重要嘅，就係我哋啲規例亦都有一啲係關於疲勞管理嘅，都係入咗法例裏面嘅，即係重型車輛（疲勞管理）規例，就同香港個做法唔同，香港就係亦都係講指引嘅啫，所以大家個焦點好唔同，而我覺得呢點好重要。我哋一路都已經喺疲勞管理有好一段時間㗎喇。

主席：（經傳譯員）或者唔好介紹我打斷一下先，而家係咪有人問--即係有冇問點解

而家有盞紅燈喺度眨緊嘅呢？

陳先生：（經傳譯員）我可唔可以問一個問題？咁樣問呢，就係教授，如果你覺得要將呢個工作時數變咗一個法定嘅指引，有冇啲咩嘢弊端呢？

MR JOHN STANLEY：（經傳譯員）冇嘅。

陳先生：（經傳譯員）亦都請你可唔可以考慮一下運輸署點解佢唔將工作時數指引變為規例嗰個考慮，就係運輸署曾經就此作供，就係喺第 1 日嘅聽證會嗰度嘅，2018 年 5 月 7 號，即係第一套嘅會議紀錄，請你可唔可以睇 121 頁，第四行？

主席：（經傳譯員）係邊個作供㗎？

陳先生：（經傳譯員）係運輸署署長陳女士。

主席：（經傳譯員）好，唔該。

陳先生：（經傳譯員）或者我哋再睇番呢一頁，就變咗可以等你知道多啲背景，喺第 13 頁嗰度，Duncan 律師就話「陳女士，今朝早你喺度嘅，我相信，當時我問運房局嘅代表點解呢啲有關工作時數嘅指引純粹只係指引，又唔係規例，因為個條例本身都明確訂明呢一個課題可以係規管嘅課題嚟嘅，你可唔可以協助委員會解釋點解到而家都仲唔係規例，或者都唔係一個行政嘅指引或者一個規定呢？」

然後運輸署署長佢答就話「因為今朝早我都喺度，同埋呢個問題提出嘅時候嗰個背景係點，就係話到底係咪可以根據--喺法例之後，作為一個專營巴士營辦商嘅要求咁樣係會更加好能夠執行呢，就唔係講話執法。

其實我哋睇番工作時數指引呢個歷史係好悠長，而且呢個係一個持續嘅過程嚟嘅，我哋都過去有幾次係修訂嗰個指引，而指引裏面所提嘅規定，咁樣做法嘅好處就係可以適時咁樣去檢討同埋修訂，就唔係如果佢係作為法例或者係規例，就冇咁靈活，但係當如果有需要嘅時候，我哋都應該要盡力睇下係咪可以將佢做法例去檢討。

如果就係指引，即係意思就係能夠靈活啲，同埋可以因應當時情況就改善或者加強，呢啲喺服務層面其實都係相當明確嘅指引--嘅規定嚟嘅，呢度就係講話係巴士服務要取得一個平衡，提供巴士服務，一方面就係專營權嘅要求，另一方面就係有其--即係對於車長嗰個工作環境要提升，兩者嘅平衡。」

呢個就係運輸署嘅解釋就係話係方便，即係我或者可以咁樣去歸納。

主席：（經傳譯員）就係更加適時咁樣去檢討同修訂同埋更具靈活性。

陳先生：（經傳譯員）係喇。

主席：（經傳譯員）或者提醒我一下，喺 2018 年 2 月修訂之前，對上一次指引修訂係幾時呀？

陳先生：（經傳譯員）2010 年。

主席：（經傳譯員）即係八年喇？

陳先生：（經傳譯員）係。

主席：（經傳譯員）再之前呢？2010 年之前嘅修訂又係幾時呢？

陳先生：（經傳譯員）2004 年。

主席：（經傳譯員）即係六年？

陳先生：（經傳譯員）係。我諗之前嘅作供就 2018 嘅修訂就正係因為 2017 年 9 月嘅意外，所以先至有嘅。

主席：（經傳譯員）咁就即係話當時就開始咗檢討嗰個修訂？

陳先生：（經傳譯員）係，就因應嗰次意外。

主席：（經傳譯員）即係六年同八年係咪適時呢？

陳先生：Yes.

主席：（經傳譯員）係咪更適時嘅方法呢？

陳先生：（經傳譯員）或者我哋睇番嗰個修訂嗰個表格，就係 MISC-1 第 897 頁，係畀委員會參考。

主席：（經傳譯員）係有用嘅，因為呢度就解釋嗰個指引係幾時改過嚟。

陳先生：（經傳譯員）04 年、07 年、10 年、18 年。

主席：Yes.

陳先生：Professor, do you have any observation...

主席：（經傳譯員）你未問一啲一般性嘅問題之前，我哋睇到係會有一啲嘅罰則嘅，即係過去，你喺維省做咗好多年呢一方面嘅工夫，我想問有幾多人--幾常見係會檢控一啲違反嘅人呢？

MR JOHN STANLEY：（經傳譯員）好少有，主席，其實就係好少係關乎呢個定線巴士營運，都係比較係常見喺嗰啲長途嘅運作。

主席：（經傳譯員）即係嗰度係有唔同嘅需求？

MR JOHN STANLEY：（經傳譯員）係。

主席：（經傳譯員）即係巴士係好少？

MR JOHN STANLEY：（經傳譯員）係，定線巴士係好少。我就亦都係想評論一下講方唔方便嘅問題，我覺得你要去決定到底嗰啲嘅指引抑或係規例係對於當局係咪方便，同埋對於公眾嗰個嘅結果，會唔會係結果對於合規方面會唔會係好啲，我個人覺得應該係要更加著重嗰個遵守嗰個規則多過嗰個行政嘅方便。

主席：（經傳譯員）係咪話如果係違反嘅時候，呢一方面嘅檢控係好少嘅呢，即係關於定線巴士嗰個嘅工作時數嗰個法例？因為佢哋合規嘅程度係高啲。

MR JOHN STANLEY：（經傳譯員）我相信係，主席，其實佢哋喺定班次同埋係編更嘅程序都係好少係需要法例嘅，佢哋係都有一啲嘅走盞位，佢哋就唔需要咁近--即係唔會話去到砸界，令到佢哋--確保佢哋有一啲嘅時間，等佢哋係有小休嘅。

主席：（經傳譯員）係。講到話香港工作時數指引嗰個合規情況，你有冇睇過呀？

MR JOHN STANLEY：（經傳譯員）大概係九成。

主席：（經傳譯員）我記得好似係百分之九十七。

MR JOHN STANLEY：（經傳譯員）我就知道係大概有百分之四就唔合規嘅、點解同埋嗰個嘅結果係點。

主席：（經傳譯員）好喇，唔該。

陳先生：（經傳譯員）我想去下一個嘅題目，希望係比較直接啲，就係嗰啲安全數據嘅透明度。你喺 69 頁嗰度講，喺 69 頁第一點，你話「有一啲好堅實嘅論據就係支持將巴士安全嗰啲嘅--即係喺嗰個遠期計劃嗰啲關於巴士安全嗰一章就係要公布嘅，因為呢個係--如果有意外嘅時候，對社會都係造成一定嘅代價嘅。」冇錯，你係咪講緊一啲嘅分析數據呀？

MR JOHN STANLEY：（經傳譯員）係呀，我覺得而家喺呢一個巴士安全嗰啲嘅篇章裏面講嘅嘢係好有資訊價值嘅，好多嘅資訊，我相信都係符合公眾利益，如果係廣為嚟到係公布嘅話，譬如話嗰啲嘅分析，就關於點解會有意外同埋意外嗰個表現等等。

主席：（經傳譯員）唔係嗰啲嘅關連，同埋嗰啲嘅--譬如話一日揸幾多個鐘頭、司機嘅年齡呢一類嘅比較。

MR JOHN STANLEY：（經傳譯員）冇錯，譬如話服務咗幾多年嗰啲嘅意外率、揸咗幾多個鐘頭嘅意外率，我覺得呢啲係一啲好嘅分析，就唔應該只係畀好少撮人嚟到去睇嘅，呢啲資料係如果係畀公眾知道，係符合公眾利益嘅，就可以有啲好好嘅研究可以嚟做，大家就可以係更加好咁樣係處理交通意識呢一方面嘅挑戰，令到業界同埋公眾都係做得更好。

主席：（經傳譯員）委員會好明顯係同意你嘅睇法嘅，因為我哋最初想攞得好多嘅材料，最初都係唔肯畀我哋嘅，我哋而家就係都採取咗好多嘅步驟，就攞到，而家佢哋肯畀我哋，因為呢啲嘅資料都係相關嘅。

MR JOHN STANLEY：（經傳譯員）係呀，呢個數據可以話畀你聽係一啲你需要關注嘅、聚焦嘅項目。我覺得由呢一個六至到八個小時呢一個一更呢一點嗰個意外率都係好重要嘅，我就睇唔到一定要睇到呢啲嘅資料，有一啲嘅分析，我先至可以覺得有好啲嘅安全表現嘅。

主席：（經傳譯員）仲有一點嘅，我就係提一點，要黃女士可以幫我哋搵嘅，你就話你注意到運輸署喺一封信就話--即係佢寫畀九巴，即係去問點解係會有意外率嘅增加，我哋而家就有九巴嗰個遠期報告，而家我諗我哋有個解釋喇，就係最新嘅報告，喺 2018 年 8 月畀我哋，喺我哋要求之下先係提供嘅，就係九巴其中一個成員嘅代表就話畀我哋聽佢哋就係會提供畀運輸署嘅，據我所記得係 8 月 18 號。

陳先生：（經傳譯員）係呀，最新嗰個版本就係擺咗落我哋嘅文件夾度，我就想請黃女士係幫我哋係同運輸署係攞嘅。

主席：（經傳譯員）我而家想你咁做：個解釋係乜嘢呢？點解個意外率係上升呢？你繼續吖。

陳先生：（經傳譯員）係。Weston 先生都係講到類同嘅一點，就係講到呢啲數據係咪應該要更加透明，我好想請你哋去睇下第 153 頁。

主席：（經傳譯員）第幾段呀？因為我嗰個係標示版本嚟嘅。

陳先生：（經傳譯員）係 Weston 先生佢自己嗰度嘅第 39 頁。

主席：（經傳譯員）我有。

陳先生：（經傳譯員）根據--84 段，就係安全數據嗰個嘅問題，「好明顯喺倫敦嘅經驗，就係話有關嘅數據，公開啲，就係同巴士網絡嘅安全表現係有關嘅，亦都令到持份者同埋公眾係可以睇得到，更加聚焦到運輸當局同埋佢嘅巴士營運商喺安全方面嗰個計劃嘅，應該係一個更加開放嘅態度去面對有關嘅數據嘅。我哋應該去睇下安全嘅數據喺香港嗰個嘅營運專營巴士網絡應該係公開嘅。」你同唔同意呢一啲嘅觀察？

MR JOHN STANLEY：（經傳譯員）我完全同意嘅，我都認為喺倫敦當局佢哋差唔多係冇呢一個嘅--同業睇唔到之間嗰個數據同埋資訊嘅，佢哋就亦都係冇嘗試係去隱瞞，佢哋會將佢擺喺呢度，所有嘢，好嘅、壞嘅都擺晒喺度，就等佢哋可以處理到有關嘅挑戰。我覺得係令到成個過程令人更有信心，所以我好支持嘅。

主席：（經傳譯員） 呢個其實喺網上係搵到佢哋每一季都公布呢啲數據？

MR JOHN STANLEY：（經傳譯員）係。

陳先生：（經傳譯員）可唔可以去講到我今日最後嘅一個題目，就係車長嘅訓練？78 頁，你嘅文件 78 頁，係第二份報告，你有一段係講車長訓練，呢度就係話司機嘅訓練嘅要求，你哋喺墨爾本嗰啲嘅合約係寫埋嘅。

MR JOHN STANLEY：（經傳譯員）（沒有可聽到的回答）

陳先生：（經傳譯員）喺香港，運輸署最近就係公布咗佢哋嘅作業守則，我就唔會講呢一個守則嘅詳情，但係喺車長訓練方面有一點我想問你嘅，就係疲勞嘅管理或者係訓練，就喺你嘅文件 90 頁係有提到嘅，90 頁，第二段開始，你嘅建議就係話疲勞管理呢一方面嘅訓練，你就話：

「喺墨爾本做十三至十四個鐘就會令--或者喺香港，就會係令大家係要問到底嗰啲司機點樣用剩低一日嘅時間呢？佢哋有冇足夠嘅睡眠或者休息去避免疲勞呢？同埋喺佢哋嘅訓練裏面點樣係加埋疲勞嘅管理呢？喺運輸署嘅 1448 頁，佢哋有一啲嘅附件嘅，就係關乎車長嘅訓練同埋後來畀立法會、交通事務委員會嘅一啲嘅文件，嗰度冇提到係疲勞管理嘅訓練。呢一個喺墨爾本司機訓練嘅重要一環嚟嘅，包括就係要司機注意呢個飲食同埋做運動嘅。呢啲訓練亦都係包埋嗰一啲嘅督察人員、督導人員，去確保佢哋唔會編更嘅時候唔會編一啲可能會疲倦嘅司機係去當更嘅。而呢一個嘅訓練，運輸署亦都有一個作業嘅守則，就係講到呢一個專營巴士嗰個嘅訓練框架係一個好嘅建議嚟嘅，呢個亦都喺畀立法會嘅文件係包咗落去。呢個確保所有嘅營運者知道乜嘢叫做良好嘅標準同埋能夠將呢啲嘅標準令到司機係認識得到嘅。」

你可唔可以講下乜嘢係叫做疲勞管理嘅訓練呢？

MR JOHN STANLEY：（經傳譯員）係喇，喺墨爾本有關嘅方面佢哋訓練新嘅司機嘅時候，或者係佢哋做一啲再培訓計劃嘅時候，疲勞管理都係一個好重要嘅一環嘅。

有好趣，喺我哋嘅國家法例裏面，係亦都有採納咗喺維省嘅法例裏面有一條嘅法令，就係重型汽車國家法應用法令，我喺第 33 同 34 頁都係有講嘅。佢裏面講到好多疲勞嘅徵狀，呢個就係話我哋維省對於疲勞呢一方面係好重視嘅。

如果你睇 34 頁，你就睇到我哋引述咗法例，嗰度係將國家法例擺咗落去維省嘅法律嗰度，佢就講到「一啲疲勞嘅徵狀，即係話一個人揸完一個重型車輛之後，可能會係疲倦嘅（呢啲徵狀係會點呢？係之前、揸車嘅時間同埋揸完車之後嗰啲徵狀都係有嘅）。」

呢個可能就係會將嗰個訓練嘅內容係包埋呢啲。好多嘅營辦商會係話譬如有一啲嘅營養師，亦都係會教佢哋點樣做下運動，或者每日就係坐--因為你坐十至十一個鐘一日嚟到揸車，就係喺司機訓練方面係好重要嘅，因為我哋都係要令佢哋去明白乜嘢係引致疲勞同埋帶嚟嘅相關嘅安全風險。

陳先生：（經傳譯員）你整體嘅建議就係呢一啲嘅訓練係應該成為呢一個運輸署嘅作業守則一部分。

MR JOHN STANLEY：（經傳譯員）係嘅，我覺得係呢啲作業守則係一個非常之好嘅做法，可以係提高嗰個大家對於一般基本訓練嗰個嘅水平，我覺得亦都要加埋疲勞呢一點喺佢訓練裏面嘅，喺應用方面，我諗我都係對於呢啲指引係畀咗我嘅意見，我覺得呢啲仍然係適用嘅。你哋呢一方面係畀我哋墨爾本係緊一啲，我諗個重點就係應用方面係點，我哋而家講緊嗰個嘅一般嘅規範就係四十四至四十五個鐘，但係我覺得係喺香港可能嗰個時數係更高，根據我自己所睇嘅一啲證供有咁嘅結論。

主席：（經傳譯員）係，好多時係高過呢個時間嘅。

MR JOHN STANLEY：（經傳譯員）所以我哋要睇下疲勞管理喺呢度係更加重要嘅。

主席：（經傳譯員）呢個喺嗰個作業嘅守則裏面係冇嘅？

MR JOHN STANLEY：（經傳譯員）（沒有可聽到的回答）

主席：（經傳譯員）對唔住，你咁樣岈頭，我哋嘅謄本寫唔到嘅。

MR JOHN STANLEY：（經傳譯員）係喇，我就冇喺呢個作業守則嗰度見到呢一點嘅。

主席：（經傳譯員）或者我哋就應該要係記住呢一點，因為我哋而家係--我哋搵番嗰啲作業守則出嚟，因為而家係講緊訓練。

MR JOHN STANLEY：（經傳譯員）唔好意思，我睇過㗎喇。

主席：（經傳譯員）我哋有冇一個嘅參考編號呀？喺我哋嘅文件度有冇一個編號？

陳先生：（經傳譯員）TD-1 470頁，嗰個嘅內容就係喺471。

主席：（經傳譯員）唔該。

陳先生：（經傳譯員）472 頁，其實主要就係話佢哋冇提到任何管理疲勞方面嘅訓練。

主席：（經傳譯員）冇特定嘅指引，係咪呀？

MR JOHN STANLEY：（經傳譯員）係，我建議就係可以係睇下職業健康同埋安全嗰一環，係(e)嗰一度，因而呢個其實--呢度可能要加強，因為呢個係同職業健康同埋安全有關嘅，但係係要有一個--要特別係集中呢一點。

主席：（經傳譯員）唔該。

陳先生：（經傳譯員）主席，從教授嘅兩份報告，我係咁多問題。而家仲有兩個嘅事項，就係今日喺發問期間主席提到嘅，首先就係運輸署所收到嘅嗰個嘅關於安

全帶安裝嗰個嘅問題。我記得嗰一個嘅篇章，但係我就想畀你嗰個嘅頁數，呢個係喺嗰個工作小組第一次會議，2018 年 3 月 1 號開始講嘅，嗰個嘅頁嘅編碼就係 KMB-12 4869-1，喺第 16 段，我而家將佢攞咗出嚟，喺呢一度係城巴同埋新一巴就係嚟到去質疑為所有嘅座位安裝安全帶係咪實際可行嘅，因為要車長去確保乘客都係戴安全帶都係好難嘅，兩間巴士公司亦都係提出一個嘅關注，就係話企喺嗰啲人點樣戴安全帶呢？

主席：（經傳譯員）等一陣，等我讀出嚟，呢度就係話「全面嘅檢討喺巴士嘅安裝番安全帶。」

陳先生：（經傳譯員）係，嗰個會議嘅日期係 2018 年 3 月 13 號，呢個係立法會交通事務委員會一個會議，嗰個會議就係關於 2018 年 2 月 15 號，亦都得到秘書處同埋黃女士嘅幫手，我哋而家搵到嗰個相關嘅立法會會議文件，我哋可以討論喇。呢度第一頁，我哋睇到係一個立法會交通事務委員會，2018 年 2 月 15 號一個特別會議嘅會議紀錄。

主席，想請你睇下第 19 頁，第 18 頁底，第 78 段就係嗰個--主席，而家你要睇番嗰個背景，陳克勤就有以下嘅動議，第 19 頁，就係睇番個動議嘅內容，就係「本事務委員會深表遺憾，對於喺 2 月 10 號嘅大埔路嚴重車禍，大約有十九人死亡、六十六個受傷人士，為咗避免同類事情再發生，委員會要求政府當局於及後專營巴士公司檢討巴士車長嘅編制同埋提供合理工時、休息時間、午膳時間同埋薪酬，同埋係強制定期訓練，就係訓練呢個安全駕駛態度畀全職同埋半職車長去確保就係話車長本身係能夠有良好駕駛特質。」

第 2，「製造一個防滑馬路表面同埋設立警告路牌同埋安裝車速鏡頭喺上述路段，立即進行同埋睇番嗰啲高危路段，同埋加快加強措施去確保道路安全使用者嘅安全。」

主席：（經傳譯員）唔該等一等。個背景就係--你嗰個相關嘅路段就係大埔路？

陳先生：（經傳譯員）係，因為係之後舉行嘅會議，所以就應該係指係嗰個路段。

第 3，「就係探討去加強巴士嘅安全裝置嘅方法，譬如去加強高危座位嘅保障，譬如話喺更多座位加裝安全帶同埋分階段強制乘客穿戴安全帶。」譬如話喺車長座位安裝外部鏡頭同埋就提及其他嘅裝置，呢啲就係成個作出安全帶要求嘅背景，由事務委員會作出嘅。而就睇番第 79 段就係嗰個動議係獲得通過嘅。

我希望都至少可以回答主席部分嘅問題，咁會同運輸署--因為都同運輸署再提及。

主席：（經傳譯員）我哋會做，因為佢哋冇同我哋講係咩嘢嚟嘅，呢個似乎係一個合理嘅解釋。

陳先生：（經傳譯員）都可能係嘅。

主席：（經傳譯員）呢個係參照番一宗嘅交通意外，佢哋用個眾數。

陳先生：（經傳譯員）我哋喺嗰個文件夾第2003年至6，當呢個問題係提及過，但係譬如話呢啲係可能係運輸署上嚟作證嘅時候，可以再提及嘅。

主席：（經傳譯員）我諗你係講番嗰個討論同埋嗰啲文件，譬如話運輸署嚟講，去考慮要唔要求巴士提供安全帶，但係就唔贊成嘅。

陳先生：（經傳譯員）係。

主席：（經傳譯員）如果你話畀教授聽會有用，同埋你可以話畀我聽有邊個司法管轄區檢視過，但係認為呢個唔係一個好嘅提議呢？呢個問題喺十五年前已經係檢視過。

陳先生：（經傳譯員）我認為個重點就係我唔會話搵番嗰份文件，但係我諗個重點就係話佢哋睇番--多次睇過同埋決定就話唔會話太有用，主要係根據番嗰個海外司法區嘅經驗。

主席：（經傳譯員）所以你譬如話睇番就係話有啲轉去大馬士革轉營，睇番佢今年4月發生咩嘢事喇。

陳先生：（經傳譯員）我想要求委員會去睇番SEC-1嘅文件夾，係274頁。

主席：（經傳譯員）等一陣。編理文件嘅人似乎唔為意就係話呢啲夾似乎有少少損壞。

陳先生：（經傳譯員）睇番274頁。

主席：（經傳譯員）而家我到咗，我有嘅。

陳先生：（經傳譯員）個日期係2007年1月，你睇一睇番嗰個第280頁有個日期，呢個係一個運輸署所預備嘅文件，係個工務部，呢個係一個畀交通事務委員會嘅進度報告，係有關於改善專營巴士嘅安全嘅措施，睇番第3段，你可以睇番有關喺現有專營巴士加裝安全帶嘅提述，而有關海外數據，第4段，第275頁，就係：

「我哋從其他國家收集有關要求安裝同埋配戴安全帶喺巴士方面，目前或者我哋未有搵到一個國家有關於法定規定要求提供安全帶作為都市用途同埋可以畀企位嘅乘客用嘅，而佢哋係--一啲交通當局佢哋認為嗰個規定配戴安全帶嘅利益係不確定嘅，而嗰個研究結果嘅撮寫嚟講，可見附錄I。」

呢個係281頁，呢個就係2007年1月。

主席：（經傳譯員）所以譬如話呢啲以上嘅司法管轄區，譬如就係美國、加拿大、英國、澳洲嘅維多利亞省、紐西蘭、荷蘭同埋新加坡？

陳先生：（經傳譯員）係，所以亦都喺2018年畀交通事務委員會嘅文件方面亦都係

有提及上述嘅國家司法管轄區，所以我哋今日亦都係睇到。

主席：（經傳譯員）呢個文件而家睇番，就係回應喺--274 年嘅文件，係回應番喺 2006 年立法會交通事務委員會嘅早前嘅討論。

陳先生：（經傳譯員）係，呢個你可以搵文件之前，2006 年嘅文件就喺 266 頁有。

主席：（經傳譯員）本身係咪好似今年 2 月、3 月咁，係咪都可以同樣--差唔多嘅寫法，就要求話要求全面檢討？

陳先生：（經傳譯員）係嘅，都好似嘅。

主席：（經傳譯員）你可以睇番 266 頁。

陳先生：（經傳譯員）就係個文件嘅開始，而相關嘅部分就係 2016 年 10 月，就有關個段落就係第 19 段，我想讀少少出嚟，因為你睇番就係字眼，個「交通意外」呢個字眼，主席亦都係留意到，就睇番第 271 頁第 18 段，「因應於最近嘅交通意外，運輸署亦都係同專營巴士營運商檢討有關於喺現有巴士安裝安全帶，考慮到譬如技術難度，譬如話佢哋座位嘅結構力量同埋固定點同埋巴士嘅設計。」

所以亦都係有個同樣嘅步驟再重複一次。「然之後亦都係研究過海外有關於安裝同埋配戴安全--喺巴士安裝安全帶嘅做法。」而暫時嚟講，係唔見到有國家係有啲咁嘅規定。

主席：Yes. Thank you. So that's 2006, 2007.

陳先生：（經傳譯員）睇番我哋係搵唔到 2007 年至到 2018 年當呢個議題再度浮現。主席同我提及嘅第二個問題，...

主席：（經傳譯員）因為頭先我哋畀教授睇過以上嘅文件，呢啲係由運輸署去協助，表面嚟講，呢個過去都有去檢討，同埋去參考過其他司法管轄區，譬如澳洲維省就話香港係唔需要，有冇啲一般性原因或者啲香港嘅特定元素或者係一般嘅原因而去改變個意願呢？

MR JOHN STANLEY：（經傳譯員）關於澳洲嘅情況，當然係 90 年代，對於能夠保障個防撞衝擊係個體積，主要係額外嘅--巴士嘅額外利益--額外效益，而呢個文件草擬嘅時候，主要係進行--喺呢個情況係進行成本效益分析，點解香港嘅情況會唔同，我相信有啲人喺上層意外嘅發生機率可能會較高，我本身冇答案，但係可能我去探討，譬如話受傷嘅機率，坐上層會唔會高啲呢？相比於單層巴士，譬如係墨爾本有嘅，令到有理據係支持喺上層安裝安全帶。我唔認為我哋下層嘅座位嚟講，同我哋嘅巴士會好大分別。

主席：（經傳譯員）睇番你點樣去分析，我哋係咪需要客觀數據去作出判斷，有幾多人掟出巴士，有幾多會翻車，...

MR JOHN STANLEY：（經傳譯員）呢啲係本身應該去做嘅分析，去回答呢啲問題。

主席：（經傳譯員）多謝。陳大律師，你會去到最後個範疇喇。

陳先生：（經傳譯員）主席之前同我提及，喺 2018 年嘅信，由運輸署嘅書信，就話留意到有啲嘢就係上升咗...

主席：（經傳譯員）譬如話個意外率係上升。

陳先生：（經傳譯員）講係 TD-5 1729。

主席：（經傳譯員）呢個係由運輸署嘅信函，就喺個五年遠期計劃嘅更新之前，就要求九巴去回應一啲問題，如果我哋係嗰個意外涉及率嗰方面。

陳先生：（經傳譯員）嗰個要求係喺個 1729 頁嘅底部，「貴公司係要求進行 2017 年有關九巴嘅交通意外，睇番 2015 同 2016 年嘅情況，喺附錄 E，應該係計入嗰個趨勢、本質同埋個原因同埋搵出個原因。」而家係我哋去第 5011 頁，呢個係最新嘅巴士安全部分，本身唔係好容易搵到呢啲意外上升嘅原因。

主席：（經傳譯員）係咪冇針對回應呢？

MR JOHN STANLEY：（經傳譯員）冇直接回應。呢個主要係佢哋根據路線、巴士型號、工時等，本身有相當幾段，主席或者會覺得有相關嘅，譬如 5025，呢個係根據意外嘅種類，8.2.6.7，「其他道路使用者嘅駕駛態度係預防，唔係由巴士車長引起嘅車禍嘅主要原因」，主要係其他道路使用者嘅駕駛態度，似乎係可以歸因呢樣嘢。

主席：（經傳譯員）我睇到。

陳先生：Then, in a similar vein...

主席：（經傳譯員）唔該等一陣。就唔係佢哋嘅--唔係巴士司機嘅錯，係其他人嘅錯。

陳先生：（經傳譯員）睇番類似嘅段落，譬如 5028，就係 8.2.7.5，畀我讀一讀，就係「喺巴士站嘅非法泊車係令到巴士唔正確靠站嘅原因，然之後會危害道路使用者嘅安全，因為乘客需要喺馬路上落客，而唔係利用巴士站，而令到意外嘅機會增加。而巴士同埋其他車輛非法--要爬嗰啲非法嘅泊車嘅頭令到一個安全--對於乘客係有一個安全隱患，同埋亦都對其他道路使用者嚟講。」同樣地，呢啲其他嘅引述亦都係有提及嘅。

仲有一項資料係畀委員會同主席參考嘅，係 5031，又搵到類似嘅，5031，我哋有一個分析，就係跟分區去分析嗰啲意外嘅，喺 8.2.9.3 段，即係嗰頁嘅底部，你睇到九巴話「交通擠塞係喺繁忙地區導致高意外率嘅一個原因，公司就建議採取積極措施解決交通擠塞嘅問題，我哋會同政府討論。」

然後跟住就講話係巴士優先嘅，作為一個措施，可以處理呢個問題，然後亦都有提及其他導致高意外率嘅因素。

主席：（經傳譯員）唔係好清晰睇到點解係交通擠塞會導致交通意外，係咪因為令到司機揸得差啲，所以好易撞到其他車呢？

陳先生：（經傳譯員）我諗佢哋就可能真係嘗試咁講。主席，我希望咁樣係幫到委員會。

主席：（經傳譯員）你之前係冇睇過呢啲數據，係咪呀？教授。

MR JOHN STANLEY：（經傳譯員）冇嘅，就係講話交通擠塞同意外有關係，其實都有好多嘅研究都顯示交通流量係會同交通意外有一個正比嘅。

主席：（經傳譯員）即係話更加多目標可以撞到，係咪咁解？

MR JOHN STANLEY：（經傳譯員）係，係，冇錯。

主席：（經傳譯員）即係你要更加要小心知道兩邊都可能有人、有車，係咪咁解呀？

MR JOHN STANLEY：（經傳譯員）係。

主席：（經傳譯員）係，係從嗰個角度睇，交通流量同交通意外率係有個關係嘅。

MR JOHN STANLEY：Yes.

主席：（經傳譯員）好，唔該教授。我諗第一點，就話其他司機嘅態度，都好清楚，就係嗰啲司機造成意外，係咪冇一啲數字細分，就話譬如話九巴有冇評估過到底邊啲人負責，即係係要對個交通意外負責任嘅呢？我諗喺香港，我哋所知道，起碼係九巴嗰方面，呢一類咁樣嘅交通意外評估，我諗我咁講應該就啱嘅，就由係保險公司開始嘅，佢哋就嘗試想將個責任推畀其他人，係咪咁呀？

陳先生：（經傳譯員）係 5020 就有按成因劃分嗰啲意外嘅，將佢分類，就係譬如話係巴士車長造成，同埋或者唔係嘅理由，第一部分就係因為巴士車長造成嘅意外，呢度有細分。

MR JOHN STANLEY：（經傳譯員）喺嗰個表，最常見嘅就係交通擠塞，就即係話冇保持安全距離，同前車。

主席：（經傳譯員）係喇，其實如果冇交通擠塞，反而就可以做到喎，係咪？

MR JOHN STANLEY：（經傳譯員）難啲喇。

主席：（經傳譯員）我就睇到相撞形嘅意外，就算冇咩嘢交通--即係唔係好多車，都其實有危險嘅，係咪呀？仍然都係咁嘅。

MR JOHN STANLEY：（經傳譯員）係，多謝你。

陳先生：（經傳譯員）除非仲有咩嘢協助委員會喇。

主席：（經傳譯員）冇㗎喇，多謝你。想多謝你畀所有嘅資料，教授。

羅先生：（經傳譯員）有一個問題，喺墨爾本，我哋睇到咁多資料，或者香港都可以學習一下。有啲新嘅措施要提出，邊個會推動嘅呢？無論係新技術又好，咩嘢都好，係承辦商吖，政府吖，委員會吖，定係邊個會通常推動呢啲改變？

MR JOHN STANLEY：（經傳譯員）有兩方面嘅，一個就係汽車製造商，譬如好似富豪、斯堪尼亞等等，或者平治，佢哋都係好想喺個市場上佔有優勢，所以特別係著重安全，另外一樣，就係個別嘅承辦商，我喺我報告都提過一啲例子，譬如話新加坡嗰間 CDC，佢哋就喺墨爾本運作，但係佢哋就有安裝呢啲新嘅儀器同埋設備，因為佢哋新加坡都有咁做，佢哋都係經常去睇下仲有啲咩嘢方法可以改善安全，所以佢哋嘅態度係好好嘅。佢哋就覺得如果佢哋自己屋企人坐都唔安全，肯定就唔足夠，就畀乘客都唔得嘅，所以有時就係承辦商佢哋自己會提出嘅，可能係加裝或者睇下市場上有啲咩嘢解決方案。所以就係--當然亦都睇下新嘅車輛可以加啲咩嘢。

羅先生：（經傳譯員）即係就算冇明確嘅同安全有關嘅主要表現指標，佢哋都係會咁做，係咪呀？

MR JOHN STANLEY：（經傳譯員）係，佢哋會自願做，冇錯，係。

羅先生：（經傳譯員）假設喺計算對嗰個巴士營運個成本相對於交通意外係點樣，因為其實有交通意外，根本佢哋架車會損毀咗，佢哋都要自己攞錢出嚟去整，所以都係一個成本嘅考慮，係咪？

MR JOHN STANLEY：（經傳譯員）係呀，肯定係，所以加裝一啲其他嘅--事後加裝一啲設備，都係肯定係有用，可能對乘客會安全啲，對於佢哋個業務成本都係可能有好處嘅。譬如話神眼咁呢個技術，要裝就大概係 1,500 澳元，每一架車，都係好嘅投資嚟嘅。

主席：（經傳譯員）係呀，因為如果一旦發生意外，譬如話你要賠償受傷嘅人，然後架車又損毀咗，用唔到，計起嚟，個成本可能都係值嘅。

MR JOHN STANLEY：（經傳譯員）係，因為就的確係有呢啲考慮嘅。

羅先生：（經傳譯員）好似維省嘅運輸安全局，有呢啲咁嘅機構，點樣可以確保佢唔係另外一個嘅政府架構，即係一個官僚架構咁呢？有冇即係咩嘢指標畀佢哋，或者有啲咩嘢方法鼓勵佢哋會盡力係做到最好呢？

MR JOHN STANLEY：（經傳譯員）我唔知道有冇定啲目標畀佢哋嘅，我要返去睇一睇，然後話番畀你聽，但係你可以放心，因為佢哋係負責規管巴士營辦商，巴士營辦商會盡佢哋嘅能力去做嘅，要確保運輸安全總監嘅要求做得到，唔會只係變成另一個嘅官僚機構，呢方面可能主要係睇個顧客，因為顧客會確保有關

當局係真正做到佢嘅功能，目前運輸安全總監同埋承辦商之間嘅關係係非常好，因為佢哋都明白如果佢哋可以有一個更--建立到更強嘅安全風險管理嘅文化係對雙方都好嘅。我或者返去墨爾本之後，如果嗰個颱風畀到我哋走，我就可以畀番啲資料你。

羅先生：（經傳譯員）好，唔該晒。

主席：（經傳譯員）仲有冇乜嘢呀？陳律師。

陳先生：（經傳譯員）冇。

主席：（經傳譯員）好，教授，我知道我哋今日超時咗少少，但係我哋喺計算需要時間嗰度都幾準確嘅，不過我哋喺呢度就要多謝你畀咗咁多協助畀我哋，特別有你嘅報告可以幫到我哋去確立，喺我哋心目中有啲咩嘢問題特別相關，同埋可能係考--我哋喺香港亦都已經係聽過啲證供，都係好有用嘅，我哋就期待如果你覺得仲有啲乜嘢係適合要畀我哋嘅，我哋都期待可以收到嘅。好多謝你協助委員會，祝你返屋企嘅旅途愉快，無論幾時都好。

MR JOHN STANLEY：（經傳譯員）好，多謝，非常多謝。

2018 月 9 月 15 日

下午 5 時 38 分押聆訊押後

[Blank Page]

Monday, 24 September 2018

(10.00 am)

EVIDENCE FROM THE HONG KONG POLICE FORCE: MS CHAN YI PING, MR STEPHEN BAKER, MS YAU SIN MAN, MR LEE TAI WAI, MR CHEUNG TIN LOK (simultaneous interpretation was used where indicated)

CHAIRMAN: Good morning, and good morning, Chief Superintendent Yau. Thank you for attending and we thank your colleagues for attending to help us.

The way in which the proceedings will unfold you are no doubt familiar with. We have counsel, and leading counsel Ms Wong will be asking questions today. The questions in the first place will be directed towards you, but if one of your colleagues is better able to assist us, by all means defer to that colleague and we will happily take information/evidence from that person or any one of the other colleagues you wish to depute to perform that role.

If you have any difficulties with understanding questions, please state so and we'll see if we can't make sure it's elaborated.

Ms Wong.

Examination by MS MAGGIE WONG

MS MAGGIE WONG: Thank you, Mr Chairman, Ms Yau, and ladies and gentlemen, for coming. I will be asking questions

on behalf of the committee.

I believe the police have provided in total eight responses, letters of reply to the committee's enquiries, providing different answers to different aspects, and they are all found in the miscellaneous bundle.

I will be first of all directing my questions on a number of topics. The first topic is in relation to the statistics of accidents.

Ms Yau, I believe that the police have developed a database on all traffic accidents; is that correct?

MS YAU SIN MAN: (Via interpreter) May I answer in Chinese?

MS MAGGIE WONG: Yes.

MS YAU SIN MAN: Correct.

MS MAGGIE WONG: Thank you. I need to pause a bit so that it can be translated.

And this database, can you tell us whether it is based on the investigation reports compiled by the police from time to time?

MS YAU SIN MAN: (Via interpreter) I will ask my colleague.

We have a database on traffic accidents. The information is collected from the police regions. We would also state the causes of accidents in that database.

MS MAGGIE WONG: Now, in compiling these statistics, what

information would you use in compiling this data?

MS YAU SIN MAN: (Via interpreter) You mean what information would be collected by us?

I will ask my colleague to explain in detail the information that we will collect.

MR STEPHEN BAKER: In general terms, the information would include the type of vehicle, the number of casualties, the type and nature of the casualties, whether it was a serious injury, slight injury or a fatality, and also a list of driver contributory factors, things which, according to the investigating officer, contributed to the cause of the accident.

These are compiled pretty much in a tick-box kind of way and submitted electronically to the Road Safety Unit, and then shared with the Transport Department, to enable the Road Safety Unit and the Transport Department to analyse the causation factors of traffic accidents, in order to design and adjust their road safety strategy.

CHAIRMAN: Is there a template, therefore, for this method of providing the data?

MR STEPHEN BAKER: Yes, my Lord.

CHAIRMAN: And do you have a copy of the template?

MR STEPHEN BAKER: I do.

CHAIRMAN: Would you be able to provide us with it?

MR STEPHEN BAKER: I would, sir, yes.

CHAIRMAN: Can you do that now?

MR STEPHEN BAKER: Yes.

CHAIRMAN: We will have it copied, please. (Handed).

MS MAGGIE WONG: Thank you.

Mr Baker, in this data form, in finding out what is happening in these accidents, you would wish to find out, first of all, how people are injured, where they are injured, and why they are injured; is that correct, in summarising the data to be collected?

MR STEPHEN BAKER: The information mainly concerns the causation factors of the accident rather than the type of injury. Classification of the type of injury is more limited to whether it was a serious injury, that is defined by the amount of time the person spent in hospital, or if it was a slight injury, or if it was a fatality.

CHAIRMAN: Is that the same definition that one finds in the back page of the traffic report that the police publish?

MR STEPHEN BAKER: I haven't seen that document recently, sir.

CHAIRMAN: Let me provide you with a copy of it.

Can you give this to the chief superintendent.

It has an explanatory note on the back page. For the chief superintendent, please. Just give it to the

chief superintendent. (Handed).

There is a list of terms defined there. It's on the back page.

MR STEPHEN BAKER: That's correct, sir, yes.

CHAIRMAN: So that method of definition is one that's employed in the template?

MR STEPHEN BAKER: It's not in the template, sir, but it's how we classify them.

CHAIRMAN: Thank you very much. We will have that copied now, if we may. Thank you.

MS MAGGIE WONG: Thank you.

When this information has been compiled, would other departments or in particular the Audit Commission conduct an independent audit of the information collected by the police and the Transport Department -- is that correct?

MR STEPHEN BAKER: I am not aware of the Audit Commission being involved in the road safety process.

CHAIRMAN: Perhaps we can help you. We have an Audit Commission paper --

MS MAGGIE WONG: Yes.

CHAIRMAN: -- where the Audit Commissioner is looking at different things, but it also looked at administration of road safety. This is March 2013.

MS MAGGIE WONG: Yes. May I take you to the SEC bundle,

page 467. I believe that's bundle 2.

Mr Baker, this is an Audit Commission report dated 28 March 2013, prepared by the Transport and Housing Bureau, Transport Department, Hong Kong Police Force, and Information Services Department, relating to the administration of road safety measures.

We can see this report was tabled before LegCo later, on 5 April 2013, as part of the report on the results of value for money audits.

If I take you to the SEC bundle, the same bundle, page 543, paragraph 5.3, we can see at paragraph 5.2 it states:

"The police is responsible for investigating traffic accidents."

And you have a database, if we look at line 4:

"The police requires its investigation officers to keep their investigation findings and results in individual physical files and input accident data into a computerised case management database (known as the traffic operations and management system -- TOMS) within 48 hours of the accidents. The data may be amended ..."

And 5.3 states:

"The police's TOMS is linked with the TD's [Transport Department's] database (known as the transport information system -- TIS ...) for the
