electronic transfer of traffic accident data. The Transport Department uses the traffic accident data in the TIS to identify locations of accident block spots and accident trends for in-depth investigation and analysis. The data also serve as an important source of information for formulation of road safety strategies, publicity/education programme and ongoing review of road safety legislation among other road safety initiatives."

It coincides with what you have told us earlier that the information will be shared with the Transport Department for devising road safety strategies. And one of the issues raised in this report is --

CHAIRMAN: Before you go any further, if it helps you, Chief Superintendent, this material is available in paper form so that you can have a look at other pages, rather than the ones you are being referred to, if that helps you.

MR STEPHEN BAKER: Thank you.

CHAIRMAN: Just ask for it and it will be provided to you.

MR STEPHEN BAKER: If I could take a look at it.

CHAIRMAN: Can we do that? Can we provide SEC -- I think this covers two volumes, does it not, SEC-1 and SEC-2?

MS MAGGIE WONG: Yes, SEC-2.

CHAIRMAN: But it begins in bundle 1, am I right, 467?

MS MAGGIE WONG: Yes, 467.

CHAIRMAN: Take a moment to familiarise yourself with it, so

you have an idea of what it is you are being asked about.

MR STEPHEN BAKER: Thank you, sir.

MS MAGGIE WONG: This report is compiled by the Audit Commission, the purpose of which is to audit the data to ensure or to check whether the information relayed by the police and the Transport Department are accurate.

According to this report, it suggested that there appear to be inaccuracies in the road traffic accident data. We can see that at page 476, paragraphs 10 to 11.

First of all, we see "Accuracy of traffic accident data", the heading. It stated "Traffic accident locations" and also "Traffic accident contributory factors". In the "Traffic accident locations", if we look in line 4:

"The traffic accident location is identified using a grid reference system. Due to inaccurate input of grid references, the Transport Department has to spend extra time and resources to rectify the problem ... In Audit's view, prompt and effective measures should be taken to ensure that the grid references for traffic accident locations are correctly input in the first place ..."

And it identifies relevant paragraphs in the report which I am going to take you to in a moment.

The second matter, Mr Baker, as you have earlier mentioned, is the traffic accident contributory factors. It also mentioned that during a sample check -- that's in line 4 of paragraph 11:

"In a sample check of the accident contributory factors input for 50 traffic accident cases, Audit found that 13 per cent of the input factors were inaccurate and there was no record of supervisory check for the 50 cases. There is a need to tighten management control in this regard ..."

So it appears the data compiled in both aspects -- that's the location and the contributory factors -- appears to be inaccurate. I understand this report was made in 2013. First of all, may I ask a general question: were you aware of the problems identified in this report about the inaccuracy of the traffic accident data?

MR STEPHEN BAKER: I was aware of this report when it was written. Since that time, I have worked in other police formations and so I haven't been able to follow what measures were taken in consequence of this report. But I recall at the time that the report was being prepared that the main problem was a discrepancy between the location of where the police said the accident occurred and where the accident was recorded in the TIS system,

and I recall that what the police believed was the cause of the problem was the TIS system was relying on a mapping system prepared by the Highways Department or used by the Highways Department which referred to grid blocks or grid zones, which didn't necessarily coincide with the police description of the location.

MS MAGGIE WONG: Yes. In fact, you are correct, Mr Baker, and that problem has been identified in the report itself.

If I could take you briefly to what was stated. That is at page 505. If we start at 544, paragraph 5.5, it stated there:

"Inaccurate grid references could adversely affect the accuracy of the accident black spot list compiled by the Transport Department in the following two ways:

(a) a non-accident prone site would be wrongly listed as a traffic accident black spot if the same grid reference was used for accidents occurring on different locations of a road; and

(b) a location with frequent accidents would be omitted from the accident black spot list ..."

And in paragraph 5.6:

"In the 2006 review, Audit found that the police incorrectly input the same grid reference for 20 accidents occurring on different locations of

a highway."

If you go over the page, at page 545, paragraph 5.8, you can see "TD's checking", Transport Department's checking:

"To minimise the risks of inaccurate grid references mentioned in paragraph 5.5, the Transport Department has since 2008 carried out selective checks on grid references input by the police. Notwithstanding the launch of the map-based TIS, the TD still identified inconsistencies between the grid references and the description of the locations input by the police."

And we can see in paragraph 5.9, it noted that in April 2010, in a meeting of April 2010, the Transport Department informed the police that about 40 per cent of the input grid references were found to be inconsistent with the descriptions of the accident locations.

At the time of the review, that's 5.10:

"... Audit found that the problem of inaccurate grid references still [existed]."

If you look at line 5, it stated:

"... the grid references of 7,314 (ie 26 per cent of 27,755) cases were inaccurate."

And if we look at 5.11, the Transport Department --

CHAIRMAN: I think this is a matter that concerns us less or interests us less than the issue of the inaccuracy of

the attribution of contributory factors.

MS MAGGIE WONG: Yes.

CHAIRMAN: Perhaps we could deal with this more shortly.

MS MAGGIE WONG: Yes.

CHAIRMAN: There were recommendations about how to fix this problem, and the real question is: has this been done?

Perhaps we can go to the recommendations, first of all, at 5.14.

MS MAGGIE WONG: Yes.

If you go to 5.14, page 548, it suggested to enhance the system by incorporating a validation check control in the TOMS/TIS so that police investigation officers would be alerted to any out-of-the-range error at the time of data input.

And the police agreed with the audit recommendations, as we can see at paragraph 5.15.

So my question is: has that situation been improved since this Audit Commission report in 2013?

MR STEPHEN BAKER: I would like to put my answers in the context that I was aware of the audit report in 2012, and that I have been away from traffic policing for some time, until 2017. Also, I was unaware that I would be questioned about the audit report and so I haven't been able to make enquiries to answer your questions before the hearing.

I can say that, as I recall, from 2012 and 2013, measures were implemented in terms of supervision of data input, and I can say that since this report was written, the TOMS system has been replaced by what we call the case management information system, which is a more modern facility for the police to input data on all kinds of police enquiries, including traffic enquiries.

And it is my understanding that this what we call the CMIS, case management information system, is linked to the Transport Department TIS system, but I am unable to say at the moment in what way the system has been enhanced in terms of the recording of the location of traffic accidents.

CHAIRMAN: Yes, thank you, Chief Superintendent. We of course understand and accept the caveats that you enter. We will be receiving evidence in due course again from the Transport Department, and perhaps the question we could ask you now is simply this: are you aware of any ongoing problems about location inaccuracy?

MR STEPHEN BAKER: I am not, sir.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Turning to the second matter, the traffic accident contributory factors, which is trickier than the first one because it requires input, actual data

input, by police officers into the system, as to the causes of the accidents.

If we look at the report, at paragraph 5.17 at page 549, 5.17 states:

"The TD [Transport Department] relies on the traffic accident contributory factors input by the police into the TIS for identifying problems of road environment, road users and driving behaviour, and [also to formulate] strategies to tackle specific types of accidents."

And during the 1998 review, the Audit's sample check revealed an error rate of 25 per cent, and in the 2006 review, the error rate was 13 per cent.

During the audit examination, at 5.20:

"... Audit examined 50 traffic accident investigation case files ... and the related 280 accident contributory factors input to the TIS. Audit found that 37 (13 per cent) of the input factors in 34 cases were inaccurate ..."

And they identify two accidents, and in summary they discovered that some of the cases where "mechanical defects" were input as the accident contributory factor when in fact it was not.

First of all, were you aware of this problem in relation to the compilation of this particular aspect,

in terms of accident data?

MR STEPHEN BAKER: I was not. I was not aware of the significant problem with the input of contributory factors.

CHAIRMAN: Perhaps, as a way of trying to understand how this might occur, if after an accident a driver was to tell the policeman, perhaps having been cautioned, "My brakes didn't work", would that then perhaps be entered as "mechanical failure"?

MR STEPHEN BAKER: Yes, sir.

CHAIRMAN: And if the system wasn't rigorous enough to correct that later, when the vehicle examiner said, "There was no problem with the brakes -- there might have been other issues but there was no problem with the brakes", would that result in that error being carried forward?

MR STEPHEN BAKER: The error could be corrected, sir.

CHAIRMAN: It ought to be corrected but it might explain why it remains in the system?

MR STEPHEN BAKER: That is a possibility, yes.

MS MAGGIE WONG: And Audit at that time suggested a number of recommendations in the report. The recommendations can be found at 5.22 at page 551.

To sum up, it required the police to tighten management control in terms of input into the system, by

reminding supervisory staff to critically check the accuracy against the records kept in the case files; and also to maintain records of their supervisory checks in relevant case files for management review.

As far as you are aware, has that been done or have the recommendations been carried out?

MR STEPHEN BAKER: The recommendations were carried out.

MS MAGGIE WONG: And, as far as you know, were you aware of any inaccurate compilation of data in relation to the accident contributory factors, as of to date?

MR STEPHEN BAKER: As far as I am aware, the data is input as accurately as possible.

CHAIRMAN: I think perhaps you can only answer that generally rather than saying "any", but generally, are you satisfied that the system better presents accurate data now?

MR STEPHEN BAKER: I am, sir, yes.

MS MAGGIE WONG: Thank you.

If I may take you to another document. The purpose of this exercise -- perhaps Mr Baker and Ms Yau -- the purpose of this exercise is to ascertain the accuracy of the traffic accident data, as you are no doubt aware, because this information is relevant to the Transport Department in devising road safety strategy or improvement measures. So the accuracy of the data is of

importance.

One of the aspects that we heard about from one of the experts, who testified last week, is we need certain procedures to consider whether there should be an impact study in Hong Kong. So you basically look at the number of victims you have, and then look at the cost of installation of these devices and look at the cost of serious injury in your jurisdiction.

So we need to have some objective data to see if there is a legitimate approach to examine safety, and to that extent, what information we have in Hong Kong to compile that data -- so that you know what direction I am going.

CHAIRMAN: Perhaps, in that context, might I indicate this. This cost/benefit analysis, how you might approach, for example, installing safety devices on vehicles, is one that they apparently use in Australia, but it obviously has as its core accurate data. We are particularly interested in that in the context of seat belts, seat belts in franchised buses. So that is an aspect that we will be coming back to later.

MS MAGGIE WONG: Yes.

CHAIRMAN: Ms Wong, now that we have what I think I call the template of factors that are listed as contributory factors, perhaps at some stage you could detail them.

Obviously you might need first to read them, but it would be helpful if we were to go to that at some stage.

MS MAGGIE WONG: Yes. I may come back to it later, after the break.

CHAIRMAN: Yes.

MS MAGGIE WONG: To that end, in particular on seat belts -- I am coming to this topic -- first of all, I wish to identify some of the statistics that we have from the Transport Department and also from the forward planning programme that was forward by the franchised bus operators in relation to non-collision-type accidents. May I --

CHAIRMAN: Again, forgive me for interrupting, that is another area where, in the course of our hearings, we have gathered together information to be found in documents that are otherwise confidential, that went between the franchised bus operators and the Transport Department, in which they were asked to analyse the causes of accidents on a whole range of different parameters.

Have you had an opportunity to look at that material? It is on our website, but if you haven't, that's another area where we are going.

MR STEPHEN BAKER: I looked at some material over the weekend, sir, which I believe is what you are referring

to.

CHAIRMAN: Yes. So, for example, in the context of seat belts, a regular pattern of accidents in buses appears to be, and are described as, loss of balance. The figure seems to be maintained at around 50 per cent of the injuries involved in and around buses.

Another aspect of the statistics is persons injured on a bus separate from loss of balance. So that is something we will come to in due course.

MS MAGGIE WONG: Thank you.

Mr Baker, first of all, may I ask some general questions. We have been provided, as Mr Chairman mentioned, the forward planning programme of these franchised bus operators, which straddles five years and it will be renewed on a yearly basis as to what the safety features would be, and conducts an analysis of accident trends and statistics.

Would the police be provided with a copy of this forward planning programme from the Transport Department?

MR STEPHEN BAKER: We have not been, and I wasn't aware that we would be. We hadn't any expectation to receive it.

CHAIRMAN: No, as I indicated earlier, we have been given to understand that this material was confidential, and it is with some difficulty, over some months, that we have

obtained the documentation.

MS MAGGIE WONG: May I take you to some of the documents as examples. It would be at TD-1, page 180. At page 180 is the extract of the forward planning programme for 2018 to 2022 submission by Kowloon Motor Bus.

If we look at paragraph 8.2.7, we can see the KMB, the bus company, had identified or done an analysis of the accident nature for the years of 2015 to 2016, and we can see in particular, table 8.1, the passenger loss of balance as 51.5 per cent, and at paragraph 8.2.7, stating that:

"The majority of the accidents ... were due to passengers losing balance while on the bus. More than half of these cases were caused by the bus braking in traffic."

It also named other accidents.

This report, this chapter, contained a number of statistics, and this is just one of them. First of all, my general question is: would this sort of information assist the police in terms of compilation of data and analysis of accident data, if you were given a copy of this from the franchised bus operators? Would it assist your department carrying out the duties?

MR STEPHEN BAKER: My first impression is that a lot of this information is covered in our casualty causation factors

already.

MS MAGGIE WONG: Casualty causation factors?

MR STEPHEN BAKER: Our accident causation factors already, and without spending more time to study this information I wouldn't be able to comment further.

CHAIRMAN: But, if you had this information, you would have the consolation of knowing that your own figures matched those of people who are expert in running this particular aspect of transportation?

MR STEPHEN BAKER: We would, sir, yes.

MS MAGGIE WONG: Because, as you know, one of the recommendations in the Audit Commission report is to critically check the accuracy of the data input to the system. So, with this information, you could actually cross-check or double-check the data you have compiled to ensure it is accurate; would you agree with that suggestion?

MR STEPHEN BAKER: It would be a useful reference, yes, but actually, I think we would value the assessment of our officers, to a great extent, although it would be useful.

MS MAGGIE WONG: For the purpose of verification and double-checking?

MR STEPHEN BAKER: As a cross-reference, yes, but how would we verify it? We would verify it by looking at what our

officers found out in their enquiry, because their enquiries would be rather thorough.

MS MAGGIE WONG: Now, in compiling your data, we can see, as an example of that, the passenger loss of balance here is 51.5 per cent, and if I may take you to the letter compiled by the Transport Department as to the statistics back in 2013, first of all. It is the letter dated 16 May 2013. That would be in SEC-2, page 566.

This is a letter from the Transport Department to the LegCo, and if we look at page 567, at paragraph (c), it identifies the number of road accidents for franchised buses. It stated that 58 per cent were non-collision --

CHAIRMAN: Before you get into detail, perhaps you could, for the record, and for Chief Superintendent Baker, establish the context of this letter.

MS MAGGIE WONG: Yes.

CHAIRMAN: Is this a response to the Audit Commissioner's report?

MS MAGGIE WONG: Yes. This is a response to the issues raised in the LegCo, when considering chapter 2 of the Director of Audit's report in administration of road safety measures that we have looked at earlier, containing recommendations, and the inaccuracies. And the Transport Department provides certain statistics

based on the information compiled.

If we look at paragraph (a), it set out the 120 road casualties in 2012, 15 involved traffic accidents happened on expressways, and in paragraph (b):

"Not many major cities in overseas countries publish statistics on accident involvement rates separately for public transport."

And they could only obtain relevant figures for some major cities in the United Kingdom.

If we go over the page, at paragraph (c), it summarised that:

"For franchised buses, because of the large number of passengers carried and the presence of standing passengers, a significant proportion of accidents involves injury of passengers even [when] there is no collision. This type of accidents typically involves passengers losing balance inside the bus compartment due to various reasons, such as not holding the handrail tightly or falling down when boarding or alighting. These are classified as non-collision type accidents. Of the [2,000-odd] franchised buses ... 5 per cent were non-collision type accidents."

So, more or less, the figure matches the KMB figure provided in their forward planning programme. We can see more up-to-date statistics in the Transport

Department paper, but you need not go through that. The new percentage that they have compiled is about 59 to 65 per cent of all accidents involving franchised buses during 2012 to 2017 are non-collision type accidents.

CHAIRMAN: When you say "accidents", are you describing injuries?

MS MAGGIE WONG: Yes.

CHAIRMAN: Thank you.

MS MAGGIE WONG: The reference is at TD-1, page 111, paragraph 5.

Now, the question I would be asking is: in compiling your data, would you differentiate accidents or injuries caused to passengers while they are seated, or whether they are standees in the bus compartments?

MR STEPHEN BAKER: As far as I recall, we don't have a differentiation whether the victim was standing or sitting.

CHAIRMAN: Is that because your approach is global, as it were, rather than specific towards buses? Your template, for example --

MR STEPHEN BAKER: Yes, sir.

CHAIRMAN: -- is not designed for that peculiarity?

MR STEPHEN BAKER: That is correct, sir, yes.

CHAIRMAN: Your template works for all vehicles?

MR STEPHEN BAKER: Yes, sir.

CHAIRMAN: At some stage, sooner rather than later, I think it would be useful to get to the template, because that probably gives us the direction in which the police approach the attribution of causative factors in accidents and injuries.

MS MAGGIE WONG: Maybe we can go to your template, to establish a few matters first.

CHAIRMAN: Perhaps in the first place, Chief Superintendent, you could describe what the document is, and where it comes from.

MR STEPHEN BAKER: This is a list of driver contributory factors, and the code on the left enables our officers to input onto the computer system what the contributory factor was.

MS MAGGIE WONG: There are two boxes there. The bottom box seems to be a summary of the major accidents caused by different driver contributory factors, based on the number of accidents in descending order. Is that correct? The bottom box is a summary extracting the major causes of contributory factors in descending order?

MR STEPHEN BAKER: I'm sorry, I haven't prepared for these questions.

CHAIRMAN: Let's take it step by step. The list at the top clearly provides an omnibus approach to factors that

might have been relevant to driver contributory factors, and there are, it appears, 62 of them. Do I understand this correctly? Never mind what happens on the right-hand side of the page. These are the pre-determined factors that may have been part of an accident contribution?

MR STEPHEN BAKER: That's correct, sir, yes.

MS MAGGIE WONG: And, if we look at the bottom box, the driver contributory factor, let's quote an example. We see "Driving inattentively", that is 189 cases for the first eight months in 2018; is that correct? That's code number 56.

MR STEPHEN BAKER: Yes.

MS MAGGIE WONG: And we can see, in descending order, the next one is number 60, "Failing to ensure the safety of passenger", and we can see the number of cases here are 97, based on the statistics in the first eight months of 2018.

MR STEPHEN BAKER: Yes.

MS MAGGIE WONG: And the third major factor is "Driving too close to vehicle in front".

MR STEPHEN BAKER: Yes.

MS MAGGIE WONG: The fourth one is "Careless lane changing".

MR STEPHEN BAKER: Yes.

MS MAGGIE WONG: The fifth one is "To avoid collision or

otherwise: swerving/stopping suddenly".

MR STEPHEN BAKER: Yes.

MS MAGGIE WONG: And the sixth one is "Improper or illegal turn".

MR STEPHEN BAKER: Correct.

MS MAGGIE WONG: As we can see, I think there are a total of I think ten -- I haven't calculated it but there are around ten-odd contributory factors that have been extracted here.

MR STEPHEN BAKER: Yes.

MS MAGGIE WONG: But the table doesn't identify the injuries caused to the passenger. For example, in passenger-losing-balance cases, where would we see this data? It appears this table doesn't contain that sort of information.

MR STEPHEN BAKER: That's right. For our statistical purposes, we only categorise injuries into those three categories, and we don't further categorise them. We would have to look at the case file to obtain further information about the injury.

CHAIRMAN: So your three categories are fatal accidents, serious accidents and slight accidents, and the explanatory notes on the back of the 2017 police report on traffic accidents -- "Traffic Report", I think it's called -- defines what those terms mean?

MR STEPHEN BAKER: That is right, sir, yes.
CHAIRMAN: And, in a sense, this is an arbitrary drawing of lines when one comes to serious and slight accidents? You've got to draw the line somewhere?
MR STEPHEN BAKER: Yes.
CHAIRMAN: There is nothing magic about being in a hospital for 12 hours, rather than 15 or 20, or three days?
MR STEPHEN BAKER: That is right, sir.
MS MAGGIE WONG: Is there another template for injuries that you have identified, the three categories of injuries suffered by passengers on buses, franchised buses?
MR STEPHEN BAKER: I am not aware of another template.
MS MAGGIE WONG: Then how do you calculate the number of cases where passengers lose balance on buses?
MR STEPHEN BAKER: I would have to look into that. I haven't got that information with me.
CHAIRMAN: Is it possible that this is a detail that you don't get involved in?
MR STEPHEN BAKER: It is, sir, yes.
CHAIRMAN: Professor.
MEMBER LO: I just want to understand who actually put down the contributory factors; by the officer at the scene, or determined afterwards? So who determines what factors contributed to the accident?
MR STEPHEN BAKER: The officer who investigated the traffic

accident. Once he had been to the scene, he would go back to his office later and input the contributory factors onto the computer system. And the data would be compiled by the Road Safety Unit in the Traffic Branch, and analysed.

MEMBER LO: But there may be multiple parties. For example, if the bus company investigated the accident afterwards, would those factors be flowed back into the accident record; for example, losing balance?

MR STEPHEN BAKER: No. It's all based on police enquiries.

MEMBER LO: What about TD? Who will maintain a record, as the ultimate eventual authority, to say, "This is the record"? Is it TD, is it police, is it -- how do you flow information into it?

MR STEPHEN BAKER: All of the data is input by the police based on their assessment, and transferred to TD, where it is kept and analysed.

MEMBER LO: So the information would not go from TD back to police records?

MR STEPHEN BAKER: We have access to the TD's information, and we share the information regularly.

CHAIRMAN: But the Transport Department is using your information?

MR STEPHEN BAKER: That's right, sir.

CHAIRMAN: And you don't have access to the franchised bus

accident statistics or their designation of contributory factors?

MR STEPHEN BAKER: We do not, sir, yes.

MEMBER LO: So there could be inconsistencies among the records kept by the bus company and the police and TD?

MR STEPHEN BAKER: There could be, but I would suggest that we would rely on our assessment of what happened, because the accident has been investigated by a police officer who has interviewed witnesses, and I don't know how the bus companies make their assessment of what happened.

CHAIRMAN: The Transport Department would be at the apex of the triangle, as it were; they get information through this forward planning programme, certainly we know about that now, and they get information from you. They have two sources of information but you only have one.

MR STEPHEN BAKER: That's right, sir, yes.

MS MAGGIE WONG: Just a matter of logistics: if the Transport Department discovered there are certain inaccuracies in the information compiled by the police, based on the data provided by the franchised bus operators, do you know what they would do about it? Would they consult you first?

MR STEPHEN BAKER: I am aware that when the Transport Department think there is a discrepancy in the

information, they will consult with us about it. I am not aware of all of the circumstances by which they would believe there is a discrepancy.

CHAIRMAN: Are you able to give us any example to illustrate that process?

MR STEPHEN BAKER: On a regular basis, our Road Safety Unit does receive referrals of cases for which the Transport Department would like us to review the data that we have provided. But I don't know on what basis they think there is a discrepancy, whether it is from the bus company or for any other reason.

CHAIRMAN: And, in your review of the data that you provided, what steps would be taken?

MR STEPHEN BAKER: We would contact the investigating formation to double-check that the information they have input to the computer system is correct, ie that it matches the information they have produced on their investigation file.

CHAIRMAN: At what stage in the investigation of the accident is the data inputted by these codes into the computer? How far into the investigation before that happens?

MR STEPHEN BAKER: At a very early stage, within hours.

CHAIRMAN: And, in the process of a review, which by its nature must happen much later, what other material is

available that might be looked at to determine whether or not the initial assessment was accurate?

MR STEPHEN BAKER: The initial assessment is made almost as soon as the officer goes back to his office. Further enquiries might find that the data needs updating. The example you gave of the driver saying the brakes didn't work and yet, after examination, it is found that there is nothing wrong with the brakes, is a good one. And it takes time to find witnesses and to make analysis of the facts that have been gathered at the scene.

CHAIRMAN: Yes, Ms Wong.

MS MAGGIE WONG: Thank you.

So do I understand it correctly that it is the officer who is involved in the case who inputs the data in the first place?

MR STEPHEN BAKER: That is correct.

MS MAGGIE WONG: And who will be conducting the double-checking or critical checking?

MR STEPHEN BAKER: Normally, it would be the sergeant, and there are different levels of supervision involved in the handling of case enquiries.

MS MAGGIE WONG: Yes, and the sergeant will be the sergeant in charge of that division of the officer in charge of the case?

MR STEPHEN BAKER: Directly in charge of that officer.

MS MAGGIE WONG: We will move on to the topic of seat belts. The reason we have spent quite a bit of time on statistics is because it is related to this issue of seat belts.

One of the things we have heard during the evidence is that you can't give seat belts to people who are standing, or standees; you can only --

CHAIRMAN: Forgive me again for interrupting.

Is the failure to use a seat belt one of the driver contributory template factors?

MR STEPHEN BAKER: It is not a contributory factor to the cause of an accident.

CHAIRMAN: No, but it is to the injury.

MR STEPHEN BAKER: Yes. I would have to look further, sir, to answer that question.

CHAIRMAN: So this is limited to driver contributory factors of the accident?

MR STEPHEN BAKER: Yes, sir.

CHAIRMAN: Not the consequences of the accident?

MR STEPHEN BAKER: Yes.

CHAIRMAN: Thank you.

MS MAGGIE WONG: These driver contributory factors, these factors, for how long have they been revised or since when they have been revised or updated?

MR STEPHEN BAKER: I don't know.

MS MAGGIE WONG: Would you mind checking and provide us with the information in due course. Would your department consider compiling a separate template for consequences of accidents that cause particular types of injuries?

CHAIRMAN: I'm sorry, what are you inviting the chief superintendent to do?

MS MAGGIE WONG: For example, to have certain statistics compiled in relation to, like, passenger losing balance, like statistics similarly conducted by the franchised bus operators, or to expand the list here, to identify which are the ones which caused the passenger losing balance in that particular category, given it accounts for the major proportion of the accidents.

MR STEPHEN BAKER: I would like to spend some time to investigate further how -- we already record such details. I'm sorry that I haven't brought such information to the hearing.

MS MAGGIE WONG: Yes. Maybe I will go back to the seat belts issue, because it is relevant to the seat belt issue, as to -- we have the statistics which account for about 59 to 65 per cent for non-collision-type accidents due to passenger losing balance.

So, going back to my issue --

CHAIRMAN: Before you move on, may I ask this general question: as an investigative tool, particularly having

regard to this issue on buses, it is a narrow issue from your point of view, I understand that -- buses, passengers being injured by loss of balance -- how often, if you are aware, would the police have recourse to the black boxes, telematics devices, on the bus, to, for example, examine excessive braking, excessive acceleration or excessive inclination?

MR STEPHEN BAKER: The police would have access to any exhibit when they were investigating an arrestable offence, and that would include causing death by dangerous driving, careless driving, et cetera.

CHAIRMAN: I appreciate that. That's the general provision. But the question really is more specific: how often actually do the police examine this material? For example, one can readily see why you might examine it when you have a fatal accident, but when you have an old lady who falls over because she lost her balance on the bus and breaks her leg, is that something that would be looked at or not? In the general it could be, but is it in fact?

MR STEPHEN BAKER: I would have to consult my colleagues, sir.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Following on that question, will there be a general protocol in terms of investigation into

traffic accidents that, as a matter of routine procedures, you have to obtain black-box or telematics data from the relevant franchised bus companies?

MR STEPHEN BAKER: I am not aware that it is done routinely, and I would need to consult with my colleagues to find out how often it is done.

MS MAGGIE WONG: And, in that regard, CCTV footages, installed on buses?

MR STEPHEN BAKER: I am afraid it is not a level that I have worked at, and I would have to consult with my colleagues.

MS MAGGIE WONG: So may I take you to a working group. If we start, in terms of this topic on seat belt, may I start the process by inviting you to look at a paper in relation to the Working Group on Enhancement of Safety of Franchised Buses, which had been set up after the Tai Po accident in February 2018.

That would be TD Paper 8, at TD-1, page 94.

Maybe I will give this in context. This working group was set up arising from the Tai Po accident in February 2018, with the representatives of all five franchised bus companies, and bus manufacturers, as well as the Transport Department, in mid-March 2018, to review the technical feasibility and desirability of installing new safety devices or applying new technology

on the safety devices to franchised buses, to enhance protection to passengers.

Were you aware of the existence of this working group?

MR STEPHEN BAKER: No.

MS MAGGIE WONG: Or, within the police, do you know who would -- so far as you are concerned, you do not know, but what about people within the police department; do you know who would be responsible for --

CHAIRMAN: I think it might help the chief superintendent if you were to describe the limited number of parties to this working group, if you were to take him to that information.

MS MAGGIE WONG: Yes.

Mr Baker, if you look at paragraph 4, we can see the number of people involved, and footnote 1, the people involved would be the franchised bus companies, namely the Kowloon Motor Bus, Long Win Bus, Citybus, New World Bus and New Lantao Bus.

If we go up to paragraph 4 --

CHAIRMAN: I think we can start at the top of the page.

MS MAGGIE WONG: Yes, at the top of the page.

CHAIRMAN: "... the TD set up a working group with representatives of all franchised bus companies ..."

"FB" is the acronym used for franchised bus

companies, and they are listed as a footnote.

... and bus manufacturers in mid-March 2018 [that's 13 March] to review the technical feasibility and desirability of installing some new safety devices or applying new technology on the safety devices of franchised buses for enhancing protection to bus passengers."

Yes. Thank you.

MS MAGGIE WONG: Yes. So the police is not one of the members consulted or one of the members of this working group. But, in that regard, I wish to ask you something about the installation of seat belts, and invite your comments on this.

We see, in this paper, at paragraph 5, we saw the issue of installation of seat belts as one of the matters discussed in this working group.

CHAIRMAN: Perhaps you would read this paragraph out, to set the context for the chief superintendent.

MS MAGGIE WONG: Yes. If we read paragraph 5:

"In the light of an accident in July 2006 in which a KMB bus collided with another vehicle resulting in a passenger on the upper deck of the bus being thrown out of the bus and another similar accident in December 2007 in which a bus of Citybus ... collided with another bus of New World First Bus ... in Tseung Kwan O

resulting in three passengers on board the CTB's bus being thrown out of the bus, the TD recommended and the FB operators agreed that safety seat belts should be retrofitted at the four front seats on the upper deck of all post-1997 licensed buses to prevent passengers from falling out from the upper deck front seats. At present, the seat belts for all the exposed seats have become a standard feature of all franchised buses."

It was in this context that the working group was considering whether to implement the installation of seat belts to all seats on franchised buses.

If I may take you to a few minutes of the meeting in relation to this working group. This working group is divided also into subgroups, which I am going to take you to some of the meetings.

The reason I am asking you this --

CHAIRMAN: Before you move on -- Chief Superintendent, or any of your colleagues, are any of you aware of whether or not at this stage, when -- I think this is something like 2008, in consequence of the 2006 and 2007 bus accidents -- seat belts were fitted in vulnerable seats, exposed seats -- I think the best example is the front of the bus on the road to Stanley, where they put a bar across the front of the bus and they put seat belts on the front seats. There are other vulnerable seats where

people have nothing in front of them where there are seat belts.

The question that I would pose generally is: are any of you aware of whether or not the police were consulted when these recommendations were being formulated? Maybe you don't, but if you are, please share your experience with us.

MR STEPHEN BAKER: I am not aware of that, sir.

CHAIRMAN: None of your colleagues?

Well, Chief Superintendent, perhaps you could make enquiries as to whether or not the police were consulted. This was the subject of debate in LegCo, and one would have expected, in something like this, given the police involvement in their investigation of accidents, that the input of the police would have been sought.

Do you have the references of the other material that would help the chief superintendent narrow this down?

MS MAGGIE WONG: Yes.

May I take you to, first of all, the end result of this working group, and then I will work backwards to the minutes of the meeting.

If I may take you to TD-1, page 403 to 426. This was a LegCo paper submitted by the Transport Department

in July 2018 for discussion on 25 July 2018, basically summarising the recommendations of the working group.

If we could go to page 407, at the bottom, it starts with --

CHAIRMAN: I think, to give the chief superintendent a context, let's go to the first page. This is a paper prepared by the Transport Department, Transport and Housing Bureau, for discussion at a meeting on 25 July of this year of the Transport Panel of the Legislative Council; is that right?

MS MAGGIE WONG: Yes, Chairman.

If we go to paragraph 10 at page 407, we can see some of the recommendations set out there, and setting out the position.

CHAIRMAN: Before we get there, perhaps we could start at page 403. This is the background.

MS MAGGIE WONG: Yes.

CHAIRMAN: Perhaps you would be kind enough to read out paragraph 2.

MS MAGGIE WONG: Yes.

Mr Baker, paragraph 2 reads as follows:

"Following a fatal traffic accident involving a franchised bus of the Kowloon Motor Bus ... at Tai Po Road on 10 February 2018, the Transport Department ... set up in mid-March 2018 a Working Group

on the Enhancement of Safety of Franchised Buses ..., which comprises members from all FB operators and the major bus manufacturers, to consider and study possible measures to further enhance bus safety. The scope of work of the working group covers the following major areas:

(a) to explore the technical feasibility, applicability and cost-effectiveness of, and any other issues relating to the installation of in-vehicle safety devices/technologies and seat belts on all seats of franchised buses; and

(b) to review the training arrangements adopted by the FB operators."

Over the page:

"So far, the working group has held three meetings since ... 2018; the technical group under the working group has also met five times. The findings and recommendations of the working group are set out in the ensuing paragraphs."

Amongst other matters, on in-vehicle safety devices, which starts at paragraph 4, may I invite you to go to page 407, in relation to installation of seat belts on passenger seats. Paragraph 10 sums up the position:

"At present, all the exposed seats on franchised buses are installed with seat belts to prevent

passengers from falling out from the seats.

11. As confirmed with the bus manufacturers, it is technically feasible to supply all new buses with seat belts for all passenger seats conforming to ... international standards. In this regard, all FB operators have agreed that all passenger seats of all new buses ordered from July 2018 onwards will be installed with seat belts."

In relation to paragraph 12, it talks about the retrofitting of seat belts on all passenger seats of existing buses, and if we drop a few lines to line 6:

"In practice, retrofitting seat belts on passenger seats, in particular those on the lower deck, will involve substantial modification and reinforcement of the bus chassis, including reinforcement of the structure of the franchised buses, addition of support mountings, replacement of all seats by those with seat belts, as well as passing the pull tests of the seat belts and seats to confirm their compliance with the international standards ... Considering the above, the bus manufacturers have advised that it is technically impracticable, if not infeasible, to retrofit seat belts on all passenger seats of both upper and lower decks.

13. However, it should be more feasible to retrofit seat belts on all passenger seats of the upper deck only

in some vehicle models of the existing double-deck fleet."

At paragraph 14:

"... the working group considers that time and manpower resources are critical. The bus manufacturers do not have the required labour and workshop facilities ... to conduct the retrofit work."

If we look through, ultimately, at the bottom:

"Some bus operators have expressed concerns that the retrofitting of seat belts would not only incur significant financial implication, but also considerable time and manpower resources, not to mention the need to re-deploy or procure additional buses to maintain the existing bus service level during the whole process."

If we look at paragraph 16, the working group has arrived at the following recommendations.

CHAIRMAN: Before you get to the recommendations, perhaps we could go through such review as appears to have been taken of overseas practices.

MS MAGGIE WONG: Yes. If we continue to look at paragraph 15:

"The working group has reviewed the prevailing overseas practices or requirements on the installation and wearing of seat belts on buses. Currently, for inter-cities or cross-[border] routes, some overseas

jurisdictions (for example United States, United Kingdom and Netherlands) have mandated the provision of seat belts for all passenger seats, while others (for example UK, Netherlands, and Australia (Victoria)) have imposed mandatory requirement of wearing seat belts. Nevertheless, for buses serving urban routes buses or buses allowed to carry standing passengers, none of the overseas jurisdictions that the working group has reviewed thus far have statutory requirements for the provision of seat belts on passenger seats. According to the transport authorities of those jurisdictions, the urban buses are typically used for short journeys, in terms of both time and distance, and undertaken at moderate speeds on urban routes. Thus, no seat belt requirement at passenger seats on these urban [routes] has been imposed."

It also contained a summary of the findings at annex B, but --

CHAIRMAN: Perhaps we could turn to that. That's at page 415.

MS MAGGIE WONG: Yes.

CHAIRMAN: You will see the range of countries that are encompassed in this statement, that in none of these jurisdictions are seat belts required for urban bus routes or where buses carry standing passengers.

MS MAGGIE WONG: So, Mr Baker, before I go to the recommendations, the findings from the overseas practices seem to suggest there is no point of having seat belts installed where there are standing passengers, because you can't give seat belts to standing passengers, and those are the people that are prone to injuries when there is a sudden braking or sudden stopping, in those type of injuries. That's the first point.

The second point is, in terms of urban routes, where the travel speed is generally within acceptable range, so it appears it is not as dangerous as highways, expressways or cross-border routes where generally you have a higher speed limit, to the tune of 70km per hour or above.

What is your comment in relation to the usefulness or effectiveness of seat belts on urban buses that run urban routes?

CHAIRMAN: I think, before the chief superintendent is invited to respond to such a general question, there is a third factor that is identified in paragraph 15, and it is this. It is not only that typically, as one would expect, in an urban bus route, the speeds are more moderate, but also these involve short journeys, both in terms of time and distance. That of course is a factor

that's relevant to the time in which a passenger has to put a seat belt on and his assessment of whether or not it is worth doing.

You have been invited to indicate whether or not you have any view. Do you have any view?

MR STEPHEN BAKER: I do, sir. From a police and road safety perspective, the police believe that seat belts save lives. If we are to look at the Transport Department web page, it states that wearing a seat belt can reduce the chance of death or serious injury by about a half, and it also says that seat belts are very effective at reducing the effects of traffic accidents occurring at quite low speeds.

Now, speaking purely from a road safety perspective, we would encourage the use of seat belts as widely as possible.

I would also like to observe that public light buses are fitted with seat belts.

CHAIRMAN: We have received evidence that suggests that they are to be categorised differently from franchised buses. Broadly speaking, the difference suggested is those that wish to go racing to their destination get on a PLB; those who are more content to arrive alive go on a franchised bus.

Are you aware of the circumstances in which seat

belts were mandated for PLBs?

MR STEPHEN BAKER: No, sir.

MS MAGGIE WONG: Before I go on, in relation to this PLB situation, I think that was a topic covered in the Audit Commission report, review, in that paper, as to the situation of seat belts worn by PLB passengers.

CHAIRMAN: Before you get involved in that detail, in view of your answer -- a statement that is clearly generally accepted worldwide -- that seat belts save lives, nevertheless, in the safety-conscious jurisdictions listed in annex B, the United Kingdom, Netherlands, Australia in the state of Victoria, New Zealand, Canada, Singapore, none of them have found it appropriate to require them to be installed on urban buses.

With that as a background, what view, if any, do you have about not only their provision on franchised buses, mandated provision -- what view do you have about the requirement, if it was decided to have one, that they be worn, and then the issue that arises of enforceability?

MR STEPHEN BAKER: I think that passengers should have an option to enable them to travel as safely as possible, that if seat belts are not fitted then that option is denied, and that as to the enforcement aspect, it can be seen from personal experience that most people don't use seat belts on public light buses, and we can

expect the same thing on franchised buses, for the reasons that have been discussed: convenience, short journeys, things like that.

So enforcement will be an issue, and I don't think the police would be able to regularly enforce such regulations, if they existed. But at the moment they do not for franchised buses.

CHAIRMAN: But they do for PLBs.

MR STEPHEN BAKER: They do, sir, yes.

CHAIRMAN: And what is the ease with which that is enforced or the difficulty?

MR STEPHEN BAKER: It is difficult to enforce, and it is not enforced regularly. I would say it is enforced occasionally, when officers decide to take enforcement as a road safety issue. There is always more than one aspect to road safety -- publicity -- but it is also coupled with enforcement from time to time.

CHAIRMAN: Am I right in -- forgive me, you were going to carry on.

MR STEPHEN BAKER: I was going to add that we hope that people won't obey the law only because they feel they might be prosecuted for it, for not following the law. Yes.

CHAIRMAN: It took a long time to persuade people when they had a choice that they should wear seat belts in cars.

MR STEPHEN BAKER: Yes, sir. But going back to my earlier comment, in our view, it is better if people have the option to improve their own road safety, as a matter of choice.

CHAIRMAN: Thank you.

MEMBER AUYEUNG: Just a quick question on the seat belt. Using the experience you have on the PLB, how successful has the police force been on enforcement?

MR STEPHEN BAKER: I don't have enforcement figures, but, like I say, I would hope that people would follow the law because it was good for them rather than because they would be prosecuted if they didn't.

CHAIRMAN: But, as you said earlier, most people don't wear them on PLBs, enforcement is difficult, and one can see why, and you would expect that same trend to obtain with buses?

MR STEPHEN BAKER: I would, sir, yes.

MS MAGGIE WONG: Thank you. Maybe just to wrap this up before we break -- in general, you make a general statement that seat belts save lives. I am asking from the perspective of cost/benefit analysis. Does the police have any empirical data or analysis as to the accuracy of the statement that you made, in the context of urban buses with standees?

CHAIRMAN: I'm sorry, I don't understand that question.

MS MAGGIE WONG: Whether they have conducted analysis on standing passengers, of the number of standing passengers that are injured as a result of accidents due to lack of seat belts, or have you conducted any analysis in terms of comparisons of passengers losing balance, in percentage, as to whether they are attributable to the lack of seat belts?

CHAIRMAN: By its nature, a standee cannot be provided with a seat belt.

MS MAGGIE WONG: Yes.

So, in that regard, would you have statistics or figures?

MR STEPHEN BAKER: We do not.

MS MAGGIE WONG: Mr Chairman, I see the time.

CHAIRMAN: Perhaps the real question would be this, the more useful one: do you have any statistics about people who are injured while seated on a bus, not wearing a seat belt? The bus company figures suggest that that number of passengers is very low, 1 per cent of the injuries, something like that, 1 to 2 per cent. Do the police have any such figures?

MR STEPHEN BAKER: I am not aware of any statistics, but I can search later, if you would wish me to.

CHAIRMAN: This would perhaps be most obvious, and I think unfortunately recently there has been an accident like

this, where somebody sitting in a vulnerable seat is projected out of that seat and impacts on something hard and either a serious or I think in this case a fatal injury incurs, so that would give rise to an opportunity for someone, if there was a template that said, "Seat belt not worn but would likely have been beneficial", in the general way that seat belts are. So perhaps you could see if there has been any attempt at analysing that.

MR STEPHEN BAKER: I will do, sir.

CHAIRMAN: Thank you.

Ms Wong.

MS MAGGIE WONG: Thank you, Mr Baker. If I may go through the recommendations before we break.

In paragraph 16 of the TD Paper at page 409, the working group arrived at the following recommendations:

"(a) seat belts should be provided for all seats in future procurement of new buses; and.

(b) subject to further assessment on the technical, operational and financial feasibility, consideration may be given to retrofitting all seats in the upper deck with seat belts on buses deployed for specific bus routes, ie long-haul routes which are operated via expressways with relatively fewer bus stops."

But the Transport Department will require the

franchised bus operators to explore in more details in conjunction with the bus manufacturers on this aspect.

So the suggestion or recommendation is for all new buses that would be fitted with seats, but for existing buses, they would only be retrofitted subject to financial considerations, and even so, it would only be supplied to limited seats on the upper deck -- sorry, upper deck, with seat belts on specific bus routes, like long-haul routes with fewer stops, and on highways.

Do you have any comments in relation to the recommendations?

MR STEPHEN BAKER: I think the recommendations are positive, but like I said, from the point of view of road safety, we would encourage the use of seat belts as widely as possible, although the recommendations are a step in the right direction.

MS MAGGIE WONG: Thank you.

CHAIRMAN: Yes, Ms Wong. Is that a convenient moment?

MS MAGGIE WONG: Yes. Thank you.

CHAIRMAN: We are going to take a morning break for 20 minutes now, and we will resume in 20 minutes' time.

(11.33 am)

(A short adjournment)

(11.53 am)

CHAIRMAN: Yes, Ms Wong.

MS MAGGIE WONG: Just to wrap up the seat belt issue, may I take you to one statement made by the Hong Kong Police in your submission to the committee dated 7 May 2018. That's in the miscellaneous bundle, page 124-1.

If we go over to page 124-2, at the top of the paragraph, if you look at the three lines in paragraph 3:

"The absence of seat belts in most franchised buses and standing passengers may also contribute to passengers sustaining injury and therefore causing a reportable accident."

Can I just confirm, this is a generalised statement rather than based on statistics, based on your answers before the break; is that correct?

MR STEPHEN BAKER: Yes, it is.

MS MAGGIE WONG: Thank you.

Moving on to another topic, on illegal parking. We have heard evidence from some of the franchised bus operators that in relation to the enforcement actions taken against illegal parking, especially at bus stops, appears to be ineffective.

Can I take you to some of the evidence. That's Mr William Chung of New World First Bus. That's in the TSCP bundle, page 731.

CHAIRMAN: What day was this evidence?

MS MAGGIE WONG: That would be Day 4.

CHAIRMAN: Day 4 in the Augustinian calendar?

MS MAGGIE WONG: Yes.

CHAIRMAN: What day of the month was this?

MS MAGGIE WONG: 30 May 2018. It is in TSCP-2A bundle.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Thank you.

If you look at the top of the page, Mr William Chung's evidence -- have you got that, Mr Baker?

MR STEPHEN BAKER: (Nodded head).

MS MAGGIE WONG: Mr William Chung said:

"In many bus stops, there is illegal parking, and these vehicles are getting in the way of the buses, in a way that they cannot pull up close to the kerb for loading and unloading."

If we scroll down to line 16, when Mr Duncan asked, "In what way?", Mr William Chung said:

"For instance, illegal parking would reduce the width of the road when the buses drive past. Because of the large size of the bus, it's likely to get into problem, and if the passengers cannot get on and off on the kerbside, there is a likelihood of them being hit by vehicles or they may fall over."

In terms of the effectiveness of the enforcement, Mr Duncan asked at line 23:

"... has the company endeavoured to overcome this problem?", and Mr William Chung said:

"We notified the Transport Department about the black spots of illegal parking. We hope that these sections, they will have 24-hour restricted zone. We also notified the police to do enforcement work.

Mr Duncan: Has that eradicated the problem?

Mr William Chung: It doesn't help much."

And the chairman also raised this question:

"Did it result in any action?"

Mr William Chung: The police would take action, but as soon as the police back is turned, then the illegal parking problem would recur. Say, for instance, in Causeway Bay, Yee Wo Street, near SOGO, outside SOGO, in fact, this is a problem that occurs very often."

We also have evidence from trade unions; they complain that it took a very long time to communicate with the police in relation to the illegal parking problem.

May I ask, first of all, is illegal parking a problem that the police was aware of throughout the years --

CHAIRMAN: Specifically illegal parking in and around bus stops or --

MS MAGGIE WONG: In and around bus stops.

MR STEPHEN BAKER: Yes, it is a problem the police have been aware of. In fact, in 2017 we issued 4,510 prosecutions against people who parked their vehicles or stopped their vehicles in a bus stop.

I'm sorry, can you elaborate your question again, please.

CHAIRMAN: Is that a fixed penalty ticket?

MR STEPHEN BAKER: Yes. It's what we call a Pol. 570, which is a fixed penalty ticket.

CHAIRMAN: What does that cost the miscreant; $320, in 2017?

MR STEPHEN BAKER: $450.

CHAIRMAN: Now.

MR STEPHEN BAKER: Yes.

CHAIRMAN: But then?

MR STEPHEN BAKER: Also then.

So, yes, we are aware of illegal parking problems and the difficulties caused by persons who stop their vehicles in unauthorised places.

CHAIRMAN: Do any difficulties arise with enforcement because of the level of the penalty?

MR STEPHEN BAKER: I believe the penalty hasn't been increased for many years, and so it has less of a deterrent effect than it used to have.

CHAIRMAN: As I remember it -- correct me if I am wrong -- the submission that the police made was that in order to

keep up with inflation, the then $320 ticket should be $800 or thereabouts. Is my memory more or less correct?

MR STEPHEN BAKER: It is, sir, yes.

CHAIRMAN: And the resulting penalty that was agreed upon by government was $450?

MR STEPHEN BAKER: That's correct, sir, yes.

CHAIRMAN: Yes, Ms Wong.

MS MAGGIE WONG: And the complaints -- we have heard complaints from the trade unions. I'm going to refer you to some extracts. But the main complaint is -- they complained the police have failed to enforce the law in relation to the illegal parking near bus stops, and that has been a recurring problem.

They also raised questions about the lack of manpower that the police put in tackling or taking enforcement action against illegal parking.

They also stated that, since 2017, although the police figures suggest they have stepped up enforcement, they don't see any significant improvement.

In relation to this aspect, about failing to enforce the law, what do you say or what is your response to that suggestion?

MR STEPHEN BAKER: Well, we enforce the law to the best of our ability. Taking enforcement action at bus stops, whilst it is important, may not be the greatest of our

priorities at any particular time. For example, the public are complaining about vehicle obstruction and illegal parking at many places, including places where it causes traffic jams, whilst we have increased our enforcement against illegal parking and vehicle obstruction related offences, from the top of my head, by about 40 per cent in the last year.

I would also say that approximately 30 per cent of the calls received by frontline officers are related to vehicle obstruction or illegal parking. So the police have made, and are making, their best efforts against illegal parking and vehicle obstruction.

If Ms Yau could add a point as well.

CHAIRMAN: Yes, please do, Chief Superintendent.

MS YAU SIN MAN: (Via interpreter) Apart from stepping up law enforcement, we also do something in terms of public education. In 2018, in our police call programme, we particularly raised the issue of illegal parking at bus stops, to alert the public.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Thank you.

We have seen from the recent news reports that the police, since 1 August this year, have launched a six-month crack-down on vehicles in congested black spots, and they include problems brought on by loading

and unloading goods in restricted zones, private cars halting in areas meant for stop by buses, minibuses and taxis, illegal entries into box junctions and inappropriate U turns.

It is stated that in order to step up the measures, these five offences now carry a fine of $400, while picking up or setting down passengers in restricted areas carries a max penalty of $560.

May I ask this question. About the selection of these black spots, on what basis did the police choose these black spots?

MR STEPHEN BAKER: The police have the ability, through their case management information system, to identify the locations where the greatest number of traffic complaints are received. That's one factor.

Another factor is complaints made directly to the police station made by members of the public, either by telephone or by letter. And so, at a local level, it is possible for frontline commanders to identify the congestion black spots, and to share that information with their regional command and with the headquarters command.

MS MAGGIE WONG: So, following your answers, would some of these complaints come from trade unions or franchised bus operators?

MR STEPHEN BAKER: We have a mechanism for liaison with trade unions and with the franchised bus companies, but I would say that the greater part if not almost the whole part is based on the statistics of complaint from the public, with additional input from the bus companies and the unions.

MS MAGGIE WONG: The news report mentioned about the trial -- it is a trial run -- it will roll out cameras with a city-wide two-month pilot, in Kowloon East and New Territories North, between December last year and January, and it stated that the initial scheme had been satisfactory, with $540 fixed penalty tickets.

About the installation of cameras, where would you normally install these cameras?

MR STEPHEN BAKER: The pilot scheme that you have referred to, which was conducted in December last year and January this year, involved the use of officers using a Handycam rather than a fixed-site camera.

CHAIRMAN: Isn't that an expensive way of enforcing traffic infractions, manpower?

MR STEPHEN BAKER: We began the trial in an effort to reduce the amount of manpower that was used to enforce these kinds of offences. The trial focused on moving-traffic offences which caused vehicle obstruction, for example, setting down passengers or goods in restricted zones.

Normally, to enforce this kind of offence, take this kind of enforcement action, the officer would have to intercept the vehicle at the scene or, as is what very often happens, the vehicle drives away then officers would mount a pre-planned snap-check or roadblock nearby, or an officer on a motorcycle would follow the vehicle and stop the vehicle. Therefore, because of this requirement, this necessity, more manpower would be required for this kind of operation.

The aim of the pilot and the subsequent trial is to enable two officers, one using the video camera, the other making notes of what he saw, to take enforcement action without intercepting the vehicle, and therefore the manpower requirement for the interception, either by following the vehicle on a motorcycle or by arranging a roadblock nearby, is done away with.

So it was an attempt to increase the efficiency of the enforcement.

CHAIRMAN: Has thought been given to just using cameras, taking the man on his motorbike out of it, the camera captures the infraction, it has the number plate, it has the location, it has the length of time that the vehicle has been breaking the law; you then track the registered owner from the number on the car?

MR STEPHEN BAKER: That's what the trial is doing, sir, yes.

CHAIRMAN: Without men being involved is what I'm suggesting.

MR STEPHEN BAKER: I see.

CHAIRMAN: Automatic cameras.

MR STEPHEN BAKER: That is something that we are looking at in the longer term.

CHAIRMAN: That is something that is used widely in London, is it not?

MR STEPHEN BAKER: It is, sir, yes.

CHAIRMAN: And it's used elsewhere -- Singapore?

MR STEPHEN BAKER: Yes, it is, sir.

CHAIRMAN: Why are we not using it here?

MR STEPHEN BAKER: I would say that was a policy issue, sir, that is now being addressed.

CHAIRMAN: Is it a question of funding being made available?

MR STEPHEN BAKER: I don't think it's a matter of funding, but it is a matter of policy support.

CHAIRMAN: Can I come back to my first question which is this: using policemen, the man himself, the police officer, to enforce traffic violations, is expensive, is it not, compared with technology?

MR STEPHEN BAKER: It is, sir, yes.

MS MAGGIE WONG: Has thought been given to installing cameras or CCTV on the bus stop or location near the bus stop?

MR STEPHEN BAKER: Perhaps I could ask Ms Yau to answer these questions.

CHAIRMAN: Certainly. Chief Superintendent.

MS YAU SIN MAN: (Via interpreter) The use of CCTV at bus stops, for the purpose of law enforcement, is being tried out in a pilot. This is something from the Development Bureau and the Transport and Housing Bureau. This is under the Energising Kowloon East Office of the Development Bureau. They have a conceptual pilot. In Kowloon East, some fixed cameras are installed there. In the first phase, the cameras would target moving offences, vehicles in motion. The second phase would be on illegal parking cases.

This is ongoing. In August, we issued the tenders. In the coming 24 months, we would look into how this might take the place of enforcement by officers. If it proves to be a mature technology, then the police will further consider how the findings can be adopted by the police to take the place of enforcement by officers physically.

CHAIRMAN: This is a mature technology. It is used widely in major cities. There is nothing immature about it.

MS YAU SIN MAN: (Via interpreter) Currently, we are trying to get the computer to use video analytics to take the image of a vehicle and how it constitutes illegal

parking.

I would also like to add that in relation to laws against illegal parking, we are required to give the fixed penalty ticket to the driver or attach it to the screen, windscreen, of the vehicle, there and then. If we use electronic ticketing or use CCTV image and then issue a ticket, under current legislation, we are unable to do it.

CHAIRMAN: You can't issue the ticket to the registered driver by using a camera to identify the number plate and then match it with the registered driver's particulars?

MS YAU SIN MAN: (Via interpreter) If it is, for illegal parking, that cannot be done. However, with regard to driving offences, yes, that can be done.

CHAIRMAN: What is required for illegal parking; that a ticket be put on the car itself?

MS YAU SIN MAN: (Via interpreter) Yes, the front of the car, or give it to the driver.

CHAIRMAN: Well, that needs to change, doesn't it, in order to catch up with technology that's been available for ten years?

MS YAU SIN MAN: (Via interpreter) We are aware that the THB has started work in legislative amendments.

CHAIRMAN: It's a lot easier to amend legislation by

deleting things.

Yes, Ms Wong.

MS MAGGIE WONG: Yes. About this conceptual scheme, can you tell us when did you have this idea with the Development Bureau, in developing this technology? When was that?

MS YAU SIN MAN: (Via interpreter) In April 2017, the police, under Energising Kowloon East Office, was invited to give comment. Our view was to tell the contractor as to what constitutes a traffic offence.

MS MAGGIE WONG: Do you have minutes of the meeting in relation to the development of the scheme with the Development Bureau?

MS YAU SIN MAN: (Via interpreter) There may be some material, but I have to go back to find it.

MS MAGGIE WONG: Would you be happy to provide us if you can find it?

MS YAU SIN MAN: (Via interpreter) Yes.

MS MAGGIE WONG: In relation to this point, I understand that the police have been using automatic number plate recognition system, that is ANPR, since 2015; is that correct?

MS YAU SIN MAN: (Via interpreter) I can't recall the year, but yes, we have been using it.

MS MAGGIE WONG: I think it is stated in one of the LegCo papers, a recent LegCo paper, placed before the

Legislative Council Panel on Security, Law Enforcement Against Moving Traffic Offences, in April 2018.

It is a paper compiled by the Transport and Housing Bureau, Security Bureau and Hong Kong Police Force. The heading is, "Legislative Council Panel on Security, Law Enforcement Against Moving Traffic Offences".

CHAIRMAN: Is there a reference in the bundle to this material?

MS MAGGIE WONG: No, Mr Chairman. This is newly added this morning.

We can see at paragraph 2, "Background":

"The police have been fulfilling their duties to safeguard the safety of the public through different means. One of the police's operational priorities is to ensure road safety and reduce traffic accidents."

Then, jumping a few lines:

"The police have been adopting a multipronged approach to promote road safety, combat moving traffic offences, and launch publicity activities and educate the public and drivers to comply with road [safety] regulations."

If we go to paragraph 7, it is in this context that there were suggestions about law enforcement action against the moving traffic offences. We can see the use of technology -- it is stated there:

"At present, there are 195 red light cameras and 24 speed enforcement cameras operating at 130 camera housing locations across the territory. Evidence collected from the cameras allows the police to subsequently identify the concerned vehicles and initiate prosecution without the need to intercept an offending vehicle, thereby effectively improving road safety. The police have been using the automatic number plate recognition ... system since 2015. The system enables traffic enforcement officers to detect relevant traffic contraventions, including those involving expired vehicle licences, registered vehicle owners driving while disqualified or having traffic arrest warrants."

May I ask about this automatic number plate recognition system. It appears this is a system also originating from London or England; is that correct?

MR STEPHEN BAKER: Could I help with this part of the question --

MS MAGGIE WONG: Yes, thank you.

MR STEPHEN BAKER: -- the ANPR part.

A trial was conducted on the use of automatic number plate recognition, beginning in 2013, and it was conducted on a very limited basis. It involved a roadside-mounted camera, which was linked to data

provided by the Transport Department concerning vehicles that were registered to persons who had an outstanding traffic arrest warrant. This enabled the officers using the equipment to identify such vehicles, and the vehicle would then be intercepted either at a roadblock or by following the offender's vehicle on a motorcycle, in order that prosecution action would be taken.

So it was used in that very limited context, as a trial.

Steps are now being taken to widen the use of automatic number plate recognition, and to widen the number of offences that can be linked to the database which is provided by the Transport Department.

We are in the process of identifying equipment which can be placed inside police vehicles, selected police vehicles, which can patrol on the highways, and surface such vehicles linked to persons wanted for criminal offences, vehicles that are wanted, vehicles that are registered to persons who have an outstanding traffic warrant.

That is the limited context in which ANPR has been used and is intended to be used. So it is a little bit -- the context of paragraph 7 doesn't give an accurate picture of what is going on.

CHAIRMAN: So it is limited to trying to detect people who

are already wanted?

MR STEPHEN BAKER: That's right, sir.

CHAIRMAN: It is not aimed at detecting people who commit moving offences generally?

MR STEPHEN BAKER: That's right, sir.

CHAIRMAN: Is there any reason why not the latter?

MR STEPHEN BAKER: There is another system which is used in police vehicles, which can record using video people committing traffic offences on the roads. But these systems all involve police officers operating them. They are not automated systems, which are envisaged at some time in the future, as Ms Yau has said, using video analytics, and so on and so forth.

CHAIRMAN: What about the use of the equivalent of what they use in London at yellow-box junctions?

MR STEPHEN BAKER: That is also linked to video analytics.

CHAIRMAN: Yes.

MR STEPHEN BAKER: Which is something we don't have yet, sir.

CHAIRMAN: But they have had it in London for ten years.

MR STEPHEN BAKER: I know, sir, yes.

CHAIRMAN: In fact, they have been so successful that millions of pounds were raised in the penalties people had to pay.

MR STEPHEN BAKER: Yes. The installation of such equipment

in Hong Kong is not simply a police matter. It involves other government departments and policy-level decisions.

CHAIRMAN: Well, it obviously has data privacy connotations as well.

MR STEPHEN BAKER: It does, sir, yes.

CHAIRMAN: Balanced against breaking the law.

MR STEPHEN BAKER: That's right, sir.

MS YAU SIN MAN: May I supplement a bit on the yellow-box junction involvement?

(Via interpreter) In September 2015, the THB started a study on yellow box enforcement camera system, and in April 2016, because of lack of financial backing, the study came to a stop.

CHAIRMAN: Who was providing the money?

MS YAU SIN MAN: (Via interpreter) The THB could not come up with funding support.

CHAIRMAN: This is a matter dealt with in Chief Superintendent Cadman's letter of August 2018, is it not?

MS YAU SIN MAN: (Chinese words not interpreted).

CHAIRMAN: Could we have that on the screen? I don't have the paginated bundle.

MS MAGGIE WONG: That would be 124-538 of the miscellaneous bundle.

CHAIRMAN: The page number again?

MS MAGGIE WONG: The letter starts at page 124-538.

And the paragraph Ms Yau mentioned is in paragraph 4 at page 124-539.

Maybe I will read that for the record.

CHAIRMAN: Yes, if you would.

MS MAGGIE WONG: In paragraph 4, you stated there:

"In respect of the yellow-box junction enforcement, in September 2015 THB convened a study with police to explore whether the yellow box enforcement camera system is technically, financially and legally feasible in Hong Kong. Since then, Hong Kong Police had tried to identify suitable products that could fit the context of Hong Kong. However, in April 2016 the study came to a halt as there was no funding support to engage a consultancy study. That said, the matter is now being actively considered, along with other types of enforcement cameras in the aforementioned interdepartmental forum."

Now, Ms Yau, it stated there that the matter is now being actively considered. What triggered a halt to an active consideration of the matter?

CHAIRMAN: They ran out of money, I think we are being told, or rather money was not forthcoming. I don't think anyone has accused this government of running out of money. It's the use of the money that's the issue, is

it not?

MS YAU SIN MAN: (Via interpreter) In the THB, together with the police and the Transport Department, there are regular meetings, and we have presented many general plans on how to use technology to enforce the traffic laws, including yellow-box junction enforcement.

CHAIRMAN: When was the scheme revived or at least consideration of reviving the scheme revived?

MS YAU SIN MAN: (Via interpreter) In February 2018, we had some meetings on e-enforcement. The issue of e-enforcement was brought up for discussion.

CHAIRMAN: E-enforcement is your shorthand for electronic enforcement of traffic violations?

MS YAU SIN MAN: (Via interpreter) Correct.

CHAIRMAN: You detect the malefactor, you identify him through the number plate to the registered owner, and you send him an e-ticket; is that it?

MS YAU SIN MAN: (Via interpreter) Simply put, that's it.

CHAIRMAN: And for how long have we been pursuing trying to do this?

MS YAU SIN MAN: (Via interpreter) If we are talking about e-tickets, we started to raise this possibility in 2012. The meetings that we are now having are to tie in with the Smart City initiative of the government. We hope that in traffic law enforcement that more technology

should be adopted.

CHAIRMAN: So we have taken six years and we are no further along the road; is that it?

MS YAU SIN MAN: (Via interpreter) We are actively doing something about it.

CHAIRMAN: Smart City, you say?

MS YAU SIN MAN: (Via interpreter) The general traffic law enforcement will be considered in the context of the general direction adopted by the SAR government.

CHAIRMAN: Yes, Ms Wong.

MS MAGGIE WONG: Ms Yau, you mentioned that in February 2018, you had some meetings on e-enforcement. What triggered this meeting to consider the issues of electronic enforcement?

MS YAU SIN MAN: (Via interpreter) It is mainly because of the Smart City initiative formulated by the government, and that's why we had some meetings.

MS MAGGIE WONG: Was this after the Tai Po accident on 10 February 2018?

MS YAU SIN MAN: (Via interpreter) No.

MS MAGGIE WONG: So you are saying it was before, the meeting was held before?

MS YAU SIN MAN: (Via interpreter) Well, we had the meeting with the THB, but it is not because of the accident.

CHAIRMAN: That's a separate question. The question is was

it before or after. Whether it was on account of is another matter.

MS YAU SIN MAN: (Via interpreter) The meeting was prepared before February.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Now, you stated in that paragraph that it involved interdepartmental forum about these enforcement cameras. What are the departments concerned?

MS YAU SIN MAN: (Via interpreter) The THB, the police and the Transport Department.

MS MAGGIE WONG: So do I understand correctly that this yellow-box junction enforcement is now revived as a discussion in tackling the illegal parking problem?

MS YAU SIN MAN: (Via interpreter) This is just a part of it. In the meeting, we talk about generally the adoption of technology to take the place of manpower in traffic law enforcement.

MS MAGGIE WONG: What about the ANPR system? Has that been discussed as one of the systems that could be utilised to tackle illegal parking problem?

MS YAU SIN MAN: (Via interpreter) Not particularly mentioned. ANPR was not particularly mentioned.

MS MAGGIE WONG: We have heard some recommendations from the trade unions, bus companies, and some of the LegCo papers, making some recommendations as to how to tackle

this illegal parking problem.

In summary, there are five recommendations. May I ask you about each one of them? The first is we have seen, in one of the answers given by William Chung of New World Citybus, that there be a 24-hour restriction zone. What is your view on this or what is the police department's view on this?

CHAIRMAN: 24-hour restriction zone of what, where, for what purpose?

MS MAGGIE WONG: 24-hour restriction zone in relation to year the bus stop, to tackle -- to identify the cars that have illegally parked near the bus station. That's what I understood William Chung's evidence to be.

CHAIRMAN: That, in addition to the bus stop, there should be a zone before and after --

MS MAGGIE WONG: Yes.

CHAIRMAN: -- the bus stop, where parking was prohibited, 24 hours a day?

MS MAGGIE WONG: Yes.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Thank you to the secretariat who have pulled up the screen the suggestions at the top:

"We hope that [these black spots] of illegal parking these sections, they will have 24-hour restricted zone. We also notify the police to do enforcement work."

So it is in that context that I raise this recommendation. So what is your view on this?

MS YAU SIN MAN: (Via interpreter) We believe that 24-hour restricted zones can be helpful, but the setting of restricted zone is under the ambit of the Transport Department. We need their collaboration.

MS MAGGIE WONG: It mentioned here that they notified the police to do this enforcement work. Do you have any recollection that this 24-hour restricted zone has been raised with the police by franchised bus operators?

MS YAU SIN MAN: (Via interpreter) It is not very clearly raised in writing, according to my recollection. I may have to check when I go back.

MS MAGGIE WONG: Do you have any recollection of this matter ever being raised in your meetings with the Transport Department?

MS YAU SIN MAN: (Via interpreter) In our meetings with representatives of the Transport Department and franchised bus operators, they did mention illegal parking causing obstruction to bus operation, yes, it was raised.

When we received the message from them, we also disseminated the same to different police regions and formations so that they could take necessary action.

MS MAGGIE WONG: The second suggestion they made is signage

at bus stop, putting signage at bus stop, that that section where the bus stop is is not allowed to have any illegal parking.

We have seen some photographs in one of the documents provided by Kowloon Motor Bus. That's at bundle 12A, page 5174. It's actually from 5173 to 5174. We can see, in Chinese characters, "Illegal parking strictly prohibited" in the green box, we see in the photo.

MS YAU SIN MAN: (Via interpreter) I have never seen this sign previously. Actually, all signs on the road have to be approved by the Transport Department. I don't know whether this is something prepared by the bus operator or it has been approved by the Transport Department.

MS MAGGIE WONG: Leaving aside the permission question, can you tell us whether that sort of signage posted at bus stops would assist the enforcement or would assist public's awareness of combatting the problem of illegal parking?

MS YAU SIN MAN: (Via interpreter) Well, such signs of course can be good reminders, but are they good enough to prevent illegal parking? I don't know how effective they are going to be.

CHAIRMAN: Is there any problem with ignorance, people not

understanding that you can't park your car in the middle of a bus stop? Is that a problem or not?

MS YAU SIN MAN: (Via interpreter) I know the public know that they cannot park their cars at any bus stop. But they may think it is okay to stop for a short while. So we need to do some public education.

CHAIRMAN: So the real issue is that they take a chance about breaking the law?

MS YAU SIN MAN: (Chinese words not interpreted).

CHAIRMAN: And that's where enforcement is required, so the chance becomes too expensive?

MS YAU SIN MAN: (Via interpreter) Certainly.

MS MAGGIE WONG: Now, the third recommendation they made is having double yellow lines around the bus stop area.

CHAIRMAN: By that you mean the approach and the exit from the bus stop?

MS MAGGIE WONG: Yes, correct, the approach and exit.

How do you find that suggestion?

MS YAU SIN MAN: (Via interpreter) This is just the same as the previous recommendation. We believe it is useful. No parking zone, it is good for preventing illegal parking. But I think the Transport Department has to do something about the road signs.

MS MAGGIE WONG: Has that been raised with the Transport Department, as far as you know?

MS YAU SIN MAN: (Via interpreter) But there is no record in the Traffic Branch Headquarters that this was raised, but the regions also have their own traffic formations and they would liaise with the local Transport Department officers on road signs, signage, and yellow lines. They have discussions separately.

CHAIRMAN: Is it currently the practice to have double yellow lines in the approach to a bus stop and the exit from a bus stop or not?

MS YAU SIN MAN: (Via interpreter) Usually, you find that.

CHAIRMAN: So the issue really is one of enforcement, because, again, everyone knows what a double yellow line is?

MS YAU SIN MAN: (Via interpreter) That's right.

MS MAGGIE WONG: The fourth suggestion we have explored is by deployment of technology such as CCTV and the video cameras as you have mentioned earlier on.

The fifth recommendation is a suggestion that we may consider the practice in Singapore of having cameras installed next to the driver's seat, and all the driver needs to do is to press the button whenever he saw there is illegal parking.

CHAIRMAN: At a bus stop?

MS MAGGIE WONG: At a bus stop.

CHAIRMAN: In other words, pray in aid the use of people who

are inconvenienced by this illegal parking, get them to help.

And your question, Ms Wong?

MS MAGGIE WONG: It is, first of all, what do you think about this suggestion? Because they are the complainants and they have cameras already installed on the buses; all they need to do is press a button and pass the footage to the Transport Department. And the suggestion is to simply invite them to assist in the enforcement of the law. How do you find that suggestion?

MS YAU SIN MAN: (Via interpreter) There are two parts. If it is moving traffic offences, if we have footage from bus companies, and if we get the assistance of bus drivers in the investigation, we can fine the driver, we can fine the owner of the vehicle, to enforce the law.

However, if it is a parking offence, illegal parking, then, as I said, there are some legal restrictions; we need to issue the ticket there and then.

So it depends on the nature of the offence.

CHAIRMAN: Could you help me with the reference to the legislation which provides, as I understand your evidence, that a non-moving infraction, a parking offence, requires the ticket to be either affixed to the

windscreen or given to the driver? What is that legislative provision?

Perhaps one of your colleagues can look it up and come back to it later.

MS YAU SIN MAN: (Via interpreter) Yes. It's Cap 237. I am trying to find the provision.

CHAIRMAN: What's the name of the ordinance?

MS YAU SIN MAN: Fixed Penalty (Traffic Contraventions) Ordinance.

CHAIRMAN: Thank you.

As I say, we can come back to this later.

MS YAU SIN MAN: Yes.

CHAIRMAN: But it clearly is an impediment to the efficient enforcement of law.

MS YAU SIN MAN: (Chinese words not interpreted).

MS MAGGIE WONG: Yes. Ms Yau, we are moving on to another topic. It is on assaults on bus captains.

We have heard evidence again on the enforcement of assaults on bus captains by the police. There have been complaints that the police did not appear to have given these cases a high priority. We have been provided with a list of assaults by the Kowloon Motor Bus for the period of 1 January 2015 to 22 July 2018.

If we can pull up on the screen KMB-1, page 212. This is a letter from KMB, setting out the statistics of

the alleged assaults on bus captains reported to KMB from 1 January 2015 to "to date", that is 26 July 2018; and also details of five specific alleged assaults.

One of the issues they raised is -- if we can look at the table, there are 41 cases, and out of these 41 incidents we can see very few resulted in any prosecution or meaningful result. Only two cases we can see at items 162 and 164, at page 216. And most of these cases we see are settled or with verbal warning or not pursued by the police.

Can I ask your view on this matter: first of all, their comments that the police seemed to not give priority to these sorts of cases, when it touches on assaults on bus captains?

MS YAU SIN MAN: (Via interpreter) I would ask my colleague from the Traffic Branch Headquarters as well as those from the Crime Wing to answer.

MR LEE TAI WAI: (Via interpreter) In relation to the 180 cases submitted by KMB -- well, after we received the information, we liaised with KMB to ask for information.

Out of 188 cases, we have successfully found the facts of the case as well as the result of 182 cases. Out of the 182 cases, 131 of them are assault on bus captains by passengers when the bus captains were working. 99 cases were successfully detected. Out of

the 99 cases, 83 cases resulted in prosecution and the cases were brought to court. 47 of them did not result in prosecution.

CHAIRMAN: There would be no further action?

MR LEE TAI WAI: (Via interpreter) I agree, right, no further action.

CHAIRMAN: And, of the 83 prosecutions, how many convictions resulted?

MR LEE TAI WAI: (Via interpreter) Of the 83 prosecution cases, 73[sic] of them resulted in convictions.

CHAIRMAN: Do you have statistics of pleas of guilty and pleas of not guilty, constituting that figure of 73?

MR LEE TAI WAI: (Via interpreter) For the 75 convicted cases, there are different penalties.

CHAIRMAN: No. The question was: how many pleaded guilty, and how many were found guilty?

MR LEE TAI WAI: (Via interpreter) We don't have the numbers.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Have you completed your answer, Mr Lee?

MR LEE TAI WAI: Yes.

MS MAGGIE WONG: Apart from the increase of assault incidents --

CHAIRMAN: Before you move on, Ms Wong -- do you have this information available in written form? Just as KMB

provided us with their analysis, the 188 figure, do you have a table in which you analysed it, from which you appear to be reading?

MR LEE TAI WAI: (Via interpreter) Yes, we have the information in writing.

CHAIRMAN: Can you provide that to us in due course?

MR LEE TAI WAI: (Via interpreter) Yes.

CHAIRMAN: Thank you.

Perhaps I stopped you prematurely. You wanted to tell us about the penalties. How did you analyse the penalties?

MR LEE TAI WAI: (Via interpreter) Of the 75 conviction cases, 15 of them were imprisonment or a suspended sentence.

CHAIRMAN: How many were actual imprisonment as opposed to suspended imprisonment?

MR LEE TAI WAI: (Via interpreter) I don't have the information in this regard.

CHAIRMAN: Thank you.

MR LEE TAI WAI: (Via interpreter) And in relation to bound over, 22 cases; social service order, 16 cases; fine, 18 cases.

CHAIRMAN: Do you have the range of fines, maximum, minimum?

MR LEE TAI WAI: (Via interpreter) No. And there are four cases of the probation order.

CHAIRMAN: Do you have the offences for which these persons were convicted?

MR LEE TAI WAI: (Via interpreter) Of all the cases I have mentioned, there are four types: wounding ...

CHAIRMAN: You are speaking now to the convictions, or generally?

MR LEE TAI WAI: (Via interpreter) Generally.

CHAIRMAN: Yes, wounding ...

MR LEE TAI WAI: (Via interpreter) The second one is AOABH, assault occasioning actual bodily harm. The third one is common assault. The fourth one is fighting in a public place.

CHAIRMAN: Is wounding confined to section 19 offences?

MR LEE TAI WAI: (Via interpreter) Section 17 and section 19.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Just on this last topic, fighting in public place, we have heard from some of the representations of the trade unions that they raise objection to this offence being made against the bus driver as well, in terms of fighting in public place, and they made two reasons. One is they are the drivers who are supposed to enforce the law based on Cap 230A, in terms of the enforcement of safety, or bus safety. And the second is the legislation or the enforcement should protect the

bus driver against assaults.

What do you say about those two complaints in relation to the charge of fighting in public place?

CHAIRMAN: Presumably, you say that the charge wouldn't have been brought unless it was appropriate. Would that be the answer?

MR LEE TAI WAI: (Via interpreter) In relation to complaints made by bus captains about assault, every case is different. There are different factors. Under Cap 230A, bus captains have certain power to deal with misbehaving or law-breaking passengers. So bus captains are protected by laws, in relation to those cases under common assault or AOABH.

MR CHEUNG TIN LOK: (Via interpreter) Maybe I should supplement. The counsel asked whether, in some cases, the bus company may be of the view that the police have dealt with bus captain assault cases in a way different from what they would expect or we do not attach importance to such cases.

I want to say that is irrespective of the status, nationality, profession of the parties concerned, every case is dealt with in an equal manner.

Our colleague has referred to the information that we can provide in relation to the 188 cases referred to by the KMB. We have been able to tell you the number of

detected cases, the number of prosecutions and the number of convictions. Compared with cases of similar nature, the relevant prosecutions and convictions are relatively higher.

So we do not think that in the case of assault on bus captain cases, the police have tried to downplay the importance. I have to stress again that in handling cases of assaulting bus captains, we have adopted a very even-handed and serious attitude.

In the investigation, we deal with the cases in an even-handed manner, and if there is sufficient evidence to support a prosecution, we would proceed with prosecution, but that would depend on the case in question. If necessary, we also seek advice from the Department of Justice.

The counsel has particularly referred to the offence of fighting in a public place. What I want to say is that when we receive a report and our officer would come to the scene to investigate, we will have to classify the case according to the findings of the investigation. Of course, the parties concerned might insist on their side of the story, but the police would certainly make an assessment and come to a conclusion on the charges to be laid on one or both parties. It could be that we would only prosecute one of them, but if the evidence

shows that fighting actually took place, then we would lay the appropriate charge against the relevant party.

It is not just a decision made by the police --

CHAIRMAN: Forgive me for cutting you off, Superintendent Cheung. So my original suggestion was that if they are charged, it is appropriate to do so?

MR CHEUNG TIN LOK: (Chinese words not interpreted).

CHAIRMAN: Yes. Very well. We have now gone past 1 o'clock so we will take a lunch break now and resume again this afternoon at 2.30. Thank you.

(1.06 pm)

(The luncheon adjournment)

(2.30 pm)

CHAIRMAN: Good afternoon.

Yes, Ms Wong.

MS MAGGIE WONG: Good afternoon.

Ms Yau, before the break, you were looking for a section in Cap 237 in relation to the issue that the fixed penalty ticket has to be served personally on the driver or fixed on the vehicle.

Have you been able to locate the section?

MS YAU SIN MAN: (Via interpreter) Yes, we have located it.

MS MAGGIE WONG: Is that section 15?

MS YAU SIN MAN: (Via interpreter) Yes, subsection 15(2).

MS MAGGIE WONG: For the purposes of reading into the

record, may I read that out. I think I should read subsection (1) as well.

CHAIRMAN: Yes, please do.

MS MAGGIE WONG: "If a police officer has reasonable cause to believe that a contravention is being or has been committed, he may give the registered owner of the vehicle concerned or, where section 3(2) applies, the driver liable an opportunity to discharge his liability in respect of that contravention by payment of a fixed penalty.

(2) For the purposes of subsection (1) notice in the prescribed form shall be delivered personally to the person in charge of the vehicle or fixed on the vehicle:

Provided that the operation of this section or section 16 shall not be affected by a failure to comply with this subsection."

Ms Yau, is that the section you refer to that requires personal service?

MS YAU SIN MAN: (Via interpreter) Indeed.

MS MAGGIE WONG: But it appears from the proviso or the "provided" part that a failure to comply with this subsection would not be affected in terms of the contravention of section 15(1).

MS YAU SIN MAN: (Via interpreter) Yes, I note that.

In relation to 15, we have consulted the advice of

the DoJ, but I haven't got the advice with me now. The advice was saying that the notice has to be fixed to the vehicle or served to the driver.

CHAIRMAN: If that advice was correct, for argument's sake, the legislative amendment would be simply to delete section 15(2), would it not?

MR STEPHEN BAKER: As I recall from the draft drafting instruction, my Lord, it's not to delete it. It is to add the facility to enable remote ticketing.

CHAIRMAN: Yes, but deleting it would have the same effect, then service would be at large.

MR STEPHEN BAKER: I bow to your ...

CHAIRMAN: But, either way, the point really is this: this can be solved very quickly, either with a blue pencil, which is how words are struck out, or with a red one, inserting them?

MR STEPHEN BAKER: We shall reflect your comments, sir.

CHAIRMAN: What we are encumbered with is legislation that is 35 years old, 30-plus years old.

MR STEPHEN BAKER: That's right, sir.

CHAIRMAN: Computers have come a long way, technology has come a long way, since then. This legislation wasn't written for the technology that obtains now.

MS MAGGIE WONG: Mr Lee, earlier on you mentioned before the break that there are, out of 188 cases provided by

Kowloon Motor Bus, 47 cases in which there were no prosecutions.

Can you let us know what is the common factor which led to this non-prosecution?

MR LEE TAI WAI: (Via interpreter) There were 47 cases where prosecution could not be pursued. For 22 cases, we could not identify or locate the suspect or the assaulter. For 16 cases, the victims did not pursue the cases, so the cases ended. For the other six cases, insufficient evidence -- ineptitude, insufficient evidence, and the cases were closed after advice by DoJ. Another case is still under investigation.

MS MAGGIE WONG: Mr Lee, the real question I would like to ask is -- we have heard evidence from the Kowloon Motor Bus that they prefer to use Cap 230A --

CHAIRMAN: Before you move on from that -- these cases where you couldn't identify the assailant, how useful or otherwise is the fact that people pay to be on buses with an Octopus card which contains, perhaps, personal details? How useful is that in identifying an assailant?

MR LEE TAI WAI: (Via interpreter) In trying to find the assailant -- now, for those who paid by means of Octopus card, that of course would be useful. But very often Octopus card users might not be using a personalised

card and therefore there won't be sufficient evidence to identify the persons. But if everyone is using personalised card, it will help us to identify the assailant.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Thank you. Following on this Octopus card issue, I believe that there are two cases in particular that the Kowloon Motor Bus raised complaint that the police did not proactively collect information in relation to Octopus card records.

May I take you to a few documents on this issue. First of all, can you refer to KMB-1A, page 297. If we read -- I shall put this in context. There are two cases -- and I apologise for that -- if we go, first of all, to page 218 in the same bundle, 1A, there are five cases mentioned there. Have you got that?

It's case number 3 and case number 4. If we look at page 218-1, paragraph 2, it stated there -- it was a letter from the IRC to the Kowloon Motor Bus, dated 27 July 2018, in which enquiries were made that:

"... in respect of cases 3 and 4, reference was made to the preparation of a 'CCTV brief finding report' and that in respect of case 1, reference was made to the provision to the police of 'Octopus card records of the assailant'."

Then we asked for the provision of copies of the CCTV and Octopus card records. It was in this context that the Kowloon Motor Bus replied on 9 August 2018, at page 297. If you look under the heading, "Reply to your 27 July 2018 letter", paragraph 2, it stated there that:

"In respect of cases 3 and 4 referred to in the said letter, the CCTV brief finding reports prepared by the accident investigation and prevention team of our legal department are enclosed ... Please note that, as the respective defendants pleaded guilty, the CCTV videos/records were not used in the legal proceedings.

In respect of case 1 referred to in the said letter, by a letter dated 16 April ... the police requested us to provide the Octopus card records of the assailant and his ... companions who were the last three passengers on board the relevant bus at the material time. In or around end of April 2018, we had a telephone conversation with the police concerning the Octopus card records and informed them to collect our written reply."

During the oral evidence of Mr Patrick Pang, he said that the police never came to collect this Octopus card report.

If we also look at your reply in the miscellaneous bundle at page 124-537-1, I will just read out what you stated there.

Mr Lee, have you got that? Not yet.

MR LEE TAI WAI: Okay.

MS MAGGIE WONG: This is a reply from you to the committee, dated 7 August 2018. You stated there, in paragraph 3:

"For case 1 ... according to the record of Tin Shui Wai police division, it is confirmed that the police had not received any Octopus card records of the assailant from KMB despite a request was made to them to provide such information."

You identify the information that can be obtained from the use of an Octopus card, including the date and time of the transaction, the machine being used for the card, the transaction cost and the personal particulars of the card owner in the case of a personalised Octopus card was used.

Now, the complaint of the KMB is that they have the document in hand but the police did not come to collect it, and the document was hanging around in their office.

What is your answer to that?

CHAIRMAN: Perhaps we ought to go to the former chief superintendent, now Mr Pang's evidence.

MS MAGGIE WONG: Yes.

CHAIRMAN: Because the ball appeared to have been dropped between the two sides, and he undertook to pick the ball up.

MS MAGGIE WONG: If I may invite you to look at transcript Day 13, 10 August 2018, pages 108 to 109 of the transcript, transcript bundle 5.

If you look at page 108 first, at line 6, the question from the chairman was this:

"We understand that, because we have asked the police about the information that is obtainable.

In your letter, which I think is at page 297 of KMB-1, in the reply to this letter of request, the second paragraph, you refer to case 1 and you say this ...:

'In or around end of April 2018, we had a telephone conversation with the police concerning the Octopus card records and informed them to collect our written reply.'.

Were they collected? Try 'yes' or 'no' on that, if you can."

Then Mr Patrick Pang said:

"No, they didn't come and collect."

And if we go to page 109, still Mr Pang's evidence at line 9:

"We made a phone call to Tin Shui Wai district of the police; we asked them to come and collect the reply. But the police never came and the letter is still with us and the Octopus records are still with us."

So that's what happened. That's the evidence of Mr Patrick Pang --

CHAIRMAN: I think it culminated with Mr Pang agreeing that that was a silly state of affairs and that he would do something about it.

MS MAGGIE WONG: Yes.

MR LEE TAI WAI: (Via interpreter) With regard to the Tin Shui Wai case, we consulted the Tin Shui Wai division. According to their record, the information they gave us was that they did ask from the KMB the relevant information about Octopus, but then they sent the letter but they never got a written reply from KMB, and they did not say that they received any phone call telling them to go and collect the information.

This is what we got from the Tin Shui Wai division.

CHAIRMAN: This is a matter that we must pursue with Mr Pang and KMB.

MS MAGGIE WONG: Yes.

CHAIRMAN: Because it is a truly lamentable state of affairs that people involved who both have a mutual interest in an allegation being investigated and, if appropriate, a prosecution being mounted, have somehow managed not to achieve that, when the evidence apparently is available.

MS MAGGIE WONG: Mr Lee, you earlier mentioned that these cases, these 188 cases of KMB, there were four types of

charges, and in none of those charges do they relate to Cap 230A, and the evidence of KMB and the trade union is all spoken with one voice, and they stated that it may be easier to invoke Cap 230A with regard to passengers' behaviour, because it doesn't involve physical abuse or physical contact to constitute a breach, and in that regard it is easier to prosecute.

What is your view on this matter?

MR LEE TAI WAI: (Via interpreter) Let me try to answer the question first. Generally speaking, contraventions under Cap 230A always happen, and very often an incident may so develop that there is physical contact and then the police would arrive on the scene.

The most ideal situation is that before an incident deteriorates, the police can intervene and then we can put a stop to the incident or we can use an easier method to handle it, say, for example, to use any offences under Cap 230A. But very often, when the police arrive on the scene, there would be injuries and there would be physical contact already.

MS MAGGIE WONG: I mean, in fairness to you, I should show you a few documents in which I believe Ms Yau has replied to KMB on this issue, as to whether you would consider using Cap 230A in future.

CHAIRMAN: Perhaps before you get to that we could have the

relevant part of Cap 230A on the screen, so we can be reminded about the ambit of that offence.

MS MAGGIE WONG: Yes. That would be at THB-2, page 132.

If we look at regulation 13A, and in particular regulation (1)(c), it stated there that -- it governed the general conduct of passengers and intending passengers, and if we roll up regulation 13, which provides that there is a power to remove passengers, and then regulation 13A(1) is the offence creating provision, that:

"No passenger or intending passenger shall:

(a) wilfully obstruct, impede or distract the driver of the bus or any authorised person;

(b) wilfully obstruct the driver's view of the road or any traffic;

(c) wilfully do or cause to be done with respect to any part of the bus or its equipment, anything which:

(i) obstructs or interferes with the workings of the bus or causes damage; or

(ii) causes injury, discomfort, annoyance or inconvenience to any other person ..."

And it will be an offence.

And regulation 25 provides that:

"Any person who without reasonable excuse contravenes any requirement ... under regulation 3(4) or

any of the provisions ... commits an offence."

And regulation 25(3) provides:

"Any person who without reasonable excuse contravenes ... section 13A ... commits an offence and is liable to a fine of $3,000 and to imprisonment for 6 months."

So the members of the trade union and the KMB consider this provision is effective in combatting physical assaults on bus captains by passengers. You don't need to prove actual assault in that regard; they consider it is easier to prosecute.

What is your response on that? I am coming to the point of referring you to some correspondence in which I believe Ms Yau did reply on this issue.

MR LEE TAI WAI: (Via interpreter) With regard to invoking Cap 230A -- well, I agree we can prevent incidents from deteriorating, say, that would deteriorate into a fight where people would be injured, therefore we have always appealed to bus drivers to keep calm when there are passengers who contravene the law, and they should report to the police as soon as possible so the police can come on the scene and handle the situation, instead of disputing with the passenger and then enter into physical contact with the passenger. That is not ideal.

Therefore, Cap 230A is effective. If bus drivers

can keep calm and call the police to arrive on the scene, I am sure there will be fewer attack cases as a result.

But we have to look at each case and then we will look for the most appropriate offence for prosecution. If there is actual physical contact and if there is assault, I would think that we should go for the most appropriate offences in order to take our prosecution.

MS MAGGIE WONG: Yes. So maybe to complete the picture, if Ms Yau can refer to KMB-1A, at page 286 in Chinese and 293 in English. It is a letter from KMB dated 8 March 2018.

The date has not been translated, Mr Chairman, in the English version, but it is dated 8 March 2018.

At page 293, the KMB stated there:

"In May last year, we wrote to the police expressing that our bus captains had been assaulted one after another. Upon considering the relevant cases, we found that certain offenders not only committed the offence of common assault but were ... likely to be in violation of section 13A(1)(c) ..."

And then he quoted the section.

"As such, our company had specifically sent our staff to the police station to provide evidence for the following cases, and requested that the Hong Kong Police

may prosecute the suspects in accordance with section 13A ..."

And they mention six cases there. Then, over the page, at 294, at the bottom:

"In this regard, we now earnestly request that the Hong Kong Police do, in future cases of assaults on bus captains, seriously consider charging the offenders under section 13A ... in addition to the charge of common assault. Our company will definitely cooperate with the Hong Kong Police to offer our assistance."

In this respect, Ms Yau replied on 17 May 2018, at page 296. The Chinese version is at page 288. You stated there, Ms Yau that:

"[Following] the follow-up action of the meeting with your company on 28 March, you are hereby notified that the division has notified the regions in writing to remind the frontline staff to be fair and professional when handling the cases of assault or harassment ... and shall understand the nature of the case and the injury of the injured to properly categorise the case and seriously consider whether Public Bus Services Regulations Cap 230A ... should apply."

So my question is this: has Cap 230A, regulation 13A, ever been invoked or used by the police to prosecute?

MS YAU SIN MAN: (Via interpreter) We looked up the records of the past few years. In 2016, we invoked 230A to issue penalty tickets to a bus passenger, just one case.

MS MAGGIE WONG: Has that been used after your reply given to the KMB? Has that been used?

MS YAU SIN MAN: (Via interpreter) We looked at the records again. We did not use it this year.

MS MAGGIE WONG: Any reason why it was so rarely used?

MS YAU SIN MAN: (Via interpreter) I believe it would depend on the cases and the evidence on site, and also the facts of the case.

MS MAGGIE WONG: There is just one more matter. According to Mr Patrick Pang's evidence, Mr Patrick Pang of KMB, he stated there was a meeting on 28 March, in which the head of the legal department, himself and another colleague attended or met with the chief superintendent and his superintendent, and during that meeting the chief superintendent promised at the meeting that he would issue guidelines to the frontline policemen, to first allow them to seriously investigate into all alleged assaults, and he would remind his frontline staff to see whether there would be cases where Cap 230A could be applied for investigation and prosecution.

Has that been done?

MS YAU SIN MAN: (Via interpreter) Yes. On 10 May 2018,

Traffic Branch Headquarters issued an internal notice for all frontline staff, in dealing with cases of alleged assault against bus captains.

MS MAGGIE WONG: Can we have a copy of this internal notice?

MS YAU SIN MAN: (Via interpreter) Yes.

MS MAGGIE WONG: Maybe we will have that through the secretariat.

CHAIRMAN: Do you have a copy of it here today?

MS YAU SIN MAN: Yes.

CHAIRMAN: Thank you. Perhaps somebody would be kind enough to come forward and take the document. We will have it copied now.

May I have a look at it first. (Handed). Thank you.

Thank you.

MS MAGGIE WONG: Just one last matter on this topic. There is this evidence from Mr Patrick Pang, stating -- when he was asked about this question, "Why would you use Cap 230A when you can proceed with the charge of common assault? What advantage do you see of using Cap 230A?", to which I believe KMB replied at Day 13, page 73. That would be 10 August 2018. Page 73, line 12.

Mr Peter Duncan SC, counsel for the committee, asked:

"So what is the point of asking the police to

prosecute under a section which carries a maximum penalty less than that for common assault?

Mr Patrick Pang: The company is of the view that in respect of cases like common assault, the investigation by the police is a difficult process. If Cap 230A is invoked in the investigation or in the prosecution, it would be relatively easier to prove the offence or the offending act.

We also hope that those who abuse or attack our bus captains, those passengers would be made known that there is this regulation, Cap 230A, in regard to passengers' behaviour, and it doesn't take physical abuse or physical contact to constitute a breach ..."

So, in that regard, they have highlighted the advantages of using this provision, and I believe your evidence also confirms you would consider using it, even though at the moment it is still rarely used. Is that the position?

MS YAU SIN MAN: (Via interpreter) I would like to say that for prosecution, we do not just go for the easy way out. It all depends on the evidence of the case. If there is sufficient evidence to show that there has been physical assault, even though Cap 230A A can be invoked, we would go for more serious offences, to show the significance police attach to physical assault of bus captains.

So we will not just go for 230A simply because it is easier to prove it. It all depends on evidence.

MS MAGGIE WONG: I would like to ask a more general question: how do you ensure that passenger assault cases are dealt with expeditiously?

MS YAU SIN MAN: (Via interpreter) We deal with all cases immediately. Timing-wise, it depends on when evidence can be given by the witness. We will ask the witness concerned to give statement or evidence at once. If further investigation such as medical reports are required, or statements from other witnesses are required, we would do that immediately.

MS MAGGIE WONG: Moving on to another topic, on Working Group on Review of Speed Limits.

Before I engage on this working group, I would like to explain a little bit as to why it was set up. It arose on the Tai Po Road accident, and there was this meeting of the Tai Po District Council, minutes dated 12 February 2018, and there was discussion as to --

CHAIRMAN: Before you go on any further, I don't think it is the evidence that we have received that the Working Group on Speed Limits arose from the Tai Po accident. It existed already, did it not? I'm asking you, Ms Wong.

MS MAGGIE WONG: Mr Chairman, I believe it should be it

existed -- I stand to be corrected.

CHAIRMAN: So there is a pre-existing Working Group on Speed Limits on which Transport Department and the police have representatives?

MS MAGGIE WONG: Yes.

CHAIRMAN: And, in this particular case, the section of road involved in the Tai Po Road was referred to this working group, with recommendations from the Transport Department; is my summary of the evidence accurate?

MS MAGGIE WONG: Yes.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Maybe Ms Yau can explain about this Working Group on Review of Speed Limits. In terms of membership, what does it comprise of?

MS YAU SIN MAN: (Via interpreter) I defer to my colleague, Mr Lee Tai Wai.

MR LEE TAI WAI: (Via interpreter) Regarding the Transport Department's Working Group on Speed Limits Review, representatives include those from the TD and two NGOs are the Motor Association of Hong Kong and Senior Drivers Association of Hong Kong, and also representatives from the police.

MS MAGGIE WONG: Can you tell us what is the police involvement in this Transport Department's working group?

MR LEE TAI WAI: (Via interpreter) We have a representative from the Traffic Branch Headquarters to attend regular meetings of the working group to review the sections' speed limit on the agenda.

CHAIRMAN: Who convenes the meeting?

MR LEE TAI WAI: (Via interpreter) Assistant Commissioner of the Transport Department.

CHAIRMAN: So it is a Transport Department-driven committee?

MR LEE TAI WAI: (Via interpreter) Yes.

CHAIRMAN: Do they provide the secretarial side of it?

MR LEE TAI WAI: (Via interpreter) Yes. They are responsible for all secretarial services, and the meeting place is also at the headquarters of the Transport Department.

CHAIRMAN: And presumably, in that role, they generate the agenda?

MR LEE TAI WAI: (Via interpreter) Agreed.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Can you tell us how the working group functioned, in terms of does it involve considering objective facts and assessment in deciding whether suggestions for changing speed limits of certain roads should be entertained?

MR LEE TAI WAI: (Via interpreter) The TD has a regular mechanism for reviewing the speed limits of road

sections to ensure that the speed limit can ensure road safety and smooth traffic.

In reviewing speed limits, the priority is to ensure safety of users. There are a few factors to be considered in deciding whether the speed limit should be raised or lowered or kept the same. First, traffic accidents of the section involved, and the second factor is the usual speed of vehicles using that section. The third factor is the characteristics and circumstances of the road, the gradient, the sightline, the junctions, and also the situation with pedestrians.

So, based on the factors I just mentioned, TD and colleagues will come up with recommendations, as to whether the speed limit should be raised, lowered or kept the same.

MS MAGGIE WONG: You mentioned that the Transport Department has a regular mechanism for reviewing speed limits. Can you tell us what is the regular mechanism; how regular?

MR LEE TAI WAI: (Via interpreter) My understanding is the working group meets on a quarterly basis, to review different road sections. The choice of road sections is for the TD to decide. So the working group will decide the road sections to be included.

I believe the mechanism would target road sections which have had frequent or serious traffic accidents.

Such road sections will mostly be reviewed by the working group.

MS MAGGIE WONG: You mentioned that the mechanism would target road sections which have had frequent or serious traffic accidents. So, in that sense, it is reactive to accidents happening in that road section; is that correct?

MR LEE TAI WAI: (Via interpreter) This is one of the considerations. There are other factors at play. For instance, complaint from members of the public or views of the district councils.

MS MAGGIE WONG: So am I correct to say it is not -- as far as you know, it is not a proactive exercise, meaning the Transport Department or the police would proactively look for dangerous road sections that need to consider reviewing speed limits; is that the position?

MR LEE TAI WAI: (Via interpreter) I dare not say whether it is a proactive review or not. But I believe the review mechanism is effective.

MS MAGGIE WONG: Now, going back to the specific example --

CHAIRMAN: Can you help the committee as to how long this Working Group on Speed Limits has been in place?

MR LEE TAI WAI: (Via interpreter) According to records, it meets on a quarterly basis, and the first meeting, according to records, was held in 2000.

CHAIRMAN: Do you know in what circumstances it was constituted?

MR LEE TAI WAI: (Via interpreter) I have no record to check.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Now, in relation to the specific Tai Po Road section, may I refer you to a few documents. The purpose of this is to show that in relation to the Tai Po Road concerned, there have been complaints from the district council, from residents, from schools, that that particular road section is prone to accidents and there are lots of speeding occurred, and there has been correspondence written by the Tai Po District Council to the Hong Kong Police, requesting for assistance.

CHAIRMAN: Before you get involved in that detail, can I ask this general question: have any of the five police representatives here today been a member of this working group Working Group on Speed Limits?

MR STEPHEN BAKER: No, sir.

MR LEE TAI WAI: (Via interpreter) The regular members are such that one of the police representatives is the superintendent in charge of traffic control, and he has just been deployed elsewhere and I am acting in that position now.

CHAIRMAN: So the direct answer to the question is that none

of the five representatives have acted in that role, until you acted as a deputy to whoever you have replaced; is that it?

MR LEE TAI WAI: (Via interpreter) I agree.

CHAIRMAN: Thank you.

MS MAGGIE WONG: So, Mr Lee, since you're acting as deputy, have you attended any of these working group meetings on the review of speed limits?

MR LEE TAI WAI: (Via interpreter) I attended one or two meetings, but it was two or three years ago.

With regard to the Tai Po incident review, I never attended any meetings.

CHAIRMAN: On the occasions that you have attended the working group meetings, typically, if there is such a thing, on how many sections of roads were the speed limits reviewed?

MR LEE TAI WAI: (Via interpreter) On the occasions when I attended the meetings, about three sites and six directions would be identified, because we will look at both directions of any road sections. Therefore, there will be six road sections to be reviewed at every meeting.

MS MAGGIE WONG: Why six road sections?

MR LEE TAI WAI: (Via interpreter) As I said, usually three sites or spots would be identified, and then we would

look at both directions of every site. Therefore, six road sections.

MS MAGGIE WONG: Yes. And who selects those three road sections?

MR LEE TAI WAI: (Via interpreter) The Transport Department.

MS MAGGIE WONG: And the basis of those road sections would be on the factors you mentioned earlier on?

MR LEE TAI WAI: (Via interpreter) That's correct.

MS MAGGIE WONG: Do you have any say in the selection of the road sections?

MR LEE TAI WAI: (Via interpreter) We would give some advice, we would say whether we agree or disagree.

MS MAGGIE WONG: What about if you have received complaints about a certain road section? Can you suggest that this section be reviewed?

MR LEE TAI WAI: (Via interpreter) Certainly. We can make the proposal to the Transport Department that we have received a complaint with regard to speed review. But usually, members of the public or district councils and other departments would know that speed limit on roads would be under the jurisdiction of the Transport Department. Only the Transport Department has the power to state and review speed limits on roads.

CHAIRMAN: And if a district councillor didn't know that, that's what he would be told?

MR LEE TAI WAI: (Via interpreter) We would reflect the situation to the Transport Department.

CHAIRMAN: But if the matter was raised by a district councillor, I'm anticipating some documents you are going to be taken to. If the district councillor chose to raise it with the police, he would be told, "That's not our job, that's the Transport Department's job'; is that it?

MR LEE TAI WAI: (Via interpreter) I believe our district staff, if they would receive views from district councillors they would certainly reflect the views to the Transport Department staff in that district, for that would be forwarded to the working group for handling.

CHAIRMAN: Well, we will see what happened.

MS MAGGIE WONG: Mr Lee, may I first of all --

CHAIRMAN: Before you do that -- you have told us about the factors that come into play in reviewing speed limits, the incidence of traffic accidents, the usual speed of road users then generally the characteristics of the road, topography, and so on.

Are these reflected in a written document?

MR LEE TAI WAI: (Via interpreter) These would appear in the report, and also there would be some filmlets on car patrol. In other words, they would use a car to patrol

the road section and demonstrate or introduce the characteristics of that road section, and also the road situation.

CHAIRMAN: More particularly, are there thresholds, parameters, that are set, for example, for the increase in the incidence of traffic accidents, that triggers a review?

MR LEE TAI WAI: (Via interpreter) I am not sure but I believe this would be one of the considerations.

CHAIRMAN: But nothing that you are aware of that is a formula?

MR LEE TAI WAI: (Via interpreter) I don't think there is a formula.

CHAIRMAN: For example, a 50 per cent increase in road traffic accidents on that road section in the last year; nothing like that?

MR LEE TAI WAI: (Via interpreter) No. There is no formula. I cannot recall any formula.

CHAIRMAN: Thank you.

Please.

MEMBER AUYEUNG: Just to follow up on this working group. When you guys meet, do you guys make a distinction between heavy vehicle versus regular vehicles?

MR LEE TAI WAI: (Via interpreter) Normally, we don't, because speed limit would apply to all types of

vehicles, except buses or light buses, for which the speed is already limited.

CHAIRMAN: Thank you.

MS MAGGIE WONG: If I may first of all chronologically -- because I am going to take you chronologically to the events that happened up until the Tai Po accident and the final report.

The first is the letter dated 5 June 2017. It is in bundle DC-2B. It's a complaint to the police by the Tai Po District Council. It's at DC-2B, page 840-70, in Chinese, and English at 840-74.

We can see the translation, that it was addressed to the central traffic camera investigation unit, Traffic Branch Headquarters, Hong Kong Police Force, dated 5 June 2017, and it is from the Tai Po District Councillor, Ms Chan Siu Kuen, and the title was, "Request to install 'speed camera' between Deerhill Bay and Tai Po Mei", and the first paragraph set out:

"This office has received requests for assistance from the residents in the vicinity of Tai Po Road because there are often speeding and unlawful motor racing on Tai Po Road, especially during overnight hours and on holidays, when a large group of suspectedly modified racing vehicles drive in high speed on Tai Po Road. It is suspected that unlawful motor racing

is being conducted and massive noise is generated ... which causes nuisances to residents. In case a traffic accident happens, the vehicle may collide into residents and cause severe casualty as well as endanger the safety of other road users. Thus the installation of a 'speed camera' is requested."

Then at the end, it stated:

"... I hope that your office would accede to the residents' request and install as soon as possible a 'speed camera' on Tai Po Road near the location between Deerhill Bay and Tai Po Mei ..."

CHAIRMAN: Do we have a map that would show us that location?

MS MAGGIE WONG: Yes. It's the section between Deerhill Bay and Tai Po Mei. That's around the areas in the middle. If you can see number -- around the area in the middle.

CHAIRMAN: Yes. We certainly see Tai Po Mei, and this of course is in the immediate vicinity of the bus accident on 10 February.

MS MAGGIE WONG: Yes.

CHAIRMAN: And the partly obscured words "... hill Bay", is that Deerhill Bay?

MS MAGGIE WONG: Yes. Correct, Mr Chairman.

Upon receiving this, the Hong Kong Police Force replied on 16 June 2017, and if I may take you to 840-71

in Chinese, and 840-73 in English.

This letter, we can see it was addressed by Andrew Lam Chi Hang, for the Commissioner of Police, to the office of Chan Siu Kuen, district councillor of Tai Po, dated 16 June 2017, and it was copied to a Mr Chiu Kang Bor, Paul, Traffic Control Division, Technical Services Branch of the Transport Department, as well as the senior superintendent of police and district commander, Tai Po.

The letter stated:

"The locations for installation of fixed speed monitoring cameras are mainly determined by the Transport Department. After installation, the police is responsible for taking enforcement action. This office understands that the Transport Department ... has no plans to install fixed speed monitoring cameras in the captioned road section. At the same time, the police will continue to closely monitor the traffic situation of the road section concerned."

Now, we can see that the Transport Department refused the request to install speed camera, and the police reply appears to suggest there is nothing they can do about it, and their role is simply enforcement.

CHAIRMAN: On what basis do you say that the Transport Department had refused to install a speed camera?

MS MAGGIE WONG: That's the sentence:

"This office understands that the Transport Department currently has no plans to install fixed speed monitoring cameras in the captioned road section."

CHAIRMAN: Well, we all can see what that says.

MS MAGGIE WONG: May I ask a general question first: if you received a request from a Tai Po District Councillor in relation to installing speed cameras or questions raised about speeding in a certain road section, would that complaint be placed as one of the items in the working group on review of speed limits?

MR LEE TAI WAI: (Via interpreter) I don't think so. This is just a request to install a speed camera on a road section. It has nothing to do with a review of speed limits.

CHAIRMAN: I think the point is this. If you, the police, have an opportunity to raise matters that ought to be considered on the agenda, is this something you would have put forward, for the Transport Department to decide whether or not to list it on the agenda of the meeting of the Working Group on Speed Limits?

MS YAU SIN MAN: (Via interpreter) I think the police and the Transport Department can have an exchange at many committees. With regard to the installation of speed cameras, this will not be considered at the Working

Group on Review of Speed Limits.

MS MAGGIE WONG: But what about if there is a specific complaint by a district councillor to change the speed limit or reduce the speed limit; would that reach the working group?

MS YAU SIN MAN: (Via interpreter) If it is about the speed limit of a road section, it would reach the working group.

MS MAGGIE WONG: Yes. May I take you to a letter dated 24 July 2015 by Tai Po District Councillor Madam Chan Siu Kuen but this time to the Transport Department. The Chinese is at 840 --

CHAIRMAN: Before you move on, Superintendent Lee, your point made earlier was that if the police received a request like this, it would be referred to the Transport Department, and that's made good, is it not, by the way in which this letter was copied to the Transport Department? I'm looking at 840-73.

So it has been sent to the Transport Department. That's the point you were making?

MR LEE TAI WAI: (Via interpreter) Yes, I agree, but the letter was cced to the Transport Department, but for installation of speed monitoring cameras. It was to the relevant division for installation of cameras. I believe the letter would not have gone to the agenda

of the Working Group on Speed Limit Review.

CHAIRMAN: That's an entirely separate point. Your point that you liaise with the Transport Department is made out by this letter, because this request for a camera was notified in your letter, the police letter, back to the district councillor.

Yes, Ms Wong.

MS MAGGIE WONG: Before I go to that specific complaint letter, can I take you to the minutes of meeting of the Tai Po District Council, minutes of the second meeting on 13 March 2015; Chinese at page 840-81, English at 840-91.

You can see the persons in attendance include a named officer at the bottom as "Head, Traffic Wing (Tai Po police district)/Hong Kong Police Force", and there were other departments concerned, like the Transport Department, Tai Po District Tenancy Housing Department and District Office, but a representative of the police force was present.

If we go to 840-92, at paragraph 79, there was a specific request from Japanese International School to reduce the speed limit of Tai Po Road section at Tai Po Kau). And at paragraph 79:

"The chairman [referred to] the receipt of a letter from the Japanese International School which requested

to reduce the speed limit of the road section in front of their school from 70km/hour to 50km/hour. They also invited the transport division to visit the Japanese International School to discuss with their students the traffic problems in their vicinity. The chairman requested the Transport Department to first respond to the request for lowering the speed limit."

Then paragraph 80:

"Mr Wong Kwok Leung responded that the Japanese International School suggested that the speed limit of the road section in front of the [school] be reduced from 70km/hour to 50km/hour in view of a traffic accident on the section of Tai Po Road in front of the Japanese International School in 2014 in which a member of the public was killed. The Transport Department and police were examining the cause of that traffic accident, which might not necessarily be related to the speed limit of that road section, including issues of the motorists' driving attitude and problem ... The TD would examine whether the present speed limit of that road section was appropriate. Furthermore, the TD had sent an interim reply to the Japanese International School after the Chinese New Year and would provide a detailed reply ..."

Now, this was a specific request, Mr Lee --

CHAIRMAN: Again, could we see the location on a map, please.

MS MAGGIE WONG: That would be between 21 and 22. You can see the Japanese International School.

CHAIRMAN: Yes. Perhaps we could zoom out to give the overall context.

So beyond the site of the accident as one drives from Sha Tin to Tai Po; is that correct?

MS MAGGIE WONG: Correct.

CHAIRMAN: Thank you. Yes.

MS MAGGIE WONG: This was a specific request by a school, where representatives of the police were present and they raised complaints about this issue and requested for reduction of speed limits.

Would this request be normally placed before the Working Group on Review of Speed Limits?

MR LEE TAI WAI: (Via interpreter) According to our minutes of the meeting, I believe the police representative present was a sergeant of the Traffic Wing of Tai Po district.

According to the minutes, the district council requested the TD to review the speed limit of the road section. I believe the message received would have been put back to the working group for inclusion to its agenda or to further decide whether there should be

a review of the speed limit for that section.

CHAIRMAN: And that would have been communicated by the police representatives to the working group; is that what you are saying?

MR LEE TAI WAI: (Via interpreter) Well, from what I could see here, in the main it was the TD representative who answered questions of the district councillor. So I believe the police would not have repeatedly conveyed the message to the TD.

CHAIRMAN: No, not the TD, the working group is the question. Would the police have taken it upon themselves to communicate this to the working group? For consideration of putting it on the agenda, perhaps.

MR LEE TAI WAI: (Via interpreter) I don't believe so, because it was the TD's representative who was responsible for answering questions on that day.

MS MAGGIE WONG: Before I go on on this topic, if someone made a complaint on a particular road section, would the police be required to compile certain statistics in relation to that particular road section, to see if the complaint is a valid one?

MR LEE TAI WAI: (Via interpreter) When the police receive a similar complaint, it will be conveyed to the TD for follow-up. We will not compile any statistics or carry out an investigation.

MS MAGGIE WONG: So do I understand the evidence correctly as even though you have a representative of the police present in this meeting, and there were complaints by a school, and there was a particular incident where someone got killed in that road section, which is serious and fatal, the police would not take up any further investigation, unless it was asked by the Transport Department? Is that the position?

MR LEE TAI WAI: (Via interpreter) Well, at that meeting, according to the minutes, the police will investigate the causes of the accident, and for that particular meeting the district council put a question to the TD, to request for a speed limit review. I did not see anything to require the police to take any appropriate action to reflect that view.

MS MAGGIE WONG: So do you know if the Transport Department asked for statistics of the road accidents for that particular section of the road at that time?

MR LEE TAI WAI: (Via interpreter) In this morning's evidence, we said that statistics of traffic accidents were shared between the TD and the police, so the TD has got such statistics.

MS MAGGIE WONG: Now, four months after these minutes --

CHAIRMAN: Sorry, before you go on, the question was then, 2017. There has been a complaint -- 2015 -- there has

been a complaint about a fatality in 2014. Did the Transport Department ask for road accident statistics then, 2015? Not in 2018. 2015. Do you understand the difference?

MR LEE TAI WAI: (Via interpreter) I understand the difference. In the main, the TD will not ask us for statistics involving traffic accidents, because we can share our system and they have all the information we have.

CHAIRMAN: So they can get the information on a shared information system, they don't need to ask you; is that it?

MR LEE TAI WAI: (Via interpreter) Yes.

CHAIRMAN: Thank you.

MS MAGGIE WONG: And, four months after the minutes of the meeting, there was another follow-up letter by the Tai Po District Councillor, dated 24 July 2015. That's in DC-2B bundle, at 840-78, in Chinese; and English at 840-88.

If we drop to the second paragraph -- the letter is dated 24 July 2015 from Mr Chan Siu Kuen, and it is stated there in paragraph 2 -- first of all, paragraph 1, the second line, that they:

"... have received request for assistance from the residents in the vicinity of Tai Po Road. This is

because owing to the absence of speed limit traffic signs around the bend of Savannah Garden, traffic accidents happened frequently.

To ensure the safety of road users, your department is now requested to expeditiously install the '50 km' speed limit signs at the above location to remind motorists to pay attention to driving at safe speed for prevention of unnecessary incidents."

Now, this is the follow-up letter, following on from the minutes of the meeting in March 2015. In normal circumstances, would this letter reach the Working Group on Review of Speed Limits?

MR LEE TAI WAI: (Via interpreter) I believe the purpose of the letter was mainly to request for signs to be installed. It was not about a request to review the speed limit. So I believe the letter would not have reached the working group.

CHAIRMAN: What was the speed limit at that place, at that time?

MR LEE TAI WAI: (Via interpreter) I don't have such information.

CHAIRMAN: Do we, Ms Wong?

MS MAGGIE WONG: It is 70km/hour.

And we have evidence from Mr Chan that it is not simply a letter. There are telephone conversations on

this matter, requesting for reduction of speed limit to 50km/hour. So this is just a follow-up letter, following up on the conversations with the Transport Department.

CHAIRMAN: Do you have a transcript reference for that so that we can help Superintendent Lee understand the evidence?

MS MAGGIE WONG: Yes. Mr Chairman, I need to look for that, because I just remembered this off the top of my head.

CHAIRMAN: I am familiar with that myself.

MS MAGGIE WONG: May I have a moment?

CHAIRMAN: Yes, take your time.

MS MAGGIE WONG: Mr Chairman, that would be on Day 4, page 9.

CHAIRMAN: And the date?

MS MAGGIE WONG: Sorry, Day 6, page 9.

CHAIRMAN: What is the date of page 6?

MS MAGGIE WONG: 14 July.

CHAIRMAN: Thank you.

MS MAGGIE WONG: On that page, it stated at line 18 -- Mr Chan Siu Kuen stated there:

"At that time, the Transport Department" -- this is in reference to the matter that we discussed earlier on.

"At that time, the Transport Department did not give me a direct reply. However, I have spoken to them on

the phone. They said that if the speed is to be reduced to 50 they would have to consult residents as well as owners corporations. And in 2014, near the Japanese International School there was a traffic accident at the signal junction, as a result a person was injured, and the Transport Department replied to me. He said for the speed to be reduced to 50 the TD would have to conduct a study, and after the accident they have appealed to the public to abide by road traffic regulations. They said that from the perspective of the TD, for the speed to be reduced to 50, they would have to do a lot of consultation and to liaise with the police.

I have been waiting. And I have been in contact with them. Well, Mr Wong of the Transport Department has been transferred out. And regrettably we had the traffic accident at Tai Po Mei. And I approached the police, because the TD could not help us. I asked the police to install speed cameras and I have been following that up."

Now, Mr Lee, that's the evidence given by Mr Chan, that it is not simply letters but there are follow-up telephone conversations and repeated requests, and there seems to be inaction.

Can you tell us why would that be the situation in this particular case?

CHAIRMAN: The context of this, to remind ourselves, is a letter from a district councillor to the Transport Department.

MS MAGGIE WONG: Yes, correct, Mr Chairman.

CHAIRMAN: It may be that you don't know why the Transport Department didn't do anything.

MR LEE TAI WAI: (Via interpreter) The letter was the communication between the TD and the person who wrote the letter, so we should not comment on it, and we don't have any record on these matters.

MS MAGGIE WONG: So am I correct to say that the role of the police in the working group is more or less like a rubber stamp, with no particular active role in requesting the Transport Department to do anything?

MR LEE TAI WAI: (Via interpreter) The police participation in the working group is absolutely not as a rubber stamp. We studied all the reports. We would also consult our colleagues in that particular district, and we would also consult our frontline staff, if a particular view is proposed, as to what they think about it, and then at the meeting we will reflect the police's view to the working group.

CHAIRMAN: Perhaps approaching the matter the other way around, to what extent, if at all, do the police have a proactive role in putting forward suggestions? For

example, "We are concerned about the speed limit on this stretch of road and we think it should be reviewed"? Do the police do that?

MR LEE TAI WAI: (Via interpreter) I believe we must have done that, especially at road sections where there have been heavy or serious traffic accidents or, where there have been a lot of traffic accidents, the division concerned, according to the investigation records, would put different views to the TD, including a review of speed limits. Usually, this would be handled by the five land-based traffic divisions of the police, investigation would have been done, and then they would reflect their views to the Transport Department.

CHAIRMAN: Are you able to provide us with any examples illustrating that proactive role -- correspondence?

MR LEE TAI WAI: (Via interpreter) Well, generally speaking, exchanges at the district level usually are not recorded by us.

CHAIRMAN: Well, they must be recorded somewhere.

MR LEE TAI WAI: (Via interpreter) I believe so.

CHAIRMAN: That's what we are asking for. Can you give us some examples illustrating the police having a proactive role, "There have been too many accidents in this area. For our part, we the police, who have to go there and scrape people up off the road, think it's time we

reduced the speed limit."? Are there any illustrations where the police have done that, so we can follow it?

MR LEE TAI WAI: (Via interpreter) We can go back to try to get some records. We will consult our colleagues.

CHAIRMAN: That's what we are asking for, illustrations demonstrating a proactive role.

MS MAGGIE WONG: Just as an example, if you receive a number of complaints, I believe there would be a number of road sections which citizens or other district councils would complain about, and if there are more than three road sections which require discussion, how do you select those three road sections, if there are more complaints than three road sections?

CHAIRMAN: That rather presupposes there is some kind of arbitrary limit.

MS MAGGIE WONG: Yes.

CHAIRMAN: Is there a limit on the number of road sections you can discuss at one of these meetings?

MR LEE TAI WAI: (Via interpreter) Well, it depends on the nature of complaints, because there can be many different kinds of traffic complaints. If the residents complain to the police, our district staff or traffic headquarters staff will process them.

MS MAGGIE WONG: We move on to the chronology, this time it is after the accident. There was this meeting of the

Tai Po District Council dated 12 February 2018. We can see that in bundle DC-2, page 285.

The minutes actually start at page 782 in English. At paragraph 5, I believe a representative of the police was present, that was Mr Chau Chung Mun, superintendent of police, investigation and support division, Traffic New Territories North, Hong Kong Police Force. And at paragraph 5, Mr Chau, apart from the road accident on 10 February 2018, he referred to the cases that the police detected in 2017, in terms of traffic violations.

If we see in the middle, it is stated there that:

"In 2017, the police had made 4 arrests, [including] 2 drunk drivers, 1 case of dangerous driving and 1 case of drug-related crime. The police had issued a total of 32 fixed penalty tickets at the road section in 2017 for speeding and traffic violations. A total of 29 traffic accidents had occurred in the Chek Nai Ping to Wong Yee Au section on Tai Po Road, out of which 2 were more serious. Although there were no speed enforcement cameras installed at the above mentioned road section, the police would carry out operations to detect speeding from time to time by placing detection equipment at a few designated spots along the road section. The Hong Kong Police Force would complete the investigation ..."

Now, Mr Chau mentioned that 29 traffic accidents occurred in this road section.

CHAIRMAN: Again, could we have a look on the map to show us the section?

MS MAGGIE WONG: Yes. That's Chek Nai Ping to Wong Yee Au section.

CHAIRMAN: Yes. Where is Chek Nai Ping? Ah, yes. Thank you. And Wong Yee Au? Yes. Thank you very much.

MS MAGGIE WONG: Mr Lee, my question is: there were 29 road traffic accidents, 30 offences of speeding and 32 fixed penalty tickets for speeding and traffic violations for that section of the road in 2017. Would you consider these statistics warranted the attention of the police in bringing this particular road section up for discussion at the working group?

MR LEE TAI WAI: (Via interpreter) It depends on the causes of these 29 traffic accidents. You need to know the causes before you can decide whether to take it to the working group, whether they were all related to speeding.

I believe this should be left to the traffic division of that district to decide whether this should be reviewed by the Transport Department.

MS MAGGIE WONG: Now, can you tell us, in all the working group sessions you have attended, would these kinds of

statistics be provided to the working group, traffic accident statistics?

MR LEE TAI WAI: (Via interpreter) They would review traffic accident figures. They would do comparisons to the average accident rate.

MS MAGGIE WONG: You mentioned in your evidence earlier on, before the break, that the working group would review three road sections with six directions. And in the meetings you have attended, have you come across a particular road section in which the speed limit was reduced?

MR LEE TAI WAI: (Via interpreter) In my impression, yes, but it was not because of traffic accidents, but because there was a major infrastructure nearby, and therefore there was a reduction.

MS MAGGIE WONG: Was there an incident where the speed limit was reduced because of the road accidents on the particular road section?

MR LEE TAI WAI: (Via interpreter) Since I only attended two to three meetings, I cannot say for sure, but I didn't see that in those two or three meetings that I attended, that the speed limit was reviewed and reduced as a result of traffic accidents.

MS MAGGIE WONG: May I take you to the last document in this chain. It's the information paper by Transport

Department to Tai Po District Council, dated 9 April 2018.

We can see that in TD-5, page 1617-1. This is a translation. The Chinese document is at page 1611.

I will give a description of this document. It is a paper prepared by the Transport Department, dated 9 April 2018, headed, "Traffic management measures on Tai Po Road (Tsun King Road, Sha Tin to Yung Yi Road, Tai Po)", and if we look at, first of all, the purpose of this paper, it says:

"The Tai Po District Council ... held a special meeting on 12 February ... to discuss the serious bus accident happened on 10 February 2018 early evening. The Transport Department ... has undertaken to review the speed limit and traffic management measures of the relevant road section. In view of the concerns of the local community and the Tai Po District Council about the progress of the implementation of improvement measures, this paper briefs members on the progress of TD in reviewing the speed limit of the relevant road section of Tai Po Road and ... follow-up improvement measures."

We can see, in this paper, that the Transport Department in paragraph 2 has reviewed the speed limit of the road section, and in paragraph 3 it stated:

"TD has established regular mechanism to review the speed limit of the road with a view to ... road safety and maintaining smooth traffic."

We can see over the page, at 1617-2, it stated there that:

"... protection of road users' safety is of prime consideration. In deciding whether the speed limit should be reduced, relaxed or maintained, [three] factors will be taken into consideration:

(a) traffic accident records of the subject road section;

(b) speeds of vehicles travelling on that road section; and

(c) road environment and features such as gradient, sightline of motorists, road intersections, pedestrian traffic, et cetera.

4. ... TD has comprehensively reviewed the traffic accident records of the subject road section ... [in the past two months]."

And then it suggested that, if we see section (c):

"Section between Chek Nai Ping and Yung Yi Road [which we have seen earlier on] ...

The traffic accident rate of the relevant road section was on a rising trend and above the overall average traffic accident rate in Hong Kong in the past

year. The detected vehicular speeds in recent months were lower than those of the past and generally below the current speed limit ..."

And apart from other matters mentioned there:

"In light of the aforementioned new circumstances, the speed limit of the relevant road section has scope for downward adjustment. The speed limit of 70km/hour is recommended to be lowered to 50km/hour for further enhancing road safety."

If we jump to paragraph 6:

"Separately, TD and the Hong Kong Police Force ... have started preparing for installation of a new batch of fixed speed enforcement cameras for stepping up the deterrence and enforcement against speeding motorists. The subject road section of the accident ... has already been included in the list of road sections for consideration of installation. TD is currently seeking resources and aims to firm up the installation of a fixed speed enforcement camera at the section near Chek Nai Ping of Tai Po Road ... before the end of this year."

Now, within two months of the Tai Po accident, the TD is said to have comprehensively reviewed the traffic accident reports and suggested the reduction of the speed limit to 50km/hour.

I have two questions. The first is, as far as your department is concerned, have these statistics been provided to the Transport Department before the accident?

CHAIRMAN: I'm sorry, could you particularise that question?

MS MAGGIE WONG: Was the traffic accident records of the subject road section provided to the Transport Department prior to the Tai Po Road accident on 10 February 2018?

CHAIRMAN: Thank you.

MR LEE TAI WAI: (Via interpreter) As far as I know, no.

MS MAGGIE WONG: Do you know if this subject road section has ever been placed before the Working Group on Review of Speed Limit prior to the Tai Po accident on 10 February 2018?

MR LEE TAI WAI: (Via interpreter) As far as I know, no.

MS MAGGIE WONG: Mr Chairman, I am going to move on to another topic -- unless you have some questions on this matter.

CHAIRMAN: Thank you. Just give me a moment, please.

There were recommendations made on 9 April for the installation of a speed camera for this stretch of road. Do we have a map? Does the map show us where the speed camera is proposed to go?

MS MAGGIE WONG: Mr Chairman, I believe the evidence is that

the speed camera has not been considered until the end of 2018.

CHAIRMAN: Was there any recommendation as to where it would go or not?

MS MAGGIE WONG: Yes. It's at 1617-5.

CHAIRMAN: Thank you. Could we see that on a map?

MS MAGGIE WONG: Yes. We can see that at the right-bottom box, with the red asterisk.

CHAIRMAN: Thank you.

MS MAGGIE WONG: It is stated there, "Initially recommended location for installing fixed speed enforcement camera".

CHAIRMAN: Thank you. Can you help us as to what steps have been taken, first of all, to obtain speed cameras -- apparently, there was a budget issue, we saw from that 9 April paper -- so that there is one available to be placed here? Can anyone help us with that?

MS YAU SIN MAN: (Via interpreter) For the fixed speed enforcement camera, it is mainly under the portfolio of the Transport and Housing Bureau and the Transport Department. In around July 2017, the Transport and Housing Bureau started a new round of public consultation on the installation of such cameras, on the choice of locations and the type of camera to be installed. The exercise started in mid-2017, and subsequent to the Tai Po Road accident, the Transport

Department, together with our CTCIU, central traffic camera investigation unit, under the Traffic Branch Headquarters of the police, the TD, together with CTCIU, started to see how cameras should be installed and designed for the site of the Tai Po Road accident.

CHAIRMAN: But the accident was six months ago. Where are we now?

MS YAU SIN MAN: (Via interpreter) I understand that the Transport Department has obtained funding and the camera will be installed there as soon as possible.

CHAIRMAN: When?

MS YAU SIN MAN: (Via interpreter) I don't know the actual date, but as far as I know they have confirmed the location and they have got money to do it.

CHAIRMAN: But, from what you are saying, this is a responsibility of the Transport Department and not the police?

MS YAU SIN MAN: (Via interpreter) That is correct.

CHAIRMAN: So they provide you with information about how they are proceeding; is that it?

MS YAU SIN MAN: (Via interpreter) That's correct. The camera to be installed at Tai Po Road, as I said, was part of the plan started in mid-2017 to install new cameras.

CHAIRMAN: But presumably not at this particular location;

there was a general review about installing new cameras? Is that what you are saying?

MS YAU SIN MAN: (Via interpreter) That's correct.

CHAIRMAN: And am I right in recollecting evidence that was given earlier, by Chief Superintendent Baker, I think, that there are 24 fixed speed cameras in Hong Kong?

MS YAU SIN MAN: (Via interpreter) That's true. Right now we have 24 such cameras installed at 130 locations. They are in operation.

(In English) 130 housings.

CHAIRMAN: I'm not sure I follow that. How do you install 24 cameras, fixed cameras, in 130 locations?

MS YAU SIN MAN: (Via interpreter) So, from time to time, the cameras are placed at different housings --

CHAIRMAN: They are moved around? They are not fixed at one place?

MS YAU SIN MAN: (Via interpreter) They are not.

CHAIRMAN: At any given time they are fixed in one place and then they are moved around?

MS YAU SIN MAN: (Via interpreter) That's true. The Transport and Housing Bureau, when it sought funding from the LegCo, provided a certain ratio.

CHAIRMAN: Are there about 4,000 kilometres of roads in Hong Kong?

MS YAU SIN MAN: (Via interpreter) The latest discussion is

such that there should be a camera placed at each housing. I think that is our main focus of the discussion.

CHAIRMAN: My question was more specific: are there about 4,000 kilometres of roads in Hong Kong?

MS YAU SIN MAN: (Via interpreter) Yes.

CHAIRMAN: 24 cameras?

MS YAU SIN MAN: (Via interpreter) Yes.

CHAIRMAN: Is that not one of the lowest ratios of cameras to length of roads in civilised jurisdictions?

MS YAU SIN MAN: (Via interpreter) Yes, I got your point, Chairman.

CHAIRMAN: Ms Wong, are we sitting today until 5.30?

MS MAGGIE WONG: Yes.

CHAIRMAN: In which case we will take a short afternoon break. Is this a convenient moment?

MS MAGGIE WONG: Yes. Thank you, Mr Chairman.

CHAIRMAN: We will take a break now for 15 minutes. Thank you.

(4.13 pm)

(A short adjournment)

(4.28 pm)

CHAIRMAN: Yes, Ms Wong.

MS MAGGIE WONG: Before I move on to a new topic, may I wrap this up by inviting you to go to the SEC bundle at

page 1360.

This is a LegCo paper -- sorry, minutes of special meeting held on 15 February 2018, Panel on Transport. I invite you to go to page 1360, in which three motions were passed at the Legislative Council. I won't read all of them out but only read one of the paragraphs which may relate to the question I am going to ask.

That's motion number 2. The panel urges the administration to:

"apply anti-skid surface dressing, erect additional deceleration warning signs and install speed enforcement cameras on the subject road section immediately, and review the 'high-risk' road sections across the territory and expeditiously enhance the relevant safety measures to safeguard the safety of road users ..."

Now, this motion was passed by the Legislative Council, and in relation to this matter which I ask this: has the police formed a separate department to carry out the task of reviewing the high-risk road sections across the territory?

MS YAU SIN MAN: (Via interpreter) I would like to say that we have never seen this document before. In relation to the road section concerned and the measures mentioned, the only thing we were involved was the speed enforcement cameras, and as I said the discussion

started last year, and after the accident at Tai Po Road, we understand that the Transport Department is going to install a camera there.

As regards other measures, we have not set up any committee to see to them.

MS MAGGIE WONG: Did the Transport Department consult you to provide them with certain traffic accident data in relation to particular road sections that have high risk across the territory?

MS YAU SIN MAN: (Via interpreter) We have never received any special request from the Transport Department.

MS MAGGIE WONG: I understand that the police has kept a database for black spots, or spots that are prone to traffic accidents. Is that correct?

MR STEPHEN BAKER: We do have a list of traffic accident black spots, which is -- these locations are classified by the Transport Department. The criteria for a location to be classified as a black spot is six cases with pedestrian injury within a 12-month period, nine cases with any injury within a 12-month period, or two fatal cases within five years. And this list is updated every three months.

MS MAGGIE WONG: Is the list made available to the public?

MR STEPHEN BAKER: I honestly don't know the answer to that question.

CHAIRMAN: No doubt you can find out and inform us.

MR STEPHEN BAKER: Yes, sir.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Thank you. You mentioned that it would be classified as a black spot if two fatal cases within five years. Once you made that classification as black spot, what measures or what safety measures would be recommended in terms of this particular road section?

MR STEPHEN BAKER: From a policing point of view, our responsibility would mainly rest through enforcement, but with all our departments working together, they could also look at road engineering road engineering, publicity and other measures to reduce the potential for accidents to happen at that location.

MS MAGGIE WONG: Would the bus companies be informed of these black spots?

MR STEPHEN BAKER: I would have to make further enquiries to find that out.

CHAIRMAN: Can you help us as to whether or not you provide the Transport Department with your list of black spots?

MR STEPHEN BAKER: Actually, the list is prepared by the Transport Department, sir.

CHAIRMAN: So dissemination of it is a matter for them?

MR STEPHEN BAKER: Yes.

CHAIRMAN: It's their document.

MR STEPHEN BAKER: Right, sir.

MEMBER LO: Actually, it is published on the TD website.

CHAIRMAN: Perhaps someone could look at that, whether or not it's available on the Transport Department's website.

MS MAGGIE WONG: May I move on to another topic, on Road Safety Council. If I may take you to a document in the SEC bundle, page 481.

CHAIRMAN: Which volume of SEC is this?

MS MAGGIE WONG: That should be bundle SEC-1.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Page 481. It is a footnote contained in the Audit Commission report that we have seen earlier this morning. If we scroll down to note 1, it provides a description of the Road Safety Council, and it contains the composition or membership within the Road Safety Council. We can see it:

"... is chaired by the Deputy Commissioner of Police (operations) with members drawn from seven government bureaux and departments (including the Transport and Housing Bureau, the Transport Department, the Information Services Department) and six non-governmental organisations (including the transport associations). It is supported by two committees, the Road Safety Campaign Committee and Road Safety Research

Committee."

So my first question is -- it is stated there that the Road Safety Councils is chaired by the Deputy Commissioner of Police (Operations). Does it hold regular meetings with respect to traffic statistics for reducing traffic-related injuries?

MR STEPHEN BAKER: Yes. It meets quarterly, at which the traffic accident trends are discussed, and the trend is mainly represented in the form of statistics.

CHAIRMAN: Have any of the officers here present today served as a representative of the police force on the council?

MR STEPHEN BAKER: Yes, sir. I have appeared at two meetings, the last two meetings.

MS MAGGIE WONG: What role would the police play in the Road Safety Council?

MR STEPHEN BAKER: The police play the role of secretariat, to coordinate the meetings, and they also have representatives on some of the subcommittees, for example, the Road Safety Campaign Committee.

MS MAGGIE WONG: What would be discussed normally in the Road Safety Council, apart from accident statistics?

MR STEPHEN BAKER: At the last two meetings, I can say that the meeting mainly focused on the road safety trend. It has also discussed items, for example, including

driverless vehicles, topical subjects such as that.

CHAIRMAN: Does it publish papers?

MR STEPHEN BAKER: No, sir.

CHAIRMAN: Are its minutes available publicly?

MR STEPHEN BAKER: No, sir.

MS MAGGIE WONG: Would the meeting make recommendations to the seven government departments as to how to enhance safety features on the road, in particular bus safety?

MR STEPHEN BAKER: Such matters were not discussed in the last two meetings.

MS MAGGIE WONG: Can it make suggestions, if they see a problem in relation to particular aspect in relation to bus safety, can it make suggestion to Transport Department or different bureaux mentioned there?

MR STEPHEN BAKER: I believe so, because the different government departments are represented there, and the overall aim of the Road Safety Council is to reduce traffic accidents.

MS MAGGIE WONG: It is stated there that there are two subcommittees, the Road Safety Campaign Committee and the Road Safety Research Committee. May I ask, first of all, what's the membership of the Road Safety Campaign Committee?

MR STEPHEN BAKER: The Road Safety Campaign Committee is chaired by one of the civilian members of the Road

Safety Council, and it consists of --

CHAIRMAN: By that you mean non-government?

MR STEPHEN BAKER: Non-government, sir, yes. Also sitting on that subcommittee are representatives from the road safety team in the Hong Kong Police, some people from the private sector who are skilled at publicity.

MS MAGGIE WONG: Would they meet regularly?

MR STEPHEN BAKER: Yes. They meet every quarter, I believe.

MS MAGGIE WONG: Would they have any minutes of meeting for this subcommittee?

MR STEPHEN BAKER: We are checking.

MS MAGGIE WONG: Thank you. Would the topic of attack on bus captains be one of the topics that would be discussed in the Road Safety Campaign Committee?

MR STEPHEN BAKER: No. It hasn't been discussed in that way. It mainly focuses on how to convey road safety messages to different groups within society. For example, elderly people or young people. Things like that.

MS MAGGIE WONG: Yes. And in terms of the Road Safety Research Committee, what is the membership?

MR STEPHEN BAKER: Perhaps Ms Yau could answer that part.

MS YAU SIN MAN: (Via interpreter) The chairman of the Research Committee is the Deputy Commissioner of the Transport Department. Members include the police, the

Highways Department, Transport Department, engineers from different units of the Transport Department, persons in charge, and in this committee, from time to time, there might be consultancy studies. Consultants would be there to give presentations. They are commissioned by the Transport Department to carry out studies, and they would give presentations at meetings. Also, there would be university lecturers and also transport experts who are on the committee.

CHAIRMAN: Transport experts who hold what positions elsewhere?

MS YAU SIN MAN: (Via interpreter) According to what I know, they are university lecturers, but I am not sure of their research interests.

MS MAGGIE WONG: Do they meet regularly?

MS YAU SIN MAN: (Via interpreter) Yes, we do. We have quarterly meetings.

CHAIRMAN: Are you a representative on this committee?

MS YAU SIN MAN: (Via interpreter) Yes, I am.

CHAIRMAN: Currently?

MS YAU SIN MAN: (Via interpreter) Yes.

CHAIRMAN: How long have you been a representative?

MS YAU SIN MAN: (Via interpreter) Starting from April 2017, when I took up this position, I started to be on the committee. But I did not attend the last two meetings

because I was otherwise officially engaged and I was represented by other colleagues.

CHAIRMAN: But no doubt you were kept informed as to what had been discussed.

MS YAU SIN MAN: (Via interpreter) Yes.

MS MAGGIE WONG: What topics were discussed?

MS YAU SIN MAN: (Via interpreter) From what I remember -- well, this may not be all the topics. For example, we talked about child seat belts on vehicles, and also extending the green phase for pedestrians of traffic lights, so elderly people can have longer time to cross the road. And also walkability, encouraging pedestrians to walk more. This is what I can recall to have been discussed at the committees. Actually, they are research reports.

MS MAGGIE WONG: What about technological --

CHAIRMAN: Before you move on -- are these research reports available publicly?

MS YAU SIN MAN: (Via interpreter) I'm not sure about that.

MS MAGGIE WONG: Would there be minutes of meeting?

MS YAU SIN MAN: (Via interpreter) Yes, there are.

CHAIRMAN: Although you only joined the committee in April 2017, although that's now the best part of 18 months ago, no doubt you had access to records going back in time earlier than that?

MS YAU SIN MAN: (Via interpreter) Yes, I can.

CHAIRMAN: And, in order to prepare yourself for the job, no doubt you had to read that material to see what this committee was all about?

MS YAU SIN MAN: (Via interpreter) Well, with regard to previous reports, I did not really look at them.

CHAIRMAN: Yes, Ms Wong.

MS MAGGIE WONG: Yes. Because the term is "Road Safety Research Committee", would they discuss anything about the reduction of speed limits of certain busy roads, like in Central, Des Voeux Road? Would they raise those sorts of matters?

MS YAU SIN MAN: (Via interpreter) From what I recall, I don't think that was mentioned. That is about a reduction of speed limits.

MS MAGGIE WONG: What about bus safety in a general sense?

MS YAU SIN MAN: (Via interpreter) No. I need to go back and look at the research reports again before I can remember, but that is what I think I can recall now.

MS MAGGIE WONG: Thank you. May I just ask a general question: in what way you see Cap 230 could be modified or strengthened to enhance bus safety based on your law enforcement experience?

MS YAU SIN MAN: (Via interpreter) Well, I think all regulations or ordinances would have been established

with a particular intent. Cap 230A targets passenger conduct on buses, and also it is to regulate the operation of franchised buses. Since the police are here to enforce the law, I would think that I would emphasise how we can enforce the law better.

MS MAGGIE WONG: Since we are on the topic of enforcement of the law, I am going actually to the last topic.

I believe in one of the replies, you have provided the committee with 51 fatal cases.

CHAIRMAN: Before you move on to that detail, there are some matters I would like to pursue.

We have, fortunately, representatives in you, Chief Superintendent Baker, on the Road Safety Campaign Committee, and in you, Chief Superintendent Yau, the police representative on the Road Safety Research Committee. I would like to pose this question to you both.

Who is it, if it is anybody, in Hong Kong government, that drives the safety of road transport? Where does the impetus come from? Who directs others? Who establishes policy?

MS YAU SIN MAN: (Via interpreter) I believe, in terms of overall transport matters, the Transport and Housing Bureau provides the steer for making policies, and the Transport Department is an executive organisation. In

terms of traffic laws and road design, this would be executed by the Transport Department.

The role of the police, according to the law, is that we are empowered by the law, so we do enforcement work as dutifully as we can.

Talking about enforcement, as we said, sometimes there would be nothing that we could do. Say, for example, I mentioned illegal parking. With what powers we are given by the law, we will do as much as we can. And in terms of revision to the law or road design, road improvements, the police also have a duty to give advice to the Transport Department. Hopefully, we can improve road safety. Hopefully, traffic can be smooth, and every road user can be protected.

CHAIRMAN: So who is it that comes up with ideas about what it is we should be pursuing? We have been discussing today, for example, seat belts on franchised buses. There are other issues about other safety devices that can be used on vehicles to make them safer. Who is it that comes up with these ideas?

MS YAU SIN MAN: (Via interpreter) I believe different quarters will provide views. On a daily basis, we enforce the law, and we can draw from overseas experience, we think. And within the Transport Department, they also do research, and in the end, it

would be up to the policy bureau to give policy support; say in terms of technology, funding, legal matters, we need the backing of the Transport and Housing Bureau, so the police and the TD can do a better job on a daily basis.

CHAIRMAN: You describe the role of the bureau as giving "steer".

MS YAU SIN MAN: (Via interpreter) Yes.

CHAIRMAN: What steer has the bureau given in respect of enhancing safety on franchised buses?

MS YAU SIN MAN: (Via interpreter) I believe, within the TD, there is already a working group that is tasked to look at the operation of franchised buses, including the licensing system, and how road safety can be ensured. Hopefully, this is what the working group of the TD will do, that it will put forward more views for the enforcement departments to enforce the law and also for the policy bureau to make more or better policies to protect the public.

CHAIRMAN: Which working group are you describing?

MS YAU SIN MAN: (Via interpreter) This morning, I heard that there was this working group. Please give me a moment.

CHAIRMAN: If you are describing the Working Group on the Enhancement of Safety, that was a working group

established on 13 March of this year. Is that the one you have in mind?

MS YAU SIN MAN: (Via interpreter) That's the one.

CHAIRMAN: Prior to that, what was the steer being given by the bureau, about enhancing safety?

It may be a bit unfair to ask you, but it seems, from the way you have described things, that you are in the position of receiving the benefit of steer which you then have to enforce. The intermediary, the Transport Department, has come up with the implementation of the steer.

MS YAU SIN MAN: (Via interpreter) From what I know, at the Transport Department, there is a unit on buses and railways which will watch over services provided by franchised buses and railway companies, and there is not much involvement from the police. It is hoped that the Transport Department can do more through this unit.

CHAIRMAN: Is anybody actually driving safety for franchised buses?

MR STEPHEN BAKER: For franchised buses, sir, I can't say that -- it's not within my knowledge that anyone is specifically for franchised buses. I think the Road Safety Council is a useful forum where ideas are exchanged, where all the different government departments with responsibilities for transport and

traffic are represented. And that forum does give steer to road safety policies. But I'm not aware of a committee that is specifically focusing on franchised buses.

CHAIRMAN: Let me come to you again, Chief Superintendent Yau. You are on this committee that does research, the Road Safety Research Committee. Are you aware of any research done by that committee into the benefits of using seat belts on franchised buses, as opposed to the difficulties of getting people to use them?

MS YAU SIN MAN: (Via interpreter) From what I remember, we haven't talked about seat belts on franchised buses. I can remember that we discussed child restraint devices, that is seat belts for children.

CHAIRMAN: Yes. Thank you for your help.

MS MAGGIE WONG: Thank you.

Following on that, who would suggest the topics to be discussed at the Road Safety Research Committee?

MS YAU SIN MAN: (Via interpreter) Usually, it would be for the Transport Department to provide consultancy papers. We read them before meetings and discuss them at meetings.

MS MAGGIE WONG: Has any member raised a topic to be discussed in the Road Safety Research Committee?

MS YAU SIN MAN: (Via interpreter) I am not clear who to

suggest items for discussion. We are informed by the secretariat of the Transport Department.

MS MAGGIE WONG: So it is predominantly driven by the Transport Department?

MS YAU SIN MAN: (Via interpreter) Yes, as far as I know.

MS MAGGIE WONG: Going on to the last topic, Ms Yau, that's in relation to some of the documents you have provided to the committee on 7 May 2018, in relation to 51 fatal traffic accidents, and your reference is at 124-1 to 124-2 of the miscellaneous bundle.

Now, my question is focused on asking you some of the examples that you provided here as to the use of black-box data in --

CHAIRMAN: Before you go on, this is not just 51 fatal accidents. It's 51 fatalities occurring on or around a bus, is it not?

MS MAGGIE WONG: Yes. 51 fatal accidents in relation to a franchised bus.

If I may refer to the question first. The question you can see is at page 124. The specific matter which you are tasked to look at is paragraph (2):

"Please provide the details of all fatal and/or serious accidents, as defined in the traffic reports, in the period 2012 to February 2014 inclusive, involving [specifically] franchised public buses, including:

(i) a brief description of the accident and the resulting fatalities and/or injuries;

(ii) a brief description of any consequential prosecution, verdicts, reasons for verdict ..."

CHAIRMAN: Before you move on, on behalf of the committee, might we thank Chief Superintendent Cadman, who is not here, and those assisting him, for providing this information. We are conscious that this must have involved a lot of effort to gather together this material and we are very grateful. It was done during a short period of time.

MS MAGGIE WONG: Yes, and we are grateful for the provision of documentation. And the 51 fatal accidents involving franchised bus is listed at page 124-4, the dates and the case numbers.

It sets out, basically, 30 cases of which 28 cases have been convicted and two acquitted, and that's set out at paragraph 4 of your letter. And 15 case summaries were provided where the driver was not prosecuted and no further action. And three cases with three brief facts only, and case not yet concluded, and two initial reports, are under active investigation, and one case with only case result.

The purpose of taking you to these 51 cases is I wanted to show some example to see the use of

black-box data or tachograph data, or the use of braking, deceleration and speed reports, and the use of this in the legal proceedings.

If I may first take you to a few examples. It's at page 124-5. That's a case in 2012, 5 September 2012, involving dangerous driving causing death.

If we can scroll to page 124-7, the background of this case relates to a fatal traffic accident at To Kwa Wan Road, and paragraph 2, involving a KMB double-decker bus, where an elderly woman was killed when she was walking across the road from a safety island to the other side of the road.

We can see at 124-8 that the police, apart from photos, they obtained the driving data from KMB, and also the data would reveal the speed when the bus pulled out from the bus stop, at a particular time, and the acceleration of the bus, the time when the defendant accelerated the bus, and when the bus captain applied the brake and how many times.

We have seen a number of examples; this is just one of them. Is this sort of information frequently used in legal proceedings?

MS YAU SIN MAN: (Via interpreter) In investigating serious traffic accidents, those that involve fatalities in particular, we will try our very best to get all

relevant records, including those captured by CCTV and also the black box.

Now, the installation of black box is not statutory, but if it is available we will always get it from the bus.

MS MAGGIE WONG: What about non-fatal accidents?

MS YAU SIN MAN: (Via interpreter) For accidents without fatalities, but that are serious, if there is a black box available, we will make use of it.

CHAIRMAN: Franchised buses have been required since 1 July 2004 to have a tachograph, black box, or rather vehicles made after that date. I think the reality is every franchised bus in Hong Kong's got a black box.

MS YAU SIN MAN: (Via interpreter) Not all franchised buses have got such. For public light buses, yes, they are all fitted with one, but not for all franchised buses.

CHAIRMAN: Could we have the requirement put on the screen? I think we also have statistics coming from the bus companies, telling us how they have retrofitted these things.

But you are saying that the police encounter franchised buses that don't have black boxes? Because that is a surprise.

MS MAGGIE WONG: Whilst we are looking for this document, may I ask this question: have you encountered

difficulties in obtaining this black-box data in any non-fatal accidents?

MS YAU SIN MAN: (Via interpreter) Where there is really such a black box, we have no difficulty obtaining the data.

MS MAGGIE WONG: That's TD-5, page 1597.

We will see a letter from the Transport Department, dated 17 October 2003, setting out the minimum requirement for electronic data recording devices being installed, and we can see the specific minimum requirements for electronic data recording device at page 1598.

We can see, at paragraph 1:

"The purpose of the electronic data recording device is to provide tools for the bus company to monitor and manage the on-road speed- and safety-related behaviour of its buses, and indirectly to encourage better driving behaviour."

And the device set out there includes the provision of data at one-second interval, install data every 30 seconds for a period of two weeks, which includes the operation time and vehicle speed -- start time, rolling time, idle time, finish time.

We will also see in some of the representations given by the KMB and Citybus that they have upgraded the

black-box data to include more data, and we can see in the TD Paper 8 -- I believe it's TD-1, page 87, and we can see in this --

CHAIRMAN: This is the paper that the Transport Department provided to the committee at the beginning of these proceedings, and I think what your attention is being drawn to is the last sentence in paragraph (c).

MS MAGGIE WONG: Yes.

CHAIRMAN: "Currently, all franchised buses are equipped with black boxes ..."

MS MAGGIE WONG: Yes, "and speed limiters".

CHAIRMAN: Perhaps just digressing, we are conscious of the fact that we are concentrating on buses and you have a much wider portfolio. But the question really is this: how much use do you make of the data on black boxes for the purposes of prosecuting?

MS YAU SIN MAN: (Via interpreter) As I said, for fatal and serious traffic accidents, we will make use of data from the black box. In police investigation, if the records are there, it won't be difficult for us to obtain the data. Colleagues of the traffic accident investigation unit would take into account all evidence and make prosecutions.

MS MAGGIE WONG: Can you tell us whether there is any difficulty as to why this sort of information was not

used in less serious cases, other than fatal accidents?

MS YAU SIN MAN: (Via interpreter) Well, all facts of the case are different. For less serious traffic accidents, if just a trip or minor injury, it is not a serious traffic accident, and the investigation direction would be different. So, in investigation of each and every case, depending on the facts of the case, we will see whether it is necessary to obtain such data regardless of whether it is serious or not.

MS MAGGIE WONG: In all these cases, do you know whether this evidence, in terms of black-box data and speed reports, or acceleration reports/deceleration reports, has ever been challenged in court?

MS YAU SIN MAN: (Via interpreter) I don't have such information with me now.

MS MAGGIE WONG: Insofar as the 51 cases --

CHAIRMAN: Just allow the translation, if you would.

MS MAGGIE WONG: I apologise.

CHAIRMAN: Before you move on, could you make enquiries as to that and provide us with an answer?

MS YAU SIN MAN: (Via interpreter) Yes.

CHAIRMAN: Thank you.

MS MAGGIE WONG: Would you find it useful -- I understand that the public light bus has a specific provision in the ordinance itself governing the admissibility of this

type of electronic data recording device evidence.

CHAIRMAN: Could we bring that up on the screen?

MS MAGGIE WONG: Yes.

CHAIRMAN: This is a provision to make it easier to prosecute by using the black-box data.

MS MAGGIE WONG: Yes.

CHAIRMAN: Do we have any references for the ordinance?

MS MAGGIE WONG: Mr Chairman, we are locating the document. But may I make the point first and -- or may we have a few seconds?

CHAIRMAN: Yes, of course. Is there a separate ordinance that deals with this?

MS MAGGIE WONG: Yes, that's the road safety ...

CHAIRMAN: Cap 374?

MS MAGGIE WONG: Cap 374.

CHAIRMAN: And it's therefore a separate part of the general Road Traffic Ordinance?

MS MAGGIE WONG: Yes.

CHAIRMAN: Well, no doubt someone can look for that while we move on.

MS MAGGIE WONG: Yes. In general terms, there is a specific provision, following amendment of the ordinance itself, to cater for admissibility of evidence for electronic data recording device in public light buses, which makes the prosecution adducing evidence much easier.

So my question is: would the police welcome an amendment similar to the statutory provisions applicable to public light buses, in admitting this evidence in relation to black-box data?

MS YAU SIN MAN: (Via interpreter) I agree.

MS MAGGIE WONG: Mr Chairman, subject to finding the appropriate statutory provision, I have completed my questioning.

CHAIRMAN: Very well.

MS YAU SIN MAN: (Via interpreter) Can I please add something?

Just now, we talked about the 51 fatal cases. Since we did not have time to prepare the documents, actually there was one, which is number 19, that was about the PLB. It was not about a franchised bus. Therefore, there should be 50 fatal accidents.

CHAIRMAN: Thank you. So no franchised bus involved?

MS YAU SIN MAN: (Via interpreter) There was not.

MS MAGGIE WONG: I believe that should be Cap 374A, the Road Traffic (Public Service Vehicles) Regulations.

CHAIRMAN: Yes, these are the specifications for the device, but then there is an evidential provision, is there not? Perhaps section 25. No.

Perhaps scroll through section 24, please. Yes. Go through the section. Yes.

Well, no doubt it can be located in due course, but there is an evidential provision.

Can any of the police representatives present assist us as to what use, if any, is made of this evidential provision in relation to PLBs; how many prosecutions involve reliance on the fact that the speed of the vehicle can be established by the black box?

MR LEE TAI WAI: (Via interpreter) From what we understand, right now we do not have accurate figures at hand as to the invocation of such data from EDRD, but I can recall one case in which the device was challenged by the defence at court, and both sides supplied experts to debate the legality and accuracy of the device. And the conclusion was that the court accepted the EDRD, and also the case was successfully prosecuted.

CHAIRMAN: There is another aspect of the different legislation for PLBs which is relevant to one of our considerations, and that is whether or not franchised buses ought to have speed display units that one sees on a PLB, telling the passengers what the speed of the vehicle is.

The question that arises from that is this. Have any difficulties arisen with conflicts between passengers and PLB drivers as a result of the fact that the passengers can see, for example, that the PLB driver

is breaking the speed limit all the journey, and they remonstrate? Any difficulties with that?

MS YAU SIN MAN: (Via interpreter) We haven't met with such difficulty. I believe, if passengers can see the speed of the vehicle, it can more effectively ensure traffic safety.

MS MAGGIE WONG: Mr Chairman, I have located the relevant provision.

CHAIRMAN: Thank you. But before you move on to that -- have there been any incidents when, for example, members of the public travelling on a PLB take a photograph of the speed display unit and produce that in relation to their complaint? Are you aware of that?

MR LEE TAI WAI: (Via interpreter) We don't have such information here.

CHAIRMAN: Yes, Ms Wong.

MS MAGGIE WONG: Mr Chairman, that would be in section 67A of the Road Traffic Ordinance itself.

CHAIRMAN: Yes.

MS MAGGIE WONG: If we look to subsection (6), this is a section in relation to EDRD, electronic data recording device, and it is a section on power to retrieve electronic data, and if we look at subsection (6), it is stated there:

"In any criminal proceedings, a document purporting

to be a record of the data retrieved under subsection (5)(b) is admissible as evidence of the matters appearing from the record without further proof."

And (5)(b) is, as we can see, the data stored in the fitted EDRD to be retrieved by a vehicle examiner or any person authorised by the Commissioner of Police, and that's the provision in relation to public light buses.

CHAIRMAN: And I think, Chief Superintendent Yau, you agreed that you would welcome such a provision in respect of franchised buses?

MS YAU SIN MAN: Yes, I agree.

MS MAGGIE WONG: Yes. Mr Chairman, I have completed my questioning in this regard.

CHAIRMAN: Thank you.

Just one or two matters remaining.

QUESTIONING BY COMMITTEE

We know that in relation to the availability of black-box data, there is now available, it seems, on many buses, CCTV film of the events, in particular forward-looking cameras that allow you to see what has happened, and perhaps cameras that actually record the instruments in the cab of the driver.

Is film obtained from such cameras used in prosecutions? I have in mind one of the 50, as it now is, fatal accidents, the one at Lei Yue Mun where a bus

toppled over, and I think there, rather than using black-box material, they were using CCTV film which showed the speed.

MS YAU SIN MAN: (Via interpreter) In the police's investigation of accidents, we can also use the film captured by CCTV on vehicles, but we need witnesses to supply the evidence. The images and oral evidence have to be combined, and this can be used for prosecution.

CHAIRMAN: Just dealing with the CCTV, this is commonly used in prosecutions for all kinds of things, is it not: bank robberies, and so on, murders?

MS YAU SIN MAN: (Via interpreter) Indeed, this is used in many criminal prosecutions.

CHAIRMAN: Right. So what are the witnesses that you need in relation to the camera itself?

MS YAU SIN MAN: (Via interpreter) I think we need the author of the film say who installed the CCTV and did anyone tamper with the images of the CCTV film.

CHAIRMAN: So section 22 of the Evidence Ordinance? It's a computer, isn't it, the CCTV?

MS YAU SIN MAN: (Via interpreter) Well, not necessarily a computer. It may be a chip, or it may be an audio tape.

CHAIRMAN: So you need someone to say it was installed, it was working properly and no one has interfered with it?

So it's a technician you need, not a witness to the event?

MS YAU SIN MAN: (Via interpreter) Well, then it depends on how advanced the camcorder is. Sometimes the vehicle owner can be that person or sometimes you need a technician.

CHAIRMAN: We are ourselves concerned with franchised buses, and they don't even allow their bus captains to put their own cameras on board, so these are cameras installed by the bus companies, maintained by the bus companies, and we have seen where they are located and we have seen the devices -- there are actually black boxes on which this data is recorded.

MS YAU SIN MAN: (Via interpreter) I believe franchised bus companies must have their devices monitored. I don't think the bus captains can remove them, because apart from data with regard to the driving, in fact the bus companies may need the information for management.

Therefore, the CCTV of the franchised buses of course is managed by the bus companies. We understand that.

CHAIRMAN: Of course, and the bus companies have IT departments, so it is simplicity itself, is it not, to establish the installation, the lack of interference, therefore the validity of the CCTV film?

You ask the KMB to give you a witness statement saying that everything was working, that proves it. Therefore, this is readily available material.

MS YAU SIN MAN: (Via interpreter) I don't know how much time they need to have it prepared, and I hope, in an investigation, I want them to be able to provide it as soon as possible.

CHAIRMAN: Mr Auyeung.

MEMBER AUYEUNG: Thank you, Chairman. I want to come back to this Road Safety Council, and maybe the two chief superintendents can help me.

In your involvement with the two committees, are you able of any recommendation that has ever been made to the TDB by this council regarding safety issues?

MR STEPHEN BAKER: There were not any new initiatives proposed at the two meetings that I attended.

MEMBER AUYEUNG: Or even looking back at minutes, are you aware of any recommendations made by this council to the TDB or the TDB turned it down for whatever reason?

MR STEPHEN BAKER: No, I'm not aware. I read through the minutes of the last probably year, but I'm not aware of any proposals being rejected in such a way.

Thank you.

Ms Yau, the same question.

MS YAU SIN MAN: (Via interpreter) I think I will have to

see what research studies have been done in the past few years that might have mentioned safety measures. I have to check first.

MEMBER AUYEUNG: Thank you, Mr Chairman.

CHAIRMAN: Prof Lo?

MEMBER LO: I have two questions. The first one is does the TD regularly study the accident statistics on a regular basis to figure out what can be improved, or is that part of TD's job to do so?

MR STEPHEN BAKER: Yes, the TD go through the traffic accident statistics and present their findings at the Road Safety Council.

MEMBER LO: So the police does not do that?

MR STEPHEN BAKER: The police do it in order to target our enforcement, and also to help in designing publicity material and the targeted audience for publicity material.

MEMBER LO: So is it fair to say that the role of the police is really enforcement, accident investigation, and maintaining the database, that would be basically the major functions?

MR STEPHEN BAKER: Yes. I mean, the overall safety strategy is the three Es: engagement, engineering and enforcement. And the police have the major part of the enforcement, obviously, and some of the engagement. But

engineering is more of a TD and Highways area. Yes.

MEMBER LO: Okay.

CHAIRMAN: Ms Wong, are there any questions arising from the questions of the committee?

MS MAGGIE WONG: No. Thank you, Mr Chairman.

CHAIRMAN: In which case, it remains for the committee to thank you for your assistance over this long day, and to invite you to provide the material that we have identified that you are going to seek to help us with. We will do the best we can to put that together as a list and we will send that to you as soon as we can, with references to the transcript so that you will be able to follow what it is that you were asked to provide.

In those circumstances, our evidence is finished today, and we will resume our hearing on Thursday. Thank you.

(5.34 pm)

(The hearing adjourned until 9.00 am on Thursday, 27 September 2018)

EVIDENCE FROM THE HONG KONG POLICE FORCE: MS CHAN YI PING, MR STEPHEN BAKER, MS YAU SIN MAN, MR LEE TAI WAI, MR CHEUNG TIN LOK (simultaneous interpretation was used where indicated) 1

Examination by MS MAGGIE WONG 1

QUESTIONING BY COMMITTEE 170

2018 年 9 月 24 日

上午 10 時正恢復聆訊

出席人士： Hon Mr Justice Michael Lunn（倫明高），香港專營巴士服務獨立檢討委員會主席

歐陽伯權先生，香港專營巴士服務獨立檢討委員會委員

羅康錦教授，香港專營巴士服務獨立檢討委員會委員

陳政龍大律師及黃佩琪大律師，由高露雲律師行委聘，代表香港專營巴士服務獨立檢討委員會

邱倩雯女士，署理總警司（交通總部）（香港警務處代表）

白令嘉先生，署理總警司（交通總部）（香港警務處代表）

張天樂先生，警司（刑事總部）（香港警務處代表）

陳依萍女士，警司（行動）（新界北總區刑事總部）（香港警務處代表）

李大偉先生，署理警司（交通管理），（香港警務處代表）

主席：（經傳譯員）各位早晨，早晨，邱總警司。好，多謝你同埋你嘅同事今日出席呢個聽證會，我相信你都知道聽證會嘅程序係點樣，我哋有黃女士，我哋今日嘅代表大律師，就會係引導大家作證，問問題。問題當然係向你提出，邱女士，不過如果你嘅同事係可以提供協助，請你隨便叫個同事，或者其他邊位同事，一位或多位同事可以提供資訊幫我哋，可以咁樣做嘅。你明唔明白？如果你聽問題有問題，你可以提出，睇下我哋可唔可以闡述一下。

黃女士：（經傳譯員）係，多謝你，邱女士。我會代表委員會提出一啲問題問你嘅。我相信警察就已經總共有八次回應咗委員會一啲嘅問題，响唔同嘅範圍回答咗唔同嘅問題。呢個全部都係我哋响嗰個所謂 Miscellaneous，雜項嗰個文件冊裏面擺晒好。

首先我會問嘅問題係就住幾個課題提出問題，首先第一個就係意外嘅統計數字。邱女士，我相信警方係有一個所有交通意外嘅數據庫，啱唔啱？

邱倩雯女士：我可以用中文答，係咪？

黃女士：Yes, please.

邱倩雯女士：啱嘅，冇錯。

黃女士：（經傳譯員）唔該晒。我要等一等，等個翻譯做完。呢個數據庫，你可唔可以話畀我聽係基於調查報告，即係警察不時進行嘅調查報告所制訂？

邱倩雯女士：我問一問我同事。我哋係有一個資料庫，係關於交通意外嘅資料庫。我哋都係由我哋嘅警區嗰度收集資料返嚟，我哋會寫埋嗰個交通意外嘅原因。

黃女士：（經傳譯員）响制定統計數字，你用咩野資料嚟到係制定呢個數據？

邱倩雯女士：你嘅意思係我哋會收集啲乜嘢嘅資料，係咪呀？

黃女士：（經傳譯員）係嘅。

邱倩雯女士：我或者請我嘅同事去詳細咁樣解釋我哋係會收集啲乜嘢資料，好嘛？

白令嘉先生：（經傳譯員）一般嚟講有關嘅訊息，就係包括資料就係一個車輛嘅類別，係咪有乘客，究竟嗰啲受傷嘅數字、性質，同埋如果係有嚴重受傷，究竟係死亡、輕傷，如果嗰個司機係有錯嘅或者佢係其中一個原因，我哋就會睇睇係根據調查人員所講，邊個人係有份造成呢個嘅成因嘅。

我哋係會用電腦嚟到收集有關嘅資料。呢個就好似响個格仔剔一剔咁做嘅，如果係用電子嘅方法就提交畀道路安全嘅小組嘅，跟住就會畀運輸署。咁等到運輸安全小組同埋運輸署係可以分析嗰個交通意外嘅成因，以便去到設計或者改進嗰個安全策略。

主席：（經傳譯員）有冇一個所謂範本，即係表格嘅範本嚟到交呢個報告？

白令嘉先生：Yes, my Lord.

主席：（經傳譯員）你有冇一個範本嘅副本？

白令嘉先生：（經傳譯員）有嘅，係可以嘅。

主席：（經傳譯員）可唔可以而家畀？

白令嘉先生：（經傳譯員）可以嘅。

主席：（經傳譯員）我想要一個副本。

黃女士：（經傳譯員）唔該晒。白令嘉先生，响咁樣嘅數據表格，你响關於呢個意外嘅成因，你會想知道究竟啲人係點樣受傷，响邊度受傷，或者係咩嘢原因係受傷，啱唔啱，咁樣嚟到係概述你收集嘅資料？

白令嘉先生：（經傳譯員）嗰個資料主要係關於意外嘅成因，就唔係嗰個受傷嘅分類。受傷嘅分類淨係話佢係咪嚴重受傷嘅，呢個係視乎嗰個人响醫院係住咗幾耐，定係一個輕傷，定係還是係死亡個案。

主席：（經傳譯員）呢個定義係咪响呢個你哋發表嘅交通報告嘅背頁嘅定義？

白令嘉先生：（經傳譯員）我最近冇睇過呢份文件。

主席：（經傳譯員）我畀份你睇睇，請你畀總警司睇一睇。嗰度有一個備註嘅，就咁畀總警司睇一睇。呢度有幾個詞語嘅定義係响背面嗰度。

白令嘉先生：（經傳譯員）係啱嘅，主席。

主席：（經傳譯員）呢個定義都係你嗰個標準表格嘅所用？

白令嘉先生：（經傳譯員）其實喺個表格冇咁寫出嚟，不過的確係咁樣用嘅。

主席：（經傳譯員）係，我可唔可以攞番我嗰份文件？唔該。

黃女士：（經傳譯員）唔該。當你係編製咗呢個資料嘅時候，其他部門或者審計署係咪會唔會審計警方同埋運輸署收嘅數據，咁講啱唔啱？

白令嘉先生：（經傳譯員）我唔知道審計署點解會參加道路安全...

主席：（經傳譯員）或者我哋幫下你，我哋有份係審計署嘅一份文件，審計署就睇咗一系列嘅事項，亦都睇咗交通安全嘅行政事宜嘅，嗰個係2013年3月。

黃女士：（經傳譯員）請你睇睇呢個文件，SEC-2號嘅文件冊。白先生，呢個係一個2013年3月28號審計署出嘅報告。呢份文件其實係房屋署、運輸署、香港警方同埋新聞處，就係話關於呢個題目，道路安全嘅行政事宜。呢份文件2013年4月5號交咗畀立法會嘅，呢個係一個衡工量值嘅審計工作嘅一部分嚟嘅。

我想你睇SEC，同一份文件，543頁。我哋可以見到5.2段係咁樣講嘅，「警方係負責調查交通意外」，你有個數據庫，我哋睇一睇第四行，「警方要求調查嘅警務人員要保存番佢哋嗰個調查結果，同埋用一個實體嘅文件，亦都將嗰個意外數據就係攞咗喺一個電腦系統，呢一個TOMS，或者係交通營運管理系統，咁係意外四十八小時內要輸入。嗰個數據係可以修改。

警方呢個TOMS嘅數據庫係運輸署嘅數據庫，佢哋叫做運輸資訊系統，TIS嘅，係利用電子嚟到輸送嗰個交通意外嘅數據嘅。運輸署就係利用呢個TIS嘅意外數據，嚟到去搵出意外嘅黑點，同埋有冇咩嘢意外嘅趨勢，以便進行深入調查同分析嘅。有關數據亦都係一個制定交通安全策略重要嘅資料來源，亦都係可以愛嚟制定安全教育措施，或者係持續檢討交通條例，同埋其他道路安全措施嘅一個資料來源嚟嘅。」

你頭先話畀我聽嗰個有關嘅資料係會同運輸署共用分享，即係以便制定嗰個道路安全嘅策略。今次呢份報告...

主席：（經傳譯員）你未再講之前，我想幫一幫手，白令嘉先生，呢份文件其實我哋有文件响度，可以睇番有關嗰份文件。

白令嘉先生：Thank you.

主席：（經傳譯員）你如果需要嗰份文件，我哋可以搵人畀你嘅，就係你提出得㗎嘞。可唔可以畀嗰份文件佢？我諗呢個係 S--其實兩冊嘅，SEC-1 同埋 SEC-2。但係開始嘅時候係1？

黃女士：（經傳譯員）即係份文件最前嗰部分，喺 SEC-1。

主席：（經傳譯員）好，你或者用啲時間睇睇呢份文件，等你知道我哋問嘅問題係關於咩嘢事嘅。

白令嘉先生：（經傳譯員）唔該晒。

黃女士：（經傳譯員）呢份文件係審計署編訂嘅，佢其實係要嚟審計有關數據，確保警方同埋運輸署使用嘅數據係咪準確嘅。根據我哋睇緊呢份報告，佢係話似乎有啲地方係唔準確嘅，即係話道路安全嘅數據有啲係唔準確嘅。

我哋可以睇476頁，第10段、第11段。首先我哋見到呢度個標題，就係「交通意外數據嘅準確性」，第一就係嗰個位置，跟住嗰個引致交通意外嘅因素。關於交通意外地點嗰段，第四行，「交通意外嘅地點係利用一個叫做座標嘅參考系統嘅。由於輸入座標嘅參考數據唔準確，運輸署係用額外嘅時間同埋資訊嚟到去改善呢個問題，或者糾正個問題。審計署覺得應該係即刻採取有效措施嚟到確保嗰個有關道路座標位置嘅數據要準確輸入，首先第一。」

另一個就係嗰個「引致交通意外嘅因素」嘅。亦都有講有一個係抽樣檢查嘅，第四行，「有一次進行抽樣調查有關引致交通因素嘅調查，我哋就睇到五十宗嘅交通意外。審計署發覺百分之十三輸入有關嘅因素係唔準確，嗰五十宗都冇一個上級嚟到去檢查、複查有關記錄，所以需要喺呢方面加強管理嘅。」

似乎就喺呢兩方面，即係話地點同埋引致意外嘅原因，似乎係不準確。以我所理解，呢一份報告就係2013年時候做。首先問一個比較概括嘅問題，你知唔知道喺報告裏面指出有關於交通意外資料嗰個不準確性？

白令嘉先生：（經傳譯員）當報告寫嘅時候，我係知道。由嗰陣時開始，我就喺其他嘅總區工作，所以就冇再跟進究竟採取咗咩嘢嘅續後措施。喺當時做呢份報告嘅時候，以我所知，嗰個主要嘅問題就係來自位置，即係警察話意外發生嘅位置同喺呢個交通資訊系統裏面記錄低嘅交通意外位置有差異。而我記得警方相信呢一個問題嘅原因，就係交通資訊系統使用嘅地圖系統就係採納番路政署使用嗰個嘅系統，使用就係一啲嘅格網座標。呢個未必一定同警方對於位置嘅描述係一致嘅。

黃女士：（經傳譯員）白令嘉先生，其實呢個問題喺報告裏面都有指出。我想請你睇一睇喺報告裏面所講嘅係乜嘢，就係呢一個嘅544頁嘅5.5段開始。544頁，5.5段。呢度就話「格網座標不準確會對運輸署所制定嘅交通意外黑點準確度有一個不良嘅影響，就係有兩個原因，因為就係話如果同一個格網座標用喺唔同嘅交通意外位置嘅話，就會搞錯咗嗰個黑點嘅位置。同埋就有時可能一啲經

常有交通意外嘅地方可能就會遺漏咗。跟住就話喺2006年嘅覆核裏面，審計署就發現警方就係將一個二十個嘅交通意外嘅地點，就係用同一個座標。警方就係話佢哋因為好多時有啲新路，就未必有咁樣嘅座標。」

跟住第5.8段，545頁，就係「運輸署嘅檢查」。佢就話「為咗減低呢個座標嘅不準確度，運輸署喺2008年開始就因應警方輸入嘅一啲座標，就揀咗幾個去檢查，但係仍然運輸署係搵到警方嘅描述同埋格網座標係有出入嘅。」

所以呢一個5.9段可以睇到「喺呢個2010年4月開會嘅時候，運輸署同警方講話，大約係輸入嘅座標有四成係用意外地點描述有出入。」跟住睇5.10段，審計署就發現到，仍然係有呢個唔準確嘅格網座標，就搵到呢一個七千三百一十四個，即係有兩成六嘅格網座標係唔準確。跟住睇番5.11段，運輸署...

主席：（經傳譯員）呢個其實係可能對我哋嚟講就冇咁有關，即係一啲意外嘅成因。或者可以縮短咁講，有冇任何嘅建議去改善呢個問題？其實真正嘅問題就係話有冇做到，可以先睇一睇個建議，就係呢一個5.14段。

黃女士：（經傳譯員）睇番5.14段，其實就係548頁。呢度就係建議喺呢個交通資訊系統或者交通行動及管理系統裏面，就可以加一個嘅查核，令到調查嘅人員係一發現出現問題嘅時候，就可以即刻知道。跟住5.15段，警方就話同意呢個建議。

想問自從審計署報告2013年之後，有冇任何嘅改善？

白令嘉先生：（經傳譯員）我就想套番落去當時嘅情況回答，我知道2012年嘅時候有呢份審計署報告，之後我係調離開咗交通部，去到2013年先返番去。而且我都唔知道係要問我一啲審計署嘅問題，所以我唔知道要先問一問呢方面嘅資料，先返嚟今日嚟答你。但係以我所記得，2013年嘅時候係有採取一啲措施，就係監察輸入資料。自呢一份報告寫咗之後，交通行動及管理系統其實都已經由另外一個比較新嘅系統，一個個案管理資訊係司取代咗。呢一個較新嘅系統有一啲新嘅設備，等警方可以將唔同嘅資料輸入去嘅，包括埋有關於交通嘅一啲調查。

以我所知道，呢個個案管理資訊系統CMIS，其實就係同運輸署嘅交通資訊系統有聯繫，不過我而家講唔到呢個系統喺咩嘢方面有改善。譬如話係咪喺交通意外地點嘅記錄方面會有任何改善。

主席：（經傳譯員）冇錯，我哋都明白你都有去過唔同嘅部門。我哋之後亦都會聽取運輸署嘅證供，但係而家問你就係話，喺位置嘅錯誤方面，你知唔知道有問題出現？

白令嘉先生：（經傳譯員）我唔知，我唔肯定。

黃女士：（經傳譯員）而家講番第二個範圍，就係意外嘅成因。呢個比較難嘅，因為

呢個就有關於警方輸入有關交通意外成因嘅資料。我哋睇番 5.17，就係 549 頁，「運輸署就使用警方輸入嘅交通意外成因入去佢哋自己嘅交通資訊系統去搵出呢個環境、駕駛者同埋道路使用者佢哋嗰個嘅問題，同埋嘗試去搵出呢一個嘅改善建議。1998 年做咗一個覆核，當時審計署就發現到其實有個錯誤率，就係呢一個 25%，但係喺 06 年再做一次覆核嘅時候，就係 13%。」

我哋睇番 5.20 段，就發現係五十宗嘅個案都係有問題嘅，牽涉就係二百八十宗嘅意外。審計署發現到就係呢個 13%，即係三十七宗，即係全部三十四宗，呢個三十七宗裏面就係唔準確嘅。佢哋就發現到其中兩宗嘅意外，就發現當時警方就係話有呢一個機件故障，但係事實上唔係。

首先你知唔知道有個咁樣嘅問題，即係呢一方面有關於交通意外嗰個資料輸入係出現咗問題，你知唔知？

白令嘉先生：（經傳譯員）唔知，我唔知道資料輸入有關於交通意外成因有咁大嘅問題。

主席：（經傳譯員）其實我哋就想搵出究竟點解會出現咗咁嘅問題，譬如話發生意外之後，牽涉嘅人士就可能同警方講話「我嗰個制動系統就係壞咗」，會唔會警方就因此寫咗落去，就係話呢個係成因。但係之後驗過架車，就發現其實嗰個煞車系統係冇問題，所以就出現咗係有咁嘅問題。

白令嘉先生：（經傳譯員）呢個其實應該改番嘅。

主席：（經傳譯員）係，但係冇改到，就留番喺個系統入面，呢個資料。

白令嘉先生：（經傳譯員）有咁嘅可能。

黃女士：（經傳譯員）當時審計署作出一系列建議，喺 551 頁嘅 5.22 段可以搵到。簡單嚟講係要求警方加強管理嘅控制，提醒監察人員要小心檢查個案記錄裏面同輸入嘅資料係咪一致，亦都需要作出有關嘅檢查，作覆核。以你所知，有冇做到--即係話呢啲嘅建議係咪真係有執行？

白令嘉先生：（經傳譯員）係有執行到建議。

黃女士：（經傳譯員）以你所知，你知唔知道有冇任何輸入資料錯誤，即係到目前為止仲有冇呢一啲關於意外成因嘅資料錯誤輸入？

白令嘉先生：（經傳譯員）以我所知，資料輸入係儘量準確。

主席：（經傳譯員）其實你都係一般嚟講，而唔可以話答「有」、「冇」。一般嚟講，你係咪滿意而家嘅做法，嗰個嘅系統都係反映到實際嘅情況？

白令嘉先生：（經傳譯員）係。

黃女士：（經傳譯員）唔該。請你睇另外一份文件，我哋咁樣做，白先生同埋陳女士

（邱女士？）就係要搵出交通意外資料嗰個準確性。因為呢方面嘅資料對於運輸署做交通安全政策或者改善措施係好重要，所以資料準確性係重要嘅。我哋聽到其中一個專家嘅講法，就佢上個禮拜作證嘅，佢就話我哋需要有啲程序，即係話香港係咪要做一個影響評估。我哋睇番譬如話幾多受害人，亦都睇番個安全個措施，睇番我哋本區裏面受傷嘅人帶嚟嘅費用成本，所以你覺唔覺得呢個係一個比較合理處理安全嘅一個角度？同埋你睇下香港係咪應該制定有關嘅數據？

主席：（經傳譯員）呢個所謂嘅利益成本嘅分析，無論你用咩嘢方法，譬如話你可能想响車輛度裝一啲安全嘅設施，呢個咁樣嘅做法，呢個咁嘅分析帶來新嘅措施，就係响澳洲有做嘅。當然需要嘅數據係要準確，我哋特別想睇嘅，就係專營巴士係咪要裝安全帶，呢個問題我哋會事後再探討嘅。

黃女士：（經傳譯員）Yes.

主席：（經傳譯員）黃小姐，我諗我想睇一睇嗰個意外成因嘅一個標準一覽表，或者某個階段，或者你可以詳細講一講，我哋再睇一睇裏面嘅內容。

黃女士：（經傳譯員）係，我可唔可以之後再係處理呢個問題？

主席：（經傳譯員）可以嘅。

黃女士：（經傳譯員）我其實都就嚟想講到安全帶嘅問題，我哋想知一啲統計數字，我想睇一睇運輸署嘅一啲數據，同埋專營巴士佢哋有個管理系統裏面講過啲即係非撞車嘅意外。

主席：（經傳譯員）唔好意思，我再打擾你。呢個我哋响個聽證會，我哋係收集到一啲機密資料，呢啲可能係專營巴士公司同埋運輸署之間嘅一啲溝通。佢哋得到嗰個要求，就係要嗰啲公司研究一啲意外成因。有冇機會睇睇有關嘅資料，或者响我哋嗰個網頁睇番個資料？

白令嘉先生：（經傳譯員）其實我週末有睇過某一部分嘅資料。

主席：（經傳譯員）如果係講緊作為安全帶，巴士成因係咪有好多都係關於失去平衡嘅原因引致？個數字似乎就話受傷個案，巴士或者巴士裏面有 50%，可能有一啲意外嘅數字係除咗失去平衡，係仲有另一組數字。呢啲我哋會之後再睇睇嘅。

黃女士：（經傳譯員）白令嘉先生，頭先我提過有個叫做遠期嘅計劃，即係話巴士公司有個遠期計劃嘅，佢哋會睇睇五年嘅情況，佢哋就會每年睇一睇嗰個意外趨勢數字。呢方面，警方會唔會收到呢個咁嘅遠期嘅計劃，即係運輸署一個遠期計劃嘅文件或者內容？

白令嘉先生：（經傳譯員）我哋未收過，我都唔知道。我諗都冇預期佢哋會畀我哋嘅。

主席：（經傳譯員）我知道--我哋之前得到嘅講法，就係話係一個機密資料嚟嘅，我哋都用咗幾個月，經過一啲困難先攞到嘅。

黃女士：（經傳譯員）我想你睇睇TD-1，180頁，呢個係2018至2022，九巴提交畀運輸署嘅遠期計劃。九巴就做咗一個分析，意外性質嘅分析。佢係講緊2015至16年嘅意外嘅，我哋見到呢個表，8.1，乘客失去平衡係佔咗51.5%；8.2.7就話大部分嘅意外係由於乘客喺巴士上面失去平衡，超過一半嘅個案係由於個巴士响行緊嘅時候就煞車嘅。呢度亦都有講其他意外嘅成因。

呢份報告有唔少嘅統計數字，呢個只係其中一部分。我第一個問題就話，呢啲咁樣嘅資料，可唔可以幫到警方？你哋制定數據分析意外嘅時候，對你哋有冇幫助？佢哋當時有畀呢個文件畀你，即係專營巴士公司畀一份咁嘅報告你，會唔會可以幫到警方執行你哋嘅職務？

白令嘉先生：（經傳譯員）我第一個印象就係呢啲資料，其實响我哋個意外成因裏面包含在內。我冇法子進一步評論，因為我冇時間睇呢份文件。

主席：（經傳譯員）如果你係有咁樣做，你就發覺你哋嘅數據同呢一方面嘅運輸專家所制定或者分析嘅資料都好一致嘅。

白令嘉先生：We would, sir, yes.

黃女士：（經傳譯員）呢度其中一個審計署嘅建議，就係話即係要特別係睇睇輸入數據係咪準確嘅，呢個係用一個要確保--你確唔確保應該有個叫做查核或者雙重查核，同唔同意？

白令嘉先生：（經傳譯員）呢個會有用嘅，我諗呢個對於我哋嘅同事進行審核或者係雙重審核。

黃女士：（經傳譯員）係作為參考？

白令嘉先生：（經傳譯員）係有用嘅，我哋可以對照一下，我哋同事响嗰個調查嘅時候，都好徹底嘅調查搵到嘅資料可以進行一個對照。

黃女士：（經傳譯員）响編製你哋嘅數據，有一個例子，就譬如話乘客失去佔51.5%。我或者想你睇一睇運輸署畀我哋嘅文件，佢係講緊2013年嘅統計數字。2013年5月16號，SEC-2，566頁。呢個文件係由運輸署寫畀立法會，响567頁，(c)呢一段，佢呢度就列出專營巴士嘅意外，就話...

主席：（經傳譯員）未繼續講詳細情況，可唔可以幫助白令嘉先生講講個信件嘅背景？

黃女士：（經傳譯員）呢個係回應審計署嘅，寫信畀番立法會。佢哋當時考慮審計署報告嘅第二張，即係道路安全措施嘅管理系統，就頭先講過係輸入嘅資料唔準確嘅問題。運輸署根據佢哋嘅資料提供咗一啲統計數字。

(a)就話「2016 年响一百二十宗交通死亡意外裏面，有十五宗係屬於公路嘅。」佢就話「唔係好多海外嘅大城市都係會分別為公路交通提供一啲意外嘅統計數字，佢哋只能夠搵到一啲英國嘅主要城市嘅有關數字。」去到(c)嗰段，佢就有一個係摘要，就話「專營巴士嚟講，由於佢哋所載嘅乘客數量好大，同埋係乘客係會企响度，有站立乘客嘅。就會見到，就算冇撞車，好多時候都會令到乘客受傷嘅。因為乘客可以車箱裏面種種原因，譬如話冇緊握扶手，就失去平衡，或者佢上車、落車失去平衡。呢啲係屬於佢哋所叫嘅非撞車型嘅意外。如果係專營巴士，58%係所謂非撞車類別嘅意外嚟嘅。」

呢個同佢哋遠期計劃裏面提供嘅統計數字係咪相符？我哋其實有一份運輸署比較新嘅數字，不過我哋唔需要睇嗰啲嘅暫時。佢而家講緊個百分率係 59%至 65%，即係 2012 至 2017 年涉及專營巴士嘅意外係屬於一啲非撞車嘅意外。

主席：（經傳譯員）你係咪講緊非撞車引致嘅受傷個案？

黃女士：（經傳譯員）係。我哋個參考編號就 TD-1，111 頁，第 5 段。我想問下响你制定你哋嘅數據，你會唔會分開乘客坐低受傷，定係乘客係企位，即係站立响巴士裏面？

白令嘉先生：（經傳譯員）照我記得，我哋冇咁樣分開嘅，即係話嗰個受害嘅乘客係企响度定坐响度。

主席：（經傳譯員）因為你哋嘅工作方法，就住整體嚟講，你哋標準嘅範本就唔係設計作為分開有咩嘢特別情況，即係嗰個標準範本文件係乜嘢車都啱用嘅？

白令嘉先生：（經傳譯員）係嘅，係嘅。

主席：（經傳譯員）我哋睇睇呢個文件係有用嘅，因為會等我哋知道警方係點樣睇嗰個意外同埋受傷嘅成因，點樣進行一個歸類嘅。

黃女士：（經傳譯員）或者我哋睇睇你嗰份標準嘅範本文件，或者先確立某啲事實先。

主席：（經傳譯員）首先總警司，你可唔可以同我哋講講呢份文件係點嚟，係咩嘢嚟？

白令嘉先生：（經傳譯員）呢度即係話係由於司機引致嘅交通意外成因嘅一覽表，响嗰個左邊有個編號嘅，呢度係畀我哋嘅同事可以輸入去個電腦系統嘅，即係話呢個意外係咩嘢成因。

黃女士：（經傳譯員）呢度有兩個表格--唔好意思，其實有兩格，第一格似乎底嗰格就係一個摘要，就係唔同嘅來自司機嘅成因，一啲大嘅意外。底部嗰一大個表格，就係將一啲主要嘅成因列咗出嚟，就係由多一路係少咁樣列出。

白令嘉先生：（經傳譯員）唔好意思，我冇諗過你會問呢啲問題，冇準備。

主席：（經傳譯員）或者我哋逐步問，頂部嗰個清單好清楚顯示咗，就係話一個係全部都適用嘅。不過呢啲全部都係因為司機而引致嘅意外，總共有六十二種，係嘛？即係唔好講右手邊做咩嘢，唔好理佢，淨係講番可能引致意外嘅原因，係嘛？

白令嘉先生：（經傳譯員）係。

黃女士：（經傳譯員）睇番下面個表格，就係司機引致嘅意外原因。第一就係唔專心駕駛，就有一百八十九宗。講緊嘅係 2018 年首八個月，係嘛？呢個編碼係 56 號。

白令嘉先生：（經傳譯員）係。

黃女士：（經傳譯員）跟住一路落去，下一個就係 60 號，冇確保乘客安全，可以見到就係九十七宗，係 2018 年首八個月嘅數字。

白令嘉先生：（經傳譯員）係。

黃女士：（經傳譯員）第三個主要成因，就係與前車距離太近。

白令嘉先生：（經傳譯員）係。

黃女士：（經傳譯員）第四個就係不小心轉線。

白令嘉先生：（經傳譯員）係。

黃女士：（經傳譯員）第五個要係為免碰撞，同埋突然間扭軚或者停。

白令嘉先生：（經傳譯員）係。

黃女士：（經傳譯員）跟住嗰個就係不適當或者非法轉彎。

白令嘉先生：（經傳譯員）冇錯。

黃女士：（經傳譯員）我哋可以見到總共係有--我冇計過，不過大約有十零個成因係抽咗出嚟。

白令嘉先生：（經傳譯員）係。

黃女士：（經傳譯員）呢個表冇搵出引致乘客受傷--譬如話失去平衡，我哋可以喺邊度搵到呢類嘅資料？因為呢個表冇呢類資料。

白令嘉先生：（經傳譯員）冇錯。我哋做統計只係會將傷勢分類，唔會再進一步分類。我哋就係要睇番嗰個案件報告先至知嘅。

主席：（經傳譯員）你哋個分類關於受傷，就係話死亡、嚴重同埋係輕傷。而喺 2017 年嗰個嘅交通報告釋義嗰度，就係有解釋到呢啲嘅名詞點解。其實以我睇，即係話輕傷、嚴重受傷，其實都係你哋自己定嘅啫，因為你都係要區分究

竟咩嘢係嚴重，乜嘢係輕傷，冇話一個好特別嘅界定方法。

白令嘉先生：Yes.

主席：（經傳譯員）因為譬如話留院十二個鐘、十五個鐘、三日，你都分得到㗎喇？

白令嘉先生：（經傳譯員）冇錯嘅。

黃女士：（經傳譯員）你講過就係話有三類嘅傷勢，有冇再分你係關於專營巴士？

白令嘉先生：（經傳譯員）我唔知道有啲咁嘅範本。

黃女士：（經傳譯員）有關於喺巴士上面，乘客失去平衡，你點計番嗰個數字出嚟？

白令嘉先生：（經傳譯員）我要再搵一搵，我而家手頭冇呢啲資料。

主席：（經傳譯員）呢啲其實係根本唔關你哋事嘅資料嚟？

白令嘉先生：（經傳譯員）冇錯。

主席：（經傳譯員）教授。

羅先生：（經傳譯員）係由到場嘅警員定係之後嘅人士先至去決定究竟因咩嘢原因發生意外？

白令嘉先生：（經傳譯員）就係調查意外嘅警務人員，佢會去到現場睇番，跟住返去就會將嗰個成因係輸入番電腦入面。呢啲嘅資料就會由交通部嘅交通安住小組負責。

羅先生：（經傳譯員）即係話有唔同嘅人士，譬如話有呢個巴士公司，佢就可能調查過，佢哋嘅資料會唔會返番去你度，譬如話乘客失去平衡？

白令嘉先生：（經傳譯員）唔會，淨係我哋嘅警方調查。

羅先生：（經傳譯員）運輸署呢？邊個係最後保留話呢個先至係正式嘅成因，係你哋定運輸署，定係咩嘢人？

白令嘉先生：（經傳譯員）警方輸入嘅資料都係基於我哋做嘅調查，跟住就會輸入電腦，跟住交畀運輸署佢哋去分析。

羅先生：（經傳譯員）即係話呢啲資料就唔會由運輸署再返番去你度嘅？

白令嘉先生：（經傳譯員）我哋可以入去運輸署嘅資料。

主席：（經傳譯員）但係運輸署就會用你哋嘅資料，但係你哋就冇專營巴士公司意外成因呢方面嘅資料，你冇㗎？

白令嘉先生：（經傳譯員）冇錯。

羅先生：（經傳譯員）即係話其實喺巴士公司、警方同埋運輸署保存嘅資料可能有出入？

白令嘉先生：（經傳譯員）有咁嘅可能，不過我就想講，我哋係會睇番自己嘅評估去決定究竟個成因係乜嘢。因為意外係由警務人員調查過，亦都係會見過一啲嘅傷者。但係關於專營巴士公司方面，我唔知道佢哋點做。

主席：（經傳譯員）運輸署就喺呢個三角嘅頂部，佢哋會透過遠期計劃--我哋而家知道呢個遠期計劃係乜嘢，同埋係從你嗰度會取得資料，即係話佢哋會有兩個源頭，但係你哋只係得一個資料來源？

白令嘉先生：（經傳譯員）冇錯。

黃女士：（經傳譯員）如果運輸署發現有錯誤、有出入，即係警方輸入嘅資料，對番專營巴士公司發現警方輸入嘅資料有錯誤嘅話，你知唔知佢哋會點做，會唔會先問下你哋先？

白令嘉先生：（經傳譯員）我知道運輸署如果佢哋覺得資料有出入的話，會同我哋講一講。我唔知所有嘅情況會點，即係因乜嘢嘅原因，佢哋會認為有出入。

主席：（經傳譯員）你可唔可以畀個例子去顯示嗰個程序究竟係點？

白令嘉先生：（經傳譯員）定期，我哋交通安全小組有時會收到運輸署交嚟嘅個案，要求我哋覆核番提供咗嘅資料，但係就唔知道佢哋基於乜嘢嚟就話有出入嘅，係咪因為巴士公司畀嘅資料或者咩嘢嘅原因。

主席：（經傳譯員）喺你哋覆核提供嘅資料裏面，你哋會採取咩嘢步驟？

白令嘉先生：（經傳譯員）我哋會聯絡番處理呢一次調查嘅總區，咁去再 check 番一次佢哋輸入電腦嘅資料係咪準確，即係話係咪同佢哋呢個調查檔案裏面所寫嘅資料係一致。

主席：（經傳譯員）調查意外嘅時候，喺邊一個階段會將呢啲編碼輸入去電腦入面，係邊個階段？

白令嘉先生：（經傳譯員）係好早期，意外發生之後幾個鐘頭就輸入。

主席：（經傳譯員）喺覆核嘅過程中，應該都會係較後嘅時間。當時會有啲乜嘢嘅材料畀你哋去睇番，去確認最初初個評估係咪準確？

白令嘉先生：（經傳譯員）初步評估其實就係警務人員返番寫字樓之後就會做，之後有可能會作進一步調查發現到可能係需要更新，譬如話可能驗咗車之後，就發現原來煞車系統係正常嘅，唔係好似司機所講係壞咗。所以我哋需要時間，就係再向證人嗰方面搵出資料，同埋分析一啲事實，先至可以係作出呢個決定嘅。

黃女士：（經傳譯員）即係負責調查嘅人員負責輸入資料，係嘛？

白令嘉先生：（經傳譯員）冇錯。

黃女士：（經傳譯員）邊個會複查？

白令嘉先生：（經傳譯員）通常係警長，仲有好多唔同程度，唔同層次嘅監察嘅。

黃女士：（經傳譯員）即係負責嗰一個分區嘅警長？

白令嘉先生：（經傳譯員）係，其實就係嗰個調查人員嘅上司。

黃女士：（經傳譯員）而家講安全帶，我哋頭先講咁多統計數字係因為同安全帶係有關嘅。我哋其中一個聆訊裏面聽到嘅資料，就係企喺度嘅人係戴唔到安全帶，...

主席：（經傳譯員）唔好意思，我再打扠。冇用安全帶係會唔會出現喺你哋嗰個司機引致意外嘅範本裏面？

白令嘉先生：（經傳譯員）呢個唔係意外引致嘅成因。

主席：（經傳譯員）但係會引致受傷。

白令嘉先生：（經傳譯員）冇錯，我要再進一步睇番先至可以回答你問題。

主席：（經傳譯員）呢個範本只係限於因為司機引致嘅意外原因，唔係話之後嘅後果？

白令嘉先生：（經傳譯員）冇錯。

黃女士：（經傳譯員）呢個司機引致嘅原因，呢啲嘅因素係佢哋對上一次更新係幾時？

白令嘉先生：（經傳譯員）唔知。

黃女士：（經傳譯員）可唔可以搵下，跟住適當時候畀番資料我哋？你哋部門會唔會考慮搜集資料有關於一啲嘅交通意外之後發生嘅事，即係有關於唔同嘅傷勢？

主席：（經傳譯員）你其實想要警司做乜嘢？

黃女士：（經傳譯員）譬如例如好似話乘客失去平衡，好似專營巴士公司做嘅統計，或者將呢度嘅清單擴大，即係搵出就係話邊一個原因引致乘客失去平衡，同埋搵番嗰個比例。

白令嘉先生：（經傳譯員）我都要時間先至可以搵出究竟點樣去調查，因為呢個係牽涉進一步嘅資料。唔好意思，我而家冇呢啲資料，係冇帶嚟。

黃女士：（經傳譯員）或者我講番安全帶，因為係同安全帶有關。因為我哋發現到，

咁係呢個非撞車嘅意外裏面，59%至到 65%都係乘客失去平衡...

主席：（經傳譯員）未問呢個之前，我就想問一個一般嘅問題。作為一個調查嘅工具，即係有關於巴士上面嘅巴士意外，呢個比較窄嘅範圍。乘客因為失去平衡受傷，你哋其實知唔知道--即係睇下你知唔知道，警方會唔會睇番黑盒去調查，搵下譬如司機係咪突然耷車，突然加速、減速咁？

白令嘉先生：（經傳譯員）我哋亦都可以睇到任何證物或者係調查任何證物嘅，譬如話如果係調查嗰啲可拘捕罪行、危險駕駛、不小心駕駛等等，我哋都可以接觸到啲證物嘅。

主席：（經傳譯員）我明白呢個係一個比較普遍嘅問題，我其實問題實際上警方真係會睇番頭先我講嗰啲設備？當然有人死亡嘅個案，肯定你係會睇。如果佢話有個女乘客失去平衡，就跌斷咗條腳，你會唔會睇嗰個黑盒？

白令嘉先生：（經傳譯員）一般嚟講可能會，不過我要先問一問我啲同事。

黃女士：（經傳譯員）我跟進呢個問題，係咪有個一般嘅標準做法，喺調查交通意外嘅時候係一個恆常嘅做法，你要搵嗰個黑盒，或者佢哋遙距記錄嘅系統，即係你會同嗰個專營巴士公司攞番呢樣嘢嚟睇，係咪一般嘅做法？

白令嘉先生：（經傳譯員）我就唔知呢個係咪一個常規嘅做法，我需要先問一問我同事先知道究竟有幾常用呢個方法。

黃女士：（經傳譯員）呢方面，如果閉路電視有錄影，巴士上面如果有閉路電視有影到嘢，會唔會睇？

白令嘉先生：（經傳譯員）呢個似乎就唔係我呢個層面，就曾經工作上接觸過，我要問一問同事。

黃女士：（經傳譯員）我想請你睇一睇一個工作小組，即係關於安全帶嘅，工作小組嘅工作。先睇睇個有關文件，呢個工作小組就關於專營巴士增強安全嘅一個工作小組，呢個係 2018 年 2 月大埔巴士意外之後成立嘅。呢個係 TD，即係運輸署，TD-1，94 頁。

先講講個背景，呢個係因為 2018 年 2 月大埔巴士意外，然後成立嘅工作小組。所以五間專營公司都有代表响度嘅，亦都有包括製造商同埋運輸署嘅代表。响 2018 年 3 月中，就要睇睇究竟係咪適合或者採用啲新科技，安裝一啲新嘅安全設施嚟到去保障巴士公司。

你係咪知道呢一個咁嘅工作小組？

白令嘉先生：（經傳譯員）唔知嘅。

黃女士：（經傳譯員）警方方面，你就唔知道有咁嘅工作小組。警方裏面有冇人知，你知唔知有冇邊個人負責...

主席：（經傳譯員）或者我可以幫幫總警司，你可唔可以描述一下呢個工作小組係有啲乜嘢人參與，有邊方面參與？或者睇睇有關嘅文件。

黃女士：（經傳譯員）總警司，請你睇第4段，嗰個備註1所涉及嘅各方面，就係話專營巴士公司，即係話九巴、龍運巴士、城巴、新世界第一巴士同埋新大嶼山巴士。去番第4...

主席：（經傳譯員）或者呢度睇睇嗰頁嘅最頂嗰度，「運輸署成立咗一個工作小組，所以專營巴士」--"FB"即係專營巴士，呢度用咗個簡寫。跟住嗰裏面就有個備註1，同埋巴士嘅製造商，成立嘅日期就係2018年3月中，其實係3月13號嚟到係複檢究竟係咪適合，或者技術上係咪可行，或者採用啲新嘅科技嚟到增加對巴士乘客嘅保障。

黃女士：（經傳譯員）警方就冇代表喺呢個工作小組，冇代表參與。呢方面我想問一問你，其實我想問下關於安裝安全帶嘅事，請你發表一個意見嘅。喺呢份文件第5段，呢度有提過一件事，就係話安裝安全帶，呢個係工作小組嘅。

主席：（經傳譯員）或者可唔可以讀晒成段，畀總警司知道個背景？

黃女士：（經傳譯員）好，我哋讀番第5段。

「由於2006年7月，九巴就同另一架車撞車嘅意外，引致上層巴士乘客就係被拋出咗架車。2007年12月有另一個類似嘅意外，城巴就同新巴嘅巴士喺將軍澳相撞，有三個車上嘅乘客被拋出，即係話城巴嘅三個乘客就係拋出巴士之外嘅。運輸署就建議同埋個巴士公司同意，就話上層最前嗰四個座位就要再裝番安全帶，所有1997年之後攞到牌照嘅巴士都要有呢個安全帶，嚟到防止上層嘅巴士被拋出車外。同埋所有嗰啲即係冇保護、暴露嘅座位都要有安全帶嘅。呢個工作小組就係研究究竟係咪所有專營巴士嘅所有座位都要安裝安全帶。」

我想睇睇關於呢個工作小組嘅會議記錄嘅某幾段，呢度佢哋亦都有唔同嘅工作小組之下，仲有啲分組嘅，我想你睇一睇。

主席：（經傳譯員）未繼續之前，總警司或者你嘅同事，你哋有冇人知道，其實我哋講緊2008年，有因為2006、2007年呢兩宗巴士意外，佢就裝咗--嗰啲容易暴露，冇安全嘅座位，即係話就响前面嘅座位安裝安全帶，同埋有一個好似護欄嘅一個橫柵嘅，冇遮擋嘅座椅就安裝咗--上層冇遮擋嘅座椅安裝安全帶。當時佢哋制定呢啲咁樣嘅措施，有冇諮詢過警方？可能冇，你唔知，不過如果知嘅，請你將你嘅經驗同我哋分享。

白令嘉先生：（經傳譯員）我唔知道有件咁嘅事。

主席：（經傳譯員）你嘅同事？總警司，你可唔可以問一問，究竟當時有冇問過警方嘅意見？呢個係立法會研究過嘅一個課題嚟嘅。我哋預期由於呢件事嘅性質，同埋警方應該會有個參與，可能都會唔會問過警方嘅意見？應該係會問，係咪

呀？

你有冇其他嗰啲參考嘅文件編號嚟到幫警方？

黃女士：（經傳譯員）首先我哋睇睇嗰個工作小組佢哋最後得到嘅成果，然之後我哋之後睇番嗰個會議記錄。請你睇403至到427頁，呢個運輸署喺2018年7月交畀立法會，為佢哋7月25號進行討論提供嘅文件，呢個就一個摘要列出工作小組嘅建議。大家可以睇407頁底嗰度...

主席：（經傳譯員）或者令到總警司知道嗰個背景，我先睇第1頁。呢個文件係由運輸署、運房局提供嘅文件，係方便佢哋喺今年7月25號立法會運輸事務委員會進行討論嘅呢份文件嚟嘅。

黃女士：（經傳譯員）睇番407頁個底嗰度，呢度有啲建議，佢就列出...

主席：（經傳譯員）或者我哋先睇403頁，嗰度有啲背景嘅。

黃女士：（經傳譯員）Yes.

主席：（經傳譯員）或者請你睇第2段出嚟。

黃女士：（經傳譯員）係，白先生，第2段係咁講嘅，「由於喺2018年2月10號大埔道，九巴發生過致命意外嘅。運輸署就喺2018年3月中成立一個促進專營巴士安全嘅工作小組，成員來自所有專營巴士營運公司，同埋主要嘅巴士嘅製造商，嚟到考慮有冇可能採取進一步嘅措施嚟到增加巴士安全嘅。工作小組嘅工作範圍包括以下範圍：一，探討技術上是否可行，係咪可以適合，同埋是否合符成本利益嚟到係喺巴士上安裝一啲車內嘅安全設施，或者係採納啲科技，同埋為所有嘅座位提供安全帶是否可行，同埋訓練方面係點進行檢討。」

佢就話「當時工作小組自從2018年3月係舉行咗三次--技術組亦都有五次會議。有關嘅結論同埋建議就係喺下面嗰幾段列出嚟。嗰個車內安全設施或者採納科技就喺第4段，去建議採納或者安裝某啲設備。」跟住請你睇407，呢個係特別講到乘客座位安裝安全帶。第10段就係列出佢哋當時嘅睇法，即係話所有冇遮擋嘅巴士座位都應該係安裝安全帶，防止佢哋跌出座位嘅。

佢就話「所以新巴士，只要係新巴士都可以安全啲符合國際標準嘅安全帶。所有專營巴士營運商都同意自從2018年7月開始，佢哋所訂購嘅新巴士都會安裝乘客嘅安全帶嘅。」第12段，呢個係講緊喺一啲冇安全帶嘅巴士度，就安裝番巴士嘅安全帶。第六行，睇一睇番實際上，裝番安全帶，特別係嗰啲下座，就會係需要喺巴士嘅底架就進行一啲改動，或者增強，亦都需要將佢嘅結構係加強，嚟到加一啲支架或者係要換晒所有座位，先至可以符合國際標準，關於嗰啲係巴士安全帶嘅拉力等安全保障。

所以營連商覺得技術上唔係好實際，就算唔係話完全做唔到都係唔係好實際嚟到將所有上層同下層嘅座位重新裝番安全帶嘅。第13段，「但係如果就係所

有上層，喺某一啲嘅汽車種類裏面都會加裝安全帶嘅話，就會更加可行。」喺 14 段繼續講，「工作小組就係考慮到時間同埋人手都好重要，巴士製造商就係冇呢個所需嘅設備同埋人手去加裝。」再睇番下面有一啲嘅巴士營運者表示關注，就係話加裝安全帶唔單只會引致大量嘅成本增加，同埋需要時間、人手，亦都需要去再買更多嘅巴士，同埋將佢調配，先至可以維持到現有嘅服務水平。跟住第 16 段「建議係小組嘅」...

主席：（經傳譯員）未講之前，可唔可以講呢啲覆核有冇係就於外國嘅做法睇過？

黃女士：（經傳譯員）我哋睇番 15 段，「工作小組就話佢哋有睇過外國嘅做法，即係有關於喺巴士上面要求安裝同埋要求乘客配戴安全帶。喺一啲城製同埋跨境嘅服務裏面，有啲地方譬如英國、美國同埋荷蘭，就係所有嘅乘客位都一定要提供安全帶。但係一啲其他即係英國、荷蘭同埋澳洲嘅維多利亞，就話一定要配戴安全帶。但係喺城市裏面嘅一啲嘅巴士，就係容許企位。

所以工作小組就係覆核過有關於要求乘客一定要配戴安全帶。睇番呢一啲外國地方嗰個運輸當局，其實呢啲城市嘅巴士路線都係比較短，路程同埋時間都係比較短嘅。」跟住睇番...

主席：（經傳譯員）係 415 頁，附件 B，你可以見到唔同嘅國家，冇一個國家要求城市內嘅巴士或者容許企位嘅巴士種類係要求乘客配戴安全帶嘅。

黃女士：（經傳譯員）未講建議之前，我就想睇番覆核外國做法，佢哋嘅結論就係話如果可以乘客企的話，硬性規定配戴安全帶係冇用嘅。因為突然煞車、停車，就會引致企喺度嘅乘客受傷。而且一啲市內巴士，一般嚟講路程都係比較短，車速可以接受，所以就唔及跨境、高速公路咁危險。因為跨境同埋高速公路就可能揸車速度會超過每小時 75 公里。

所以想請你講一下，市內巴士用安全帶有冇用？

主席：（經傳譯員）或者未叫佢答一個咁一般嘅問題之前，就想講下第三個成因，係第 15 段有提到嘅，就係話即係唔似人哋預期話市內巴士車速比較慢，而且距離時間都比較短，呢個都係有關。因為即係乘客上咗車仲要戴安全帶，喺咁短嘅路程，係咪真係有咁樣嘅價值？係咪真係值得做？你有冇任何意見？

白令嘉先生：（經傳譯員）有嘅。從警方同埋交通安全角度嚟講，警方相信安全帶可以救到你一命。睇番運輸署嘅網頁，就話配戴安全帶可以減低死亡或者嚴重受傷機會一半。安全帶減低--即係喺車速比較慢嘅情況之下，發生意外都好有效嘅。

如果喺道路安全角度嚟睇，我哋會鼓勵儘量使用安全帶。我哋亦都想講小巴都有安全帶。

主席：（經傳譯員）我哋聽咗證供，就係話其實小巴係同專營巴士係唔同類型。一般嚟講，即係如果想快啲去到終點嘅，就會係坐小巴嘅。冇乜所謂嘅，想到站嘅

時候都仲生存嘅，就會搭專營巴士嘅。你知唔知道因為乜嘢原因，所以硬性要求小巴要戴安全帶？

白令嘉先生：（經傳譯員）唔知。

黃女士：（經傳譯員）我未講另外一樣嘢之前，即係有關於呢一個小巴嘅情況，其實喺文件裏面，審計署都有講過小巴乘客戴安全帶嘅事。

主席：（經傳譯員）未講之前，頭先你就係話全世界都承認安全帶可以拯救生命。但係喺附件 B 裏面，英國、澳洲、加拿大、新加坡、荷蘭，佢哋好似仲安全，但係都唔認為市內巴士係需要加裝安全帶。

喺咁嘅背景底下，對於專營巴士強制要提供安全帶，如果真係強制要加裝安全帶，對於話強制乘客配戴安全帶，同埋一個執法方面，你有冇任何嘅意見？

白令嘉先生：（經傳譯員）我覺得乘客應該係要有選擇，當然呢個選擇都係要確保乘客係儘量安全。如果冇加裝安全帶，當然就連選擇都冇。有關於執法方面，個人經驗嚟睇，大部分人都唔會戴安全帶，即係佢哋坐小巴嘅時候。可以預計專營巴士情況都會係一樣，即係都係原因一樣，因為唔方便，同埋車程比較短。

所以執法係一個問題，我認為警方係好難定期可以真係有效率咁執到法，目前冇咁樣嘅要求嘅，對於專營巴士。

主席：（經傳譯員）但係小巴有。

白令嘉先生：（經傳譯員）係，小巴有。

主席：（經傳譯員）但係對於小巴執法方面，容唔容易？

白令嘉先生：（經傳譯員）都難㗎，其實係久唔久先會執法，而唔係定期，係要當警務人員覺得要因為交通安全執法嘅時候，先至會執法。其實對於交通安全有幾個方面嘅，宣傳同埋不時執法。

主席：（經傳譯員）係，你係咪繼續？

白令嘉先生：（經傳譯員）我想補充，我希望公眾人士唔會因為怕犯法先至遵守法律。

主席：（經傳譯員）其實都要好長嘅時間先說服到乘客喺私家車上面配戴安全帶。

白令嘉先生：（經傳譯員）係，正如我之前所講，以我哋嘅角度嚟睇，其實乘客有選擇，等佢哋改善交通安全係好重要嘅，呢個係一個個人選擇嚟。

歐陽先生：（經傳譯員）我想好快問一問，有關於安全帶。即係有關於小巴嘅情況，你覺得專營巴士上面執法會幾成功？

白令嘉先生：（經傳譯員）我冇有關嘅資料，不過我希望公眾人士係知道係對佢哋有

利，所以守法，而唔係話因為怕畀人告，所以守法。

主席：（經傳譯員）但係正如你先前所講，好多人小巴上面都唔戴安全帶而執法係困難嘅。我哋都明白嘅，你係咪認為巴士都會有咁嘅情況？

白令嘉先生：（經傳譯員）係。

黃女士：（經傳譯員）我想先講一講再小休，一般嚟講，你都有提過安全帶係可以保命。我就想講番有關於呢個成本效益分析方面，警方有冇做過任何實證嘅分析，就係話城市內巴士有企位嗰個嘅準確性？

主席：（經傳譯員）我唔明你問咩嘢。

黃女士：（經傳譯員）有冇做過分析，就係話巴士有企位，乘客係咪因為冇安全帶而受傷，你有冇做過任何分析比較即係嗰五十幾個百分點，乘客因為失去平衡而受傷，係咪因為冇安全帶？

主席：（經傳譯員）企喺度嘅人係戴唔到安全帶，因為都冇提供。

黃女士：（經傳譯員）係呀，喺呢方面，你有冇任何統計數字？

白令嘉先生：（經傳譯員）冇。

黃女士：（經傳譯員）我而家都知道咩嘢時間。

主席：（經傳譯員）其實真正嘅問題，一個比較有用嘅問題，你有冇任何統計數字，就係巴士坐位嘅乘客冇戴安全帶因而受傷有冇統計？因為根據巴士公司所講，就話嗰個數字係非常之低，得1%或者2%，你有冇咁樣嘅資料？

白令嘉先生：（經傳譯員）我唔知有咁樣嘅統計，不過我可以再搵下。

主席：（經傳譯員）但係好明顯，如果係坐喺一啲冇遮擋嘅位，被拋出車外，跟住就撞到硬物，就引致死亡或者嚴重受傷，呢個其實亦都可以喺你哋嘅範本裏面，就話有安全帶對佢哋有利但係冇戴到，你哋有冇考慮過，從呢個方面去分析？

白令嘉先生：（經傳譯員）我哋會咁做。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）唔該晒，白令嘉先生。

我而家想睇一睇建議，喺第16段，即係運輸署嘅文件409頁。工作小組得出以下嘅建議，(a)就係所有新買嘅巴士所有座位都要提供安全帶；(b)取決於一啲技術、運作，同埋財務可行性嘅評估，就係話上層座位某啲特定嘅路線，即係一啲長途嘅路線係要行高速公路比較少巴士站，就一定要有。

但係運輸署就要求巴士營運商就喺呢一方面同巴士製造商再進一步研究一下係咪技術上可行，即係所有新嘅巴士就會有安全帶。但係現有巴士只會係喺考

慮過財務可行性之後先至會加裝，而且只係喺某一啲嘅座位上層，某啲路線，譬如長途路線比較少啲巴士站嘅，或者會駛經高速公路嘅，先至會加裝安全帶。對於呢一個建議，你有冇任何意見？

白令嘉先生：（經傳譯員）呢個建議係正面嘅，我正所講從安全角度睇，我哋希望儘量廣泛就使用安全帶。呢個建議係一個正確方向行嘅一步。

主席：（經傳譯員）黃小姐，呢個時候方唔方便？

黃女士：Yes. Thank you.

主席：（經傳譯員）我哋今日朝頭早而家小休二十分鐘，二十分鐘後我哋重新開會。

上午 11 時 33 分聆訊押後

上午 11 時 53 分恢復聆訊

出席人士如前。

主席：（經傳譯員）黃律師，請繼續。

黃女士：（經傳譯員）講番關於安全帶，想請你睇一睇警方寫畀委員會，日期係 18 年 5 月 7 號嘅嗰封信，喺雜項文件裏面，124-1。我哋睇番就係一橫二嗰頁，頂部，就係第三段嘅屘三，就話「大部分嘅」--124-2 頂部，第三段嘅屘三行，見唔見到？呢度就話「大部分專營巴士冇安全帶，同埋站立乘客亦都可能引致乘客受傷，同埋就係--所以係構成一個要通報嘅議案。」咁想睇番，係你小休之前嗰個嘅答--正如你小休之前所講，安全帶好重要？

白令嘉先生：（經傳譯員）係。

黃女士：（經傳譯員）咁講番另外一個範圍，係非法泊車。我哋聽到有啲專營巴士公司就話，就於非法泊車執法，尤其喺巴士站，執法係冇力嘅，咁我就想請你睇番一位鍾先生，William，佢係新巴嘅，文件頁數係 731 頁，TSCP 呢份文件夾。

主席：（經傳譯員）係邊一日？

黃女士：（經傳譯員）係第四日。

主席： Day 4 in the Augustinian calendar?

黃女士： Yes.

主席：（經傳譯員）咁係邊一個月？

黃女士：（經傳譯員）咁就係呢一個嘅18年5月，係喺TSCP文件夾2A。

主席： Thank you.

黃女士：（經傳譯員）請你睇番頂部，係一位鍾生，William Chung 佢作證嘅部分，搵到未？

白令嘉先生： (Nodded head).

黃女士：（經傳譯員）呢位鍾生就話「喺好多巴士站係有非法泊車，呢啲車係阻住巴士，即係話巴士唔可以泊--行到接近呢一個嘅行人路邊先至可以上落客。」

第十六行，當時呢一個嘅鄧樂勤律師問「係邊方面？」鍾生就話「如果有非法泊車，令到巴士經過嘅時候，嗰個道路嘅係寬度會減少，因為巴士比較龐大，所以就可能會有問題。如果乘客係唔可以喺行人路邊上落嘅話，就會引致到佢哋可能會畀車撞，或者跌倒。」喺執法方面係咪有效，喺二十三行，喺二十三行裏面就講「公司有冇嘗試去解決問題？」鍾生就話「我哋通知運輸署有關於非法泊車黑點，希望喺呢啲路段裏面會有廿四小時嘅禁止區，亦都通知咗警方要佢哋執法。」律師就話「有冇解決問題？」鍾生話「冇乜。」主席亦都講「之後有冇任何行動？」鍾生話「警方會採取行動，咁但係警方一轉背，又出現非法泊車。譬如話喺怡和街，銅鑼灣近住崇光嗰度，呢一個問題成日出現。」

我哋亦都聽到公會講，話用咗好長嘅時間先至可以同警方溝通關於非法泊車嘅問題。所以首先我想問，非法泊車，警方係咪一直知道呢個問題？

主席：（經傳譯員）尤其就係巴士站嘅非法泊車？

黃女士：（經傳譯員）係。

白令嘉先生：（經傳譯員）係，警方係知道有咁嘅問題。喺2017年，我哋總共就進行過四千五百一十次嘅檢控，我哋係告嗰啲喺嗰啲巴士站停車或者泊車嘅人。係，或者可唔可以請你再講講你嘅問題？

主席：（經傳譯員）呢啲係咪定額罰款嘅？

白令嘉先生：（經傳譯員）我哋個呢個所謂編號570嘅罰款行動。

主席：（經傳譯員）幾多錢，罰，320欠，2017年？

白令嘉先生：（經傳譯員）$450。

主席：（經傳譯員）而家$450？

白令嘉先生： Yes.

主席：（經傳譯員）當時呢？

白令嘉先生：（經傳譯員）當時都好似係。所以我哋知道係有咁樣嘅非法泊車嘅問題，同埋咁呢個問題引起嗰啲人要响其他地方非法停車。

主席：（經傳譯員）有冇任何因為增加罰款而加強個檢控？

白令嘉先生：（經傳譯員）個罰款好多年都冇改，咁呢個當然就比起以前嗰個阻嚇性係低咗。

主席：（經傳譯員）警方嘅睇法就話，要追上通脹，320 鈪嘅罰款應該係增加到 800 鈪左右，當時係咁講，我有冇記錯？

白令嘉先生： It is, sir, yes.

主席：（經傳譯員）當時政府所同意就係罰款係 450 鈪？

白令嘉先生：（經傳譯員）係。

主席：（經傳譯員）黃小姐。

黃女士：（經傳譯員）我哋聽到工會嘅人士係投訴，我想你請睇一啲嗰個紀錄嘅摘要，佢哋投訴話警方冇有力咁去執法，針對响巴士公司非法泊車嘅車輛執法，咁呢個係一個持續嘅問題。佢有提過，警方唔夠人手，或者係調派做執法嘅，針對呢啲非法泊車車輛嘅人手係不足。佢哋亦都有講，自從 2017 年，雖然警方嘅數字就顯示佢哋執法係加強咗力度，佢就見唔到一啲顯著嘅改善，關於呢一個即係話未能夠--即係或者執法不力嘅呢個問題，你有咩嘢回應，對於呢啲咁嘅睇法？

白令嘉先生：（經傳譯員）我哋盡力係執法，呢個係我哋會做。採取執法行動，即係响巴士站執法當然係重要，但係未必係等於我哋當時任何一段時間嘅最高優先次序，譬如話公眾可能投訴，好多地方非法泊車，引致阻塞，引起交通嘅問題塞住咗，咁我哋當然係會增加我哋針對非法泊車嘅執法行動，或者係車輛引致阻塞嘅罪行，我記得舊年我哋就增加咗大概係百分之四十，根據我而家記得。咁前線嘅人員收到嗰啲投訴，就大部--有百分之三十係同嗰啲車輛引起阻塞，或者係非法泊車有關嘅，所以我覺得警方係已經盡力嚟到係採取行動，針對引起阻塞或者係非法泊車嘅罪行。或者我想請邱女士都可以補充幾句。

主席：（經傳譯員）係，請你講，邱女士。

邱倩雯女士：除咗喺加強執法方面，咁其實我哋喺嗰個公眾教育嗰度，我哋都做咗啲嘢。喺 2018 年，我哋亦都喺警訊節目嗰度，特別提到就係關於係喺巴士站非法停泊嘅問題，咁希望公眾係有留意到呢個事情。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）唔該晒。我哋見到最近一啲新聞報告，警方今年自從 8 月 1 號進行咗開始咗個六個月嘅執法行動，特別係針對嗰啲交通阻塞嘅黑點，咁呢個亦

都包括响受限制區域嘅上落客、上落貨，咁私家車就係响巴士站或者小巴站或者的士站上落客，或者係非法進入嗰個黃格，或者係唔適當地進行調頭轉彎。咁為咗加強執法，呢五種嘅罪行而家係會涉及罰款係 400 鈆，如果喺禁區上落乘客，就個罰款就係 560 鈆。我想問，關於呢個--呢啲黑點，警察係點樣揀呢啲黑點嘅？

白令嘉先生：（經傳譯員）警方係透過我哋個個案管理系統，係有能力辨識究竟邊笪地方係有引致好多嘅交通方面嘅投訴，咁呢個係一個因素我哋可以睇嘅；另一個因素就係，直接向警署--公眾直接向警署投訴，一係打電話，一係寫信收到嘅投訴。所以响當區，嗰個指揮官係的確係有辦法知道，邊笪地方係擠塞黑點，咁亦都可以同總區嘅管理指揮嘅單位係分享有關資訊。

黃女士：（經傳譯員）咁根據你個講法，呢啲投訴有冇部分係從嗰個工會或者係專營巴士公司度提出？

白令嘉先生：（經傳譯員）我哋有個安排，嚟到同佢哋嗰啲工會同埋專營巴士公司嚟到聯絡，就算唔係全部，都有大部分都係基於--我係講緊係公眾嘅投訴，公眾向警方提出嘅投訴，同埋有部分--再加埋有部分就係巴士公司提出，亦都有啲工會提出嘅投訴。

黃女士：（經傳譯員）你當時講呢個運動，執法行動係會試驗性質，咁跟住之後九龍東、新界北亦都有一個試驗計劃，從舊年 12 月到今年 1 月就進行嘅，咁佢話初步嚟講，似乎就效果你哋滿意嘅，咁有五百四十張嗰啲罰款單係發咗出嚟。一般嚟講，你哋會响邊度裝呢啲咁嘅鏡頭？

白令嘉先生：（經傳譯員）呢個試驗計劃，舊年 12 月、今年 1 月進行嘅，咁我哋就會叫我哋警方嘅同事就用一個手提嘅鏡頭嚟到執法，就唔係固定鏡頭。

主席：（經傳譯員）呢個方法嚟到執法，執行呢個交通法例，係咪貴㗎？係咪好貴，或者人力需要好多？

白令嘉先生：（經傳譯員）我哋希望減少呢方面依賴人力嘅即係情況，响試驗計劃，主要話嗰啲行車，即係車輛嘅罪行，譬如話禁區上落客，一般嚟講，要執法呢一類嘅罪行，要針對呢啲罪行執法，嗰個警務人員係要截停架車，當場截停架車，或者亦都有啲情況個車駛走咗，所以我哋就要根據一個--或者之前要整定一個路障，或者有人係要揸車跟住架車，跟住截停架車，因為有呢樣咁嘅要求，我哋需要多啲人手，做咁樣嘅執法行動係需要更多人手。呢個咁樣嘅試驗計劃就係容許我哋警務人員就用一個錄影嘅設備，另外一方面就去寫低個筆記，佢見到啲咩嘢，嚟到採取執法行動，又唔需要截停架車。咁所以截停車輛嘅人手，即係一係就警務人員，一係就坐電單車截停佢，或者係用路障，就冇再需要做。所以其實我哋想增加嗰個執法行動嘅效率。

主席：（經傳譯員）有冇諗過淨係用鏡頭嚟到錄低，咁就唔需要嗰個人--警方人員嚟到係即係揸電單車追佢，譬如話你可以影到佢嗰個車牌，咁你就請--叫嗰個車

Transcript by Epiq Hong Kong, Limited

主嚟到係--你就搵到個登記車主？

白令嘉先生：（經傳譯員）我哋試驗緊。

主席：（經傳譯員）我意思即係唔需要人做呢樣嘢。

白令嘉先生： I see.

主席：（經傳譯員）唔需要錄影嘅，自動嘅。

白令嘉先生：（經傳譯員）呢個喺我哋長遠啲會再諗。

主席：（經傳譯員）其實倫敦係廣泛使用緊，係咪呀？

白令嘉先生：（經傳譯員）係。

主席：（經傳譯員）其他地方都係喎，新加坡，係咪？

白令嘉先生：（經傳譯員）係。

主席：（經傳譯員）咁點解香港唔用？

白令嘉先生：（經傳譯員）我會話呢個係一個政策問題，而家我哋係處理緊呢個政策問題。

主席：（經傳譯員）關唔關撥款嘅問題？

白令嘉先生：（經傳譯員）我諗同撥款冇關係，呢個係關於個政策嘅支持。

主席：（經傳譯員）可唔可以講番第一個問題？用警察，即係個人，警務人員嚟到係執法，即係違反--即係針對交通事項執法，係咪好貴？係，係，係，需要費用好高？係，即係相對於科技？

白令嘉先生：（經傳譯員）係。

黃女士：（經傳譯員）有冇諗過裝一啲閉路電視，或者一啲鏡頭响嗰個巴士站，或者附近裝鏡頭？

白令嘉先生：（經傳譯員）我想請邱女士答呢個問題。

主席：（經傳譯員）好，總警司，邱女士。

邱倩雯女士：利用 CCTC 喺嗰個巴士站做嗰個執法係有--而家係有一個嘅試驗計劃，但係呢個係政府嘅 Development Bureau，呢個係發展局同埋運房局嘅一個計劃嚟。而家就係由發展局嘅起動九龍東，Energising KE Office，咁樣就啟動一個試驗計劃，proof of concept 嘅 trial，咁樣就係喺九龍東嘅地方，就係會 install 一啲嘅固定嘅攝影機，咁第一個嘅計劃就係影一啲即係行車嘅一啲嘅交通嘅範例；第二個個部分就會係嗰個試驗計劃就會係用喺一啲嘅停車，

即係違例泊車嘅交通違例嗰度，咁呢個計劃而家係進行緊。其實啱啱正正今年嘅 8 月份，就會係出個投標，咁希望喺未來嘅大概二十四個月裏面，會睇下點樣利用呢個科技，可以喺呢個交通執法嗰度代替人手，咁樣當呢個技術係成熟嘅話，呢個就會應用喺運房局嘅策動之下，就會係睇下喺而家警方係點樣可以利用到呢啲試驗計劃嘅成果，而做到代替人手去做呢個交通執法。

主席：（經傳譯員）呢個係成熟嘅技術，亦都廣泛喺大城市應用，冇一啲唔成熟嘅地方㗎。

邱倩雯女士：而家係校緊個電腦，點樣利用一個叫做 video analytic 嘅技術去影一部車，點樣為之停泊喺一個地方，而造成一個係違例停泊嘅即係一個 offence。另外我想補充就係，而家喺違例停泊嗰個法例上面，我哋係必須要係當時當地將嗰個告票交畀司機，或者係擺喺嗰個即係車頭嘅玻璃嗰度。如果係離開咗，即係如果係用一個類似電子告票咁樣，或者係一個閉路電視影到嘅影像，然後發告票，喺現時嘅法例，係唔可以做到。

主席：（經傳譯員）即係唔可以將--用呢一個嘅係相機影咗嗰個車牌，然之後將個告票寄去地址？

邱倩雯女士：如果係違例告票--違例停泊，係唔可以，但係 for 一啲行車嘅交通嘅犯法係可以。

主席：（經傳譯員）咁非法泊車要點，就係擺喺架車嗰度，將個告票？

邱倩雯女士：可以擺喺車頭嗰度，或者係畀司機。

主席：（經傳譯員）咁要改變個囉喎，唔係咩？要追上技術嘅改善吖嘛。

邱倩雯女士：我哋知道運房局已經喺呢個修改法例嗰度，已經開始做緊啲嘢。

主席：（經傳譯員）改例法要刪除係容易好多個喎。黃律師，請繼續。

黃女士：（經傳譯員）呢個概念計劃，可唔可以講係幾時有呢個意念，即係係運房局去發展呢個技術，係幾時嘅事？係發展局。

邱倩雯女士：警方係喺 2017 年嘅 4 月，就由發展局嗰邊起動九龍東嗰個辦公室，就係邀請警察去參與，就畀意見。主要我哋嘅意見就係講畀個承辦商，個合約商知道，點為之犯咗一個交通嘅法例。

黃女士：（經傳譯員）有冇嗰次會面嘅會議紀錄，即係有關於發展呢個計劃，同發展局一齊做？

邱倩雯女士：我哋應該可能會有啲材料，但我要返去睇一睇。

黃女士：（經傳譯員）如果搵到，會唔會樂意提供？

邱倩雯女士：可以。

黃女士：（經傳譯員）有關於呢一點，以我理解，警方一直用自動車牌認證嘅系統，由 2015 年開始已經使用呢個 ANPR 呢個系統？

邱倩雯女士：我唔係好記得個年份，但係我哋而家係有用緊。

黃女士：（經傳譯員）喺立法會文件裏面，最近嘅一份有講，係保安事務委員會，有關於係呢一個 18 年 4 月，有關於呢一個嘅行車罪行執法，咁係保安局、警方同埋運房局，咁就係喺保安事務委員會裏面傾過，有關於行車罪行嘅執法。

主席：（經傳譯員）有冇號碼㗎？

黃女士：（經傳譯員）冇呀，呢個係新加嘅，今朝早加嘅，主席。我哋可以見到喺第二段，「背景」嗰度，「警方係一直有執行佢哋嘅工作，就係確保道路安全，其中一個就係要確保道路安全，同埋減少交通意外，呢個係佢哋嘅行動首先任務嚟㗎，咁佢哋亦都採取多方面嘅工作，去促進交通安全，同埋打擊一啲嘅行車罪行，同埋仲有宣傳、教育，要公眾同埋駕駛者遵守法例。」

跟住第七段，就係有關於係執法，行車罪行嘅執法使用技術，呢度話「目前就係有一百九十五個紅燈嘅攝影機，另外有二十四個快相機，咁就喺一個嘅係一百三十個嘅位置裏面嘅，可以令到警方收集證據，亦知道係邊架嘅汽車涉事，同埋唔需要截停架車，都可以拘控嗰個--都可以就係控告有關嘅人士。咁 2015 年開始已經使用呢一個嘅自動車牌識別系統㗎喇，咁可以幫助到警方執法，包括埋汽車行車證過期，咁同埋係冇駕駛執照情況底下行車等等。」

咁有關呢個自動車牌識別系統，似乎呢個系統係來自倫敦嘅，係嘛？

白令嘉先生：（經傳譯員）或者可以我幫手答。

黃女士： Yes, thank you.

白令嘉先生：（經傳譯員）喺使用自動識別車牌系統方面，係有做過--喺 2013 年嘅時候，進行試行，咁係嗰個範圍有限，係喺路邊安裝一架攝影機，就同運輸署嘅資料聯繫，資料就係有關於一啲同交通罪行有關嘅拘捕令。跟住就會喺路邊路障截停佢，或者用電單車跟住呢架車，去拘控呢個涉事嘅人士，所以係喺有限範圍下試行。而家我哋採取咗措施，擴大自動車牌識別系統嘅使用範圍，亦都擴大可以聯繫到數據庫嘅一啲罪行。我哋目前搵緊一啲設備，可以擺喺警車入面，喺公路巡邏，可以聯繫一啲犯罪人士、被通緝車輛，咁如果架車係登記係一啲未執行嘅拘捕交通罪行拘捕令嘅汽車，亦都可以利用佢搵到。呢個系統，我哋想用嘅範圍就係呢啲。第七段裏面所講，係冇確實咁講到實際情況。

主席：（經傳譯員）即係話係只限於已經係被通緝嘅人士？

白令嘉先生：（經傳譯員）冇錯。

主席：（經傳譯員）唔係用嚟捉一啲犯咗行車嘅罪行嘅人？

白令嘉先生： That's right, sir.

主席：（經傳譯員）咁有冇原因點解唔係咁樣用？

白令嘉先生：（經傳譯員）其實仲有另外一個系統，係警車使用嘅，可以記錄低，利用錄影記錄低喺馬路上面犯交通罪行嘅人士，不過都係需要警務人員去操作，唔係自動系統嚟。正如邱女士所講，我哋將來係希望可以用呢一個數據分析。

主席：（經傳譯員）咁使用好似倫敦裏面嗰啲黃格裏面嘅系統？

白令嘉先生：（經傳譯員）呢個都係同數據分析有關。

主席： Yes.

白令嘉先生：（經傳譯員）我哋目前冇呢啲技術。

主席：（經傳譯員）但係倫敦嗰個已經十年前個囉喎？

白令嘉先生： I know, sir, yes.

主席：（經傳譯員）佢哋好成功，成功到係因為啲人犯法，嗰個罰款數額係去到幾百萬英鎊喺。

白令嘉先生：（經傳譯員）係，但係如果安裝呢啲設備，唔係淨係警方嘅事宜，其實就係政策方面嘅事宜嚟。

主席：（經傳譯員）咁當然仲有呢一個私人嘅問題。

白令嘉先生：（經傳譯員）係。

主席：（經傳譯員）呢個係權衡即係犯法呢一方面嘅考慮喎？

白令嘉先生：（經傳譯員）冇錯。

邱倩雯女士：（經傳譯員）或者我再補充下黃格犯罪？（證人直接用本地話說）喺 2015 年 9 月，運房局亦都係開始去研究喺嗰個黃格仔嗰個 yellow box 嘅 enforcement camera system，但係去到 2016 年嘅 4 月，因為冇呢個財務嘅支持，所以嗰個研究計劃亦都停止咗。

主席：（經傳譯員）邊個負責係支付？

邱倩雯女士：運房局嗰度係提出唔到有一個 funding support，嗰個財務嘅支持。

主席：（經傳譯員）呢個係總警司喺呢一個 18 年 8 月嗰封信裏，Cadman 先生已經提到㗎嘞，係？

邱倩雯女士：冇錯。

主席：（經傳譯員）可唔可以喺個螢幕上面打番出嚟？

黃女士：（經傳譯員）呢個係雜項文件裏面第124-538頁。

主席：（經傳譯員）再畀一次個頁數。

黃女士：（經傳譯員）就係124-538。頭先邱女士提及嗰段就係第四段，就係124-539頁。或者我讀出嚟，以作紀錄。

主席：（經傳譯員）係。

黃女士：（經傳譯員）第四段，你就話「有關於係黃格執法，喺2015年9月嘅時候，運房局就係同警方開始研究，睇下可唔可以係技術上、財務上同埋法律上可行，去用呢個黃格執法攝影系統。自此之後，警方就係嘗試搵一個適合嘅產品，可以適用喺香港。但喺2016年4月嘅時候，呢個研究就終止咗嘞，因為係冇錢做顧問研究。雖然如此，但係嗰件事就係同其他一啲執法嘅攝影機，其實喺部門之間係有傾過。」呢度就話，呢件事其實都係積極考慮。有乜嘢係令到係終止？

主席：（經傳譯員）我哋知道，係冇財務支持吖嘛。其實冇人話政府冇錢，其實係啲錢用喺邊度先至係問題？

邱倩雯女士：而家喺運房局嗰度，亦都同警方同埋運輸署，我哋有定期嘅會議，咁我哋亦都將整體上面嘅用科技點樣去執行呢個交通嘅犯法，我哋都係即係將好多嘅計劃都喺嗰度提出，咁亦都包括咗就係黃格嘅路口嘅執法。

主席：（經傳譯員）幾時會考慮重新進行計劃？

邱倩雯女士：我哋由2018年2月開始，我哋都有會議，我哋整體上面講，我哋叫e-enforcement，電子執法嗰個議題擺上去，大家去傾。

主席：（經傳譯員）電子執法，你嘅意思係話用電子方法嚟到係執行交通法例，係咪呀？

邱倩雯女士：冇錯，冇錯。

主席：（經傳譯員）你搵到啲方法，或者係點樣即係知道嗰個車牌，搵到個車主，就畀個電子告票，係咪咁嘅意思？

邱倩雯女士：簡單嚟講，可以係咁講。

主席：（經傳譯員）我哋要想咁做，考慮咗幾耐？

邱倩雯女士：如果講電子告票，其實由2012年已經開始提出㗎嘞。相信係而家我哋嘅會議亦都係集中配合政府一個智慧城市嘅一個概念，所以我哋喺交通執法嗰度，我哋都希望儘量用多啲科技。

主席：（經傳譯員）即係話用咗六年，而家都好似冇乜再進一步進展？

邱倩雯女士：而家係好主動積極咁樣做緊。

主席：（經傳譯員）智慧城市，係咪呀，你頭先講？

邱倩雯女士：我係講整體性，喺交通執法方面，我哋係配合政府嘅方向。

主席：（經傳譯員）黃律師。

黃女士：（經傳譯員）邱女士，頭先你講2018年2月，你有啲會議，關於個電子執法嘅討論，係咩嘢引發要咁樣開會，考慮用電子嚟到進行執法嘅工作？

邱倩雯女士：主要都係即係政府整體上面嗰個智慧城市嘅概念，所以我哋會有會議。

黃女士：（經傳譯員）呢個係咪大埔，即係2018年2月10號大埔意外之後發生？

邱倩雯女士：唔係。

黃女士：（經傳譯員）即係之前囉喎，即係個會係响意外之前開？

邱倩雯女士：我哋同運房局嘅會議唔係因為大埔嗰個意外。

主席：（經傳譯員）即係另外一樣嘢嚟，另一個問題係之前定之後，即係係咪因為呢件事發生就係問同之前之後唔同嘅。

邱倩雯女士：我相信會議嗰個籌備係早過2月份。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）你响嗰段，呢個涉及一個跨部門嘅一個場合，嗰個部門係有啲咩嘢部門？

邱倩雯女士：我哋有運房局、警方同埋運輸署。

黃女士：（經傳譯員）咁我理解有冇錯，呢個關於黃格嘅執法呢個措施已經係重新展開，因為你要處理個非法泊車？

邱倩雯女士：呢個就係其中一個部分，喺會議裏面，我哋整體上面都係即係針對一啲可以用科技代替人手嘅一啲交通違例。

黃女士：（經傳譯員）呢個自動車牌識別系統有冇討論？即係話呢個系統可以嚟到處理非法泊車嘅事項，有冇討論？

邱倩雯女士：我哋冇特別係提到ANPR。

黃女士：（經傳譯員）我哋見到有啲--聽過一啲建議，工會提出，巴士公司提出嘅，一啲立法會嗰啲文件都有啲建議就話點樣處理呢個非法泊車嘅情況。簡單嚟講，有五個建議，我想逐個問一問你，第一，我哋見過頭先鍾先生，William Chung先生，即係新巴嘅，佢嘅答覆講，就可以設立一啲廿四小時禁區，你對於呢個嘅睇法，或者警方對呢個睇法係有咩嘢意見？

Transcript by Epiq Hong Kong, Limited

主席：（經傳譯員）廿四小時禁區，邊度設立禁區？係咩嘢--目的係咩嘢？

黃女士：（經傳譯員）我哋講嘅廿四小時禁區就話即係巴士站附近設立，嚟到係搵--即係可以睇到邊啲車喺嗰度非法泊車，响巴士站附近泊車，呢個就係其中一個建議。

主席：（經傳譯員）即係話除咗有巴士站，即係之前之後都應該係有禁區，係咪呀，就？

黃女士： Yes.

主席：（經傳譯員）就唔准泊車，全日都唔准，係咪咁嘅意思？

黃女士：（經傳譯員）係。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）呢度睇--我哋而家响個螢幕度顯示出當時嘅講法，佢話「我哋希望呢啲咁嘅路段係會係二十四小時禁區嚟嘅，我哋都通知咗警方就做執法工作。」就响咁嘅背景，咁佢有個咁嘅建議，你哋嘅睇法係點？

邱倩雯女士：我哋相信，二十四小時嘅限制區係有幫助，但係需要去將嗰個區域嗰個地段劃做一個限制區，就一定要係運輸署嗰個工作範疇，同埋佢嗰個配合。

黃女士：（經傳譯員）呢度有提過，佢哋都叫警方嚟到執法，有冇--你哋有冇任何紀錄？記唔記得佢哋有冇向警方提過，話設立廿四小時--即係專營巴士公司有冇向你哋提過，設立呢啲全日禁區？

邱倩雯女士：呢個喺我印象中，就冇好明確咁樣係書面提出過，咁樣可能要返去再睇睇。

黃女士：（經傳譯員）你有冇記唔記得，呢個問題有冇同運輸署開會嘅時候，有人提過呢個課題出嚟？

邱倩雯女士：喺我哋同運輸署同埋一啲巴士公司代表嘅會議裏面，佢哋係有提出過一啲非法泊車，令到即係阻礙咗巴士司機嘅運作，有提出過嘅。我哋收到呢啲嘅訊息之後，我哋亦都有將呢啲訊息發放去唔同嘅警區，有關嘅警區，等佢哋可以去繼續佢哋嘅執法嘅行動。

黃女士：（經傳譯員）第二個建議，就係話巴士站嗰個路牌，或者嗰個標示，即係話標出嚟個巴士站係咁樣嘅，喺呢度唔准泊車，非法泊車嘅，我哋見過啲相片嘅，其中一份係由九巴提出嘅文件，係有啲相片嘅，呢個係 12A，5174 頁，5173 頁、5174 頁，你可以見到有啲中文寫出嚟嘅字「嚴禁泊車」，响裏面嗰張相係講。

邱倩雯女士：係，我之前冇睇過，冇見過呢啲咁樣嘅即係標誌喺度，道路標誌。事實

上，所有擺喺路邊嘅道路標誌都係需要運輸署去批准，咁我唔知道呢一個係即係巴士公司自己擺喺度，定係已經得到運輸署嘅批准。

黃女士：（經傳譯員）先唔好講嗰個得到批准個問題，你可唔可以話畀我聽，呢啲咁嘅牌，標示，擺响巴士站，可唔可以幫到你哋執法，或者可唔可以幫到公眾或者大家係處理非法泊車嘅問題，係咪有幫助嘅？

邱倩雯女士：我相信呢啲道路標誌有個提示性喺度，但係你話佢係咪真係可以禁止到有司機係停泊喺嗰度，我唔知道個成效會係點樣。

主席：（經傳譯員）係咪有啲人唔知㗎？或者係唔明白，佢哋唔可以响嗰個巴士站中間泊車，呢個認知度係咪一個問題嚟㗎？定係唔係一個問題？

邱倩雯女士：我相信市民係知道巴士站係唔可以泊車，但係即係可能佢哋會覺得停一停係冇所謂，呢個所以係其實需要多啲教育。

主席：（經傳譯員）個實際問題就係話，佢哋即係取巧，撞一撞運氣，咁所以需要執法？

邱倩雯女士：冇錯。

主席：（經傳譯員）等到佢哋覺得咁做係成本太高？

邱倩雯女士：贊成。

黃女士：（經傳譯員）第三個建議，就有啲畫雙黃線，响個巴士站範圍畫雙黃線。

主席：（經傳譯員）你意思係入嚟入口、出口？

黃女士：（經傳譯員）佢入嚟嗰部分，出口嗰部分，出去嗰部分都係畫埋黃線，呢個建議係你哋覺得點？

邱倩雯女士：呢個同之前嗰個意見都一樣，就係我哋相信係有用，即係禁止停車係有用，但係喺道路嘅設計同埋嗰個道路嘅標記，呢個都需要係運輸署嗰度去處理。

黃女士：（經傳譯員）有冇同運輸署提過，據你所知道，有冇同運輸署提過呢個做法？

邱倩雯女士：由交通總部，我哋個聯絡，我哋就冇紀錄係話有特別提出過，但係我哋嘅每一個總區，我哋有自己嘅交通單位，交通單位同運輸署都會就住佢本地，即係 local，佢嗰啲嘅道路標記，同埋道路畫線，佢哋會有多啲嘅商討。

主席：（經傳譯員）目前嘅做法，係咪喺進入巴士站同埋離開嗰個位有雙黃線，係咪目前嘅做法？

邱倩雯女士：通常都有。

主席：（經傳譯員）所以係關於執法，因為每人--個個人都知雙黃線咩意思？

邱倩雯女士：係。

黃女士：（經傳譯員）第四個建議，就係使用技術，譬如話閉路電視、錄影，之前你都提過。第五個建議，就係考慮新加坡模式，即係話喺司機隔籬位安裝攝影機，司機只需要喺見到有非法泊車情況撳個掣。

主席：（經傳譯員）喺邊度，喺巴士站？

黃女士：（經傳譯員）係。

主席：（經傳譯員）換言之，係希望嗰啲受阻礙嘅人士可以幫助到，呢個係咪咁？

黃女士：（經傳譯員）首先想問，你對於呢個建議有咩嘢意見？因為嗰啲投訴人嚟，佢哋車上都已經有攝影機，只係需要撳個掣，然之後將影片交畀運輸署，個建議就係話，請佢哋幫助執法。對於呢個講法，你有咩嘢意見？

邱倩雯女士：分開兩個部分，如果係一啲行車嘅交通違例，我哋係可以--即係如果係有巴士公司嘅一啲嘅影片，亦都佢哋嘅司機係協助調查嘅話，我哋係可以搵番車主，搵番司機出嚟，進行呢個執法嘅。但係如果係一個泊車停泊嘅違例嘅話，咁呢個就頭先有提過，就係喺法例上面嘅限制，我哋係需要當時當地畀告票，咁所以要睇下嗰個違例嘅性質係乜嘢。

主席：（經傳譯員）想請你講一講，喺呢個法例，以你所講話，咁係一個泊車嘅罪行，架車就係一係擺喺個擋風玻璃，一係畀喺司機，你可唔可以話番畀我聽，係邊一條條例？或者你同事可以搵一搵。

邱倩雯女士：我有個法例就係 Cap 237，Cap 237，我而家睇緊係邊一行。

主席：（經傳譯員）叫咩嘢名，呢條條例？

邱倩雯女士：（經傳譯員）定額罰款，違反交通條例--違反交通罪行條例。

主席：（經傳譯員）唔該。正如我所講，可以之後搵番畀我哋。

邱倩雯女士： Yes.

主席：（經傳譯員）呢個妨礙咗有效執法。

邱倩雯女士：冇錯。

黃女士：（經傳譯員）邱女士，我哋而家講就係，就係關於呢個車長，襲擊車長。我哋聽到一啲嘅證供就係話，係有關於襲擊車長執法方面，就係投訴警方，話警方就冇將呢啲嘅案件列為優先，咁我哋有個清單，就係列出咗一啲毆打車長嘅事件，係九巴嘅，咁就係呢一個開始嘅時候，就係 2015 年嘅 1 月至到 2018 年嘅 7 月 2 號，KMB-1，212 頁。呢封信就來自九巴，列出咗係聲稱襲擊巴士車長嘅，就係呢一個 2015 年 1 月至到今日，即係至到 2018 年 7 月 26 號，就係話有五宗。佢哋提出其中一個事項，可以睇番個表，有四十一宗，喺呢四十一宗入

面，可以見到係好少最後係控告嘅啫，就係 162 同埋 164 號，喺 216 頁可以見到。大部分嘅個案都係和解或者口頭警告，或者冇再係追究。我想問一問呢一方面，話警方似乎冇將呢啲個案列為優先處理，即係關於襲擊車長嘅個案？

邱倩雯女士：我會請我交通總部嘅同事，同埋一陣間都會有刑事部嘅同事去作答。

李大偉先生：係，針對九巴向委員會提供嗰一百八十八單案件，我哋收到之後，亦都聯絡咗九巴攞取呢啲資料。我哋成功咁喺一百八十八單裏面嘅案件裏面，可以搵到一百八十二單嗰個案情，同埋個結果。喺呢一百八十二單案件裏面，總共就係有分類到一百三十一單係巴士司機喺工作期間，喺巴士上面畀乘客毆打，其中九十九單係我哋破案，喺九十九單破案裏面，即係我哋有拘捕到人士，係有八十三單係檢控上法庭，而四十七單係冇被檢控。

主席：（經傳譯員）即係冇再進一步行動嘞？

李大偉先生：同意，冇任何進一步行動。

主席：（經傳譯員）喺八十三宗嘅控告裏面，有幾多單係定罪？

李大偉先生：喺嗰八十三單檢控案件裏面，七十三單係成功檢控。

主席：（經傳譯員）有冇數字，譬如話係認罪、唔認罪嘅案件，即係最後係七十三宗係被定罪？

李大偉先生：七十五單成功檢控--成功定罪嘅案件裏面，就有唔同嘅法庭嘅判罰嘅，刑罰嘅。

主席：（經傳譯員）唔係，我問嘅問題係有幾多宗係認罪，有幾多宗係審訊之後被定罪？

李大偉先生：我哋冇呢啲咁嘅數字。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）你答完未，李生？

李大偉先生： Yes.

黃女士：（經傳譯員）除咗襲擊數字上升...

主席：（經傳譯員）黃律師，等等，呢啲嘅資料有冇係白紙黑字嘅？九巴有冇呢個分析，即係話一百八十八宗跟住點點點，咁你似乎都係讀啲數字出嚟，有冇資料？

李大偉先生：我哋有呢方面嘅資料嘅。

主席：（經傳譯員）可唔可以提供呢一個書面嘅資料畀我哋？

李大偉先生：可以嘅。

主席：（經傳譯員）唔該。或者我打斷咗你，你想講話關於呢個懲罰方面，你係點樣分析？

李大偉先生：喺七十五單成功定罪嘅案件裏面，有十五宗分別係判入獄或者緩刑嘅判罰。

主席：（經傳譯員）有幾多宗就係真係入獄，而唔係緩刑？

李大偉先生：冇方--冇呢面嘅--呢方面就冇呢個數字嘞。

主席： Thank you.

李大偉先生：另外簽保守行為，即係 bound over，有二十二宗；另外就係社會服務令，十六宗；罰款係十八宗。

主席：（經傳譯員）有冇罰款範圍，數字範圍，最高罰款，最低？

李大偉先生：冇。另外四宗就係受教導，教導所--感化令，sorry。

主席：（經傳譯員）咁你係有冇佢哋嗰個罪行？

李大偉先生：頭先我講嗰所有案件係主要係包含四種嘅個案，第一種係傷人，wounding...

主席：（經傳譯員）而家講緊嘅係關於一般定係定咗罪？

李大偉先生：概括，總共嘅。

主席： Yes, wounding...

李大偉先生：第二個控罪就係毆打，引致身體受傷；第三個控罪係普通毆打；而第四個就係公眾地方打交。

主席：（經傳譯員）傷人係咪第十九條嘅罪行？

李大偉先生：Section 17 同埋 19 都有。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）最後呢個嘞，公眾地方毆打，我哋聽過一啲工會嘅人講，話佢哋反對用呢一條，因為會係控告埋巴士車長，話佢哋公眾地方毆打，有兩個原因，一，因為佢哋係巴--佢哋就係呢一個巴士車長嚟㗎喇，佢哋要根據 230A 章係要確保安全；另外第二個就係，法例係要保護被打嘅人士吖嘛。對於呢一個投訴，即係話公眾地方毆打，你有咩意見？

主席：（經傳譯員）你可能講，如果唔係適當，你唔會咁樣告喇，我諗佢會咁樣答，係咪呀？

李大偉先生：因應巴士司機投訴畀乘客毆打嘅案件，係有唔同--好多時候都有唔同，每一宗案件都有唔同嘅案情同埋因素，咁巴士司機係有佢--喺法例 230A，係有法定權力，係佢嘅權力去點樣去處理一啲違規嘅乘客。咁如果係巴士司機毆打，就會係另外一種--就另外會係畀其他罪行會所保護嘅，即係頭先我所講嘅傷人，毆打之類嘅案件。

張天樂先生：方唔方便作啲補充，而家呢個時間？嗄，作少少補充，頭先大律師提到就係話，會唔會有啲案件裏面，即係巴士公司佢有個意見，就係警方就住巴士司機被毆打，受襲嘅案件，警方會唔會係有啲不同嘅處理方法，或者係對巴士司機受襲嘅案件，含有任何不重視嘅情況出現呢？喺呢度重申，就係我哋警方係處理每一宗案件，係不論受害人嘅身分、國籍、背景、職業等等，我哋都會係予以一視同仁咁樣去處理。係就住剛才交通總部嘅同事，佢講話關於九龍巴士公司，佢提供過一百八十八宗案件裏面，佢哋能夠搵到嘅數字，我哋比較過嗰個檢控，破案率等等，破案率、檢控率、定罪率等等，係相比較整體同類案件嘅破案率、檢控率、定罪率，嗰一百八十幾宗嘅案件嘅相關數字，係比相同嘅案件類別嘅整體數字，都係要高嘅，呢個係一個即係我哋搵到出嚟嘅一個數字嘅比較。所以喺個整體情況裏面，我哋見唔到有任何喺巴士司機受襲嘅案件裏面，係即係警方係有輕描淡寫嘅情況出現，所以呢個必須要重申就係，再重複一次，我哋警方係處理巴士司機受襲嘅案件，係採取一個一視同仁嘅一個態度，同埋認真去處理，處理--即係喺個調查過程係作出一個一視同仁嘅態度，如果個調查搵到出嚟嘅證據係充分，我哋會予以檢控。

咁檢控嗰個係採用邊一個條例，邊一個控罪去檢控，就要視乎嗰個案情。如果我哋有需要嘅話，當然係會向律政師索取--尋求法律意見。剛才大律師提到話喺公眾地方打交呢一個咁嘅情況係點樣去理解，我哋接報--即係警方接報去到場調查之後，我哋會因應唔同案件個案情，係決定嗰個案件嘅性質係屬於邊一樣。當然喺接報嘅時候，可能即係會各執一詞，即係雙方--即係牽涉--涉案嘅雙方會各執一詞，但係當我哋警方係經過詳盡嘅調查之後，我哋會係作一個評估，有一個結論，係決定係控以邊一方面，邊一個控罪，有機會係只係控告其中一方相關嘅控罪，如果係案情係的確係證實係顯示雙方都有打交嘅情況出現，咁我哋亦都會係控於適合嘅罪名。咁呢個亦都唔係單單係警方嘅決定嚟，亦都係一個案件上到法庭，有法庭嘅檢控官，檢控主任去做一個...

主席：（經傳譯員）唔好意思，我截斷你，我原本嘅建議，如果係有咁樣嘅--即係如果係咁樣控告，即係話咁嘅控告嘅罪名當然係你哋覺得係適當喇？

李大偉先生：同意。

主席：（經傳譯員）我哋而家過咗1點嘞，我哋而家就係午休，我哋兩點半再復會。

下午1時06分聆訊押後

下午2時30分恢復聆訊

出席人士如前。

主席：（經傳譯員）各位，午安。黃律師。

黃女士：（經傳譯員）邱女士，我哋未休會之前，就係睇緊法例第237章嘅，就係講到嗰個定額罰款嗰方面，告票嗰度，就係畀呢一個車輛同埋司機嘅。Have you been able to locate the section?

邱倩雯女士：我哋搵到喇。

黃女士：係咪第15?

邱倩雯女士：係section 15嘅第(2)段。

黃女士：Subsection (2)?

邱倩雯女士：係。

黃女士：（經傳譯員）我就讀佢出嚟係以資紀錄，我應該都讀埋係第(1)款嘅，如果呢一個嘅警務人員有合理嘅理由相信就係已經係有觸犯咗有關條例，佢可以就係向呢一個車輛嘅司機或者係向嗰個嘅司機，就係要佢嚟到去遵守佢有關呢一個違例嘅責任，呢個就係要畀一個定額罰款。

為咗第(1)款，呢一個嘅通知應該係一個定明嘅格式，就係要係面交係呢一個掌管呢一個車輛嘅嗰個人士，但係就係要唔喺影響第16條或者係呢一條嗰個嘅情況之下，即係唔會影響佢不能夠履行呢一條條款嗰個嘅要求。

呢個係咪關於要面交嘅嗰個條款呀？

邱倩雯女士：啱，冇錯。

黃女士：（經傳譯員）但係從呢一個嘅但書嗰度睇到，如果係唔能夠符合呢一條，就唔可以違反第15(1)條嘅。

邱倩雯女士：係，我睇到。我哋曾經就過就第15項，我哋都徵詢過律政司意見嘅，但係嗰個意見我而家唔喺手上面，但係基本上個意思都係話需要係畀嗰個當時當地嗰個司機，或者係我哋需要擺喺個車嗰度嘅。

主席：（經傳譯員）如果呢一--即係為講而講喇，如果嗰個嘅法律指示係合適，咁就應該係刪除第15條第(2)款，係咪呀？

白令嘉先生：（經傳譯員）我從嗰個嘅草擬嗰個指示，就似乎唔係話係刪除，而係就

係去話畀我哋係--即係搖距咁發呢個嘅告票。

主席：（經傳譯員）即係其實同刪除呢一條一樣喇，嗰個結果？

白令嘉先生：（經傳譯員）係喇。

主席：（經傳譯員）即係一係就係好簡單咁樣攞支藍筆係劃咗呢度，又或者係要用一支紅筆係加啲新嘅條款。

白令嘉先生：（經傳譯員）我哋會反映你嗰個評論嘅。

主席：（經傳譯員）我哋而家就係有一個嘅法例，就係三十五年咁--超過三十年咁久㗎喇，係咪呀？

白令嘉先生：（經傳譯員）冇錯。

主席：（經傳譯員）而家無論係電腦或者科技都係進步咗好多，呢個法例寫嘅時候唔係為咗今日嘅科技而寫嘅。

黃女士：（經傳譯員）李先生，喺休息之前，你就係提到，喺一百八十八個個案之中，呢個就係九巴提畀你，有四十七宗嘅個案係冇檢控嘅，你可唔可以畀我哋睇下一般係乜嘢原因係令到冇檢控嘅呢？

李大偉先生：就住嗰四十七宗不能夠檢控個個案，有二十二宗係未能夠搵到嗰個受疑人嘅，即係話係施襲者，另外十六宗就係受害人最終就係不追究個事件嘅，所以就案件就終結咗，六宗係不夠證據，另外兩宗不夠證據係經過諮詢律政司意見而係就完結嘅，另外一宗就係案件調查之中。

黃女士：（經傳譯員）李先生，其實我想問你嗰個問題，基於九巴嗰個證供，佢話佢哋係比較喜歡用第 230A 章嘅，...

主席：（經傳譯員）未去講呢一度之前，講到嗰啲搵唔到行兇者嗰啲個案，如果大家畀錢搭巴士，如果係用八達通嘅話，有冇幫助呢？因為呢啲可能會係包咗嗰啲個人資料嘅，呢一啲會唔會幫到你搵到行兇者呢？

李大偉先生：喺尋找施襲者，如果係用透過八達通嘅，係一定有幫助嘅，對警察嘅調查，但係由於好多時候使用八達通卡者未必係一個私人登記嘅八達通卡，所以警方未能夠就跟進到佢嘅身分，當然如果係個個都用個人登記嘅八達通，係會幫助到警方調查去搵到呢啲咁嘅施襲者嘅。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）好，跟進話用八達通呢個問題，我諗係有兩宗嘅個案，九巴公司係提出投訴，就係話警方係冇積極咁樣去收集嗰啲個人資料，即係用八達通卡嗰啲，我想你睇睇一啲嘅文件，可唔可以睇下九巴 1A，297 頁？

我哋講番個背景，有兩宗嘅個案，唔好意思，睇一睇 218 頁先，同一沓文

件，218，1A 嗰個文件夾，第 218 頁，嗰度有提到五宗個案，搵唔搵到？3 同埋 4 號，個案 3 同埋 4，我哋睇下 218-1 嗰一頁，第 2 段，呢度就係話，呢度係被悉到，呢一封信係我哋委員會畀呢一個九巴嘅，係 6 月 27 號嘅，嗰個嘅回應就係話關乎第 3 同埋第 4 宗嘅個案，係提到有一個閉路電視嘅報告嘅，就係話喺第 1 個案裏面就係話到係警方方面有呢一個行兇者嗰個嘅八達通卡嗰個紀錄嘅，我哋就要求有呢一個閉路電視同埋八達通卡嗰個紀錄嘅印本，喺呢一度就係話九巴就喺 2018 年 8 月 9 號就係回覆呢一封信。

喺第 297 頁，你睇下嗰個大題目就係話回覆 2018 年 7 月 27 號嗰封信，第二段度話「關於第 3、第 4 宗嘅個案，嗰個嘅閉路電視嘅由我哋法律部門嗰個嘅意外調查同埋預防組畀嘅報告就係喺附件 A，就話呢一個嘅兩個被告人係認罪，所以係冇用到閉路電視嘅紀錄嘅。」

然後，「關於第 1 宗案件，就喺 2018 年 4 月 16 號，警方係要求我哋提供八達通卡嘅紀錄同埋邊個陪同佢一齊，因為佢哋當時係有最後三個嘅乘客就係喺當時上車嘅。喺 2018 年 4 月尾嘅，我哋就同警方有一個電話嘅對話，就係關於八達通嘅資料，就話畀佢哋聽係要攞我哋嘅書面回應嘅。」

Patrick Pang 先生口頭作供嘅時候，佢就話警方冇去攞嗰個八達通嘅資料或者係報告，我哋睇下你呢度嘅回應。喺嗰個雜項文件第 124-537-1 呢一頁嗰度，124-537-1 呢一頁嗰度，537，我讀出嚟，李生，你搵唔搵到嗰份文件呀？

李大偉先生：（沒有可聽到的回答）

黃女士：（經傳譯員）仲未。呢個係你畀委員會嘅一封嘅回信，係 2018 年 8 月 7 號嘅，喺第 3 段，你咁樣寫，「關於第 1 宗嘅個案，就係天水圍嘅警區嗰度，警方係冇收到任何嘅從九巴嘅嗰個疑犯或者係行兇者嗰個八達通資料。」

你亦都話呢啲嘅資料係可以喺嗰個八達通可以搵到嗰個交易嘅時間、日期、用邊一個嘅器材、嗰個交易嘅幾多錢同埋嗰個八達通卡主嗰個嘅個人資料，而家就話--九巴就話佢哋有呢啲資料，但係警方就冇去攞，於是乎呢份文件仲喺九巴嘅寫字樓度，你嘅回應係乜嘢呢？

主席：（經傳譯員）或者我哋應該去番前呢一個警司彭先生嗰個嘅資料，因為我哋似乎而家兩面就係喺度推卸緊，佢就彭生就似乎就接咗手。

黃女士：（經傳譯員）我想請你睇一睇我哋第 13 日嗰個嘅研訊謄本，2018 年 8 月 10 號，係 108 去到 109 謄本嘅，就喺謄本 5 嗰度，108 至 109 頁，你睇咗 108 頁先，第六行，主席係咁問嘅，「我哋知道，因為我哋問咗警方係有啲乜嘢可以攞到嘅資料，喺你封信嗰度，我諗應該係喺 KMB-1 第 297 頁，就係話去回應呢一封信嘅時候，喺二段，你就係講到第 1 個個案，你係咁講嘅，你話『大概喺 2018 年 4 月咁上下，我哋就係同警方講過電話，就住關於八達通呢啲紀錄嘅，就向佢哋講就話可以收到我哋嘅書面回覆嘅。』佢哋收唔收到呢？係

咪可以答有或者冇呢？」然後彭生就話冇，佢哋冇嚟到攞嘅。

然之後我哋去睇 109 頁，都仍然係彭生畀緊證供，第九行，「我哋打電話去天水圍警區，我哋問佢，叫佢哋攞呢一個回覆，但係警方冇嚟過，封信依然喺我哋度，嗰啲八達通嗰啲卡依然喺我哋度，就係咁樣發生咗喇，主席。」呢個係 Patrick Pang 先生嘅證供，...

主席：（經傳譯員）我諗到最後彭生就話咁樣嘅做法係好愚蠢嘅，應該係做啲嘢。

黃女士：Yes.

李大偉先生：就住呢個天水圍個案件，我哋都諮詢過天水圍分區嘅，根據佢哋嘅紀錄，佢畀我哋嘅資料，就係佢哋係有向呢個九巴係索取呢個相關案件嘅八達通資料，而發信之後一路都收唔到 KMB 書面嘅答覆，亦都冇話收到任何電話通知有關於可以去攞呢啲咁嘅資料嘅，我哋喺天水圍方面就可以攞到咁嘅資料啫。

主席：（經傳譯員）呢一件事我哋一定要跟進，我哋要同彭生同九巴跟進，因為咁樣發生真係令人覺得好惋惜嘅，大家其實對呢件事都有一個興趣嘅，因為就係話究竟係咪會調查咗一個指控，甚至係咪可以提出檢控呢咁，但係有人唔知做咗啲乜嘢，就做唔到，但係好明顯嗰啲證據係喺度。

黃女士：（經傳譯員）李生，你先前提到呢個一百八十八宗九巴嘅案件係有四種唔同嘅檢控嘅罪行嘅，冇一次係同 230A 章有關嘅，九巴嘅證供同埋個工會嘅證供全部都係同一個意見嘅，佢哋就係話其實你動用 230A 章係更加容易嘅，如果你係講到乘客嘅行為，因為係唔需要有真係身體方面嘅接觸或者係襲擊嘅，咁都已經係可以違例，係應該容易檢控啲嘅，你個意見點呀？

李大偉先生：或者我嘗試答下先，一般嚟講，普通嘅 230A 嘅違規，即係乘客唔守規矩，係經常會發生，好多時候嗰個事件已經發展到可能已經係肢體衝突，直至到警察到場㗎喇，當然係最理想嘅方法就係喺件事件未發展到咁差嘅時候，就警察開始介入就可以平息咗佢，或者係用比較容易嘅方法處理，譬如話可唔可以考慮到 230A 嘅控罪，但係好多時候警察去到現場，好多時候已經係去到一個階段，已經係可能肢體發生衝突又或者有人受傷嘅情況。

黃女士：（經傳譯員）對你比較公道，或者我畀幾份文件你睇睇，我諗邱小姐係回覆過九巴嘅，佢係回覆過九巴關於呢件事，就係話究竟你係咪有考慮過將來都係用 230A 章，...

主席：（經傳譯員）或者未講呢一點之前，我哋可唔可以睇一睇 230A 章有相關嘅部分，等我哋睇一睇呢一個罪行嗰個範圍。

黃女士：（經傳譯員）應該喺 THB-2 第 132 頁，即係運房局嗰啲文件，我哋睇下第 13A 規例，尤其是係(1)(c)嗰一條，佢係咁寫嘅，就係講到乘客同埋將會乘搭巴士人士嘅一般行為，我哋可以睇下第 13 條嗰個規例，就係咁寫嘅，即係話嗰個巴士嘅車長可以係驅逐呢一位乘客嘅，而 13A 就係講到有關嘅罪行嘅，就係

話任何嘅乘客或者將會搭巴士嘅乘客係唔可以蓄意去阻礙或者係妨礙其他嘅人或者係呢一個巴士嘅車長或者係蓄意阻礙巴士車長嘅視線嘅，同埋係唔可以蓄意或者係令到巴士任何嘅器材係會受到破壞或者係令到其他人係會受傷或者覺得唔舒服或者覺得煩厭或者唔方便嘅，呢個係會造成罪行嘅。

第 25 條嘅規例就係寫明任何人如果冇合理嘅辯解係違反第 3 條規例，即係第 3 條第(4)款或者以下規例嘅任何嘅條文，都係會犯法嘅。

第 25 條第(3)款就係話任何人冇合理辯解，如果係違反 13A，係會犯法，係可以被罰 3,000 元或者係入獄六個月嘅。

工會同埋九巴嘅人士就認為呢一個嘅條文已經係好有效可以去對付乘客對巴士車長嘅人身嘅攻擊嘅，即係你唔需要真係證明到係有襲擊，因為佢哋認為有呢一條係更加容易檢控嘅。你點樣回應呀？同埋我一陣間都會請你睇一啲書信來往嘅，係邱小姐都畀過答覆嘅。

李大偉先生：至於用 230A 個控罪，係同意嘅，係可以喺每個事件裏面防止啲事件再惡劣下去，即係演變得更加差，譬如話變成打交或者係受傷咁樣嘅，所以我哋一路都呼籲啲巴士司機一定要冷靜處理呢啲咁嘅違規乘客，儘快報警，由警察儘快去到現場處理，而唔係用自己去同人口角，跟住肢體衝突係最唔理想嘅處理方法，所以 230A 係有佢嘅作用嘅，如果係巴士車長可以喺保持冷靜，儘快通知警察去現場處理，我相信就一定係將啲受襲嘅事件可以降低。

就住每宗案件，都要針對最適當嘅控罪，警方先會檢控嘅，相對如果係實質係一啲肢體衝突、係毆打嘅案件，警方一定會用番頭先我上晝所講嘅嗰四條控罪，最適合嘅控罪採取檢控行動嘅。

黃女士：（經傳譯員）好嘅。我哋講番成個故事，或者邱女士，請你去睇九巴 1A 沓文件，中文 286 頁，英文 283 頁，呢一封信係九巴 2018 年 3 月 8 號寫。，主席，喺英文版嗰度，個日子係冇寫出嚟嘅，但係係 2018 年 3 月 8 號出嘅。呢封信，喺 293 頁，九巴就係咁樣寫嘅，就話「舊年 5 月，我哋寫信畀警方表達話我哋嘅車長一而再被襲擊嘅，我哋考慮過有關嘅個案之後，我哋發現有一啲嘅違例者不單只係犯咗普通襲擊，有可能甚至係違反咗公共巴士服務規例 13A(1)(c)嘅，因此我哋公司實際上已經係派咗同事去警察局嗰度係為呢一啲嘅個案提供證供，希望警方可以係根據規例嘅 13A 提出檢控嘅。」佢哋係提到六個個案。

喺 294 頁嘅底部，佢話「喺呢一方面，我哋而家係熱切祈求警方喺將來如果仲有襲擊車長嘅情況」，係請佢哋慎重考慮使用規例第 13A，即係除咗係告普通襲擊之外，都係用埋 13A 嘅，「我哋嘅公司肯定會同警方合作，提供協助。」

喺呢一方面，邱女士就係回覆過嘅，2018 年 5 月 17 號，喺 296 頁，中文版 288 頁，你喺呢一度咁寫嘅，邱女士，你就係話「同你公司開過會之後，

即係 3 月 28 號，我哋而家通知你我哋嘅分區亦都係通知咗總區嗰度，係用書面嘅，去提醒前線嘅人員喺處理巴士車長被騷擾或者係襲擊嘅時候，係要公平同埋專業嘅，同埋要明白嗰個個案嘅性質，然後適當咁將佢分類嘅，然後去考慮一下係咪公共巴士服務規例，即係 230A 章係可以適用。」

我個問題係 230A 章第 13A 條從來有冇援引過係警方攞嚟去檢控嘅呢？

邱倩雯女士：我哋曾經睇番呢幾年嘅紀錄，喺 2016 年我哋都有用過 230A 去控告--發過告票畀巴士嘅乘客嘅，一共有一宗。

黃女士：（經傳譯員）你回覆咗之後，有冇再用過呢？

邱倩雯女士：我哋再睇過紀錄，今年冇嘅。

黃女士：（經傳譯員）點解呢？點解用得咁少呢？

邱倩雯女士：呢個我相信就係睇下究竟喺事件裏面究竟係嗰個證據--現場嘅證據有啲乜嘢嘅案情。

黃女士：（經傳譯員）仲有一件事，就係根據 Patrick Pang 先生，即係九巴嘅 Patrick Pang 嘅證據，佢就話 3 月 28 號開過會嘅，佢自己同埋係法律部嘅主管同埋另外一個同事，就係同總警司開會嘅，喺嗰一個會，總警司就係答應咗，喺即係個會度答應，就話佢會發出一啲指引畀前線嘅警員去到首先，就要佢哋所有指稱係有襲擊嘅個案，都要係認真咁樣調查，佢亦都會提醒佢嘅前線同事，睇下會唔會有一啲個案係適合援引 230A 章做調查同埋檢控嘅，有冇咁做呢？

邱倩雯女士：嗰個有嘅，我哋喺 2018 年嘅 5 月 10 號，係由警察嘅交通總部係發出咗一個內部嘅通告畀前線嘅同事去留意巴士嘅司機係受襲嘅事件嘅。

黃女士：（經傳譯員）我哋可唔可以睇下呢一張內部嘅通告呀？

邱倩雯女士：可以。

黃女士：（經傳譯員）或者就係透過呢度嘅秘書處，可以畀呢一個我哋。

主席：（經傳譯員）你今日會唔會有嗰張通告㗎？

邱倩雯女士：Yes.

主席：（經傳譯員）如果有嘅，請搵同事去攞佢去影印，或者畀我睇一睇先，我可唔可以睇下佢呢？唔該。等一等。唔該。唔該。

黃女士：（經傳譯員）呢個嘅題目仲有最後一樣嘢嘅，就係 Patrick Pang 先生嘅口頭證供就係話「當我哋問佢呢一個問題話點解佢係如果可以用普通襲擊嘅話，點解要援引 230A 章呢？有咩嘢好處呢？」我相信九巴係咁樣回覆呢個問題嘅，喺第 13 日，嗰個嘅研訊嘅謄本第 73 頁，呢個就係 2018 年 8 月 10 號第

12 行，呢一個鄧樂勤資深大律師就係問，「如果嗰個嘅最高刑罰係會低過呢一個 230A 章嗰個罰則，咁有咩嘢意思呢？」鄧資深大律師就係話「其實如果要普通襲擊，警方嗰個調查過程係好複雜嘅，如果用 230A 章，就係比較容易去證實呢一個罪行已經觸犯咗，我哋希望嗰啲襲擊車長嘅乘客佢知道其實係有 230A 章呢個係關於乘客嘅行為，而且係唔需要有真係肢體嘅接觸，都可以係觸犯呢個罪行嘅。」

你就係強調話用呢一條嘅條例係有好處嘅，我相信你嘅證供亦都話強調雖然而家係好少援引呢一章，你都會考慮援引嘅，係咪？

邱倩雯女士：我想提出就係檢控嘅工作唔係取易不取難，而係真係睇下嗰個案情係嗰個證據去到邊度，如果個證據已經係可以顯示到有肢體嘅受襲嘅話，縱使 Cap. 230A 係可以同樣控告嘅話，我哋相信我哋一定會係去一啲較嚴重嘅罪行，去顯示，更加巴士司機受襲係令到警方係重視嘅，就唔係話因為 230A 比較容易去證明，而我哋就去 230A，所以一切都係睇證據。

黃女士：（經傳譯員）唔該。我想問一個一般嘅問題，你點樣去確保乘客襲擊嘅個案係好快速咁樣得到處理？

邱倩雯女士：我哋對每一單嘅案件都係即時去處理，咁樣時間性上面亦都係睇下證人幾時可以畀到證據，我哋嘅調查隊會係立刻、即刻咁樣要求證人去畀到口供，咁樣如果有係需要到較後嘅調查，例如係需要攞醫生報告或者係其他嘅證人可以畀到口供，呢個我哋都係即時會做嘅。

黃女士：（經傳譯員）去另外一個題目，嗰個嘅係去檢討車速嘅工作小組，我未去講到呢個工作小組嘅時候，我就想解釋一下點解會成立咗一個咁嘅工作小組，呢個係完全源於大埔公路嗰個嘅意外嘅，有一次係大埔嘅區議會有一個嘅會議，嗰個嘅議程就係記錄 2018 年 2 月 12 號嗰個嘅會議，...

主席：（經傳譯員）你未繼續落去之前，我哋就冇話過呢一個嘅工作小組係因為大埔嘅意外先至引起，其實一早呢個工作小組已經存在嘅，係咪呀？黃律師？

黃女士：（經傳譯員）係，係，主席，應--我相信--如果我講錯，請你係更正。

主席：（經傳譯員）即係佢呢一個工作小組，關於檢討車速嘅，就係運輸署同埋警方都係有代表，係一直存在嘅。喺呢一個嘅個案，所涉及嘅大埔道嗰個交通意外，就係運輸署嗰個建議係要包埋呢段落路去嘅，係咪呀？我咁樣嚟到去總結我哋聽到嘅證供正唔正確？

黃女士：（經傳譯員）係正確嘅。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）或者邱女士向我哋去解釋下呢一個檢討車速嘅工作小組有啲咩嘢成員嘅？

邱倩雯女士：我讓我同事李大偉去回答。

李大偉先生：有關個運輸署嘅檢討車速工作小組，成員包括運輸署嘅同事，另外有兩個非政府組織、一個就係香港汽車會、一個就係香港高級駕駛人員協會同埋警方嘅代表，係作為參與嘅。

黃女士：（經傳譯員）可唔可以話畀我哋聽警方响呢個由運輸署成立嘅工作小組佢有咩嘢角色嘅？

李大偉先生：警方嘅代表就係喺我哋嘅交通總部派出一個代表係定期參與佢裏面嗰個會議，主要係檢討議程上面所檢討嘅路段嘅速度嘅。

主席：（經傳譯員）邊一個召開呢一個會議㗎？

李大偉先生：運輸署助理署長。

主席：（經傳譯員）呢個係由運輸署策動嘅小組。

李大偉先生：同意。

主席：（經傳譯員）佢哋係咪提供埋秘書處支援？

李大偉先生：佢哋會提供秘書處，佢哋負責所有秘書處嘅服務，而開會嘅地方都係運輸署總部裏面。

主席：（經傳譯員）即係話喺咁嘅角色之下，佢哋定議程嘅？

李大偉先生：同意。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）可唔可以話畀我哋聽呢個工作小組點樣運作嘅呢？會唔會係考慮埋一啲嘅客觀嘅事實，同埋評估，當佢考慮到去更改某啲路段嘅車速限制嘅時候。

李大偉先生：運輸署係有恆常嘅機制檢討道路速度限制嘅，確保定立嘅速度限制能夠保障道路安全同埋交通暢順嘅。喺檢討嘅路段嘅時速限制嘅時候，儘量都會保障道路使用者個安全為首要嘅。

檢討嘅時候會考慮有幾大因素嘅，無論係調低、放寬或者保持原狀個速度限制嘅，第一個考慮就係路段發生意外嘅紀錄；第二個考慮因素就係車輛嘅常用速度；第三個考慮因素就係道路環境同埋特徵，就包括路面嘅斜度、視線、路口同埋行人情況等等。

根據上述頭先我講嘅因素，運輸署同同事就會作出佢嘅建議，究竟係嗰段道路應該係調低吖，調高吖，或者保持現行嘅速度嘅。

黃女士：（經傳譯員）你提到運輸署有一個嘅恆常機制去檢討一啲嘅車速，你可唔可

以話畀我哋聽呢一個嘅定期機制有幾定期嘅呢？

李大偉先生：據我理解，呢個檢討小組一般嚟講，係以每一季度就開一次會，檢討唔同嘅道路嘅，道路嘅選擇就係屬於運輸署範疇，究竟應該係檢討邊一段道路，就純粹係關於運輸署個工作小組決定嘅。我相信就係特別針對一啲可能--個機制就係特別一啲發生過嚴重交通意外又或者經常發生交通意外嘅地方，佢哋係會比較容易喺呢個會議嗰陣討論關於車速嘅限制方面。

黃女士：（經傳譯員）你提到嗰個機制，就係會針對一啲嘅路段，可能係一啲頻密或者係嚴重嘅交通意外嘅路段，咁即係話係一個回應有發生咗嘅意外嘅機制，係咪呀？

李大偉先生：呢個係其中一個考慮嘅因素，其實仲有其他因素，就係可能係市民投訴，或者係區議會嘅反映咁樣。

黃女士：（經傳譯員）我咁講啱唔啱呢？根據你所知，唔係一個主動嘅機制嚟嘅，即係唔係話運輸署或者係警方會係主動出擊，睇下邊啲危險嘅路段係需要考慮嗰個車速要去調整，係咪呀？

李大偉先生：我唔敢講係咪一個主--即係佢唔係一個主動嘅檢討，不過呢個檢討嘅機制係--我覺得係有效。

黃女士：Now, going back to the specific example...

主席：（經傳譯員）可唔可以幫下我哋，呢個工作小組已經成立咗幾耐呢？

李大偉先生：根據紀錄，一般嚟講，係會三個月，季度性開一次會嘅。

邱倩雯女士：第一次。

黃女士：Since when？

李大偉先生：而第一次嘅會議，根據紀錄，係喺 2000 年第一次。

主席：（經傳譯員）你知唔知道喺咩嘢嘅情況之下佢係成立㗎？

李大偉先生：呢個我哋冇紀錄可以查到。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）關於呢一個大埔路嘅交通意外，可唔可以請你睇幾份嘅文件，嗰個目的係想顯示大埔路段，即係關於乎呢一段嘅大埔路段，其實區議會、居民、學校都係有投訴話呢一段嘅路係好容易有交通意外，亦都有好多超速嘅情況，呢度有一啲嘅書信往來，係嚟自大埔區議會寫畀警方，要求佢哋協助嘅，...

主席：（經傳譯員）未去講到細節之前，我想請問一個一般性嘅問題，呢五位警方嘅

代表，請問有冇任何一位係參加過呢一個車速嘅檢討委員會嘅呢？

李大偉先生：嗰個常任個會員係其中一個警察代表就係交通總部嘅警司，交通管理嘅警司，其實嗰個啱啱就係調任咗，調離咗崗位，而家我就署任緊嗰個角色。

主席：（經傳譯員）即係話直接去答呢一個問題就係今日喺呢一度嗰五位警方人士係冇積極咁係參與過呢一個委員會嘅工件？直至到你係代替咗之後。

李大偉先生：同意。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）李生，自從你署任之後，你有冇參與過呢一個工作會議嘅會議呢？即係呢一個工作小組。

李大偉先生：我曾經出席過一至兩次，不過係相信係兩、三次年前嘅事嚟。而家，就住呢個大埔道呢個檢討，就我冇出席過。

主席：（經傳譯員）當你參與呢一個工作小組會議嘅時候，即係參與過嗰啲，通常會係一次會議檢討幾多個路段？

李大偉先生：喺我出席嘅兩、三次會議裏面，每一次嘅會議大致上係會搵出三個地點、六個方向，即係每一個地點通常都係有來回線嘅，所以每一次會檢討六個唔同嘅路段。

黃女士：（經傳譯員）點解係六個路段呀？

李大偉先生：頭先我講每--通常會搵三個地點，而每個地點都係有來回線，所以有六個路段。

黃女士：（經傳譯員）係邊個去選擇嗰三個路段呢？

李大偉先生：運輸署同事。

黃女士：（經傳譯員）點解係咁樣選呢三個路段呢？係咪就係根據你剛才講嗰啲因素呢？

李大偉先生：冇錯。

黃女士：（經傳譯員）關於去選擇呢啲路段，你有冇任何嘅意見嘅呢？

李大偉先生：我哋會畀意見嘅，我哋會畀同唔同意佢嘅建議。

黃女士：（經傳譯員）如果你係收到啲投訴，係關於某一個路段嘅，你可唔可以建議話去檢討嗰個路段？

李大偉先生：當然可以提出嘅，可以提出，向運輸署同事，我哋有收到投訴係關於速度嘅要求，但係一般嚟講，但係市民或者係好多區議會、其他部門都好清楚到

Transcript by Epiq Hong Kong, Limited

路面上面嘅速度限制係歸於運輸署嘅範疇去檢討，同埋去定制，只係佢哋有權去檢討嗰個道路嘅速度限制。

主席：（經傳譯員）如果一個區議員係唔知道，你係咪會咁樣話畀佢聽？

李大偉先生：我哋會將呢件嘢反映畀運輸署嘅同事聽。

主席：（經傳譯員）但係如果係一個區議會係提出嘅，一陣間我哋都預計會畀啲文件你睇，如果係一個區議員係向警方提出，你係咪會話畀佢聽「呢件事唔係我哋做嘅，係運輸署嘅工作。」係咪咁呢？

李大偉先生：我相信區嘅同事收到呢啲每個唔同區議會嘅議員嘅反映，佢都一定會反映番畀佢當區嘅運輸署同事，由運輸署同事反映番上去呢個檢討工作小組裏面處理。

主席：（經傳譯員）好呀，我哋一陣間睇下發生咩嘢事。

黃女士：（經傳譯員）李生，...

主席：（經傳譯員）等一等，唔該。你就同我哋講過一啲因素，就係話影響車速檢討嘅，即係話多唔多交通意外、嗰啲車輛駕駛者一般駕駛嘅速度或者係嗰啲條路嘅特徵等等，呢啲有冇喺任何書面嗰度可以睇到㗎？

李大偉先生：係會喺報告，除咗報告之外，佢哋係會播巡邏影片嘅，即係會有一架車直頭係去巡邏，去示範嗰條路，即係介紹嗰條路嘅特徵同埋嗰個車輛--道路情況嘅。

主席：（經傳譯員）比較具體咁講，有冇一啲嘅參數或者臨界點係話講到要有幾多嘅交通意外先至可以引發一個檢討呢？

李大偉先生：我唔肯定，但係我相信都會係其中一個考慮因素。

主席：（經傳譯員）但係你所知道就唔會係有一個方程式？

李大偉先生：冇呢條方程式。

主席：（經傳譯員）譬如如果話係意外增加咗百分之五十，喺過去一年多咗百分之五十嘅意外。

李大偉先生：冇一個方程式可以講到。

主席：（經傳譯員）唔該。請繼續。

歐陽先生：（經傳譯員）我想補充一下，關於呢一個工作小組，當你哋開會嘅時候，你哋會唔會係分開重型車輛同埋係普通車輛㗎？

李大偉先生：一般嚟講，都唔會嘅，因為車速普遍嚟講係針對所有唔同種類嘅車輛，除咗一啲巴士或者係小巴已經係--本身已經係呢個車輛可以行咁多車速嘅啫。

歐陽先生：（經傳譯員）好，唔該你。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）首先我跟番個時序，因為我都會同你講番嗰啲事情，根據時間咁樣去發生，一路喺大埔嗰件事一路去到最後個報告，首先，2017年6月5號一封信，喺DC-2(B)嗰一沓文件，係一個投訴，係大埔區議會寫畀警方嘅，DC-2(B)，840-70就係中文，如果英文，就係840-74。

我哋係睇到呢個翻譯嘅，佢係寫畀交通部總部嘅，2017年6月5號，係寫畀中央交通攝錄調查小組嘅，佢係寫畀一位張笑權先生嘅，個題目就係話希望大埔尾同埋一個屋苑之間，請你哋係安裝超速嘅攝錄機嘅，就係話呢一個係發現好多時候喺大埔道好多人喺度鬥車、賽車咁樣，尤其是係放假同埋半夜嘅時候，佢哋發現有一大組嘅，經過改裝嘅車係高速咁樣喺大埔道行駛嘅，佢哋發現有可能係有不合法嘅賽車情況，同埋係令到居民係受到好大嘅嘈雜滋擾嘅。

喺咁嘅情況，如果有交通意外，就會係會撞到啲居民同埋係會造成嚴重嘅人身嘅傷害嘅，因此係希望你哋安裝呢個超速嘅攝錄機，呢個就係喺大埔尾同埋鹿茵山莊之間嗰一段大埔道，希望可以安裝呢啲嘅超速攝錄機嘅。

呢一個就係大埔區議會寫嚟畀警方嘅一個投訴嚟嘅。

主席：（經傳譯員）我哋有冇一個地圖可以顯示到個地點呀？

黃女士：（經傳譯員）有嘅。就係喺大埔尾同埋鹿茵山莊之間，呢一度就係大概嗰個路段，喺中間呢一度，喺中間嗰個部分。

主席：（經傳譯員）我哋肯定睇到大埔尾，呢個當然就係喺2月10號巴士意外嗰個路段嘅附近喇？

黃女士：（經傳譯員）係，冇錯。

主席：（經傳譯員）呢一度有啲字係睇唔真嘅，淨係睇到“Hill Bay”，係咪即係等如“Deerhill Bay”？

黃女士：（經傳譯員）正確嘅，主席。收到呢個投訴之後，香港警方喺2017年6月16號就係回覆咗嘅，請大家睇一睇中文840-71頁，英文就係840-73頁，我哋睇到呢一封信就係警方代表Andrew Lam Chi Hang就係寫畀區議員Chan Siu Kuen嘅，2017年6月16號，佢亦都係副本抄錄畀Paul Chiu Kang Bor，就係運輸署嘅，亦都係抄錄畀大埔嘅指揮官同埋負責交通嘅高級人員嘅。

呢一度就係講到話你哋要求係喺鹿茵山莊同埋大埔尾之間安裝攝錄機，你就話係「主要由運輸署負責嘅，安裝之後，警方就可以執法嘅，我哋就係明白運輸署而家係冇計劃喺呢一個你講嘅路段係安裝固定嘅超速嘅攝錄機，但係同時，警方係會緊密咁監察呢一個路段嘅交通情況嘅。」

呢一度就話運輸署係拒絕呢個要求係安裝超速嘅攝錄機，警方嘅回覆就似乎就話你都冇咩嘢可以做，因為你哋嘅角色只係執法，...

主席：（經傳譯員）你點解咁樣講呢，就話運輸署係拒絕去安裝呢啲攝錄機呢？

黃女士：（經傳譯員）因為有一句嘅，就係話「我哋係理解運輸署現時係冇計劃去安裝固定嘅超速攝錄機嘅，喺呢一個有關嘅路段」。

主席：（經傳譯員）我哋要睇下佢係咪真係咁講。

黃女士：（經傳譯員）我想請問一個一般性嘅問題先，如果你收到大埔區議員一個要求，係講到話要裝置超速嘅攝錄機或者係某一個路段做啲乜嘢嘅，呢一個投設會唔會交畀車速嘅檢討工作小組去講呢？

李大偉先生：我相信係唔會嘅，呢個純粹係一個要求喺道路上面安裝呢個偵測器嘅啫，同檢討道路速度限制係兩回事嚟嘅。

主席：（經傳譯員）我諗佢嘅重點就係話如果你警方有一個機會喺工作小組嗰度提出一啲議程嘅，呢一樣嘢你亦都會唔會係向運輸署去提出，然後睇下佢哋會唔會擺喺呢一個工作小組嘅議程上面呢？

邱倩雯女士：我相信就係我哋警方同個 TD--同運輸署我哋有好多唔同嘅委員會嘅傾談嘅，嘅商討嘅，其中關於要設立呢啲偵速嘅攝影機就唔會喺嗰個速度限制嗰個委員會嗰度傾嘅。

黃女士：（經傳譯員）但係如果有一個具體嘅投訴係區議員提出嘅，就係話要佢哋修改或者係減低一個車速，會唔會終於都去到工作小組呢？

邱倩雯女士：如果係關於速度--個路段嘅速度限制，就會係去番頭先嗰個工作小組嗰度。

黃女士：（經傳譯員）係，就想請你睇 2015 年 7 月 24 號一封信，係由一個嘅大埔區嘅區議員係 Chan Siu Kuen 女士，但係呢個係寫畀運輸署。

主席：（經傳譯員）咪住，李先生，你早前就係話警方如果係接收到一個咁樣嘅要求，就係會轉介畀運輸署，呢一封信其實都係已經抄送咗畀運輸署，嗰個嘅日子--嗰個係 840-73 嗰一封嘅信係咪已經係畀咗運輸署？

李大偉先生：係，冇錯，同意，但係我唔清--我相信佢係--呢封信係副件係去咗運輸署有關於處理一啲安裝一啲新嘅偵速器攝影機嘅運輸署部門，就唔係話佢哋會--呢封信唔會去咗--我相信唔會去到嗰個速度檢討小組嗰個會議上面。據我所知，運輸署係會有一...

主席：（經傳譯員）呢個係另外一點嚟嘅，你就話你會同運輸署方面嘅連繫就係嚟自呢封信，因為呢一封信，你--警方嗰封信係有係畀區議會㗎嘛，亦都係謄本抄送咗畀呢一個運輸署㗎嘛？係，黃女士。

黃女士：（經傳譯員）我未去到講番呢一封投訴信之前，我想去睇一睇大埔區議會嘅會議紀錄，喺第二次嘅會議，2015年3月13號，中文文件840-81頁，而英文就係840-91頁。呢一度出席嗰度，喺最底嗰度，就係大埔警區嘅交通部嘅主管，另外亦都有大埔區嘅或者係房署嘅大埔當區嘅負責人或者係代表，亦都有警方嘅代表喺呢個會議度嘅。

去番840-92頁嗰度，喺79段，嗰度係有一個特定嘅要求，係日本學校，嗰度係要求喺大埔坳嗰度嘅路段嘅車速係要係限制嘅，喺79段嗰度就主席就係表示收到日本國際學校嘅呢一封信，要求將呢一個嘅學校前面嘅路段嘅車速就係由每小時70公里就減到50嘅，佢亦都係邀請呢個委員會去到呢一間嘅國際學校同佢哋學生去討論下佢哋附近嘅交通。主席係要求運輸署首先就係去回覆話要求降低車速上限呢一個嘅請求。

第80段，Wong Kwok Leung先生回應日本國際學校建議將呢一個學校前面嗰個路段嘅車速限制由70減到去50，因為係喺2014年喺呢一段大埔路嘅路段，喺學校前面係有一個交通意外，有一位公眾人士係死亡嘅，運輸署同埋警方就係研究緊呢一個交通意外嘅成因，未必一定係關乎呢一個路段嘅車速限制，可能係包括埋駕駛嘅態度同埋到底嗰個行人嘅視線係咪被遮住咗。運輸署亦都會係睇下現時呢一條路段嘅車速限制係咪合適，另外，運輸署就係會向學校畀一個臨時嘅回覆，係農曆年之後，之後就會畀一個更加詳細嘅回覆嘅。

主席：（經傳譯員）可唔可以畀我哋睇下嗰個地圖？

黃女士：（經傳譯員）呢度，21同埋22之間，香港日本人學校。

主席：（經傳譯員）我哋將佢再放番闊啲，睇到成個嘅情況，即係由意外嗰個地點，由沙田一路揸車去大埔，沿路嘅，係咪呀？

黃女士：（經傳譯員）啱。

主席：（經傳譯員）唔該。係。

黃女士：（經傳譯員）呢一個係一個特定嘅要求，係由一間學校提出嘅，警方係有代表出席呢個會議，當時係有投訴嘅，對呢個問題，亦都係要求將個車速上限降低。通常呢啲會唔會係畀嗰個工作小組嚟到去討論㗎？

李大偉先生：根據會議紀錄，我相信出席嗰個警察嘅同事就係屬於大埔區交通組嘅警長嚟嘅，我睇番個會議紀錄就係睇到係區議會要求運輸署去檢討當段嘅速度嘅，我相信運輸署收到呢個訊息之後，應該係會將佢帶番去運輸署畀個工作小組去考慮將佢擺落去個議程上面，或者係進一步去檢視下呢段路應唔應該去做個檢討嘅。

主席：（經傳譯員）即係話係會由警方代表，將個訊息傳遞畀工作小組，係咪呀？

李大偉先生：由於嗰次會議我睇到主要都係運輸署同事喺個會議上面解答區議會所--

呢個問題，我相信運輸署--警方係唔會再重複番轉達番區議會嘅意見畀番運輸署。

主席：（經傳譯員）唔係嗰個運輸署，而家係講緊嗰個工作小組，警方會唔會自己係將呢一個訊息係畀工作小組？因為叫佢哋考慮喺議程度講呢樣？

李大偉先生：我相信唔會，因為當日係由運輸署同事負責解答呢個問題。

黃女士：（經傳譯員）我未繼續之前，如果有人對於某個路段有投訴，警方係需唔需要係制定關乎嗰個路段嘅統計數字，睇下呢個投訴係咪有利呢？

李大偉先生：警方如果收到類似上述嘅投訴，係轉介畀運輸署同事處理嘅，我哋係唔會做任何呢啲統計或者係去做調查。

黃女士：（經傳譯員）我咁樣理解你嘅口供啱唔啱呢？雖然你有警方嘅代表出席嗰個會議，當時亦都有一間學校去投訴，亦都有一個嘅事件喺嗰個路段係有人死亡，即係嚴重嘅死亡事件，但係警方都唔會係進一步嘅調查，除非運輸署要求佢咁做，係咪？係咪咁樣嘅立場呀你哋？

李大偉先生：我相信喺嗰次會議上面警方係會調查交通--喺會議紀錄上面，警方係會調查交通意外個成因同埋調查嘅，而運輸署係個問題嗰個--今次佢就住嗰個會議，我睇到係區議會向運輸署提問，同埋要求有關於該段路段應該係去檢討嗰個速度限制，我睇唔到兩個有咩嘢關係，關於警方話我哋冇做任何適當行動去轉達呢個意見。

黃女士：（經傳譯員）你知唔知道運輸署有冇要求呢一個路段嘅交通意外嘅統計數字呢？

李大偉先生：頭先喺上晝嘅證供裏面，其實運輸署同我哋警方嘅意外數字係互通嘅，佢係有我哋啲意外數字。

黃女士：Now, four months after these minutes of...

主席：（經傳譯員）你未繼續之前，個問題就係喺 2017 年有一個投訴--2015 年有一個投訴，就係關於 2014 年嘅傷亡數字，運輸署當時會唔會係即係問--2015 年嘅時候問一啲嘅數字，一啲嘅--唔係 2018 年，係 2015 年嘅時候，你明唔明白嗰個嘅分別？

李大偉先生：我明白，嗰個最主要就係運輸署係唔會問我哋攞交通意外嘅資料嘅，因為本身我哋嘅系統係互通，佢係有晒我哋所有相關嘅資料。

主席：（經傳譯員）即係佢哋可以自己喺一個共用嘅訊息嘅系統去攞，佢哋唔需要問你嘅，係咪呀？

李大偉先生：係，同意，冇錯。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）嗰個會議紀錄之後四個月，就有一封嘅跟進嘅信件，就係大埔區議員2015年7月24號嘅個日期，喺DC-2(B) 840-78頁，呢個係中文，英文就係840-88頁，如果我哋睇下第二段，呢封信就係2015年7月24號Chan Siu Kuen女士喺第二段嗰度話--第一段先，第二行，佢哋係從大埔道附近嘅居民收到一啲求助嘅請求，呢個係因為喺呢一個屋苑嘅轉角位嗰度係冇一個交通嘅時速限制嘅標誌，所以好多時候都係有交通意外，去確保道路使用者嘅安全，我哋希望你個部門儘快咁樣喺呢度裝一個嘅標誌，就係話車速嘅限制係50，就係去提醒駕駛者係去呢度揸車係以一個安全嘅時速，就避免不必要嘅意外，呢個就喺呢一個翡翠花園附近嘅。

喺通常嘅情況，呢一啲咁嘅信會唔會係去到呢個工作小組手上嘅呢？

李大偉先生：我相信呢封信主要都係講話要求加裝一啲交通標誌，就唔係有關於要求檢討個速度限制，我相信呢封信係唔會去到個工作小組度。

主席：（經傳譯員）嗰度當時嘅車速係幾多，限制係幾多？

李大偉先生：我冇呢方面嘅資料。

主席：（經傳譯員）黃大律師，我哋有冇呀？

黃女士：（經傳譯員）係時速係70，我哋從陳先生嘅證供，就唔係淨係得封信嘅，其實係有電話嘅通話，要求係降低呢度嘅車速限制去到50嘅，呢個只係一封跟進嘅信嘅，係嗰個同運輸署通完電話之後。

主席：（經傳譯員）有冇嗰個謄本嘅頁數，等我哋可以去理解下嗰啲嘅證供？

黃女士：（經傳譯員）可以，我要搵一搵，因為我都係臨時諗到呢一點，啱啱記得呢一點

主席：（經傳譯員）我自己都係熟悉嘅，呢一點。

黃女士：（經傳譯員）請畀少少時間我。

主席：（經傳譯員）冇問題，慢慢。

黃女士：（經傳譯員）主席，係第4日，第9頁。

主席：（經傳譯員）日子呢？

黃女士：（經傳譯員）第4日，唔好意思，應該係第6頁--第6日第9頁。

主席：（經傳譯員）嗰日係幾多號呀？

黃女士：（經傳譯員）7月14號。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）喺呢一頁第 18 行，陳笑權先生喺嗰陣時應該係關於頭先我哋傾嘅嗰件事，佢話「當時運輸署冇直接回覆畀我，不過我同佢哋講過電話，佢哋就話如果個速度係減到 50，佢哋就會係要諮詢居民同埋啲業主法團，喺 2014 年喺香港日本人學校附近就喺嗰個路口係有一個交通意外，有人受傷嘅，運輸署就向我回應，就話如果嗰個速度係減到 50，運輸署係要進行研究嘅，而喺嗰個意外之後，佢哋就係向居民呼籲就係要遵守交通嘅規則嘅。就話如果真係要去減到 50，佢哋係要做好多嘅諮詢，同埋亦都要同警方去聯絡嘅。我就一路等，我一路都同佢哋聯絡，運輸署嘅王生就調走咗，好遺憾，我哋就喺大埔尾嗰度有呢個交通意外，我就再接觸警方，因為運輸署幫唔到我哋，我請警方就係安裝超速攝錄機，而我一路都有跟進。」

李生，呢個係陳生畀嘅證供嚟嘅，就唔係淨係信，佢亦都係有跟進，同你哋講電話，同埋佢係不斷重複佢嘅要求，似乎係咁樣一路做緊，請問點解喺呢一個個案個情況係咁？

主席：（經傳譯員）個背景就係我哋自己提醒番自己，就係有一位區議員寫咗信畀運輸署。

黃女士：（經傳譯員）係正確嘅，主席。

主席：（經傳譯員）有可能你唔知點解運輸署冇做過嘢？

李大偉先生：我相信呢封信純粹係運輸署同埋寫信嗰個人士嘅溝通，我哋冇得喺呢度畀任何意見，亦都冇任何紀錄關於呢啲咁嘅事件。

黃女士：（經傳譯員）我咁樣講正唔正確呢？喺工作小組裏面，警方嘅角色可以話好似一個橡皮圖章咁樣，係冇任何積極嘅角色嘅？你唔會要求運輸署做任何嘢嘅？

李大偉先生：警方嘅參與喺個工作小組絕對唔係一個橡皮圖章嚟嘅，我哋會審視晒所有佢哋嘅報告，我亦都會諮詢番地區嘅--喺嗰個地點嘅總區交通嘅同事嘅意見，有關於運輸署工作小組提出嘅建議，我哋會諮詢番我哋前線同事佢嗰段路段如果係嗰個建議，係有咩嘢睇法，從而我哋喺個會上就反映我哋警方嘅意見畀個工作小組知嘅。

主席：（經傳譯員）或者我哋用另外一個方法去問一問呢個問題，就係話究竟去到咩嘢嘅程度，警方可以話係有一個積極嘅角色去提出一啲建議，譬如話我哋係關心呢一個路段嘅車速，我哋認為應該檢討，你會唔會咁做？

李大偉先生：我相信一定會有嘅，特別係喺一啲嚴重交通意外發生或者經常發生交通意外嘅地方，每個總區嘅交通都係會根據調查之後嘅結果，係會向運輸署提供唔同嘅意見嘅，包括就係速度檢討嘅議題，呢個工作一般嚟講都係交畀番五個陸上嘅交通--警方嘅交通部嘅同事，喺佢哋調查之後，由交通部向運輸署嘅區-

-即係運輸署嘅適當部門反映番每個區嘅需要嘅。

主席：（經傳譯員）你可唔可以畀一啲例子我哋？即係我哋說明你一個積極嘅角色，或者係一啲書信。

李大偉先生：手頭上我--因為一般嚟講，呢啲地區嘅來往，即係由總區同埋運輸署嘅地區嘅同事，我哋一般我哋係冇記錄嘅。

主席：（經傳譯員）咁一定喺某啲地方有紀錄㗎？

李大偉先生：我相信會有，但係要諮詢...

主席：（經傳譯員）我哋而家就係想請你畀呢啲我哋，可唔可以畀啲例子我哋，說明話畀我哋聽警方如果喺某個地方係有一啲意外嘅，「我哋呢個警方亦都係會有一個積極嘅角色就會去同人哋講，就話可能都要係減低嗰個速度。」有冇一啲例子？

李大偉先生：我哋可以返去諮詢下，我哋會攞番呢個紀錄嘅，我哋會返去諮詢下啲同事。

主席：（經傳譯員）我哋而家就係想咁樣，即係有一啲嘅說明，有一啲嘅證據可以顯示出警方都有一個積極嘅角色。

黃女士：（經傳譯員）或者畀個例子你，如果你收到一定數目嘅投訴，因為我相信其他嘅區議會或者係居民都可能會投訴嘅，如果有多過三個路段係需要討論嘅，你點樣去選擇呢？三個嚟去討論呢，即係如果有人投訴嘅路段係多過三個。

主席：（經傳譯員）你好似講到係--啲人為嘅一啲限制咁樣，係咪每一個會你有一啲咁樣嘅限制？

李大偉先生：要視乎佢哋投訴嗰啲係咩嘢性質，交通投訴有好多唔同嘅性質嘅，處理投訴都係會由--市民都會係去--如果向警方投訴嘅話，區嘅同事或者係總區交通嘅同事都會相應處理嘅。

黃女士：（經傳譯員）或者我哋而家繼續睇嗰個時序，而家就係喺意外之後，大埔區議會 2018 年 2 月 12 號開過會嘅，我哋可以睇 DC-2 嗰一沓文件 785 頁，其實英文版本嘅會議紀錄係 782 頁就開始，喺第 5 段，我相信警方嘅代表係參加咗呢一個會議，就係 Chau Chung Mun，就係一位警司嚟嘅，係屬於新界北嘅交通警區嘅。

喺第 5 段嗰度，呢位 Chau 先生就話除咗 2018 年 2 月 10 日嗰一次嘅意外之外，佢係講到另外一啲嘅個案，係警方 2017 年嘅時候偵破嘅，係關於交通違例事件。

請大家睇呢一段嘅中間部分。佢話「2017 年警方拘捕咗四個人，包括兩個飲醉酒嘅司機，一個就係危險駕駛，一個就係同毒品有關嘅罪行嘅，警方總共

發出咗三十二張定額罰款嘅票，就係喺 2017 年喺呢一個路段嗰度，就係因為有人超速，同埋係有其他嘅交通違例事件嘅，總共係有二十九個交通意外，就係喺赤泥坪同黃宜坳呢一段嘅，就喺大埔道嗰度，有其中兩個係比較嚴重嘅，雖然嗰一度當時係冇超速嘅攝錄機，警方都係會採取行動，不時係用一啲嘅偵察嘅器材都喺呢一個路段嗰度係偵察車速嘅，警方亦都係會完成有關嘅調查程序嘅。」呢位鄒先生係提及到曾經有二十九次嘅交通意外喺呢一個路段嗰度。

主席：（經傳譯員）不如我哋又睇番個地圖，睇番有關嘅路段。

黃女士：（經傳譯員）赤泥坪至黃宜坳，...

主席：（經傳譯員）赤泥坪喺邊度呀？好，見到喇，唔該。黃宜坳呢？好，唔該晒。

黃女士：（經傳譯員）李生，我個問題係咁嘅，有二十九個交通意外，三十個係關於超速，三十二個就係關於發出咗定額罰款嘅告票嘅，喺 2017 年嘅時候，你認為有咁樣嘅統計數字係咪應該令到警方有足夠嘅理由去將呢一個特別嘅路段應該喺工作小組嗰度提出嚟討論呢？

李大偉先生：要視乎呢二十九宗交通意外嗰個交通意外嘅成因係乜嘢，先可以決定應唔應該係咪--因為係咪二十九宗裏面有幾多單係關於車速嘅問題而引致交通意外，亦都係一個考慮因素，就呢個當有--我諗要留番畀當區嘅總區交通決定需唔需要將佢提交畀運輸署去檢討。

黃女士：（經傳譯員）你就參加過幾次工作小組嘅會議，你可唔可以話畀我哋聽呢一類嘅統計數字係咪都會交畀個工作小組㗎？即係交通意外嘅數字。

李大偉先生：佢哋會檢討個交通意外數字嘅，整理嚟講，每一年對比其他路段交通意外嘅平均率--發生意外率嚟作出比較嘅。

黃女士：（經傳譯員）之前，你作供嘅時候，即係喺早上嘅時候，你就話工作小組就係會每一次睇三個路段六個方向，你參加過嘅會議裏面，你有冇見過某一個嘅路段最後係減速嘅呢？

李大偉先生：喺我印象之中係有嘅，係有嘅，不過就唔係因為交通意外，係因為附近嘅大型基建嘅工程問題而作出嘅調動嘅啫。

黃女士：（經傳譯員）有冇試過一次事件係減低嗰個車速，就係因為喺某一個路段係有交通意外呢？

李大偉先生：由於我出席過只不過係兩至三次，我唔敢肯定，喺我兩、三次裏面應該就係冇，應該就冇試過因為交通意外而需要檢討決定就係建議去減低個速度嘅。

黃女士：（經傳譯員）我而家可唔可以請你睇呢一連串文件嘅最後一份文件，就係一份資料文件，由警方寫畀大埔區議會嘅，就係 2018 年 4 月 9 號，TD 第 5 號文件夾 1617 頁，呢個係翻譯嚟嘅，中文嘅文件就係喺 1611 頁。

我首先描述一下呢一份文件先，呢一份文件係運輸署 2018 年 4 月 9 號寫嘅，佢嘅題目就係話大埔道駿景路沙田至雍宜路嘅交通管理措施，嗰個文件嘅目的就係話大埔區議會喺 2018 年 2 月 12 號開咗一個特別嘅會議去討論 2018 年 2 月 10 號傍晚嘅一宗嚴重巴士意外，運輸署就承諾去檢討呢一個路段嘅車速限制同埋交通管理措施，因為當區嘅關注，仲有區議會嘅關注就係到底呢啲改善措施實施嘅進度如何，呢一份文件就係想話畀議員聽呢一個運輸署去檢討呢一個路段嘅車速限制同埋其他嘅跟進改善措施嘅進度。

第 2 段就係話呢一個路段嘅車速限制係檢討咗。第 3 段就係話運輸署成立咗一個恆常嘅機制去檢討呢一個路段嘅車速限制去確保係交通安全同埋安全暢順嘅。

跟住第 2 頁，1617-2 就係話喺去檢討呢一個路段嘅車速限制嘅時候，有三個嘅因素係要考慮嘅，首先，呢一個路段嘅交通意外紀錄，第二，行呢一個路段嘅車輛嘅車速，另外就係個道路嘅環境，一啲特徵，譬如佢嘅斜度、駕駛者嘅視線、有冇路口、行人嘅交通等等。

「喺過去嘅兩個月，運輸署就係全面咁檢討過呢一個路段係舊年嗰個嘅意外紀錄，亦都係去評估過一啲嘅情況嘅，喺赤泥坪同埋雍宜路呢一個路段，我哋正話睇到呢一度嘅交通意外率係有上升嘅趨勢，亦都係比香港去年嘅整體嘅平均意外率係高嘅，而呢一度過去嗰幾個月，呢一度去偵測到佢哋車輛嘅速度就係比過去同埋一般係低過 70 公里嘅。另外亦都有好多大型嘅發展喺附近嘅，而家其實係有需要將呢度嘅車速下調嘅，我哋建議係將嗰個每公里 70 嗰個嘅時速係降低到 50，嚟到去改善道路嗰個安全嘅。」

另外，我哋而家睇第 6 段，「運輸署同埋警方亦都開始係著手喺呢度安裝新一批嘅偵速嘅攝影機就係加強嗰個阻嚇同埋執法，等啲人係唔好係超速嘅。而家運輸署就係搵緊資源，就希望係喺呢一個赤泥坪大埔道附近嗰一段路，喺今年年尾之前就裝咗呢啲嘅車速偵察攝錄機嘅。」

喺兩個月裏面，呢一個意外兩個月裏面，運輸署就已經係檢討咗--佢話佢係全面咁檢討咗呢啲嘅交通意外報告，就建議將呢度嘅車速限制係下調到 50 嘅。

我而家有兩個問題，第一，係以你部門嚟講，有關嘅數字有冇係之前有冇提供過畀運輸署嘅呢？喺意外之前。

主席：（經傳譯員）唔好意思，你可唔可以係講得具體啲，呢個問題？

黃女士：（經傳譯員）呢度嘅路段嘅交通意外數字有冇喺大埔道呢一個嘅即係 2018 年 2 月 10 號之前係向運輸署提供過呢？

主席：Thank you.

李大偉先生：印象之中，我冇喇。

黃女士：（經傳譯員）你知唔知道呢一個嘅路段有冇曾經係畀呢一個工作小組討論過嘅呢？即係喺 2018 年 2 月 10 號嗰個交通意外之前，有冇討論過呢？

李大偉先生：據我紀錄嚟講，我就見唔到喇。

黃女士：（經傳譯員）陳生，我就想去講另外一個嘅題目，除非主席係關於呢個項目係有問題。

主席：（經傳譯員）好呀，唔該，畀少少時間我。4 月 9 號嗰個嘅建議就係話安裝一啲嘅車速嘅偵察攝影機嘅，有冇嗰個地圖呀？

黃女士：（經傳譯員）據我所知，係應該係 2018 年尾嗰先至係安裝到呢啲攝錄機嘅。

主席：（經傳譯員）係邊度呀？

黃女士：（經傳譯員）係 1617 頁第 5。

主席：（經傳譯員）嗰幅圖喺邊度？

黃女士：（經傳譯員）右手面，右下角嗰度話初步建議固定偵察車速攝影機位置，初步建議固定偵察車速攝影機嘅位置。

主席：（經傳譯員）唔該。可唔可以幫下我哋，就係採取咗咩嘢步驟去裝呢啲嘅攝影機？首先，就要嗰個預算，即係有錢，根據 4 月 19 號嗰個文件，到底係有冇錢係喺呢度安裝呢？幫唔幫到我哋呢？

邱倩雯女士：我可以講一講嗰個固定嘅偵速攝影機，呢個都係主要由運房局同埋運輸署嘅工作範圍，喺其實 2017 年嘅大概 7 月嗰，其實運房局嗰度已經展開另一個階段嘅衝紅燈嘅攝錄機同埋個偵速嘅攝錄機嗰個諮詢，喺就嗰個地地點嘅選擇咁樣，同埋邊一類型嘅攝影機，事實上喺 2017 年嘅年中已經係做緊，喺大埔嘅巴士意外之後，亦都運輸署已經係同我哋嘅攝影機嘅檢控組，我哋係叫 CTCIU，係 Central Traffic Camera Investigation Unit，係喺警察嘅交通總部嘅，咁樣都已經同我哋 CTCIU 呢一個嘅單位就係去睇下點樣去落實呢一個喺大埔交通意外嗰度嗰個地點嗰度嗰個偵速機嗰個設計咁樣。

主席：（經傳譯員）但係嗰個嘅意外係六個月前㗎囉喎，我哋而家有咩嘢進展呀？

邱倩雯女士：我知道就係而家運輸署已經攞咗有錢喺度，就會儘快咁樣喺嗰度設立偵速嘅攝錄機。

主席：（經傳譯員）幾時呀？

邱倩雯女士：我唔知道實際嗰個日期，但係以我所知，係佢哋已經落實咗嗰個地點同埋已經有錢可以做。

主席：（經傳譯員）根據你講，呢個係運輸署嘅責任，唔係警方嘅責任，係咪呀？

邱倩雯女士：冇錯。

主席：（經傳譯員）佢哋提供咗資料畀你，話佢哋諗住點樣做？

邱倩雯女士：冇錯，冇錯。同埋呢一個喺大埔嘅攝錄機亦都係喺整體上面，我頭先講話係 2017 年嗰個新一期嘅紅燈、快相嘅偵測機嗰個計劃裏面嘅其中一部分。

主席：（經傳譯員）但係就唔係當時話係特定喺呢個地點，當時只不過係話去檢討下喺邊度裝啲新嘅 camera？

邱倩雯女士：冇錯，係。

主席：（經傳譯員）我嘅記憶啱唔啱呢？就係之前就好似係白令嘉先生就係話有二十四個--香港有二十四個嘅固定偵緝嘅車速攝影機。

邱倩雯女士：冇錯，yes，而家係有二十四部嘅偵速機喺一百三十個唔同嘅地點嗰度係運行緊嘅，（經傳譯員）一百三十個地點。

主席：（經傳譯員）我唔係幾明，點解喺一百三十個地點，點解係可以裝到二十四個嘅攝影機？

邱倩雯女士：呢個係不定期咁樣就將呢啲嘅偵速機就擺喺唔同嘅地點嗰度，希望係可以係加...

主席：（經傳譯員）即係周圍搬嘅？

邱倩雯女士：冇錯。

主席：（經傳譯員）佢哋唔係固定喺一個地點嘅？

邱倩雯女士：唔係嘅。

主席：（經傳譯員）即係佢哋某一段時間擺定喺一度，但係都會搬來搬去嘅？

邱倩雯女士：冇錯，呢個亦都係喺運房局喺同立會攞錢嘅時候，有一個比例喺度嘅。

主席：（經傳譯員）香港有成四十萬公里嘅道路。

邱倩雯女士：我可以講而家最新嘅商談，咁樣係希望就將每一個地點，即係每一個 housing 都可以擺一個攝錄機喺度，呢個亦都係而家主要商討嘅重點。

主席：（經傳譯員）我嘅問題係更加具體，香港係咪有大概 4,000 公里嘅道路？

邱倩雯女士：係。

主席：（經傳譯員）但係就得二十四個嘅攝影機？

邱倩雯女士：冇錯。

主席：（經傳譯員）喺一啲明文嘅司法管轄區，係咪都係咁樣嘅比例㗎？係咪最低呀我哋？

邱倩雯女士：我明白主席所說嘅話。

主席：（經傳譯員）黃大律師，我哋今日係咪去到五點半㗎？

黃女士：Yes.

主席：（經傳譯員）如果係咁，我哋就有一個小休，而家係咪一個合適嘅時間？

黃女士：Yes. Thank you, Mr Chairman.

主席：（經傳譯員）我哋而家小休十五分鐘，唔該。

下午 4 時 13 分聆訊押後

下午 4 時 28 分恢復聆訊

出席人士如前。

主席：（經傳譯員）黃律師，請開始。

黃女士：（經傳譯員）我開一個新嘅題目之前，或者我請大家睇一睇 SEC 嗰一沓係 1360 段，呢一個就係 2018 年 2 月 15 號一個特別會議嘅會議紀錄，我想你睇一睇 1360 頁，嗰度係有三個動議係通過咗嘅，係當時喺立法會嗰度，我唔會全部都讀晒出嚟嘅，我只會讀其中一段係有可能有關嘅，即係佢會同我一陣間問嘅問題係相關嘅，呢個係第二個嘅動議。就係請佢哋係「安裝一啲防滑嘅路面同埋係有一啲嘅額外嘅係減速警示牌，放置呢個偵速攝影機，並檢視全港高危路段及儘快提升相關安全設施，以保證道路使用者安全」...

呢一個動議係由立法會通過嘅，關於呢一點，我想問警方有冇成立一個獨立嘅部門去處理全港高危路段嘅安全問題呢？

邱倩雯女士：我可以答就係喺呢份文件，我哋之前就冇見過，咁樣喺呢個第二段嗰度所講嘅建議，主要我哋有涉及嘅就係嗰個偵速嘅攝錄機，頭先亦都有提過，喺偵速攝錄機嘅時候，我哋嗰個研究或者我哋嘅討論其實由舊年已經開始，而大埔公路呢個意外之後，我哋亦都知道運輸署嗰度已經係做緊一啲--會將會喺嗰度起一個攝錄機，至於其他嗰啲方面，我哋冇任何嘅 set up--即係成立乜嘢委員會咁樣。

黃女士：（經傳譯員）運輸署就諮詢你哋，希望你哋提供某啲路段嘅某啲嘅交通意外

嘅數字，有冇呢？

邱倩雯女士：我哋冇收到運輸署嘅特別要求。

黃女士：（經傳譯員）我就知道警方係有一個數據庫，係關乎一啲交通意外嘅黑點，係咪呀？

白令嘉先生：（經傳譯員）我哋係有一張係交通意外黑點嘅清單，呢啲嘅地點係由運輸署嚟到係劃分嘅，呢一個地點點樣成為一個黑點呢？嗰啲嘅準則就係如果有喺一個十二個月期內有六宗涉及行人嘅意外，同埋喺一個十二個月期內有九宗係有任何嘅受傷或者喺五年裏面有兩宗有死亡嘅個案，呢個就係每三個月就係會更新一次嘅。

黃女士：（經傳譯員）嗰張清單係公眾知唔知㗎？

白令嘉先生：（經傳譯員）老實講，我就唔知道個答案，呢個問題。

主席：（經傳譯員）相信你可以去查一查，然後話番畀我哋聽。

白令嘉先生：Yes, Sir.

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）你提到一個嘅地點就會劃分為黑點，如果喺五年裏面有兩宗涉及死亡嘅事件，一旦一筲地方被列為黑點，會有啲乜嘢嘅安全措施會建議喺呢一個嘅路段度實施呢？

白令嘉先生：（經傳譯員）從警方嗰個嘅角度，我哋嘅責任主要就係執法，我哋咁多個部門嚟到合作，可能係一個道路工程方面，亦都可能係宣傳，亦都係目的就係要減低呢一度再發生意外嘅可能。

黃女士：（經傳譯員）巴士公司會唔會都係獲告知呢啲嘅黑點呢？

白令嘉先生：（經傳譯員）我要查下先至知道。

主席：（經傳譯員）可唔可以幫到我哋運輸署係咪會有--你會唔會將呢個名單交畀運輸署？

白令嘉先生：（經傳譯員）其實係運輸署制定呢個交通黑點嘅名單。

主席：（經傳譯員）所以應該嗰個係咪要發布個消息應該係佢哋做嘅，係咪呀？

白令嘉先生：（經傳譯員）係。

主席：（經傳譯員）佢哋嘅文件？

白令嘉先生：（經傳譯員）係，佢哋嘅文件。

羅先生：（經傳譯員）其實就喺運輸署個網站上面有公布嘅。

主席：（經傳譯員）或者搵人去睇一睇運輸署嗰個嘅網站，睇下係咪有。

黃女士：（經傳譯員）我想去另外一個嘅題目，就係交通安全委員會，我就係想睇SEC嘅文件第481頁。

主席：（經傳譯員）SEC嘅乜嘢？邊一沓嘅文件？

黃女士：（經傳譯員）應該係SEC-1，481，就係我哋今朝見過嘅一個核數署嗰個嘅報告，呢度就係講到道路安全議會，佢嘅成員我哋見到係副警務處處長（行動）做主席嘅，另外有七個嘅政府署或者係局或者係部門嚟到代表嘅，呢個運房局、運輸署、呢個新聞署同有六個非常政府機構，包括埋一啲嘅運輸委員會，另外有兩個委員會就係呢一個道路安全宣傳委員會同埋呢一個嘅研究委員會嘅。

呢度就係話道路安全議會係由副警務處處長（行動）嚟到去做主席，佢係咪有定期會議嘅呢，關於一啲嘅交通數字，以減低同交通相關嘅傷亡呢？

白令嘉先生：（經傳譯員）係嘅，佢係每季開一次會嘅，就係會睇下一啲交通意外嘅趨勢，而嗰啲趨勢就係睇嗰啲數字。

主席：（經傳譯員）我想問今日在座嘅代表有冇邊一個係喺呢一個嘅議會嘅一個成員？

白令嘉先生：（經傳譯員）有，我係喺過去嗰兩次嘅會議，我都去出席嘅。

黃女士：（經傳譯員）警方喺呢一個道路安全議會扮演咩嘢角色㗎？

白令嘉先生：（經傳譯員）警方就係做呢一個秘書處，統籌會議，亦都喺嗰啲部分嘅小組委員會上面係有代表，譬如話嗰個道路安全運動委員會。

黃女士：（經傳譯員）喺呢個道路安全議會一般討論啲乜嘢㗎？除咗交通意外嘅數字之外。

白令嘉先生：（經傳譯員）喺上兩次嘅會議，我可以話嗰個嘅會議主要係集中喺道路安全嘅趨勢，亦都有討論到一啲譬如話無人嘅駕駛嘅車輛，呢啲咁樣嘅專題嘅項目。

主席：（經傳譯員）會唔會係有一啲嘅文件係會公布嘅呢？

白令嘉先生：（經傳譯員）冇嘅。

主席：（經傳譯員）佢嘅會議紀錄會唔會公開嘅呢？

白令嘉先生：（經傳譯員）冇嘅。

黃女士：（經傳譯員）嗰啲會議會唔會係提出建議畀嗰七個嘅政府部門點樣去改善道

Transcript by Epiq Hong Kong, Limited

路嘅安全，特別係關乎巴士安全方面，有冇嘅呢？

白令嘉先生：（經傳譯員）喺上兩次嘅會議係冇討論過呢啲嘅項目。

黃女士：（經傳譯員）呢個議會如果見到佢有一啲關於巴士安全嘅某方面，佢哋可唔可以向運輸署或者不同嘅呢度所提過嘅局係作出建議嘅呢？

白令嘉先生：（經傳譯員）我相信可以嘅。因為不同嘅政府部門都有代表喺呢一個議會裏面，而呢一個議會嘅整體目標就係減低交通意外嘅數字。

黃女士：（經傳譯員）呢度講到有兩個嘅委員會嘅，有道路安全運動委員會、道路安全研究委員會，可唔可以話畀我哋聽呢個道路安全運動委員會係有咩嘢成員㗎？

白令嘉先生：（經傳譯員）道路安全運動委員會嘅主席就係道路安全議會嘅其中一個非官方嘅成員。

主席：（經傳譯員）你意思即係唔係嚟自政府嘅成員？

白令嘉先生：（經傳譯員）係。喺呢一個委員會亦都係有香港--我哋即係警方方面嗰個道路安全組，另外就係呢一個私人界別裏面喺公共關係方面嘅一啲專家。

黃女士：（經傳譯員）佢哋係會唔會定期開會嘅呢？

白令嘉先生：（經傳譯員）會，佢哋我相信每季開一次會嘅。

黃女士：（經傳譯員）佢哋會唔會--呢個委員會有冇會議紀錄嘅呢？

白令嘉先生：（經傳譯員）我而家喺度查緊。

黃女士：（經傳譯員）唔該。會唔會道路安全運動委員會會唔會討論話對於巴士司機方面嘅襲擊？

白令嘉先生：（經傳譯員）冇嘅，佢主要討論係點樣將道路道路安全嘅訊息嚟到去帶到畀唔同組別嘅人士，譬如話老人家、後生仔咁樣。

黃女士：（經傳譯員）關於道路安全研究委員會有咩嘢成員㗎？

白令嘉先生：（經傳譯員）或者由邱小姐可以幫手。

邱倩雯女士：The chairman of the--我講番中文。嗰個 research committee 嗰個主席就係 Deputy Commissioner of TD。另外嘅委員有警方，有路政署，有 TD 本身佢唔同單位嘅工程師，即係唔同單位嘅主管，亦都喺個委員會裏面會係間中會有一啲嘅 consultancy，會係做一啲解說咁樣，通常都係由運輸署去請佢哋去做一啲研究，喺嗰個會裏面就會係有一啲嘅講解。亦都個委員會會有譬如係大學嘅講師，有關於交通事務嘅專家會喺個委員會裏面嘅。

主席：（經傳譯員）交通嘅專家，佢哋本身係一啲咩嘢職位嚟㗎？做啲咩嘢？

邱倩雯女士：以我所知，係有一啲嘅大學講師，但係佢哋主要嘅交通範疇喺邊度，我就唔太清楚。

黃女士：（經傳譯員）佢哋係咪都係定期開會嘅呢？

邱倩雯女士：會嘅，我哋每三個月，每季我哋會開一次會。

主席：（經傳譯員）你係咪參與呢個委員會嘅？

邱倩雯女士：冇錯，我係。

主席：（經傳譯員）而家？

邱倩雯女士：係。

主席：（經傳譯員）你已經代表咗警方幾耐？

邱倩雯女士：我由舊年嘅 2017 年 4 月開始，當我到任喺交通總部呢一個崗位嘅時候，我就開始有參與呢個會議，但係對上兩次我就冇去到，因為有其他公務，就有其他同事代去嘅。

主席：（經傳譯員）但係你一路都知道係傾咗啲乜嘢，係咪？肯定。

邱倩雯女士：係。

黃女士：（經傳譯員）即係你傾過啲乜嘢？

邱倩雯女士：以我所記得嘅，就未必係全部，例如有一啲細路仔嘅安全帶，喺車裏面，細路仔嘅安全帶，亦都有提過就係延長交通燈號綠公仔讓行人可以有長啲嘅過路時間，例如畀老人家嘅長啲嘅過路時間，有一個--我哋而家講嘅walkability，即係行人--多啲行人去行路，即係呢個係我印象所及嘅其中幾個嘅研究報告。

黃女士：What about technological

主席：（經傳譯員）等一等先。呢一啲嘅研究係咪公開可以攞到嘅？

邱倩雯女士：呢個我唔係太清楚。

黃女士：（經傳譯員）你開會有冇會議紀錄？

邱倩雯女士：有嘅。

主席：（經傳譯員）你只不過係 2017 年 4 月先參與呢個委員會，當然而家都差唔多十八個月，好肯定你係可以睇到以前嘅紀錄嘅，係咪？

邱倩雯女士：可以搵到嘅。

主席：（經傳譯員）肯定如果你想做得好呢個工作，你係要睇番以前嗰啲嘅物料、資料。

邱倩雯女士：對於再之前嘅報告我就冇特別去睇過。

主席：（經傳譯員）黃律師。

黃女士：（經傳譯員）因為呢一個委員會叫做道路安全研究委員會，佢哋有冇傾過喺啲路段嗰度或者喺啲繁忙嘅道路，譬如話喺德輔道中嗰啲，會唔會將佢減速，有冇傾過呢啲問題呢？

邱倩雯女士：以我印象中，就冇特別提過，即係關於減低速度，冇。

黃女士：（經傳譯員）一般嚟講，巴士安全有冇傾過呢？

邱倩雯女士：冇，我要返去再睇下一啲研究報告先記得，但係而家即時諗起就冇。

黃女士：（經傳譯員）唔該。我想請問一個一般性問題，230 章，你覺得可以點樣將佢修改或者係加強去加強巴士嘅安全呢？因為你有呢啲執法經驗，你認為可以點樣做呢？

邱倩雯女士：我諗每個法例嘅成立都有一個立法原意喺度，Cap. 230A 主要都係針對就係喺巴士上面嘅乘客嘅行為同埋整個專營巴士嗰個運作嘅一啲規管，在於警方係需要執法，我諗就係可唔可以讓我哋比較順利執法，係我比較著重嗰個重點。

黃女士：（經傳譯員）我哋既然係講緊執法，我而家就會去最後一個題目，我相信其中一個你提供嘅回覆，你就話有五十一宗致命意外，...

主席：（經傳譯員）你未講呢啲細節之前，有一啲嘢我都想跟進，我哋好幸運，白令嘉先生你就係參加道路安全運動委員會，同埋邱女士你係警方嘅代表就喺道路安全研究委員會嗰度，我就想請問兩位一個問題，如果有人嘅話，係邊一個，即係香港嚟講，係香港政府裏面邊一位係主導道路交通嘅安全嘅呢？即係嗰個動力係來自邊一位呢？邊個係去指令其他人嘅呢？邊個設置嗰啲措施或者政策嘅呢？

邱倩雯女士：我相信喺整體嘅交通嘅事務嚟講，香港政府運房局都係有個帶頭嘅 policy 嘅角色喺度，政策嘅角色喺度，至於運輸署就係一個行政嘅組織，喺交通條例上面，或者喺交通嘅設計，道路嘅設計，都係需要 TD 去執行嘅。警方嘅角色就係根據法例賦予我哋嘅權力，我哋可以點樣盡忠職守咁樣去做好我哋嗰個檢控嘅工作。對於有一啲檢控，我哋頭先都有提過有少少束手無策，就例如係我講嘅違例泊車，咁樣我哋會儘量會喺現行嘅法例畀到我哋嘅權力裏面，我哋都會儘量做。

另外，喺法例嘅譬如修改或者喺道路嘅設計、道路嘅改善，咁樣我哋都會係--警方都係義不容辭咁樣希望可以提供到意見畀運輸署，從而希望可以改善

到道路嘅安全，希望交通係暢順，希望係道路亦都每一個使用者都係受到保障。

主席：（經傳譯員）究竟係邊一位係提出一啲意見出嚟，就話我哋跟進啲乜嘢呀？我哋今日都傾過專利巴士上面嘅安全帶嘅問題或者有其他喺車輛上面可以有嘅安全設施呀咁，究竟係邊啲人提出呢啲意見呢？

邱倩雯女士：我諗幾方面都會係有唔同嘅意見喺裏面，喺警方日常執法，其實我哋都會預見到有一啲海外嘅經驗，係可以畀我哋用得到嘅，亦都喺 TD 裏面嘅 research，佢哋嘅研究工作，佢哋亦都會睇到，可能最終都係需要決策局運房局嗰個支持，無論係喺嗰個科技上面、喺金錢上面、喺法例上面，都希望係可以得到運房局嗰個最大嘅支持，咁樣喺 TD 同埋喺警方都希望可以喺日常嘅工作做得更加好。

主席：（經傳譯員）你就描述過呢一個運房局係要帶頭咁嘅作用，點樣帶頭法呢？運房局關於改善專利巴士嘅安全，佢提供過啲乜嘢嘅帶頭作用呢？

邱倩雯女士：我相信而家喺運輸署裏面已經有一個工作小組係著意咁樣睇專營巴士嗰個運作，無論喺佢哋嗰個發牌嘅制度同埋佢哋點樣可以係保障到道路安全，呢個希望就係運輸署嗰個工作小組可以提出更加多嘅意見畀我哋譬如執法部門可以去執法，或者喺嗰個政策部門嗰度可以係有更加完善嘅政策去保障各位市民。

主席：（經傳譯員）邊個工作小組呀？

邱倩雯女士：今朝聽到係有個工作小組，稍等。

主席：（經傳譯員）如果你講緊話加強專利巴士安全嘅工作小組，佢係今年 3 月 13 號成立嘅，...

邱倩雯女士：係，冇錯。

主席：（經傳譯員）...你係咪講緊呢個？

邱倩雯女士：係，冇錯。

主席：（經傳譯員）喺呢個小組之前，運房局又提供過啲乜嘢嘅帶頭作用呢？係加強安全方面嘅。可能對你咁樣問係唔係好公道，但係好似你頭先描述你嘅認識嘅時候，你就係話嗰個運房局就係會畀一啲帶頭嘅作用，然後你就會執法，然後運輸署就係要去實施有關嘅政策。

邱倩雯女士：以我所知，喺運輸署嗰度亦都有一個關於巴士同埋鐵路嘅一個單位去處理有關專營巴士同埋鐵路嘅服務嘅，咁樣呢個警方唔係太多嘅 involvement 喺裏面，但係期望就係 TD 可以藉住嗰一個嘅單位可以做多一啲嘢。

主席：（經傳譯員）有冇任何人真係帶頭去改善專利巴士嘅安全嘅呢？

白令嘉先生：（經傳譯員）主席，關於專利巴士，其實我係唔知道有任何一位人士係特別係負責專利巴士，其實道路安全議會係一個好好嘅平台讓我哋同埋唔同嘅有關交通運輸嘅部門可以一齊係交換意見，呢一個平台肯係可以為道路安全嘅政策起一個帶頭作用，但係我就唔知道有冇其他係咪話有一個委員會係特別處理專利巴士。

主席：（經傳譯員）邱女士，我想再問你，你就係參與道路安全研究委員會嘅，你知唔知道有冇一個呢啲委員會做嘅研究係講到話專利巴士如果用安全帶有咩嘢好處嘅？即係當然有啲人未必想用喇。

邱倩雯女士：以我嘅記憶，就冇喺專利巴士講--即係冇講過專利巴士嗰個安全帶問題，只係有記得就係小朋友嗰個叫 child restraining device 嗰度有提過，小朋友用嘅安全帶。

主席：（經傳譯員）好，唔該你。

黃女士：（經傳譯員）跟進呢一點，邊個負責建議議題畀呢一個道路安全研究委員會商討嘅呢？

邱倩雯女士：通常都係由 TD 去畀一啲 consultant's paper，我哋喺開會之前，我哋會睇，睇完之後，我哋就開會去傾。

黃女士：（經傳譯員）可唔可以有委員係去提議任何嘅項目，喺道路安全委員會度傾？

邱倩雯女士：我唔太清楚係由邊度會提出啲題目，咁樣我哋都係由運輸署個秘書處嗰度通知。

黃女士：（經傳譯員）即係話其實都係以運輸署所推動？

邱倩雯女士：係，以我所知，係。

黃女士：（經傳譯員）邱女士，去到最後一個嘅題目，就係關於 2018 年 5 月 7 號你提供畀委員會嘅一啲文件，就係關於五十一個係有死亡嘅致命嘅意外，就喺 124-1 頁，就喺嗰個雜項文件夾嗰度，係第 124-1 至到 124-2 嗰個嘅文件，我就係想問你係某啲嘅問題，係關於用黑盒裏面嘅資料...

主席：（經傳譯員）未落之前，呢個其實唔係淨係五十一宗致命意外，其實喺巴士上面或者附近嘅？

黃女士：（經傳譯員）五十一項係致命嘅意外係涉及專營巴士嘅呢啲嘅意外。124 頁，呢度就係講第 2 段，請你係提供一啲細節，係關於係致命意外嘅，就係喺呢一個嘅 2012 年至到 2014 年 2 月，特別係包括呢一個致命意外方面，同埋係有啲乜嘢嘅後來嘅檢控，有冇一啲去搵下佢成因等等。

主席：（經傳譯員）你未繼續之前，我代表委員會，我就要多謝 Cadman 總警司，其

實係佢--佢今日唔喺度，但係佢向我哋提供呢啲資料，佢都係花咗好多工夫嚟到去製備--喺咁短嘅時間裏面幫我哋製備呢啲嘅資料嘅。

黃女士：（經傳譯員）我哋都係好多謝你向我哋提供呢啲嘅文件嘅，有五十一宗嘅致命交通意外係涉及專營巴士，係第 124-2 頁，呢度係有嗰啲嘅數字--嗰個嘅個案嘅編號同埋嗰啲嘅日期，有三十宗，有二十八宗係定罪，有兩宗係無罪釋放嘅，係文件嘅第 4 段寫嘅；亦都提供咗係十五宗嘅個案嘅撮要，冇檢控到呢一個司機，冇進一步嘅行動；有三宗只係有簡單嘅案情，有一宗仲未完結嘅，有兩個嘅初步報告同埋一宗就淨係係有呢一個嘅案件嘅結果。

我哋其實就係想講下你用呢啲黑盒或者係啲行車紀錄儀嗰啲嘅數據係點樣用㗎？譬如佢哋減速或者係超速，喺一啲嘅法律訴訟程序裏面係點樣用㗎？舉一啲例子，124-5 頁，呢個就係 2012 年 9 月 5 號，就係一個危險駕駛引致死亡嘅個案。我哋落去 124-7 頁，呢一個嘅背景就係一宗嘅致命交通意外，喺土瓜灣道，第 2 段就係一架雙層巴士，係九巴嘅，有一個嘅老婆婆就係死亡，佢喺嗰個安全島過馬路嘅時候發生嘅。

喺 124-8 頁嗰度，除咗相片之外，警方都係從九巴攞咗嗰啲嘅行車紀錄數據，就顯示當嗰個嘅巴士係離開車站嘅時候個車速、佢嗰個嘅加速嘅情況同埋當個車長係剎咗幾多次掣、踩咗幾多次嘅剎掣。

呢度有好多嘅例子，呢個係其中一個。我想問呢啲嘅資料係咪好常喺一啲法律程序裏面使用嘅呢？

邱倩雯女士：喺調查一啲嚴重嘅交通意外，尤其是係有死亡嘅調查裏面，我哋都會係盡所有嘅辦法，攞齊所有嘅交通紀錄，包括埋巴士上面嘅 CCTV、巴士上面嘅行車紀錄。咁樣不過要提到一樣嘢，就係巴士個行車紀錄儀喺而家唔係法定必須要做嘅嘢嚟嘅，如果佢架巴士有嘅話，我哋一定會攞嘅。

黃女士：（經傳譯員）一啲非致命意外，又點呀？

邱倩雯女士：喺其他如果係冇死者嘅個案，係一啲嚴重嘅交通意外裏面，如果有個行車紀錄儀，我哋都會攞取愛嚟做證據。

主席：（經傳譯員）專營巴士自從 2014 年 7 月 1 號已經係要裝呢個黑盒㗎囉喎，唔係，抑或係話嗰個日子之後所造嘅巴士，所有嘅專營巴士其實個事實就係已經係有呢一個行車紀錄儀㗎喇。

邱倩雯女士：而家喺專利巴士唔係每一架巴士都有嘅，以我哋所知，係小巴、PLB 就有，但係專利巴士就未係每一部都有。

主席：（經傳譯員）可唔可以將嗰個嘅要求，有咁樣嘅要求擺上去屏幕嗰度畀我哋睇呢？我諗我哋係巴士公司畀我哋有咁嘅數據，話佢哋已經事後安裝晒呢啲，你而家係咪話警方係有遇到一啲專利巴士係冇裝呢個黑盒嘅呢？因為咁就有啲詫異。

黃女士：（經傳譯員）我哋而家搵呢份文件，不如答咗呢個問題先，你有冇遇過一啲咩嘢困難，想喺一啲非致命嘅意外度想搵黑盒嘅資料？

邱倩雯女士：我相信如果係佢本身已經有嗰個資料喺度，我哋係冇困難去攞取呢啲資料嘅。

黃女士：（經傳譯員）TD-5 1597 頁，呢個係運輸署一封嘅信件，2003 年 10 月 17 號嘅，就講到電子數據紀錄儀器最基本嘅要求，我哋睇到最起碼嘅要求就係有電子數據紀錄儀，呢個係喺 1598 頁，我哋第 1 段。電子數據紀錄儀嘅目的就係畀巴士公司有一個工具去監察同埋管理路上嘅車速同埋安全，即係佢嗰個巴士嗰個呢方面嘅行為，同埋係間接咁樣係鼓勵到良好嘅駕駛習慣，呢一個嘅儀器應該係提供以下嘅數據嘅，每一秒同埋嗰個記--所能夠儲存嘅數據係喺一個嘅兩星期嘅期內每三十秒佢嗰個嘅運作時間開車、嗰個嘅轉動時間、係完成嘅時間等等。九巴同埋城巴亦都有一啲嘅講解話佢哋而家係更新咗黑盒嘅數字，係可以裏面係包含多啲嘅數據。

喺運輸署文件 8，我相信係 TD-1 第 87 頁，...

主席：（經傳譯員）呢個係運輸署提供畀委員會，喺我哋一開始研訊嘅時候提供嘅文件，我諗我哋要去睇(c)段最後一句，就話「而家所有嘅專營巴士都已經係有黑盒同埋呢一個車速限制器嘅」。

黃女士：Yes, "and speed limiters".

主席：（經傳譯員）或者我哋岔開咗一啲，我哋而家嗰個嘅重點係講巴士，當然你嗰個範疇係闊啲，我係想問你，你有幾常使用黑盒裏面嘅數據嚟到做檢控呢？

邱倩雯女士：而家喺--我頭先講過而家喺有--牽涉有死亡同埋一啲嚴重嘅交通意外，都會用到黑盒裏面嘅資料嘅，咁樣呢個亦都係喺警方調查裏面都--如果有嗰個紀錄，我哋都唔會係好困難咁樣攞到，我相信喺我哋嘅交通意外調查組嘅同事都會係將所有嘅證據一併去考慮，然後作出檢控。

黃女士：（經傳譯員）可唔可以話畀我哋聽有冇困難，就話點解呢啲嘅數據係除咗喺一啲致命或者係嚴重嘅意外之外，喺一啲輕微嘅意外你唔用？

邱倩雯女士：我諗就係即係每一個案情都會有唔同，如果即係講話一啲冇咁嚴重嘅交通意外，可能就係好普通嘅跌嘅、整嘅，咁樣呢個可能係唔牽涉係一個交通嘅--即係嚴重交通意外需要所調查嘅方向，呢個我諗我哋都會再作檢討，喺每一宗嘅交通意外調查裏面，睇下係咪--都根據案情不論係嚴重或者唔嚴重我哋都需要攞呢個證據。

黃女士：（經傳譯員）喺所有嘅個案，你知唔知道嗰啲黑盒數據係咪都係報告咗，譬如嗰啲加速、減速，係咪所有嘅喺法庭裏面，有冇人質疑過呢？

邱倩雯女士：我手頭冇呢一個分析嘅資料喺度。

黃女士：（經傳譯員）喺嗰五十一宗...

主席：（經傳譯員）畀時間傳譯員譯咗先。

黃女士：（經傳譯員）唔好意思，...

主席：（經傳譯員）你未繼續之前，你可唔可以係幫我哋去查詢下，然後畀番個答案我哋？

邱倩雯女士：可以。

黃女士：（經傳譯員）我知道小巴喺嗰個有關嘅法例係有講到呢啲電子資料紀錄儀嘅，係咪可以接納成為呈堂證供。

主席：（經傳譯員）可唔可以將佢擺上去個網度呢？

黃女士：Yes.

主席：（經傳譯員）係咪有一條嘅條款，就係令到用黑盒嘅數據做檢控係容易啲嘅。

黃女士：（經傳譯員）係。

主席：（經傳譯員）請問可唔可以話畀我哋聽嗰個參考嘅編號？

黃女士：（經傳譯員）係，我哋搵緊有關嘅文件，或者我講咗個要點先，或者我哋需要幾秒嘅。

主席：（經傳譯員）係，冇問題。係咪有另外一條條例嘅呢？

黃女士：（經傳譯員）呢個係關於道路安全嘅。

主席：（經傳譯員）係咪374章呀？

黃女士：Cap. 374.

主席：（經傳譯員）道路交通，因此就係同呢一個一般性嘅《道路交通條例》係有關，係咪？

黃女士：Yes.

主席：（經傳譯員）好肯定我哋有人會幫我哋搵，我哋不如繼續，好唔好呀？

黃女士：（經傳譯員）一般嚟講，有一個具體嘅條文，係我哋修訂咗個條例之後，就係講到邊啲嘅證據可以係法庭接納嘅，即係譬如話係公共小巴上面嘅電子紀錄系統，咁就令到控方更加容易係舉證嘅。我個問題就係警方會唔會歡迎類似嘅一種修訂呢？即係好似公共小巴有嘅條文，你會唔會歡迎呢？令到專營巴士嘅黑盒資料都可以係接納呢？

邱倩雯女士：我同意嘅。

黃女士：（經傳譯員）主席，視乎我哋搵唔搵到嗰個具體嘅條文，我嘅提問已經完結喇。

主席：Very well.

邱倩雯女士：我想有少少補充，唔好意思。

黃女士：Thank you.

邱倩雯女士：頭先講嗰五十一宗嘅 fatal cases，因為喺預備嘅時間比較可能倉卒咗一啲，其實有一單係 number 19，嗰一單就係牽涉係 PLB 嘅，就唔係專利巴士，所以嗰個數字係有五十宗，一共係。

主席：（經傳譯員）唔該晒。即係嗰度係冇專利巴士牽涉在內？

邱倩雯女士：係。

黃女士：（經傳譯員）我相信應該係 374A 章，《道路交通公共服務車輛規例》...

主席：（經傳譯員）係喇，呢啲就係嗰個儀器嘅規格，但係都應該有一條條文係關於舉證，係咪？可能係第 25 條喎，有冇呢？或者我哋睇一睇 24 條，唔該，係，我哋成條睇一睇。或者我哋遲啲再將佢搵出嚟，肯定有一條係關於舉證嘅。今日喺呢度嘅警方代表可唔可以協助我哋，有冇試過動用過呢一個關於公共小巴嘅舉證條文呢？即係話當你檢控嘅時候，你係可以用黑盒嘅資料嚟去確定當時嘅車速㗎？

李大偉先生：有關--據我哋了解，我哋手頭冇準確數字有關於幾多單案件引用呢個嘅數字，但係我印象之中係有一單案件曾經呢個裝置曾經喺法庭畀辯方去爭議嘅，亦都大家係會請咗互相嘅專家去爭論呢個個合法性同埋準確性嘅，結論就係法庭接納咗呢個 EDRD 嘅作用同埋佢嘅指定安裝人，而成功檢控個個案嘅。

主席：（經傳譯員）仲有另外一個方面嘅，即係關於公共小巴，仲有其他嘅條例都係同我哋今日考慮嘅事件係相關嘅，就係話專營巴士係咪都應該有呢一啲嘅速度顯示器，就係好似公共小巴咁樣，讓乘客都知道個車速？我要問嘅問題就係有冇一啲嘅困難或者衝突，係公共小巴嘅司機同埋乘客因為都睇到嗰個車速，就令到譬如話公共小巴嘅司機就係冇符合呢個車速，因為乘客睇到，咁就造成困難，有冇試過呢？

邱倩雯女士：冇呢個難度，我相信就係如果乘客都可以睇到嗰個車速嘅話，呢個亦都係可以更加有效地保障到嗰個交通安全。

黃女士：（經傳譯員）主席，我已經搵到有關嗰個條文。

主席：（經傳譯員）唔該晒你。你講之前，有冇試過喺公共小巴嘅乘客就係影相，將嗰個車速顯示器係影相，然後就係提出一個投訴嘅，你知唔知道有咁嘅事呢？

李大偉先生：我哋冇呢方面嘅資料。

主席：（經傳譯員）黃律師。

黃女士：（經傳譯員）主席，係喺 67A 條，喺番嗰個主體條例，《道路交通條例》本身嗰度，67A 條，我哋可以睇第(6)款，應該係關於電子數據嘅紀錄系統嘅，呢一度就係講到話可以撿取有關嘅數據嘅權力嘅，第(6)款就話喺任何刑事程序當中，如果有一份文件就話係根據第(5)款(b)條撿取到嘅數據紀錄，佢就會係被法庭接納作為證據，就唔需要再進一步去舉證嘅。(5)(b)，你可以睇到就係話喺嗰個裝置咗嘅電子紀錄系統裏面嘅數據，而呢一個安裝嘅人就係由運輸署署長--對唔住，係警務處處長係授權佢做呢一個安裝嘅。

主席：（經傳譯員）邱女士，我諗你會同意，你都會係歡迎一個咁樣嘅條文，係用喺呢個專營巴士？

邱倩雯女士：（經傳譯員）係，我同意。

黃女士：（經傳譯員）主席，我係完成咗我喺呢方面嘅提問。

主席：（經傳譯員）好，唔該。仲有一、兩件事係要處理嘅。我哋知道除咗黑盒數據係有或者冇之外，而家其實喺好多巴士上面都有閉路電視，佢哋係可以攝錄咗好多事件嘅，尤其是一啲係前置嘅鏡頭，就可以讓你睇到係發生咩嘢事，亦都有一啲嘅攝錄機亦都係可以影到巴士嗰個車長個位嘅，呢一啲攝錄機裏面嘅紀錄係咪都用過嚟做檢控呢？我就記得五十宗嘅致命意外裏面，喺鯉魚門嗰度有一架巴士係翻側嘅，佢哋與其用嗰個黑盒嘅數據，佢係用番閉路電視裏面影到嘅嘢係去顯示個車速嘅。

邱倩雯女士：喺警方嘅意外調查裏面，我哋都可以係用到車裏面嗰個行車嗰個攝錄裏面嘅片段嘅，但係嗰個片段亦都係需要有證人去提供呢一個證據，咁樣結合咗嗰個影像同埋口供嘅話，呢個係可以用喺檢控裏面嘅。

主席：（經傳譯員）好，淨係講番閉路電視，係咪而家好多時都會用到嘅呢？就算你打劫銀行等等，都會係用到閉路電視嘅。

邱倩雯女士：有，而家喺好多嘅刑事檢控嗰度都有用到嘅。

主席：（經傳譯員）你頭先講話要證人，關於嗰個攝錄機仲要需要咩嘢證人？

邱倩雯女士：我諗最主要我哋需要嗰個 author，個原作者，邊一個譬如係 install 嗰個相機，嗰個相機裏面嗰個影像有冇人去騷擾過、干擾過，呢啲資料需要...

主席：（經傳譯員）即係話係《證據條例》裏面第 22 條，應該係有一個電腦嘅，係咪？

邱倩雯女士：未必係電腦，可能係一個 chip，一個錄影帶，錄影嘅 chip。

主席：（經傳譯員）即係話你需要有人就係話係咪冇人干擾過佢，...

邱倩雯女士：冇錯。

主席：（經傳譯員）...即係你需要一個技術員，而唔係一個證人？

邱倩雯女士：呢個視乎嗰個 cam. recorder 係有幾先進，有一啲係可能比較容易啲，自己車主可以做嘅，有啲可能係需要到譬如一啲 technician，一啲有技術嘅人做。

主席：（經傳譯員）我哋而家係講緊專營巴士，其實巴士車長都唔可以自己擺自己嘅攝錄機喺度，其實所有呢啲嘅攝錄機都係巴士公司安裝同埋維修嘅，我哋知道佢哋係安裝喺邊度，我哋亦都見到係有黑盒嘅數據嘅。

邱倩雯女士：我相信專利巴士公司嗰個行車紀錄儀係一定有一啲監管喺嗰度，就唔係個司機自己可以係攞到出嚟，咁樣，因為呢個除咗係一啲行車嘅紀錄嘅數據之外，亦都對於巴士公司嘅管理可能佢喺嗰度一啲資料佢係需要嘅，所以喺專利巴士嗰個 CCTV 係由巴士公司去管理，呢個係理解嘅。

主席：（經傳譯員）當然，巴士公司亦都有佢哋嘅資訊科技部門，好簡單，就係要有安裝，唔可以有干擾，就可以確保到嗰啲嘅影片嘅有效性，係咪？你問九巴嗰啲人畀你一個嘅證供，話所有嘢都係運作良好，就證明到佢喇。

邱倩雯女士：係。

主席：（經傳譯員）呢個就成為一啲好有價值嘅資料嚟㗎喇？

邱倩雯女士：我唔知道佢哋需要幾多時間可以預備到，但係都喺一個調查裏面，我都希望佢哋係儘快可以配合。

主席：（經傳譯員）歐陽先生。

歐陽先生：（經傳譯員）我就而家想講番道路安全議會，希望兩位警司幫到我。你哋都係有參與過呢兩個委員會，你就知唔知道有冇任何嘅建議係畀房運局嘅呢？由呢一個議會，係關於安全嘅問題。

白令嘉先生：（經傳譯員）喺我所參與嘅兩次會，冇一啲新嘅建議。

歐陽先生：（經傳譯員）睇番下嗰啲嘅會議紀錄，你知唔知呢個議會有冇向房運局提過啲咩嘢建議或者係畀房運局就係推翻或者係拒絕接受？

白令嘉先生：（經傳譯員）我就唔知道，我睇過過去嗰兩年嘅會議紀錄，但係我就睇唔到話係有啲咩嘢嘅建議係被拒絕或者係唔接受。

歐陽先生：Thank you. Ms Yau, same thing?

邱倩雯女士：喺研究嘅委員會裏面，我諗我都需要再睇睇佢有啲乜嘢嘅研究報告喺過

往幾年係可能有提及過一啲安全措施，我返去要睇睇。

歐陽先生：（經傳譯員）好，唔該主席。

主席：（經傳譯員）羅教授。

羅先生：（經傳譯員）我就有兩個嘅問題，第一個就係運輸署會唔會定期咁樣研究下嗰啲意外嘅數字，睇下有啲咩嘢可以改善呢？係咪運輸署嘅工作之一呢？

白令嘉先生：（經傳譯員）係，運輸署係會睇下交通意外嘅數字，然後喺呢個議會嗰度係提供一啲嘅結論嘅。

羅先生：（經傳譯員）警方會唔會咁做？

白令嘉先生：（經傳譯員）警方就會咁做就係希望係針對我哋嘅執法同埋去制定一啲宣傳嘅資料去到特定嘅受眾，要嚟做宣傳。

羅先生：（經傳譯員）咁樣講公唔公道呢？警方嘅角色係執法、調查意外同埋去管理呢一個數據庫，呢個就係警方嘅基本角色，係咪？

白令嘉先生：（經傳譯員）係。道路安全嗰個策略嗰個整體係有三方面嘅，就係要有參與，有工程方面同埋係執法，警方個主要嘅角色就係執法，同埋部分係要去令到公眾係參與，而喺工程方面，係多啲由運輸署同埋路政署嚟到去做嘅。

主席：（經傳譯員）好，黃大律師，委員問過嘅問題，你有冇進一步嘅追問？

黃女士：（經傳譯員）冇。

主席：（經傳譯員）如果係咁，委員會就想多謝幾位代表今日出席咗好長嘅聆訊，我哋亦都希望你提供我哋所要求嘅資料，我哋就係希望儘快係將佢哋成為一個清單，係畀你哋知道，亦都畀埋有關嘅研訊謄本畀你，就希望你就係可以跟進嘅。我哋今日嘅取供嘅程序就完成，我哋就會喺星期四再繼續，多謝。

2018年9月24日

下午5時34分聆訊押後

(9.00 am)

EXPERT EVIDENCE OF MR MIKE WESTON

CHAIRMAN: Good morning, Mr Weston.

MR MIKE WESTON: Good morning.

CHAIRMAN: Thank you for travelling from London to Hong Kong to assist us with our inquiry.

As you no doubt know, we are assisted by counsel who will pose questions to you, although there may be questions that we, the committee, wish to pose to you. If any of our questions are less than clear, by all means indicate that that is the case and we will see what we can do to make sure that the question is accurate.

I will ask Mr Duncan then to begin the evidence.

Examination by MR PETER DUNCAN

MR PETER DUNCAN: Thank you, Mr Chairman.

Mr Weston, good morning.

MR MIKE WESTON: Good morning.

MR PETER DUNCAN: I would like to echo the chairman's remarks and thank you for the assistance that you have rendered to the committee, and in particular for furnishing the committee with a written report.

Could I ask you to turn up that report, please, which will be found in bundle EXP-1 at page 115.

There are a number of topics that I wish to explore with you, but before doing so I'm going to ask you a few questions about your background and your experience, and then also the context in which you have provided your report.

So with regard, first of all, to your own experience, can I direct you, please, to page 118 of the bundle, and the section headed "Context", and the second paragraph:

"This report has been prepared by [yourself] an independent consultant with over 30 years' experience within the bus industry including senior roles at Transport for London most recently as director of buses."

Then there is reference to a career resume at appendix A.

I think if we would go to appendix A -- you will find that at page 157, where we have the benefit of "Personal profile", "Recent career history", and "Other professional interests".

If I could just direct your attention to the section headed, "Director of buses, Transport for London", and under that part of the page, going back to 1999 to 2003, "Head of bus infrastructure, London Buses". Can you tell us a bit about what that involved?

MR MIKE WESTON: Yes. As head of bus infrastructure, which I was appointed to in 1999, prior to that I had been heavily involved in evaluation of bus route tenders. But in 1999 I was appointed head of bus infrastructure and had a range of responsibilities but was primarily responsible for the provision of all the bus infrastructure for the bus network; that's bus stops, bus shelters, bus stations, some of the bus garages which TfL owned but that wasn't the majority. So responsible both for the provision of the infrastructure but also for the day-to-day operation of that infrastructure.

That role also included an oversight of the engineering and bus specifications for the bus operators, so buses were included in that definition of infrastructure in that role.

MR PETER DUNCAN: Were you concerned with the safety of buses at all in that role?

MR MIKE WESTON: No, not directly. Clearly, I was responsible for the safety of the infrastructure. So, for example, the safe operation of bus stations, and monitoring of that locally. It was the role head of bus operations in 2003 where I became responsible for the safety of the London bus network, and then subsequently in 2004 as operations director.

So clearly, as head of bus infrastructure, there was clearly a role in terms of safety, as you would expect, but in terms of overall safety responsibility for the bus network, that was assumed in 2003.

MR PETER DUNCAN: And that's when you took up the position of head of bus operations?

MR MIKE WESTON: Yes, that's correct.

MR PETER DUNCAN: Then operations director -- you have touched on that already -- could I just ask where that position sat within the management hierarchy of Transport for London?

MR MIKE WESTON: Yes. So at the time there were three directors, actually, reporting in on the bus side of the Transport for London business. I was the operations director. There was a performance director who was responsible for the performance of the bus contracts. And then there was a finance director who also had other responsibilities for other parts of the organisation. We reported into a managing director who, as well as being responsible for London Buses, was responsible for other modes within TfL, and he reported into the Commissioner for Transport for London.

MR PETER DUNCAN: Then, in 2013, you were appointed director of buses. How did that position relate to your previous position as operations director?

MR MIKE WESTON: In 2013, the decision was taken to combine the roles of performance director and operations director into one role. So, effectively, this new role of director of buses became responsible for the bus network, reporting into the managing director. As I said, the managing director had other responsibilities for the surface transport operation within London, so really the director of buses was responsible day to day for the provision of the bus network, the management of the contractors, and as it says there in the evidence, the budget of about 2 billion pounds per annum for the procurement of the bus network.

MR PETER DUNCAN: You have referred in the second paragraph there to the fact that included responsibility for the provision of a "safe network"?

MR MIKE WESTON: Yes. As I previously said, probably the head of bus operations was when I first became responsible for the safety team that was allocated to London Buses. Operations director took forward that role, but clearly, as director of buses, as the senior manager responsible for the bus network, I also assumed responsibility for the safe operation of that network.

MR PETER DUNCAN: You left that organisation, as I understand it, in 2016, September.

MR MIKE WESTON: Yes.

MR PETER DUNCAN: Since then, you have been working as an independent consultant. Can you tell us just a little bit in your own words what that work has entailed?

MR MIKE WESTON: Yes. It is probably worth just saying that I took the opportunity to leave the organisation in 2016 as part of a sort of planned restructuring, and I volunteered to leave after 31 years.

As an independent consultant, I now focus on the bus industry, and there are two main areas of my focus. One is the environmental management of bus fleets, and that's an area where I gained quite a lot of experience in previous roles at Transport for London, but also franchising and tendering of bus services and network design, and I have been providing some support to a number of transport authorities within Europe on those subjects.

MR PETER DUNCAN: Thank you. I now ask you to go back, please, to page 118 of your report, and just focus on the context in which you have provided this report.

I think if I could just read out quickly some excerpts from this, so we all understand the context. The first paragraph:

"This report has been commissioned by [the committee] ... to seek further understanding on the

organisation and structure of the London bus franchising system and to ascertain best practice which could potentially be used in Hong Kong to further improve the existing franchising model. The committee have already had sight of Transport for London's document titled 'London's bus contracting and tendering process' dated August 2015."

Then if we jump a couple of paragraphs down:

"In commissioning the report, the IRC have asked for the following:

(i) A description of the regulatory and governance arrangements together with the operations and management of franchised buses in London, having regard to bus safety.

(ii) A summary of the regime obtaining in Hong Kong in respect of franchised buses.

(iii) So that, having regards to the differences in the two regimes at (i) and (ii), you are asked to express opinions as to the adequacy of the regime obtaining in Hong Kong and make recommendations, as are warranted in your opinion, to enhance the safety of the franchised system in Hong Kong."

Then the final paragraph:

"Sections 2 to 5 of the report give an overview of London's public transport system, explains the structure

of the UK bus industry and the history of London's bus contracting regime and describes the current bus contracting regime and how contractor performance is monitored and managed. Section 6 gives an overview of safety management within London's bus industry and section 7 describes the various initiatives currently being delivered by Transport for London and the contracted bus operators under the bus safety programme. The report concludes in section 8 with the author's observations and opinions of how the approaches adopted in London could be used to improve the Hong Kong regime."

So there we have the context in which your report has been written.

You have referred, in that section, to some differences in the two regimes, between London and Hong Kong, and in order that we all understand what those differences are, I would just like to refer to a few of those before I explore some of these topics with you.

The first, if we go to page 120 of your report, you will see the number of passenger journeys in London, at 2.2 billion, I think that's in a year. So that's the approximate number of passenger journeys.

In Hong Kong -- I will simply give everybody the

reference rather than taking you to the document -- but at THB-2, page 103, we can work out that the equivalent number of passenger journeys in Hong Kong is 1.4 billion. So that's the comparison with regard to numbers of passenger journeys.

The second comparison I would like to bring to your attention is the proportion of the populations within the two areas which use public transport.

Perhaps we will go to the bundle on this occasion; I'm not sure whether you have seen this. If you look at THB-2, page 2, footnote 2 on that page -- this is from a public transport strategy study conducted by the Transport and Housing Bureau in June of last year, and if you look at the footnote at the bottom of that page:

"According to a study conducted by the Land Transport Authority of Singapore in November 2014, the public transport usage rate in Hong Kong was the highest among 27 major cities."

And you can see from item 2 that the ratio in Hong Kong is as high as 90 per cent, and the comparator in London is 30 per cent. The 90 per cent you will see in paragraph 1.4 on that page:

"Public transport services are closely related to the daily life of the public. Every day, over 12 million passenger trips are made through different

public transport services in Hong Kong. This accounts for over 90 per cent of the total passenger trips each day, which is the highest in the world."

So I just bring your attention also to that statistic.

The third matter perhaps which is worthy of mention is the percentage of bus use as a percentage of the overall public transport journeys undertaken. You have referred to this yourself at page 120. I have a reference to 56 per cent in my notes. Perhaps I will have to check that.

In Hong Kong, if we are on THB-2 at page 103, we will see that franchised buses, at item 2, account for 31.1 per cent, whereas heavy rail, which you can read as the MTR, is at 38.9 per cent. So there is a greater quantity in favour of the heavy rail system.

CHAIRMAN: Obviously that's the figure for Hong Kong, and that accords with my own memory, but what are you suggesting is the figure of the percentage of the use of franchised buses in London as a proportion of public transport in London?

MR PETER DUNCAN: Mr Chairman, I have --

CHAIRMAN: Perhaps Mr Weston can help.

MR PETER DUNCAN: Do you have that percentage at your fingertips, Mr Weston?

MR MIKE WESTON: I can't -- no doubt somebody has a calculator on the screen but it's over 50 per cent, because obviously 2.2 billion out of just under 4 billion is more than 50 per cent, so it's 50-odd -- 56 per cent it comes up as, yes.

CHAIRMAN: Right.

MR PETER DUNCAN: So that's the 2.2 billion over 3.9 million on that page?

MR MIKE WESTON: Yes.

MR PETER DUNCAN: I think that's where I got the 56 per cent from.

MR MIKE WESTON: Mr Chairman, those two tables aren't entirely comparable, because for example, I noticed on the Hong Kong figures you have ferries included, where in London there are some river commuter services included, so they're not -- but the magnitude of the figures is correct.

MR PETER DUNCAN: Thank you. The fourth difference is the number of buses on respective networks. You have referred to this at page 126 of the report, where we see a reference of the bus fleet in 2018 consisting of 9,200 buses.

I can give you the equivalent in Hong Kong -- I can simply give members the reference to the page -- it's THB-1 at page 30, paragraph 7. The equivalent number in

Hong Kong is approximately 6,000.

Moving on to another difference, and this is the kilometres travelled annually by buses in the two territories. We can see, for London, this figure at page 120, just under the chart:

"During the period 2017/2018 the bus network operated 490 million kilometres ..."

Now, the equivalent figure for Hong Kong -- I will ask the assistant to turn up the bundle at THB-1, page 30, at paragraph 7. By multiplication, we get a figure almost the same as London, 500 million kilometres:

"About 6,000 franchised buses operate on the road every day. On average, franchised buses run over 1.4 million kilometres every day."

Now, there is an interesting result of those figures, and that is the number of kilometres travelled by each bus in each territory per year. So, in London, if we divide 490 million kilometres by number of buses, that's 9,200, we get 53,260 kilometres per bus per year. In Hong Kong, if we divide the 500 million by the 6,000 buses, then we get a figure of something like 83,333 kilometres per bus per year.

Moving away from those statistics with regard to road use, and looking at the periods of contracts under

which the bus operators work -- in London, you have set out for us the fact that London bus contracts typically run for an initial period of 5 years with the potential for a two-year extension.

We can see that on page 129, in the very last paragraph on that page.

In Hong Kong, by comparison -- and I will simply give the committee the reference again: it's TD-1 at page 73, paragraph 4; and TD-1, page 74, paragraph 8 -- we have a franchise period of ten years, and that can be extended on application by five years or two years, depending on when the application for the extension is made.

Just one question for you, if I may, Mr Weston, with regard to the London franchise -- London contracting operation. It's five years, with the opportunity of an extension for two. Can a bus operator normally expect to get that same route back again at the end of the seven-year period, or are the chances of renewal of that route effectively not automatically in his favour.

MR MIKE WESTON: No. If the route runs for either five or seven years, it will then go back out to competitive tender. Clearly, the incumbent often has an advantage because perhaps the reason that they were successful with the route the first time was because they had

a garage or a depot nearer to the route than their competitors. But, when it goes back out to tender, clearly they will bid for it and so will other operators, and it often depends on the state of the market at the time. If another operator has recently lost some routes, they may decide to be more competitive on this route to try to win this route from the incumbent.

I haven't got the exact percentages, but I think it's about two-thirds -- about 70 per cent of routes stay with the incumbent upon re-tendering; 30 per cent move between operators at the point of re-tendering.

MR PETER DUNCAN: Thank you.

Then another matter I would like to raise with you is the number of bus operators working on the London network. You have referred to this at page 126 of the report, where we see a reference to domination by six large bus groups, and then several smaller companies making up the remaining 5.6 per cent of the network.

Now, as you know, in Hong Kong, the franchised bus operators consist of three groups, and I think it's fair to say that the public in Hong Kong are quite aware of the difference between, say, Kowloon Motor Bus on the one hand and Citybus on the other.

With the number of bus networks in London, is the

difference between the different bus companies something which is noticed or appreciated by the public? Does that have any effect on public use?

MR MIKE WESTON: Some members of the public will realise that their local bus is run by a particular operator, but the big difference between Hong Kong and London in this respect is that all the buses in London are painted red and have the Transport for London, London Buses, logo on the side. They also have the bus company logo on the side, but to most members of the public, it is a red bus, it is run by Transport for London as far as they are concerned, and if you asked most people in London who is responsible for the buses, they would say the Mayor of London is responsible, and people -- I'm sure a lot of members of the public realise there are different companies, but I think they very strongly understand that actually those companies are working for the transport authority, because the ticketing is provided by the transport authority, they pay the transport authority for their fares. So there is a strong recognition that there is a coordination by the transport authority in London.

MR PETER DUNCAN: So the average Joe Public would see a bus as being a bus of Transport for London rather than a bus of, say, Stagecoach?

MR MIKE WESTON: Yes, that's correct.

CHAIRMAN: Although the name of the individual bus operator is located on the bus itself, on the exterior, is it not?

MR MIKE WESTON: Yes, that's correct. So as well as the London Buses, Transport for London logo on the side of the vehicle, the operator's logo is also displayed on the side. But as I said, the buses are all red, so to most members of the public they will appear the same.

CHAIRMAN: At an earlier stage, were different liveries not used by different bus companies?

MR MIKE WESTON: Yes, in the early days of tendering from the mid-1980s through to probably the early 1990s, the private operators at the time, who were competing against the in-house London Transport-owned bus company, which was still publicly owned, were allowed to use buses in their own liveries, and there were probably two main reasons for this at the time. One was to show to the public that things were changing, that things were improving, and one of the ways of doing that was showing that there were new operators coming into the market, so having buses in different liveries was a good way of illustrating that. And the second reason at the time was really to show to the trade unions that things were changing and that the system was moving from a publicly

owned and publicly employed operation to a private operation. So there were probably two main reasons.

Eventually the decision -- and I think it was probably in the early/mid-1990s -- was taken that actually the marketing benefit of having a common livery was far stronger than those other messages that were probably by that point already accepted by the public.

MR PETER DUNCAN: I would like to move now, please, to another quite significant difference between London and Hong Kong, and that is the difference in the contractual framework which exists and which permits the bus operators to undertake their work.

As you appreciate, in Hong Kong, there are negotiated contracts by the form of a franchise under which the bus operators operate, whereas, as is evident from your report, in London you have what might be described, and I think has been described, as a route-based competitive tendering system.

I would just like to ask you some questions -- bring to your attention, first of all, some matters, and then ask you some questions about the system which operates in London in this respect.

Could I ask you to go to page 124. If I take you through the first few paragraphs of 3.3, I think we will get a very good idea of the system operating in London.

You say:

"It is useful to understand the contract regime pertaining to London to understand how safety management, by both TfL and the bus operators, fits into this regime. The competitive tendering of individual bus routes with the whole network being controlled, regulated and planned by the Transport Authority (Transport for London) is currently unique to London due to government policy dating back to 1985.

Route tendering was introduced in 1985 with the overall structure of awarding 5-year contracts, with operators receiving 2-year extensions if they meet certain performance criteria, having remained unchanged over this period.

Gross cost contracts are used by TfL with the operators being paid for each mile operated with additional bonuses and deductions based on the reliability of the service. Passenger revenue is retained by TfL so in practice any enhancements to the contract, including safety or other improvements to buses, are funded by Transport for London not the bus operator."

Then you have taken us through, again, some of the history behind the evolution of the system.

If I could bring your attention then to the last of

those paragraphs, "1994":

"Remaining routes placed onto negotiated contracts with privatisation of the public owned companies. All bus operation privately owned but controlled and managed through the tendering process by London Transport."

So the first question I've got is: do negotiated contracts exist at all now in London, or is everything done by way of competitive tendering?

MR MIKE WESTON: No, they don't. Perhaps I can clarify the 1994 position. So, as it says in the report, by 1993 50 per cent of the bus routes had been competitively tendered. Some of those had been successfully won by private operators; some of them had been won by London Transport in-house bus companies that were still publicly owned. Because of a desire by the government at the time to privatise the bus companies that were still publicly owned and put them into the private sector, it was necessary to put the remaining bus routes, which at that point had basically received a block subsidy internally from London Transport to operate them -- it was necessary to put them onto some sort of contract. So the decision was taken to put each of these remaining routes that hadn't been subject to competitive tendering onto a negotiated contract, where the contract price was negotiated.

But the important thing that this probably fails to explain is that those negotiated contracts had a fixed life, so that the companies or the management that were buying these bus companies from London Transport had a portfolio of competitively won contracts but also a portfolio of negotiated contracts, but they knew the end date of each of those contracts. So they knew that in five years' time or four and a half years' time, that route would be subject to competitive tendering.

So it was a way, really, of sort of accelerating putting everything onto a route contract for privatisation, but with a clear view that those contracts would be re-tendered after a certain timescale, and they subsequently were all re-tendered and probably -- I'm just trying to think -- about five years later, they had all been then subject to the first round of competitive tendering.

CHAIRMAN: So by 1998/1999, all routes were operated on a tendered basis?

MR MIKE WESTON: Yes, roughly. Those dates are roughly about right, yes.

MR PETER DUNCAN: Thank you.

If we go back to the second paragraph on page 125, there are references in the second line to "additional bonuses and deductions" to the gross cost contracts

"based on the reliability of the service".

I think if you go through to page 131, we get further detail as to these bonuses and deductions, at paragraph 4.3.3; is that correct?

MR MIKE WESTON: Yes, that's correct. So the quality incentive contract was or is a gross cost contract but with additional incentives for reliability and performance.

MR PETER DUNCAN: We can see the matters which are taken into account with regard to the incentives or disincentives, and there is reference to EWT, excess wait time. There is a quality of service indicator. And you say, at the end of the first paragraph:

"These payments could range between plus 15/minus 10 per cent and were aimed at increasing operators' focus on reliability of the service in addition to quantity (ie mileage operated) which had been the focus of the gross cost contracts."

Does the element of safety have any relevance in the context of these bonuses or deductions?

MR MIKE WESTON: No, these bonuses are -- the potential bonuses of plus 15 per cent of the contract price or minus 10 per cent are purely related to the reliability of the service, as measured either by excess wait time, which is the measure for high-frequency services, or by

on-time performance, which is the measure for lower frequency performance.

So these payments only relate to the reliability of the service provided by the operators.

MR PETER DUNCAN: Could I take you back now to 127.

CHAIRMAN: Before you do that -- and in context, is the fact that a bonus of up to 15 per cent can be gained by good performance and a deduction of 10 per cent from the contract agreement important to bus operators, from a financial point of view?

MR MIKE WESTON: Yes, from a financial point of view -- I mean, the ability to get plus 15 per cent -- to get 15 per cent is very, very difficult; the service has to be running almost perfectly. To get minus 10 per cent, again, is probably quite unusual because a service would have to be very poor. So probably the average payments range perhaps between 5 and 8 per cent of the contract price for an operator's portfolio of routes added together over the course of a year. That's significant and that roughly equates to the average return that a lot of the bus companies in London are making. So in many ways an operator achieving their reliability targets effectively is their profit on the contracts. So it is an important element and it is an important incentive to the operators to achieve those payments.

MR PETER DUNCAN: Could you give us an idea of what the maximum contract price would be for -- I assume it would be the longest route or the most complicated route?

MR MIKE WESTON: Yes. For a bus route of -- some of the bigger bus routes in London will have about 60 vehicles on them, and the contract price could be up to 20 million pounds a year, so quite a significant contract, yes.

CHAIRMAN: And the basis of the contract is the bus operator says, "I will do this route for 20 million pounds", and Transport for London will pay them 20 million pounds, plus or minus the bonus or the deduction?

MR MIKE WESTON: Well, there are two payment regimes. There's the contract price which is then divided by the annual scheduled mileage to get a contract price per mile, and an operator is then paid that rate per mile for every mile that they operate. So effectively they lose the contract rate per mile for mileage that they fail to operate due to reasons within their control. So, for example, if they have no driver to run the journey or they have no bus because of mechanical failure, they would lose the rate per mile from the contract price.

But it is fair to say those deductions are relatively small. Probably, for mechanical loss

mileage, it's about 0.3 per cent; for staff, it is probably a very similar figure. So fairly small deductions for mileage not operated.

For mileage that is not operated due to reasons beyond their control -- so this is traffic delays, or diversions due to planned or unplanned events -- they are not deducted. That is considered not to be within their control so they are not deducted. Then separately, as we have said, there are these incentive payments or deductions for the reliability.

So the contract price relates to the quantity on a rate-per-mile basis, and then there is a relationship with these additional payments for reliability of the service.

CHAIRMAN: So, to crystallise that in a short example -- could you do that for us?

MR MIKE WESTON: Yes. I will use simple figures to illustrate. So a contract price of 1,000 pounds and an operator is supposed to run 100 miles, the contract rate per mile will be 10 pounds per mile. For every mile they don't operate, they would lose 10 pounds per mile. These are very simple figures to illustrate the point.

But clearly, if the service was better than the excess wait time minimum standard within the contract,

they could earn some bonuses up to 15 per cent of that contract price. But, as I said earlier, plus 15 per cent is very, very difficult to achieve. The average is probably nearer 8 to 10 per cent for a very reliable service.

CHAIRMAN: So, in order to avoid deductions for mileage lost that is your fault, it is important to have a maintenance regime for your buses and to have adequate staff numbers? Would that be a simple way of looking at it?

MR MIKE WESTON: Yes, Chairman, that's correct. So making sure you've got enough drivers every day to run the service, and that's why most depots will have some spare drivers because it is a way of protecting the mileage if some drivers don't show up for work, perhaps due to sickness. And then making sure you have adequate buses each day that are ready for service, so that's around adequate maintenance regimes but also adequate spare vehicles to provide cover when other vehicles are being maintained.

But it is fair to say that the maturity of the tendering system in London is such that the amount of mileage that operators lose due to staff and mechanical reasons is relatively small. It is pretty low, because there's a maturity in managing those aspects of the

service.

CHAIRMAN: That's because of experience; bus operators know the margins that they need to have of staff and vehicles not to fall into that problem?

MR MIKE WESTON: Yes, that's correct.

MEMBER LO: To operate the system, do you have to gather information about the arrival time of every bus at every bus stop?

MR MIKE WESTON: Yes. So the excess wait time calculation and the on-time performance calculations historically were done by surveys, sample surveys, with inspectors standing on the roads noting down -- these are Transport for London-employed inspectors -- when buses went past that location, and that data was then used to calculate the excess wait time.

It might be worth just briefly explaining what the excess wait time is. The way that Transport for London measure the reliability of high-frequency services is through the statistic called excess wait time. So, for a ten-minute frequency bus service, the assumption is that passengers will arrive randomly at the bus stop. They won't use a timetable, they will just arrive at the bus stop. So, if the ten-minute service is running perfectly, on average you should wait five minutes, because you may have just arrived and missed the bus, so

you wait nearly ten minutes; you may arrive five minutes and wait five minutes, or you may arrive and literally the bus arrives, but on average you should wait five minutes.

So the excess wait time is how long you wait over that ideal wait time, and for a route the minimum standard may be one minute or may be 1.2 minutes' excess wait time. So that's how the calculation is used.

Historically, as I said, it was done by manual data collection. Now it is calculated automatically through the vehicle location system. So historically it was a sample; now it is effectively 100 per cent statistic based on all buses on that route.

MEMBER LO: A follow-up question. You said for factors out of their control, like congestion, would not be deducted, so how do they factor in congestion in their calculation?

MR MIKE WESTON: Sorry?

MEMBER LO: You mentioned about for factors outside their control, like detour, congestion, those factors will not cause any reduction or deduction in payment scheme, but how do they factor in congestion effect in this kind of calculation?

MR MIKE WESTON: Okay. So, for congestion, an operator, when they are submitting their tender bid, would be

expected to put in a timetable or a schedule. So Transport for London will specify the frequency of the service required and will specify the route of the service. But the operator has to turn that into an operating schedule and determine how many buses they need to run that route reliably. And an operator is expected to design a schedule to cope with the average congestion on the majority of days.

In extreme circumstances -- I'm trying to think of an example -- so an unplanned demonstration in Central London, a terrorist attack in Central London, for example, where there is a lot of disruption and major chaos and congestion, Transport for London will then void those days from the calculation. So, in extreme examples where the congestion is very, very bad and it is clear that the operator couldn't predict that and also couldn't manage the service in those circumstances, those days would be void from the calculation.

CHAIRMAN: So would that apply to, for example, a burst water main, the Dartford Tunnel having a vehicle on fire and being closed?

MR MIKE WESTON: Yes. What tends to happen for more localised incidents is that individual routes could be void for those days, not necessarily -- I think for -- I was managing the bus network on the day of the 7 July

2005 attacks on the Underground and bus network, clearly all the data for that day and subsequent days was void because it clearly wasn't the right thing to do, to try to monitor and penalise the operators.

But individual routes could be void due to a local issue, yes.

CHAIRMAN: Thank you.

MR PETER DUNCAN: So, going back to page 127, if we could, Mr Weston. You set out at paragraph 4.1 the contract responsibilities, and if I could try and reduce this to very simple terms by summarising four points -- if you can just confirm this is the case or, if not, please tell me -- first of all, Transport for London will invite tenders for a particular route. Secondly, a tender will put in a contract price for operating that route. Thirdly, Transport for London will keep all the fare revenue and thus assume the profits and the losses associated with the patronage on that route. Then, fourthly, Transport for London will simply pay the contract price to the operator with the bonuses and deductions you have just described.

Is that a very quick, very simple thumbnail summary?

MR MIKE WESTON: Yes, I think that's a good summary.

MR PETER DUNCAN: Now, on the routes which are made available for tender, who decides on the routes and what

factors are taken into account in determining a new route or discard of an old route?

MR MIKE WESTON: Yes. So the route planning is done by Transport for London, and it is done under what are called the service planning guidelines which are some high-level guidelines which set the sort of aspirations for running bus services in London, and within those guidelines, for example, there is an aspiration that nobody is more than 400 metres from a bus stop in London. It's not totally achieved, it's almost achieved but not totally. And there will be various other guidelines about trying to provide a comprehensive service seven days a week, from a certain time in the morning to a certain time in the evening. So there are some guidelines that set the aspiration.

So all the route planning is done by Transport for London and they will determine which services should be enhanced, which services should be reduced. Some of that will be based on loadings and how busy routes are. Some of it will be based on working with colleagues in other parts of the organisation to determine changes likely to happen.

So at the moment, for example, there is a new railway line opening next year now, called the Elizabeth Line, which goes across Central London. Clearly, that

will bring a lot of extra capacity to the Underground network, and as a result a lot of the bus routes in Central London will lose patronage and therefore they will be changed when the line opens. Some of them will be withdrawn and some will be reduced, to make sure that there is an efficient operation in terms of the services provided.

MR PETER DUNCAN: Does this involve consultation with the bus operators, or is this done exclusively within Transport for London?

MR MIKE WESTON: There will be some dialogue with bus operators, but essentially it is a sort of central planning process. There is a duty on Transport for London to consult with the local authorities in London and stakeholders, including members of the public, so Transport for London have to consult before service changes are made.

So there will be some dialogue with the operators but I wouldn't necessarily -- I wouldn't describe it as consultation.

MR PETER DUNCAN: You mentioned just a few moments ago that there was an as aspirational approach -- persons living within a certain area should have access to a bus service. Assuming that route is unprofitable, would the route nevertheless continue, to enable that aspiration?

MR MIKE WESTON: Yes. So the decision on each individual service change is done on a cost/benefit analysis. So there is a subsidy for the London bus network, and if you take that subsidy, for every pound you spend, you will be looking to maximise the passenger benefits. So every service change will go through a small cost/benefit calculation to make sure it is getting some passenger benefits to make sure it is worthwhile investing that pound of money.

But it's worth saying there is subsidy into the bus network and ultimately, Transport for London, under the direction of the mayor, in theory, could operate the service without subsidy, through a combination of running less unprofitable services and/or charging more to passengers to use the service. So the amount of subsidy that is put into the network is very much a political decision by the mayor, who sets the strategy for the organisation.

CHAIRMAN: So it could be user pay or it could be subsidised, as it is?

MR MIKE WESTON: Yes. As it says in my report, one of the key things that the mayor determines is passenger fares. So the decision to change passenger fares rests with the mayor, not with Transport for London. So, clearly, that has an impact on the financial performance of the bus

network.

The current mayor, who was elected in 2016, in his manifesto made a commitment not to increase fares on the Underground or buses for four years of his initial term, and that clearly has big benefits to the travelling public in terms of value for money but obviously has implications on Transport for London in terms of fares income over the next four years.

CHAIRMAN: Where does the money come from?

MR MIKE WESTON: So the mayor has to find it from other sources, so, for example, from the Council Tax, the business rates; encourage -- well, part of it has been encouraging Transport for London to become more efficient as an organisation, through trying to reduce its costs. So a whole combination of ways of trying to balance the books.

CHAIRMAN: What proportion of the costs of running the buses does the total amount of fares represent?

MR MIKE WESTON: I'm trying to see if we've got any figures in here. At the moment, it is -- about a third of the cost of the operation is subsidy, so it's about 600.

I'm just looking at my notes for the figure.

CHAIRMAN: Take your time.

MR MIKE WESTON: Yes, sorry, in the financial year 2016/17, 70 per cent of the cost of the network was covered by

passenger revenue. So the other 30 per cent was subsidy, which was 626 million. But that's varied over the years, and I think my report makes reference that in 1997/98, the network broke even, and the passenger revenue covered the cost of operation.

But we are stressing that those decisions are very -- are political decisions. They are decisions of the mayor about how he or she wants financially the bus network to operate.

CHAIRMAN: So if fares are frozen for four years, one could expect the 70 per cent covered by fares to drop to perhaps 60 per cent or some lower figure?

MR MIKE WESTON: Potentially, unless the service volume is reduced, which the current business plan assumes it will be slightly.

CHAIRMAN: Right. Thank you.

MR PETER DUNCAN: I think you have referred to the financial performance and the subsidy aspects that the chairman has been asking you about, at pages 120 and 121 of your report. Do you see there reference to the financial performance?

MR MIKE WESTON: Mmm.

MR PETER DUNCAN: I think, at the bottom of page 120, the last sentence, you have referred to one of the points you've just made:

"By financial year 1997/98 the network broke even with passenger revenue covering operating costs."

Then you have referred to the impact of elected mayors from 2000, at the top of page 121, and the figures, with the cost recovery of 70 per cent, apparent from the first paragraph on page 121.

MR MIKE WESTON: Yes. Correct.

MR PETER DUNCAN: So, for 2016/17, the amount of the subsidy seems to be something like 626 million pounds.

MR MIKE WESTON: Yes, that's correct.

MR PETER DUNCAN: So that's over 600 billion in Hong Kong dollar terms.

The chairman asked you who meets that subsidy. Is it simply the ratepayers of London, or how is that actually met?

MR MIKE WESTON: Historically, it was a combination of the ratepayers of London, both domestic, private ratepayers, but also businesses, but until this year it is also an element of government subsidy, so national subsidy. But from next year -- the government about three years ago gave notice to Transport for London that they would no longer be getting any revenue subsidy, ie subsidy to cover operating costs; they would only give the organisation capital grants, capital grants aimed at improving the infrastructure, so, for example, building

new Underground lines, enhancing stations, for example.

So the last two or three years, Transport for London has seen its revenue grant from central government go to zero, so it has had to make up that shortfall from a combination of local funding from the 32 London boroughs and business rates and domestic rates, but also by some aggressive cost-cutting, in trying to cut overheads and reduce the costs of operating the business. So it's been quite a challenging time.

At the same time, the mayor made a decision to freeze fares for four years. I refer in the next paragraph to the fact that contract prices go up with inflation. So, for the next four years, the contract prices will go up with inflation, but the fares revenue will effectively be frozen. So that's again a big financial challenge for the organisation.

CHAIRMAN: What was the size of the central government subvention at the time the government indicated it would cease to provide it over a period of three years?

MR MIKE WESTON: It was around about 600 million, I think, at the time they decided they were going to reduce it to zero, and they took the decision to reduce it to zero over about a three or four-year period.

CHAIRMAN: So 600 million pounds reduced to nothing over --

MR MIKE WESTON: Yes. It's quite a significant reduction.

That was a grant to the whole organisation, not just to the bus parts of the business, but the whole of Transport for London.

CHAIRMAN: Are -- or were, perhaps -- subsidies of this kind provided for transport systems outside the metropolis, London?

MR MIKE WESTON: For the railways, yes. For buses, no. So, outside of London, bus services are deregulated, so that any operator, or anybody that is approved to operate buses, can operate, can register to operate, whatever bus services they like commercially. So, in the big cities, Manchester, Birmingham, for example, any operator can commercially operate whatever service they feel they want to, and the local authority or the transport authority can then buy in the bits of service that they feel are perhaps missing.

So, for example, if an operator operates a service commercially Monday to Saturday, the transport authority can then buy in a Sunday service, if it's not being provided commercially, and probably 90 per cent plus of the bus services are provided commercially, with the local authorities and transport authorities providing the top-up of what's not being operated commercially, although the government last year passed legislation to allow transport authorities outside of London to

consider franchising bus services, to look at introducing franchising systems, and at the moment Manchester are looking at potentially moving from a deregulated environment to a franchise-type system.

CHAIRMAN: Thank you.

MR PETER DUNCAN: Could I ask you to go back now to page 127, where you have dealt with the contract structure, and leading on to page 128, under the heading 4.2, "Contract life cycle".

If I understand this correctly, the operator would be bound by two agreements, first of all the framework agreement, which, according to the second arrow, sets out the general contractual requirements for operating bus services for Transport for London; and then, third from the bottom, a route agreement also which is issued, which details the specific route requirements, including minimum performance standards.

Have you made available examples of those in your supporting documents?

MR MIKE WESTON: Yes, there is a reference, web link, to the route agreement, that includes an example of -- sorry, the framework agreement, and the framework agreement includes an example of the route agreement.

MR PETER DUNCAN: Thank you. Yes, I see that's referred to at page 189. Yes, thank you.

MR MIKE WESTON: So the route agreement is a fairly big document, 160 to 200 pages, but each operator only signs up to the framework agreement once, and then every time they win a bus route they get a route agreement, which is the more specific information in relation to that route.

MR PETER DUNCAN: Now, at page 129, in the second paragraph --

CHAIRMAN: Before you move away from this -- we have had an account from Prof Stanley about the system that obtains in Melbourne, which involves an accreditation system. In what way, if at all, does the system in London, with a framework agreement, then prequalified operators -- in what way does that compare or can one contrast it with Melbourne and accreditation?

MR MIKE WESTON: The prequalification system is effectively assessing the suitability of a business to become an approved supplier for bus services. And it is trying to -- it is looking for an established operator that has an operator's licence from a government agency, and it is not the decision point at which a business wins a contract.

So the hurdles to become an approved supplier are relatively low. You have to be an established operator, you have to have an operator's licence, and you have to

have some experience of running buses. But it is set relatively low because Transport for London, as well as trying to encourage big companies and big businesses to come in as approved suppliers, also see a place for some very small companies. So there are some very small companies who may operate 10 or 15 buses on school bus contracts, for example.

So the prequalification process is a relatively open process, to encourage people to participate in the tendering process, and it is the tendering process that then decides the suitability of an operator to win a particular contract.

So I certainly wouldn't describe it as an accreditation process. It is making sure that a potential operator has got the basic components in place to run buses in London.

CHAIRMAN: Thank you.

Yes, Professor.

MEMBER LO: Does it include whether they have a depot? Is that a qualification criteria?

MR MIKE WESTON: No. The requirement to have a depot -- as an approved supplier, you wouldn't have to have a depot. It is clearly a barrier to entry to the market, because getting a depot is a challenge, and where you locate it would be a challenge, and obviously one of the

challenges for TfL is that for a new operator, they might award them a route with perhaps 20 vehicles' worth of work, but your depot might be 150 capacity, so you have to be confident you can win more work over time to fill that depot up. But, as an approved supplier, you don't have to have a depot in London. Logically, because you are already an operator, you will have a depot somewhere, but it could be somewhere else in the UK. It could be somewhere else in Europe. It could be somewhere else in the world, in theory.

MR PETER DUNCAN: At page 129, you have addressed the question of the evaluation of an operator's bid, which you describe in the first line:

"... an assessment of all aspects of their current performance including safety."

If I may continue to quote:

"This approach allows Transport for London to reflect an operator's current performance into the tender evaluation process thus acting as a strong incentive for operators to constantly improve their performance. In terms of safety performance, along with performance on all other aspects of the route agreement this will feed into the tender evaluation process and could result in either operating contracts not being renewed or an operator failing to win a new contract.

However, safety is not currently scored as part of the technical evaluation but treated as a 'red line' in terms of the award of new contracts. An example given by Transport for London was a contractor in 2015 who due to concerns about maintenance standards, which were visible due to high mechanical lost mileage and poor engineering quality monitoring results, was not awarded new contracts whilst they addressed the area of concern."

You have given one example there of the red line having been crossed, but could you give the committee some idea as to how one does cross the red line in this context?

MR MIKE WESTON: Yes. It is fair to say that the red line is -- there is no definition of the red line in terms of what is and isn't acceptable.

One of the big advantages of the route level tendering system over perhaps an area-based franchising system, such as for example in Singapore, is that the ability of the authority to adjust the size of a company through route awards is very, very flexible. The challenge with a big area franchise is that if performance in certain aspects of the contract isn't up to standard, it is a very big decision to terminate that contract. You may have a contract for 400 or 450 buses.

A very, very big decision and potentially very disruptive to the transport network and members of the public.

The benefit of the London system is that you can send some very clear messages to the operator by not awarding them some contracts for a period of time. It doesn't have a devastating effect on their business but sends a very strong message that they've got to improve their performance.

So I think the purpose for this red line is not defined in black and white. It's not a clear definition. It's just a very strong check, in terms of the tender valuation. You are looking at the commercial aspects of somebody's tender bid, you are looking at their current performance in relation to quality of service, volume of service on their other contracts, looking at all the other monitoring data, to come up with a score for their performance, and then separately there is a look at their safety indicators to see whether there are any areas of concern.

The example given there was it was pretty clear that this company was struggling with maintenance, mainly due to a high retirement rate of engineers. They were losing a lot of engineers who had been with the company for a large number of years, and they had failed to

really anticipate that and recruit and train new people. So they were struggling to maintain their vehicles. That became visible in terms of a lot of mechanical breakdowns on the road, and poor engineering -- the quality monitoring that TfL undertook, the results were showing issues.

So, it was then that, because of that concern, the view was taken that that needed to improve. The operator was given a warning to improve their performance, and in the intervening period they were not awarded any new contracts. So probably over that period they may have lost four or five contracts that they would have otherwise won. Then, once that performance is returned to an acceptable standard, they were then able to win contracts again.

But it is worth stressing that red line is not defined; it's a judgment by the evaluation team and board of directors who will ultimately award those contracts. So they will have that discussion when they make that contract award.

CHAIRMAN: But in the example that you have given, the breakdowns, the high mechanical lost mileage and poor engineering, those are factors that would have shown up in quality performance monitoring, would they not?

MR MIKE WESTON: Yes. They will show up both in the lost

mileage returns, because of the number of breakdowns on the road will start to increase, so the operator would be getting deductions for lost mileage, but they will also show up through the independent assessments that Transport for London undertake.

CHAIRMAN: I am just wondering where the two meet, the safety side of things and the breakdown of buses and therefore you are not meeting your requirements. Had this reached the stage where the wheels were coming off the bus and they were crashing into people?

MR MIKE WESTON: No. I think the first visual sign of sort of poorer maintenance tends to be mechanical breakdown, so vehicles breaking down because of perhaps gearbox failure or engine failure. I think it is fair to say that operators would always make sure that those sort of safety-related engineering things are done correctly because they realise -- because the other aspect is, as well as TfL's sanction of not awarding contracts, the government agency, who have a national role, do their own monitoring of engineering standards of bus companies across the whole of the UK, and they can ultimately call the operator to a public inquiry, and the traffic commissioner can restrict the number of vehicles that they can operate.

So there is another sanction that the government

level can apply to a bus company.

CHAIRMAN: So was this perhaps, really, a potential safety issue? Your buses are breaking down so often that it means you are not maintaining them properly and therefore potentially there is a safety issue?

MR MIKE WESTON: I think if both the operator and Transport for London hadn't recognised the urgency of the issue, it could potentially become a safety issue. I don't think it did. I think it potentially could have become a safety issue.

CHAIRMAN: Yes. Thank you.

MR PETER DUNCAN: You did mention a couple of moments ago in one of your answers safety indicators in this context. Does Transport for London keep a list of particular safety indicators, or is this looked at from a more generic point of view?

MR MIKE WESTON: Yes, there's a whole host of safety indicators, and at the moment, with the operators, they have come up with a safety performance index which is about 41 indicators, which they are going to turn into a safety score for each operator, to try to bring all the various monitoring together, to give a clear indication of safety performance.

So there are a whole host of safety indicators, from engineering, mechanical lost mileage, the engineering

quality monitoring scores, driver quality monitoring scores, a whole host of things that could, if they start to look out of kilter with other operators, would be an indication that something is not right. It might not necessarily be safety-related but it tends to indicate that something is not going right in the company.

CHAIRMAN: Are these safety performance indicators publicly available yet, or are these matters to be announced soon?

MR MIKE WESTON: Not yet. They will be, yes. I think the intention is that the safety performance indicators will be made public but they haven't been as of yet. I think they will be announced shortly.

CHAIRMAN: So, at the moment -- or rather prior to, perhaps, the trial of these safety performance indicators, how was safety measured, if it was measured?

MR MIKE WESTON: There was a lot -- a lot of the monitoring -- there was a lot of trend analysis around collisions, falls on buses, all the measures -- all the statistics and data that was being gathered around safety and incidents was being -- there was a lot of trend analysis and a lot of comparison of performance between individual operators.

So, for example, TfL produced a lot of graphs showing the trends in falls on buses, in pedestrian

conflict incidents, and those were broken -- those trends were shown both at a network level but also at an operator level, and operators, through one of the forums that was held with all the operators, would share that data, and were happy that other operators saw each other's data, so they were able to compare their performance with their peer group.

So a lot of the data was monitored and then shared amongst the operators.

CHAIRMAN: Is this data available on the internet?

MR MIKE WESTON: Yes. So the data of all -- TfL, with regards to bus data, bus safety, currently publish two lots of data. They publish every quarter an Excel spreadsheet of all incidents that have occurred on the bus network, all safety-related incidents, so slips, trips and falls on buses, incidents with other vehicles, incidents with pedestrians, incidents with cyclists. So that's produced quarterly as an Excel spreadsheet.

CHAIRMAN: But is that done globally or is that done operator by operator?

MR MIKE WESTON: Well, it's a spreadsheet of all incidents, but on the front end of the spreadsheet, anybody, including members of the public, are able to interrogate that by operator or by route. So there is a front dashboard where you can filter the spreadsheet by

operator, by borough, which part of London, or by individual bus route. So it allows the public to interrogate that data on that basis.

Then, in addition --

CHAIRMAN: But it's not presented, for example, Abellio have a lot more trips, slips and falls than Stagecoach; it's not presented in that way?

MR MIKE WESTON: No, not at the moment, no. A member of the public or some other organisation could do that analysis themselves and come to that conclusion, but it is not presented in that way.

Then, in addition, every quarter, there is a performance dashboard for the safety performance of the bus network, at a network level, so it's showing the trends compared with previous quarters on various things like slips, trips and falls, accidents, and showing the trends with previous quarters. Again, that at the moment is done at a network level, not at an operator level.

CHAIRMAN: And the network level produces figures for fatalities and serious injuries as well?

MR MIKE WESTON: Yes, so for any incident on the bus network.

CHAIRMAN: Yes, thank you.

MR PETER DUNCAN: With regard to that data, what is the

actual source of the data? Who provides the data into the system?

MR MIKE WESTON: There are two -- the main source of the data is the bus operators inputting into a central database, which is called the incident reporting system. So all operators have a requirement to enter all their incidents onto this central database, and that's the main source of the information, and there's audits undertaken by Transport for London to ensure that operators are correctly populating that database.

In addition, that data is cross-referenced with the police data for serious incidents. So the police, if they attend an incident, will have their own database. It's about to change its name but it's currently called STATS19 data. So TfL will cross-reference to make sure that all incidents will be picked up. But clearly, the police data is only the serious incidents they attend or incidents that are reported to them.

So, for example, trips and falls on the bus that aren't related to a road traffic incident wouldn't necessarily be picked up by the police. But the main source of that data is individual bus operators entering data onto a central database.

CHAIRMAN: Is the police data available publicly?

MR MIKE WESTON: Yes, that's also published quarterly. Yes,

that's also published quarterly.

CHAIRMAN: Under a website for the Metropolitan Police?

MR MIKE WESTON: It might even be a national website, because I think it's actually national data.

CHAIRMAN: From which data can London be extracted or not?

MR MIKE WESTON: Yes, from STATS19 you can extract it, yes, by the whole of London, by London boroughs, by certain specified geographical parts of London, and I think by vehicle type.

CHAIRMAN: So certainly, for example, you say the police data encompasses serious incidents, so one could compare all fatalities in or around buses from the police data and the Transport for London database?

MR MIKE WESTON: Yes. I mean, those figures should correlate. There should be no reason why they should be any different, clearly. The minor injuries may not -- because there may be some minor injuries where the police have attended, but there might be some minor injuries where the police didn't attend. So the minor injuries might not but certainly the serious and fatalities should actually correlate with each other.

CHAIRMAN: Thank you.

MR PETER DUNCAN: In this context, could I ask you to turn to page 150 of your report. At paragraph 7.8, is there a paragraph on Transport for London's safety performance

indicator, as part of the bus safety programme? Do you see that?

MR MIKE WESTON: Yes.

MR PETER DUNCAN: Is that the safety performance indicator which Mr Chairman referred to but which has not yet been published?

MR MIKE WESTON: Yes. This is a proposal which TfL are working on, and one of the bus operators explained to us in August what would be involved in this basket. So, basically, it is 41 measures that are brought together into a safety performance score, and these measures may be weighted in different ways. So the measures may be "killed or seriously injured" figures, they may be "slips, trips and falls", various other monitoring results from engineering monitoring to driver monitoring, and they are all brought together.

The idea is they are brought together into a benchmark score of 80 for each operator, and the aim then is to monitor an operator's trend against that baseline of 80, and they are weighted in such a way that -- it is weighted so that the whole basket -- the trend is not just -- if you are unfortunate in having a fatal incident, which may not even be down to the bus company's fault, that doesn't send the score completely off the scale. So it's about trying to monitor trends

within the company and not to use it as comparing your performance with your peer group, because I think the concern then is that if you're the best, you think you don't need to necessarily do anything else to improve, but I think there is a recognition that everyone can be better and be safer. So the idea is your safety performance indicator is benchmarked at 80, and then along with TfL you monitor your performance against that baseline of 80 and you try and improve on it and improve that score.

I think the intention is that will be announced publicly, the content of it will be announced publicly in due course, but it hasn't been as of yet.

CHAIRMAN: When you say, "This was explained to us", you are referring, are you not, to a meeting that you and I had with managing directors and other officers of RATP --

MR MIKE WESTON: That's correct.

CHAIRMAN: -- at the end of August?

MR MIKE WESTON: Yes. They showed us the table of all the indicators, I think.

CHAIRMAN: And this was explained to us by Mr Jon Pike who was the head of safety and risks?

MR MIKE WESTON: Yes, that's correct.

CHAIRMAN: But as you say, we are looking forward to having this made available, if it is made available, in the

middle of next month?

MR MIKE WESTON: Yes. I think it is going to be made available as part of their intended announcement of their bus safety standard in the middle of October.

MR PETER DUNCAN: Will this be likely to have any effect on the red-line approach to safety which is currently the manner in which safety is taken into account in assessing an operator who applies for either a renewal of a route or a new route?

MR MIKE WESTON: Well -- I mean, it is difficult to predict how it will be used, but certainly, if your first quarter or first period, you are benchmarked at 80, and your score starts to get progressively worse, I would expect that to start ringing alarm bells and potentially being a red line.

So it will be a strong indicator that your safety performance has deteriorated, because this is such a wide basket of measures that, you know, any significant deterioration would show up in this score. So you would expect that to really start to ring the alarm bells and be an area of concern.

MR PETER DUNCAN: Now moving to another topic --

CHAIRMAN: Before you do so -- why, if you have any view on this, has it proved necessary to have such a wide measure, encompassing 41 indicators, to determine

a benchmark for safety?

MR MIKE WESTON: I think, as it says in the report, the methodology has been adopted from the rail industry, and my understanding of it is that you are trying to come up with a score that's not so sensitive to individual incidents, because ultimately, if you are a large bus operator, operating maybe 2,000 buses, you will unfortunately have some incidents involved in running those buses. So the idea is to come up with a group of measures that are then weighted and brought together to create a score.

If that score starts to move either way, you have clearly done quite a lot to shift or to improve, or not -- or allowed some to get worse -- a lot of those individual indicators. So it is trying to provide a more robust measure than just looking at one specific area.

So, for example, if you took the view that your prime measure would be the number of traffic collisions that a bus company has, it's a measure, but it could be perhaps an unfair measure because it could be that on certain routes there's been some circumstances on the road that have led to more collisions beyond the operator's control. It may not be a robust overview of an operator's safety performance, and this is trying to

take a wider basket of measures into account to give a broader indication of their safety performance.

CHAIRMAN: And what is the ambit of this wider basket?

MR MIKE WESTON: Sorry, what is the --

CHAIRMAN: Ambit. One can readily understand why you look at collisions. You might look at what are described as "trips, slips and falls". You might look at infractions of road traffic law, speeding, harsh braking. But what other factors come into play?

MR MIKE WESTON: I think included in these measures will be things like the driver quality monitoring results, so how well drivers are monitoring. I think they are also going to include public correspondence around safe driving. It's just trying to get a very broad basket of measures that the overall score then becomes a sort of good, high-level indicator of an operator's broader performance in terms of safety.

CHAIRMAN: By public correspondence, you mean complaints?

MR MIKE WESTON: It could be complaints, yes.

CHAIRMAN: Thank you.

MR PETER DUNCAN: One of the topics, Mr Weston, which was raised at the hearing when Prof Stanley was assisting the committee was the possible engagement in Hong Kong of a competitive bidding system, but where the bus operator of course collects the fare revenue and assumes

the profit risk himself.

I want to ask you a little bit about this, but perhaps just to put this in context can I take you to the transcript of Prof Stanley's evidence where these possibilities were identified. We will get that from the transcript at Day 16, page 45.

CHAIRMAN: What was the date of that?

MR PETER DUNCAN: That was 15 September, Mr Chairman.

CHAIRMAN: Thank you.

MR PETER DUNCAN: Have you had the opportunity of reading this evidence?

MR MIKE WESTON: Yes.

MR PETER DUNCAN: Thank you. In that case, I can take you through it quite quickly, I think.

Perhaps I can start at page 45, at line 10, where counsel for the committee says this:

"I'm going to explore with you the second and third part a bit later, but the first part refers to the benefits from the existence of competitive tendering in Melbourne.

To some extent, you have explained bits of it already, but can I test with you the concept of competitive tendering and how that fits within the Hong Kong environment where the bus operators collect the fares and assumes the profit risk from the provision of

route bus services."

Then, going down to line 22:

"I understand there are a number of options available, but perhaps I can get you to explain some of those options."

Then I think we can leave quite a bit out, because all I want to do is to identify what those possibilities appear to be from the evidence of Prof Stanley. I can jump down, I think, to the bottom of page 48. At line 21, Mr Derek Chan -- he is the counsel for the committee:

"So, if I understand your answer correctly, there can be a number of possibilities ... One is a bidder proposing to pay the government a sum for the operation, for the right to operate an area or a number of routes. The second possibility is the bidder offering to share part of the margins with the government, as part of the bid."

Then, at line 6:

"... a third possibility exists that there is no bidding price and the competition is based entirely on an assessment of the quality of the service expected to be provided."

Then, at line 22, the chairman offers I think a fourth alternative:

"Presumably, another way in which it might be negotiated is the prospective new operator might say, 'I can do these routes for 10 per cent less than the fares that the incumbent is doing it'?

Answer: Exactly, lower fares.

Chairman: There would be no payment to government, 'but we are providing better value to the public'?

Answer: Absolutely. That's the kind of degree of freedom is what happens to fares.

Mr Chan: So that's the advantages of competitive bidding --"

So, bearing in mind those four possibilities, I would like then to take you to your report, at page 131, at paragraph 4.3.2, and the first paragraph, which seems to describe a situation which is not dissimilar to Hong Kong, at least as far as sharing the revenue is concerned. So it's "Net cost contracts":

"During the period 1995 to 2000 the organisation adopted a net cost contract regime with bus operators retaining the revenue for each route and taking the revenue risk. Operators would bid for contracts based on forecast revenue and either bid for a subsidy from London Transport for unprofitable routes or offered to pay London Transport a share of the surplus on profitable routes."

If I could just continue with the second paragraph:

"Net cost contract only operated for a short period of time partly due to the heavy administrative burden it placed on London Transport in allocating revenue (the majority of which came from prepaid tickets) across over 700 routes. Also, it became clear that operators in practice had very little influence over the actual route revenue as route planning, setting frequencies and fares was still controlled and managed by London Transport."

Now, let's assume, just for the sake of the discussion, that the first of the two problems in the second paragraph could be overcome, so we don't have that administrative burden. Leaving that out of the situation, is this net cost contract approach something that you would suggest for consideration in Hong Kong, or would you not think that it is workable?

MR MIKE WESTON: I think it becomes easier if you were looking at area franchises, where an operator was running and operating all the routes within a certain part of Hong Kong, or even in a certain part of London. The difficulty in London was one operator could be operating one route down a corridor and there could be four or five other routes operated by another operator, or a number of operators. Hence, the ability to actually influence your own route revenue is very, very

small.

So I think the real issue is, there is nothing wrong with net cost contracts; it's a model that is used for a number of the railway contracts, operating contracts, in the UK. There is nothing wrong with the model. You just have to ensure that the operator has some influence over the revenue and has the ability to change the revenue, either through some control of fares, either through the ability to change the level of service, or the ability to perhaps market or promote the service.

And in London Transport's case, all these levers, as I call them, were with the authority, not with the operator. So, essentially, an operator had very little influence over what the actual revenue would be, because even if they ran a very good, reliable service, if they were operating in a corridor with three or four other operators, and a lot of those buses were still going to the same common destination, passengers would just get on the first bus that comes along. They won't choose operator A over operator B.

So I think the real answer to the question is it can work -- it can probably work better where an operator has an area franchise, so manages all the routes in a certain part of the city, but also you've got to make sure the operator has the ability to control a number of

aspects of the service, because if all those controls are kept by the transport authority then it probably doesn't really work.

Hopefully that answers the question.

MR PETER DUNCAN: Thank you. Incidentally -- I don't think I have asked you this before -- but how many routes are there altogether in London?

MR MIKE WESTON: There's about 700, and they vary from individual routes that just do a school journey. There are actually -- all the bus routes in London, even if they run school bus routes, are still open to members of the public, but there are some journeys at school time specifically to take children to specific schools that run dedicated routes but members of the public can use them.

So some routes might be individual school buses, one bus per route, up to some of the bigger routes, there may be 60 to 70 buses, but overall there's about 700 bus routes.

MR PETER DUNCAN: Thank you. Another matter, if I may, that arose from Prof Stanley's evidence -- if we can go back to that, Day 16, at page 50. It follows on from the evidence to which I have just referred. At page 50, line 9, Mr Chan then asks this question:

"Are there any perceived advantages that competitive

tendering brings about that relate more specifically to the safe operation of buses?"

We can see then the answer of Prof Stanley which really runs from page 50 right through to page 56, at line 16. Have you had the opportunity of reading this part of Prof Stanley's evidence?

MR MIKE WESTON: Yes, I have.

MR PETER DUNCAN: I think it's fair to say, if I may now be permitted to try to summarise his evidence, that there are no advantages relating specifically to safety out of competitive tendering. In fact, he thinks that the risk might be the other way.

Is that how you read his evidence?

MR MIKE WESTON: Yes. I mean, that's how I would read it. I wouldn't disagree with the high-level view that there are no advantages to safety of competitive tendering, but I would say there are also no disadvantages, and it then depends on the model of competitive tendering that's adopted.

So, in London, the route level tendering process, whilst the tendering process itself doesn't bring any specific advantages in terms of safety, the tendering evaluation process itself is an opportunity for the authority to look at safety before making a decision and, as we talked about earlier, the example of a bus

company whose mechanical engineering standards were not as good as they should have been, it gives the transport authority the ability to then alter its recommendation, taking safety into account.

So the tendering process and competition process itself may not directly influence safety, but the presence of the tendering process, certainly in London's case, allows the authority to take safety into account when awarding contracts and renewing contracts.

CHAIRMAN: That is, the example you have given, taking safety into account where there is a negative side to a particular bus operator -- for example, failed maintenance programme. How, in this system, could the willingness of a company to be involved in innovation, with the use of technology, to be taken? In other words, a positive side of safety. This company is deploying forward-looking cameras on all its buses to pick up safe distances to travel -- how could that be picked up in this process of competitive tendering?

MR MIKE WESTON: I think the challenge is that clearly, if the authority have set some minimum standards in terms of safety, in terms of equipment, CCTV, on buses and forward CCTV cameras is an example in London, then all operators tendering for those routes have to meet those common standards.

So, if the authority set the standard, then it is a given and all operators have to meet those standards to be awarded the contract. I think the challenge of a competitive tendering process is that ultimately you have a commercial evaluation, you have a technical evaluation, and it is very difficult for a relatively small piece of innovation within a tender -- so, for example, an operator deciding they are going to use a new telematics system that might improve driver performance -- that clearly will help their technical score, but ultimately, to a degree, the overall technical score and commercial score will still dominate the decision.

So it is probably quite difficult to let individual bits of innovation influence the overall decision of contract award. That's the challenge and that's probably why London will see a move towards more common standards, safety standards, for all operators, in terms of things like the bus safety standard.

So it probably -- the tendering process, because clearly cost is always going to be an important element, maybe discourages additional innovation over and above what the operator has -- sorry, over and above what the transport authority has deemed necessary, unless the operator believes there is a strong business case in

their own right for some of this innovation.

So, if they believe some of the technology or some innovation will actually reduce accidents enough to save them money, then they may do it off their own initiative. But I think small bits of innovation are very difficult to take into account in an evaluation process of this nature.

CHAIRMAN: So this would lead to a regulator or central authority-led imposition of minimum standards, rather than bus operators volunteering improvements in safety standards?

MR MIKE WESTON: I think that's probably the way it would end up going, and I think if you look at what Transport for London are doing with the bus safety standard, that's basically -- my assessment of that is the authority is saying, "There is lots of technology out there. We can either leave it to individual operators to innovate and adopt which ones they think are appropriate, or we could set a standard that everybody has to adopt, and if everybody has to adopt it, everybody has to cost that into their tender bids." So it keeps the playing field level, keeps the competition fair.

CHAIRMAN: So, in such circumstances, competitive tendering would be neutral to enhance safety?

MR MIKE WESTON: Yes, and maybe that is the right conclusion, that safety should be a given and the standards should be -- you know, certain standards should be achieved by all operators bidding for routes, and where you are looking for innovation is in other aspects of the way in which they provide the service. You want competition to affect the efficiency of their organisation, their overheads, how they run the routes, and that's where you want the impact of competition to give value for money back to the public sector.

CHAIRMAN: So performance rather than safety; that's where competition comes in?

MR MIKE WESTON: Yes.

CHAIRMAN: Is there a parallel between that kind of scenario and the airline industry, where standards are mandated by the authorities rather than individual airlines equipping their aeroplanes with better equipment, as it were, for safety?

MR MIKE WESTON: Yes. I'm not an expert on the aviation industry, but the impression you get of the industry is that safety is not seen as a competitive advantage by an airline over another airline. They treat it as a given that they all have to achieve a safety standard, and maybe that's the sort of approach that Transport for London are trying to achieve, so there's a safety

standard that's the given and it's not seen as a competitive advantage for one operator over another operator.

CHAIRMAN: Thank you.

MR PETER DUNCAN: Have you seen such a movement in any of the cities in Europe towards that approach?

MR MIKE WESTON: In terms of safety?

MR PETER DUNCAN: In terms of a uniform standard for all buses being imposed by bodies such as Transport for London, rather than leaving it to the individual bus operators to decide what innovations they will introduce.

MR MIKE WESTON: No. I think from my knowledge, certainly in Europe, Transport for London, with their bus safety standard, are leading the way. It's fair to say that most operators in Europe, most of the big operator in Europe, will be trying some new technology to improve safety, but I think, from my knowledge, TfL are the first big transport authority to try to bring all of this together and try to come up with a common standard for all of their bus fleets.

MR PETER DUNCAN: Another matter you raised, in the context of competitive tendering, with particular reference to Hong Kong, is depot ownership and depot availability.

Can I bring your attention to page 151 of your

report. Right at the end of that page, you have introduced the topic by saying:

"The availability of bus depots is often seen as a barrier to competition."

We can see the content of the paragraph for ourselves, and it ends up by saying:

"Any future competitive tendering of bus services in Hong Kong would require a clear strategy around depot ownership and availability."

Would you like to expand on that for us and just amplify the point you were making there, Mr Weston?

MR MIKE WESTON: Yes. If you look at the London competitive situation, the biggest challenge for a new operator coming into the market is depot availability. That's the combination of finding a suitable site where you can build a depot but also the economics of -- if you want to come into the market and you decide to build a depot for 150 vehicles, the first route you win might be 25 vehicles, but to make that depot economic to run you have to be able to fill it up with contracts, otherwise it won't be economic.

So, even in London, the main barrier to entry is probably the availability of a depot site, and it's not impossible but it is a barrier. That's with a route-level tendering system. The challenge, if you

were going down the road of an area-based franchising or bigger franchises, is that investment in new depot facilities would be enormous, and it would act as a big barrier to competition. The model adopted in Singapore for their tendering is that the authority have provided both the depot and the vehicles, so effectively the operators are bidding to run the contracts or run the franchise but with the vehicles and depot provided by the Land Transport Authority in Singapore. So that's quite a different model.

So I think the point here is that unless -- if there was going to be some competitive tendering of bus services in Hong Kong, there would need to be a clear strategy around the barriers to entry into the market, and as I see, the biggest barrier to entry is probably depot ownership, and unless there is a clear strategy around depot ownership then the likelihood is that the competition would be very weak and it would be probably only the incumbent competing for some of the services.

MR PETER DUNCAN: Is there any sharing of depots in London amongst the operators?

MR MIKE WESTON: The majority of bus depots in London are owned by the bus operators. Probably, of the 85, I think about 75, at least 75, are owned by the bus operators. About ten are owned by Transport for London,

for various historical reasons. Some of them were vacant at the time of privatisation of the bus companies in the mid-1990s, but due to the expansion of the bus network, since 2000 these depots have been reopened and then leased to the bus companies to use for their contracts. Of those, two of those depots are shared. So there is one in east London that's shared between Hackney Community Transport and Arriva, and there is one in north London that's also shared. It's fairly unusual, it takes both operators working closely together to make that work, but not impossible. So there are two depots that are actually shared. They will have separate parts of the depot for parking but they are using the same sort of entrance and the same sort of generic facilities.

MR PETER DUNCAN: So, in Singapore, have they provided depots for individual operators or are they also on a shared basis?

MR MIKE WESTON: No. The first two contracts in Singapore are new, purpose-built depots, but it is on the back of an expanding bus network in Singapore. So they have expanded the network into new areas and then built a depot to serve those areas. So a slightly different approach. But, if they carried on tendering, at some point they would probably have to think about a strategy

around the existing depots and how they were brought into the competitive tendering process.

CHAIRMAN: So the barrier that depots pose to competition would be less dealing with new routes in developing parts of -- for example, in Hong Kong, developing parts of Hong Kong, a new town, we would have perhaps rural land which is now being made urban and that would be your opportunity for the authorities to secure depots?

MR MIKE WESTON: Yes, and my understanding is that's what's happened in Singapore. It's been new services from new depots. So it's been easier to achieve. But, clearly, if there were bus services into a new part of Hong Kong and there was a requirement for a new depot anyway, in theory that could be provided by the Transport Department as opposed to individual operators.

Depots is probably the biggest barrier that exists to bringing in new competition.

CHAIRMAN: In London, has there been consolidation, where perhaps a company outside of the UK has come into the market and acquired smaller bus companies and thereby acquired depots and entered the market in that way?

MR MIKE WESTON: Yes. The last big operator or the last operator to enter the market was an Australian company that had been trying to enter the market for a number of years, but had found this barrier of depot availability,

and also not just availability of the depot but where across London do you decide to put your depot to compete was the barrier. So, in the end, they acquired some of the depots of a bus company called First Group who were selling up their London business and they entered the market on the back of acquisition as opposed to starting from scratch.

CHAIRMAN: I'm looking at page 126 of your report, where we have a list of the ultimate groups of the bus operators. Is the Australian company you are describing ComfortDelGro Corporation?

MR MIKE WESTON: No. The Australian company is under "Other", because they run about 3 or 4 per cent of the network. It's called Tower Transit.

CHAIRMAN: Ah, yes. They operate in Singapore, don't they?

MR MIKE WESTON: Yes, Tower Transit operate in Singapore and so do ComfortDelGro. ComfortDelGro is a Singaporean company. Go-Ahead also operates in Singapore.

CHAIRMAN: For example, a company like RATP Development -- is that a French company?

MR MIKE WESTON: Yes. There are two parts to RATP. RATP is the publicly owned transport operator in Paris, so they operate all the buses and the Metro in Paris. But RATP Development is their commercial arm that bids for overseas contracts. So I think, for example, they just

won one of the contracts for the Riyadh Metro, for example, to operate the Riyadh Metro. And as it says there, they run about 11 per cent of the London bus network.

CHAIRMAN: Which metro were you describing?

MR MIKE WESTON: I think it's Riyadh they just won.

CHAIRMAN: Riyadh, in Saudi Arabia?

MR MIKE WESTON: Yes.

CHAIRMAN: But did not RATP Development take over several smaller London bus companies, historic bus companies?

MR MIKE WESTON: Yes, RATP also bought out a company called Quality Line, and they bought out part of another French transport company operating in London called Transdev. So they sort of evolved a little bit over the last few years. There has certainly been a lot of consolidation of the smaller bus companies selling out to these six big groups over the last few years.

CHAIRMAN: And how many of these companies have overseas, overseas from the United Kingdom, ownership? We have RATP, French.

MR MIKE WESTON: Running down the list fairly quickly, Abellio is the Dutch railways; Arriva is owned by Deutsche Bahn, the German railways; ComfortDelGro is a Singapore-based company; Go-Ahead is a UK PLC, public limited company in the UK; RATP, as I said already, is

the French, Paris public transport operator; and Stagecoach is again a UK public company. So effectively three of them are overseas state-owned companies and one is a private company. So quite a mix.

CHAIRMAN: Yes.

Mr Auyeung?

MEMBER AUYEUNG: When one company buys the other, is it part of the condition that they take over the drivers?

MR MIKE WESTON: Yes. The framework agreement requires that if any bus company in London wants to buy another bus company, they need to seek agreement of Transport for London and seek agreement and novation of the contracts from one bus company to another. So ultimately TfL could object to a takeover of one company by another, and probably would if it led to -- if one of the big six companies there listed was trying to take over another one of the big six, TfL may object on competition grounds, and also the competition authorities in the UK may take a view that they want to intervene and review the competitiveness of the market.

So they have to seek the agreement of TfL.

Also in the UK, if they were buying the company, then they are assuming the assets and obligations of that company anyway, but there is also legislation in Europe, in UK and Europe, called the transfer of

undertakings, the transfer of undertakings of employment.

So effectively, if one operator wins a contract from another, the operator that's lost the contract can insist that the drivers move to the other company, and the drivers have the right to move if they want to. So they have to move with the contract, or they can move with the contract. Sometimes an operator will take the view that he wants to keep the drivers because he may be short of drivers anyway, so he might decide to keep the drivers, and often drivers will want to stay with the company where they are because the depot is probably closer to where they live, as opposed to where the new company might be based. But ultimately drivers have the right to transfer with contracts between companies.

MEMBER AUYEUNG: Thank you.

CHAIRMAN: And to do so on their existing terms of employment?

MR MIKE WESTON: Yes, that's what the legislation says, that they have to transfer on existing terms and conditions. A company may subsequently decide to negotiate to change those terms and conditions, but at the point of transfer they have to stay on the existing terms and conditions.

CHAIRMAN: Was this not one of the -- declared as an achievement of the mayor in the recent year or two?

MR MIKE WESTON: Yes. The current mayor has done a number of things around drivers' terms and conditions. It's slightly different in the sense that the legislation requires you to move with -- if the contract moves and you want to move, you can opt to move to the new contractor, but they have to take you on your existing terms and conditions.

What the mayor has separately done, he has insisted that if a driver applies for a job with another bus company, perhaps because they are moving house and it is more convenient to go and work for Go-Ahead as opposed to Abellio, and they are successful in the job -- at the moment, if you opted to move by applying for a job, you start on the starter wage rate. What the mayor has agreed with the operators or told the operators they must do is if I'm a driver and I've got 15 years of experience in driving, and I apply to move from Abellio to Go-Ahead because it is more convenient for where I now live, I must be paid the rate that a 15-year service driver at Go-Ahead would be paid. So I haven't got to go back to the start of the promotional ladder in terms of driver seniority.

CHAIRMAN: Thank you.

MR MIKE WESTON: That's trying to make it fairer for drivers to transfer for sort of personal reasons.

CHAIRMAN: Mr Duncan.

MR PETER DUNCAN: Mr Chairman, are you minded to take a break?

CHAIRMAN: Yes.

MR PETER DUNCAN: It would be a convenient moment, if you are.

CHAIRMAN: I think it is. We think alike. We are going to break up our morning. I'm conscious that it's been more than two hours that you've been testifying. We'll take a 20-minute break now and resume at 11.30. Thank you.

(11.10 am)

(A short adjournment)

(11.30 am)

CHAIRMAN: Yes, Mr Duncan.

MR PETER DUNCAN: Thank you, Chairman.

Mr Weston, can I ask you to turn, please, to page 153 of your report. In section 8.6, you deal with the matter of the contractual relationship between the transport authority and the bus operators.

One of the points you make there appears in the first paragraph, the second sentence:

"Whilst the contractual structure is different in Hong Kong the high-level contractual model adopted in Hong Kong does not necessarily need to change to achieve improvement in terms of the contractual monitoring,

performance management and collaboration between franchised operators and the Transport Department."

A second point you have made, if I can refer you to the following page, 154, in the second paragraph, is what you described as an over-dependency on the statutory regulations applied to all vehicles.

You follow this up, in the last paragraph, by saying:

"In terms of experience from London, compliance with the statutory requirements relating to both vehicles and drivers is very much expected and it is the initiatives, projects and collaborative working beyond these that have and will make the real-world differences to safety."

You then refer to:

"The collaboration between the London bus operators and Transport for London and their willingness to innovate and try new technologies and approaches has, and as part of the bus safety programme, will deliver real results in terms of incident and injury reduction. [So] The Transport Department should consider how they can improve the collaborative working with the franchised bus operators."

So some sentiments there with regard to collaboration.

The question I wish to ask you is: given that the Transport Department here is the regulator in this area, is there a danger of this close collaboration developing into something too cosy between the regulator and the bus operators?

MR MIKE WESTON: I think the two can sit side by side quite happily, and I think the reason why I have made those points in my report is, firstly, when I was at the TfL and was director of buses, I think I rarely referred to the framework agreement or the route agreement in any discussions with operators around performance or around issues, and I think that typified the nature of the relationship.

I think, when the chair and I met with some of the London operators in August, I don't think any of them mentioned the contract. The contract wasn't seen as an issue, wasn't seen as a barrier. I suppose I have also made that point because I feel that if an organisation -- and it would apply equally to TfL -- wanted to make significant changes to a certain aspect of the operation, and safety is the one we are clearly interested in today, then doing it via the contract potentially becomes a very long process to actually agree how you will change the contract and what you will change in the contract.

I think if TfL had tried to introduce their bus safety standard and some of the other safety initiatives via changes to the contract, it would have taken a lot longer to deliver and it would have been a far slower process.

So I think there is an issue around the speed of delivering things, and you can deliver some things quicker through collaboration. I'm sure then at some point some of those things will get incorporated into the contract, into the framework agreement, at the appropriate point in time.

So I think that's one of the reasons there's a speed at which some of these things can be done if they are not totally locked into the franchise agreement or the contract.

I am also a strong believer that if -- it is important that there is a franchise agreement, there's a contract in place, or a framework agreement, that is clearly important in case of some dispute around the contract, but I am a strong believer that certain things can be taken forward more quickly and more effectively through collaboration, and that came out very, very clearly in the discussions in August with operators and with Transport for London, that collaboration, working together, was making quite significant progress in this

safety field and in terms of the safety agenda.

I think that's why I have emphasised on collaboration.

There was a comment about the statutory requirements and meeting those. In terms of the UK requirements, there is just, in terms of vehicle maintenance standards and in terms of operators' requirements to meet the statutory requirements, there isn't a big issue. Most operators comfortably achieve those in London. So relying on those as your mechanism for improving won't really drive forward improvement.

CHAIRMAN: What are the aspects of collaboration that exist in London between Transport for London and the franchised bus operators that you would point to as evidencing the success that is to be achieved by collaboration?

MR MIKE WESTON: I think there's a number. The first one that's referred to in the report is the mechanism of the Bus Operator Forum, which is the forum of the managing directors of the bus companies and senior managers from the Transport for London buses department, who come together regularly to discuss issues of common interest, and safety is clearly one of those.

CHAIRMAN: Where do we find this in the report?

MR PETER DUNCAN: It's at page 136, Chairman.

MR MIKE WESTON: So the Bus Operator Forum, where operators would come together on an eight-weekly cycle, to meet with Transport for London managers, to discuss issues of common interest, and there are various subgroups below that that meet, again, to discuss issues of common interest but also to share best practice. And there is a safety subgroup --

CHAIRMAN: Before we get into the subgroup -- who are the people that meet at the Bus Operator Forum?

MR MIKE WESTON: It will be the managing directors of the individual bus companies, and the director level and senior managers of Transport for London, who will come together to that forum.

CHAIRMAN: Where is that meeting held?

MR MIKE WESTON: That's held at TfL's offices, usually on about an eight-weekly cycle.

It's probably got three objectives. One is to share good practice. It's a forum where operators can raise concerns, generic concerns they have, that they feel this forum can discuss. So they wouldn't necessarily raise specific issues that they have to do with their contract; it's more generic concerns.

CHAIRMAN: Could you give some examples?

MR MIKE WESTON: I'm trying to think of an example. It might be around enforcement of bus stops, for example,

parking at bus stops, where it's a generic issue for all operators. So it's a good forum to discuss what TfL can do to try to support enforcement at bus stops, for instance. It's those sorts of generic issues.

So it wouldn't be a forum where an operator would raise specific issues they've got with their contract or with their route agreements. It would be more --

CHAIRMAN: Taking that as an example, how would action be taken as a result? Who would do what?

MR MIKE WESTON: So TfL is then best placed to escalate those issues to either local authorities, who will be responsible for enforcement on certain highways, their own operational staff who may be able to contribute to enforcement, or the police, depending on the type of road.

So, again, TfL is often very better placed to escalate these things to other organisations who can help.

So those are the common issues. And then it is a good opportunity where TfL can use, through early engagement on some of the issues that they are thinking about, for example, sharing what the business plan might look like for the next five years for the organisation, which therefore could impact on the volume of work that's available to the operators, giving them advance

notice of schemes that may be coming in, so big planning schemes for Central London, for example, changes to the bus networks, so using it as a forum to share what the organisation is planning to do.

CHAIRMAN: And, for example, things like the Elizabeth Line, the consequences of that, would that be something that would be raised?

MR MIKE WESTON: Yes. When I was at TfL, I can recall there being a couple of presentations by the bus planning department on the impact that line would have on the bus network in terms of how routes might change. So it's a good forum for sharing those sorts of issues.

CHAIRMAN: You mentioned subgroups. Can you describe them for us?

MR MIKE WESTON: Yes. There are a number of subgroups. The most pertinent ones in terms of safety are the safety subgroup and the engineering subgroup. So the safety subgroup is attended, again, by all the bus companies, sometimes at a managing director or director level, sometimes by the bus companies' head of safety. That's where again common issues around safety would be discussed.

The forum is also used as a place for operators to share lessons learnt from incidents, road traffic incidents. One of the things that I know the

organisation was very conscious about, certainly when I was there, and still is, is that if one operator has an incident and does a very in-depth investigation and gets down to the root causes, it's clearly important that the other operators share the benefit and the wisdom of that investigation. It might not be totally applicable to them, but there might be some things that are applicable to them, but I think it would be remiss if the operators and TfL didn't share those lessons learnt and that good practice amongst each other.

So the forum is also used to share the outcome of investigations.

CHAIRMAN: For example, just by memory, there was an incident involving a bus driver who got out of his cab and hadn't put the handbrake on, and what that particular bus operator did to ensure that couldn't happen again.

MR MIKE WESTON: Yes. The incident you refer to, Chair, was where a driver had a problem with a wheelchair ramp and it wouldn't go back in correctly, so the vehicle therefore couldn't move. He called out an engineer. The engineer went to try and fix it but because the driver hadn't put the handbrake on, when he fixed it, the vehicle started to move, and unfortunately the engineer was killed in that incident. So that led the

company to install a warning system whereby, when the driver leaves the cab, it warns him or her to make sure the handbrake has been deployed.

It is likely that TfL's bus safety standard would include that type of system as standard across the network, and it may even be more of an interlock.

But again it is a good example of where it's important that those sorts of lessons are shared across the contracted bus operators, and that operators don't see it as information that they should keep to themselves, that they are willing to share it, and they are willing to share with other operators those sorts of lessons learnt.

Then the engineering subgroup is generally made up of the engineering directors that will share issues around maintenance of vehicles. So often operators will have similar types of vehicles from the same manufacturers, so again there is an opportunity to share some of the lessons learnt for new vehicles coming into the fleet for issues they have had around maintenance, et cetera. So again another forum for collaboration and sharing good practice.

CHAIRMAN: And how often would the subgroups meet?

MR MIKE WESTON: On a similar cycle to the main group.

I mean, you could achieve this in a number of ways, but

I think the underlying message here I think is that the bus operators in London are more than happy to collaborate and work together on issues that aren't necessarily of competitive advantage. And safety is one they see actually it's the greater good of everybody to improve safety, hence their willingness to work together and to collaborate.

CHAIRMAN: Apart from the representatives of the bus companies, and on the other hand Transport for London, do any of these meetings involve the attendance of bus drivers or trade union members?

MR MIKE WESTON: No. There's two separate lines of communication with the trade unions. One, TfL hold a meeting with -- I mean, London predominantly has one trade union --

CHAIRMAN: That's Unite?

MR MIKE WESTON: Unite, who probably represent 95-plus per cent of bus drivers, so in that sense consulting or liaising with a trade union from TfL's point of view is relatively easy, because there is only one trade union to liaise with.

So TfL have some regular meetings with the trade union to discuss things of generic interest. For example, they would meet with the trade union probably to share some of their thoughts on the bus safety

standard, for example. But it is left down to the individual bus companies to deal with their local trade union representative in terms of local issues and local terms and conditions.

So there is a sort of two-tier approach to dealing with trade unions, with the official discussions and negotiations taking place at company level, not by TfL.

CHAIRMAN: Mr Duncan.

MR PETER DUNCAN: Thank you, Mr Chairman.

When was the forum established?

MR MIKE WESTON: That's a good question. At least 15 years ago, very established. I chaired it probably for six or seven years. But a good 15 years, a very established process, and maybe the fact that it's stood the test of time perhaps gives it some credibility in terms of its usefulness, otherwise I'm sure it wouldn't still be -- the forum and the subgroups still wouldn't be there, if they weren't deemed to be useful.

MR PETER DUNCAN: Was it formed as a reaction to a particular event, or was it a proactive move, just to improve standards generally?

MR MIKE WESTON: If I recall, it was proactive, and I think it was probably at some point post the privatisation of the publicly owned companies, when it was felt there was a need to bring everybody together to discuss these

sorts of common issues.

MR PETER DUNCAN: I wonder if I could refer you to Prof Stanley's report, page 94.

There's a paragraph 5.3, "Conclusions on other matters", where he says in this part of his report:

"In light of this discussion, the main areas that the author proposes that Hong Kong should consider in terms of possibly improving working/driving/rest provisions for, and technology used in, route pus operation are to", and there's a number there, but he refers to an item 6:

"establish a standing committee on bus safety, meeting at least twice yearly to review and evaluate the latest technology that may impact on bus safety, particularly for route bus operation, and advise government on desirable safety inclusions in the FB fleet and other bus systems. The newly formed working group on enhancement of franchised bus safety could form the basis for this committee but membership should be broadened to include other bus operators."

The question I've got for you is: is there a body or a group of any sort in London which effectively meets the objectives of Prof Stanley's standing committee, something which reviews and evaluates the latest technology with regard to what safety inclusions in the

buses are desirable? Is there any equivalent body in London for this?

MR MIKE WESTON: Well, the structure in London, it appears to be that TfL are leading the development of those standards and reviewing those technologies, but then liaising with the operators, either through workshops or through the Bus Operator Forum structure.

So I would say that the Bus Operator Forum and the safety subgroup are the nearest to that committee, but then it depends whether Prof Stanley was suggesting that committee should be broader than the bus operators and the Transport Department, whether it should have broader membership than that.

So I think the equivalent would be the Bus Operator Forum, in London's case.

MR PETER DUNCAN: Right, and if I understand your answer correctly, initially any developments that might be available with regard to technology would be something which TfL itself would identify and then ensure that it's discussed during the course of the forum meetings?

MR MIKE WESTON: Yes. Or operators have identified them and brought them up through the Bus Operator Forum structure. In all fairness, often the operators will identify some of this technology before TfL does, but the structure and the lines of communication are there

for all these ideas to flow both ways between the authority and bus operators.

MR PETER DUNCAN: Now, I would ask you to go to another page of Prof Stanley's report, this time at --

CHAIRMAN: Before you do, just let me pursue this.

So, for example, the Guardian drowsiness machine, that might be something that a particular bus operator had raised at a safety group meeting, and then it became something that Transport for London implemented a trial of the device; is that what you are describing?

MR MIKE WESTON: Yes. The technology you describe there -- which was the Seeing Machines, I think it was called, wasn't it, where the cameras identify when drivers potentially were falling asleep -- the trial of that came about because TfL introduced something called the safety innovation fund and they went out to all the operators, saying, "We would like to fund a number of trials of new technology and make sure that we monitor those trials properly, make sure we get some good data on how successful they are", and so they asked for operators to put in bids for some of this funding, and that was an example of one of the trials that came about, on the back of this safety innovation fund, which I think at the time, the first round was 500,000 pounds, so half a million pounds of funding was put into these

various trials.

CHAIRMAN: And this, as I recall it, was July 2017, and people were asked to bid and then awards were made in November 2017?

MR MIKE WESTON: Yes, that's correct.

CHAIRMAN: Then the trials rolled out?

MR MIKE WESTON: Yes, the trials rolled out, and then the output and the monitoring and the results of those trials are fed into or are feeding into the bus safety standard.

CHAIRMAN: And that's what will be reported on in the middle of October, the success or otherwise of these various trials?

MR MIKE WESTON: Yes. I think it's on 16 October TfL are planning an event for bus operators and suppliers, not only to announce the first phase of their bus safety standard but also to feed back to all the operators the results of the various technology trials that have taken place.

CHAIRMAN: So the role of Transport for London was to come up with the money to fund -- one part of the role was to come up with the money to fund the trial of safety devices?

MR MIKE WESTON: Yes, but I think also to help the operators come up with the methodology for monitoring the trials.

There are two aspects, in my view, to a trial of new technology. It is easy to engage a supplier to fit technology to your bus. What's important is you've got some robust monitoring in place, that you clearly assess the benefits and understand whether it's actually delivering results, because that helps justify the future investment in that technology. And in the past I think things have been trialled where the monitoring hasn't perhaps been as robust as it should be, hence it is very difficult to determine whether or not that piece of technology is successful.

CHAIRMAN: So who in Transport for London would have given that assistance to the successful bus operators in their bids to get money to do trials?

MR MIKE WESTON: What Transport for London did in early 2015 is set up a dedicated team to focus on the bus safety programme, and it included somebody who was seconded from the road safety team of TfL, and the aim was so they would focus, and that team is still focusing, on improving bus safety and delivering the bus safety programme.

So there is a dedicated team of two or three people whose job is purely focused on this agenda and driving bus safety.

CHAIRMAN: But, more specifically, how would they have

assisted in ensuring that the monitoring was done properly?

MR MIKE WESTON: Oh, okay, sorry. So it's a combination of they would have helped the operators develop the monitoring framework, but they have also used an external consultancy called TRL to undertake some of the monitoring on behalf of TfL and the operators.

CHAIRMAN: TRL is Transport Research?

MR MIKE WESTON: Yes, it historically stood for Transport Research Laboratory which was actually a government-owned transport research centre focusing on accidents and crashworthiness of vehicles but was privatised a number of years ago. So it's effectively a consultancy but specialising in road transport matters and technical assessment of road transport matters.

CHAIRMAN: That is how the bus operators were assisted in monitoring the trials?

MR MIKE WESTON: Yes. Some of them. Some of them, they may have monitored themselves, but TRL have been involved in trying to understand the costs and benefits of these various technologies.

CHAIRMAN: TRL was involved in the test of the intelligent speed assistance or assessment trial, was it not?

MR MIKE WESTON: Yes, they were, in 2000 --

CHAIRMAN: June 2015?

MR MIKE WESTON: Yes, and then early 2016.

CHAIRMAN: Reported at the end of 2016?

MR MIKE WESTON: Yes, correct.

CHAIRMAN: Do we have that report in our bundle?

MR PETER DUNCAN: Yes. It's in SEC-3, Mr Chairman.

CHAIRMAN: Thank you.

MR PETER DUNCAN: I beg your pardon, it's in MISC-3.

I believe it starts at page 1002 of that bundle.

CHAIRMAN: So we see from this report, do we not, at page 1003, that the report had been amended and issued in November 2016? But I think it's apparent from the report that the initial testing had begun in June 2015.

MR MIKE WESTON: Yes. So my understanding is that in June/July 2015, the "before" data for the two selected bus routes was collected.

CHAIRMAN: Yes.

MR MIKE WESTON: And TfL selected two routes, one that went through Central London and then one that went from inner London to outer London. So they selected two quite different bus routes, the route 19 and the 486, and the "before" data was collected in July 2015. I think it took a number of months then for the technology to settle down and to be properly calibrated. There were some teething issues during 2015.

So the "after" data for route 19 was collected in

September 2015, and for route 486 in January 2016.

CHAIRMAN: And one of the two bus companies involved, was that Go-Ahead?

MR MIKE WESTON: Yes, the 486 is Go-Ahead.

CHAIRMAN: And Mr John Trayner is the managing director of Go-Ahead?

MR MIKE WESTON: That's correct.

CHAIRMAN: Who we met in London?

MR MIKE WESTON: We did.

CHAIRMAN: Can you help us then to understand, just briefly, what role Transport for London and TRL had played in ensuring that this trial was monitored and assessed properly?

MR MIKE WESTON: So effectively TfL commissioned this trial of intelligent speed adaptation, and just to clarify, effectively what this technology does is it uses the digital speed map that's available for London, and each of the vehicles fitted with equipment talk to the digital speed map, and therefore restricts the driver's ability to accelerate beyond the speed limit. So it controls the driver's speed at the speed limit. So it doesn't take away any of his or her braking ability, but at the point at which the speed limit is reached, it stops the driver accelerating any further.

So this technology was funded on these two routes by

Transport for London, but they commissioned TRL to do the monitoring, and the reason for that is that whilst I think the bus companies quite rightly could get a feel for how successful it was from driver feedback and from their own observations, it does take quite a lot of detailed monitoring to get some robust before and after data to show the real impact on the average speed of buses and the actual number of buses exceeding the speed limit before and after.

So I think there was a recognition, and this is a good example, of some new technology where it is important that you have some robust monitoring in place, ideally before it is installed but definitely after it is installed, to make sure you understand the changes and therefore understand what the benefits are.

So that's at TfL. TRL's role was the monitoring of these two bus routes, both before and after the fitment of the ISA kit.

CHAIRMAN: And to produce this very comprehensive report?

MR MIKE WESTON: And to produce the report, yes.

CHAIRMAN: This technology, intelligent speed assistance, was a technology that had been around for many years, had it not? Perhaps not implemented -- perhaps this was the time when it was ready to be implemented -- but the concept had been around for many years?

MR MIKE WESTON: Yes. I think the concept has been around. It's clearly dependent on the digital speed map existing and being kept up to date. The concept of the technology had been around but I think this was the first time it had been trialled on buses. I think about three or four years before this trial, it was fitted to one of TfL's cars, and I had the opportunity to drive the car to see how it performed, and at the speed limit, you weren't able to accelerate beyond.

So this was the sort of first full-scale trial of the technology on buses in London.

CHAIRMAN: This was technology that had been written about in the EU, had it not? Had there not been papers extolling its virtues and inviting people to experiment with it?

MR MIKE WESTON: Yes. I think there was some reference to that during our discussions in London, but I'm not totally familiar with those papers.

CHAIRMAN: So the process of doing this trial, had it involved the use of the equipment on a car, first of all, three or four years earlier; then the funding of the equipment to be installed on these two bus routes, and then the funding of the consultancy --

MR MIKE WESTON: Yes.

CHAIRMAN: -- TRL to do the monitoring and the report?

MR MIKE WESTON: Yes.
CHAIRMAN: The project had been underway, therefore, for some years?
MR MIKE WESTON: Yes, but I don't think the funding was -- I don't think the availability of funding was the issue. If I recall, the issue was the technology becoming mature enough to be successfully fitted to a vehicle that was in passenger service. So I think that was what TfL were waiting for, as opposed to the funding wasn't the reason that it wasn't being trialled.
CHAIRMAN: Is it known what the funding cost Transport for London?
MR MIKE WESTON: I don't have those figures but I would suggest that actually, probably, in reality, the monitoring was probably more expensive than the actual equipment for the number of buses fitted.
CHAIRMAN: Yes.
MR MIKE WESTON: I would suspect the monitoring would be the bigger cost involved. But in the context of the bus network, it would have been relatively -- well, it would have been very small sums of money.
CHAIRMAN: But this is an example of the authority, in this case Transport for London, funding the trial, the bus operator agreeing to participate in the trial?
MR MIKE WESTON: Yes. And hopefully a good example of the

level of monitoring and assessment that you need to go into when looking at new technology. Hopefully the report gives you a feel for the sort of depth of analysis that's needed to make sure that you are investing your money in the right types of technology.

CHAIRMAN: And a rigorous monitoring and then analysis in the report itself?

MR MIKE WESTON: Yes, rigorous analysis, but also independent analysis, which is quite valuable as well. So commissioning somebody to independent monitor is of value as well. And TRL have also been engaged in the assessments of all the other technologies that are being considered as part of the new bus safety standard in London.

CHAIRMAN: By that, do you mean the various devices, the drowsiness device, the forward-looking device, the one that picks up the pedestrians about to cross the road?

MR MIKE WESTON: Yes.

CHAIRMAN: TRL have been involved in the monitoring side of that?

MR MIKE WESTON: Monitoring and understanding the cost/benefits of those different technologies.

CHAIRMAN: Yes, Mr Duncan.

MR PETER DUNCAN: Thank you, Chairman.

If I could ask you some supplementary questions on

that topic, Mr Weston. First of all, with regard to when intelligent speed adaptation design was first considered by Transport for London.

If you would be good enough to look at that volume, MISC-3, at page 939, please.

Do we see there a report, dated as long ago as December 2009, on the topic of intelligent speed adaptation design?

MR MIKE WESTON: Mmm.

MR PETER DUNCAN: I think, if you look through to page 943, we see the commencement of the executive summary:

"This report outlines results from a project commissioned by TfL to further explore drivers' attitudes towards intelligent speed adaptation ... and specially to understand drivers' response to the design of the user interface."

So there was a study as long ago as 2009.

If I can take you then to 945, the introduction to the paper refers, in the first paragraph, if I may quote:

"ISA software development began in France in the 1980s and has been trialled and evaluated in a number of different markets since, proving effective at reducing driver speed and incidents on the road. In May 2009 Transport for London commenced a trial of one of the

latest ISA systems in an attempt to reduce speed and road accidents in the capital."

If I could stop there. It would seem that this particular trial was not restricted, as you referred to before, to buses, or did not extend to buses; it was vehicles, it looks like, in general?

MR MIKE WESTON: Yes, that's correct, because TfL also have some generic road safety responsibilities as an organisation, because the strategic road network in London is TfL -- TfL owns and is TfL's responsibility. So, within TfL, there is a road safety unit, responsible for road safety generally. So these trials that this report is referring to, which is the ones -- I wasn't involved in but I recall because this would have been the cars that were fitted -- this wasn't specifically buses, this was vehicles generally, looking at the appropriateness of ISA for vehicles generally.

MR PETER DUNCAN: And if we look at the penultimate paragraph on the "Introduction" page:

"To date a year-long project has already been undertaken by TfL to understand and explore the London drivers' attitudes, motivations and barriers to ISA."

Then if we go through to page 960, in the context of cost/benefit analysis, do we see set out at page 960 a list of the perceived benefits and barriers to the

introduce of ISA?

MR MIKE WESTON: Yes.

MR PETER DUNCAN: If I could then take you, please, through to page 1004 of the same bundle. You will see the contents page of the TRL client contract report, published in November 2016.

I would just like to dwell upon some of the content of the report, the details of which we can see by reading the report, but in the context of the rigorous analysis, as Mr Chairman referred to it, as far as cost and benefits are concerned.

If we go through the contents, there's eight headings:

"1. Is ISA an effective method of speed compliance?

2. Is ISA an efficient method ...?

3. What is the impact of ISA vehicles on the behaviour of surrounding traffic speeds?

4. What is the impact of ISA vehicles on the behaviour of surrounding vehicle actions?

5. ... benefits and disbenefits of ISA for Transport for London."

Then you can see those headings and details set out at 5.2 to 5.13 in detail, and then item 6, the benefits and disbenefits of ISA for the bus operator; and then 7, the benefits and disbenefits of ISA for the bus driver;

and then 8, the benefits and disbenefits of ISA for the bus passenger.

So those are the various matters which TRL have explored and the details of which we can find in the report itself, in the report that was submitted to Transport for London.

I think, at page 1011, we can see the reference to 2015 for the trial that the chairman referred to. I think it's in the last paragraph on that page:

"Subsequently, in 2015 TfL carried out a trial of ISA on London buses using an intervening ISA system by Zeta Automotive Ltd."

I think that's the trial that's been referred to before; is that correct?

MR MIKE WESTON: Yes. That's the sort of -- yes, I think that was a very small-scale trial before these two routes were trialled on a slightly bigger basis, on a larger basis.

MR PETER DUNCAN: Could I now take you back, please, to Prof Stanley's report, this time at page 70. Have you had the opportunity of reading this page of his report?

MR MIKE WESTON: Yes, I have.

MR PETER DUNCAN: On this page, Prof Stanley is bringing to our attention the fact that one of the notable differences between the arrangements between Melbourne

and Hong Kong is that Melbourne has a separate -- I am quoting from the paragraph underneath the italicised part:

"... Melbourne ... has a separate independent safety regulator operating at the tactical level. Transport Safety Victoria was first established under the state's Transport Integration Act 2010, as discussed in section 3.3.1 of the first report under this brief, a role that has no equivalent independent safety entity in Hong Kong. The Transport Department monitors safety performance of franchised bus operators and is involved in promoting safety initiatives. However, the absence of an independent safety regulator in Hong Kong seems likely to lessen the relative focus on safety matters."

So, to summarise that, it would appear that in Melbourne, the safety aspect of the operation is taken away from the regulator and put in the hands of an independent regulator aimed at the safety aspects.

We can see more detail of this by going to page 99 of the same report. If I could read from the second-last paragraph on that page:

"Operator support is available from BusVic, the industry association, if desired, across all three areas. For example, BusVic has developed templates ... which are available to its members, these templates

having been developed in collaboration with the Transport Safety Director. The Transport Safety Director has a strong focus on the development and improvement of safety culture in a bus business and safety risk management, working with operators and the industry to improve practice. Guidance material is available, such as Guidance -- Safety Culture, September 2016 ... and the director has indicated his willingness to share materials and ideas with Hong Kong, if desired.

The independence of the Transport Safety Director both elevates safety as a desirable policy outcome and provides an independent source of accountability and transparency on safety processes and outcomes that exceed what is likely to result if ... bus safety was left solely to the public transport regulatory agency and/or a governmental department to manage. The Transport Safety Director's audit processes and industry engagement has led the agency to the conclusion that Melbourne's route bus services and practices are safe and that the safety focus should be on developing a proactive and forward-looking safety risk management culture, as distinct from practices that react to safety concerns after they happen."

Then, going down the page, in bold:

"The major recommendation from the study is that the

committee should give consideration to, within the legislative framework, recommending", and it's the second bullet:

"the creation of the independent position of Transport Safety Director, whose role is to be responsible for administering matters related to safety duties, ensuring compliance and enforcement."

Now, we can see the role of that body in Victoria and the recommendation. I suppose one of the questions that might be asked is whether we actually need another bureaucracy, as it would be, to carry out this role. Do you have any views on that?

MR MIKE WESTON: Yes. I think it does depends very much on the sort of local structures and circumstances that already exist in Melbourne or Hong Kong or London.

But I would suggest that if you look at some of the progress that TfL are currently making with the bus operators around safety, and the bus safety standard and the bus safety programme, and the relative speed in which that's being delivered, I would just -- I'm not adverse to the idea of a separate safety regulator in some way, and it is something that already exists in the UK rail industry, as is referred to in my report, and it is something that TfL are thinking of trying to encourage for the UK tram industry, in terms of setting

standards and good practice.

But my fear would be that if it was suggested to establish this in London, for example, the potential is that whilst that's being established you get a period of inertia, with not much particularly happening. So I would be fearful in London, if the suggestion was made, that you may end up with a period of the current activity and current progress that's been made slows down whilst this regulator is established. So that would be my concern.

But no particularly strong views, just a little bit of a concern that it perhaps stifles progress in the short term, and maybe progress can be made quicker through collaboration and the current structures and the current players working together more closely.

CHAIRMAN: If I understand your evidence correctly, you are satisfied that appropriate progress is being made by virtue of collaboration between the franchised bus operators and Transport for London, in the various ways you have described?

MR MIKE WESTON: Yes, but the caveat on that comment is that that's within the tendering and competitive structure that London currently has. So whether that model transfers easily to other jurisdictions is a matter of debate, I suppose.

So, you know, it seems, from the evidence that I have seen over the last few years and the evidence that we have gathered for this report, it seems that quite significant progress is being made around the safety agenda for buses in London, but that's being made within the current structure that they have in London. So taking that model exactly and trying to put it into another region may not necessarily deliver results in exactly the same way. But the evidence from London is it certainly seems to be delivering some quite significant results and making some quite rapid progress around the use of technology and setting standards.

CHAIRMAN: What view do you take on what I understand to be Transport for London's claim that they are setting global standards?

MR MIKE WESTON: From my knowledge, it is the only transport authority that seems to be trying to set a bus safety standard for its bus fleet, and so it will set the scene, and it will certainly have a knock-on effect into other parts of the UK and possibly places such as Hong Kong and Singapore, mainly because the main bus manufacturers into London also supply the rest of the UK, and also the key suppliers into Hong Kong and Singapore. So you can see how there's going to be some obvious transition of some of this best practice to

other vehicles that they build for other parts of the world. So there is clearly some good crossover by those manufacturers who I'm sure will be keen to sell some of this technology into other regions.

CHAIRMAN: One example of that would be, for example, changes to the design of the front of buses. As I understand it, changes that would modify the box shape of the front of the bus, putting in curves, so that rather than being knocked down and put under the wheels of a bus, the person who has impact with the front of a bus would be knocked sideways; do I understand that change correctly?

MR MIKE WESTON: Yes. So one of the initiatives that is likely to be included in the bus safety standard, when it is announced next month, is a sort of -- I call it softening of the front-end design of a bus. So it's not physical softening, but it's using more curves, looking at the rake of a windscreen, looking at having the spindles for the wipers at the top of the windscreen, not at the bottom, because if they are at the bottom they then become a point of impact for pedestrians if they are hit by the bus and potential injury.

So I suppose it is trying to make the front end of the design of the bus more forgiving. If a pedestrian is hit by a car at a certain speed, at a relatively low

speed generally they will be thrown off the bonnet onto the pavement, onto the road, but at the same speed with a bus, you are more likely to be more seriously injured because of the design of the bus.

So it's trying to make the front end of a bus more forgiving in an accident with a pedestrian. In my mind, the likelihood is that is more of a design cost as opposed to an actual manufacturing cost, and the logic would be if that design is proved to be beneficial in London, why wouldn't the likes of Alexander Dennis and Wrights, who supply to the rest of the UK and to Hong Kong, adopt that for buses that they sold into their other markets. It would be a pretty obvious thing to do. So I think that's a good example of where we might see some good practice and best practice move across into other markets relatively quickly.

CHAIRMAN: Just to come back to your observations as far as this is concerned. The model works in London, that has regard to the structure that obtains in London, and the issue of a progressive, proactive transport authority achieving the same success is going to depend on the local structures in Hong Kong?

MR MIKE WESTON: Yes, and I think the question is which model will deliver these benefits quickest, using the current structures that are in place and trying to build

on those or establishing a separate regulator that in the short term possibly will slow the progress down.

So it's trying to, I suppose, learn from the relative speed in which London has made some progress over the last couple of years and trying to see how that sort of good practice could be implemented sooner rather than later.

CHAIRMAN: Mr Duncan.

MR PETER DUNCAN: Thank you, Chairman.

So I think, between you and Prof Stanley, you have provided the committee with various options to improve this aspect. One might be something equivalent to the Bus Operator Forum. Another might be a standing committee which Prof Stanley suggested, although there doesn't seem to be a standing committee in Victoria. Then a third option might be this independent regulator, the transport safety regulator. So they all seem to be matters for the committee's consideration. Would you agree with that?

MR MIKE WESTON: Yes, and perhaps the difference between the Bus Operator Forum structure and the standing committee is perhaps fairly small and may be one of semantics and description more than anything. They may be the same thing in practice.

I suppose the question out of that is whether that

committee would benefit from other third parties being involved, such as obviously the police or other authorities being involved in the debate.

MR PETER DUNCAN: You have no doubt heard of ISO, ISO 39001 in particular. Does that standard have any sort of role in the bus system in London?

MR MIKE WESTON: I'm not sure. I know that certainly Go-Ahead have got an ISO standard for their engineering practices, but whether it's the same number or a different one, I don't know. So there are some bus companies in London that have ISO accreditation for certain aspects of their operation, but it is not a requirement of Transport for London to have any particular ISO accreditation. But I certainly know Go-Ahead do for their engineering practices, but whether it's the same number or not, I'm not sure.

MR PETER DUNCAN: Could I take you to page 146 of your report, where you deal in detail with the bus safety programme, and introduced on page 146 in this way:

"In February 2016 Transport for London, partly in response to increased public and stakeholder pressure, launched its bus safety programme the core elements of which can be summarised as follows".

We can see the "Core elements" in the left-hand column, and we can see the "Recent additions" on the

right.

We may have touched on this earlier, just a few moments ago, but one of the questions I was interested in asking you was how long this bus safety programme was in the making?

MR MIKE WESTON: Not very long, and partly the reason I know is because I was still at TfL in February 2016 and was responsible for launching the bus safety programme.

The background to it is not that safety wasn't a priority and it's not that safety wasn't being progressed and taken forward and the Bus Operator Forum for safety existed and a lot of these things were happening anyway.

There was increased public pressure around the safety of buses, and that was partly driven by increased transparency from TfL in terms of publishing safety data, but it was also led by a number of stakeholders, including some members of the public that had been involved in serious bus accidents, that led to a lot of pressure on the organisation to move the safety agenda forward. So the bus safety programme was trying to pull together various aspects of work that were currently happening into a coordinated programme, where previously there had been lots of initiatives but it wasn't being seen as a coordinated programme. And February 2016 was

when that was launched, to try to progress this agenda in a more coordinated way.

MR PETER DUNCAN: So how many people would have participated in the design of the programme?

MR MIKE WESTON: Probably two or three people. Very small team. It would have been signed off internally at a higher level, but it would have been brought together by two or three people within the buses safety team.

MR PETER DUNCAN: And the programme, would you describe it as a reactive step, a proactive step, or a mixture of both?

MR MIKE WESTON: It wasn't reactive to a specific incident. I think it was an evolution of a number of things that were already happening, but probably a useful refocus on the agenda.

So, you know, I think it's clear in my mind that the bus operators and TfL have always taken safety seriously, for a number of years, but this was a useful point to try and refocus and rejuvenate the agenda and give it a little bit more direction. That was the purpose of this.

But it wasn't triggered specifically by a specific event, but there was increasing public pressure. There had been an increasing number of incidents with cyclists, because the number of cyclists in London was

rising quite dramatically. There had been some serious bus accidents as well in Oxford Street. So a number of things were bubbling under that were putting more pressure on TfL to move this agenda forward.

But I should stress that a lot of this work was already happening but probably not in such a coordinated way.

MR PETER DUNCAN: If I could bring your attention to page 148. There's particular reference within the programme to the bus safety standard. That's introduced in the first paragraph, if I may quote:

"A core output of the bus safety programme is the development of a new bus safety standard. TfL have been working in collaboration since 2016 with road safety consultant TRL, Loughborough University, the bus operators and manufacturers to assess and then recommend features which should be incorporated into future bus design to help drive safety improvements."

Then in the second paragraph:

"Several potential technologies including intelligent speed assistance, autonomous braking, runaway bus prevention, pedal confusion prevention, acoustic and visual conspicuity, mirror design and frontal crash protection are being considered as part of this programme with both the costs and benefits of each

being thoroughly assessed to ensure that the causality [I think that's casualty] reduction is maximised in return for the financial investment made."

Then we see a reference to intelligent speed assistance, and then the plan to announce the first phase of its bus safety standard on 16 October 2018, to which the chairman has referred, and the three introductory phases.

If I could pick it up after that:

"Although it is currently envisaged the standard will apply to new buses (around 700 per annum) consideration is also being given to the potential for retrofitting to existing buses possibly as part of their midlife refurbishment which takes place around 7 years. It is worth noting that TfL have adopted a rigorous approach to the assessment of each potential option using cost/benefit analysis to target the interventions which will give the greatest return for each pound spent in terms of injury/accident reduction.

It is not anticipated that seat belts will form part of the new bus safety standard."

When you say, "It is not anticipated", is that as a result of the rigorous cost/benefit analysis which has been applied to this particular topic?

MR MIKE WESTON: I think, during the discussions with TfL

staff about the bus safety standard, it was pretty clear that they have discounted seat belts as one of the options to be rigorously assessed fairly quickly. The view has clearly been taken that they don't want to pursue seat belts, I suspect because they know what the cost is and they feel that there are greater benefits from some of the other options that are listed above on that page.

I don't want to use the word they were "dismissive" of seat belts -- that sounds a little bit flippant because I don't think they were dismissive -- but it clearly is not featuring in their thinking in terms of the new bus safety standard. That was pretty clear from the discussions we held with TfL in August, that seat belts were not being considered.

CHAIRMAN: Mr Duncan's question was whether or not it had been dismissed, rejected, or not considered as a result of a rigorous analysis. The contrary is the impression that we anticipate to be confirmed in the future: it hadn't even been considered?

MR MIKE WESTON: The impression we had -- we were given the impression that it hasn't been considered.

CHAIRMAN: Not looked at?

MR MIKE WESTON: Not looked at.

MR PETER DUNCAN: If we look at page 134, have you set out,

it appears in blue on that page, a quotation from the Department for Transport guidance note, which states the current situation with regard to seat belts on buses? Is that the Department for Transport guidance note?

MR MIKE WESTON: Yes. The blue is a direct copy of their guidance.

MR PETER DUNCAN: I'm going to ask you -- I will take you through that, because we want to examine the situation in Hong Kong, as it has evolved and as it is currently recommended. So it is important, I think, that we understand this.

"General requirements since 1 October 2001, seat belts have been required to be installed in each forward and rearward facing seat in all new buses. The use of an approved and properly fitted restraint system can help prevent death or serious injury, not only by restraining the occupant from forward motion but also by preventing their ejection from the vehicle, particularly in accidents where the vehicle rolls over.

The only exemption from this requirement is for buses that are designed for urban use with standing passengers. An exemption is permitted for these vehicles because they are typically used for short journeys, in both time and distance, undertaken at moderate speeds on urban routes. Although we are aware

that vehicles equipped with seat belts are used by some operators for urban fare-paying services, ultimately, it is for the operator to choose the type of vehicle used to provide a service."

So that's the Department for Transport guidance note.

CHAIRMAN: Just for the record, this comes from a statement made by the Department for Transport issued in May 2010, does it not, headed "Seat belts on urban buses"?

MR MIKE WESTON: Yes, that's correct.

MR PETER DUNCAN: I think that note, Mr Chairman, to which you referred, is now in the bundles.

CHAIRMAN: Yes. Can you give us a reference for that?

MR PETER DUNCAN: It's being shown up now on the screen.

CHAIRMAN: But do you have a page reference for future purposes?

MR PETER DUNCAN: It's in MISC-3, Mr Chairman, at page 1274.

CHAIRMAN: Thank you very much.

MR PETER DUNCAN: Now, with regard to the position in Hong Kong with regard to seat belts on buses, I'm going to take you through some, if I can call it that -- I was going to say the history, but various considerations of this matter, and then will ask you a couple of questions at the end with regard to your opinion on certain matters.

We can start, I think, at SEC-3 at page 1310. This is a paper issued by the Environment, Transport and Works Bureau, as it then existed, in 2006. You will see that from page 1316. It is a submission to the Legislative Council Panel on Transport, with the heading, "Safety of franchised bus operations".

At 1315, you will see the topic, "Seat belt on franchised bus[es]".

Paragraph 18:

"Under Road Traffic (Safety Equipment) Regulations ... it is a mandatory requirement to provide seat belt for the driver ... As regards the passenger seats, about 34 per cent of franchised buses have been equipped with seat belt[s] at exposed seats. These seat belts had been installed by the bus manufacturers as standard equipment when the buses were purchased. All franchised bus operators have committed that new buses to be purchased by them will have seat belts installed at the exposed seats. In the light of recent traffic accidents, Transport Department has been reviewing with the franchised bus operators on retrofitting of seat belts on the existing buses, taking into account of the technical difficulties such as the structural strength of the seats, adequate anchorage points and design of the bus ...

19. We have conducted a research on overseas practices regarding the fitting and wearing of seat belts in buses. A summary of the corresponding seat belt requirements is at [the annex]. It can be seen that no overseas country requires fitting of seat belts in passenger seats of buses designed for urban use or for carrying standing passengers."

Then at 20:

"In view of the above, we consider that it is not appropriate to introduce mandatory requirements for installation and wearing of passenger seat belts for franchised buses."

So that is the situation as per the Transport Department's recommendation in 2006.

If we can move from that to SEC-3 at page 1323. This is a paper headed for the information of the Legislative Council Panel on Transport, so the same panel, and the heading this time, "Progress on measures to enhance safety of franchised bus operation".

At page 1329, we can see this is issued in January 2007.

If we look at page 1323, we have the subheading, "Retrofitting seat belt on franchised bus[es]", and if we look through paragraph 3, some reports on the progress of retrofitting.

I can pick it up, I think, at paragraph 4:

"We have collected information from other countries on the requirements of fitting and fastening of seat belts on buses. So far, we are not found any country that have legal requirements for the provision of seat belts on passenger seats of buses designed for urban use and are allowed to carry standing passengers. According to the transport authorities of these countries, the benefit of imposing a seat belt requirement in their buses is uncertain."

And there's a summary at the annex.

So I think it's fair to say that between 2016 and 2017, there was no change in the view of the department; there was the same recommendation on each occasion.

The next report I would like to commend to you is to be found at TD-1/94. So Transport Department volume 1 at page 94.

The heading on this page is, "TD_Paper_08", "Application of new devices or technology on franchised buses", and if you go through to page 107 --

CHAIRMAN: This is a submission made by the Transport Department in April of this year?

MR PETER DUNCAN: That's correct, Mr Chairman, thank you.

So we have jumped from 2007 now, Mr Weston, through to 2018, and this is not a submission made to the

Legislative Council. It is actually one of the documents submitted by the department to the committee, assisting the committee in its work.

If I could bring your attention first to page 94, you will see, at paragraph 4:

"Arising from the serious traffic accident involving a franchised bus of the Kowloon Motor Bus on Tai Po Road resulting in the death of a number of passengers in February 2018, the Transport Department set up a working group with representatives from all franchised bus companies and bus manufacturers in mid-March 2018 to review the technical feasibility and desirability of installing some new safety devices or applying new technology on the safety devices of franchised buses for enhancing protection to bus passengers. The outcome of the discussion and recommendations of the working group are set out in the ensuing [passages]."

You will see then from that what had prompted the setting up of this working group was the accident in Tai Po.

Paragraph 7 of the report, under the heading, "Installation of seat belts for all passenger seats" -- perhaps I should start with paragraph 5:

"In the light of an accident in July 2006 in which a KMB bus collided with another vehicle resulting in

a passenger on the upper deck of the bus being thrown out of the bus and another similar accident in December 2007 ... the TD recommended and the franchised bus operators agreed that safety seat belts should be retrofitted on the four front seats on the upper deck of all the post-1997 licensed buses to prevent passengers from falling out from the upper deck front seats. At present, the seat belts for all the exposed seats have become a standard feature of all franchised buses."

Then paragraph 7:

"As regards the installation of seat belts for all passenger seats on franchised buses, the three double-decked bus manufacturers ... have confirmed that it is technically feasible, upon the request of the franchised bus operators, to supply all new buses with seat belts for all passenger seats which comply with the aforesaid international standards. Correspondingly, all franchised bus operators indicate that they agree to incorporate this requirement for procurement of new buses.

8. As for retrofitting of seats on all passenger seats of existing buses, the bus manufacturers have concerns that the floor structure (especially on the lower deck) of the franchised bus is not designed for seat belt installations for compliance with the

international standards. To fulfil the requirements, reinforcement of the existing floor structure and replacement of all the existing passenger seats with new passenger seats are required. Subject to detailed assessment, the bus manufacturers have initially confirmed that it may be technically feasible to retrofit safety seat belts on all passenger seats of upper deck of the existing buses which are manufactured in certain specified years. They would also make further study on such feasibility and advise the recommended models or batches of buses used by the franchised bus operators that are suitable for installation of seat belts. Based on the Transport Department's understanding, the retrofitting work will involve substantial modifications, including reinforcement of the structure of a franchised bus, replacement of all seats with seat belts, as well as conducting pull tests of the seat belts and seats to confirm their compliance with the international standards, et cetera. The retrofitting and testing work for each franchised bus will take considerable time to complete and hence will affect the bus availability rate for bus operation during the process. The franchised bus operators will further study the proposal."

So that was the situation at April 2018, this year,

as reported to the committee.

It's getting on for 1 o'clock so I will leave the following developments until after the break.

CHAIRMAN: Yes, certainly.

Mr Weston, we are going to take our lunch break now.

Can I ask, Mr Duncan, what progress we have made and what estimate, if any, you have of how much longer your questioning would last, given that we acknowledge that certainly my interruptions may delay you?

MR PETER DUNCAN: Thank you, Mr Chairman. I will do my best to anticipate the extent of Mr Chairman's so-called interruptions. I think we have made good progress. I think we will finish this by 3.30; if not by 3.30, before 4 o'clock, this afternoon.

CHAIRMAN: Thank you for that indication.

In which case, we will adjourn then until 2.30 this afternoon. Thank you.

(1.01 pm)

(The luncheon adjournment)

(2.30 pm)

CHAIRMAN: Good afternoon.

MR PETER DUNCAN: Good afternoon.

CHAIRMAN: Yes, Mr Duncan.

MR PETER DUNCAN: Thank you, Mr Chairman.

Mr Weston, good afternoon.

MR MIKE WESTON: Good afternoon.

MR PETER DUNCAN: Prior to the luncheon break, I had taken you to a document dated April 2018, that was Transport Department Paper No. 8.

I am now going to ask you to look at another document. Here, we are going to go back a little bit in time, to March 2018. We will find this in KMB-12 at page 4869-1. At this page, you will see the commencement of a document which is headed, "Working Group on Enhancement of Safety of Franchised Buses", "Notes of 1st meeting held on 13 March 2018 at 3.00 pm at ..." and it gives the place and it gives the people attending the meeting.

If you go to page 4869-6, you will see the section on "Installation of seat belts", and it's that information which has been summarised in a different form and provided to the committee in the document I showed you just before lunch, TD_08, so I won't ask you to dwell on that any further.

What I would like to do is to take you to 4869-9, which confirms the scope of work for the working group. So this is the scope of work that the working group set for itself, and we can see that set out in full on page 4869-9.

With regard to items (2) and (3), there is --

perhaps I will read them out quickly. Item (2):

"To examine the technical feasibility, cost-effectiveness, applicability and any other issues relating to installation of seat belts on all seats other than exposed seats;

(3) To explore the technical feasibility, cost-effectiveness, applicability and any other issues relating to the installation of on-vehicle safety device, including but not limiting to the following --

(a) Speed display unit for passengers;

(b) Active/passive roll stability control;

(c) Electronic stability control;

(d) Speed control aided by GPS;

(e) Speed limiter to cap maximum speed within 70 kilometres per hour;

(f) Collision prevention and lane-keeping device; and

(g) Monitoring device on captain's condition eg dozing, drowsiness."

What I would like to ask you is this. You told us this morning, in fact, in your evidence and I think it appears in your report, that with regard to safety measures, there will, at least in London, be a rigorous examination of the cost on the one hand and the effect on the other, before any measure is introduced.

So what I am interested in is your opinion as to whether the period of three months that you will see on page 4869-11, "A report on the outcome and recommendations of the review is expected to be submitted to the Commissioner for Transport in 3 months' time", whether you would consider that period to be sufficiently adequate to undertake a rigorous cost and effect analysis of all those matters set out in the scope of work.

What is your opinion on that?

MR MIKE WESTON: On the face of evidence from London, I suppose I would cite two examples. First, the ISA study that we talked about this morning, and the time that study took to gain both pre and post data, and also the time it has taken so far for TfL to deliver its bus safety programme, which started -- work started in early 2016 and has already delivered some elements, but the main focus of that, the bus safety standard, phase 1 won't be announced until next month and will start to be implemented on vehicles from 2019.

Now, you could ask the question, has TfL taken too long to consider and deliver these suggestions, as opposed to being able to do it a lot quicker? I would suggest that to gather bus data from trials, you either need to have a small number of trial buses in service

for a reasonably long period of time, or a very, very large numbers of buses in service for a shorter period of time, to collect robust data.

So in theory, yes, you could undertake trials and assessments in three months, but in my view, to collect robust data on the benefits of those trials, you would have to do a large number of vehicles. I can't remember quite how many vehicles were involved in the ISA scheme but you would have to make sure you had a big enough sample to get some robust data.

So three months does seem remarkably quick, although I'm sure in London some people would say the time TfL have taken could have been quicker. So maybe there is a balance there between the two.

CHAIRMAN: As far as ISA is concerned in London, there were two bus routes, but presumably, in order to sustain the service on two bus routes, that would involve many, many buses?

MR MIKE WESTON: Yes. I can't remember the exact number, but I think the 19, for example -- the route 19 is quite a big route, probably 30 or 40 buses. But I don't think all the buses were installed with the ISA equipment. It was just a smaller sample that were installed and monitored.

So three months does -- if you use TfL as

a comparator and you assume that TfL hasn't been dragging its heels, this three months does seem a very quick turnaround of an assessment of all these technologies and all these options.

MR PETER DUNCAN: Thank you. I'm now going to take you through to April.

CHAIRMAN: Before you do that, although this initial 13 March agenda suggested that a report would be expected to be submitted to the Commissioner for Transport in three months' time, in fact six months have gone past and no final report at least has been submitted that we're aware of. Just to give you that context.

MR MIKE WESTON: Which perhaps suggests that the three months was ambitious in the first place.

CHAIRMAN: Mr Duncan, there is one other matter. Just let me flag it. There was a LegCo meeting when issues germane to this working group were discussed, I think on 15 February. Is that something you are going to go to at some stage? Three motions were passed.

MR PETER DUNCAN: Yes. I can take the committee to that.

CHAIRMAN: At some stage, because it gives context as to why it is that the Transport Department was considering the matters that they did consider in the working group.

MR PETER DUNCAN: Certainly, Mr Chairman. I would like to

go to that now, to try to keep track of the dates in a reasonably chronological order.

We can actually find that, I think, at SEC-3, at page 1342.

At this page, Mr Weston, you will see minutes of the meeting of the Legislative Council's Panel on Transport of 15 February. So it is before the first meeting of the working group which we have just seen was held in March.

If we go to page 1359 -- just give me a moment, please.

CHAIRMAN: Yes. Take your time.

One of the passages I had in mind is at paragraph 3 on 1360, one of the motions, which gives a shopping list of matters that the LegCo Panel urges the administration to explore.

MR PETER DUNCAN: Yes. I think the precursor to that can actually be found on page 1356.

CHAIRMAN: Yes.

MR PETER DUNCAN: There is a discussion on measures to enhance bus safety, and paragraph 59:

"The deputy chairman [of the meeting] suggested that, to minimise the number of casualties in case of bus accident, all franchised bus operators should consider retrofitting seat belts to all seats in buses

by phases. Mr Luk Chung Hung recalled that there had been times all seats of certain bus models of Long Win Bus Company were retrofitted with seat belt. He asked why there was no such kind of buses at the moment.

Commissioner for Transport advised that all exposed seats of new buses purchased after 2003 had been installed with seat belts. After a serious bus accident in 2007, franchised bus companies had acceded to TD's request for retrofitting seat belts to the exposed seats and front-row seats on the upper decks for buses designed after 1997. Transport Department would, together with KMB and other franchised bus operators, actively study measures to enhance safety, including the technical feasibility of retrofitting seat belt to all seats. Managing director for KMB supplemented that KMB held an open mind on any suggestion to improve bus safety and would discuss the above suggestion with the Transport Department. In reply to Mr Luk, Commissioner for Transport said that Long Win had once proactively installed seat belts to all seats but no longer provided them having regard to the low usage.

Ms Claudia Mo noted the view of some transport experts that seat belt might not help reduce the number of casualties for such kind of serious bus accident. She was also concerned that, in case all seats were

retrofitted with seat belt, whether there would be difficulties to require all passengers to wear the seat belts. She enquired about the timetable of considering the suggestion of retrofitting all seats with seat belts and whether a consultation would be conducted in this regard.

Commissioner for Transport said that the administration kept an open mind on the suggestion of retrofitting seat belt to all seats in franchised buses. However, apart from technical feasibility, passengers' acceptability should also be taken into account when considering the suggestion of retrofitting seat belt[s] to all seats. It would study the investigation report to be submitted by KMB in one month's time and would examine the suggestion having regard to relevant considerations."

Then I think, Mr Chairman, the motions commence at page 1359, at paragraph 77:

"The chairman advised that he had received three motions respectively ... He considered that the proposed motions were directly related to the agenda item under discussion. Members agreed that the motions be proceeded with ..."

And the motion was moved by Mr Chan Hak Kan and seconded, and the translation appears at 1360, and

paragraph 3 reads:

"explore ways to further strengthen the safety installations on buses, including enhancing the protection for high-risk seats, retrofitting seat belts on more seats and making it compulsory in phases for passengers to wear seat belts, installing an external camera at the bus captain's seat, modifying the speed limiters on buses to ensure safe driving on high-risk road sections, and installing an auxiliary system for automatic emergency braking, so as to reduce the risk of injuries among passengers in an accident."

So you can see the motions of the Legislative Council which preceded the first meeting of the working group, and reference there to seat belts and some of the pros and cons.

MR MIKE WESTON: Yes.

MR PETER DUNCAN: So, if it is in order, I will then take you further, please, into the chronology by asking you to turn up minutes of the second meeting of the working group, which we will find at KMB-12/4887-1.

CHAIRMAN: This is 23 April 2018?

MR PETER DUNCAN: This is the meeting, indeed, on 23 April 2018. These are the notes.

The relevant section I think you will find, Mr Weston, on page 4887-5.

So:

"After checking with the bus manufacturers on the feasibility for installation of seat belts for all passenger seats for new buses, all franchised bus operators advised that it was technically feasible to install seat belts for all passenger seats for new buses to be procured. KMB/Long Win supplemented that it would cost about an additional of 5,000 pounds for each double-decker to install seat belts for all passenger seats. All bus operators agreed to incorporate this requirement in their new single-decked buses and double-decked buses to be procured.

For new buses which had been procured but not yet delivered, KMB said they would request the bus manufacturers to install seat belts for all passenger seats if it would be feasible to include such requirement. KMB/Long Win advised that 145 new buses to be delivered before September 2018 could be able to install with seat belts for all passenger seats. Citybus and New Lantao Bus would advise Transport Department by end of April 2018 if the bus manufacturer could install seat belts for all passenger seats for new buses being manufacture[d].

For existing buses, Citybus and Kowloon Motor Bus advised that the technical feasibility for installation

of the seat belts on all passenger seats at upper deck was still uncertain. Even if it proved to be technical[ly] feasible, the subject still needed further deliberation taking into consideration the financial implications and impacts on bus operation (ie the availability of bus) due to the time required for the substantial modification of buses. Transport Department encouraged all franchised bus operators to continue to study the technical feasibility of retrofitting seat belts on all passenger seats on each bus model before reaching the final decision."

So that's the position after the second meeting, and then the third meeting we can see, which was held on 23 June -- so we've had March, April, and now we have June -- is at KMB-12/4908-1.

The relevant part of these notes with regard to seat belts appear at page 4908-7. At 25:

"The meeting noted that it was technically feasible to supply all new buses with seat belts for all passenger seats conforming to relevant international standards and all franchised bus operators committed that all new franchised buses would be incorporated with seat belts on all passenger seats."

And we have seen that the additional cost of that is going to be about 5,000 pounds per bus.

Then at 26:

"As for existing buses, the meeting noted that retrofitting seat belts on all passenger seats of the upper deck of some existing double-deck bus models should be feasible. Kowloon Motor Bus advised that they would retrofit seat belts on all passenger seats of the upper deck or deploy buses with seat belts on all passenger seats on routes which serve long-haul passengers or are operated on expressways with limited boarding or alighting activities at the en route stops.

[Post-meeting note: KMB advised that there would be about 400 new buses with seat belts on all passenger seats by mid-2019. KMB would deploy these buses to the required routes. Retrofitting seat belts to existing buses would depend on the actual situation/requirement at that moment.]

27. In the light of KMB's initiative, the meeting had discussed and come to the views that having regard to the technical feasibility in retrofitting seat belts on existing buses; operation of franchised buses in Hong Kong which were mostly deployed on urban routes with standing passengers; and the costs and downtime incurred to retrofit seat belts on all existing buses, as well as overseas experiences, that there were insufficient justifications to make it a mandatory

requirement for all buses to be fitted with seat belts on all passenger seats. Nevertheless, members reckoned that as in the case of exposed seats and in bus compartment with no standees allowed, seat belts might give extra protection to seated passengers to prevent passengers from falling out from these seats.

28. In this regard, Citybus was requested to consider retrofitting seat belts on all passenger seats on the upper deck for the buses operating selected bus routes for long-haul passengers or operating on expressways with limited boarding and alighting activities along the routes. Citybus indicated that it would be difficult for their companies to allocate their buses to solely operate specific routes as their buses would serve a number of routes in a day under their existing operations. In addition, Citybus observed that very few passengers would make use of seat belts, it would not be financially viable to retrofit existing buses with seat belts on all passenger seats. Citybus requested the government to fund the retrofit of seat belts to existing buses if that was what the government wanted."

And the section concludes, in paragraph 31:

"... the Transport Department requested all franchised bus operators to estimate the number of

long-haul bus routes operating via expressway with relatively fewer bus stops and the corresponding number of buses involved, and provide the information to the Transport Department for reference the soonest possible."

If we can then move from what you can see in that meeting to another document, this time at page 4938-1. You will see the notes of what is described as the 3rd meeting, held on 27 June this year, of the sub-working group on in-vehicle safety devices for franchised buses. So this is six days later, in the sub-working group.

If we go to page 4938-5, at paragraph 15 we see the heading, "Installation of seat belts for all passenger seats":

"Transport Department informed the meeting of their view to retrofit seat belts for bus routes serving long-haul passengers, or operating on expressways with limited boarding or alighting activities at the en route stops where passengers tend to use them. Transport Department had already requested franchised bus operators to provide return on the number of buses involved in these service natures. New World/Citybus emphasised that they did not [agree] to such retrofit work unless it would be funded by the government. New World also mentioned that it would take 3-4 skilled

labour one week to retrofit a bus (eg one man-month). Taking into account the labour cost and material cost, it was estimated that the retrofit cost for one bus would be around $240,000."

Then the final paper, I think, which I then need to show you, is a paper which the Transport Department provided by way of an update to the LegCo's Transport Panel the following month, that's July of this year. We will find that in TD-1 at page 403.

At page 403, we can see the heading, "For discussion on 25 July 2018". It's to the Legislative Council Panel on Transport, "Enhancement of safety of franchised buses", and if you go through to page 412, you will see that it's a paper which has been provided by the Transport and Housing Bureau and Transport Department in July.

The purpose of the paper is set out on page 403, and the background is set out, referring to the working group and its scope of work. There are various sections in that paper. The one of relevance to seat belts, I think I can take you directly to paragraph 16 which is on page 409:

"Having regard to the points mentioned in paragraphs 10 to 15 above ..."

And it's in that section where the detailed

matters -- I think which we have already gone through in the previous notes.

"... the working group has arrived at the following recommendations with a view to giving extra protection to seated passengers:

(a) seat belts should be provided for all seats in future procurement of new buses; and

(b) subject to further assessment on the technical, operational and financial feasibility, consideration may be given to retrofitting all seats in the upper deck with seat belts on buses deployed for specific bus routes, ie long-haul routes which are operated via expressways with relatively fewer bus stops.

The Transport Department will require the franchised bus operators to explore in more details in conjunction with the bus manufacturers to ascertain the technical feasibility of retrofitting seat belts on the upper deck of different bus models, the operational and capacity considerations in developing the timetable for the retrofitting works and how such considerations may be addressed, as well as the financial implications, in order to decide whether and, if so, how all passenger seats on the upper deck of existing double-deck buses deployed for long-haul routes mentioned in paragraph 16(b) can be retrofitted with seat belts. In

the meantime, the Transport Department will work with the franchised bus operators to promote the use of seat belts if they are available (at exposed seats or on new buses)."

I think, in addition to those papers, I should also, before asking you a couple of questions, refer you to just some aspects of the evidence that the committee has heard. First of all, evidence from Citybus, who gave evidence at an early stage of the inquiry. We will find this at Day 4 of the transcript at page 102.

CHAIRMAN: Which transcript bundle is this to be located in?

MR PETER DUNCAN: It will be in 2A, Mr Chairman.

CHAIRMAN: Thank you. To give this context, this is 30 May 2018.

MR PETER DUNCAN: That's right. That's before some of the matters we have just seen.

The part I wish to bring your attention to is at page 102. Perhaps I should go to the question, which you will find at page 101, at line 15, where I am examining Mr Samuel Cheng, who is a representative of Citybus:

"Can you point to anything specific which you would regard as beyond your financial capabilities at the moment, but which, if it could be could funded, would add materially to the matter of safety? Is there any

specific matter?

Mr Samuel Cheng: I cannot give any examples which will substantially enhance the safety. Rather, there are certain things which the public would think that, when done, the safety would be enhanced.

I can give examples. Say, for example, this morning, you explored the idea of retrofitting safety seat belts for the upper deck. This morning, Mr Li talked about the cost. It will be 15,000 to 20,000 pounds per bus, and we have got 1,100 buses falling into this category. If they all have to be retrofitted with safety belts on the upper deck, the total cost, as we have given, will be HK$180 million to HK$240 million."

That's Citybus.

Then if I could take you to Kowloon Motor Bus, more recently, Day 15 --

CHAIRMAN: Perhaps before we leave that, there is an observation that is relevant to the cost side of it, and that's the usage side of it. That's at the bottom of page 102. Perhaps you would draw Mr Weston's attention to that. Line 19 -- or line 16, perhaps.

MR PETER DUNCAN: If I leave out the next couple of paragraphs, Mr Weston, and pick it up at line 16:

"This morning, we have said that currently there are

certain exposed seats on board and they have been fitted with seat belts, but then in fact I ride on the buses many times. I seldom see passengers occupying such seats put on the seat belts. In future, if you ask our company to spend $100 million to $200 million, or more than $200 million to work on this, while we query very much the effectiveness, of course, if the administration would like to impose such a requirement, that is to retrofit the seat belts, then I very much hope that the government will provide a subsidy so that we can install the seat belts.

So this is one of the examples. Thank you.

Chairman: So your point really is this: if the government thinks that it's worthwhile doing because it gives passengers who might want to put a seat belt on the opportunity to do so, but it's your experience that if they don't do so, then it's up to government to fund this, rather than impose it on your own? Is that the point?

Answer: If the government sees the need for seat belts, in order for the passengers to put on the seat belts if they want to, if that's the case then I hope the government would fund the exercise because if we fund it, it would be a waste of resources."

I think if you go to page 58 --

CHAIRMAN: Of this transcript on Day 4?

MR PETER DUNCAN: The transcript, yes.

CHAIRMAN: Yes.

MR PETER DUNCAN: -- there is a similar sentiment from Mr Cheng at an earlier stage, at line 24 on page 58. Yes, I had just referred to an extract from the forward planning programme for Citybus, where Mr Cheng's evidence is to this effect. I quote from line 25:

"It is feasible to install seat belts on all seats or on all seats on the upper deck. However, our observation shows that very few people wear the seat belts currently available at the exposed seats. Without any legislation to mandate the wearing of passenger seat belts on a franchised bus and the enforcement authority to strictly enforce the legislation, installing seat belts on all [buses] will be a waste of resources because vast majority of passengers will not wear seat belts even though they are provided."

So, then, moving from Citybus to Kowloon Motor Bus. Their evidence was given more recently, Day 15 on 13 September. That's in bundle 6 of the transcripts, Mr Chairman.

CHAIRMAN: Thank you.

MR PETER DUNCAN: Day 15, page 18. At line 20, I have asked a question about new buses having seat belts:

"Do I understand that the new buses will have seat belts --"

Perhaps I need to go back a little further. At page 15, line 24, Mr Roger Lee -- he is from Kowloon Motor Bus -- is talking about the feasibility, first, of installing safety belts on the upper deck for retrofit:

"To install safety belts on the upper deck, technically speaking, we would have to consider the issue of gravity. The government and ourselves -- well, the government has consulted us for certain information and our supplier conducting a technical assessment, and the progress has been positive so far. The safety belts are relatively heavy. If they are to be installed on the upper deck, the government would have to conduct tilt tests. If this is technically feasible, it won't be an issue to install them. Whereas for the two main suppliers, Volvo and ADL, the progress has been very positive, however we would still have to wait until the tilt tests are completed.

Question: Can you give the committee some idea as to the financial implications of the retrofitting of the seat belts?

Answer: This is not cheap, or should I say, in the beginning of this year, a special committee of our company issued clear instructions. Our buses procured

in 2019 and after would be fitted with safety belts. As for the retrofitting of safety belts, where possible, especially on long-haul routes, we would install safety belts on the upper deck. We do not want to see further accidents, so cost is not our main consideration. We have not considered the financial implications yet. Retrofitting of safety belts would cost about $200,000 per bus.

Chairman: That is on the upper deck?

...

Question: ... Approximately how many buses do you expect would be retrofitted, how many buses in your fleet?

Mr Leung Kin Wang [another representative]: I think nearly 3,600 long-haul buses."

Then there is an intervention at line 22 -- sorry, Mr Roger Lee at line 11:

"I would like to add something. Currently, we have 4,200 to 4,300 buses. That is for KMB and Long Win Bus combined. Some buses are fully equipped with safety belts. For some others, as they will retire in the next years -- for buses that will retire in two or three years, they might not need to be retrofitted. For long-haul buses, I do not have the exact figure, but about one-third of our buses would go on long-haul

routes, so that comes to about 1,000."

Then the chairman at line 22:

"Before you move on ... earlier, Mr Lee, you said this involved retrofitting 3,600 long-haul buses. Are you now correcting that statement and in fact it involves 1,000?

Answer: Yes."

At line 5:

"I'm just trying to do the mathematics. 1,000 buses at $200,000 per bus?

Mr John Chan: Yes.

Question: $200 million?

Dr Norman Leung: Yes.

Question: Is the cost of that something that has been discussed with the government?

Mr Roger Lee: No."

Finally, as regards material data I need to bring to your attention, we have the evidence from the Hong Kong Police Force representatives.

CHAIRMAN: Before you move on to that, there is something in the transcript that you have just read out, at page 16, line 17:

"... in the beginning of this year, a special committee of our company issued clear instructions. Our buses procured in 2019 and after would be fitted with

safety belts. As for the retrofitting of safety belts, where possible, especially on long-haul routes, we would install safety belts on the upper deck."

I think, to give that context, it would be relevant to refer to the report to the Commissioner for Transport by KMB on the bus accident on the Tai Po Road which is to be found at KMB-1A at page 98, and to paragraphs 39 and 40.

MR PETER DUNCAN: Do you have that in front of you, Mr Weston?

MR MIKE WESTON: Yes.

MR PETER DUNCAN: KMB-1A/98.

CHAIRMAN: Just to give you the context, Mr Weston, this was a report that the Commissioner for Transport required KMB to give in a period of a month. I think it was delivered on 12 March.

This precedes the very first day, which was the following day, when the working group met, and its agenda was provided to those who attended.

Perhaps I could invite you, Mr Duncan, to read this out, so we have it in the transcript, informing us as to the position taken by KMB in advance of any working group.

MR PETER DUNCAN: Yes.

If you go back to page 98 of this bundle, Mr Weston,

you will see this is issued on 12 March. At paragraph 39 the bus company say, in their report to the Commissioner for Transport:

"In the aftermath of the incident, a number of comments and suggests have been raised by members of the Legislative Council, the media and members of the public on measures which should be considered with a view to enhancing the safety of public bus operations and of bus passengers. The special committee has considered these issues, in consultation with KMB's bus suppliers, and made various recommendations which KMB's management will be implementing or further examining.

40. KMB has already requested its suppliers to install safety belts on all seats as a standard feature for new buses ordered after 5 March 2018. As for buses that are currently in service, where certain routes so require, safety belts will be installed on the upper deck of KMB buses phase by phase."

CHAIRMAN: Thank you.

MR PETER DUNCAN: If I could then finally take you to the evidence from the police. This is Day 17 of the hearing. That was held on Monday, 24 September. That will be in transcript bundle 7, Mr Chairman.

CHAIRMAN: Thank you.

MR PETER DUNCAN: If I could bring your attention, please,

to page 50. The exchange is between the chairman and Mr Auyeung, with Mr Stephen Baker, who is a representative of the police force.

CHAIRMAN: Chief Superintendent Baker.

MR PETER DUNCAN: Thank you.

I think probably I need to pick it up at page 49, where the chairman has indicated that the provision of seat belts is required for public light buses, and the chairman at line 8:

"But they do for PLBs.

Answer: They do, sir, yes.

Chairman: And what is the ease with which that is enforced or the difficulty?

Answer: It is difficult to enforce, and it is not enforced regularly. I would say it is enforced occasionally, when officers decide to take enforcement as a road safety issue. There is always more than one aspect to road safety -- publicity -- but it is also coupled with enforcement from time to time.

...

I was going to add that we hope that people won't obey the law only because they feel they might be prosecuted for it, for not following the law. Yes.

Chairman: It took a long time to persuade people when they had a choice that they should wear seat belts

in cars.

Answer: Yes, sir. But going back to my earlier comment, in our view, it is better if people have the option to improve their own road safety, as a matter of choice.

Then Mr Auyeung raises this question:

"Just a quick question on the seat belt. Using the experience you have on the PLB, how successful has the police force been on enforcement?

Answer: I don't have enforcement figures, but, like I say, I would hope that people would follow the law because it was good for them rather than because they would be prosecuted if they didn't.

Chairman: But, as you said earlier, most people don't wear them on public light buses, enforcement is difficult, and one can see why, and you would expect that same trend to obtain with buses?

Answer: I would, sir, yes."

So there is a lot of information there I have asked you to digest, Mr Weston, but you can see what appears to be looming here. First of all, not just looming, but apparently decided that with regard to new buses, henceforth it is proposed that all buses be fitted with seat belts for each seat, irrespective of whether that bus is plying an urban route, presumably a very crowded

route where there is provision for standing passengers. That's the first issue, and we have heard that the additional cost to the bus companies for that facility would be something like 5,000 pounds per bus. So that's one aspect.

The second aspect is the retrofitting of the upper deck seats, where it is technically possible for buses which are plying on specific routes, exemplified by expressways, at a total cost, if we take the two major franchisees, of something like $400 million.

So what I think the committee would appreciate would be your reaction to these two matters, first of all the provision for seat belts on each and every new bus, at that not insignificant cost, and then secondly the provision of a retrofitting on those buses which ply the expressways and those specific routes.

Would you be able to assist the committee with your views on those?

MR MIKE WESTON: Yes. I will give some sort of general observations. I think, on first sight, it seems, from the evidence this afternoon, that the decision to install seat belts has been more led by technical feasibility than assessment of the benefits. So there has clearly been a very in-depth technical assessment about whether it's possible. There has clearly been

some work around the costs. What seems to be missing is whether there is any real benefit.

I could conclude from the evidence this afternoon that the decision to adopt seat belts in Hong Kong by the franchised bus operators has been as quick a decision as TfL's decision to dismiss seat belts. We spoke earlier this morning about TfL's dismissal of seat belts as an option, and maybe this has been as quick the other way.

I think it is clear that seat belts clearly have a benefit in an accident, whether it is a car or any other vehicle, it's clearly a benefit, but it must be worn, and we have talked -- or there is evidence around the enforcement issue and the ability to enforce the use of the seat belt.

The other issue that hasn't been mentioned and I haven't seen in any of the evidence but I would also be worried about is the ability to maintain these seat belts in working order. At the end of the day, you will buy a new bus with seat belts, and it is clearly important then that if the Transport Department and the franchised bus operators are going to encourage passengers to use these seat belts, it's clearly critical that they are maintained in working order, and that in itself is potentially a massive financial

obligation and a massive time obligation. So there is an issue around maintenance, into continuous maintenance.

I think in my mind the bit that is missing in a lot of this assessment is really the cost/benefit, and really considering the cost of seat belts, and certainly the retrofitting is a huge cost. Even in new buses, the 5,000 pounds is still a fairly significant cost compared with the overall cost of the vehicle.

The key question is what are the benefits of that investment in terms of seat belts, in terms of reducing injuries, compared with how that money could be spent on other safety measures across the network. I think one of the worries is that, you know, the commitment by people like KMB to invest such huge sums of money is credible, it's good, should be welcomed, but the danger is some other technology is waiting to be installed that then can't afford to be installed because the money has been spent on seat belts.

So I think there's a whole piece of work missing here about, for every dollar that's invested in bus safety, are there bigger benefits to be obtained by intelligent speed adaptation/assistance, autonomous braking, front-end design, can that money be spent more wisely on other things? And I think the worry is once

the money has been spent on this, it's been spent.

Ultimately, from my understanding of the system in Hong Kong, this money can only come from three places. It can either come from the existing profits of the franchised bus operators -- although I have read some evidence that suggests that's not great -- it can come from the passengers in terms of increased fares, or it can come from the government; it's got to come from one of those three sources.

So there's a question about can that money be spent in a better way and get stronger results? If we added up all those figures, it's a significant amount of money, and I would question whether it could be spent on other forms of technology that would get better results.

However, I think just drawing on a bit of a difference between London and Hong Kong which I think is significant -- the decision -- TfL appear to be saying they are not really considering seat belts, but London is a very flat environment. There are very, very few roads where buses can run above 40 or 50 miles an hour. Buses generally don't go on expressways or motorways in London, so most buses are what you would term urban in London, where clearly in Hong Kong you have some quite challenging topography and you have some fast roads. So in my mind, I think I would be looking

at how you deal with those high-risk routes as opposed to a blanket one-size-fits-all in terms of solution.

So I think there could be some routes which are strong candidates for seat belts but it probably needs to be perhaps more selective as opposed to a blanket approach.

As I say, I think I would be interested in asking questions around what is the ongoing maintenance commitment going to be, in ensuring these seat belts are in working order.

CHAIRMAN: Can I ask you to move closer to the microphone.

MR MIKE WESTON: In ensuring these seat belts are in working order and are maintained properly, because that's quite rightly, if there is a strong campaign to encourage their use, the public then have a right that those seat belts are working when they get on a franchised bus.

CHAIRMAN: Are you able to give us any idea of the cost of maintenance of seat belts? I am right, am I not, in thinking that they are required to be installed and worn on coaches, in the United Kingdom?

MR MIKE WESTON: Yes. I suspect the challenge in London, if they were on service buses, would be -- the challenge in terms of maintenance would probably be in terms of vandalism and -- well, vandalism of the strap or of people putting things into the holder. So I suspect the

challenge --

CHAIRMAN: Fortunately, in Hong Kong, that's very unlikely to be the problem. Are there any --

MR MIKE WESTON: Which is less of an issue.

CHAIRMAN: -- technical factors about maintenance that might be the problem here?

MR MIKE WESTON: I don't know. But I would be surprised if there wasn't some regular maintenance requirement of seat belts. On coaches in the UK, clearly, probably vandalism is less of an issue or potential vandalism is less of an issue.

Maybe if I can just refer to some interesting TfL data in my submission, which I think was appendix D of my submission, which --

CHAIRMAN: Just a moment.

Mr Duncan, can you give us a page number for that? Appendix D.

MR MIKE WESTON: It was the presentation by TfL to myself and the chairman.

MR PETER DUNCAN: 160, we believe, Mr Chairman.

CHAIRMAN: Thank you.

MR MIKE WESTON: There is an early slide of that presentation that --

CHAIRMAN: Do you have a page number for us so we can --

MR MIKE WESTON: I don't. That one there, yes. Backwards,

sorry. Yes, that's it.

CHAIRMAN: Yes.

MR MIKE WESTON: This is data for 2017, showing slips, trips and falls on buses: 3,074 in the year 2017. I think it helpfully illustrates that the majority of injuries to passengers on board were those standing, while the vehicle is in motion, while they are boarding or alighting, while they are climbing or going up or down stairs. 13 per cent is seated passengers. So there are about 400 incidents of the 3,000 down to seated passengers, which suggests that perhaps the focus needs to be on -- as much as those, also needs to be on those standing and moving around the bus whilst it's in service.

I think that just hopefully illustrates the sort of breakdown of the injuries in London by what the passenger is doing on the bus at the time.

CHAIRMAN: In the statistics that we have in the forward planning programme, Mr Duncan, KMB, for example, 2018 to 2022, distinguish between people who lose their balance, which is how we describe "slips, trips and falls", from people who are injured in their seat. My memory is that in that year -- though I think, looking at the figures for 2015 and 2016, two years -- 51.5 per cent were standing, or "lost balance" is the way it's put, and

only 1 per cent were injured in their seats, which suggests perhaps a lower rate of injury for seated passengers.

MR PETER DUNCAN: That does accord with my recollection, Mr Chairman, but I will ask my assistant to try and turn up the FPP reference to that.

CHAIRMAN: Yes.

One of the other issues that will arise if one was addressing this as a topic -- as required by the LegCo members in this panel, please have a look at seat belts, as you have seen -- would presumably be, first of all, what damage happens if you are not wearing a seat belt, and from the figures I have just quoted, the main damage appears to be people standing up or moving down staircases, moving around the bus, as opposed to people seated at seats, which seems to be small.

The other issue would be the usage of existing seat belts on a bus, and would it not be sensible to have some kind of survey to get empirical data about the actual usage, rather than the managing director of Citybus, who did tell us that he was a passenger on buses frequently, say, "Nobody wears them"? Would it not be sensible to have empirical data?

MR MIKE WESTON: It would be very easy to do, I would have thought, from perhaps CCTV observations and sampling of

a certain number of journeys. It would be probably quite an easy thing to come up with, a current usage rate.

But I would hope that if a decision to fit the seat belts carries forward, there would be a strong campaign, a publicity/marketing campaign, to encourage their use, because at the end of the day, once the decision has been taken to make that investment, let's hope that at least the effort is then put in to maximise the benefit from that investment.

But, as the data from TfL shows, it probably supports the case in Hong Kong that that's not the biggest issue in terms of passengers on board a vehicle.

CHAIRMAN: Perhaps another factor would be to conduct a survey asking people if, because the authority thought and the bus company thought it would be a safe thing to do, to install seat belts, "Would you be prepared to use them? What's your willingness to use them?"

Such a survey was conducted back in 2007, I think. Perhaps Mr Duncan can find that reference. 2,200 people were called up by telephone is my memory.

MR MIKE WESTON: I suspect, Chair, that there is a danger with that question, in how it's asked, that people will give the answer that they are expected to give.

CHAIRMAN: The opposite of the question asked at the

referendum about Brexit.

MR MIKE WESTON: Yes. "Of course I would wear the seat belt", but their actions in practice may be different.

CHAIRMAN: Yes.

MR MIKE WESTON: That's the challenge with one of those sorts of questions.

CHAIRMAN: I understand, but I assume it was done professionally, since the Transport Department quoted the statistic.

MR MIKE WESTON: Yes. But again, it goes back -- I'm not sitting here saying that the seat belts are necessarily a bad idea. My question is can that amount of money which has been quoted this afternoon be spent in a more cost-effective -- in a more beneficial way and result in greater benefits in terms of injuries to passengers and other road users. That's the question.

CHAIRMAN: Your concern is that if the money is spent and the pot is emptied, then money that might have been more usefully, more beneficially, spent on other aspects of safety will not actually be available to be spent?

MR MIKE WESTON: Exactly, and where we currently are, the operators have made a financial commitment for future years and could that financial commitment get greater benefits somewhere else?

CHAIRMAN: Just let me explain. We are going to take

a short adjournment, and the reason for that is that Prof Lo has a commitment elsewhere that he must keep, but we are going to continue with our hearing and Prof Lo will have available not only the transcript of the proceedings but also the audio tape. But it is necessary now for us to take a short adjournment while Prof Lo is able to leave.

So we will take two or three minutes. Thank you.

(3.40 pm)

(A short adjournment)

(3.44 pm)

(In the absence of Prof Lo)

CHAIRMAN: Thank you.

Yes, Mr Duncan.

MR PETER DUNCAN: Thank you, Mr Chairman.

I am actually going to leave the topic of seat belts now, Mr Weston.

CHAIRMAN: Were you able to turn up the figures that I had in mind?

MR PETER DUNCAN: Not precisely, Mr Chairman, no, I'm afraid. Once we do locate what we think is being referred to, we will bring that to the committee's attention.

CHAIRMAN: I think they are on the screen.

MR PETER DUNCAN: Yes. I'm not sure that gives the

distinction that Mr Chairman was referring to. It's certainly got the loss of balance of 54 per cent.

CHAIRMAN: There we are: loss of balance, 54 per cent; injury to passenger inside bus, that's 3 per cent.

MR PETER DUNCAN: Yes.

CHAIRMAN: And that I understand to mean the seated passenger, because that's the distinction between someone who has loss of balance.

MR PETER DUNCAN: Yes. I understand.

CHAIRMAN: To all events, it's a very marked difference in the small number of people injured while seated, although for obvious reasons there must have been a basis for installing seat belts on exposed seats. So the seat belts on the upper deck, at the front, I think came about because people were projected out of the bus. So at some stage a rail was put there, I think earlier, and then seat belts.

Then there are obvious places seated in the lower deck where there is no obstacle immediately in front of you, so if you are seated with another seat in front of you, you haven't got very far to go, and that seems to have been the rationale to that limited use.

MR PETER DUNCAN: I will just give you the reference to that page, Mr Chairman, which is now being shown. It's KMB-12, page 5115.

CHAIRMAN: Thank you.

MR PETER DUNCAN: So, subject to any other comments or questions, Mr Weston, I'm going to move away from seat belts and actually move to the final topic that I've got that I wish to explore with you.

That arises from page 149 of your report. I beg your pardon, it's page 146 initially. It's the issue of fatigue management, which we can see on page 146, in the introduction to the bus safety programme, was a recent addition to the bus safety programme. I would like just to ask you a few matters about this.

At page 149, at paragraph 7.6, you say in the last paragraph:

"It is also clear that there has ... been a shift towards 'behavioural safety' such as fatigue management."

Could you give the committee the benefit of your information with regard to that shift, and what is constituted by "behavioural safety"?

MR MIKE WESTON: Yes. I think the shift is that traditionally safety management has been around risk assessments, accident investigation, and often coming up with physical changes to either bus design or to suggested changes to road layout or changes to working practices.

One of the things that's certainly come out as part of the bus safety programme -- and it came out very strongly when the chairman and myself were meeting the London operators in August -- is that operators are now trying to dig further down into what the root causes of incidents may have been, and as part of that looking at the sort of behavioural impact of drivers.

An example in terms of fatigue management may be if a driver has an accident, traditionally the driver would have been interviewed, and the questions very much would have around what happened at the time of the accident, what were the factors, was the driver a contributory factor in the accident, very much focused on the incident itself.

What a lot of the operators are starting to do -- and we saw examples -- is starting to look beyond the accident and the incident itself, starting to talk to drivers about what was happening perhaps half an hour before, had they had any conflicts with passengers that may have acted as -- may have not been a direct impact on the accident but it was a distraction with them, if they had had an argument with a passenger maybe half an hour before; talking to drivers about their lifestyle. What one operator noticed, from some analysis they had done, is that often a lot of their

longer-serving drivers who had a very good safety records were far more conscientious about turning up for work early, giving themselves plenty of time to check their bus before they went into service, perhaps go to the toilet before they go into service, perhaps have a cup of tea before they go into service. So often these drivers were more conscientious about turning up on time, and in some interviews they had done -- and also more conscientious about making sure they went to bed at the right time the night before.

So operators appear to be broadening out their thinking about how they look at safety from investigating the incident itself and the factors around that incident, to a broader looking at driver behaviour and the impact that may have on fatigue. There are examples in bus companies whereby every night bus driver has a regular interview around their shift patterns and anything that might impact on their ability to drive at night.

So it's a sort of shift away, in simple terms, from investigating incidents, to try to look at driver behaviour more broadly.

CHAIRMAN: In that context, as I recall, questions asked about why you want to be a night-time driver: is it because you are delivering children to school and

picking them up during the day, so that in fact you are not actually getting a proper, sustained rest; you are looking after family and doing a full-time job?

MR MIKE WESTON: Yes, and there were concerns expressed by some bus companies that one of the reasons they do regularly interview night bus drivers is to make sure that their work-life balance is right, and obviously a lot of pressure in big cities like London where drivers may have to share family responsibilities with their partners, to take children to school, then get home, then perhaps have three or four hours' rest before picking them up and then going to drive at night. So companies are very conscious of making sure that they understood more about a driver's ability to do the types of shift they were being asked to do, which I think is a new approach than has traditionally been the case.

MR PETER DUNCAN: To what extent is fatigue management made part of the training of bus drivers?

MR MIKE WESTON: Probably not as much as -- probably not that much, historically, and I think there are opportunities for a lot of this work to actually up the sort of interaction around the whole issue of fatigue management.

I personally don't think it's around bus drivers' hours. I think perhaps -- the danger is that the amount

that bus drivers drive could be again another quick reaction to a problem, a bit like seat belts. I don't really think that's the issue. I think the drivers' hours and regulations in the UK are pretty well established. There is no suggestion that they allow excessive driving hours. It's about making sure drivers take enough rest between their shifts and they are not doing other jobs, although most London bus operators weren't overly worried about secondary employment, but a lot of them did have processes in place to check that drivers weren't undertaking secondary employment.

But I think this whole issue of fatigue management, and also supporting drivers in getting enough rest and living the right lifestyle to do the job, is just becoming more of a focus.

CHAIRMAN: Bus companies in London have access to the register, if that's the right name, of drivers who are allowed to drive minicabs and Uber, and so on; is that correct?

MR MIKE WESTON: Yes. So TfL, Transport for London, is the licensing authority for taxis and private-hire drivers and vehicles, and so they are able to share that database with the bus operators, so the bus operators can satisfy themselves that some drivers aren't also driving for minicab companies as a way of boosting their

income, because I think most bus companies see, quite rightly, that bus driving is a primary job and if you are full time it should be your only job, because you should be resting the rest of your time.

CHAIRMAN: Am I right in recalling that some bus companies have some kind of limited checking of that information, surveillance of some kind?

MR MIKE WESTON: Yes. I think most of the checking tends to be reactive, reactive to incidents or to information that's received. So very few companies do blanket checking of whether the drivers are doing other things, but it will be in response to certain incidents, like, for example, if a driver is off sick, sometimes they get information to suggest the driver is working somewhere else, and they will then follow that up with their own internal investigation.

But, in summary, I think we are just seeing a shift from investigations very, very focused on the incident itself to try and look at the root causes, and trying to dig down more into what some of the root causes of accidents may be. Where traditionally and historically there's probably been very much a culture of -- were we as the bus company blameworthy or not blameworthy, and that's almost been the point where the investigation has ended, "Our driver wasn't blameworthy, it was the third

party, there's a financial claim against the third party, that's investigation finished."

I slightly exaggerate to make the point, but I think what's happening now is there is more work going into identifying the root causes, and some of those root causes may only be small contributory factors but from that you can learn things that allow you to improve the safety culture and the safety practices.

CHAIRMAN: Where is the initiative coming from in this gradual change of approach to fatigue management?

MR MIKE WESTON: It's coming from the renewed focus of Transport for London to improved safety, and I think the operators see that as a joint responsibility. I don't think the bus operators in London have ever been dismissive of safety management, and it's a constant journey that in reality you will never finish because you can always become safer and safer. In our discussions in London in August, I think it was the managing director of Go-Ahead London was saying that when he joined as a apprentice probably 35 to 40 years ago, the biggest risk was people slipping over in garages because they were covered in diesel oil. That risk was eliminated years ago. So it's just a case of bus companies having to become more and more sophisticated to reduce the risk even further in

operational areas.

So I think it's a constant process but everybody is becoming more focused and more sophisticated.

MR PETER DUNCAN: Does Transport for London govern the training of bus drivers or is that left entirely to the bus operators?

MR MIKE WESTON: There are two key aspects to training. There's the driving test itself, which is a Department for Transport national requirement. So, to get a public service vehicle driving licence, you have to undergo a driving test which is undertaken by either the government agency, the Driver and Vehicle Standards Agency, or a lot of bus companies will have dedicated examiners, so they will have their own examiners who can self-test but obviously are overseen to maintain standards.

Once you have your driving licence, every bus driver in the UK, and it applies -- it's European legislation -- has to do five days of accredited training every five years. Most bus companies will have a day's accredited training each year, and that is to maintain a bus driver's certificate of professional competence.

So those requirements apply to all bus and coach drivers across the whole of the UK, not just to London.

What London then does, it requires certain training courses to be undertaken, and the main one is an accredited qualification, accredited by an organisation called City and Guilds, which is called Professional Bus Driving in London, and it is a course that drivers must complete within one year of becoming a London bus driver, and they must complete that accredited training.

In addition, TfL has also developed some training that's been part of the five days of accredited training. So I refer in my report to one called In The Zone, which was a half-day training course that we developed, which was then delivered by bus company trainers to all bus drivers, and it was effectively a training course that used videos to show how drivers manage and assess risk, and basically it was a series of videos that took a bus driver through a typical morning and showed you different outcomes depending on how they had assessed risks during that half-hour prior to an accident and various incidents that took place. It was trying to illustrate that your behaviour and your risk assessment as you are driving can dramatically affect the outcome. So that was a half-day's training.

Then, more recently, they have undertaken something called Hello London which is a two-day training that all

25,000 bus drivers in London have been through, and this was centrally organised and delivered by Transport for London. This was about trying to enhance customer experience and customer satisfaction, because one of the key areas where Transport for London and the bus operators were being criticised was around driver interaction with customers and the customer satisfaction with bus drivers.

So it was very much aimed at trying to improve the interaction and the customer service drivers gave to passengers.

CHAIRMAN: What was this course called?

MR MIKE WESTON: It was called Hello London, and it was delivered to a group of 100 drivers at a time, and it took two years to complete all 25,000 bus drivers. It was delivered by a small team of actors using interactive training. So they would play out a scenario and they would get drivers to comment on how they may have handled that differently.

It didn't specifically have a direct link to safety, but fair to say that because it was trying to get drivers to interact with passengers more positively and to manage difficult situations with passengers -- I mean, one of the views is that if drivers can become less stressed and agitated by the way in which they deal

with passengers, then hopefully they are less distracted when they are driving the vehicle after that incident or that interaction. So there is a link to safety because I think it was trying to help drivers deal with difficult situations and to defuse situations from becoming more difficult.

CHAIRMAN: So this would include the abusive/aggressive bus passenger?

MR MIKE WESTON: Yes, and one of the scenarios in the training is how you deal with that type of passenger, and the way to deal with it is not to necessarily react, and certainly not to get out of your cab and talk to the person. It's to try and pull back from it and hopefully, in most cases, that passenger will then board the bus and move on. And that becomes a distraction. That becomes a distraction to your focus on driving, so ...

CHAIRMAN: This was a course provided -- structured by Transport for London?

MR MIKE WESTON: Yes, structured by Transport for London, accredited with the accreditation agency, so it counted towards bus drivers' CPC, certificate of professional competence training, and in this case delivered centrally by Transport for London contractors. So it was a big commitment. But it was also trying to

achieve -- one of the other criticisms from passengers often is inconsistency between drivers, and it was trying to achieve more consistency in how drivers deal with situations and how drivers deal with passengers.

As part of the bus safety programme there is the intention to have another safety-related course, centrally delivered and centrally accredited, as part of the bus safety programme, I think sometime in 2019.

CHAIRMAN: Presumably, the course was structured so that actors acted out a particular script, and the group of drivers were asked to respond to it? Is that how it was done?

MR MIKE WESTON: Yes. There were various scenes, and the first scene of day one was a driver coming into the garage. He asked to swap his shift in a week's time because he's got a family commitment. The supervisor is very dismissive of his request. He then has an argument with the supervisor, then gets on the bus, then drives the bus, and then a passenger gets on, but because he's in a bad mood a fairly minor situation becomes a bigger issue with a passenger.

So, initially, interestingly, a lot of the drivers sit there -- so when the actors say to the drivers, "Would you have dealt with that differently?", initially the reaction often is, "No, the supervisor was wrong,

they should have been more friendly or more helpful and the passenger could have been nicer or more polite", and then slowly they bring the drivers around to say, "I suppose if we had done this differently and that differently, maybe the outcome would have changed", and then the actors re-act that scene, taking on board those suggestions. It's trying to show that, yes, it might be somebody else's fault but you can change the outcome and you can influence what happens, and it is quite interesting to observe, to see how drivers come around to a different way of thinking, because their initial reaction often is that everybody else is at fault, "There's nothing I could have done better", but that changes.

CHAIRMAN: Is the, as it were, syllabus of this course available in written form?

MR MIKE WESTON: It should be. We can certainly find out. It's been accredited by independent accreditation agency for the CPC, but I would be very surprised if Transport for London weren't willing to share it with the committee anyway.

CHAIRMAN: Perhaps we might invite you to make those enquiries.

MR MIKE WESTON: Yes.

CHAIRMAN: Just as a template of the kind of issues.

Obviously local characteristics would present a different script, but it might be that the formula might be similar, or at least consideration could be given to it.

MR MIKE WESTON: Yes. I will make the request.

MR PETER DUNCAN: Do we see some details with regard to the In The Zone training and the Hello London initiative on pages 144 and 145 of your report?

MR MIKE WESTON: Yes.

MR PETER DUNCAN: Just going back to the question of fatigue management, can I bring your attention to page 146 and the last paragraph on that page, when I think, during the course of your preparation for your report, you had discussions with London bus operators and witnessed a demonstration of a driving fatigue monitoring system called Seeing Machines, and you've given details of that in that paragraph.

Has this actually been implemented by the bus operators yet, or is this something which is still under trial?

MR MIKE WESTON: No. This is one of the trials that has -- it's been trialled by a bus operator, in this case it was RATP, and as part of -- and it's being assessed by TfL to consider whether it should feature in their bus safety standard. So I think, as part of the safety

innovation fund, there were two trials of fatigue management. There was the Seeing Machines and there was another system that whilst it detected when drivers' eyes were starting to close and it vibrated their seat and it alerted the control room, it didn't video the incident, so it was very difficult then to retrospectively talk to the driver about what was happening because it wasn't capturing a video of the situation. With this system, it actually keeps the videos and captures the video of the driver, so it's far easier to engage and have a discussion with the driver.

The intention of the discussion is to move the discussion into fatigue management, "The video suggests you were starting to nod off and go to sleep; is there any reason why that might be the case?" It might prompt a discussion about some medical condition that perhaps a driver hasn't declared. It's a useful way to create a dialogue with the driver about their lifestyle.

So, from the various things trialled, this seemed to be one of the stronger systems in terms of monitoring driver fatigue.

CHAIRMAN: And this facility had a real-time function as well, did it not?

MR MIKE WESTON: Yes.

CHAIRMAN: So that the image that was captured was sent to

a control room, I think in the United States?

MR MIKE WESTON: Yes.

CHAIRMAN: And the controller in the United States would then contact the control room in the bus company, who communicated a real-time alert to the driver?

MR MIKE WESTON: Yes. Clearly, if the driver had at that point fallen asleep, then that sequence of events wouldn't stop any subsequent accident, but the idea is that somebody in the central control room verifies that it is a fatigue incident and then prompts the bus company to speak to the driver as soon as possible to either ask them if there is any issues and certainly interview them when they return to the garage, to assess what the causes might have been.

As it says on the bottom of that page, the operator has observed a 25 per cent reduction in incidents since May on that one route, so quite a significant result and quite a significant benefit.

MR PETER DUNCAN: At present, are there any fatigue monitoring systems in place in London buses?

MR MIKE WESTON: Only the trials. Only the trials. But we will --

CHAIRMAN: But they are available or used, are they not, on the Croydon tram?

MR MIKE WESTON: Yes. They were fitted to -- I think it was

the same system, if I recall, Seeing Machines, was fitted to the Croydon trams following an incident, a serious accident, last year, I think it was, or the year before, and a lot of long-distance coaches have similar systems. I think National Express have a similar system for driver fatigue, partly because probably driving on an expressway, motorway, at a constant speed, there is more chance of fatigue. So it's become the norm in that industry, but it will be interesting to see whether TfL, once they have gone through their cost/benefits analysis, these various options, decide this is one that should feature in their basket of proposals for their bus safety standard.

CHAIRMAN: The Croydon tram accident happened at the very early morning, did it not, around 5 o'clock in the morning or something like that?

MR MIKE WESTON: Yes, very early. It was a change of speed limit, so the speed limit going down from I think 50 miles per hour to 30 or something like that, and the driver not observing the speed limit on a fairly tight curve on the system.

CHAIRMAN: So the issue really is whether or not there might be a difference between coach drivers on long, boring motorways, tram drivers in the early hours of the morning going down a track, compared with a bus driver

having to stop every 300 or 400 yards, you wouldn't expect him to be going to sleep; is that the distinction?

MR MIKE WESTON: I think that's the distinction, but then there are times of the day, even for a London bus driver, where early in the morning, it's not as busy, you might not be stopping at many stops, nighttime drivers, in certain directions it can be a lot quieter. So there are situations -- you would naturally assume there is so much going on on a London road or even here in Hong Kong that you wouldn't have time to nod off, but I think there are times when you can be -- it can be a lot quieter and maybe those situations could occur.

CHAIRMAN: But the RATP driver was driving an urban bus route, was he not, and demonstrably going to sleep?

MR MIKE WESTON: He was. We saw the video.

But I think what the report at this point is trying to do is say there is a whole host of technologies and solutions out there, but they need to be properly assessed, and the judgment needs to be made about which ones will offer the best benefit, because ultimately it would perhaps be naive to assume that you could adopt all these technologies on every bus. It's clearly not going to be financially feasible. So it's a case of making sure there is a proper assessment to select the

ones that offer the maximum benefit in terms of reducing both passenger injuries but also injuries to third parties, pedestrians, cyclists, et cetera. That's what I think from my review of TfL's bus safety programme they are trying to achieve. They are trying to really go through quite a thorough cost/benefit analysis, to make sure that the money they've got or the money they need to find is spent in the best possible way.

CHAIRMAN: You have read Prof Stanley's report and you will be aware that that is the analysis, even down to the cost of life, that they undergo in Australia, before they determine whether or not it is worth this device which has these benefits, but there aren't very many people who will help and therefore perhaps it's not worth it; cost/benefit analysis to determine all these things.

MR MIKE WESTON: Yes, and the Department for Transport in the UK publish those figures for cost of life, cost of major injury, so you can build those costs, because those are the wider costs/benefits to society. So clearly the cost of saving a fatality is a cost to lots of people; it's a saving to the NHS or the hospital services. So, yes, it's capturing those costs and those wider benefits.

CHAIRMAN: And, at the end of the day, you choose the device

that delivers most for the cost and delivers most benefit for the cost.

MR MIKE WESTON: Yes. The logic would be, if you've tested ten different systems and you understand the cost/benefit, you can rank them in order of cost/benefit and ultimately you can go down that list as far as you can afford in terms of the funding you have available. I think that's ultimately what the bus safety programme in London will do.

CHAIRMAN: And, as you say, the money comes either from profits, government, or fares?

MR MIKE WESTON: Yes. It's got to come from one of those three. It's got to either come from -- in London's case, it's either got to come from fares revenue, from the transport authority or from reduced profits of the bus companies.

MR PETER DUNCAN: Mr Chairman, that really completes the matters that I was going to explore with Mr Weston.

CHAIRMAN: There is one other matter that looms large in the Transport for London approach, and that is speed limits, which we see no consideration of in what is being undergone in Hong Kong at the moment. Perhaps you could set us the scene.

And if you, Mr Duncan, can locate any material that goes to this issue, perhaps in the material relating to

London.

As I understand it, there is a digital map of London roads and speed limits, is there not?

MR MIKE WESTON: Yes.

CHAIRMAN: And 20 miles an hour limits are in green, and the map is green, is it not, now?

MR MIKE WESTON: Yes. There's been a trend across the 32 London boroughs to implement more and more 20 mile per hour zones across large residential areas. So 20 miles per hour equates to about 32 kilometres per hour. So we are seeing more and more roads becoming 20 mile per hour speed limited. Most other roads will be 30 or 40, and perhaps a few 50. But in terms of bus routes in London, very few bus routes would operate on roads with a higher than 50 mile per hour speed limit. The majority will be less than that.

I think one of the challenges is around appropriate speed. The speed limit -- you could argue that for a large bus, a speed limit of 30 miles per hour may be the limit. It may not be the appropriate speed for that piece of road at that particular time. So it's trying to educate drivers to be aware of appropriate speed limits -- sorry, appropriate speed as opposed to just the speed limit.

CHAIRMAN: The appropriate speed for the section of road on

which the vehicle is being driven?

MR MIKE WESTON: Yes, which could -- the appropriate speed could vary by time of day, depending on --

CHAIRMAN: And does, in London, when schools are encountered alongside the roads, the speed limit changes for the time that the school comes out? Or perhaps there are signs telling you what the speed limit is, reminding you?

MR MIKE WESTON: Yes, I think there might be reminders of speed limits, and there are often by schools warning signs that activate during the school periods but not actually change the speed limits.

CHAIRMAN: Very well.

Given that in Hong Kong, as you are aware, we have parts of Hong Kong that are urbanly dense, with many pedestrians on the sidewalk immediately adjacent to where traffic is moving, buses are plying. With that scenario, in London, are there now limits of 20 miles an hour in streets that match that description?

MR MIKE WESTON: Yes. Some of the major Central London roads now have 20 mile per hour limits. So it's not just residential roads; it is some of the sort of -- I think, in the text on the screen at the moment, it talks about March 2015 trials, including Clapham High Street, which is a major thoroughfare.

CHAIRMAN: The ISA test on those two routes that you described earlier involved traversing 20 mile an hour zones, did it not, even back then in 2015-16?

MR MIKE WESTON: It did, and the results of that trial was that it was having -- the ISA trial on buses, 20 mile per hour zones was having a greater impact on other vehicle average speeds. So you tended to find that when the limit was 30, the average speed of other vehicles went down a lot less than when the limit was 20. So it was tending -- the slower bus was tending to slow other traffic down more as well, in greater proportion than it was on a 30 mile per hour road.

CHAIRMAN: I think it was described as a platoon or a convoy?

MR MIKE WESTON: Yes. One of the worries, when that trial was done, was if you start to flow the following traffic down, does some of the following traffic then start to take risks in terms of trying to overtake the bus, trying to nip past it at bus stops in dangerous situations, but from my reading of the report, there was no evidence of that. There was no evidence that it made other traffic behave any differently.

So, in practice, there was -- certainly in 20 mile per hour zones, restricting buses to 20 miles per hour could be a good way of helping enforce the speed limit

on other vehicles, because it would force other vehicles to slow down.

CHAIRMAN: And the risk assessment that relates to the likelihood of serious injury or fatalities related to speed of buses shows that it falls significantly, does it not, as one goes down the speed limits, 40 miles an hour, 30 miles an hour, 20 miles an hour?

MR MIKE WESTON: Yes, I can't remember the exact ratios but clearly, the chances of being killed if you are hit by a bus at 25 or 30 miles an hour is significantly greater than if it's at 10 or 18 miles an hour. That would be the same for other vehicles, but with buses, as I think we've said this morning, the front of a bus is less forgiving perhaps than a car, if it's involved in an incident with a pedestrian or a cyclist.

CHAIRMAN: And the mass of the bus is quite different.

MR MIKE WESTON: Yes.

MEMBER AUYEUNG: One question. What's the feedback from the bus captains in terms of dealing with multiple speed limits? Are they expressing concerns of having to deal with too many speed limits?

MR MIKE WESTON: I'm not aware of anything, and partly because a lot of these 20 mile per hour limits have gone into wide areas on a blanket basis, so it's not as if the speed limit is constantly changing. The chairman

and myself saw some technology system called Mobileye that actually reminds the driver of the speed limit as it picks up speed limit signs painted on the road or on signage and then reminds him in his or her cab that that's the speed limit.

CHAIRMAN: So the camera reads the speed limit sign and then reproduces it on a dial in front of the driver?

MR MIKE WESTON: A dial, to act as a reminder. It could be that the driver didn't notice that speed limit sign because he was looking the other way at that point.

The map on the screen now is the one that the chairman was referring to in terms of --

CHAIRMAN: And I'm right in remembering that green was the 20 mile --

MR MIKE WESTON: Yes. So you see a lot of inner London is 20 miles per hour, apart from a few major corridor through that area, and I suspect that will change -- that map will continue to get greener and greener.

CHAIRMAN: Have the statistics showed any positive change, correlation to serious injuries and fatalities as a result of lower speeds, or not, or not yet?

MR MIKE WESTON: Not yet, although I think if I recall the last quarter for TfL, they quoted to us that they had had no fatalities in the quarter.

CHAIRMAN: I think that's the first quarter of 2018?

MR MIKE WESTON: Which is the first time for a long time that they had had a quarter with no fatalities. So --

CHAIRMAN: The second quarter proved the dangers of being complacent because they had six fatalities.

MR MIKE WESTON: Yes, but I think the average running rate is still lower than the previous year. It takes a long time to build those proper, robust trends, I think.

CHAIRMAN: Has there been any impact on the time that journeys take, or is London so congested it makes no difference?

MR MIKE WESTON: I think there's been bigger factors affecting the time the journeys take as opposed to the speed limit, because there has been -- certainly in Central London, there's been a lot of roadworks connected with the introduction of cycle lanes and cycle superhighways, and a lot of construction work has had a real impact on average bus speeds, and that's slowed the bus network down certainly in Central London, more so than the 20 mile per hour limit.

I think there's a lot of those corridors where even today, if drivers could go 20 miles per hour, they would be quite happy.

CHAIRMAN: Am I right in thinking that the average speed of traffic is 9.2 miles per hour?

MR MIKE WESTON: 9.2 in Central London, so the average is

very low.

CHAIRMAN: Is that an aspect of road safety enhancement, franchised bus enhancement safety, that Hong Kong should look at, speed limits?

MR MIKE WESTON: I think the answer to that question is somebody should probably first understand what the average speed is and what the range of speeds are. I think, in London, just to clarify, these 20 mile per hour speed limits apply to all vehicles, not just buses. So they apply to all road vehicles.

First, I would suggest there is a case of understanding what the average speeds are on certain sections of road to understand the extent of the problem. I would suggest that probably greater benefits would come from reducing -- if there was a desire to reduce the average speed of all vehicles on a section of road as opposed to just buses, I think just to differentiate it between buses and other vehicles would probably be very difficult and quite challenging and I suspect the benefits would be greater from actually reducing the speed of all vehicles on sections of road.

But I think it's probably a case of first understanding what the issue is and what the problem is.

CHAIRMAN: And, like these other issues that we have discussed today, this is a matter where one needs to

obtain information first of all, as you have just described, average speeds, and so on, and then ultimately apply a cost/benefit analysis, the cost of, if traffic is going to move slower, and then the benefit?

MR MIKE WESTON: Yes, because the logic is, if you do slow all the bus routes down because you don't go as fast, then to run the same frequency you potentially need more buses and more drivers, so there's a cost to that, and it's back to the earlier point, is that more beneficial than fitting other safety features to the buses? It's trying to take an overview of all the options that are available and making an informed choice of all those, as opposed to perhaps picking certain things off one at a time. I think, if you do the latter approach, there is a danger you make some of the wrong decisions.

CHAIRMAN: For how long has this reduced speed limit of 20 miles an hour, as opposed to the normal 30 miles an hour speed limit in urban areas -- for how long has that been available as an option for local authorities?

MR MIKE WESTON: I don't know exactly but I would say between about five and ten years, and it's available to all local authorities across the UK, not just London. But I would say about five to ten years. It's relatively new.

CHAIRMAN: Yes. I think we have on the screen "January 2013" -- I think this is some kind of a publication by the circular, by the Department for Transport --

MR MIKE WESTON: Yes.

CHAIRMAN: -- telling local authorities what they can do, and the circumstances in which it would be appropriate.

MR MIKE WESTON: But initially, my personal recollection, it was intended to be very selective on selected pieces of road, in response to maybe the presence of a school or some other incident, and now we are starting to see more local authorities effectively doing wider blanket 20 mile per hour zones as opposed to individual pieces of road. So we are seeing -- and that's probably because people are starting to learn that actually the impact of it on journey times is pretty marginal, but the safety benefits potentially are great --

CHAIRMAN: You mentioned that it can be now found on major London roads. You gave Clapham High Street as one. What of inner London, Regent Street, Oxford Street, roads like that?

MR MIKE WESTON: I'm not sure. I'm fairly confident that the road outside the TfL offices in Southwark is a 20 mile per hour zone, which is Blackfriars Road -- I think that's 20, for example. So it is on quite a few major roads but I'm not sure about Oxford Street.

In Oxford Street, I think if you were able to go 20 miles per hour you would be doing very well; it's a very congested road.

CHAIRMAN: Mr Duncan, is there anything arising from the topic that I --

MR PETER DUNCAN: Can I just give you a few references for matters that have come up recently.

First of all, Department for Transport setting local speed limits, you will find that at SEC-3 at page 1003. There was the earlier sheet from the "Safe London streets: our approach" document, October 2015, headed "Travelling too fast", and the statement that "A 1 mile per hour reduction in speed could reduce the frequency of collisions by around 6 per cent in urban areas", that can be found at MISC-3 at 987.

Then Mr Chairman also referred to --

CHAIRMAN: And that document is entitled "Reduction in speed", is it?

MR PETER DUNCAN: The overall document is called, "Safe London streets: our approach".

CHAIRMAN: Is this a Transport for London publication?

MR MIKE WESTON: Yes, it is. The major heading on page 986 is "Our priorities", and then the first priority is "Travelling too fast".

CHAIRMAN: Thank you.

MR PETER DUNCAN: Then you had referred earlier to a preliminary passenger survey in May 2007 to gauge the views of bus passengers on the wearing of seat belts.

CHAIRMAN: Yes.

MR PETER DUNCAN: And that involving some 2,000 respondents. You will find that at SEC-1, page 295.

CHAIRMAN: Could we just put that on the screen so that Mr Weston can see what I was referring to.

MR PETER DUNCAN: It's paragraph 7.

CHAIRMAN: Yes. As you say, Mr Weston, it depends on what the question was.

MR MIKE WESTON: Yes.

CHAIRMAN: Thank you for those.

Are there any other matters, Mr Duncan?

MR PETER DUNCAN: No, Mr Chairman. Thank you.

CHAIRMAN: Mr Weston, are there any final matters that you would like to draw to our attention?

MR MIKE WESTON: No. I think the only thing that we hadn't talked about was incentivisation of contracts, financial incentivisation.

CHAIRMAN: Oh, yes.

MR MIKE WESTON: I think that was the only other area that I'm surprised you hadn't raised.

CHAIRMAN: Thank you for raising that. The issue, broadly speaking, is this. Is incentivising safety indicators

likely to be neutral, positive or negative to enhancing safety of buses? So rewards to companies for performing well in safety-related indicators, is that likely to enhance safety of buses?

MR MIKE WESTON: In my report, I make the observation that some concerns -- and there were concerns expressed by the bus operators, interestingly, as well, whether direct financial incentives potentially drive the wrong behaviours in a bus company and potentially reduce information-sharing and collaboration with their peer group.

But I think, stepping back slightly from that, I think I would suggest that -- firstly, I think operators in London have always taken safety seriously anyway, so I think the question is what behaviours are you trying to change from a financial incentive, and I think where it becomes difficult is when you start paying a financial incentive for improvements in safety performance, but an operator is still having accidents, because effectively you then end up with a slightly perverse situation that, yes, your safety performance has improved this year compared with last year, but this year you perhaps still had three fatalities and 80 serious injuries and here is your financial bonus for this year. It seems rather a strange link to make.

Now, clearly the other way of doing it is you just have pure deductions for safety performance. Now, the danger with that is if an operator feels they can't influence that safety performance quick enough, then they will just build those deductions into their original contract price to mitigate the impact.

So I think there is a whole host of concerns around directly linking financial incentives to the bus contracts. I think that's supported by TfL in their document about the bus route tendering process dated 2015, where they explain why they don't think the financial incentive would be right.

I think, on the other hand, there could be potential for other sorts of incentives. The obvious one in my mind is does the eligibility for the two-year extension at the end of the first five years -- does that eligibility -- at the moment, it's only related to reliability -- could it be related to some trend in safety performance over the previous five years, for example? So there could be some other ways of incentivising operators as not directly financial. I think I have some big reservations about making financial incentives to do with safety because I think it just feels like the wrong approach, because you are either still paying people bonuses who are still having

accidents or you are making deductions that they just build into their contract.

But maybe there are some other ways and the one that springs to mind is you are only eligible for a two-year extension if your safety performance in years 3 and 4 of the original contract have showed some positive trends, for example. That could be quite a strong incentive to operators. So it's not directly linked to financial reward.

CHAIRMAN: You use the word "incentives" but you have in mind deductions as well?

MR MIKE WESTON: It could be.

CHAIRMAN: So, to deal with the situation you posit, of giving somebody an incentive/reward for having only killed three people this year rather than six last year as being a strange way of doing it, the other way of doing that would be a deduction: "If you kill anybody, we deduct"?

MR MIKE WESTON: It could be. I think, again, you've got to make sure that over a reasonable period of time an operator has some chance of influencing that trend. Otherwise, if I am bidding for a contract for five years and I don't believe I can significantly change that trend over the period of five years, I will build that deduction or the cost of that deduction into my original

contract price, because it's a cost I know I will probably pick up during that five-year period.

So I think an incentive has got to drive a behaviour but it has also got to be realistically achievable, which is perhaps why, if I was asked by TfL to think what I would do, I would maybe think they are coming up with a safety performance indicator, this score for each operator, you possibly could link an improved trend in that score to the contract extension. That could be a way of incentivising operators.

CHAIRMAN: As things stand, the primary driving force for the extension is whether or not, am I correct in thinking, the reliability performance is being delivered?

MR MIKE WESTON: Yes. So, if an operator meets the minimum performance standard or the extension criteria which is slightly better than the minimum performance, as I understand it, they would be eligible for an extension.

CHAIRMAN: Yes.

MR MIKE WESTON: The other incentive that already exists -- and again we talked about it this morning -- is that ultimately, because there is a rolling programme of route tendering, ultimately the incentive to perform well from a safety perspective is constantly there

because if you don't, it is very easy for Transport for London to stop awarding you contracts for a period of time, and we discussed the example this morning of where that had occurred.

CHAIRMAN: Thank you for that.

Are there any other matters you wanted to raise?

MR MIKE WESTON: No, Chair.

CHAIRMAN: In which case --

MR PETER DUNCAN: Mr Chairman, may I be permitted to raise just one matter arising from that?

CHAIRMAN: Certainly.

MR PETER DUNCAN: There has been some discussion during the course of the hearing as to incentivisation of the drivers by the bus companies for safety performance. Do you have any views on that?

MR MIKE WESTON: Again, I think it has to be meaningful, and it has to be well within the driver's control, and again, during our discussions in August, there was one company that used to have a direct driver incentive, but had consolidated it into their base pay at some point because they felt it had outgrown its usefulness and it wasn't really having any impact.

I think it could, but the measures need to be very meaningful to drivers, and also need to be designed in such a way that if a driver is involved in an incident,

it then doesn't become a disincentive, "Because I've lost my bonus for the year." So again it's trying to calibrate it correctly.

But I think, during the discussions with operators, there seemed to be bit of a move away from directly incentivising drivers in terms of safety.

CHAIRMAN: One operator had a system, did they not, where the bus driver got some relatively small reward, perhaps 50 pounds, I think it was, but his name went forward into a hat and after nine months, all the drivers who had won the driver of the month award were in the draw, and the winner of the draw got a car, a new car?

MR MIKE WESTON: A new car. That was funded by the telematics company. Actually, that was quite an interesting incentive because basically each four-weekly period in the garage, a list of the best-performing drivers was put up in the garage and I think it was a 50 pounds shopping voucher that those drivers got. But it's quite a natural thing amongst bus drivers in London, I'm sure it is in Hong Kong, that everyone wants to be considered to be a good driver, so actually having your name on the good drivers list was an incentive almost in itself, and you could argue it almost didn't need to be incentivised. People wanted to be considered to be a good driver. And the car was

relatively small cost in terms of the 2,500 bus drivers that company employed.

CHAIRMAN: But it was an illustration of an incentive directly related to a driver.

MR MIKE WESTON: Yes, but wasn't, Chair, a direct incentive into their pay packet or into their wages. It was away from their normal pay and terms and conditions.

MR PETER DUNCAN: Thank you, Mr Chairman. That was all.

CHAIRMAN: Mr Weston, may we close by inviting you to communicate with us with some addendum to your report, after Transport for London have delivered their bus safety standard, whatever it is they deliver, on 16 October.

MR MIKE WESTON: Yes.

CHAIRMAN: That will be of great assistance to us, and any material that you are able to obtain to assist us.

MR MIKE WESTON: Yes. I will also see whether we can obtain the syllabus for the Hello London bus driver training campaign.

CHAIRMAN: Thank you.

On that note, it remains for the committee to thank you, as Mr Duncan said at the outset, for your report, and for fleshing that out and answering our enquiries in this oral session today. It's been most useful to be able to draw on your experience of so many years working

with buses. It's certainly an assistance to our understanding of the considerations that are relevant to what we might recommend in Hong Kong.

On that note, may we wish you a safe return journey. Thank you.

MR MIKE WESTON: Thank you, Chair.

(4.50 pm)

(The hearing adjourned until 10.00 am on Thursday, 4 October 2018)

EXPERT EVIDENCE OF MR MIKE WESTON 1

Examination by MR PETER DUNCAN 1

[Blank Page]

2018 年 9 月 27 日

上午 9 時正恢復聆訊

出席人士： Hon Mr Justice Michael Lunn（倫明高），香港專營巴士服務獨立檢討委員會主席

歐陽伯權先生，香港專營巴士服務獨立檢討委員會委員

羅康錦教授，香港專營巴士服務獨立檢討委員會委員

Peter N. Duncan（鄧樂勤）資深大律師，由高露雲律師行委聘，代表香港專營巴士服務獨立檢討委員會

Mr Mike Weston，獨立的客運交通顧問

主席：（經傳譯員）早晨，Weston 先生，係好多謝你就係由倫敦嚟到香港協助我哋嘅聽證會。你可能都知道我哋就係有律師係協助我哋，佢就會係問你啲問題，我哋委員會亦都會係向你提問嘅，如果啲問題問得唔清楚嘅說話，你就話畀我哋聽，我哋就會確保我哋嘅提問係好準確，我哋就請鄧樂勤資深大律師開始。

MR DUNCAN：（經傳譯員）多謝主席。Weston 先生，早晨。我就會--主席頭先所講，多謝你係協助我哋嘅委員會嘅工作，特別係提供畀委員會就有一個書面嘅報告，我哋就係想睇一睇，話請你返去去呢一個嘅報告，就係專家嘅呢個文件夾第 115 頁，就係第一份嘅，就有幾個課題，我就希望同你一齊探討嘅，但係開始之前，我就係想會問一問你嘅問題，係關於你自己嘅背景同埋經驗嘅，同埋就係話你寫個報告嘅時候你自己嗰個身處嗰個身分係點樣樣。

首先，你自己嗰個嘅經驗，我就請你翻開第 118 頁，呢度就係講個背景嘅，第二段就係你話你自己就準備咗呢一個報告，你係一個獨立嘅顧問，就有超過三十年嘅經驗，喺呢個巴士行業裏面，包括就係喺呢一個倫敦運輸局裏面嘅高層人士，同埋就最近就係呢一個巴士總監嘅。

同埋你就跟住就喺附件 A 裏面就有你嘅履歷，所以請我哋去到附件 A，喺第 157 頁。我哋睇到有你自己嘅個人嘅簡歷、最近嘅工作經驗同埋其他嘅專業方面嘅事宜。我哋睇一睇係關於巴士部總監倫敦運輸局，喺呢一段裏面，就 1999 就係 2003 就係講緊呢個巴士基建嘅主管同埋巴士營運主管，你可唔可以話畀我聽？

MR MIKE WESTON：（經傳譯員）巴士基建嘅主管 1999 年我就開始做，之前其實我就主要就係去評估一啲巴士嘅招標，1999 年我就係作為一個巴士基建主管嘅，我係負責一系列嘅事宜，就包括提供呢個巴士基建、巴士站、巴士上蓋同埋巴士站等等，同埋一啲倫敦運輸局嘅其他嘅設施，我哋就係要提供個基建同埋就

係平日嗰個營運，亦都係包括我哋會監管，特別係呢一個工程部同埋工程同埋巴士嘅標準，呢啲一切都係包喺呢一個巴士基建個定義之內。

MR DUNCAN：（經傳譯員）呢個亦都冇涵蓋巴士安全嘅？

MR MIKE WESTON：（經傳譯員）冇嘅，冇直接關係嘅，我亦都係負責基建嘅安全，譬如話係巴士站係安全，同埋監察相關嘅事宜，喺2003年我係巴士營運嘅主管，當時我就係負責呢個倫敦巴士網絡嘅安全，去到04年。喺作為巴士基建主管，我都有喺安全都係有一定嘅責任嘅，但係係巴士整體嘅網絡嘅營運嘅安全，我就係2003年先至開始做嘅。

MR DUNCAN：（經傳譯員）當其時你就係話係巴士營運部嘅主管嘅？

MR MIKE WESTON：（經傳譯員）冇錯。

MR DUNCAN：（經傳譯員）然後營運總監，你頭先就講過，喺成個管理層之中，呢一個喺倫敦運輸局，究竟呢個營運總監個位置係點呢？

MR MIKE WESTON：（經傳譯員）當其時就一共係三個總監嘅，就係負責就係倫敦運輸局嘅，我自己就係營運總監。就係譬如話巴士合約方面同埋另外一個財務嘅總監，佢就係負責財務嗰方面。我哋就係係向董事總經理去負責嘅，亦都係除咗係倫敦巴士之外，其實都喺倫敦運輸局之外，其他嘅交通運輸其實亦都係有負責嘅，我哋都係向呢一個運輸部主管--運輸部部長負責。

MR DUNCAN：Then, in 2013, you were appointed director of buses. How did that position relate to your previous position as operations director?

MR MIKE WESTON：（經傳譯員）呢一個2013年嘅時候，我哋就決定就係將兩個總監就合併咗，就變成一個巴士部總監，佢亦都係負責呢個巴士嘅網絡，亦都係向呢個董事總經理去負責，當然佢亦都有其他嘅責任，包括係其他嘅服務。巴士部總監都係每日嘅呢一個巴士嘅網絡嘅營運係需要負責，同埋係相關嘅合約嘅事宜，每一年嗰個去購買呢個巴士網絡大概係20億嘅英磅嘅，個財政。

MR DUNCAN：（經傳譯員）你喺第二段你就講過，你亦都係話負責就係提供一個安全嘅網絡嘅？

MR MIKE WESTON：（經傳譯員）係，冇錯。正如我頭先所講，我作為巴士部總監，我起初嗰時就係都會負責呢個安全團隊嘅，但係巴士部總監就係一個更加高層嘅職位，我就負責就係確保成個嘅巴士嘅網絡係安全營運嘅。

MR DUNCAN：（經傳譯員）你係2016年離開個機構，9月嘅，之後你就係作為一個嘅獨立顧問去工作，你可唔可以話畀我哋聽呢一個獨立顧問嘅工作係乜嘢呢？

MR MIKE WESTON：（經傳譯員）我就2016年離開，三十一年喺嗰度服務之後，我就作為一個獨立顧問喇後來，我就主要都係巴士業嘅工作，主要係有兩點，一

個就係關於環保管理，特別係巴士車隊嗰方面，因為其實喺呢方面我都係經驗係好豐富嘅，喺倫敦運輸局做咗咁多年。另外就係巴士嗰個網絡嘅設計同埋呢個專營服務，我哋喺歐洲嘅運輸局當局，我都有同佢哋合作嘅。

MR DUNCAN：（經傳譯員）好，唔該晒。我就請你返番去第 118 頁，就係你個報告裏面嘅。我哋就睇番你係寫呢一個嘅報告嘅背景，我好快咁讀一讀，就喺呢一頁裏面嘅一啲嘅段落，第 1 點就係話呢個係我哋嘅委員會請你寫嘅報告，希望就更加了解就係呢一個倫敦巴士個專營服務系統同埋就係睇下有啲咩嘢良好嘅作法係可以令到香港可以繼續改善我哋嘅做法。我哋其實委員會就已經係睇過呢一個倫敦運輸局喺 2015 年 8 月嘅時候嘅報告，叫做倫敦巴士合約及呢一個嘅招標過程嘅。

然後繼續睇落去，你就有講到，呢度個報告就係有關於呢個規管同埋呢個管治嗰方面，特別係倫敦巴士喺營運同埋管理方面，同埋係我哋亦都係要求就睇下--你睇下香港個專營巴士嗰方面嘅情況。同埋睇番(i)同(ii)之間嘅分別，你就係畀咗啲意見。就睇下香港嘅制度其實係咪是否足夠同埋良好同埋係提供建議，就可以改善香港專營服務同埋安全方面。

最後屘嗰段就係就「報告第 2 至第 5 段就係睇番倫敦嘅公共運輸服務，亦都解釋咗英國巴士業嘅歷史同埋結構，同埋就係睇下嗰個巴士嘅合約制度係點樣做同埋點樣監察。第 6 段就係講到嗰個安全管理。而第 7 個部分就係講到就係而家目前嗰個巴士安全計劃底下嗰個合約巴士營運商係點樣做。第 8 個部分就係講到作者對於呢一個嘅倫敦巴士嘅服務嘅觀察同埋相關嘅服務點樣可以幫助改善香港嘅制度。」

你就講到就兩個嘅制度係有啲嘅分別嘅，即係倫敦同埋香港嘅制度，就係令我哋明白有點樣唔同呢，或者我哋睇一睇，我以下所講，然後我哋再進一步去探討，第 120 頁，你嘅報告第 120 頁，我哋睇到就係呢個乘客嘅人次，喺倫敦，22 億嘅，呢個係 22 億人次嘅，喺巴士方面，喺香港，我就話畀你聽大概係幾多，就唔睇嗰個文件，呢個運房局，THB 第 2 個文件夾 103，就喺香港嘅乘客人次就係 14 億人次，所以呢個就係同呢個人次方面嘅比較。

第二個嘅比較，我想特別提一提就係兩個地方嘅人口，有幾多比例係用公交嘅，我唔肯定你有冇睇過，我哋睇 THB-2 文件冊第 2 頁，喺嗰個註腳，呢個係公交策略，就係由運房局進行嘅，係舊年 6 月進行嘅個研究，我哋睇番嗰個嘅註腳，喺頁裏面。喺新加坡嘅相關嘅機構，運輸局，2014 年 11 月做嘅研究，就係香港使用公交嘅比例喺二十七個城市係最高嘅。

喺第 2 點，喺香港嚟講，就係睇到係百分之九十嘅，係相比倫敦就係百分之三十嘅啫，喺第 1.4 段你睇到呢個百分之九十嘅數字，呢個講公交就係同香港市民嘅日常生活息息相關，每一日就係有一千二萬嘅人次，呢個等如就係呢一個百分之九十嘅，喺世界嚟講，係首屈一指嘅。我就希望特別係提出呢一點。

第三點我特別想提到嘅，就係話啲巴士嘅比例，就巴士嘅比例相對於成個公交個使用嘅比例，你就自己都有講到嘅，喺呢一點上面，喺第 120 頁，我就睇到係百分之五十六嘅，喺我個筆記係咁寫，但係我就要再搞清楚。

喺香港，我哋就喺 THB-2 個文件夾第 103 頁，我哋睇到香港嘅情況，呢一個專營巴士第 2 項，就係佔百分之三十一點一嘅，係重鐵，重型鐵路，就係講緊港鐵，就係百分之三十八點九，所以喺重鐵方面，個佔嘅比例係較高嘅。

主席：（經傳譯員）好明顯，呢個就係香港嘅數字嚟嘅，對於我嚟講，我都記得係咁樣嘅，你所講嘅就係話喺專營巴士喺倫敦嗰個佔嘅公交個使用率嘅比例其實就係點樣呢？或者 Weston 先生可以講一講。

MR DUNCAN：（經傳譯員）或者 Weston 先生，你而家有冇呢方面嘅資料呢？

MR MIKE WESTON：（經傳譯員）我而家要係自己係計一計嘅，因為我哋講 22 億人次，就係 40 億嘅總數，所以應該係超過百分之五十，可能百分之五十六嘅。

主席：（經傳譯員）係喇。

MR DUNCAN：（經傳譯員）呢個係喺呢一頁裏面？

MR MIKE WESTON：（經傳譯員）係。其實呢兩個表格都係可以去比較嘅，喺倫敦其實都有啲呢一個河上面嘅交通工具嘅，所以有少少就未必係完全直接比較得到。

MR DUNCAN：（經傳譯員）第四個不同之處就係巴士嘅數目，第 126 頁你有提到個數字，你嗰個巴隊嘅數字，2018 年係有九千二百架巴士嘅，喺香港係幾多呢？THB-1 號文件冊，第 30 頁嘅第 7 段，喺香港嚟講，就係大概六千部巴士。

另外一個我哋唔同嘅地方，就係我哋每一年巴士嗰個行嘅里數，喺倫敦，喺第 120 頁，我哋睇到呢個數字，喺呢個表格嘅下底，2017 至 2018 年，就呢個講到係 4 億 9 千萬嘅公里嘅，係呢個巴士網絡方面。

喺香港嘅相應嘅數字，我請佢哋睇一睇 THB-1 號文件冊第 30 頁第 7 段嘅，我哋乘一乘，我哋得出嘅數字同倫敦係差唔多嘅，就係 5 億公里嘅，有六千架專營巴士每日，而平均嚟講，專營巴士每日係行走超過 140 萬公里嘅。

呢啲數字係好有趣，每架巴士、每個地方、每年嘅行車公里就有一啲數字，如果係倫敦嘅話，如果將 4 億 9 千萬除九千二百架巴士，我哋就會得出大概 53,000 公里，每架巴士每年行走嘅距離。而香港嘅話，如果將 5 億公里除以六千架巴士，大概就係 83,300 公里嘅每架巴士每年行走。

我哋而家講下一啲數字以外嘅事情，我哋睇下巴士公司嘅合約，喺倫敦，你就講到倫敦嘅巴士合約期一般係五年，然後係可以續期兩年嘅，呢個就係 129 頁最後一段係有提到嘅。喺香港嚟講，我就想大家睇下 TD-1 文件冊第 73 頁第 4 段同埋 TD-1 文件冊第 74 頁嘅第 8 段，我哋嘅專營合約期就係十年，可

以透過申請，再延期五年或者兩年嘅，視乎係幾時作出呢一個續期嘅申請。

Weston 先生，我就想問一個問題，就係關於倫敦嘅專營巴士服務同埋合約嘅，就五年合約期，然後可以續期兩年，巴士公司一般嚟講，係咪都即係喺七年之後可以繼續經營一樣嘅路線呢，定係未必係一定會自動畀番嗰條--即係一樣嘅路線佢呢？

MR MIKE WESTON：（經傳譯員）五年再過兩年之後，就會再有一個投標或者招標嘅過程，當初間巴士公司可以攞到一條路線，可能因為佢哋有個車廠或者其他原因，但係招標之後，佢哋就要同其他嘅經營商係去競爭，亦都係要視乎當時市場嘅情況，一啲其他嘅公司可能會--即係以前可能失去咗一啲路線，佢哋可能想去爭番返嚟，我就冇嗰個啲數字响手，但係就係大概有七成嘅巴士公司會攞番相同嘅路線嘅。

MR DUNCAN：（經傳譯員）而我就想同你講另一個問題，就係喺倫敦嘅交通網絡經營嘅巴士公司，就想你睇第 126 頁，就係報告嘅 126 頁，呢度就講到呢個市場由六個主要嘅巴士集團係壟斷嘅，而餘下嘅百分之五點六就係由其他比較細嘅公司去營運嘅。

正如你所知，喺香港，專營巴士商包括有三個集團嘅，可以咁講，香港市民係知道九巴同城巴之間嘅分別嘅。喺倫敦嘅巴士網絡嚟講，市民知唔知道唔同巴士公司之間嘅分別呢？

MR MIKE WESTON：（經傳譯員）有一啲市民會知道佢哋嘅巴士可能係由某個營運商去經營，喺呢方面，香港同倫敦係好唔同，因為倫敦所有嘅巴士都係紅色嘅，同埋亦都係有呢一個倫敦運輸局巴士嘅標誌，亦都係有巴士公司嘅標誌，但係對市民嚟講，佢哋見到嘅巴士全部都係紅色同埋都係由倫敦運輸局去營運嘅，如果你問倫敦嘅市民究竟邊個負責係經營呢，佢可能會話係倫敦運輸局，而有一啲市民可能知道係由唔同嘅公司去營運，但係佢哋而家知道呢一個即係所有嘅公司都係為運輸當局服務嘅，因為佢哋嘅車費亦都係畀呢個交通當局嘅。

MR DUNCAN：（經傳譯員）所以一般市民都會覺得架巴士係由倫敦運輸局營運，而唔係由一間公司譬如話捷達集團營運嘅？

MR MIKE WESTON：Yes, that's correct.

主席：（經傳譯員）呢啲巴士公司嘅標誌都會印咗喺個巴士嘅車身，係咪？

MR MIKE WESTON：（經傳譯員）係，亦都係會有倫敦運輸局嘅標誌，但係正如我所講，呢啲巴士全部都係紅色嘅，所以對大部分市民嚟講，佢哋似乎都係一樣嘅。

主席：（經傳譯員）以前唔同嘅巴士公司係咪有唔同嘅車身嘅顏色或者圖案呢？

MR MIKE WESTON：（經傳譯員）喺80年代中去到90年代初，當時嘅私人營運商就係同倫敦運輸局自己嘅公司去競爭，當時佢哋可以有自己嘅車身圖案，當時主要嘅兩個原因就係第一，話畀市民知啲服務係改善緊，其中一個方法就係畀一啲新嘅營運商係有唔同嘅車身設計；而第二個原因就係話畀工會知道啲事情係改變緊或者改善緊，服務係由公營係走向私營，所以呢兩個就係主要嘅原因。喺90年代初，以一個市場推廣嘅角度，有一個統一嘅車身顏色係有利嘅，而當時市民亦都係接受咗。

MR DUNCAN：（經傳譯員）我而家想講另一個主要嘅分別，喺倫敦同香港之間嘅分別，呢個就係合約制度嘅分別，呢個就係就住巴士公司嘅合約制度。喺香港專營服務嘅合約係可以商議嘅，根據你嘅報告，喺倫敦，你就係有一個以路線為本嘅競價招標制度，我就想問一啲問題，就係關於倫敦嘅制度，我想請你睇下第124頁，第3.3段嘅頭嗰幾段，我哋就可以睇到倫敦嗰個系統或者制度係點運作嘅，你就話「我哋係應該了解倫敦嘅合約制度，先可以了解倫敦運輸局同埋巴士公司嘅安全管理係點樣可以融合喺呢個制度入面嘅。而一啲個別巴士路線嘅競價投標制度就係由運輸當局，亦即係倫敦運輸局係管理同埋係控制嘅，呢個就係由1985年開始嘅一項倫敦嘅政策嚟嘅。

1985年就開始就就住巴士路線進行招標，而整體就會係批出一啲五年嘅合約，而巴士公司如果係符合某啲嘅表現嘅目標，係可以有兩年嘅續期，而一啲成本合約就係由倫敦運輸局就係用呢一類嘅合約。

根據行車嘅里數，巴士公司係可以有一啲嘅獎賞或者係扣減，就係就住佢哋服務嘅可以靠程度嘅，而倫敦運輸局係會保留一啲乘客嘅或者客務嘅收入，就如果需要係改善一啲巴士服務或者安全，就係會由倫敦運輸局，而唔係巴士公司去支付嘅。」呢個就係一啲巴士服務嘅演變。

我想你睇下最後一段嘅，就係「1994年-其餘嘅巴士路線都係已經納入咗一啲協議嘅合約，而公營嘅公司亦都係已經私有化，而所有嘅巴士服務都係由私人運作，而係由倫敦運輸局進行招標同埋管理嘅。」

而家喺倫敦係咪有一啲協商嘅合約，定係所有服務都係經呢一個競價嘅招標完成呢？

MR MIKE WESTON：（經傳譯員）唔係嘅。我想澄清一下94年嘅情況，根據報告，喺到93年，網絡嘅五成路線已經係經呢一個競價嘅招標係批出，而有四成就係批咗畀私人公司，因為當時政府係希望將公營嘅巴士公司私有化，然後將佢納入私人市場，所以係必須將餘下嘅巴士路線--即係當時係倫敦運輸局係提供資助，而當時係要將佢哋納入某一啲嘅合約，而一啲餘下嘅路線就必須要納入一啲協議嘅合約，但係報告冇講嘅，就係呢一啲嘅合約係有時限嘅，所以呢啲巴士公司佢哋可能係有一啲合約係贏番嚟，亦都有一啲係經協議得番嚟嘅，但係佢哋亦都知道四年半或者五年之後嗰條巴士路線就要進行一個競價嘅招標，所以當時嘅目標就係私有化，而嗰啲合約經過某個年份或者期限之後都係要進行

招標嘅。大概五年之後，所有嘅合約都係要進行第一輪嘅招標。

主席：（經傳譯員）換句話講，98 或者 99 年所有嘅路線都係以一個招標嘅形式營運，係咪？

MR MIKE WESTON：（經傳譯員）係，大概係咁。

MR DUNCAN：（經傳譯員）唔該晒。我哋睇番 125 頁嘅第二段，第二行就講到係有一啲額外嘅獎賞或者係扣減，就係根據巴士服務嘅可靠性嘅，如果你睇番第 131 頁，呢度就係有多啲嘅詳情，即係呢一啲嘅獎賞同埋扣減係點樣運作嘅。喺 4.3.3 段就係講到，係咪呀？

MR MIKE WESTON：（經傳譯員）冇錯，呢個就係同表現掛鈎嘅合約，係根據呢一個可靠性嘅表現，就係有一啲嘅獎賞嘅。

MR DUNCAN：（經傳譯員）呢度就係睇到考慮到一啲嘅獎賞，就係講到呢一個額外嘅等候時間，呢個就係其中一項服務指標嚟嘅，你提到，喺第一段尾就係「呢一啲嘅獎賞或者係扣減可能係介乎正百分之十五或者係負百分之十，目標就係鼓勵巴士公司係去更加著重服務嘅可靠性嘅。」就住呢啲獎賞或者扣減嚟講，有冇考慮到安全呢？

MR MIKE WESTON：（經傳譯員）冇嘅，呢一啲嘅獎賞就係合約價格嘅百分之正十五或者係負百分之十，呢個就係同可靠程度係掛鈎，包括就係呢一個額外嘅等候時間同埋巴士係咪準時等等。所以呢一啲嘅獎賞只係同巴士公司嘅可靠程度有關嘅，佢哋嘅服務。

MR DUNCAN：（經傳譯員）我想你睇第 127 頁。

主席：（經傳譯員）首先，巴士公司如果表現好，係可以得到高達百分之十五嘅獎賞，相反，可能係會扣百分之十，呢一點對巴士公司係--即係喺財務角度，對佢哋重唔重要呢？

MR MIKE WESTON：（經傳譯員）冇錯，喺一個財務角度，即係好難可以攞足百分之十五嘅，因為佢哋嘅服務係幾乎要完美，相反--即係同樣，扣百分之十亦都係好少見嘅，所以通常嗰個獎賞都係百分之五至八，即係合約價格嘅百分之五至八，以一個全年嚟講，嗰個銀碼都係唔細嘅。即係好多嘅倫敦巴士公司佢係可以透過呢個獎賞得到多啲嘅收益嘅，所以呢個制度好有效地可以鼓勵到巴士公司。

MR DUNCAN：（經傳譯員）可唔可以同我哋講一講最高嗰個嘅合約價格係幾多呢？我相信對於嗰啲長嘅路線咁講。

MR MIKE WESTON：（經傳譯員）對於巴士路線，一啲長啲嘅巴士路線，就有成六十輛巴士嘅，根據合約價格去到就一年係 2 千萬鎊，個成本都幾高嘅。

主席：（經傳譯員）個合約就係承辦商就會係花 2 千萬鎊，而呢個倫敦運輸局就會支

付呢個費用，就唔計嗰啲獎金，係咪？

MR MIKE WESTON：（經傳譯員）其實呢個支付嘅制度嗰個合約價格就會係分開嗰個里數同埋就住嗰個里數就會支付呢個咁嘅費用，其實就佢哋如果係唔能夠運作呢啲嘅里數，佢哋就得唔到嗰個嘅支付嘅費用，譬如話佢哋冇嗰啲司機或者係冇一啲巴士或者有機件故障咁樣，做唔到呢啲里數，佢哋就喺嗰個合約價格嗰度損失咗呢啲嘅費用㗎喇，但係嗰個扣減就唔係咁高嘅，百分之三點四嘅，機件故意嘅問題，其實嗰個扣減--對於里數扣減唔係咁高嘅。

由於一啲佢哋不能控制嘅理由，做唔到嗰啲里數，譬如話係交通阻塞、改道或者係一啲計劃、冇計劃嘅事項咁樣，嗰度佢哋都係喺佢哋嘅可控嘅範圍，其實呢啲咁嘅獎金其實就係獎勵佢哋嘅服務嘅可靠性嘅，個合約嘅費用就係根據嗰個數量同埋質量，同埋亦都係根據佢哋嗰個係咪可靠，嚟到去畀額外嘅獎金嘅。

主席：（經傳譯員）或者清晰啲，畀個例子，可唔可以畀啲例子我哋呢？

MR MIKE WESTON：（經傳譯員）或者我用一啲簡單嘅數字嚟到去講，一個合約成本，1,000 鎊咁樣，佢哋應該就係有 100 里嘅路程嘅，佢哋就如果做唔到，就係會損失 10 鎊一里咁樣，好簡單嘅例子就係咁樣，咁顯然如果嗰啲服務係好過呢一個過長嘅等候時間嘅情況，佢哋可以就係得到呢個去到百分之十五嘅獎勵嘅，正如我所講，百分之十五呢個獎勵其實都好難做得到嘅，通常就係百分之八嘅，對於嗰個服務可靠性。

主席：（經傳譯員）要避免扣減損失嗰個里數，最緊要嘅就係巴士有一個良好嘅維修、保養同埋有足夠嘅人數，係咪？係咪好簡單咁嘅觀點？

MR MIKE WESTON：（經傳譯員）係，你確保要每日係有足夠嘅車長，所以就係好多廠房都有一啲後備嘅車長喺度嘅，有一啲車長都可能返唔到工、病咗咁樣，佢哋就有足夠嘅車長，亦都係有足夠嘅車嚟到去調配，亦都需要有一個足夠嘅保養嘅計劃，足夠嘅車輛等佢哋可以係維持到個服務嘅。

但係公平咁講，倫敦嗰度嘅招標制度就好成熟㗎喇，由於人手或者機件問題係損失嗰啲里數嘅情況，嗰個情況都唔係咁高嘅，因為佢哋喺管理嗰方面都係幾成熟㗎喇。

主席：（經傳譯員）呢個係因為經驗，係咪呀？喺巴士運作嗰方面，佢哋係知道需要有一定嘅額外嘅剩餘嘅能力咁樣，所以就唔會造成呢啲問題，係咪？

MR MIKE WESTON：（經傳譯員）係嘅。

羅先生：（經傳譯員）喺運作嘅制度嘅時候，喺每一個巴士到站嘅時間嗰度，係咪都要規管？

MR MIKE WESTON：（經傳譯員）係，佢哋就係計嗰個嘅到站嘅時間，通常就會係

有一啲嘅調查，有一啲嘅站長就會喺路上面就記錄晒--呢啲係倫敦運輸局嘅自己嘅視察人員，佢哋就會係記錄晒有關嘅資料，個數據就用嚟計算嗰個超--即係過長嘅候車時間嘅，呢個係解釋咗嗰個過長嘅輪候時間係點樣，咁其實佢哋係量度嗰啲高班次嘅一啲嘅服務，佢哋就會計嗰個嘅過長嘅時間，譬如話十分鐘一班嘅車咁樣，佢一定就--乘客就會係不斷咁嚟到嗰個巴士站，佢哋有一個時間表，如果嗰個十分鐘嗰個班次係冇問題嘅話，佢哋可能會等五至十分鐘，佢哋可能嚟到係走咗架巴士，係等十分鐘就會有架巴士嚟㗎喇，咁可能就係有啲就等五分鐘，有啲可能係一嚟就有巴士，通常就係等五分鐘嘅，其實嗰個即係過長嘅候車時間就用呢個方法嚟到計算出嚟嘅，某一啲嘅路線嗰個標準嘅標準就係一分鐘、一點五分鐘嘅過長嘅候車時間咁樣。

過去都係人手咁嚟到積累嗰啲數據，而家基本上都係自動咁樣係透過呢個系統嚟到去計出嚟㗎喇，其實我哋嘅數據就係根據個巴士嚟到去計嘅。

羅先生：（經傳譯員）好，跟進呢個問題，你話就係有幾個因素，交通嘅擠塞，呢個唔會扣減嘅，嗰個係點樣計嗰個交通擠塞嗰個因素呢？

MR MIKE WESTON：Sorry?

羅先生：（經傳譯員）你提到有四個因素係佢哋控制唔到嘅，譬如話係一啲交通擠塞，呢啲因素就唔會係導致有費用嘅扣減嘅，其實喺呢度計數嘅時候，點樣計嗰個交通擠塞㗎？

MR MIKE WESTON：（經傳譯員）對於交通擠塞，當佢哋係入標嘅時候，佢哋預計就會係有個時間表，有個行車嘅時間表，運輸局就會係考慮佢哋嗰個服務係點樣，同埋係訂定嗰個嘅路線，承辦商就需要就制定一套嘅運作嘅時間表，決定有幾多巴士係調配出嚟咁樣，佢哋就需要設計一個嘅時間表嚟到應付一般嘅日子嘅擠塞情況嘅。

喺極端嘅情況，我而家諗緊一個例子畀大家參考，譬如話喺倫敦中部有示威、有恐襲咁樣，就亦都會中斷咗好多嘅巴士嘅服務嘅，運輸局就會係避免喺呢啲日子，喺計算嘅時候就唔計呢啲日子落去嘅，呢啲係極端嘅例子，係好清楚營運商就唔可以預計呢啲咁嘅情況，亦都唔可以喺呢啲情況底下運作佢哋嘅服務嘅，所以我哋就唔計呢啲日子落去嘅。

主席：（經傳譯員）呢個譬如話係爆水管，喺 Dartford 隧道嗰度係有車著火又唔計，係咪呢？

MR MIKE WESTON：（經傳譯員）係，有一啲地方嘅情況，佢哋就會避咗呢啲嘅日子，我相信我係--當時 2005 年 7 月就係喺巴士受襲嘅時候，我當時都係管理呢啲巴士嘅，佢哋都係唔計呢啲咁嘅日子嘅，因為其實都唔應該係咁樣嚟到去計呢啲日子，計埋落去嘅，嚟到去懲罰嗰啲營辦商嘅。某一啲嘅路線可以扣番出嚟唔計嘅。

MR DUNCAN：（經傳譯員）好喇，睇番 127 頁，Weston 先生，請你睇 127 頁，4.1 嗰度就有講到嗰個合約嘅責任，或者好簡單咁樣係濃縮一下，總括四點出嚟，你確定咗就係話即係唔係咁樣嘅，你就話番畀我知，首先，就運輸局就會係招標，對於某路線就進行招標，跟住就佢哋就會--入標者就會訂定嗰個合約價格，對於嗰啲路線，第三，運輸局就會係保留所有嘅票價嘅收，咁就睇嗰個乘客嘅量嚟到去支付個費用，然後運輸局就會係支付嗰個合約嘅價格畀嗰個營辦商嘅，根據你正話所講嘅情況嚟到去做喇。好簡單講，係咪總括咗個情況呢？

MR MIKE WESTON：（經傳譯員）係嘅，呢個總括得非常之清晰嘅。

MR DUNCAN：（經傳譯員）好喇，喺招標嘅路線，其實係邊個決定嗰啲路線㗎？同埋有啲咩因素係需要考慮嚟到決定一條新嘅路線或者係取消一啲舊嘅路線呢？

MR MIKE WESTON：（經傳譯員）係路線規劃嗰方面其實就係倫敦運輸局做嘅，佢哋係有一個服務計劃嘅指引，係高層次嘅一啲指引，呢個就係照顧到嗰個巴士嘅訴求咁樣，其實冇人係--喺巴士站嘅提供方面，冇人會超過係 400 公里咁遠嘅。

當然有其他嘅指引喺度，但係要提供一啲全面嘅服務，一個星期有七日有呢啲嘅巴士服務，就係早上、夜晚都有咁樣，其實都係包括晒所有對巴士服務嘅訴求，呢個係運輸局做嘅，佢哋就會決定究竟提供邊啲嘅服務、減少邊啲嘅服務，有啲就係根據嗰個量，乘客量，有啲就係根據就係同其他嘅機構一齊磋商，睇下需唔需要作出調整呀咁樣。

譬如話有新嘅鐵路路線係明年通車喇咁樣，就係呢個伊利沙伯線，即係嗰個橫貫嗰條嘅鐵路，就會有好多嘅容量，有啲巴士嘅路線喺倫敦中部就會係損失咗乘客，佢哋就會係喺線鐵開通嘅時候就會調節，有啲會加，有啲會減，確保就係會有一個有效嘅運作嚟到提供嗰個服務嘅。

MR DUNCAN：（經傳譯員）呢方面係咪包括同巴士營運商大家磋商呢，還是就淨係呢一個運輸局自己作出呢個決定嘅呢？

MR MIKE WESTON：（經傳譯員）當時同巴士公司的確係有對話嘅，亦都係一個中央--唔係單係中央規定，運輸局就會係磋商地區嘅當局，同埋有關嘅持份者、公眾人士咁樣，運輸局的確係需要啲諮詢，然後先至係作出任何嘅更改嘅。我哋會有同巴士公司有對話，就可以話係一啲磋商、一啲諮詢咁樣。

MR DUNCAN：（經傳譯員）剛才你提到就話係有一啲嘅訴求，照顧一啲訴求，一般人就喺居住嘅地點都應該係有巴士服務提供畀佢哋嘅咁樣，假定某一個路線係無利可圖嘅，咁會唔會係都繼續落去係照顧有關嘅意願呢？

MR MIKE WESTON：（經傳譯員）係嘅，其實要決定一啲服務嘅改變，咁就根據呢

個成本效益嘅角度嚟到睇嘅，我哋就睇嗰個巴士嘅網絡，如果你睇嗰個補貼，你每花一鎊，就都需要係提供最大嘅乘客嘅利益，任何嘅改變都係要睇嗰個成本效益嗰方面嘅角度嚟到去睇，等乘客係有一定嘅利益，睇下係咪能夠係每一鎊都使得物有所值嘅。

當然嗰個巴士路線嘅網絡係有補貼嘅，我哋倫敦運輸局喺市長嘅指示底下，係可以冇補貼底下嚟到提供服務嘅，就係營辦少啲利潤低嘅路線，或者係收費係收得高啲咁樣。其實喺呢個網絡入面係有一定嘅補貼，呢個係一個市長本身嘅政治嘅決定嚟嘅。

主席：（經傳譯員）可以係用者自付嘅，係咪呀？即係可以係補貼，係咪呀？

MR MIKE WESTON：（經傳譯員）係嘅，响我報告當中有講其中一個重點，市長決定乘客嘅票價，就始終都係睇嗰個市長係咪改變嗰個嘅票價，呢方面對巴士個網絡嘅財政係有一定嘅影響，目前嘅市長佢就 16 年係當選嘅，喺佢嘅政綱入面作出咗一個承諾，就話係四年唔會加票價嘅。呢個好清楚就係對公眾人士、對乘客就係有一定嘅優惠，但係對呢一個運輸局未來四年嗰個財政有一定嘅影響。

主席：（經傳譯員）錢喺邊度嚟呢？

MR MIKE WESTON：（經傳譯員）市長就係需要從其他嘅渠道係攞呢啲財政，譬如話係嗰個嘅稅收，佢哋會鼓勵呢個運輸局就更加提高嗰個效率，嚟到去減低個成本，所以有不同嘅五花八門嘅方法嚟到去減低個成本嘅。

主席：（經傳譯員）其實比例上喺營運巴士--即係喺嗰個票價方面係佔咗個百分比係幾多呢？

MR MIKE WESTON：（經傳譯員）我睇下個數字有冇先。而家就係三分一嘅成本就係有補貼嘅，我睇番嗰個嘅數字，個筆記先。

主席：（經傳譯員）係，得。

MR MIKE WESTON：（經傳譯員）2016 年，七成嘅成本係乘客嘅收入嚟到去--嗰度嚟嘅，三成就係其他，呢個就係 2 千 600 萬，呢個每年個數字都唔同嘅，我報告當中，有講到 97/98 就係收支平衡嘅，嗰個票價係可以照顧到嗰個嘅運作。但係始終呢個係一個政治嘅決定，係市長嗰個嘅決定，就係佢其實喺財政運作上係點樣處理嘅。

主席：（經傳譯員）票價係凍結四年，七成就本來話係票價可以照顧到，而家可能係跌到六成或者更低，係咪呀？

MR MIKE WESTON：（經傳譯員）除非嗰個乘客量係減低，估計可能會減低少少嘅。

MR DUNCAN：（經傳譯員）我諗你提到嗰個財政表現同埋有關嘅補貼，主席剛才都

提到呢個問題，喺 120 頁、121 頁嗰度，你睇到其實有講到嗰個財政嘅表現嘅，係咪？

MR MIKE WESTON：Mmm.

MR DUNCAN：（經傳譯員）120 頁最底嗰度，最後嗰句你就提到就 1997、98 年嘅時候，個網絡其實就係收支平衡，票價係可以支付到嗰個營運嘅費用，跟住你就講到市長喺 2000 年之後嘅做法，就係話 121 頁最頂嗰部分，同埋就係七成嘅收回成本，就喺第一段嗰度，喺 121 頁嗰度係有咁講嘅。

MR MIKE WESTON：（經傳譯員）係。

MR DUNCAN：（經傳譯員）好，2016 年、2017 年，補貼嗰個數量，睇嚟就係 6 億 2 千 600 萬鎊嘅，就係 60 億港幣咁計喇。主席剛才問到你，就係你嗰個補貼嘅金額喺邊度嚟，係咪就係佢哋嘅嘅稅嗰方面呢？

MR MIKE WESTON：（經傳譯員）無論係商業機構或者係個人嘅畀稅嘅人士，佢哋都會係負擔，當然亦都有政府國家嘅補貼嘅，但係從明年開始，就事實上，三年之前政府就係話畀運輸局聽，其實就唔會再畀補貼佢哋，所以就只會係會畀營運者就資本嘅投入，就佢哋譬如話好似興建新嘅地下鐵路或者係改善站頭嘅設施等等。

所以運輸局喺過去兩、三年，就係從呢一個國家嘅運輸部就係冇任何嘅補貼嘅，所以佢哋就要自己搵辦法，同埋就要去比較雷厲風行睇下點樣節省成本，令到成個營運嘅情況係可以改善，呢個係好大嘅挑戰。同時間，市長亦都係決定就係三至四年之內都唔會有一個--呢一個嘅津貼都係凍結嘅，所以其實會係因為喺嚟緊四年係呢一個合約價格就會隨住通賬增加，但係喺其他方面就係冇增加嘅。

主席：（經傳譯員）中央政府個補貼嘅大概係幾多呢？

MR MIKE WESTON：（經傳譯員）當佢哋講話嚟緊三年成個補貼會凍嘅時候，大概係 6 億鎊嘅，佢哋決定就係三至四年就係減到零嘅。

主席：（經傳譯員）就係 6 億鎊就去到零嘅，...

MR MIKE WESTON：（經傳譯員）呢個其實都係一個好大嘅削減嚟，係呀，呢個係講緊津貼成個運輸局，就唔係單單係講巴士嘅。

主席：（經傳譯員）呢方面嘅津貼喺倫敦之外，其實有冇㗎？

MR MIKE WESTON：（經傳譯員）喺鐵路嚟講，有，巴士就冇。就喺倫敦之外嘅地方，巴士服務其實就已經係放寬咗規管，已經唔規管㗎喇，所以任何人佢哋係被獲准係可以經營巴士呢，佢哋都係用商業去營運巴士，譬如好似係曼徹斯特、伯明翰等等，任何嘅營運商都係可以用商業原則去營運個巴士，當地嘅規管嘅機構就可能就譬如話係提供一啲缺乏嘅服務嘅。譬如話佢哋商業嚟講，佢

啲就會係禮拜一至到禮拜六就先至係營運，而政府當局就可以購買佢哋服務就係星期日去運作嘅。其實百分之九十嘅巴士服務其實係以商業形式嚟去運作嘅，而剩番嗰百分之十就係由當局政府去購買嚟提供服務。

喺倫敦以外嘅地方其實都有考慮緊會唔會有一啲嘅專營巴士服務，而家就探討緊，曼徹斯特特別就係諗緊就係從一個唔規管嘅環境就係去做到一個專營服務嘅方面。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）我哋睇番第 127 頁，呢度就係講到關於個合約個架構，去到 128 頁，4.2 就係講緊合約嘅週期，就有兩個嘅協議嘅，一個就係個框架協議，跟住根據第二個箭咀，就係講到一般嘅合約嘅要求，就特別係巴士營運商應該點樣遵守。另外就係一個路線嘅協議，裏面詳列咗係一啲特別嘅路線嘅要求，特別係一啲最低表現標準等等。你有冇喺你嘅資料之中提供一啲相關嘅例子呢？

MR MIKE WESTON：（經傳譯員）有。有關於路線協議嗰方面嘅，有個例子，對唔住，應該係框架協議嘅。

MR DUNCAN：（經傳譯員）我睇到嘅，第 189 頁嘅，係咪呀？係，冇錯。

MR MIKE WESTON：（經傳譯員）個路線協議就有一百六十頁嘍，每一個營運商都係要簽訂嘅，如果每一次佢哋去營辦一條路線，佢哋都係要簽呢個路線協議，裏面有好詳細嘅資料點樣營辦。

MR DUNCAN：（經傳譯員）第 129 頁第二段，...

主席：（經傳譯員）喺離開呢個題目之前，我哋睇一睇我哋 Stanley 教授有提過墨爾本嘅系統，裏面就關於一啲嘅認證嘅制度嘅，倫敦嘅制度有呢一個框架協議，有預審制度，呢個同墨爾本嘅情況係點樣對比呢，就關於認證嗰方面嘅？

MR MIKE WESTON：（經傳譯員）呢個預審制度就係實際上係審視呢個嘅公司就可唔可以成為一個嘅巴士服務供應商，我哋會睇番佢哋有冇政府機構嘅一個牌照，呢個唔係話呢個公司一定係會贏到呢個合約嘅，其實嗰個門踭唔係太高嘅，你係有一個公司成立咗，你有啲經驗係提供巴士服務，嗰個門踭係比較低嘅，因為倫敦運輸局希望能夠鼓勵各類一啲細嘅公司都可以成為個供應商，當然除咗有啲大嘅公司，譬如話其實佢哋可能係有啲細嘅公司佢哋係有--個車隊係十至十五部巴士嘅，佢哋都能夠可以係認可，希望能夠鼓勵更多嘅人就係可以參加招標個過程，然後我哋就可以決定究竟邊一間公司係能夠可以贏某一個嘅合約。

我唔會講呢個係一個認證嘅過程嚟嘅，我哋只係想希望有可能有潛力嘅公司佢哋係有基本嘅制度係可以提供巴士服務嘅。

主席：（經傳譯員）唔該晒。係，好。係，教授。

羅先生：（經傳譯員）會唔會包括佢哋係有一個車廠呢？

MR MIKE WESTON：（經傳譯員）冇嘅。你係唔需要有個車廠嘅，因為其實如果係咁，就會成為一個佢哋進入市場嘅障礙添，因為要設置一個車廠係一個好大嘅挑戰，譬如擺喺邊度。倫敦運輸局其實可能就會畀一間公司佢只係有二十部巴士，但係一個車廠好多時候都係需要一百五十部車先至能夠營運得成功嘅，所以你係唔需要有個車廠。但係如果你係一個嘅營運商，你就應該係有一個嘅車廠去支持你嘅，可能英國，或者呢個車廠係喺另外一個地方嘅。

MR DUNCAN：（經傳譯員）好，我哋睇番第 129 頁，你就提到關於評審嗰方面，關於個標書嘅評審，你就提到就會係佢哋嘅唔同範疇嘅表現，包括係安全表現，「呢個咁嘅方法就係可以讓到呢個運輸局就係睇清楚佢哋嘅表現情況，亦都讓到營運商佢有個誘因就係不停咁改善佢哋嘅服務。喺安全方面，亦都好似其他方面嘅表現一樣，都會係我哋考慮嘅，亦都會令到我哋係考慮究竟會唔會續約或者畀批新約佢。但係安全就唔係成為呢一個技術評審嘅一部分，但係成為一個『紅線』，其中一個例子就喺 2015 年，就有一個嘅合約商，因為佢哋嘅維修嘅呢個嘅標準唔達標，所以致使到佢哋失去咗好多嘅里數，因為嗰個器械嘅原因嘅問題，所以佢哋就冇一個新嘅合約畀佢哋。」

你提到一個嘅紅線嘅問題，你可唔可以話畀我哋聽你點樣會超越咗嗰條嘅紅線呢？咩嘢為之超越嗰條紅線呢？

MR MIKE WESTON：（經傳譯員）紅線我哋就冇一個定義嘅，就話乜嘢接受到或者乜嘢唔接受到。喺呢一個路線為本嘅招標嘅好處，相對於譬如話新加坡嘅專營嘅制度嘅好處就係話讓我哋運輸局就可以透過呢一個路線招標令到呢間公司就係個大細隨時可以有彈性增大或者係減細嘅。其實如果我哋係要終止合約，尤其是譬如話啲四百或者或者四百五十部巴士嘅，係一個好大嘅決定，對於我哋嚟講，成個巴士嘅服務係一個好大嘅影響，同埋好明顯我哋就可以對於呢一個營運商，我哋--唔好嘅營運商呢，我哋就係唔批新嘅合約畀佢，就對佢哋嚟講，係一個好強嘅訊息，就係佢哋做得唔好。

所以呢條所謂嘅紅線就冇清楚去界定嘅，或者定義係點樣，就我哋就希望就話我哋喺招標嘅評審之中，我哋就會睇下清楚佢哋嘅服務質素同埋其他方面嘅表現，就係會畀分，同埋睇番啲安全嘅指標，睇下有冇問題。

呢度我舉咗個例子，呢度好清楚呢間公司喺維修方面係做得唔好嘅，因為有好多嘅工程師都已經退休，佢哋好多做咗好多年嘅工程師都退咗休，佢哋就冇預計到呢度咁嘅情況，亦都冇做一啲嘅措施去培訓適合嘅維修人員；後來就有好多嘅機械嘅故障同埋有個好差嘅呢個工程質素嘅監測。所以因為咁樣嘅問題，我哋就決定佢哋係需要改善，喺呢段時間，我哋就冇批新合約畀佢哋，喺呢段咁嘅時間，佢哋可能其實就失去咗四至五個合約，可能佢哋之前可能會可以贏到嘅，之後佢哋就喺佢改善咗之後先至可以再入標。

所謂嘅呢一個紅線就係由我哋董事局同埋我哋嘅評審小組去決定嘅。

主席：（經傳譯員）你就頭先提嗰個例子，關於個器械故障同埋就失去咗好多嘅里數同埋好差嘅工程嘅質素，其實呢啲喺你哋去表現監察嘅時候，你哋都已經睇到㗎喇，係咪呀？

MR MIKE WESTON：（經傳譯員）其實就佢失去咗好多嘅里數，同埋好多嘅喺路上機械故障嘅情況，所以佢哋就會扣減佢哋嗰筆款項嘅。

主席：（經傳譯員）我亦都係諗緊其實呢兩樣嘢同呢一個安全有咩嘢關係，係咪去到一個情況就係話嗰啲轆直情甩咗落嚟，然後係撞嚟人呢？

MR MIKE WESTON：（經傳譯員）冇，冇，冇，唔係咁。第一個嘅警示其實係就好--就係通常都係機械故障嘅，即係講緊如果佢哋嗰個維修情況係好差。營運商好多時候都會確保安全都係好緊要嘅，因為倫敦運輸局會懲罰佢哋，就係唔會批新嘅合約畀佢哋，一啲國家嘅機構亦都係會做一啲監察安全嗰方面，如果有問題嘅時候，佢哋可能有公開聽證會等等，政府亦都會係有懲處嘅。

主席：（經傳譯員）其實呢個會唔會係一個潛在嘅安全嘅風險呢？因為呢個巴士成日都死火，佢因為佢維修不善，所以都會係一個可能嘅安全嘅危機嚟㗎喎？

MR MIKE WESTON：（經傳譯員）無論係運輸局或者營運商都會明白呢個都係一個問題嚟嘅，可能會真係會成為一個安全嘅危機，但係最後屘都冇喺真係喺安全方面出咗咩嘢問題，但係冇錯，係可能係一個安全危機嚟嘅。

MR DUNCAN：（經傳譯員）你就頭先講到就話呢一個有安全指標嘅，運輸局有冇一系列嘅一個清單嘅安全指標嘅呢？

MR MIKE WESTON：（經傳譯員）冇錯，係有一系列嘅安全指標嘅，目前營運商佢哋自己都有一啲安全表現嘅呢一個表現嘅指數，就四十一個嘅，我哋就會將呢啲所有嘢就考慮喺一齊嘅時候，就睇番嗰個安全表現係點樣，實在譬如喺呢一個嘅工程或者係機械方面，或者係呢個司機嘅安全等等，都係有一啲嘅安全嘅指標，我哋都會特別嘅監察。

主席：（經傳譯員）呢啲嘅安全指標係咪公眾人士可以參閱嘅呢，又或者係會不久將來會係公布呢？

MR MIKE WESTON：（經傳譯員）未目前為止其實都冇公開嘅，但係好快我哋就會公開呢啲安全指標。

主席：（經傳譯員）喺目前嚟講，或者係試行呢啲嘅安全指標嘅落實之前，其實而家有一啲咩嘢嘅安全嘅措施嘅呢？

MR MIKE WESTON：（經傳譯員）有，有好多嘅監察，有好多分析趨勢等等，我哋會收集好多嘅數據同埋做好多嘅趨勢分析，有好多嘅比較、分析，就係譬如話個別嘅營運商會比較，運輸局會做好多嘅圖表，就睇下唔同嘅情況，譬如話同

行人嗰個意外有咩嘢情況，呢啲嘅趨勢就會係我哋分析係一個網內嘅分析，亦都會係個別嘅營運商嚟分析嘅。而一啲巴士公司就會同其他嘅巴士公司係分享呢個數據，而佢哋之間都可以睇到大家之間嘅數據嘅，所以佢哋係可以比較佢哋嘅表現。

主席：（經傳譯員）呢啲數據喺網上係咪可以攞到嘅呢？

MR MIKE WESTON：（經傳譯員）倫敦運輸局係有發布兩類嘅數據，首先就係巴士網絡上面嘅任何意外，譬如話有人喺巴士上面跌低，即係蹦低等等，每年--每一季都會係發布呢啲數據嘅。

主席：（經傳譯員）係咪即係全部嘅公司都會發布嘅呢，定係由個別去發布呢？

MR MIKE WESTON：（經傳譯員）就係有一份嘅圖表就係所有市民都可以睇到嘅，就係有一個嘅一覽表，你可以睇下倫敦唔同嘅郡或者唔同嘅巴士公司嘅表現，所以市民係可以係查詢呢啲資料嘅。

主席：（經傳譯員）所以就唔會話跟公司，譬如話 Abellio 公司就有多啲嘅人係哦到或者蹦低？

MR MIKE WESTON：（經傳譯員）暫時唔係咁樣嘅。市民或者其他嘅機構可以自己去根據呢啲數據分析，而每一季都會有一個表現嘅一覽表嘅，即係就住巴士網絡嘅安全性，所以就睇到同上一季相比嘅表現。目前嚟講，就係一個網絡嘅層面去做嘅。

主席：（經傳譯員）呢個巴士網絡嘅數據包唔包傷亡數字呀？

MR MIKE WESTON：（經傳譯員）冇錯，係包括任何喺巴士網絡上發生嘅事件嘅。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）呢個數據嘅來源究竟喺邊度呢？邊個提供呢啲數據嘅呢？

MR MIKE WESTON：（經傳譯員）數據嘅主要來源就係巴士公司，佢哋就要將數據入一個中央嘅資料庫，即係一個報告嘅系統--匯報系統，而巴士公司亦要將佢哋嘅事故嘅數據係輸入呢一個系統，倫敦運輸局就會進行審核去確保啲巴士公司係正確咁樣去輸入呢啲資料嘅。而呢啲數據亦都係會同警方嘅數據係交叉去檢查，如果係一啲嚴重意外或者嚴重事故。而家就叫做 STATS19，就嚟會改名㗎喇，而倫敦運輸局就會互相去檢查，去確保呢啲資料係正確。

譬如話喺巴士上有人絆倒或者蹦低，警方係未必會統計嘅，但係呢個數據主要嘅來源就係個別嘅巴士公司，佢哋會將資料輸入一個中央資料庫。

主席：（經傳譯員）呢啲資料係咪公開㗎？

MR MIKE WESTON：（經傳譯員）冇錯，係會每季發布嘅。

主席：（經傳譯員）倫敦警方嘅網站有冇呢？

MR MIKE WESTON：（經傳譯員）可能係一個全國嘅網站上面睇得到嘅。

主席：（經傳譯員）倫敦嘅數據係可唔可以睇得到呢？

MR MIKE WESTON：（經傳譯員）你可以睇成個倫敦嘅數據，倫敦個別嘅郡或者係某啲嘅巴士公司或者甚至係車種嘅。

主席：（經傳譯員）你話警方嘅數據係會包括嚴重嘅事故，係咪包括所有嘅傷亡或者係死亡數字呢？而倫敦運輸局嘅資料庫係咪都會有？

MR MIKE WESTON：（經傳譯員）冇錯，呢啲嘅數據應該係腳合嘅，至於一啲輕微嘅受傷，因為可能警方係會有處理某啲呢啲輕微嘅受傷，所以輕微受傷嘅數字未必係腳合，但係一啲嚴重嘅傷亡應該係腳合嘅數據。

主席：（經傳譯員）係，唔該晒。

MR DUNCAN：（經傳譯員）請你撳去第 150 頁，你報告嘅第 150 頁，第 7.8 段，呢段就係關於倫敦運輸局嘅安全表現指標，呢個就係巴士安全計劃嘅一部分嚟嘅，你見唔見到？

MR MIKE WESTON：（經傳譯員）係，見到嘅。

MR DUNCAN：（經傳譯員）呢個就係咪主席所講嘅未經發布嘅安全表現指標呢？

MR MIKE WESTON：（經傳譯員）呢個就係其中一間巴士公司嘅建議，佢哋就喺 8 月嘅時候向我哋簡介咗㗎喇，就有四十一項嘅建議，就得出一個安全表現嘅分數，有一啲嘅元素，包括係可能乘客嘰倒或者跌低嘅數字，傷亡數字，司機嘅監察等等，呢啲就會得出一個標準，一個分數，個基準就係 80 分，然後就會係根據呢一個基準再去幫呢個巴士公司評分嘅。

如果你係遇上呢一個傷亡，有時未必係因為巴士公司嘅錯嘅，未必影響佢哋分數，所以有一個加權嘅系數，我哋嘅目標就係所有巴士公司都可以做得更加好、更加安全，所以我哋定咗一個安全表現嘅基準就係 80 分，然後你就會根據呢一個基線就儘量去改善你嘅分數同埋表現，所以呢個我哋計劃係會公布呢一個計劃嘅，但係暫時仲未。

主席：（經傳譯員）你話已經係向我哋解釋過，你係咪講緊我同你同埋一啲董事總經理，即係喺 8 月嘅會面？

MR MIKE WESTON：（經傳譯員）冇錯，佢哋係有睇過嗰啲表嘅。

主席：（經傳譯員）呢個就係 Jon Pike 先生向我哋講過，佢就係安全及風險主管嘅？

MR MIKE WESTON：（經傳譯員）冇錯。

主席：（經傳譯員）呢個就係下個月中係會有嘅，係咪？

MR MIKE WESTON：（經傳譯員）冇錯。我諗佢哋喺 10 月中公布佢哋嘅安全計劃嘅時候，就會公布嘅。

MR DUNCAN：（經傳譯員）呢個對於嗰個處理安全嘅嗰個紅線嘅做法係會唔會有影響或者分別呢？而家就會有一個紅線嘅制度去決定會唔會同一間巴士公司續約或者畀新嘅路線佢。

MR MIKE WESTON：（經傳譯員）好難去形容會點樣去用嘅，如果你嘅分數係越嚟越差嘅話，我諗可能都會係--即係算係一條紅線嚟，即係可能反映你嘅表現係惡化緊。因為我哋係會睇好多嘅因素，如果喺任何一方面差咗，都會係反映喺個分數度嘅，所以如果你嘅分數係低咗，可能會係一個問題嚟嘅。

主席：（經傳譯員）點解係需要包括四十一個因素咁多呢？即係喺你計呢一個安全表現嘅分數嘅時候。

MR MIKE WESTON：（經傳譯員）正如報告所講，我哋係從呢一個鐵路業就係借鏡，即係得出呢一個制度嘅。我哋嘅原則就係個分數唔應該係受個別嘅事件影響，因為如果你一間大嘅巴士公司，有二千架巴士，你係會遇上一啲嘅事故嘅，所以我哋嘅設計就係得出一籃子嘅措施或者係因素去得出一個分數嘅。如果呢個分數上升或者下降，可能你嘅表現係大幅度地改善咗或者係惡化，呢個就係比起淨係睇某一個因素係好嘅。

例如如果你主要係睇一間巴士公司遇上嘅撞車嘅意外，可能係唔公平嘅，因為可能喺某啲嘅路線有啲路面嘅情況係會導致撞車，並不代表成間巴士公司嘅整體表現嘅，所以我哋係要考慮一籃子嘅因素，先去評核佢哋嘅安全表現。

主席：（經傳譯員）呢一個一籃子因素嘅範圍係點呢？當然如果你睇呢個碰撞嘅數字，係大家都會明白，你睇到如果有乘客跌低、蹦倒等等，或者違反交通規例、超速、急速剎車等等，仲會考慮啲咩嘢其他因素呀？

MR MIKE WESTON：（經傳譯員）我哋會包括呢一個司機質素監管或者係監察，呢個亦都係同公眾對安全駕駛嘅期望係有關，所以我哋係想包括一系列嘅因素，先至得出一個分數去反映呢個巴士公司嘅整體表現嘅。

主席：（經傳譯員）即係你講緊公眾嘅回響，係咪講緊投訴呀？

MR MIKE WESTON：（經傳譯員）係，包括投訴。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）Weston 先生，喺 Stanley 教授喺向委員會--即係協助委員會時候講，香港就係有一個競爭性嘅投標制度，而巴士公司就會係自己係

收呢啲車資，但係佢哋亦都係要承擔風險嘅，我就想你睇睇呢一個嘅 Stanley 教授嘅作供嘅謄本，呢個就係第 16 日嘅謄本，第 45 頁嘅。

主席：（經傳譯員）日期係幾時呀？

MR DUNCAN：（經傳譯員）9 月 15 號嘅。你之前有冇睇過呢份證供呀？

MR MIKE WESTON：（經傳譯員）有嘅。

MR DUNCAN：（經傳譯員）所以我就會好快咁樣帶你睇一睇呢份文件。我會由第 45 頁開始，第 10 行，委員會嘅大律師就講到呢一點嘅，「第一部分就係講呢一個喺墨爾本有呢個競爭性投標制度嘅好處，你都已經有提過呢一個議題㗎喇，所以我想同你講下呢個競爭性嘅投標制度，同埋呢個點樣係應用喺香港嘅情況。巴士公司就會自己收呢一個巴士嘅車資，而佢哋就自己承擔營運巴士路線嘅風險。」

第 22 行，就話「我明白係有唔同嘅選項，但係我就想請你解釋下呢一啲嘅選項。」我諗之後有一啲部分可以略過，因為我諗你都知道嗰啲嘅選項或者情景係乜嘢，就住 Stanley 教授所講。我就想跳去第 48 頁嘅頁底，第 21 行。

陳政龍大律師就講到「如果我冇理解錯，係可以有唔同嘅情景嘅，第一，就係一個投標商就係建議係支付政府一個營運嘅金額去換取經營某一個區域或者某啲路線嘅經營權，佢就會係同政府分享某啲嘅利潤。」

第 6 行就講到「第三個情景就係冇一個競投嘅價格，而呢個投標嘅競爭係完全係視乎服務質素嘅評核。」

第 22 行就主席話「另一個方法就係呢一個新嘅巴士公司就可能會建議佢可以--我收嘅車費比現有嘅巴士公司係可以低一成嘅，即係呢個情景底下，就唔會畀錢政府，但係巴士公司就可以幫到乘客。」陳大律師就話「呢啲就係競爭性投標制度嘅好處。」

所以呢個就係有四個嘅情景，我就想睇番你嗰份報告第 131 頁嘅，第 4.3.2 段，第一段就係形容一個同香港相似嘅制度，就住呢個盈利分享，就講到呢一個淨價嘅合約。

「喺 1995 年至 2000 年，機構就係採納咗一個淨價嘅合約制度，而巴士公司就會係保留路線嘅車資收入，然後就係承擔呢個相關嘅風險，巴士公司就會係競投一啲合約，就住呢個預期嘅收入，佢會係競投一個倫敦交通局嘅資助，就住一啲比較冇咁賺錢嘅路線，或者喺一啲賺錢嘅路線就係同倫敦運輸局係分享收益嘅。

呢個淨價合約就只係運作咗一段短嘅時間，因為就倫敦運輸局佢嘅行政嘅負擔係非常之大嘅，因為佢係要分配超過七百條巴士路線嘅利潤或者收入。而

實際嚟講巴士公司係好難影響實際嘅路線車資收入嘅，因為路線嘅規劃、班次同埋車資嘅釐訂仍然係由倫敦運輸局去控制同埋管理嘅。」

我哋假定喺第二段嗰度所講嘅兩個問題都係可以克服得到咁講喇，即係個行政嘅負擔，嗰個情況就係呢一個淨成本合約嘅做法，你覺得香港係咪可以參考呢，還是係唔可以考慮呢？

MR MIKE WESTON：（經傳譯員）如果你係睇個專營權嗰度，嗰個營辦者就係喺香港某一啲部分就係營辦所有嘅路線，就好似倫敦嘅情況咁樣，就容易啲嘅。倫敦個問題就係營運者可以係有幾條線係有不同嘅營運者或者係若干營運者嚟到去做，因此對嗰個收入係有一定嘅影響嘅。所以實際嘅問題就係喺呢個淨成本合約係有乜問題嘅。

就睇下嗰個英國嘅合約，呢個係冇問題嘅，但係要確保就係嗰啲營運者係對嗰個收入有一定嘅影響，同埋係有能力係改變嗰個嘅收入，譬如話可以控制嗰個嘅票價或者係可以係將嗰個服務水平係改變，或者係有能力係可以係推廣或者係推銷佢哋嘅服務呀咁樣。

喺倫敦運輸局嘅情況，所有呢啲咁嘅工具就係掌握喺嗰個當局當中，就唔喺個營運者手中嘅，所以營運者其實對嗰個實際嗰個票價收入有好少嘅影響嘅，即使佢哋服務嘅質量都好好，佢哋喺嗰個走廊上面有三、四間嘅營運商，佢哋係有同樣嘅路線都好，乘客都係會有車嚟就搭㗎喇，佢哋唔會揀邊間巴士公司嚟搭嘅。

所以答你條問題，就係係可行嘅，可能就係如果營運者係有一個專營權係可以處理自己嘅路線，可以喺自己嘅範圍入面係有一定嘅控制權，就好有用嘅。呢個確保嗰個營運者係可以控制到若干嘅範疇，然後先至可行嘅，因為喺倫敦嗰度當局控制咗好多嘅情況，睇嚟就唔係話咁可行。我希望答到你嘅問題。

MR DUNCAN：（經傳譯員）唔該晒。其實我以前都冇問過呢個問題，其實就係有幾多條路線，倫敦總有幾多條路線？

MR MIKE WESTON：（經傳譯員）有七百，就視乎係個別嘅路線，有啲就係學校嘅路線，倫敦嘅巴士路線加埋呢啲巴士路線，其實公眾人士都可以坐嘅，但係有一啲嘅路線喺返學嘅時間就淨係畀學生嚟到去搭一啲專門嘅路線嚟嘅。有一啲路線可能係個別嘅巴士線--校巴線，有啲就可能係長啲嘅路線，就係六百、七百輛巴士都有嘅。

MR DUNCAN：（經傳譯員）唔該晒。另一個問題就係 Stanley 教授證供當中有提到嘅。或者係返番去第 16 日嘅聆訊，第 50 頁嗰度，呢個就係喺正話我提嗰段嘅之後嘅啫，第 50 頁，第 9 行，陳律師就問，「係咪有一定嘅優點呢，即係喺嗰個競爭性嘅投標嗰度，而具體上就係同呢一個巴士安全運作係相關嘅？」我哋睇到就係教授嘅回覆就係第 50 頁一路係答到去 56 頁嘅，第 16 行嗰度，你有

有機會睇過Stanley教授呢方面嘅證供？

MR MIKE WESTON：（經傳譯員）係有嘅。

MR DUNCAN：（經傳譯員）我諗公道咁講，或者係可以總括一下咁講，其實喺具體上對安全同呢一個競爭性嘅投標係冇一定嘅影響嘅，其實你睇呢個證供係咪咁樣睇呢？

MR MIKE WESTON：（經傳譯員）其實我嘅睇法都係咁樣嘅，我唔會唔同意嗰個睇法，就話係即係競爭性投標對安全係唔會話冇影響，但係亦都唔會話有一定嘅優點。其實喺倫敦嗰度嗰個路線嘅投標，嗰個投標過程本身就並冇具體咁樣係對安全帶嚟一啲嘅優點，但係嗰個投標嗰個評估，其實等當局就可以就係睇埋嗰個安全嘅角度。

剛才我哋都講過，就有啲公司佢哋係有一啲機件--即係嗰個基建工程嘅水平就唔係話咁好，等運輸當局就係可以係有能力係更改佢哋嘅建議，特別係照顧個安全嘅問題，所以嗰個招標嘅程序或者嘅競爭性嘅招標未必係同安全有直接嘅關係，但係嗰個招標嗰個目的，特別喺倫敦嗰個情況就容許有關當局係可以係考慮埋嗰個安全角度，然後先至批嗰個合約或者係續嗰個合約嘅。

主席：（經傳譯員）呢個其實你係畀過呢啲嘅例子，考慮到嗰個嘅安全，就有一啲巴士公司佢哋喺呢方面唔係咁好嘅，喺嗰個保養嘅計劃入面係做得唔足咁樣，其實喺呢個制度入面，點樣--一間公司係咪願意進行呢個技術上嘅一啲創新，呢個對安全亦都係有一定嘅影響嘅，其實公司可唔可以係有一啲嘅前置嘅一啲嘅鏡頭咁樣，等佢哋可以睇到嗰個巴士同車輛嘅距離咁樣。喺呢一方面，呢個過程，競爭性投標方面係咪有一定嘅影響呢？

MR MIKE WESTON：（經傳譯員）我相信嗰個挑戰顯然，就係如果當局係訂定一啲最低嘅安全標準，譬如話一啲設備、閉路電視、即係巴士上面前、後嘅閉路電視，倫敦都有嘅，所有嘅營運者如果佢哋係要入標嘅話，都要符合呢個標準。如果當局係訂定呢啲標準，所有嘅營運者都係需要符合呢啲標準，然後先至可以得到個合約嘅

對於呢啲競爭性投標方面嘅程序，個挑戰性就係最終始終我哋係有一個商業嘅評估嘅，有個技術上嘅評估，有時就好難就話對一啲即係喺標書入面啲少量嘅創新、科技創新，譬如話有一啲嘅通話嘅系統就可以改善到嗰個表現，因為未必得嘅有時。呢個會幫到佢哋嗰個技術上嘅得分，但係最終某程度上，整體嗰個商業上面嘅分數就會係佔咗主要嘅一個嘅決定嘅，呢個對於嗰個合約方面--喺呢方面又未必係有咁大嘅影響，所以個挑戰就喺呢度。所以喺倫敦就係用一啲一般嘅安全嘅標準，即係一般嘅巴士安全嘅標準咁樣。

嗰個招標嘅程序始終係有一個重要嘅元素，我哋唔會話唔鼓勵嗰個技術上嘅創新，即係佢哋可以係超越到呢個當局所要求嘅，當然如果佢哋覺得佢哋有一定嘅業務上可行嘅話，有一啲嘅技術上嘅創新，就可以減低嗰個嘅意外，亦

都可以節省佢哋嘅成本，佢哋亦都係好樂意咁嚟到去採納嘅，但係你少少嘅技術創新對嗰個評估方面又未必有大影響嘅。

主席：（經傳譯員）嗰啲規管當局其實就可以係訂定一啲最低嘅標準，就唔係話嗰啲巴士公司係主動咁樣嚟到去改善個安全，係咪呢？

MR MIKE WESTON：（經傳譯員）我諗呢個就可能係最終係要咁樣走㗎喇，嗰條路，喺呢個倫敦運輸局講到呢個巴士安全嘅水準咁樣。我嘅評估就係當局就會話其實有好多嘅技術創新喺度，我哋要睇嗰啲巴士公司點樣去進行創新，同埋係採納佢哋認為合適嘅科技，就唔係話訂定一啲標準等各方面係採納，否則，亦都係需要加埋呢個成本入去，咁樣先至係會公平嘅。

主席：（經傳譯員）喺呢個情況底下，呢啲競爭性嘅投標其實喺提升嗰個安全方面係中性，係咪呢？

MR MIKE WESTON：（經傳譯員）係嘅，可能係咁樣，呢個可能係一個正確嘅結論，安全基本係必定㗎喇，其實所有嘅營運者都係需要符合一定嘅標準，佢哋喺其他方面可以係睇一啲技術嘅創新嚟到去改善嗰個服務，亦都係希望提升佢哋嘅效率，亦都係會增加佢哋嘅成本，其實對公眾人士嚟講係咪物有所值係一個問題。

主席：（經傳譯員）個表現，即係始終競爭係要提升表現，就唔係話安全？

MR MIKE WESTON：Yes.

主席：（經傳譯員）其實呢個情況同航空公司係咪可以類比嘅呢？當局訂定咗一定嘅標準，就唔係個別航空公司就係裝某啲嘅設備咁樣嚟到去提升安全。

MR MIKE WESTON：（經傳譯員）喺航空方面我都唔係一啲專家，但係我嘅印象就係你對呢個航空公司嘅印象，其實安全就喺航空公司嚟講，就唔係話一個乜嘢嘅特別嘅優點，而係一啲係一啲既定一定要做嘅嘢嚟㗎喇，咁可能呢個做法喺倫敦運輸局都係要咁樣做嘅，安全嘅標準係必定嘅，就唔係話有一個競爭嘅優點，等呢啲公司可以大家互相競爭嘅。

MR DUNCAN：（經傳譯員）其實喺歐洲有冇城市係朝住呢個方向嚟到去走嘅呢？

MR MIKE WESTON：（經傳譯員）就安全嗰方面？

MR DUNCAN：（經傳譯員）即係一致嘅標準，所有巴士必須係當局訂定一定嘅標準，即係話喺倫敦運輸局係有一定嘅安全標準，就唔係話等公司嚟到去自己去決定點樣創新嚟到去點樣提升安全。

MR MIKE WESTON：（經傳譯員）我所照我嘅所知，倫敦運輸局嗰個安全標準係佔領先嘅地位嘅，其他歐洲嘅地方佢哋都係用一啲嘅科技嚟到提升安全，但係照我所知，倫敦運輸局其實就係有一定嘅一致嘅標準，所有公司係遵守。

MR DUNCAN：（經傳譯員）另一點你提嘅就係喺呢個競爭性投標嗰方面，就係就住香港，睇關於嗰個廠房嘅擁有權同埋係有冇廠房嘅問題，我想你睇係你報告嘅 151 頁，最底嗰度，你就話「巴士車廠好多時就係對競爭嚟講係構成一個障礙嘅」，你睇到「喺將來，競爭性嘅投標嗰方面的確係需要有一定嘅清楚策略就係關於廠房嘅擁有權同埋有冇廠房提供嘅問題。」可唔可以同我哋係引申一下呢方面嘅講法呢？Weston 先生。

MR MIKE WESTON：（經傳譯員）係喇，如果你睇倫敦嗰個情況，最大嘅挑戰，如果你係新嘅營運者入嚟嘅話，始終都係有冇廠房嘅問題，呢個係始終係搵一個合適嘅地點嚟到起廠房同埋嗰個--如果你想係打入一個市場嘅話，你需要起一啲嘅廠房畀百五部車咁樣，咁你係需要係要令到嗰個廠房係喺經濟上可行先得嘅，等佢可以係攞到合約。

即使喺倫敦嚟講，嗰個要打入個市場都係嗰個廠房嘅問題，係咪有冇廠房，唔係話冇可能嘅，但係呢個係一個障礙。另外喺嗰個路線投標嗰方面，如果你係要用一個專營權嗰方面嘅做法，喺投資新廠房嘅設施其實就係好重要嘅，呢個對競爭嚟講亦都構成一個障礙嘅。

喺新加坡嗰個嘅模式，佢哋當局就會提供嗰個廠房同埋有關嘅車輛嘅，基本上個營運者喺入標嘅時候就係要營運呢個嘅專營權，而廠房、車就係呢個新加坡嘅土地運輸局提供，呢個模式亦都係完全不同嘅。

不過問題就係除非有一啲嘅競爭性嘅投標，即係香港嚟講，我哋始終都係需要係有一定嘅策略，嚟到處理呢一個嗰個嘅障礙，始終呢個畢竟都係嗰個廠房嘅問題，我哋喺呢度需要有一定嘅清楚嘅策略，好可能嗰個競爭可能會好弱㗎喇，而現有嘅巴士公司可能會係贏到個合約嘅。

MR DUNCAN：（經傳譯員）可唔可以喺倫敦係大家分享嗰啲廠房嘅呢？

MR MIKE WESTON：（經傳譯員）係喇，大多數嘅倫敦嘅廠房都係巴士公司擁有嘅，大約七十五間就係巴士公司公司所擁有嘅，十間就係運輸局所擁有嘅，其他即係種種原因，有啲就喺私有化嘅時候都係空置緊嘅，由於係 2000 年一路擴展，嗰啲廠房一路都係有用嘅，巴士公司就喺佢哋合約上面就係用呢啲嘅廠房，有兩間嘅呢啲廠房就係--即係倫敦東部其實就係 Hackney 同埋 Arriva 兩間公司，即係大家係分享嘅，呢個係比較少有嘅，佢哋都係大家互相合作，令到佢哋可行嘅，呢個做法都唔係話唔可行嘅，兩間廠房而家係大家係分享，有啲嘅車廠就用嚟泊車，佢哋係用當中嘅設施嘅。

MR DUNCAN：（經傳譯員）新加坡佢哋就提供呢啲車廠畀呢啲營運商，佢哋係咪都係分享呢啲嘅廠房㗎？

MR MIKE WESTON：（經傳譯員）新加坡有兩份嘅合約，就係有啲新設嘅車廠，佢哋亦都係--即係喺新加坡亦都係擴展呢啲嘅車廠嘅，佢哋嘅網絡亦都係擴展咗，亦都有新嘅車廠，佢哋嘅做法係同其他地方係有所不同嘅，如果佢哋係繼

續呢啲嘅招標嘅工作，佢哋可能係需要考慮而家嘅車廠嘅安排，睇下點樣可以將佢係喺呢個程序入面係納入埋入面嘅。

主席：（經傳譯員）嗰個嘅障礙就係車廠，如果係講緊新嘅路線嘅時候，呢個障礙係咪會細啲呢？譬如喺香港，就我哋要發展一個新市鎮，我哋係需要有一啲嘅農村嘅地帶，我哋會將佢擺一啲城市嘅設施，所以就比較容易啲政府當局係可以起車廠嘅，係咪？

MR MIKE WESTON：（經傳譯員）係，冇錯。我所知，其實就係新加坡係有個新嘅服務嘅時候就有新嘅車廠建立。如果譬如喺香港有新嘅服去新嘅地方嘅時候，係如果係理論上就係應該由運輸署去起呢個車廠，而唔係話個別嘅公司嘅。車廠其實就係喺競爭方面係一個最大嘅障礙嚟嘅。

主席：（經傳譯員）喺倫敦嚟講，係咪有一啲嘅整合嘅情況呢？譬如話喺倫敦以外嘅公司佢入地倫敦，佢就係收購咗一啲細少少嘅巴士公司，然後亦都係收購咗一啲嘅車廠，就藉以進入個市場，係咪咁？

MR MIKE WESTON：（經傳譯員）係。最後一個入嚟市場嘅時候就係一間澳洲嘅公司，佢哋嘗試好努力係好多年係進入個市場，但係嗰個車廠嘅障礙其實都係好大。唔單只係咁，喺倫敦，你亦都係將係--車廠亦都係要有競爭力嘅地點嗰度，所以佢哋就去--First Group 呢間公司就買一啲車廠，然之後就進入呢個市場，就由收購開始進入市場。

主席：（經傳譯員）好，我哋係睇 126 頁嘅，你嘅報告，你就係列出咗巴士營運商嘅名稱，嗰個澳洲公司係咪 ComfortDelGro 呢？

MR MIKE WESTON：No. The Australian company is under "Other", because they run about...

主席：（經傳譯員）佢係咩嘢邊間公司話？

MR MIKE WESTON：（經傳譯員）佢唔係呢度嚟嘅，佢大概係佔市場係百分之三至四，Tower Transit。

主席：（經傳譯員）係咪都係喺新加坡嗰度係營運嘅呢？

MR MIKE WESTON：（經傳譯員）冇錯，佢亦都係喺新加坡嗰度叫做易塔通嘅呢間公司，都係新加坡有營運嘅。

主席：（經傳譯員）譬如好似 RATP Development 呢間公司，呢個係咪一個法國公司？

MR MIKE WESTON：（經傳譯員）係。佢有兩個部分嘅，RATP 就係公交嘅公司，喺巴黎嚟嘅，就係營運巴士同埋地鐵嘅，喺巴黎。RATP Development 係一個就佢哋嘅另外一間公司就係投資海外嘅業務嘅，佢哋係有成功投標咗一個叫做 Riyadh Metro，係呢一個倫敦嘅中心地點嘅一個巴士嘅。

主席：（經傳譯員）邊間話？Riyadh Metro？

MR MIKE WESTON：（經傳譯員）係。

主席：（經傳譯員）RATP Development 係咪收購咗倫敦幾間比較古老嘅、細嘅巴士公司呢？

MR MIKE WESTON：（經傳譯員）係，RATP 亦都係收購咗一間叫 Quality Line 嘅公司，亦都係收購咗另外一間呢個法國公司，佢喺倫敦有業務嘅，喺過去幾年，佢哋收購咗幾間公司，亦都係有好多細嘅巴士公司係有整合，亦都係將畀呢啲大嘅公司去吞併嘅。

主席：（經傳譯員）有幾多間公司其實係倫敦以外嘅公司，RATP 呢？

MR MIKE WESTON：（經傳譯員）Abellio 就係荷蘭公司，Arriva 係呢一個德國嘅鐵路公司，ComfortDelGro 就係新加坡公司，新加坡基地嘅公司，Go-Ahead Group PLC 係英國嘅一間有限公司，RATP Development 正如我頭先所講，係法國喺巴黎嘅一個公交公司，Stagecoach 係亦都一個英國公司嚟嘅，所以係三間係外國公司公共公司，一個就係私人公司嚟嘅，所以其實都個組合都係唔同嘅。

歐陽先生：（經傳譯員）如果佢哋係要去收購一間公司，其實佢哋係咪要繼續聘請嗰啲司機呢？

MR MIKE WESTON：（經傳譯員）係，冇錯嘅，嗰個框架協議就係如果有收購嘅情況，佢哋係要--首先佢就係要得到運輸局同意同埋佢呢個運輸局其實係可以有權反對收購嘅呢啲嘅行動嘅。如果呢個六個裏面嘅其中一個大嘅公司就想係收購另外一間大嘅公司，倫敦運輸局可能就會反對，因為唔想個競爭係減少。佢哋亦都會係喺第二啲情況係會介入嘅，因為佢哋想睇下成個競爭嘅情況會唔會可以保留到。無論如何，佢哋係需要得到倫敦運輸局嘅同意。

喺英國，如果你要收購一個公司，嗰間公司嘅資產亦都係有相對嘅責任你係要去履行嘅，咁嘅情況係喺英國同埋歐洲其實都係情況嘅，你係要將嗰啲嘅員工同時間去移交嘅。如果一間公司如果係冇--贏到一個合約嘅時候，呢間公司嘅員工係有權係去到另外一間新公司嘅公司嗰度做。一間新嘅公司可能係決定係需要繼續聘請原有原有嘅員工，因為其實佢哋亦都缺乏員工，但係可能員工亦都可以決定去繼續留喺原有嘅公司嗰度嘅，可能個車廠已經係關閉咗等等咁樣樣。

歐陽先生：（經傳譯員）係。

主席：（經傳譯員）係咪都係原有個僱用條件都係要保留？

MR MIKE WESTON：（經傳譯員）冇錯，法例係咁規定嘅，佢哋係要保留原有嘅聘用條件嘅。呢間公司後來之後可能係同員工磋商，就係改變嗰個聘用條件，但

係喺呢個轉移嗰刻，嗰個聘用條件應該係保留嘅。

主席：（經傳譯員）呢個係咪市長嘅成就嚟嘅，佢所做嘅呢？

MR MIKE WESTON：（經傳譯員）其實而家嘅市長其實已經做咗好多工作，譬如話係立法嗰方面，如果個合約係改變咗，你就係要遵守番原用嘅一直嘅合約條件，但係呢個而家嘅市長就係容許嗰啲員工係選擇過唔過去新公司嘅，個市長就講「如果我係一個嘅司機，我已經有十五年經驗，然後我喺申請由 Abellio 去 Go-Ahead，因為 Go-Ahead 就近我住嘅地方，我仍然就係應該係享有十五年工作經驗嘅巴士司機嘅待遇，所以我就唔需要從頭開始，即係話我嗰個經驗會繼續係保留嘅。」對於咁樣嘅情況，如果啲司機係要調去另一間公司，就比較公平一啲。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）你係咪會唔會想小休呢？而家係一個幾合適嘅時間。

主席：（經傳譯員）我哋會係有個小休。已經係作咗供兩個小時，然後我哋而家會小休二十分鐘，我哋會係十一點半之前再返嚟嘅，十一點半會再返番嚟。

上午 11 時 10 分押聆訊押後

上午 11 時 30 分恢復聆訊

出席人士如前。

主席：（經傳譯員）鄧大律師。

MR DUNCAN：（經傳譯員）多謝主席。Weston 先生，請你撥去第 153 頁嘅，你報告嘅其中一頁，第 8.6 段，你就提到運輸當局同埋巴士營運商之間嘅合約關係，喺第一段第二句，你就提到「雖然合約結構喺香港係唔同嘅，香港所採用嘅呢一個高層次嘅合約模式係未必需要改變先至可以改善合約監管、表現管理同埋運輸署同埋專營巴士商之間嘅合作。」

另外我想你睇睇第 154 頁第二句，你就形容係過度依賴法定嘅規例，就係適用於所有嘅車輛嘅，然後最後一段，你講到「喺倫敦嘅情況係車輛同埋司機都係需要遵從呢個法定嘅要求嘅，而呢啲相關嘅措施、項目同埋合作，即係超越呢啲法規嘅呢啲合作同埋項目就會令到實際嘅安全得到改善嘅。」

然後你提到「倫敦巴士公司同埋倫敦運輸局之間嘅合作，佢哋係願意創新同埋試一啲新嘅技術同埋方法，同埋作為呢一個巴士安全計劃嘅一部分，呢啲

係會帶嚟一啲良好嘅結果，即係喺呢一個減少意外同埋受傷方面嘅，而運輸署係應該考慮佢哋點樣可以改善同專營巴士商之間嘅合作關係。」呢度就係提到一啲關於合作嘅觀點。

運輸署喺呢一方面係監管者嚟嘅，如果密切合作嘅話，會唔會引致監管者同埋巴士之間嘅嗰個關係係太過係親近呢？

MR MIKE WESTON：（經傳譯員）我諗兩者係可以併存嘅，我喺報告度咁樣寫嘅原因係因為我喺倫敦運輸局擔任巴士服務總監嘅時候，我哋好少係講呢一個--即係我哋同巴士公司傾嘅時候好少講呢個框架協議嘅或者呢個路線協議，呢個就係我哋當局同埋巴士公司之間嘅關係。

我喺 8 月就係同一啲巴士公司嘅代表見面，我諗我哋冇提到合約，合約並唔係一個問題嚟嘅或者一個阻礙，我當時亦都係有咁樣講，因為我知道倫敦運輸局亦都係想致力去改善營運安全嘅，如果係要透過合約去著手，可能係需要好長嘅時間。如果倫敦運輸局係要引入一啲安全嘅標準，即係透過合約嚟講，就要好耐先可以睇到成果，呢個過程亦都係會係好慢嘅。

我諗如果係想快啲係做到嘢，合作係一個好嘅方法嚟嘅，我諗到咗某個時候，呢一啲元素可能係會納入成為合約嘅一部分。所以呢個可以獲得結果或者成果嘅速度係一個考慮嘅因素嚟嘅。

我亦都深信有合約係重要嘅，如果我哋有任何嘅爭議，但係我係相信有一啲事情透過合作，係更加快可以得到成果嘅，呢個喺 8 月同運輸局同埋巴士公司傾嘅時候都好清楚地帶出呢一點。喺呢方面，即係喺安全方面亦都取得好大嘅進展。所以我就強調合作呢一點。

至於法定嘅要求或者英國嘅要求，包括係一啲車輛嘅維修、車隊嘅管理等等，呢啲並冇大問題，大部分嘅巴士公司都係可以係符合呢啲要求。

主席：（經傳譯員）呢個合作嘅機制係點嘅呢？即係喺倫敦運輸局同埋專營巴士商之間嘅合作係點嘅呢？你就指出合作可以帶嚟成功嘅。

MR MIKE WESTON：（經傳譯員）報告所提到嘅第一點就係呢一個巴士公司會議嘅成果，即係嚟自巴士公司高層同埋倫敦運輸局嘅高層係去定期見面去傾下一啲討論點嘅，包括係安全。

主席：（經傳譯員）呢個喺報告邊一部分呀？

MR DUNCAN：（經傳譯員）第 136 頁嘅。

MR MIKE WESTON：（經傳譯員）呢個巴士營運商高峰會，喺呢個高峰會入面，每個星期巴士公司嘅代表會同倫敦運輸局嘅代表係會面，然後去傾一啲共同關注嘅問題，而轄下嘅安全小組亦都係會鼓勵啲營運商去分享佢哋嘅最佳做法，...

主席：（經傳譯員）喺呢一個巴士營運商嘅峰會有咩嘢人出席呢？

MR MIKE WESTON：（經傳譯員）就會係個別巴士公司董事總經理同埋倫敦運輸局嘅總監或者係以上級別嘅代表嘅。

主席：（經傳譯員）呢個峰會喺邊度進行㗎？

MR MIKE WESTON：（經傳譯員）就會係喺倫敦運輸局嘅辦公室，就係為期係八星期嘅為一個週期。有三大嘅目標，第一，就係分享一啲良好嘅做法，喺呢一個高峰會入面，巴士公司就可以提出佢哋嘅有咩嘢擔憂同埋佢哋想傾嘅議題嘅，佢哋未必係會傾一啲好個別嘅問題。

主席：（經傳譯員）可唔可以舉啲例子畀我哋聽？

MR MIKE WESTON：（經傳譯員）我諗緊就係一啲例子，譬如話關於嗰啲巴士站嘅執行嘅措施，呢個論壇其實等運輸局係支援一啲巴士站嘅設置咁樣，仲有其他一般性嘅問題都係會討論嘅，而呢啲巴士公司係會提出佢哋嘅合約入面嘅事項，...

主席：（經傳譯員）用呢個例子咁嚟講，究竟討論完之後會採取咩嘢行動呢？

MR MIKE WESTON：（經傳譯員）運輸局其實就係最有能力係提升呢啲事項畀有關嘅當局，咁佢哋就喺--譬如話喺公路係可以執行呢啲嘅措施，佢哋有人力，有警方呀咁樣，其實視乎嗰個路段係點樣，運輸局其實就係可以有能力係引進其他嘅機構係一齊參與嘅，呢啲係一般嘅事項。

呢個亦都係一個好好嘅機會等倫敦運輸局係接觸有關嘅機構係講不同嘅問題，譬如話一啲嘅未來五年之後嗰個--即係未來五年嗰個嘅業務計劃係點樣，對嗰個營運者係有一定嘅影響，同埋有一啲計劃係等巴士公司係預先係知道嘅，譬如改變嗰個嘅巴士嘅網絡。呢個論壇其實就可以係大家分享嗰個嘅工作係點樣。

主席：（經傳譯員）譬如話喺呢個伊利沙伯線，呢方面會唔會係會提出呢？

MR MIKE WESTON：（經傳譯員）係嘅，我喺運輸局做嘅時候，亦都係有一啲講解，一啲巴士嘅規劃嘅當局係解釋一下呢條新嘅橫貫嘅伊利沙伯線對巴士嘅路線有咩嘢路線呢咁，呢個係一個好好嘅論壇，等大家可以分享不同嘅事項嘅。

主席：（經傳譯員）你提到一啲小組，可唔可以同我哋講一講咩嘢嘅小組呢？

MR MIKE WESTON：（經傳譯員）有幾個小組喺度嘅，主要就係安全方面嘅事項嘅小組，有工程嘅小組，安全小組其實就係所有巴士公司都有參與嘅，有陣時嗰啲董事經理或者係一啲總監或者係喺安全方面嘅負責人係會有參與嘅。亦都係大家討論一啲安全嘅問題，個論壇亦都係等巴士公司可以大家分享一啲嘅汲取嘅--交通事故所汲取嘅教訓。

我知道巴士公司其實就係好關注呢方面嘅問題嘅，如果一間公司係有一啲嘅事故，係做過深入嘅調查，係查出嗰個實際嘅底因，其他嘅巴士營運者亦都

係可以從呢個調查當中嘅結果係得出一啲嘅經驗，可能未必係完全適用嘅，有時都係會適用嘅。如果營運者同埋運輸局唔分享呢啲咁樣嘅結果，就係未必咁好嘅，所以呢個論壇其實就會係分享嗰個調查嘅結果。

主席：（經傳譯員）譬如話係有一啲事件就係巴士司機就冇係拉手掣嘅，釀成一啲嘅後果，呢啲喺呢個論壇就可以分享，確保唔會有類似事件發生，係咪呢？

MR MIKE WESTON：（經傳譯員）係，主席你都提到呢個事故，就係有個車長就係處理嗰個嘅輪椅嘅斜度，佢就係嗌咗工程師嚟，工程師就係處理嗰個問題，但係司機就係處理當中冇拉手掣，車就郁，最終個工程師就係冇咗命添嘅。其實就我哋會有一個嘅警告，就話巴士車長離開佢座位嘅時候，就要確保係一定要拉咗手掣先可以離開嘅咁，其實呢個運輸局嗰個嘅安全標準亦都會包括呢方面嘅環節嘅，就有一個鎖咁樣。

但係呢個係一個好好嘅例子，就係呢類咁樣嘅教訓其實大家巴士公司、巴士營運者係可以分享嘅。就有啲公司就係可能有一啲嘅資料同大家就係互相分享，大家可以汲取一個教訓嘅。

而工程嗰個小組就係有一啲工程嘅總監就係參與，佢哋係分享一啲嘅維修、保養方面嘅事項，好多時營運者都係會面對類似嘅巴士嘅車種，佢哋有一個好好嘅機會等佢哋係有新嘅車加入車隊嘅時候，佢哋可以分開啲保養、維修嘅一啲經驗，呢啲嘅論壇就大家互相合作、互相係分享一啲最好嘅做法。

主席：（經傳譯員）佢哋係幾耐開一次會㗎？

MR MIKE WESTON：（經傳譯員）同嗰個主要嘅論壇個時間差唔多，其實有最主要嘅一個訊息就係巴士嘅巴士營運者其實係好樂意大家互相合作嚟到處理一啲非競爭性嘅一啲問題，譬如話係安全，為咗整體嘅大局嚟到去分享一啲嘅經驗咁樣，所以呢度大家互相係會合作嘅，喺呢方面。

主席：（經傳譯員）除咗巴士公司嘅代表同埋運輸局之外，呢啲咁樣嘅論壇、會議會唔會係有巴士車長嘅參與或者係工會嘅參與呢？

MR MIKE WESTON：（經傳譯員）唔會嘅，其實係有--亦係兩方面嘅溝通嘅渠道嚟嘅，倫敦運輸局--即係倫敦就係有一個嘅工會就代表九成五嘅巴士車長嘅，所以我哋係會同工會諮詢、溝通，呢個比較容易，因為只係有一個嘅工會係進行溝通咁樣。

運輸局都係同工會的確有定期嘅會議嘅，嚟到討論一啲一般嘅關注嘅事項。譬如話佢哋係會分享一啲巴士安全標準嘅一啲嘅諗法，呢個就視乎巴士公司睇下點樣處理佢哋嘅當地嘅工會，所以呢個係有兩層嘅做法嘅，喺處理工會嗰方面。我哋有一個正式嘅討論磋商嘅公司層面嘅渠道，就唔係呢一個倫敦運輸局嘅渠道。

MR DUNCAN：（經傳譯員）呢個論壇幾時成立㗎？

MR MIKE WESTON：（經傳譯員）呢個問得好好，起碼十五年前成立嘅。我做主席都有五、六年，就有不同嘅程序嘅，呢個亦都係經得起時間嘅考驗，亦都係好有用，係好有信譽，否則嘅話，嗰個論壇同埋小組亦都唔會係繼續存在嘅。

MR DUNCAN：（經傳譯員）呢個係咪某一個事件之後成立呢，還是係你哋主動嚟到去成立嘅呢？

MR MIKE WESTON：（經傳譯員）如果記得嘅話，應該係主動成立嘅，我相信應該係喺私有化之後，當時就有個睇法，就話應該大家聚埋一齊嚟到去討論呢啲共同關注嘅事項咁樣嘅。

MR DUNCAN：（經傳譯員）或者我想請你睇 Stanley 教授嗰份嘅報告，就係 94 頁，94 頁 5.3 段，就話其他事項嘅結論咁樣，佢提到就話「鑑於有關嘅討論，作者建議香港考慮嘅主要事項，嚟到去改善工作、駕駛或者係休息嘅規定，同埋係使用技術」，佢就特別提到第 6 項嘅，「成立一個巴士安全嘅常設委員會，起碼一年開兩次會嚟到去檢討評估最新嘅科技，係對巴士安全有影響嘅，特別係對一啲巴士路線嘅運作，同埋建議政府係睇下喺啲專營巴士方面點樣可以加入呢啲嘅安全嘅措施。最新嘅工作小組改善呢一個安全，就可以就係作為一個基礎，個成員可以係擴大到去加入巴士嘅營運者。」咁樣。

個問題就係倫敦有冇一啲嘅組織，一啲嘅小組，其實佢哋係符合到教授所講嘅一啲嘅常設委員會嘅要求呢？譬如話呢個常設委員會可以檢討個最新嘅科技，可以將呢啲安全嘅措施係納入去個車隊入面，倫敦有冇類似嘅機構喺度嘅呢？

MR MIKE WESTON：（經傳譯員）倫敦嘅架構就係運輸局其實就係主導呢啲嘅安全標準嘅，佢哋就會睇嗰啲最新嘅科技，同埋跟住同巴士公司大家磋商，透過論壇，透過呢啲工作坊，咁嚟到去同佢哋磋商嘅，可以話巴士營運者嘅論壇同埋小組就可以係話類似嘅措施，教授所講嘅常設委員會係可能係闊過呢一方面嘅，嗰個成員嘅組合可能係會闊啲，但係個相應嘅機構應該係我哋倫敦嘅一啲營運者嘅論壇。

MR DUNCAN：（經傳譯員）照我理解，如果我明白你嘅答案嘅話，任何嘅喺科技方面嘅發展，主要就係倫敦運輸局係做主導嘅，然後就喺嗰個論壇喺會議上面大家討論，係咪呢？

MR MIKE WESTON：（經傳譯員）係，所有呢啲嘅營運者都係可以提出呢啲嘅建議嘅，喺論壇上面提出嘅。好多時嗰啲營運者都係會搵出呢啲咁樣嘅科技--新嘅科技，然後大家係喺論壇提出，大家可以溝通呀咁樣，其實就兩者喺當局同巴士公司之間係有互動嘅。

MR DUNCAN：（經傳譯員）或者想你睇教授嘅另一份嘅報告，...

主席：（經傳譯員）等一陣間，律師，我就想跟一跟呢方面嘅問題。舉個例，譬如話

一啲防止瞌眼瞓嘅一啲嘅工具，佢哋可能喺呢啲安全嘅論壇上面提出。倫敦嘅運輸局係可以係試行呢啲嘅做法，係咪呢？係咪可以咁樣做呢？

MR MIKE WESTON：（經傳譯員）係喇，你所講嘅一啲科技，我哋叫做 Seeing Machines，即係一啲就係有一啲嘅鏡頭就睇下個車長會唔會係瞌眼瞓咁樣，有呢啲咁樣嘅試驗，就係運輸局就覺得需要試行呢啲咁樣嘅做法，而巴士公司就話亦都係想係提供經費嚟到去試下呢啲科技係做成點，同埋啲監察嗰個嘅試驗，佢就係請呢啲巴士公司就提供部分嘅經費，就其實就我哋有一個嘅安全嘅創新基金，第一輪就係 50 萬鎊，之後就係有一啲嘅試辦。

主席：（經傳譯員）喺 2017 年 7 月，就佢哋係入標，就係 17 年尾就係批咗個標，然後就係進行嗰個試行嘅計劃？

MR MIKE WESTON：（經傳譯員）係喇。跟住就有監察同埋有關嘅試驗嘅結果就係加咗入去嗰個嘅安全標準入面。

主席：（經傳譯員）呢個 10 月係有匯報嘅，個成功與否就會係 10 月匯報？

MR MIKE WESTON：（經傳譯員）係喇，10 月 16 號就會有匯報，運輸局係會有一個嘅事項等供應商同埋巴士公司就宣布佢哋嗰個安全標準嘅水準，唔單只係咁，仲有就係將營運者嗰個嘅結果--試行嘅結果係將佢入納入去嗰個計劃入面。

主席：（經傳譯員）運輸局就係會出錢，係提供經費，即係其中一個角色就係試行呢啲安全嘅設施安全嘅設備，係咪呢？

MR MIKE WESTON：（經傳譯員）係喇，同埋就係幫營運者係制定一啲嘅方法嚟到去監察嗰個嘅進度嘅，喺試行呢啲新嘅科技嗰方面就可以請--好容易請供應商就安裝呢啲設備，但係最緊要就係我哋要監察嗰個嘅進度，睇下係咪有效益嘅同埋係取得一定嘅成效，而先至係證明係物有所值嘅。喺過去亦都係有一啲嘅試行，但係就冇監察，咁好難就確定到有關嘅科技係咪成功嘅。

主席：（經傳譯員）喺倫敦運輸局嗰度，邊個單位係協助呢啲巴士公司係取得經費嚟到去做試驗？

MR MIKE WESTON：（經傳譯員）倫敦運輸局喺 2015 年所做嘅就係成立一個專責嘅隊伍係集中睇呢個巴士安全嘅計劃，呢個係有運輸局嗰個道路安全小組嗰度調咗一啲人手過嚟，等佢哋係改善專門改善巴士嘅安全同埋係推行呢一個嘅巴士安全計劃嘅，所以當時係有一隊嘅專門隊伍，係有兩、三人係專門係負責處理呢一方面嘅工作嘅，同埋係促進呢個巴士安全。

主席：（經傳譯員）具體嚟講，佢哋點樣係提供協助同埋確保係有關嘅監察係做得妥當呢？

MR MIKE WESTON：（經傳譯員）係喇，其實做幾樣嘢嘅，佢哋就會幫巴士公司係

制定呢一個嘅架構，同埋亦都有一啲外部嘅一啲顧問，我哋叫 TRL，就做呢一啲嘅監察嘅工作，就等...

主席：（經傳譯員）TRL 係咩嘢意思呀？運輸嘅研究，係咪呀？

MR MIKE WESTON：（經傳譯員）係喇，運輸研究嘅實驗室，佢哋係做一啲嘅運輸嘅研究，特別係睇嗰啲意外或者係一啲撞車嘅情況，後來就幾年前就將佢係私有化咗，可以話係一個顧問公司，專門就係處理呢啲交通運輸技術上嘅分析、評估嘅工作嘅。

主席：（經傳譯員）巴士公司就係得到呢啲協助，然後進行呢啲試驗，係咪？

MR MIKE WESTON：（經傳譯員）係喇，其實運輸局就係睇呢啲不同嘅科技嗰個優點。

主席：（經傳譯員）呢啲實驗所就係亦都提供協助，係咪呀？喺呢個研究方面？

MR MIKE WESTON：（經傳譯員）係喇。

主席：（經傳譯員）2015年...

MR MIKE WESTON：（經傳譯員）當時2015年--16年初都係咁樣做嘅。

主席：（經傳譯員）16年就遞交報告，係咪？

MR MIKE WESTON：（經傳譯員）係嘅。

主席：（經傳譯員）個報告係喺文件夾入面有冇㗎？鄧律師。

MR DUNCAN：（經傳譯員）係有嘅，喺 SEC-1--SEC-3。唔好意思，應該喺 MISC-3嘅，MISC-3嘅，應該係1002頁。

主席：（經傳譯員）我哋喺呢個報告睇到1003頁，係2016年11月係有發表同埋修改嘅，好清楚喺呢個報告講，就係2015年6月就開始去試驗嘅？

MR MIKE WESTON：（經傳譯員）冇錯，喺2015年6月、7月嘅時候，呢兩個嘅--呢個特別嘅巴士路線，我哋就收集一啲數據，然後嗰個研究實驗室，就會睇番倫敦中心區同埋倫敦以外，就係19號同埋294號，然後係喺2015年6月嘅時候就做一啲嘅數據收集，因為需要啲時間等嗰啲嘅科技慢慢係可以係應用到出嚟，同埋有啲校正嘅工作，所以喺2015年會有啲少少嘅問題，喺2015年9月就係收集咗19號路線嘅數據，而係2016年我哋收集咗486號路線嘅數據嘅。

主席：（經傳譯員）邊間公司係 Go-Ahead 公司係有參與嘅？

MR MIKE WESTON：（經傳譯員）486嗰個路線嘅試驗。

主席：（經傳譯員）John Trayner 就當其時係董事總經理，喺 Go-Ahead，我喺倫敦，我有見過佢，係咪？

MR MIKE WESTON：（經傳譯員）係呀。

主席：（經傳譯員）你可唔可以幫我哋去明白倫敦運輸局同埋 TRL，即係你哋嘅研究室，其實佢哋係扮演嘅咩嘢角色呢，特別喺監察呢一個嘅計劃之中？

MR MIKE WESTON：（經傳譯員）運輸局就係委託就係做呢一個智能車速輔助系統嘅科技同埋做相關嘅試驗計劃，同埋係搞清楚究竟呢個科技係做乜嘢嘢，就係關於呢個數碼地圖，然後呢個巴士佢又裝置呢個系統嘅時候，就會令到呢個成個車速可以係限制嘅，換句話嚟講，就係會令到司機係唔會超速，亦都令到佢個剎車嗰個功能係可以停止嘅，亦都唔可以加速嘅，如果已經達到咗個最高上限。

呢個係倫敦運輸局資助嘅計劃，亦都係請我哋嘅研究中心去監察，呢個巴士公司亦都可以從佢哋自己嘅觀察同埋巴士車長嘅回應，知道究竟有成功，我哋亦都喺之前同埋之後收集數據，睇下有幾有效，同埋有幾多嘅巴士喺呢個試驗計劃仍然都超速。

所以呢個係一個好好嘅例子，就話啲新科技係應用，亦都係一個好好嘅例子，我哋係需要有一個有效嘅監察制度，無論係推行計劃之前或者係推行計劃嘅期間，我哋都係需要去好好監察，呢個都係一個挑戰，令到我哋知道實際有咩嘢好處。運輸研究室其實都係喺呢一個科技應用之前同埋之後去監察相關嘅情況。

主席：（經傳譯員）亦都係佢哋係去製備呢一個嘅非常之完備嘅報告嘅，係咪？

MR MIKE WESTON：（經傳譯員）係。

主席：（經傳譯員）關於呢個科技，關於智能車速輔助系統或者科技，呢個科技其實就已經係存在咗好多年，係咪呢？或者係冇落實到，喺起初嘅時候可能冇落實到，但係相關嘅概念其實就已經存在咗好耐？

MR MIKE WESTON：（經傳譯員）係，冇錯。其實就一直都有呢個意念㗎喇，其實都係要睇番我哋有冇呢個數碼速度地圖嘅，但係其實今次係第一次就喺巴士嗰度應用。喺呢個試驗計劃三或者四年之前，亦都係有喺運輸局上面有裝置嘅，我亦都係有試過呢個嘅自己揸呢架車，但係其實有呢個裝置之後，我哋就好--個司機如果超速，就好難加油嘅，但係今次第一次係全面係科技喺倫敦裏面有一個試驗計劃。

主席：（經傳譯員）呢個科技係咪其實喺呢個歐盟其實都有出現過，其實有啲嘅文件，有啲嘅--都有講話有啲人係嘗試去試驗？

MR MIKE WESTON：（經傳譯員）係呀，其實喺倫敦我哋會面嘅時候，我哋都有傾過呢一點。

主席：（經傳譯員）會唔會首先係其實三、四年前其實就係呢個科技係應用喺一架車

上面嘅，我哋然後係有資金就係將呢個科技應用喺呢兩嘅巴士上面，同埋亦都後來我哋亦都出資係畀呢一個 TRL，即係呢個運輸研究中心就係去監察嘅，係咪？

MR MIKE WESTON：Yes.

主席：（經傳譯員）但係個科技其實已經係存在咗一段時間嘅？

MR MIKE WESTON：（經傳譯員）係，冇錯。關於個--其實個資金，有冇資金其實唔係個問題，其實係反而個關鍵就係個科技係咪已經成熟，喺呢一個客運交通方面，我哋一定係等緊嗰個科技成熟，其實我哋都一直都係有個資金嘅。

主席：（經傳譯員）大概嗰個資金係幾多？

MR MIKE WESTON：（經傳譯員）對唔住，我真係冇個數字。我會話其實個監察仲貴過嗰個裝置本身嘅，我懷疑其實嗰個監察其實仲貴過嗰個裝置，其實對於成個網絡嚟講，其實個裝置個費用可能唔係咁貴。

主席：（經傳譯員）但係呢個係一個嘅例子，就係話倫敦運輸局就係出資係畀呢一啲試驗計劃，而相關嘅營運商就同意參與嘅，係咪呀？

MR MIKE WESTON：（經傳譯員）係呀，呢個係一個幾好嘅例子，就係話我哋係需要有一定程度嘅評估同埋監察一啲新科技，先至有用嘅，然後我哋係需要深入嘅分析，我哋先至知道我哋係咪投資喺啱嘅科技裏面。

主席：（經傳譯員）首先係監察，然後分析，同埋制定--去寫報告嘅，係咪呀？

MR MIKE WESTON：（經傳譯員）其實呢個運輸研究中心，其實佢哋都係好獨立嘅，所以呢個獨立呢樣嘢都係好緊要，我哋係需要有一個獨立嘅研究中心幫我哋做監察同埋分析嘅，TRL--對唔住，我成日都搞錯咗，混淆咗 TFL 同埋 TRL，但係 TRL 同運輸研究中心亦都係有參與呢一個嘅最新嘅關於呢個安全標準制定嗰方面嘅，特別係喺呢個科技上面。

主席：（經傳譯員）你嘅意思係有唔同嘅裝置，譬如話向前嘅鏡頭，又或者有啲嘅鏡頭知道有個行人喺附近等等？

MR MIKE WESTON：（經傳譯員）冇錯。

主席：（經傳譯員）係呢啲方面嘅監察？

MR MIKE WESTON：（經傳譯員）同埋睇下佢嗰個成本效益係點樣，佢哋都有參與嘅。

主席：（經傳譯員）鄧律師，係。

MR DUNCAN：（經傳譯員）多謝主席。我會有個補充嘅問題嘅，關於呢個課題嘅。首先智能車速輔助或者調節系統其實係幾時倫敦運輸局開始去考慮嘅呢？你睇

番 MISC 第 3 號文件冊，第 939 頁，我哋睇唔睇到？呢個係一個報告，2009 年 12 月㗎喇，好耐之前，就係關於智能車速調節設計嘅。

去睇番第 943 頁，我哋睇到呢個係個倫敦運輸局委託嘅一個嘅研究，就係睇下司機對於呢個嘅科技嘅一啲嘅反應，同埋特別係呢一個用者個界面嗰方面究竟有啲咩嘢反應，呢度係一個研究，係 2009 年做嘅研究。

然後我哋去睇第 945 頁，呢個引言部分，呢度有講到第一段，就係呢個講「呢個智能車速嘅系統呢一個嘅軟件就係 1980 年喺法國已經開始開發㗎喇，亦都係喺唔同嘅市場係試過，亦都係能夠減低車速係有效嘅，喺 2009 年 5 月呢一個運輸局就係開展最新嘅試驗計劃，就係希望能夠減低個速度同埋減少呢個首都嘅路上嘅意外嘅。」

我喺度停一停，似乎喺呢個嘅試驗計劃唔係單單係限於就係巴士上面去使用，其他嘅車輛都係喺呢一個嘅試驗計劃裏面涵蓋嘅？

MR MIKE WESTON：（經傳譯員）係，冇錯。運輸局亦都係負責一般嘅道路安全嘅，因為其實都有好多嘅道路網絡喺倫敦，我哋有一個道路安全嘅分布係特別係負責呢方面，道路安全嘅，所以呢一個嘅就係呢度所指嘅，我都有參與其中嘅。所以呢度唔係淨係講巴士嘅，就係其他嘅車輛都係涵蓋，亦都係一般嘅道路安全嘅事項都涵蓋。

MR DUNCAN：（經傳譯員）喺引言最後一個嘅段，呢個第一年嘅計劃就係運輸局就已經開始咗，亦都想明白去睇下倫敦巴士司機佢嘅態度、佢哋有啲咩嘢誘因同埋佢哋有啲咩嘢障礙佢哋去實行呢個嘅科技，我哋睇番第 960 頁，我哋睇番個成本效益分析，喺第 960 頁，我哋睇到一系列嘅，就有一啲嘅認為可以達到嘅好處同埋啲障礙，就係話智能車速調節係科技嘅應用就係乜嘢係好處、乜嘢係障礙，呢度列咗出嚟？

MR MIKE WESTON：（經傳譯員）係嘅。

MR DUNCAN：（經傳譯員）然後我哋去睇番 1004 頁，都係同一個文件冊嘅，如果你睇到，喺呢個呢一頁裏面，2016 年 11 月係發表嘅報告，係 TRL 發表嘅，我哋係--嗰啲細節我哋自己可以睇，但係我想係特別講幾點，主席就係話一定係要有一個好仔細嘅分析，特別係成本效益分析嗰度先至得嘅。

如果我哋睇番嗰個內容，一共有八個標題嘅，第 1 個就係呢一個嘅科技係咪一個有效嘅科技去減低個速度--限制速度？第 2，呢個係咪一個有效益嘅方法呢？第 3，就係話有呢個科技嘅車輛對於周圍嘅環境有乜嘢影響？第 4，就係對於其他嘅附近嘅車輛嘅行為有咩嘢影響？第 5，就係好處同唔好處，特別對呢一個倫敦運輸局嚟講，有咩嘢好處、唔好處？

第 5.2 至到 5.13 就係有講清楚嗰啲嘅好處，第 6 項就係對於巴士營運商嚟講，ISA 係有咩嘢好處定咩嘢唔好處？第 7 題，對於巴士車長嚟講，ISA 有

咩嘢好處同唔好處？第 8 條，對於巴士乘客嚟講，呢個科技係有帶嚟咩嘢好處同埋唔好處呢？

呢個就係 TRL 係探討嘅事項，所有嘅詳情都係喺報告裏面可以睇得到，呢個報告就係提交畀倫敦運輸局嘅後來。

第 1011 頁，我哋睇到 2015 年就試驗計劃開始，主席啱啱提到，我相信應該係喺呢一個嘅係最後一段，係 2015 年就運輸局就係喺倫敦巴士就嘗試去試驗智能車速輔助系統，就用咗一個呢個 Zeta Automative Ltd.嗰個相關嘅系統嘅。

呢個就係我哋頭先提到嗰個試驗計劃，係咪呀？

MR MIKE WESTON：（經傳譯員）呢個啱啱呢兩條路線去試驗之前，其實之前嗰個試驗係一個規模非常細嘅試驗嚟嘅。

MR DUNCAN：（經傳譯員）我哋而家去 Stanley 教授嘅報告第 70 頁，你有冇睇過呢個報告嘅呢一頁？

MR MIKE WESTON：（經傳譯員）有，有，我睇過。

MR DUNCAN：（經傳譯員）喺呢版裏面，Stanley 教授就讓我哋--希望我哋留意到其實墨爾本同香港一個最主要嘅唔同，墨爾本係--我而家就節錄呢一個，喺呢一個斜字下面嗰段，就係「墨爾本就有一個獨立嘅規管者，安全監管者，喺呢一個營運嘅層面，維多利亞呢一個相關嘅安全部門就係 2010 年開始成立嘅，就喺 3.3.1 段嗰度。呢個喺佢哋做--佢做嘅角色同香港--香港就冇相類似嘅角色或者機構，佢哋就係監察專營巴士營運系統佢哋嘅--營運者佢哋嘅安全表現，亦都係推進安全嘅計劃嘅，但係喺香港就冇一個咁樣嘅獨立嘅安全嘅規管者，就令到我哋對於安全嘅關注就冇咁大。」

似乎喺墨爾本，監管者就冇監管呢一個行車安全，而相反就係--即係呢個工作就係交咗畀一個負責安全嘅獨立管理者，詳情我哋可以睇第 99 頁，就係同一份報告嚟嘅，我就想讀出屘二嗰一段，「Bus Victoria 就係一個業界嘅組織去提供支援，即係可以提供三個部分嘅支援嘅，例如 BusVic 就係提供一啲嘅範本就畀佢哋嘅會員，而呢啲範本就係同交通安全總監共同係建立嘅，而總監就係著重呢一個發展巴士業務嘅一個安全文化，同埋風險管理，而佢哋亦都係同一啲業界同埋營運商係去改善做法嘅。係有一啲指引嘅文件，包括係呢一份叫 Guidance - Safety Culture 2016 年 9 月嘅文件，而總監亦都表示佢係願意同香港分享佢哋嘅資料同埋一啲理念嘅，如果有需要嘅話。

就呢一個總監嘅獨立性就係提升咗安全，亦都係可以提供咗一個獨立問責嘅來源，亦都係提供一啲安全步驟嘅一個透明度嘅。而總結嚟講，墨爾本嘅巴士服務係安全嘅，而應該係主動去建立一個安全嘅文化同埋安全管理嘅制度，而唔係一個被動式嘅回應。」

然之後喺呢一頁嘅下面就講到「呢一個研究得出嘅主要建議，就係委員會應該係改善或者應該係喺呢一個立法嘅框架下面考慮以下嘅，就係引入一啲可以執行嘅安全指引」，同埋「建立一個獨立嘅交通安全總監職位，要求所有嘅專營巴士公司商就係必須要得到總監嘅認證，先至可以攞到呢一個牌照嘅，同埋將呢一個要求延伸到所有嘅商業車服務。」

呢一個就係墨爾本嘅情況，我哋嘅問題就係我哋需唔需要建立一個咁嘅職位呢，喺我哋嘅編制底下？

MR MIKE WESTON：（經傳譯員）呢個就好視乎本地嘅情況，無論係香港或者倫敦都好。如果你睇番倫敦運輸局同巴士公司所建立嘅一啲安全項目，或者一個關於車速方面嘅事，我並不反對一個獨立嘅安全總監嘅，因為喺英國已經係有咁樣做㗎喇。而倫敦運輸局亦都係希望英國嘅電車業都係跟住做嘅，即係就住安全方面。

但係我擔心如果喺倫敦成立呢一個職位嘅話，可能係會受到一啲阻力嘅，所以我比較擔心如果喺倫敦實施嘅話，可能喺成立呢一個監管者嘅過程之中，呢一個發展安全嘅進度可能會係受到影響，呢個只係我一個小小嘅擔憂，可能會係影響短期嘅進展，所以透過合作--即係透過而家有嘅機構互相合作，可能係會更加快得到成果嘅。

主席：（經傳譯員）如果我冇理解錯，你認為係透過專營巴士公司同埋倫敦運輸局嘅合作，係可以得到令人滿意嘅成果，係咪呀？

MR MIKE WESTON：（經傳譯員）係，係嘅，不過倫敦本身有一個具競爭性嘅投標制度，究竟呢一個模式可唔可以喺其他嘅地區度使用就係另一個問題。根據我過去嗰幾年所見，同埋呢份報告，即係倫敦巴士喺安全方面係有好大嘅改善，呢個就係--即係個背景就係佢哋用一個現有嘅架構嘅。

如果喺另一個地區，未必可以得出同樣嘅結果，但係喺倫敦嚟講，好明顯係取得好好嘅進展，同埋喺使用科技同埋制定標準方面亦都有好大嘅進展。

主席：（經傳譯員）倫敦運輸局係表示佢哋係定緊一啲世界級嘅標準，你係點睇呢？

MR MIKE WESTON：（經傳譯員）據我所知，佢哋係唯一一個為佢哋巴士車隊定立標準嘅一個監管當局，一定係會影響英國其他地方嘅機構，亦都可能係會影響到香港同埋新加坡嘅，因為製造倫敦巴士嘅供應商亦都有製造英國其他巴士，亦都係有供應巴士畀香港同新加坡嘅。所以呢啲嘅最佳做法可能係會伸延去世界其他嘅地方，所以係會有一個正面嘅影響嘅，因為呢啲製造商可能佢會想將佢哋嘅技術應用喺其他嘅地區。

主席：（經傳譯員）其中一個例子就係巴士車頭嘅設計，係咪？佢哋係會改善一個車頭，即係一個四方形嘅設計，個改善咗之後，如果畀個巴士車頭撞到，一個途人可能係會向側面係飛，而唔係向前面嘅？

MR MIKE WESTON：（經傳譯員）而下個月就會有一個新嘅設計，就係叫做將個車頭所謂令佢軟化一啲，我哋係會改變呢一個擋風玻璃，而呢一個水撥嗰個鉸就會喺上面，而唔係喺下面，因為如果喺下面嘅話，就如果撞到人嘅話，可能會令到人受傷嘅，嗰個鉸。而改善咗設計之後，如果有途人係畀架車撞到，即係係以低速去碰撞，佢可能會係被撞上呢一個行人路嘅，但係如果係以同樣車速畀一架巴士撞到，可能佢哋係會嚴重受傷嘅，所以我哋係想令到巴士車頭嘅設計係好啲，如果出現碰撞嘅情況。

呢個設計嘅費用係比呢個製造費係低好多嘅，呢一個亞歷山大丹尼斯公司冇理由就唔喺佢哋賣去其他國家嘅巴士度採用同樣嘅設計嘅，佢哋好有機會會咁樣做嘅，所以我哋可能會見到一啲良好嘅做法係延伸到去其他嘅市場。

主席：（經傳譯員）我哋講番你嘅觀察，呢個模式喺倫敦係可行嘅，呢個就係喺倫敦嘅架構底下係可行嘅，係有一個進步同埋主動嘅運輸當局，如果要喺香港取得成功，都係視乎香港嘅架構係點嘅？

MR MIKE WESTON：（經傳譯員）係嘅。我諗個問題就係邊一個模式可以最快取得成果，即係根據現有嘅架構，但係喺短期嚟講，如果我哋要定立一個--建立一個新嘅監管者，可能會影響短期嘅成果。過去幾年，即係運輸局亦都係有睇到呢個問題嘅。

主席：（經傳譯員）鄧大律師。

MR DUNCAN：（經傳譯員）多謝主席。你同 Stanley 教授，你係向委員會提供咗唔同嘅選項，點樣可以改善呢個做法，第一，就係呢一個巴士公司嘅峰會；第二，就係一個委務委員會，就係 Stanley 教授有提議過嘅，雖然喺維多利亞省就冇一個咁樣嘅架構；第三，就係一個獨立嘅交通監管者。呢啲都係供委員會參考嘅，你同唔同意？

MR MIKE WESTON：（經傳譯員）係，呢個巴士營運商峰會同埋常務委員會之間嘅個分別可能只係文字上嘅分別啫，可能係同一件事嚟嘅，喺實際嚟講。我諗另一個問題就係呢個委員會如果有一啲第三方參與，譬如話係警方，會唔會佢哋--即係可以幫助到佢哋嘅工作呢。

MR DUNCAN：（經傳譯員）你應該係會聽過 ISO 標準，就係特別係 ISO 39001，呢一項嘅標準對倫敦嘅整個巴士系統係有冇影響呢？

MR MIKE WESTON：（經傳譯員）喺呢個工程嘅標準係會符合呢個 ISO 嘅標準嘅，但係我唔知係咪同一個號碼或者有另外一個編號嘅。倫敦有一啲巴士公司係有 ISO 認證嘅，喺佢哋業務嘅某啲方面。但係倫敦運輸局就係冇要求任何巴士公司係要有 ISO 認證，但係我相信佢哋嘅喺工程方面係得到一啲 ISO 認證，但係我唔知道嗰啲標準係咪一樣。

MR DUNCAN：（經傳譯員）我想你睇第 146 頁，係你報告嘅一部分，你就詳細提到

呢個巴士安全計劃，第146頁就講，「喺2016年嘅2月，倫敦運輸局為咗回應公眾同埋持份者嘅施壓，佢就開展咗一個巴士安全計劃，而主要嘅元素就係以下嘅」，我哋見到呢一個核心嘅元素就係喺左面嗰一欄，而右面嗰一欄就係一啲最近新加嘅元素，我哋頭先都講到呢個問題，我亦都問過你究竟呢一個巴士安全計劃係籌備咗幾耐呢？

MR MIKE WESTON：（經傳譯員）唔係好耐嘅啫。點解我會知道呢？因為我16年2月我仍然係即係喺倫敦運輸局嘅一部分，我係有份係開展呢個計劃嘅，個背景就係安全並唔係一個首要嘅考慮，而巴士營運商嘅峰會亦都冇係著重呢個安全。

當時公眾施加嘅壓力係越嚟越大，其中一個原因就係倫敦運輸局就喺發布呢個交數據嘅時候係更加高透明度，而有一啲嘅持份者，包括係公眾，佢係涉及喺一啲嚴重嘅巴士意外嘅，所以呢個機構係受到好大嘅壓力要改善安全。所以呢個巴士安全計劃就係希望係納入唔同嘅元素。

以前可能有一啲嘅措施，但係就並冇一個整合嘅計劃，所以喺2016年2月就開展咗呢項計劃，令到我哋可以更加有系統咁樣推展呢啲工作嘅。

MR DUNCAN：（經傳譯員）當時有幾多人係負責設計呢個計劃嘅呢？

MR MIKE WESTON：（經傳譯員）大概兩至三個人，只係一個好細嘅團隊嘅啫。係由喺呢個巴士安全小組入面兩至三個人係設計嘅。

MR DUNCAN：（經傳譯員）呢個計劃係包括一啲主動吖，還是一啲被動嘅措施？

MR MIKE WESTON：（經傳譯員）呢個計劃並唔係係為咗回應某一個嘅事件或者意外，其實純粹係一個自然嘅進展，個目標就係去重新係聚焦喺呢個安全嘅。我好清楚巴士公司同埋倫敦運輸局一直都係好著重安全嘅，呢個計劃係純粹係令到呢一個問題更加聚焦，令到工作更加有方向，但係呢個計劃並唔係由某一個事件引起嘅，但係係為咗回應一個公眾嘅訴求，包括係踩單車嘅人，因為係越嚟越多人喺倫敦踩單車，亦都係佢哋涉及一啲嚴重嘅交通意外，所以市民係期望運輸局係拓展佢哋嘅工作，但係之前其實好多工作已經做緊，只不過就唔係喺一個好整合嘅方式去進行。

MR DUNCAN：（經傳譯員）我想你睇下第148頁嘅，呢度特別係講到一個巴士安全嘅標準，第一段有介紹過，「巴士安全計劃嘅一個主要嘅成果就係發展一個新嘅巴士安全標準，喺2016年開始，倫敦運輸局已經係同呢一個道路安全顧問TRL Loughborough University、一啲巴士公司同埋發展商係去評核同埋建議一啲未來巴士設計應該有嘅一啲設計特點去改善安全嘅。」

而第二段就講到「有幾項嘅潛在嘅科技，包括係智能車速輔助、一啲自動剎掣、一啲巴士嘅固定裝置、一個防止誤踏油門、一個鏡面嘅設計同埋巴士車頭嘅防撞保護等等，亦都係有考慮到各項嘅成本同埋好處，同埋亦都係想喺財

務投資同埋係減低意外方面取得一個平衡嘅，亦都有提到一個智能嘅車速輔助系統。」

跟住就係巴士安全標準嘅第一階段，就係喺18年10月16號宣布嘅，正話都講過，就話有三個嘅階段，「儘管而家預計個標準就適用於新嘅巴士（就一年大概有七百部），對於現時嘅巴士車隊都係會加裝呢啲設備嘅，作為一個中期翻新嘅計劃嚟到去加裝，大概需要就係七年嗰就加裝㗎喇。運輸局其實就係採取一個好嚴謹嘅態度嚟到睇不同嘅選項嘅，佢哋就會用成本嘅效益嘅分析嚟到去睇每一個嘅選項，確保就係每一鎊使出嚟都係物有所值，同埋可以係減低嗰個傷亡嘅數字。」

巴士嘅安全帶就冇預計就係喺呢一個安全標準嘅一部分咁樣，你就話「冇預計有安全帶」，其實呢個係咪經過一個好嚴謹嘅成本效益嘅分析，然後先至係作出呢個結論嘅呢？

MR MIKE WESTON：（經傳譯員）我諗喺同呢個運輸局傾呢個巴士安全嘅時候，好顯然佢哋冇係諗到呢一個安全帶係作為一個嘅安全嘅措施，佢哋嘅睇法就係佢哋知道個成本係點樣，同埋就相對於其他嘅選項嗰個嘅效益係點樣，我唔會話佢哋覺得係冇用，但係顯然喺佢哋嘅諗法入面就冇諗到呢一個安全帶係作為一個安全嘅標準咁樣，呢個當時就係8月嘅時候，當時冇考慮到呢個安全帶嘅。

主席：（經傳譯員）鄧律師嘅問題就係話係咪冇考慮到係--係咪經過嚴謹嘅考慮，然後先至唔採納呢一個嘅做法呢？係咪將來都唔會咁樣考慮呢個做法呢？

MR MIKE WESTON：（經傳譯員）我哋嘅印象就係佢哋唔會考慮嘅。

主席：（經傳譯員）唔會睇？

MR MIKE WESTON：（經傳譯員）唔會睇。

MR DUNCAN：（經傳譯員）如果你睇134頁，你喺你藍色嗰部分就係引述呢個運輸署嗰個嘅指引，講到目前嘅安全帶，即係巴士安全帶嗰個嘅情況咁樣嘅，呢個係咪運輸署嘅指引？

MR MIKE WESTON：（經傳譯員）係喇，藍色就係直接係轉載呢一個嘅指引嘅。

MR DUNCAN：（經傳譯員）我會帶你睇一睇呢一方面，我哋會睇香港嗰個情況，即係而家嘅建議係點樣，「一般嘅規定，係2001年10月1號以嚟，每一個向前或者向後嘅座位都係需要有呢啲嘅安全帶裝置嘅，用一個批准同埋係妥善安裝嘅安全帶就可以防止死亡同埋嚴重受傷嘅，唔單只就可以係將個乘客綁住喺度，同時亦都係防止啲乘客彈出嚟，特別係反車嘅情況。

唯一嘅例外就係某一啲嘅車可能係市區用嘅，係有企位嘅乘客嘅，對於短途嘅情況，就係有呢啲咁樣嘅豁免，喺時間又短，距離亦都短嘅，速度亦都唔快嘅，儘管我哋知道對於安全帶安裝方面，嗰個營運者係可以選擇邊類嘅車種

係安裝安全帶嚟到提供呢啲服務。」呢個就係運輸署嘅指引嚟嘅。

主席：（經傳譯員）為咗記錄，運輸署就係 2010 年 5 月嘅時候亦都係有一啲嘅文獻就係講到巴士安全帶嘅情況嘅。

MR DUNCAN：（經傳譯員）係喇，主席亦都提供呢方面，亦都文件夾亦都有嘅。而家喺螢光幕上面都有打出嚟㗎喇。

主席：（經傳譯員）有冇編號㗎？

MR DUNCAN：（經傳譯員）MISC-3 嘅，1274 頁。講到香港嘅情況，係巴士安全帶嗰方面，我想你係--我啱啱想講就話歷史，或者係對呢個問題嘅不同嘅考慮因素，我跟住就想請你表達下啲個人嘅意見。

首先我就想睇一睇 SEC-3 1310 頁，呢一份文件係環境運輸局所發出嘅，呢個係 2006 年嘅時候係寫嘅呢份文件，份文件就係畀立法會嘅運輸事務委員會，係講到呢一個專營巴士嘅安全嘅問題嘅，喺 1315 頁嗰度，你可以睇到個標題，就係專營巴士嘅安全帶。

第 18 段，「根據道路交通安全設備規例，司機係硬性規定係需要提供安全帶，其實就係百分之三十四冇遮擋嘅座位都係有安全帶嘅，而呢個所有嘅專營巴士嘅經營者都係需要承擔新巴士係要喺啲冇遮擋嘅座位嗰度就係安裝安全帶嘅。鑑於最近嘅交通意外，運輸署同專營巴士經營者就係檢討個情況，睇下現時巴士車隊入面係加裝安全帶，佢哋就會考慮嗰個技術問題，譬如話係座位係咪結構上係強而有力同埋係咪有一啲嘅鞏固點。

同時亦都係有研究做過海外嘅做法，有啲就睇嚟，就冇一啲嘅海外國家就係規定安裝安全帶就係喺一啲市區使用或者係有企位嘅巴士上面係安裝嘅。

由於上述，我哋認為要引進強制規定安裝同埋係配戴安全帶，即係專營巴士上面，呢個係唔合適嘅。」

目前就住運輸署嗰方面個情況就係咁樣，嘅立場，當時就係 2006 年嘅。

或者我哋想睇 SEC-3，1323 頁，呢份文件就係立法會運輸事務委員會嘅，同一個事務委員會，個標題就係講到提升專營巴士運作安全嘅措施嘅進度。

1329 頁，我哋睇到呢個係 2007 年所發表嘅一份文件，當時係 1 月。

我哋睇 1323 頁，有個副標題就係喺專營巴士上面加裝安全帶，第 3 段，呢度就匯報番有關加裝安全帶嗰個嘅情況。

或者請大家睇第 4 段，「我哋從其他國家係關於加裝安全帶嘅情況，到目前為止，我哋搵唔到一啲國家佢哋係有一啲法律嘅規定就係話喺市區使用嘅巴士同埋係有企位嘅巴士上面就安裝或者使用一啲安全帶嘅。」

「所以專營巴士佢哋係同意係完成個改裝工程喺上層嗰度係安裝一啲強化玻璃嘅擋風玻璃」咁樣，但係呢個就係 2008 年--即係 2007 年，當時就係對於嗰個加裝安全帶係冇任何嘅轉變嘅。

另一個事項係我想提嘅就係 TD-1 94，運輸署嘅第 1 沓文件嘅第 94 頁，個標題就係 TD 文件 08，係喺專營巴士上面應用新嘅裝置同埋科技嘅，你或者睇 107 頁...

主席：（經傳譯員）呢個係運輸署今年 4 月提交嘅文件，係咪？

MR DUNCAN：（經傳譯員）係嘅，主席。我哋由 07 年而家係去 2018 年，Weston 先生，呢個唔係交畀立法會嘅文件，呢份文件其實係運輸署提交畀委員會，協助委員會嚟到去進行佢嘅工作嘅。

或者我想請你注意第 94 頁，你睇到就係第 4 段，「跟進番牽涉專營巴士嘅嚴重嘅意外，即係九巴大埔嘅事件，牽涉到若干人死亡嘅，呢個就係 18 年 2 月，跟住就係成立咗一個委員會就亦都係有牽涉專營巴士公司同埋巴士製造商，喺 2018 年 3 月中就檢討安裝一啲新嘅安全裝置或者係應用一啲新嘅安全技術嗰個嘅技術可行性嚟嚟到去提升巴士乘客嘅安全保障嘅。有關嘅討論嘅結果同埋係工作小組嘅建議，係已經開列咗喺下面嘅段落當中。」

你睇到就係成立呢一個工作小組嘅原因就係因為大埔嗰度發生交通意外，巴士嘅意外，第 7 段，報告嘅第 7 段，嗰度有講，就係對於所有乘客座位安裝安全帶嘅，第 5 段先，「鑑於 06 年 7 月嘅意外，當時九巴就同一輛車輛係相撞，就喺雙層巴士上層嗰度有乘客被拋出」，「運輸署就建議，而巴士公司係同意就係應該喺四個上層嘅前面座椅嗰度係加裝安全帶嘅嘅，呢啲就係 97 年之後發牌嘅巴士就防止巴士乘客就係跌出嚟嘅，目前，淨係一啲冇遮擋嘅座椅先至係需要加裝安全帶，呢個係標準嘅做法。」

第 7 段，「至於話對於所有座椅安裝安全帶，三間嘅雙層巴士製造商就確定技術係可行嘅，如果係經營者係要求嘅話，佢哋可以喺新嘅巴士對所有座椅係安裝安全帶，係符合上述所講嘅國際標準嘅；同樣，所有專營巴士嘅經營者指出就話佢哋同意係將呢一個嘅要求係納入去喺採購新巴士嘅安排當中。」

「至於話現行巴士加裝安全帶，製造商表達關注就話喺地面嘅結構就冇咁樣嘅設計就未必能夠安裝起嚟，符合國際嘅標準，係要符合呢個規定，係加固呢一個嘅地台嘅結構同埋係取代或者更換而家嘅巴士座椅。製造商亦都確定就係技術上係可以喺所有嘅上層嘅座椅係加裝安全帶，而佢係一定係某個年份製造先至得嘅，佢哋就會係就住呢個可行性做出研究嘅，同埋就係對於呢啲專營公司嘅巴士睇下係咪適合安裝呢啲安全帶。根據運輸署嘅了解，加裝安全帶係牽涉到重大嘅改裝，包括呢個專營巴士嗰個嘅結構同埋係更換所有嘅座椅，同埋係進行一啲拉力嘅測試，嚟到確定係咪符合國際標準等等。加裝安全帶同埋測試嘅工作係需要好長嘅時間嚟到去完成嘅，因此亦都影響巴士嗰個嘅出車率同埋有關嘅運作嘅。專營巴士公司經營者係會進一步研究有關嘅建議嘅。」

呢個就係 2018 年 4 月嘅情況，呢個就係運輸署提供畀委員會嘅報告。而家係已經 1 點鐘，或者可能就喺午膳時間我就會繼續。

主席：（經傳譯員）好，Weston 先生，我哋而家就會係午膳，所以我請鄧律師，你會唔會話畀我哋聽你需要再多幾多時間呢？我哋知道其實我就自己都問咗好多問題，所以亦都令到成個時間長咗。

MR DUNCAN：（經傳譯員）多謝主席。你亦都冇打擾到我哋嘅，我哋其實個進展都相當良好嘅。我相信就三點半應該可以完，如果唔得嘅時候，就起碼都係 4 點之前可以完。

主席：（經傳譯員）我哋而家係午膳，兩點半先至再返嚟。唔該晒。

下午 1 時 01 分押聆訊押後

下午 2 時 30 分恢復聆訊

出席人士如前。

主席：（經傳譯員）午安。係，鄧律師，唔該。

MR DUNCAN：（經傳譯員）多謝主席。Weston 先生，午安。喺午膳之前，我就睇過一份文件，2018 年 4 月嘅文件，係一個運輸署嘅文件，文件編號係 8 號，而家就請你睇另外一份文件，就係返番去時序再較早之前嘅事件，係 2018 年 3 月，係 KMB-12 號文件冊，4869-1。

喺呢頁上面，你睇到呢個嘅標題就係「專營巴士安全改善工作小組」，呢個係 2018 年 3 月 13 號嘅會議嘅記錄，係 3 點鐘舉行，而跟住就有一啲出席者嘅名單。去到 4869-6，呢度就係講裝置安全帶，呢度嘅資料就係有另外一個方法係去總結，然後係提供畀委員會，啱啱喺呢個 TD-08 嘅文件嗰度有展示出嚟嘅，喺食飯之前。我而家想做嘅就係就請你去到第 4869-9，就呢度講到佢個職責或者工作範圍，就係呢個工作小組嘅工作範圍。

呢個佢哋嘅工作範圍，工作小組自行制定佢嘅工作範圍，呢度係羅列咗出嚟，4869，就至到去橫劃第 9，第(2)同埋第(3)項，或者我讀出嚟，就第(2)項就係話「去檢視個技術可行性呢一個嘅成本效益，同埋適用性同埋其他嘅方面，就係話關於除咗係呢個會暴露嘅座位之外，係其他巴士所有座位都裝置安全帶嘅，呢個講緊就係話技術可行性、成本效益同埋適用性就同埋係裝置呢啲咁樣嘅裝置嘅安全設施，譬如話係呢個車速顯示器，同埋呢一個嘅電子穩定控制，就係全球定位系統呢一個速度限制同埋呢一個速度限制器，就係每小時 70

公里，同埋防撞同埋呢一個保持行車線嘅裝置，同埋就係監察呢個巴士車長嘅情況，包括究竟佢有冇係瞌眼瞓。」咁樣。

你今朝早就話畀我哋聽，喺你嘅證供裏面，亦都喺你個報告亦都有提到嘅，就係話關於安全嘅措施，譬如係喺倫敦巴士嚟講，其實一方面你好謹慎去睇嗰個成本，但係另一方面亦都好睇嗰個效益，就喺引入啲措施之前會咁樣去做。

所以我就想問下你嘅意見，就係話三個月，4869-11 嘅，呢度講嘅就係話喺檢討之後，就係會有一個啲建議，就係三個月之內去提交嘅。你覺得三個月係夠定唔夠呢？就去好小心、好謹慎睇嗰個成本同埋個效益，就頭先我哋睇到喺個工作範圍之中，有一系列嘅安全裝置，你覺得夠唔夠？

MR MIKE WESTON：（經傳譯員）喺倫敦嗰個情況，首先就係關於我哋喺今朝早講嗰個智能車速輔助系統，我哋之前同埋之後我哋都要收集數據，呢個係一個嘅經驗，同埋就係話我哋用咗幾多時間就係倫敦運輸局就係做嗰個巴士安全嘅計劃，2016 年開始嘅，但係我哋下一個月先至係 2018 年先至講第一期點樣做，2019 年先至落實嘅。所以你可以話倫敦運輸局用咗太多時間去考慮、去討論呢啲咁嘅建議嘅，就其實我哋可以做快啲嘅。

但係試驗計劃裏面嘅數據，你係需要有一少部分嘅巴士就係用好長時間去試，又或者好多巴士用比較少嘅時間去試，先至有足夠嘅數據。當然，理論上你可以喺三個月之內係做個試驗計劃，但係如果我哋真係需要好謹慎去睇呢啲嘅數據嘅時候，你就係要做--就係多啲時間，或者你需要更加嘅樣本嘅巴士先至做得到，所以三個月好似係太少，喺倫敦嚟講，嗰啲人，當然有人會講話倫敦運輸局係可能要做快啲都未定，但係我哋亦都要平衡嘅。

主席：（經傳譯員）關於呢個智能車速輔助系統喺倫敦就係有兩個路線係試驗嘅，係咪牽涉到都有好多部嘅巴士呢？

MR MIKE WESTON：（經傳譯員）我其實就唔係好記得，19 號其實都係條大線嚟嘅，可能係三十、四十，但係 486 就應該係少啲嘅。三個月如果你假設對我哋嚟講，如果我哋真係冇去延誤嘅說話，其實真係太過快，太短喇時間，即係要去試咁多、咁多唔同嘅選項。

MR DUNCAN：（經傳譯員）唔該晒。而家我就想去睇一睇 4 月。

主席：（經傳譯員）喺做呢個之前，呢個係 3 月 13 號嘅議程，就係講話呢個嘅報告會係喺三個月之內提交畀運輸署署長，但係其實已經係過咗六個月，最終嘅報告都仲未提交嘅，就畀你知道。

MR MIKE WESTON：（經傳譯員）我覺得就三個月就太過有野心喇，如果咁樣做。

主席：（經傳譯員）鄧律師，或者有另外一件事我都想提一提嘅，喺立法會係有個會議嘅，就係同呢個工作小組有關，係 2 月 15 號，你會唔會喺某個階段，你都會

講一講呢一點呢？因為佢哋就通過咗三個動議嘅。

MR DUNCAN：（經傳譯員）係，我係...

主席：（經傳譯員）因為可能你都要提一提，因為會話到畀我哋聽個背景點解運輸署係要考慮佢哋喺工作小組裏面要考慮嘅事項。

MR DUNCAN：（經傳譯員）我就想希望按住時序去睇啲事件嘅，喺 SEC-3 嘅文件冊嗰度會見到嘅，第 1342 頁，喺呢一頁上面，Weston 先生你見到就係喺立法會嘅運輸事務委員會佢哋嘅會議，就係 2018 年 2 月 15 號嘅會議嘅會議記錄，就係工作小組第一次會議之前，嗰個會議就係喺 3 月舉行嘅，我哋頭先睇到。1359 頁--請畀少少時間我。

主席：（經傳譯員）好呀，你慢慢。其中有一段就係第 3 段嚟，第 3 段，1360 頁嘅，其中一個動議裏面就係話裏面列出咗呢一個委員會--立法局委員會就係促請政府係去考慮同埋探討一系列嘅措施。

MR DUNCAN：（經傳譯員）喺第 1356 頁，我哋就會睇到究竟呢個動議係點樣嚟㗎喇。有討論到就話有啲咩嘢措施可以加強巴士安全，係第 59 頁講，就係「副主席就係建議係減低巴士意外裏面嘅傷亡數字，所有嘅專營巴士公司就應該係考慮係喺所有嘅巴士上面嘅座位係加裝安全帶，可以分期咁樣做，陸頌雄先生就係話佢話喺龍運巴士公司嘅時候，其實係所有嘅巴士係有好多--全部都有安全帶，但係點解而家冇呢咁樣。

呢個運輸署署長就係話喺呢個新嘅巴士--喺 2003 年購置嘅巴士係一啲冇遮擋嘅位置嘅時候都有安全帶，但係 2007 年一個嘅意外之後，巴士公司就係已經同意咗運輸署嘅要求，就係話冇遮擋嘅位置同埋喺上層嘅前面都應該係有安全帶嘅，呢個運輸署同埋其他嘅巴士公司，包括九巴，都會係會係積極考慮去睇下可唔可以加裝所有嘅座位都有安全帶，呢個董事總經理九巴就話佢對呢個持開放態度，佢亦都會同運輸署去傾呢樣嘢。運輸署答陸仲雄先生嘅問題嘅時候，就係話佢哋曾經龍運就係所有巴士裏面嘅座位都有安全帶，但係因為太少嗰個用--使用率太低，所以佢哋就冇喇，而家。

毛議員--毛孟靜議員就係話其實有一啲嘅專家就話即使有呢個安全帶，亦都未必可以減低傷亡數字嘅，佢亦都好關注如果即使所有座位都有呢一個嘅安全帶，有冇困難就係要求所有嘅乘客都係去戴上呢；佢亦都就係會問下會唔會係做一個公眾諮詢。運輸署署長就話政府當局係喺呢方面係持開放態度嘅，但係除咗話呢一個技術嘅可行性，究竟乘客是否接受呢樣嘢都係應該要考慮嘅，佢會係喺一個月之後，呢個九巴就會係提交一個調查報告，佢亦都會係睇番個調查報告，然後先至去決定或者考慮使唔使去裝置一個安全帶。」

喺 1359 頁，喺第 77 頁，「個主席就係話佢亦都係收到三個嘅動議，佢認為呢啲嘅動議同嗰個議程係有關嘅，而委員都係同意處理呢啲動議嘅。」

陳克勤先生就係動議人，呢個動議。喺 1360 頁就係有英文嘅翻譯嘅，呢個第 3 段就講，就係「探討有啲咩嘢方法，點可以改善巴士嘅安全，包括就係一啲高風險嘅座位亦都係增加個保護裝置，係喺更多嘅座位上面係加裝安全帶，同埋係分期係強制乘客應該係戴安全帶，同埋係喺巴士司機嘅外面係裝置一個嘅外置嘅攝錄機，同埋係改裝呢一個限速器，去確保喺一個高風險嘅道路上面有係安全嘅行車嘅。」

所以你睇到立法會嘅呢一個動議就喺工作小組嘅第一次會議之前就舉行嘅，所以都係有提到一啲譬如話係裝置安全帶嘅一啲好處同埋難處嘅。

MR MIKE WESTON：Yes.

MR DUNCAN：（經傳譯員）然後我就想跟住時序，我哋就睇番工作小組第二次會議嘅會議記錄，呢個係 KMB-12 4887-1。

主席：（經傳譯員）呢個係 2018 年 4 月 23？

MR DUNCAN：（經傳譯員）係，冇錯，呢個係 2018 年 4 月 23 號嘅會議，呢啲係個會議記錄，相關嘅部分就喺 4887-5 頁，就去睇我哋呢啲嘅「巴士嘅營運者佢哋就同呢一個製造商睇下有冇辦法、有冇可行性可唔可以係喺座位上面係安裝安全帶，佢哋就會呢個都係可以，係有啲新嘅巴士去購買嘅時候就係可以裝置安全帶嘅，九巴同埋龍運就話會差唔多係每一架雙層巴士就係要 5,000 英鎊嘅，如果要咁做，所有嘅巴士營運商就都同意喺新購買嘅單層同埋雙層巴士都會係安裝安全帶嘅。

至於啲已經採購但係仲未送運嘅新巴士，九巴、龍運表示佢哋係會要求呢個生產商係喺所有嘅乘客座位度安裝安全帶嘅，如果係可行嘅話，而九巴、龍運就話喺 18 年 9 月之前送抵嘅一百四十五架新巴士都可以係喺所有嘅座位度安裝安全帶嘅。九巴同埋新大嶼山巴士就通知咗運輸署就係喺 18 年 4 月嗰陣時，如果係供應商係可以--即係佢哋係可以喺所有嘅乘客座位安裝安全帶嘅。

至於現有嘅巴士，九巴、龍運同埋城巴、新巴就表示呢一個喺所有乘客座位安裝安全帶嘅技術可行性評估仍然係未明朗嘅，即使技術上係可行，呢個問題仍然係要進一步考慮，因為要考慮到相關嘅財務安排同埋對巴士營運嘅影響，因為就要係相當嘅時間係去改裝啲巴士。運輸署就鼓勵所有巴士公司去繼續探討喺所有乘客座位加裝安全帶嘅技術可行性，應該喺每個巴士型號都去探討，然後先作出決定嘅。」

呢個就係第二次會面之後嘅結論，即係第二次同埋第三次嘅會議之後得出嘅結果，呢個就係 6 月 21 號，即係有 3 月、4 月同埋係 6 月。

喺 KMB-12 文件冊 4908-1 頁嘅，同安全帶有關嘅部分就係喺 4908-7 頁嘅，喺第 25 段，就話喺「會議上同意係可以喺所有新嘅巴士嘅乘客座位係安裝安全帶嘅，係可以符合相關嘅國際標準，而所有嘅巴士公司就承諾所有新嘅專

營巴士都係會喺全部嘅乘客座位度安裝安全帶嘅。」而額外嘅支出將會係每架巴士大概 5,000 鎊。

第 26 段，「至於現有嘅巴士，喺會議上係提到，喺某啲現有雙層巴士型號上層嘅所有乘客座位加裝安全帶係可行嘅，而九巴、龍運就表示佢哋會喺巴士嘅上層所有座位加裝安全帶，而喺呢啲係某啲長途嘅巴士或者喺一啲某啲行走高速公路嘅路線嘅。

而九巴、龍運就話到咗 2019 年中就會大概有四百新巴士會係所有嘅乘客座位度安裝安全帶嘅。九巴、龍運就會將呢啲巴士調配去上述嘅路線。喺現有嘅巴士加裝安全帶就要視乎實際嘅情況或者要求。

就住九巴、龍運嘅措施，喺會議上係同意喺現有嘅巴士加裝安全帶嘅，而係相關即係喺現有巴士安裝安全帶嘅成本同埋所需嘅時間，根據海外嘅經驗，就冇足夠嘅證據支持佢成為一個強制嘅--所有巴士嘅強制要求。但係委員同意至於一啲冇保護嘅座位同埋一啲冇企位嘅車廂係需要嘅。

喺呢方面，城巴、新巴就被要求去考慮喺某啲長途巴士路線嘅上層所有座位加裝安全帶或者喺一啲喺高速公路行走嘅某啲路線，城巴、新巴表示會好難調配佢哋嘅巴士只係行走某一啲嘅路線，因為佢哋嘅巴士每日都會係調派去唔同嘅路線嘅。同時城巴、新巴亦都係表示好少乘客會係用安全帶，所以喺現有嘅巴士度加裝安全帶喺財務上係不可行嘅。城巴、新巴要求政府去支付加裝安全帶嘅費用，如果政府係咁樣要求嘅話。」

而個結論，喺第 31 段，就係話「運輸署係要求所有嘅專營巴士營運商去估計一啲行走巴士停站比較少、高速公路嘅長途巴士路線同埋相關嘅巴士數目，並將呢一個資料係儘早交畀運輸署參考。」

我哋而家就睇另外一份文件，就係 4938-1，呢啲就係第三次會議嘅記錄，就係喺今年 6 月 27 號進行嘅，呢個就係一個專營巴士車內安全裝置嘅工作小組，換句話講，呢個就係六日之後所進行嘅一個會議。

我哋睇 4938-5 頁，第 15 段，嗰個標題就係喺所有嘅乘客座位安裝安全帶。「運輸署通知會議就係同佢哋就係喺長途巴士路線安裝安全帶嘅睇法，或者就係一啲喺高速公路行走而上落係比較少嘅路線，運輸署已經係要求專營巴士商係去提供參與呢啲服務路線嘅巴士數目。新巴、城巴強調佢哋唔同意呢一項嘅加裝工作，除非係由政府係畀錢嘅，咁亦都係睇到係需要三至四名技術嘅勞工，要用一個星期先可以為一架巴士加裝安全帶嘅，如果考慮到呢一個人手嘅支出同埋物料嘅支出，加裝一架巴士加裝安全帶嘅成本會大概係 24 萬嘅。」

而最後一份文件，我都想帶你睇一睇嘅，呢份就係運輸署交畀立法會交通事務委員會喺今年 7 月提供嘅更新文件，呢一個就係 TD-1 文件冊 403 頁嘅。喺 403 頁，呢個標題你見到就係 2018 年 7 月 25 號討論嘅事項，就係畀立法會交通事務委員會嘅，標題就係改善專營巴士嘅安全。我哋睇第 412 頁，你見到

Transcript by Epiq Hong Kong, Limited

呢份就係由運房局、運輸署提供嘅文件就係喺今年7月嘅。

文件嘅目標就係寫咗喺403頁，而喺背景底下就講到呢一個工作小組同埋工作範圍，喺呢份文件有一啲部分就係講到安全帶嘅，我想你睇下第16段，就係409頁嘅，「就住以上10至15段所提到嘅要點」，嗰啲部分就講到一啲嘅詳情，即係我哋已經提到㗎喇。

「工作小組就得出以下嘅建議，目標就係為呢啲坐低嘅乘客提供更加多嘅保護，首先喺未來採購新嘅巴士應該喺所有座位都提供安全帶；而

(b)就係喺進行進一步嘅技術營運同埋財務評估之後，係可以考慮喺某一啲嘅巴士路線嘅上層嘅座位提供安全帶嘅。換句話講，即係行走一啲巴士停站比較少、高速公路嘅長途路線。

運輸署係會要求專營巴士商去進一步同巴士製造商去探討喺唔同巴士型號嘅上層加裝安全帶嘅技術可行性，同埋亦都係要考慮到呢一個營運同埋容量同埋係要決定一個加裝工程嘅時間表，同埋呢個財務嘅可行性，然後先至去決定究竟會唔會喺16(b)段所講嘅長途巴士路線嘅上層可唔可以加裝安全帶嘅。同時，運輸署會同專營巴士商去宣傳乘客使用安全帶，如果係有安裝嘅話（換句話講，就係一啲冇保護嘅座位，即係新嘅巴士上面冇保護嘅座位）。」

我就會問幾個問題嘅，我就會講番委員會已經聽取咗嘅證供嘅某啲部分嘅，首先就係城巴嘅證供，即係喺早前嘅聆訊佢哋係有作供嘅，呢個就係第4日嘅謄本嘅，第102頁。

主席：（經傳譯員）邊一份文件冊㗎，你講緊？

MR DUNCAN：（經傳譯員）2A文件冊嘅。

主席：（經傳譯員）呢個背景就係18年5月30號。

MR DUNCAN：（經傳譯員）冇錯，呢個就係之前我哋聽取嘅證供嚟嘅。我想你睇102頁，我想你睇番第101頁第15行，我就喺度問緊城巴嘅Samuel Cheng先生，我就問到呢一個財務嘅安排，就係「如果係可以支付呢個部分嘅話，會對安全有咩幫助呢？」

鄭先生就話「我唔可以舉到任何可以改善安全嘅例子，但係有一啲事情可能公眾會覺得係可以改善到安全嘅，其中一樣嘢就係喺上層加裝安全帶。今朝李先生就講到成本，就會係每架巴士15,000至到20,000金鎊嘅，我哋係有一千一百架呢一類嘅巴士，如果佢哋全部都要喺上層加裝安全帶嘅話，總成本將會係1億8千萬至到2億4千萬港幣。」呢個就係城巴嘅情況。

我想你睇番九巴嘅部分，就係喺第15日，...

主席：（經傳譯員）首先想講下呢一個成本嘅問題，呢個就係102頁頁底嗰度，想Weston先生睇睇嘅，第19行，或者第16行。

MR DUNCAN：（經傳譯員）第16行就講話「今朝我哋講到喺車上有一啲嘅冇保護嘅座位，佢哋已經係裝咗安全帶，我就成日搭呢啲巴士嘅，但係我就好少見到乘客--即係呢啲座位嘅乘客會戴安全帶，以後如果你要我哋公司去使1億或者兩億或者甚至超過兩億做呢件事情嘅話，我哋就好懷疑究竟係有冇用，即係如果政府係有呢個要求嘅話，如果係真係要加裝安全帶，我希望政府係會提供資助畀我哋係去安裝安全帶嘅。呢個就係其中一個例子，唔該晒。」

主席就話「你嘅意思就係如果政府係認為係需要咁做，因為乘客可能係想戴安全帶，但係根據你嘅經驗，如果佢哋唔咁做嘅話，應該係由政府去出錢，而唔係由你哋自己畀錢嘅？」

鄭先生話「如果政府認為係有需要乘客去戴安全帶，我希望政府係會資助呢一個安裝嘅工作，如果唔係，就--即係如果要我哋自己畀錢，就會係好浪費資源。」

睇番第58頁，...

主席：（經傳譯員）係咪呢個謄本，第4日？

MR DUNCAN：The transcript, yes.（經傳譯員）鄭先生早前都係有類似嘅睇法嘅，喺第58頁嘅24行，我就講緊一個城巴遠期計劃其中一部分嘅，第25行，我就話「係喺上層嘅所有座位安裝安全帶係可行嘅，但係根據我哋嘅觀察，而家好少人係會喺呢個未經保護嘅座位嗰度戴安全帶嘅，如果係冇立法係要求專營巴士嘅乘客安裝安全帶嘅話，而加上由執法單位去嚴格執行嘅話，喺所有座位安裝安全帶只會係浪費資源，因為多數嘅乘客都唔會戴嘅，即使係有提供嘅話。」

好喇，講完城巴，而家講九巴同埋近期啲嘅聆訊，第15日，9月13號嘅，第6份嘅資料夾，第15日，18頁，第20行嗰度，我就問過一個問題嘅，係關於新嘅巴士裝安全帶，我相信佢哋有安全帶嘅，或者睇番前少少，第15頁，24行，李生，Roger Lee就係九巴嘅，佢提到就係上層裝安全帶嘅可行性，「喺上層裝安全帶，技術上我哋係需要考慮到嗰個地心吸力嘅問題，政府諮詢過我哋同埋有關嘅供應商關於嗰個可行性--技術上可行性同埋個進度嘅。安全帶比較重嘅，如果你係要喺上層安裝，政府係需要考慮到嗰個傾側嘅測試，如果係技術可行，就唔會係一個問題，但係兩個供應商富豪同ADL嗰個進度就係喺正面嘅。」

跟住佢就係講到嗰個財政上嘅影響，就係喺呢個加裝安全帶。

「價錢唔平嘅，即係喺今年初嘅時候，就有個特別委員會就發出一個清楚指示，我哋嘅巴士19年買嘅同埋之後嘅就有安全帶，至於話加裝安全帶，如果可行嘅話，特別係啲長途嘅路線，我哋係會喺上層加裝安全帶，我哋唔希望係進一步有意外嘅，所以個成本唔係我哋主要考慮，有關安全帶就需要一加巴士就係需要20萬嘅，係上層咁計。」

「有幾多架巴士係會加裝呢？喺呢個車隊入面有幾多架呢？」

梁生（另一位代表）就話「我相信係三千六百部長途嘅巴士。」

跟住就第 22 段嗰度，李生，Roger Lee 就話佢要補充，「目前我哋有係四千二、四千三架巴士，呢個係九巴、龍運加埋，有啲巴士就係有安全帶，但係其他佢哋係明年將來嘅年份就會退役㗎喇，呢啲巴士係會兩、三年退役，佢哋就唔會加裝嘅。對於長途線嘅巴士，我唔知道個實際個數字，但係三分一就會係長途嘅。」

主席喺 22 行嗰度就話「李生，你講過就話加裝三千六部嘅長途巴士，你係咪更改你嘅聲明，就話係一千呢？」佢就話「係嘅。」

第 5 行，就話「我就係嘗試就計一計數，一千部巴士 ，20 萬，每部巴士 20 萬？」「係。」

「個數字就係 2 億元嘅？」梁博士就話「係嘅。」

「呢一點就需要同政府傾嘅？」個答案就係「唔會。」

好喇，最後，我想你留意一下嘅，就係我哋係聽取過警方嘅證供，...

主席：（經傳譯員）我哋講呢度之前，或者喺嗰個謄錄本嗰度，你正話提到第 16 頁嗰度，第 17 行，「喺今年年初就係我哋公司成立咗個委員會，就係特別委員會發出指示，我哋嘅巴士 19 年或者之後採購嘅係會有安全帶嘅，至於話安全帶嘅加裝，如果可行嘅話，特別係長途線，我哋係會喺上層嗰度係安裝安全帶嘅。」

我諗清楚啲嘅，就係呢個係提到九巴係就住大埔道交通意外佢提交嘅報告，呢個就係 KMB-1A 第 98 頁，同埋第 39 段、第 40 段。

MR DUNCAN：（經傳譯員）你睇到嘛，Weston 先生？

MR MIKE WESTON：（經傳譯員）係，睇到嘅。

MR DUNCAN：（經傳譯員）KMB-1A，98。

主席：（經傳譯員）呢個就講番個背景，係運輸署長係規定九巴喺一個月之內提交嘅一份報告，喺 3 月 12 號提交嘅，呢份報告就係喺工作小組開會之前嘅，就正話都有講過邊個出席咁樣。或者我想請 Duncan 大律師同我哋讀一讀，等我哋知道九巴喺呢個工作小組之前嗰個立場係點樣嘅。

MR DUNCAN：（經傳譯員）或者睇番 98 頁，文件夾嘅第 98 頁，Weston 先生，你睇到呢個就係 3 月 12 號，39 段，巴士公司就話喺報告當中係咁講嘅，呢個係畀運輸署長嘅，「事件之後，就立法會議員提出咗不同嘅意見同埋建議，傳媒、公眾人士都提到應該採取咩嘢措施嚟到去提升公共巴士運作嘅安全，特別

巴士乘客嘅安全，特別委員會考慮過呢啲事項，諮詢過九巴嘅巴士供應商，同埋作出若干嘅建議，而九巴嘅管理層係會執行同埋係進一步探討嘅。」

第 40 段，「九巴已經要求咗供應商係喺所有嘅座位安裝安全帶，呢個新訂嘅巴士，喺 18 年 3 月 5 號之後就會係既定嘅安排嚟㗎喇。至於而家現行嘅巴士，如果有啲路線係需要嘅話，係可以喺上層分階段咁嚟到去安裝呢啲安全帶嘅，呢個係九巴嘅巴士。」

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）好喇，最後就想請你睇一睇警方所畀嘅證供，呢個就係第 17 日嘅作供，日期就係 18 年 9 月 24 號星期一嘅，第 7 號嘅文件夾。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）或者想請你睇一睇第 50 頁，當時就係主席同歐陽先生係同 Stephen Baker 先生係對話嘅，Baker 先生就係警隊嘅代表，佢係總警司嚟嘅，或者睇番第 49 頁先，主席就提到安全帶嘅問題，即係小巴，公共小巴就有安全帶嘅。

主席就話「係咪小巴有？」Baker 先生話「係嘅。」

「其實喺執法嗰度有冇困難？係咪好容易嘅呢？」Baker 先生就話「好難執行嘅，因為呢個都唔係定期咁執行嘅，呢個係有時咁樣執行，警務人員就決定要執法，就係因為道路安全嘅問題，呢個係唔單只係一個環節嘅問題，即係需要宣傳，需要經常嘅宣傳嘅。我希望啲人就唔會話因為驚住檢控，然後先至係守法。」

主席話「呢個係需要好長嘅時間先至說服到啲人係坐車係戴安全帶。」佢就話「我哋認為如果啲人有得選擇，咁就更加好嘅，即係去改善佢哋嘅道路安全作為一個選擇，一個選項。」

歐陽先生就提咗一個問題，就話「安全帶嗰方面，根據小巴嘅經驗，警方喺執法方面係咪好成功呢？」Baker 先生話「我冇嗰啲執法嘅數字，但係我希望市民係會守法，因為係對佢哋好嘅，即係而唔係進行檢控咁樣。」

「但係正如剛才所講，大多數嘅人就唔會喺小巴嗰度係纜安全帶，執法係好困難嘅，我哋可以睇到點解你預計喺巴士嗰度亦都有同樣嘅趨勢嘅？」Baker 先生話「係嘅。」

好喇，有好多資料係提供咗畀你消化嘅，Weston 先生，但係你可以睇到呢度嘅情況就係肯定就係有個決定就係話至於話新嘅巴士以後--有個建議就話以後新採購嘅巴士就係會有安全帶嘅，每個座椅都係會有安全帶嘅，不管嗰輛巴士係行走呢個市區路線，咁係好擠逼㗎喇，我相信應該，亦都係有一啲企位嘅乘客。我哋聽到巴士公司嗰個額外嘅成本，就會係差唔多一架巴士就係

5,000鎊嘅，呢個係其中一方面。

第二方面就係喺上層嗰度嘅座椅加裝安全帶，技術上係可行嘅，對於行某啲路線嘅巴士，即係行一啲譬如話高速公路嘅路線嘅巴士，如果你替兩間專營巴士公司嚟講，嗰個成本就差唔多係4億。

我相信委員會明白嘅就係你對呢兩方面其實都可能有你嘅意見，即係新購置嘅巴士係要安裝安全帶，呢個唔會話好大嘅開支。第二，就係加裝安全帶嘅問題，喺行走一啲高速公司、特別路線嘅巴士加裝安全帶，我好希望係聽下你嘅意見。

MR MIKE WESTON：（經傳譯員）係嘅，或者我畀一啲一般嘅觀察先，我相信初步睇嚟，從今日嘅證供聽到就係安裝安全帶就係技術上係可行嘅，亦都係有佢嘅優點嘅，即係有做過研究係咪可行，成本就係另一個問題，係咪有實際嘅優點呢？

從我嘅聽到嘅證供，就係話喺香港專利巴士經營者加裝安全帶，呢個佢哋接納呢個安排嘅速度好似呢個運輸局拒絕呢個安排係咁快咁樣，一樣咁快。我相信安全帶的確有佢嘅優點嘅，喺交通意外嘅時候，汽車又好，咩嘢車都好，的確係佢嘅幫助嘅。

我哋都係聽過一啲執法嘅問題，係咪有能力去到執法嘅問題，另一個問題提到嘅，就係喺證供嗰度係未必有提，就係係咪能夠令到呢啲安全帶係成日都係運作良好呢咁，最緊要就係你有啲安全帶，如果運輸署同埋專營經營者係要啲人係纜安全帶，就確保佢哋係用得到先得嘅，呢個亦都可能係一個好大嘅財政負擔嘅。喺保養嗰方面亦都係一個問題，經常要保養住呢啲安全帶。

我認為喺好多評估嗰度冇睇到嘅就係嗰個成本效益嘅問題，安全帶嗰個成本，加裝安全帶亦都係一個好大嘅成本負擔嚟嘅，喺啲新巴士，5,000鎊，亦都係有一個成本喺度㗎嘛。主要嘅問題就係投資呢啲錢落去，個效益係點樣，安全帶喺減少交通意外傷亡嘅時候相對於嗰個--嘅價錢相對於嗰啲錢擺喺其他嘅措施嗰方面係點樣比較呢？其中一個擔憂嘅地方就係九巴投資龐大嘅金錢，呢個當然係值得歡迎，但係始終個危險就係有其他嘅高科技嘅措施係可以安裝嘅，亦都係同樣可以係投資喺嗰度嘅。

呢點，每一鈪使落去，愛嚟提升安全係咪可以係取得更加好嘅效益呢？譬如話嗰個車頭嘅設計、自動減速、自動剎車等等嗰啲咁嘅措施，嗰啲錢係咪花得更加有成本效益呢？

啲錢一係就係嚟自現時專營巴士嗰個嘅利潤；我聽到一啲嘅證供就係都唔係好高嘅，一係就嚟自嗰個乘客，個票價會高啲；一係來自政府。始終都係呢三個來源係得到經費嘅，始終問題就係點樣使呢啲錢，點樣可以使得物有所值嘅，點樣可以取得更加好嘅成效。如果你加埋呢啲咁嘅數字，嗰個錢都唔係少嘅。

其實我就要問，係咪可以係花喺其他嘅形式嘅科技以取得更加好嘅成效呢咁？但係相對於倫敦、香港嘅比較，最重要嘅就係運輸局佢哋就唔係好贊成呢個安全帶，倫敦就係好平坦嘅地方，唔係話好多車就係每小時四、五十里咁行，大多數嘅巴士係喺倫敦就係同香港係唔同嘅，香港其實嗰個地勢就係好有挑戰性嘅，亦都係有唔同嘅。

所以我就會睇下其實特別係一啲高風險嘅路線點樣去處理，我哋可能就唔係話一刀切去做一啲嘢，可能係有啲唔同嘅方案。有一啲嘅路線其實可能真係需要安全帶嘅，但係我認為你哋應該選擇得比較好啲，而唔係一刀切嘅去做。

正如我所講，我就會問一個問題，就係話究竟保養方面究竟有需要幾多嘅承擔呢等等。

主席：（經傳譯員）你可唔可以埋啲個咪？

MR MIKE WESTON：（經傳譯員）就去確保呢個安全帶其實係保養得好，亦都係有一個好嘅功能繼續，使到佢哋可以繼續被使用嘅。當嗰啲乘客去到架專營巴士嘅時候，其實真係嗰啲安全帶真係情況係好嘅。

主席：（經傳譯員）你可唔可以話畀我聽嗰個保養費係幾多呢？而家喺啲--譬如係喺英國，譬如旅遊車會唔會有㗎？

MR MIKE WESTON：（經傳譯員）喺倫敦嚟講，譬如話佢哋係一啲服務型嘅巴士嗰度，嗰個保養嘅挑戰就可能有啲人刻意破壞，就或者有啲人就係喺個安全帶嗰度就塞住嗰啲窿呀咁樣樣。

主席：（經傳譯員）香港嚟講，都係唔會係一個問題嚟嘅。喺呢一個保養會唔會係有啲嘅技術層面都會係一個問題嚟嘅呢？

MR MIKE WESTON：（經傳譯員）我唔係好清楚，就我相信就應該一定係會有一啲定期嘅保養嘅工作要做嘅，喺英國嘅一啲嘅旅遊車嚟講，其實即係刻意破壞呢樣嘢就唔係話真係個問題好嚴重嘅。或者我亦都係喺我個報告裏面講，就係附件 D 裏面，...

主席：（經傳譯員）請你稍等一下，鄧律師，你可唔可以畀我哋嘅頁碼呢？

MR DUNCAN：（經傳譯員）就係由運輸局係提交畀我同埋主席嘅，係第 160 頁嘅。

MR MIKE WESTON：（經傳譯員）有一個幻燈片呢度就係有講到...

主席：（經傳譯員）你有冇嘅頁數呢？

MR MIKE WESTON：（經傳譯員）冇錯喇，就係呢個喇，呢個。

主席：（經傳譯員）係。

MR MIKE WESTON：（經傳譯員）就係佢，呢一頁，2017 年嘅數字，就係話喺巴士

上面有啲人係跌嚟，就係 3,074 嘅數字，係 2017 年嘅數字。呢個就係睇到大部分喺巴士上面嘅乘客受傷就係因為佢哋企喺度或者佢係上緊車、落緊車或者佢哋係上緊樓梯、落緊樓梯，就大概係百分之十三嘅，就喺三千宗之中，大概係四百宗係呢一類型嘅。所以其實我所認為我哋焦點應該就係睇下嗰啲企喺度嘅乘客，呢個係說明喺倫敦嗰個受傷嘅情況嘅分類，就係有啲人企喺度咁樣樣，同埋啲乘客喺乜嘢狀況底下喺架巴士上面係受傷嘅。

主席：（經傳譯員）喺遠期計劃裏面嘅一啲數字，鄧律師，2018 至到 2022 年就有講到有啲人就係佢哋係失咗平衡，佢哋跌嚟，亦都有啲數字就係嗰啲人坐喺度就係受傷嘅。2015 至 2016 年兩年，百分之五十一點五就係嗰啲企喺度嘅乘客嚟嘅，或者佢哋係失去重心、失去平衡，只係有百分之一嘅人就係佢哋坐緊嘅時候係受傷嘅，呢個似乎就係話就係坐喺度嘅乘客佢哋受傷嘅百分比係比較低嘅。

MR DUNCAN：（經傳譯員）呢個，主席，呢個好似似乎係我記憶所及嘅情況，可唔可以請我助手係將嗰個計劃再搵出嚟。

主席：（經傳譯員）另外一個問題係就呢個立法會議員就要求我哋審視下安全帶呢個問題，首先如果你唔配戴安全帶，你有咩嘢嘅受傷，可能似乎啲人就係話啲人喺架巴士行嚟行去、上樓梯或落樓梯，而唔係真係坐喺個座位受傷嘅，所以坐喺度嘅人受傷嘅比率係比較少。

另外就係話，其實而家我哋睇下而家巴士嘅人去使安全帶嘅情況係點樣，係咪應該做一個調查，呢一個城巴嘅董事總經理話畀我聽其實都冇人去戴嘅，其實會唔會我哋其實搜集一啲客觀嘅資料會好㗎？

MR MIKE WESTON：（經傳譯員）係好嘅，如果譬如話我哋係用一啲閉路電視去睇清楚究竟個使用率有幾多咁樣會係好。但係我認為你話要係裝安全帶嘅時候，你亦都係有一個宣傳運動去鼓勵啲人去配戴安全帶，如果你真係決定去投資去裝安全帶嘅說話，起碼都能夠將呢一個好處係攞到最大嘅。但係我哋嘅運輸局嘅數據顯示其實就呢個真係一個--係車上乘客嘅問題，呢方面唔係最大嘅。

主席：（經傳譯員）另外一個因素可能就係話係進行一個調查，就問下啲人因為呢一個巴士公司或者管理當局認為係安裝安全帶係安全啲嘅，佢哋願唔願意使用呢？2007 年嘅時候，其實可能都--如果係，我冇記錯嘅時候，就係都做過咁嘅調查嘅，佢哋就訪問咗，用電話訪問咗二千二百個人嘅。鄧大律師，可唔可以證實下呢一點呢？

MR MIKE WESTON：（經傳譯員）其實你點樣去問嘅時候，都會影響嗰啲人點樣去答嘅。

主席：（經傳譯員）係呀，係呀，譬如好似我哋話係脫鈎，咁都係有一個嘅全民投票去問呢啲問題都係有啲問題嘅。

MR MIKE WESTON：（經傳譯員）其實你問問題係一件事，但係實際上啲人點做係另外一件事嚟嘅。

主席：（經傳譯員）但係我認為如果係好專業咁去做，又會係好嘅。運輸署其實都畀過呢啲相類似嘅數據畀我哋。

MR MIKE WESTON：（經傳譯員）我就唔係咁講話其實安全帶就唔好嘅、係唔需要嘅，但係因為你要投資咁多錢，今日下晝我哋都講過有幾多錢，係咪啲錢係咪用得其所一啲呢可以？係咪真係有呢一個嘅成本效益等等，亦都會係帶嚟更多--好多嘅好處。

主席：（經傳譯員）你就話如果我哋要花咁多錢嘅時候，呢筆錢就可能係用其--投資喺其他嘅安全裝置會好啲嘅，而家可能冇使緊嗰方面嘅錢。

MR MIKE WESTON：（經傳譯員）個營運商可能就係嚟緊要使一筆錢嘅，嚟緊呢幾年，但係其實呢筆錢係用緊其他用途更加物有所值嘅。

主席：（經傳譯員）等我解釋下，就我哋而家會小休，因為盧教授佢有其他嘅事情，佢一定要去嘅，但係我哋仍然都係要繼續嘅。我諗我哋而家要小休直至盧教授佢可以離開嘅。唔該晒。

下午 3 時 40 分押聆訊押後

下午 3 時 44 分恢復聆訊

出席人士： Hon Mr Justice Michael Lunn（倫明高），香港專營巴士服務獨立檢討委員會主席

歐陽伯權先生，香港專營巴士服務獨立檢討委員會委員

Peter N. Duncan（鄧樂勤）資深大律師，由高露雲律師行委聘，代表香港專營巴士服務獨立檢討委員會

Mr Mike Weston，獨立的客運交通顧問

主席：（經傳譯員）鄧律師。

MR DUNCAN：（經傳譯員）多謝主席。我就而家唔再講安全帶喇，Weston 先生。

主席：（經傳譯員）我哋頭先講嗰啲數字，有冇搵到出嚟呢？

MR DUNCAN：（經傳譯員）對唔住，冇。如果我哋真係搵到嘅，我哋就會提交畀委

員會。

主席：（經傳譯員）我認為佢已經喺個螢幕上面。

MR DUNCAN：（經傳譯員）但係呢度就冇講到主席你講過嗰啲嘅唔同類型嘅，就係百分之五十四就係失去重心，但係就係個巴士個乘客受傷係百分之三

主席：（經傳譯員）我相信呢個就係講緊坐喺度嘅乘客，因為我哋前面係講話失去重心吖嘛，呢啲就係嗰啲坐喺度嘅乘客喇。所以其實嗰個數字相距係好大，因為佢哋係坐喺度嘅時候，相對係少人係受傷嘅，好明顯個原因--所以就我哋喺冇遮擋嘅座位嘅時候，我哋要裝置安全帶，我哋應該有原因嘅。

喺下層有啲座位前面就係冇一啲嘅阻擋，所以即使你要拋開去外面，亦都唔會拋好遠，所以亦都唔需要下底個下層嗰度裝安全帶嘅，似乎咁樣就係個原因。

MR DUNCAN：（經傳譯員）主席，我就會話畀你聽個頁碼 KMB-12 第 5115 頁嘅。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）睇下仲有冇其他嘅意見或者問題，如果冇，我就唔再講安全帶，我就嚟到我最一個課題希望能夠同你探討嘅。呢個係你個報告嘅第 149 頁，嗰度提到，唔好意思，係應該係 146 頁嘅，係關於疲勞管理嗰方面嘅，喺 146 頁，呢個係巴士安全計劃嘅引言嗰度，呢個係講個係最近增加咗嘅項目就係疲勞管理方面，我就想係就呢方面問你幾條問題。

喺第 149 頁，7.6 段，你就話，最後一段你咁講嘅，「好清楚就係而家我哋嘅關注係越嚟越係關於行為安全嗰方面，特別係疲勞管理。」你可唔可以話畀委員會聽點解會有一個咁樣嘅改變呢？你所謂嘅「行為安全」係咩嘢意思呢？

MR MIKE WESTON：（經傳譯員）傳統嚟講，我哋就係講緊係安全管理或者係風險管理、調查意外同埋譬如話喺巴士嘅設計方面係有咩嘢改變、道路設計方面有咩嘢改變，同埋我哋嘅運作方面有咩嘢改變等等，呢個都會係呢一個巴士安全計劃裏面嘅部分嚟嘅。

我哋之前主席同我同倫敦巴士公司喺 8 月會面嘅時候，呢度都有提到，但係而家我哋就想掘深一啲，就係睇番嗰個根源嘅問題，特別係個司機嘅行為有啲咩嘢影響。

喺疲勞管理嘅其中一個例子就係如果有一個司機係涉及一個意外，以前即係傳統上就會問個司機發生咩嘢事，睇下嗰個司機即係喺嗰個意外嘅角色係乜嘢，即係我哋以前係會著重個意外本身，但係而家好多嘅巴士公司就開始唔單只睇嗰個意外本身，佢哋係開始同車長講喺意外之前半個鐘發生咩嘢事，即係有冇一啲同乘客嘅互動可能係會令到佢哋分心，例如啲公司亦都係會啲車司傾

佢哋個生活方式係點。

佢哋好多即係一啲好有經驗嘅車長，佢哋好多時都會係預早去返工，令到佢哋可以有充足嘅時間檢查佢哋嘅巴士先係去開車嘅，呢啲司機就會比較係準時去返工，而佢哋亦都係會比較清醒嘅，而呢啲巴士公司係會--即係佢哋唔單只係調查事件本身，佢亦都係會睇呢個同事件有關嘅一啲元素或者環境，佢亦都係會睇下疲勞嘅可能嘅因素，有一啲嘅巴士公司係會經常係訪問佢哋嘅夜更司機，睇佢哋嘅嗰個編更嘅情況等等。所以嗰個演變就係由睇個事件本身去到係訪問個司機本身嘅。

主席：（經傳譯員）你問啲司機點解佢會想開夜班車，佢哋會唔會係因為日頭想去接佢哋嘅小朋友，會唔會令到佢哋休息不足呢？

MR MIKE WESTON：（經傳譯員）有一啲巴士公司係表示一啲擔憂，點解佢哋經常係同一啲夜更司機傾偈呢？因為佢哋想去確保佢哋嘅工作同埋佢哋生活取得平衡嘅。因為有一啲嘅司機可能要同佢哋嘅另一半分擔呢個家庭嘅責任嘅，譬如話佢哋接完啲小朋友之後，可能會即係要休息三、四個鐘，先至去開車嘅，所以啲巴士公司就想了解多啲司機能唔能夠係履行佢哋嘅職務，所以呢一個相比起傳統嘅做法，係一個比較新嘅做法嚟嘅。

MR DUNCAN：（經傳譯員）喺車長培訓方面，有幾多係融入咗呢一個疲勞管理呢？

MR MIKE WESTON：（經傳譯員）以前一直都唔算係好多嘅，我自己覺得就未必係關車長嗰個工作時間事嘅，即係可能同安全帶一樣，可能有啲人會覺得個車長嗰個工作量係有關係，但係我覺得並唔係一個問題，英國係對工時係有管制嘅，就冇跡象顯示呢啲司機係要超時去工作，佢哋喺更同更之間亦都有充足嘅休息，大部分嘅倫敦嘅巴士公司都唔係好擔心啲車長另外有工作嘅，有一啲公司會去睇下佢哋有冇其他嘅工作。佢哋亦都係會幫助車長，令到佢哋有足夠嘅休息同埋有一個健康嘅生活嘅。

主席：（經傳譯員）倫敦嘅巴士公司係可以睇到--即係揸巴士或者 Uber 車嘅司機嘅一個名冊，係咪？

MR MIKE WESTON：（經傳譯員）倫敦運輸局係的士嘅發牌機構同埋一啲私人預約車嘅，佢可以將呢一個資料庫同巴士公司分享，巴士公司就知道有一啲車長就會係--都係會開的士嘅，有一啲公司就覺得啲司機應該只係開巴士嘅啫，其餘時間應該要休息嘅。

主席：（經傳譯員）如果我冇記錯，有一啲嘅巴士公司係會有限度地去檢查呢一個資料嘅，係咪呀？

MR MIKE WESTON：（經傳譯員）大部分呢啲檢查都係比較被動式嘅，就係就住一啲收到嘅資料，比較少公司就係全面檢查個司機會做緊啲咩嘢工作嘅。如果有車長病咗，如果佢哋認為呢個司機可能係去咗做其他工作，佢哋可能會調查

嘅。但係我哋嘅方向係由調查個事件本身去到搵一啲比較深層嘅原因，即係有咩嘢原因會引致到事件或者意外嘅。

傳統上，我哋通常都係睇究竟巴士公司有冇錯，或者睇下啲司機係有冇錯，定係會唔會向第三者進行索償，即係當然我係誇大少少咁講，但係而家會比較多係去搵出呢個問題嘅根源嘅，有一啲原因就並唔係一個完全嘅原因，但係你可以睇到呢一個係有建立咗一個安全嘅文化。

主席：（經傳譯員）喺呢個針對疲勞管理嘅文化嘅轉變，即係由邊個發起嘅呢？

MR MIKE WESTON：（經傳譯員）呢個就係因為倫敦運輸局係重新係重視呢個安全，呢個係一個聯合嘅責任嚟嘅，我諗巴士公司都係有責任，呢個係一個無終止嘅過程嚟嘅，喺今年 8 月，我哋會面嘅時候，倫敦運輸局嘅代表表示四十或者五十年前，最大嘅車廂--就係啲人蹋低，因為就好多汽油喺個車上入面嘅，呢個就係好多年前，所以巴士公司係會越嚟越注意去減低呢個風險嘅，所以呢個過程係持續嘅，但係會越嚟越著重安全。

MR DUNCAN：（經傳譯員）倫敦運輸局有冇負責監督車長嘅培訓，定係交由巴士公司處理呢？

MR MIKE WESTON：（經傳譯員）培訓係可以分兩方面講嘅，首先呢一個駕駛考試就係一個全國交通部嘅要求，如果你要攞一個公共車輛嘅駕駛執照，你就要考一個駕駛試，就由一個汽車局進行考核，或者呢啲巴士公司亦都可以自己係進行考核嘅。

你攞到呢一個車牌之後，英國嘅司機每五年就要接受五日嘅認證培訓，多數嘅公司都會每年進行一日呢一個培訓，去維持司機嘅專業駕駛證書嘅，呢個係全英國嘅巴士同埋旅遊巴司機都要做嘅，唔單只係倫敦嘅司機。司機係要接受一啲嘅訓練課程，而主要嘅課程，一個由 City and Guilds 認證嘅考核，呢個係一個專業巴士駕駛嘅課程，呢一個課程就係要喺你成為倫敦巴士司機一年內係完成嘅。而倫敦運輸局亦都發展咗一啲嘅培訓，呢個就係五日嘅認證課程嘅一部分嚟。

另外，我哋發展咗一個半日嘅培訓，就係由巴士公司提供畀所有嘅司機嘅，呢個培訓課程之中就有用一啲影片去話畀司機知道點樣可以去處理一啲嘅危機，啲司機就會見到喺意外之前係可以點樣去處理，然後就會--就去我哋會講解「你嗰個駕駛表現點樣會影響到呢一個結果嘅」，呢個係一個半個鐘嘅培訓。

然後就有一個兩日嘅培訓，就係畀成個倫敦二萬五千個司機嘅，呢一個就係由倫敦運輸局安排嘅。呢個就係為咗改善顧客嘅滿意程度。因為好多人就批評倫敦運輸局同埋巴士公司就係就住巴士司機同埋乘客之間嘅互動嘅，所以呢個培訓就係想改善司機同埋乘客之間嘅互動嘅。

主席：（經傳譯員）呢個培訓叫咩嘢名？

MR MIKE WESTON：（經傳譯員）叫做 Hello London 嘅，就係每次就係培訓一百個司機嘅，就要用兩年嘅時間去培訓二萬五千個司機，就會由一個角色扮演嘅小隊去進行，佢哋就會進行一啲角色嘅扮演，然之後就叫啲司機係去評論一下佢哋自己就會點樣處理呢啲情景嘅。

就呢個培訓就同安全冇直接有關，但係可以話就係鼓勵啲司機係去用一個正面嘅態度同顧客互動、乘客互動同埋去處理一啲比較困難嘅情景嘅，同埋令到佢哋喺同乘客互動嘅時候就冇咁大壓力，同埋可以平靜一啲。所以喺呢個方面都係同安全有關嘅，因為佢係會幫助一啲司機處理一啲比較難纏嘅情況。

主席：（經傳譯員）所以呢個就係包括同一啲比較惡嘅乘客係去互動，係咪？

MR MIKE WESTON：（經傳譯員）係嘅，因為有時你係出嚟同個乘客理論未必係最好嘅，你可能要係冷靜一啲，因為咁樣就可能會引開咗你嘅注意力。

主席：（經傳譯員）呢個係咪由倫敦運輸局設計㗎？

MR MIKE WESTON：（經傳譯員）冇錯，就係由認證機構提供認證嘅。呢一個就係持續專業進修嘅一部分，喺呢個情況下，就係由倫敦運輸局係去統籌嘅，所以呢個係一項承諾嚟嘅，其中一個目標就係回應一啲乘客嘅投訴，就住呢啲司機，同埋令到司機處理乘客嘅方式更加一致嘅。呢個亦都係根據呢個巴士安全計劃底下，另外一個有同安全有關嘅課程，就係中央去統籌，同埋亦都係有認證嘅，呢個就大概係2019年開始。

主席：（經傳譯員）喺呢個課程嘅設計底下，有一啲嘅演員進行一啲角色嘅扮演，然後啲巴士司機就要回應，係咪咁樣做？

MR MIKE WESTON：（經傳譯員）冇錯，就係有唔同嘅情景，第一日就係司機入到個車廠，佢就要求下一個星期就調更，然後佢嘅上司就冇理佢，然後司機就同呢一個上司係去理論，跟住之後佢開車，因為佢心情唔好，就因為一啲小事就同乘客爭拗等等。當演員問個司機佢會點樣處理，佢哋都好多都會話呢個佢哋嘅上司係唔啱嘅，佢哋啲乘客應該都要係有禮貌啲，跟住就講，如果司機處理嘅乘客唔同，可能個結果係唔同，然後啲演員就會係再係處理呢一個情景，所以就顯示其實你係可以改變呢個結果嘅，所以睇呢啲司機唔同嘅諗嘢嘅方法都係幾有趣嘅，因為佢哋一開始都覺得佢哋都係會咁做嘅，但係係會改變嘅。

主席：（經傳譯員）呢個課程嘅大綱有冇一個文字寫低嘅呢？

MR MIKE WESTON：（經傳譯員）呢個課程係由獨立嘅認證機構係認證嘅。倫敦運輸局係可以係向委員會分享嘅。

主席：（經傳譯員）即係可能係一個範本，本地嘅情況未必一樣嘅，但係嗰個方程式可能係相似嘅，可能係值得參考嘅。

MR MIKE WESTON：（經傳譯員）我會要求佢哋提供。

MR DUNCAN：（經傳譯員）我哋睇過呢一個半日嘅培訓同埋呢個 Hello London 嘅培訓，就係第 144 同 145 頁，就係你報告嘅一部分。

MR MIKE WESTON：（經傳譯員）係。

MR DUNCAN：（經傳譯員）講番呢個疲勞管理嘅問題，我想你睇第 146 頁同埋呢一版嘅最後嗰段，喺你準備呢份報告嘅時候，你其實就係同呢一個倫敦嘅巴士公司傾過嘅，就係有一個監察呢個疲勞嘅一個系統，就英文叫“Seeing Machines”，喺呢段，你亦都係畀過一啲嘅詳情嘅。呢個系統巴士公司係咪行緊，還是就而家都仲係試辦緊？

MR MIKE WESTON：（經傳譯員）呢個係一個試行，係巴士營辦商 RATP 係試行嘅，運輸局就會係評估，睇下係唔係將來喺嗰個巴士安全標準嗰度係納入喺裏面嘅，呢個係嗰個安全嘅創新基金嘅一部分，係關於嗰個疲勞嘅監察，我哋就會係測察巴士車長係咪眼係會瞌埋，如果係嘅話，就嗰張座椅就會震嘅，如果合埋眼就會係通知嗰個嘅上司，我哋喺嗰度有一啲嘅錄像嘅，係影住嗰個嘅車長，亦都可以就係同呢一個車長大家傾，喺嗰個傾談嘅時候就會講到嗰個疲勞嘅處理咁樣。就佢哋瞌眼瞓，跟住就瞌埋眼就瞓咗著咁嘅情況。

佢討論嘅時候就會睇下係咪有一啲--有冇一啲嘅醫療嘅問題，亦都係同個車長大家進行對話，傾下佢哋嘅生活方式咁樣。從嗰個試驗嚟睇，喺監察嗰個疲勞駕駛嗰方面呢個係有效嘅。

主席：（經傳譯員）呢個亦都係一個即時一個嘅功能，係咪？

MR MIKE WESTON：（經傳譯員）係嘅。

主席：（經傳譯員）嗰個影像就會係捕捉咗，然後嗰個主管人士就會係知道嘅，喺美國嗰度，個主管人員就會係--控制室就會係即時咁樣係提醒嗰個司機嘅，係咪呀？

MR MIKE WESTON：（經傳譯員）係嘅，如果車長喺當時係瞌著咗嘅話，有關嗰個程序就唔會係導致任何意外發生，喺嗰個控制室嗰度如果係認為有疲勞駕駛嘅情況，就會係知會巴士公司，同車長就大家進行對話，就睇下有冇一啲特別嘅問題，喺佢返車廠嘅時候就要睇下嗰個原因係點解。喺呢一版嗰度最後一段就講到，就話係自從 5 月之後，就喺呢條路線嗰個意外率嘅數目係減低咗百分之二十五嘅，都係有好大嘅裨益嘅呢方面。

MR DUNCAN：（經傳譯員）目前有冇一啲嘅疲勞駕駛嘅監察系統，喺倫敦嘅巴士入面有冇？

MR MIKE WESTON：（經傳譯員）淨係嗰個試行，淨係個試行嘅做法，...

主席：（經傳譯員）但係都係有用嘅，係咪呀？係咪即係喺呢個 Croydon 嘅電車嗰

度有用㗎？

MR MIKE WESTON：（經傳譯員）係，嗰個同嗰個 Croydon 嘅電車喺意外之後，嗰個系統一樣嘅，應該係舊年或者前年嘅時候，有好多長線--長途嘅巴士亦都有類似嘅系統，我相信就係亦都有好多好類似嘅系統係監察疲勞駕駛嘅，特別係喺駕駛一啲長途車嘅時候，疲勞就會係更加容易發生嘅。我哋其實係好想知道呢個運輸局睇過成本效益之後係咪覺得應該將佢納入埋喺呢個交通安全標準入面嘅。

主席：（經傳譯員）Croydon 嘅電車事件就喺早上發生嘅，係咪呀？朝頭早 5 點發生嘅？

MR MIKE WESTON：（經傳譯員）係嘅，當時好早，嗰個速限就由 50 里去到 30 里嘅，嗰個司機就當時就喺嗰個好窄嘅彎位嗰度冇留意到嗰個速限咁樣咁出事嘅。

主席：（經傳譯員）個問題就係究竟揸巴士喺呢啲長途嘅車長同呢個電車喺呢啲彎位嗰度，即係三百、幾百嘅公里嘅里數嗰度係咪有差別呢，係咪有分別呢？

MR MIKE WESTON：（經傳譯員）係有分別嘅，喺倫敦嘅巴士車長喺大清早嘅時候喺繁忙嘅時候亦都唔會話停咁多站嘅，夜晚就嗰條路比較靜，所以好多時你會假定就係喺倫敦嘅道路上面就有好多情況發生，香港瞌著嘅機會就唔高嘅，倫敦嗰度就比較靜，就好多情況係--好多時有咁嘅情況。

主席：（經傳譯員）RATP 佢哋當時係揸緊一條市區路線㗎喎，係咪呀？即係佢哋都瞌著咗？

MR MIKE WESTON：（經傳譯員）係喇，我哋睇過呢啲咁嘅錄像嘅。我認為個報告要做嘅就係指出有一啲技術係可以係用嘅，就需要作出評估，就睇下邊一樣係有最好嘅效益，因為最終嚟講，如果我哋係採納晒所有呢啲嘅科技，就係--如果採納得晒所有嘅科技，咁比較天真嘅想法，因為財政上都係好龐大嘅，所以我哋要選擇一啲係有最大嘅效益，係可以減少呢個乘客嘅傷亡或者係對第三者嘅傷亡，路人或者係騎單車嘅人士咁樣。呢一個運輸局嘅安全計劃其實就係會做一個好全面嘅成本效益嘅研究，希望嗰啲錢係用得最好嘅。

主席：（經傳譯員）你睇過 Stanley 教授嘅報告，嗰度當時有分析過一啲生命嘅代價咁樣，澳洲嗰度佢係有研究過嘅，就睇下係咪值得係花錢用喺某一啲嘅裝置嗰度，就嗰個成本效益嗰個嘅研究嚟到去作出決定咁樣。

MR MIKE WESTON：（經傳譯員）係喇，英國嘅運輸署就會係睇到嗰個生命嘅代價，因為畢竟呢個就係比較廣泛嘅對社會嘅代價嚟嘅，譬如話係減低嗰個傷亡，其實對呢個醫療嗰方面亦都係有好大嘅節省嘅，所以呢個有廣泛嘅一啲嘅效益喺度。

主席：（經傳譯員）最終嚟講，有關嗰個設備其實就應該係達到最高嘅效益㗎喇，係

咪呀？

MR MIKE WESTON：（經傳譯員）係，嗰個邏輯就係如果你係測試十種唔同嘅裝置，亦都係要睇嗰個成本效益，你可以係排優次，睇下嗰個嘅最高嘅效益，一路睇，睇落去嗰個清單上面，睇下你嗰個可以負擔得幾多，個經費有幾多咁樣，始終嗰個倫敦嘅巴士安全計劃就係咁樣。

主席：（經傳譯員）因為嗰個錢係嚟自利潤、票價或者係政府，係咪呀？

MR MIKE WESTON：（經傳譯員）係喇，即係始終都係呢三方面嘅財政來源，喺倫敦嗰度，喺票價嗰度或者係當局或者係嗰個利潤，巴士公司嘅利潤。

MR DUNCAN：（經傳譯員）主席，基本上我要探討嘅範圍都七七八八喇。

主席：（經傳譯員）仲有一個問題就都係好--呢個倫敦運輸局嗰度，我哋睇得好清楚就係嗰個嘅速限嘅問題，睇嚟，香港呢度就係我哋都可以睇一睇嘅，鄧律師，可唔可以同我哋睇下有冇一啲材料係關於呢方面嘅情況，亦都係同呢個倫敦係相關嘅呢？照我理解，就係有一啲電子地圖或者係同埋有一啲嘅速限嘅，喺倫敦嗰度。20 里係綠色嘅，個地圖就係綠色顯示嘅，係咪呀？

MR MIKE WESTON：（經傳譯員）係喇，其實有個趨勢就係三十二個倫敦嘅區佢哋都係推行呢個每小時 20 里嘅一個速限嘅，係好多住宅區佢哋有咁樣嘅安排，即係 20 里，即係 32 公里。有好多嘅道路而家漸漸都係 20 里嘅速限㗎喇，其他嘅道路就係 30、40 或者 50 每小時嘅速限，喺倫敦嘅巴士就好少就巴士會去到時速係 50 里嘅。

我相信其中一個挑戰就係要選擇一個合適嘅速度，個速限你可以話對於一啲大型嘅巴士，30 里其實都係嗰個限制，即係極限㗎喇，某啲道路我哋係要教育車長係要注意嗰個合適嘅速限--即係合適嘅速度，咁嚟到去即係要佢遵守嗰個速限嘅。

主席：（經傳譯員）某啲即係嗰啲道路，即係有車行嘅道路，係咪呀？

MR MIKE WESTON：（經傳譯員）不同時間亦都可能有不同嘅速限嘅。

主席：（經傳譯員）喺倫敦，如果有學校嘅話，嗰個速限係咪亦都會減低呢？即係學校放學嘅時候，亦都係會即係個速限會降低呢，或者係有一啲嘅牌寫明個速限呢？

MR MIKE WESTON：（經傳譯員）係，呢個係會提醒佢哋嗰個速限嘅，學校亦都有一啲警告牌，喺學校返學、放學嘅時候，佢哋就係可以改變個速限嘅。

主席：（經傳譯員）香港，照你所知，香港有部分嘅地方就係好人煙稠密嘅，喺行人路上面有好多嘅行人，而馬路上面亦都係有好多嘅車輛，巴士係經常喺隔籬係行駛，以呢個咁嘅情景嚟講，倫敦係咪都係限喺 20 里呢？即係類似咁嘅道路係咪都係每小時 20 里呀？

MR MIKE WESTON：（經傳譯員）係嘅，一啲主要嘅倫敦嘅道路的確就係 20 里，每小時係 20 里嘅車速，有啲就係住宅嘅道路，其實就係有一啲就係 15 里，有一啲道路就係一啲主要嘅道路亦都係有咁樣嘅安排。

主席：（經傳譯員）你正話所講嘅嗰個速限，即係嗰個 30 里嗰啲嘅道路就係會去到 15、16 里，係咪呀？

MR MIKE WESTON：（經傳譯員）呢個速限嗰個嘅試驗，即係呢啲 20 里嘅道路，呢個係對其他車輛有一定嘅影響嘅，當個速限係 30，一般嘅平均速度就係會去到 20，巴士就會好慢，巴士甚至係會令到嗰個交通嘅流量係會減慢嘅，即係比起 30 里嗰度。

主席：I think it was described as a platoon or a convoy?

MR MIKE WESTON：（經傳譯員）其中我哋關注嘅，就係當我哋進行試驗嘅時候就會係減慢嗰個車速，有啲車就可能會係冒啲險就爬頭咁樣，亦都會係導致一啲危險嘅景象嘅，喺我報告當中所講，暫時都冇咁樣嘅證據，有可能就係令到個交通就係個駕車人士個行為係有不同嘅。喺實際上，喺 20 里嘅地區，我哋將巴士下限到 20 里，令到我哋係--幫我哋係--即係令到其他車輛係減慢嘅。

主席：（經傳譯員）風險評估係牽涉到有冇可能就係造成一啲嚴重嘅傷亡，即係有啲巴士嗰個--如果將 40、30、20，一路減低，就會係減低嗰個嘅風險嘅？

MR MIKE WESTON：（經傳譯員）我唔記得個比例係點樣，其實如果你係一架巴士行緊 25 或者 20 里，相對於 20 里嗰個被撞到嗰個傷亡嘅程度係有咩嘢唔同，我就唔係好記得，正如我哋今朝所講，巴士嘅車頭其實就係牽涉到撞到乘客、撞到單車，其實都係好嚴重嘅。

歐陽先生：（經傳譯員）我想跟進一個問題，車長佢哋嘅反應係點樣呢？就係有不同嘅速限咁樣，佢哋有冇表達過關注呢？佢哋處理不同嘅速限咁樣。

MR MIKE WESTON：（經傳譯員）我唔知道有咁嘅情況，除咗話嗰啲 20 里嘅道路，佢哋係一致咁嚟到去執行，呢個就唔係話嗰啲速限不斷咁改變，其實係有一啲嘅裝置，譬如 Mobileye 呢啲咁嘅裝置係可以提醒個車長嗰個速限係點樣嘅，又佢係感應到嗰個速限嘅標誌嘅，喺司機位嗰度就會知道嗰個速限係點樣嘅。

主席：（經傳譯員）嗰個鏡頭就係會睇到嗰個速限，然後就會同司機就係表達一個訊息？

MR MIKE WESTON：（經傳譯員）提醒個訊息係點樣嘅，當然車長就未必留意到嗰個嘅標誌，但係個機器就可以係睇到嘅，喺面前嗰個嘅地圖就可以睇到，譬如主席都講過，就不同嘅顏色，...

主席：（經傳譯員）綠色就係呢個 20 里？

MR MIKE WESTON：（經傳譯員）喺倫敦好多地方，即係中部嘅地方其實都好多係

呢啲 20 里嘅速限嘅，我相信呢個係會嗰個地圖就可能會越嚟越綠㗎喇變咗。

主席：（經傳譯員）喺數字上，睇唔睇到一啲正面嘅轉變呢，即係相對於嗰個嚴重嘅傷亡意外，喺減低咗呢個速限之後，有冇一啲嘅關係呢，還是冇呀？

MR MIKE WESTON：（經傳譯員）暫時都未睇到。上一季佢哋係話嗰一季係冇一啲嘅死亡數字嘅。

主席：（經傳譯員）呢個係第一季，係咪呀？

MR MIKE WESTON：（經傳譯員）呢個係好耐以嚟，第一季係完全冇死亡數字嘅，...

主席：（經傳譯員）第二季就--呢個可能會係有自滿嘅情況，係有六宗嘅死亡意外。

MR MIKE WESTON：（經傳譯員）但係始終都係低過以前嘅數字，呢個係需要時間嘅，即係先睇到個趨勢係點樣。

主席：（經傳譯員）有冇一啲嘅影響，對於嗰個車程有幾長還是咁擠塞都冇乜大分別呢？

MR MIKE WESTON：（經傳譯員）我相信就係有一個因素影響嗰個嘅車程嘅，因為特別喺倫敦中部有好多嘅道路工程，係有一啲嘅單車徑、單車路亦都有一啲工程嘅進行，亦都影響到嗰個車速咁樣，亦都係令到個巴士嘅速度，喺倫敦中部係會減慢咗嘅，呢個影響比嗰個 20 里嘅車速限制影響就更加大嘅。呢啲司機就對於 20 里都係冇問題嘅。

主席：（經傳譯員）就喺呢一個大概係九--平均嘅速度就係每小時係 9.2 里嘅，係咪呀？喺倫敦。

MR MIKE WESTON：（經傳譯員）冇錯。

主席：（經傳譯員）呢個會唔會就係話我哋香港要改善我哋嘅道路交通同安全，其實呢個係我哋應該係特別留意嘅呢？

MR MIKE WESTON：（經傳譯員）我哋係需要明白平均嘅車速係點樣樣，同埋大致上嗰個幅度係幾多，喺倫敦嚟講，呢個 20 里就係適用於所有嘅車輛，唔係單單係巴士嘅，所以我哋首先要明白喺某一啲嘅道路個平均嘅車速係點樣樣先，我相信希望能夠就所有嘅車輛都平均減速，就唔係淨係巴士減速，就會有更大嘅裨益。我相信所有嘅道路同埋所有車輛一齊減速就會係個裨益會更加大，但係首先我哋要明白究竟個問題個根源喺邊度先嘅。

主席：（經傳譯員）我哋今日就傾到其他嘅課題，就同樣我哋係首先要搜集一啲數據，譬如話個平均車速係點樣樣，跟住就係去就做一個成本效益分析，如果個車速係減慢，究竟會係成本係點樣樣，個效益係點樣樣？

MR MIKE WESTON：（經傳譯員）係，冇錯，個邏輯就係咁，如果你就係要所有嘅巴士減速，你唔係--如果你係要維持所有嘅班次不變嘅時候，你就需要更多嘅巴士、更多嘅司機。返番去我哋頭先講嘅一點，究竟咁樣做呢，還是再裝置更多嘅安全裝置更加有效呢？我哋應該係有所有嘅數據，然後先至做選擇。如果你就咁純粹單一去做一個選擇可能會做錯選擇嘅。

主席：（經傳譯員）呢個 20 里嘅減速，市區，已經係行咗幾耐呢？係對於當地嘅政府機關嚟講？

MR MIKE WESTON：（經傳譯員）我就唔係好知道，我會話係五至十年，就係已經係喺英國各地佢哋呢一個嘅當地政府都係有呢個選擇，唔係淨係倫敦，但係已經係五至十年喇。

主席：（經傳譯員）而家我哋睇番呢個文件係 2013 年 1 月嘅，呢個係一個通告，係運輸部嘅，就話畀本地政府講佢哋可以做啲乜嘢嘢同埋係點樣為之適合嘅車速。

MR MIKE WESTON：（經傳譯員）據我自己嚟講，如果我記得冇錯嘅時候，其實嗰啲本地政府都可能好選擇性去做呢樣嘢嘅，譬如話係有學校喺附近等等，但係而家我哋越嚟越多嘅當地政府就係會喺某一啲嘅地段就有個 20 里嘅車速限制，當然我哋啲人係睇到其實對於嗰個車程時間嘅影響，其實唔係好大，但係就有好大嘅裨益，...

主席：（經傳譯員）你話係而家喺主要倫敦嘅道路都係有嘅？其他嘅道路，譬如 Oxford Street、Clapham High Street 等等？

MR MIKE WESTON：（經傳譯員）我就唔係好肯定，喺呢一個 Blackfriars Road 其實應該都係 20 里嘅，其實都係啲主要嘅道路都係 20 里嘅。如果喺 Oxford Road，你都係可以做到 20 里，其實已經係個交通好暢通㗎喇，因為其實基本上係好擠塞嘅嗰度。

主席：（經傳譯員）鄧律師。

MR DUNCAN：（經傳譯員）我就想畀你幾個參考嘅文件嘅，首先運輸部就係制定速限嗰樣嘢，SEC-3 1003 頁嘅，就係呢一個 2015 年嗰份文件，就係個標題係話行得太快，就如果你係減速一里，就可以喺市區嗰度減低咗撞車就百分之六嘅，然後另外一頁就係 MISC-3 987 頁嘅，主席...

主席：（經傳譯員）呢個文件叫做咩嘢名？係「減速」，係咪嘅意思呀？

MR DUNCAN：（經傳譯員）呢個係安全倫敦街道，我哋嘅方法，我哋嘅方案，呢個係喺 986 頁就話我哋嘅優先次序，第一個首要嘅次序就係話要係解決一個行得太快嘅問題。

主席：（經傳譯員）得，唔該晒。

MR DUNCAN：（經傳譯員）你亦都睇到 2007 年 5 月嗰個一個調查，就係講緊乘客嘅調查，有二千個嘅被訪者，呢個係 SEC-1 第 295 頁可以睇得到。

主席：（經傳譯員）我哋可唔可以擺上去屏幕嗰度，Weston 先生都可以睇得到我之前所提及嘅嗰個調查。

MR DUNCAN：（經傳譯員）第 7 段。

主席：（經傳譯員）係，就係喇，Weston 先生，就係其實都係視乎嗰個問題點問法嘅。

MR MIKE WESTON：Yes.

主席：（經傳譯員）多謝晒，唔該晒。鄧律師，仲有冇其他嘅事項？

MR DUNCAN：（經傳譯員）冇，主席，多謝，唔該。

主席：（經傳譯員）Weston 先生，你有冇最後有一啲嘅嘢你係想我哋特別留意嘅呢？

MR MIKE WESTON：（經傳譯員）冇，唯一一樣我哋冇提到嘅，就係話點樣去鼓勵或者一個合約嗰方面，呢個就我都覺得好奇怪點解你冇提嘅。

主席：（經傳譯員）呢個咁樣嘅，關於呢個課題，其實係去做一啲鼓勵嘅措施或者係安全指標係對於改善安全會有作用或者冇作用還是係有一個負面嘅作用呢？譬如話我哋去獎勵一啲公司，如果佢哋個安全表現係好好嘅，特別喺安全指標嗰方面，咁樣會唔會真係可以改善巴士安全呢？

MR MIKE WESTON：（經傳譯員）喺我個報告裏面，我就有個觀察，就係話呢個巴士公司就有啲關注，就呢個--其實反而會唔會有一個直接嘅財務嘅獎勵，就會令到佢哋唔願意分享資訊等等，但係無論如何，我都想提一提。

倫敦嘅營運者其實向來都好重視安全，所以個問題就係話你有一個財務上獎勵，金錢嘅獎勵，你係想改變一啲嘅咩嘢行為呢？你開始係畀緊啲現金嘅獎賞或者一啲嘅財務嘅獎賞，但係呢一個嘅營運者仍然都係有意外，個問題就係話可能你今年嗰個安全表現相比於舊年就係改善咗，但係你仍然都係有三個人就係死亡，或者係八十個人受傷，但係你仍然都係有個獎金，所以其實嗰個情況就變得好奇怪。

另外一個方法去做就係話你係純粹係扣減，按住個安全嘅表現嚟扣減你個合約價格，但係就係嗰啲嘅營運者，如果佢哋認為佢哋喺安全嗰度表現得唔係好好嘅時候，佢哋係入標嘅時候，佢哋就會將呢樣嘢擺埋落去喇。所以話關於財務嘅一啲獎勵，都係好嘅。喺倫敦運輸局 2015 年嘅文件之中，佢哋都有提到呢一點，佢哋都解釋過就係財務嘅獎金或者鼓勵其實都係好嘅。

另外，其實其他嘅獎勵都可以嘅，可以考慮嘅，譬如我諗到就係話係喺頭

五年個合約期完咗之後，你之後嗰兩年嘅續約就係有個優勢嘅，我哋而家就係話個服務嘅可靠性我哋主要嘅考慮，但係會唔會我哋就係話之前嗰五年佢個安全嘅表現都可以考慮埋喺裏面呢？亦都另外一個方法就唔係話一定財務上嘅獎勵，我對於呢一個嘅安全表現有財務獎勵，我有好大保留，因為你可能--其實佢仍然有意外嘅時候，你仍然係畀緊佢哋嘅獎金，然後或者佢哋係會入標嘅時候將佢計埋個成本落去。

當然可能仲有其他嘅方法嘅，譬如話你係喺頭嗰第三同埋第四年嘅時候，你嗰個安全表現係好嘅時候，你就可以有資格可以續約多兩年嘅，呢個就亦都會係一個幾好嘅鼓勵，就唔係一個財務嘅鼓勵嘅。

主席：（經傳譯員）你用呢一個「鼓勵」呢個字，但係你就係獎金咁，但係你就仍然就你又諗緊呢一個扣減喎？譬如你可唔可以話你獎勵啲人其實今年係有三個人死亡，但係舊年有六個人嘅，所以你就有獎勵，但係另一個方法，你就係可以係扣減嘅，你嗰個畀佢哋嘅錢？

MR MIKE WESTON：（經傳譯員）係嘅，我哋要睇一個合理長嘅時間，而相關嘅營運商佢哋就有啲方法真係可以改變個情況，改變個趨勢，係如果我係得五年去營運嘅時候，我係冇辦法喺五年之內作出改變嘅時候，我就會將呢一條成本就打埋落我嗰個入標價嗰度。

所以我認為所謂嘅獎勵真係可以令到嗰啲人個行為有改變，亦都係可以達到嘅，如果唔係咁，如果--倫敦運輸局應該點樣做呢？咁就會係有一個安全嘅指標，然之後我會畀分，然之後將呢個畀分就係去同佢能唔能夠係兩年續約去掛鈎，呢個就亦都可能會係一個方法去鼓勵到相關嘅營運者嘅。

主席：（經傳譯員）而家目前嚟講，係話可唔可以續約就係關於佢哋嘅服務係咪可靠嘅，係咪呀？

MR MIKE WESTON：（經傳譯員）係，主要嘅考慮係咁，係嘅，如果個營運商係能夠滿足到最低表現嘅要求或者係做得好少少，佢哋就合資格係可以係續約嘅。另外一個獎勵嘅方法就係話，我哋今朝早都有提過，因為我哋常常都會再招標嘅，如果喺--所以呢一個安全表現我哋一直都係考慮嘅，如果你冇個好嘅安全表現嘅時候，我哋運輸局就唔會再係批新嘅約畀你。今朝早我哋亦都係傾咗好耐喇呢一點。

主席：（經傳譯員）有冇其他嘅事項你想提出嘅呢？

MR MIKE WESTON：（經傳譯員）冇嘅。

MR DUNCAN：（經傳譯員）主席，我哋都會想睇一睇，我哋有提到點樣可以獎勵啲巴士司機，就係由巴士公司去獎勵佢哋，特別係佢哋係喺安全係表現得好，你喺呢方面有冇乜嘢嘅意見呢？

MR MIKE WESTON：（經傳譯員）我認為係要有意義，亦都係嗰個司機係可以控制

範圍之內先至可以做。有一間公司有一個直接嘅司機獎勵計劃，後來佢就係將佢納入咗佢嘅底薪嗰度，因為都覺得唔係好有用，冇乜影響，我覺得係可以做嘅，但係要考慮嘅就係話對於司機嚟講係有意思嘅。同埋設計到一個地步，就係司機可以參與嘅，而唔會話「因為我做得唔好，我就係冇咗個獎金。」唔會係一個反效果。同營運商嘅討論，似乎佢哋都唔係好想喺安全方面特別去獎勵司機嘅。

主席：（經傳譯員）有一個營辦商就係話有一個司機就係有被獎勵係 50 鎊嘅，同埋佢後來就係 9 月之後，佢個名就係擺落個抽獎嗰度，佢就係抽到架車嘅，係咪咁呀？

MR MIKE WESTON：（經傳譯員）係嘅，一架新車，呢個就係因為同一個遠程訊息系統有關嘅，亦都係一個好好嘅一個獎勵嚟嘅，佢就係攞到 50 鎊嘅。喺倫敦嘅巴士司機，好似香港都係，佢哋都想成為一個好嘅司機，有一個呢一個嘅好司機名單其實都係好好嘅，啲人就會係有希望得到鼓勵係可以成為榜上有名嘅。對於嗰架車嚟講，其實嗰個價錢都唔係好高嘅啫，我哋講緊係有二千五百個巴士司機嘅。

主席：（經傳譯員）呢個亦都係一個獎勵司機嘅一個例子，係咪？

MR MIKE WESTON：（經傳譯員）但係呢個唔係話係獎勵佢係用佢嘅加薪或者係其他嘅獎金去獎勵佢嘅。

MR DUNCAN：（經傳譯員）唔該晒主席，呢個係咁多喇。

主席：（經傳譯員）Weston 先生，我哋就結束喇，希望你能夠係就住你個報告，倫敦運輸局佢哋係公布咗呢個係 12 月 16 號公布咗架巴士安全標準之後，你可唔可以提交畀我哋呢？對我哋嚟講，係好大幫助嘅，又或者有其他嘅材料，你覺得係對我哋有幫助，都請你提交嘅。

MR MIKE WESTON：（經傳譯員）好，我就會睇一睇可唔可以睇到嗰個嘅教程 Hello London 嘅課程嗰個畀大家嘅。

主席：（經傳譯員）好多謝你，唔該晒你哋有呢啲嘅報告提交畀我哋，同埋係嚟到作證嘅。今日呢一個嘅聽證會都係非常之有用嘅。你嘅經驗，喺巴士業務嘅經驗係非常之寶貴嘅，亦都令到我哋明白我哋對香港可以得出啲咩嘢嘅建議。希望你一路順風嘅，唔該晒。

(10.01 am)

EVIDENCE FROM THE TRANSPORT DEPARTMENT: MS MABLE CHAN, MS AMY LEE, MS AMY TSE, MR PATRICK WONG, MR YK CHAN, MR WILLIAM SHUM, MR TONY YAU

CHAIRMAN: Good morning, Ms Chan, and good morning to your colleagues.

Thank you for accepting our invitation to give further evidence to the committee, to assist us in our enquiries.

At the outset, I would like to make a few observations about what happened yesterday. Yesterday, at 5 o'clock, we received a bundle of documents from the Transport Department. One of them is what appears to be the final version of the report of the Working Group on Enhancement of Safety of Franchised Buses, but we received new documents dealing with the implementation of a road safety audit and a study on low speed limit zones. We received other material in relation to facilities, the arrangements that are made, for bus captains at bus stations.

Now, service of documents at 5 o'clock on the day before a hearing obviously causes difficulties to counsel who are assisting the inquiry, because certainly so far as speed limits are concerned, low speed limits,

20 miles an hour or its equivalent in kilometres, is an area where there is a wealth of material to which you will, in due course, be referred, to assist us. But of course that material isn't available now. It has to be found. It has to be put into our bundles. It has to be scanned so that it can be put on the screens, and so on.

May I simply ask this question: why is it that the documents were served on us at 5 o'clock yesterday?

MS MABLE CHAN: Chairman, if I may? On behalf of the department, I would just like to send apologies to the committee for the late delivery of the papers. Actually, we have followed through the oral hearings since May, when I last attended the hearing at the committee, and we actually followed through carefully and we noted a number of important areas that the committee have expressed keen interest. Amongst those, we are actually giving thought to a number of important initiatives that we have to secure internal clearance and also we are securing additional dedicated resources to implement those initiatives.

So we would love to send those material across to the committee to facilitate your consideration and deliberation at an earlier juncture. Obviously, due to a number of pressing urgent commitments, so we would not be able to do that earlier. So I would send my deep

apology for that. But hopefully, that will also serve as a reference material for the committee. We are not expecting the committee to take that into account in a very detailed way in hearing our further evidence to that, but in any event, we would just like to keep the committee posted of some of the developments within the government and within the department, and actually in parallel we are seeking dedicated resources to push forward a number of those initiatives. So we think that it may help to give the committee an idea of what we are thinking and what we are planning to do.

Thank you, Chairman.

CHAIRMAN: Thank you for that, and thank you for your confirmation that you are following the evidence that we are receiving, and from what I understand you to be saying that you are proactively responding to it, as is obvious from the topics that you have looked at. That is to be welcomed. That is the journey that we are all embarked on and we are pleased to learn that.

But let me give you an example. Apparently, in August of this year, a department of the Transport Department which goes by the initials VSSD issued a new requirement, basic minimum requirement, for electronic data recording device. That is August, the document is dated. Why are we not told about it until October? And

this is a topic we have been raising with various witnesses. Why is it that we are all operating from a requirement promulgated in November 2003, but in fact it's been superseded? Why was this not drawn to our attention?

MS MABLE CHAN: Chairman, that August update is actually a development arising from the deliberation of the Working Group on Enhancement of Bus Safety. The working group has actually gone through a number of rounds of discussions with the various parties involved, and that transpired to some of the updates.

With hindsight, we should have done that, on that particular update, on that document, and informed the committee on that occasion, but we actually have incorporated that as part of the whole working group report.

Let me just add a personal remark to that. It is actually our pledge in previous hearings and in previous submissions that we would like to complete the working group first-stage study within six months. Due to the various urgent commitments cropping up, especially in the midst of the super typhoon, we have not been able to schedule the last working group meeting with our bus operators in early September. Our original target is to finish it by then. So the last meeting had to be

rescheduled to mid-September, and we actually made some fine-tunes to the working group report and made sure that everybody is well aware of the recommendations and the findings of the working group report.

We sent the working group report to the committee at 5.00 last evening, it's actually subsequent to our --

CHAIRMAN: Forgive me for interrupting. Well, that's an improvement, because in the past we've been getting documents during the night, so at least we got it at 5 o'clock and we are grateful for that.

MS MABLE CHAN: We certainly want to improve and we strive for the best, and my deep apology to the chairman for causing you difficulty and inconvenience, but we would like to keep you posted of any of our initiatives in a timely manner. Thank you, Chairman.

CHAIRMAN: The problem is not for the committee. The problem is for our counsel, because it is their job to assist us by testing the evidence that you advance, and in order to do so, they have to draw your attention to relevant documents that perhaps you have not provided but they are nevertheless relevant, and they can't do that in the time that they have been allowed. But thank you for what you have had to say.

Before I invite counsel to begin questioning, is there any statement that you wish to make at the outset?

MS MABLE CHAN: Chairman, I know time is precious, and if you allow I would just like to make brief remarks, just to highlight a few things in response to the interest areas that the committee has indicated and expressed over the last few months.

CHAIRMAN: Please do so.

Opening statement by MS MABLE CHAN

MS MABLE CHAN: Thank you.

Chairman and members of the committee, my team and I are pleased to appear today before the committee today to give further oral evidence in support of the committee's work.

Since our last attendance at the hearings in May, we know that the committee has invited other parties to provide oral evidence and have closely followed through the submissions made by various parties.

As the mission of the Transport Department tells, we strive to provide the world's best transport system which is safe, reliable, efficient, environmentally friendly, and satisfying to both users and operators. Safety is of utmost importance to the transport operation, including the provision of franchised bus services. To this end, we have been trying our very best to monitor franchised bus operations in accordance with the law and having regard to the franchise

requirements.

Since May, we have provided supplementary information for reference of the committee at the committee's request and suggestion. Today, we stand ready to answer any questions or issues to be raised by the committee.

I just wish to highlight a few things to address a number of aspects on which we think the committee has expressed keen interest.

First of all, we have been taking some proactive action in enhancing road safety and developing our road safety management system. To ensure continuous improvement of the system, the department reviews it with reference to overseas practices and experience from time to time. Apart from preparing in late 2017 for embarking on a consultancy study on the review of potential roadside safety hazards in the Hong Kong road network in May this year, following a recent review in May, we have identified a further area of improvement to strengthen the performance evaluation and auditing of the system by introducing a road safety audit mechanism within the Transport Department.

We have proposed to set up a dedicated team to implement road safety audit to all new roads, to enhance road safety in a proactive, comprehensive and systematic

manner, and are securing dedicated manpower resources in this regard.

I wish to add that late last week, we have just got information from the Financial Services and the Treasury Bureau that we would be able to get a few spare hands approved for implementing this road safety audit, and it is on that basis that we can confirm that we will implement this audit mechanism within the department in the coming months.

Secondly, the Working Group on Enhancement of Safety of Franchised Buses has completed its first six-month study and come up with a number of recommendations to further enhance bus safety, including the feasibility of installation of in-vehicle safety devices and equipment and review of training for bus captains.

Chairman, this is not the end, but rather a beginning. The working group will continue its work and will meet on a regular basis so as to monitor the progress of follow-up actions and review the practice note on training framework for bus captains to achieve the best possible industry standard practices.

Meanwhile, I would like to report that the Transport Department is actively taking forward the recommendations of the working group, including the various development and tests, trials and feasibility

studies, with the FB operators and bus manufacturers.

One of the initiatives that the working group has been pushing for is the development of a prototype of the bus monitoring and control system, BMCS in short, for franchised buses. This embraces the black box, GPS, geo-fencing, two-stage speed limiter with mapping against the statutory speed limits.

As a first step, in particular Citybus and New World First Bus have embarked on the phase 1 trial of the BMCS on their whole fleet since 18 September this year, whereby real-time audio alerts will be provided to the bus captains when the vehicle speed exceeds the corresponding legal speed limit.

Apart from overseeing such trials by franchised bus operators, the Transport Department sees the need to push it from ourselves by engaging a service provider to carry out an independent trial on vehicles, to evaluate the applicability and effectiveness of using geo-fencing technology to control vehicle speed, which is one of the vital parts of the BMCS.

We will review the outcome of the trials and will have further discussions with bus operators with a view to developing a clear roadmap for enhancing the franchised bus monitoring through implementation of the BMCS.

Meanwhile, we are also in the process of securing manpower resources to have a dedicated team to oversee transport technology, which will help speed up the process of such trials and initiatives.

Thirdly, we are equally concerned with the welfare of the bus captains and assisting in every possible way in facilitating the provision of ancillary facilities at the bus termini. Since December 2017, the Transport Department has set up a task force with representatives of relevant government departments and franchised bus operators, to monitor the provision or upgrading of the public transport ancillary facilities at public transport interchanges, bus stops and termini, and will continue to work closely with the relevant approving authorities through regular meetings, with a view to speeding up the processing of the applications.

Looking ahead, we will explore in consultation with relevant government bureaus and departments to pursue along the approach of providing such ancillary facilities at new public transport interchanges and bus termini at government cost, while the franchised bus operators will pay the rent and recurrent costs for using these facilities.

In this regard, we will have to pursue this and take it further with the relevant bureaus and departments

overseeing the management of such facilities and also regarding the funding arrangements.

With the latest review of the guidelines of bus captains' working hours, rest times and meal breaks in early 2018, franchised bus operators have started to implement the latest guidelines by phases since the second quarter of 2018, targeting for full compliance by the second quarter of 2019, subject to the recruitment of sufficient bus captains to fill up the shortfall arising from the shortening of duty hours and driving hours of bus captains.

Bus operators have been trying hard to recruit new bus captains and retain the existing bus captains, including improvement in the remuneration packages. This will inevitably have an impact on the franchised bus operators' accounts. A number of developments are happening on this front and I would like to report that by now the government has just received fare increase applications for all of the bus operators, and we will take every effort to process these applications in a timely manner and go through the due process, including consultation with the various approving authorities within the government.

Finally, Chairman and members of the committee, it has always been my intention to personally attend before

the committee during the whole hearing today. Regrettably, due to an urgent commitment to attend a special meeting of the Legislative Council House Committee later this afternoon to discuss the aftermath issues arising from the super typhoon which cannot be rescheduled, I will have to apologise for not joining you throughout the hearing today, but please rest assured that my team members appearing today will continue to offer the best support to the committee for the rest of the hearing, and if necessary for the hearing on Saturday I will be able to join the rest of my team to help the committee for your work.

Thank you very much, Chairman.

CHAIRMAN: Thank you, Ms Chan, and thank you for your explanation which we were informed of in advance about your unavailability this afternoon. Of course we understand that, and I hope that the commencement of proceedings today hasn't given you a bad start to that whole day.

But I would ask counsel now to start asking questions. Thank you.

MS MABLE CHAN: Thank you.

Examination by MR DEREK CHAN

MR DEREK CHAN: Thank you, Ms Chan, for those opening remarks. I will be kicking off the questions today on

a number of copies topics, and Ms Maggie Wong, senior counsel, will carry on questioning on other topics, possibly later today or on Saturday, so it will be mostly me today.

Ms Chan, can I start off with the first topic, and that is on the issue of competitive tendering in Hong Kong, and by competitive tendering I am referring to both competitive tendering of franchises as a whole or individual bus routes.

Just to give you some context to my questioning, the committee has heard evidence from two overseas experts, Mr Weston and Prof Stanley, on the operating environment of urban buses in London and Melbourne respectively. Have you had an opportunity to go through that evidence?

MS MABLE CHAN: Yes.

MR DEREK CHAN: In that case, rather than taking you in detail through the report, perhaps I will just summarise the position so that the questions I am about to ask will have some proper context.

Firstly, the situation in London is that all urban bus routes are open for competitive tender, with contract lengths of five years plus a possible extension of two years, after which the route will be open to competitive tendering again. So that's the situation in London. The market is dominated by six large bus

groups, comprising of around 94 per cent of the bus network.

Mr Chairman, just for the reference, on record, that's the expert bundle, page 126, in Mr Weston's report.

CHAIRMAN: Yes. I'm familiar with the table.

MR DEREK CHAN: So that's London.

In Melbourne -- again, since you have been through the evidence, I will just summarise it instead of going to the report -- about two-thirds of the bus network in Melbourne are subject to negotiated contracts, and there are about 15 contracts with 12 operators.

Again, just as a matter of reference, that's Day 16 of the evidence, page 34, line 3.

Secondly, about one-third of the bus network in Melbourne is provided for by way of a single contract across a defined spatial area that is subject to competitive tendering. The contract length would be seven years.

Again, the reference, if I may just put it on record, is Day 16 of the evidence, pages 22 to 27.

So that's the position in London and Melbourne.

Now, in Hong Kong, before I ask questions on that, can I just take you to an annual report of Transport International Holdings, which is the parent company to

KMB. I'm taking you to the 2015 annual report at KMB-5, page 1523.

CHAIRMAN: For which year?

MR DEREK CHAN: 2015.

CHAIRMAN: Thank you.

MR DEREK CHAN: Do you have that, Ms Chan?

MS MABLE CHAN: Yes.

MR DEREK CHAN: You are looking at page 32 of the annual report for 2015, which is page 1523 of our bundle. Can I just draw your attention to the column at the right-hand side of the page, at the first paragraph of that column. I will just read it out into the record:

"In 2015, two competitive tendering exercises for new bus routes were finalised by the HKSAR Government, and KMB was awarded both tenders. As a result of the first tender, routes 290 and 290A were introduced in March 2015 to operate between Tseung Kwan O and Tsuen Wan. The call for tenders for the route package for Anderson Road Development Area was made in mid-2015 and KMB was notified that it had been award the tender in November 2015. Services on the routes will commence in phases from the first quarter of 2016 in line with the population intake."

So there is a reference to some competitive tendering of routes in Hong Kong. So, in the context of

all of this, I have a number of questions for you. The first one is: what is the scale of competitive tendering that exists in Hong Kong at the moment?

MS MABLE CHAN: I do not have the ready figure in quantifiable terms, but as this statement in the KMB report pointed out, there have been a number of occasions whereby, should there be a new town development, a new social transport need emerging, or there is any particular circumstances whereby a package of routes would involve profit-making or non-profit-making, then the Transport Department will venture out to proceed with competitive tendering.

Let me quote a recent example. It is the high speed rail station in West Kowloon. We have introduced three routes, one from Admiralty to West Kowloon, the other one is from Kwun Tong to West Kowloon, and the last one is from Sheung Shui to West Kowloon. We have actually discussed the needs and designed the routing, and then we have packaged the tender exercise in a way to facilitate competitive bidding, while striving for a sustainable financial operation of the routes involved.

The outcome is that -- colleagues perhaps may supplement on that -- one route is awarded to Citybus Ltd --

CHAIRMAN: I was at that bus station yesterday.

MS MABLE CHAN: Yes. One route is awarded to Citybus Ltd and two routes are awarded to KMB.

For the reference of the committee, in the last two routes awarded to KMB, our internal guesstimate is that one of the routes would not be profit-making, and it is through this competitive tendering strategy that we would like to invite competition, although the spatial area of the new routes may be perceived to be well served or well covered by KMB, that doesn't stop us from venturing out to proceed with competitive tendering to attract competition while achieving sustainable financial operation of the routes involved.

Let me also quote another example. It's the Hong Kong-Zhuhai-Macau Bridge new routes. We also proceed with a competitive tendering whereby we have awarded at least one route to the New Lantao Bus Co Ltd, and the route actually straddles service areas which is currently also served by the major bus companies like KMB.

My point is just to answer senior counsel's question that under our current franchise model, we will also proceed with competitive, route-by-route, tendering exercise.

Thank you.

MR DEREK CHAN: After the hearing, or later on if possible, can you give us some actual numbers of the proportion of routes that are now subject to competitive tendering and also the contract details --

MS MABLE CHAN: Sure.

MR DEREK CHAN: -- of those competitively tendered contracts?

MS MABLE CHAN: Yes.

MR DEREK CHAN: Thank you very much.

CHAIRMAN: Before you move on, if that's what you are going to do -- the competitive tendering what you've described, has that been of the open public competitive tendering nature, or restricted to certain participants?

MS MABLE CHAN: Perhaps I would ask my colleagues to supplement on that detail.

CHAIRMAN: Certainly.

MS MABLE CHAN: Amy Tse.

CHAIRMAN: Ms Tse.

MS AMY TSE: The operator selection exercise is restricted to the local market, namely the Citybus, the New World First Bus, the Long Win, KMB and New Lantao.

CHAIRMAN: So restricted to those operators that currently hold one or more franchises; is that the case?

MS AMY TSE: Yes, in the local service market.

MS MABLE CHAN: Local franchised bus operators.

CHAIRMAN: Five bus companies?

MS MABLE CHAN: Yes.

CHAIRMAN: Were these tenders in that restricted market -- were they promulgated publicly so it was known by an interested member of the public that this exercise was going on?

MS AMY TSE: Before we conduct the operator selection exercise, when we plan the routing, we will consult the district councils involved on the routings and the details.

CHAIRMAN: Did you inform the district councils that you proposed to embark upon a tendering exercise restricted to these five bus companies?

MS AMY TSE: We will inform them that we will select the operators and based on the routings and the details and any comments they can provide.

CHAIRMAN: So you were consulting them about routes, not about how you were going to tender? Is that the position?

MS AMY TSE: Yes.

CHAIRMAN: So, if an interested member of the public wanted to find out about, for example, West Kowloon -- we've built this new bus station, next to the Express Rail station -- who's going to be running the buses, how would he have found that out, in advance of it actually

happening, in other words? If he had turned up, like me, yesterday, he would have seen a Citybus going to Admiralty, and he would have seen KMB buses going elsewhere, but how would he have known in advance?

MS AMY TSE: We will just inform the district council and conduct the consultation with the district council.

CHAIRMAN: So this is reflected in correspondence, is it?

MS AMY TSE: Yes.

CHAIRMAN: Is it reflected in the minutes of the councils?

MS AMY TSE: Yes.

CHAIRMAN: So perhaps you could provide us with that correspondence, and if you've got the minutes, can you provide us with the minutes?

MS AMY TSE: Yes. Okay.

CHAIRMAN: Thank you.

Prof Lo.

MEMBER LO: I just want to find out more about the tendering process. Does it involve the safety record of the company when you award a route contract, or what is being considered? What are the major factors? Is the fare being considered? What are the factors that award one route to one company and not to the other?

MS AMY TSE: Fare is one of our criteria to assess. The other is the accident rate that we would also compare.

MEMBER LO: So how exactly do you compare the accident rate

of two companies? Do you have parameters or do you have factors you look at in a very explicit manner, so people can actually know in a very transparent manner?

MS AMY TSE: It will be assessed based on the existing parameters, like the number of accidents involvement rate, as we are now using -- in the vehicle-kilometre that we are now using as a parameter.

CHAIRMAN: These are statistics that one has seen in the forward planning bus safety sections of the companies; is that what you are describing?

MS AMY TSE: Yes, and the number of accident rates in the past three years.

CHAIRMAN: But do you give any weighting for different kinds of accidents, for example an accident kills ten people or an accident where an old lady falls over in a bus? Do you weight them?

MS AMY TSE: We will count all the types of accidents.

CHAIRMAN: But do you give different weightings for them? Do you understand my point?

MS AMY TSE: No, we do not give the weighting to different types of accident. We take it as a whole.

CHAIRMAN: So it's a raw figure?

MS AMY TSE: Yes.

CHAIRMAN: The number of accidents per millions of kilometres or whatever statistic you use; is that it?

MS MABLE CHAN: Chairman, if I may --

MS AMY TSE: Yes.

MS MABLE CHAN: -- I would ask Amy or Patrick to elaborate a little bit, that there are a number of factors that they will consider in a restricted tender exercise. So, in response to the member's question about safety, Amy has quoted the indicator that we have used and made reference to in the forward planning exercise. Apart from the safety factor, there are a number of other factors regarding performance and service standards that they will also consider.

I would suggest we will provide, after the hearing, the factors considered in the marking scheme --

CHAIRMAN: Thank you.

MS MABLE CHAN: -- for the complete reference for the committee.

CHAIRMAN: Yes. Thank you very much. If you could provide that before we have our hearing on Saturday, then we would be in a position to ask questions that might arise. Can that be done?

MS MABLE CHAN: Yes, sure.

CHAIRMAN: Thank you.

Yes, Mr Chan.

MR DEREK CHAN: Thank you.

Ms Chan, on the issue of the safety performance

indicator, it is a matter I will come to in a moment, but before I move on, may I just pick up on a question Prof Lo asked, about whether fares is a criterion. Can I just understand -- so in the tender exercise, the bidder will put in a proposed fare for the route; is that correct? So it's not set by the government?

MR PATRICK WONG: No.

CHAIRMAN: Sorry, was there an answer to that?

MR PATRICK WONG: Actually, because it's competitive tendering, the bus company will put forth their proposed fares, which we have -- the fare scale governs the maximum fare per distance. Each company has their own fare scale. So whenever they submit a bid for the particular route under tender, they would put forth their proposed fare, which may be below the ceiling fare level under the scale I have just mentioned.

CHAIRMAN: How is the ceiling fare made known to the bus company?

MR PATRICK WONG: It's been gazetted and basically published.

CHAIRMAN: Is that a fare per kilometre and how is it articulated?

MR PATRICK WONG: Basically, they set different kilometres with different fares. In other words, the longer distance, they can charge higher fares. Also, it

depends on different service types they provide. For example, some recreational routes which can be operated on Sunday and public holidays, they can be allowed to charge higher fares, and overnight services, they can be allowed to charge higher fares, and so on and so forth.

CHAIRMAN: And this is gazetted?

MR PATRICK WONG: Yes.

CHAIRMAN: Can you provide us with a copy of the current version?

MR PATRICK WONG: Yes, sure.

CHAIRMAN: Thank you.

MR DEREK CHAN: Would these fares still be subject to the fare adjustment mechanism for the normal franchise agreements, or are they separately considered? So, once they have bid for the route, according to the contract price, and they want to increase it later on, is it done under the same mechanism?

MR PATRICK WONG: Yes, once they offer and we accept the tender, the fare will be charged in accordance with that fare, and if they want to raise that fare they are subject to the fare increase mechanism, as you have just mentioned.

MR DEREK CHAN: If I understand correctly, from a policy perspective, this competitive tendering exercise would be restricted to new towns, or new developments, when

a package of routes becomes available.

Are there any plans, that the government may or may not have, to expand the scope of competitive tendering, and if so to what extent?

MS MABLE CHAN: Perhaps I will answer that question.

It is always the government's objective to promote competition and to improve service standards. As a forward-looking perspective, there are a number of new development areas or districts like in the New Territories or even in the urban Kowloon, like the Kai Tak development. So, while we are venturing into competitive routing in such new town developments or new area developments, should there be any routes that straddle across these new areas to the existing built-up area, like between Kwun Tong and also the Kai Tak East development, then we also will try out the approach of competitive routing, route-by-route, tendering approach.

Looking ahead, under the current franchise model, it will not preclude us from doing more in this regard. I also wish to add that from the past experience, should a franchised bus operator fail in the service standards or compliance with the franchise requirements, like in the 1990s there has been occasions that we actually suspend the operation of certain routes or certain package of routes, like in the case of the China Motor

Bus, and then we take out those routes or package of routes for competitive tendering, to invite new operators to operate those routes. So there is always the opportunity for us to do more and to use this as a vehicle to salvage the service performance of existing operators.

Thank you.

CHAIRMAN: When was the last open, public, competitive tender in Hong Kong for bus routes? Open public.

MS AMY TSE: It was at 1998, when we first tendered the routes for the airport service.

CHAIRMAN: Thank you.

MS AMY TSE: Sorry, to China Motor Bus, in 1998.

CHAIRMAN: So such competitive tendering as there has been since has all been restricted competitive tendering?

MS AMY TSE: Yes.

CHAIRMAN: Thank you.

MR DEREK CHAN: Are there any plans, or at least plans under consideration, to subject the old routes currently under the franchise agreements -- subject those routes to competitive tendering, in an open manner, not just restricted to Hong Kong incumbents?

MS MABLE CHAN: At the present moment, we do not have immediate plan, but we would not rule out such opportunity because we always keep in view the service

performance of the various franchised operators in terms of various bus routes.

MR DEREK CHAN: If I may then move on to the next topic, which is the use of, firstly, safety indicators or safety performance indicators. I will also ask questions about the virtues or non-virtues of using incentives or penalty clauses in contracts linked to such a safety performance indicator.

If I may take it step by step, firstly, by looking at the concept of a safety performance indicator. I would like to start by looking firstly at what is currently used by the Transport Department, and then later on ask for your comments on the evidence that this committee has received in terms of possible improvements in this area.

Before I go to the details, can I start off by asking you to clarify one aspect of the full report of the Working Group on Enhancement of Safety of Franchised Buses. That may or may not have relevance to this topic, I'm not sure, so I want to ask you to clarify that.

That report has made it into bundle TD-5.

Mr Chairman, I don't have the page references. If I may just use the paragraph numbers of the report at this stage.

CHAIRMAN: Yes.

Ms Chan, do you have the report in front of you?

MS MABLE CHAN: Just a minute.

MR DEREK CHAN: Please take your time.

MS MABLE CHAN: Yes, I am ready.

MR DEREK CHAN: Mr Chairman, just for the record, the first page of the report is at page 1757 of TD --

CHAIRMAN: As normal, I am working on the document that was provided overnight, so I don't have page numbers, as is normal.

MR DEREK CHAN: So am I. Perhaps I can just put the page numbers in for the record of the transcript, so that when we come back to it later on, we have a page reference there.

The first reference is TD-5, page 1757, and I wish to refer you to paragraph 4.26, which is page 1798 in the bundle.

Just to give some context to this paragraph, this paragraph is contained in a section on training, so at first blush it may not be relevant to the topic of safety performance indicators. So I may just invite you to clarify.

If I can just read out 4.26 first:

"The working group considers that in order to ensure that adequate and appropriate trainings are provided to

bus captains, all franchised bus operators should also enhance their internal monitoring and audit mechanism for the training of bus captains, including developing key performance indicators, monitoring the implementation and their effectiveness, and formulating appropriate remedial follow-up actions."

And the rest of the paragraph talks about reporting to management.

Can I just ask you to explain what you mean by development key performance indicators; what is it a reference to?

MS MABLE CHAN: This key performance indicator is regarding the training of the bus captains and it is not directly relevant to the safety performance indicator as you may have mentioned at the outset. For the committee's background, in the past, the franchised bus operators have volunteered to set an indicator for their training, say the number of bus captains to be trained in the past three years.

MR DEREK CHAN: I see.

MS MABLE CHAN: This is just a starting point, but with the promulgation of the practice note on the training framework of bus captains, one of the issues and observations that we have found is that by just relying on one single indicator of the number of bus captains to

be trained in the past three years, it does not suffice to achieve the training requirement of bus captains.

The proposal of developing key performance indicators will cover the performance of the bus operators, in providing training of in-service bus captains for refresher course, remedial course, and also for those that are necessary to rectify the driving misbehaviour of those bus captains committing traffic offences. And, on the other hand, we have also observed that while the bus operators have mentioned that they will provide behind-the-wheel training for the in-service bus captains, this may not be actually provided for the in-service bus captains to the extent that we expect. Say, for example, some of the behind-the-wheel training will actually involve that particular bus captain watching behind another bus captain behind the wheel, so he's just observing from behind. So this does not fulfil the expectations of behind-the-wheel training.

So we are expecting the franchised bus operators to develop key performance indicators along these fronts, so that it is easier and more efficient for the bus operators to achieve an internal monitoring and audit mechanism.

We are also expecting them to provide regular

reports. If I remember correctly, it's half-yearly, at least half-yearly, to their management boards. On the other hand, they should also provide exceptional reports to the management boards on their training indicators and the effectiveness of their training. In parallel, these reports should be provided to the Transport Department for our regular monitoring and also for us to review with them in our regular meetings with them, with their senior management.

Thank you.

MR DEREK CHAN: For my purposes, just to make it clear, these performance indicators do not relate to driving behaviour as a result of the training?

MS MABLE CHAN: In a way, it is a training target.

MR DEREK CHAN: Training target. Thank you for that clarification.

If I may then move on to looking firstly at how safety indicators are presently, currently, being used by the Transport Department.

Can I do that by first taking you to the bus safety section of KMB's forward planning programme for 2018 to 2022. The page reference for that is TD-1, page 180.

Just to remind you of the context, this would be a document prepared by KMB and submitted to the Transport Department around mid-2017, which relates to

the next five years, 2018 to 2022.

If I can take you immediately to page 192 of this document. Under paragraph 8.8.1, under the heading "Proposed Target and Other Measures", the paragraph states as follows:

"KMB proposes to use the 3-year average of 2014 to 2016 actual accident involvement rate of 2.71 (defined as the number of buses involved in accidents per million kilometres operated) as a target for the purpose of this five-year plan period. It represents a 6 per cent reduction from the accident rate in 2014, the highest record among 2014 to 2016."

So the point that I wish to draw to your attention, before I move on to the next document, is that the target that KMB set for themselves is 2.71.

Can we then move forward a year to see what happened in 2017, so the next document that I wish to take you to will be the next forward planning programme for 2019 to 2023, and the page reference for that is TD-5, page 1728.

Do you have that before you, Ms Chan?

MS MABLE CHAN: Yes.

MR DEREK CHAN: Page 1728, first of all, is a letter from the Transport Department to KMB, dated 21 May 2018, basically providing KMB with a list of what needs to be

included in the next forward planning programme. So that's the context.

MS MABLE CHAN: Yes, please.

MR DEREK CHAN: Then over the page, at 1729 to 1731 is your letter to KMB as to what needs to be included in the next FPP.

If I may just read the first two paragraphs of page 1729, under the heading of "Bus Safety":

"We note that there was an increase in the number of KMB buses involved in accident per million vehicle-kilometres from 2.74 in 2016 to 3.04 in 2017, which was at a high level.

The table below which summarises the number of KMB buses involved in the traffic accidents by severity of accident from 2015 to 2017 reveals that there was a decrease in the number of fatal accidents from 11 cases in 2015 to 3 cases in 2017. However, the number of slight traffic accident has shown an increasing trend from 737 in 2015 to 866 in 2017. Also, the actual accident involvement rate, which is 3.04 in 2017, was higher than the proposed target accident ... rate in your FPP (2018 to 2022), which was 2.71."

So KMB did not meet a target that it set for itself. And we can see in the table below the two paragraphs I just read the number of KMB buses involved in traffic

accidents as a rate per million vehicle-kilometres had been increasing from 2015 to 2016 to 2017, the rate being 2.62, 2.74 to 3.04.

The second table below on that page also shows an increasing number of traffic accidents involving KMB buses throughout the same three years.

So it would appear from this analysis -- and please correct me if I am wrong -- that the two safety indicators that the Transport Department focused on here are, firstly, accident rates per million vehicle-kilometres, and secondly, the number, the absolute number, of traffic accidents involving KMB buses.

Would that be a fair summary?

MS MABLE CHAN: Yes.

MR DEREK CHAN: Then we can skip forward to page 1731, which is the last page of that letter. Under subparagraph (4), the heading is "Target for target accident rate", and can I just read it out. The Transport Department says:

"Your company is required to

a. propose target accident rate for the coming FPP to pursue continuous improvement to the safety of your operation

b. propose target reduction of accident involvement

rate per million kilometre yearly for the coming five years."

Again, the focus is on the accident rate per million vehicle-kilometres. Can I explore with you the utility of using this accident rate per million vehicle-kilometres rate as a safety performance indicator.

Firstly, would you agree with me this rate covers both accidents where the bus driver is at fault and also accidents where the bus driver is not at fault? Would that be correct?

MS MABLE CHAN: This is a general indicator of counting the number of accidents. So the number of accidents may cover some of the accidents involving driver's fault or may not. The causes of the accidents may be multiple and the investigation of the accidents and also the determination of the causes of whether the driver is a contributing factor will be subject to the judicial proceedings.

Thank you.

CHAIRMAN: So the short answer is "yes"?

MS MABLE CHAN: Yes.

MR DEREK CHAN: And, therefore, this rate includes factors to which the bus driver or bus operator cannot control; would you agree with that?

MS MABLE CHAN: Yes.

MR DEREK CHAN: With that in mind, can I refer you to the evidence of Prof Stanley on this point, and can I invite your observations or comment on that.

Can I firstly take you to the transcript of Day 16, which is 15 September 2018, which should be in transcript bundle 7, page 67.

I would like to pick it up at page 67, line 16. Just to give you some context to the answer, I was asking questions of Prof Stanley about using a benchmark safety performance indicator as a trigger to a penalty or incentive clause. But can I just pick it up on line 16, where Prof Stanley talks about what he would expect to be included in a safety performance indicator. I will just read it out for the record, at line 16:

"I would just make a few comments which -- I talked before the break about, for example, fatalities, 'slips, trips and falls', and so on, being some of the sorts of things you might take into account. In terms of developing KPIs [that's short for key performance indicators] or performance indicators, there's a number of criteria that you would expect them to meet. They need to be specific. You've clearly got to be able to measure them. They ought to be achievable. They clearly need to be relevant. The data, and so on, needs

to be available on a timely basis. And all of those KPIs need to be something that the operator can affect. There's no point having a KPI if the operator is not able to, by their performance, influence the outcomes of them. So they are really important."

In the same vein, can I also take you to page 93 of the same day's evidence, and can I pick it up at line 22 of page 93. Again, just to give you some context, looking at the exchange above, the discussion was about whether the indicator includes something that the operator has or has not control over. At line 22, Prof John Stanley says this:

"I think, when we were talking about the criteria for indicators, it needs to be something that you've got control over."

So, given that we have just looked at the accident rate per vehicle-kilometres, which includes pretty big weighting of accidents to which the bus operator has no control over because the bus driver is not at fault, what observations do you have in terms of Prof Stanley's suggestion of what a performance indicator ought to include, something that the bus operator does have control over? Do you have any observations in that regard?

MS MABLE CHAN: Firstly, in terms of key performance

indicator, I think it serves the purpose of having -- of serving as a management tool or indicator for both the regulator, ie the Transport Department, and the franchise operators, to review their performance in the aspect of safety at the outset.

As I answered your question a minute ago, in terms of road transport or land transport, there could be a number of contributing factors leading to accidents. While following this KPI in terms of the number of accidents in absolute terms and also the number of accidents per million km, we are also in the process of the forward-planning exercise, digging into the analysis of the nature of accidents, in terms of the bus type, bus model, the type of accidents, be it collision or non-collision, and also the age of the drivers involved, the routes of those accidents involved. Merely relying on the KPI will just help us as a very high-level tool to evaluate the overall safety performance of a franchised bus operator, but that would not suffice. We are actually asking the franchised bus operators to cover in their safety chapter, as we have provided in May for the committee's reference, that they actually have to break down those accidents by the various categories that I have just mentioned.

In fact, my Bus and Railway Branch and also the Road

Safety and Standards Division have joined hands in analysing the trend of the accidents according to the various categories as I mentioned, in order to evaluate in more detailed terms the safety performance of the franchised bus operators.

MR DEREK CHAN: Ms Chan, if I may -- obviously, if you want to expand, please let me know -- but my question is more focused on the indicator. Obviously, the evaluation, as you have mentioned, it is important to dig deep into different causes and all that --

CHAIRMAN: Forgive me for interrupting, Mr Chan, but I think this matter can be put very simply. You don't agree with Prof Stanley that a KPI must be something that a bus operator can influence the outcome? You don't agree with that?

MS MABLE CHAN: To answer your question, I would not agree, because a KPI, in terms of a management tool --

CHAIRMAN: That answers my question. Let Mr Chan pursue his question.

MS MABLE CHAN: Thank you.

MR DEREK CHAN: Thank you, Chairman.

You mentioned analysis and the different causes and breakdowns and all that. From my reading of the documents, there is no targets at all set for the bus company in respect of individual categories of analysis.

The only target that I can see is this accident per million vehicle-kilometres.

So, in terms of using something as a target, do you agree that you should be using something that the bus company has control over?

MS MABLE CHAN: If we are operating in a vacuum, and in taking a purist approach, it would be good if we can have some KPI that a company can have full control. But, as I have answered the chairman's question, I do not totally agree that a KPI will have to be fully controlled by a company, because it is an indicator, to start with, and it serves as a basis for us to evaluate its performance. Because the accidents are complex and could be contributed by various factors, it is by our detailed analysis of the various types of accidents and the nature of accidents involved that we can start to dig deep into the various other related performance indicators.

If I may, you have mentioned about the training targets. In the working group discussions, the safety is our utmost concern, and while the company may not have full control of the number of accidents involving their buses in a particular year, as far as the bus type, the bus safety and the bus captains are concerned, there are a number of ways that they can help to bring

down the number of accidents in absolute terms and also the number of accidents involved per million kilometres.

It is actually on this front that we have come up with the practice note, and then to expect them to develop key performance indicators on training, and also with the update of the specifications of the black box, and also with the installation of the CCTV, all these devices will help the company to investigate whether or not a driver is particularly involved or cause fault to that accident or there are other contributing factors.

So we will take all this into account in evaluating whether the company has tried its best in providing a safe bus, as also to equip the driver with a safe driving behaviour and attitude.

MR DEREK CHAN: So, when you are weighting these various different incidents and analysis that you are talking about, different aspects, different causes, you investigate through CCTV and all that, so the weighting will be done in your head?

MS MABLE CHAN: Perhaps it would be helpful if I quote an example of how we would deal with this. Say in the case of KMB, we have pointed out that its accident rate has actually exceeded its pledged target. We have asked them to provide further analysis in terms of the nature and category of the accidents. Our initial observation

has found that the number of non-collision accidents have actually increased relatively over the last year, and the installation of the black-box device and also the CCTV would actually help the company to advise us of whether or not there is something wrong with a particular bus model or whether there is something wrong with a particular bus captain's driving behaviour, that has led to the increase in non-collision accidents involving the falling of passengers or losing of passengers' balance within a bus.

There are a number of routes, say, for example, that we may observe there are higher occurrence of such kind of accidents. We actually go deep down to that level of detail to investigate and to ask the companies to come up with focused measures. If the chairman and members may remember correctly, when we last presented the safety chapters, you can see that the companies have presented quite standard paragraphs on the improvement measures to enhance safety, but I think since the last submission of the FPP we have actually, with the comparison of the analysis of the accident trend, gone deep into the accident analysis and asked them to provide focused measures to address the various occurrence of accidents by bus routes, by the bus type, and also by the type of the accidents. This will help

us with the reference of the KPI, as a start, for us to evaluate in a more comprehensive and holistic manner the safety performance of franchised bus operators.

CHAIRMAN: Where is this request of the bus companies that they perform a more detailed analysis?

MS MABLE CHAN: We have written to the various bus operators, setting out our requirements. One of the examples is just illustrated in the bundle, our letter to the KMB. We can certainly provide other letter samples for the committee's reference. And following the issuance of those letters the various franchised bus operators are in the process of finalising the coming forward planning programme, in particular the safety chapter. So the process is developing and is evolving.

The whole FPP exercise will end by the end of this year, by which we will submit the finalised FPP, including the route planning exercise, as well as other chapters, in particular the safety chapters, to the bureau for the agreement -- in accordance with the law.

CHAIRMAN: This is delayed compared with previous years, is it not?

MS MABLE CHAN: Sorry, Chairman?

CHAIRMAN: Is this not a delay compared with the normal timetable for the forwarding of the forward-planning exercise?

MS MABLE CHAN: I think it is more or less in line, but obviously --

CHAIRMAN: So it will be the end of the year before the bus companies have given you this safety chapter in their forward-planning exercise?

MS MABLE CHAN: To be correct, the franchised bus operators have submitted a draft of the FPP, including the safety chapter, by the deadline --

CHAIRMAN: The deadline being?

MS MABLE CHAN: End of June, and it is supposed to be around the end of September/early October that we will come back to them with comments, and hopefully we will reach some sort of agreement on the contents of the chapter, and then it will take us from early October to the end of this year for us to submit to the bureau and for clearance of the FPP.

CHAIRMAN: Is there not some statutory requirements about this timetable?

MS MABLE CHAN: It is a statutory requirement, correct.

CHAIRMAN: Can you remind me where this is to be found? The dates you have mentioned, as I recall, it was the end of June and certainly September.

MS MABLE CHAN: End of September, yes.

While me colleagues are searching through the bundles, you are correct, there are two dates mentioned

in the ordinance. They have to submit by the end of June, and then we are supposed to reach agreement with them by the end of September --

CHAIRMAN: Otherwise, you can go for an arbitration via the Secretary for Transport and Housing; is that right?

MS MABLE CHAN: Yes, and the process beyond September and taking us to the end of December is the internal process for us to seek the clearance from the Secretary for Transport and Housing, when we will submit all the details of the route planning exercise.

CHAIRMAN: Which is why I asked the question. Are you not past 1 September or the end of September? Have you reached agreement with the bus companies?

MS MABLE CHAN: The date of end of September has passed. In this particular year, because of a number of questions we have posed to the operator, we are expecting them to provide supplementary beefing-up sections to the safety chapter, and that is why by now they are still finalising the additional pieces of information to the safety chapter.

CHAIRMAN: So you haven't reached agreement this year yet?

MS MABLE CHAN: No.

Chairman, the reference to the statutory provision is clause 12A of the Public Bus Services Ordinance.

CHAIRMAN: Thank you. When do you expect to reach agreement

this year?

MS MABLE CHAN: We hope to agree with them as early as possible.

CHAIRMAN: Obviously, but do you have any expectation when that might be achieved?

MS MABLE CHAN: Perhaps a piece of information: we have recently met with Citybus Ltd and New World First Bus on the FPP, and we are also arranging a meeting with the KMB and Long Win on the FPP. So a lot of work is underway for us to reach an agreement as early as possible.

CHAIRMAN: You've said that twice now. Are you unable to put a date on it? If you are, just say so.

MS MABLE CHAN: I cannot mention a date at this juncture, but it is my objective to reach an agreement as early as possible, because we also have to finalise the routes for the next year, for the planning purpose and for early dissemination to the public of information.

CHAIRMAN: Yes, Mr Chan.

MR DEREK CHAN: Mr Chairman, again just for the record, section 12A, the section Ms Chan referred to, is contained in THB-2, page 109.

CHAIRMAN: Thank you.

MR DEREK CHAN: An earlier question by the chairman is about your request to the bus operators to provide further

breakdown of the causes. I think one example of that would be at TD-5, page 1729 to 1730, which is the document we have just been looking at.

At page 1728, the letter dated May 2018, and then at the bottom of page 1729 you require the KMB to conduct an analysis of traffic accidents, and over the page you ask them to analyse the traffic accidents related to non-driver factors.

So is that the sort of request to bus companies that you were referring to in your evidence?

MS MABLE CHAN: Yes. And actually over the page on 1730 there is also a long list of the analysis that we are expecting the company to conduct and provide.

CHAIRMAN: At page 1729, the bottom of that page, "Your company is required to (a)", and then the last sentence:

"The analysis shall include the trend, the nature and causes of the accident, as well as the reasons for the increases."

So you are requiring them to give you causes?

MS MABLE CHAN: Yes.

CHAIRMAN: Is that developed further on the next page, 1730?

MS MABLE CHAN: Yes, Chairman.

CHAIRMAN: Perhaps you can point out where that theme is developed. Just read it out, when you find it.

MS MABLE CHAN: Okay.

So we are expecting the company to provide further analysis on the identification of the causes of the accidents and whether there are any common factors in the accidents as identified. This will provide a basis for them to tell us what specific proposals or the improvement measures and programmes that they will provide. Say in the case of non-collision accidents involving falling passengers, the location of the passengers, are they along the stairs or are they on the lower deck or the upper deck.

CHAIRMAN: Where is that spelt out in this letter?

MS MABLE CHAN: I am just giving an example of --

CHAIRMAN: Before you give an example, can you read from the text anything that supports what you are saying? We've got this phrase "You are required to give us an analysis of the nature and causes of the accident", that's page 1729.

MS MABLE CHAN: Yes.

CHAIRMAN: All I'm asking you is: is that developed further on the next page?

MS MABLE CHAN: It is further developed on the next page, down the page of 1730 we have mentioned the safety-related plans, Chairman.

CHAIRMAN: Yes.

MS MABLE CHAN: So with a view to lower the accident

involvement rate of buses and to further enhance the safety of buses provided to passengers, we are expecting them to propose the respective specific plans and proposals: to enhance the existing monitoring system or introduce new monitoring system on the safe driving of buses; to enhance the awareness of the company's employees on the consequences of the monitoring system, what sort of disciplinary action and penalties that may have; and also to develop action plan for automation of monitoring of bus captain driving behaviour through the data captured in black boxes of similar devices; as well as to propose publicity plans and programmes in the next two years to enhance passenger safety.

And also, over the page, to 1731, we also expect them to provide programmes in the next two years to enhance bus captain training for part-time and full-time bus captains respectively -- this is also related to the working group recommendation on the training framework. And to provide a programme of surveys to assess the utilisation rate of seat belts on buses which are installed with 3-point seat belt on all seats as suggested in the 2018-2022 FPP submitted to the Transport Department.

On this latter point, we are also picking up some of the initiatives they mention in the previous FPP and we

are expecting the company to follow through with assessment and survey to evaluate the effectiveness and utilisation, so that they can provide us more detailed data and information for us to monitor the effectiveness.

CHAIRMAN: Just coming back to page 1730, at the top, three or four lines down, "Analysis on traffic accident related to non-driver factors", and then there is a lot of detail about that.

There is no requirement that I can see where there is to be an analysis of driver-related factors, if a driver braked too harshly because he was going too fast as he approached the bus stop. Where is the requirement to give you that analysis?

MS MABLE CHAN: Chairman, in the case of the KMB, here we do not specify to that extent and ask them to provide detailed analysis as to what kind of behaviour of the driver has caused the traffic accidents. But can I quote the example in the Citybus, whereby they are upgrading the black-box specifications and the installation. They are actually keeping a log of the events caused by the driver and those will be the cases whereby is there any very speedy acceleration or speedy deceleration.

CHAIRMAN: 50 per cent of all accidents that are

non-collision are loss of balance, are they not?

MS MABLE CHAN: Yes.

CHAIRMAN: And it's obvious beyond imagination that that must be related to braking, accelerating or swerving, for one reason or another. But then the information that you need to help you with that comes as to the cause of the accident, and that's why I'm asking you why you don't ask for details of what caused the accident. The answer might be the bus driver was driving inattentively, and what then was the cause of the accident? Because he had to brake too hard.

MS MABLE CHAN: In this current letter that we sent to the KMB, we haven't gone down to that level of detail.

CHAIRMAN: Have you done so for Citybus?

MS MABLE CHAN: Can I check for that, because in the updated minimum requirements for the black box, we actually have specified them to illustrate the events where there is an over-speedy acceleration or deceleration. Can I ask my deputy commissioner to update the committee on that, about the acceleration of the G force of that, so that to facilitate the company to identify whether there are any sudden braking or over-braking, harsh braking, by the driver?

CHAIRMAN: Yes, please do.

You are addressing the August 2018 basic minimum

requirements for electronic data recording device, are you?

MR YK CHAN: That was a minimum requirement, but what I am talking about is --

CHAIRMAN: Let's start with the minimum and then you can go on to what is the maximum, what you are hoping they will do. What's the minimum first of all? And what we are looking for is data about acceleration or braking.

MR YK CHAN: May I have a minute?

CHAIRMAN: It's appendix 2, if that helps you.

MR DEREK CHAN: Just for the record, Mr Chairman, that's appendix 2 to the working group report, and the page reference is 1807 of TD-5.

CHAIRMAN: Not on the bundle I've got. There are no page numbers.

MR YK CHAN: Mr Chairman.

CHAIRMAN: Yes.

MR YK CHAN: The basic minimum requirement for the electronic data recording device, which we commonly refer to as black box.

CHAIRMAN: Yes.

MR YK CHAN: For this update, we have sort of updated with new additions or requirements.

CHAIRMAN: I understand that. What we are looking for is acceleration and braking. Which one is that?

MR YK CHAN: Item 4(a):

"Accident report -- vehicle speed profile at time interval of 1 second for the 3 minutes period preceding detection of 0.4G deceleration."

This is a requirement that the equipment should be able to record that sort of acceleration or deceleration --

CHAIRMAN: This is deceleration. It used to be 0.2, didn't it?

MR YK CHAN: No. 0.4 has been in this since first inception already.

CHAIRMAN: Thank you. Why is 0.4 deceleration chosen? Is that when you hit the wall? Is that what 0.4 means?

MR YK CHAN: No. Actually, 0.4 is a figure that we adopted some time ago. It was actually based on a study.

CHAIRMAN: What does it represent?

MR YK CHAN: It represents the force, when you step on the brake, the sort of gravitational force that you may experience as a normal person.

CHAIRMAN: I understand --

MR YK CHAN: To put simply, 0.4 -- normally, we are talking about gravitational force is 9.81 metres per second per second. Now, 0.4 is a fraction of that. Now, on a bus --

CHAIRMAN: What does this actually mean for a real driver?

Braking where smoke is coming off the wheels; is that it?

MR YK CHAN: No.

CHAIRMAN: Give us a real example; what does it mean?

MR YK CHAN: No, the definition of this one is actually -- what it demonstrates is a deceleration force of 3.92 metres per second, which would be experienced by a passenger sitting on a seat would fall off the seat. So this is sort of a braking force that is large enough or deceleration force large enough to cause a passenger who normally sits on a seat and fall off. So this is a requirement specified in this equipment.

CHAIRMAN: So a passenger seated but without a seat belt would fall off a seat at this level of deceleration?

MR YK CHAN: Fall off the seat -- well, now, to put it more technically, there was no dislodgement of passenger from the seat in more than 95 per cent of the sample cases. So this is a probability of 95 per cent of the passengers would probably fall off the seat without a seat belt, if a retardation force of 0.4G is applied on the bus suddenly.

CHAIRMAN: Thank you. So what that then triggers is if you have a deceleration of that kind, you must provide speed for the previous three minutes, but that's it, is it?

MR YK CHAN: This is purely when you apply -- this is

an instant moment, but we also need records of what happens in the previous three seconds.

CHAIRMAN: Yes. Thank you.

MR YK CHAN: Three minutes, sorry.

CHAIRMAN: At item 2 there is a reference to brakes at (c), is there not, "Activation of brake"? So the machine must always report when the brake has been applied?

MR YK CHAN: Well, the machine should be able to -- item 2 refers to it should be capable of recording those data at every second interval.

CHAIRMAN: Yes.

MR YK CHAN: And store data every 30 seconds for a period of two weeks.

CHAIRMAN: Yes.

MR YK CHAN: So all those (a) to (f), this black box should be able to keep those information intact.

CHAIRMAN: Thank you for that explanation. That's the minimum. But what is it that you say that you are expecting the bus companies to do above the minimum?

MR YK CHAN: Well, actually, the system that we saw from -- understand from -- actually, we saw how it works from Citybus and New World First Bus -- it actually can record all those information.

CHAIRMAN: Can record what?

MR YK CHAN: Speed.

CHAIRMAN: Yes.

MR YK CHAN: Let me refer to this -- it actually, obviously can record the operating time.

CHAIRMAN: Are you referring to a document?

MR YK CHAN: Yes, the document, the minimum specification we just talked about, in paragraph 2. Vehicle speed; activation of the brake, that can be seen on the screen.

CHAIRMAN: Yes.

MR YK CHAN: Actually, whenever the bus pulls into the stop and opens the rear door, that can be shown on the screen. Obviously the GPS coordination actually can --

CHAIRMAN: It's coordinates, is it not?

MR YK CHAN: Yes, the position of that bus, and whether a bell has been pushed. All those information are able to be provided by the bus company.

CHAIRMAN: But this is the minimum. I'm asking about what it is you expect them to provide, because the black box does a lot more than this, does it not?

MR YK CHAN: I think black box is a common term for an equipment, telematics system installed on buses and obviously they can provide various functions, but as far as bus operation and fleet management is concerned, the parameters specified are the parameters we are looking for, particularly when you are talking about whether a vehicle is actually speeding, whether the driver is

driving in a proper manner, whether he's applying hard brakes or not, whether the driver actually is servicing the passengers in the correct manner, whether someone might complain about the bus driver did not stop. So we can actually see from the system that the driver actually pulled into the stop and also, in response to the bell, pushed bell, and see what happens, and also let the passenger get off the buses with the doors open. All this information is related to operation of the bus services, and this is really the key information that we are looking for.

Also, the bus companies are actually developing their monitoring indicators as to how should this information be recorded and also how they analyse it later.

CHAIRMAN: All this information is recorded. The question is getting them to analyse it and use it.

MR YK CHAN: That's right.

CHAIRMAN: The buses are awash with CCTV cameras. They've got these telematics devices that store all this information.

MR YK CHAN: Yes.

CHAIRMAN: But the question is: is it being used, and is it being used to enhance safety?

On that note, we will take our morning break.

20 minutes.

MR YK CHAN: Okay.

(11.35 am)

(A short adjournment)

(11.55 am)

CHAIRMAN: Yes, Mr Chan.

MS MABLE CHAN: Chairman, sorry.

CHAIRMAN: Yes.

MS MABLE CHAN: Just before the break, on the point about whether we have asked the FB operators to provide the causes of --

CHAIRMAN: May I invite you to be closer to the microphone.

MS MABLE CHAN: Sorry. Before the break, you asked us to provide some evidence to see whether we have asked the FB operators to analyse the causes of those non-collision accidents, in particular the loss-of-balance accidents.

May I refer you to our letter to KMB in the bundle.

CHAIRMAN: The 21 May letter?

MS MABLE CHAN: Yes, 21 May.

CHAIRMAN: That's TD-5 at page 1728.

MS MABLE CHAN: Yes. Thank you, Chairman.

On page 8 of our letter.

CHAIRMAN: Yes, page 1729.

MS MABLE CHAN: May I refer to the last item, "Analysis of

traffic accidents involving KMB", and we asked them to conduct an analysis on the traffic accidents involving KMB in 2017, in conjunction with the situation in 2015 and 2016, presented in annex E(i).

May I refer to the annex E(i)?

CHAIRMAN: Yes. Where do we find that?

MS MABLE CHAN: Sorry, Chairman, perhaps the annex is not included in the bundle, but I can certainly submit --

CHAIRMAN: What's included in the bundle is what we've been given either by KMB or by the Transport Department. But if you've got annex E(i), we can have it copied now.

MS MABLE CHAN: Yes. Should I --

CHAIRMAN: If someone can come forward and take the annex from you and then we will have it copied.

MS MABLE CHAN: Sorry, Chairman, about that. (Handed).

CHAIRMAN: Perhaps you could come back to that in a moment.

MS MABLE CHAN: Sure.

CHAIRMAN: Mr Chan, are there other questions you could ask in the meantime?

MR DEREK CHAN: I could perhaps follow up on one factual matter arising out of the exchange between Mr Chairman and Mr Chan of the Transport Department about the black-box requirements, in the meantime.

CHAIRMAN: Yes.

MR DEREK CHAN: Perhaps, Mr Chan, I can take you to the new,

2018, black box minimum requirements which we had been looking at before the break, which is at appendix 2 of the working group's report.

Do you have that in front of you, Mr Chan?

MR YK CHAN: Yes. May I -- sorry.

CHAIRMAN: Let Mr Chan get to his question and then you may.

MR YK CHAN: I just want to make one point. Before the break, I answered to Chairman that the requirement under paragraph (a), the 0.4G, has it ever changed --

CHAIRMAN: I think you will find that's where Mr Chan is taking you.

MR YK CHAN: But after I double-checked with the 2003 version, it's actually been changed from 0.2 to 0.4.

CHAIRMAN: So it's been doubled, the deceleration threshold, 0.2 to 0.4?

MR YK CHAN: That's right. Yes.

CHAIRMAN: And 0.4 is 95 per cent of people falling off their bus seats.

MR YK CHAN: Yes, the chance of 95 per cent --

CHAIRMAN: What's 0.2? How many fall off their bus seats at that level?

MR YK CHAN: 0.4 was actually a threshold taken a long time ago, and at that time -- let me explain --

CHAIRMAN: No, can you help me with -- perhaps you don't know the answer -- how many people fall off their bus

seats if the braking is 0.2?

MR YK CHAN: I don't have the answer. I cannot answer.

CHAIRMAN: Can you answer this question: why was it changed from 0.2 to 0.4?

MR YK CHAN: The reason is that in 2006, when we discussed with the operators on this minimum specification, actually when we have meeting with them and assessing the performance of the requirement, it was come out that because the 0.2 really is a very, very, very light deceleration force which will come up very, very frequently and doesn't provide any meaningful indication for monitoring purpose, and at that time we have discussed with the operators and agreed at meetings that the 0.2G version was changed to 0.4, but unfortunately, at that time, the number hadn't been changed in the specification, so this time we take the opportunity to update it. That's why.

CHAIRMAN: 12 years later? It took 12 years to update it?

MR YK CHAN: Yes. I think this is an overlook that we should have done earlier.

CHAIRMAN: Do you have minutes of this meeting of 2006 where this matter was discussed?

MR YK CHAN: Yes, I think we have notes of meeting too.

CHAIRMAN: Can you provide them to the committee?

MR YK CHAN: Yes.

CHAIRMAN: Thank you.

Now, Mr Chan, you were cut off. Perhaps, for the record, you can give us the reference to the 2003 minimum requirements.

MR DEREK CHAN: Yes. That's at TD-5, page 1598.

CHAIRMAN: Perhaps we could have that on the screen.

Yes. There it is. 3(a).

This reference that you made to 95 per cent of people falling off the seat at 0.4G deceleration, is that a study that someone has conducted?

MR YK CHAN: From our search, it was a study conducted by the US department of transportation in 1977.

CHAIRMAN: Can you give us the details of that? Do you have that paper?

MR YK CHAN: We can provide it later.

MR DEREK CHAN: Does the study that you refer to include the probabilities of standing passengers losing their balance at 0.2 versus 0.4G?

MR YK CHAN: Unfortunately, there is no reference made to the standing passengers, because for sitting passenger you have a proper seat and people will sit in a prescribed, defined area, but for people standing, that is another matter, because how people stand is really -- there's not much control and also there's no set form of standing. So, from that, we don't have any

sort of equivalent deceleration force applied make reference to standing passengers.

CHAIRMAN: Yes, but we can readily infer by using common sense that they would all be on the floor, wouldn't they, if not through the front of the bus?

MR YK CHAN: Yes and no. Because it really depends on how people stand, and we actually specify in the buses there are lots of devices to facilitate standing passengers, holding bars and grips, and if people are doing the right thing when standing then I think the chance of falling down may not be as severe. But of course we understand people, they come on the bus carrying their packages and walk around when the bus is moving, then that's another matter.

CHAIRMAN: Mr Chan.

MR DEREK CHAN: I have just been handed a document which --

CHAIRMAN: I think this is the document that you wish to speak to -- we now have it -- headed annex E(i).

MS MABLE CHAN: Yes, Chairman. This is the annex E(i) attached to the letter to the KMB as well as other franchised bus operators. In this table, we are asking them to categorise and analyse the contributing factors of traffic accidents involving bus captains. We have provided in this table for the handy reference a comparison of the number of bus captains involved in

those traffic accidents in three years, and we have divided the factors as listed in the table.

So, in the second item, "Factors related to bus captains".

CHAIRMAN: Yes.

MS MABLE CHAN: And the second item -- because this is a partial description of the nature of the accidents, we have input here as stopping or starting negligently as an example, and following this description, in our letter to the various bus operators, the bus operators are elaborating in their safety chapter the various factors relating to these kinds of accidents.

And in terms of stopping and starting negligently, we notice in their safety chapter, which is being finalised for our consideration, that in the case of KMB, they are actually subdividing the accident counts by the incidence of accelerating, of bus braking in traffic, bus braking when stopping for passengers, when pulling off or leaving bus stop. So there are individual categorisation of number of accident counts in terms of the bus braking under various circumstances.

So while the bus braking is not specifically mentioned in this table, because this is a starting reference for them, and we expect them to provide the detailed accounts of the accident situations, they are

providing in their safety chapter on the causes, whether or not hard braking is applied during the traffic or whether they are pulling off from the bus stop, et cetera.

Thank you, Chairman.

CHAIRMAN: Can you just help me, at least: where has this data come from?

MS MABLE CHAN: The data has been compiled with reference to the past accident statistics described in the previous bus safety chapters of the various bus operators.

CHAIRMAN: So is this collation of data an exercise done by the Transport Department? This table in front of us, this one page.

MS MABLE CHAN: Maybe Tony, our chief engineer, can help us on that.

CHAIRMAN: Yes.

MR TONY YAU: Chairman, yes, this data we collected from the police traffic accident system.

CHAIRMAN: From the police?

MR TONY YAU: Yes.

CHAIRMAN: But it is the Transport Department that have produced this document?

MR TONY YAU: Yes.

CHAIRMAN: And what are these police statistics called?

MR TONY YAU: The name is case investigation --

CHAIRMAN: Speak closer to the microphone, if you would.
MR TONY YAU: Because they have changed to a new system with a new name.
The system is named case management incident system.
CHAIRMAN: CMIS I think is the acronym they use.
MR TONY YAU: Yes.
CHAIRMAN: Because we had evidence from the police.
MR TONY YAU: Yes.
CHAIRMAN: And you have access to their data bank, do you not?
MR TONY YAU: Yes.
CHAIRMAN: Have you read the transcript of the evidence that the police gave us not so long ago?
MR TONY YAU: No. We only can access the data --
MS MABLE CHAN: The transcript, police transcript.
MR TONY YAU: Yes.
CHAIRMAN: Then you know that the police told us that they had a template of I think 60 factors that was given to the police constable who's investigating the accident, and he ticks one or more of these boxes and then inputs it into the computer; that's how this data is obtained. Then apparently it is reviewed by someone higher up.
So that's where this information is coming from, the police?
MR TONY YAU: That's another table, those factors shown on

the screen is the factors that the police referred to. That mean when they input the traffic data, they will choose the factors that contribute to the accident.

CHAIRMAN: Yes, Mr Chan.

MR DEREK CHAN: If I may move back to, at a more conceptual level, the use of a safety performance indicator, which we had been discussing before the break.

CHAIRMAN: Before you do that, let me ask this of Ms Chan, if I may: this letter that you wrote to the Kowloon Motor Bus Company -- I'm looking at page 1729 now, where we find annex E(i) -- there is no indication in the text of the letter as to where this data comes from, is there?

MS MABLE CHAN: No, Chairman.

CHAIRMAN: Is there any reason why you wouldn't tell KMB where the data comes from?

MS MABLE CHAN: If I may explain. Because it's quite a common practice for us to refer to the police database on the number of accidents and also the categorisation of the causes of the accidents, because apart from the police, TD do not categorise the number or the nature of the accidents.

So, actually, this traffic accident data compiled in 2015, 2016 and 2017, as attached to the letter, there is actually a subsequent briefing for the FB operators on

our expectations. So we just have a briefing and there is no sort of written records. So, on that briefing, we are explaining to them the details of the data that we are expecting. So we do not have a record of the discussion but obviously it is quite a common knowledge of the bus operators that we are referring to that accident database as administered by the police and have access by the TD.

CHAIRMAN: Yes.

MR DEREK CHAN: Ms Chan, returning, if I may, to the issue of the safety performance indicator. I seem to understand from your evidence that you disagree with the use of a safety performance indicator. Just to make sure that I'm correct in understanding, I'm just going to put to you two short passages in Prof Stanley's evidence, just to make sure there is no ambiguity in what we are talking about.

Can I take you to the transcript of Day 16, which is 15 September 2018, at page 61 of the transcript. Can I start with the question at page 61, line 21, where the chairman asks:

"What other ways can one measure safety?"

And Prof Stanley says this:

"I think accident rate is a really good starting point, and if you look at some of the reporting that has

been done I think in the safety plans of the five-year forward plans, there's information on fatalities, collisions, non-collisions -- 'slips, trips and falls' types of involvement involvements as well -- and in my view, if you are going to go down the path of developing safety as an incentive or penalty provision, I would drill down into where are the safety problems. So you wouldn't use accident involvement rate in total; you would look at the fatality rate, you would look at 'slips, trips and falls'. And you would form a view, I think, on what is the relative importance of those two things.

I think one operator I saw, for example, had an increase in the 'slips, trips and falls' type accidents, but a drop in fatalities. So, if you add them up together, and say one incident is an incident, you are missing that nuance. So I would be trying to decompose it a bit and look at the major areas of safety concern and make sure that there are KPIs, if you like, or incentive/penalty clauses that relate to those. That means you are going to really end up with a bundle, I think, of measures. I don't know how many elements are in that bundle. That's something that needs to be settled by negotiation between government operators with advice, for example, from committees such as your own,

about what the components are.

But I would start with what are the main sources of safety problems and start to target those."

On that same subject, can I take you to page 72 in the same transcript, at line 18. Prof Stanley is saying that:

"... accident rates per million vehicle-kilometres are a very blunt and, I believe, a misleading measure."

The question that I was asking:

"You would need a more nuanced indicator or set of indicators?

Prof John Stanley: Absolutely. You need a set of more nuanced indicators. These should form part of it, but it should be the components, not the total.

And the components need to be weighted in some way to reflect -- I mean, as an economist, I would use the cost of those different sorts of accidents, which we regularly measure in Australia and I'm sure you do here in Hong Kong: you have a value for a typical fatal accident, you have a value for a typical serious injury accident, and you have a value for a typical slight injury accident. I would use those weights to come up with a weighted, if you like, accident rate per million vehicle-kilometres.

Have in mind also, though, there would be other

things you would want to include as well."

So do I understand it correctly, from your evidence this morning, that you would disagree with this approach to measure safety?

MS MABLE CHAN: I would like to elaborate a little bit more on my stance and observation.

First of all, when being asked before the break whether or not I agree with Prof Stanley's point that the KPI simply cannot be a useful factor in measuring the safety performance, my answer is I do not agree because, similarly, I think that there should be a reference point and a starting point, and for the management --

CHAIRMAN: Well, you disagreed earlier that a KPI that is outside the control of the bus company is not relevant. I think that was the issue; it's a KPI that's outside control. That was Prof Stanley's point.

MS MABLE CHAN: My point is noting the KPI on the safety factor in terms of number of accidents, while that to a certain extent may not be controlled by the company at all, we still think that this KPI is useful in measuring the service performance.

On the other hand, as I mentioned, because an accident could be contributed by a number of factors, if we go down to a very specific indicator, say for

example the number of accidents involving a bus captain who apply harsh braking in certain circumstances, if we do not go deep to investigate the contextual circumstances of that occasion, this kind of indicator, again, may not be primarily contributed by the driver alone.

As I have already seen a number of occasions, as revealed from the CCTV by one or two of the bus operators, when the black box tracks an event log whereby the bus captain has applied harsh braking, without the investigation of the other data collected as revealed from the CCTV, we do not know that perhaps it may involve an outside factor which cannot be controlled by the driver or the company as well. It could be the driver has to make a hard choice in whether or not he has to apply harsh braking in order to prevent colliding with another vehicle or a passenger, that he has applied harsh braking, and it also leads to losing balance of a passenger on board a compartment.

My point is just to illustrate that it is difficult for us to come up with a simple, specific indicator alone, to measure the safety performance of the company. Prof Stanley's suggestion of, say, coming up with a weighted accident rate could be an area that we can consider and further discuss and explore, but still we

need to have a reference point and we need to have a starting point. In having a safety performance indicator like the number of accidents or the number of accidents involving the bus travelling distance, we can have a trendal comparison or analysis, year on year. As illustrated in KMB's case, we can see that there is an increase in the number of accidents rate in 2017 as compared to 2016 and also exceeding the target rate. These are targets or pledges set by the companies themselves. So that also can serve the purpose in evaluating whether they have made their very best in reducing the number of accidents year on year and whether they are complying with the pledge that they have volunteered and offered to us.

Thank you, Chairman.

MR DEREK CHAN: What about Prof Stanley's opinion that using that measure is too blunt and may be misleading; do you agree with that?

MS MABLE CHAN: I think I have tried to answer that question.

MR DEREK CHAN: Thank you, Ms Chan.

Then if I may take you to how London is doing it at the moment.

What I'm going to do, Ms Chan, is first take you to a passage in Mr Weston's report on the London approach.

I'm going to take you then to a short passage in his evidence that relates to what I'll be reading from the expert report, and then I will be going to a document from Transport for London on the same issue. So, with that information in mind, I will be asking for your observations on London's approach.

Firstly, Mr Weston's report. Can I take you to the expert bundle at page 150, at paragraph 7.8 of Mr Weston's report. Can I just first read it out into the record. Under the heading "TfL safety performance indicator", Mr Weston says this:

"As part of the bus safety programme TfL [Transport for London] have developed a safety performance indicator (SPI) based on an approach already used within the rail industry. The SPI monitors a basket of measures including incident data and outputs from the observational measures giving an operator an overall score which is benchmarked at 80. Their individual future performance is then measured against the benchmark to track for either deterioration or improvement. The system is not designed to compare bus companies between each other but to track the trend of an individual company."

So that's what Mr Weston says in his report. I'm going to take you then --

CHAIRMAN: I think it's important to emphasise the point that this safety performance indicator is being developed for use in the bus safety programme, and it's the bus safety programme that will be announced on 16 October. So this is a new system.

MS MABLE CHAN: Yes. I understand that, because we have exchanges with the Transport for London commissioner as well.

CHAIRMAN: Can you speak closer to the microphone, please.

MS MABLE CHAN: I also noticed their new initiative and we have exchanged with Transport for London and obviously we are also striving to see if there is an effective measurement of the safety performance of the bus and rail industry.

Thank you.

MR DEREK CHAN: Perhaps I can quickly take you to Mr Weston's evidence on this same paragraph of the report. That's at evidence at Day 18, 27 September 2018, at page 52.

Can I take you to the end of page 51 first. At line 23, you will see a question from Mr Duncan.

CHAIRMAN: We don't see anything on our individual screens yet.

Yes, thank you.

MR DEREK CHAN: At line 23, you see Mr Duncan taking

Mr Weston to paragraph 7.8 of the report, which we've just read. Can I then skip to page 52, line 4.

Mr Duncan asks this question:

"Is that the safety performance indicator which Mr Chairman referred to but which has not yet been published?

Mr Weston: Yes. This is a proposal which TfL are working on, and one of the bus operators explained to us in August what would be involved in this basket. So, basically, it is 41 measures that are brought together into a safety performance score, and these measures may be weighted in different ways. So the measures may be 'killed or seriously injured' figures, they may be 'slips, trips and falls', various other monitoring results from engineering monitoring to driver monitoring, and they are all brought together.

The idea is that they are brought together into a benchmark score of 80 for each operator, and the aim then is to monitor an operator's trend against that baseline of 80, and they are weighted in such a way that -- it is weighted so that the whole basket -- the trend is not just -- if you are unfortunate in having a fatal incident, which may not even be down to the bus company's fault, that doesn't send the score completely off the scale. So it's about trying to monitor trends

within the company and not to use it as comparing your performance with your peer group, because I think the concern then is that if you're the best, you think you don't need to necessarily do anything else to improve, but I think there is a recognition that everyone can be better and be safer. So the idea is your safety performance indicator is benchmarked at 80, and then along with TfL you monitor your performance against that baseline of 80 and you try and improve on it and improve that score.

I think the intention is that will be announced publicly, the content of it will be announced publicly in due course, but it hasn't been as of yet."

Lastly, can I refer you to a document published by the Transport for London on this very same issue. Can I take you to bundle MISC-3, page 1194. Perhaps I could start at 1189, which is the first page of the document.

Ms Chan, the document I am taking you to is an update on the bus safety programme published by Transport for London, in response to London's Assembly Transport Committee report.

CHAIRMAN: This is November 2017?

MR DEREK CHAN: Yes, that's correct, Mr Chairman. I'm just trying to find the date.

Anyway, Ms Chan, can I just take you to page 1194,

which is headed, "Contract and performance management". The introduction says:

"We use a range of data as part of the assessment of an operator's ability to provide a safe service. As part of the bus safety programme we are considering methods to improve this process and to increase the emphasis on safety in the award and management of contracts.

Progress

Having considered a range of methods to best monitor operator safety, we are developing an operator safety performance index (SPI). The SPI is based on the same principle as the consumer price index, that is, a composite measure, using basket of indicators to generate a single performance index. The operator SPI builds on the success of the TfL bus network-wide SPI which was introduced in 2017 to better monitor safety performance across 81 safety-related indicators. The operator SPI will include 41 indicators, a mix of incident-generated data and behavioural observations, covering: staff and customer safety, network safety, risk management, driving standards and engineering. Each operator's performance will be tracked against their own baseline, to encourage continuous improvement."

So, Ms Chan, my question for you is this --

CHAIRMAN: Are you going to go to the document entitled, "Driven to distraction", the Greater London Assembly's earlier document dealing with this issue?

MR DEREK CHAN: Yes, I was going to deal with it in the context of giving incentives, because that's what --

CHAIRMAN: Yes, because this is a response to what the Greater London Assembly had had to say.

By all means do it whenever you like, but I think that's the context. This is Transport for London's response to what was in effect an attack on their approach.

MS MABLE CHAN: Yes.

MR DEREK CHAN: Perhaps I can come back to that, because it is a document I will go to shortly after.

CHAIRMAN: Certainly.

MR DEREK CHAN: Ms Chan --

MS MABLE CHAN: Yes.

MR DEREK CHAN: -- I'm not suggesting we need to copy 41 factors that London uses. My question is more on a conceptual level, about the idea of coming up with a basket of measures to form an overall safety performance indicator, with which we can monitor and measure the progress that a bus operator makes, and to encourage them to improve as against that measure.

What is your observation about that type of approach?

MS MABLE CHAN: Thank you, Chairman, and senior counsel, for drawing reference to the initiative of Transport for London. Actually, we also take note of their recent initiative, which is actually November 2017. We have actually arranged our officers to visit Transport for London, which has been planned some time ago, to learn more about their road safety and public transport safety programme and plans.

I think the gist of the initiative is to -- the conceptual rationale is to take into account a basket of factors in evaluating the safety performance of bus operators. We think that there should be a performance indicator, at least a performance indicator for us to evaluate the safety of the bus company. That said, we also think that if we can move towards the direction of embracing a number of key relevant factors, and come up with a simple index or indicator, that could be an area that we can further explore and study and examine.

Meanwhile, with the working group recommendations to push for a comprehensive and holistic bus fleet monitoring and control management system, what we are pushing for is to ask the bus companies to install all the relevant devices and to provide real-time monitoring

of the drivers' attitude and behaviour, to keep track of the key events, say like braking, harsh braking or acceleration, in the black-box log, coupled with our expectations of the bus operators to follow the training framework. All these could be a number of factors that we can take into account in further developing a more sophisticated performance indicator on safety.

So this is something that we also have interest in, and with all the other recommendations and developments on the real-time automatic surveillance of a bus operation and drivers' behaviour and attitude, I think we will have firmer ground for us to explore and discuss this with the bus operators, in order to find a pragmatic way and yet a more sophisticated way to measure the bus operators' safety performance. This is certainly an area that we will have keen interest to examine and study.

Thank you.

CHAIRMAN: When do you expect to be able to identify the relevant factors and come up with a simple index of performance?

MS MABLE CHAN: I cannot commit at this juncture, but being the head of the department and with our initiative to visit Transport for London on the whole rationale and issues involved in this sort of SPI, we would certainly

hope to come up with some preliminary thinking and analysis, say within a year, Chairman.

Thank you.

CHAIRMAN: Is this something that you have discussed with the franchised bus operators?

MS MABLE CHAN: We haven't yet reached that stage, but obviously, with the development of key performance indicators on training, and with the real-time monitoring with the black-box functions and all the other driver-assisted device, I think now we are in the process of following up all these in our working group forum. As I mentioned in my opening statement, with the learning of the various experiences and views and suggestions through this Independent Review Committee, both the operators and the TD find the working group as a very useful forum. We will continue our work on that front and that will be an appropriate forum to bring the parties together to pursue all these meaningful initiatives to enhance measurement of safety performance of franchised bus operators. We will take it forward in that forum, Chairman.

CHAIRMAN: You have used the word "forum" several times there. Do you have in mind the recommendation that Mr Weston made that this working group should become a standing committee, a Bus Operator Forum is the term

used in London; is that what you have in mind?

MS MABLE CHAN: I also noticed that reference in the expert evidence about a forum, operators' forum. So while we call it a working group, it is similar in terms of its nature and in terms of its scope of work.

Thank you, Chairman.

CHAIRMAN: No, the specific question is this: do you have in mind making this permanent, not a working group working on a particular project, but a permanent group that would meet regularly, in future?

MS MABLE CHAN: It will be a permanent group which will meet regularly.

CHAIRMAN: And it would be similar, therefore, to the Bus Operator Forum which exists in London?

MS MABLE CHAN: Yes.

CHAIRMAN: Which is what Mr Weston has recommended we adopt in Hong Kong. So you are accepting his recommendation? You are doing it?

MS MABLE CHAN: Yes. Yes. Thank you, Chairman.

MR DEREK CHAN: Ms Chan, so the first side of the equation is coming up with some combined, sophisticated safety performance indicator. The second part of this same equation is the concept of incentivising or having penalties imposed in, say, a franchise agreement, for meeting or not meeting targets for this safety

performance indicator. That's the concept I want to explore with you.

For that, can I take you directly to the London Assembly Transport Committee, the "Driven to distraction" document that Mr Chairman was talking about. The document is at MISC-3, page 1134, and the document, as you can see, is dated July 2017.

The concept that I'm focusing on is incentivising safety, or penalising it, for not meeting certain targets.

Can I take you to page 1151 of the report. Perhaps I should start on 1150, to give it some context.

Under the heading "Setting safety targets", if I can pick it up under paragraph 2.2:

"Injury and collision targets could be used to provide TfL and operators with clear incentives to improve London's bus safety record. They have a clear role in improving performance for many private and public services. As we explore in this chapter, performance targets have helped TfL drive up the reliability of the bus network in recent years. We believe that a similar approach could also be applied to bus safety by directly linking safety performance to profits for all bus operators working in London, and to the pay of senior TfL management."

Now 2.3:

"TfL has told us that it intends to introduce bus safety targets, but there is no indication that they would be linked to financial incentives. In November 2016, TfL's Safety, Sustainability and Human Resources Panel was asked to agree a bus customer major injury target for 2007/18. TfL also told us in February that it would aim to set bus safety targets by the end of the year. We are waiting for TfL to publish these targets, but we think that they need to be linked to financial incentives if they are to be effective."

So it's the second part that I am focusing on.

If you go over the page, at page 1151, can I pick it up at 2.6:

"TfL has previously explained its decision not to set safety targets for the operators by stating that:

'[Safety] is not directly related to payments/deductions due to the importance of avoiding the suggestion that safety of operation is in any way a negotiable trade off against cost.'

While we understand TfL's argument, we fundamentally disagree with it. Operators will behave in line with the incentives (particularly the financial ones) that are set by TfL -- their shareholders would expect nothing less. By not factoring safety into the payment

structure of contracts, TfL is failing to direct operators to provide the safe service we think London needs. As the case study below illustrates, financial payments have been successfully linked to safety in transport contracts in other countries."

The box itself talks about the Spanish example which I will skip for the moment. If I could pick it up again at 2.7:

"If TfL wants to take positive steps to reduce injury and collision rates, it must introduce meaningful incentives for operators to make their services safer. Londoners agree with us: of the 1,662 Londoners we surveyed, 88 per cent thought it was important that TfL incentivised safety as well as punctuality."

So, Ms Chan, from a conceptual level, can I ask for your observations or comments on this concept of incentivising safety and penalising not meeting targets.

MS MABLE CHAN: First of all, I think this is not an easy topic. It involves correlation of the safety performance to the financial payment or financial penalty to the operator. I think this suggestion or this idea raised in the London circumstances whereby we know that in London, they implement a sort of MOM model, a management and operation model, for their bus services. Whether or not the safety performance can be

related to a financial subsidy or payment to the operator or a financial penalty to the operator will involve a lot of discussion and debate in the context of Hong Kong whereby we actually operate bus services under a franchise model.

So, conceptually, we are operating under a different model. This is the first point I wish to make.

Secondly, under our current regime, we have a statutory provision whereby if a franchised bus operator fails in providing a proper and efficient service, then we can make a case to the Executive Council as to whether or not we can impose a financial penalty.

So I think, in the Hong Kong context, should we in the future come up with a more sophisticated safety performance index or so, it may provide a more effective and meaningful reference or basis for us to make our cases to the Executive Council as to penalise in terms of financial terms on a bus operator for failing to fulfil its target in terms of safety performance.

On the other hand, whether or not we can sort of use this and translate into a financial payment to the operator, I think it is a different game. We know that this one is currently discussed and explored in London. Obviously, we will learn a bit more directly from Transport for London on this, but at this juncture

I will not take this lightly. So we will keep an open mind and KIV the developments and obviously we will take into account the experience in London as well as in other jurisdictions. We will not rule out the possibility for us to deliberate and explore this internally, but my point is whether or not we can take it forward, we have to take into account a number of other factors and in a very careful and prudent manner.

Thank you.

MR DEREK CHAN: Yes. Unless you have any further observations on this issue about benchmarking, indicators, and incentivising issue, I will be moving on to my next topic.

CHAIRMAN: Just to understand what the Greater London Assembly were saying here, at 2.6 on page 1151, there's a reference to what TfL had said, "safety is not directly related to payments/deductions". Now, that phrase "payments and deductions" is clearly a reference to their system, which we don't have, of incentivising better performance of service provision, and penalising a failure to deliver performance service.

What the Greater London Authority appear to be saying is that if you can do it for performance, then you can do it for safety. But your point is this, that our model of Hong Kong is different, we don't have

a system of bonuses or deductions, so all that perhaps we would be left with would be a system of penalties, if you fail to meet a safety performance indicator.

MS MABLE CHAN: Yes.

CHAIRMAN: That's what they have in Singapore, is it not?

MS MABLE CHAN: Yes. Chairman, actually, the penalty provision is now currently in the law, so we can refer to that clause, and with the development of more sophisticated and balanced performance safety indicators, one area that we can further develop and take forward in our forum with the bus operators is how that can translate into a more systematic and formalised system of imposing penalty.

Of course, in the past, there are accounts that we have imposed both statutory fines or penalty by referring to this clause. We have. But how it can relate systematically to a sophisticated performance indicator, including safety, is something that we can seriously take forward in our working group with the bus operators.

CHAIRMAN: When was such a penalty last imposed?

MS MABLE CHAN: I have the data with my folder, but perhaps I need to find time and supplement it to the committee in a moment.

CHAIRMAN: Yes, because it was my memory that when this

issue was dealt with on 7 May, we were told that it had never been used.

MS MABLE CHAN: Yes.

CHAIRMAN: Am I correct in remembering that, Mr Chan?

MR DEREK CHAN: Yes, that accords with my memory, but I need to dig up the reference to be sure.

CHAIRMAN: Yes.

But you are telling us it has been used?

MS MABLE CHAN: Let us double-check on that, and the date. Let us double-check on that and then we will supply the information later in this hearing.

CHAIRMAN: Yes, certainly.

Mr Chan, do we have the provision that obtains in Singapore? My memory is that it is a financial penalty, I think S$100,000, if an accident rate is exceeded, a specific accident rate.

MR DEREK CHAN: I have an idea of where that may be, but perhaps we can deal with that reference over the break.

CHAIRMAN: Certainly.

Mr Auyeung?

MEMBER AUYEUNG: Ms Chan, is it true that such penalty system does exist within the public transport system in Hong Kong, for example within the MTR system?

MS MABLE CHAN: Yes, you are correct.

MEMBER AUYEUNG: Thank you.

MS MABLE CHAN: Chairman, based on the current records I have, there is an account of us imposing a penalty in 1996, but we will further check as to the basis upon which we have imposed that fine.

CHAIRMAN: No doubt that was on China Motor Bus.

MS MABLE CHAN: Yes, Chairman, you are correct.

CHAIRMAN: Yes, Mr Chan.

MR DEREK CHAN: Mr Chairman, just to follow up on the reference to the evidence on 7 May, the issue was raised with the Secretary for Transport and Housing Bureau, Mr Joseph Lai. That is page 8 of the transcript for 7 May 2018.

CHAIRMAN: Yes. Perhaps we could have that on the screen.

MR DEREK CHAN: I'm looking at the transcript for 7 May 2018, at page 32, line 19.

CHAIRMAN: Just wait until we can all share it.

MR DEREK CHAN: Chairman asked this question:

"Before you move on, Mr Duncan -- by that do you mean no financial penalty has ever been invoked?

Mr Joseph Lai: Chairman, by that I mean the question of safety issue leading to an attempted use of this particular section concerning financial penalty has never been invoked thus far, so it's not tested."

Then Mr Duncan goes on to ask:

"So do we understand correctly from that answer that

no financial penalty has ever been imposed for any of the reasons set out in that section, section 22?

Mr Joseph Lai: Chairman, not to my recollection or understanding. I would be more than happy to come back with a written confirmation of that, but certainly not in recent times."

CHAIRMAN: That's a matter that you can come back to.

MS MABLE CHAN: Chairman, Mr Joseph Lai's statement is correct, because he was answering in respect of safety. The recollection is there has not been any fine imposed on previous occasions. The incident that I mentioned regarding China Motor Bus in 1996 is regarding the lost trips of that franchised bus operator and we imposed a fine of 8,000 on China Motor Bus in -- the incident was in 1995 and we imposed the fine in 1996.

CHAIRMAN: But I think there was a second part to the answer -- I'm only looking at the screen. We can see at the top of the screens:

"... no financial penalty has ever been imposed for any of the reasons set out in that section, section 22?"

And that also got a negative answer, to his understanding. So that's now been qualified, has it? Does section 22 deal with a range of matters for which a penalty can be applied?

MS MABLE CHAN: Proper and efficient service, and safety is

one of the factors that we consider in whether or not a franchised bus operator is providing a proper and efficient service.

CHAIRMAN: So, insofar as that suggests it has never been applied for any of the reasons, that's now qualified; it had been imposed for lost trips occurring in 1994 but the penalty was imposed in 1996?

MS MABLE CHAN: 1995 lost trips, and the fine was imposed in 1996.

CHAIRMAN: Thank you.

Yes, Mr Chan.

MR DEREK CHAN: Mr Chairman, I am about to move to the next substantive topic of the approach to bus safety taken by the Transport Department. I was going to kick it off with a general question. Perhaps I can ask that --

CHAIRMAN: We are not going to have the commissioner this afternoon, so perhaps it's a good opportunity to ask the general question.

MR DEREK CHAN: Yes.

Ms Chan, the general question I'm going to kick off this topic with is this. In the context of the Hong Kong system, who is responsible for driving bus safety or driving improvements to bus safety? Who provides the impetus for new safety measures to be implemented?

MS MABLE CHAN: I would say, in terms of public transport, and in particular bus safety, the Transport Department will no doubt be the party to be responsible to monitor and enhance the safety of bus operation, and we will make our effort to drive public transport safety.

MR DEREK CHAN: With that in mind, I was about to look at some examples of how the Transport Department has dealt with enhancements to bus safety throughout the years, before making some observations on that.

Perhaps I can start that process after the lunch break, if that's convenient to the committee.

CHAIRMAN: Perhaps we can just ask one or two more questions at this stage, so the commissioner can reply.

Who in the Transport Department has responsibility for driving issues of bus safety? Which person or persons?

MS MABLE CHAN: Within the department, it will be a joint effort of our Bus and Railway Branch and also the Road Safety and Standards Division. The assistant commissioner for Bus and Railway Branch is Mr Patrick Wong, and in the Road Safety and Standards Division, it's the chief engineer Mr Tony Yau who is also present today, Mr Tony Yau.

CHAIRMAN: Yes.

MS MABLE CHAN: So both parties, both units, are responsible

for joining hand in hand to push and drive for public transport safety.

Thank you.

MR DEREK CHAN: Do I take it from that answer there is no team within the Transport Department that's dedicated solely to bus safety?

MS MABLE CHAN: There is not a single team, but the Bus and Railway Branch oversees all policy and operational matters related to franchised buses, and the Road Safety and Standards Division will also provide impetus and input to enhance road safety, including public bus safety.

So, apart from these two major divisions, we have the Vehicle Safety and Standards Division, which is responsible for monitoring and regulating on the hardware, ie the maintenance and the standards of buses. And the assistant commissioner is Mr Reg Chan, who is also acting as deputy commissioner of the Transport Department. They oversee in general the vehicle standards and safety of vehicles, including franchised buses.

CHAIRMAN: There was a second part to the question, which was: who is responsible for new innovations? Technological safety devices, let's try that.

MS MABLE CHAN: This is a very interesting subject,

Chairman. Actually we learned a lot throughout this IRC process. Over the past year or so, the Vehicle Safety and Standards Division, headed by Mr YK Chan, has been overseeing the new technology advancements in vehicle standards and maintenance. While there is no dedicated team or extra manpower resources, their division is driving for new technological advancements, and under the working group we have a technical group chaired by Mr YK Chan. That is the main forum for us to drive and push the various in-vehicle safety devices and automated real-time systems and features, including black box, GPS.

May I also add that we see the need and the importance of having a dedicated team, as in the case of London and in other jurisdictions, of enhancing transport technology research capability within the department. We are actually securing and bidding necessary manpower resources involving engineers, transport officers and electrical and mechanical engineers, to set up a dedicated transport technology team within the department.

We have not been able to say a bit more for the committee's reference because this one is actually undergoing an internal resource bidding process, but I would just like to give an idea for the committee's

reference.

Thank you, Chairman.

CHAIRMAN: The technical group that Mr YK Chan heads in the working group, that is something that followed, obviously, the setting up of the working group, and that was 13 March 2018. The technical group presumably happened second, later.

MS MABLE CHAN: That is correct, Chairman. The idea of having a working group actually arose from our attendance at the Tai Po District Council and the Legislative Council Panel on Transport immediately following the tragic accident in February. On those two occasions --

CHAIRMAN: I think you are referring to 12 February and 15 February respectively.

MS MABLE CHAN: Yes, of February, Chairman, you are correct.

There are a lot of different ideas and suggestions flagged up on those two occasions. Coming out from those two meetings, my team and I considered that we have to take a proactive approach and a more systematic approach to take heed of all these suggestions and ideas and advice, and we have to try and push for ourselves, and we subsequently informed the Transport Advisory Committee, on 27 February, about our suggestion of forming a working group, with the proposed terms of

reference to cover three areas.

First is on on-board vehicle-safety devices and equipment technology. The second aspect is on the feasibility and effectiveness of the installation of seat belts. The third is on enhancing the training for bus captains.

So we formalised this idea in late February, after the tragic accident, and this did lead us to formally establish the working group in mid-March.

Thank you, Chairman.

CHAIRMAN: You said earlier that you had decided, following the meeting with the district council in Tai Po of 12 February, and the 15 February LegCo meeting and motions that you were going to be proactive, but in fact you are being reactive to events that have already happened, are you not?

MS MABLE CHAN: Chairman, if I may, I think that there is a lot more proactiveness that we can adopt. Of course, this idea of forming a working group is reacting to the tragic bus accident. I think we have taken a forward-looking and proactive approach by not just waiting for the various advisory committees and parties to make request and for us to respond. Rather, we should set our agenda by forming that working group, and it was on that basis that we have, at the start of the

working group meetings, come up with a number of possible ideas and initiatives, to set the agenda and go through it one by one with the bus operators and the manufacturers.

So I think, in that sense, we are taking a more systematic and forward-looking approach to set the agenda for ourselves, rather than waiting for the bus operators or the bus manufacturers to tell them what they can or will do.

Thank you, Chairman.

CHAIRMAN: We've gone over time. We will take the lunch break now. We thank you for your attendance this morning. We hope you have a good afternoon. We look forward to seeing you on Saturday.

MS MABLE CHAN: Thank you, Chairman, sure.

CHAIRMAN: Thank you for your assistance.

MS MABLE CHAN: Thank you.

CHAIRMAN: We will adjourn now until 2.30.

(1.05 pm)

(The luncheon adjournment)

(2.30 pm)

CHAIRMAN: Good afternoon.

MR DEREK CHAN: Mr Chairman, before I resume my questioning, can I just report back on a reference that Mr Chairman asked for, in terms of the Singapore penalty provision.

CHAIRMAN: Yes.

MR DEREK CHAN: One reference to that is expert bundle page 229, at paragraphs 3.19 and 3.20.

CHAIRMAN: Can we have that on the screen.

What is the document that we are looking at?

MR DEREK CHAN: The document itself is an appendix to a Transport Department document. The relevant paragraph starts at paragraph 3, which looks at the Singapore situation.

CHAIRMAN: I'm sorry, tell me again, if you would, what the document is. Is there not an original document from Singapore which spells out this?

MR DEREK CHAN: Yes. Just to answer the chairman's question earlier and then going to the source document itself, the document that I took Mr Chairman to is annexed to a letter to the Singapore authority --

CHAIRMAN: Ah, yes, thank you.

MR DEREK CHAN: -- asking them, "Look, this is the materials that the committee has received" and asking for the assistance of the Singapore Land Transport Authority.

CHAIRMAN: Yes.

MR DEREK CHAN: The document that I took Mr Chairman to is an annexure to the letter sent to the Singapore authority, to seek their assistance.

The letter itself is at page 198 of the same bundle.

CHAIRMAN: Thank you. We don't need to be delayed by this.

MR DEREK CHAN: In any event --

CHAIRMAN: Is there no reference to a penalty being enforced or available in relation to the accident rate per million kilometres?

MR DEREK CHAN: Perhaps I will come back to you on that, Mr Chairman, with a more specific reference, instead of just handing up references that have provided to me in the moment.

CHAIRMAN: Yes.

MR DEREK CHAN: Perhaps I can just review the references first myself.

CHAIRMAN: Yes. Very well. Thank you.

MR DEREK CHAN: So, Mr Chan, I understand you will be taking over the main answering of the questions.

MR YK CHAN: Yes.

MR DEREK CHAN: Before the lunch break, questions were directed at Ms Chan in relation to the approach taken by the Transport Department on bus safety, and Ms Chan was questioned on the general question about who was responsible for taking this forward.

My next series of questions will be in relation to a number of historical events, and I'll be going through them quite quickly, just to see the Transport Department's handling of issues about bus safety

historically. I'm just going to go through them. If you recollect them, that's fine. If you want a reference to the raw documentation, please let me know.

Firstly, in July 2003, a bus fell down a slope from Tuen Mun Road, resulting in 21 fatalities and a number of people injured. Arising from that Tuen Mun incident, there is now put in place hazard speed limiters that limit the maximum speed of the bus. So these speed limiters were required to be installed after the Tuen Mun accident, and this has now become a standard feature for franchised buses. Is that correct?

MR YK CHAN: That's right.

CHAIRMAN: Where is the requirement first time for speed limiters?

MR YK CHAN: After the incident, we have looked into the possible ways of putting this right and then we discuss with the operators, and then after that we impose the new requirement to incorporate in buses the speed limiter, limiting those buses to 70kph.

CHAIRMAN: Yes, that's why it happened. Where do we find it? Was it a letter, a requirement in the franchise; where is it?

MR YK CHAN: We should have incorporated in the specification, the minimum spec of the buses, but

of course before that, I believe there should be a series of discussions with the bus company and then perhaps there's a an exchange of documents, but at the moment we are checking.

CHAIRMAN: Thank you. It's a very simple question: what document do we look for to find it; yes?

MR YK CHAN: Yes. We can provide.

MR DEREK CHAN: A second safety measure arising from that same accident was the requirement for the franchised buses to have black boxes. We have been through that requirement this morning. It's in a letter dated October 2003. But do you recall that black-box requirement also arising out of the Tuen Mun accident?

MR YK CHAN: Yes.

CHAIRMAN: Would you repeat the reference for the promulgation of that document?

MR DEREK CHAN: TD-5, page 1597, being the letter; 1598 being the requirement itself.

CHAIRMAN: Thank you.

MR DEREK CHAN: Then, in July 2006 and December 2007, there were two incidents of franchised bus collisions that resulted in passengers being thrown out of franchised buses.

The bus safety measures that were implemented as a result of those incidents were, firstly, a horizontal

guardrail being required to be installed on the upper deck windscreen; and, secondly, safety belts were required to be installed on the four upper deck front seats.

Firstly, do you recollect those two safety measures being implemented --

MR YK CHAN: Yes.

MR DEREK CHAN: -- as a result of those incidents?

MR YK CHAN: Yes.

MR DEREK CHAN: Both these features are again now standard features for franchised buses?

MR YK CHAN: That's correct.

CHAIRMAN: Do you have any reference to where this was promulgated? If not, come back to it.

MR DEREK CHAN: It's all in the list of franchised bus requirements which is annexed to the franchise agreement. I will come back to Mr Chairman on the reference to that list.

CHAIRMAN: When was this first required? Again, if you don't have detail, come back later.

MR YK CHAN: We will come back on the exact date.

MR DEREK CHAN: Again, in 2016, there were three bus accidents which caused the breaking of glass on the exit doors of buses, which caused injury to passengers. Arising from those incidents, an additional guard bar

was installed on the exit door. Do you recall that safety feature being implemented as a result of those incidents?

MR YK CHAN: Yes.

MR DEREK CHAN: Again, this has become a standard feature for all franchised buses?

MR YK CHAN: That's correct.

CHAIRMAN: Again, when was that required, first of all?

MR YK CHAN: That's required after the accident, but I can tell that all the -- after that, the buses have been retrofitted with such a guard bar, and they all completed in June 2017.

CHAIRMAN: Thank you.

MR DEREK CHAN: On 22 September 2017, there was a fatal bus accident which occurred in Sham Shui Po that resulted in three fatalities and a number of passengers injured.

As a result of that accident, it led the Transport Department to conduct a review of the Guidelines on Bus Captain Working Hours, Rest Times, and Meal Breaks, which resulted in a new improved set of guidelines in February. Is that a correct summary?

MR YK CHAN: Yes.

MR DEREK CHAN: Then, in March 2018, following the Tai Po accident in February 2018, a Working Group on Enhancement of Safety of Franchised Buses was set up.

I'm going to go to the chronology of the setting up of this working group in a moment, but can I first ask you this question.

We have just been through what appear to be a number of fairly useful safety features that have been implemented throughout the years as a result of bus accidents. Is there any reason why those safety measures were put in place only after the accidents had occurred and were not proactively put in place before the accidents occurred? Is there a reason for that?

MR YK CHAN: What I can say is when we -- we require the bus companies to provide a proper and efficient service, and provision of properly equipped buses to serve passengers is one of them, and all along we have been monitoring the performance of bus companies, of course including the equipment, the vehicles they use.

Now, of course, normally, when the services are being provided without any major incidents, then of course we will presume that they are actually operating properly, and actually this is a system instilled in our organisation that we take note or actually monitor continuously the operation of these buses, and if ever, in any circumstances, we discover there is any major fault of these buses or the way they provide the service, then the Transport Department would

proactively follow up the cases.

Hence, I would say that those accidents are unfortunate events that we don't want to see, but the Transport Department actually is proactively continuously monitoring what's happening to the operation of buses, and if we ever discover any incidents that have a major cause or to a specific type of accident, then we will sort of discuss with bus operators to provide and implement the necessary measures and equipment to ensure that those accidents won't happen again. This is the way I believe is a responsible way to ensure the safe operation of buses in Hong Kong.

CHAIRMAN: Can you point to some safety feature that was imposed, a requirement, without there having been an accident before that might have been connected to the safety feature?

MR YK CHAN: Apart from that, apart from monitoring the operation of bus services in Hong Kong, we also take note of what's happening in other parts of the world. One example I can quote is actually recently, some years back, we actually discovered or take note of there's some fire happened, occurred on buses --

CHAIRMAN: Fire in the engine compartment? Is that what you have in mind?

MR YK CHAN: Yes. When it's in operation, the fire actually broke out in a bus, but of course those cases maybe come from engine or other purpose, or other situations.

Arising from that, we actually -- our Vehicle Safety and Standards Division to carry out a research on what can we do, what can be done, to sort, of prevent that, and arising from that we require the bus companies to put in place the fire suppression system on all these buses and it has now become a standard feature in our bus specification.

CHAIRMAN: So this was again in response to there being some fires and then you did some research and then you put in place a requirement for fire suppression.

MR YK CHAN: You can say that.

CHAIRMAN: Do I understand you correctly?

MR YK CHAN: Yes.

CHAIRMAN: What I was asking you for is an example where you imposed a safety requirement without it being connected to an event that had occurred earlier. If you want to think about it and come back later, do so.

MR YK CHAN: I cannot think of any major sort of standard features or improvement with the buses, but I believe, actually, our Vehicle Safety and Standards Division does discuss, we have regular meetings with bus companies on vehicle repairs and maintenance aspects regularly.

There may be small things that happen. We can find out, for example, there are new features and faults commonly found in buses during our inspection. Those things that we notice, if we take note of that, then we can discuss with bus companies and require them to take particular note and pay attention for remedial action.

I think one of the examples is sometimes when we do the inspection and discover some leakage of oil from a particular part, or whether there's any rusting on the chassis, and for those things, probably it won't cause accidents as such, but this is a small thing that can accumulate to a certain stage that may cause some sort of vehicle breakdowns and inconvenience to bus passengers.

Those small things, although it looks they are not very significant, but we do discuss with bus companies, and one thing, if we discover such minor faults in the buses, we not only discuss with that particular company, we also put this across to other bus companies to take note, because they do operate similar types of vehicle.

I think this is the way that we continuously monitor -- we do an inspection, monitor, and find out what's happening to those buses and if any fault we require the bus company to take action.

For major incidents like the ones you mentioned,

of course, after our investigation, if we can identify any sort of ways, technically feasible ways, to address that, then we sort of follow through.

CHAIRMAN: Thank you.

MR DEREK CHAN: I will then next go on to look at the setting up and the process of the Working Group on Enhancement of Bus Safety, and I will deal with the events in a chronological manner.

If I may first start off with the minutes of the LegCo Panel On Transport, please, the LegCo Panel on Transport meeting that took place on 15 February --

CHAIRMAN: If you are going to deal with this chronologically, doesn't the district council meeting on 12 February come first?

MR DEREK CHAN: Yes, it does, Mr Chairman.

CHAIRMAN: That I think is a meeting that the commissioner attended.

MR DEREK CHAN: Yes. The document for that is in the DC-2 bundle, page 782.

CHAIRMAN: Yes.

MR DEREK CHAN: As you can see from the first page of the translation of the document, at page 782, this meeting of the Tai Po District Council took place on 12 February 2018.

Over the page, at 783, you can see that Ms Mable

Chan, Commissioner for Transport, was present in the meeting.

As you can see from page 784, the topic of discussion was the accident on Tai Po Road. I won't go through the minutes in detail. Suffice for me to summarise it in this way: a lot of views were expressed by different members of the district council, which Ms Chan, the Commissioner for Transport, explained this morning she took into account. So that's the first event.

CHAIRMAN: I think it's worth going to paragraph 8, where Ms Chan is speaking. One sees that perhaps one of the first steps that was being taken:

"The Transport Department had asked KMB to submit a report for the ... accident as soon as possible and KMB had also promised that they would submit [a report] within one month."

Then there is an indication that it had been announced that this committee would be set up. There is an indication in the last three or four lines that the commissioner was aware of concerns expressed by the Tai Po District Council about road safety in the Tai Po district and the relevant road section in the past, and this would be followed up closely.

There is another reference, as I recall, from the

commissioner later on. Are you able to take us to that, Mr Chan? Yes, paragraph 34.

MR DEREK CHAN: Yes, at page 798 of the bundle, Mr Chairman.

So, again, perhaps just summarising the four points that the Commissioner for Transport raised in this meeting, the first one being driving tests for bus captains and the vehicle examination issue. The second point is a review of the safety and speed limits; thirdly, locations of bus stations; and fourthly, that KMB will set up an investigation committee.

So these were the matters addressed by Ms Chan at this meeting.

CHAIRMAN: I think it is worth noting what is in (ii):

"The Transport Department will review the safety and speed limits of the roads in Hong Kong from time to time."

That's a general statement, no doubt.

"Although the site of the current accident is not a traffic black spot, the department will consider appropriate accident-improvement measures in consideration of the number and nature of past accidents, road design, site environment, and the impact on the drivers."

That of course is what happened.

Then, as I think you said, the final reference is,

in (iv), in anticipation of the KMB accident report.

I think that gives a context to the next date which, as you were saying earlier, is 15 February, and it's the LegCo meeting.

MR DEREK CHAN: Yes. That document is at bundle SEC-3, page 1342.

Mr Chan, do you have the document in front of you?

MR YK CHAN: I am looking at the screen.

MR DEREK CHAN: At page 1342, you can see this is a set of minutes of the special meeting held by the Panel on Transport on 15 February 2018, and over the page, at page 1343, towards the bottom of the page, you can see Ms Mable Chan attended as the Commissioner for Transport.

Again, I won't take you through the discussions, but can I go straight to the motion that was passed as a result of this meeting, at page 1360. The motions record that the panel urges the administration to, firstly:

"1. request franchised bus companies to review the staffing establishment of bus captains, provide reasonable working hours, rest time, meal breaks and remuneration packages for bus captains, and provide on a compulsory basis regular training on a safe driving attitude for full-time and part-time bus captains to

ensure that bus captains are equipped with the qualities of a good driver".

So the first motion concerns the guidelines, the working hour guidelines, and training. The second motion states as follows:

"2. apply anti-skid surface dressing, erect additional declaration warning signs and install speed enforcement cameras on the subject road section immediately, and review the 'high-risk' road sections across the territory and expeditiously enhance the relevant safety measures to safeguard the safety of road users ...

3. explore ways to further strengthen the safety installations on buses, including enhancing the protection for high-risk seats, retrofitting seat belts on more seats and making it compulsory in phases for passengers to wear seat belts, installing an external camera at the bus captain's seat, modifying the speed limiters on buses to ensure safe driving on high-risk road sections, and installing an auxiliary system for automatic emergency braking, so as to reduce the risk of injuries among passengers in an accident."

So the third motion concerns the installation of in-vehicle safety devices or measures, as well as the issue of seat belts.

Now, next in the chronology is the submission of KMB's investigation report on the Tai Po accident to the Transport Department on 23 March 2018.

Mr Chairman, the reference to that is KMB-1, page 98.

I won't go to this document yet. I just note that it was handed in on this date and I will come back to it a bit later.

CHAIRMAN: Very well.

MR DEREK CHAN: Now, what happened after the submission of the KMB investigation report is the first meeting of the working group, which was held on 13 March 2018.

Before I get to the minutes, I want to first go to the agenda, which is at CTB-3, page 588.

I simply ask you to note from this agenda that the main issue on the agenda appears to be "Discussion on the scope of works and membership of the working group". There is no date on the agenda. Do you recall whether this agenda was issued before KMB submitted its investigation report or afterwards?

MR YK CHAN: The meeting -- you mean the working group on 13 March?

MR DEREK CHAN: No, the meeting was on the 13th. Presumably the agenda would have been sent out before the meeting. The KMB investigation report was given to the Transport

Department on the 12th, so would this agenda have been set before the 12th?

MR YK CHAN: I think we have to come back to check on the exact date --

CHAIRMAN: Presumably -- forgive me for interrupting -- it was sent out under cover of a letter. Would that not be what one would expect?

MS AMY LEE: It is an email.

MR YK CHAN: We cannot confirm whether it's a letter or by means of an email.

CHAIRMAN: But either way, there is a record of it?

MR YK CHAN: Yes, that's right.

CHAIRMAN: That's what you are suggesting, is it? You can check and provide it?

MR YK CHAN: Now, if I --

CHAIRMAN: Before you move on -- when were the franchised bus operators first contacted at all about participating in a working group? When did that happen?

MR YK CHAN: I cannot tell the exact date but presumably the bus company would be advised in advance that there would be a working group.

CHAIRMAN: Presumably, they were asked, "Would you be prepared to take part in a working group?"

MR YK CHAN: Yes.

CHAIRMAN: You can't recall when that was?

MR YK CHAN: I can't recall the exact date.

CHAIRMAN: Do you recall who did it? Did you do it?

MR YK CHAN: Not me personally, no.

CHAIRMAN: Not you. Did any representatives of the Transport Department now present make that contact?

MR YK CHAN: Probably not one of our representatives here today.

CHAIRMAN: Very well.

MR YK CHAN: Somebody in the office.

CHAIRMAN: Yes, very well, in which case can you try to help us with some emails, correspondence, which helps us understand the time frame in which this was set up?

MR YK CHAN: Yes.

CHAIRMAN: Thank you, Mr Chan.

MR DEREK CHAN: Can I then move on to the actual minutes of the first meeting, and this is KMB-12, page 4869-1.

Mr Chan, can I just confirm with you that you have the right document in front of you. It should be KMB-12, page 4869-1 on the bottom right-hand corner.

That should be the first page of the notes of the first meeting of the working group.

MR YK CHAN: Yes.

MR DEREK CHAN: Can I confirm that you have the notes of the first meeting of the working group held on 13 March 2018 in front of you?

MR YK CHAN: Yes.

MR DEREK CHAN: So you can see the attendees at that meeting on the first page.

Can I take you to the second page, 4869-2. In the opening remarks by the convenor, who is Ms Rachel Kwan, Assistant Commissioner for Transport, can I pick it up six lines down from the top, where the convenor says that:

"... the purpose of the WG meeting was to review and study measures with a view to further enhancing bus safety."

My first question is this. Is there any reason why a working group of this type, which gets together everybody -- well, not everybody -- gets together the franchised bus operators and the Transport Department for the purposes of studying measures to enhance bus safety -- is there any reason why such a working group had not been set up prior to the Tai Po accident?

MR YK CHAN: I would say that this is a working group that was specifically set up in the wake of this particular incident. In the normal time, the other time, when the Transport Department do have other regular meetings set up to follow up with all aspects of the operations of the bus companies.

So, for this particular group, I think we have

a specific target or specific purpose for investigation, that's why we set up this working group, and it involved all the franchised bus companies and the relevant sections or divisions of the Transport Department.

CHAIRMAN: Who attended these other regular meetings?

MR YK CHAN: Well, we have different sort of regular meetings in the Transport Department and the bus operators.

CHAIRMAN: I'm sure you do. Was there any -- let's call it a forum -- was there any forum at which the very senior people in the bus operators attended together?

MR YK CHAN: Yes. We have regular forums with senior management of the bus companies. TD, the Transport Department's representative, may typically be the assistant commissioner of the Bus and Railway Division, and this meeting -- and the counterparts from the bus companies, they normally would be the operational directors.

CHAIRMAN: Not the managing directors?

MR YK CHAN: Not the managing director.

CHAIRMAN: Because that's the signal difference, is it not, between the working group and whatever else might have happened before? You've got the top of the companies there?

MR YK CHAN: If there are very important and specific items

that have to be discussed and which have to be decided by the many top management level, then probably there will be meetings.

CHAIRMAN: Can you provide us with the minutes of such a meeting, where the managing directors were present of the various franchised bus operators where safety was being discussed?

MR PATRICK WONG: Yes, sure.

Mr Chairman, may I supplement what Mr Chan said? Basically, we had different regular meetings on -- sometimes they're regular and sometimes ad hoc basis, and as you can see from the working group members, what Mr Chan mentioned about the manager or the operation directors, for example, KMB's Mr Godwin So is also attending another regular meetings, we are partners on various issues and Mr William Chung of Citybus and New World First Bus as well.

So, basically, we are partners and we had different meetings on various issues as mentioned by Mr Chan. Also on services, maybe included some regular meeting on safety and other --

CHAIRMAN: It's a very specific question. It's safety. And it's very specific. Managing directors -- Roger Lee, when was he last present at such a meeting together with Mr Cheng the managing director of Citybus, together with

the senior people at the Transport Department? That's the question.

Were there any such meetings: safety, top of the companies, top of the Transport Department?

MR YK CHAN: Mr Chairman, the regular meeting with the Bus and Railway Branch, meeting with their counterparts at the bus operations, the representative from those companies, like Godwin So and William Chung, et cetera, they are really the people that have been authorised by the company to make top-level decisions on all matters on operations. That is the regular forum that we have, to discuss with them all aspects of the bus operation, including safety. And the decision made at those meetings or items discussed at those meetings, they actually will be honoured if agreed by these companies. So probably there's not specific meetings that we have to actually meet the managing director.

CHAIRMAN: So the answer is "no"? The short answer to the question is "no"? The explanation is what you've told us first?

MR YK CHAN: Normally, no.

CHAIRMAN: Thank you.

MR DEREK CHAN: Now, at paragraph 2 of the minutes, there is a note that:

"The members had no objection to the membership and

the scope of work of the working group."

And there's a reference to an annex. The annex we can find at page 4869-9. The first item of the scope of work for this working group is to review the training arrangements. This is a matter that was covered by the motion passed by the LegCo Panel on Transport on 15 February 2018 that we just looked at a moment ago.

The second item for this working group is:

"To examine the technical feasibility, cost effectiveness, applicability and any other issues relating to the installation of seat belts on all seats other than exposed seats."

Now, again, the issue of seat belts was something mentioned in the motion passed by the LegCo Panel on Transport that we looked at moments ago.

Thirdly, the scope of work for the working group included the exploration of:

"... the technical feasibility, cost effectiveness, applicability and any other issues relating to the installation of on-vehicle safety devices ..."

Again, that is also something mentioned by the motion of LegCo Panel on Transport.

My question is --

CHAIRMAN: Before you move on, item (a), the speed display unit for passengers, was that mentioned in either the

debate or the motions?

MR DEREK CHAN: Not that specific unit. It was more a general reference.

CHAIRMAN: Thank you. But were the other items all mentioned or not?

MR DEREK CHAN: The speed limiter cap is certainly mentioned. The other specific matters were not addressed --

CHAIRMAN: It's a matter that can be checked simply by reference to the minutes of the LegCo meeting and the motions. So perhaps you can come back to us on that.

MR DEREK CHAN: Certainly, Mr Chairman.

My question for you, Mr Chan, is whether the definition of this scope of works for the working group was driven very much by the motion passed by the LegCo Panel on Transport; is that a fair observation?

MR YK CHAN: Well, I disagree to that. As you know, the scope of work as given in this minute, they go into quite detail, and also, as you can take note that in particular at item (3), there are a number of subitems included, specific devices that we are going to look at.

Actually, before this working group, we have done a lot of preparatory work, to look into what sort of thing we can do to improve or to help the bus captains on buses and what sort of device that can possibly be

useful for installation.

Of course, those are the research we have done and then incorporate in the scope of work for further investigation and discussion with the operators.

Some of the ideas may have been raised or suggested by the public or by LegCo members, or by others. But, in this world of putting safety equipment on buses, there is nothing -- there really are a number of things that you can do. If you are talking about seat belts, of course everybody will readily recognise that seat belts might help and this is a legitimate item to be investigated.

Whether training for bus captains, of course this is an accident that might arise from inadequate training of bus captains, and thus legitimately an item which we should investigate in the working group report.

All in all, before this working group report, we actually did some research and prepared for the items to be discussed. I think this is a responsible way to do it. Otherwise, if we just go to a meeting that allow the operators to make wild suggestions or even not responding to specific measures -- our view was, actually, in conducting this working group, we have done our research first and then prepared the items to be discussed, so that we have a more focused discussion

during this working group meeting, in the hope that we can achieve something meaningful and useful out of this working group.

CHAIRMAN: When was this research done about safety devices?

MR YK CHAN: We actually did a large part of our research in a compact time, about February.

CHAIRMAN: So it was done after the Tai Po accident?

MR YK CHAN: You may say so.

CHAIRMAN: Well, do you say so?

MR YK CHAN: Yes.

CHAIRMAN: Thank you.

MR DEREK CHAN: Can I compare the list of safety devices here with the list of safety devices mentioned in the KMB investigation report, which was available the day prior to this meeting.

For that, can I ask you to keep 4869-9 open, and at the same time go to KMB-1, page 114. KMB-1, page 114, is part 5 of the KMB investigation report that was submitted by KMB to the Transport Department on 12 March 2018.

Under this section, KMB was considering "Other measures to enhance bus safety".

In terms of safety devices, you can see, at paragraph 41, KMB mentioned the electronic stability programme, or also called electronic stability control.

MR YK CHAN: Yes.

MR DEREK CHAN: If you compare that against the scope of works document, at 4869-9, that's item 3(c).

Then, at paragraph 42 of the KMB investigation report, page 114, you can see a reference to geo-fencing, and that's a reference to speed control aided by GPS.

CHAIRMAN: Do you agree that the two mean the same thing?

MR YK CHAN: I would say so.

MR DEREK CHAN: I'm sorry, Mr Chairman --

CHAIRMAN: Please.

MR DEREK CHAN: And speed control aided by GPS is item 3(d) in the list of safety devices to be considered by the working group.

Over the page, at paragraph 45, KMB raised the issue of speed limitation. So sort of a speed retardation system that does more than just cutting fuel when the bus goes past a certain speed limit. That is also mentioned as one of the devices to be considered by the working group at paragraph 3(e).

At paragraph 47 of the KMB investigation report, there is consideration being given to a device to monitor the drowsiness of bus captains, and that is also a device to be considered by the working group at paragraph 3(g) of the scope of works document.

My general question is this: why do we see a substantial overlap between the devices that KMB said they are considering and the devices that are to be considered in the scope of works for the working group? Had there been prior coordination or discussion between the Transport Department and KMB on safety devices that can be considered and what should be put on the agenda?

MR YK CHAN: Okay. Let me try to answer this question.

Previously, I mentioned that before the working group meeting, the Transport Department has been carrying out some research on the sort of equipment that may help to improve equipment we fit on vehicles, to improve or to help the drivers, and also improve the safety standards, safety of vehicles.

In the course of doing that research, apart from our research we actually talked to the manufacturers. This is a logical way to do it because when you try to find out --

CHAIRMAN: Before you go on with your long answer, can you answer the specific question: had there been prior discussions between the Transport Department and KMB about what should be on the agenda; "yes" or "no", or "I don't know"?

MR YK CHAN: No.

CHAIRMAN: No? Now, by all means, carry on.

MR YK CHAN: I just want to try to set the scene what has been done. When we do our research, apart from our own normal context, we also approach the vehicle manufacturer of those buses. So mainly it's the three main manufacturers of buses in Hong Kong, ADL, Volvo and MAN, and we discuss with them and try to find out what can possibly be done to be fitted on those buses to improve the safety of vehicles.

I think for improving the safety of buses, there are only a number of things you can do. There is nothing new. But we can find out and bus companies can find out. I don't know whether they have discussed with the manufacturer to do the same thing as well, but for us, we do that independently in February.

MR DEREK CHAN: Mr Chan, if you don't mind, can I summarise it in this way: what you are saying is that you did your own independent research, KMB might have done their own independent research, you don't know, but it's a coincidence, a proper one, that you come up with a similar list of safety devices; is that the case?

CHAIRMAN: Because there are only a limited number of safety devices that are relevant; isn't that your evidence?

MR YK CHAN: That is right. And you can also notice that what KMB proposed, not all of their proposals are in our list, so obviously they are doing their own research and

think there is something that should be investigated.

CHAIRMAN: Yes.

MR DEREK CHAN: Still on the scope of works issue, can I take you back to the minutes itself at paragraph 3. That's at page 4869-2, paragraph 3.

Paragraph 3 says this:

"As regards the proposed scope of work, KMB/Long Win further suggested including four other aspects advise assault on bus captain, illegal parking at bus stops, traffic congestion, aggravating bus captains' driving fatigue and pressure as well as bus stop arrangements in the scope of work."

Paragraph 4 contains the Transport Department's response to that suggestion.

Can I pick it up over the page, around six lines down from the bottom. The minutes recorded this:

"Given the 3-month limited time span of the working group, it was agreed at the meeting that the working group should focus on the proposed scope of work set out at annex ..."

And it goes on to record what that scope of works is.

Am I correct to interpret it as saying that, at this stage, the intended limited time span of the working group meant that additional bus safety related matters

proposed by KMB should not be discussed in order to focus on the proposed scope of works of the working group? Is that a correct interpretation?

MR YK CHAN: At that time, as I just mentioned, the intention was to complete the working group and investigation and also come up with the recommendation in a really tight time, in about three months. That's why, at that moment, we sort of want to focus on those critical items.

Now, all other items, we are not saying that they are not relevant.

CHAIRMAN: But the answer to the question is "yes".

MR YK CHAN: Yes.

CHAIRMAN: The question was, was KMB's shopping list rejected because of the short time span? And the answer is "yes; is that right? Do I understand your evidence?

MR YK CHAN: That's right, that's right.

We also mentioned to the bus companies that those items can be discussed at other forums; it's not necessary to be covered in this working group.

MR DEREK CHAN: Yes. Now, at this stage, what was the rationale behind the intended limited life span of a working group of this nature? At that stage, why was it not a permanent group; why was it intended to be only three months? What was the thinking behind it?

MR YK CHAN: The thinking behind it at that time was we tried to find out and develop measures as quickly as possible, and three months' time at that time was considered appropriate, in order to cover the scope that we have defined at that time.

CHAIRMAN: What was the urgency in finding out and developing measures as quickly as possible? What was the urgency?

MR YK CHAN: I suppose the urgency was that a serious bus accident had occurred, and the Transport Department would like to work with the bus companies to develop remedial measures as quickly as possible, so as to minimise or even eradicate the occurrence of such incidents in future. But of course those items cannot be implemented in one day but we try to complete it as soon as possible.

CHAIRMAN: And presumably -- and say so if it wasn't -- this was also a reaction to the fact that there had been considerable concern expressed in LegCo, in the district council and publicly about the incident, the 10 February accident. Was that a factor in the urgency?

MR YK CHAN: I would say this is a contributing factor to that.

CHAIRMAN: There was a need to be seen to be doing something; is that it?

MR YK CHAN: No.

CHAIRMAN: Yes, Mr Chan.

MR DEREK CHAN: Mr Chairman, it may be convenient here again to note the reference on the transcript on the scope of work discussion between KMB and the Transport Department. There's a series of correspondence on this very topic, which starts at KMB-12, page 4939. I don't intend to go to that detail at this stage, but again the reference is there.

CHAIRMAN: Just give me a moment because I want to understand what you are talking about.

This is correspondence about the KMB shopping list, as I've called it?

MR DEREK CHAN: Yes, and then the Transport Department's response. So there are four rounds of communication, if I may put it that way, starting at 4939.

CHAIRMAN: Yes. Thank you.

MR DEREK CHAN: Mr Chan, can I then take you back to the minutes of the first meeting, and can I take you, please, to paragraph 16, which is page 4869-6.

Mr Chan, I am going to come back -- this paragraph 16 is on the issue of seat belts. I am going to come back to you on seat belts as a separate topic later on. But, at this point in the chronology, can I just ask you this question which arises from

paragraph 16.

At paragraph 16 -- I will just read it into the record:

"CTB/NWFB queried the practicability of installation of seat belts on all seats to enhance passengers safety because it would be difficult for the bus captains to ensure passengers on buses wearing seat belts. Besides, CTB/NWFB also raised the concerns on the need of wearing seat belt by standees who could not be provided with seat belts. TD advised that there were requests for a comprehensive review on seat belts installation on bus after the traffic accidents."

Now, Mr Chan, what "requests" is referred to in this paragraph here? We know, in the LegCo Panel on Transport, in the motions passed there was a reference to seat belts, which is a month before this meeting. Does the "requests" there refer to the requests made by the LegCo Panel on Transport in its motion, or does it refer to some other requests?

MR YK CHAN: I think what you mentioned, the LegCo session, the request for seat belts, to review the seat belt arrangement, is one --

CHAIRMAN: Could you speak into the microphone more directly. Thank you.

MR YK CHAN: Yes. I believe that what you mentioned about

the LegCo members' request for review on seat belts is one source of information, but of course we cannot specifically mention which one, which occasions that the requests were made, but from our meeting of the press and also from other sources, we do note that seat belts is an item that we are expected to look into.

CHAIRMAN: Are you moving on?

MR DEREK CHAN: Yes.

CHAIRMAN: There is a reference here, in the plural, to "traffic accidents". Now, Tai Po was one accident. To what other accident was this referring?

MR YK CHAN: I think it really mentions that particular accident.

CHAIRMAN: So plural is a mistake? It should be "the traffic accident"?

MR YK CHAN: I think that was a general statement, referring traffic accidents. There's not particular mention of other accidents, but the Tai Po accident is the one that brings up this issue for review.

CHAIRMAN: Yes. Thank you.

MR DEREK CHAN: The next matter in the chronology that I want to deal with is the issue of a digital speed map. What I'm referring to is a digital map with speed limits incorporated into the map itself.

The first document I want to take you to in this

respect is at TD-1, page 366.

What you should have before you, Mr Chan, is an email. Can I first take you to the bottom email on page 366. It is an email from the committee's secretariat to the Transport Department, one Mr Tony KT Yau.

CHAIRMAN: What is the date of the email?

MR DEREK CHAN: The date of the email is 1 June 2018. You can pick that up at the bottom of page 366.

The email itself is over the page at page 367. You can see from the second paragraph from the top:

"It was noted from the hearing that CTB and NWFB had set their black box system to automatically generate over-speeding report for drivers driving above 70 km/h generally, as well as for drivers driving above 50 km/h on 25 road sections selected by the companies for enhanced monitoring ... A question was posed to CTB and NWFB on whether the bus company management had any information on the percentage (in terms of length) of roads travelled by CTB's and NWFB's buses and with a statutory speed limit of 50 km/h that were covered by the abovementioned 25 road sections. In response, CTB and NWFB replied that they did not have the figure (as they said that they did not have a full set of digital data detailing the speed limit of all roads in Hong

Kong) but agreed to share with the committee a digital map depicting all roads that their buses operate on.

It is in connection to the above that I am writing to seek your assistance in providing the committee with digital maps showing the statutory speed limits of roads in Hong Kong, so that the committee may compare those maps with the ones to be provided by CTB and NWFB."

Now, (i) and (ii) set out the detail of that request, but that request was made on 1 June 2018.

What then happened on this topic is a letter was then sent to the bus companies by the Transport Department, on 7 June 2018, just a few days after this email.

Can I firstly take you to the document, at TD-1, page 477. Do you have before you the letter from the Transport Department to the bus operators dated 7 June 2018?

Mr Chan, do you have that before you?

MR YK CHAN: Yes.

MR DEREK CHAN: In this letter, in the second paragraph, the Transport Department says:

"I am pleased to inform you that the dataset of speed limits under the road networks managed by TD in the geographical information system format is already available to download from data.gov.hk [website] of the

HKSAR government."

In the third paragraph, you inform the bus operators that:

"You may utilise these GIS data packages to explore the technical feasibility on speed control by GPS or geo-fencing with your bus manufacturers or other appropriate parties to conduct relevant trials."

Now, my question is this. Is there any reason why the Transport Department wrote to the bus companies, drawing their attention specifically to the availability of a speed limit digital map, in the context of GPS speed control, only after this committee has enquired into its availability? Is there any connection between the two?

MR YK CHAN: Well, the date of the letter was sent on the 7th to the operators.

MR DEREK CHAN: Yes.

MR YK CHAN: We sent this letter because Citybus said -- I believe they are not aware of the city map data is already available.

CHAIRMAN: That was apparent from what had been stated in the letter from the committee, was it not, that it was obvious they didn't know about the availability of this digital map?

MR YK CHAN: I presume Citybus did not know.

CHAIRMAN: No.

MR YK CHAN: That's why we sent a letter to them to advise the datas are actually available.

CHAIRMAN: So there is a connection between the fact that it came out in the inquiry, this letter, perhaps, to the Transport Department, telling you that, although it was already available on the transcript, and that's why there was a response saying, "If you don't know about its availability, here it is, it's available"; is that it?

MR YK CHAN: I think there's a connection.

CHAIRMAN: Yes, thank you. Perfectly sensible, if I might say so.

MR DEREK CHAN: Then, moving on from that, Mr Chan -- there were various meetings held in March, April and then June. I will come back to some of the details of the matters discussed in the meetings on the issue of seat belts, but at this stage can I then go forward in the chronology to 25 July 2018. That date is relevant because we have a meeting by the LegCo Panel on Transport, and a briefing note was prepared by the Transport Department in advance of that meeting or for the purpose of that meeting.

That document is at TD-1, page 403.

MR YK CHAN: Yes.

MR DEREK CHAN: So that's the briefing paper prepared for the panel meeting.

Now, Mr Chan, I had originally prepared a number of questions to ask you on the basis of this briefing paper, but those issues have now been superseded by the report, the full report, of the working group that the department provided to the committee yesterday afternoon, so I will pick up the matters that I want to ask you from the full working group report.

The report -- Mr Chairman, my copy is unpaginated, but again, for the transcript's record --

CHAIRMAN: Thank you.

MR DEREK CHAN: -- the report of the working group is at TD-5, page 1757.

CHAIRMAN: Which paragraph number are you going to?

MR DEREK CHAN: I'm going firstly to the summary at section 5 of the report.

Mr Chan, I'm going directly first to the summary of recommendations at chapter 5 --

CHAIRMAN: Yes, I have it.

MR DEREK CHAN: -- which is internal pagination page 41.

Mr Chan, at paragraph 5.3, it deals with the proposed installation of in-vehicle safety devices, and 5.3 says:

"All new double-deck buses procured from July 2018

onwards will be incorporated with:

(a) electronic stability control system, and

(b) speed limiting retarder."

At 5.4, it is noted that for existing buses, the franchised bus operators will be working on retrofitting these two items on to the buses.

So that deals with one category which is devices which will be installed.

At 5.5, this deals with devices that will be trialled to see whether they are worth installing, and under that category we have the BMCS, which is the bus monitoring control system, the collision-alert and lane-keeping devices, and the driver-monitoring device. So these are the devices that are to be trialled.

My question is this: is there any reason why these numerous enhancements to bus safety were considered only after the Tai Po accident and not before that?

MR YK CHAN: I would say that these improvement measures or new equipment is an outcome of our discussion with the bus operators and the vehicle manufacturers to prove that they might be useful, actually useful, for improving the safety of buses, and that comes out, the recommendation like this.

CHAIRMAN: But the question is, why weren't you having these discussions with the bus manufacturers prior to the

Tai Po accident? That's really the question.

MR YK CHAN: Well, perhaps, as I mentioned before, this Tai Po accident actually entails a series of questions on whether something more can be done to improve the safety of operation of buses, and arising from that I would say that this is the outcome of the discussions, and this is the way we have been moving forward.

CHAIRMAN: I think it comes to this, does it not: because of what had been said in LegCo, the district council, publicly, the press, that was the impetus that got you looking into these areas; is that fair?

MR YK CHAN: Yes.

CHAIRMAN: Thank you.

MR DEREK CHAN: Now, can I focus on the BMCS for the moment, which is the bus monitoring control system. Is it a fair summary to say the bus monitoring control system consideration arises as a result of the technological advancements of the black box or telematics systems that's available to be installed on franchised buses? Would that be a fair observation?

MR YK CHAN: Yes. Black box is sort of a major item that is embedded in this sort of system.

MR DEREK CHAN: Yes. It is the black box that enables the BMCS to be further advanced?

MR YK CHAN: Yes.

MR DEREK CHAN: We have already looked at the pre-existing requirements that the Transport Department imposed on the franchised buses this morning, in a document dated 2003. In that regard -- to some extent we have already covered this this morning, but there are a few matters I want to ask you about, at paragraph 2.22.

We've already been through this morning that annex 2 contains the updated black-box requirement. At 2.22, the report says:

"Moreover, the working group notes that the TD has recently reviewed and updated the 'Basic minimum requirements for electronic data recording device' which was first issued in 2003."

So my question is when was this reviewed and what prompted the review?

MR YK CHAN: Well, it is a review of the function, the capability of the telematics that are now available -- for the telematics now currently used by the bus companies, and then the review give us the results that there are some other functions that actually the telematics is capable of recording or taking signals and it would be useful in enhancing the BMCS. That's why I would say that the revision of the basic minimum requirement for the electronic data recording device is arising from this review.

CHAIRMAN: Sorry, is arising from this review, the committee?

MR YK CHAN: This review.

CHAIRMAN: Thank you.

MR DEREK CHAN: Still on the issue of the BMCS, can I take you to paragraph 5.14.

At 5.14 of the report, it says this:

"Moreover, the Transport Department is keen to see the development and trials on BMCS which enables franchised bus operators to adopt a more holistic approach in both enhancing bus safety and management and control of bus fleet. Apart from overseeing trials by franchised bus operators, the Transport Department plans to engage a service provider to carry out an independent trial on vehicles to evaluate the applicability and effectiveness of using geo-fencing technology to control vehicle speed, which is one of the vital parts of the BMCS. Looking ahead, the TD would review the findings as revealed in the trials and would have further discussions with franchised bus operators with a view to developing a clear roadmap for uplifting the franchised bus monitoring through implementation of the BMCS."

Now, I've got a couple of questions on this proposed engagement of a service provider to carry out independent trials. What progress has currently been

made on this front, engaging an independent service provider to conduct trials independently by the TD?

MR YK CHAN: We are actually applying for resources, funding, to fund this independent trial.

MR DEREK CHAN: So does that mean that there's not yet an identification of who may be providing this service?

MR YK CHAN: Not yet.

CHAIRMAN: This term, "service provider", what does that actually mean? Independent consultant? What is it?

MR YK CHAN: Well, this is a party who can provide this sort of service to the Transport Department to carry out this trial. May I put it more specific?

CHAIRMAN: Please.

MR YK CHAN: We are looking to engage the Hong Kong Productivity Council to carry out this sort of trial for us. But this is not yet fixed because we are still waiting for funding.

CHAIRMAN: Perhaps you can help me. Why is it that you think that they have the expertise to deal with this?

MR YK CHAN: We have actually tried to source a suitable party to assist Transport Department to do an independent research on this geo-fencing technology. This is because we want to try to be more proactive, to do more research in this regard, and also we have some more independent information to verify the bus

operators' claim on their development, whether they are genuine or not.

In the search of these parties, we find that the Hong Kong Productivity Council, they do have an automotive parts and accessory system and R&D centre. We have discussed with them and we believe that they have the sort of capability to carry out this sort of research.

CHAIRMAN: Thank you.

MR DEREK CHAN: So I take it from your answers that you do not yet have a defined scope for the engagement, or have you got something?

MR YK CHAN: We are working on the detailed project brief, on the scope of the project, but basically what we want to do is -- we will try to do this trial in two phases. The first one is to test out this geo-fencing technology, to see what can be done to improve the accuracy of this positioning system and whether it is working properly, and we also intend to try in other types of vehicle, to see whether it works.

In the second phase, subject to a successful trial in the first phase, then we will talk to the bus companies, whether we can adopt this technology to try on their buses as well. So we will have our independent trial and the bus company also engage their own supplier

to do more or less the same thing. But this is something that we try to cross-reference and see whether we are actually doing the right thing or they are doing the right thing.

CHAIRMAN: I'm sorry, the first part of the test is to test the accuracy of the GPS system? Is that what you said?

MR YK CHAN: Well, the first part is -- I think, out of this whole geo-fencing technology, one aspect is, the most difficult, is the application of this GPS positioning in Hong Kong environment.

CHAIRMAN: Yes.

MR YK CHAN: And there are a lot of feedbacks that they are not very accurate and that's why they have to apply geo-fencing technology to actually map out -- sort of map out these road networks and then try to provide a more accurate reading on the route itself. This is something that has to be tried out.

Also, I understand that the service provider working for Citybus and also KMB is also working on that sort of technology and has produced some quite good results, but we want to try to -- we really want to have an independent trial to sort of verify and then understand more about this technology.

CHAIRMAN: And this technology is, first of all, GPS, Global Positioning System?

MR YK CHAN: Mm-hmm.

CHAIRMAN: And its implementation in a geo-fencing system; is that it?

MR YK CHAN: Yes.

CHAIRMAN: Thank you.

MR DEREK CHAN: I'm sorry, do you want to say something, Mr Chan?

MR YK CHAN: No, that's all.

MR DEREK CHAN: Mr Chan, there is nothing in this report that talks about a similar proposed appointment of an independent consultant or a separate independent Transport Department trials for the other devices that are being tried. They are the collision-alert and lane-keeping devices and the driver monitoring devices.

Now, are there any plans by the Transport Department to conduct their own independent trials or consultancy work, and if not, why not?

MR YK CHAN: We would like to do more, but the reality is we do need resources to do it. As the commissioner this morning also mentioned, we are actually applying for resources to set up an IT -- technology group, to carry out that sort of studies and researches. With the resources we have at the moment, and like this trial we are also applying for funding to do it, if we have sufficient resources, we certainly would like to go into

that sort of -- more researches.

In fact, in this project, independent trial, the second part is really we will go into sort of using the technology to map out -- match out the speed limit of the vehicles and then we also want to carry out trial on whether we can apply the speed limiters, to restrict the speed on our road sections. But this is really subject to the first successful trial in the first phase and then we will go into the second phase.

CHAIRMAN: And by "speed limiters" you mean active retarders?

MR YK CHAN: That's right.

MR DEREK CHAN: Mr Chan, so we have been through the way the Transport Department has dealt with various enhancements to bus safety. Now I want to contrast that by looking at the London approach.

CHAIRMAN: If you are moving on to another topic, we are going to take a mid-afternoon break, not least of all to give Mr Chan a rest, but also yourself. If that's convenient, we will take 20 minutes now.

MR DEREK CHAN: Yes. Thank you, Mr Chairman.

CHAIRMAN: A 20-minute break.

(4.02 pm)

(A short adjournment)

(4.22 pm)

CHAIRMAN: Yes, Mr Chan.

MR DEREK CHAN: Mr Chairman, I think I owe the committee a reference in terms of the Singapore penalty situation.

CHAIRMAN: Yes.

MR DEREK CHAN: The document that we have that describes the franchised bus services in Singapore is at SEC-2, page 822. That's the first page of the document.

So, Mr Chairman, the document itself is an information note from the research office of the Legislative Council Secretariat, and the part relevant to us for our question is at paragraph 3.19 at page 834. At 3.19, there is a reference to "Quality of Service Standards", defined as "QoS", and the end of the paragraph says:

"Currently, the QoS standards comprise the following two categories:

(a) Operating performance standards which measure minimum daily or monthly operational deliverables, either at the bus network or route levels. They cover the aspects of bus reliability, loading and safety ..."

So that's where safety comes in.

At 3.20, the paragraph sets out consequences of non-compliance with the QoS standards and the scale of the fines.

CHAIRMAN: Yes.

MR DEREK CHAN: Turning over the page, at 835, we have a table of the quality of service standards, grouped under different headings.

CHAIRMAN: Yes.

MR DEREK CHAN: Mr Chairman will note that under the heading "Reliability", the third item is a bus breakdown rate, which is set at less than 1.5 per cent monthly, and under the heading "Safety" it would appear that the Singapore Land Transport Authority also uses only the accident rate of all bus services of less than 0.75 per 100,000 bus kilometres per month.

CHAIRMAN: And as we would express that, 7.5 per million kilometres?

MR DEREK CHAN: Yes. And again, page 837 --

CHAIRMAN: A high figure compared with our accident rate for our buses in Hong Kong?

MR DEREK CHAN: Yes, purely on an accident rate basis.

CHAIRMAN: But nevertheless a penalty to be visited on the franchised bus operator if that event occurs?

MR DEREK CHAN: Yes, that's correct.

CHAIRMAN: Am I right in recalling that we have asked those assisting us in the Land Transport Authority in Singapore whether or not this penalty has ever been used?

MR DEREK CHAN: Yes. The committee has written letters to

the Land Transport Authority, setting out a number of matters which arose from this research, information note.

CHAIRMAN: And that's one of the questions: has this penalty provision ever been invoked?

MR DEREK CHAN: Yes, it is.

CHAIRMAN: Thank you.

MR DEREK CHAN: Mr Chan, before the break, I was going to contrast the Hong Kong approach to the London approach. So, firstly, can I deal with the topic of what they have referred to as intelligent speed assistance, which is similar to our geo-fencing speed limitation concept.

For that, can I first take you to a document --

CHAIRMAN: Do you agree with that proposition, that ISA is similar to geo-fencing?

MR YK CHAN: Yes.

MR DEREK CHAN: Can I first take you to a document at bundle MISC-3, page 939.

Mr Chan, what you have before you should be the first page of a report published by Transport for London titled, "Intelligent speed adaption design", dated December 2009.

Can I go to the introduction to this report to give context to what was happening in December 2009, and for that can I go to page 945.

So what is being looked at now are the introduction part -- I will just read out the first two paragraphs:

"ISA [that's intelligent speed assistance] software development began in France in the 1980s and has been trialled and evaluated in a number of different markets since, proving effective at reducing driver speed and incidents on the road. In May 2009 TfL commenced a trial of one of the latest ISA systems in an attempt to reduce speed and road accidents in the capital. Prior to this trial TfL developed one of the most comprehensive digital speed maps of any city.

The three types of ISA modes currently available are Advisory, Voluntary and Mandatory ISA. The Advisory ISA displays the speed limit to the driver via a digital map and GPS system in the vehicle, and is currently an add-on unit, similar to a satnav device. Voluntary ISA goes a step further, linking the speed limit information with the vehicle engine management electronics, and can limit the vehicle's performance once the speed limit has been reached. Under the Voluntary system the equipment can be switched off if the driver wishes so that the device does not affect acceleration. The Mandatory ISA differs in that the equipment cannot be switched off (except in case of emergency). TfL is sponsoring a trial of Advisory and Voluntary ISA within London."

And can I take you to the second-to-last paragraph from the bottom:

"To date a year long project has already been undertaken by TfL to understand and explore the London drivers' attitude, motivations and barriers to ISA."

Again, my reference to this document is to set the scene and give a date as to when the Transport for London has been looking at this ISA system.

The second document that I want to take you to, on the same subject, is a report from the Transport Research Laboratory dated November 2016 on the same issue. In the same bundle, can I take you forward to page 1002.

Mr Chan, I hope you have before you a report by TRL, the Transport Research Laboratory, in London, on intelligent speed assistance on London Buses, and it says, "A trial on two London bus routes".

Over the page on 1003, you can pick up the report date near the top of the page, which is November 2016. Again, can I pick up the context of this report from the introduction, which is at page 1011 of the report.

Starting at the middle part of the page, under the heading, "What is ISA?", the first paragraph describes what intelligent speed assistance is -- it's similar to what we've looked at so I'm not going to read it out --

and the second paragraph, which I will read out, says this:

"In the Pedestrian Safety Action Plan, TfL made a commitment to run a trial of ISA Technology on a small number of vehicles in the bus fleet to understand the potential role of this technology in promoting adherence to speed limits across the road network and its impact on reducing KSI casualties. Subsequently, in 2015 TfL carried out a trial of ISA on London buses using an intervening ISA system by Zeta Automotive Ltd. Such a system is the focus of the study."

So, Mr Chan, I just want to pick up the dates from this report, because the report is dated November 2016, but the trials took place in 2015.

Again, can I take you quickly to page 1105, which is an appendix to the same report. It's a report on a trial, and the report is dated October 2015. Again, just picking up dates of various things happening in this context.

Over the page, at 1106, it gives us a little bit more information about the trials in the first bullet point:

"TfL are running a trial of intelligent speed assistance technology on 48 London Buses. The technology brings together internal information on the

vehicle speed with external information on the speed limit, and actively controls the speed of the vehicle to stay within the speed limit."

The second bullet point says this:

"ISA has been trialled across Europe and research in Sweden shows a positive impact of the technology both in terms of improving road safety and acceptance from drivers."

Just to complete the picture, 1120, we can pick up the date of the second trial, which is January 2016, at page 1120 of the report. There's a report on the phase 2 trial.

So the documents show that the ISA had been under consideration by Transport for London as early as 2009, with trials conducted in 2015 and 2016.

My question is this: was the Transport Department aware of TfL's extensive analysis into intelligent speed assistance prior to the Tai Po accident?

MR YK CHAN: We are not aware of this.

MR DEREK CHAN: Leaving this topic of intelligent speed assistance, I'm going to move to look at how London approach their bus safety programme.

Can I pick that up firstly from Mr Weston's report, which is at expert bundle page 148.

CHAIRMAN: Internal pagination?

MR DEREK CHAN: Internal pagination, page 34.

CHAIRMAN: Thank you.

MR DEREK CHAN: And I'm looking at paragraph 7.5 which is headed, "Bus safety standard".

Mr Chan, I'm just going to read the first two paragraphs under the heading, paragraph 7.5, which provides the context in which Transport for London was looking into setting up the bus safety standard:

"A core output of the bus safety programme is the development of a ... bus safety standard. TfL have been working in collaboration since 2016 with road safety consultant TRL, Loughborough University, the bus operators and manufacturers to assess and then recommend features which should be incorporated into future bus design to help drive safety improvements. The primary objective of the bus safety standard is casualty reduction especially those killed and seriously injured.

Several potential technologies including intelligent speed assistance, autonomous braking, runaway bus prevention, pedal confusion prevention, acoustic and visual conspicuity, mirror design and frontal crash protection are being considered as part of this programme with both the costs and benefits of each being thoroughly assessed to ensure that the casualty reduction is maximised in return for the financial

investment made."

Now, the committee has heard evidence that this process of developing a bus safety standard began in February 2016, and still has not been completed as of today.

CHAIRMAN: That is Mr Weston's evidence?

MR DEREK CHAN: Yes, and the reference to that, Mr Chairman, is at Day 18, which is 27 September 2018, page 115, line 7, which gives us the date for that.

CHAIRMAN: Thank you.

MR DEREK CHAN: As Mr Chairman mentioned this morning, the bus safety standard is expected to be announced in mid-October 2018. So it's more than a two-year process, in that sense.

CHAIRMAN: I think what we've been told is that it is intended to be rolled out in phases, and the first phase will be announced in October.

MR DEREK CHAN: Yes. Actually, if I can just read on, if you look at page 148, the same page that we are looking at, just a bit further down, just under the middle of the page, it says here:

"TfL are planning to announce the first phase of its bus safety standard on 16 October 2018 and it is currently envisaged that they will have three introductory phases:

-- phase 1 ...

-- phase 2 ...

-- phase 3 ..."

And you've got the dates there.

Having looked at the Hong Kong approach and having looked at the London approach, what would be your response to a suggestion that the Transport Department's previous approach to enhancement of bus safety appears to be more reactive to accidents having occurred rather than proactively and systematically seeking out additional measures to enhance bus safety before accidents occurred?

MR YK CHAN: I cannot comment on the background, how this bus safety programme comes from. We don't know what institute the authority --

CHAIRMAN: You are not being asked to comment on that.

MR YK CHAN: I know. I understand. But what I'm saying is I don't know whether the bus safety standard is more or less equivalent to what we have already, something that we have the recommended minimum specification requirement for new franchised buses.

In these specifications, it includes all the features a franchised bus should have, in terms of providing services or facilitating passengers using the buses, and obviously a large part in it does cover

safety and new safety measures to be incorporated.

Again, this standard, this time we have reviewed it and also amended it, in August this year, and we will continue to do so, to include the new standards, to be incorporated in here.

The bus safety standard mentioned to be revealed or to be unveiled in London comprises a lot of phases and certainly I would suppose it's a very comprehensive and very complicated programme. Certainly, the Transport Department will look into that and see what we can learn from this. As the commissioner said, we will send somebody to the UK later, and certainly this is one aspect that we can further look into.

MR DEREK CHAN: Mr Chan, can I then move on to seek your observations on some of the recommendations that the committee has heard that may improve the consideration, proactiveness of the considerations being given to the enhancement of bus safety, and I would like to invite your observations on them.

Firstly, the committee has heard various terms being given to this, but one term is a Bus Operator Forum. That's from Mr Weston. Prof Stanley talks about a standing committee on bus safety, the main aim being putting together various interested parties and collaborate on bus safety issues on a regular basis.

To some extent, Ms Chan has accepted that recommendation this morning, by referring to the extension or turning the Working Group on Enhancement of Bus Safety into a permanent group. So I want to ask --

CHAIRMAN: She accepted in terms that she was accepting the recommendation of Mr Weston.

MR DEREK CHAN: Yes. In that sense, can I ask some further questions about this working group intended to be made permanent.

Can I first pick it up from the working group's final report at paragraph 5.13. Again, just for the reference of the transcript, this is TD-5, page 1803, internal pagination page 43.

Mr Chan, I hope you are looking at paragraph 5.13, which is under the heading, "TD's proposed actions". The first part of 5.13 talks about the steps that TD proposes to take in respect of the devices proposed.

Can I pick it up at the last sentence, the last line of internal pagination page 44, which says this:

"The TD will continue to keep track of the latest development of other devices and technologies with a view to further enhancing bus safety. Taking a proactive approach, the TD will continue to convene working group meetings to monitor the progress of trials closely on a regular basis, and provide a platform for

the Transport Department and the franchised buses operators to exchange views on the latest bus technology advancement and the applicability of new safety devices and technologies on franchised buses."

This is a reference to what Ms Chan said this morning about extending the life of the working group. Is that correct?

MR YK CHAN: Yes.

MR DEREK CHAN: Is there any document which sets out the details of what is now a permanent working group? For example, is there a document setting out any expanded scope of work, any set regular meeting intervals, any document which tells us how this working group has changed from an interim group to a permanent group?

MR YK CHAN: Nothing in writing at the moment, but certainly during our discussions with the bus operators, we will discuss this -- we have sort of mentioned about -- because all those initiatives mentioned in the working group will take some time for implementation, and also, as we mentioned, we will also look into the new initiatives where possible. So the working group will carry on, but now, as discussed this morning, this working group is going to be changed to become a permanent forum, but nothing in writing yet.

CHAIRMAN: Have you secured the agreement of the franchised

bus operators to continue to be members of this permanent forum?

MR YK CHAN: Yes.

CHAIRMAN: That's been done orally?

MR YK CHAN: We mentioned in the last working group.

MS AMY LEE: Last working group meeting.

CHAIRMAN: I'm sorry?

MR YK CHAN: We have thrown this idea out at the last working group meeting and they did not express any objection to it.

CHAIRMAN: What was the date of that meeting?

MR YK CHAN: 21 September.

CHAIRMAN: Yes. That's referred to at paragraph 1.5 of the full report.

Can you give me a page reference in the paginated version, Mr Chan?

MR DEREK CHAN: TD-5, page 1763.

The reference to there being a meeting is at the second line of paragraph 1.5.

MR YK CHAN: Yes, in the working --

CHAIRMAN: So it was mentioned at that meeting?

MR YK CHAN: Yes, the four dates mentioned for the working group, it was the last one, 21 September.

CHAIRMAN: Yes. The committee has been provided with the unredacted full notes or draft notes of these other

meetings. That is other than 21 September and 29 August 2018.

Would you please provide those to the committee?

MR YK CHAN: As I understand it, the notes of the last meeting are still being prepared and to be commented by the operators, so we will --

CHAIRMAN: Right. Well, no doubt it's in draft form, it's ten days ago or more, so there must be a draft. Prepare a draft and we will accept it on that basis.

MR YK CHAN: Yes. We will discuss with the operator.

CHAIRMAN: Yes. Well, we found that when we ask everybody, they agree to do it for themselves and defer in respect of others, so eventually we got some redacted notes and then Citybus must have said, "Yes, we don't mind the committee having them", and we got the full version. We would like to get to the end result, straight away if we can.

MR YK CHAN: Yes. We will certainly look into this. The only worry is because the notes are in draft format and have not been seen by the members, so I don't know whether it will be the final version.

CHAIRMAN: Just give them the draft notes now and get them to comment. If there are reservations, then by all means make them.

MR YK CHAN: We will consider it.

CHAIRMAN: That's the best you can do, "We will consider it"? All right.

Yes, Mr Chan.

MR DEREK CHAN: Just on this working group, can I just ask one further question about the scope or the intended scope of this working group going forward.

From the passage at paragraph 5.13 of the working group report that I just read out, it appears from the wording that the scope of works of the working group is intended to be restricted to discussions on technological enhancements on safety device of franchised buses. Would that be a fair observation of the intended scope of this working group going forward?

MR YK CHAN: It would be fair to say that the scope of the working group has been defined beforehand, and it is a common understanding of the members of the working group that we will restrict our discussion to those items.

MR DEREK CHAN: Yes. As we have established when I went through the chronology in respect of this working group, that scope of work was agreed with a time frame of three months for the life of the working group in mind.

MR YK CHAN: Yes.

MR DEREK CHAN: The new intention is for this working group to be permanent.

MR YK CHAN: Right.

MR DEREK CHAN: So my question is: is it intended that the scope of works of this transformed working group is still going to be restricted --

MR YK CHAN: No.

MR DEREK CHAN: -- to only technical considerations, or is it intended to consider other aspects of bus safety that may relate to safe practices or bus-related road safety issues, for example?

MR YK CHAN: Well, with the change of the scope, the working group into a permanent forum, I would expect the scope of the new forum will cover much more than the original scope and if there's any need to extend to other issues related to safe operation of buses, I think we will include it. We are open-minded about this.

CHAIRMAN: So you would expect, or you anticipate, the scope of this permanent working group/forum to encompass all issues of safety/safe operation of buses? Is that it?

MR YK CHAN: Yes.

CHAIRMAN: Thank you.

MEMBER LO: Can I ask a question?

CHAIRMAN: Please do. Prof Lo.

MEMBER LO: What about membership of the working group, like for example police or Road Safety Council people, who would be relevant to look at bus safety?

MR YK CHAN: Well, the membership -- since we will be transforming this working group into a more permanent forum, the membership, we can consider whether it should be extended to other relevant members, whether government or non-government. But at the moment, I think we will have to discuss and see how this group is going to work, in terms of membership and the scope as well.

CHAIRMAN: When do you expect these matters to be resolved, that is to say the scope identified and the membership to be identified?

MR YK CHAN: I would say we will do it as quickly as possible. There's a million things going on, and we certainly hope we can take forward this new initiative as soon as possible.

CHAIRMAN: By the end of the year? You are identifying scope and you are identifying members. Those are the two matters.

MR YK CHAN: Perhaps we can take this target for achievement.

CHAIRMAN: You will consider that as a possible target?

MR YK CHAN: Yes.

CHAIRMAN: Potential?

MR YK CHAN: Bearing in mind -- may I supplement -- because as I mentioned before we are trying to get more support,

resources, to take forward this initiative, and certainly this is a factor that we have to consider.

CHAIRMAN: Yes, Mr Chan.

MR DEREK CHAN: The next recommendation that has been suggested to the committee which may have an effect of encouraging a proactive approach is what has been termed as a safety innovation fund in London.

Can I first take you to the evidence of what that fund is, and then I will ask for your observations on that. Firstly, can I take you to the expert bundle at page 146.

Mr Chairman, that's --

CHAIRMAN: Mr Weston's report?

MR DEREK CHAN: Yes, Mr Weston's report, internal pagination page 32.

CHAIRMAN: Thank you.

MR DEREK CHAN: I am interested in the paragraph under the heading, paragraph 7.3, "Safety innovation fund".

Again, I will just read it out:

"During November 2017 TfL announced as part of the safety innovation fund the award of 500,000 pounds to six bus operators to develop new ideas that will improve safety across London's bus network. Abellio, CT Plus, Go-Ahead, RATP, Tower Transit and Metro line were all awarded funding for their ideas for safety devices and

to improve workplace behaviour. These trials form part of the data collection process which has fed into the development of the bus safety standard."

Mr Weston then goes on to describe the actual devices being trialled, so I won't go through that.

Can I then go to a passage at page 152 which contains Mr Weston's recommendations.

Mr Chairman, that's page 38, internal pagination page 38.

CHAIRMAN: Thank you.

MR DEREK CHAN: A related recommendation that Mr Weston gives, under the heading "Network financial performance" -- can I pick it up at the second full paragraph of that page:

"Consideration could be given as to whether certain safety initiatives, such as the uptake of new safety technology and bus driver training targeted specially at safety might need to be funded by the Transport Department as direct grants outside of the franchise agreements with specific outcomes linked to these grants. Providing funding outside of the franchise agreements is also justified especially if the benefits accrue to the wider society."

Having that context in mind, what observations does the Transport Department have in terms of establishing

some sort of fund that provides funding for trialling and developing or coming up with new ideas or new measures to enhance bus safety?

MR YK CHAN: As you may know, in Hong Kong the operating situation is very different to that of the UK. I believe the bus services in the UK are tendered out and actually the government is providing funding to run those services, while in Hong Kong the bus companies actually should be responsible to run the network or bus routes on their own, under commercial principles.

CHAIRMAN: Sorry, under what?

MR YK CHAN: Commercially viable -- commercial principles.

CHAIRMAN: Thank you.

MR YK CHAN: So these are private companies, and the bus companies should be responsible to pay for all the outlays for operating the bus services and we believe that the operation, the equipment and buses are being provided by the bus companies and they should normally continue to do so. So the UK situation is very different from Hong Kong.

But about new initiatives, whether it should be subsidised by the government can be a topic that can be discussed. In actual fact, even nowadays in Hong Kong, we actually sort of are subsidising the bus companies to put up the display units on one-for-one arrangement. So

this is not an item that cannot be touched. We are open-minded about this. But do they establish funding solely for a particular purpose? That I think will have profound implications and real cost implications to other public transport modes as well.

But for individual items, certainly we are open-minded about it and it should be discussed, if the bus companies see there is a need to do so.

CHAIRMAN: What is this display unit that you subsidise?

MR YK CHAN: Currently?

CHAIRMAN: Yes.

MR YK CHAN: Currently, the government is providing subsidised funding for installation of real-time display units on the bus shelters or bus stops, and also the seatings at those bus stops on a one-for-one arrangement. That means if the bus company provides one, the government will subsidise for another one. So this is the arrangement that has been implemented. So we do provide assistance to take forward initiatives that are beneficial to the general travelling public.

CHAIRMAN: This real-time display unit tells the member of the public the estimated time of the arrival of the next bus?

MR YK CHAN: That's right.

CHAIRMAN: Are you saying that government does a one-for-one

subsidy?

MR YK CHAN: Yes.

CHAIRMAN: The bus company provides one, the government does another?

MR YK CHAN: Yes.

CHAIRMAN: And what about bus shelters, bus seats, seats at bus shelters?

MR YK CHAN: Yes, seats at the bus shelters, installed at the bus shelters.

CHAIRMAN: A one-for-one arrangement?

MR YK CHAN: Yes.

MR PATRICK WONG: Seats no. All subsidised by government.

MR YK CHAN: Sorry, seats --

CHAIRMAN: I'm sorry, what's the position with seats?

MR PATRICK WONG: For seats, basically we subsidise the provision of the seats installed at the bus shelters, for the bus shelters basically built by the bus operators themselves, and for the ETA, we call it the display unit, just mentioned by Mr Chan, it's being subsidised on a matching basis one by one.

CHAIRMAN: So you pay for the member of the public to sit down at the bus stop to watch one in two of the displays that you have paid for; the other is paid for by the bus company? Is that it?

MR PATRICK WONG: Actually, I think for seats, basically we

have a lot of requests and feedback from especially elderly and those people in need, they prefer to have seats. So we want to -- actually, it's the government policy under the public address -- policy address, that it subsidises the bus company to expedite the provision, to make more numbers available for those who are in need.

Thank you.

CHAIRMAN: Who pays for the bus shelter, the structure?

MR YK CHAN: The bus company.

CHAIRMAN: Right. Thank you.

Yes, Mr Chan.

MR DEREK CHAN: Another recommendation that has been suggested to the committee by Prof Stanley is the establishment of an independent safety regulator.

Again, you have read Prof Stanley's report. I'll just give the context to the question. In Australia --

CHAIRMAN: I think it would help to be taken to his recommendations, so we can understand it.

MR DEREK CHAN: Yes.

Can I take you to two parts of Prof Stanley's report. The first one is at expert bundle page 70.

Mr Chairman, this is a reference to Prof Stanley's second report.

CHAIRMAN: Thank you.

MR DEREK CHAN: Internal pagination page 70.

Mr Chan, can I just draw your attention to page 70. The page is headed up, "Governance", "Main agencies and roles", and in the middle italicised passage Prof Stanley quotes something from the Transport and Housing Bureau on the system in Hong Kong. Can I pick it up in the paragraph under the italicised passage:

"THB thus performs the strategic or policy role, the TD undertakes the tactical role and franchised bus operators provide the operational or delivery role. This parallels the Melbourne arrangement, where Transport for Victoria undertakes the strategic role and the Public Transport Development Authority has responsibility for the tactical level. As shown in figure 3.1 [which is the figure over the page], however, a notable difference between arrangements in the two jurisdictions is that Melbourne also has a separate independent safety regulator operating at the tactical level. Transport Safety Victoria was first established under the State's Transport Integration Act 2010, as discussed in section 3.3.1 of the first report under this brief, a role that has no equivalent independent safety entity in Hong Kong. The Transport Department monitors safety performance of FB operators and is involved in promoting safety initiatives. However, the

absence of an independent safety regulator in Hong Kong seems likely to lessen the relative focus on safety matters."

So that's the first part that I wish to draw your attention to.

The second part, if I may ask you to turn to page 99 of the same bundle.

Mr Chairman, that's internal pagination page 46.

CHAIRMAN: Thank you.

MR DEREK CHAN: Can I pick it up at the middle of the page, so I'm going to read the paragraph under the numbers 1, 2 and 3. Prof Stanley says this:

"Operator support is available from BusVic, the industry association, if desired, across all three areas. For example, BusVic has developed templates for MISs and MMSs which are available to its members, these templates having been developed in collaboration with the Transport Safety Director. The Transport Safety Director has a strong focus on the development and improvement of safety culture in a bus business and safety risk management, working with operators and the industry to improve practice. Guidance material is available, such as Guidance -- Safety Culture, September 2016 ... and the director has indicated his willingness to share materials and ideas with Hong Kong, if desired.

The independence of the Transport Safety Director both elevates safety as a desirable policy outcome and provides an independent source of accountability and transparency on safety processes and outcomes that exceed what is likely to result if (route) bus safety was left solely to the public transport regulatory agency and/or a governmental department to manage."

So, in that context, what is the Transport Department's observation as to this idea of setting up an independently accountable safety regulator that focuses on safety issues?

MR YK CHAN: Well, I don't know the scale of operations -- is it in Australia, Melbourne? -- under this Victoria, and as I understand the bus operations in Victoria, they are sort of quite de-centralised to quite a number of operators, and obviously the scope of monitoring is much larger.

CHAIRMAN: This is a report really about Melbourne rather than the state of Victoria, which obviously is huge.

MR YK CHAN: Yes, but it's talking about BusVic. I'm not sure whether it's talking about the whole of Victoria or it really only concentrates on Melbourne.

CHAIRMAN: Yes. I follow your point.

MR YK CHAN: But even if it is talking about Melbourne, as I understand, Melbourne bus operations, the bus

operation in Melbourne is very different from Hong Kong. In Melbourne, I think they are talking about quite a number of operators, in quite a large number, and --

CHAIRMAN: Yes. I think we can help you with that.

MR DEREK CHAN: In terms of negotiated services, which is about two-thirds of the routes, there are 15 contracts and 12 operators, and in terms of one-third of the route which is subject to competitive tendering, there is one contractor, but that is subject to change or may change every seven years.

MR YK CHAN: So talking about less than 20 operators?

CHAIRMAN: 13.

MR YK CHAN: 13. So obviously you are looking at quite a number of operators across the spectrum, and the regulators of these operators have to manage quite a number of these operators.

But for Hong Kong, we are looking at -- well, we have six franchisees, and roughly into three core groups: KMB/Long Win, New World First Bus/Citybus, NLB.

CHAIRMAN: Long Win.

MR YK CHAN: Long Win and KMB.

MR DEREK CHAN: New Lantao is the other one.

MR YK CHAN: Yes, NLB, New Lantao Bus. So we are managing basically three large groups, six franchisees.

Under this regime, I would say it is much easier,

because we don't have to manage such a large number of operators, and quite easy -- if you talk about maintenance of safety standards, that will be a much smaller task, as I see it.

CHAIRMAN: In Hong Kong?

MR YK CHAN: In Hong Kong.

Also, as already mentioned previously by the commissioner, in the Transport Department we do have specific professional branches and groups to look into safety. We have the Road Safety and Standards Division, the Vehicle Safety and Standards Division, and also Bus and Railway Branch, all these are actually exercising very tight control on the monitoring of these operators.

As far as I can see now, we are doing -- well, I think the way we are working is very efficient, very efficient in the sense that with one department and dealing with only three big groups, and what we want to achieve sort of in raising the safety standards of these operators is not a tremendous task, like in Melbourne you have to convince probably 13 or 14 operators to achieve a common goal.

In particular, when you talk about turning a working group into a permanent forum now, it actually is creating a much more focused core group. I would say this forum will take on the duty, I would say very

similar to what is being proposed, as an independent audit sort of set-up, like the one in Melbourne.

So, in the Hong Kong context, I think the need for establishing a separate entity to oversee the operation over the Transport Department and the operators is not absolutely necessary.

CHAIRMAN: But what's independent about a forum that is comprised of the Transport Department and the bus operators? They are not independent of each other, are they? They are not independent.

MR YK CHAN: I would say, yes, they are not independent, between those two parties, but I think we can further look into the membership of this group and see whether it is possible to bring in independent opinions into the group, to provide independent opinions on the operations and running of this group.

CHAIRMAN: Who do you have in mind?

MR YK CHAN: I don't have anybody yet, but we certainly will look into this.

MEMBER LO: I was talking about the Road Safety Council people.

MR YK CHAN: We certainly would welcome.

CHAIRMAN: You would regard them as being independent, if they were members of this permanent working group forum, that would give an element of independence; do you

agree?

MR YK CHAN: Yes, yes, members from the Road Safety Council are actually quite independent members.

CHAIRMAN: Please, Mr Auyeung.

MEMBER AUYEUNG: I hear the comment about this forum, that you will be -- sort of you are having permanent meetings, including many stakeholders, but one of the comments I would make is that this forum would discuss more than just safety, because you would discuss many other things.

What about within the Transport Department having a particular unit just responsible for safety? Is it a possibility?

MR YK CHAN: At the moment, we have a unit called Road Safety and Standards Division. This unit actually looks into the safety aspects of all modes of transport. Certainly franchised bus is one of them.

But I see that this unit alone cannot achieve specifically what we want to achieve for enhancing the safety of buses, because it involves more than roads; it also involves vehicles and the sort of operations.

So, in actual fact, within the Transport Department internally we can certainly form a group comprising the experts from all these divisions, to specifically look into franchised bus safety. I think this is workable.

MEMBER AUYEUNG: We heard from the commissioner this morning that there are about four units responsible for safety jointly. But how often do those units meet? Do they meet regularly, like monthly, to discuss safety issues?

MR YK CHAN: At the moment, there is no set regular meeting between these units, but certainly, particularly in the backdrop of we are going to sort of create a new forum to take forward the bus safety issues, and obviously all these units will be sort of involved, and perhaps under this forum we will sort of have to internally arrange regular meetings to discuss and take forward initiatives, bring to the Transport Department's notice.

MEMBER AUYEUNG: Thank you.

MEMBER LO: May I ask a question?

CHAIRMAN: Please, Professor.

MEMBER LO: I try to explore a little bit more about the Road Safety Council. So how does that work with the TD and the police? Is that sort of like an independent body to look after safety? Has it served an independent role already? I'm trying to understand the working relationship between Road Safety Council, the TD, the police, and also a Road Safety Research Committee which is part of the Road Safety Council -- how would these four entities work together to promote or to look at safety?

MR YK CHAN: On this question, may I invite Mr Yau to talk about it?

CHAIRMAN: Yes, please.

MR TONY YAU: Thank you, Chairman. The Road Safety Council combines a representative from different departments or bureaus, and also from outside official members, such as motorist associations, Institute of Logistics and Transport, Hong Kong Medical Association and Hong Kong Road Safety Association, IT fields and insurance.

So the Road Safety Council is an independent body, and under the Road Safety Council we have two subcommittees. The first one is the Road Safety Research Committee -- Prof Lo, you are one of our members -- and the second one is the Road Safety Campaign Committee. The Road Safety Research Committee, that means if we have some new initiative under the road safety, no matter if the initiative it related to vehicle safety, road safety or other new issues, it would be discussed in the Road Safety Research Committee.

In the Road Safety Research Committee, we have academics from different universities, and also some members from other relevant road safety associations.

For the Road Safety Campaign Committee, it mainly focuses on publicity and education. Under Road Safety

Council, we have a quarterly meeting for each council and each subcommittee. In the Road Safety Council, the TD will report the quarterly accident record to the council members, and the accident record will include bus accident record. So members of the council will offer their comments on the bus safety performance.

CHAIRMAN: And whose statistics are these for franchised bus accident records?

MR TONY YAU: Similar to other accident records, we retrieve the data from the police system and then do our analysis --

CHAIRMAN: So it's based on the police primary data, is it?

MR TONY YAU: Yes.

CHAIRMAN: And you collate and analyse that?

MR TONY YAU: Yes.

CHAIRMAN: Who does that?

MR TONY YAU: My office, TD, Transport Department, and we report to the council members the safety performance, the trends, or any observations.

CHAIRMAN: Can I ask you to speak into the microphone more closely.

Yes, so based on police records which your Transport Department collate and analyse?

MR TONY YAU: Yes. Then we report the safety performance to the council members, report any observation we identify,

any trend of accidents or any common contributory factors noted in our analysis.

Because the Road Safety Council consists of members from our bureau, the police and other external bodies, so if they have any comments or suggestions, any initiative to enhance or any policy to enhance bus safety, they will be discussed in the Road Safety Council, and the members under the council would follow up on the ideas raised in the council.

CHAIRMAN: Does the Road Safety Council make recommendations specifically relevant to enhancing franchised bus safety?

MR TONY YAU: In recent few years, they do not have any particular recommendations.

CHAIRMAN: Has it ever made a recommendation about enhancing franchised bus safety?

MR TONY YAU: I think, because the recommendation may involve legislation, enforcement as well as publicity, although to my memory there's no specific comment or suggestions about the legislation, but on the enforcement as well as the publicity there are some suggestions to enhance the bus safety.

CHAIRMAN: Can you provide us with some examples of that, where a recommendation has been made?

MR TONY YAU: For example, I remember that we identified the

trend of accidents, for example, the passenger lost balance, and then the publicity we propose in the Road Safety Council is focused on alerting passengers to hold the handrail firmly. That's one example.

CHAIRMAN: I had more in mind recommendations relating to perhaps the design of buses, the safety devices, seat belts. Has the council ever made those kinds of recommendations?

MR TONY YAU: No. I think why there's no recommendation from the Road Safety Council is, over the past few years, the overall accident numbers remained stable for the franchised bus.

CHAIRMAN: Isn't that all the more reason to make recommendations, if the accident rate is not dropping? Isn't that a reason to make recommendations? That seems to be the driving force in London, to get the accident rate down. They have a goal. I think they call it zero, goal zero or some phrase like that. So, if the accident rates are not dropping, why aren't recommendations being made?

MR TONY YAU: Yes. We have also the target in the Road Safety Council -- we are also discussing any plan to lower the accident rate. But we are not talking about lowering the accident rate for franchised bus. We are talking about lowering the accident rate of the whole --

all the transport.

CHAIRMAN: Is the reality that this council makes no recommendations that are directly relevant to franchised bus safety, apart from holding onto the handrail?

MR TONY YAU: As I mentioned, this is one of the examples of publicity. The Road Safety Council has recommended enhanced publicity, and also, for enforcement, the Road Safety Council also recommend the police to do enforcement.

CHAIRMAN: Enforcement of what?

MR TONY YAU: Such as illegal parking at bus stops, because it will affect the operation of the bus as well as --

CHAIRMAN: Yes. When was that recommendation made?

MR TONY YAU: I have to check the records.

CHAIRMAN: Can you provide that information to us? Because that is a subject that has been a constant refrain of bus companies, in particular KMB, and of the trade unions, the drivers, that there is an ongoing problem, not solved, not really addressed. I think they might say the police are not really interested.

MR TONY YAU: Because each year the police, in the Road Safety Council, they will consult on their STEP programme, the selective traffic enforcement programme, and, in the STEP, there's selective enforcement about the illegal parking.

CHAIRMAN: Please provide documents that show this recommendation that the police enforce the law about illegal stopping at bus stops.

MR TONY YAU: I will check. I am not sure whether it is particular for bus stops or in general the illegal parking.

CHAIRMAN: I'm sorry?

MR TONY YAU: I have to check the record, to check if the illegal parking is focused on bus stops or any location on road carriageway that affects road safety.

CHAIRMAN: Well, any recommendation of either of those areas, please provide us a copy of the document.

MR TONY YAU: Yes.

CHAIRMAN: Yes, Mr Chan.

MR DEREK CHAN: Mr Chairman, I was about to move on to the topic of seat belts, but I see the time.

CHAIRMAN: Yes. That's obviously an appropriate moment. But, Mr Chan, if there's something you wish to say, please do so.

MR YK CHAN: Thank you, Chairman. Talking about the enforcement of illegal parking at bus stops, I believe it is not the mainstream work of the Road Safety Council. Actually, this is a subject, as you have rightly pointed out, that the unions and the bus companies mention; this is a common problem.

For this, the Transport Department actually is taking active action, has been taking active action, to push -- not push -- to request the police to take enforcement action, and we do receive specific requests from bus companies and then we refer them to them, and also we follow up whether they have done it or not.

So it would be fair to say that operational problem like this will be sort of more or less undertaken by the Transport Department rather than by the Road Safety Council.

CHAIRMAN: Yes. We've encountered your efforts in that respect. We've been provided with correspondence, and so on. We've heard from the police about it as well.

MR YK CHAN: We can find out some sample of it.

CHAIRMAN: All that I was trying to do was to find out what it is that the Road Safety Council does that is relevant to enhancing safety on franchised buses.

But we have reached the end of our day. Thank you, ladies and gentlemen, for your assistance today. There are quite a number of documents that we will be asking you to provide before we sit on Saturday, but we are now going to adjourn until Saturday.

What time are we sitting on Saturday?

MR DEREK CHAN: I understand we are starting at 10 o'clock, Mr Chairman.

CHAIRMAN: So we will adjourn then until 10 o'clock on Saturday. Thank you very much.

(5.31 pm)

(The hearing adjourned until 10.00 am on Saturday, 6 October 2018)

EVIDENCE FROM THE TRANSPORT DEPARTMENT: MS MABLE 1
CHAN, MS AMY LEE, MS AMY TSE, MR PATRICK WONG, MR YK CHAN, MR WILLIAM SHUM, MR TONY YAU

Opening statement by MS MABLE CHAN 6

Examination by MR DEREK CHAN 12

[Blank Page]

2018 年 10 月 4 日

上午 10 時 01 分恢復聆訊

出席人士： Hon Mr Justice Michael Lunn（倫明高），香港專營巴士服務獨立檢討委員會主席

歐陽伯權先生，香港專營巴士服務獨立檢討委員會委員

羅康錦教授，香港專營巴士服務獨立檢討委員會委員

陳政龍大律師及黃佩琪大律師，由高露雲律師行委聘，代表香港專營巴士服務獨立檢討委員會

陳美寶女士，運輸署署長（運輸署代表）

陳英傑先生，副署長／公共運輸事務及管理（署理）（運輸署代表）

黃志光先生，助理署長／巴士及鐵路（運輸署代表）

謝善怡女士，首席運輸主任／巴士及鐵路 1（運輸署代表）

邱國鼎先生，總工程師／道路安全及標準研究（運輸署代表）

岑毅安先生，總機電工程師／車輛安全及標準（運輸署代表）

李美鳳女士，總運輸主任／特別職務（運輸署代表）

主席：（經傳譯員）早晨，陳女士同埋你嘅同事，多謝你接受我哋邀請嚟進一步向委員會作供，協助我哋嘅調查工作，嘅研訊工作。或者一開始，我想先講幾點嘅觀察，就係琴日發生咩嘢事，琴日 5 點鐘--下晝 5 點鐘，我哋收到一沓文件，係運輸署畀我哋，其中一份似乎就係工作小組嘅最後嘅報告，呢個就係檢討巴士安全嘅工作小組嗰個工作報告嚟嘅，同埋亦都有幾份文件，一份係講嗰個時速限，就係一個關於道路安全嘅審核同埋低時速限制區嘅研究，另外就係關於巴士車長嘅輔助設施嘅，即係喺巴士總站嗰度。

咁晏 5 點鐘先畀到文件我哋，當然就好難協助到我哋嘅研訊，特別係講到話係低時速限制區，譬如話時速 20 公里等等，呢啲肯定係相關嘅材料，當然我哋係需要一陣你會提到嚟協助我哋嘅，但係嗰份文件係咁遲先至畀到我哋，因為我哋又要將佢掃瞄，加咗入我哋嗰個文件夾度等等，都係要好多工。

所以我就想問一個問題，點解要琴日下晝 5 點鐘先交呢啲文件畀我哋呢？

陳美寶女士：（經傳譯員）主席，容許我回答，代表運輸署，我哋首先向委員會致歉，因為我哋咁遲交呢啲文件。其實我哋一路自從 5 月我哋出席咗第一次嘅聽

Transcript by Epiq Hong Kong, Limited

證會之後，一路都有做跟進工作，我哋好小心咁跟進，我哋亦都察悉到委員會就住幾個重要方面都表達咗興趣，我哋其實都有考慮幾個重要嘅措施，但係我哋需要首先內部通過到，亦都要爭取到額外嘅資源去實施嗰啲額外嘅設施，所以我哋就希望可以交到呢啲資料畀委員會，係儘早畀到你哋，等你哋考慮。但好明顯，因為同時我哋亦都有好多其他緊急而重要嘅工作，所以冇辦法更早咁提交呢啲資料，我係誠心致歉。

但係我亦都希望呢啲嘅資料可以作為參考資料畀委員會嘅，我哋唔係話預期委員會要好仔細咁嚟考慮呢啲資料，即係喺我哋進一步作供嘅時候，只不過我哋係想向委員會報告政府內部同埋部門內部嘅一啲最新嘅發展，其實我哋正在爭取專項嘅資源，可以落實當中嘅幾項措施，我哋只不過係希望畀多啲資料委員會，等你知道我哋而家諗緊啲乜嘢同埋打算做啲乜嘢嘢。

主席：（經傳譯員）好，多謝你，多謝你證實話你都係有跟進，亦都有一路係留意我哋所收到嘅證供，同時你亦都係去回應，好明顯從你睇到嗰啲嘅課題，我哋都好高興睇到你係咁做嘅，只不過係呢個過程我哋大家都係一齊行，所以都希望可以從中學習。

但係我可以畀一個例子你，譬如係今年8月，運輸署就用咗呢個叫VSSD，就係話有一個電子嘅數據記錄儀嚟嘅，呢份係8月嘅情況嚟嘅，點解要等到10月先話畀我哋聽呢？呢份文件，個日期就8月嘅，其實呢件事我哋一路都係有唔同證人都有提出，而有關嘅要求其實係2003年11月已經係定咗㗎喇，點解之後又係冇再用呢？點解唔早啲講畀我哋聽？

陳美寶女士：（經傳譯員）主席，8月嗰次嘅更新其實就係因為加強專營巴士安全工作小組嘅工作而做出嚟嘅，佢哋考慮到嘅，佢哋亦都係有好多輪嘅討論，亦有牽涉唔同嘅人士，之後就有呢個更新，睇番轉頭，我哋其實應該係喺更新咗文件之後，立即通知委員會，但係我哋其實係將呢部分納入咗工作小組嘅整體報告裏面嘅。

或者我都可以再補充一個個人意見，就係喺之前嘅作供同埋我哋都係知道，係要喺六個月內首先完成工作小組嘅第一期嘅工作，做咗份報告，但係同時亦都係出現咗一啲緊急嘅工作，特別係因為嗰個超強颱風，所以最後一次嘅工作小組嘅會議就要9月初先至可以同相關嘅巴士營運商開到會，但係因為9月初開唔到會，所以就要改期到9月中，然後之後我哋要再修訂一下嗰個報告，亦都要確保所有人都知道相關嘅建議，呢個工作小組報告就琴日5點鐘交畀委員會，其實係因為...

主席：（經傳譯員）對唔住，容許我打斷一下，咁都係改善咗㗎喇，其實過去我哋都試過半夜收到文件，起碼今次係5點鐘，我哋都已經好多謝你喇。

陳美寶女士：（經傳譯員）我哋肯定係希望改善，我哋會盡力去做，我亦都係再誠心向主席同委員會致歉，為你哋造成不便。我哋亦都係會儘量適時咁樣向大家報告最新嘅發展。

主席：（經傳譯員）唔係淨係我哋嘅委員會嘅，就算律師都係，因為佢要係事先睇到個資料，先至可以幫助到我哋去提問嘅，但係呢啲係相關嘅文件，雖然你冇之前畀到，但係其實係相關嘅，但係你就畀唔到足夠時間佢哋去睇。不過點都好，多謝你。或者喺我請律師開始提問之前，我想問下你想唔想一開始作一個評論？

陳美寶女士：（經傳譯員）我知道時間好寶貴，主席，如果你容許嘅話，我只係想好快咁講一講幾點，就係委員會顯示關注嘅範疇，係過去幾個月你哋提出嘅，我想好快咁講一講。

主席：（經傳譯員）好，請你開始。

陳美寶女士：（經傳譯員）多謝主席。我同我嘅同事好高興今日可以再次出席委員會嘅聽證會係作進一步證供協助委員會工作。

喺我哋上一次 5 月出席聽證會之後，我哋知道委員會係邀請唔同人士提供口述證供，亦都係有唔同人士提供咗好多嘅文件嘅，我哋作為運輸署，我哋亦都係會盡力為香港提供最好嘅運輸系統，安全、可靠、有效率、環保，而且亦都係照顧到用家同埋營運商嘅；安全就係我哋嘅運輸系統最重要嘅一環，所以喺呢方面，我哋一路致力去監察巴士營運商嘅表現，係要確保佢哋符合法律，亦都遵守所有嘅安全要求。

喺 5 月之後，我哋都提交咗補充資料畀委員會參考，呢個係因應委員會要求嘅，今日係樂意回答任何委員會提出嘅問題，我只係想特別係提及幾點，就我哋相信係委員會過去表達關注嘅。

一直以嚟，我哋都係積極採取行動，加強道路安全同埋改善我哋嘅道路安全管理系統嘅，我哋為咗要確保系統不斷改善，運輸署係會參考外國嘅經驗同埋做法嘅，不時都會咁做。喺 2017 年底，我哋亦都係開展咗一個顧問研究，就睇下喺香港路邊嘅危險嘅因素，我哋係亦都有確認咗有好幾方面可以再加強嗰個改善嘅工作，係加強我哋嗰個表現評估，同埋有個制度係做道路安全審核嘅。

我哋亦都有建議係成立一個特別嘅隊伍係實施道路安全審核，即係所有新嘅道路都會咁做，同埋積極、全面同有系統咁樣加強道路安全，我哋已經係取得有關所需嘅人力資源。

我哋亦都想補充，喺上星期，財經事務局嗰度亦都通知我哋，話已經批准咗畀我哋有額外嘅人手，可以實施道路安全審核嘅工作嘅，所以我哋就會喺部門裏面喺未來嘅幾個月會開始實施呢個系統。

第二方面，講到話係專營巴士服務安全加強嗰方面，我哋就完成咗一個六個月嘅研究，即係呢個工作小組做嘅工作，就要提出一啲建議，可以加強巴士嘅安全，包括埋喺巴士裏面安裝一啲嘅安全設施同埋係有關於巴士車長嘅培訓

亦都會檢視。

主席，呢個唔係終結，而係開始，我哋會繼續做我哋嘅工作，工作小組會繼續做佢嘅工作，就會定期開會，就係去監察有關嘅跟進工作嘅進度，同埋會檢視業內嘅一啲嘅做法，希望可以提出最佳嘅業內嘅安全做法。

另外我亦都係想報告運輸署已經積極執行工作小組提出嘅建議，包括各項嘅發展、測試、試行同埋可行性嘅研究等等，都做咗，亦都係同巴士營運商同埋巴士製造商合作一齊去做嘅，其中一個就係要做一個原型，係巴士監察管理系統 BMCS，就係裏面會有黑盒，會有全球定位系統，有地標圍欄同埋兩階段嘅時速限制等等，等佢哋可以符合嗰個法定嘅時速嘅。

作為第一步，城巴同埋新巴就已經係開始咗試用嘅工作，喺全個車隊自從今年9月18號就開始試行，就會有實時嘅響號嘅警報，等巴士車長可以知道佢哋超速。

運輸署亦都覺得我哋需要去推動有關嘅工作，我哋就已經係聘用咗一個服務營辦商就係進行獨立嘅測試去睇下有啲咩嘢方法可以控制車速，呢個就係 BMCS 嘅一個重要部分嚟嘅。我哋就會係檢視嗰個測試嘅結果，然後亦都會同巴士營運商一齊確定一個更好嘅路線圖，更清楚，點樣去加強專營巴士嘅監測，就可以用呢個 BMCS 嚟做得到嘅。

另外，我哋亦都會睇外國嘅一啲嘅最新嘅科技，希望我哋有一個專責小組會做，就睇下點可以加快有關嘅測試。

第三，我哋亦都係非常關注巴士車長嘅福利，係希望係每一方面都能夠協助到佢哋係提供更多嘅輔助設施喺總站嗰度嘅，自從 2017 年 12 月中，運輸署就成立咗一個專責小組，係有各個相關政府部門同埋專營巴士營辦商嘅代表參與嘅，就去監察喺公共交通交匯處嗰度嘅設施點樣可以係加強。我哋會繼續密切同各方一齊合作，尤其是係一啲負責審批嘅部門，等我哋可以係儘快去處理相關嘅申請。

往前睇，我哋就會考慮同相關嘅政府部門同埋政策局，諮詢佢哋，睇下點樣可以用政府嘅資源去提供一啲輔助設施喺公共交通交匯處同埋巴士總站，等營辦商可以畀租金就可以用到呢啲嘅設施嘅，喺呢方面，我哋會同相關嘅政策局同埋部門就一齊工作，就會睇下點樣可以管理到相關嘅設施同埋處理有關嘅撥款問題。

有關於巴士車長嘅休息時間、用膳時間等等，我哋之前已經做過一次嘅檢討，而家已經係逐步咁樣去落實最新嘅指引嘅，即係由 2018 年初就開始咁做。而喺 2018 年第二季，最新嘅指引已經係逐階段落實，亦都因為要聘用足夠嘅巴士車長嗰度可能係出現短缺，所以又要睇下點樣，如果僱用到車長之後，就縮短佢哋嘅工作時間、駕駛時間等等嘅。

Transcript by Epiq Hong Kong, Limited

而巴士營運商亦都努力去招聘新嘅巴士車長同埋可以係保留現有嘅巴士車長，佢哋已經係改善咗有關嘅服務條件等等嘅。所以喺呢方面有好幾樣事情都係做緊嘅，我就想報告政府啱啱收到所有嘅專營巴士承辦商提交嘅增加車資嘅申請，我哋就會適時咁樣去處理呢啲嘅申請，亦都會做番相關嘅工作，包括係諮詢各個有關政府嘅審批部門等等。

最後我一直都希望可以喺全部嘅聽證會裏面親自出席嘅，但係因為今日需要特別臨時係出席立法會今日下午嘅內務委員會嘅特別會議，係處理因為超颱風引出嘅一啲問題，所以我首先要道歉，我今日係冇辦法全日出席呢個聽證會，但係請你放心，我嘅同事，今日出席嘅同事會繼續盡力協助委員會嘅。如有需要，星期六再舉行聽證會嘅話，我同我嘅同事就可以出席協助各位嘅工作嘅，多謝。

主席：（經傳譯員）多謝你，陳女士，多謝你解釋。我哋係事前知道話你今日下晝係唔能夠出席聽證會，我哋當然明白嘅，希望今日可以一早就開始做呢個聽證會，令你今日都係一開始得唔好嘅，不過無論如何，而家我可以請律師向你提問。

陳政龍先生：（經傳譯員）好，多謝你，陳女士，你頭先嘅開場發言，而今日就由我就住幾個方面提出問題，先開始，然後遲啲黃律師就會就住其他可能今日晏啲嘅時候或者禮拜六就會問其他嘅問題嘅，所以今日主要係由我提問先。

陳女士，一開始我係想講下就係競爭性投標呢一個嘅問題，投標即係包括就係專營巴士成個嘅服務或者係個別嘅巴士線嘅，委員會聽到嘅證供就係有兩個海外嘅專家，就係 Weston 教授同埋 Stanley 教授，就係講到倫敦同埋墨爾本佢哋嘅市區巴士嗰個營運，你有冇機會睇過嗰啲證供呢？

陳美寶女士：（經傳譯員）睇過㗎喇。

陳政龍先生：（經傳譯員）好喇，與其係要你詳細咁睇嗰啲嘅報告，不如我就撮要講一講，然後我就係會問相關嘅問題，首先倫敦嘅情況就係所有嘅市區巴士都係可以畀人競投嘅，嗰個合約期係五年，亦都可以係續期兩年嘅，之後嗰啲嘅路線又會再次攞出嚟係投標，呢個就係倫敦嘅情況。嗰個嘅市場就係由六大間嘅巴士公司嚟到係去佔咗最大嘅市場佔有率，大概百分之九十四嘅。主席，呢個就係喺 Weston 先生嗰個專家文件㗎第 126 頁。

主席：（經傳譯員）係咪即係你話專家定係嗰個嘅證物？

陳政龍先生：（經傳譯員）係專家嗰㗎嘅文件。

主席：（經傳譯員）好，我知道。

陳政龍先生：（經傳譯員）呢個就係倫敦，至於墨爾本，因為你都睇過證供，我就會係撮要，就唔會逐頁去睇。

墨爾本嗰個嘅巴士嘅網絡有三分二就係大家去洽商出嚟嘅合約，而大概有十五份合約，十二個嘅營運商，呢個就係第16日嘅證供，第34頁第3行。另外有三分一嘅墨爾本嘅巴士網絡就係由一個單一嘅合約，就係一個特定嘅區域行走嘅，呢一度係要競投嘅，個合約期係七年。為咗紀錄，我就想講係我哋第16日作供嘅第22頁去到27頁。呢個就係倫敦同埋墨爾本嘅狀況。

香港，我未問香港嘅情況，就我想你睇一睇呢一個九巴嗰個母公司交通運輸國際集團佢嗰個嘅周年報告，我而家就想你睇2015年嘅年報，係KMB-5嗰一沓嘅文件，頁數就係...

主席：（經傳譯員）邊一年話？

陳政龍先生：（經傳譯員）2015年嘅。

主席：（經傳譯員）好，唔該。

陳政龍先生：（經傳譯員）頁數就係1523頁，呢個就係呢個載通嘅年報，搵唔搵到呀，陳女士？

陳美寶女士：（經傳譯員）搵到。

陳政龍先生：（經傳譯員）第32頁，年報2015年，就喺我哋文件第1523頁，我想你睇右手面嗰一欄，第一段，我讀出嚟，「喺2015年有兩次嘅投標嘅，一啲新嘅巴士線，就係特區政府就係落實咗，而九巴就係兩次都係中標嘅，第一次嘅投標就係關乎路線290、290A，就喺2015年3月開始咗係行走將軍澳同埋荃灣嘅，安達臣路發展區就喺2015年嘅年中就係招標，而九巴就係獲通知，喺2015年11月就係得到通知話『我哋中標嘅』。而呢一啲路線嘅服務係會分階段開始，喺2016年嘅第一季開始，就係同佢哋人口嘅遷入係配合嘅。」呢個就係關於香港某啲嘅路線嘅投標安排。

我哋睇番晒正話所講嘅，我有幾個問題，第一，香港嗰個嘅--而家嘅投標嗰個嘅規模有幾大呢？

陳美寶女士：（經傳譯員）我就冇一啲量化嘅數字係即刻講得到，但係正如正話九巴嘅年報都係指出係喺好多情況，如果係有咗新嘅發展區嘅話，如果有一個新嘅交通需求又，或者有任何嘅情況我哋需要有一組嘅路線，係包括埋有啲係可能有利可圖嘅，有啲就係未必能夠係有利潤嘅，運輸署就會係攞出嚟投標嘅。

舉個例，最近就係西九嗰個高鐵站，我哋就有三條新線，一個就係金鐘去到西九龍，第二個就係觀塘去到西九，第三，就係上水去西九。我哋討論過嗰個需求，跟住就設計咗一個路線，然後我哋喺呢一個投標係有一組嘅路線，一方面係可以有競爭性嘅投標，另外一樣就希望嗰個嘅運作係財政上係可以維持得到嘅。個結果就係有一條路線就係畀咗城巴。

主席：（經傳譯員）我琴日都去咗嗰個站。

陳美寶女士：（經傳譯員）哦。有一條嘅路線就係批咗畀城巴，另外有兩條就係畀咗九巴，畀委員會嘅參考就係喺嗰兩條嘅路線係畀咗九巴，我哋內部估計其中有一條係唔能夠有利潤嘅，就係我哋就係呢個投標嘅策略就係我哋想引入競爭，而有一啲嘅新嘅路線可能佢嘅服務範圍就可能已經覺得係已經係有九巴係服務緊嘅，但係我哋都仍然係繼續係攞出嚟投標，去鼓勵競爭，亦都係希望呢啲路線嘅營運係喺財政上係可持續嘅。

我亦都係想舉另外一個嘅例子，就係港珠澳大橋嘅新路線，我哋做咗一個投標，我哋起碼有一條路線就係畀咗新大嶼山巴士公司嘅，而其實呢條路線其實亦都可能同一啲九巴嘅主要路線係有重疊嘅地方，我想指出就係我哋而家嗰個嘅專營嘅模式，我哋係會有鼓勵競爭，同埋逐條路線嘅一個投標嘅工作。唔該。

陳政龍先生：（經傳譯員）好喇，而家或者係今日之後，可唔可以畀我哋有一啲實際嘅數目，有幾大部分嘅路線而家係用競投嘅方式，同埋嗰啲嘅合約嘅詳情呢？

陳美寶女士：（經傳譯員）可以。

陳政龍先生：（經傳譯員）好，唔該晒。

主席：（經傳譯員）未繼續之前，我就想問，呢啲所謂有競爭性嘅投標係一啲係公開嘅投標抑或係有限制性嘅投標呢，即係只係某啲嘅人可以參與嘅--某啲嘅公司可以參與？

陳美寶女士：（經傳譯員）或者我請我嘅同事係補充。

主席：（經傳譯員）唔該。

陳美寶女士：（經傳譯員）係 Amy Tse。

主席：（經傳譯員）謝善怡女士。

謝善怡女士：（經傳譯員）好喇，而家嗰啲嘅篩選營運商嗰個工作，我哋係限制喺本地市場嘅，即係話城巴、新一巴、龍運、九巴同埋新大嶼山巴士。

主席：（經傳譯員）即係畀只係限於而家有一或者兩個嘅專營權嗰啲巴士，係咪呀？

謝善怡女士：（經傳譯員）係，即係本地嘅市場。

陳美寶女士：（經傳譯員）係本地嘅專營巴士。

主席：（經傳譯員）五間公司？

陳美寶女士：（經傳譯員）係。

主席：（經傳譯員）呢啲嘅喺一個有限制嘅投標係咪都係向公眾嚟到係公開嘅呢？因為我想知道公眾知唔知道而家係就某啲嘅路線有投標嘅呢？

謝善怡女士：（經傳譯員）我哋未開始去篩選或者選擇營辦商之前，我哋首先就係規劃咗條路線，我哋會諮詢區議會，話畀佢聽嗰個定線同埋呢啲嘅細節。

主席：（經傳譯員）你有冇話畀區議會聽話你打算淨係限制畀呢五間嘅巴士公司去競投嘅呢？

謝善怡女士：（經傳譯員）我哋會話畀區議會聽我哋定線嗰個嘅細節同埋佢哋提供嘅一啲嘅評語或者意見嚟到去揀選營辦商。

主席：（經傳譯員）即係你會關於路線就係諮詢佢哋，但係點樣投標，你哋就唔會問佢，係咪呀？

謝善怡女士：（經傳譯員）冇錯。

主席：（經傳譯員）如果有公眾有一個新嘅公司，就係想--或者公眾有一個相關嘅人士，佢哋想知道譬如話西九，關於呢個新嘅巴士站點樣起同埋喺嗰個嘅高鐵站隔籬、邊個會係營運呢啲巴士，佢哋點樣去查到呢啲嘅資料呢？預先點樣呢？如果佢琴日嚟到，佢就見到一架城巴去金鐘，又見到九巴，周圍都係有，佢會唔會事先可以知道嘅呢？

謝善怡女士：（經傳譯員）我哋會話畀區議會聽，然後就諮詢區議會。

主席：（經傳譯員）係咪喺一啲信件裏面書信往來係反映得到？

謝善怡女士：（經傳譯員）係。

主席：（經傳譯員）係喺區議會嗰個嘅會議紀錄度係睇到嘅？

謝善怡女士：（經傳譯員）係。

主席：（經傳譯員）可唔可以畀我哋睇下你哋嘅書信往來同埋有關嘅會議紀錄？

謝善怡女士：（經傳譯員）可以嘅。

主席：（經傳譯員）唔該。

羅先生：（經傳譯員）呢個考慮呢啲嘅路線或者係批出呢啲路線嘅時候，你會唔會考慮嗰啲嘅安全嘅表現呢，嗰個嘅往績呢？即係你哋去批出呢條路線畀呢間公司嘅時候係有咩嘢嘅考慮因素呢？

謝善怡女士：（經傳譯員）車資係一個嘅準則，另外，嗰個意外率亦都係我哋比較嘅一個準則。

羅先生：（經傳譯員）你點樣去比較兩間公司嘅意外率呢？係咪有一啲嘅參數抑或你有一啲嘅因素去可以睇下兩間公司，咁可以係好透明咁樣係睇得到嘅呢？

謝善怡女士：（經傳譯員）我哋係會基於現有嘅參數，譬如話涉及意外嘅數字，佢嗰個嘅比率，我哋係用緊係每車行車公里嘅，呢個係一個參數。

主席：（經傳譯員）呢啲嘅統計數字係咪嗰間公司嘅關於呢一個安全方面嘅規劃嗰部分係咪睇得到㗎？遠期嘅計劃係咪睇到㗎？

謝善怡女士：（經傳譯員）係，同埋喺過去三年每一年嗰個嘅意外率。

主席：（經傳譯員）不同類型嘅意外會唔會有不同嘅比重㗎？譬如話有一個意外就係令有十個人死亡，話有另外一個意外，就係有個老太太喺巴士度跌嘅，你會唔會有不同嘅加權㗎？

謝善怡女士：（經傳譯員）我哋會數晒所有類型嘅意外。

主席：（經傳譯員）但係會唔會有不同嘅加權㗎？你明唔明我嘅意思呀？

謝善怡女士：（經傳譯員）冇嘅，不同類型嘅意外，我哋唔會將佢加權嘅，就係攞晒總數。

主席：（經傳譯員）即係話係一個嘅原始嘅數據，係咪？

謝善怡女士：Yes.

主席：（經傳譯員）即係話每一百萬行車公里嗰個嘅意外數字，或者你其他所有嘅數字，係咪咁呀？

陳美寶女士：（經傳譯員）主席，...

謝善怡女士：（經傳譯員）係。

陳美寶女士：（經傳譯員）...我會叫謝女士或者係黃生幫我補充嘅，佢哋會解釋一下我哋嘅一啲限制性嘅投標點樣做嘅，關於講到安全嘅問題，謝女士亦都係有一啲嘅指標話我哋用過嘅，喺遠期規劃嗰度係作為參考。除咗呢一個安全嘅因素，仲有其他嘅因素，關於就係佢哋嘅表現、服務水準，佢哋都會考慮嘅，呢個嘅研訊之後，我哋可以畀嗰個評分表大家睇，...

主席：（經傳譯員）好吖。

陳美寶女士：（經傳譯員）...就係畀委員會嚟到參考。

主席：（經傳譯員）好呀，唔該。我希望我哋喺星期六嘅研訊之前係得得到，我哋就可以問問題，可唔可以呢？

陳美寶女士：（經傳譯員）可以。

主席：（經傳譯員）唔該。陳生。

陳政龍先生：（經傳譯員）好，唔該。講到呢啲嘅安全表現嘅指標，我哋一陣間都會講嘅，但係未講嗰樣嘢之前，我可唔可以係去番正話羅教授問嘅，到底車資就係一個考慮嘅因素，喺呢啲投標裏面，係咪由嗰個嘅競投人自己提議一個嘅--某條路線嘅車資嘅，抑或唔係由政府去定㗎？

黃志光先生：（經傳譯員）唔係嘅。

主席：（經傳譯員）咩嘢？個答案係咩嘢話？

黃志光先生：（經傳譯員）係其實呢個係一個競爭性嘅投標，所以巴士公司就會建議佢哋嘅車資，就我哋亦都會有一個車資嘅級表，就係話每一個嘅路程最高可以收到幾多車資，每間公司都可以定佢哋嘅車資嘅，佢哋喺提交標書嘅時候，佢哋亦都要提出--係根據我哋呢一個嘅車資水平嗰個嘅表就係上限提出一啲嘅建議。

主席：（經傳譯員）最高係幾多呢？

黃志光先生：（經傳譯員）係已經係賣咗憲報，大家都知嘅。

主席：（經傳譯員）係咪每公里幾多錢，係點樣計㗎？

黃志光先生：（經傳譯員）其實係不同嘅公里亦都有不同嘅車資嘅，譬如話車程越長，佢哋可以係收貴啲，亦都視乎不同類型嘅服務嘅，如果係一啲康樂性嘅路線，佢係星期日或者係公眾假期先行走，佢哋亦都可以係貴啲，又或者係一啲嘅晚間服務、通宵服務，佢哋都可以嘅貴啲嘅。

主席：（經傳譯員）係咪已經係賣咗憲報㗎？

黃志光先生：（經傳譯員）係。

主席：（經傳譯員）可唔可以畀我哋一份而家嗰個版本？

黃志光先生：（經傳譯員）可以嘅。

陳政龍先生：（經傳譯員）如果呢啲嘅車資係可唔可以用而家嗰個嘅車資調整機制嚟到係去調整㗎？

黃志光先生：（經傳譯員）如果我哋接受咗嗰一個--如果我哋批出咗嘅話，佢哋就要根據呢一個車資嚟到去收費，如果佢哋想加價，佢哋就要根據車資調整機制嚟到係去調整嘅。

陳政龍先生：（經傳譯員）從一個政策嘅角度嚟睇，呢一個嘅競投或者係投標嘅工作會唔會只係限於一啲新市鎮或者係一啲新嘅發展或者有一啲新嘅路線組合先至會做嘅呢？政府有冇咩嘢計劃去擴闊呢一個投標嘅範圍？如果係嘅話，諗住去到咩嘢程度呢？

陳美寶女士：（經傳譯員）或者等我答，政府嗰個目標一向都係想係促進呢個競爭嚟到去改善服務水平嘅。如果向前看嚟睇，其實有一啲新嘅發展區，譬如喺新界或者喺九龍嘅市區，譬如係啟德嘅發展區都會有一啲新嘅需求嘅。當我哋喺呢啲新嘅市鎮或者新嘅發展係想有一啲具競爭性嘅路線嘅，我哋就會諗下應唔應該係重疊一啲而家係舊嘅區，譬如觀塘或者啟德東嘅呢啲已發展區嘅一啲路

線，要唔要嗰度有重疊嘅。

我哋都會試下逐條線、逐條線咁樣嚟睇--嚟到去投標嘅，向前睇，我哋喺呢一個現有嘅專營模式，我哋亦都覺得冇乜嘢係令我哋--冇嘢--我哋係可以喺呢一方面做多啲嘅。我亦都可以話根據經驗，如果有一間嘅專營巴士營運商喺佢哋服務水平方面係唔符呢一個專營權嘅要求，好似喺1990年代，我哋係試過係某啲嘅路線係唔畀佢再營運嘅，或者係某啲嘅路線組合，就好似中巴咁，我哋就攞走咗嗰啲嘅路線或者係一啲路線嘅組合嚟到出嚟投標，畀一啲新嘅營辦商嚟到去運作嘅，所以其實我哋成日有機會都係會係再進一步係用呢個作為一個工具嚟到去改善嗰個服務水平嘅。

主席：（經傳譯員）上一次喺香港嘅巴士路線公開嘅競爭性招標係幾時呢？即係對上一次嘅公開招標。

謝善怡女士：（經傳譯員）係1998年嘅，當時我哋就第一次就就住呢啲機場嘅巴士路線進行招標，就係中巴公司，就係1998年嘅。

主席：（經傳譯員）當時嘅競爭性招標係咪有限度咁進行嘅呢？

謝善怡女士：（經傳譯員）係。

主席：（經傳譯員）唔該晒。

陳政龍先生：（經傳譯員）你哋有冇計劃係就住現有嘅專營協議嘅現有路線係會唔會進行競爭性招標呢？

陳美寶女士：（經傳譯員）暫時我哋係冇計劃咁做嘅，但係我哋唔會排除咁樣做，因為我哋一直都係有監察唔同專營巴士公司唔同路線嘅表現嘅。

陳政龍先生：（經傳譯員）我就想講另一個議題，就係首先用一啲安全或者安全表現指標，我就會問一啲問題，就係會講下使用一啲獎勵--即係喺合約入面使用獎勵或者懲罰嘅好處同埋壞處嘅，即係就住呢啲安全表現指標。

首先，我就想去睇下安全表現指標呢一個概念，首先，我就想問一下運輸署現行嘅做法，同埋跟住我就會問你嘅意見嘅，就係點樣可以改善呢一個方面，喺我講啲細節之前，我就想請你澄清呢一個加強專營巴士安全工作小組報告上面有一點我就想你澄清嘅。

呢個就係TD-5文件冊，我就冇嗰個頁數，我就可能會講嗰個報告嘅頁數或者嗰個段數嘅。

主席：（經傳譯員）好。陳女士，你有冇呢份報告响手呢？

陳美寶女士：（經傳譯員）請等等。係，我睇到喇。

陳政龍先生：（經傳譯員）報告嘅第一頁就係1757頁嘅。

主席：（經傳譯員）呢份文件係啱啱先至有啫，所以我就冇嗰個頁數嘅。

陳政龍先生：（經傳譯員）或者我可以加番呢個頁數，令到我哋嘅謄本度都可以記錄到。

第一，我想先睇TD-5文件冊嘅1757頁，我想你睇下4.26段嘅，呢個係1798頁，首先，我想講下呢一段嘅背景嘅，呢一段就係講培訓，即係喺培訓底下嘅，驟眼睇，可能同安全表現指標呢一個議題冇直接嘅關係，我有一點想你澄清嘅，我就想先讀出4.26段。

「工作小組認為如果係要向車長提供足夠同埋相關嘅培訓，所有嘅專營巴士公司係應該改善佢哋培訓巴士車長嘅內部監管同埋核證機制，包括係開發一啲主要嘅服務指標，監察佢哋嘅實行同埋有效性同埋係制定一啲合適同埋有效嘅跟進行動，並且向管理層匯報。」

我想你解釋一下發展一啲主要嘅表現指標係咩嘢意思呢？同埋係有咩嘢關係呢？

陳美寶女士：（經傳譯員）呢啲嘅主要表現指標就係同車長嘅培訓有關，而且同你所講嘅安全表現指標係冇直接關係嘅。以往專營巴士公司係主動制定咗一啲培訓嘅指標，例如係過去三年培訓車長嘅數目，呢個只係起點嚟嘅啫，我哋係有提倡呢一個專營巴士車長訓練綱領嘅實務守則，我哋發現如果我哋只係依賴一個單一嘅表現指標，例如係過去三年訓練嘅車長數目，係不足夠嘅。

就發展一啲主要嘅表現指標係可以監察到巴士公司嘅表現，即係就住現有車長嘅培訓同埋一啲嘅溫習課程、一啲跟進課程，呢啲就可以有效係矯正一啲犯下駕駛錯誤車長嘅表現或者係行為嘅。而巴士公司表示佢就會係為現有嘅車長提供實地嘅駕駛訓練，但係呢一類嘅培訓就並唔能夠滿足我哋嘅需要嘅，例如有啲呢啲嘅駕駛訓練--即係有陣時呢啲訓練只係由一個車長去喺監察或者睇住另一個車長去駕駛，呢一個就同我哋預期嘅要求係唔同嘅。

而我哋係希望專營巴士公司係可以做多一啲，佢哋就可以更加有效地進行內部嘅監核，我哋亦都期望巴士公司係定期提供報告，應該係起碼每半年係向佢哋嘅管理層或者董事局係提供報告嘅，佢哋亦都要提供一啲特別事故嘅報告，向佢哋嘅管理層，就住佢哋嘅培訓、培訓嘅有效性，亦都係要提供嘅。而呢啲報告亦都係要提供畀運輸署，令到我哋可以定期去監察，同埋喺我哋同佢哋嘅管理層會面嘅時候，亦都可以定期檢討嘅。

陳政龍先生：（經傳譯員）有一點想澄清嘅，呢一啲嘅表現指標同駕駛行為，即係因為培訓所引起嘅駕駛行為係冇關？

陳美寶女士：（經傳譯員）呢一個係一個培訓嘅項目之一。

陳政龍先生：（經傳譯員）多謝你澄清。而家我就想睇睇現時運輸署點樣用呢啲安全表現指標嘅，首先，我想你睇睇九巴嘅遠期計劃，就係2018至22年，頁數就

係 TD-1 文件冊嘅第 180 頁，我想提一提呢個背景，呢份文件就係由九巴準備，就係呈交咗畀運輸署，就係喺 2017 年中嘅，呢個就係關於未來嗰五年嘅計劃，即係 18 至 22 年嘅。

我想你睇睇第 192 頁，喺 8.8.1 段，呢個標題就係建議嘅目標同埋其他嘅措施，呢一段就係咁講嘅，「九巴係建議係用 2014 至 16 年嘅三年平均實際意外率，就係 2.71，（呢個定義就係每 100 萬行車公里涉及意外巴士嘅數目），呢個就作為五年遠期計劃嘅目標，呢個就亦都係等同係即係比起 2014 年嘅意外率係減低咗百分之六，呢個亦都係 14 至 16 年嘅最高紀錄。」

我就想向你指出，九巴自行制定嘅目標就係 2.71，然後我哋就睇一睇下一年，即係 2017 年係發生咗咩嘢事，下一份我想你睇嘅文件，就係下一份嘅五年遠期計劃，就係 2019 至 23 年，頁數就係 TD-5 文件冊嘅 1728 頁。你睇唔睇到呢份文件，陳女士？

陳美寶女士：（經傳譯員）係。

陳政龍先生：（經傳譯員）第 1728 頁，呢封係運輸署向九巴發出嘅信件，就係 18 年嘅 5 月 21 號，就向九巴提供咗一個清單，就係講咗下一份遠期計劃需要包括嘅項目，背景就係咁樣。

至於喺 1729 至 1731 頁就係你向九巴發出嘅信件，就係提出喺下一份嘅遠期計劃要包括嘅項目，我就想讀出頭嗰兩段，呢個標題就係「巴士安全」嘅。

就話「我哋發現喺涉及意外嘅九巴巴士數目，即係喺每百萬行車公里計，就由 2016 年嘅 2.73 上升到 2017 年嘅 3.04，呢一個係一個高嘅數字嚟嘅。

以下呢一個表就總結咗 2015 至 17 年涉及交通意外嘅九巴巴士數目，就係以意外嘅嚴重程度去分類。就結果顯示致命意外嘅數目就由 15 年嘅 11 宗下降到 17 年嘅 3 宗，而輕微交通意外嘅就有輕微上升嘅趨勢，就係由 15 年嘅 737 宗上升到 17 年嘅 866 宗，而實際嘅意外率就係喺 2017 年係 3.04 嘅，呢個就係比喺 2018 年至 22 年遠期計劃嘅目標意外率為高嘅，而呢個當時預期嘅意外率係 2.71。」

換句話講，九巴就達成唔到佢自己定下嘅目標，而下面呢個表，你就會見到呢個就係涉及交通意外嘅九巴巴士數目，就係以每百萬公里計嘅，呢個趨勢係上升緊嘅，由 15 去到 16 至 17 年，呢個意外率分別係 2.62、2.74 同埋 3.04。

下面第二個表亦都係顯示咗涉及九巴巴士交通意外數目，呢三年內亦都係有上升嘅趨勢嘅。

根據呢度嘅分析，似乎運輸署所著重嘅兩項安全指標，第一，就係每百萬行車公里嘅意外率；第二，就係交通意外嘅數目，就係涉及九巴巴士嘅意外數目嘅。我咁講，啱唔啱呀？

陳美寶女士：（經傳譯員）係，啱嘅。

陳政龍先生：（經傳譯員）我哋可以跳去1731頁，就係呢封信嘅最屘嘅部分，喺第(4)分段，個標題就係「目標意外率」呢一個目標，運輸署就話「你哋公司係必須要喺嚟緊嘅遠期計劃係指出一個目標嘅意外率，同埋係包括一個改善安全嘅建議」，第二項，就係「喺嚟緊嘅五年就係提出一個每百萬行車公里減低意外率下降嘅目標。」

我就想同你探討一下點解使用呢一個每百萬行車公里嘅意外率作為一個安全嘅指標，首先，呢一個意外率係包括咗因為巴士車長犯錯引起嘅意外同埋不涉及巴士車長嘅意外，啱唔啱呀？

陳美寶女士：（經傳譯員）呢個係一個一般性嘅指標，係去統計意外嘅數目嘅，呢啲意外可能係包括一啲涉及巴士車長犯錯嘅意外，但係有時就同車長無關嘅。呢個就視乎意外嘅調查同埋意外嘅成因，睇下車長係咪其中一個成因。

主席：（經傳譯員）所以簡單嚟講，個答案就「係」嘅，係咪？

陳美寶女士：（經傳譯員）冇錯。

陳政龍先生：（經傳譯員）換句話講，呢個意外率係包括咗一啲巴士公司或者車長都控制唔到嘅元素，係咪？

陳美寶女士：（經傳譯員）係。

陳政龍先生：（經傳譯員）我想你睇下Stanley教授嘅證供嘅，我就想你評論一下，首先，我就想你睇睇第16日嘅謄本，就係9月15號，就係喺第7號文件夾第67頁，我就想講67頁嘅第16行，我就想講番一啲背景畀你聽，當時我就問Stanley教授一啲問題，我就問緊一啲--用一啲標準嘅安全表現指標就作為制定一個獎賞或者懲罰嘅方法，我想講番第16行，Stanley教授就講佢認為安全表現指標應該包括啲咩嘢，我就想讀出嚟，第16行。

「我就有一啲意見嘅，喺休息之前，我講到一啲意外，譬如話一啲致命嘅意外，嘰倒、跌嚫等等，呢啲係你可以考慮嘅元素嘅，至於制定一啲主要嘅服務或者主要嘅表現指標，你係應該符合一啲嘅元素，佢哋一定係要有針對性，你係可以量度得到，亦都係可以實行得到，亦都係要相關嘅，而相關嘅數據應該係要定期或者及時去提供，而呢一啲嘅指標就係要係呢啲巴士公司係影響得到嘅，如果巴士公司係唔能夠係影響呢啲指標嘅話，就係冇意思嘅。」

我亦都想你睇下第93頁，就係同一日嘅謄本嚟嘅，第22行，第93頁嘅，我亦都想講番一啲背景畀你聽，當時就係講緊呢啲指標究竟巴士公司係控唔控制得到嘅，喺第22行，Stanley教授就話「我認為如果我哋講呢個指標嘅範圍，咁必須係一啲你控制得到嘅事項。」

我哋就啱啱講緊每百萬行車公里嘅意外率，好大部分嘅意外都係巴士車長

Transcript by Epiq Hong Kong, Limited

控制唔到，即係話啲車長係冇犯錯嘅。你就住 Stanley 教授嘅意見，你認為呢啲指標係應該包括啲咩嘢呢？即係巴士公司係能夠控制到，你有咩嘢意見呢？

陳美寶女士：（經傳譯員）首先，講到話主要表現指標，目的就係作為一個管理工具或者係一個指標，就係畀規管當局，即係運輸署同埋專營巴士營運商，都可以檢視佢哋就住安全嗰方面嘅表現嘅，喺我頭先啱啱答你之前一個問題嘅時候，講到道路安全或者係陸路交通安全都係有好多因素導致意外發生嘅，我哋睇呢個主要表現指標，即係話係實際交通意外嘅數字同埋每 100 萬公里嘅涉及交通意外率，其實都係喺呢方面，我哋都做緊--就係講係一個遠期計劃嘅工作，就係去嘗試去探討分析意外嘅性質，牽涉一啲巴士嘅種類、巴士嘅型號、意外嘅種類、到底係碰撞抑或係冇碰撞，同埋所牽涉巴士司機嗰個年紀同埋嗰啲巴士路線等等。

純粹如果只係--我哋係純粹係倚賴呢啲嘅主要表現指標幫我哋去定一啲高層次嘅工具去評估整體安全表現，即係指專營巴士營運商，但係唔係足夠嘅，我哋都實際有要求話專營巴士營運商喺佢哋有關於安全嗰個章節裏面，即係今年 8 月畀委員會嘅時候，都有提到佢哋要將呢啲意外將佢細分做唔同嘅種類，之前我有提及。

而事實上，我哋部門嘅巴士及鐵路部都同埋道路安全及標準處都有聯手去分析巴士意外嘅趨勢，即係各種嘅分類，同埋係更加仔細咁去評估專營巴士營運商嘅安全表現。

陳政龍先生：（經傳譯員）陳女士，如果你想再擴大啲講，請你話畀我聽，但係我個問題就係話就係呢個評估嘅指標...

主席：（經傳譯員）或者畀我打斷一下，陳律師。其實可以好簡單咁問呢個問題，你就唔同意 Stanley 教授所講，就話主要表現指標必須係巴士營運商可以影響嘅結果嘅一個指標，係咪？你唔同意，係咪？

陳美寶女士：（經傳譯員）係，我唔同意，因為作為主要表現指標，就係一個管理工具，...

主席：（經傳譯員）你已經係答咗個問題，已經係答咗個問題。

陳美寶女士：（經傳譯員）唔該。

陳政龍先生：（經傳譯員）主席。你提到話係要分析唔同嘅意外成因，但係其實喺有關文件裏面冇定一啲指標畀巴士公司就話按唔同分類嗰個分析嚟去睇嘅，唯一一個指標就係呢個每百萬公里意外涉及率，如果你話用某一啲嘢嚟做一個指標，你同唔同意就係應該用一啲巴士公司可以控制到嘅因素嚟做指標？

陳美寶女士：（經傳譯員）如果我哋純粹喺理論層面咁講，當然可以有啲主要表現指標係巴士公司完全控制到就最好，但係喺我頭先答主席問題嘅時候，我唔係完全同意話主要表現指標係應該要由公司全面可以控制到嘅，因為呢個一開始只

不過係一個指標，就作為一個基礎，等我哋去評估佢哋嘅表現，因為意外嘅成因係好複雜嘅，可以係有好多唔同嘅因素導致，所以我哋係要詳細分析各類嘅意外、佢嘅性質同埋種類，然後等我哋可以作好深層次咁去分析一下相關嘅表現指標。

你頭先提及話培訓嘅指標，喺工作小組嘅討論裏面，安全係我哋最關心嘅問題，巴士公司未必能夠全面控制到牽涉到佢哋巴士嘅意外宗數，即係每一年，但係講到話巴士安全同埋巴士車長嗰方面，其實係有唔同嘅方法佢哋可以做到係將意外嘅整體數字係減低嘅，或者以百萬公里計嘅意外率都可以減低，所以喺呢一方面，我哋就制定咗實務守則，就預期巴士公司能夠制定一啲嘅就住培訓嘅主要表現指標。

至於話黑盒嗰個規格同埋加裝閉路電視呢啲嘅做法，所有呢啲儀器都可以幫到巴士公司去調查到底有關嘅巴士車長係咪牽涉到造成嗰宗嘅交通意外嘅。

所以我哋會考慮晒所有嘅因素去評估到底巴士公司係咪已經盡咗力去提供安全嘅巴士服務，同埋亦都可以令到佢哋嘅巴士車長有安全嘅駕駛行為同埋態度。

陳政龍先生：（經傳譯員）你喺計算唔同嘅事故、分析嗰個比重嘅時候，你頭先提及係喺你個腦裏面做呢啲比重？譬如裝閉路電視等等。

陳美寶女士：（經傳譯員）或者可唔可以一個具體例子我哋點樣做，譬如話九巴，佢嘅意外率其實係超出咗佢哋自己提出嘅目標，我就要求佢哋進一步分析有關意外嘅性質同埋種類，我哋嘅觀察發現冇涉及碰撞嘅意外個數字係增加咗嘅，即係相對於前一年，而裝設黑盒同埋閉路電視其實可以幫到公司話到畀我哋聽到底係咪有一種嘅巴士型號有啲咩嘢問題又或者係有一個巴士車長嗰個駕駛行為係有問題，因此導致係冇涉及碰撞嘅意外宗數增加，即係話包括係乘客跌倒或者乘客喺車上面企唔穩。亦都有一啲嘅路線，譬如我哋發現係呢類咁嘅意外係會多啲嘅，所以我哋就係會仔細咁去調查，就要求公司提出一啲特定嘅措施去處理。

或者上一次我哋提交有關安全章節嘅時候，你都會睇到各間公司都係提交咗一啲牽涉到標準嘅段落，係話佢哋落實咗啲乜嘢加強安全嘅措施，但係自從上一次提交遠期計劃之後，我哋都係實際會去分析意外嘅趨勢同埋係深入咁分析相關嘅意外，要求佢哋提供一啲特定嘅措施去處理唔同類型，就住按巴士路線嗰啲嘅意外率、巴士嘅型號等等咁樣，等我哋可以更加全面、整體咁樣去評估專營巴士營運商嘅安全表現。

主席：（經傳譯員）你話要求呢啲公司做更詳細嘅分析，喺邊度有寫？

陳美寶女士：（經傳譯員）我哋係寫咗畀唔同嘅巴士營運商就係提出呢啲要求，其中一個例子就係喺畀九巴嘅信件嘅，喺一份文件夾裏面有㗎喇，我哋當然可以提交有關嘅信件嘅範本畀你哋參考嘅。而喺發出呢啲信件之後，有各個專營巴士

Transcript by Epiq Hong Kong, Limited

營運商都已經喺度制定下一個嘅遠期計劃，就會特別係處理呢個安全嘅章節嘅，呢個過程係不斷會係演變嘅。整個遠期計劃就今年年尾會完成，我哋就會提交嗰啲計劃畀政策局，就會根據法例去做嘅。

主席：（經傳譯員）係咪比起之前係遲咗呀？即係比起一般嗰個時間表，即係提交呢個遠期計劃，今年係咪遲咗？

陳美寶女士：（經傳譯員）我覺得係差唔多係跟番過往嘅，...

主席：（經傳譯員）即係喺年尾之前，巴士公司就會係提交佢哋遠期計劃裏面嗰個安全章節？

陳美寶女士：（經傳譯員）專營巴士營運商其實已經提交咗遠期計劃嘅草擬本，包括埋安全章節，係按嗰個--喺個限期之前交咗㗎喇。

主席：（經傳譯員）限期係幾時呀？

陳美寶女士：（經傳譯員）6月中--6月尾，6月尾。應該係9月尾或者10月初，我哋要畀番我哋嘅意見佢哋，然後希望之後我哋可以就住有關章節嘅內容達成協議，就可能會係年底或者明年初就交畀運房局係批准嘅。

主席：（經傳譯員）呢個時間表係咪有一個法定規定㗎？

陳美寶女士：（經傳譯員）係有法定規定嘅。

主席：（經傳譯員）可唔可以提一提我喺邊度可以搵到個法定要求呀？即係你提嗰啲日期，因為如果我冇記錯，應該係6月中同埋係9月嘅。

陳美寶女士：（經傳譯員）9月尾。我同事搵緊嗰沓文件夾，但係你講得啱嘅，係有兩個日期喺條例有提及嘅，佢哋係要喺6月尾提交，然後我哋就應該係要9月尾同佢達成協議...

主席：（經傳譯員）否則嘅話，可能--可以就去到運房局局長嗰度做審裁，係咪呀？

陳美寶女士：（經傳譯員）係，係一路去到9月嗰度嗰個過程就係內部過程嚟嘅，就係要取得運房局局長嘅同意，我哋會提交所有路線嘅詳細計劃等等。

主席：（經傳譯員）所以我就個問題就係問你係咪已經過咗9月尾，你係咪已經同巴士公司達成協議呢？

陳美寶女士：（經傳譯員）9月尾個日期已經過咗，喺今年，特別呢一年係因為有一系列嘅問題我哋向營辦商提出咗，所以我哋就預期佢哋就住嗰個安全章節就要提供一啲補充--即係要再補充一啲資料，再加強，所以而家佢哋係就住呢一個章節係制定最後嘅內容。

主席：（經傳譯員）即係今年你哋仲未達成協議，係咪？

陳美寶女士：（經傳譯員）係，未達成嘅。主席，有關嗰個法定條文，就係第12A條，《公共巴士服務條例》第12A條。

主席：（經傳譯員）今年你哋預計幾時可以達成協議？

陳美寶女士：（經傳譯員）我哋希望儘早同佢哋達成協議。

主席：（經傳譯員）好明顯喇，但係有冇話一個大概幾時做得到呢？

陳美寶女士：（經傳譯員）或者可以提供個資料畀你哋，我哋最近同城巴同埋新巴都係就住佢哋遠期計劃開過會，我哋亦都係同九巴安排緊，同埋龍運安排緊會議係處理佢哋嘅遠期計劃，所以我哋係做緊各項工作，係儘可能儘早同佢哋達成協議。

主席：（經傳譯員）你講咗兩次喇，你係冇辦法畀到個日期，係咪？如果係真係咁，你就講，照講。

陳美寶女士：（經傳譯員）喺現階段，我唔可以提一個日期，但係我嘅目標就係希望儘早去達成協議，因為我哋亦都需要定到明年嗰個最後嗰啲巴士路線，亦都係而且要將有關資料發放畀公眾嘅。

主席：（經傳譯員）陳律師。

陳政龍先生：（經傳譯員）主席，為咗做紀錄，就係12A條，即係頭先陳女士所提嗰點就係喺THB-2文件夾109頁嘅。

主席：（經傳譯員）好，唔該。

陳政龍先生：（經傳譯員）好喇，講番較早之前主席嘅問題，你就係話你要求巴士營運商進一步提供細分資料關於嗰啲嘅意外成因嘅，喺TD-5文件夾1729至1730頁其實就係頭先我哋啱啱睇嗰份文件，係TD-5文件夾1729頁。

1728頁嗰封信件就係2018年5月嘅日期，然後嗰度底部，即係1729頁底部，你就要求九巴就住巴士意外就係做分析，然後下一頁，一個佢哋分析同非巴士司機相關因素嘅交通意外做分析，呢個係咪你嘅頭先提及嘅，頭先？

陳美寶女士：（經傳譯員）係，而喺1730頁其實都係有一個好長嘅清單，就話我哋要求公司去做嘅分析嘅，要佢哋提供呢啲資料嘅。

主席：（經傳譯員）喺1729頁底部，「要求你哋公司(a)」，然後第二，就係「分析有關意外嘅性質同埋成因，同埋解釋點解意外宗數增加嘅理由。」呢個係你要求佢哋做嘅，係咪呀？

陳美寶女士：（經傳譯員）係，冇錯。

主席：（經傳譯員）然後下一頁1730又進一步再要求，你可唔可以指出喺邊度就話繼續係有呢啲要求呢？如果搵到嘅，讀出嚟，唔該。

陳美寶女士：（經傳譯員）我哋就係希望公司提出進一步嘅分析，就係呢一個意外嘅成因，同埋佢哋有冇一啲相同嘅因素，想佢哋話畀我哋聽佢哋有啲咩嘢具有嘅建議嚟到去改善嘅，譬如話非碰撞式嘅意外，就係啲乘客跌嘅，到底佢哋喺邊度跌倒嘅呢？喺上層定係下層吖，定係喺樓梯呢？

主席：（經傳譯員）喺邊度寫出嚟呀？

陳美寶女士：（經傳譯員）我而家係舉個例...

主席：（經傳譯員）但係你未舉例之前，可唔可以讀出嗰個文本係支持你而家講嘅嘢呢？我哋有呢一句「你係要畀我哋一個分析係關乎意外嘅趨勢、成因同埋類型」，呢個就係喺 1729，下一頁嗰度係...

陳美寶女士：（經傳譯員）喺下一頁就係我哋繼續講落去，1730，我哋提到同安全相關嘅計劃，主席。我哋就話目標要去減低涉及巴士嘅意外，同埋係加強向乘客提供巴士服務個安全，你哋公司係要畀我哋有關嘅計劃或者建議去改善現時嘅監察制度或者係要新嘅監察制度係關乎巴士嘅安全同埋增加你哋公司員工嗰個意識，就係呢啲監察制度嗰個結果同埋會有啲乜嘢嘅紀律行動或者係懲罰嘅，亦都要發展一個嘅計劃書，就係自動咁樣嚟到去監察到車長嘅駕駛行為，就係透過喺黑盒裏面或者類似嘅儀器裏面嘅一啲嘅資料，另外就係要有一啲嘅宣傳計劃嚟到係去喺嚟緊兩年加強乘客嘅安全。

下一頁，1731 頁，我哋亦都希望佢哋喺嚟緊嘅兩年提供一啲嘅計劃去加強車長嘅訓練，無論係兼職或者係全職嘅，亦都係希望佢哋--個工作小組嘅建議就係關於訓練嗰個嘅框架，另外就係畀我哋一啲嘅計劃，嚟到去調查嗰個用三點安全帶呢一個嘅有幾頻密嘅。我哋亦都要求佢哋係做一啲嘅調查或者係評估，去評估呢啲嘅安全帶嗰個嘅使用狀況、有效程度等等。

主席：（經傳譯員）好，去番 1730 頁，喺頭嗰四行，就係要去分析一啲唔關乎嗰個車長嘅造成意外嗰個嘅因素，喺過去嗰五年，呢度有冇做過分析？有冇一啲係同車長相關嘅分析呢？譬如話佢哋車速太快，就嚟要去入站嘅時候，就係突然嚟到去剎掣，有冇呢一類型咁樣嘅分析？

陳美寶女士：（經傳譯員）主席，喺九巴方面，呢一度我哋冇講到呢個程度話要佢詳細咁樣去分析車長嘅乜嘢駕駛行為係引致交通意外。但係我可唔可以舉個例呢？喺城巴方面，佢哋係更新緊黑盒嗰個嘅規格嘅，佢哋將司機嘅一啲事件記錄低，即係譬如係有冇太過快嘅快速或者係減速。

主席：（經傳譯員）有一半嘅意外都係非碰撞式嘅，都係因為乘客失咗平衡，係咪呀？

陳美寶女士：（經傳譯員）係。

主席：（經傳譯員）我覺得毫無疑問，呢一個一定係佢哋係太快嘅突然間剎掣或者係加速或者係搖擺嘅或者係扭軚嘅，呢一方面，我就係想問你呢啲都係同意外嘅

成因有關，我就問你點解係冇問到一啲關於呢啲意外嘅問題？有時就係啲司機揸車嘅時候就唔留心，有時佢就係剎掣剎得太急。

陳美寶女士：（經傳譯員）喺呢一封信，我哋畀九巴嘅時候，我哋冇去到咁細緻嘅。

主席：（經傳譯員）你城巴有冇呢？

陳美寶女士：（經傳譯員）我查一查喇。不過喺我哋最新嘅、起碼嘅，關於黑盒規格嘅要求，我哋就係規定佢要--如果係有一啲係過急嘅剎掣或者係踩油嘅時候，係要喺黑盒裏面係記錄到呢啲嘅事件嘅。或者我請我嘅助理署長話畀委員會聽喺呢一個嘅踩油嘅時候，佢哋公司係咪能夠搵得到係有突然剎掣或者係剎得太急或者係剎得太多嘅、太過份。

主席：（經傳譯員）係，唔該。你就喺 2018 年 8 月嘅時候關於係最基本嘅要求，話嗰個電子數據紀錄儀，係咪呀？

陳英傑先生：（經傳譯員）呢個係咪講緊最起碼嘅要求？

主席：（經傳譯員）講緊最起碼嘅要求先，然後再講到你期望達到最高嘅水準--水平，可以做到乜嘢呢？關於踩油同埋係剎掣嘅嗰啲數據。係咪喺附件 2 呀？

陳政龍先生：（經傳譯員）為紀錄嘅原因，應該係工作小組嗰個嘅報告，係附件 2 嗰個嘅編碼係 1807，係 TD-5。

主席：（經傳譯員）但係唔喺我呢一沓文件度喎，冇編碼嘅--冇頁碼嘅。

陳英傑先生：（經傳譯員）嗰個電子數據紀錄儀嘅最起碼要求，我哋就平時叫佢做黑盒，呢個更新，我哋係對於嗰個嘅新嘅版本或者新嘅要求係有一啲更新嘅。

主席：（經傳譯員）我知道，到底如果我哋係關於係加速或者係剎掣方面喺邊度呀？

陳英傑先生：（經傳譯員）其實係 4(a)，「意外報告，就係當時嘅車速，係要去記錄到每秒鐘嘅時段，係要持續三分鐘，就喺呢個 0.4G 減速嘅呢啲嘅事件之前。」呢個就係話呢一個嘅儀器要起碼記錄到呢一類型嘅加速或者減速...

主席：（經傳譯員）但係呢個係減速，應該以前係 0.2 嘅，係咪呀？

陳英傑先生：（經傳譯員）唔係，係 0.4，自從一開始用，就已經係咁。

主席：（經傳譯員）點解係 0.4，減速 0.4 呢？係咪咁樣就係--咩嘢叫 0.4 呢？

陳英傑先生：（經傳譯員）0.4 係一個數字係我哋以前喺一個研究之後採納嘅。

主席：（經傳譯員）咩嘢意思呢？

陳英傑先生：（經傳譯員）就係話嗰個嘅力度，當你一踩落去嗰個剎車掣嘅時候，嗰個嘅地心吸力嘅，你會一個正常人所感受到嘅力。

主席：（經傳譯員）我明，...

陳英傑先生：（經傳譯員）擺喺 0.4，其實就係講緊嗰個係每秒鐘 9.81 米，即係 0.4...

主席：（經傳譯員）咁咩嘢意思呀？係咪對於一個嘅司機嚟講，咩嘢意思呢？係咪話當喺嗰架車轆都有煙出嘅時候嚟到剎掣？

陳英傑先生：（經傳譯員）唔係，唔係。

主席：（經傳譯員）畀一個嘅例子我。

陳英傑先生：（經傳譯員）譬如話有一個嘅乘客坐喺車度，佢如果喺咁嘅減速，佢會係蹋出嚟㗎喇，呢個就係一般一個剎掣力係大到咁樣嘅地步，就係能夠令一個坐喺椅上面嘅乘客就係跌落嚟嘅，呢一個係需要喺儀器裏面記錄得到嘅。

主席：（經傳譯員）即係係一個冇纜安全帶嘅乘客會係跌落嚟？

陳英傑先生：（經傳譯員）會跌出個座位--就更加技術性咁講，就係九成五嘅乘客如果喺咁--如果冇戴安全帶，喺咁樣嘅減速力度，0.4 嘅話，就係會突然之間係跌出座位嘅。

主席：（經傳譯員）好，唔該。呢個就係話如果有咁樣類型嘅減速，你一定要係提供喺之前嗰三分鐘嗰個嘅車速，係咪呀？

陳英傑先生：（經傳譯員）呢個係一個嗰一刻嘅時間，但係我哋亦都需要知道喺呢一個事件發生之前嗰三秒--唔係，對唔住，係三分鐘嗰個係發生咩嘢事。

主席：（經傳譯員）第 2 項就係指到嗰度有提到剎車掣嘅，喺(c)嗰度，係咪呀？就係嗰個嘅儀器一定要係記錄到幾時係踩過剎車掣？

陳英傑先生：（經傳譯員）係喇，呢個應該係第 2，就係話可以記錄到每一秒時段嗰個嘅資料。

主席：（經傳譯員）係喇。

陳英傑先生：（經傳譯員）即係可以記錄到喺兩個星期嘅時段裏面係每三十秒嘅資料嗰啲數據可以喺嗰度，即係話呢個黑盒應該係可以係保持到呢啲資料完整。

主席：（經傳譯員）係，多謝你解釋，呢個就係最起碼嘅要求，但係你就話希望巴士公司係做高過你哋嘅最低要求嘅？

陳英傑先生：（經傳譯員）係，我哋嗰個制度希望就係話城巴同埋新一巴都係可以記錄所有呢啲嘅資料。

主席：（經傳譯員）乜嘢資料？

陳英傑先生：（經傳譯員）車速嘅資料。係可以係去記錄到嗰個嘅運作時間。

Transcript by Epiq Hong Kong, Limited

主席：（經傳譯員）你係講緊邊一份文件呀？

陳英傑先生：（經傳譯員）係呀，呢一份文件，係最低嘅起碼嘅要求，喺第2段，就係個車速、幾時剎車，呢個係可以喺螢幕上面睇得到。

主席：（經傳譯員）係。

陳英傑先生：（經傳譯員）譬如話嗰個巴士係去到車站嘅時候就開咗呢一個車尾嘅門，呢啲全部喺嗰個屏幕上都係可以嘅。呢個係咪全球定位系統嗰個嘅協調...

主席：（經傳譯員）係有座標，係咪呀？

陳英傑先生：（經傳譯員）即係話巴士嗰個位置、到底有冇人撳過鐘，呢啲資料全部都係由巴士公司提供嘅。

主席：（經傳譯員）呢個係最起碼嘅要求，我就係問你，你希望嗰啲黑盒係做得更多，係咪呀？

陳英傑先生：（經傳譯員）其實黑盒係一個一般嘅即係講呢啲儀器嘅名嚟嘅啫，其實係呢一個嘅安裝喺巴士上面就係佢哋可以做唔同嘅功能嘅，喺巴士營運同埋車隊管理方面，嗰啲嘅參數就係如果你係講緊一架巴士係咪真係超速、嗰個車長駕駛係唔係合適、佢係踩呢個剎車掣係咪踩得太急、佢係咪用一個合適嘅態度嚟到去服務乘客、有冇人係會投訴，我哋都喺呢個嘅系統裏面係--譬如話嗰個司機係咪停喺嗰個車站度，有人撳鐘，佢就會係停車，呢啲全部都係可以睇得到嘅。而公司亦都係發展緊一啲嘅監察指標，睇下呢啲資訊應該點樣去記錄、佢哋點樣嚟到去分析。

主席：（經傳譯員）所有嘅資料都係記錄嘅，嗰個問題就係佢哋要分析同埋使用，巴士亦都係有呢個嘅閉路電視嚟到去睇住佢哋，嗰個問題就係係咪用緊，係咪用佢嚟到去增加呢個安全？

喺呢個時候，我哋就休息二十分鐘。

上午11時35分聆訊押後

上午11時55分恢復聆訊

出席人士如前。

主席：（經傳譯員）陳先生。

陳美寶女士：（經傳譯員）主席，喺休息之前，就講到我哋有冇要求專營巴士公司...

主席：（經傳譯員）可唔可以對正個咪講嘢？唔該。

陳美寶女士：（經傳譯員）喺休息之前，你就要求我哋去提供一啲嘅證據去睇下我哋有冇要求專營巴士公司有冇去睇下某一啲嘅意外，包括係跌低或者係蹦低，我想講番5月21號嗰封信嘅。

主席：（經傳譯員）就係TD-5嘅1728頁。

陳美寶女士：（經傳譯員）係，唔該晒。係我哋封信嘅第8頁。

主席：（經傳譯員）就係1729頁嘅。

陳美寶女士：（經傳譯員）我想講最後個項目，就係「分析涉及九巴嘅交通意外」，我哋要求佢哋分析喺2017年涉及九巴嘅交通意外，同埋亦都分析15同埋16年嘅情況，就係喺附錄E(i)嘅，我想睇番附錄E(i)。

主席：（經傳譯員）喺邊一頁呢？

陳美寶女士：（經傳譯員）唔好意思，主席，文件冊入面就冇呢個附錄，附錄...

主席：（經傳譯員）文件冊入面有嘅嘢就係由九巴或者係運輸署提供嘅。如果你有附錄E(i)，可唔可以畀一份我哋呢，而家？

陳美寶女士：Yes. Should I...

主席：（經傳譯員）或者有人可以係從你手中攞一份呢個附錄，然後畀一份我哋呢。

陳美寶女士：（經傳譯員）唔好意思，主席。

主席：（經傳譯員）或者你可以一陣間再講呢個問題。

主席：（經傳譯員）陳大律師，你有冇其他問題想問呢？

陳政龍先生：（經傳譯員）我就想跟進其中一點，就係運輸署陳先生同埋主席之間嘅對話，即係關於呢個黑盒嘅要求。主席，我想你睇一睇2018年最新嘅黑盒嘅要求，就係休息之前我哋講到嘅，就係工作小組報告，你有冇呢份文件，主席？

陳英傑先生：Yes. May I -- sorry.

主席：（經傳譯員）或者畀陳大律師問埋佢嘅問題先。

陳英傑先生：（經傳譯員）我就先講一點嘅，喺休息之前，我就回應主席，就講到4(a)段，就係0.4G嘅減速率有冇改變過...

主席：（經傳譯員）我諗陳大律師就係想同你講呢一點。

陳英傑先生：（經傳譯員）呢一個就係2003年嘅版本，就係由0.2去到0.4嘅。

主席：（經傳譯員）即係話呢一個減速嗰個上限就係由0.2就去到0.4，係咪？

陳英傑先生：That's right. Yes.

主席：（經傳譯員）喺0.4嘅減速率之下，百分之九十五嘅乘客都會喺個座位度跌出嚟。

陳英傑先生：Yes, the chance of 95 per cent...

主席：（經傳譯員）如果係0.2G嘅減速率又點呢？有幾多人會跌出嚟呢？

陳英傑先生：（經傳譯員）呢一個嘅上限就係好耐之前採用㗎喇，...

主席：（經傳譯員）如果係0.2G嘅減速率底下，有幾多乘客會跌出嚟，你答唔答到呢？

陳英傑先生：I don't have the answer. I cannot answer.

主席：（經傳譯員）或者你可唔可以答呢個問題呢，點解由0.2G轉咗去0.4G呢？

陳英傑先生：（經傳譯員）喺2006年，我哋同巴士公司討論呢一個規格嘅時候，當我哋會面嘅時候，我哋評估咗呢項嘅要求，我哋發現0.2G只係好輕微嘅減速，係會經常出現嘅，亦都係對於監察嚟講，冇意義嘅，當時我哋同巴士公司會面，亦都同意咗就將0.2G轉去0.4G，不幸地，當時--即係喺呢個規格入面就冇更新呢個相關嘅數字嘅，所以今次我哋就更新咗呢個數字。

主席：（經傳譯員）即係過咗十二年之後先做，係咪呀？即係用成十二年先去更新呢個數字？

陳英傑先生：（經傳譯員）我諗呢個工作應該係會早啲做嘅。

主席：（經傳譯員）你有冇2006年呢一個會議嘅紀錄呢？

陳英傑先生：Yes, I think we have notes of meeting too.

主席：（經傳譯員）你可唔可以向委員會提供呀？

陳英傑先生：Yes.

主席：（經傳譯員）唔該晒。陳律師，頭先打斷咗你，或者你可唔可以講番2003嗰個最低要求嗰個文件紀錄？

陳政龍先生：（經傳譯員）就係TD-5文件夾1598頁。

主席：（經傳譯員）或者係擺上螢幕喇。係喇，呢度有喇，3(a)。你頭先提及百分之九十五嘅人坐喺位都會跌咗落嚟，即係話如果係用0.4G嘅減速衝力嘅話，呢個係咪有人做過一個研究㗎？

陳英傑先生：（經傳譯員）從我哋嘅搜尋，就喺1997年嘅時候，運輸署做一個研究發現嘅。

主席：（經傳譯員）有冇有關嘅文件？

陳英傑先生：（經傳譯員）我哋可以遲啲畀你。

陳政龍先生：（經傳譯員）你所講嘅研究包唔包括埋如果企喺度嘅乘客會企唔穩呢？即係嗰個數字係幾--呢度有冇呢？即係關於0.2同0.4G。

陳英傑先生：（經傳譯員）有關於站立嘅乘客，恐怕就冇提及嘅，因為坐喺度嘅乘客，佢係有個正式嘅位坐喺度，就可以容易啲去界定，但係企喺度嘅乘客，係另一回事嚟嘅，因為啲人點樣企法我哋就唔可以控制到嘅，亦都冇話既定用咩嘢方法企嘅，所以我哋就冇相關嘅減速衝力嘅，係針對站立嘅乘客嘅。

主席：（經傳譯員）或者我哋可以用常識，你哋都係應該--佢哋應該都會跌晒落地，係咪？

陳英傑先生：（經傳譯員）可以係，可以唔係，因為好視乎佢哋點樣企法，喺巴士裏面，我哋其實有訂明話巴士有啲咩嘢設施可以幫到嗰啲站立嘅乘客，譬如佢係扶住一條柱--一支杆等等，如果佢哋企得好穩陣，未必係咁大機會會跌落地嘅，但係當然有啲人佢上咗巴士，可能手拎住啲嘢，然後巴士行嗰陣時候行嚟行去咁又另一回事喇。

主席：（經傳譯員）陳律師。

陳政龍先生：（經傳譯員）啱啱我收到一份文件，就係你頭先想提嗰份文件，陳女士，就係附錄E(i)，係咪？

陳美寶女士：（經傳譯員）係，主席。呢個就係附件E(i)，就係我哋夾附畀九巴同埋其他專營巴士公司嘅信件嗰度嘅，喺呢度，我哋就想佢哋分類，將導致巴士意外嘅原因嘅分類，呢度就係比較有幾多巴士車長係牽涉喺嗰三年期嘅交通意外裏面嘅，我哋就將佢因素就拆開嚟，就列咗喺呢個表度。

喺第二項就係同巴士車長有關嘅因素，同埋因為呢啲係講話唔同意外嗰個性質，呢度有個描述嘅，就係講話譬如一開始嘅時候，佢係大意咁樣開車等等，例如作為一個例子，然後我哋同巴士公司傾過之後，巴士公司就喺佢哋嘅--而家會喺嗰個安全章節嗰度就會詳細講述每一類呢啲意外嘅成因。

譬如如果話講到話巴士車長大意咁停車或者開車，呢啲嘅安全因素都會喺個安全章節嗰度最後訂明嘅，而譬如好似九巴，就會將佢交通意外數字分類，就話譬如話喺停車畀乘客上落車或者係離開巴士站嘅時候嗰啲嘅情況，所以就將嗰啲交通意外就分咗咁多個細類，就喺唔同情況嘅時候所發生嘅。

如果特別講話係踩剎車掣呢一點，就冇特別具體咁提及嘅，因為呢個係一個可以話係一個起始嘅一個參考水平嚟嘅，但係我哋預計佢哋喺佢嗰個安全章節就會好詳細咁講出各個意外嘅成因係咪話佢突然間剎車或者係喺巴士站開車出嚟嘅時候等等。

主席：（經傳譯員）呢啲數據係嚟自邊度㗎？

陳美寶女士：（經傳譯員）呢啲數據就係根據過往嘅交通意外統計數字，就喺之前嘅各間巴士公司嗰個安全章節裏面有提及嘅。

主席：（經傳譯員）即係話呢個就係由運輸署將嗰啲數據組合起上嚟，係咪？即係呢個表只係得一頁嘅之嘛。

陳美寶女士：（經傳譯員）或者我哋嘅總工程師邱生可以幫一幫手。

邱國鼎先生：（經傳譯員）係，我哋呢啲數據係從警方嘅交通意外調查組嗰度攞番嚟嘅。

主席：（經傳譯員）係警方呀？但係呢份文件係運輸署提供嘅，係咪呀？

邱國鼎先生：（經傳譯員）係，係佢哋運輸署做出嚟嘅。

主席：（經傳譯員）呢啲警察嘅統計數字叫做乜嘢㗎？

邱國鼎先生：（經傳譯員）個名稱係...

主席：（經傳譯員）請你可唔可以近啲個咪講嘢？

邱國鼎先生：（經傳譯員）因為佢哋而家轉緊一個新嘅系統，所以有個新嘅名，嗰個系統就係「事故個案管理系統」。

主席：（經傳譯員）CMIS，係咪呀？即係佢哋用個縮寫，CMIS。

邱國鼎先生：Yes.

主席：（經傳譯員）因為我哋聽過警方作供嘅。你哋係可以用到佢哋個數據庫嘅，係咪？

邱國鼎先生：（經傳譯員）係。

主席：（經傳譯員）有冇睇過警方唔係幾耐之前向我哋作供嗰個證供謄本呀？

邱國鼎先生：（經傳譯員）冇，我哋只係可以接觸呢啲數據。

陳美寶女士：The transcript, police transcript.

邱國鼎先生：（經傳譯員）有，有，有睇過。

主席：（經傳譯員）你係咪--你都知道警方話過畀你聽佢哋有個範本嘅，係有六十個成因，即係話警員如果佢調查交通意外嘅時候，就有呢個範本，有六十個成因，佢哋就剔每一個成因，然後就將啲資料輸入去電腦，然後就會有高層啲嘅人就會檢視呢啲嘅資料，所以嗰個資料係咁嚟嘅，即係由警方嗰度。

邱國鼎先生：（經傳譯員）係，其實佢哋有個表，而家顯示嗰啲因素都係其實警方所

提及嘅因素嚟嘅，即是喺佢哋將呢啲嘅數據輸入去電腦嘅時候，佢哋就會揀係邊啲因素導致個交通意外嘅。

主席：（經傳譯員）陳律師。

陳政龍先生：（經傳譯員）或者我返番去轉頭，講一個比較概念性嘅問題，就係話係安全表現指標，因為喺小休之前我哋都有傾緊嘅。

主席：（經傳譯員）或者係喺你咁做之前，可唔可以先問一問陳女士，呢封信係你寫畀九巴嘅，我睇嘅係 1729 頁，喺嗰度，我哋就搵到附件 E(i)，嗰度信件其實冇提及呢啲數據嘅來源嘅，係咪？

陳美寶女士：（經傳譯員）冇嘅。

主席：（經傳譯員）有冇咩嘢特別理由點解你唔話畀九巴聽呢啲數據係邊度嚟嘅呢？

陳美寶女士：（經傳譯員）或者我解釋一下，因為我哋一般個做法都係用警方關於譬如交通意外數字嘅數據庫同埋佢哋嘅分析等等，因為其實只係有警方會話將啲意外分類，我哋運輸署冇嘅，所以呢啲關於 2015、16、17 年所制定嘅交通意外嘅數據都係咁樣嚟嘅。

其實我哋之後都會係會向巴士公司做一個講解嘅，就會講我哋要求佢哋做啲乜，如果喺做嗰個簡介會嘅時候，我哋就向佢解釋我哋預計--希望佢哋提交嗰啲數據要有幾細緻，我哋就冇嗰個討論嘅紀錄，但係好明顯呢個都係巴士公司一般都知道，就係話我哋其實係用警方所管理嘅數據庫，而運輸署係有權用嘅，純粹係咁。

主席：（經傳譯員）好。

陳政龍先生：（經傳譯員）主席，或者我返番去講安全表現指標嘅問題，從你哋嘅證供，似乎你係唔同意用一個安全表現指標，為咗確保我嘅理解正確，我就想請你睇 Stanley 教授嘅供詞裏面有兩段，等我哋好清晰知道我哋大家講緊乜嘢，唔會有含糊或者混淆。

好，而家睇番第 16 日聽證會嘅證供謄本，即係 2018 年 9 月 15 號，61 頁，謄本 61 頁，61 頁，第 21 行，我由嗰個問題開始。

主席問「仲有乜嘢其他方法我哋可以量度安全呢？」而 Stanley 教授就話「我覺得意外率係一個好嘅起點，如果你睇番喺嗰五年遠期計劃裏面嘅安全計劃裏面提及嘅一啲嘅數據，譬如話係碰撞式，有導致死亡嘅意外，冇碰撞嘅意外，滑到、絆倒、跌倒嘅意外等等，你可以沿住呢個去再制定一啲關於安全嘅鼓勵措施或者係罰則。如果你唔用嗰個整體嗰個意外牽涉率，你睇嗰個死亡率同埋睇下滑到、絆倒、跌倒嘅意外等等，你就可以形成一種睇法。我就覺得呢個係相對係重要嘅。

就如果佢哋加埋晒所有呢啲，話一宗事故都係一宗事故，你其實就睇唔到

Transcript by Epiq Hong Kong, Limited

嗰啲細節嘅，所以我就會將佢再拆分一啲嚟睇，就睇下啲主要安全關注嘅地方。同埋確保主要表現指標係同呢啲相關嘅，而你鼓勵或者罰則都係同呢啲有關嘅。我唔知道嗰沓裏面係有幾多嘅元素，我諗就需要由政府同埋營辦商去討論、去協商。

又我哋或者可以睇番乜嘢係主要影響安全問題嘅因素，然後由嗰度做一個起點。」

然後就請你睇第 72 頁，係同一份謄本，18 行，Stanley 教授就話「每 100 萬行車公里意外率，就我覺得係一個誤導，而且係太過粗疏嘅一個指標嚟嘅。」

跟住我就問「你係咪需要一個更加細緻嘅指標或者一組嘅指標？」Stanley 教授話「絕對係需要嘅，你需要一套好細緻嘅指標，呢啲都係成個指標嘅一部分，能夠反映到，由於作為一個經濟學家，我就會話嗰啲唔同意外嘅一個成本係乜嘢，就可以咁樣去量度，我相信肯定你哋香港都會咁樣去量度嘅。譬如話係典型嘅導致死亡嘅意外係有一個數值，其他輕微啲嘅意外又有一個數值，就可以當佢係一個加權咁樣嚟睇嘅。當然仲有其他嘅因素可能你都想包括埋係其中。」

所以從你今朝早作供，你就話你係唔同意用呢個方法嚟去量度安全，啱唔啱？

陳美寶女士：（經傳譯員）或者我可唔可以再詳細啲解釋我哋嘅立場或者觀察？喺小休之前，你就問過我係咪同意 Stanley 教授嗰個講法，就話主要表現指標就唔可以係唯一個指標去量度安全，我就話唔同意，我就話只不過係需要有一個起點，一個參考點。

主席：（經傳譯員）唔係，其實早啲時候，你係唔同意就話主要表現指標如果係巴士公司唔可以控制嘅，就唔相關嘅，我諗我哋講嘅呢個問題，就係主要表現指標係咪控制得到，呢個就係 Stanley 教授嘅睇法。

陳美寶女士：（經傳譯員）我諗講到話安全因素，譬如講話有幾多宗意外，喺某程度上，就唔係話巴士公司完全可以控制到嘅，但係我哋覺得用一個咁嘅指標仍然都係可以幫到我哋去量度個安全表現嘅。而另一方面，我提到話一宗意外可能係好多因素造成嘅，如果我哋用一啲好具體嘅指標，例如話牽涉到巴士車長嘅意外宗數，可能係因為佢大力剎車，即係某啲情形之下，如果淨係咁樣睇，又再深入啲去調查當時係咩嘢情況嘅話，呢一類咁嘅指標就未必可以係完全顯示到佢係完全由巴士司機造成嘅意外嘅。

譬如可能話巴士公司去睇番嗰啲閉路電視嘅錄影帶，又有個黑盒有紀錄，就睇到巴士司機急劇剎車咁樣，可能都仲要睇埋譬如話閉路電視有啲其他嘅數據，就顯示可能係牽涉一啲外在嘅因素，係巴士司機或者係巴士公司冇辦法控制嘅，可能巴士司機係要作一個艱難嘅決策，到底係咪要大力剎車，避免同其

他車相撞，或者係撞到一個路人咁樣，而當--因為佢大力剎車可能都導致啲乘客企唔穩等等。所以好難話我哋做到一個好簡單單一嘅一個指標去量度巴士公司嘅安全表現嘅。

Stanley 教授建議話用一個加權嘅意外率，可能喺呢一方面，我哋可以進一步去探討同討論，但係我哋需要有一個起點，一個參考點嘅。而講到話有幾多宗交通意外，幾多交通意外牽涉到巴士嘅行車里數嘅話，其實變咗我哋可以有一個比較嘅基礎，係按年咁去做比較，而我哋亦都可以--譬如話從咁，我哋可以睇到係咪話個意外率增加，即係 2017 年相對於 2016 年係增加咗，而且亦都係超越咗佢哋嗰個目標意外率嘅，呢個目標就係由巴士公司自己定嘅。咁亦都能夠達到我哋嘅希望做到，就係我哋有啲咩嘢方法可以按年咁去減低嗰個意外率或者宗數，呢個就係佢哋可以提供嘅資料嚟嘅。

陳政龍先生：（經傳譯員）Stanley 教授嘅建議就係話用呢一個嘅方法係太過粗疏，可能有誤導性嘅，你有咩嘢睇法？

陳美寶女士：（經傳譯員）我諗我已經答咗呢個問題㗎喇。

陳政龍先生：（經傳譯員）好，唔該。好，而家就睇一睇倫敦點樣做，倫敦而家嘅狀況。陳女士，就想請你睇一段 Weston 先生講到倫敦嗰個做法嘅報告書，我就會喺佢嘅口供嗰度攞一小段嘅文字嚟讀出嚟，就喺佢嘅專家嘅報告，仲有就係講到倫敦方面嘅證供，我會讀咗出嚟先，然後請你係畀下你嘅睇法嘅。

首先，Weston 先生嘅報告就係專家文件 150 頁，7.8 段，Weston 先生嘅報告，我讀喇，喺「TFL 安全表現指標」，Weston 先生就話「係作為佢哋倫敦運輸嗰個嘅巴士安全計劃，佢哋有一個安全表現指標，嗰個做法就係基於鐵路業嗰個嘅做法嘅，佢哋就係會監察一籃子嘅措施，包括一啲意外嘅數據同埋一啲可以觀察出嚟嘅措施嘅一啲嘅表現，佢嗰個整體嘅數字就係 80 嘅，將來嘅表現就係根據呢一個嘅基準 80 嚟到去比較，就係睇下到底有改善抑或係惡化嘅，呢個制度唔係要去比較巴士與巴士公司之間，反而係睇一間個別公司嗰個嘅趨勢。」Weston 先生嘅報告就係咁。

主席：（經傳譯員）呢個重要嘅就係話要去強調安全表現指標係要嚟發展用喺一個嘅巴士安全計劃嗰度，而呢一個巴士安全計劃就係會喺 10 月 16 號嘅時候公布，呢個係一個新嘅制度？

陳美寶女士：（經傳譯員）係，我明白嘅，我哋同倫敦嘅運輸署都係有一啲聯絡。

主席：（經傳譯員）可唔可以對住個咪講大聲啲？

陳美寶女士：（經傳譯員）係，我哋同倫敦嗰個嘅運輸嘅局係有一啲嘅聯絡。我哋就係想睇下有冇一個有效嘅量度就係關於巴士同埋鐵路業嗰個安全表現。唔該。

陳政龍先生：（經傳譯員）而家想請你睇下 Weston 先生喺同一個報告嘅睇法，就係喺 2018 年呢一個嘅係 9 月 27 號，第 18 日嘅研訊講嘅。喺 51 頁尾嗰度，第

23行，你睇到鄧先生係一個嘅文件嘅。

主席：（經傳譯員）我哋而家仲未睇到。得喇，睇到喇。

陳政龍先生：（經傳譯員）就係鄧大律師就係問Weston先生，佢話「可唔可以去睇你報告150頁？」我就想去第52頁第4行，鄧先生就問「係咪有一個安全表現指標已經係--即係有指稱過，但係未公布嘅？」

「係呀，就話呢個就係一個嘅建議，呢一個倫敦運輸局係做緊嘅，巴士營運商係向我哋8月嘅時候解釋過，就係牽涉埋落去嘅有四十一個嘅措施，係呢一個嘅安全表現分數嗰度就可以有不同嘅加權，可以包埋係一啲死亡或者嚴重受傷嘅數字，可能係滑倒、絆倒或者係跌倒呀咁樣嘅。

佢哋目標就係要去監察一個營辦商嗰個嘅趨勢，就係根據呢個80呢一個嘅基準，佢係經過加權，加權落去成個籃子嘅指標裏面。就係話唔單只話有一宗致命意外咁簡單，就係話呢個可能唔關嗰個巴士公司嘅事嘅，呢個就唔會令到佢個分數大大咁降低嘅，我哋係想監察呢間公司入面嘅趨勢，就唔係要佢嚟去同其他嘅公司去比較。我覺得咁樣做未必係幫到佢改善嘅，只不過係一個認可，就話你而家呢間公司係做得好咗、安全咗。如果譬如嗰個基準係80，你就係基於呢個80嘅標準嚟到去改善嘅。嗰個目標就係喺適時就係會向公眾公布，不過而家仲未嘅。」

最後，請你睇下倫敦係交通局佢哋嗰個公布嘅一份嘅文件，係關於同一個事項嘅，請你睇雜項文件3第1194頁，或者由1189頁開始講，係呢一份文件嘅第一頁。

陳女士，嗰份嘅文件就係呢一個巴士安全計劃嘅最新情況，呢個就係呢個倫敦嘅交通局係應佢哋嗰個嘅有關嘅委員會要求係提交嘅一個報告。

主席：（經傳譯員）呢個係2017年11月？

陳政龍先生：（經傳譯員）冇錯。想搵番個日子。無論如何，陳女士，請你睇1194頁，個標題就係合約同埋呢一個嘅表現管理。

喺引言嗰度話「我哋用一系列嘅數據去評估一個營辦商係咪能夠提供一個安全嘅服務嘅，作為巴士安全計劃嘅一部分，我哋考慮緊一啲方法去改善呢個程序同埋係更加可以係著重獎勵安全同埋係合約嘅管理嘅。

我哋考慮過一系列嘅方法之後，我哋而家決定有一個營辦商安全表現指標，呢個叫SPI，係基於呢一個消費物價指數嘅同一個原則，喺一個嘅綜合嘅措施，係有一籃子嘅指標嚟到係得到一個單一嘅表現指數。呢個係因為我哋喺2017年係引入咗呢一個巴士網絡嘅安全表現指標，都係好成功，會有八十一個相關嘅指標，而呢一個指數係四十一個指標，係包括一啲係意外衍生嘅數據同埋一啲行為方面嘅觀察，包括係員工同埋呢個顧客安全、網絡安全、呢個風險管理、駕駛嘅水平、工程嘅情況等等。每一個營辦商嗰個表現都係會根據佢自

己嗰個嘅表現嘅指標做一個追蹤，嚟到去鼓勵持續嘅改善。」

陳小姐，我嘅問題就係...

主席：（經傳譯員）你而家係咪會去講“Driven to distraction”，呢個係大倫敦議會佢哋嗰一份嘅文件？

陳政龍先生：（經傳譯員）係，我會一陣間係講一講話「提供誘因」呢一點嘅，咁...

主席：（經傳譯員）係呀，呢個係回應呢一個大倫敦議會佢哋呢一方面嘅要求嘅。你可以用你嘅方法去做，但係我覺得嗰個就係背景，呢個係倫敦嘅運輸局嗰個嘅回應，亦都係有人對佢呢個做法有一啲嘅批評嘅。

陳美寶女士：（經傳譯員）係。

陳政龍先生：（經傳譯員）我一陣間會講番呢一度，因為呢一份文件我好快就會講到㗎喇。陳女士，我唔係話我哋要照抄呢四十一個倫敦用嘅因素，我係更加概念性嚟講，我哋會唔會都係想有一籃子嘅措施，畀我哋一個整體嘅安全表現指標，我哋可以一路監察，亦都係去量度巴士營辦商嗰個嘅進展嘅，亦都鼓勵佢哋係根據呢啲嘅措施一路去改善嘅，你有啲咩嘢嘅評論？

陳美寶女士：（經傳譯員）多謝主席同埋陳生係去向我哋提出倫敦運輸局嗰個嘅措施嘅，其實我哋都知道佢哋呢啲最新嘅發展，其實係2017年11月㗎喇，我哋已經安排咗我哋嘅職員去探訪佢哋嘅部門，其實之前已經係計劃咗，去認識多啲佢哋關於道路安全同埋公共交通安全計劃嘅一啲計劃。

我諗佢哋嘅措施簡單嚟講就係要有一個好概念性嘅做法，就係去考慮到一籃子嘅因素去評估巴士營辦商個安全表現，我覺得應該係有一個嘅表現指標嘅，起碼有一個指標等我哋去評估呢間巴士公司係咪安全。話雖如此，我覺得我哋應該要向住呢個方向發展，我哋要有好幾個相關嘅因素，然後要有一個單一嘅指數或者指標，呢一個範疇我哋可以再探究、研究嘅。

工作小組嘅建議就係話想有一個全面嘅巴士車隊嘅監察同埋管控計劃，我哋而家係想叫巴士公司係安裝晒所有相關嘅儀器，而提供實時嘅監察去睇住車長嗰個嘅駕駛態度，係睇住佢一啲主要嘅事宜，好似話剎車、係咪急劇嘅剎車、加速同埋嗰個黑盒嗰個紀錄。另外我哋亦都係期望巴士營辦商係跟住嗰個嘅訓練框架，呢啲係一系列嘅因素我哋會考慮，嚟到去發展一個更加精確嘅表現指標，嚟到關於巴士嘅安全嘅。

呢啲我哋都係有興趣係會繼續，仲有其他嘅建議同埋一啲嘅發展，就係關於巴士嘅用儀器嚟到實時監察巴士嘅運作，同埋車長嗰個嘅態度，我諗呢個係畀我哋更堅實嘅基礎嚟到去繼續探究，就同巴士公司方面去研究，我覺得呢個都係實務嘅，呢個係一個更加係進深嘅一個方法，我諗我哋都係好想喺呢方面研究嘅。

主席：（經傳譯員）你估大概要幾時先至可以搵到相關嘅因素，有一個單一嘅或者係簡單嘅表現指數呢？

陳美寶女士：（經傳譯員）喺呢個時候，我講唔實，但係我係運輸署署長，我哋亦都係諗住去拜訪倫敦嘅運輸局，我哋會同佢哋討論下成個安全表現指標嗰個嘅理念，我諗大概嚟講，應該一年內，我哋會有一啲初步嘅諗法嘅，唔該。

主席：（經傳譯員）你係咪已經同專營嘅巴士營運者係傾過嘅呢？

陳美寶女士：（經傳譯員）我未嘅，但係話去發展一啲嘅主要表現指標，喺訓練方面嘅，同埋係實時嘅黑盒嘅監察功能同埋其他係協助到車長嘅一啲儀器，我已經係跟進緊㗎喇，同我哋嘅工作小組。喺我開場白嗰度話我哋根據經驗，同埋喺呢一個嘅檢討小組裏面嘅一啲建議，運輸署都覺得工作小組係一個好有用嘅一個制度，我哋會繼續用嗰個機制將所有相關嘅各方就係坐埋一齊，我哋就會睇下點樣用一啲係有用嘅措施嚟到去改善安全表現呢個問題。

主席：（經傳譯員）你用咗「場合」呢個字幾次，你係咪即係聽到或者個心係咪諗住 Weston 先生就話呢個工作小組應該係一個常設嘅委員會，一個嘅巴士營運嘅機制，係咪咁呢？

陳美寶女士：（經傳譯員）我都係睇到專家嘅證供係有用“forum”，即係營辦商嘅“forum”呢個字，我會叫佢係一個工作小組，其實佢嗰個嘅性質同埋嘅工作範疇都係差唔多嘅。

主席：（經傳譯員）嗰個更加具體嘅問題，你而家心裏面係咪諗住將呢個成為一個永久嘅委員會或者機制，就唔係一個工作小組嘅，係會有定期會議，係咪呀？

陳美寶女士：（經傳譯員）呢個係一個永久嘅小組，會定期咁開會。

主席：（經傳譯員）咁即係有啲似倫敦而家嘅巴士營辦商大會咁，係咪呀？

陳美寶女士：（經傳譯員）類似喇。

主席：（經傳譯員）Weston 先生亦都係建議我哋喺香港採納嘅，你係咪接受佢呢個建議呢？

陳美寶女士：（經傳譯員）係嘅。多謝主席。

陳政龍先生：（經傳譯員）陳女士，呢一方面就係要有一啲合併嘅，比較係精準嘅安全表現指標，而另外一方面就係話要用一啲嘅誘因或者係賞罰嚟到擺落你嗰個嘅營辦協議嗰度，即係佢哋能唔能夠達標就係可以有賞罰嘅，呢一點我想同你係探討一下。我想請你睇倫敦議會交通委員會嘅一份文件，呢個主席正話係講到嘅就係雜項文件 3，係第 1134 頁，大家睇到，個日期係 2017 年 7 月嘅，我而家想集中睇嗰個概念就係話唔達到某啲嘅目標嘅時候就係有一啲賞或者罰嘅，係 1151 頁，呢一份報告書--唔好，由 1150 頁開始，等我哋知道個背景。

呢度會係「制定安全目標」，第 2.2 段，「受傷同埋一啲嘅碰撞目標係可以要嚟作為一啲嘅指標去改善倫敦嘅巴士安全紀錄嘅，呢個有好清晰嘅角色，係好多--無論係公營或者係私營嘅服務都係可以改善佢哋嘅表現。我哋相信可以用一個類似嘅方式嚟到係將安全表現係同呢啲巴士營辦商嗰個利潤連結起嚟，就係亦都係直接影響佢哋高層管理員嗰個嘅薪酬嘅。」

喺 2.3 段，「倫敦運輸局就係向我哋表示佢係有意引入一啲巴士安全嘅目標，但係就冇計劃--冇跡象顯示佢哋係呢啲係會同一啲金錢嘅獎勵係拉上關係嘅。喺 16 年 11 月，倫敦運輸局嘅安全可持續性同埋人力資源小組就係被要求係去決定 2017/18 年嘅巴士乘客主要嘅受傷數字嘅目標，而倫敦運輸局亦都同我哋講喺 2 月有同我哋作出一個匯報嘅。」

我想講 2.6 段，「之前倫敦運輸局係解釋點解冇向巴士公司定立一啲安全嘅目標，佢就表示『安全就冇直接同一啲金錢或者一啲扣減係相關，因為佢哋係唔想有帶出一個訊息就係營運嘅安全就係一個可以協商嘅一個代價嚟嘅。』

我哋明白倫敦運輸局嘅睇法，但係我哋就並唔同意嘅，營運公司係會根據一啲獎賞係去行事，特別一啲財務上嘅獎賞，而佢哋嘅股東亦都係有相同嘅期望嘅。如果唔將安全納入一啲合約嘅支付架構，就倫敦運輸局就唔能夠鼓勵營運商係去承諾一啲安全嘅表現。」

喺 2.7 段就講到「如果倫敦運輸局係想減少呢一個意外或者受傷同埋碰撞率，佢必須要向呢一個巴士公司引入一啲有意義嘅獎賞，令到佢哋提供更加安全嘅服務。而倫敦嘅市民亦都係同意我哋嘅做法嘅，我哋訪問嘅一千六百名倫敦市民之中，百分之八十八同意倫敦運輸局係必須要就住呢一啲安全同埋及時嘅表現係提供一啲獎賞嘅。」

陳美寶女士：（經傳譯員）首先我認為呢個唔係一個簡單嘅議題嚟嘅，因為呢個就係涉及就將呢一個安全嘅表現同埋巴士公司嘅財務誘因係去掛鈎。喺倫敦嘅情況下，我哋知道倫敦就引入咗一個叫"MOM"嘅模式，就住佢哋嘅巴士公司。

至於安全表現可唔可以比巴士公司嘅獎賞或者係懲罰有關呢？呢個係喺香港係有好大嘅討論空間，亦都係涉及究竟巴士公司係咪以一個專營權嘅方式去經營，我哋首先要睇下我哋係咪用緊同一個模式；第二，喺我哋現有嘅機制下，我哋係有一個法定嘅框架，如果專營巴士公司無法係提供適當同埋有效率嘅服務，我哋係可以向行政長官係提出係對佢哋進行財務上嘅懲處嘅。

喺香港嘅情況之下，如果我哋日後係引入一個更加複雜嘅安全表現指標，就可以令到我哋更加有效咁樣向行政會議係提出係懲處一啲無法去滿足安全要求嘅巴士經營商。

究竟我哋可唔可以將呢樣嘢轉化為針對巴士公司嘅金錢嘅懲處，呢個係另一個問題，呢個問題之前喺倫敦係有探討過嘅，倫敦運輸局可能會對我哋有一啲啟示，但係喺現階段，我哋係會保持開放嘅態度。我哋會考慮倫敦同埋其他

Transcript by Epiq Hong Kong, Limited

司法管轄區嘅經驗，但係我哋唔會排除係去內部探討呢個問題，但係個問題我哋會唔會實行，我哋就會考慮好多其他嘅因素，我哋係要小心謹慎去考慮。唔該主席。

陳政龍先生：（經傳譯員）除非你有其他嘅觀察想提出，呢一個獎勵嘅機制，我就會係講下一個議題。

主席：（經傳譯員）或者畀佢答一答，你係咪有嘢想講？

陳美寶女士：No.

主席：（經傳譯員）至於倫敦議會所講，喺第1151頁嘅第2.6段就講到倫敦運輸局講咗啲咩嘢，「安全就冇直接就同一啲款項或者扣減掛鈎」，呢個就係講緊佢哋嘅制度，佢哋就係會獎勵一啲好嘅服務，而如果啲巴士無法係提供滿意嘅服務，佢哋係會受到懲罰嘅。而倫敦當局嘅做法就係呢個制度可以延伸到去安全表現嘅，但係喺香港嘅制度係唔同，我哋冇一個獎賞或者扣減嘅制度。我哋只有一個懲罰嘅制度，如果你唔可以滿足一個安全表現指標，就會懲罰。

陳美寶女士：Yes.

主席：（經傳譯員）新加坡都係一樣，係咪？

陳美寶女士：（經傳譯員）係，主席。我哋法律入面係有懲處嘅條文，我哋就會引用嗰啲條文，然後係去發展一啲比較平衡嘅安全表現指標，根據我哋同巴士公司之間嘅峰會，我哋其中一項就提到我哋喺懲處方面點樣有一個更加高透明度嘅制度，以往我哋係有一啲法定嘅罰款，根據呢個條文，究竟我哋點樣將佢哋同安全表現指標掛鈎，呢個就係喺我哋同巴士公司參與嘅工作小組都可以做嘅嘢。

主席：（經傳譯員）上一次進行懲處係幾時呢？

陳美寶女士：（經傳譯員）我有呢個資訊喺我個文件夾入面，但係暫時就畀唔到一個答案委員會。

主席：（經傳譯員）就講到一個5月7號嘅文件就話從來冇用過，係咪？

陳美寶女士：（經傳譯員）係。

主席：（經傳譯員）我有冇記錯，陳大律師？

陳政龍先生：（經傳譯員）根據我嘅記憶係咁嘅，但係我要搵番個相關嘅資料。

主席：（經傳譯員）但係你而家同我哋講係有用到，係咪？

陳美寶女士：（經傳譯員）我哋要再去確認一下嗰個日子，我哋會確認一下，然後會稍後再提供呢個資料嘅。

主席：（經傳譯員）陳大律師，我哋有冇新加坡嗰面嘅資料呢？如果根據我個記憶，就係有個金錢上嘅懲處，就係十萬元新加坡元嘅，即係如果係超過咗某個嘅意外率。

陳政龍先生：（經傳譯員）或者我哋喺一陣間下晝返嚟去處理呢一個問題。

主席：（經傳譯員）係，可以嘅。歐陽先生。

歐陽先生：（經傳譯員）香港嘅公共交通系統係有一個懲處嘅制度，例如係港鐵嘅制度，係咪？

陳美寶女士：（經傳譯員）冇錯嘅。主席，根據我哋有嘅紀錄，係有記錄我哋係喺96年係進行過懲處嘅，但係我哋會再去確認一下我哋嗰個當時個原因係咩嘢。

主席：（經傳譯員）應該係針對中巴嘅懲處，係咪？

陳美寶女士：（經傳譯員）冇錯，主席。

主席：（經傳譯員）陳大律師。

陳政龍先生：（經傳譯員）主席，我想講番 5 月 7 號嘅證供，就係向運房局提供--即係向呢一個黎以德先生常務秘書長嘅，就係今年 5 月 7 號嘅謄本，或者我哋可以顯示出嚟，第19項嘅。呢個就係5月7號嘅謄本，第8頁嘅。

主席：（經傳譯員）係，慢慢。

陳政龍先生：（經傳譯員）唔好意思，應該係第32頁，第19行。

主席：（經傳譯員）稍等。

陳政龍先生：（經傳譯員）主席問咗呢個問題，「鄧大律師，喺你繼續之前，你嘅意思係咪從冇施加過財務嘅懲罰呢？」而黎以德先生就話「主席，就我講嘅就係因為安全而令到我哋要引用呢個條文，即係財務懲處嘅條文。」「就從來冇係因為--即係啟用 22 條嘅懲處嘅？」而黎先生就話「主席，我就記憶中就冇嘅，我就見唔到要引用呢一個嘅條文。」

陳美寶女士：（經傳譯員）主席，黎以德先生嘅證供係正確嘅，因為佢係回應緊安全方面嘅問題，而佢嘅印象中，就以前係冇施加過罰款嘅，而我所提到嘅情況，即係就住中巴喺 96 年嘅情況，就係同嗰間嘅專營巴士公司嘅脫班有關嘅，我哋係向中巴施加咗 8,000 蚊嘅罰款，呢個事件就係喺 1995 年，我哋喺 96 年係施加罰款嘅。

主席：（經傳譯員）我就問題嘅第二部分--答案第二部分，上面都有講到「係冇引用過 22 條而去施加任何嘅罰款？」而答案就係「冇錯嘅，以我嘅記憶或者係了解。」第22條係咪同罰款有關？

陳美寶女士：（經傳譯員）就係一個合適同埋有效率嘅服務，而安全就係其中一項我

1 哋考慮嘅因素之一。

2 主席：（經傳譯員）換句話講，就從來冇係--即係94年出現咗脫班？

3 陳美寶女士：（經傳譯員）95年都出現咗脫班，而喺96年就係施加咗罰款嘅。

4 主席：（經傳譯員）唔該晒。陳大律師。

5 陳政龍先生：（經傳譯員）主席，我就準備講下一個嘅議題，就係運輸署對安全嘅做
6 法，...

7 主席：（經傳譯員）我哋下晝署長就唔會喺度嘅，或者可能一啲一般性嘅問題可能而
8 家問咗先會好啲。

9 陳政龍先生：（經傳譯員）主席，我想問嘅一般性嘅問題就係以香港嘅制度嚟講，邊
10 個係負責推廣或者係改善巴士安全？邊個係負責係去發動去實施一啲新嘅安全
11 措施呢？

12 陳美寶女士：（經傳譯員）喺公共交通嚟講，特別係巴士安全，當然運輸署係負責嘅
13 單位，佢哋係負責係監察同埋改善巴士安全，而我哋亦都係會努力係改善公共
14 交通嘅安全。

15 陳政龍先生：（經傳譯員）我想睇一睇一啲嘅例子，就係睇下運輸署一直以來點樣去
16 改善巴士嘅安全嘅，或者我哋喺午飯後就開始進行呢個過程。

17 主席：（經傳譯員）或者我哋可以問多一、兩個問題，畀運輸署署長係作答嘅。運輸
18 署係邊一位係負責係推廣巴士安全呢，係邊啲人士負責呢？

19 陳美寶女士：（經傳譯員）喺運輸署之內，就係一個我哋係一個共同嘅努力，呢個我
20 哋有一個巴士及鐵路科，我哋亦都係有一個道路安全同埋標準部嘅，我哋助理
21 署長同埋負責呢一個鐵路部就係黃先生，或者黃志光先生，呢兩個單位都會係
22 共同係推廣公共交通安全嘅，唔該，同埋我哋同埋亦都係有邱國鼎先生嘅。

23 陳政龍先生：（經傳譯員）換句話講，就係喺運輸署入面冇一個單一嘅單位係負責巴
24 士安全？

25 陳美寶女士：（經傳譯員）係，冇一個單一嘅單位，但係巴士及鐵路科就係負責係睇
26 所有嘅政策同埋營運嘅事宜嘅，就住專營巴士。而道路安全及標準研究部亦都
27 係有份係去推廣同埋係改善道路安全嘅，包括係公共巴士安全。

28 除咗呢兩個主要單位之外，我哋亦都有一個車輛標準及安全部，就係負責
29 監管同埋監督呢一個硬件方面問題，包括係維修同埋巴士嘅標準，而助理署長
30 陳先生亦都係運輸署嘅副署長，佢哋係負責監管整體嘅車輛安全同埋標準，包
31 括係專營巴士嘅。

32 主席：（經傳譯員）問題嘅第二部分就係邊個係負責一啲創新嘅事宜，包括係安全嘅

裝置呢？

陳美寶女士：（經傳譯員）呢個係一個好有趣嘅問題，喺過去嗰一年左右，車輛安全及標準部，即係陳英傑先生所帶領，佢係負責去睇一啲喺車輛保養同埋安全方面嘅一啲新技術，我哋冇一個特定嘅單位同埋一啲額外嘅人手，呢個部門係負責推廣一啲新嘅技術，而喺工作小組底下，我哋亦都有個技術小組，亦都係由陳英傑先生係去主持，呢個就係一個主要嘅平台畀我哋係去推廣一啲唔同嘅安全裝置同埋一啲自動化嘅實時系統，包括係黑盒、全球定位系統等等。

我亦都想補充，我哋見到有一個獨立隊伍嘅重要性同埋需要嘅，即係正如我哋喺倫敦同埋其他嘅地方嘅例子度睇到，係去改善呢一個公共交通嘅研究能力。我哋亦都係爭取一啲人力嘅資源，包括一啲工程師、運輸主任同埋一啲機電嘅工程師，同埋我哋目標係去喺部門之內係創立一個交通嘅科技隊伍。呢個我哋就係一個內部爭取資源嘅過程嘅，我就想畀委員會參考。

主席：（經傳譯員）陳英傑先生嗰個嘅技術小組，佢一路做緊工作，但係好明顯一路就係負責係成立嗰個工作小組，就係2018年3月13號，之後先至成立嗰個技術組，係咪呀？

陳美寶女士：（經傳譯員）係，正確嘅，主席。我哋成立呢個工作小組個意念就係來自我哋參加大埔區議會會議嘅時候提出嘅，因為喺個 2 月嘅意外之後，就出席呢個會議嘅，...

主席：（經傳譯員）你講緊2月，2018年2月，係咪呀？嘅12同15號。

陳美寶女士：（經傳譯員）係，正確，主席。就話由好多--當時提出好多嘅睇法，建議，好多諗法，就係嗰兩次嘅會議度提出嚟嘅，而喺嗰兩次會議之後，我同我嘅團隊就認為我哋需要主動同埋更有系統咁樣去處理所有呢啲嘅建議，所以我哋要自己努力去推動有關工作，之後我哋就通知咗交通諮詢委員會，就喺 2 月27 號嘅時候通知佢哋，就話我哋係建議成立一個工作小組，嗰個職權範圍，建議就包括三個部分。

第一，就係巴士上嘅安全裝置，第二，就係安裝安全帶嘅可行性，第三就係加強巴士車長嘅培訓。所以我哋喺 2 月底嘅時候就係制定呢啲嘅建議，就係因為喺嗰次交通意外之後，因此就令我哋正式 3 月中嘅時候成立咗呢個工作小組。唔該主席。

主席：（經傳譯員）你較早時候講話你決定跟進大埔區議會 2 月 12 同 15 號嘅建議同埋立法會相關嘅會議同提出嘅動議等等，你話會採取行動，但係其實你根本係回應緊已經發生咗嘅事件嘅，雖然你話你係主動，係咪？

陳美寶女士：（經傳譯員）主席，我諗我哋可以做嘅主動措施仲有好多，至於話成立工作小組呢個嘅諗法係回應嗰次嘅巴士意外慘劇，但係我哋亦都採取咗前瞻同埋主動嘅做法，唔係等各個相關嘅諮詢委員會或者相關人士提出，我哋先至回

應，相反，我哋應該定出嗰個日程就係成立呢個工作小組，所以係喺咁嘅基礎，喺工作小組一開始開會嘅時候，我就已經係提出咗各個可能考慮嘅措施，然後定咗嗰個會議議程，然後就同巴士公司同埋巴士製造商逐個咁樣去傾呢啲建議，所以我哋係採取一個比較有系統同埋前瞻性嘅做法，為我哋自己定咗個議程，唔係等巴士公司或者係巴士製造商話畀我哋聽「你哋可以做到啲乜嘢。」唔該主席。

主席：（經傳譯員）好喇，我哋超時喇，我哋而家就係午膳時間。多謝你哋今朝早出席我哋嘅聽證會，希望星期六可以再見到你，陳女士。

陳美寶女士：（經傳譯員）好，唔該。

主席：（經傳譯員）好多謝你嘅協助。好，而家我哋就休會到兩點半。

下午1時05分聆訊押後

下午2時30分恢復聆訊

出席人士如前。

主席：（經傳譯員）午安。

陳政龍先生：（經傳譯員）主席，喺我繼續提問之前，我可唔可以報告一下，頭先主席你問到有個參考編號㗎，就係關於星加坡嗰個罰則嘅條文，其中一個參考就係專家文件夾229頁，係第3.19同埋3.20段。

主席：（經傳譯員）有冇擺上螢幕嗰度？我哋睇緊嗰份係咩嘢文件？

陳政龍先生：（經傳譯員）文件本身就係一份運輸署文件嘅附錄嚟㗎，相關嘅段落就喺第3段開始，就係睇星加坡嘅情況㗎。

主席：（經傳譯員）係，唔好意思，你可唔可以再講一次畀我聽呢份係咩嘢文件？係咪星加坡原本嘅文件嚟㗎，即係原來源自星加坡？

陳政龍先生：（經傳譯員）係，或者就係答你較早嘅問題喇，然後就講番個文件本身喇，我呢度請主席睇嘅文件就係一封信寫畀星加坡嘅管理當局，就問佢哋話呢份文件就係我哋委員會收到嘅，咁就問番，所以星加坡嗰個陸路交通嘅管理局喇，咁就有封信就係發咗畀星加坡嘅有關規管當局，就係請佢哋協助嘅，咁而嗰封信本身就喺第198頁，即係同一套文件夾裏面。

主席：（經傳譯員）好，我諗我哋唔需要喺呢度花時間。好喇。有冇提及話嗰啲罰則

點樣執行？係針對譬如話每一百萬行車公里意外率嘅呢？

陳政龍先生：（經傳譯員）主席，或者我之後再返嚟畀番啲具體嘅參考資料，咁我自己都要搵番嗰個有關編號出嚟先。

主席：（經傳譯員）好，唔該你。

陳政龍先生：（經傳譯員）主席，我知道陳生今日晏晝係由你主要回答問題喇，喺午膳之前我哋就向陳女士提問，就話運輸署喺巴士安全方面所採取嘅做法，咁我哋問咗陳女士一啲一般性嘅問題，就話邊個係負責推動巴士安全嘅，而我跟住落嚟嘅一連串問題充係講番啲過往嘅事件嘅，主要充睇下運輸署過往係點樣處理巴士安全嘅問題，咁我會逐項去講，咁如果你記得嘅話，咁就最好喇，但係如果譬如你想問番有關嗰個原文件嘅參考編號，請你話畀我知。好，第一，2003年7月，有一架巴士喺屯門公路跌咗落去個山坡，導致二十一人死亡，亦都有相當人數受傷，因為屯門公路嘅事故，而家就有啲被動式嘅時速限制器就限制咗巴士行駛嘅時速，咁呢啲時速限制器就喺屯門意外之後係規定巴士公司要安裝，而家已經成為所有專營巴士嘅標書裝置嚟㗎，啱唔啱？

陳英傑先生：係。

主席：（經傳譯員）第一次規定限速器係幾時？

陳英傑先生：（經傳譯員）係嗰次事故之後，我哋就睇番有啲咩嘢嘅方法可以糾正個問題，咁我哋就同巴士公司傾過之後，咁我哋就施工咗一個新嘅規定，就係話巴士要安裝時速限速器就係限制個時速係每小時70公里。

主席：（經傳譯員）係，但係點解發生？係邊度搵到嗰封信或者嗰個專營權嘅規定係點？

陳英傑先生：（經傳譯員）係，我哋應該係將佢納入咗個規格裏面嘅，咁但係即係巴士嘅最低規格，但係之前係--我相信係我哋同巴士公司有一連串嘅討論嘅。

主席：（經傳譯員）其實係一個好簡單嘅問題啫，就係想搵嗰份文件，咁請你搵出嚟。

陳英傑先生：（經傳譯員）好，我哋會提供嘅。而家聽唔聽到？

陳政龍先生：（經傳譯員）第二項嘅安全措施亦都係因為同一宗交通意外而引申出嚟嘅，就係規定專營巴士公司安裝黑盒，今朝早我哋都已經睇過呢個規定喇，就係2003年10月嘅一封信嚟嘅，咁你記唔記得呢個黑盒嘅規定亦都係因為屯門公路嘅意外而出現嘅呢？

陳英傑先生：（經傳譯員）係。

主席：（經傳譯員）咁你可唔可以重複嗰份頒布文件嘅參考編號？

陳英傑先生：（經傳譯員）係 TD-5 號文件夾，1957 頁就係嗰封信喇，1958 頁就係嗰個附錄嘅文件--嗰封知件嘅附錄，即係個規定本身。

陳政龍先生：（經傳譯員）然後 2006，7 月同埋 2007 年 12 月又有兩宗專營巴士相撞嘅事故，導致有乘客由專營巴士嗰度拋咗出去，最後因為呢啲事故而施加嘅巴士安全措施，第一就係要喺上層巴士嘅玻璃窗安裝個打橫嘅欄杆；第二就係喺上層前面四個位要安裝安全帶，咁你記唔記得有呢啲嘅安全措施就因為嗰兩次事故而提出嘅呢？

陳英傑先生：（經傳譯員）係，記得。

陳政龍先生：（經傳譯員）好喇，咁而同樣喇，而家呢啲設施已經係專營巴士嘅標書設施喇？

陳英傑先生：（經傳譯員）係，正確。

主席：（經傳譯員）咁有冇一個參考編號幾時頒布呢個規定？如果冇嘅話，或者遲啲畀番喇。

陳英傑先生：（經傳譯員）全部都係喺專營巴士嘅規定清單嗰度嘅，或者遲啲我畀番嗰個參考編號你，主席。

主席：（經傳譯員）第一次規定係幾時？同樣喇，如果你而家冇呢個細節，或者遲啲畀番我哋。

陳英傑先生：（經傳譯員）我哋會之前畀番個具體日期畀你。

陳政龍先生：（經傳譯員）好喇，咁然後喺 2016 年就有三宗嘅巴士意外，喺嗰個巴士門嗰度就爛咗玻璃，咁就導致有人受傷嘅，乘客受傷嘅，咁因為呢啲事故喇，咁又額外加裝咗一條防護杆喺嗰個巴士門嗰度，咁就係因為呢啲事故就安裝咗呢個新嘅安全設施...

主席：（經傳譯員）同樣喇，而家亦都變成係專營巴士嘅標準設備嚟嘅，又係喇，第一次規定係幾時？

陳英傑先生：（經傳譯員）係喺個意外之後㗎，我可以講嘅就係話自此之後，所有嘅巴士都係加裝咗呢啲嘅防護欄杆，咁就全部喺 2007 年 6 月嘅時候完成加裝嘅，2017 年 6 月完成加裝。

主席：（經傳譯員）好，唔該。

陳政龍先生：（經傳譯員）2017 年 12 月 22 日，有宗導致死亡嘅巴士交通意外，就喺深水埗，就有三人死亡，亦都有乘客受傷，咁亦因為呢次嘅交通意外，運輸署就檢討咗巴士車長嘅有關於佢哋工時、午膳同埋休息時間嘅指引嘅，咁亦都實施咗，啱唔啱，係因為嗰次嘅事故？

陳英傑先生：（經傳譯員）啱。

陳政龍先生：（經傳譯員）然後喺2018年3月，因為2018年2月大埔嘅交通意外之後，咁就成立咗加強專營巴士安全工作小組，等一陣我會再講番成立呢個工作小組嗰個時序喇，不過或者我首先問你，就係我哋頭先已經係睇過喇，睇嚟似乎都係相當有用嘅一連串嘅安全設施，咁多年嚟一路都施加咗喇，咁有冇咩嘢理由，點解喺意外發生之後先至實施呢啲安全措施，唔係喺意外發生之前已經咁做，有冇咩嘢原因係咁樣？

陳英傑先生：（經傳譯員）我哋要求巴士公司提供有效率嘅服務，咁亦都要提供裝置妥善嘅巴士嚟服務市民，我哋一路都監督住巴士公司嘅表現，當然包括埋佢哋用嘅設備、用嘅巴士等等，咁當然喇，一般如果提供服務，又冇咩嘢大事發生嘅話，咁我哋當然就會假設巴士公司嘅營運妥善。咁喺我哋個機構裏面有一個制度，等我哋可以持續監督住巴士嘅運作，咁如果有任何嘅情況發現係巴士有啲咩嘢--巴士公司提供服務有啲咩嘢大嘅問題，咁運輸署就會主動跟進嘅。我必須講，嗰啲意外事故係好不幸嘅事故，我哋唔想見到發生，咁但係運輸署係一路持續密切咁監督住巴士運作嘅，咁如果我哋發現有任何巴士事故，或者有啲特別具體類型嘅意外同巴士有關，我哋都會同巴士公司傾，係咪可以再施加啲咩嘢嘅設施或者係裝一啲咩嘢裝置，避免呢啲意外再發生，咁我相信咁係一個負責任嘅態度，確保巴士服務係安全㗎。

主席：（經傳譯員）你可唔可以指出一啲嘅安全施設係喺冇發生意外嘅時候就已經提出要做嘅呢？

陳英傑先生：（經傳譯員）除咗話監督巴士嘅服務之外，我哋都會睇下世界各地發生緊咩嘢事嘅，係有幾年前我哋其實就發現或者留意到有啲巴士發生火警。

主席：（經傳譯員）係個巴士引擎著火？你係咪咁嘅意思？

陳政龍先生：（經傳譯員）係喇，即係喺巴士行駛嘅時候，喺巴士上面著火，咁但係可能係因為其他原因，即係有其他情況㗎，咁總之係因為咁樣，我哋嘅車輛安全嘅標準部做咗啲研究，睇下我哋可以做啲咩嘢防止呢啲情況出現，咁喺嗰次嘅檢討之後，我哋就要求巴士公司喺所有巴士都要有滅火嘅設備，咁而家已經係巴士嘅一個標準裝置嚟㗎喇。

主席：（經傳譯員）咁即係呢個同樣亦都係因為有發生過一啲火警，然後你做咗啲研究，然後你就係有個規定，就要做滅火設備，我個理解正唔正確？

陳英傑先生：（經傳譯員）係。

主席：（經傳譯員）我問你一個例子，就係話你係喺--有冇施加過任何嘅安全措施，係唔係同之前任何嘅事故相關㗎，如果要諗一諗，咁你可以遲啲先至話番畀我聽，你可以咁樣做嘅。

陳英傑先生：（經傳譯員）我就冇諗過啲乜嘢重大嘅--即係啲特別重大嘅例子喇，咁

但係我哋嘅車輛安全及標準部係會同巴士公司定期開會，係講及巴士嘅維護、保養同埋安全設備等等嘅。咁可能亦都係有啲比較細微嘅事故發生，譬如話喺我哋檢驗巴士嘅時候，可能發現有啲嘅小問題，咁如果我哋留意到，我哋會同巴士公司傾，又要求佢哋要注意或者採取啲補救行動，有啲例子就係譬如有時我哋檢驗巴士嘅時候，發現漏油，喺巴士嘅某一部分漏油，又或者喺個車底盤嗰度就生銹，咁呢啲情況都唔會話引起意外嘅，咁但係呢啲小毛病積累落去就可能最後會導致車輛發生故障，對乘客造成不便。咁雖然呢啲情況唔係好嚴重，但係我哋都會同巴士傾嘅，咁如果我哋發現有呢啲咁比較巴士上面細微嘅瑕疵，咁我哋唔單只淨係同相關嗰一間巴士公司傾，我哋亦都會話埋畀其他巴士公司聽，等佢哋都知道，因為佢哋都係用緊類似嘅巴士型號嘅，咁所以我哋係會做檢驗，然後就監督住情況，睇下啲巴士上有啲咩嘢嘅毛病或者瑕疵，我哋就會要求巴士公司採取行動。如果係啲重大嘅事故，好似之前提及嗰啲，當然喇，喺我哋做調查之後，我哋發現有任何嘅方法，技術上可行，可以處理到呢啲問題嘅，我哋就一定會跟進到底嘅。

陳政龍先生：（經傳譯員）好喇，跟住我哋睇成立加強專營巴士安排工作小組嘅過程，我就會跟時序咁樣去處理。或者首先就睇番立法會運輸事務委員會嘅會議紀錄，喺今年2月15號開始嘅。

主席：（經傳譯員）如果係由時序開始，咁係咪首先應該睇2月12號區議會嘅會議開始先？

陳政龍先生：（經傳譯員）係。

主席：（經傳譯員）因為嗰次會議就係運輸署署長有出席嘅。

陳政龍先生：（經傳譯員）係，嗰份文件就係DC2號文件夾，782頁。

主席：（經傳譯員）係。

陳政龍先生：（經傳譯員）咁你睇到喇，喺呢一份文件翻辯嘅第1頁係782頁，呢個係大埔區議會2月12號2018年開會嘅會議紀錄。783頁，陳女士，即係運輸署署長係有出席呢個會嘅。784頁你都睇到，討論嘅話題就係大埔道發生嘅交通意外，我就唔會詳細睇呢一份嘅會議紀錄喇，咁我就撮要嚟講，區議員都係表達咗唔同嘅意見，而運輸署嘅署長今朝都係同我哋講過㗎喇，佢都係有考慮到表達過嘅意見。

主席：（經傳譯員）好，睇下第8段，陳女士係喺呢度發言嘅，佢話第一步會做嘅就係運輸署叫咗九巴去提交一份交通意外嘅報告書，儘快，而九巴亦都係答應喺一個月內提交呢份報告。咁當時就係已經公布咗我哋呢個委員會係會成立嘅，表示咗。咁最後嗰四行就話署長亦都係知道大埔區議會有一個共識，就係關於大埔區同埋相關路段佢哋以前都係表達過關注嘅，佢話就會同幾個部門緊密咁樣合作。我記得運輸署署長仲係稍後係有提過呢啲類似嘅論點，咁你記唔記得喺邊？喺第34段。

陳政龍先生：（經傳譯員）798 頁。呢度就想撮要下，就係運輸署長喺呢個會裏面講咗咩嘢呢，第一，首先就係嗰個嘅車長要考駕駛嘅試喇，咁另外就係運輸署會係檢討香港道路嘅安全同埋車速限制喇，咁就係話會成立一個小組，呢個就係陳女士喺當時所提到嘅各點。

主席：（經傳譯員）值得注意嘅就係喺羅馬數字第 ii 段嗰度就係話運輸署就係會不時咁樣檢討香港道路嘅安全同埋時速限制，呢個都係一個比較一般嘅講法喇，咁雖然話嗰個發生意外嘅嗰個地段唔係一個交通意外嘅黑點，部門都係會考慮一啲改善嘅措施，因為考慮到過往嗰啲意外嘅性質同埋數目喇，嗰個道路設計、環境同埋對於車長嘅影響，咁當然後來就係一如佢講咁發生咗喇，咁我諗你最後一點就係講緊下一個日子喇，就係立法會開會嗰日。

陳政龍先生：（經傳譯員）係喇，喺 SEC-3，1342 頁。陳生，你有冇嗰份文件？

陳英傑先生：（經傳譯員）我而家係望住個螢幕㗎。

陳政龍先生：（經傳譯員）134--1340 頁，係立法會交通事務委員會特別會議，日子係 2018 年 2 月 15 號。下一頁，1343 頁，喺最底嗰度近紙尾嗰度，就係睇到運輸署署長陳女士有出席嘅。咁我唔會話同你一路講嗰個嘅會議討論，咁不如我哋直接就去到 1360，就係佢哋嗰日通過嘅一啲動議。嗰個動議就係話委員會懇請政府--速請政府，係要求專營巴士嚟到係檢討佢哋車長嗰個嘅編制喇，佢哋工作時數、休息時間、食飯時間等等，咁亦都係要強制咁樣喺定期咁有一啲嘅訓練，咁呢個就係包括兼職同埋係全職嘅司機佢哋嘅駕駛態度等等。咁第一個嘅議程就係一啲工作嘅指引同埋訓練。

第二個嘅動議就話用一啲防滑嘅路面喇，鋪設防滑嘅物料喇，係要有多啲嘅警示牌同埋係有一啲即係規管呢個車速嘅一啲偵測嘅攝錄機等等。第三就係要睇下有咩嘢嘅方法係進一步加強巴士嘅安全裝置，包括係對一啲高危嘅座位係多啲安裝番呢個安全帶，同埋係分階段強制乘客要纜安全帶，咁就要喺一啲巴士--喺車長外面嘅位係裝一啲嘅攝錄機，仲要改裝一啲嘅限速器，就確保喺啲高危嘅路段就係會小心啲嚟到去駕駛，咁就減少喺意外嘅時候乘客嘅傷亡。咁第三個嘅動議就係關於安全，喺車內一啲安全裝置嘅安裝或者措施同埋關於安全帶嘅問題。

咁按時序，下一件事就係九巴就大埔呢一個意外向運輸署提交呢一個調查報告，呢個係 2018 年 3 月 23 號嘅事。呢個就係九巴一嘅文件第 98 頁，我就而家唔會係進入呢份文件度討論，不過我就知道係嗰一日嚟到係提交咗報告，我稍後會講番佢嘅。

主席：（經傳譯員）冇問題。

陳政龍先生：（經傳譯員）講到城巴講嗰個報告，咁就係工作小組嘅一次會議喇，就係 2018 年 3 月 13 號第一次嘅會議。好喇，我未講嗰個會議紀錄之前，想講下嗰個會議議程就喺 CTB-3 第 588 頁。我就想請你係備悉呢一個嘅議程，喺議程

嗰個主要嘅項目就係去討論呢個工作小組個工作範圍同埋成員。呢一個嘅議程係冇日子嘅，咁你記唔記得呢個議程係幾時發出？係九巴交咗報告書之前定之後嘅事？

陳英傑先生：（經傳譯員）你講呢個會議？

陳政龍先生：（經傳譯員）呢個會議係3月13號，咁估計應該個議程喺會議之前係提交。咁九巴嗰個嘅調查報告就喺3月12號交畀立法會嗰個嘅事務委員會。

陳英傑先生：（經傳譯員）咁我諗我要去查一查先知道確實嗰個日子。

主席：（經傳譯員）唔好意思，我就打一打岔，應該係有一封信咁樣附隨呢一個嘅議程？

陳英傑先生：（經傳譯員）我哋唔記得到底用係電郵或者係用信嚟到係寄出。

主席：（經傳譯員）咁無論如何，都係有紀錄㗎，係咪可以？

陳英傑先生：（經傳譯員）係有㗎。

主席：（經傳譯員）咁你可以幫我哋去查一查，再話番畀我哋聽。我哋未繼續之前，我想知道專營巴士公司係你哋幾時去接觸佢，係關於要佢哋參與呢個工作小組嘅呢，你哋幾時去接觸佢哋嘅呢？

陳英傑先生：（經傳譯員）我而家就講唔到確切嘅日期，不過應該係會預先通知咗呢啲公司會有一個工作小組。

主席：（經傳譯員）係喇，咁估計你就會問佢哋「你打唔打算參加呢個工作小組」？

陳英傑先生：（經傳譯員）係。

主席：（經傳譯員）你唔記得幾時？

陳英傑先生：（經傳譯員）我唔記得嗰個確實嘅日子。

主席：（經傳譯員）咁你記唔記得係邊個邀請佢哋，係咪你？

陳英傑先生：（經傳譯員）唔係我自己個人去同佢哋講。

主席：（經傳譯員）唔係你，咁有冇運輸署任何嘅代表而家喺度嘅，在座嘅係去負責聯絡巴士公司嘅呢？

陳英傑先生：（經傳譯員）應該唔係今日在座嘅代表喇，不過係辦事處嘅其他職員。

主席：（經傳譯員）好，咁你可唔可以幫我哋去查下有冇一啲嘅電郵或者係書信嘅往來，等我哋知道呢個工作小組係幾時嚟到去成立？

陳政龍先生：（經傳譯員）好喇，咁我哋去第一次會議嘅紀錄，就係 KMB-12，嗰個

頁數就係 469-1--係 4869-1。陳生，可唔可以同你確認你而家係搵到嗰一份文件，係 KMB-12，4869-1，4969-1。係應該會議紀錄嘅第 1 頁。

陳英傑先生：（經傳譯員）搵到。

陳政龍先生：（經傳譯員）我可唔可以確認你係有呢個工作小組 2018 年 3 月 13 號第一次會議嘅會議紀錄喺你面前？

陳英傑先生：（經傳譯員）係。

陳政龍先生：（經傳譯員）你睇下出席嘅人吖，第 1 頁。第 2 頁，4869-2，喺開場白嗰段係關女士，佢係就係助理運輸署署長，佢就係呢一個工作小組嘅召集人。由頭數落去第六行，召集人就話工作小組嘅會議目標就係去研究、去複檢一啲嘅措施可以係進一步加強巴士安全嘅。我想問，呢啲工作會議--或者呢個工作小組係所有人又或者起碼係巴士公司同埋運輸署喺埋一齊就去研究巴士安全嘅，有冇咩嘢理由，點解咁樣類型嘅工作小組唔係喺大埔嗰次嘅意外之前就成立？

陳英傑先生：（經傳譯員）因為呢個工作小組就係因為嗰個嘅事件之後特別而成立嘅，喺正常或者平時，運輸署係有其他嘅定期會議同埋其他嘅機制去跟進巴士公司各方面嘅營運嘅，咁呢一個工作小組係有一個特定嘅目標，有一個特定嘅目的就係調查嘅，咁所以我哋成立咗呢個工作小組喇。咁所有嘅專營巴士公司同埋運輸署相關嘅組別都係有介入。

主席：（經傳譯員）咁邊一個會出席嗰啲其他嘅定期會議？

陳英傑先生：（經傳譯員）運輸署有好多其他嘅定期會議同專營巴士公司開嘅。

主席：（經傳譯員）一定係有喇，或者叫做一啲嘅場合會唔會有啲專營巴士公司好高層嘅管理人員係一齊出席嘅呢？

陳英傑先生：（經傳譯員）有嘅，我哋定期都會同巴士公司嘅高層管理人員有一啲嘅會面嘅機會嘅。運輸署嘅代表應該就係助理署署長，佢係負責巴士同埋鐵路嘅營運嘅，而呢個會議佢哋嘅對口單位就係巴士公司喇，佢哋就係嗰啲嘅營運總監。

主席：（經傳譯員）唔係嗰個管理...

陳英傑先生：（經傳譯員）唔係嗰個管理嘅總監。

主席：（經傳譯員）因為其實係有一啲嘅分別嘅，因為呢個工作小組同埋以前嘅--唔係由公司最高級嘅人嚟到去參與嘅咩？

陳英傑先生：（經傳譯員）佢有啲好重要同埋好特定嘅項目係要討論嘅，咁係要由嗰啲非常之高層嘅管理人員做決定嘅，咁應該係有啲咁嘅會議。

主席：（經傳譯員）咁可唔可以畀我哋類似呢啲會議嘅紀錄，就係話佢哋嘅總監係會有出席嘅？

黃志光先生：（經傳譯員）係，我補充喇，有時呢啲會議係定期，有啲就係就一啲特定嘅事嚟成立嘅，咁你睇到呢一個嘅工作小組嘅成員喇，陳先生就係提到蘇先生喇，咁仲有一個，佢係嚟自九巴㗎喇，仲有鍾先生，佢就係新一巴嘅，咁我哋其實係夥伴嘅形式，我哋有不同嘅會議，討論不同嘅事項，好似陳生咁講，咁有時我哋有啲定期嘅會議係講安全嘅。

主席：（經傳譯員）我個問題係非常之有針對性嘅，就係關於安全嘅，咁嗰個嘅營運總監李先生，佢幾時係試過同你哋開過會？呢個就係城巴嗰個嘅總監，咁佢有冇同你哋開過會？幾時？有冇咁樣類似嘅會議係講到安全嘅，係由呢啲公司最高層嘅人嚟到去出席嘅呢？

陳英傑先生：（經傳譯員）主席，即係巴士及鐵路部嘅常規會議，即係同嗰啲巴士公司代表，即係好似蘇先生或者鍾先生等等，佢哋就係由佢哋公司授權係去做一啲營運嘅決定嘅，咁呢個就係我哋定期嘅會議去討論所有關於車務，包括係安全嘅事宜嘅，咁而嗰啲會議所作嘅決定都係會即係由佢哋相關嘅公司係去授權或者係同意嘅，所以就冇一啲特別嘅就係會涉及佢哋嘅董事總經理嘅。

主席：（經傳譯員）咁所以個問題係咪即係唔會，即係根據你同我哋所講？

陳英傑先生：（經傳譯員）係，通常都唔會嘅。

陳政龍先生：（經傳譯員）喺會議紀錄嘅第2段就講到委員冇反對成員嘅組成同埋工作小組嘅工作範圍，咁就係提到附錄嘅，咁而附錄就係喺4869-6頁或者-9頁嘅。咁工作範圍嘅第一項就係來檢討培訓嘅安排，呢個就係立法會喺4月15號交通事務委員會所通過嘅動議嘅內容。咁而工作小組嘅第二項工作範圍就係去檢討喺所有嘅座位安裝安全帶嘅技術可行性、成本效益同埋其他嘅事宜嘅，咁而該項動議，即係立法局交通事務委員會所通過嘅動議亦都有提到安裝安全帶嘅。第三就係探討安裝車上安全裝置嘅技術可行性、成本效益同埋其他嘅事宜，咁呢個亦都係立法會嗰項動議入面提到嘅。

主席：（經傳譯員）首先喺a項就係乘客嘅車速顯示儀，咁呢個係咪動議入面提到嘅呢？

陳政龍先生：（經傳譯員）冇特別提到呢一個裝置嘅。

主席：（經傳譯員）咁其他嘅項目係咪都有提到？

陳政龍先生：（經傳譯員）咁車速限制器嗰個車速上限係有提到嘅，冇提到其他嘅事項...

主席：（經傳譯員）睇番立法會會議紀錄嗰項動議係咪就可以睇到，係咪可以向我哋確認？

陳政龍先生：（經傳譯員）係，可以嘅。我嘅問題就係呢個係咪--即係呢個工作小組嘅工作範圍就係受呢一個嘅立法會嗰項動議所影響，係咪？

陳英傑先生：（經傳譯員）我唔同意。呢個會議紀錄入面嘅工作範圍係相當詳細嘅，咁喺第三項你見到係有好多分項，係有非常之針對性咁樣提出我哋會睇嘅裝置嘅，咁喺成立呢個工作小組之前，我哋已經做咗好多準備工作去探討我哋可以做啲乜嘢係去幫助到巴士車長同埋可以安裝啲乜嘢有用嘅裝置。咁我哋即係研究咗嘅結果就係加咗入去呢一個工作範圍入面嘅。其中一啲項目可能係由公眾建議或者係由立法會議員去建議，或者係其他人士建議嘅。咁但係就住喺巴士安裝安全裝置，即係如果你講安全帶嘅話，當然大家都知道安全帶係會有幫助，咁所以包括埋佢都合理嘅。咁至於車展嘅培訓方面，即係如果巴士車長嘅培訓不足係可能會引致意外，咁當然我哋喺工作小組係應該探討嘅，咁所以我哋係即係做咗一啲研究係決定去即係傾啲乜嘢嘅，咁我諗呢個係一個負責任嘅做法。如果我哋淨係開會就有啲巴士公司係提出乜嘢都可以，而我哋唔講一啲特別嘅措施嘅話，即係我哋喺未開始工作小組工作之前，我哋已經做咗功課，咁樣我哋喺日後嘅會議就可以更加集中討論，咁我哋希望係可以做到一啲嘢嘅，透過呢個工作小組。

主席：（經傳譯員）即係關於呢啲安全裝置嘅研究係咩嘢時候做嘅呢？

陳英傑先生：（經傳譯員）咁大部分嘅研究都係大概係2月嘅時候做嘅。

主席：（經傳譯員）即係話喺大埔意外之後做嘅？

陳英傑先生：（經傳譯員）你可以咁講。

主席：（經傳譯員）你會唔會咁講？

陳英傑先生：（經傳譯員）係。

主席：（經傳譯員）唔該晒。

陳政龍先生：（經傳譯員）我想比較一下呢一啲安全裝置同埋調查報告入面所講嘅安全裝置，咁呢個報告係即係喺前一日就係公布嘅，咁我想你睇下 KMB-1 文件冊嘅 114 頁，同埋同時間繼續睇 4609 頁嘅。KMB-1 文件冊 114 頁，114 頁，係，KMB-1 文件冊 114 頁。咁呢個係九巴調查報告嘅第五部分，咁呢個就係喺18 年 3 月 12 號呈交畀運輸署嘅，咁而喺九巴就提到一啲其他改善巴士安全嘅措施。喺安全裝置方面，你見到第 41 頁九巴就有提到呢個電子穩定程底，或者可以叫做電子穩定控制系統。咁如果你同呢一個工作小組工作範圍比較，即係喺 4869-9 頁就係 c 項嘅，咁喺第 42 段，喺九巴嘅調查報告第 42 段，喺 114 頁，咁就講到地理圍欄，咁就對應由全球定位系統輔助嘅車速控制。

主席：（經傳譯員）你同唔同意兩者係講緊同一樣嘢？

陳英傑先生：（經傳譯員）係，我可以咁講嘅。

Transcript by Epiq Hong Kong, Limited

陳政龍先生：（經傳譯員）另外就係車速限制，就係由全球定位系統輔助，咁呢一個就係喺呢一個安全裝置嗰個清單嘅d項嘅。咁喺下一頁嘅45段，九巴就提到限制車速呢個問題，咁就有一個減速嘅系統，咁唔單只淨係隔斷呢個燃油嘅，咁呢個亦都係喺工作小組喺3e段提到嘅。咁喺47段，九巴嘅研究報告就講到話係即係監察車長瞌眼瞓嘅情況，咁而工作小組同樣係喺第3g段係有提到呢一個安全裝置嘅，即係喺呢個工作範圍嘅文件之中。咁我有一個即係一般性嘅問題，咁我哋見到九巴考慮嘅措施同埋工作小組工作範圍入面嘅安全裝置係非常脗合嘅，之前運輸署同埋九巴有冇係傾過即係考慮安裝啲咩嘢安全裝置，同埋即係會喺個議程上面包括啲乜嘢？

陳英傑先生：（經傳譯員）我嘗試答呢個問題，早前我就提到喺工作小組會議之前，運輸署係做咗一啲研究，就係關於可以喺車上安裝咩嘢裝置去幫助啲司機同埋改變車輛嘅安全嘅，咁喺進行嗰啲研究嘅時候，同時我哋亦都有同巴士嘅製造商對話，咁呢個係一個合理嘅做法嚟嘅。

主席：（經傳譯員）即係你答一個好長嘅答案之前，你可唔可以先回答呢個問題，運輸署之前同九巴有冇傾到究竟喺個議程上面應該寫啲咩嘢？有定係冇，或者你唔知道？

陳英傑先生：（經傳譯員）冇。

主席：（經傳譯員）好，請你繼續。

陳英傑先生：（經傳譯員）我就想講一講即係個背景，我哋進行研究嘅時候，我哋係有接觸一啲巴士嘅製造商，咁主要係三大嘅巴士製造商喇，就係我哋有同佢傾過即係包括係ADL、Volvo同埋MAN呢五間公司，我哋有同佢傾過點樣可以改善啲巴士嘅安全，咁就喺改善巴士安全方面，其實做嘅嘢係有限，即係冇咩嘢係新嘅，我哋知道喇，巴士公司亦都知道，我唔知佢哋有冇同啲巴士製造商係傾過去做一啲一樣嘅事情，咁但係對我嚟講，我哋喺2月就有做...

陳政龍先生：（經傳譯員）陳先生，總括可唔可以咁講呢，你做咗--即係你自己一個獨立嘅研究，你唔知九巴有冇做獨立研究喇，咁但係就即係咁啱，咁巧合你哋得出嘅安全裝置嗰個清單都係一樣嘅？

主席：（經傳譯員）因為相關嘅安全裝置嘅數目都係有限嘅？

陳英傑先生：（經傳譯員）冇錯，咁而九巴--即係九巴建議嘅事項唔係所有都有喺我哋個清單上面，咁所以即係佢哋認為係--即係有啲嘢佢哋認為應該做嘅。

陳政龍先生：（經傳譯員）咁我想你睇番會議紀錄嘅第3段，就係4869-2頁第3段嘅。第3段就話就住呢個建議嘅工作範圍，九巴龍運進一步就建議係包括四個其他方面嘅，即係就住襲擊車長--包括襲擊車長、巴士站違泊，塞車令到即係巴士車長嘅疲勞加劇同埋壓力，同埋巴士站嘅安排嘅。咁第4段就有運輸署嘅回應，咁我想講下一頁最屘第六行，咁會議紀錄就話因為工作小組嘅時限只

有三個月，咁會員同意工作小組應該係著重討論附錄入面嘅建議工作範圍，咁而附錄就有提到呢個工作範圍係乜嘢。咁可唔可以咁樣理解，當時工作小組有限嘅工作時間就即係反映喺工作小組嘅工作範圍唔應該傾九巴提出嘅改善安全建議喇，可唔可以咁樣去理解？

陳英傑先生：（經傳譯員）當時嗰個目標係完成工作小組嘅工作同埋調查，同埋得出一啲嘅建議，咁所以時間只有三個月係非常之緊張嘅，所以當時我哋係想著重處理呢一啲重要嘅事項。咁我哋嘅意思就唔係話其他事項係無關。

主席：（經傳譯員）咁但係你個答案就係「係」，係咪？即係但係九巴嘅--你話九巴嘅建議係唔會考慮，因為時間緊絀，係咪？

陳英傑先生：（經傳譯員）係，冇錯。我哋亦都提到--即係向巴士公司提，即係呢啲問題可以喺其他嘅會議或者峰會上面去傾，唔一定要喺呢個工作小組度傾嘅。

陳政龍先生：（經傳譯員）咁喺當時，呢個工作小組嘅時限--即係點解會有一個有限嘅工作時限？咁當時點解--即係決定呢個工作小組只係一個三個月嘅工作小組，而唔係一個常規嘅小組，當時嘅諗法係點？

陳英傑先生：（經傳譯員）當時我哋係想儘快得出一啲嘅建議，咁所以三個月係合適嘅呢個長度，就去完成我哋訂立嘅工作範圍。

主席：（經傳譯員）點解要儘快去得出一啲嘅措施？點解咁有逼切性？

陳英傑先生：（經傳譯員）我諗個原因就係有一個嚴重嘅巴士意外喇，咁而運輸署就係希望同巴士公司合作去制訂--即係儘快制訂一啲補救措施，目的就係去避免日後有同樣嘅意外發生嘅，咁當然呢一啲嘅項目唔能夠係即時去實行，但係我哋係儘量係儘快去完成嘅。

主席：（經傳譯員）咁換句話講，當時就係回應--因為區議會、立法會等等，或者係公眾都係對呢一個事件係有好大嘅關注嘅，即係呢一個 2 月 10 號嘅意外，所以係咪因為咁，好有逼切性？

陳英傑先生：（經傳譯員）我會話呢個係其中一項原因。

主席：（經傳譯員）即係你想畀人哋知道你係做緊一啲嘢，係咪？

陳英傑先生：（經傳譯員）唔係嘅。

主席：（經傳譯員）陳大律師。

陳政龍先生：（經傳譯員）主席，呢個謄本入面有講到呢一個工作範圍嘅，咁呢個就係 KMB-12 文件夾 4939 頁開始嘅，咁但係我就唔會詳細講，咁但係個頁數就喺呢度。

主席：（經傳譯員）請你畀少少時間我，因為我想知道你講緊乜嘢嘅。呢封信函就係

經九巴嗰個「購物清單」喇，我會咁叫佢喇。

陳政龍先生：（經傳譯員）係，冇錯，佢哋有四輪嘅溝通嘅，同運輸署，就係由4939頁開始。

主席：（經傳譯員）好，唔該。

陳政龍先生：（經傳譯員）陳生，我想你而家睇番第一次會議嘅會議紀錄，請你睇第16段，4869-6頁。陳生，呢度第16段講嘅就係安全帶嘅問題，或者我遲啲先至再獨立講安全帶呢個問題，但係而家即係純粹係從時序嘅角度睇，呢個問題就係第16段嗰度引申出嚟嘅，第16段我或者讀出嚟喇，就係「巴士同埋城巴質疑所有座位都安裝安全帶嘅實際可行性，即係用呢一個嚟加強乘客嘅安全，因為其實要巴士車長確保所有乘客都上咗車真係有戴安全帶都有困難嘅，而且新巴同城巴都提出個關注，就係話如果企喺度嘅人，係咪又係需要安排安全帶呢？咁運輸署就話係全面檢討過，有呢啲咁嘅提出，就係因為喺交通意外之後，全面檢討過喺巴士安裝安全帶嘅問題嘅。」咁喺呢一段嗰度提及話有啲要求係唔只乜嘢嘢？我哋知道喺立法會嘅運輸署事務委員會會議上通過咗啲動議，就係話要喺巴士安裝安全帶，咁呢個就係呢次會議之前一個月提出嘅動議嚟嘅，咁所以呢啲嘅要求係指立法會交通事務委員會提出嗰啲要求吖，定係其他要求？

陳英傑先生：（經傳譯員）我諗你所提及嘅即係立法會要求話安裝安全帶...

主席：（經傳譯員）請你可唔可以直接對住個咪講？

陳英傑先生：（經傳譯員）係，我相信立法會議員提及話安裝安全帶呢個其中一個要求喇，咁但係我哋就好難好具體咁講話係喺邊一次會議就提出呢啲嘅要求，因為我哋有同新聞界，同其他人都有見過，咁我哋都有留意係有提過安全帶呢樣，就要求我哋要去研究嘅。

主席：（經傳譯員）請你繼續。呢合有個提及，就係話大埔嘅交通意外喇，咁仲有話有其他嘅交通意外嘅，咁指嘅係邊啲其他嘅交通意外？

陳英傑先生：（經傳譯員）我諗其實主要都係講嗰一宗嘅交通意外。

主席：（經傳譯員）所以呢度用咗交通意外眾數係錯㗎，係嘛？係指嗰個交通意外？

陳英傑先生：（經傳譯員）我相信係指一般嘅講法，就係提及交通意外，冇話特別講邊一宗交通意外，但係大埔交通意外只係其中一個帶出呢個問題嘅意外嚟嘅啫。

主席：（經傳譯員）好，唔該。

陳政龍先生：（經傳譯員）下一個事項，或者喺個時序裏面下一個事項我想講就係發表一個電子地圖，即係意思電子地圖上面有時速限制加咗落去，喺呢方面第一份我想請你睇嘅文件就係TD-1號文件冊366頁。喺你面前，陳生，應該係睇

到一封電郵，請你先睇電郵嘅底部 366 頁嗰度喇，呢封電郵係委員會秘書署寫畀運輸署 Tony KT。

主席：（經傳譯員）個電郵日期係幾號？

陳政龍先生：（經傳譯員）2018年6月1號，喺366頁底部會見到嘅。咁呢封電郵其實個內容就喺 367 頁嗰度出現嘅。由上數落去第 2 段，就從個聽證會嗰度知悉，城巴同新巴已經係裝住黑盒嘅系統，係會自動做呢個超速嘅報告嘅，即係話如果司機駕駛個時速係超過咗 70 公里嘅話，咁而至於話嗰啲巴士公司管理層會唔會有資料知道話譬如喺嗰個駕駛路段幾多嘅百分比，即係新巴同城巴嘅巴士係嗰個法定嘅時速係 50 公里嘅，咁而係又係以上提及嗰二十五個路段有包含嘅，咁喺回應嘅時候，新巴同城巴就話佢哋冇呢個數字，因為佢哋話佢哋冇全套嘅電子數據係顯示晒香港所有路段嘅時速--所有道路嘅時速限制嘅，咁但係就同意交畀委員會一份嘅電子地圖係顯示佢哋喺邊啲道路上面佢哋嘅巴士有運作嘅。

咁喺呢一方面，我就想請你協助委員會提供一啲電子地圖係顯示香港所有道路嗰個法定時速限制嘅，咁等我哋委員會可以比較呢啲嘅地圖，即係呢啲地圖新巴同城巴將會提供畀我哋㗎，咁呢個就係 2018 年 6 月 1 號嘅電郵。咁跟住運輸署就寫咗信畀各間巴士公司，就喺 6 月 7 號，即係出咗電郵之後幾日喇，咁呢度就係 TD-1 號文件冊，4077 頁--或者係 477 頁。請問你而家睇唔睇到運輸署寫畀巴士公司--各間巴士公司嘅信件，日期係 2018 年 6 月 7 號，陳生，你面前睇唔睇到呢封信？

陳英傑先生：（經傳譯員）係，睇到。

陳政龍先生：（經傳譯員）喺呢封信嗰度第 2 段，運輸署就話「我好高興通知你有關於時速限制嘅數據，即係運輸署所管理嘅道路系統--嘅網絡裏面，咁已經係可以喺 data.gov.hk 呢個網頁嗰度下載嘅」。咁然後第 3 段你就話畀啲巴士公司聽「你哋可以利用呢啲嘅數據，即係地理資訊系統嘅數據，GIS 嘅數據嚟去探討點樣可以控制時速，用全球定位方式或者係地標圍欄方式，咁你可以同你哋嘅巴士製造商去討論呢個問題，然後進行有關嘅測試」。有冇咩特別原因點解運輸署會寫信畀巴士公司，特別請佢哋留意話有關於一個時速限制嘅電子地圖，其實係已經有嘅，咁你係要等到我哋委員會問有冇呢啲資料嘅時候，你先至寫信畀巴士公司，兩者之間有冇關運嘅呢？

陳英傑先生：（經傳譯員）嗰封信嘅日期係 6 月 7 號寫畀巴士公司，各間，我哋出呢封信，因為城巴話--我諗佢哋係--我相信佢哋係唔知道呢啲嘅地圖數據係已經存在嘅。

主席：（經傳譯員）呢個喺委員會寫嘅信裏面已經有提及喇，咁係咪冇乜可能佢哋唔知道？

陳英傑先生：（經傳譯員）我假設城巴係唔知道，所以點解我哋寫信畀佢哋，提醒佢

Transcript by Epiq Hong Kong, Limited

啲有關嘅數據其實已經存在。

主席：（經傳譯員）咁即係話係因為喺研訊裏面提到，咁跟住就運輸署就再寫信話畀佢啲聽有呢個數據，雖然其實呢個資料喺我啲個聽證會謄本已經有㗎喇，係咪咁解？

陳英傑先生：（經傳譯員）我相信係有咁嘅關連嘅。

主席：（經傳譯員）好，唔該，我覺得咁亦都係完全合理。

陳政龍先生：（經傳譯員）好喇，咁我啲繼續，陳生。喺3月、4月、6月都開過好幾次會--一連串嘅會議喇，咁我一陣就會再返嚟講話嗰個安全帶嘅問題，咁但係喺呢個階段，我想繼續跟住個時序去到2018年7月25號嗰個日期相關嘅，因為我啲有一個會議，係立法會交通事務委員會嘅會議，咁而運輸署喺開嗰次會之前準備咗一份文件嘅，呢份文件就喺TD-1號文件冊，403頁。呢份係簡介文件，為嗰個交通事務委員會嘅會議準備嘅。咁我有幾個問題就住呢份文件想問你嘅，咁但係嗰啲問題就已經--原本係準備問你，但係而家因為工作小組已經出咗報告喇，所以就唔需要問喇，琴日下晝你就交咗呢份報告畀我啲喇，咁所以我就會從嗰個工作小組報告裏面去提出呢啲問題嚟問你。主席，我嗰份報告就未有編頁碼嘅，咁但係為咗紀錄，咁呢個就係TD-5號文件冊，1757頁嘅。

主席：（經傳譯員）係邊一段，你想講？

陳政龍先生：（經傳譯員）首先我講嗰個撮要喇，第5節，撮要第5節文件，即係個報告嘅。主席，我首先想請你睇嗰個建議嘅撮要，就係第五章。

主席：（經傳譯員）係，我啲有喇。

陳政龍先生：（經傳譯員）佢嗰份報告本身嘅頁數就係41頁。陳生，喺5.3段，處理嘅問題就係建議喺車內安裝嘅安全裝置，就話由2018年7月2號採購嘅新雙層巴士都需要裝有嗰個電子穩定控制系統，同埋第二就係時速限制器--車速限制減速器，咁就即係話專營巴士公司就要首先就係處理啲新巴士，由現有巴士就係咪安裝嘅問題喇。然後5.5段就係處理一啲會試用嘅一啲安全裝置，睇下又係咪要安裝，咁呢度我啲睇到就係嗰個BMCS喇，即係巴士監控嘅系統喇，同埋就係一啲碰撞警報、換線裝置等等喇，咁呢度又--我想問下喇，點解所有呢度咁多加強巴士安全嘅措施都係喺大埔意外之後先至考慮，唔喺之前考慮？

陳英傑先生：（經傳譯員）呢啲新嘅改善措施或者新裝置都係喺我啲同專營巴士公司同埋巴士製造商傾過之後，覺得佢啲係有用，可以改善巴士安全，因此先至提出呢啲建議嘅。

主席：（經傳譯員）但係個問題係點解呢啲討論即係你唔會喺話大埔意外之前已經同巴士製造商有呢啲討論？

陳英傑先生：（經傳譯員）或者好似我之前都有提到喇，大埔嘅意外其實就牽涉到一連串嘅問題，就話我哋仲可以做啲乜嘢去加強巴士運作嘅安全，咁呢個就係嗰個討論嘅結果，咁所以我哋就係朝呢個方向去。

主席：（經傳譯員）嗰個問題，我諗其實就係譬如話喺立法會、區議會、媒體、公眾都係有提話--係因為有呢啲情況先至即你令到你會去睇呢啲事項，咁講係咪公道？

陳英傑先生：（經傳譯員）係嘅。

陳政龍先生：（經傳譯員）可唔可以特別聚焦睇呢個 BMCS，即係巴士監控系統，巴士監控系統。呢個考慮就係因為科技進步，即係黑盒嗰個科技進步先至會考慮嘅，咁係咪一個公道嘅觀察？

陳英傑先生：（經傳譯員）係，黑盒可以話係一個主要嘅元素喺呢個監控系統裏面嘅。

陳政龍先生：（經傳譯員）係喇，就係因為有黑盒，先至可以令到巴士監控嘅系統可以再有新嘅進步嘅措施？

陳英傑先生：（經傳譯員）係。

陳政龍先生：（經傳譯員）咁運輸署就要求專營巴士公司就今朝嗰份文件--即係睇到2003 年嗰份文件就要求你哋做一啲嘅設施，咁而喺今朝我哋亦都有提及㗎喇，咁就喺嗰個報告 2.2 段，我而家想問一問你嘅。唔好意思，係 2.22 段。我哋今朝都講過呢一樣嘅，就係附件二就係已經更新咗個對黑盒嘅要求，唔係你喇，係嗰個報告書咁講，2.2 話「再者，工作小組就係備悉運輸署最近係檢討過同埋係更新咗電子數據紀錄儀嘅基本要求，咁最初係 2003 年頒布」。咁我想知道嗰個嘅--上一次係幾時檢討呢一個嘅最低要求，同埋點解有咁樣嘅檢討？

陳英傑先生：（經傳譯員）呢個就係檢討嗰啲嘅電子數據紀錄儀裏面嘅--巴士裏面所用嘅佢哋嘅功能喇，嗰個嘅容量喇，咁呢一個嘅檢討就令我哋知道嗰啲黑盒係可以記錄或者係可以幫助我哋加強呢個巴士監控嘅系統，咁我哋就話呢個對於電子紀錄儀嘅--數據紀錄儀嘅基本要求更新咗。

主席：（經傳譯員）對唔住，呢個係因為咩嘢？因為呢一個檢討--因為呢一個委員會？

陳英傑先生：（經傳譯員）係，呢個檢討。

主席：（經傳譯員）唔該。

陳政龍先生：（經傳譯員）仍然講緊呢個巴士監控系統，請你去睇 5.14 段。5.14 段即係報告書裏面就話「再者，運輸署係好希望睇到巴士監控系統嗰個嘅發展同埋試用，因為佢係能夠令到專營巴士公司採納一個更全面嘅方法嚟到去改善巴士安全同埋車隊嘅管理同埋控制嘅。咁除咗呢啲巴士公司喺海外嘅試行之

外，運輸署都係打算請一個嘅服務提供者去做一個獨立嘅試行，喺車輛上面嚟到去評估一下用呢個地理圍欄嘅科技係咪用得到同埋係咪有效，例如去控制車速，咁呢個就係呢一個系統一個非常重要嘅一點。向前望，運輸署係會喺呢啲嘅試行計劃裏面去檢討嗰啲嘅結果喇，咁就進一步同專營巴士公司去商討，係希望發展一個好清晰嘅路線圖，去加強專營巴士嘅監控嘅，咁就係透過呢一個系統」。好喇，我有幾個問題嘅，關於呢個建議，話請一個嘅服務提供者去做一啲獨立嘅測試或者試行計劃，咁我想問喺呢方面聘用獨立服務提供者方面有咩嘢進展？

陳英傑先生：（經傳譯員）我哋而家係申請緊資源，即係錢喇，嚟到去做呢個獨立嘅試行計劃㗎。

陳政龍先生：（經傳譯員）咁即係話而家都仲未係話搵到邊一個嘅服務提供者嚟到做呢一件事嘅？

陳英傑先生：（經傳譯員）未嘅。

主席：（經傳譯員）呢個「服務提供者」其實咩嘢意思？點解㗎，呢個字？係咪一個獨立嘅顧問，定係咩嘢？

陳英傑先生：（經傳譯員）呢個可以向運輸署提供呢個服務，幫我哋做試行計劃嘅一方喇，我再講得具體啲，我哋想聘用香港嘅生產力促進局去幫我哋做呢一個嘅試行計劃嘅，咁但係呢個仲未落實嘅，因為我哋都仲係等緊要有資金先做到。

主席：（經傳譯員）或者你幫一幫手，點解你覺得佢哋有咁樣嘅專材去做呢一件事？

陳英傑先生：（經傳譯員）我哋係試過去搵不同嘅機構去幫運輸署去做一個獨立嘅研究嘅，關於地理圍欄嘅科技，因為我哋想係更加積極主動，做多啲嘅研究嘅，喺呢方面。另外，我哋想有一啲獨立嘅數據去確認，到底巴士公司方面聲稱話佢哋或者佢哋呢一方面嘅發展係真抑或假嘅，咁喺呢一個去搵合適機構嘅過程，我哋就發覺香港生產力促進局就係有呢啲嘅車輛嘅部件喇，有有關嘅系統係喺佢哋嗰個科研中心，我哋同佢哋傾過，咁我哋相信佢有咁樣嘅能力去做呢一個研究嘅。

主席：（經傳譯員）唔該。

陳政龍先生：（經傳譯員）咁從你嘅答案就顯示你仲未有一個嘅確定嘅範圍嘅，係嘛，呢一個--或者你已經係有一啲複稿？

陳英傑先生：（經傳譯員）我哋而家做緊一個嘅項目嘅概要，即係關乎呢一個項目嘅範疇，但係我哋係想分兩階段嘅，首先要試下地理圍欄技術係有咩嘢辦法令到佢嗰個定位能力係更加精準。另外，我哋亦都係想喺其他車輛入面試行下，睇下佢係咪行得通。咁另外我哋如果係有做咗一啲成功嘅試行計劃，我哋就會同巴士公司嗰度傾下，睇下佢可唔可以將呢個技術攏擺喺佢哋嘅巴士上面試下，咁我哋有自己嘅獨立試行計劃，巴士亦都有自己嘅供應商去做一啲差唔多嘅

Transcript by Epiq Hong Kong, Limited

嘢，不過我哋希望可以互相參照，睇下我哋或者佢哋係咪做緊一啲正確嘅事。

主席：（經傳譯員）唔好意思，嗰個測試嘅第一部分係測咩嘢？係咪測嗰一個嘅全球定位系統係咪準確？

陳英傑先生：（經傳譯員）呢啲叫做地理圍欄技術，今日最困難嗰方面就喺香港呢個環境用全球定位系統呢一個應用嘅，咁有好多嘅回應就話佢哋唔係幾準確㗎，咁所以佢哋係要應用地理圍欄技術去提供一個路線方面、道路網絡方面一個更加準確嘅數據，呢個係要試過先得嘅。據我所知，幫九巴同埋城巴做嘅服務提供者都係做緊一啲類似嘅技術，咁結果都係唔錯，但係我哋想有一個獨立嘅測試去核實同埋對呢個技術了解多啲。

主席：（經傳譯員）咁呢個技術就係首先一個全球定位系統，咁然後就係用呢個地理圍欄技術，係咪？

陳英傑先生：（經傳譯員）係。

主席：（經傳譯員）唔該。

陳政龍先生：（經傳譯員）陳生，你係咪有嘢想講？

陳英傑先生：（經傳譯員）唔係嘅。

陳政龍先生：（經傳譯員）陳生，呢度報告書裏面係冇提到一個話類似係聘用一個獨立或者係外聘一個顧問嚟到去試行其他呢度建議嘅一啲器材，咁呢個就係碰撞警報裝置同埋保持行車線裝置等等嘅，我想問，運輸署會唔會都係就其他嘅儀器聘用自己獨立嘅服務提供者或者顧問去試行？如果唔會嘅話，點解？

陳英傑先生：（經傳譯員）我哋都想做多啲嘅，但係現實就係需要有資源先做得到。好似我哋今朝署長咁講喇，我哋而家係想搵一啲資源去成立一個嘅資訊科技組嚟到去做呢一類型嘅研究嘅，暫時我哋所有嘅資源，好似呢一個咁樣嘅項目，我哋都要去申請撥款嘅，如果我哋有足夠嘅資源，我哋當然係想做多啲嘅研究喇。其實喺呢個項目，即係呢個嘅獨立試行項目第二階段我哋就會用呢一個嘅技術去睇下車輛嗰個嘅車速限制，咁就會試行下可唔可以喺一啲嘅路段上面係施加呢一個嘅車速限制器嘅。

主席：（經傳譯員）係講嗰啲車速限制器係咪即係車速限制減速器？

陳英傑先生：（經傳譯員）係。

陳政龍先生：（經傳譯員）陳生，我哋都講完咗運輸署點樣處理呢啲種種提高安全嘅儀器喇，我而家就另一方面想講下倫敦嗰個嘅做法。

主席：（經傳譯員）既然你都要開另一個題目，我哋都係要小休㗎喇，亦都畀陳生休息一陣喇，咁或者我哋而家休息二十分鐘，二十分鐘。

陳政龍先生：（經傳譯員）唔該。

下午4時02分聆訊押後

下午4時22分恢復聆訊

出席人士如前。

主席：（經傳譯員）陳大律師。

陳政龍先生：（經傳譯員）主席，咁我有提到新加坡嘅罰則，請等一等。

主席：（經傳譯員）係。

陳政龍先生：（經傳譯員）文件係形容咗新加坡嘅專營巴士服務，就喺SEC-3文件冊嘅第822頁，呢個就係文件嘅第1頁。唔好意思，應該係SEC-2文件夾嘅822頁。主席，呢一份文件係立法會秘書處研究部嘅資料文件，咁相關嘅部分就係3.19段，就係喺834頁。3.19段，有提到服務質素標準，咁呢一段最後就講到，暫時，即係目前呢一個服務質素嘅標準就包括以下兩類，(a)係營運表現標準，就係量度每日嘅最低或者每月嘅營運嘅標準，咁就包括就係巴士嘅可靠程度、負載同埋安全；咁而3.20段就提出如果唔符合呢啲標準嘅相關嘅罪則。

主席：（經傳譯員）係。

陳政龍先生：（經傳譯員）咁835頁就有一個表，就係服務質素標準，就係有唔同嘅標題。

主席：（經傳譯員）係。

陳政龍先生：（經傳譯員）主席，咁你會見到，喺可靠性呢一個標題底下，第三項，就係巴士故障率，咁個目標就係每個月少於百分之一點五。咁似乎新加坡嘅交通局都係用呢一個巴士服務意外率即係低於某一個數目，即係話每百萬行車公里七點五。

主席： And as we would express that, 7.5 per million kilometres?

陳政龍先生： Yes. And again, page 837 --

主席：（經傳譯員）咁呢個係比香港嘅巴士意外率係高嘅？

陳政龍先生：（經傳譯員）係，純粹係睇嗰個巴士意外率嘅啫。

主席：（經傳譯員）咁呢一個就講到對專營巴士嘅罰則？

陳政龍先生： Yes, that's correct.

主席：（經傳譯員）咁我哋已經問過新加坡嘅陸路交通當局，就我哋有問過佢哋有冇即係畀過呢啲嘅罰款，係咪？

陳政龍先生：（經傳譯員）係，我哋係問過新加坡嘅交通當局一啲嘅問題嘅。

主席：（經傳譯員）咁係咪即係從來未施加過呢一啲嘅懲罰？

陳政龍先生：（經傳譯員）係，冇錯。

主席：（經傳譯員）唔該晒。

陳政龍先生：（經傳譯員）陳先生，喺休息之前，我就希望比較一下香港同埋倫敦嘅做法。首先，我想講一講佢哋所謂嘅智能車速調節系統，即係同我哋嗰個地理圍欄嘅概念係相似嘅，咁我想先你睇下呢一份文件。

主席：（經傳譯員）你同唔同意呢個講法，智能車速調節系統係同地理圍欄係相似嘅，你同唔同意？

陳英傑先生：（經傳譯員）係。

陳政龍先生：（經傳譯員）我想你睇下一份文件，就係 MISC-3 文件冊嘅 939 頁。陳生，你面前睇到嘅應該就係一份報告嘅第 1 頁，係倫敦運輸局所發表，個題目就係智能車速調節設計，日期就係 2009 年 12 月。可唔可以首先睇下呢個報告嗰個引言？咁就可以畀大家有個背景係咩嘢情況，或者去 945 頁。呢度引言--我讀出頭嗰兩段。「ISA 軟件設計嘅制訂就喺 80 年代喺法國開始，咁就自此喺唔同嘅市場都有評估，證實係有效可以減少--減低車速，同埋喺道路上嘅事故。喺 2009 年 5 月，倫敦運輸交通局就開始一個測試，就用最新嘅嗰套智能系統，就希望可以減低車速同埋道路交通嘅意外。咁喺呢個測試之前，倫敦運輸局已經係制訂咗一套全面嘅電子車速限制地圖，即係係所有城市都有㗎，咁總共有三種唔同嘅智能系統嘅模式，而家係有個叫勸喻式，一個係自願式，一個係硬性規定，就強制式。咁如果係勸喻式，就即係顯示嗰個速度限--車速限制畀司機，就通過呢個電子地圖，等司機可以睇到；而自願，就再進一步就係會將呢個車速嘅限制嘅資料，同嗰個汽車嘅引擎管理電子系統係連結喺上嚟，咁喺呢個自願系統之下，如果熄咗呢個設備嘅時候，司機係可能咁選擇咁樣做，咁就變咗嗰個裝置就唔會影響嗰個加速。」咁另外再睇下落幾段就係「到目前為止，佢已經做咗一年嘅呢個計劃，即係倫敦嗰面，咁佢等佢哋可以認識，同埋探討到倫敦司機嗰個駕駛態度，同埋要做呢個系統，有啲咩嘢嘅可能嘅障礙等等。」咁即係話，倫敦交通局就一路睇緊呢套嘅智能系統，智能車速調節系統喇，即係 ISA。

咁第二份文件我想你睇嘅，都係講同一個課題，就係運輸及研究實驗所嘅一份報告，日期就係 2016 年 11 月，喺同一個文件冊裏面，我想你睇 1002

頁。陳生，你面前應該睇到嘅就係 TRL，即係倫敦運輸研究實驗所嘅一份報告，就係話喺倫敦巴士上面，裝咗呢個智能車速輔助系統。咁你睇到嗰個報告個日期，喺上面就係 2016 年 11 月。咁又係嘞，我哋講講呢份報告嘅引言嗰度相關內容，1011 頁。喺中間嗰部分嗰頁，就話嘞，ISA 係咩嘢，咁第一段就描述呢一個智能系統係咩嘢，就同我之前讀出嗰個係好近似。由第二段就係咁講，就話「為呢個即係呢個行人輔助--行人安全行動計劃，我哋管理局就係承諾就會做一個試驗計劃，喺少量嘅巴士上面做，睇下佢呢個係--個科技係點樣應用。咁之後喺 2015 年，倫敦運輸局就係進行咗一個智能系統嘅測試，就喺倫敦巴士上面做，咁就係一間公司 Zeta Automotive 所提供嘅系統嚟。」咁呢個報告日期就係 2016 年 11 月，而嗰個測試就喺 2015 年進行。

而家去 1105 頁，咁都係就係嗰份報告嘅附錄嚟。呢份報告就係講到嗰個試驗計劃，咁日期就係 2015 年 10 月，咁就解釋咗當中發生嘅事。咁 1106 就畀多少少資料我哋嘞，就係話「管理局就做呢個智能車速輔助科技，咁就係主要係喺--即係睇下嗰個--即係外在嘅就係關於嗰個車輛嘅速度，同埋內在嘅資料同埋外在資料就係嗰個車速限制，咁呢度就係已經喺歐洲同埋其他地方有使用，證明都可以改善道路安全，而司機亦都接受。」咁或者係 1120 頁，我哋睇到第二次做試驗嘅日期，就係 2016 年 1 月，就係 1120 頁，同一份報告，就係第二階段嘅試驗。所以呢度就顯示，呢個 ISA 系統就係倫敦嘅運輸局就有考慮，咁佢哋喺 2009 年就已經考慮，然後 15 年、16 年都做個試驗。咁呢個主要就喺--即係倫敦嗰方面就係就住呢個智能車速調節系統係做過大量嘅分析，係咪呢啲情況都係喺個大埔意外之前出現嘅呢，即係做嘅呢？

陳英傑先生：（經傳譯員）我哋係唔知道㗎。

陳政龍先生：（經傳譯員）好，我哋而家唔好講呢個 ISA，我哋講番倫敦係有個計劃加強巴士安全。首先，Weston 先生嘅報告裏面，就係專家文件冊 148 頁。

主席：（經傳譯員）嗰份文件本身嘅頁碼係幾多？

陳政龍先生：（經傳譯員）34。

主席： Thank you.

陳政龍先生：（經傳譯員）我睇緊嘅係 7.5 段，就係巴士安全標準。陳生，我會讀出頭嗰兩段，即係 7.5 嗰度，因為呢個提供咗嗰個背景就係話倫敦嗰方面係點樣定嗰個巴士安全標準。「巴士安全計劃第一個關鍵嘅成果就係要制訂一個新嘅巴士安全標準，運輸局一路都--自從 2016 年就同道路安全顧問 TRL，一間 Loughborough 嘅大學，同埋巴士營運商同埋製造商，一齊去評估同埋提出一啲建議，建議一啲設施就可以加入去未來嘅巴士設計裏面，咁主要目標就係減少傷亡，特別係嚴重嘅傷亡同埋死亡。咁有幾個可能又可以考慮嘅技術，包括就係智能車速調節系統，自動剎車系統，同埋好多其他嘅設施。咁就係所有每一項設施嗰個成本效益都係全面咁樣去評估，確保我哋一方面可以儘量減少傷亡，但係同時亦都係喺我--就住我哋所做嘅財務投資嗰度，得到最高嘅回報，從傷亡減

少嘅角度嚟睇。」咁呢個就係2016年開始嘅工作，到而家都未完成。

主席：（經傳譯員）呢個係Weston先生嘅報告，係咪呀？

陳政龍先生：（經傳譯員）係，而呢度就有個參考嘅資料，就係喺第18日嘅聽證會，即係2018年9月27號，第115頁，第7行，即係謄本嗰度。

主席： Thank you.

陳政龍先生：（經傳譯員）好似主席今朝都提到，巴士安全標準，我哋預期應該係喺2018年10月中嘅時候公布，咁即係話呢個過程係超過兩年。

主席：（經傳譯員）我諗係原本係想逐--分階段咁推出，第一階段就應該喺10月公布。

陳政龍先生：（經傳譯員）係，我可以繼續睇落去，如果去到148頁，即係同一個報告，再落啲，同一頁，喺中間嗰度，就話「我哋倫敦運輸局計劃第一階段嘅巴士安全標準就會喺2018年10月16號公布，咁佢哋預計就會三個嘅開始嘅--三個嘅階段，就係第一、第二、第三階段去引入。」咁我哋睇番香港嘅--喺香港嘅做法，亦都睇到倫敦嘅做法，咁你對於一個建議，就話運輸署之前嘅加強巴士安全嘅做法，似乎更多係回應意外，即係喺意外發生之後先至回應，而唔係主動積極咁，同埋有系統咁樣去睇下仲有啲咩額外措施可以加強巴士安全，就避免發生意外？

陳英傑先生：（經傳譯員）我就唔可以評論嗰個背景，就話倫敦嗰個巴士安全計劃係點樣出嚟，我哋唔知道有啲乜嘢...

主席：（經傳譯員）我哋冇叫你評論嗰點喎。

陳英傑先生：（經傳譯員）我明白，我明白。但係我想講嘅就係，我唔知道巴士安全標準係咪同我哋已經有嘅標準係一樣，因為我哋都有啲最低規格要求，係要求專營巴士公司做得到。咁呢啲嘅規格，包括所有嘅設施，即係話專營巴士必須要具備嘅，呢個講就係話要提供服務畀乘客，可以方便利用到巴士服務，咁而好大部分都係講安全，同埋新嘅安全設施係要加入嘅。呢啲嘅標準，今次我哋又再檢視，亦都有修訂，就係今年8月嘅時候做。我哋會繼續咁做，去包括一啲新嘅標準。巴士安全標準喺倫敦嗰度話係會引進或者檢視㗎喇，咁佢哋有好多個階段，咁我會相信佢哋應該係好全面，亦都好複雜嘅一個計劃嚟。運輸署肯定會睇下從中可以學習到啲乜嘢嘢，又正如署長講，遲啲我哋會派人去英國㗎，肯定呢個係其中一方面我哋會睇嘅。

陳政龍先生：（經傳譯員）陳生，咁我可唔可以繼續請你睇下委員會聽過嘅一啲建議，你嘅睇法係點嘅？就係話點樣可以積極主動咁去加強巴士安全嘅一啲建議。首先，委員會聽到有好多嘅名詞提及，其中一個就係巴士營運商論壇，呢個係Weston先生講嘅，而Stanley教授就提到話有一個常設委員會係處理巴士安全，咁當中就包括咗各個相關嘅人士，或者係各方都有參與佢哋定期開會，合作

處理巴士安全嘅事宜。咁喺某程序上，陳女士今朝早都接納咗呢個建議，咁佢話嗰個工作小組係會繼--永久存在。

主席：（經傳譯員）佢話接納，佢係--佢就係話佢接納咗係 Weston 先生呢個建議㗎。

陳政龍先生：（經傳譯員）咁好，從呢方面睇，咁可以問呢個係可唔可以進一步問題，係咪準備將呢個工作小組變咗係常設呢？或者先講工作小組最後報告，5.13段。係TD-5號文件冊，1803頁，佢內部嗰個頁數就係43。陳生，請你睇5.13段，就係話運輸署嘅建議行動。咁佢第一部分就講話，你哋會採取啲咩嘢步驟係回應嗰啲建議，或者最後一句我想睇，第四十--即係佢本身43頁嘅最後一行，就話「運輸署會繼續留意最新嘅裝置同埋科技嘅發展，目的就係想進一步加強巴士安全，咁運輸署會採取主動積極嘅做法，繼續召集工作小組會議，係密切咁樣監測住試驗嘅進度，會定期咁做，而且會提供個平台畀運輸署，同埋專營巴士公司交換意見，睇下最新嘅巴士科技發展，同埋係有啲咩嘢新嘅安全裝置同埋技術可以應用喺專營巴士上面。」咁呢個其實就係同今朝早陳女士提及話會延長呢個工作小組嘅壽命嗰點嘞，啱唔啱呀？

陳英傑先生：（經傳譯員）係。

陳政龍先生：（經傳譯員）有冇任何文件，係列出而家已經係一個常設工作小組嘅細節嘅呢？例如有冇一份文件，就話佢嗰個工作範圍，擴大咗係點樣樣？有冇話佢定期開會，同埋有冇文件可以話畀我哋聽，呢個工作小組已經由一個臨時嘅工作小組變咗一個常設嘅工作小組？

陳英傑先生：（經傳譯員）喺現階段，冇任何文字嘅紀錄嘅，咁但係肯定，喺我哋同巴士公司傾嘅時候，我哋會傾呢一點，我哋都略為--之前略為提過喇。因為工作小組提出咗好多建議，咁所以係需要時間先可以落實。而正如我哋提過，我哋都會睇下一啲新--即係儘可能仲有冇啲新嘅措施嘅，咁所以工作小組係會繼續工作。但係好似今朝早都有提到，呢個工作小組會成為一個常設嘅會議，但係暫時冇喺文件上面有寫低。

主席：（經傳譯員）你係咪已經取得專營巴士公司同意，繼續做呢個常設嘅基制嘅成員呢？

陳英傑先生： Yes.

主席：（經傳譯員）係咪已經口頭上做咗？

陳英傑先生：（經傳譯員）係，我哋喺上一次工作小組會議已經有提到㗎嘞。

李女士： Last working group meeting.

主席： I'm sorry?

陳英傑先生：（經傳譯員）即係上一次嘅工作小組會議，我哋有提出呢個睇法，諗

法。

主席：（經傳譯員）嗰次會議係幾時，日期？

陳英傑先生：（經傳譯員）咁嗰次會議，佢哋係冇反對。嗰次會議日期，係 9 月 21 號。

主席：（經傳譯員）嗄，喺呢個報告嘅 1.5 段有提及嘅。可唔可以畀個頁數我，陳生？

陳政龍先生：（經傳譯員）TD-5 號文件冊，1763 頁。咁嗰度提及話有個會議，喺 1.5 段第 2 行有提及。

陳英傑先生： Yes, in the working --

主席：（經傳譯員）咁喺嗰次會議嗰度有提及，係咪呀？

陳英傑先生：（經傳譯員）係，就係最後，即係嗰個四個工作小組會議嘅最後一個，就係 9 月 21 號。

主席：（經傳譯員）係，嗰個委員會已經收到一整套所有嗰啲會議紀錄嘅正式版本，或者係草擬版本，係完全冇刪減嘅，咁但係就係 9 月 21 號同 8 月 29 號嘅好似仲未有，咁你可唔可以提供畀我哋？

陳英傑先生：（經傳譯員）上一次會議嘅會議紀錄都仲準備緊，咁又需要巴士公司評論先。

主席：（經傳譯員）係，咁就算係草擬本都可以畀我哋先吖，一定係有個草擬本喇，係咪呀？咁一係個草擬本，就用個草擬本提交畀我哋喇。

陳英傑先生：（經傳譯員）我哋同巴士公司商量吖。

主席：（經傳譯員）我哋問佢哋嘅時候，佢哋都係同意，但係又話要問下其他啲人，咁最後我哋得到係一啲刪減過嘅會議紀錄，跟住就城巴就話「係呀，我哋唔介意畀委員會㗎。」咁我哋要嗰個嘅成個完整版本。

陳英傑先生：（經傳譯員）係，我哋會睇下，唯一憂慮嘅就係，嗰啲草稿係未畀其他委員睇過，咁所以我唔知道嗰個最終嘅版本係咩嘢。

主席：（經傳譯員）咁而家就畀佢哋睇嗰啲草稿喇，咁叫佢哋評論喇，如果係有啲咩嘢嘅保留，咁就改喇。

陳英傑先生：（經傳譯員）我哋會考慮佢㗎。

主席：（經傳譯員）我覺得呢個係--就係咁喇，你會考慮，好吖。陳律師。

陳政龍先生：（經傳譯員）關於呢個工作小組，我想再問多個問題，就係佢呢個工作小組再發展落去，嗰個範圍你諗住係點嘞。咁我哋而家啱啱就讀咗 5.13 段報告

書，咁從字裏行間就睇嚟，呢一個工作小組嘅工作範圍係會限喺討論一啲科技嘅發展，就係關於點樣改善專營巴士嘅安全，我咁樣講公唔公道？呢個就係工作小組未來嗰個嘅工作範圍？

陳英傑先生：（經傳譯員）係喇，其實工作小組嗰個工作範圍一早已經係界定咗，而委員會嘅成員嘅共識都係，我哋嘅討論就會限喺--局限喺呢啲嘅範圍裏面。

陳政龍先生：（經傳譯員）係，咁我哋一開始嘅時候，都係按住時序講，呢個工作小組點樣成立㗎喇，咁當時就係話呢個工作小組嘅壽命係三個月嘅啫。

陳英傑先生： Yes.

陳政龍先生：（經傳譯員）但係而家嗰個打算將工作小組變成常設。

陳英傑先生： Right.

陳政龍先生：（經傳譯員）咁所以我想問，呢一個經過轉型嘅工作小組，係會唔會仍然工作嘅範圍係咁有限呢？

陳英傑先生： No.

陳政龍先生：（經傳譯員）會唔會淨係講呢個技術嘅考慮呢？會唔會考慮巴士安全嘅其他方面，譬如話係巴士有關嘅道路安全嘅事宜，一啲安全嘅做事方法呀咁？

陳英傑先生：（經傳譯員）咁範圍改變咗之後，嗰個工作小組就會成為一個常設嘅基制，我諗。咁我估計佢呢個新嘅基制嘅範疇就會比較原本嗰個範疇闊啲㗎喇，咁我諗係可以處理巴士安全其他嘅事項，我喺呢方面係保留開放嘅態度。

主席：（經傳譯員）咁即係你預期，呢一個常設嘅工作小組或者係基制就係會個範疇係包括多所有關於巴士嘅安全，或者安全運作嘅事宜，係咪呢？

陳英傑先生：（經傳譯員）係。

主席：（經傳譯員）好，唔該。

羅先生：（經傳譯員）咁我可唔可以問一個問題呢？

主席：（經傳譯員）隨便。

羅先生：（經傳譯員）咁關於工作小組嘅成員又係點嘅呢？舉例，警方或者係道路安全議會，會唔會都係成為佢嘅一員？

陳英傑先生：（經傳譯員）因為關於嗰個成員，因為我哋會改變呢個工作小組，成為一個常設嘅基制，咁嗰個成員我哋要考慮應唔應該係包埋其他嘅人士，咁包括官方或者非官方。但係喺呢個時候，我哋要討論下先，咁睇下呢一個嘅工作--呢個小組或者佢嘅範疇係點樣運作，包括埋佢嘅成員同埋佢嘅範疇。

主席：（經傳譯員）咁你預期呢啲嘅問題幾時可以落實到呢？幾時先至可以定出工作

小組嘅範圍，同埋佢嘅成員係邊個？

陳英傑先生：（經傳譯員）我只可以話我哋希望儘快，因為有千百萬樣嘢都係發生緊，我哋當然希望就係儘快將新嘅措施係實施。

主席：（經傳譯員）可唔可以喺呢個年尾之前呀？你而家係到底係搵緊工作小組嘅範疇定係成員？呢個兩樣嘢嚟嘅。

陳英傑先生：（經傳譯員）我諗我哋希望如果年尾做得到就係我哋嘅目標喇。

主席：（經傳譯員）即係你覺得係一個可能達得到嘅目標？

陳英傑先生：（經傳譯員）係。

主席： Potential?

陳英傑先生：（經傳譯員）係，我哋都要留意番，我哋而家係想攞一啲資源多啲嘅支援，多啲嘅資源，嚟到去實施有關嘅措施，咁呢點我哋要考慮在內。

主席：（經傳譯員）陳律師。

陳政龍先生：（經傳譯員）下一個嘅建議係向委員會提過嘅，就係可以鼓勵一個比較積極主動嘅做法，就係喺倫敦，佢哋有個安全創新基金，可以睇你--睇下關乎呢個基金嘅證供，咁睇下你自己有乜嘢觀察嘞。係專家文件夾 146 頁。

主席：（經傳譯員）即係 Weston 先生嘅報告？

陳政龍先生：（經傳譯員）係，Weston 先生嘅報告，自己嘅頁數就係 32。

主席：（經傳譯員）好，唔該。

陳政龍先生：（經傳譯員）咁喺 7.3 段，安全創新基金。我再讀出嚟喇，「喺 2017 年 11 月嘅時候，倫敦運輸局就係宣布佢安全創新基金嗰部分，就係會係提供 500,000 英鎊畀六間巴士公司，去發展新啲嘅概念，嚟到改善倫敦嘅巴士網絡嘅安全，咁呢六間公司全部都係就佢哋嘅安全嘅設備，同埋改善工作嘅行為，員工嘅表現，係得到呢啲基金嘅支助。咁亦都係佢哋做嘅試行計劃又係一個資料搜集嘅過程，亦都係後來係擺咗入去發展呢個巴士安全標準。」好，而家我想去另外一段，係 152 頁，就係 Weston 先生嘅建議。主席，呢個係 38 頁，呢個報告書嘅 38 頁。

主席： Thank you.

陳政龍先生：（經傳譯員）呢個相關嘅建議，Weston 先生提出嘅，就係喺網絡財務表現嗰度，係成段我想讀出嚟嘞。「我哋應該要考慮某啲嘅安全措施，例如話係引用新嘅安全技術，同埋車長嘅訓練，目標就係要加強安全，係應該由運輸署以直接資助嘅形式，喺專營協議以外，係提供畀巴士公司，就要達到一啲指定嘅成效。咁喺專營協議以外提供一啲資金，係有理據嘅，因為佢可以係令成個嘅社會

受益。」咁我想問，運輸署對於成立一個基金有咩睇法？個基金係要嚟資助，要嚟發展，試用一啲新嘅措施，新嘅器材，嚟改善巴士安全嘅，你哋嘅睇法係咩呢？

陳英傑先生：（經傳譯員）大家都可能知道，香港嘅經營環境同英國係好唔同。我相信英國嘅巴士服務係由政府畀錢，然後就係外判畀公司。而香港就唔同，我哋就係用一個嘅商業...

主席：（經傳譯員）咩話？

陳英傑先生：（經傳譯員）商業嘅原則就係畀巴士公司嚟到經營呢啲嘅網絡。

主席：（經傳譯員）咩話？

陳英傑先生：（經傳譯員）係要商業上可行嘅商業原則。

主席： Thank you.

陳英傑先生：（經傳譯員）咁所以呢啲私人公司，即係巴士公司就要負責營運巴士嘅所有成本，所有開支，咁我哋相信嗰啲嘅器材、巴士，都係由巴士公司去提供，咁佢哋應該繼續係用呢個模式，英國嘅情況同香港好唔同。關於一啲新嘅措施應唔應該由政府補貼都係可以討論嘅，呢個問題。事實上，即使今時今日，香港我哋都係有補貼畀巴士公司，去做呢啲嘅顯示器嘅，係即係一對一咁樣嘅安排。咁即係話，呢一個嘅建議都唔係話不能夠去考慮嘅，我哋都係持開放嘅態度。但係話如果單單成立一個基金，有一個特定嘅目標，我相信就會對成個嘅公共巴--公共運輸系統有一啲成本方面嘅影響，咁但係對一啲個別嘅項目，我哋都係持開放嘅態度，可以係討論嘅，如果巴士公司認為有需要嘅話。

主席：（經傳譯員）呢個你哋補貼緊嘅顯示系統係咩嚟嘅？

陳英傑先生：（經傳譯員）而家？

主席： Yes.

陳英傑先生：（經傳譯員）而家政府係補貼緊畀巴士公司，去安裝一啲實時嘅顯示系統，喺巴士站，或者係巴士站嗰度顯示，咁另外喺呢啲巴士站嘅座位，即係用一個一對一咁樣嘅安排，巴士公司負責起--負責一個項目，我哋政府就係補貼另外一個項目，咁呢個係配對，咁呢一個安排已經係實施緊，我哋係都係提供咗一啲協助，嚟到係推行一啲對整體運輸大眾有益嘅呢啲措施。

主席：（經傳譯員）呢個實時嘅顯示系統，就係等搭車嘅人知道大概下一班車幾時到？

陳英傑先生：（經傳譯員）係嘞。

主席：（經傳譯員）咁你就話政府係一個一對一嘅配對？

陳英傑先生：（經傳譯員）係。

主席：（經傳譯員）咁巴士就係公司提供一個，政府就提供另一個？

陳英傑先生：（經傳譯員）係。

主席：（經傳譯員）咁嗰啲--係嘞，巴士站，巴士座位，巴士站嘅座位又點呢？

陳英傑先生：（經傳譯員）係，係巴士站嗰啲座位。

主席：（經傳譯員）亦都係一對一嘅？

陳英傑先生： Yes.

黃志光先生： Seats no. All subsidised by government.

陳英傑先生：（經傳譯員）對唔住，係座位...

主席：（經傳譯員）乜嗰啲座位嘅情況係點呀？

黃志光先生：（經傳譯員）即係我哋就係話喺巴士站上蓋下面，如果佢哋係要裝呢啲座位，就係由巴士公司佢哋自己起嘅。咁至於嗰啲嘅預計巴士到達時間，我哋就叫嗰啲顯示系統，咁就係一個配對，一對一嘅安排。

主席：（經傳譯員）咁即係你係畀錢畀啲乘客，就睇下嗰啲嘅顯示器，睇下巴士幾時到，你哋就出資興建一個，咁巴士公司就一個？

黃志光先生：（經傳譯員）係呀，咁關於嗰啲座位，我哋就係特別喺老人家同埋一啲有需要嘅人士，都係好多嘅要求，希望喺巴士站提供座位嘅。咁政府其實喺施政報告都係話呢個政策，我哋會補貼巴士公司係儘快提供座位，咁等有需要嘅人係可以有多啲嘅位嚟坐。

主席：（經傳譯員）咁邊個畀錢起呢個巴士站嘅上蓋？

陳英傑先生：（經傳譯員）巴士公司。

主席：（經傳譯員）好，唔該。陳律師。

陳政龍先生：（經傳譯員）另外一個建議，Weston 先生--Stanley 教授亦都係向委員會建議，就係話要有一個嘅獨立嘅安全嘅規管機構。咁你都讀過--睇過 Stanley 教授嘅報告喇，咁我就講講個背景先。喺澳洲...

主席：（經傳譯員）我諗畀我哋去睇下 Stanley 教授嘅建議，咁就等我哋大家理解下。

陳政龍先生：（經傳譯員）好，咁我就帶大家睇 Stanley 教授嘅報告書嘅兩部分，第一個就係專家文件夾，第 70 頁。咁呢個就係 Stanley 教授嘅第二份報告。

主席： Thank you.

陳政龍先生：（經傳譯員）佢自己報告嘅頁碼係70。主席，請大家睇睇第70頁。佢嗰個嘅大題目係管治，跟住就係主要嘅機構，同埋角色。咁呢一度就係香港嗰個嘅房運局喺4月24號嘅一個意見嘞。就係房運局就係負責嗰個嘅策略嘅角色，咁運輸署就係實際提供服務㗎，咁呢個就係同物業局嘅安排係類似。「維多利亞運輸局就係有一個策略嘅角色，而佢哋嘅公共運輸發展局就係負責去執行。咁但係兩者有一個好明顯嘅差別，就係墨爾本有一個獨立嘅安全規管當局，就係喺策略性嘅層面嚟到運作嘅。咁呢個維多利亞嘅運輸，交通嘅安全就係喺佢哋2010年嘅法案嗰度成立㗎。咁但係喺香港，我哋就冇一個對等嘅當局，運輸署就係去監察專營巴士公司嘅安全表現，而都係負責促進一啲安全嘅措施，但係香港冇一個獨立嘅安全規管當局，咁似乎就係減低咗大家對安全問題嘅關注嘞。」呢個就係第一部分我想大家留意嘅。第二部分，請大家揭去第99頁，同一沓嘅文件。主席，呢個文件本身嘅--報告嘅本身頁數係46頁。

主席：（經傳譯員）唔該。

陳政龍先生：（經傳譯員）大概係中間嗰度，我就會係讀一、二、三段下面嗰一段，教授就話「呢個維多利亞巴士公司係會有營運方面嘅支援，呢個係業界嘅委員會。咁譬如話佢哋係會為MIS、MMS係發展一啲嘅範本，咁就所有嘅成員都係用得到嘅。而呢一個運輸安全總監係非常--佢嘅焦點、重點就係發展同埋改善呢一個巴士業界嘅安全文化，同埋呢個安全風險管理，亦都係同公司同埋業界去改善佢哋嗰個做法。咁佢哋有一啲指引嘅文件，呢一個運輸安全總監係獨立，就係令到一個--有一個好好嘅政策，就亦都可以有一個獨立嘅問責同埋透明嘅，呢一個嘅安全過程。咁就巴士安全就係完全係由呢一個公共交通規管當局嚟到去負責㗎。」咁喺呢方面嚟講，運輸署嗰個有咩嘢嘅觀察，對於話去成立一個係獨立嘅交通安全，或者係運輸安全嘅監察當局，你有咩嘢睇法？

陳英傑先生：（經傳譯員）我唔知喺澳洲即係墨爾本嗰個業務嘅規模，呢個係維多利亞省嘅，咁即係據我了解喇，維多利亞省嘅巴士營運就係唔係中央化嘅，咁而監管嘅規模係大好多。

主席：（經傳譯員）呢個就係講緊墨爾本，而唔係整個維多利亞省嘅。

陳英傑先生：（經傳譯員）咁但係佢講緊一個巴士監管機構，即係我唔知佢係講成個維多利亞省吖定係淨係墨爾本。

主席： Yes. I follow your point.

陳英傑先生：（經傳譯員）就算淨係講墨爾本，即係據我所知，墨爾本嘅巴士業務同香港好唔同嘅，喺墨爾本係有唔同嘅經營公司喇。

主席：（經傳譯員）我諗我哋可以幫下你。

陳政龍先生：（經傳譯員）至於話協商嘅服務，就佔路線嘅三分二，就有十五份合

約，十二間公司，咁而有三分一嘅路線都係有呢個競爭性嘅競投嘅。咁但係每七年，係可能係會轉變嘅。

陳英傑先生：（經傳譯員）咁講緊係咪少過二十間？

主席：（經傳譯員）十三間嘅。

陳英傑先生：（經傳譯員）所以你講緊係即係好多唔同嘅巴士營運商，咁而呢啲營運商嘅監管機構係需要即係管理唔同嘅公司嘅，咁但係喺香港嚟講，我哋有六間嘅專營巴士公司，咁主要有三個集團，咁龍運、新巴、城巴。

主席： Long Win.

陳英傑先生：（經傳譯員）九巴、龍運。

陳政龍先生： New Lantao is the other one.

陳英傑先生：（經傳譯員）新巴同埋城巴，同埋新大嶼山嘅巴士。咁基本上我哋係管理緊三間集團底下嘅六間專營巴士公司。我可以咁講，咁樣係容易好多，因為我唔使管理好多唔同嘅公司，如果講緊維持呢啲安全嘅標準，係會相對容易嘅。

主席：（經傳譯員）喺香港？

陳英傑先生：（經傳譯員）係，喺香港嘅。正如即係署長所講，運輸署係有獨特--即係特定嘅即係專業嘅分支，咁我哋有道路安全部、車輛標準及安全部，同埋一個巴士及鐵路科嘅。咁我哋係好嚴謹咁樣去控制同埋管理呢一啲巴士公司嘅，即係我哋係做得唔錯嘅，因為我哋嘅工作係非常之有效率，因為我哋一個部門只需要同三大集團係交涉。咁至於提升啲巴士公司嘅質素，或者安全標準，就同墨爾本唔同，喺墨爾本，係你係要即係說服十幾間公司，先至可以達到你嘅目標。咁至於即係將呢個工作小組變成一個常規嘅會議，係令到我哋可以有一個即係集中嘅核心小組，咁呢個會議嘅目標嘅功能，同一個獨立嘅審核機構係好相似，即係同墨爾本個機構好相似嘅。咁而香港嘅情況嚟講，成立一個獨立嘅監管機構，去即係監管運輸署同埋巴士公司並不必要嘅。

主席：（經傳譯員）咁呢一個會議係包括運輸署同埋巴士公司喇，咁有咩嘢獨立性？佢哋--即係呢個唔係一個獨立嘅會議嚟嘅？

陳英傑先生：（經傳譯員）係，唔係獨立嘅，因為即係有兩方，咁但係我哋可以睇下個成員嘅組成，咁然後我哋會睇下可唔可以引入一啲獨立嘅意見，咁可以為車務提供獨立嘅意見。

主席：（經傳譯員）你心目中有咩嘢人選？

陳英傑先生：（經傳譯員）我哋暫時冇其他人，但係我哋係一定會去探討呢個問題嘅。

羅先生：（經傳譯員）我哋講緊係道路安全議會嘅委員喇，成員喇。

陳英傑先生：（經傳譯員）我哋好歡迎佢哋。

主席：（經傳譯員）你認為佢哋係獨立，即係如果佢哋成為呢一個工作小組嘅成員，咁係咪就有一個獨立性响度？你同唔同意？

陳英傑先生：（經傳譯員）係嘅，道路安全議會嘅成員都係頗為獨立嘅。

主席： Please, Mr Auyeung.

歐陽先生：（經傳譯員）咁呢一個--就住呢個工會，就會喺唔同嘅持份者之間，會有即係定期會議喇，咁呢一個會議唔單只係會講安全嘅，你會講其他嘅事宜。咁運輸署會唔會有一個即係單位，專門係負責安全，咁樣可唔可行呢？

陳英傑先生：（經傳譯員）目前，我哋有一個道路安全及標準研究科，咁呢個單位就係處理所有公眾--公共交通嘅安全，包括係專營巴士。咁但係呢一個分支並唔可以達致我哋提升巴士安全嘅目標，因為唔單只係涉及道路，亦都涉及車輛同埋營運。所以實際嚟講，喺運輸署入面，我哋即係可以成立一個小組，係包括呢啲唔同嘅分支嘅專家，去特別去睇專營巴士嘅安全，我認為咁樣係可行嘅。

歐陽先生：（經傳譯員）咁今朝，署長就表示係有四個單位係共同負責巴士安全嘅，咁但係呢啲嘅分支係咪有定期會議？會唔會係每月都會會面？

陳英傑先生：（經傳譯員）目前就冇即係一啲定期嘅會議，即係喺呢啲唔同嘅單位，咁就住即係成立一個新嘅會議去處理巴士安全嘅事宜，當然呢啲單位都會參與喇，咁而喺呢個會議入面，我哋內部即係都要安排一啲會議，係去討論同埋去實施一啲嘅措施嘅。

歐陽先生：（經傳譯員）唔該晒。

羅先生： May I ask a question?

主席：（經傳譯員）羅教授。

羅先生：（經傳譯員）我想探討一下呢一個道路安全議會嘅，佢同運輸署同埋警方之間點樣合作？佢係咪一個獨立嘅機構，去處理安全問題？佢係咪已經有一個獨立嘅地位？我想知道道路安全議會、運輸署同埋警方之間嘅合作關係，同埋呢一個道路安全嘅研究委員會嘅，咁呢四個單位係點樣去合作處理安全問題？

陳英傑先生：（經傳譯員）咁喺呢個問題，我想請邱先生去講一講嘅。

主席： Yes, please.

邱國鼎先生：（經傳譯員）唔該，主席。道路安全議會係包括唔同部門嘅同埋局嘅代表，同埋亦都有啲非官守成員，例如係一啲即係車輛總會、醫委會、香港道路安全協會、一啲保險界嘅代表等等。咁所以道路安全議會係一個獨立嘅機構嚟，咁

喺道路安全議會底下，有兩個委員會，第一，就係道路安全嘅研究委員會，咁羅教授係其中一名嘅委員；咁另外就係道路安全嘅宣傳委員會，咁就如果我即係喺呢個研究委員會嗰度，如果我哋有一啲新嘅措施，無論佢哋係關於車輛安全、道路安全，或者其他嘅問題，都會喺呢一個道路安全嘅研究委員會度傾嘅。咁而道路安全嘅研究委員會下，我哋係有唔同大學嘅學者，亦都有一啲來自即係相關即係組織嘅成員嘅，咁而道路安全嘅宣傳委員會，主要係負責公眾教育同埋宣傳。咁喺道路安全議會底下，我哋係每季都會有--即係同委員會會面，咁而喺道路安全議會下，即係亦都係運輸署每一季會即係檢討一個意外嘅紀錄，咁而呢啲嘅意外紀錄會包括巴士嘅意外，咁樣委員會嘅委員就可以提供意見嘅，即係就住巴士安全表現。

主席：（經傳譯員）咁呢啲專營巴士意外嘅數據係喺邊度？

邱國鼎先生：（經傳譯員）即係同其他嘅意外紀錄一樣，我哋係會即係依賴警方嘅數據。

主席：（經傳譯員）咁即係主要係靠警方嘅數據？

邱國鼎先生： Yes.

主席：（經傳譯員）然後你就會整理同埋分析，係咪？

邱國鼎先生： Yes.

主席：（經傳譯員）邊個做㗎？

邱國鼎先生：（經傳譯員）我哋嘅同事，即係運輸署嘅同事，咁我哋就會向委員匯報呢個安全表現，趨勢等等。

主席：（經傳譯員）你可唔可以向--對正個咪講嘢？你就會睇警方嘅紀錄，運輸署就會加以整理同埋分析嘅？

邱國鼎先生：（經傳譯員）係，然後我哋就會將呢個安全表現匯報畀安全議會嘅委員，我哋就會講下我哋嘅觀察、趨勢，同埋一啲共同嘅--共通嘅成因等等。因為道路安全議會就係包括唔同嘅局、警方同埋第三方嘅代表，如果佢哋有任何意見，或者建議，即係就住政策，或者係改善嘅巴士安全嘅措施，咁就會喺道路安全議會度傾嘅，咁而議會嘅委員就會進一步跟進嘅。

主席：（經傳譯員）道路安全議會會唔會就住改善專營巴士安全，係作出一啲建議？

陳英傑先生：（經傳譯員）喺近年嚟講，佢哋就冇即係提供建議。

主席：（經傳譯員）佢哋有冇曾經提供過一啲改善專營巴士安全嘅建議？

邱國鼎先生：（經傳譯員）因為建議可能涉及立法同埋執法，同埋宣傳，咁據我即係所知，就冇特別講關於立法嘅意見，但係就係有一啲建議就係關於執法同埋宣

傳，咁目的就係改善巴士安全。

主席：（經傳譯員）你可唔可以畀啲例子我哋，即係曾經即係作出過嘅建議？

邱國鼎先生：（經傳譯員）例如我哋係分析咗意外嘅成因，例如係乘客失去平衡，咁而我哋係即係向道路安全議會作出嘅建議，就係主要係即係提醒乘客就係緊握扶手，咁呢個係其中一個例子。

主席：（經傳譯員）即係有冇任何其他嘅建議，係關於巴士嘅設計、安全裝置、安全帶，即係議會有冇即係作出過呢啲嘅建議？

邱國鼎先生：（經傳譯員）冇，我諗個原因就係喺過去幾年，整體嘅意外數字都係維持穩定嘅，即係就住專營巴士。

主席：（經傳譯員）咁如果係咁，唔係應該更加即係作出一啲建議咩？即係意外數字係冇下降到喎，咁樣唔係應該更加係需要即係作出一啲建議？咁倫敦嘅情況，佢哋係有一個零意外嘅目標嘅，咁目標就係即係令到意外減少，咁佢哋就有個咁嘅零意外目標嘅。咁佢哋嘅意外率係下降緊，而佢哋亦都係有一啲嘅建議。

邱國鼎先生：（經傳譯員）我哋亦都係有一啲即係目標，即係去--我哋亦都係有一啲即係建議就係減低呢一個意外率，就係所有交通工具意外率，唔單只係專營巴士。

主席：（經傳譯員）咁實際上，道路安全議會係咪冇即係就住專營巴士作出任何即係針對性嘅建議，即係除咗緊握扶手之外？

邱國鼎先生：（經傳譯員）正如我所講，呢個係一個即係宣傳措施嘅例子。咁道路安全議會就係有即係提供一啲建議去加強宣傳同埋執法，即係而喺執法方面，道路安全議會亦都係有一啲建議嘅。

主席：（經傳譯員）邊方面嘅執法？

邱國鼎先生：（經傳譯員）例如係違泊等等，因為即係喺啲巴士站嘅違泊情況，因為就會影響巴士嘅營運。

主席：（經傳譯員）幾時作出呢啲建議㗎，係？

邱國鼎先生：（經傳譯員）我要即係睇番啲紀錄先。

主席：（經傳譯員）你可唔可以向我哋提供呢個資料？因為呢個就係即係一直以嚟，巴士公司，特別係九巴工會同埋車長即係嘅一個持續嘅問題嚟嘅，而係冇解決到，咁可能佢會覺得即係警方係冇咩興趣去處理。

邱國鼎先生：（經傳譯員）咁每年，道路安全議會即係都會係即係徵詢嗰一個嘅--一個重點交通執法項目，咁喺呢個項目底下，係有包括呢個違泊問題嘅。

主席：（經傳譯員）咁請你畀一啲文件我哋，顯示警方係有就住巴士站違泊嘅情況執

法嘅。

邱國鼎先生：（經傳譯員）我會去睇番啲紀錄。咁我唔肯定呢個係即係特別係喺巴士站嘅執法，定係一個一般嘅執法。

主席： I'm sorry?

邱國鼎先生：（經傳譯員）我就要睇下啲紀錄，睇下呢一個即係針對違泊行動係喺即係針對巴士站吖定係喺即係一般--即係其他地方。

主席：（經傳譯員）我諗任何嘅情況都--即係如果有文件，都可以畀我哋嘅。

邱國鼎先生： Yes.

主席：（經傳譯員）陳大律師。

陳政龍先生：（經傳譯員）主席，我想講下呢一個安全帶嘅問題，咁但係我見個時間就可能差唔多。

主席：（經傳譯員）即係可能唔係好適合而家講嘞。咁但係陳大律師，如果即係有嘢你想講，就請你而家講。

陳英傑先生：（經傳譯員）喺巴士站違泊嘅執法問題，呢個就唔係道路安全議會嘅主要工作。咁正如你所講，但係呢一個就係工會同埋巴士公司指出嘅一個問題，運輸署係已經係有主動去做咗一啲嘢，係去要求警方係進行執法，我哋係有收到巴士公司嘅求助，咁我哋就會即係將呢啲個案轉介，咁然後我哋就會跟進下，睇下究竟佢哋有冇做到。咁可以咁講喇，呢啲嘅營運問題，主要係由運輸署處理，而唔係道路安全議會嘅。

主席：（經傳譯員）咁我哋係有即係睇到你呢方面嘅工作，我哋睇到相關嘅書信，而警方亦都係有提到嘅。

陳英傑先生：（經傳譯員）我哋可以即係舉一啲例子。

主席：（經傳譯員）我淨係想知道，道路安全議會有邊方面嘅工作就係同提升專營巴士嘅安全有關，咁但係我哋今日嘅時間就到嘞，咁多謝各位嘅今日嘅協助。咁我哋要求咗你提供即係一啲嘅文件，即係喺星期六之前，咁我哋而家就會即係休會，直至星期六繼續嘅。星期六我哋會幾點開始？

陳政龍先生：（經傳譯員）係朝早九點半嘅--9點嘅--10點嘅，應該係。朝早10點，唔好意思。

主席：（經傳譯員）咁我哋星期六嘅朝早10點繼續，多謝各位。

Saturday, 6 October 2018

(10.01 am)

EVIDENCE FROM THE TRANSPORT DEPARTMENT: MS MABLE CHAN, MS AMY LEE, MS AMY TSE, MR PATRICK WONG, MR YK CHAN, MR WILLIAM SHUM, MR TONY YAU

CHAIRMAN: Good morning.

MR DEREK CHAN: Good morning.

MS MABLE CHAN: Good morning, Chairman.

CHAIRMAN: Thank you for attending on a Saturday to help us take this evidence.

At the outset, let me explain the absence of Prof Lo. Prof Lo has duties at Hong Kong University of Science and Technology today, because they are hosting an Asian Deans' Forum of Engineers, and he is unable to attend, but rather than dislocate our hearing, what we are going to do is this. We will continue, and of course, and because we have a live transcript, we are able to -- and this is what we are going to do -- we are going to have this emailed to him during the course of the day at different stages so that he can review it to see if there are questions that he wants to pose and he can do that through me.

At the end of the day, of course, he will have available the corrected transcript, and we have an audio record as well, so he will be able to review everything

that has been discussed and, if there are any matters arising subsequently, then those are matters that we may find it necessary to pose in written questions.

But that explains, I hope, Prof Lo's absence.

I'm going to ask Mr Chan now to recommence the questioning.

Examination by MR DEREK CHAN (continued)

MR DEREK CHAN: Good morning, Ms Chan, and to your colleagues as well.

Thank you for providing to the committee yesterday some additional materials on matters arising from the hearing on Thursday. I would like to follow up on one matter arising from the new material provided. That is the material concerning the black box deceleration threshold.

Firstly, can I take this step by step -- can I firstly remind ourselves what the threshold is currently, and for that can I take you to appendix 2 to the report of the Working Group on Enhancement of Safety of Franchised Buses. The page reference is TD-5, page 1807.

Ms Chan, do you have appendix 2 in front of you?

MS MABLE CHAN: Yes.

MR DEREK CHAN: This was canvassed with your colleague Mr Chan during Thursday afternoon's session. Attention

was drawn to paragraph 4 of this new black box requirement, which says that the software for analysing on-board or downloaded data should be capable of reporting the following:

(a) Accident report -- vehicle speed profile at time interval of 1 second for the 3 minutes period preceding detection of a 0.4G deceleration."

There was a discussion on Thursday afternoon about the change from 0.2G in the 2003 requirement to 0.4G, which is what we see here now. There was a discussion on Thursday afternoon when this was changed and some of the additional materials that were provided to us yesterday evening relate to this change. May I just go through that change, and I also want to ask questions about the rationale for this selection of the 0.4G threshold, which we discussed Thursday afternoon, and the new materials throw some light on that selection. So I'm going to go through those two issues as I go through the documents.

If I can take it again in stages, firstly, I will go through the process of the change in I think 2005 to 2006 and 2007. For that, can I refer you to the new materials that came in last night. I'm going to go to a document headed "Annex C1".

Mr Chairman, I know we are probably both working on

unpaginated version.

CHAIRMAN: I have annex C1 in front of me.

MR DEREK CHAN: For the purposes of the transcript, the bundle reference now is TD-5, page 1853.

Ms Chan, I hope you have before you minutes of meeting of the Transport Department and CTB liaison meeting which took place on 19 May 2005.

There were a number of representatives present from the Transport Department. I take it from the names that appear there that none of the colleagues present today attended this meeting; would that be correct?

MR YK CHAN: Correct.

MR DEREK CHAN: If I can go over the page, under the heading "Black box", paragraph 25 refers to the issue of retrofitting. At paragraph 26:

"Citybus mentioned that during the last Transport Department/franchised bus companies joint meeting, 2 suggested changes of the black box requirements were discussed:

-- The accident log of the black box should be triggered by 0.4G deceleration instead of 0.2G;

-- The accident log record should be 3 minutes with 30 second after and 2 minutes 30 second before."

And at paragraph 27:

"The Transport Department advised that they had no

objection to the suggested changes and would like to gather more feedback from operators."

So it would appear from this minute that 0.4G was something that was selected by Citybus; would that be a correct reading?

MR YK CHAN: Can you hear?

CHAIRMAN: Yes, we can.

MR YK CHAN: I understand that the subject was discussed in 2005. Possibly, it was arising from a request from Citybus, to see whether the triggering point should be varied because of the 0.2G deceleration.

CHAIRMAN: So the answer is "yes"?

MR YK CHAN: Yes.

CHAIRMAN: It's Citybus' idea. Try to use "yes" or "no" if you can -- by all means explain afterwards. But the answer is "yes"?

MR YK CHAN: Yes.

CHAIRMAN: Mr Chan.

MR DEREK CHAN: If you go to the next document, annex C2, you have an email more than a year later, on 19 September 2006, attaching the proposed requirements for the black box to be installed. And over the page, we see a draft requirement and in a table in the middle of the page we can see 0.4G being referred to in item 2 and item 4. So that's the position as at September

2006.

Can I then move on to the next --

CHAIRMAN: Just for the purposes of the record, because things have been redacted, who was the sender of this information and to whom was it sent? Perhaps, Mr Chan, you can deal with that.

MR DEREK CHAN: Yes, Mr Chairman.

It appears from the first page of annex C2 that the email was sent by a Mr Walter Foo of the Transport Department; is that a correct reading of the document?

MR YK CHAN: May I invite Chief Engineer Shum to reply to this question?

MR DEREK CHAN: Yes.

MR WILLIAM SHUM: The email is sent by Mr Walter Foo who is one of the engineers of the Transport Department at that moment.

MR DEREK CHAN: And it looks like, from what is left unredacted from the recipients of the email, that the email was sent to the franchised bus operators; would that be a correct reading of the email?

MR WILLIAM SHUM: Yes. All the recipients are the staff in various franchise operators, even those which are fully redacted.

MR DEREK CHAN: Mr Chairman, my apologies. I didn't notice that the letters on the left were not translated in

English, so, for the purposes of the record, the first line is the sender.

CHAIRMAN: I can work that out myself, but it's important that it's in the record because otherwise, when one reads this later, it needs more explanation.

MR DEREK CHAN: Certainly, Mr Chairman.

The next document is annex C3, which takes us to 28 March 2007. I hope you have before you the minutes of the 28th joint meeting between the Transport Department and franchised bus companies.

On the first page, you can see that those present from the Transport Department and also representatives of the franchised bus companies were also present, with their names redacted on the version that we have.

Can I then take you over the page to paragraph 5, which is the only passage on the black box. Under the heading, "black box data box data recording device", it is recorded that:

"The Transport Department advised that the functional requirements and specification of the electronic data recording device had been finalised and all bus operators would be updated in due course."

So that was the position as at March 2007.

Then the next document, annex C4, is an email dated 5 October 2007, which attaches the black box

specification. Again, can you just confirm that the email was sent by a Mr Steven Tse and he is a colleague of yours in the Transport Department?

MR WILLIAM SHUM: Yes.

MR DEREK CHAN: And the recipients, can you tell us who they are? Because I only see a reference to KMB and Citybus.

MR WILLIAM SHUM: All the distribution, even in the redacted parts, are the staff of all the franchised bus operators.

CHAIRMAN: Why have they been redacted?

MR WILLIAM SHUM: Because the email contains the names of the staff. That's why we redacted those, the name of the staff of the franchise operators.

CHAIRMAN: Why do you do that? What's so offensive about someone's name being there? Is this compliance with data protection? Is it really?

MS MABLE CHAN: Chairman, I think, when the staff redacted in the preparation of the response yesterday, I think they may not have the time to seek the consent of the relevant staff. We can certainly --

CHAIRMAN: So the answer is "yes"?

MS MABLE CHAN: Yes.

CHAIRMAN: This is because you are concerned about data protection?

MS MABLE CHAN: Yes.

CHAIRMAN: That's an extraordinary spanner to throw in the works of perfectly ordinary correspondence, is it not?

MS MABLE CHAN: We are working on a more prudent basis. Thank you, Chairman.

CHAIRMAN: I'm not criticising you. It may be the unintended effects of this legislation.

MR DEREK CHAN: Can I then go to the second page of annex C4, which contains what I understand to be the finalised black box requirement, after what appears to be two years of discussions. Would that be a correct understanding?

MR WILLIAM SHUM: Yes.

MR DEREK CHAN: So that's the process by which the black box requirement was changed.

Next, I want to go into the rationale of using --

CHAIRMAN: Before you do that -- why did this change, if that's what it was, not find its way into the document that was issued -- a document of the type that was issued in August 2018? Why was there a 12-year delay before it found its way into that format?

MR YK CHAN: Chairman, on Thursday I mentioned already that the process of discussion and eventual change of this deceleration force took place between 2005-2007, and I think at that time the staff of the Transport Department actually recognised that the change -- the

new deceleration attributes have been taken on board, but --

CHAIRMAN: No. Please answer the question: why was there a delay of 12 years before it was put into the format that we now have, August 2018? That is the question, nothing else.

MR YK CHAN: I would say that the staff of the Transport Department at the time did not take the trouble or omitted to change these parameters in the specification.

CHAIRMAN: So it ought to have been done but it wasn't; is that it?

MR YK CHAN: In hindsight, we believe we should have done it earlier.

CHAIRMAN: Yes. Thank you.

Mr Chan.

MR DEREK CHAN: Thank you, Mr Chairman.

I want to now move to the rationale of using 0.4G as the threshold. We discussed this on Thursday afternoon. I'm going to start by reminding you of the evidence given on Thursday and then go to the new materials to seek your observations or comments on them.

Can I first take you to the transcript of Thursday's hearing, which is Day 19, 4 October 2018, starting firstly at page 54.

Just to give context to the passage I will be

reading, at page 53 there were discussions about why 0.4G deceleration was chosen, and can I pick it up at page 54, line 4, where Mr Chairman asked the question:

"Give us a real example; what does it mean?"

Mr Chan said this:

"No, the definition of this one is actually -- what it demonstrates is a deceleration force of 3.92 metres per second, which would be experienced by a passenger sitting on a seat would fall off the seat. So this is sort of a braking force that is large enough or deceleration force large enough to cause a passenger who normally sits on a seat and fall off. So this is a requirement specified in this equipment.

Chairman: So a passenger seated but without a seat belt would fall off a seat at this level of deceleration?

Mr Chan: Fall off the seat -- well, now, to put it more technically, there was no dislodgement of passenger from the seat in more than 95 per cent of the sample cases. So this is a probability of 95 per cent of the passengers would probably fall off the seat without a seat belt, if a retardation force of 0.4G is applied on the bus suddenly."

So that's the first part I want to take you to.

CHAIRMAN: Before we move on, which is it, no dislodgement

of 95 per cent, or a possibility that 95 per cent would fall off? They are contradictory, aren't they?

MR YK CHAN: I think I would clarify this point. It is the probability of -- 95 per cent of the probability of passengers would not be dislodged from the seat.

CHAIRMAN: Would not?

MR YK CHAN: Would not.

MR DEREK CHAN: That figure of 95 per cent is something I am going to take up with you in the article that you provided to us.

CHAIRMAN: So 95 per cent of passengers seated but without a seat belt would not be dislodged from their seat by 0.4G deceleration?

MR YK CHAN: That's correct.

CHAIRMAN: Thank you.

MR DEREK CHAN: Still on the same issue, can I move forward a little bit in the transcript to page 61, and pick it up at line 3. The question from Mr Chairman was this:

"Can you answer this question: why was it changed from 0.2 to 0.4?

Mr Chan: The reason is that in 2006, when we discussed with the operators on this minimum specification, actually when we have meeting with them and assessing the performance of the requirement, it was come out that because the 0.2 really is a very, very,

very light deceleration force which will come up very, very frequently and doesn't provide any meaningful indication for monitoring purpose, and at that time we have discussed with the operators and agreed at meetings that the 0.2G version was changed to 0.4, but unfortunately, at that time, the number hadn't been changed in the specification, so this time we take the opportunity to update it."

So there's a reference there -- the point that I want to take from that is the operators are saying, "Look, 0.2 is too low; you get a lot of hits coming up."

Page 62, I'm going to read it from line 8, it's the question from Mr Chairman:

"This reference that you made to 95 per cent of people fall off the seat at 0.4G deceleration, is that a study that someone has conducted?

Mr Chan: From our search, it was a study conducted by the US Department of Transportation in 1977.

Chairman: Can you give us the details of that? Do you have that paper?

Mr Chan: We can provide it later."

Just pausing here, that has now been provided by the Transport Department at annex D of the materials provided to us yesterday evening. I'm going to go to that next, but can I just finish off reading the rest of

the transcript, because it's relevant to the point that I wish to take you to in the discussion paper. I will pick it up again at line 16, where my question was:

"Does the study that you refer to include the probabilities of standing passengers losing their balance at 0.2 versus 0.4G?

Mr Chan: Unfortunately, there is no reference made to the standing passengers, because for sitting passenger you have a proper seat and people will sit in a prescribed, defined area, but for people standing, that is another matter, because how people stand is really -- there's not much control and also there's no set form of standing. So, from that, we don't have any sort of equivalent deceleration force applied make reference to standing passengers.

Chairman: Yes, but we can readily infer by using common sense that they would all be on the floor, wouldn't they, if not through the front of the bus?

Mr Chan: Yes and no. Because it really depends on how people stand, and we actually specify in the buses there are lots of devices to facilitate standing passengers, holding bars and grips, and if people are doing the right thing when standing then I think the chance of falling down may not be as severe. But of course we understand people, they come on the bus

carrying their packages and walk around when the bus is moving, then that's another matter."

The point I wish to pick up when I go to the study is the 0.4G and 95 per cent issue and secondly, whether there is any scientific data for standing passengers.

For that, can I take you to annex D of the materials provided yesterday.

Excuse me, Mr Chairman, I will just get the page reference.

CHAIRMAN: Yes.

MR DEREK CHAN: For the record, it's TD-5, page 1862.

CHAIRMAN: Thank you.

MR DEREK CHAN: Mr Chairman, I will be working off the internal pagination.

CHAIRMAN: As always, so am I.

MR DEREK CHAN: Mr Chan, can I first take you to the introduction to this paper, at page 9 of 28 in the top right-hand corner.

CHAIRMAN: Can you supply a paginated number for that, for future use?

MR DEREK CHAN: Yes. The bundle pagination is page 1870, in bundle TD-5.

CHAIRMAN: Thank you.

MR DEREK CHAN: If I can just read the first two paragraphs of this introduction:

"Very little experimental research has been performed on the effects of deceleration on seated users of ground transportation. Of this limited research, only two previous studies have used live human subjects. In studies aimed at developing specifications for street railways (trolley cars), Hirshfield accelerated standing subjects at constant jerk rates of between 1 and 10 g per second. Participating subjects ranged from 11 to 78 years, 39 (87) to 107 g (235 pounds), and 132 (4 feet 4 inches) to 193 centimetres (6 feet 4 inches) in height. In the study, the foot movement accompanying loss of balance resulted in the opening of a sensor switch. Loss of balance occurred at 0.16 g for both forward-facing, unsupported males wearing low-heeled shoes and forward-facing, unsupported females in high heels. Loss of balance occurred at 0.23 g for subjects holding an overhead strap, and at 0.27 g for subjects holding a vertical stanchion.

The second study, by Browning, also measured only standees. Ninety subjects ranging from 15 to 65 years participated. Subjects could face either forward or backward and use a handrail if they so desired. Observer ratings of movement indicated that subjects reacted equally to acceleration (facing forward) or deceleration (facing backward). Ratings of 'slight

relative movement' occurred at 0.055 g for unsupported subjects and at 0.115 g for subjects holding the handrail. Safe emergency deceleration in excess of 0.2 g were postulated for seated subjects."

So it would appear from this that there were studies done even before 1977 on the effects of acceleration or deceleration on standing passengers. Would that be a fair observation, Mr Chan?

MR YK CHAN: Well, this is a short introduction provided in the report in giving a summary of what the author would observe, for which we don't have full access to the details of those studies. So, yes, as quoted in the paper, there were studies --

CHAIRMAN: But this is an academic paper.

MR YK CHAN: Yes.

CHAIRMAN: And of course there is a list of references, and if we go to page 19 of 20, or 27 of 28, we see the Hirshfield paper, do we not, item 1, "Disturbing Effects of Horizontal Acceleration. Electrical Railway Presidents' Conference Committee, September 1932".

MR YK CHAN: Yes, there were previous studies.

CHAIRMAN: And we have the Browning report. The Browning report is October 1972, and it comes from the "Royal Aircraft Establishment, Technical Report, Farnborough" in the United Kingdom. So both reports are identified.

The provenance of the statistics is clear.

Yes, Mr Chan.

MR DEREK CHAN: At this stage, I'm going to go further to another part of the discussion paper, but at this stage can I ask this question. Were these papers or studies considered by the Transport Department when they agreed to use 0.4G acceleration as the threshold?

MR YK CHAN: As far as I understand, these papers were not considered at the time when we considered to change the threshold.

CHAIRMAN: So are you saying that no regard was had to the effects of different levels of deceleration on standees, but regard was had only to seated persons? Is that what you are saying?

MR YK CHAN: Yes.

CHAIRMAN: Thank you. Why?

MR YK CHAN: The parameter adopted in this specification is the specification for the bus operators to develop their black box. At that time, we believed the sitting passengers -- the black box should be able to measure deceleration that affects passengers who are seated in the buses and those who are most secure.

CHAIRMAN: But why not consider the standees, who are going to be affected by lower levels of deceleration?

MR YK CHAN: Well, the passengers sitting on the seat, from

observation, would be more difficult -- well, since they are seated in confined, proper seating, it would be more difficult for them to dislodge, and if we can use the black box to measure the deceleration, which is -- we suppose it is the higher forces that enable to dislodge passengers from the seats, and this is the more serious incidents that we would like to look at.

CHAIRMAN: So what are you saying, that standees being thrown to the floor is less serious?

MR YK CHAN: Not at all, but I would invite Mr Shum to supplement further technical points.

CHAIRMAN: Yes, probably a good idea.

MR WILLIAM SHUM: One of the considerations is that for the seated passengers we seldom ask them to hold the handrail tightly, and we had a series of publicity advising standing passengers to hold the handrail or the other parts firmly when they are standing inside the bus. That is one of the considerations we believe to be taken into account when considering revising the deceleration rate from 0.2G to 0.4G.

CHAIRMAN: To be fair to you, you weren't involved in this decision, were you, in 2005-2007; is that right?

MR WILLIAM SHUM: No -- yeah, I am not involved in the discussion at that moment.

CHAIRMAN: Do you have any more information than we have

here as to why this change was made, to help you answer these rather obvious questions?

MR WILLIAM SHUM: No, sorry. We don't have that.

CHAIRMAN: So you are doing the best you can to produce ex post facto rationalisation for the change; is that it?

MR WILLIAM SHUM: Yes.

CHAIRMAN: Thank you.

MR DEREK CHAN: Just to round up this point, can I take you to another passage at page 26 of 28 of the same document. That's TD-5, page 1887.

Again, I will just read from the first and second paragraphs:

"The goals of this study were both to provide data to understand the influence of various parameters on seated passengers during emergency stops, and to obtain initial estimates of the emergency decelerations to be specified for transit systems.

These data indicate that seated passengers can safely experience deceleration levels about twice those reported for standees. A conservative estimate of the emergency deceleration to be specified in the design of transit systems at which 84 per cent of the occupants of an untilted forward-facing standard transit seat will remain securely in the seat is 0.47 g. To insure

retention of 84 per cent of the occupants of a side-facing seat, the best estimate is 0.41 g. And, for a seat tilted back 5 degrees (facing forward), the best estimate is 0.52 g."

Mr Chan, there's a reference to 84 per cent of the occupants in an untilted forward-facing seat. What I can't find is a reference to 95 per cent. It may be that I have missed something. Can you perhaps direct me to the part where the 95 per cent comes from?

MR YK CHAN: I will invite Mr Shum to reply to this question.

MR WILLIAM SHUM: In the "Discussion" section, the 0.41 deceleration rate is referring to the side-facing, and for what we are referring to, can I bring you to page 11 of this paper.

CHAIRMAN: Are you taking the numbers from the top or the bottom? Because there's a difference.

MR WILLIAM SHUM: That's the page with three graphs.

CHAIRMAN: But there are two sets of numbers. One appears at the top, and it says, for example, "26 of 28", but when you look at the bottom, it says "18". So which numbers are you taking?

MR WILLIAM SHUM: The page number is --

MS MABLE CHAN: The bottom.

CHAIRMAN: Thank you. So page 11.

MR WILLIAM SHUM: Yes. Here is the top-most graph. In this top-most graph, there is the wording "95 per cent retention". Yes, this one.

MR DEREK CHAN: Is that the one at 0.42G?

MR WILLIAM SHUM: Yes, referring to 0.42G. You can also notice in the X axis, there is an item, a figure, 0.4G. Yes, this one.

MR DEREK CHAN: So, if I understand the graph correctly, at 0.4G, 95 per cent of the seated passengers would not be dislodged; is that correct?

MR WILLIAM SHUM: Yes.

CHAIRMAN: It's more than 95 per cent, isn't it, on the graph?

MR WILLIAM SHUM: Yes.

CHAIRMAN: So what is it? 98, something like that?

MR WILLIAM SHUM: We can't have an estimate. That's why we quote more than 95 per cent of the sampled case would not be dislodged under the 0.4G deceleration.

CHAIRMAN: Thank you.

MR DEREK CHAN: In the "Discussion" passage that I just read out previously, there was also a reference to the data indicating that seated passengers can safely experience deceleration levels about twice those reported for standees.

So it would appear, on the face of this study, in

the passages I just read out, including the passages read out in the introduction part -- it would appear that standing passengers holding onto fixed supports, such as overhead straps or vertical bars, would lose their balance at deceleration values of 0.23G or 0.27G. Do you agree with this observation on what appears in the "Introduction" part of this paper?

CHAIRMAN: Those are the results of the Hirshfield study, 1932.

MR WILLIAM SHUM: Yes.

MR DEREK CHAN: So, on the face of the figures put forward in this study, it would appear that the selection of a deceleration threshold of 0.4G would adequately look after the interests of the sitting passengers but not the interests of the standing passengers. Do you have any observations to this suggestion?

MR WILLIAM SHUM: Yes.

MR DEREK CHAN: So does the Transport Department consider that more careful and scientific analysis ought to be conducted on whether the 0.4G threshold sufficiently protects the safety of standing passengers?

MR YK CHAN: Yes. I think we can do more to study, to find out how the various deceleration force could have an effect on various types of passengers such as those standing and sitting.

CHAIRMAN: The papers that we've been looking at were 1977, 1972 and 1932. Have you looked for papers more recently than that, academic technical research into this issue, in the last 50 years?

MR YK CHAN: That's what we have been trying to do and --

CHAIRMAN: You've tried to do that?

MR YK CHAN: We have tried.

CHAIRMAN: With what success?

MR YK CHAN: Not much success. This is the paper that we can find out.

CHAIRMAN: Again, you were somebody not involved at the time that this was discussed; is that right?

MR YK CHAN: Correct.

CHAIRMAN: So when was this attempt made to look for more recent studies?

MR YK CHAN: In the last couple of weeks.

CHAIRMAN: Can you help us as to where you were looking? Who did you contact?

MR YK CHAN: We have our engineers to do the internet search and also dig out from our files and documents to see whether there actually was any material reference that we can make in regard to the study of this subject. So far, our searches on the internet and also other sources have not been very successful.

CHAIRMAN: So internet searches, your own records, and what

else?

MR WILLIAM SHUM: That's the only two ways.

CHAIRMAN: Have you contacted the excellent local universities, their departments of engineering, Hong Kong University of Science and Technology, that is Prof Lo's university?

MR WILLIAM SHUM: In the past few weeks, we haven't done that.

CHAIRMAN: Thank you.

MR DEREK CHAN: Mr Chairman, I will move on to the next topic, of seat belts.

CHAIRMAN: Please do.

MR DEREK CHAN: Ms Chan, I rather assumed that you will be dealing with this, so I will be addressing you, but if you feel other colleagues are more suited to answer, please indicate.

Can I first pick up the seat belt topic from the working group's full report, because the issue of seat belts was dealt with extensively in that report. Again, for the purposes of the record, the full report begins at TD-5, page 1757, and I would invite that attention be drawn to section 3 of that report, which deals with the issue of seat belts.

I would like to start this topic by first looking at the position in other jurisdictions, firstly, and

secondly, what the Transport Department's historical position on this issue is. So, in respect of the overseas jurisdictions, can I first take you to paragraph 3.11 of this full report.

CHAIRMAN: Is there a paginated number for this page?

MR DEREK CHAN: Yes, Mr Chairman, the internal pagination is page 28, the bundle reference is TD-5, page 1788.

CHAIRMAN: Thank you.

MR DEREK CHAN: Again, I will just read out paragraphs 3.11 and 3.12. At 3.11, the report says this:

"Noting the divergent views of franchised bus operators, the working group has reviewed the prevailing overseas practices or requirements on the installation and wearing of seat belts on buses. Currently, for inter-city or cross-boundary routes, some overseas jurisdictions (for example United States, United Kingdom and Netherlands) have mandated the provision of seat belts for all passenger seats, while others (for example United Kingdom, Netherlands, and Australia (Victoria)) have imposed mandatory requirement of wearing seat belts. Nevertheless, for the urban buses or buses allowed to carry standing passengers, none of the overseas jurisdictions that have been reviewed thus far have statutory requirements for the provision of seat belts on passenger seats. According to the transport

authorities of those jurisdictions, the urban buses are typically used for short journeys, in terms of both time and distance, and undertaken at moderate speeds on urban routes. Thus, no seat belt requirement for passenger seats on these urban buses has been imposed. A summary of the findings is at the appendix IV."

And appendix IV is page 1809 in the bundle.

Mr Chairman, I think page 1809 simply sets out what had been described in the paragraph that I just read already.

CHAIRMAN: Yes, I have it in front of me.

MR DEREK CHAN: So, for urban buses with standing passengers, there is no seat belt requirement in those jurisdictions reviewed.

Just one minor matter of clarification. When was this review conducted in the context of this working group report? Would it be in the course of 2018 or before that?

MS MABLE CHAN: The review is conducted in 2018, in preparation and in the process of the discussion of the working group report.

MR DEREK CHAN: Thank you. I ask that because a similar review was conducted in 2005-2007. Before I go to that, perhaps I will just round off this part by reading paragraph 3.12 of the report as well. Paragraph 3.12

says this:

"The above review findings were also echoed by the three bus manufacturers who advised that seat belts were not required for buses travelling in cities in other countries, and that in Europe, seat belts are only required for inter-city coach without standing passengers and passengers on city bus tend not to wear seat belt due to its short travelling time. They also opined that the retrofitting of seat belt in franchised buses of Hong Kong could not protect standing passengers."

3.12, as I understand it, is a reference to the observations of the bus manufacturers that were expressed during the subgroup meetings of the working group that involved the bus manufacturers; is that correct?

MS MABLE CHAN: Correct.

MR DEREK CHAN: So, with the 2018 review in mind, can I then move back in time to a similar review conducted in 2005-2007. With that, can I stay on the working group report and go to paragraph 3.2 to introduce that historical review, because it's referred to in the report. Paragraph 3.2, internal pagination page 23, bundle reference page 1783, says this:

"The TD has made it a requirement to install seat

belts on selected seats in the light of accidents involving franchised buses in 2006 and 2007. The Transport Department recommended that the franchised bus operators agreed in 2007 that seat belts should be retrofitted at the four front seats on the upper deck of all the post-1997 licensed buses to prevent passengers from falling out from the upper deck front seats. We have taken the opportunity in the 2012, 2015 and 2017 franchise negotiation exercises to make it a franchise requirement for bus companies to install seat belts at all exposed seats."

So that's a summary of the review undertaken in 2006-2007. Again, can I go to one of those historical documents in 2006 to illustrate the review undertaken back then. For that, can I refer you to the bundle SEC-1, page 266.

At page 266, I hope you have before you a paper prepared by the Transport Department for the Legislative Council Panel On Transport, "Safety of Franchised Bus Operations". You can see the date of the paper at page 272, which is October 2006.

Can I draw your attention directly to paragraph 19 at page 271, which appears in the section titled, "Seat belt on Franchised Bus".

Can I read directly paragraphs 19 and 20 for the

point of the overseas jurisdiction review conducted back in that time. Paragraph 19:

"We have conducted a research on overseas practices regarding the fitting and wearing of seat belts in buses. A summary of the corresponding seat belt requirements is at annex."

The annex is at page 273, but I will read on first:

"It can be seen that no overseas country requires fitting of seat belts in passenger seats of buses designed for urban use or for carrying standing passengers. Studies conducted in Australia and Canada indicated that the additional safety benefit of installing seat belt on all seats in a bus might not be as great as envisaged and that it is very difficult to ensure that all passengers will use seat belts.

In view of the above, we consider that it is not appropriate to introduce mandatory requirements for installation and wearing of passenger seat belts for franchised buses. However, we will continue to work with the franchised bus operators to identify measures for better protection of passenger safety."

So is it fair to say that the overseas jurisdictions that the Transport Department have considered have not changed their stance between 2006 and 2018 in respect of not requiring seat belts to be installed on urban buses

with standing passengers?

MS MABLE CHAN: Yes. I would say that in the two rounds of review, the overseas experiences and practices as revealed from the review show that the overseas jurisdictions' stance towards the installation of seat belts remains largely the same.

CHAIRMAN: There is reference in paragraph 19 to studies conducted in Australia and Canada indicating that the "additional safety benefit of installing seat belt on all seats in a bus might not be as great as envisaged", and then the second issue, "and that it is very difficult to ensure that all passengers will use seat belts".

Can you give us references to these two studies, or perhaps there are more, Australia and Canada?

MS MABLE CHAN: I do not have the details of the references of the studies with me now, but we can certainly provide the reference afterwards.

CHAIRMAN: Thank you.

Do any of your representatives know to what studies this is a reference? I know the Australians, particularly New South Wales, have examined seat belts on a number of occasions.

MS MABLE CHAN: Yes.

CHAIRMAN: And this is consistent with what they have had to

say.

MS MABLE CHAN: Yes.

CHAIRMAN: No one can help us? But you can in due course?

MS MABLE CHAN: We have those materials and the references, but offhand we are not in a position to quote the specific references.

CHAIRMAN: No, but you will provide them in due course?

MS MABLE CHAN: I will provide that, yes.

CHAIRMAN: Thank you.

MR DEREK CHAN: So, with that historical context in mind --

MS MABLE CHAN: Sorry, Chairman, my colleague Mr Tony Yau would like to add on the comparison of the stances of the overseas jurisdictions. Perhaps I will invite him to point out an observation in regard to the US.

CHAIRMAN: Yes. Please do.

MS MABLE CHAN: Thank you, Chairman.

MR TONY YAU: Thank you, Mr Chairman.

Mr Chan, you are right that for urban buses, the requirements are more or less the same between 2006 and 2018 reviews. But if you consider, except for urban bus, that means for some inter-city buses, there is a change in United States legislation. In November 2013, the US passed a new legislation, requiring seat belts for each passenger sitting position in all new buses, except urban buses or school buses.

CHAIRMAN: It's urban buses that we are talking about.

MR TONY YAU: Yes.

CHAIRMAN: We know, for example, that coaches in the United Kingdom, say going between Birmingham and London, they are required to provide seat belts, but buses in both of those cities are not. So it's the urban buses we are interested in.

MR TONY YAU: Yes, but those inter-city buses are more or less the same like our long-haul buses, that means from Hong Kong Island to NT, those buses are required to travel on several expressways, the high-speed expressways.

CHAIRMAN: And are there any speed limits at which those buses can travel in the United States? Because there is a difference between travelling at 70 kilometres per hour and being able to do 110 kilometres per hour, is there not?

MR TONY YAU: Yes.

CHAIRMAN: Is there a difference? Are they allowed to do high speeds?

MR TONY YAU: I think there is also a requirement for the bus running at high speeds in those jurisdictions.

CHAIRMAN: Yes. One can see the obvious difference. It is no doubt the logic, the rationale, applied to coaches -- coaches going down English motorways do so at

considerable speed, not at 70 kilometres per hour.

MR TONY YAU: Yes.

CHAIRMAN: Yes, Mr Chan.

MR DEREK CHAN: So, with that historical context in mind, can I then consider the current position adopted in the working group report.

Before I go to the details, I understand that the position is slightly different in respect of new buses and in respect of retrofitting existing buses, so I will deal with those two situations in turn.

Going firstly to the position with new buses, can I please take you to paragraph 3.4 of the report, which is internal pagination page 24, and bundle reference page 1784. Can I just read paragraph 3.4 first:

"As regards the installation of seat belts for all passenger seats on franchised buses, all three double-deck bus manufacturers (that is ADL, Volvo and MAN) have confirmed that it is technically feasible to supply new buses with seat belts for all passenger seats which comply with the aforesaid international standards if such installation is made as a procurement requirement. In light of this, the working group recommends that seat belts should be provided for all seats in future procurement of new buses. All franchised bus operators have agreed that all new buses

ordered from July 2018 onwards should be installed with seat belts."

So that's the position for new buses.

Before I ask the next question, I want to draw attention to another piece of information that may or may not be relevant to the next question that I am about to ask. That is the cost of installing seat belts on all seats on new buses. For that, can I take you to -- it would be good if you have the working group report open in front of you while we go to this other reference -- KMB-12, page 4887-5.

Perhaps I can go to 4887-1 first, just to give that document some context.

Ms Chan, at page 4887-1, you should have before you the notes of the second meeting of the working group, held on 23 April 2018.

Can I draw your attention to paragraph 16 of those minutes, which is at page 4887-5, and again I will just read out paragraph 16:

"After checking with the bus manufacturers on the feasibility for installation of seat belts for all passenger seats for new buses, all franchised bus operators advised that it was technically feasible to install seat belts for all passenger seats for new buses to be procured. KMB/Long Win supplemented that it would

cost about an additional of 5,000 pounds for each double-decker to install seat belts for all passenger seats. All bus operators agreed to incorporate this requirement in their new single-decked buses and double-decked buses to be procured."

The reference to 5,000 pounds' extra cost per bus to install seat belts on all seats referred to in the minutes, did that turn out to be a correct estimate, with the information you have now, compared to April 2018?

MS MABLE CHAN: This is the information that we are aware.

Thank you.

MR DEREK CHAN: So it's correct, an extra 5,000 pounds?

MS MABLE CHAN: Yes.

MR DEREK CHAN: With that information in mind, my question is this: what has changed since 2006-2007 that led to the Transport Department making this recommendation for new buses? Has the analysis on the benefit of seat belts on urban buses with standing passengers changed during that time?

MS MABLE CHAN: In our working group discussion, the seat belt is one of the key areas that we have looked into. Before preparing for the working group discussion, the Transport Department has undertaken to conduct a further review of the overseas experiences. As I just answered

to the senior counsel's question, it appears to us that the overseas jurisdictions' stance towards the installation of seat belts for urban buses remains generally the same.

That said, we have taken this issue very seriously. There has been a number of discussions raised in the Legislative Council Panel on Transport, so we have to look into this subject very carefully. We consider it from different aspects. First, it's from a road safety and public transport safety aspect. Secondly, we also look into the technical feasibility of installation of seat belts for new buses and on existing buses. Thirdly, we also look into the cost and financial implications of doing this extra installation of seat belts for all passenger seats.

On the public transport safety point of view, we have actually taken this seat belt issue to the Road Safety Council for discussion and for seeking their advice. On this aspect, I will later invite Mr Tony Yau to supplement on that, on our position regarding the safety and protection that we think the installation of seat belts would provide to the passengers on board our urban buses in Hong Kong.

On the technical feasibility --

CHAIRMAN: Before you move on, when did you refer this

matter to the Road Safety Council?

MR TONY YAU: In April, Road Safety Research Committee, subcommittee, we discuss.

CHAIRMAN: In April of this year?

MR TONY YAU: Sorry, it should be July, July's meeting.

CHAIRMAN: Presumably, by a paper or an email?

MS MABLE CHAN: Yes, paper.

MR TONY YAU: It's a meeting, it's a subcommittee meeting. We discussed by paper.

MS MABLE CHAN: A paper was submitted.

CHAIRMAN: Can you provide a copy of that as well?

MS MABLE CHAN: Yes.

CHAIRMAN: What date in July was this meeting?

MR TONY YAU: May I check my diary?

CHAIRMAN: Yes. Take your time.

MR TONY YAU: 17 July.

CHAIRMAN: Thank you.

Yes, Mr Chan.

MR DEREK CHAN: Yes, Ms Chan, I think you were --

CHAIRMAN: I interrupted you, Ms Chan.

MS MABLE CHAN: That's okay.

CHAIRMAN: You were dealing with the first aspect, that's for road safety.

MS MABLE CHAN: Yes, on road safety and public transport safety, we have consulted the Road Safety Council, the

relevant committee, and presented a paper. But on this score, I would also ask Mr Tony Yau to elaborate a little bit more in a minute.

I would like to just cover the other two aspects. On the technical feasibility, in the working group discussions with the presence of the bus operators and the bus manufacturers, we have actually tackled the issue on two fronts. First is on the new buses. As revealed from the meeting notes, we have looked into the feasibility of whether or not seat belts can be installed for all passenger seats for the new buses to be procured, and we got confirmation from the bus manufacturers that this is technically feasible, and we also have the bus operators present at the meeting confirming that they would be prepared to take this into account for the procurement of the new buses in the future.

On the costing and the financial implications, for the new buses, the additional 5,000 pounds for each double-decker bus amounts to about 1.5 per cent of the total cost of a new double-decker bus. At the meeting, the bus operators considered that it is technically feasible and also operationally feasible for them to procure new buses with the installation of the seat belts on board for, for the new buses.

I think the next question will be on those existing buses.

We also go through the different bus models.

MR DEREK CHAN: Ms Chan, for retrofitting, I'm going to take that as a separate topic, if I may, which I will be expanding on that, and then I will be asking for your views on a number of issues relating to retrofitting, if you don't mind.

MS MABLE CHAN: Sure. That's okay.

Should I invite Mr Tony Yau to say --

CHAIRMAN: I think it's more efficient if we allow counsel to explore the matters that he thinks are relevant for us. If matters are not a raised that you feel you want to raise, by all means do so, but can we proceed by a questioning method first.

MR DEREK CHAN: Ms Chan, you have helpfully referred to three considerations. What appears to me -- and I may not be correct but it appears to me that there doesn't seem to be an attempt to carry out an analysis on the benefits, an objective, scientific analysis on the benefits that seat belts on all passenger seats may bring. Is that a fair observation?

MS MABLE CHAN: I beg your pardon?

CHAIRMAN: Are you addressing the issue of cost/benefit analysis, or only benefit?

MR DEREK CHAN: We have the cost here of 5,000 pounds.

CHAIRMAN: Yes. The question appears to be: you don't to have conducted a cost/benefit analysis. That's the proposition being put to you.

MS MABLE CHAN: I would not agree.

MR DEREK CHAN: Again, just a side point --

CHAIRMAN: Before we move on -- what analysis did you do then, if you don't agree with that proposition?

MS MABLE CHAN: First, we have looked into the cost of the installation of seat belts on all passenger seats for new buses. On the other hand, we have also discussed and looked into the benefits of providing seat belts for all passenger seats for new buses.

CHAIRMAN: And what was the result of that analysis?

MS MABLE CHAN: We considered that the provision of seat belts for all passenger seats will render additional protection for the passengers on board the new buses, and on that I would invite Mr Tony Yau to just supplement on this aspect.

CHAIRMAN: Yes.

MR TONY YAU: If we are required to do any cost/benefit analysis, we have to base on like-to-like comparison.

What we are concerned with is the safety belt is a protective measure. What others previously proposed, those in-vehicle devices, such as collision alert,

electronic stability control, speed limiter and retarders, they are all preventive measures. They are trying, via transport technology, to prevent accidents occur. But for seat belts, it's a protective measure. That means, after all, the accident still happens and the seat belt is the general measure that can protect the passengers.

So if we need to compare or do a cost/benefit analysis, we have to find other device that has the same protective performance or is in the same category as the seat belt. I am not seeing any similar things that can provide similar benefit to bus passengers and have the same protective measure during the accidents.

And considering the cost, during the working group we discussed with the bus operators, the cost is about 5,000 pounds per vehicle. We are talking about each new bus is over HK$3 million cost. That means the additional cost is only about --

CHAIRMAN: We've been told it's about 1.5 per cent of the cost of a new bus.

MR TONY YAU: Yes. So comparatively the cost is quite low, and the protective benefit is quite good, very significant.

CHAIRMAN: What are the incidence of passengers being injured while they are seated on buses at seats where

there are no seat belts? Did you look at that?

MR TONY YAU: There is some analysis but it is for private cars, the seat belt can reduce the severity of the accident.

CHAIRMAN: Cars are quite different from buses. Did you look at the incidence, the number, of passengers being injured or killed whilst seated at bus seats that are not equipped with seat belts? Did you look at that?

MR TONY YAU: There are no specific study on public transport --

CHAIRMAN: So is the answer no?

MR TONY YAU: (Shook head).

CHAIRMAN: But why not?

MR TONY YAU: We also discussed, as I mentioned before, in the Road Safety Research Committee, and I looked at -- we have mentioned it in the working group report, 5.10.

CHAIRMAN: The question is simple: why didn't you look at the number of people that are being injured or killed while seated at bus seats where there are no seat belts, as an indication of what the cost of the problem is?

MS MABLE CHAN: Chairman, may I add?

CHAIRMAN: Please.

MS MABLE CHAN: We need to acknowledge that based on colleagues' evidence, we have not made any quantifiable analysis into the causes of the accidents whereby any

passengers without a seat belt will be more seriously hit. But I would like to point out the historical perspective --

CHAIRMAN: Before you do that, "why not" is the question; why haven't you done a quantifiable analysis?

MS MABLE CHAN: We have not done so and I do not have a ready answer, but I would like to point out --

CHAIRMAN: Let me try to help: are there statistics available? Have these records been kept? Have they been collated?

MS MABLE CHAN: Chairman, I don't think there are specific statistics collected or collated in this regard.

CHAIRMAN: None by the police?

MS MABLE CHAN: We cannot answer on behalf of the police.

CHAIRMAN: Well, you have access to their accident data bank, do you not? I'm not asking you to answer on behalf of them. Do they have any category of statistics that helps you with this?

MR TONY YAU: Chairman, in our road traffic accident statistics we issue to the public each year, we have those figures.

CHAIRMAN: But you have figures presumably that include cars. I'm asking about buses.

MR TONY YAU: We have buses.

CHAIRMAN: Yes. What have you got?

Perhaps you would like to consider this. I don't want to be unfair to you. If you need a bit of time to collate the information, do so, and we will come back to it later.

Yes, Mr Chan.

MR DEREK CHAN: Mr Chairman, since reference to the police data has been made, I am asking those assisting me to find the reference for the police letter that they sent to us very recently, that does have some data on seated passengers being injured.

CHAIRMAN: Yes, it does. Yes, you have reminded me.

MR DEREK CHAN: Yes.

CHAIRMAN: Is this material on our internet, on our website?

MR DEREK CHAN: Yes, it is. I'm just getting it.

It may not answer the point fully.

CHAIRMAN: No.

MR DEREK CHAN: But at least it would be of some relevance.

May I please draw your attention to MISC-1C, page 124-561.

Mr Chairman, it's a letter from the police to this committee, dated 3 October 2018, in case you have that document somewhere else.

Ms Chan, I hope you have before you this letter from the police to the committee dated 3 October 2018. At paragraph 3, the police notes:

"Traffic Branch Headquarters could not find any record of any consultation from the Transport Department regarding the recommendation to install seat belts on buses in 2007."

And the rest of the paragraph talks about the meeting of the Road Safety Council.

Over the page, at paragraph 4, the police says this:

"The police have been keeping statistics on the number of passengers who were injured while seated on a bus and not wearing a seat belt. The figures were tabled as below."

We can see statistics were kept by the police in 2015, 2016 and 2017 of what appears to be passengers who were injured wearing or not wearing seat belts.

Has this sort of data been considered by the Transport Department when making the recommendation that seat belts should be installed on all new buses, when considering the benefit analysis?

CHAIRMAN: Or is this the first time you have seen this data?

MR TONY YAU: No, no, we are aware of those data.

CHAIRMAN: So you have seen it?

MR TONY YAU: Not exactly. They are usually in different presentations. But the figures, the source, we have seen.

CHAIRMAN: Did you consider it when making your analysis?

MR TONY YAU: Because currently those casualties, maybe the passengers are not -- no seat belt is provided to them, and for our proposals to provide seat belt, did it really concern with the security?

CHAIRMAN: No. The question is very simple: did you consider this data or not? Don't tell us what else you considered, but did you consider it or not in your analysis?

MR TONY YAU: We have not considered --

CHAIRMAN: Thank you. "Yes" and no" are very simple words. Is there something more you wish to say about what you did consider?

MS MABLE CHAN: Chairman, may I add that to be fair to my colleague, he is the road safety expert in the department. He has been participating in the Road Safety Council and the relevant subcommittee meetings. He has close liaison with the police. I think, in their experience and based on their past research and work, they have gathered and have access to the police figures. It's true that they have not considered the figures as tabulated in this form. So I think it's true for them to say that they have not considered such statistics in this presentation, but as Tony would just like to present and explain to this committee and

honourable chairman, it is their expert and professional analysis that provision of seat belts will provide additional protection to a passenger when seated on a bus.

That's all I would like to supplement. Thank you, Chairman.

CHAIRMAN: Yes. We had a chief superintendent of police giving evidence here, and he reminded us of that well-worn phrase, "Seat belts save lives". That's not in dispute.

The issue is what is problem, what is the extent of the problem on buses what is the cost of fixing it, and that's all we are trying to find out.

MS MABLE CHAN: Yes.

CHAIRMAN: Mr Yau, did you perform any analysis, make any paper on this point, that can help us understand what you say you did, and if so can you provide it to us?

MR TONY YAU: So that's why, in our working group report, 5.3 and 5.4 ...

CHAIRMAN: Can you answer my question first: did you produce a paper addressing this cost/benefit analysis?

MR TONY YAU: No. I want to mention --

CHAIRMAN: Can you just answer the question: did you do so or not?

MR TONY YAU: We are going to request in the working group

report that those --

CHAIRMAN: No, Mr Yau. Please answer my question. I will give you all the time you want to give whatever other explanations you want to give. Did you prepare a paper that addresses this issue? Take your time to think about it. It's a simple question.

MR TONY YAU: No.

CHAIRMAN: Thank you. Now, what else do you want to say?

MR TONY YAU: As mentioned in paragraph 5.4 of the working group report, that's why, for existing buses, that means the retrofitting of seat belts of existing buses, the working group recommends that TD, the franchised bus operators and the bus manufacturers to continue to work closely.

CHAIRMAN: Very well. That's what you wanted to tell us. We now know what you wanted to tell us.

Yes, Mr Chan.

MR DEREK CHAN: Again, Ms Chan, my next question is this. It may be unfair in the sense that it asks you to explain what may or may not have been done by your predecessors, but my question is this. If the Transport Department considers that seat belts are so good, then why wasn't such requirement imposed in the 2006-2007 review?

MS MABLE CHAN: I cannot answer on behalf of my predecessors

of the review at that time and the position taken at that time, but in the course of the working group discussion, the Transport Department's point of view is that the seat belt would render additional protection to passengers, but whether or not it can achieve the effect that we would like to would depend very much on whether the passenger will use the seat belt, in the first place, and whether or not they are seated.

We know the constraints that may affect the effectiveness of the seat belt, but notwithstanding that we think that for new buses, the installation of seat belts is cost-effective, but it will render additional protection, while the additional cost is not significant. But I will address the retrofitting of existing buses in a later stage.

Thank you.

CHAIRMAN: Yes, Mr Chan.

MR DEREK CHAN: Before I move on to retrofitting, perhaps I can just make one side point.

In KMB's investigation report on the Tai Po accident, which was made available to the Transport Department on 12 March, so before the first meeting of the working group, KMB already indicated voluntarily that it would install seat belts on all passenger seats.

Can I just give a page reference -- I think you

remember that.

CHAIRMAN: Can we have that reference, please. And can we have it on the screen.

MR DEREK CHAN: KMB-1, page 114, paragraph 40.

Mr Chairman, 114 is part of the KMB investigation report on the Tai Po accident dated 12 March 2018.

CHAIRMAN: Yes. We get that from page 98, which gives us the front page.

MR DEREK CHAN: Yes.

If I can just read out paragraph 40, headed "Safety belts", which is in part 5 of the investigation report, titled "Other measures to enhance bus safety". If I may just read out paragraph 40:

"KMB has already requested its suppliers to install safety belts on all seats as a standard feature for new buses ordered after 5 March 2018. As for buses that are currently in service, where certain routes so require, safety belts will be installed on the upper deck of KMB buses phase by phase."

Now, it would thus appear that even before the first meeting of the working group, KMB themselves have already taken the step to install seat belts on all passenger seats.

CHAIRMAN: On all new buses.

MR DEREK CHAN: On all new buses. Thank you, Mr Chairman.

So my question is this. Given this position of KMB, to what extent did this position play a part in your working group's recommendation that seat belts should be installed in all passenger seats for the other franchised bus operators as well?

MS MABLE CHAN: First of all, I would like to say that the receipt of the KMB's report to me on 12 March was later than our email to inform the various bus operators on 6 March regarding the measures that we would like to study to enhance the franchised bus safety.

We have provided the committee with our email on --

CHAIRMAN: This is not in dispute. On 15 February, the LegCo discussion focused, to some degree, on seat belts.

MS MABLE CHAN: Yes.

CHAIRMAN: So it's not surprising that you have put this on your agenda. There is no dispute about that.

MS MABLE CHAN: Okay.

CHAIRMAN: The question being asked is this. The fact that KMB have come to this decision before the working group ever met, did that play a part in you requiring that other -- or proposing that all franchised bus operators install seat belts on new buses? That's the question: did it play a part or not?

MS MABLE CHAN: We take note of the plan of KMB to request the suppliers to install safety seat belts on all seats

for their new buses. We take note of that.

But in the working group discussion on the installation of seat belt issue, we take our due diligence to look into the technical feasibility, the financial implication and the road safety perspective of this --

CHAIRMAN: Forgive me interrupting, but to crystallise it, you took note of the feasibility, the cost, and the benefit -- the road safety perspective, you call it -- but that means the benefit to passengers?

MS MABLE CHAN: Yes.

CHAIRMAN: Yes, Mr Chan.

MR DEREK CHAN: Mr Chairman, I was going to move to the issue of retrofitting seat belts.

CHAIRMAN: Very well, but before we leave this topic -- can you help the committee as to this: what proportion of the franchised buses in Hong Kong does the KMB Group, if I can call it that, operate?

MS MABLE CHAN: You means in terms of the number of buses?

CHAIRMAN: Yes, buses. 4,000, from my memory?

MS MABLE CHAN: 4,000 out of 5,900.

CHAIRMAN: Well, let's call it 6,000. So two-thirds of the buses. The company running two-thirds of the buses has decided to introduce seat belts on new buses, leaving the consideration about what to do with the other

one-third, and you say of that, "We took note of that"; is that it? That's your evidence?

MS MABLE CHAN: Yes.

CHAIRMAN: Thank you. We will take a 20-minute break now.

MS MABLE CHAN: Thank you, Chairman.

(11.32 am)

(A short adjournment)

(11.53 am)

CHAIRMAN: Yes, Mr Chan.

MR DEREK CHAN: Mr Chairman, if I may then move on to the issue of retrofitting.

Again, I am going to start by looking at the passages in the working group report that deals with the issue of retrofitting. I'm going to read more passages than before because I recognise that the issue of retrofitting is more complicated.

So I think, to do justice to the analysis carried out in the report, I ought to read a few paragraphs in full. Can I first take you to paragraph 3.8 of the working group report, internal pagination page 26, bundle reference TD-5, page 1786.

Mr Chairman, there appears to be something wrong with the screen. Ah, there we are.

CHAIRMAN: Yes. Has that been resolved?

MR DEREK CHAN: Yes.

CHAIRMAN: Thank you.

MR DEREK CHAN: Ms Chan, do you have paragraph 3.8 in front of you?

MS MABLE CHAN: Yes.

MR DEREK CHAN: I'm going to read out 3.8, 3.9 and 3.10, and pausing towards the end of 3.10 to make a few remarks, but I will start reading first. 3.8 is contained in a section, "Retrofitting of seat belts on existing franchised buses", and the issue now is retrofitting on the upper deck. 3.8 says this:

"Even though it would be technically feasible to retrofit seat belts on all passenger seats on the upper deck, there are other implications. First, it is expected that the weight of the bus will increase by 300 to 400kg and the passenger carrying capacity will probably be reduced by 7 to 8 passengers as a result of the modification. Moreover, the retrofitting and testing work for each franchised bus will take considerable time to complete and hence will affect the bus availability rate for bus operation during the process. Subject to the manpower available for the retrofitting works ADL and Volvo have estimated that the retrofitting would take about one week, requiring 3 to 4 skilled labour, per bus. However, since bus manufacturers have indicated that they could not provide the manpower and workshop

for the retrofitting work, the franchised bus operators would need to carry out the work by engaging contractors or utilise their own manpower and workshop. The availability of skilled workers and workshop facilities are critical factors in determining the time required for the retrofitting and testing work. Based on a very rough estimate, it would take about 6 to 12 years to complete the full retrofitting for about 3,300 buses.

3.9. In the light of the above, some bus operators have expressed concerns that the retrofitting of seat belts would not only incur significant financial implications, but also considerable time and manpower resources, not to mention the need to re-deploy or procure additional buses to maintain the existing bus service level during the whole process."

Pausing here, the reference to "significant financial implications" has a footnote 10 next to it, and at the bottom of the page, footnote 10 says this:

"In the absence of a detailed study on the technical details for retrofitting seat belts on all seats in the upper deck, a rough estimate on the costs of retrofitting a bus is about HK$200,000 (excluding manpower and overhead costs)."

So, pausing here, it would appear from this that on the cost side of the analysis, you are looking at

something like HK$600 million in order to carry out the retrofitting over six to twelve years. Is that a correct rough way of looking at it?

MS MABLE CHAN: Correct, in terms of a rough estimate.

MR DEREK CHAN: If I may then continue reading from --

CHAIRMAN: Before you do so, what is meant by "excluding manpower and overhead costs"? What costs are they?

MR YK CHAN: Mr Chairman, may I answer this question? The cost quoted in the footnote only comprises the quote provided by the manufacturers on the equipment and fittings. In completing the whole retrofitting work, additional costs will be involved, including labour and other overheads, which is not included in this amount, at that time.

CHAIRMAN: So the manpower costs of the engineers who retrofit these devices is not included; is that it?

MR YK CHAN: It's not included because at that time there was no estimate about it.

CHAIRMAN: And what about the overhead costs? Is that something to do with the fact that the bus is out of action for a week?

MR YK CHAN: Another overhead might be workshop rental, things like that.

CHAIRMAN: I see. But what about the fact that the bus is out of action; is that costed into this?

MR YK CHAN: That's not factored into this at all.

CHAIRMAN: So that's an extra cost that's not yet calculated?

MR YK CHAN: That's correct.

CHAIRMAN: So the 600 million global figure is plus, plus, plus; is that correct?

MR YK CHAN: Yes.

CHAIRMAN: Thank you.

MR DEREK CHAN: If I may continue reading paragraph 3.10:

"In this regard, all franchised bus operators opine that, from their day-to-day observation, those passengers sitting on exposed seats do not normally wear seat belts. Seen in this light, the retrofitting works appeared not to be cost-effective."

Pausing here, I will ask you to note that this is something that I want to follow up with after we have read all the passages.

"On the other hand, they consider that public education should be conducted to promote the use of seat belts on buses. Amongst the five franchised bus operators, KMB and Long Win emphasise that they support the seat belt installation for new buses. Subject to the proposal from bus manufacturers, KMB and Long Win would retrofit seat belts on upper deck passenger seats or deploy buses with seat belts at all passenger seats

on routes which serve long-haul passengers or are operated on expressways with limited boarding or alighting activities at the en route stops. The remaining three franchised bus operators (that is Citybus, New World First Bus and New Lantao Bus) do not support the retrofitting works due to the expected low utilisation rate and huge retrofitting cost, and request for government subsidy should the proposed retrofitting be taken forward."

Now, again, just pausing here, there are references in this paragraph to franchised bus operators opining that passengers sitting on exposed seats do not normally wear seat belts and an expected low utilisation rate.

Am I correct that these sentiments were expressed during the working group meetings by the franchised bus operators?

MS MABLE CHAN: Yes.

MR DEREK CHAN: Again, just to give this issue more context, this committee has heard evidence from the police, and Chief Superintendent Baker, on behalf of the police, indicated an expectation that most people would use seat belts.

Mr Chairman, the reference to that evidence, if I can just give it, on the transcript, is Day 17, 24 September 2018, page 48, line 20, and also at

page 50, line 13.

I understand there is an option of just retrofitting seat belts on the upper deck and only on the routes that involve using expressways, and that's covered in 3.13, so I will read that as well before I start questioning.

3.13, under the heading "Conclusion and actions ahead":

"Having regard to the operation of franchised buses in Hong Kong which involves mostly urban buses with standing passengers, the technical feasibility of, and the costs and time required for, retrofitting seat belts on existing buses, the working group considers that there are insufficient grounds to make it a mandatory requirement for all buses to be fitted with seat belts on all passenger seats."

Just pausing here, I'm wondering if it's a typo or an issue with the language, because I understand that the working group recommends seat belts to be fitted on all passenger seats in new buses, so should this sentence read, "There are insufficient grounds to make it a mandatory requirement for all buses to be retrofitted with seat belts"?

MS MABLE CHAN: I can clarify on that. First, for new buses, the working group's recommendation is that all the new buses to be procured would be installed with

seat belts for all passenger seats.

The working group considers that there are insufficient grounds to make it mandatory or I should emphasise that to make it a statutory requirement for all the buses, including both new or existing buses, to be fitted with seat belts on all passenger seats. When we make this statement, we are mindful of the various issues involved, which is still yet to be further examined and assessed, in particular the technical feasibility, the cost and time required for retrofitting seat belts on existing buses.

Thank you.

MR DEREK CHAN: So a distinction here is drawn between a franchise requirement and a statutory requirement? Is that a correct understanding?

MS MABLE CHAN: This is the first distinction, and the other distinction is that the franchise requirement is for all new buses, but we do not make a franchise requirement for all buses.

MR DEREK CHAN: Thanks for that clarification. If I may read on in that paragraph:

"Nevertheless, the working group recognises that as in the case of exposed seats and in bus compartment with no standees allowed, seat belts may offer extra protection to seated passengers. Hence, the working

group recommends, and all franchised bus operators have agreed, that the feasibility of retrofitting of existing buses for installation of seat belts has to be further examined. Subject to further assessment on the technical, operational and financial feasibility, consideration should be given to retrofitting all seats in the upper deck with seat belts on those buses deployed for specific bus routes, that is those long-haul routes which are operated via expressways with relatively fewer bus stops."

Now, at footnote 11, the working group report gives examples of what expressways are being referred to, and at footnote 12, the number of buses required for retrofitting appears to be reduced to 2,000.

Am I correct to interpret this as saying, under this option, again on a global rough estimate, we are looking at something like HK$400 million, plus, plus, plus --

MS MABLE CHAN: Correct.

MR DEREK CHAN: Going back, if I may, to the general statements that I have read out before about retrofitting works appear to be not cost-effective -- now, when you are talking about cost-effectiveness, is that expressed in relative terms to the benefits that retrofitting might bring to passengers?

MS MABLE CHAN: Yes.

MR DEREK CHAN: Given Mr Chairman has indicated that the Transport Department has not made any quantifiable analysis on the benefits of seat belts, how is the cost-effectiveness measured, assessed?

MS MABLE CHAN: The statement that the retrofitting of seat belts on existing buses appears not to be cost-effective was made on the following considerations.

First, we notice that amongst the existing buses, not all bus models would be technically feasible for retrofitting of seat belts.

Secondly, for those models which are technically feasible for installation of seat belts, the installation of seat belts for seats on the lower deck would have implication on the structure and the operation aspects of the buses.

Thirdly, we also notice about the operational implications in terms of time and in terms of the labour arrangement, manpower and workshop arrangement, for the retrofitting work, which may have an implication and impact on the availability of the buses for the various bus operators to deploy.

Taking all this into account, the working group have carefully considered this and discussed with the bus operators, and as the senior counsel has also mentioned, in paragraphs 3.13 and 3.14, it is on this basis that we

consider, and the bus operators agree, that the feasibility of retrofitting the existing buses for installation of seat belts has to be further examined.

So, to answer your question, the statement that it appears not to be cost-effective hasn't undergone a quantifiable and robust cost/benefit analysis in that term, but we have required, and the FB operators have agreed, that the operational and financial feasibility have to be, amongst other things, further assessed before we consider whether or not the seat belts can be installed with -- the seats on the upper deck can be installed with seat belts and, if so, whether they could be applicable to those long-haul routes which are operated via expressway with relatively fewer bus stops on which there may be a higher chance for the passengers, because they are not getting on and off that frequently, so it would be on that basis that the promotion of the use of seat belts would stand a higher chance.

Thank you.

CHAIRMAN: By that you mean that the utilisation rate would be higher?

MS MABLE CHAN: Yes, Chairman.

MR DEREK CHAN: Noting in your answer that more assessment is required, can I take you to an approach to this

cost/benefit analysis suggested by Prof Stanley and Mr Weston, and then after I have read out the evidence I will invite your observations on whether this approach ought to be adopted.

If I may first take you to the transcript of Prof Stanley's evidence. That's at Day 16, 15 September 2018, page 124.

Perhaps I can take it from page 123, just to give it some context. At page 123, line 20, you can see the topic is on the installation of seat belts on all seats, and at page 124, line 1, I was asking this question:

"So can I just start with a general question, that is are seat belts required to be installed on urban buses in Australia?

Prof John Stanley: No.

Mr Derek Chan: Is there a reason for that?

Prof John Stanley: The belief is that the mass of the vehicle itself is normally going to provide sufficient occupant protection in the event of an accident, such that seat belts are not going to add much more on top of that. There is also a challenge with existing vehicles of retrofitting and the cost of so doing.

The way that we would approach this sort of question in Australia -- and I don't know whether you might do

exactly the same thing -- is we have a process called a regulatory impact statement, and if we were looking, for example, to require seat belts to be mandatory on route buses, that would probably need to go through the process of a regulatory impact statement that would look at the cost of various ways of going about undertaking that work, and then do an assessment of the probabilities of various sorts of incident types being reduced, putting a dollar value on that, and coming up with a view as the basis of that assessment. That's the normal way we do this kind of assessment.

Chairman: And who does the regulatory impact statement?

Prof John Stanley: It would be done by the relevant government department. A lot of these sorts of things would happen at a national level in Australia, so they would be done by the National Transport Commission which is the successor body to the National Road Transport Commission that I was deputy chairman of for nine years. We did multiple regulatory impact statements into various aspects of vehicle requirements."

So that's one passage.

Another passage that I would like to read out in the same day's evidence is at page 144. At 144, line 4, my question was this:

"With all that information in mind, what is your observation or comment on the installation of seat belts, firstly on all the seats, and secondly focusing on the upper deck, where there is no standing passengers?

Prof John Stanley: Thank you. This really takes me back to an answer I gave maybe half an hour ago about the notion of a regulatory impact statement. I think there are two levels to this particular question. The first level is: is it technically feasible to fit seat belts in certain kinds of positions on buses, for example on the upper deck of new buses, on retrofitting for older buses. That's a technical question of feasibility.

The second level then is: if it is technically feasible, what is the cost/benefit ratio of doing that installation? In other words, what will it cost? That is the probability of particular kinds of accidents being reduced if those seat belts are installed? Will people wear them, is one of the questions that needs to be addressed in that setting?

I don't have a view in any particular circumstances whether it is a good idea or not. What I would say is that that's exactly the kind of problem that you should submit to a regulatory impact statement. There will be

information around on the probabilities of accidents, these different varieties. You can put monetary values on the probability of those sorts of accidents being reduced. You probably can form a view too on the probability of wearing seat belts, which would affect the effectiveness of the wearing thereof.

So I think this is an exercise that needs a serious piece of cost/benefit analysis done on it. Now, government may decide it wants to make a policy decision to install seat belts where it is technically feasible. That's fine. As a matter of course, the way I would approach this, though, is to say you need to go through this cost/benefit analysis first, and I think that's what should be done in this situation.

So, rather than taking it on the basis that people think it's going to be this or going to be that, the kinds of concerns that have been raised by the various parties are really genuine and legitimate concerns and they affect the values of the potential installation, but until you have actually done that proper cost/benefit analysis, it's just speculation.

If I had a gut feel, it's going to be that probably it's not going to be worthwhile, with extensive seat belt fitting, but that would be no more than a gut feel, and ideally this needs to go through a proper

evaluation.

Chairman: Because a gut feel is not good enough; you should do a cost/benefit analysis?

Prof Stanley: Exactly ..."

I will pick it up at line 9 again:

"Prof John Stanley: Exactly. In principle, it's a pretty straightforward cost/benefit analysis. Getting some of the values or the probabilities you need will need a bit of serious research, but the process and the sorts of things you need to look for are very much encapsulated by a lot of the responses that you have read out in the various submissions."

Then the rest of it talks about where you could get that type of information in Australia, which I won't read out.

Another passage that I want to go to, along the same lines, is at page 149, line 4. Again, I'm picking it up in the middle of Prof Stanley's answer which focuses more on the benefits side. Line 4:

"But then it's a case of what are the benefits, so then you need to look at what are the sorts of accidents that are happening in the vehicle, and, for example, is this happening to people who are standing; is it happening to people who are sitting; what is the probability that exposure to those sorts of accidents

will be reduced in the event that seat belt-wearing is required, and what do you need to do to encourage that seat belt-wearing?

If I was doing that kind of exercise, I would probably be talking to psychologists about how you would get through the message about wearing seat belts, about getting people to take this seriously. The point you make, Chair, about looking at what happens in those seats that are currently required to do it in Hong Kong, very important in terms of forming a view on the probabilities that will happen. I would be talking to whoever are the custodians of the values or the costs of different sorts of accidents. So, in other words, what is the cost of a fatal accident in Hong Kong, what is the cost of a serious injury accident, what is the cost of a minor injury accident, those sorts of things, because they will be the sorts of unit values you need to apply to the reductions in the probability of an accident of a particular kind taking place."

So that's Prof Stanley's view on how a cost/benefit analysis can be carried out.

I'm going to take you also to a short passage in Mr Weston's report about the London approach, and then I am going to ask for your observations. Can I take you to Mr Weston's report. The report starts at expert

bundle page 115, and the short passage that I want to refer you to is at page 148 of that bundle, internal pagination page 34.

Ms Chan, as you can see, page 148, the topic being discussed is the bus safety standard, and the context concerns what safety devices to include as part of the bus safety standard. I will just read the third paragraph from the bottom, the paragraph starting with, "Although it is currently envisaged". I will just read out that paragraph first:

"Although it is currently envisaged that the standard will apply to new buses (around 700 per annum) consideration is also being given to the potential for retrofitting to existing buses possibly as part of their midlife refurbishment which takes place around 7 years."

Now, Ms Chan, it's not talking about seat belts here. The next part is what I want to focus on:

"It is worth noting that TfL have adopted a rigorous approach to the assessment of each potential option using cost/benefit analysis to target the interventions which will give the greatest return for each pound spent in terms of injury/accident reduction."

CHAIRMAN: I think, to put that into context, it would be useful to refer to the second paragraph under the heading "Bus safety standard", where the various

technologies that have been examined are stipulated.

MR DEREK CHAN: Yes. Thank you, Mr Chairman. Perhaps I can read that for the record as well.

So the second paragraph under the heading "Bus safety standard" says this:

"Several potential technologies including intelligent speed assistance, autonomous braking, runaway bus prevention, pedal confusion prevention, acoustic and visual conspicuity, mirror design and frontal crash protection are being considered as part of this programme with both the costs and benefits of each being thoroughly assessed to ensure that the casualty reduction is maximised in return for the financial investment made."

So it would appear from the two experts' evidence that a similar rigorous cost/benefit analysis is undertaken in both jurisdictions. What I would like is the Transport Department's observations in respect of such an approach to the issue of retrofitting seat belts on franchised buses.

MS MABLE CHAN: Referring to the first expert submission, I notice that the reference that a regulatory impact assessment is considered necessary to consider any mandatory requirement for the installation of seat belts, and in this second submission or evidence from

Transport for London, Mr Weston, it mentions about cost/benefit analysis.

From the Transport Department's perspective, I would say that I agree that for any installation of in-vehicle device to improve bus safety standard, we would need to go through a robust and careful assessment. While we may not be referring to the similar terminology as in the case of the two expert submissions, ie the regulatory impact assessment or the cost/benefit analysis, the working group's observation and consideration of requiring further study on the feasibility and operational considerations and the financial implications of the retrofitting of seat belts also embraces the need to look at this issue in a more systematic and holistic manner.

As the chairman pointed out a little bit earlier, in paragraphs 3.13 and 3.14 in the working group report, we may not have mentioned about comparing this cost or implications with the benefit. As a forward-looking approach, when we take this forward, I agree that we would have to look into these operational and technical and financial considerations and compare them with the benefits.

Given the retrofitting of the existing buses for seat belts appears to be not cost-effective at the

present moment, and it involves a number of considerations, obviously, should there be any decision to make it a mandatory or statutory requirement for all existing buses to be installed with seat belts, in particular on the upper deck, we would have to look into seriously on how much marginal benefit we can achieve as compared with the cost and the technical considerations.

So, in short, to answer your question, I agree with the expert advice that if we want to go forward with a mandatory requirement, we have to go through some cost/benefit analysis or impact assessment.

Thank you.

MR DEREK CHAN: What about the suggestion from Prof Stanley and to some extent in Mr Weston's report about some scientifically-based quantifiable analysis on the benefits that can be achieved by the installation of seat belts? Do you agree with that observation and the need to do that in our present case?

MS MABLE CHAN: I agree, though I think a lot of work would need to be done in that perspective, because so far the buses, the franchised buses, in Hong Kong, we do not have such installation. So it is difficult to gather the data in this sense. But still, we can go further, to do some overseas research, and also we can do further analysis based on the accident figures in other types of

vehicles. But still the constraint would be those vehicles are not double-decker. On the other hand, we think it is also worth to further consider, because the protection and the choice that can be provided to the passengers would also merit our consideration of whether the provision of seat belts on the upper deck passengers is worth further consideration and examination.

MR DEREK CHAN: Mr Chairman, if I may, I was going to move into the topic of bus accident data.

CHAIRMAN: Yes, but before you do that, there are some questions that I'd like to ask.

Have you obtained any data of the utilisation rate of the seat belts that are currently installed in franchised buses?

MS MABLE CHAN: No. No, Chairman.

CHAIRMAN: Why not?

MS MABLE CHAN: Sorry, I don't have the answer.

CHAIRMAN: Is that something that you intend obtaining in the future?

MS MABLE CHAN: That's something I would intend to do. I just wish to add that we also notice the view expressed by the bus operators at the working group that they are inclined to think that the utilisation rate of seat belts is low. I wish to add that while noting that statement, we don't think, if it is true, that the

current low or relatively low utilisation rate of seat belts should not be a key factor to stop us from exploring or examination or assessment of the installation of seat belts on existing buses, because I think this is something that both government and also the bus operators should do more in passenger education.

CHAIRMAN: We have received evidence from Mr Samuel Cheng, the managing director of Citybus, of his personal experience as somebody who travels a lot on buses that seat belts are not used. Do you accept that that is a fair assessment, not not used by anybody, but the very low rate of use?

MS MABLE CHAN: I notice his statement, although I do not receive similar statement by other bus operators' operations staff.

Thank you, Chairman.

CHAIRMAN: But do you accept what he's observed? He says he goes on buses all the time.

MS MABLE CHAN: Chairman, I would just accept his statement, although I would like to add I also travel on buses all the time.

CHAIRMAN: Do you notice people wearing seat belts?

MS MABLE CHAN: I'm the one using the seat belt.

CHAIRMAN: Apart from you?

MS MABLE CHAN: I notice a number of people actually like to

sit on the exposed seats, like the front seats on the upper deck. On my personal experience, I have seen people using the seat belt.

CHAIRMAN: Would it not be simplicity itself to ask the bus operators to use their CCTV cameras to capture the use of seat belts? For example, those upper deck seats at the front.

MS MABLE CHAN: I think that would be a good idea, because the installation of CCTV on buses, the rate, I mean the number of buses installed with CCTV, have already reached some 80 per cent, and CCTV are installed on the upper deck, and I think this is actually a good idea that we can consider.

CHAIRMAN: Do you have any intentions as to whether or not you would seek to have the use of seat belts made mandatory on buses where they are fitted?

MS MABLE CHAN: Should we consider this as a way forward, then this is exactly the point that I would like to make and agree with the expert observation that we have to go through a robust impact assessment before making it a statutory or mandatory requirement.

Thank you, Chairman.

CHAIRMAN: Have you considered the difficulties that lie in the way of making the use of seat belts mandatory on a bus, a double-decked bus, with only one bus driver, no

conductor? How is it to be enforced; have you considered that?

MS MABLE CHAN: I would not underestimate the issues or difficulties involved in an actual operation context, in particular the enforcement. We will certainly take that into account when we consider the operational aspect of examining the installation of seat belts on all buses.

Thank you.

CHAIRMAN: Mr Auyeung.

MEMBER AUYEUNG: What about education? Is there any way TD can educate the public more on encouraging them to use seat belts?

MS MABLE CHAN: This is certainly an area that we can do more. We are actually working diligently on a passenger education campaign. There are a number of themes, regarding their attitude and their responsibility when on-boarding public transport modes. The issue of seat belt and the use of seat belt wherever it is available is certainly an area that we would promote further.

Thank you.

MR DEREK CHAN: In that context, would a mandatory requirement, leaving aside the issue of enforceability -- would a mandatory requirement to wear seat belts where available assist in the public education, drawing on the experience in public light

buses?

MS MABLE CHAN: In a way, it may help, but on the other hand I think that the enforceability and the impact -- because it will have to be enforced, and implemented by the bus operators. So we would certainly need to take that into account seriously when we move towards any step of making this as a mandatory requirement.

MR DEREK CHAN: Can you just remind me, for my benefit -- I think we have received evidence on this, but instead of me digging around for the reference -- is the wearing of seat belts on public light buses a mandatory requirement under statute?

MS MABLE CHAN: Yes.

CHAIRMAN: It is, is it not, and has been for quite a few years?

MS MABLE CHAN: Yes. 2005? I don't have the exact date. We can check.

CHAIRMAN: Yes. We have that information. We have received evidence about this.

But perhaps this is the real point. When Chief Superintendent Baker was telling us that the expectation would be of a low utilisation of seat belts on franchised buses, he did so having already observed that there was a low utilisation on PLBs, and he also said that there were real difficulties in enforcement, and in

fact enforcement only happened in bursts when particular policemen decided to enforce it, but generally it was an unenforced law.

MS MABLE CHAN: If I may add that -- I noticed his statement, but I think it is always a chicken and egg issue. I think, if we have to consider any safety installation or device, to make it mandatory, we need to -- when we take this to the Legislative Council, it is an established practice for the administration to submit our assessment, including any impact assessment, to the Legislative Council for passing anything into the law. We have to support that with figures and with anecdotal evidence, with statistics. Whether or not it could be enforceable is also one of the issues that always our Legislative Councillors will raise when we put something into the law. But once it is agreed and passed in the law, I think it will be up to operational departments, like TD, and also the enforcement agency to make our best effort to ensure a law, the legislative requirement, is implemented to its fullest possible.

Thank you, Chairman.

CHAIRMAN: Earlier on you said, as I recall, that if the utilisation of installed seat belts on buses was to be made mandatory, it would have to be enforced by the bus operators.

MS MABLE CHAN: I think, in the outset, when a bus passenger gets onto the bus, no doubt a bus captain on a bus would be the first point of contact to have first-hand information and knowledge about the utilisation of passengers.

If something is written into the law, and it is always the law enforcement agency's responsibility. Should they receive any complaint or should they see this on the roadside, it will be in their prerogative to ensure that something in the law is enforced.

CHAIRMAN: The reason I raise that with you is because we had evidence from a bus company who said they couldn't possibly do that, there's one bus driver and 135 people on the bus, and there are two decks to the bus.

MR DEREK CHAN: Chairman, we appreciate and acknowledge the difficulties and the pressure on the bus captain. So I think, should we go along that path to make it mandatory, of course we have to be true to ourselves, to make sure something written in law is enforceable, and we would have to think of ways to help or equip our bus operators to help ensure that the seat belt, if available, can be utilised.

The usage of CCTV or the promotion campaign, all these will be considered in ensuring this, but I think at this present stage we will not take this lightly and

we are not anywhere near the stage of making the wearing of seat belts a mandatory requirement. That is why we are taking a very prudent approach here.

Thank you.

CHAIRMAN: Yes, thank you.

Yes, Mr Chan.

MR DEREK CHAN: If I may move on to the next topic, which is bus accident data.

Can I deal firstly with the present situation, as it currently is. We have looked at the "Bus safety" sections of the forward planning programmes, which I will refer to as FPPs, of the bus operators on numerous occasions, so I'm not going to go back to them, but they contain a lot of data and analysis on bus accidents.

We have also heard from the police that the police do not have access to the data contained in the "Bus safety" sections of the FPPs.

Mr Chairman, the reference to that evidence is Day 17, 24 September 2018, page 19. I'm not going to go to it; I'm just giving you the reference for the transcript.

CHAIRMAN: Thank you. That's Chief Superintendent Baker, isn't it?

MR DEREK CHAN: Yes, that's correct.

So, Ms Chan, my question is this. Prior to such data being made available to the public through the provision of it to this committee, had this data and analysis been made available to the public?

MS MABLE CHAN: Perhaps I will start off and then I will ask my colleagues to supplement.

Based on my knowledge and recollection, we have asked the franchised bus operators to make further disclosure of their accident data on an annual basis.

CHAIRMAN: When was that request made?

MS MABLE CHAN: I'm afraid that we have to provide the year in which this has been included as a franchise requirement. Based on my colleague's cursory knowledge, it has been for quite some years.

CHAIRMAN: It's a franchise requirement, is it?

MS MABLE CHAN: Franchise requirement.

MR DEREK CHAN: It's a franchise requirement to provide it to the Transport Department. My question is more towards disclosure of it to the public.

MS MABLE CHAN: Yes. Let me elaborate a little bit.

CHAIRMAN: Yes.

MS MABLE CHAN: Or, actually, perhaps it may be useful if I can provide a copy -- it's already there. On the screen is the New World First Bus Fuller Disclosure, 2017.

So, go down the page, at the bottom of the page, and go down. 13, I think. I think this is not the example I would like to refer to. Perhaps I can supply you with the page of the Citybus Fuller Disclosure, 2017 -- I can provide this page to the committee.

CHAIRMAN: Yes. We have that in our bundles.

Where are they, Mr Chan?

MR DEREK CHAN: Yes, we do. I'm looking for it now.

CHAIRMAN: Just give us a moment.

MR DEREK CHAN: The document is contained in TD-3, page 906.

Ms Chan, is that the document you were trying to locate?

MS MABLE CHAN: Yes.

CHAIRMAN: And what page, perhaps, if you've got the original, the internal pagination?

MS MABLE CHAN: There is no page on that.

MR DEREK CHAN: The page number is in the top-left and top-right-hand corner.

MS MABLE CHAN: Paginated page 909.

CHAIRMAN: 909? Thank you.

MR DEREK CHAN: The point I would like to make is the bus operator, they provide the accident data in their fuller disclosure report which is disclosed to the public. Of course, I would need to point out that the description and the outline of the accident data may not

go down into the further deeper level, which, as circumstances require, we may ask them to provide further analysis into more detail on specific causes of accidents. But this is the sort of accident data required to be provided in their fuller disclosure to the public.

CHAIRMAN: You're referring to paragraph 13?

MS MABLE CHAN: Yes, item 13.

CHAIRMAN: Have you had a look at the Transport for London's accident data on the internet?

MS MABLE CHAN: I have. It's more --

CHAIRMAN: You have seen how broad that is, how it's produced every quarter?

MS MABLE CHAN: Yes, I understand that.

CHAIRMAN: Is there any reason why we couldn't do that in Hong Kong?

MS MABLE CHAN: As we shared with the chairman, the previous FPP that we presented to the committee in May, on a personal account, I think there are a lot of areas that we can elaborate and enhance, and actually, in the process of FPP in the coming 2019-2023, we have also produced to the committee the letter that we have written to the FB operators that the areas that we would like them to further elaborate and analyse. With that as the basis, there is certainly scope for us to request

the bus operators to disclose in an even greater extent of the accident data for the public's information.

CHAIRMAN: Is there any reason why the "Bus safety" chapter with the accident data that we've seen in these forward planning programmes could not be made public, all of it? Is there any reason?

MS MABLE CHAN: Obviously, we haven't gone through that detailed discussion with the bus operators, as to whether or not that safety chapter can be disclosed in full. I just wish to point out that --

CHAIRMAN: Well, can you think of any reason that it couldn't be disclosed? There's nothing commercially sensitive about it, is there?

MS MABLE CHAN: In general, there may not be any immediate commercial sensitivity that I can think of in that "Bus safety" chapter.

CHAIRMAN: By all means take time to think of it, because I can't think of a single thing that would be commercially sensitive so that it might not be something that ought to be revealed.

MS MABLE CHAN: I just want to highlight one point.

CHAIRMAN: Yes.

MS MABLE CHAN: Because when we asked the franchised bus operators to provide further information for the purpose of the FPP, not for the purpose of the fuller

disclosure, we have ventured into the area of asking the bus operators to diagnose the accident causes, say by bus route, down to bus route, or into very specific reference to certain bus routes. So I'm not saying that may be commercially sensitive, but I think we have to be conscious that should that "Bus safety" chapter be made as a fuller disclosure to the public -- I mean, the commercial sensitivity angle would have to be taken into account.

CHAIRMAN: Can you think of any commercial angle? I'm inviting you to do so. What is there that could possibly be commercially sensitive in a chapter about bus safety?

MS MABLE CHAN: I'm just thinking of it in a theoretical way, Chairman, first of all. Because the bus company is also required to advise and elaborate on their plans and proposals to enhance bus safety and measures to be taken, so the bus operator may put in some dollar sign on to some specific measure on to that programme, and also the timeline for implementing that specific proposal in the coming five years or so, as part of their investment of the company in the forward-planning exercise for the coming five years.

CHAIRMAN: In the "Bus safety" chapter?

MS MABLE CHAN: Yes.

CHAIRMAN: I'm going to ask Mr Chan to take us to that -- in due course, Mr Chan -- so you can explore this issue. The question is, is there anything that could possibly be properly commercially sensitive in this data? Please come back to that later, Mr Chan.

MR DEREK CHAN: Yes. I will perhaps deal with that particular point after lunch.

CHAIRMAN: Whilst we are on this topic, is there any reason why this data, in the forward planning programme "Bus safety" chapter, could not be disclosed to the police? They said they would be delighted or happy to receive it. Is there any reason why the police couldn't get it?

MS MABLE CHAN: Chairman, on this front, I do not see there is any particular difficulty in providing this data for sharing with our close partner, ie the police.

CHAIRMAN: So can I take that --

MS MABLE CHAN: This is something that we can consider.

CHAIRMAN: You are only going to consider it? You can't say yes, they can have it?

MS MABLE CHAN: I think the best I can say is that we will consider that.

CHAIRMAN: You are open to discussing it, are you?

MS MABLE CHAN: Yes.

CHAIRMAN: Thank you.

MR DEREK CHAN: Again, just focusing on what is available to

the public --

MS MABLE CHAN: Perhaps, if I may -- because the safety chapter has been compiled and provided to TD in the context of the forward planning programme, so apart from providing detailed information and analysis, the primary objective is to let the bus operator inform and advise the government and administration of their forward-planning exercise, their investments, their plans, and all that. That's why I need to take a bit of caution here that I would not at this point commit the government on any specific disclosure of a particular chapter; although, as I answered the chairman's question, that the sharing of that "Bus safety" chapter with the police is something that is worth us considering.

Thank you.

CHAIRMAN: I am right, am I not, Mr Chan, in recalling that Mr Weston recommended that this data be made public?

MR DEREK CHAN: Yes, I was going to go to that --

CHAIRMAN: Perhaps after lunch you can come back with that reference.

MR DEREK CHAN: Yes. I was going to go to the recommendations a bit later.

CHAIRMAN: Thank you.

MR DEREK CHAN: Again, just focusing on what the current

situation is and then looking at what could be the situation a bit later -- in the hearing on Thursday, the Transport Department provided, during the hearing itself, a document entitled, "Contributory factors of traffic accidents" with a reference "Annex E" on the top right-hand corner.

I understand that that document has not yet made its way into the bundle.

Ms Chan, do you have a copy of that document? It's on the screen but do you have a hard copy of that document before you? A copy is being made available to you now. (Handed).

CHAIRMAN: Thank you.

MR DEREK CHAN: I'll just give the context of this document. This document was provided as part of a letter that the Transport Department sent to KMB --

MS MABLE CHAN: Yes.

MR DEREK CHAN: -- on 21 May 2018, asking KMB to provide accident analysis in a similar format.

Just for the transcript, the page reference of that letter from the Transport Department to KMB is at TD-5, page 1728.

My question, actually, is quite simple. Has a table like this been made available to the public on a systematic and regular basis, going into this level of

detail?

MS MABLE CHAN: No.

MR DEREK CHAN: To be fair, I understand that the Transport Department does publish road accident statistics on its website annually.

MS MABLE CHAN: Yes.

MR DEREK CHAN: And part of the information does relate to franchised buses. My question is more whether the disclosure goes to this level of detail.

MS MABLE CHAN: No, not to that detail.

MR DEREK CHAN: Again, Ms Chan, before going to the recommendations and what could be the position, I just want to establish the passing of accident data from the franchised bus operators to the Transport Department.

CHAIRMAN: Before you move on to that -- just looking at annex E, given that we've been told about the considerable number of accidents that involve people losing balance on buses, which are the categories of driving behaviour that contribute to that, looking at this schedule?

I ask that question because when I look at "Stopping/starting negligently", whatever that means, but let's assume stopping with harsh braking and starting with excessive acceleration, that seems to be a very small number of incidents. So what is it that

contributes to losing balance?

MR YK CHAN: Mr Chairman, making reference to this list, I would go through probably one by one.

CHAIRMAN: Take your time for a moment. Take what you say is the big one, and then go down in scale.

MR YK CHAN: I would say stopping and starting negligently.

CHAIRMAN: But why are there so few, if that's --

MR YK CHAN: This is only one of the factors. Possibly to avoid collision, probably the driver's action is to try to stop -- press hard on the brake to avoid collision, that may cause the unbalance of the passenger on board.

"Overtaking/lane changing negligently", yes, certainly, that may cause passenger imbalance in there.

"Driving too fast" -- it may, but if you only drive constantly too fast that may --

CHAIRMAN: It's completely irrelevant, isn't it, driving too fast? It's the change of speed that makes a difference --

MR YK CHAN: That is right.

CHAIRMAN: -- or swerving.

MR YK CHAN: No, so probably it is not a major factor to that.

U-turning, it depends on the rate --

CHAIRMAN: You don't see too many buses doing U-turns, do you?

MR YK CHAN: No.

CHAIRMAN: Right.

MR YK CHAN: But usually our routes will be tried out on the first hand, but when they really need to U-turn, then we should ask them to exercise caution. But U-turning may be one factor, because it involves turning direction with different speed, so it may cause imbalance.

Further down: "Failing to observe traffic signals/traffic signs", it may not be.

CHAIRMAN: Well, just tell us the ones that are, not the ones that are not.

MR YK CHAN: "Driving inattentively" may be one. "Lost control of vehicle" may be one.

CHAIRMAN: These figures don't really help us, do they?

MR YK CHAN: No.

CHAIRMAN: Because if one was to start with this question, "We've got a problem with people losing balance on buses; what's causing it?", where do we find that information from?

MR YK CHAN: Perhaps we may do more analysis. I think we do have the consequence of the accidents, like whether, say, a passenger on board has lost balance and got injured.

CHAIRMAN: Let's just take that as an example.

MR YK CHAN: Based on that, I think we can do more analysis

on the cause.

CHAIRMAN: When that happens, somebody is injured on a bus because they have lost balance, they are thrown into some hard object on the bus and they are injured, does the bus operator perform an analysis of the circumstances? And there would be easy ways to do that: CCTV, to show whether or not he was braking because of a child running across the road, a car changing lanes. And then one could see if that wasn't the case, you might see that he had gone past the bus stop and was braking hard so he could stop near the bus stop. Is that kind of analysis done?

MR YK CHAN: I understand bus companies do carry out such investigations.

CHAIRMAN: Do they give you the results, the data, to show what has caused it?

MR YK CHAN: We do not receive those information for each and every accident, but for specific incidents or accidents, we ask for more detailed information of the investigation, they will provide us with the reasoning.

CHAIRMAN: I'm not asking whether or not you get data for each and every accident, but surely this information could be collated and they could say, "We have 200 people injured on the buses where the bus drivers are at fault, and these are the conditions that have caused it:

accelerating too fast, decelerating harshly."

MS MABLE CHAN: Chairman, I will try to help while my colleagues are finding some specific evidence on that. I recall that in past years, say in 2006 or 2007, in their analysis of the accidents of passengers losing balance of certain bus companies, then colleagues have noted a rise in the trend and also the number of accounts, and they have asked the companies to investigate. One of the causes then was the lack of adequate handrails along the staircase and also on the lower deck. It was arising from the analysis then that we have required the bus companies to install additional devices in the bus compartment, to help to address this particular factor of, say, passengers rolling over down the stairs onto the lower deck.

CHAIRMAN: In what years was this data required and provided?

MS MABLE CHAN: My colleagues are checking. I think we have reported that in one of our previous submissions.

CHAIRMAN: There's no need to hurry because we have reached lunchtime. Maybe you can deal with that after lunch.

MS MABLE CHAN: I can quote the reference, yes.

CHAIRMAN: Thank you.

We will take our lunch break now and resume at 2.30 this afternoon. Thank you.

(1.03 pm)

(The luncheon adjournment)

(2.31 pm)

CHAIRMAN: Good afternoon.

Yes, Mr Chan.

MR DEREK CHAN: Mr Chairman, I think before the lunch break both Ms Chan and myself owed the committee a couple of references.

CHAIRMAN: Yes.

MR DEREK CHAN: Can I take them one by one, in turn.

The first reference that the committee was interested in was in relation to Mr Weston and Prof Stanley's views about making the "Bus safety" section of the forward planning programmes public.

CHAIRMAN: Yes.

MR DEREK CHAN: The first reference for that can be found in the report of Prof Stanley, which is at expert bundle, page 67, internal pagination page 14 of the second report.

CHAIRMAN: Thank you.

MR DEREK CHAN: Again, if I can just read it out:

"The forward planning programme documents are understood to be confidential documents, as between the relevant franchised bus operators and the Transport Department. The author believes that the data and

analysis they contain is an important part of the process of an operator demonstrating their capacity to operate a proper and efficient service. The fatalities associated with these services are largely pedestrian fatalities, making them a significant societal or external cost of service operation. It is argued in section 4 of this report that franchised/contracted route bus operators need to be subject to performance pressure to help ensure they provide a proper and efficient service. Being publicly accountable for their safety performance would help to sustain performance pressure. There are solid arguments favouring publication of the "Bus safety" chapter of the FPPs, because of the wider societal costs of accidents."

Prof Stanley expands on this in his evidence, so I will take the committee to that as well. Can I refer the committee to the evidence of Prof Stanley on Day 16, 15 September 2018, at page 178.

CHAIRMAN: Yes.

MR DEREK CHAN: If I can pick it up at line 3. That is where I am asking the question, and I am asking Prof Stanley this:

"You make that point at page 69 of your expert report. At the bull bullet point of page 69 you say:

'There are solid arguments favouring publication of

the "Bus safety" chapter of the five year forward planning programmes, because of the wider societal costs of accidents.'

I think you were referring to a number of analytical statistics that relate to safety issues.

Prof John Stanley: Yes, Mr Chan. I thought that the discussion in some of those "Bus safety" chapters was really informative, and it is the sort of information that I believe, in the public interest, should be more widely available.

I'm referring, for example, to the kinds of analysis that was presented on the driving our links and how that affects accident performance, I think it was.

Chairman: Yes, and non-links, as I think it was established, between the number of hours you drive, the age of the drivers, that sort of comparison?

Prof John Stanley: Exactly, Chair. Accident rate by years of service, accident rate by hours of duty before the accident. I mean, I think this is really good analysis, and it shouldn't be stuck in documents that are only available to a few select people. It's really important information in the public interest, in my view, and it shows that there's some really good research being done, trying to come to grips with the challenges that are being faced in the safety sense and

it would give people confidence in what the industry is trying to do."

Can I then pick it up over the next page, at page 180, where Prof Stanley deals with Mr Weston's opinions on the same topic, so I can probably deal with both together.

Picking it up at line 16, where I ask this question:

"Yes. Mr Weston also makes a similar point, on the transparency of this sort of data. Can I quickly take you to that at page 153 of the expert bundle, and if I can just read you --" and can I drop to line 25:

"Paragraph 84, under the heading, 'Safety data transparency/performance'. If I can read it out."

Mr Chairman, what follows is an extract from Mr Weston's evidence so I will read that as well so I can deal with both Mr Weston and Prof Stanley at the same time.

CHAIRMAN: Yes.

MR DEREK CHAN: Reading from line 2 on page 181:

"'It is clear from London's experience that greater transparency of data necessarily the safety performance of the bus network not only leads to greater stakeholder and public scrutiny [but] it also leads to a sharper focus from both the transport authority and its contracted bus operators on the safety agenda. An open

approach to incident data leads to accountability.

Consideration should be given to what safety data in relation to the Hong Kong franchised bus network could be placed into the public domain.'

Professor, do you agree with that or do you have any other observations in that regard?

Prof John Stanley: I agree fully with that, Mr Chan. My view generally on the Greater London Authority and Transport for London is they are almost without peer in terms of availability of data and information, in a global sense, and they don't try [to] hide things, they try [to] put it out there, and warts and all are prepared to confront the sorts of challenges that that shows.

I think that really leads to a lot of confidence in that process, so I'm very supportive."

So those are the views of both Mr Weston and Prof Stanley.

CHAIRMAN: Can you provide the reference for Mr Weston's evidence? What day and page was that?

MR DEREK CHAN: The quote that I was reading out is actually a reference to Mr Weston's report.

CHAIRMAN: Yes. Where is it?

MR DEREK CHAN: Expert bundle, page 153, which is internal pagination page 39 of Mr Weston's report, under the

heading, "Safety data transparency/performance", paragraph 8.4.

CHAIRMAN: That's very helpful. Thank you.

MR DEREK CHAN: Hopefully, that deals with the first issue.

The second and third issues deal with the contents of --

CHAIRMAN: This may be an opportunity for you, Ms Chan, to respond about the issue -- if it's not yet the right opportunity say so -- of whether or not there is anything in this safety chapter accident data information that might be commercially sensitive.

MS MABLE CHAN: Chairman, I have been looking through past FPP safety chapter. It appears to me that there may not be a significant part of the information that may directly relate to the commercial sensitivity of the companies involved. I would like to add that open data policy and approach is something that Hong Kong government and Transport Department is also advocating. So more transparency, greater transparency of data, in particular on safety that is of concern to members of the public, is an approach and a direction that I think TD would actively pursue and discuss with the bus operators.

Thank you.

CHAIRMAN: And when do you expect to be in a position to

make a determination about this issue?

MS MABLE CHAN: As mentioned in the past hearing, our working group will continue its work. It will be one of the topics on the agenda to explore.

In parallel, we are also working with the bus operators to improve and elaborate the various analysis in the safety chapter of the FPP reports. We will also raise this issue with the bus operators in the coming months.

Thank you, Chairman.

CHAIRMAN: Do you expect to be able to decide this by the end of the year?

MS MABLE CHAN: I may not be able to commit at this point in time, but we will try our best.

Thank you, Chairman.

CHAIRMAN: Yes, Mr Chan.

MR DEREK CHAN: Ms Chan, as you will note from the evidence that I have just read out, there's a reference to the data being available in London being without peer. Prof Stanley said the view generally on the Greater London Authority and Transport for London is that they are almost without peer in terms of availability of data and information.

The London approach is something that I will come back to in a moment, and in terms of how we can learn

from that, and whether their approach is commendable here, but before I do so, perhaps I can deal with one more issue arising from the "Bus safety" chapter that arose during the evidence before lunch, and that is the issue about the cause of accidents in the "Bus safety" section of the reports, a particular example being raised is the issue of people losing their balance and what causes people to lose their balance.

Mr Chairman, this is actually covered, at least from what I can find, in two of the years of the "Bus safety" section, so perhaps I can take them in turn.

The first in time is the "Bus safety" chapter in KMB's forward planning programme for 2017 to 2021. That can be found at KMB-12, page 5320.

Ms Chan, I hope you have before you, at page 5320, the five-year plan for KMB, 2017 to 2021. Such a plan would be made available to the Transport Department around the middle to third quarter of 2016; is that correct?

MS MABLE CHAN: Correct.

MR DEREK CHAN: Just on the issue of loss of balance and the cause of it, as an example, can I take you to page 5324.

CHAIRMAN: Just pausing there -- this plan has to be forwarded to the Transport Department by 30 June, has it not?

MS MABLE CHAN: Yes.

CHAIRMAN: And the Transport Department, together with the company, are to resolve whatever problems there might be by 30 September?

MS MABLE CHAN: Yes, you are correct.

MR DEREK CHAN: So if we can go to 5324, the paragraph that I'm interested in is 8.2.7, but as you can see the context of it is under -- it's contained within the section, "Accidents by nature", and it's one paragraph within a series of analysis, but this paragraph has particular relevance to the example that was being discussed in the evidence before lunch, so I will just read it out, 8.2.7:

"The majority of the accidents (52.4 per cent) were due to passengers losing balance while on the bus. More than half of these cases were caused by the bus braking in traffic. Accidents with injuries sustained as a result of different kinds of collisions accounted for 36.5 per cent while accidents with injury to pedestrians accounting for 4.3 per cent of all the accidents."

So, in this context, the bus operators have tried to articulate the cause of the majority of the accidents arising from passengers losing their balance. Is this something that you were referring to or trying to refer to in the evidence before lunch?

MS MABLE CHAN: The statement I have made regarding the observation of the accidents relating to passengers losing balance, that I am referring to, and the subsequent analysis and the action to be taken is relating to passengers losing balance.

The thing that I would like to refer to before lunch is that as an ongoing exercise, passengers losing balance has been an ongoing issue of concern to us, and in the 2013 franchise renewal exercise, whereby there is agreement on the franchise and also the exchange of the commitment letter, that we have required the company, as a result of our discussion with them and analysis of the accidents by nature, in particular of passengers losing balance, one of the measures that we have required the bus companies to do is to install and improve the handrailing along the staircase, double railing along the staircase, as one of the issues tackling particular incidents with passengers losing balance along the staircase.

So this is an ongoing issue of concern to us. The 2016 FPP has also highlighted the majority of the accidents relate to passengers losing balance while on the bus. So I think this is something that the bus companies and also the TD have always been concerned about, and we continue to take efforts to see what can

be further done.

Thank you.

MR DEREK CHAN: Ms Chan, I want to follow up with you the Transport Department's monitoring of harsh braking situations, since you have mentioned that it's a cause for concern to the department.

CHAIRMAN: Before you do so, perhaps those who are not on their feet might assist you by finding the reference in the franchise renewal to a requirement that a handrail be fitted to the staircase.

MR DEREK CHAN: Yes.

MS MABLE CHAN: We can also refer to the --

CHAIRMAN: Thank you. It doesn't have to be done immediately; at some suitable time.

Yes, Mr Chan.

MR DEREK CHAN: Before I go to the harsh braking issue, Mr Chairman, I have referred to the 2017-2021 FPP. Perhaps I will just give you the reference to the same or similar paragraph in the 2018-2022 FPP.

CHAIRMAN: Of KMB?

MR DEREK CHAN: Yes, of KMB. The page reference is TD-1, page 180, that's where the report starts, and page 183 is where you find a similar paragraph.

At paragraph 8.2.7 --

CHAIRMAN: It's a replica with a slightly different figure

from the previous year.

MR DEREK CHAN: Yes.

CHAIRMAN: The majority of the accidents is 51.5 here, as opposed to 52.4:

"... due to passengers losing balance while on the bus. More than half of these cases were caused by the bus braking in traffic."

That's the same observation as the year before.

MR DEREK CHAN: Yes.

CHAIRMAN: Thank you.

MR DEREK CHAN: Ms Chan, I see you are looking for something.

MS MABLE CHAN: Yes. I am actually trying to identify the reference, as an example of the enhanced safety feature of double handrailing at staircase in our letter to the KMB --

CHAIRMAN: Feel free to come back to that at a suitable opportunity. Don't be distracted. I'm sure somebody next to you can help you.

Mr Chan, in the analysis that we have seen of this kind of accident data, is there not an analysis somewhere about the liability for accidents? In other words, 100 accidents but only -- I think this is the figure -- 75 per cent caused by others, 25 per cent by our bus captains?

MR DEREK CHAN: That analysis -- yes, it's in the "Bus safety" chapter for 2019-2022, which is the one that was handed in in August 2018, where they actually split the driver contributory causes.

CHAIRMAN: Whilst we are dealing with this topic, could we have a look at that? What is the reference to that?

MS MABLE CHAN: Chairman, the paragraph 8.2.10 on page 5325 refers to the statement that you recall.

CHAIRMAN: Thank you very much.

MS MABLE CHAN: "The breakdown of liability in the two-year period is shown in table 8.3 below. For 79 per cent of the cases, the bus captains were not blameworthy. The pending cases ... are those pending for police action ..."

CHAIRMAN: Mr Chan, the bundle reference? Is that KMB-12?

MR DEREK CHAN: Yes, that's the following page.

CHAIRMAN: Yes.

MR DEREK CHAN: So we are still in the 2017 FPP.

CHAIRMAN: Yes. It may be it's repeated elsewhere, but in this document liability is assessed at 25 per cent for bus captain.

MR DEREK CHAN: Yes. I think Mr Chairman will recall the evidence, in terms of the 2018 FPP, the Transport Department issued a letter in May 2018, annexing that table that we have just seen on Thursday and today,

which --

CHAIRMAN: Annex E?

MR DEREK CHAN: Exactly, which separates factors caused by bus captains, and factors not caused by bus captains, and the request made to KMB to further break down accidents in that sort of category, which actually led to an even more detailed analysis in the 2018 "Bus safety" section that relates to 2019-2023. So that's where we get a lot of analysis in the next "Bus safety" chapter, even more detailed, that splits it into driver contributory factors and non-driver contributory factors.

CHAIRMAN: Where is the 2019 five-year plan?

MR DEREK CHAN: It's in the same bundle, KMB-12, at page 5011. That is where it starts.

For example --

CHAIRMAN: Give me a moment.

MR DEREK CHAN: Sorry.

CHAIRMAN: Yes.

MR DEREK CHAN: For example, at page 5016, we see a similar heading, "Accidents by nature", and again you see the breakdown. But at page 5020 there is a new chart, "Accidents by cause", and it's broken into bus captains' blameworthy factors and -- the "Accidents by nature" part, there's no breakdown of bus captains blameworthy

or not blameworthy, and then at 8.2.3, there is that breakdown of bus captain blameworthy factors which we don't find in previous FPPs.

CHAIRMAN: Yes. Thank you.

Ms Chan, can I ask you this. We are looking now at the data that the bus company KMB have been compiling. Do you know how it is that they compile this data; how do they determine liability or non-liability?

MS MABLE CHAN: Chairman, I'm afraid I do not have the ready answer.

CHAIRMAN: Has there been no correspondence when these kinds of figures were asked to be produced, "How is it that you are producing them?" Not that you're aware of? Nobody asked them?

MS MABLE CHAN: It is as part of the process that colleagues will discuss with them and get the analysis. I have to be careful, at this juncture, not to give you any conclusive or misleading answer.

CHAIRMAN: Certainly don't give us misleading answers. But somebody must know how this data is tested. Somebody at the Transport Department surely tests the data. How are you doing it?

MS MABLE CHAN: Based on our knowledge, because regarding accidents involving bus captains, the liability, very often the accidents will have to be determined and

investigated through the police proceedings. Then they will identify which is relating to the drivers' fault and which accidents are not. Based on that information, bus companies will also differentiate those accidents by the specific type of causes relating to the bus captain's behaviour.

CHAIRMAN: If the bus captain is being prosecuted that would be a very easy way to say, "That's our liability", but I'm asking you: is that not something that you asked them, "How are you reaching these figures"?

MS MABLE CHAN: I do not have a ready answer because the colleagues involved in the discussion with KMB are not the persons involved on this table. If you can allow us, we can perhaps supplement with an example to illustrate how we test the data with the bus company.

CHAIRMAN: Mr Auyeung.

MEMBER AUYEUNG: Maybe the other way to ask the question is the Transport Department gives those categories to fill in? So are these classifications identified by the Transport Department?

MS MABLE CHAN: Chairman, based on my knowledge and the advice from our colleagues, this information is compiled by the company themselves.

CHAIRMAN: So the categories are their categories, not yours?

MS MABLE CHAN: Not our category.

CHAIRMAN: Frankly, looking at these figures, it's very difficult to understand how it is that 25 per cent of all accidents are caused by passengers losing balance, with those figures. Has nobody troubled to ask them what this all means?

Anyhow, perhaps you could provide us with an explanation for what action, if any, has been taken by the Transport Department, and if possible illustrate it with correspondence, indicating the enquiries that were made and the responses that were given -- if they were made orally, then it can be dealt with by identifying the conversations, the dates, the persons -- so that we can have an evidential basis for understanding this data.

MS MABLE CHAN: Thank you, Chairman.

MR DEREK CHAN: Ms Chan, can I follow up with you the concern that the Transport Department has on the issue of harsh braking.

At the moment, how does the Transport Department monitor harsh braking behaviour of bus captains, if at all?

MS MABLE CHAN: Chairman, I'm just confirming my understanding with my colleagues.

CHAIRMAN: Yes, of course. Please take your time.

MS MABLE CHAN: Chairman, based on our previous submissions to the committee, the Transport Department has been asking the franchised bus operators to submit information on the number of random checks and how they monitor the black box administration of the franchised buses. So our monitoring is based on the information provided by them.

In the past few months, we have, in the course of the working group discussion, discussed with the franchised bus operators on enhancing the black box features and functions, and based on the updated minimum requirements on the black box, we are asking the franchised bus operators to provide further information on the event logs of the black box data as captured in their regular monitoring.

So we will continue to monitor in particular regarding the specific misbehaviour of the bus captains, including harsh braking or braking suddenly.

CHAIRMAN: What is the further information on the event logs that you have asked for?

MS MABLE CHAN: Chairman, the event logs, as logged by the black box, will include vehicle speed, harsh acceleration, harsh deceleration. So different companies may have slightly different thresholds for the event logs and also for issuing real-time alerts to the

bus companies. So this is the area that we are working with the bus companies on allowing the event logs to be provided to the Transport Department.

CHAIRMAN: The updated minimum requirements came in in August, did they not?

MS MABLE CHAN: Yes, there is -- yeah.

CHAIRMAN: So, presumably, this request for further information about event logs was made after that?

MS MABLE CHAN: Yes, corresponding --

CHAIRMAN: When was it made?

Was it made in correspondence?

MS MABLE CHAN: It is not made in correspondence, but we have met the Citybus -- I'm sorry, can I repeat again?

CHAIRMAN: Yes.

MS MABLE CHAN: Colleagues, further to the issue and update of the basic minimum requirements of the black box, have first met with Citybus company on 26 September regarding the new requirements on the event logs and the submission of the data. We haven't done that with KMB but we are in the process of doing so.

CHAIRMAN: And were the Transport Department representatives any of the people who are present here today?

MS MABLE CHAN: Yes, Amy, Amy Tse.

CHAIRMAN: Perhaps Ms Tse can help us as to what this new information was.

MS AMY TSE: We understand that KMB has been setting some thresholds for speed limit and harsh acceleration and harsh deceleration. So we welcome this initiative, so we discuss with Citybus, New World First Bus and NLB, to see if they could also generate this type of threshold as a way to monitor their bus drivers' driving performance.

Thank you.

CHAIRMAN: What are the thresholds that you understand that KMB have now set for speed limit, harsh acceleration, I think that's probably described as sudden acceleration, and harsh deceleration. What are the those thresholds?

MS AMY TSE: For KMB and Long Win, the harsh acceleration threshold is vehicle accelerates at a speed of over 4 kilometres per second, and for harsh deceleration, vehicle decelerates at a speed of over 7 kilometres per second.

CHAIRMAN: And speed?

MS AMY TSE: Yes, the speed.

CHAIRMAN: What about the speed?

MS AMY TSE: For speed it's vehicle speed over 70 kilometres per hour or above. For Citybus, we understand they are also using the latest technology to define the road sections with speed limits of 50 kilometres per hour and

with the aid of the digital maps --

CHAIRMAN: This is not the latest technology, is it? This is technology that's existed for years?

MS AMY TSE: Yes, I understand.

CHAIRMAN: Perhaps the way to put it is that the use that is now made of long-existing technology.

MS AMY TSE: Yes, it's their use of the technology.

And for other road sections with a speed limit of 70 kilometres per hour in the black box.

Thank you.

CHAIRMAN: And what was the result of your requests of Citybus?

MS AMY TSE: For Citybus and New World First Bus, they replied that they are willing to study, but they have a concern of what type of threshold to set for the deceleration and the acceleration, because the accident may be a bit complex, so they need to discuss with the unions to see whether a specific threshold could be set.

For NLB --

CHAIRMAN: Just before you move on -- sorry to interrupt -- but specific thresholds have been delineated by KMB. Are you suggesting that they were concerned about the thresholds that KMB had set?

MS AMY TSE: Yes, we share KMB's threshold setting information with Citybus and New World First Bus, and

they are willing to study it.

CHAIRMAN: I understand that. You said they were concerned about the thresholds that had been set, so are you saying they were questioning the thresholds that KMB had imposed?

MS AMY TSE: They need to study it before they make a decision.

CHAIRMAN: That was because they were concerned about the level of the thresholds; do I understand you?

MS AMY TSE: Yes.

MS MABLE CHAN: Chairman, can I add a word on that?

CHAIRMAN: Of course.

MS MABLE CHAN: In my recent exchange with Citybus, I wish to add to what Ms Tse has added, by expressing that they need to study and see if that threshold can be implemented in the Citybus case, the Citybus management is considering how it could be operated and then to consider the follow-up actions, if any, by non-compliance by the bus captains. So they are considering the operational issues regarding the applicability of the threshold.

CHAIRMAN: Yes, Mr Chan.

MR DEREK CHAN: You mentioned that KMB already has a threshold system in place, and I think Ms Tse mentioned -- I'll just focus on harsh braking because

it's easier if I focus on an example.

Does the Transport Department know whether the monitoring done by KMB of harsh braking allows them to focus on harsh braking on an incident-by-incident basis, or what does the Transport Department know about that?

MS MABLE CHAN: What we know is that they have set the threshold, and for monitoring, because of the black box availability, of the black box function, the black box can actually generate exceptional reports of non-compliance or exceedance of the threshold. So we know that the bus operator is using this function to help them to monitor as well.

CHAIRMAN: So, as you understand it, KMB can use the black box to generate exceptional reports of harsh braking?

MS MABLE CHAN: Yes. The same also applies to Citybus and New World. They would also use the black box function to generate exception reports.

MR DEREK CHAN: It's your understanding, and I'm simply asking for the Transport Department's understanding, of these exception reports, do they identify individual instances of harsh braking?

MS MABLE CHAN: I cannot speak on behalf of the franchised bus operators but the black box function and technology and the generation of the exception reports will help them to monitor to a great extent how the bus captains

apply braking, either acceleration or deceleration. So I think they will have to take that into account in an actual operational context, to see if the exception report with the threshold can actually help them to monitor in a very effective way.

MR DEREK CHAN: So am I understanding you correctly that insofar as this aspect, in terms of what generates an exception report, the Transport Department leaves it to the judgment of the franchise operator; would that be a fair way of doing it?

MS MABLE CHAN: At the present moment, I think the process is ongoing, but we would certainly be very interested and we consider that it is also necessary and effective to know the threshold and how they generate the exception report, so that it can help us to focus on investigating the causes of the accidents, leading to passengers losing balance, because this is an ongoing issue of concern, and the hard braking has been identified as one of the key factors contributing. So with the black box function and the generation of the exception reports, we would very much like to pursue and look into this further in our working group.

MR DEREK CHAN: If I may then move away from the issue of harsh braking and back into the more general topic of bus accident data.

We know from the evidence that the Transport Department shares a database with the police, that is the case management information system, and the Transport Department would obtain data and do its own analysis from that database. So that's one part of the information that's available to the Transport Department.

What I want to focus on is the other part of the information, which is the accident data from the franchised bus operators.

We know from the "Bus safety" section of the FPPs, the bus operators make available its own data along with its own analysis to the Transport Department once a year. So, leaving that aside, and excluding major incidents where the Transport Department would obviously require the bus companies to submit an investigation report as we have seen in the Tai Po accident, would there be any other systematic and regular reporting of bus accident data by the bus operators?

MS MABLE CHAN: I am checking some of my notes.

MR DEREK CHAN: Yes. So leaving aside the "Bus safety" chapter and leaving aside major incidents.

MS MABLE CHAN: I would invite Ms Tse to reply on that.

CHAIRMAN: Yes, Mr Tse.

MS AMY TSE: So each month we obtain the information from

the police, and we will analyse the data from the police, and if we find that the accident rate has been increasing or some abnormal situation, we will write to or we will discuss with the operators and find out the situation or any rectification or any things that have to be done.

Thank you.

MR DEREK CHAN: Can I perhaps illustrate what I'm asking with a very simple example. Say an incident involving an old lady losing her balance in the bus, she injures herself slightly, I imagine not reported to the police, but the bus operator was aware of the incident and keeps its own records.

Would the Transport Department know about this incident, or would it simply form part of the accident data submitted under the "Bus safety" section?

MR PATRICK WONG: Mr Chairman, may I take this question? As explained by Ms Tse, what we did was for the incidents, we rely on the police cases which have been investigated. For those mentioned by the SC, at the moment we do not receive that sort of information, because it happens basically every day. So the answer is "no".

MR DEREK CHAN: I'm going to go on to the London approach on something like this in a moment, but before I do that,

can I establish one more fact about what the Transport Department does with the two sets of data.

When you have the bus safety data from the bus operators annually under the "Bus safety" chapter, does the Transport Department do any crossmatching between the two data sets that it receives, one from the police and one from the bus operators? Does the Transport Department do any crossmatching exercise?

MS MABLE CHAN: Based on my knowledge, with the involvement of Mr Tony Yau's road safety division and also the Bus and Railway Branch, I can confirm that in our preparation for the forward-planning exercise, we did look at the data submitted by the company and also we looked into the police data. We may not compare it one by one, but we will look at it on a trendal analysis, and if there is any obvious discrepancy then it is certainly the areas that we will question and ask for further analysis.

I can also mention that because the government has also representative on the management boards of the bus operators, on the board discussion they will also at times submit some information on the accident data. We will also look at that, and in preparation of our discussion at the management boards, our colleagues will also look at those regular accident data and then we

will also compare with the database that we have access to. Should there be any discrepancy or differences, we will also point it out in the management board.

Thank you.

CHAIRMAN: So you don't specifically cross-check?

MS MABLE CHAN: We don't specifically cross-check but we will also look into and see whether there is any area of discrepancy and difference.

CHAIRMAN: Can you help me, at least, as to what it is that you mean by your colleagues on the management boards giving you accident data, if that's what you were saying?

MS MABLE CHAN: I am one of the directors on the management board. In preparation for the management board discussion, in looking at the accident data or the safety report submitted by the company to the board, colleagues will also have access to the data provided by the company and then we will compare it with the database that we have, and should there be any case that differs, then we will make that remark and point it out at the management board and ask them that they would have to make sure that their data should align with the police data available.

Thank you.

CHAIRMAN: I'm trying to understand: what role do these

government directors on the management of the companies' boards perform? Are you suggesting that they are a channel, separate channel, for information to the Transport Department?

MS MABLE CHAN: I would not say that it is a separate channel to the Transport Department.

CHAIRMAN: Well, what are you saying?

MS MABLE CHAN: I just would like to mention some forum at which there may be also availability of this accident data, and a government director being present on the management board would also have the opportunity to make our comments and observations on the information provided by the company.

CHAIRMAN: Thank you.

MR DEREK CHAN: If I may, Ms Chan, then take you to the London approach. I am going to take you to a few documents so that we have a more complete picture on the evidence that we have on how Transport for London approaches the issue of data transparency.

Can I start first by going to Mr Weston's report at page 141 of the expert bundle.

Mr Chairman, internal pagination page 27 of Mr Weston's report.

CHAIRMAN: Thank you. Yes.

MR DEREK CHAN: The expert bundle, page 141.

Ms Chan, maybe I can just read bits of this out and then ask you to comment on some of them. I will be pausing and asking you to comment on individual paragraphs.

Firstly, under paragraph 6.2, Mr Weston says this:

"As part of bus operators' contractual requirements, they are required to submit comprehensive data relating to incident and accidents which have occurred across the network. This data is submitted through IRIS (incident reporting information system) although in the case of serious [accidents] these will be reported and monitored in real time through TfL's central control room who will work with other agencies to manage the [immediate] response to the incident.

TfL also publish STATS19 data which is the national data set of road traffic collisions involving death or personal injury. This data is compiled by the police and is published on a quarterly basis."

Pausing here, Transport for London appears to be working on a similar concept as the Transport Department here, in the sense that they have two data sets, one from the bus operators and one from the police, and it would be the data set from the bus operators which I am most interested in, in comparing what, if anything, Hong Kong can do to improve on this front.

If I can drop down to the second paragraph from the bottom of the same page:

"Every quarter TfL publish Excel spreadsheets listing all reported incidents which occurred across the network and include the following information for each incident -- route, date, operator, location in terms of London borough, injury result (treated at scene, taken to hospital), details of the injured party whether passenger, third party, their gender and, if known, their age.

TfL also publish, on a quarterly basis a bus safety dashboard which provides a narrative of the published data and trend analysis with previous quarters."

Over the page:

"This openness, and the associated increased scrutiny from stakeholders, encourages accountability from both TfL and its contracted bus operators for safety performance and encourages continuous improvement."

Just pausing here and going back to the issue of the Excel spreadsheet listing all reported incidents which occur across the bus network -- do you have any observations as to the utility of publishing data down to this level of detail?

CHAIRMAN: Before you ask that question, this is an appendix

to Mr Weston's report, is it not?

MR DEREK CHAN: It is a web link.

CHAIRMAN: Yes, but it's -- I'm asking you this question, really. I have a file that has printed out the data you are describing. Is that material in our bundle?

MR DEREK CHAN: I see that the secretariat has pulled up the table on the screen. My understanding is we have separately downloaded the data from the internet, but not having incorporated it into the bundles in paginated form.

CHAIRMAN: So you can illustrate it from what's on the screen?

MR DEREK CHAN: Yes.

CHAIRMAN: It says "Q1, 2018".

MR DEREK CHAN: Yes. Perhaps I can just describe for the record what's being shown on the screen.

CHAIRMAN: Yes.

MR DEREK CHAN: It is one data set that has been downloaded from Transport for London's website, and in the page on the screen that you can see, it is in relation to the accidents that occurred in January 2018, and on the spreadsheet we can see each incident, the route, the operator, the borough, the injury result description, victim's sex, adult/child, victim casualty category, et cetera, et cetera.

CHAIRMAN: Is there any information that goes off to the right-hand side, as I am looking at it? Yes, so there is.

So let's categorise, as we are looking at it -- are you able to see this?

MS MABLE CHAN: Yes.

CHAIRMAN: What we call "loss of balance", they call "slip, trip and fall".

MS MABLE CHAN: Yes.

CHAIRMAN: And we can see the frequency with which they have that problem as well.

MR DEREK CHAN: Ms Chan, my question was: do you see any utility in the context of Hong Kong for setting up a kind of reporting system and making public information to this level of detail?

MS MABLE CHAN: Perhaps I may make a few preliminary observations. The information set out on the screen, on the details of the incidents, as mentioned in Transport for London's evidence, is down to the very detail of the individual incident. I think, in the Hong Kong context, we are not yet in that position, to track down to every incident to that level of detail. At the present moment, we will have an established system to keep track of fatal accidents regarding the route involved, the operator, the victim involved and the driver involved.

I personally think that while we will advocate open data and transparency, so as to enhance the accountability of both the regulatory authority and the transport operators, the publication or disclosure on every incident with that detail may not -- while it may help to enhance transparency and accountability, it may also go far beyond the level of detail that the public, members of the public, may be interested to know.

I wish to point out also --

CHAIRMAN: But isn't that a matter for the public? If they are not interested in it they wouldn't bother reading it, but they can't read it if it's not available.

MS MABLE CHAN: And also, very often, the incident, once happened, there could be a lot of subsequent developments, regarding the situations of the passengers involved and the pedestrians involved. So I think, once we have to consider disclosure on an incident basis, the timely updating and ensuring the factual accuracy of the information in this format will also have to be considered, because we have to make sure that the public that has access to this kind of information can have correct knowledge of what happened in those particular incidents.

CHAIRMAN: No doubt that's what they do in London. Are you suggesting we're not capable of doing this in Hong Kong?

MS MABLE CHAN: No. That's why the third point I would like to make, as I mentioned the day before, we are also hoping to learn more from Transport for London and the Road Safety and Standards Division colleagues have arranged a visit to Transport for London in February 2019. This is one of the areas that we would like to learn more about the preparation, the issues and also the resources that are required and how they discuss and liaise with the various bus operators, and also to have to verify the data with the police department, so as to see how this kind of information in this format will actually help to enhance transport data accountability and transparency while not causing any complications in the disclosure process.

CHAIRMAN: What are the complications when looking at this bland information: the date of an accident, the route of the bus, the bus operator, the garage from which it came, the place at which it happened, the nature of the injury, male/female, adult/child, type of injury, and whether or not it's a passenger or presumably somebody else, a driver?

MS MABLE CHAN: Yes. Mr Chairman, I think the information here, tabulated in this form, will serve to provide members of the public a simple and factual account of the incident.

The point I would like to add is when we consider whether or not we would disclose or provide the information in this format, we will also have to consider how this information will have to be further updated or elaborated, once it is promulgated.

CHAIRMAN: What update do you need to make from this? A female is not going to become male. Adult is not going to become a child. The accident is not going to happen in another place. What's the update?

MS MABLE CHAN: Chairman, because in particular I notice that there is a column showing the injury description.

CHAIRMAN: Yes.

MS MABLE CHAN: My point is while this table will present a factual account of the injury description at the juncture or immediately, we, from the administration's point of view, also need to consider whether or not there would need to be further updates on the injury description and whether there is any development on that, because I think once the public get this information, there may be also further follow-up questions from the members of the public on what follow-up action has been done and are there any further developments.

So this is something that we would need to discuss further with Transport for London, on how to feed back

to this kind of information disclosure, if there is.

CHAIRMAN: Thank you. May I ask that we have a paper copy of this page, so that we can follow for our records what it is we've been looking at, and could that be distributed to everybody.

Yes, Mr Chan.

MR DEREK CHAN: Ms Chan, you mentioned a moment ago Hong Kong, we, are not in a position to look at this on an incident-by-incident basis. But that's because the operators at the moment are not required to report on an incident-by-incident basis; is that correct?

MS MABLE CHAN: Yes.

MR DEREK CHAN: If we look at London's reporting obligations -- and perhaps I can ask you the practicalities of setting up that sort of system or the utility as well, and for that can I please take you to bundle MISC-3, page 1189, which is a publication from Transport for London, titled, "Update on bus safety programme".

Ms Chan, the passage that I'm going to take you to --

CHAIRMAN: Just a moment while I take a note.

Thank you.

MR DEREK CHAN: I wish to take you to page 1191.

CHAIRMAN: This is the November 2017 response of Transport

for London; am I right?

MR DEREK CHAN: Yes, Mr Chairman. And within the report there is a description of what the system currently is and what they hope can be done to improve the system. So I will be asking Ms Chan on both those aspects.

Ms Chan, at page 1191, the heading is "Bus collision data analysis". I'm not going to read out the "Introduction" paragraph. I want to focus on the paragraphs under the heading "Progress", because the publication starts off that part on a description of what their current system is, and I first want to ask you questions about that.

If I can just read it out first:

"We currently have two main data sets for bus collision data: IRIS and STATS19."

Again, we have established from Mr Weston's report that STATS19 is a reference to the police data.

I will continue reading:

"IRIS is used by bus operators under contract with TfL for reporting incidents relating to their operational activities. This includes collisions, but also slips, trips and fall and other safety incidents such as assault. Operators are required to report serious incidents within 48 hours, and all incidents within seven days. The system serves as the complete

and reliable single source of information on all incidents involving or affecting London's buses."

Now, just pausing here, comparing that to Hong Kong, we also have access to the police data, so in that sense it looks at least the same, but would you agree that the Transport Department in Hong Kong is disadvantaged in the sense that it does not have a similar data set on every incident from the bus operators?

MS MABLE CHAN: Yes, I would agree that under the current franchise regime, there is no such requirement on the specific report of specific incidents to the Transport Department.

MR DEREK CHAN: Yes. For the future, do you think it would be useful to require the franchised bus operators to have a similar reporting obligation? Because it seems to me, from a practical perspective, all it requires is the setting up of a computer system.

MS MABLE CHAN: I think this is certainly an area that is worth pursuing, and also, with the automatic data transmission, I think there can be ways to make this data compilation and transmission more efficient and more effective.

MR DEREK CHAN: And instead of receiving different data sets from different bus operators, you can have one common system that all franchised bus operators use to report

incidents; would that be helpful?

MS MABLE CHAN: I think it would always be helpful and wise to have a common set of template for data report and for data compilation, so that it can equip relevant parties to do data analysis and further investigation and for recommendation of any further follow-up actions.

CHAIRMAN: Mr Chan, before you move on, reference is made at this London update on bus safety programme to this being a requirement under the contract that the bus operators in London have with TfL.

MR DEREK CHAN: Yes.

CHAIRMAN: Are you aware of where that provision is in the contract?

MR DEREK CHAN: No. I have tried to make some effort to look for that, and at the moment this is the only paragraph I can find where the reporting obligation is set out in some detail. I can perhaps attempt to look for it after the hearing.

CHAIRMAN: No doubt that's a matter we could raise with Mr Weston.

MR DEREK CHAN: Yes.

CHAIRMAN: Because it's presumably a simple contractual provision that requires bus operators to report incidents, including collisions, slips, trips, falls and other safety instances.

MR DEREK CHAN: Yes.

CHAIRMAN: So it would be useful to know what it is, how they couch it.

If I could ask you, Ms Chan: this would be very simple, to say to the franchised bus operators, "This is what we want you to report. You can design your own template. We want the date, we want the place, we want to know adult/child, female" -- because age is clearly relevant to trips, slips and falls, as they call it, and London reports, as we do, that it's older people who suffer more, sometimes even sadly fatally, from those kinds of accidents. But this would be very easy to request of the bus operators, would it not?

MS MABLE CHAN: I think it is something that we can actively pursue, Chairman.

MR DEREK CHAN: The other advantage which I am getting on to, when I read on in this publication, is if you have an event incident-by-incident report from the operators, if the matter was reported to the police, you would also have the same data from the police database, which would allow you to conduct a matching exercise to see the quality of the information recording process that the franchised bus operators adopt. Would you agree with that suggestion?

MS MABLE CHAN: That will help in data matching and in

identifying of any discrepancy or exceptions. I think it boils down to the question of how to set the template and to identify major headings for the data template, and then we can get the various bus operators to come up with a similar set of categorisation and also incidents reporting.

So this is something that I think we can take the matter further and discuss with the bus operators.

CHAIRMAN: Presumably, the bus companies themselves require their bus captains to make reports of this nature?

MS MABLE CHAN: Yes, Chairman.

CHAIRMAN: Are you aware of the nature of the information the bus companies require?

MS MABLE CHAN: Because, as we have asked them to provide the data and the analysis by causes of incidents in the "Safety" chapter, it's actually collated based on their raw data and the accounts of the incidents. So we consider that it is not difficult for the bus operators, for the bus company, to capture these data in a more systematic way and report it to the Transport Department.

CHAIRMAN: But do you know, for example, what KMB require their bus drivers to report when there is an incident, an accident? Do you know?

MS MABLE CHAN: I do not know to the level of detail.

Perhaps -- Ms Tse would like to add.

CHAIRMAN: Yes.

MS AMY TSE: Thank you, Chairman.

We understand that bus operators will require the bus captains to report any incident that happens, say within the bus, if there is injury, then they should report to the police.

CHAIRMAN: So, if there's an injury, the bus captain should report it to the police?

MS AMY TSE: Yes, Chairman.

CHAIRMAN: So the police reports ought to match 100 per cent to the bus captain's, if the systems work?

MS AMY TSE: Yes, Chairman.

CHAIRMAN: Is this reflected in writing? Is it part of a handbook, for example? I think the bus companies have got quite useful bus captain handbooks. Have you seen this requirement? If you haven't, say so.

MS AMY TSE: We don't have the information in hand. We may have to check with the bus operators, whether they have put it in the handbook.

CHAIRMAN: We've got bus captain handbooks in our bundles, do we not?

Mr Chan, perhaps someone can look for that and we might be able to turn it up now; well, in due course.

MR DEREK CHAN: Yes. Perhaps I can round up this issue or

this topic by looking at what remains for London to do.

Ms Chan, are you still on page 1191 of the MISC-3 bundle that we were just looking at?

MS MABLE CHAN: Yes.

MR DEREK CHAN: I had read out the first paragraph under "Progress", which describes what the system in London presently is.

The next paragraph under that -- I won't read it out -- describes the police data, so it refers to STATS19 being the old police system, and also refers to COPA which is an updated police system so I'm not going to refer to that.

Over the page, at 1192, under the heading "Future works", this is what Transport for London is aiming for:

"Work is being done to improve the compatibility of IRIS, STATS19 and COPA. A complex matching exercise is continuing to ensure better consistency and reliability of each data set. We are also developing a software system to improve the efficiency and accuracy of collecting IRIS data by enabling it to be automatically updated from bus operators' own various databases."

My question is this, Ms Chan: in terms of looking into the future, should this type of synergy between different data sets be something that Hong Kong should be aiming for in terms of its bus accidents, data

collection and reporting process?

MS MABLE CHAN: Certainly, I think this will be an area that we would hope we can achieve, especially with the improved consistency and reliability of different data sets.

At the present moment, the various bus operators, they keep track of the data, while we have asked them to try to categorise the accident data in terms of the nature and the contributory factors, the description may not be exactly the same as what the police department has done.

I think a common and consistent data set with more frequent updates, say in an automatic way, I think will certainly help the relevant parties to have better articulation and also diagnosis of the issues of concern and then the corresponding follow-up actions.

Also, I would like to add that the expert evidence/submission in this regard actually demonstrates the complexity involved in accidents, in the contributory factors to the accidents, very often the accidents can be contributed by various factors, and the diagnosis of the accidents very often would have to come after thorough investigation by the police and also judicial proceedings.

But, in any event, it will not stop us from trying

to get the first-hand information and categorisation of the incident data from the various bus companies.

MR DEREK CHAN: Mr Chairman, that completes the topics that I have to cover, but before I sit down can I come back to you on this operations handbook, staff handbook, because those assisting me have very helpfully given me the reference already, and I think I can provide an answer to the committee.

CHAIRMAN: Yes.

MR DEREK CHAN: Can I refer the committee to bundle KMB-8A, page 3086. It's showing up on the screen at the moment.

CHAIRMAN: Yes.

MR DEREK CHAN: What is being shown on the screen is the first page of the document from Kowloon Motor Bus, headed, "Outdoor operations staff handbook", and the bottom of the page states that the last update is January 2018.

The relevant part dealing with the procedures when encountering a traffic accident can be found at page 3123 of the bundle.

Volume 8A, Mr Chairman.

CHAIRMAN: Yes.

MR DEREK CHAN: Page 3123.

Under part nine, the handbook says this:

"If a staff member is involved in a traffic accident

while driving company vehicle, he/she should fill in and submit the 'traffic Accident Report' with letter of authorisation within 72 hours of the accident (hospitalised staff should submit the report as soon as possible after discharged from hospital). Please pay attention to the followings", and there's some detail about the description of the report.

After the items 1, 2, 3 and 4, it says:

"The completed 'Traffic accident report' should be submitted to the designated duty dispatch sections of respective depot and countersigned by staff members who collect the report. Any staff members who fail to submit the report on time will have to bear the consequences and will be disqualified from receiving the 'bus captain good services bonus'. Moreover, the company also considers taking disciplinary action against the staff member for non-compliance."

Mr Chairman, I won't read on, but I think the point to take from this is there is no express obligation or direction to the staff to report the matter to the police, although there is a reference to providing a statement made to the police to the legal department, at the third bullet point from the bottom.

CHAIRMAN: Does this handbook contain the traffic accident report?

MR DEREK CHAN: Not in the version that we have in the bundle.

CHAIRMAN: In that case, may I ask that we make a request of KMB to provide us with whatever this document is so that we can see the detail that is required in this report. That would help the Transport Department know what information should be available in KMB.

MR DEREK CHAN: Yes. Mr Chairman, on that note, if I may hand over the questioning to Ms Wong.

CHAIRMAN: Not just yet, Mr Chan.

I'd like you to pursue, if you would, the issue of harsh braking and the information that we've received from KMB as to what they do with these reports, and then to take us to one of their so-called four-minute accumulated total, so we can see how they gather the data.

MR DEREK CHAN: Yes.

For that purpose, Ms Chan, I think it would be useful for you to have two documents together. Can I first ask you to have before you KMB-12, page 4848. Also, can I ask for the secretariat's assistance in providing the page reference for a recent submission from KMB dated 3 October 2018, which I have in an unpaginated form.

CHAIRMAN: Then you have the same version as I have. We can

work from that.

MR DEREK CHAN: Yes. I'm trying to give a reference so that Ms Chan can also have a copy of that before her.

CHAIRMAN: Yes.

MR DEREK CHAN: KMB-1, page 571.

Again, just to clarify, what I wish to have before you, Ms Chan, is firstly KMB-12, page 4848, which is a harsh braking exception report provided to us by KMB; and also KMB-1, page 571, which is a submission from KMB which describes how that harsh braking exception report had been generated. So that's why I want these two documents side by side.

Page 4848 is a Chinese version of the harsh braking report.

Mr Chairman, the English translation is at page 4851. Perhaps I can use the translated version for convenience.

Just reading the table for the moment, Ms Chan, you see that the table heading, "BC performance from 6 February to 12 Feb", so about a week, and the harsh braking -- in the heading -- is said to have accumulated more than four minutes.

If you look at the fourth column from the left, the "harsh brake accumulated" is described as "deceleration more than 8 kilometres per hour". So this is what the

table looks like.

With that table in mind, can I ask you to look at KMB's description of how this harsh braking report is generated.

For that, can I ask you to look at the submission from KMB at paragraph 3(B), firstly, page 572.

CHAIRMAN: Before you do that, the document that we've been looking at on page 4848, is this a document that's come to us from Kowloon Motor Bus?

MR DEREK CHAN: Yes, that's correct.

CHAIRMAN: And it comes from their records?

MR DEREK CHAN: Yes.

CHAIRMAN: It's not a document that is sent to the Transport Department?

MR DEREK CHAN: Not as far as I understand, because this is the exception report that KMB generates for themselves.

CHAIRMAN: Let's ask: the document at 4848, is that sent to the Transport Department, that kind of document, or not?

MS MABLE CHAN: No.

CHAIRMAN: Thank you. So this is a KMB internal record.

MR DEREK CHAN: Under paragraph 3(B), page 572, KMB sets out, The criteria for generating weekly bus captain performance reports are as follows". So the first bit deals with speeding; the second bit deals with sudden acceleration; the third bit, over the page, deals with

harsh braking. If I can just read that out, under the heading "Harsh braking":

"BC's name will be shown in the BC performance reports when the accumulated duration of harsh braking (that is for any particular second, the decrease in speed compared with the speed of the preceding second exceeds 7 kilometres per hour) ..."

And if you look at footnote 3 at the bottom:

"The threshold was set at 8 km/hr per second prior to 1 August 2018."

That's why we see the reference to 8 kilometres per hour in the table.

Continuing reading from the top:

"... recorded by the black boxes of all buses driven by that BC during a particular week is more than 4 minutes."

At paragraph 6, KMB says this:

"The causes of BCs' sudden acceleration and harsh braking vary, for example, they might do so due to actual traffic conditions at such particular time. Accordingly, KMB and Long Win's approach is to monitor the bus captains' driving behaviour first instead of taking immediate investigation and follow-up actions. KMB and LWB thus do not have the practice of generating detailed incident-based reports for sudden acceleration

and harsh braking. Further, the number of entries would be numerous if such detailed reports were generated. For example, an aggregation of 60 minutes (that is 3,600 seconds) of sudden acceleration by one BC would create at least 3,600 entries in the report while an aggregate of 4 minutes (that is 240 seconds) of harsh braking by one BC would create at least 240 entries. Given the massive volume of data involved, the information technology department of KMB and LWB has made their best effort in conducting manual analysis of the relevant data to generate irregular detailed reports (with the adoption of BC performance report standard) in response to the requests of IRC as explained below."

So, Ms Chan, just to give you some context, KMB also provided other data pursuant to this manual effort for the purposes of the committee, so I'm not going to go into that more.

CHAIRMAN: I'd like you to go to that, because one sees what four minutes of accumulated braking actually means. This is done over one week, 240 seconds, and as one can imagine and as you will see, you don't do harsh braking for 20 seconds in a row, because you would be stationary after several seconds. So we get a measure of how often this harsh braking is happening.

Mr Chan, perhaps you can go to the first of the

pages. It's annex 1(b)(1) -- it's page 1 of 16.

MR DEREK CHAN: Yes. I think that's already on the screen.

CHAIRMAN: Thank you. Perhaps we could have this printed out for the benefit of the Transport Department. Is this in hard-copy form that would be available to them in a file that is with them?

MR DEREK CHAN: I certainly looked at it as a soft copy on my computer because it was quite long. I didn't cause that to be printed out.

CHAIRMAN: I have a hard copy here myself, so presumably hard copies have been produced.

There's a lot of pages on sudden acceleration and there are fewer pages on harsh braking.

MR DEREK CHAN: Yes. The report on harsh braking begins at page 5578 of KMB-12.

Ms Chan, I hope you have before you a document -- there's a heading on the top left-hand corner of the page which says "Annex 1(b)(i) harsh braking report for selected BCs".

Ms Chan, just to give you some context, according to the KMB submissions, this is not a document that is regularly generated by KMB themselves. It's a document that they generated at the request of the committee, to look at the individual instances of harsh braking that make up a four-minute entry which then appears in their

regular exception report.

Ms Chan, what you can see is that this set of records at the bottom comprises of 18 pages and you will be looking at the first page, at 5578. All these records relates to an employee number 3965, and if you look across the page you can see a number of information about the route, the time, the date, and the speed deceleration.

CHAIRMAN: Have we been given any explanation for some of these abbreviations, for example "ba_value"?

MR DEREK CHAN: Yes. The explanation is actually at the written submission we have just been looking at, at KMB-1.

CHAIRMAN: So what is "ba_value"? I think we can do it by deductive logic.

MR DEREK CHAN: The ba_value, according to KMB, and this is in footnote 4 of the submission we have been looking at, the item "ba_value" refers to brake deceleration value which is calculated by comparing the speed of a particular time with the speed of the preceding second. So that is the speed difference.

CHAIRMAN: So the speed at 06:05:45 was 5.8 kilometres per hour, and that had come about because the vehicle had been braked by 9.5 kilometres per hour from the previous second; is that it?

MR DEREK CHAN: Yes, that's correct, Mr Chairman.

Ms Chan, from 5578 to 5586, you can see the entries generated for employee 3965. Then, on that page, you can see the employee number then changes to 63287.

CHAIRMAN: Do we know what the accumulated total of this particular driver's harsh braking was?

MR DEREK CHAN: According to KMB submission, at paragraph 7(b) that we have just been looking at -- I will read it out:

"The detailed record of harsh braking for BC with employee number 3965 (401 entries entailing 6.68 minutes of harsh braking) ..."

So that's for 3965.

"... and BC with employee number 63287 (395 entries totalling 6.58 minutes of harsh braking) ..."

Ms Chan, I think you can see 63287 from page 5586 down to 5595, comprising, as I said, 395 entries.

So, Ms Chan, from the perspective of the Transport Department, do you have any observations about the practice of KMB of basically not generating an exception report for a bus captain for harsh braking until this bus captain accumulates something like hundreds of times of crossing the harsh braking threshold within any particular week? Do you have any observations about that?

CHAIRMAN: It might be you want to reflect on that, and we are going to take a break soon, and give you a chance to think about the question.

But perhaps next we might move to what it is that is provided to the Transport Department about harsh braking.

MR DEREK CHAN: Yes. I have that document. I had that document a moment ago. Give me a moment, Mr Chairman.

CHAIRMAN: Yes, of course.

MR DEREK CHAN: In terms of what is given to the Transport Department, I think Ms Tse mentioned this a moment ago. Can I take you to TD-4, page 1020. This document at the top says, "Monthly report on monitoring measures relating to bus safety", and I think this is a document that Ms Tse referred to earlier about requiring bus operators to submit a form of random checks that they take -- or checks that they do take on the black box data.

If I can take you down to one-third of the way up from the bottom, under the heading, "Checking black box data box data for monitoring of driving behaviours of bus captains", the second box under that heading, under the item, "No. of ad hoc checks on black box data conducted"; second column:

"No. of mal-practice cases found (as at end month)

Please provide breakdown of cases by nature [of]:

- speeding.

- braking suddenly.

- others (please specify)."

And for this example braking suddenly is reported as eight times, and verbal warning is 13 times. So, when the Transport Department gets a document like this, and it is reported that there is eight "braking suddenly" cases, it appears to suggest, how does the Transport Department interpret this data?

So does the Transport Department interpret it as eight individual instances of harsh braking, or what?

CHAIRMAN: Perhaps now would be the time to take the break, and you can reflect on the question whilst we have a break. Let's take 15 minutes.

MS MABLE CHAN: Thank you, Chairman.

(4.16 pm)

(A short adjournment)

(4.31 pm)

CHAIRMAN: Yes, Mr Chan.

MR DEREK CHAN: So, Ms Chan, before the break I asked you two questions.

Firstly, from the perspective of the Transport Department, do you have any observations as to KMB's practice of basically not generating an exception report

on harsh braking until an individual bus captain has accumulated what is hundreds of occasions of crossing the harsh braking threshold within a particular week? That was the first question.

The second question was in respect of the monthly report, at TD-4, page 1020. So, when the Transport Department receives the report and sees on one of the entries, "braking suddenly", what appears to be eight cases, how does the Transport Department interpret that data?

Perhaps Ms Chan can deal with those in turn.

MS MABLE CHAN: I will address the first question and then I will invite my colleague Mr Patrick Wong to respond to the second.

On the first question, I think with the availability of the black box function to generate exception report, and with the focus of issue of concern on harsh braking, I think we expect the company to take a very serious approach to how to make use of this function and their data to help them to closely monitor the driving behaviour of bus captains.

No doubt, the data generated by the black box alone may not necessarily lead to any conclusion that the bus captain drives the bus in a negligent manner. Still, it provides some objective data for the bus company to

investigate further. We expect that with, say, the availability of installation of CCTV, and with also the plain-clothed inspectors on board the buses, all these are helping, equipping the bus company to take into account any other relevant observations on the bus driver's behaviour. But no doubt this black box data is very essentially and first-hand information and a basis for them to identify any misbehaviour or malpractice of the bus captain.

I will invite Mr Patrick Wong to address on the second question, regarding the information that we ask the bus companies to provide regarding the black box data.

MR PATRICK WONG: Mr Chairman, basically the template shown on the screen has been --

MR DEREK CHAN: Which is page 1020 of TD-4.

MR PATRICK WONG: Yes. It's been designed by the Transport Department and shared with -- actually, we requested the franchised bus companies to provide such information since January this year.

For the case you mentioned about the braking suddenly, we gather that -- because on the left column, it shows 400, but we are not sure actually, for designing this template, we just ask the franchised bus companies to provide the information about the number of

malpractice cases found. So, under the "braking suddenly", we cannot confirm whether it's actually based from the acceleration or deceleration black box data on this, but maybe we gather that the bus company would do some more investigation, maybe interview with the bus captain, before coming up whether it is established as a malpractice. That's what we understand.

Thank you, Chairman.

CHAIRMAN: I'm sorry, can you help me -- what does the figure that you pointed out -- what does 400 mean?

MR PATRICK WONG: Number of checks, ad hoc checks.

CHAIRMAN: So ad hoc as opposed to routine; is that it? The box above it, "Routine".

MS AMY TSE: Chairman, the ad hoc checks by bus company is normally based on the complaints, not the routine one but the extra one that they did. The routine one would be 8552 for the KMB case, as shown.

CHAIRMAN: But that doesn't address braking, that's only speeding, which is the point really. They check speeding, not harsh braking.

MS AMY TSE: For speeding, because they have a report generated from the black box, but for the ad hoc checkings, normally they act on the complaint, and because the braking, they might need to investigate based on the CCTV, before they just simply use the data

to say that it is the negligence of the bus drivers. They need more different investigation before they could classify it as a malpractice of bus captains.

CHAIRMAN: So what it comes down to is this: there is an exception report generated for speeding?

MS AMY TSE: Yes, there is report generated for speeding.

CHAIRMAN: But there is no exception report generated for harsh braking?

MS AMY TSE: To our understanding, they can set the threshold, but at the moment they may not generate the report because they need more investigation.

CHAIRMAN: Let's just deal with the facts. The explanation can be another matter. There is no exception report generated for harsh braking?

MS AMY TSE: Yes, to my understanding.

CHAIRMAN: The ad hoc report comes about because there had been a complaint and they go and investigate it as a result of the complaint.

MS AMY TSE: Yes.

CHAIRMAN: But the fact is the data is available, as we have seen in all these pages of data, to monitor/understand the volume of harsh braking that's occurring; correct?

MS AMY TSE: Yes, Chairman.

CHAIRMAN: Now, one of the factors that is obvious is that the threshold they are setting, which used to be for

braking more than 8 kilometres, now reduced apparently to 7 kilometres per hour change per second, is in the range of 0.2G thereabouts, is it not? They are not monitoring this at 0.4G, are they?

MS MABLE CHAN: No.

MR WILLIAM SHUM: Yes, for the 7km/hour/second, is approximately equal to 0.2G.

CHAIRMAN: Yes. That is relevant to problems caused to people standing in a bus.

Yes, Mr Chan.

MR DEREK CHAN: Mr Chairman, that completes my questioning, so with your permission I will hand over the questioning to Ms Wong.

CHAIRMAN: Yes. Thank you very much for your help.

MR DEREK CHAN: Thank you, Chairman.

CHAIRMAN: Just give me a moment, Ms Wong, to dispose of some of these files.

MR DEREK CHAN: Mr Chairman, Ms Wong didn't let me sit down.

CHAIRMAN: I think she was probably encouraged by me.

MR DEREK CHAN: The reason is because Ms Wong has very helpfully dug up the traffic accident report that we had been looking at, in terms of what the bus drivers are instructed to do when they encounter an accident.

CHAIRMAN: Yes.

MR DEREK CHAN: There is actually a better reference than

the one I took you to earlier.

So perhaps I can invite Mr Chairman firstly to look at bundle KMB-10A, page 4190-1.

Just for the purposes of the record, the Chinese of the document starts at 4161; English translation, 4190-1.

CHAIRMAN: Yes.

MR DEREK CHAN: The document that you should have before you is headed, "Quality guide on how to handle bus traffic accidents", and it's a document from KMB.

CHAIRMAN: Yes.

MR DEREK CHAN: Perhaps just starting at the last point, which is the actual traffic accident report.

Mr Chairman will find that at appendix II of this document which is at page 4190-31.

And I think at 4190-29 is the English translation of that document.

CHAIRMAN: Is there a legible, or more legible, version of the one at 4190-31? That looks as though it's a scanned version.

MR DEREK CHAN: Yes. There's not in this file. Perhaps we can liaise with KMB afterwards to get that.

CHAIRMAN: Yes.

MR DEREK CHAN: But what is interesting is if I can draw the committee's attention to 4190-38, which appears to be

a standard form letter of consent, seeking the passenger's consent for not to file a report with the police, even though he sustained injuries.

So it does not appear to be a matter of course that incidents would definitely be reported to the police.

CHAIRMAN: Yes. Thank you for that.

MR DEREK CHAN: Ms Wong has very helpfully found a more legible copy of the traffic accident report, at bundle KMB-10B, page 4397.

CHAIRMAN: Yes. Thank you, Ms Wong.

So what appears to be missing from this form compared with the information that is on the Transport for London website, details of incidents resulting in a fatality or injuries, which required hospital attendance and treated on scene." What is missing is any reference to the nature of injuries, is it not? But there is a reference to a fatal, admitted, discharge -- presumably that's a reference to hospitals.

MR DEREK CHAN: Yes, under the heading "Particulars of casualties", there appear to be boxes that can be ticked.

CHAIRMAN: Yes.

MR DEREK CHAN: "Not verified", "left scene", "discharged", "admitted", "fatal". I think what appears to be missing is a characterisation that is perhaps more useful for

analytical purposes later on as to whether it's a "slips, trips and falls" accident, whether it's a loss of balance case, those kind of categories.

CHAIRMAN: Yes. Ms Chan, that would be something that, if you were to design a template and require franchised bus operators to give you this kind of information so that you had a better database, then you could design whatever it is you wanted them to tell you.

MS MABLE CHAN: Yes. I will, yes, because this is very important, and how we can sort of describe it and set in the template, to enable accurate data reporting, is something that we will have to look into. Yes, we will.

Thank you, Chairman.

CHAIRMAN: Thank you.

MR DEREK CHAN: Yes, Mr Chairman. May I once again attempt to hand over hand over the microphone to Ms Wong.

CHAIRMAN: Thank you very much.

Ms Wong.

Examination by MS MAGGIE WONG

MS MAGGIE WONG: Thank you, Mr Chairman, and thank you, Ms Chan, and ladies and gentlemen.

I will be asking a few topics. The first topic is on the Working Group on Speed Limit Review, and its functions and its interrelationship with the Road Safety Audit that you mention in your new annex and how it

works in practice.

With that remark, may I first of all ask you -- we know from the evidence that the Transport Department's Working Group on Speed Limit Review includes representatives from the Transport Department and two NGOs, which are the Motorist Association of Hong Kong and Senior Drivers Association of Hong Kong.

CHAIRMAN: I think that might be a translation that is supposed to capture advanced motorists; am I right?

MS MAGGIE WONG: Yes.

And also representatives from the police. Is that correct?

MR TONY YAU: Yes.

MS MAGGIE WONG: We also heard evidence that the person who convenes the meeting is the assistant commissioner of the Transport Department; is that also correct?

MR TONY YAU: Correct.

MS MAGGIE WONG: The Transport Department also provides the secretarial side of it. May I ask first of all, the function of the working group -- would the working group consider based on objective facts and assessment of accident data in determining whether there should be suggestions for changing speed limits of certain road sections?

CHAIRMAN: Before you answer that question -- is this

committee described in our papers somewhere, in our bundles?

MR TONY YAU: I think in our paper 10. TD-1, page --

MS MAGGIE WONG: 120. TD-1, pages 120 to 121.

MR TONY YAU: 120, yes.

CHAIRMAN: But is it a working group or is it a committee?

MR TONY YAU: It's a working group.

CHAIRMAN: Thank you.

MR TONY YAU: The main purpose of the speed limit review working group is to advise on TD's review of speed limits and advise on TD's practice on setting speed limit.

The members offer comments on the speed limit review, based on the major four factors. The first one is the accident history of the concerned road sections. The second one is the geometric environment of the road sections. That means the road's environment conditions. And the third one is the number of changes in speed limit, the existing speed limit and the connecting road speed limit. The fourth one is the actual vehicular speed, that means the speed measured on site.

CHAIRMAN: That's the 85th centile?

MR TONY YAU: Yes.

MS MAGGIE WONG: I understand that the working group also meet on a quarterly basis, and may I ask -- we have

heard evidence that the choice of the road sections is for the Transport Department to decide; is that correct?

MR TONY YAU: Yes, correct.

MS MAGGIE WONG: If there is a situation where you receive complaints from the district council about certain road sections that need to review speed limit, how would that reach the Working Group on Speed Limit Review?

MR TONY YAU: Usually, when there is a request from district councils, they will approach our regional district engineer, and our regional district engineer will base on those criteria of a speed limit review and see if any significant change.

Also, the main three points they have to consider is whether there is a change of accident and change of road environment. If there is a public request, they will consider whether they will prepare the speed limit report and submit to the working group for discussion.

MS MAGGIE WONG: You mentioned one of the things is whether there is a change of accident. What do you mean?

MR TONY YAU: As I mentioned, to consider the speed limit review, one of the criteria is the accident history. We usually will calculate the average year -- the year accident rate. So, if the district engineer noticed that there are significant increase of accident, they may consider to do a speed limit review.

CHAIRMAN: How is "accident" defined?

MR TONY YAU: It is the personal injury accident rate of the road section concerned, as compared with the figure of the whole territory.

That means the concerned road section's accident history compared with territory-wide, to see if the accident rate of the concerned road is particularly higher than the average one.

CHAIRMAN: So it doesn't get into the statistics unless there is a personal injury?

MR TONY YAU: Only consider the personal injury accident.

CHAIRMAN: Yes, so you could write the car off and get out and walk away and it doesn't go in the statistics; is that it?

MR TONY YAU: It's based on the record from the police.

CHAIRMAN: It requires an injury before it gets in the figures?

MR TONY YAU: Yes.

CHAIRMAN: Thank you.

MS MAGGIE WONG: You mentioned the accident rate, and that it only requires -- it only qualifies as an accident rate if there is a personal injury. What happens -- maybe you quote an example -- in this scenario it is Tai Po Road -- which particular district would you compare the statistics before it reaches the working

group?

MR TONY YAU: Usually, we will compare with the territory-wide average values.

MS MAGGIE WONG: In the Tai Po Road section, which district would that be?

MR TONY YAU: For Tai Po Road, we would consider -- we would select the concerned sections of Tai Po Road, and then we sum up the accidents and we calculate the accident rate for that concerned section of road, and then compare it with the territory-wide figures.

MS MAGGIE WONG: There's one situation --

CHAIRMAN: Forgive me for interrupting again -- accident rate per what?

MR TONY YAU: Accidents per million vehicular kilometres.

CHAIRMAN: Thank you.

MS MAGGIE WONG: You mentioned accidents per million vehicular kilometres, but it doesn't state accidents that necessitate personal injuries. So, in that sense, it is qualified by the Transport Department as accident for injuries per million vehicular kilometres; is that the position?

MR TONY YAU: We only count the personal injury as accident, as traffic accident.

MS MAGGIE WONG: Thank you.

CHAIRMAN: Why?

MR TONY YAU: Because we base on the police figures. We only retrieve -- we only can assess the accident, the traffic accident, involving personal injuries. I know that from police, there are quite some accidents that maybe the motorist vehicle hit some street furniture and they left, and those figures, they did not have a quite -- cannot record all that incident because the concerned motorist maybe disappeared after those accidents that do not involve any personal injury.

CHAIRMAN: But there clearly was an accident. It might, for example, be a bend where cars go off regularly, but it's only an accident if somebody is injured?

MR TONY YAU: Yes, but because required by the regulations, only accidents involving personal injury need to be reported to the police. So maybe for those that do not involve personal injury, they do not need to report to the police, so we do not have very true figures of that kind of accident.

CHAIRMAN: I understand what you're talking about, the requirement in law to report if there's an accident involving injury. But if the car is broken at the side of the road, the driver might have run away, but there clearly has been an accident -- tyre marks all over the road, lamppost knocked down -- and that doesn't count?

MR TONY YAU: It doesn't count in this exercise of speed

limit review.

CHAIRMAN: Very well.

MS MAGGIE WONG: Now, on this accident rate, can I ask another scenario. It's if that particular section of the road has a lot of speeding, and the police issue a lot of fixed penalty tickets for speeding, and I understand that some of the accidents would be shared with the Transport Department in terms of accident data, but would that sort of fixed penalty tickets data be shared with the Transport Department?

MR TONY YAU: You mean that maybe --

MS MAGGIE WONG: Speeding.

MR TONY YAU: Yes, speeding, the police issue tickets for speeding and actually there are quite a number of vehicles are speeding, but it did not reflect in the accident rate.

MS MAGGIE WONG: Yes.

MR TONY YAU: That's the reason why we might consider the accident rate. If in that case that many -- or maybe most of the vehicles are speeding, but the accident rate is still low, there may be a problem of the speed limit set. So, under the current situation, they have to conduct a speed limit review. Maybe the speed limit imposed on the road is too slow, from traffic engineer's viewpoint. That's why most of the cars are speeding but

the accident rate is very low.

CHAIRMAN: I think part of the question was, "Do the police provide you with their data as to the fixed penalty speeding tickets issued on the section of road as a matter of course?" Do they do that?

MR TONY YAU: No, not for the speed limit review exercise.

MS MAGGIE WONG: Can you give us a ballpark figure -- because you talked about the accident rate being screened by the engineer of the particular region, and compared to the particular district, can you give us a ballpark figure as to what figure it reached would it warrant the investigation or review or consideration by the Working Group on Speed Limit Review?

MR TONY YAU: Yes. Maybe I can give you some figures. The territory-wide accident rate, I mean it's territory-wide, not particular district accident rate, we annually issue the road traffic accident statistics. For example, the accident rate for territory-wide in 2017, accident rate per million vehicle-kilometres is 1.15. That means, for a particular section of road, if the district engineer finds that after the calculation, the accident rate is higher than 1.15, they will consider to conduct a speed limit review.

CHAIRMAN: Is this material in our bundles? What's the name of this document where this is contained?

MR TONY YAU: I would like to add, in addition to the accident rate, even there's no observation from accident rate or other factors, they would conduct a regular review of the road section, a regular review of the speed limit of the concerned road section.

CHAIRMAN: Where is this figure, territory-wide accident rate per million vehicular kilometres 2017 -- what document is it in?

MR TONY YAU: It is in the booklet the Transport Department issue every year. The name is "Road Traffic Accident Statistics". It is available on our Transport Department homepage.

CHAIRMAN: Ms Wong, is that in our material?

MS MAGGIE WONG: No. I haven't seen that. Maybe we can be provided with that.

CHAIRMAN: This is available on the internet?

MR TONY YAU: Yes.

CHAIRMAN: Perhaps we can see if we can locate it now. What page is it at?

MR TONY YAU: Page 9.

Yes, on this page, the 1.15 accident rate.

CHAIRMAN: Yes. Could we have a copy of that printed, please, and distributed.

MS MAGGIE WONG: According to this table, it doesn't specify the territory.

CHAIRMAN: Is that term perhaps found elsewhere in these statistics?

MR TONY YAU: Because this table summarises the whole Hong Kong figures.

CHAIRMAN: Yes, but is that spelt out somewhere else?

MR TONY YAU: Maybe you can refer to figure 2.13.

CHAIRMAN: Yes. Do we have to go to the bottom to get a total?

MR TONY YAU: Yes.

CHAIRMAN: "All roads", that's the figure?

MR TONY YAU: "All roads", yes.

CHAIRMAN: Thank you.

MS MAGGIE WONG: On that table, "All roads", does that mean all roads within that territory, or all roads within the selected roads mentioned there?

MR TONY YAU: All roads within the territory.

MS MAGGIE WONG: So, when you mentioned earlier in the evidence about the engineer would look at the accident rate based on territory-wide, would this table assist?

MR TONY YAU: Yes. Territory-wide is actually the "All roads" accident rate figure.

MS MAGGIE WONG: So you would look at the 0.13 figure and not the 1.15 figure; is that the position?

MR TONY YAU: 1.15 should be on the bottom.

CHAIRMAN: 1.15 is the territory-wide accident rate, but the

Tai Po Road rate is 0.13, is it not? You look at the two figures, don't you, how the particular section of road compares with the territory-wide ...

MR TONY YAU: In the speed limit review report, the engineer has to select a concerned section of road, and then use that section of road, to retrieve all the accident occurred over the past one year, and then calculate the accident rate.

CHAIRMAN: By that, are you suggesting that the reference "Tai Po Road Sha Tin" is a broader area of the road than the section of the road that the engineer would select; is that what you mean?

MR TONY YAU: Yes, because the exact boundary may be different.

CHAIRMAN: Yes. So the Tai Po Road from beginning to end might have quite a number of different sections; is that it?

MR TONY YAU: Yes.

CHAIRMAN: And this figure is the summation of all of those different sections?

MR TONY YAU: Yes, I think so.

MS MAGGIE WONG: Yes. Now, you mentioned earlier in the evidence that even without this accident rate, the Transport Department would regularly review the limits or the road sections or the speed limit of the road

sections. On what basis would it conduct that exercise?

MR TONY YAU: It mentions in our submission, the latest submissions, the paper.

MS MAGGIE WONG: Is that TD Paper 10?

MR TONY YAU: No, the submission that we submit on Wednesday, on 3 October.

MS MAGGIE WONG: That would be TD-5?

MR TONY YAU: That's the table.

MS MAGGIE WONG: That would be TD-5, page 1817. Is that the paper?

MR TONY YAU: Yes.

MS MAGGIE WONG: You stated there, at page 1819, paragraphs 12 and 13, that "As mentioned" -- if I could read that into record:

"As mentioned in TD Paper 10 ... speed limit reviews taking into consideration a number of factors, including accident rate, actual vehicular travelling speed, road geometry and environment of the road section, will be carried out regularly and discussed in the standing Working Group on Speed Limit Review."

Then at 13 you stated there:

"A review of speed limits on all roads will be carried out at regular intervals, and the frequency for such reviews will make reference to their road types ..."

And you specify that there are three road types: trunk roads, the frequency will be 36 months; primary distributor roads, 48 months; and rural roads, 60 months. That would be equivalent to five years.

Can you explain or elaborate what is meant by "trunk roads"?

MR TONY YAU: Trunk road is the major, usually with higher standard, including the expressways, and usually it's linking inter-district or inter-region. That means the trunk road may be linking different districts or from regions, say Kowloon to the New Territories.

We also have a definition of that. This is under our transport planning design manual, we have a definition of trunk road; do you want me to --

MS MAGGIE WONG: Yes. Can you either read it out or give us a copy.

MR TONY YAU: I will read it out. The trunk roads -- there are two different types of trunk roads, the first one is rural trunk road. Rural trunk roads is:

"... Roads connecting the main centres of populations. High-capacity roads with no frontage access or development, pedestrian segregated, widely spaced grade-separated junctions, and 24-hour stopping restrictions."

For the urban trunk roads, they are:

"... roads connecting the main centres of populations. High capacity roads, with no frontage access or development, segregation of pedestrians, widely spaced grade-separated junctions, and 24-hour stopping restrictions."

CHAIRMAN: Yes.

MS MAGGIE WONG: What about the primary distributor roads?

MR TONY YAU: Primary distributor, under the same design manual, it means:

"... roads forming the major network of the urban area. Roads having high capacity junctions, though may be at-grade, segregated pedestrian facilities wherever possible and frontage access limited if not entirely restricted, and 24-hour stopping restrictions."

MS MAGGIE WONG: So it's not limited to urban roads; it could include New Territories, roads in New Territories, as long as it fits the description?

MR TONY YAU: Maybe the new towns. New towns, the nature is similar to the urban areas.

MS MAGGIE WONG: Yes. Sorry, I should have asked earlier about this trunk road. Trunk road, would that be mostly urban roads or does it also cover roads in New Territories?

MR TONY YAU: Both, cover urban and rural.

MS MAGGIE WONG: And what about rural roads?

MR TONY YAU: Rural roads are:

"... roads connecting the smaller centres of populations or popular recreation areas with major road networks. Frontage access should be limited wherever possible and junction design whilst not necessarily grade separated should be of a high capacity standard."

MS MAGGIE WONG: I see, in your footnote 1, you mentioned that:

"For most roads, if the speed limit accords with the design speed set for their existing road types and road characteristics, changing the speed limit will not be required ..."

On this section first, the existing road types is the three road types that you mentioned; is that the position?

MR TONY YAU: Do you mean Tai Po Road?

MS MAGGIE WONG: No, generally, this statement, "existing road types", does this "existing road types" mean the road types that you mention in paragraph 13, ie the trunk roads, primary distributor roads and rural roads?

MR TONY YAU: Yes, "existing road types" covers all the different roads.

In this footnote, there's a new term, the design speed. That means, for an engineer, when they design a road, they have an intention on what the design speed

for that road. For example, if a road is designed for 50 kilometres per hour, I think no matter whatever change of the road environment, the surrounding area, or accidents, even though you review several times, the speed limit will remain 50 but will not have any chance to increase to 70 because that is the design speed, it is the road constraint, the site constraint that limits the speed limit.

CHAIRMAN: What about decreasing it, if you have hots of accidents?

MR TONY YAU: Under the current speed limit structures, our lowest speed limit usually is 50.

CHAIRMAN: You don't consider any other lower speed limit?

MR TONY YAU: We've mentioned that in the paper.

CHAIRMAN: We are going to come to that as a separate topic.

MS MAGGIE WONG: The second part is:

"... changing speed limit will not be required unless there has been demand on it or the accident rate on the concerned road is above the territory-wide average."

There are two provisos here. The first is there has been demand of it.

CHAIRMAN: Sorry, where are you reading from?

MS MAGGIE WONG: From footnote 1, Mr Chairman, I apologise, page 1819.

"There has been demand on it"; what do you mean?

MR TONY YAU: That's echo what I just mentioned before, there are two ways to trigger the speed limit review. The first one is the regular review. Regular review, which follows the road types, and the frequency of review, that means the table mentioned under paragraph 13. And the second way to trigger the speed limit review will be triggered by public demand or accident rate, and accident rate, I have just explained how to compare with the territory-wide average.

CHAIRMAN: So public demand might be district councillors communicating to you complaints made by residents; would that be it?

MR TONY YAU: The members of the public.

CHAIRMAN: Through the district council?

MR TONY YAU: Maybe.

CHAIRMAN: We've seen that in the Tai Po Road itself. That clearly is a public demand, is it not? Or don't you regard that as a public demand?

MR TONY YAU: When we receive a demand from DC members, we will consider a review.

CHAIRMAN: Yes.

MS MAGGIE WONG: You mentioned, "When we receive a demand from DC members, we would consider a review." The "we", who are you referring to?

MR TONY YAU: Usually, the DC members will approach our district traffic engineers.

MS MAGGIE WONG: So it will be screened by the district traffic engineer first, to see if it reached the accident rate before it reached the working group; is that the position?

MR TONY YAU: Yes. They would consider also -- accident rate is one of their considerations. They will also consider whether there is a significant change in the environment around their district.

MS MAGGIE WONG: Yes. What do you mean by "significant change in the environment"?

MR TONY YAU: For example, with some new developments, property that will affect the traffic mix or increase the traffic flows.

MS MAGGIE WONG: Is there a mechanism where if the distinct council or district councillor, the public, disagrees with the consideration given by the traffic engineer that the road should be reviewed, what can the public do in those circumstances, apart from going repeatedly to the to traffic engineer? Is there a review mechanism where it could reach the Working Group on Speed Limit Review?

MR TONY YAU: Because, based on our current practice whether to conduct a speed limit review or -- the speed limit

review itself is quite technical. So it really depends on the traffic engineer to conduct a speed limit review and find out the most suitable speed limit for that concerned road section.

MS MAGGIE WONG: In terms of the current practice, this traffic engineer, if the accident rate doesn't meet the criteria, would the traffic engineer, having received a number of complaints, or the district council is dissatisfied with the complaints and requests the engineer to review it, would the engineer as a protocol go and visit that particular site in question?

MR TONY YAU: Yes.

MS MAGGIE WONG: So it's a protocol?

MR TONY YAU: Usually, the traffic engineer will have a site visit with the concerned DC members, and see if -- even though there may not be sufficient reason to trigger the speed limit review, they may see on site what kinds of traffic improvement measure can be done.

CHAIRMAN: By that, do you mean perhaps improving signage, or chevrons, that sort of thing?

MR TONY YAU: Yes. Sometimes it improves the -- usually it is the pedestrian crossing facility. They may find the speed limit is too high, and they have difficulty crossing the road.

MS MAGGIE WONG: Still on that page, can I proceed to ask you about that paragraph below the table:

"Over the past five years, speed limits of 143 road sections have been reviewed and discussed in the Working Group on Speed Limit Review."

These 143 road sections, is there a breakdown of which road type it was?

MR TONY YAU: Yes, I have a record.

MR DEREK CHAN: Can you give us the figure?

MR TONY YAU: I will check whether I have the information available.

I have a table showing all the road types of each 143 road sections, but do not have a summary or an example of primary distributor or --

MS MAGGIE WONG: Yes. First of all, can you give us an average of the road sections that would be reviewed on a yearly basis?

MR TONY YAU: Average is at least 24 road sections, each year.

MS MAGGIE WONG: Is that number a fixed number or can it be changed subject to circumstances?

MR TONY YAU: Yes, it's the minimum number, at least we have to review 24.

MS MAGGIE WONG: How do you select the 24 road sections?

MR TONY YAU: It's based on the regional engineer's

considerations.

MS MAGGIE WONG: And the regional engineer considerations will be based on the three criteria you mentioned earlier?

MR TONY YAU: Yes, and also the public demand, accident rate.

MS MAGGIE WONG: Would this information be made public, these 143 road sections, or the 24 road sections that are going to be reviewed; would this information be made public so that the public knows the working group would review these 24 sections and give their comments before the working group convenes?

MR TONY YAU: No. But if there are any changes in the speed limit finally recommended in the working group, we usually will consult the district council.

MS MAGGIE WONG: You mention also in that paragraph that out of the 143 road sections reviewed, seven road sections have been recommended for speed limit changes.

Can you tell us, first of all, these seven road sections, which type it is, or which road types they are?

MR TONY YAU: For that seven road sections, two roads are primary distributors, one road is a district distributor, and two roads are sliproads of expressway, and one is a rural -- two primary distributors, one

district distributor, two sliproads of expressway, one rural, and one local distributor.

MS MAGGIE WONG: Second, the speed limit, you stated there that there had been changes. What is the change?

MR TONY YAU: Five road sections, the speed limit is decreased, and two road sections, the speed limit is increased.

MS MAGGIE WONG: So which are the road sections where the speed limit is decreased?

MR TONY YAU: You mean the name of the road section?

CHAIRMAN: Do you mean the name or the type of road?

MS MAGGIE WONG: I mean first of all the road type, and if you would also be able to assist on the specific road sections, and the year.

MR TONY YAU: Maybe, from the time chronology -- in 2015, for the five road types that the speed limit decreased, there is one primary distributor, one district distributor, one rural, one local distributor, and one sliproad of expressway. Those five road types have a decrease of their speed limit.

For the two road sections have an increase of the speed limit, one is primary distributor and another one is sliproad of expressway.

MS MAGGIE WONG: I see the time, Mr Chairman, but I would like to explore this. I would be grateful if you would

provide more information about this 2015 in relation to these five roads types where the speed limit is decreased, and the specific sections which we are concerned with and the reasons why they are decreased in terms of speed limit, and the relevant minutes of the meeting of the working group.

CHAIRMAN: Before the witness answers the question, may I enquire what is the relevance of this line of questioning?

MS MAGGIE WONG: Mr Chairman, I wish to know on what basis, first of all, would it reach the working group in terms of specific road sections; and the second is what considerations have been given in the working group and what weight has been given in the working group as to the complaints made by the district council.

Maybe, if they could address these two matters without minutes, I'm happy with that.

CHAIRMAN: Ultimately, what is the purpose of finding out this information?

MS MAGGIE WONG: It's whether we could improve the working group system or the protocol in terms of reviewing of road limits, when it comes to complaints from district council, without simply using the accident rate per territory-wide coverage, because it appears artificial.

CHAIRMAN: You have in mind the benchmark being what

happened on this Tai Po Road section that we are concerned with?

MS MAGGIE WONG: Yes, specifically.

CHAIRMAN: Very well.

Can you provide information as to that?

MS MABLE CHAN: We will try to dig out those minutes to facilitate.

CHAIRMAN: Thank you.

MS MAGGIE WONG: In terms of -- before I go on with this paper, can I ask a few questions, going back to this Working Group on Speed Limit. May I ask a few questions as to why it is set up in the first place. We have information that this working group -- or rather you provided information that this Working Group on Speed Limit Review has been formed in 2000. Can you tell us why this Working Group on Speed Limit Review has been formed in 2000?

MR TONY YAU: Yes. The working group was formed in 2000. In that year, I remember there's a LegCo paper, stating why we set the Working Group on Speed Limit, because at that time there is quite public enquiries or comments that the then road section, the speed limit were usually set too low and the police will invoke enforcement for those road sections. So there's quite a strong request from public, in particular the motorists' association,

that we have to review the speed limit with a view to seeing if any particular roads, any concerned road, the speed limit can be increased.

CHAIRMAN: Who was it that suggested forming a working group to deal with the public concerns?

MR TONY YAU: The Transport Department.

CHAIRMAN: Thank you. Is that set out in the paper, the LegCo paper?

MR TONY YAU: Yes.

MS MAGGIE WONG: We have the LegCo paper pulled up on the screen and we will distribute copies now.

CHAIRMAN: Do we have a bundle reference or not?

MS MAGGIE WONG: I apologise, Mr Chairman, it is not in our bundle yet, but we picked it up from the LegCo documents. It is a document prepared by the Transport Bureau, dated 24 January 2000.

Is that the paper that you -- or the LegCo paper you refer to in your evidence?

MR TONY YAU: Yes.

MS MAGGIE WONG: Thank you. If I may, for the purposes of the record, it is a LegCo paper headed or entitled, "Speed limit in Hong Kong", and this paper was presented by the Transport Bureau in relation to three aspects: the structure of speed limit categorisation and the criteria of setting speed limits on roads in Hong Kong;

second, the review of speed limits in Hong Kong; and the relationship between traffic accidents and speed limit.

We can see in paragraph 3 there is this speed limit categorisation. In terms of low band, which is 50km per hour for urban or new town built-up areas; middle band, 70 to 80 for areas outside urban or new town built-up areas; and high band, for 100km per hour for high standard expressways.

If we go over the page --

CHAIRMAN: Before you move on -- for how long has Hong Kong adopted that approach of these three bands, perhaps earlier expressed in miles per hour, but for how long have we had that approach?

MR TONY YAU: I think around the same time that the paper is issued.

CHAIRMAN: This came into being in 2000?

MR TONY YAU: Yes, but before 2000, in Hong Kong, the speed limit of roads also generally can be classified in those three bands, but in that paper, in that LegCo paper, we clearly specified that Hong Kong have those three speed limits.

CHAIRMAN: What is the status of this structure, the three-band structure?

MR TONY YAU: It's still valid --

CHAIRMAN: No. What is its status? This is an approach

adopted by the Transport Department. Is it a law?

MR TONY YAU: No.

CHAIRMAN: So what is it?

MR TONY YAU: It's our current approach.

CHAIRMAN: Transport Department's approach?

MR TONY YAU: Administration's approach.

CHAIRMAN: The government's approach?

MR TONY YAU: Yes.

CHAIRMAN: The Transport and Housing Bureau's policy approach?

MR TONY YAU: Yes.

CHAIRMAN: Is that expressed in any other document?

MR TONY YAU: I'm not aware of that, apart from this paper, there is any paper about the speed limits structures.

MS MABLE CHAN: Chairman, perhaps, if I may.

CHAIRMAN: Please.

MS MABLE CHAN: I would think that to put it in a more accurate context, it's the government approach as set out in the Transport Department's transport, planning and design manual. I may not say it to that far as a policy approach.

CHAIRMAN: Transport, planning and design manual?

MS MABLE CHAN: Yes.

CHAIRMAN: Thank you.

Ms Wong, we are already over time. I'm leaving it

to you to choose a moment when a topic is finished.

MS MAGGIE WONG: Maybe just to end this topic.

CHAIRMAN: Yes.

MS MAGGIE WONG: What is the date of this manual that you refer to?

MR TONY YAU: You mean the transport planning manual?

MS MAGGIE WONG: Yes, the transport planning --

CHAIRMAN: Presumably you update it from time to time.

MR TONY YAU: Yes, we have submitted this copy to the secretary of the committee.

CHAIRMAN: When was it born, this manual? Does it go back to the 1960s? 1950s?

MR TONY YAU: Please wait. I need to check. It's based on -- I remember it's based on some similar UK manual at the time, and we drafted one to suit Hong Kong road conditions.

CHAIRMAN: Yes. I have looked at a copy from the Hong Kong University, so I think it has its origins in the 1960s, doesn't it, UK in the 1960s?

MR TONY YAU: Yes. That's the first edition.

CHAIRMAN: Yes.

MS MAGGIE WONG: Has this speed limit structure in the transport manual ever been reviewed or updated?

MR TONY YAU: Yes. The concerned structure we will regularly update.

MS MAGGIE WONG: You mentioned "regularly update". On what criteria would you update it?

MR TONY YAU: We will check if there are any changes, say, to overseas practice that triggers our update in light of overseas matters.

MS MAGGIE WONG: We will touch upon this overseas practice maybe in the next session, but if I could go back to this LegCo paper, just to finish off this document before we break. It's in paragraph 6 of this LegCo paper. It talks about the review of speed limit in 1999, and:

"... the administration commissioned the Transport Research Laboratory (TRL) in the UK, an independent leading transport research establishment in the world, to carry out a study on the speed limits in Hong Kong."

It also specified some of the findings in the paragraph that follows.

So my question is this. Apart from this 1999 commissioning of the Transport Research Laboratory in the UK, has there been other commissioning of the Transport Research Laboratory in recent years?

MR TONY YAU: No.

MS MAGGIE WONG: So that's the only one that has ever been done?

MR TONY YAU: Yes.

CHAIRMAN: Is this document available publicly, this consultancy report?

MR TONY YAU: I don't think so. It may be a kind of internal consultancy report.

CHAIRMAN: Right. Is it a document you can provide to us?

MR TONY YAU: Yes.

MS MABLE CHAN: Yes, Chairman, certainly.

CHAIRMAN: Thank you. If you could provide it, we'd be grateful.

MS MAGGIE WONG: So do I take it that apart from 1999, there has not been a consultancy study or a big study on the overseas practice in terms of speed limit structure in Hong Kong since 1999?

MR TONY YAU: No, there's not a particular consultancy study on speed limit review, but as we mentioned in our paper of low speed limit zones, we are aware that many of the European cities implement some lower speed limit, say 20 miles per hour, it's similar to 30 kilometres per hour. We are studying whether such measures would be suitable in Hong Kong.

MS MAGGIE WONG: Yes. I understand. That would be perhaps a new job for the Road Safety Audit team; is that the position?

MR TONY YAU: No. This is different. The low speed limit study is related to the road designs, whether it's a

suitable traffic calming measure to make the vehicles drive at such low speed limit.

MS MABLE CHAN: So, to put it shortly, irrespective of whether or not the Road Safety Audit team is in place, this low speed limit zone, we have already started some pilot scheme and study.

CHAIRMAN: There's a lot of material available, isn't there?

MS MABLE CHAN: Yes.

MS MAGGIE WONG: When did you start this low speed limit zone study?

MR TONY YAU: We start the study under the walkability study, and the walkability study commenced in December 2017.

CHAIRMAN: What is the walkability study?

MR TONY YAU: Walkability study, to review our current standard and design to see if any particular measure or innovative measure can enhance the pedestrian environment so that encourage the road user to walk more.

CHAIRMAN: In the way that they have developed it in London?

MR TONY YAU: London is one of our reference in this study.

MS MABLE CHAN: This is quite relevant, Chairman, because I notice, in the discussion with the expert about the reference to certain road sections in London, that is exactly one of the reference points for us in taking

forward the walkability study.

While the study focuses or branches out from improving the pedestrian environment, it actually touches upon how to improve the road and also pedestrian pathway, in order to ensure the safety and also to enhance the ambience of the environment, and it touches upon the study of whether low speed limit zones in some of the road sections is worth considering.

CHAIRMAN: Yes. The two go together, don't they?

MS MABLE CHAN: Yes, the two go together.

I would just like to add that in Hong Kong, we are actually focusing on a few road sections in the urban districts, in particular like Hong Kong Island.

MS MAGGIE WONG: What is the membership of this walkability study or low speed limit zone study? What is the membership?

MR TONY YAU: We appoint a consultant to do that.

CHAIRMAN: And who are they?

MR TONY YAU: Mott MacDonald.

CHAIRMAN: Sorry, could you repeat that?

MR TONY YAU: Mott MacDonald consultant.

MS MAGGIE WONG: Maybe that is an appropriate time to stop, Mr Chairman.

CHAIRMAN: I'm sure it is.

We will adjourn our proceedings. I ought to say

this, for the record, that as I indicated at an earlier stage in the day, we have been providing Prof Lo with a running transcript, and in the course of the day he's come back to us with questions, but obviously these proceedings will have to be adjourned, and so, at the resumed hearing, he can pose those questions. It might well be that we are dealing with other topics and we will have to go back to them, and it's better that he should have the opportunity to put them himself. But he has come back to us during the day.

So what we will do is adjourn now and we will resume at a date that is mutually convenient to you, Ms Chan, and your representatives, and counsel. We will have to investigate diaries as to when that date is. But we will confirm in due course when we will resume these hearings.

MS MABLE CHAN: Thank you very much, Chairman.

CHAIRMAN: So we are now adjourned to a future date. Thank you.

(5.48 pm)

(The hearing adjourned to a date to be fixed)

Examination by MR DEREK CHAN (continued) 2

Examination by MS MAGGIE WONG 160

2018 年 10 月 6 日

上午 10 時 01 分恢復聆訊

出席人士： Hon Mr Justice Michael Lunn（倫明高），香港專營巴士服務獨立檢討委員會主席

歐陽伯權先生，香港專營巴士服務獨立檢討委員會委員

陳政龍大律師及黃佩琪大律師，由高露雲律師行委聘，代表香港專營巴士服務獨立檢討委員會

陳美寶女士，運輸署署長（運輸署代表）

陳英傑先生，副署長／公共運輸事務及管理（署理）（運輸署代表）

黃志光先生，助理署長／巴士及鐵路（運輸署代表）

謝善怡女士，首席運輸主任／巴士及鐵路 1（運輸署代表）

邱國鼎先生，總工程師／道路安全及標準研究（運輸署代表）

岑毅安先生，總機電工程師／車輛安全及標準（運輸署代表）

李美鳳女士，總運輸主任／特別職務（運輸署代表）

主席：（經傳譯員）早晨。唔該晒星期六出席呢個聽證會協助委員會去取證嘅。我一開始要解番羅教授嘅情況，羅教授今日喺科技大學係有工作在身嘅，因為佢哋係有一個論壇就係關於亞洲嘅工程學系嘅，佢今日嚟唔到。我哋個做法就會咁嘅，我哋會繼續，因為我哋有現場嘅謄本，我哋嘅做法就會係喺今日唔同階段將呢一個現場嘅謄錄版本去電郵畀佢，可以係透過我--如果佢有需要，可以問一啲問題，而到今日最後嘅時候，就會有一個更正版本嘅謄本同埋錄音版本，等教授可以知悉番我哋討論過嘅事項，如果之後仲有需要嘅話，亦都可以以書面嘅方式去再提問嘅。我先解釋番羅教授今日係嚟唔到嘅。而家我會邀請陳律師係繼續嘅。

陳政龍先生：（經傳譯員）陳女士，署長早晨，多謝你哋尋日向委員會提交咗一啲嘅文件，就係星期四嘅聆訊之後，一啲跟進嘅文件，我想跟進番一件事嘅，就係根據新提供嘅文件，關於黑盒減速嘅嗰個數據嘅，我想首先問你嗰個限額係幾多？而可唔可以請你睇番呢個專營巴士加強安全嘅小組嘅一個報告？嗰個報告就係第 1807 頁，陳女士，而家有冇附件 2 呢？

陳美寶女士：Yes.

陳政龍先生：（經傳譯員）呢個就係陳先生喺星期四下晝聽證會嘅時候就提交出嚟

嘅，而家就講番喺文件嘅第 4 段，關於黑盒嘅要求，就話用嚟--嗰個軟件係應該可以提交報告，關於以下嘅事項嘅，就係呢一個嘅喺偵察到減速 0.4G 嘅時候嘅一個三分鐘嘅時間呢個車輛嘅速度嘅情況，我哋就星期四下晝問過，喺 2003 年嗰個要求係 0.2G 嘅，而家見到個要求係 0.4G 嘅減速嘅。星期四下晝就有討論過點解會改咗，同埋喺尋日傍晚就提交咗啲文件，關於呢一個嘅更改嘅，我想問下呢樣嘢。我亦都想問下背後改嘅理據嘅，即係點解會選擇個界限值係 0.4G，呢樣嘢亦都係討論過嘅。想同你傾下關於呢兩個問題嘅。

我逐步講，首先會講番呢一個改動，喺 04、05、06、07 年，嗰個改動，我而家就先請你睇番尋晚提交嘅一啲文件，而家先請你睇附件 C1，我哋而家--主席，...

主席：（經傳譯員）我都睇到 C1㗎喇。

陳政龍先生：（經傳譯員）主席，呢度係未有頁碼嘅，呢個應該係運輸署第 5 號嘅文件冊嘅 1853 頁。

陳女士，而家你應該見到係運輸署同埋城巴一個聯絡嘅會議，呢個 2005 年 5 月 19 號嘅會議紀錄，有啲代表嘅，係運輸署代表出席，我睇番啲名應該係你今日在場嘅同事當時都冇出席呢一個嘅會議嘅。

陳英傑先生：（經傳譯員）冇錯。

陳政龍先生：（經傳譯員）我想而家請你睇第 25 段，即係話黑盒，黑盒就講--即係安裝個黑盒，到 26 段嘅時候，就提過話喺上一次嘅專營巴士同運輸署嘅聯合會議入面就建議黑盒嘅要求就有兩項嘅更改，就商量過嘅，第一，就係呢一個黑盒嘅意外紀錄，應該係由 0.2G 改做 0.4G 嘅減值；另外就係呢一個嘅意外紀錄應該係喺之後--即係三十秒之後記錄三分鐘同埋三十秒之前記錄兩分鐘嘅。而運輸署就話冇反對以上嘅更改，亦都想知道營運商有咩嘢意見嘅。

睇番呢個會議紀錄，似乎 0.4G 減速就係城巴選擇嘅，咁樣睇，你同唔同意？

陳英傑先生：（經傳譯員）聽到嘛？聽到嘛？

主席：（經傳譯員）聽到喇。

陳英傑先生：（經傳譯員）我明白呢個題目 2005 年討論過，好可能係據城巴要求，去睇下呢個數值係咪應該要更改，因為 0.2G 嘅本來係。

主席：（經傳譯員）答案即係「係」喇？

陳英傑先生：（經傳譯員）係。

主席：（經傳譯員）城巴提議嘅。你儘量係答「係」或者「唔係」，即係簡單嚟講，個答案係「係」喇？

陳英傑先生：（經傳譯員）冇錯。

主席：（經傳譯員）陳律師。

陳政龍先生：（經傳譯員）如果我哋睇跟住嘅一封電郵，係 annex C，即係附件C2，係一年之後㗎喇，就係2006年9月19號，個附件就係話安裝黑盒要嘅要求，之後嗰頁，我哋見到呢個黑盒嘅要求草擬本，喺呢頁中間，我哋見到喺呢個表嘅第2、第4都出現0.4G嘅，即係話去到2006年9月個情況就係咁喇。

主席：（經傳譯員）為咗記錄起見，因為有啲部分係有遮蓋嘅，我想問下係邊個，寄件者同埋收件者係咩嘢人？陳先生，或者你可以處理。

陳政龍先生：（經傳譯員）可以嘅。主席，如果睇番附件 C2 第一頁，電郵就係一個運輸署叫做 Walter Foo 嘅人士發出嘅，啱唔啱呢？

陳英傑先生：（經傳譯員）我可以邀請岑毅安先生，即係話我哋總機電工程師回答嘅。

岑毅安先生：（經傳譯員）呢個電郵係--冇錯，係 Walter Foo 先生，佢當時就係運輸署嘅一個機電工程師，發出嘅。

陳政龍先生：（經傳譯員）而睇番冇遮蓋嗰啲部分，喺電郵收件者嗰一欄似乎係電郵發畀嗰啲嘅專營巴士公司嘅？

岑毅安先生：（經傳譯員）冇錯。呢啲係唔同嘅專營巴士公司嘅唔同嘅職員...

陳政龍先生：（經傳譯員）唔好意思，主席，我冇留意到，其實封信喺左手面係冇翻譯到出嚟嘅。應該咁樣講，第一欄就係寄件者。

主席：（經傳譯員）得㗎喇，喺紀錄上面就可以㗎喇，我自己可以理解。

陳政龍先生：（經傳譯員）下一份文件就係2007年3月28號，喺附件C3，你而家面前見到就係一個會議紀錄，係運輸署同埋專營巴士公司嘅第二十八次聯合會議。第一頁你可以見到運輸署代表同埋巴士公司嘅代表，但係人名嗰度就係遮蓋嘅，我哋有嘅版本，我而家想請你睇第 5 頁，關於黑盒嘅，黑盒數據記錄儀器，呢個係個標題，呢度記錄就係話根據運輸署，就係話呢個電子數據記錄儀器嘅要求同埋規格係已經細節落實，所有巴士營運商係喺稍後就會收到最新嘅通知，呢個情況就係2007年3月嘅。

下一份文件係附件C4，2007年10月5號，呢度就有一個附件關於黑盒要求，可唔可以確認呢一個係叫做一個 Steven Tse 嘅人士發出，係運輸署你嘅同事嚟嘅？

岑毅安先生：（經傳譯員）冇錯。

陳政龍先生：（經傳譯員）收件人，可唔可以講下係咩嘢人呢？我哋只係見到有九

巴，有城巴。

岑毅安先生：（經傳譯員）喺遮蓋嘅部分嘅收件者其實係所有專營巴士公司嘅職員。

主席：（經傳譯員）點解需要遮蓋呢？

岑毅安先生：（經傳譯員）因為電郵入面提到嗰啲職員嘅名，我哋就遮蓋番嗰啲職員嘅名。

主席：（經傳譯員）點解要咁做呢？點解呢個職員嘅名喺度嘅話，係會侵犯到佢呢？係咪同個人資料私隱有關呢？

陳美寶女士：（經傳譯員）主席，我諗喺準備呢一個回應，我啲同事遮蓋嘅時候就冇去問番有關職員嘅同意嘅。

主席：（經傳譯員）個答案即係「係」喇？

陳美寶女士：Yes.

主席：（經傳譯員）係因為你係關注呢一個嘅個人資料保障喇？

陳美寶女士：Yes.

主席：（經傳譯員）好奇怪，一個咁普通嘅書信來往，點解需要加呢個枝節呢？

陳美寶女士：（經傳譯員）我哋只不過係謹慎啲去行事。

主席：（經傳譯員）我唔係批評你，可能係呢個法例本身引發咁嘅現象。

陳政龍先生：（經傳譯員）我而家揭去附件 C4，第二頁，似乎係傾咗兩年之後，就係嗰啲最終個黑盒嘅要求嘅細節就敲定喇？

岑毅安先生：（經傳譯員）係。

陳政龍先生：（經傳譯員）黑盒要求改變嗰個--有更改嗰個過程就係咁喇，我跟住想問下你...

主席：（經傳譯員）你喺繼續問之前，點解如果係有呢一個改變，喺2018年8月發出嘅有關嘅文件入面係冇反映出嚟呢？點解延遲咗十二年先至用咁樣嘅格式呢？

陳英傑先生：（經傳譯員）主席，我尋日都提過，討論過程同埋呢一個減速值嘅更改就喺2005年、2007年之間討論嘅，運輸署嘅職員當時就認為新嘅減速值...

主席：（經傳譯員）請你回答番個問題，點解延遲咗十二年先至用咁樣嘅格式呢？即係我哋而家2018年見到嘅格式呢？

陳英傑先生：（經傳譯員）我會話運輸署嘅職員當時--或者為免麻煩，或者佢哋遺漏

咗去將呢一個規格嘅啲參數改變。

主席：（經傳譯員）而家事後係咪應該咁做呢？

陳英傑先生：（經傳譯員）如果而家事後睇番，應該嘅。

主席：（經傳譯員）好，唔該。陳律師。

陳政龍先生：（經傳譯員）唔該晒，陳先生，我而家想講下用 0.4G 作為界限值嘅理據，我哋喺星期四下晝都討論過，我而家可以提醒番你星期四嘅證供係點樣，然後再睇番一啲新嘅文件，聽下你對呢啲文件有咩嘢意見。

而家先睇番星期四嘅謄本，2018 年 10 月 4 號第 19 日嘅聽證會，第 54 頁，我而家解釋一下我讀緊啲乜嘢先，第 53 頁嘅時候，就傾緊點解選擇呢個 0.4 嘅減速值嘅，而家喺 54 頁第 4 行，繼續講。

主席問咗條問題「畀一個實際嘅例子，咩嘢意思呢？」陳先生就話「唔係，呢一個嘅定義就係顯示呢一個減速嘅力度就係每秒 3.92 米，即係話有乘客坐喺座位嘅話，會係跌出座位嘅，而呢一個嘅剎車嘅力度就會令到--或者減速嘅力度係會令到一個乘客係由座位度跌出嚟嘅，呢個係要求嚟嘅。」

主席跟住話「即係話如果唔戴安全帶嘅話，一個坐喺度嘅乘客就會係因為咁樣嘅減速嘅程度去跌出座位？」而陳先生回答「跌出座位呢，其實技術層面講就係喺百分之九十五嘅樣本嘅情況，就會令到乘客係跌離座位嘅，即係話有個百分之九十五嘅可能性，如果冇戴安全帶嘅話，呢一個乘客會跌出嚟，如果係有 0.4G 嘅減速值嘅話。」

主席：（經傳譯員）喺繼續講之前，呢度話有百分之九十五嘅情況，乘客喺座位度跌出嚟，或者話百分之九十五嘅可能性，係咪有呢兩句說話有矛盾？

陳英傑先生：（經傳譯員）我講--我要更正番，呢度係話有百分之九十五嘅可能性個乘客係唔會跌出架車。

陳政龍先生：（經傳譯員）再講百分之九十五呢個數我陣間會同你再討論嘅。

主席：（經傳譯員）即係百分之九十五坐喺度嘅乘客冇戴安全帶，如果係有個 0.4G 嘅減速值嘅話，都唔會跌出個座位嘅？

陳英傑先生：（經傳譯員）正確嘅。

主席：（經傳譯員）唔該晒。

陳政龍先生：（經傳譯員）係同一個課題，我哋去睇一睇謄本第 61 頁，第 3 行，主席就問「你可唔可以回答呢條問題？點解係由 0.2 轉到去 0.4？」陳先生就講話「就係話喺 2006 年當我哋係同呢一個經營商去講最低規格嘅時候，當我哋見佢哋同埋去做評估佢哋嘅表現嘅時候，我哋就發現 0.2 就係一個好輕微嘅減速

嘅動力，其實成日都會發生嘅，對我哋嚟講，如果要監察嘅說話，就唔係好有意思。喺嗰陣時候，我哋就同呢一個營運商亦都係同意咗，就話0.2G就應該係更改到去0.4，但係不幸，喺嗰個規格之中就冇改到嘅，所以今次我哋就利用呢個機會就去更改佢。」

我喺度想問嘅就係話營運商就話0.2係太多，因為經常都會發生嘅，喺第62頁，我哋就係由第6行開始睇--唔好意思，應該係第8行，呢個亦都係主席問嘅問題，呢個就係話係「係百分之九十五嘅人就喺0.4G嘅減速嘅時候就會跌落張凳嗰度，呢個係咪有人係曾經做過研究嘅呢？」陳生就話「我哋嘅資料，就係喺美國嘅運輸署嘅時候1977年曾經做過一個咁樣嘅研究。」

主席就話「你可唔可以畀我哋一啲細節呢？你有冇呢個文件呢？」陳先生就話「我哋係可以提供畀你。」

而家就運輸署已經係提供咗呢個文件，就喺附件D嗰度嘅，琴晚就提交畀我哋，遲少少我就會係再睇呢個文件。我而家就再讀埋呢一個其他嘅謄本嘅部分先，因為都好有關嘅。

喺第16行，我嘅問題就係話「呢個嘅調查研究，你講嘅就係話有冇提到係0.2同埋0.4G嘅限值嘅時候，企喺度嘅客人佢哋會唔會跌呢？」陳先生就話「唔好意思，就係冇關於企喺度嘅乘客嘅，因為坐喺度嘅客人佢哋係坐喺個座位度，佢哋都會喺特定嘅位置嗰度係坐低，但係如果啲人企喺度嘅時候，嘅情況就好唔同，因為啲人點樣企其實我哋係控制唔到，亦都係冇任何規格啲人係點樣企法嘅，所以因此我哋就係冇關於有呢啲嘅--關於企嘅乘客嘅呢啲嘅數據喇。」

主席就話「其實如果係一般嘅常識嚟講，佢哋都會係跌咗喇？」陳先生就話「就睇下佢哋究竟係點樣企嘅，我哋喺巴士裏面其實都講清楚其實如果一啲人企喺度，佢哋係可以拎住啲扶手，如果佢哋係做姿勢係正確嘅時候，可能佢哋跌低嘅機會就唔係好大，但係如果有啲人佢哋有行李上嚟或者佢哋郁嘅時候，可能個情況就好唔同喇。」

所以我就會特別想講一講關於個研究嗰度就係呢一點，就係0.4G同埋百分之九十五嘅問題，同埋就有冇一啲嘅科學嘅數據，就係特別係一啲企喺度嘅乘客佢哋嘅情況係點。我可唔可以請大家睇下附件D，就係琴日提供嘅嗰份文件。主席，唔好意思，我就睇一睇嗰個頁碼係幾多。呢個係TD-5嘅1862頁嘅。

主席：（經傳譯員）唔該晒。

陳政龍先生：（經傳譯員）主席，我就或者我睇一睇我哋自己本來本身嗰個頁碼。陳生，我哋可唔可以首先睇一睇佢個引言？係呢一個嘅28頁嘅第9頁嘅，喺右上角。

主席：（經傳譯員）你可唔可以話畀我聽頁碼呢，如果喺個文件夾之中？

陳政龍先生：（經傳譯員）就係1870嘅，就係TD-5嘅文件冊嘅。

主席：（經傳譯員）唔該晒。

陳政龍先生：（經傳譯員）我哋可以係第一、二段去講一講，「其實係關於減速嘅度其實就喺呢方面嘅研究就好少嘅，特別就係一啲坐喺度嘅乘客嘅，就喺呢啲嘅研究之中，其實就係只係有兩個研究就係同一啲人有關嘅，特別係喺呢啲嘅研究就係譬如話係鐵路嘅度，Hirshfield就係發現就係1同埋10g每一秒就會係有一啲郁動嘅，然後喺107g（235磅）、132（4呎4吋）去到193厘米（即是6呎4吋）嘅高度嘅時候，就會係個情況係咁。如果有啲人係失去咗平衡嘅時候，喺0.16嘅g嘅呢個限值嘅時候，嗰啲坐--佢哋係向前，啲男士佢哋係著低踭鞋同埋女士係高踭鞋嘅時候，佢哋會失去平衡。而對於佢哋拎住一啲嘢嘅時候，佢係0.23g嘅時候，就會係失去平衡。

第二個調查係Browning嘅，佢哋就係講企嘅乘客，有15至60歲嘅人，九十個人係參與，如果佢哋係向前同埋向後，而佢哋係揸住個扶手嘅時候，我哋發現就係如果加速嘅時候，同埋減速嘅時候就會係對於佢哋有啲影響嘅，喺0.055g嘅呢個動力嘅時候，如果佢哋係冇嘢扶住嘅時候，佢哋就會輕微有郁動，而佢捉住呢一個嘅扶手嘅時候，喺0.115g呢個嘅限值嘅時候，佢哋就會有動，而坐喺度嘅人，0.2g嘅時候，佢哋就係會有影響嘅。」

呢個就係同呢一個企喺度嘅乘客對於呢一個加速嘅時候就有啲影響嘅，呢個係咪一個好--係一個正確嘅觀察嚟嘅呢，陳先生？

陳英傑先生：（經傳譯員）呢個係一個簡單嘅簡短嘅引言，就係呢個報告裏面，就係嗰個作者嘅觀察，我哋對於呢啲研究，我哋冇嗰個細節，喺文件裏面講，呢個就係有個研究，...

主席：（經傳譯員）呢個係一個學術嘅文件研究嚟嘅，如果你去到第19頁嘅時候，我哋都睇到有其他嘅文件或者研究，就係話橫向嘅加速嘅時候，有啲咩嘢嘅影響嘅，呢個係Browning嘅研究，1972年，就係一個嘅技術嘅研究嚟嘅，係英國嘅，嗰啲數據係非常之清楚，個問題亦都係好清楚嘅，睇得。陳先生。

陳政龍先生：（經傳譯員）喺呢一個階段，我就想問一問呢個問題，呢啲嘅研究或者文件，運輸署當佢去同意係用0.4嘅減速值嘅時候，作為一個界限值嘅時候，有冇參考過呢啲文件呢？

陳英傑先生：（經傳譯員）就我所知，呢個文件，當我哋係改變嗰個界限值嘅時候，我哋冇考慮到嘅。

主席：（經傳譯員）係咪意思，你就係話意思就係話唔同嘅減速嘅程度係對於企嘅乘客個影響你冇考慮到，你純粹係考慮坐喺度嘅乘客呢？

陳英傑先生：（經傳譯員）係，冇錯。

主席：（經傳譯員）唔該晒。點解呀？

陳英傑先生：（經傳譯員）呢個係嗰個我哋定嗰個界限，就係為巴士營運商去開發黑盒嘅用途嘅，喺當其時我哋覺得嗰個黑盒應該係可以量度到當減速嘅時候對於坐喺度嘅乘客有咩嘢影響，佢哋係個影響係點樣。

主席：（經傳譯員）點解你冇考慮到企喺度嘅乘客呀？佢哋受一啲減速，即使唔係好快嘅時候，佢哋都會影響得好緊要嘅。

陳英傑先生：（經傳譯員）因為嗰啲嘅坐喺度嘅乘客，佢哋就坐喺度，對佢哋嚟講，佢哋要郁動係比較難嘅，所以我哋就用黑盒去量度嗰個減速個程度，佢個減速要大啲，先至啲人會係跌出嚟嘅，所以呢個就亦都會個情況係比較嚴重。

主席：（經傳譯員）你嘅意思話企喺度嘅乘客，如果佢哋跌低嘅時候，個情況冇咁嘅嚴重？

陳英傑先生：（經傳譯員）唔係嘅，或者我想請岑先生佢去補充嘅。

岑毅安先生：（經傳譯員）其中一個我哋考慮就係話嗰啲坐喺度嘅乘客，我哋好少叫佢話「你係捉緊個扶手」嘅，但係企喺度嘅乘客，我做好多嘅宣傳活動，就叫佢哋--勸籲佢哋企喺度嘅乘客捉緊個扶手或者係捉緊一啲其他嘅部分，當佢哋企喺個巴士上面，所以呢個其中一個考慮因素，當我哋去更改個減速嘅 G 值嘅時候，由 0.2 更改到去 0.4G 嘅時候。

主席：（經傳譯員）我要好公平嘅，你咁講，你當其時 2005 年、07 年嘅時候，你都冇參與嗰個決定嘅？

岑毅安先生：（經傳譯員）冇嘅，我真係冇參與嘅。

主席：（經傳譯員）你有冇多一啲嘅資料可以提供畀我哋呢？點解會作出呢個更改，就幫助你去回答呢啲，聽落去都係好明顯嘅問題？

岑毅安先生：No, sorry. We don't have that.

主席：（經傳譯員）你已經盡你所能去回答呢個問題，就係提供一啲點解要做更改嘅理由，你已經盡你嘅所能，係咪？

岑毅安先生：（經傳譯員）係。

主席：（經傳譯員）唔該。

陳政龍先生：（經傳譯員）好，或者我總結下呢一點，第 28 頁裏面嘅第 26 版，就係同一個嘅文件嘅，呢個係 TD-5 1887 頁嘅，我哋就第一、第二段去讀，「呢個研究嘅目的就係提供數據，就係睇下唔同嘅限值對於坐喺度嘅乘客喺突然剎車嘅時候有啲咩嘢影響，同埋就睇下呢一個嘅突然減速嘅時候有啲咩嘢影響，呢啲嘅數據就係表示，話畀我哋聽呢一個佢哋嘅坐喺度嘅乘客，當佢有一個減

速嘅時候，佢哋個經驗比嗰啲企喺度嘅乘客有兩倍咁多，呢個百分之八十四嘅喺一個座位上面嘅乘客佢向前嘅時候，當佢嗰個減速值係0.4g嘅時候，佢哋就可以安然坐喺個位嘅。要確保喺呢個打橫嘅位嘅時候，百分之八十四嘅乘客喺0.41g嘅限值，同埋呢一個嘅傾側5度嘅時候，嗰個限值應該係最好係0.52g嘅。」

呢度有講過，就係百分之八十四乘客就坐喺呢一個嘅向前嘅座位嘅時候嘅情況，百分之九十五呢個就冇講到嘅，喺呢一度提到，或者我係漏咗啲嘢嘅，你可唔可以話畀我聽你百分之九十五個數字係點樣嚟嘅呢？

陳英傑先生：（經傳譯員）我請岑先生去回答。

岑毅安先生：（經傳譯員）喺我哋去同巴士公司傾嘅時候，0.4G嘅減速值嘅時候，就係講嗰啲打橫排嗰啲座位嘅，我哋去睇一睇呢個文件嘅第11頁。

主席：（經傳譯員）你係睇緊上高定係下底嗰個嘅頁碼呢？

岑毅安先生：（經傳譯員）呢個係有三個圖表嘅嗰個。

主席：（經傳譯員）有唔同嘅頁碼嘅，呢個就係第11，下底就係1872等等，你睇緊邊個頁碼？

陳美寶女士：（經傳譯員）下底嗰個。

主席：（經傳譯員）好，下底嗰個頁碼，第11頁。

岑毅安先生：（經傳譯員）呢個係睇第一--最上嗰個圖表，喺呢個圖表之中，呢度寫百分之九十五嘅保留值，就係呢個喇。

陳政龍先生：（經傳譯員）呢個係咪0.42G嗰個減速值嘅？

岑毅安先生：（經傳譯員）係，冇錯，0.42G減速值。你睇X軸，呢度寫住有一啲嘅數據，係0.4G嘅，寫住。係，冇錯，就係呢個喇。

陳政龍先生：（經傳譯員）如果我咁樣去理解圖表，啱唔啱呢？就係0.4G嚟計，百分之九十五嘅坐喺度嘅乘客就唔會跌出嚟嘅？

岑毅安先生：（經傳譯員）係嘅，冇錯。

主席：（經傳譯員）其實如果你睇呢，其實係多過百分之九十五講喎，係咪呀？

岑毅安先生：Yes.

主席：（經傳譯員）還是百分之九十八定係點呢？

岑毅安先生：（經傳譯員）我哋就唔能夠去正確講，所以我哋就話係多於百分之九十五嘅，就多於百分之九十五嘅乘客就係唔會跌出嚟嘅，就係當係0.42嘅減速值嘅時候。

主席：（經傳譯員）唔該晒。

陳政龍先生：（經傳譯員）就頭先我讀出嚟嗰段亦都係講到嗰啲數據就會係坐喺度嘅乘客就係感受到嗰個減速係兩倍嘅個感覺強過一啲企喺度嘅乘客，因此喺呢一個嘅研究，我就頭先讀出嗰段，就包括喺引言部分嗰啲嘅文字，就話企喺度嘅乘客，如果佢係有緊握嘅扶手等等，佢哋會失去平衡，就會係 0.3G 同埋 0.27G 嘅時候，就係會失去平衡嘅，似乎喺引言嗰度係咁講嘅，你會唔會同意呢？

主席：（經傳譯員）呢個係 Hirshfield 1932 嗰個嘅研究嘅結果嚟嘅？

岑毅安先生：（經傳譯員）係，冇錯。

陳政龍先生：（經傳譯員）喺呢個調查之中個數據，似乎就係話--我哋去 0.4G 嘅減速 G 值其實就已經係可以足以係去照顧好嗰啲坐喺度嘅乘客，但係嗰啲企喺度嘅乘客，佢哋嘅情況就冇被照顧，而我呢個咁嘅講法，你有啲咩觀察或者同唔同意？

岑毅安先生：（經傳譯員）係。

陳政龍先生：（經傳譯員）運輸署會唔會諗就係話更加小心同埋更加科學嘅研究，去做一啲咁嘅研究，去睇清楚 0.4G 嘅呢個值係咪真係可以保障到個乘客嘅--或者企喺度乘客嘅安全呢？

陳英傑先生：（經傳譯員）係嘅，我覺得我哋可以做多啲嘢，做多啲研究去找出唔同嘅減速值點樣去影響唔同嘅乘客，譬如話企嘅或者係坐嘅。

主席：（經傳譯員）我哋睇咗嘅文件係 1977、1972 同埋 1932 年做嘅，你有冇睇過一啲近期啲嘅學術或者係技術方面嘅研究呢？譬如喺過去五十年有冇呢？

陳英傑先生：（經傳譯員）我哋都係嘗試咁樣做...

主席：（經傳譯員）你有嘗試咁樣做？

陳英傑先生：（經傳譯員）有。

主席：（經傳譯員）有冇成功呀？

陳英傑先生：（經傳譯員）唔係好成功，我哋能夠搵到嘅文件都係呢一啲。

主席：（經傳譯員）當然，你係冇當時參與呢一啲討論，係咪？

陳英傑先生：（經傳譯員）係，正確。

主席：（經傳譯員）究竟係幾時嘗試去搵一啲比較近期嘅研究呢？

陳英傑先生：（經傳譯員）喺過去幾個星期。

主席：（經傳譯員）你可唔可以協助我哋，話畀我哋聽你喺邊度搵？你接觸過邊個？

陳英傑先生：（經傳譯員）我哋嘅工程師喺網上尋找同埋睇番自己嘅檔案或者文件，去睇下究竟有冇任何嘅材料我哋係可以搵到關於研究呢一個題目嘅，到而家，我哋網上嘅搜尋同埋其他嘅資源，我哋都係冇乜成功。

主席：（經傳譯員）好喇，即係網上搜尋同埋你自己嘅檔案，仲有冇其他呢？

岑毅安先生：（經傳譯員）就係呢兩個方法。

主席：（經傳譯員）你有冇接觸過本地非常之傑出嘅大學，譬如話佢哋嘅工程學系或者係港大、科大，甚至其他嘅大學呢？

岑毅安先生：（經傳譯員）喺過去幾個星期，我哋冇咁樣做。

主席：（經傳譯員）好，唔該。

陳政龍先生：（經傳譯員）主席，我而家打算開始另外一個題目，就係關於安全帶。

主席：（經傳譯員）好呀。

陳政龍先生：（經傳譯員）陳女士，我假設會係你去處理問題，所以我係會向你發問，但係如果你認為其他嘅同事應該回答，你可以請佢哋回答。

首先，我而家想講關於安全帶，係睇番工作小組嘅報告嘅，因為喺嗰個報告裏面係詳細咁樣處理咗安全帶嘅問題，為咗個紀錄，嗰個報告係喺 TD-5 嗰沓文件 1757 頁開始嘅，我請大家睇第 3 部分，呢一部分係處理安全帶嘅問題嘅。首先，我係請大家睇一睇其他司法管轄區嘅情況，然後睇下運輸署以前嘅立場係點樣樣嘅，關於其他司法管轄區，我想大家睇 3.11 段，喺呢一個全面報告嘅。

主席：（經傳譯員）我哋自己畀一個頁碼佢呢？

陳政龍先生：（經傳譯員）有嘅，主席，我哋內部嘅頁碼係第 28 頁，我哋聽證文件嘅頁碼就係 TD-5 號文件 1788 頁。法官閣下，我而家就會讀出 3.11 同埋 3.12 段嘅。

3.11，個報告係咁講嘅，「我哋考慮到專營巴士公司方面不同嘅意見，工作小組就係檢討咗而家海外嘅做法同埋佢哋嘅要求嘅，即係關於喺巴士上面安裝安全帶嘅問題，如果係城際或者係跨境嘅一啲路線，譬如話美國、英國同埋荷蘭，佢哋就係硬性規定所有嘅座位都要有安全帶，但係其他人。譬如英國、荷蘭同埋喺澳洲嘅維多利亞省，就係話一定係要戴安全帶添嘅。但係如果係市內或者係有企位嘅巴士，任何嘅海外司法管轄區，即係我哋檢討過嗰啲，冇一個係法定規定一定要喺個座位嗰度配備安全帶嘅。根據呢一啲司法管轄區嘅運輸當局，市內嘅巴士好多時都係用嚟畀人搭一個短嘅時間，無論係時間或者係距離都係嘅。同埋好多時喺市內嗰個速度都係唔會好快嘅，因此對於呢啲市內巴士就唔會有安全帶嘅要求嘅，有關嘅數據就係喺附件 IV 嗰度。」

喺附件 IV，就喺 1809 頁嘅，即係我哋嗰啲會議文件 1809 頁。陳女士，1809 頁就只不過係詳細講出我剛才讀出嗰個段落所描述嘅嘢。主席話佢係搵到嘅。即係話如果係喺市內嘅巴士，就佢哋檢討過嘅司法管轄區就並冇法定要求要有安全帶，我只不過係想有一個細微嘅點想你澄清一下，呢一個檢討係幾時做嘅呢？即係就呢一個工作小組嘅報告嚟講，係咪喺 2018 年呢？

陳美寶女士：（經傳譯員）呢一個檢討係 2018 年做嘅，係當我哋準備同埋當呢個工作小組係佢自己討論嘅時候。

陳政龍先生：（經傳譯員）唔該晒，我咁樣問係因為有一個類似嘅檢討，係 2005 同埋 2007 年有做過嘅，但係我講嗰樣之前，我而家又想讀埋 3.12 段出嚟嘅。

3.12 段係咁講嘅，「以上嘅檢討結果，就嗰三個巴士製造商都係同意嘅，佢哋嘅意見就係話如果喺其他嘅國家，譬如喺城市內嘅巴士都係唔需要有安全帶嘅。喺歐洲，如果係城際嘅大巴士，而且係冇企位嘅話，先至係需要呢一啲嘅安全帶嘅，佢哋就認為喺香港就算加裝安全帶，都唔會保障到企位嘅乘客。」大家可以睇到 3.12 其實就係嗰啲巴士製造商，佢哋喺小組討論嘅時候佢哋發表嘅意見嚟嘅，我咁樣講啱唔啱呢？

陳美寶女士：（經傳譯員）係，正確。

陳政龍先生：（經傳譯員）喺 2018 年做咗呢個檢討之後，我而家就想回顧一下一個類似嘅檢討，就係 2005 至 2007 年做嘅，好喇，我哋而家留住呢個工作小組個報告，我哋去 3.2 段嗰度係向大家介紹一下呢個以前做過嘅類似嘅檢討，3.2 段，內部頁碼第 23 頁，我哋嘅聽證會文件頁碼 1783 頁。

3.2 段係咁講嘅，「運輸署就係規定，喺 2006 年、2007 年嘅時候因為有專營巴士係牽涉喺意外嗰度，因此喺某啲嘅座位就規定要有呢一啲嘅安全帶，而喺 2007 年，專營巴士公司都係同意喺上層最前嗰四個位係要安裝安全帶，即係話所有 1997 年之後發牌嘅巴士都要咁樣樣，以防止佢哋係跌出座位嘅，喺 2012、2015、2017 年我哋喺傾呢一個續牌嘅時候，我哋都利用嗰個機會，就係規定所有巴士公司就係話呢一啲冇任何遮擋嘅座位都要安裝安全帶嘅。」呢一個就係因為 06、07 年嘅時候有一啲意外發生。

好喇，我而家講番其中一份歷史性嘅文件，就講下當時做嘅一個檢討嘅，而家請大家睇一睇 SEC-1 嗰一沓文件，第 266 頁，喺 266 頁，我希望大家都睇到呢一份文件，係運輸署準備嘅，係畀立法會運輸事務委員會開會嘅時候用嘅，你可以喺 272 頁睇到嗰個日子就係 2006 年 10 月寫嘅，請大家直接睇 271 頁第 19 段，呢一度嘅大題目就係話公營巴士上嘅安全帶，我而家直接係讀出第 19 段同埋第 20 段，係講到海外嘅司法管轄區點樣處理安全帶嘅問題。

第 19 段，「我哋係做咗一個研究去睇下海外點樣去處理巴士安全帶嘅問題，有關嘅要求就會喺個附件嗰度有一個摘要嘅。」呢一個附件喺 273 頁，不過我繼續讀咗先。「我哋可以睇到冇任何一個外國嘅國家係要求喺市內嘅巴

士，即係城市內嘅巴士，就算係有企位嘅乘客，係要求佢哋安裝安全帶嘅。喺澳洲同埋加拿大做嘅研究就係發現如果喺所有嘅座位嗰度安裝安全帶，其實額外嘅安全利益都唔係咁多嘅，因為我哋都好難想像所有嘅乘客都會願意扣上安全帶。

因此我哋認為並不適當去硬性規定所有專營巴士都要安裝同埋係強逼乘客配戴安全帶嘅。但係我哋會繼續同專營巴士公司一齊工作去搵多啲措施確保乘客安全。」

我咁樣講公唔公道呢？就係海外司法管轄區，就係話運輸署考慮過嗰啲，係冇改變佢哋嘅立場嘅，2006 年至到今年 2018 年，關於話唔去規定喺市內嘅巴士，就算有企位，乘客都要安裝安全帶。

陳美寶女士：（經傳譯員）係嘅，我認為喺我哋兩輪嘅檢討之中，海外嘅做法同埋經驗，好似我哋嘅檢討都顯示出對於安全帶嘅配備，佢哋嘅立場大致上係冇改變。

主席：（經傳譯員）喺第 19 頁，就係講到澳洲同加拿大嘅研究，就話就算喺所有嘅巴士座位安裝安全帶，其實額外嘅安全利益都唔係大到好似我哋想像咁嘅，然後跟住就話好難想像所有嘅乘客都可以確保佢哋用呢一個安全帶，你可唔可以畀澳洲同埋加拿大呢一啲嘅研究嘅參考嘅資料畀我哋呢？

陳美寶女士：（經傳譯員）我而家就冇嗰啲詳細嘅資料，但係我哋可以畀番有關嘅參考資料畀大家嘅。

主席：（經傳譯員）你哋呢一度嘅代表，有冇邊位知道呢一啲嘅研究係乜嘢研究呢？

陳美寶女士：（經傳譯員）我知道喺新南威爾斯州澳洲嗰度係有做過一啲研究嘅。

主席：（經傳譯員）但係我想知佢哋點樣講，你喺適當時候畀番啲參考資料我哋。

陳美寶女士：（經傳譯員）我哋有嘅，我哋有有關嘅參考資料，不過而家我哋好難引述嗰個參考嘅資料畀大家。

主席：（經傳譯員）但係你會向我哋提供？

陳美寶女士：（經傳譯員）會嘅。

陳政龍先生：（經傳譯員）好喇，我哋睇咗呢一個歷史背景之後...

陳美寶女士：（經傳譯員）唔好意思，主席，我嘅同事邱生想講一講海外司法管轄區嘅比較，我想邀請佢向大家講出佢嘅觀察。

主席：（經傳譯員）好呀。

邱國鼎先生：（經傳譯員）多謝主席。陳律師，你係講得啱嘅，喺市內巴士個要求喺 2006 年同 2018 年間係冇大改變嘅，不過除咗市內巴士之外，如果你講係城際

巴士，喺美國嘅法例係有改變，喺2013年11月，美國係通過咗新嘅法例，就係規定所有新嘅巴士都要有安全帶，即係除咗校巴同埋市內巴士之外。

主席：（經傳譯員）我哋知道喺英國，喺伯明翰至到倫敦之間嗰啲嘅大旅遊巴係需要有安全帶嘅，因此我哋而家想講嘅唔係城際巴士，係市內巴士。

邱國鼎先生：（經傳譯員）係，我意思就係話如果城際巴士就好似我哋嗰啲比較長線嘅巴士，即係譬如話由港島去到新界，佢哋係要用高速公路嘅話咁樣。

主席：（經傳譯員）呢一啲巴士，如果你講番美國嗰啲，佢哋有冇一個車速限制呢？因為如果車速係70公里同110公里，咁就爭好遠㗎嘩？

邱國鼎先生：Yes.

主席：（經傳譯員）會唔會個規定係唔同呢？佢哋可唔可以係以高速行駛呢？

邱國鼎先生：（經傳譯員）我相信係有規定嘅，喺嗰啲嘅司法管轄區，如果佢哋高速行駛，應該有規定。

主席：（經傳譯員）係喇，我都覺得係有分別，所以嗰個邏輯就係會適用於呢啲大嘅旅遊巴，因為佢哋事實上都係高速行駛嘅，並不是每小時行70公里。陳律師。

陳政龍先生：（經傳譯員）好喇，我哋而家有咗呢個歷史背景之後，而家我想考慮一下工作小組報告裏面講到嘅現時嘅立場。我未講到個細節之前，我明白個立場，對於新巴士同埋加裝安全帶喺現有巴士係有些少唔同嘅，我係會逐一講呢一個唔同嘅狀況。

首先，講新巴士嘅立場，請大家睇報告第3.4段，內部頁碼24，聽證會文件頁碼1784。首先，我讀出3.4段，「關於喺公營巴士上面所有嘅座位安裝安全帶，所有三個嘅巴士製造商，即係亞歷山大丹尼斯、富豪同埋合德猛獅，就話技術上係完全可能嘅，甚至係合乎國際嘅標準，即係如果你認為呢個係採購嘅要求，我哋係可以咁樣安裝嘅。鑑於呢一個咁嘅講法，工作小組嘅建議就係喺採購新巴士嘅時候，所有嘅座位都應該有安全帶嘅，所有嘅專營巴士嘅公司都同意，就話從2018年7月起，佢哋訂購嘅巴士全部座位都應該有安全帶。」呢個就係新巴士嘅情況。

我問下一個問題之前，我想大家留意另外一項資料，可能同下一個問題有關或者無關嘅，就係關於嗰個成本，喺所有座位安裝安全帶，如果係新巴士嚟講，個成本係幾多，我想請大家留住呢個工作小組嘅報告，然後我哋睇另外一份文件，係KMB第12沓文件，4887-5嗰一頁，或者我去4887-1嗰一頁先，等大家知道嗰個背景。

陳女士，喺呢一頁，你應該係面前見到㗎喇，呢個係第二次工作小組會議嘅筆記，日期係2018年4月23號嘅，而家請你睇番第16段，呢個會議紀錄，呢個係4887-5頁，等我讀出第16段。

「同巴士廠商係查問過，對於新嘅巴士座位安裝安全帶嘅可能性之後，所有巴士公司都話技術上係可以喺採購嘅新巴士嘅所有乘客座位度安裝安全帶嘅，而九巴龍運亦都係補充，每一架嘅雙層巴士係要額外 5,000 鎊嘅成本係為所有乘客座位安裝安全帶，所有巴士公司都同意喺佢哋嘅新嘅單層同埋雙層採購嘅巴士係實施呢個新嘅要求嘅。呢度提到有額外成本，就係每一架巴士 5,000 鎊去安裝乘客嘅安全帶，呢個係會議紀錄入面提到嘅。」

呢個係咪一個正確嘅估算呢？根據你而家有嘅資料。

陳美寶女士：（經傳譯員）睇番喺 2018 年 4 月，呢個係據我哋所知嘅資料。

陳政龍先生：（經傳譯員）即係啱囉喎，額外每一架巴士成本係 5,000 鎊？

陳美寶女士：Yes.

陳政龍先生：（經傳譯員）你有呢個資料，我個問題係喺 06、07 年之後有咩嘢更改呢，令到運輸署有呢一個建議，為新嘅巴士裝安全帶？對於喺市內巴士安裝安全帶，係咪個益處有改變呢，喺呢段時間？

陳美寶女士：（經傳譯員）喺我哋工作小組嘅討論入面，安全帶係其中一個好主要我哋討論過嘅題目，喺準備工作小組嘅討論之前，運輸署係有進一步檢討過海外嘅做法。頭先回答番大律師嘅問題，似乎海外對於市內巴士乘客座位安裝安全帶嘅立場大致一樣，呢一點我哋係好認真看待嘅，喺立法會嘅交通事務委員會都提過數個建議，我哋需要好小心咁樣考慮呢一個課題。

我哋由唔同嘅角度考慮，首先係道路交通同埋公共交通安全；第二，我哋亦都考慮到技術可行性，對於新採購巴士同埋現有巴士安裝乘客嘅安全帶；第三，我哋亦都考慮如果額外加裝所有乘客座位嘅安全帶嘅話，額外嘅成本，對於安全角度，我哋其實係有向道路安全議會提出呢啲議題，去討論攞佢哋嘅意見。

接住落嚟，喺呢個題目，我可以請邱國鼎先生補充一下我哋對於安全同保障嘅立場，即係話如果喺我哋市內巴士喺香港乘客座位加裝安全帶嘅影響，...

主席：（經傳譯員）你繼續講之前，你可唔可以話你幾時向道路安全議會提出呢個議題㗎？

邱國鼎先生：（經傳譯員）4 月，喺道路安全研究小組曾經討論過呢個題目。

主席：（經傳譯員）今年 4 月？

邱國鼎先生：（經傳譯員）對唔住，係 7 月，係 7 月嗰個會。

主席：（經傳譯員）係咪以文件或者電郵方式呀？

邱國鼎先生：（經傳譯員）係一個會議，一個小組會議嚟嘅，就有文件，有討論文件

嘅。

陳美寶女士：（經傳譯員）我哋有提交文件畀議會嘅。

主席：（經傳譯員）可唔可以提供文件副本畀我哋？

陳美寶女士：（經傳譯員）可以嘅。

主席：（經傳譯員）呢個係7月邊一日呀，個會議？

邱國鼎先生：May I check my diary?

主席：（經傳譯員）你慢慢喇。

邱國鼎先生：（經傳譯員）7月17號。

主席：（經傳譯員）唔該。陳律師。陳女士，我打斷咗你，我哋講緊你第一個嘅關注，即係話...

陳美寶女士：（經傳譯員）係呀，道路安全同埋公共交通安全，我哋就有諮詢過道路安全議會有關嘅小組，亦都提交咗文件，第二，呢一方面，我都會請邱國鼎先生隨後補充。但係我而家先講埋另外兩方面，喺技術可行性方面，工作小組嘅會議，亦都得到巴士廠商同埋巴士公司嘅參與。

我哋係處理兩個問題，第一，就係新嘅巴士，你可以睇番會議紀錄，我哋係有討論過，新採購嘅巴士，乘客座位都安裝安全帶呢個可行性，廠商嘅回覆係話技術上係可行嘅。專營巴士公司嘅代表喺會議上亦都係話--都確認佢哋係可以就住新採購巴士喺將來係實施呢一個建議嘅。

對於成本同埋財政影響方面，對於新嘅巴士，每一架雙層巴士額外嘅成本5,000 鎊，即係等如總成本嘅百分之一點五，即係話購置一架雙層巴士嘅總成本嘅百分之一點五。喺會議嘅時候，巴士公司亦都係話係喺技術上、操作上都係可行嘅，如果喺新採購嘅巴士所有乘客座位安裝安全帶。

下一條問題就係話現有巴士加裝安全帶，我哋參考過唔同巴士嘅模型...

陳政龍先生：（經傳譯員）喺加裝嗰個問題，我稍後會另一個題目先至再詳細討論，而家先講番幾個問題。

陳美寶女士：（經傳譯員）我而家係咪請邱國鼎先生去補充先呢？

主席：（經傳譯員）我諗我哋如果畀大律師去問晒所有有關嘅問題，先會更加有效率嘅，如果仲有啲事項遺漏嘅話，你可以提出，不過請佢繼續問先。

陳政龍先生：（經傳譯員）陳女士，我而家繼續問番嗰三個考慮，如果我錯，請你更正我，不過似乎係冇做過一個客觀嘅、科學嘅分析，係如果所有乘客座位都加裝安全帶嘅話係有咩好處，咁樣講公唔公道？

陳美寶女士：（經傳譯員）唔好意思，我唔明。

主席：（經傳譯員）你係咪講緊成本效益嘅分析吖，定點？

陳政龍先生：（經傳譯員）我哋有呢個成本就係5,000鎊...

主席：（經傳譯員）係呀，你個問題似乎係--你話「你似乎冇做過任何成本效益嘅分析」，佢係咁樣問嘅。

陳美寶女士：（經傳譯員）我唔同意。

陳政龍先生：Again, just a side point...

主席：（經傳譯員）我哋繼續講之前，你做過乜嘢分析呀，如果你唔同意佢講法？

陳美寶女士：（經傳譯員）首先，我哋有考慮成本，如果新巴士所有乘客座位安裝安全帶嘅成本，我哋有考慮；第二，亦都有考慮效益。

主席：（經傳譯員）你個分析結果係點呢？

陳美寶女士：（經傳譯員）我哋結論係如果係所有乘客座位都裝安全帶嘅話，就會為喺車上嘅乘客提供額外嘅保障，呢一方面可以請邱國鼎先生係補充嘅。

邱國鼎先生：（經傳譯員）如果我哋要做成本效益分析嘅話，我哋要對等比較嘅，我哋關注嘅係安全帶係一個保護裝置，之前我哋提過喺車廂內嘅其他嘅譬如係限速器或者係穩定控制系統，所有呢啲都係一啲防禦嘅措施嚟嘅，就係用技術去防止意外嘅發生，但係安全帶係一個保護裝置，因為畢竟都係會發生意外，而安全帶就係一啲安全措施可以保障乘客，如果我哋做一啲成本效益分析嘅時候，我哋要搵一啲類似嘅同等嘅有咁樣嘅保護功能嘅儀器去同安全帶去比較，而我冇見到有任何一種保護裝置可以對乘客，特別喺發生意外嘅時候提供一樣嘅保障。

而喺工作小組，我哋亦都有同巴士公司討論，額外嘅費用就係每一部巴士5,000鎊，而每一架雙層巴士就係超過300萬。

主席：（經傳譯員）我哋知道㗎喇，即係話係總成本嘅百分之一點五。

邱國鼎先生：（經傳譯員）喺比較總成本嚟講，係比較低嘅，但係呢一個帶嚟嘅保護，呢個得益係好高嘅。

主席：（經傳譯員）有冇啲情況係有車上嘅座位乘客因為冇安全帶而受傷呢？你有冇研究過呢一樣嘢呢？

邱國鼎先生：（經傳譯員）有啲研究嘅，係私家車，安全帶可以減低意外嘅嚴重性。

主席：（經傳譯員）私家車同巴士好唔同，你有冇考慮過--有冇研究過有啲事件有乘客係喺車上坐喺個座位度因為冇安裝安全帶而受傷或者係甚至死亡呢，你有冇

研究過呢？

邱國鼎先生：（經傳譯員）冇一個特定嘅研究。

主席：（經傳譯員）即係答案就係你冇喇？

邱國鼎先生：（沒有可聽到的回答）

主席：（經傳譯員）點解冇呢？

邱國鼎先生：（經傳譯員）我哋亦都有討論過，正如我頭先提過，就係喺道路研究小組嗰度傾過，呢個係喺工作小組報告嘅 5.10 段嗰度。

主席：（經傳譯員）個問題好簡單，點解你冇去研究過喺巴士上座位嘅乘客冇安全帶而導致到有受傷或者死亡嘅事件去顯示番個問題喺邊呢？

陳美寶女士：（經傳譯員）請容許我補充，主席。我哋要承認番，根據職員嘅證供，我哋係冇做過任何可以量化嘅研究，考慮到意外嘅成因嘅，去研究一下係唔係冇帶安全帶嘅乘客個傷勢會重啲，...

主席：（經傳譯員）你喺繼續講之前，我而家問你嘅問題，點解冇做咁嘅研究，或者係可以量化嘅分析呢？

陳美寶女士：（經傳譯員）我哋冇咁樣做，我而家都答唔到你，但係我想指出...

主席：（經傳譯員）等我協助你，有冇咁嘅統計數據？有冇紀錄？有冇整理過呢啲資料？

陳美寶女士：（經傳譯員）主席，我諗喺呢方面冇收集過或者整理過統計數據嘅。

主席：（經傳譯員）警方冇？

陳美寶女士：（經傳譯員）我哋唔可以代表警方回答。

主席：（經傳譯員）你接觸佢哋嘅交通意外數據庫嘅，你唔係叫你幫佢答，有冇任何數據係協助到你嘅？

邱國鼎先生：（經傳譯員）主席，喺我哋嘅路上交通意外數據，我哋每年係的確有啲數字嘅。

主席：（經傳譯員）有啲數字係包括私家車，但係我問嘅係巴士。

邱國鼎先生：（經傳譯員）我哋巴士方面都有嘅。

主席：（經傳譯員）你有啲咩嘢數字呢？或者你可以考慮下呢點，我就唔想對你唔公平，如果你需要啲時間去整理下啲資料，我哋可以稍後再返番呢一點嘅。陳律師。

陳政龍先生：（經傳譯員）主席，因為提到警方嘅數據，我問緊我嘅助手搵番最近警方發畀我哋嘅函件，有啲資料關於係巴士座位乘客受傷嘅數據嘅。

主席：（經傳譯員）你都提醒咗我，呢啲資料喺我哋嘅網站有冇呢？

陳政龍先生：（經傳譯員）有嘅，未必可以完全回答到呢個問題嘅，但係都有啲關係嘅，而家想請你睇番雜項1C嘅，頁數係124-561，主席，呢個係10月3號2018年警方發畀我哋委員會嘅函件。陳女士，你而家面前都應該有呢一封信件，係警方係喺2018年10月3號寫畀委員會嘅，第3段，警方知悉佢哋嘅總部係搵唔到任何運輸署根據喺2007年呢個建議喺巴士上安裝安全帶嘅任何諮詢嘅，呢一段就講到同道路安全議會嘅會議，之後嗰頁。

第4段，警方係咁講嘅，警方就係有一啲統計數字，關於係喺巴士上嘅座位乘客冇戴安全帶受傷嘅，跟住就係2015年、2016年、17年警方有啲數據提供，似乎就係一啲乘客係有帶同冇帶安全帶而受傷嘅數字嘅。

運輸署有冇考慮到呢一啲數據呢，當時你係提議話喺新嘅巴士係有安全帶，你去考慮個益處嘅時候，有冇睇過呢啲數據呀？

主席：（經傳譯員）還是你第一次去睇到呢啲嘅數據呢？

邱國鼎先生：（經傳譯員）唔係，唔係嘅，我哋都係知道呢啲嘅數據。

主席：（經傳譯員）係，你以前見過㗎喇，係咪呀？

邱國鼎先生：（經傳譯員）其實佢哋嗰個格式可能唔同嘅，但係嗰個來源，其實我哋都知嘅。

主席：（經傳譯員）當時你去做分析嘅時候，有冇考慮呢啲數據？

邱國鼎先生：（經傳譯員）而家嗰啲傷亡嘅情況，因為有啲--而家我哋就冇安全帶吖嘛，我哋嘅建議就係話要提供安全帶，我哋比較關注...

主席：（經傳譯員）唔係，唔係，唔係，個問題好簡單嘅啫，你有冇考慮過呢啲嘅數據呢？你可以話畀我聽你仲考慮過其他嘢，但係有冇考慮過呢啲數據？

邱國鼎先生：（經傳譯員）我哋冇考慮嘅。

主席：（經傳譯員）是或者否其實好簡單嘅啫，如果你想補充嘅時候，你可以話畀我聽你考慮過其他嘢都得。

陳美寶女士：（經傳譯員）主席，我哋要好公道嘅，對啲同事，佢喺我哋嘅運輸署其實係道路安全嘅專家，佢有參加道路安全議會嘅會議，佢亦都係有同警方去聯繫，基於佢哋以前嘅研究，佢哋係攞到警方嘅資料同埋數據嘅，冇錯，如果有咁樣嘅數字，點樣嘅方法係去表達呢啲數字嘅時候，佢哋就冇考慮過，但係邱先生可能想解釋嘅就係話佢哋嘅專業嘅分析就會話畀佢聽有安全帶就會係對於

坐喺度嘅乘客提供額外嘅保障嘅。

主席：（經傳譯員）我哋之前有警司係嚟作供嘅，佢話畀我哋聽，提醒我哋有如果呢一個嘅乘客佢係戴安全帶戴得好嘅說話，佢就可以個生命得到保障，呢個嘅問題就係大家唔爭論嘅，個問題就係話--個問題--而家個問題喺邊度，同埋究竟嗰個成本係點樣樣。邱先生，其實你有冇做到啲分析同埋有冇一啲文件去令我哋明白你究竟係做過啲咩嘢分析，你可唔可以提供呢？

邱國鼎先生：（經傳譯員）喺我哋嘅工作小組嘅報告第5.3、5.4段嗰度，我哋有提到...

主席：（經傳譯員）你可唔可以首先回答我個問題，其實你有冇係做過一個文件就係有呢一個成本效益分析呢？

邱國鼎先生：No. I want to mention...

主席：（經傳譯員）你可唔可以就咁答問題？有冇咁做？

邱國鼎先生：We are going to request in the working group report that those...

主席：（經傳譯員）對唔住，邱先生，唔該你答我嘅問題。你需要幾多時間都得，你係需要點樣解釋都得，我會畀時間你，但係回答我問題，喺呢一個課題上面，你有冇去撰寫過一個文件？或者呢個係一個好簡單嘅問題，你用--你可以花啲時間去諗一諗。

邱國鼎先生：（經傳譯員）冇。

主席：（經傳譯員）好，你係想講啲乜嘢嘢呢？

邱國鼎先生：（經傳譯員）第5.4段，呢個工作小組嘅報告就話「所以喺現有嘅巴士，如果我哋要加裝安全帶，個工作小組就建議運輸署、專營巴士公司同埋巴士廠就係大家緊密繼續聯繫同埋去工作嘅。」

主席：（經傳譯員）係，呢個係咪你想話畀我哋聽嘅？

邱國鼎先生：（經傳譯員）係。

主席：（經傳譯員）好，陳生，繼續。

陳政龍先生：（經傳譯員）陳女士，我下一條問題就係咁嘅，可能唔係咁公道嘅，咁樣問你，就係請你解釋就係你上一手做過或者冇做過啲乜嘢，但係無論如何，個問題就係話運輸署--如果個安全帶係咁好，點解喺2006、07年做個檢討嘅時候，冇加入咁樣嘅要求呢、規定呢？

陳美寶女士：（經傳譯員）我就唔可以係代我嘅上一手嘅人去回答，但係喺我哋工作小組嘅討論嘅當中，運輸署嘅睇法就係安全帶就會提供畀乘客一個多一層嘅保

障，但係可唔可以達到我哋希望達到嘅成果呢？亦都係視乎嗰個乘客會唔會使用或者配戴呢啲安全帶，同埋佢哋係咪真係坐喺度嘅乘客。

我哋知道有限制嘅，對於呢一個安全帶有冇效，但係即使係咁，我哋認為係新巴士嚟講，如果我哋要配有安全帶，其實都幾有成本效益，亦都會係提供額外嘅保障，而嗰個額外嘅成本亦都唔係咁大嘅。係關於現有巴士我哋再加裝，遲少少我就會講多啲。

主席：（經傳譯員）唔該晒。陳生。

陳政龍先生：（經傳譯員）喺加裝之前，我就係都想提一點嘅，喺九巴關於大埔嘅意外嘅調查報告嘅時候，2018 年 3 月 12 號提交畀運輸署，九巴就係講，就話--自願咁講，就係話佢會係安裝--喺所有嘅座位之中安裝安全帶，...

主席：（經傳譯員）我哋可唔可以睇一睇嗰個頁數呢？

陳政龍先生：（經傳譯員）KMB-1 第 114 頁第 40 段嘅，主席，114 頁嘅，就係九巴，係大埔公路嘅意外嘅其中一個嘅部分嚟嘅，係 3 月 12 號嘅。

主席：（經傳譯員）冇錯，我哋睇到喇。

陳政龍先生：（經傳譯員）或者我讀一讀出嚟，第 40 段嘅，就係「安全帶」係標題，係呢個調查報告嘅第 5 部分，就係「其他措施可以改善巴士安全」嘅，好，我哋讀出第 40 段嘅。

「九巴就已經係要求呢個嘅供應商就係喺新巴士喺 2018 年 3 月 5 號採購嘅巴士之中就係都係有安全帶嘅，係一個標準嘅一個設施嚟嘅，而家現有嘅巴士嚟講，如果係有一啲特定嘅路線係需要嘅時候，就喺上層嘅巴士上層嘅座位之中就會係逐步咁安裝安全帶嘅。」

所以喺工作小組第一個會議之前，九巴自己就已經係採取行動係去裝置安全帶喺所有嘅所有座位之中，...

主席：（經傳譯員）係所有新巴士。

陳政龍先生：（經傳譯員）係，冇錯，主席，係，唔該晒。我個問題就係九巴而家個情況就係咁，九巴呢個咁樣嘅決定其實有冇影響到工作小組個建議，就係話係建議其他嘅專營巴士公司都係要喺所有嘅座位度安裝安全帶呢？

陳美寶女士：（經傳譯員）首先，我會想講九巴提供嘅報告，2018 年 3 月 12 號收到嘅，係遲過我哋發出電郵，就係 3 月 6 號就係畀所有嘅巴士營運商，就係話畀佢哋聽其實我哋會研究乜嘢嘅措施去改善巴士安全嘅，我哋提供畀委員會其實已經係提供咗相關嘅電郵嘅。

主席：（經傳譯員）冇錯，我哋喺呢點係冇爭議，喺 2 月 15 號立法會有討論過呢個問題，佢哋都有傾過關於呢個安全帶嘅，所以其實你嘅議程裏面，你擺上一個

咁嘅議程就係唔奇怪，冇問題嘅，呢個冇爭議，個問題就係話九巴其實喺工作小組開會之前佢哋作出咁樣嘅決定，呢個有冇影響到你哋工作小組嘅建議，就係話提議其他嘅專營巴士公司，其他或者係所有嘅專營巴士公司都喺新嘅巴士嗰度係有安全帶，有冇影響嘅呢？

陳美寶女士：（經傳譯員）我哋知道九巴有呢一個咁嘅計劃，就話係需要供應商喺新嘅巴士有安全帶，但係喺工作小組我哋去討論嘅時候，討論關於安全帶嘅時候，我哋係盡力希望睇下其實嗰個技術可行性、財務方面係點樣樣，同埋道路安全嗰個方面係點樣樣。

主席：（經傳譯員）對唔住，我真係要打斷一下，或者我講得清楚少少，你係睇番嗰個嘅可行性，技術嘅可行性，同埋係呢一個關於呢一個對於道路安全同埋乘客嗰個益處嘅，係咪呀？

陳美寶女士：（經傳譯員）係，冇錯。

主席：（經傳譯員）好，陳先生。

陳政龍先生：（經傳譯員）主席，我就而家係去到關於加裝安全帶方面，...

主席：（經傳譯員）好，我哋喺做呢樣嘢之前，其實你可唔可以幫一幫委員會，喺呢一方面，專營巴士或者係九巴其實係大概佔嘅比例係幾多呢？

陳美寶女士：（經傳譯員）你嘅意思係巴士嘅數目，係咪呀？

主席：（經傳譯員）係，巴士嘅數目，佔幾多？大概係四千，係咪呀？

陳美寶女士：（經傳譯員）係。

主席：（經傳譯員）大概係三分之二，即係六千部之中，四千部係九巴嘅。呢間公司其實係三分二，擁有香港嘅巴士車隊，佢就係決定喺新巴士裏面係裝置安全帶，其餘三分之一，你就話被悉到呢個九巴嘅決定嘅，係咪？

陳美寶女士：（經傳譯員）係。

主席：（經傳譯員）好，或者我哋而家小休二十分鐘。

上午11時32分聆訊押後

上午11時54分恢復聆訊

出席人士如前。

主席：（經傳譯員）陳律師。

陳政龍先生：（經傳譯員）主席，而家我想講加裝安全帶嘅問題，我首先係講番工作小組有關嘅段落，我係會讀多啲段落出嚟嘅，因為我發現加裝呢個問題係比較複雜嘅，為咗對工作小組嘅分析公道，我係會係全部讀幾段出嚟，首先請大家睇 3.8 段，係工作小組報告，內部頁碼 26，聽證會號碼係 TD-5 文件 1786 頁，主席，似乎嗰個屏幕有少少問題--而家有喇。

主席：（經傳譯員）解決咗未呀？

陳政龍先生：（經傳譯員）係，解決咗。陳女士，你睇唔睇到 3.8 段呀？

陳美寶女士：Yes.

陳政龍先生：（經傳譯員）我而家係會將佢讀出嚟，亦都會讀出 3.9、3.10，然而就會停一停，到時我會係講幾句嘅，不過首先我讀咗先。

3.8，佢嘅部分就係話喺現有專營巴士上加裝安全帶呢一部分嘅，佢就係咁講，而家個問題就係講加裝上層嘅安全帶嘅，3.8 係咁講嘅「就算係喺上層所有乘客座位加裝安全帶係技術上可行都好，都有其他嘅影響嘅，首先，我哋認為巴士嘅重量係會增加 300 至 400 公斤，而載客嘅容量可能會減少七至八位乘客，因為係要將佢改裝；仲有加裝同埋測試嘅工作，喺每一架專營巴士嚟講，都要需要好多嘅時間，因此亦都會係影響喺呢一個程序當中巴士嘅操作同埋巴士可用率嘅。同埋睇下仲有冇呢一啲嘅人力，ADL 同富豪就話係需要一個星期，每一架巴士一個星期，仲要三至四個有技能嘅技工嘅，但係因為巴士廠就話佢哋冇咁樣嘅地方係可以做呢啲加裝嘅工作，公營巴士嘅公司就要自己用自己嘅工場嘅地方同埋自己請承辦商去做，因此有冇咁樣有技能技工同埋工場有冇地方就會係一啲好重要嘅考慮。基於一個比較粗略嘅估計，係可能需要六至十二年嘅時間，將全部三千三百架巴士加裝上層安全帶嘅。」

3.9 段，「因此有一啲嘅巴士營辦商就係表達咗一啲關注，就話加裝安全帶唔單只係令到佢哋喺財務上有負擔，甚至喺時間同埋人力方面都係好可觀嘅，仲要就係可能要重新調配或者係購置新嘅、額外嘅巴士令到喺整個程序當中都有足夠嘅巴士服務嘅。」

好喇，講到呢一度，我停一停，喺註腳 10 嗰度就係講到有關嘅財務負擔嘅，佢就係咁講，「我哋未詳細去研究呢一啲技術上嘅細節之中，我哋係假設一架巴士如果係要做呢個加裝就要 20 萬港元嘅，仲未計人力同埋係一啲間接嘅費用嘅。」因此講到成本嗰方面，喺個分析嘅時候，你係睇緊成香港六億元嘅，咁樣先可以係六年到十二年做晒所有嘅加裝，我咁樣講係咪正確呢？

陳美寶女士：（經傳譯員）正確，粗略嘅估計係咁。

陳政龍先生：（經傳譯員）或者而家我繼續去讀，...

主席：（經傳譯員）你再讀之前，咩嘢意思就係話人力同埋間接費用係唔包括呢？咩嘢意思呢？

陳英傑先生：（經傳譯員）主席，或者我答呢個問題，喺呢一個註腳嗰度講嘅成本就只係包括巴士製造商喺器材同埋嗰個加裝嘅安全帶嗰度佢哋報價，其他嘅費用或者係人力仲未包括在內嘅，因此我哋係咁講。

主席：（經傳譯員）即係話譬如話要有啲工程師，佢哋係要加裝呢一啲嘅安全帶，即係話工程師嘅費用未加落去？

陳英傑先生：（經傳譯員）係，冇錯。因為當時係未能夠係估計嘅。

主席：（經傳譯員）咩嘢叫做間接嘅費用？係咪即係話譬如話架巴士可能成個禮拜唔用得呀咁？

陳英傑先生：（經傳譯員）有可能係包括你要租個工場嘅地方。

主席：（經傳譯員）仲有架巴士喺嗰個禮拜係唔用得㗎嘛？

陳英傑先生：（經傳譯員）係呀，都未計算喺呢一度嘅。

主席：（經傳譯員）嗰個就係額外嘅成本嚟㗎喇？

陳英傑先生：That's correct.

主席：（經傳譯員）所以呢一個總體嘅數字話6億，其實仲有其他嘅成本係未包括在內嘅？

陳英傑先生：（經傳譯員）冇錯。

陳政龍先生：（經傳譯員）跟住第3.10段，「喺呢一方面，所有嘅巴士公司都係話由佢哋每日嘅觀察，坐喺冇遮閉嘅座位嘅乘客通常都唔會戴安全帶嘅，如果係咁嘅情況嘅話，似乎加裝安全帶就唔係符合成本效益喇。」喺呢一度停一停，我想跟進一點。

「另一方面，佢哋覺得應該加強公眾教育去鼓勵喺巴士上配戴安全帶，喺五個專營巴士公司嚟講，九巴同龍運強調佢哋就住新嘅巴士係支持安裝安全帶嘅，亦都要睇下巴士廠商嘅建議，九巴、龍運就會喺上層嘅座位加裝安全帶，又或者係如果有一啲係行公路嘅路線，長途嘅路線，係中段站好少嘅話，亦都可以喺所有嘅乘客座位加裝安全帶，其餘嘅三間巴士公司，即係城巴、新巴、大嶼山巴士公司就唔支持加裝呢一個建議嘅，係因為使用率好低喇預期，同埋係加裝嘅費用高昂，要求政府如果係要加裝呢個建議實施嘅話，係提供津貼嘅。」

停一停，睇番呢一段，係講到巴士公司嘅意見，佢哋話喺冇遮閉嘅座位嘅乘客嗰度，其實一般都唔戴安全帶，佢哋預期個使用率係好低嘅，係咪喺工作小

組嗰時開會都同巴士公司討論呢一點呢？

陳美寶女士：（經傳譯員）係嘅。

陳政龍先生：（經傳譯員）委員會聽過警方嘅證據，而警方嘅代表，即係總警司Baker 佢都係話預期大部分嘅人都會用安全帶嘅。主席，就住呢一個證據、證供，可以講番係喺謄本嗰度嘅第17日嘅聽證會，9月24號2018年，第48頁20行同埋第50頁13行，據我理解，仲有一個做法，就話只係上層安裝安全帶，同埋只係喺長途車，行公路嘅路線，冇乜站先至安裝安全帶。

呢一個就喺3.13嗰段有提到嘅，「結論同埋未來嘅工作」，呢度係咁講嘅，「考慮到喺香港嘅專營巴士嘅營運狀況都係喺市內巴士，亦都係有企位，同埋喺現有嘅巴士加裝安全帶嘅技術可行性、費用同埋所需時間，工作小組認為係理據不足去令到所有嘅巴士係強制安裝座位嘅安全帶。」

我停一停，我唔知道係咪有打錯字吖，定話係語言嘅問題，因為我理解工作小組係有就住新巴士建議所有座位安裝安全帶嘅，呢度就話所有巴士，如果係要強制安裝安全帶嘅話，就理據不足，係咪有啲搞錯呢？

陳美寶女士：（經傳譯員）我可以澄清一下嘅，首先，對於新嘅購置嘅巴士，工作小組嘅建議就係所有新嘅巴士都係所有乘客座位都安裝安全帶嘅，工作小組嘅建議就認為如果係話全部巴士，我哋有一個法定要求或者強制要求要所有巴士，包括新購置巴士同埋現有嘅巴士都係所有乘客座位要加裝安全帶嘅話，就理據不足嘅。我哋咁樣講嘅時候，我哋係明白好多問題，嗰啲問題仲需要仔細考慮去評估嘅，譬如話係安全帶。

陳政龍先生：（經傳譯員）所以呢度有個分別，就係話呢個係一個專營巴士嘅協議嘅要求，同埋法定嘅要求，啱唔啱？

陳美寶女士：（經傳譯員）呢個第一個分別，另外就係話所有巴士吖，定係所有新嘅巴士。

陳政龍先生：（經傳譯員）多謝你嘅澄清，我再繼續讀呢一段，「然而工作小組亦都承認喺冇遮閉座位同埋係巴士車廂係冇企位嘅情況底下，安全帶係會為坐低嘅乘客提供額外保障，所以工作小組亦都建議，而所有公司亦都同意現有巴士加裝安全帶呢個可行性係要進一步考慮嘅。視乎技術性、操作上同埋財政上嘅可行性嘅評估，當局應該考慮喺有啲巴士係指派行某一啲嘅路線，譬如話係長途巴士，係行公路，比較少中途站嘅，上層嘅所有座位都應該加裝安全帶。」

睇下個附註，佢就畀咗啲公路嘅例子，呢個係第11號--第12號嘅附註，就係話根據巴士公司，似乎牽涉嘅巴士嘅數目會減低，就大概係二千。

咁樣講啱唔啱呢？呢一個數字都係一個粗略估算嚟嘅，啱唔啱呀？就即係4億港元，稍為超過4億港元。

陳美寶女士：（經傳譯員）係嘅。

陳政龍先生：（經傳譯員）講番轉頭，我頭先讀過嘅段落，即係話如果加裝安全帶似乎唔符合成本效益，當大家講到符合成本效益嘅時候，係咪相比加裝安全帶為乘客嚟嘅益處而言呀？

陳美寶女士：（經傳譯員）冇錯。

陳政龍先生：（經傳譯員）陳女士都有提過，因為運輸署冇就呢一方面，即係安全帶嘅效益做一個成本效益研究，你點樣去評估成本效益呢？

陳美寶女士：（經傳譯員）對於現有巴士加裝安全帶似乎唔符合成本效益，呢句說話就係有以下考慮嘅，首先，我哋留意到唔係所有現有巴士嘅型號都係適合加裝安全帶嘅；第二，有啲巴士型號適合加裝安全帶嘅技術上，但係喺下層都加裝安全帶嘅話，就會對於巴士嘅結構同埋運作有影響；第三，我哋亦都留意到運作上嘅影響，譬如話時間、所需嘅人手，如果話係要喺工場嗰度加裝嘅話，呢樣嘢亦都會影響專營巴士可以調配嘅巴士嘅數目嘅。考慮到呢啲情況，工作小組係仔細考慮過，亦都有同巴士公司商討嘅，正如資深大律師亦都提到喺 3.13 段、3.14 段，係基於咁嘅原因，而巴士公司亦都同意現有巴士加裝安全帶呢件事係要進一步去研究嘅。

所以回答番你嘅問題，呢句說話話似乎唔符合成本效益係冇經過一啲可以量化同埋穩健嘅成本效益分析，但係我哋有要求巴士公司要進一步評估操作上同埋財務上嘅可行性，我哋先會進一步考慮到底喺上層可唔可以加裝安全帶，如果係嘅話，對於係行走公路嘅長途巴士路線，中途比較少巴士站嘅，會唔會係有比高嘅機會咁樣做呢，因為乘客係冇咁頻密要上車、落車嘅，而係根據咁嘅基礎，係有較大機會使用安全帶嘅。

主席：（經傳譯員）你意思係嗰個使用率會高啲，係咪呀？

陳美寶女士：（經傳譯員）冇錯，主席。

陳政龍先生：（經傳譯員）你都提過話需要更多嘅評估，Stanley 教授同埋 Weston 教授都有一啲建議嘅，我讀咗佢哋嘅證供之後，再邀請你去回應一下，你覺得呢個方法係咪可行。而家請你睇番 Stanley 教授嘅證供嘅謄本，就係 2018 年 9 月 15 號，第 124 頁，或者由 123 頁開始講起，畀大家一啲背景資料，第 123 頁第 20 行，你可以見到個題目就係「所有座位加裝安全帶」。

124 頁第 1 行，我就問呢個問題嘅，「喺澳洲市內巴士係咪有要求加裝安全帶嘅呢？」「冇。」

我個問題就話「係咪有原因嘅呢？」Stanley 教授就話「一般嚟講，呢架車輛本身嘅重量，就會提供足夠嘅保障，而安全帶就唔會提供更多嘅保障，而且現有嘅車輛加裝安全帶亦都係一個挑戰，成本亦都會增加。

我唔知你明唔明，有一樣嘢就叫做係一個條例帶嚟嘅影響嘅一個陳述嘅，譬如話如果係喺巴士路線，現有嘅，係強制安裝安全帶嘅話，似乎就要去做一個條例實施嘅影響嘅研究，去睇下咁樣做牽涉嘅成本，同埋亦都要睇下唔同嘅事故嘅情況嘅唔同嘅機率係咪會減低。然後再計下佢嗰個成本，然後去作為一個評估嘅基礎嘅。我哋平時就會咁樣做嘅。」

而主席跟住就問，「呢個嘅條例影響係咩嘢意思呢？」「通常就會由政府部門做嘅，喺澳洲就有係國家嘅層面會做好多嘢，譬如係話佢國家嘅交通局，就係我亦都做咗副主席九年嘅，我哋係有做過唔同嘅車輛研究嘅，唔同方面嘅條例影響嘅說明嘅。」

呢個係其中一段，另外一段都係教授嘅證供，就係第144頁，144頁第4行，我問題係話「考慮到嗰啲資料，你對於呢個意見，即係話喺所有座位安裝安全帶，或者第二，淨係喺上層冇企位嘅乘客去安裝安全帶，你嘅觀察係點呢？」

教授就回答話「多謝，呢個係令我要返番去半個鐘頭前提到嘅嗰個答案嘅，我覺得係有兩個層面嘅，第一，就係話喺巴士嘅某啲位置，譬如話係新巴士嘅上層係技術上係可以安裝安全帶或者係舊嘅巴士去加裝。

第二個層面，就係話如果係技術上可行嘅話，呢一個成本效益比率係幾多呢？即係意思話成本要花幾多，同埋如果安裝咗安全帶之後，嗰啲意外嘅種類發生嘅機率係咪會減低呢？人哋會唔會戴安全帶呢？呢啲問題都係需要回答嘅。

我會講話呢啲問題就係你要係喺條例實施嘅影響嘅評估入面去做嘅，有唔同呢啲種類呢啲意外發生嘅機率個資料係點樣呢，你亦都可以係就住呢啲意外機率減低去睇下用金錢去量化計算，然後你亦都可以對於配戴安全帶嘅機率有個意見，亦都會影響戴安全帶嘅有效性嘅。

政府喺決定如果係技術可行嘅話，作為一個政策嘅決定去安裝安全帶都可以嘅，而咁樣做，你要去先做一個嘅成本效益分析，我覺得喺呢個情況應該咁樣做嘅，所以我覺得個基礎唔可以係話就咁憑人嘅意見認為應該咁做、應該點樣做。

我哋要考慮好多一啲真實而係有基礎嘅一啲關注，同埋會影響係咪去安裝安全帶，但係你要做一個恰當嘅成本效益分析先，如果唔係，所有都係猜測嘅。

我自己就覺得人哋可能覺得係應該要安裝安全帶，不過呢個冇恰當嘅評估嘅話，只係一個意見嚟嘅。」

「即係話就咁一個嘅感受係唔夠嘅，你要做一個嘅成本效益分析？」

「冇錯。」

Transcript by Epiq Hong Kong, Limited

「而咁樣做嘅話，你會睇啲乜嘢情況呢？」

「理論上，原則上，就會係非常簡單嘅成本效益分析，而要考慮個機率嘅價值嘅話，你要做一啲比較嚴肅啲嘅研究，你要睇番你喺唔同嘅收到嘅陳述書入面已經係提到過嘅。」

跟住落嚟嘅證供就問關於澳洲嘅好多嘅資料，我就唔會讀出嚟。另外一段我想講嘅都係同一點嘅，就係喺第149頁第4行，Stanley教授個答案中間，呢一段開始，第4行係講效益嘅。

「但係呢個情況就要問係有乜嘢效益，你要睇下呢架車係會發生乜嘢類型嘅意外，譬如係咪喺企位嘅乘客定座位嘅乘客會有意外，而如果要求戴安全帶嘅話，呢一類型嘅意外機率係咪會減低幾多，而你要做啲乜嘢去鼓勵大家戴安全帶呢？

如果係咁樣做嘅話，我就可能係要同心理學家講下你點樣去叫人戴安全帶、點樣令到人哋去認真處理，我覺得喺香港，而家都係應該要咁樣做嘅，係好重要嘅就係去考慮到底會發生嘅機率係幾多，我會同--即係話我會考慮發生呢啲意外之後嗰個成本係幾多，即係話如果香港有致命意外嘅話，牽涉嘅費用係幾多、個成本係幾多、嚴重受傷嘅意外係幾多，因為你要將呢一啲嘅價值去將佢轉換去應用喺係某一種嘅意外發生嘅機率減低咗嘅話，個價值係幾多。」即係解釋咗就點樣去做一個成本效益分析嘅。

就我就會睇一睇 Weston 先生喺倫敦嘅情況，然後我就會問一問你點樣睇佢哋嘅意見。好，我哋而家去睇番去 Weston 先生嘅報告，係呢個專家嘅文件冊115頁，我就想睇一段簡短嘅一段，就係呢一個嘅文件夾嘅第148頁，喺文件裏面就係第34頁嚟嘅。

陳小姐，第148頁，呢個就係「巴士安全標準」嘅，呢個背景就係關於應該係裝置一啲乜嘢嘅安全裝置，我就會讀下面數上嚟第三段。

呢度講話「雖然話呢個新嘅標準就會喺新嘅巴士適用，每一年就有七百部嘅，我哋亦都係諗緊其實可唔可以喺而家嘅巴士裏面加裝，特別就係而家係中期嘅時段，就大概係會係需要七年時間去完成嘅。我哋特別要留意就係倫敦運輸局就係採取一個非常嚴謹嘅措施就去睇番每一個嘅可能性，就用一個成本效益分析嘅，就會係希望能夠達到就係話每一鎊我哋使咗嘅錢就能夠達成最大嘅傷亡同埋意外減低嘅效益嘅。」

主席：（經傳譯員）呢個係巴士安全嘅標準，我哋睇緊唔同嘅巴士嘅科技嘅。

黃女士：（經傳譯員）或者我亦都係為紀錄起見，我都係睇一睇第二段，就係「巴士安全標準」。

「有唔同嘅科技我哋睇緊嘅，包括智慧車速輔助、自動剎車同埋呢一個聲控同埋影像嘅分析等等，其實都係我哋睇緊嘅，我哋都係設計去睇呢一啲嘅唔同

嘅選項，就確保我哋係投資咗幾多錢，我哋應該係能夠攞盡嗰個益處同埋利益嘅。」

因此呢兩個嘅專家嘅報告話畀我哋聽其實佢哋都有做--喺兩個唔同嘅司法管轄區都做一啲好嚴謹嘅成本效益分析嘅，我希望運輸署特別去睇一睇呢一個咁樣嘅方法，就特別喺專營巴士裏面加裝安全帶，會唔會係做同類嘅嘢呢？

陳美寶女士：（經傳譯員）第一位專家嘅供詞，佢就講到個規管影響研究，就佢認為係需要嘅，如果我哋係要強制係要加裝或者安裝安全帶嘅時候，就需要嘅，喺呢一個 Weston 先生，倫敦，佢就講到係成本效益分析，運輸署嘅睇法就係我哋同意喺車上面係安裝一啲嘅裝置去改善巴士安全標準，我哋係需要有一個嚴謹同埋小心嘅評估，或者我哋所用嘅字眼係同佢哋唔相同嘅，同嗰個專家，譬如話規管影響研究或者成本效益分析，可能我哋用嘅字眼唔同，但係工作小組嘅觀察同埋佢考慮就係話我哋都係需要進一步去探討個可行性同埋嗰個運作上嘅影響、財務嘅承擔等等，係就住--即係話就住加裝或者安裝安全帶。換句話嚟講，我哋都係睇緊用一個更有系統嘅方法，更全面嘅方法去睇呢一個嘅課題。

主席較早前都提出，喺第 3.13、3.14 段，喺呢個工作小組嘅報告裏面，我哋可能冇講過話就係將成本同埋效益嚟作一個對比，但係我哋都係前瞻嘅，前瞻嘅，當我哋再去推進呢個項嘅時候，我同意我哋係需要睇番喺操作技術同埋財務方面嘅承擔同埋睇番我哋嗰個嘅效益係點。

我哋而家喺現有嘅巴士加裝安全帶似乎唔係咁符合成本效益，我哋亦都考慮過幾個因素，所以其實係咪應該成為一個強制或者法定嘅規定，抑或要求特別係喺目前現有巴士上層加裝安全帶，我哋真係要去認真去睇下究竟我哋係有乜嘢額外嘅成本或者額外嘅效益，特別係我哋亦都係睇番成本同埋個技術嘅可行性。

專家提過，如果我哋係需要有個強制嘅要求嘅時候，我哋需要係進行一啲成本效益分析或者係做一啲影響嘅研究。唔該晒。

陳政龍先生：（經傳譯員）又或者 Stanley 教授或者 Weston 先生嘅報告都有提到，就話有啲科學嘅、量化嘅一啲嘅效益，如果我哋真係要加裝安全帶，我哋需唔需要做呢啲嘢呢？你同唔同意呢？

陳英傑先生：（經傳譯員）我同意嘅。我哋需要做好多嘅工作嘅。專營巴士喺香港，我哋暫時都未有呢啲嘅裝置，所以其實喺呢方面，我哋都係好難收集數據，但係我哋都可以係研究海外嘅經驗，作進一步嘅分析，特別係基於嗰啲意外嘅數據、其他嘅車輛嘅意外數據，但係我哋要考慮到佢哋唔係雙層嘅車輛。我哋需要為乘客提供保護，我哋亦都要考慮呢一點，去決定究竟我哋要唔要求或者係需唔需要進一步考慮喺上層去加裝安全帶嘅。

陳政龍先生：（經傳譯員）主席，我就想去另外一個嘅課題，就係關於巴士意外數

據。

主席：（經傳譯員）喺做呢個之前，我又自己都有幾個問題想問一問嘅，你有冇去搜集一啲數據，就係關於安全帶，如果有嗰啲安全帶，佢哋嘅使用率係點樣呢？即係講緊喺專營巴士嘅安全帶。

陳美寶女士：（經傳譯員）冇，主席，冇。

主席：（經傳譯員）點解冇呢？

陳美寶女士：（經傳譯員）對唔住，我冇答案。

主席：（經傳譯員）你有冇打算將來會收集呢啲數據？

陳美寶女士：（經傳譯員）我會咁樣做嘅。我想補充，就係我哋亦都留意到係巴士營運商喺工作小組嘅時候，佢哋亦都畀過一啲意見，佢哋傾向於認為就係嗰個使用率都係好低嘅，我哋知道有咁嘅意見，而家個使用率係相對較低嘅，但係呢個唔係一個我哋應該關鍵去考慮嘅因素，當我哋去考慮就應唔應該喺現有巴士裏面加裝安全帶，因為我哋認為無論係政府或者係巴士公司，應該係做多啲乘客教育嘅。

主席：（經傳譯員）我哋 Mr Samuel Cheng 先生，城巴嘅董事總經理，佢喺作供嘅時候，佢就話佢係--佢自己都成日搭巴士，但係安全帶係啲人係唔多用嘅，你覺得呢個係咪一個公道嘅講法呢？就係冇人用或者係一個使用率係好低。

陳美寶女士：（經傳譯員）我有知道佢嘅證供係咁嘅，但係其他嘅巴士公司或者佢哋嘅員工，佢哋個個講法係唔一樣嘅。

主席：（經傳譯員）佢話佢成日都搭巴士嘅。

陳美寶女士：（經傳譯員）主席，我係接受佢嘅證供，但係我自己都成日搭巴士嘅。

主席：（經傳譯員）但係你有冇發現啲人係就會配戴安全帶呢？

陳美寶女士：（經傳譯員）我自己會戴嘅。

主席：（經傳譯員）其他呢，其他人呢？你自己之外。

陳美寶女士：（經傳譯員）其實其他有啲人鍾意喺啲冇遮擋嘅座位嗰度坐，譬如話上層嘅頭一排，我自己個人嘅經驗，我就見到啲人係有用--有配戴安全帶。

主席：（經傳譯員）其實如果我哋叫巴士公司用閉路電視睇下啲人有冇用安全帶，其實會唔會好簡單？譬如特別係呢一個上層嘅乘客。

陳美寶女士：（經傳譯員）呢個係一個好嘅建議嚟嘅。如果我哋安裝閉路電視，其實而家已經有百分之八十嘅巴士就有閉路電視，有啲就喺上層安裝嘅，我覺得你呢個建議係好嘅。

主席：（經傳譯員）你計唔計劃會強制--如果有啲人--有啲巴士已經安裝咗安全帶，強制啲乘客一定要配戴呢？

陳美寶女士：（經傳譯員）呢個正正係我想係提出嘅一點，我係同意專家嘅觀察，我哋係需要有一個嚴謹嘅規管影響研究，先至決定係咪應該係強制啲人一定係要配戴安全帶。

主席：（經傳譯員）你有冇考慮過如果係要強制乘客配戴安全帶係會有咩嘢困難呢？我哋上高冇其他嘅人手，只係有個車長喺度，會唔會真係有困難呢？如果有個強制嘅要求。

陳美寶女士：（經傳譯員）我唔會低估嗰個困難嘅，特別係實際喺營運嘅當中，特別係話點樣去執法，我哋肯定會考慮呢一點嘅，如果我哋特別去係審視喺所有巴士裏面安裝安全帶嘅時候。唔該晒。

歐陽先生：（經傳譯員）關於教育嗰方面呢？

主席：（經傳譯員）歐陽先生，係。

歐陽先生：（經傳譯員）呢一個運輸署有冇方法點樣去更加去教育乘客同埋鼓勵佢哋去做安全帶？

陳美寶女士：（經傳譯員）其實呢個我哋可以做得更多嘅，我哋希望有個乘客嘅宣傳運動，亦都係會有唔同嘅主題，關於佢哋嘅態度、佢哋嘅責任，特別佢哋喺公交嘅時候、坐車嘅時候佢哋應該點樣做，關於安全帶點樣使用，如果真係有安全帶嘅時候，佢哋應該使用。呢個肯定我哋係需要做多啲宣傳嘅。唔該。

陳政龍先生：（經傳譯員）如果係一個強制嘅要求，如果真係有已經安裝咗安全帶，強制要求佢哋配戴，呢個會唔會成為你哋嘅工作其中一個部分呢？你曾經喺呢個小巴做過嘅，你可唔可以睇下啲經驗係點？

陳美寶女士：（經傳譯員）係有幫助嘅，但係嗰個執法同埋個影響都要考慮嘅。我哋係要執法嘅，同埋個巴士公司係應該去落實嘅，如果真係要成為呢個強制規定嘅時候，我哋係要考慮呢啲。

陳政龍先生：（經傳譯員）我哋之前又睇過一啲嘅證供，我就唔哋，你可唔可以話畀我聽其實喺香港嘅法例嚟講，喺小巴裏面強制啲乘客去戴安全帶係咪有強制嘅規定㗎？

陳美寶女士：（經傳譯員）係嘅，係嘅。我哋可以係去搵番啲資料。

主席：（經傳譯員）其實我哋都有呢啲資料，我哋都聽過一啲證供嘅。總警司 Baker 先生，你就話畀我哋聽其實你都--如果專營巴士要--即係你即係個使用率係非常之低，喺公共小巴裏面嘅使用率都係好低，其實喺執法嚟，都係好難嘅，可能係分--即係某一個時期特別去執法咁樣。

Transcript by Epiq Hong Kong, Limited

陳美寶女士：（經傳譯員）我想補充，我知道佢嗰個證供嘅，其實呢個永遠都係一個雞同雞蛋嘅問題，如果我哋要考慮任何嘅安全裝置，我哋係令到佢係一個強制性嘅措施，如果我哋係要將呢個建議提交立法會嘅時候，政府一直嘅做法就係會係將我哋嘅影響嘅評估嘅資料都係提交畀立法會嘅，喺立法之前，我哋好多時候都係需要提交一啲嘅數字、數據去支持我哋嘅建議。

另外一點，我哋嘅立法會議員都會問，就係究竟執法係咪可行呢？但係一旦立法，就係運輸署或者其他嘅執法部門就會盡我哋嘅努力去確保嗰啲立法嘅、嗰啲法例嘅規定係真係可以盡力去落實嘅。唔該晒。

主席：（經傳譯員）你之前講過，如果我冇記錯，如果配戴係要一個強制嘅規定，可能係需要巴士公司去執法，係咪去落實佢呢？

陳美寶女士：（經傳譯員）開始嘅時候，巴士車長就會係乘客嘅第一個嘅接觸點，就係話畀巴士乘客聽相關嘅資料，如果已經係立法喇，永遠都係嗰啲執法機構嘅責任去執法嘅，如果佢哋係收到投訴又或者佢哋係知道有違法嘅情況，佢哋嘅責任係去執法嘅。

主席：（經傳譯員）點解我提出呢一點呢？因為巴士公司嘅證供話畀我哋聽，其實佢哋真係做唔到，只係有一個巴士司機，有好多嘅乘客喺巴士上面，亦都係巴士有兩層。

陳美寶女士：（經傳譯員）主席，我哋知道，亦都明白巴士車長嘅困難同埋佢嘅壓力，如果我哋真係要強制咁樣做，我哋要確保個法例寫到一個地步，其實呢個條例係可以執行到嘅。同樣，我哋可能亦都係要令到巴士嘅營運者就係確保嗰啲安全帶就係會被乘客去配戴嘅。閉路電視同埋宣傳計劃都可以考慮嘅，但係喺呢一個階段，我哋唔會掉以輕心，其實而家我哋都未係話可以好快令到呢一個係強制性嘅，所以我哋係好謹慎進行。

主席：（經傳譯員）好，陳律師。

陳政龍先生：（經傳譯員）好，我而家講下一個嘅課題，就係巴士意外嘅數據。首先，我要處理一下現時嘅狀況先嘅，我哋睇咗嗰啲係所謂 FPP，即係前瞻性策劃嘅計劃嘅關於巴士安全嗰啲嘅部分，我唔會再講，但係嗰度係有好多關於巴士意外嘅數據喺嗰個部分嘅，我亦都聽到警方嘅證供，就係話警方係並不能接觸到巴士安全報告裏面嘅一啲數據嘅。主席，警方嘅證供就係第 17 日，第 19 頁嘅，我唔會真係要詳細讀出嚟。

主席：（經傳譯員）呢個係總警司 Baker 嘅證供。

黃女士：（經傳譯員）陳女士，我個問題係咁嘅，喺公眾得到呢一啲數據之前，即係話你未將呢一啲數據交畀委員會，因此公眾得到呢啲數據之前，請問呢一啲嘅分析數據有冇向大眾公布過呢？

陳美寶女士：（經傳譯員）我會答先，然後我會請我嘅同事補充嘅。基於我自己嘅知

識同埋記憶，我哋係有叫專營巴士公司進一步披露佢哋嘅意外嘅數據，我哋就係請佢哋每年咁樣做。

主席：（經傳譯員）你係幾時作出呢個要求呢？

陳美寶女士：（經傳譯員）等我哋查核一下先。可能我哋只能夠講嗰一個年份，我哋係將佢作為一個續牌嘅要求。根據我嘅同事所講，就已經好多年㗎喇。

主席：（經傳譯員）即係呢一個係續牌嘅要求嚟嘅？

陳美寶女士：（經傳譯員）係呀。

陳政龍先生：（經傳譯員）你意思係將嗰個數據交畀運輸署？但係我頭先個問題係講話要向公眾披露有關嘅數據喎。

陳美寶女士：（經傳譯員）或者我詳細講一下，或者--有喇，係咪呀？而家喺屏幕上面係有新巴 2017 年話佢更全面披露嘅一份文件，或者我哋睇關於個頁底嗰個部分，再繼續向下，第 13 項。呢個唔係我真係想舉嘅例子，或者我遲啲再畀城巴 2017 更全面披露嘅一份文件畀大家，我遲啲畀一個頁碼大家。

主席：（經傳譯員）其實喺我哋嗰啲聆訊文件裏面有嘅，喺邊度呢？

陳政龍先生：（經傳譯員）畀少少時間我哋搵一搵。文件喺 TD-3 第 906 頁，陳女士，你係咪想搵呢份文件？

陳美寶女士：（經傳譯員）係。

主席：（經傳譯員）係邊一頁呢？如果你有原本嗰份文件嗰個內部嘅頁碼係幾多呢？

陳政龍先生：（經傳譯員）喺左上同左右都有一啲嘅文件嘅編頁嘅。

陳美寶女士：（經傳譯員）但係喺底部我哋係睇到 909 呢一頁。我想講嘅就係巴士營辦商喺佢哋更全面披露呢一種嘅報告裏面就係會將意外嘅數據公布畀公眾嘅，但係我都要指出嗰啲數據嘅描述未必係可以去到比較深嘅層次嘅，因為如果個情況係需要嘅話，我哋係會請佢哋更加詳細咁樣去分析，講出個意外嘅原因，但係呢一啲咁樣嘅就係意外嘅數據，就係我哋要求佢哋喺全面披露報告裏面公布畀公眾嘅。

主席：（經傳譯員）你係咪睇緊第 13 段呀？

陳美寶女士：（經傳譯員）係，第 13 項。

主席：（經傳譯員）你有冇網上睇倫敦方面嗰個意外數據嘅報告呀？

陳美寶女士：I have. It's more...

主席：（經傳譯員）你有冇見到佢哋其實每季都提供一啲粗略嘅數字，香港點解唔可以咁做呢？

陳美寶女士：（經傳譯員）主席，之前嗰啲前瞻性嘅策劃報告，即係我哋喺 5 月嘅時候提交畀委員會嗰啲，我個人認為有好多嘅範疇其實都可以改善嘅，即係喺 2019 同埋 2023 年嘅時候，我哋再做呢一啲遠期計劃嘅時候，就好似我哋提議過，會請佢哋係進一步做多啲分析嘅，肯定我哋係可以進一步要求巴士營辦商以更詳細嘅方式將意外嘅數據係公布畀公眾人士嘅。

主席：（經傳譯員）有冇咩嘢嘅原因係我哋喺呢啲遠期計劃裏面睇到嘅意外數據點解唔可以全面披露畀公眾呢？有冇咩嘢理由嘅呢？

陳美寶女士：（經傳譯員）好明顯，我哋仲未同巴士營辦商詳細去傾，就係話呢一類咁樣嘅安全數據可唔可以全面披露，我只係想指出...

主席：（經傳譯員）你諗唔諗到啲咩嘢原因呀？點解唔可以全面披露？呢啲唔係商業性嘅敏感資料嚟嘅。

陳美寶女士：（經傳譯員）一般嚟講，唔會話有即時嘅商業敏感性，...

主席：（經傳譯員）唔緊要，你要多啲時間諗，你可以諗嘅，但係我自己就覺得好簡單啫，應該唔會有咩嘢商業嘅敏感性而因此係唔可以向公眾披露。

陳美寶女士：（經傳譯員）我只係想強調一點，當我哋請專營巴士營辦商提供多啲嘅資料去做遠期計劃，而唔係因為要全面披露嘅理由，我哋仲未係去叫巴士營辦商去分析每一條巴士路線嘅意外原因嘅，即係我哋冇具體咁樣要求。我唔係話呢樣嘢會有商業敏感性，但係我哋都要明白如果呢一個巴士安全嘅章節都要變成全面披露嘅資料嘅話，我哋都要由商業敏感性呢一個角度去考慮佢。

主席：（經傳譯員）你又諗到啲乜嘢嘅商業敏感性嘅角度呢？我而家就邀請你咁做，有啲乜嘢係會有商業敏感性嘅呢？呢個只係講巴士安全嘅章節啫。

陳美寶女士：（經傳譯員）我只係理論上咁樣去思考一下啫而家，主席，因為巴士公司都需要詳細講出一啲嘅計劃去加強巴士安全同埋佢哋會採取咩嘢措施，巴士嘅營辦商有可能對於某啲具體嘅措施係講明需要用幾多錢同埋會講實施某一個具體措施，喺未來五年嗰個時間性嘅，即係亦都會講到佢哋成間公司喺呢一方面要做幾多投資嘅。

主席：（經傳譯員）你意思係巴士安全嗰個章節？

陳美寶女士：Yes.

主席：（經傳譯員）如果係咁，或者陳律師，一陣間你可以帶我哋去睇嗰個章節，去睇下係咪有咁嘅情況。我一般嘅問題就係話究竟係咪真係喺呢一啲數據裏面有任何嘅商業敏感性？我就要問呢個問題。陳律師，請你一陣間返嚟處理呢個問題。

陳政龍先生：（經傳譯員）好呀，我喺食晏之後會處理呢一點。

主席：（經傳譯員）當我哋講緊呢一個題目嘅時候，我想問下有冇咩嘢嘅理由，點解呢一個巴士安全嘅章節亦都唔可以披露畀警方呢？因為警方就話如果收到，佢哋會好高興，點解連警方都收唔到呢？

陳美寶女士：（經傳譯員）主席，我就睇唔到有咩嘢嘅困難嘅，如果要提供呢一啲數據同警方分享嘅話，應該冇咩嘢困難嘅，呢樣嘢我哋係可以考慮嘅。

主席：（經傳譯員）即係你只可以考慮，你唔可以話一定得呀？

陳美寶女士：（經傳譯員）我諗喺而家我哋可以講嘅只係話考慮。

主席：（經傳譯員）即係你係可以同佢哋討論，係咪？

陳美寶女士：（經傳譯員）係。

主席：（經傳譯員）唔該。

陳美寶女士：（經傳譯員）或者我想講，因為呢一個巴士安全嘅章節係以遠期計劃嘅其中一部分交畀運輸署嘅，除咗係畀好多詳細嘅分析之外，其實有一個目標就係要讓巴士營辦商話畀政府聽佢哋喺遠期計劃裏面有啲乜嘢嘅投資、佢哋嘅策劃等，所以喺呢一方面，我要小心啲，我喺呢一方面，我唔能夠為政府承諾任何一個章節會有咩嘢具體嘅披露嘅，好似我剛才回答主席，呢一個巴士安全嘅章節如果要同警方去分享，我哋只能夠話我哋可以考慮。

主席：（經傳譯員）我咁樣講啱唔啱呢？陳律師，我記得 Weston 先生就建議，就話有關嘅數據要向公眾披露。

陳政龍先生：（經傳譯員）係嘅，啱嘅。

主席：（經傳譯員）或者喺食晏之後，你亦都可以返嚟講番呢一點。

陳政龍先生：（經傳譯員）係，之後我哋會講有關嘅建議嘅。好，而家我哋再集中睇一睇現時嘅情況，然後睇下將來嘅情況可以係點樣。喺星期四嘅聆訊當中，運輸署喺聆訊當中提供咗一份文件，就係話交通意外嘅成因嘅，就係喺右手面上角就寫住“E”嘅附件嘅。

照我所知，呢一份文件仲未納入我哋嘅聆訊文件冊當中嘅。主席，而家都喺屏幕上面，請問你有冇自己一份呢，主席？而家向大家派發一個副本嘅。

我講一講個背景先，呢一份文件係一封信裏面嘅一部分，就係運輸署畀九巴嘅一封信件，係 2018 年 5 月 21 號嘅，就係請九巴提出佢哋對意外嘅分析嘅，為咗謄本嘅利益，呢一個嘅謄本嘅頁碼就係 TD-5 1728 頁。我個問題好簡單，咁樣嘅一個表有冇向公眾披露過呢，係好有系統、好定期咁樣，以一個咁樣嘅表列嘅公眾公布過呢一啲嘅資料呢？

陳美寶女士：（經傳譯員）冇。

陳政龍先生：（經傳譯員）我要對你公道嘅，我知道運輸署係有發布--即係喺網上，每年發布道路交通意外嘅一啲資料，個資料亦都包括專營巴士嘅，我只不過係想問下有冇好似咁詳細咁樣公布呢？

陳美寶女士：（經傳譯員）冇嘅，冇咁詳細咁樣公布。

陳政龍先生：（經傳譯員）陳女士，我哋未講個建議同埋將來嘅情況可以點之前，首先，我想確立一下呢一啲意外嘅數字，由專營巴士營辦商交畀運輸署...

主席：（經傳譯員）你未講呢一點之前，我想睇番E附件呢一度，我哋聽到有好多嘅意外，其實都係關乎到啲人係喺巴士上面失去平衡嘅，呢一度有啲乜嘢係巴士車長嘅駕駛態度係同呢一度有關--呢一樣嘢有關嘅呢？請你睇一睇呢個表。

我咁樣問係因為當我睇到話係好疏忽咁樣開動或者係剎車，同埋係好重咁樣剎車或者係突然間好快咁加速，似乎嗰啲事件嘅數字係好細嘅，究竟係有啲乜嘢嘅原因係令到巴士乘客失去平衡呢？

陳英傑先生：（經傳譯員）主席，講番呢一個表，我想逐一項咁樣講，...

主席：（經傳譯員）你等一等。你講咗啲比較重要嘅先，然後由最重講到最唔重要。

陳英傑先生：（經傳譯員）我會覺得係停車或者開動架車係疏忽嘅。

主席：（經傳譯員）點解得咁少事件呢？

陳英傑先生：（經傳譯員）我相信佢哋有可能係防止碰撞，個車長可能會好快咁樣剎車嘅，即係可能係要防止同其他嘅車輛碰撞，就會令到乘客係失去平衡嘅；同埋係好疏忽咁樣爬頭、轉線，亦都會令到乘客失去平衡；開得太快，有可能，但係如果佢係一路都係揸得太快...

主席：（經傳譯員）咁就冇問題喎，其實個問題就係佢係要改變個速度先至會令人失去平衡，或者係突然間扭軚。

陳英傑先生：（經傳譯員）所以呢個揸得太快應該唔係嘅。如果係掉頭，...

主席：（經傳譯員）巴士都唔需要掉頭，係咪呀？

陳英傑先生：（經傳譯員）冇錯嘅，唔係好多時巴士需要掉頭。但係一般嚟講，我哋嘅路線係會畀我哋測試過嘅，但係如果佢哋真係需要掉頭嘅話，我哋係會請佢哋小心謹慎嘅。但係掉頭有可能嘅，因為佢轉嘅方向，一路轉嘅時候有唔同嘅車速，就會令到乘客失去平衡。再睇落去，「冇留意交通訊號／交通燈」，應該唔會嘅。

主席：（經傳譯員）不如你話有關係嗰啲，好唔好？

陳英傑先生：（經傳譯員）「不專注駕駛」應該可能會係，「不能控制車輛」可能係，「巴士車長突然間生病」...

主席：（經傳譯員）呢一啲咁嘅數字唔係好幫到我哋嘅。等我哋再問過呢個問題，因為而家就話巴士乘客會失去平衡，我就想知道係有啲咩理由，喺邊度可以搵到呢啲資料？

陳英傑先生：（經傳譯員）或者我哋可以做多啲分析，我諗我哋係有意外一啲後果嘅，譬如車上有冇乘客失平衡受傷。

主席：（經傳譯員）用呢個做例子。

陳英傑先生：（經傳譯員）我哋可以根據呢個情況，做多啲分析。

主席：（經傳譯員）如果有人係喺車上失平衡，受傷，可能撞到車上嘅硬物受傷，巴士公司會唔會分析番意外成因呢？呢個係最易嘅方法嚟嘅，係咪因為有小朋友突然過馬路要急剎吖，定係架車突然轉線吖，會唔會去睇下係咪咁嘅情況呢？或者佢個巴士站係要埋站嘅時候佢係急劇剎掣咁樣，有冇做咁樣嘅分析呢？

陳英傑先生：（經傳譯員）我理解巴士公司有調查。

主席：（經傳譯員）調查之後嘅數據會唔會畀結果你睇，睇下意外成因？

陳英傑先生：（經傳譯員）我哋冇收到呢個資料，唔係每一宗意外都有，但係一啲特定嘅事故或者意外，我哋有要求佢哋調查更多詳情嘅話，佢哋係會提交嘅。

主席：（經傳譯員）我唔係問緊你有冇數據，但係你都可以整理資料，譬如話喺巴士上，我哋有二百個乘客受傷係因為司機嘅問題嘅，譬如話係加速太快或者係急劇減速。

陳美寶女士：（經傳譯員）主席，我嘗試協助，呢一方面我同事而家搵番有關嘅資料先，我就記得過去，譬如 2006、07 年，喺佢哋嘅分析，喺意外當中，任何巴士公司，即係分析乘客失衡嘅時候受傷，亦都有係睇下有幾多宗咁嘅事故，要求佢哋調查嘅，其中一件事--其中一個原因就係話喺樓梯嗰度缺乏扶手，同埋喺下層缺乏扶手，係因為做完呢個分析之後，我哋就要求巴士公司加裝車廂嘅儀器去處理呢個因素，即係話有乘客喺上層由巴士樓梯碌落嚟，碌咗去下層。

主席：（經傳譯員）係邊一年份呀？你要求呢一個數據，嚟提供數據。

陳美寶女士：（經傳譯員）我同事而家喺度搵緊。應該係我哋之前一份意見書，提交咗㗎喇。

主席：（經傳譯員）唔使趕，因為而家已經午膳時間，或者喺午飯之後繼續，而家午飯休息，下晝兩點半繼續，唔該。

<u>下午 1 時 03 分聆訊押後</u>

下午2時32分恢復聆訊

出席人士如前。

主席：（經傳譯員）午安。陳律師。

陳政龍先生：（經傳譯員）主席，午飯時間，陳女士同我係要幫委員會查番一啲資料嘅，我而家逐樣講番，第一個參考嘅資料委員會有興趣知嘅就係 Weston 先生同埋 Stanley 教授喺呢個巴士遠期計劃入面關於增加巴士安全嘅管理嘅事項嘅意見。

而家先睇番 Stanley 教授嘅意見，喺專家文件冊嘅第 67 頁，即係喺第二份報告入面嘅第 67 頁。等我讀出嚟。

「呢一個遠期計劃嘅文件就係保密文件嚟嘅，係巴士公司同埋運輸署之間嘅保密文件，作者相信入面嘅數據同埋分析係作為營運商工作一個重要嘅部分去顯示佢哋係有能力提供恰當有效嘅服務，而同呢啲服務有關嘅主要傷亡都係行人嘅，令到佢哋嘅社會或者係外在成本係增加嘅。喺呢份報告嘅第 4 段就係話呢啲嘅營運商要確保佢哋提供恰當有效嘅服務，就喺表現方面會受到壓力嘅。而佢哋安全表現係要公開嘅話，可以令到佢哋持續地受到呢一種表現嘅壓力。亦都有一啲嘅說法，認為喺呢個遠期計劃入面嘅巴士安全嘅章節係應該公開嘅，係考慮到呢啲意外嘅更廣泛嘅社會嘅成本。」

另一方面，Stanley 教授嘅證供就係喺 9 月 15 號 2018 年第 178 頁嘅，佢有嚟到委員會度作證。

主席：（經傳譯員）繼續。

陳政龍先生：（經傳譯員）可以睇番第 3 行，第 3 行就我問咗一個問題，我問 Stanley 教授「你喺你嘅專家報告第 69 頁提出一個論點，第 69 頁嘅第一點就係話『有啲有力嘅論點就係對於五年遠期計劃巴士安全嘅章節係應該發布嘅，係因為意外比較廣泛嘅社會成本。』」

跟住 Stanley 教授就話「係嘅，陳先生，我覺得係關於巴士安全章節嘅某啲部分嘅討論係好有資料性嘅，呢啲為咗公眾起見，係應該畀公眾參考，譬如舉個例，喺駕駛嘅分析同埋點樣影響意外表現，我諗係有關連，呢個關連係重要嘅。」

「係，我覺得應該係有啲比較，譬如係話你駕駛嘅時數、司機嘅年齡喇咁？」

「冇錯，係譬如係入職年期同埋喺意外之前嘅駕駛嘅鐘數同埋意外率，我覺得應該而家係只係畀少數人知道，我就覺得喺公眾嘅利益起見係好重要嘅，係令到大家可以做一啲好好嘅研究，就可以知道喺安全嗰方面大家面對咩挑

戰，亦都係令大眾有信心業界係嘗試去解決問題嘅。」

然後到180頁嘅時候，Stanley教授喺同一個題目，就係回應番Weston先生嘅專家嘅意見，我而家可以請大家睇下第180頁第16行，我就咁樣問嘅，「係，Weston先生都講咗一個類似嘅講法嘅，即係話呢啲數據要有透明度，我可唔可以而家請你睇下專家文件冊嘅153頁，我就可以讀畀你聽」。

然後第25行，「84段，標題係安全數據嘅透明度同埋表現，然後我就讀出嚟。」

主席，跟住就係講番Weston先生嘅證供嘅部分，然後亦都可以再處理Stanley教授點樣回應嘅，由第2段，第181頁開始。

「由倫敦嘅經驗，好清楚關於巴士網絡安全表現嘅數據要有更高嘅透明度係會令到持份者同埋公眾更加能夠去監察，亦都可以畀運輸當局同埋外判嘅巴士營運商係更加聚焦喺安全嘅問題，其中一個公開事件嘅數據係會帶嚟問責性嘅，應該考慮到喺香港嘅專營巴士網絡安全數據方面應該係公開。教授，你同唔同意或者你喺呢一方面有咩嘢觀察？」

Stanley教授就話「我完全同意嘅，陳律師，對於係倫敦當局同埋運輸局，就係一般嚟講，我個意見就係佢哋係獲得大量嘅數據同埋資料，而佢哋整體嚟講，係唔會隱瞞任何嘢嘅，佢哋就咁將佢係公開，而且就顯示係有啲乜嘢挑戰，我亦都覺得好有信心嘅，對於呢一個做法，我好支持嘅。」呢個就係Stanley教授嘅意見。

主席：（經傳譯員）你可唔可以提供番Weston先生佢嘅證供，即係喺邊一日嘅證供，同第幾頁呢？

陳政龍先生：（經傳譯員）我讀出嚟嘅就係Weston先生嗰份報告。

主席：（經傳譯員）係喺邊度？

陳政龍先生：（經傳譯員）專家文件冊第153頁，即係話嗰份報告嘅第39頁，標題係「安全數據透明度及表現」，呢個係第8.4段。

主席：（經傳譯員）好，多謝你協助。

陳政龍先生：（經傳譯員）呢個希望處理到第一個問題。第二、第三個問題...

主席：（經傳譯員）或者畀個機會陳先生你可以回應番--如果你覺得而家仲未係時候，你就出聲，但係呢個機會可以畀你回應下喺呢一個巴士安全嘅章節，就話呢一個--就提出話呢啲資料應該係喺商業上都係有敏感度。

陳美寶女士：（經傳譯員）我睇過以前嘅遠期計劃嘅安全嘅章節，我就覺得似乎冇一個好重要嘅資料係可能牽涉公司一啲嘅商業敏感資料嘅。我就想補充，開放數據嘅政策或者個方法，香港政府同埋運輸署都係倡議嘅，我同意係要數據有更

高透明度，尤其係同安全有關，牽涉公眾，而家嘅方向或者我哋做法就係運輸署會同巴士公司繼續商量。

主席：（經傳譯員）你覺得幾時先可以就呢一個議題有啲決定呢？

陳美寶女士：（經傳譯員）正如我之前喺聆訊嗰度講過我哋嘅小組會繼續係探索呢個議題嘅，同一時間，我哋都同專營巴士公司商量，睇下呢一個遠期計劃嘅巴士安全章節入面嘅細節，呢個問題我哋都會同巴士公司喺未來幾個月傾嘅。

主席：（經傳譯員）可唔可以喺今年年底前有個決定呢？

陳美寶女士：（經傳譯員）我呢個階段唔可以承諾，我哋會盡力嘅，唔該晒主席。

主席：（經傳譯員）陳律師。

陳政龍先生：（經傳譯員）陳女士，我頭先讀咗啲證供出嚟，提到喺倫敦，數據係公開嘅，正如 Stanley 教授講，就係話喺倫敦嘅交通當局都係話佢哋喺公開數據方面差唔多係同儕之間首屈一指嘅，而倫敦呢個方法，我就陣間會再講下嘅，睇下我哋點樣可以從倫敦嗰度學習或者應唔應該採取佢哋嘅方法。

但係關於巴士安全章節，我仲有一個問題要講嘅，呢個係喺午飯前，我哋嘅證供嗰度係引出嘅一個問題，就係喺報告巴士安全章節嘅講及意外原因，譬如話係乘客失去平衡，同埋係佢哋失平衡嘅原因。

主席，喺我搵到嘅就係起碼有兩年嘅報告入面嘅巴士安全嘅章節都有提到嘅，我而家可以逐一講下。第一，係九巴嘅巴士安全章節，即係話喺九巴 2017 年至 2021 章嘅五年遠期計劃嘅巴士安全章節，呢個係文件冊嘅 5320 頁。

陳女士，喺你面 5320 頁就係一個九巴 2017 年至 2021 嘅五年遠期計劃，通常喺 2016 年嘅年中或者第三季就會提交畀運輸署嘅？

陳美寶女士：（經傳譯員）冇錯。

陳政龍先生：（經傳譯員）關於乘客失去平衡同埋原因，我舉呢個例子，而家請你睇下...

主席：（經傳譯員）請等等。呢個計劃係咪 6 月 30 號前要交畀運輸署呀？

陳美寶女士：（經傳譯員）係。

主席：（經傳譯員）運輸署就要同公司解決當中任何嘅問題，要喺 9 月 30 號前完成嘅？

陳美寶女士：（經傳譯員）冇錯。

主席：（經傳譯員）如果睇番 5324，我想睇嘅係 8.2.7，呢個係講緊意外嘅性質，跟住就係有一連串嘅分析，就係呢一段就尤其同我哋講嘅例子有關嘅，即係我

哋午飯之前你證供提到嘅。

8.2.7段就係話「係百分之五十二點四，即係話意外嘅大部分都係因為乘客喺車廂內失去平衡，呢啲個案超過一半係因為交通情況巴士剎掣導致嘅，而因為有意外導致受傷嘅係因為唔同嘅情況嘅碰撞，就百分之三十六點五，而係對行人造成傷害嘅意外就係所有意外中嘅百分之四點三。」

即係話巴士公司嘗試解釋導致到乘客失去平衡嘅意外嘅大部分嘅成因，呢個係咪就係你喺午飯之前提及呢一點嗰時想講有關嘅證供呀？

陳美寶女士：（經傳譯員）關於同喺意外時乘客失去平衡，我嘅觀察同埋其後嘅分析，會採取咩嘢行動，即係話都係關於乘客失去平衡喇，我想喺午飯前講番嘅，就係話作為一個恆常嘅工作，可以話我哋一直都有關注乘客喺車廂內失去平衡嘅。

喺2013年嘅專營巴士專營權續期嘅時候，亦都有一個嘅交換承諾嘅信件，喺我哋同巴士公司傾完同埋係意外嘅性質，包括係乘客失去平衡嘅問題，之後我哋有要求巴士公司喺樓梯嗰度係要加裝雙排嘅扶手嘅，呢個係針對特定嘅事件，即係話有乘客喺上層樓梯碌落嚟，呢個我哋係特別關注嘅。

2016年遠期計劃亦都有指出意外大部分同乘客喺巴士車廂失去平衡有關嘅，即係話呢樣嘢運輸署同九巴一直都好關注嘅，我哋亦都有致力睇下點樣解決。

陳政龍先生：（經傳譯員）陳女士，我想同你跟進一點，運輸署係點樣監察急剎嘅問題，你都會呢個係你關注...

主席：（經傳譯員）你問之前，或者你坐喺旁邊嘅助手都可以搵番喺專營權續期嘅時候增加呢一個雙排扶手嘅要求。

陳政龍先生：（經傳譯員）係，可以嘅。

主席：（經傳譯員）你唔需要立即搵嘅，你可以而家同事由佢哋做。陳律師。

陳政龍先生：（經傳譯員）我講急剎之前，我提到2017年至2021年嘅五年遠期計劃，我講番類似一段，喺2018年至2022年嘅遠期計劃入面都有嘅。

主席：（經傳譯員）即係都係九巴？

陳政龍先生：（經傳譯員）冇錯。TD-1 180，呢個就係個報告開始嗰頁，然後183頁你就會搵到類似嘅段落，第8.2.7段...

主席：（經傳譯員）其實啲數字唔同，但係嗰個用字都係一樣。

陳政龍先生：（經傳譯員）係。

主席：（經傳譯員）大部分嘅意外，百分之五十一點五，之前就係百分之五十二點

四，「多過一半就係因為有巴士剎車嘅問題嘅。」

陳政龍先生：（經傳譯員）係。

主席：（經傳譯員）唔該，唔該晒。

陳政龍先生：（經傳譯員）陳女士，你而家喺度搵緊啲嘢，係咪呀？

陳美寶女士：（經傳譯員）我就嘗試就睇下個文件，就係關於喺樓梯嘅雙層扶手，我哋係寫封信畀九巴...

主席：（經傳譯員）可能我哋遲少少，有機會先至再睇，我哋或者而家唔好分心做呢樣嘢，我相信你隔籬嗰個可以幫到你嘅。

陳大律師，我哋就頭先睇到個分析，呢個嘅意外數據，有冇睇到喺邊度講到關於嗰個意外嘅責任係點樣？我認為，一百宗之中就係百分之五十就係啲乘客有關，而百分之二十五就係同我哋巴士車長有關。

陳政龍先生：（經傳譯員）呢個係睇巴士安全章節有關，就係2019-2020年，就係2018年8月提交嘅報告嚟嘅，我哋就係將佢嗰個百分比寫咗出嚟嘅。

主席：Whilst we are dealing with this topic, could we have a look at that? What is the reference to that?

陳美寶女士：（經傳譯員）第5325頁嘅第8.2.10段，就係正正係講，就係「呢個係兩年之間究竟邊個負責任，百分之七十九其實嗰啲巴士車長都唔需要負責嘅，其他大概百分之一就係等緊警方去進一步行動嘅。」

主席：（經傳譯員）呢個係邊一個文件冊㗎，係咪KMB-12文件冊呢？

陳政龍先生：（經傳譯員）係，下一頁嘅。

主席：（經傳譯員）係。

陳政龍先生：（經傳譯員）我哋仍然係2017年嗰個報告--2017年嘅遠期計劃。

主席：（經傳譯員）可能喺其他地方都有重複到，但係呢度講到就係巴士車長係要為百分之二十五嘅意外負責嘅。

陳政龍先生：（經傳譯員）主席，你講緊就係2018個遠期計劃，運輸署就係2018年5月就寫封信，就裏面有附件就有--我哋睇到就係頭先個表，就係...

主席：（經傳譯員）附件E嘅？

陳政龍先生：（經傳譯員）係，冇錯。就係講緊有啲乜嘢因素係因為個車長，有啲乜嘢唔係，然後我哋就請呢個九巴再細分啲數字，之後又有一個更詳盡嘅分析，就係喺2018年嘅巴士嘅安全個章節嗰度，係就係由2019至到2023年，我哋就有更加詳細嘅資料嘅，就有一啲關於巴士車長有關、巴士車長冇關。

主席：Where is the 2019 five-year plan?

陳政龍先生：（經傳譯員）呢個係同一個文件冊，係第 5011 頁嘅，2019 年嘅五年計劃嘅，講緊。譬如呢度有個例子...

主席：（經傳譯員）對唔住，等一等。

陳政龍先生：（經傳譯員）譬如好似喺 5016 頁，我哋睇到相同嘅標題，係「意外嘅性質」，我哋見到個仔細嘅分析，5020，我哋有另外新嘅圖表，就係話意外嘅原因，就關於係有巴士車長有關嘅原因或者因素，呢個巴士嘅性質嗰度，其實我哋就冇細分話究竟巴士車長使唔使負責嘅，但係呢一個嘅 8.2.3 嘅圖表嗰度我哋睇到有幾多係巴士車長要負責嘅，但係 2019 年之前嗰啲報告，我哋就冇一個咁樣嘅細分。

主席：（經傳譯員）係，唔該。陳女士，我可唔可以問你，我哋而家就睇緊啲九巴嘅數據，你知唔知佢哋點樣去收集同埋分析呢啲數據？佢哋點樣去決定邊個係需要負責或者邊個唔需要負責呢？

陳美寶女士：（經傳譯員）主席，對唔住，我諗我就冇答案。

主席：（經傳譯員）你哋有冇書信來往呢？你就叫佢哋提交啲數據，你有冇問佢「究竟你哋點樣去整合呢啲數據嘅呢？」你係咪你唔知，冇人問，定係點樣呢？

陳美寶女士：（經傳譯員）呢個係成個過程嘅一個部分，我哋同事會同佢哋討論，然後我哋就會攞到呢啲嘅分析資料，喺呢一刻，我就唔想畀一啲誤導性嘅答案畀你。

主席：（經傳譯員）但係有啲人一定知道其實呢啲數據係咪真，或者去嘗試去測試下啲數據呀咁樣，運輸署一定有人咁做㗎？

陳美寶女士：（經傳譯員）就我哋所知，關於係意外同車長有關嘅，嗰個負責任嗰樣嘢，好多時候嗰啲意外就係由警方去調查，佢哋就會話畀我哋聽究竟邊一啲意外係同巴士車長嘅缺失有關、有邊啲唔係。根據我哋嘅資料，巴士公司亦都會係將佢細分，就係嗰啲意外個原因係乜嘢嘢，就係會唔會有啲係同巴士車長嘅行為係點。

主席：（經傳譯員）如果個巴士車長佢係被起訴嘅時候，佢當然係負責，但係我話問你，就係話你有冇問佢哋點樣去整合同埋搜集呢啲數據、點樣去釐訂係呢啲數據呢？

陳美寶女士：（經傳譯員）對唔住，我真係冇呢啲嘅答案，因為同九巴傾嘅同事其實佢就冇喺度，或者其實我哋可以補充係話畀你聽究竟我哋點樣去測試呢啲嘅數字嘅，同九巴。

歐陽先生：（經傳譯員）或者另外一個嘅方法去問，就係話係咪運輸署畀呢啲嘅不同嘅項目畀佢哋係填嗰啲數字，係咪由運輸署釐訂一啲唔同嘅分目嘅呢？

陳美寶女士：（經傳譯員）主席，就我所知，我亦都問過同事，呢啲資料就係由公司自己編製嘅。

主席：（經傳譯員）呢啲分項係佢哋嘅分項嚟嘅？

陳美寶女士：（經傳譯員）係，冇錯，唔係我哋嘅分項嚟嘅。

主席：（經傳譯員）好坦白，你睇番呢啲數字，其實我哋就唔係好明，點解譬如話所有嘅數字之中，百分之二十五就係話因為一啲嘅乘客佢失去平衡咁樣，有冇人就話問下佢點解、呢啲係咩嘢數字嚟嘅呢？

或者你之後可以話畀我哋聽，解釋畀我聽運輸署採取啲咩嘢行動、有咩嘢角色就係去睇呢啲數字嘅？或者你同佢有書信來往，或者你係問佢問題，佢哋係有回答，係咪口頭問佢哋問題，或者佢係咩嘢日子、邊個去問等等，所以我哋知道就係有好嘅證據去話畀我哋聽我哋點樣去理解呢啲數字，可唔可以呀？

陳美寶女士：（經傳譯員）係，可以。唔該晒主席。

陳政龍先生：（經傳譯員）陳女士，我同你跟進一個問題，運輸署關於急劇剎車呢樣嘢係咪好關注，喺而家，你哋係點樣去監察呢個車長佢係急劇剎車㗎？如果你真係有監察嘅說話。

陳美寶女士：（經傳譯員）主席，等我--我而家同同事嘗試確定緊。根據我哋以前提交嘅證供，運輸署就係叫緊一啲嘅專營巴士公司係提交佢哋點樣去監察黑盒嘅數據，所以我哋嘅監察係基本上係基於佢哋提供畀我哋嘅資料，喺過去數個月，喺工作小組嘅討論嘅過程當中，我哋同專營巴士公司講過就係點樣可以改善黑盒嘅功能同埋功用，我哋亦都係更新咗一個最低嘅要求，就係關於黑盒嗰方面，我哋叫專營巴士公司就提供進一步嘅資料，就係關於黑盒喺日常之中嗰一啲嘅數據提供更加多，我哋就會特別監察到就譬如巴士車長佢哋嘅行為不當，譬如話佢哋急剎、突然之間停車等等。

主席：（經傳譯員）你仲要求咩嘢額外嘅資料呢，係關於個紀錄嗰方面？

陳美寶女士：（經傳譯員）主席，嗰個事件紀錄嗰方面就係黑盒嗰方面，關於個車速，突然之間加速，突然之間減速，唔同嘅公司其實有唔同嘅界限值嘅，就係講緊喺事件紀錄方面，或者就係實時係發出警告畀間公司咁樣。呢個我哋同巴士公司一直係做緊呢方面嘅工作，就希望能夠就佢哋嗰個事件紀錄能夠提供得更好。

主席：（經傳譯員）呢個最新嘅最低要求係8月先生效嘅，係咪？

陳美寶女士：（經傳譯員）係，冇錯。

主席：（經傳譯員）所以話呢個希望事件紀錄被提供更多嘅資料，呢個嘅要求其實就係之後先至提出嘅。

主席：（經傳譯員）幾時提出㗎，呢個要求？係咪喺書信嘅來往之中提出要求嘅呢？

陳美寶女士：（經傳譯員）我哋就係同城巴會面。我再從--嚟過。就關於我哋就同城巴就係 9 月 26 號見面嘅，就特別係關於呢個事件紀錄最新嘅要求，我哋就同九巴仲未見，但係我哋就同佢哋而家安排緊。

主席：（經傳譯員）運輸署嘅代表或者今日出席嘅人士其實有冇同佢哋傾嘅呢？

陳美寶女士：（經傳譯員）或者 Amy Tse，謝善怡女士。

主席：（經傳譯員）呢啲最近嘅資料係啲咩嘢？

謝善怡女士：（經傳譯員）我哋知道九巴就係釐訂緊一啲嘅車速嘅界限值同埋急劇加速同埋急劇減速嘅。我哋歡迎佢哋做呢一啲咁樣嘅計劃，我哋亦都係同呢一個城巴、北大嶼山巴士公司同埋新巴就睇下可唔可以就係釐訂一啲類似嘅界限值，就可以監察司機嘅行為。

主席：（經傳譯員）九巴而家佢哋最新嗰個界限值，譬如話急剎、急劇加速、急劇減速等等，嗰個界限值而家最新係點樣？

謝善怡女士：（經傳譯員）九巴同龍運急劇加速嘅界限值每秒鐘係超過 4 個公里，減速，每一秒係超過 7 個公里嘅。

主席：（經傳譯員）而嗰個車速呢？

謝善怡女士：（經傳譯員）係，車速。如果佢哋係每個小時 70 公里，佢哋就係超速。我哋明白到佢哋採用緊啲最新嘅科技係睇緊一啲嘅道路係計過係有 50 公里嘅車速嘅...

主席：（經傳譯員）呢個唔係最新嘅科技，其實呢個科技已經係有好多年㗎喇。或者你應該咁講，你就係用緊一啲以前一直已經存在嘅科技。

謝善怡女士：（經傳譯員）係，其他嘅道路如果係有 70 公里嘅車速嘅時候，佢哋都會睇嘅。

主席：（經傳譯員）你哋提出個要求之後，城巴點樣回應呢？

謝善怡女士：（經傳譯員）城巴、新巴佢哋嘅回答就係佢哋願意去睇一睇，但係佢哋就好關注就應該係點樣設一個點樣嘅界限值，特別係減速或者係加速嗰方面，因為意外好多時候都好複雜嘅，所以佢哋係需要同工會去傾一傾應唔應該係釐訂某個特定嘅界限值嘅。

主席：（經傳譯員）請你唔好繼續住，我想打岔一下。其實九巴已經定咗具體界限值，你而家係咪話佢哋係關心到九巴嗰個係嘅限值呢？

謝善怡女士：（經傳譯員）我哋知道九巴嘅資料之後，已經係畀咗新巴同城巴，佢哋就話願意去研究嘅。

主席：（經傳譯員）我明白，但係你話佢哋係關注到九巴已經定咗個限值，你意思係咪話佢哋質疑九巴定咗具體限值呢？

謝善怡女士：（經傳譯員）佢哋話需要研究一下，然後先至決定。

主席：（經傳譯員）係因為佢哋係有啲關注嗰個限值，係咪？我嘅理解啱唔啱？

謝善怡女士：（經傳譯員）啱嘅。

陳美寶女士：（經傳譯員）主席，我可唔可以繼續補充呢？

主席：（經傳譯員）可以。

陳美寶女士：（經傳譯員）我最近同城巴交談嘅時候--我都想補充一下謝小姐所講嘅，佢哋表達過話要研究一下，去睇下可唔可以喺城巴嗰度都實施同一個限值，城巴嘅管理層係考慮緊點樣去操作同埋去考慮使唔使採取一啲巴士車長不守規嘅時候嘅跟進行動，所以佢哋係考慮緊呢一個限值喺適用性方面嗰個操作方面嘅事情。

主席：（經傳譯員）陳律師。

陳政龍先生：（經傳譯員）你就提過九巴已經定咗呢啲限值，已經有喇，謝女士亦都講過係急剎車嘅時候嘅情況，運輸署知唔知道九巴去監察呢一個大力剎車嘅情況係咪就可以令到佢哋可以每一個意外都可以集中睇下係咪有急剎車嘅情形呢？

陳美寶女士：（經傳譯員）我哋所知嘅，就係佢哋定咗個限值去做監察嘅，因為黑盒嘅功能已經係可以產生呢一啲係超出限值或者係不合規嘅呢啲嘅報告，我哋知道九巴就可以用呢一個咁嘅功能幫助佢哋做呢個監察㗎喇。

主席：（經傳譯員）即係話照你理解，九巴就可以黑盒去產生一啲例外報告出嚟，如果有急剎車嘅情況？

陳美寶女士：（經傳譯員）係，新巴、城巴亦都可以用呢一啲黑盒嘅功能去印出一啲例外報告。

陳政龍先生：（經傳譯員）我想問下，係咪你嘅理解，就係我問緊運輸署嘅理解，呢一類嘅例外報告係咪都可以講出任何一個大力剎車嘅事情呢？

陳美寶女士：（經傳譯員）我唔可以代表專營巴士公司去答，但係黑盒嘅功能同埋佢嘅科技同埋呢一啲嘅例外報告，的而且確到好大程度上可以幫佢哋監察個巴士車長點樣剎車、點樣加速、減速，佢哋喺實際操作嘅時候都要考慮呢一點，去睇下個例外報告同埋有關嘅限值係咪可以好有效呢，幫助佢哋做監察。

陳政龍先生：（經傳譯員）我咁樣理解啱唔啱呢？就係講番呢一啲例外報告，運輸署其實就係留番畀專營巴士公司自己去判斷，係咪呢？咁樣係咪公道呢？

陳美寶女士：（經傳譯員）我諗而家嗰個程序仲係繼續緊嘅，但係我哋當然係好有興趣，我哋亦都覺得係有需要，同埋都係一個有效嘅方法，等我哋知道如果有咗呢啲例外報告之後係咪可以幫助我哋調查意外嘅原因，而係牽涉到乘客失衡嘅，我哋想知道係咪呢一個係其中一個促成意外嘅成因，因此黑盒同埋例外報告都係我哋想喺工作小組嗰度進一步跟進嘅事嚟嘅。

陳政龍先生：（經傳譯員）或者而家唔再講呢個大力剎車嘅問題，而家去番一個比較一般性嘅題目，就係關於巴士嘅意外數據。我哋聽到證供就話運輸署係同警方係分享呢個個案管理嘅系統嘅，然後運輸署就從呢一個資料庫嗰度攞啲資料去做自己嘅分析，因此運輸署其中一個資料嘅來源就係呢一個系統。

我想集中嘅就係講另外嗰方面嘅資料，就係專營巴士公司嘅意外數據，我哋知道由呢個巴士安全嗰個部分，即係遠期計劃裏面，巴士公司就會係提供自己嘅數據同埋分析，然後每年交畀運輸署。

好，而家將呢件事擺埋一邊先，亦都排除一啲比較大嘅事件，當然，有大嘅事件嘅時候，運輸署就要求巴士公司提供調查報告，就好似喺大埔嗰個意外咁樣。我就想問下，有冇其他嘅有制度性嘅定期嘅報告係巴士公司交畀你係講關於啲意外嘅事情嘅？

陳美寶女士：（經傳譯員）我而家查一查我嘅筆記先。

陳政龍先生：（經傳譯員）係喇，我唔係講遠期計劃裏面嗰個巴士安全章節同埋比較大嘅事故，係其他嘅。

陳美寶女士：（經傳譯員）我請謝女士回答呢個問題。

主席：（經傳譯員）好呀，謝女士。

謝善怡女士：（經傳譯員）每一個月，我哋會得到警方嘅資料，然後我哋會分析由警方得到嘅數據，如果我哋發現意外率係有所增加或者有任何不尋常嘅情況，我哋會同巴士公司傾，睇下個情況係點，同埋有乜嘢要改正或者佢哋需要做啲咩嘢呀咁。

陳政龍先生：（經傳譯員）或者我說明一下我想問嘅問題，我而家用一個例子，譬如話有一個事件，有一位老婦喺巴士上失去平衡，佢自己係受咗輕傷，但係就冇報警嘅，不過巴士公司知道呢件事，佢自己做咗紀錄，運輸署咁會唔會知道呢件事？抑或就只會係成為巴士安全部分嘅其中一個數字呢？

黃志光先生：（經傳譯員）主席，請問我可唔可以答呢個問題呢？好似謝女士所解釋，我哋基本上係倚賴警方嘅事件數字嘅，好似大狀頭先提嗰啲咁嘅例子，現時嚟講，我哋係唔會收到呢啲嘅資料嘅，因為基本上日日都會發生，所以個答案係冇嘅，係唔知嘅。

陳政龍先生：（經傳譯員）好，我講番喺倫敦方面係點樣做，不過之前我仲想確立另

外一個事實嘅，就係運輸署點樣處理呢兩組嘅數據，當你收到巴士公司每年畀你嘅巴士安全數據，即係喺呢一個巴士安全章節嗰度寫嗰啲，運輸署會唔會去做核對嘅呢？兩套嘅資料，即係由警方收到一套，巴士公司嗰度又收到一套，你兩者之間會唔會做一啲比對或者核對嘅呢？

陳美寶女士：（經傳譯員）邱先生，佢有呢一個道路安全嘅工作，同埋另外一位同事，基於我嘅所知，當做呢一個遠期計劃嘅時候，當我哋睇巴士公司嘅資料，我哋亦都會睇埋警方畀我哋嘅資料，我哋未必會逐項去比對，但係我哋會睇趨勢分析，如果兩者之間有好明顯嘅差別，我哋係會提出問題同埋要求進一步嘅分析。

我都可以提及，就係政府係有派代表坐喺巴士公司嘅管理局嗰度嘅，喺管理局有關討論嘅時候，都會提供一啲意外數字，我哋會睇咗嗰啲數字先，我哋嘅同事亦都會係睇呢一啲定期嘅意外數據，同埋係比對我哋有嘅數據庫，如果有一啲好明顯嘅差別，我哋都會喺嗰個董事局嗰度係會提出嚟。

主席：（經傳譯員）即係唔會好具體咁做核對嘅？

陳美寶女士：（經傳譯員）我哋唔會，但係我哋會睇下有冇邊一度係好明顯嘅差別或者落差嘅。

主席：（經傳譯員）你可唔可以協助我，當你話你哋喺董事局嗰啲嘅同事就係話會畀啲數據你嘅，你頭先係咁講？

陳美寶女士：（經傳譯員）喺公司嘅董事局係會有運輸署嘅代表，喺睇嗰啲意外嘅數字同埋公司向董事局提交嘅巴士安全報告嘅時候，我哋嘅同事就會攞到有關嘅資料，我哋就會將佢同我哋數據庫裏面嘅資料核對嘅，如果係發覺係有唔同，我哋都可以喺董事局嗰度係講出嚟嘅。我哋就會話畀佢哋聽佢哋嘅數據應該係同警方嘅數據一致嘅。

主席：（經傳譯員）我而家想嘗試明白一下政府代表喺呢啲公司嘅董事局嘅角色係乜嘢，你而家係咪話佢哋係另外一個渠道讓運輸署攞到資料呢？

陳美寶女士：（經傳譯員）我唔會話係另外一個渠道。

主席：（經傳譯員）你意思係咩嘢？

陳美寶女士：（經傳譯員）我只係想提及話有一啲嘅平台我哋都可能攞到呢啲意外嘅數據嘅，政府係有董事坐喺呢啲公司嘅董事局嗰度，就令到我哋可以評論或者係講出我哋對於公司提交資料嘅一啲觀察。

主席：（經傳譯員）好，唔該。

陳政龍先生：（經傳譯員）陳女士，而家我想講下倫敦嗰個做法，我會讓你睇幾份文件，然後我哋就可以好全面咁睇一睇倫敦嘅運輸局佢哋係點樣做呢一啲數據點樣係有透明度嘅。

首先，我睇番 Weston 先生嘅報告，就係專家文件冊第 141 頁，內部嘅頁碼就係 Weston 先生報告第 27 頁，專家文件冊第 141 頁。陳女士，或者我讀某啲部分出嚟，然後請你提出一啲意見，我會不時讀完一段就停一停，請你畀意見嘅。

第一，開始就係 6.2 段，佢話「喺巴士公司合約嘅要求當中，巴士公司係要提供全面嘅數據，係關於事件同埋意外嘅，係成個網絡裏面嘅，呢一啲係通過事件報告資料系統提交嘅，如果有嚴重嘅事件就會係實時報告同埋係監察，就係通過有關嘅中央控制室，然後我哋係會即時同嗰個有關嘅機構發出一啲即時嘅回應嘅。

倫敦嘅運輸局亦都係會提供全國嘅一啲數據就係關於車輛嘅碰撞，如果係造成傷亡，就會咁樣做嘅。每一個季度都會有警方嘅報告。」

似乎倫敦同香港都係有兩套嘅資料，一就係來自巴士公司，一就係來自警察嘅，來自巴士公司嗰啲嘅資料就係我最有興趣嘅地方，我哋就想睇下香港同倫敦比較之後，香港點樣可以改善嘅。

而家我想睇下屘二嗰一段，同一頁，「每一季，倫敦嘅運輸局就會係用一啲大嘅表係表列出所有報告咗嘅事件嘅，就係成個網絡都係咁，然後每一個事件所有嘅資料，就係個路線、日期、邊個係營運商、嗰個地點、有冇人受傷、係咪當場處理咗抑或係入院、如果受傷嘅人究竟係乘客，抑或係第三者、佢哋嘅性別，同埋我哋知道佢哋嘅年紀。

佢亦都係每一季度就會去比較之前嗰個季度同埋做一啲趨勢嘅分析嘅。呢一度就話咁樣可以鼓勵透明度同埋係可以鼓勵佢哋繼續係改善嘅。」

好喇，而家停一停，講番呢一個大嘅表，就係成個巴士嘅服務網絡都係會包括晒嘅，我想知道你知唔知道有冇用咁樣嘅形式，用咁具體嘅形式係畀呢一個數據呢？

主席：（經傳譯員）其實呢一個係 Weston 先生報告嘅一個附件嚟嘅，係咪呀？

陳政龍先生：（經傳譯員）呢個係一個連結嚟嘅，網上嘅連結。

主席：（經傳譯員）唔係，我而家就係問緊你--因為我有一個檔案就係印出咗你而家描述緊嘅數據，究竟係咪喺我哋嘅文件冊裏面嘅呢？

陳政龍先生：（經傳譯員）我睇到秘書處已經將有關嘅表打咗喺屏幕上面，我嘅理解就係我哋係由網上下載咗有關嘅資料，但係仲未包括有頁碼嘅文件冊裏面嘅。

主席：（經傳譯員）即係你而家我哋睇番呢一個屏幕，係咪呀？

陳政龍先生：（經傳譯員）或者我描述一下，等我哋喺個紀錄嗰度都可以講出究竟屏幕上係顯示出啲乜嘢嘅。

係一份數據集，係喺倫敦交通局嗰個網頁嗰度下載嘅，你喺呢一頁會見到喺1月發生嘅意外，呢個係2018年1月，喺個試算表你可以見到每一件事件路線、營運商、所屬嘅區分、傷勢、受害人嘅性別、年紀、係屬於乘客定係邊一類型。

主席：（經傳譯員）喺右邊，我而家睇緊畫面嗰度再過啲仲有冇資料㗎？睇到喇。我哋見到嘅分類係咪你都見到呀？

陳美寶女士：Yes.

主席：（經傳譯員）我哋叫做失去平衡，佢哋就係叫做蹣倒、絆倒或者係跌倒嘅。

陳政龍先生：（經傳譯員）陳女士，喺香港嘅情況，用咁樣嘅匯報嘅方式將資料公開去到咁仔細，你覺得應唔應用到喺香港？

陳美寶女士：（經傳譯員）或者我可以初步畀一啲觀察，螢幕上顯示嘅事故嘅詳情，關於倫敦嘅運輸當局，呢個係睇到每一件事件嘅仔細嘅詳情，但係喺香港嘅情況，我哋就冇辦法去追蹤去到每一件事件，去到咁仔細喇。我哋而家嘅做法就係有一個系統記錄有致命嘅意外係行咩嘢路線、受害人嘅資料、司機嘅資料，我自己覺得我哋係倡議公開數據同埋透明性，令到規管當局同埋交通營運商問責性更高，但係每一件事件去到咁仔細去公開嘅話，未必--即係可能係可以加強透明度、問責性，但係亦都可能超越公眾可能有興趣知道詳情嘅層面，...

主席：（經傳譯員）呢樣嘢都係由公眾決定，佢哋冇興趣都好，佢可以睇咗之後冇興趣，但係佢而家直頭係冇辦法睇到。

陳美寶女士：（經傳譯員）好多時候一有意外發生嘅時候，係有好多事後嘅發展嘅，牽涉乘客，亦都牽涉行人，所以我哋要考慮就住各宗事故嘅披露嘅時候，我哋亦都要確保呢一個格式嘅資料入面係咪準確、係咪最新嘅資料，因為我哋要確保如果公眾攞到呢啲資料嘅話，佢哋都係要有正確嘅認知嘅事件。

主席：（經傳譯員）佢哋喺倫敦都係咁做，你係咪意思我哋喺香港就冇能力做到呢？

陳美寶女士：（經傳譯員）唔係嘅，所以第三點我想提到嘅就係我之前嗰日都提到我哋都係希望參考倫敦嘅交通當局，而我同事其實已經安排咗一個嘅訪問嘅，係倫敦交通當局，喺2019年2月嘅時候去，就係正好畀機會我哋去學習準備呢啲嘅問題、需要嘅資源、佢哋點樣同唔同巴士公司商量，仲要同警方核對資料，睇下喺呢個格式咁樣嘅資料點樣可以加強喺交通上嘅數據透明度，而同時唔會因為披露資料期間會有啲複雜嘅問題。

主席：（經傳譯員）我哋睇到呢一個咁實事求是嘅資料，就睇番巴士公司、路線、廠房喺邊、傷勢、傷者嘅性別、年紀、意外嘅事故類別、受害人係乜嘢人、係乘客定司機、行人。

陳美寶女士：（經傳譯員）我諗喺呢一個表格入面嘅資料係可以用一個好簡單、好客

Transcript by Epiq Hong Kong, Limited

觀嘅方法去向公眾交代呢個事件嘅原因同埋詳情，個問題係我哋用咁樣嘅格式提供資料嘅時候，仲要考慮呢一啲資料係點樣可以喺發布之後再更新。

主席：（經傳譯員）你由呢度要點樣更新呀？係咪即係個受害人由女變男、成人變番小童？個意外其實喺第二度發生？所謂更新係咩嘢意思呀？

陳美寶女士：（經傳譯員）我留意到，主席，有一行就係話受傷嘅描述嘅，呢個表可能係形容番喺意外發生嗰一刻或者意外發生之後佢哋立即得到嘅資料，我哋作為當局都要考慮下要唔要進一步更新番個傷勢嘅描述，喺呢一方面有冇進展嘅，因為可能公眾都有進一步追問有咩嘢跟進行動，有冇進一步發展，呢啲係我哋要同倫敦當局再進一步傾去實施披露資料。

主席：（經傳譯員）唔該，我想呢一頁有副本喺手，等我哋可以睇下入面嘅內容，希望全部人都有副本。陳律師。

陳政龍先生：（經傳譯員）陳女士，頭先提到喺香港我哋就唔適宜係逐件事件咁樣去睇，係因為而家呢一刻冇要求巴士公司就每宗事故匯報嘅？

陳美寶女士：（經傳譯員）冇錯。

陳政龍先生：（經傳譯員）如果你睇下倫敦嘅匯報要求，問下可唔可以成立咁嘅系統、點樣應用，我而家請你睇雜項 3 嘅文件冊，1189 頁，係倫敦嘅交通局一個叫做巴士安全計劃嘅最新情況嘅文件。

主席：（經傳譯員）你等一等，我做一做筆記先。呢個係 2017 年 11 月嘅，回應番呢一個交通當局嘅。

陳政龍先生：（經傳譯員）冇錯，呢度就描述番個最新嘅情況同埋要點樣去改善個系統，我就呢兩方面問番陳女士嘅。陳女士，喺 1191 頁，標題係「巴士碰撞數據分析」，簡介嗰段我唔讀喇，我想讀跟住嗰段，標題係「進度」，因為呢個文件一開頭就形容佢哋而家嘅系統係點，我都要問一個問題先嘅。

佢係咁講，「我哋而家對於巴士撞擊嘅數據係有兩組主要嘅數據集，係 IRIS 同埋 STATS19。」而 Weston 先生嘅報告就提到 IRIS 係警方嘅數據嚟嘅。

我繼續讀，「IRIS 係由巴士公司使用嘅，關於佢哋嘅營運活動嘅事件嘅匯報，包括撞擊，亦都包括係滑倒、絆倒或者跌倒，同埋一啲嘅安全事故，包括襲擊嘅。而巴士公司要喺四十八小時之內匯報嚴重事件，所有嘅事件就要喺七日之內匯報嘅，呢一個系統係完整、可靠、單一嘅資料來源，呢啲資料就係所有嘅影響或者係涉及倫敦巴士嘅事故。」

我停一停先，相比香港嘅情況，我哋亦都可以接觸到警方數據，睇落去係好似，但係你同唔同意香港嘅運輸署有一方面係輸蝕咗嘅，因為由巴士公司入面係冇能夠提交到啲數據集，關於巴士意外嘅？

陳美寶女士：（經傳譯員）我同意，喺而家嘅巴士專營權營運制度入面係冇要求就住特定嘅事件需要特定嘅匯報嘅。

陳政龍先生：（經傳譯員）將來你覺得咁樣有冇作用呢？如果要求巴士公司有一個類似嘅匯報嘅制度，因為似乎喺實際嘅角度嚟講，要做嘅只不過係成立一個電腦嘅系統？

陳美寶女士：（經傳譯員）我諗呢個當然係一個可以跟進嘅範圍，再加埋自動數據傳輸，我相信係有辦法令到呢個數據嘅紀錄或者係整理係更加有效率嘅。

陳政龍先生：（經傳譯員）即係話可以唔使由唔同巴士公司收到唔同嘅數據組，而係有一個單一嘅系統要佢哋匯報？可唔可能呢？

陳美寶女士：（經傳譯員）我覺得關於匯報數據、採集數據方面，我哋一直都可以做一個單一嘅系統，等我哋可以分析好啲數據再提交報告建議進一步嘅行動嘅。

主席：（經傳譯員）陳律師，喺你繼續之前，而家提到巴士安全計劃嘅最新情況，喺合約入面有冇標明巴士公司向倫敦交通當局有咩嘢責任呢？有冇咁嘅條文呢？

陳政龍先生：（經傳譯員）我唔知道，我而家唯一搵到嘅就係呢一段，入面有講係一啲嘅匯報嘅責任嘅詳情，我可以係嘗試再搵下。

主席：（經傳譯員）呢個我哋亦都可以問下 Weston 先生嘅意見。可能係好簡單有一條嘅合約嘅條款，就係話有啲事故嘅話，包括係碰撞、有人滑倒、絆倒、跌倒，都係需要由巴士公司向當局匯報嘅，咁樣係好有幫助。

陳女士，我想問一問你，咁樣同專營巴士公司嘅制度好相近嘅，我哋想有咁嘅範本、有日期、時間、受害人嘅特色，譬如話係佢年紀、性別，因為當然佢個年紀亦都係同譬如話有冇跌倒有關，同埋有陣時受害人因為某啲特質，佢可能係個傷勢較重，甚至係死亡嘅，可唔可以係要求巴士公司提交呢？

陳美寶女士：（經傳譯員）我諗我哋可以好積極跟進嘅，主席。

陳政龍先生：（經傳譯員）我繼續讀嘅時候睇到另外一個問題，如果你係由巴士公司逐宗事故去匯報嘅話，如果係向警方匯報嘅話，你都有一樣嘅數據㗎，喺嗰個數據庫入面，就可以令你可以對照一下，睇下專營巴士公司喺記錄資料嘅時候佢嘅方法妥唔妥當？

陳美寶女士：（經傳譯員）咁樣對於核對數據同埋去找出有乜嘢錯漏、差異係有用嘅，所以我哋應該有個範本，一啲主要嘅標題，然後我哋可以由唔同嘅巴士公司去決定類似或者係一樣嘅分類，然後匯報事故，我諗呢一方面我哋可以進一步考慮嘅，同巴士公司商量。

主席：（經傳譯員）巴士公司都會要求車長去匯報呢啲嘅事件㗎？

陳美寶女士：（經傳譯員）係。

主席：（經傳譯員）你知唔知道巴士公司要求咩嘢資料吖？

陳美寶女士：（經傳譯員）因為我哋要求佢哋提供數據同埋資料，係喺嗰個巴士安全嘅章節嗰度提供，呢個亦都係根據佢哋嘅原數據同埋佢哋畀嘅證據去再整理嘅，巴士公司係用一個更加系統性嘅方法去收集數據、匯報畀運輸署係唔難嘅。

主席：（經傳譯員）但係你知唔知道譬如話有件事故發生或者意外發生嘅時候，公司要求車長匯報乜嘢資料呢？

陳美寶女士：（經傳譯員）我冇呢個詳情，或者可以由謝女士補充。

謝善怡女士：（經傳譯員）唔該。我哋知道巴士公司要求車長匯報喺車上發生嘅，譬如話意外有受傷嘅話，就要係匯報畀--就報畀警方聽嘅。

主席：（經傳譯員）即係話如果有受傷嘅話，巴士車長係要匯報畀警方聽？

謝善怡女士：（經傳譯員）係。

主席：（經傳譯員）如果系統係有效嘅話，警方嗰啲數據同巴士公司應該係百分百脗合？

謝善怡女士：（經傳譯員）係。

主席：（經傳譯員）呢樣嘢係咪書面反映番呢？有冇一個手冊--巴士公司應該有啲幾有用嘅巴士車長手冊畀佢哋嘅，你有冇見過？你冇見過，你可以話冇見過。

謝善怡女士：（經傳譯員）而家我哋冇資料，我哋要問下巴士公司先。

主席：（經傳譯員）我哋嘅文件冊係咪有車長嘅證供呀？或者可以睇下，而家可以答到我哋嘅--或者稍後答喇。

陳政龍先生：（經傳譯員）或者我可以總結呢一個問題，就係睇下倫敦點樣做，陳女士，你仲係咪喺 1191 頁呀？我哋頭先睇緊嗰一頁。

陳美寶女士：（經傳譯員）係。

陳政龍先生：（經傳譯員）我讀咗「進度」嘅第一段，形容番喺倫敦嘅系統而家點樣做嘅。我繼續想讀第二段，講警方數據嘅，STATS19 就係警方舊嘅系統，仲有 COPA，係一個警方更新咗嘅系統，我就唔繼續講呢方面。到 1192 頁，後面嗰頁，未來嘅工作嘅標題，呢個就係佢哋交通當局要做啲乜嘢。

「要花啲工夫去改進喺 IRIS、STATS19 同 COPA 嘅相容性，我哋係會繼續做嗰個複雜嘅核對嘅工作去確保每一個數據組嘅可靠性同埋相容性嘅。我哋亦都做緊一個嘅--開發緊一個軟件系統，可以係改善 IRIS 嘅數據收集嘅效率同埋係準確性嘅，因為係會由巴士公司自己嘅數據嗰度自動更新嘅。」

未來路向，陳女士，你覺得唔同嘅數據組能夠協同嘅話，係咪香港應該做嘅呢？即係我講緊嘅係喺收集數據同埋匯報嘅工作。

陳美寶女士：（經傳譯員）肯定係嘅，呢個係一個範疇我哋希望能夠做多啲，特別係希望能夠唔同嘅數據更加可靠同埋更加一致，目前嚟講，唔同嘅巴士營運商佢哋有自己嘅數據庫，我哋希望佢哋能夠將佢哋嗰啲意外分類，譬如就住嗰個性質或者係成因嚟分，但係嗰啲佢哋嘅形容詞可能同警方嗰啲形容詞可能唔一樣，因此我覺得應該有一個致嘅數據庫或者數據集，亦都係更新得更加頻密，就肯定會幫唔同嘅各方明白個情況，同埋去分析大家關注嘅事宜，同埋去採取適當嘅跟進行動。

我亦都想補充，專家嘅證供同埋佢哋供詞，喺呢方面嘅供詞係話畀我哋聽其實喺意外嚟講，嗰啲成因好複雜嘅，通常有多於一個嘅成因，嗰個分析個意外好多時候都係要係詳盡由警方調查之後先至可以搵得到同埋可能經過相當嘅程序先至可以確定。但係無論如何，我哋都會係搜集第一手嘅資料同埋希望能夠係向唔同嘅巴士公司攞到一啲唔同嘅數據。

陳政龍先生：（經傳譯員）主席，我就已經完成咗我要探討嘅課題，但係完之前，我哋就講關於一個營運嘅手冊嗰方面，其實我同事已經畀咗我，我而家畀個答案你--畀委員會，提供啲資料畀委員會。

KMB-8(A)，第 3086 頁，而家已經喺個螢幕度打咗出嚟，呢個係第一頁嚟嘅，呢個係九巴嘅文件，就係戶外營運同事或者員工嘅手冊，呢個就係講 2018 年 1 月最後更新嘅。相關同程序有關嘅部分就特別喺意外嘅時候，3123 頁嗰度可以睇到，第 8(A)，第 3123 頁，喺第 9 個部分。

呢個手冊就講，「如果有一個員工就係有交通意外，尚當佢係揸緊公司嘅車嘅時候，佢就應該係填咗呢一個『交通意外報告』同埋一個授權書，就係喺意外七十二小時之內，如果嗰個同事要住院嘅時候，佢出院之後，就儘快做。」呢個跟住就係話要係留意啲咩嘢，跟住就有幾項。

1、2、3、4 之後，呢度就講，就話「呢個填好咗嘅『交通意外報告』就應該係去提交畀相關嘅車廠嘅有關嘅部門，亦都係畀嗰啲接受個報告嗰個人去簽署嘅。如果佢哋就冇咁做嘅時候，佢哋就話係唔會收到呢一個嘅『好服務獎賞』，亦都可能因為佢哋冇遵從相關嘅規矩，公司可能會採取呢一個紀律行動嘅。」

呢度講到--冇清楚講清楚就係話畀員工聽係一定要去報警嘅，雖然呢度就話可能就係要提供一份嘅口供或者係呢一個嘅報告畀警方，呢個係第三段所講嘅。

主席：（經傳譯員）呢個嘅手冊有冇有包含呢一個交通意外嘅報告呢？

陳政龍先生：（經傳譯員）冇，冇喺我哋嘅文件冊度嘅。

主席：（經傳譯員）如果係咁嘅時候，我哋就要求九巴就係提供呢個相關嘅文件，致使到我哋知道究竟呢個報告嗰個需要個詳情係幾仔細，致使到運輸署可以知道呢個九巴其實係手頭上有啲咩資料。

陳政龍先生：（經傳譯員）主席，就我哋請黃律師繼續去發問嘅。

主席：（經傳譯員）我希望你能夠係再傾一傾關於急剎車嗰個問題，同埋九巴就係話畀我哋聽究竟呢啲嘅報告佢哋點樣處理，同埋就係關於呢個四分鐘嘅一個規定係點樣樣。

陳政龍先生：（經傳譯員）好，我哋睇兩份文件，會比較幫到我哋嘅。首先我哋睇一睇 KMB-12 第 4848 頁，我希望請秘書處幫一幫，就話畀我哋聽嗰個頁數，一個最近嘅文件，2018 年 10 月 3 號九巴提交嘅。

主席：（經傳譯員）你係同我嗰個版本一樣嘅，係咪呀？如果係咁嘅時候，我可以就睇呢一個版本。

陳政龍先生：（經傳譯員）我希望有個頁碼，陳女士知道究竟係講緊邊一頁。KMB 第 1 號文件冊第 571 頁。

我澄清一點，陳女士，希望係睇到，第一，KMB-12 第 4848 頁，呢個係急剎嘅一個報告，就係由九巴提交畀我哋嘅，另外 KMB 第 1 號文件冊第 571 頁，就亦都係九巴提交嘅意見書--陳述書，佢就講到呢個嘅急剎報告係點樣編製，所以我就希望呢兩份文件就一齊併排我哋睇。

4848 頁，呢個係一個中文嘅報告，個英文嘅翻譯就喺 4851 頁，又或者我哋用嗰個英文嘅翻譯本，就等大家方便啲，睇起上嚟。我而家就係睇下呢個圖表，陳女士，你睇到嗰個標題就係 2018 年 2 月 6 號到 2 月 12 號嗰個急剎嘅情況，就係總次數係--或者個總時數係多過四分鐘嘅，你睇番左邊第四個，就係話急剎嘅次數，就係減速係每小時係高於 8 個公里嘅。呢個表就係咁。

然後我哋睇一睇嗰個形容係點樣樣，呢個咁嘅報告係應該點樣係編製出嚟，我哋睇一睇嗰個文件，我哋睇一睇就九巴呢個提交呢一份文件，第 3 段，3(B)，第 572 頁。

主席：（經傳譯員）第 4848 頁，呢個嘅文件係咪九巴提交㗎？

陳政龍先生：（經傳譯員）係，冇錯。

主席：（經傳譯員）係佢哋嘅紀錄當中嘅？

陳政龍先生：Yes.

主席：（經傳譯員）呢個唔係提交畀運輸署嘅一個文件，係咪？

陳政龍先生：（經傳譯員）就我所知，就冇嘅，呢個嘅係九巴...

主席：（經傳譯員）呢個4848有冇提交畀運輸署嘅？

陳美寶女士：（經傳譯員）冇嘅，冇嘅。

主席：（經傳譯員）好，呢個係佢哋自己內部紀錄嚟嘅。

陳政龍先生：（經傳譯員）第3(B)段係第572頁，佢哋就講就話呢一個車長嘅每周嘅表現點樣去做，呢個就係包括佢哋超速或者急剎等等，我就讀出嚟。

「呢度個車長個名就會喺佢哋嘅車長嘅表現報告嗰度寫出嚟嘅，當嗰個急剎嘅總時數或者累計時數就係--呢個嗰個減速嘅情況係相對於之前嗰一秒嘅減速係超過7公里」，佢哋就會寫出嚟。

而我哋睇番嗰個註釋，第3嗰度就係話「就2018年8月1號之前，其實佢之前嗰個嘅準則就係每秒係8個公里嘅。」

好，我哋繼續。呢個就係由「黑盒所記錄嘅，就係如果個累計嘅時數喺之前嗰個禮拜係多過四分鐘，就係會記錄。」

第6段，就係話「呢個嘅嗰個原因，急剎都會係好多原因嘅，譬如因為可能實際嘅交通嘅情況，喺某段時間係需要佢哋咁做。九巴同埋龍運嘅方法就係話去監察佢哋嗰個車長嘅情況同埋嗰個行為，而唔係即刻採取行動嘅，九巴同埋龍運巴士就唔會係有一啲好仔細嘅報告就係講急劇嘅剎車同埋加速嘅。如果做得好多次嘅時候，就會係有報告，譬如話如果係佢嗰個累計時嘅時數係多過六十分鐘，佢就會係喺個報告嗰度，而另外佢係嗰個時數係多過四分鐘嘅時候，佢哋就會有二百四十個提到嘅。因為個數據嘅數量好大，所以嗰個技術部門就會盡佢哋嘅最大能力去編製一啲報告，如果係有異常情況出現嘅時候，就會去編製呢啲報告。」

陳女士，我就想畀啲背景你，九巴除咗呢個嘅守則之外，亦都畀咗好多其他嘅數據我哋，但係我哋就唔會講得好仔細。

主席：（經傳譯員）就一個累計呢個剎車係超過四分鐘係咩嘢意思，其實係講緊係一個星期其實係講緊二百四十秒嘅，但係你就唔會話做得好頻密嘅，所以我哋就知道嗰個急剎嘅情況係幾咁頻密。

我哋去睇番第一頁，附件1(b)(1)，第1頁。或者我哋睇一睇呢個文件，我哋讓運輸署了解得更加好，呢個係咪喺紙張上面㗎？其實係咪喺個檔案裏面可以提供畀佢哋呢？

陳政龍先生：（經傳譯員）呢個係我嘅檔案，其實喺我個電腦裏面，其實都幾長嘅。

主席：（經傳譯員）就我相信有一啲紙張嘅版本嘅，係咪？係急劇加速其實就係好多頁嘅，但係急剎就比較少啲頁數。

陳政龍先生：（經傳譯員）急剎嗰個報告就係5578頁開始嘅，係KMB第12號嘅或

者係九巴12號嘅文件冊嗰度。

陳女士，我希望你呢度睇到一份文件，嗰個標題係左上角寫咗，就係附件1(b)(i)，就係急剎報告，就係特別針對幾位特別嘅車長嘅。就九巴嘅文件，一般嚟講，就其實就唔係話九巴會係定期去編製嘅，就係因為我哋委員會要求，佢哋就編製，我哋就想睇番呢個急剎嘅個別嘅事件，就講緊係四分鐘嘅急剎嘅累計時數，然後就會喺個報告裏面出現，呢啲咁嘅情況。

所以，陳女士，呢度就係睇到呢個一共係有十八頁，你就我哋而家睇第5578頁嘅第一頁，呢啲嘅紀錄就係個員工嘅紀錄，員工編號3965嘅呢位員工嘅，你睇番呢一頁，其實好多嘅資料，關於佢哋嘅路線、時間、日期、車速、減速等等。

主席：（經傳譯員）呢啲咁嘅簡寫其實佢哋有冇解㗎，"ba value"咁？

陳政龍先生：（經傳譯員）相關嘅解釋其實就喺我哋頭先嘅KMB第1號文件冊。

主席：（經傳譯員）"ba value"係乜嘢呀？我哋可以推想出嚟嘅。

陳政龍先生：（經傳譯員）九巴就講，喺註釋第4號嘅時候，我哋頭先睇過講直情"ba value"就係呢個制動器嘅加速嘅值，就係同呢一秒同之前嗰秒去比較嘅。

主席：（經傳譯員）呢個係嗰個車速就係每個小時5.8嘅公里，個ba value就係9.5嘅，所以相對於之前嗰一秒其實就係嗰個加速個值就係咁樣，係咪咁呀？

陳政龍先生：（經傳譯員）係。陳女士，由5578頁去到5586頁，你可以睇到3965號員工嗰啲記項，然後你亦都可以睇到有關嘅員工嘅編號就變咗63287。

主席：（經傳譯員）我想請問嗰一位特別嘅車長，佢大力剎車嘅累計分鐘係幾多呢？

陳政龍先生：（經傳譯員）根據7(b)嗰個文件，我都讀番出嚟先。

「3965號車長嘅累計就係6.68分鐘，就有401個記項嘅」，「63287號車長就係395個記項，總共係6.58分鐘大力剎車」。

陳女士，我諗你亦都睇到63287係由5586頁開始去到5595頁嘅，總共係有395個記項嘅。陳女士，從運輸署嘅角度睇嚟，你對於九巴呢一個做法有咩嘢觀察呢？基本上就喺車長大力剎車方面都冇一個例外嘅報告，直至到呢個車長係累積咗幾百次超越咗大力剎車嗰個門檻，即係喺某一個星期裏面，佢先至有呢啲報告，你有咩嘢觀察呀？

主席：（經傳譯員）或者你都想用啲時間諗一諗，我哋好快會有一個小休，就令到你可以有時間諗下呢個問題。我亦都想問，佢哋交啲咩嘢報告畀運輸署嘅呢？如果有大力剎車嗰啲嘅事故。

陳政龍先生：（經傳譯員）我有有關嘅文件嘅，或者畀少少時間我搵出嚟。

主席：（經傳譯員）好呀。

陳政龍先生：（經傳譯員）講到話有啲乜嘢係交畀運輸署，我諗陳女士都有講到嘅，就係TD-4 1020頁，呢一份文件最頂嗰度就係講到關於巴士安全監察措施嘅每月報告，陳女士剛才都講過，就係話公司係要提交一啲嘅表格，係講到關於黑盒嘅數據，佢哋嗰啲突擊嘅檢查嘅。

我哋睇下最屘嗰度嗰三分一，就係話查核黑盒嘅數據以監察巴士車長嘅駕駛行為，可以睇到就係話有幾多次突擊嘅檢查，就係喺月尾嗰度有幾多次咁樣嘅個案呢，譬如話個性質係超速、突然剎車嗰啲咁樣，我哋睇到突然間剎車係有八次嘅，口頭嘅警告係有十三次嘅。

當運輸署收到呢一類咁樣嘅文件，就係話有八次係突然剎車嘅，呢度似乎係咁寫，運輸署會點樣去詮釋呢一個數據嘅呢？運輸署嘅詮釋會唔會認為係有八次唔同嘅事件呢？即係話分開有八次突然間剎車抑或係點呢？

主席：（經傳譯員）或者我哋而家休息一陣，等你去考慮下呢一個問題，即係當我哋小休嘅時候。我哋而家小休十五分鐘。

陳美寶女士：（經傳譯員）多謝主席。

下午4時15分聆訊押後

下午4時32分恢復聆訊

出席人士如前。

主席：（經傳譯員）陳律師。

陳政龍先生：（經傳譯員）陳女士，喺小休之前問咗你兩個問題嘅，第一，運輸署嘅角度嚟講，你對於九巴嘅做法有咩嘢觀察？即係關於用力剎車係唔會每一次做一個報告，只係如果有一個巴士司機係某一個禮拜係累積咗幾百次咁嘅情況先會有個報告；第二，關於每個月嘅報告，即係TD文件冊第4號1020頁，當運輸署收到報告，見到其中有一個嘅記項就係有八次嘅突然嘅急速剎車，係點樣處理呢個數據呢？或者陳女士可唔可以回答呢兩個問題？

陳美寶女士：（經傳譯員）我會答第一個問題，同埋我邀請我嘅同事回應第二個問題。

第一個問題就係有黑盒嘅功能去顯示一啲嘅事件嘅報告，就係睇下用力剎車嘅情況，我哋預期巴士公司係認真看待點樣使用呢一個功能同埋啲數據去密切

監察巴士司機嘅表現。

而黑盒嘅數據，單憑數據就未必可以係有一個嘅結論司機係疏忽駕駛，但係可以係作為一個理據，巴士公司可以進一步調查。如果有閉路電視監察嘅系統同埋喺車上有便裝嘅調查員嘅話，係可以進一步去睇下觀察一下巴士司機嘅表現，但係毫無疑問黑盒嘅數據係好重要，亦都提供一啲資料作為根據畀佢哋去睇下巴士車長有乜嘢不當嘅行為。

我而家請黃志光先生回應番關於黑盒嘅數據係要求巴士公司提供咩嘢資料。

黃志光先生：（經傳譯員）主席，基本上螢幕上顯示嘅...

陳政龍先生：（經傳譯員）即係1020頁，係運輸署嘅文件冊第4冊。

黃志光先生：（經傳譯員）呢個係由運輸署決定，我哋要求巴士公司提交有關嘅數據，由今年1月已經開始。

你提到突然剎車嘅問題，左手邊個欄目顯示“400”，我哋只係要求巴士公司提供佢哋搵到嘅不當嘅行為有幾多個個案，至於突然剎車，我哋唔可以確認係唔係根據黑盒嘅突然加速或者剎車嘅數據，或者巴士公司可能會進一步調查一下，可能係同巴士車長會面咗，跟住先有呢個數據嘅，我哋呢個就係收到嘅就係咁。

主席：（經傳譯員）可唔可以協助下我呢？你提到呢個數目字“400”係咩嘢意思？

黃志光先生：（經傳譯員）呢個係即場嘅臨時嘅一個檢查。

主席：（經傳譯員）即係相比起一個例行檢查，係咪呀？上面嗰一格就係寫住「例行嘅檢查」。

謝善怡女士：（經傳譯員）巴士公司突擊檢查就唔係例行檢查，通常因為有投訴，而突然間作出嘅，而例行檢查就係上面8552。

主席：（經傳譯員）但係嗰度冇講剎車嘅，淨係講緊超速啫，即係佢哋係有檢查超速，但係冇突然剎車。

謝善怡女士：（經傳譯員）超速呢個就係根據黑盒嘅數據產生出嚟嘅報告，但係對於突擊檢查就係因為有人投訴，而剎車好多時候要調查埋譬如話閉路電視嘅數據，而唔可以淨係用黑盒嘅數據去指稱司機疏忽嘅，佢哋要進一步調查先可以將佢定性為係唔係不當行為。

主席：（經傳譯員）即係話超速方面就會產生一啲嘅例外報告嘅？

謝善怡女士：（經傳譯員）超速就係咁嘅情況。

主席：（經傳譯員）但係如果係剎掣嘅就冇喇？

謝善怡女士：（經傳譯員）我哋嘅理解，佢哋可以設定一個界限值嘅，就係而家就唔會話去即刻產生一個報告，因為佢哋需要進一步調查。

主席：（經傳譯員）我哋處理一下個事實先，即係話急剎係唔會因為咁產生報告嘅？

謝善怡女士：（經傳譯員）據我哋理解，就係啱嘅。

主席：（經傳譯員）而突擊檢查嘅報告係因為有投訴，佢哋係就住個投訴去調查所得嘅？

謝善怡女士：（經傳譯員）係。

主席：（經傳譯員）但係其實我哋見過有咁多頁嘅數據，即係話係已經有現成嘅數據，去監察理解到底急剎呢個情況係有幾嚴重？

謝善怡女士：（經傳譯員）係。

主席：（經傳譯員）其中一個因素係要急劇剎掣嘅，譬如由 8 公里而家減到去 7 公里，講緊每秒嘅改變就係 0.2G 嘅，佢哋唔係監察 0.4G 嘅，啱唔啱呀？

陳美寶女士：No.

岑毅安先生：（經傳譯員）正確嘅，喺時速 7 公里每秒嘅轉變就係等如 0.2G 嘅。

主席：（經傳譯員）當然對於喺巴士站立嘅乘客就會有問題喇。係嘅，陳大律師。

陳政龍先生：（經傳譯員）主席，我已經完成提問喇。我而家請黃大律師繼續。

主席：（經傳譯員）唔該晒。黃大律師，畀少少時間我去處理一下呢度啲文件先。

陳政龍先生：（經傳譯員）主席，黃大律師就請我唔好坐低住。

主席：（經傳譯員）或者佢可能得到我嘅鼓勵。

陳政龍先生：（經傳譯員）原因係咁嘅，因為黃大律師就幫忙我就搵到啲報告，就睇番話巴士司機收到咩嘢指示，如果遇到巴士有意外嘅時候。或者我可以先邀請主席睇番文件冊 10(A)，4190-1 頁，係 4161 頁嘅，呢個中文版，英文譯本就係 4190-1 頁。

主席：（經傳譯員）係。

陳政龍先生：（經傳譯員）而家喺你面前有嘅文件就係話如何處理交通意外嘅指引，係九巴嘅。我哋可以睇下最後一點，關於交通意外報告，主席，你睇番附件 II，即係 4190-31 頁，你可以見到嘅，交通意外報告表。4190-29 頁就應該係佢英文譯本。

主席：（經傳譯員）有冇一個更加清晰可以閱讀㗎？因為呢個睇落，係一個掃瞄嘅版本。

陳政龍先生：（經傳譯員）或者我哋之後可以同九巴聯絡攞番嘅。

有趣嘅地方，就係我想邀請委員會留意 4190-38，呢個就似乎係一個標準嘅一個表格，係尋求乘客嘅同意唔好去警方嗰度作出投訴，即使有受傷。即係似乎唔係話理所必然一定係有事件，就會去向警方舉報嘅。

主席：（經傳譯員）係，唔該。

陳政龍先生：（經傳譯員）黃大律師亦都好幫手，搵到一個係交通意外報告表，一個更加容易閱讀，清晰嘅，呢個係喺 4397 頁嘅，九巴嘅文件冊 10(B)。

主席：（經傳譯員）似乎喺呢個報告表缺乏嘅資料，相比起喺倫敦嘅交通局個網站嘅，就係意外嘅傷亡或者意外嘅結果，係咪需要當場接受治理定留院，但係呢度係冇提到受傷嘅性質嘅，定話係有啲譬如話死亡、留醫、出院呀咁樣。

陳政龍先生：（經傳譯員）係，喺呢一個傷亡者資料嗰度係有啲空格可以剔嘅，有「死亡」、「留醫」、「出院」、「離開現場」、「未能確定」，似乎冇嘅部分就係分類，呢個可能係其後分析嘅時候更加有用，睇下係咪一個滑倒、絆倒或者跌倒定係一個失去平衡嘅情況。

主席：（經傳譯員）其實可以設計一個範本要求巴士公司向你提供一啲資料，等你可以改善你嘅數據庫，因為你可以要求佢哋提交咩嘢資料。

陳美寶女士：（經傳譯員）係，係好重要嘅，同埋我哋點樣可以喺個範本入面形容，喺個報告入面反映，呢一個當然我哋係會考慮嘅。

主席：（經傳譯員）唔該。

陳政龍先生：（經傳譯員）主席，或者我而家嘗試再一次將個時間交畀黃大律師。

主席：（經傳譯員）好。

黃女士：（經傳譯員）唔該晒主席，唔該晒陳女士。

各位，我會問幾個範圍嘅問題嘅，第一個範圍就係呢一個嘅車速檢討嘅小組委員會佢嘅功能同你喺新嘅文件附件入面提到道路安全有咩嘢關係同埋個關係係乜嘢。首先我想講，我哋由啲證供入面聽到運輸署有同你哋傾關於車速限制嘅就包括係運輸署嘅代表，就有兩個非政府組織，就係香港車輛組織...

主席：（經傳譯員）我諗係應該有一個翻譯就係關於係高級嘅司機？

黃女士：Yes.（經傳譯員）同埋就係警方嘅代表，係咪呀？

邱國鼎先生：（經傳譯員）冇錯。

黃女士：（經傳譯員）我哋亦都聽到證供就係話會議召集人就係運輸署嘅助理署長嘅？

邱國鼎先生：Correct.

黃女士：（經傳譯員）運輸署亦都係提供秘書處嘅服務嘅，而個工作小組，我想問一問，就係嗰個功能係乜嘢嘢--工作小組會唔會考慮基於一啲客觀嘅事實同埋評審，就係睇下嗰啲意外嘅數字，就去決定係會唔會建議某一啲嘅道路應該係更改個時速限制？

主席：（經傳譯員）問呢個問題之前，呢個嘅工作小組嘅委員會喺我哋嘅文件冊之中有冇提到㗎？

邱國鼎先生：（經傳譯員）喺10號文件，TD-1，...

黃女士：（經傳譯員）TD-1嘅第120頁至到121頁。

主席：（經傳譯員）呢個係工作小組還是係一個委員會？

邱國鼎先生：（經傳譯員）呢個係一個工作小組。

主席：（經傳譯員）唔該。

邱國鼎先生：（經傳譯員）呢個速度限制檢討工作小組主要嘅目的就係提供意見畀運輸署要唔要檢討速度限制同埋點樣做，嗰啲委員亦都會係提供意見，佢哋基於四個主要嘅因素，第一個就係將嗰個相關道路嗰個意外嘅紀錄或者歷史；同埋嗰個路面嘅情況；第三，就係話呢一條道路同佢相近連接嘅道路嗰個嘅速度限制有冇分別或者改變；第四，就係話汽車嗰個速度，就係話我哋實際嗰個車速。

主席：（經傳譯員）呢個係講緊第八十五個嘅分位？

邱國鼎先生：Yes.

黃女士：（經傳譯員）我知道工作小組就每季係會開會嘅，我哋有證供話畀我哋聽就運輸署佢決定究竟係邊一條路去睇嘅，係咪㗎？

邱國鼎先生：（經傳譯員）係嘅。

黃女士：（經傳譯員）如果你有一個情況，就係話你接到投訴話係區議會提交嘅投訴，就係話有某一啲嘅道路需要係檢討個車速限制，呢個咁嘅意見就點樣可以交到畀個工作小組嗰度睇呢？

邱國鼎先生：（經傳譯員）如果區議會有意見或者建議，佢哋會搵我哋嘅區域嘅工程師，嗰啲工程師就根據我頭先講嘅準則，就睇下需唔需要建議車速嘅限制會改變，主要考慮三點嘅，個交通嘅事故意外有冇改變同埋嗰個道路嘅環境有冇改變，如果有需要嘅時候，佢哋就會係編製一個報告，然後提交畀工作小組去考慮。

黃女士：（經傳譯員）你就提過就話有冇意外有冇咩嘢改變，咩嘢意思呢？

邱國鼎先生：（經傳譯員）其中一個嘅準則就係嗰個意外嘅歷史，我哋通常就會計算每一年嗰個意外率，如果嗰個區域嘅工程師發現嗰個意外嘅數目突然之間增加咗，佢哋就會做一個嘅速度限制嘅檢討。

主席：（經傳譯員）我哋點樣去定義乜嘢叫做意外呢？

邱國鼎先生：（經傳譯員）呢個就係嗰個個人受傷率，相比於成個香港嗰個受傷率，即係話相關嗰個道路嗰個率就係同全港嘅受傷率係比較會唔會佢哋係特別高。

主席：（經傳譯員）如果有人係受傷嘅，你就會去搜集一啲數據？

邱國鼎先生：（經傳譯員）係，冇錯，係。

主席：（經傳譯員）如果一啲人離開咗、走咗，我哋就唔會嗰啲數字可以反映出嚟嘅？

邱國鼎先生：（經傳譯員）就我哋會睇番個紀錄。

主席：（經傳譯員）其實你首先要有人受傷，然後你先至係搜集嗰啲數據，係咪呀？

邱國鼎先生：（經傳譯員）係呀。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）你提到意外率，如果佢係要計算落意外率，就要有人受傷，如果--或者你係舉一個例子，如果譬如話喺一個咁嘅情況，大埔道，你就會將佢嘅數據就會同另外邊個區比較，然後先至將意見提交畀工作小組？

邱國鼎先生：（經傳譯員）我哋就會睇番全香港嘅數字。

黃女士：（經傳譯員）如果喺大埔道嚟講，佢就係屬於邊個區㗎？

邱國鼎先生：（經傳譯員）我哋就會睇番大埔道嘅某一個嘅路段，然後我哋就睇番嗰個意外個數目，然後就計算出意外率，然後將佢同全港嘅意外率去作比較。

主席：（經傳譯員）唔好意思，我要打岔一下。意外率係每乜嘢嘅意思呢？

邱國鼎先生：（經傳譯員）係每百萬行車公里嘅意外率。

主席：（經傳譯員）唔該。

黃女士：（經傳譯員）你又提到每百萬行車公里嘅意外率，你又冇提到就話呢啲意外率一定係要有人受傷先至計入去，係咪運輸署其實就將佢改一改，就其實就係話有人受傷嘅意外率，每百萬行車公里？

邱國鼎先生：（經傳譯員）我哋真係會淨係睇有人受傷，我哋先至係叫嗰啲做係交通意外嘅。

黃女士：（經傳譯員）唔該。

主席：（經傳譯員）點解呢？

邱國鼎先生：（經傳譯員）因為我哋就會睇番警方嘅數字，我哋只係睇到有人受傷嘅意外嘅數字嘅啫，我知道譬如有一啲嘅意外，有一啲嘅車佢就係撞到嗰啲路邊嘅情況，但係佢哋就離開咗嗰啲車，所以佢哋就唔應該--佢哋唔會係呢啲所有嘅意外都係有紀錄嘅，因為好多時候嗰個司機，其實佢就離開嘅即刻，當中亦都係冇人受傷。

主席：（經傳譯員）但係好明顯呢個都係意外㗎，或者係有一個彎位，其實嗰啲車成日都會撞到嘅。

邱國鼎先生：（經傳譯員）咁係根據我哋嘅規例，就係只係有人受傷嘅意外先至係需要係向警方報告嘅，如果其他意外，佢哋就唔需要報警嘅，所以因此我哋就冇呢方面嘅意外嘅數字。

主席：（經傳譯員）我明你講乜，呢個係法律就話有人受傷嘅意外先至係要報警，但係如果架車係壞咗，可能嗰個司機係走咗嘅，但係好明顯其實係有意外嘅，譬如話有嗰個燈柱撞低咗等等。

邱國鼎先生：（經傳譯員）對唔住，我哋喺計算嗰個速度限制嘅時候，我哋就唔計呢一類嘅意外嘅。

主席：（經傳譯員）好。

黃女士：（經傳譯員）我又想問一問呢一個關於意外率嗰度，我就譬如話有好多人喺呢一段嘅車速嗰度，喺呢個道路嗰度超速，警方就發出咗好多張罰款通知書，我哋又知道有某一啲嘅意外嘅資料就會同呢一個嘅運輸署一齊去分享嘅，但係關於呢個定額罰款通知嘅呢啲資料會唔會係交畀運輸署去知悉㗎？我哋講緊超速

邱國鼎先生：（經傳譯員）我哋警方就發出呢個告票咁樣，或者係，呢個喺意外率裏面係冇反映出嚟。所以點解我哋考慮意外率嘅，淨係意外率，或者大部分嘅車都係有超速嘅，意外率仍然都係好細，所以其實個車速可能有問題嘅，就可能嗰個車速有時候會係太慢，所以咁多車都會係超速，而同時間個意外率仍然都係好低嘅。

主席：（經傳譯員）嗰個問題其實係警方有冇提供佢哋嘅數據，就係講關於就係佢哋關於超速發出嘅定額罰款通知書，關於某一個道路？

邱國鼎先生：（經傳譯員）冇，冇，冇，就係關於我哋檢討車速限制嗰方面嗰個工作嚟講，佢哋冇畀一啲呢啲資料我哋。

黃女士：（經傳譯員）你可唔可以畀一個大概嘅數字畀我哋？你講到就係關於呢個意外率就係由當區嘅工程師去睇嘅，而將佢係同當區嚟再去比較嘅，你可唔可以

大概嘅數字畀到我哋？個數字去到乜嘢位，然後你先至會去睇--工作小組會去睇一睇呢一個嘅路段需唔需要檢討個速度限制呢？

邱國鼎先生：（經傳譯員）我可以畀啲數字你，喺全港嚟講，意外率，全港，就唔係一個特別嘅區域，每年我哋都會發布呢個意外率嘅數字嘅，全港意外率，2017 年每百萬行車公里 1.15，意思就係話如果呢個道路嘅路段個工程師發現其實呢個意外率係高於 1.15，佢哋就會諗下要唔要檢討嗰個速度限制。

主席：（經傳譯員）你呢啲嘅資料有冇喺我哋嘅文件冊嗰度有㗎，喺邊一張文件呀？

邱國鼎先生：（經傳譯員）除咗意外率之外--或者我哋冇嗰個意外率睇到，佢哋都會係定期去檢討某一個路段嘅車速限制嘅。

主席：（經傳譯員）我哋喺邊度去睇到呢個嘅數字，就係講緊 2017 年每百萬行車公里嘅意外率？

邱國鼎先生：（經傳譯員）我哋運輸署每一年都會係有一個小冊子，係講緊道路交通意外嘅，喺運輸署嘅網頁都有嘅。

主席：（經傳譯員）黃律師，係咪喺我哋嘅文件冊當中？

黃女士：（經傳譯員）冇，我冇見過。我哋可能遲少少會提供。

主席：（經傳譯員）係喺網上可以睇到嘅？

邱國鼎先生：Yes.

主席：（經傳譯員）或者我哋睇一睇，睇下可唔可以搵得出嚟。係第幾頁呀？

邱國鼎先生：（經傳譯員）第 9 頁嘅。係，冇錯，就係呢一頁，我哋睇落少少，1.15，見到呢度。

主席：（經傳譯員）我哋可唔可以打印呢一份出嚟，然後我哋分發畀大家？

黃女士：（經傳譯員）就根據呢個圖表，呢度冇講話係全港㗎喎。

主席：（經傳譯員）會唔會喺呢啲數字嘅其他嘅部分可以睇到呢一個嘅形容呢？

邱國鼎先生：（經傳譯員）呢個嘅圖表就係講全香港嘅。

主席：（經傳譯員）但係會唔會好清楚喺邊一度講明呢個係一個全港嘅數字？

邱國鼎先生：（經傳譯員）我哋睇 2.13，圖表 2.13。

主席：（經傳譯員）我哋係咪去到...

邱國鼎先生：（經傳譯員）係。

主席：（經傳譯員）我睇到喇，「所有道路」？

邱國鼎先生：（經傳譯員）係，冇錯。

主席：（經傳譯員）唔該晒。

黃女士：（經傳譯員）喺呢一個圖表就係「所有道路」係咩嘢意思呢？係咪等如係呢啲嘅被選擇嘅道路嘅所有嘅道路還是...

邱國鼎先生：係全港所有道路。

黃佩琪女士：（經傳譯員）你之前嘅作供，就係話就嗰個工程師就會睇一睇嗰個意外率--全港嘅意外率，呢個圖表係咪其實可以幫到佢㗎？

邱國鼎先生：（經傳譯員）係，就全港嗰個就係話全港所有道路。

黃女士：（經傳譯員）你就會睇番你0.13嗰度，而唔睇1.15？

邱國鼎先生：1.15 should be on the bottom.

主席：（經傳譯員）1.15就係全港嘅意外率，而大埔道就係0.13，個意外率，係咪咁呀？你睇呢兩個數字，係咪？就係某一個路段同全港嗰個點樣比較？

邱國鼎先生：（經傳譯員）係喺呢個速度限制檢討個報告之中，嗰個工程師就會揀某一段嘅道路，然後我哋就去睇，睇番過去一年所有嘅意外數字，然後我哋就計出嗰個意外率。

主席：（經傳譯員）呢個係大埔道沙田其實係講緊係一個大少少嘅範圍，而唔係淨係嗰個工程師選嘅好細嘅路段？

邱國鼎先生：（經傳譯員）嗰個界限其實就係可能有唔同嘅。

主席：（經傳譯員）大埔道就可能有唔同嘅路段嘅，係咪呀？

邱國鼎先生：（經傳譯員）係嘅。

主席：（經傳譯員）呢個就呢個數字等如係所有呢啲嘅唔同嘅路段嘅總和嘅平均，係咪？

邱國鼎先生：（經傳譯員）係。

黃女士：（經傳譯員）你剛才嘅口供就提到就算冇呢個意外率，運輸署都會定期檢討不同路段嘅車速限制，你咁樣做嘅時候，個基礎係乜嘢？

邱國鼎先生：（經傳譯員）喺我哋嘅文件裏面，我哋都係提交過。

黃女士：（經傳譯員）係咪第10號文件呀？

邱國鼎先生：（經傳譯員）唔係，係我哋星期二提交嘅文件--唔係，應該係星期三，總言之係10月3號。係一個表嚟嘅。

黃女士：（經傳譯員）TD-5，喺TD-5第1817頁，係咪呢一份呢？

邱國鼎先生：（經傳譯員）係。

黃女士：（經傳譯員）喺嗰度，係1819頁，第12同埋第13段，或者我讀，因為咁就可以寫落去個紀錄嗰度，「我哋睇番TD嘅運輸署嘅文件，呢一啲嘅檢討會睇唔同嘅因素嘅，譬如意外率、實際嗰啲車嘅速度、嗰個道路嘅幾何環境，呢啲就會係定期做嘅，亦都會喺工作小組嗰度傾。同埋所有道路嘅車速檢討都會係定期咁樣做嘅，而有關嗰個頻率就會睇番唔同種類嘅道路。」

你就話道路可以分為三種嘅，主要幹道，就係每三十六個月，主要嘅道路，四十八個月，或者係鄉村嘅道路就係六十個月，即係五年嘅。你可唔可以話畀我哋聽咩嘢叫「主幹道路」呢？

邱國鼎先生：（經傳譯員）即係嗰啲最主要嘅路，亦都係最高標準，包括高速公路，通常係會將唔同嘅區域或者區係連結埋一齊嘅道路，譬如話由九龍去到新界，我哋喺呢一方面係有定義嘅，我哋係有定義嘅，即係對於主幹道，...

黃女士：（經傳譯員）你一係讀出嚟，一係畀個副本我哋。

邱國鼎先生：（經傳譯員）主幹路係有兩種嘅，第一，就係鄉村主幹道，呢啲就係將嗰啲人口中心係會連結埋一齊嘅，甚至係有唔同高度嘅入口或者出口嘅；如果係喺城市方面嘅主幹道，就會係「將唔同嘅人口中心連結埋一齊，佢係會將行人係分開同埋係有唔同嘅高度或者係層次嘅。

黃女士：（經傳譯員）好。另外嗰啲區域或者係幹路，又係啲咩嘢嚟？

邱國鼎先生：（經傳譯員）區域幹路就係話將市區嘅道路組成一個主要網絡嘅，佢哋亦都係有好高嘅容量，同埋進入呢啲道路係有限制嘅，同埋係有二十四小時不准停車嘅一啲限制嘅。

黃女士：（經傳譯員）即係話唔單只係指市區嘅道路，亦都包括新界嘅道路？總言之係符合呢個定義，就包括？

邱國鼎先生：（經傳譯員）或者係新市鎮，因為新市鎮嘅性質同市區都好相近。

黃女士：（經傳譯員）唔好意思，我亦都要講番主幹道嗰度，係咪大概都一定係市區嘅呢？抑或都包括埋新界呢？

邱國鼎先生：（經傳譯員）兩樣都包括嘅。

黃女士：（經傳譯員）鄉村嘅道路又點呢？

邱國鼎先生：（經傳譯員）鄉村嘅道路係會將比較細嘅人口中心連結埋一齊，或者係將嗰啲康樂嘅地方同主要道路網絡連結埋一齊，佢會係有一啲嘅--個容量未必係好高嘅。

黃女士：（經傳譯員）喺嗰個註腳 1 嗰度，你就話喺大部分嘅道路，如果個時速係符合嗰個道路嘅特徵同埋佢嘅設計嘅容量，就唔會需要改變佢嘅時速嘅，所謂現行嘅道路種類係咪就係呢三類呢？

邱國鼎先生：（經傳譯員）你講緊大埔道？

黃女士：（經傳譯員）唔係，一般嚟講，你有個講法，就話現行嘅道路種類，係咪就係你 13 段所講嘅道路種類呢？係咪就係主幹道、主要幹路同埋鄉村道路呢？

邱國鼎先生：（經傳譯員）其實而家現行嘅道路種類係包括晒所有嘅道路嘅。當一個工程師設計一條道路嘅時候，佢要自己打算嗰個設計嘅時速係幾多嘅，如果一條路係要設計成每小時 50 公里做時速限制嘅，個道路環境或者周圍嘅環境有咩嘢改變都好，就算你檢討幾多次都好，嗰個時速都會係維持喺 50，都唔會有機會去到 70，因為嗰個原本設計嗰個時速就係 50，係考慮到有關嗰個周圍嘅限制嘅。

主席：（經傳譯員）但係如果有好多意外，會唔會考慮將佢減低呢？

邱國鼎先生：（經傳譯員）根據我哋而家嘅時速嘅系統，最低都係 50 公里。

主席：（經傳譯員）即係你唔會考慮再低啲嘅時速？

邱國鼎先生：（經傳譯員）我哋喺個文件都有提過。

主席：（經傳譯員）係，係，我哋之後可以分開再講呢一點。

黃女士：（經傳譯員）其實仲有第二部分嘅，改變時速係唔會需要嘅，除非係有一個咁嘅要求，或者除非嗰個路段嘅意外率係高過全港意外率，呢度有兩個但書，第一，就係話有要求...

主席：（經傳譯員）你而家讀緊邊度？

黃女士：（經傳譯員）註腳 1，主席，對唔住，1819 頁。即係話有要求，咩嘢意思呀？

邱國鼎先生：（經傳譯員）呢個就係回應我頭先所講嘅，就係話有兩個方法係可以引發一個檢討嘅，第一，就係定期嗰個，即係我哋 13 段所講嗰啲定期嘅檢討；第二，要引發時速檢討，就係公眾人士要求或者係意外率。意外率我頭先已經解釋咗，係同全港嗰個平均去比較。

主席：（經傳譯員）公眾嘅要求就有可能係話居民有投訴，因此區議會就向你反映，係咪呢？

邱國鼎先生：（經傳譯員）公眾人士。

主席：（經傳譯員）係咪要通過個區議會呢？

邱國鼎先生：（經傳譯員）有可能。

主席：（經傳譯員）但係喺大埔道好明顯已經有公眾要求，係咪？你覺唔覺得嗰個就係公眾要求呀？

邱國鼎先生：（經傳譯員）當我哋收到區議會議員嘅要求，我哋係會考慮嘅。

黃女士：（經傳譯員）你就話當你收到區議員嘅要求嘅時候，你就話「我哋」，「我哋」係邊個呢？

邱國鼎先生：（經傳譯員）一般嚟講，區議會嘅會員就會係接觸我哋區嘅工程師。

黃女士：（經傳譯員）即係話會係由區嘅交通工程師去審議，睇下佢會唔會係達到一個意外率，然後先至會交到去工作小組，係咪呢？

邱國鼎先生：（經傳譯員）係嘅。意外率係其中一個考慮，佢哋亦都會考慮個環境係咪有重大嘅改變。

黃女士：（經傳譯員）咩嘢叫做「環境有重大改變」？

邱國鼎先生：（經傳譯員）譬如話有啲新嘅發展，譬如房地產嘅發展，係會影響嗰啲唔同車輛嘅種類或者係加咗交通流量呀咁。

黃女士：（經傳譯員）有冇一個機制係公眾人士或者區議員係同交通工程師嘅考慮嘅意見係不一致嘅，如果係咁，公眾人士可以點做呢？除咗不斷咁同嗰個交通工程師講，有冇一個檢討嘅機制讓呢件事可以去到車速檢討工作小組嗰度呢？

邱國鼎先生：（經傳譯員）根據我哋慣常嘅做法，車速檢討其實係好技術性，我哋真係要倚賴交通工程師去做咗車速檢討，然後提議有關嘅路段應有嘅車速限制。

黃女士：（經傳譯員）關於你講呢個現行嘅做法，呢一個交通嘅工程師，如果個意外率未達到有關嘅準則，雖然佢收到唔同嘅投訴，而區議員又唔滿意嗰啲投訴，就要求個工程師再檢討，個交通工程師會唔會就因此去做一個當地嘅視察？係咪一個慣常做法呢？

邱國鼎先生：（經傳譯員）係一般嚟講，交通工程師都會同有關嘅區議員一齊去實地視察，可能就算未有足夠嘅理由去引發一個時速檢討，佢都可以實地睇下可唔可以有啲交通嘅改善嘅措施。

主席：（經傳譯員）你意思係咩嘢呀？係咪即係話嗰啲指示牌或者喺地面畫一啲箭咀咁樣？

邱國鼎先生：（經傳譯員）有時如果有行人過路嘅措施，佢哋就會覺得個車速太高，行人過路比較難，就可以做啲嘢嘅。

黃女士：（經傳譯員）喺同一頁，我想問你關於呢一個表下面嗰一段嘅，喺過去五年，我哋檢討過一百四十三個路段嘅時速限制，亦都喺工作小組嗰度傾過嘅，

關於一百四十三個路段，有冇將佢哋分類，係屬於邊類嘅道路呢？

邱國鼎先生：（經傳譯員）有嘅，我有個紀錄喺度。

黃女士：（經傳譯員）你可唔可以畀啲數字我哋呢？

邱國鼎先生：（經傳譯員）我而家睇一睇我係咪手上有資料先。我有一個表係列明呢一百四十三個路段屬於咩嘢嘅道路嘅種類，但係我就冇一個總數話係邊一類有幾多個路段嘅。

黃女士：（經傳譯員）首先，你可唔可以畀一個平均數字我哋，每一年係檢討幾多個路段呢？

邱國鼎先生：（經傳譯員）平均嚟講，最少係二十四個路段，每一年。

黃女士：（經傳譯員）係咪一個固定嘅數字嚟㗎，抑或可以就唔同嘅情況改變？

邱國鼎先生：（經傳譯員）呢個係最細嘅數字，即係最少要檢討二十四個路段。

黃女士：（經傳譯員）你點樣選擇呢二十四個路段呢？

邱國鼎先生：（經傳譯員）係基於區域交通工程師嘅考慮。

黃女士：（經傳譯員）區域嘅工程師考慮就會基於你頭先講嘅三個準則？

邱國鼎先生：（經傳譯員）仲有就係公眾要求同埋意外率。

黃女士：（經傳譯員）有關嘅資料會唔會公布嘅呢？即係關於呢個一百四十三路段又好，二十四路段又好。呢啲咁嘅資料會唔會公布嘅呢？等公眾知道工作小組就會檢討呢二十四個路段，然後向工作小組提供意見，咁佢先開會呢？

邱國鼎先生：（經傳譯員）唔會嘅，但係最後工作小組建議改變個時速嘅話，我哋就會去諮詢區議會。

黃女士：（經傳譯員）呢一段你都有話喺呢一百四十三個路段之中，有七個工作小組就係建議改變個時速限制嘅，首先，你可唔可以話畀我哋聽呢七個路段係屬於啲咩嘢嘅道路種類呢？

邱國鼎先生：（經傳譯員）呢七個路段，有兩個係主要幹路，一個就係區嘅幹路，有兩個係高速公路嘅連接路，而一個就係鄉村道路，即係話兩個係主要幹路、兩個就係區嘅幹路、一個就係鄉村道路。

黃女士：（經傳譯員）關於時速，你就話有改變過，點樣改變法呢？

邱國鼎先生：（經傳譯員）有五個路段就係減咗速，有兩個路段係加咗嗰個時速限制。

黃女士：（經傳譯員）有邊啲嘅路段係減咗速嘅呢？

邱國鼎先生：（經傳譯員）你意思係要路段嗰個名呀？

主席：（經傳譯員）你講種類定係個名呀？

黃女士：（經傳譯員）我意思首先就係個種類，如果你都可以，甚至講埋啲咩路段就好喇，同埋邊一年。

邱國鼎先生：（經傳譯員）好，我用時序嚟講，2013 年，關於減咗速嘅路段，一個係主要幹路，一個區嘅幹路，一係本地--當地嘅幹路，一個就係鄉村道路，一個就係高速公路嘅連接路，就有呢五個路段就係減咗時速限制。另外有兩個路段就係增加咗時速限制，一條就係主要幹路，另外一條就係高速公路嘅連接路。

黃女士：（經傳譯員）我留意到時間，主席，但係我都想再探索一下。如果你可以提供多啲資料，關於 2015 年呢五種道路種類車速限制係降低咗，同埋我哋關注嘅某啲路段，同埋點解會減咗個車速限制嘅，同埋嗰啲嘅工作小組有關嘅會議紀錄。

主席：（經傳譯員）證人回答問題之前，我要問下你問呢啲嘅問題有咩關連呢？

黃女士：（經傳譯員）主席，係嘅，我想知道有咩理據去傾某啲路段，工作小組；第二，就係工作小組考慮咗咩，同埋喺工作小組考慮區議會投訴嘅時候，畀幾多比重去考慮。如果唔需要睇番會議紀錄都回答到呢兩個問題嘅話，我都好接受嘅。

主席：（經傳譯員）最終，你要知道呢個資料有咩作用？

黃女士：（經傳譯員）去睇下我哋可唔可以改善工作小組嘅工作，又或者係喺檢討道路嘅車速限制嘅慣常做法係點，如果有收到投訴嘅時候，而唔係淨係睇嗰個嘅意外率嘅，喺全港，因為似乎係人工做出嚟嘅。

主席：（經傳譯員）你知唔知道呢一個大埔公路段嘅基準係幾多？

黃女士：（經傳譯員）係嘅。

主席：（經傳譯員）好。畀時間你搵番嗰啲會議紀錄出嚟。

黃女士：（經傳譯員）你答番頭先嘅問題之前，我再問下其他問題，講番呢一個道路速度限制檢討嘅工作小組，我想問下點解起初會成立呢個工作小組呢？我哋有啲資料--或者其實你提供呢啲資料嘅，就係話喺 2000 年嘅時候成立呢個工作小組嘅，係檢討車速嘅，可唔可以解釋下點解 2000 年會成立呢個小組呢？

邱國鼎先生：（經傳譯員）工作小組係喺 2000 年成立，當年，我記得有立法會文件解釋係點解成立呢個工作小組檢討車速限制，因為當時有好多公眾查詢或者意見，就係話某啲嘅路段嗰個車速限制太低，而警方喺嗰啲路段又會執法，所以係公眾嘅一個要求--幾強烈嘅要求，我哋應該去檢討一下道路嘅車速限制，去

睇下有冇邊一啲路段嗰個車速限制可以提高。

主席：（經傳譯員）係邊個建議成立工作小組去處理公眾關注呢？

邱國鼎先生：（經傳譯員）運輸署。

主席：（經傳譯員）唔該。係咪喺立法會文件都有指出㗎？

邱國鼎先生：Yes.

黃女士：（經傳譯員）我哋有立法會文件而家喺畫面度見到嘅，我哋亦都會派發文件。

主席：（經傳譯員）喺文件冊入面有冇？

黃女士：（經傳譯員）對唔住，主席，暫時而家未加入去我哋文件冊，呢個係喺立法會嗰啲文件嗰度搵出嚟嘅，呢個係運房局係2000年嘅1月24號準備嘅文件。你頭先講嗰個係咪就係呢份嘅立法會文件，你頭先嘅證供？

邱國鼎先生：（經傳譯員）係嘅。

黃女士：（經傳譯員）唔該。而家為咗紀錄起見，我而家要講出呢一個標題係「香港車速限制」，係喺立法會嗰度交通事務委員會，由運房局提供嘅，呢一個文件就會講三件事嘅，就係車速限制分類嘅結構，同埋係點樣喺香港道路上設置道路車速限制、點樣檢討車速限制同埋交通意外同埋車速限制嘅關係。

到咗第3段，佢係講緊話譬如係低速嘅，就係喺市區或者係新市鎮嘅密集人口地區就係時速50公里，而中階嘅就係喺市區以外或者係新市鎮嘅密集人口地區就係時速70或者80嘅，...

主席：（經傳譯員）你繼續講之前，香港用呢一個方法有三個階級嘅，係已經用咗幾耐？

邱國鼎先生：（經傳譯員）我諗係呢個文件發出嘅時間差唔多。

主席：（經傳譯員）即係2000年？

邱國鼎先生：（經傳譯員）係，但係喺2000年之前，喺香港道路嘅車速限制一般都係分做呢三級嘅，喺呢個文件交畀立法會嘅，我哋就清楚指明香港係有三級嘅車速限制，呢一個結構，即係話有三個級別嘅，而家係咩狀態？

邱國鼎先生：（經傳譯員）仍然有效，...

主席：（經傳譯員）唔係，我問佢個地位係點樣嘅？係咪運輸署採納嘅方式？係咪條法例？

邱國鼎先生：（經傳譯員）唔係。

主席：（經傳譯員）咁係咩嘢呢？

邱國鼎先生：（經傳譯員）係我哋而家嘅做法。

主席：（經傳譯員）即係運輸署做法？

邱國鼎先生：（經傳譯員）係行政嘅做法。

主席：（經傳譯員）即係政府嘅做法？

邱國鼎先生：Yes.

主席：（經傳譯員）即係運房局嘅政策嘅做法？

邱國鼎先生：（經傳譯員）係。

主席：（經傳譯員）喺其他文件有冇提及㗎？

邱國鼎先生：（經傳譯員）除咗呢份文件，我就唔知道仲有咩嘢文件係關於車速限制嘅。

黃女士：（經傳譯員）主席，我諗更加準確咁講，就係政府嘅做法係喺運輸署嘅運輸設計計劃手冊嗰度，我就唔可以將佢講話一定係政策嘅做法。

主席：（經傳譯員）呢個係交通設計規劃手冊？

陳美寶女士：Yes.

主席：（經傳譯員）唔該。我哋已經過時㗎喇，我而家係等你黃大律師去選擇幾時完成，或者你講完某一個部分之後。

黃女士：（經傳譯員）你講過呢個手冊嘅日期係幾時㗎？

邱國鼎先生：（經傳譯員）你講係嗰個交通設計及規劃手冊？

黃女士：Yes, the transport planning...

主席：（經傳譯員）你應該話不時有更新嘅。

邱國鼎先生：（經傳譯員）我哋亦都有交一份畀秘書處嘅。

主席：（經傳譯員）係幾時開始有呢個手冊？係咪50年代、60年代？

邱國鼎先生：（經傳譯員）我要去查核一下，但係據我理解，係根據英國一啲類似嘅手冊係制定嘅，再睇番香港嘅情況。

主席：（經傳譯員）係呀，我都睇過香港大學嘅一份副本，我諗係好似 60 年代寫㗎喇，係喺英國。

邱國鼎先生：（經傳譯員）可能係第一版，冇錯。

黃女士：（經傳譯員）呢一個車速限制嘅結構，喺手冊入面寫嘅從來有冇更新過或者檢討過？

邱國鼎先生：（經傳譯員）係，有關嘅章節我哋都係不時會更新嘅。

黃女士：（經傳譯員）你提到定期更新係有咩嘢條件你就去更新呢？

邱國鼎先生：（經傳譯員）如果有任何更改，譬如話海外嘅做法，我哋都會係跟番去更新嘅。

黃女士：（經傳譯員）或者喺下一節我哋再講詳細啲，但係我而家講番呢份立法會文件，去快啲講埋呢份嘅文件，然後我哋可以休息。我哋講到係呢份文件嘅第6段，佢提到喺1999年個車速限制有檢討過，「喺英國就有一個嘅獨立嘅交通研究嘅院所，亦都係喺全球領先地位嘅，叫TRL，就做過一個研究，關於香港嘅車速限制嘅。」而跟住嗰一段就係講佢嗰個結果。

我想問嘅就係除咗1999年開始去請英國嘅呢一個嘅交通研究實驗所去做一個研究之外，喺近年有冇請過呢一間機構做研究呢？

邱國鼎先生：（經傳譯員）冇。

黃女士：（經傳譯員）即係呢個係唯一一個做過嘅？

邱國鼎先生：（經傳譯員）係。

主席：（經傳譯員）呢個係咪公開嘅文件嚟㗎，呢份顧問報告？

邱國鼎先生：（經傳譯員）應該唔係，可能係內部嘅顧問報告。

主席：（經傳譯員）可唔可以提交呢個報告畀我哋？

邱國鼎先生：（經傳譯員）可以。

陳美寶女士：（經傳譯員）可以，主席。

主席：（經傳譯員）多謝你提供呢個文件。

黃女士：（經傳譯員）除咗1999年之外，就冇一個主要嘅研究或者顧問研究係睇番喺外國嘅做法，去比較香港嘅車速限制嘅結構？

邱國鼎先生：（經傳譯員）冇嘅，對檢討車速限制冇一個特別嘅顧問報告，但係我哋喺文件都提到過啲低速嘅地區，喺歐洲一啲嘅城市係用啲較低嘅車速限制嘅，譬如係時速20英里，即係等如30公里，我哋都有研究過呢啲嘅措施喺香港是否合適。

黃女士：（經傳譯員）係，明白。可能係道路安全嘅審核小組嘅新嘅任務喇？

邱國鼎先生：（經傳譯員）唔係，呢樣嘢唔同嘅，呢個研究其實係同道路設計，睇下

用咁樣嘅措施係咪適合司機喺道路上用咁樣嘅低速去行駛。

陳美寶女士：（經傳譯員）即係話呢個道路安全審核小組無論係有冇喺度，我哋都已經係開咗一個嘅試驗計劃同埋研究㗎喇，關於個低速嘅地帶。

主席：（經傳譯員）係咪有好多有關嘅資料㗎？

陳美寶女士：Yes.

黃女士：（經傳譯員）你幾時開始做一個低速區嘅研究？

邱國鼎先生：（經傳譯員）我哋喺做易行城市嘅時候嘅研究開始嘅，呢個研究就係2017年12月開始做嘅。

主席：（經傳譯員）易行研究係咩嘢意思呀？

邱國鼎先生：（經傳譯員）即係檢討我哋現有嘅標準同埋設計，睇下有冇一啲措施或者係有創意嘅措施可以改善行人嘅步行環境去鼓勵用家多啲行路。

主席：（經傳譯員）係喺倫敦發展起嚟嘅，係咪呀？

邱國鼎先生：（經傳譯員）倫敦係我哋其中一個參考嘅地方。主席，呢個都幾有關係嘅，我都留意到喺同專家嘅討論期間講到一啲路段係喺倫敦，呢個就係我哋參照嘅地方，去做一個易行嘅研究嘅時候，去改善行人嘅步行環境嘅時候，其實亦都係睇下點樣可以改善道路同埋行人路去提高道路安全同埋改善環境嘅氣氛嘅。亦都係某啲路段係提及到嗰啲嘅車速限制都係應該係考慮嘅。

主席：Yes. The two go together, don't they?

陳美寶女士：（經傳譯員）係呀，兩樣有關嘅。我都想提到我哋喺香港係聚焦喺市區某啲嘅路段，尤其係香港島。

黃女士：（經傳譯員）呢一個嘅易行或者係低車速區嘅研究係有咩嘢委員？

邱國鼎先生：（經傳譯員）我哋委任顧問做嘅？

主席：（經傳譯員）係邊個？

邱國鼎先生：（經傳譯員）Mott MacDonald，Mott MacDonald顧問公司。

黃女士：（經傳譯員）或者喺呢個時間暫停，主席，都合適？

主席：（經傳譯員）係。我哋而家就會暫停，不過我要講，喺今日較早嘅時候我都提過，我哋會將而家一路打嘅謄本都會交畀羅教授，睇下佢最尾有冇問題，但係今日都係要暫停，呢個聆訊再恢復嘅時候，佢可能會問一啲嘅問題。我哋可能而家係講緊某個題目嘅，佢會去問番其他啲題目，但係佢會有機會咁樣做嘅。

而家我哋會暫停，然後再另定各方都方便嘅日期，即係律師同埋陳女士同埋

1 你啲同事，佢哋去搵一個日期，下一次再恢復聆訊。

2 陳美寶女士：（經傳譯員）唔該晒主席。

3 主席：（經傳譯員）我哋而家押後去另外一日繼續聆訊。

4

5 2018年10月6日

6 下午5時48分聆訊押後
