22 Holdings Ltd, for 2012. On that page, you will see the  
23 members of the board of directors, and in particular you  
24 will see the names of the independent non-executive  
25 directors.

26

1           We can see those listed as Dr Leung and Dr Chan,  
2           present this morning; Dr Eric Li Ka Cheung,  
3           Mr Gordon Siu Kwing Chue, and Prof Liu Pak Wai. We see  
4           the list of the independents.

5           If I could then ask you to go to KMB-5, at  
6           page 1896. This is the list of the company directors,  
7           as set out in the annual report for the year 2016. We  
8           can see by reference to the asterisk the independents,  
9           the independent non-executive directors. Again, the  
10          name list: Dr Leung, Dr Chan, Dr Eric Li, Mr Siu and  
11          Prof Liu.

12          I won't take you through each of the reports between  
13          2012 and 2016, but you will, I think, confirm that there  
14          were no changes in the independents during the course of  
15          those years; is that correct?

16       DR NORMAN LEUNG: Correct, Mr Duncan.

17       MR PETER DUNCAN: Thank you.

18          Then if I could take you, please, to KMB-6 at  
19          page 2108. This is a list of directors for the year  
20          2017. We can see, at that page, 2108, that the  
21          directors have changed, in that Mr Gordon Siu is no  
22          longer an independent director.

23       DR NORMAN LEUNG: Correct, Mr Duncan.

24       MR PETER DUNCAN: And Mr Tsang Wai Hung has been appointed  
25          as an independent non-executive director.

1 DR NORMAN LEUNG: Correct, Mr Duncan.

2 MR PETER DUNCAN: Now, I'm going to ask a couple of  
3 questions about the independent non-executive directors,  
4 and please understand I am asking these questions with  
5 the utmost respect to those who have served and continue  
6 to serve as independent non-executive directors.

7 Firstly, is it a correct observation that none of  
8 the independent non-executive directors have  
9 a background of safety matters?

10 DR NORMAN LEUNG: Well, specifically safety matters -- well,  
11 you can say that we know -- personally, I have been  
12 involved with bus operation for a number of years. In  
13 fact, I have been a director of KMB since year 2000, so  
14 for 17 years. And of course we care about the new  
15 buses, you know, for example, we have to upgrade our  
16 buses with the latest model, with the latest, you know,  
17 technology. And very often the new buses incorporate  
18 what we call the safety features. So we spend money in  
19 upgrading our buses, say from Euro IV and then to Euro V  
20 and now to Euro VI. All this is buses with the latest  
21 technology.

22 In that aspect, we ensure that the best available  
23 buses are purchased by KMB and Long Win, in that aspect.

24 MR PETER DUNCAN: I think we are all aware of the fact that  
25 new people bring new ideas to organisations.

26

1 DR NORMAN LEUNG: Yes. Yes.

2 MR PETER DUNCAN: Does the company have any policy with  
3 regard to how often the benefit of new ideas and  
4 therefore new people as independent non-executive  
5 directors might be appointed? Is there any particular  
6 policy in that respect?

7 DR NORMAN LEUNG: We have a number of board committees, and  
8 different directors serve on different committees, with  
9 regard to their expertise, so to speak. That's why you  
10 will see that Mr John Chan, for example, was formerly  
11 the managing director of Kowloon Motor Bus and Long Win  
12 Bus, and that's why he has been requested to serve on  
13 the standing committee of the board, which is really the  
14 executive committee of the board, and he also serves on  
15 the nomination committee, and the remuneration committee  
16 as well; whereas Prof Liu Pak Wai, for example, is  
17 a very distinguished economist, he serves on the board  
18 to offer strategic development of our bus company, just  
19 to name them as an example, Mr Duncan.

20 MR PETER DUNCAN: Thank you, Dr Leung.

21 I want to now go back to a matter which was raised  
22 at one of the previous hearings. I think it was  
23 actually Day 13. This was the subject of real-time  
24 monitoring. You recall this issue that arose on Day 13,  
25 in particular when I raised with you, with the

26

1           representatives from KMB, the evidence that the  
2           committee had heard from a Mr Alok Jain; do you remember  
3           that issue coming up?

4           You will recall that Mr Jain's evidence -- I will  
5           give everybody the reference just for the record; it's  
6           Day 13 at page 41 -- but his evidence was to the effect  
7           that in 2014 -- sorry, Day 13, page 41 is a summary of  
8           his evidence, but as I put it to you, his evidence was  
9           that in 2014, the company had considered a project which  
10          had involved the real-time monitoring of driver  
11          behaviour, but this project had been scrapped.

12          Do you remember that was the nature of the evidence  
13          that I raised? Do you recall that? Do you recall my  
14          raising that?

15   MR LEUNG KIN WANG: (Via interpreter) Yes.

16   MR PETER DUNCAN: Thank you. And your response -- and this  
17          was by Mr Leung -- if I understand it correctly, was  
18          that the project to which Mr Jain had been referring was  
19          a real-time operations management system, and that had  
20          nothing to do with driving safety. Do you recall that  
21          was what Mr Leung told us?

22   MR LEUNG KIN WANG: (Via interpreter) We were talking about  
23          giving a real-time alert to the bus captain,  
24          over-speeding or sudden acceleration or harsh braking.

25   MR PETER DUNCAN: Yes, and your recollection was that what  
26

1 Mr Jain's project, if I could put it that way, entailed  
2 was not that; it was, rather, a real-time operations  
3 management system. Correct?

4 MR LEUNG KIN WANG: (Via interpreter) Correct.

5 MR PETER DUNCAN: Again, just for the record, I will give  
6 members the appropriate references in the transcript.  
7 It's Day 13, page 41, lines 10 to 14, and then page 42  
8 at line 23.

9 In the light of that apparent difference, the  
10 chairman invited you to provide to the committee some of  
11 the presentations which had been made during the course  
12 of consideration of the project to which Mr Jain had  
13 been referring. Amongst the material that the bus  
14 company has provided since the last hearing have been  
15 a number of presentations. Do you recall that those  
16 presentations have been provided?

17 MR LEUNG KIN WANG: (Via interpreter) We have provided some  
18 information to the committee, I believe.

19 MR PETER DUNCAN: Thank you. I just want to refer to some  
20 of those presentations and raise some matters with you  
21 in this context, if I may.

22 First of all, could you turn up KMB-11, please.  
23 Could you go to page 4492, please.

24 Page 4492, you will see the cover of a particular  
25 document, "The Kowloon Motor Bus Company (1933) Ltd,

26

1 system specifications for real-time operations  
2 management system (ROM)", and this is a document which  
3 runs from page 4492, and it goes through to page 4530,  
4 if I understand it correctly.

5 Now, at page 4493, we will see the table of contents  
6 in this presentation. Part II is referred to as the  
7 introduction and the scope of work.

8 If we then go to page 4495, we will see some of the  
9 details with regard to the introduction and the scope of  
10 work, and you have, under part II, item 1,  
11 "Introduction" -- if I could bring your attention,  
12 please, to item 1.4:

13 "The main functions of ROM are to assist dispatchers  
14 from operations control centres and terminus supervisors  
15 from bus termini to:

16 Manage bus departures and bus trips.

17 Handle special situations that cause disruptions to  
18 bus services."

19 Then this is the one which I would bring your  
20 particular attention to, 1.4.3:

21 "Communicate with drivers, via voice, text and sound  
22 recordings for any information or special messages that  
23 needs driver's attention and action."

24 So do I conclude from that that the system did  
25 envisage real-time contact between the system at the bus  
26

1           headquarters and the individual drivers?

2       MR LEUNG KIN WANG:   (Via interpreter) The one that we  
3           developed subsequent to this did not have this feature.

4       MR PETER DUNCAN:   Mr Jain's evidence I think was that this  
5           was one of the aspects that was being considered, but it  
6           was scrapped.   So was real-time communication with the  
7           drivers at least part of the consideration?

8       MR ROGER LEE:   (Via interpreter) Last time, our operations  
9           director said it clearly.   This function would involve  
10          a central control centre, to remind bus captains over  
11          the speed of the bus, and also the need to pause at some  
12          bus stops so as to have a proper distance between buses.

13          Of course, in this course of action, there could be  
14          communication with bus captains.   But, as we said last  
15          time, it would not be proper to distract the bus captain  
16          while he is driving.   Also, this function may take the  
17          place of the function discharged by the dispatchers or  
18          the management people at the bus termini.

19          So we did not think there would be the need to have  
20          real-time verbal communication with bus captains while  
21          they are on duty and it would be better to enhance the  
22          functions discharged by the personnel, management  
23          personnel, at the bus termini.

24       MR PETER DUNCAN:   Yes.   I'm not asking at the moment  
25          questions with regard to the conclusion.   All I'm asking

26

1 is whether, in the project that was being considered by  
2 Mr Jain, which I understand to be part of this  
3 presentation, there was, as part of that programme,  
4 consideration as to whether there should be real-time  
5 communication with drivers with regard to their  
6 behaviour, including of course speed excesses.

7 So do I understand correctly from paragraph 1.4.3  
8 that this was at least part of the project which was  
9 being considered? Leave aside the conclusions.

10 MR ROGER LEE: (Via interpreter) Well, it is put down here.

11 Of course, there was such consideration. It was back in  
12 2013/2014. At that time, the view taken was that  
13 something should be done centrally so that the real-time  
14 operation management should be more comprehensive, so  
15 that, by some means, the central controls should be able  
16 to communicate with bus captains.

17 But we are now actually talking about the black box  
18 and geo-fencing, and the alert would be given to bus  
19 captains on board the bus and that would cover the  
20 behaviour of the bus captain. We are at this stage now.

21 MR PETER DUNCAN: Yes. Thank you. If I could just, before  
22 I leave this particular document, refer you to some  
23 other passages which also seem to refer to this  
24 real-time communication with drivers. I think you will  
25 see at page 4497 -- you see under the heading,

26

1 "Functional requirements" a heading, "Operations control  
2 centre system", and at 1.1.4:

3 "Allow dispatcher to draw a certain area on the map  
4 so that buses within the boundary of the drawn area are:

5 a. Highlighted for sending text and voice  
6 messages.

7 b. Used for speed calculation so that the average  
8 speed of highlighted area are displayed."

9 If I could also bring your attention to the next  
10 heading at page 4497, "Core system functions", that's  
11 item 1.2, and then we have a subheading, "Operations  
12 management", and at (a)(7), which you actually find on  
13 the following page, 4498, we have this entry:

14 "Regulation of bus departures are done automatically  
15 based on a set of rules with elements of the rules  
16 configurable. The configurable items should include but  
17 not limited to the followings".

18 Then item (iv) mentions "driver working guidelines".  
19 So that would cover, would it not, the driving behaviour  
20 of drivers; yes?

21 MR ROGER LEE: (Via interpreter) Well, the regulation here  
22 refers to the distance between the vehicles from  
23 a safety perspective.

24 Allow me to say the following. On any one day, we  
25 have at its peak over 3,000 buses running on the road at  
26

1           any one time, and they can be found all over Hong Kong,  
2           including outlying islands, that is Lantau. If you have  
3           a central control system to control all the 3,000 buses,  
4           of course, if we want to have precise information about  
5           them, it will mean it is quite a difficult task.

6           But here it is quite clear this is about the safe  
7           distance from preceding or following vehicles.

8   MR PETER DUNCAN: If I could then refer you, please, to --

9   CHAIRMAN: I'm sorry, could you elaborate what you mean by

10          "the safe distance"? Is this to do with the bunching of  
11          buses?

12   MR ROGER LEE: Yes.

13   CHAIRMAN: That's nothing to do with safety, is it?

14   MR ROGER LEE: (Via interpreter) Well, in fact, bus drivers  
15          do not know how far he is away from the preceding bus,  
16          so he will just be following his speed. For passengers,  
17          buses departed at different times, but then roads get  
18          congested and, as a result, the preceding bus and the  
19          following bus will have a longer and longer headway. It  
20          means that passengers would have to wait in such a way  
21          that he has got a bunch of buses arriving. This is  
22          quite similar to the case of train service, but then  
23          trains have to stop at platforms. Many passengers would  
24          have to board and alight, and so they would stop there  
25          for a longer time, and you can more easily control the

26

1 distance between trains. This is not the same for  
2 buses.

3 This is because we don't want to have the bunching  
4 together of the buses. That's not desirable. Now,  
5 of course, we have got something on mind to inform the  
6 passengers about the arrival time, so it's not  
7 safety-related.

8 CHAIRMAN: No, this is the efficient delivery of service,  
9 nothing to do with safety.

10 MR ROGER LEE: Correct. Correct.

11 CHAIRMAN: Thank you, Mr Duncan.

12 MR PETER DUNCAN: Thank you, Mr Chairman.

13 Finally in this document, can I just bring your  
14 attention to page 4501, and the heading, "Driver  
15 communication system", under the overall heading of  
16 "Functional requirements". At 2.1:

17 "A driver console will be installed on each bus.

18 The driver console will provide the following functions:

19 2.1.1 Display colour graphics and text data".

20 Then at item (c):

21 "Display real-time indicators showing driving

22 behaviour of the driver with information available from

23 the OBD. For abnormal driving behaviour, different beep

24 sounds shall be prompted to the driver. A global

25 parameter shall be provided to activate or deactivate

26

1           this function."

2           So, at least for consideration, was there suggested  
3           a real-time system whereby abnormal driving behaviour  
4           would be detected and would be communicated to the  
5           driver?

6       MR LEUNG KIN WANG: (Via interpreter) Well, I think this is  
7           what we call the on-board driver feedback device. We  
8           are in the process of installing such a system.  
9           Previously, the design was such that it would be  
10          incorporated into the driver console, but today, in  
11          fact, we have got a separate feedback device and the  
12          real-time indicators are such that we have got lights as  
13          well as audio alerts. That's for every bus.

14       MR PETER DUNCAN: Right. I'm going to move now to another  
15          matter which came up at the last hearing -- this is on  
16          Day 14 -- when the committee heard from the  
17          representatives of the company that contrary to its  
18          earlier intention, the company had decided not to  
19          incorporate a tilt alarm in the buses.

20               Do you recall that evidence?

21       MR ROGER LEE: (Nodded head).

22       MR PETER DUNCAN: I will again give the committee  
23          a reference to the transcript. It's Day 14 at pages 126  
24          to 130.

25               If I understand Mr Leung's evidence correctly, the  
26

1 reason for that was that neither ADL nor Volvo could  
2 recommend a particular tilt angle. Is that a correct  
3 recollection?

4 MR LEUNG KIN WANG: (Via interpreter) Correct.

5 MR PETER DUNCAN: And if the angle was too narrow, it would  
6 not be meaningful; it would mean nothing. And if, on  
7 the other hand, the angle was too broad, it would be  
8 dangerous. Is that a correct recollection of what was  
9 said?

10 MR LEUNG KIN WANG: (Via interpreter) Yes.

11 MR PETER DUNCAN: Thank you.

12 Now, I want to refer you to something which I was  
13 alerted to only yesterday, and I'm not sure whether you  
14 had a chance to look at it, but it's a document which we  
15 can find at bundle MISC-2 at page 916.

16 Have you had a chance of looking at this document  
17 yet, Mr Leung?

18 MR LEUNG KIN WANG: (Via interpreter) Not yet.

19 MR PETER DUNCAN: Thank you. In that case, I will perhaps  
20 take you through it very slowly.

21 It seems to be notes of a lecture or presentation  
22 which was given at a seminar very recently -- sorry,  
23 a long time ago -- 29 August 2008, and it is headed,  
24 "Seminar on safety aspects of double deck buses in  
25 Hong Kong", and the subheading is, "Regulatory (Safety)

26

1 Requirements of double-deck buses", and the presenter  
2 appears to be a gentleman called Mr Steven Tse,  
3 an engineer in the bus safety department of the Vehicle  
4 Safety and Standards Division of the Transport  
5 Department.

6 This may be too much to ask, but do any of the  
7 members from the company here this morning have any  
8 recollection of attending such a seminar?

9 MR LEUNG KIN WANG: (Via interpreter) I don't recall.

10 MR PETER DUNCAN: Thank you. I go straight to the page in  
11 which I am interested. It's page 936. I will simply go  
12 to that and then give you the opportunity of reading  
13 through the slides which precede it.

14 At that page, there is this heading, "Tilt angle",  
15 and on the left, "Regulatory requirement/directive", and  
16 then on the right, "Tilt angle (DD bus)", which I infer  
17 is double-decker bus, and the reference to  
18 "United Nations -- Economic Commission for Europe,  
19 28 degrees"; "EC -- European Union, 28 degrees"; and  
20 "Hong Kong, 28 degrees".

21 Does this mean anything to you, Mr Leung?

22 MR LEUNG KIN WANG: (Via interpreter) Well, for each  
23 vehicle, in particular for double-decker buses, for them  
24 to be allowed to run on the road, they have to meet this  
25 test requirement, namely the tilt test. It is a static  
26

1 test. In other words, the bus is static when it is  
2 tested for tilting. If the bus can tilt at an angle 28  
3 and it won't topple, then it means that it can meet the  
4 test requirement, it can get the type approval, it can  
5 be registered for running on our roads. That's my  
6 understanding.

7 MR PETER DUNCAN: I think the static test has been referred  
8 to in previous documentation provided to the committee;  
9 is that correct?

10 MR LEUNG KIN WANG: Correct.

11 MR PETER DUNCAN: Thank you.

12 I am going to move now to the subject of journey  
13 times and lead up to the issue of what are known as --  
14 what are described sometimes as "lost trips". I think  
15 you know what I mean by that.

16 Can I start by taking you to the evidence of one of  
17 the representatives that we heard from one of the  
18 unions, I think it was the Staff Rights Association of  
19 KMB, Mr Li Kwok Wah. We will find that at the  
20 transcript for Day 10, if I could take you to that,  
21 please, at page 62.

22 If I could just read you a passage from Mr Li's  
23 evidence. He has been asked questions by Ms Wong for  
24 the commission at line 14, and Ms Wong asks this:

25 "Mr Li, I would like to go to a specific topic on  
26

1 scheduled trips and loss of time."

2 And a few lines down:

3 "And the passage is at page 120."

4 At line 20:

5 "... you stated that:

6 '... with the continued loss of bus captains, and  
7 the need [to] maintain the scheduled trips and avoid  
8 cancelling scheduled trips, causing bus captains'  
9 entitled rest time during work subject to the situation  
10 of lost trips and the road traffic circumstances that  
11 day. For many bus captains who would need to drive  
12 various bus routes, in order to have more time for rest  
13 during work, will try to complete the bus routes as soon  
14 as possible depending on road traffic condition and  
15 return to the bus terminals for rest.'

16 Can you tell us or elaborate how the need to  
17 maintain scheduled trips would affect bus captains'  
18 entitled rest time?"

19 Mr Li's answer is:

20 "The bus company, say, for example, there is one  
21 hour of journey time, it would be compressed to 55 to 58  
22 minutes. Bus captains have little rest time. If you  
23 compress journey time even by a few minutes, that means  
24 a loss of a few minutes of rest time."

25 Can I ask you this: if a journey does take longer  
26

1           than the scheduled time, does that have a potential  
2           effect on the driver's rest time?

3       MR PATRICK PANG: (Via interpreter) Mr Duncan, my answer is  
4           it may. It may. However, in each and every terminus,  
5           we have got a terminus supervisor on duty. It is  
6           exactly because of this the supervisor will make  
7           corresponding adjustments, so that the bus captains,  
8           though affected by the traffic congestion or owing to  
9           other reasons come back late to the terminus, they would  
10          still get rest time. So we will make arrangements.

11       MR PETER DUNCAN: Are there circumstances such that  
12           sometimes bus drivers do have to forfeit their rest  
13           time?

14       MR PATRICK PANG: (Via interpreter) Sometimes, this may  
15           happen, but I just want to emphasise that for each bus  
16           captain, when he returns to the terminus, he will  
17           certainly have time. He will have a pre-scheduled rest  
18           time. But then if this is being affected owing to one  
19           reason or another, we will still give him a water break,  
20           a toilet break -- he can have a sip of water, he can go  
21           to the toilet -- before he commences the next revenue  
22           trip to take on passengers.

23       MR PETER DUNCAN: How does the company actually calculate  
24           the length of time that is necessary for a particular  
25           route?

26

1 MR PATRICK PANG: (Via interpreter) We do. When we draw up  
2 the journey time for each route -- well, there are two  
3 types. First of all, we have got existing bus routes.  
4 We do have a mechanism, and it is subject to regular  
5 reviews. So once every three months we will look at  
6 each bus route. We have got 380-plus routes under KMB.  
7 So, on a quarterly basis, we have to re-examine each and  
8 every route once every three months.

9 Then, secondly, in the light of special traffic  
10 conditions, in the light of sudden changes of passenger  
11 volume, and in the light of the increase or decrease of  
12 express routes, and in the light of feedback from  
13 frontline bus captains, inspectors and supervisors, we  
14 also have ad hoc arrangements. We won't wait until the  
15 next quarterly review. We will carry out a review of  
16 the journey time instantly.

17 MR PETER DUNCAN: What does the review entail?

18 MR PATRICK PANG: (Via interpreter) Well, a number of  
19 elements would affect the journey time. Say, for  
20 example, changes in the traffic conditions. Say, for  
21 example, in West Kowloon, in Jordan and Nathan Road,  
22 traffic was congested because of the construction of the  
23 XRL, and so we have to make adjustments about the  
24 journey time.

25 Then another factor that would prolong the journey  
26

1 time would be changes in the number of passengers. It  
2 will have a direct bearing on the time taken. Say, for  
3 example, more passengers boarding, more passengers  
4 alighting. In other words, you have to stop at a bus  
5 stop for a longer time. Then there may be road  
6 diversions or we have to deroute a bus service. Say,  
7 for example, the main route is the same but there are  
8 slight changes to its side routes, then we have to  
9 re-examine the journey time.

10 MR PETER DUNCAN: I'd like to refer you, please, to the  
11 evidence of Mr Kelvin Yeung, who gave assistance to the  
12 tribunal on Day 11. He I think is a current depot  
13 manager within KMB. We find his evidence on Day 11 at  
14 page 94.

15 In fact if I can take you by introducing the  
16 question of him at page 93, line 19, again Ms Wong  
17 asking the question. Ms Wong asks this of Mr Kelvin  
18 Yeung:

19 "And moving on to another topic, it is about lost  
20 trips.

21 We have heard evidence from your colleague, Ms Debby  
22 Wong, that lost trips appear to be a frequent  
23 occurrence, and it affects driving behaviour because of  
24 the inaccurate estimation of scheduled journey time.  
25 And also it would, in turn, affect the rest time period.

26

1           What is your view on this matter?"

2           Mr Yeung responds as follows:

3           "From my perspective, lost trip is due to various  
4 reasons.

5           First, we may lose a trip because of shortage of bus  
6 captains, there may be traffic jam in Hong Kong, there  
7 may be emergency situations, public events,  
8 demonstrations, rallies, or special traffic  
9 arrangements, inclement weather, and vehicles breaking  
10 down on the road. All these contribute to the problem  
11 of lost trips. But we try our best not to affect the  
12 rest periods of bus captains, because we have a schedule  
13 of journey time, we have provided that to the bus  
14 captains, and about 96 per cent of these, or 90 per cent  
15 of these trips allow bus captains to have sufficient  
16 rest periods."

17           Now, a lost trip, I assume that that means there is  
18 a bus which is supposed to leave from A and arrive at B  
19 but in fact, perhaps for one or more of these reasons,  
20 it just doesn't happen.

21           Could you give the committee some idea as to how  
22 frequent this occurrence occurs?

23 MR PATRICK PANG: (Via interpreter) The Transport Department  
24 assigns a value to all franchised bus operators. In  
25 terms of the lost trip rate, in the context of our

26

1 schedule of service, the benchmark is no more than  
2 3 per cent of the trips.

3 MR PETER DUNCAN: I'm going to ask in that respect for you  
4 to look at one of the Transport Department documents.  
5 Again, we will need to go to TD-1 for this, at page 34.

6 At page 34, we have a document which was provided by  
7 the transport authorities to the committee for the  
8 purposes of this hearing. This document is headed,  
9 "An overview of the regulatory and monitoring regime of  
10 franchised bus[es]". You can see the purpose of the  
11 paper, at page 34: "to give an overview of the  
12 regulatory and monitoring regime under which the  
13 government regulates the operation of franchised bus  
14 services in Hong Kong."

15 Then there are a number of sections. The part  
16 I would like to refer to at the moment can be found on  
17 page 44, and it's paragraph (e). It's under the  
18 heading, at page 41, of "Other measures and requirements  
19 through exchange of letters and issuance of guidelines",  
20 and there are a number of paragraphs -- (a), (b), (c),  
21 (d) -- and we get to (e) on page 44. If I could read  
22 that out quickly:

23 "In 2015, the Transport Department put forward  
24 a revised sanction mechanism in respect of the bus lost  
25 trips made by the franchised bus operators. The  
26

1 mechanism sets out the procedures and steps on the  
2 issuance of letters of different degrees of gravity  
3 (including reminding letter, advisory letter, warning  
4 letter and serious warning letter) depending on the  
5 frequency, level of lost trips incurred and  
6 rectification actions taken by the FB operators. The  
7 warning letters will make way for initiating further  
8 statutory sanctions under section 22 of the Public Bus  
9 Services Ordinance, such as financial penalty,  
10 revocation of operating right of a particular bus route  
11 or of its franchise in the event that no apparent  
12 improvement is made by the bus operator concerned  
13 without providing any reasonable explanations. See  
14 appendix K on a sample of TD's letter to FB operators on  
15 the promulgation of revised sanction mechanism."

16 Unfortunately, I was unable to find appendix K, but  
17 reading on:

18 "Since the implementation of the above mechanism in  
19 2015, the Transport Department has been closely  
20 monitoring the lost trip situation of the franchised bus  
21 operators and sent reminding letters, advisory letters  
22 and warning letter to franchised bus operators for  
23 rectification action and making service improvement.  
24 These ... operators provided explanations to the  
25 Transport Department and took prompt actions, including  
26

1       deploying more standby bus drivers to fill up the  
2       shortfall, to improve the lost trip situation. Given  
3       the actions taken by the franchised bus operators, no  
4       further penalty actions were imposed on them."

5             Just before I ask you a couple of questions on that,  
6       could I ask you, please, to go through to page 117 of  
7       the same bundle.

8   CHAIRMAN: Before you do that, Mr Duncan, the missing  
9       appendix K, is that not at TD-2, page 291?

10   MR PETER DUNCAN: Thank you, Mr Chairman. I couldn't find  
11       it.

12   CHAIRMAN: Don't let me divert you. It may not be directly  
13       relevant.

14   MR PETER DUNCAN: I'm happy to go to that volume, if members  
15       from the company can see that, at page 291.

16             Thank you, Mr Chairman.

17             Appendix K.

18             I think that is a general letter regarding the  
19       subject, with respect to promulgating the revised  
20       sanction mechanism. You will see that.

21             Thank you, Mr Chairman.

22             What I want to do before just asking you a couple of  
23       questions on this topic is to take you through to  
24       another of the Transport Department's papers, at  
25       page 117, referred to as Transport Department paper 10,  
26

1           which is headed, "Operation of franchised bus service --  
2           route scheduling, fleet deployment and designation of  
3           speed limit", and the purpose:

4           "This paper gives an account of the role of the  
5           Transport Department in route scheduling, fleet  
6           deployment and designation of speed limits on roads for  
7           operation of franchised bus service."

8           Then if you go to page 122, you will see what's  
9           described as a sample of the schedule of service of  
10          a particular bus route. There's an example which is  
11          described as the air-conditioned Kowloon urban route  
12          no. 2.

13          Now, going back to the question of these possible  
14          sanctions and letters, could you give the committee some  
15          idea as to how many warning letters the company may have  
16          received, say in the last six months?

17       MR GODWIN SO: (Via interpreter) Mr Duncan, in the past six  
18          months, the company did not receive warning letters due  
19          to lost trips, but for particular routes we received  
20          advisory letters or reminder letters.

21       MR PETER DUNCAN: What were the advisory or reminder letters  
22          about?

23       MR GODWIN SO: (Via interpreter) For certain routes, for  
24          example during certain hours, for example at night, the  
25          letters would remind us that the lost trip rate was over  
26

1           3 per cent, and the letter reminded us to make  
2           improvements and asked why these lost trips occurred.

3       MR PETER DUNCAN: Has the company received any warning  
4           letters in the last 12 months?

5       MR GODWIN SO: (Via interpreter) We did not receive any  
6           warning letters in the last 12 months.

7       MR PETER DUNCAN: Is it necessary, from time to time, given  
8           the circumstances that might give rise to lost trips, to  
9           approach the department and ask for amendments to the  
10          schedule for a particular route?

11      MR PATRICK PANG: (Via interpreter) Our company often  
12          contacts the Transport Department to report the specific  
13          issues we encounter on certain routes. When the TD  
14          calculates the lost trip rate, they would calculate it  
15          based on four time periods, namely the morning peak  
16          hours, morning non-peak hours, the evening peak hours  
17          and evening non-peak hours. Based on road and traffic  
18          conditions, including congestion and illegal parking, we  
19          would often reflect to TD requesting a review of the  
20          schedule of service, et cetera.

21      MR PETER DUNCAN: Does the Transport Department often grant  
22          those review applications?

23      MR PATRICK PANG: (Via interpreter) I can only say that it  
24          is very difficult. We have a lot of low utilisation  
25          routes. Very often, due to change in passenger volume,  
26

1           for example due to railway developments, our service  
2           demand might drop. Very often, during the non-peak  
3           hours -- we have repeatedly made written requests as  
4           well as face-to-face requests that the TD would lower  
5           the frequency of service for non-peak hours. These  
6           applications are made based on certain guidelines, and  
7           according to the guidelines, we are entitled to certain  
8           journey reductions.

9           Even if we fulfil the guideline requirements, to be  
10          very honest, if we need to increase our service  
11          frequency, the TD would often want us to get it done  
12          immediately, on the request of district personnel. But  
13          if we want to reduce our service, it is very difficult.

14          Our manpower resources are limited, but at times we  
15          would have to invest our resources on low utilisation  
16          routes. I don't think this is a healthy development.

17          Very often, we communicate with TD, but progress is  
18          relatively slow.

19   CHAIRMAN: So, although you have reduced usage, passengers,  
20              and you ask for a reduced service to be permitted, you  
21              don't get approval? And there are various forces  
22              involved in impeding your request?

23   MR PATRICK PANG: (Via interpreter) Correct.

24   MR PETER DUNCAN: Just one more question before we break.

25              Who issues these guidelines?

1 MR PATRICK PANG: (Via interpreter) TD.

2 MR PETER DUNCAN: Do you have a say in the formation of the  
3 guidelines?

4 MR GODWIN SO: (Via interpreter) The guidelines were in  
5 place for a long time. They have proved effective. So  
6 this is about the execution of the guidelines and we  
7 agree with those guidelines.

8 MR PETER DUNCAN: Could you supply the committee with a copy  
9 of the guidelines?

10 MR GODWIN SO: (Via interpreter) I think the guidelines are  
11 already included in the bundles. I will tell you where  
12 they are during the break.

13 MR PETER DUNCAN: Thank you.

14 CHAIRMAN: Thank you.

15 MR PETER DUNCAN: Sorry, one more question. So the problem  
16 which seems to have been identified is not in the  
17 guidelines, it is in the way in which the guidelines are  
18 applied; that would be correct?

19 MR PATRICK PANG: (Via interpreter) I totally agree. The  
20 guidelines are very clear. But in terms of enforcement,  
21 I realise there is a lot of resistance, so I hope that  
22 resources can be invested on the significant or useful  
23 routes.

24 Thank you.

25 CHAIRMAN: Gentlemen, we will take a 20-minute break now,  
26

1 and if you can locate the reference, we would be  
2 grateful.

3 20 minutes. Thank you.

4 (11.38 am)

5 (A short adjournment)

6 (12.00 pm)

7 CHAIRMAN: Yes, Mr Duncan.

8 MR PETER DUNCAN: Thank you, Mr Chairman.

9 I think you were going to find a reference for us to  
10 those guidelines.

11 MR PATRICK PANG: (Via interpreter) We do have it. KMB  
12 Long Win Bus bundle 2, page 73, item (IV), "Frequency  
13 reduction". Yes, it has been turned up on the screen.

14 MR PETER DUNCAN: Thank you very much.

15 Just while we are on the subject of references,  
16 Mr Chairman raised the matter of the anti-dozing device  
17 being utilised in Singapore. If a reference is needed  
18 for that, it can be found at CTB-1 at page 63.

19 I now wish to move on to the issue of toilet and  
20 rest facilities for bus captains. Can I commence this  
21 by taking you to the volume TD-1 at page 438, please.

22 To introduce this particular page, we need to go  
23 back to page 427, which is a letter from the Transport  
24 Department to the committee of 20 July 2018, where the  
25 Transport Department has provided a number of answers to

26

1 questions raised by the committee.

2 At 438, you will see question 28:

3 "Provision of toilet and rest facilities at bus  
4 termini.

5 Has the Transport Department issued any guidelines  
6 to franchised bus operators on provision of toilet and  
7 rest facilities at bus termini? If so, please let us  
8 have the details. If not, the underlying reasons for  
9 not doing so. Does the Transport Department assume  
10 an active role in facilitating the respective franchised  
11 bus operators to pursue with relevant departments for  
12 provision of the facilities?"

13 I will go through quickly the response of the  
14 department to that question:

15 "The Transport Department has all along encouraged  
16 the bus companies, being good employers, to provide  
17 suitable toilets and rest facilities at bus termini for  
18 their staff. When relevant departments/authorities  
19 consider and vet the applications for setting up these  
20 staff facilities, the TD has been providing appropriate  
21 coordination so as to facilitate early installation of  
22 such facilities.

23 There are no specific guidelines issued to the  
24 franchised bus operators on the provision of toilets and  
25 rest facilities. It is because toilets and rest  
26

1 facilities are generally part of the basic facilities to  
2 be considered when new bus termini are designed.  
3 Requirements and comments from the franchised bus  
4 operators on toilets and rest facilities would be  
5 incorporated in the design of the bus termini as  
6 appropriate. At bus termini where toilets are not  
7 within reasonable walking distance, or rest facilities  
8 are not provided or insufficient, the franchised bus  
9 operators are active in applying for placement of these  
10 facilities to meet their latest operational needs. As  
11 at 31 March 2018, nearly all of the 295 bus termini over  
12 the territory are provided with toilets [within]  
13 a walking distance of 3 to 7 minutes, and about  
14 86 per cent of the bus termini (ie 255 bus termini) over  
15 the territory are provided with rest facilities in the  
16 form of regulator's kiosk/office or rest kiosk for bus  
17 captains. It is therefore considered not necessary to  
18 issue specific guidelines to the franchised bus  
19 operators on provision of toilet and rest facilities at  
20 bus termini.

21 The Transport Department has been proactively  
22 liaising with the relevant departments/authorities as  
23 appropriate to resolve any difficulties encountered by  
24 the franchised bus operators in applying for the  
25 facilities, and to let the departments/authorities and  
26

1 the ... operators understand the procedural requirements  
2 with a view to smoothening the application process for  
3 timely provision of the facilities. The successful case  
4 of provision of a rest kiosk at the bus terminus on  
5 Ma Wan Road outside Shan Shui House of Shui Pin Wai  
6 Estate as mentioned in TD's paper 05 'Franchised bus  
7 captain -- working conditions and environment' is one of  
8 the good examples. Each department/authority may have  
9 its own statutory power and considerations in processing  
10 the FB's application for placement of toilets and rest  
11 facilities under their jurisdiction. That said, the  
12 Transport Department will continue to facilitate the  
13 franchised bus operators if necessary to actively cater  
14 for the needs of bus captains on provisions of toilets  
15 and rest facilities, and endeavour to provide the  
16 necessary assistance to the franchised bus operators in  
17 this respect."

18 Then there was a second question that was asked by  
19 the committee:

20 "Despite repeated and longstanding requests made by  
21 franchised bus operators, the committee was informed  
22 that some bus termini are still not provided with  
23 adequate toilet and rest facilities. Please identify  
24 these bus termini and whether they are major termini  
25 serving a number of bus routes and whether any of those  
26

1 routes are manned by bus captains employed by Kowloon  
2 Motor Bus working on special shift who require adequate  
3 rest facilities to take rest break no less than 3  
4 consecutive hours. Please explain the constraints in  
5 providing such facilities, particularly the reasons for  
6 rejecting franchised bus companies' request for  
7 provision of such facilities by the relevant  
8 departments/authorities."

9 The answer provided by the department was as  
10 follows:

11 "As at 31 March 2018, nearly all of the 295 bus  
12 termini over the territory are provided with toilets  
13 with a walking distance of 3 to 7 minutes, and about  
14 86 per cent of the bus termini (ie 255 bus termini) over  
15 the territory are provided with rest facilities in the  
16 form of regulator's kiosk/office or rest kiosk for bus  
17 captains. Among the remaining 14 per cent of the bus  
18 termini without rest facilities, the franchised bus  
19 operators have not applied for provision of rest  
20 facilities at most, if not all of the bus termini.

21 On the other side, the franchised bus operators may  
22 apply to relevant departments/authorities for  
23 additional/enlarged rest facilities at bus termini to  
24 meet their operational needs. A list of the bus termini  
25 with toilets and rest facilities, to our best knowledge,  
26

1           that were requested by the ... operators and were  
2           rejected in the past 3 years or under processing by  
3           relevant departments/authorities is attached at annex 3  
4           for reference. We are afraid that the Transport  
5           Department does not have the information on the duty  
6           shift records of individual bus captain on each bus  
7           route which may be subject to changes from time to time  
8           and hence the information as to whether any of those  
9           routes operating at these bus termini were manned by bus  
10          captains employed by KMB working on special shift.

11           As shown in annex 3, the major reasons for rejecting  
12          the franchised bus operators' request for provision of  
13          toilets and rest facilities by relevant  
14          departments/authorities are mainly because of the  
15          physical constraints at individual sites (eg the bus  
16          terminus is located on a narrow sidewalk) or because of  
17          the views expressed by the community in the  
18          neighbourhood. As the proponent of the facilities, the  
19          franchised bus operators would explore feasible  
20          solutions to overcome the physical constraints and  
21          address the concerns from the locals for setting up  
22          toilets and rest facilities at those bus termini for bus  
23          captains. The Transport Department would assist the  
24          franchised bus operators in canvassing support from the  
25          locals by conducting site visits/meetings with them to  
26

1 explore feasible solutions for erection of the rest  
2 facilities in order to expedite the implementation plans  
3 as and when necessary for the benefits of bus captains  
4 and passengers."

5 Annex 3, we will have to go to another bundle for  
6 that. It's to be found at TD-5 at page 1723.

7 You will see, at 1723, there is a heading, "List of  
8 bus termini with toilets and rest facilities requested  
9 by the franchised bus operators":

10 "(A) List of bus termini with toilets and rest  
11 facilities requested by the franchised bus operators  
12 under processing by the Transport Department.

13 (B) List of bus termini with toilets and rest  
14 facilities listed by the franchised bus operators under  
15 processing by the relevant departments/authorities.

16 (C) List of bus termini with toilets and rest  
17 facilities rejected by the Transport Department and  
18 relevant departments/authorities in the past 3 years."

19 Now, I will ask some questions later with regard to  
20 some of the points that the Transport Department has  
21 sought to make. It may well be that the company would  
22 wish to respond, in any event, to some of those  
23 assertions. But before I do that, before I come back to  
24 the information provided by the department, I have some  
25 questions of my own relating to the actual facilities or  
26

1 the lack of the same. Then I will come back to the  
2 Transport Department position.

3 My understanding is that KMB has four depots, as  
4 they are called, and then a large number of termini;  
5 would that be correct?

6 MR ROGER LEE: Yes.

7 MR PETER DUNCAN: So, if we look at KMB-1, at page 252, do  
8 we see there the company's own map of depots and zones,  
9 for the company's use, which sets out the locations, or  
10 identifies, rather, the four depots that the company  
11 has: one at Lai Chi Kok, the Kowloon Bay Depot, the  
12 Tuen Mun Depot, and a Sha Tin Depot.

13 Just for the avoidance of any doubt, what exactly is  
14 a depot?

15 MR ROGER LEE: (Via interpreter) Within a depot, we have two  
16 functions. First of all, every night, buses return to  
17 the depot for maintenance, refuelling and cleansing.  
18 Some maintenance and repair work is being carried out  
19 there.

20 Another major function is as follows. Bus captains  
21 get their duty rosters and bus captains take a rest  
22 there. Bus captains go there every morning to get their  
23 duty list. There are four. At Tuen Mun Depot, it has  
24 the specific function of carrying out annual inspection  
25 and maintenance, and then at another one, Sha Tin,  
26

1 training school. At Lai Chi Kok Depot, that's the  
2 centre for dispatching to cater for special  
3 circumstances, like a typhoon. For Kowloon Bay Depot,  
4 that's our backup office.

5 MR PETER DUNCAN: So does each bus captain start his day by  
6 going to a depot?

7 MR ROGER LEE: (Via interpreter) Most of them are, but some  
8 of them would just report to a terminus. Most of them  
9 will go back to the depot to get his duty list for the  
10 day.

11 MR PETER DUNCAN: Do I understand correctly -- you touched  
12 on this a couple of moments ago, I believe -- that the  
13 depots do provide toilet and resting facilities for the  
14 captains?

15 MR ROGER LEE: (Via interpreter) Certainly. Within  
16 a depot -- well, in fact the depot is larger in size --  
17 we have got showering facilities, we have toilets. And  
18 for each depot, we have got a clinic for bus captains  
19 who are not feeling well; they will be given a quick  
20 check before deciding whether they should resume their  
21 duties. There are also rest facilities for bus  
22 captains.

23 The chairman reminded me that in fact we have got  
24 a barber's shop for bus captains to have a haircut.

25 CHAIRMAN: That's certainly true in Tuen Mun, but is that  
26

1 true in all four of the depots?

2 MR ROGER LEE: (Via interpreter) All four of them. All four  
3 of them. There is even a grocery shop so that they can  
4 buy basic groceries. The majority of the bus captains  
5 would regard the depot as a place that they have  
6 essential belongings.

7 MR PETER DUNCAN: May I refer you, please, to file MISC-2 at  
8 page 902. You will see this is part of the document  
9 which is headed, on page 899, as a report on KMB's bus  
10 termini and the Tuen Mun Depot, visited by the chairman  
11 and members of the IRC staff on 3 August.

12 There is reference at paragraph (E) on page 902 to  
13 the Tuen Mun Depot.

14 If I could bring to your attention, please, just the  
15 second bullet point at the bottom of page 902: on the  
16 1st floor, there is "a recreation area with two table  
17 tennis tables, a water dispenser, a locker and a soft  
18 drink vending machine, a barber's shop; a convenience  
19 shop; a restroom with A/C, four tables, 16 chairs,  
20 a refrigerator, a microwave oven and a television; and  
21 a small dark room with couches, which permitted bus  
22 captains to sleep in a horizontal position. One bus  
23 captain was sleeping in that position".

24 Then on the 2nd floor:

25 "a clinic, male and female toilets, storage room  
26

1 (uniform) and offices."

2 Then we're assisted by annex E, which we will find  
3 on page 912, and 913, which contain photographic images  
4 of what is being described there in those paragraphs.

5 So that's the position with regard to depots.

6 Turning to the issue of termini, how many termini  
7 does KMB have?

8 MR ROGER LEE: (Via interpreter) 217.

9 MR PETER DUNCAN: Can we go to KMB-1 at page 201, please.

10 You will see, at this page, a letter from the  
11 committee dated 19 July 2018 to the company, and in the  
12 second paragraph it asks the company to provide  
13 information as to the location and address of the bus  
14 termini, and the bus depot responsible for that bus  
15 termini, at which KMB and Long Win bus captains working  
16 a "special shift", permitted under the guidelines,  
17 commence the minimum of a three-hour break which they  
18 are required to be afforded on such a shift, and the  
19 company is asked to describe in detail the resting and  
20 staff facilities available at the terminal.

21 Then we can see the answer to that letter at  
22 page 205, a letter dated 26 July:

23 "We refer to your letter ... dated 19 July ... by  
24 which you requested us to provide details of the resting  
25 and staff facilities available at bus termini that cater  
26

1 for 'special shifts'.

2 The details are set out in the enclosed table."

3 And so on. Then we see the table at pages 206, 207  
4 and through to 211.

5 Before I ask some questions with regard to that  
6 schedule, this of course concerns termini which are used  
7 for the special shifts. Do I infer correctly that there  
8 are some termini which are not used for special shifts?

9 MR PATRICK PANG: (Via interpreter) Yes, Mr Duncan. Some  
10 termini might not be used by captains on special shifts.

11 MR PETER DUNCAN: Now, approximately how many of those would  
12 there be?

13 MR PATRICK PANG: (Via interpreter) Perhaps I can provide  
14 a figure to reflect the situation.

15 As for the number of termini with bus captains  
16 resting, this is something we have to look at or find  
17 out. Perhaps I can provide the number of captains on  
18 special shifts that would take rests at depots, how many  
19 would take a rest at termini and how many of them would  
20 take a rest back home.

21 MR PETER DUNCAN: Yes. I probably haven't made myself  
22 clear, but this table would set out all the termini at  
23 which captains may be at when they commence their  
24 special or take their special shift and then have  
25 a rest.

26

1 MR PATRICK PANG: Yes.

2 MR PETER DUNCAN: If I understand things correctly, there  
3 would be some termini that would fall under that  
4 category, they would not be used for resting in  
5 a special shift situation. Is that correct?

6 MR PATRICK PANG: (Via interpreter) Perhaps I would put it  
7 this way. According to the timetable, some termini are  
8 not being used by bus captains on special shifts for  
9 resting. However, even if a terminus has resting  
10 facilities, operationally there might be different  
11 arrangements or deployments.

12 MR ROGER LEE: (Via interpreter) Mr Duncan, KMB has 217  
13 termini and at each terminus there are basic facilities.  
14 As for terminus facilities, the kiosk approved by the  
15 government is about 40 square feet in area, and these  
16 are needed by bus captains, even those not on special  
17 shifts. We do not make a distinction for those on  
18 special shifts.

19 I have looked at all 217 termini. We are talking  
20 about kiosks of 40 square feet. This is not a place to  
21 sleep.

22 MR PETER DUNCAN: Sorry, when you say you looked at all 217  
23 termini, did they cover termini used in a special shift  
24 situation and also termini not used in a special shift  
25 situation?

26

1 MR ROGER LEE: Yes.

2 MR PETER DUNCAN: So that's the total number of termini,  
3 irrespective of the special duty situation?

4 MR ROGER LEE: Right.

5 MR PETER DUNCAN: If I understand your answer just a few  
6 moments ago correctly, when you're considering  
7 facilities you don't distinguish between the two?

8 MR ROGER LEE: Right. (Via interpreter) Yes.

9 MR PETER DUNCAN: I want you to go, please, to KMB-1 at  
10 page 206.

11 We see, amongst other things, in this table, which  
12 of the termini rely on the use of a public toilet, as  
13 opposed to a chemical toilet, and as opposed to a KMB  
14 toilet.

15 MR ROGER LEE: (Via interpreter) Of the 217 termini, we have  
16 50 termini with purpose-built toilets, and we have  
17 66 termini with chemical toilets and about 100 would  
18 rely on surrounding facilities, including shopping  
19 malls. One terminus has no toilet facilities.

20 MR PETER DUNCAN: Now, given -- the number of public  
21 toilets -- if I could ask about that -- according to the  
22 Transport Department document I showed you a few moments  
23 ago, these toilets might be three to seven minutes away  
24 from the terminus. Is that a correct reflection of the  
25 situation?

26

1 MR ROGER LEE: (Via interpreter) I have not paid visits  
2 myself, but many of them can be reached within ten  
3 minutes' walk. Some termini rely on shopping malls, and  
4 when the shopping malls are closed the captains might  
5 have to walk further. This is possible.

6 MR PETER DUNCAN: Does the company consider that to be  
7 a satisfactory state of affairs?

8 MR ROGER LEE: (Via interpreter) In the past year, we added  
9 26 new chemical toilets, and now there is only one  
10 terminus left. I think we are reaching a level that is  
11 acceptable. By captains one year ago, the situation  
12 might not be acceptable. For chemical toilets, since  
13 there is a lack of power supply, ventilation and other  
14 aspects might be worse than a complete toilet. But this  
15 is being improved upon and more will be done.

16 CHAIRMAN: When you say there is one terminus left, what do  
17 you mean exactly by that?

18 MR ROGER LEE: (Via interpreter) That is a terminus in  
19 Yuen Long. So the situation is like what you heard  
20 a few days ago: the footpath is rather narrow, and  
21 district councillors do not find that location  
22 appropriate, so it is still under application, so we are  
23 yet to install chemical toilet in one of our termini,  
24 and that terminus is in Yuen Long, in Yuen Long Park.

25 MR PETER DUNCAN: So, after the installation of those  
26

1           27 chemical toilets, in how many instances will the  
2           company be dependent upon public toilets?

3       MR ROGER LEE: (Via interpreter) For these 100 termini, the  
4           situation is difficult because we have to rely on public  
5           toilets. Some public toilets are located in parks. Or  
6           let me put it this way: toilets are a complicated issue,  
7           because the applications for toilets require  
8           communication with government departments and district  
9           councillors and a lot of time is needed, and there is  
10          very little within our control on what we can do.

11       MR PETER DUNCAN: Assuming you did have control of the  
12          situation, what would be the ideal outcome for the  
13          company?

14       MR ROGER LEE: (Via interpreter) Personally, I often visit  
15          the termini, and I want our captains and frontline staff  
16          to know that we are listening to their challenges.  
17          I think the main challenge today is not on toilets but  
18          on the rest kiosks. Last autumn, there was an incident,  
19          the rest kiosks are important to our staff. The  
20          locations and sizes of the kiosks are an important part  
21          of our work coming up for new termini in the future;  
22          more should be done in terms of facilities, and this  
23          should be our area of focus.

24       MR PETER DUNCAN: We will come to the rest facilities in  
25          a moment, but assuming the way was much clearer than it

26

1 appears to be at the moment, what outcome would you want  
2 with regard to the provision of toilet facilities other  
3 than not relying on public facilities?

4 MR ROGER LEE: (Via interpreter) For our chemical toilets,  
5 very often power supply could not be connected in many  
6 of them. I once asked our engineering department to  
7 supply batteries and connect them to the toilets so that  
8 24-hour ventilation and lighting would be possible. So  
9 this was the first step we conducted.

10 Next, for all venues with no power supply, we have  
11 installed solar panels on top of the chemical toilets,  
12 in order to enable lighting and ventilation for our bus  
13 captains. Within my ambit, we have done our best in  
14 terms of chemical toilets. As for facilities in  
15 shopping malls or parks, would we be allowed to install  
16 more chemical toilets? This is something we would try  
17 to do. But, as we said, there is involvement of  
18 government departments and district personnel, so there  
19 is some difficulty.

20 MR PATRICK PANG: (Via interpreter) Mr Duncan, I would like  
21 to add something. I would like to thank you for raising  
22 this issue of toilets.

23 The issue has bothered our captains. Sometimes, our  
24 bus captains are rejected when they want to visit  
25 toilets in shopping malls, and they might have to walk  
26

1           eight or ten minutes to reach a toilet. Their rest time  
2           might be jeopardised as a result, and this issue has  
3           bothered our bus captains.

4           I am quite surprised that some termini have no  
5           toilets. Even we can add chemical toilets, but for new  
6           termini, I am quite surprised that they have not  
7           factored in a permanent toilet.

8           Let me give you some examples. For example, the  
9           West Kowloon XRL Station bus terminus. It's a sizeable  
10          bus terminus but there is no toilet. For Hung Luen Road  
11          in Hung Hom, there is a new terminus to replace the  
12          Hung Hom Pier terminus. It is a public transport  
13          interchange; again, there is no toilet, there is no rest  
14          kiosk. For the Hong Kong-Macau-Zhuhai Bridge terminus,  
15          as we see now, there will be no toilet.

16          So again I would like to thank you for raising this  
17          issue for these resting facilities, including toilets.  
18          They should be included, or they should include the  
19          basic facilities.

20   CHAIRMAN: So is the root cause of the problem a failure of  
21          the planning system? How can you have new termini set  
22          up with new routes and have no regime that requires that  
23          suitable toilets be made available?

24   MR PATRICK PANG: (Via interpreter) Thank you, Chairman.

25          I do not know whether this is a design failure. For  
26

1       termini built in the past, there are permanent resting  
2       facilities, including kiosks and toilets, but  
3       surprisingly, for some new termini, there are no such  
4       facilities.

5             For new termini, apart from a lack of resting  
6       facilities, there are design deficiencies as well. For  
7       the West Kowloon Station and Hung Luen Road termini,  
8       after they were commissioned, the Transport Department  
9       invited the bus operators to conduct trials, but we  
10      found that the designs do not suit certain models of  
11      buses, and eventually wholesale modifications must be  
12      made at the termini before our buses can use these  
13      termini.

14            For older termini, they weren't designed with  
15      12-metre-long buses in mind. This is something we  
16      understand. But for new termini, we are rather  
17      surprised.

18      MR PETER DUNCAN: Could I ask you, please, to turn up file  
19      FE-1B, and go to page 199-7. Do you see there a letter  
20      dated 21 January 2016, addressed to the Commissioner for  
21      Transport from the company, under the heading,  
22      "Application for placement of chemical toilet on/over  
23      government land at Allway Gardens bus terminus,  
24      Tsuen Wan, New Territories."

25            Do you see a copy of that letter?

1 MR PATRICK PANG: (Via interpreter) Yes.

2 MR PETER DUNCAN: Does it constitute an application for the  
3 placement of a chemical toilet at the Allway Gardens bus  
4 terminus?

5 MR PATRICK PANG: (Via interpreter) Yes.

6 MR PETER DUNCAN: If you go through, please, to page 199-10,  
7 do you see a copy of a response from the Transport  
8 Department in April 2016?

9 MR PATRICK PANG: (Via interpreter) Yes, I see it.

10 MR PETER DUNCAN: Does it say in the second paragraph:

11 "This department has circulated your proposal to all  
12 relevant government departments for comments and sought  
13 Tsuen Wan District Office's assistance to conduct local  
14 consultation on the subject matter. I would like to  
15 advise that strong objection from local resident's  
16 representative to the placement of the proposed chemical  
17 toilet at Allway Gardens bus terminus were received due  
18 to hygiene concern and proximity of toilet facilities  
19 nearby. The details of the reasons for objection are  
20 listed in annex A for your reference, please.

21 As such, we regret to inform you that the  
22 application in relation to the placement of the chemical  
23 toilet is not supported. You are advised to reconsider  
24 the need and location of chemical toilet placement and  
25 resubmit application, if necessary."

26

1           Then, at page 199-13, there is another letter from  
2           the company to the Commissioner for Transport, on this  
3           occasion saying, in the second paragraph:

4           "Please note that the chemical toilet has been  
5           upgraded with better design and ventilation."

6           Et cetera, et cetera; do you see that?

7   MR PATRICK PANG:   (Via interpreter) Yes.

8   MR PETER DUNCAN:   We understand that Allway Gardens has been  
9           a bus station, bus terminus, for more than 20 years.

10   MR PATRICK PANG:   (Via interpreter) That's correct.

11   MR PETER DUNCAN:   Then a further letter, which is dated  
12           29 September 2017, at page 199-18, a resubmission of the  
13           application.

14   MR PATRICK PANG:   (Via interpreter) Yes.

15   MR PETER DUNCAN:   Then finally, at 199-26, a letter from the  
16           Transport Department of 29 September 2017, so almost two  
17           years after the original application:

18           "With reference to your application for placement of  
19           one chemical toilet ... I am pleased to inform you that  
20           permission is hereby given ...", with attached  
21           32 conditions pertaining to the installation of one  
22           chemical toilet.

23           Is that the situation?

24   MR PATRICK PANG:   (Via interpreter) That's correct.

25   MR PETER DUNCAN:   If I may make an observation. This seemed  
26

1 to have taken a long time to achieve?

2 MR ROGER LEE: Yes.

3 MR PATRICK PANG: (Via interpreter) That's correct.

4 MR PETER DUNCAN: Is this a unique case or does this reflect  
5 the sort of situation that often occurs with regard to  
6 applications for chemical toilet installations?

7 MR ROGER LEE: (Via interpreter) You can see that the date  
8 is September 2016. That's after the Lok Wah incident.  
9 During that period, within a short period of time, we  
10 secured approval for 26 chemical toilets to be placed.  
11 It was a very long process. As I have said, for another  
12 100 termini, we have to rely on nearby facilities such  
13 as parks and shopping malls. Much remains to be done.  
14 But we are talking about an application time of  
15 something couched in years.

16 MR PATRICK PANG: (Via interpreter) For this Allway Gardens  
17 example, I was also involved. Why did we put in the  
18 application in the first place? Well, as you observed,  
19 the termini has been around for many years. All the  
20 time, we had been relying on shopping malls. They allow  
21 bus captains to use it, and suddenly they said no, and  
22 our bus captains had to walk a long distance to use  
23 a toilet.

24 Therefore, for the first time, we submitted  
25 an application on 21 January 2016, and there was

26

1       correspondence, residents objected, the district  
2       councillor said no and the Transport Department said,  
3       "Sorry, the application is not accepted." Then, in  
4       September 2017, I went on a visit to the terminus. The  
5       I talked to the bus captains; the bus captains had  
6       strong views. Then I told my manager that we had to  
7       resubmit an application. And as Mr Lee has said, in the  
8       middle of 2017, at Lok Wah Estate, we wanted to place  
9       a kiosk there and it took years to get it approved.  
10      Then the pace quickened. As Mr Lee has said, we are  
11      talking about years in getting things done. Toilets  
12      have been a source of nuisance or trouble for bus  
13      captains for many years.

14   MR PETER DUNCAN: If we could go back, please, to KMB-1 and  
15      the information that you provided to the commission with  
16      regard to staff facilities and toilets.

17           It would seem, from analysis of these references,  
18      that there are some seven termini which do not appear to  
19      have any toilet facilities at all. If I look at  
20      page 208, the third and fourth on that page, Handsome  
21      Court and Sun Tuen Mun Centre, and then at page 209, the  
22      Central (Macau Ferry), the Cheung Sha Wan -- maybe  
23      that's just one, Cheung Sha Wan; Cho Yiu; and then,  
24      second from the bottom, the Kwai Tsing Central terminus.

25           So how do your drivers get on at these termini?

1 MR ROGER LEE: (Via interpreter) They went to toilets in the  
2 shopping malls.

3 MR PETER DUNCAN: Would that not be recorded as "public  
4 toilet"?

5 MR ROGER LEE: (Via interpreter) Some are government public  
6 toilets that can be reached within ten minutes.

7 MR PETER DUNCAN: When you've got a number of references  
8 here to public toilets, and there's a great number --  
9 about 100, I think you said -- some of those include  
10 shopping malls?

11 MR ROGER LEE: Yes.

12 MR PETER DUNCAN: So why are these blank, these seven? That  
13 implies they are not even available in shopping malls.

14 MR PATRICK PANG: (Via interpreter) It could be that they  
15 relied on toilets in shopping malls, but the shopping  
16 malls will close during certain hours and the toilets  
17 would be locked up during those hours. I would have to  
18 check and then I will come back later with an answer.

19 MR PETER DUNCAN: So let's move from toilets to rest  
20 facilities. In this context, can I start by referring  
21 you to the evidence of one of the union representatives  
22 that the committee heard from, on Day 9, please, at  
23 page 50.

24 This is the evidence of a Mr Chan Kwong Nung from  
25 Long Win Bus. He was one of the representatives from  
26

1 the Motor Transport Workers General Union. He gave  
2 evidence on Day 9. I want to pick it up, if I could, at  
3 line 20 on page 50:

4 "Mr Chan Kwong Nung: I'm from Long Win Bus, let me  
5 supplement."

6 So he is supplementing a statement previously made.

7 "For E33P" -- which as I understand it is one of the  
8 routes -- "in 2016, the route runs around the clock,  
9 there are about 60 trips. The terminus is at Siu Hong  
10 Station South. There are no rest facilities nor  
11 toilets.

12 Originally, this route was already in operation, in  
13 2016 it became a full day route. Colleagues had to eat  
14 at the bus terminus, and to rest, at special space,  
15 location, we had to rest, but there was no rest kiosk.

16 After repeated efforts, to have one, the result was  
17 the local community and the Transport Department had not  
18 approved it. So it has been close to two years we have  
19 been asking for a kiosk, but still, to no avail.

20 We have not any notification as to when that can be  
21 done.

22 Ms Maggie Wong: And about this E33P, was this  
23 request made in writing, about the rest kiosk?

24 Mr Chan Kwong Nung: Yes.

25 Ms Maggie Wong: When was that?

26

1           Mr Chan Kwong Nung: The trade union at our meeting  
2           with the company raised that in 2015. The company has  
3           been telling us that it is making applications with the  
4           relevant authorities, and then in 2016 the district  
5           council approved that the route should be a whole-day  
6           route to serve the residents of Tuen Mun, and we were  
7           saying that without a rest kiosk how can we improve the  
8           quality of service? Our views were relayed to the  
9           district council and the Transport Department. Even  
10          today, we have not heard anything from the parties."

11          Just before I ask questions about that, could I also  
12          take you back to MISC-2. This is the report of the  
13          chairman's visit. This time, at page 899.

14          From page 899, could you go, please, through to  
15          page 902, where the observation of the visits is as  
16          follows:

17          "There was no rest facility at the bus terminus.

18          It was noted that a bus captain driving bus route  
19          E33P could only take a nap inside the bus compartment  
20          between two bus trips as there was no rest kiosk at this  
21          open-air terminus. According to another bus captain  
22          driving the same route, there was a locker stand at the  
23          terminus, in which bottles of water were occasionally  
24          placed. An Octopus card was available for access to the  
25          toilets inside the Siu Hong Station, but it took at  
26

1       least seven to eight minutes to go to the toilets in the  
2       station and return."

3               Then at annex D we have some photos. That's  
4       page 911. So we have photos of the terminus but no rest  
5       facility; a locker stand; and then the toilets inside  
6       the Siu Hong Station.

7               So you, I think, anticipate my question, which is:  
8       how could a terminus be approved and be installed  
9       without, apparently, any provision for either a toilet  
10      or a rest facility?

11   MR ROGER LEE: (Via interpreter) I think, as the chairman  
12      has said, this is a core problem. I don't have  
13      an answer for you. The latest situation is that the  
14      Transport Department has approved some facilities for  
15      this terminus. Of course, there is still work to do, in  
16      that we need to apply for power supply. This is the  
17      procedure: we need to get the approval from the  
18      government first, before we can apply for power supply,  
19      and that takes time.

20              So the next step for us is to do our best to get  
21      power connected to the rest facilities there.

22   MR PETER DUNCAN: Without going back to the Transport  
23      Department's submission, I think you will understand the  
24      tenor of what they say is that they will facilitate  
25      these sorts of applications and liaise with other  
26

1 government departments.

2 MR ROGER LEE: That's right.

3 MR PETER DUNCAN: Is it your experience that that is  
4 effective in any way?

5 MR ROGER LEE: Personally, I think some departments -- we  
6 may not need to contact some of these departments.  
7 These facilities are temporary structures, and they ask  
8 those departments which have to do with permanent  
9 structures. So they ask all those departments dealing  
10 with permanent structures.

11 Then the other point is about power supply. We need  
12 to get the approval before the power company would  
13 entertain an application for power supply. We have  
14 failed to make any headway about these procedures.  
15 I have asked CLP to expedite the process. You can well  
16 imagine that certain things can certainly be done much  
17 quicker.

18 MR PETER DUNCAN: So how long ago was it that you first made  
19 an application for a kiosk and a toilet at this  
20 particular venue?

21 MR ROGER LEE: (Via interpreter) I need to check, but it is  
22 not a short while ago, not like in terms of months. It  
23 may well be over a year. Even for power supply  
24 application, it would at least take a few months.

25 MR PETER DUNCAN: So it hasn't been granted as yet?

26

1 MR ROGER LEE: (Via interpreter) Not the power supply.

2 MR PETER DUNCAN: When do you expect all of the approvals  
3 will have been obtained?

4 MR ROGER LEE: (Via interpreter) Maybe after this meeting,  
5 things will gather pace, but it is not very complicated.  
6 We are talking about four to six months and nothing less  
7 than that.

8 MR PATRICK PANG: (Via interpreter) For the termini, we need  
9 a lot of time to apply for the rest facilities, and  
10 application for power supply equally takes a long time.  
11 So our colleagues would ask why they could not use the  
12 kiosks, but it's because we need to get the green light  
13 from other departments, including the DSD, Drainage  
14 Services Department, and some other formalities have to  
15 be complied with first.

16 CHAIRMAN: Gentlemen, we have reached 1 o'clock. We will  
17 take our lunch break now. We will resume this afternoon  
18 at 2.30. Thank you.

19 (1.00 pm)

20 (The luncheon adjournment)

21 (2.30 pm)

22 CHAIRMAN: Good afternoon, gentlemen.

23 Yes, Mr Duncan.

24 MR PETER DUNCAN: Thank you, Mr Chairman.

25 MR PATRICK PANG: (Via interpreter) Sorry, Mr Duncan, prior  
26

1 to the lunch break, we talked about the facilities at  
2 the termini. Do you mind if I try to give you a reply  
3 first?

4 Can we go to KMB Long Win Bus bundle 1(A), page 208.

5 CHAIRMAN: Yes.

6 MR PATRICK PANG: (Via interpreter) First of all, in  
7 relation to the third as well as the fourth one,  
8 Handsome Court as well as Sun Tuen Mun Centre, we were  
9 talking about special buses. There was only service in  
10 the morning, and therefore we don't have toilets, and  
11 bus captains do not take a rest there.

12 In addition, if you may go to page 209, Central  
13 (Macau Ferry) -- sorry, but there is an omission here.  
14 In fact, there is a public toilet.

15 (Chinese words not interpreted) --

16 CHAIRMAN: Just a moment, please. So that's a mistake or  
17 an omission?

18 MR PATRICK PANG: (Via interpreter) Correct. Sorry for the  
19 mistake.

20 CHAIRMAN: That's the Shun Tak Centre, is it?

21 MR PATRICK PANG: (Via interpreter) Correct. You are right,  
22 Mr Chairman.

23 CHAIRMAN: Yes?

24 MR PATRICK PANG: (Via interpreter) Further down, Cheung Sha  
25 Wan, Kom Tsun Street South, we haven't got a chemical  
26

1           toilet there, because we are looking at the chemical  
2           toilet at Kom Tsun Street North, so the two termini  
3           share one chemical toilet.

4           Then further down, second-last one, Kwai Shing  
5           Central -- I'm sorry, again, there was a slip, and in  
6           fact there is a KMB permanent toilet.

7           Then page 210, the last one, Yau Yat Chuen, for  
8           Yau Yat Chuen we haven't actually got a bus terminus,  
9           because route 203C goes to Tai Hang Tung. So there  
10          isn't a toilet; there isn't a rest facility for bus  
11          captains, as they don't rest there.

12          In addition, earlier on, some trade union  
13          representatives talked about Long Win Bus E33P, in  
14          particular Siu Hong South. Mr Duncan, you asked us when  
15          we started to apply for the facility. For Siu Hong  
16          South, it was August 2017 that we submitted our  
17          application to the TD to ask for a rest kiosk as well as  
18          chemical toilet. In July 2018, approval was given.  
19          Currently, we are now applying for power supply.

20          Thank you, Mr Duncan.

21          Thank you, Mr Chairman.

22   MR PETER DUNCAN: Yes. Thank you, Mr Pang.

23          Can I ask you now to be at MISC-2, at page 899,  
24          which, as we saw them this morning, is the report on the  
25          visit to the bus termini, the depot, and ask you,  
26

1 please, to go to the second page of the report, that's  
2 page 900.

3 I notice the reference in line 3 under paragraph  
4 (B), the Sha Tin Railway Station bus terminus", that  
5 this contained the new style rest kiosk with  
6 an air-conditioner, an exhaust fan, five chairs, and  
7 then the reference at the bottom of the page to the fact  
8 that "on an average day, there can be more than  
9 10 drivers resting at the terminus at the same time."

10 If I read the report correctly, this seems to be  
11 a situation which is not peculiar to the Sha Tin Railway  
12 Station bus terminus. So if you look at page 901, which  
13 refers to the Luen Wo Hui bus terminus, we have in the  
14 second bullet in the first paragraph reference to  
15 a small restroom with three chairs; and then, in the  
16 second paragraph on that page, the fourth bullet:

17 "on the day of the visit, there were around 6 or 7  
18 drivers resting at the terminus during peak hours".

19 I think if we go then to page 903 for the Shan King  
20 terminus, we have five chairs, although there is no  
21 reference on this occasion to the number of drivers who  
22 might be in that kiosk at any one time.

23 I think there are two points here. We heard that at  
24 the depot, there's actually a dark room with facilities  
25 which enable the bus captain to have a sleep in  
26

1 a horizontal position. That doesn't seem to be the case  
2 for the kiosks at the termini. Do you believe that to  
3 be a satisfactory situation?

4 MR PATRICK PANG: (Via interpreter) This may happen. What  
5 I want to emphasise is that for the so-called kiosks,  
6 there are two sizes, one smaller, the other larger. If  
7 we would like to place a couch which is horizontal, it  
8 takes up certain space. In fact, we have been doing our  
9 best, and depending on the usage, for certain termini,  
10 bus captains may not use the facilities at that  
11 particular terminus during the three-hour break, but  
12 whenever possible and if permitted we will try to place  
13 a larger kiosk.

14 MR ROGER LEE: (Via interpreter) If I may also add to the  
15 answer. Within a depot, yes, indeed, there is something  
16 for you to lie down. For a purposely built terminus, we  
17 aren't actually talking about a chair, but then it is  
18 a lower chair that allows the employees to take a rest  
19 more comfortably. They may not be able to lie down on  
20 something like a bed, but still it is quite  
21 a comfortable facility.

22 As to the point you are making, the kiosk is of such  
23 a size that it is only 40 square feet, we can only  
24 accommodate five or six chairs, and we believe that  
25 there is a need. Very soon, at larger termini, we are  
26

1 going to have two types of chairs, one for you to sit  
2 upright, the other for you to be more comfortable. We  
3 are already working on this at many locations.

4 MR PATRICK PANG: (Via interpreter) Mr Duncan, this morning,  
5 during the hearing, I tried to provide some figures for  
6 the committee. For us, the KMB, for bus captains doing  
7 special shifts, what I want to say is that about  
8 9 per cent of bus captains doing special shifts, that is  
9 134 of them, they will take their rest at the four  
10 depots. As Mr Lee has said, we do have horizontal beds.  
11 So 134 of them would have their rest breaks at the  
12 depots. For others taking their rest at the bus  
13 termini, 17 per cent of them, in other words 262 of  
14 them. Then for those who go home for the three-hour  
15 rest break, in fact they account for 74 per cent of the  
16 special shift bus captains, 1,117 of them. 74 per cent  
17 of them can go home to take their rest.

18 So, relatively speaking, for us in KMB, we are in  
19 a better position, because we have got differently  
20 distributed depots, and bus captains can go home within  
21 a short period of time so as to take their break.

22 Thank you, Mr Duncan.

23 MR ROGER LEE: (Via interpreter) If I may also add to the  
24 answer. Of course, we have given you the figures. For  
25 the rest facilities at the termini, we will continue to  
26

1 work on them: better chairs, more comfortable chairs.

2 So they are not just for special shift bus captains.

3 Even for those doing straight duties, we will still try

4 to improve the facilities for them.

5 MR PETER DUNCAN: At the larger kiosks, is there room for  
6 horizontal sleeping facilities?

7 MR PATRICK PANG: (Via interpreter) I don't think they can  
8 actually lie down in a horizontal position, but then we  
9 have something like an armchair for them to recline.  
10 Of course, I'm not talking about a bed that is  
11 horizontal, but then it is like an armchair that they  
12 can sit more comfortably. Soon we are going to provide  
13 more and more chairs like this.

14 So we do have them, and we are working on them, and  
15 as long as their size allows, we can provide more such  
16 chairs.

17 CHAIRMAN: Has anyone stipulated the maximum size of  
18 a kiosk?

19 MR PATRICK PANG: (Via interpreter) Every time when we apply  
20 to the TD to install the kiosk, there is a size  
21 restriction. I think we are already talking about the  
22 best size within the current framework.

23 CHAIRMAN: Is that an indirect answer that the Transport  
24 Department impose a limit on the size?

25 MR PATRICK PANG: (Via interpreter) Yes, indeed. Not  
26

1 necessarily the TD but in fact there is.

2 MR ROGER LEE: (Via interpreter) This is a size stipulated  
3 by the government. So we have an open attitude towards  
4 the size. It can certainly be bigger.

5 MR PATRICK PANG: (Via interpreter) Well, on many occasions,  
6 we try to convert to another type of kiosk from type A.

7 CHAIRMAN: Which department of government stipulates  
8 a maximum size of kiosk?

9 MR PATRICK PANG: (Via interpreter) The Transport  
10 Department.

11 MR ROGER LEE: (Via interpreter) The Transport Department.

12 CHAIRMAN: For how long has it stipulated these two sizes?

13 MR ROGER LEE: (Via interpreter) Five years.

14 CHAIRMAN: Really? No longer than that?

15 MR ROGER LEE: I'd probably say at least five years.

16 CHAIRMAN: And have you asked to have bigger kiosks, perhaps  
17 saying, "Look, we need somewhere for drivers to lie down  
18 to sleep?" Have you asked the Transport Department?

19 MR ROGER LEE: (Via interpreter) Usually we will ask for two  
20 40 square foot kiosks. Usually, that's what we try to  
21 do. Usually we only get one, we are only given  
22 permission to do one. If we ask for a size which is  
23 larger than 40, I'm afraid we have never tried.

24 CHAIRMAN: So you don't know what the answer might be?

25 MR ROGER LEE: (Via interpreter) Correct.

26

1 CHAIRMAN: But you infer from the fact that they refuse you  
2 to have two 40-foot ones, that they would refuse  
3 a 100 square foot kiosk; is that it?

4 MR ROGER LEE: (Nodded head).

5 CHAIRMAN: Yes, Mr Duncan.

6 MR PETER DUNCAN: The armchairs you refer to, are they  
7 visible in any of the photos that are attached to the  
8 report?

9 MR ROGER LEE: (Via interpreter) No, not shown in the  
10 photographs, but then for many bus termini we do have  
11 these kind of chairs.

12 MR PETER DUNCAN: The second point which arises from those  
13 descriptions that I read is the fact that you may have,  
14 say, three to five chairs, but at any one time there may  
15 be seven to eight people having a rest. Is that  
16 a satisfactory state of affairs?

17 MR ROGER LEE: (Via interpreter) Of course, there is always  
18 room for improvement. Personally speaking, I don't  
19 think this is quite satisfactory. So, as I have said,  
20 we have never stopped liaising with the government and  
21 applying to the government. So, for the rest kiosk, it  
22 isn't a problem that has been resolved; we are not  
23 satisfied with the situation.

24 MR PETER DUNCAN: So, going back to, if I could, TD-1, where  
25 we started this conversation this morning, at page 438,  
26

1 where we saw the two questions of the department and  
2 their responses. If I could bring your attention to  
3 page 438, the second sentence of the first bullet:

4 "When relevant departments/authorities consider and  
5 vet the applications for setting up these staff  
6 facilities, the TD has been providing appropriate  
7 coordination so as to facilitate early installation of  
8 such facilities."

9 Is that in fact your experience of the situation?

10 MR ROGER LEE: (Via interpreter) Yes, they do play the role  
11 as a coordinator. For applications like this, there are  
12 two major departments involved. Generally speaking, the  
13 Transport Department will deal with cases other than the  
14 Housing Department or the Housing Authority. For those  
15 cases falling within the Housing Authority, the Housing  
16 Authority will be the coordinator. So we are mainly  
17 talking about two different authorities dealing with the  
18 applications.

19 MR PETER DUNCAN: Does the Transport Department's  
20 coordination result in the facilitation of early  
21 installation of the facilities, in your experience?

22 MR ROGER LEE: (Via interpreter) As an operator, I would say  
23 that they could have done more quickly.

24 MR PETER DUNCAN: The second bullet, third sentence:

25 "Requirements and comments from the FB operators on  
26

1           toilets and rest facilities would be incorporated in the  
2           design of the bus termini as appropriate."

3           Is that the situation, in reality?

4   MR PATRICK PANG:   (Via interpreter) Actually, it is very  
5           difficult for me to give you either "yes" or "no". Some  
6           would be known to us, but others, the information is not  
7           known to us. So sorry, Mr Duncan, I cannot give you  
8           a clear "yes" or "no".

9   MR PETER DUNCAN:   Who's responsible for the design of a bus  
10          terminus?

11   MR ROGER LEE:   (Via interpreter) There are several types of  
12          termini. Some termini are on government land or  
13          government property. When they were built, the  
14          government might not have decided which bus operators  
15          would operate the routes there, and they seldom invited  
16          the operators for comment. The TD would have their own  
17          team of consultants to design the termini. So, over the  
18          years, we were never consulted on where the toilets  
19          should be installed.

20   MR PETER DUNCAN:   So it is the Transport Department which  
21          designs each bus terminus?

22   MR ROGER LEE:   (Via interpreter) If it is on their land.  
23          For termini on public transport interchanges, that might  
24          have to do with the railway company, and we are unaware  
25          of the property ownership situation, but we were never

26

1 informed.

2 MR PETER DUNCAN: So, when the Transport Department designs  
3 a terminus on government land, do they incorporate in  
4 the design the provision for a toilet and a rest  
5 facility?

6 MR ROGER LEE: (Via interpreter) If they call it a bus  
7 terminus, then terminus facilities should be  
8 incorporated. But from what I see now, these facilities  
9 are absent in some termini, so I cannot say or comment  
10 on their standards.

11 MR PETER DUNCAN: Going down to page 439, the first bullet  
12 on that page:

13 "The TD has been proactively liaising with the  
14 relevant departments/authorities as appropriate to  
15 resolve any difficulties encountered by the franchised  
16 bus operators in applying for the facilities ..."

17 Is your experience that the Transport Department has  
18 effectively resolved difficulties encountered by your  
19 company?

20 MR ROGER LEE: (Via interpreter) Mr Duncan, I would only say  
21 that it can be done better. This bullet point is  
22 actually very broad. There is no way for me to gauge  
23 what is meant by "proactively".

24 Or let me put it this way. The TD does not object  
25 in principle the installation of rest kiosks and  
26

1 chemical toilets at the termini, but whenever there is  
2 district consultation, and it is also about whether  
3 these facilities -- or whether there is space for these  
4 facilities at the actual site. I feel that we have no  
5 major differences with the TD and I see that they have  
6 certain difficulties.

7 MR PETER DUNCAN: Page 440, the last sentence on that page:

8 "The Transport Department would assist the  
9 franchised bus operators in canvassing support from the  
10 locals by conducting site visits/meetings with them to  
11 explore feasible solutions for erection of the rest  
12 facilities in order to expedite the implementation plans  
13 as and when necessary for the benefits of bus captains  
14 and passengers."

15 Has the company experienced that sort of assistance?

16 MR PATRICK PANG: (Via interpreter) When we file  
17 an application, I know that the TD would communicate  
18 with the district council as relevant for the example of  
19 Allway Gardens in Tsuen Wan, the TD said that there was  
20 opposition from the residents and they asked us to apply  
21 on another site. So this is a common problem we run  
22 into.

23 MR PETER DUNCAN: I now want to conclude by asking you  
24 a series of clarification matters, or matters that have  
25 already been the subject of the assistance you have  
26

1           given the committee.

2           First of all, with regard to the drivers actually  
3           coming to work to start their shifts -- now, do  
4           I understand correctly that, currently, drivers are not  
5           provided with any special transport to enable them to  
6           get to the start of their work? They have to use their  
7           own resources, their own devices, to get to work?

8       MR PATRICK PANG: (Via interpreter) We do provide crew bus  
9           service. The service is provided for morning shifts and  
10          the scope is pretty wide. We do not have any depot on  
11          Hong Kong Island, but we would provide crew bus service  
12          on Hong Kong Island every morning to take captains to  
13          work at their respective depots.

14       MR PETER DUNCAN: Right. Can you provide just a little more  
15          detail about that so the committee knows the extent of  
16          that crew bus service?

17       MR PATRICK PANG: (Via interpreter) No problem. We do have  
18          routes for our crew bus, and the timetables, et cetera,  
19          we can provide them.

20          For those on morning shifts, commuting is an issue,  
21          whereas for those on night shifts, the captains can  
22          often use the bus, and they can reach the depots they  
23          need.

24       MR PETER DUNCAN: Can I ask you to go to KMB-12 at  
25          page 5010.

26

1           This is one of the documents that you supplied after  
2           the last hearing, and which provide statistics to which  
3           you referred in different context just a few moments  
4           ago.

5           It shows the statistics regarding what proportion of  
6           the drivers will take their midday rest respectively at  
7           the depot or at the terminus or at home. I think the  
8           earlier point that you were making was the high  
9           proportion -- I think you mentioned about 70 per cent --  
10          who actually took their break by returning home.

11       MR PATRICK PANG:   Mmm.

12       MR PETER DUNCAN:   Is there any provision for transport  
13           assistance with regard to taking the drivers home or  
14           back from home to resume their duties?

15       MR PATRICK PANG:   (Via interpreter) We have an inherent  
16           advantage, in which we have a high number of termini, so  
17           every bus captain who has completed training at our  
18           company would be deployed somewhere near where they  
19           live.

20           So you can see that 74 per cent of the bus captains  
21           on special shifts are within walking distance of home,  
22           and very often they would just live next to the termini,  
23           so it is easy for them to go home.

24       MR PETER DUNCAN:   Now, during the hearing, on the last  
25           occasion -- if I could just give the members reference:

1 Day 14 at page 112 -- we were informed that drivers  
2 might be required to drive up to three routes in a day.

3 Do you recall that evidence?

4 MR PATRICK PANG: (Via interpreter) Yes, I remember.

5 MR PETER DUNCAN: What would be the financial implications  
6 if that was reduced to two routes a day, or would there  
7 be financial implications?

8 MR PATRICK PANG: (Via interpreter) Financially, I do not  
9 see any substantial difference, but in terms of  
10 operation, there might be some impacts. For the  
11 so-called interlining or the cap of number of routes at  
12 three per day, we are not the only company with such  
13 practice.

14 As far as I know, all franchised bus operators in  
15 Hong Kong adopt this approach of interlining. In the  
16 last hearing, as Mr Lee said, we asked a British  
17 consultant to look at the maintenance and operation of  
18 our bus routes, and from my experience with those  
19 consultants, in other countries, sometimes more than  
20 three routes are included in the interlining.

21 So, to answer your question, Mr Duncan, financially  
22 there is no substantial difference, but in terms of  
23 operation, you must understand that the passenger volume  
24 might be different every day and some bus captains might  
25 be on sick leave. If we allow them to drive no more  
26

1           than three routes, there would be more operational  
2           flexibility and for each bus route, there would be bus  
3           route training, or else we would not deploy the  
4           captains.

5       MR PETER DUNCAN: Are there any complaints from unions or  
6           drivers that driving three routes is too many?

7       MR PATRICK PANG: (Via interpreter) I did not hear major  
8           complaints, but for certain drivers there might be some  
9           complaints, if they have to drive two routes a day.  
10          I think there is a need not to drive more than three  
11          routes a day and this is a common practice.

12       MR PETER DUNCAN: We have heard evidence with regard to what  
13          happens when a driver is required to drive on a new  
14          route. When he is required to try out a new route, does  
15          he have the assistance on board of another captain?

16       MR PATRICK PANG: (Via interpreter) Captains must have  
17          received route training for all routes. If they are to  
18          drive a new route, they must receive route training at  
19          our training school.

20       MR ROGER LEE: (Via interpreter) I think we are looking at  
21          two issues here. For bus captains trained at our Bus  
22          Captain Training School, at the beginning, the driver  
23          would be accompanied by another person on board; whereas  
24          for an experienced captain picking up a new route, the  
25          captain would receive training from the training school.

1 MR PETER DUNCAN: When he drives that new route for the  
2 first time, does he have the assistance of another  
3 driver on board?

4 MR PATRICK PANG: Yes, buddy driver.

5 MR PETER DUNCAN: Buddy driver, yes?

6 MR GODWIN SO: (Via interpreter) It depends on the number of  
7 years of experience for the bus captain. For  
8 an experienced captain picking up a new line, that route  
9 would not be completely new for him, so he can handle it  
10 alone. For a new captain who has freshly graduated, we  
11 would assign a buddy driver who is experienced, who  
12 would give confidence to the new driver and provide the  
13 information necessary.

14 MR PETER DUNCAN: Dr Leung mentioned the proposal to  
15 introduce a 20-point increment instead of the current  
16 I think eight-point increment. Are you able to indicate  
17 to the committee when it is likely that this will be  
18 introduced?

19 MR GODWIN SO: (Via interpreter) It was in effect from  
20 1 September.

21 MR PETER DUNCAN: It has already been introduced?

22 MR GODWIN SO: Yes.

23 DR NORMAN LEUNG: In fact, Mr Duncan, for your information,  
24 with effect from 1 September, if a new recruit joins KMB  
25 or Long Win as bus captain, he will be earning about  
26

1           \$23,000 a month, inclusive of the double pay at the end  
2           of the year. That is a substantial increase over the  
3           previous remuneration.

4       MR PETER DUNCAN: Thank you.

5       CHAIRMAN: You have provided us with this information in  
6           a recent submission, have you not?

7       DR NORMAN LEUNG: I think we are happy to make -- Godwin,  
8           will be happy to submit to this committee a comparison;  
9           all right? The remuneration package before 1 September  
10          and after 1 September. Compare the daily rate of bus  
11          captains and the monthly captains -- provide those  
12          figures to this committee, please.

13      MR GODWIN SO: (Via interpreter) We will provide it as soon  
14          as possible.

15      CHAIRMAN: Yes. Thank you.

16      MR PETER DUNCAN: Does it sometimes happen that a driver  
17          will fall ill during the course of his duties? Does  
18          that sometimes happen?

19      MR GODWIN SO: (Via interpreter) Yes, it does happen.

20      MR PETER DUNCAN: Does the company have any procedures or  
21          protocols as to what should happen in that situation?

22      MR GODWIN SO: (Via interpreter) First of all, in the  
23          recruitment of captains, according to our agreement, if  
24          a bus captain falls ill, he or she should apply for sick  
25          leave, and we have our own clinic at each depot, and

26

1       when captains are deployed, when they check in at the  
2       terminus, we would remind them that they can only work  
3       that day if they are healthy, and they are allowed to  
4       apply for sick leave otherwise.

5       MR PETER DUNCAN: What of the particular situation, though,  
6       that during the course of driving a route a particular  
7       driver falls ill? Is there any particular policy or  
8       protocol or procedure that is required to be undertaken?

9       MR PATRICK PANG: (Via interpreter) If a bus captain feels  
10      unwell during the course of driving a route, the captain  
11      can pull over and call our inspector. We have  
12      inspectors who make inspections, and the bus captain  
13      simply has to pull over and our inspector would arrange  
14      another bus so that the passengers can be transferred,  
15      and then we would take the bus captain to a clinic.  
16      This is our practice.

17      MR PETER DUNCAN: KMB-12 again, if I may, this time at  
18      page 5063. This again is some of the material that you  
19      provided the committee with since the last hearing, and  
20      it contains a description of the regular training for  
21      new bus captains, page 5063, and then the regular  
22      training for serving bus captains at page 5064.

23             Does the company provide any training with regard to  
24      fatigue management? And when I mention "fatigue  
25      management", what I mean, if I can try and explain  
26

1           this -- recognising fatigue, knowing what to do about  
2           fatigue and knowing how better to take rest. That's  
3           what I mean about "fatigue management". Is there  
4           anything of that nature covered in the course of driver  
5           training?

6       MR JAMES WONG:   (Via interpreter) As Mr So has said, when  
7           they join the company, we will remind them that if they  
8           are not well, they should see a doctor; they should not  
9           drive.

10           As for fatigue, we think this is covered by the  
11           point on not being well.

12       MR GODWIN SO:   (Via interpreter) On fatigue management, the  
13           company has done a few things. First of all, the  
14           Transport Department has issued Guidelines on Working  
15           Hours. If we comply with the guidelines, then at least  
16           we can ensure that there is sufficient rest taken by the  
17           bus captains. We also have a chapter in the training  
18           manual that as a driver, they should manage their health  
19           properly. When they discover that they are not feeling  
20           well, they should inform the company and do not work in  
21           that particular shift that they have been deployed to  
22           work. There are also facilities at the depot -- at the  
23           terminus.

24           Every six hours, the bus captain has a coffee break,  
25           and there is also a water break, a layover break and  
26

1           toilet break, for them to take a rest, and that's for  
2           the purpose of keeping them healthy.

3       MR PETER DUNCAN:   So do I understand correctly from those  
4           answers that there is nothing specifically aimed at  
5           fatigue management; that these are general matters that  
6           are covered during the course of the training?

7       MR GODWIN SO:   No.

8       MR PETER DUNCAN:   Now, we have heard a lot at the last  
9           hearing that it was in early June this year that the  
10          company first learned from the Transport Department that  
11          digital road mapping was available in Hong Kong.   Do you  
12          remember that evidence at the last hearing?

13                               (People nodding)

14          Has the company yet started to make use of the  
15          digital road mapping?

16       MR LEUNG KIN WANG:   (Via interpreter) We have talked to the  
17          black box manufacturer.   We are working on it.   We hope  
18          we can make good use of the map.   We are doing it.

19       MR PETER DUNCAN:   When do you expect to commence making use  
20          of the digital mapping facility?

21       MR ROGER LEE:   (Via interpreter) We are doing this under  
22          a two-pronged approach.   For ZF, there are two systems,  
23          one based on digital map; the other is an approach based  
24          on manual input of information and data.   We are doing  
25          both.   We hope that in January next year or so, we can

26

1 try to provide some information on the black box. For  
2 example, speeding, or a speed limit for that particular  
3 road section. We hope to achieve this by January next  
4 year.

5 MR PETER DUNCAN: At the hearing on Day 13 -- I will give  
6 everybody the reference just for the record: it's  
7 page 31 of line 12 -- the committee was informed that,  
8 at that time, that's earlier this month, or last month,  
9 in August, it took four days for the speeding report to  
10 be generated.

11 Then, in answer to a question from Prof Lo, Mr Leung  
12 agreed that if the driver tapped in using his ID, and  
13 that record was put in the black box, the information  
14 would be instantaneous; you wouldn't have to wait for  
15 the four days.

16 So what is the current situation? Do we still have  
17 to wait for the four days or is it instantaneously  
18 available?

19 MR LEUNG KIN WANG: (Via interpreter) Still four days now,  
20 but we are working towards that particular direction.

21 MR PETER DUNCAN: When will you reach that direction?

22 MR LEUNG KIN WANG: (Via interpreter) We hope we can achieve  
23 it as soon as possible.

24 MR PETER DUNCAN: What does that mean, a few weeks, a month?

25 MR ROGER LEE: (Via interpreter) We were talking about the  
26

1 black box and the digital map. We can reduce it from  
2 ten to four days because of the technology. We have to  
3 merge the two sets of data, and it will take four  
4 instead of ten days.

5 If we can further integrate the digital map into the  
6 black box, we can certainly reduce the time taken from  
7 four days to something less. Maybe it can be reduced to  
8 one or two days. We don't know yet. But next year, the  
9 real time taken -- the time taken will be much  
10 shortened.

11 MR PETER DUNCAN: Thank you, gentlemen. I have, personally,  
12 no further questions, but the committee may have some  
13 questions for you.

14 MEMBER AU YEUNG: Thank you, Chairman.

15 You spent a lot of time today talking about how to  
16 improve the working conditions of all the bus captains.  
17 Can you give us some description on the hiring successes  
18 of bus captains so far, using say the last month versus  
19 three months ago to six months ago? Are you having much  
20 success hiring bus captains?

21 MR GODWIN SO: (Via interpreter) At present, on a weekly  
22 basis, we can recruit 20 to 30 new bus captains.  
23 Compared with what it was six months ago, we were only  
24 able to recruit 10 to 15 bus captains. But it has to do  
25 with the market. But, at the same time, the company has  
26

1       done certain things. First of all, pay and  
2       remuneration. As our chairman has said, there was  
3       an enhancement in March, and then in August there was  
4       a pay increase. So altogether we are talking about  
5       15 per cent increase in one year. With higher pay, we  
6       can attract more bus captains.

7       Secondly, we were talking about the conditions, more  
8       facilities for rest, and so on, and also in our  
9       recruitment we have stepped up our efforts. We have  
10      organised more open days and reaching out activities.  
11      We would take the initiative to reach the target of  
12      prospective bus captains so we can make up the shortage,  
13      shortfall.

14      MR ROGER LEE: (Via interpreter) As for the target recruits,  
15      and also we have to bear in mind different local  
16      characteristics in different districts. For example,  
17      Tuen Mun is very different from Lai Chi Kok, so we will  
18      have to adopt a targeted approach. In Tuen Mun, we may  
19      want to target more women. They might not be able to  
20      work a full eight-hour day; they may only work half of  
21      that. But we know that certain hours, they will be able  
22      to work, and they don't want to have an assured working  
23      shift designated.

24      So we will also look into child-care service so that  
25      these bus captains can take care of their children when  
26

1       they are off duty. Some of these people are in their  
2       early 50s. They may have the driving licence; they may  
3       not want to take up a full-time job.

4       So we will have to look at the district  
5       characteristics and the people in different districts.

6       Also, we have gone to different districts, including  
7       Lantau Island and Tung Chung, and we need to use some  
8       new approaches.

9       MEMBER AUYEUNG: A second question I may have is to follow  
10      up on the question Mr Duncan asked earlier about the  
11      design of the bus terminus.

12      I get the impression from your feedback that it's  
13      like you have no chance to ask for a toilet or whatever.  
14      Is the arrangement all or nothing, either you do it or  
15      you don't get the route? Is that how it works in the  
16      system?

17      MR PATRICK PANG: (Via interpreter) Not that the design of  
18      every terminus is without a rest kiosk or any toilet.  
19      Some termini would factor in this in the design, but  
20      somehow, in some of the termini, these facilities are  
21      not taken on board.

22      MR ROGER LEE: (Via interpreter) I think Mr Auyeung was  
23      asking about our role in the design of new termini.  
24      Usually, the design of the new terminus is completed  
25      before the award of new bus routes. So they would build

26

1 the termini first before they make a decision on which  
2 operator, bus operator, should be granted the right to  
3 run the routes.

4 For example, in respect of the Hong  
5 Kong-Zhuhai-Macau Bridge, they have been talking about  
6 offering bus service for a long time, but they haven't  
7 made a decision on who, which company, to run those  
8 routes. So they have no way to ask us about our ideas  
9 or proposals in the design. So they would complete the  
10 hardware first, before finding an operator, because when  
11 the design is done we don't know whether we will run  
12 those routes.

13 MEMBER AUYEUNG: You have no chance to go back and request  
14 such facilities as a toilet?

15 MR ROGER LEE: (Via interpreter) In respect of the Hong  
16 Kong-Zhuhai-Macau Bridge, we did try that, but the  
17 hardware is already completed so that's a difficult  
18 point.

19 MEMBER AUYEUNG: Thank you.

20 Thank you, chairman.

21 CHAIRMAN: You have provided the committee with redacted  
22 versions of the notes or the minutes of various minutes  
23 that were held in several different parts of the working  
24 group that was convened in March 2018 and addressed  
25 training and the use of technological devices to enhance  
26

1 safety.

2 In response to the agenda being sent out, you sent  
3 your own shopping list of what you would like to  
4 address, and can I invite you to go to that. It's at  
5 KMB-12 at page 4939. I think the agenda had been sent  
6 out on 13 March, so this was an immediate response, and  
7 no doubt what you were doing was taking the opportunity  
8 to put down matters that you had had difficulties with,  
9 for them to be discussed. This was an opportunity for  
10 you.

11 Am I correct in that assumption?

12 MR GODWIN SO: Yes.

13 MR ROGER LEE: Yes.

14 CHAIRMAN: What you asked them to address was, first of all,  
15 illegal parking and loading and unloading activities at  
16 bus stops; traffic congestion is perhaps a broader  
17 matter; but more specifically, bus captain assaults and  
18 traffic black spots.

19 Two of those matters are matters that we have  
20 received evidence on from various parties: illegal  
21 parking, particularly at bus stops, and assaults on bus  
22 captains.

23 The response from the Transport Department came in  
24 the letter at page 4941, dated 26 March 2018. You will  
25 see, in the second paragraph, reference is made to the  
26

1 limited time span of the working group and the need to  
2 focus on submitting a review report on the outcome in  
3 three months' time. Then the response to your request:

4 "As for the four subjects that you have raised, we  
5 would handle them separately outside the working group."

6 The question I have for you is this. This is now  
7 five months later. Have these matters, illegal parking  
8 at bus stops and assaults on bus captains, been handled  
9 at all?

10 MR GODWIN SO: (Via interpreter) Perhaps I can answer this.

11 At that time, the working group under the Transport  
12 Department focused on safety belts on buses and the  
13 training of bus drivers. After the two priority agenda  
14 items were completed, we wrote to the Transport  
15 Department, as you can see in page 4945, and we  
16 reiterated the four subjects.

17 Illegal parking, as we mentioned in earlier hearing,  
18 Mr Pang told you that the company took the initiative to  
19 liaise with the police in an attempt to do something  
20 about this.

21 As for traffic congestion, we all understand there  
22 is very little we can do.

23 The third one, harassment of bus captains, or bus  
24 captain assault, we understand that the Transport  
25 Department is conducting a campaign involving a number  
26

1 of operators, railway operators and bus operators. This  
2 is a publicity campaign on polite passengers.

3 And the fourth one, traffic black spots, we have  
4 a fleet of 3,000 buses. We understand the road  
5 conditions well. Some roads are uneven or the levelling  
6 is not good, and also the marking may also affect -- may  
7 cause traffic accidents. From time to time, we write to  
8 the Transport Department. They have regional offices  
9 responsible for road safety and design, road design. We  
10 will relay the views collected from our bus captains and  
11 our frontline people.

12 According to this letter, the department said the  
13 matters would be dealt with outside the working group.  
14 So we subsequently wrote to the Transport Department,  
15 listing out all the 300 cases that we have gathered over  
16 the period.

17 CHAIRMAN: Has anything at all been achieved about illegal  
18 parking at bus stops in the five months since March?  
19 Perhaps you can answer "yes" or "no", and then go on to  
20 explain.

21 MR PATRICK PANG: (Via interpreter) The simple answer is no.  
22 There has been no substantial improvement.

23 CHAIRMAN: Has anything been achieved about the issue of  
24 assaults on bus captains?

25 MR PATRICK PANG: (Via interpreter) After the last hearing,  
26

1 the police communicated with us, and we once again  
2 provided detailed information about past bus captain  
3 assault cases. So the information has been passed to  
4 the police.

5 As I said last time, there was a case at Yau Yat  
6 Chuen, four men twice pressed the emergency button on  
7 the bus and the police took the initiative to talk to us  
8 and also the police have contacted the bus captain  
9 concerned.

10 CHAIRMAN: That's the total of the achievement, is it?

11 MR PATRICK PANG: (Via interpreter) I think in respect of  
12 illegal parking or traffic congestion, we cannot expect  
13 much to be done within such a short period of time.  
14 There's the so-called "polite passenger" campaign  
15 organised by the Transport Department to promote mutual  
16 trust and politeness, and I think this would help our  
17 bus captains in the long run.

18 CHAIRMAN: The other matter I would like your help on, if  
19 I can ask for it, is -- and I give you an example -- the  
20 way in which the minutes have been redacted, the minutes  
21 of the meetings of the working group.

22 Now, the working group has been addressing issues of  
23 training, issues of safety-related technological  
24 devices. Those are very much matters that this  
25 committee is concerned with in discharging its duties in  
26

1 examining the system, regulatory system, the operation  
2 of buses, as required by the Chief Executive in the  
3 terms of reference. These are parallel, if you like,  
4 enquiries into the same issue.

5 Can I ask you to go to page 4926. I'm just taking  
6 this as an example. We are not dealing with a censor in  
7 wartime, blacking out material that the enemy might get  
8 hold of, are we? But when we come to the prosaic item  
9 of "Installation of seat belts for all passenger seats",  
10 page 4927, we've got half a page of black ink, and then  
11 on the next page we've got another half-page of black  
12 ink.

13 The more general question I would ask you is this:  
14 on what basis have these minutes been redacted? What is  
15 the logic behind it?

16 MR GODWIN SO: (Via interpreter) Well, it involves the  
17 remarks made by other bus companies, so, in the absence  
18 of their consent, we have to redact the relevant parts.

19 CHAIRMAN: So that is the basis? You have just taken out  
20 what other people have said? You are happy to tell us  
21 what you have said but you have taken out what others  
22 said? Is that it?

23 MR GODWIN SO: (Via interpreter) Yes, you may say so.

24 CHAIRMAN: So what you have taken out is what Citybus have  
25 had to say, what the Transport Department have had to  
26

1 say, is that it?

2 MR GODWIN SO: (Via interpreter) We haven't redacted  
3 anything spoken by the Transport Department because we  
4 have asked them about it.

5 CHAIRMAN: So it's Citybus?

6 MR GODWIN SO: (Via interpreter) Yes, in my version of the  
7 minutes, that's it.

8 CHAIRMAN: So did you ask Citybus if you could put in what  
9 it is they said at these meetings?

10 MR GODWIN SO: (Via interpreter) I think it is better, more  
11 appropriate, for the Transport Department to do this.

12 CHAIRMAN: So the answer to my question is you haven't asked  
13 Citybus whether or not you can include what it is that  
14 they had to say so that we would get a full version of  
15 the minutes? You haven't even asked them?

16 MR GODWIN SO: (Via interpreter) After today, I will ask  
17 them. If they give us the permission, we will give you  
18 the full set.

19 DR NORMAN LEUNG: Sorry about that. The straight answer is  
20 that, Mr Chairman, we have not asked Citybus and  
21 New World First Bus for their consent to have the full  
22 text presented before you. Sorry about that,  
23 Mr Chairman.

24 CHAIRMAN: Thank you, Dr Leung, but, Mr So, you will now ask  
25 Citybus. If Citybus decline, please tell us, because  
26

1           then we will ask them ourselves, because we might be  
2           able to save quite a lot of ink.

3           One final question is this. You have told us about  
4           four depots that Kowloon Motor Bus have: Tuen Mun,  
5           Sha Tin, Lai Chi Kok and Kowloon Bay. Of those four  
6           depots, are any or all of them owned by Kowloon Motor  
7           Bus or its subsidiaries?

8   MR ROGER LEE: (Via interpreter) Well, among the four  
9           depots, for Sha Tin Depot and Tuen Mun Depot, they are  
10          owned by the KMB. We bought it at an auction. For  
11          Kowloon Bay Depot, it has been granted to us under  
12          private treaty grant. So we paid the premium for using  
13          it as a depot. For Lai Chi Kok Depot, it is under the  
14          arrangement of a short-term tenancy with the government.

15   CHAIRMAN: And, as to the meaning of "short-term", can you  
16          give us some indication?

17   MR ROGER LEE: (Via interpreter) This is true, for the KMB  
18          Citybus and New World Bus, the government offers a site  
19          under a short-term tenancy arrangement. It depends on  
20          the duration. For Lai Chi Kok Depot, we have it renewed  
21          automatically every year. We have to pay a rent for the  
22          use of it.

23   CHAIRMAN: So it's an annual renewal?

24   MR ROGER LEE: (Nodded head).

25   CHAIRMAN: Yes. Thank you.

26

1           Mr Duncan, are there any matters arising from the  
2           questions asked by the committee?

3       MR PETER DUNCAN: Just one matter. If I may follow up the  
4           issue of women drivers, Mr Chairman.

5       CHAIRMAN: Yes, please do.

6       MR PETER DUNCAN: Thank you.

7           Previously, we were alerted or apprised of some of  
8           the issues that surround women drivers, and a few  
9           moments ago there was further information given with  
10          regard to how to approach that topic.

11          Has there been any appreciable increase in the  
12          number of women applying for positions in recent times?

13       MR ROGER LEE: (Via interpreter) Well, for female bus  
14          captains, it is slightly over 5 per cent as of now.  
15          Of course, it depends on the local factors. In  
16          Hong Kong, I think we have sort of half male and half  
17          female in our population. So I see a huge potential  
18          here.

19          Just now, to follow up on Mr Auyeung's question, we  
20          use Tuen Mun as an example, we hope that at Tuen Mun  
21          Depot, we can do something about it, and the chairman  
22          has also referred to the case in Sweden. I have also  
23          noticed that in many European countries, they are  
24          providing nurseries so that female drivers can drive.  
25          They may not be working full-time for us, but still they

26

1           can spare some time and help us out as bus captains in  
2           the short term.

3       MR PETER DUNCAN: Have you seen any fruits from your  
4           endeavours?

5       MR ROGER LEE: (Via interpreter) Indeed, there is.  
6           Personally speaking, I think in terms of stability and  
7           in terms of passenger interaction, I have a high level  
8           of hope for the women bus captains. But of course we  
9           have to get approval from the government to allow us to  
10          set up a nursery within our depot before we can move on  
11          to that.

12       MR PETER DUNCAN: I think my question was a little more  
13          specific. Has there been any increase, as yet, in the  
14          number of applications by women?

15       MR ROGER LEE: (Via interpreter) Steady. Not really  
16          an increase.

17       MR PETER DUNCAN: Thank you.

18       MR ROGER LEE: (Via interpreter) But many people did ask us  
19          about that.

20       MR PETER DUNCAN: Yes. Thank you, Mr Chairman.

21       CHAIRMAN: Mr Lee, I understand that there is a concluding  
22          statement that you wish to make at the end of the  
23          evidence. Or is Dr Leung going to make it?

24       DR NORMAN LEUNG: Yes, Chairman and members of the  
25          committee, I just want to say that we are grateful for  
26

1           your time to receive representation from us. As I said  
2           at the outset of the hearing we came before you with  
3           a humble and receiving heart. We welcome any  
4           recommendation that will safeguard bus safety for our  
5           passengers. It has been a very educating experience to  
6           us, and in particular to our management, and so with  
7           that I ask our managing director, Mr Roger Lee, to say  
8           a few words to wrap up our representation before you.

9           Thank you very much, Chairman.

10          CHAIRMAN: Thank you, Dr Leung.

11          Mr Lee?

12                       Closing statement by MR ROGER LEE

13          MR ROGER LEE: (Via interpreter) Mr Chairman and members,  
14           I would like to thank everybody. We fully understand,  
15           over the past period of time, that the public in  
16           Hong Kong have high expectations in relation to bus  
17           service.

18           In our daily operation, there are many, many  
19           challenges, in terms of recruitment of bus captains,  
20           road congestion, and then there are many social changes,  
21           and we have seen bus captains being assaulted. So in  
22           fact it is a major challenge. But still we believe we  
23           have to discharge our duty properly. We shall continue  
24           to enhance our service.

25           In particular, in relation to safety, I am sure  
26

1           nobody from our team would give up our efforts.

2           For the traffic accident in Tai Po Road in February  
3           this year, it was a huge blow to everybody in the KMB,  
4           both in the senior management as well as at the  
5           frontline. No words can describe how heart-breaking it  
6           was for us. Personally speaking, ever since, I have not  
7           been able to let it off. We won't allow the accident to  
8           happen again and we don't want this to happen again.  
9           This is one too many.

10          Since the accident, we come to recognise that there  
11          are inadequacies in our work. We haven't stopped in  
12          making improvements.

13          In the process of giving evidence, we come to  
14          realise that KMB must progress with the times. We have  
15          to do more in this regard to enhance our service. Say,  
16          for example, in terms of the use of technologies, we  
17          need to be comprehensive, and we have to aim at  
18          precision and we have to work more on our safety system,  
19          and we need to catch up with the times.

20          Now I turn to the bus captains. The management of  
21          bus captains, the training of bus captains, are areas  
22          that we need to improve. And in terms of our  
23          facilities -- and in fact just now we have talked about  
24          the rest facilities as well as the toilets -- well, in  
25          fact we haven't stopped making improvements in such

26

1 areas. The KMB has been serving the Hong Kong citizens  
2 for 85 years as a bus company. Indeed, it is our duty  
3 to be fully dedicated in serving the public.

4 Whatever that our passengers or staff need, it is  
5 our duty to meet their requirements, but at the same  
6 time it takes more than the KMB on its own to do the  
7 job. We need the support and coordination of the  
8 government departments, and then we can be effective in  
9 service enhancement.

10 Finally, our team as a whole are most grateful to  
11 the committee for your past work as well as your work in  
12 the future.

13 As our chairman has said in the opening remarks  
14 before you, with a humble heart and with the greatest  
15 sincerity, the KMB team will be open to different  
16 recommendations and suggestions.

17 Thank you.

18 CHAIRMAN: Dr Leung and Mr Lee and gentlemen, thank you for  
19 attending now for four days to assist us with your  
20 evidence. We are grateful for that, but these  
21 proceedings are now concluded. We have other evidence  
22 to take on Saturday, typhoon willing. Thank you for  
23 your attendance.

24 (3.43 pm) (The hearing adjourned until 10.00 am  
25 on Saturday, 15 September 2018)

MR PATRICK PANG, MR JAMES WONG

Examination by MR PETER DUNCAN (continued) .....1

Closing statement by MR ROGER LEE .....112

*[Blank Page]*

1 2018 年 9 月 12 日

2 上午 10 時正恢復聆訊

3 出席人士如前。

4

5 主席：（經傳譯員）各位早晨，梁乃鵬博士早晨，各位先生早晨。鄧樂勤大律師。

6 MR DUNCAN：（經傳譯員）多謝你，主席。早晨，梁博士，早晨，各位先生。首先  
7 我想講一講就係我哋係確定係收到大量嘅材料嘅，呢個係嚟自你哋公司，就係  
8 自從上次召開聆訊之後，你哋一直都畀咗好多文件我哋嘅，亦都多謝你哋係提  
9 供咗呢啲資訊。喺第十四日結束嘅時候，我當時係問咗你哋一啲問題嘅，呢個  
10 係關於就係話一啲裝置嘅，譬如話係提醒唔好撞車同埋係保持喺行車線嗰度呢  
11 一啲裝置，當時就梁先生話畀我哋聽就係公司當時係有做過呢一個研究嘅，就  
12 係貝爾法斯特嘅 Queen 大學嘅，呢個就話係去年嘅秋天所做嘅事，即係話到而  
13 家大概有一年嘅時間。當時你哋亦都同我哋講過，就話你哋會留意市場個情  
14 況，睇下有冇一啲第三方嘅產品係可以用得著嘅。

15 委員會係知道市場係有咁樣嘅性質嘅產品嘅，佢個名--即係個產品個名叫  
16 做 Mobileye，我就想問下你哋公司知唔知道係有呢一類嘅裝置呢？即係叫做  
17 神眼嘅呢個 Mobileye。

18 梁健宏先生：我哋知悉嘅。

19 MR DUNCAN：（經傳譯員）想問下，你哋有冇諗過係用呢一啲咁樣嘅裝置呢？

20 梁健宏先生：會嘅。

21 MR DUNCAN：（經傳譯員）係咪仲未開始做呀？

22 梁健宏先生：其實我哋 2014 年同 Mobileye 亦都試過㗎喇，2014 年我哋就同  
23 Mobileye 亦都試過一個類似嘅計劃，試過嘅，當其時嘅成果就唔係幾理想，  
24 就當然技術會改善嘅，我亦都係開始聯絡--再聯絡佢哋嘅。

25 李澤昌先生：呢度都有少少可以補充，其實我哋今日其實已經採用緊一間公司，一間  
26 澳洲嘅公司就係我哋嘅車上面都做緊一啲近乎 Mobileye，即係其實係等於車  
27 長喺行駛嘅時間，如果係有啲瞓著眼瞓咁，就會提醒佢。呢個係我哋係喺呢個  
28 做緊個 chart 嘅，亦都同一時間，我哋亦都搵咗一間日本嘅公司，過去嗰兩年  
29 係都同--睇緊有冇嘢即係近似合適嘅嘢，喺車長行駛嘅時間有咁嘅狀況，即係  
30 我哋所謂叫“fatigue”，就希望可以幫到佢哋，過去嗰兩年其實係頭嗰年就  
31 係困難嘅，因為喺香港嘅道路上邊其實行長途嘅時間同埋行短途，特別喺繁忙  
32 嘅路段，車長佢嗰個頭嗰個轉動比較多，所以好難好精準睇到佢嘅眼，例如同  
33 啲乘客有交流或者係轉彎嘅時候，其實係困難。

1 所以其實香港嘅道路係搵一個好第三者嘅一間公司去做到呢個 fatigue 呢  
2 個係困難，所以我哋亦都喺--而家喺 Belfast 喺北愛爾蘭嗰個 Queen's  
3 University，我哋都好斟酌研究嗰幾樣嘢，一，就係喺車長喺無意中轉線嘅時  
4 候而係有一個好合理嘅理由，呢個提醒佢，或者喺同前車太近個速度去提醒  
5 佢。我覺得呢個係一個整體上嘅研究嚟嘅，當然日本嗰個牌子我哋應該喺今年  
6 或者下年年初有機會再試，澳洲嗰個牌子而家試緊。

7 Mobileye 我哋曾經睇過，好似梁生講，但係呢個--暫時呢個我認係唔適  
8 合。

9 主席：（經傳譯員）你講緊好多不同類型嘅裝置㗎嘛，同埋係譬如話你話 Mobileye  
10 6 同埋佢係咪一個係防撞--另外仲有一啲係防碰撞嘅裝置？因為佢會睇你個車  
11 速㗎嘛。另外你亦都係話有一個裝置係避免啲人係瞓眼瞓嘅。

12 李澤昌先生：Okay，呢個基本上有兩樣唔同嘅嘢嚟嘅，Mobileye 就係--或者係我  
13 哋試緊嗰兩隻係望住個車長佢嗰個眼神或者個面部有啲咩嘢令到佢覺得係可能  
14 係瞓著㗎，就然後有一啲方法係搞醒佢。另外嗰種就係喺架車裏面有個  
15 sensor，而呢個 sensor 係同你前車之間個距離有幾遠，而佢可以知道你當其  
16 時你架車嘅車速，因為每一架車嘅車速，佢有一個既定嘅所謂叫做“braking  
17 distance”，即係話你行緊某一個公里嘅時間，你如果喺嗰陣時急剎，你同個  
18 前車有一個合理嘅距離仲係安全嘅，如果佢量度前車嘅距離係好近，而你嘅車  
19 速去到某個階段，係基本上係即係唔係好理性嘅，呢個就係一個--即係喺另外  
20 一樣嘢，其實係整體上一套嘢嚟嘅。我哋係喺研究喺呢兩套，我哋都會做。

21 MR DUNCAN：（經傳譯員）希望我哋就唔會係有乜嘢混亂，我就想講下，不如先集  
22 中就係防碰撞同埋保持行車線呢一啲產品，然後之後先至再係睇嗰啲係防止瞓  
23 眼瞓嘅裝置。

24 梁健宏先生：可以。

25 MR DUNCAN：（經傳譯員）講到話係避免碰撞同埋保持行車線呢啲裝置，我認你較  
26 早時候有講過嘅，就話再睇番係咪可以搵番呢個 Mobileye 呢個裝置嘅，咁講  
27 啱唔啱？

28 梁健宏先生：我哋會參考尤其是我知道其他啲 operator 都係試緊佢嘅，我哋都理  
29 解下對方嗰個試驗個情況如何，除咗我哋喺 Queen's University 嗰個研究  
30 之外，我哋都會保持開放嘅態度，理解下 Mobileye 而家嗰個功能係點樣樣。  
31 雖然之前嗰個經驗就未必啱用，但係我覺得都可以去睇下佢嗰個狀況。

32 MR DUNCAN：（經傳譯員）我想問開始咗未呢？搵番呢個 Mobileye 未呢？

33 李澤昌先生：未。

34 MR DUNCAN：（經傳譯員）你係咪打算咁做呀？

1 李澤昌先生：暫時我哋係都係睇純粹睇文件裏面睇緊佢個發展，係冇直接同  
2 Mobileye 呢間公司有任何嘅對話，因為頭先都講咗其實 Mobileye 嘅公司佢  
3 做嘅嘢市面上都有好多係可能比佢適合我哋嘅，所以我哋係睇多幾款嘢，就亦  
4 都我哋自己亦都研究緊。

5 MR DUNCAN：（經傳譯員）好，想問有冇同任何嘅供應商係傾談緊就係關乎呢啲防  
6 碰撞嘅設施呢？

7 李澤昌先生：有，有一間澳洲公司，正正講咗我哋已經係研究緊㗎喇，用咗佢嘅產品  
8 係試驗緊，喺一間日本公司，我哋亦都有同佢哋已經有直接係有對話，係發展  
9 緊係做緊佢啲套新嘅儀器，亦都頭先都講咗，我哋自己亦都研發緊啲個  
10 collision，啲個同 Mobileye 有少少唔同嘅嘢，亦都係啱啱講緊喺北愛爾蘭  
11 我哋亦都做緊。

12 MR DUNCAN：（經傳譯員）唔該。係咪可以講畀我哋聽澳洲公司嘅名？

13 李澤昌先生：（經傳譯員）可以嘅。

14 MR DUNCAN：（經傳譯員）邊間呢？

15 梁健宏先生：嗰間就係 Guardian 㗎嘅。

16 MR DUNCAN：（經傳譯員）日本公司個名呢？

17 梁健宏先生：Denso。

18 主席：（經傳譯員）可唔可以重複你個名？

19 梁健宏先生：日本間公司就係 Denso，D-E-N-S-O，Denso。

20 MR DUNCAN：（經傳譯員）請你再串一次個名。

21 陳祖澤先生：D-E-N-S-O。

22 MR DUNCAN：（經傳譯員）講番呢個 Queen's 大學嘅研究，其實你上次都有講過㗎  
23 喇，就話大概一年之前開展嘅，我想問而家去到咩嘢階段呢？

24 李澤昌先生：首先，佢哋 Queen's University 嘅 professor 應該--我記得係應  
25 該上個月，上個月就佢哋亦都過咗嚟我哋九巴，就睇過我哋公司一啲我哋嘅  
26 個營運上啲嘢，即係喺架車裏面啲個營運嘅情況，我哋亦都派咗我哋一個工程  
27 師去咗北愛爾蘭，喺--應該係已經開始同佢哋一齊研究緊，好快嘅將來，應該  
28 係呢一、兩個月，佢哋亦都會有啲即係做 research，喺個 university 嘅  
29 research 亦都會 base 喺我哋呢邊一段時間，係睇緊香港啲個道路嘅情況，而  
30 家暫時去到呢個階段，我自己個人都會睇下一、兩個月會去一去呢個 Queen's  
31 University 睇下佢哋個 update。

32 MR DUNCAN：（經傳譯員）你預期幾時會做完個研究？

1 李澤昌先生：暫時個時間表係好 tentative，係出年嘅 summer，但係就當然係要  
2 睇個進展嘅情況。

3 MR DUNCAN：（經傳譯員）喺呢個階段講到個研究，可唔可以話到畀我哋聽你預  
4 期到時會有啲咩嘅結果呢？

5 李澤昌先生：我要返去 check 一 check 佢發展到咩嘅階段，當然絕對啲啲出嚟啲啲  
6 結果係可以同呢個 committee 一齊分享嘅。

7 MR DUNCAN：（經傳譯員）但其實我個問題就問你而家做緊研究，你覺得係你都抱  
8 有希望定抑或你有啲乜嘢係預期嘅結果呢？

9 李澤昌先生：其實喺文件裏面，我哋應該係交咗呢一個研究，呢個 ADAS 呢個東西係  
10 咩嘅東西，其實已經係文件上係有嘅。

11 MR DUNCAN：（經傳譯員）你是否樂觀呢？即係今次嘅研究係會得出一個有效嘅裝  
12 置，避免碰撞同埋保持行車線，你樂觀定唔樂觀呢？

13 李澤昌先生：我只可以咁講，Queen's University 佢個 mechanical 個部  
14 門係好少一間大學係願意做一啲同雙層巴士或者 city bus 有關係嘅研究，呢  
15 個其實都係比較係一啲好特殊嘅，亦都正正喺英國，亦都有好好嘅環境畀佢從  
16 一個歐洲個角度去睇呢樣嘢，我哋作為一個全世界都算係一啲大嘅 bus  
17 operator，我當然對佢好大嘅期望。

18 MR DUNCAN：（經傳譯員）好喇，我哋不如唔講呢個防止碰撞同埋保持呢個係行車  
19 線，而家就講話防止就係呢個巴士司機就係瞓眼瞓嘅，你剛才就係講咗少少呢  
20 一方面嘅情況㗎喇。喺呢方面係想請你睇番 KMB 文件夾 1，想請你睇番 115  
21 頁，喺 115 頁個度，你見到呢個就係你哋公司提交畀運輸當局嘅一份報告嘅最  
22 尾個頁嚟嘅，就係其實--尾二個頁嚟嘅，其實就係大埔車禍之後你哋提交嘅調  
23 查報告，尾二個頁嘅，喺第 47 段，115 頁，個度個標題就係話車長係瞓眼瞓，  
24 你哋度就話九巴目前就進行緊一個測試嘅，就係有一個供應商就係有一啲係會  
25 監察車長嘅昏昏欲睡嘅情況，如果係揸緊車係有咁嘅情況，就會睇下佢哋就係  
26 有幾警覺，會唔會佢哋有呢個微睡眠嘅情況，如果係成績係滿意嘅話，就個系  
27 統就會安裝喺九巴嘅巴士上面嘅。

28 我就係想請你睇一睇工作小組其中一項嘅建議，呢一個就係 TD-1 嘅文件  
29 夾個度嘅，運輸署嘅文件夾 1，係 406 頁個度嘅。為咗紀錄起見，我就將佢讀  
30 出嚟，呢個係工作小組所提出嘅一個建議嘅，就係監察司機嘅裝置，呢一啲裝  
31 置就會係監察車上嘅車長嘅情況，就睇下佢係咪警覺嘅，如果佢就唔留意又或  
32 者譬如話佢係周圍望、瞓眼瞓、係昏昏入睡或者係姿勢唔好，個系統就會就係  
33 有啲視覺嘅警告同埋亦都會有個聲音嘅警示嘅，呢一個市場係有嘅，用佢嚟到  
34 去進行一個試驗計劃，睇下佢有冇有效係運輸署嘅建議嚟嘅。

35 我就想問，講番呢個係調查報告嘅第 47 段，我想問，你哋度講話供應

1 商，究竟係邊一家嘅供應商呢？因為你進行緊呢個試驗計畫，可唔可以講呢？

2 梁健宏先生：個公司名就係 Seeing Machines，佢個 product 個名就叫做  
3 Guardian。

4 MR DUNCAN：（經傳譯員）好，唔該。可唔可以話畀委員會聽就係你呢度所講個  
5 測試究竟而家進展如何呢？

6 彭樹雄先生：Mr Duncan，或者我講一講我哋個測試個嘅進展，我哋喺今年嘅 6  
7 月底，我哋就將呢一個 Guardian 嘅 system，我哋就裝咗落四架巴士裏面，  
8 其實就唔同廠嘅，因為我哋唔同廠都有啲比較長途嘅巴士線，當中包括沙田廠  
9 有兩部、屯門廠有一部、龍運巴士亦都有一部，初步嘅測試嘅結果都係有效  
10 嘅，係有效嘅，亦都係可以偵測到譬如話個車長係如果佢瞓埋眼係比較眨眼長  
11 嘅，其實個 system 係會 alert 到嘅，有聲同埋喺個耳背後面會震動嘅。

12 我自己本身都測試過兩部巴士，一部就係屯門廠嘅，一部係沙田廠嘅，我  
13 哋初步覺得有效嘅。但係因為呢一個嘅系統佢係會掃描你嘅五觀嘅，亦都我都  
14 知道廠亦都同我哋講，因為呢個 product，呢個係喺澳洲嘅，澳洲其實同我哋  
15 初步嘅發現都係就係喺某啲情況下，如果個車長，舉個例係側頭同啲乘客係  
16 去有眼神接觸嘅時候，佢個 facial detection，即係個就可能會有少少  
17 係 detect 唔到，佢就會有少少會震動嘅。呢個其實我哋明白嘅，但係總整嚟  
18 講，我哋接觸我哋嘅車長，我哋啲工會嘅工友其實對呢一樣嘢都係正面嘅。我  
19 哋亦都將呢一個嘅測試就再擴展到搵多啲嘅唔同嘅車長係繼續咁測試嘅，Mr  
20 Duncan，多謝。

21 MR DUNCAN：（經傳譯員）你認為個試驗會幾時完成呢？

22 彭樹雄先生：我哋而家啱啱喺 8 月中--我哋由 6 月底就試咗一班嘅車長，我哋而家  
23 試緊第二班嘅車長，好 likely，好大可能我哋會喺今個月底做埋呢一輪嘅測  
24 試，我哋其實係準備咗一啲嘅問卷嘅，即係睇一睇啲車長個嘅反應，然後  
25 我哋喺月底，我哋會做一個決定，我哋會唔會再--除咗呢四部，我哋再訂多  
26 啲，喺唔同廠繼續咁樣測試，然後 by phases，睇下點樣可以推到出嚟。

27 MR DUNCAN：（經傳譯員）根據你所講，呢個裝置就將會係被採用嘅，係咪？

28 彭樹雄先生：如果睇番而家我哋個測試嘅成效，我哋覺得係 positive 嘅，正面  
29 嘅。

30 李澤昌先生：呢度有少少補充，其實每一件可以幫到個交通路面個安全，我哋一  
31 定都會去嘗試，與時並進，我諗每一件新嘅嘢都會越嚟越好，我諗我哋一定會  
32 係有啲開始嘅。

33 主席：（經傳譯員）Guardian 呢一個裝置都係有喺新加坡採用嘅，係咪？

34 彭樹雄先生：主席，我知道澳洲係有用緊嘅，但係新加坡就應該就我嘅認知就應該

1 未。

2 李澤昌先生：新加坡應該係未正式開始用嘅，不過就...

3 主席：（經傳譯員）我哋可以再睇呢一點，因為根據我嘅記憶，新加坡已經係用咗呢  
4 個裝置好幾年㗎喇，呢個就係喺呢個 Sandilands 嘅電車嘅意外之後就係建議  
5 採用呢一個裝置嘅，完成嗰個調查之後，就係開始用咗呢一個裝置。

6 李澤昌先生：嗰個係火車，呢個唔知。

7 主席：（經傳譯員）我哋有嗰份報告嘅，都可以同你去分享。

8 李澤昌先生：但係有一點想講，係因為其實我哋喺兩、三年前都係好積極睇緊呢樣  
9 嘢，但係因為喺火車又好，喺啲大嘅 coach 又好，其實係用緊嘅，火車--揸火  
10 車嘅時候，有啲人係會仍然瞓眼瞓，揸大貨車亦都好多人容易瞓眼瞓，其實喺  
11 好多城市，呢啲已經係好 widely 用緊嘅，其實 metro--即係 city bus 今日  
12 面對嘅問題，就係長途嘅巴士，即係譬如去機場嗰啲，我覺得呢一套嘢係應該  
13 係--應該有一個好重要嘅功能我哋一定會係睇到佢個好處，但係喺好繁忙嘅地  
14 方，因為佢成日要睇交通燈，睇啲路面嘅行人過馬路，因為佢個頭比較郁得  
15 多，所以呢一個我哋係要好小心處理，否則嘅話，就會令到啲車長好受滋擾，  
16 所以我點解講係喺北愛爾蘭做緊個研究同埋喺日本 Denso 做緊嗰個嘢，正正就  
17 係處理緊呢一個問題。

18 我相信呢個 Guardian 係應該係某啲路線係用到嘅，所以我正正講就話我  
19 哋一定會喺唔同--即係唔同嘅嘢放喺唔同嘅身上去處理今日九巴嗰個問題裏  
20 面。

21 MR DUNCAN：（經傳譯員）點解唔同嘅路線會影響到你嘅決定呢？

22 李澤昌先生：因為喺啲--譬如喺市區嘅繁忙嘅路段，因為個車長個頭部個郁動比較  
23 大，而佢要睇紅綠燈，睇唔同嘅路面嘅情況，特別又多彎位，佢個情況係同  
24 走一條大直路好唔同，譬如假設你去機場，行一條機場嘅公路，其實佢行緊嗰  
25 50 公里，基本上架車係一條行車線上邊，佢個頭嘅郁動基本上係冇嘅，連埋站  
26 嘅機會都好少嘅，所以有啲相似火車，有啲相似嗰啲長途嘅大啲 coach，或  
27 者嗰啲貨櫃車。

28 MR DUNCAN：（經傳譯員）我而家就唔再講呢啲防打瞓眼瞓嘅裝置，我而家想講下  
29 安全帶嘅，我想你睇番呢一個調查報告嘅，或者我哋先睇工作小組嘅建議，呢  
30 個就係 TD-1 文件冊，就係 407 頁嘅。

31 主席：（經傳譯員）呢啲就係呈交畀立法會，喺今年嘅 7 月 25 號嘅一啲建議㗎嘅，  
32 啱唔啱呀？

33 MR DUNCAN：（經傳譯員）（經傳譯員）正確嘅，主席，403 頁係有提到呢一點。

34 主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）首先就係呢一個講安全帶嘅部分，就係 407 頁嘅頁底，然後一直去到第 410 頁嘅，我想你睇下第 16 段，呢一段就係有啲建議，同埋未來嘅路向，然後第 16 段就話「根據以上第 10 至 15 段所講，工作小組就係得出以下嘅建議，目的就係去更加--即係為一啲坐低嘅乘客提供更加多嘅保護嘅：首先，所有嘅--即係以後一啲新買嘅巴士必須要喺所有座位提供安全帶；而第二點，就係之後進一步嘅技術，營運同埋財務嘅可行性研究之後，可以考慮喺上層嘅所有座位係安裝安全帶嘅，呢個就係講緊係某一啲嘅巴士路線。」

呢個就係一啲建議。我而家就請你睇番調查報告，就係今朝早前有提到嘅，呢個就係 114 頁，第 40 段就係其他改善巴士安全嘅措施，根據報告，就話九巴已經係要求佢嘅供應商係喺所有喺 2018 年 3 月 5 號之後訂購嘅新巴士入面係所有座位都安裝安全帶嘅，而一啲現有巴士方面，如果某啲嘅路線有要求嘅話，喺九巴巴士嘅上層座位係會局部去安裝安全帶嘅。

如果我有理解錯，根據調查報告佢所講，係同工作小組嘅建議係一致嘅，首先喺呢一啲現有巴士安裝安全帶嘅工作係咪已經開始㗎？

李澤昌先生：因為其實喺上層要安置呢個安全帶最主要嘅問題就係嗰個技術性，係嗰個 gravity 嘅問題，政府已經開始同我哋係做緊一啲--問一啲資料，亦都係嗰個供應商亦都做緊呢個技術嘅研究，到今日為止，其實都仲係正面嘅，係正面嘅，因為佢最擔心就係因為嗰啲安全帶係比較重，佢擺咗喺上邊嘅時候，因為嗰啲係 retrofit 嘅關係，佢--因為佢個政府要做嗰啲叫 tilt test，將架巴士係可以嗰個重心嘅問題，其實個技術性如果係做到嘅，就應該絕對唔係一個問題，但係而家喺主要嗰兩大嘅供應商，Volvo 同埋呢個 ADL，就暫時都係好正面嘅，就當然係要 subject to 到最後係擺咗上去，做咗個 tilt test 嗰個為準。

MR DUNCAN：（經傳譯員）你可唔可以同委員會講一講，喺財政上如果要安裝一啲--即係喺現有巴士安裝安全帶會有啲--成本係幾多呢？

李澤昌先生：其實係一個唔平嘅一個嘅東西嚟嘅，應該可以咁講，喺今年嘅年頭，我哋公司個 special committee 已經好清楚畀咗個指引畀我哋，我哋 2019 年嘅新車係全車安裝呢個安全帶，同埋 retrofit 裏面，我哋儘量配合政府，可以嘅話，特別係長途車，我哋會喺樓上係配置安全帶，因為我哋個 special committee 清楚嘅就係話交通意外係比我哋使任何嘅費用係更加高昂，所以我哋係--暫時我哋係冇從呢個角度去睇，因為我哋就係想--唔想再見到有啲意外。

Financial 嘅 implication，我諗我哋係--暫時我哋係冇睇到呢樣，但係當然一條安全帶大概係二十萬一架巴士，喺 retrofit 嗰度，二十萬。

主席：（經傳譯員）呢個係講緊上層嘅，係咪？

李澤昌先生：（沒有可聽到的回答）

- 1 梁健宏先生：（沒有可聽到的回答）
- 2 主席：（經傳譯員）唔該。
- 3 MR DUNCAN：（經傳譯員）大概會喺幾架現有嘅巴士度安裝安全帶呀？
- 4 梁健宏先生：我諗接近有三千部嘅喇。
- 5 李澤昌先生：長途巴士㗎。
- 6 MR DUNCAN：（經傳譯員）我係想計一計㗎。
- 7 李澤昌先生：唔係，唔係，我想補充少少先，而家我哋現在有大概係四千二百部--四  
8 千二至四千三，即係話九巴再加埋龍運，其實佢裏面已經有一部分嘅巴士已經  
9 配置晒安全帶㗎喇，亦都有啲巴士係嗰個--即係隨住退役嘅關係，嚟緊呢幾  
10 年，其實我哋因為退役嘅車，如果有架新嘅車到，嗰啲未必係需要係配置安全  
11 帶，即係話兩、三年退役嗰啲，嗰啲未必需要。如果你睇長途嘅巴士，我喺呢  
12 度有一個好準確嘅數字，大概有三分一嘅線係跑長途嘅，你即係當佢係大概一  
13 千鬆啲左右。
- 14 MR DUNCAN：（經傳譯員）喺新嘅巴士...
- 15 主席：（經傳譯員）鄧大律師，喺你繼續之前，李先生之前就話會喺三千六百架長途  
16 巴士度安裝安全帶，而家你係咪更正個數字應該係一千呢？
- 17 梁乃鵬先生：Yes.
- 18 李澤昌先生：（經傳譯員）冇錯。
- 19 主席：（經傳譯員）鄧大律師。
- 20 MR DUNCAN：（經傳譯員）我都係想計番啲啲數㗎。一千架巴士，每架二十萬？
- 21 陳祖澤先生：Yes.
- 22 MR DUNCAN：（經傳譯員）就係總共要二億嘅，係咪？
- 23 梁乃鵬先生：Yes.
- 24 MR DUNCAN：（經傳譯員）有冇同政府傾過呢個成本嘅問題呢？
- 25 李澤昌先生：No.
- 26 主席：（經傳譯員）：梁博士。
- 27 梁乃鵬先生：（經傳譯員）我想補充一下，最近我係有同政府官員見面，我同佢哋講  
28 --即係我問政府可唔可以為我哋提供任何嘅補助，即係就住呢個加裝安全帶，  
29 個反應都係頗正面嘅。

1 主席：（經傳譯員）你同邊個係有呢個對話？

2 梁乃鵬先生：（經傳譯員）主席，呢個就係運房局常任秘書長黎以德，另外就係有呢  
3 一個運輸署嘅副署長嘅。

4 主席：（經傳譯員）唔該晒。

5 MR DUNCAN：（經傳譯員）你哋公司之前有冇聯絡過政府係要求一啲嘅資助或者係  
6 津貼呢？目的就係為咗現代--令到你哋嘅車隊更加現代化。

7 梁乃鵬先生：（經傳譯員）我哋有同佢哋講過加裝安全帶嘅問題。

8 MR DUNCAN：（經傳譯員）我咁理解啱唔啱呢？係新嘅巴士係會係上層同埋下層都  
9 安裝安全帶嘅，係咪？

10 梁乃鵬先生：Correct。

11 MR DUNCAN：（經傳譯員）你哋有冇考慮乘客會唔會真係用啲安全帶呢？

12 李澤昌先生：其實我哋做咗一啲有啲即係好比較係籠統嘅--即係啲大眾點樣睇呢個安  
13 全帶，喺坐短途啲啲，其實就唔係特別多人用，特別係樓下啲層，長途啲啲係  
14 比較受歡迎嘅，但係都唔係話講緊一個好多人特別覺得係好接受，明白嘅，因  
15 為其實係比較係麻煩嘅。但係我哋個睇法就係呢個個趨勢係--特別係長途嘅巴  
16 士線係會越嚟越重要嘅。因為每一個人上巴士嘅時候佢有個選擇就係話如果佢  
17 想瞓一瞓嘅時間，特別係長途，佢有條安全帶係畀佢一個選擇。當然我希望呢  
18 個數字會越嚟越多，今日個數字唔係一個太過受歡迎，但係我覺得係啲個越嚟  
19 越呢個趨勢嘅話，我哋覺得我哋作為九巴，應該係好接受啲個改變呢樣嘢，因  
20 為最後都係講緊一個安全嘅一個裝置嚟。

21 MR DUNCAN：（經傳譯員）九巴有冇考慮過喺使用安全帶可能會係需要立法呢？即  
22 係換句話講，係強制乘客係使用安全帶呢？即係如果係有提供嘅話？

23 李澤昌先生：呢個係有個難度嘅，因為香港嘅巴士係有企位嘅，所以如果你喺有一個  
24 法例上要做呢樣嘢，一，佢企位係一個問題，第二，就係啲個 enforcement，  
25 因為個車長亦都今日係同乘客之間亦都好多滋擾。我自己公司就有一個特別即  
26 係係咪呢個立例去做，但係就我覺得今日嚟講，我哋一定好覺得係安置安全帶  
27 有呢個選擇畀市民大眾係一件正面嘅嘢，呢個係我哋嘅睇法。

28 MR DUNCAN：（經傳譯員）唔該晒。而家我哋就唔再講呢一個安全帶嘅問題，我就  
29 想講另一個話題，我就請你攞去 KMB-4 文件冊。我就請你攞去 1182 頁，呢個  
30 就係文件冊嘅 1182 頁，呢一個就係上市公司全年報告嘅一部分，呢個就係  
31 2012 年，呢個就係載通國際控股有限公司嘅，然後呢一頁你哋見到就係董事嘅  
32 名單，你就會見到呢個獨立非執行董事嘅名單，然後你哋就會見到梁博士同埋  
33 陳博士同埋李家祥博士嘅，同埋蕭炯柱先生，同埋廖柏偉教授嘅。

34 我想請你而家睇一睇 KMB-5，請睇 1896 頁，呢個係有個董事嘅名單，呢

1 個 2016 年年報列出嚟嘅名單，我哋可以睇到呢度有打咗粒星嗰啲名，嗰啲係獨  
2 立非執行董事嚟嘅，梁博士、陳博士、李先生、蕭先生同埋廖教授，我就唔會  
3 逐個年報睇，即係 2012 到 2016 年嘅唔同嘅年報，我諗你可以證實係冇變到  
4 嘅，即係話獨立非執行董事响嗰幾年係冇改變嘅，啱唔啱？

5 梁乃鵬先生：（經傳譯員）冇錯嘅，冇錯嘅，鄧生，冇錯嘅。

6 MR DUNCAN：（經傳譯員）而家我想請你又睇到去 KMB-6 2108 頁，呢度係董事嘅  
7 名單嚟嘅，2017 年嘅名單嚟嘅，我哋睇到呢一頁 2108 頁，董事有改變喇，蕭  
8 冚柱先生就唔再係獨立非執行董事。

9 梁乃鵬先生：（經傳譯員）講得啱嘅，係，冇錯。

10 MR DUNCAN：（經傳譯員）曾偉雄就做咗係獨立非執行董事。

11 梁乃鵬先生：（經傳譯員）係，冇錯嘅。

12 MR DUNCAN：（經傳譯員）我想問幾個問題嘅，關於呢啲獨立非執行董事嘅委任，  
13 我希望你明白，我係非常之尊重嗰啲過去擔任過或者而家仍然擔任過獨立非執  
14 行董事嘅各位董事嘅，咁樣講啱唔啱呢？有任何一個獨立非執行董事係有安全  
15 嘅事務方面嘅背景嘅呢？

16 梁乃鵬先生：（經傳譯員）如果淨係講安全方面嘅背景，我哋--我個人就參與咗呢個  
17 巴士嘅運作好多年㗎喇，我係做咗九巴董事好多年，自從 2000 年，即係十七  
18 年，做咗十七年，當然我哋係好關心新嘅巴士，我哋知道我哋要為改善嗰個巴  
19 士，採用最新嘅型號，採用最新嘅科技，好多時候新嘅巴士係會有我哋所講嘅  
20 即係安全嘅裝置，我哋就唔會係節省我哋呢方面嘅開支，我哋不斷咁樣嚟到係  
21 改善，由歐盟 4 型、5 型，而家去到歐盟 6 型，即係話用一啲最新科技嘅新巴  
22 士，我哋就會採用嘅。我哋就要保證我哋採用嘅係可以搵到嘅最好嘅巴士，九  
23 巴、龍運，我哋都會採用呢啲新嘅巴士嘅。

24 MR DUNCAN：（經傳譯員）我哋都知道有新人士加入，就有一啲新嘅意念。

25 梁乃鵬先生：（經傳譯員）冇錯，冇錯。

26 MR DUNCAN：（經傳譯員）公司有冇咩嘢政策係關於你要幾耐就要有新人委任，希  
27 望有啲新嘅諗法、新嘅意念，即係點樣委任新嘅董事呢？有冇咩嘢政策嘅呢？

28 梁乃鵬先生：（經傳譯員）我哋有啲係董事局嗰啲委員會嘅，唔同嘅董事就响唔同委  
29 員會嚟到係參與工作嘅，特別係我哋就住佢哋嘅專長，所以你見到陳生之前係  
30 董事總經理，係九巴嘅同埋龍運嘅，所以我哋要求佢就响呢個董事局嘅常任或  
31 者係執行嘅委員會做事嘅，佢亦都喺一個提名委員會度工作嘅，同埋嗰個係薪  
32 酬委員會，佢都係成員嚟嘅。廖柏偉教授，佢係一個係好出名嘅經濟學者嚟  
33 嘅，佢就响董事局係向董事局提供一啲關於公司嘅策略嘅發展嘅意見，呢啲我  
34 係作為一啲例子咁樣提出嚟嘅，鄧生。

MR DUNCAN：（經傳譯員）多謝你，梁博士。我想講番之前提過嘅一件事，或者之前一個第十三日嘅研訊嗰日提過嘅，有關嘅課題就係話實時監察嘅系統嘅，第十三日我哋提過呢件事嘅，當時我個具體嘅就係同你提出，同埋向九巴嘅代表提出，我哋同呢個係程艾樂先生收到一啲證供嘅，你記得程生嘅證供，或者畀一個參考編號，呢個第十三日嘅，41 頁，佢提出嘅證供就係話 2014 年--呢個其實係一個係佢證供嘅摘要嚟嘅，佢所講嘅 2014 年公司曾經考慮過一個工程嘅，呢個係話會用實時監察巴士車長嘅行為嘅，跟住呢個計劃就取消咗，你記唔記得當時我同你提過佢有咁樣嘅作供㗎，你記唔記得？你記唔記得我提過呢件事呀？

梁健宏先生：有。

MR DUNCAN：（經傳譯員）你當時嘅回應，梁先生回應，如果我有理解錯，理解得正確嘅話，程生所講嗰個計劃係一個實時嘅營運嘅管理系統嘅，呢個同安全駕駛係有關係嘅，你記唔記得？當時係梁先生話畀委員會聽嘅。

梁健宏先生：嗰度係講緊有個 real-time alert 畀嗰個車長，就住佢嗰個 speeding 或者 sudden acceleration 同埋 harsh braking。

MR DUNCAN：（經傳譯員）冇錯嘅，你記得喇，當時即係話呢位程生所講嘅嗰個計劃係其實係一個實時嘅營運嘅管理系統嚟嘅。

梁健宏先生：係嘅。

MR DUNCAN：（經傳譯員）為我哋嘅紀錄清楚，呢個我係講清楚，係第十三日，第 41 頁，第 10 到 14 行同埋 42 頁第 23 行，呢方面有啲分歧，好明顯，當時主席要求你提供--向委員會提供你哋有冇啲講解嘅材質，即係响考慮呢個項目、呢個計劃，即係程生所講呢個工作計劃或者工程嘅時候，有冇咩講解嘅使用嘅呢？同埋係你自從上次我哋開完會之後，你就記唔記得係有冇呢啲咁樣嘅材料畀到我哋呀？

梁健宏先生：我哋係畀咗一啲資料畀個 board 嘅，我知道。

MR DUNCAN：（經傳譯員）我就想就住呢啲咁樣嘅資料，就講一講嘅，同埋澄清一下嘅，如果可以嘅，請大家睇 KMB-11，請大家睇 4492，4492 呢一頁你見到嗰個封面，呢個文件嘅封面，九龍巴士公司（一九九三）有限公司係嗰個系統嘅標準，呢個係為嗰個 ROM，即係實時營運管理系統，呢份文件就由 4492 呢一頁一路可以去到 4530，如果我有理解錯誤嘅話，响 4493，呢個係嗰個目錄，係呢個係呢份材料嘅目錄，第 II 部係簡介同埋工作嘅規模、範圍。

跟住我哋睇下 4495 有啲詳細嘅資料，就係話簡介同埋嗰個工作嘅規模或者係範圍，就第 II 部，1，簡介，我想你請睇 1.4 呢一段，主要嘅呢個係實時管理系統就係幫助嗰啲控制室嘅人嚟到係响嗰個巴士總站營運、操作嘅時候係調配嘅，調配响巴士幾時離開同埋處理特別嘅情況同埋服務有冇受到需要終止

1 嘅情況點樣處理。1.4.3 就係話同司機嚟到係溝通，通過係語音、文字或者聲  
2 音嘅錄音嚟到係發布一啲畀巴士車長知道需要嘅資訊或者特別嘅訊息嘅。

3 呢度係咪有一個實時同車長--即係話同响你哋嘅總部同巴士車長有冇實時  
4 溝通，有冇呢個咁樣嘅部分㗎？

5 梁健宏先生：呢個係我哋稍後做咗 ROM，係冇呢個--冇呢樣嘢嘅。

6 MR DUNCAN：（經傳譯員）程先生就係話，佢話當時有考慮過呢個做法，但係之後  
7 就取消，佢話實時同車長溝通係咪當時嘅考慮要做嘅一部分呢？

8 李澤昌先生：或者等我講，我諗上次我哋個 Operation Director 都講得好清楚，  
9 佢呢個咁嘅功能係主要係一個中央有一個控制嘅中心，係提示個車長佢行車嘅  
10 速度，甚至乎喺一啲巴士站嘅時間佢係要停一停，隔番喺前面行車之間嘅距  
11 離，令到嗰個 management 嘅 fleet 係會嚟得比較--唔會一堆嚟，一堆走，  
12 當然呢個溝通裏面亦都可以作出咗一啲同個車長之間嘅提示。

13 上次都講咗，係我哋覺得喺當車長行駛嘅時間，實在令佢分心亦都係唔係  
14 一件恰當嘅事；兼夾呢個系統亦都可以係作嚟係取替咗喺巴士站頭裏面嘅站長  
15 嘅功能，呢個我哋覺得係亦都確實係有個難度嘅，最後我諗喺 2014 年嘅時候，  
16 就呢個計劃係擱置咗。所以亦都有一個中央嘅系統同嗰個車長喺行駛嘅時間有  
17 呢個對話，就變咗採用番，update 番喺巴士站頭嘅站長個功能，會令到佢更加  
18 完善同埋妥善㗎。

19 MR DUNCAN：（經傳譯員）我而家唔係講緊嗰個結論，我係想問有冇--當程先生當  
20 時考慮--佢話佢負責埋呢方面嘅考慮個工程，係咪其中一部分就話應該有實時  
21 同巴士司機--巴士車長嘅溝通，嘅溝通嘅內容係關於佢哋嘅嗰啲行為，就包括  
22 有冇超速，我有冇理解錯誤呢？呢度 1.4.3，起碼呢度--响呢一部分係當時曾  
23 經考慮嘅一部分，先唔好講咩嘢結論。

24 李澤昌先生：當然呢度寫得出，我諗應該喺嗰段時間，係有咁嘅考慮嘅，當然嗰陣時  
25 做呢個 project 嘅時候，我諗應該 back date 番去 2013、2014 嘅時候，喺  
26 當其時，嗰個睇法應該係用一個比較喺中央嘅形式，令到呢個所謂叫做 real  
27 time operation 嘅 management 係全面啲，係令到車長同埋嗰個中央嗰個  
28 方法，我唔知係咪因為--或者嗰陣時嘅時候係有咁嘅睇法，但係因為而家我哋  
29 講嘅 real time 同車長已經係講緊個黑盒，講緊個 geo-fencing，嚟緊嘅，  
30 同埋係直接喺嗰個車裏面係提示佢嘅 behaviour 同埋佢速度，呢個我哋已經係  
31 去到呢個階段。

32 MR DUNCAN：（經傳譯員）我哋去睇第二啲嘢之前，我想睇番呢份文件嘅其他嘅段  
33 落，似乎都係有提過同呢個同巴士車長嘅實時嘅溝通嘅，4497 頁，嗰個頂部講  
34 緊--即係嗰個標題有講功能方面嘅要求，呢個有一個係中央嘅控制系統嘅，  
35 1.1.4，容許嘅調派嘅人係嚟到係可以响嗰個地圖畫出某一個部分，可以有啲地  
36 方係可以標示嚟到係送出一啲文字或者係聲音嘅訊息嘅，亦都可以計算速度，

1 嗰個標示嘅地區計出嚟嘅速度可以展示出嚟，或者個平均速度可以展示出嚟。

2 呢度亦都有講嗰個核心嘅功能嘅，跟住就係有講呢個營運嘅管理，就係對  
3 下嘅標題嚟嘅。喺個 a(7)，即係跟住嗰一頁，4498 頁嗰度，嗰度就係話巴士  
4 離站全部都自動咁樣去調節，根據就係一啲可以改變嘅一啲規則嘅，就係應該  
5 包括但係唔限於以下各項，第 iv 項度就有提及車長嘅工作指引，我就覺得係應  
6 該包括咗嘅，係咪呀？包咗係車長嘅行為嘅，係咪呀？

7 李澤昌先生：我睇呢個 regulation 講嘅，佢主要係想緊同行車之間個距離多過從  
8 一個安全嘅角度去睇嘅，但係我都想提點一樣嘢，其實係我哋每日同一時間喺  
9 路面，我哋講緊係接近，最高峰嘅時間係超過三千幾部車喺路面行緊，三千幾  
10 部車遍佈全香港、九龍、新界同埋離島，即係我指係大嶼山，其實如果你有一  
11 個中央嘅系統控制嗰三千多部車喺路面，當然佢有好精準嘅資料、路面嘅情  
12 況，呢個係有佢嘅難度。但係睇番呢度，佢係講緊--好清晰係講緊佢同行車之  
13 間嘅距離多過同呢個安全方面係有一啲好清晰嘅掛鈎。

14 MR DUNCAN：（經傳譯員）或者等我再...

15 主席：（經傳譯員）對唔住，等等。你可唔可以講講話即係安全行車距離係咪話嘅車  
16 係逼埋一齊，係唔想嘅車堆埋一齊定抑或係同安全有關？

17 李澤昌先生：Yes, yes, 唔係，佢做嘅時候好多時因為嘅車長佢係唔知道佢前面架  
18 車個距離有幾遠，佢就跟住個速度係咁樣行，對乘客嚟講，好多時因為佢出車  
19 嘅時間可能係唔同嘅時間出，但係因為去到某一啲擠塞嘅道路嘅時間，就前面  
20 架車同後面架車就個距離可能越嚟越拉近，對乘客嚟講，一等就會變咗就會一  
21 炸車嚟，所以如果你可以同個車長溝通，即係有啲似今日嘅火車，火車都係有  
22 呢啲咁嘅情況嘅，但係當然火車係因為埋站嘅時候多人上落，而令到架火車停  
23 咗喺站嘅時間長，你要控制後邊架車唔好行得咁快，但係巴士就好難嘅，巴士  
24 就好難，所以呢個系統係令到佢唔好有個好似你話 bunching 呢個情況，即係  
25 好 clustered，一班車嚟到，令到個客嗰個等車嘅時間就比較好啲。

26 但係而家我哋都有一個網上，有一個--即係做緊一個行車嘅到站嘅時間幾  
27 長都幫到個客，但係呢個同當其時個 safety 係有少少未必係完全掛鈎嘅。

28 主席：（經傳譯員）呢個係有效咁樣樣去提供服務，就唔係同安全有關，係咪呀？

29 李澤昌先生：Correct. Correct.

30 主席：（經傳譯員）唔該晒。

31 MR DUNCAN：（經傳譯員）我又想請你睇睇呢個 4501 頁，個標題就係司機溝通系  
32 統，呢個就係喺功能要求底下嘅，2.1 嗰度就係話喺每部巴士可以安裝一個巴  
33 士嘅控制板嘅，就會提供以下嘅功能嘅，2.1.1 就係話可以顯示一啲有顏色嘅  
34 圖表同埋一啲文字嘅數據嘅。嗰度係就話可以係睇一睇就係有一啲顯示一啲實  
35 時嘅標誌，就睇下嗰個司機嘅駕駛行為，如果係有不正常嘅駕駛行為就會有不

1 同嘅嗰嗰聲就係提示個司機嘅，同埋就會有一啲嘅全面性嘅參數嚟到去啟動  
2 或者係停止呢一個功能嘅。

3 我想問，係咪話當時諗住有一個實時嘅系統就睇到一啲不正常嘅駕駛行  
4 為，就偵察到，就同埋就係會話番畀個車長聽「你呢啲行為係唔啱嘅」？

5 梁健宏先生：呢個就變咗我哋而家裝咗喺車上面個 driver feedback  
6 device，而家我哋係裝咗一個嘅，之前佢個設計就係話將呢啲嘢就係喺埋個  
7 driver console 個度嘅，但係而家個情況實情就係我哋另外一個 feedback  
8 device，亦都將啲 real time indicator 喺個度有啲燈、有啲聲音提示  
9 啲車長嘅，而家我哋每一架巴士都有。

10 MR DUNCAN：（經傳譯員）好，我而家就想講另一個課題，係上次聆訊嘅時候出現  
11 嘅，係第十四日嘅聆訊，當時委員會聽到你哋公司嘅代表所講，就係同之前個  
12 個打算係有所不同，就係你哋最後就係決定唔會安裝一啲係巴士傾側嘅警示系  
13 統嘅，你記唔記得有咁提過呀？不如咁，我亦都等大家睇番我哋個紀錄本，  
14 係第十四日嘅聆訊，係 1620 到 1030 頁嘅，當時梁先生就話點解係有咁嘅決定  
15 呢？就係因為呢個丹尼斯同埋呢個富豪都係無法建議係應該用一個乜嘢嘅傾側  
16 角度，啱唔啱？

17 梁健宏先生：係嘅。

18 MR DUNCAN：（經傳譯員）唔該。如果個角度太窄嘅話，就有意思，因為都冇意義  
19 嘅，但係另一方面，如果個角度太廣嘅話，就會危險喇，啱唔啱呀？我所記  
20 憶嘅啱唔啱呀？係咪咁呀？

21 梁健宏先生：係嘅。

22 MR DUNCAN：（經傳譯員）好，唔該。只係昨日先至有人提一提我要睇呢樣嘢嘅，  
23 我唔知道你有冇機會睇過，呢一個就係喺雜項文件夾 2 個度嘅一份材料嘅，係  
24 第 916 頁，我唔知你有冇機會睇過呢份文件呢？

25 梁健宏先生：未有嘅。

26 MR DUNCAN：（經傳譯員）好，唔該。我諗就要慢慢咁樣同你一齊睇呢份文件。睇  
27 嚟，就係有個講解，又或者係一個演講嘅一啲筆記嚟嘅，當時就係好近嘅--唔  
28 係喎，其實係好耐，係 2008 年 8 月 29 號嘅一個講座，嗰個講座個標題就話香  
29 港雙層巴士安全事宜嘅講座，佢嗰個題目就係話雙層巴士嘅安全規管要求，似  
30 乎就係一位謝先生 Steven 嘅演講嚟嘅，佢就係負責巴士安全嘅工程師，就係  
31 嚟自運輸署係車輛安全及標準部嘅。

32 我咁問可能係問得太多，不過我唔知道在座各位先生有冇邊一位係有記憶  
33 話當時曾經係出席過呢一個講座呢？咁樣問法可能要求你哋太多，不過都想問  
34 一個問題。

1 梁健宏先生：我唔記得。

2 MR DUNCAN：（經傳譯員）好，唔該。我想直接去番我有興趣嘅嗰一頁，936 頁，  
3 我陣間先畀機會你去睇番之前嗰幾頁，不過喺嗰一版嗰個標題就係話傾側嘅角  
4 度，喺左手邊就話有咩嘢規管嘅要求或者有咩嘢規管嘅指示，右邊嗰欄就講呢  
5 個傾側嘅角度，「DD 巴士」我相信應該即係代表係雙層巴士咁解，呢一個簡  
6 寫。就講及呢個聯合國係歐洲經濟委員會就係 28 度，同埋歐盟 28 度，香港都  
7 係 28 度。我想問呢啲資料對你嚟講，你知唔知佢講緊乜嘢呢？

8 梁健宏先生：呢個係每一架車，尤其是雙層巴士佢需要喺--可以喺香港行走，就要經  
9 過測試嘅，要符合到呢個傾斜嘅測試嘅，呢個測試就係架車就係 static 嘅，  
10 係 static 嘅，架車係試傾斜嘅，當架車係可以傾斜到 28 度都唔會 topple，  
11 先至可以合格嘅，先至會出到嗰個 type approval，先至可以註冊喺路面行走  
12 嘅，我知道。

13 MR DUNCAN：（經傳譯員）你話嗰個 static test，即係話嗰個靜止嘅測試，就都  
14 係之前提供嘅材料都係有包括呢點嘅，係咪呀？

15 梁健宏先生：係。

16 MR DUNCAN：（經傳譯員）唔該。我而家就想講呢個行車時間，呢個就關乎所謂脫  
17 班，即係好多時都有人咁講㗎喇，行車時間同埋脫班呢一個關係，我想首先請  
18 你睇一睇，我哋之前就係睇過係一個工會代表佢嘅證供嘅，就係李國華先生，  
19 我諗你可以喺呢個第十日嗰個紀錄本嗰度係睇到嘅，第 62 頁，或者我將李先生  
20 嘅證供嘅一部分將佢讀出嚟畀你聽，當時就係黃律師代表委員會就喺第 14 項  
21 度就向佢提出個問題嘅。

22 當時黃小姐就咁問嘅，「李先生，我就想講及一個係比較特定嘅題目，就  
23 講及就係所編排嘅車程同埋一個係脫班。跟住就係喺第 120 頁嗰度嘅，你當時  
24 就話由於係流失咗好多車長，亦都有需要維持嗰個係行車時間表，亦都避免取  
25 消咗嗰啲定咗嘅班次，就令到就係車長本來應得嘅休息嘅時間就係受呢個脫班  
26 嘅影響嘅，好多巴士嘅車長係需要行唔同嘅路線，為咗係有更多嘅休息時間，  
27 佢哋會儘快咁完成嗰個路線嘅服務嘅，當然呢個亦都視乎係路面嘅交通情況，  
28 然後就係將車揸番去總站嗰度休息。你可唔可以同我哋講一講點樣去維持咗  
29 嗰個定咗嘅班次呢個咁嘅需要就影響咗車長佢應得嘅休息時間呢？」

30 當時李先生就咁講嘅，「巴士公司就話--譬如話就係有一個鐘頭嘅行車時  
31 間嘅話，就應該將佢壓縮到係五十五至到五十八分鐘，巴士車長就會有少少嘅  
32 休息時間嘅，如果你再將嗰個行車時間係再壓縮多幾分鐘，就會係少咗休息時  
33 間嘅幾分鐘。」

34 我就想問，如果有一個車程真係長過原本所編排嘅時間，會唔會係影響到  
35 車長嗰個休息時間嘅呢？

1 彭樹雄先生：Mr Duncan，我嘅答案係可能會嘅，不過正正因為我哋其實每一個總  
2 站裏面都有站長當值，所以個站長係亦都會作出一啲相應行動上嘅調整，就係  
3 去令到我哋嘅車長，就算因為交通阻塞，就算因為其他嘅關係佢係遲咗返個總  
4 站，我哋一定都係有時間畀個車長去休息嘅，我哋係會作出行動上嘅安排。

5 MR DUNCAN：（經傳譯員）有時車長都係會唔會有咁嘅情況，就係車長係有咗休息  
6 時間㗎？

7 彭樹雄先生：我哋有情況可能--我想強調，就係每一個車長佢返到嗰個總站裏面，佢  
8 係一定有時間可以有個--即係有個預先安排嘅休息，但係如果呢個休息係因為  
9 某啲嘅理由而影響到，我哋一定都會有一個所謂 water break、toilet  
10 break，佢可以飲啖水，可以去洗手間等等，然後佢先至會開始佢下一程個  
11 revenue trip，即係嗰個下一程嗰個嘅載客嘅。

12 MR DUNCAN：（經傳譯員）公司其實係點樣樣計算係需要幾多時間去完成嗰個車程  
13 嘅呢？

14 彭樹雄先生：我哋係有嘅，其實喺我哋制定每一條線嘅行車時間，呢個有兩種嘅，一  
15 種就係一啲現有嘅行車線，其實我哋係有個機制，我哋係會有定期嘅檢視嘅，  
16 呢個就係第一個機制，就係我哋每三個月，每三個月，我哋係會將每一條嘅路  
17 線，舉例，我哋 KMB 有三百八十幾條線，我哋每一季每三個月一定會將個  
18 journey time 要重新檢視嘅；第二個可以或者可能會檢視嘅就係話因應一啲  
19 特殊嘅交通環境，因應一啲特殊嘅客量嘅改變，因應一啲特別嘅路線或者特快  
20 線嘅增加、減少，同埋我哋前線嘅車長嘅反映、我哋前線督察嘅反映、我哋前  
21 線站長嘅反映，我哋都有啲 ad hoc 嘅，即係所謂--唔係話三個月，我哋唔會  
22 等三個月，我哋都會即時去檢視嗰個嘅行車時間嘅。

23 MR DUNCAN：（經傳譯員）你嗰個檢視會係涉及啲咩嘢呢？

24 彭樹雄先生：其實我哋有幾個情況係會影響到個行車時間嘅，正如我講，例如一啲嘅  
25 交通嘅情況嘅改變，例如舉個例，西九龍佢喺起高鐵嘅時候，譬如佐敦、彌敦  
26 道一帶其實就擠塞咗嘅，於是乎我哋就會喺嗰個行車時間裏面係酌量去調整。  
27 又或者其實另外一個令到行車時間加長嘅理由就係其實客量嘅多少，其實呢個  
28 都會直接影響到嗰個行車嘅時間嘅，譬如話多客上車，多客落車，即係你埋站  
29 嗰個嘅時間其實相對地亦都會多咗嘅。另外有一啲另外一啲比較交通嘅改道，  
30 或者嗰條線要我哋俗稱叫做 deroute 咗，即係有啲新嘅路線，佢條主線係一  
31 樣，但係有啲支線改咗嘅，其實我哋都係會檢視嗰個行車時間嘅。

32 MR DUNCAN：（經傳譯員）我想你睇下楊先生嘅證供，佢就喺第十一日係作供嘅，  
33 佢就係現時嘅車站經理，九巴嘅車站經理，呢個就係第十一頁，呢個就係喺第  
34 94 頁嘅，第十一日。佢嘅問題就係喺第 93 頁第 19 行嘅，就係黃佩琪大律師係  
35 問呢一個問題，佢就係問咗楊先生呢條問題，「我哋而家講另一個話頭，就係  
36 脫班，我哋係從你嘅同事 Debby Wong 就係聽取咗證供，就似乎係經常有脫班  
37 嘅情況，而佢係會影響到駕駛嘅行為嘅，因為就無法係準確地預測呢一個行車

1 時間，而你嘅睇法係點呢？就住呢個問題。」

2 楊先生嘅回應就係「對我哋嚟講，係有唔同嘅原因導致脫班嘅，首先，如  
3 果巴士車長不足亦都係會脫班，香港亦都係會塞車，可能有一啲嘅緊急情況，  
4 公眾嘅集會、活動同埋一啲特別嘅交通安排、惡劣天氣，喺路上係有車輛係故  
5 障等等，呢啲都係會引致脫班嘅，但係我哋會盡量唔影響車長嘅休息時間，因  
6 為我哋有一個嘅行車時間表，而我哋係會提供呢個表畀我哋嘅車長，而喺 96%  
7 或者係 90 嘅車程之中，我哋嘅車--或者嘅行車之中，我哋嘅車長都會有足夠嘅  
8 休息時間嘅。」

9 脫班嘅定義就係有架巴士係本身應該由 A 去到 B，但係最後就有去到嘅。  
10 你可唔可以話畀委員會知道係有幾頻密呢，出現得，脫班嘅情況？

11 彭樹雄先生：其實運輸署就畀所有嘅專利巴士公司其實都有一個嘅數值，就係嗰個所  
12 謂脫班率，如果比較起整個我哋叫做 schedules of service，嗰個行車時  
13 間表，嗰個 benchmark 就係唔應該多過 3%，唔應該多過 3%。

14 MR DUNCAN：（經傳譯員）我就想請你睇一睇運輸署呢一份文件，呢個就係 TD-1  
15 文件冊第 34 頁嘅，喺第 34 頁，呢份文件就係由運輸當局提供畀委員會，而呢  
16 份文件就係叫做專營巴士嘅整體規管同埋監管制度，喺第 31 頁，你就見到呢份  
17 文件嘅目的就係提供一個政府規管香港專營巴士服務嘅整體規管同埋監察架  
18 構，我就想你先睇睇第 44 頁嘅部分，就係(e)段嘅，呢一個標題就係第 41 頁  
19 其他措施同埋發出信件同埋指引，就有唔同嘅段落，有(a)至(e)，(e)段就係  
20 喺 44 頁嘅，我就係想讀出嚟。

21 「喺 2015 年運輸署就係提供咗一個更新咗嘅懲罰機制，就係就住專營巴  
22 士商嘅巴士脫班嘅情況嘅，呢一個機制就係包括咗係發出唔同--即係根據嚴重  
23 嘅程度發出信件，包括係一啲提示信、警告信、嚴重警告信等等，就係根據脫  
24 班嘅頻密程度同埋佢嗰個嚴重程度嘅，同埋有相關嘅解決--即係營運商所採取  
25 嘅解決措施。呢啲警告信就係可能係會引起進一步嘅法定嘅懲處，根據呢一個  
26 專營巴士服務嘅條例第 22 章，包括係罰款，係撤銷呢一個某條巴士線嘅營運  
27 權，同埋如果係營運商係冇改善嘅話，即係或者有一個合理嘅解釋嘅情況，都  
28 會出現嘅。

29 而喺 2015 年引入咗呢個制度之後，運輸署就係有監察呢個專營巴士商嘅  
30 脫班情況，同埋係發出一啲嘅提示信件同埋警告信等等，等佢哋係採用修補嘅  
31 措施同埋改善服務嘅。而呢啲營運商亦都係向運輸署提供解釋同埋採取行動，  
32 包括就係調派多一啲嘅後備車長去解決呢一個短缺嘅問題同埋改善呢個脫班嘅  
33 情況嘅。而根據呢個營運商採取嘅情況，佢哋就有進一步遭到係懲罰嘅。」

34 我想你睇第 117 頁，就係同一份文件冊。

35 主席：（經傳譯員）鄧大律師，呢一個附錄 K 就係喺 KMB-2 文件冊嘅 217 頁--或者  
36 291 頁。

MR DUNCAN：（經傳譯員）我就想畀大家睇下呢一個附錄 K 嘅第 291 頁，呢個就係一封一般嘅信件，呢個就係關於實施呢一個新嘅懲處機制嘅，主席，你會喺呢度見到呢封信。

我就先想問幾個問題嘅，就住呢個話題，我想你睇另外一份嘅運輸署文件，就係 117 頁，呢個就係叫做運輸署文件 10 號，呢個標題就係專營巴士服務嘅營運、安排路線、車隊嘅調配同埋設立呢一個車速限制嘅，呢份文件就係介紹運輸署喺規劃路線、調派車隊同埋制定呢一個車速嘅角色，就係就住呢個專營巴士服務嘅。

我想你睇番 122 頁，呢一份就係服務時間--即係某條巴士路線服務時間表嘅樣本，呢個例子就係有空調嘅九龍市區巴士路線 2 號，如果我哋講番呢個可能或者潛在嘅懲罰，你可唔可以話畀委員會知道九巴係喺過去嗰六個月係收到幾多封警告信呢？

蘇偉基先生：Mr Duncan，喺過往六個月，因為 lost trip，公司係有收過 warning letter，但係個別嘅線我哋係收--另外頭先所講嘅，advisory letters，或者係 reminder letters。

MR DUNCAN：（經傳譯員）呢啲嘅提示信係關於啲乜嘢呢？

蘇偉基先生：佢會係講述我哋某啲線喺某一個時段，假設係夜晚嘅繁忙時間，佢個 lost trip rate 係大約多過 3%，就會提--我哋要係做一個檢討，改善，同埋佢亦都會問我哋究竟原因點解會出現呢個 lost trip。

MR DUNCAN：（經傳譯員）九巴喺過去十二個月有冇收過任何嘅警告信呀？

蘇偉基先生：Warning letters，過往十二個月係有收過，公司。

MR DUNCAN：（經傳譯員）基於呢個脫班嘅情況，你哋需唔需要定時係要求運輸署改變某一啲路線嘅行車時間表呢？

彭樹雄先生：其實我哋公司係不時都有聯絡番運輸署，係主要就係闡述番我哋喺嗰個特別某啲線上面遇到啲乜嘢嘅問題，因為運輸署計嗰個嘅所謂脫班率，其實佢係分開四個時段嘅，譬如話早上嘅繁忙時間、跟住就係早上嘅非繁忙時間、晚間繁忙時間同埋非繁忙時間等等嘅。就住唔同嘅路面情況，就住路面可能嗰個交通阻塞、違例泊車等等，其實我哋好多時都有同運輸署係反映，然後就話可唔可以譬如話檢視下嗰個嘅 schedule of service，即係嗰個行車嗰個時間表等等。

MR DUNCAN：（經傳譯員）運輸署通常會唔會批准呢一啲檢討嘅申請呀？

彭樹雄先生：我只可以答係好困難，我哋其實有好多我哋嗰啲叫做 low utilisation，我想解釋，因為好多時有啲客量嘅改變，例如有啲鐵路嘅發展，我哋嗰個服務可能嗰個需求係有之前咁多嘅，好多時我哋就特別喺非繁忙

1 時間，我哋都係好多次、好多次都作出書面嘅同埋會議嘅要求，希望運輸署係  
2 可以酌量咁樣去某啲非繁忙時間嘅班次係作出減少嘅。

3 其實我哋作出呢個申請，我哋係會依據一啲嘅--我哋有啲 guidelines，  
4 有啲指引，其實我哋係跟番個指引，其實我哋係可以用一個字叫做--我哋應該  
5 entitle 一啲嘅 journey reduction 嘅，但係就算我哋係達到呢個指引呢  
6 個係可以減班次，但係往往--即係我要好老實咁講，如果需求我哋加班次嘅，  
7 往往運輸署就想我哋即刻做嘅，因為可能地區嘅人士或者議會嘅人士，但係去  
8 減班次，呢個我哋真係遇到好大嘅困難嘅。

9 我哋人手個餅都係咁大㗎喇，但係問題就係我哋有時真係好無奈地，我  
10 哋要將一啲嘅資源係擺咗落一啲我哋所謂 low utilisation 嘅線裏面，我覺得  
11 得呢個就其實就係個發展係唔健康嘅，我覺得。我哋好多時同運輸署我哋都有  
12 溝通，但係就始終個進展相對地係緩慢嘅。

13 主席：（經傳譯員）換句話講，雖然你係要求一啲減少嘅服務班次，但係通常都係有  
14 獲得批准嘅，係咪？即係有唔同嘅原因係影響到你嘅申請。

15 彭樹雄先生：係，冇錯，主席。

16 MR DUNCAN：（經傳譯員）喺午飯前，我哋再問多一個問題，邊個係發出呢啲指引  
17 㗎？

18 彭樹雄先生：運輸署。

19 MR DUNCAN：（經傳譯員）喺議定呢個指引，你有冇一個角度嘅呢？或者你有冇參  
20 與？

21 蘇偉基先生：嗰個 guideline 本身都係出咗好耐，亦都持之有恆，而家係執行個  
22 guideline，個 guideline 本身我哋係認同嘅。

23 MR DUNCAN：（經傳譯員）你可唔可以向委員會提供指引呀？

24 蘇偉基先生：應該喺啲 document 有，我講番喺邊頁喇，我小息嗰陣時講番畀大家  
25 聽。

26 MR DUNCAN：（經傳譯員）唔該晒。仲有一個問題嘅，即係呢個問題就係點樣去實  
27 施呢個指引呢？

28 彭樹雄先生：絕對同意，係個 guideline 就好清晰嘅，但係問題喺執行上始終我都  
29 明白有好多嘅阻力嘅，呢個就係我哋都希望可以真係可以將啲 resources、將  
30 啲資源用喺一啲有需要嘅路線上面，多謝 Mr Duncan。

31 主席：（經傳譯員）各位，我哋係會小休二十分鐘，如果你可以搵出嗰個指引喺邊  
32 度，會好大幫助嘅，唔該。

上午 11 時 38 分押聆訊押後

中午 12 時正恢復聆訊

出席人士如前。

主席：（經傳譯員）鄧樂勤大律師。

MR DUNCAN：（經傳譯員）好，唔該你，主席先生。唔知你哋搵到嗰個係材料未？

彭樹雄先生：有，Mr Duncan，就喺 KMB Long Win Bus bundle number two，page 73，73 頁，係第(IV)，“Frequency reduction”。係嘞，冇錯，就係螢光幕呢一個。

MR DUNCAN：（經傳譯員）唔該晒。我哋講緊嗰啲係有關嘅材料，主席亦都有講過話喺新加坡亦都有啲係防止瞓眼瞓嘅裝備，如果大家想參考嘅話，就係 CTB-1，63 頁，就可以搵到相關嘅材料，CTB 城巴 1 號文件夾 63 頁。我而家係想講另一樣嘢，關於嗰啲洗手間，同埋就係車長嘅休息嘅設施。我開始問問題嘅時候，首先係想請你睇番呢個運輸署，TD-1，438 頁。講番嗰個背景，咁先睇番 427 頁，呢個係一封信嚟，係運輸署發出嘅信件，係寫嚟畀我哋委員會，日期係 2018 年 7 月 20 號。運輸署就係回應咗委員會嘅一啲問題，提供咗啲答案。喺 438 頁嗰度，你會見到問題第 28 號，就係講及係喺巴士總站提供洗手間同埋休息嘅設施，就問運輸署有冇發出任何嘅指引畀嗰個專營巴士營運商，亦要提供巴士總站嘅洗手間同埋休息設施，如果有，係畀個詳情，如果有嘅話，就要解釋點解。運輸署有冇積極咁樣樣去便利係有關嘅專營巴士營運者，去同有關嘅部門去跟進，好讓可以提供到咁嘅設施？

我而家好快咁講一講，係部門嗰個回應，「運輸署一直都係鼓勵巴士公司，因為佢哋要作為一個良好嘅僱主，應該係喺巴士總站嗰度為僱員提供適當嘅洗手間同埋休息設施，相關嘅部門同埋有關當局去考慮同埋批核呢一啲係申請嘅時候，即係呢啲都係員工嘅設施嚟嘅，運輸署都有提供適當嘅協調，嚟到係儘早可以安裝到。但係對於話提供呢個洗手間同埋休息設施，係有一啲具體嘅指引發過畀營運商，因為休息嘅設施同埋係洗手間，一般都係喺設計新嘅巴士總站嘅時候，作為基本嘅設施，考慮埋嚟嘞。有關嘅營運商嘅要求，同埋嗰個意見，都會係入咗落去嗰個巴士總站設計嗰度，如果係適當嘅話。如果洗手間唔係係合理嘅步行距離之內，又或者休息設施係冇或者唔足夠，咁樣佢哋就係會好積極咁樣去申請係有呢啲設施嚟到符合佢哋嘅營運要求。

1           2018 年 3 月 31 號，二百九十五個巴士總站差唔多全部都有洗手間，就係步  
2           行三至七分鐘。百分之八十六，即係二百五十五個就係有休息嘅設施，就係站長  
3           室，或者站長辦公室，又或者係車長嘅休息站或者休息室。因此就係考慮過，就  
4           認為唔需要就係向呢一個營運商係提--發出一個具體嘅指引，講及呢啲總站係需  
5           要呢一啲嘅設施。我哋就係會係積極就係同有關嘅部門就去係協調，咁亦都會係  
6           讓相關嘅部門同埋當局明白，就係有關嘅程序嘅要求。咁最終目的都希望係履信  
7           啲個申請嘅過程，希望及時可以有啲設施。咁譬如話係呢個係水邊圍邨山水樓  
8           呢個馬灣道（媽橫路？）出面啲個巴士總站嘅休息室，正如 05 號文件啲度就係  
9           所載就係一個好好嘅例子，每一個部門同埋當局都有佢自己嘅法定嘅權力，同埋  
10          就係有佢自己嘅考量，嚟到決定批唔批佢嘅申請，嚟到有洗手間同埋休息設施。  
11          雖然係咁講，運輸署會繼續便利營運商，如果有咁嘅需要嘅話，嚟到去積極咁樣  
12          去跟進，係回應同埋係滿足車長對於洗手間同埋休息設施呢一個嘅需要，亦都會  
13          致力就係提供所需嘅援助畀營運商係跟進呢件事。」

14          咁跟住下面啲度，就問題就問「縱使就係專營巴士營運商係時常同埋長久以  
15          嚟咁嘅要求，我哋就知悉有一啲總站仲係未有足夠嘅洗手間同埋休息設施，請話  
16          畀我哋聽，係邊一啲係總站，同埋係咪有一啲主--係咪一啲主要嘅大嘅站，有好  
17          多巴士線嘅？同埋佢哋有冇係一啲車長就係返特別更，而佢哋特別需要足夠嘅休  
18          息設施，嚟到去有一個不少於連續三小時嘅休息嘅時間？解釋就係有咩掣肘，  
19          特別係就係點解佢哋係拒絕你哋係要求係提供咁嘅設施？即係話政府當局係有啲  
20          咩嘢理由係提咗出嚟？」

21          當時部門所提供嘅答案係咁，「喺 2018 嘅 3 月 31 號為止，差唔多所有全  
22          港九嘅二百九十五個巴士總站，都有洗手間，只需要行三至到七分鐘，而大概百  
23          分八十六嘅巴士總站，換句話講二百五十五個巴士總站，即係遍佈全港九，就係  
24          有休息室，咁佢嘅形式就一係站長嘅休息室，或者站長嘅辦公室，又或者係車長  
25          嘅休息室，其餘嘅百分之十四嘅巴士總站，佢有休息設施，專營巴士嘅營運商就  
26          有申請到提供休息設施，係要設立喺啲度。大部分係咁，就算唔係全部都係，另  
27          一方面就係，營運商就係可以向有關嘅部門或者當局就係申請額外或者係擴大啲  
28          個休息嘅設施，係符合佢哋總站嘅營運要求。咁照我哋所知，係有一個名單，  
29          就係巴士總站係有洗手間同埋休息設施，咁就係營運商要求，就但係喺過去啲三  
30          年，就係被拒，或者係仲係部門或者當局係處理緊。咁我哋相信就係有啲係個  
31          別車長佢個當更嘅紀錄，因為係逐條逐條線嚟講，就好難，因為佢哋時不時有  
32          改變。至於話佢哋有冇係要返特別更，就唔知。」

33          咁喺附件 3 所顯示，主要嚟講，點解會拒絕佢哋嘅要求，話設立洗手間同埋  
34          休息室，部門同埋當局主要拒絕嘅原因都係因為地理上面嘅掣肘，譬如話係個巴  
35          士總站喺一個好窄嘅行人路側邊，又或者係當區係社區人士就係有意見。至於話  
36          係啲個營運商，佢哋係提出申請想有呢啲設施，佢哋係可以係搵出一啲可行嘅解  
37          決辦法嚟到去克服呢一啲實際嘅困難。咁運輸署就會協助巴士公司，就係取得當  
38          地人士嘅支持，譬如話進行一啲實地嘅視察，又或者係同當區嘅人士就係去開  
39          會，去搵下有啲咩嘢可行嘅解決方法，嚟到去係設立呢啲設施，亦都希望可以加

1 快落實呢一啲規劃。即係話如果咁嘅需要，而且亦都為咗車長同埋乘客嘅便利，  
2 同埋嘅好處。」

3 附件 3，附件 3，我哋就要去另一個文件夾，咁就係 TD-5，運輸署 5 號文件  
4 夾，頁碼就係 1723 頁。1723 頁，嗰度就係個標題就話，係有個清單就巴士總  
5 站係有休息設施同埋係洗手間，就係巴士公司申請，但係運輸署仲處理緊。咁就  
6 係運輸署仲處理緊佢哋嘅申請；咁而 (B) 嗰度就係話，營運商係要求係有呢啲係  
7 洗手間同埋休息設施，但係由其他嘅相關嘅部門同埋係當局係處理緊佢哋嘅申請，  
8 嗰個就 (B) 嘞；(C) 嗰個標題就係話，係有一個清單，巴士總站就係運輸署已經  
9 同埋其他嘅部門喺過去嗰三年拒絕咗佢哋申請，係安呢個洗手間同埋休息設施嘅  
10 個案。

11 我稍後會問你一啲問題，呢個就係關乎運輸署係所作出嘅解釋，咁或者巴士  
12 公司你哋都想作一個回應。不過我未講嗰度之前，我又想睇番一啲問題，我就係  
13 想睇下究竟係呢方面嗰個問題喺邊一度。我嘅理解就咁嘅，九巴有四個車廠，你  
14 哋係咁樣叫，係有四個車廠，咁另外亦都有好多嘅巴士總站，係咪？

15 李澤昌先生：（經傳譯員）啱。

16 MR DUNCAN：（經傳譯員）如果我哋睇番呢個九巴士文件夾 1，喺 252 頁，你睇到  
17 嘛？就係你哋公司自己嘅車廠同埋分區嘅地圖。你哋度就係將嗰四個車廠，同埋  
18 啲分區，係標示咗出嚟，你有荔枝角廠，有九龍灣車廠，屯門車廠，同埋係沙田  
19 車廠。為免生疑問，其實所謂「車廠」，即係咩嘢意思？

20 李澤昌先生：佢嗰個車廠裏面，主要有兩個大嘅功能，一個就係嗰啲車每晚返到去，  
21 做一啲維修、入油、清潔嘅工作，咁佢有一啲維修喺嗰度；另外一個功能，另外  
22 一個大嘅功能就係，啲車長佢嗰個——嗰啲派更嘅時間表，同埋啲車長好多時候  
23 喺嗰度休息，每朝返到去，係擺佢嗰個更紙嘅嗰個功能。咁有啲其他嘅，四個唔  
24 同車廠，有四個唔同嘅另外功能，喺屯門廠，就會做嗰個每年嘅年檢大維修；喺  
25 沙田廠嗰個，就係我哋訓練車長嗰間學校；喺荔廠，就係我哋嗰個即係中心，係  
26 調配嗰啲車輛，例如打風落雨，特別嘅情況；喺九龍灣廠，就會係我哋嘅  
27 backup office，大部分都會喺個九龍灣廠。

28 MR DUNCAN：（經傳譯員）咁係咪車長每朝返工都係先去車廠？

29 李澤昌先生：絕大部分都會係，有啲就會去個站頭嗰度去擺車，不過好大部分都去個  
30 depot 嗰度係擺佢嗰個當天嗰個派更嗰張紙。

31 MR DUNCAN：（經傳譯員）我咁嘅理解啱唔啱？你其實係較早時候有提過下，我嘅  
32 理解啱唔啱，車廠係有洗手間同埋有休息嘅設施畀車長用？

33 李澤昌先生：絕對會有，佢個 depot 裏面，亦都係一個相當大嘅一個車廠嚟嘅，咁  
34 佢裏面係有一啲沖涼嘅設施，有一啲呢個洗手間，有呢個甚至乎每一個 depot  
35 都有一個 clinic，係會係畀啲車長如果唔舒服，喺嗰度驗一驗，先至係咪決定

1 返唔返去--返唔返工。咁仲有一啲休息嘅地方，等啲車長喺嗰度休息一下。主  
2 席提一提，嗰度係甚至乎有間剪頭髮，係畀啲車長係剪頭髮。

3 主席：（經傳譯員）喺屯門肯定就啱，係咪所--四間都係？

4 李澤昌先生：四間都有，四間都有，四間都有，佢甚至乎有個 grocery shop，係  
5 畀佢買啲一般基本嘅雜貨，都喺嗰度，咁其實基本上大部分嘅車長都會當嗰個係  
6 佢一個即係地方，佢哋係有個歸宿嘅地方。

7 MR DUNCAN：（經傳譯員）我想你睇睇呢一個雜項文件夾 2，902 頁。899 頁嗰度  
8 就係講及就係，九巴嘅係巴士總站同埋屯門車廠，就係主席同埋委員喺 2018 年  
9 8 月 3 號去參觀嘅一個報告。咁其實就喺 902 頁嗰度，(E) 嗰個係標題底下，就  
10 係見到係關乎屯門車廠。我就想請你睇一睇，第二點，902 頁底下嗰度，就話  
11 「一字樓，一字樓嗰度有一個康樂地方，咁就有兩張乒乓波檯，有呢個飲水機，  
12 有係儲物櫃，同埋一個係汽水販賣機，有髮型店，有便利店，有一個係休息室，  
13 就有冷氣嘅，四張檯，十六張凳，有雪櫃，係微波爐同埋電視機，同埋一個細嘅  
14 黑房，就係有啲係休息嘅凳，就係讓車長可以躺下，即係瞓平咁樣喺嗰度休息。咁  
15 而當時就係有一位車長就係用咁嘅姿勢喺嗰度瞓緊。」跟住下面嗰度，「二字樓就  
16 係有一個診所，有男廁、女廁，係一個制服嘅儲存室，同埋係辦公室。」嗰啲相  
17 就係呢個附件 E 嗰度係包括咗嗰度，912 頁嗰度就有嗰啲相，913 頁亦都係有嗰  
18 啲照片，就係反映番剛才文字所講嘅情況。呢個就係車廠嗰個情況，我哋而家就  
19 講番呢個車站嘅情況，九巴有幾多個車站？

20 李澤昌先生：二百一十七個。

21 MR DUNCAN：（經傳譯員）二百一十七個。我哋而家睇下 KMB-1 文件冊，201 頁。  
22 咁呢一頁就係委員會喺 18 年 7 月 19 號發畀九巴，咁第二段就提到要求公司係  
23 提供一個巴士車站嘅位置同埋地址，同埋係由邊一個車廠係負責嗰個車站，而係  
24 有九巴同埋龍運嘅車長就係返特別更，就係根據呢一個巴士車長工作休息及用膳  
25 時間指引，就係喺 18 年 2 月係更新，就係開始就係有一個最少三小時嘅休息。  
26 咁呢封信就係--嘅回覆就係 205 頁，就係 7 月 26 日嘅，咁就講到「我哋就回  
27 應你喺 18 年 7 月 19 號嘅信件，咁你係要求我哋提供車站，照顧呢啲特別更車  
28 長所提供嘅休息同埋員工設施。咁就喺下表就係有詳情。」咁跟住我哋就見到個  
29 表，就係 206 頁、207 頁，一直去到 211 頁。咁就住呢個表，我問問題之前，  
30 呢個表就係列咗一啲有特別更嘅車站，咁我咁樣理解啱唔啱？某一啲嘅車站係有  
31 特別更，即係係特別更都有使用嘅，啱唔啱？

32 彭樹雄先生：係，冇錯，Mr Duncan，有個別嘅車站就未必會有啲特別更嘅車長嘅  
33 使用。

34 MR DUNCAN：（經傳譯員）大概有幾多個咁樣嘅車站？

35 彭樹雄先生：或者我可以--不如我用一個數字可以--即係咁樣容易表達啲出嚟，因  
36 為邊個站有，或者有幾多站有特別更嘅車長喺嗰度休息，我哋都要睇一睇，但係或

1 者容許我畀一個數就係話，我哋啲特別更嘅車長，譬如話有幾多會係喺個  
2 depot 休息，有幾多個特別更嘅車長係會喺個站頭，即係 bus termini 休  
3 息，又或者有幾多個佢哋係可以返屋企去休息嘅。

4 MR DUNCAN：（經傳譯員）或者我可能頭先講得唔係太清楚，呢個表就係列出咗一  
5 啲車長開始特別更，然後休息嘅時候，可能會喺呢啲車站度。

6 彭樹雄先生：係。

7 MR DUNCAN：（經傳譯員）咁如果我理解啱嘅話，某啲車站係唔會被車長使用嚟休  
8 息㗎嘛，即係返緊休息--返特別更嘅車長？

9 彭樹雄先生：我或者可以咁--係，我或者可以咁樣答，因為我哋如果跟番個時間  
10 表，timetable，確實就某啲站頭，佢哋係有一啲嘅特別更車長嘅休息，但係  
11 有可能喺行動上，譬如話個站頭就算有一啲嘅 resting facilities 咁計，  
12 佢可能未必--因為個行動上，即係個車務上嘅調配，佢可能會有唔同嘅，呢  
13 度。

14 李澤昌先生：我可唔可以咁樣補充，Mr Duncan？其實我哋九巴有二百一十七個站  
15 頭，或者佢哋講個 bus termini，其實每一站頭都基本上有一啲好--我哋講  
16 緊啲基本嘅設施，而家你講緊個--呢一個站頭嘅設施，其實佢即係最大，而家  
17 政府批一個 kiosk，佢哋講緊係大概係 40 呎，40 平方呎咁大㗎咋。即係就算  
18 係咪特別更，或者係一般嘅車長嘅休息嘅設施，都係需要，而家我哋係冇刻意話  
19 邊一個係特別更先，因為其實如果我哋--我就睇過個二百一十七個站頭，其實  
20 每一個二百一十七個站頭裏面，佢個設施係基本上我哋講緊係一個 40 呎嘅一  
21 個--平方呎嘅一個東西㗎咋，即係唔係一個可以瞓覺嘅地方。

22 MR DUNCAN：（經傳譯員）你話你睇晒二百一十七個車站，佢哋包唔包括一啲即係  
23 返特別更車長所用嘅車長--即係係咪包括晒呢啲車長用同埋冇用嘅車站？

24 李澤昌先生：有，有可能係。

25 MR DUNCAN：（經傳譯員）咁即係話呢一個係車站嘅總數，就無論係有冇特別更車  
26 長用，係咪？

27 李澤昌先生：冇錯，冇錯，冇錯。

28 MR DUNCAN：（經傳譯員）咁如果我有理解錯，你啱啱就話當你即係考慮呢啲設施  
29 嘅時候，你就唔會特別係分係畀一啲特別更或者唔係特別更嘅車長用嘅？

30 李澤昌先生：冇錯。

31 MR DUNCAN：（經傳譯員）我就想你睇番 KMB-1 文件冊嘅 205 頁，或者係應該係  
32 206 頁。咁呢個表我哋就會見到，邊個車站就係要即係依靠呢一個公廁，而唔係  
33 一個化學廁所，或者係用一個九巴廁所。

1 李澤昌先生：其實今日二百一十七個站裏面，我哋叫做即係 purposely-built 有  
2 一個 toilet 喺度，係五十個；而佢有化廁嘅地方，係有六十六個；咁跟住有一  
3 百個左右，係倚賴周邊嘅設施畀個車長，例如係一啲即係 shopping mall，或  
4 者啲商場嗰啲咁嘅地方，咁今日仲有一個係冇洗手間嘅設施。

5 MR DUNCAN：（經傳譯員）咁關於呢個公廁嘅問題，根據運輸署文件，即係我頭先  
6 畀你睇嘅文件，呢啲廁所可能要即係行四至七分鐘先至去到，即係喺車站行四至  
7 七分鐘，咁樣講啱唔啱？

8 李澤昌先生：我有親身行過，但係就有住大部分係可以去--係大概十分鐘之內左右，  
9 因為有啲係好倚賴個商場，咁有時商場佢係門咗，咁佢可能會行得更遠，呢個係  
10 有呢個情況發生。

11 MR DUNCAN：（經傳譯員）九巴認為呢個情況理唔理想？

12 李澤昌先生：我哋喺過去一年裏面，我哋係添置咗個化廁係二十六個，二十六個，而  
13 家係剩番一個，咁基本上，已經去到一個我覺得係慢慢啲員工覺得係接受到嘅水  
14 平。一年前你問我呢個問題，可能係我接受唔到。但係仲有一樣嘢，我哋需要係  
15 要處理，就係因為化廁其實佢點都係缺乏咗一啲電嘅關係，所以好多時喺個通風  
16 同埋嗰啲即係等等其他嘅設施，係有一個完整一個廁所咁好，所以呢個係--我  
17 哋仲係改善之中，咁我相信會越嚟越--即係喺呢個方面會做多啲工夫。

18 主席：（經傳譯員）你話「剩番一個車站」，係咩嘢意思？

19 李澤昌先生：嗰個喺元朗，咁因為嗰個即係同近期你聽到，前幾日個差唔多個情  
20 況，因為佢個--本身嗰個路，行人路係比較窄，咁亦都係當區嗰啲區議員亦  
21 都係覺得嗰個位置同埋嗰個環境唔係咁適合，咁呢個仲係喺個申請之中，而家係  
22 仲有一個我係仲未可以即係處理到嗰個化廁，喺元朗，exactly 嘅位置係元朗  
23 公園。

24 MR DUNCAN：（經傳譯員）喺安裝咗呢二十七個化廁之後，即係仲有即係幾多--仲  
25 有啲咩嘢情況，你哋係要靠公廁？

26 李澤昌先生：呢個比較--呢一百個站頭係困難，因為佢係倚賴個 public toilet，  
27 咁有啲 public toilet 係其實係譬如係周邊係一啲公園嘅設施，係因為申--  
28 應該咁講，洗手間係複雜，因為洗手間係佢申請嘅過程，係要同好多啲區議員，  
29 唔單只政府部門，個時間係好長，所以係--我哋係即係掌握唔到呢方面即係可  
30 以做得啲咩嘢囉。

31 MR DUNCAN：（經傳譯員）即係假設你可以控制到呢個情況，即係對公司嚟講，理  
32 想嘅情況係點樣嘅？

33 李澤昌先生：我自己個人就係經常都落站頭，係同啲車長，前線員工，係畀佢感覺我  
34 哋係多啲聽佢個困難，其實今日佢個困難都未係個洗手間，其實佢個困難係個  
35 個休息室，因為休息室，我諗上年嘅秋天，大家都記得呢個樂華事件，其實休息

1 室係員工嘅一個幾重要嘅問題嚟，因為個休息室嗰個位置同埋佢個大細係呢個  
2 需要我嚟緊嘅重要嘅工作，特別係未來香港--未來政府起嗰啲新嘅站，喺嗰個  
3 設施裏面，應該要做多少少，呢個先至係我哋覺得應該要多啲嘅工作。

4 MR DUNCAN：（經傳譯員）一陣間我哋會講呢個休息室嘅問題，即係就住呢個提供  
5 廁所嘅問題，即係呢個理想嘅情況會係點？

6 李澤昌先生：我自己--Okay，我哋自己做咗啲咩嘢，今日啱啱我想講就係，我哋啲  
7 洗手間、化廁，其實佢係好多地方係申請唔到電，我哋大部分嘅化廁今日，我曾  
8 經係叫我哋啲工程部提供一啲電池，然後托個電池去嗰度，畀佢哋廿四小時有  
9 燈，同埋廿四小時有抽氣嘅設施。咁呢個第一步我試完，而家第二步，我哋差唔  
10 多係全部有電到嘅地方，我哋係安置咗個太陽能嘅板，喺嗰個化廁上高，而提供  
11 啲電畀我哋啲車長可以有燈同埋有抽氣扇。我哋--即係喺我自己嘅範圍裏面，  
12 我諗我哋喺嗰個化廁嘅工作，已經我覺得係盡量去做㗎喇。咁你話當然，即係你  
13 話係咪喺其他商場或者公園嘅設施嗰度，佢即係可以再畀多啲機會我哋係裝多啲  
14 化廁，我哋願意去做，但係即係正如頭先講，有好多地區同埋其他嘅部門，即係  
15 我真係確實係有個難度。

16 彭樹雄先生：Mr Duncan，其實我想少少嘅補充，即係我好多謝 Mr Duncan 你提出  
17 呢個洗手間嘅問題，其實呢個洗手間嘅問題，其實都係--都幾困擾我哋前線啲  
18 車長，因為往往個洗手間嘅問題，令我哋啲車長去到商場，可能佢哋即係所謂  
19 食閉門羹，畀人趕番出嚟。正正因為冇洗手間，佢哋可能真係要來回--淨係來  
20 回個步程都可能要八分鐘、十分鐘，佢哋嗰個休息時間相對地係因為咁樣而係有  
21 所減少，呢個係其實都幾困擾我哋啲車長。同埋我亦都有啲驚奇就係，一啲現有  
22 嘅總站，你有一個永久嘅洗手間，我覺得即係呢個當然我哋可以逐步做，我哋公  
23 司譬如話我哋會加自己嘅化廁等等，但係一啲啱啱起好嘅新嘅巴士總站，我覺得  
24 都頗為詫異就係，佢完全冇 factor in 到一啲 permanent 嘅洗手間喺裏面。  
25 我舉幾個例，例如西九龍高鐵巴士總站，一個係好有規模嘅巴士總站，但係完全  
26 係冇洗手間嘅安排；紅磡嘅紅鸞道，啱啱使用，佢係要嚟取代嗰個紅磡碼頭，亦  
27 都係一個好大嘅 PTI，我哋所謂 public transport interchange，亦都係  
28 有一個洗手間嘅設備，冇站長室，冇休息室；港珠澳大橋，我哋初步睇，亦都係  
29 有一個洗手間嘅設備。咁呢個其實正正多謝 Mr Duncan，我哋覺得係咪應該呢  
30 啲 resting facilities，包括 toilet 等等，係咪應該喺包含咗一啲基本嘅  
31 設施裏面？㗎。

32 主席：（經傳譯員）咁問題嘅根本係咪即係係規劃上嘅問題，點解會有一啲新嘅路線  
33 同埋新嘅設施，但係就有一個制度去確保呢啲設施入面係有合適嘅廁所？

34 彭樹雄先生：多謝主席，我唔知道呢個係咪一個 design failure，但係有一啲以  
35 往即係建造嘅巴士總站係有一個 permanent 嘅 resting facility，有洗手  
36 間，冇站長室，但係就好奇怪，就係--正正就係有啲新落成嗰啲，就完全係冇  
37 呢一樣嘢。同埋除咗--呢個新落成嘅巴士總站，除咗 resting facilities，  
38 其實喺個設計上，其實都有問題。正正我講，紅鸞道、西九高鐵站，呢兩個站喺

落成咗之後，Transport Department 就邀請我哋巴士公司落去試路，但係先發覺，原來佢個 design，佢個設計根本係對某啲嘅車種係唔適合，結果呢兩個站係需要做一啲好大型嘅 modifications，先至可以令到我哋啲巴士係轉得到，又或者係能夠出到嗰個出口。因為佢--即係嗰個--我相信一啲舊式嘅巴士總站設計，當時係諗唔到會有十二米車，十二米八㗎，呢個我哋可以諒解。但係一啲新嘅巴士站，呢個我哋覺得係比較驚奇，㗎。

MR DUNCAN：（經傳譯員）而家請你搵去 FE-1B 嘅文件冊，199-7 頁。你見唔見到呢度有封信，2016 年 1 月 21 號，呢個係寫畀運輸署署長，公司發出，有關於就係話擺一個化學廁畀政府土地，一個荃灣嘅--新界荃灣嘅巴士總站，見唔見到？

彭樹雄先生：見到。

MR DUNCAN：（經傳譯員）呢個算唔算係一個申請擺一個化學廁嘅，呢個就係荃灣嗰個呢個地方？

彭樹雄先生：係，冇錯。

MR DUNCAN：（經傳譯員）請你睇 199-10，呢度就係嗰 4 月，運輸署--2016 年 4 月，運輸署一封回信㗎。

彭樹雄先生：係，見到。

MR DUNCAN：（經傳譯員）响第二段，「部門將你個建議畀有關嘅政府部門，係發--睇下佢哋有咩嘢意見，亦都要求荃灣民政處就嗰當地係諮詢啲人。我想同你講，當地居民嘅代表係有強烈反對，擺呢個响個荃威花園嘅巴士總站擺化學廁，因為佢哋關心衛生，同埋仲要附近亦都有洗手間，咁詳細嘅反對原因就係擺咗响附件 A，請你參考。咁我哋好遺憾話畀你聽，你申請擺個化學廁呢個建議，係我哋唔能夠支持，我哋想請你重新考慮下，係咪需要响呢個地方擺個化學廁，再重新提交申請嘅，如果需要嘅話。」

咁跟住 199-13，係另一封信，係公司發去畀運輸署署長，今次第二段，「請你--請留意化學廁已經係有更好嘅設計，同埋通風嘅等等一啲情況。」見唔見到？

彭樹雄先生：見到，有。

MR DUNCAN：（經傳譯員）大家知道荃威花園即係已經有二十年係做巴士總站。

彭樹雄先生：係，冇錯。

MR DUNCAN：（經傳譯員）咁另一封信，日期 2017 年 9 月 29 號，係頁數 199-18，係即係重新申請嘅。

彭樹雄先生：係，見到。

1 MR DUNCAN：（經傳譯員）咁 199-26，係 2017 年 12 月 29，即係話第一次申請之  
2 後，差唔多兩年之後發生嘅事嚟，「關於你嘅申請化學廁，我好高興話畀你聽，  
3 我哋而家批准等等，咁我哋夾附咗」--有三十二個條件，即係關於呢個化學  
4 廁，你要遵守呢啲條件？

5 彭樹雄先生：係，冇錯。

6 MR DUNCAN：（經傳譯員）我睇嚟嘅，似乎用咗好多時間嚟到申請嗎？

7 李澤昌先生：Yes.

8 彭樹雄先生：Yes，係，冇錯。

9 MR DUNCAN：（經傳譯員）係咪一個好獨特嘅個案，定係呢個反映一般嘅經常發生  
10 嘅情況？即係話你申請擺化學廁，係咪經常都係咁嘅？

11 李澤昌先生：我可以咁樣講，你睇--你留意到嗰個日子係 2017 年 12 月，呢個就係  
12 樂華事件之後嘅事嚟。我頭先都講過，其實呢個化廁，我哋喺呢段時間，係有二  
13 十六個係好短時間去得到呢個 approval，係一個非常之漫長，你頭先--我哋頭  
14 先都講咗，你話仲有一百個係要倚賴周邊嘅設施，好似話公園同埋商場，我哋仲  
15 有好多工作做，但係真係基本上申請一個化廁，係講緊係用年作為一個單位去  
16 計算，係真係有個難度。

17 彭樹雄先生：Mr Duncan，其實呢個--你 quote 呢個例子，呢個荃威花園，其實我  
18 都有參與。我哋第一次申請，點解我哋--首先我哋點解會申請，正如阿 Mr  
19 Duncan 講咗，呢個站其實係好多年嚟嘞，一路我哋都係用喺個總站對面一個商  
20 場嘅洗手間，佢哋係畀我哋啲車長用。但係唔知點解，佢突然之間就話「我唔會  
21 再畀你哋車長用嘞。」咁於是乎我哋嘅車長就要行好遠。咁我哋就喺 2016 年 1  
22 月 21 號，就第一次申請，咁一路就係來來往往，咁就基於居民嘅拒絕，區議員  
23 嘅反對，咁運輸署就同我哋講就對唔住，佢就唔會申請。咁直至到我 2017 年 9  
24 月，我落去呢一個站頭度去 visit，即係同啲車長傾偈，咁啲車長個反應非常  
25 之大，咁於是乎我就同我哋個經理講就話「唔得嘞，我哋一定要再寫信去畀運輸  
26 署。」咁正如李生講，因為大家都記得 2017 年年中，樂華邨，我哋想等一個休  
27 息室，搞咗好多好多年。咁 eventually，結果我哋就成功爭取咗。咁之後就都  
28 睇得到，嗰個步伐係快咗，但係都同阿李生咁講，我哋係用年做單位，申請一個  
29 化廁，呢個我哋其實都話，我都想強調，對於我哋前線車長，前線同事，洗手間  
30 呢個問題係真係好困擾，呢個係。

31 MR DUNCAN：（經傳譯員）請我哋大家睇番 KMB-1，同埋你提供嘅資訊、資料，係  
32 你提供畀委員會嘅資料，就係關於員工嘅設施、廁所等。根據呢啲分析，有七個  
33 總站似乎完全冇廁所，冇呢啲設施。如果大家睇 208 頁，第三、第四個記項，  
34 新屯門中心同埋另一個喺屯門嘅，係跟住 209，港澳碼頭、長沙灣，咁呢度有個  
35 係長沙灣、葵盛中、祖堯，呢啲總站，咁佢啲巴士車長點應付？

1 李澤昌先生：佢哋去嗰啲商場嘅洗手間度。

2 MR DUNCAN：（經傳譯員）算唔算係公廁？

3 李澤昌先生：佢有啲係，有啲 public toilet 係嗰啲政府嗰啲嚟，但係佢周邊喺  
4 十分鐘之內，佢哋去得到㗎嘞。

5 MR DUNCAN：（經傳譯員）呢度你講嘅公廁，你話有一百個，大部分有都包括係商  
6 場？

7 李澤昌先生：Yes.

8 MR DUNCAN：（經傳譯員）咁有啲點解空白㗎，呢七個係完全冇任何嘢寫低？係咪  
9 即係話就算係商場嘅廁所都有？

10 彭樹雄先生：Mr Duncan，我再去睇一睇，有個可能性就係，佢係倚賴一啲商場嘅  
11 洗手間，但係因為商場洗手間佢係有時間限制，即係佢商場門門，嗰個洗手間就  
12 會鎖，咁呢個我可以再睇一睇，我再--或者我稍後回覆 Mr Duncan。

13 MR DUNCAN：（經傳譯員）咁先暫時唔睇廁所，睇番休息設施。响咁樣嘅情況，我  
14 想睇番工會嘅提供嘅證供，我哋聽到佢哋嘅第九日嘅--第九日嘅時候，聽到  
15 佢哋嘅一啲證供。第九日，第 50 頁，呢個係陳先生，龍運嘅，陳廣龍（陳廣  
16 能？），佢係其中一個巴士總工會嘅代表嚟，佢响第九日作證。

17 我想就去番--睇番第 50 頁嘅第 20 行，佢就話--陳生就話「我係龍運嘅，  
18 我想補充一句。」即係佢話之前講過，而家就補充，佢話「响 E33P 呢條線」--  
19 我相信係路--我相信--我理解呢個係路線，「2016 年，咁就係廿四小時咁樣營  
20 運，呢條線，咁就大概就有六十程，有六十程，咁個巴士總站喺兆康南站，嗰度  
21 係有休息室，亦都有廁所。原本，佢已經有一條線㗎嘞，去到 2016 年，變咗全  
22 日線，咁我哋就要响嗰個巴士總站嗰度食飯，同埋喺特別嘅地方就係休息，不過  
23 就有休息室。咁我哋不斷嘗試過之後，最後有一個，咁當地同埋運輸署就唔批  
24 准，咁而家呢個--我哋呢個亭就停咗，關咗兩年，咁我哋一路都要求有個休息  
25 亭，不過始終都做唔到，亦都未收過通知話幾時可以提供到。」

26 咁黃小姐問「咁關於呢 E33P，你幾時申請要求有咁樣嘅休息亭，係咪用書  
27 面？」

28 佢話「我哋响 2015 年同公司見面嘅時候提出，即係工會同佢見面，咁公司  
29 話畀我哋聽，佢一路就向唔同嘅當局申請，不過 2016 年，區議會就話應該係呢  
30 條全日線嘅嚟到係服務屯門居民，我話我哋如果有一個休息室，我哋點能夠佢改  
31 善個服務嘅質素？我哋嘅意見就轉達咗畀區議會同埋運輸署，就算係到到今日，  
32 到今日為止，都未再收到佢哋有咩嘢回應。」

33 咁我未問我呢個問題之前，我想你去番雜項 2，呢個係嗰個主席去探訪嘅紀  
34 錄嚟，899 頁。由 899 頁，一路去到 902 頁，咁呢度觀察--即係探訪者嘅觀察

1 所得就係咁樣，「嗰個巴士總站就係有休息室，咁嗰啲駕駛 E33P 嘅車長只能夠  
2 响兩程之間，就係响個巴士車箱裏面休息，因為嗰度冇--呢個係個露天嘅總  
3 站，有休息室，根據另一個車長講，同一路線嘅，嗰度有一個係儲物櫃嘅地方，  
4 咁可以擺水，咁另外兆康站係你可以用八達通去到裏面嘅廁所，不過要去，就要  
5 來往要起碼七、八分鐘。」咁有啲相片，911 頁，即係呢個係總站，我哋就有個  
6 擺儲物櫃嘅，就有廁所，咁廁所就响兆康站裏面。咁你都可以估到我想問乜嘢，  
7 點解個總站--咁你批准設立總站，但係冇提供廁所或者係休息嘅設施？

8 李澤昌先生：我諗頭先主席都講咗，呢個係一個好核心嘅一個問題嚟，即係呢個我答  
9 你唔到，但係就而家呢個最新嘅情況，就其實運輸署就已經係批咗佢呢個站頭個  
10 個設施，咁當然批咗之後，仲有一個工作要做，就係申請電。咁因為佢嗰個程序  
11 上，就係要申請咗，有咗個政府嘅 approval，然後先至可以申請電，咁申請電  
12 都要一段時間，所以係我哋而家跟住嘅工作就係努力咁樣申請嗰條電線，駁到呢  
13 個休息嘅設施。

14 MR DUNCAN：（經傳譯員）就唔想--我哋如果唔返番去嗰個運輸署嗰啲申請文件嗰  
15 度，你明白佢哋嘅講法就係話，佢哋會協助方便你同其他嘅政府部門溝通。

16 李澤昌先生：係，冇錯。

17 MR DUNCAN：（經傳譯員）呢個係咪就係你嘅經驗？就係咁--有冇有效？

18 李澤昌先生：我自己個人覺得有啲部門，有啲係可能係真係未必需要，因為呢一個所  
19 謂休息室嘅設施，其實呢一個都幾係一個 temperate，一個好臨時式嘅一個建  
20 築物，咁佢有啲部門，佢問嗰啲部門其實同一啲即係永久性嘅建築物，係接近乎  
21 係一模一樣，咁呢一個過程係我覺得有啲比較長。另外一樣嘢就係，嗰啲申請  
22 電，咁因為佢個制度係通常我哋係批咗之後，然後啲電嘅公司先至有批文，先至  
23 可以接受你個申請嗰條電線入嚟，咁嗰度亦都有啲程序上，我哋都有辦法可以即  
24 係有個突破，咁所以而家就算等到申請咗之後，我係問緊中電可唔可以加快申請  
25 條電，咁即係我可以--你可以想像到，其實係有啲嘢係可以做得快啲嘅。

26 MR DUNCAN：（經傳譯員）幾耐之前，你申請呢個咁嘅地方有個係亭同埋嗰個廁  
27 所，係幾時申請？

28 李澤昌先生：我要即係返去 check check，但係唔係一個短時間，即係唔係用月嚟  
29 計，可能已經遠遠超過一年㗎㗎。就算申請電，都要一段即係起碼要好幾個月，  
30 最快都要。

31 MR DUNCAN：（經傳譯員）就未批准㗎，係咪呀？

32 李澤昌先生：電未。

33 MR DUNCAN：（經傳譯員）你覺得幾時可以擺晒啲批准？

34 李澤昌先生：可能開完呢個會就會快啲，但係即係我相信係，如果唔係好複雜，都要

1 講緊係四至六個月，係冇得少。

2 彭樹雄先生：其實 Mr Duncan，我哋有好多嘅--其實有好多嘅站頭，我哋用咗好多  
3 時間去申請個休息室，但係好多時，個休息室擺咗喺度，我哋申請電，真係一  
4 個--都係一個好漫長。同埋我哋最慘就係，啲同事就會講「喂，你都--休息室  
5 都擺咗喺度，點解唔用得？」咁，但係查實就係，因為真係要等埋其他政府部  
6 門，有啲甚至乎要睇埋渠務署等等，即係好多好多即係有啲要經過嘅程序。

7 主席：（經傳譯員）各位，而家已經 1 點鐘，我諗我哋而家係食午飯，咁今日下晝兩  
8 點半繼續，唔該晒。

9

10 下午 12 時 59 分聆訊押後

11

12

13 下午 2 時 30 分恢復聆訊

14 出席人士如前。

15

16 主席：（經傳譯員）各位午安。係，鄧樂勤大律師。

17 MR DUNCAN：（經傳譯員）唔該你，主席。

18 彭樹雄先生：喺我哋嘅 lunch break 之前，就我哋會 check 一啲啲站頭啲設  
19 施，或者介唔介意我匯報番先？我哋去--麻煩你去番 KMB Long Win Bus  
20 bundle 1(A)，就係 Long Win Bus & KMB bundle 1(A) 208 頁。

21 主席：Yes.

22 彭樹雄先生：首先我第三個同埋第四個站，一個叫做 Handsome Court 同埋新屯門  
23 中心。因為我哋啲車係特別車嚟，即係淨係朝頭早有服務，所以嗰度係有一  
24 個洗手間嘅設定，同埋啲車長唔會喺嗰度休息嘅。

25 另外就去到 209 頁，嗰個 Central (Macau Ferry)，對唔住，呢度我  
26 哋有少少遺漏，其實嗰度係有 public toilet 嘅，有公共洗手間嘅。然後落  
27 去...

28 主席：（經傳譯員）麻煩你等一等。搞錯咗，就唔係話遺漏？

29 彭樹雄先生：係，冇錯，冇錯，對唔住，我哋係有啲粗疏㗎，呢度...

30 主席：（經傳譯員）信德中心，係咪呀？

1 彭樹雄先生：係，冇錯，係，冇錯，主席。

2 主席：（經傳譯員）係。

3 彭樹雄先生：好，另外落去，就有個長沙灣，Cheung Sha Wan，有個甘泉街  
4 South，甘泉街南，嗰度我哋係有一個化廁嘅，個原因就係我哋用對上嗰個總  
5 站，甘泉街北嗰個嘅化廁，即係兩個站係 share 一個化廁嘅。

6 好嘞，然後落去尅二個，葵盛中。咁嗰度，對唔住，呢度又係我哋有啲  
7 粗疏，其實係有一個嘅 KMB 嘅 toilet 嘅，嗰個係 permanent，嗰個係永久嘅  
8 toilet 㗎。

9 然後去到第 210，最樓尅嗰個又一邨。其實又一邨我哋係有巴士總站嘅，  
10 因為我哋嗰條 203C 嗰條線，就係去大坑東嘅，不過係經又一邨，所以嗰度係有  
11 一個洗手間嘅設備，因為亦都有車長喺嗰度休息嘅。

12 好嘞，另外就睇番亦都先前有工會嘅代表講，就係龍運巴士嗰個 E33P 嗰  
13 個兆康南。正話 Mr Duncan 你就問我哋係幾時開始申請，嗰個兆康南站，我哋  
14 係 2017 年嘅 8 月係入紙同運輸署申請站長室、休息室同埋化廁嘅。而運輸署喺  
15 2018 年嘅 7 月，2018 年嘅 7 月係已經批咗嗰個嘅 approval，我哋而家就係  
16 喺度申請緊電力嘅供應嘅。

17 多謝，Mr Duncan。多謝主席。

18 MR DUNCAN：（經傳譯員）唔該晒你，彭先生。而家想請你睇呢一個雜項文件夾 2，  
19 899 頁。今朝睇過嘅，呢個係一個報告，就係報告番委員就係去巴士總站同埋  
20 車廠參觀。

21 請你睇呢個報告嘅第 2 頁，即係第 900 頁。喺第三行，即係 (B) 嗰度嘅第  
22 三行，沙田火車站巴士總站，嗰度嘅第三行就咁講，就話有新型嘅休息設施，  
23 有冷氣嘅，有空調嘅，有抽氣扇、有五張椅。然後喺底下嗰度，就話平均嚟  
24 講，一日就會有多過十位司機喺嗰個巴士總站同一時間係休息嘅。

25 如果我理解得正確嘅話，似乎係咪就話呢個情況都唔係淨係沙田鐵路站嘅  
26 巴士總站唯一係有咁嘅情況？因為你睇番 901 頁嗰度，就係講及聯和墟巴士總  
27 站喺第 2 點嗰度，第 1 大段嘅第 2 點嗰度就提及一個細嘅休息室，裏面有三張  
28 椅。

29 然後喺嗰一版嘅第 2 段，第 4 個大點嗰度，就話喺探訪嗰日，大概有六、  
30 七名司機喺總站嗰度休息，當時就係繁忙時間。

31 落到去 903 頁，就係山景巴士總站，有五張椅，但係今次就有提及話究竟  
32 係任何時間，同一時間裏面，總共會有幾多位司機喺度休息。呢度有兩點，我  
33 哋聽到喺車廠嗰度，車廠有個係所謂暗啲話「黑房」，就係有設施係讓車長可  
34 以攤平咁樣馴喺度。但係如果喺巴士總站嚟講，嗰啲休息室就有同樣嘅情況

1 嗶，你覺唔覺得咁樣係理想嘅呢？

2 彭樹雄先生：呢個係會發生嘅。我想強調其實我哋 呢啲所謂 Kiosks，休息室，我  
3 哋 有兩種唔同嘅 size 嘅，一種係細啲，一種係比較大啲。我哋 好多時因為個  
4 張--如果要真係擺一張 horizontal 嘅椅喺度，其實佢佔用個個嘅空間都有--  
5 即係會有一定嘅空間係會佔用到。其實我哋 都盡量就係話視乎個個使用個  
6 usage，因為有一啲嘅總站，其實車長未必會喺中段休息會使用--即係個三個鐘  
7 頭未必一定會使用個個站頭嘅設施嘅，但係盡量如果我哋 可以，我哋 都會申  
8 請，如果容許的話，我哋 都會擺個比較大啲嘅 kiosk 喺度。

9 李澤昌先生：呢度有少少補充嘅，其實喺個車廠裏面，有啲真係好似瞓低喺度啲  
10 咁樣。但係而家我哋 有啲係本身係 purposely built 嘅 terminus，其實佢  
11 有啲就唔係一張凳嚟嘅，佢有張比較低少少可以坐得舒服啲嘅凳，畀啲員工  
12 休息。咁個數量就係我今日手上有啲巴士總站，啲係真係畀啲員工，雖  
13 然唔係坐低，可以橫--好似張床咁瞓，但係啲都好舒服。而家你所講啲，  
14 因為佢本身個 kiosk 嘅 size 係正正係得個 40 平方呎，咁就其實係擺得  
15 五、六張凳。我哋係確確實實覺得係有呢個需要，嚟緊我哋係好希望喺好多站  
16 頭裏面，都比較大啲站係有兩個形式嘅凳，一種就係坐直啲凳，另外一種  
17 係坐低，比較舒服少少啲種。而家我哋 都已經係好多係做緊呢樣嘢。

18 彭樹雄先生：係，Mr Duncan，今朝早喺個聽證會度，我都想提供一啲數字或者畀  
19 呢個 Committee 參考嘅。我哋 九巴啲特別更嘅車長，其實我想講就係我哋有  
20 大約九個 per cent 嘅特別更嘅車長，即是一百三十四位嘅特別更車長，佢係  
21 會喺個四個廠裏面休息嘅，即係換句話，正話李生講啲，我哋 會有一啲  
22 horizontal 嘅床等等，呢一百三十四位同事就會喺廠休息嘅。

23 另外喺各個站頭休息嘅，就佔咗十七個 per cent，就係二百六十二位。  
24 而返屋企呢三個鐘頭或者以上嘅休息，其實佔嘅總數係所有特別更嘅車長係七  
25 十四個 per cent，係一千一百一十七位同事，七十四個 per cent 嘅同事係  
26 佢哋可以返到屋企休息嘅。

27 正正我哋 KMB 相對地比較好嘅，就係因為我哋車廠嘅分佈比較多，同埋亦  
28 都可以真係就到一啲車長，佢哋係可以係短時間裏面係能夠返到屋企休息。多  
29 謝你，Mr Duncan。

30 李澤昌先生：即係佢係嚟緊個將來，我想補充，即係當然呢啲係一個數字，但係即係  
31 個 terminus 休息個設施，我諗我哋都會再做緊啲工夫。我諗啲凳，同  
32 埋可以坐得舒服啲，其實唔係淨係畀一啲特別更，我諗有一啲一般嘅值更嘅同  
33 事，我諗我哋都要喺個度會做啲嘢喺度。

34 MR DUNCAN：（經傳譯員）大啲嘅休息室，我想問有冇個房係畀佢哋可以瞓平呢？

35 彭樹雄先生：佢就唔可以係完全 horizontal，但係好似一啲 armchair，安樂椅咁  
36 呢，佢係可以係躺臥到嘅，但係就唔係--完全唔係--即係都係當然，唔係一張

1 床咁，係 horizontal，但係都係一張安樂椅咁斜斜地，咁可以休息到。其實我  
2 哋開始越嚟越我哋會擺得多啲呢種嘅椅嘅。其實係有，做緊㗎，不過我哋會繼續  
3 --即係如果可以--喺個面積上面容許，其實我哋可以擺得更加多添。

4 主席：（經傳譯員）有冇人規定過嗰個休息室嘅大細？

5 彭樹雄先生：我哋每一次呢啲 kiosk 去畀運輸署申請，其實有個 size 嘅限制嘅，  
6 呢個已經係最好嘅 size，即係喺而家嘅規架底下，呢個已經係最好嘅一個  
7 size。

8 主席：（經傳譯員）呢個咪間接咁講，就係運輸署係限制咗個大細？

9 彭樹雄先生：有呀，有㗎，我諗唔一定係運輸署嘅。因為有啲地方...

10 李澤昌先生：係有嘅，係有嘅。

11 彭樹雄先生：係有嘅，係，但係個...

12 李澤昌先生：呢個 size 係政府 stipulate 㗎，所以其實我哋係呢個 size 係絕對  
13 開放，係絕對希望可以係大啲嘅。

14 彭樹雄先生：其實我哋都好--係申請即係由 A 亭會轉個大--我哋都有咁樣做。

15 主席：（經傳譯員）邊一個政府部門係規定咗呢個休息室嘅大細？

16 彭樹雄先生：運輸署。

17 李澤昌先生：運輸署。

18 主席：（經傳譯員）佢規定咗嗰個呢兩種尺寸已經實施咗幾耐？

19 李澤昌先生：五年。

20 主席：（經傳譯員）真係？唔係仲多過五年咩？

21 李澤昌先生：（經傳譯員）我會話起碼五年囉。

22 主席：（經傳譯員）你有冇係申請過大啲嘅休息室？譬如話話畀佢哋聽，就係話我哋  
23 想佢哋瞓低，躺平咁瞓，有冇咁問過？

24 李澤昌先生：我哋通常咁做，我哋係申請兩個 40 呎嘅，呢個我哋通常都會咁做，咁  
25 得到嘅通常都係一個返嚟。如果你話即係可以係申請大嘅，大過 40 嘅，我哋應  
26 該係未試過嘅，未試過。

27 主席：（經傳譯員）所以你有試過，亦都未必知個答案？

28 李澤昌先生：㗎。

29 主席：（經傳譯員）但係你就推論，就係你想擺兩個 40，即係話如果要 100，應該

1 佢哋唔會批准，你係咪咁樣推論？

2 李澤昌先生：(Nodded head)

3 主席：（經傳譯員）律師。

4 MR DUNCAN：（經傳譯員）你講嘅啲好似安樂椅嘅椅，我想問下報告裏面有冇  
5 相？

6 李澤昌先生：呢度冇影到，但係我哋有好多我哋啲總站啲啲呢，係有呢一種凳嘅。

7 MR DUNCAN：（經傳譯員）第 2 點亦都係源至剛才我讀出嚟嘅啲啲描述，你有時就  
8 話有三至到五張椅，但係同一時間就可能有七至八個人就係喺啲度休息緊，咁嘅  
9 情況滿唔滿意？

10 李澤昌先生：當然即係永遠都可以做好啲嘅，我個人覺得唔係好滿意，所以我頭先都  
11 講咗，我哋會係未停過係繼續同政府係再繼續申請，所以休息室個問題，我哋  
12 係仲未解決嘅，所以我哋係未滿意嘅。

13 MR DUNCAN：（經傳譯員）好嘞，而家讓我講番運輸署嘅文件夾，即係今朝早我哋  
14 展開呢一段對話嘅時候，就已經係睇緊運輸署嘅文件，就係運輸署嘅 1 號文件  
15 夾，438 頁。啲度睇到有兩條問題嘅，就問運輸署兩條問題，佢哋亦都答咗嘅。  
16 咁想請你睇番 438 頁。第 1 點嘅第二句，就係相關嘅部門或者當局考慮同埋係  
17 審核個申請，睇下畀唔畀你哋有呢啲員工設施嘅時候，運輸署一直都有提供適  
18 當嘅協調工作嚟到係便利係早日可以安裝到咁嘅設施。

19 我想問，你哋嘅經驗係咪都係咁樣樣？

20 李澤昌先生：佢係做一個協調嘅工作，但係申請呢啲嘢，其實佢係有兩個最大嘅部門  
21 嘅。運輸署佢通常係處理一啲係 Housing Department 或者 Housing  
22 Authority 以外啲啲，啲啲係佢哋去處理。但係喺一啲 Housing Authority  
23 啲啲範圍裏面，就會由番 Housing Authority 去做 coordinate。所以係基  
24 本上係兩個唔同嘅單位去處理。

25 MR DUNCAN：（經傳譯員）想問下，運輸署嘅協調工作有冇令到你哋早日係得到批  
26 准去造啲啲設施，即係從你嘅經驗嚟計？

27 李澤昌先生：即係如果作為一個--即係我哋一個營運者，我覺得佢可以快啲囉。

28 MR DUNCAN：（經傳譯員）第二個要點，第三句「專營巴士營運商佢哋嘅要求同埋  
29 意見，即係關乎洗手間同埋休息設施都會係喺適當嘅時候，加入咗巴士總站嘅設  
30 計啲度。」

31 喺實際嘅經驗嚟講，係咪真係咁？

32 彭樹雄先生：其實我好難答 yes 或者 no，因為有啲可能我哋會知悉嘅，但係有啲我

1 咁有知悉。所以我對唔住，Mr Duncan，我真係畀唔到一個好 yes or no 嘅答  
2 案畀你。

3 MR DUNCAN：（經傳譯員）邊個負責設計呢啲巴士站？

4 彭樹雄先生：運輸署。

5 李澤昌先生：我覺得有幾種嘅巴士總站嘅，有啲巴士總站係應該屬於政府嘅地，或者  
6 政府嘅產業，佢去做。咁喺做嘅時候，其實佢都未必決定咗係邊一間公司入嚟行  
7 嗰條巴士線，其實就確實佢就好少係搵咗邊一間公司畀意見。佢哋運輸署亦都係  
8 有一班專業嘅團隊，或者佢有佢自己嘅顧問係設計個巴士站。所以我就喺我過去  
9 咁多年，我就應該就未有人諮詢過我哋嗰啲洗手間喺邊度，呢啲問題。

10 MR DUNCAN：（經傳譯員）換句話講係運輸署設計每一個巴士總站，係咪呀？

11 李澤昌先生：如果係佢哋嘅地方，但係當然譬如好似係--即係我頭先想講嗰啲 bus  
12 transport interchange，即係可能同鐵路嗰啲有關係，我諗當然個業權，  
13 呢個我唔係好清楚。但係我哋本身就真係有喺嗰個諮詢裏面係有知會。

14 MR DUNCAN：（經傳譯員）當運輸署設計巴士總站嘅時候，即係如果係喺政府土地  
15 上面嘅巴士總站，佢哋喺設計入面，有冇包括埋廁所同埋休息設施？

16 李澤昌先生：即係我覺得係應該如果佢叫呢個叫做“bus terminus”，佢係應該有  
17 一啲 terminus 嘅設施喺裏面，但係就我眼見，而家暫時有啲係真係有，我答  
18 唔到佢哋本身嗰個標準係點樣。

19 MR DUNCAN：（經傳譯員）439 頁，第 1 點，「運輸署係有積極咁樣同相關嘅部門  
20 同埋單位，就係聯絡去解決任何專營巴士公司喺申請設施嘅時候遇到嘅困難。」

21 根據你嘅經驗，運輸署有冇有效咁樣解決你公司所遇到嘅問題？

22 彭樹雄先生：Mr Duncan，我嘅答案，我只可以話可以做得好啲嘅。即係因為佢呢  
23 一個 bullet，其實好 broad，即係我完全唔能夠 gauge 到到底即係佢所謂  
24 “proactively” 嗰個程度係去到邊度。

25 李澤昌先生：即係或者我咁樣講，其實運輸署係有原則上係反對個站頭個設施係有呢  
26 啲咁嘅休息室，或者廁所、化廁嘅東西。但係因為即係每一次去到做嘅地方上嗰  
27 啲咁嘅諮詢，或者喺個土地上有冇足夠嘅地方令到佢可唔可以擺到嚟嘅，佢係真  
28 係面對咗好多呢啲咁嘅疑難。當然，處理呢啲嘅其實唔係咁容易，我好明白，但  
29 係就我哋感覺到，我哋同運輸署係有一個好大嘅分歧，但係亦都睇到佢哋有一個  
30 難度喺呢方面。

31 MR DUNCAN：（經傳譯員）第 440 頁最後啲一句，「運輸署就會協助專營巴士公司  
32 去得到當地或者當區嘅支持，就會透過做一啲實地嘅考察，或者係同佢哋會面去  
33 搵出一啲可行嘅方案，咁呢去加快呢一個實施嘅方案，就可以幫助到車長同埋乘  
34 客。」

1 你公司有冇即係得到咁樣嘅協助？

2 彭樹雄先生：呢個我可以答呢，就係當我哋入咗一個申請嘅時候，我都知運輸署係會  
3 聯繫當區嗰啲區議員等等。如果真係有反對，大家都睇到，好似正話荃灣荃威花  
4 園嗰個個案，運輸署嘅回覆最梗乸嗰段就係話「當區居民反對，你哋巴士公司搵  
5 過個位置再申請喇。」咁樣。呢個就係我哋好多時都會遇到呢一個咁嘅問題嘅。

6 MR DUNCAN：（經傳譯員）最後我就想問一啲問題去澄清一啲嘅事宜嘅，即係之前  
7 你都已經向委員會講過呢啲議題。首先呢啲車長，即係返工，開始上班嘅時候，  
8 即係以我所知，即係而家有提供任何嘅交通工具畀啲車長去佢哋返工嘅地方，係  
9 咪呀？佢哋要用自己嘅方法去到返工嘅地點，係咪？

10 彭樹雄先生：其實我哋公司係有提供到一啲我哋所謂嗰啲叫“crew bus”，我哋嗰  
11 啲廠車。我哋嘅廠車就係早更，其實就基本上個涵蓋面都幾廣泛，甚至乎，雖然  
12 我哋有廠喺香港島，我哋香港島都會有朝頭早嘅 crew bus 廠車係接送啲同事  
13 返番去個屬廠度開工嘅、工作嘅。

14 MR DUNCAN：（經傳譯員）你可唔可以提供多啲嘅詳情？咁樣委員會就會知道呢一  
15 個員工巴士服務係點嘅。

16 彭樹雄先生：冇問題，其實我哋有嗰啲 Crew bus 嗰啲嘅路線，幾多點鐘開等等，  
17 我哋都可以提供到嘅。早更，因為早更嗰個交通嗰個問題，有啲同事返夜更，咁  
18 又點呢？其實同事——因為我哋嗰啲同事係可以自己搭巴士等等，佢哋好多時都  
19 係用番我哋當日中午嗰啲巴士嘅服務，亦都係可以返到去個站頭度攞車工作嘅。

20 MR DUNCAN：（經傳譯員）我想你搵去 KMB-12 文件冊嘅第 5010 頁，呢份就係你  
21 喺上次聆訊之後提供嘅，將份文件。呢度就係一啲數據，就係你嗰啲有提到呢啲  
22 數字嘅。呢啲數據就係關於有幾多嘅車長會喺車廠、車站或者屋企，即係佢哋下  
23 午度休息嘅。你提到大概係七成嘅車長係會返屋企休息嘅，即係喺佢哋落更嘅時  
24 候。

25 會唔會有任何協助幫呢啲車長返屋企，或者係由屋企返嚟去恢復工作？

26 彭樹雄先生：其實我哋有個叫做先天性嘅優勢，就係我哋屬廠比較多。我哋如果個車  
27 長佢加入我哋嘅公司完成受訓，基本上佢哋係會派番去佢住嗰個地方嘅附近嘅。  
28 所以正正就咁樣，你睇得到所以好多同事，74 個 per cent 嘅特別更嘅車長，  
29 其實佢哋根本就係 walking distance，可以返屋企，有啲甚至乎住喺個巴士  
30 總站樓上嘅屋邨等等，所以佢哋其實就係好容易地就可以返到屋企。

31 MR DUNCAN：（經傳譯員）喺上次嘅聆訊嘅時候，即係第十四日，就係喺 112 頁，  
32 我哋知道車長一日可能會係揸三條路線嘅巴士嘅，你記唔記得？

33 彭樹雄先生：係，我記得係。

34 MR DUNCAN：（經傳譯員）即係如果係每日揸嘅路線係減少到兩條嘅話，即係喺財

1 政上會有咩嘢後果？

2 彭樹雄先生：我諗財務上，我唔覺得會係一個好大概分別，不過可能即係反而個車務  
3 運作上可能會有啲影響。因為其實我哋所謂呢啲 interlining，或者每日唔揸  
4 多過三條線，其實我想講就唔係淨係我哋個公司係會有呢一個做法。

5 其實我嘅理解，我哋香港所有啲專利巴士嘅 bus operator，其實都係  
6 有呢一種 interlining 嘅方法，甚至乎李生喺上一次嘅聽證會都講咗，我哋  
7 啱啱搵咗英國一間嘅顧問公司嚟睇我哋個巴士嘅運作，包括維修，包括個  
8 車務。其實我同啲 consultant 嘅接觸，overseas 嘅國家，即係外國，其  
9 實個 interlining，有啲甚至乎比我哋多過三條線添，即係佢哋都係一個幾  
10 普遍嘅一個做法嚟嘅。

11 咁所以答番你嘅問題，Mr Duncan，financially 我諗個差別唔會太  
12 大，但係可能個運作上，因為你要明白每一日個客量，又或者我上一次都  
13 講咗，可能有啲同事擺病假、擺咗假，可能即係個調配上，個彈性，如果  
14 我哋容許佢唔多過三條線，其實個運作上會暢順啲。同埋我都強調，佢哋每  
15 一條線，佢一定要有個路線訓練嘅，冇路線訓練，我哋絕對唔會派車佢揸個  
16 條線嘅。

17 MR DUNCAN：（經傳譯員）即係車長同埋其他嘅工會有冇向你投訴過要揸三條線係  
18 太多？

19 彭樹雄先生：我大部分我認知嘅，其實我冇聽到啲好大概聲音，當然可能個別有啲--  
20 即係可能個日佢要揸兩條線，佢可能會有啲聲音，但係整體嚟講，我覺得係  
21 okay。同埋佢哋亦都明白到個運作上，唔揸多三條線，其實係有個咁嘅需  
22 要，同埋即係基本上呢個都係一個幾普遍嘅一個運作嘅做法嘅。

23 MR DUNCAN：（經傳譯員）我哋聽到即係如果一個車長係要揸一條新嘅路線嘅時候  
24 會發生咩嘢事，如果一個車長需要揸一條新嘅路線，會唔會有另外一位車長喺車  
25 上面協助佢？

26 彭樹雄先生：所有車長，佢所有揸嘅路線一定要有個路線訓練嘅。如果佢要係揸一  
27 條新嘅線，佢一定要經過駕駛訓練學校，即係我哋 KMB 駕駛訓練學校裏面嘅路  
28 線訓練，先至會揸個一條線嘅。

29 李澤昌先生：我諗呢個問題有兩個，第一個就係如果啱啱出嚟，喺我哋嘅駕駛學院出  
30 嚟，佢初初接觸個盤軟嘅時間，佢側邊會有一個人陪住佢一段時間嘅。另外你講  
31 個，就話如果佢係一個有經驗嘅車長，然後再學一個新線嘅話，個新線係一  
32 定要經過個駕駛學院教佢，咁係咁樣。

33 MR DUNCAN：（經傳譯員）當佢第一次揸呢條新線嘅時候，係咪有另外一位嘅車長  
34 喺車上面協助佢？

35 彭樹雄先生：Yes, buddy driver.

1 MR DUNCAN：（經傳譯員）即係夥伴車長，係咪呀？

2 蘇偉基先生：睇睇嗰個車長佢入職幾耐，如果佢係一個好資深嘅車長，佢再學咗一條  
3 新嘅路線，其實呢啲路線對佢嚟講唔係算新嘅，咁就佢就可以駕馭得到。但係如  
4 果一個新嘅車長，我哋俾佢出去學 until 一段短時間，我哋係有一啲 buddy  
5 driver，一啲資深嘅車長，就俾佢嗰個駕駛艙側近嗰度，畀到佢一啲信心，同  
6 埋有啲需要，有啲支援佢嘅。

7 MR DUNCAN：（經傳譯員）梁博士就提到，即係引入一個二十個增薪點嘅制度去代  
8 替現有嘅八點增薪點嘅。你可唔可以話畀委員會知道，即係呢一個建議幾時會實  
9 行？

10 蘇偉基先生：喺 9 月 1 號開始實行。

11 MR DUNCAN：（經傳譯員）即係已經係實施咗，係咪呀？

12 彭樹雄先生：係。

13 梁乃鵬博士：（經傳譯員）鄧大律師，由 9 月 1 號開始，如果即係有新車長加入九巴  
14 或者龍運，佢嘅薪金就會係月薪--即係佢每個月大概係會賺 2 萬 3000 蚊，係包  
15 括年中嘅雙糧嘅，所以比起之前嘅薪酬係大幅上升嘅。

16 MR DUNCAN：（經傳譯員）唔該晒。

17 主席：（經傳譯員）你喺最新呈交嘅文件都係有分享過呢個資訊嘅，係咪？

18 梁乃鵬博士：我哋好樂意係向委員會係呈交一個比較圖，即係喺 9 月 1 號之前嘅薪酬  
19 同埋 9 月 1 號之後嘅薪酬嘅，我哋可以比較一個每日嘅薪酬，或者日薪車長同  
20 埋月薪車長嘅薪酬。

21 蘇偉基先生：我哋會儘快提供番。

22 主席：（經傳譯員）唔該晒。

23 MR DUNCAN：（經傳譯員）有冇發生過呢，即係車長喺執行職務嘅時候就病咗，會  
24 唔會發生？

25 蘇偉基先生：會有機會㗎。

26 MR DUNCAN：（經傳譯員）公司有冇任何嘅程序或者指引，即係如果發生呢個情況  
27 嘅時候會點做？

28 蘇偉基先生：首先喺招聘車長嗰陣時，我哋嗰個招聘書提醒，如果車長係身體不適嗰  
29 陣時係應該申請告假。我哋亦都喺每個廠嗰度係有自己嘅 clinic 係可以畀佢睇  
30 醫生，亦都喺派更嗰陣時，佢喺嗰個站頭拍卡，亦都會係提醒佢，「你係要當日  
31 嗰個身體良好，你先至可以揸車。」佢就可以係申請病假。

1 MR DUNCAN：（經傳譯員）如果即係車長揸緊某條路線嘅時候病咗，有啲咩嘢嘅程  
2 序或者政策係會執行？

3 彭樹雄先生：如果有車長喺駕駛途中，佢感到唔舒服，其實車長會知道--佢係可以  
4 點，佢停低架車，然後畀電話我哋當值嘅 inspector。因為我哋有啲督察，佢  
5 哋係會做個所謂巡邏嘅，佢哋會揸車巡邏嘅。佢哋只要擺低架車，然後我哋督  
6 察就會安排另外一架車，就等啲客過咗另外一架車，然後我哋會車個車長去睇  
7 醫生，呢個係一向都係咁樣做緊嘅。

8 MR DUNCAN：（經傳譯員）KMB-12 文件冊，5063 頁嘅。呢個就係你喺上次嘅聆訊  
9 之後向委員會提供嘅文件，呢度就係描述咗新車長接受嘅訓練，就係 5063 頁。  
10 另外就係現有車長嘅訓練，就係喺 5064 頁。

11 公司就住駕駛疲勞，有冇提供任何嘅訓練？我所謂講話即係點樣處理疲  
12 勞，我或者解釋下。我哋指即係佢哋點樣辨識，即係知道係有疲勞--唔係，知  
13 道點樣防止，或者點樣休息，所謂嘅管理疲勞狀況，有冇呢啲咁樣嘅訓練？即  
14 係你哋車長訓練有冇呢？

15 黃祥明先生：我相信頭先蘇生講咗喇，啲車長入職嘅時候，我哋都會提醒佢哋，如果  
16 係有唔舒服，就需要睇醫生，直情唔好繼續揸車。Mr Duncan，你剛才講嘅  
17 fatigue，我哋當佢係一種唔舒服嘅時候，佢都應該係跟番我哋呢個守則去做。

18 蘇偉基先生：基於一個疲倦嘅管理嘅度，有幾方面公司係做咗東西。第一，就當然運  
19 輸署佢有個指引，對於車長個個工時。咁符合呢個指引，就起碼都有一個足夠嘅  
20 休息。第二，就係喺車長個個安全手冊嘅度，亦都有個章節係提醒佢哋作為一個  
21 專業車長，佢係要管理佢自己嘅健康。當佢發覺係身體不適個陣時，佢係應該唔  
22 好去做個更次，更加通知公司去停止。呢點，我哋係有提佢。

23 再者就係話，頭先我哋講咗好多站頭嘅設施。我哋都希望佢而家就係話每  
24 六個小時，就會有個 coffee break。每一個車與車之間，亦都頭先講咗有個  
25 叫 layover 嘅 break，等佢有個 water break 或者有個 toilet break，  
26 等佢可以斟一斟，去管理番佢自己個嘅身體同埋疲倦。

27 MR DUNCAN：（經傳譯員）根據呢個回覆，我理解啱唔啱呢，即係冇話特別提過話  
28 管理疲勞嘅，即係呢啲一般性嘅訓練內容，就唔係特別提過疲勞管理嘅，啱唔  
29 啱？

30 李澤昌先生：冇。

31 MR DUNCAN：（經傳譯員）上次聽證嘅時候，聽咗好多人講，今年六月初公司第一  
32 次從個運輸署知道係有個電子數碼嘅地圖，香港有咁嘅地圖。記唔記得上次聽證  
33 係曾經提過？

34 梁健宏先生：係。

1 MR DUNCAN：（經傳譯員）公司已經係咪開始運用咗呢個電子數碼嘅地圖？

2 梁健宏先生：我哋同黑盒製造商喺呢一方面係做緊工夫，係希望可以用到嗰張 map，  
3 亦都係做緊嘅。

4 MR DUNCAN：（經傳譯員）你預期幾時真係可以運用到呢個電子數碼嘅地圖？

5 李澤昌先生：我哋雙線做緊嘅，我哋同 ZF 之前同你哋 嘅 committee 都傾過，就係  
6 佢有兩個系統，一個就用 digital map，另外一個就係用即係人手咁樣放一啲  
7 資料入去。佢哋 兩樣嘢都一齊做緊嘅，我哋期望就希望下年嘅 1 月左右，應該  
8 就可以將呢一套系統可以嘗試喺即時喺嗰架車個 dashboard 嗰度可以睇到佢個  
9 個超速同實際上路面個速度，就反映番喺嗰個顯示屏嗰度。我哋 期望係下年嘅 1  
10 月。

11 MR DUNCAN：（經傳譯員）第十三日我哋聽證嘅時候，呢個係關於記錄嘅，31 頁第  
12 十二行，當時上一個月，8 月，嗰陣時都要四日先至可以編制到嗰個超速嘅報  
13 告。

14 跟住回答羅教授嘅問題，佢話司機就用佢個證件嚟到拍卡，跟住就你就  
15 唔使等四日，呢個就可以即刻知道嘅。而家個情況係點，而家仲使唔使等四  
16 日，定係可以即刻知道？

17 梁健宏先生：而家都仲係四日嘅，但係循住嗰個方向，我哋係努力緊，希望縮短個日  
18 子。

19 MR DUNCAN：（經傳譯員）幾時你能夠答到嗰個方向嘅目標？

20 梁健宏先生：我希望可以儘快。

21 MR DUNCAN：（經傳譯員）咁係咩嘢意思？

22 李澤昌先生：其實頭先講緊嗰個黑盒同埋嗰個 digital map，呢樣嘢係幫到點解由  
23 十日變四日。因為十日變四日，因為佢個 black box 個 information，我哋  
24 自己嗰啲資料嵌埋一齊，就由十日變咗四日。而嗰個黑盒，即係個 ZF 嗰個東  
25 西，再加埋 digital map 係可以成功做到嘅話，相信呢四日嘅時間一定會縮  
26 短，但係縮短幾多，可能係一至兩日，我哋唔知。但係如果你咁樣睇，我哋應該  
27 嚟緊下年嘅一月，嗰個 real time 同埋嗰個縮短嘅時間係同一時發生嘅。

28 MR DUNCAN：（經傳譯員）我就有其他嘅問題，唔知委員會嘅成員有冇嘢想問？

29 歐陽先生：（經傳譯員）多謝你，主席。我哋用咗今日好多時間，就講緊點樣能夠改  
30 善車長嘅工作環境。你可唔可以描述一下你請司機嘅成功率，譬如上個月同六個  
31 月之前比較，係咪容易咗，就成功率係高咗？

32 蘇偉基先生：唔該委員。而家嘅情況，我哋大約每個禮拜係請到有二十五至三十個嘅  
33 新嘅車長，比對我諗半年前，三個月都係短嘅時間，當時係請緊十至十五個嘅。

1 呢個當然係市場供應一個考慮，我哋自己公司喺期間亦都做咗幾樣嘢。

2 第一樣嘢就係嗰個薪酬嗰樣，正如頭先主席講，我哋係喺今年 3 月一次嘅  
3 優化，跟住喺啱啱 8 月嗰陣時，亦都係做咗今年嘅加薪，接近其實全年都有十  
4 五個 per cent 嘅增幅。呢個人工高咗，就多啲人吸引咗。

5 第二就係嗰啲嘅 condition，頭先我哋講即係多啲嘅休息設施，...（說  
6 話含糊）

7 第三就係我哋喺招聘嗰度，亦都係即係加大力度，我哋做多咗一啲招聘  
8 日、開放日，我哋更加係--英文用“reaching out”，主動去接觸我哋嘅群  
9 眾，即係一啲 target 嘅 driver，就從而去追番個車長嘅短缺。

10 李澤昌先生：仲有一點想補充嘅，就係請人嗰個類別，同埋每一個區，因為你知道我  
11 哋有四個唔同嘅廠。每一個區，佢嗰個人嗰個類型係好唔同嘅，譬如喺屯門區同  
12 喺荔枝角廠區，或者九龍灣區係好唔同。

13 我哋可能會用一個對症下藥嘅方法，譬如屯門區，佢會係多啲比較女性，  
14 佢有一啲時間可能未必足夠做到八或者十個鐘頭每日，可能做到嘅時間係一  
15 半，但係最低限度可以知道佢邊個時間好穩定去返工，邊個時間好肯定係會放  
16 工，呢度呢，我哋朝住呢啲方向去做啲工夫。你可能會喺個站嗰個 depot 裏面  
17 做啲設施，呢個我哋都係同緊政府係傾緊可唔可以做一啲托兒嘅服務之類，係  
18 令到佢可以--即係做完嗰幾個鐘頭，可以湊番啲細路仔。

19 咁有啲地方，譬如有某一啲工種佢係退休嘅時候，就係五十零歲頭，佢未  
20 必係想工作一段好長嘅時候，佢同樣地，佢希望有份工作，佢可能又有車牌  
21 嘅。我哋都向呢個方向做緊，即係變咗而家去招聘，唔只與時並進，係同個地  
22 區性都要扣上關係。因為我哋涉及嗰個區域比較大，譬如你甚至乎去到大嶼  
23 山、東涌都有，咁變咗即係嗰個類型係要有啲新嘅環...（說話含糊）

24 歐陽先生：（經傳譯員）呢個同鄧大律師頭先問嘅有關嘅，就係嗰個總站嘅設計。我  
25 得到嘅印象，你嘅回覆，我得到嘅印象，即係話你有機會係要求有個廁所嘅，你  
26 哋係有辦法，定係--如果唔係咁做，嗰啲路線就唔提供到？

27 彭樹雄先生：我諗答呢條問題，其實我諗要好搞清楚，就係其實唔係每一個巴士站都  
28 係會喺個設計上有個洗手間，或者有站長室。其實有好多站，佢係 factor in  
29 咗呢一樣嘢，但係只不過就係話 somehow 喺某啲嘅站嘅設施裏面，呢一樣嘢就  
30 有包含咗落去。

31 李澤昌先生：我諗歐陽先生嘅意思係話，即係佢設計新站嘅時候，我哋個角色喺邊  
32 度。我可以講畀你聽，佢設計新站，佢通常係先過係批咗條線畀邊個做，所以佢  
33 通常佢係設計完個站，如果假設呢個新嘅巴士站，佢然後先至再決定畀邊一間公  
34 司入去行呢條線。舉個為例，港珠澳大橋，佢會有一個巴士站喺嗰度。呢個巴士  
35 站佢做嘅設計已經講緊好多年前嘅事嚟嘅，但係佢開條標畀邊一間公司入嚟行呢

1 條線係之後嘅事嚟嘅，所以前後嘅問題，佢都唔知搵邊間公司入去同佢傾個巴士  
2 站嘅設計。如果你叫我入去同佢傾個巴士設計嘅時候，我就問「你條路線係咪畀  
3 我行先？」咁，即係變咗有個前後嘅問題。所以佢有少少係佢做咗個硬件，然後  
4 佢先至落標係搵一個 operator 入嚟做嗰條線。咁所以呢度有少少好似你話，  
5 我哋個角色未必喺佢設計時間，佢搵得我哋入去，因為我都未必知道我有機會行  
6 呢條巴士線。

7 歐陽先生：（經傳譯員）即係話你有辦法之後要求佢啲額外設施嘅？

8 李澤昌先生：喺港珠澳大橋，我哋嘗試做咗嘅，但係好多嘢已經係--即係個硬件已經  
9 喺度，咁變咗係有啲困難。

10 歐陽先生：（經傳譯員）唔該晒。

11 主席：（經傳譯員）你提供咗畀委員會唔同嘅會議嘅會議記錄，即係工作小組 3 月-  
12 -同埋啲訓練、使用科技嗰個記錄係有部分遮蓋咗嘅。响回應嗰個議程，你就有  
13 另一個你嘅所謂購物清單，KMB-12，4939 頁。即係話 3 月 13 號就寄咗個議程  
14 出去，呢度即刻有個回應，你就利用呢個機會，就寫低或者你哋遇到嘅困難，希  
15 望討論嘅。因為呢個有個機會畀你哋可以討論，啱唔啱？

16 蘇偉基先生：Yes.

17 李澤昌先生：Yes.

18 主席：（經傳譯員）你要求佢哋睇嘅，就係非法泊車，响巴士站非法上落客貨嘅活  
19 動，交通阻塞，呢個比較闊嘅問題。比較具體就係襲擊你哋嗰啲車長，同埋交通  
20 黑點。其中呢兩件事，我哋從唔同各個團體收過啲證供，巴士站非法泊車同埋襲  
21 擊車長嘅問題。

22 運輸署嘅回應，4941 頁嘅一封信，2018 年 3 月 26 號嘅一封信，你見到  
23 第 2 段咁講嘅，佢就係講緊嗰個工作小組嘅時間有限，同埋要將嗰個報告要三  
24 個月內交，同埋有埋嗰個結果，同埋建議。至於話你嗰四個課題，我哋會响個  
25 工作小組以外另行處理。

26 我所以問你嘅問題，就係而家都五個月嘞，呢個問題，巴士站非法泊車、  
27 襲擊嗰個巴士車長，有冇處理過？

28 蘇偉基先生：呢個我可以答一答先，佢頭先講咗三個月，佢就當時個 working  
29 group 喺運輸署嘅領導下，focus 就係一啲 bus 嘅 safety belt，同埋一個  
30 bus driver 嘅 training。喺完結咗呢兩個 priority 嘅 agenda，我再去  
31 信去運輸署，你會見到喺第 4945 頁嗰度係再次重提呢四件事。

32 喺第一點，illegal parking。其實正如早幾時嘅會議，彭生都有講，  
33 公司都主動地係同警方做一啲嘢，希望喺度做到啲工夫。

34 第二樣，traffic congestion，我諗大家都理解，真係可以做到嘅嘢真

1 係不多嘅。

2 第三樣嘢就係話呢個騷擾車長，我得悉運輸署佢係做緊一個運動，就幾間  
3 公交公司，包括埋巴士公司、鐵路公司，就係宣傳一個叫做乘客禮貌嘅運  
4 動，就係開咗兩次嘅會議，我都有啲進展嘅。

5 第四樣，就係 traffic black spots，咁了解到公司其實三千幾車，任  
6 何時間喺個路面嗰度，其實我哋係好熟習個路面嘅，有啲路可能佢個  
7 levelling 唔平，會影響交通意外。或者劃線，會影響交通意外。我哋呢啲其  
8 實係久不久就會去信畀運輸署，佢有一個叫做 regional office，運輸署除  
9 咗監管我哋之外，個 regional office 仲係睇埋嗰個道路嘅 design 同埋安  
10 全。我哋會同佢反映呢啲我哋嘅車長會反映畀我哋聽，我哋前線嘅員工反映畀  
11 我哋聽，就會講畀佢聽。

12 因為佢封信同我哋講，就係話喺呢個 working group 以外處理，所以我  
13 都有去信咗運輸署，詳列咗我哋曾經係接近三百個呢啲咁嘅個案去畀佢研究。

14 主席：（經傳譯員）有冇咩嘢實際上係處理到——即係嗰五個月，處理到巴士站非法泊  
15 車？可唔可以就咁答話有處理到，定係冇？

16 彭樹雄先生：我簡單答你就係 no，即係有一個好大嘅進展。

17 主席：（經傳譯員）有冇任何進展，即係佢哋話滋擾、襲擊車長嗰啲，有冇咩嘢處理  
18 到？

19 彭樹雄先生：喺上一次嘅聽證會之後，其實警方亦都主動再聯絡咗我哋，我哋亦都係  
20 提交咗過去嗰啲我哋車長被襲擊嗰啲案件，嗰個詳細資料亦都係已經畀咗蒼方。  
21 例如我喺上一次嘅聽證會講，我哋有架車喺又一邨就畀四個男子係兩次掀熄我哋  
22 嗰個 emergency button，其實聽證會之後，警方亦都主動聯絡咗我哋，亦都  
23 係同我哋個車長接觸咗嘅。

24 主席：（經傳譯員）呢個進展就係咁多，係咪呀？

25 彭樹雄先生：我諗有啲嘢係譬如話違例泊車、交通阻塞，即係好難話係喺咁短時間裏  
26 面有一個好大嘅成效。例如正話蘇生講咗，我哋亦都知運輸署會做一個禮貌乘客  
27 運動，就希望可以教育啲乘客點樣可以大家互相尊重，我希望呢個長遠係真係幫  
28 到整個業界，幫到我哋嘅車長。

29 主席：（經傳譯員）另一件事我想你幫幫手嘅，我畀個例子你，如果係遮蓋咗嘅會議  
30 記錄，即係工作小組嘅。工作小組一路都係處理緊訓練，關於安全嘅技術嘅裝  
31 置，科技裝置，呢個都係我哋委員會需要關注嘅。我哋要睇嘅嗰個係規管巴士營  
32 運嘅制度，呢個係我哋嗰個職權範圍，即係特首畀我哋嘅職權範圍，呢個可以話  
33 係——我哋似乎大家同時都係睇緊差唔多嘅課題。

34 我想你睇番 4926 頁嘅，即係呢個作為一個例子嚟嘅。我哋唔係話好似喺

1 打仗嘅時候，就係要將啲重要消息或者點樣樣遮蓋咗，就避免敵人得知嗰個情  
2 報。呢度我想講，就係話呢度提及嘅，就係為所有嘅乘客座位安裝安全帶，  
3 4927 頁，半版紙都係塗黑咗，跟住嗰版又係有半版紙都塗黑咗。

4 我要問一個比較一般嘅廣泛嘅問題，就係話係根據乜嘢準則去將呢一啲部  
5 分係塗黑咗、遮蓋咗，究竟背後嘅邏輯係乜？

6 蘇偉基先生：呢個其實係牽涉到其他嘅巴士公司嘅發言，所以我哋就未有佢同意下，  
7 我哋就遮咗。

8 主席：（經傳譯員）即係話總之係人哋講嘅嘢，你就係塗黑咗佢，你哋自己講嘅說  
9 話，你就係唔介意話畀我哋聽，嗰個情況係咪咁？

10 蘇偉基先生：可以係咁講。

11 主席：（經傳譯員）所以你擺走咗嗰啲就係運輸署所講嘅嘢，或者係城巴、新巴...

12 蘇偉基先生：Transport Department 係冇乜尸，因為我有問過佢。

13 主席：（經傳譯員）即係主要係呢個城巴？

14 蘇偉基先生：Citybus 係刪去咗，喺我版本嗰度。

15 主席：（經傳譯員）你有冇問下城巴係咪可以將佢哋講嘅說話抹上去？

16 蘇偉基先生：我覺得運輸署做呢個角色恰當啲。

17 主席：（經傳譯員）你回應，就係你有問過城巴，係咪呀？即係冇問過佢哋，係咪你  
18 可以將佢哋所講嘅嘢都係包括在內？如果包括咗，就讓我哋嗰個會議記錄比較全  
19 面。

20 蘇偉基先生：我會後問佢，如果佢準許我，全 set 交畀委員會。

21 梁乃鵬博士：（經傳譯員）對唔住，其實主席先生，直接回答，我哋係冇問過城巴或  
22 者新巴。我哋冇問佢哋擺同意去將嗰個整份嘅會議記錄交畀你哋睇，對唔住。

23 主席：（經傳譯員）唔該你，梁博士。你而家就會去問下呢個新巴，如果新巴拒絕，  
24 話畀我哋聽，我哋咪自己直接問佢哋，因為咁樣都可以慳番墨水。

25 梁乃鵬博士：唔該。

26 主席：（經傳譯員）最後有一個問題係咁嘅，你哋有問我講過係有四個車廠，九巴有  
27 四個車廠，屯門、沙田、荔枝角同埋九龍灣。喺呢四個車廠嗰度，我想問有冇邊  
28 一個或者全部都係你哋九巴所擁有，或者你哋嘅附屬公司所擁有？

29 李澤昌先生：其實喺呢四個車廠裏面，九巴有沙田廠同埋屯門廠係 owned by 九  
30 巴，嗰陣時 auction site 買番嚟嘅。九龍灣廠係 under 一個 private  
31 treaty grant，基本上係畀咗地價係作為一個車廠嘅用途。荔枝角廠係一個

1 short-term tenancy 嘅 arrangement with 政府嘅。

2 主席：（經傳譯員）你講話短期，有幾短期？

3 李澤昌先生：基本上而家包括即係城巴、新巴同九巴都有好多嘅，就係政府係畀筭地  
4 方出嚟，係用一個短期租約，佢裏面其實係視乎你個年限幾長、幾短。荔枝角廠  
5 今日係每一年 automatically 續，要交租。

6 主席：（經傳譯員）就係每年都續期？

7 李澤昌先生：(Nodded head)

8 主席：（經傳譯員）唔該。鄧大律師，我哋問咗之後，你有冇嘢想跟進？

9 MR DUNCAN：（經傳譯員）如果得嘅話，我想跟進一下，係講一講女司機，係如果  
10 畀嘅話。

11 主席：（經傳譯員）好，你問。

12 MR DUNCAN：（經傳譯員）之前我哋都有講過係女車長呢件事，之前你哋亦都有進  
13 一步嘅資料畀我哋，就話點樣去招聘女車長。我想問下，喺女車長嘅數目嗰方  
14 面，或者申請人方面個數目，最近有冇大增？

15 李澤昌先生：而家嗰個女性嘅車長係已經微微超過五個 per cent，當然係好視乎個  
16 地區性。當然即係喺香港，其實男同女嗰個比例，其實基本上係差唔多一半、一  
17 半，我覺得呢個係一個好大嘅空間，所以頭先同歐陽先生講，我哋好想用屯門係  
18 一個例子，希望喺嗰個屯門嘅廠裏面可以做啲工夫，亦都 Mr Chairman 之前都  
19 有講過，喺瑞典，我都留意過係有好多歐洲嘅地方都做緊一啲呢啲咁嘅提供  
20 nurseries 嘅東西，係令到有啲女性嘅車長可以騰空一啲時間，未必係一個全  
21 職，但係都有個穩定性嘅時候係一定幫到車長短缺嗰個情況。

22 MR DUNCAN：（經傳譯員）有冇成果，你哋呢方面嘅努力有冇成果？

23 李澤昌先生：有嘅，因為我自己個人覺得女性車長可能希望喺嗰個穩定性，同埋對客  
24 方面，呢個都係公司嚟緊一個方向嚟，我對呢個係寄於厚望。當然係要政府批咗  
25 我哋嗰個廠可以做呢個 nurseries 嘅工作先。

26 MR DUNCAN：（經傳譯員）我諗我問嘅問題比較具體嘅，有冇增加到嗰個申請者嘅  
27 數目，即係女性嚟申請？

28 李澤昌先生：平穩，冇特別向上，冇特別向上。

29 MR DUNCAN：（經傳譯員）唔該。

30 李澤昌先生：但係好多人問過我。

31 MR DUNCAN：（經傳譯員）好，唔該晒。唔該晒你，主席。

1 主席：（經傳譯員）李先生，我明白你係想作一個總結嘅發言，喺作證完畢之後，係  
2 咪呀，定抑或係梁博士會講？

3 梁乃鵬博士：（經傳譯員）係，主席先生，主席同埋委員，我係想講㗎。我哋非常感  
4 謝你哋畀時間我哋係作證，正如我一開頭嘅時候所講，我哋嚟到你哋嘅席前，我  
5 哋以一個謙虛嘅心同埋一個開放嘅態度，我哋係歡迎你哋所提出嘅建議，如果能  
6 夠係加強乘客嘅安全。今次呢個經驗，對我哋嚟講係非常有啟發，特別係對我哋  
7 嘅管理階層，所以我就會請我哋嘅董事總經理，李澤昌先生就係發言，係總結我  
8 哋今日到嚟嘅作證。

9 主席：（經傳譯員）好，唔該你，李先生。

10 李澤昌先生：首先喺度即係多謝大家，我哋好深深明白到，其實睇到呢段時間，真係  
11 香港嘅市民對呢個巴士嘅服務同安全係一個好大、好大嘅期望。亦都雖然你睇  
12 到，喺營運方面係有好多、好多嘅挑戰，例如請車長、路面嘅擠塞，呢個社會有  
13 好多啲情況發生喺譬如打車長等等嘅嘢，係一個非常大挑戰。我哋都覺得我哋一  
14 定係做好我自己嘅工作，係繼續提高、提升我哋嘅服務，特別喺安全方面，我好  
15 肯定我哋呢班同事係一定唔會放棄，做得差。

16 今年 2 月呢個交通意外，大埔公路呢個交通意外，其實對我哋公司上上下下  
17 嘅員工個個打擊係非常之大，即係甚至乎可以講，唔可以用說話去形容。我  
18 哋絕對覺得——即係我個人由嗰日開始到而家，都對呢件事都有辦法可以忘記呢  
19 個日子。我哋絕對係唔會容許，亦都唔會畀呢個意外係會再發生。因為一次已  
20 經其實係太過足夠。我哋喺呢個意外之後，我哋真係好承認到自己有好多地方  
21 係做得唔足夠，我哋係未停過係喺呢方面改善。

22 喺呢個聽證會裏面，呢件過程，我哋已經深深感覺到九巴一定要與時並  
23 進，要喺呢方面做多啲工夫去提升我哋嘅服務。例如喺我哋個科技方面係要做  
24 得全面，同埋係真係喺個準確性，同埋個個安全嘅系統係要真係與時並進，做  
25 得要更加好。

26 至於喺車長方面，我哋喺個 management 控制，喺個管理同埋喺個培  
27 訓方面係要做得更加要好，喺佢個設施，喺頭先講咗休息室同埋佢啲啲洗手  
28 間嘅服務，其實我哋係未停過。

29 九巴其實喺香港已經服務咗超過八十五年嘅一間巴士公司，根本上我哋係  
30 絕對係應該要盡心盡力繼續服務呢個社會。如果我哋嘅員工、我哋嘅乘客要嘅  
31 嘢，我哋一定會盡力去做好佢。不過呢度有一點要提及，其實九巴好難係一間  
32 公司單方面可以做到，我好希望唔可以缺少各界同埋政府嘅部門嘅支持同配  
33 合，先至令到呢啲方面可以有效咁樣去提升個服務。

34 最後我哋成個團體好感激呢個委員會過去呢段日子，同埋佢未來嘅工作。  
35 正如我哋九巴嘅主席喺聽證會之前講過，我哋九巴嘅團隊一定以一個謙虛、誠  
36 懇，同埋一個開放嘅態度接受唔同嘅意見，同埋建議，多謝大家。

1 主席：（經傳譯員）梁博士、李先生，同埋各位先生，感謝你哋係出席咗四日嘅聆訊  
2 係提供證供協助我哋，我哋亦都感謝你哋。今日嘅聆訊到此為止，我哋喺星期六  
3 就會聽其他嘅證供，希望唔受颱風影響。今日多謝你哋出席。

(10.01 am)

EXPERT EVIDENCE OF PROF JOHN STANLEY

CHAIRMAN: Good morning, Prof Stanley, and welcome to Hong Kong.

PROF JOHN STANLEY: Thank you, Chairman.

CHAIRMAN: Thank you for assistance you have already given this committee with the two reports that you provided us with, and thank you for agreeing to come and give us oral evidence so that we can explore the ambit of your report, in particular, of course, its relevance to Hong Kong, with questions which are going to be posed to you, at least in the first place, by counsel Mr Derek Chan, and I ask him to begin that questioning.

Mr Chan.

Examination by MR DEREK CHAN

MR DEREK CHAN: Thank you, Mr Chairman.

Good morning, Mr Stanley. Can I start by asking you a few matters by way of background and start by asking questions about your own background by going firstly to your curriculum vitae which is at page 107 of our expert bundle.

CHAIRMAN: Yes.

MR DEREK CHAN: We see in your CV that you started your career in 1969, and in 1980 to 1999 you were the

1 principal of John Stanley & Associates Pte Ltd.

2 PROF JOHN STANLEY: (Nodded head).

3 MR DEREK CHAN: Can you tell us a bit about the work that  
4 your company did during that period?

5 PROF JOHN STANLEY: Yes, Mr Chan. We did a lot of  
6 consulting/advisory work in particular to governments at  
7 the federal level in Australia, but also at the state  
8 level, in particular in the transport space, for example  
9 the National Road strategy, the Victorian government's  
10 contribution to projects like that. We have undertaken  
11 reviews of ports in Tazmania for the Tazmanian  
12 government, work also for a range of local authorities,  
13 local councils, about their road systems, not too much  
14 work to that point about public transport. Until about  
15 the early 1990s, I was primarily in the road space in  
16 terms of transport. So I worked for the federal  
17 government earlier on in that road area and did a lot of  
18 consulting work around road economics in particular.

19 MR DEREK CHAN: And in 1991 to 1999, you were the deputy  
20 chairman of the National Road Transport Commission, and  
21 in 1999 to 2008, you were the executive director of the  
22 Bus Association Victoria.

23 Can you tell us a bit about what you did there?

24 PROF JOHN STANLEY: Yes. The National Road Transport  
25 Commission was set up in 1991 as one of the primary  
26

1 initiatives in the microeconomic reform in programme in  
2 Australia to try and improve the productivity, safety  
3 and environmental performance of road transport in  
4 Australia. Those responsibilities are in fact state  
5 government responsibilities, so that the states got  
6 together with the federal government to set up this  
7 commission to propose nationally consistent laws for  
8 everything essentially that happened on top of the road  
9 system. So that was things like mass limits, it was  
10 things like driving hour regulations and loading  
11 regulations and law as well. Fatigue was an important  
12 part of that, fatigue management.

13 Then the Bus Association, I had several roles there.  
14 I was obviously, in a formal sense, to represent my  
15 members, of whom there were 500, who held together at  
16 that time contracts with the state government to a worth  
17 of around about A\$900 million a year. So I was the  
18 primary person responsible for negotiating their  
19 contracts with the state government.

20 As part of that process -- and this is a point  
21 I made in the submissions -- the bus industry receives  
22 considerable subsidy from the state government in  
23 Victoria, so a lot of the work I did as executive  
24 director was on trying to identify the value of public  
25 transport in general, but buses in particular, to the  
26

1 Victorian community. So that involved work, for  
2 example, on trying to look at the role that buses play  
3 in social inclusion, and in fact I work very closely  
4 with my wife, Prof Janet Stanley, who is here today  
5 also, in that area; congestion reduction, the roles that  
6 buses can play there; the roles that buses can play in  
7 terms of improved environmental outcomes. These are  
8 really important positions to develop, in the policy  
9 sense, when you are going to government, looking for so  
10 much support.

11 We also had a range of businesses that we did in the  
12 association, and for example one of those businesses  
13 operated at arm's length is Road Safety Inspections,  
14 which is the largest bus tester in Victoria, bus testing  
15 since about the 1980s has in fact been a privatised  
16 industry in Victoria. The association actually took  
17 over the state government's previous vehicle inspection  
18 and testing business, and so we were the biggest bus  
19 tester and, in fact, remain so today.

20 CHAIRMAN: Who are the members of the bus association?

21 PROF JOHN STANLEY: Yes, they are essentially operators,  
22 Chairman, so they are route bus operators in Melbourne  
23 and regional Victoria, as they are school bus operators.  
24 In fact, the largest number of them, primarily because  
25 they tend to have only a small number of vehicles each,

26

1 are school bus operators, but they are also charter and  
2 tour operators. So we cover the whole range of those  
3 market areas. The largest contract values are far and  
4 away, though, in the route service area.

5 CHAIRMAN: How many such members are there?

6 PROF JOHN STANLEY: There were at the time over 500. The  
7 number has come down a bit since I left them, because  
8 there's a fair bit of consolidation going on among some  
9 of the businesses.

10 CHAIRMAN: Can you give us an idea of the size of the staff  
11 of the association?

12 PROF JOHN STANLEY: The staff -- the association had 50  
13 staff when I finished my time, and that included, for  
14 example, about 10 or 12 staff in the vehicle inspection  
15 company. We had a range of people employed at the time  
16 also as ticket inspectors, so we had our own ticket  
17 inspectors; the state government provided us money to  
18 employ ticket inspectors to work on buses. We had  
19 a little marketing group as well and a group who looked  
20 after member servicing, so they spent a lot of time  
21 talking to members and looking at contract issues they  
22 may have had with the government or with the Public  
23 Transport Victoria, which is the government's  
24 responsible organisation for programme delivery.

25 CHAIRMAN: And who in Victoria are the beneficiaries of the  
26

1 fares received by the bus companies?

2 PROF JOHN STANLEY: The fares are collected by government,  
3 go to government.

4 CHAIRMAN: So this was ticket inspection on behalf of  
5 government as the recipient of the revenue?

6 PROF JOHN STANLEY: Yes.

7 CHAIRMAN: Thank you.

8 MR DEREK CHAN: Professor, you mentioned, during your role  
9 in the National Road Transport Commission, you were  
10 involved in driving hour regulations.

11 Did those driving hour regulations relate to heavy  
12 vehicles?

13 PROF JOHN STANLEY: They did. The ambit of responsibility  
14 of the National Road Transport Commission was vehicles  
15 of 4.5 tonnes and above, so it was essentially heavy  
16 vehicles, and the freight side of the business, trucks  
17 if you like, was much more dominant than bus. So the  
18 truck agenda tended to dominate the work of the  
19 commission.

20 But in the process, the bus agenda got very much  
21 linked to it, and one of the major issues in Australia  
22 at that time was the distance between the major capital  
23 cities, Melbourne and Sydney, Sydney and Brisbane,  
24 required, if a truck was going to do it in one sitting,  
25 fairly long driving hours. So the issue of what is

26

1 an acceptable length of drive and what kind of rest  
2 provisions are needed for trucks became really important  
3 in that process. But buses got vacuumed up in it at the  
4 same time.

5 CHAIRMAN: Was this commission a federal commission?

6 PROF JOHN STANLEY: It was a national commission, so it was  
7 established under federal legislation, but, if you like,  
8 the people we were responsible reporting to were the  
9 federal minister and all the state ministers.

10 So, Chairman, in my eight years on that board, I had  
11 45 different ministers that I reported to.

12 CHAIRMAN: Thank you.

13 MR DEREK CHAN: Professor, in 2008 you became an adjunct  
14 professor and a Bus Industry Confederation senior  
15 research fellow in sustainable land transport, Institute  
16 of Transport and Logistic Studies, the University of  
17 Sydney.

18 Did that post involve touchings in public transport  
19 or bus-related topics?

20 PROF JOHN STANLEY: It involved -- I taught the final unit  
21 in the masters programme in transport management. The  
22 institute is one of the top-rated transport institutes  
23 in the world, and we run a number of master's  
24 programmes, and at that time I taught the final subject  
25 that everybody had to do, and then taught transport  
26

1 policy as well, and the transport policy involved a lot  
2 of bus policy work.

3 MR DEREK CHAN: And, in 2012 to 2016, you were a member of  
4 the Ministerial Advisory Council advising Victoria's  
5 planning ministers in two governments on long-term  
6 Melbourne metropolitan planning strategy. I assume that  
7 involved transport planning as well?

8 PROF JOHN STANLEY: Not as much as it should have. The main  
9 focus in that work was in fact on land use planning.  
10 The intention -- and in fact this is mentioned also in  
11 the first report I did -- we had a 2010 Transport  
12 Integration Act in Victoria that requires government to  
13 produce an integrated land use transport plan. Six of  
14 us were appointed by the planning minister to form  
15 a ministerial advisory council and advise him on what  
16 Victoria's long-term land use plan should be, and that  
17 included some work on transport strategy. I have to say  
18 I tried to write a transport strategy in that, but it  
19 was taken out three times, so for some reason the  
20 government did not want to include a transport strategy  
21 within the long-term land use planning strategy. There  
22 was a change in government in the middle of that period,  
23 and the new government appointed us again to continue  
24 doing our work.

25 MR DEREK CHAN: You list out a number of directorships at  
26

1 the bottom of page 107.

2 PROF JOHN STANLEY: Yes.

3 MR DEREK CHAN: Can you please tell us which one of these  
4 directorships are relevant to transport or bus policies?

5 PROF JOHN STANLEY: Yes. The work -- when I was  
6 Commissioner of the Victorian State Services Authority,  
7 the government of Victoria gave me that appointment to  
8 look at the governance arrangements in land transport  
9 between roads and public transport. So I produced  
10 a report for the government, recommending new governance  
11 arrangements between public transport and the road  
12 authority at that time.

13 Metlink was the public transport marketing body for  
14 Victoria's tram, train and bus systems, at the time that  
15 I was in that role there. So we produced system-level  
16 marketing campaigns to promote, if you like, the brand  
17 of public transport, and the individual operators did  
18 their own campaigns as well.

19 At that same time, I was on the board of the public  
20 transport ombudsman representing bus, where complaints  
21 from dissatisfied customers, if they are not adequately  
22 dealt with by the operators, get sent to the ombudsman.  
23 So there was a role there as well. And --

24 MR DEREK CHAN: Excuse me, how long were you in that role as  
25 public transport ombudsman?

26

1 PROF JOHN STANLEY: I'm guessing a bit, but I think about  
2 four years.

3 MR DEREK CHAN: Between which years, approximately?

4 PROF JOHN STANLEY: Between about 2000 -- sorry, 2008 it  
5 would have finished, so 2004 to 2008.

6 MR DEREK CHAN: Sorry, I interrupted you; please continue.

7 PROF JOHN STANLEY: That's okay. I'm currently on the board  
8 of Road Safety Inspections, which as I indicated earlier  
9 is a bus testing company which is run at arm's length  
10 from the Bus Association to conduct the annual  
11 inspection that all heavy vehicles, or buses in  
12 particular, have to go through. We do about 5,000 of  
13 those inspections a year, which is around about  
14 75 per cent of the relevant bus fleet in Australia.

15 CHAIRMAN: Is that in respect of the mechanical side of  
16 buses?

17 PROF JOHN STANLEY: It is, Chairman.

18 MR DEREK CHAN: How long have you been a board member of  
19 that company?

20 PROF JOHN STANLEY: That would be about seven years.

21 MR DEREK CHAN: Seven years counting from today, counting  
22 back from today?

23 PROF JOHN STANLEY: Yes.

24 MR DEREK CHAN: Just going to page 108, where you list out  
25 across several pages a number of reports, articles,  
26

1 journals, books or book chapters, in which you have  
2 written or contributed towards. I don't intend to go  
3 through all of them, because there are quite a few, but  
4 can you perhaps point out a few as examples that relate  
5 to bus policies?

6 PROF JOHN STANLEY: Sure. If you look -- there are mainly  
7 two or three particular topic areas. The first one is  
8 a number of papers there are around, for example, the  
9 value of public transport. So the book that Prof Janet  
10 Stanley and I wrote with Prof Hanson came out about  
11 a year or two ago, which is called "How Great Cities  
12 Happen", which is "2017 books", that includes quite  
13 a lot in it about public transport and the role that  
14 public transport can play.

15 The issue of -- the next paper that appears under  
16 that, "Getting the Prices Right", which is here, also  
17 includes work on public transport policy.

18 If you scroll down further, you will see reports for  
19 2017, "Moving People: Solutions for Policy Thinkers --  
20 Improved public transport services supporting city  
21 productivity growth". We have done quite a lot of  
22 research on what role does public transport play in  
23 enabling a city to be productive. So there are a number  
24 of papers through here in that particular topic.

25 The journal articles: 2016, Stanley J and Levinson,  
26

1 "Workshop 3 report: Sustainable funding sources" -- this  
2 is a report of a workshop from a conference that was  
3 held about three years ago, a conference series called  
4 the Thredbo conference series which is held every second  
5 year internationally, and the main topic of that  
6 conference is competition and regulation in public  
7 transport. I'm a member of a group of about eight who  
8 chair workshops as part of that conference series. So  
9 that particular workshop, and in fact another one that  
10 I've just published an article that will be available in  
11 the next couple of weeks, looks at what are the benefits  
12 of public transport and how can you turn those benefits  
13 into monetary flows to help fund services. So there are  
14 quite a few services in that particular space.

15 Two underneath that, you will see, "Moving People:  
16 Solutions for Policy Thinkers -- National Guidelines:  
17 Bus services procurement and bus service contracts".  
18 That is a paper that explores in some depth the sorts of  
19 issues involved in deciding on bus contracting regimes.  
20 It talks about questions, for example, of competitive  
21 tendering versus negotiation, which one of the issues  
22 I referred to in the report. It looks at things like  
23 contract length, KPIs that you might see in contracts as  
24 well.

25 The next one, "Equity in Transport", focuses very  
26

1 much on the role that public transport plays in social  
2 inclusion in contributing to a fairer society.

3 If we continue going on down, the next one,  
4 "Reports", 2015, at the top of the page, "Moving People:  
5 Solutions for Policy Thinkers -- Connecting  
6 Neighbourhoods". One of the ideas that we came up in  
7 the land use strategy work for Melbourne was trying to  
8 shape the city in such a way that everybody could live  
9 within 20 minutes' access to most of the things you need  
10 for a good life by walking, cycling or public transport.  
11 We are a very car-dependent city. This was is about to  
12 try to reshape the land use in the city to enable public  
13 transport to play a bigger role.

14 The next paper talks about the role of public  
15 transport, in particular in promoting better development  
16 densities in middle suburbs of Australian cities. The  
17 report after that looks at governance arrangements which  
18 includes how you integrate transport and land use in the  
19 government sense.

20 In 2014, my book called, "Introduction to Transport  
21 Policy", has quite an extensive discussion of public  
22 transport issues in that.

23 MR DEREK CHAN: Perhaps can I summarise in this way: many of  
24 the articles concern issues of policy?

25 PROF JOHN STANLEY: Particularly policy, but policy has been  
26

1 my main focus, and strategic planning to help implement  
2 that policy.

3 MR DEREK CHAN: Having regard to your background, the  
4 various posts that you have had, the articles that you  
5 have written and the research that you have done, how  
6 would you describe your area of expertise?

7 PROF JOHN STANLEY: In terms of the subject matter of this  
8 particular hearing --

9 MR DEREK CHAN: Yes.

10 PROF JOHN STANLEY: -- I think the expertise I would most  
11 bring to this question is issues of public transport  
12 governance and policy in a context of governance for  
13 integrated urban planning and transport planning, so  
14 it's really positioning public transport in a wider  
15 setting.

16 Then, when you think about bus, it's really  
17 governance and institutional arrangements with respect  
18 to bus service delivery and planning for that delivery  
19 and policy arrangements that are going to make it happen  
20 to enable bus, if you like, to best achieve the goals  
21 that government has for society. That's really the  
22 level I tend to operate, rather than vehicle operations.  
23 It's really the role that these modes play in terms of  
24 delivering value for society and how can you set up your  
25 governance arrangements, your institutional

26

1 arrangements, to maximise that value.

2 MR DEREK CHAN: And I think you have fairly stated in your  
3 second report, at the start of it -- perhaps I will just  
4 give the reference to the committee. That's page 56 of  
5 the expert bundle.

6 CHAIRMAN: Yes.

7 MR DEREK CHAN: Mr Chairman, I'm looking at page 56, about  
8 the third full paragraph down, so that's just past the  
9 middle of the page.

10 Professor, you have fairly accepted there that you  
11 are not an expert in bus operation, but have expertise  
12 in matters to do with the institutional --

13 CHAIRMAN: Would you read out what you are referring to?

14 MR DEREK CHAN: I'm sorry, I'm reading from --

15 CHAIRMAN: Just read out the relevant part.

16 MR DEREK CHAN: Yes. You say, at this part of your report,  
17 that you are not an expert in bus operation but have  
18 expertise in matters to do with the institutional  
19 environment within which bus operates and how this can  
20 impact performance.

21 PROF JOHN STANLEY: Yes, Mr Chan.

22 CHAIRMAN: Thank you.

23 MR DEREK CHAN: Thank you, Professor. Unless you've got  
24 anything to add to the background employment, I will  
25 next introduce the background of the brief, which you  
26

1 had been provided with, in writing these two reports.

2 PROF JOHN STANLEY: Thank you.

3 MR DEREK CHAN: For that purpose, can I please take you to  
4 the expert bundle at page 4 where -- it's on the  
5 screen -- at the second full paragraph of page 4, you  
6 set out the task with which you have been provided in  
7 writing these two reports.

8 In the first bullet point, you were asked to  
9 describe the operations and management of the bus system  
10 in Melbourne together with the regulatory and governance  
11 arrangements, in particular with regard to the  
12 monitoring of bus safety. So that's the first task, and  
13 I believe that's covered by your first report which has  
14 been included in the expert bundle.

15 In the second bullet point, you were asked:

16 "Having been provided with such information about  
17 the franchised bus services of Hong Kong, if so  
18 required, to summarise the system and, having regard to  
19 the bus system in Melbourne, give an opinion of the  
20 adequacy of the regulatory and monitoring systems in  
21 Hong Kong, making recommendations as to any changes to  
22 those systems, as in your opinion, are warranted to  
23 enhance the safety of the franchised bus system in  
24 Hong Kong".

25 I believe that's included in your second report,

26

1 which has also been is included in this bundle.

2 PROF JOHN STANLEY: Yes, Mr Chan.

3 MR DEREK CHAN: Can I start then with some simple practical  
4 comparisons between the bus system in Melbourne and the  
5 bus system in Hong Kong. Can I perhaps start with  
6 page 5 of that same report, in the same expert bundle.

7 The first point of difference is the population of  
8 Melbourne and Hong Kong. I can see that you state in  
9 the first paragraph of page 5 that Melbourne has  
10 a population of 4.8 million in 2017, and in the second  
11 paragraph you say that Melbourne is a relatively  
12 low-density city.

13 Do I understand that to mean there's a metropolitan  
14 area and a large suburban area?

15 PROF JOHN STANLEY: We would call the whole lot  
16 a metropolitan area. The function of the outer parts is  
17 very suburban, yes.

18 MR DEREK CHAN: And in terms of annual bus trips in  
19 Melbourne, we can pick that up at the fourth full  
20 paragraph of that page, that's towards the bottom of the  
21 page, where you say this:

22 "Victorian government budget papers ... indicate  
23 that Melbourne's trains currently have around  
24 240 million passenger boardings annually, trams  
25 205 million and buses 120 million, giving a total ...

26

1           metropolitan public transport task of about 565 million  
2           annual boardings."

3           So the bus takes up about 21 per cent of public  
4           transport trips annually.

5   PROF JOHN STANLEY: Yes.

6   MR DEREK CHAN: I think, just to put that figure by way of  
7           contrast to the Hong Kong context, we have about  
8           1.4 billion annual bus trips.?

9   PROF JOHN STANLEY: About one month. Melbourne is about one  
10          month of Hong Kong.

11   CHAIRMAN: Where do we get the 1.4 billion figure from,  
12          Mr Chan?

13   MR DEREK CHAN: That's from the aggregate figures provided  
14          by the Transport Department.

15   CHAIRMAN: In which submission?

16   MR DEREK CHAN: Perhaps I will come back to the committee  
17          with a reference for that figure.

18   CHAIRMAN: Thank you.

19   MR DEREK CHAN: Perhaps a quick reference to that would be  
20          at page 58 of the expert bundle, which is the first part  
21          of your second report.

22          It may be convenient, Professor, to have the expert  
23          bundle in front of you, because I will be going to it  
24          repeatedly, basically nonstop throughout the day.

25   PROF JOHN STANLEY: I have a very good helper here.

26

1 MR DEREK CHAN: At page 58 of the bundle, which is the start  
2 of your second report, in the middle of the first  
3 paragraph, you say:

4 "The Hong Kong Public Transport Strategy Study --  
5 July 2017 ... describes the role performed by each  
6 public transport mode within the public transport system  
7 and the passenger tasks involved. It notes that the  
8 public transport system caters for 12 million passenger  
9 trips daily, of which franchised bus services carry just  
10 over 4 million ..."

11 And that's per day.

12 Mr Chairman, I will give the committee another  
13 reference a bit later, but 4 million times daily for  
14 a year would be about 1.4 billion trips annually.

15 CHAIRMAN: Thank you.

16 MR DEREK CHAN: Professor, roughly how many buses are  
17 operating in Melbourne?

18 PROF JOHN STANLEY: About 1,700 as part of the route  
19 service.

20 CHAIRMAN: How is the term "route service" defined?

21 PROF JOHN STANLEY: These are contracted services that  
22 provide regular, scheduled -- daily, essentially --  
23 service that's determined by the state government and  
24 laid down in the operator's contract.

25 CHAIRMAN: Thank you.

26

1 MR DEREK CHAN: So it would not include school buses,  
2 coaches --

3 PROF JOHN STANLEY: It doesn't include coaches and it  
4 doesn't include dedicated school buses, but  
5 schoolchildren often travel on the route services.

6 MR DEREK CHAN: Yes. Just by way of general comparison, can  
7 I then talk about the contractual framework under which  
8 the Melbourne buses operate, to contrast that with  
9 Hong Kong. For that, can I please take you to page 7 of  
10 the expert bundle. The third full paragraph of the  
11 page, which is close to the bottom, you say there:

12 "Current route bus services in Melbourne are a mix  
13 of competitively tendered services (about a third of the  
14 network) and negotiated services, the former being the  
15 previously government-provided services and the latter  
16 those started by private operators (including  
17 extensions/additions to those services)."

18 PROF JOHN STANLEY: Correct, Mr Chan. There's also, in the  
19 services that are competitively tendered, an element  
20 which is called the SmartBus system, which is a system  
21 of a couple of circumferential services that provide  
22 long-distance trunk services around the middle suburbs  
23 of Melbourne. So they are also part of the tendered  
24 regime, but they are a small part of it.

25 MR DEREK CHAN: Right. So I take it a third of the  
26

1 contracts are competitively tendered and two-thirds of  
2 the contracts are negotiated services?

3 PROF JOHN STANLEY: No, it's not contracts. There's  
4 actually one contract that's competitively tendered.  
5 That's about a third of the task.

6 MR DEREK CHAN: Perhaps you can give us a very general  
7 description of how that competitive tender process  
8 works.?

9 PROF JOHN STANLEY: Yes, sure. I have to say, as  
10 an introduction to this, that I was not part of that  
11 competitive tendering process, so I don't know the  
12 contract in detail. The roles that I've had in contract  
13 negotiation in detail have been the negotiated  
14 contracts, which are the two-thirds rather than the  
15 one-third.

16 However, the general process, as you ask for, is  
17 that the government would invite people to express  
18 interest in submitting a tender for a service, and the  
19 government would nominate what it was looking for in  
20 terms of those services, the kinds of routes that are  
21 going to be involved, the frequency, if you like. It  
22 would lay down the timetable and invite operators to put  
23 in a price that they would require in terms of, if I use  
24 the word, subsidy, to provide those services. So then  
25 it becomes a case of the operators who are bidding,

26

1 bidding, if you like, the lowest price to government.

2 Now, government may also take things other than  
3 price into account. It might take what it thinks is the  
4 operator's capacity to provide a good service into  
5 account as well. But that's essentially a bid to run  
6 a series of services across a spatial area. So they are  
7 essentially area-based services, apart from those couple  
8 of circumferential trunk route services that I talked  
9 about.

10 CHAIRMAN: Apart from the routes, presumably the government  
11 would stipulate the schedule that it wishes the service  
12 to be provided?

13 PROF JOHN STANLEY: Yes, Chairman. Frequency, the headways,  
14 and so on, and start/finish times, yes.

15 And then government gets the fare revenue and the  
16 government assumes profit risk but --

17 CHAIRMAN: Before we move on to that detail, perhaps I could  
18 ask this: how many routes are tendered on how many  
19 different occasions?

20 PROF JOHN STANLEY: Only one tender, and that's for a large  
21 number of routes together. So it's in fact a franchise  
22 area, if you like, a contract area, and all the routes  
23 that are in that area. So it's a fairly large chunk of  
24 Melbourne, given it's one-third of the routes in total.  
25 I wouldn't know the absolute number of routes involved,

26

1           it could be a couple of hundred or more. But it's  
2           essentially area-based.

3   CHAIRMAN: And over what period of time is the franchise, if  
4           one uses that term, awarded?

5   PROF JOHN STANLEY: Yes, they are mostly seven years. The  
6           negotiated contracts have been ten; they come back to  
7           seven under the new contracts that are starting in  
8           about --

9   CHAIRMAN: So the government offers one contract. Does it  
10          receive multiple bids and then accept multiple bus  
11          operators, or does it --

12   PROF JOHN STANLEY: Just a single operator, Chairman.

13   CHAIRMAN: Single?

14   PROF JOHN STANLEY: Yes.

15   MEMBER LO: What is the difference between negotiated and  
16          tendered? Who negotiates with whom and how?

17   PROF JOHN STANLEY: Yes. The negotiated contracts  
18          essentially relate to services that were started by the  
19          private sector, often 50, 60, 70 years ago, and for  
20          a long time ran out of the fare box, as yours still do,  
21          but in around about 1970 that ceased, and there was  
22          a requirement for service subsidies to come in at that  
23          time.

24          There has been negotiation, though, between the  
25          operator, at the start of those services, and government

26

1 to continue providing those services throughout the  
2 process. Now, government at one stage tried to take on  
3 the operators who have those negotiated contracts and  
4 put their services out to competitive tender. That  
5 ended up in the Australian Federal Court and the  
6 operators actually won, probably more to do with  
7 an issue of legal detail than much else.

8 But negotiation is still the way those contracts are  
9 dealt with, but each time they are dealt with, the  
10 contract is silent about what will happen at the end of  
11 the contract period. So the next lot of contracts that  
12 have just started now are seven-year contracts, they are  
13 silent. Then what happens at the end of that seven-year  
14 period, the industry could confidently believe they  
15 would sit down for another negotiation. The government  
16 probably wouldn't agree with that.

17 MEMBER LO: So the negotiation would involve changing the  
18 operator at the end or not?

19 PROF JOHN STANLEY: No. It essentially involves determining  
20 a price to provide those services, and agreeing on, for  
21 example, key performance indicators that will lead to  
22 incentive and penalty clauses that will be in those  
23 contracts. Also things like driver training is  
24 a provision of those contracts as well.

25 CHAIRMAN: When you say the essential factor being  
26

1 negotiated is price, that is the price that the  
2 government will pay the bus company to run the service,  
3 the subsidy?

4 PROF JOHN STANLEY: Yes, correct. Essentially, it's the  
5 total cost of the service. The government actually pays  
6 the total cost to the operator --

7 CHAIRMAN: Because the government keeps the revenue in the  
8 fare box?

9 PROF JOHN STANLEY: Correct. So there's a process that's  
10 gone through which actually involves benchmarking, quite  
11 detailed benchmarking, of operator costs across all the  
12 operators, to try and identify, if you like, whether  
13 there are outliers in some particular areas, whether  
14 particular operators are low-cost or very high-cost.  
15 That leads to a discussion about what would be  
16 a reasonable band for those costs to fall within, and  
17 operators sometimes have their remuneration reduced  
18 because they look like they are too expensive relative  
19 to their peers.

20 CHAIRMAN: Are there occasions when agreement is not reached  
21 with the incumbent operator and the service then is  
22 offered to other operators or not?

23 PROF JOHN STANLEY: I'm not aware of any such instances so  
24 far, Chairman.

25 CHAIRMAN: And this is a system that has been developed  
26

1 since the 1970s?

2 PROF JOHN STANLEY: Well, there's been a subsidy since the  
3 1970s. The focus on the negotiated contracts, probably  
4 30 or 40 years. I'm not aware of the history of the  
5 1970/early 1980s period, but it's certainly been going  
6 since the early 1980s, the way I've described it to you.

7 CHAIRMAN: Thank you.

8 MR DEREK CHAN: In terms of the competitive tendering  
9 contractor, who is the current bus operator in Melbourne  
10 that won the competitive tendering?

11 PROF JOHN STANLEY: It will come to me. Just give me --  
12 Transdev, which is a French company.

13 CHAIRMAN: Could you spell that for me?

14 PROF JOHN STANLEY: T-R-A-N-S-D-E-V.

15 MR DEREK CHAN: And how long has that operator been  
16 operating the competitive tender part of the system, bus  
17 system?

18 PROF JOHN STANLEY: They have -- they have held it once. So  
19 the contract was held by another company before that,  
20 called Ventura.

21 MR DEREK CHAN: Can you spell that as well?

22 PROF JOHN STANLEY: V-E-N-T-U-R-A, was the previous holder  
23 of the competitive contract, then Transdev won the  
24 tender the last time that came around, and I think that  
25 comes up again in the next 12 or 18 months.

26

1 MR DEREK CHAN: So the competitive tendering process  
2 actually resulted in a change in the operator?

3 PROF JOHN STANLEY: Indeed.

4 CHAIRMAN: You describe Transdev as being a French company.

5 PROF JOHN STANLEY: Yes.

6 CHAIRMAN: Do they operate bus services elsewhere in the  
7 world?

8 PROF JOHN STANLEY: Yes, a huge number in France, Chairman,  
9 and they also I think operate services in other parts of  
10 Australia as well.

11 MR DEREK CHAN: We have talked about one change in operator.  
12 Have there been many changes -- talking about the  
13 competitive tendering part -- in the operators?

14 PROF JOHN STANLEY: There have. If I can just go back. In  
15 about 1998, I think Melbourne was the first city in the  
16 world to privatise its train service. In fact we put  
17 the train, tram and the competitive one-third of bus  
18 routes that I've talked about before -- they all got put  
19 out for tender at the same time. There were two tenders  
20 let for train, two for tram, and one for bus. One  
21 British company called National Express, one of the  
22 train contracts, one of the tram contracts and the bus  
23 contract, they surrendered that contract within about  
24 three years, so that contract changed at that time, and  
25 the holder of the other train and tram contract then got

26

1 full train and tram service at that time.

2 So we have had two changes in the operators.

3 CHAIRMAN: So who got the bus contract in 1998?

4 PROF JOHN STANLEY: That was National Express. They won  
5 that contract in 1998.

6 CHAIRMAN: Was that a seven-year contract?

7 PROF JOHN STANLEY: I don't remember, Chairman.

8 CHAIRMAN: Was Ventura the successor?

9 PROF JOHN STANLEY: I would need to come back to you on  
10 that, what time they took on that contract.

11 CHAIRMAN: So you have identified for us three different  
12 contractors for the bus tender.

13 PROF JOHN STANLEY: Yes.

14 CHAIRMAN: Transdev, Ventura and National Express?

15 PROF JOHN STANLEY: Correct.

16 CHAIRMAN: Might there be a fourth?

17 PROF JOHN STANLEY: There might be something between  
18 National Express and Ventura, which probably was other  
19 operators taking over those services after National  
20 Express fell through until it could be reconstituted for  
21 a tender. But I will come back to you on that.

22 CHAIRMAN: Yes, if you could.

23 Am I understanding you correctly to say that  
24 National Express services didn't run the length of the  
25 contract; they fell out prematurely, is that the point?

26

1 PROF JOHN STANLEY: Yes, indeed. I think --

2 CHAIRMAN: Then someone took over?

3 PROF JOHN STANLEY: Yes, correct. I think there was  
4 a feeling that -- and we will probably come to this  
5 later, Mr Chan -- one of the challenges of competitive  
6 tendering is that sometimes it encourages operators to  
7 go in too low with their bid, perhaps hoping they can  
8 encourage government to negotiate the price upwards  
9 later on. In the case of the National Express rail  
10 one -- one of my papers I wrote earlier on was about  
11 this situation -- they did have one upward negotiation  
12 in their remuneration with government, but only one, and  
13 that's when they decided that they weren't going to  
14 continue.

15 CHAIRMAN: But all events -- as far as the bus contract was  
16 concerned, there was no successful negotiation that  
17 resulted in National Express staying on?

18 PROF JOHN STANLEY: No.

19 CHAIRMAN: They pulled out of the contract?

20 PROF JOHN STANLEY: Yes.

21 CHAIRMAN: Thank you.

22 MR DEREK CHAN: Mr Chairman, in relation to the reference  
23 for the 4 million bus trips per day in Hong Kong, which  
24 works out to about 1.4 billion bus trips per year.

25 CHAIRMAN: Yes.

26

1 MR DEREK CHAN: That would be at THB-2 at page 103.

2 CHAIRMAN: Thank you.

3 MR DEREK CHAN: That's a figure as of December 2017.

4 Professor, that's the competitive tendering side of  
5 it.

6 Can I then move briefly to the negotiated contract.

7 CHAIRMAN: Before we leave the competitive tendering side of  
8 it, what are the key features of the competitive  
9 tendering contract?

10 PROF JOHN STANLEY: I think it's to do with incentive and  
11 penalty clauses, but as I said, Chairman, I wasn't part  
12 of that negotiation process, so I can't express  
13 an opinion on the detail of what those incentive and  
14 penalty clauses are.

15 CHAIRMAN: Are these documents not made public?

16 PROF JOHN STANLEY: They tend to be heavily redacted when  
17 they are.

18 MR DEREK CHAN: So you can't say, or can you, whether those  
19 penalty and incentive clauses are related to safety  
20 performance or not?

21 PROF JOHN STANLEY: I would expect that they aren't.  
22 I think it's pretty unusual to have incentive and  
23 penalty clauses that relate to safety. That's  
24 unfortunate, but they aren't in an Australian setting,  
25 to the best of my knowledge, in the operator, certainly  
26

1 not in Victoria, clauses that relate safety as one of  
2 the incentive/penalty components.

3 MR DEREK CHAN: So I assume it would relate to performance  
4 indicators more than specific --

5 PROF JOHN STANLEY: They very much seem to relate to  
6 operational performance, things like on-time running,  
7 service cancellations, they tend to be where most of the  
8 public transport systems around the world put their  
9 focus, sometimes also on customer satisfaction survey  
10 results, what customers think of the services. They  
11 tend to be the elements you see in those incentive and  
12 penalty clauses.

13 MR DEREK CHAN: Sorry, I think I might have interrupted you.  
14 You were responding to the question from the chairman  
15 about the key terms of the competitive tendering  
16 contract.

17 PROF JOHN STANLEY: Yes. I'm saying that the main focus  
18 is -- I think otherwise, on most of the elements, the  
19 contracts are not vastly different between competitive  
20 tendering and negotiation. I think it's really just  
21 a matter of how that right to operate is provided.  
22 A lot of the detail of the contracts is fairly similar  
23 between the two.

24 CHAIRMAN: And the negotiated contracts are lengthy compared  
25 with the franchise agreements of Hong Kong? I think you  
26

1 have made that point.

2 PROF JOHN STANLEY: They are unbelievably long, Chairman.

3 My recollection is that I think the Hong Kong franchise  
4 agreements are 31 or 32 pages. The comparable Melbourne  
5 negotiated contract is 160 pages, plus a bunch of  
6 schedules as well.

7 CHAIRMAN: Yes.

8 MR DEREK CHAN: Thank you. Professor, I think you have  
9 talked a lot about negotiated contracts, but perhaps  
10 I can just go through a couple of things, perhaps by way  
11 of summary.

12 You have mentioned that the negotiated contracts  
13 would be quite similar to the competitive tender  
14 contract.

15 PROF JOHN STANLEY: Yes.

16 MR DEREK CHAN: Can I just confirm that under these  
17 negotiated contracts, it's also the government who  
18 collects the fares?

19 PROF JOHN STANLEY: Yes, Mr Chan.

20 MR DEREK CHAN: And the operator is basically paid to run  
21 the service?

22 PROF JOHN STANLEY: Correct. The contracts are what we call  
23 gross-cost-plus contracts, so they are gross cost  
24 contracts, but they do have incentive and penalty  
25 clauses as well. So the operator gets paid an agreed  
26

1 amount to run the service, but then there's an at-risk  
2 component that's tied up in those incentive and penalty  
3 clauses, which is not huge but, relative to the margins  
4 on the contract, it's enough to make you focus on  
5 achievement.

6 CHAIRMAN: Can you estimate, if you can, the percentage of  
7 the variable?

8 PROF JOHN STANLEY: Yes, Chairman. There are essentially  
9 two main components that are operative in this space at  
10 the moment. The first one is a patronage incentive, and  
11 in a sense that's only got upside. So if an operator  
12 grows patronage faster than a benchmarked rate, then  
13 they are entitled to a patronage incentive.

14 Then there's an operational performance regime which  
15 covers, as I said before, things like on-time running,  
16 service cancellations. You put those sorts of things  
17 together, you are talking about 2 or 3 per cent.

18 CHAIRMAN: That's the benefit side of it?

19 PROF JOHN STANLEY: That's the kind of swinging margin.

20 CHAIRMAN: So benefit and penalty?

21 PROF JOHN STANLEY: Yes. So you could go up by that or down  
22 by about that. So it's not huge, but contracts like  
23 this probably have margins of around about 10 per cent  
24 on them.

25 CHAIRMAN: Thank you.

26

1 MR DEREK CHAN: Approximately how many operators would there  
2 be under this negotiated contract system?

3 PROF JOHN STANLEY: There are 15 contracts and 12 operators.  
4 When I was negotiating the contracts, about ten or so  
5 years ago, there were a lot more; there were about 26  
6 then. So there's been consolidation in the last decade.

7 CHAIRMAN: How has consolidation occurred?

8 PROF JOHN STANLEY: It's essentially occurred through  
9 operators buying out other operators. So one of the  
10 companies that I talk about a little bit in this paper  
11 is a company called ComfortDelGro Cabcharge, CDC, who  
12 operate also in Singapore, for example, and I think in  
13 London as well. They have bought a substantial share of  
14 the market. Ventura, whose name I mentioned before,  
15 have absorbed another very large company in Melbourne as  
16 well. Some of the smaller companies have been taken  
17 over by slightly larger ones. So we have seen about  
18 half of the operators disappear in the last decade, and  
19 I expect we will see some continuing contraction.

20 MR DEREK CHAN: From a policy perspective, can you attribute  
21 a purpose or reason to the expectation that there will  
22 be market contraction amongst the number of operators?

23 PROF JOHN STANLEY: Yes. I think that it does create  
24 benefits to particular companies in terms of cost base.  
25 Some getting a little bit larger can help you with your  
26

1 cost base, some of these operators have been quite small  
2 and some of the larger ones are keen on buying market  
3 share, they are really after a substantial share of the  
4 market where they can give them a chance to grow their  
5 business further.

6 MR DEREK CHAN: When you talk about creating benefits, do  
7 I understand that to be benefits in economies of scale?

8 PROF JOHN STANLEY: Yes. There's also a part of it,  
9 Chairman, that -- these are family companies, and  
10 sometimes the next generation don't want to continue on  
11 in the business. We had an interesting example a few  
12 years ago where the Grenda Corporation, who are one of  
13 the two or three largest bus operators in Melbourne,  
14 a couple of generations in the family, the next  
15 generation decided they didn't want to continue in the  
16 business, so they sold the business, and in fact in that  
17 sale process they gave one-third of the revenue to their  
18 staff, which was an amazingly generous thing to do.

19 CHAIRMAN: So, as an overview, 1,700 franchised buses in  
20 Melbourne, the pie is divided up one-third to the  
21 current successful operator, Transdev?

22 PROF JOHN STANLEY: Transdev.

23 CHAIRMAN: Then the other two-thirds are divided up by 12  
24 operators?

25 PROF JOHN STANLEY: Correct.

26

1 CHAIRMAN: So what is the largest number of buses that any  
2 one operator operates?

3 PROF JOHN STANLEY: There would be about 500.

4 CHAIRMAN: About 500?

5 PROF JOHN STANLEY: Mm-hmm.

6 CHAIRMAN: Would that be Transdev?

7 PROF JOHN STANLEY: Transdev would probably have 500, and  
8 I suspect that Ventura would have sort of around 300 or  
9 400 as well. CDC would have a large number, around  
10 about 400. I can get those numbers back to you.

11 CHAIRMAN: So if the tendered process takes up 500, that  
12 leaves 1,200 to be divided by the 12 operators, and from  
13 what you are saying, two of them occupy most of  
14 those bus --

15 PROF JOHN STANLEY: In fact, three of them would account for  
16 a very large proportion of that.

17 CHAIRMAN: Thank you.

18 MEMBER AUYEUNG: Professor, can you give us some idea about  
19 the size of the smaller one, how many buses a small  
20 operator would have?

21 PROF JOHN STANLEY: I'm thinking around 30 to 40, but there  
22 would only be one or two.

23 MEMBER AUYEUNG: 30 to 40 buses only?

24 PROF JOHN STANLEY: (Nodded head).

25 MEMBER AUYEUNG: Thank you.

26

1 MR DEREK CHAN: In the Melbourne context, what happens to  
2 the infrastructure -- the buses, the depots, the repair  
3 facilities -- when one contractor moves on to the next  
4 contractor as a result of the competitive tendering  
5 process?

6 PROF JOHN STANLEY: Sure. The contract specifies how those  
7 assets need to be handled in the process, and in fact  
8 that also applies for the negotiated contracts. So  
9 holding the depots in particular puts you in a very  
10 powerful position as a bus operator. It's very hard to  
11 build a new depot, particularly in highly built-up  
12 areas.

13 But one of the ways -- government is concerned about  
14 this, because government wants the opportunity to make  
15 sure there is some competition in the process, and it's  
16 hard to get competition if you've got a negotiated  
17 contract. But given that the operators, with the  
18 negotiated contracts, have a little bit of concern about  
19 whether their services might at some point be put out to  
20 tender, they have agreed with government to a process  
21 whereby their assets -- and the same thing applies for  
22 the competitively tendered ones -- are made available to  
23 a successor operator on particular terms.

24 MR DEREK CHAN: Basically, the old operator sells the  
25 infrastructure to the new operator?

26

1 PROF JOHN STANLEY: Yes.

2 CHAIRMAN: Including the buses?

3 PROF JOHN STANLEY: Yes.

4 CHAIRMAN: So the depots, the bus stations, the buses  
5 themselves?

6 PROF JOHN STANLEY: Yes.

7 CHAIRMAN: So that's what would have happened with  
8 National Express and Ventura and the other one?

9 PROF JOHN STANLEY: Correct. The three. They just change  
10 the logo on the buses.

11 MR DEREK CHAN: In general terms -- and my question covers  
12 both the competitive tendering part and the negotiated  
13 contract part -- does the fare revenue that the  
14 government receives cover the cost of running the bus  
15 routes?

16 PROF JOHN STANLEY: It covers probably in the order of  
17 20 per cent plus. So it's around about a dollar in five  
18 or a little bit better than that.

19 Now, if fare concessions were added, that government  
20 requires the operators to give fare concessions to  
21 certain sorts of customers, and if the government  
22 compensated the operators specifically for that, it  
23 might get up to 30 per cent, but fare box recovery, as  
24 it is, off the top, sort of just low 20s or 20 per cent.

25 MR DEREK CHAN: So, in that context, the bus operations are  
26

1 heavily subsidised by the government?

2 PROF JOHN STANLEY: They are. In fact, one of the reasons  
3 why, when I was running the association, we put a lot of  
4 effort into defining or trying to measure the value that  
5 the community got from those services. In fact, in the  
6 paper that I wrote with my colleague, Prof Hensher,  
7 I estimated that the value of Melbourne's route bus  
8 services to the Melbourne society, Melbourne community,  
9 is about ten times the financial cost recovery rate.

10 The main benefits are particularly social inclusion.  
11 In other words, if you didn't have those buses,  
12 particularly in the outer suburbs -- and Melbourne has  
13 very extensive low-density outer suburbs that are  
14 growing very fast -- if you didn't have those bus  
15 services, a lot of those people would not be able to  
16 participate in the range of activities that our society  
17 makes available. We have estimated that alone is worth  
18 more than the cost of the bus services. And the bus  
19 services are also a very significant contributor to  
20 congestion reduction. Those two benefits in particular  
21 are more than double the cost of the subsidy.

22 MR DEREK CHAN: So that's an economic justification to  
23 giving subsidy to those services?

24 PROF JOHN STANLEY: Precisely, Mr Chan, yes.

25 MR DEREK CHAN: Would it be fair to say that this subsidy  
26

1 part would be a big point of difference between  
2 Hong Kong and Melbourne, in the sense that in Hong Kong,  
3 the operators keep the fares and they run the profit  
4 risk of patronage?

5 PROF JOHN STANLEY: They are a huge difference. I guess the  
6 corollary of that is probably Melbourne knows what the  
7 societal worth of its bus services is, but Hong Kong  
8 doesn't, because we have done the exercise, because we  
9 have needed to do to say what it is that we are doing  
10 for society that should make it worthwhile for  
11 government to think about paying so much money. I would  
12 think, if there's a really useful exercise to be done in  
13 Hong Kong, it's trying to define more precisely and  
14 measure the value to the Hong Kong society of the bus  
15 services that are provided.

16 CHAIRMAN: But Hong Kong operates a "use pay" system that  
17 works?

18 PROF JOHN STANLEY: It does indeed, Chairman, but there are  
19 also other people who benefit from the services and  
20 other people who incur costs.

21 CHAIRMAN: Yes.

22 PROF JOHN STANLEY: For example, the subject of the inquiry  
23 is safety, and safety is a major externality of  
24 transport operations. So, if you have an interest in  
25 externalities, as I do, then trying to understand the  
26

1           benefits and the costs that are associated with  
2           providing bus services, and if you had, for example,  
3           half the people who are travelling on the franchised  
4           buses every day getting in cars instead, you would have  
5           much poorer safety outcomes.

6   CHAIRMAN:   Yes.

7   PROF JOHN STANLEY:   So those sorts of things, I think, need  
8           to be understood.

9   CHAIRMAN:   Does the Hong Kong model work simply because of  
10           the number of people who use our buses?

11   PROF JOHN STANLEY:   I would have said yes, Chairman, and the  
12           density that supports that.

13   CHAIRMAN:   Yes.

14           Thank you, Mr Chairman.

15   MR DEREK CHAN:   Professor, can I move on to a related topic,  
16           but the focus a little bit different, and under this  
17           topic I want to discuss with you the advantages and  
18           disadvantages between competitive tendering and  
19           negotiated contracts.   So I want to assess not  
20           necessarily which is better --

21   PROF JOHN STANLEY:   Sure.

22   MR DEREK CHAN:   -- but the good and bad of each system, if I  
23           can use that term.

24   PROF JOHN STANLEY:   Yes.

25   MR DEREK CHAN:   Can I start that topic by taking you to  
26

1 page 20 of the expert bundle, which will be your first  
2 report.

3 Excuse me, Mr Chairman, that may be a wrong  
4 reference.

5 CHAIRMAN: Yes. Take your time.

6 MR DEREK CHAN: I'm sorry, Mr Chairman, it ought to be at  
7 page 20 of your second report, which is at page 73 of  
8 the expert bundle.

9 CHAIRMAN: Thank you.

10 MR DEREK CHAN: On page 73, the topic that you are  
11 discussing there is the franchises and the method of  
12 allocating the rights for service provision.

13 If I can draw your attention to the second paragraph  
14 from the bottom, starting with the word "However" --  
15 I will just read it out:

16 "However, Melbourne also tendered about one-third of  
17 its route bus services, which adds an element of  
18 performance pressure to the whole route bus system, both  
19 tendered and negotiated. The tendering element has the  
20 effect of creating a lingering concern among incumbent  
21 operators with negotiated contracts that their services  
22 are not guaranteed: there is always a risk that their  
23 services might be tendered if they do not perform. The  
24 absence of tendering in Hong Kong for the last two  
25 decades suggests that this risk is likely to be lower in  
26

1 Hong Kong than in Melbourne."

2 So that's the where you deal with the advantage of  
3 competitive tendering.

4 Can I also, in the same vein, take you to a second  
5 reference.

6 CHAIRMAN: Before you move on, you identify this as a risk,  
7 but it's a risk that is not eventuated: no incumbent  
8 negotiated contract operator has lost its contract.

9 PROF JOHN STANLEY: Yes. I think there are two ways of  
10 looking at this, Chair. One is the risk in terms of the  
11 pressure on the costs of providing the service. The  
12 real point of competitive tendering is to sharpen the  
13 pencil in terms of what the costs are for running  
14 services, and the people who've -- the jurisdictions  
15 around the world that have gone into competitive  
16 tendering, it's almost always where you have had a  
17 government providing the service, not a private company,  
18 and the government has decided that it can't afford the  
19 cost, subsidy, if you like, to continue those services,  
20 and so it's said, "Let's see if we can get this done  
21 more cheaply by going out to tender." And the  
22 international evidence I think is that competitive  
23 tendering, if you are putting a private operator in to  
24 replace a public operator, tends to give you savings  
25 between 10 and 50 per cent.

26

1           Now, if you've got a private operator who's already  
2           operating, and operating commercially in a viable way,  
3           the rights to operate are very valuable. The government  
4           has essentially given that operator a free run in terms  
5           of a market area on which they can earn a return by  
6           providing a good service. It may well be, if they  
7           tendered, that somebody would pay the government some  
8           money to actually have the right to run that service.

9   CHAIRMAN: Yes.

10   PROF JOHN STANLEY: This is pretty unusual, Hong Kong.

11           There aren't many places where you could mount that  
12           argument, but I think it's the case here. Because your  
13           services are so successful, in that commercial sense, at  
14           the end of the day, it's the government that has given  
15           the operator the right to run a service and make  
16           a profit, and it's a possibility that if that was  
17           a contested service, the price would be lower and  
18           an operator might pay the government some money to  
19           provide the service.

20   CHAIRMAN: Thank you.

21   MR DEREK CHAN: The second reference to the issue of  
22           performance pressure arising from tendering is at  
23           page 87 of the expert bundle. The relevant paragraph is  
24           at the top of that page. I will just read it out:

25           "Melbourne's route bus operators seem likely to be  
26

1 under relatively greater performance pressure than  
2 Hong Kong's franchised bus operators because of: (1) the  
3 ever-present threat of competitive tendering in  
4 Melbourne, in the event of unsatisfactory operator  
5 performance; (2) the inclusion of specific (albeit  
6 small) incentive/penalty provisions in contract  
7 remuneration arrangements; and, most importantly from  
8 a safety perspective, (3) the existence of safety  
9 duties ..."

10 I'm going to explore with you the second and third  
11 part a bit later, but the first part refers to the  
12 benefits from the existence of competitive tendering in  
13 Melbourne.

14 To some extent, you have explained bits of it  
15 already, but can I test with you the concept of  
16 competitive tendering and how that fits within the  
17 Hong Kong environment where the bus operators collect  
18 the fares and assumes the profit risk from the provision  
19 of route bus services. I think you have already started  
20 on that topic during your previous answer to the  
21 chairman.

22 I understand there are a number of options  
23 available, but perhaps I can get you to explain some of  
24 those options. So you have talked already about --  
25 because the route bus operator collects the profit from  
26

1 patronage, and that's valuable, so you have talked about  
2 the possibility of a contractor or bidder actually  
3 paying the government a sum for the right to operate  
4 this franchised area or franchised bus routes.

5 What about the option of no bidding price, so the  
6 government opens up the right to run a certain franchise  
7 area? What would be the bidding be based upon then, if  
8 there's no price?

9 PROF JOHN STANLEY: I'm not sure if I'm understanding you  
10 precisely, but let me answer what I think you are  
11 asking. If the government is going to do that, it would  
12 say, "Okay, in area X we are going to get rid of all  
13 existing franchises for that and we are going to invite  
14 anybody who wants to provide a service to put in a bid  
15 to provide a service for that area."

16 Now, the bid might be to provide a particular  
17 timetable, as we talked about before, Chairman, where  
18 the government might specify fully what it wants the  
19 services to look like, and then it invites an operator  
20 to bid for that service. Now, you would expect those  
21 bids would be pretty low, you know, in the sense of it's  
22 not going to cost the government a lot of money, in that  
23 sense. But the real issue is, I think, can the  
24 government make some money out of it; will an operator  
25 be prepared to accept a lower return, for example, than  
26

1           he might be getting at the moment, and transfer some of  
2           that margin back to the government, to hold the right to  
3           run that service?

4           I think, in the evidence you have received from  
5           London, they talk about quite low margins on the  
6           services there because of the competitive tendering  
7           process, and I think the way London do it, they have  
8           relatively small contracts, they have short contracts,  
9           and they have performance pressure coming through that,  
10          and that pushes the returns down. So an operator might  
11          say, "I'm prepared to put in a bid, I'm not going to  
12          drop my margin", so they would put in a particular  
13          price. Another operator might think, "I'm prepared to  
14          pay the government some money for this contract because  
15          I think I can make money out of it and so can the  
16          government."

17          I think it's hard to know how that would go, but --  
18          and let me be clear, I'm not saying Hong Kong should  
19          competitively tender. I wouldn't say that at all. But  
20          if you wanted to hypothetically think how might you do,  
21          then what I would do is I would pick a number of routes  
22          and I would actually choose some routes and I would deal  
23          with them. I would put some routes out to competitive  
24          tender. Now, it would be a fairly messy process in  
25          terms of assets and buses that need to get dealt, I mean  
26

1           how you deal with the equity that's invested in those  
2           sorts of assets; it could be a very difficult thing to  
3           do, but presumably in principle you could do it, for  
4           a price. Then it's up to how big you want that area and  
5           how many routes you want to think about putting out for  
6           bidding.

7   CHAIRMAN: You referred to the London contracts as being  
8           "short". As I understand it, the system in London is  
9           the tender is for a five-year contract --

10   PROF JOHN STANLEY: Correct.

11   CHAIRMAN: -- with a two-year extension possibility, but  
12           that after seven years, it's re-tendered.

13   PROF JOHN STANLEY: Yes.

14   CHAIRMAN: The seven years is the same as Melbourne; is that  
15           right?

16   PROF JOHN STANLEY: Ours isn't a five plus two, it's seven.

17   CHAIRMAN: I follow that.

18   PROF JOHN STANLEY: They are also smaller contracts. They  
19           tend to be route-based contracts, I think, in London.

20   CHAIRMAN: Yes, as I understand it, that is the case.

21   MR DEREK CHAN: So, if I understand your answer correctly,  
22           there can be a number of possibilities, obviously. One  
23           is a bidder proposing to pay the government a sum for  
24           the operation, for the right to operate an area or  
25           a number of routes. The second possibility is the

26

1 bidder offering to share part of the margins with the  
2 government, as part of the bid.

3 PROF JOHN STANLEY: Yes.

4 MR DEREK CHAN: So that's what you call a bidding price.

5 PROF JOHN STANLEY: Okay.

6 MR DEREK CHAN: I suppose a third possibility exists that  
7 there is no bidding price and the competition is based  
8 entirely on an assessment of the quality of the service  
9 expected to be provided. Would that sort of tendering  
10 be logical or not?

11 PROF JOHN STANLEY: Absolutely. I mean, normally the  
12 criteria that are taken into account in competitive  
13 tendering -- price is one, obviously, but quality of  
14 service is very important, and often you will find  
15 jurisdictions don't offer the contract to the lowest  
16 bidder; they put more emphasis on quality of service in  
17 that process.

18 So quality of service would certainly be a very high  
19 priority in terms of determining what qualities you  
20 would want the operator to bring to providing that  
21 service.

22 CHAIRMAN: Presumably, another way in which it might be  
23 negotiated is the prospective new operator might say,  
24 "I can do these routes for 10 per cent less than the  
25 fares that the incumbent is doing it"?  
26

1 PROF JOHN STANLEY: Exactly, lower fares.

2 CHAIRMAN: There would be no payment to government, "but we  
3 are providing better value to the public"?

4 PROF JOHN STANLEY: Absolutely. That's the kind of degree  
5 of freedom is what happens to fares.

6 MR DEREK CHAN: So that's the advantages of competitive  
7 bidding --

8 PROF JOHN STANLEY: Mm-hmm.

9 MR DEREK CHAN: -- generally. Are there any perceived  
10 advantages that competitive tendering brings about that  
11 relate more specifically to the safe operation of buses?

12 PROF JOHN STANLEY: I think the risks are the other way with  
13 competitive tendering, that you might find situations  
14 where operators go in low with their bids and find out,  
15 "Gee, we are not making the margins we thought we were  
16 going to make; we will see where we can cut some  
17 corners." That might lead, for example, to deferred  
18 maintenance, which is a risk in this situation.

19 One of the things I mentioned in my first report was  
20 that Road Safety Inspections, the bus testing company  
21 that I'm a director of, was concerned about the  
22 condition of the number of the buses that were providing  
23 Melbourne's competitively tendered service. We drew  
24 that to the attention of the regulator. The reason we  
25 did that is that we operate under chain of

26

1 responsibility legislation in Melbourne for our bus  
2 services, and as a bus tester, if we know that  
3 an operator's buses are not up to standard, then we  
4 would be seen, we believe, as part of the chain of  
5 responsibility if something untoward was to happen as  
6 a function of one of those vehicles.

7 So I think that's a risk, and how would you deal  
8 with that? I think you have to deal with that by  
9 specifying quality criteria into your bidding document  
10 that says what your expectations are about fleet  
11 condition, for example, and how the maintenance is  
12 undertaken.

13 MEMBER LO: In the tendering process, competitive bid, if it  
14 were to make safety an explicit item, how would you pull  
15 it into the tendering process? So, if safety becomes  
16 an explicit item that somebody can bid for, what would  
17 that be?

18 PROF JOHN STANLEY: I think you would be nominating things  
19 like the condition of the vehicles, the maintenance  
20 schedules that need to be done. You would be setting  
21 limits on defects that operators would need to come up  
22 to, and then they would be in default under the contract  
23 if they didn't actually achieve those outcomes. So I'm  
24 not essentially -- I'm not a lawyer, but I think that's  
25 how you would deal with it. You would actually be  
26

1           setting benchmark targets for performance that the  
2           operator needs to meet, and if those targets aren't met,  
3           then you would go through a cure regime.

4   MEMBER LO: Is it common to put accident rate as part of the  
5           bidding?

6   PROF JOHN STANLEY: Part of the bidding criteria?

7   MEMBER LO: I don't know. If you were to use safety  
8           explicitly as a measure, do people use accident rate as  
9           a --

10   PROF JOHN STANLEY: If you were to --

11   MEMBER LO: If you don't keep your promise you pay a fine or  
12           something?

13   PROF JOHN STANLEY: I'm not aware of too many people who  
14           actually have incentives or penalties that relate  
15           explicitly to safety provisions, but if you were to do  
16           that, then accident rate would be a really good place to  
17           start, but you would need to take that a fair bit  
18           further, I think.

19   CHAIRMAN: Is that not a provision in Singapore, a penalty  
20           if the accident rate reaches a certain level?

21   PROF JOHN STANLEY: I think it is, Chairman, but I don't  
22           know enough about it.

23   CHAIRMAN: It's quite a high level, is my recollection,  
24           higher than is experienced in Hong Kong.

25   PROF JOHN STANLEY: Okay.

26

1 MR DEREK CHAN: Yes, as a possible downside risk to  
2 competitive tendering, you have mentioned in your answer  
3 something about deferring costs. Let me try to flesh  
4 that out a little bit more.

5 You gave an example of maintenance costs.

6 PROF JOHN STANLEY: Deferred maintenance, yes.

7 MR DEREK CHAN: Is that a consequence of the contract length  
8 being only a specified period of time, so as long as you  
9 keep up your performance within that period, you don't  
10 care what happens after, or is that a wrong way of  
11 looking at it?

12 PROF JOHN STANLEY: No. I think -- again as I said earlier  
13 on, I'm not aware of the full detail of the  
14 competitively tendered contract, but the usual practice  
15 for government in this would be to put some requirements  
16 in the contract about the condition of the vehicles at  
17 the end of the contract period, so that you would avoid  
18 that problem.

19 MR DEREK CHAN: But in terms of the general concept of  
20 deferring costs as a downside risk of competitive  
21 tendering -- I think you mentioned the operator going in  
22 low -- what do you mean by deferring costs? If  
23 I understand correctly, I go in low, I operate with low  
24 cost, I cut corners here and there because of the length  
25 of the contract, I don't look at the long term, I look  
26

1 at the short term -- is that the idea you are trying to  
2 express or am I getting it wrong?

3 PROF JOHN STANLEY: Yes. I think, during the process, if  
4 you are in that position you have a serious discussion  
5 with the government about whether they might be prepared  
6 to help you out a little bit in terms of giving you  
7 a higher rate of remuneration. I mean, that's a thing  
8 that happens. You will find operators do that. They  
9 actually go to government and try to renegotiate their  
10 contract if they feel they have gone in too low.

11 In the particular Melbourne case, as I say, we  
12 identified a real problem that we believe was an example  
13 of that situation. That's been dealt with and the  
14 operator's fleet is now in a much better condition.  
15 I don't know whether there was any payment from  
16 government or not in that process.

17 MR DEREK CHAN: Perhaps -- I'm sorry for going back on this  
18 issue, but I just want to make it absolutely clear I'm  
19 understanding it properly. I've heard a lot about  
20 advantages commercially for a competitive tender, but  
21 are there any advantages that relate specifically to  
22 safety that arise out of competitive tendering?

23 PROF JOHN STANLEY: I can't think of any, Mr Chan, but  
24 others may be able to.

25 CHAIRMAN: You point to the fact that there is a risk.

26

1 PROF JOHN STANLEY: I think there's a risk.

2 CHAIRMAN: The operator finds that he's underbid and so he  
3 doesn't replace the tyres every 50,000 kilometres; he  
4 says they will last 60,000 --

5 PROF JOHN STANLEY: They will go a bit further, yes,  
6 exactly.

7 CHAIRMAN: -- so that's a risk to safety?

8 PROF JOHN STANLEY: That's the risk, I think.

9 MR DEREK CHAN: I note that one-third of the Melbourne  
10 routes are competitively tendered. Have you seen how  
11 that introduction of competitive tendering -- has that  
12 brought about any benefits in terms of the safe  
13 operation of the buses?

14 PROF JOHN STANLEY: I don't think there's any evidence of  
15 that. I think, if you look at the transport ombudsman's  
16 report about complaints against bus operators, you will  
17 find that the company that holds the contract for the  
18 competitively tendered service tends to rate relatively  
19 high in terms of complaints from customers to the  
20 transport ombudsman, and I gave you the other example of  
21 the maintenance problem that we identified as well.

22 CHAIRMAN: Which of the competitive tendered companies was  
23 that?

24 PROF JOHN STANLEY: The current holder, Transdev.

25 CHAIRMAN: Transdev?

26

1 PROF JOHN STANLEY: Mmm.

2 CHAIRMAN: I know from London that they have had experiences  
3 where a maintenance problem is in fact brought about by  
4 a lack of strategic planning, where all the fitters and  
5 engineers retired at the same time and they were unable  
6 to recruit. Was the Melbourne problem of that kind of  
7 origin or was it perceived to be a cost-cutting problem?

8 PROF JOHN STANLEY: No, I think it's really more to do with  
9 bus -- we've got an incredibly high population growth in  
10 Melbourne at the moment. It's growing about  
11 2.5 per cent per annum. So the buses are being worked  
12 much harder, and I think it's partly to do with that,  
13 that the buses are doing more kilometres, they are being  
14 kept a bit longer so they are getting a bit older.  
15 That's I think probably what's been going on there.

16 CHAIRMAN: Thank you.

17 MR DEREK CHAN: Professor, can I then move on to look at the  
18 pros and cons of a negotiated contract concept. Can  
19 I start first by taking you to your second report, that  
20 is the expert bundle at page 86. I am interested in the  
21 bottom paragraph of that page.

22 Can I just read that passage out. You say at the  
23 bottom of page 86:

24 "Route bus operators need to feel a certain amount  
25 of performance pressure when they are essentially  
26

1 operating under a renewable negotiated  
2 franchise/contract regime. The author supports the  
3 negotiated approach to allocating the rights for route  
4 service provision, provided this includes mechanisms to  
5 ensure that operators are under pressure to perform  
6 across a range of outcome areas. This needs  
7 opportunities for a bonus for good performance but  
8 penalties for poor performance and a plausible risk of  
9 loss of franchise in the event of particularly poor  
10 performance public definitions of which should be  
11 embedded in the franchise agreement."

12 Can I first start with a general question: why do  
13 you support the negotiated approach over a competitive  
14 tendering approach?

15 PROF JOHN STANLEY: Yes. We have done a lot of work on this  
16 in Melbourne, and I think the major benefit is that what  
17 you can do with a negotiated contract, if you determine  
18 that you want to do this, is develop a really strong  
19 relationship between the operators and the government,  
20 in terms of how best to develop the system as a whole.  
21 Our experience would be that there are limited skills in  
22 government, and limited skills in the operators, in  
23 terms of things like system design and how to actually  
24 get the best out of your public transport. And if  
25 there's an opportunity to get government, the government

26

1 experts in this space, and the industry working  
2 together, you get a situation of one plus one equals  
3 three.

4 That's really what we've tried to do, through --  
5 I've written about this in some of my papers --  
6 developing what we call a trusting relationship between  
7 the government and the operator, but not to the point of  
8 what some people call regulatory capture, where the  
9 operators try to capture the regulator. That's  
10 completely anathema to what I'm talking about. But we  
11 are talking about really trusting partnerships between  
12 the two, so there's really strong and open  
13 collaboration, and that means that the contract or the  
14 franchise can vary through the period of the contract.  
15 It's an evolving thing. It's a live document. It's not  
16 set in stone at the start, as competitive tender  
17 documents tend to be, but you recognise going into it  
18 that you are trying to improve the value of the service  
19 all the way through that period, on the basis of  
20 a trusting partnership between those players who are in  
21 it.

22 I think we were able to do that in Melbourne at the  
23 time when I was running the Bus Association, where we  
24 achieved a very substantial increase in patronage and  
25 service delivery because of the nature of the  
26

1 relationship we put in place with the government, that  
2 hadn't been done for 30 or 40 years before that.

3 So I think there is evidence from our experience  
4 that if you seek to develop a trusting partnership  
5 between government and the authority, without regulatory  
6 capture, but a partnership that holds accountability is  
7 really important -- so the operator's got to perform; he  
8 is not being given a licence just to receive money --  
9 then you can get really good outcomes. That's why  
10 performance pressure is important to guard against this  
11 risk, if you like, of regulatory capture under  
12 a negotiated arrangement.

13 CHAIRMAN: Could you expand on what you describe as  
14 "regulatory capture"?

15 PROF JOHN STANLEY: Certainly, Chairman. This is the thing  
16 we have talked about a little bit before, if you like,  
17 where the operator might go into a tender, bid too low,  
18 works very hard on the government to try and become  
19 their best friends, and then seeks to ratchet up the  
20 price of the contract later on.

21 People would often criticise negotiated contracts  
22 for just that point, that they say that the operators  
23 have captured the government, and negotiation just lets  
24 them continue on in what could be said is a rent-seeking  
25 behaviour. So we are really strong on the importance of  
26

1 performance pressure to mitigate that risk, because it  
2 is a risk.

3 CHAIRMAN: And another way it might manifest itself would be  
4 where the bus operator is able to resist any suggestions  
5 made by the government about how to improve, for  
6 example, safety devices on the bus.

7 PROF JOHN STANLEY: Sure.

8 CHAIRMAN: Never actually doing what is discussed, never  
9 coming up with an actual change.

10 PROF JOHN STANLEY: If you have captured the regulator, you  
11 can do that.

12 CHAIRMAN: That's the risk.

13 PROF JOHN STANLEY: It's a risk. That's why you need  
14 performance pressure, and the performance pressure needs  
15 to be seen for what it is, as genuine performance  
16 pressure.

17 CHAIRMAN: Could you give some examples of what you regard  
18 as performance pressure? In what areas?

19 PROF JOHN STANLEY: Yes. In particular, the safety  
20 performance pressure. We approach that very much in  
21 Melbourne through seeing -- and I think this may be one  
22 of the things that we are pretty unique in -- we see  
23 safety as a shared responsibility. All the parties in  
24 what we call the chain of responsibility that can impact  
25 bus safety have safety duties, and that requirement sits  
26

1           underneath our accreditation system and it sits  
2           underneath our negotiated contracting arrangements.

3           So all of our operators are highly aware that they  
4           are liable to be put in a position where they might find  
5           themselves in court, if safety circumstances turn out to  
6           be such that they can be shown to not have taken due  
7           care and done all that is, so far as is reasonably  
8           practicable, to reduce safety risks.

9           That's a really important element of performance  
10          pressure, that chain of responsibility provision.

11          I would say the lower-level performance pressure, not as  
12          significant as that, is to do with incentives and  
13          penalties that we talked about before, things like  
14          on-time running, and so on, but also, as Prof Lo talks  
15          about, whether you can have some incentives as well with  
16          respect to safety.

17   CHAIRMAN: Yes, because on-time running is a service  
18              incentive for penalty, but safety, as Prof Lo has  
19              mentioned, might be measured in accident rates?

20   PROF JOHN STANLEY: Absolutely.

21   CHAIRMAN: What other ways can one measure safety?

22   PROF JOHN STANLEY: I think accident rate is a really good  
23              starting point, and if you look at some of the reporting  
24              that has been done I think in the safety plans of the  
25              five-year forward plans, there's information on

26

1       fatalities, collisions, non-collisions -- "slips, trips  
2       and falls" types of involvement involvements as well --  
3       and in my view, if you are going to go down the path of  
4       developing safety as an incentive or penalty provision,  
5       I would drill down into where are the safety problems.  
6       So you wouldn't use accident involvement rate in total;  
7       you would look at the fatality rate, you would look at  
8       "slips, trips and falls". And you would form a view,  
9       I think, on what is the relative importance of those two  
10      things.

11       I think one operator I saw, for example, had  
12      an increase in the "slips, trips and falls" type  
13      accidents, but a drop in fatalities. So, if you add  
14      them up together, and say one incident is an incident,  
15      you are missing that nuance. So I would be trying to  
16      decompose it a bit and look at the major areas of safety  
17      concern and make sure that there are KPIs, if you like,  
18      or incentive/penalty clauses that relate to those. That  
19      means you are going to really end up with a bundle,  
20      I think, of measures. I don't know how many elements  
21      are in that bundle. That's something that needs to be  
22      settled by negotiation between government operators with  
23      advice, for example, from committees such as your own,  
24      about what the components are.

25       But I would start with what are the main sources of  
26

1 safety problems and start to target those.

2 CHAIRMAN: I think London have identified 42 components of  
3 some measure of approaching safety in that way.

4 PROF JOHN STANLEY: That sounds too many for me.

5 MR DEREK CHAN: You focused on performance pressure. Can  
6 I just put this to you, to see what observations or  
7 comments you have.

8 In a situation in Hong Kong where the bus service is  
9 in one sense also competing with other modes of  
10 transportation for patronage -- for example the rail,  
11 public light buses, taxis -- do you think that type of  
12 competition also creates the type of performance  
13 pressure that you are envisaging?

14 PROF JOHN STANLEY: It creates an element of performance  
15 pressure, but I don't think it's anywhere near as strong  
16 as the performance pressure that you get, for example,  
17 under competitive tendering, because the consequences of  
18 poor performance are much more severe under competitive  
19 tendering than they are under the context that you  
20 describe.

21 So, for example, you might lose some passengers if  
22 you are not competing well against MTR, for example.  
23 But that's different to losing your business. I don't  
24 see the need for performance pressure to necessarily go  
25 as far as losing your business, you know, probably as  
26

1 commonly as it does under competitive tendering, but  
2 that needs to be a plausible proposition.

3 I think, for performance pressure, there needs to be  
4 a plausible threat that if your performance is so bad,  
5 then your negotiated franchise/contract finishes.

6 I guess the other thing I would say, Chairman, is  
7 that the fare adjustment mechanism that exists under  
8 your franchise agreement here provides a little bit of  
9 slack in the sense there's a formula for adjusting the  
10 fares, changes in operating costs and revenue, for  
11 example, are one of those things, but the need to  
12 provide the bus operator with a reasonable rate of  
13 return is one element to be taken into account in fare  
14 adjustment.

15 So plausibly somebody who's losing the sort of  
16 business that you talked about in competition could make  
17 an argument against a clause like that.

18 CHAIRMAN: We have received evidence from the bus  
19 operators -- and I think it's fair to categorise it in  
20 this way -- that they are not very happy with this fare  
21 adjustment mechanism, and they have reached the extent  
22 in which they don't even make applications because they  
23 anticipate them being rejected.

24 PROF JOHN STANLEY: I think it's really important that  
25 a franchise or a contract has a clear and unambiguous  
26

1 means of adjusting fares. In our case, it's not so much  
2 fares as the return to the operator that gets subjected  
3 to the same sort of formula. So you would look at  
4 what's happening to wages, you would look at what's  
5 happening to fuel costs, you would look at what's  
6 happening to other elements of costs in the cost  
7 structure, and we would take those into account in  
8 changing the remuneration or the subsidy level, if you  
9 like, that the operator receives from government;  
10 whereas here it gets built into the fare-setting process  
11 as the medium that you use to achieve the same outcome.

12 CHAIRMAN: Having said what I did about the bus operators'  
13 views as a fare mechanism adjustment, I ought to add  
14 that they have overcome their misgivings by both making  
15 applications which are being considered by government at  
16 the moment.

17 Mr Chan, if that's a convenient moment.

18 MR DEREK CHAN: Yes, I was actually going to move on to the  
19 next topic, so that's very convenient.

20 CHAIRMAN: Prof Stanley, we are going to take a break now,  
21 to give all of us a break, for 20 minutes, and resume  
22 after that.

23 PROF JOHN STANLEY: Thank you, Chairman.

24 (11.35 am)

25 (A short adjournment)

26

1 (11.56 am)

2 CHAIRMAN: Professor, before we resume, might I just mention  
3 two matters. One is, as you know, we have simultaneous  
4 interpretation being performed for us. So, for the  
5 benefit of those that are listening to the  
6 interpretation, might I invite you to slow down in your  
7 answers, perhaps even making pauses, so that they can  
8 follow up with you.

9 The other is that perhaps you could speak more  
10 closely to the microphone which enables all of us to  
11 hear you better. It's no doubt adjustable. You will  
12 find whatever is a comfortable distance.

13 PROF JOHN STANLEY: Thank you.

14 CHAIRMAN: Mr Chan.

15 MR DEREK CHAN: Thank you, Mr Chairman.

16 We had been talking about incentivising safety just  
17 before the break. I am going to focus more specifically  
18 on that topic now.

19 Before the break, you have talked a little bit about  
20 what possible indicators to focus on if you want  
21 a safety-related incentive. Can I just ask a general  
22 question: how do you envisage this working in  
23 an environment where the bus operator already assumes  
24 the risk of profit from the bus operation, so they  
25 themselves depend on patronage? Do you envisage this

26

1 sort of incentive being a direct cash payment or a cash  
2 deduction, a fine of some sort? Is that what's being  
3 envisaged, or is that something different?

4 PROF JOHN STANLEY: No, that's exactly what I envisage,  
5 Mr Chan.

6 MR DEREK CHAN: So you would have targets or benchmarks, so  
7 to speak, and if you don't make them, there will be  
8 a penalty clause, and if you go over them, there will be  
9 a bonus payment as such?

10 PROF JOHN STANLEY: Indeed, and I would imagine you would  
11 set that up in bands, so you might fall short by  
12 a little bit, or fall short by a big bit, or you might  
13 accomplish the target by a small amount or by a large  
14 amount, and that the level of the incentive or penalty  
15 would reflect those thresholds, if you like.

16 I would just make a few comments which -- I talked  
17 before the break about, for example, fatalities, "slips,  
18 trips and falls", and so on, being some of the sorts of  
19 things you might take into account. In terms of  
20 developing KPIs or performance indicators, there's  
21 a number of criteria that you would expect them to meet.  
22 They need to be specific. You've clearly got to be able  
23 to measure them. They ought to be achievable. They  
24 clearly need to be relevant. The data, and so on, needs  
25 to be available on a timely basis. And all of those

26

1 KPIs need to be something that the operator can affect.  
2 There's no point having a KPI if the operator is not  
3 able to, by their performance, influence the outcomes of  
4 them. So they are really important.

5 But I also go back to the point I said before about  
6 we see safety as a shared responsibility, and I think it  
7 would be a real shame if those KPIs focused excessively  
8 on the bus captains and not enough on other people who  
9 are also, I believe, part of the chain of responsibility  
10 for bus safety. So you would look at particular sorts  
11 of safety performance indicators, which might be things  
12 like fatalities and "slips, trips and falls", and so on.  
13 But you would also try and see if there's a way in those  
14 indicators to target a range of people who can affect  
15 safety outcomes, not just the bus captains. Bus  
16 captains often tend to be the kind of target for a lot  
17 of this sort of work and that's probably a bit unfair.

18 MR DEREK CHAN: By your previous answer, do you have in mind  
19 actually a bonus system from the government that not  
20 only extends to the operator but employees of the  
21 operator or --

22 PROF JOHN STANLEY: I think that would be a matter for the  
23 companies to work out, how they think they are going to  
24 get the best result in terms of the objectives that  
25 they've got. But I had initially envisaged that this  
26

1           would be a bonus or a penalty at the company level, and  
2           then the company would make a judgment about whether it  
3           would like to reward, for example, particular people who  
4           have contributed to that outcome.

5       MR DEREK CHAN: We have talked about at a general conceptual  
6           level. Can I take you to a specific example that we  
7           have come across during the inquiry -- there are  
8           a number of examples but I will just pick one of them.

9       PROF JOHN STANLEY: Thank you.

10      MR DEREK CHAN: Just to illustrate how the concept may or  
11           may not work, and ask for your observations on that  
12           example.

13           Can I first take you to the TD-1 bundle at page 192.  
14           Just so you know what this document is, it is a KMB  
15           forward planning programme, and this particular page is  
16           one page of the section on bus safety for 2018 to 2022.

17           So this document, at page 192, would have been  
18           submitted by KMB to the Transport Department in around  
19           mid-2017.

20           So, at paragraph 8.8.1 of this document:

21           "KMB proposes to use the 3-year average of 2014 to  
22           2016 actual accident involvement rate of 2.71 (defined  
23           as the number of buses involved in accidents per million  
24           kilometres operated) as a target for the purpose of this  
25           five-year plan period. It represents a 6 per cent  
26

1 reduction from the accident rate in 2014, the highest  
2 record among 2014 to 2016."

3 So here we have the setting of a target or  
4 benchmark, so to speak.

5 So this is the target that KMB set for themselves as  
6 one possible safety indicator. This is in 2017.

7 If I can fast-forward one year and see what happens  
8 in mid-2018, and for that can I invite you to go to  
9 TD-5, page 1729.

10 Sorry, can I just go back a page, to 1728, just to  
11 give the document some context. So, at 1728, you see  
12 a letter from the Transport Department dated 21 May  
13 2018, and it's from the Transport Department to KMB.  
14 The first paragraph of the letter says:

15 "This is to provide you with a set of guidelines and  
16 requirements covering the following aspects for your  
17 compliance in preparation of the five-year forward  
18 planning programme (2019 to 2023) ..."

19 So we are one year on, and we are on the topic of  
20 the same forward planning programme.

21 Over the page, on 1729, you will see the Transport  
22 Department's comments on bus safety. In the first  
23 paragraph, the Transport Department says:

24 "We note that there was an increase in the number of  
25 KMB buses involved in accident per million  
26

1 vehicle-kilometres from 2.74 in 2016 to 3.04 in 2017,  
2 which was at a high level."

3 In the next paragraph, I will just read the last  
4 sentence:

5 "Also, the actual accident involvement rate, which  
6 is 3.04 in 2017, was higher than the proposed target  
7 accident involvement rate in your FPP" -- that's the one  
8 we saw earlier" -- which was 2.71."

9 And you can see in the table below that the accident  
10 rate per million vehicle-kilometres has been increasing,  
11 2015, 2016 and 2017.

12 The paragraph below the table also notes that:

13 "In terms of number of traffic accidents/number of  
14 cases involving KMB buses as shown in the table below,  
15 it has also shown an increasing trend from 362 in 2015  
16 to 423 in 2017."

17 From the passages I have just read, we see that KMB  
18 did not meet the accident target rate that it set for  
19 itself. You can also see an increasing trend in KMB's  
20 accident rate per million vehicle-kilometres.

21 In this context, where KMB has failed to meet the  
22 target it set for itself, do you see your suggested  
23 incentive/penalty system operating in a situation like  
24 this?

25 PROF JOHN STANLEY: Yes, but I wouldn't apply it the way  
26

1           it's been applied here.

2           If you look through the rows in the table that's  
3           headed, "Number of KMB buses involved in traffic  
4           accidents", you will see the number of fatalities has  
5           gone from 11 to 5 to 3; the number of serious injuries  
6           has gone from 122 to 110 to 11; and the number of slight  
7           injuries has gone from 737 to 787 to 889.

8           Now, to quote an accident rate per million  
9           vehicle-kilometres that treats each of those rows as  
10          equally weighted is, to me, an error if you are trying  
11          to develop a performance indicator.

12          I would say fatalities are far and away more  
13          important than serious injuries, which are a lot more  
14          important than slight injuries. So you need a weight to  
15          apply to reflect the significance of those types of  
16          accidents, if you are going to come up with a KPI, if  
17          you like, that measures accident safety performance.

18          And accident rates per million vehicle-kilometres  
19          are a very blunt and, I believe, a misleading measure.

20       MR DEREK CHAN: You would need a more nuanced indicator or  
21          set of indicators?

22       PROF JOHN STANLEY: Absolutely. You need a set of more  
23          nuanced indicators. These should form part of it, but  
24          it should be the components, not the total.

25          And the components need to be weighted in some way

26

1 to reflect -- I mean, as an economist, I would use the  
2 cost of those different sorts of accidents, which we  
3 regularly measure in Australia and I'm sure you do here  
4 in Hong Kong: you have a value for a typical fatal  
5 accident, you have a value for a typical serious injury  
6 accident, and you have a value for a typical slight  
7 injury accident. I would use those weights to come up  
8 with a weighted, if you like, accident rate per million  
9 vehicle-kilometres.

10 Have in mind also, though, there would be other  
11 things you would want to include as well.

12 MR DEREK CHAN: If you go on to the next page, 1730, at the  
13 bottom, section 3, the Transport Department proposes  
14 a safety-related plan, or KMB proposes a safety-related  
15 plan. I will just read the first paragraph under that  
16 heading:

17 "With a view to lower accident involvement rate of  
18 buses and further enhance the safety of bus services  
19 provided to the passengers, your company is required to  
20 propose respective plans/proposals", and there are  
21 a number of them.

22 If you go over the page to 1731, the Transport  
23 Department required KMB to propose a target accident  
24 rate for the coming FPP, and proposed target reduction  
25 of accident involvement rate.

26

1           Again, your opinion would be that these targets are  
2           too blunt, even as a target?

3       PROF JOHN STANLEY: Absolutely, Mr Chan. They need to be  
4           more nuanced than that.

5           I would have thought targets like that ought to be  
6           the outcome of a negotiation between the Transport  
7           Department and the operator, rather than something that  
8           the operator is going to propose to the department.  
9           I think this is the sort of thing that really should be  
10          the subject of a discussion where both parties can put  
11          their cards on the table and come up with a feasible  
12          programme.

13       MR DEREK CHAN: Professor, I notice from your report that  
14          the Melbourne bus contracts do not specify safety  
15          performance as being subject to incentive and penalty  
16          provisions under contract.

17          Can I first take you to the reference and then ask  
18          for your opinion on that.

19       PROF JOHN STANLEY: Yes.

20       MR DEREK CHAN: Can I take you to page 26 of the expert  
21          bundle. That should be in your first report.

22          Are you on page 26?

23       PROF JOHN STANLEY: Yes.

24       MR DEREK CHAN: Can I read the second full paragraph,  
25          paragraph 3.4:

26

1 "Under the ten-year metropolitan route bus service  
2 contracts that expire in mid-2018, incentive/penalty  
3 provisions relate to patronage growth ... and on-time  
4 running/service cancellations. The contracts that will  
5 replace those contracts generally retain this focus.  
6 Safety is not a KPI [key performance indicator] under  
7 the contracts and safety performance is not subject to  
8 incentive/penalty provisions under the contracts but  
9 poor safety performance could result in the safety  
10 director removing an operator's accreditation, which  
11 would mean loss of contract. The new contracts are  
12 understood to provide for a passenger experience regime,  
13 which is about the operator's performance with respect  
14 to number, response and resolution of passenger  
15 complaints that fall within the operator's control.  
16 Relevant KPIs are yet to be developed but the focus is  
17 wider than safety."

18 Now, my question is a very simple one. If the  
19 incentivising safety concept is important, why is it not  
20 being incorporated in the Melbourne contracts?

21 PROF JOHN STANLEY: Yes. Mr Chan, the reason for that is  
22 that we rely very strongly, in our Melbourne contracts,  
23 on the legislative base of safety duties and chain of  
24 responsibility to achieve safety outcomes. So that  
25 essentially makes all the parties who are able to  
26

1 influence safety outcomes responsible for and  
2 accountable for their performance in that regard.

3 I personally believe that is the primary reason why  
4 our services are held in a high regard from the safety  
5 point of view. The Transport Safety Director, who I've  
6 met many times during the preparation of the submissions  
7 to your hearing, is firmly of the view that Melbourne's  
8 route bus services are safe, and I believe that the  
9 fundamental reason that that's the case is that people  
10 can be held to account for their performance in the  
11 event that it's not safe.

12 So we've really got a very strong underpinning of  
13 the contract regime by safety duties and chain of  
14 responsibility in the law.

15 MR DEREK CHAN: Just to give a very general understanding of  
16 the concept that you just raised -- so you have legal  
17 duties in Victoria to promote safety insofar as  
18 reasonably practicable, but perhaps the peculiar feature  
19 of that is that that duty is not just on the bus  
20 operator but also on the employees that come under the  
21 bus operator?

22 PROF JOHN STANLEY: Yes, Mr Chan. The Bus Safety Act, which  
23 is the relevant legislation in Victoria, legislates  
24 safety duties. The primary safety duty, if I can read  
25 the line from the legislation, is an obligation to  
26

1 eliminate or minimise potential harm or risk by doing  
2 all that is reasonably practicable to ensure safety.

3 Then, if you take an example, it talks about:

4 "An operator of a bus must, so far as is reasonably  
5 practicable, ensure the safety of the bus service."

6 Now, the legislation then designates safety duties  
7 that apply to a range of people, and it mentions --

8 CHAIRMAN: Just pause there, if you would, Professor.

9 Do we have this available so it can be displayed on  
10 the screen?

11 MR DEREK CHAN: Yes, we have. It would be in, probably, the  
12 professor's first report.

13 CHAIRMAN: But is it not in an annex to -- or one of the  
14 documents to which reference is made in the report? Are  
15 those documents available? Do we have the Bus Safety  
16 Act?

17 MR DEREK CHAN: Perhaps the professor can assist on that,  
18 but not as far as I can see from the references attached  
19 to the --

20 CHAIRMAN: I must say, I have downloaded this myself and  
21 I have it in my own bundle. Is this not available for  
22 all of us?

23 MR DEREK CHAN: Yes, we can perhaps make it available.

24 CHAIRMAN: But is it not already available on the screen?

25 Is there a reference number -- I have three volumes of  
26

1 references to Prof Stanley's report on my right-hand  
2 side -- is it one of those?

3 PROF JOHN STANLEY: Pages 22 and 23 of my first report  
4 contain most of the relevant bits of the legislation.

5 MR DEREK CHAN: Mr Chairman, the references annexed to the  
6 professor's report contain articles and publications  
7 that describe the chain of responsibility, but not the  
8 Act itself.

9 CHAIRMAN: Then we need the Act.

10 MR DEREK CHAN: Perhaps I can make that available over our  
11 next adjournment. Then we can come back to that issue.

12 CHAIRMAN: Yes. But, at all events, we have an excerpt from  
13 it at page 23?

14 MR DEREK CHAN: Yes, we have.

15 CHAIRMAN: You were about to go on, Professor, to describe  
16 upon whom these duties are imposed.

17 PROF JOHN STANLEY: Thank you, Chairman. The legislation  
18 actually talks about, if I use your language, bus  
19 captains. It talks about schedulers. It talks about  
20 service procurers, maintenance staff, and so on.

21 There is a concept in the legislation called bus  
22 safety workers, and these safety duties apply to bus  
23 safety workers as well as to particular designated  
24 people such as drivers or bus captains.

25 So there is an extensive range of parties who can  
26

1           affect safety, and the two -- or a fundamental principle  
2           on which the legislation sits is the principle of shared  
3           responsibility which I talk about at the bottom of  
4           page 22 of the report.

5   CHAIRMAN: Does this duty extend to the public?

6   PROF JOHN STANLEY: It's not designated as such, no.

7   CHAIRMAN: I thought I had seen that in the legislation.

8   PROF JOHN STANLEY: I've missed that, if that's the case.

9   CHAIRMAN: I'm sure you are more familiar with it than I am.  
10          I was a bit taken aback, if my memory is correct.

11          But, at all events, a chain of people who have  
12          duties?

13   PROF JOHN STANLEY: Who can affect safety outcomes. It's  
14          really, I think, to remind people that this isn't just  
15          the bus drivers. You know, there are a lot of people  
16          who can affect safety outcomes, and they all need to be  
17          held accountable for their performance.

18   CHAIRMAN: So how are they held accountable; by being taken  
19          to court?

20   PROF JOHN STANLEY: That can happen. The provisions  
21          essentially have monetary fines that I --

22   CHAIRMAN: And there are different levels depending on  
23          whether it's the company, the scheduler, the bus  
24          captain, and so on?

25   PROF JOHN STANLEY: Yes.

26

1 CHAIRMAN: With the highest level reserved for the upper  
2 echelons of the company?

3 PROF JOHN STANLEY: Correct, and in the new national law  
4 that's about to come into play on 1 October -- which, in  
5 a sense, sets the background for the Victorian law --  
6 they have introduced a category of "reckless behaviour"  
7 as well, which can lead to prison as a possible  
8 consequence.

9 CHAIRMAN: Yes.

10 PROF JOHN STANLEY: That's in the National Heavy Vehicle Law  
11 update, but that will get reflected through shortly  
12 into, if you like, the penalties that can apply under  
13 this legislation. At the moment, they are mainly  
14 monetary penalties.

15 CHAIRMAN: Before you go on, we've now got the Act. Which  
16 section tells us about who's got the public duty?

17 PROF JOHN STANLEY: Clause 15 was where I was talking -- so  
18 the duty of an operator, for example:

19 "An operator of a bus service must, so far as is  
20 reasonably practicable, ensure the safety of the bus  
21 service."

22 Then, if you go down to clause 16, it has similar  
23 language for a procurer.

24 CHAIRMAN: What is a procurer?

25 PROF JOHN STANLEY: A procurer is somebody who buys a bus  
26

1 service, and there's a really interesting discussion  
2 going on at the moment in Victoria about whether the  
3 public transport authority, which buys and determines  
4 the schedules, is a procurer and might in fact be one of  
5 the chain of responsibility.

6 CHAIRMAN: Why would it not be?

7 PROF JOHN STANLEY: That would be my view, Chairman.

8 So this continues, going down, in that way.

9 Then, in section 14 of the Act, it talks --

10 CHAIRMAN: Can we just scroll down the list for the moment,  
11 if we may. So we were going to 17. 17 is a bus safety  
12 worker.

13 PROF JOHN STANLEY: 17 is a bus safety worker. Now, the  
14 "bus safety worker" is defined up in the definitions at  
15 the front part of the legislation.

16 CHAIRMAN: What does that encompass, broadly?

17 PROF JOHN STANLEY: I suggest it would be better to look at  
18 that than to rely on me to remember it, Chairman.

19 CHAIRMAN: Very sensible. Can we go to the definitions  
20 section, which is normally section 1.

21 "Definitions", section 3. Yes, "bus safety work".

22 Is there "bus safety worker"? There we are.

23 PROF JOHN STANLEY: So a bus safety worker means:

24 "... a person who has carried out, is carrying out  
25 or is about to carry out, bus safety work", which is

26

1 defined in the previous point, "including a person who  
2 is --

3 (a) employed or engaged by a bus operator to carry  
4 out bus safety work;

5 (b) engaged by any other persons to carry out bus  
6 safety work;

7 (c) a trainee;

8 (d) a volunteer".

9 So this is quite broad, and, Chairman, this is where  
10 we as bus testers in road safety inspection -- that's  
11 why we were concerned, because we do testing of  
12 vehicles, and we saw that this provision could pick us  
13 up.

14 CHAIRMAN: Yes. Can we go to "bus safety work", the  
15 previous definition.

16 PROF JOHN STANLEY: It means:

17 "... an activity that may affect the safety of bus  
18 services including --

19 (a) driving a bus or activities associated with  
20 driving a bus;

21 (b) designing, constructing, supplying, repairing,  
22 modifying, maintaining, monitoring, examining or testing  
23 a bus ..."

24 CHAIRMAN: That's the section that applies to you.

25 PROF JOHN STANLEY: That's us.

26

1 "... (c) designing, constructing, supplying,  
2 installing, repairing, modifying, maintaining,  
3 monitoring, examining or testing equipment in or on  
4 a bus;

5 (d) setting or altering a schedule or timetable for  
6 a bus service;

7 (e) a prescribed activity"; I'm not sure what that  
8 means.

9 But this is pretty comprehensive, and it's really  
10 important, I think, to understand that the managers in  
11 the bus companies know this. They are very conscious of  
12 it. And, for example, in discussions about bus driver  
13 working hours, this is really front of mind in terms of  
14 what they will accept. So, for example, our bus drivers  
15 or bus captains on average would work 44 to 46 hours  
16 a week. They can, under the regulations, work more than  
17 that. They don't, because the operators are concerned  
18 about the safety implications of so doing.

19 In fact, the CEO of one of the larger operators,  
20 when he took on that role in 2008, had an average of  
21 about 48 hours, and he brought that down to within the  
22 44 to 46 range over the subsequent four or five years.  
23 And most of the Melbourne operators are running at  
24 around about 45, in round terms, hours' driving a week.

25 CHAIRMAN: What are the maximum permitted hours of driving  
26

1 per week?

2 PROF JOHN STANLEY: They could do 72, Chairman, which we  
3 wouldn't think very favourably on.

4 CHAIRMAN: And is it your evidence that it is, because  
5 regard is had to this safety duty, one of the reasons  
6 that these hours have been reduced?

7 PROF JOHN STANLEY: Yes. The operators are very conscious  
8 of the scheduling requirements, and, for example, one  
9 operator builds 35 minutes' I think slack into a five  
10 and a quarter hour shift to allow for traffic congestion  
11 affecting their run times because they don't want to go  
12 beyond the five and a quarter hours which, under our  
13 regulation, is the maximum you can drive without having  
14 a break.

15 And if you talk to them, they have absolutely front  
16 of mind that this is the potential safety consequences  
17 and implications for them if, for example, somebody was  
18 killed by a driver driving an excessive amount of time.

19 CHAIRMAN: Yes, Mr Chan.

20 MR DEREK CHAN: And the point that you were making, going  
21 into this chain of responsibility topic, was that  
22 because you have this underlying layer of legal  
23 obligations and duties, that explains why you don't need  
24 to specifically incentivise safety in the bus contract  
25 itself?

26

1 PROF JOHN STANLEY: Yes.

2 MR DEREK CHAN: So, in Hong Kong, where we don't have that  
3 sort of underlying legislative regime of duties and  
4 obligations on safety, would you say that it makes it  
5 more important to incentivise or focus on safety in  
6 other ways?

7 PROF JOHN STANLEY: I think it's a good way to increase the  
8 focus on safety, but not nearly as powerful or  
9 compelling as the safety duties and chain of  
10 responsibility provisions that we have. But I would  
11 also say that if you were to use safety penalties and  
12 incentives then, to go back to a point I made earlier,  
13 try and ensure that those incentives and penalties  
14 encompass a number of parties who are able to affect  
15 safety outcomes. In a sense, it's a de facto way of  
16 trying to do chain of responsibility.

17 CHAIRMAN: Could you give us some context for the Bus Safety  
18 Act? Is this the Act that brought into Victoria safety  
19 duties of this kind?

20 PROF JOHN STANLEY: Yes. The way the law works, Chairman,  
21 is that -- essentially, it is driven by the national law  
22 that I was involved in when I was at the National Road  
23 Transport Commission. We now have a National Road  
24 Transport Commission, and Heavy Vehicle National Law is  
25 set through that national process and it gets applied at  
26

1 the state level.

2 Now, not all states have a Bus Safety Act like this.  
3 Victoria and New South Wales, which are the two biggest  
4 states that have gone the furthest in this regard, and  
5 in fact the Bus Safety Act here got a bit ahead of the  
6 national legislation by introducing this idea of "so far  
7 as is reasonably practicable". The national legislation  
8 until I think 1 October this year is still based on "all  
9 reasonable effort" type of concepts. But this Victorian  
10 Act has had "so far as is reasonably practicable" as its  
11 basis since 2009, and the national law is picking that  
12 up on 1 October. So, in a sense, the national law is  
13 catching up a little bit to what the Bus Safety Act is  
14 saying.

15 CHAIRMAN: But how many years in the making has this process  
16 involved?

17 PROF JOHN STANLEY: Probably about three or four. It  
18 happened when I was CEO of the Bus Association. The law  
19 was in 2009 and I had that role from 1999 to 2008. So,  
20 you know, the legislation and putting the industry's  
21 views on the development of legislation was something  
22 that I was involved in through that time.

23 And I think I said in my first paper that partly  
24 because the industry receives a substantial amount of  
25 financial support from government, we wanted to be seen  
26

1 as very proactive in terms of safety, that we are good  
2 corporate citizens. So, in a sense, we were very  
3 proactive or keen to see safety legislation of this kind  
4 to which we thought we could confidently say we would  
5 comply.

6 CHAIRMAN: That, of course, is not the factual circumstance  
7 of Hong Kong.

8 PROF JOHN STANLEY: Indeed. I would say that if you look at  
9 simple indicators like fatality rates per million  
10 vehicle-kilometres, Hong Kong and London are not as good  
11 as Melbourne, and one possible reason for that is the  
12 fact that we've got this legislation. Another possible  
13 reason is our bus operating circumstances are probably  
14 a bit easier than they are in Hong Kong, in a physical  
15 sense, and London too.

16 MR DEREK CHAN: Correct me if I am wrong, but I suppose one  
17 factor in play here is that because you have a heavily  
18 subsidised system, and a cost-plus-profit contract  
19 structure, any increased costs that relate to safety can  
20 in that sense be passed on to the government?

21 PROF JOHN STANLEY: Absolutely. But it also means that the  
22 government then looks very closely at any potential  
23 additions to cost that may be from a safety perspective.

24 An example would be we've had concerns for a number  
25 of years, but more particularly in the last three or  
26

1 four years, with abuse and assault of bus drivers, and  
2 so installing security screens, closed-circuit  
3 television, and so on, to deal with problems like that  
4 have become a basis for sharing. So the operators are  
5 in fact meeting part of the cost of that and the  
6 government is meeting part of the cost of that.

7 So it's a negotiated outcome.

8 MEMBER LO: In proposing and enhancing this Bus Safety Act,  
9 who are the possible resistance and opposition against  
10 it? Who might be that?

11 PROF JOHN STANLEY: Who would be against it?

12 MEMBER LO: Yes. I mean, is it a straightforward thing  
13 or --

14 PROF JOHN STANLEY: I can't think of anybody. The people  
15 who might be opposed to it, you would think, would be  
16 bus operators, because it really makes them accountable,  
17 but our bus operators in Melbourne are very much behind  
18 this legislation and the accreditation system, that is  
19 one of the key elements to implement it, because they  
20 know, or they believe, that it improves the safety  
21 outcomes that they can achieve.

22 So, for example, it makes them a better place for  
23 someone to go and work because they think their drivers  
24 are more likely to be safer than in a system that  
25 doesn't have this same level of focus.

26

1           So I don't see anybody really opposed to this,  
2           because the most likely candidate is one of the  
3           strongest components for having it.

4   MEMBER LO: Yes, but it is imposing duties and obligations  
5           and liabilities upon them, and they welcome it?

6   PROF JOHN STANLEY: They think they can perform to an extent  
7           where they can meet their obligations to a satisfactory  
8           level. In that event, they see that it can enhance  
9           their standing as an industry that is a responsible  
10          industry. So it has really been approached as  
11          an industry, and I think that's one of the benefits that  
12          we have in Melbourne from having a very strong operator  
13          association, that we can speak as an industry rather  
14          than as individual operators.

15   CHAIRMAN: Of course, there is an economic advantage to  
16          enhanced safety, because accidents cost money.

17   PROF JOHN STANLEY: Indeed.

18   CHAIRMAN: That's a benefit to the bus operators.

19   PROF JOHN STANLEY: Indeed, Chair.

20   MR DEREK CHAN: In the same context, the committee has  
21          received, in the form of a written report, some opposing  
22          views to the concept of incentivising safety. Can  
23          I invite your observations on that?

24   PROF JOHN STANLEY: Mm-hmm.

25   MR DEREK CHAN: Can I do that firstly by going to the expert  
26

1 bundle, page 153.

2 Just to give this report some context, it is  
3 a report prepared by Mr Mike Weston, who is a passenger  
4 transport consult, and he specialises in the London bus  
5 system.

6 The page is at page 153 at the bottom right-hand  
7 corner, and the passage that I'm interested in is under  
8 the heading, "Incentivisation of safety improvements".  
9 I will just read that paragraph:

10 "As referred to in section 6.1 one of the  
11 recommendations from the Greater London Assembly  
12 Transport Committee was 'Revise its senior staff bonus  
13 scheme to introduce a direct link between bus safety and  
14 performance-related payments'. Also, within the body of  
15 the report, there is a recommendation that 'TfL's  
16 [that's Transport for London's] contracts with bus  
17 operators do not incentivise safety and should be  
18 revised'. During discussions with the London bus  
19 operators it was clear that operators do not support the  
20 direct incentivisation of safety within the route  
21 agreement. Operators were concerned that direct  
22 financial incentivisation might drive the wrong  
23 behaviours, especially at lower levels within the  
24 company, including potentially encouraging  
25 underreporting. Also, operators felt that linking  
26

1 safety performance to financial payments could lead to  
2 a reluctance to collaborate with other operators on  
3 safety-related issues as it now had a competitive and  
4 commercial benefit. Overall options to incentivise  
5 safety within the bus contracts were not seen as  
6 a positive move."

7 So he's identified two possible risks. First, the  
8 underreporting of issues, and secondly, reduces  
9 collaboration between bus operators.

10 Do you have any observations or comments to make in  
11 respect of these two potential risks identified by  
12 Mr Weston?

13 PROF JOHN STANLEY: Yes. Look, I acknowledge that there is  
14 a risk that you could incentivise underreporting, but  
15 I think that's a case of trying to design monitoring  
16 systems and compliance assurance systems that make sure  
17 that doesn't happen.

18 For example, in our setting, the Transport Safety  
19 Director is the system auditor. He is an independent  
20 person, organisation, with a statutory brief to accredit  
21 operators and to ensure that they are complying with the  
22 provisions of that accreditation regime, and they  
23 include things like reporting.

24 So I think, if you are going to design incentives  
25 and penalties, you need to make sure that you do guard  
26

1           against that risk. Now, that may be hard to do, but  
2           that's something you've got to "suck it and see",  
3           I think, try to find a system that deals with that risk.

4           As I say, our existence of a Transport Safety  
5           Director as the system umpire or auditor I think is  
6           a way that you can help to do that.

7           The issue of reluctant --

8   MR DEREK CHAN: Before you go to the next issue, can I just  
9           flesh out that first issue, underreporting?

10   PROF JOHN STANLEY: Sure.

11   MR DEREK CHAN: Your evidence is that the risk of  
12           underreporting can be met with putting in place  
13           a reliable system that ensures that the data is  
14           accurately collected and recorded? Am I understanding  
15           your evidence properly?

16   PROF JOHN STANLEY: Yes. That would be where I would be  
17           looking for the solution and, you know, that is  
18           something that you would need to work through and see  
19           that you can achieve that outcome. But the intention  
20           would be to use that sort of process to try and deal  
21           with that problem.

22   MR DEREK CHAN: So, to some extent, provide some automation  
23           in the data collection and remove the human element?

24   PROF JOHN STANLEY: That, but also maybe trying to link up  
25           databases because incidents or accidents come you

26

1 through various sorts of channels. Those --

2 CHAIRMAN: Yes. I am puzzling as to how one could  
3 under-report accidents, because so many different  
4 parties would be involved; it wouldn't just be -- it  
5 would be the bus driver, it would be the passenger, it  
6 might be the police, it would be ambulance. How do you  
7 under-report that?

8 PROF JOHN STANLEY: Just thinking out loud, Chairman, we  
9 have a problem in Melbourne sometimes of children  
10 throwing rocks at buses on a freeway as the bus goes  
11 underneath. If you were the operator and you were on  
12 an incentive that's based on involvements of potentially  
13 accident-type incidents, you might decide, "We will  
14 ignore that, we won't report that", whereas in fact if  
15 it had broken the window, hit the driver, you could have  
16 killed X people.

17 CHAIRMAN: That would be a system where your fault doesn't  
18 come into the equation. This is someone else's criminal  
19 act and you might be penalised that.

20 PROF JOHN STANLEY: It is.

21 CHAIRMAN: There must be ways of getting around that.

22 PROF JOHN STANLEY: I think, when we were talking about the  
23 criteria for indicators, it needs to be something that  
24 you've got control over.

25 CHAIRMAN: Yes.

26

1 PROF JOHN STANLEY: So I think you've nailed that one well.

2 Thank you.

3 CHAIRMAN: I think, if my memory is correct, the 42

4 components of the London assessment contain the fact of  
5 the bus driver being abused. How on earth that should  
6 redound to the detriment of the bus company is difficult  
7 to understand.

8 PROF JOHN STANLEY: It is important information to have, but  
9 it's not something that you would want to be judging  
10 a safety penalty on.

11 I think this needs some really creative thinking,  
12 Mr Chan. This is not easy. But, you know, if you are  
13 looking at it as an alternative to safety duties and  
14 chain of responsibility, then I think the challenge  
15 needs to be tackled to make sure you don't encourage  
16 underreporting.

17 If I could deal with the second issue.

18 MR DEREK CHAN: Sorry, I interrupted you there. Please  
19 continue to deal with the second issue.

20 PROF JOHN STANLEY: I think, in a competitive tendering  
21 situation, if you are an operator who has good safety  
22 processes, you would think the inclination would be that  
23 you would use that to back your pitch, and you probably  
24 would not share information with other operators.

25 So I'm not quite sure about this. A reluctance to  
26

1 collaborate, I think that's more to do with the problem  
2 of competitive tendering than it is to do with the  
3 challenge of safety KPIs. I think one of the things  
4 we've found is that in a competitive tendering  
5 environment, there's a general reluctance of operators  
6 to collaborate because they don't want to give away  
7 their competitive advantage, and if safety was one of  
8 your competitive advantages, then you would keep that to  
9 yourself.

10 So I don't really get that solution. I think one of  
11 the other points that was made by the London report --  
12 and I think it's a really important point to make -- is  
13 the need for greater collaboration between the  
14 operators, and between the operators and government, on  
15 safety matters. That's something that I had  
16 a recommendation of in my second report too.

17 CHAIRMAN: Whilst there might be a risk of lack of  
18 collaboration between operators directly -- if, for  
19 example, in the London system you have Transport for  
20 London as the government side of things -- the fact that  
21 one operator, for example, because he's using  
22 Mobileye 6, has reduced the front and rear shunts in  
23 accidents, that would be something that the bus  
24 authority would pick up and be able to say, "We've had  
25 some striking results from operator A", and they would  
26

1           disseminate that information to the other bus operators?

2       PROF JOHN STANLEY: You would hope so, Chairman. You would  
3       hope so. In fact, in a situation where you've got  
4       incentives and penalties, they can all put in the same  
5       technologies and all get a benefit from it.

6       CHAIRMAN: Yes.

7       PROF JOHN STANLEY: So I find that point a bit hard to  
8       understand, the second point.

9       CHAIRMAN: Yes, Mr Chan.

10      MR DEREK CHAN: So that's the incentive to the operator  
11      side.

12             Can I see if I can test the possibility of the  
13      further benefit of incentivising safety. So would  
14      a safety performance-related penalty/bonus system also  
15      have the potential to motivate the government to monitor  
16      safety-related performance indicators more closely,  
17      because there is now an additional focus and financial  
18      consequence that relates specifically to safety?

19      PROF JOHN STANLEY: You would expect that that would be one  
20      of the consequences of this process, particularly if, as  
21      I said earlier, there's quite a task to be gone through  
22      first in actually devising what those incentives and  
23      penalties are going to look like.

24             So the authority, the Transport Department, if you  
25      like, has to involve itself in a pretty deep and

26

1 meaningful conversation with the franchised bus  
2 operators in the development of those KPIs, which brings  
3 up questions of how you would do that monitoring in the  
4 process, and that's likely to therefore vest in a much  
5 more rigorous process of monitoring and assessment.

6 MR DEREK CHAN: Yes, Professor. I am going to move on now  
7 to a different topic, and that is the topic of  
8 accreditation.

9 PROF JOHN STANLEY: (Nodded head).

10 MR DEREK CHAN: In the general sense, I understand from your  
11 report that bus operator accreditation forms a central  
12 part of bus safety in Melbourne. Basically, a bus  
13 operator cannot operate unless it is first accredited,  
14 and there is a possibility of that accreditation being  
15 taken away.

16 Can I go to two places in your report where you talk  
17 about that, to start off the topic.

18 The first page I would invite you to go to is page 9  
19 of your first report. So that's expert bundle page 9.

20 Again, I introduce the topic by reading out the  
21 first three full paragraphs of page 9:

22 "Bus operator accreditation, as a programme, was  
23 intended to ensure that a person could provide a safe,  
24 efficient and effective bus service. It started with  
25 three elements:

1           1. A transport management course for bus and coach  
2 operators run by Monash University, the scope of which  
3 depended on the type of service an operator wanted to  
4 provide. One senior representative of each contracted  
5 route service operator needed to complete the course,  
6 which included four units, one of which was 'safety risk  
7 management for bus operators', but also included units  
8 on the legal/regulatory framework, financial management  
9 and business development.

10           2. Management information systems.

11           3. Maintenance management systems.

12           As discussed in section 3.3 below, these three  
13 elements remain as key regulatory requirements for  
14 accredited route bus operators. The safety focus of  
15 accreditation more broadly has been  
16 substantially enhanced over the decade or so since  
17 inception, to focus increasingly on building what can be  
18 best described as a safety risk management culture, as  
19 discussed in section 3.3.

20           The bus operator accreditation system forms a major  
21 focus of this report because the author sees it as  
22 potentially the single most significant point of  
23 difference between the Melbourne safety regime and that  
24 in Hong Kong. As elaborated above, the institutional  
25 setting of Victorian route bus operation was  
26

1 particularly receptive to the development of this safety  
2 agenda at the time of its inception."

3 So, as I understand it, the accreditation system  
4 focuses on the general running of the bus operation, of  
5 which safety forms part?

6 PROF JOHN STANLEY: (Nodded head).

7 MR DEREK CHAN: Now, I see a reference to the importance of  
8 management information systems and maintenance  
9 management systems in this accreditation programme. On  
10 those two topics, can I invite you to go to page 25 of  
11 this report, which refers back to those systems.

12 At the bottom full paragraph of page 25, I will just  
13 read the first half of the bottom paragraph:

14 "BusVic has played a very active role in  
15 establishing the implementing bus operator accreditation  
16 in Victoria. For example, it has contributed  
17 substantially to course content in the Monash University  
18 training programme that accredited operators must  
19 complete. Importantly, it has developed template  
20 responses to the requirements for management information  
21 systems (MIS) and maintenance management systems (MMS),  
22 based on ISO 39001, which should enable its members to  
23 develop and implement safety risk management systems  
24 that meet the requirements of the accreditation regime,  
25 provided they are diligently applied."

26

1           Now, I see the link between the accreditation system  
2           and ISO 39001, to which I will come back. But, firstly,  
3           can you describe generally what you see as the major  
4           advantages for bus operator accreditation that relate  
5           specifically to safety?

6   PROF JOHN STANLEY: Bus operator accreditation in Melbourne  
7           is very much about safety. Essentially, that's the  
8           fundamental rationale that sits behind the operation of  
9           the accreditation system. It's really about ensuring  
10          that the operator can provide a safe service, and it's  
11          no surprise then that the accreditation is provided by  
12          the Transport Safety Director. So the Transport Safety  
13          Director is the person who has to say, "Yes, this person  
14          can be an accredited operator", which then means they  
15          are eligible to have a contract with the government.

16          And the maintenance management system and the  
17          management information system, the scope of those two  
18          systems is in fact determined by the Transport Safety  
19          Director. So, under the relevant legislation -- and  
20          I think I may have referred to the clauses somewhere in  
21          my submission -- the Transport Safety Director tells the  
22          operators what they need to -- what he's expecting to  
23          see or they are expecting to see, in terms of their  
24          maintenance management systems and management  
25          information systems.

1 I've referred in my evidence to some of the  
2 documents. For example, this is "Maintenance Management  
3 Systems: For Accredited Bus Operators"; "Management  
4 Information Systems: For Accredited Bus Operators";  
5 "Managing the Risks to Bus Safety" -- these are  
6 publications by the Transport Safety Director which are  
7 intended, firstly, to leave operators in no doubt as to  
8 what is expected of them if they are to become  
9 accredited, but it also helps them through the process  
10 of meeting those requirements. And then the Bus  
11 Association, as I have referred in the bit that you've  
12 got highlighted on the screen, has actually developed  
13 template responses for its members to go through and  
14 customise, to meet the expectations of those maintenance  
15 management systems and management information systems.

16 The larger operators do a lot of particular  
17 tailoring of that to their own circumstances, but for  
18 some of the smaller operators those templates may get  
19 them almost all the way there.

20 MR DEREK CHAN: Please correct me if I am wrong, but my  
21 understanding is that the accreditation system, insofar  
22 as the safety aspects are concerned, focuses a lot on  
23 the risk management, and the setting up and running of  
24 systems to ensure safety.

25 Now, what I'm interested in is the comparison of  
26

1           that focus to ISO 39001. We've already seen a reference  
2           to 39001 in this paragraph. Can I also take you to your  
3           second report at page 78 of the expert bundle. I'm  
4           looking at the paragraph in about the middle of the  
5           page, just above the heading "Bus Captain Training".  
6           Again, I will just read it out and ask you questions on  
7           it:

8           "Final Transport Department" -- and I think that's  
9           a reference to the Transport Department in Hong Kong --  
10          "Road Traffic Management System, pointing out that this  
11          has been adopted by some fleet management companies and  
12          logistics companies but is not commonly adopted by the  
13          Transport Authority. It is noted in the first report on  
14          the current project that Victoria's operator  
15          accreditation system mirrors ISO 39001, and all route  
16          bus operators must achieve accreditation, but does not  
17          involve formal certification under that standard."

18          Now, my question is this. In the Hong Kong context  
19          where we do not have an accreditation system and we do  
20          not yet have competitive tendering, would requiring bus  
21          operators to achieve ISO 39001 have the same type of  
22          benefits on safety that can arise under the Melbourne  
23          accreditation system?

24       PROF JOHN STANLEY: You would expect that that would take  
25          you a fair distance in that direction. I think the

1 difference that you would also need to think about is  
2 the role of the Transport Safety Director, what  
3 mechanism you use, if you like, to assure compliance, as  
4 it particularly applies to bus operations in Hong Kong.  
5 So you would have the accreditation authority that does  
6 the ISO accreditation or certification, if you like,  
7 being sure that its expectations were met.

8 We don't have that, but we've got something like  
9 that, but we do also, though, have this Transport Safety  
10 Director who, in a sense, is the guardian of the system.  
11 So I would be looking to say, if you are going to do  
12 that, I think it's a really good idea.

13 I would think about, then, is there a role as well  
14 for somebody like the Transport Safety Director as  
15 an independent and accountable guardian, if you like, of  
16 system safety.

17 MR DEREK CHAN: Yes. In Melbourne that guardian of system  
18 safety, ensuring that the operator has the appropriate  
19 risk management systems in place, would be the Transport  
20 Safety Director?

21 PROF JOHN STANLEY: Correct.

22 MR DEREK CHAN: In an ISO 39001 context, that task would  
23 fall on the accreditation company to perform the annual  
24 audits?

25 PROF JOHN STANLEY: Yes.

26

1 MR DEREK CHAN: So that they can have the certification?

2 PROF JOHN STANLEY: Yes.

3 MR DEREK CHAN: Mr Chairman, I'm about to move on to the  
4 next topic of a standing committee on bus safety. Would  
5 that be a convenient moment?

6 CHAIRMAN: Yes, certainly.

7 Professor, we will adjourn now for our lunch break,  
8 and we will resume again at 2.30 this afternoon.

9 PROF JOHN STANLEY: Thank you, Chairman.

10 (12.57 pm)

11 (The luncheon adjournment)

12 (2.30 pm)

13 CHAIRMAN: Good afternoon.

14 Yes, Mr Chan.

15 MR DEREK CHAN: Thank you, Mr Chairman.

16 Prof Stanley, I am about to move on to the next  
17 topic. That is the standing committee on bus safety,  
18 and also the Transport Safety Director. I'm going to  
19 deal with these together.

20 You have already talked about, this morning, the  
21 role of the Transport Safety Director in enforcing the  
22 chain of responsibility and duties arising under the  
23 ordinance. So I will be focusing on this different  
24 aspect, if I may.

25 I am going to look at these two recommendations in  
26

1 the context of being able to promote a more proactive  
2 approach to safety and issues, rather than a reactive  
3 approach.

4 Can I start first by going to places in your report  
5 where you talk about these two recommendations. Can  
6 I start first with going to page 100 of the expert  
7 bundle, where you set out your main recommendations in  
8 bold, in about the middle of the page.

9 The second bullet point there talks about your  
10 recommendation for "the creation of the independent  
11 position of Transport Safety Director, whose role is to  
12 be responsible for administering matters related to  
13 safety duties, ensuring compliance and enforcement".

14 So that is the context in which you are recommending  
15 a Transport Safety Director, in the context of the  
16 recommendation about setting out duties and chain of  
17 responsibility and that sort of thing.

18 But what I am also interested in is an observation  
19 that you made at the bottom of page 99, so the previous  
20 page of the expert bundle. At the bottom of page 99,  
21 you say:

22 "The independence of the Transport Safety Director  
23 both elevates safety as a desirable policy outcome and  
24 provides an independent source of accountability and  
25 transparency on safety processes and outcomes that  
26

1       exceed what is likely to result if ... bus safety was  
2       left solely to the public transport regulatory agency  
3       and/or a governmental department to manage. The  
4       Transport Safety Director's audit processes and industry  
5       engagement has led the agency to the conclusion that  
6       Melbourne's route bus services and practices are safe  
7       and that the safety focus should be on developing  
8       a proactive and forward-looking safety ... management  
9       culture, as distinct from practices that react to safety  
10      concerns after they happen."

11       So that's the context of the safety director. In  
12      the same vein, can I then take you to the passage in  
13      your report where you talk about the standing committee  
14      on bus safety as another recommendation of yours. For  
15      that, can I please take you to --

16      CHAIRMAN: Before we move on, could you help us understand  
17      a bit more about the independent Transport Safety  
18      Director?

19      PROF JOHN STANLEY: Yes, Chair.

20      CHAIRMAN: What support services does he have? Who is he?  
21      Where does he come from?

22      PROF JOHN STANLEY: He was a position created by the  
23      Transport Integration Act, which is a 2010 act of the  
24      Victorian Parliament, that essentially reorganised a lot  
25      of the institutional arrangements for delivery and  
26

1 planning of transport in Victoria. So it created  
2 an organisation, essentially, to be the peak policy  
3 body, and then it created two agencies in terms of where  
4 public transport is going that in fact are responsible,  
5 if you like, for various elements of system planning.

6 The first one is Public Transport Victoria, who are  
7 essentially the contract administrator and the system  
8 planner. But it also created the independent position  
9 of Transport Safety Director and Transport Safety  
10 Victoria, because it wanted to put a significant focus  
11 on safety improvement in the transport space, and it  
12 felt that to do that, creating a separate entity with  
13 a statutory duty to perform that role, was probably the  
14 strongest way to do it.

15 An alternative, for example, might be to just make  
16 that another responsibility of the public transport  
17 agency, but I think the feeling at the time was that  
18 safety is sufficiently important to benefit from  
19 an independent, more arm's length approach, and so that  
20 was the reason, I think, that it was done in that way.

21 CHAIRMAN: What support does he have to discharge his  
22 duties?

23 PROF JOHN STANLEY: He has his own organisation with  
24 a staff, I don't know the actual number, but they have  
25 research staff; they have staff who do field audits, for  
26

1 example.

2 I'm guessing -- I'm simply guessing -- their staff  
3 numbers are probably around about 30 or 40, but I'll  
4 come back to you with an answer on that.

5 CHAIRMAN: Thank you.

6 What qualifications does he have, the occupant at  
7 the moment?

8 PROF JOHN STANLEY: He is an expert in safety risk  
9 management, I think in aviation was his experience  
10 background. So, essentially, because the focus has been  
11 on safety risk management, I think the feeling was that  
12 he would be a good person to come into that space and  
13 apply those lessons, if you like, that he had been  
14 learning and applying in the aviation field into the  
15 land transport area.

16 CHAIRMAN: And land transport encompasses buses, trains,  
17 trams?

18 PROF JOHN STANLEY: Yes, but he's also -- he's the director  
19 of bus safety as well.

20 CHAIRMAN: Thank you.

21 MR DEREK CHAN: So does the government still have any role  
22 to play in mandating safety behaviour, or is that all  
23 down to the Transport Safety Director?

24 PROF JOHN STANLEY: I'm sorry, could you repeat that?

25 MR DEREK CHAN: Does the government still have a role to  
26

1 play in ensuring bus safety, or is that all left to the  
2 Transport Safety Director?

3 PROF JOHN STANLEY: No, the government's role is essentially  
4 in setting the policy framework and attaching the  
5 priority to safety, and then it's the safety director's  
6 role to in fact implement and deliver on that policy  
7 objective for government.

8 I included, I think it was in my second report,  
9 a diagram that compared the structure of arrangements,  
10 at page 71, in Hong Kong and Melbourne. I split that up  
11 into three categories, which we often use to talk about  
12 institutional design: strategic or policy level,  
13 tactical or system design level, and the operational  
14 level. And in terms of the way that Hong Kong's  
15 organised and the way Melbourne's organised, you have  
16 your Transport and Housing Bureau at the policy level;  
17 we have an organisation called Transport for Victoria.  
18 At the operational level, you have franchised bus  
19 operators and we have contracted bus operators. Then in  
20 the middle, you have the Transport Department; we have  
21 Public Transport Victoria but we also have Transport  
22 Safety Victoria, and probably in terms of institutions,  
23 that's perhaps the biggest gap or the biggest difference  
24 between the two sets of arrangements.

25 MR DEREK CHAN: Along the same vein --  
26

1 CHAIRMAN: If you will excuse me, I have a nose bleed so I'm  
2 going to adjourn for a short while. Excuse me.

3 (2.39 pm)

4 (A short adjournment)

5 (2.50 pm)

6 CHAIRMAN: Apologies for the interruption, but I think  
7 normal services have been restored.

8 Yes, Mr Chan.

9 MR DEREK CHAN: Thank you, Mr Chairman.

10 Professor, just before the break, you were comparing  
11 the institutional structure in Melbourne and contrasting  
12 that with Hong Kong, and the observation being that  
13 Hong Kong does not have a dedicated safety department or  
14 body.

15 Along that same vein, at page 70 of the report,  
16 which is the previous page from this chart, in the third  
17 full paragraph you made some observations about the  
18 Hong Kong system, and in the last sentence you make the  
19 remark that:

20 "However, the absence of an independent safety  
21 regulator in Hong Kong seems likely to lessen the  
22 relative focus on safety matters."

23 Is that the point that you were making before, about  
24 the benefits of having such an independent regulator?

25 PROF JOHN STANLEY: Yes.

26

1 MR DEREK CHAN: Turning, if I may, then to the  
2 recommendation on the standing committee, which is at  
3 page 94 of the expert report. At the bottom of page 94,  
4 at point 6, you recommend establishing "a standing  
5 committee on bus safety", and you suggest "meeting at  
6 least twice yearly to review and evaluate the latest  
7 technology that may impact on bus safety, particularly  
8 for route bus operation, and advise government on  
9 desirable safety inclusions in the franchised bus fleet  
10 and other bus systems. The newly formed Working Group  
11 on Enhancement of Franchised Bus Safety could form the  
12 basis for this committee but membership should be  
13 broadened to include other bus operators."

14 Again, do I understand it correctly that both these  
15 approaches -- a standing committee on bus safety and  
16 a transport director -- would assist in promoting  
17 a proactive approach to bus safety issues?

18 PROF JOHN STANLEY: Mr Chan, I believe that's the case, yes.  
19 The standing committee is really about trying to ensure  
20 there is an ongoing dialogue between the respective  
21 parties who have an influence in this bus safety area,  
22 such as the bus manufacturers, the after-market  
23 equipment providers, the government, the universities  
24 that have a role in this place as well. It is really  
25 about trying to have a mechanism for collaboration which  
26

1 I also noted was an important point made by Mr Weston  
2 about the London arrangements. We have those kinds of  
3 arrangements at the national level in particular in  
4 Australia as part of the process, going through the  
5 National Heavy Vehicle Law, and it's working out in  
6 relation to bus. That's been a good way of "open door"  
7 all the way through and making sure there is knowledge  
8 throughout the field about what is possible.

9 I noticed in some of the evidence that was  
10 submitted, oral evidence to this committee, one of the  
11 smaller operators, franchised bus operator, commenting  
12 that perhaps he or she didn't have the information about  
13 some of the technologies that they might have liked to  
14 have had. This is really about trying to make sure that  
15 everybody's got access to a lot of the better  
16 information on a reasonably prompt basis so that you're  
17 actually ahead of the game rather than responding once  
18 an accident's happened.

19 CHAIRMAN: So this is to be proactive rather than reactive?

20 PROF JOHN STANLEY: Yes, Chair --

21 CHAIRMAN: Which is perhaps what this working group is,  
22 reacting?

23 PROF JOHN STANLEY: Yes. I think if you get a major  
24 catastrophe of the kind you had here in February, you  
25 can expect some kind of reaction.

1 CHAIRMAN: Reaction is better than no action.

2 PROF JOHN STANLEY: Indeed.

3 CHAIRMAN: And best of all is proaction.

4 PROF JOHN STANLEY: That's really where I'm seeing this  
5 going, that you use that as a basis to grow into a more  
6 proactive approach, which could emerge from the working  
7 group, but in my view it needs to have a wider  
8 membership. I note that the working group started with  
9 a relatively narrow range of issues that it was going to  
10 look at, and that, I think, again is perfectly  
11 understandable, in view of the reaction to the February  
12 situation, for example.

13 But, going forward, at least to stand back from that  
14 and say what are the most significant areas that we can  
15 make enhancements, and I've talked here particularly  
16 about technology, because I also think that you need to  
17 focus much more on the working/driving/fatigue question  
18 and dealing with that as well, so this is particularly  
19 focused on bus safety, on the technology side.

20 CHAIRMAN: When you say "include other bus operators", all  
21 of the franchised bus operators are members of the  
22 working group.

23 PROF JOHN STANLEY: Yes. I'm thinking about the smaller bus  
24 operators as well, not just the big ones.

25 CHAIRMAN: Not the franchised bus operators?

26

1 PROF JOHN STANLEY: Well, they would be franchised, but not  
2 the big ones, the one who run the minibuses and so on.

3 CHAIRMAN: I see. We use the term "franchised buses" to  
4 describe the six franchises and the five franchised bus  
5 operators. They were all representatives on this  
6 standing committee. But certainly minibus organisations  
7 were no part of it. Do you have in mind including them?

8 PROF JOHN STANLEY: I do, Chair. They are a significant  
9 part of your market. My recollection is it's 1.5 or  
10 2 per cent, in terms of millions of passengers per day,  
11 compared to 4 million with the franchised bus  
12 operations. So they are significant in the marketplace,  
13 and I think they also need to be a part of this process,  
14 because if someone is going to catch a bus, any bus, it  
15 seems to me they have the right to expect the same level  
16 of safety, no matter who is providing that service.

17 CHAIRMAN: But, as you will perhaps be aware, we impose  
18 different safety features on minibuses compared with our  
19 franchised buses.

20 PROF JOHN STANLEY: Yes. That doesn't mean that the  
21 conversation about what is the best technology that's  
22 available for those different categories of vehicle is  
23 not a conversation that should be had. That would be  
24 the point I'm making, that the floor needs to be lifted  
25 across the board if you are going to have these  
26

1           conversations, not just at the big end of town.

2       CHAIRMAN: The working group does not include any  
3           representatives of unions. Do you have any suggestions  
4           or views on that, for the proposed standing committee?

5       PROF JOHN STANLEY: Prima facie, I would be in favour of  
6           that. That would be certainly part of the way we would  
7           approach this in Australia.

8       CHAIRMAN: Thank you.

9       MEMBER LO: Is the standing committee advisory, or does it  
10          have any statutory power to enforce implementation?

11      PROF JOHN STANLEY: Prof Lo, no. I see this as being  
12          an advisory committee to government, in particular to  
13          the responsible minister, but it wouldn't have powers of  
14          those kinds.

15          But ideally, it's findings, it's deliberations, any  
16          research that it supports would all be made public.

17      MEMBER LO: So what difference does it make if, let's say,  
18          our Transport Department has a division or a branch  
19          called transport safety, versus what you have in  
20          Victoria, where it's a separate, parallel agency or  
21          body? What difference does it make?

22      PROF JOHN STANLEY: They are different roles. The Transport  
23          Safety Director, his role is essentially to do with  
24          implementation of particular legislation. This standing  
25          committee idea is about trying to improve knowledge and

26

1 awareness and understanding across the industry of the  
2 sorts of technologies that are available, so that they  
3 are in people's minds, when they are going through  
4 vehicle purchase decisions, for example. You know, this  
5 is about awareness raising, collaboration, trying to  
6 develop a stronger industry level understanding, as  
7 distinct from implementing an administrative mechanism  
8 to ensure that legislation is meeting its purposes.

9 MEMBER LO: I guess my question is why you want a separate  
10 transport safety as a separate entity, rather than part  
11 of public transport?

12 PROF JOHN STANLEY: Public transport, or in your case the  
13 Transport Department, have multiple purposes that they  
14 try to achieve, and safety is one of those but it is  
15 only one. It's the question of the priority that you  
16 put on safety, whether you are happy to see it dealt  
17 with at that level, where it might get put down at  
18 a lower level of priority than operating commercially,  
19 for example. I'm not saying that's happening. But I'm  
20 simply saying that if an authority has multiple  
21 objectives, then it gets involved in doing trade-offs  
22 that may mean that safety suffers.

23 If you think safety is a serious issue, then the  
24 best chance of elevating it in a priority sense for  
25 treatment, I think, is to give it a separate entity,

26

1 responsible for looking after its administration.

2 CHAIRMAN: Separate and independent?

3 PROF JOHN STANLEY: Especially independent, Chair.

4 MR DEREK CHAN: Just now, Professor, you talked about the  
5 scope of the working group as well. Perhaps I can put  
6 that in context by going to actually the document that  
7 shows what the scope of the working group is.

8 Can I refer you to KMB-12, page 4867. Here, we have  
9 the document which tells us the scope of work of the  
10 Working Group on Enhancement of Safety of Franchised  
11 Buses. In the first paragraph, it says that the working  
12 group was set up after a traffic accident involving --

13 CHAIRMAN: Perhaps you could put this document in context.

14 MR DEREK CHAN: Yes. This document is an annexure to the  
15 minutes of the first meeting of this particular working  
16 group, and the first page of the document is at  
17 page 4859, and it's the notes of first meeting of the  
18 group.

19 CHAIRMAN: Was the starting point not an agenda, which was  
20 issued on 12 March?

21 MR DEREK CHAN: Yes.

22 CHAIRMAN: I would like you to be familiar with the  
23 chronology of what was involved in the setting up of  
24 this group, the speed at which it met, and the speed at  
25 which it made decisions, because I would like your views

26

1 on that, in the context of the benefits of proactive as  
2 opposed to reactive decisions.

3 We were given the agenda at an early stage by one of  
4 the bus operators, and gradually we have managed to  
5 obtain the minutes, now unredacted, are they not?

6 MR DEREK CHAN: Yes, the minutes are now unredacted.

7 Ms Wong has drawn my attention to the Citybus bundle  
8 at page 588.

9 CHAIRMAN: Is that CTB-1, 1A, or B?

10 MR DEREK CHAN: CTB-3.

11 CHAIRMAN: Just put it on the screen, if you would.

12 MR DEREK CHAN: Page 588.

13 What we see on the screen is the agenda for the  
14 first meeting of the working group to be held on  
15 13 March 2018, and part of the agenda was the discussion  
16 of the scope of works --

17 CHAIRMAN: Does this document have a date other than the one  
18 at the top, 13 March?

19 MR DEREK CHAN: This document itself does not have a date.

20 CHAIRMAN: Thank you. My memory was incorrect then. So  
21 13 March is when the agenda comes into being, but that  
22 also is the first meeting, and that's what you were  
23 taking us to at 4867, is it not?

24 MR DEREK CHAN: Yes, 4867 is a document that defines the  
25 scope of the working group.

26

1 CHAIRMAN: Perhaps for purposes of the transcript you could  
2 read out passages that are relevant to the questions you  
3 are going to ask from this "scope of work" document.

4 MR DEREK CHAN: Yes. The first paragraph of this document  
5 says:

6 "After a traffic accident involving a bus of Kowloon  
7 Motor Bus Co Ltd took place on Tai Po Road on  
8 10 February 2018, a working group is proposed to be set  
9 up to review and study measures to further enhance bus  
10 safety."

11 So, Professor, the first point to note is that the  
12 working group is reactive to a serious accident  
13 happening. And the scope of the working group  
14 includes -- the first item is about enhancing training  
15 arrangements; the second item is about seat belts; and  
16 the third item is to explore technical feasibility,  
17 cost-effectiveness, applicability and other issues  
18 relating to installation of on-vehicle safety devices.

19 Professor, in the context of a proactive approach,  
20 would you expect these issues to be discussed in  
21 advance, or rather as a reaction to an accident  
22 happening?

23 PROF JOHN STANLEY: These are the sorts of things that would  
24 come up as a matter of course on the agenda of a  
25 proactive set of circumstances. But given the situation  
26

1 at the time and the concerns around, you can understand  
2 these sorts of issues being put on the agenda  
3 straightaway, recognising that it is reactive, but you  
4 can't do much else in that circumstance, but going  
5 forward, you would want to have this stuff on the agenda  
6 on an ongoing basis so that you are ahead of the  
7 problems.

8 MR DEREK CHAN: In a committee that is adopting a proactive  
9 approach, would you expect the scope of the committee to  
10 cover other aspects of bus safety, in addition to the  
11 three mentioned here?

12 PROF JOHN STANLEY: Certainly. I think I have suggested in  
13 my report that you have a technology-oriented committee,  
14 but another one also focusing on training, which is the  
15 first point there. But I think the technology committee  
16 could really write its own agenda in terms of what are  
17 the forward-looking initiatives we are going to see and  
18 should anticipate and plan for that will be most  
19 effective in terms of improving bus safety.

20 Now, there are a range of measures that are listed  
21 here. The European process that they are going through  
22 at the moment to look at their next set of mandatory  
23 requirements has other elements as well that it's  
24 including. I would imagine that your proactive,  
25 forward-looking committee would be all over that sort of  
26

1 European agenda and assessing its relevance to Hong Kong  
2 going forward, for example.

3 There were some notes at the back of my first report  
4 on some of the elements in that ongoing European agenda.  
5 I just wrote them as notes for your information. But  
6 they are the kinds of issues, for example, the kinds of  
7 technologies, that you would expect a forward-looking  
8 committee would be looking at and saying, "Have these  
9 got a role in Hong Kong now? Will they have a role in  
10 Hong Kong in three years' time?", with all the key  
11 players being at the table.

12 CHAIRMAN: So you would expect such a proactive committee to  
13 be examining what others are doing in other  
14 jurisdictions?

15 PROF JOHN STANLEY: Absolutely, Chair.

16 CHAIRMAN: And you mention the European Union as an example,  
17 but we also know, because we have a report from  
18 Mr Weston, that that has been underway in London as  
19 well, for Transport for London?

20 PROF JOHN STANLEY: Indeed. Transport for London have a lot  
21 of investigations for themselves. Their Standard Bus,  
22 I think they call it, looks a really good initiative to  
23 me. But at the end of the day,  
24 London/Hong Kong/Europe/Australia, we all tend to get  
25 caught up in the UNECE standards.

26

1 CHAIRMAN: Transport for London are going to promulgate  
2 a bus safety standard, which I think is the term they  
3 use for it.

4 PROF JOHN STANLEY: Yes, which is a really good initiative  
5 too.

6 CHAIRMAN: So you would expect such a committee to be  
7 proactive, ongoing, monitoring what is happening in  
8 other jurisdictions?

9 PROF JOHN STANLEY: Yes, Chair, and looking in particular at  
10 the kinds of safety problems that Hong Kong is facing,  
11 and saying, "Which of these technologies are going to be  
12 most useful here in the time frame that they might be  
13 available?" And are there any areas of research that  
14 need to be done for problems that we've got that maybe  
15 nobody else has got to the same extent, because your  
16 operating environment is pretty challenging in some  
17 places.

18 CHAIRMAN: Would you expect such a committee to not only  
19 monitor remotely, as it were, what is happening in other  
20 jurisdictions, but to have exchanges of personnel so  
21 that such developments are discussed in person between  
22 the people involved, in Hong Kong and the EU, Australia,  
23 Singapore, London?

24 PROF JOHN STANLEY: Certainly, and I think a lot of the  
25 original equipment manufacturers, for example, would be

26

1        falling over themselves with delight at the opportunity  
2        to participate in a process like this, if you think  
3        about the Volvos, the Scantias, and so on; they have got  
4        a lot to contribute to this process and I'm sure would  
5        be delighted at the opportunity to be involved in  
6        an ongoing basis with that sort of deliberation.

7        CHAIRMAN: Thank you.

8        MR DEREK CHAN: Moving on, if I may, Professor, to the next  
9        topic I want to cover with you, and that's the issue of  
10       seat belts. We saw from the working group agenda just  
11       now that installation of seat belts or retrofitting seat  
12       belts was a major item on their agenda. Can I start  
13       with this question: are seat belts required to be  
14       installed --

15       CHAIRMAN: Just pause for a moment. The reference to seat  
16       belts at 4867 is not in either the context of  
17       retrofitting or fitting on new buses. It's general, is  
18       it not?

19       MR DEREK CHAN: Yes.

20       CHAIRMAN: "The installation of seat belts on all seats".

21       MR DEREK CHAN: Yes, the discussion started with  
22       installation of seat belts on all seats, and I will show  
23       you in a moment the documents that show the progression  
24       of the discussion to a point where the retrofitting  
25       issue arises.

26

1           So can I just start with a general question, that is  
2           are seat belts required to be installed on urban buses  
3           in Australia?

4   PROF JOHN STANLEY: No.

5   MR DEREK CHAN: Is there a reason for that?

6   PROF JOHN STANLEY: The belief is that the mass of the  
7           vehicle itself is normally going to provide sufficient  
8           occupant protection in the event of an accident, such  
9           that seat belts are not going to add much more on top of  
10          that. There is also a challenge with existing vehicles  
11          of retrofitting and the cost of so doing.

12          The way that we would approach this sort of question  
13          in Australia -- and I don't know whether you might do  
14          exactly the same thing -- is we have a process called  
15          a regulatory impact statement, and if we were looking,  
16          for example, to require seat belts to be mandatory on  
17          route buses, that would probably need to go through the  
18          process of a regulatory impact statement that would look  
19          at the cost of various ways of going about undertaking  
20          that work, and then do an assessment of the  
21          probabilities of various sorts of incident types being  
22          reduced, putting a dollar value on that, and coming up  
23          with a view as the basis of that assessment. That's the  
24          normal way we do this kind of assessment.

25   CHAIRMAN: And who does the regulatory impact statement?

26

1       PROF JOHN STANLEY: It would be done by the relevant  
2       government department. A lot of these sorts of things  
3       would happen at a national level in Australia, so they  
4       would be done by the National Transport Commission which  
5       is the successor body to the National Road Transport  
6       Commission that I was deputy chairman of for nine years.  
7       We did multiple regulatory impact statements into  
8       various aspects of vehicle requirements.

9       CHAIRMAN: Has such a study been done on the impact of seat  
10      belts being installed on buses?

11      PROF JOHN STANLEY: I'm not sure if there's been a formal  
12      one done at national level, but I know it's been looked  
13      at many times at state level in terms of seat belts.  
14      Probably the main pressure in Victoria that we get for  
15      installation of seat belts is actually on school buses  
16      in country areas, where the vehicles tend to be  
17      operating at higher speed, you have younger children  
18      sitting in the seats. But again that's not been  
19      mandatory at all; it's not a requirement.

20             The only requirement for seat belts on our buses is  
21      for coaches that are travelling interstate, usually at  
22      high speed.

23      CHAIRMAN: Yes. As I understand it, that is the distinction  
24      drawn in the United Kingdom. Seat belts have to be  
25      provided on coaches, and the issue is speed.

1 PROF JOHN STANLEY: Yes.

2 MR DEREK CHAN: Just so that I understand the context of  
3 that, when you talk about high speeds, interstate  
4 travel, what speed do coaches travel at?

5 PROF JOHN STANLEY: These would be travelling at  
6 100 kilometres per hour, most of the time.

7 MR DEREK CHAN: So that I understand the comparison being  
8 drawn, are double-decker buses common in Victoria?

9 PROF JOHN STANLEY: We don't have double-decker buses  
10 providing route service, but we do have a double-decker  
11 bus that runs from the Melbourne CBD to the airport in  
12 Melbourne and -- my wife and I were just discussing  
13 during the lunch break -- we think that has seat belts.  
14 In fact, Janet told me that I continually tell her to  
15 put it on, so that suggests that they do.

16 MR DEREK CHAN: At what speed does the bus travel?

17 PROF JOHN STANLEY: It's mostly on a freeway so it would be  
18 travelling at 100 kilometres per hour.

19 MR DEREK CHAN: What I am going to do now, Professor, if  
20 I may, is just to take you to the stage at which the  
21 working group has reached in terms of the considerations  
22 that it has on seat belts and retrofitting seat belts.  
23 Then I'm going to go back to take you to some  
24 discussions leading up to that and ask for your views  
25 and observations on some of the matters raised, if I  
26

1           may.

2       PROF JOHN STANLEY: Thank you.

3       MR DEREK CHAN: If I can start at the end, so we know where  
4           the end-game is. Can I take you to TD-1, page 403.

5           Just so you know what the document is: it is  
6           a document drafted by the Transport Department for  
7           discussion by the Legislative Council Panel on  
8           Transport. That discussion was to take place on 25 July  
9           2018.

10          So this, as it were, is a summary of what the  
11          working group has arrived at in terms of recommendations  
12          and considerations.

13       CHAIRMAN: I think the letter on the previous page is useful  
14          in explaining what it is.

15       MR DEREK CHAN: Yes. Perhaps --

16       CHAIRMAN: You could go to that.

17       MR DEREK CHAN: Yes. Perhaps I can read that out. That's  
18          a letter from the Transport Department to this  
19          committee, and the Transport Department says in the body  
20          of the letter:

21          "As you are aware from our previous submissions, the  
22          Transport Department has set up in mid-March a Working  
23          Group on Enhancement of Safety of Franchised Buses which  
24          comprises members from all franchised bus operators and  
25          major bus manufacturers to consider and study possible

26

1 measures to further enhance bus safety. Whilst the  
2 report of the working group is being compiled, the  
3 findings and recommendations of the working group will  
4 be reported to the Legislative Council Panel on  
5 Transport at its meeting on 25 July 2018."

6 So that's the context in which this paper was  
7 prepared. If I can go directly to the passage on seat  
8 belts, which is at page 407, that's where the section on  
9 seat belts starts, and if I may go straight to  
10 paragraph 11, over the page, the Transport Department  
11 notes that:

12 "As confirmed with the bus manufacturers, it is  
13 technically feasible to supply all new buses with seat  
14 belts for all passenger seats conforming to relevant  
15 international standards. In this regard, all FB  
16 operators have agreed that all passenger seats of all  
17 new buses ordered from July 2018 onwards will be  
18 installed with seat belts."

19 So that's in respect of new buses.

20 Paragraph 12 talks about retrofitting. I won't  
21 trouble you with the details about that. The long and  
22 short of it is that retrofitting seat belts on lower  
23 decks was considered to be impractical or not feasible.

24 At paragraph 13:

25 "However, it should be more feasible to retrofit  
26

1 seat belts on all passenger seats of the upper deck only  
2 in some vehicle models of the existing double-deck  
3 fleet. If all passenger seats on the upper deck are  
4 retrofitted with seat belts, it is expected that the  
5 weight of the bus will be increased by 300 to 400kg and  
6 consequently the passenger-carrying capacity may need to  
7 be reduced by 7 to 8 passengers."

8 So that's the consideration that has been reached at  
9 this stage, just the upper deck.

10 Paragraph 14, the last sentence on that page:

11 "Some bus operators have expressed concerns that the  
12 retrofitting of seat belts would not only incur  
13 significant financial implication, but also considerable  
14 time and manpower resources, not to mention the need to  
15 redeploy or procure additional buses to maintain the  
16 existing bus service level during the whole process."

17 Now, the "incur significant implication" part,  
18 there's a footnote 5 to it, and if you look at the  
19 bottom of the page, footnote 5:

20 "With the absence of detailed study on the technical  
21 details for retrofitting seat belts on all seats in the  
22 upper deck, a rough estimate on the costs of  
23 retrofitting a bus is about HK\$200,000 (excluding  
24 manpower and overhead costs)."

25 So that's what we are looking at.  
26

1 Paragraph 15 talks about overseas experience and  
2 practices, and it's similar to what you have told us  
3 about Melbourne.

4 CHAIRMAN: Perhaps you would be kind enough to read that  
5 out, because this is relevant.

6 MR DEREK CHAN: Certainly, Mr Chairman.

7 Paragraph 15 talks about overseas experience  
8 a practices:

9 "The working group has reviewed the prevailing  
10 overseas practices or requirements on the installation  
11 and wearing of seat belts on buses. Currently, for  
12 inter-cities or cross-boundary routes, some overseas  
13 jurisdictions (eg United States, United Kingdom and  
14 Netherlands) have mandated the provision of seat belts  
15 for all passenger seats, while others (eg United  
16 Kingdom, Netherlands, and Australia (Victoria)) have  
17 imposed mandatory requirement of wearing seat belts.  
18 Nevertheless, for buses serving urban routes buses or  
19 buses allowed to carry standing passengers, none of the  
20 overseas jurisdictions that the working group has  
21 reviewed thus far have statutory requirements for the  
22 provision of seat belts on passenger seats. According  
23 to the transport authorities of those jurisdictions, the  
24 urban buses are typically used for short journeys, in  
25 terms of both time and distance, and undertaken at  
26

1 moderate speeds on urban routes. Thus, no seat belt  
2 requirement at passenger seats on these urban buses has  
3 been imposed. A summary of the findings is at the  
4 annex B."

5 Paragraph 16:

6 "Having regard to the points mentioned in [the  
7 paragraphs above], the working group has arrived at the  
8 following recommendations with a view to giving extra  
9 protection to seated passengers:

10 (a) seat belts should be provided for all seats in  
11 future procurement of new buses; and

12 (b) subject to further assessment on the technical,  
13 operational and financial feasibility, consideration may  
14 be given to retrofitting all seats in the upper deck  
15 with seat belts on buses deployed for specific bus  
16 routes, ie long-haul routes which are operated via  
17 expressways with relatively fewer bus stops."

18 That's the Transport Department's summary of the  
19 position that it has reached, so the recommendation is,  
20 in terms of retrofitting, upper deck and long-haul  
21 routes.

22 CHAIRMAN: Well, as qualified.

23 MR DEREK CHAN: Yes, as qualified.

24 CHAIRMAN: Long-haul routes which are operated on  
25 expressways.

26

1 MR DEREK CHAN: Expressways, yes.

2 We've got examples at footnote 6 as to what those  
3 expressways are expected to be, and in footnote 7,  
4 according to the franchised bus operators, this would  
5 apply to around 2,000 buses currently being deployed on  
6 those routes.

7 What I want to do is then go to some examples -- not  
8 all of them, just certain examples -- of the concerns or  
9 observations made by the bus operators during  
10 discussions, and then I'm also going to refer you to one  
11 passage in Mr Weston's report that talks about the same  
12 thing, and then I'm going to ask you for your  
13 observations on this topic.

14 PROF JOHN STANLEY: Thank you.

15 MR DEREK CHAN: So if I may refer you to some of the minutes  
16 of the discussions of the working group. The first one  
17 that I want to take you to is at KMB-12 at page 4869-1.

18 What you should be looking at, Professor, is the  
19 first page of the notes of 1st meeting held on 13 March  
20 2018, and you can see the parties present at that  
21 meeting on the first and second pages. On the issue --

22 CHAIRMAN: Do we have unredacted versions of this document?

23 MR DEREK CHAN: Mr Chairman, 4869-1 ought to be unredacted  
24 in my copy, and it's also unredacted on the screen copy.

25 CHAIRMAN: Thank you. I must have had the wrong page.

26

1 MR DEREK CHAN: I'm sorry, Chairman, 4869-1.

2 CHAIRMAN: Yes.

3 MR DEREK CHAN: If I can take you directly to the seat belt  
4 passage, which is firstly at page 13.

5 CHAIRMAN: I think it's important perhaps to help  
6 Prof Stanley with this: there was a division, was there  
7 not, in the way in which the working group addressed  
8 these issues? So the working group met generally; there  
9 was then a technical group which dealt with safety  
10 devices; and then there was a group that dealt with  
11 training, a subgroup, I think that's called.

12 PROF JOHN STANLEY: Yes.

13 MR DEREK CHAN: And what we're looking at is the main group  
14 meetings. I will be taking you to two parts in the main  
15 group meetings, so we see the observations made by some  
16 of the bus operators. I will also be taking you to  
17 a minute of the subgroup, which includes bus  
18 manufacturers, so you can see what the bus manufacturers  
19 were saying on the same issue.

20 PROF JOHN STANLEY: Okay.

21 MR DEREK CHAN: If I may take you to page 4869-6, starting  
22 at paragraph 13, which is a section on the installation  
23 of seat belts.

24 I'm still on KMB-12, Mr Chairman.

25 CHAIRMAN: Yes. I was looking for the version, as with most  
26

1 of the documents in this inquiry, I work on  
2 an unpaginated version because they are given to me the  
3 night before, and then I come into this hearing and  
4 I have a paginated version which has none of my notes on  
5 it. So I'm going to try and work from both.

6 Thank you.

7 MR DEREK CHAN: Mr Chairman, I'm looking at paragraph 13 the  
8 1st meeting note. That is the section on the  
9 installation of seat belts.

10 In paragraph 13, it introduced:

11 "At present, all exposed seats on franchised buses  
12 have been installed with seat belts. Taking the  
13 technical feasibility into account, the Transport  
14 Department proposed to install seat belts on all seats  
15 for new buses and retrofit seat belts on all seats on  
16 the existing buses."

17 At paragraph 16:

18 "Citybus/New World First Bus queried the  
19 practicability of installation of seat belts on all  
20 seats to enhance passenger safety because it would be  
21 difficult for the bus captains to ensure passengers on  
22 buses wearing seat belts. Besides, Citybus/New World  
23 First Bus also raised concerns on the need of wearing  
24 seat belts by standees who could not be provided with  
25 seat belts. The Transport Department advised that there  
26

1           were requests for a comprehensive review on seat belts  
2           installation on bus after the traffic accidents. It had  
3           been more than a decade since the last review on the  
4           installation of seat belts on buses. The objective of  
5           the prevailing discussion should focus on the technical  
6           feasibility, cost-effectiveness, applicability and other  
7           issues relating to installation of seat belts on all  
8           seats other than exposed seats."

9           So the two issues identified by Citybus here are the  
10          enforcement issue and also those standing wouldn't have  
11          the benefit of seat belts.

12       CHAIRMAN: Before you move on, if that's what you are going  
13          to do, there is a statement in the notes of this meeting  
14          that the TD, as they are called, the Transport  
15          Department, advised that "there were requests for  
16          a comprehensive review on seat belt installation on bus  
17          after the traffic accident". Do we have any information  
18          as to that?

19       MR DEREK CHAN: Perhaps I will have to get back to you on  
20          that, Chairman.

21       CHAIRMAN: I was wrong to call it "accident" singular. It  
22          says "accidents". That begs the question: from whom  
23          were these requests made, to whom were they made, when  
24          were they made, and in respect of which traffic  
25          accident?

1 MR DEREK CHAN: Yes. It certainly calls for that to be  
2 considered. Perhaps I can come back to you,  
3 Mr Chairman, on that.

4 CHAIRMAN: Well, good luck.

5 MR DEREK CHAN: Anyway, that's the observations from  
6 Citybus.

7 If I can take you then to a 3rd meeting. The notes  
8 of the 3rd meeting are at page 4908-1, and the 3rd  
9 meeting was held on 21 June 2018. Again, I am focusing  
10 firstly on the main group meetings.

11 I want to focus your attention at paragraph 25 of  
12 that meeting note, at page 4908-7.

13 CHAIRMAN: This is now 21 June?

14 MR DEREK CHAN: That's correct, Mr Chairman.

15 CHAIRMAN: Thank you.

16 MR DEREK CHAN: You see, Professor, at paragraph 26, that  
17 the discussion about retrofitting has focused on the  
18 upper deck, for the reasons that we've already covered,  
19 about it being impractical to fit it on the lower deck.

20 At paragraph 26 -- I will just read it out:

21 "As for existing buses, the meeting noted that  
22 retrofitting seat belts on all passenger seats of the  
23 upper deck of some existing double-deck bus models  
24 should be feasible. Kowloon Motor Bus/Long Win advised  
25 that they would retrofit seat belts on all passenger  
26

1 seats of the upper deck or deploy buses with seat belts  
2 on all passenger seats on routes which serve long-haul  
3 passengers or are operated on expressways with limited  
4 boarding or alighting activities at the enroute stops."

5 At paragraph 27:

6 "In the light of [that] initiative, the meeting had  
7 discussed and come to the views that having regard to  
8 the technical feasibility in retrofitting seat belts on  
9 existing buses, operation of franchised buses in  
10 Hong Kong which were mostly deployed on urban routes  
11 with standing passengers; and the costs and downtime  
12 incurred to retrofit seat belts on all existing buses,  
13 as well as overseas experiences, that there were  
14 insufficient justifications to make it a mandatory  
15 requirement for all buses to be fitted with seat belts  
16 on all passenger seats. Nevertheless, members reckoned  
17 that in the case of exposed seats and in bus compartment  
18 with no standees allowed, seat belts might give extra  
19 protection to seated passengers to prevent passengers  
20 from falling out from those seats."

21 Just to give you some context, the upper deck of  
22 buses in Hong Kong would have no standing room on them;  
23 standing room only applies to the lower deck.

24 In paragraph 28:

25 "In this regard, Citibank/New World First Bus was  
26

1 requested to consider retrofitting seat belts on all  
2 passenger seats on the upper deck for the buses  
3 operating selected bus routes for long-haul passengers  
4 or operating on expressways with limited boarding and  
5 alighting activities along the routes. Citybus/New  
6 World First Bus indicated that it would be difficult for  
7 their companies to allocate their buses to solely  
8 operate specific routes as their buses would serve  
9 a number of routes in a day under their existing  
10 operations. In addition, Citybus/New World First Bus  
11 observed that very few passengers would make use of seat  
12 belts, it would not be financially feasible to retrofit  
13 existing buses with seat belts on all passenger seats."

14 So two points to note there. One is the narrowing  
15 down of the retrofitting target to upper deck and  
16 expressways/long-hauls. Secondly, you have observations  
17 about financial viability and doubts about whether it is  
18 actually useful.

19 CHAIRMAN: To give Prof Stanley the context, we have  
20 received oral evidence from Citybus, have we not, and  
21 they have spoken in strident terms about their views  
22 about the deployment of seat belts on buses?

23 MR DEREK CHAN: Yes, they have.

24 CHAIRMAN: Are you going to take the professor to that  
25 transcript, or are you in a position to summarise it?

26

1           It's 8 May, I think.

2       MR DEREK CHAN: Perhaps I will ask Ms Wong to locate that  
3       part of the transcript.

4           In the meantime, perhaps I can take you to  
5       Mr Weston's report, so we can complete the picture about  
6       the various observations and views that this committee  
7       has received on this issue.

8           Mr Weston's report, the relevant passage is at  
9       page 134 of the bundle.

10          At page 134 of Mr Weston's report, the relevant part  
11       on seat belts starts in the middle of that page. Again,  
12       I will just read it out:

13          "Currently bus driver or passenger seat belts are  
14       not a legal requirement in the UK on scheduled bus  
15       services.

16          In terms of passenger seat belt the Department for  
17       Transport guidance note makes the following statement:

18          'General requirements. Since 1 October 2001, seat  
19       belts have been required to be installed in each forward  
20       and rearward facing seat in all new buses. The use of an  
21       approved and properly fitted restraint system can help  
22       prevent death or serious injury, not only by restraining  
23       the occupant from forward motion but also by preventing  
24       their ejection from the vehicle, particularly in  
25       accidents where the vehicle rolls over.

26

1           The only exemption from this requirement is for  
2           buses that are designed for urban use with standing  
3           passengers. An exemption is permitted for these vehicles  
4           because they are typically used for short journeys, in  
5           both time and distance, undertaken at moderate speeds on  
6           urban routes. Although we are aware that vehicles  
7           equipped with seat belts are used by some operators for  
8           urban fare paying services, ultimately, it is for the  
9           operator to choose the type of vehicle used to provide  
10          a service'.

11           At present no London operators fit passenger or  
12          driver seatbelts on buses contracted to TfL.  
13          Historically First Group did fit driver seat belts but  
14          sold out their London operations to Tower Transit and  
15          Metroline ... in June 2013."

16           I think we have also located the passage from the  
17          Citybus transcript. Can I just turn that up?

18          CHAIRMAN: Yes. Thank you.

19          MR DEREK CHAN: The transcript bundle, Day 3, page 6.

20          CHAIRMAN: How does that translate in the Augustinian  
21          calendar, rather than the North Korean calendar? What  
22          is Day 3?

23          MR DEREK CHAN: Tuesday, 29 May 2018.

24          CHAIRMAN: Yes.

25          MR DEREK CHAN: At line 15, Mr Samuel Cheng for Citybus  
26

1       says -- the question was:

2       "... has the Commissioner required any specific  
3       safety features to be installed on any of your bus?"

4       That's the question.

5       Mr Cheng then says:

6       "Let me cite two examples. The Transport Department  
7       did ask the bus operators -- allow me to use English to  
8       talk about this term -- in relation to exposed seats,  
9       seat belts must be fixed.

10       In addition, a small number of our buses had  
11       a straight and long flight of steps, so the Transport  
12       Department asked us to fix an additional handrail."

13       I'm sorry, Mr Chairman, I think the more appropriate  
14       reference to be the evidence of the following day, the  
15       following hearing day. That is Wednesday, 30 May 2018.,  
16       at page 58.

17       CHAIRMAN: Yes. Thank you.

18       MR DEREK CHAN: At line 19, Mr Duncan, that is counsel for  
19       the committee, focused the witness's attention to  
20       "Feasibility of installation of seat belts on (a) all  
21       seats and (b) all seats on the upper deck on new buses".

22       CHAIRMAN: To what was Mr Duncan referring?

23       MR DEREK CHAN: Mr Duncan is quoting a statement made in the  
24       Citybus forward planning programme, and if I could just  
25       read it out:

26

1            "'It is feasible to install seat belts on all seats  
2            or on all seats on the upper deck. However, our  
3            observation shows that very few people wear the seat  
4            belts currently available at the exposed seats. Without  
5            any legislation to mandate the wearing of passenger seat  
6            belts on a franchised bus and the enforcement authority  
7            to strictly enforce the legislation, installing seat  
8            belts on all seats will be a waste of resources because  
9            vast majority of passengers will not wear seat belts  
10           even though they are provided.'

11           That was a statement that you made in the latest  
12           forward planning programme for Citybus."

13           Mr Duncan then draws his attention to another  
14           passage in the Transport Department about the seat belt  
15           issue. At page 60, Mr Chairman raised specifically this  
16           issue of retrofitting and whether it's a waste of  
17           resources. At page 60, line 17, this is a question from  
18           the chairman:

19           "Before you embark on retrofitting, might I ask this  
20           question. In your earlier answers, you said that it was  
21           a waste of resources to fit seat belts because the vast  
22           majority of passengers simply wouldn't wear them, so  
23           that it required enforcement. Given that you have now  
24           indicated that you have agreed to incorporate them, what  
25           view do you have about whether or not this is a waste of  
26

1 resources if there isn't enforcement?"

2 Mr Cheng has this to say:

3 "If it is not mandated by law, then it is impossible  
4 to enforce the law. Currently, there is no requirement  
5 that when you are on a bus you have to put on your seat  
6 belt. Even if it is mandated by law, in the absence of  
7 law enforcement, I'm afraid it is also a waste of  
8 resources. We maintain the same view."

9 Chairman: Have you raised this view with the  
10 Transport Department?

11 Mr Cheng: We did. Our colleagues did raise it with  
12 the TD."

13 So you've seen actually Citybus raising that  
14 observation in the minutes that we've just read of the  
15 working group.

16 Before I ask you for your observation on that issue,  
17 I can also inform you that the expressways on which the  
18 buses operate, speed limits can go up to 80, but the  
19 speed limiter is fixed at 70. So that's the speed at  
20 which the franchised bus can go on expressways.

21 CHAIRMAN: Well, the expressway to the airport is 110, is it  
22 not?

23 MR DEREK CHAN: The airport is 110, but the franchised bus  
24 limiter will still be the same, at 70.

25 CHAIRMAN: The legal speed limit for a franchised bus is  
26

1           70 kilometres per hour?

2       MR DEREK CHAN: Yes, also. So that's the speed at which  
3       buses would travel along the expressways.

4           With all that information in mind, what is your  
5       observation or comment on the installation of seat  
6       belts, firstly on all the seats, and secondly focusing  
7       on the upper deck, where there is no standing  
8       passengers.

9       PROF JOHN STANLEY: Thank you. This really takes me back to  
10      an answer I gave maybe half an hour ago about the notion  
11      of a regulatory impact statement. I think there are two  
12      levels to this particular question. The first level is:  
13      is it technically feasible to fit seat belts in certain  
14      kinds of positions on buses, for example on the upper  
15      deck of new buses, on retrofitting for older buses.  
16      That's a technical question of feasibility.

17           The second level then is: if it is technically  
18      feasible, what is the cost/benefit ratio of doing that  
19      installation? In other words, what will it cost? That  
20      is the probability of particular kinds of accidents  
21      being reduced if those seat belts are installed? Will  
22      people wear them, is one of the questions that needs to  
23      be addressed in that setting?

24           I don't have a view in any particular circumstances  
25      whether it is a good idea or not. What I would say is

26

1       that that's exactly the kind of problem that you should  
2       submit to a regulatory impact statement. There will be  
3       information around on the probabilities of accidents,  
4       these different varieties. You can put monetary values  
5       on the probability of those sorts of accidents being  
6       reduced. You probably can form a view too on the  
7       probability of wearing seat belts, which would affect  
8       the effectiveness of the wearing thereof.

9       So I think this is an exercise that needs a serious  
10      piece of cost/benefit analysis done on it. Now,  
11      government may decide it wants to make a policy decision  
12      to install seat belts where it is technically feasible.  
13      That's fine. As a matter of course, the way I would  
14      approach this, though, is to say you need to go through  
15      that cost/benefit analysis first, and I think that's  
16      what should be done in this situation.

17      So, rather than taking it on the basis that people  
18      think it's going to be this or going to be that, the  
19      kinds of concerns that have been raised by the various  
20      parties are really genuine and legitimate concerns and  
21      they affect the values of the potential installation,  
22      but until you have actually done that proper  
23      cost/benefit analysis, it's just speculation.

24      If I had a gut feel, it's going to be that probably  
25      it's not going to be worthwhile, with extensive seat  
26

1 belt fitting, but that would be no more than a gut feel,  
2 and ideally this needs to go through a proper  
3 evaluation.

4 CHAIRMAN: Because a gut feel is not good enough; you should  
5 do a cost/benefit analysis?

6 PROF JOHN STANLEY: Exactly, Chair.

7 CHAIRMAN: And in doing that, you would look at the various  
8 components that you have described?

9 PROF JOHN STANLEY: Exactly. In principle, it's a pretty  
10 straightforward cost/benefit analysis. Getting some of  
11 the values or the probabilities you need will need a bit  
12 of serious research, but the process and the sorts of  
13 things you need to look for are very much encapsulated  
14 by a lot of the responses that you have read out in the  
15 various submissions.

16 CHAIRMAN: What parties ought to be involved in a proper and  
17 effective cost/benefit analysis on this issue? Who  
18 would you go to? What information would you want from  
19 them?

20 PROF JOHN STANLEY: Firstly, you've obviously got to talk to  
21 the equipment suppliers, the bus manufacturers, to get  
22 a solid view of what's technically feasible with new and  
23 older vehicles. That includes with the seat  
24 manufacturers as well. You probably need to be talking  
25 also to people who do customer survey work on the

26

1 vehicle, to get a sense of what are the sorts of factors  
2 that would be influencing the probability of these seat  
3 belts being worn. In that case, you might want to go  
4 and look at vehicles where it is currently mandated, to  
5 see if the seat belts are being worn in those situations  
6 or not. For example, in Australia, you would have  
7 a look at the coaches and see whether people are  
8 actually wearing their seat belts there, and if they are  
9 what are the sorts of reasons that they are; have they  
10 been responding to some sort of market awareness  
11 campaign? What is it that's actually encouraged them to  
12 go through that process?

13 It's unlikely to be the fact that an inspector will  
14 get on the bus and fine them if they don't do it. It's  
15 more likely to be because they have thought about the  
16 consequences of not doing it.

17 So I think that's the sort of process that you need  
18 to go through there. There are a range of technical --

19 CHAIRMAN: Before you go on, if I might interrupt -- so in  
20 Hong Kong, we've got seat belts on vulnerable seats, as  
21 they are called, the top seats on the upper deck, for  
22 example, at the front. So it would be simple enough to  
23 survey whether or not people are actually prepared to  
24 use them.

25 PROF JOHN STANLEY: Absolutely.

26

1 CHAIRMAN: Even though this has been identified as  
2 a dangerous or vulnerable place on a bus; are they  
3 actually using them?

4 PROF JOHN STANLEY: Absolutely, Chair, and I have to say  
5 that my wife and I wore ours yesterday in the front seat  
6 coming from Victoria, which was the first place in the  
7 world to make seat belt-wearing compulsory.

8 CHAIRMAN: Am I right in understanding that that was  
9 a journey coming to and from Stanley?

10 PROF JOHN STANLEY: Exactly, Chair.

11 CHAIRMAN: That's no doubt a good reason to wear a seat  
12 belt.

13 You were going on to describe the people from whom  
14 one would seek assistance and the kind of information  
15 you would want from them to do this cost/benefit  
16 analysis.

17 PROF JOHN STANLEY: Thank you. On the cost side, we have  
18 talked about the vehicle suppliers, the manufacturers of  
19 the vehicles. When it gets to the question of  
20 retrofitting, you would need to talk to people who do  
21 that sort of work on buses, who actually -- I mean, we  
22 have vehicle body builders in Melbourne who I would go  
23 to, if I was doing this particular type of study in  
24 Melbourne, to get an opinion from them. It's probably  
25 going to be technically feasible to retrofit, it's just  
26

1 going to be very expensive. I think they are the sorts  
2 of things you would need to look at. So it would  
3 require a fairly major rebuild of the bottom part.

4 But then it's a case of what are the benefits, so  
5 then you need to look at what are the sorts of accidents  
6 that are happening in the vehicle, and, for example, is  
7 this happening to people who are standing; is it  
8 happening to people who are sitting; what is the  
9 probability that exposure to those sorts of accidents  
10 will be reduced in the event that seat belt-wearing is  
11 required, and what do you need to do to encourage that  
12 seat belt-wearing?

13 If I was doing that kind of exercise, I would  
14 probably be talking to psychologists about how you would  
15 get through the message about wearing seat belts, about  
16 getting people to take this seriously. The point you  
17 make, Chair, about looking at what happens in those  
18 seats that are currently required to do it in Hong Kong,  
19 very important in terms of forming a view on the  
20 probabilities that will happen. I would be talking to  
21 whoever are the custodians of the values or the costs of  
22 different sorts of accidents. So, in other words, what  
23 is the cost of a fatal accident in Hong Kong, what is  
24 the cost of a serious injury accident, what is the cost  
25 of a minor injury accident, those sorts of things,

26

1           because they will be the sorts of unit values you need  
2           to apply to the reductions in the probability of  
3           an accident of a particular kind taking place.

4   CHAIRMAN: In finding out what is happening in accidents,  
5           how it is that people are injured, where they are  
6           injured, why they are injured, no doubt you would wish  
7           to consult the police, perhaps; the bus companies?

8   PROF JOHN STANLEY: You would certainly do both of those  
9           things, Chair. Also, if I was doing that kind of  
10          exercise in Australia, I would talk to Monash University  
11          Accident Research Centre, where they specialise in that  
12          kind of analysis. So certainly the police, and I think  
13          some of the data that I saw, I think it was from the  
14          Transport Department, on fatal accidents here in  
15          Hong Kong, looked good data, and I suspect there's a lot  
16          more available behind that than what I read in some of  
17          the summaries. But certainly those sources of  
18          information are really important.

19          But also, if there are university knowledge hubs  
20          that focus on safety in vehicles, then they would be  
21          an important inclusion in an exercise like this.

22   CHAIRMAN: Thank you.

23   MR DEREK CHAN: As a matter of interest, Professor, in  
24          Melbourne, when you've talked about urban bus routes  
25          with standing capacities, excluding the route to the  
26

1           airport, at what speeds do the buses operate? Do you  
2           have a 70km zone in your urban areas?

3       PROF JOHN STANLEY: We have a 60km general speed limit, but  
4           on freeways it is 100 kilometres per hour. One of the  
5           major transport corridors that the competitively  
6           tendered service runs on is on the eastern freeway in  
7           Melbourne, which has a bus lane, and that bus lane would  
8           operate at up to 100 kilometres per hour. You know, in  
9           part of the day, at the peak time, it wouldn't be able  
10          to operate at that speed all its length, but because it  
11          is a bus lane, they can operate at 100 kilometres per  
12          hour for a good part of the day.

13                No most of the network, the average speed is about  
14           22 kilometres per hour. If you look at the timetable  
15           and the sort of implied speeds built into the timetable,  
16           they average about 22 kilometres per hour, which means  
17           the bus probably gets up to 60 for a short part, between  
18           stops.

19       MR DEREK CHAN: Let's just make sure I'm not mistaken. So  
20           some of the urban buses where there are no seat belts  
21           can travel up to 100 kilometres per hour?

22       PROF JOHN STANLEY: Correct, Chairman.

23       MR DEREK CHAN: Now that we have discussed the costs  
24           involved of retrofitting, it may be a good point to then  
25           move on to my next topic, which is the case for subsidy,

26

1           which is a topic mentioned --

2       CHAIRMAN: Before you do that, might I raise with you the  
3           issue of speed limit. What is the minimum speed limit  
4           that's enforced -- I'm phrasing that badly. You say  
5           60 kilometres per hour is the general speed limit. Are  
6           there lower speed limits?

7       PROF JOHN STANLEY: There are, Chair. There are down to  
8           40 kilometres per hour, for example, past schools.  
9           There are areas where 50 kilometres per hour is common.  
10          There is also a push from a number of municipal  
11          authorities or local councils to try and reduce speed  
12          limits to 30 kilometres per hour, particularly on local  
13          streets.

14       CHAIRMAN: And how widespread is that amongst those  
15          communities?

16       PROF JOHN STANLEY: Not very, Chair. It's in a few inner  
17          metropolitan municipalities where there are a lot of  
18          cyclists.

19       CHAIRMAN: But that hasn't resulted in those kind of  
20          reductions?

21       PROF JOHN STANLEY: No, Chair. 60 is the most common.  
22          There's a bit of 50 and then there's 100 on expressways.

23       CHAIRMAN: And 40 past schools?

24       PROF JOHN STANLEY: 40 past schools. Between certain hours,  
25          in the morning, but I think it's between 8.30 and about  
26

1 9.30; in the afternoon --

2 CHAIRMAN: So that's a variable speed limit?

3 PROF JOHN STANLEY: Yes. It would be 40 past the school,  
4 that school opening and closing time, and then probably  
5 revert to 60 in most cases.

6 CHAIRMAN: Is that signalled by an electronic sign as it is  
7 in London --

8 PROF JOHN STANLEY: Yes.

9 CHAIRMAN: -- telling you that the speed limit now is  
10 different for this stretch of road as you go past the  
11 school?

12 PROF JOHN STANLEY: Yes, there would be a red circle sign  
13 with a 40 lit in it.

14 CHAIRMAN: Has any study been done in Melbourne in respect  
15 of the link between speeds of vehicles and the damage  
16 done to people in collisions or on buses?

17 PROF JOHN STANLEY: Funny you should ask that, Chair. There  
18 was an article that appeared in The Melbourne Age. It's  
19 not about buses per se but it's about speed and the risk  
20 of pedestrian death, and it shows how that probability  
21 or the risk of pedestrian death increases dramatically  
22 beyond about 40 kilometres per hour. This is based on  
23 research that was undertaken by the Monash University  
24 Accident Research Centre. I'm happy to leave this  
25 little piece of paper with your committee.

26

1 CHAIRMAN: Monash Accident Research Centre?

2 PROF JOHN STANLEY: Monash University Accident Research  
3 Centre.

4 CHAIRMAN: Thank you for your offer, which we will gladly  
5 take up. This is a matter you no doubt know about is  
6 being looked at in London, Transport for London, where  
7 they have correlated the risk of fatal injury to various  
8 levels of speed.

9 PROF JOHN STANLEY: Yes.

10 CHAIRMAN: You will have noted the significant drop in the  
11 risk of fatalities if the vehicle is doing, for example,  
12 20 miles an hour rather than 30 miles an hour.

13 PROF JOHN STANLEY: Indeed, but the really big jump in  
14 Melbourne at least happens beyond about -- getting  
15 towards 40 kilometres per hour, so you have a relatively  
16 flat curve up to there, then it climbs very steeply,  
17 with a much higher probability of pedestrian death.

18 CHAIRMAN: Yes. When you say "pedestrian deaths", so that's  
19 deaths outside a vehicle?

20 PROF JOHN STANLEY: Yes, walking in front of.

21 CHAIRMAN: Or being driven into.

22 PROF JOHN STANLEY: Yes. Thank you.

23 CHAIRMAN: Mr Chan.

24 MR DEREK CHAN: Thank you, Mr Chairman.

25 Can I then move on to the topic of subsidy.

26

1 I think, in your report, you do look at the possibility  
2 of subsidy, and your recommendation that the Transport  
3 and Housing Bureau in Hong Kong should be looking at it  
4 from the angle of societal benefits that a bus operation  
5 brings, and I think you have explained a bit of that  
6 this morning to us as well.

7 Can I first take you to page 92 of your report,  
8 where you deal with that issue, and can I just read the  
9 second full paragraph out:

10 "Hong Kong's public transport system would generate  
11 large societal external benefits each year, some of  
12 which may be captured by the PT provider through land  
13 value increase, where the PT operator is a land owner.  
14 This would apply to rail more than bus. Franchised bus  
15 services will certainly produce more value to society  
16 than operators can collect in fares, particularly  
17 through easing road congestion levels, increasing social  
18 inclusion and improving road safety outcomes. If fares  
19 need to increase to find money for staffing needs, then  
20 there will be some loss of these societal benefits.  
21 This loss may be sufficient to justify government  
22 providing some financial support to operators, such as  
23 would enable them to retain/attract sufficient bus  
24 captains. Franchised bus operations can still operate  
25 commercially but on the basis that government is now  
26

1           remunerating the operator a sum for the societal  
2           benefits that their service provides, benefits that the  
3           operator is not able to capture through the fare box."

4           I think that's consistent with what you have been  
5           telling us this morning.

6   PROF JOHN STANLEY:   Yes.

7   MR DEREK CHAN:   In the next paragraph, you suggest:

8           "The Transport and Housing Bureau and the Transport  
9           Department should assess in economic terms the societal  
10          benefits of Hong Kong's franchised bus services, to  
11          enable them to evaluate the case for some financial  
12          support to those services, should such an issue be  
13          raised. It is noted that the matter of possible subsidy  
14          in respect of added remuneration was raised by counsel  
15          in discussion on the first day of committee hearings ...  
16          The safety consequences of bus captain  
17          working/driving/rest provisions are a classic example of  
18          where this public policy trade-off may need to be faced,  
19          given difficulties of attracting bus drivers and  
20          particularly if this was to be compounded, in future, by  
21          working hours greater than 12 per day being ruled out or  
22          limited more than at present. The author is not arguing  
23          for a 12-hour limit, Melbourne experience suggesting  
24          that 12-14 hours can be safe, provided the institutional  
25          setting has a strict focus on safety. However, without  
26

1       such a strict safety regime, there should be some  
2       nervousness about working days exceeding 12 hours."

3           So here you are tying the case for subsidy to the  
4       issue already experienced here about the hiring of bus  
5       captains. In the same vein, can I take you also to  
6       Mr Weston's report, who says also much the same thing.  
7       Can I invite you to go to page 152 of the expert bundle.  
8       I am focusing on the first two paragraphs under  
9       paragraph 8.3. If I can just pick this up in the middle  
10      of the first paragraph, where Mr Weston noted that there  
11      is no public subsidy in Hong Kong, and he remarks in the  
12      middle of the paragraph:

13           This is an exceptional achievement; however, the  
14      question must be asked whether the emphasis on operating  
15      a commercial network without public subsidy is  
16      sustainable and potentially drives either the wrong  
17      behaviours or lack [of] focus on certain aspects of the  
18      operation. Also does this overly restrict the  
19      investment the franchised operators can make in the  
20      network especially in terms of developing and  
21      introducing new technology and initiatives."

22           He then goes on to say:

23           "Consideration could be given as to whether certain  
24      safety initiatives, such as the uptake of new ...  
25      technology and bus driver training targeted specially at  
26

1 safety might need to be funded by the Transport  
2 Department as direct grants outside of the franchise  
3 agreements with specific outcomes linked to these  
4 grants. Providing funding outside of the franchise  
5 agreements is also justified especially if the benefits  
6 accrue to the wider society."

7 Just two points, if I may pick up from those two  
8 passages. The second part, Mr Weston links the  
9 provision of subsidy to technology and training, whereas  
10 you pick up the hiring. Is there any difference  
11 conceptually to the cases that you are both making for  
12 subsidy?

13 PROF JOHN STANLEY: None at all, Mr Chan. I think the key  
14 point that we are both really making here is that public  
15 transport in general and franchised buses in particular,  
16 through their operation, generate external benefits to  
17 the wider society, and those benefits have a value to  
18 the community beyond just what's involved in the  
19 commercial returns that are available to the operator  
20 who's providing the service. And if there are -- and  
21 I think it's really important to understand the value of  
22 those external benefits. I think Hong Kong to me should  
23 be having a look at what is the societal value of its  
24 public transport services. I think the numbers are  
25 going to be very big.

26

1           Then, when you've got that sort of background, you  
2           can look at particular policy initiatives, such as  
3           initiatives in technology, initiatives with training, to  
4           test whether they do have external benefits that flow  
5           from them, and whether the changes in the safety  
6           environment that you're going to generate, for example,  
7           either through technology or through training or through  
8           remuneration, if that's a link there too, is going to be  
9           such as justifies the government putting some money in  
10          to support that. In other words, the external benefits  
11          are bigger than the costs involved, but they don't  
12          accrue to the operator.

13          I think that's the key, really. The key concept of  
14          an externality is it's accruing to the wider society and  
15          it's not able to be captured through the fare box, or  
16          land value in some cases.

17       MR DEREK CHAN: In the first paragraph that I read out in  
18       Mr Weston's report, he refers to a concern that if you  
19       don't have public subsidy, it may potentially drive  
20       wrong behaviours or a lack of focus, or restriction on  
21       the investment into new technologies and initiatives.

22          Would you share that concern or do you have any  
23          additional comments on that?

24       PROF JOHN STANLEY: No, absolutely. I think the kind of  
25       argument in, if you like, welfare economic terms, is

26

1       that if you ignore the external benefits that are  
2       available, then the level of service provision will be  
3       not enough; that you should in fact, in terms of trying  
4       to maximise the benefits to society, provide a larger  
5       volume of service than will flow from solely  
6       a commercial operator making a decision on commercial  
7       criteria.

8           I mentioned earlier on in the day the Thredbo  
9       conference that's held every two years, discussing  
10      competition and regulation in public transport, which is  
11      a forum that involves academics, operators in public  
12      transport, and governments. I chair the workshop strand  
13      in that and have done for probably the past ten years,  
14      that looks at trying to value public transport services.  
15      So there's an active conversation happening there in the  
16      academic/public transport operation/government area,  
17      through that forum, and it would be terrific if the  
18      Hong Kong Transport Department and interested academics  
19      from Hong Kong could participate in that forum, which  
20      is, as I say, every two years, the next one being in  
21      Singapore next year.

22   CHAIRMAN: Which other jurisdictions send representatives to  
23      this conference?

24   PROF JOHN STANLEY: Chair, I think at the last one there  
25      were 22 different countries present. Around about  
26

1 a third of the participants would be academics; a number  
2 of public transport operators participate. I notice  
3 when we were reading previously you talked about Tower  
4 Transit in London -- Neil Smith, the principal of that  
5 business, is a regular in this forum; South Africa,  
6 South America are strong participants; a lot of European  
7 countries participate in the venue; Australia is well  
8 represented as well, new Zealand -- 22 countries -- and  
9 senior-level representation from government, from the  
10 universities, and also from operators.

11 CHAIRMAN: I take it, if the next one is in Singapore,  
12 Singapore is also a participant?

13 PROF JOHN STANLEY: Yes, Chair.

14 CHAIRMAN: Is that government and bus operators?

15 PROF JOHN STANLEY: The Land Transport Authority will be  
16 hosting the next event. I suspect that some of the  
17 operators might be sponsors.

18 CHAIRMAN: When is that to be held?

19 PROF JOHN STANLEY: I think it's September next year. Maybe  
20 August. I will send you that information.

21 CHAIRMAN: Thank you.

22 Does it publish information that is available  
23 publicly?

24 PROF JOHN STANLEY: It does, Chair. In fact that's really  
25 the most important part of the whole process. It's all  
26

1 published, and so --

2 CHAIRMAN: Is it available on the internet?

3 PROF JOHN STANLEY: A lot of it is. Some of it gets  
4 actually published as journal papers, which means it's  
5 not available on the internet necessarily but you can  
6 get copies of those papers. Sometimes it appears as  
7 books. But publication is the essence of the process.

8 In fact, it's an unusual conference in the sense  
9 that it takes you -- it extends over four days, three  
10 days of which is based on a workshop format in which  
11 participants choose one topic only and spend three days  
12 working through that topic, and that topic might be, for  
13 example, how do we get more competition into public  
14 transport operation, and they would spend three days  
15 discussing that with colleagues. The workshop I chair  
16 spends three days talking about what are the benefits of  
17 public transport and how can we value them and can we  
18 convert them into cash flows to help pay for services.

19 CHAIRMAN: Thank you.

20 PROF JOHN STANLEY: Chair, my wife points out the next  
21 conference is Sunday, 25 to Friday, 30 August 2019.

22 CHAIRMAN: Thank you.

23 MR DEREK CHAN: Mr Chairman, may I then move on to the next  
24 topic, which is working hour guidelines.

25 CHAIRMAN: You were dealing with the topic of subsidies,  
26

1 where government might play a role in addressing the  
2 issues that Mr Weston has identified. This is an issue  
3 that's been raised, has it not, by the bus operators in  
4 respect of the cost of implementing the decision, if  
5 that's what it is, to install seat belts on franchised  
6 buses?

7 MR DEREK CHAN: Seat belts. We have heard evidence from  
8 Kowloon Motor Bus, Dr Leung, I think it was, who said  
9 that he had one discussion with a government official.

10 CHAIRMAN: Yes. Perhaps if you can turn up that reference  
11 in the transcript. It is also dealt with, is it not --  
12 and I'm working from my unpaginated bundle -- but the  
13 sub-working group on vehicle safety devices, 12 June  
14 2018, paragraph 8. Perhaps we could draw that to  
15 Prof Stanley's attention.

16 You have already been told, Prof Stanley, of the  
17 anxiety being expressed by Citybus of being involved in  
18 an operation of installing seat belts at their cost on  
19 buses where it is their experience that the passengers  
20 won't use them and government won't mandate it and won't  
21 even enforce it. It's a futility, I think is what  
22 they're saying, the whole exercise.

23 Perhaps if we could go to paragraph 8 of those  
24 minutes.

25 MR DEREK CHAN: Yes. Can I start first then by going to the  
26

1 second meeting notes of the sub-working group.

2 CHAIRMAN: Yes.

3 MR DEREK CHAN: It starts at KMB-12, page 4932-1. That's  
4 the first page of the meeting note.

5 CHAIRMAN: What's the date of this meeting?

6 MR DEREK CHAN: 12 June 2018.

7 CHAIRMAN: Thank you.

8 MR DEREK CHAN: The relevant passage that Mr Chairman  
9 referred to is at 4932-3, paragraph 8.

10 Perhaps I can just read that out:

11 "Citybus ... mentioned that the exposed seats on the  
12 existing buses were already fitted with 3 point seat  
13 belts. From their day-to-day operation experience, most  
14 passengers sitting on exposed seats did not wear seat  
15 belts. The retrofitting work with huge cost would be  
16 a waste of money if nobody uses them. It was agreed  
17 that promotion and education to passengers should be  
18 conducted to promote the use of seat belts. Citybus  
19 said that they had about 1,100 bus registered in or  
20 after 2013 which might be feasible [for] retrofitting  
21 seat belts to the upper deck. The estimated cost of  
22 retrofit would be in the magnitude of about  
23 HK\$240 million which is almost impossible for the  
24 company to afford. Citybus requested the government to  
25 provide funding or subsidy to such retrofit projects if  
26

1           that is really required. Therefore they have no plan to  
2           retrofit seat belts on their own. It was agreed that  
3           the issue of financial implication would be brought up  
4           in the working group for discussion."

5           Just to complete the picture in respect of the other  
6           two companies, at paragraph 9:

7           "Kowloon Motor Bus ... emphasised that they  
8           supported the seat belt installations for all new  
9           buses", and in a phase-by-phase approach.

10          At the end of that paragraph:

11          "New Lantao Bus objected to such installation due to  
12          low utilisation rate and huge cost. New Lantao Bus had  
13          no plan to retrofit seat belts."

14          That's the position in respect of the three  
15          providers.

16   CHAIRMAN: So KMB might consider to retrofit seat belts; is  
17           that the point being made there?

18   MR DEREK CHAN: Yes.

19   CHAIRMAN: They were prepared to fit them on new buses but  
20           they would only consider retrofitting them on existing  
21           buses.

22   MR DEREK CHAN: Yes. We also saw in a previous meeting note  
23           that we went through that it was KMB who came up with  
24           the initiative or proposal about retrofitting upper deck  
25           and on specific routes that are long-haul or go on  
26

1 expressways.

2 Perhaps just to complete the picture about the  
3 evidence from Dr Leung in the last hearing, can I refer  
4 the committee to the transcript for 12 September 2018.  
5 That should be at transcript bundle 6. The relevant  
6 part of it is at page 18, line 14. Again, maybe I will  
7 read out Dr Leung's evidence:

8 "May I just add. Recently I had a meeting with the  
9 government official and in fact I talked to him and  
10 requested the government whether they can offer any  
11 assistance to us in retrofitting these safety belts, and  
12 the response was quite positive, if I may put it this  
13 way."

14 And the person was Mr Joseph Lai, permanent  
15 secretary for transport, and his deputy, Mr Kevin Choi.

16 CHAIRMAN: Now, this is ground that we have covered, in  
17 a sense, already, but it is actually a real issue in  
18 Hong Kong. So that we understand what you are saying,  
19 this is what calls for an analytical cost/benefit  
20 analysis. You say, on the one hand, government can make  
21 a decision, "As a matter of policy, that's what we are  
22 going to do", but even when government makes policy  
23 decisions, surely it has regard to cost/benefit  
24 analysis?

25 PROF JOHN STANLEY: You would hope so, Chair, but the  
26

1 evidence is that's probably not always the case. But in  
2 a situation like this, you would hope that government  
3 would go through the process of doing that cost/benefit  
4 analysis and identifying the benefits, and if those  
5 benefits look substantial, they are very much  
6 externalities. These aren't benefits that are going to  
7 be captured for the operator. So they are a case for  
8 looking at subsidy as a means of helping this process to  
9 happen.

10 CHAIRMAN: There might be benefits for the operator. If  
11 accidents are prevented so the passenger doesn't get  
12 injured when the bus brakes or hits something, that's  
13 a benefit for the operator.

14 PROF JOHN STANLEY: It is, that's true.

15 CHAIRMAN: They don't have damages to pay.

16 PROF JOHN STANLEY: That's true. The larger component of  
17 these will be externalities that are not able to be  
18 captured by the operator. So you would make  
19 the argument for a sharing on the basis of the cost  
20 between the government and the operator.

21 CHAIRMAN: But when government is disposing of taxpayers'  
22 money, it behooves government to have regard to what the  
23 benefit and the cost is, does it not?

24 PROF JOHN STANLEY: Absolutely, to do the quantification and  
25 to work through the exercise we were talking about  
26

1 an hour or so ago.

2 CHAIRMAN: Yes, Mr Chan.

3 MR DEREK CHAN: Mr Chairman, I have three more topics. One  
4 is the issue of guidelines, the second being  
5 transparency of safety data, and the third, bus captain  
6 training. I suspect I will need about 20 minutes or  
7 half an hour to finish that. Does Mr Chairman want  
8 a break now or do you want me to head straight through?

9 CHAIRMAN: I am conscious that you have been on your feet  
10 and the professor has been in the hot chair, as it were.  
11 Shall we take ten minutes?

12 PROF JOHN STANLEY: I'm happy to go either way.

13 MR DEREK CHAN: Thank you, Mr Chairman.

14 CHAIRMAN: Ten minutes then.

15 (4.21 pm)

16 (A short adjournment)

17 (4.38 pm)

18 CHAIRMAN: Yes, Mr Chan.

19 MR DEREK CHAN: Thank you, Mr Chairman, and Professor.

20 If I may then go directly to the issue of working  
21 hour guidelines. I think the biggest point you make  
22 there is the difference between Melbourne and Hong Kong,  
23 in the sense that in Melbourne, working hour guidelines  
24 are embedded within legislation, whereas in Hong Kong,  
25 we have them in the form of just guidelines.

26

1 Can I take you to the relevant passage in your  
2 expert report on that issue, and that is at page 91 of  
3 your expert report. I'm looking at the middle paragraph  
4 of page 91, and if I may read it out:

5 "Two notable differences between Hong Kong and  
6 Melbourne with respect to working/rest hours are that  
7 (1) the Melbourne (Victorian) requirements on  
8 work/driving/rest are set out in a regulation (the  
9 National Heavy Vehicles (Fatigue Management) National  
10 Regulations 2013), with (2) a safety duties/chain of  
11 responsibility link, whereas in Hong Kong they are the  
12 subject matter of a Guidelines document" -- and you can  
13 take reference to that -- "without specific legislative  
14 reference to safety duties or chain of responsibility.  
15 The Hong Kong Public Bus Services Ordinance (Cap 230)  
16 provides for regulations of working/driving/rest hours  
17 but this has not been taken up."

18 Pausing there, Mr Chairman, the reference to that is  
19 section 35J of the Ordinance, and the page number,  
20 without going to it, if I may --

21 CHAIRMAN: You are going to go into it?

22 MR DEREK CHAN: I don't propose to go to it.

23 CHAIRMAN: I'm familiar with the provision.

24 MR DEREK CHAN: The page reference is TD-2, page 56.

25 Professor, you go on to say in your report that:  
26

1 "This difference in mode of establishing  
2 working/rest hour requirements between the two  
3 jurisdictions seems likely to mean that there will be  
4 a stricter focus by operators on compliance in  
5 Melbourne, since the consequences of non-compliance  
6 involve a breach of the law, which could have legal  
7 consequences for a number of people in the business, and  
8 others (possibly also including the government service  
9 procurer), because of chain of responsibility."

10 The last part is a reference to the Bus Safety Act  
11 that we already looked at this morning. And one of your  
12 key recommendations is for our guidelines to be embedded  
13 within some sort of regulation.

14 Mr Chairman, the reference for that is page 94 of  
15 the expert report, which I won't go to. It's simply  
16 a one-line reference to that.

17 CHAIRMAN: Yes, I see that. Thank you.

18 MR DEREK CHAN: Professor, it may be obvious, but can  
19 I still ask you to elaborate on the advantages of  
20 incorporating the working hour guidelines into  
21 regulation and giving it the force of law.

22 PROF JOHN STANLEY: Thank you, Mr Chan. In the Melbourne  
23 situation, and I think I have included in my first  
24 report some examples of the potential consequences of  
25 not complying -- this was at page 27 of my first report,

26

1           which is ...

2       CHAIRMAN: I think the numbers marry up.

3       PROF JOHN STANLEY: So it will be page 27 also. They are  
4           just some examples of the penalties that are there for  
5           some of the problems that might occur for a breach.

6       CHAIRMAN: Yes. It's from that page that I got the feel of  
7           how it is that the higher up the chain you are, the more  
8           the penalty is.

9       PROF JOHN STANLEY: Yes. The consequences have potential  
10           monetary amounts involved with them for a range of  
11           parties, as I think I also indicated earlier today, and  
12           the new revisions of the national law that are coming in  
13           on 1 October, potential for imprisonment as well for  
14           reckless behaviour and substantially increased penalties  
15           at the top of end of this scale.

16           So this is taken very seriously because it has that  
17           sort of embedding. I think maybe the police have  
18           criticised the application of this possibility to date,  
19           saying they don't think enough heavy penalties have been  
20           imposed. This is primarily in trucking rather than in  
21           the bus area. These provisions are mostly in  
22           infringements coming up in terms of trucking. But  
23           certainly the provisions are there, and from the  
24           conversations that I have with our bus operators, they  
25           are very conscious of these provisions and the

26

1 consequences for themselves, as management, but also for  
2 other potential players in that chain of responsibility.

3 Chair, I would also make the I think important point  
4 that our regulation is embedded in something that's  
5 called "fatigue management regulation". So it's Heavy  
6 Vehicles (Fatigue Management) National Regulations, as  
7 distinct from the Hong Kong approach which is guidelines  
8 that refer to working.

9 CHAIRMAN: Yes.

10 PROF JOHN STANLEY: So it's quite a different focus, and  
11 I think that's quite important. We have been on  
12 a fatigue focus for quite some time.

13 CHAIRMAN: Forgive me for interrupting. May I ask that  
14 somebody enquire why we are now being visited by  
15 a bright flashing red light? Thank you.

16 MR DEREK CHAN: Can I ask the question in this way: can you,  
17 Professor, see any downside in making the working hour  
18 guidelines a matter of legal requirement under statute?

19 PROF JOHN STANLEY: No.

20 MR DEREK CHAN: Can I also ask you to consider the Transport  
21 Department's explanation for not putting the working  
22 hour guidelines into regulation, and the evidence from  
23 the Transport Department I will ask you to have a look  
24 at is on the first day of the evidence, which is on  
25 7 May 2018, so it's the first set of transcripts in the  
26

1 first transcripts bundle, and can I please refer you to  
2 page 121, starting at line 4.

3 CHAIRMAN: Who is giving evidence?

4 MR DEREK CHAN: This would be Ms Mable Chan, the  
5 Commissioner for Transport.

6 CHAIRMAN: Thank you.

7 MR DEREK CHAN: If I go forward a page just to give some  
8 context, Mr Duncan, in the middle of the page at  
9 line 13, page 120, says:

10 "Ms Chan, you were present this morning, I think,  
11 when I asked representatives from the bureau as to why  
12 these guidelines with regard to working hours are simply  
13 guidelines, as opposed to regulations, given that the  
14 ordinance expressly stipulates that this topic can be  
15 the subject of regulation.

16 Are you able to assist the committee as to the  
17 reason why this has not been a regulation or has not  
18 even achieved the status of a direction or a  
19 requirement?"

20 The response or the explanation of Ms Mable Chan,  
21 the Commissioner for Transport, was this:

22 "Because I was present at this morning's session and  
23 the context in which this issue was raised was on  
24 whether or not it should be better implemented or  
25 enforced under the law or as a franchise requirement.

26

1 First perhaps I can express my view from an  
2 operational and monitoring point of view. As I see it,  
3 the history of the working hours guidelines is long and  
4 it is an ongoing process. As revealed from the few  
5 times that the guidelines are revised, the beauty of the  
6 requirements as set out in the guidelines is that it  
7 could be reviewed and revised in a more timely basis as  
8 compared to if it is stipulated as the ordinance or in  
9 the regulation; though I must admit that as and when  
10 necessary, we should not spare ourselves from the effort  
11 in reviewing the legislation or taking it through the  
12 Legislative Council.

13 The fact remains that, being guidelines, it can be  
14 more flexible and it can be sort of enhanced in the  
15 light of the prevailing circumstances. Franchised bus  
16 service is a very labour-intensive service. There are  
17 also highly prescriptive requirements on the service  
18 levels of franchised bus. So I think from the  
19 government perspective, we are trying to strike a  
20 balance in ensuring the delivery of bus service  
21 according to franchise requirement on the one hand and  
22 the enhancement of the working environment of bus  
23 captains on the other."

24 So there is the explanation from the Transport  
25 Department, for convenience, if I could sum it up in  
26

1           that way.

2       CHAIRMAN: Reviewed and revised in a more timely way, and  
3           more flexible.

4       MR DEREK CHAN: Yes.

5       CHAIRMAN: Just remind me, prior to the February 2018  
6           revision, when was the last revision of the guidelines?

7       MR DEREK CHAN: 2010.

8       CHAIRMAN: So eight years?

9       MR DEREK CHAN: Yes.

10      CHAIRMAN: And prior to that, 2010?

11      MR DEREK CHAN: 2004.

12      CHAIRMAN: So six years?

13      MR DEREK CHAN: Yes, and I think the evidence previously was  
14           that the 2018 amendment kicked off because of the  
15           September 2017 accident.

16      CHAIRMAN: Yes. That was when a review of the guidelines  
17           was commenced, in consequence of that.

18      MR DEREK CHAN: Again, in reaction to that accident.

19      CHAIRMAN: Yes. So six and eight years?

20      MR DEREK CHAN: Yes.

21      CHAIRMAN: Timely? A more timely way?

22      MR DEREK CHAN: Perhaps I can just give the reference to  
23           that table of amendments. It's at MISC-1, page 897,  
24           just for the reference of the committee.

25      CHAIRMAN: Thank you. That's helpful. This details the way  
26

1           that the guidelines have been changed.

2       MR DEREK CHAN: Exactly. 2004, 2007, 2010, 2018.

3       CHAIRMAN: Yes.

4       MR DEREK CHAN: Professor, do you have any observation --

5       CHAIRMAN: Before you ask the more general question, we have

6           seen that there are penalties available for infractions.

7           Given the work that you have done over the years with

8           buses in Victoria, how often are people prosecuted,

9           presumably, for this kind of infraction?

10      PROF JOHN STANLEY: Very rare, Chair, and not in fact in

11           relation to route bus operation. It's much more likely

12           to occur in the longer distance running.

13      CHAIRMAN: Yes. I can understand the different demands

14           there.

15      PROF JOHN STANLEY: Yes.

16      CHAIRMAN: But very rare in buses?

17      PROF JOHN STANLEY: Yes, in route buses, yes.

18      CHAIRMAN: In route buses?

19      PROF JOHN STANLEY: Yes. And if I might comment on that

20           issue of convenience. It seems to me that you have to

21           decide whether the guidelines or a regulation are about

22           convenience to the authority or whether they are about

23           outcomes to the public, and coming as a consequence of

24           compliance with whatever it is you are putting in those

25           guidelines. So my personal view would be it is more

26

1           important to put weight on -- emphasis on compliance  
2           than it is on administrative convenience.

3   CHAIRMAN: Is the fact that prosecutions are very rare for  
4           infractions of this working hours legislation for route  
5           buses because there is a high level of compliance?

6   PROF JOHN STANLEY: I believe so, Chair, yes. In fact the  
7           scheduling and rostering processes that the operators  
8           use have very much the provisions of the regulation  
9           sitting behind them, and they build a little bit of  
10          margin for error in there, so that they don't bump up  
11          against the boundaries that are created with respect to  
12          the lengths of time before they need to take a break.

13   CHAIRMAN: Yes.

14           The figures of compliance with working hour  
15          guidelines in Hong Kong, have you looked at them?

16   PROF JOHN STANLEY: I think my recollection was 96 per cent.

17   CHAIRMAN: Yes. That accords with mine, 97, perhaps,  
18          something like that.

19   PROF JOHN STANLEY: Yes. My concern there would be that  
20          there's 4 per cent non-compliance, and why is that, what  
21          is the consequence of that.

22   CHAIRMAN: Thank you.

23           Yes, Mr Chan.

24   MR DEREK CHAN: Thank you, Professor.

25           Can I move on then to the next topic, which I hope  
26

1 is more straightforward. That is the transparency of  
2 the safety data.

3 You make that point at page 69 of your expert  
4 report. At the first bullet point of page 69 you say:

5 "There are solid arguments favouring publication of  
6 the bus safety chapter of the five year forward planning  
7 programmes, because of the wider societal costs of  
8 accidents."

9 I think you were referring to a number of analytical  
10 statistics that relate to safety issues.

11 PROF JOHN STANLEY: Yes, Mr Chan. I thought that the  
12 discussion in some of those bus safety chapters was  
13 really informative, and it is the sort of information  
14 that I believe, in the public interest, should be more  
15 widely available.

16 I'm referring, for example, to the kinds of analysis  
17 that was presented on the driving our links and how that  
18 affected accident performance, I think it was.

19 CHAIRMAN: Yes, and non-links, as I think it was  
20 established, between the number of hours you drive, the  
21 age of the drivers, that sort of comparison?

22 PROF JOHN STANLEY: Exactly, Chair. Accident rate by years  
23 of service, accident rate by hours on duty before the  
24 accident. I mean, I think this is really good analysis,  
25 and it shouldn't be stuck in documents that are only

26

1       available to a few select people. It's really important  
2       information in the public interest, in my view, and it  
3       shows that there's some really good research being done,  
4       trying to come to grips with the challenges that are  
5       being faced in the safety sense and it would give people  
6       confidence in what the industry is trying to do.

7       CHAIRMAN: The committee obviously agrees with you, because  
8       initially we were denied access to this material, and by  
9       a series of steps over several months we have managed to  
10      obtain a great deal of this material by people being  
11      willing to give it to us, perhaps recognising that it is  
12      data of relevance.

13     PROF JOHN STANLEY: Indeed, and it is data that can inform  
14     you on areas that are unique to focus the effort.  
15     I drew attention in fact to a little jump in the kind of  
16     six to eight-hour period after the start of shift in  
17     which the accident rate seemed to go up a little bit,  
18     and I didn't see that actually commented on in the paper  
19     in which the evidence was presented, but it just shows  
20     that the sort of analysis and the data presentation can  
21     lead you into asking questions that might be able to  
22     help better safety outcomes.

23     CHAIRMAN: Mr Chan, there is one matter -- I mention it now  
24     so that perhaps Ms Wong can find it -- you raised or you  
25     drew attention to the fact that the Transport  
26

1 Department, in the letter it wrote requiring KMB to  
2 address why there had been an increase in accident  
3 rates -- we now have the KMB forward planning report.  
4 Presumably, that gives us an explanation. The latest  
5 report was given to us during August 2018, again at our  
6 request, when one of the members of the KMB  
7 representatives told us that they were going to provide  
8 it to the Transport Department, my memory is, on  
9 18 August.

10 MR DEREK CHAN: Yes. The latest version has made it into  
11 our bundles. I will ask Ms Wong to marry it up with  
12 what the Transport Department asked for.

13 CHAIRMAN: Yes, that's what I'm inviting you to do: what was  
14 the explanation for why the rate had gone up? You don't  
15 have to do it immediately. Carry on with your list.

16 MR DEREK CHAN: Yes. Mr Weston also makes a similar point,  
17 on the transparency of this sort of data. Can I quickly  
18 take you to that at page 153 of the expert bundle, and  
19 if I can just read you --

20 CHAIRMAN: Can you give me the paragraph number, because I'm  
21 working from the set that I've marked up.

22 MR DEREK CHAN: That would be page 39 of the internal  
23 pagination of Mr Weston's report.

24 CHAIRMAN: Thank you. I've got that open.

25 MR DEREK CHAN: Paragraph 84, under the heading, "Safety  
26

1 data transparency/performance". If I can read it out:

2 "It is clear from London's experience that greater  
3 transparency of data in relation to the safety  
4 performance of the bus network not only leads to greater  
5 stakeholder and public scrutiny [but] it also leads to  
6 a sharper focus from both the transport authority and  
7 its contracted bus operators on the safety agenda.  
8 An open approach to incident data leads to  
9 accountability.

10 Consideration should be given to what safety data in  
11 relation to the Hong Kong franchised bus network could  
12 be placed into the public domain."

13 Professor, do you agree with that or do you have any  
14 other observations in that regard?

15 PROF JOHN STANLEY: I agree fully with that, Mr Chan. My  
16 view generally on the Greater London authority and  
17 Transport for London is they are almost without peer in  
18 terms of availability of data and information, in  
19 a global sense, and they don't try and hide things, they  
20 try and put it out there, and warts and all are prepared  
21 to confront the sorts of challenges that that shows.

22 I think that really leads to a lot of confidence in  
23 that process, so I'm very supportive.

24 CHAIRMAN: In fact this material is available on the  
25 internet and they publish it every quarter.

26

1 PROF JOHN STANLEY: They do, yes.

2 MR DEREK CHAN: Yes, Mr Chairman. Can I then move on to the  
3 last topic in my notes, and that is bus captain  
4 training.

5 In page 78 of the expert bundle, which should be the  
6 second report, you have a section on bus captain  
7 training. I think the point here is that the driver  
8 training requirement is specifically required under the  
9 Melbourne contracts.

10 PROF JOHN STANLEY: (Nodded head).

11 MR DEREK CHAN: And in Hong Kong, recently, the Transport  
12 Department has recently promulgated a practice note in  
13 respect of this training guideline, so I won't take you  
14 to the details of that.

15 But there is one matter arising out of the captain  
16 training that I would like to ask you about, and that is  
17 on fatigue management training, which you expressly  
18 mention at page 90 of your report. At page 90, can  
19 I perhaps read from the second full paragraph, where you  
20 deal with your recommendation that fatigue management  
21 training should be part of our training programme. You  
22 say in here that:

23 "Working for 13-14 hours in Melbourne or Hong Kong  
24 puts a major focus on the question of how drivers use  
25 their remaining hours, whether they are getting  
26

1 sufficient rest/sleep to avoid fatigue and on the  
2 importance of including fatigue management training in  
3 driver training programmes. Within the various bus  
4 captain training materials included in the annexes to  
5 the Transport Department submission at pages 1448 and  
6 following, and also in the briefing paper to the  
7 Legislative Council Panel on Transport on Enhancement of  
8 Safety of Franchised Buses ... the author did not see  
9 any mention of training in fatigue management. This is  
10 an important part of bus driver training in Melbourne,  
11 including attention to related matters such as diet and  
12 exercise. The training also extends to supervisors, to  
13 try to ensure that they do not roster drivers who may be  
14 fatigued. More broadly, the idea of the Transport  
15 Department developing a practice note on the training  
16 framework for franchised bus captains is a good idea, as  
17 outlined in the paper to the Legislative Council Panel.  
18 This will help to ensure that all operators are aware of  
19 desired standards and have a means of conveying these  
20 standards to their bus captains. The training framework  
21 that is developed needs to include a specific component  
22 on fatigue management, which could form part of  
23 an occupational health and safety module and should  
24 extend to supervisors."

25 Professor, can you elaborate on what would be  
26

1 involved in this type of fatigue management training?

2 PROF JOHN STANLEY: Yes. The operators in Melbourne, when  
3 they're training new drivers or when they're running  
4 retraining programmes, refresher programmes, fatigue  
5 management is an important component in that programme.

6 It is interesting, in our national legislation, that  
7 is then adopted into Victorian law under an Act called  
8 the Heavy Vehicle National Law Application Act, which  
9 I talk about on pages 33 and 34 of the first report,  
10 that legislation lists a whole bunch of signs of  
11 fatigue. That's how seriously fatigue is taken in this  
12 area in Victoria.

13 So if you go to page 34, you will see -- this is  
14 a quote from the legislation that embeds the national  
15 law in Victorian law -- it talks about:

16 "Signs of fatigue means that a person was or will be  
17 fatigued when driving a fatigue-related heavy vehicle on  
18 a road (whether the sign manifests itself before, during  
19 or after the driver drove the vehicle)."

20 Then it gives a range of a dozen or so examples of  
21 signs of fatigue. Those sorts of signs then would be  
22 incorporated into that training programme, but a lot of  
23 our operators will introduce dietitians, for example,  
24 exercise people into their driver training courses, with  
25 sitting on your backside for 10 or 11 hours a day  
26

1 driving a bus is probably not great health-promoting  
2 exercise. So those sorts of things form a really  
3 important part of driver training, because of the nexus  
4 between understanding what causes fatigue and the risks  
5 of safety associated therewith.

6 MR DEREK CHAN: I think your overall recommendation is that  
7 this sort of training should form part of the practice  
8 note that the Transport Department issued.

9 PROF JOHN STANLEY: It is, Mr Chairman, I think the practice  
10 note is a really good idea in terms of raising the bar  
11 on a common base level of training. But I think it is  
12 important that fatigue forms part of that. In terms of  
13 application, I think I commented that the guidelines, if  
14 they are adhered to as they stand at the moment, if  
15 anything, marginally tighter than the comparable  
16 provisions in Melbourne. The main difference in fact is  
17 in terms of how they are applied in practice, where  
18 I talked earlier today on about 44/45 hours being our  
19 norm, but I understand that it's a much bigger number  
20 than that in Hong Kong, based on some of the evidence  
21 that I've seen presented to the committee before.

22 CHAIRMAN: Yes, very significantly more than that.

23 PROF JOHN STANLEY: Yes. So that would make the issue of  
24 fatigue management even more important here.

25 CHAIRMAN: And that's missing from the practice note?  
26

1 PROF JOHN STANLEY: (Nodded head).

2 CHAIRMAN: Sorry, a nod doesn't go on the transcript. Do  
3 you agree?

4 PROF JOHN STANLEY: I haven't seen the practice note yet.

5 CHAIRMAN: Perhaps we can put it up, since we are on  
6 training.

7 PROF JOHN STANLEY: Apologies. I have read that, Chair.

8 CHAIRMAN: Do we have a reference for that in the bundles?

9 MR DEREK CHAN: TD-1, page 470, is currently being shown on  
10 the screen. The contents of the practice note are at  
11 page 471.

12 CHAIRMAN: Thank you.

13 MR DEREK CHAN: Across the page at 472 as well, and I think  
14 the point simply is that there is no reference to any  
15 fatigue management training.

16 CHAIRMAN: There is no specific reference to it, is there?

17 PROF JOHN STANLEY: Chair, my suggestion was that it could  
18 be picked up under the occupational health and safety  
19 component of item (e), which is only 5 to 10 per cent,  
20 I think you would need to beef that up if you were going  
21 to do it that way, but it is part of occupational health  
22 and safety but it needs a specific focus.

23 CHAIRMAN: Thank you.

24 MR DEREK CHAN: Mr Chairman, those are the questions that  
25 I have arising from the professor's report. It remains  
26

1           for me to follow up on two matters that Mr Chairman  
2           raised with me during the course of the questioning.

3   CHAIRMAN:   Yes.

4   MR DEREK CHAN:  The first relates to the requests that the  
5           Transport Department received --

6   CHAIRMAN:   Yes.

7   MR DEREK CHAN:  -- in respect of the seat belt installation.

8           I think Mr Chairman remembers the passage but I will  
9           just give the chairman the page reference for that.  
10          That was mentioned during the 1st meeting of the working  
11          group which was held on 13 March 2018, and the page  
12          reference for that in our bundles is KMB-12/4869-1, at  
13          paragraph 16.  I see it up on the screen now.

14          At paragraph 16, Citybus was querying the  
15          practicality and raising the concern that standees could  
16          not be provided with seat belts.  Then the passage goes  
17          on to record:

18          "TD advised that there were requests for  
19          a comprehensive review on seat belts installation on bus  
20          after the traffic accidents."

21   CHAIRMAN:   Just a moment.  Let me read that again.

22          "... comprehensive review on seat belts installation  
23          on bus after the traffic accidents."

24   MR DEREK CHAN:  Yes.  Mr Chairman, the date of this meeting  
25          was 13 March 2018, and there was actually a relevant  
26

1 discussion on this in the LegCo Panel for Transport on  
2 15 February 2018, and with the assistance of the very  
3 helpful staff of the secretariat and Ms Wong, we have  
4 actually located the relevant LegCo meeting minutes that  
5 discuss this.

6 CHAIRMAN: Yes.

7 MR DEREK CHAN: I think that is now being shown on the  
8 screen.

9 On the first page, we can see that it is the minutes  
10 of a special meeting of the Panel on Transport in LegCo,  
11 held on Thursday, 15 February 2018.

12 Can I direct Mr Chairman's attention to page 19.

13 CHAIRMAN: Yes.

14 MR DEREK CHAN: If I just go back a page to 18, at the  
15 bottom of page 18, at paragraph 78, Mr Chairman can see  
16 the context in which this happened. So:

17 "Mr Chan Hak Kan moved the following motion which  
18 was seconded."

19 At page 19, you can see the motion being proposed:

20 "This panel expresses deep sorrow and regret at the  
21 occurrence of a serious traffic accident on Tai Po Road  
22 on 10 February resulting in 19 fatalities and 66  
23 injuries and, in order to prevent the recurrence of such  
24 a tragedy, this panel urges the administration to:

25 1. Request franchised bus companies to review the  
26

1 staffing establishment of bus captains, provide  
2 reasonable working hours, rest time, meal breaks and  
3 remuneration packages for bus captains, and provide on  
4 a compulsory basis regular training on a safe driving  
5 attitude for full-time and part-time bus captains to  
6 ensure that bus captains are equipped with the qualities  
7 of a good driver."

8 So, Mr Chairman, that forms part of the working  
9 group.

10 CHAIRMAN: Yes.

11 MR DEREK CHAN: "2. Apply anti-skid surface dressing, erect  
12 additional deceleration warning signs and install speed  
13 enforcement cameras on the subject road section  
14 immediately, and review the 'high-risk' road sections  
15 across the territory and expeditiously enhance the  
16 relevant safety measures to safeguard the safety of road  
17 users."

18 Thirdly --

19 CHAIRMAN: Just a moment, please. So, in context, the  
20 reference to "the subject road section" is to the  
21 Tai Po Road, the scene of the accident?

22 MR DEREK CHAN: Yes, according to the date of the panel  
23 meeting, that must be the case.

24 CHAIRMAN: Yes.

25 MR DEREK CHAN: And:  
26

1           "3. Explore ways to further strengthen the safety  
2           installations on buses, including enhancing the  
3           protection for high-risk seats, retrofitting seat belts  
4           on more seats and making it compulsory in phases for  
5           passengers to wear seat belts ..."

6           It goes on to talk about other devices. So that's  
7           the context in which the seat belt request had been made  
8           by the LegCo Panel.

9           Over the page at paragraph 79, you can see that the  
10          motion was carried.

11       CHAIRMAN: Yes.

12       MR DEREK CHAN: I hope that answers at least part of

13          Mr Chairman's concern. We will probably raise it with  
14          the Transport Department again.

15       CHAIRMAN: We will do, because they haven't told us what it  
16          was, but this appears a logical explanation.

17       MR DEREK CHAN: Possibly, yes.

18       CHAIRMAN: But this refers to one accident. They refer in  
19          the plural to "accidents".

20       MR DEREK CHAN: Yes. We have in the bundle documents dating  
21          back to 2003 and 2006 in which this issue had been  
22          raised, but perhaps it is more properly an issue that we  
23          can take up with the Transport Department when they come  
24          back.

25       CHAIRMAN: Well, I think it's a matter -- you are referring  
26

1 to discussions, papers --

2 MR DEREK CHAN: Yes.

3 CHAIRMAN: -- where the Transport Department have considered  
4 whether or not to require seat belts to be provided on  
5 buses, but dismissed it.

6 MR DEREK CHAN: Yes, which also --

7 CHAIRMAN: I think it might help if you were to tell  
8 Prof Stanley about that, and perhaps you can also tell  
9 us which jurisdictions they looked at when they decided  
10 it wasn't a good idea.

11 This is a matter that was considered 15 years ago,  
12 was it not?

13 MR DEREK CHAN: Yes. I think the point -- I'm not going to  
14 go to the document but I think the point is they have  
15 consistently looked at it and consistently decided that  
16 it wasn't going to be very useful, having regard to the  
17 experience in overseas jurisdictions.

18 CHAIRMAN: Yes. Perhaps you can turn up a couple of those  
19 in that journey towards the conversion on the road to  
20 Damascus, which happened in April this year.

21 MR DEREK CHAN: Can I refer the committee to bundle SEC-1.  
22 Page 274 is where one paper starts.

23 CHAIRMAN: Whoever makes these lever-arch files has failed  
24 to make one that doesn't break whenever it is  
25 transferred to the auditorium.

26

1 MR DEREK CHAN: Yes. Does Mr Chairman have the document at  
2 page 274?

3 CHAIRMAN: Thank you. I do.

4 MR DEREK CHAN: The date of this document is January 2007.  
5 You can find the reference to the date at page 280.

6 CHAIRMAN: And what is it?

7 MR DEREK CHAN: It is a briefing paper prepared by the  
8 Transport Department.

9 CHAIRMAN: "Environment, Transport and Works Bureau", of the  
10 Transport Department?

11 MR DEREK CHAN: Yes. And the purpose would be for a LegCo  
12 Panel on Transport meeting. It's a progress report on  
13 measures to enhance safety of the franchised bus  
14 operation.

15 CHAIRMAN: Thank you.

16 MR DEREK CHAN: Mr Chairman, you can see at page 274,  
17 paragraph 3, the immediate reference to retrofitting  
18 seat belts on franchised buses. And the reference to  
19 overseas data, we can find that at paragraph 4 on  
20 page 275:

21 "We have collected information from other countries  
22 on the requirements of fitting and fastening of seat  
23 belts on buses. So far, we have not found any country  
24 that have legal requirements for the provision of seat  
25 belts on passenger seats of buses designed for urban use  
26

1 and are allowed to carry standing passengers. According  
2 to the transport authorities of these countries, the  
3 benefit of imposing a seat belt requirement in their  
4 buses is uncertain. A summary of the findings is at  
5 annex I."

6 And annex I can be found at page 281.

7 CHAIRMAN: Yes.

8 MR DEREK CHAN: So that's January 2007.

9 CHAIRMAN: So the jurisdictions concerned are the

10 United States of America, Canada, the United Kingdom,  
11 the state of Victoria in Australia, New Zealand,  
12 Netherlands and Singapore?

13 MR DEREK CHAN: Yes. And we have seen references to those  
14 similar countries in the 2018 briefing paper to the  
15 LegCo Panel on Transport as well, which we have already  
16 looked at today.

17 CHAIRMAN: This paper appears to be a response -- I'm  
18 looking at page 274 -- to an earlier discussion in the  
19 LegCo Panel on Transport in 2006.

20 MR DEREK CHAN: Yes. That can be found just before this  
21 document. The 2006 document starts at page 266.

22 CHAIRMAN: Was it couched in a similar way to the note that  
23 we just looked at in February or March of this year,  
24 a request that there be a comprehensive review; is that  
25 the same language?

26

1 MR DEREK CHAN: Yes, very much the same language.

2 CHAIRMAN: Perhaps you can read that out, at 266.

3 MR DEREK CHAN: 266 is the start of the document.

4 CHAIRMAN: Yes.

5 MR DEREK CHAN: The relevant part the document, which is the  
6 one dated October 2016, is at paragraph 19.

7 If I can just read a little bit at the end of  
8 paragraph 18.

9 CHAIRMAN: Yes.

10 MR DEREK CHAN: Because it has the phrase "traffic  
11 accidents", which Mr Chairman picked up on, in the  
12 minutes. I'm reading from the bottom half of  
13 paragraph 18 on page 271:

14 "In the light of recent traffic accidents, TD has  
15 been reviewing with the franchised bus operators on  
16 retrofitting of seat belts on the existing buses, taking  
17 into account of the technical difficulties such as the  
18 structural strength of the seats, adequate anchorage  
19 points and design of the bus, et cetera."

20 So we have the same process repeating itself.

21 Paragraph 19:

22 "We have conducted a research on overseas practices  
23 regarding the fitting and wearing of seat belts in  
24 buses. A summary of the corresponding seat belt  
25 requirements is at annex."

26

1           Again, the same reference to no overseas  
2           jurisdiction having this requirement.

3       CHAIRMAN:   Yes.   Thank you.   So that's 2006, 2007.

4       MR DEREK CHAN:   Yes, and we can't find anything between 2007  
5           and 2018, when the issue raised its head again at the  
6           moment.

7       CHAIRMAN:   Yes.   Thank you.

8       MR DEREK CHAN:   The second issue that Mr Chairman raised  
9           with me is the request --

10      CHAIRMAN:   Perhaps having taken Prof Stanley through this  
11           material -- this obviously is a matter for the Transport  
12           Department to help us with -- on its face, it looks as  
13           though this review has been conducted in the past and  
14           it's been decided by reference to other jurisdictions,  
15           including Victoria, that it's not necessary for  
16           Hong Kong.

17           Is there any general reason -- you perhaps wouldn't  
18           know any specific reason in Hong Kong -- but any general  
19           reason that you can see for this I called it the  
20           conversion on the road to Damascus moment?

21      PROF JOHN STANLEY:   I think the findings from places like  
22           Australia -- and we were involved in some of these  
23           exercises when I was with the National Road Transport  
24           Commission back in the 1990s -- the major benefit from  
25           buses in terms of collision comes from the mass of the

26

1 vehicle, not from seat belts, and the question then  
2 becomes what marginal value on top of that does a seat  
3 belt generate for you?

4 Certainly, at the time this paper was written, that  
5 would very much have been the result of cost/benefit  
6 analyses, if you had done them on this circumstance.

7 Why might it be different now in Hong Kong? I think  
8 it probably goes to the question of people seated  
9 upstairs -- is there a possibility that the probability  
10 of an accident is much higher in that circumstance?

11 I don't know the answer to that. But that's what  
12 I would be looking for. Is there a higher risk, for  
13 example, of injury associated with travelling in the  
14 upper deck of a double-decker bus than there might be on  
15 a single-level platform vehicle like we have in  
16 Melbourne that might justify the use of seat belts  
17 upstairs, so to speak? I don't think downstairs would  
18 be much different to our buses.

19 CHAIRMAN: But, to come back to the way you have analysed  
20 things, one would need empirical data to make this  
21 judgment, what is the accident data, how many people are  
22 thrown out of the bus, how many buses fall over --

23 PROF JOHN STANLEY: Exactly, Chair. It's exactly the kind  
24 of analysis that should be done to resolve these kinds  
25 of questions.

26

1 CHAIRMAN: Yes. Thank you.

2 Mr Chan, you were moving to your last point,  
3 I think.

4 MR DEREK CHAN: Yes, and I think Mr Chairman raised with me  
5 that in the 2018 letter from the Transport Department --

6 CHAIRMAN: Yes.

7 MR DEREK CHAN: -- they noted increase in certain things and  
8 asked KMB to --

9 CHAIRMAN: Yes, increased accident rate, broadly speaking.

10 MR DEREK CHAN: If I can go quickly to that document. TD-5,  
11 page 1729, just to see the context of it again.

12 CHAIRMAN: So this is the letter from the Transport  
13 Department in advance of the annual update of the  
14 five-year forward planning, spelling out what it is that  
15 they want the company, KMB, to address, and stipulating  
16 the increased accident rate, using that term broadly.

17 MR DEREK CHAN: That's correct. The request is at the  
18 bottom of page 1729. Again, if I can just read it out:

19 "Your company is required to:

20 (a) conduct an analysis on the traffic accidents  
21 involving KMB in 2017, in conjunction with the situation  
22 in 2015 and 2016 ... The analysis should include the  
23 trend, the nature and causes of the accidents, as well  
24 as the reasons for the increases."

25 The answer we can find at KMB-12, starting at  
26

1 page 5011. That's the start of the most up-to-date bus  
2 safety section.

3 Can I just remark, Mr Chairman, that there is no one  
4 easy place where you can find the reasons for the  
5 increase. What we see is --

6 CHAIRMAN: It's not addressed specifically; is that what you  
7 mean?

8 MR DEREK CHAN: Not directly. It's a similar format in that  
9 they analyse the accidents by route, by bus type, by  
10 hours and all that. But there are a couple of passages  
11 which Mr Chairman may find relevant.

12 For example, at 5025, the analysis here is  
13 "Accidents by type", and at 8.2.6.7, which is over the  
14 page at 5026, you can see:

15 "Driving attitude of other road users is one of the  
16 key in preventing accidents not blameworthy to bus  
17 captains."

18 So that seems to attribute part of it to driving  
19 attitudes of other people.

20 CHAIRMAN: Yes. I see your point.

21 MR DEREK CHAN: Then, in a similar vein --

22 CHAIRMAN: Just a moment, please. So, "It's not our fault;  
23 it's other drivers", is that what it comes to?

24 MR DEREK CHAN: Yes. We also see other references in  
25 a similar vein, for example at 5028, which is  
26

1 paragraph 8.2.7.5. Again, if I could just read it out:

2 "Illegal parking at bus stops is one of the cause of  
3 improper stopping of buses, by which road users' safety  
4 will be jeopardised as passengers have to board and  
5 alight on the roadway instead of using the bus stop.  
6 [They] increased the chance of traffic accidents. Buses  
7 and other vehicles overtaking illegally parked vehicles  
8 pose safety concerns for boarding and alighting  
9 passengers, as well as other road users."

10 So again other contributory factors are highlighted.

11 Perhaps just one reference for Mr Chairman and the  
12 committee's reference. At 5031, again we find something  
13 similar. At 5031, again we have an analysis of  
14 "Accidents by district", and at paragraph 8.2.9.3, which  
15 is at the bottom of that page, you see KMB saying:

16 "Traffic congestion is one of the causes of the high  
17 percentage of accidents noted in the busy districts.  
18 The company recommends that proactive measures should be  
19 taken to resolve the congestion problem. We will  
20 discuss with the government."

21 And over the page, they talk about bus priority as  
22 a possible counter to that problem. So, again, it talks  
23 about other contributory factors to the accident rate.

24 CHAIRMAN: Not entirely clear how traffic congestion causes  
25 accidents. It may cause drivers to drive badly and  
26

1 gives them more vehicles to hit. Is that perhaps what  
2 is meant?

3 MR DEREK CHAN: Perhaps other vehicles hitting them is  
4 probably what they are trying to say.

5 CHAIRMAN: Yes.

6 MR DEREK CHAN: Mr Chairman, I hope that assists the  
7 committee.

8 CHAIRMAN: Yes.

9 You haven't seen this data before, have you,  
10 Professor?

11 PROF JOHN STANLEY: No, Chair, but in terms of traffic  
12 congestion being associated with accidents, I think  
13 there are a number of studies that show one of the  
14 correlations between accidents is with traffic volume.

15 CHAIRMAN: Yes.

16 PROF JOHN STANLEY: So the higher the volume you have, the  
17 more accidents you are going to have, and congestion is  
18 an example of that.

19 CHAIRMAN: There are more targets to hit, aren't there?

20 PROF JOHN STANLEY: Indeed, and closer together, so your  
21 chances --

22 CHAIRMAN: The more you have to be aware, if you've got  
23 people on the inside, outside, front. So to that extent  
24 traffic congestion has a correlation to accident  
25 increase; is that the point?

26

1 PROF JOHN STANLEY: Yes.

2 CHAIRMAN: Thank you for that.

3 I suppose the first point, driver attitude of other  
4 drivers, speaks for itself. If other drivers are the  
5 ones causing the accidents, then that's why there are  
6 more accidents.

7 Is there no figure that breaks down their  
8 assessment, KMB's assessment, of who was responsible for  
9 the accidents?

10 I think in Hong Kong what we have learnt is, at  
11 least with KMB, that this kind of assessment of the  
12 accidents, I think I am right in saying, began with the  
13 insurance department, and of course they attribute  
14 culpability as, "Is this one we are liable for; is this  
15 one where we are not?" I think this has been the  
16 approach.

17 MR DEREK CHAN: At page 5020 we have a section on "Accidents  
18 by cause", and the table is an analysis of the accidents  
19 caused by bus captains' blameworthy factors.

20 PROF JOHN STANLEY: Chairman, the most frequent one in that  
21 table is traffic congestion, "Failing to keep safe  
22 distance from front vehicle".

23 CHAIRMAN: Yes. You can do that when there is no  
24 congestion, though, can't you?

25 PROF JOHN STANLEY: It's a bit harder.

26

1 CHAIRMAN: I have looked at a Mobileye 6 collision, in fact  
2 of course being an advert for the product collision was  
3 avoided, but there is not much traffic around and the  
4 danger is still there.

5 PROF JOHN STANLEY: Indeed.

6 MR DEREK CHAN: Unless there is anything else I can assist  
7 the committee with --

8 CHAIRMAN: No. Thank you for that endeavour.

9 MEMBER LO: I just have two questions. Thank you for all  
10 the information.

11 One question regarding the -- given all the context  
12 in Melbourne, perhaps we can learn something in  
13 Hong Kong. Who are the main drivers of new initiatives,  
14 technologies or otherwise, that would have  
15 an implication for bus safety? Are they operators,  
16 government committee, or who are the people driving?

17 PROF JOHN STANLEY: I would say that comes from two sources.  
18 One is from the vehicle manufacturers, companies like  
19 Volvo, Scania, Mercedes. I think they are very  
20 conscious of trying to get an edge in the safety space  
21 at the moment, and really looking for that.

22 The other then is particular operators, and I quote  
23 the example in my report of ComfortDelGro, who is a  
24 Singaporean operator who operates in Melbourne, who have  
25 installed the Mobileye technology, Chair, you just  
26

1 mentioned on their buses in Melbourne and in Singapore,  
2 and they are really consciously looking out for ways in  
3 which they can improve safety and their attitude is very  
4 much, "If it's not good enough for our own family, then  
5 it's not good enough for our business". So they judge  
6 safety decisions on that basis.

7 So it's both. It's the operator sometimes, more for  
8 retrofitting or after-market solutions. But it's the  
9 manufacturers in terms of what's embedded in new  
10 vehicles.

11 MEMBER LO: Even though there's no explicit safety-related  
12 KPIs in their system, they do it voluntarily?

13 PROF JOHN STANLEY: Yes.

14 CHAIRMAN: But presumably in that calculation -- and this is  
15 a matter I suggested earlier on -- there is a cost to  
16 bus operators having accidents, is there not? The bus  
17 is out of operation, they may be left out of pocket from  
18 the damages, never mind the loss of use of the vehicle,  
19 and so on?

20 PROF JOHN STANLEY: Certainly. In terms of fitting of  
21 after-market equipment, that's certainly true. I think  
22 it's about the safety of their customers, but it's also  
23 about business costs and part of the same process, and  
24 I think one of the benefits of that technology like the  
25 Mobileye technology is it's -- I think the cost in  
26

1 Melbourne is something like A\$1,500 per vehicle to  
2 install that equipment, and you would think that's  
3 a pretty good investment in terms of --

4 CHAIRMAN: Yes, because that would easily be exceeded by the  
5 cost of an accident, and damages you have to pay for the  
6 person injured --

7 PROF JOHN STANLEY: Indeed.

8 CHAIRMAN: -- damages to the vehicle, loss of the use of the  
9 vehicle.

10 PROF JOHN STANLEY: Indeed, and my view is you will see that  
11 being built into the new vehicle, it's starting to  
12 already, because it is such a sensible thing to do.

13 CHAIRMAN: Yes.

14 MEMBER LO: The other question I have is given a public  
15 entity like Transport Safety Victoria, how would we  
16 ensure that it will perform its best and it's not just  
17 another bureaucracy that looks at numbers? Are there  
18 targets given to them to achieve, or is there any  
19 incentive or motivation for them to do their best?

20 PROF JOHN STANLEY: I don't know whether there are any  
21 targets that have been set to them. I will have a look  
22 at that and come back to you on that, Professor. But  
23 rest assured that because they are regulating bus  
24 operators, the bus operators will be doing all they can  
25 to make sure that the Transport Safety Director is

26

1 performing the task in a vigilant way and not becoming  
2 just another bureaucracy.

3 So I think there's accountability in the sense to  
4 the customer, and the customer will be doing all that  
5 they can do to make sure that the authority is genuinely  
6 serving the role that it's supposed to be serving.

7 At the moment, there is a very good relationship  
8 between the Transport Safety Director and the operators,  
9 because I think they both understand that their interest  
10 is in trying to build a stronger safety risk management  
11 culture and that they can do that better together. But  
12 as for specific KPIs on the organisation, I will speak  
13 to the director when I get back to Melbourne, provided  
14 the storm lets us out, and come back to you on that one.

15 MEMBER LO: Sure. Thank you.

16 CHAIRMAN: Mr Chan, is there anything arising from those  
17 questions?

18 MR DEREK CHAN: Not from me, Mr Chairman.

19 CHAIRMAN: In which case, Professor, although we have gone  
20 slightly over time, the estimate has been rather  
21 accurate as to the time we required.

22 It remains for us to thank you very much for the  
23 assistance you have given us, in particular in this oral  
24 session where, having had the benefit of your report, we  
25 have been able to establish what, to our mind, are the  
26

1 matters that are particularly relevant, having regard to  
2 the evidence that we have received, to Hong Kong, and  
3 that's been of considerable assistance, and we look  
4 forward to receiving whatever else it is that you might  
5 feel is appropriate for us to receive.

6 With those words, we thank you for your assistance  
7 and wish you a safe travel home.

8 MR DEREK CHAN: Thank you, Chair and members.

9 CHAIRMAN: Whenever that might be.

10 PROF JOHN STANLEY: Thank you very much.

11 CHAIRMAN: Thank you.

12 (5.38 pm)

13 (The hearing adjourned to a date to be fixed)

EXPERT EVIDENCE OF PROF JOHN STANLEY .....1

Examination by MR DEREK CHAN .....1

*[Blank Page]*

1 2018 年 9 月 15 日

2 上午 10 時正恢復聆訊

3 出席人士： Hon Mr Justice Michael Lunn（倫明高），香港專營巴士服務獨  
4 立檢討委員會主席

5 歐陽伯權先生，香港專營巴士服務獨立檢討委員會委員

6 羅康錦教授，香港專營巴士服務獨立檢討委員會委員

7 陳政龍大律師及黃佩琪大律師，由高露雲律師行委聘，代表香港專營巴  
8 士服務獨立檢討委員會

9 Professor John Stanley，悉尼大學商學院運輸及物流研究學院客  
10 席教授（委員會委任的專家）

11

12 主席：（經傳譯員）早晨，Stanley 教授，歡迎你嚟香港，多謝你向委員會提供協  
13 助，交咗兩份報告畀我哋，亦都多謝你同意嚟呢度做口述證供，等我哋可以探  
14 討你報告嘅內容，特別當然就係同香港相關嘅，我哋會向你提問題，由我哋嘅  
15 律師陳律師向你提問嘅，請佢而家開始，就係陳政龍律師。

16 陳先生：（經傳譯員）係，唔該主席，早晨，主席。首先，可唔可以講一講你嘅背景  
17 呢？就係你個人嘅背景，就去你嗰個嘅履歷嗰度，喺我哋嘅專家證人文件夾嘅  
18 第 107 頁。我哋睇到喺你嘅履歷嗰度，你係 1969 年開始你嘅事業，喺 1980  
19 至 1999 年，你就係 Principal John Stanley and Associates Pty  
20 Ltd 嘅主事人，請問你可唔可以講一下你公司當時係做咩嘢工作？

21 MR JOHN STANLEY：（經傳譯員）我哋係做一啲顧問嘅服務嘅，就特別係畀政府  
22 嘅，喺聯邦政府同埋喺州政府嘅層面都有做，主要就係講話運輸嘅，譬如話域  
23 多利州政府關於嗰個載重嘅規定等，我哋都提意見嘅，同埋港口亦都係塔斯曼  
24 尼亞州政府，我哋都做咗啲關於港口嘅諮詢工作，同埋向當地嘅議會，亦都會  
25 係畀啲意見係關於話道路系統係點嘅，唔係話做咁多關於公共運輸嘅，直至去  
26 到 1990 年代，當時就係講話運輸嗰方面嘅道路空間嘅問題，嗰陣時就做好多嘅  
27 諮詢工作係關於道路經濟學嘅，特別係呢方面嘅工作。

28 陳先生：（經傳譯員）喺 1991 至 99 年，你就係國家道路運輸委員會嘅副主席，而  
29 1999 至 2008 年就係維多利亞巴士協會嘅執行董事，請你可唔可以介--講一講  
30 你喺嗰度做咩嘢工作，執行總監？

31 MR JOHN STANLEY：（經傳譯員）係，我哋係 1991 年成立呢個國家道路交通委員  
32 會，就主要係想改革澳洲嘅道路運輸嘅安全同埋各個方面，嗰啲職責主要就係  
33 州政府嘅職責嚟嘅，即係話係州政府同埋聯邦政府共同成立呢個委員會，就可

1 以喺全國施行一啲一致嘅法例，就除咗係本州自己嘅道路系統之外，就定一啲  
2 譬如話嗰個汽車嘅重量嘅限制，嗰個載重嘅規定等等，都係即係話做管理方面，  
3 呢個係重要嘅一環嚟嘅。

4 同埋亦都我要代表我哋嘅業界嘅代表，就我哋個成員就有五百人，就要講話  
5 佢哋同州政府嗰啲合約，當時嗰個價值每年係有九億澳元嘅，我就係主要負責  
6 同--即係要同州政府去商討佢哋嘅合約嘅，而喺我嘅報告裏面都有提到，巴士  
7 業喺澳洲嚟講，係接受州政府嘅大量嘅資助嘅，我作為執行總監，主要就係要  
8 整體咁樣評估運輸嗰個價值，同埋亦都係牽涉一啲工作，就話睇下喺巴士嘅社  
9 會融合方面扮演咩嘢嘅角色嘅，我太太其實都係做呢方面嘅工作，咁又睇下點  
10 樣可以減少擠塞同埋巴士嘅改善環境方面又可以扮演咩嘢角色等等嘅，呢個都  
11 係話喺要制定政策嗰方面，就要確保係一致。

12 我哋亦都係協助啲商業公司，譬如其中一位嘅巴士營辦商就係做道路安全嘅  
13 檢查，即係喺維多利亞嗰度譬如係檢測嗰啲巴士嗰啲等等同埋類似其他嘅活  
14 動，其實我哋亦都係已經係本來由政府做嘅巴士檢測嘅工作嘅，而家係由我哋  
15 嚟做。

16 主席：（經傳譯員）呢個巴士協會有啲咩嘢成員呀？

17 MR JOHN STANLEY：（經傳譯員）佢哋就係嗰啲定線巴士嘅服務營辦商，咁就維多  
18 利亞喇，亦都有學校巴士嘅營辦商，其實大部分都係嗰啲嘅，因為通常如果巴  
19 士--即係學校嘅承辦商通常都係得好少量巴士，所以嗰個數目係比較多嘅、大  
20 嘅。但係當然如果講話合約價值大嘅，就係定線巴士服務。

21 主席：（經傳譯員）總共有幾多個成員呀？

22 MR JOHN STANLEY：（經傳譯員）就有五百名成員，我走之後，就係降咗少少，因  
23 為有啲嘅業務佢哋整合咗。

24 主席：（經傳譯員）可唔可以講一講協會有幾多職員呢？

25 MR JOHN STANLEY：（經傳譯員）我哋有五十個職員，當我離職嘅時候，就包括例  
26 如話十至十二名職員就係嗰間做檢驗車輛嘅公司，我哋亦都有自己嘅稽查主  
27 任，就負責係僱用稽查喺巴士上面工作。同埋我哋亦都有一組係服務成員嘅，  
28 即係佢哋會花好多時間同成員傾偈，即係處理佢哋嘅事或者係幫佢哋聯絡政府  
29 等等，就係因為佢哋負責係提供呢啲服務。

30 主席：（經傳譯員）如果係巴士公司收到車資，邊個係得益嘅？

31 MR JOHN STANLEY：（經傳譯員）係畀政府嘅。

32 主席：（經傳譯員）即係話做稽查工作係代表政府做，因為政府係最終接收嗰啲車資  
33 嘅人，係咪呀？

34 MR JOHN STANLEY：（經傳譯員）係。

1 陳先生：（經傳譯員）教授，你提到話喺你做國家道路運輸委員會嘅時候，你就係講  
2 到話係駕駛一啲--你會負責處理一啲駕駛規例，我相信係駕駛時數，係咪呀？  
3 包唔包括埋重型車輛呀？

4 MR JOHN STANLEY：（經傳譯員）國家道路運輸委員會處理嘅車輛就係 4.5 公噸以  
5 上嘅車輛嘅，可能係一啲嘅貨車，其實貨車嘅數量係比巴士多好多嘅，所以通  
6 常委員會主要處理都係關於貨車嘅問題，但係亦都可能同巴士有啲關連，當時  
7 澳洲最大嘅問題就係各個主要嘅大城市，譬如係悉尼、墨爾本，如果啲貨車要  
8 一次咁去，佢個個其實揸個距離係好長嘅，所以我哋就要睇下應該係點樣為之  
9 安全嘅駕駛距離等等，所以呢個過程好重要，但係同時都會一併就睇埋巴士嘅  
10 情況嘅。

11 主席：（經傳譯員）呢個委員會係聯邦委員會嚟㗎？

12 MR JOHN STANLEY：（經傳譯員）係一個國家委員會，全國委員會，其實係根據聯  
13 邦法例成立嘅，我哋要負責嘅就係聯邦嘅部長同埋所有州嘅部長，即係話所有  
14 四十五個部長，我哋要向佢報告嘅。

15 陳先生：（經傳譯員）教授，喺 2008 年你做咗客席教授，亦都係巴士業聯盟嘅高級  
16 研究人員，又喺悉尼大學嗰度，即係呢個係悉尼大學嘅工作嚟嘅，咁又會做一  
17 啲研究生嘅教學同埋研究工作？

18 MR JOHN STANLEY：（經傳譯員）係，我係負責一個運輸管理嘅碩士學位課程嘅，  
19 我哋其實有都當時有唔同嘅呢類嘅碩士課程，我就係教其中一科，就係關於運  
20 輸政策，亦都係牽涉關於到巴士政策嘅。

21 陳先生：（經傳譯員）2012 至 16 年，你就係部長諮詢議會就係向維多利亞嘅規劃  
22 部長，即係兩個政府，就係向佢哋提供意見係關於墨爾本都會規劃策略問題？

23 MR JOHN STANLEY：（經傳譯員）其實主要更多個係講話土地用途嘅規劃，喺第  
24 一份報告我都有提及嘅。我哋有二十--當時就係有一啲嘅運輸規劃嘅，需要整  
25 合嘅，有一個--所以有一個部長嘅諮詢委員會，就向佢提供意見話維多利亞長  
26 遠個個土地規劃應該係點樣做，亦都包括一啲嘅運輸策略嘅，我係嘗試想制定  
27 一份嘅運輸策略，但係當時唔知咩嘢理由，政府就唔想包括--即係喺呢個長遠  
28 嘅土地規劃裏面包括埋呢個運輸策略，喺新嘅政府又再次委任我哋而家係繼續  
29 做呢個工作嘅。

30 陳先生：（經傳譯員）你就列出喺 107 頁呢度第一部你列出你有一啲嘅董事嘅工  
31 作，可唔可以講一講邊一啲嘅--呢啲工作係同運輸或者係巴士政策有關㗎？

32 MR JOHN STANLEY：（經傳譯員）我係維多利亞嘅國家服務委員會嗰陣時候，佢哋  
33 就叫我哋睇番道路同埋公共運輸政策之間個關係，我就做咗一份報告，就建  
34 議有一個新嘅管治嘅安排，就係關於道路同埋公共運輸嘅。而另外仲有一個機  
35 構，Metlink 就係關於係公共運輸嘅推廣嘅，我哋就係一啲系統層面做一啲推

1 廣工作，由個別嘅營辦商就會做自己嘅推廣運動，當時我亦都係公共運輸申訴  
2 專員嘅辦事處嗰度嘅，就話如果有啲乘客佢哋覺得有啲咩嘢投訴係關於啲承辦  
3 商嘅，就會去到呢個申訴專員嗰度。

4 陳先生：（經傳譯員）你做呢個工作，即係喺申訴專員方面嘅工作做咗幾耐？

5 MR JOHN STANLEY：（經傳譯員）我要估一估，但係我諗係大概四年嘅。

6 陳先生：（經傳譯員）大概喺邊段時間呀？大概喺邊段時間，邊幾年呀？

7 MR JOHN STANLEY：（經傳譯員）應該係 199--2004 至 2008 年，應該係，而家  
8 我就係道路安全檢查嘅委員會嗰度嘅，就係同嗰個巴士協會係保持一個距離，  
9 可以咁講，就係佢哋就係每年為所有嘅重型車輛同埋巴士做檢驗嘅，每一年都  
10 會佔咗維多利亞整個巴士數量百分七十五都係我哋檢驗嘅。

11 主席：Is that in respect of the mechanical side of buses?

12 MR JOHN STANLEY：It is, Chairman.

13 陳先生：（經傳譯員）你做咗呢間公司嗰個董事協會成員做咗幾耐？

14 MR JOHN STANLEY：（經傳譯員）大概七年。

15 陳先生：（經傳譯員）七年即係由今日數番轉頭七年，係咪呀？

16 MR JOHN STANLEY：（經傳譯員）係。

17 陳先生：（經傳譯員）好喇，再落下一頁 108 頁，你就列出你有好幾頁嘅一啲報  
18 告、文獻或者係書本嘅章節等等，係你寫嘅，我就冇打算全部去睇，因為好  
19 多。你可唔可以特別指一指出一啲例子，就係同巴士政策有關嘅呢？

20 MR JOHN STANLEY：（經傳譯員）當然，可以。主要有兩、三個課題嘅，第一，就  
21 有寫過一啲文章，就係關於公共運輸嘅價值，就係 2017 年，呢本書就係 “How  
22 Great Cities Happen” 嗰度，就係講話公共運輸可以扮演啲咩嘢角色，跟  
23 住喺知道--下一個文章，跟住下面呢份就話嗰個價格要定得啱，即係使用道路  
24 嘅代價要定得啱。然後亦都有一份 2017 嘅報告，就係話點樣係令人可以流動  
25 到，即係要做制定政策者要考慮啲啲解決方案，呢個有 “Moving People:  
26 Solutions for Policy Thinkers”。

27 又有睇下公共運輸點樣可以令到一個城市生產力能夠好呢，佢個扮演角色係  
28 點，亦都係有提及。然後 2016 年，Stanley J and Levinson 嗰份文獻就  
29 係話可持續嘅資助嘅形式，因為當時三年前有一個嘅會議係每兩年開一次嘅，  
30 係國際嘅，當次就係講話公共運輸嘅競爭同埋規管嘅，我係其中負責主持一個  
31 工作坊嘅，喺嗰次嘅國際會議裏面，所以呢度我亦都係有發表一份文章。就睇  
32 公共運輸嘅好處喺邊度，同埋可以點樣去資助呢啲服務，所以喺嗰度係特別有  
33 提。

1 再落去兩張，就係話令人流動呢？即係點可以令到啲人可以流動啲方面，決  
2 策者要考慮嘅解決方案等等。同埋比較深入咁探討就係巴士啲個合約嘅制度係  
3 點樣處理，譬如話係公開投標嘅，定係通過商討去定個合約，亦都係睇話有啲  
4 乜嘢嘅主要嘅表現、指標要定呀咁樣，即係關於巴士服務。同埋又話公共運輸  
5 嘅社會融合同埋推動更公平社會方面扮演嘅角色。

6 再落，有份 2015 年嘅報告，亦都係繼續話即係點樣令人流動，決策者要考  
7 慮嘅方案等等。就係講話墨爾本佢想定一個策略令到所有人都可以嚟佢哋最需  
8 要常去嘅地方都只係二十分鐘嘅，可以係行路、踩單車或者係用公共交通嘅方  
9 式等等，就令到公共運輸可以——呢個文章就講話點樣可以公共運輸扮演一個大  
10 嘅角色。

11 下一份文件就係講話公共運輸嘅角色係點樣可以推動發展密度做得更加好，  
12 特別係喺澳洲城市嘅一啲中部嘅市郊地方。就係亦都講埋啲個——睇埋啲個嘅管  
13 治嘅安排，就係點樣係從政府角度睇，點樣係運用個土地等等嘅。

14 陳先生：（經傳譯員）或者我可以咁樣總結，你好多嘅文章都係講政策嘅？

15 MR JOHN STANLEY：（經傳譯員）特別係講政策，因為政策主要係我嘅關注嘅地  
16 方，同埋策略規劃，點樣可以去執行啲個政策嘅。

17 陳先生：（經傳譯員）睇番你嘅背景，你所寫過嘅文章，你所做嘅研究，你點樣會形  
18 容你嘅專才係乜嘢呢？

19 MR JOHN STANLEY：（經傳譯員）講到話今次啲個委員會要睇啲個課題，我諗我可  
20 以畀嘅專才，就係關於話公共運輸政策同埋管治，就係講到城市嘅規劃，當然  
21 亦都牽涉到運輸，譬如你講話巴士，其實就係話啲個管治同埋架構上嘅安排就  
22 可以令我哋提供到巴士服務，同埋有啲嘅政策嘅安排令到真係可以提供呢啲服  
23 務，可以話係令到巴士能夠最好咁樣達到政府所定嘅目標，係為公眾利益、社  
24 會利益嘅，所以我主要就喺呢方面。你話講到運作，就係點樣可以去設立啲個  
25 架構等等嚟做到呢樣嘢。

26 陳先生：（經傳譯員）喺你第二個報告都係寫得好清楚，喺一開始嘅時候，或者我想  
27 講一講，係第 56 頁嘅，係專家文件，主席，我睇緊第 56 頁，大概中段啲度。  
28 教授，你啲度就講話喺巴士嘅營運方面你唔係專家，但係你嘅專才就係喺啲個  
29 架構方面，不如你係讀...

30 主席：（經傳譯員）你指邊一段？

31 陳先生：（經傳譯員）唔好意思，我係讀緊...

32 主席：（經傳譯員）讀佢出嚟，即係將相關啲一段讀出嚟。

33 陳先生：（經傳譯員）你喺呢度就話你唔係巴士營運方面嘅專家，但係你有一啲關於  
34 啲個嘅架構啲個環境，就係關乎巴士點樣運作同埋點樣能夠影響啲個表現，呢

1 方面你係有專才嘅？

2 MR JOHN STANLEY：（經傳譯員）係。

3 主席：（經傳譯員）好，唔該。

4 陳先生：（經傳譯員）唔該你，教授。除非你喺你嘅背景方面仲有啲咩嘢補充，如果  
5 唔係，我就進去下一步。就係你所收到嘅要寫呢兩個報告嗰個指引嘅背景，我  
6 想請你睇第 4 頁，專家嘅文件第 4 頁，喺第二段，第 4 頁，第二段，你就係睇  
7 到你寫呢兩份嘅報告係要個範圍係乜嘢，喺第二點嗰度話我哋邀請你去描述墨  
8 爾本嗰個嘅巴士服務嗰個嘅制度同埋管治嗰個嘅安排，特別就係喺去監察巴士  
9 安全呢方面，呢個係你第一份報告個範圍嘅，喺我哋嘅專家文件夾裏面有嘅，  
10 喺第二點嗰度，我哋請你--我哋已經畀咗關於香港專營巴士服務嘅文件你，如  
11 果係需要嘅話，就係同我哋嚟到去總結一下嗰個制度。

12 考慮到墨爾本嗰個巴士制度，就係畀啲意見，我哋香港嗰個嘅規管同埋監察  
13 制度係咪足夠呢？亦都畀我哋一啲建議，係有邊啲需要改善，你認為係可以係  
14 必須要做到去改善香港專營巴士服務嘅安全嘅，呢個係你第二份專家報告嗰個  
15 嘅內容？

16 MR JOHN STANLEY：（經傳譯員）係，冇錯。

17 陳先生：（經傳譯員）我就首先係想做一啲比較實務嘅簡單嘅比較，就係墨爾本同埋  
18 香港嗰個巴士制度嘅比較，想由第 5 頁開始，係同一項嘅專家嘅報告，第 5  
19 頁，第一樣，大家嗰個不同就係墨爾本同埋香港嘅人口嘅不同，喺第一段，第 5  
20 頁，你就話墨爾本嘅人口係有四百八十萬，喺 2017 年嘅時候，喺第二段，墨爾  
21 本係一個相對低密度嘅城市。我嘅理解係咪正確呢？呢個係咪一個都會區抑或  
22 大嘅市郊區呢？

23 MR JOHN STANLEY：（經傳譯員）我哋會係叫佢做一個都會區嘅。另外其他嗰個亦  
24 都係有近郊嘅地區。

25 陳先生：（經傳譯員）講到乘搭巴士嘅次數，我哋睇到最低嗰度，你話域多利政府嘅  
26 預算顯示而家墨爾本嘅火車就每年有二億四千嘅人次，電車就二億零五百嘅人  
27 次，巴士一億二千萬嘅人次，即係話喺墨爾本公共運輸係每一年都係有五億六  
28 千五百萬嘅人次，而巴士係佔百分之二十一次嘅乘客次嘅，係咪？

29 MR JOHN STANLEY：（經傳譯員）係。

30 陳先生：（經傳譯員）我就係想用呢個數字同香港方面對比下，香港每年有十四億...

31 主席：（經傳譯員）呢度十四億喺邊度得番嚟㗎？

32 陳先生：（經傳譯員）呢個係由運輸署畀我哋嘅總數字嗰度搵出嚟嘅。

33 主席：（經傳譯員）喺邊一份嘅文件呀？

1 陳先生：（經傳譯員）稍後我會畀番呢一個參考畀委員會嘅。

2 主席：（經傳譯員）唔該你。

3 陳先生：（經傳譯員）咁個參考，係，58 頁，即係你第二份報告書嘅第一部分，或  
4 者你攞住嗰個嘅專家文件夾係會好嘅。

5 MR JOHN STANLEY：（經傳譯員）係呀，非常之好。

6 陳先生：（經傳譯員）好，第 58 頁就係你第二份報告嘅開頭，喺第一段嘅中部分  
7 嘅，就係話「香港嘅 2017 年嘅公共運輸研究就係睇下香港嗰個嘅交通--總括  
8 交通運輸嗰個情況，而嗰個嘅專營巴士每一日係有四百萬嘅人次嘅，呢個就係  
9 每一日嘅人次，每一年係有一千二百萬嘅，呢個就係四--每一日係四百萬」，  
10 將佢乘咗出嚟，成年就係大概十四億嘅人次。

11 主席：（經傳譯員）唔該。

12 陳先生：（經傳譯員）教授，墨爾本大概有幾多架巴士喺度營運呀？

13 MR JOHN STANLEY：（經傳譯員）大概一千七百架嘅，就係有路線嘅服務。

14 主席：（經傳譯員）點樣界定咩嘢叫路線服務？

15 MR JOHN STANLEY：（經傳譯員）呢啲係合約嘅服務，係有定班嘅，每一日嘅就係  
16 由州政府決定，而且係寫咗喺營運嗰個嘅合約度。

17 主席：（經傳譯員）唔該。

18 陳先生：（經傳譯員）咁會唔會包埋，譬如校巴或者係旅遊巴。

19 MR JOHN STANLEY：（經傳譯員）係唔包旅遊巴，又唔包係一啲特定嘅校巴，但係  
20 好多嘅學童都會搭呢啲嘅路線服務嘅。

21 陳先生：（經傳譯員）好，而家一個一般嘅比較，可唔可以睇下嗰個合約嘅架構，即  
22 係墨爾本巴士服務嗰個合約框架同我哋香港係點樣比較。想請你攞去專家文件  
23 夾嘅第 7 頁，第三段就係好近尾㗎喇，你嗰度話「而家墨爾本嘅路線巴士服務  
24 其實係有一啲係有啲競爭性嘅投標服務嘅，亦都有一啲係經恰商而有嘅服務，  
25 有一啲--前者就係政府所提供嘅服務，後者就係開始由一啲私人嘅營辦商，包  
26 括呢啲服務嘅延伸或者係增加。」

27 MR JOHN STANLEY：（經傳譯員）冇錯，陳生，亦都喺呢一個服務裏面，有一啲係  
28 叫做係有競爭性嘅投標，我哋叫佢做智慧巴士系統，係長途嘅服務，就喺我哋  
29 墨爾本一啲市郊嘅地方，佢哋亦都係成個投標嘅機制嘅一部分，但係係佔好少  
30 部分。

31 陳先生：（經傳譯員）好，大部分--有三分一嘅合約就係經過有競爭性嘅投標，而三  
32 分二就係經過恰商之下就有合約。

1 MR JOHN STANLEY：（經傳譯員）唔係，唔係合約嚟嘅，佢哋其實係一份合約，唔  
2 係幾份合約，都係經過有競爭性嘅投標，大概係佔三分一嘅。

3 陳先生：（經傳譯員）可唔可以好概括咁樣係描述下呢一個有競爭性嘅投標係點樣運  
4 作㗎？

5 MR JOHN STANLEY：（經傳譯員）做一個嘅引子，我就唔係呢一個有競爭性嘅投  
6 標，我有參與嘅，我就唔知道嗰啲合約嘅細節，我喺合約協議方面個角色就係—  
7 —我就知道嗰啲經洽商嘅合約係點嘅，就係佔咗三分二，唔係三分一。但係嗰個  
8 一般嘅程序，如果你問我，就係會政府會請人嚟到表達佢嘅興趣係咪想係投一  
9 個服務，而政府就係會指出佢希望呢啲服務裏面有啲咩嘢呢？係有啲咩嘢嘅路  
10 線、嗰個嘅班次，如果你咁講，亦都會將嗰個嘅時間表列出，就請一啲營運商  
11 就係畀一個價格，佢哋係要求幾多呢，亦都可以話係要補貼去提供呢啲嘅服  
12 務，就係嗰啲嘅營辦商去投標，如果你鍾意用呢個字，最低嘅價格去畀政府  
13 嘅。

14 佢亦都—政府可以除咗價格之外，會將呢啲嘅事項係考慮在內嘅，呢個就  
15 係營辦商有冇能力提供好個服務同埋係能唔能夠喺一個相當廣闊地方提供種種  
16 嘅服務，其實係以一個地區為主嘅服務，除咗就係話我正話講過嘅嗰個一筆嘅  
17 或者係比較整體嘅路線服務。

18 主席：（經傳譯員）除咗呢啲路線之外，係咪話政府係可以定嗰個嘅班次㗎？

19 MR JOHN STANLEY：（經傳譯員）係，應該係嗰個嘅班次，即係幾耐一班等等、幾  
20 時開始、幾時結束服務。

21 主席：（經傳譯員）我哋未去講呢啲細節嘅時候，我想問有幾多嘅路線係畀嚟投標嘅  
22 呢？同埋係幾多次呢？

23 MR JOHN STANLEY：（經傳譯員）其實只係有一次投標，就包括好多嘅路線嘅，好  
24 似係呢一個嘅專營區咁樣，一個嘅合約地區，包括所有呢個合約區裏面所有嘅  
25 路線，所以都係相當多嘅，可能三分一嘅路線，我就唔知道總共有幾多個路  
26 線，但係可能都有好幾百嘅。呢個就係以地區為本嘅。

27 主席：（經傳譯員）通常一次嘅專營期係幾長呀？如果可以用呢個字嘅話。

28 MR JOHN STANLEY：（經傳譯員）通常都係七年嘅，嗰啲洽商嘅合約就可以去到有  
29 係七、八個合約—就係可以係有七個嘅。

30 主席：（經傳譯員）政府就係提供一個合約，會唔會係接受多個嘅投標，亦都接受多  
31 個嘅巴士營運商一齊運作？

32 MR JOHN STANLEY：（經傳譯員）唔會嘅，只係有一個單一嘅營運商嘅？

33 主席：（經傳譯員）一個，單一？

1 MR JOHN STANLEY：（經傳譯員）係。

2 羅先生：（經傳譯員）嗰個經洽談嘅合約同埋嗰個投標嘅有咩嘢唔同㗎？

3 MR JOHN STANLEY：（經傳譯員）嗰啲要經過洽商嘅合約就係五十、六十年係私人  
4 嘅營辦商已經開始咗有㗎喇，佢而家都係仲有嘅，大概係 1970 年就停咗，當時  
5 有一個嘅服務嘅改變，一路有一啲嘅洽商，就係由服務開始同埋政府去繼續係  
6 成個過程裏面提供服務嘅，佢某個階段，政府就係想接收咗呢啲洽商嘅服務，  
7 而將佢哋去有競爭嘅投標，結果就係去到澳洲嘅聯邦法庭，最後營辦商係勝訴  
8 嘅，即係關乎嗰啲嘅法律細節，但係而家仍然喺度談判之中。但每一次佢哋處  
9 理就係每一次嗰個合約都有講到合約圓滿之後係點樣做嘅，下一組嘅合約就係  
10 啱啱開始咗，都係七年期嘅，佢哋亦都有講過七年期滿之後會點嘅，業界就係  
11 好有信心佢哋可以繼續再有另外一次嘅談判，政府又可能亦都唔同意嘅。

12 羅先生：嗰啲嘅洽商會唔會係換咗嗰個營辦商？

13 MR JOHN STANLEY：（經傳譯員）唔會嘅，其實呢個係關乎決定嗰個價格、點樣嚟  
14 提供呢啲服務，譬如話係大家要同意一啲主要嘅服務指標同埋有啲咩嘢誘因，  
15 又有咩嘢懲罰嘅條款喺呢啲合約裏面，亦都有關於車長嘅訓練咁樣。

16 主席：（經傳譯員）你會唔會話嗰啲主要喺度恰商嗰個因素只係嗰個價格嘅啫，就係  
17 話政府要畀幾多錢呢間公司去提供呢個服務，呢個所謂補貼？

18 MR JOHN STANLEY：（經傳譯員）冇錯，呢個就係成個合約嗰個嘅價格，政府就係  
19 畀所有嘅錢畀晒呢一個嘅營辦商...

20 主席：（經傳譯員）因為政府就係--即係嗰啲車資嘅收入可以保留，係咪？

21 MR JOHN STANLEY：（經傳譯員）冇錯，呢個就係呢一個點樣嚟到定出個基準，有  
22 啲好詳盡嘅基準，嗰個營辦商嘅成本，亦都試下睇下喺某啲嘅地方，係咪有啲  
23 嘅營辦商係特別係成本高或者特別低，佢哋就去討論下乜嘢叫做合理嘅幅度嚟  
24 到去計算呢個成本，因為有時嗰個營運商係會減嘅，因為減低呢個薪酬，因為  
25 可能佢哋嘅成本相對其他嘅同業係太高嘅。

26 主席：（經傳譯員）有冇試過係同一個做緊嘅營辦商達唔到協議，就要將嗰個合約畀  
27 另外一個營辦商呢？

28 MR JOHN STANLEY：（經傳譯員）我就唔知道有咁嘅情況。

29 主席：（經傳譯員）呢個制度係咪自從 1970 年代已經開始？

30 MR JOHN STANLEY：（經傳譯員）自從 1970 年代已經係呢個補貼，嗰個焦點就係  
31 嗰啲經洽商而出嘅合約，大概有三、四十年㗎喇，我就唔係好知道 1970 年代或  
32 者 1980 年代嘅早期嘅歷史，不過應該自從 1980 年開始都係咁，好似我正話去  
33 向你描述咁樣嘅。

1 陳先生：（經傳譯員）關於嗰個競爭嘅投標，而家墨爾本嗰個嘅巴士營辦商係得到呢  
2 一個嘅合約，係咪呀？

3 MR JOHN STANLEY：（經傳譯員）等我諗下先，諗下，應該係法國嘅公司，係叫  
4 做...

5 主席：（經傳譯員）點樣串呀？

6 MR JOHN STANLEY：（經傳譯員）T-R-A-N-S-D-E-V。

7 陳先生：（經傳譯員）呢個營辦商係經營呢一個競爭性投標得到嘅合約已經幾耐㗎  
8 喇？

9 MR JOHN STANLEY：（經傳譯員）佢哋做過一次咁樣嘅投標，之前由另外一間公司  
10 係贏取嘅。

11 陳先生：（經傳譯員）就係可唔可以串出嚟嗰間咩嘢公司？

12 MR JOHN STANLEY：（經傳譯員）V-E-N-T-U-R-A，就係之前喺競爭性投標嗰度  
13 中標嗰間公司，跟住 Transdev 就中咗標，我諗就喺嚟緊十二個月又會有另外  
14 一次嘅投標㗎喇。

15 陳先生：（經傳譯員）就係其實一個競爭性嘅投標程序就令到係個營辦商換咗？

16 MR JOHN STANLEY：（經傳譯員）冇錯。

17 主席：（經傳譯員）你就話 Transdev 係一間法國公司，係咪呀？

18 MR JOHN STANLEY：（經傳譯員）係。

19 主席：（經傳譯員）佢哋喺世界其他地方有冇提供巴士服務？

20 MR JOHN STANLEY：（經傳譯員）好似大部分都係法國嘅，我諗喺澳洲其他地方佢  
21 哋都有提供巴士服務嘅。

22 陳先生：（經傳譯員）好，而家講番嗰個競爭性投標嗰度，本身專營商有冇轉過手？

23 MR JOHN STANLEY：（經傳譯員）去番 1998 年，墨爾本市係世界上首個城市去私  
24 有化個火車服務，我哋嘅火車、電車，同埋有三分之一嘅競爭性投標路線同時  
25 間係公開投標，本身係有兩個標做火車，兩個標做電車，一個做巴士，一個英  
26 國公司叫做 National Express 係其中一個重要火車中標經營商，其中一個  
27 三年內就交回嗰個合約。而另一個火車同電車嘅中標者，本身就攞晒--同時間  
28 營運火車同電車。

29 主席：（經傳譯員）喺 1998 年係邊個中標呢？

30 MR JOHN STANLEY：（經傳譯員）應該係 National Express，佢哋係嗰年中標  
31 嘅。

- 1 主席：（經傳譯員）係咪七年合約呢？
- 2 MR JOHN STANLEY：（經傳譯員）唔記得喇，主席。
- 3 主席：（經傳譯員）Ventura 係咪嗰個繼承營運商呢？
- 4 MR JOHN STANLEY：（經傳譯員）我要再查番佢哋幾時去接手嗰個合約。
- 5 主席：（經傳譯員）所以你辨認咗巴士方面有三個唔同嘅營運者？
- 6 MR JOHN STANLEY：Yes.
- 7 主席：（經傳譯員）Transdev、Ventura 同 National Express？
- 8 MR JOHN STANLEY：Correct.
- 9 主席：（經傳譯員）有冇第四個呢？
- 10 MR JOHN STANLEY：（經傳譯員）可能 National Express 同 Ventura 之間可  
11 能中間有另外一個經營者，可能係其他經營，National Express 交換牌照之  
12 後，喺未重新投標前可能有其他營運商臨時接手嘅，我會之後答覆你嘅。
- 13 主席：（經傳譯員）我有冇理解錯誤，就係 National Express 佢嘅服務冇法履行  
14 佢成個合約期？
- 15 MR JOHN STANLEY：（經傳譯員）係。
- 16 主席：（經傳譯員）然之後有其他人接手？
- 17 MR JOHN STANLEY：（經傳譯員）係。我哋之後會講番其中一個競爭性中標嘅制度  
18 就係佢哋鼓勵--就係個人標價就太低，就係希望佢哋--希望政府之後可以同佢  
19 哋再協商個價格。喺個 National Express 嘅情況，嗰個--我哋之前嘅文件  
20 講過就話 National Express 佢哋同政府商量過，至今方面就係淨係得一  
21 個，同埋佢哋決定唔會再繼續。
- 22 主席：（經傳譯員）有關於個巴士嗰方面，就係個 National Express 本身就冇成  
23 功協商到，令到 National Express 留低？
- 24 MR JOHN STANLEY：（經傳譯員）冇。
- 25 主席：（經傳譯員）佢哋係咪終止合約？
- 26 MR JOHN STANLEY：（經傳譯員）係嘅。
- 27 陳先生：（經傳譯員）有關嗰個香港每日四百萬人次，大約每年十四億嘅巴士人次，  
28 呢個係嗰個運房局，第 103 頁，係 2017 年 12 月嘅數字，教授，呢個就係嗰個  
29 競爭性投標制度，而家睇番嗰個...

1 主席：（經傳譯員）或者喺離開呢部分之前，呢個競爭性中標嘅特點係乜嘢？競標制  
2 度嘅特點係乜嘢？

3 MR JOHN STANLEY：（經傳譯員）主要係嗰個鼓勵同埋罰則條款。主席，我本身有  
4 參與過協商過程，所以我無法評論嗰啲罰則同埋獎勵條款。

5 主席：（經傳譯員）呢啲係咪公眾文件呢？

6 MR JOHN STANLEY：（經傳譯員）當佢公開嘅時候，大部分都係刪走嘅。

7 陳先生：（經傳譯員）所以你有辦法講番譬如嗰啲鼓勵同埋懲罰條款會唔會同安全又  
8 係有關呢？

9 MR JOHN STANLEY：（經傳譯員）我唔可以講話係咪同安全直接，主要係有個澳洲  
10 背景，就係話有條維省，就話有啲條款係直接係關於巴士安全嘅有關罰則同埋  
11 獎勵條款方面。

12 陳先生：（經傳譯員）呢啲係主要係表現指標？

13 MR JOHN STANLEY：（經傳譯員）主要係關於營運嘅個表現，譬如話準時、取消班  
14 次，呢啲係主要世界上嘅交通系統嘅重點，有陣時會擺一啲嘅乘客滿意度調  
15 查，譬如話乘客嘅意見，呢啲係通常係鼓勵同埋懲罰條款方面常見嘅。

16 陳先生：（經傳譯員）我可能我唔覺意去中斷你，你係回答番主席有關於嗰個競標制  
17 度嘅主要特點喇。

18 MR JOHN STANLEY：（經傳譯員）個主要重點，大部分嘅合作元素，其實兩--協商  
19 同埋競標個制度大部分都一樣，主要係嗰啲佢啲啲條款都比較相似。

20 主席：（經傳譯員）而嗰個協商合約相比喺嗰啲香港嘅專營巴士協議係比較詳盡嘅？

21 MR JOHN STANLEY：（經傳譯員）佢啲係無法置信咁長嘅，我嘅記憶嚟講，香港嘅  
22 專營巴士協議大約有三十一、三十二頁嘅，相比墨爾本嘅協商協議大約係一百  
23 六十頁，仲有其他嘅附表呀咁樣。

24 陳先生：（經傳譯員）教授，你講番嗰啲協議合約，想探討下，不如少少總結，你睇  
25 番嗰啲協商合約都同嗰啲競標制同合約都好相似嘅，可唔可以肯定就話嗰啲協  
26 商合約，政府亦都係會負責收取車資呢？

27 MR JOHN STANLEY：（經傳譯員）係。

28 陳先生：（經傳譯員）而個營運商係畀錢去營運呢啲服務？

29 MR JOHN STANLEY：（經傳譯員）呢啲合約主要係嗰啲成本就附加，本身係有啲所  
30 謂鼓勵同埋罰則條款嘅度，所以營運商根據議定嘅款項去營運呢個服務，然之  
31 後仲有呢啲鼓勵同埋罰則條款本身個金額唔係咁大，但係主要係嗰個分別就會  
32 令到你會有動力去達標。

1 主席：（經傳譯員）你可唔可以估計嗰個變數方面個百分比？

2 MR JOHN STANLEY：（經傳譯員）主要係有兩個元素，第一個就住嗰個乘客人數鼓  
3 勵，如果個人數係比個指標率高過，就會係有獲得個獎勵，然後就有個營運  
4 表現制度，譬如話準時、班次取消等等，你擺呢啲嘅因素一齊，就要係大約百  
5 分之二至三--百分比二至三。

6 主席：（經傳譯員）呢個係個獎勵喇？

7 MR JOHN STANLEY：（經傳譯員）係，即係有獎有罰，可以上落百分之二至三，唔  
8 係好多，但係呢啲合約本身個盈貿率大約有百分之十左右。

9 主席：（經傳譯員）唔該。

10 陳先生：（經傳譯員）大約喺呢啲協商制度度入面有幾多個營運者呢？

11 MR JOHN STANLEY：（經傳譯員）大約有十五個合約，十二個營運者，我擬定合約  
12 嗰時，十年前就會多好多營運商嘅，以前有二十六，所以係過去十年係有啲行  
13 業整合嘅。

14 主席：（經傳譯員）佢哋點樣整合嘅呢？

15 MR JOHN STANLEY：（經傳譯員）主要係佢哋營運商互相收購，其中一間我提及嘅  
16 公司，有一間叫做 CDC ComfortDelGro 係本身喺新加坡都有營運嘅，好似倫  
17 敦都有，佢哋收購市場份額，Ventura，之前提及喇，本身亦都收購咗一間比  
18 較大嘅營運商，而有啲小型嘅營運商亦都係畀比佢哋大嘅公司收購，所以大約一  
19 半嘅營運商係過去十年畀人收購咗，我哋都會繼續睇到個營運商數目會持續減  
20 少。

21 陳先生：（經傳譯員）响個政策角度睇，你睇唔睇到係有咩嘢原因就話會令到個營運  
22 商個數目會減少呢？

23 MR JOHN STANLEY：（經傳譯員）本身對某啲公司嚟講，成本方面係會有益處嘅，  
24 如果擴大規模，就會個控制成本有幫助，有啲營運商比較細，有啲大型，本身  
25 佢哋購買市場份額，等佢哋可以再擴展業務。

26 陳先生：（經傳譯員）當你講番創造利益，就係話主要係個規模效益呢？

27 MR JOHN STANLEY：（經傳譯員）一部分都係歸因於--呢啲如果係家族企業，譬如  
28 話下一代唔想繼承，有個幾有趣嘅例子，一個叫 Grenda Corporation，本身  
29 喺墨爾本一間比較大嘅公司，本身係都係幾代人做㗎喇，亦都下一代決定就話  
30 唔想繼續營運，所以就將佢賣咗，喺個出售過程，佢哋將三分之一嘅營運收入  
31 畀佢哋嘅職員，呢樣係非常之慷慨嘅。

32 主席：（經傳譯員）總括嚟講，一千七百架專營巴士本身係由三分之一畀個目前成功  
33 嘅營運商，其他嘅就係...

1 MR JOHN STANLEY: Transdev.

2 主席: Then the other two-thirds are divided up by 12 operators?

3 MR JOHN STANLEY: Correct.

4 主席: (經傳譯員) 譬如話最大一間嘅營運商本身係營運幾多間巴士呢?

5 MR JOHN STANLEY: (經傳譯員) 大約五百架左右。

6 主席: (經傳譯員) Transdev?

7 MR JOHN STANLEY: (經傳譯員) 可能大約五百嘅, 我懷疑 Ventura 都大約有  
8 三、四百架嘅, CDC 本身大約都有四百架左右。我可以之後回覆番個數字。

9 主席: (經傳譯員) 如果個投標過程大約五百, 本身有一千二百架就有其他營運商瓜  
10 分, 但係兩間大約係佔大部分路線。

11 MR JOHN STANLEY: (經傳譯員) 大約三間嚟講, 都佔一個好大比例。

12 歐陽先生: (經傳譯員) 教授, 可唔可以話畀我聽一間細嘅營運商本身會有幾多架巴  
13 士嘅呢?

14 MR JOHN STANLEY: (經傳譯員) 大約三、四十架。

15 歐陽先生: (經傳譯員) 三、四十架巴士?

16 MR JOHN STANLEY: (經傳譯員) 然之後有啲淨係得一、兩架--係一、兩個營運  
17 商。

18 陳先生: (經傳譯員) 講番墨爾本, 譬如話嗰個基建、車廠同埋嗰個維修設施, 如果  
19 將嗰個營運商轉換嘅時候, 嗰個競標制度轉換嘅時候點做呢?

20 MR JOHN STANLEY: (經傳譯員) 個合約會指明就話呢啲資產係點樣會處理嘅, 而  
21 亦都安排亦都係嗰個協商合約方面, 本身擁有車廠本身係畀一個有利位置, 因  
22 為係嗰特別市區係好難起一個新車廠。而家政府亦都比較關注, 因為有機會就  
23 話有確保競爭, 如果你協商合約方面就比較難啲有競爭, 由於嗰啲協商合約嘅  
24 營運商比較關注就話佢哋嘅服務--路線會畀咗出嚟投標, 所以佢哋同政府講,  
25 就話佢哋嘅資產同埋對於競標制嘅人, 就會根據某啲條款, 係會畀嗰個成功中  
26 標者, 基本上就會將呢啲設施就賣畀嗰個新中標嘅營運商。

27 陳先生: (經傳譯員) 包括巴士?

28 MR JOHN STANLEY: (經傳譯員) 係。

29 主席: (經傳譯員) 巴士站、車廠、巴士本身?

30 MR JOHN STANLEY: (經傳譯員) 係。

- 1 主席：（經傳譯員）所以就 Ventura 同埋 National Express 嘅情況係咪咁樣？
- 2 MR JOHN STANLEY：（經傳譯員）係，佢哋就淨係轉換巴士上面嘅標誌。
- 3 陳先生：（經傳譯員）一般而言，我嘅問題係同時關於競標同埋協商合約方面。譬如
- 4 嗰啲車，政府所收嘅車資可唔可以收回營運巴士成本呢？
- 5 MR JOHN STANLEY：（經傳譯員）大約係百分之二十幾，主要一釐收番兩毫幾子或
- 6 者再好少少。政府要求營運商畀啲車價優惠，而如果根據番啲特定津貼嚟講，
- 7 就會百分之三十幾，但係如果一般車資嚟講，大約二十至三十左右。
- 8 陳先生：（經傳譯員）喺咁背景下，政府係個津貼巴士營運商都幾大？
- 9 MR JOHN STANLEY：（經傳譯員）主要係當我個營運嗰個行業，就會啲力度就話去
- 10 衡量番社會嘅得益，而我哋嘅同事係估計就話巴士路線對於墨爾本社區嘅利益
- 11 大約係嗰個所收回成本嘅十多倍，主要係嗰個社會共融，如果你有一啲近郊區
- 12 嘅巴士服務，因為呢啲區增長好快，有呢啲服務嘅話，好多人就有辦法去參與
- 13 社會提供嘅一系列嘅活動，我諗淨係呢樣嘢就主要係抵銷番呢啲嘅成本，而巴
- 14 士亦都係對減少擠塞係好有幫助，呢兩樣嘢絕對係比起津貼嘅效益嘅兩倍。
- 15 陳先生：（經傳譯員）呢個係嗰個經濟嘅理據去提供補貼？
- 16 MR JOHN STANLEY：（經傳譯員）係，正正係咁。
- 17 陳先生：（經傳譯員）可唔可以咁講，呢個補貼部分就係香港同墨爾本嘅分別就係香
- 18 港就係營運商收車資同埋佢哋負責嗰個財務風險？
- 19 MR JOHN STANLEY：（經傳譯員）墨爾本本身知道個社會效益，因為我哋之前係做
- 20 過一啲計算，就因為我哋計番對社會嘅效益同埋值唔值得係政府去畀咁多錢，
- 21 呢個係一個可以——香港嚟講，都應該係有用嘅，去量化對香港社會嘅價值，有
- 22 關於個巴士服務。
- 23 主席：（經傳譯員）香港嗰個用者自付制度係有效嘅？
- 24 MR JOHN STANLEY：（經傳譯員）係，係嘅，但係亦都係有其他人去受益，譬如話
- 25 嗰個安全，呢個安全係一個巴士營運嘅一個重大嘅外部因素，所以對我哋嚟
- 26 講，外部因素都幾緊要去了解嗰個成本同埋個效益，譬如話有一半人去坐專營
- 27 巴士而轉去坐私家車，本身個安全結果會比較差，所以呢啲係需要去明白嘅。
- 28 主席：（經傳譯員）香港模式有效係咪如果個人數呢？
- 29 MR JOHN STANLEY：（經傳譯員）我會話係，同埋個密度係支持到嘅。
- 30 主席：（經傳譯員）唔該。陳律師。
- 31 陳先生：（經傳譯員）係，教授，跟住我哋去講一個相關嘅課題，但係個焦點就會有
- 32 啲唔同，喺呢個課題下面，我想同你討論嘅就係競標同埋協商合約兩者個優

1 劣，我唔係話邊一樣係好啲，而係想講每一--探討下每一種方式個優劣。我  
2 可唔可以開始就係請你睇一睇專家文件夾嘅 20 頁？即係你第一份報告。主席，  
3 唔好意思，講錯咗。

4 主席：（經傳譯員）係，慢慢喇。

5 陳先生：（經傳譯員）主席，應該係你第二份報告嘅 20 頁，即是專家文件夾嘅 73  
6 頁。

7 主席：（經傳譯員）好，唔該。

8 陳先生：（經傳譯員）喺第 73 頁，你呢度講嘅題目就係專營權同埋係用咩嘢方法去  
9 分配服務提供嘅權利，請你睇由尾數上去畀二個段，就係開始第一個字係  
10 “However”，我會讀出嚟，「但係墨爾本亦都將大概三分之一嘅定線巴士服  
11 務用招標方式判出去，就會令到喺表現方面增加咗個壓力嘅元素，對成個定線  
12 巴士系統都係，而呢個投標嘅元素就會造成一個效果，就係令到現有嘅營辦商  
13 喺--都一直有一個擔心，就話佢哋個協商嘅合約唔係得到保證嘅，所以亦都  
14 有個風險可能將來佢哋個條線嘅服務係會用投標方式判出去嘅，即係如果佢哋  
15 表現得唔好嘅話。而喺香港就有一個競標嘅制度，即係過去二十年都有，就顯  
16 示喺呢方面個風險，香港可能就係低過墨爾本。」然後請你睇...

17 主席：（經傳譯員）或者你繼續之前，你就覺得呢個係一個風險，就即係話現有嘅服  
18 務承辦商從來都未試過喺協商合約嘅時候係有咗份合約嘅，係咪呀？

19 MR JOHN STANLEY：（經傳譯員）係，我諗就有兩方面去睇呢個問題嘅，一方面就  
20 要睇個風險同個壓力，即係提供服務個成本個度，而真正係競標嘅話，  
21 就會令到人會警覺啲，即係要睇下佢個營運個成本係點樣。喺全世界嘅好多  
22 地方佢哋都係用競標個方式嘅，就但係好多時候都係由政府提供個服務，就唔  
23 係私人公司，而政府決定佢可能係負擔唔到個成本補貼，跟住就要繼續服  
24 務，咁就點做，咁睇喇。而我哋如果用競標，通常由一個私人營辦商代表咗公  
25 營營辦商，可能個成本就會節省百分之十五至二十嘅。

26 如果係私人營辦商係一路都係有效咁樣經營緊、提供緊一啲服務，因為營辦  
27 權係有值錢嘅，政府基本上就係畀營辦商--畀佢哋自由點樣去營辦，但係佢哋  
28 可以賺到一個合理利潤，提供一個好嘅服務，但係如果係競標嘅話，即係有人  
29 畀錢政府，可以攞到呢個營辦權。

30 香港就比較唔尋常，就因為唔係好多地方就可以用呢一個論據嘅，因為呢度  
31 嘅服務真係做得咁成功，完全係商業營辦嘅，即係話政府就畀咗個權畀營辦商  
32 去經營，咁都係一個可行嘅方法嘅，就個費用會低啲，而營辦商可能亦都會  
33 畀啲錢政府去提供個服務咁樣，都可以係咁嘅。

34 主席：（經傳譯員）好，唔該。

35 陳先生：（經傳譯員）第二個我哋想睇嘅，就關於話係表現壓力個度，就係第 87

1 頁，即係用競標形式就會有表現壓力，第 87 頁，相關嗰段就係第一段，嗰頁嘅  
2 第一段，就係話「墨爾本嘅定線巴士營辦商，睇嚟係有可能會承擔比較大嘅表  
3 現嘅壓力，就係相對於香港嘅專營巴士營辦商，原因就係第(1)，就係墨爾本經  
4 常都存在呢個可以有競標嘅威脅，即係如果佢表現唔理想就會出現；第(2)，就  
5 會包括一啲具體嘅獎勵或者罰則條款喺合約裏面；而最重要，從一個安全角度  
6 睇，第(3)點，就係有存在安全嘅職責等等。」

7 或者我先講番第一部分，就係因為有競標嚟墨爾本佢個好處係乜嘢，首先講  
8 呢點，某程度上，你都解釋咗一部分，或者我可唔可以再問一問你？關於呢個  
9 競投或者競標嘅概念，嚟香港環境點樣可以用到呢？即係因為香港就係巴士營  
10 辦商就收嗰個車費嘅收入嘅，你其實頭先已經開始講咗嘅，之前嘅答案裏面都  
11 開始講呢一部分㗎喇，即係頭先你係答主席嘅問題，我知道係有唔同嘅方案可  
12 以考慮嘅，你可唔可以解釋下各個方案呢？

13 因為定線巴士營辦商佢就從乘客嘅車資嗰度就收到佢嘅收入，呢個係個價值  
14 好大，你又提到有個可能性就係由承辦商畀錢政府攞得呢個營辦權去提供譬如  
15 巴士服務嚟一個專營地方咁樣，香港就有一個競標，但係政府係可以考慮係咁  
16 樣做就開放畀人去競投嗰個營辦權，如果係咁競投嘅話，而家因為有一個價格  
17 定咗嚟度，點樣用咩嘢基礎去做呢？

18 MR JOHN STANLEY：（經傳譯員）我未必完全明白你想問乜嘢，但係等我嘗試答。  
19 如果政府係咁做，就會話「好喇，而家嚟 x 呢個區將現有嘅專營巴士權全部整  
20 走，我哋就會邀請邊個想提供服務就嚟入一個標，就話要嚟呢個區度提供服  
21 務。」而呢個競投可能係講話有一個時間表，即係個班次時間表，政府就可能  
22 亦都具體講明話佢哋希望個服務係點樣嘅，然後邀請公司嚟去競投，可能會預  
23 計嗰個競標價係會好低，因為政府嚟呢方面係唔需要話花啲乜嘢錢，政府係咪  
24 最終可以賺到錢呢？譬如可能就係睇佢哋嗰個回報率，然後將其中一部分嘅利  
25 潤係交番畀政府，等佢哋可以擁有呢個經營權。

26 譬如話嚟倫敦咁樣，佢哋講緊嗰個利潤--個利率都係好低嘅，即係個回報  
27 率好低嘅，而嚟倫敦，佢哋嘅做法，佢哋嗰啲合約都係規模細啲，年期短啲，  
28 因此就將佢哋個回報率係撇低咗，所以可能個營辦商就會話「好喇，我而家就  
29 係要投標，不過我都唔會降低我個利潤。」而另外一個競投嘅人就可能話「我  
30 係會準備--我係願意畀番啲錢政府嘅，即係從呢個合約，因為我就可以賺到  
31 錢。」所以政府都會畀佢賺啲錢。所以好難知道話最終嗰個結果係點。

32 我要講得好清楚一點，我唔係話香港都應該用競投或者競標呢個制度，但係  
33 用個假設嘅情況話我哋可以做啲咩嘢呢？畀我呢，我就揀幾條路線，然後就處  
34 理，就話呢啲路線我就拎出嚟畀人競投，就會令到個過程都會簡單啲，容易  
35 嘅，就係譬如你要點樣處理已經係投放咗嘅資產、投資啲資產等等點樣處理當  
36 然係困難，但係原則上其實係做得到嘅，即係畀錢之嘛，就可以買到嗰啲資  
37 產，然後嗰個區幾大，又當中有幾多條路線你攞出嚟競投，就係咁考慮。

1 主席：（經傳譯員）你講話倫敦嗰啲合約個年期好短嘅，我知道倫敦佢哋個招標個合  
2 約期係五年，...

3 MR JOHN STANLEY: Correct.

4 主席：（經傳譯員）...而有可能延展兩年，但係七年之後就要重新招標㗎喇。

5 MR JOHN STANLEY: Yes.

6 主席：（經傳譯員）即係同墨爾本一樣，係咪呀？如果你講七年就。

7 MR JOHN STANLEY：（經傳譯員）係喇，墨爾本都係五加二--倫敦係五加二。

8 主席：（經傳譯員）係，我知道。

9 MR JOHN STANLEY：（經傳譯員）而且佢哋嗰啲合約規模係細啲嘅，我都知道倫敦  
10 個情況係咁，就係以路線為本嚟定嗰啲合約嘅。

11 陳先生：（經傳譯員）我知道當然亦都可以有其他嘅可能性，一個方法就係競投人就  
12 建議向政府畀某一個數目金額，就等佢可以營辦咁多條路線喺某個區咁樣，而  
13 另外一個可能性就係競投人係提出同政府分享個利潤。

14 MR JOHN STANLEY：（經傳譯員）係。

15 陳先生：（經傳譯員）而我諗仲有可能有第三個可能性，就係唔係用競投價，而係完  
16 全去評估佢哋可能將會提供個服務嘅性質係點樣樣，如果咁樣去競投，係咪都  
17 合邏輯呀？

18 MR JOHN STANLEY：（經傳譯員）係一般去考慮，即係做競標呢個方式㗎，抑或考  
19 慮--價格當然係其中一個因素，但係質素係非常重要嘅，而好多時候你會發現  
20 好多地方佢哋唔會將個合約畀最低投標價嗰個人，而佢哋睇番個服務，所以服  
21 務質素肯定係一個好高嘅要考慮嘅因素㗎嘅，一個重要嘅考慮因素㗎嘅，就係  
22 話要睇番嗰個競投人佢能夠提供啲咩嘢服務，呢一點係重要。

23 主席：（經傳譯員）可能亦都有其他嘅方法，即係個準新營辦商，佢就會話「我比現  
24 任嗰個--而家嗰個承辦商，我會將嗰個票價降低百分之十。」從政府嘅角度考  
25 慮，就當然會令到公眾得益，咁都可以係一個方法，係咪呀？

26 MR JOHN STANLEY：（經傳譯員）係呀，絕對可以係嘅。

27 陳先生：（經傳譯員）好喇，講番嗰個好處，即係競標呢個方式嘅好處，一般嚟講，  
28 競標一般可以提供啲咩嘢嘅優勢，即係譬如話係改善到巴士服務嘅安全呢？

29 MR JOHN STANLEY：（經傳譯員）我諗競標，你哋可能會見到一種情況，佢嗰個競  
30 投價係低嘅，然後可能賺唔到錢，可能佢哋個承辦商就話「如果係咁，睇下邊  
31 度可以慳到錢。」譬如話係遲啲先做維修、保養，呢個係一個例子。

1 我喺第一份報告都有提到其中一樣，就係道路安全嘅檢驗，當時都係關注到  
2 話有啲巴士個個狀況好唔好咁呢個問題，所以我哋當時就話喺競標嘅方式就有  
3 呢個問題，當時我哋係向規管當局提出咗呢個問題，個原因就係如果用責任鍊  
4 呢個方式，喺墨爾本個法例係咁定嘅，作為檢驗巴士嘅人，我哋就知道如果佢  
5 啲營辦商嘅巴士唔合標準，就我哋相信就要喺呢個責任鍊嗰度去處理，如果  
6 唔係，就會出問題。

7 所以我覺得係會有風險嘅，就係你點樣處理，就係話你可能喺做個招標文  
8 件嘅時候就好明確訂明個質素嘅準則係點樣樣，同埋要講明個譬如巴士車  
9 隊個狀況要維持喺邊度。

10 羅先生：（經傳譯員）如果我哋係特別明確講出安全係一個考素，應該喺個招標過程  
11 裏面加落去呢？即係要講明要安全呢個因素，點樣寫落去等啲人競投嘅時候考  
12 慮呢？

13 MR JOHN STANLEY：（經傳譯員）我諗要講明話個車嘅狀況係點、維修保養係點  
14 樣做同埋營辦商需要保持到咩嘢狀況，咁可能喺合約裏面都要講明如果佢哋達  
15 唔到啲成效嘅時候就要點樣處理，我唔係律師，肯定你寫合約，你就會講到  
16 定到一啲嘅基準嘅表現嘅指數，而呢啲基準表現目標達得到，就有問題，如果  
17 達唔到，就要處理。

18 羅先生：（經傳譯員）你話喺競投個準則嗰度點樣呢？即係如果我哋好明確講明話  
19 安全係一個因素，會唔會用意外率呢？即係話如果你做唔到，你要罰款咁樣  
20 呢？

21 MR JOHN STANLEY：（經傳譯員）我就唔知道有人會有啲獎勵或者係罰則係特別同  
22 安全有關嘅，如果真係咁做，我就會覺得意外率都係一個好嘅起點嚟嘅。

23 主席：（經傳譯員）新加坡有冇一啲規定，就話如果個意外率達到某一個水平，就會  
24 有個罰則咁樣呢？

25 MR JOHN STANLEY：I think it is, Chairman, but I don't know  
26 enough about it.

27 主席：（經傳譯員）但係我知道個意外率係定得好高嘅，高過香港現有嘅意外率  
28 嘅。

29 MR JOHN STANLEY：Okay.

30 陳先生：（經傳譯員）喺競標，你提到話可能有一個壞處，就係個成本嗰方面嘅問題  
31 或者係要遲啲計算，你又提到話保養嘅成本，會唔會係同個合約年期有關  
32 呢？譬如話只限定一段時間，只要你保持到你嘅表現，喺嗰段時間就得喇，之  
33 後發生咩嘢事你就唔理喇喇，如果咁講，係咪錯呢？抑或係調番轉呢？

34 MR JOHN STANLEY：（經傳譯員）正如我之前講過，我唔知道啲競標合約嗰個全

1 部細節係點嘅，但係通常做法，政府就會喺個合約定一啲規定，就話去到個合  
2 約完嘅時候嗰啲汽車應該保持喺乜嘢嘅狀態嘅。

3 陳先生：（經傳譯員）嗰個一般個概念，即係話要延遲支付一啲成本，就會係競標嘅  
4 一個弊端嚟嘅，你其實指話延遲成本係咩嘢意思呢？即係我理解，就係話因為  
5 我要保持成本低，我就係呢度慳、嗰度慳咁樣，你想講嘅係咪係想講呢個觀點  
6 呢？所以因此佢哋延遲支付某啲成本？

7 MR JOHN STANLEY：（經傳譯員）我諗就係你同政府當然會進行一連串嘅協商，睇  
8 下政府會唔會係有啲情況幫到你一啲，譬如話畀多啲錢你去營辦咁樣，有啲承  
9 辦商佢哋會咁做嘅，佢哋會嘗試去同政府重新再商討佢哋嘅合約嘅，如果佢哋  
10 發覺佢哋個利潤太低嘅話，譬如喺墨爾本，我哋就睇到真係有一個問題存在，  
11 所以嗰個情況最後就處理咗㗎喇，而家營辦商佢哋個車隊嘅狀好咗好多，但係  
12 我唔知道嗰次政府係咪有畀到幫助佢哋或者畀咗錢佢哋。

13 陳先生：（經傳譯員）唔好意思，我要講番返去呢個問題，因為我要確保我係好清楚  
14 明白你講乜嘢嘢。即係從商業嘅競標就有弊端，但係又有好處，係同安全相關  
15 嘅，係會因為競標係會提供咗呢個好處？

16 MR JOHN STANLEY：（經傳譯員）我就諗唔到，陳生，或者係有嘅。

17 主席：（經傳譯員）你就係指出話有風險？

18 MR JOHN STANLEY：（經傳譯員）係，我覺得係有風險嘅。

19 主席：（經傳譯員）所以你就覺得競標，譬如話——譬如每咁多公里，佢唔換嗰啲車  
20 㗎，就係因為想慳錢，呢個就係個風險，係咪呀？

21 MR JOHN STANLEY：（經傳譯員）係，就係呢個風險，類似呢啲。

22 陳先生：（經傳譯員）我知道三分一嘅墨爾本嘅定線巴士服務都係競標嘅，你覺得自  
23 從引入咗競標之後，對於巴士安全運作有冇帶嚟好處呢？

24 MR JOHN STANLEY：（經傳譯員）我就唔認為有咩嘢證據，如果你睇番運輸申訴專  
25 員嘅報告，就係講話針對嗰啲巴士營辦商，你就會睇到嗰啲競投嘅服務，佢哋  
26 通常即係話如果呢方面服務，佢哋去到申訴員嗰個投訴都係屬於排得比較高嘅  
27 啲公司嚟嘅，就主要係保養問題。

28 主席：（經傳譯員）有啲邊啲嘅競投嘅營辦商？

29 MR JOHN STANLEY：（經傳譯員）就係現有嗰個，Transdev。

30 主席：Transdev？

31 MR JOHN STANLEY：（經傳譯員）係。

32 主席：（經傳譯員）我知道倫敦佢哋一啲嘅可能就係因為有策略性嘅規劃，就令到佢

1 咁保養有問題，好多嘅工程師同一時間係退休嘅，佢哋又請唔到人，墨爾本個  
2 個問題係咪都係因為咁嘅原因呢，抑或係同想節省成本嘅問題？

3 MR JOHN STANLEY：（經傳譯員）我諗應該係因為墨爾本而家都係有一個好快速嘅  
4 人口增長，就係差唔多每年係百分之二點五，嗰啲巴士就要運作得頻繁啲，我  
5 諗呢個係其中嘅原因佢哋要行多啲嘅里數，又要每日喺路上係用長咗，又老  
6 化，我諗呢個就係墨爾本嘅情況。

7 主席：（經傳譯員）唔該。

8 陳先生：（經傳譯員）好，教授，我可唔可以去睇下一個協商嘅合約有咩嘢利弊，首  
9 先，想請你睇你第二份嘅報告書，第 86 頁，喺嗰一頁嘅最底嗰一段，我讀呢一  
10 段出嚟，你就話，86 頁下面，「定線巴士營辦商係需要感覺到某啲嘅表現方面  
11 嘅壓力嘅，如果佢哋係一個可以係唔續約嘅，協商出嚟嘅專營權嘅話，作者就  
12 係支持呢一個協商嘅方式嚟到去批呢一個定線服務嘅營辦權利，但係呢一個嘅  
13 制度必須要確保呢一個營辦商係有一啲嘅壓力，要喺一啲嘅可以量度嘅啲嘅  
14 表現方面係表現得好嘅，就有機會如果佢做得好，就有獎勵，如果佢做得唔  
15 好，就有刑罰嘅，就係可能引致佢係會甚至損失咗呢個專營權嘅，呢啲就係要  
16 全部擺晒落去嗰個嘅專營合約裏面。」點解你覺得呢一個比起競投方式更加好  
17 呢？

18 MR JOHN STANLEY：（經傳譯員）我自己喺呢方面喺墨爾本做咗好多工夫，我覺得  
19 一個協商嘅合約主要嘅好處，就係話你要決定如果你真係想用呢個方法，你就  
20 要喺政府同埋營辦商之間有一個好牢固嘅關係，就係話到底呢一個制度點樣可  
21 以發展得最好嘅，我哋就覺得政府方面係佢技巧方面有限，營辦商方面亦都  
22 係，嗰個嘅制度嘅設計同埋點樣能夠最好咁樣得到你公共運輸嗰個嘅利益，就  
23 有一個機會畀政府喺呢方面嘅專家同埋業界就一齊努力，就希望一加一係大過  
24 二嘅結果，呢個我哋而家就係試緊咁樣做，喺呢方面我寫咗好多嘅文章，就係  
25 話政府同埋營辦商要有一個互相信任嘅關係，就唔係講到話--即係唔係話規管  
26 方面係做唔到，而係要嗰間公司--唔係話嗰間公司好似係控制咗個營辦商，而  
27 係兩方面係有一個互相嘅信任嘅協作，嗰個嘅合約或者營辦商就係可以喺期內  
28 有所變更嘅，係一路喺度更新緊嘅，係一份活嘅文件，就唔係話係已經係鐵板  
29 一塊，開始係點就唔能夠改變嘅。就一路嗰個營辦期一路運作，就可以改善呢  
30 個服務嘅，就係基於大家有一個相互嘅信任。

31 點解墨爾本佢哋做得到呢？因為我亦都係去經營呢個巴士協會嘅，我哋喺呢  
32 一個乘客量同埋服務表現方面都有好大嘅改善，就係基於我哋同政府有呢一個  
33 嘅關係，以前三、四十年都係做唔到嘅，從我哋嘅經驗，我哋睇到如果你--政  
34 府同埋相關嘅機構有呢一個嘅互相信任嘅關係，呢一個制度亦都係需要雙方都  
35 係負責嘅，咁嗰個營辦商就可以有好嘅表現。如果佢唔係話畀個牌照佢賺錢就  
36 算嘅，佢係要有好嘅表現，點解？就係話要有一啲嘅表現方面嘅壓力係擺喺呢個  
37 人身上嘅。

1 主席：（經傳譯員）你可唔可以解釋乜嘢叫做規管方面嘅即係一個嘅--大家困咗喺呢  
2 一個嘅局裏面？

3 MR JOHN STANLEY：（經傳譯員）即係話有時可能嗰個嘅標係太低，政府就覺得好  
4 難，如果佢哋大家唔太過親近嘅時候，就可能嗰方面又會想嗰個合約價格係升  
5 高嘅，好多時候大家就會批評協商嘅合約就係話好似而家嗰個營辦商就已經係  
6 俘虜咗政府㗎喇，政府冇辦法，惟有畀佢繼續嚟到去做。我哋其實就係要有一  
7 個壓力，要佢有好嘅表現嚟到處理呢個風險，因為其實有個風險嘅。

8 主席：（經傳譯員）即係話可能係巴士營辦商就係可能抗拒政府有一啲嘅建議話叫佢  
9 哋點樣改善，係咪咁呀？譬如話加一啲巴士上一啲安全嘅裝置。

10 MR JOHN STANLEY：（經傳譯員）係呀，係呀。

11 主席：（經傳譯員）就係有講，但係就唔做，就係有一個實質嘅改變，係唔係呀？

12 MR JOHN STANLEY：（經傳譯員）如果真係嗰個營辦商俘虜咗嗰個嘅規管者，就可  
13 能會咁嘅。

14 主席：（經傳譯員）呢個係一個風險。

15 MR JOHN STANLEY：（經傳譯員）所以點解你要有一個嘅表現方面有壓力嘅，就係  
16 係一個真正嘅壓力。

17 主席：（經傳譯員）你可唔可以畀一啲舉例例子，點樣叫做表現方面畀啲壓力佢呀？  
18 喺邊方面呀？

19 MR JOHN STANLEY：（經傳譯員）特別係安全表現嘅壓力，我哋喺墨爾本就係覺得  
20 安全係一個共同承擔嘅責任，呢個係好獨特嘅，所有相關嘅各方都係有一個嘅  
21 責任鍊，呢個都可以影響巴士嘅安全，佢哋都安全嘅責任。呢一個就需要我哋  
22 喺我哋嘅認證制度之下有一個洽商嘅合約安排，所有嘅營辦商都相當知道佢哋  
23 如果做得唔好，佢可能係會被告上法庭嘅，如果證明佢哋冇盡佢哋嘅力嚟到去  
24 盡佢嘅責任保障安全，就會咁喇。所以呢個係一個非常之重要嘅表現壓力，呢  
25 個就係責任鍊方面。我哋覺得如果有一個太過低程度嘅表現壓力，呢個就係關  
26 乎賞罰，我哋都講過喇。

27 主席：（經傳譯員）即係話喺佢哋可唔可以營辦係有一個服務嘅有獎賞，而係安全方  
28 面，可唔可以用呢一個意外率嚟到量度？

29 MR JOHN STANLEY：Absolutely.

30 主席：（經傳譯員）有咩嘢其他方法去量度呢？

31 MR JOHN STANLEY：（經傳譯員）意外率係一個好嘅起點，如果你睇下一啲嘅報  
32 告，我哋喺安全計劃同埋呢一個五年嘅計劃，你就提供一啲資料關於傷亡率、  
33 撞車、非撞車，譬如話係蹣倒、絆倒、跌倒等等呢啲嘅意外。如果你係發現一

1   咱安全--你將安全變做一個可能係有懲罰嘅條件，我哋就會去處理嗰個安全嘅  
2   問題，如果你唔去將嗰個意外率嚟到一齊嚟去睇，你就咁睇嗰個傷亡率，你就  
3   會睇埋譬如話踎嘍、噉嘍、跌倒呀咁，我覺得呢兩點都係重要嘅。

4   我覺得有一個嘅營辦商就係見到越嚟越多係踎嘍、噉倒同埋跌嘍呢一類嘅意  
5   外，呢一方面處理咗，就減低咗嗰個傷亡，如果你將佢哋全部加起上嚟，一件  
6   事件就係一個事件，你就睇唔到嗰個整體嘅情況，如果你將佢哋分析下，睇下  
7   一啲安全嘅大嘅範疇，就係確保有一啲主要服務指標，你就可以有一條嘅條  
8   款，可能係賞罰嘅條款，即係話你就係會有一系列嘅設施喇。

9   我唔知道呢一個一籃子嘅設施有幾多個元素，但係係要喺大家洽商，即係政  
10  府同埋營辦商或者係委員會洽商之後嗰個結果嘅，我覺得呢個就係主要呢個安  
11  全嘅問題同埋你要去處理嘅。

12  主席：（經傳譯員）我諗喺倫敦，佢哋有四十二個元素係關於安全嘅問題。

13  MR JOHN STANLEY：（經傳譯員）我就覺得好多。

14  陳先生：（經傳譯員）你正話就係重點講咗表現方面嘅壓力，我就想問下你，喺香港  
15  呢個情況，巴士服務其實都係同其他公共交通模式去競爭嘅，譬如話火車、小  
16  巴、的士等等，你覺得呢一類型嘅競爭會唔會都喺營辦商方面有壓力，要佢表  
17  現得更好嘅呢？

18  MR JOHN STANLEY：（經傳譯員）係有嘅，都有一個程度嘅，但係就唔夠我哋正話  
19  講到競投所造成嘅要佢表現得好啲嘅壓力，因為嗰個嘅後果係比較嚴重嘅，  
20  喺競投嘅情況之下，佢哋係例如話你如果競爭得唔好，你就可能少咗啲乘客，  
21  你同呢一個地鐵方面，但係呢個唔同，係完全冇咗你成檔生意嘅，我諗我哋係  
22  需要嗰個壓力係去到一個地步，如果你表現得唔好，你可能冇得做生意，冇得  
23  做嘅，呢個就係競投一般嘅情況。亦都要有一個好可能嘅一個情況，就係話呢  
24  個好可能嘅威脅，就係如果你表現好差，你會成個嘅合約或者專營權係冇咗  
25  嘅。

26  我諗另外一點，就係票價嗰個調整機制亦都喺你嘅專營合約裏面係容許有呢  
27  方面可能係畀佢哋表現得冇咁好，因為有一條方程式嚟到去調整價格，改變咗  
28  營運嘅開支同埋收入就係其中一樣嘢我哋畀呢個巴士營辦商係有一個合理嘅回  
29  報率，呢一個喺票價調整方面係考慮埋嘅。我哋要畀佢睇到好可能，真係好可  
30  能你如果係做得唔好，你冇咗呢個專營權嘅。

31  主席：（經傳譯員）我哋而家就係聽到一啲嘅證供，嚟自巴士營運商，佢哋話咁樣嚟  
32  到係分類係唔公道嘅，佢哋對於呢個嘅價格調整機制唔係好開心，佢哋就話佢  
33  哋有時去到一個地步，都費事申請加價，因為通常都係被拒絕㗎喇。

34  MR JOHN STANLEY：（經傳譯員）我諗一個合約或者專營權係要寫得好清晰，冇含  
35  糊嘅地方，關乎票價嘅調整，我哋呢一度就唔係睇個票價，反而係營辦商嗰個

1 嘅回報，我哋都係有類似嘅方程式嘅。我哋會睇下譬如工資、燃油價格、其他  
2 嘅營運成本嗰啲嘅元素係點呢，我哋會將呢啲全部考慮在案，嚟到去計算我哋  
3 嘅補貼水平，即係話營辦商同政府收到幾多，佢就會將佢擺晒落去嗰個價格嘅  
4 釐訂嗰個情況裏面嘅。

5 主席：（經傳譯員）你即係話巴士營辦商就係認為價格調整機制就係令到佢哋唔係幾  
6 開心，佢哋就唔提出申請嘅。我諗而家都係一個合適嘅時間我哋係有一個小  
7 休，我哋會休息二十分鐘，一陣間會再返嚟嘅。

8 MR JOHN STANLEY：（經傳譯員）唔該。

9  
10 上午 11 時 35 分押聆訊押後

11  
12 上午 11 時 56 分恢復聆訊

13 出席人士如前。

14  
15 主席：（經傳譯員）教授，喺我哋繼續之前，有兩樣嘢嚟講，我哋同時間提供即時傳  
16 譯，為咗方便聆聽傳譯嘅人，我希望你喺回答嘅時候可以放慢少少，同埋適當  
17 時候停頓，可以令到佢哋可以追到你。同埋你或者可以或者會對準啲個咪去回  
18 答，我哋大家都會收聽得清楚啲。希望你搵到一個合適嘅距離去回答。

19 陳先生：（經傳譯員）我哋之前提及到將安全列為獎勵嘅一部分，我想特別針對呢個  
20 題目嘅，喺小息之前，你有提及到有啲咩嘢指標可以去聚焦嘅，即係作為獎勵  
21 嘅一部分，想問一個一般性問題，喺有個環境，譬如話個營運者已經本身係靠  
22 個乘客人數去獲利，你預計話呢啲嘅獎勵會唔會成為一個係直接嘅獎金或者係  
23 扣錢？

24 MR JOHN STANLEY：（經傳譯員）呢個就係我係正正會預計到。

25 陳先生：（經傳譯員）本身係會有啲指標，係咪？如果你唔設定嘅話，就會係有個罰  
26 則條款，如果你符合嘅話，就會有一個額外獎金？

27 MR JOHN STANLEY：（經傳譯員）我諗係會設定一個範圍，如果你稍為唔符合或者  
28 你超過少少或者你係可以達標或者超過幾多，呢啲獎罰本身係會有個最高低範  
29 圍。喺我小息前講過，譬如話嗰啲死亡、滑倒、絆倒、跌倒呢啲亦都會考慮  
30 到。

31 去建立嗰啲表現指標，本身係有啲要求去符合，本身你要係具體，可量度同  
32 埋可以達到，同埋明顯要有關，同埋嗰啲數據本身係要及時供應到，呢啲嘅主

1 要即效指標，主要係要營運商係可以去同佢嘅表現去--係影響個結果。

2 我哋認為安全係一個共同責任，我認為如果呢啲嘅主要即效指標傾斜於個責  
3 任喺個車長方面，而唔去涉及其他人還是本身係做個巴士安全責任鍊嘅一部  
4 分，特別係啲啲有關呢啲巴士安全嘅指標，譬如話死亡、滑倒、絆倒、跌倒個  
5 案。

6 亦都睇番呢啲嘅指標本身可唔可以針對可以影響呢啲指標嘅一批人，因為呢  
7 啲係牽涉到只係車長，就唔係咁公平。

8 陳先生：（經傳譯員）根據你之前嘅答案，你諗緊係咪一個獎金制度？即係譬如話政  
9 府設定嘅，唔係淨係畀營辦商，可能營辦商嘅僱員都可以有呢？

10 MR JOHN STANLEY：（經傳譯員）我諗呢個就要公司自己去決定，即係佢點樣做到  
11 最--得到最好嘅效果，我就會覺得可能係有一個獎金制度或者一個罰則嘅制  
12 度，係公司層面嘅，由佢哋去判斷，到底佢哋想獎勵邊個，特別係啲啲都一齊  
13 努力導致個個成果做得到嘅人。

14 陳先生：（經傳譯員）譬如我哋講過呢個概念層面，可唔可以講一個具體嘅例子？即  
15 係頭先講咗概念層面，而家可唔可以講個具體嘅例子？其實有好多例子，但係  
16 我淨係擺一個，等我哋嚟睇下到底呢個概念係咪行得通，然後就請你就住呢個  
17 例子畀啲評論，首先可唔可以請你睇 TD-1 文件夾 192 頁？

18 等你知道呢份係咩嘢文件，呢份就係九巴嘅遠期規劃嘅文件，呢度有一節就  
19 係特別講巴士安全嘅，就係 2018 至 2002 年嘅，呢份文件 192 頁就係九巴交  
20 界運輸署嘅，就係大概 2017 年中左右，8.8.1 段，九巴建議用三年嘅平均數  
21 字，係 2014 至 16 年嘅實際牽涉交通率，就係 2.71 呢個數，個定義就係話每  
22 一百萬營運里數嘅牽涉喺交通意外嘅巴士數目，就比起 2014 年個意外率其實就  
23 係減低咗百分之六嘅，喺 2014 至 2016 就係最高個紀錄嚟嘅，就用呢個目標  
24 做五年計劃期嘅目標，即係話佢定咗個基準喺呢度喇，可以咁講。呢個就係九  
25 巴自己定嘅目標，就係其中一個可以用嘅安全指標。

26 然後我哋往前去，2017 年去到 2018 年，你就可以睇 TD-5 文件夾 1729  
27 頁，唔好意思，可唔可以返番一頁先，1728 頁，等我哋知道呢份係咩嘢文件，  
28 1728 頁，你就睇到有一封信，係運輸署，日期 2018 年 5 月 21 號，係由運輸  
29 署畀九巴嘅。

30 第一段，「呢封信就講話係提供你一套嘅指引同埋規定，就係涵蓋下面嘅部  
31 分，就係要你喺五年嘅規劃計劃裏面就遵循嘅，所以你準備嘅時候就要睇  
32 喇。」

33 好喇，即係一年前，即係講緊同一個，就係話佢個未來五年嘅規劃工作。  
34 然後去番 1729 頁，你睇到運輸署嘅評論，關於巴士安全嘅，第一段，運輸署就  
35 話「我哋備悉喺九巴每百萬行車里牽涉交通意外嘅巴士數目就 2016 年嘅 2.74

1 就增加到 2017 年嘅 3.04，係屬於一個高水平。」

2 第二段，我淨係讀最後啲一行，「仲有，實際嘅牽涉交通意外率就係 2017  
3 年 3.04，就係比喺你 2018 至 2022 年規劃計劃裏面所建議嘅 2.71 呢個水平  
4 係高嘅。」

5 就呢度就睇到，每百萬行車公里牽涉意外嘅巴士數目，啲個 2016、17 啲  
6 啲數字你睇到晒，15 都有。

7 然後喺呢一個表下一段就話「如果講到話牽涉到九巴巴士嘅交通意外數目，  
8 喺 2015 年 362 宗增加到 2017 年嘅 423 宗，就有一個上升嘅趨勢。」

9 喺我頭先讀啲段，我哋睇到九巴並冇達到意外率嘅目標，呢個目標係佢自己  
10 定嘅，你可以睇到九巴嘅意外率，即係按每百萬行車公里計，係達唔到，係高  
11 咗嘅，即係話九巴自己達唔到佢自己設定嘅目標。

12 你覺得如果個獎罰嘅機制喺咁嘅情況，點樣做呢？

13 MR JOHN STANLEY：（經傳譯員）我就唔會好似喺呢度咁樣嚟應用嘅，如果你睇番  
14 啲個表，題目就係話九巴巴士牽涉喺交通意外個數目，你會睇到啲個致命意外  
15 由 11 降到 5，再降到 3；嚴重受傷就由 122 降到 110，再降到 11；而輕微受  
16 傷就由 737 升到 787，再升到 889；如果你淨係講話每百萬行車公里嘅意外  
17 率，就即係話將所有唔同程度嘅受傷都有平等嘅對待，咁係一個錯誤嚟嘅。當  
18 然致命意外嘅考慮係最重要，跟住嚴重受傷都係重要，然後輕微受傷可能又有  
19 咁重要，所以係應該要反映到各種唔同意外所造成嘅傷亡程度嘅。即係話就係  
20 有一個主要表現指標，咁先至可以係量度到啲個安全表現，如果淨係按每一百  
21 萬行車里數嚟計啲個意外率，咁可能會誤導嘅。

22 陳先生：（經傳譯員）即係你意思應該仲有另一套嘅數字？

23 MR JOHN STANLEY：（經傳譯員）係喇，你要有一整套嘅指標，呢一度就會係啲套  
24 指標嘅一部分，但係應該係其中一個元素，唔係佢嘅全部。係應該有其他指標  
25 能夠反映到，如果我係作為經濟學家，我就會反映啲個交通意外嘅總體成本，  
26 譬如某一種嘅意外，譬如話嚴重受傷，輕微受傷或者致命意外，佢啲個成本係  
27 點樣，就變咗有個加權嘅因素加咗落去，就先至可以睇到每百萬行車里數啲個  
28 意外率點樣比較。

29 陳先生：（經傳譯員）好喇，如果睇下一頁 1730 頁，底部，第(3)節，運輸署建議  
30 --或者應該係話九巴就建議相關嘅計劃，為咗要減低巴士牽涉喺交通意外嘅比  
31 率同埋進一步加強巴士服務嘅安全，照顧到乘客，我哋要求你問公司要建議以  
32 下嘅計劃嘅。然後我哋去睇 1731 頁，運輸署要求九巴提出一個建議，係個目標  
33 意外率，即係喺下一期嘅長遠巴士服務計劃啲度要提及，就係呢個都係講話巴  
34 士牽涉喺意外個比率嘅。你就頭先都提到話呢個意外率就唔足夠嘅，太粗疏？

35 MR JOHN STANLEY：（經傳譯員）係呀，佢哋應該係要再仔細啲，我會覺得咁樣個

1 目標應該係佢哋協商個結果嚟嘅，就即係話運輸署同埋營辦商之間去協商到嘅  
2 結果，唔係應該由營辦商向運輸署建議。以呢一啲嘅課題其實應該係雙方都去  
3 協商嘅題目嚟嘅。

4 陳先生：（經傳譯員）教授，喺你個報告度，我睇到墨爾本即係訂價加呢個合約模式  
5 就有具體講明嗰個安全指標同埋有啲咩嘢獎罰嘅，或者我首先我講緊邊一頁，  
6 然後就請你評論，請你睇第 26 頁，就係專家文件夾嘅第 26 頁，即係你嘅第一  
7 份報告。你而家係咪揭到去第 26 頁呀？

8 MR JOHN STANLEY：Yes.

9 陳先生：（經傳譯員）我可唔可以讀出第二段？即係 3.4 之下嘅第二段，「根據十  
10 年嘅都會區定線巴士服務合約就會喺 2018 年中到期，獎罰條款就係同乘客人數  
11 增長有關，亦都係同係咪能夠按時提供服務或者取消班次有關，而呢個合約就  
12 會取代之之前嘅合約，就一般都係包括埋呢個焦點。但係安全就唔係一個主要嘅  
13 表現指標嚟嘅，根據合約，所以安全表現亦都有獎罰嘅條款規定，如果係安全  
14 表現惡劣，就可能只係會導致安全總監就係取消有關營辦商個認證，就即係話  
15 佢會有咗份合約。而喺新嘅合約，據理解，就會提供一個乘客體驗嘅機制喺  
16 度，就係話係要根據營辦商嗰個表現，睇下相關嘅乘客投訴嘅數目、佢嘅回應  
17 同埋解決嘅方法，就會成為一個考慮嘅指標。」

18 你提到話安全係咁重要，所以點解唔會加咗入去墨爾本嗰啲合約裏面呢？

19 MR JOHN STANLEY：（經傳譯員）係，原因就係我哋好大程度係倚賴墨爾本嘅法  
20 例，就關於佢哋嘅安全責任同埋義務，就導致佢哋可以達到安全嘅要求，即係  
21 話要所有有關能夠影響到安全嘅人士都要負上責任，我個人猜測呢個就係主要  
22 嘅理由點解我哋嗰個服務係咁受到讚賞，就係因為安全嘅考慮，而運輸安全署  
23 長，我都自己見過好多次，佢喺——我喺準備你今次嘅聆訊嘅時候，我就係見過  
24 佢好多次，佢都係深信墨爾本嘅定線巴士服務安全就係因為我哋最基本理由就  
25 係要所有相關人士都要負責，所以就係喺法例裏面有關於安全嘅規定，亦都有  
26 係責任鍊嘅規定。

27 陳先生：（經傳譯員）你頭先所講嗰個概念，嗰個一般理解就即係話喺維省係有法律  
28 上嘅責任，要確保安全，係咪呀？呢個責任嘅特點就係唔係淨係巴士營辦商，  
29 而係就算喺營辦商下面嘅僱員都要付上責任，係咪呀？

30 MR JOHN STANLEY：（經傳譯員）係，佢哋有巴士安全法，就係維省嘅法例，就係  
31 就住安全責任立法嘅。即係話喺根據法例，有關有時有責任要儘可能去減少或  
32 者係消除會威脅到安全嘅因素，確保安全，譬如一個例子，就係話巴士營辦商  
33 要喺儘量合理可行嘅情況之下確保巴士服務嘅安全，而法例亦都訂明嗰個安全  
34 責任係適用於一連串嘅人嘅。

35 主席：（經傳譯員）有關呢個文本，可唔可以喺個畫面度打出嚟呀？

1 陳先生：（經傳譯員）呢個應該係教授第一份報告嘅。

2 主席：（經傳譯員）唔係喺個附件或者另一份文件嗰度？即係佢提及呢份文件，嗰份  
3 文件有冇呢？有冇就係巴士安全法，即係有冇呢份文件？

4 陳先生：（經傳譯員）或者教授可以喺呢度幫一幫手，就我所知，我就喺附夾嘅文件  
5 嗰度有見到嘅。

6 主席：（經傳譯員）我自己就有下載到，喺我自己嗰查文件就有嘅，係咪其他人唔係  
7 都有㗎？

8 陳先生：（經傳譯員）係呀，或者可以畀所有人。

9 主席：（經傳譯員）即係話係咪喺個螢幕上係咪有呢已經？有冇一個參考編號呀？就  
10 住 Stanley 教授嘅報告就有三個文件夾嘅參考編號嘅，係咪喺呢度？

11 MR JOHN STANLEY：（經傳譯員）係有 22、23 頁，我第一份報告就有提到部分相  
12 關嘅法例，嗰個文本喺嗰度有。

13 陳先生：（經傳譯員）主席，個參考編號就係教授報告裏面嗰啲文件，即係佢提過啲  
14 文件，但係就有嗰個法例本身。

15 主席：（經傳譯員）我哋需要嗰份法例本身。

16 陳先生：（經傳譯員）或者下一次研訊，我哋會提供，然後再返嚟講嗰個部分。

17 主席：（經傳譯員）我哋喺 23 頁就有一個摘錄。

18 陳先生：（經傳譯員）係，冇錯。

19 主席：（經傳譯員）教授，你正想繼續講話邊啲人就有呢啲責任。

20 MR JOHN STANLEY：（經傳譯員）多謝主席。嗰個法例其實提及嘅，就係話用你哋  
21 講法，就係巴士車長、嗰啲編更嘅人員、採購服務嘅人士、維修保養嘅職員等  
22 等，即係喺個法例裏面嘅概念就係呢啲叫做巴士安全工作人員，佢哋就有安全  
23 嘅責任，而指定嘅人員就會包括例如係車長，牽涉嘅人係好多類嘅，佢哋就可  
24 能影響到個安全嘅情況嘅，所以嗰個根本嘅原則就係話共同嘅責任呢個概念，  
25 喺 22 頁報告底部嗰度有解釋。

26 主席：（經傳譯員）呢個責任會唔會延展到去公眾人士？

27 MR JOHN STANLEY：（經傳譯員）係有嘅。

28 主席：（經傳譯員）我覺得好似喺法例嗰度睇過喇。

29 MR JOHN STANLEY：（經傳譯員）如果係嘅話，我諗可能我睇漏㗎。

30 主席：（經傳譯員）但係我肯定你係比我熟悉嘅，我睇到，因為我當時就記得就係覺

1 得好怪喇，即係講到話嗰個責任鍊有邊啲人似乎有提。

2 MR JOHN STANLEY：（經傳譯員）就話邊個會影響到個安全嘅成效嘅。我諗值得提  
3 醒人--即係主要係想提醒人唔係淨係巴士司機嘅，仲有其他人都要負責嘅，因  
4 此佢哋需要承擔責任。

5 主席：（經傳譯員）佢哋點樣承擔責任呀？係會係法庭告佢哋？

6 MR JOHN STANLEY：（經傳譯員）係呀，係可以㗎，因為有關嘅條文就有一啲嘅罰  
7 款嘅。

8 主席：（經傳譯員）即係話如果係公層面，就可以係編更人員、巴士車長，而最高層  
9 嘅就係公司嘅高層，係咪？

10 MR JOHN STANLEY：（經傳譯員）係喇。而新嗰個全國法律好快就會喺 10 月 1 號  
11 生效嘅，嗰度就係定出維省法律嘅背景，就係講話有啲咩嘢行為可能會引致有  
12 啲咩嘢後果嘅，甚至係監禁嘅，呢個就係更新咗嗰個全國法例，係根據呢個法  
13 例，而家嗰個罰則主要就係罰款㗎嘅，但係將來就會改。

14 主席：（經傳譯員）你未繼續之前，想講嗰條法例，邊一部分係講話公眾嘅責任㗎？

15 MR JOHN STANLEY：（經傳譯員）第 15 條嗰度就係講緊營辦商嗰個責任，譬如話  
16 巴士營辦商一定要喺儘可能嘅情況之下確保嗰個巴士服務係安全嘅。第 16 條亦  
17 都係類似咁講，一個採購商...

18 主席：（經傳譯員）邊個叫做採購人？

19 MR JOHN STANLEY：（經傳譯員）即係嗰啲購買巴士服務嘅採購人。而呢度都係喺  
20 維省嘅一個好有趣嘅辯論係講緊嘅，就係講到係公眾嘅運輸當局就係購買同埋  
21 決定呢啲嘅服務班次就有一個採購人，可能係其中服務鍊一員嘅。

22 主席：（經傳譯員）點解唔係呢？

23 MR JOHN STANLEY：（經傳譯員）我覺得，就主席，呢個應該係嘅。咁繼續，就係  
24 去到第 14 條，...

25 主席：（經傳譯員）我哋可唔可以睇一睇，第 14 條一路去到第 17 條，第 17 條就有  
26 一個「巴士安全工作者」，係咩嘢㗎嘅呢？

27 MR JOHN STANLEY：（經傳譯員）個定義就係喺法例嘅前部係定咗嘅。

28 主席：（經傳譯員）邊啲係嗰啲巴士安全工人呀？

29 MR JOHN STANLEY：（經傳譯員）我諗最好都係睇番嗰個定義。

30 主席：（經傳譯員）好合理。可唔可以睇番釋義嗰部，應該係第 1 條，第 3 條，「定  
31 義」喺第 3 條，法例第 3 條，喺呢度，㗎唔㗎？「巴士安全工作」，係喇。

MR JOHN STANLEY：（經傳譯員）巴士安全工作者就係一個人係將會或者已經係做緊一啲巴士安全嘅工作，包括一個人係由巴士營辦人係聘用嚟到係做一啲巴士安全嘅工作，或者有其他人所聘用嚟到去做巴士安全工作，係一個受訓嘅人士或者一個自願工作者，所以嗰個定義都好闊嘅，可能係巴士嘅測試，一啲嘅監察。其實我哋就係負責驗車嘅，所以呢條條款都可以包埋我哋嘅。

主席：（經傳譯員）去番上面「巴士安全工作」嗰度。

MR JOHN STANLEY：（經傳譯員）指「一個活動可能影響到巴士服務嘅安全，包括駕駛巴士，或者係同一啲駕駛巴士相關嘅活動、設計、建造、供應、維修、改裝、驗車」或者係--等等。呢啲嘅係巴士上面嘅設備，或者係去定出或者係改變巴士服務時間表個班次，或者一個指定嘅服務，呢個係範圍好廣闊。

即係話巴士公司嘅經理佢哋係知道嘅，佢哋都係好認識呢一點嘅，譬如話曾經有討論到巴士司機嗰個嘅工作時間，其實就係佢哋係點樣可以接受。譬如舉例，我哋嘅巴士司機或者係車長平均一個星期工作四十四至四十六小時，喺法例之下佢哋可以工作長啲嘅，但係佢哋唔會，因為營辦商都係關心到咁樣做對安全嘅影響。

其實做一間大嘅營辦商嘅總裁，當佢喺上任嘅時候，2008年就係將當時嗰個嘅平均工作時數，四十八降到去四十四至到四十六，喺後來嗰四、五年之間做得到嘅，而大部分嘅墨爾本承辦商都係大概一周就係定四十五駕駛小時嘅。

主席：（經傳譯員）最高可以容許嘅，每個星期駕駛幾多小時呀？

MR JOHN STANLEY：（經傳譯員）佢哋可以去到七十二嘅，我哋覺得就唔係幾好。

主席：（經傳譯員）你嘅證供就係話因為關乎到安全嘅職責，所以佢哋認為應該駕駛小時係下降？

MR JOHN STANLEY：（經傳譯員）冇錯。營辦商都係非常之明白嗰個編更嗰個要求嘅，譬如話有一個嘅承辦商就係喺一個五又四分一小時嘅更裏面係畀多咗三十五分鐘，因為就都會計可能有交通阻塞，就會影響行車時間，佢哋就唔想佢超過五又四分一嘅小時，根據我哋嘅法例，因為呢個係你最高有休息之下連續揸車嘅時數，如果同佢哋講，佢哋一定最關心嘅就係可能導致對於安全嘅影響、一啲嘅後果，如果有一個人因為揸車時間太長，會唔會係會撞死另外一個人呢咁。

陳先生：（經傳譯員）好喇，講到責任鍊呢個問題，你當然下面係有好一層嘅法律責任同義務，就解釋點解你係唔需要特別嚟到話係有啲乜嘢嚟到去獎勵、鼓勵佢哋係注重安全嘅？

MR JOHN STANLEY：（經傳譯員）係。

陳先生：（經傳譯員）喺香港，我哋就有呢啲嘅法例嚟到--喺法律方面係有要求到確

1 保安全嘅責任嘅，你覺得係咪更加重要應該係喺其他嘅方面嚟到去獎賞安全  
2 呢？

3 MR JOHN STANLEY：（經傳譯員）我覺得呢個係一個好嘅方法嘅，but 就應該唔夠  
4 好似我哋咁有一個責任鍊同埋有一啲嘅法例規定安全方面係咁有效嘅。我就覺  
5 得如果你係想用一啲賞懲嘅制度嚟到促進安全，就會去番我正話所講，要確保  
6 呢啲嘅賞罰都係會適用喺好幾方面嘅，凡係有機會影響安全表現嘅人應該都要  
7 受制，呢個就係其實想建立一個嘅責任鍊。

8 主席：（經傳譯員）可唔可以話畀我哋聽喺嗰個法例方面係點樣嚟到令到維省係有安  
9 全嗰個嘅職責？

10 MR JOHN STANLEY：（經傳譯員）係呀，嗰個法例嘅做法，就係主席，全國嗰個嘅  
11 法律就係我自己係有份參與嘅，就係嗰個嘅國家道路安全委員會，我哋而家有一  
12 個國家道路安全委員會，亦都有一啲重型車輛嘅全國法律，就係會喺省嗰個  
13 嘅層面係實行嘅。

14 唔係所有嘅省都有一個巴士安全法好似我哋咁嘅，維省同埋新南威爾斯，呢  
15 兩個最大嘅省就係喺呢一方面就係行得最前嘅，喺 10 月 1 號今年就會係開始㗎  
16 喇。我諗喺儘可能嘅情況之下，自從 2009 年呢個國家嘅法律已經係會開始嘅，  
17 我哋 10 月 1 號會開始，我覺得而家嗰個全國嘅法律已經係追上咗我正話所講嘅  
18 巴士安全法呢一方面嘅水平。

19 主席：（經傳譯員）用咗幾多年先至可以達到呢個嘅程度呢？

20 MR JOHN STANLEY：（經傳譯員）我諗就都要三、四年。當我係呢一個巴士協會嗰  
21 個總裁，2009 年有呢個法例，當時我 1999 年至 2008 年係擔任呢個角色，呢  
22 一個嘅法例同埋係將嗰個業界嘅意見就擺埋落去去發展呢一個嘅法例，就係我  
23 自己當時有份參與嘅。

24 喺我第一份嘅文件，我就話主要或者係部分原因係業界接受政府好大程度嘅  
25 財政資助，我哋亦都係想更加係主動咁樣喺安全方面令到佢哋成為好嘅企業公  
26 民，我哋係好主動嘅，亦都希望呢一類型嘅安全法例係可以係繼續，亦都希望  
27 佢哋係符合嘅。

28 主席：（經傳譯員）香港就情況唔係咁喇。

29 MR JOHN STANLEY：（經傳譯員）冇錯。但係如果你睇下啲好簡單嘅指標，譬如每  
30 百萬行車公里嘅意外率，我哋香港同埋倫敦都有墨爾本咁好，其中一個原因可  
31 能係因為我哋有呢一條嘅法例；另外一方面，亦都可能係個經營嘅環境，喺香  
32 港同埋倫敦係--佢哋係好過香港同埋倫敦嘅。

33 陳先生：（經傳譯員）呢度係有另外一個因素，如果我講錯咗，你可以更正。就係你  
34 哋有一個係好大嘅補貼，另外係成本增加亦都係可以增加佢哋嘅利潤嘅，任何  
35 嘅成本增加都可以轉嫁畀政府嘅？

1 MR JOHN STANLEY：（經傳譯員）冇錯，你講得啱。不過亦都--即係話政府係可以  
2 好緊密咁樣監察任何可能係增加成本嘅一啲事情，呢一個可以從一個安全嘅角  
3 度去睇嘅，譬如話喺過去三、四年，我哋都係有一啲人係譬如襲擊或者係辱罵  
4 司機嘅，喺呢一方面就引致我哋就加咗一啲安全嘅罩，亦都有一啲嘅閉路電  
5 視，去處理呢個問題，政府同埋呢一個承辦商都係大家作負擔咗部分嘅成本  
6 嘅，呢個都洽商出嚟嘅結果。

7 羅先生：（經傳譯員）去建議同埋改善呢一個呢一個巴士--增強呢個巴士安全法會有  
8 啲咩嘢人係抗拒嘅呢？有啲咩嘢反對呢？

9 MR JOHN STANLEY：（經傳譯員）即係邊個會反對呢啲嘅法例呀？

10 羅先生：（經傳譯員）係。

11 MR JOHN STANLEY：（經傳譯員）我就諗唔到有咩嘢人會反對嘅，可能巴士營辦商  
12 或者會反對，因為喺呢個法例之下佢哋就要問責。但係我哋嘅墨爾本嘅巴士營  
13 辦商就好支持呢個法例，佢哋亦都係支持認證嘅，呢個認證制度。我諗一啲主  
14 要嘅因素就係佢去實行咗呢啲嘅要求之後，佢哋知道或者佢哋相信就可以改善  
15 到佢哋嘅安全表現，譬如話佢令到墨爾本成為一個大家去工作、出行都係更加  
16 好嘅地方，因為巴士司機駕駛係會更加嘅安全，我睇唔到有咩嘢人會反對嘅，  
17 因為嗰啲最可能反對嘅人可能係佢哋都係會有好處嘅。

18 羅先生：（經傳譯員）但係嗰啲變咗要係有多啲嘅責任同埋義務嘅人，佢哋會歡迎咁  
19 嘅制度咩？

20 MR JOHN STANLEY：（經傳譯員）因為佢哋諗佢哋可以嘅表現只要達到呢啲嘅責  
21 任，佢哋就係好滿意㗎喇，所以佢哋可以加強佢哋喺業界嗰個嘅地位，就亦都  
22 畀人睇到佢哋係一個負責任嘅業界，所以其中一個好處就係我哋有一個非常  
23 之強嘅業界協會，我哋可以係代表業界嚟發聲，唔係個別嘅營辦商發聲。

24 主席：（經傳譯員）當然呢度亦都係有一個經濟嘅利益，因為加強咗安全之後，因為  
25 意外都係會引致有金錢損失嘅。

26 MR JOHN STANLEY：（經傳譯員）係呀。

27 主席：（經傳譯員）呢個對於巴士營辦商都有好處嘅。

28 MR JOHN STANLEY：（經傳譯員）冇錯，主席。

29 陳先生：（經傳譯員）喺呢一方面，我哋就係收到一份嘅報告，就係話有人反對係用  
30 獎勵嘅制度嚟到去促進安全嘅，可唔可以請你喺呢一方面表達下意見？

31 MR JOHN STANLEY：Mm-hmm.

32 陳先生：（經傳譯員）我哋而家就去專家報告嘅第 153 頁，呢個就係 Mike Weston  
33 先生嚟到做嘅一份報告，佢就係一個交通乘客嘅顧問，佢就係個專長就係倫敦

1 嘅巴士制度。153 頁嘅最底嗰度，我想講嘅就係用獎勵嘅形式去改善安全，呢  
2 一段嗰個大題目，8.5。

3 我讀一讀，「喺 6.1 段其中一個大倫敦嗰個嘅運輸委員會就係有一個建  
4 議，就係去『改善佢高級員工嗰個獎賞制度，就係有一個嘅直接嘅連繫，就係  
5 巴士安全同埋表現有關嘅付款。』喺嗰個嘅報告書裏面就有建議，就係『而家  
6 嘅巴士營辦商就係冇用錢嚟到去獎勵安全，呢個應該係要修改嘅。』咁同呢一  
7 個倫敦嘅巴士營辦商傾過之後，好明顯營辦商係唔支持直接用錢嚟到去獎勵安  
8 全嘅，即係喺嗰個合約裏面，承辦商就覺得直接咁樣用金錢嚟到去獎賞就會係  
9 引致一啲錯誤嘅行為，特別喺比較低層嘅--公司嘅低層，包括就係會鼓勵佢哋  
10 係唔匯報或者係唔舉報一啲嘅意外嘅，就覺得如果將兩者相連，就會令到佢哋  
11 唔願意同其他嘅營辦商喺安全嘅問題上面係嚟到合作，因為呢個係會有一個嘅  
12 競爭嘅商業方面嘅利益考慮嘅，咁即係話如果用錢嚟到去獎勵安全，佢哋覺得  
13 唔係一個積極嘅行為。」

14 佢就話有兩個可能嘅風險，第一，就係變咗有關嘅事就係會唔舉報，有一個  
15 趨向；另外就係會減少咗巴士營辦商之間嗰個合作，你呢一方面又有咩嘢嘅睇  
16 法呢？

17 MR JOHN STANLEY：（經傳譯員）我都承認呢個係有一個風險嘅，如果你可能係會  
18 鼓勵人哋有事唔報嘅，但係我諗亦都係可能佢哋會設計一個嘅監察制度同埋合  
19 規嘅保證嘅制度，確保唔會咁樣發生，例如喺我哋呢一度，運輸安全署署長就  
20 係嗰個成個制度嘅批核者，佢係一個嘅獨立人士或者係機構，佢會有一個嘅法  
21 定嘅指引，要佢係幫承辦商認證，亦都確保佢哋符合呢一個認證規度裏面嘅條  
22 款，包括係有事係需要匯報嘅。

23 如果你設計一啲賞罰嘅制度，你要確保你係預防到呢個風險，可能係好難做  
24 到嘅，但係我哋都係要去試下嘅，咁去試下呢個制度，去睇下可唔可以處理到  
25 呢個風險，我哋有呢一個咁樣嘅署長就係好似我哋呢個制度嘅一個裁判或者係  
26 批核人咁樣。而家話唔願意...

27 陳先生：（經傳譯員）唔係，你未講下一個事項嘅時候，我哋想再講多啲第一個事  
28 項，就係遇事不報。

29 MR JOHN STANLEY：（經傳譯員）係。

30 陳先生：（經傳譯員）你嘅證供就係話遇事不報或者係傾向唔報嘅呢一個風險就可以  
31 有一個--你點樣處理呢？就係有一個可靠嘅制度去確保呢啲嘅數據係能夠係準  
32 確咁樣係收集得到同埋記錄得到，我理解唔唔唔？

33 MR JOHN STANLEY：（經傳譯員）係，我哋就要睇下有咩嘢方法，你要睇下可唔可  
34 以達到呢一點，而我哋可以用一啲嘅程序去處理呢個問題嘅。

35 陳先生：（經傳譯員）某個程度嚟講，係咪話喺呢個數據收集方面係盡量機械化同埋

1 減少人嘅參與呢？

2 MR JOHN STANLEY：（經傳譯員）呢個亦都可以將一啲嘅數據庫同事件同埋意外嚟  
3 到連貫起嚟，可以係有唔同嘅渠道嘅，...

4 主席：（經傳譯員）我就係諗緊點解可以話係唔報呢啲意外呢？因為有好多方係涉及  
5 㗎嘛，譬如話司機、乘客、警方等等，甚至乎係呢一個救護車嘅，你點可以話  
6 大家聯合唔報嘅呢？

7 MR JOHN STANLEY：（經傳譯員）你諗下譬如有一啲細路仔向一架巴士掙石，掙啲  
8 石頭，如果你係嗰個嘅營辦商，你會喺一個有賞罰為基本嘅制度，即係關於意  
9 外方面嘅事項，你就會諗「我哋就唔好理呢件事，我哋唔去匯報。」其實佢已  
10 經掙爛咗窗或者係傷咗，甚至係令到嗰個司機死亡，或者係可能係令到某啲嘅  
11 人死亡。

12 主席：（經傳譯員）呢個嘅制度就係你嗰個嘅錯誤係唔擺落去個方程式嗰度，有一啲  
13 嘅人係可能有--呢個可能係刑事嘅行為，你可以懲罰佢。

14 MR JOHN STANLEY：（經傳譯員）係呀。

15 主席：（經傳譯員）呢個係有辦法去處理嘅。

16 MR JOHN STANLEY：（經傳譯員）我哋而家係講緊一啲嘅準則，我哋係要點樣控  
17 制。

18 主席：（經傳譯員）係。

19 MR JOHN STANLEY：（經傳譯員）你講到呢點啱喇。

20 主席：（經傳譯員）如果我記得啱呢，有四十二個元素喺倫敦嗰個評估裏面，就係話  
21 嗰啲嘅巴士比欺凌或者係凌辱嘅，點解將佢--點解話唔會報畀巴士公司聽或者  
22 點解係會嘅呢？

23 MR JOHN STANLEY：（經傳譯員）呢個係好重要嗰個嘅訊息，如果你唔去做呢啲，  
24 你就會畀人哋係喺安全方面係有一個罰款嘅。我哋要有一啲嘅創意思巧，呢個  
25 係唔容易嘅，但係如果你睇下其他嘅安全制度方面其他嘅方法，有一個責任鍊  
26 嘅問題，就係有冇一個係遇事不報嘅問題。

27 陳先生：Sorry, I interrupted you there. Please continue to deal  
28 with the second issue.

29 MR JOHN STANLEY：（經傳譯員）譬如話喺一個競投制度入面，有個營運商本身有  
30 個好嘅安全步驟，你會認為就係話佢會有傾向就係話支持你所講嘅，而係唔會  
31 去分享呢啲資訊畀其他營運商。呢啲我唔認同，我諗譬如話呢啲係同個競投制  
32 度有關，而唔係同呢個安全指標有關。喺個競投制度下面，呢啲營運商一般都  
33 唔想合作，因為就唔想畀人知道佢嘅競爭優勢。而如果安全就係一個佢哋嘅競

1 爭優勢，就更加唔想同人哋分享。

2 要解決問題嘅方法，倫敦嘅報告，我認為有一項好重要嘅，其中一個要點就  
3 係需要唔同營運商更大合作，同埋政府同埋營運商更多合作喺個安全事宜方  
4 面，喺我嘅報告第二部分方面亦都係有提到嘅。

5 主席：（經傳譯員）雖然就係話營運商之間可能有咩嘢直接合作，譬如話倫敦方面係  
6 有啲個 Transport for London 就從個官方啲方面，譬如話有個營運商，譬  
7 如話啲個神眼系統，本身係去減少咗個追撞嘅意外，呢啲係個監管當局會留意  
8 到，我哋營運商 A 有個好好嘅結果，然後之後就會將呢啲嘅資訊畀其他營運商？

9 MR JOHN STANLEY：（經傳譯員）我哋希望係咁，主席，譬如話情況就係有獎有罰  
10 嘅情況，都要可以安裝呢啲科技，然後從中得益嘅。我哋就唔係話好明個第  
11 二點。

12 陳先生：（經傳譯員）講番個營運商嘅獎勵方面，講到譬如話睇番有冇獎勵安全措施  
13 嘅延伸利益，如果啲個安全表現係有關嘅獎勵制度，會唔會係有潛質可以去鼓  
14 勵政府去留意番啲個安全有關嘅係即效指標？因為而家係有一個額外嘅焦點同  
15 埋個財政後果。

16 MR JOHN STANLEY：（經傳譯員）你認為會係作為一個步驟嘅後果，首先就係已經  
17 係需要去決定啲獎勵同罰則係點樣，所以啲個運輸部門本身係需要去深入去  
18 同啲專營巴士營運商去討論去建立呢啲嘅即效指標，就延伸到個問題，就係話  
19 你點樣去過程上監察，同埋需要有一個更強力嘅監察同埋評估制度個步驟。

20 陳先生：（經傳譯員）教授，而家我哋去另外一個範圍，就係個認證呢方面，一般嚟  
21 講，喺你嘅報告入面，巴士營運商認證係墨爾本巴士嘅中央重要部分，基本上  
22 如果佢未認證嘅話，就唔可以去營運嘅，而家係可能就係話呢啲認證就可能要  
23 改變。

24 而家我哋係去睇番文件夾方面，第 9 頁，你嘅報告第 9 頁，第一部分嘅第  
25 9 頁，我首先會提及番啲三段，「巴士營運商認證，作為一個制度去確保就話某  
26 個人係可以提供一個安全有效率嘅巴士服務，就有三個元素，係畀巴士同埋旅  
27 遊巴、營運者嘅運輸管理課程，由 Monash 大學舉辦嘅，個範圍主要係譬如話  
28 啲個營運商提供嘅服務同埋一個每個合約嘅定線服務，高級員工就需要去完成  
29 個課程，就有四個單元嘅，其中一個就係巴士營運商安全風險管理，其中包括  
30 課題就係規管同法律架構、財政管理同埋商務擴展，另外一個就係管理資訊系  
31 統，第三個就係維修管理系統。

32 喺 3.3 部分提及，呢三個元素係獲認證，巴士營運商嘅主要規管元素，而  
33 個安全嘅重點係主要係過去十年係大大加強，主要集中在去建立認為係一個安  
34 全風險管理文化。

35 而呢個巴士營運認證系統主要係個報告嘅主要焦點，因為作者認為主要比起

1 墨爾本同埋香港之間係一個最重要嘅單一分別，喺上文提及，維多利亞嘅定線  
2 巴士運作個機制係一個特別對呢啲嘅安全議題發展特別重視嘅，所以就睇番呢  
3 啲嘅一般營運。」我就對於嗰個管理資訊系統同埋維修管理系統嘅重視。

4 而家我哋去第 25 頁，去提及呢兩個嘅系統，最後嗰段，我就讀番上半段，  
5 「BusVic 係好積極咁樣去建立維省嘅巴士營運商認證制度，例如佢--個課程  
6 內容係提供咗畀 Monarsh 大學方面，就係嗰啲認證--營運商一定要去完成嘅，  
7 最緊要就係佢有一啲嘅範文回應佢關於管理資訊系統同埋維修管理系統嘅要  
8 求，係根據 ISO 39001 嘅，因佢令到佢嘅會員能夠建立同埋執行安全風險管理  
9 系統去符合認證制度嘅要求，只要佢係盡力去應用。」

10 我見到嗰個認證系統同埋 ISO 39001 嘅聯繫，之後我會再提及番。首先，  
11 你可唔可以總括嚟講，你可唔可以形容嗰啲巴士營運商認證系統嘅主要好處，  
12 特別係關於巴士安全呢？

13 MR JOHN STANLEY：（經傳譯員）呢個營運商認證主要係關於安全，主要就係佢哋  
14 就係個認證系統嘅背後根本理據，就係確保就係營運商佢提供安全嘅服務，同  
15 埋就唔會有--所以意外就係呢啲認證係由嗰個運輸交通總監提供嘅，所以佢就  
16 「係，嗰個人就話係呢個人係可以係成為一個認證合格營運商。」所以就可以  
17 合資格去同政府建立合約。

18 而呢個維修嘅管理系統同埋嗰個管理資訊系統，呢兩個系統嘅範圍本身係由  
19 嗰個運輸署安全總監去決定。睇番嗰啲相關法例嘅條款，我本身啲文件都有提  
20 及到嘅，本身呢個運輸安全總監本身係會話畀個營運商佢哋要做啲乜嘢同埋佢  
21 對佢哋嘅期望係乜嘢，同埋佢要睇到啲乜嘢，譬如話佢哋嘅管理同埋維修系  
22 統方面，同埋個管理資訊系統方面，譬如話我睇番我文件入面所提及嘅，譬如  
23 話呢啲嘅管理資訊系統，呢啲譬如係佢巴士安全嘅管理方面，呢啲係由運輸安  
24 全總監去出版嘅，就係令到佢哋啲營運商確認，就係話佢哋有咩嘢期望，同  
25 埋如果佢哋認證咗之後，就係佢哋去引導佢完成個認證過程。

26 而之後個巴士行業協會，我哋之前擺喺個螢幕上，就基本上係會建立一啲範  
27 本回應畀佢哋會員去睇，同埋去定制，令到佢哋符合佢哋嘅維修管理系統同埋  
28 管理資訊系統，就係呢啲比較大嘅營運商，佢哋會度身訂度一啲，根據佢哋嘅  
29 營運情況，但係如果細嘅營運商，佢哋就基本上都會夠用嘅呢啲範文。

30 陳先生：（經傳譯員）如果我錯，你指正我，就係話呢啲嘅認證系統，就關於安全方  
31 面，主要係集中於嗰個風險管理方面同埋設立同埋去營運呢個系統去確保安  
32 全。其實點解我會去比較番嗰個譬如係 ISO 39001，可以睇番 39001 喺呢一  
33 段，我睇番你第二個報告，第 78 頁，喺中間嗰段，喺巴士車長訓練對上嗰段，  
34 我會讀一讀，然後再問一問。

35 「最後運輸部」--呢個係運輸局--「運輸署去參照番 ISO 39001 道路安  
36 全管理系統指出，就係話呢啲係有啲嘅車隊管理公司同埋物流公司，但係唔係  
37 畀個運輸監督採納。亦都係留意到，就係話維省嘅營運商管理系統亦都係參照

1 番 ISO 39001，然後所有嘅定線巴士營運商需要獲得認證，然後但係就有話  
2 要去，根據呢個標準，然後獲得呢個證書。」

3 喺香港，我哋就有呢個認證系統，同埋亦都係有一個競標系統，例如我哋要  
4 --如果我哋要求巴士營運商去達到 ISO 39001 會唔會好似墨爾本咁樣達到相  
5 同嘅安全利益呢？

6 MR JOHN STANLEY：（經傳譯員）你會期望就係話應該會令你去相當嘅改進，我認  
7 為就係話--要諗就係話嗰個交通安全嘅總監嘅角色、你要咩嘢機制，同埋你想  
8 嘅話，去確保合規，特別係應用香港嘅巴士營運，所以你會嗰個認證當局就  
9 會做嗰個 ISO 認證，同埋頒發證書，如果你鍾意嘅話，去確保就係話個符合期  
10 望。

11 我哋有呢啲咁嘅嘢，但係我哋有啲類似嘅嘢，但係如果我哋做嘅話，就會有  
12 一個運輸安全總監，就會去作為成個制度嘅監察者。我哋如果睇番就係話，做  
13 係一個好嘅提議。我會諗就係話如果有個角色，譬如話好似問責同作為一個獨  
14 立同埋一個問責嘅守護者去確保個系統有效。

15 陳先生：（經傳譯員）喺維省，嗰個系統安全嘅守護者去確保個營運者係有合適嘅風  
16 險管理系統就係嗰個運輸安全總監？

17 MR JOHN STANLEY：（經傳譯員）啱嘅。

18 陳先生：（經傳譯員）喺個 ISO 39001 嘅背景之下，呢個責任就係由嗰個認證公司  
19 去處理，去進行一個年度檢查--審查？

20 MR JOHN STANLEY：（經傳譯員）係。

21 陳先生：（經傳譯員）佢哋而家係會得到嗰個證書？

22 MR JOHN STANLEY：（經傳譯員）係。

23 陳先生：（經傳譯員）主席，而家我想去另一個題目，就係巴士安全嘅常設委員會。  
24 而家會唔會係一個合適嘅時間呢？

25 主席：（經傳譯員）而家會進行午膳，而家我哋會兩點半先返嚟繼續。

26  
27 下午 12 時 57 分押聆訊押後

28  
29 下午 2 時 30 分恢復聆訊

30 出席人士如前。

1 主席：（經傳譯員）下午好。係，陳律師。

2 陳先生：（經傳譯員）多謝主席。Stanley 教授，我就會開始去下一個題目，就係  
3 巴士安全常務委員會同埋運輸安全總監嘅問題，我會兩樣一齊處理。你今朝早  
4 都有提及運輸安全總監嘅角色就係點樣可以負責執行嗰個責任鍊嘅，我就會而  
5 家集中講各個方面。

6 首先，我哋睇番呢兩個建議，就係話可以變咗促進更加積極嘅做法去達致巴  
7 士安全，就唔係話比較被動咁做。或者首先，睇番你個報告有提及呢兩項建議  
8 嘅，首先，去到第 100 頁，就係專家文件夾嘅 100 頁，呢度你就列出你嘅主要  
9 嘅建議，大概喺頁嘅中間，第二點，嗰度第二點，你建議「設立一個獨立嘅運  
10 輸安全總監，佢嘅工作就係負責管理同安全責任，確保遵守同埋執行嘅事宜  
11 嘅」。即係話你建議設立一個運輸安全總監，就係確保安全責任鍊得以落實。

12 你亦都有講一點觀察，就係 99 頁底部嗰度，喺 99 頁底部，你就話「運輸  
13 安全總監，如果係獨立嘅話，就既可以提升安全，將佢成為一個係可取嘅政策  
14 成果，同埋亦都係提供一個獨立嘅問責嘅機制，亦都係有透明度去處理安全嘅  
15 程序同埋成效，就會超越一個政府部門或者係公共運輸管理機構所能夠做到  
16 嘅，而運輸安全總監佢嗰個審查嘅程序，同埋佢可以接觸到業界，就令到佢哋  
17 都達成一個結論，就係話譬如墨爾本咁樣，佢個定線巴士服務嘅做法係安全，  
18 咁就係可以達致到呢一點。」

19 呢個就係運輸安全總監可以做到嘅嘢，根據同一點，我哋又可以睇埋你另外  
20 一個建議，就係關於話巴士安全常務委員會，...

21 主席：（經傳譯員）或者喺你繼續之前，可唔可以幫我哋再認識多啲，就係運輸安全  
22 總監佢會得到啲咩嘢嘅支援服務，佢係咩嘢人？佢應該喺邊度嚟㗎？

23 MR JOHN STANLEY：（經傳譯員）喺墨爾本，就係 2010 年有一條嘅公共運輸整合  
24 法，喺嗰度出嚟就有呢個職位嘅，主要就係重組番嗰個架構嘅安排，可以喺維  
25 省嗰度就係提供到運輸服務同埋做規劃嘅，呢個法例亦都係設立咗一個機構，  
26 主要就係一個政策機構嚟嘅，佢之下面就成立咗兩個處理機構，就係處理公共  
27 運輸，同時亦都有一個獨立嘅職位就係運輸安全總監，即係維省嘅，因為佢哋  
28 想特別聚焦睇改善運輸空間嘅安全，要做到呢一點，就需要成立一個獨立嘅組  
29 織，所以呢一個方法就係最有力可以做到嘅方法嚟嘅，同時佢亦都有其他--即  
30 係變咗佢係喺譬如好似其他嘅方案以外嘅一個選擇嘅，譬如好似一個係公共運  
31 輸局咁樣，而且佢有獨立地位，亦都係會令到佢有空間可以去做到佢嘅工作。

32 主席：（經傳譯員）佢有啲咩嘢支援呀？

33 MR JOHN STANLEY：（經傳譯員）佢自己有一個機構，有職員嘅，我唔知道有幾多  
34 職員，但係有做研究嘅，亦都有做實地審查嘅，我純粹係估嘅啫，應該佢哋嘅  
35 職員人數大概係三、四十人，但係我之後可以畀番個答案你嘅。

1 主席：（經傳譯員）好，唔該。佢有啲咩嘢資歷呢？即係而家現任嗰位？

2 MR JOHN STANLEY：（經傳譯員）佢係安全風險管理嘅專家嚟嘅，佢嘅背景同埋經  
3 驗就係咁，主要就係因為個焦點係放喺安全管理嗰方面，所以佢就會係一個好  
4 適合嘅人選去做呢個工作，就可以應用佢嘅--佢原本係喺航空界嗰方面做安全  
5 管理嘅，但係亦都可以將佢呢方面嘅經驗同知識應用喺呢度，即係陸路交通嗰  
6 度。

7 主席：（經傳譯員）陸路交通係咪包括巴士、電車同埋火車？

8 MR JOHN STANLEY：（經傳譯員）係，但係佢亦都係巴士安全嘅總監嚟嘅。

9 主席：（經傳譯員）好，唔該。

10 陳先生：（經傳譯員）政府呢方面有冇咩嘢角色嘅呢？即係話係要要求嗰個安全行  
11 為，抑或係由呢個總監負責？

12 MR JOHN STANLEY：（經傳譯員）你可唔可以重複你個問題？

13 陳先生：（經傳譯員）就話政府有冇啲咩嘢角色扮演嘅呢？

14 MR JOHN STANLEY：（經傳譯員）政府主要就係定立呢個政策，制定嗰個政策框  
15 架，就係關於處理安全嘅，然後就由安全總監去執行有關嘅政府嘅政策。

16 我喺我嘅--我諗係我第二份報告裏面，就我有加一幅圖，就顯示到嗰個架  
17 構嘅，應該係第 71 頁，就係喺香港同埋墨爾本，我將佢分為三類，因為好多時  
18 候，我哋講話架構設計都係咁樣睇呢三類，就第一，就係嗰個政策層面--即係  
19 或者策略層面，第二個就係執行層面，第三就係營運嗰個層面。

20 喺香港同墨爾本，如果喺執行層面，香港就有運輸署，澳洲就有一個公共運  
21 輸署，然後去到--而喺最頂，即係策略層面，就係香港就係運房局，墨爾本就  
22 係有維多利亞運輸局。中間嗰層，跟住最底嗰層營運嘅層面，香港就係專營巴  
23 士營辦商，墨爾本就係合約巴士營辦商。

24 主席：（經傳譯員）唔好意思，我流鼻血，要暫停一陣。

25

26 下午 2 時 39 分押聆訊押後

27

28 下午 2 時 50 分恢復聆訊

29 出席人士如前。

30

1 主席：（經傳譯員）對唔住，唔好意思。不過我哋而家就可以係恢復正常喇。

2 陳先生：（經傳譯員）好，教授，未小休之前，你就係比較緊香港同埋墨爾本嗰個嘅  
3 架構嘅，你嘅觀察就係香港有一個嘅特定安全部門，即係有一個專責嘅安全部  
4 門，同一個話題，喺第 70 頁，即係喺呢一個圖表嘅前一頁，喺第三段，你就係  
5 做咗一啲觀察嘅，就香港嗰個嘅制度，喺最後一句，你就話「但係因為有一個  
6 獨立嘅安全規管機構喺香港，就似乎就係相對嚟講，係減低咗大家對於安全問  
7 題嗰個嘅注重嘅。」呢個係咪你嘅觀察呢？

8 MR JOHN STANLEY：（經傳譯員）係。

9 陳先生：（經傳譯員）而家講到呢個常務委員會嘅建議，就係第 94 頁，專家報告嘅  
10 94 頁，喺 94 頁最底嗰度，第 6 點，你就建設成立一個常務委員會，係關於巴  
11 士安全嘅，就起碼一年要開會兩次嚟到去覆檢同埋去評估最新嘅關於巴士安全  
12 嘅技術，特別就係定線嘅巴士營運，就建議政府一啲應該採用嘅安全需求嘅，  
13 關於巴士嘅車隊同埋其他巴士系統，新成立嘅加強專營巴士安全嘅專責小組就  
14 可以成為呢個基礎，但係裏面嘅成員可以係擴闊啲去包括埋其他嘅巴士經營者  
15 嘅。

16 我明白呢兩個嘅做法，即係要建立一個常務委員會同埋呢一個嘅運輸總監就  
17 係會係令到我哋更加主動積極咁樣去處理巴士安全嘅事？

18 MR JOHN STANLEY：（經傳譯員）係，我相信喺咁嘅情況，係嘅，呢一個常務委員  
19 會就係去確保有一個恆常嘅對話，就係有關嘅方面都可以係對巴士安全有一個  
20 影響嘅，都可以繼續係討論，譬如話巴士嘅製造廠、售後嗰個嘅零件供應、政  
21 府、大學等等都有一個角色，呢個就係要建立一個協作嘅架構，我就覺得呢個  
22 好重要嘅，我哋就係倫敦嘅 Mr Weston 先生所講嘅。

23 我哋喺墨爾本有呢一個國家層面嘅安排，就係有呢一個國家嘅重型車輛法，  
24 亦都可以適用於巴士，呢一個係一個好好嘅、開放嘅做法去確保成個嘅業內都  
25 係知道可以有咩嘢可能性嘅，我都係注意到有一啲嘅證供話，特別係口頭嘅證  
26 供，就係有一啲細啲嘅營運商，專營嘅巴士營運商就話佢有咁樣嘅資訊，即係  
27 關於有咩嘢最新嘅技術可以改善安全，我覺得呢個就係確保到每一個人都可  
28 以得到好啲嘅資訊，喺一個好快速，即係相當迅速嘅時間得到呢啲資訊，就唔  
29 好要等到有意外發生先至回應嘅。

30 主席：（經傳譯員）係應該係要主動，而唔係被動形式？

31 MR JOHN STANLEY：（經傳譯員）冇錯。

32 主席：（經傳譯員）呢個就係可能呢個工作小組係咪就係一個只係因為有嘢而要去應  
33 對？

34 MR JOHN STANLEY：（經傳譯員）係嘅，要咁大型嘅災難，好似 2 月咁，你就知道  
35 有咁樣嘅反應。

1 主席：（經傳譯員）但係有反應都好過冇反應㗎。

2 MR JOHN STANLEY：（經傳譯員）冇錯。

3 主席：（經傳譯員）最好就係可以係積極主動㗎。

4 MR JOHN STANLEY：（經傳譯員）冇錯，我覺得要持續咁樣有一個積極主動嘅做  
5 法，由呢個工作小組，我覺得需要擴闊佢嘅成員，我見到工作小組就初初處理  
6 嘅事項個範圍係比較窄嘅，我覺得呢個都係可以理解嘅。因為喺呢個 2 月個  
7 事件個嘅回應，但係向前望，我諗我哋可以褪後一步話邊啲係最重要嘅關鍵  
8 嘅位置，就係要去改善。我哋特別講到係技術，因為我哋要喺多啲關注無論係  
9 營運、工作、揸車、疲勞呢個問題，特別係巴士安全，係點樣用技術嚟到去處  
10 理。

11 主席：（經傳譯員）當你話其他嘅巴士營運者，係咪話所有嘅巴士營運者都係呢一個  
12 工作小組嘅成員？

13 MR JOHN STANLEY：（經傳譯員）係，我諗唔係淨係啲啲大嘅經營者，係細嘅經營  
14 者。

15 主席：（經傳譯員）即係佢哋會唔會係專營巴士營運商？

16 MR JOHN STANLEY：（經傳譯員）係，但係唔只淨係啲啲大嘅營運商，細嘅都要包  
17 埋。

18 主席：（經傳譯員）我哋香港有六個嘅專營權，有五個嘅專營經營商，佢哋全部都係  
19 有代表坐喺呢個常務委員會嘅，但係有一啲嘅細啲嘅機構或者係小巴嘅機構好  
20 似係冇包括，你係咪應該加埋佢哋？

21 MR JOHN STANLEY：（經傳譯員）我覺得係，譬如百分之零點一至到二嘅，都係佢  
22 哋佔咗呢個市場佔有率嘅，因為你有幾百萬嘅乘客嘅，每一日，比起呢一個專  
23 營嘅巴士經營商，我覺得佢哋喺啲個市場都係有一定嘅位置，所以佢哋應--即  
24 係譬如如果佢哋想去搭巴士，佢哋都應該係有權利係表達佢哋對於安全水平個  
25 個期望嘅，無論係邊個提供服務都好。

26 主席：（經傳譯員）可能你都知道，我哋對於小巴要求嘅安全水準係同專營巴士有唔  
27 同嘅。

28 MR JOHN STANLEY：（經傳譯員）係，但係都唔代表我哋唔可以用最好嘅技術嚟到  
29 畀不同類型嘅車種，等大家有個持續一個對話，我就覺得應該成個業界裏面都  
30 有呢啲嘅對話，唔係淨係啲啲大嘅經營商先至係參與其中嘅。

31 主席：（經傳譯員）但係而家呢個工作小組就有包埋啲啲工會嘅，你覺得我哋係咪應  
32 該要加埋落去呢？

33 MR JOHN STANLEY：（經傳譯員）表面上嚟睇，我覺得我係支持嘅，當然我哋喺澳

1 洲係都有咁樣嘅方向嚟到去處理嘅。

2 主席：（經傳譯員）唔該。

3 羅先生：（經傳譯員）呢個常務委員會，你覺得係咪應該係諮詢性質呢？應唔應該有  
4 咩嘢法定嘅效力呢？

5 MR JOHN STANLEY：（經傳譯員）我覺得應該係對於政府係諮詢性質係好喇，特別  
6 係嗰個嘅負責嘅——問責局長，但係就有咩嘢法定嘅權力，不過最好佢嘅研究、  
7 佢嘅討論、佢嘅一啲嘅結論都係可以公開嘅。

8 羅先生：（經傳譯員）如果話我哋嘅運輸署有一個嘅部門，可以叫做運輸安全，同你  
9 哋維省嗰個係分開嘅或者一個平衡嘅，兩者有咩嘢分別呢？

10 MR JOHN STANLEY：（經傳譯員）佢哋嘅角色係唔同嘅，呢個運輸安全總監，佢嘅  
11 角色主要就係要去實施一條特定嘅法例，而常務委員會就係去改善有關嘅知  
12 識、意識，係等業內裏面更加知道有不同嘅科技就可以應用，等佢哋大家都係  
13 喺買車嘅時候可以去考慮，譬如，呢個都係提高意識、協作同埋係喺業界係提  
14 高佢哋嘅認知，呢個就唔同話係去實行一個行政嘅架構去確保呢一個嘅法律係  
15 達到佢嘅目的嘅。

16 羅先生：（經傳譯員）我諗我問題就係問你點解要一個獨立嘅運輸安全嘅總監，而唔  
17 係公共運輸嘅一部分？

18 MR JOHN STANLEY：（經傳譯員）公共運輸喺你哋度就係運輸署，就係有多重嘅目  
19 的嘅，佢哋要有好多嘅目標要達到，安全係其中之一，但係唔係唯一，所以而  
20 家個問題就係優次嘅問題，可能佢未必會將安全擺喺最高嗰個嘅次序，例如話—  
21 —我唔係話而家個情況係咁，但係我只係話如果我哋有一個嘅總監或者一個機構  
22 係要有多種嘅目的嘅話，佢就會有時有啲取捨，可能令到安全係有所犧牲，如  
23 果你覺得安全係一個好重要嘅問題，最好就係將佢提高到去一個非常之高嘅優  
24 先處理嘅位置，就係有一個獨立嘅機構嚟到係負責任嘅，係獨立，而且係——...

25 主席：（經傳譯員）真係要獨立嘅，分開嘅？

26 MR JOHN STANLEY：（經傳譯員）係，特別重要係要獨立嘅。

27 陳先生：（經傳譯員）正話，教授你就講到嗰個工作小組嗰個嘅範疇，或者我而家就  
28 係想睇一睇嗰份嘅文件，係講到嗰個工作小組嘅範疇嘅，我想請你睇九巴文件  
29 12 第 4867 頁，呢份嘅文件就話畀我哋聽呢個工作小組嘅工作範疇，佢係要係  
30 改善專營巴士嘅安全，呢一段就話呢個工作小組係喺一宗交通意外之後...

31 主席：（經傳譯員）或者你講番呢一份文件嗰個背景。

32 陳先生：（經傳譯員）呢份嘅文件係一個附件嚟嘅，係佢哋呢一個工作小組第一次會  
33 議嘅會議紀錄嘅附件，第一頁就係喺 4859，呢個就係佢工作小組嘅第一次會議  
34 嘅會議紀錄。

1 主席：（經傳譯員）唔係應該講一講個議程咩？個議程係咪第一次會係 3 月 12 號。

2 陳先生：Yes.

3 主席：（經傳譯員）因為我想你知道啲事情發生嘅時序。呢個工作小組佢就係好快咁  
4 樣就係開咗會，好快咁做咗一啲嘅建議，呢個就係一個採取主動嘅做法定係被  
5 動嘅做法嗰個嘅分別，同埋係主動嘅做法嗰個好處。

6 喺好早期，我哋就其中一個巴士營運商界咗一個議程我哋，我哋而家就係睇  
7 到佢哋嗰個有經刪減嘅會議紀錄。

8 陳先生：（經傳譯員）黃女士係向我提出城巴文件 588 頁。

9 主席：（經傳譯員）城巴 1、1A 定 1B 呀？

10 陳先生：（經傳譯員）城巴 3，城巴 11--係第 588 頁。

11 主席：（經傳譯員）擺佢上網。

12 陳先生：（經傳譯員）我哋而家喺屏幕上見到第一次會議嘅議程，呢個工作小組係第  
13 一個會議，2018 年 3 月 13 號舉行嘅，而部分嘅議程就係去討論呢個工作小組  
14 嗰個嘅範疇同埋委員...

15 主席：（經傳譯員）除咗 3 月 13 號嗰度，呢一份文件有冇日子㗎？

16 陳先生：（經傳譯員）呢份文件冇嘅。

17 主席：（經傳譯員）3 月 13 號就係嗰個嘅議程，亦都係佢哋第一次嘅會議，跟住就  
18 會帶到我哋去第 4867 頁，係咪呀？

19 陳先生：（經傳譯員）係，4867 頁嗰個文件，就係工作小組嗰個範疇。

20 主席：（經傳譯員）為我哋謄本嘅緣故，或者你去讀出啲同你嘅問題相關嘅段落，  
21 好唔好？

22 陳先生：（經傳譯員）第一段就話「喺 2018 年 2 月 10 號大埔道涉及一宗九巴公司  
23 嘅交通意外之後，就建議成立一個工作小組去檢討同埋研究一啲嘅措施去進一  
24 步改善、加強巴士嘅安全。」呢一個工作小組嘅範圍或者工作範疇就係要回應  
25 一啲嘅意外嘅，呢一個工作小組嘅範疇，第一，就係要去檢討同埋加強訓練嘅  
26 安排，第二，就係研究安全帶嘅問題，第三，就係去探討一啲技術嘅可能性，  
27 成本效益，是否可以應用嘅，同埋其他嘅事項，就係包括喺呢個車上面安裝一  
28 啲安全嘅裝置。

29 如果你話係一個主動嘅做法㗎講，你會預期呢啲嘅事項應該係意外之前㗎，  
30 抑或係之後㗎到去發生嘅呢？

31 MR JOHN STANLEY：（經傳譯員）呢啲嘅嘢係應該係理所當然喺議程上面出現，就

1 係回應當時嘅情況嘅，但係當時嗰個嘅回應同埋種種嘅關注，你可以明白呢啲  
2 嘅事項係會即刻擺喺議程上面嘅，因為佢係要回應當時發生嘅事，但係喺呢一  
3 次嘅事，即係單一嘅會議就係唔能夠做得太多，應該係要持續嘅。你會想呢啲  
4 嘅事項係持續擺喺議程上面，嚟到係可以係預防某啲嘅問題嘅。

5 陳先生：（經傳譯員）如果喺一個會議係用一個積極嘅做法，你會唔會期望委員會嘅  
6 工作範圍要包埋呢啲嘅嘢嘅呢？巴士安全同埋嗰啲三項提到嘅呢？

7 MR JOHN STANLEY：（經傳譯員）係呀，我覺得我已經建議——喺我報告嘅建議有一  
8 個以技術為本嘅委員會，另外一個就係要專注訓練嘅，呢個就係呢度第一點。  
9 我認為技術委員會就其實可以係有佢自己嘅議程，就係到底向前望要有啲咩嘢  
10 嘅措施我哋應該要預期同埋要計劃下點樣係最好嘅方法去改善巴士安全，當然  
11 亦都係有一系列嘅措施喺呢度列咗出嚟，歐洲嗰個嘅過程就係佢哋係而家係睇  
12 緊下一輪應該有啲咩嘢強制性嘅要求，同埋要包括啲乜嘢嘅項目，我覺得如果  
13 你係要積極、主動、向前望嘅委員會，應該係要處理晒，加埋呢個歐洲方面嘅  
14 議程，去評估一下佢對香港係咪適用。

15 亦都喺我第一個報告，我都係有提到其中一啲嘅項目係關於而家喺歐洲進行  
16 緊嘅討論，我就寫低晒作為資料畀你參考，亦都有其他嘅項目，例如一啲嘅技  
17 術，你期望一個委員會係可以話「呢啲喺香港係咪有冇角色嘅呢？喺嚟緊三年  
18 有冇角色嘅呢？」就同所有嘅持份者嚟到傾嘅。

19 主席：（經傳譯員）你會唔會期望一個積極、主動嘅委員會就會係喺其他嘅司法管轄  
20 區會做緊啲咩嘢呢？

21 MR JOHN STANLEY：（經傳譯員）係會咁做嘅。

22 主席：（經傳譯員）你話譬如歐洲嗰方面，我哋知道嘅，就係有一個嘅報告，係  
23 Weston 先生都係做緊，喺倫敦，係咪都係倫敦㗎？

24 MR JOHN STANLEY：（經傳譯員）係呀。倫敦嘅運輸署就係自己做咗好多嘅調查  
25 嘅，佢哋嘅「標準巴士」，我諗佢哋咁樣叫喇。我覺得我睇嚟幾好嘅。最後，  
26 香港、澳洲、歐洲都係應該要追番上 UNECE 呢一個標準嘅。

27 主席：（經傳譯員）倫敦運輸似乎就係想制定，公布一啲嘅巴士安全水平，就同佢哋  
28 而家用緊嘅係相似。

29 MR JOHN STANLEY：（經傳譯員）係喇，呢個係一個好好嘅措施。

30 主席：（經傳譯員）你會唔會期望一個咁嘅委員會係積極嘅、持續嘅，一路監察其他  
31 地方發生緊咩嘢事？

32 MR JOHN STANLEY：（經傳譯員）主席，係嘅，特別要睇下其他嘅地方係要面對咩  
33 嘢嘅安全問題，香港就應該問呢啲嘅設施係咪喺香港都用得到、係咪可以適  
34 用、要做啲咩嘢嘅研究去處理我哋而家嘅問題，因為你哋呢個環境比起其他地

1 方都係好有挑戰性嘅。

2 主席：（經傳譯員）你會唔會期望一個咁嘅委員會唔單只係遠程咁樣去監察其他地方  
3 發生緊咩嘢事，而係同佢哋喺人事方面都有一啲嘅交流，睇下佢哋有啲咩嘢新  
4 嘅發展，即係香港、歐洲同埋澳洲、新加坡同倫敦咁呢？

5 MR JOHN STANLEY：（經傳譯員）係呀，因為有好多嘅原材料嘅製造商，例如都係  
6 會好高興有機會參與成個過程嘅，譬如話富豪、Scania，呢啲車種，佢哋都喺  
7 呢一方面可以有好多嘅貢獻，我諗佢哋都好開心有呢個機會係參與嘅。

8 主席：（經傳譯員）多謝。

9 陳先生：（經傳譯員）我哋去下一個題目，就係嗰個安全帶嘅問題，我睇番嗰個工作  
10 小組嘅議程，就係個加裝安全帶係一個重要嘅議程嚟嘅，可唔可以用呢個題目  
11 開始呢...

12 主席：（經傳譯員）停一停先，就關於安全帶嘅參考，喺 4867 嗰面就唔係關於嗰個  
13 加裝或者係新巴士上面，呢個係比較一般性嘅問題，呢個係關於喺所有座位安  
14 裝安全帶嘅。

15 陳先生：（經傳譯員）我一陣間就會就睇番喺所有嘅座位安裝安全帶同埋睇番嗰個相  
16 關文件，睇番嗰個文件嗰個討論嘅進展。所以我想開始一般性問題，就係澳洲  
17 都市巴士嗰邊係咪規定咗安裝安全帶呢？

18 MR JOHN STANLEY：（經傳譯員）唔係嘅。

19 陳先生：（經傳譯員）有冇咩嘢原因呢？

20 MR JOHN STANLEY：（經傳譯員）就係覺得嗰個巴士嘅重量本身係會有畀乘客有足  
21 夠嘅保護，喺意外發生嘅時候，而安全帶所帶嚟嘅額外保障未必太多，同埋喺  
22 加裝亦都係會有啲困難，同埋個成本會關注。

23 可能我哋對澳洲呢個問題，就係我唔知你哋會唔會做，就係我哋會有個過  
24 程，叫做規管影響陳述書，如果我哋譬如話想探討就話要求巴士強制性安裝安  
25 全帶，佢哋就會可能要去有一個過程就係整一個規管影響陳述書，然之後去探  
26 討譬如話呢啲嘅相關成本同埋去評估嗰個唔同意外嘅可能性同埋可以減少幾多  
27 機率同埋睇番一個量化一個價值。呢啲係我哋通常都會做㗎喇。

28 主席：（經傳譯員）通常會邊個進行草擬呢個規管影響陳述書呢？

29 MR JOHN STANLEY：（經傳譯員）通常會由嗰個相關政府部門做嘅，好多嘢嘅話，  
30 澳洲全國做嘅，佢哋會通常由嗰個國家運輸委員會，呢個本身係繼承嗰個國家  
31 道路運輸委員會，我係喺嗰度做咗九年嘅副主席嘅。我哋亦都係做咗好幾次嘅  
32 呢啲嘅陳述書，關於唔同嘅車輛規定。

33 主席：（經傳譯員）有冇一個關於巴士嘅規管影響研究呢？

1 MR JOHN STANLEY：（經傳譯員）我唔知道全國有冇正式做過，但係我知道喺省嘅  
2 方面都做過好幾次嘅，所以維省個主要壓力就係我哋係校巴安裝安全帶，喺  
3 啲鄉郊地方，因為啲車通常都會個車速比較快，然後你有啲好細嘅小朋友  
4 坐喺個位嗰度，但係呢個唔係強制嘅，呢個唔係一個規定嘅，唯一嘅要求就係  
5 我哋過州，啲嘅嘅旅遊巴係要安裝安全帶。

6 主席：（經傳譯員）我嘅理解就係呢個就係英國方面係有分別嘅，就係旅遊巴係要安  
7 裝安全帶，個問題係個速度嘅問題喇？

8 MR JOHN STANLEY：（經傳譯員）係。

9 陳先生：（經傳譯員）所以我個理解嘅話，個背景就係話你講緊係個高車速，過州行  
10 程，同埋啲嘅旅遊車咩嘢速度呀？

11 MR JOHN STANLEY：（經傳譯員）大約會係每小時 100 公里，大部分時間。

12 陳先生：（經傳譯員）我明白就係話個比較就係維省本身有冇雙層巴士呢？

13 MR JOHN STANLEY：（經傳譯員）我哋本身係有雙層巴士提供個定線服務，但係我  
14 哋有定線巴士由墨爾本市中心去機場，我同我妻子剛剛係都午膳時間討論到，  
15 就認為就話應該係有安全帶嘅，後來 Janet 話畀我聽就係我成日叫佢戴安全  
16 帶，就應該就係佢係有安全帶嘅。

17 陳先生：（經傳譯員）佢哋呢啲巴士係咩嘢速度呢？

18 MR JOHN STANLEY：（經傳譯員）通常公路嘅話，大約係每小時 100 公里。

19 陳先生：（經傳譯員）教授，我而家想做嘅就係去睇番有關係安裝安全帶討論嘅進  
20 展，然後就去睇番個討論點樣，同埋問你關於嗰方面嘅意見同埋一啲嘅觀  
21 察。

22 MR JOHN STANLEY：（經傳譯員）係嘅。

23 陳先生：（經傳譯員）如果我睇番最後，睇番 TD-1 第 403 頁，畀你睇番呢份文件，  
24 呢個係由運輸署草擬嘅文件，作為畀立法會運輸事務委員會喺 2018 年 7 月 25  
25 日討論文件。呢個係嗰個工作小組嘅有關於建議嘅總結。

26 主席：（經傳譯員）我認為嗰封信之前嗰頁嘅話，係對於解釋比較有用。

27 陳先生：（經傳譯員）我諗我會讀番佢，呢個係由運輸署寫畀呢個委員會嘅，而信入  
28 面亦都提到，就話「喺我哋之前嘅陳述書提到運輸署喺 3 月中嘅時候係建立咗  
29 一個有關改善專營巴士安全嘅工作小組，主要係由所有專營權營運商嘅成員組  
30 成，同埋主要嘅巴士製造商去考慮同埋去探討係咪可以改善巴士安全嘅可行措  
31 施，雖然呢個工作組係進行緊，而佢嘅推薦同埋佢嘅結果要係响 2018 年 7 月  
32 25 號向立法會匯報。」

1 有關係文件嗰度，就係睇番相關段落，譬如 407 頁，呢個就係關於安全帶  
2 嘅段落，而家直接去到 11 段，個運輸署留意到就係「同個製造商確認就係所  
3 有新嘅巴士係可以安裝安全帶去符合國際水準，喺呢方面嚟講，所有新嘅新巴  
4 士自 2018 年 7 月就會安裝安全帶。」呢啲係新嘅巴士。

5 而第 12 段就講番喺現有巴士加裝，我唔會再講詳細。簡單嚟講，就係加裝  
6 安全帶喺下層係認為係不實際或者不可行嘅。

7 第 13 段就講番，就係話「喺某啲嘅型號嘅上層巴士，現有雙層巴士係可行  
8 去加裝嘅。如果上層嘅所有乘客座位都加安全帶，其實就話個增加嘅重量會大  
9 約係 300 至 400 kg，然後之後個容納人數就會減少七至八個。」

10 第 14 段，就係最尾一段，就係話「有啲巴士營運商就關注到喺舊巴士加裝  
11 安全帶唔單只會有重大財政影響，亦都可能會利用好多時間同埋人力資源，唔  
12 單只就係需要去重新調動或者去購買額外巴士去維持現有巴士服務，喺成個過  
13 程入面。」

14 而家睇番最後一段，附註 5，喺譬如話喺個個--如果--「由於有一個關於  
15 去加裝安全帶嘅詳細報告，喺上層，主要係一個好粗略嘅估計，就係話每加裝  
16 安全帶喺一架巴士大約係二十萬左右，就唔計呢個人力同埋啲嘅雜項開支。」

17 第 15 段講番呢啲海外經驗同埋做法。

18 主席：（經傳譯員）不如你讀開啲一段，因為呢個係相關嘅。

19 陳先生：（經傳譯員）第 15 段，講番海外做法同埋個經驗，「嗰個工作小組亦都係  
20 檢視番目前嘅海外做法同埋規定有關於巴士安裝同埋穿戴安全帶，喺跨城同埋  
21 跨界巴士，譬如喺海外管轄區，譬如美國、英國同埋荷蘭係規定所有乘客座  
22 位需要安裝安全帶，譬如話有啲國家，喺英國、荷蘭同埋澳洲維省係有呢個強  
23 制規定要穿戴安全帶，然而有啲市區路線嘅巴士，同埋巴士佢有企位嘅話，有  
24 一個海外管轄區，工作小組睇過嘅，就係有關法例規定乘客座位需要提供安全  
25 帶，有關呢啲司法管轄區嘅交通當局，呢啲市區巴士通常係比較係短程嘅，無  
26 論係個時間同埋個里程，同埋個速度亦都唔係咁快，所以佢哋唔會強加於呢啲  
27 路線加安全帶規定嘅，而係附錄 B 嘅方面都係有個建議嘅總結。」

28 而去第 16 段，「參照番 10 至 15 段，然後之後工作小組有關於畀乘客更多  
29 保障，佢有以下建議，就係所有新巴士購買時候應該提供安全帶；同埋視乎有  
30 關於技術、營運同埋財政可能性，可能會考慮就有關舊巴士方面，就會有啲雙  
31 層巴士入面嘅上層所有座位，只要係特定嘅巴士路線，就譬如話行快速公路嘅  
32 長途路線，本身就唔係咁多停站嘅。」

33 呢個就係運輸署嘅建議總結，所以個建議就係話如果舊嘅巴士加裝安全帶就  
34 主要就係長程路線。

35 主席：（經傳譯員）主要係有啲要求，主要就係行快捷公路嘅長途路線。

1 陳先生：（經傳譯員）而我哋亦都有啲附註 6 講明就話呢啲係咩嘢嘅快速道路。附錄  
2 7 主要係講，就話目前啲啲專營巴士營運商大約涉及二千架目前調動嘅巴士。

3 而家我會舉啲例子，去提及番巴士營運商佢嘅關注同埋觀察，然之後我就會  
4 叫你去睇番 Weston 先生報告入面其中一段，然之後佢亦都講番同樣嘅嘢，然  
5 之後就問番你對關於啲個題目嘅觀察。

6 而家就睇番啲個工作小組討論嘅紀錄，而家就我想睇一睇番就係 KMB-12  
7 第 4869-1 頁，而我想你睇番啲個會議紀錄嘅筆記部分，你睇番個出席者。

8 主席：（經傳譯員）我哋有冇一個冇刪節嘅版本㗎，呢個文件？

9 陳先生：（經傳譯員）主席，4869-1 本身係冇刪節，同埋擺喺個螢幕上亦都係冇刪  
10 節嘅。

11 主席：（經傳譯員）我似乎唔係喺同一頁。

12 陳先生：（經傳譯員）唔好意思，係 4869-1。而家我哋直接去到安全帶啲個段落，  
13 係第 13 段。

14 主席：（經傳譯員）可以幫一幫教授，個工作小組係咪呢方面係咪有少少嘅分歧？所  
15 以佢哋有一個技術小組去講一啲安全裝備同埋細分有一個小組係講個培訓嘅。

16 MR JOHN STANLEY：Yes.

17 陳先生：（經傳譯員）而家我睇番個小組嘅會議，所以睇番呢啲巴士營運商嘅觀察，  
18 同埋想睇番佢轄下嘅小組嘅紀錄，本身係有製造商參與嘅，所以可以喺呢度直  
19 接睇番製造商對呢方面嘅睇法。而家我哋睇番 4869-6，由第 13 段起係關於安  
20 全帶安裝嘅，我而家仍然喺 KMB-12。

21 主席：（經傳譯員）我一路睇緊個版本，又同其他嘅文件一樣，因為我本身係一個有  
22 編號嘅版本，因為佢哋之前咁樣畀我，然之後我嚟到呢個研訊，然之後我有呢  
23 個有編號嘅版本--頁數嘅版本，然之後我完全係冇我所做嘅筆記，所以而家我  
24 而家想兩個版本同時都去睇。

25 陳先生：（經傳譯員）主席，我而家就睇番第一次會議嘅筆記第 13 段，呢個係關於  
26 安裝安全帶嘅，「而家目前所有專營巴士嘅暴露座位都已經係安裝安全帶，考  
27 慮到啲啲技術嘅可行性，運輸署建議就喺所有新巴士同埋喺目前嘅巴士入面喺  
28 所有座位安裝安全帶。」

29 第 16 段，「城巴同埋新巴第一巴士質疑話有關於喺所有座位安裝安全帶嘅  
30 可行性去增加顧客安全，因為係好難地由個車長去確保所有乘客穿戴安全帶，  
31 同時巴士公司亦都係關注到企位，企喺巴士入面穿戴安全帶嘅需要，因為佢哋  
32 本身畀唔到安全帶畀佢哋，運輸署建議就係話喺交通意外之後有要求就會進行  
33 呢個全面嘅檢討嘅呢方面，而上次檢討之後已經係過咗十年，而呢啲嘅目標就  
34 喺目前嘅討論係應該集中喺啲個技術可行性、成本效益、應用性同埋其他相關

1 問題，係關於所有座位安裝安全帶方面嘅。」

2 主席：（經傳譯員）好，呢個會議紀要嗰度就有一份陳述書嘅，就係話運輸署就提到  
3 就話，係有要求--即係喺嗰次交通意外之後，就做一個全面檢討講安裝安全帶  
4 嘅，呢方面有冇咩嘢資料呀，而家？

5 陳先生：（經傳譯員）或者我要之後話番畀你聽，主席。

6 主席：（經傳譯員）我話「一宗交通意外」就錯，應該係眾數，係「多宗交通意  
7 外」。就係因為呢度就引出一個問題，係邊個提出要求，幾時提出要求同埋講  
8 緊係邊幾宗嘅交通意外？

9 陳先生：（經傳譯員）係，或者我肯定係需要去考慮嘅呢點，或者我之後再話番畀你  
10 聽。

11 主席：（經傳譯員）好，祝你好運。

12 陳先生：（經傳譯員）好喇，呢個就係城巴嘅觀察。跟住我就請你睇第三次會議嘅會  
13 議紀要，4908-1，就喺 2018 年 6 月 21 號開嘅會，呢個亦都係工作小組嘅大  
14 會會議，唔係分組，我想請你睇第 25 段，即係呢個會議紀要 25 段，4908-7。

15 主席：（經傳譯員）而家就係去到 6 月 21 號，係咪呀？

16 陳先生：（經傳譯員）係，主席。

17 主席：（經傳譯員）好，唔該。

18 陳先生：（經傳譯員）教授，你可以睇番第 26 段，就有討論到加裝安全帶，都係集  
19 中講上層嘅，因為原因頭先我哋都講咗喇，就話如果要下層安裝安全帶就不切  
20 實際，所以呢度 26 段就提到話「有關於現有嘅巴士會議嘅得悉係喺某啲現有嘅  
21 雙層巴士型號，喺上層所有乘客座位加裝安全帶都係可行嘅，而城巴、龍運就  
22 提出就話佢哋就會喺上層所有嘅巴士乘客座位安裝安全帶嘅，然後呢啲巴士就  
23 用喺啲長途會上高速公路嘅巴士嗰度，即係話意思中間上落嘅站係少嘅相  
24 對。」

25 「之後，會議之後，就話考慮所有嘅技術可行性」，即係下一段，即係 27  
26 段，就提到話「而家就係大部分佢哋嘅巴士都係用喺市區路線嘅，就有乘客站  
27 立嘅，如果話要強制規定所有嘅巴士乘客座位都要安裝安全帶，就唔係切實可  
28 行嘅，而且有啲係外露嘅車位，譬如話有啲車廂又唔畀企位嘅，本身嗰個安全  
29 帶先至會畀到額外保障畀坐咗喺度嘅乘客嘅。」

30 喺香港，而家就喺樓上係唔准企嘅，就喺樓下先至可以企嘅。即係巴士裏  
31 面，「呢方面城巴同埋新世界第一巴士就話要佢哋考慮喺啲長途巴士上面，就  
32 上層所有嘅乘客座位加裝安全帶，城巴同埋新世界第一巴就話如果佢哋有啲巴  
33 士只限於用特定嘅路線，根據現時佢哋嘅操作模式就有困難嘅，而且城巴同埋  
34 新一巴士就話好少乘客--佢哋留意好少乘客係有用安全帶嘅，所以喺財政上未

1 必係可行嘅，即係要加裝啲安全帶。」

2 所以呢度有兩點，第一，就係將嗰個加裝安全帶嘅範圍縮窄到會行長途高速  
3 公路巴士嘅上層，第二，有提出一點，就關於嗰個財政上係咪可行，同埋係咪  
4 有用。

5 主席：（經傳譯員）或者要講畀教授聽，我哋已經聽晒所有城巴嘅證供，係咪呀？佢  
6 哋對於話喺巴士裝安全帶，佢哋亦都係表達咗好清晰、強烈嘅立場。

7 陳先生：Yes, they have.

8 主席：（經傳譯員）或者可以請教授睇番相關嗰個謄本，公聽會謄本，就係 5 月，等  
9 佢睇番。

10 陳先生：（經傳譯員）係，或者我哋而家可以搵番出嚟，但係等緊嘅時候，就可以睇  
11 番 Weston 先生個報告嘅，因為佢都有提及呢一點嘅，Weston 先生嘅報告就喺  
12 134 頁，即係個文件夾 134 頁嗰度，134 頁係 Weston 先生嘅報告，相關部分  
13 講安全帶嘅就係嗰頁嘅中間。

14 「目前巴士司機或者乘客安全帶喺英國唔係一個法律規定嚟嘅，有關於安全  
15 帶嗰度，佢哋嘅運輸署嘅指引就提到話：

16 『自從 2001 年 10 月 1 號向前或者向後嘅所有新嘅巴士嘅座位，即係新巴  
17 士裏面都要安裝安全帶嘅，就有助防止死亡或者嚴重嘅傷害，唔單只話因為個  
18 乘客可能會向前，而係架巴士如果係翻側嘅時候亦都係有幫助嘅。

19 唯一可以豁免嘅就係如果巴士係有企位嘅，容許豁免就係因為呢啲巴士主要  
20 係用嚟短途，而且喺時間上同埋行個距離嗰度，同埋考慮到佢嗰個喺市區路  
21 線，佢個速度唔會太快，所以先至可以容許豁免，但係我哋都明白首先就要營  
22 辦商決定揀選邊啲巴士嚟要安裝呢啲安全帶。』

23 目前倫敦嘅營辦商係有裝到安全帶嘅，但係有一間公司傳統上，以前一間  
24 First Group 就係有裝到安全帶，但係之後佢哋賣咗佢哋嘅倫敦嘅業務畀  
25 Tower Transit and Metroline，呢個就係 13 年 6 月。」

26 而家又或者睇番城巴嗰度，搵到喇，我哋搵到嗰個謄本，謄本紀錄第 3  
27 日。

28 主席：（經傳譯員）第 3 日係咩嘢，我唔知你講緊，用緊咩嘢日曆，係北韓日曆定咩  
29 嘢日曆呢？第 3 日係指乜嘢呢？

30 陳先生：（經傳譯員）係星期二，2018 年 5 月 29 號。

31 主席：（經傳譯員）係。

32 陳先生：（經傳譯員）第 15 行，鄭生係城巴嘅代表，問題就係「運輸署署長有冇要

1 求喺你巴士上面安裝任何具體嘅安全設備？」佢鄭生回答，佢就話「等我講兩  
2 個例子，運輸署就有要求巴士營運商就係喺一啲外露嘅巴士就要裝安全帶嘅，  
3 另外，我哋有少數嘅巴士因為嗰個樓梯係比較直同長，所以運輸署都要求我哋  
4 加裝額外嘅扶手，即係嗰啲冇遮擋嘅座位。」

5 唔好意思，主席，更加合適嘅參考紀錄應該喺下一日嘅證供，即係 5 月 30  
6 號 2018 年，係星期三嚟嘅，第 58 頁。

7 主席：（經傳譯員）好，唔該。

8 陳先生：（經傳譯員）第 19 行，Duncan 先生就係委員會嘅律師，佢就想證人睇一  
9 點，就係關於話「喺所有座位；同埋 (b)，喺所有新巴士上層所有座位安裝安全  
10 帶嘅可行性」。

11 主席：（經傳譯員）Duncan 先生提緊嘅係乜嘢？

12 陳先生：（經傳譯員）佢係引述一份聲明，就係城巴嘅遠期計劃裏面嘅聲明嚟嘅，或  
13 者我可以講番，就話「可以喺上層所有座位都安裝安全帶嘅，不過我哋嘅觀察  
14 顯示而家如果已經有--即係嗰啲譬如冇遮擋嘅座位而家其實已經有安全帶，因  
15 為法律冇規定一定要戴安全帶，所以好少人係會戴安全帶，而規管當局亦都有  
16 執行，所以要加裝安全帶其實即係浪費資源嘅，因為絕大部分嘅乘客都唔會戴  
17 安全帶嘅，就算你提供咗都好。」呢個就係 Duncan 先生喺佢哋講到城巴嗰個  
18 遠期計劃時候就有作出一個咁嘅陳述。

19 然後 Duncan 先生就請城巴嘅代表睇另一段文字，就係運輸署提到關於安  
20 全帶嘅問題嘅，然後喺第 60 頁，主席，就特別問到加裝安全帶嘅問題到底係咪  
21 真係浪費資源，第 60 頁 17 行就係主席問嘅問題，就話「你之前答就話要加裝  
22 安全帶都係浪費資源，因為絕大部分嘅乘客都唔會戴嘅，就因為唔係一個要求  
23 執行嘅，你既然有咁提及，如果唔係法例規定，你係咪覺得佢哋浪費資源  
24 呢？」

25 鄭先生亦都有問，「因為而家法例冇咁規定，你話巴士唔規定一定要戴安全  
26 帶嘅，就算真係法例冇咁規定，但係如果有人去執法，我都擔心會係浪費資源  
27 嘅，所以我哋係維持原來嘅睇法。」

28 主席就問「你有冇同運輸署提出呢個觀點？」鄭生就話「我哋有，我哋同事  
29 係有同運輸署提過嘅。」所以係城巴就有表達咁樣嘅睇法，同佢哋嚟工作小組  
30 嘅會議紀要所提嘅係一樣嘅。

31 好喇，喺我問你對呢件事嗰個觀察之前，我亦都想講畀你聽我哋嘅巴士所行  
32 嘅高速公路係點嘅，個時速限制可以去到 80，但係巴士係有個時速限制係定喺  
33 70 公里嘅啫，所以喺高速公路，巴士最多都係行 70 公里。

34 主席：（經傳譯員）但係去機場嗰個高速公路嗰個時速限制係 110 公里？

1 陳先生：（經傳譯員）係呀，但係喺巴士上面嗰個時速限制亦都係限咗喺 70 公里  
2 嘅。

3 主席：The legal speed limit for a franchised bus is 70  
4 kilometres per hour?

5 陳先生：（經傳譯員）所以巴士喺高速公路所行駛嘅速度都係咁。好喇，你聽晒所有  
6 呢啲資料之後，你有咩嘢觀察或者評論，即係對於安裝安全帶呢點？首先，係  
7 咪所有座位都安裝？第二，係咪淨係集中睇上層，巴士上層？上層就有企位  
8 嘅。

9 MR JOHN STANLEY：（經傳譯員）好，多謝。或者咁係講番返去半個鐘頭時候我畀  
10 一個答案，就話嗰個規管嘅問題，其實呢度，個規管嘅影響呢度係有兩個方  
11 面，第一，就係技術上係咪可行，係咪可以喺巴士嘅某啲地方安裝安全帶？例  
12 如話新巴士嘅上層，或者係所有現有巴士都係加裝呢？第一個問題，首先就係  
13 技術上係咪可行？第二，就係如果係技術上可行，嗰個成本效益嘅比率係點樣  
14 呢？即係裝咗呢啲安全帶，會係點呢？即係意思安裝安全帶要幾多錢，然後減  
15 少意外嘅程度又會係點樣？同埋裝咗安全帶，啲人會唔會攞呢？又係要考慮。

16 喺任何具體情況，我都有咩嘢意見話攞安全帶係好定唔好，但係我諗就係應  
17 該要做一個規管影響嘅陳述，就會睇下嗰個或然率，譬如話唔同嘅種類嘅意外  
18 嘅影響係點呢？你亦都可以畀一個金額佢，就話以金額嚟計算，可以減少幾多  
19 意外，同埋亦都睇下如果攞咗安全帶係咪可以減少傷害嗰個或然率亦都可以計  
20 算，因此就需要先做埋嗰個成本效益嘅分析，政府先至可以能做到一個政策決  
21 定，到底係咪需要裝安全帶，係咪可行，係咪值得。

22 所以我對呢個問題嘅睇法就係首先要做一個成本效益嘅分析，就唔係淨係話  
23 啲人覺得會咁或者又係咁樣，唔係咁，而係既然有人提出一啲關注，即係唔同  
24 方面都提出關注，呢啲亦都係真實，係合情合理嘅關注，因此就要睇下係咪真  
25 係需要安裝，但係直至你做好個成本效益分析之前，所有呢啲睇法都只能夠當  
26 成係揣測。

27 如果你問我嘅直覺，可能就係唔值得嘅，即係要大規模咁樣去加裝就唔值  
28 得，但係呢個係一個直覺嚟嘅，肯定係需要做一個全面嘅評估先得。

29 主席：（經傳譯員）係喇，就正正因為憑正覺唔夠好，所以就要全面做一個成本效益  
30 嘅分析？

31 MR JOHN STANLEY：（經傳譯員）係喇，冇錯，主席。

32 主席：（經傳譯員）然後先至可以--咁做嘅時候，就要睇番各個唔同嘅元素，係咪  
33 呀？你頭先提到嗰啲。

34 MR JOHN STANLEY：（經傳譯員）係喇，正正係咁。原則上，做一個成本效益分析  
35 係好直截了當嘅啫，就可以攞到一啲或然率或者計到個價值係點樣，睇下呢個

1 過程係咪值得嘅。同埋你喺呢個過程就會一定睇到各種嘅因素，係頭先即係你  
2 提到嗰啲各人嘅睇法，就可以去從咁嘅角度去分析。

3 主席：（經傳譯員）應該有邊啲人係參與做一個成本效益嘅分析呢？你會嗌啲咩嘢人  
4 做呢？你會想佢哋畀到啲咩嘢資料你呢？

5 MR JOHN STANLEY：（經傳譯員）好明顯，首先你要同嗰啲提供設備嘅人，即係嗰  
6 啲製造商，佢哋就會可以畀到啲好實際嘅資料同埋意見畀你，話技術上咩嘢可  
7 行、咩嘢唔可行，新嘅車、舊嘅車款可行定唔可行；咁又包括埋就係做安全帶  
8 嘅製造商；可能你亦都會想問下其他做一啲譬如話顧客嘅調查，就係話有啲咩  
9 嘢因素會影佢哋係咪纜安全帶，如果係纜安全帶，係咪大部分情況都會咁做  
10 呢？

11 譬如話喺澳洲，你會睇番嗰啲巴士，旅遊巴，睇下啲人係咪會纜安全帶，如  
12 果佢哋係有纜嘅，到底佢哋因為咩嘢理由、點解會纜安全帶呢？係咪因為佢哋  
13 有啲市場嘅認知嘅運動，所以佢哋之後就會咁做呢？所以嗰個過程係點，係乜  
14 嘢鼓勵到佢哋會咁做呢？可能唔係因為話巴士上面有稽查，所以佢哋就會罰佢  
15 哋，佢唔纜安全帶。

16 所以你就要睇下有咩嘢原因，呢個過程...

17 主席：（經傳譯員）你未繼續之前，我想打個岔嘅，喺香港，我哋喺一啲冇遮擋嘅位  
18 置係有安全帶，譬如話喺上層嘅最前排，要做一個嘅調查，就咁係咪可以好簡  
19 單咁睇到大家會唔會用安全帶呢？

20 MR JOHN STANLEY：（經傳譯員）絕對係。

21 主席：（經傳譯員）雖然呢個已經係認為一個危險嘅位置，喺巴士度，但係佢哋係咪  
22 真係用緊嘅呢？

23 MR JOHN STANLEY：（經傳譯員）係，絕對係，主席，我覺得我哋喺話我太太同埋  
24 我自己都琴日係有戴安全帶嘅，我哋嚟自呢一個維省，我哋係即係話第一次去  
25 見到一個地方係話必須要戴安全帶嘅。

26 主席：（經傳譯員）即係話據我所知，你係去赤柱，係咪呀？

27 MR JOHN STANLEY：（經傳譯員）冇錯。

28 主席：（經傳譯員）所以呢個係一個好嘅理由嚟到去戴安全帶嘅。你正話又去形容到  
29 底邊啲人我哋係應該向佢求助同埋邊啲嘅資料係想問佢哋擺嘅，去做呢一個分  
30 析嘅時候？

31 MR JOHN STANLEY：（經傳譯員）冇錯，就係嗰啲成本方面，我哋係講緊車輛、  
32 供應商同埋製造商嘅，去到事後安裝，我諗我哋要問下嗰啲事後安裝嘅人員，  
33 即係譬如我哋喺悉尼，喺墨爾本就有一啲係車輛--車身嘅安裝嘅人，我哋就會  
34 特別做呢樣嘅工作嘅，我就會問佢，就係睇下有冇辦法係事後安裝㗎？係咪好

1 貴㗎？我諗呢啲你都要全部要考慮㗎。

2 亦都會要求一個相當大嘅改裝㗎，喺個底部，如果真係咁，有啲咩嘢嘅好處  
3 呢？你需唔需要睇下有啲咩嘢類型嘅意外呢？同埋係咪嗰啲企喺度嘅人受傷，  
4 定係坐喺度嘅人受傷呢？到底喺呢啲意外嘅時候，如果真係坐喺呢啲有遮擋嘅  
5 位置嘅人戴咗安全帶，係咪就會減少咗意外呢？同埋要做啲乜嘢去鼓勵大家戴  
6 安全帶？

7 如果我係做呢一類嘅工作，我會同啲心理學家傾下，點樣係將嗰個訊息係傳  
8 遞到畀人，即係知道戴安全帶係重要㗎。呢一點你就要睇下喺坐呢啲位置嘅人  
9 佢哋做啲咩嘢呢而家，喺香港？我覺得要睇下嗰個或然率，我哋應該同所有嘅  
10 呢一方面嘅持份者同埋香港不同嘅意外帶嚟嘅成本，即係話一個致命嘅意外喺  
11 香港嘅成本係幾多？一個有嚴重受傷嘅意外嘅成本又幾多？一個輕微受傷嘅意  
12 外又有咩嘢成本呢？睇下呢啲個代價係乜嘢，然後就係睇下減少咗意外嘅或然  
13 率嗰個好處係咩嘢喇。

14 主席：（經傳譯員）去搵意外發生嘅時候詳情係點、啲人係點樣受傷、喺邊度受傷、  
15 點解佢哋有受傷，我相信你係會想諮詢警方或者係巴士公司？

16 MR JOHN STANLEY：（經傳譯員）一定會，如果我喺澳洲係做呢啲嘅工作，我會係  
17 同呢一個大學嗰個嘅意外研究中心，佢哋就係專做呢一類嘅分析嘅，當然要問  
18 埋警方，佢哋會有一啲資料嘅，喺香港，就問埋運輸署，因為致命嘅意外都係  
19 有相當之好嘅數據，我諗仲有，去睇呢啲嘅資料嘅撮要應該都有好多嘢可以睇  
20 得到嘅。資訊嘅來源亦都係好緊要，如果係有大學嘅知識樞紐，即係一啲中  
21 心，大學嘅研究中心，係專門做車輛安全嘅，我諗佢哋都係應該要參與㗎。

22 主席：（經傳譯員）唔該。

23 陳先生：（經傳譯員）我想問下，教授，喺墨爾本，當你講到市區嘅巴士路線如果係  
24 有企位嘅話，佢哋嘅車速係幾多，我哋唔好計佢去機場嗰個嘅車速，會唔會係  
25 有 70 公里呢一個限制㗎？

26 MR JOHN STANLEY：（經傳譯員）我哋一般個時速限制係 60 公里，但係喺一啲高  
27 速公路係可以去到時速 100 公里嘅，一個主要嘅運輸嘅走廊就係有競投嘅服務  
28 嘅，呢個喺我哋東面嘅走廊，係墨爾本，嗰度有一條嘅巴士線，佢哋巴士可以  
29 去到 100 公里嘅個時速，喺一日嘅某啲嘅時間，但係如果喺呢一個交通嘅高峰  
30 期就唔可以嘅，但係呢條係一條巴士線，佢哋可以喺一日裏面大部分時間行到  
31 100 公里，喺其他嘅網絡，平均嘅時速 22 公里，如果你睇下嗰個嘅時間表，佢  
32 哋嘅時速限制平均係 22 公里嘅，有啲可能喺一個短嘅路段可以去到 60 公里。

33 陳先生：（經傳譯員）我想澄清一下，即係喺有啲嘅市區巴士係冇安全帶，都可以行  
34 到 100 公里嘅，時速？

35 MR JOHN STANLEY：（經傳譯員）係，可以㗎。

1 陳先生：（經傳譯員）我哋已經講咗事後安裝安全帶嗰個嘅成本，或者我哋而家可以  
2 去下一個題目，就係補貼嗰個問題嘅，...

3 主席：（經傳譯員）未講呢一點之前，我想同你講一講時速限制呢一方面，車速，嗰  
4 個最低嘅時速，或者我講清楚啲，嗰個一般嘅嗰個嘅時速限制，就係 60 公里，  
5 咁有冇一個下限嘅呢？

6 MR JOHN STANLEY：（經傳譯員）有嘅，可以係 40，例如經過學校就係咁，另外  
7 就係一般嚟講，係 50 公里，當然有一啲嘅市政府或者係地區議會就係想係略為  
8 提高，或者甚至係減到係時速 30 公里嘅，特別喺一啲當區嘅街道。

9 主席：（經傳譯員）有幾常見嘅呢？

10 MR JOHN STANLEY：（經傳譯員）唔係太多嘅，喺一啲嘅大都會區嘅內面，內街，  
11 就譬如有好多係踩單車人士就有呢啲要求。

12 主席：（經傳譯員）但係就有去到咁低，係咪呀？

13 MR JOHN STANLEY：（經傳譯員）冇，一般嚟講係限速 50 公里，喺高速公路係  
14 100。

15 主席：（經傳譯員）經過學校就係 40？

16 MR JOHN STANLEY：（經傳譯員）係呀，喺朝早某啲嘅時段，不過應該係朝早八點  
17 半至到九點半，係下晝嘅...

18 主席：（經傳譯員）咁即係嗰個嘅時速限制係有變嘅？

19 MR JOHN STANLEY：（經傳譯員）係呀，因為學校朝早返學同埋放學嘅時候，就跟  
20 住去番 60 嘅，之後。

21 主席：（經傳譯員）會唔會有一個電子嘅標示，好似係訊號，好似係倫敦咁樣，就會  
22 話畀人聽「而家呢度經過學校，你嗰個嘅時速限制有變嘅」？

23 MR JOHN STANLEY：（經傳譯員）有嘅，會有一個圓圈，話裏面寫住“40”嘅。

24 主席：（經傳譯員）喺墨爾本，關於呢一個車速同埋一啲係巴士喺撞車嘅時候對於人  
25 嗰個傷亡有冇一個連繫嘅呢？

26 MR JOHN STANLEY：（經傳譯員）你問呢一點好有趣，呢一個係有一份嘅文章，係  
27 喺 Melbourne Age 呢一份報紙上面，呢個就唔係真係我講於巴士，but 係講  
28 車速同埋呢一個行人死亡嗰個風險，就係講緊點樣路人嗰個死亡嗰個或然率係  
29 會大大咁升高嘅，如果係超過咗 40 嘅話，呢個係基於 40 公里嘅，呢個係基於  
30 呢一個大學做嗰個研究嘅，如果你鍾意，我會畀嗰份文件你睇嘅。

31 主席：（經傳譯員）呢一個大學嘅意外研究中心？

1 MR JOHN STANLEY: (經傳譯員) 係呀, 係喺一個嘅意外研究中心。

2 主席: (經傳譯員) 多謝你, 我哋都好樂意要睇到嘅。呢個我諗你亦都係睇到, 喺倫  
3 敦, 佢哋嘅倫敦運輸就係將不同嘅時速同嗰個致命傷亡嗰個風險係有一個連繫  
4 嘅?

5 MR JOHN STANLEY: (經傳譯員) 係嘅。

6 主席: You will have noted the significant drop in the risk of  
7 fatalities if the vehicle is doing, for example, 20 miles  
8 an hour rather than 30 miles an hour.

9 MR JOHN STANLEY: (經傳譯員) 你會睇到喺墨爾本, 由 20 去到 30 係比較平  
10 嘅, 但係去到 40 嘅時候係大幅咁樣增加, 所以嗰個嘅風險去到 40 之後係大幅  
11 咁樣攀升嘅, 就即係多咗呢個機會係行人會係死亡嘅。

12 主席: (經傳譯員) 你話係行人死亡, 即係佢哋喺車外面嘅, 唔喺車上嘅?

13 MR JOHN STANLEY: (經傳譯員) 係喇, 佢哋譬如喺車前行過。

14 主席: (經傳譯員) 或者係畀架車撞到呀咁。

15 MR JOHN STANLEY: (經傳譯員) 係喇。

16 陳先生: (經傳譯員) 而家我想講一講補貼呢個問題, 喺呢個報告, 你有睇過係提供  
17 補貼呢個可能性嘅, 你嘅建議就係香港嘅房運局從呢一個社會嘅利益去睇一  
18 睇, 為巴士公司提供補貼呢個問題嘅。想請你睇下你自己嘅報告嘅第 92 頁, 就  
19 係關於呢一點嘅, 我想讀第二段:

20 「香港嘅公共運輸系統就係每一年有好大嘅社會對外嘅效益嘅, 有啲就係譬  
21 如嗰個嘅承辦者就係會有土地嘅增值, 如果嗰個嘅營運者係一個地主, 亦都係  
22 適用於鐵路嘅, 多過係巴士嘅。專營嘅巴士服務就係對於社會係提供多啲嘅利  
23 益, 就佢哋提供嘅利益係多過佢哋所收到嘅車資嘅, 特別係減少道路擠塞, 係  
24 增加一啲社會共融同埋改善呢個道路安全嘅表現。如果係需要用收費嚟到係譬  
25 如請人, 呢個社會效益係會降低, 呢一個嘅損失係足夠係有理據叫政府為呢啲  
26 嘅營運商提供一啲嘅財政資助嘅。」

27 下一段, 就係「房運局同埋運輸署就係應該要評估喺經濟方面, 香港嘅專營  
28 巴士帶嚟嘅社會效益, 去確保佢哋去評估係咪有理由為呢啲嘅服務提供一啲嘅  
29 財政支援, 即係如果呢件事係提出嘅話。我哋亦都睇到有關嘅資助一定要係睇  
30 下第一日呢一個委員會律師方面嗰個嘅意見。呢個對於安全嘅影響就係更加好  
31 嘅, 我哋就話將每一個嘅車長如果每日要揸車超過十二小時呢樣嘢係完全排除  
32 嘅, 我哋而家唔係話將十二個鐘頭就係一個限制, 其實墨爾本嘅經驗, 就係話  
33 十二至十四個鐘都可以安全嘅, 但係必須要有一啲制度性嘅安排, 就係要著重  
34 呢個安全嘅, 如果真係有一個嚴格嘅安全嘅規管嘅話。如果有咁樣嘅安排, 要

1 司機揸過十二個鐘一小時就係令人擔心㗎喇。」

2 我想請你睇下 Weston 先生個嘅報告，都係講緊類似嘅事情嘅，搬去  
3 152 頁，專家報告，頭一、二段，就係喺 8.3 之下嘅，喺大概中間--第一段中  
4 間開始讀起，Weston 先生就話香港係冇呢一個補貼嘅，喺中間就話：

5 「佢話呢個係一個非常之難得嘅成就，但係呢條問題就要問嘅到底係營運一  
6 個商業嘅網絡而冇公眾補貼係咪可持續嘅，同埋長遠嚟講，係咪會引致一啲錯  
7 誤嘅行為或者對於營運嘅某啲方面，就係失咗焦嘅。呢個過分咁樣限制呢個營  
8 運商個嘅投資，就會令到呢一個嘅網絡就有咩發展，就唔能夠發展一啲新  
9 嘅科技同埋措施嘅。」

10 「其實有一啲新嘅安全措施，譬如使用新嘅安全呢一個嘅一啲嘅技術同埋巴  
11 士訓練係可以改善安全嘅。從佢哋呢個營運權之外，提供一啲支援其實係有幫  
12 助嘅，而且對公眾嘅利益嚟講，係有好處嘅。」

13 我想講下呢兩段嘅，Weston 先生就係講到提供一啲嘅資助，就係要嚟做科  
14 技嘅應用同埋訓練嘅。你覺得你哋兩個人係咪有一啲唔相同嘅睇法呢？

15 MR JOHN STANLEY：（經傳譯員）我覺得我哋睇法係有分歧嘅，而家重點就係話我  
16 哋大家都係話公共交通一般嚟講同埋專營巴士，特別嚟講，喺佢哋營運嘅時  
17 候，其實對於社會整體係有一啲嘅界外利益嘅，而呢啲嘅利益對社會係有價值  
18 嘅，而個價值係超過個營運商所得嘅商業回報嘅，我覺得呢點好重要，  
19 我哋要明白呢啲界外利益個價值。香港，我覺得需要睇下呢一方面，佢即係  
20 公共運輸服務嘅一啲社會嘅價值，我覺得個嘅利益都係相當龐大嘅。

21 如果我哋睇番呢個咁嘅背景，你應該睇下會唔會有一啲嘅政策措施，例如係  
22 鼓勵用科技、訓練去測試下佢哋係咪有一啲嘅界外利益，咁樣就如果係嘅話，  
23 亦都可唔可以係改善到呢個安全嘅環境，我哋可以透過使用技術同埋訓練或者  
24 透過一啲嘅錢，如果中間真係有關係嘅，都係有理據政府係用一啲錢資助呢啲  
25 項目嘅。換句話講，如果個界外利益係高過所涉及嘅成本，佢哋唔應該係由  
26 營運商去出資嘅。

27 我覺得呢個就係重點，重點就係要睇下係對於整體社會嚟講，個界外利益  
28 係咪話單單係靠呢個車費嘅收入或者佢哋發展土地個度係收番嚟嘅。

29 陳先生：（經傳譯員）喺第一段，就 Weston 先生嘅報告就話，佢就係關注如果你唔  
30 提供一啲公眾嘅補貼，有可能就係會引致一啲錯誤嘅行為，或者大家就係唔會  
31 重點睇下有咩嘅技術、有咩嘅措施可以改善安全嘅，呢個係咪都係你嘅關注  
32 呢？

33 MR JOHN STANLEY：（經傳譯員）我覺得呢度個嘅論據就係一啲嘅福利、經濟嚟  
34 講，即係如果你完全係漠視個界外利益，個服務本身嘅提供係唔夠嘅，你應  
35 該睇下，你要儘量增加對社會個個效益，提供多啲嘅服務，就唔好單單係從一

1 個商業嘅營運角度去考慮嘅。

2 我早前係提過嘅，喺每兩年有一個嘅大會，就係講到公共運輸嘅競爭同埋規  
3 管嘅，就係有一個嘅論壇係有好多學者同埋營運者嚟到去參與嘅，政府又有參  
4 與，我自己就係主持呢個論壇，就講到我哋過去十年喺呢方面所做過嘅嘢，亦  
5 都睇下公共運輸服務帶嚟嘅價值。當時係學界公共運輸營運者、政府都有一個  
6 非常好嘅對話，喺呢個論壇，我覺得如果香港嘅運輸署同埋有興趣相關嘅學者  
7 都能夠參與呢個兩年一次嘅論壇應該係非常之好嘅，下一次就會係出年喺新加  
8 坡舉行。

9 主席：（經傳譯員）有邊個司法管轄區同埋代表參與個會議嘅？

10 MR JOHN STANLEY：（經傳譯員）主席，我諗上一次嚟講，有二十二個唔同國家，  
11 但係有三分之一嘅與會者係學者嚟嘅，有一部分就公共運輸營運商參與，我留  
12 意到個文章，之前你提及到就係話嗰個 Tower Transit in London，而  
13 Neil Smith 嗰個東主係經常參與呢個會議嘅，喺南非、南美亦都係好積極咁  
14 參與，有好多嘅歐洲國家都有參與，而澳洲亦都係會有好多代表團同埋紐西  
15 蘭，二十二個國家--政府、大學同埋營運商嘅高層代表亦都係有出席嘅。

16 主席：（經傳譯員）我亦都睇到就係下一個嚟講，會喺新加坡度舉行，新加坡本身亦  
17 都會有參與？

18 MR JOHN STANLEY：（經傳譯員）係嘅。

19 主席：（經傳譯員）而政府同埋巴士營運商？

20 MR JOHN STANLEY：（經傳譯員）新加坡嘅陸地運輸局本身會係主持呢個會議嘅，  
21 我認為有啲嘅營運商本身會係贊助人。

22 主席：（經傳譯員）幾時舉行呢？

23 MR JOHN STANLEY：（經傳譯員）我認為係下年 9 月嘅，或者 8 月，我會補充呢啲  
24 資料畀你。

25 主席：（經傳譯員）多謝。有冇啲公開嘅--有冇會出版一啲資料畀公眾參閱呢？

26 MR JOHN STANLEY：（經傳譯員）有嘅，最緊要就係成個過程嚟講，係會公開  
27 嘅，...

28 主席：（經傳譯員）網上有冇呢？

29 MR JOHN STANLEY：（經傳譯員）好多都有嘅，有啲最新就係嗰啲學術期刊嘅文  
30 章，所以就唔係話互聯網好容易搵到，但係你可以搵到呢啲文章嘅副本，有時  
31 佢哋係以書籍形式出版，但係而且出版就係成個過程嘅最重要嘅部分，呢個係  
32 一個好唔尋常嘅會議，就係話佢哋四日間，三日就會有一個工作坊嘅形式，然之  
33 後與會者就揀單一嘅題目，然後用三日時間去探討，而個題目可以係譬如點

1 樣可以喺公共運輸運作嗰度有更多嘅競爭，或者而且用三日嘅時間同同行去討  
2 論，呢啲嘅我主持嘅工作坊，譬如話用三日睇番公眾運輸嘅益處，同埋我哋點  
3 樣去評價同埋可以令到佢成為現金流去支付呢啲嘅服務嘅。

4 主席：（經傳譯員）多謝。

5 MR JOHN STANLEY：（經傳譯員）主席，我嘅太太指出，就話下次嘅會議係星期  
6 日，8 月 25 號，去到星期五。

7 陳先生：（經傳譯員）而家我哋去另一個範圍，就係去草擬呢啲嘅指引。

8 主席：（經傳譯員）我哋而家講番補貼，或者政府或者係有角色去解決 Weston 先生  
9 所指出嘅問題，呢個之前都係提及過，就係由巴士營運商有關於呢啲去實施呢  
10 啲決定嘅成本，就係話係有關喺專營巴士安裝安全帶。

11 陳先生：（經傳譯員）係安全帶，我哋聽到九巴嘅作供，係梁乃鵬博士，我認為就話  
12 佢曾經同一個政府官員討論過一次嘅。

13 主席：（經傳譯員）或者我哋可以睇番相關會議嗰個對話紀錄嘅相關段落，就睇下--  
14 唔係，就我而家睇番嗰個係有頁數嘅嗰查文件，嗰個有關於車輛安全裝置一個  
15 轄下小組喺 2018 年 6 月 12 號第 8 段，我想特別針對嗰段畀教授睇一睇。教  
16 授，你之前亦都係知道，就係話你對於城巴，由於關於譬如話關於安裝安全帶  
17 要自負成本，然後有啲關注，然後佢哋嘅經驗就係話佢哋嘅乘客本身唔會  
18 用佢哋，然後政府係唔會強制去執行，呢啲係有用嘅。大約係佢哋嘅大意係  
19 咁講。或者我睇番第 8 段。

20 陳先生：（經傳譯員）如果我哋睇番嗰個會議嘅紀要，KMB-12，第 4932-1，呢個  
21 係會議紀要嘅第一頁。

22 主席：（經傳譯員）咩嘢日期呀？

23 陳先生：（經傳譯員）2018 年 6 月 12 號。

24 主席：（經傳譯員）唔該晒。

25 陳先生：（經傳譯員）就相關嘅段落，梁乃鵬博士講番嘅就係 4932-3，第 8 段，或  
26 者我就咁讀，「城巴講過就係話現有嘅巴士嘅暴露嘅座位本身有三點式嘅安全  
27 帶，由佢哋嘅日常營運經驗，大部分坐喺嗰啲位嘅乘客都唔戴安全帶，而呢啲  
28 嘅加設安全帶係成本好高，同埋如果有人用嘅話就會咁錢。同意就係話向乘客  
29 嘅教育同埋推廣係應該係進行去推廣用安全帶，而城巴就話佢哋大約 2013 年之  
30 後有一千一百架巴士可能係安裝上層座位安全帶係可行嘅，而預計個成本係二  
31 億四千萬，係公司係負擔唔到，城巴要求政府去提供資金或者補貼畀呢啲加裝  
32 安全帶嘅項目，如果係規定嘅話。所以目前佢哋係唔會自資去加裝安全帶，同  
33 意就係話呢個財政嘅問題會係喺工作小組入面討論嘅。」

34 「而睇番九巴嗰面，佢哋強調就係話佢哋支持喺新巴士安裝安全帶，而視乎

1 係嗰個技術細節同埋嗰個巴士製造商嘅加裝計劃書，佢哋考慮就係話係以分期  
2 數嚟去安裝特定路線嘅安全帶，因為嗰啲路線就啲乘客傾向會用佢哋嘅。而新  
3 大嶼山巴士係反對，因為低使用率同埋高成本，佢係目前有計劃去加裝安全  
4 帶。」

5 主席：（經傳譯員）基本上佢係預備嚟新巴士安裝，同埋嚟現行路線巴士裏面都會考  
6 慮安裝。

7 陳先生：（經傳譯員）睇番之前嘅會議紀要，就係九巴就係有呢個提議，就係話嚟安  
8 裝上層座位嘅安全帶同埋嚟啲特定嘅長途路線或者係行公路線。

9 提供一個完整嘅圖畫，就話梁博士嘅作供，嚟上次嘅聆訊入面，我睇番嗰個  
10 聆訊紀錄，嚟 2018 年 9 月 12 日，呢個係第 18 頁，第 14 行。

11 主席：（經傳譯員）等少少，等佢嚟個螢光幕上面顯示。

12 陳先生：（經傳譯員）第 14 行，「我都想補充嘅，最近我同政府官員會晤，而我同  
13 佢講，就係話要求政府睇下佢哋可唔可以關於嚟安裝安全帶嗰面可唔可以提供  
14 援助，而個答案係正面嘅，如果我可以咁講嘅話。」

15 「你可唔可以講下你同邊個討論過？」

16 「係運輸署常秘 Mr Joseph Lai 同埋佢嘅副手 Mr Kevin Choi 先生，  
17 運輸署副秘書長。」

18 主席：（經傳譯員）呢啲係我哋本身係討論過嘅範圍，但係佢本身嚟香港係一個實質  
19 嘅問題，所以我哋明白你嘅意思就係要求去進行一個成本效益分析，你一方面  
20 講到話政府係可以作一個政策決定，所以我哋就會係咁做，但係當政府作呢個  
21 政策決定嘅時候，佢通常都要去進行呢個--參照呢個成本效益分析？

22 MR JOHN STANLEY：（經傳譯員）你希望會咁做喇，主席，證據就係唔一定成日經  
23 常咁做，譬如話嚟呢個情況嚟講，你會希望政府會進行成個步驟，呢個成本效  
24 益同埋辨悉嗰個效益，如果呢啲效益本身係明顯，呢啲係好大嘅界外因素，但  
25 係呢啲嘅效益本身係唔會由個營運商去獲取嘅，所以絕對係有理據去探討下用  
26 津貼嚟去促成呢個過程。

27 主席：（經傳譯員）呢個可能係對於營運商有利，但係如果能夠避免意外，令到乘客  
28 唔會受傷，當個巴士撞到唔知--作故障嘅時候，呢啲係對個營運商亦都係相應  
29 都係有利嘅。

30 MR JOHN STANLEY：（經傳譯員）係，呢啲係啱嘅。

31 主席：（經傳譯員）但係佢哋唔使咩嘢賠償㗎。

32 MR JOHN STANLEY：（經傳譯員）係，大部分嚟講，亦都係呢啲界外嘅利益唔係由  
33 營運商去獲取嘅，所以你而家就建議就係話個成本係由個營運商同埋政府分

1 擔。

2 主席：（經傳譯員）係，但係如果政府係使用納稅人公錢嘅時候，政府係咪需要去睇  
3 番嗰個利益--界外效益同埋成本呢？

4 MR JOHN STANLEY：（經傳譯員）係嘅，如果係去進行呢個承辦，我哋會--佢嗰個  
5 過程都係之前一個鐘頭前講過。

6 主席：（經傳譯員）係嘅。陳生。

7 陳先生：（經傳譯員）主席，我而家有三個題目未講，主要係個指引嘅問題，第二個  
8 就係安全數據透明度，同埋嗰個巴士車長嘅培訓，我預大約多二十分鐘至半個  
9 鐘頭去做完嘅，你想唔想休息一下，然後之後返嚟繼續？

10 主席：（經傳譯員）我而家明白就係話你都企咗好耐，同埋教授亦都作供好耐。

11

12 下午 4 時 21 分押聆訊押後

13

14 下午 4 時 38 分恢復聆訊

15 出席人士如前。

16

17 主席：（經傳譯員）係，陳律師。

18 MR JOHN STANLEY：（經傳譯員）多謝主席。教授，或者我就直接去講嗰個工作時  
19 數指引，我諗你提嘅最重要嘅點就係話墨爾本同香港嘅分別，喺墨爾本，工作  
20 時數指引就係喺入咗法例裏面嘅，而香港我哋就純粹只係一個指引。

21 或者可唔可以請你睇你個專家報告嘅相關段落呢？就係 91 頁，你嘅專家報  
22 告 91 頁，我睇緊中間嗰段，91 頁，或者我讀出嚟：

23 「香港同墨爾本兩個主要嘅分別，就係指話同工作時數或者休息時數有關嘅  
24 就係第(1)，墨爾本（維省）嘅規定對於工作／駕駛同埋休息時間嘅規定就係寫  
25 咗入去規例嗰度嘅，就係全國重型車輛（疲勞管理）全國規例 2013；而第(2)  
26 點就係有關嗰個安全責任同埋責任鍊都係有提及嘅，而香港就純粹只係一個指  
27 引文件，就冇任何具體法律嘅支持嘅，《香港公營巴士服務條例》香港法例第  
28 230 章就規定要調節工作／駕駛同埋休息時數，但係有關呢點就係有特別有要  
29 求點做。」

30 或者而家我可以講下...

31 主席：（經傳譯員）你係再詳細講？

1 陳先生：（經傳譯員）你唔需要講...

2 主席：（經傳譯員）係呀，我好熟悉個條文，所以唔需要特別睇㗎喇。

3 陳先生：（經傳譯員）就係畀番個頁數畀你，就係 TD-2 第 56 頁。教授，你喺你  
4 報告裏面提到話呢度即係話「點樣去確立工作時數同埋休息時數個規定，兩個  
5 管轄區就有唔同嘅地方，似乎喺墨爾本要守規就係重要，因為如果唔遵守，就  
6 會違反法例，就會有法律上嘅後果嘅，即係對嗰啲有關公司嘅人士，（甚至包  
7 括埋採購服務嘅政府人員都有），因為佢哋係有一個責任鍊嘅制度。」

8 最後另外提到就係話巴士安全法，今朝都睇過，你其中一個主要嘅建議，就  
9 係話將我哋嘅指引變成某啲嘅規例，呢度就係專家報告第 94 頁有提及嘅，我唔  
10 會特別揭過去，因為只係有一項提到嘅啫。

11 好，教授，可能都係好明顯嘅，但係可唔可以請你都詳細再解釋一下，將工  
12 作時數指引擺咗入去規例嗰度，等佢有法律效力嘅個好處係點呢？

13 MR JOHN STANLEY：（經傳譯員）多謝主席。喺墨爾本個情況，或者我喺第一份報  
14 告其實都有畀咗啲例子，就話如果唔遵守，嗰個後果係點，就係我嘅第一份報  
15 告嘅 27 頁，可能--應該係 27 頁，...

16 主席：（經傳譯員）我諗嗰度第一份報告嗰個頁數係一樣嘅。

17 MR JOHN STANLEY：（經傳譯員）係喇，第 27 頁嗰度就畀咗啲例子，就話會有啲  
18 咩嘢罰則，即係如果違反咗，會點樣。

19 主席：（經傳譯員）係喇，呢一頁我都睇到喇，就睇到嗰個罰款會係點樣嘅，即係  
20 上面。

21 MR JOHN STANLEY：（經傳譯員）係，所以嗰個後果就可能會導致罰款，就係有好  
22 多方面嘅人士嘅，今朝早我都提過㗎喇。而最新會喺 10 月 1 號修訂嘅全國法例  
23 亦都有講話大幅咁增加嗰個罰則嘅，即係喺呢個表嗰度，同埋處理埋嗰啲魯莽  
24 行為，甚至可能會有監禁嘅，所以係好認真對待呢個問題嘅。

25 我知道警方嗰方面都批評話呢個政策到目前嗰個應用個情況係點樣，佢哋就  
26 話有足夠嘅刑罰，特別係講到話貨車就多過講巴士嘅。而呢啲條文主要都係講  
27 話貨車違反嘅時候情況係點嘅，但係肯定嗰啲條文係喺度嘅，而喺我同巴士營  
28 運商嘅傾談當中，佢哋亦都係好清楚知道有呢啲嘅條款同埋對佢哋可能會有啲  
29 咩嘢後果嘅。

30 我亦都要講一點，我覺得好重要嘅，就係我哋啲規例亦都有一啲係關於疲勞  
31 管理嘅，都係入咗法例裏面嘅，即係重型車輛（疲勞管理）規例，就同香港個  
32 做法唔同，香港就係亦都係講指引嘅啫，所以大家個焦點好唔同，而我覺得呢  
33 點好重要。我哋一路都已經喺疲勞管理有好一段時間㗎喇。

34 主席：（經傳譯員）或者唔好介紹我打斷一下先，而家係咪有人問--即係有冇問點解

1 而家有盞紅燈喺度眨緊嘅呢？

2 陳先生：（經傳譯員）我可唔可以問一個問題？咁樣問呢，就係教授，如果你覺得要  
3 將呢個工作時數變咗一個法定嘅指引，有冇啲咩弊端呢？

4 MR JOHN STANLEY：（經傳譯員）冇嘅。

5 陳先生：（經傳譯員）亦都請你可唔可以考慮一下運輸署點解佢唔將工作時數指引變  
6 為規例嗰個考慮，就係運輸署曾經就此作供，就係喺第 1 日嘅聽證會嗰度嘅，  
7 2018 年 5 月 7 號，即係第一套嘅會議紀錄，請你可唔可以睇 121 頁，第四  
8 行？

9 主席：（經傳譯員）係邊個作供㗎？

10 陳先生：（經傳譯員）係運輸署署長陳女士。

11 主席：（經傳譯員）好，唔該。

12 陳先生：（經傳譯員）或者我哋再睇番呢一頁，就變咗可以等你知道多啲背景，喺第  
13 13 頁嗰度，Duncan 律師就話「陳女士，今朝早你喺度嘅，我相信，當時我問  
14 運房局嘅代表點解呢啲有關工作時數嘅指引純粹只係指引，又唔係規例，因為  
15 個條例本身都明確訂明呢一個課題可以係規管嘅課題㗎嘅，你可唔可以協助委  
16 員會解釋點解到而家都仲唔係規例，或者都唔係一個行政嘅指引或者一個規定  
17 呢？」

18 然後運輸署署長佢答就話「因為今朝早我都喺度，同埋呢個問題提出嘅時候  
19 嗰個背景係點，就係話到底係咪可以根據--喺法例之後，作為一個專營巴士營  
20 辦商嘅要求咁樣係會更加好能夠執行呢，就唔係講話執法。

21 其實我哋睇番工作時數指引呢個歷史係好悠長，而且呢個係一個持續嘅過程  
22 㗎嘅，我哋都過去有幾次係修訂嗰個指引，而指引裏面所提嘅規定，咁樣做法  
23 嘅好處就係可以適時咁樣去檢討同埋修訂，就唔係如果佢係作為法例或者係規  
24 例，就有咁靈活，但係當如果有需要嘅時候，我哋都應該要盡力睇下係咪可以  
25 將佢做法例去檢討。

26 如果就係指引，即係意思就係能夠靈活啲，同埋可以因應當時情況就改善或  
27 者加強，呢啲喺服務層面其實都係相當明確嘅指引--嘅規定㗎嘅，呢度就係講  
28 話係巴士服務要取得一個平衡，提供巴士服務，一方面就係專營權嘅要求，另  
29 一方面就係有其--即係對於車長嗰個工作環境要提升，兩者嘅平衡。」

30 呢個就係運輸署嘅解釋就係話係方便，即係我或者可以咁樣去歸納。

31 主席：（經傳譯員）就係更加適時咁樣去檢討同修訂同埋更具靈活性。

32 陳先生：（經傳譯員）係喇。

- 1 主席：（經傳譯員）或者提醒我一下，喺 2018 年 2 月修訂之前，對上一次指引修訂  
2 係幾時呀？
- 3 陳先生：（經傳譯員）2010 年。
- 4 主席：（經傳譯員）即係八年喇？
- 5 陳先生：（經傳譯員）係。
- 6 主席：（經傳譯員）再之前呢？2010 年之前嘅修訂又係幾時呢？
- 7 陳先生：（經傳譯員）2004 年。
- 8 主席：（經傳譯員）即係六年？
- 9 陳先生：（經傳譯員）係。我諗之前嘅作供就 2018 嘅修訂就正係因為 2017 年 9 月  
10 嘅意外，所以先至有嘅。
- 11 主席：（經傳譯員）咁就即係話當時就開始咗檢討嗰個修訂？
- 12 陳先生：（經傳譯員）係，就因應嗰次意外。
- 13 主席：（經傳譯員）即係六年同八年係咪適時呢？
- 14 陳先生：Yes.
- 15 主席：（經傳譯員）係咪更適時嘅方法呢？
- 16 陳先生：（經傳譯員）或者我哋睇番嗰個修訂嗰個表格，就係 MISC-1 第 897 頁，  
17 係畀委員會參考。
- 18 主席：（經傳譯員）係有用嘅，因為呢度就解釋嗰個指引係幾時改過嚟。
- 19 陳先生：（經傳譯員）04 年、07 年、10 年、18 年。
- 20 主席：Yes.
- 21 陳先生：Professor, do you have any observation...
- 22 主席：（經傳譯員）你未問一啲一般性嘅問題之前，我哋睇到係會有一啲嘅罰則嘅，  
23 即係過去，你喺維省做咗好多年呢一方面嘅工夫，我想問有幾多人--幾常見係  
24 會檢控一啲違反嘅人呢？
- 25 MR JOHN STANLEY：（經傳譯員）好少有，主席，其實就係好少係關乎呢個定線巴  
26 士營運，都係比較係常見喺嗰啲長途嘅運作。
- 27 主席：（經傳譯員）即係嗰度係有唔同嘅需求？
- 28 MR JOHN STANLEY：（經傳譯員）係。

1 主席：（經傳譯員）即係巴士係好少？

2 MR JOHN STANLEY：（經傳譯員）係，定線巴士係好少。我就亦都係想評論一下講  
3 方唔方便嘅問題，我覺得你要去決定到底啲啲嘅指引抑或係規例係對於當局係  
4 咪方便，同埋對於公眾啲個嘅結果，會唔會係結果對於合規方面會唔會係好  
5 啲，我個人覺得應該係要更加著重啲個遵守啲個規則多過啲個行政嘅方便。

6 主席：（經傳譯員）係咪話如果係違反嘅時候，呢一方面嘅檢控係好少嘅呢，即係關  
7 於定線巴士啲個嘅工作時數啲個法例？因為佢哋合規嘅程度係高啲。

8 MR JOHN STANLEY：（經傳譯員）我相信係，主席，其實佢哋啲定班次同埋係編更  
9 嘅程序都係好少係需要法例嘅，佢哋係都有一啲嘅走盞位，佢哋就唔需要咁近-  
10 -即係唔會話去到砸界，令到佢哋--確保佢哋有一啲嘅時間，等佢哋係有小休  
11 嘅。

12 主席：（經傳譯員）係。講到話香港工作時數指引啲個合規情況，你有冇睇過呀？

13 MR JOHN STANLEY：（經傳譯員）大概係九成。

14 主席：（經傳譯員）我記得好似係百分之九十七。

15 MR JOHN STANLEY：（經傳譯員）我就知道係大概有百分之四就唔合規嘅、點解同  
16 埋啲個嘅結果係點。

17 主席：（經傳譯員）好喇，唔該。

18 陳先生：（經傳譯員）我想去下一個嘅題目，希望係比較直接啲，就係啲啲的安全數據  
19 嘅透明度。你喺 69 頁啲度講，喺 69 頁第一點，你話「有一啲好堅實嘅證據就  
20 係支持將巴士安全啲啲嘅--即係喺啲個遠期計劃啲啲關於巴士安全啲一章就係  
21 要公布嘅，因為呢個係--如果有意外嘅時候，對社會都係造成一定嘅代價  
22 嘅。」冇錯，你係咪講緊一啲嘅分析數據呀？

23 MR JOHN STANLEY：（經傳譯員）係呀，我覺得而家喺呢一個巴士安全啲啲嘅篇章  
24 裏面講嘅嘢係好有資訊價值嘅，好多嘅資訊，我相信都係符合公眾利益，如果  
25 係廣為嚟到係公布嘅話，譬如話啲啲嘅分析，就關於點解會有意外同埋意外啲  
26 個表現等等。

27 主席：（經傳譯員）唔係啲啲嘅關連，同埋啲啲嘅--譬如話一日揸幾個鐘頭、司機  
28 嘅年齡呢一類嘅比較。

29 MR JOHN STANLEY：（經傳譯員）冇錯，譬如話服務咗幾多年啲啲嘅意外率、揸咗  
30 幾多個鐘頭嘅意外率，我覺得呢啲係一啲好嘅分析，就唔應該只係畀好少撮人  
31 嚟到去睇嘅，呢啲資料係如果係畀公眾知道，係符合公眾利益嘅，就可以有啲  
32 好好嘅研究可以嚟做，大家就可以係更加好咁樣係處理交通意識呢一方面嘅挑  
33 戰，令到業界同埋公眾都係做得更好。

1 主席：（經傳譯員）委員會好明顯係同意你嘅睇法嘅，因為我哋最初想攞得好多嘅材  
2 料，最初都係唔肯畀我哋嘅，我哋而家就係都採取咗好多嘅步驟，就攞到，而  
3 家佢哋肯畀我哋，因為呢啲嘅資料都係相關嘅。

4 MR JOHN STANLEY：（經傳譯員）係呀，呢個數據可以話畀你聽係一啲你需要關注  
5 嘅、聚焦嘅項目。我覺得由呢一個六至到八個小時呢一個一更呢一點個意外  
6 率都係好重要嘅，我就睇唔到一定要睇到呢啲嘅資料，有一啲嘅分析，我先至  
7 可以覺得有好啲嘅安全表現嘅。

8 主席：（經傳譯員）仲有一點嘅，我就係提一點，要黃女士可以幫我哋搵嘅，你就話  
9 你注意到運輸署喺一封信就話--即係佢寫畀九巴，即係去問點解係會有意外率  
10 嘅增加，我哋而家就有九巴嗰個遠期報告，而家我諗我哋有個解釋喇，就係最  
11 新嘅報告，喺 2018 年 8 月畀我哋，喺我哋要求之下先係提供嘅，就係九巴其中  
12 一個成員嘅代表就話畀我哋聽佢哋就係會提供畀運輸署嘅，據我所記得係 8 月  
13 18 號。

14 陳先生：（經傳譯員）係呀，最新嗰個版本就係擺咗落我哋嘅文件夾度，我就想請黃  
15 女士係幫我哋係同運輸署係攞嘅。

16 主席：（經傳譯員）我而家想你咁做：個解釋係乜嘢呢？點解個意外率係上升呢？你  
17 繼續㗎。

18 陳先生：（經傳譯員）係。Weston 先生都係講到類同嘅一點，就係講到呢啲數據係  
19 咪應該要更加透明，我好想請你哋去睇下第 153 頁。

20 主席：（經傳譯員）第幾段呀？因為我嗰個係標示版本嚟嘅。

21 陳先生：（經傳譯員）係 Weston 先生佢自己嗰度嘅第 39 頁。

22 主席：（經傳譯員）我有。

23 陳先生：（經傳譯員）根據--84 段，就係安全數據嗰個嘅問題，「好明顯喺倫敦嘅  
24 經驗，就係話有關嘅數據，公開啲，就係同巴士網絡嘅安全表現係有關嘅，亦  
25 都令到持份者同埋公眾係可以睇得到，更加聚焦到運輸當局同埋佢嘅巴士營運  
26 商喺安全方面嗰個計劃嘅，應該係一個更加開放嘅態度去面對有關嘅數據嘅。  
27 我哋應該去睇下安全嘅數據喺香港嗰個嘅營運專營巴士網絡應該係公開嘅。」  
28 你同唔同意呢一啲嘅觀察？

29 MR JOHN STANLEY：（經傳譯員）我完全同意嘅，我都認為喺倫敦當局佢哋差唔多  
30 係有呢一個嘅--同業睇唔到之間嗰個數據同埋資訊嘅，佢哋就亦都係有嘗試係  
31 去隱瞞，佢哋會將佢擺喺呢度，所有嘢，好嘅、壞嘅都擺晒喺度，就等佢哋可  
32 以處理到有關嘅挑戰。我覺得係令到成個過程令人更有信心，所以我好支持  
33 嘅。

34 主席：（經傳譯員）呢個其實喺網上係搵到佢哋每一季都公布呢啲數據？

1 MR JOHN STANLEY：（經傳譯員）係。

2 陳先生：（經傳譯員）可唔可以去講到我今日最後嘅一個題目，就係車長嘅訓練？78  
3 頁，你嘅文件 78 頁，係第二份報告，你有一段係講車長訓練，呢度就係話司機  
4 嘅訓練嘅要求，你哋喺墨爾本嗰啲嘅合約係寫埋嘅。

5 MR JOHN STANLEY：（經傳譯員）（沒有可聽到的回答）

6 陳先生：（經傳譯員）喺香港，運輸署最近就係公布咗佢哋嘅作業守則，我就唔會講  
7 呢一個守則嘅詳情，但係喺車長訓練方面有一點我想問你嘅，就係疲勞嘅管理  
8 或者係訓練，就喺你嘅文件 90 頁係有提到嘅，90 頁，第二段開始，你嘅建議  
9 就係話疲勞管理呢一方面嘅訓練，你就話：

10 「喺墨爾本做十三至十四個鐘就會令--或者喺香港，就會係令大家係要問  
11 到底嗰啲司機點樣用剩低一日嘅時間呢？佢哋有冇足夠嘅睡眠或者休息去避免  
12 疲勞呢？同埋喺佢哋嘅訓練裏面點樣係加埋疲勞嘅管理呢？喺運輸署嘅 1448  
13 頁，佢哋有一啲嘅附件嘅，就係關乎車長嘅訓練同埋後來畀立法會、交通事務  
14 委員會嘅一啲嘅文件，嗰度有提到係疲勞管理嘅訓練。呢一個喺墨爾本司機訓  
15 練嘅重要一環嚟嘅，包括就係要司機注意呢個飲食同埋做運動嘅。呢啲訓練亦  
16 都係包埋嗰一啲嘅督察人員、督導人員，去確保佢哋唔會編更嘅時候唔會編一  
17 啲可能會疲倦嘅司機係去當更嘅。而呢一個嘅訓練，運輸署亦都有一個作業嘅  
18 守則，就係講到呢一個專營巴士嗰個嘅訓練框架係一個好嘅建議嚟嘅，呢個亦  
19 都喺畀立法會嘅文件係包咗落去。呢個確保所有嘅營運者知道乜嘢叫做良好嘅  
20 標準同埋能夠將呢啲嘅標準令到司機係認識得到嘅。」

21 你可唔可以講下乜嘢係叫做疲勞管理嘅訓練呢？

22 MR JOHN STANLEY：（經傳譯員）係喇，喺墨爾本有關嘅方面佢哋訓練新嘅司機嘅  
23 時候，或者係佢哋做一啲再培訓計劃嘅時候，疲勞管理都係一個好重要嘅一環  
24 嘅。

25 有好趣，喺我哋嘅國家法例裏面，係亦都有採納咗喺維省嘅法例裏面有一條  
26 嘅法令，就係重型汽車國家法應用法令，我喺第 33 同 34 頁都係有講嘅。佢裏  
27 面講到好多疲勞嘅徵狀，呢個就係話我哋維省對於疲勞呢一方面係好重視嘅。

28 如果你睇 34 頁，你就睇到我哋引述咗法例，嗰度係將國家法例擺咗落去維  
29 省嘅法律嗰度，佢就講到「一啲疲勞嘅徵狀，即係話一個人揸完一個重型車輛  
30 之後，可能會係疲倦嘅（呢啲徵狀係會點呢？係之前、揸車嘅時間同埋揸完車  
31 之後嗰啲徵狀都係有嘅）。」

32 呢個可能就係會將嗰個訓練嘅內容係包埋呢啲。好多嘅營辦商會係話譬如有一  
33 啲嘅營養師，亦都係會教佢哋點樣做下運動，或者每日就係坐--因為你坐十  
34 至十一個鐘一日嚟到揸車，就係喺司機訓練方面係好重要嘅，因為我哋都係要  
35 令佢哋去明白乜嘢係引致疲勞同埋帶嚟嘅相關嘅安全風險。

1 陳先生：（經傳譯員）你整體嘅建議就係呢一啲嘅訓練係應該成為呢一個運輸署嘅作  
2 業守則一部分。

3 MR JOHN STANLEY：（經傳譯員）係嘅，我覺得係呢啲作業守則係一個非常之好嘅  
4 做法，可以係提高嗰個大家對於一般基本訓練嗰個嘅水平，我覺得亦都要加埋  
5 疲勞呢一點喺佢訓練裏面嘅，喺應用方面，我諗我都係對於呢啲指引係畀咗我  
6 嘅意見，我覺得呢啲仍然係適用嘅。你哋呢一方面係畀我哋墨爾本係緊一啲，  
7 我諗個重點就係應用方面係點，我哋而家講緊嗰個嘅一般嘅規範就係四十四至  
8 四十五個鐘，但係我覺得係喺香港可能嗰個時數係更高，根據我自己所睇嘅一  
9 啲證供有咁嘅結論。

10 主席：（經傳譯員）係，好多時係高過呢個時間嘅。

11 MR JOHN STANLEY：（經傳譯員）所以我哋要睇下疲勞管理喺呢度係更加重要嘅。

12 主席：（經傳譯員）呢個喺嗰個作業嘅守則裏面係冇嘅？

13 MR JOHN STANLEY：（經傳譯員）（沒有可聽到的回答）

14 主席：（經傳譯員）對唔住，你咁樣吸頭，我哋嘅謄本寫唔到嘅。

15 MR JOHN STANLEY：（經傳譯員）係喇，我就冇喺呢個作業守則嗰度見到呢一點  
16 嘅。

17 主席：（經傳譯員）或者我哋就應該要係記住呢一點，因為我哋而家係--我哋搵番個  
18 啲作業守則出嚟，因為而家係講緊訓練。

19 MR JOHN STANLEY：（經傳譯員）唔好意思，我睇過㗎喇。

20 主席：（經傳譯員）我哋有冇一個嘅參考編號呀？喺我哋嘅文件度有冇一個編號？

21 陳先生：（經傳譯員）TD-1 470 頁，嗰個嘅內容就係喺 471。

22 主席：（經傳譯員）唔該。

23 陳先生：（經傳譯員）472 頁，其實主要就係話佢哋冇提到任何管理疲勞方面嘅訓  
24 練。

25 主席：（經傳譯員）冇特定嘅指引，係咪呀？

26 MR JOHN STANLEY：（經傳譯員）係，我建議就係可以係睇下職業健康同埋安全嗰  
27 一環，係(e)嗰一度，因而呢個其實--呢度可能要加強，因為呢個係同職業健康  
28 同埋安全有關嘅，但係係要有一個--要特別係集中呢一點。

29 主席：（經傳譯員）唔該。

30 陳先生：（經傳譯員）主席，從教授嘅兩份報告，我係咁多問題。而家仲有兩個嘅事  
31 項，就係今日喺發問期間主席提到嘅，首先就係運輸署所收到嘅嗰個嘅關於安

1 全帶安裝個嘅問題。我記得個一個嘅篇章，但係我就想畀你個嘅頁數，呢  
2 個係喺個個工作小組第一次會議，2018 年 3 月 1 號開始講嘅，個嘅頁嘅編碼  
3 就係 KMB-12 4869-1，喺第 16 段，我而家將佢擺咗出嚟，喺呢一度係城巴同  
4 埋新一巴就係嚟到去質疑為所有嘅座位安裝安全帶係咪實際可行嘅，因為要車  
5 長去確保乘客都係戴安全帶都係好難嘅，兩間巴士公司亦都係提出一個嘅關  
6 注，就係話企喺嗰啲人點樣戴安全帶呢？

7 主席：（經傳譯員）等一陣，等我讀出嚟，呢度就係話「全面嘅檢討喺巴士嘅安裝番  
8 安全帶。」

9 陳先生：（經傳譯員）係，個個會議嘅日期係 2018 年 3 月 13 號，呢個係立法會交  
10 通事務委員會一個會議，個個會議就係關於 2018 年 2 月 15 號，亦都得到秘書  
11 處同埋黃女士嘅幫手，我哋而家搵到個個相關嘅立法會會議文件，我哋可以討  
12 論喇。呢度第一頁，我哋睇到係一個立法會交通事務委員會，2018 年 2 月 15  
13 號一個特別會議嘅會議紀錄。

14 主席，想請你睇下第 19 頁，第 18 頁底，第 78 段就係個個--主席，而家  
15 你要睇番個背景，陳克勤就有以下嘅動議，第 19 頁，就係睇番個動議嘅內  
16 容，就係「本事務委員會深表遺憾，對於喺 2 月 10 號嘅大埔路嚴重車禍，大約  
17 有十九人死亡、六十六個受傷人士，為咗避免同類事情再發生，委員會要求政  
18 府當局於及後專營巴士公司檢討巴士車長嘅編制同埋提供合理工時、休息時  
19 間、午膳時間同埋薪酬，同埋係強制定期訓練，就係訓練呢個安全駕駛態度畀  
20 全職同埋半職車長去確保就係話車長本身係能夠有良好駕駛特質。」

21 第 2，「製造一個防滑馬路表面同埋設立警告路牌同埋安裝車速鏡頭喺上述  
22 路段，立即進行同埋睇番嗰啲高危路段，同埋加快加強措施去確保道路安全使  
23 用者嘅安全。」

24 主席：（經傳譯員）唔該等一等。個背景就係--你個個相關嘅路段就係大埔路？

25 陳先生：（經傳譯員）係，因為係之後舉行嘅會議，所以就應該係指係個個路段。

26 第 3，「就係探討去加強巴士嘅安全裝置嘅方法，譬如去加強高危座位嘅保  
27 障，譬如話喺更多座位加裝安全帶同埋分階段強制乘客穿戴安全帶。」譬如話  
28 喺車長座位安裝外部鏡頭同埋就提及其他嘅裝置，呢啲就係成個作出安全帶要  
29 求嘅背景，由事務委員會作出嘅。而就睇番第 79 段就係個個動議係獲得通過  
30 嘅。

31 我希望都至少可以回答主席部分嘅問題，咁會同運輸署--因為都同運輸署  
32 再提及。

33 主席：（經傳譯員）我哋會做，因為佢哋冇同我哋講係咩嘢嚟嘅，呢個似乎係一個合  
34 理嘅解釋。

35 陳先生：（經傳譯員）都可能係嘅。

1 主席：（經傳譯員）呢個係參照番一宗嘅交通意外，佢哋用個眾數。

2 陳先生：（經傳譯員）我哋喺嗰個文件夾第 2003 年至 6，當呢個問題係提及過，但  
3 係譬如話呢啲係可能係運輸署上嚟作證嘅時候，可以再提及嘅。

4 主席：（經傳譯員）我諗你係講番嗰個討論同埋嗰啲文件，譬如話運輸署嚟講，去考  
5 慮要唔要求巴士提供安全帶，但係就唔贊成嘅。

6 陳先生：（經傳譯員）係。

7 主席：（經傳譯員）如果你話畀教授聽會有用，同埋你可以話畀我聽有邊個司法管轄  
8 區檢視過，但係認為呢個唔係一個好嘅提議呢？呢個問題喺十五年前已經係檢  
9 視過。

10 陳先生：（經傳譯員）我認為個重點就係我唔會話搵番嗰份文件，但係我諗個重點就  
11 係話佢哋睇番--多次睇過同埋決定就話唔會話太有用，主要係根據番嗰個海外  
12 司法區嘅經驗。

13 主席：（經傳譯員）所以你譬如話睇番就係話有啲轉去大馬士革轉營，睇番佢今年 4  
14 月發生咩嘢事喇。

15 陳先生：（經傳譯員）我想要委員會去睇番 SEC-1 嘅文件夾，係 274 頁。

16 主席：（經傳譯員）等一陣。編理文件嘅人似乎唔為意就係話呢啲夾似乎有少少損  
17 壞。

18 陳先生：（經傳譯員）睇番 274 頁。

19 主席：（經傳譯員）而家我到咗，我有嘅。

20 陳先生：（經傳譯員）個日期係 2007 年 1 月，你睇一睇番嗰個第 280 頁有個日  
21 期，呢個係一個運輸署所預備嘅文件，係個工務部，呢個係一個畀交通事務委  
22 員會嘅進度報告，係有關於改善專營巴士嘅安全嘅措施，睇番第 3 段，你可以  
23 睇番有關喺現有專營巴士加裝安全帶嘅提述，而有關海外數據，第 4 段，第  
24 275 頁，就係：

25 「我哋從其他國家收集有關要求安裝同埋配戴安全帶嘅巴士方面，目前或者  
26 我哋未有搵到一個國家有關於法定規定要求提供安全帶作為都市用途同埋可以  
27 畀企位嘅乘客用嘅，而佢哋係--一啲交通當局佢哋認為嗰個規定配戴安全帶嘅  
28 利益係不確定嘅，而嗰個研究結果嘅撮寫嚟講，可見附錄 I。」

29 呢個係 281 頁，呢個就係 2007 年 1 月。

30 主席：（經傳譯員）所以譬如話呢啲以上嘅司法管轄區，譬如就係美國、加拿大、英  
31 國、澳洲嘅維多利亞省、紐西蘭、荷蘭同埋新加坡？

32 陳先生：（經傳譯員）係，所以亦都喺 2018 年畀交通事務委員會嘅文件方面亦都係

1 有提及上述嘅國家司法管轄區，所以我哋今日亦都係睇到。

2 主席：（經傳譯員）呢個文件而家睇番，就係回應嚟--274 年嘅文件，係回應番嚟  
3 2006 年立法會交通事務委員會嘅早前嘅討論。

4 陳先生：（經傳譯員）係，呢個你可以搵文件之前，2006 年嘅文件就係 266 頁有。

5 主席：（經傳譯員）本身係咪好似今年 2 月、3 月咁，係咪都可以同樣--差唔多嘅寫  
6 法，就要求話要求全面檢討？

7 陳先生：（經傳譯員）係嘅，都好似嘅。

8 主席：（經傳譯員）你可以睇番 266 頁。

9 陳先生：（經傳譯員）就係個文件嘅開始，而相關嘅部分就係 2016 年 10 月，就有  
10 關個段落就係第 19 段，我想讀少少出嚟，因為你睇番就係字眼，個「交通意  
11 外」呢個字眼，主席亦都係留意到，就睇番第 271 頁第 18 段，「因應於最近嘅  
12 交通意外，運輸署亦都係同專營巴士營運商檢討有關於嚟現有巴士安裝安全  
13 帶，考慮到譬如技術難度，譬如話佢哋座位嘅結構力量同埋固定點同埋巴士嘅  
14 設計。」

15 所以亦都係有個同樣嘅步驟再重複一次。「然後亦都係研究過海外有關於  
16 安裝同埋配戴安全--嚟巴士安裝安全帶嘅做法。」而暫時嚟講，係唔見到有國  
17 家係有啲咁嘅規定。

18 主席：Yes. Thank you. So that's 2006, 2007.

19 陳先生：（經傳譯員）睇番我哋係搵唔到 2007 年至到 2018 年當呢個議題再度浮  
20 現。主席同我提及嘅第二個問題，...

21 主席：（經傳譯員）因為頭先我哋畀教授睇過以上嘅文件，呢啲係由運輸署去協助，  
22 表面嚟講，呢個過去都有去檢討，同埋去參考過其他司法管轄區，譬如澳洲維  
23 省就話香港係唔需要，有冇啲一般性原因或者啲香港嘅特定元素或者係一般嘅  
24 原因而去改變個意願呢？

25 MR JOHN STANLEY：（經傳譯員）關於澳洲嘅情況，當然係 90 年代，對於能夠保  
26 障個防撞衝擊係個體積，主要係額外嘅--巴士嘅額外利益--額外效益，而呢個  
27 文件草擬嘅時候，主要係進行--嚟呢個情況係進行成本效益分析，點解香港嘅  
28 情況會唔同，我相信有啲人嚟上層意外嘅發生機率可能會較高，我本身有答  
29 案，但係可能我去探討，譬如話受傷嘅機率，坐上層會唔會高啲呢？相比於單  
30 層巴士，譬如係墨爾本有嘅，令到有理據係支持嚟上層安裝安全帶。我唔認為  
31 我哋下層嘅座位嚟講，同我哋嘅巴士會好大分別。

32 主席：（經傳譯員）睇番你點樣去分析，我哋係咪需要客觀數據去作出判斷，有幾多  
33 人掙出巴士，有幾多會翻車，...

- 1 MR JOHN STANLEY: (經傳譯員) 呢啲係本身應該去做嘅分析, 去回答呢啲問題。
- 2 主席: (經傳譯員) 多謝。陳大律師, 你會去到最後個範疇喇。
- 3 陳先生: (經傳譯員) 主席之前同我提及, 喺 2018 年嘅信, 由運輸署嘅書信, 就話  
4 留意到有啲嘢就係上升㗎...
- 5 主席: (經傳譯員) 譬如話個意外率係上升。
- 6 陳先生: (經傳譯員) 講係 TD-5 1729。
- 7 主席: (經傳譯員) 呢個係由運輸署嘅信函, 就喺個五年遠期計劃嘅更新之前, 就要  
8 求九巴去回應一啲問題, 如果我哋係嗰個意外涉及率嗰方面。
- 9 陳先生: (經傳譯員) 嗰個要求係喺個 1729 頁嘅底部, 「貴公司係要求進行 2017  
10 年有關九巴嘅交通意外, 睇番 2015 同 2016 年嘅情況, 喺附錄 E, 應該係計入  
11 嗰個趨勢、本質同埋個原因同埋搵出個原因。」而家係我哋去第 5011 頁, 呢個  
12 係最新嘅巴士安全部分, 本身唔係好容易搵到呢啲意外上升嘅原因。
- 13 主席: (經傳譯員) 係咪有針對回應呢?
- 14 MR JOHN STANLEY: (經傳譯員) 冇直接回應。呢個主要係佢哋根據路線、巴士型  
15 號、工時等, 本身有相當幾段, 主席或者會覺得有相關嘅, 譬如 5025, 呢個係  
16 根據意外嘅種類, 8.2.6.7, 「其他道路使用者嘅駕駛態度係預防, 唔係由巴  
17 士車長引起嘅車禍嘅主要原因」, 主要係其他道路使用者嘅駕駛態度, 似乎係  
18 可以歸因呢樣嘢。
- 19 主席: (經傳譯員) 我睇到。
- 20 陳先生: Then, in a similar vein...
- 21 主席: (經傳譯員) 唔該等一陣。就唔係佢哋嘅--唔係巴士司機嘅錯, 係其他人嘅  
22 錯。
- 23 陳先生: (經傳譯員) 睇番類似嘅段落, 譬如 5028, 就係 8.2.7.5, 畀我讀一讀,  
24 就係「喺巴士站嘅非法泊車係令到巴士唔正確靠站嘅原因, 然後會危害道路  
25 使用者嘅安全, 因為乘客需要喺馬路上落客, 而唔係利用巴士站, 而令到意外  
26 嘅機會增加。而巴士同埋其他車輛非法--要爬嗰啲非法嘅泊車嘅頭令到一個安  
27 全--對於乘客係有一個安全隱患, 同埋亦都對其他道路使用者嚟講。」同樣  
28 地, 呢啲其他嘅引述亦都係有提及嘅。
- 29 仲有一項資料係畀委員會同主席參考嘅, 係 5031, 又搵到類似嘅, 5031,  
30 我哋有一個分析, 就係跟分區去分析嗰啲意外嘅, 喺 8.2.9.3 段, 即係嗰頁嘅  
31 底部, 你睇到九巴話「交通擠塞係喺繁忙地區導致高意外率嘅一個原因, 公司  
32 就建議採取積極措施解決交通擠塞嘅問題, 我哋會同政府討論。」

1 然後跟住就講話係巴士優先嘅，作為一個措施，可以處理呢個問題，然後亦  
2 都有提及其他導致高意外率嘅因素。

3 主席：（經傳譯員）唔係好清晰睇到點解係交通擠塞會導致交通意外，係咪因為令到  
4 司機揸得差啲，所以好易撞到其他車呢？

5 陳先生：（經傳譯員）我諗佢哋就可能真係嘗試咁講。主席，我希望咁樣係幫到委員  
6 會。

7 主席：（經傳譯員）你之前係有睇過呢啲數據，係咪呀？教授。

8 MR JOHN STANLEY：（經傳譯員）有嘅，就係講話交通擠塞同意外有關係，其實都  
9 有好多嘅研究都顯示交通流量係會同交通意外有一個正比嘅。

10 主席：（經傳譯員）即係話更加多目標可以撞到，係咪咁解？

11 MR JOHN STANLEY：（經傳譯員）係，係，冇錯。

12 主席：（經傳譯員）即係你要更加要小心知道兩邊都可能有人、有車，係咪咁解呀？

13 MR JOHN STANLEY：（經傳譯員）係。

14 主席：（經傳譯員）係，係從嗰個角度睇，交通流量同交通意外率係有個關係嘅。

15 MR JOHN STANLEY：Yes.

16 主席：（經傳譯員）好，唔該教授。我諗第一點，就話其他司機嘅態度，都好清楚，  
17 就係嗰啲司機造成意外，係咪有一啲數字細分，就話譬如話九巴有冇評估過到  
18 底邊啲人負責，即係係要對個交通意外負責任嘅呢？我諗喺香港，我哋所知道，  
19 起碼係九巴嗰方面，呢一類咁樣嘅交通意外評估，我諗我咁講應該就啱  
20 嘅，就由係保險公司開始嘅，佢哋就嘗試想將個責任推畀其他人，係咪咁呀？

21 陳先生：（經傳譯員）係 5020 就有按成因劃分嗰啲意外嘅，將佢分類，就係譬如話  
22 係巴士車長造成，同埋或者唔係嘅理由，第一部分就係因為巴士車長造成嘅意  
23 外，呢度有細分。

24 MR JOHN STANLEY：（經傳譯員）喺嗰個表，最常見嘅就係交通擠塞，就即係話有  
25 保持安全距離，同前車。

26 主席：（經傳譯員）係喇，其實如果有交通擠塞，反而就可以做到啲，係咪？

27 MR JOHN STANLEY：（經傳譯員）難啲喇。

28 主席：（經傳譯員）我就睇到相撞形嘅意外，就算有咩嘢交通——即係唔係好多車，都  
29 其實有危險嘅，係咪呀？仍然都係咁嘅。

30 MR JOHN STANLEY：（經傳譯員）係，多謝你。

1 陳先生：（經傳譯員）除非仲有咩嘢協助委員會喇。

2 主席：（經傳譯員）冇㗎喇，多謝你。想多謝你畀所有嘅資料，教授。

3 羅先生：（經傳譯員）有一個問題，喺墨爾本，我哋睇到咁多資料，或者香港都可以  
4 學習一下。有啲新嘅措施要提出，邊個會推動嘅呢？無論係新技術又好，咩嘢  
5 都好，係承辦商㗎，政府㗎，委員會㗎，定係邊個會通常推動呢啲改變？

6 MR JOHN STANLEY：（經傳譯員）有兩方面嘅，一個就係汽車製造商，譬如好似富  
7 豪、斯堪尼亞等等，或者平治，佢哋都係好想喺個市場上佔有優勢，所以特別  
8 係著重安全，另外一樣，就係個別嘅承辦商，我喺我報告都提過一啲例子，譬  
9 如話新加坡嗰間 CDC，佢哋就喺墨爾本運作，但係佢哋就有安裝呢啲新嘅儀器  
10 同埋設備，因為佢哋新加坡都有咁做，佢哋都係經常去睇下仲有啲咩嘢方法可  
11 以改善安全，所以佢哋嘅態度係好好嘅。佢哋就覺得如果佢哋自己屋企人坐都  
12 唔安全，肯定就唔足夠，就畀乘客都唔得嘅，所以有時就係承辦商佢哋自己會  
13 提出嘅，可能係加裝或者睇下市場上有啲咩嘢解決方案。所以就係——當然亦都  
14 睇下新嘅車輛可以加啲咩嘢。

15 羅先生：（經傳譯員）即係就算冇明確嘅同安全有關嘅主要表現指標，佢哋都係會咁  
16 做，係咪呀？

17 MR JOHN STANLEY：（經傳譯員）係，佢哋會自願做，冇錯，係。

18 羅先生：（經傳譯員）假設喺計算對嗰個巴士營運個成本相對於交通意外係點樣，因  
19 為其實有交通意外，根本佢哋架車會損毀㗎，佢哋都要自己擺錢出嚟去整，所  
20 以都係一個成本嘅考慮，係咪？

21 MR JOHN STANLEY：（經傳譯員）係呀，肯定係，所以加裝一啲其他嘅——事後加裝  
22 一啲設備，都係肯定係有用，可能對乘客會安全啲，對於佢哋個業務成本都係  
23 可能有好處嘅。譬如話神眼咁呢個技術，要裝就大概係 1,500 澳元，每一架  
24 車，都係好嘅投資㗎嘅。

25 主席：（經傳譯員）係呀，因為如果一旦發生意外，譬如話你要賠償受傷嘅人，然後  
26 架車又損毀㗎，用唔到，計起嚟，個成本可能都係值嘅。

27 MR JOHN STANLEY：（經傳譯員）係，因為就的確係有呢啲考慮嘅。

28 羅先生：（經傳譯員）好似維省嘅運輸安全局，有呢啲咁嘅機構，點樣可以確保佢唔  
29 係另外一個嘅政府架構，即係一個官僚架構咁呢？有冇即係咩嘢指標畀佢哋，  
30 或者有啲咩嘢方法鼓勵佢哋會盡力係做到最好呢？

31 MR JOHN STANLEY：（經傳譯員）我唔知道有冇定啲目標畀佢哋嘅，我要返去睇一  
32 睇，然後話番畀你聽，但係你可以放心，因為佢哋係負責規管巴士營辦商，巴  
33 士營辦商會盡佢哋嘅能力去做嘅，要確保運輸安全總監嘅要求做得到，唔會只  
34 係變成另一個嘅官僚機構，呢方面可能主要係睇個顧客，因為顧客會確保有關

1 當局係真正做到佢嘅功能，目前運輸安全總監同埋承辦商之間嘅關係係非常  
2 好，因為佢哋都明白如果佢哋可以有一個更--建立到更強嘅安全風險管理嘅文  
3 化係對雙方都好嘅。我或者返去墨爾本之後，如果嗰個颱風畀到我哋走，我就  
4 可以畀番啲資料你。

5 羅先生：（經傳譯員）好，唔該晒。

6 主席：（經傳譯員）仲有冇乜嘢呀？陳律師。

7 陳先生：（經傳譯員）冇。

8 主席：（經傳譯員）好，教授，我知道我哋今日超時咗少少，但係我哋喺計算需要時  
9 間嗰度都幾準確嘅，不過我哋喺呢度就要多謝你畀咗咁多協助畀我哋，特別有  
10 你嘅報告可以幫到我哋去確立，喺我哋心目中有啲咩嘢問題特別相關，同埋可  
11 能係考--我哋喺香港亦都已經係聽過啲證供，都係好有用嘅，我哋就期待如果  
12 你覺得仲有啲乜嘢係適合要畀我哋嘅，我哋都期待可以收到嘅。好多謝你協助  
13 委員會，祝你返屋企嘅旅途愉快，無論幾時都好。

14 MR JOHN STANLEY：（經傳譯員）好，多謝，非常多謝。

15

16 2018 月 9 月 15 日

17 下午 5 時 38 分押聆訊押後

*[Blank Page]*

Monday, 24 September 2018

(10.00 am)

EVIDENCE FROM THE HONG KONG POLICE FORCE: MS CHAN YI PING,

MR STEPHEN BAKER, MS YAU SIN MAN, MR LEE TAI WAI,

MR CHEUNG TIN LOK (simultaneous interpretation was used

where indicated)

CHAIRMAN: Good morning, and good morning, Chief

Superintendent Yau. Thank you for attending and we

thank your colleagues for attending to help us.

The way in which the proceedings will unfold you are no doubt familiar with. We have counsel, and leading counsel Ms Wong will be asking questions today. The questions in the first place will be directed towards you, but if one of your colleagues is better able to assist us, by all means defer to that colleague and we will happily take information/evidence from that person or any one of the other colleagues you wish to depute to perform that role.

If you have any difficulties with understanding questions, please state so and we'll see if we can't make sure it's elaborated.

Ms Wong.

Examination by MS MAGGIE WONG

MS MAGGIE WONG: Thank you, Mr Chairman, Ms Yau, and ladies

and gentlemen, for coming. I will be asking questions

1 on behalf of the committee.

2 I believe the police have provided in total eight  
3 responses, letters of reply to the committee's  
4 enquiries, providing different answers to different  
5 aspects, and they are all found in the miscellaneous  
6 bundle.

7 I will be first of all directing my questions on  
8 a number of topics. The first topic is in relation to  
9 the statistics of accidents.

10 Ms Yau, I believe that the police have developed  
11 a database on all traffic accidents; is that correct?

12 MS YAU SIN MAN: (Via interpreter) May I answer in Chinese?

13 MS MAGGIE WONG: Yes.

14 MS YAU SIN MAN: Correct.

15 MS MAGGIE WONG: Thank you. I need to pause a bit so that  
16 it can be translated.

17 And this database, can you tell us whether it is  
18 based on the investigation reports compiled by the  
19 police from time to time?

20 MS YAU SIN MAN: (Via interpreter) I will ask my colleague.

21 We have a database on traffic accidents. The  
22 information is collected from the police regions. We  
23 would also state the causes of accidents in that  
24 database.

25 MS MAGGIE WONG: Now, in compiling these statistics, what  
26

1 information would you use in compiling this data?

2 MS YAU SIN MAN: (Via interpreter) You mean what information  
3 would be collected by us?

4 I will ask my colleague to explain in detail the  
5 information that we will collect.

6 MR STEPHEN BAKER: In general terms, the information would  
7 include the type of vehicle, the number of casualties,  
8 the type and nature of the casualties, whether it was  
9 a serious injury, slight injury or a fatality, and also  
10 a list of driver contributory factors, things which,  
11 according to the investigating officer, contributed to  
12 the cause of the accident.

13 These are compiled pretty much in a tick-box kind of  
14 way and submitted electronically to the Road Safety  
15 Unit, and then shared with the Transport Department, to  
16 enable the Road Safety Unit and the Transport Department  
17 to analyse the causation factors of traffic accidents,  
18 in order to design and adjust their road safety  
19 strategy.

20 CHAIRMAN: Is there a template, therefore, for this method  
21 of providing the data?

22 MR STEPHEN BAKER: Yes, my Lord.

23 CHAIRMAN: And do you have a copy of the template?

24 MR STEPHEN BAKER: I do.

25 CHAIRMAN: Would you be able to provide us with it?

26

1 MR STEPHEN BAKER: I would, sir, yes.

2 CHAIRMAN: Can you do that now?

3 MR STEPHEN BAKER: Yes.

4 CHAIRMAN: We will have it copied, please. (Handed).

5 MS MAGGIE WONG: Thank you.

6 Mr Baker, in this data form, in finding out what is  
7 happening in these accidents, you would wish to find  
8 out, first of all, how people are injured, where they  
9 are injured, and why they are injured; is that correct,  
10 in summarising the data to be collected?

11 MR STEPHEN BAKER: The information mainly concerns the  
12 causation factors of the accident rather than the type  
13 of injury. Classification of the type of injury is more  
14 limited to whether it was a serious injury, that is  
15 defined by the amount of time the person spent in  
16 hospital, or if it was a slight injury, or if it was  
17 a fatality.

18 CHAIRMAN: Is that the same definition that one finds in the  
19 back page of the traffic report that the police publish?

20 MR STEPHEN BAKER: I haven't seen that document recently,  
21 sir.

22 CHAIRMAN: Let me provide you with a copy of it.

23 Can you give this to the chief superintendent.

24 It has an explanatory note on the back page. For  
25 the chief superintendent, please. Just give it to the  
26

1 chief superintendent. (Handed).

2 There is a list of terms defined there. It's on the  
3 back page.

4 MR STEPHEN BAKER: That's correct, sir, yes.

5 CHAIRMAN: So that method of definition is one that's  
6 employed in the template?

7 MR STEPHEN BAKER: It's not in the template, sir, but it's  
8 how we classify them.

9 CHAIRMAN: Thank you very much. We will have that copied  
10 now, if we may. Thank you.

11 MS MAGGIE WONG: Thank you.

12 When this information has been compiled, would other  
13 departments or in particular the Audit Commission  
14 conduct an independent audit of the information  
15 collected by the police and the Transport Department --  
16 is that correct?

17 MR STEPHEN BAKER: I am not aware of the Audit Commission  
18 being involved in the road safety process.

19 CHAIRMAN: Perhaps we can help you. We have an Audit  
20 Commission paper --

21 MS MAGGIE WONG: Yes.

22 CHAIRMAN: -- where the Audit Commissioner is looking at  
23 different things, but it also looked at administration  
24 of road safety. This is March 2013.

25 MS MAGGIE WONG: Yes. May I take you to the SEC bundle,  
26

1 page 467. I believe that's bundle 2.

2 Mr Baker, this is an Audit Commission report dated  
3 28 March 2013, prepared by the Transport and Housing  
4 Bureau, Transport Department, Hong Kong Police Force,  
5 and Information Services Department, relating to the  
6 administration of road safety measures.

7 We can see this report was tabled before LegCo  
8 later, on 5 April 2013, as part of the report on the  
9 results of value for money audits.

10 If I take you to the SEC bundle, the same bundle,  
11 page 543, paragraph 5.3, we can see at paragraph 5.2 it  
12 states:

13 "The police is responsible for investigating traffic  
14 accidents."

15 And you have a database, if we look at line 4:

16 "The police requires its investigation officers to  
17 keep their investigation findings and results in  
18 individual physical files and input accident data into  
19 a computerised case management database (known as the  
20 traffic operations and management system -- TOMS) within  
21 48 hours of the accidents. The data may be amended ..."

22 And 5.3 states:

23 "The police's TOMS is linked with the TD's  
24 [Transport Department's] database (known as the  
25 transport information system -- TIS ...) for the  
26

1 electronic transfer of traffic accident data. The  
2 Transport Department uses the traffic accident data in  
3 the TIS to identify locations of accident block spots  
4 and accident trends for in-depth investigation and  
5 analysis. The data also serve as an important source of  
6 information for formulation of road safety strategies,  
7 publicity/education programme and ongoing review of road  
8 safety legislation among other road safety initiatives."

9 It coincides with what you have told us earlier that  
10 the information will be shared with the Transport  
11 Department for devising road safety strategies. And one  
12 of the issues raised in this report is --

13 CHAIRMAN: Before you go any further, if it helps you, Chief  
14 Superintendent, this material is available in paper form  
15 so that you can have a look at other pages, rather than  
16 the ones you are being referred to, if that helps you.

17 MR STEPHEN BAKER: Thank you.

18 CHAIRMAN: Just ask for it and it will be provided to you.

19 MR STEPHEN BAKER: If I could take a look at it.

20 CHAIRMAN: Can we do that? Can we provide SEC -- I think  
21 this covers two volumes, does it not, SEC-1 and SEC-2?

22 MS MAGGIE WONG: Yes, SEC-2.

23 CHAIRMAN: But it begins in bundle 1, am I right, 467?

24 MS MAGGIE WONG: Yes, 467.

25 CHAIRMAN: Take a moment to familiarise yourself with it, so  
26

1           you have an idea of what it is you are being asked  
2           about.

3       MR STEPHEN BAKER:   Thank you, sir.

4       MS MAGGIE WONG:   This report is compiled by the Audit  
5           Commission, the purpose of which is to audit the data to  
6           ensure or to check whether the information relayed by  
7           the police and the Transport Department are accurate.

8           According to this report, it suggested that there  
9           appear to be inaccuracies in the road traffic accident  
10          data. We can see that at page 476, paragraphs 10 to 11.

11          First of all, we see "Accuracy of traffic accident  
12          data", the heading. It stated "Traffic accident  
13          locations" and also "Traffic accident contributory  
14          factors". In the "Traffic accident locations", if we  
15          look in line 4:

16                 "The traffic accident location is identified using  
17                 a grid reference system. Due to inaccurate input of  
18                 grid references, the Transport Department has to spend  
19                 extra time and resources to rectify the problem ... In  
20                 Audit's view, prompt and effective measures should be  
21                 taken to ensure that the grid references for traffic  
22                 accident locations are correctly input in the first  
23                 place ..."

24          And it identifies relevant paragraphs in the report  
25          which I am going to take you to in a moment.

1           The second matter, Mr Baker, as you have earlier  
2           mentioned, is the traffic accident contributory factors.  
3           It also mentioned that during a sample check -- that's  
4           in line 4 of paragraph 11:

5           "In a sample check of the accident contributory  
6           factors input for 50 traffic accident cases, Audit found  
7           that 13 per cent of the input factors were inaccurate  
8           and there was no record of supervisory check for the 50  
9           cases. There is a need to tighten management control in  
10          this regard ..."

11          So it appears the data compiled in both aspects --  
12          that's the location and the contributory factors --  
13          appears to be inaccurate. I understand this report was  
14          made in 2013. First of all, may I ask a general  
15          question: were you aware of the problems identified in  
16          this report about the inaccuracy of the traffic accident  
17          data?

18       MR STEPHEN BAKER: I was aware of this report when it was  
19       written. Since that time, I have worked in other police  
20       formations and so I haven't been able to follow what  
21       measures were taken in consequence of this report. But  
22       I recall at the time that the report was being prepared  
23       that the main problem was a discrepancy between the  
24       location of where the police said the accident occurred  
25       and where the accident was recorded in the TIS system,  
26

1 and I recall that what the police believed was the cause  
2 of the problem was the TIS system was relying on  
3 a mapping system prepared by the Highways Department or  
4 used by the Highways Department which referred to grid  
5 blocks or grid zones, which didn't necessarily coincide  
6 with the police description of the location.

7 MS MAGGIE WONG: Yes. In fact, you are correct, Mr Baker,  
8 and that problem has been identified in the report  
9 itself.

10 If I could take you briefly to what was stated.  
11 That is at page 505. If we start at 544, paragraph 5.5,  
12 it stated there:

13 "Inaccurate grid references could adversely affect  
14 the accuracy of the accident black spot list compiled by  
15 the Transport Department in the following two ways:

16 (a) a non-accident prone site would be wrongly  
17 listed as a traffic accident black spot if the same grid  
18 reference was used for accidents occurring on different  
19 locations of a road; and

20 (b) a location with frequent accidents would be  
21 omitted from the accident black spot list ..."

22 And in paragraph 5.6:

23 "In the 2006 review, Audit found that the police  
24 incorrectly input the same grid reference for 20  
25 accidents occurring on different locations of  
26

1 a highway."

2 If you go over the page, at page 545, paragraph 5.8,  
3 you can see "TD's checking", Transport Department's  
4 checking:

5 "To minimise the risks of inaccurate grid references  
6 mentioned in paragraph 5.5, the Transport Department has  
7 since 2008 carried out selective checks on grid  
8 references input by the police. Notwithstanding the  
9 launch of the map-based TIS, the TD still identified  
10 inconsistencies between the grid references and the  
11 description of the locations input by the police."

12 And we can see in paragraph 5.9, it noted that in  
13 April 2010, in a meeting of April 2010, the Transport  
14 Department informed the police that about 40 per cent of  
15 the input grid references were found to be inconsistent  
16 with the descriptions of the accident locations.

17 At the time of the review, that's 5.10:

18 "... Audit found that the problem of inaccurate grid  
19 references still [existed]."

20 If you look at line 5, it stated:

21 "... the grid references of 7,314 (ie 26 per cent of  
22 27,755) cases were inaccurate."

23 And if we look at 5.11, the Transport Department --

24 CHAIRMAN: I think this is a matter that concerns us less or  
25 interests us less than the issue of the inaccuracy of  
26

1 the attribution of contributory factors.

2 MS MAGGIE WONG: Yes.

3 CHAIRMAN: Perhaps we could deal with this more shortly.

4 MS MAGGIE WONG: Yes.

5 CHAIRMAN: There were recommendations about how to fix this  
6 problem, and the real question is: has this been done?

7 Perhaps we can go to the recommendations, first of  
8 all, at 5.14.

9 MS MAGGIE WONG: Yes.

10 If you go to 5.14, page 548, it suggested to enhance  
11 the system by incorporating a validation check control  
12 in the TOMS/TIS so that police investigation officers  
13 would be alerted to any out-of-the-range error at the  
14 time of data input.

15 And the police agreed with the audit  
16 recommendations, as we can see at paragraph 5.15.

17 So my question is: has that situation been improved  
18 since this Audit Commission report in 2013?

19 MR STEPHEN BAKER: I would like to put my answers in the  
20 context that I was aware of the audit report in 2012,  
21 and that I have been away from traffic policing for some  
22 time, until 2017. Also, I was unaware that I would be  
23 questioned about the audit report and so I haven't been  
24 able to make enquiries to answer your questions before  
25 the hearing.

26

1 I can say that, as I recall, from 2012 and 2013,  
2 measures were implemented in terms of supervision of  
3 data input, and I can say that since this report was  
4 written, the TOMS system has been replaced by what we  
5 call the case management information system, which is  
6 a more modern facility for the police to input data on  
7 all kinds of police enquiries, including traffic  
8 enquiries.

9 And it is my understanding that this what we call  
10 the CMIS, case management information system, is linked  
11 to the Transport Department TIS system, but I am unable  
12 to say at the moment in what way the system has been  
13 enhanced in terms of the recording of the location of  
14 traffic accidents.

15 CHAIRMAN: Yes, thank you, Chief Superintendent. We  
16 of course understand and accept the caveats that you  
17 enter. We will be receiving evidence in due course  
18 again from the Transport Department, and perhaps the  
19 question we could ask you now is simply this: are you  
20 aware of any ongoing problems about location inaccuracy?

21 MR STEPHEN BAKER: I am not, sir.

22 CHAIRMAN: Thank you.

23 MS MAGGIE WONG: Turning to the second matter, the traffic  
24 accident contributory factors, which is trickier than  
25 the first one because it requires input, actual data  
26

1 input, by police officers into the system, as to the  
2 causes of the accidents.

3 If we look at the report, at paragraph 5.17 at  
4 page 549, 5.17 states:

5 "The TD [Transport Department] relies on the traffic  
6 accident contributory factors input by the police into  
7 the TIS for identifying problems of road environment,  
8 road users and driving behaviour, and [also to  
9 formulate] strategies to tackle specific types of  
10 accidents."

11 And during the 1998 review, the Audit's sample check  
12 revealed an error rate of 25 per cent, and in the 2006  
13 review, the error rate was 13 per cent.

14 During the audit examination, at 5.20:

15 "... Audit examined 50 traffic accident  
16 investigation case files ... and the related 280  
17 accident contributory factors input to the TIS. Audit  
18 found that 37 (13 per cent) of the input factors in 34  
19 cases were inaccurate ..."

20 And they identify two accidents, and in summary they  
21 discovered that some of the cases where "mechanical  
22 defects" were input as the accident contributory factor  
23 when in fact it was not.

24 First of all, were you aware of this problem in  
25 relation to the compilation of this particular aspect,  
26

1 in terms of accident data?

2 MR STEPHEN BAKER: I was not. I was not aware of the  
3 significant problem with the input of contributory  
4 factors.

5 CHAIRMAN: Perhaps, as a way of trying to understand how  
6 this might occur, if after an accident a driver was to  
7 tell the policeman, perhaps having been cautioned, "My  
8 brakes didn't work", would that then perhaps be entered  
9 as "mechanical failure"?

10 MR STEPHEN BAKER: Yes, sir.

11 CHAIRMAN: And if the system wasn't rigorous enough to  
12 correct that later, when the vehicle examiner said,  
13 "There was no problem with the brakes -- there might  
14 have been other issues but there was no problem with the  
15 brakes", would that result in that error being carried  
16 forward?

17 MR STEPHEN BAKER: The error could be corrected, sir.

18 CHAIRMAN: It ought to be corrected but it might explain why  
19 it remains in the system?

20 MR STEPHEN BAKER: That is a possibility, yes.

21 MS MAGGIE WONG: And Audit at that time suggested a number  
22 of recommendations in the report. The recommendations  
23 can be found at 5.22 at page 551.

24 To sum up, it required the police to tighten  
25 management control in terms of input into the system, by

26

1        reminding supervisory staff to critically check the  
2        accuracy against the records kept in the case files; and  
3        also to maintain records of their supervisory checks in  
4        relevant case files for management review.

5            As far as you are aware, has that been done or have  
6        the recommendations been carried out?

7        MR STEPHEN BAKER: The recommendations were carried out.

8        MS MAGGIE WONG: And, as far as you know, were you aware of  
9        any inaccurate compilation of data in relation to the  
10       accident contributory factors, as of to date?

11       MR STEPHEN BAKER: As far as I am aware, the data is input  
12       as accurately as possible.

13       CHAIRMAN: I think perhaps you can only answer that  
14       generally rather than saying "any", but generally, are  
15       you satisfied that the system better presents accurate  
16       data now?

17       MR STEPHEN BAKER: I am, sir, yes.

18       MS MAGGIE WONG: Thank you.

19            If I may take you to another document. The purpose  
20       of this exercise -- perhaps Mr Baker and Ms Yau -- the  
21       purpose of this exercise is to ascertain the accuracy of  
22       the traffic accident data, as you are no doubt aware,  
23       because this information is relevant to the Transport  
24       Department in devising road safety strategy or  
25       improvement measures. So the accuracy of the data is of  
26

1 importance.

2 One of the aspects that we heard about from one of  
3 the experts, who testified last week, is we need certain  
4 procedures to consider whether there should be an impact  
5 study in Hong Kong. So you basically look at the number  
6 of victims you have, and then look at the cost of  
7 installation of these devices and look at the cost of  
8 serious injury in your jurisdiction.

9 So we need to have some objective data to see if  
10 there is a legitimate approach to examine safety, and to  
11 that extent, what information we have in Hong Kong to  
12 compile that data -- so that you know what direction  
13 I am going.

14 CHAIRMAN: Perhaps, in that context, might I indicate this.

15 This cost/benefit analysis, how you might approach, for  
16 example, installing safety devices on vehicles, is one  
17 that they apparently use in Australia, but it obviously  
18 has as its core accurate data. We are particularly  
19 interested in that in the context of seat belts, seat  
20 belts in franchised buses. So that is an aspect that we  
21 will be coming back to later.

22 MS MAGGIE WONG: Yes.

23 CHAIRMAN: Ms Wong, now that we have what I think I call the  
24 template of factors that are listed as contributory  
25 factors, perhaps at some stage you could detail them.

26

1 Obviously you might need first to read them, but it  
2 would be helpful if we were to go to that at some stage.

3 MS MAGGIE WONG: Yes. I may come back to it later, after  
4 the break.

5 CHAIRMAN: Yes.

6 MS MAGGIE WONG: To that end, in particular on seat belts --  
7 I am coming to this topic -- first of all, I wish to  
8 identify some of the statistics that we have from the  
9 Transport Department and also from the forward planning  
10 programme that was forward by the franchised bus  
11 operators in relation to non-collision-type accidents.  
12 May I --

13 CHAIRMAN: Again, forgive me for interrupting, that is  
14 another area where, in the course of our hearings, we  
15 have gathered together information to be found in  
16 documents that are otherwise confidential, that went  
17 between the franchised bus operators and the Transport  
18 Department, in which they were asked to analyse the  
19 causes of accidents on a whole range of different  
20 parameters.

21 Have you had an opportunity to look at that  
22 material? It is on our website, but if you haven't,  
23 that's another area where we are going.

24 MR STEPHEN BAKER: I looked at some material over the  
25 weekend, sir, which I believe is what you are referring

26

1 to.

2 CHAIRMAN: Yes. So, for example, in the context of seat  
3 belts, a regular pattern of accidents in buses appears  
4 to be, and are described as, loss of balance. The  
5 figure seems to be maintained at around 50 per cent of  
6 the injuries involved in and around buses.

7 Another aspect of the statistics is persons injured  
8 on a bus separate from loss of balance. So that is  
9 something we will come to in due course.

10 MS MAGGIE WONG: Thank you.

11 Mr Baker, first of all, may I ask some general  
12 questions. We have been provided, as Mr Chairman  
13 mentioned, the forward planning programme of these  
14 franchised bus operators, which straddles five years and  
15 it will be renewed on a yearly basis as to what the  
16 safety features would be, and conducts an analysis of  
17 accident trends and statistics.

18 Would the police be provided with a copy of this  
19 forward planning programme from the Transport  
20 Department?

21 MR STEPHEN BAKER: We have not been, and I wasn't aware that  
22 we would be. We hadn't any expectation to receive it.

23 CHAIRMAN: No, as I indicated earlier, we have been given to  
24 understand that this material was confidential, and it  
25 is with some difficulty, over some months, that we have  
26

1           obtained the documentation.

2       MS MAGGIE WONG: May I take you to some of the documents as  
3       examples. It would be at TD-1, page 180. At page 180  
4       is the extract of the forward planning programme for  
5       2018 to 2022 submission by Kowloon Motor Bus.

6           If we look at paragraph 8.2.7, we can see the KMB,  
7       the bus company, had identified or done an analysis of  
8       the accident nature for the years of 2015 to 2016, and  
9       we can see in particular, table 8.1, the passenger loss  
10      of balance as 51.5 per cent, and at paragraph 8.2.7,  
11      stating that:

12           "The majority of the accidents ... were due to  
13      passengers losing balance while on the bus. More than  
14      half of these cases were caused by the bus braking in  
15      traffic."

16           It also named other accidents.

17           This report, this chapter, contained a number of  
18      statistics, and this is just one of them. First of all,  
19      my general question is: would this sort of information  
20      assist the police in terms of compilation of data and  
21      analysis of accident data, if you were given a copy of  
22      this from the franchised bus operators? Would it assist  
23      your department carrying out the duties?

24      MR STEPHEN BAKER: My first impression is that a lot of this  
25      information is covered in our casualty causation factors

26

1 already.

2 MS MAGGIE WONG: Casualty causation factors?

3 MR STEPHEN BAKER: Our accident causation factors already,  
4 and without spending more time to study this information  
5 I wouldn't be able to comment further.

6 CHAIRMAN: But, if you had this information, you would have  
7 the consolation of knowing that your own figures matched  
8 those of people who are expert in running this  
9 particular aspect of transportation?

10 MR STEPHEN BAKER: We would, sir, yes.

11 MS MAGGIE WONG: Because, as you know, one of the  
12 recommendations in the Audit Commission report is to  
13 critically check the accuracy of the data input to the  
14 system. So, with this information, you could actually  
15 cross-check or double-check the data you have compiled  
16 to ensure it is accurate; would you agree with that  
17 suggestion?

18 MR STEPHEN BAKER: It would be a useful reference, yes, but  
19 actually, I think we would value the assessment of our  
20 officers, to a great extent, although it would be  
21 useful.

22 MS MAGGIE WONG: For the purpose of verification and  
23 double-checking?

24 MR STEPHEN BAKER: As a cross-reference, yes, but how would  
25 we verify it? We would verify it by looking at what our  
26

1 officers found out in their enquiry, because their  
2 enquiries would be rather thorough.

3 MS MAGGIE WONG: Now, in compiling your data, we can see, as  
4 an example of that, the passenger loss of balance here  
5 is 51.5 per cent, and if I may take you to the letter  
6 compiled by the Transport Department as to the  
7 statistics back in 2013, first of all. It is the letter  
8 dated 16 May 2013. That would be in SEC-2, page 566.

9 This is a letter from the Transport Department to  
10 the LegCo, and if we look at page 567, at paragraph (c),  
11 it identifies the number of road accidents for  
12 franchised buses. It stated that 58 per cent were  
13 non-collision --

14 CHAIRMAN: Before you get into detail, perhaps you could,  
15 for the record, and for Chief Superintendent Baker,  
16 establish the context of this letter.

17 MS MAGGIE WONG: Yes.

18 CHAIRMAN: Is this a response to the Audit Commissioner's  
19 report?

20 MS MAGGIE WONG: Yes. This is a response to the issues  
21 raised in the LegCo, when considering chapter 2 of the  
22 Director of Audit's report in administration of road  
23 safety measures that we have looked at earlier,  
24 containing recommendations, and the inaccuracies. And  
25 the Transport Department provides certain statistics  
26

1 based on the information compiled.

2 If we look at paragraph (a), it set out the 120 road  
3 casualties in 2012, 15 involved traffic accidents  
4 happened on expressways, and in paragraph (b):

5 "Not many major cities in overseas countries publish  
6 statistics on accident involvement rates separately for  
7 public transport."

8 And they could only obtain relevant figures for some  
9 major cities in the United Kingdom.

10 If we go over the page, at paragraph (c), it  
11 summarised that:

12 "For franchised buses, because of the large number  
13 of passengers carried and the presence of standing  
14 passengers, a significant proportion of accidents  
15 involves injury of passengers even [when] there is no  
16 collision. This type of accidents typically involves  
17 passengers losing balance inside the bus compartment due  
18 to various reasons, such as not holding the handrail  
19 tightly or falling down when boarding or alighting.  
20 These are classified as non-collision type accidents.  
21 Of the [2,000-odd] franchised buses ... 5 per cent were  
22 non-collision type accidents."

23 So, more or less, the figure matches the KMB figure  
24 provided in their forward planning programme. We can  
25 see more up-to-date statistics in the Transport  
26

1 Department paper, but you need not go through that. The  
2 new percentage that they have compiled is about 59 to  
3 65 per cent of all accidents involving franchised buses  
4 during 2012 to 2017 are non-collision type accidents.

5 CHAIRMAN: When you say "accidents", are you describing  
6 injuries?

7 MS MAGGIE WONG: Yes.

8 CHAIRMAN: Thank you.

9 MS MAGGIE WONG: The reference is at TD-1, page 111,  
10 paragraph 5.

11 Now, the question I would be asking is: in compiling  
12 your data, would you differentiate accidents or injuries  
13 caused to passengers while they are seated, or whether  
14 they are standees in the bus compartments?

15 MR STEPHEN BAKER: As far as I recall, we don't have  
16 a differentiation whether the victim was standing or  
17 sitting.

18 CHAIRMAN: Is that because your approach is global, as it  
19 were, rather than specific towards buses? Your  
20 template, for example --

21 MR STEPHEN BAKER: Yes, sir.

22 CHAIRMAN: -- is not designed for that peculiarity?

23 MR STEPHEN BAKER: That is correct, sir, yes.

24 CHAIRMAN: Your template works for all vehicles?

25 MR STEPHEN BAKER: Yes, sir.

26

1 CHAIRMAN: At some stage, sooner rather than later, I think  
2 it would be useful to get to the template, because that  
3 probably gives us the direction in which the police  
4 approach the attribution of causative factors in  
5 accidents and injuries.

6 MS MAGGIE WONG: Maybe we can go to your template, to  
7 establish a few matters first.

8 CHAIRMAN: Perhaps in the first place, Chief Superintendent,  
9 you could describe what the document is, and where it  
10 comes from.

11 MR STEPHEN BAKER: This is a list of driver contributory  
12 factors, and the code on the left enables our officers  
13 to input onto the computer system what the contributory  
14 factor was.

15 MS MAGGIE WONG: There are two boxes there. The bottom box  
16 seems to be a summary of the major accidents caused by  
17 different driver contributory factors, based on the  
18 number of accidents in descending order. Is that  
19 correct? The bottom box is a summary extracting the  
20 major causes of contributory factors in descending  
21 order?

22 MR STEPHEN BAKER: I'm sorry, I haven't prepared for these  
23 questions.

24 CHAIRMAN: Let's take it step by step. The list at the top  
25 clearly provides an omnibus approach to factors that  
26

1 might have been relevant to driver contributory factors,  
2 and there are, it appears, 62 of them. Do I understand  
3 this correctly? Never mind what happens on the  
4 right-hand side of the page. These are the  
5 pre-determined factors that may have been part of  
6 an accident contribution?

7 MR STEPHEN BAKER: That's correct, sir, yes.

8 MS MAGGIE WONG: And, if we look at the bottom box, the  
9 driver contributory factor, let's quote an example. We  
10 see "Driving inattentively", that is 189 cases for the  
11 first eight months in 2018; is that correct? That's  
12 code number 56.

13 MR STEPHEN BAKER: Yes.

14 MS MAGGIE WONG: And we can see, in descending order, the  
15 next one is number 60, "Failing to ensure the safety of  
16 passenger", and we can see the number of cases here are  
17 97, based on the statistics in the first eight months of  
18 2018.

19 MR STEPHEN BAKER: Yes.

20 MS MAGGIE WONG: And the third major factor is "Driving too  
21 close to vehicle in front".

22 MR STEPHEN BAKER: Yes.

23 MS MAGGIE WONG: The fourth one is "Careless lane changing".

24 MR STEPHEN BAKER: Yes.

25 MS MAGGIE WONG: The fifth one is "To avoid collision or  
26

1 otherwise: swerving/stopping suddenly".

2 MR STEPHEN BAKER: Yes.

3 MS MAGGIE WONG: And the sixth one is "Improper or illegal  
4 turn".

5 MR STEPHEN BAKER: Correct.

6 MS MAGGIE WONG: As we can see, I think there are a total of  
7 I think ten -- I haven't calculated it but there are  
8 around ten-odd contributory factors that have been  
9 extracted here.

10 MR STEPHEN BAKER: Yes.

11 MS MAGGIE WONG: But the table doesn't identify the injuries  
12 caused to the passenger. For example, in  
13 passenger-losing-balance cases, where would we see this  
14 data? It appears this table doesn't contain that sort  
15 of information.

16 MR STEPHEN BAKER: That's right. For our statistical  
17 purposes, we only categorise injuries into those three  
18 categories, and we don't further categorise them. We  
19 would have to look at the case file to obtain further  
20 information about the injury.

21 CHAIRMAN: So your three categories are fatal accidents,  
22 serious accidents and slight accidents, and the  
23 explanatory notes on the back of the 2017 police report  
24 on traffic accidents -- "Traffic Report", I think it's  
25 called -- defines what those terms mean?

26

1 MR STEPHEN BAKER: That is right, sir, yes.

2 CHAIRMAN: And, in a sense, this is an arbitrary drawing of  
3 lines when one comes to serious and slight accidents?

4 You've got to draw the line somewhere?

5 MR STEPHEN BAKER: Yes.

6 CHAIRMAN: There is nothing magic about being in a hospital  
7 for 12 hours, rather than 15 or 20, or three days?

8 MR STEPHEN BAKER: That is right, sir.

9 MS MAGGIE WONG: Is there another template for injuries that  
10 you have identified, the three categories of injuries  
11 suffered by passengers on buses, franchised buses?

12 MR STEPHEN BAKER: I am not aware of another template.

13 MS MAGGIE WONG: Then how do you calculate the number of  
14 cases where passengers lose balance on buses?

15 MR STEPHEN BAKER: I would have to look into that.

16 I haven't got that information with me.

17 CHAIRMAN: Is it possible that this is a detail that you  
18 don't get involved in?

19 MR STEPHEN BAKER: It is, sir, yes.

20 CHAIRMAN: Professor.

21 MEMBER LO: I just want to understand who actually put down  
22 the contributory factors; by the officer at the scene,  
23 or determined afterwards? So who determines what  
24 factors contributed to the accident?

25 MR STEPHEN BAKER: The officer who investigated the traffic  
26

1 accident. Once he had been to the scene, he would go  
2 back to his office later and input the contributory  
3 factors onto the computer system. And the data would be  
4 compiled by the Road Safety Unit in the Traffic Branch,  
5 and analysed.

6 MEMBER LO: But there may be multiple parties. For example,  
7 if the bus company investigated the accident afterwards,  
8 would those factors be flowed back into the accident  
9 record; for example, losing balance?

10 MR STEPHEN BAKER: No. It's all based on police enquiries.

11 MEMBER LO: What about TD? Who will maintain a record, as  
12 the ultimate eventual authority, to say, "This is the  
13 record"? Is it TD, is it police, is it -- how do you  
14 flow information into it?

15 MR STEPHEN BAKER: All of the data is input by the police  
16 based on their assessment, and transferred to TD, where  
17 it is kept and analysed.

18 MEMBER LO: So the information would not go from TD back to  
19 police records?

20 MR STEPHEN BAKER: We have access to the TD's information,  
21 and we share the information regularly.

22 CHAIRMAN: But the Transport Department is using your  
23 information?

24 MR STEPHEN BAKER: That's right, sir.

25 CHAIRMAN: And you don't have access to the franchised bus  
26

1 accident statistics or their designation of contributory  
2 factors?

3 MR STEPHEN BAKER: We do not, sir, yes.

4 MEMBER LO: So there could be inconsistencies among the  
5 records kept by the bus company and the police and TD?

6 MR STEPHEN BAKER: There could be, but I would suggest that  
7 we would rely on our assessment of what happened,  
8 because the accident has been investigated by a police  
9 officer who has interviewed witnesses, and I don't know  
10 how the bus companies make their assessment of what  
11 happened.

12 CHAIRMAN: The Transport Department would be at the apex of  
13 the triangle, as it were; they get information through  
14 this forward planning programme, certainly we know about  
15 that now, and they get information from you. They have  
16 two sources of information but you only have one.

17 MR STEPHEN BAKER: That's right, sir, yes.

18 MS MAGGIE WONG: Just a matter of logistics: if the  
19 Transport Department discovered there are certain  
20 inaccuracies in the information compiled by the police,  
21 based on the data provided by the franchised bus  
22 operators, do you know what they would do about it?  
23 Would they consult you first?

24 MR STEPHEN BAKER: I am aware that when the Transport  
25 Department think there is a discrepancy in the  
26

1 information, they will consult with us about it. I am  
2 not aware of all of the circumstances by which they  
3 would believe there is a discrepancy.

4 CHAIRMAN: Are you able to give us any example to illustrate  
5 that process?

6 MR STEPHEN BAKER: On a regular basis, our Road Safety Unit  
7 does receive referrals of cases for which the Transport  
8 Department would like us to review the data that we have  
9 provided. But I don't know on what basis they think  
10 there is a discrepancy, whether it is from the bus  
11 company or for any other reason.

12 CHAIRMAN: And, in your review of the data that you  
13 provided, what steps would be taken?

14 MR STEPHEN BAKER: We would contact the investigating  
15 formation to double-check that the information they have  
16 input to the computer system is correct, ie that it  
17 matches the information they have produced on their  
18 investigation file.

19 CHAIRMAN: At what stage in the investigation of the  
20 accident is the data inputted by these codes into the  
21 computer? How far into the investigation before that  
22 happens?

23 MR STEPHEN BAKER: At a very early stage, within hours.

24 CHAIRMAN: And, in the process of a review, which by its  
25 nature must happen much later, what other material is  
26

1           available that might be looked at to determine whether  
2           or not the initial assessment was accurate?

3       MR STEPHEN BAKER:   The initial assessment is made almost as  
4           soon as the officer goes back to his office.   Further  
5           enquiries might find that the data needs updating.   The  
6           example you gave of the driver saying the brakes didn't  
7           work and yet, after examination, it is found that there  
8           is nothing wrong with the brakes, is a good one.   And it  
9           takes time to find witnesses and to make analysis of the  
10          facts that have been gathered at the scene.

11       CHAIRMAN:   Yes, Ms Wong.

12       MS MAGGIE WONG:   Thank you.

13                So do I understand it correctly that it is the  
14           officer who is involved in the case who inputs the data  
15           in the first place?

16       MR STEPHEN BAKER:   That is correct.

17       MS MAGGIE WONG:   And who will be conducting the  
18           double-checking or critical checking?

19       MR STEPHEN BAKER:   Normally, it would be the sergeant, and  
20           there are different levels of supervision involved in  
21           the handling of case enquiries.

22       MS MAGGIE WONG:   Yes, and the sergeant will be the sergeant  
23           in charge of that division of the officer in charge of  
24           the case?

25       MR STEPHEN BAKER:   Directly in charge of that officer.

26

1 MS MAGGIE WONG: We will move on to the topic of seat belts.

2 The reason we have spent quite a bit of time on  
3 statistics is because it is related to this issue of  
4 seat belts.

5 One of the things we have heard during the evidence  
6 is that you can't give seat belts to people who are  
7 standing, or standees; you can only --

8 CHAIRMAN: Forgive me again for interrupting.

9 Is the failure to use a seat belt one of the driver  
10 contributory template factors?

11 MR STEPHEN BAKER: It is not a contributory factor to the  
12 cause of an accident.

13 CHAIRMAN: No, but it is to the injury.

14 MR STEPHEN BAKER: Yes. I would have to look further, sir,  
15 to answer that question.

16 CHAIRMAN: So this is limited to driver contributory factors  
17 of the accident?

18 MR STEPHEN BAKER: Yes, sir.

19 CHAIRMAN: Not the consequences of the accident?

20 MR STEPHEN BAKER: Yes.

21 CHAIRMAN: Thank you.

22 MS MAGGIE WONG: These driver contributory factors, these  
23 factors, for how long have they been revised or since  
24 when they have been revised or updated?

25 MR STEPHEN BAKER: I don't know.

26

1 MS MAGGIE WONG: Would you mind checking and provide us with  
2 the information in due course. Would your department  
3 consider compiling a separate template for consequences  
4 of accidents that cause particular types of injuries?

5 CHAIRMAN: I'm sorry, what are you inviting the chief  
6 superintendent to do?

7 MS MAGGIE WONG: For example, to have certain statistics  
8 compiled in relation to, like, passenger losing balance,  
9 like statistics similarly conducted by the franchised  
10 bus operators, or to expand the list here, to identify  
11 which are the ones which caused the passenger losing  
12 balance in that particular category, given it accounts  
13 for the major proportion of the accidents.

14 MR STEPHEN BAKER: I would like to spend some time to  
15 investigate further how -- we already record such  
16 details. I'm sorry that I haven't brought such  
17 information to the hearing.

18 MS MAGGIE WONG: Yes. Maybe I will go back to the seat  
19 belts issue, because it is relevant to the seat belt  
20 issue, as to -- we have the statistics which account for  
21 about 59 to 65 per cent for non-collision-type accidents  
22 due to passenger losing balance.

23 So, going back to my issue --

24 CHAIRMAN: Before you move on, may I ask this general  
25 question: as an investigative tool, particularly having  
26

1        regard to this issue on buses, it is a narrow issue from  
2        your point of view, I understand that -- buses,  
3        passengers being injured by loss of balance -- how  
4        often, if you are aware, would the police have recourse  
5        to the black boxes, telematics devices, on the bus, to,  
6        for example, examine excessive braking, excessive  
7        acceleration or excessive inclination?

8        MR STEPHEN BAKER: The police would have access to any  
9        exhibit when they were investigating an arrestable  
10       offence, and that would include causing death by  
11       dangerous driving, careless driving, et cetera.

12       CHAIRMAN: I appreciate that. That's the general provision.

13       But the question really is more specific: how often  
14       actually do the police examine this material? For  
15       example, one can readily see why you might examine it  
16       when you have a fatal accident, but when you have an old  
17       lady who falls over because she lost her balance on the  
18       bus and breaks her leg, is that something that would be  
19       looked at or not? In the general it could be, but is it  
20       in fact?

21       MR STEPHEN BAKER: I would have to consult my colleagues,  
22       sir.

23       CHAIRMAN: Thank you.

24       MS MAGGIE WONG: Following on that question, will there be  
25       a general protocol in terms of investigation into  
26

1 traffic accidents that, as a matter of routine  
2 procedures, you have to obtain black-box or telematics  
3 data from the relevant franchised bus companies?

4 MR STEPHEN BAKER: I am not aware that it is done routinely,  
5 and I would need to consult with my colleagues to find  
6 out how often it is done.

7 MS MAGGIE WONG: And, in that regard, CCTV footages,  
8 installed on buses?

9 MR STEPHEN BAKER: I am afraid it is not a level that I have  
10 worked at, and I would have to consult with my  
11 colleagues.

12 MS MAGGIE WONG: So may I take you to a working group. If  
13 we start, in terms of this topic on seat belt, may  
14 I start the process by inviting you to look at a paper  
15 in relation to the Working Group on Enhancement of  
16 Safety of Franchised Buses, which had been set up after  
17 the Tai Po accident in February 2018.

18 That would be TD Paper 8, at TD-1, page 94.

19 Maybe I will give this in context. This working  
20 group was set up arising from the Tai Po accident in  
21 February 2018, with the representatives of all five  
22 franchised bus companies, and bus manufacturers, as well  
23 as the Transport Department, in mid-March 2018, to  
24 review the technical feasibility and desirability of  
25 installing new safety devices or applying new technology  
26

1 on the safety devices to franchised buses, to enhance  
2 protection to passengers.

3 Were you aware of the existence of this working  
4 group?

5 MR STEPHEN BAKER: No.

6 MS MAGGIE WONG: Or, within the police, do you know who  
7 would -- so far as you are concerned, you do not know,  
8 but what about people within the police department; do  
9 you know who would be responsible for --

10 CHAIRMAN: I think it might help the chief superintendent if  
11 you were to describe the limited number of parties to  
12 this working group, if you were to take him to that  
13 information.

14 MS MAGGIE WONG: Yes.

15 Mr Baker, if you look at paragraph 4, we can see the  
16 number of people involved, and footnote 1, the people  
17 involved would be the franchised bus companies, namely  
18 the Kowloon Motor Bus, Long Win Bus, Citybus, New World  
19 Bus and New Lantao Bus.

20 If we go up to paragraph 4 --

21 CHAIRMAN: I think we can start at the top of the page.

22 MS MAGGIE WONG: Yes, at the top of the page.

23 CHAIRMAN: "... the TD set up a working group with  
24 representatives of all franchised bus companies ..."

25 "FB" is the acronym used for franchised bus  
26

1 companies, and they are listed as a footnote.

2 ... and bus manufacturers in mid-March 2018 [that's  
3 13 March] to review the technical feasibility and  
4 desirability of installing some new safety devices or  
5 applying new technology on the safety devices of  
6 franchised buses for enhancing protection to bus  
7 passengers."

8 Yes. Thank you.

9 MS MAGGIE WONG: Yes. So the police is not one of the  
10 members consulted or one of the members of this working  
11 group. But, in that regard, I wish to ask you something  
12 about the installation of seat belts, and invite your  
13 comments on this.

14 We see, in this paper, at paragraph 5, we saw the  
15 issue of installation of seat belts as one of the  
16 matters discussed in this working group.

17 CHAIRMAN: Perhaps you would read this paragraph out, to set  
18 the context for the chief superintendent.

19 MS MAGGIE WONG: Yes. If we read paragraph 5:

20 "In the light of an accident in July 2006 in which  
21 a KMB bus collided with another vehicle resulting in  
22 a passenger on the upper deck of the bus being thrown  
23 out of the bus and another similar accident in December  
24 2007 in which a bus of Citybus ... collided with another  
25 bus of New World First Bus ... in Tseung Kwan O  
26

1 resulting in three passengers on board the CTB's bus  
2 being thrown out of the bus, the TD recommended and the  
3 FB operators agreed that safety seat belts should be  
4 retrofitted at the four front seats on the upper deck of  
5 all post-1997 licensed buses to prevent passengers from  
6 falling out from the upper deck front seats. At  
7 present, the seat belts for all the exposed seats have  
8 become a standard feature of all franchised buses."

9 It was in this context that the working group was  
10 considering whether to implement the installation of  
11 seat belts to all seats on franchised buses.

12 If I may take you to a few minutes of the meeting in  
13 relation to this working group. This working group is  
14 divided also into subgroups, which I am going to take  
15 you to some of the meetings.

16 The reason I am asking you this --

17 CHAIRMAN: Before you move on -- Chief Superintendent, or  
18 any of your colleagues, are any of you aware of whether  
19 or not at this stage, when -- I think this is something  
20 like 2008, in consequence of the 2006 and 2007 bus  
21 accidents -- seat belts were fitted in vulnerable seats,  
22 exposed seats -- I think the best example is the front  
23 of the bus on the road to Stanley, where they put a bar  
24 across the front of the bus and they put seat belts on  
25 the front seats. There are other vulnerable seats where  
26

1 people have nothing in front of them where there are  
2 seat belts.

3 The question that I would pose generally is: are any  
4 of you aware of whether or not the police were consulted  
5 when these recommendations were being formulated? Maybe  
6 you don't, but if you are, please share your experience  
7 with us.

8 MR STEPHEN BAKER: I am not aware of that, sir.

9 CHAIRMAN: None of your colleagues?

10 Well, Chief Superintendent, perhaps you could make  
11 enquiries as to whether or not the police were  
12 consulted. This was the subject of debate in LegCo, and  
13 one would have expected, in something like this, given  
14 the police involvement in their investigation of  
15 accidents, that the input of the police would have been  
16 sought.

17 Do you have the references of the other material  
18 that would help the chief superintendent narrow this  
19 down?

20 MS MAGGIE WONG: Yes.

21 May I take you to, first of all, the end result of  
22 this working group, and then I will work backwards to  
23 the minutes of the meeting.

24 If I may take you to TD-1, page 403 to 426. This  
25 was a LegCo paper submitted by the Transport Department

26

1 in July 2018 for discussion on 25 July 2018, basically  
2 summarising the recommendations of the working group.

3 If we could go to page 407, at the bottom, it starts  
4 with --

5 CHAIRMAN: I think, to give the chief superintendent  
6 a context, let's go to the first page. This is a paper  
7 prepared by the Transport Department, Transport and  
8 Housing Bureau, for discussion at a meeting on 25 July  
9 of this year of the Transport Panel of the Legislative  
10 Council; is that right?

11 MS MAGGIE WONG: Yes, Chairman.

12 If we go to paragraph 10 at page 407, we can see  
13 some of the recommendations set out there, and setting  
14 out the position.

15 CHAIRMAN: Before we get there, perhaps we could start at  
16 page 403. This is the background.

17 MS MAGGIE WONG: Yes.

18 CHAIRMAN: Perhaps you would be kind enough to read out  
19 paragraph 2.

20 MS MAGGIE WONG: Yes.

21 Mr Baker, paragraph 2 reads as follows:

22 "Following a fatal traffic accident involving  
23 a franchised bus of the Kowloon Motor Bus ... at  
24 Tai Po Road on 10 February 2018, the Transport  
25 Department ... set up in mid-March 2018 a Working Group

26

1 on the Enhancement of Safety of Franchised Buses ...,  
2 which comprises members from all FB operators and the  
3 major bus manufacturers, to consider and study possible  
4 measures to further enhance bus safety. The scope of  
5 work of the working group covers the following major  
6 areas:

7 (a) to explore the technical feasibility,  
8 applicability and cost-effectiveness of, and any other  
9 issues relating to the installation of in-vehicle safety  
10 devices/technologies and seat belts on all seats of  
11 franchised buses; and

12 (b) to review the training arrangements adopted by  
13 the FB operators."

14 Over the page:

15 "So far, the working group has held three meetings  
16 since ... 2018; the technical group under the working  
17 group has also met five times. The findings and  
18 recommendations of the working group are set out in the  
19 ensuing paragraphs."

20 Amongst other matters, on in-vehicle safety devices,  
21 which starts at paragraph 4, may I invite you to go to  
22 page 407, in relation to installation of seat belts on  
23 passenger seats. Paragraph 10 sums up the position:

24 "At present, all the exposed seats on franchised  
25 buses are installed with seat belts to prevent  
26

1 passengers from falling out from the seats.

2 11. As confirmed with the bus manufacturers, it is  
3 technically feasible to supply all new buses with seat  
4 belts for all passenger seats conforming to ...  
5 international standards. In this regard, all FB  
6 operators have agreed that all passenger seats of all  
7 new buses ordered from July 2018 onwards will be  
8 installed with seat belts."

9 In relation to paragraph 12, it talks about the  
10 retrofitting of seat belts on all passenger seats of  
11 existing buses, and if we drop a few lines to line 6:

12 "In practice, retrofitting seat belts on passenger  
13 seats, in particular those on the lower deck, will  
14 involve substantial modification and reinforcement of  
15 the bus chassis, including reinforcement of the  
16 structure of the franchised buses, addition of support  
17 mountings, replacement of all seats by those with seat  
18 belts, as well as passing the pull tests of the seat  
19 belts and seats to confirm their compliance with the  
20 international standards ... Considering the above, the  
21 bus manufacturers have advised that it is technically  
22 impracticable, if not infeasible, to retrofit seat belts  
23 on all passenger seats of both upper and lower decks.

24 13. However, it should be more feasible to retrofit  
25 seat belts on all passenger seats of the upper deck only  
26

1 in some vehicle models of the existing double-deck  
2 fleet."

3 At paragraph 14:

4 "... the working group considers that time and  
5 manpower resources are critical. The bus manufacturers  
6 do not have the required labour and workshop  
7 facilities ... to conduct the retrofit work."

8 If we look through, ultimately, at the bottom:

9 "Some bus operators have expressed concerns that the  
10 retrofitting of seat belts would not only incur  
11 significant financial implication, but also considerable  
12 time and manpower resources, not to mention the need to  
13 re-deploy or procure additional buses to maintain the  
14 existing bus service level during the whole process."

15 If we look at paragraph 16, the working group has  
16 arrived at the following recommendations.

17 CHAIRMAN: Before you get to the recommendations, perhaps we  
18 could go through such review as appears to have been  
19 taken of overseas practices.

20 MS MAGGIE WONG: Yes. If we continue to look at  
21 paragraph 15:

22 "The working group has reviewed the prevailing  
23 overseas practices or requirements on the installation  
24 and wearing of seat belts on buses. Currently, for  
25 inter-cities or cross-[border] routes, some overseas  
26

1 jurisdictions (for example United States, United Kingdom  
2 and Netherlands) have mandated the provision of seat  
3 belts for all passenger seats, while others (for example  
4 UK, Netherlands, and Australia (Victoria)) have imposed  
5 mandatory requirement of wearing seat belts.  
6 Nevertheless, for buses serving urban routes buses or  
7 buses allowed to carry standing passengers, none of the  
8 overseas jurisdictions that the working group has  
9 reviewed thus far have statutory requirements for the  
10 provision of seat belts on passenger seats. According  
11 to the transport authorities of those jurisdictions, the  
12 urban buses are typically used for short journeys, in  
13 terms of both time and distance, and undertaken at  
14 moderate speeds on urban routes. Thus, no seat belt  
15 requirement at passenger seats on these urban [routes]  
16 has been imposed."

17 It also contained a summary of the findings at  
18 annex B, but --

19 CHAIRMAN: Perhaps we could turn to that. That's at  
20 page 415.

21 MS MAGGIE WONG: Yes.

22 CHAIRMAN: You will see the range of countries that are  
23 encompassed in this statement, that in none of these  
24 jurisdictions are seat belts required for urban bus  
25 routes or where buses carry standing passengers.

26

1 MS MAGGIE WONG: So, Mr Baker, before I go to the  
2 recommendations, the findings from the overseas  
3 practices seem to suggest there is no point of having  
4 seat belts installed where there are standing  
5 passengers, because you can't give seat belts to  
6 standing passengers, and those are the people that are  
7 prone to injuries when there is a sudden braking or  
8 sudden stopping, in those type of injuries. That's the  
9 first point.

10 The second point is, in terms of urban routes, where  
11 the travel speed is generally within acceptable range,  
12 so it appears it is not as dangerous as highways,  
13 expressways or cross-border routes where generally you  
14 have a higher speed limit, to the tune of 70km per hour  
15 or above.

16 What is your comment in relation to the usefulness  
17 or effectiveness of seat belts on urban buses that run  
18 urban routes?

19 CHAIRMAN: I think, before the chief superintendent is  
20 invited to respond to such a general question, there is  
21 a third factor that is identified in paragraph 15, and  
22 it is this. It is not only that typically, as one would  
23 expect, in an urban bus route, the speeds are more  
24 moderate, but also these involve short journeys, both in  
25 terms of time and distance. That of course is a factor  
26

1           that's relevant to the time in which a passenger has to  
2           put a seat belt on and his assessment of whether or not  
3           it is worth doing.

4           You have been invited to indicate whether or not you  
5           have any view. Do you have any view?

6   MR STEPHEN BAKER: I do, sir. From a police and road safety  
7           perspective, the police believe that seat belts save  
8           lives. If we are to look at the Transport Department  
9           web page, it states that wearing a seat belt can reduce  
10          the chance of death or serious injury by about a half,  
11          and it also says that seat belts are very effective at  
12          reducing the effects of traffic accidents occurring at  
13          quite low speeds.

14          Now, speaking purely from a road safety perspective,  
15          we would encourage the use of seat belts as widely as  
16          possible.

17          I would also like to observe that public light buses  
18          are fitted with seat belts.

19   CHAIRMAN: We have received evidence that suggests that they  
20          are to be categorised differently from franchised buses.  
21          Broadly speaking, the difference suggested is those that  
22          wish to go racing to their destination get on a PLB;  
23          those who are more content to arrive alive go on  
24          a franchised bus.

25          Are you aware of the circumstances in which seat  
26

1           belts were mandated for PLBs?

2           MR STEPHEN BAKER: No, sir.

3           MS MAGGIE WONG: Before I go on, in relation to this PLB  
4           situation, I think that was a topic covered in the Audit  
5           Commission report, review, in that paper, as to the  
6           situation of seat belts worn by PLB passengers.

7           CHAIRMAN: Before you get involved in that detail, in view  
8           of your answer -- a statement that is clearly generally  
9           accepted worldwide -- that seat belts save lives,  
10          nevertheless, in the safety-conscious jurisdictions  
11          listed in annex B, the United Kingdom, Netherlands,  
12          Australia in the state of Victoria, New Zealand, Canada,  
13          Singapore, none of them have found it appropriate to  
14          require them to be installed on urban buses.

15          With that as a background, what view, if any, do you  
16          have about not only their provision on franchised buses,  
17          mandated provision -- what view do you have about the  
18          requirement, if it was decided to have one, that they be  
19          worn, and then the issue that arises of enforceability?

20          MR STEPHEN BAKER: I think that passengers should have  
21          an option to enable them to travel as safely as  
22          possible, that if seat belts are not fitted then that  
23          option is denied, and that as to the enforcement aspect,  
24          it can be seen from personal experience that most people  
25          don't use seat belts on public light buses, and we can  
26

1 expect the same thing on franchised buses, for the  
2 reasons that have been discussed: convenience, short  
3 journeys, things like that.

4 So enforcement will be an issue, and I don't think  
5 the police would be able to regularly enforce such  
6 regulations, if they existed. But at the moment they do  
7 not for franchised buses.

8 CHAIRMAN: But they do for PLBs.

9 MR STEPHEN BAKER: They do, sir, yes.

10 CHAIRMAN: And what is the ease with which that is enforced  
11 or the difficulty?

12 MR STEPHEN BAKER: It is difficult to enforce, and it is not  
13 enforced regularly. I would say it is enforced  
14 occasionally, when officers decide to take enforcement  
15 as a road safety issue. There is always more than one  
16 aspect to road safety -- publicity -- but it is also  
17 coupled with enforcement from time to time.

18 CHAIRMAN: Am I right in -- forgive me, you were going to  
19 carry on.

20 MR STEPHEN BAKER: I was going to add that we hope that  
21 people won't obey the law only because they feel they  
22 might be prosecuted for it, for not following the law.  
23 Yes.

24 CHAIRMAN: It took a long time to persuade people when they  
25 had a choice that they should wear seat belts in cars.

26

1 MR STEPHEN BAKER: Yes, sir. But going back to my earlier  
2 comment, in our view, it is better if people have the  
3 option to improve their own road safety, as a matter of  
4 choice.

5 CHAIRMAN: Thank you.

6 MEMBER AUYEUNG: Just a quick question on the seat belt.  
7 Using the experience you have on the PLB, how successful  
8 has the police force been on enforcement?

9 MR STEPHEN BAKER: I don't have enforcement figures, but,  
10 like I say, I would hope that people would follow the  
11 law because it was good for them rather than because  
12 they would be prosecuted if they didn't.

13 CHAIRMAN: But, as you said earlier, most people don't wear  
14 them on PLBs, enforcement is difficult, and one can see  
15 why, and you would expect that same trend to obtain with  
16 buses?

17 MR STEPHEN BAKER: I would, sir, yes.

18 MS MAGGIE WONG: Thank you. Maybe just to wrap this up  
19 before we break -- in general, you make a general  
20 statement that seat belts save lives. I am asking from  
21 the perspective of cost/benefit analysis. Does the  
22 police have any empirical data or analysis as to the  
23 accuracy of the statement that you made, in the context  
24 of urban buses with standees?

25 CHAIRMAN: I'm sorry, I don't understand that question.

26

1 MS MAGGIE WONG: Whether they have conducted analysis on  
2 standing passengers, of the number of standing  
3 passengers that are injured as a result of accidents due  
4 to lack of seat belts, or have you conducted any  
5 analysis in terms of comparisons of passengers losing  
6 balance, in percentage, as to whether they are  
7 attributable to the lack of seat belts?

8 CHAIRMAN: By its nature, a standee cannot be provided with  
9 a seat belt.

10 MS MAGGIE WONG: Yes.

11 So, in that regard, would you have statistics or  
12 figures?

13 MR STEPHEN BAKER: We do not.

14 MS MAGGIE WONG: Mr Chairman, I see the time.

15 CHAIRMAN: Perhaps the real question would be this, the more  
16 useful one: do you have any statistics about people who  
17 are injured while seated on a bus, not wearing a seat  
18 belt? The bus company figures suggest that that number  
19 of passengers is very low, 1 per cent of the injuries,  
20 something like that, 1 to 2 per cent. Do the police  
21 have any such figures?

22 MR STEPHEN BAKER: I am not aware of any statistics, but  
23 I can search later, if you would wish me to.

24 CHAIRMAN: This would perhaps be most obvious, and I think  
25 unfortunately recently there has been an accident like  
26

1       this, where somebody sitting in a vulnerable seat is  
2       projected out of that seat and impacts on something hard  
3       and either a serious or I think in this case a fatal  
4       injury incurs, so that would give rise to an opportunity  
5       for someone, if there was a template that said, "Seat  
6       belt not worn but would likely have been beneficial", in  
7       the general way that seat belts are. So perhaps you  
8       could see if there has been any attempt at analysing  
9       that.

10      MR STEPHEN BAKER: I will do, sir.

11      CHAIRMAN: Thank you.

12             Ms Wong.

13      MS MAGGIE WONG: Thank you, Mr Baker. If I may go through  
14       the recommendations before we break.

15             In paragraph 16 of the TD Paper at page 409, the  
16       working group arrived at the following recommendations:

17             "(a) seat belts should be provided for all seats in  
18       future procurement of new buses; and.

19             (b) subject to further assessment on the technical,  
20       operational and financial feasibility, consideration may  
21       be given to retrofitting all seats in the upper deck  
22       with seat belts on buses deployed for specific bus  
23       routes, ie long-haul routes which are operated via  
24       expressways with relatively fewer bus stops."

25             But the Transport Department will require the  
26

1 franchised bus operators to explore in more details in  
2 conjunction with the bus manufacturers on this aspect.

3 So the suggestion or recommendation is for all new  
4 buses that would be fitted with seats, but for existing  
5 buses, they would only be retrofitted subject to  
6 financial considerations, and even so, it would only be  
7 supplied to limited seats on the upper deck -- sorry,  
8 upper deck, with seat belts on specific bus routes, like  
9 long-haul routes with fewer stops, and on highways.

10 Do you have any comments in relation to the  
11 recommendations?

12 MR STEPHEN BAKER: I think the recommendations are positive,  
13 but like I said, from the point of view of road safety,  
14 we would encourage the use of seat belts as widely as  
15 possible, although the recommendations are a step in the  
16 right direction.

17 MS MAGGIE WONG: Thank you.

18 CHAIRMAN: Yes, Ms Wong. Is that a convenient moment?

19 MS MAGGIE WONG: Yes. Thank you.

20 CHAIRMAN: We are going to take a morning break for

21 20 minutes now, and we will resume in 20 minutes' time.

22 (11.33 am)

23 (A short adjournment)

24 (11.53 am)

25 CHAIRMAN: Yes, Ms Wong.

26

1 MS MAGGIE WONG: Just to wrap up the seat belt issue, may  
2 I take you to one statement made by the Hong Kong Police  
3 in your submission to the committee dated 7 May 2018.  
4 That's in the miscellaneous bundle, page 124-1.

5 If we go over to page 124-2, at the top of the  
6 paragraph, if you look at the three lines in  
7 paragraph 3:

8 "The absence of seat belts in most franchised buses  
9 and standing passengers may also contribute to  
10 passengers sustaining injury and therefore causing  
11 a reportable accident."

12 Can I just confirm, this is a generalised statement  
13 rather than based on statistics, based on your answers  
14 before the break; is that correct?

15 MR STEPHEN BAKER: Yes, it is.

16 MS MAGGIE WONG: Thank you.

17 Moving on to another topic, on illegal parking. We  
18 have heard evidence from some of the franchised bus  
19 operators that in relation to the enforcement actions  
20 taken against illegal parking, especially at bus stops,  
21 appears to be ineffective.

22 Can I take you to some of the evidence. That's  
23 Mr William Chung of New World First Bus. That's in the  
24 TSCP bundle, page 731.

25 CHAIRMAN: What day was this evidence?  
26

1 MS MAGGIE WONG: That would be Day 4.

2 CHAIRMAN: Day 4 in the Augustinian calendar?

3 MS MAGGIE WONG: Yes.

4 CHAIRMAN: What day of the month was this?

5 MS MAGGIE WONG: 30 May 2018. It is in TSCP-2A bundle.

6 CHAIRMAN: Thank you.

7 MS MAGGIE WONG: Thank you.

8 If you look at the top of the page, Mr William

9 Chung's evidence -- have you got that, Mr Baker?

10 MR STEPHEN BAKER: (Nodded head).

11 MS MAGGIE WONG: Mr William Chung said:

12 "In many bus stops, there is illegal parking, and  
13 these vehicles are getting in the way of the buses, in  
14 a way that they cannot pull up close to the kerb for  
15 loading and unloading."

16 If we scroll down to line 16, when Mr Duncan asked,  
17 "In what way?", Mr William Chung said:

18 "For instance, illegal parking would reduce the  
19 width of the road when the buses drive past. Because of  
20 the large size of the bus, it's likely to get into  
21 problem, and if the passengers cannot get on and off on  
22 the kerbside, there is a likelihood of them being hit by  
23 vehicles or they may fall over."

24 In terms of the effectiveness of the enforcement,  
25 Mr Duncan asked at line 23:

26

1 "... has the company endeavoured to overcome this  
2 problem?", and Mr William Chung said:

3 "We notified the Transport Department about the  
4 black spots of illegal parking. We hope that these  
5 sections, they will have 24-hour restricted zone. We  
6 also notified the police to do enforcement work.

7 Mr Duncan: Has that eradicated the problem?

8 Mr William Chung: It doesn't help much."

9 And the chairman also raised this question:

10 "Did it result in any action?"

11 Mr William Chung: The police would take action, but  
12 as soon as the police back is turned, then the illegal  
13 parking problem would recur. Say, for instance, in  
14 Causeway Bay, Yee Wo Street, near SOGO, outside SOGO, in  
15 fact, this is a problem that occurs very often."

16 We also have evidence from trade unions; they  
17 complain that it took a very long time to communicate  
18 with the police in relation to the illegal parking  
19 problem.

20 May I ask, first of all, is illegal parking  
21 a problem that the police was aware of throughout the  
22 years --

23 CHAIRMAN: Specifically illegal parking in and around bus  
24 stops or --

25 MS MAGGIE WONG: In and around bus stops.

26

1 MR STEPHEN BAKER: Yes, it is a problem the police have been  
2 aware of. In fact, in 2017 we issued 4,510 prosecutions  
3 against people who parked their vehicles or stopped  
4 their vehicles in a bus stop.

5 I'm sorry, can you elaborate your question again,  
6 please.

7 CHAIRMAN: Is that a fixed penalty ticket?

8 MR STEPHEN BAKER: Yes. It's what we call a Pol. 570, which  
9 is a fixed penalty ticket.

10 CHAIRMAN: What does that cost the miscreant; \$320, in 2017?

11 MR STEPHEN BAKER: \$450.

12 CHAIRMAN: Now.

13 MR STEPHEN BAKER: Yes.

14 CHAIRMAN: But then?

15 MR STEPHEN BAKER: Also then.

16 So, yes, we are aware of illegal parking problems  
17 and the difficulties caused by persons who stop their  
18 vehicles in unauthorised places.

19 CHAIRMAN: Do any difficulties arise with enforcement  
20 because of the level of the penalty?

21 MR STEPHEN BAKER: I believe the penalty hasn't been  
22 increased for many years, and so it has less of  
23 a deterrent effect than it used to have.

24 CHAIRMAN: As I remember it -- correct me if I am wrong --  
25 the submission that the police made was that in order to  
26

1 keep up with inflation, the then \$320 ticket should be  
2 \$800 or thereabouts. Is my memory more or less correct?

3 MR STEPHEN BAKER: It is, sir, yes.

4 CHAIRMAN: And the resulting penalty that was agreed upon by  
5 government was \$450?

6 MR STEPHEN BAKER: That's correct, sir, yes.

7 CHAIRMAN: Yes, Ms Wong.

8 MS MAGGIE WONG: And the complaints -- we have heard  
9 complaints from the trade unions. I'm going to refer  
10 you to some extracts. But the main complaint is -- they  
11 complained the police have failed to enforce the law in  
12 relation to the illegal parking near bus stops, and that  
13 has been a recurring problem.

14 They also raised questions about the lack of  
15 manpower that the police put in tackling or taking  
16 enforcement action against illegal parking.

17 They also stated that, since 2017, although the  
18 police figures suggest they have stepped up enforcement,  
19 they don't see any significant improvement.

20 In relation to this aspect, about failing to enforce  
21 the law, what do you say or what is your response to  
22 that suggestion?

23 MR STEPHEN BAKER: Well, we enforce the law to the best of  
24 our ability. Taking enforcement action at bus stops,  
25 whilst it is important, may not be the greatest of our  
26

1 priorities at any particular time. For example, the  
2 public are complaining about vehicle obstruction and  
3 illegal parking at many places, including places where  
4 it causes traffic jams, whilst we have increased our  
5 enforcement against illegal parking and vehicle  
6 obstruction related offences, from the top of my head,  
7 by about 40 per cent in the last year.

8 I would also say that approximately 30 per cent of  
9 the calls received by frontline officers are related to  
10 vehicle obstruction or illegal parking. So the police  
11 have made, and are making, their best efforts against  
12 illegal parking and vehicle obstruction.

13 If Ms Yau could add a point as well.

14 CHAIRMAN: Yes, please do, Chief Superintendent.

15 MS YAU SIN MAN: (Via interpreter) Apart from stepping up  
16 law enforcement, we also do something in terms of public  
17 education. In 2018, in our police call programme, we  
18 particularly raised the issue of illegal parking at bus  
19 stops, to alert the public.

20 CHAIRMAN: Thank you.

21 MS MAGGIE WONG: Thank you.

22 We have seen from the recent news reports that the  
23 police, since 1 August this year, have launched  
24 a six-month crack-down on vehicles in congested black  
25 spots, and they include problems brought on by loading  
26

1 and unloading goods in restricted zones, private cars  
2 halting in areas meant for stop by buses, minibuses and  
3 taxis, illegal entries into box junctions and  
4 inappropriate U turns.

5 It is stated that in order to step up the measures,  
6 these five offences now carry a fine of \$400, while  
7 picking up or setting down passengers in restricted  
8 areas carries a max penalty of \$560.

9 May I ask this question. About the selection of  
10 these black spots, on what basis did the police choose  
11 these black spots?

12 MR STEPHEN BAKER: The police have the ability, through  
13 their case management information system, to identify  
14 the locations where the greatest number of traffic  
15 complaints are received. That's one factor.

16 Another factor is complaints made directly to the  
17 police station made by members of the public, either by  
18 telephone or by letter. And so, at a local level, it is  
19 possible for frontline commanders to identify the  
20 congestion black spots, and to share that information  
21 with their regional command and with the headquarters  
22 command.

23 MS MAGGIE WONG: So, following your answers, would some of  
24 these complaints come from trade unions or franchised  
25 bus operators?  
26

1 MR STEPHEN BAKER: We have a mechanism for liaison with  
2 trade unions and with the franchised bus companies, but  
3 I would say that the greater part if not almost the  
4 whole part is based on the statistics of complaint from  
5 the public, with additional input from the bus companies  
6 and the unions.

7 MS MAGGIE WONG: The news report mentioned about the  
8 trial -- it is a trial run -- it will roll out cameras  
9 with a city-wide two-month pilot, in Kowloon East and  
10 New Territories North, between December last year and  
11 January, and it stated that the initial scheme had been  
12 satisfactory, with \$540 fixed penalty tickets.

13 About the installation of cameras, where would you  
14 normally install these cameras?

15 MR STEPHEN BAKER: The pilot scheme that you have referred  
16 to, which was conducted in December last year and  
17 January this year, involved the use of officers using  
18 a Handycam rather than a fixed-site camera.

19 CHAIRMAN: Isn't that an expensive way of enforcing traffic  
20 infractions, manpower?

21 MR STEPHEN BAKER: We began the trial in an effort to reduce  
22 the amount of manpower that was used to enforce these  
23 kinds of offences. The trial focused on moving-traffic  
24 offences which caused vehicle obstruction, for example,  
25 setting down passengers or goods in restricted zones.

26

1 Normally, to enforce this kind of offence, take this  
2 kind of enforcement action, the officer would have to  
3 intercept the vehicle at the scene or, as is what very  
4 often happens, the vehicle drives away then officers  
5 would mount a pre-planned snap-check or roadblock  
6 nearby, or an officer on a motorcycle would follow the  
7 vehicle and stop the vehicle. Therefore, because of  
8 this requirement, this necessity, more manpower would be  
9 required for this kind of operation.

10 The aim of the pilot and the subsequent trial is to  
11 enable two officers, one using the video camera, the  
12 other making notes of what he saw, to take enforcement  
13 action without intercepting the vehicle, and therefore  
14 the manpower requirement for the interception, either by  
15 following the vehicle on a motorcycle or by arranging  
16 a roadblock nearby, is done away with.

17 So it was an attempt to increase the efficiency of  
18 the enforcement.

19 CHAIRMAN: Has thought been given to just using cameras,  
20 taking the man on his motorbike out of it, the camera  
21 captures the infraction, it has the number plate, it has  
22 the location, it has the length of time that the vehicle  
23 has been breaking the law; you then track the registered  
24 owner from the number on the car?

25 MR STEPHEN BAKER: That's what the trial is doing, sir, yes.

26

1 CHAIRMAN: Without men being involved is what I'm  
2 suggesting.

3 MR STEPHEN BAKER: I see.

4 CHAIRMAN: Automatic cameras.

5 MR STEPHEN BAKER: That is something that we are looking at  
6 in the longer term.

7 CHAIRMAN: That is something that is used widely in London,  
8 is it not?

9 MR STEPHEN BAKER: It is, sir, yes.

10 CHAIRMAN: And it's used elsewhere -- Singapore?

11 MR STEPHEN BAKER: Yes, it is, sir.

12 CHAIRMAN: Why are we not using it here?

13 MR STEPHEN BAKER: I would say that was a policy issue, sir,  
14 that is now being addressed.

15 CHAIRMAN: Is it a question of funding being made available?

16 MR STEPHEN BAKER: I don't think it's a matter of funding,  
17 but it is a matter of policy support.

18 CHAIRMAN: Can I come back to my first question which is  
19 this: using policemen, the man himself, the police  
20 officer, to enforce traffic violations, is expensive, is  
21 it not, compared with technology?

22 MR STEPHEN BAKER: It is, sir, yes.

23 MS MAGGIE WONG: Has thought been given to installing  
24 cameras or CCTV on the bus stop or location near the bus  
25 stop?  
26

1 MR STEPHEN BAKER: Perhaps I could ask Ms Yau to answer  
2 these questions.

3 CHAIRMAN: Certainly. Chief Superintendent.

4 MS YAU SIN MAN: (Via interpreter) The use of CCTV at bus  
5 stops, for the purpose of law enforcement, is being  
6 tried out in a pilot. This is something from the  
7 Development Bureau and the Transport and Housing Bureau.  
8 This is under the Energising Kowloon East Office of the  
9 Development Bureau. They have a conceptual pilot. In  
10 Kowloon East, some fixed cameras are installed there.  
11 In the first phase, the cameras would target moving  
12 offences, vehicles in motion. The second phase would be  
13 on illegal parking cases.

14 This is ongoing. In August, we issued the tenders.  
15 In the coming 24 months, we would look into how this  
16 might take the place of enforcement by officers. If it  
17 proves to be a mature technology, then the police will  
18 further consider how the findings can be adopted by the  
19 police to take the place of enforcement by officers  
20 physically.

21 CHAIRMAN: This is a mature technology. It is used widely  
22 in major cities. There is nothing immature about it.

23 MS YAU SIN MAN: (Via interpreter) Currently, we are trying  
24 to get the computer to use video analytics to take the  
25 image of a vehicle and how it constitutes illegal  
26

1 parking.

2 I would also like to add that in relation to laws  
3 against illegal parking, we are required to give the  
4 fixed penalty ticket to the driver or attach it to the  
5 screen, windscreen, of the vehicle, there and then. If  
6 we use electronic ticketing or use CCTV image and then  
7 issue a ticket, under current legislation, we are unable  
8 to do it.

9 CHAIRMAN: You can't issue the ticket to the registered  
10 driver by using a camera to identify the number plate  
11 and then match it with the registered driver's  
12 particulars?

13 MS YAU SIN MAN: (Via interpreter) If it is, for illegal  
14 parking, that cannot be done. However, with regard to  
15 driving offences, yes, that can be done.

16 CHAIRMAN: What is required for illegal parking; that  
17 a ticket be put on the car itself?

18 MS YAU SIN MAN: (Via interpreter) Yes, the front of the  
19 car, or give it to the driver.

20 CHAIRMAN: Well, that needs to change, doesn't it, in order  
21 to catch up with technology that's been available for  
22 ten years?

23 MS YAU SIN MAN: (Via interpreter) We are aware that the THB  
24 has started work in legislative amendments.

25 CHAIRMAN: It's a lot easier to amend legislation by  
26

1 deleting things.

2 Yes, Ms Wong.

3 MS MAGGIE WONG: Yes. About this conceptual scheme, can you  
4 tell us when did you have this idea with the Development  
5 Bureau, in developing this technology? When was that?

6 MS YAU SIN MAN: (Via interpreter) In April 2017, the  
7 police, under Energising Kowloon East Office, was  
8 invited to give comment. Our view was to tell the  
9 contractor as to what constitutes a traffic offence.

10 MS MAGGIE WONG: Do you have minutes of the meeting in  
11 relation to the development of the scheme with the  
12 Development Bureau?

13 MS YAU SIN MAN: (Via interpreter) There may be some  
14 material, but I have to go back to find it.

15 MS MAGGIE WONG: Would you be happy to provide us if you can  
16 find it?

17 MS YAU SIN MAN: (Via interpreter) Yes.

18 MS MAGGIE WONG: In relation to this point, I understand  
19 that the police have been using automatic number plate  
20 recognition system, that is ANPR, since 2015; is that  
21 correct?

22 MS YAU SIN MAN: (Via interpreter) I can't recall the year,  
23 but yes, we have been using it.

24 MS MAGGIE WONG: I think it is stated in one of the LegCo  
25 papers, a recent LegCo paper, placed before the  
26

1 Legislative Council Panel on Security, Law Enforcement  
2 Against Moving Traffic Offences, in April 2018.

3 It is a paper compiled by the Transport and Housing  
4 Bureau, Security Bureau and Hong Kong Police Force. The  
5 heading is, "Legislative Council Panel on Security, Law  
6 Enforcement Against Moving Traffic Offences".

7 CHAIRMAN: Is there a reference in the bundle to this  
8 material?

9 MS MAGGIE WONG: No, Mr Chairman. This is newly added this  
10 morning.

11 We can see at paragraph 2, "Background":

12 "The police have been fulfilling their duties to  
13 safeguard the safety of the public through different  
14 means. One of the police's operational priorities is to  
15 ensure road safety and reduce traffic accidents."

16 Then, jumping a few lines:

17 "The police have been adopting a multipronged  
18 approach to promote road safety, combat moving traffic  
19 offences, and launch publicity activities and educate  
20 the public and drivers to comply with road [safety]  
21 regulations."

22 If we go to paragraph 7, it is in this context that  
23 there were suggestions about law enforcement action  
24 against the moving traffic offences. We can see the use  
25 of technology -- it is stated there:

1            "At present, there are 195 red light cameras and 24  
2            speed enforcement cameras operating at 130 camera  
3            housing locations across the territory. Evidence  
4            collected from the cameras allows the police to  
5            subsequently identify the concerned vehicles and  
6            initiate prosecution without the need to intercept  
7            an offending vehicle, thereby effectively improving road  
8            safety. The police have been using the automatic number  
9            plate recognition ... system since 2015. The system  
10           enables traffic enforcement officers to detect relevant  
11           traffic contraventions, including those involving  
12           expired vehicle licences, registered vehicle owners  
13           driving while disqualified or having traffic arrest  
14           warrants."

15           May I ask about this automatic number plate  
16           recognition system. It appears this is a system also  
17           originating from London or England; is that correct?

18        MR STEPHEN BAKER: Could I help with this part of the  
19           question --

20        MS MAGGIE WONG: Yes, thank you.

21        MR STEPHEN BAKER: -- the ANPR part.

22           A trial was conducted on the use of automatic number  
23           plate recognition, beginning in 2013, and it was  
24           conducted on a very limited basis. It involved  
25           a roadside-mounted camera, which was linked to data  
26

1 provided by the Transport Department concerning vehicles  
2 that were registered to persons who had an outstanding  
3 traffic arrest warrant. This enabled the officers using  
4 the equipment to identify such vehicles, and the vehicle  
5 would then be intercepted either at a roadblock or by  
6 following the offender's vehicle on a motorcycle, in  
7 order that prosecution action would be taken.

8 So it was used in that very limited context, as  
9 a trial.

10 Steps are now being taken to widen the use of  
11 automatic number plate recognition, and to widen the  
12 number of offences that can be linked to the database  
13 which is provided by the Transport Department.

14 We are in the process of identifying equipment which  
15 can be placed inside police vehicles, selected police  
16 vehicles, which can patrol on the highways, and surface  
17 such vehicles linked to persons wanted for criminal  
18 offences, vehicles that are wanted, vehicles that are  
19 registered to persons who have an outstanding traffic  
20 warrant.

21 That is the limited context in which ANPR has been  
22 used and is intended to be used. So it is a little  
23 bit -- the context of paragraph 7 doesn't give  
24 an accurate picture of what is going on.

25 CHAIRMAN: So it is limited to trying to detect people who  
26

1 are already wanted?

2 MR STEPHEN BAKER: That's right, sir.

3 CHAIRMAN: It is not aimed at detecting people who commit  
4 moving offences generally?

5 MR STEPHEN BAKER: That's right, sir.

6 CHAIRMAN: Is there any reason why not the latter?

7 MR STEPHEN BAKER: There is another system which is used in  
8 police vehicles, which can record using video people  
9 committing traffic offences on the roads. But these  
10 systems all involve police officers operating them.  
11 They are not automated systems, which are envisaged at  
12 some time in the future, as Ms Yau has said, using video  
13 analytics, and so on and so forth.

14 CHAIRMAN: What about the use of the equivalent of what they  
15 use in London at yellow-box junctions?

16 MR STEPHEN BAKER: That is also linked to video analytics.

17 CHAIRMAN: Yes.

18 MR STEPHEN BAKER: Which is something we don't have yet,  
19 sir.

20 CHAIRMAN: But they have had it in London for ten years.

21 MR STEPHEN BAKER: I know, sir, yes.

22 CHAIRMAN: In fact, they have been so successful that  
23 millions of pounds were raised in the penalties people  
24 had to pay.

25 MR STEPHEN BAKER: Yes. The installation of such equipment  
26

1 in Hong Kong is not simply a police matter. It involves  
2 other government departments and policy-level decisions.

3 CHAIRMAN: Well, it obviously has data privacy connotations  
4 as well.

5 MR STEPHEN BAKER: It does, sir, yes.

6 CHAIRMAN: Balanced against breaking the law.

7 MR STEPHEN BAKER: That's right, sir.

8 MS YAU SIN MAN: May I supplement a bit on the yellow-box  
9 junction involvement?

10 (Via interpreter) In September 2015, the THB started  
11 a study on yellow box enforcement camera system, and in  
12 April 2016, because of lack of financial backing, the  
13 study came to a stop.

14 CHAIRMAN: Who was providing the money?

15 MS YAU SIN MAN: (Via interpreter) The THB could not come up  
16 with funding support.

17 CHAIRMAN: This is a matter dealt with in Chief  
18 Superintendent Cadman's letter of August 2018, is it  
19 not?

20 MS YAU SIN MAN: (Chinese words not interpreted).

21 CHAIRMAN: Could we have that on the screen? I don't have  
22 the paginated bundle.

23 MS MAGGIE WONG: That would be 124-538 of the miscellaneous  
24 bundle.

25 CHAIRMAN: The page number again?

26

1 MS MAGGIE WONG: The letter starts at page 124-538.

2 And the paragraph Ms Yau mentioned is in paragraph 4  
3 at page 124-539.

4 Maybe I will read that for the record.

5 CHAIRMAN: Yes, if you would.

6 MS MAGGIE WONG: In paragraph 4, you stated there:

7 "In respect of the yellow-box junction enforcement,  
8 in September 2015 THB convened a study with police to  
9 explore whether the yellow box enforcement camera system  
10 is technically, financially and legally feasible in  
11 Hong Kong. Since then, Hong Kong Police had tried to  
12 identify suitable products that could fit the context of  
13 Hong Kong. However, in April 2016 the study came to  
14 a halt as there was no funding support to engage  
15 a consultancy study. That said, the matter is now being  
16 actively considered, along with other types of  
17 enforcement cameras in the aforementioned  
18 interdepartmental forum."

19 Now, Ms Yau, it stated there that the matter is now  
20 being actively considered. What triggered a halt to an  
21 active consideration of the matter?

22 CHAIRMAN: They ran out of money, I think we are being told,  
23 or rather money was not forthcoming. I don't think  
24 anyone has accused this government of running out of  
25 money. It's the use of the money that's the issue, is  
26

1           it not?

2       MS YAU SIN MAN: (Via interpreter) In the THB, together with  
3           the police and the Transport Department, there are  
4           regular meetings, and we have presented many general  
5           plans on how to use technology to enforce the traffic  
6           laws, including yellow-box junction enforcement.

7       CHAIRMAN: When was the scheme revived or at least  
8           consideration of reviving the scheme revived?

9       MS YAU SIN MAN: (Via interpreter) In February 2018, we had  
10          some meetings on e-enforcement. The issue of  
11          e-enforcement was brought up for discussion.

12      CHAIRMAN: E-enforcement is your shorthand for electronic  
13          enforcement of traffic violations?

14      MS YAU SIN MAN: (Via interpreter) Correct.

15      CHAIRMAN: You detect the malefactor, you identify him  
16          through the number plate to the registered owner, and  
17          you send him an e-ticket; is that it?

18      MS YAU SIN MAN: (Via interpreter) Simply put, that's it.

19      CHAIRMAN: And for how long have we been pursuing trying to  
20          do this?

21      MS YAU SIN MAN: (Via interpreter) If we are talking about  
22          e-tickets, we started to raise this possibility in 2012.  
23          The meetings that we are now having are to tie in with  
24          the Smart City initiative of the government. We hope  
25          that in traffic law enforcement that more technology

26

1           should be adopted.

2       CHAIRMAN:   So we have taken six years and we are no further  
3           along the road; is that it?

4       MS YAU SIN MAN:   (Via interpreter) We are actively doing  
5           something about it.

6       CHAIRMAN:   Smart City, you say?

7       MS YAU SIN MAN:   (Via interpreter) The general traffic law  
8           enforcement will be considered in the context of the  
9           general direction adopted by the SAR government.

10      CHAIRMAN:   Yes, Ms Wong.

11      MS MAGGIE WONG:   Ms Yau, you mentioned that in February  
12           2018, you had some meetings on e-enforcement.   What  
13           triggered this meeting to consider the issues of  
14           electronic enforcement?

15      MS YAU SIN MAN:   (Via interpreter) It is mainly because of  
16           the Smart City initiative formulated by the government,  
17           and that's why we had some meetings.

18      MS MAGGIE WONG:   Was this after the Tai Po accident on  
19           10 February 2018?

20      MS YAU SIN MAN:   (Via interpreter) No.

21      MS MAGGIE WONG:   So you are saying it was before, the  
22           meeting was held before?

23      MS YAU SIN MAN:   (Via interpreter) Well, we had the meeting  
24           with the THB, but it is not because of the accident.

25      CHAIRMAN:   That's a separate question.   The question is was  
26

1           it before or after. Whether it was on account of is  
2           another matter.

3       MS YAU SIN MAN: (Via interpreter) The meeting was prepared  
4           before February.

5       CHAIRMAN: Thank you.

6       MS MAGGIE WONG: Now, you stated in that paragraph that it  
7           involved interdepartmental forum about these enforcement  
8           cameras. What are the departments concerned?

9       MS YAU SIN MAN: (Via interpreter) The THB, the police and  
10          the Transport Department.

11      MS MAGGIE WONG: So do I understand correctly that this  
12          yellow-box junction enforcement is now revived as  
13          a discussion in tackling the illegal parking problem?

14      MS YAU SIN MAN: (Via interpreter) This is just a part of  
15          it. In the meeting, we talk about generally the  
16          adoption of technology to take the place of manpower in  
17          traffic law enforcement.

18      MS MAGGIE WONG: What about the ANPR system? Has that been  
19          discussed as one of the systems that could be utilised  
20          to tackle illegal parking problem?

21      MS YAU SIN MAN: (Via interpreter) Not particularly  
22          mentioned. ANPR was not particularly mentioned.

23      MS MAGGIE WONG: We have heard some recommendations from the  
24          trade unions, bus companies, and some of the LegCo  
25          papers, making some recommendations as to how to tackle  
26

1           this illegal parking problem.

2           In summary, there are five recommendations. May  
3           I ask you about each one of them? The first is we have  
4           seen, in one of the answers given by William Chung of  
5           New World Citybus, that there be a 24-hour restriction  
6           zone. What is your view on this or what is the police  
7           department's view on this?

8   CHAIRMAN: 24-hour restriction zone of what, where, for what  
9           purpose?

10   MS MAGGIE WONG: 24-hour restriction zone in relation to  
11           year the bus stop, to tackle -- to identify the cars  
12           that have illegally parked near the bus station. That's  
13           what I understood William Chung's evidence to be.

14   CHAIRMAN: That, in addition to the bus stop, there should  
15           be a zone before and after --

16   MS MAGGIE WONG: Yes.

17   CHAIRMAN: -- the bus stop, where parking was prohibited,  
18           24 hours a day?

19   MS MAGGIE WONG: Yes.

20   CHAIRMAN: Thank you.

21   MS MAGGIE WONG: Thank you to the secretariat who have  
22           pulled up the screen the suggestions at the top:

23           "We hope that [these black spots] of illegal parking  
24           these sections, they will have 24-hour restricted zone.  
25           We also notify the police to do enforcement work."

26

1           So it is in that context that I raise this  
2           recommendation. So what is your view on this?

3   MS YAU SIN MAN: (Via interpreter) We believe that 24-hour  
4           restricted zones can be helpful, but the setting of  
5           restricted zone is under the ambit of the Transport  
6           Department. We need their collaboration.

7   MS MAGGIE WONG: It mentioned here that they notified the  
8           police to do this enforcement work. Do you have any  
9           recollection that this 24-hour restricted zone has been  
10          raised with the police by franchised bus operators?

11   MS YAU SIN MAN: (Via interpreter) It is not very clearly  
12          raised in writing, according to my recollection. I may  
13          have to check when I go back.

14   MS MAGGIE WONG: Do you have any recollection of this matter  
15          ever being raised in your meetings with the Transport  
16          Department?

17   MS YAU SIN MAN: (Via interpreter) In our meetings with  
18          representatives of the Transport Department and  
19          franchised bus operators, they did mention illegal  
20          parking causing obstruction to bus operation, yes, it  
21          was raised.

22          When we received the message from them, we also  
23          disseminated the same to different police regions and  
24          formations so that they could take necessary action.

25   MS MAGGIE WONG: The second suggestion they made is signage

26

1 at bus stop, putting signage at bus stop, that that  
2 section where the bus stop is is not allowed to have any  
3 illegal parking.

4 We have seen some photographs in one of the  
5 documents provided by Kowloon Motor Bus. That's at  
6 bundle 12A, page 5174. It's actually from 5173 to 5174.  
7 We can see, in Chinese characters, "Illegal parking  
8 strictly prohibited" in the green box, we see in the  
9 photo.

10 MS YAU SIN MAN: (Via interpreter) I have never seen this  
11 sign previously. Actually, all signs on the road have  
12 to be approved by the Transport Department. I don't  
13 know whether this is something prepared by the bus  
14 operator or it has been approved by the Transport  
15 Department.

16 MS MAGGIE WONG: Leaving aside the permission question, can  
17 you tell us whether that sort of signage posted at bus  
18 stops would assist the enforcement or would assist  
19 public's awareness of combatting the problem of illegal  
20 parking?

21 MS YAU SIN MAN: (Via interpreter) Well, such signs  
22 of course can be good reminders, but are they good  
23 enough to prevent illegal parking? I don't know how  
24 effective they are going to be.

25 CHAIRMAN: Is there any problem with ignorance, people not  
26

1           understanding that you can't park your car in the middle  
2           of a bus stop? Is that a problem or not?

3       MS YAU SIN MAN: (Via interpreter) I know the public know  
4           that they cannot park their cars at any bus stop. But  
5           they may think it is okay to stop for a short while. So  
6           we need to do some public education.

7       CHAIRMAN: So the real issue is that they take a chance  
8           about breaking the law?

9       MS YAU SIN MAN: (Chinese words not interpreted).

10      CHAIRMAN: And that's where enforcement is required, so the  
11           chance becomes too expensive?

12      MS YAU SIN MAN: (Via interpreter) Certainly.

13      MS MAGGIE WONG: Now, the third recommendation they made is  
14           having double yellow lines around the bus stop area.

15      CHAIRMAN: By that you mean the approach and the exit from  
16           the bus stop?

17      MS MAGGIE WONG: Yes, correct, the approach and exit.

18           How do you find that suggestion?

19      MS YAU SIN MAN: (Via interpreter) This is just the same as  
20           the previous recommendation. We believe it is useful.  
21           No parking zone, it is good for preventing illegal  
22           parking. But I think the Transport Department has to do  
23           something about the road signs.

24      MS MAGGIE WONG: Has that been raised with the Transport  
25           Department, as far as you know?

26

1 MS YAU SIN MAN: (Via interpreter) But there is no record in  
2 the Traffic Branch Headquarters that this was raised,  
3 but the regions also have their own traffic formations  
4 and they would liaise with the local Transport  
5 Department officers on road signs, signage, and yellow  
6 lines. They have discussions separately.

7 CHAIRMAN: Is it currently the practice to have double  
8 yellow lines in the approach to a bus stop and the exit  
9 from a bus stop or not?

10 MS YAU SIN MAN: (Via interpreter) Usually, you find that.

11 CHAIRMAN: So the issue really is one of enforcement,  
12 because, again, everyone knows what a double yellow line  
13 is?

14 MS YAU SIN MAN: (Via interpreter) That's right.

15 MS MAGGIE WONG: The fourth suggestion we have explored is  
16 by deployment of technology such as CCTV and the video  
17 cameras as you have mentioned earlier on.

18 The fifth recommendation is a suggestion that we may  
19 consider the practice in Singapore of having cameras  
20 installed next to the driver's seat, and all the driver  
21 needs to do is to press the button whenever he saw there  
22 is illegal parking.

23 CHAIRMAN: At a bus stop?

24 MS MAGGIE WONG: At a bus stop.

25 CHAIRMAN: In other words, pray in aid the use of people who  
26

1 are inconvenienced by this illegal parking, get them to  
2 help.

3 And your question, Ms Wong?

4 MS MAGGIE WONG: It is, first of all, what do you think  
5 about this suggestion? Because they are the  
6 complainants and they have cameras already installed on  
7 the buses; all they need to do is press a button and  
8 pass the footage to the Transport Department. And the  
9 suggestion is to simply invite them to assist in the  
10 enforcement of the law. How do you find that  
11 suggestion?

12 MS YAU SIN MAN: (Via interpreter) There are two parts. If  
13 it is moving traffic offences, if we have footage from  
14 bus companies, and if we get the assistance of bus  
15 drivers in the investigation, we can fine the driver, we  
16 can fine the owner of the vehicle, to enforce the law.

17 However, if it is a parking offence, illegal  
18 parking, then, as I said, there are some legal  
19 restrictions; we need to issue the ticket there and  
20 then.

21 So it depends on the nature of the offence.

22 CHAIRMAN: Could you help me with the reference to the  
23 legislation which provides, as I understand your  
24 evidence, that a non-moving infraction, a parking  
25 offence, requires the ticket to be either affixed to the

26

1           windscreen or given to the driver? What is that  
2           legislative provision?

3           Perhaps one of your colleagues can look it up and  
4           come back to it later.

5   MS YAU SIN MAN: (Via interpreter) Yes. It's Cap 237. I am  
6           trying to find the provision.

7   CHAIRMAN: What's the name of the ordinance?

8   MS YAU SIN MAN: Fixed Penalty (Traffic Contraventions)  
9           Ordinance.

10   CHAIRMAN: Thank you.

11           As I say, we can come back to this later.

12   MS YAU SIN MAN: Yes.

13   CHAIRMAN: But it clearly is an impediment to the efficient  
14           enforcement of law.

15   MS YAU SIN MAN: (Chinese words not interpreted).

16   MS MAGGIE WONG: Yes. Ms Yau, we are moving on to another  
17           topic. It is on assaults on bus captains.

18           We have heard evidence again on the enforcement of  
19           assaults on bus captains by the police. There have been  
20           complaints that the police did not appear to have given  
21           these cases a high priority. We have been provided with  
22           a list of assaults by the Kowloon Motor Bus for the  
23           period of 1 January 2015 to 22 July 2018.

24           If we can pull up on the screen KMB-1, page 212.  
25           This is a letter from KMB, setting out the statistics of  
26

1 the alleged assaults on bus captains reported to KMB  
2 from 1 January 2015 to "to date", that is 26 July 2018;  
3 and also details of five specific alleged assaults.

4 One of the issues they raised is -- if we can look  
5 at the table, there are 41 cases, and out of these 41  
6 incidents we can see very few resulted in any  
7 prosecution or meaningful result. Only two cases we can  
8 see at items 162 and 164, at page 216. And most of  
9 these cases we see are settled or with verbal warning or  
10 not pursued by the police.

11 Can I ask your view on this matter: first of all,  
12 their comments that the police seemed to not give  
13 priority to these sorts of cases, when it touches on  
14 assaults on bus captains?

15 MS YAU SIN MAN: (Via interpreter) I would ask my colleague  
16 from the Traffic Branch Headquarters as well as those  
17 from the Crime Wing to answer.

18 MR LEE TAI WAI: (Via interpreter) In relation to the 180  
19 cases submitted by KMB -- well, after we received the  
20 information, we liaised with KMB to ask for information.

21 Out of 188 cases, we have successfully found the  
22 facts of the case as well as the result of 182 cases.  
23 Out of the 182 cases, 131 of them are assault on bus  
24 captains by passengers when the bus captains were  
25 working. 99 cases were successfully detected. Out of  
26

1 the 99 cases, 83 cases resulted in prosecution and the  
2 cases were brought to court. 47 of them did not result  
3 in prosecution.

4 CHAIRMAN: There would be no further action?

5 MR LEE TAI WAI: (Via interpreter) I agree, right, no  
6 further action.

7 CHAIRMAN: And, of the 83 prosecutions, how many convictions  
8 resulted?

9 MR LEE TAI WAI: (Via interpreter) Of the 83 prosecution  
10 cases, 73[sic] of them resulted in convictions.

11 CHAIRMAN: Do you have statistics of pleas of guilty and  
12 pleas of not guilty, constituting that figure of 73?

13 MR LEE TAI WAI: (Via interpreter) For the 75 convicted  
14 cases, there are different penalties.

15 CHAIRMAN: No. The question was: how many pleaded guilty,  
16 and how many were found guilty?

17 MR LEE TAI WAI: (Via interpreter) We don't have the  
18 numbers.

19 CHAIRMAN: Thank you.

20 MS MAGGIE WONG: Have you completed your answer, Mr Lee?

21 MR LEE TAI WAI: Yes.

22 MS MAGGIE WONG: Apart from the increase of assault  
23 incidents --

24 CHAIRMAN: Before you move on, Ms Wong -- do you have this  
25 information available in written form? Just as KMB  
26

1 provided us with their analysis, the 188 figure, do you  
2 have a table in which you analysed it, from which you  
3 appear to be reading?

4 MR LEE TAI WAI: (Via interpreter) Yes, we have the  
5 information in writing.

6 CHAIRMAN: Can you provide that to us in due course?

7 MR LEE TAI WAI: (Via interpreter) Yes.

8 CHAIRMAN: Thank you.

9 Perhaps I stopped you prematurely. You wanted to  
10 tell us about the penalties. How did you analyse the  
11 penalties?

12 MR LEE TAI WAI: (Via interpreter) Of the 75 conviction  
13 cases, 15 of them were imprisonment or a suspended  
14 sentence.

15 CHAIRMAN: How many were actual imprisonment as opposed to  
16 suspended imprisonment?

17 MR LEE TAI WAI: (Via interpreter) I don't have the  
18 information in this regard.

19 CHAIRMAN: Thank you.

20 MR LEE TAI WAI: (Via interpreter) And in relation to bound  
21 over, 22 cases; social service order, 16 cases; fine, 18  
22 cases.

23 CHAIRMAN: Do you have the range of fines, maximum, minimum?

24 MR LEE TAI WAI: (Via interpreter) No. And there are four  
25 cases of the probation order.

26

1 CHAIRMAN: Do you have the offences for which these persons  
2 were convicted?

3 MR LEE TAI WAI: (Via interpreter) Of all the cases I have  
4 mentioned, there are four types: wounding ...

5 CHAIRMAN: You are speaking now to the convictions, or  
6 generally?

7 MR LEE TAI WAI: (Via interpreter) Generally.

8 CHAIRMAN: Yes, wounding ...

9 MR LEE TAI WAI: (Via interpreter) The second one is AOABH,  
10 assault occasioning actual bodily harm. The third one  
11 is common assault. The fourth one is fighting in  
12 a public place.

13 CHAIRMAN: Is wounding confined to section 19 offences?

14 MR LEE TAI WAI: (Via interpreter) Section 17 and  
15 section 19.

16 CHAIRMAN: Thank you.

17 MS MAGGIE WONG: Just on this last topic, fighting in public  
18 place, we have heard from some of the representations of  
19 the trade unions that they raise objection to this  
20 offence being made against the bus driver as well, in  
21 terms of fighting in public place, and they made two  
22 reasons. One is they are the drivers who are supposed  
23 to enforce the law based on Cap 230A, in terms of the  
24 enforcement of safety, or bus safety. And the second is  
25 the legislation or the enforcement should protect the  
26

1 bus driver against assaults.

2 What do you say about those two complaints in  
3 relation to the charge of fighting in public place?

4 CHAIRMAN: Presumably, you say that the charge wouldn't have  
5 been brought unless it was appropriate. Would that be  
6 the answer?

7 MR LEE TAI WAI: (Via interpreter) In relation to complaints  
8 made by bus captains about assault, every case is  
9 different. There are different factors. Under  
10 Cap 230A, bus captains have certain power to deal with  
11 misbehaving or law-breaking passengers. So bus captains  
12 are protected by laws, in relation to those cases under  
13 common assault or AOABH.

14 MR CHEUNG TIN LOK: (Via interpreter) Maybe I should  
15 supplement. The counsel asked whether, in some cases,  
16 the bus company may be of the view that the police have  
17 dealt with bus captain assault cases in a way different  
18 from what they would expect or we do not attach  
19 importance to such cases.

20 I want to say that is irrespective of the status,  
21 nationality, profession of the parties concerned, every  
22 case is dealt with in an equal manner.

23 Our colleague has referred to the information that  
24 we can provide in relation to the 188 cases referred to  
25 by the KMB. We have been able to tell you the number of  
26

1 detected cases, the number of prosecutions and the  
2 number of convictions. Compared with cases of similar  
3 nature, the relevant prosecutions and convictions are  
4 relatively higher.

5 So we do not think that in the case of assault on  
6 bus captain cases, the police have tried to downplay the  
7 importance. I have to stress again that in handling  
8 cases of assaulting bus captains, we have adopted a very  
9 even-handed and serious attitude.

10 In the investigation, we deal with the cases in  
11 an even-handed manner, and if there is sufficient  
12 evidence to support a prosecution, we would proceed with  
13 prosecution, but that would depend on the case in  
14 question. If necessary, we also seek advice from the  
15 Department of Justice.

16 The counsel has particularly referred to the offence  
17 of fighting in a public place. What I want to say is  
18 that when we receive a report and our officer would come  
19 to the scene to investigate, we will have to classify  
20 the case according to the findings of the investigation.  
21 Of course, the parties concerned might insist on their  
22 side of the story, but the police would certainly make  
23 an assessment and come to a conclusion on the charges to  
24 be laid on one or both parties. It could be that we  
25 would only prosecute one of them, but if the evidence  
26

1 shows that fighting actually took place, then we would  
2 lay the appropriate charge against the relevant party.

3 It is not just a decision made by the police --

4 CHAIRMAN: Forgive me for cutting you off, Superintendent  
5 Cheung. So my original suggestion was that if they are  
6 charged, it is appropriate to do so?

7 MR CHEUNG TIN LOK: (Chinese words not interpreted).

8 CHAIRMAN: Yes. Very well. We have now gone past 1 o'clock  
9 so we will take a lunch break now and resume again this  
10 afternoon at 2.30. Thank you.

11 (1.06 pm)

12 (The luncheon adjournment)

13 (2.30 pm)

14 CHAIRMAN: Good afternoon.

15 Yes, Ms Wong.

16 MS MAGGIE WONG: Good afternoon.

17 Ms Yau, before the break, you were looking for  
18 a section in Cap 237 in relation to the issue that the  
19 fixed penalty ticket has to be served personally on the  
20 driver or fixed on the vehicle.

21 Have you been able to locate the section?

22 MS YAU SIN MAN: (Via interpreter) Yes, we have located it.

23 MS MAGGIE WONG: Is that section 15?

24 MS YAU SIN MAN: (Via interpreter) Yes, subsection 15(2).

25 MS MAGGIE WONG: For the purposes of reading into the  
26

1 record, may I read that out. I think I should read  
2 subsection (1) as well.

3 CHAIRMAN: Yes, please do.

4 MS MAGGIE WONG: "If a police officer has reasonable cause  
5 to believe that a contravention is being or has been  
6 committed, he may give the registered owner of the  
7 vehicle concerned or, where section 3(2) applies, the  
8 driver liable an opportunity to discharge his liability  
9 in respect of that contravention by payment of a fixed  
10 penalty.

11 (2) For the purposes of subsection (1) notice in the  
12 prescribed form shall be delivered personally to the  
13 person in charge of the vehicle or fixed on the vehicle:

14 Provided that the operation of this section or  
15 section 16 shall not be affected by a failure to comply  
16 with this subsection."

17 Ms Yau, is that the section you refer to that  
18 requires personal service?

19 MS YAU SIN MAN: (Via interpreter) Indeed.

20 MS MAGGIE WONG: But it appears from the proviso or the  
21 "provided" part that a failure to comply with this  
22 subsection would not be affected in terms of the  
23 contravention of section 15(1).

24 MS YAU SIN MAN: (Via interpreter) Yes, I note that.

25 In relation to 15, we have consulted the advice of  
26

1 the DoJ, but I haven't got the advice with me now. The  
2 advice was saying that the notice has to be fixed to the  
3 vehicle or served to the driver.

4 CHAIRMAN: If that advice was correct, for argument's sake,  
5 the legislative amendment would be simply to delete  
6 section 15(2), would it not?

7 MR STEPHEN BAKER: As I recall from the draft drafting  
8 instruction, my Lord, it's not to delete it. It is to  
9 add the facility to enable remote ticketing.

10 CHAIRMAN: Yes, but deleting it would have the same effect,  
11 then service would be at large.

12 MR STEPHEN BAKER: I bow to your ...

13 CHAIRMAN: But, either way, the point really is this: this  
14 can be solved very quickly, either with a blue pencil,  
15 which is how words are struck out, or with a red one,  
16 inserting them?

17 MR STEPHEN BAKER: We shall reflect your comments, sir.

18 CHAIRMAN: What we are encumbered with is legislation that  
19 is 35 years old, 30-plus years old.

20 MR STEPHEN BAKER: That's right, sir.

21 CHAIRMAN: Computers have come a long way, technology has  
22 come a long way, since then. This legislation wasn't  
23 written for the technology that obtains now.

24 MS MAGGIE WONG: Mr Lee, earlier on you mentioned before the  
25 break that there are, out of 188 cases provided by  
26

1 Kowloon Motor Bus, 47 cases in which there were no  
2 prosecutions.

3 Can you let us know what is the common factor which  
4 led to this non-prosecution?

5 MR LEE TAI WAI: (Via interpreter) There were 47 cases where  
6 prosecution could not be pursued. For 22 cases, we  
7 could not identify or locate the suspect or the  
8 assaulter. For 16 cases, the victims did not pursue the  
9 cases, so the cases ended. For the other six cases,  
10 insufficient evidence -- ineptitude, insufficient  
11 evidence, and the cases were closed after advice by DoJ.  
12 Another case is still under investigation.

13 MS MAGGIE WONG: Mr Lee, the real question I would like to  
14 ask is -- we have heard evidence from the Kowloon Motor  
15 Bus that they prefer to use Cap 230A --

16 CHAIRMAN: Before you move on from that -- these cases where  
17 you couldn't identify the assailant, how useful or  
18 otherwise is the fact that people pay to be on buses  
19 with an Octopus card which contains, perhaps, personal  
20 details? How useful is that in identifying  
21 an assailant?

22 MR LEE TAI WAI: (Via interpreter) In trying to find the  
23 assailant -- now, for those who paid by means of Octopus  
24 card, that of course would be useful. But very often  
25 Octopus card users might not be using a personalised  
26

1 card and therefore there won't be sufficient evidence to  
2 identify the persons. But if everyone is using  
3 personalised card, it will help us to identify the  
4 assailant.

5 CHAIRMAN: Thank you.

6 MS MAGGIE WONG: Thank you. Following on this Octopus card  
7 issue, I believe that there are two cases in particular  
8 that the Kowloon Motor Bus raised complaint that the  
9 police did not proactively collect information in  
10 relation to Octopus card records.

11 May I take you to a few documents on this issue.  
12 First of all, can you refer to KMB-1A, page 297. If we  
13 read -- I shall put this in context. There are two  
14 cases -- and I apologise for that -- if we go, first of  
15 all, to page 218 in the same bundle, 1A, there are five  
16 cases mentioned there. Have you got that?

17 It's case number 3 and case number 4. If we look at  
18 page 218-1, paragraph 2, it stated there -- it was  
19 a letter from the IRC to the Kowloon Motor Bus, dated  
20 27 July 2018, in which enquiries were made that:

21 "... in respect of cases 3 and 4, reference was made  
22 to the preparation of a 'CCTV brief finding report' and  
23 that in respect of case 1, reference was made to the  
24 provision to the police of 'Octopus card records of the  
25 assailant'."

1           Then we asked for the provision of copies of the  
2           CCTV and Octopus card records. It was in this context  
3           that the Kowloon Motor Bus replied on 9 August 2018, at  
4           page 297. If you look under the heading, "Reply to your  
5           27 July 2018 letter", paragraph 2, it stated there that:

6           "In respect of cases 3 and 4 referred to in the said  
7           letter, the CCTV brief finding reports prepared by the  
8           accident investigation and prevention team of our legal  
9           department are enclosed ... Please note that, as the  
10          respective defendants pleaded guilty, the CCTV  
11          videos/records were not used in the legal proceedings.

12          In respect of case 1 referred to in the said letter,  
13          by a letter dated 16 April ... the police requested us  
14          to provide the Octopus card records of the assailant and  
15          his ... companions who were the last three passengers on  
16          board the relevant bus at the material time. In or  
17          around end of April 2018, we had a telephone  
18          conversation with the police concerning the Octopus card  
19          records and informed them to collect our written reply."

20          During the oral evidence of Mr Patrick Pang, he said  
21          that the police never came to collect this Octopus card  
22          report.

23          If we also look at your reply in the miscellaneous  
24          bundle at page 124-537-1, I will just read out what you  
25          stated there.

26

1 Mr Lee, have you got that? Not yet.

2 MR LEE TAI WAI: Okay.

3 MS MAGGIE WONG: This is a reply from you to the committee,  
4 dated 7 August 2018. You stated there, in paragraph 3:

5 "For case 1 ... according to the record of  
6 Tin Shui Wai police division, it is confirmed that the  
7 police had not received any Octopus card records of the  
8 assailant from KMB despite a request was made to them to  
9 provide such information."

10 You identify the information that can be obtained  
11 from the use of an Octopus card, including the date and  
12 time of the transaction, the machine being used for the  
13 card, the transaction cost and the personal particulars  
14 of the card owner in the case of a personalised Octopus  
15 card was used.

16 Now, the complaint of the KMB is that they have the  
17 document in hand but the police did not come to collect  
18 it, and the document was hanging around in their office.

19 What is your answer to that?

20 CHAIRMAN: Perhaps we ought to go to the former chief  
21 superintendent, now Mr Pang's evidence.

22 MS MAGGIE WONG: Yes.

23 CHAIRMAN: Because the ball appeared to have been dropped  
24 between the two sides, and he undertook to pick the ball  
25 up.

26

1 MS MAGGIE WONG: If I may invite you to look at transcript  
2 Day 13, 10 August 2018, pages 108 to 109 of the  
3 transcript, transcript bundle 5.

4 If you look at page 108 first, at line 6, the  
5 question from the chairman was this:

6 "We understand that, because we have asked the  
7 police about the information that is obtainable.

8 In your letter, which I think is at page 297 of  
9 KMB-1, in the reply to this letter of request, the  
10 second paragraph, you refer to case 1 and you say  
11 this ....:

12 'In or around end of April 2018, we had a telephone  
13 conversation with the police concerning the Octopus card  
14 records and informed them to collect our written  
15 reply.'.

16 Were they collected? Try 'yes' or 'no' on that, if  
17 you can."

18 Then Mr Patrick Pang said:

19 "No, they didn't come and collect."

20 And if we go to page 109, still Mr Pang's evidence  
21 at line 9:

22 "We made a phone call to Tin Shui Wai district of  
23 the police; we asked them to come and collect the reply.  
24 But the police never came and the letter is still with  
25 us and the Octopus records are still with us."  
26

1           So that's what happened. That's the evidence of

2           Mr Patrick Pang --

3       CHAIRMAN: I think it culminated with Mr Pang agreeing that  
4           that was a silly state of affairs and that he would do  
5           something about it.

6       MS MAGGIE WONG: Yes.

7       MR LEE TAI WAI: (Via interpreter) With regard to the  
8           Tin Shui Wai case, we consulted the Tin Shui Wai  
9           division. According to their record, the information  
10          they gave us was that they did ask from the KMB the  
11          relevant information about Octopus, but then they sent  
12          the letter but they never got a written reply from KMB,  
13          and they did not say that they received any phone call  
14          telling them to go and collect the information.

15          This is what we got from the Tin Shui Wai division.

16       CHAIRMAN: This is a matter that we must pursue with Mr Pang  
17          and KMB.

18       MS MAGGIE WONG: Yes.

19       CHAIRMAN: Because it is a truly lamentable state of affairs  
20          that people involved who both have a mutual interest in  
21          an allegation being investigated and, if appropriate,  
22          a prosecution being mounted, have somehow managed not to  
23          achieve that, when the evidence apparently is available.

24       MS MAGGIE WONG: Mr Lee, you earlier mentioned that these  
25          cases, these 188 cases of KMB, there were four types of

26

1 charges, and in none of those charges do they relate to  
2 Cap 230A, and the evidence of KMB and the trade union is  
3 all spoken with one voice, and they stated that it may  
4 be easier to invoke Cap 230A with regard to passengers'  
5 behaviour, because it doesn't involve physical abuse or  
6 physical contact to constitute a breach, and in that  
7 regard it is easier to prosecute.

8 What is your view on this matter?

9 MR LEE TAI WAI: (Via interpreter) Let me try to answer the  
10 question first. Generally speaking, contraventions  
11 under Cap 230A always happen, and very often an incident  
12 may so develop that there is physical contact and then  
13 the police would arrive on the scene.

14 The most ideal situation is that before an incident  
15 deteriorates, the police can intervene and then we can  
16 put a stop to the incident or we can use an easier  
17 method to handle it, say, for example, to use any  
18 offences under Cap 230A. But very often, when the  
19 police arrive on the scene, there would be injuries and  
20 there would be physical contact already.

21 MS MAGGIE WONG: I mean, in fairness to you, I should show  
22 you a few documents in which I believe Ms Yau has  
23 replied to KMB on this issue, as to whether you would  
24 consider using Cap 230A in future.

25 CHAIRMAN: Perhaps before you get to that we could have the  
26

1 relevant part of Cap 230A on the screen, so we can be  
2 reminded about the ambit of that offence.

3 MS MAGGIE WONG: Yes. That would be at THB-2, page 132.

4 If we look at regulation 13A, and in particular  
5 regulation (1)(c), it stated there that -- it governed  
6 the general conduct of passengers and intending  
7 passengers, and if we roll up regulation 13, which  
8 provides that there is a power to remove passengers, and  
9 then regulation 13A(1) is the offence creating  
10 provision, that:

11 "No passenger or intending passenger shall:

12 (a) wilfully obstruct, impede or distract the driver  
13 of the bus or any authorised person;

14 (b) wilfully obstruct the driver's view of the road  
15 or any traffic;

16 (c) wilfully do or cause to be done with respect to  
17 any part of the bus or its equipment, anything which:

18 (i) obstructs or interferes with the workings of the  
19 bus or causes damage; or

20 (ii) causes injury, discomfort, annoyance or  
21 inconvenience to any other person ..."

22 And it will be an offence.

23 And regulation 25 provides that:

24 "Any person who without reasonable excuse  
25 contravenes any requirement ... under regulation 3(4) or  
26

1 any of the provisions ... commits an offence."

2 And regulation 25(3) provides:

3 "Any person who without reasonable excuse  
4 contravenes ... section 13A ... commits an offence and  
5 is liable to a fine of \$3,000 and to imprisonment for 6  
6 months."

7 So the members of the trade union and the KMB  
8 consider this provision is effective in combatting  
9 physical assaults on bus captains by passengers. You  
10 don't need to prove actual assault in that regard; they  
11 consider it is easier to prosecute.

12 What is your response on that? I am coming to the  
13 point of referring you to some correspondence in which  
14 I believe Ms Yau did reply on this issue.

15 MR LEE TAI WAI: (Via interpreter) With regard to invoking  
16 Cap 230A -- well, I agree we can prevent incidents from  
17 deteriorating, say, that would deteriorate into a fight  
18 where people would be injured, therefore we have always  
19 appealed to bus drivers to keep calm when there are  
20 passengers who contravene the law, and they should  
21 report to the police as soon as possible so the police  
22 can come on the scene and handle the situation, instead  
23 of disputing with the passenger and then enter into  
24 physical contact with the passenger. That is not ideal.

25 Therefore, Cap 230A is effective. If bus drivers  
26

1 can keep calm and call the police to arrive on the  
2 scene, I am sure there will be fewer attack cases as  
3 a result.

4 But we have to look at each case and then we will  
5 look for the most appropriate offence for prosecution.  
6 If there is actual physical contact and if there is  
7 assault, I would think that we should go for the most  
8 appropriate offences in order to take our prosecution.

9 MS MAGGIE WONG: Yes. So maybe to complete the picture, if  
10 Ms Yau can refer to KMB-1A, at page 286 in Chinese and  
11 293 in English. It is a letter from KMB dated 8 March  
12 2018.

13 The date has not been translated, Mr Chairman, in  
14 the English version, but it is dated 8 March 2018.

15 At page 293, the KMB stated there:

16 "In May last year, we wrote to the police expressing  
17 that our bus captains had been assaulted one after  
18 another. Upon considering the relevant cases, we found  
19 that certain offenders not only committed the offence of  
20 common assault but were ... likely to be in violation of  
21 section 13A(1)(c) ..."

22 And then he quoted the section.

23 "As such, our company had specifically sent our  
24 staff to the police station to provide evidence for the  
25 following cases, and requested that the Hong Kong Police  
26

1       may prosecute the suspects in accordance with  
2       section 13A ..."

3             And they mention six cases there. Then, over the  
4       page, at 294, at the bottom:

5             "In this regard, we now earnestly request that the  
6       Hong Kong Police do, in future cases of assaults on bus  
7       captains, seriously consider charging the offenders  
8       under section 13A ... in addition to the charge of  
9       common assault. Our company will definitely cooperate  
10      with the Hong Kong Police to offer our assistance."

11            In this respect, Ms Yau replied on 17 May 2018, at  
12      page 296. The Chinese version is at page 288. You  
13      stated there, Ms Yau that:

14            "[Following] the follow-up action of the meeting  
15      with your company on 28 March, you are hereby notified  
16      that the division has notified the regions in writing to  
17      remind the frontline staff to be fair and professional  
18      when handling the cases of assault or harassment ... and  
19      shall understand the nature of the case and the injury  
20      of the injured to properly categorise the case and  
21      seriously consider whether Public Bus Services  
22      Regulations Cap 230A ... should apply."

23            So my question is this: has Cap 230A, regulation  
24      13A, ever been invoked or used by the police to  
25      prosecute?  
26

1 MS YAU SIN MAN: (Via interpreter) We looked up the records  
2 of the past few years. In 2016, we invoked 230A to  
3 issue penalty tickets to a bus passenger, just one case.

4 MS MAGGIE WONG: Has that been used after your reply given  
5 to the KMB? Has that been used?

6 MS YAU SIN MAN: (Via interpreter) We looked at the records  
7 again. We did not use it this year.

8 MS MAGGIE WONG: Any reason why it was so rarely used?

9 MS YAU SIN MAN: (Via interpreter) I believe it would depend  
10 on the cases and the evidence on site, and also the  
11 facts of the case.

12 MS MAGGIE WONG: There is just one more matter. According  
13 to Mr Patrick Pang's evidence, Mr Patrick Pang of KMB,  
14 he stated there was a meeting on 28 March, in which the  
15 head of the legal department, himself and another  
16 colleague attended or met with the chief superintendent  
17 and his superintendent, and during that meeting the  
18 chief superintendent promised at the meeting that he  
19 would issue guidelines to the frontline policemen, to  
20 first allow them to seriously investigate into all  
21 alleged assaults, and he would remind his frontline  
22 staff to see whether there would be cases where Cap 230A  
23 could be applied for investigation and prosecution.

24 Has that been done?

25 MS YAU SIN MAN: (Via interpreter) Yes. On 10 May 2018,  
26

1 Traffic Branch Headquarters issued an internal notice  
2 for all frontline staff, in dealing with cases of  
3 alleged assault against bus captains.

4 MS MAGGIE WONG: Can we have a copy of this internal notice?

5 MS YAU SIN MAN: (Via interpreter) Yes.

6 MS MAGGIE WONG: Maybe we will have that through the  
7 secretariat.

8 CHAIRMAN: Do you have a copy of it here today?

9 MS YAU SIN MAN: Yes.

10 CHAIRMAN: Thank you. Perhaps somebody would be kind enough  
11 to come forward and take the document. We will have it  
12 copied now.

13 May I have a look at it first. (Handed). Thank  
14 you.

15 Thank you.

16 MS MAGGIE WONG: Just one last matter on this topic. There  
17 is this evidence from Mr Patrick Pang, stating -- when  
18 he was asked about this question, "Why would you use  
19 Cap 230A when you can proceed with the charge of common  
20 assault? What advantage do you see of using Cap 230A?",  
21 to which I believe KMB replied at Day 13, page 73. That  
22 would be 10 August 2018. Page 73, line 12.

23 Mr Peter Duncan SC, counsel for the committee,  
24 asked:

25 "So what is the point of asking the police to  
26

1 prosecute under a section which carries a maximum  
2 penalty less than that for common assault?

3 Mr Patrick Pang: The company is of the view that in  
4 respect of cases like common assault, the investigation  
5 by the police is a difficult process. If Cap 230A is  
6 invoked in the investigation or in the prosecution, it  
7 would be relatively easier to prove the offence or the  
8 offending act.

9 We also hope that those who abuse or attack our bus  
10 captains, those passengers would be made known that  
11 there is this regulation, Cap 230A, in regard to  
12 passengers' behaviour, and it doesn't take physical  
13 abuse or physical contact to constitute a breach ..."

14 So, in that regard, they have highlighted the  
15 advantages of using this provision, and I believe your  
16 evidence also confirms you would consider using it, even  
17 though at the moment it is still rarely used. Is that  
18 the position?

19 MS YAU SIN MAN: (Via interpreter) I would like to say that  
20 for prosecution, we do not just go for the easy way out.  
21 It all depends on the evidence of the case. If there is  
22 sufficient evidence to show that there has been physical  
23 assault, even though Cap 230A A can be invoked, we would  
24 go for more serious offences, to show the significance  
25 police attach to physical assault of bus captains.

26

1           So we will not just go for 230A simply because it is  
2           easier to prove it. It all depends on evidence.

3   MS MAGGIE WONG: I would like to ask a more general  
4           question: how do you ensure that passenger assault cases  
5           are dealt with expeditiously?

6   MS YAU SIN MAN: (Via interpreter) We deal with all cases  
7           immediately. Timing-wise, it depends on when evidence  
8           can be given by the witness. We will ask the witness  
9           concerned to give statement or evidence at once. If  
10          further investigation such as medical reports are  
11          required, or statements from other witnesses are  
12          required, we would do that immediately.

13   MS MAGGIE WONG: Moving on to another topic, on Working  
14          Group on Review of Speed Limits.

15           Before I engage on this working group, I would like  
16          to explain a little bit as to why it was set up. It  
17          arose on the Tai Po Road accident, and there was this  
18          meeting of the Tai Po District Council, minutes dated  
19          12 February 2018, and there was discussion as to --

20   CHAIRMAN: Before you go on any further, I don't think it is  
21          the evidence that we have received that the Working  
22          Group on Speed Limits arose from the Tai Po accident.  
23          It existed already, did it not? I'm asking you,  
24          Ms Wong.

25   MS MAGGIE WONG: Mr Chairman, I believe it should be it  
26

1           existed -- I stand to be corrected.

2       CHAIRMAN:   So there is a pre-existing Working Group on Speed  
3           Limits on which Transport Department and the police have  
4           representatives?

5       MS MAGGIE WONG:   Yes.

6       CHAIRMAN:   And, in this particular case, the section of road  
7           involved in the Tai Po Road was referred to this working  
8           group, with recommendations from the Transport  
9           Department; is my summary of the evidence accurate?

10      MS MAGGIE WONG:   Yes.

11      CHAIRMAN:   Thank you.

12      MS MAGGIE WONG:   Maybe Ms Yau can explain about this Working  
13           Group on Review of Speed Limits.   In terms of  
14           membership, what does it comprise of?

15      MS YAU SIN MAN:   (Via interpreter) I defer to my colleague,  
16           Mr Lee Tai Wai.

17      MR LEE TAI WAI:   (Via interpreter) Regarding the Transport  
18           Department's Working Group on Speed Limits Review,  
19           representatives include those from the TD and two NGOs  
20           are the Motor Association of Hong Kong and Senior  
21           Drivers Association of Hong Kong, and also  
22           representatives from the police.

23      MS MAGGIE WONG:   Can you tell us what is the police  
24           involvement in this Transport Department's working  
25           group?

26

1 MR LEE TAI WAI: (Via interpreter) We have a representative  
2 from the Traffic Branch Headquarters to attend regular  
3 meetings of the working group to review the sections'  
4 speed limit on the agenda.

5 CHAIRMAN: Who convenes the meeting?

6 MR LEE TAI WAI: (Via interpreter) Assistant Commissioner of  
7 the Transport Department.

8 CHAIRMAN: So it is a Transport Department-driven committee?

9 MR LEE TAI WAI: (Via interpreter) Yes.

10 CHAIRMAN: Do they provide the secretarial side of it?

11 MR LEE TAI WAI: (Via interpreter) Yes. They are  
12 responsible for all secretarial services, and the  
13 meeting place is also at the headquarters of the  
14 Transport Department.

15 CHAIRMAN: And presumably, in that role, they generate the  
16 agenda?

17 MR LEE TAI WAI: (Via interpreter) Agreed.

18 CHAIRMAN: Thank you.

19 MS MAGGIE WONG: Can you tell us how the working group  
20 functioned, in terms of does it involve considering  
21 objective facts and assessment in deciding whether  
22 suggestions for changing speed limits of certain roads  
23 should be entertained?

24 MR LEE TAI WAI: (Via interpreter) The TD has a regular  
25 mechanism for reviewing the speed limits of road  
26

1 sections to ensure that the speed limit can ensure road  
2 safety and smooth traffic.

3 In reviewing speed limits, the priority is to ensure  
4 safety of users. There are a few factors to be  
5 considered in deciding whether the speed limit should be  
6 raised or lowered or kept the same. First, traffic  
7 accidents of the section involved, and the second factor  
8 is the usual speed of vehicles using that section. The  
9 third factor is the characteristics and circumstances of  
10 the road, the gradient, the sightline, the junctions,  
11 and also the situation with pedestrians.

12 So, based on the factors I just mentioned, TD and  
13 colleagues will come up with recommendations, as to  
14 whether the speed limit should be raised, lowered or  
15 kept the same.

16 MS MAGGIE WONG: You mentioned that the Transport Department  
17 has a regular mechanism for reviewing speed limits. Can  
18 you tell us what is the regular mechanism; how regular?

19 MR LEE TAI WAI: (Via interpreter) My understanding is the  
20 working group meets on a quarterly basis, to review  
21 different road sections. The choice of road sections is  
22 for the TD to decide. So the working group will decide  
23 the road sections to be included.

24 I believe the mechanism would target road sections  
25 which have had frequent or serious traffic accidents.

26

1           Such road sections will mostly be reviewed by the  
2           working group.

3       MS MAGGIE WONG:   You mentioned that the mechanism would  
4           target road sections which have had frequent or serious  
5           traffic accidents.   So, in that sense, it is reactive to  
6           accidents happening in that road section; is that  
7           correct?

8       MR LEE TAI WAI:   (Via interpreter) This is one of the  
9           considerations.   There are other factors at play.   For  
10          instance, complaint from members of the public or views  
11          of the district councils.

12      MS MAGGIE WONG:   So am I correct to say it is not -- as far  
13          as you know, it is not a proactive exercise, meaning the  
14          Transport Department or the police would proactively  
15          look for dangerous road sections that need to consider  
16          reviewing speed limits; is that the position?

17      MR LEE TAI WAI:   (Via interpreter) I dare not say whether it  
18          is a proactive review or not.   But I believe the review  
19          mechanism is effective.

20      MS MAGGIE WONG:   Now, going back to the specific example --

21      CHAIRMAN:   Can you help the committee as to how long this  
22          Working Group on Speed Limits has been in place?

23      MR LEE TAI WAI:   (Via interpreter) According to records, it  
24          meets on a quarterly basis, and the first meeting,  
25          according to records, was held in 2000.

26

1 CHAIRMAN: Do you know in what circumstances it was  
2 constituted?

3 MR LEE TAI WAI: (Via interpreter) I have no record to  
4 check.

5 CHAIRMAN: Thank you.

6 MS MAGGIE WONG: Now, in relation to the specific  
7 Tai Po Road section, may I refer you to a few documents.  
8 The purpose of this is to show that in relation to the  
9 Tai Po Road concerned, there have been complaints from  
10 the district council, from residents, from schools, that  
11 that particular road section is prone to accidents and  
12 there are lots of speeding occurred, and there has been  
13 correspondence written by the Tai Po District Council to  
14 the Hong Kong Police, requesting for assistance.

15 CHAIRMAN: Before you get involved in that detail, can I ask  
16 this general question: have any of the five police  
17 representatives here today been a member of this working  
18 group Working Group on Speed Limits?

19 MR STEPHEN BAKER: No, sir.

20 MR LEE TAI WAI: (Via interpreter) The regular members are  
21 such that one of the police representatives is the  
22 superintendent in charge of traffic control, and he has  
23 just been deployed elsewhere and I am acting in that  
24 position now.

25 CHAIRMAN: So the direct answer to the question is that none  
26

1 of the five representatives have acted in that role,  
2 until you acted as a deputy to whoever you have  
3 replaced; is that it?

4 MR LEE TAI WAI: (Via interpreter) I agree.

5 CHAIRMAN: Thank you.

6 MS MAGGIE WONG: So, Mr Lee, since you're acting as deputy,  
7 have you attended any of these working group meetings on  
8 the review of speed limits?

9 MR LEE TAI WAI: (Via interpreter) I attended one or two  
10 meetings, but it was two or three years ago.

11 With regard to the Tai Po incident review, I never  
12 attended any meetings.

13 CHAIRMAN: On the occasions that you have attended the  
14 working group meetings, typically, if there is such  
15 a thing, on how many sections of roads were the speed  
16 limits reviewed?

17 MR LEE TAI WAI: (Via interpreter) On the occasions when  
18 I attended the meetings, about three sites and six  
19 directions would be identified, because we will look at  
20 both directions of any road sections. Therefore, there  
21 will be six road sections to be reviewed at every  
22 meeting.

23 MS MAGGIE WONG: Why six road sections?

24 MR LEE TAI WAI: (Via interpreter) As I said, usually three  
25 sites or spots would be identified, and then we would

26

1 look at both directions of every site. Therefore, six  
2 road sections.

3 MS MAGGIE WONG: Yes. And who selects those three road  
4 sections?

5 MR LEE TAI WAI: (Via interpreter) The Transport Department.

6 MS MAGGIE WONG: And the basis of those road sections would  
7 be on the factors you mentioned earlier on?

8 MR LEE TAI WAI: (Via interpreter) That's correct.

9 MS MAGGIE WONG: Do you have any say in the selection of the  
10 road sections?

11 MR LEE TAI WAI: (Via interpreter) We would give some  
12 advice, we would say whether we agree or disagree.

13 MS MAGGIE WONG: What about if you have received complaints  
14 about a certain road section? Can you suggest that this  
15 section be reviewed?

16 MR LEE TAI WAI: (Via interpreter) Certainly. We can make  
17 the proposal to the Transport Department that we have  
18 received a complaint with regard to speed review. But  
19 usually, members of the public or district councils and  
20 other departments would know that speed limit on roads  
21 would be under the jurisdiction of the Transport  
22 Department. Only the Transport Department has the power  
23 to state and review speed limits on roads.

24 CHAIRMAN: And if a district councillor didn't know that,  
25 that's what he would be told?

26

1 MR LEE TAI WAI: (Via interpreter) We would reflect the  
2 situation to the Transport Department.

3 CHAIRMAN: But if the matter was raised by a district  
4 councillor, I'm anticipating some documents you are  
5 going to be taken to. If the district councillor chose  
6 to raise it with the police, he would be told, "That's  
7 not our job, that's the Transport Department's job"; is  
8 that it?

9 MR LEE TAI WAI: (Via interpreter) I believe our district  
10 staff, if they would receive views from district  
11 councillors they would certainly reflect the views to  
12 the Transport Department staff in that district, for  
13 that would be forwarded to the working group for  
14 handling.

15 CHAIRMAN: Well, we will see what happened.

16 MS MAGGIE WONG: Mr Lee, may I first of all --

17 CHAIRMAN: Before you do that -- you have told us about the  
18 factors that come into play in reviewing speed limits,  
19 the incidence of traffic accidents, the usual speed of  
20 road users then generally the characteristics of the  
21 road, topography, and so on.

22 Are these reflected in a written document?

23 MR LEE TAI WAI: (Via interpreter) These would appear in the  
24 report, and also there would be some filmlets on car  
25 patrol. In other words, they would use a car to patrol  
26

1 the road section and demonstrate or introduce the  
2 characteristics of that road section, and also the road  
3 situation.

4 CHAIRMAN: More particularly, are there thresholds,  
5 parameters, that are set, for example, for the increase  
6 in the incidence of traffic accidents, that triggers  
7 a review?

8 MR LEE TAI WAI: (Via interpreter) I am not sure but  
9 I believe this would be one of the considerations.

10 CHAIRMAN: But nothing that you are aware of that is  
11 a formula?

12 MR LEE TAI WAI: (Via interpreter) I don't think there is  
13 a formula.

14 CHAIRMAN: For example, a 50 per cent increase in road  
15 traffic accidents on that road section in the last year;  
16 nothing like that?

17 MR LEE TAI WAI: (Via interpreter) No. There is no formula.  
18 I cannot recall any formula.

19 CHAIRMAN: Thank you.

20 Please.

21 MEMBER AUYEUNG: Just to follow up on this working group.

22 When you guys meet, do you guys make a distinction  
23 between heavy vehicle versus regular vehicles?

24 MR LEE TAI WAI: (Via interpreter) Normally, we don't,  
25 because speed limit would apply to all types of  
26

1 vehicles, except buses or light buses, for which the  
2 speed is already limited.

3 CHAIRMAN: Thank you.

4 MS MAGGIE WONG: If I may first of all chronologically --  
5 because I am going to take you chronologically to the  
6 events that happened up until the Tai Po accident and  
7 the final report.

8 The first is the letter dated 5 June 2017. It is in  
9 bundle DC-2B. It's a complaint to the police by the  
10 Tai Po District Council. It's at DC-2B, page 840-70, in  
11 Chinese, and English at 840-74.

12 We can see the translation, that it was addressed to  
13 the central traffic camera investigation unit, Traffic  
14 Branch Headquarters, Hong Kong Police Force, dated  
15 5 June 2017, and it is from the Tai Po District  
16 Councillor, Ms Chan Siu Kuen, and the title was,  
17 "Request to install 'speed camera' between Deerhill Bay  
18 and Tai Po Mei", and the first paragraph set out:

19 "This office has received requests for assistance  
20 from the residents in the vicinity of Tai Po Road  
21 because there are often speeding and unlawful motor  
22 racing on Tai Po Road, especially during overnight hours  
23 and on holidays, when a large group of suspectedly  
24 modified racing vehicles drive in high speed on  
25 Tai Po Road. It is suspected that unlawful motor racing  
26

1 is being conducted and massive noise is generated ...  
2 which causes nuisances to residents. In case a traffic  
3 accident happens, the vehicle may collide into residents  
4 and cause severe casualty as well as endanger the safety  
5 of other road users. Thus the installation of a 'speed  
6 camera' is requested."

7 Then at the end, it stated:

8 "... I hope that your office would accede to the  
9 residents' request and install as soon as possible  
10 a 'speed camera' on Tai Po Road near the location  
11 between Deerhill Bay and Tai Po Mei ..."

12 CHAIRMAN: Do we have a map that would show us that  
13 location?

14 MS MAGGIE WONG: Yes. It's the section between Deerhill Bay  
15 and Tai Po Mei. That's around the areas in the middle.  
16 If you can see number -- around the area in the middle.

17 CHAIRMAN: Yes. We certainly see Tai Po Mei, and this  
18 of course is in the immediate vicinity of the bus  
19 accident on 10 February.

20 MS MAGGIE WONG: Yes.

21 CHAIRMAN: And the partly obscured words "... hill Bay", is  
22 that Deerhill Bay?

23 MS MAGGIE WONG: Yes. Correct, Mr Chairman.

24 Upon receiving this, the Hong Kong Police Force  
25 replied on 16 June 2017, and if I may take you to 840-71  
26

1 in Chinese, and 840-73 in English.

2 This letter, we can see it was addressed by Andrew  
3 Lam Chi Hang, for the Commissioner of Police, to the  
4 office of Chan Siu Kuen, district councillor of Tai Po,  
5 dated 16 June 2017, and it was copied to a Mr Chiu Kang  
6 Bor, Paul, Traffic Control Division, Technical Services  
7 Branch of the Transport Department, as well as the  
8 senior superintendent of police and district commander,  
9 Tai Po.

10 The letter stated:

11 "The locations for installation of fixed speed  
12 monitoring cameras are mainly determined by the  
13 Transport Department. After installation, the police is  
14 responsible for taking enforcement action. This office  
15 understands that the Transport Department ... has no  
16 plans to install fixed speed monitoring cameras in the  
17 captioned road section. At the same time, the police  
18 will continue to closely monitor the traffic situation  
19 of the road section concerned."

20 Now, we can see that the Transport Department  
21 refused the request to install speed camera, and the  
22 police reply appears to suggest there is nothing they  
23 can do about it, and their role is simply enforcement.

24 CHAIRMAN: On what basis do you say that the Transport  
25 Department had refused to install a speed camera?

26

1 MS MAGGIE WONG: That's the sentence:

2 "This office understands that the Transport  
3 Department currently has no plans to install fixed speed  
4 monitoring cameras in the captioned road section."

5 CHAIRMAN: Well, we all can see what that says.

6 MS MAGGIE WONG: May I ask a general question first: if you  
7 received a request from a Tai Po District Councillor in  
8 relation to installing speed cameras or questions raised  
9 about speeding in a certain road section, would that  
10 complaint be placed as one of the items in the working  
11 group on review of speed limits?

12 MR LEE TAI WAI: (Via interpreter) I don't think so. This  
13 is just a request to install a speed camera on a road  
14 section. It has nothing to do with a review of speed  
15 limits.

16 CHAIRMAN: I think the point is this. If you, the police,  
17 have an opportunity to raise matters that ought to be  
18 considered on the agenda, is this something you would  
19 have put forward, for the Transport Department to decide  
20 whether or not to list it on the agenda of the meeting  
21 of the Working Group on Speed Limits?

22 MS YAU SIN MAN: (Via interpreter) I think the police and  
23 the Transport Department can have an exchange at many  
24 committees. With regard to the installation of speed  
25 cameras, this will not be considered at the Working  
26

1 Group on Review of Speed Limits.

2 MS MAGGIE WONG: But what about if there is a specific  
3 complaint by a district councillor to change the speed  
4 limit or reduce the speed limit; would that reach the  
5 working group?

6 MS YAU SIN MAN: (Via interpreter) If it is about the speed  
7 limit of a road section, it would reach the working  
8 group.

9 MS MAGGIE WONG: Yes. May I take you to a letter dated  
10 24 July 2015 by Tai Po District Councillor Madam Chan  
11 Siu Kuen but this time to the Transport Department. The  
12 Chinese is at 840 --

13 CHAIRMAN: Before you move on, Superintendent Lee, your  
14 point made earlier was that if the police received  
15 a request like this, it would be referred to the  
16 Transport Department, and that's made good, is it not,  
17 by the way in which this letter was copied to the  
18 Transport Department? I'm looking at 840-73.

19 So it has been sent to the Transport Department.  
20 That's the point you were making?

21 MR LEE TAI WAI: (Via interpreter) Yes, I agree, but the  
22 letter was cced to the Transport Department, but for  
23 installation of speed monitoring cameras. It was to the  
24 relevant division for installation of cameras.  
25 I believe the letter would not have gone to the agenda  
26

1 of the Working Group on Speed Limit Review.

2 CHAIRMAN: That's an entirely separate point. Your point  
3 that you liaise with the Transport Department is made  
4 out by this letter, because this request for a camera  
5 was notified in your letter, the police letter, back to  
6 the district councillor.

7 Yes, Ms Wong.

8 MS MAGGIE WONG: Before I go to that specific complaint  
9 letter, can I take you to the minutes of meeting of the  
10 Tai Po District Council, minutes of the second meeting  
11 on 13 March 2015; Chinese at page 840-81, English at  
12 840-91.

13 You can see the persons in attendance include  
14 a named officer at the bottom as "Head, Traffic Wing  
15 (Tai Po police district)/Hong Kong Police Force", and  
16 there were other departments concerned, like the  
17 Transport Department, Tai Po District Tenancy Housing  
18 Department and District Office, but a representative of  
19 the police force was present.

20 If we go to 840-92, at paragraph 79, there was  
21 a specific request from Japanese International School to  
22 reduce the speed limit of Tai Po Road section at Tai Po  
23 Kau). And at paragraph 79:

24 "The chairman [referred to] the receipt of a letter  
25 from the Japanese International School which requested  
26

1 to reduce the speed limit of the road section in front  
2 of their school from 70km/hour to 50km/hour. They also  
3 invited the transport division to visit the Japanese  
4 International School to discuss with their students the  
5 traffic problems in their vicinity. The chairman  
6 requested the Transport Department to first respond to  
7 the request for lowering the speed limit."

8 Then paragraph 80:

9 "Mr Wong Kwok Leung responded that the Japanese  
10 International School suggested that the speed limit of  
11 the road section in front of the [school] be reduced  
12 from 70km/hour to 50km/hour in view of a traffic  
13 accident on the section of Tai Po Road in front of the  
14 Japanese International School in 2014 in which a member  
15 of the public was killed. The Transport Department and  
16 police were examining the cause of that traffic  
17 accident, which might not necessarily be related to the  
18 speed limit of that road section, including issues of  
19 the motorists' driving attitude and problem ... The TD  
20 would examine whether the present speed limit of that  
21 road section was appropriate. Furthermore, the TD had  
22 sent an interim reply to the Japanese International  
23 School after the Chinese New Year and would provide  
24 a detailed reply ..."

25 Now, this was a specific request, Mr Lee --  
26

1 CHAIRMAN: Again, could we see the location on a map,  
2 please.

3 MS MAGGIE WONG: That would be between 21 and 22. You can  
4 see the Japanese International School.

5 CHAIRMAN: Yes. Perhaps we could zoom out to give the  
6 overall context.

7 So beyond the site of the accident as one drives  
8 from Sha Tin to Tai Po; is that correct?

9 MS MAGGIE WONG: Correct.

10 CHAIRMAN: Thank you. Yes.

11 MS MAGGIE WONG: This was a specific request by a school,  
12 where representatives of the police were present and  
13 they raised complaints about this issue and requested  
14 for reduction of speed limits.

15 Would this request be normally placed before the  
16 Working Group on Review of Speed Limits?

17 MR LEE TAI WAI: (Via interpreter) According to our minutes  
18 of the meeting, I believe the police representative  
19 present was a sergeant of the Traffic Wing of Tai Po  
20 district.

21 According to the minutes, the district council  
22 requested the TD to review the speed limit of the road  
23 section. I believe the message received would have been  
24 put back to the working group for inclusion to its  
25 agenda or to further decide whether there should be  
26

1 a review of the speed limit for that section.

2 CHAIRMAN: And that would have been communicated by the  
3 police representatives to the working group; is that  
4 what you are saying?

5 MR LEE TAI WAI: (Via interpreter) Well, from what I could  
6 see here, in the main it was the TD representative who  
7 answered questions of the district councillor. So  
8 I believe the police would not have repeatedly conveyed  
9 the message to the TD.

10 CHAIRMAN: No, not the TD, the working group is the  
11 question. Would the police have taken it upon  
12 themselves to communicate this to the working group?  
13 For consideration of putting it on the agenda, perhaps.

14 MR LEE TAI WAI: (Via interpreter) I don't believe so,  
15 because it was the TD's representative who was  
16 responsible for answering questions on that day.

17 MS MAGGIE WONG: Before I go on on this topic, if someone  
18 made a complaint on a particular road section, would the  
19 police be required to compile certain statistics in  
20 relation to that particular road section, to see if the  
21 complaint is a valid one?

22 MR LEE TAI WAI: (Via interpreter) When the police receive  
23 a similar complaint, it will be conveyed to the TD for  
24 follow-up. We will not compile any statistics or carry  
25 out an investigation.

26

1 MS MAGGIE WONG: So do I understand the evidence correctly  
2 as even though you have a representative of the police  
3 present in this meeting, and there were complaints by  
4 a school, and there was a particular incident where  
5 someone got killed in that road section, which is  
6 serious and fatal, the police would not take up any  
7 further investigation, unless it was asked by the  
8 Transport Department? Is that the position?

9 MR LEE TAI WAI: (Via interpreter) Well, at that meeting,  
10 according to the minutes, the police will investigate  
11 the causes of the accident, and for that particular  
12 meeting the district council put a question to the TD,  
13 to request for a speed limit review. I did not see  
14 anything to require the police to take any appropriate  
15 action to reflect that view.

16 MS MAGGIE WONG: So do you know if the Transport Department  
17 asked for statistics of the road accidents for that  
18 particular section of the road at that time?

19 MR LEE TAI WAI: (Via interpreter) In this morning's  
20 evidence, we said that statistics of traffic accidents  
21 were shared between the TD and the police, so the TD has  
22 got such statistics.

23 MS MAGGIE WONG: Now, four months after these minutes --

24 CHAIRMAN: Sorry, before you go on, the question was then,  
25 2017. There has been a complaint -- 2015 -- there has  
26

1       been a complaint about a fatality in 2014. Did the  
2       Transport Department ask for road accident statistics  
3       then, 2015? Not in 2018. 2015. Do you understand the  
4       difference?

5       MR LEE TAI WAI: (Via interpreter) I understand the  
6       difference. In the main, the TD will not ask us for  
7       statistics involving traffic accidents, because we can  
8       share our system and they have all the information we  
9       have.

10      CHAIRMAN: So they can get the information on a shared  
11      information system, they don't need to ask you; is that  
12      it?

13      MR LEE TAI WAI: (Via interpreter) Yes.

14      CHAIRMAN: Thank you.

15      MS MAGGIE WONG: And, four months after the minutes of the  
16      meeting, there was another follow-up letter by the  
17      Tai Po District Councillor, dated 24 July 2015. That's  
18      in DC-2B bundle, at 840-78, in Chinese; and English at  
19      840-88.

20             If we drop to the second paragraph -- the letter is  
21      dated 24 July 2015 from Mr Chan Siu Kuen, and it is  
22      stated there in paragraph 2 -- first of all,  
23      paragraph 1, the second line, that they:

24             "... have received request for assistance from the  
25      residents in the vicinity of Tai Po Road. This is  
26

1           because owing to the absence of speed limit traffic  
2           signs around the bend of Savannah Garden, traffic  
3           accidents happened frequently.

4           To ensure the safety of road users, your department  
5           is now requested to expeditiously install the '50 km'  
6           speed limit signs at the above location to remind  
7           motorists to pay attention to driving at safe speed for  
8           prevention of unnecessary incidents."

9           Now, this is the follow-up letter, following on from  
10          the minutes of the meeting in March 2015. In normal  
11          circumstances, would this letter reach the Working Group  
12          on Review of Speed Limits?

13       MR LEE TAI WAI: (Via interpreter) I believe the purpose of  
14          the letter was mainly to request for signs to be  
15          installed. It was not about a request to review the  
16          speed limit. So I believe the letter would not have  
17          reached the working group.

18       CHAIRMAN: What was the speed limit at that place, at that  
19          time?

20       MR LEE TAI WAI: (Via interpreter) I don't have such  
21          information.

22       CHAIRMAN: Do we, Ms Wong?

23       MS MAGGIE WONG: It is 70km/hour.

24           And we have evidence from Mr Chan that it is not  
25          simply a letter. There are telephone conversations on  
26

1           this matter, requesting for reduction of speed limit to  
2           50km/hour. So this is just a follow-up letter,  
3           following up on the conversations with the Transport  
4           Department.

5   CHAIRMAN: Do you have a transcript reference for that so  
6           that we can help Superintendent Lee understand the  
7           evidence?

8   MS MAGGIE WONG: Yes. Mr Chairman, I need to look for that,  
9           because I just remembered this off the top of my head.

10   CHAIRMAN: I am familiar with that myself.

11   MS MAGGIE WONG: May I have a moment?

12   CHAIRMAN: Yes, take your time.

13   MS MAGGIE WONG: Mr Chairman, that would be on Day 4,  
14           page 9.

15   CHAIRMAN: And the date?

16   MS MAGGIE WONG: Sorry, Day 6, page 9.

17   CHAIRMAN: What is the date of page 6?

18   MS MAGGIE WONG: 14 July.

19   CHAIRMAN: Thank you.

20   MS MAGGIE WONG: On that page, it stated at line 18 --

21           Mr Chan Siu Kuen stated there:

22           "At that time, the Transport Department" -- this is  
23           in reference to the matter that we discussed earlier on.

24           "At that time, the Transport Department did not give  
25           me a direct reply. However, I have spoken to them on  
26

1 the phone. They said that if the speed is to be reduced  
2 to 50 they would have to consult residents as well as  
3 owners corporations. And in 2014, near the Japanese  
4 International School there was a traffic accident at the  
5 signal junction, as a result a person was injured, and  
6 the Transport Department replied to me. He said for the  
7 speed to be reduced to 50 the TD would have to conduct  
8 a study, and after the accident they have appealed to  
9 the public to abide by road traffic regulations. They  
10 said that from the perspective of the TD, for the speed  
11 to be reduced to 50, they would have to do a lot of  
12 consultation and to liaise with the police.

13 I have been waiting. And I have been in contact  
14 with them. Well, Mr Wong of the Transport Department  
15 has been transferred out. And regrettably we had the  
16 traffic accident at Tai Po Mei. And I approached the  
17 police, because the TD could not help us. I asked the  
18 police to install speed cameras and I have been  
19 following that up."

20 Now, Mr Lee, that's the evidence given by Mr Chan,  
21 that it is not simply letters but there are follow-up  
22 telephone conversations and repeated requests, and there  
23 seems to be inaction.

24 Can you tell us why would that be the situation in  
25 this particular case?

26

1 CHAIRMAN: The context of this, to remind ourselves, is  
2 a letter from a district councillor to the Transport  
3 Department.

4 MS MAGGIE WONG: Yes, correct, Mr Chairman.

5 CHAIRMAN: It may be that you don't know why the Transport  
6 Department didn't do anything.

7 MR LEE TAI WAI: (Via interpreter) The letter was the  
8 communication between the TD and the person who wrote  
9 the letter, so we should not comment on it, and we don't  
10 have any record on these matters.

11 MS MAGGIE WONG: So am I correct to say that the role of the  
12 police in the working group is more or less like  
13 a rubber stamp, with no particular active role in  
14 requesting the Transport Department to do anything?

15 MR LEE TAI WAI: (Via interpreter) The police participation  
16 in the working group is absolutely not as a rubber  
17 stamp. We studied all the reports. We would also  
18 consult our colleagues in that particular district, and  
19 we would also consult our frontline staff, if  
20 a particular view is proposed, as to what they think  
21 about it, and then at the meeting we will reflect the  
22 police's view to the working group.

23 CHAIRMAN: Perhaps approaching the matter the other way  
24 around, to what extent, if at all, do the police have  
25 a proactive role in putting forward suggestions? For  
26

1 example, "We are concerned about the speed limit on this  
2 stretch of road and we think it should be reviewed"? Do  
3 the police do that?

4 MR LEE TAI WAI: (Via interpreter) I believe we must have  
5 done that, especially at road sections where there have  
6 been heavy or serious traffic accidents or, where there  
7 have been a lot of traffic accidents, the division  
8 concerned, according to the investigation records, would  
9 put different views to the TD, including a review of  
10 speed limits. Usually, this would be handled by the  
11 five land-based traffic divisions of the police,  
12 investigation would have been done, and then they would  
13 reflect their views to the Transport Department.

14 CHAIRMAN: Are you able to provide us with any examples  
15 illustrating that proactive role -- correspondence?

16 MR LEE TAI WAI: (Via interpreter) Well, generally speaking,  
17 exchanges at the district level usually are not recorded  
18 by us.

19 CHAIRMAN: Well, they must be recorded somewhere.

20 MR LEE TAI WAI: (Via interpreter) I believe so.

21 CHAIRMAN: That's what we are asking for. Can you give us  
22 some examples illustrating the police having a proactive  
23 role, "There have been too many accidents in this area.  
24 For our part, we the police, who have to go there and  
25 scrape people up off the road, think it's time we  
26

1 reduced the speed limit."? Are there any illustrations  
2 where the police have done that, so we can follow it?

3 MR LEE TAI WAI: (Via interpreter) We can go back to try to  
4 get some records. We will consult our colleagues.

5 CHAIRMAN: That's what we are asking for, illustrations  
6 demonstrating a proactive role.

7 MS MAGGIE WONG: Just as an example, if you receive a number  
8 of complaints, I believe there would be a number of road  
9 sections which citizens or other district councils would  
10 complain about, and if there are more than three road  
11 sections which require discussion, how do you select  
12 those three road sections, if there are more complaints  
13 than three road sections?

14 CHAIRMAN: That rather presupposes there is some kind of  
15 arbitrary limit.

16 MS MAGGIE WONG: Yes.

17 CHAIRMAN: Is there a limit on the number of road sections  
18 you can discuss at one of these meetings?

19 MR LEE TAI WAI: (Via interpreter) Well, it depends on the  
20 nature of complaints, because there can be many  
21 different kinds of traffic complaints. If the residents  
22 complain to the police, our district staff or traffic  
23 headquarters staff will process them.

24 MS MAGGIE WONG: We move on to the chronology, this time it  
25 is after the accident. There was this meeting of the  
26

1        Tai Po District Council dated 12 February 2018. We can  
2        see that in bundle DC-2, page 285.

3        The minutes actually start at page 782 in English.  
4        At paragraph 5, I believe a representative of the police  
5        was present, that was Mr Chau Chung Mun, superintendent  
6        of police, investigation and support division, Traffic  
7        New Territories North, Hong Kong Police Force. And at  
8        paragraph 5, Mr Chau, apart from the road accident on  
9        10 February 2018, he referred to the cases that the  
10       police detected in 2017, in terms of traffic violations.

11       If we see in the middle, it is stated there that:

12       "In 2017, the police had made 4 arrests, [including]  
13       2 drunk drivers, 1 case of dangerous driving and 1 case  
14       of drug-related crime. The police had issued a total of  
15       32 fixed penalty tickets at the road section in 2017 for  
16       speeding and traffic violations. A total of 29 traffic  
17       accidents had occurred in the Chek Nai Ping to Wong  
18       Yee Au section on Tai Po Road, out of which 2 were more  
19       serious. Although there were no speed enforcement  
20       cameras installed at the above mentioned road section,  
21       the police would carry out operations to detect speeding  
22       from time to time by placing detection equipment at  
23       a few designated spots along the road section. The  
24       Hong Kong Police Force would complete the  
25       investigation ..."

1           Now, Mr Chau mentioned that 29 traffic accidents  
2           occurred in this road section.

3       CHAIRMAN: Again, could we have a look on the map to show us  
4           the section?

5       MS MAGGIE WONG: Yes. That's Chek Nai Ping to Wong Yee Au  
6           section.

7       CHAIRMAN: Yes. Where is Chek Nai Ping? Ah, yes. Thank  
8           you. And Wong Yee Au? Yes. Thank you very much.

9       MS MAGGIE WONG: Mr Lee, my question is: there were 29 road  
10           traffic accidents, 30 offences of speeding and 32 fixed  
11           penalty tickets for speeding and traffic violations for  
12           that section of the road in 2017. Would you consider  
13           these statistics warranted the attention of the police  
14           in bringing this particular road section up for  
15           discussion at the working group?

16      MR LEE TAI WAI: (Via interpreter) It depends on the causes  
17           of these 29 traffic accidents. You need to know the  
18           causes before you can decide whether to take it to the  
19           working group, whether they were all related to  
20           speeding.

21           I believe this should be left to the traffic  
22           division of that district to decide whether this should  
23           be reviewed by the Transport Department.

24      MS MAGGIE WONG: Now, can you tell us, in all the working  
25           group sessions you have attended, would these kinds of  
26

1 statistics be provided to the working group, traffic  
2 accident statistics?

3 MR LEE TAI WAI: (Via interpreter) They would review traffic  
4 accident figures. They would do comparisons to the  
5 average accident rate.

6 MS MAGGIE WONG: You mentioned in your evidence earlier on,  
7 before the break, that the working group would review  
8 three road sections with six directions. And in the  
9 meetings you have attended, have you come across  
10 a particular road section in which the speed limit was  
11 reduced?

12 MR LEE TAI WAI: (Via interpreter) In my impression, yes,  
13 but it was not because of traffic accidents, but because  
14 there was a major infrastructure nearby, and therefore  
15 there was a reduction.

16 MS MAGGIE WONG: Was there an incident where the speed limit  
17 was reduced because of the road accidents on the  
18 particular road section?

19 MR LEE TAI WAI: (Via interpreter) Since I only attended two  
20 to three meetings, I cannot say for sure, but I didn't  
21 see that in those two or three meetings that I attended,  
22 that the speed limit was reviewed and reduced as  
23 a result of traffic accidents.

24 MS MAGGIE WONG: May I take you to the last document in this  
25 chain. It's the information paper by Transport  
26

1 Department to Tai Po District Council, dated 9 April  
2 2018.

3 We can see that in TD-5, page 1617-1. This is  
4 a translation. The Chinese document is at page 1611.

5 I will give a description of this document. It is  
6 a paper prepared by the Transport Department, dated  
7 9 April 2018, headed, "Traffic management measures on  
8 Tai Po Road (Tsun King Road, Sha Tin to Yung Yi Road,  
9 Tai Po)", and if we look at, first of all, the purpose  
10 of this paper, it says:

11 "The Tai Po District Council ... held a special  
12 meeting on 12 February ... to discuss the serious bus  
13 accident happened on 10 February 2018 early evening.  
14 The Transport Department ... has undertaken to review  
15 the speed limit and traffic management measures of the  
16 relevant road section. In view of the concerns of the  
17 local community and the Tai Po District Council about  
18 the progress of the implementation of improvement  
19 measures, this paper briefs members on the progress of  
20 TD in reviewing the speed limit of the relevant road  
21 section of Tai Po Road and ... follow-up improvement  
22 measures."

23 We can see, in this paper, that the Transport  
24 Department in paragraph 2 has reviewed the speed limit  
25 of the road section, and in paragraph 3 it stated:

1 "TD has established regular mechanism to review the  
2 speed limit of the road with a view to ... road safety  
3 and maintaining smooth traffic."

4 We can see over the page, at 1617-2, it stated there  
5 that:

6 "... protection of road users' safety is of prime  
7 consideration. In deciding whether the speed limit  
8 should be reduced, relaxed or maintained, [three]  
9 factors will be taken into consideration:

10 (a) traffic accident records of the subject road  
11 section;

12 (b) speeds of vehicles travelling on that road  
13 section; and

14 (c) road environment and features such as gradient,  
15 sightline of motorists, road intersections, pedestrian  
16 traffic, et cetera.

17 4. ... TD has comprehensively reviewed the traffic  
18 accident records of the subject road section ... [in the  
19 past two months]."

20 And then it suggested that, if we see section (c):

21 "Section between Chek Nai Ping and Yung Yi Road  
22 [which we have seen earlier on] ...

23 The traffic accident rate of the relevant road  
24 section was on a rising trend and above the overall  
25 average traffic accident rate in Hong Kong in the past  
26

1 year. The detected vehicular speeds in recent months  
2 were lower than those of the past and generally below  
3 the current speed limit ..."

4 And apart from other matters mentioned there:

5 "In light of the aforementioned new circumstances,  
6 the speed limit of the relevant road section has scope  
7 for downward adjustment. The speed limit of 70km/hour  
8 is recommended to be lowered to 50km/hour for further  
9 enhancing road safety."

10 If we jump to paragraph 6:

11 "Separately, TD and the Hong Kong Police Force ...  
12 have started preparing for installation of a new batch  
13 of fixed speed enforcement cameras for stepping up the  
14 deterrence and enforcement against speeding motorists.  
15 The subject road section of the accident ... has already  
16 been included in the list of road sections for  
17 consideration of installation. TD is currently seeking  
18 resources and aims to firm up the installation of  
19 a fixed speed enforcement camera at the section near  
20 Chek Nai Ping of Tai Po Road ... before the end of this  
21 year."

22 Now, within two months of the Tai Po accident, the  
23 TD is said to have comprehensively reviewed the traffic  
24 accident reports and suggested the reduction of the  
25 speed limit to 50km/hour.

26

1 I have two questions. The first is, as far as your  
2 department is concerned, have these statistics been  
3 provided to the Transport Department before the  
4 accident?

5 CHAIRMAN: I'm sorry, could you particularise that question?

6 MS MAGGIE WONG: Was the traffic accident records of the  
7 subject road section provided to the Transport  
8 Department prior to the Tai Po Road accident on  
9 10 February 2018?

10 CHAIRMAN: Thank you.

11 MR LEE TAI WAI: (Via interpreter) As far as I know, no.

12 MS MAGGIE WONG: Do you know if this subject road section  
13 has ever been placed before the Working Group on Review  
14 of Speed Limit prior to the Tai Po accident on  
15 10 February 2018?

16 MR LEE TAI WAI: (Via interpreter) As far as I know, no.

17 MS MAGGIE WONG: Mr Chairman, I am going to move on to  
18 another topic -- unless you have some questions on this  
19 matter.

20 CHAIRMAN: Thank you. Just give me a moment, please.

21 There were recommendations made on 9 April for the  
22 installation of a speed camera for this stretch of road.  
23 Do we have a map? Does the map show us where the speed  
24 camera is proposed to go?

25 MS MAGGIE WONG: Mr Chairman, I believe the evidence is that  
26

1 the speed camera has not been considered until the end  
2 of 2018.

3 CHAIRMAN: Was there any recommendation as to where it would  
4 go or not?

5 MS MAGGIE WONG: Yes. It's at 1617-5.

6 CHAIRMAN: Thank you. Could we see that on a map?

7 MS MAGGIE WONG: Yes. We can see that at the right-bottom  
8 box, with the red asterisk.

9 CHAIRMAN: Thank you.

10 MS MAGGIE WONG: It is stated there, "Initially recommended  
11 location for installing fixed speed enforcement camera".

12 CHAIRMAN: Thank you. Can you help us as to what steps have  
13 been taken, first of all, to obtain speed cameras --  
14 apparently, there was a budget issue, we saw from that  
15 9 April paper -- so that there is one available to be  
16 placed here? Can anyone help us with that?

17 MS YAU SIN MAN: (Via interpreter) For the fixed speed  
18 enforcement camera, it is mainly under the portfolio of  
19 the Transport and Housing Bureau and the Transport  
20 Department. In around July 2017, the Transport and  
21 Housing Bureau started a new round of public  
22 consultation on the installation of such cameras, on the  
23 choice of locations and the type of camera to be  
24 installed. The exercise started in mid-2017, and  
25 subsequent to the Tai Po Road accident, the Transport  
26

1 Department, together with our CTCIU, central traffic  
2 camera investigation unit, under the Traffic Branch  
3 Headquarters of the police, the TD, together with CTCIU,  
4 started to see how cameras should be installed and  
5 designed for the site of the Tai Po Road accident.

6 CHAIRMAN: But the accident was six months ago. Where are  
7 we now?

8 MS YAU SIN MAN: (Via interpreter) I understand that the  
9 Transport Department has obtained funding and the camera  
10 will be installed there as soon as possible.

11 CHAIRMAN: When?

12 MS YAU SIN MAN: (Via interpreter) I don't know the actual  
13 date, but as far as I know they have confirmed the  
14 location and they have got money to do it.

15 CHAIRMAN: But, from what you are saying, this is  
16 a responsibility of the Transport Department and not the  
17 police?

18 MS YAU SIN MAN: (Via interpreter) That is correct.

19 CHAIRMAN: So they provide you with information about how  
20 they are proceeding; is that it?

21 MS YAU SIN MAN: (Via interpreter) That's correct. The  
22 camera to be installed at Tai Po Road, as I said, was  
23 part of the plan started in mid-2017 to install new  
24 cameras.

25 CHAIRMAN: But presumably not at this particular location;  
26

1           there was a general review about installing new cameras?

2           Is that what you are saying?

3   MS YAU SIN MAN:   (Via interpreter) That's correct.

4   CHAIRMAN:   And am I right in recollecting evidence that was  
5           given earlier, by Chief Superintendent Baker, I think,  
6           that there are 24 fixed speed cameras in Hong Kong?

7   MS YAU SIN MAN:   (Via interpreter) That's true.   Right now  
8           we have 24 such cameras installed at 130 locations.  
9           They are in operation.

10                 (In English) 130 housings.

11   CHAIRMAN:   I'm not sure I follow that.   How do you install  
12           24 cameras, fixed cameras, in 130 locations?

13   MS YAU SIN MAN:   (Via interpreter) So, from time to time,  
14           the cameras are placed at different housings --

15   CHAIRMAN:   They are moved around?   They are not fixed at one  
16           place?

17   MS YAU SIN MAN:   (Via interpreter) They are not.

18   CHAIRMAN:   At any given time they are fixed in one place and  
19           then they are moved around?

20   MS YAU SIN MAN:   (Via interpreter) That's true.   The  
21           Transport and Housing Bureau, when it sought funding  
22           from the LegCo, provided a certain ratio.

23   CHAIRMAN:   Are there about 4,000 kilometres of roads in  
24           Hong Kong?

25   MS YAU SIN MAN:   (Via interpreter) The latest discussion is  
26

1           such that there should be a camera placed at each  
2           housing. I think that is our main focus of the  
3           discussion.

4   CHAIRMAN: My question was more specific: are there about  
5           4,000 kilometres of roads in Hong Kong?

6   MS YAU SIN MAN: (Via interpreter) Yes.

7   CHAIRMAN: 24 cameras?

8   MS YAU SIN MAN: (Via interpreter) Yes.

9   CHAIRMAN: Is that not one of the lowest ratios of cameras  
10           to length of roads in civilised jurisdictions?

11   MS YAU SIN MAN: (Via interpreter) Yes, I got your point,  
12           Chairman.

13   CHAIRMAN: Ms Wong, are we sitting today until 5.30?

14   MS MAGGIE WONG: Yes.

15   CHAIRMAN: In which case we will take a short afternoon  
16           break. Is this a convenient moment?

17   MS MAGGIE WONG: Yes. Thank you, Mr Chairman.

18   CHAIRMAN: We will take a break now for 15 minutes. Thank  
19           you.

20   (4.13 pm)

21                               (A short adjournment)

22   (4.28 pm)

23   CHAIRMAN: Yes, Ms Wong.

24   MS MAGGIE WONG: Before I move on to a new topic, may I wrap  
25           this up by inviting you to go to the SEC bundle at  
26

1 page 1360.

2 This is a LegCo paper -- sorry, minutes of special  
3 meeting held on 15 February 2018, Panel on Transport.  
4 I invite you to go to page 1360, in which three motions  
5 were passed at the Legislative Council. I won't read  
6 all of them out but only read one of the paragraphs  
7 which may relate to the question I am going to ask.

8 That's motion number 2. The panel urges the  
9 administration to:

10 "apply anti-skid surface dressing, erect additional  
11 deceleration warning signs and install speed enforcement  
12 cameras on the subject road section immediately, and  
13 review the 'high-risk' road sections across the  
14 territory and expeditiously enhance the relevant safety  
15 measures to safeguard the safety of road users ..."

16 Now, this motion was passed by the Legislative  
17 Council, and in relation to this matter which I ask  
18 this: has the police formed a separate department to  
19 carry out the task of reviewing the high-risk road  
20 sections across the territory?

21 MS YAU SIN MAN: (Via interpreter) I would like to say that  
22 we have never seen this document before. In relation to  
23 the road section concerned and the measures mentioned,  
24 the only thing we were involved was the speed  
25 enforcement cameras, and as I said the discussion

26

1       started last year, and after the accident at  
2       Tai Po Road, we understand that the Transport Department  
3       is going to install a camera there.

4             As regards other measures, we have not set up any  
5       committee to see to them.

6   MS MAGGIE WONG: Did the Transport Department consult you to  
7       provide them with certain traffic accident data in  
8       relation to particular road sections that have high risk  
9       across the territory?

10  MS YAU SIN MAN: (Via interpreter) We have never received  
11       any special request from the Transport Department.

12  MS MAGGIE WONG: I understand that the police has kept  
13       a database for black spots, or spots that are prone to  
14       traffic accidents. Is that correct?

15  MR STEPHEN BAKER: We do have a list of traffic accident  
16       black spots, which is -- these locations are classified  
17       by the Transport Department. The criteria for  
18       a location to be classified as a black spot is six cases  
19       with pedestrian injury within a 12-month period, nine  
20       cases with any injury within a 12-month period, or two  
21       fatal cases within five years. And this list is updated  
22       every three months.

23  MS MAGGIE WONG: Is the list made available to the public?

24  MR STEPHEN BAKER: I honestly don't know the answer to that  
25       question.

26

1 CHAIRMAN: No doubt you can find out and inform us.

2 MR STEPHEN BAKER: Yes, sir.

3 CHAIRMAN: Thank you.

4 MS MAGGIE WONG: Thank you. You mentioned that it would be  
5 classified as a black spot if two fatal cases within  
6 five years. Once you made that classification as black  
7 spot, what measures or what safety measures would be  
8 recommended in terms of this particular road section?

9 MR STEPHEN BAKER: From a policing point of view, our  
10 responsibility would mainly rest through enforcement,  
11 but with all our departments working together, they  
12 could also look at road engineering road engineering,  
13 publicity and other measures to reduce the potential for  
14 accidents to happen at that location.

15 MS MAGGIE WONG: Would the bus companies be informed of  
16 these black spots?

17 MR STEPHEN BAKER: I would have to make further enquiries to  
18 find that out.

19 CHAIRMAN: Can you help us as to whether or not you provide  
20 the Transport Department with your list of black spots?

21 MR STEPHEN BAKER: Actually, the list is prepared by the  
22 Transport Department, sir.

23 CHAIRMAN: So dissemination of it is a matter for them?

24 MR STEPHEN BAKER: Yes.

25 CHAIRMAN: It's their document.

26

1 MR STEPHEN BAKER: Right, sir.

2 MEMBER LO: Actually, it is published on the TD website.

3 CHAIRMAN: Perhaps someone could look at that, whether or  
4 not it's available on the Transport Department's  
5 website.

6 MS MAGGIE WONG: May I move on to another topic, on Road  
7 Safety Council. If I may take you to a document in the  
8 SEC bundle, page 481.

9 CHAIRMAN: Which volume of SEC is this?

10 MS MAGGIE WONG: That should be bundle SEC-1.

11 CHAIRMAN: Thank you.

12 MS MAGGIE WONG: Page 481. It is a footnote contained in  
13 the Audit Commission report that we have seen earlier  
14 this morning. If we scroll down to note 1, it provides  
15 a description of the Road Safety Council, and it  
16 contains the composition or membership within the Road  
17 Safety Council. We can see it:

18 "... is chaired by the Deputy Commissioner of Police  
19 (operations) with members drawn from seven government  
20 bureaux and departments (including the Transport and  
21 Housing Bureau, the Transport Department, the  
22 Information Services Department) and six  
23 non-governmental organisations (including the transport  
24 associations). It is supported by two committees, the  
25 Road Safety Campaign Committee and Road Safety Research  
26

1 Committee."

2 So my first question is -- it is stated there that  
3 the Road Safety Councils is chaired by the Deputy  
4 Commissioner of Police (Operations). Does it hold  
5 regular meetings with respect to traffic statistics for  
6 reducing traffic-related injuries?

7 MR STEPHEN BAKER: Yes. It meets quarterly, at which the  
8 traffic accident trends are discussed, and the trend is  
9 mainly represented in the form of statistics.

10 CHAIRMAN: Have any of the officers here present today  
11 served as a representative of the police force on the  
12 council?

13 MR STEPHEN BAKER: Yes, sir. I have appeared at two  
14 meetings, the last two meetings.

15 MS MAGGIE WONG: What role would the police play in the Road  
16 Safety Council?

17 MR STEPHEN BAKER: The police play the role of secretariat,  
18 to coordinate the meetings, and they also have  
19 representatives on some of the subcommittees, for  
20 example, the Road Safety Campaign Committee.

21 MS MAGGIE WONG: What would be discussed normally in the  
22 Road Safety Council, apart from accident statistics?

23 MR STEPHEN BAKER: At the last two meetings, I can say that  
24 the meeting mainly focused on the road safety trend. It  
25 has also discussed items, for example, including  
26

1 driverless vehicles, topical subjects such as that.

2 CHAIRMAN: Does it publish papers?

3 MR STEPHEN BAKER: No, sir.

4 CHAIRMAN: Are its minutes available publicly?

5 MR STEPHEN BAKER: No, sir.

6 MS MAGGIE WONG: Would the meeting make recommendations to

7 the seven government departments as to how to enhance

8 safety features on the road, in particular bus safety?

9 MR STEPHEN BAKER: Such matters were not discussed in the  
10 last two meetings.

11 MS MAGGIE WONG: Can it make suggestions, if they see

12 a problem in relation to particular aspect in relation

13 to bus safety, can it make suggestion to Transport

14 Department or different bureaux mentioned there?

15 MR STEPHEN BAKER: I believe so, because the different

16 government departments are represented there, and the

17 overall aim of the Road Safety Council is to reduce

18 traffic accidents.

19 MS MAGGIE WONG: It is stated there that there are two

20 subcommittees, the Road Safety Campaign Committee and

21 the Road Safety Research Committee. May I ask, first of

22 all, what's the membership of the Road Safety Campaign

23 Committee?

24 MR STEPHEN BAKER: The Road Safety Campaign Committee is

25 chaired by one of the civilian members of the Road

26

1 Safety Council, and it consists of --

2 CHAIRMAN: By that you mean non-government?

3 MR STEPHEN BAKER: Non-government, sir, yes. Also sitting  
4 on that subcommittee are representatives from the road  
5 safety team in the Hong Kong Police, some people from  
6 the private sector who are skilled at publicity.

7 MS MAGGIE WONG: Would they meet regularly?

8 MR STEPHEN BAKER: Yes. They meet every quarter, I believe.

9 MS MAGGIE WONG: Would they have any minutes of meeting for  
10 this subcommittee?

11 MR STEPHEN BAKER: We are checking.

12 MS MAGGIE WONG: Thank you. Would the topic of attack on  
13 bus captains be one of the topics that would be  
14 discussed in the Road Safety Campaign Committee?

15 MR STEPHEN BAKER: No. It hasn't been discussed in that  
16 way. It mainly focuses on how to convey road safety  
17 messages to different groups within society. For  
18 example, elderly people or young people. Things like  
19 that.

20 MS MAGGIE WONG: Yes. And in terms of the Road Safety  
21 Research Committee, what is the membership?

22 MR STEPHEN BAKER: Perhaps Ms Yau could answer that part.

23 MS YAU SIN MAN: (Via interpreter) The chairman of the  
24 Research Committee is the Deputy Commissioner of the  
25 Transport Department. Members include the police, the

26

1 Highways Department, Transport Department, engineers  
2 from different units of the Transport Department,  
3 persons in charge, and in this committee, from time to  
4 time, there might be consultancy studies. Consultants  
5 would be there to give presentations. They are  
6 commissioned by the Transport Department to carry out  
7 studies, and they would give presentations at meetings.  
8 Also, there would be university lecturers and also  
9 transport experts who are on the committee.

10 CHAIRMAN: Transport experts who hold what positions  
11 elsewhere?

12 MS YAU SIN MAN: (Via interpreter) According to what I know,  
13 they are university lecturers, but I am not sure of  
14 their research interests.

15 MS MAGGIE WONG: Do they meet regularly?

16 MS YAU SIN MAN: (Via interpreter) Yes, we do. We have  
17 quarterly meetings.

18 CHAIRMAN: Are you a representative on this committee?

19 MS YAU SIN MAN: (Via interpreter) Yes, I am.

20 CHAIRMAN: Currently?

21 MS YAU SIN MAN: (Via interpreter) Yes.

22 CHAIRMAN: How long have you been a representative?

23 MS YAU SIN MAN: (Via interpreter) Starting from April 2017,  
24 when I took up this position, I started to be on the  
25 committee. But I did not attend the last two meetings  
26

1           because I was otherwise officially engaged and I was  
2           represented by other colleagues.

3   CHAIRMAN:   But no doubt you were kept informed as to what  
4           had been discussed.

5   MS YAU SIN MAN:   (Via interpreter) Yes.

6   MS MAGGIE WONG:   What topics were discussed?

7   MS YAU SIN MAN:   (Via interpreter) From what I remember --  
8           well, this may not be all the topics. For example, we  
9           talked about child seat belts on vehicles, and also  
10          extending the green phase for pedestrians of traffic  
11          lights, so elderly people can have longer time to cross  
12          the road. And also walkability, encouraging pedestrians  
13          to walk more. This is what I can recall to have been  
14          discussed at the committees. Actually, they are  
15          research reports.

16   MS MAGGIE WONG:   What about technological --

17   CHAIRMAN:   Before you move on -- are these research reports  
18          available publicly?

19   MS YAU SIN MAN:   (Via interpreter) I'm not sure about that.

20   MS MAGGIE WONG:   Would there be minutes of meeting?

21   MS YAU SIN MAN:   (Via interpreter) Yes, there are.

22   CHAIRMAN:   Although you only joined the committee in April  
23          2017, although that's now the best part of 18 months  
24          ago, no doubt you had access to records going back in  
25          time earlier than that?

26

1 MS YAU SIN MAN: (Via interpreter) Yes, I can.

2 CHAIRMAN: And, in order to prepare yourself for the job, no  
3 doubt you had to read that material to see what this  
4 committee was all about?

5 MS YAU SIN MAN: (Via interpreter) Well, with regard to  
6 previous reports, I did not really look at them.

7 CHAIRMAN: Yes, Ms Wong.

8 MS MAGGIE WONG: Yes. Because the term is "Road Safety  
9 Research Committee", would they discuss anything about  
10 the reduction of speed limits of certain busy roads,  
11 like in Central, Des Voeux Road? Would they raise those  
12 sorts of matters?

13 MS YAU SIN MAN: (Via interpreter) From what I recall,  
14 I don't think that was mentioned. That is about a  
15 reduction of speed limits.

16 MS MAGGIE WONG: What about bus safety in a general sense?

17 MS YAU SIN MAN: (Via interpreter) No. I need to go back  
18 and look at the research reports again before I can  
19 remember, but that is what I think I can recall now.

20 MS MAGGIE WONG: Thank you. May I just ask a general  
21 question: in what way you see Cap 230 could be modified  
22 or strengthened to enhance bus safety based on your law  
23 enforcement experience?

24 MS YAU SIN MAN: (Via interpreter) Well, I think all  
25 regulations or ordinances would have been established  
26

1 with a particular intent. Cap 230A targets passenger  
2 conduct on buses, and also it is to regulate the  
3 operation of franchised buses. Since the police are  
4 here to enforce the law, I would think that I would  
5 emphasise how we can enforce the law better.

6 MS MAGGIE WONG: Since we are on the topic of enforcement of  
7 the law, I am going actually to the last topic.  
8 I believe in one of the replies, you have provided the  
9 committee with 51 fatal cases.

10 CHAIRMAN: Before you move on to that detail, there are some  
11 matters I would like to pursue.

12 We have, fortunately, representatives in you, Chief  
13 Superintendent Baker, on the Road Safety Campaign  
14 Committee, and in you, Chief Superintendent Yau,  
15 the police representative on the Road Safety Research  
16 Committee. I would like to pose this question to you  
17 both.

18 Who is it, if it is anybody, in Hong Kong  
19 government, that drives the safety of road transport?  
20 Where does the impetus come from? Who directs others?  
21 Who establishes policy?

22 MS YAU SIN MAN: (Via interpreter) I believe, in terms of  
23 overall transport matters, the Transport and Housing  
24 Bureau provides the steer for making policies, and the  
25 Transport Department is an executive organisation. In  
26

1 terms of traffic laws and road design, this would be  
2 executed by the Transport Department.

3 The role of the police, according to the law, is  
4 that we are empowered by the law, so we do enforcement  
5 work as dutifully as we can.

6 Talking about enforcement, as we said, sometimes  
7 there would be nothing that we could do. Say, for  
8 example, I mentioned illegal parking. With what powers  
9 we are given by the law, we will do as much as we can.  
10 And in terms of revision to the law or road design, road  
11 improvements, the police also have a duty to give advice  
12 to the Transport Department. Hopefully, we can improve  
13 road safety. Hopefully, traffic can be smooth, and  
14 every road user can be protected.

15 CHAIRMAN: So who is it that comes up with ideas about what  
16 it is we should be pursuing? We have been discussing  
17 today, for example, seat belts on franchised buses.  
18 There are other issues about other safety devices that  
19 can be used on vehicles to make them safer. Who is it  
20 that comes up with these ideas?

21 MS YAU SIN MAN: (Via interpreter) I believe different  
22 quarters will provide views. On a daily basis, we  
23 enforce the law, and we can draw from overseas  
24 experience, we think. And within the Transport  
25 Department, they also do research, and in the end, it  
26

1 would be up to the policy bureau to give policy support;  
2 say in terms of technology, funding, legal matters, we  
3 need the backing of the Transport and Housing Bureau, so  
4 the police and the TD can do a better job on a daily  
5 basis.

6 CHAIRMAN: You describe the role of the bureau as giving  
7 "steer".

8 MS YAU SIN MAN: (Via interpreter) Yes.

9 CHAIRMAN: What steer has the bureau given in respect of  
10 enhancing safety on franchised buses?

11 MS YAU SIN MAN: (Via interpreter) I believe, within the TD,  
12 there is already a working group that is tasked to look  
13 at the operation of franchised buses, including the  
14 licensing system, and how road safety can be ensured.  
15 Hopefully, this is what the working group of the TD will  
16 do, that it will put forward more views for the  
17 enforcement departments to enforce the law and also for  
18 the policy bureau to make more or better policies to  
19 protect the public.

20 CHAIRMAN: Which working group are you describing?

21 MS YAU SIN MAN: (Via interpreter) This morning, I heard  
22 that there was this working group. Please give me  
23 a moment.

24 CHAIRMAN: If you are describing the Working Group on the  
25 Enhancement of Safety, that was a working group  
26

1 established on 13 March of this year. Is that the one  
2 you have in mind?

3 MS YAU SIN MAN: (Via interpreter) That's the one.

4 CHAIRMAN: Prior to that, what was the steer being given by  
5 the bureau, about enhancing safety?

6 It may be a bit unfair to ask you, but it seems,  
7 from the way you have described things, that you are in  
8 the position of receiving the benefit of steer which you  
9 then have to enforce. The intermediary, the Transport  
10 Department, has come up with the implementation of the  
11 steer.

12 MS YAU SIN MAN: (Via interpreter) From what I know, at the  
13 Transport Department, there is a unit on buses and  
14 railways which will watch over services provided by  
15 franchised buses and railway companies, and there is not  
16 much involvement from the police. It is hoped that the  
17 Transport Department can do more through this unit.

18 CHAIRMAN: Is anybody actually driving safety for franchised  
19 buses?

20 MR STEPHEN BAKER: For franchised buses, sir, I can't say  
21 that -- it's not within my knowledge that anyone is  
22 specifically for franchised buses. I think the Road  
23 Safety Council is a useful forum where ideas are  
24 exchanged, where all the different government  
25 departments with responsibilities for transport and  
26

1 traffic are represented. And that forum does give steer  
2 to road safety policies. But I'm not aware of  
3 a committee that is specifically focusing on franchised  
4 buses.

5 CHAIRMAN: Let me come to you again, Chief Superintendent  
6 Yau. You are on this committee that does research, the  
7 Road Safety Research Committee. Are you aware of any  
8 research done by that committee into the benefits of  
9 using seat belts on franchised buses, as opposed to the  
10 difficulties of getting people to use them?

11 MS YAU SIN MAN: (Via interpreter) From what I remember, we  
12 haven't talked about seat belts on franchised buses.  
13 I can remember that we discussed child restraint  
14 devices, that is seat belts for children.

15 CHAIRMAN: Yes. Thank you for your help.

16 MS MAGGIE WONG: Thank you.

17 Following on that, who would suggest the topics to  
18 be discussed at the Road Safety Research Committee?

19 MS YAU SIN MAN: (Via interpreter) Usually, it would be for  
20 the Transport Department to provide consultancy papers.  
21 We read them before meetings and discuss them at  
22 meetings.

23 MS MAGGIE WONG: Has any member raised a topic to be  
24 discussed in the Road Safety Research Committee?

25 MS YAU SIN MAN: (Via interpreter) I am not clear who to  
26

1 suggest items for discussion. We are informed by the  
2 secretariat of the Transport Department.

3 MS MAGGIE WONG: So it is predominantly driven by the  
4 Transport Department?

5 MS YAU SIN MAN: (Via interpreter) Yes, as far as I know.

6 MS MAGGIE WONG: Going on to the last topic, Ms Yau, that's  
7 in relation to some of the documents you have provided  
8 to the committee on 7 May 2018, in relation to 51 fatal  
9 traffic accidents, and your reference is at 124-1 to  
10 124-2 of the miscellaneous bundle.

11 Now, my question is focused on asking you some of  
12 the examples that you provided here as to the use of  
13 black-box data in --

14 CHAIRMAN: Before you go on, this is not just 51 fatal  
15 accidents. It's 51 fatalities occurring on or around  
16 a bus, is it not?

17 MS MAGGIE WONG: Yes. 51 fatal accidents in relation to  
18 a franchised bus.

19 If I may refer to the question first. The question  
20 you can see is at page 124. The specific matter which  
21 you are tasked to look at is paragraph (2):

22 "Please provide the details of all fatal and/or  
23 serious accidents, as defined in the traffic reports, in  
24 the period 2012 to February 2014 inclusive, involving  
25 [specifically] franchised public buses, including:

26

1 (i) a brief description of the accident and the  
2 resulting fatalities and/or injuries;

3 (ii) a brief description of any consequential  
4 prosecution, verdicts, reasons for verdict ..."

5 CHAIRMAN: Before you move on, on behalf of the committee,  
6 might we thank Chief Superintendent Cadman, who is not  
7 here, and those assisting him, for providing this  
8 information. We are conscious that this must have  
9 involved a lot of effort to gather together this  
10 material and we are very grateful. It was done during  
11 a short period of time.

12 MS MAGGIE WONG: Yes, and we are grateful for the provision  
13 of documentation. And the 51 fatal accidents involving  
14 franchised bus is listed at page 124-4, the dates and  
15 the case numbers.

16 It sets out, basically, 30 cases of which 28 cases  
17 have been convicted and two acquitted, and that's set  
18 out at paragraph 4 of your letter. And 15 case  
19 summaries were provided where the driver was not  
20 prosecuted and no further action. And three cases with  
21 three brief facts only, and case not yet concluded, and  
22 two initial reports, are under active investigation, and  
23 one case with only case result.

24 The purpose of taking you to these 51 cases is  
25 I wanted to show some example to see the use of  
26

1 black-box data or tachograph data, or the use of  
2 braking, deceleration and speed reports, and the use of  
3 this in the legal proceedings.

4 If I may first take you to a few examples. It's at  
5 page 124-5. That's a case in 2012, 5 September 2012,  
6 involving dangerous driving causing death.

7 If we can scroll to page 124-7, the background of  
8 this case relates to a fatal traffic accident at  
9 To Kwa Wan Road, and paragraph 2, involving a KMB  
10 double-decker bus, where an elderly woman was killed  
11 when she was walking across the road from a safety  
12 island to the other side of the road.

13 We can see at 124-8 that the police, apart from  
14 photos, they obtained the driving data from KMB, and  
15 also the data would reveal the speed when the bus pulled  
16 out from the bus stop, at a particular time, and the  
17 acceleration of the bus, the time when the defendant  
18 accelerated the bus, and when the bus captain applied  
19 the brake and how many times.

20 We have seen a number of examples; this is just one  
21 of them. Is this sort of information frequently used in  
22 legal proceedings?

23 MS YAU SIN MAN: (Via interpreter) In investigating serious  
24 traffic accidents, those that involve fatalities in  
25 particular, we will try our very best to get all  
26

1           relevant records, including those captured by CCTV and  
2           also the black box.

3           Now, the installation of black box is not statutory,  
4           but if it is available we will always get it from the  
5           bus.

6   MS MAGGIE WONG:   What about non-fatal accidents?

7   MS YAU SIN MAN:   (Via interpreter) For accidents without  
8           fatalities, but that are serious, if there is a black  
9           box available, we will make use of it.

10   CHAIRMAN:   Franchised buses have been required since 1 July  
11           2004 to have a tachograph, black box, or rather vehicles  
12           made after that date. I think the reality is every  
13           franchised bus in Hong Kong's got a black box.

14   MS YAU SIN MAN:   (Via interpreter) Not all franchised buses  
15           have got such. For public light buses, yes, they are  
16           all fitted with one, but not for all franchised buses.

17   CHAIRMAN:   Could we have the requirement put on the screen?  
18           I think we also have statistics coming from the bus  
19           companies, telling us how they have retrofitted these  
20           things.

21           But you are saying that the police encounter  
22           franchised buses that don't have black boxes? Because  
23           that is a surprise.

24   MS MAGGIE WONG:   Whilst we are looking for this document,  
25           may I ask this question: have you encountered  
26

1 difficulties in obtaining this black-box data in any  
2 non-fatal accidents?

3 MS YAU SIN MAN: (Via interpreter) Where there is really  
4 such a black box, we have no difficulty obtaining the  
5 data.

6 MS MAGGIE WONG: That's TD-5, page 1597.

7 We will see a letter from the Transport Department,  
8 dated 17 October 2003, setting out the minimum  
9 requirement for electronic data recording devices being  
10 installed, and we can see the specific minimum  
11 requirements for electronic data recording device at  
12 page 1598.

13 We can see, at paragraph 1:

14 "The purpose of the electronic data recording device  
15 is to provide tools for the bus company to monitor and  
16 manage the on-road speed- and safety-related behaviour  
17 of its buses, and indirectly to encourage better driving  
18 behaviour."

19 And the device set out there includes the provision  
20 of data at one-second interval, install data every 30  
21 seconds for a period of two weeks, which includes the  
22 operation time and vehicle speed -- start time, rolling  
23 time, idle time, finish time.

24 We will also see in some of the representations  
25 given by the KMB and Citybus that they have upgraded the

26

1           black-box data to include more data, and we can see in  
2           the TD Paper 8 -- I believe it's TD-1, page 87, and we  
3           can see in this --

4   CHAIRMAN: This is the paper that the Transport Department  
5           provided to the committee at the beginning of these  
6           proceedings, and I think what your attention is being  
7           drawn to is the last sentence in paragraph (c).

8   MS MAGGIE WONG: Yes.

9   CHAIRMAN: "Currently, all franchised buses are equipped  
10           with black boxes ..."

11   MS MAGGIE WONG: Yes, "and speed limiters".

12   CHAIRMAN: Perhaps just digressing, we are conscious of the  
13           fact that we are concentrating on buses and you have  
14           a much wider portfolio. But the question really is  
15           this: how much use do you make of the data on black  
16           boxes for the purposes of prosecuting?

17   MS YAU SIN MAN: (Via interpreter) As I said, for fatal and  
18           serious traffic accidents, we will make use of data from  
19           the black box. In police investigation, if the records  
20           are there, it won't be difficult for us to obtain the  
21           data. Colleagues of the traffic accident investigation  
22           unit would take into account all evidence and make  
23           prosecutions.

24   MS MAGGIE WONG: Can you tell us whether there is any  
25           difficulty as to why this sort of information was not  
26

1           used in less serious cases, other than fatal accidents?

2       MS YAU SIN MAN: (Via interpreter) Well, all facts of the  
3       case are different. For less serious traffic accidents,  
4       if just a trip or minor injury, it is not a serious  
5       traffic accident, and the investigation direction would  
6       be different. So, in investigation of each and every  
7       case, depending on the facts of the case, we will see  
8       whether it is necessary to obtain such data regardless  
9       of whether it is serious or not.

10      MS MAGGIE WONG: In all these cases, do you know whether  
11      this evidence, in terms of black-box data and speed  
12      reports, or acceleration reports/deceleration reports,  
13      has ever been challenged in court?

14      MS YAU SIN MAN: (Via interpreter) I don't have such  
15      information with me now.

16      MS MAGGIE WONG: Insofar as the 51 cases --

17      CHAIRMAN: Just allow the translation, if you would.

18      MS MAGGIE WONG: I apologise.

19      CHAIRMAN: Before you move on, could you make enquiries as  
20      to that and provide us with an answer?

21      MS YAU SIN MAN: (Via interpreter) Yes.

22      CHAIRMAN: Thank you.

23      MS MAGGIE WONG: Would you find it useful -- I understand  
24      that the public light bus has a specific provision in  
25      the ordinance itself governing the admissibility of this  
26

1 type of electronic data recording device evidence.

2 CHAIRMAN: Could we bring that up on the screen?

3 MS MAGGIE WONG: Yes.

4 CHAIRMAN: This is a provision to make it easier to  
5 prosecute by using the black-box data.

6 MS MAGGIE WONG: Yes.

7 CHAIRMAN: Do we have any references for the ordinance?

8 MS MAGGIE WONG: Mr Chairman, we are locating the document.

9 But may I make the point first and -- or may we have  
10 a few seconds?

11 CHAIRMAN: Yes, of course. Is there a separate ordinance  
12 that deals with this?

13 MS MAGGIE WONG: Yes, that's the road safety ...

14 CHAIRMAN: Cap 374?

15 MS MAGGIE WONG: Cap 374.

16 CHAIRMAN: And it's therefore a separate part of the general  
17 Road Traffic Ordinance?

18 MS MAGGIE WONG: Yes.

19 CHAIRMAN: Well, no doubt someone can look for that while we  
20 move on.

21 MS MAGGIE WONG: Yes. In general terms, there is a specific  
22 provision, following amendment of the ordinance itself,  
23 to cater for admissibility of evidence for electronic  
24 data recording device in public light buses, which makes  
25 the prosecution adducing evidence much easier.

26

1           So my question is: would the police welcome  
2           an amendment similar to the statutory provisions  
3           applicable to public light buses, in admitting this  
4           evidence in relation to black-box data?

5   MS YAU SIN MAN: (Via interpreter) I agree.

6   MS MAGGIE WONG: Mr Chairman, subject to finding the  
7           appropriate statutory provision, I have completed my  
8           questioning.

9   CHAIRMAN: Very well.

10   MS YAU SIN MAN: (Via interpreter) Can I please add  
11           something?

12           Just now, we talked about the 51 fatal cases. Since  
13           we did not have time to prepare the documents, actually  
14           there was one, which is number 19, that was about the  
15           PLB. It was not about a franchised bus. Therefore,  
16           there should be 50 fatal accidents.

17   CHAIRMAN: Thank you. So no franchised bus involved?

18   MS YAU SIN MAN: (Via interpreter) There was not.

19   MS MAGGIE WONG: I believe that should be Cap 374A, the Road  
20           Traffic (Public Service Vehicles) Regulations.

21   CHAIRMAN: Yes, these are the specifications for the device,  
22           but then there is an evidential provision, is there not?  
23           Perhaps section 25. No.

24           Perhaps scroll through section 24, please. Yes. Go  
25           through the section. Yes.

26

1 Well, no doubt it can be located in due course, but  
2 there is an evidential provision.

3 Can any of the police representatives present assist  
4 us as to what use, if any, is made of this evidential  
5 provision in relation to PLBs; how many prosecutions  
6 involve reliance on the fact that the speed of the  
7 vehicle can be established by the black box?

8 MR LEE TAI WAI: (Via interpreter) From what we understand,  
9 right now we do not have accurate figures at hand as to  
10 the invocation of such data from EDRD, but I can recall  
11 one case in which the device was challenged by the  
12 defence at court, and both sides supplied experts to  
13 debate the legality and accuracy of the device. And the  
14 conclusion was that the court accepted the EDRD, and  
15 also the case was successfully prosecuted.

16 CHAIRMAN: There is another aspect of the different  
17 legislation for PLBs which is relevant to one of our  
18 considerations, and that is whether or not franchised  
19 buses ought to have speed display units that one sees on  
20 a PLB, telling the passengers what the speed of the  
21 vehicle is.

22 The question that arises from that is this. Have  
23 any difficulties arisen with conflicts between  
24 passengers and PLB drivers as a result of the fact that  
25 the passengers can see, for example, that the PLB driver

26

1 is breaking the speed limit all the journey, and they  
2 remonstrate? Any difficulties with that?

3 MS YAU SIN MAN: (Via interpreter) We haven't met with such  
4 difficulty. I believe, if passengers can see the speed  
5 of the vehicle, it can more effectively ensure traffic  
6 safety.

7 MS MAGGIE WONG: Mr Chairman, I have located the relevant  
8 provision.

9 CHAIRMAN: Thank you. But before you move on to that --  
10 have there been any incidents when, for example, members  
11 of the public travelling on a PLB take a photograph of  
12 the speed display unit and produce that in relation to  
13 their complaint? Are you aware of that?

14 MR LEE TAI WAI: (Via interpreter) We don't have such  
15 information here.

16 CHAIRMAN: Yes, Ms Wong.

17 MS MAGGIE WONG: Mr Chairman, that would be in section 67A  
18 of the Road Traffic Ordinance itself.

19 CHAIRMAN: Yes.

20 MS MAGGIE WONG: If we look to subsection (6), this is  
21 a section in relation to EDRD, electronic data recording  
22 device, and it is a section on power to retrieve  
23 electronic data, and if we look at subsection (6), it is  
24 stated there:

25 "In any criminal proceedings, a document purporting  
26

1 to be a record of the data retrieved under subsection  
2 (5) (b) is admissible as evidence of the matters  
3 appearing from the record without further proof."

4 And (5) (b) is, as we can see, the data stored in the  
5 fitted EDRD to be retrieved by a vehicle examiner or any  
6 person authorised by the Commissioner of Police, and  
7 that's the provision in relation to public light buses.

8 CHAIRMAN: And I think, Chief Superintendent Yau, you agreed  
9 that you would welcome such a provision in respect of  
10 franchised buses?

11 MS YAU SIN MAN: Yes, I agree.

12 MS MAGGIE WONG: Yes. Mr Chairman, I have completed my  
13 questioning in this regard.

14 CHAIRMAN: Thank you.

15 Just one or two matters remaining.

16 QUESTIONING BY COMMITTEE

17 We know that in relation to the availability of  
18 black-box data, there is now available, it seems, on  
19 many buses, CCTV film of the events, in particular  
20 forward-looking cameras that allow you to see what has  
21 happened, and perhaps cameras that actually record the  
22 instruments in the cab of the driver.

23 Is film obtained from such cameras used in  
24 prosecutions? I have in mind one of the 50, as it now  
25 is, fatal accidents, the one at Lei Yue Mun where a bus  
26

1           toppled over, and I think there, rather than using  
2           black-box material, they were using CCTV film which  
3           showed the speed.

4       MS YAU SIN MAN: (Via interpreter) In the police's  
5           investigation of accidents, we can also use the film  
6           captured by CCTV on vehicles, but we need witnesses to  
7           supply the evidence. The images and oral evidence have  
8           to be combined, and this can be used for prosecution.

9       CHAIRMAN: Just dealing with the CCTV, this is commonly used  
10           in prosecutions for all kinds of things, is it not: bank  
11           robberies, and so on, murders?

12      MS YAU SIN MAN: (Via interpreter) Indeed, this is used in  
13           many criminal prosecutions.

14      CHAIRMAN: Right. So what are the witnesses that you need  
15           in relation to the camera itself?

16      MS YAU SIN MAN: (Via interpreter) I think we need the  
17           author of the film say who installed the CCTV and did  
18           anyone tamper with the images of the CCTV film.

19      CHAIRMAN: So section 22 of the Evidence Ordinance? It's  
20           a computer, isn't it, the CCTV?

21      MS YAU SIN MAN: (Via interpreter) Well, not necessarily  
22           a computer. It may be a chip, or it may be an audio  
23           tape.

24      CHAIRMAN: So you need someone to say it was installed, it  
25           was working properly and no one has interfered with it?

26

1           So it's a technician you need, not a witness to the  
2           event?

3       MS YAU SIN MAN: (Via interpreter) Well, then it depends on  
4           how advanced the camcorder is. Sometimes the vehicle  
5           owner can be that person or sometimes you need  
6           a technician.

7       CHAIRMAN: We are ourselves concerned with franchised buses,  
8           and they don't even allow their bus captains to put  
9           their own cameras on board, so these are cameras  
10          installed by the bus companies, maintained by the bus  
11          companies, and we have seen where they are located and  
12          we have seen the devices -- there are actually black  
13          boxes on which this data is recorded.

14       MS YAU SIN MAN: (Via interpreter) I believe franchised bus  
15          companies must have their devices monitored. I don't  
16          think the bus captains can remove them, because apart  
17          from data with regard to the driving, in fact the bus  
18          companies may need the information for management.

19               Therefore, the CCTV of the franchised buses  
20          of course is managed by the bus companies. We  
21          understand that.

22       CHAIRMAN: Of course, and the bus companies have IT  
23          departments, so it is simplicity itself, is it not, to  
24          establish the installation, the lack of interference,  
25          therefore the validity of the CCTV film?

26

1           You ask the KMB to give you a witness statement  
2           saying that everything was working, that proves it.  
3           Therefore, this is readily available material.

4   MS YAU SIN MAN: (Via interpreter) I don't know how much  
5           time they need to have it prepared, and I hope, in  
6           an investigation, I want them to be able to provide it  
7           as soon as possible.

8   CHAIRMAN: Mr Auyeung.

9   MEMBER AUYEUNG: Thank you, Chairman. I want to come back  
10           to this Road Safety Council, and maybe the two chief  
11           superintendents can help me.

12           In your involvement with the two committees, are you  
13           able of any recommendation that has ever been made to  
14           the TDB by this council regarding safety issues?

15   MR STEPHEN BAKER: There were not any new initiatives  
16           proposed at the two meetings that I attended.

17   MEMBER AUYEUNG: Or even looking back at minutes, are you  
18           aware of any recommendations made by this council to the  
19           TDB or the TDB turned it down for whatever reason?

20   MR STEPHEN BAKER: No, I'm not aware. I read through the  
21           minutes of the last probably year, but I'm not aware of  
22           any proposals being rejected in such a way.

23           Thank you.

24           Ms Yau, the same question.

25   MS YAU SIN MAN: (Via interpreter) I think I will have to  
26

1           see what research studies have been done in the past few  
2           years that might have mentioned safety measures. I have  
3           to check first.

4   MEMBER AUYEUNG: Thank you, Mr Chairman.

5   CHAIRMAN: Prof Lo?

6   MEMBER LO: I have two questions. The first one is does the  
7           TD regularly study the accident statistics on a regular  
8           basis to figure out what can be improved, or is that  
9           part of TD's job to do so?

10   MR STEPHEN BAKER: Yes, the TD go through the traffic  
11           accident statistics and present their findings at the  
12           Road Safety Council.

13   MEMBER LO: So the police does not do that?

14   MR STEPHEN BAKER: The police do it in order to target our  
15           enforcement, and also to help in designing publicity  
16           material and the targeted audience for publicity  
17           material.

18   MEMBER LO: So is it fair to say that the role of the police  
19           is really enforcement, accident investigation, and  
20           maintaining the database, that would be basically the  
21           major functions?

22   MR STEPHEN BAKER: Yes. I mean, the overall safety strategy  
23           is the three Es: engagement, engineering and  
24           enforcement. And the police have the major part of the  
25           enforcement, obviously, and some of the engagement. But

26

1 engineering is more of a TD and Highways area. Yes.

2 MEMBER LO: Okay.

3 CHAIRMAN: Ms Wong, are there any questions arising from the  
4 questions of the committee?

5 MS MAGGIE WONG: No. Thank you, Mr Chairman.

6 CHAIRMAN: In which case, it remains for the committee to  
7 thank you for your assistance over this long day, and to  
8 invite you to provide the material that we have  
9 identified that you are going to seek to help us with.  
10 We will do the best we can to put that together as  
11 a list and we will send that to you as soon as we can,  
12 with references to the transcript so that you will be  
13 able to follow what it is that you were asked to  
14 provide.

15 In those circumstances, our evidence is finished  
16 today, and we will resume our hearing on Thursday.

17 Thank you.

18 (5.34 pm)

19 (The hearing adjourned until 9.00 am on

EVIDENCE FROM THE HONG KONG POLICE FORCE: MS CHAN ....1

YI PING, MR STEPHEN BAKER, MS YAU SIN MAN, MR  
LEE TAI WAI, MR CHEUNG TIN LOK (simultaneous  
interpretation was used where indicated)

Examination by MS MAGGIE WONG .....1

QUESTIONING BY COMMITTEE .....170

1 2018 年 9 月 24 日

2 上午 10 時正恢復聆訊

3 出席人士： Hon Mr Justice Michael Lunn（倫明高），香港專營巴士服務獨  
4 立檢討委員會主席

5 歐陽伯權先生，香港專營巴士服務獨立檢討委員會委員

6 羅康錦教授，香港專營巴士服務獨立檢討委員會委員

7 陳政龍大律師及黃佩琪大律師，由高露雲律師行委聘，代表香港專營巴  
8 士服務獨立檢討委員會

9 邱倩雯女士，署理總警司（交通總部）（香港警務處代表）

10 白令嘉先生，署理總警司（交通總部）（香港警務處代表）

11 張天樂先生，警司（刑事總部）（香港警務處代表）

12 陳依萍女士，警司（行動）（新界北總區刑事總部）（香港警務處代  
13 表）

14 李大偉先生，署理警司（交通管理），（香港警務處代表）

15

16 主席：（經傳譯員）各位早晨，早晨，邱總警司。好，多謝你同埋你嘅同事今日出席  
17 呢個聽證會，我相信你都知道聽證會嘅程序係點樣，我哋有黃女士，我哋今日  
18 嘅代表大律師，就會係引導大家作證，問問題。問題當然係向你提出，邱女  
19 士，不過如果你嘅同事係可以提供協助，請你隨便叫個同事，或者其他邊位同  
20 事，一位或多位同事可以提供資訊幫我哋，可以咁樣做嘅。你明唔明白？如果  
21 你聽問題有問題，你可以提出，睇下我哋可唔可以闡述一下。

22 黃女士：（經傳譯員）係，多謝你，邱女士。我會代表委員會提出一啲問題問你嘅。  
23 我相信警察就已經總共有八次回應咗委員會一啲嘅問題，响唔同嘅範圍回答咗  
24 唔同嘅問題。呢個全部都係我哋响個所謂 Miscellaneous，雜項個文件冊  
25 裏面擺晒好。

26 首先我會問嘅問題係就住幾個課題提出問題，首先第一個就係意外嘅統計數  
27 字。邱女士，我相信警方係有一個所有交通意外嘅數據庫，啱唔啱？

28 邱倩雯女士：我可以用中文答，係咪？

29 黃女士：Yes, please.

30 邱倩雯女士：啱嘅，冇錯。

1 黃女士：（經傳譯員）唔該晒。我要等一等，等個翻譯做完。呢個數據庫，你可唔可  
2 以話畀我聽係基於調查報告，即係警察不時進行嘅調查報告所制訂？

3 邱倩雯女士：我問一問我同事。我哋係有一個資料庫，係關於交通意外嘅資料庫。我  
4 哋都係由我哋嘅警區嗰度收集資料返嚟，我哋會寫埋嗰個交通意外嘅原因。

5 黃女士：（經傳譯員）响制定統計數字，你用咩嘢資料嚟到係制定呢個數據？

6 邱倩雯女士：你嘅意思係我哋會收集啲乜嘢嘅資料，係咪呀？

7 黃女士：（經傳譯員）係嘅。

8 邱倩雯女士：我或者請我嘅同事去詳細咁樣解釋我哋係會收集啲乜嘢資料，好嘛？

9 白令嘉先生：（經傳譯員）一般嚟講有關嘅訊息，就係包括資料就係一個車輛嘅類  
10 別，係咪有乘客，究竟嗰啲受傷嘅數字、性質，同埋如果係有嚴重受傷，究竟  
11 係死亡、輕傷，如果嗰個司機係有錯嘅或者佢係其中一個原因，我哋就會睇睇  
12 係根據調查人員所講，邊個人係有份造成呢個嘅成因嘅。

13 我哋係會用電腦嚟到收集有關嘅資料。呢個就好似响個格仔剔一剔咁做嘅，  
14 如果係用電子嘅方法就提交畀道路安全嘅小組嘅，跟住就會畀運輸署。咁等到  
15 運輸安全小組同埋運輸署係可以分析嗰個交通意外嘅成因，以便去到設計或者  
16 改進嗰個安全策略。

17 主席：（經傳譯員）有冇有一個所謂範本，即係表格嘅範本嚟到交呢個報告？

18 白令嘉先生：Yes, my Lord.

19 主席：（經傳譯員）你有冇有一個範本嘅副本？

20 白令嘉先生：（經傳譯員）有嘅，係可以嘅。

21 主席：（經傳譯員）可唔可以而家畀？

22 白令嘉先生：（經傳譯員）可以嘅。

23 主席：（經傳譯員）我想要一個副本。

24 黃女士：（經傳譯員）唔該晒。白令嘉先生，响咁樣嘅數據表格，你响關於呢個意外  
25 嘅成因，你會想知道究竟啲人係點樣受傷，响邊度受傷，或者係咩嘢原因係受  
26 傷，啱唔啱，咁樣嚟到係概述你收集嘅資料？

27 白令嘉先生：（經傳譯員）嗰個資料主要係關於意外嘅成因，就唔係嗰個受傷嘅分  
28 類。受傷嘅分類淨係話佢係咪嚴重受傷嘅，呢個係視乎嗰個人响醫院係住咗幾  
29 耐，定係一個輕傷，定係還是係死亡個案。

30 主席：（經傳譯員）呢個定義係咪响呢個你哋發表嘅交通報告嘅背頁嘅定義？

1 白令嘉先生：（經傳譯員）我最近有睇過呢份文件。

2 主席：（經傳譯員）我畀份你睇睇，請你畀總警司睇一睇。嗰度有一個備註嘅，就咁  
3 畀總警司睇一睇。呢度有幾個詞語嘅定義係响背面嗰度。

4 白令嘉先生：（經傳譯員）係咁嘅，主席。

5 主席：（經傳譯員）呢個定義都係你嗰個標準表格嘅所用？

6 白令嘉先生：（經傳譯員）其實喺個表格有咁寫出嚟，不過的確係咁樣用嘅。

7 主席：（經傳譯員）係，我可唔可以擺番我嗰份文件？唔該。

8 黃女士：（經傳譯員）唔該。當你係編製咗呢個資料嘅時候，其他部門或者審計署係  
9 咪會唔會審計警方同埋運輸署收嘅數據，咁講咩唔咩？

10 白令嘉先生：（經傳譯員）我唔知道審計署點解會參加道路安全...

11 主席：（經傳譯員）或者我哋幫下你，我哋有份係審計署嘅一份文件，審計署就睇咗  
12 一系列嘅事項，亦都睇咗交通安全嘅行政事宜嘅，嗰個係 2013 年 3 月。

13 黃女士：（經傳譯員）請你睇睇呢個文件，SEC-2 號嘅文件冊。白先生，呢個係一  
14 個 2013 年 3 月 28 號審計署出嘅報告。呢份文件其實係房屋署、運輸署、香港  
15 警方同埋新聞處，就係話關於呢個題目，道路安全嘅行政事宜。呢份文件 2013  
16 年 4 月 5 號交咗畀立法會嘅，呢個係一個衡量量值嘅審計工作嘅一部分嚟嘅。

17 我想你睇 SEC，同一份文件，543 頁。我哋可以見到 5.2 段係咁樣講嘅，  
18 「警方係負責調查交通意外」，你有個數據庫，我哋睇一睇第四行，「警方要  
19 求調查嘅警務人員要保存番佢哋嗰個調查結果，同埋用一個實體嘅文件，亦都  
20 將嗰個意外數據就係擺咗喺一個電腦系統，呢一個 TOMS，或者係交通營運管理  
21 系統，咁係意外四十八小時內要輸入。嗰個數據係可以修改。

22 警方呢個 TOMS 嘅數據庫係運輸署嘅數據庫，佢哋叫做運輸資訊系統，TIS  
23 嘅，係利用電子嚟到輸送嗰個交通意外嘅數據嘅。運輸署就係利用呢個 TIS 嘅  
24 意外數據，嚟到去搵出意外嘅黑點，同埋有冇咩意外嘅趨勢，以便進行深入  
25 調查同分析嘅。有關數據亦都係一個制定交通安全策略重要嘅資料來源，亦都  
26 係可以愛嚟制定安全教育措施，或者係持續檢討交通條例，同埋其他道路安全  
27 措施嘅一個資料來源嚟嘅。」

28 你頭先話畀我聽嗰個有關嘅資料係會同運輸署共用分享，即係以便制定嗰個  
29 道路安全嘅策略。今次呢份報告...

30 主席：（經傳譯員）你未再講之前，我想幫一幫手，白令嘉先生，呢份文件其實我哋  
31 有文件响度，可以睇番有關嗰份文件。

32 白令嘉先生：Thank you.

1 主席：（經傳譯員）你如果需要嗰份文件，我哋可以搵人畀你嘅，就係你提出得㗎  
2 嘞。可唔可以畀嗰份文件佢？我諗呢個係 S--其實兩冊嘅，SEC-1 同埋 SEC-  
3 2。但係開始嘅時候係 1？

4 黃女士：（經傳譯員）即係份文件最前嘅部分，喺 SEC-1。

5 主席：（經傳譯員）好，你或者用啲時間睇睇呢份文件，等你知道我哋問嘅問題係關  
6 於咩嘢事嘅。

7 白令嘉先生：（經傳譯員）唔該晒。

8 黃女士：（經傳譯員）呢份文件係審計署編訂嘅，佢其實係要嚟審計有關數據，確保  
9 警方同埋運輸署使用嘅數據係咪準確嘅。根據我哋睇緊呢份報告，佢係話似乎  
10 有啲地方係唔準確嘅，即係話道路安全嘅數據有啲係唔準確嘅。

11 我哋可以睇 476 頁，第 10 段、第 11 段。首先我哋見到呢度個標題，就係  
12 「交通意外數據嘅準確性」，第一就係嗰個位置，跟住嗰個引致交通意外嘅因  
13 素。關於交通意外地點嗰段，第四行，「交通意外嘅地點係利用一個叫做座標  
14 嘅參考系統嘅。由於輸入座標嘅參考數據唔準確，運輸署係用額外嘅時間同埋  
15 資訊嚟到去改善呢個問題，或者糾正個問題。審計署覺得應該係即刻採取有效  
16 措施嚟到確保嗰個有關道路座標位置嘅數據要準確輸入，首先第一。」

17 另一個就係嗰個「引致交通意外嘅因素」嘅。亦都有講有一個係抽樣檢查  
18 嘅，第四行，「有一次進行抽樣調查有關引致交通因素嘅調查，我哋就睇到五  
19 十宗嘅交通意外。審計署發覺百分之十三輸入有關嘅因素係唔準確，嗰五十宗  
20 都有一個上級嚟到去檢查、複查有關記錄，所以需要喺呢方面加強管理嘅。」

21 似乎就喺呢兩方面，即係話地點同埋引致意外嘅原因，似乎係不準確。以我  
22 所理解，呢一份報告就係 2013 年時候做。首先問一個比較概括嘅問題，你知唔  
23 知道喺報告裏面指出有關於交通意外資料嗰個不準確性？

24 白令嘉先生：（經傳譯員）當報告寫嘅時候，我係知道。由嗰陣時開始，我就喺其他  
25 嘅總區工作，所以就冇再跟進究竟採取咗咩嘢嘅續後措施。喺當時做呢份報告  
26 嘅時候，以我所知，嗰個主要嘅問題就係來自位置，即係警察話意外發生嘅位  
27 置同喺呢個交通資訊系統裏面記錄低嘅交通意外位置有差異。而我記得警方相  
28 信呢一個問題嘅原因，就係交通資訊系統使用嘅地圖系統就係採納番路政署使  
29 用嗰個嘅系統，使用就係一啲嘅格網座標。呢個未必一定同警方對於位置嘅描  
30 述係一致嘅。

31 黃女士：（經傳譯員）白令嘉先生，其實呢個問題喺報告裏面都有指出。我想請你睇  
32 一睇喺報告裏面所講嘅係乜嘢，就係呢一個嘅 544 頁嘅 5.5 段開始。544 頁，  
33 5.5 段。呢度就話「格網座標不準確會對運輸署所制定嘅交通意外黑點準確度  
34 有一個不良嘅影響，就係有兩個原因，因為就係話如果同一個格網座標用喺唔  
35 同嘅交通意外位置嘅話，就會搞錯咗嗰個黑點嘅位置。同埋就有時可能一啲經

1 常有交通意外嘅地方可能就會遺漏㗎。跟住就話喺 2006 年嘅覆核裏面，審計署  
2 就發現警方就係將一個二十個嘅交通意外嘅地點，就係用同一個座標。警方就  
3 係話佢哋因為好多時有啲新路，就未必有咁樣嘅座標。」

4 跟住第 5.8 段，545 頁，就係「運輸署嘅檢查」。佢就話「為咗減低呢個  
5 座標嘅不準確度，運輸署喺 2008 年開始就因應警方輸入嘅一啲座標，就揀咗幾  
6 個去檢查，但係仍然運輸署係搵到警方嘅描述同埋格網座標係有出入嘅。」

7 所以呢一個 5.9 段可以睇到「喺呢個 2010 年 4 月開會嘅時候，運輸署同  
8 警方講話，大約係輸入嘅座標有四成係用意外地點描述有出入。」跟住睇 5.10  
9 段，審計署就發現到，仍然係有呢個唔準確嘅格網座標，就搵到呢一個七千三  
10 百一十四個，即係有兩成六嘅格網座標係唔準確。跟住睇番 5.11 段，運輸  
11 署...

12 主席：（經傳譯員）呢個其實係可能對我哋嚟講就有咁有關，即係一啲意外嘅成因。  
13 或者可以縮短咁講，有冇任何嘅建議去改善呢個問題？其實真正嘅問題就係話  
14 有冇做到，可以先睇一睇個建議，就係呢一個 5.14 段。

15 黃女士：（經傳譯員）睇番 5.14 段，其實就係 548 頁。呢度就係建議喺呢個交通資  
16 訊系統或者交通行動及管理系統裏面，就可以加一個嘅查核，令到調查嘅人員  
17 係一發現出現問題嘅時候，就可以即刻知道。跟住 5.15 段，警方就話同意呢個  
18 建議。

19 想問自從審計署報告 2013 年之後，有冇任何嘅改善？

20 白令嘉先生：（經傳譯員）我就想套番落去當時嘅情況回答，我知道 2012 年嘅時候  
21 有呢份審計署報告，之後我係調離開咗交通部，去到 2013 年先返番去。而且我  
22 都唔知道係要問我一啲審計署嘅問題，所以我唔知道要先問一問呢方面嘅資  
23 料，先返嚟今日嚟答你。但係以我所記得，2013 年嘅時候係有採取一啲措施，  
24 就係監察輸入資料。自呢一份報告寫咗之後，交通行動及管理系統其實都已經  
25 由另外一個比較新嘅系統，一個個案管理資訊係司取代咗。呢一個較新嘅系統  
26 有一啲新嘅設備，等警方可以將唔同嘅資料輸入去嘅，包括埋有關於交通嘅一  
27 啲調查。

28 以我所知道，呢個個案管理資訊系統 CMIS，其實就係同運輸署嘅交通資訊  
29 系統有聯繫，不過我而家講唔到呢個系統喺咩嘢方面有改善。譬如話係咪喺交  
30 通意外地點嘅記錄方面會有任何改善。

31 主席：（經傳譯員）冇錯，我哋都明白你都有去過唔同嘅部門。我哋之後亦都會聽取  
32 運輸署嘅證供，但係而家問你就係話，喺位置嘅錯誤方面，你知唔知道有問題  
33 出現？

34 白令嘉先生：（經傳譯員）我唔知，我唔肯定。

35 黃女士：（經傳譯員）而家講番第二個範圍，就係意外嘅成因。呢個比較難嘅，因為

1 呢個就有關於警方輸入有關交通意外成因嘅資料。我哋睇番 5.17，就係 549  
2 頁，「運輸署就使用警方輸入嘅交通意外成因入去佢哋自己嘅交通資訊系統去  
3 搵出呢個環境、駕駛者同埋道路使用者佢哋個嘅問題，同埋嘗試去搵出呢一  
4 個嘅改善建議。1998 年做咗一個覆核，當時審計署就發現到其實有個錯誤率，  
5 就係呢一個 25%，但係喺 06 年再做一次覆核嘅時候，就係 13%。」

6 我哋睇番 5.20 段，就發現係五十宗嘅個案都係有問題嘅，牽涉就係二百八  
7 十宗嘅意外。審計署發現到就係呢個 13%，即係三十七宗，即係全部三十四  
8 宗，呢個三十七宗裏面就係唔準確嘅。佢哋就發現到其中兩宗嘅意外，就發現  
9 當時警方就係話有呢一個機件故障，但係事實上唔係。

10 首先你知唔知道有個咁樣嘅問題，即係呢一方面有關於交通意外個資料輸  
11 入係出現咗問題，你知唔知？

12 白令嘉先生：（經傳譯員）唔知，我唔知道資料輸入有關於交通意外成因有咁大嘅問  
13 題。

14 主席：（經傳譯員）其實我哋就想搵出究竟點解會出現咗咁嘅問題，譬如話發生意外  
15 之後，牽涉嘅人士就可能同警方講話「我個制動系統就係壞咗」，會唔會警  
16 方就因此寫咗落去，就係話呢個係成因。但係之後驗過架車，就發現其實個  
17 煞車系統係有問題，所以就出現咗係有咁嘅問題。

18 白令嘉先生：（經傳譯員）呢個其實應該改番嘅。

19 主席：（經傳譯員）係，但係冇改到，就留番喺個系統入面，呢個資料。

20 白令嘉先生：（經傳譯員）有咁嘅可能。

21 黃女士：（經傳譯員）當時審計署作出一系列建議，喺 551 頁嘅 5.22 段可以搵到。  
22 簡單嚟講係要求警方加強管理嘅控制，提醒監察人員要小心檢查個案記錄裏面  
23 同輸入嘅資料係咪一致，亦都需要作出有關嘅檢查，作覆核。以你所知，有冇  
24 做到——即係話呢啲嘅建議係咪真係有執行？

25 白令嘉先生：（經傳譯員）係有執行到建議。

26 黃女士：（經傳譯員）以你所知，你知唔知道有冇任何輸入資料錯誤，即係到目前為  
27 止仲有冇呢一啲關於意外成因嘅資料錯誤輸入？

28 白令嘉先生：（經傳譯員）以我所知，資料輸入係盡量準確。

29 主席：（經傳譯員）其實你都係一般嚟講，而唔可以話答「有」、「冇」。一般嚟  
30 講，你係咪滿意而家嘅做法，個嘅系統都係反映到實際嘅情況？

31 白令嘉先生：（經傳譯員）係。

32 黃女士：（經傳譯員）唔該。請你睇另外一份文件，我哋咁樣做，白先生同埋陳女士

1 (邱女士?)就係要搵出交通意外資料嗰個準確性。因為呢方面嘅資料對於運  
2 輸署做交通安全政策或者改善措施係好重要，所以資料準確性係重要嘅。我哋  
3 聽到其中一個專家嘅講法，就佢上個禮拜作證嘅，佢就話我哋需要有啲程序，  
4 即係話香港係咪要做一個影響評估。我哋睇番譬如話幾多受害人，亦都睇番個  
5 安全個措施，睇番我哋本區裏面受傷嘅人帶嚟嘅費用成本，所以你覺唔覺得呢  
6 個係一個比較合理處理安全嘅一個角度？同埋你睇下香港係咪應該制定有關嘅  
7 數據？

8 主席：(經傳譯員)呢個所謂嘅利益成本嘅分析，無論你用咩嘢方法，譬如話你可能  
9 想响車輛度裝一啲安全嘅設施，呢個咁樣嘅做法，呢個咁嘅分析帶來新嘅措  
10 施，就係响澳洲有做嘅。當然需要嘅數據係要準確，我哋特別想睇嘅，就係專  
11 營巴士係咪要裝安全帶，呢個問題我哋會事後再探討嘅。

12 黃女士：(經傳譯員)Yes.

13 主席：(經傳譯員)黃小姐，我諗我想睇一睇嗰個意外成因嘅一個標準一覽表，或者  
14 某個階段，或者你可以詳細講一講，我哋再睇一睇裏面嘅內容。

15 黃女士：(經傳譯員)係，我可唔可以之後再係處理呢個問題？

16 主席：(經傳譯員)可以嘅。

17 黃女士：(經傳譯員)我其實都就嚟想講到安全帶嘅問題，我哋想知一啲統計數字，  
18 我想睇一睇運輸署嘅一啲數據，同埋專營巴士佢哋有個管理系統裏面講過嘅即  
19 係非撞車嘅意外。

20 主席：(經傳譯員)唔好意思，我再打擾你。呢個我哋响個聽證會，我哋係收集到一  
21 啲機密資料，呢啲可能係專營巴士公司同埋運輸署之間嘅一啲溝通。佢哋得到  
22 嗰個要求，就係要嗰啲公司研究一啲意外成因。有冇機會睇睇有關嘅資料，或  
23 者响我哋嗰個網頁睇番個資料？

24 白令嘉先生：(經傳譯員)其實我週末有睇過某一部分嘅資料。

25 主席：(經傳譯員)如果係講緊作為安全帶，巴士成因係咪有好多都係關於失去平衡  
26 嘅原因引致？個數字似乎就話受傷個案，巴士或者巴士裏面有50%，可能有一  
27 啲意外嘅數字係除咗失去平衡，係仲有另一組數字。呢啲我哋會之後再睇睇  
28 嘅。

29 黃女士：(經傳譯員)白令嘉先生，頭先我提過有個叫做遠期嘅計劃，即係話巴士公  
30 司有個遠期計劃嘅，佢哋會睇睇五年嘅情況，佢哋就會每年睇一睇嗰個意外趨  
31 勢數字。呢方面，警方會唔會收到呢個咁嘅遠期嘅計劃，即係運輸署一個遠期  
32 計劃嘅文件或者內容？

33 白令嘉先生：(經傳譯員)我哋未收過，我都唔知道。我諗都有預期佢哋會畀我哋  
34 嘅。

1 主席：（經傳譯員）我知道--我哋之前得到嘅講法，就係話係一個機密資料嚟嘅，我  
2 哋都用咗幾個月，經過一啲困難先攞到嘅。

3 黃女士：（經傳譯員）我想你睇睇 TD-1，180 頁，呢個係 2018 至 2022，九巴提交  
4 畀運輸署嘅遠期計劃。九巴就做咗一個分析，意外性質嘅分析。佢係講緊 2015  
5 至 16 年嘅意外嘅，我哋見到呢個表，8.1，乘客失去平衡係佔咗 51.5%；  
6 8.2.7 就話大部分嘅意外係由於乘客喺巴士上面失去平衡，超過一半嘅個案係  
7 由於個巴士响行緊嘅時候就煞車嘅。呢度亦都有講其他意外嘅成因。

8 呢份報告有唔少嘅統計數字，呢個只係其中一部分。我第一個問題就話，呢  
9 啲咁樣嘅資料，可唔可以幫到警方？你哋制定數據分析意外嘅時候，對你哋有  
10 冇幫助？佢哋當時有畀呢個文件畀你，即係專營巴士公司畀一份咁嘅報告你，  
11 會唔會可以幫到警方執行你哋嘅職務？

12 白令嘉先生：（經傳譯員）我第一個印象就係呢啲資料，其實响我哋個意外成因裏面  
13 包含在內。我有法子進一步評論，因為我有時間睇呢份文件。

14 主席：（經傳譯員）如果你係有咁樣做，你就發覺你哋嘅數據同呢一方面嘅運輸專家  
15 所制定或者分析嘅資料都好一致嘅。

16 白令嘉先生：We would, sir, yes.

17 黃女士：（經傳譯員）呢度其中一個審計署嘅建議，就係話即係要特別係睇睇輸入數  
18 據係咪準確嘅，呢個係用一個要確保--你確唔確保應該有個叫做查核或者雙重  
19 查核，同唔同意？

20 白令嘉先生：（經傳譯員）呢個會有用嘅，我諗呢個對於我哋嘅同事進行審核或者係  
21 雙重審核。

22 黃女士：（經傳譯員）係作為參考？

23 白令嘉先生：（經傳譯員）係有用嘅，我哋可以對照一下，我哋同事响嗰個調查嘅時  
24 候，都好徹底嘅調查搵到嘅資料可以進行一個對照。

25 黃女士：（經傳譯員）响編製你哋嘅數據，有一個例子，就譬如話乘客失去佔  
26 51.5%。我或者想你睇一睇運輸署畀我哋嘅文件，佢係講緊 2013 年嘅統計數  
27 字。2013 年 5 月 16 號，SEC-2，566 頁。呢個文件係由運輸署寫畀立法會，  
28 响 567 頁，(c) 呢一段，佢呢度就列出專營巴士嘅意外，就話...

29 主席：（經傳譯員）未繼續講詳細情況，可唔可以幫助白令嘉先生講講個信件嘅背  
30 景？

31 黃女士：（經傳譯員）呢個係回應審計署嘅，寫信畀番立法會。佢哋當時考慮審計署  
32 報告嘅第二張，即係道路安全措施嘅管理系統，就頭先講過係輸入嘅資料唔準  
33 確嘅問題。運輸署根據佢哋嘅資料提供咗一啲統計數字。

1 (a) 就話「2016 年响一百二十宗交通死亡意外裏面，有十五宗係屬於公路  
2 嘅。」佢就話「唔係好多海外嘅大城市都係會分別為公路交通提供一啲意外嘅  
3 統計數字，佢哋只能夠搵到一啲英國嘅主要城市嘅有關數字。」去到(c)嗰段，  
4 佢就有一個係摘要，就話「專營巴士嚟講，由於佢哋所載嘅乘客數量好大，同  
5 埋係乘客係會企响度，有站立乘客嘅。就會見到，就算冇撞車，好多時候都會  
6 令到乘客受傷嘅。因為乘客可以車箱裏面種種原因，譬如話冇緊握扶手，就失  
7 去平衡，或者佢上車、落車失去平衡。呢啲係屬於佢哋所叫嘅非撞車型嘅意  
8 外。如果係專營巴士，58%係所謂非撞車類別嘅意外嚟嘅。」

9 呢個同佢哋遠期計劃裏面提供嘅統計數字係咪相符？我哋其實有一份運輸署  
10 比較新嘅數字，不過我哋唔需要睇啲嘅暫時。佢而家講緊個百分率係 59%至  
11 65%，即係 2012 至 2017 年涉及專營巴士嘅意外係屬於一啲非撞車嘅意外。

12 主席：（經傳譯員）你係咪講緊非撞車引致嘅受傷個案？

13 黃女士：（經傳譯員）係。我哋個參考編號就 TD-1，111 頁，第 5 段。我想問下响  
14 你制定你哋嘅數據，你會唔會分開乘客坐低受傷，定係乘客係企位，即係站立  
15 响巴士裏面？

16 白令嘉先生：（經傳譯員）照我記得，我哋有咁樣分開嘅，即係話嗰個受害嘅乘客係  
17 企响度定坐响度。

18 主席：（經傳譯員）因為你哋嘅工作方法，就住整體嚟講，你哋標準嘅範本就唔係設  
19 計作為分開有咩嘢特別情況，即係嗰個標準範本文件係乜嘢車都唔用嘅？

20 白令嘉先生：（經傳譯員）係嘅，係嘅。

21 主席：（經傳譯員）我哋睇睇呢個文件係有用嘅，因為會等我哋知道警方係點樣睇嗰  
22 個意外同埋受傷嘅成因，點樣進行一個歸類嘅。

23 黃女士：（經傳譯員）或者我哋睇睇你嗰份標準嘅範本文件，或者先確立某啲事實  
24 先。

25 主席：（經傳譯員）首先總警司，你可唔可以同我哋講講呢份文件係點嚟，係咩嘢  
26 嚟？

27 白令嘉先生：（經傳譯員）呢度即係話係由於司機引致嘅交通意外成因嘅一覽表，响  
28 嗰個左邊有個編號嘅，呢度係畀我哋嘅同事可以輸入去個電腦系統嘅，即係話  
29 呢個意外係咩嘢成因。

30 黃女士：（經傳譯員）呢度有兩個表格--唔好意思，其實有兩格，第一格似乎底嗰格  
31 就係一個摘要，就係唔同嘅來自司機嘅成因，一啲大嘅意外。底部嗰一大個表  
32 格，就係將一啲主要嘅成因列咗出嚟，就係由多一路係少咁樣列出。

33 白令嘉先生：（經傳譯員）唔好意思，我有諗過你會問呢啲問題，冇準備。

1 主席：（經傳譯員）或者我哋逐步問，頂部嗰個清單好清楚顯示咗，就係話一個係全  
2 部都適用嘅。不過呢啲全部都係因為司機而引致嘅意外，總共有六十二種，係  
3 嘛？即係唔好講右手邊做咩嘢，唔好理佢，淨係講番可能引致意外嘅原因，係  
4 嘛？

5 白令嘉先生：（經傳譯員）係。

6 黃女士：（經傳譯員）睇番下面個表格，就係司機引致嘅意外原因。第一就係唔專心  
7 駕駛，就有一百八十九宗。講緊嘅係 2018 年首八個月，係嘛？呢個編碼係 56  
8 號。

9 白令嘉先生：（經傳譯員）係。

10 黃女士：（經傳譯員）跟住一路落去，下一個就係 60 號，冇確保乘客安全，可以見  
11 到就係九十七宗，係 2018 年首八個月嘅數字。

12 白令嘉先生：（經傳譯員）係。

13 黃女士：（經傳譯員）第三個主要成因，就係與前車距離太近。

14 白令嘉先生：（經傳譯員）係。

15 黃女士：（經傳譯員）第四個就係不小心轉線。

16 白令嘉先生：（經傳譯員）係。

17 黃女士：（經傳譯員）第五個要係為免碰撞，同埋突然間扭軚或者停。

18 白令嘉先生：（經傳譯員）係。

19 黃女士：（經傳譯員）跟住嗰個就係不適當或者非法轉彎。

20 白令嘉先生：（經傳譯員）冇錯。

21 黃女士：（經傳譯員）我哋可以見到總共係有--我有計過，不過大約有十零個成因係  
22 抽咗出嚟。

23 白令嘉先生：（經傳譯員）係。

24 黃女士：（經傳譯員）呢個表冇搵出引致乘客受傷--譬如話失去平衡，我哋可以喺邊  
25 度搵到呢類嘅資料？因為呢個表冇呢類資料。

26 白令嘉先生：（經傳譯員）冇錯。我哋做統計只係會將傷勢分類，唔會再進一步分  
27 類。我哋就係要睇番嗰個案件報告先至知嘅。

28 主席：（經傳譯員）你哋個分類關於受傷，就係話死亡、嚴重同埋係輕傷。而喺  
29 2017 年嗰個嘅交通報告釋義嗰度，就係有解釋到呢啲嘅名詞點解。其實以我  
30 睇，即係話輕傷、嚴重受傷，其實都係你哋自己定嘅啫，因為你都係要區分究

- 1 竟咩嘢係嚴重，乜嘢係輕傷，冇話一個好特別嘅界定方法。
- 2 白令嘉先生：Yes.
- 3 主席：（經傳譯員）因為譬如話留院十二個鐘、十五個鐘、三日，你都分得到㗎喇？
- 4 白令嘉先生：（經傳譯員）冇錯嘅。
- 5 黃女士：（經傳譯員）你講過就係話有三類嘅傷勢，有冇再分你係關於專營巴士？
- 6 白令嘉先生：（經傳譯員）我唔知道有啲咁嘅範本。
- 7 黃女士：（經傳譯員）有關於喺巴士上面，乘客失去平衡，你點計番個數字出嚟？
- 8 白令嘉先生：（經傳譯員）我要再搵一搵，我而家手頭冇呢啲資料。
- 9 主席：（經傳譯員）呢啲其實係根本唔關你哋事嘅資料㗎？
- 10 白令嘉先生：（經傳譯員）冇錯。
- 11 主席：（經傳譯員）教授。
- 12 羅先生：（經傳譯員）係由到場嘅警員定係之後嘅人士先至去決定究竟因咩嘢原因發
- 13 生意外？
- 14 白令嘉先生：（經傳譯員）就係調查意外嘅警務人員，佢會去到現場睇番，跟住返去
- 15 就會將個成因輸入番電腦入面。呢啲嘅資料就會由交通部嘅交通安住小組
- 16 負責。
- 17 羅先生：（經傳譯員）即係話有唔同嘅人士，譬如話有呢個巴士公司，佢就可能調查
- 18 過，佢哋嘅資料會唔會返番去你度，譬如話乘客失去平衡？
- 19 白令嘉先生：（經傳譯員）唔會，淨係我哋嘅警方調查。
- 20 羅先生：（經傳譯員）運輸署呢？邊個係最後保留話呢個先至係正式嘅成因，係你哋
- 21 定運輸署，定係咩嘢人？
- 22 白令嘉先生：（經傳譯員）警方輸入嘅資料都係基於我哋做嘅調查，跟住就會輸入電
- 23 腦，跟住交界運輸署佢哋去分析。
- 24 羅先生：（經傳譯員）即係話呢啲資料就唔會由運輸署再返番去你度嘅？
- 25 白令嘉先生：（經傳譯員）我哋可以入去運輸署嘅資料。
- 26 主席：（經傳譯員）但係運輸署就會用你哋嘅資料，但係你哋就有專營巴士公司意外
- 27 成因呢方面嘅資料，你有㗎？
- 28 白令嘉先生：（經傳譯員）冇錯。

1 羅先生：（經傳譯員）即係話其實喺巴士公司、警方同埋運輸署保存嘅資料可能有出  
2 入？

3 白令嘉先生：（經傳譯員）有咁嘅可能，不過我就想講，我哋係會睇番自己嘅評估去  
4 決定究竟個成因係乜嘢。因為意外係由警務人員調查過，亦都係會見過一啲嘅  
5 傷者。但係關於專營巴士公司方面，我唔知道佢哋點做。

6 主席：（經傳譯員）運輸署就喺呢個三角嘅頂部，佢哋會透過遠期計劃--我哋而家知  
7 道呢個遠期計劃係乜嘢，同埋係從你嗰度會取得資料，即係話佢哋會有兩個源  
8 頭，但係你哋只係得一個資料來源？

9 白令嘉先生：（經傳譯員）冇錯。

10 黃女士：（經傳譯員）如果運輸署發現有錯誤、有出入，即係警方輸入嘅資料，對番  
11 專營巴士公司發現警方輸入嘅資料有錯誤嘅話，你知唔知佢哋會點做，會唔會  
12 先問下你哋先？

13 白令嘉先生：（經傳譯員）我知道運輸署如果佢哋覺得資料有出入的話，會同我哋講  
14 一講。我唔知所有嘅情況會點，即係因乜嘢嘅原因，佢哋會認為有出入。

15 主席：（經傳譯員）你可唔可以畀個例子去顯示嗰個程序究竟係點？

16 白令嘉先生：（經傳譯員）定期，我哋交通安全小組有時會收到運輸署交嚟嘅個案，  
17 要求我哋覆核番提供咗嘅資料，但係就唔知道佢哋基於乜嘢嚟就話有出入嘅，  
18 係咪因為巴士公司畀嘅資料或者咩嘢嘅原因。

19 主席：（經傳譯員）喺你哋覆核提供嘅資料裏面，你哋會採取咩嘢步驟？

20 白令嘉先生：（經傳譯員）我哋會聯絡番處理呢一次調查嘅總區，咁去再 check 番  
21 一次佢哋輸入電腦嘅資料係咪準確，即係話係咪同佢哋呢個調查檔案裏面所寫  
22 嘅資料係一致。

23 主席：（經傳譯員）調查意外嘅時候，喺邊一個階段會將呢啲編碼輸入去電腦入面，  
24 係邊個階段？

25 白令嘉先生：（經傳譯員）係好早期，意外發生之後幾個鐘頭就輸入。

26 主席：（經傳譯員）喺覆核嘅過程中，應該都會係較後嘅時間。當時會有啲乜嘢嘅材  
27 料畀你哋去睇番，去確認最初個評估係咪準確？

28 白令嘉先生：（經傳譯員）初步評估其實就係警務人員返番寫字樓之後就會做，之後  
29 有可能會作進一步調查發現到可能係需要更新，譬如話可能驗咗車之後，就發  
30 現原來煞車系統係正常嘅，唔係好似司機所講係壞咗。所以我哋需要時間，就  
31 係再向證人嗰方面搵出資料，同埋分析一啲事實，先至可以係作出呢個決定  
32 嘅。

- 1 黃女士：（經傳譯員）即係負責調查嘅人員負責輸入資料，係嘛？
- 2 白令嘉先生：（經傳譯員）冇錯。
- 3 黃女士：（經傳譯員）邊個會複查？
- 4 白令嘉先生：（經傳譯員）通常係警長，仲有好多唔同程度，唔同層次嘅監察嘅。
- 5 黃女士：（經傳譯員）即係負責嗰一個分區嘅警長？
- 6 白令嘉先生：（經傳譯員）係，其實就係嗰個調查人員嘅上司。
- 7 黃女士：（經傳譯員）而家講安全帶，我哋頭先講咁多統計數字係因為同安全帶係有  
8 關嘅。我哋其中一個聆訊裏面聽到嘅資料，就係企喺度嘅人係戴唔到安全  
9 帶，...
- 10 主席：（經傳譯員）唔好意思，我再打攞。冇用安全帶係會唔會出現喺你哋嗰個司機  
11 引致意外嘅範本裏面？
- 12 白令嘉先生：（經傳譯員）呢個唔係意外引致嘅成因。
- 13 主席：（經傳譯員）但係會引致受傷。
- 14 白令嘉先生：（經傳譯員）冇錯，我要再進一步睇番先至可以回答你問題。
- 15 主席：（經傳譯員）呢個範本只係限於因為司機引致嘅意外原因，唔係話之後嘅後  
16 果？
- 17 白令嘉先生：（經傳譯員）冇錯。
- 18 黃女士：（經傳譯員）呢個司機引致嘅原因，呢啲嘅因素係佢哋對上一次更新係幾  
19 時？
- 20 白令嘉先生：（經傳譯員）唔知。
- 21 黃女士：（經傳譯員）可唔可以搵下，跟住適當時候畀番資料我哋？你哋部門會唔會  
22 考慮搜集資料有關於一啲嘅交通意外之後發生嘅事，即係有關於唔同嘅傷勢？
- 23 主席：（經傳譯員）你其實想要警司做乜嘢？
- 24 黃女士：（經傳譯員）譬如例如好似話乘客失去平衡，好似專營巴士公司做嘅統計，  
25 或者將呢度嘅清單擴大，即係搵出就係話邊一個原因引致乘客失去平衡，同埋  
26 搵番嗰個比例。
- 27 白令嘉先生：（經傳譯員）我都要時間先至可以搵出究竟點樣去調查，因為呢個係牽  
28 涉進一步嘅資料。唔好意思，我而家有呢啲資料，係冇帶嚟。
- 29 黃女士：（經傳譯員）或者我講番安全帶，因為係同安全帶有關。因為我哋發現到，

1 咁係呢個非撞車嘅意外裏面，59%至到 65%都係乘客失去平衡...

2 主席：（經傳譯員）未問呢個之前，我就想問一個一般嘅問題。作為一個調查嘅工  
3 具，即係有關於巴士上面嘅巴士意外，呢個比較窄嘅範圍。乘客因為失去平衡  
4 受傷，你哋其實知唔知道--即係睇下你知唔知道，警方會唔會睇番黑盒去調  
5 查，搵下譬如司機係咪突然㗎車，突然加速、減速咁？

6 白令嘉先生：（經傳譯員）我哋亦都可以睇到任何證物或者係調查任何證物嘅，譬如  
7 話如果係調查嗰啲可拘捕罪行、危險駕駛、不小心駕駛等等，我哋都可以接觸  
8 到啲證物嘅。

9 主席：（經傳譯員）我明白呢個係一個比較普遍嘅問題，我其實問題實際上警方真係  
10 會睇番頭先我講嗰啲設備？當然有人死亡嘅個案，肯定你係會睇。如果佢話有  
11 個女乘客失去平衡，就跌斷咗條腳，你會唔會睇嗰個黑盒？

12 白令嘉先生：（經傳譯員）一般嚟講可能會，不過我要先問一問我啲同事。

13 黃女士：（經傳譯員）我跟進呢個問題，係咪有個一般嘅標準做法，喺調查交通意外  
14 嘅時候係一個恆常嘅做法，你要搵嗰個黑盒，或者佢哋遙距記錄嘅系統，即係  
15 你會同嗰個專營巴士公司攞番呢樣嘢嚟睇，係咪一般嘅做法？

16 白令嘉先生：（經傳譯員）我就唔知呢個係咪一個常規嘅做法，我需要先問一問我同  
17 事先知道究竟有幾常用呢個方法。

18 黃女士：（經傳譯員）呢方面，如果閉路電視有錄影，巴士上面如果有閉路電視有影  
19 到嘢，會唔會睇？

20 白令嘉先生：（經傳譯員）呢個似乎就唔係我呢個層面，就曾經工作上接觸過，我要  
21 問一問同事。

22 黃女士：（經傳譯員）我想請你睇一睇一個工作小組，即係關於安全帶嘅，工作小組  
23 嘅工作。先睇睇個有關文件，呢個工作小組就關於專營巴士增強安全嘅一個工  
24 作小組，呢個係 2018 年 2 月大埔巴士意外之後成立嘅。呢個係 TD，即係運輸  
25 署，TD-1，94 頁。

26 先講講個背景，呢個係因為 2018 年 2 月大埔巴士意外，然後成立嘅工作小  
27 組。所以五間專營公司都有代表响度嘅，亦都有包括製造商同埋運輸署嘅代  
28 表。响 2018 年 3 月中，就要睇睇究竟係咪適合或者採用啲新科技，安裝一啲新  
29 嘅安全設施嚟到去保障巴士公司。

30 你係咪知道呢一個咁嘅工作小組？

31 白令嘉先生：（經傳譯員）唔知嘅。

32 黃女士：（經傳譯員）警方方面，你就唔知道有咁嘅工作小組。警方裏面有冇人知，  
33 你知唔知有冇邊個人負責...

1 主席：（經傳譯員）或者我可以幫幫總警司，你可唔可以描述一下呢個工作小組係有  
2 啲乜嘢人參與，有邊方面參與？或者睇睇有關嘅文件。

3 黃女士：（經傳譯員）總警司，請你睇第 4 段，嗰個備註 1 所涉及嘅各方面，就係話  
4 專營巴士公司，即係話九巴、龍運巴士、城巴、新世界第一巴士同埋新大嶼山  
5 巴士。去番第 4...

6 主席：（經傳譯員）或者呢度睇睇嗰頁嘅最頂嗰度，「運輸署成立咗一個工作小組，  
7 所以專營巴士」--“FB”即係專營巴士，呢度用咗個簡寫。跟住嗰裏面就有個  
8 備註 1，同埋巴士嘅製造商，成立嘅日期就係 2018 年 3 月中，其實係 3 月 13  
9 號嚟到係複檢究竟係咪適合，或者技術上係咪可行，或者採用啲新嘅科技嚟到  
10 增加對巴士乘客嘅保障。

11 黃女士：（經傳譯員）警方就有代表喺呢個工作小組，冇代表參與。呢方面我想問一  
12 問你，其實我想問下關於安裝安全帶嘅事，請你發表一個意見嘅。喺呢份文件  
13 第 5 段，呢度有提過一件事，就係話安裝安全帶，呢個係工作小組嘅。

14 主席：（經傳譯員）或者可唔可以讀晒成段，畀總警司知道個背景？

15 黃女士：（經傳譯員）好，我哋讀番第 5 段。

16 「由於 2006 年 7 月，九巴就同另一架車撞車嘅意外，引致上層巴士乘客就  
17 係被拋出咗架車。2007 年 12 月有另一個類似嘅意外，城巴就同新巴嘅巴士喺  
18 將軍澳相撞，有三個車上嘅乘客被拋出，即係話城巴嘅三個乘客就係拋出巴士  
19 之外嘅。運輸署就建議同埋個巴士公司同意，就話上層最前嗰四個座位就要再  
20 裝番安全帶，所有 1997 年之後攞到牌照嘅巴士都要有呢個安全帶，嚟到防止上  
21 層嘅巴士被拋出車外。同埋所有嗰啲即係冇保護、暴露嘅座位都要有安全帶  
22 嘅。呢個工作小組就係研究究竟係咪所有專營巴士嘅所有座位都要安裝安全  
23 帶。」

24 我想睇睇關於呢個工作小組嘅會議記錄嘅某幾段，呢度佢哋亦都有唔同嘅工  
25 作小組之下，仲有啲分組嘅，我想你睇一睇。

26 主席：（經傳譯員）未繼續之前，總警司或者你嘅同事，你哋有冇人知道，其實我哋  
27 講緊 2008 年，有因為 2006、2007 年呢兩宗巴士意外，佢就裝咗--嗰啲容易  
28 暴露，冇安全嘅座位，即係話就响前面嘅座位安裝安全帶，同埋有一個好似護  
29 欄嘅一個橫柵嘅，冇遮擋嘅座椅就安裝咗--上層冇遮擋嘅座椅安裝安全帶。當  
30 時佢哋制定呢啲咁樣嘅措施，有冇諮詢過警方？可能有，你唔知，不過如果知  
31 嘅，請你將你嘅經驗同我哋分享。

32 白令嘉先生：（經傳譯員）我唔知道有件咁嘅事。

33 主席：（經傳譯員）你嘅同事？總警司，你可唔可以問一問，究竟當時有冇問過警方  
34 嘅意見？呢個係立法會研究過嘅一個課題嚟嘅。我哋預期由於呢件事嘅性質，  
35 同埋警方應該會有個參與，可能都會唔會問過警方嘅意見？應該係會問，係咪

1 呀？

2 你有冇其他啲參考嘅文件編號嚟到幫警方？

3 黃女士：（經傳譯員）首先我哋睇睇個工作小組佢哋最後得到嘅成果，然後我哋  
4 之後睇番個會議記錄。請你睇 403 至到 427 頁，呢個運輸署响 2018 年 7 月  
5 交界立法會，為佢哋 7 月 25 號進行討論提供嘅文件，呢個就一個摘要列出工作  
6 小組嘅建議。大家可以睇 407 頁底嗰度...

7 主席：（經傳譯員）或者令到總警司知道個背景，我先睇第 1 頁。呢個文件係由運  
8 輸署、運房局提供嘅文件，係方便佢哋响今年 7 月 25 號立法會運輸事務委員會  
9 進行討論嘅呢份文件嚟嘅。

10 黃女士：（經傳譯員）睇番 407 頁個底嗰度，呢度有啲建議，佢就列出...

11 主席：（經傳譯員）或者我哋先睇 403 頁，嗰度有啲背景嘅。

12 黃女士：（經傳譯員）Yes.

13 主席：（經傳譯員）或者請你睇第 2 段出嚟。

14 黃女士：（經傳譯員）係，白先生，第 2 段係咁講嘅，「由於响 2018 年 2 月 10 號  
15 大埔道，九巴發生過致命意外嘅。運輸署就响 2018 年 3 月中成立一個促進專營  
16 巴士安全嘅工作小組，成員來自所有專營巴士營運公司，同埋主要嘅巴士嘅製  
17 造商，嚟到考慮有冇可能採取進一步嘅措施嚟到增加巴士安全嘅。工作小組嘅  
18 工作範圍包括以下範圍：一，探討技術上是否可行，係咪可以適合，同埋是否  
19 符合成本利益嚟到係响巴士上安裝一啲車內嘅安全設施，或者係採納啲科技，  
20 同埋為所有嘅座位提供安全帶是否可行，同埋訓練方面係點進行檢討。」

21 佢就話「當時工作小組自從 2018 年 3 月係舉行咗三次--技術組亦都有五  
22 次會議。有關嘅結論同埋建議就係响下面嗰幾段列出嚟。嗰個車內安全設施或  
23 者採納科技就响第 4 段，去建議採納或者安裝某啲設備。」跟住請你睇 407，  
24 呢個係特別講到乘客座位安裝安全帶。第 10 段就係列出佢哋當時嘅睇法，即係  
25 話所有有遮擋嘅巴士座位都應該係安裝安全帶，防止佢哋跌出座位嘅。

26 佢就話「所以新巴士，只要係新巴士都可以安全啲符合國際標準嘅安全帶。  
27 所有專營巴士營運商都同意自從 2018 年 7 月開始，佢哋所訂購嘅新巴士都會安  
28 裝乘客嘅安全帶嘅。」第 12 段，呢個係講緊响一啲冇安全帶嘅巴士度，就安裝  
29 番巴士嘅安全帶。第六行，睇一睇番實際上，裝番安全帶，特別係嗰啲下座，  
30 就會係需要喺巴士嘅底架就進行一啲改動，或者增強，亦都需要將佢嘅結構係  
31 加強，嚟到加一啲支架或者係要換晒所有座位，先至可以符合國際標準，關於  
32 嗰啲係巴士安全帶嘅拉力等安全保障。

33 所以營運商覺得技術上唔係好實際，就算唔係話完全做唔到都係唔係好實際  
34 嚟到將所有上層同下層嘅座位重新裝番安全帶嘅。第 13 段，「但係如果就係所

1 有上層，喺某一啲嘅汽車種類裏面都會加裝安全帶嘅話，就會更加可行。」喺  
2 14 段繼續講，「工作小組就係考慮到時間同埋人手都好重要，巴士製造商就係  
3 有呢個所需嘅設備同埋人手去加裝。」再睇番下面有一啲嘅巴士營運者表示關  
4 注，就係話加裝安全帶唔單只會引致大量嘅成本增加，同埋需要時間、人手，  
5 亦都需要去再買更多嘅巴士，同埋將佢調配，先至可以維持到現有嘅服務水  
6 平。跟住第 16 段「建議係小組嘅」...

7 主席：（經傳譯員）未講之前，可唔可以講呢啲覆核有冇係就於外國嘅做法睇過？

8 黃女士：（經傳譯員）我哋睇番 15 段，「工作小組就話佢哋有睇過外國嘅做法，即  
9 係有關於喺巴士上面要求安裝同埋要求乘客配戴安全帶。喺一啲城製同埋跨境  
10 嘅服務裏面，有啲地方譬如英國、美國同埋荷蘭，就係所有嘅乘客位都一定要  
11 提供安全帶。但係一啲其他即係英國、荷蘭同埋澳洲嘅維多利亞，就話一定要  
12 配戴安全帶。但係喺城市裏面嘅一啲嘅巴士，就係容許企位。

13 所以工作小組就係覆核過有關於要求乘客一定要配戴安全帶。睇番呢一啲外  
14 國地方個運輸當局，其實呢啲城市嘅巴士路線都係比較短，路程同埋時間都  
15 係比較短嘅。」跟住睇番...

16 主席：（經傳譯員）係 415 頁，附件 B，你可以見到唔同嘅國家，有一個國家要求城  
17 市內嘅巴士或者容許企位嘅巴士種類係要求乘客配戴安全帶嘅。

18 黃女士：（經傳譯員）未講建議之前，我就想睇番覆核外國做法，佢哋嘅結論就係話  
19 如果可以乘客企的話，硬性規定配戴安全帶係冇用嘅。因為突然煞車、停車，  
20 就會引致企喺度嘅乘客受傷。而且一啲市內巴士，一般嚟講路程都係比較短，  
21 車速可以接受，所以就唔及跨境、高速公路咁危險。因為跨境同埋高速公路就  
22 可能撞車速度會超過每小時 75 公里。

23 所以想請你講一下，市內巴士用安全帶有冇用？

24 主席：（經傳譯員）或者未叫佢答一個咁一般嘅問題之前，就想講下第三個成因，係  
25 第 15 段有提到嘅，就係話即係唔似人哋預期話市內巴士車速比較慢，而且距離  
26 時間都比較短，呢個都係有關。因為即係乘客上咗車仲要戴安全帶，喺咁短嘅  
27 路程，係咪真係有咁樣嘅價值？係咪真係值得做？你有冇任何意見？

28 白令嘉先生：（經傳譯員）有嘅。從警方同埋交通安全角度嚟講，警方相信安全帶可  
29 以救到你一命。睇番運輸署嘅網頁，就話配戴安全帶可以減低死亡或者嚴重受  
30 傷機會一半。安全帶減低--即係喺車速比較慢嘅情況之下，發生意外都好有效  
31 嘅。

32 如果喺道路安全角度嚟睇，我哋會鼓勵儘量使用安全帶。我哋亦都想講小巴  
33 都有安全帶。

34 主席：（經傳譯員）我哋聽咗證供，就係話其實小巴係同專營巴士係唔同類型。一般  
35 嚟講，即係如果想快啲去到終點嘅，就會係坐小巴嘅。冇乜所謂嘅，想到站嘅

1 時候都仲生存嘅，就會搭專營巴士嘅。你知唔知道因為乜嘢原因，所以硬性要  
2 求小巴要戴安全帶？

3 白令嘉先生：（經傳譯員）唔知。

4 黃女士：（經傳譯員）我未講另外一樣嘢之前，即係有關於呢一個小巴嘅情況，其實  
5 喺文件裏面，審計署都有講過小巴乘客戴安全帶嘅事。

6 主席：（經傳譯員）未講之前，頭先你就係話全世界都承認安全帶可以拯救生命。但  
7 係喺附件 B 裏面，英國、澳洲、加拿大、新加坡、荷蘭，佢哋好似仲安全，但  
8 係都唔認為市內巴士係需要加裝安全帶。

9 喺咁嘅背景底下，對於專營巴士強制要提供安全帶，如果真係強制要加裝安  
10 全帶，對於話強制乘客配戴安全帶，同埋一個執法方面，你有冇任何嘅意見？

11 白令嘉先生：（經傳譯員）我覺得乘客應該係要有選擇，當然呢個選擇都係要確保乘  
12 客係儘量安全。如果有加裝安全帶，當然就連選擇都有。有關於執法方面，個  
13 人經驗嚟睇，大部分人都唔會戴安全帶，即係佢哋坐小巴嘅時候。可以預計專  
14 營巴士情況都會係一樣，即係都係原因一樣，因為唔方便，同埋車程比較短。

15 所以執法係一個問題，我認為警方係好難定期可以真係有效率咁執到法，目  
16 前有咁樣嘅要求嘅，對於專營巴士。

17 主席：（經傳譯員）但係小巴有。

18 白令嘉先生：（經傳譯員）係，小巴有。

19 主席：（經傳譯員）但係對於小巴執法方面，容唔容易？

20 白令嘉先生：（經傳譯員）都難㗎，其實係久唔久先會執法，而唔係定期，係要當警  
21 務人員覺得要因為交通安全執法嘅時候，先至會執法。其實對於交通安全有幾  
22 個方面嘅，宣傳同埋不時執法。

23 主席：（經傳譯員）係，你係咪繼續？

24 白令嘉先生：（經傳譯員）我想補充，我希望公眾人士唔會因為怕犯法先至遵守法  
25 律。

26 主席：（經傳譯員）其實都要好長嘅時間先說服到乘客喺私家車上面配戴安全帶。

27 白令嘉先生：（經傳譯員）係，正如我之前所講，以我哋嘅角度嚟睇，其實乘客有選  
28 擇，等佢哋改善交通安全係好重要嘅，呢個係一個個人選擇㗎。

29 歐陽先生：（經傳譯員）我想好快問一問，有關於安全帶。即係有關於小巴嘅情況，  
30 你覺得專營巴士上面執法會幾成功？

31 白令嘉先生：（經傳譯員）我有有關嘅資料，不過我希望公眾人士係知道係對佢哋有

1 利，所以守法，而唔係話因為怕畀人告，所以守法。

2 主席：（經傳譯員）但係正如你先前所講，好多人小巴上面都唔戴安全帶而執法係困  
3 難嘅。我哋都明白嘅，你係咪認為巴士都會有咁嘅情況？

4 白令嘉先生：（經傳譯員）係。

5 黃女士：（經傳譯員）我想先講一講再小休，一般嚟講，你都有提過安全帶係可以保  
6 命。我就想講番有關於呢個成本效益分析方面，警方有冇做過任何實證嘅分  
7 析，就係話城市內巴士有企位嗰個嘅準確性？

8 主席：（經傳譯員）我唔明你問咩嘢。

9 黃女士：（經傳譯員）有冇做過分析，就係話巴士有企位，乘客係咪因為冇安全帶而  
10 受傷，你有冇做過任何分析比較即係嗰五十幾個百分點，乘客因為失去平衡而  
11 受傷，係咪因為冇安全帶？

12 主席：（經傳譯員）企喺度嘅人係戴唔到安全帶，因為都有提供。

13 黃女士：（經傳譯員）係呀，喺呢方面，你有冇任何統計數字？

14 白令嘉先生：（經傳譯員）冇。

15 黃女士：（經傳譯員）我而家都知道咩嘢時間。

16 主席：（經傳譯員）其實真正嘅問題，一個比較有用嘅問題，你有冇任何統計數字，  
17 就係巴士坐位嘅乘客冇戴安全帶因而受傷有冇統計？因為根據巴士公司所講，  
18 就話嗰個數字係非常之低，得 1% 或者 2%，你有冇咁樣嘅資料？

19 白令嘉先生：（經傳譯員）我唔知有咁樣嘅統計，不過我可以再搵下。

20 主席：（經傳譯員）但係好明顯，如果係坐喺一啲冇遮擋嘅位，被拋出車外，跟住就  
21 撞到硬物，就引致死亡或者嚴重受傷，呢個其實亦都可以喺你哋嘅範本裏面，  
22 就話有安全帶對佢哋有利但係冇戴到，你哋有冇考慮過，從呢個方面去分析？

23 白令嘉先生：（經傳譯員）我哋會咁做。

24 主席：（經傳譯員）唔該。

25 黃女士：（經傳譯員）唔該晒，白令嘉先生。

26 我而家想睇一睇建議，喺第 16 段，即係運輸署嘅文件 409 頁。工作小組得  
27 出以下嘅建議，(a) 就係所有新買嘅巴士所有座位都要提供安全帶；(b) 取決於  
28 一啲技術、運作，同埋財務可行性嘅評估，就係話上層座位某啲特定嘅路線，  
29 即係一啲長途嘅路線係要行高速公路比較少巴士站，就一定要有。

30 但係運輸署就要求巴士營運商就喺呢一方面同巴士製造商再進一步研究一下  
31 係咪技術上可行，即係所有新嘅巴士就會有安全帶。但係現有巴士只會係喺考

1 慮過財務可行性之後先至會加裝，而且只係喺某一啲嘅座位上層，某啲路線，  
2 譬如長途路線比較少啲巴士站嘅，或者會駛經高速公路嘅，先至會加裝安全  
3 帶。對於呢一個建議，你有冇任何意見？

4 白令嘉先生：（經傳譯員）呢個建議係正面嘅，我正所講從安全角度睇，我哋希望儘  
5 量廣泛就使用安全帶。呢個建議係一個正確方向行嘅一步。

6 主席：（經傳譯員）黃小姐，呢個時候方唔方便？

7 黃女士：Yes. Thank you.

8 主席：（經傳譯員）我哋今日朝頭早而家小休二十分鐘，二十分鐘後我哋重新開會。

9

10 上午 11 時 33 分聆訊押後

11

12 上午 11 時 53 分恢復聆訊

13 出席人士如前。

14

15 主席：（經傳譯員）黃律師，請繼續。

16 黃女士：（經傳譯員）講番關於安全帶，想請你睇一睇警方寫畀委員會，日期係 18  
17 年 5 月 7 號嘅嗰封信，喺雜項文件裏面，124-1。我哋睇番就係一橫二個頁，頂  
18 部，就係第三段嘅乸三，就話「大部分嘅」--124-2 頂部，第三段嘅乸三行，  
19 見唔見到？呢度就話「大部分專營巴士冇安全帶，同埋站立乘客亦都可能引致乘  
20 客受傷，同埋就係--所以係構成一個要通報嘅議案。」咁想睇番，係你小休之  
21 前嗰個嘅答--正如你小休之前所講，安全帶好重要？

22 白令嘉先生：（經傳譯員）係。

23 黃女士：（經傳譯員）咁講番另外一個範圍，係非法泊車。我哋聽到有啲專營巴士公  
24 司就話，就於非法泊車執法，尤其喺巴士站，執法係冇力嘅，咁我就想請你睇番  
25 一位鍾先生，William，佢係新巴嘅，文件頁數係 731 頁，TSCP 呢份文件夾。

26 主席：（經傳譯員）係邊一日？

27 黃女士：（經傳譯員）係第四日。

28 主席：Day 4 in the Augustinian calendar?

29 黃女士：Yes.

1 主席：（經傳譯員）咁係邊一個月？

2 黃女士：（經傳譯員）咁就係呢一個嘅 18 年 5 月，係喺 TSCP 文件夾 2A。

3 主席： Thank you.

4 黃女士：（經傳譯員）請你睇番頂部，係一位鍾生，William Chung 佢作證嘅部  
5 分，搵到未？

6 白令嘉先生：（Nodded head）.

7 黃女士：（經傳譯員）呢位鍾生就話「喺好多巴士站係有非法泊車，呢啲車係阻住巴  
8 士，即係話巴士唔可以泊--行到接近呢一個嘅行人路邊先至可以上落客。」

9 第十六行，當時呢一個嘅鄧樂勤律師問「係邊方面？」鍾生就話「如果有非  
10 法泊車，令到巴士經過嘅時候，嗰個道路嘅係寬度會減少，因為巴士比較龐大，  
11 所以就可能會有問題。如果乘客係唔可以喺行人路邊上落嘅話，就會引致到佢哋  
12 可能會畀車撞，或者跌倒。」喺執法方面係咪有效，喺二十三行，喺二十三行裏  
13 面就講「公司有冇嘗試去解決問題？」鍾生就話「我哋通知運輸署有關於非法泊  
14 車黑點，希望喺呢啲路段裏面會有廿四小時嘅禁止區，亦都通知咗警方要佢哋執  
15 法。」律師就話「有冇解決問題？」鍾生話「有乜。」主席亦都講「之後有冇任  
16 何行動？」鍾生話「警方會採取行動，咁但係警方一轉背，又出現非法泊車。譬  
17 如話喺怡和街，銅鑼灣近住崇光嗰度，呢一個問題成日出現。」

18 我哋亦都聽到公會講，話用咗好長嘅時間先至可以同警方溝通關於非法泊車  
19 嘅問題。所以首先我想問，非法泊車，警方係咪一直知道呢個問題？

20 主席：（經傳譯員）尤其就係巴士站嘅非法泊車？

21 黃女士：（經傳譯員）係。

22 白令嘉先生：（經傳譯員）係，警方係知道有咁嘅問題。响 2017 年，我哋總共就進  
23 行過四千五百一十次嘅檢控，我哋係告咗咁啲咁啲巴士站停車或者泊車嘅人。  
24 係，或者可唔可以請你再講講你嘅問題？

25 主席：（經傳譯員）呢啲係咪定額罰款嘅？

26 白令嘉先生：（經傳譯員）我哋個呢個所謂編號 570 嘅罰款行動。

27 主席：（經傳譯員）幾多錢，罰，320 釐，2017 年？

28 白令嘉先生：（經傳譯員）\$450。

29 主席：（經傳譯員）而家\$450？

30 白令嘉先生： Yes.

31 主席：（經傳譯員）當時呢？

1 白令嘉先生：（經傳譯員）當時都好似係。所以我哋知道係有咁樣嘅非法泊車嘅問  
2 題，同埋咁呢個問題引起啲人要响其他地方非法停車。

3 主席：（經傳譯員）有冇任何因為增加罰款而加強個檢控？

4 白令嘉先生：（經傳譯員）個罰款好多年都有改，咁呢個當然就比起以前個阻嚇性  
5 係低咗。

6 主席：（經傳譯員）警方嘅睇法就話，要追上通脹，320 釐嘅罰款應該係增加到 800  
7 釐左右，當時係咁講，我有冇記錯？

8 白令嘉先生： It is, sir, yes.

9 主席：（經傳譯員）當時政府所同意就係罰款係 450 釐？

10 白令嘉先生：（經傳譯員）係。

11 主席：（經傳譯員）黃小姐。

12 黃女士：（經傳譯員）我哋聽到工會嘅人士係投訴，我想你請睇一啲個紀錄嘅摘  
13 要，佢哋投訴話警方冇有力咁去執法，針對响巴士公司非法泊車嘅車輛執法，咁  
14 呢個係一個持續嘅問題。佢有提過，警方唔夠人手，或者係調派做執法嘅，針對  
15 呢啲非法泊車車輛嘅人手係不足。佢哋亦都有講，自從 2017 年，雖然警方嘅數  
16 字就顯示佢哋執法係加強咗力度，佢就見唔到一啲顯著嘅改善，關於呢一個即係  
17 話未能夠——即係或者執法不力嘅呢個問題，你有咩嘢回應，對於呢啲咁嘅睇  
18 法？

19 白令嘉先生：（經傳譯員）我哋盡力係執法，呢個係我哋會做。採取執法行動，即係  
20 响巴士站執法當然係重要，但係未必係等於我哋當時任何一段時間嘅最高優先次  
21 序，譬如話公眾可能投訴，好多地方非法泊車，引致阻塞，引起交通嘅問題塞住  
22 咗，咁我哋當然係會增加我哋針對非法泊車嘅執法行動，或者係車輛引致阻塞嘅  
23 罪行，我記得舊年我哋就增加咗大概係百分之四十，根據我而家記得。咁前線嘅  
24 人員收到啲投訴，就大部——有百分之三十係同啲車輛引起阻塞，或者係非  
25 法泊車有關嘅，所以我覺得警方係已經盡力嚟到係採取行動，針對引起阻塞或者  
26 係非法泊車嘅罪行。或者我想請邱女士都可以補充幾句。

27 主席：（經傳譯員）係，請你講，邱女士。

28 邱倩雯女士：除咗喺加強執法方面，咁其實我哋喺啲個公眾教育嘅度，我哋都做咗啲  
29 嘢。喺 2018 年，我哋亦都喺警訊節目嘅度，特別提到就係關於係喺巴士站非法  
30 停泊嘅問題，咁希望公眾係有留意到呢個事情。

31 主席：（經傳譯員）唔該晒。

32 黃女士：（經傳譯員）唔該晒。我哋見到最近一啲新聞報告，警方今年自從 8 月 1 號  
33 進行咗開始咗個六個月嘅執法行動，特別係針對啲交通阻塞嘅黑點，咁呢個亦

1 都包括响受限制區域嘅上落客、上落貨，咁私家車就係响巴士站或者小巴士站或者  
2 的士站上落客，或者係非法進入個黃格，或者係唔適當地進行調頭轉彎。咁為  
3 咗加強執法，呢五種嘅罪行而家係會涉及罰款係 400 釐，如果喺禁區上落乘  
4 客，就個罰款就係 560 釐。我想問，關於呢個--呢啲黑點，警察係點樣揀呢啲  
5 黑點嘅？

6 白令嘉先生：（經傳譯員）警方係透過我哋個個案管理系統，係有能力辨識究竟邊  
7 地方係有引致好多嘅交通方面嘅投訴，咁呢個係一個因素我哋可以睇嘅；另一個  
8 因素就係，直接向警署--公眾直接向警署投訴，一係打電話，一係寫信收到嘅  
9 投訴。所以响當區，個個指揮官係的確係有辦法知道，邊咁地方係擠塞黑點，咁  
10 亦都可以同總區嘅管理指揮嘅單位係分享有關資訊。

11 黃女士：（經傳譯員）咁根據你個講法，呢啲投訴有冇部分係從個工會或者係專營  
12 巴士公司度提出？

13 白令嘉先生：（經傳譯員）我哋有個安排，嚟到同佢哋啲工會同埋專營巴士公司嚟  
14 到聯絡，就算唔係全部，都有大部分都係基於--我係講緊係公眾嘅投訴，公眾  
15 向警方提出嘅投訴，同埋有部份--再加埋有部份就係巴士公司提出，亦都有啲  
16 工會提出嘅投訴。

17 黃女士：（經傳譯員）你當時講呢個運動，執法行動係會試驗性質，咁跟住之後九龍  
18 東、新界北亦都有一個試驗計劃，從舊年 12 月到今年 1 月就進行嘅，咁佢話初  
19 步嚟講，似乎就效果你哋滿意嘅，咁有五百四十張啲罰款單係發咗出嚟。一般  
20 嚟講，你哋會响邊度裝呢啲咁嘅鏡頭？

21 白令嘉先生：（經傳譯員）呢個試驗計劃，舊年 12 月、今年 1 月進行嘅，咁我哋就  
22 會叫我哋警方嘅同事就用一個手提嘅鏡頭嚟到執法，就唔係固定鏡頭。

23 主席：（經傳譯員）呢個方法嚟到執法，執行呢個交通法例，係咪貴㗎？係咪好貴，  
24 或者人力需要好多？

25 白令嘉先生：（經傳譯員）我哋希望減少呢方面依賴人力嘅即係情況，响試驗計劃，  
26 主要話啲行車，即係車輛嘅罪行，譬如話禁區上落客，一般嚟講，要執法呢一  
27 類嘅罪行，要針對呢啲罪行執法，個個警務人員係要截停架車，當場截停架車，  
28 或者亦都有啲情況個車駛走咗，所以我哋就要根據一個--或者之前要整定一個  
29 路障，或者有人係要揸車跟住架車，跟住截停架車，因為有呢樣咁嘅要求，我哋  
30 需要多啲人手，做咁樣嘅執法行動係需要更多人手。呢個咁樣嘅試驗計劃就係容  
31 許我哋警務人員就用一個錄影嘅設備，另外一方面就去寫低個筆記，佢見到啲咩  
32 嘢，嚟到採取執法行動，又唔需要截停架車。咁所以截停車輛嘅人手，即係一係  
33 就警務人員，一係就坐電單車截停佢，或者係用路障，就有再需要做。所以其實  
34 我哋想增加個執法行動嘅效率。

35 主席：（經傳譯員）有冇諗過淨係用鏡頭嚟到錄低，咁就唔需要個個人--警方人員嚟  
36 到係即係揸電單車追佢，譬如話你可以影到佢個車牌，咁你就請--叫個車

- 1 主嚟到係--你就搵到個登記車主？
- 2 白令嘉先生：（經傳譯員）我哋試驗緊。
- 3 主席：（經傳譯員）我意思即係唔需要人做呢樣嘢。
- 4 白令嘉先生： I see.
- 5 主席：（經傳譯員）唔需要錄影嘅，自動嘅。
- 6 白令嘉先生：（經傳譯員）呢個喺我哋長遠啲會再諗。
- 7 主席：（經傳譯員）其實倫敦係廣泛使用緊，係咪呀？
- 8 白令嘉先生：（經傳譯員）係。
- 9 主席：（經傳譯員）其他地方都係喎，新加坡，係咪？
- 10 白令嘉先生：（經傳譯員）係。
- 11 主席：（經傳譯員）咁點解香港唔用？
- 12 白令嘉先生：（經傳譯員）我會話呢個係一個政策問題，而家我哋係處理緊呢個政策
- 13 問題。
- 14 主席：（經傳譯員）關唔關撥款嘅問題？
- 15 白令嘉先生：（經傳譯員）我諗同撥款冇關係，呢個係關於個政策嘅支持。
- 16 主席：（經傳譯員）可唔可以講番第一個問題？用警察，即係個人，警務人員嚟到係
- 17 執法，即係違反--即係針對交通事項執法，係咪好貴？係，係，係，需要費用
- 18 好高？係，即係相對於科技？
- 19 白令嘉先生：（經傳譯員）係。
- 20 黃女士：（經傳譯員）有冇諗過裝一啲閉路電視，或者一啲鏡頭响個巴士站，或者
- 21 附近裝鏡頭？
- 22 白令嘉先生：（經傳譯員）我想請邱女士答呢個問題。
- 23 主席：（經傳譯員）好，總警司，邱女士。
- 24 邱倩雯女士：利用 CCTC 喺個巴士站做個執法係有--而家係有一個嘅試驗計劃，
- 25 但係呢個係政府嘅 Development Bureau，呢個係發展局同埋運房局嘅一個計
- 26 劃嚟。而家就係由發展局嘅起動九龍東，Energising KE Office，咁樣就啟
- 27 動一個試驗計劃，proof of concept 嘅 trial，咁樣就係喺九龍東嘅地方，
- 28 就係會 install 一啲嘅固定嘅攝影機，咁第一個嘅計劃就係影一啲即係行車嘅
- 29 一啲嘅交通嘅範例；第二個個部分就會係個試驗計劃就會係用喺一啲嘅停車，

1 即係違例泊車嘅交通違例嗰度，咁呢個計劃而家係進行緊。其實啱啱正正今年嘅  
2 8 月份，就會係出個投標，咁希望嚟未來嘅大概二十四個月裏面，會睇下點樣利  
3 用呢個科技，可以嚟呢個交通執法嗰度代替人手，咁樣當呢個技術係成熟嘅話，  
4 呢個就會應用嚟運房局嘅策動之下，就會係睇下嚟而家警方係點樣可以利用到呢  
5 啲試驗計劃嘅成果，而做到代替人手去做呢個交通執法。

6 主席：（經傳譯員）呢個係成熟嘅技術，亦都廣泛嚟大城市應用，冇一啲唔成熟嘅地  
7 方㗎。

8 邱倩雯女士：而家係校緊個電腦，點樣利用一個叫做 video analytic 嘅技術去影  
9 一部車，點樣為之停泊嚟一個地方，而造成一個係違例停泊嘅即係一個  
10 offence。另外我想補充就係，而家嚟違例停泊嗰個法例上面，我哋係必須要係  
11 當時當地將嗰個告票交界司機，或者係擺嚟嗰個即係車頭嘅玻璃嗰度。如果係離  
12 開咗，即係如果係用一個類似電子告票咁樣，或者係一個閉路電視影到嘅影像，  
13 然後發告票，嚟現時嘅法例，係唔可以做到。

14 主席：（經傳譯員）即係唔可以將--用呢一個嘅係相機影咗嗰個車牌，然後將個告  
15 票寄去地址？

16 邱倩雯女士：如果係違例告票--違例停泊，係唔可以，但係 for 一啲行車嘅交通嘅  
17 犯法係可以。

18 主席：（經傳譯員）咁非法泊車要點，就係擺嚟架車嗰度，將個告票？

19 邱倩雯女士：可以擺嚟車頭嗰度，或者係畀司機。

20 主席：（經傳譯員）咁要改變個囉喎，唔係咩？要追上技術嘅改善咁嘛。

21 邱倩雯女士：我哋知道運房局已經嚟呢個修改法例嗰度，已經開始做緊啲嘢。

22 主席：（經傳譯員）改例法要刪除係容易好多個喎。黃律師，請繼續。

23 黃女士：（經傳譯員）呢個概念計劃，可唔可以講係幾時有呢個意念，即係係運房局  
24 去發展呢個技術，係幾時嘅事？係發展局。

25 邱倩雯女士：警方係嚟 2017 年嘅 4 月，就由發展局嗰邊起動九龍東嗰個辦公室，就  
26 係邀請警察去參與，就畀意見。主要我哋嘅意見就係講畀個承辦商，個合約商知  
27 道，點為之犯咗一個交通嘅法例。

28 黃女士：（經傳譯員）有冇嗰次會面嘅會議紀錄，即係有關於發展呢個計劃，同發展  
29 局一齊做？

30 邱倩雯女士：我哋應該可能會有啲材料，但我要返去睇一睇。

31 黃女士：（經傳譯員）如果搵到，會唔會樂意提供？

32 邱倩雯女士：可以。

1 黃女士：（經傳譯員）有關於呢一點，以我理解，警方一直用自動車牌認證嘅系統，  
2 由 2015 年開始已經使用呢個 ANPR 呢個系統？

3 邱倩雯女士：我唔係好記得個年份，但係我哋而家係有用緊。

4 黃女士：（經傳譯員）喺立法會文件裏面，最近嘅一份有講，係保安事務委員會，有  
5 關於係呢一個 18 年 4 月，有關於呢一個嘅行車罪行執法，咁係保安局、警方同  
6 埋運房局，咁就係喺保安事務委員會裏面傾過，有關於行車罪行嘅執法。

7 主席：（經傳譯員）有冇號碼㗎？

8 黃女士：（經傳譯員）冇呀，呢個係新加嘅，今朝早加嘅，主席。我哋可以見到喺第  
9 二段，「背景」嗰度，「警方係一直有執行佢哋嘅工作，就係確保道路安全，其  
10 中一個就係要確保道路安全，同埋減少交通意外，呢個係佢哋嘅行動首先任務㗎  
11 㗎，咁佢哋亦都採取多方面嘅工作，去促進交通安全，同埋打擊一啲嘅行車罪  
12 行，同埋仲有宣傳、教育，要公眾同埋駕駛者遵守法例。」

13 跟住第七段，就係有關於係執法，行車罪行嘅執法使用技術，呢度話「目前  
14 就係有一百九十五個紅燈嘅攝影機，另外有二十四個快相機，咁就係一個嘅係一  
15 百三十個嘅位置裏面嘅，可以令到警方收集證據，亦知道係邊架嘅汽車涉事，同  
16 埋唔需要截停架車，都可以拘控嗰個--都可以就係控告有關嘅人士。咁 2015 年  
17 開始已經使用呢一個嘅自動車牌識別系統㗎喇，咁可以幫助到警方執法，包括埋  
18 汽車行車證過期，咁同埋係冇駕駛執照情況底下行車等等。」

19 咁有關呢個自動車牌識別系統，似乎呢個系統係來自倫敦嘅，係嘛？

20 白令嘉先生：（經傳譯員）或者可以我幫手答。

21 黃女士：Yes, thank you.

22 白令嘉先生：（經傳譯員）喺使用自動識別車牌系統方面，係有做過--喺 2013 年嘅  
23 時候，進行試行，咁係嗰個範圍有限，係喺路邊安裝一架攝影機，就同運輸署嘅  
24 資料聯繫，資料就係有關於一啲同交通罪行有關嘅拘捕令。跟住就會喺路邊路障  
25 截停佢，或者用電單車跟住呢架車，去拘控呢個涉事嘅人士，所以係喺有限範圍  
26 下試行。而家我哋採取咗措施，擴大自動車牌識別系統嘅使用範圍，亦都擴大可  
27 以聯繫到數據庫嘅一啲罪行。我哋目前搵緊一啲設備，可以擺喺警車入面，喺公  
28 路巡邏，可以聯繫一啲犯罪人士、被通緝車輛，咁如果架車係登記係一啲未執行  
29 嘅拘捕交通罪行拘捕令嘅汽車，亦都可以利用佢搵到。呢個系統，我哋想用嘅範  
30 圍就係呢啲。第七段裏面所講，係有確實咁講到實際情況。

31 主席：（經傳譯員）即係話係只限於已經係被通緝嘅人士？

32 白令嘉先生：（經傳譯員）冇錯。

33 主席：（經傳譯員）唔係用嚟捉一啲犯咗行車嘅罪行嘅人？

- 1 白令嘉先生： That's right, sir.
- 2 主席：（經傳譯員）咁有冇原因點解唔係咁樣用？
- 3 白令嘉先生：（經傳譯員）其實仲有另外一個系統，係警車使用嘅，可以記錄低，利  
4 用錄影記錄低喺馬路上面犯交通罪行嘅人士，不過都係需要警務人員去操作，唔  
5 係自動系統㗎。正如邱女士所講，我哋將來係希望可以用呢一個數據分析。
- 6 主席：（經傳譯員）咁使用好似倫敦裏面嗰啲黃格裏面嘅系統？
- 7 白令嘉先生：（經傳譯員）呢個都係同數據分析有關。
- 8 主席： Yes.
- 9 白令嘉先生：（經傳譯員）我哋目前有呢啲技術。
- 10 主席：（經傳譯員）但係倫敦嗰個已經十年前個囉喎？
- 11 白令嘉先生： I know, sir, yes.
- 12 主席：（經傳譯員）佢哋好成功，成功到係因為嗰人犯法，嗰個罰款數額係去到幾百  
13 萬英鎊㗎。
- 14 白令嘉先生：（經傳譯員）係，但係如果安裝呢啲設備，唔係淨係警方嘅事宜，其實  
15 就係政策方面嘅事宜㗎。
- 16 主席：（經傳譯員）咁當然仲有呢一個私人嘅問題。
- 17 白令嘉先生：（經傳譯員）係。
- 18 主席：（經傳譯員）呢個係權衡即係犯法呢一方面嘅考慮喎？
- 19 白令嘉先生：（經傳譯員）冇錯。
- 20 邱倩雯女士：（經傳譯員）或者我再補充下黃格犯罪？（證人直接用本地話說）喺  
21 2015 年 9 月，運房局亦都係開始去研究喺嗰個黃格仔嗰個 yellow box 嘅  
22 enforcement camera system，但係去到 2016 年嘅 4 月，因為有呢個財務  
23 嘅支持，所以嗰個研究計劃亦都停止㗎。
- 24 主席：（經傳譯員）邊個負責係支付？
- 25 邱倩雯女士：運房局嗰度係提出唔到有一個 funding support，嗰個財務嘅支持。
- 26 主席：（經傳譯員）呢個係總警司喺呢一個 18 年 8 月嗰封信裏，Cadman 先生已經  
27 提到㗎㗎，係？
- 28 邱倩雯女士：冇錯。
- 29 主席：（經傳譯員）可唔可以喺個螢幕上面打番出嚟？

1 黃女士：（經傳譯員）呢個係雜項文件裏面第 124-538 頁。

2 主席：（經傳譯員）再畀一次個頁數。

3 黃女士：（經傳譯員）就係 124-538。頭先邱女士提及嗰段就係第四段，就係 124-  
4 539 頁。或者我讀出嚟，以作紀錄。

5 主席：（經傳譯員）係。

6 黃女士：（經傳譯員）第四段，你就話「有關於係黃格執法，喺 2015 年 9 月嘅時  
7 候，運房局就係同警方開始研究，睇下可唔可以係技術上、財務上同埋法律上可  
8 行，去用呢個黃格執法攝影系統。自此之後，警方就係嘗試搵一個適合嘅產品，  
9 可以適用喺香港。但喺 2016 年 4 月嘅時候，呢個研究就終止咗嘞，因為係冇錢  
10 做顧問研究。雖然如此，但係嗰件事就係同其他一啲執法嘅攝影機，其實喺部門  
11 之間係有傾過。」呢度就話，呢件事其實都係積極考慮。有乜嘢係令到係終止？

12 主席：（經傳譯員）我哋知道，係冇財務支持咁嘛。其實有人話政府冇錢，其實係啲  
13 錢用喺邊度先至係問題？

14 邱倩雯女士：而家喺運房局嗰度，亦都同警方同埋運輸署，我哋有定期嘅會議，咁我  
15 哋亦都將整體上面嘅用科技點樣去執行呢個交通嘅犯法，我哋都係即係將好多嘅  
16 計劃都喺嗰度提出，咁亦都包括咗就係黃格嘅路口嘅執法。

17 主席：（經傳譯員）幾時會考慮重新進行計劃？

18 邱倩雯女士：我哋由 2018 年 2 月開始，我哋都有會議，我哋整體上面講，我哋叫  
19 e-enforcement，電子執法嗰個議題擺上去，大家去傾。

20 主席：（經傳譯員）電子執法，你嘅意思係話用電子方法嚟到係執行交通法例，係咪  
21 呀？

22 邱倩雯女士：冇錯，冇錯。

23 主席：（經傳譯員）你搵到啲方法，或者係點樣即係知道嗰個車牌，搵到個車主，就  
24 畀個電子告票，係咪咁嘅意思？

25 邱倩雯女士：簡單嚟講，可以係咁講。

26 主席：（經傳譯員）我哋要想咁做，考慮咗幾耐？

27 邱倩雯女士：如果講電子告票，其實由 2012 年已經開始提出嚟嘞。相信係而家我哋  
28 嘅會議亦都係集中配合政府一個智慧城市嘅一個概念，所以我哋喺交通執法嗰  
29 度，我哋都希望盡量用多啲科技。

30 主席：（經傳譯員）即係話用咗六年，而家都好似冇乜再進一步進展？

31 邱倩雯女士：而家係好主動積極咁樣做緊。

- 1 主席：（經傳譯員）智慧城市，係咪呀，你頭先講？
- 2 邱倩雯女士：我係講整體性，喺交通執法方面，我哋係配合政府嘅方向。
- 3 主席：（經傳譯員）黃律師。
- 4 黃女士：（經傳譯員）邱女士，頭先你講 2018 年 2 月，你有啲會議，關於個電子執  
5 法嘅討論，係咩嘢引發要咁樣開會，考慮用電子嚟到進行執法嘅工作？
- 6 邱倩雯女士：主要都係即係政府整體上面嗰個智慧城市嘅概念，所以我哋會有會議。
- 7 黃女士：（經傳譯員）呢個係咪大埔，即係 2018 年 2 月 10 號大埔意外之後發生？
- 8 邱倩雯女士：唔係。
- 9 黃女士：（經傳譯員）即係之前囉喎，即係個會係响意外之前開？
- 10 邱倩雯女士：我哋同運房局嘅會議唔係因為大埔嗰個意外。
- 11 主席：（經傳譯員）即係另外一樣嘢嚟，另一個問題係之前定之後，即係係咪因為呢  
12 件事發生就係問同之前之後唔同嘅。
- 13 邱倩雯女士：我相信會議嗰個籌備係早過 2 月份。
- 14 主席：（經傳譯員）唔該晒。
- 15 黃女士：（經傳譯員）你响嗰段，呢個涉及一個跨部門嘅一個場合，嗰個部門係有啲  
16 咩嘢部門？
- 17 邱倩雯女士：我哋有運房局、警方同埋運輸署。
- 18 黃女士：（經傳譯員）咁我理解有冇錯，呢個關於黃格嘅執法呢個措施已經係重新展  
19 開，因為你要處理個非法泊車？
- 20 邱倩雯女士：呢個就係其中一個部分，喺會議裏面，我哋整體上面都係即係針對一啲  
21 可以用科技代替人手嘅一啲交通違例。
- 22 黃女士：（經傳譯員）呢個自動車牌識別系統有冇討論？即係話呢個系統可以嚟到處  
23 理非法泊車嘅事項，有冇討論？
- 24 邱倩雯女士：我哋有特別係提到 ANPR。
- 25 黃女士：（經傳譯員）我哋見到有啲——聽過一啲建議，工會提出，巴士公司提出嘅，  
26 一啲立法會嗰啲文件都有啲建議就話點樣處理呢個非法泊車嘅情況。簡單嚟講，  
27 有五個建議，我想逐個問一問你，第一，我哋見過頭先鍾先生，William  
28 Chung 先生，即係新巴嘅，佢嘅答覆講，就可以設立一啲廿四小時禁區，你對  
29 於呢個嘅睇法，或者警方對呢個睇法係有咩嘢意見？

- 1 主席：（經傳譯員）廿四小時禁區，邊度設立禁區？係咩嘢--目的係咩嘢？
- 2 黃女士：（經傳譯員）我哋講嘅廿四小時禁區就話即係巴士站附近設立，嚟到係搵--
- 3 即係可以睇到邊啲車喺嗰度非法泊車，响巴士站附近泊車，呢個就係其中一個建
- 4 議。
- 5 主席：（經傳譯員）即係話除咗有巴士站，即係之前之後都應該係有禁區，係咪呀，
- 6 就？
- 7 黃女士：Yes.
- 8 主席：（經傳譯員）就唔准泊車，全日都唔准，係咪咁嘅意思？
- 9 黃女士：（經傳譯員）係。
- 10 主席：（經傳譯員）唔該。
- 11 黃女士：（經傳譯員）呢度睇--我哋而家响個螢幕度顯示出當時嘅講法，佢話「我哋
- 12 希望呢啲咁嘅路段係會係二十四小時禁區嚟嘅，我哋都通知咗警方就做執法工
- 13 作。」就响咁嘅背景，咁佢有個咁嘅建議，你哋嘅睇法係點？
- 14 邱倩雯女士：我哋相信，二十四小時嘅限制區係有幫助，但係需要去將嗰個區域嗰個
- 15 地段劃做一個限制區，就一定要係運輸署嗰個工作範疇，同埋佢嗰個配合。
- 16 黃女士：（經傳譯員）呢度有提過，佢哋都叫警方嚟到執法，有冇--你哋有冇任何紀
- 17 錄？記唔記得佢哋有冇向警方提過，話設立廿四小時--即係專營巴士公司有冇
- 18 向你哋提過，設立呢啲全日禁區？
- 19 邱倩雯女士：呢個喺我印象中，就有好明確咁樣係書面提出過，咁樣可能要返去再睇
- 20 睇。
- 21 黃女士：（經傳譯員）你有冇記唔記得，呢個問題有冇同運輸署開會嘅時候，有人提
- 22 過呢個課題出嚟？
- 23 邱倩雯女士：喺我哋同運輸署同埋一啲巴士公司代表嘅會議裏面，佢哋係有提出過一
- 24 啲非法泊車，令到即係阻礙咗巴士司機嘅運作，有提出過嘅。我哋收到呢啲嘅訊
- 25 息之後，我哋亦都有將呢啲訊息發放去唔同嘅警區，有關嘅警區，等佢哋可以去
- 26 繼續佢哋嘅執法嘅行動。
- 27 黃女士：（經傳譯員）第二個建議，就係話巴士站嗰個路牌，或者嗰個標示，即係話
- 28 標出嚟個巴士站係咁樣嘅，喺呢度唔准泊車，非法泊車嘅，我哋見過啲相片嘅，
- 29 其中一份係由九巴提出嘅文件，係有啲相片嘅，呢個係 12A，5174 頁，5173
- 30 頁、5174 頁，你可以見到有啲中文寫出嚟嘅字「嚴禁泊車」，响裏面嗰張相係
- 31 講。
- 32 邱倩雯女士：係，我之前有睇過，有見過呢啲咁樣嘅即係標誌喺度，道路標誌。事實

1 上，所有擺喺路邊嘅道路標誌都係需要運輸署去批准，咁我唔知道呢一個係即係  
2 巴士公司自己擺喺度，定係已經得到運輸署嘅批准。

3 黃女士：（經傳譯員）先唔好講嗰個得到批准個問題，你可唔可以話畀我聽，呢啲咁  
4 嘅牌，標示，擺响巴士站，可唔可以幫到你哋執法，或者可唔可以幫到公眾或者  
5 大家係處理非法泊車嘅問題，係咪有幫助嘅？

6 邱倩雯女士：我相信呢啲道路標誌有個提示性喺度，但係你話佢係咪真係可以禁止到  
7 有司機係停泊喺嗰度，我唔知道個成效會係點樣。

8 主席：（經傳譯員）係咪有啲人唔知㗎？或者係唔明白，佢哋唔可以响嗰個巴士站中  
9 間泊車，呢個認知度係咪一個問題㗎？定係唔係一個問題？

10 邱倩雯女士：我相信市民係知道巴士站係唔可以泊車，但係即係可能佢哋會覺得停一  
11 停係有所謂，呢個所以係其實需要多啲教育。

12 主席：（經傳譯員）個實際問題就係話，佢哋即係取巧，撞一撞運氣，咁所以需要執  
13 法？

14 邱倩雯女士：冇錯。

15 主席：（經傳譯員）等到佢哋覺得咁做係成本太高？

16 邱倩雯女士：贊成。

17 黃女士：（經傳譯員）第三個建議，就有啲畫雙黃線，响個巴士站範圍畫雙黃線。

18 主席：（經傳譯員）你意思係入嚟入口、出口？

19 黃女士：（經傳譯員）佢入嚟嗰部分，出口嗰部分，出去嗰部分都係畫埋黃線，呢個  
20 建議係你哋覺得點？

21 邱倩雯女士：呢個同之前嗰個意見都一樣，就係我哋相信係有用，即係禁止停車係有  
22 用，但係喺道路嘅設計同埋嗰個道路嘅標記，呢個都需要係運輸署嗰度去處理。

23 黃女士：（經傳譯員）有冇同運輸署提過，據你所知道，有冇同運輸署提過呢個做  
24 法？

25 邱倩雯女士：由交通總部，我哋個聯絡，我哋就有紀錄係話有特別提出過，但係我哋  
26 嘅每一個總區，我哋有自己嘅交通單位，交通單位同運輸署都會就住佢本地，即  
27 係 local，佢哋嘅道路標記，同埋道路畫線，佢哋會有多啲嘅商討。

28 主席：（經傳譯員）目前嘅做法，係咪喺進入巴士站同埋離開嗰個位有雙黃線，係咪  
29 目前嘅做法？

30 邱倩雯女士：通常都有。

31 主席：（經傳譯員）所以係關於執法，因為每人一個個人都知雙黃線咩嘢意思？

1 邱倩雯女士：係。

2 黃女士：（經傳譯員）第四個建議，就係使用技術，譬如話閉路電視、錄影，之前你  
3 都提過。第五個建議，就係考慮新加坡模式，即係話喺司機隔離位安裝攝影機，  
4 司機只需要喺見到有非法泊車情況揸個掣。

5 主席：（經傳譯員）喺邊度，喺巴士站？

6 黃女士：（經傳譯員）係。

7 主席：（經傳譯員）換言之，係希望嗰啲受阻礙嘅人士可以幫助到，呢個係咪咁？

8 黃女士：（經傳譯員）首先想問，你對於呢個建議有咩嘢意見？因為嗰啲投訴人嚟，  
9 佢哋車上都已經有攝影機，只係需要揸個掣，然後將影片交畀運輸署，個建議  
10 就係話，請佢哋幫助執法。對於呢個講法，你有咩嘢意見？

11 邱倩雯女士：分開兩個部分，如果係一啲行車嘅交通違例，我哋係可以--即係如果係  
12 有巴士公司嘅一啲嘅影片，亦都佢哋嘅司機係協助調查嘅話，我哋係可以搵番車  
13 主，搵番司機出嚟，進行呢個執法嘅。但係如果係一個泊車停泊嘅違例嘅話，咁  
14 呢個就頭先有提過，就係喺法例上面嘅限制，我哋係需要當時當地畀告票，咁所  
15 以要睇下嗰個違例嘅性質係乜嘢。

16 主席：（經傳譯員）想請你講一講，喺呢個法例，以你所講話，咁係一個泊車嘅罪  
17 行，架車就係一係擺喺個擋風玻璃，一係畀司機，你可唔可以話番畀我聽，係  
18 邊一條條例？或者你同事可以搵一搵。

19 邱倩雯女士：我有個法例就係 Cap 237，Cap 237，我而家睇緊係邊一行。

20 主席：（經傳譯員）叫咩嘢名，呢條條例？

21 邱倩雯女士：（經傳譯員）定額罰款，違反交通條例--違反交通罪行條例。

22 主席：（經傳譯員）唔該。正如我所講，可以之後搵番畀我哋。

23 邱倩雯女士：Yes.

24 主席：（經傳譯員）呢個妨礙咗有效執法。

25 邱倩雯女士：冇錯。

26 黃女士：（經傳譯員）邱女士，我哋而家講就係，就係關於呢個車長，襲擊車長。我  
27 哋聽到一啲嘅證供就係話，係有關於襲擊車長執法方面，就係投訴警方，話警方  
28 就有將呢啲嘅案件列為優先，咁我哋有個清單，就係列出咗一啲毆打車長嘅事  
29 件，係九巴嘅，咁就係呢一個開始嘅時候，就係 2015 年嘅 1 月至到 2018 年嘅  
30 7 月 2 號，KMB-1，212 頁。呢封信就來自九巴，列出咗係聲稱襲擊巴士車長  
31 嘅，就係呢一個 2015 年 1 月至到今日，即係至到 2018 年 7 月 26 號，就係話  
32 有五宗。佢哋提出其中一個事項，可以睇番個表，有四十一宗，喺呢四十一宗入

1 面，可以見到係好少最後係控告嘅啫，就係 162 同埋 164 號，喺 216 頁可以見  
2 到。大部分嘅個案都係和解或者口頭警告，或者有再係追究。我想問一問呢一方  
3 面，話警方似乎有將呢啲個案列為優先處理，即係關於襲擊車長嘅個案？

4 邱倩雯女士：我會請我交通總部嘅同事，同埋一陣間都會有刑事部嘅同事去作答。

5 李大偉先生：係，針對九巴向委員會提供啲一百八十八單案件，我哋收到之後，亦都  
6 聯絡咗九巴擷取呢啲資料。我哋成功咁喺一百八十八單裏面嘅案件裏面，可以搵  
7 到一百八十二單啲個案情，同埋個結果。喺呢一百八十二單案件裏面，總共就係  
8 有分類到一百三十一單係巴士司機喺工作期間，喺巴士上面畀乘客毆打，其中九  
9 十九單係我哋破案，喺九十九單破案裏面，即係我哋有拘捕到人士，係有八十三  
10 單係檢控上法庭，而四十七單係有被檢控。

11 主席：（經傳譯員）即係有再進一步行動嘞？

12 李大偉先生：同意，有任何進一步行動。

13 主席：（經傳譯員）喺八十三宗嘅控告裏面，有幾多單係定罪？

14 李大偉先生：喺啲八十三單檢控案件裏面，七十三單係成功檢控。

15 主席：（經傳譯員）有冇數字，譬如話係認罪、唔認罪嘅案件，即係最後係七十三宗  
16 係被定罪？

17 李大偉先生：七十五單成功檢控——成功定罪嘅案件裏面，就有唔同嘅法庭嘅判罰嘅，  
18 刑罰嘅。

19 主席：（經傳譯員）唔係，我問嘅問題係有幾多宗係認罪，有幾多宗係審訊之後被定  
20 罪？

21 李大偉先生：我哋有呢啲咁嘅數字。

22 主席：（經傳譯員）唔該。

23 黃女士：（經傳譯員）你答完未，李生？

24 李大偉先生：Yes.

25 黃女士：（經傳譯員）除咗襲擊數字上升...

26 主席：（經傳譯員）黃律師，等等，呢啲嘅資料有冇係白紙黑字嘅？九巴有冇呢個分  
27 析，即係話一百八十八宗跟住點點點，咁你似乎都係讀啲數字出嚟，有冇資料？

28 李大偉先生：我哋有呢方面嘅資料嘅。

29 主席：（經傳譯員）可唔可以提供呢一個書面嘅資料畀我哋？

30 李大偉先生：可以嘅。

1 主席：（經傳譯員）唔該。或者我打斷咗你，你想講話關於呢個懲罰方面，你係點樣  
2 分析？

3 李大偉先生：喺七十五單成功定罪嘅案件裏面，有十五宗分別係判入獄或者緩刑嘅判  
4 罰。

5 主席：（經傳譯員）有幾多宗就係真係入獄，而唔係緩刑？

6 李大偉先生：冇方--冇呢面嘅--呢方面就有呢個數字嘞。

7 主席：Thank you.

8 李大偉先生：另外簽保守行為，即係 bound over，有二十二宗；另外就係社會服務  
9 令，十六宗；罰款係十八宗。

10 主席：（經傳譯員）有冇罰款範圍，數字範圍，最高罰款，最低？

11 李大偉先生：冇。另外四宗就係受教導，教導所--感化令，sorry。

12 主席：（經傳譯員）咁你係有冇佢哋嗰個罪行？

13 李大偉先生：頭先我講嗰所有案件係主要係包含四種嘅個案，第一種係傷人，  
14 wounding...

15 主席：（經傳譯員）而家講緊嘅係關於一般定係定咗罪？

16 李大偉先生：概括，總共嘅。

17 主席：Yes, wounding...

18 李大偉先生：第二個控罪就係毆打，引致身體受傷；第三個控罪係普通毆打；而第四  
19 個就係公眾地方打交。

20 主席：（經傳譯員）傷人係咪第十九條嘅罪行？

21 李大偉先生：Section 17 同埋 19 都有。

22 主席：（經傳譯員）唔該。

23 黃女士：（經傳譯員）最後呢個嘞，公眾地方毆打，我哋聽過一啲工會嘅人講，話佢  
24 哋反對用呢一條，因為會係控告埋巴士車長，話佢哋公眾地方毆打，有兩個原  
25 因，一，因為佢哋係巴--佢哋就係呢一個巴士車長嚟㗎喇，佢哋要根據 230A 章  
26 係要確保安全；另外第二個就係，法例係要保護被打嘅人士吓嘛。對於呢一個投  
27 訴，即係話公眾地方毆打，你有咩意見？

28 主席：（經傳譯員）你可能講，如果唔係適當，你唔會咁樣告喇，我諗佢會咁樣答，  
29 係咪呀？

李大偉先生：因應巴士司機投訴畀乘客毆打嘅案件，係有唔同--好多時候都有唔同，每一宗案件都有唔同嘅案情同埋因素，咁巴士司機係有佢--喺法例 230A，係有法定權力，係佢嘅權力去點樣去處理一啲違規嘅乘客。咁如果係巴士司機毆打，就會係另外一種--就另外會係畀其他罪行會所保護嘅，即係頭先我所講嘅傷人，毆打之類嘅案件。

張天樂先生：方唔方便作啲補充，而家呢個時間？嗰，作少少補充，頭先大律師提到就係話，會唔會有啲案件裏面，即係巴士公司佢有個意見，就係警方就住巴士司機被毆打，受襲嘅案件，警方會唔會係有啲不同嘅處理方法，或者係對巴士司機受襲嘅案件，含有任何不重視嘅情況出現呢？喺呢度重申，就係我哋警方係處理每一宗案件，係不論受害人嘅身分、國籍、背景、職業等等，我哋都會係予以一視同仁咁樣去處理。係就住剛才交通總部嘅同事，佢講話關於九龍巴士公司，佢提供過一百八十八宗案件裏面，佢哋能夠搵到嘅數字，我哋比較過嗰個檢控，破案率等等，破案率、檢控率、定罪率等等，係相比較整體同類案件嘅破案率、檢控率、定罪率，嗰一百八十幾宗嘅案件嘅相關數字，係比相同嘅案件類別嘅整體數字，都係要高嘅，呢個係一個即係我哋搵到出嚟嘅一個數字嘅比較。所以喺個整體情況裏面，我哋見唔到有任何喺巴士司機受襲嘅案件裏面，係即係警方係有輕描淡寫嘅情況出現，所以呢個必須要重申就係，再重複一次，我哋警方係處理巴士司機受襲嘅案件，係採取一個一視同仁嘅一個態度，同埋認真去處理，處理--即係喺個調查過程係作出一個一視同仁嘅態度，如果個調查搵到出嚟嘅證據係充分，我哋會予以檢控。

咁檢控嗰個係採用邊一個條例，邊一個控罪去檢控，就要視乎嗰個案情。如果我哋有需要嘅話，當然係會向律政師索取--尋求法律意見。剛才大律師提到話喺公眾地方打交呢一個咁嘅情況係點樣去理解，我哋接報--即係警方接報去到場調查之後，我哋會因應唔同案件個案情，係決定嗰個案件嘅性質係屬於邊一樣。當然喺接報嘅時候，可能即係會各執一詞，即係雙方--即係牽涉--涉案嘅雙方會各執一詞，但係當我哋警方係經過詳盡嘅調查之後，我哋會係作一個評估，有一個結論，係決定係控以邊一方面，邊一個控罪，有機會係只係控告其中一方相關嘅控罪，如果係案情係的確係證實係顯示雙方都有打交嘅情況出現，咁我哋亦都會係控於適合嘅罪名。咁呢個亦都唔係單單係警方嘅決定嚟，亦都係一個案件上到法庭，有法庭嘅檢控官，檢控主任去做一個...

主席：（經傳譯員）唔好意思，我截斷你，我原本嘅建議，如果係有咁樣嘅--即係如果係咁樣控告，即係話咁嘅控告嘅罪名當然係你哋覺得係適當喇？

李大偉先生：同意。

主席：（經傳譯員）我哋而家過咗 1 點嘞，我哋而家就係午休，我哋兩點半再復會。

下午 1 時 06 分聆訊押後

- 1
- 2 下午 2 時 30 分恢復聆訊
- 3 出席人士如前。
- 4
- 5 主席：（經傳譯員）各位，午安。黃律師。
- 6 黃女士：（經傳譯員）邱女士，我哋未休會之前，就係睇緊法例第 237 章嘅，就係
- 7 講到嗰個定額罰款嗰方面，告票嗰度，就係畀呢一個車輛同埋司機嘅。Have
- 8 you been able to locate the section?
- 9 邱倩雯女士：我哋搵到喇。
- 10 黃女士：係咪第 15？
- 11 邱倩雯女士：係 section 15 嘅第 (2) 段。
- 12 黃女士：Subsection (2)？
- 13 邱倩雯女士：係。
- 14 黃女士：（經傳譯員）我就讀佢出嚟係以資紀錄，我應該都讀埋係第 (1) 款嘅，如果
- 15 呢一個嘅警務人員有合理嘅理由相信就係已經係有觸犯咗有關條例，佢可以就
- 16 係向呢一個車輛嘅司機或者係向嗰個嘅司機，就係要佢嚟到去遵守佢有關呢一
- 17 個違例嘅責任，呢個就係要畀一個定額罰款。
- 18 為咗第 (1) 款，呢一個嘅通知應該係一個定明嘅格式，就係要係面交係呢
- 19 一個掌管呢一個車輛嘅嗰個人士，但係就係要唔喺影響第 16 條或者係呢一條嗰
- 20 個嘅情況之下，即係唔會影響佢不能夠履行呢一條條款嗰個嘅要求。
- 21 呢個係咪關於要面交嘅嗰個條款呀？
- 22 邱倩雯女士：啱，冇錯。
- 23 黃女士：（經傳譯員）但係從呢一個嘅但書嗰度睇到，如果係唔能夠符合呢一條，就
- 24 唔可以違反第 15 (1) 條嘅。
- 25 邱倩雯女士：係，我睇到。我哋曾經就過就第 15 項，我哋都徵詢過律政司意見嘅，
- 26 但係嗰個意見我而家唔喺手上面，但係基本上個意思都係話需要係畀嗰個當時
- 27 當地嗰個司機，或者係我哋需要擺喺個車嗰度嘅。
- 28 主席：（經傳譯員）如果呢一——即係為講而講喇，如果嗰個嘅法律指示係合適，咁就
- 29 應該係刪除第 15 條第 (2) 款，係咪呀？
- 30 白令嘉先生：（經傳譯員）我從嗰個嘅草擬嗰個指示，就似乎唔係話係刪除，而係就

- 1 係去話畀我哋係--即係搖距咁發呢個嘅告票。
- 2 主席：（經傳譯員）即係其實同刪除呢一條一樣喇，嗰個結果？
- 3 白令嘉先生：（經傳譯員）係喇。
- 4 主席：（經傳譯員）即係一係就係好簡單咁樣擺支藍筆係劃咗呢度，又或者係要用一
- 5 支紅筆係加啲新嘅條款。
- 6 白令嘉先生：（經傳譯員）我哋會反映你嗰個評論嘅。
- 7 主席：（經傳譯員）我哋而家就係有一個嘅法例，就係三十五年咁--超過三十年咁久
- 8 㗎喇，係咪呀？
- 9 白令嘉先生：（經傳譯員）冇錯。
- 10 主席：（經傳譯員）而家無論係電腦或者科技都係進步咗好多，呢個法例寫嘅時候唔
- 11 係為咗今日嘅科技而寫嘅。
- 12 黃女士：（經傳譯員）李先生，喺休息之前，你就係提到，喺一百八十八個個案之
- 13 中，呢個就係九巴提畀你，有四十七宗嘅個案係冇檢控嘅，你可唔可以畀我哋
- 14 睇下一般係乜嘢原因係令到有檢控嘅呢？
- 15 李大偉先生：就住嗰四十七宗不能夠檢控個個案，有二十二宗係未能夠搵到嗰個受疑
- 16 人嘅，即係話係施襲者，另外十六宗就係受害人最終就係不追究個事件嘅，所
- 17 以就案件就終結咗，六宗係不夠證據，另外兩宗不夠證據係經過諮詢律政司意
- 18 見而係就完結嘅，另外一宗就係案件調查之中。
- 19 黃女士：（經傳譯員）李先生，其實我想問你嗰個問題，基於九巴嗰個證供，佢話佢
- 20 哋係比較喜歡用第 230A 章嘅，...
- 21 主席：（經傳譯員）未去講呢一度之前，講到嗰啲搵唔到行兇者嗰啲個案，如果大家
- 22 畀錢搭巴士，如果係用八達通嘅話，有冇幫助呢？因為呢啲可能會係包咗嗰啲
- 23 個人資料嘅，呢一啲會唔會幫到你搵到行兇者呢？
- 24 李大偉先生：喺尋找施襲者，如果係用透過八達通嘅，係一定有幫助嘅，對警察嘅調
- 25 查，但係由於好多時候使用八達通卡者未必係一個私人登記嘅八達通卡，所以
- 26 警方未能夠就跟進到佢嘅身分，當然如果係個個都用個人登記嘅八達通，係會
- 27 幫助到警方調查去搵到呢啲咁嘅施襲者嘅。
- 28 主席：（經傳譯員）唔該。
- 29 黃女士：（經傳譯員）好，跟進話用八達通呢個問題，我諗係有兩宗嘅個案，九巴公
- 30 司係提出投訴，就係話警方係有積極咁樣去收集嗰啲個人資料，即係用八達通
- 31 卡嗰啲，我想你睇睇一啲嘅文件，可唔可以睇下九巴 1A，297 頁？
- 32 我哋講番個背景，有兩宗嘅個案，唔好意思，睇一睇 218 頁先，同一沓文

1 件，218，1A 嗰個文件夾，第 218 頁，嗰度有提到五宗個案，搵唔搵到？3 同  
2 埋 4 號，個案 3 同埋 4，我哋睇下 218-1 嗰一頁，第 2 段，呢度就係話，呢度  
3 係被悉到，呢一封信係我哋委員會畀呢一個九巴嘅，係 6 月 27 號嘅，嗰個嘅回  
4 應就係話關乎第 3 同埋第 4 宗嘅個案，係提到有一個閉路電視嘅報告嘅，就係  
5 話喺第 1 個案裏面就係話到係警方方面有呢一個行兇者嗰個嘅八達通卡嗰個紀  
6 錄嘅，我哋就要求有呢一個閉路電視同埋八達通卡嗰個紀錄嘅印本，喺呢一度  
7 就係話九巴就喺 2018 年 8 月 9 號就係回覆呢一封信。

8 喺第 297 頁，你睇下嗰個大題目就係話回覆 2018 年 7 月 27 號嗰封信，  
9 第二段度話「關於第 3、第 4 宗嘅個案，嗰個嘅閉路電視嘅由我哋法律部門嗰個  
10 嘅意外調查同埋預防組畀嘅報告就係喺附件 A，就話呢一個嘅兩個被告人係認  
11 罪，所以係冇用到閉路電視嘅紀錄嘅。」

12 然後，「關於第 1 宗案件，就喺 2018 年 4 月 16 號，警方係要求我哋提  
13 供八達通卡嘅紀錄同埋邊個陪同佢一齊，因為佢哋當時係有最後三個嘅乘客就  
14 係喺當時上車嘅。喺 2018 年 4 月尾嘅，我哋就同警方有一個電話嘅對話，就係  
15 關於八達通嘅資料，就話畀佢哋聽係要攞我哋嘅書面回應嘅。」

16 Patrick Pang 先生口頭作供嘅時候，佢就話警方冇去攞嗰個八達通嘅資  
17 料或者係報告，我哋睇下你呢度嘅回應。喺嗰個雜項文件第 124-537-1 呢一頁  
18 嗰度，124-537-1 呢一頁嗰度，537，我讀出嚟，李生，你搵唔搵到嗰份文件  
19 呀？

20 李大偉先生：（沒有可聽到的回答）

21 黃女士：（經傳譯員）仲未。呢個係你畀委員會嘅一封嘅回信，係 2018 年 8 月 7 號  
22 嘅，喺第 3 段，你咁樣寫，「關於第 1 宗嘅個案，就係天水圍嘅警區嗰度，警  
23 方係冇收到任何嘅從九巴嘅嗰個疑犯或者係行兇者嗰個八達通資料。」

24 你亦都話呢啲嘅資料係可以喺嗰個八達通可以搵到嗰個交易嘅時間、日  
25 期、用邊一個嘅器材、嗰個交易嘅幾多錢同埋嗰個八達通卡主嗰個嘅個人資  
26 料，而家就話--九巴就話佢哋有呢啲資料，但係警方就有去攞，於是乎呢份文  
27 件仲喺九巴嘅寫字樓度，你嘅回應係乜嘢呢？

28 主席：（經傳譯員）或者我哋應該去番前呢一個警司彭先生嗰個嘅資料，因為我哋似  
29 乎而家兩面就係喺度推卸緊，佢就彭生就似乎就接咗手。

30 黃女士：（經傳譯員）我想請你睇一睇我哋第 13 日嗰個嘅研訊謄本，2018 年 8 月  
31 10 號，係 108 去到 109 謄本嘅，就喺謄本 5 嗰度，108 至 109 頁，你睇咗  
32 108 頁先，第六行，主席係咁問嘅，「我哋知道，因為我哋問咗警方係有啲乜  
33 嘢可以攞到嘅資料，喺你封信嗰度，我諗應該係喺 KMB-1 第 297 頁，就係話去  
34 回應呢一封信嘅時候，喺二段，你就係講到第 1 個個案，你係咁講嘅，你話  
35 『大概喺 2018 年 4 月咁上下，我哋就係同警方講過電話，就住關於八達通呢啲  
36 紀錄嘅，就向佢哋講就話可以收到我哋嘅書面回覆嘅。』佢哋收唔收到呢？係

1 咪可以答有或者冇呢？」然後彭生就話冇，佢哋冇嚟到擺嘅。

2 然之後我哋去睇 109 頁，都仍然係彭生畀緊證供，第九行，「我哋打電話  
3 去天水圍警區，我哋問佢，叫佢哋擺呢一個回覆，但係警方冇嚟過，封信依然  
4 喺我哋度，嗰啲八達通嗰卡依然喺我哋度，就係咁樣發生咗喇，主席。」呢  
5 個係 Patrick Pang 先生嘅證供，...

6 主席：（經傳譯員）我諗到最後彭生就話咁樣嘅做法係好愚蠢嘅，應該係做啲嘢。

7 黃女士：Yes.

8 李大偉先生：就住呢個天水圍個案件，我哋都諮詢過天水圍分區嘅，根據佢哋嘅紀  
9 錄，佢畀我哋嘅資料，就係佢哋係有向呢個九巴係索取呢個相關案件嘅八達通  
10 資料，而發信之後一路都收唔到 KMB 書面嘅答覆，亦都有話收到任何電話通知  
11 有關於可以去擺呢啲咁嘅資料嘅，我哋喺天水圍方面就可以擺到咁嘅資料啫。

12 主席：（經傳譯員）呢一件事我哋一定要跟進，我哋要同彭生同九巴跟進，因為咁樣  
13 發生真係令人覺得好惋惜嘅，大家其實對呢件事都有一個興趣嘅，因為就係話  
14 究竟係咪會調查咗一個指控，甚至係咪可以提出檢控呢咁，但係有人唔知做咗  
15 啲乜嘢，就做唔到，但係好明顯嗰啲證據係喺度。

16 黃女士：（經傳譯員）李生，你先前提到呢個一百八十八宗九巴嘅案件係有四種唔同  
17 嘅檢控嘅罪行嘅，有一次係同 230A 章有關嘅，九巴嘅證供同埋個工會嘅證供全  
18 部都係同一個意見嘅，佢哋就係話其實你動用 230A 章係更加容易嘅，如果你係  
19 講到乘客嘅行為，因為係唔需要冇真係身體方面嘅接觸或者係襲擊嘅，咁都已  
20 經係可以違例，係應該容易檢控啲嘅，你個意見點呀？

21 李大偉先生：或者我嘗試答下先，一般嚟講，普通嘅 230A 嘅違規，即係乘客唔守規  
22 矩，係經常會發生，好多時候嗰個事件已經發展到可能已經係肢體衝突，直至  
23 到警察到場㗎喇，當然係最理想嘅方法就係嗰件事未發展到咁差嘅時候，就  
24 警察開始介入就可以平息咗佢，或者係用比較容易嘅方法處理，譬如話可唔可  
25 以考慮到 230A 嘅控罪，但係好多時候警察去到現場，好多時候已經係去到一個  
26 階段，已經係可能肢體發生衝突又或者有人受傷嘅情況。

27 黃女士：（經傳譯員）對你比較公道，或者我畀幾份文件你睇睇，我諗邱小姐係回覆  
28 過九巴嘅，佢係回覆過九巴關於呢件事，就係話究竟你係咪有考慮過將來都係  
29 用 230A 章，...

30 主席：（經傳譯員）或者未講呢一點之前，我哋可唔可以睇一睇 230A 章有相關嘅部  
31 分，等我哋睇一睇呢一個罪行嗰個範圍。

32 黃女士：（經傳譯員）應該喺 THB-2 第 132 頁，即係運房局嗰啲文件，我哋睇下第  
33 13A 規例，尤其是係 (1) (c) 嗰一條，佢係咁寫嘅，就係講到乘客同埋將會乘搭  
34 巴士人士嘅一般行為，我哋可以睇下第 13 條嗰個規例，就係咁寫嘅，即係話嗰  
35 個巴士嘅車長可以係驅逐呢一位乘客嘅，而 13A 就係講到有關嘅罪行嘅，就係

1 話任何嘅乘客或者將會搭巴士嘅乘客係唔可以蓄意去阻礙或者係妨礙其他嘅人  
2 或者係呢一個巴士嘅車長或者係蓄意阻礙巴士車長嘅視線嘅，同埋係唔可以蓄  
3 意或者係令到巴士任何嘅器材係會受到破壞或者係令到其他人係會受傷或者覺  
4 得唔舒服或者覺得煩厭或者唔方便嘅，呢個係會造成罪行嘅。

5 第 25 條嘅規例就係寫明任何人如果有合理嘅辯解係違反第 3 條規例，即  
6 係第 3 條第 (4) 款或者以下規例嘅任何嘅條文，都係會犯法嘅。

7 第 25 條第 (3) 款就係話任何人有合理辯解，如果係違反 13A，係會犯法，  
8 係可以被罰 3,000 元或者係入獄六個月嘅。

9 工會同埋九巴嘅人士就認為呢一個嘅條文已經係好有效可以去對付乘客對  
10 巴士車長嘅人身嘅攻擊嘅，即係你唔需要真係證明到係有襲擊，因為佢哋認為  
11 有呢一條係更加容易檢控嘅。你點樣回應呀？同埋我一陣間都會請你睇一啲書  
12 信來往嘅，係邱小姐都畀過答覆嘅。

13 李大偉先生：至於用 230A 個控罪，係同意嘅，係可以喺每個事件裏面防止啲事件再  
14 惡劣下去，即係演變得更加差，譬如話變成打交或者係受傷咁樣嘅，所以我哋  
15 一路都呼籲啲巴士司機一定要冷靜處理呢啲咁嘅違規乘客，儘快報警，由警察  
16 儘快去到现场處理，而唔係用自己去同人口角，跟住肢體衝突係最唔理想嘅處  
17 理方法，所以 230A 係有佢嘅作用嘅，如果係巴士車長可以喺保持冷靜，儘快通  
18 知警察去現場處理，我相信就一定係將啲受襲嘅事件可以降低。

19 就住每宗案件，都要針對最適當嘅控罪，警方先會檢控嘅，相對如果係實  
20 質係一啲肢體衝突、係毆打嘅案件，警方一定會用番頭先我上晝所講嘅啲四條  
21 控罪，最適合嘅控罪採取檢控行動嘅。

22 黃女士：（經傳譯員）好嘅。我哋講番成個故事，或者邱女士，請你去睇九巴 1A 沓  
23 文件，中文 286 頁，英文 283 頁，呢一封信係九巴 2018 年 3 月 8 號寫。主席，  
24 喺英文版嗰度，個日子係有寫出嚟嘅，但係係 2018 年 3 月 8 號出嘅。呢  
25 封信，喺 293 頁，九巴就係咁樣寫嘅，就話「舊年 5 月，我哋寫信畀警方表達  
26 話我哋嘅車長一而再被襲擊嘅，我哋考慮過有關嘅個案之後，我哋發現有一啲  
27 嘅違例者不單只係犯咗普通襲擊，有可能甚至係違反咗公共巴士服務規例  
28 13A(1)(c) 嘅，因此我哋公司實際上已經係派咗同事去警察局嗰度係為呢一啲  
29 嘅個案提供證供，希望警方可以係根據規例嘅 13A 提出檢控嘅。」佢哋係提到  
30 六個個案。

31 喺 294 頁嘅底部，佢話「喺呢一方面，我哋而家係熱切祈求警方喺將來如  
32 果仲有襲擊車長嘅情況」，係請佢哋慎重考慮使用規例第 13A，即係除咗係告  
33 普通襲擊之外，都係用埋 13A 嘅，「我哋嘅公司肯定會同警方合作，提供協  
34 助。」

35 喺呢一方面，邱女士就係回覆過嘅，2018 年 5 月 17 號，喺 296 頁，中  
36 文版 288 頁，你喺呢一度咁寫嘅，邱女士，你就係話「同你公司開過會之後，

1 即係 3 月 28 號，我哋而家通知你我哋嘅分區亦都係通知咗總區嗰度，係用書面  
2 嘅，去提醒前線嘅人員喺處理巴士車長被騷擾或者係襲擊嘅時候，係要公平同  
3 埋專業嘅，同埋要明白嗰個個案嘅性質，然後適當咁將佢分類嘅，然後去考慮  
4 一下係咪公共巴士服務規例，即係 230A 章係可以適用。」

5 我個問題係 230A 章第 13A 條從來有冇援引過係警方擺嚟去檢控嘅呢？

6 邱倩雯女士：我哋曾經睇番呢幾年嘅紀錄，喺 2016 年我哋都有用過 230A 去控告--  
7 發過告票畀巴士嘅乘客嘅，一共有一宗。

8 黃女士：（經傳譯員）你回覆咗之後，有冇再用過呢？

9 邱倩雯女士：我哋再睇過紀錄，今年有嘅。

10 黃女士：（經傳譯員）點解呢？點解用得咁少呢？

11 邱倩雯女士：呢個我相信就係睇下究竟喺事件裏面究竟係嗰個證據--現場嘅證據有啲  
12 乜嘢嘅案情。

13 黃女士：（經傳譯員）仲有一件事，就係根據 Patrick Pang 先生，即係九巴嘅  
14 Patrick Pang 嘅證據，佢就話 3 月 28 號開過會嘅，佢自己同埋係法律部嘅  
15 主管同埋另外一個同事，就係同總警司開會嘅，喺嗰一個會，總警司就係答應  
16 咗，喺即係個會度答應，就話佢會發出一啲指引畀前線嘅警員去到首先，就要  
17 佢哋所有指稱係有襲擊嘅個案，都要係認真咁樣調查，佢亦都會提醒佢嘅前線  
18 同事，睇下會唔會有一啲個案係適合援引 230A 章做調查同埋檢控嘅，有冇咁做  
19 呢？

20 邱倩雯女士：嗰個有嘅，我哋喺 2018 年嘅 5 月 10 號，係由警察嘅交通總部係發出  
21 咗一個內部嘅通告畀前線嘅同事去留意巴士嘅司機係受襲嘅事件嘅。

22 黃女士：（經傳譯員）我哋可唔可以睇下呢一張內部嘅通告呀？

23 邱倩雯女士：可以。

24 黃女士：（經傳譯員）或者就係透過呢度嘅秘書處，可以畀呢一個我哋。

25 主席：（經傳譯員）你今日會唔會有嗰張通告㗎？

26 邱倩雯女士：Yes.

27 主席：（經傳譯員）如果有嘅，請搵同事去擺佢去影印，或者畀我睇一睇先，我可唔  
28 可以睇下佢呢？唔該。等一等。唔該。唔該。

29 黃女士：（經傳譯員）呢個嘅題目仲有最後一樣嘢嘅，就係 Patrick Pang 先生嘅  
30 口頭證供就係話「當我哋問佢呢一個問題話點解佢係如果可以用普通襲擊嘅  
31 話，點解要援引 230A 章呢？有咩嘢好處呢？」我相信九巴係咁樣回覆呢個問題  
32 嘅，喺第 13 日，嗰個嘅研訊嘅謄本第 73 頁，呢個就係 2018 年 8 月 10 號第

1 12 行，呢一個鄧樂勤資深大律師就係問，「如果嗰個嘅最高刑罰係會低過呢一  
2 個 230A 章嗰個罰則，咁有咩嘢意思呢？」鄧資深大律師就係話「其實如果要普  
3 通襲擊，警方嗰個調查過程係好複雜嘅，如果用 230A 章，就係比較容易去證實  
4 呢一個罪行已經觸犯咗，我哋希望嗰啲襲擊車長嘅乘客佢知道其實係有 230A 章  
5 呢個係關於乘客嘅行為，而且係唔需要冇真係肢體嘅接觸，都可以係觸犯呢個  
6 罪行嘅。」

7 你就係強調話用呢一條嘅條例係有好處嘅，我相信你嘅證供亦都話強調雖  
8 然而家係好少援引呢一章，你都會考慮援引嘅，係咪？

9 邱倩雯女士：我想提出就係檢控嘅工作唔係取易不取難，而係真係睇下嗰個案情係嗰  
10 個證據去到邊度，如果個證據已經係可以顯示到有肢體嘅受襲嘅話，縱使 Cap.  
11 230A 係可以同樣控告嘅話，我哋相信我哋一定會係去一啲較嚴重嘅罪行，去顯  
12 示，更加巴士司機受襲係令到警方係重視嘅，就唔係話因為 230A 比較容易去證  
13 明，而我哋就去 230A，所以一切都係睇證據。

14 黃女士：（經傳譯員）唔該。我想問一個一般嘅問題，你點樣去確保乘客襲擊嘅個案  
15 係好快速咁樣得到處理？

16 邱倩雯女士：我哋對每一單嘅案件都係即時去處理，咁樣時間性上面亦都係睇下證人  
17 幾時可以畀到證據，我哋嘅調查隊會係立刻、即刻咁樣要求證人去畀到口供，  
18 咁樣如果有係需要到較後嘅調查，例如係需要攞醫生報告或者係其他嘅證人可以  
19 以畀到口供，呢個我哋都係即時會做嘅。

20 黃女士：（經傳譯員）去另外一個題目，嗰個嘅係去檢討車速嘅工作小組，我未去講  
21 到呢個工作小組嘅時候，我就想解釋一下點解會成立咗一個咁嘅工作小組，呢  
22 個係完全源於大埔公路嗰個嘅意外嘅，有一次係大埔嘅區議會有一個嘅會議，  
23 嗰個嘅議程就係記錄 2018 年 2 月 12 號嗰個嘅會議，...

24 主席：（經傳譯員）你未繼續落去之前，我哋就有話過呢一個嘅工作小組係因為大埔  
25 嘅意外先至引起，其實一早呢個工作小組已經存在嘅，係咪呀？黃律師？

26 黃女士：（經傳譯員）係，係，主席，應--我相信--如果我講錯，請你係更正。

27 主席：（經傳譯員）即係佢呢一個工作小組，關於檢討車速嘅，就係運輸署同埋警方  
28 都係有代表，係一直存在嘅。喺呢一個嘅個案，所涉及嘅大埔道嗰個交通意  
29 外，就係運輸署嗰個建議係要包埋呢段落路去嘅，係咪呀？我咁樣嚟到去總結  
30 我哋聽到嘅證供正唔正確？

31 黃女士：（經傳譯員）係正確嘅。

32 主席：（經傳譯員）唔該。

33 黃女士：（經傳譯員）或者邱女士向我哋去解釋下呢一個檢討車速嘅工作小組有啲咩  
34 嘢成員嘅？

1 邱倩雯女士：我讓我同事李大偉去回答。

2 李大偉先生：有關個運輸署嘅檢討車速工作小組，成員包括運輸署嘅同事，另外有兩  
3 個非政府組織、一個就係香港汽車會、一個就係香港高級駕駛人員協會同埋警  
4 方嘅代表，係作為參與嘅。

5 黃女士：（經傳譯員）可唔可以話畀我哋聽警方响呢個由運輸署成立嘅工作小組佢有  
6 咩嘢角色嘅？

7 李大偉先生：警方嘅代表就係喺我哋嘅交通總部派出一個代表係定期參與佢裏面嗰個  
8 會議，主要係檢討議程上面所檢討嘅路段嘅速度嘅。

9 主席：（經傳譯員）邊一個召開呢一個會議㗎？

10 李大偉先生：運輸署助理署長。

11 主席：（經傳譯員）呢個係由運輸署策動嘅小組。

12 李大偉先生：同意。

13 主席：（經傳譯員）佢哋係咪提供埋秘書處支援？

14 李大偉先生：佢哋會提供秘書處，佢哋負責所有秘書處嘅服務，而開會嘅地方都係運  
15 輸署總部裏面。

16 主席：（經傳譯員）即係話喺咁嘅角色之下，佢哋定議程嘅？

17 李大偉先生：同意。

18 主席：（經傳譯員）唔該。

19 黃女士：（經傳譯員）可唔可以話畀我哋聽呢個工作小組點樣運作嘅呢？會唔會係考  
20 慮埋一啲嘅客觀嘅事實，同埋評估，當佢考慮到去更改某啲路段嘅車速限制嘅  
21 時候。

22 李大偉先生：運輸署係有恆常嘅機制檢討道路速度限制嘅，確保定立嘅速度限制能夠  
23 保障道路安全同埋交通暢順嘅。喺檢討嘅路段嘅時速限制嘅時候，儘量都會保  
24 障道路使用者個安全為首要嘅。

25 檢討嘅時候會考慮有幾大因素嘅，無論係調低、放寬或者保持原狀個速度  
26 限制嘅，第一個考慮就係路段發生意外嘅紀錄；第二個考慮因素就係車輛嘅常  
27 用速度；第三個考慮因素就係道路環境同埋特徵，就包括路面嘅斜度、視線、  
28 路口同埋行人情況等等。

29 根據上述頭先我講嘅因素，運輸署同同事就會作出佢嘅建議，究竟係嗰段  
30 道路應該係調低咩，調高咩，或者保持現行嘅速度嘅。

31 黃女士：（經傳譯員）你提到運輸署有一個嘅恆常機制去檢討一啲嘅車速，你可唔可

1 以話畀我哋聽呢一個嘅定期機制有幾定期嘅呢？

2 李大偉先生：據我理解，呢個檢討小組一般嚟講，係以每一季度就開一次會，檢討唔  
3 同嘅道路嘅，道路嘅選擇就係屬於運輸署範疇，究竟應該係檢討邊一段道路，  
4 就純粹係關於運輸署個工作小組決定嘅。我相信就係特別針對一啲可能--個機  
5 制就係特別一啲發生過嚴重交通意外又或者經常發生交通意外嘅地方，佢哋係  
6 會比較容易啲呢個會議個陣討論關於車速嘅限制方面。

7 黃女士：（經傳譯員）你提到個機制，就係會針對一啲嘅路段，可能係一啲頻密或  
8 者係嚴重嘅交通意外嘅路段，咁即係話係一個回應有發生咗嘅意外嘅機制，係  
9 咪呀？

10 李大偉先生：呢個係其中一個考慮嘅因素，其實仲有其他因素，就係可能係市民投  
11 訴，或者係區議會嘅反映咁樣。

12 黃女士：（經傳譯員）我咁講啱唔啱呢？根據你所知，唔係一個主動嘅機制嚟嘅，即  
13 係唔係話運輸署或者係警方會係主動出擊，睇下邊啲危險嘅路段係需要考慮個  
14 個車速要去調整，係咪呀？

15 李大偉先生：我唔敢講係咪一個主--即係佢唔係一個主動嘅檢討，不過呢個檢討嘅機  
16 制係--我覺得係有效。

17 黃女士：Now, going back to the specific example...

18 主席：（經傳譯員）可唔可以幫下我哋，呢個工作小組已經成立咗幾耐呢？

19 李大偉先生：根據紀錄，一般嚟講，係會三個月，季度性開一次會嘅。

20 邱倩雯女士：第一次。

21 黃女士：Since when?

22 李大偉先生：而第一次嘅會議，根據紀錄，係喺 2000 年第一次。

23 主席：（經傳譯員）你知唔知道喺咩嘅情況之下佢係成立㗎？

24 李大偉先生：呢個我哋有紀錄可以查到。

25 主席：（經傳譯員）唔該。

26 黃女士：（經傳譯員）關於呢一個大埔路嘅交通意外，可唔可以請你睇幾份嘅文件，  
27 個目的係想顯示大埔路段，即係關於乎呢一段嘅大埔路段，其實區議會、居  
28 民、學校都係有投訴話呢一段嘅路係好容易有交通意外，亦都有好多超速嘅情  
29 況，呢度有一啲嘅書信往來，係嚟自大埔區議會寫畀警方，要求佢哋協助  
30 嘅，...

31 主席：（經傳譯員）未去講到細節之前，我想請問一個一般性嘅問題，呢五位警方嘅

1 代表，請問有冇任何一位係參加過呢一個車速嘅檢討委員會嘅呢？

2 李大偉先生：嗰個常任個會員係其中一個警察代表就係交通總部嘅警司，交通管理嘅  
3 警司，其實嗰個嗱就係調任咗，調離咗崗位，而家我就署任緊嗰個角色。

4 主席：（經傳譯員）即係話直接去答呢一個問題就係今日喺呢一度嗰五位警方人士係  
5 有積極咁係參與過呢一個委員會嘅工件？直至到你係代替咗之後。

6 李大偉先生：同意。

7 主席：（經傳譯員）唔該。

8 黃女士：（經傳譯員）李生，自從你署任之後，你有冇參與過呢一個工作會議嘅會議  
9 呢？即係呢一個工作小組。

10 李大偉先生：我曾經出席過一至兩次，不過係相信係兩、三次年前嘅事嚟。而家，就  
11 住呢個大埔道呢個檢討，就我有出席過。

12 主席：（經傳譯員）當你參與呢一個工作小組會議嘅時候，即係參與過嗰啲，通常會  
13 係一次會議檢討幾多個路段？

14 李大偉先生：喺我出席嘅兩、三次會議裏面，每一次嘅會議大致上係會搵出三個地  
15 點、六個方向，即係每一個地點通常都係有來回線嘅，所以每一次會檢討六個  
16 唔同嘅路段。

17 黃女士：（經傳譯員）點解係六個路段呀？

18 李大偉先生：頭先我講每--通常會搵三個地點，而每個地點都係有來回線，所以有六  
19 個路段。

20 黃女士：（經傳譯員）係邊個去選擇嗰三個路段呢？

21 李大偉先生：運輸署同事。

22 黃女士：（經傳譯員）點解係咁樣選呢三個路段呢？係咪就係根據你剛才講嗰啲因素  
23 呢？

24 李大偉先生：冇錯。

25 黃女士：（經傳譯員）關於去選擇呢啲路段，你有冇任何嘅意見嘅呢？

26 李大偉先生：我哋會畀意見嘅，我哋會畀同唔同意佢嘅建議。

27 黃女士：（經傳譯員）如果你係收到啲投訴，係關於某一個路段嘅，你可唔可以建議  
28 話去檢討嗰個路段？

29 李大偉先生：當然可以提出嘅，可以提出，向運輸署同事，我哋有收到投訴係關於速  
30 度嘅要求，但係一般嚟講，但係市民或者係好多區議會、其他部門都好清楚到

1 路面上面嘅速度限制係歸於運輸署嘅範疇去檢討，同埋去定制，只係佢哋有權  
2 去檢討嗰個道路嘅速度限制。

3 主席：（經傳譯員）如果一個區議員係唔知道，你係咪會咁樣話畀佢聽？

4 李大偉先生：我哋會將呢件嘢反映畀運輸署嘅同事聽。

5 主席：（經傳譯員）但係如果係一個區議會係提出嘅，一陣間我哋都預計會畀啲文件  
6 你睇，如果係一個區議員係向警方提出，你係咪會話畀佢聽「呢件事唔係我哋  
7 做嘅，係運輸署嘅工作。」係咪咁呢？

8 李大偉先生：我相信區嘅同事收到呢啲每個唔同區議會嘅議員嘅反映，佢都一定會反  
9 映番畀佢當區嘅運輸署同事，由運輸署同事反映番上去呢個檢討工作小組裏面  
10 處理。

11 主席：（經傳譯員）好呀，我哋一陣間睇下發生咩嘢事。

12 黃女士：（經傳譯員）李生，...

13 主席：（經傳譯員）等一等，唔該。你就同我哋講過一啲因素，就係話影響車速檢討  
14 嘅，即係話多唔多交通意外、嗰啲車輛駕駛者一般駕駛嘅速度或者係嗰啲條路  
15 嘅特徵等等，呢啲有冇喺任何書面嗰度可以睇到㗎？

16 李大偉先生：係會喺報告，除咗報告之外，佢哋係會播巡邏影片嘅，即係會有一架車  
17 直頭係去巡邏，去示範嗰條路，即係介紹嗰條路嘅特徵同埋嗰個車輛--道路情  
18 況嘅。

19 主席：（經傳譯員）比較具體咁講，有冇一啲嘅參數或者臨界點係話講到要有幾多嘅  
20 交通意外先至可以引發一個檢討呢？

21 李大偉先生：我唔肯定，但係我相信都會係其中一個考慮因素。

22 主席：（經傳譯員）但係你所知道就唔會係有一個方程式？

23 李大偉先生：冇呢條方程式。

24 主席：（經傳譯員）譬如如果話係意外增加咗百分之五十，喺過去一年多咗百分之五  
25 十嘅意外。

26 李大偉先生：有一個方程式可以講到。

27 主席：（經傳譯員）唔該。請繼續。

28 歐陽先生：（經傳譯員）我想補充一下，關於呢一個工作小組，當你哋開會嘅時候，  
29 你哋會唔會係分開重型車輛同埋係普通車輛㗎？

30 李大偉先生：一般嚟講，都唔會嘅，因為車速普遍嚟講係針對所有唔同種類嘅車輛，  
31 除咗一啲巴士或者係小巴已經係--本身已經係呢個車輛可以行咁多車速嘅啫。

1 歐陽先生：（經傳譯員）好，唔該你。

2 主席：（經傳譯員）唔該。

3 黃女士：（經傳譯員）首先我跟番個時序，因為我都會同你講番啲事情，根據時間  
4 咁樣去發生，一路喺大埔嗰件事一路去到最後個報告，首先，2017 年 6 月 5 號  
5 一封信，喺 DC-2 (B) 嗰一查文件，係一個投訴，係大埔區議會寫畀警方嘅，  
6 DC-2 (B)，840-70 就係中文，如果英文，就係 840-74。

7 我哋係睇到呢個翻譯嘅，佢係寫畀交通部總部嘅，2017 年 6 月 5 號，係  
8 寫畀中央交通攝錄調查小組嘅，佢係寫畀一位張笑權先生嘅，個題目就係話希  
9 望大埔尾同埋一個屋苑之間，請你哋係安裝超速嘅攝錄機嘅，就係話呢一個係  
10 發現好多時候喺大埔道好多人喺度鬥車、賽車咁樣，尤其是係放假同埋半夜嘅  
11 時候，佢哋發現有一大組嘅，經過改裝嘅車係高速咁樣喺大埔道行駛嘅，佢哋  
12 發現有可能係有不法嘅賽車情況，同埋係令到居民係受到好大嘅嘈雜滋擾  
13 嘅。

14 喺咁嘅情況，如果有交通意外，就會係會撞到啲居民同埋係會造成嚴重嘅  
15 人身嘅傷害嘅，因此係希望你哋安裝呢個超速嘅攝錄機，呢個就係喺大埔尾同  
16 埋鹿茵山莊之間嗰一段大埔道，希望可以安裝呢啲嘅超速攝錄機嘅。

17 呢一個就係大埔區議會寫畀警方嘅一個投訴嚟嘅。

18 主席：（經傳譯員）我哋有冇一個地圖可以顯示到個地點呀？

19 黃女士：（經傳譯員）有嘅。就係喺大埔尾同埋鹿茵山莊之間，呢一度就係大概嗰個  
20 路段，喺中間呢一度，喺中間嗰個部分。

21 主席：（經傳譯員）我哋肯定睇到大埔尾，呢個當然就係喺 2 月 10 號巴士意外嗰個  
22 路段嘅附近喇？

23 黃女士：（經傳譯員）係，冇錯。

24 主席：（經傳譯員）呢一度有啲字係睇唔真嘅，淨係睇到“Hill Bay”，係咪即係  
25 等如“Deerhill Bay”？

26 黃女士：（經傳譯員）正確嘅，主席。收到呢個投訴之後，香港警方喺 2017 年 6 月  
27 16 號就係回覆咗嘅，請大家睇一睇中文 840-71 頁，英文就係 840-73 頁，我  
28 哋睇到呢一封信就係警方代表 Andrew Lam Chi Hang 就係寫畀區議員 Chan  
29 Siu Kuen 嘅，2017 年 6 月 16 號，佢亦都係副本抄錄畀 Paul Chiu Kang  
30 Bor，就係運輸署嘅，亦都係抄錄畀大埔嘅指揮官同埋負責交通嘅高級人員嘅。

31 呢一度就係講到話你哋要求係喺鹿茵山莊同埋大埔尾之間安裝攝錄機，你  
32 就話係「主要由運輸署負責嘅，安裝之後，警方就可以執法嘅，我哋就係明白  
33 運輸署而家係有計劃喺呢一個你講嘅路段係安裝固定嘅超速嘅攝錄機，但係同  
34 時，警方係會緊密咁監察呢一個路段嘅交通情況嘅。」

1 呢一度就話運輸署係拒絕呢個要求係安裝超速嘅攝錄機，警方嘅回覆就似  
2 乎就話你都有咩嘢可以做，因為你哋嘅角色只係執法，...

3 主席：（經傳譯員）你點解咁樣講呢，就話運輸署係拒絕去安裝呢啲攝錄機呢？

4 黃女士：（經傳譯員）因為有一句嘅，就係話「我哋係理解運輸署現時係有計劃去安  
5 裝固定嘅超速攝錄機嘅，喺呢一個有關嘅路段」。

6 主席：（經傳譯員）我哋要睇下佢係咪真係咁講。

7 黃女士：（經傳譯員）我想請問一個一般性嘅問題先，如果你收到大埔區議員一個要  
8 求，係講到話要裝置超速嘅攝錄機或者係某一個路段做啲乜嘢嘅，呢一個投設  
9 會唔會交界車速嘅檢討工作小組去講呢？

10 李大偉先生：我相信係唔會嘅，呢個純粹係一個要求喺道路上面安裝呢個偵測器嘅  
11 啫，同檢討道路速度限制係兩回事嚟嘅。

12 主席：（經傳譯員）我諗佢嘅重點就係話如果你警方有一個機會喺工作小組嗰度提出  
13 一啲議程嘅，呢一樣嘢你亦都會唔會係向運輸署去提出，然後睇下佢哋會唔會  
14 擺喺呢一個工作小組嘅議程上面呢？

15 邱倩雯女士：我相信就係我哋警方同個 TD--同運輸署我哋有好多唔同嘅委員會嘅傾  
16 談嘅，嘅商討嘅，其中關於要設立呢啲偵速嘅攝影機就唔會喺嗰個速度限制嘅  
17 個委員會嗰度傾嘅。

18 黃女士：（經傳譯員）但係如果有一個具體嘅投訴係區議員提出嘅，就係話要佢哋修  
19 改或者係減低一個車速，會唔會終於都去到工作小組呢？

20 邱倩雯女士：如果係關於速度--個路段嘅速度限制，就會係去番頭先嗰個工作小組嗰  
21 度。

22 黃女士：（經傳譯員）係，就想請你睇 2015 年 7 月 24 號一封信，係由一個嘅大埔  
23 區嘅區議員係 Chan Siu Kuen 女士，但係呢個係寫畀運輸署。

24 主席：（經傳譯員）咪住，李先生，你早前就係話警方如果係接收到一個咁樣嘅要  
25 求，就係會轉介畀運輸署，呢一封信其實都係已經抄送咗畀運輸署，嗰個嘅日  
26 子--嗰個係 840-73 嗰一封嘅信係咪已經係畀咗運輸署？

27 李大偉先生：係，冇錯，同意，但係我唔清--我相信佢係--呢封信係副件係去咗運  
28 輸署有關於處理一啲安裝一啲新嘅偵速器攝影機嘅運輸署部門，就唔係話佢哋  
29 會--呢封信唔會去咗--我相信唔會去到嗰個速度檢討小組嗰個會議上面。據我  
30 所知，運輸署係會有一...

31 主席：（經傳譯員）呢個係另外一點嚟嘅，你就話你會同運輸署方面嘅連繫就係嚟自  
32 呢封信，因為呢一封信，你--警方嗰封信係有係畀區議會㗎嘛，亦都係謄本抄  
33 送咗畀呢一個運輸署㗎嘛？係，黃女士。

1 黃女士：（經傳譯員）我未去到講番呢一封投訴信之前，我想去睇一睇大埔區議會  
2 會議紀錄，喺第二次嘅會議，2015 年 3 月 13 號，中文文件 840-81 頁，而英  
3 文就係 840-91 頁。呢一度出席嗰度，喺最底嗰度，就係大埔警區嘅交通部嘅  
4 主管，另外亦都有大埔區嘅或者係房署嘅大埔當區嘅負責人或者係代表，亦都  
5 有警方嘅代表喺呢個會議度嘅。

6 去番 840-92 頁嗰度，喺 79 段，嗰度係有一個特定嘅要求，係日本學  
7 校，嗰度係要求喺大埔坳嗰度嘅路段嘅車速係要係限制嘅，喺 79 段嗰度就主席  
8 就係表示收到日本國際學校嘅呢一封信，要求將呢一個嘅學校前面嘅路段嘅車  
9 速就係由每小時 70 公里就減到 50 嘅，佢亦都係邀請呢個委員會去到呢一間嘅  
10 國際學校同佢哋學生去討論下佢哋附近嘅交通。主席係要求運輸署首先就係去  
11 回覆話要求降低車速上限呢一個嘅請求。

12 第 80 段，Wong Kwok Leung 先生回應日本國際學校建議將呢一個學校  
13 前面嗰個路段嘅車速限制由 70 減到去 50，因為係喺 2014 年喺呢一段大埔路  
14 嘅路段，喺學校前面係有一個交通意外，有一位公眾人士係死亡嘅，運輸署同  
15 埋警方就係研究緊呢一個交通意外嘅成因，未必一定係關乎呢一個路段嘅車速  
16 限制，可能係包括埋駕駛嘅態度同埋到底嗰個行人嘅視線係咪被遮住咗。運輸  
17 署亦都會係睇下現時呢一條路段嘅車速限制係咪合適，另外，運輸署就係會向  
18 學校畀一個臨時嘅回覆，係農曆年之後，之後就會畀一個更加詳細嘅回覆嘅。

19 主席：（經傳譯員）可唔可以畀我哋睇下嗰個地圖？

20 黃女士：（經傳譯員）呢度，21 同埋 22 之間，香港日本人學校。

21 主席：（經傳譯員）我哋將佢再放番闊啲，睇到成個嘅情況，即係由意外嗰個地點，  
22 由沙田一路揸車去大埔，沿路嘅，係咪呀？

23 黃女士：（經傳譯員）啱。

24 主席：（經傳譯員）唔該。係。

25 黃女士：（經傳譯員）呢一個係一個特定嘅要求，係由一間學校提出嘅，警方係有代  
26 表出席呢個會議，當時係有投訴嘅，對呢個問題，亦都係要求將個車速上限降  
27 低。通常呢啲會唔會係畀嗰個工作小組嚟到去討論㗎？

28 李大偉先生：根據會議紀錄，我相信出席嗰個警察嘅同事就係屬於大埔區交通組嘅警  
29 長㗎嘅，我睇番個會議紀錄就係睇到係區議會要求運輸署去檢討當段嘅速度  
30 嘅，我相信運輸署收到呢個訊息之後，應該係會將佢帶番去運輸署畀個工作小  
31 組去考慮將佢擺落去個議程上面，或者係進一步去檢視下呢段路應唔應該去做  
32 個檢討嘅。

33 主席：（經傳譯員）即係話係會由警方代表，將個訊息傳遞畀工作小組，係咪呀？

34 李大偉先生：由於嗰次會議我睇到主要都係運輸署同事喺個會議上面解答區議會所--

1 呢個問題，我相信運輸署--警方係唔會再重複番轉達番區議會嘅意見畀番運輸  
2 署。

3 主席：（經傳譯員）唔係嗰個運輸署，而家係講緊嗰個工作小組，警方會唔會自己係  
4 將呢一個訊息畀工作小組？因為叫佢哋考慮嘅議程度講呢樣？

5 李大偉先生：我相信唔會，因為當日係由運輸署同事負責解答呢個問題。

6 黃女士：（經傳譯員）我未繼續之前，如果有人對於某個路段有投訴，警方係需唔需  
7 要係制定關乎嗰個路段嘅統計數字，睇下呢個投訴係咪有利呢？

8 李大偉先生：警方如果收到類似上述嘅投訴，係轉介畀運輸署同事處理嘅，我哋係唔  
9 會做任何呢啲統計或者係去做調查。

10 黃女士：（經傳譯員）我咁樣理解你嘅口供唔啱呢？雖然你有警方嘅代表出席嗰個  
11 會議，當時亦都有一間學校去投訴，亦都有一個嘅事件喺嗰個路段係有人死  
12 亡，即係嚴重嘅死亡事件，但係警方都唔會係進一步嘅調查，除非運輸署要求  
13 佢咁做，係咪？係咪咁樣嘅立場呀你哋？

14 李大偉先生：我相信喺嗰次會議上面警方係會調查交通--喺會議紀錄上面，警方係會  
15 調查交通意外個成因同埋調查嘅，而運輸署係個問題嗰個--今次佢就住嗰個會  
16 議，我睇到係區議會向運輸署提問，同埋要求有關於該段路段應該係去檢討個  
17 個速度限制，我睇唔到兩個有咩嘢關係，關於警方話我哋有做任何適當行動去  
18 轉達呢個意見。

19 黃女士：（經傳譯員）你知唔知道運輸署有冇要求呢一個路段嘅交通意外嘅統計數字  
20 呢？

21 李大偉先生：頭先喺上晝嘅證供裏面，其實運輸署同我哋警方嘅意外數字係互通嘅，  
22 佢係有我哋嘅意外數字。

23 黃女士：Now, four months after these minutes of...

24 主席：（經傳譯員）你未繼續之前，個問題就係喺 2017 年有一個投訴--2015 年有  
25 一個投訴，就係關於 2014 年嘅傷亡數字，運輸署當時會唔會係即係問--2015  
26 年嘅時候問一啲嘅數字，一啲嘅--唔係 2018 年，係 2015 年嘅時候，你明唔明  
27 白嗰個嘅分別？

28 李大偉先生：我明白，嗰個最主要就係運輸署係唔會問我哋攞交通意外嘅資料嘅，因  
29 為本身我哋嘅系統係互通，佢係有晒我哋所有相關嘅資料。

30 主席：（經傳譯員）即係佢哋可以自己喺一個共用嘅訊息嘅系統去攞，佢哋唔需要問  
31 你嘅，係咪呀？

32 李大偉先生：係，同意，冇錯。

1 主席：（經傳譯員）唔該。

2 黃女士：（經傳譯員）嗰個會議紀錄之後四個月，就有一封嘅跟進嘅信件，就係大埔  
3 區議員 2015 年 7 月 24 號嘅個日期，喺 DC-2 (B) 840-78 頁，呢個係中文，  
4 英文就係 840-88 頁，如果我哋睇下第二段，呢封信就係 2015 年 7 月 24 號  
5 Chan Siu Kuen 女士喺第二段嗰度話--第一段先，第二行，佢哋係從大埔道  
6 附近嘅居民收到一啲求助嘅請求，呢個係因為喺呢一個屋苑嘅轉角位嗰度係有  
7 一個交通嘅時速限制嘅標誌，所以好多時候都係有交通意外，去確保道路使用  
8 者嘅安全，我哋希望你個部門儘快咁樣喺呢度裝一個嘅標誌，就係話車速嘅限  
9 制係 50，就係去提醒駕駛者係去呢度揸車係以一個安全嘅時速，就避免不必要  
10 嘅意外，呢個就喺呢一個翡翠花園附近嘅。

11 喺通常嘅情況，呢一啲咁嘅信會唔會係去到呢個工作小組手上嘅呢？

12 李大偉先生：我相信呢封信主要都係講話要求加裝一啲交通標誌，就唔係有關於要求  
13 檢討個速度限制，我相信呢封信係唔會去到個工作小組度。

14 主席：（經傳譯員）嗰度當時嘅車速係幾多，限制係幾多？

15 李大偉先生：我有呢方面嘅資料。

16 主席：（經傳譯員）黃大律師，我哋有冇呀？

17 黃女士：（經傳譯員）係時速係 70，我哋從陳先生嘅證供，就唔係淨係得封信嘅，  
18 其實係有電話嘅通話，要求係降低呢度嘅車速限制去到 50 嘅，呢個只係一封跟  
19 進嘅信嘅，係嗰個同運輸署通完電話之後。

20 主席：（經傳譯員）有冇嗰個謄本嘅頁數，等我哋可以去理解下嗰啲嘅證供？

21 黃女士：（經傳譯員）可以，我要搵一搵，因為我都係臨時諗到呢一點，啱啱記得呢  
22 一點

23 主席：（經傳譯員）我自己都係熟悉嘅，呢一點。

24 黃女士：（經傳譯員）請畀少少時間我。

25 主席：（經傳譯員）冇問題，慢慢。

26 黃女士：（經傳譯員）主席，係第 4 日，第 9 頁。

27 主席：（經傳譯員）日子呢？

28 黃女士：（經傳譯員）第 4 日，唔好意思，應該係第 6 頁--第 6 日第 9 頁。

29 主席：（經傳譯員）嗰日係幾多號呀？

30 黃女士：（經傳譯員）7 月 14 號。

1 主席：（經傳譯員）唔該。

2 黃女士：（經傳譯員）喺呢一頁第 18 行，陳笑權先生喺嗰陣時應該係關於頭先我哋  
3 傾嘅嗰件事，佢話「當時運輸署冇直接回覆畀我，不過我同佢哋講過電話，佢  
4 哋就話如果個速度係減到 50，佢哋就會係要諮詢居民同埋啲業主法團，喺  
5 2014 年喺香港日本人學校附近就喺嗰個路口係有一個交通意外，有人受傷嘅，  
6 運輸署就向我回應，就話如果嗰個速度係減到 50，運輸署係要進行研究嘅，而  
7 喺嗰個意外之後，佢哋就係向居民呼籲就係要遵守交通嘅規則嘅。就話如果真  
8 係要去減到 50，佢哋係要做好多嘅諮詢，同埋亦都要同警方去聯絡嘅。我就一  
9 路等，我一路都同佢哋聯絡，運輸署嘅王生就調走咗，好遺憾，我哋就喺大埔  
10 尾嗰度有呢個交通意外，我就再接觸警方，因為運輸署幫唔到我哋，我請警方  
11 就係安裝超速攝錄機，而我一路都有跟進。」

12 李生，呢個係陳生畀嘅證供嚟嘅，就唔係淨係信，佢亦都係有跟進，同你  
13 哋講電話，同埋佢係不斷重複佢嘅要求，似乎係咁樣一路做緊，請問點解喺呢  
14 一個個案個情況係咁？

15 主席：（經傳譯員）個背景就係我哋自己提醒番自己，就係有一位區議員寫咗信畀運  
16 輸署。

17 黃女士：（經傳譯員）係正確嘅，主席。

18 主席：（經傳譯員）有可能你唔知點解運輸署冇做過嘢？

19 李大偉先生：我相信呢封信純粹係運輸署同埋寫信嗰個人士嘅溝通，我哋冇得喺呢度  
20 畀任何意見，亦都冇任何紀錄關於呢啲咁嘅事件。

21 黃女士：（經傳譯員）我咁樣講正唔正確呢？喺工作小組裏面，警方嘅角色可以話好  
22 似一個橡皮圖章咁樣，係有任何積極嘅角色嘅？你唔會要求運輸署做任何嘢  
23 嘅？

24 李大偉先生：警方嘅參與喺嗰个工作小組絕對唔係一個橡皮圖章嚟嘅，我哋會審視晒所  
25 有佢哋嘅報告，我亦都會諮詢番地區嘅——喺嗰個地點嘅總區交通嘅同事嘅意  
26 見，有關於運輸署工作小組提出嘅建議，我哋會諮詢番我哋前線同事佢嗰段路  
27 段如果係嗰個建議，係有咩嘢睇法，從而我哋喺個會上就反映我哋警方嘅意見  
28 畀个工作小組知嘅。

29 主席：（經傳譯員）或者我哋用另外一個方法去問一問呢個問題，就係話究竟去到咩  
30 嘢嘅程度，警方可以話係有一個積極嘅角色去提出一啲建議，譬如話我哋係關  
31 心呢一個路段嘅車速，我哋認為應該檢討，你會唔會咁做？

32 李大偉先生：我相信一定會有嘅，特別係喺一啲嚴重交通意外發生或者經常發生交通  
33 意外嘅地方，每個總區嘅交通都係會根據調查之後嘅結果，係會向運輸署提供  
34 唔同嘅意見嘅，包括就係速度檢討嘅議題，呢个工作一般嚟講都係交界番五個  
35 陸上嘅交通——警方嘅交通部嘅同事，喺佢哋調查之後，由交通部向運輸署嘅區—

1 -即係運輸署嘅適當部門反映番每個區嘅需要嘅。

2 主席：（經傳譯員）你可唔可以畀一啲例子我哋？即係我哋說明你一個積極嘅角色，  
3 或者係一啲書信。

4 李大偉先生：手頭上我--因為一般嚟講，呢啲地區嘅來往，即係由總區同埋運輸署嘅  
5 地區嘅同事，我哋一般我哋係有記錄嘅。

6 主席：（經傳譯員）咁一定喺某啲地方有紀錄㗎？

7 李大偉先生：我相信會有，但係要諮詢...

8 主席：（經傳譯員）我哋而家就係想請你畀呢啲我哋，可唔可以畀啲例子我哋，說明  
9 話畀我哋聽警方如果喺某個地方係有一啲意外嘅，「我哋呢個警方亦都係會有一  
10 一個積極嘅角色就會去同人哋講，就話可能都要係減低嗰個速度。」有冇一啲  
11 例子？

12 李大偉先生：我哋可以返去諮詢下，我哋會攞番呢個紀錄嘅，我哋會返去諮詢下啲同  
13 事。

14 主席：（經傳譯員）我哋而家就係想咁樣，即係有一啲嘅說明，有一啲嘅證據可以顯  
15 示出警方都有一個積極嘅角色。

16 黃女士：（經傳譯員）或者畀個例子你，如果你收到一定數目嘅投訴，因為我相信其  
17 他嘅區議會或者係居民都可能會投訴嘅，如果有多過三個路段係需要討論嘅，  
18 你點樣去選擇呢？三個嚟去討論呢，即係如果有人投訴嘅路段係多過三個。

19 主席：（經傳譯員）你好似講到係--啲人為嘅一啲限制咁樣，係咪每一個會你有一啲  
20 咁樣嘅限制？

21 李大偉先生：要視乎佢哋投訴嗰啲係咩嘢性質，交通投訴有好多唔同嘅性質嘅，處理  
22 投訴都係會由--市民都會係去--如果向警方投訴嘅話，區嘅同事或者係總區交  
23 通嘅同事都會相應處理嘅。

24 黃女士：（經傳譯員）或者我哋而家繼續睇嗰個時序，而家就係喺意外之後，大埔區  
25 議會 2018 年 2 月 12 號開過會嘅，我哋可以睇 DC-2 嗰一沓文件 785 頁，其實  
26 英文版本嘅會議紀錄係 782 頁就開始，喺第 5 段，我相信警方嘅代表係參加咗  
27 呢一個會議，就係 Chau Chung Mun，就係一位警司嚟嘅，係屬於新界北嘅交  
28 通警區嘅。

29 喺第 5 段嗰度，呢位 Chau 先生就話除咗 2018 年 2 月 10 日嗰一次嘅意外  
30 之外，佢係講到另外一啲嘅個案，係警方 2017 年嘅時候偵破嘅，係關於交通違  
31 例事件。

32 請大家睇呢一段嘅中間部分。佢話「2017 年警方拘捕咗四個人，包括兩個  
33 飲醉酒嘅司機，一個就係危險駕駛，一個就係同毒品有關嘅罪行嘅，警方總共

1 發出咗三十二張定額罰款嘅票，就係喺 2017 年喺呢一個路段嗰度，就係因為有  
2 人超速，同埋係有其他嘅交通違例事件嘅，總共係有二十九個交通意外，就係  
3 喺赤泥坪同黃宜坳呢一段嘅，就係大埔道嗰度，有其中兩個係比較嚴重嘅，雖  
4 然嗰一度當時係有超速嘅攝錄機，警方都係會採取行動，不時係用一啲嘅偵察  
5 嘅器材都喺呢一個路段嗰度係偵察車速嘅，警方亦都係會完成有關嘅調查程序  
6 嘅。」呢位鄒先生係提及到曾經有二十九次嘅交通意外喺呢一個路段嗰度。

7 主席：（經傳譯員）不如我哋又睇番個地圖，睇番有關嘅路段。

8 黃女士：（經傳譯員）赤泥坪至黃宜坳，...

9 主席：（經傳譯員）赤泥坪喺邊度呀？好，見到喇，唔該。黃宜坳呢？好，唔該晒。

10 黃女士：（經傳譯員）李生，我個問題係咁嘅，有二十九個交通意外，三十個係關於  
11 超速，三十二個就係關於發出咗定額罰款嘅告票嘅，喺 2017 年嘅時候，你認為  
12 有咁樣嘅統計數字係咪應該令到警方有足夠嘅理由去將呢一個特別嘅路段應該  
13 喺工作小組嗰度提出嚟討論呢？

14 李大偉先生：要視乎呢二十九宗交通意外嗰個交通意外嘅成因係乜嘢，先可以決定應  
15 唔應該係咪--因為係咪二十九宗裏面有幾多單係關於車速嘅問題而引致交通意  
16 外，亦都係一個考慮因素，就呢個當有--我諗要留番畀當區嘅總區交通決定需  
17 唔需要將佢提交畀運輸署去檢討。

18 黃女士：（經傳譯員）你就參加過幾次工作小組嘅會議，你可唔可以話畀我哋聽呢一  
19 類嘅統計數字係咪都會交畀個工作小組㗎？即係交通意外嘅數字。

20 李大偉先生：佢哋會檢討個交通意外數字嘅，整理嚟講，每一年對比其他路段交通意  
21 外嘅平均率--發生意外率嚟作出比較嘅。

22 黃女士：（經傳譯員）之前，你作供嘅時候，即係喺早上嘅時候，你就話工作小組就  
23 係會每一次睇三個路段六個方向，你參加過嘅會議裏面，你有冇見過某一個嘅  
24 路段最後係減速嘅呢？

25 李大偉先生：喺我印象之中係有嘅，係有嘅，不過就唔係因為交通意外，係因為附近  
26 嘅大型基建嘅工程問題而作出嘅調動嘅啫。

27 黃女士：（經傳譯員）有冇試過一次事件係減低嗰個車速，就係因為喺某一個路段係  
28 有交通意外呢？

29 李大偉先生：由於我出席過只不過係兩至三次，我唔敢肯定，喺我兩、三次裏面應該  
30 就係有，應該就有試過因為交通意外而需要檢討決定就係建議去減低個速度  
31 嘅。

32 黃女士：（經傳譯員）我而家可唔可以請你睇呢一連串文件嘅最後一份文件，就係一  
33 份資料文件，由警方寫畀大埔區議會嘅，就係 2018 年 4 月 9 號，TD 第 5 號文  
34 件夾 1617 頁，呢個係翻譯嚟嘅，中文嘅文件就係喺 1611 頁。

1 我首先描述一下呢一份文件先，呢一份文件係運輸署 2018 年 4 月 9 號寫  
2 嘅，佢嘅題目就係話大埔道駿景路沙田至雍宜路嘅交通管理措施，嗰個文件嘅  
3 目的就係話大埔區議會喺 2018 年 2 月 12 號開咗一個特別嘅會議去討論 2018  
4 年 2 月 10 號傍晚嘅一宗嚴重巴士意外，運輸署就承諾去檢討呢一個路段嘅車速  
5 限制同埋交通管理措施，因為當區嘅關注，仲有區議會嘅關注就係到底呢啲改  
6 善措施實施嘅進度如何，呢一份文件就係想話畀議員聽呢一個運輸署去檢討呢  
7 一個路段嘅車速限制同埋其他嘅跟進改善措施嘅進度。

8 第 2 段就係話呢一個路段嘅車速限制係檢討咗。第 3 段就係話運輸署成立  
9 咗一個恆常嘅機制去檢討呢一個路段嘅車速限制去確保係交通安全同埋安全暢  
10 順嘅。

11 跟住第 2 頁，1617-2 就係話喺去檢討呢一個路段嘅車速限制嘅時候，有  
12 三個嘅因素係要考慮嘅，首先，呢一個路段嘅交通意外紀錄，第二，行呢一個  
13 路段嘅車輛嘅車速，另外就係個道路嘅環境，一啲特徵，譬如佢嘅斜度、駕駛  
14 者嘅視線、有冇路口、行人嘅交通等等。

15 「喺過去嘅兩個月，運輸署就係全面咁檢討過呢一個路段係舊年嗰個嘅意  
16 外紀錄，亦都係去評估過一啲嘅情況嘅，喺赤泥坪同埋雍宜路呢一個路段，我  
17 哋正話睇到呢一度嘅交通意外率係有上升嘅趨勢，亦都係比香港去年嘅整體嘅  
18 平均意外率係高嘅，而呢一度過去嗰幾個月，呢一度去偵測到佢哋車輛嘅速度  
19 就係比過去同埋一般係低過 70 公里嘅。另外亦都有好多大型嘅發展喺附近嘅，  
20 而家其實係有需要將呢度嘅車速下調嘅，我哋建議係將嗰個每公里 70 嗰個嘅時  
21 速係降低到 50，嚟到去改善道路嗰個安全嘅。」

22 另外，我哋而家睇第 6 段，「運輸署同埋警方亦都開始係著手喺呢度安裝  
23 新一批嘅偵速嘅攝影機就係加強嗰個阻嚇同埋執法，等啲人係唔好係超速嘅。  
24 而家運輸署就係搵緊資源，就希望係喺呢一個赤泥坪大埔道附近嗰一段路，喺  
25 今年年尾之前就裝咗呢啲嘅車速偵察攝錄機嘅。」

26 喺兩個月裏面，呢一個意外兩個月裏面，運輸署就已經係檢討咗——佢話佢  
27 係全面咁檢討咗呢啲嘅交通意外報告，就建議將呢度嘅車速限制係下調到 50  
28 嘅。

29 我而家有兩個問題，第一，係以你部門嚟講，有關嘅數字有冇係之前有冇  
30 提供過畀運輸署嘅呢？喺意外之前。

31 主席：（經傳譯員）唔好意思，你可唔可以係講得具體啲，呢個問題？

32 黃女士：（經傳譯員）呢度嘅路段嘅交通意外數字有冇喺大埔道呢一個嘅即係 2018  
33 年 2 月 10 號之前係向運輸署提供過呢？

34 主席：Thank you.

35 李大偉先生：印象之中，我有喇。

1 黃女士：（經傳譯員）你知唔知道呢一個嘅路段有冇曾經係畀呢一個工作小組討論過  
2 嘅呢？即係喺 2018 年 2 月 10 號嗰個交通意外之前，有冇討論過呢？

3 李大偉先生：據我紀錄嚟講，我就見唔到喇。

4 黃女士：（經傳譯員）陳生，我就想去講另外一個嘅題目，除非主席係關於呢個項目  
5 係有問題。

6 主席：（經傳譯員）好呀，唔該，畀少少時間我。4 月 9 號嗰個嘅建議就係話安裝一  
7 啲嘅車速嘅偵察攝影機嘅，有冇嗰個地圖呀？

8 黃女士：（經傳譯員）據我所知，係應該係 2018 年尾嘅先至係安裝到呢啲攝錄機  
9 嘅。

10 主席：（經傳譯員）係邊度呀？

11 黃女士：（經傳譯員）係 1617 頁第 5。

12 主席：（經傳譯員）嗰幅圖喺邊度？

13 黃女士：（經傳譯員）右手面，右下角嗰度話初步建議固定偵察車速攝影機位置，初  
14 步建議固定偵察車速攝影機嘅位置。

15 主席：（經傳譯員）唔該。可唔可以幫下我哋，就係採取咗咩嘢步驟去裝呢啲嘅攝影  
16 機？首先，就要嗰個預算，即係有錢，根據 4 月 19 號嗰個文件，到底係有冇錢  
17 係喺呢度安裝呢？幫唔幫到我哋呢？

18 邱倩雯女士：我可以講一講嗰個固定嘅偵速攝影機，呢個都係主要由運房局同埋運輸  
19 署嘅工作範圍，喺其實 2017 年嘅大概 7 月嘅，其實運房局嗰度已經展開另一個  
20 階段嘅衝紅燈嘅攝錄機同埋個偵速嘅攝錄機嗰個諮詢，喺就嗰個地地點嘅選擇  
21 咁樣，同埋邊一類型嘅攝影機，事實上喺 2017 年嘅年中已經係做緊，喺大埔嘅  
22 巴士意外之後，亦都運輸署已經係同我哋嘅攝影機嘅檢控組，我哋係叫  
23 CTCIU，係 Central Traffic Camera Investigation Unit，係喺警察  
24 嘅交通總部嘅，咁樣都已經同我哋 CTCIU 呢一個嘅單位就係去睇下點樣去落實  
25 呢一個喺大埔交通意外嗰度嗰個地點嗰度嗰個偵速機嗰個設計咁樣。

26 主席：（經傳譯員）但係嗰個嘅意外係六個月前㗎囉，我哋而家有咩嘢進展呀？

27 邱倩雯女士：我知道就係而家運輸署已經攞咗有錢喺度，就會儘快咁樣喺嗰度設立偵  
28 速嘅攝錄機。

29 主席：（經傳譯員）幾時呀？

30 邱倩雯女士：我唔知道實際嗰個日期，但係以我所知，係佢哋已經落實咗嗰個地點同  
31 埋已經有錢可以做。

32 主席：（經傳譯員）根據你講，呢個係運輸署嘅責任，唔係警方嘅責任，係咪呀？

- 1 邱倩雯女士：冇錯。
- 2 主席：（經傳譯員）佢哋提供咗資料畀你，話佢哋諗住點樣做？
- 3 邱倩雯女士：冇錯，冇錯。同埋呢一個喺大埔嘅攝錄機亦都係喺整體上面，我頭先講
- 4 話係 2017 年嗰個新一期嘅紅燈、快相嘅偵測機嗰個計劃裏面嘅其中一部分。
- 5 主席：（經傳譯員）但係就唔係當時話係特定喺呢個地點，當時只不過係話去檢討下
- 6 喺邊度裝啲新嘅 camera？
- 7 邱倩雯女士：冇錯，係。
- 8 主席：（經傳譯員）我嘅記憶啱唔啱呢？就係之前就好似係白令嘉先生就係話有二十
- 9 四個--香港有二十四個嘅固定偵緝嘅車速攝影機。
- 10 邱倩雯女士：冇錯，yes，而家係有二十四部嘅偵速機喺一百三十個唔同嘅地點嗰度
- 11 係運行緊嘅，（經傳譯員）一百三十個地點。
- 12 主席：（經傳譯員）我唔係幾明，點解喺一百三十個地點，點解係可以裝到二十四個
- 13 嘅攝影機？
- 14 邱倩雯女士：呢個係不定期咁樣就將呢啲嘅偵速機就擺喺唔同嘅地點嗰度，希望係可
- 15 以係加...
- 16 主席：（經傳譯員）即係周圍搬嘅？
- 17 邱倩雯女士：冇錯。
- 18 主席：（經傳譯員）佢哋唔係固定喺一個地點嘅？
- 19 邱倩雯女士：唔係嘅。
- 20 主席：（經傳譯員）即係佢哋某一段時間擺定喺一度，但係都會搬來搬去嘅？
- 21 邱倩雯女士：冇錯，呢個亦都係喺運房局喺同立會擺錢嘅時候，有一個比例喺度嘅。
- 22 主席：（經傳譯員）香港有成四十萬公里嘅道路。
- 23 邱倩雯女士：我可以講而家最新嘅商談，咁樣係希望就將每一個地點，即係每一個
- 24 housing 都可以擺一個攝錄機喺度，呢個亦都係而家主要商討嘅重點。
- 25 主席：（經傳譯員）我嘅問題係更加具體，香港係咪有大概 4,000 公里嘅道路？
- 26 邱倩雯女士：係。
- 27 主席：（經傳譯員）但係就得二十四個嘅攝影機？
- 28 邱倩雯女士：冇錯。

1 主席：（經傳譯員）喺一啲明文嘅司法管轄區，係咪都係咁樣嘅比例㗎？係咪最低呀  
2 我哋？

3 邱倩雯女士：我明白主席所說嘅話。

4 主席：（經傳譯員）黃大律師，我哋今日係咪去到五點半㗎？

5 黃女士：Yes.

6 主席：（經傳譯員）如果係咁，我哋就有一個小休，而家係咪一個合適嘅時間？

7 黃女士：Yes. Thank you, Mr Chairman.

8 主席：（經傳譯員）我哋而家小休十五分鐘，唔該。

9

10 下午 4 時 13 分聆訊押後

11

12 下午 4 時 28 分恢復聆訊

13 出席人士如前。

14

15 主席：（經傳譯員）黃律師，請開始。

16 黃女士：（經傳譯員）我開一個新嘅題目之前，或者我請大家睇一睇 SEC 嗰一沓係  
17 1360 段，呢一個就係 2018 年 2 月 15 號一個特別會議嘅會議紀錄，我想你睇  
18 一睇 1360 頁，嗰度係有三個動議係通過㗎嘅，係當時喺立法會嗰度，我唔會全  
19 部都讀晒出嚟嘅，我只會讀其中一段係有可能有關嘅，即係佢會同我一陣問問  
20 嘅問題係相關嘅，呢個係第二個嘅動議。就係請佢哋係「安裝一啲防滑嘅路面  
21 同埋係有一啲嘅額外嘅係減速警示牌，放置呢個偵速攝影機，並檢視全港高危  
22 路段及儘快提升相關安全設施，以保證道路使用者安全」...

23 呢一個動議係由立法會通過嘅，關於呢一點，我想問警方有冇成立一個獨  
24 立嘅部門去處理全港高危路段嘅安全問題呢？

25 邱倩雯女士：我可以答就係喺呢份文件，我哋之前就冇見過，咁樣喺呢個第二段嗰度  
26 所講嘅建議，主要我哋有涉及嘅就係嗰個偵速嘅攝錄機，頭先亦都有提過，喺  
27 偵速攝錄機嘅時候，我哋嗰個研究或者我哋嘅討論其實由舊年已經開始，而大  
28 埔公路呢個意外之後，我哋亦都知道運輸署嗰度已經係做緊一啲--會將會喺嗰  
29 度起一個攝錄機，至於其他嗰啲方面，我哋有任何嘅 set up--即係成立乜嘢  
30 委員會咁樣。

31 黃女士：（經傳譯員）運輸署就諮詢你哋，希望你哋提供某啲路段嘅某啲嘅交通意外

- 1 嘅數字，有冇呢？
- 2 邱倩雯女士：我哋冇收到運輸署嘅特別要求。
- 3 黃女士：（經傳譯員）我就知道警方係有一個數據庫，係關乎一啲交通意外嘅黑點，  
4 係咪呀？
- 5 白令嘉先生：（經傳譯員）我哋係有一張係交通意外黑點嘅清單，呢啲嘅地點係由運  
6 輸署嚟到係劃分嘅，呢一個地點點樣成為一個黑點呢？嗰啲嘅準則就係如果有  
7 喺一個十二個月期內有六宗涉及行人嘅意外，同埋喺一個十二個月期內有九宗  
8 係有任何嘅受傷或者喺五年裏面有兩宗有死亡嘅個案，呢個就係每三個月就係  
9 會更新一次嘅。
- 10 黃女士：（經傳譯員）嗰張清單係公眾知唔知㗎？
- 11 白令嘉先生：（經傳譯員）老實講，我就唔知道個答案，呢個問題。
- 12 主席：（經傳譯員）相信你可以去查一查，然後話番畀我哋聽。
- 13 白令嘉先生：Yes, Sir.
- 14 主席：（經傳譯員）唔該。
- 15 黃女士：（經傳譯員）你提到一個嘅地點就會劃分為黑點，如果喺五年裏面有兩宗涉  
16 及死亡嘅事件，一旦一笪地方被列為黑點，會有啲乜嘢嘅安全措施會建議喺呢  
17 一個嘅路段度實施呢？
- 18 白令嘉先生：（經傳譯員）從警方嗰個嘅角度，我哋嘅責任主要就係執法，我哋咁多  
19 個部門嚟到合作，可能係一個道路工程方面，亦都可能係宣傳，亦都係目的就  
20 係要減低呢一度再發生意外嘅可能。
- 21 黃女士：（經傳譯員）巴士公司會唔會都係獲告知呢啲嘅黑點呢？
- 22 白令嘉先生：（經傳譯員）我要查下先至知道。
- 23 主席：（經傳譯員）可唔可以幫到我哋運輸署係咪會有--你會唔會將呢個名單交畀運  
24 輸署？
- 25 白令嘉先生：（經傳譯員）其實係運輸署制定呢個交通黑點嘅名單。
- 26 主席：（經傳譯員）所以應該嗰個係咪要發布個消息應該係佢哋做嘅，係咪呀？
- 27 白令嘉先生：（經傳譯員）係。
- 28 主席：（經傳譯員）佢哋嘅文件？
- 29 白令嘉先生：（經傳譯員）係，佢哋嘅文件。

1 羅先生：（經傳譯員）其實就喺運輸署個網站上面有公布嘅。

2 主席：（經傳譯員）或者搵人去睇一睇運輸署個個嘅網站，睇下係咪有。

3 黃女士：（經傳譯員）我想去另外一個嘅題目，就係交通安全委員會，我就係想睇  
4 SEC 嘅文件第 481 頁。

5 主席：（經傳譯員）SEC 嘅乜嘢？邊一沓嘅文件？

6 黃女士：（經傳譯員）應該係 SEC-1，481，就係我哋今朝見過嘅一個核數署個嘅  
7 報告，呢度就係講到道路安全議會，佢嘅成員我哋見到係副警務處處長（行  
8 動）做主席嘅，另外有七個嘅政府署或者係局或者係部門嚟到代表嘅，呢個運  
9 房局、運輸署、呢個新聞署同有六個非常政府機構，包括埋一啲嘅運輸委員  
10 會，另外有兩個委員會就係呢一個道路安全宣傳委員會同埋呢一個嘅研究委員  
11 會嘅。

12 呢度就係話道路安全議會係由副警務處處長（行動）嚟到去做主席，佢係  
13 咪有定期會議嘅呢，關於一啲嘅交通數字，以減低同交通相關嘅傷亡呢？

14 白令嘉先生：（經傳譯員）係嘅，佢係每季開一次會嘅，就係會睇下一啲交通意外嘅  
15 趨勢，而啲趨勢就係睇啲數字。

16 主席：（經傳譯員）我想問今日在座嘅代表有冇邊一個係喺呢一個嘅議會嘅一個成  
17 員？

18 白令嘉先生：（經傳譯員）有，我係喺過去啲兩次嘅會議，我都去出席嘅。

19 黃女士：（經傳譯員）警方喺呢一個道路安全議會扮演咩嘢角色㗎？

20 白令嘉先生：（經傳譯員）警方就係做呢一個秘書處，統籌會議，亦都喺啲部分嘅  
21 小組委員會上面係有代表，譬如話啲個道路安全運動委員會。

22 黃女士：（經傳譯員）喺呢個道路安全議會一般討論啲乜嘢㗎？除咗交通意外嘅數字  
23 之外。

24 白令嘉先生：（經傳譯員）喺上兩次嘅會議，我可以話啲個會議主要係集中喺道路  
25 安全嘅趨勢，亦都有討論到一啲譬如話無人嘅駕駛嘅車輛，呢啲咁樣嘅專題嘅  
26 項目。

27 主席：（經傳譯員）會唔會係有一啲嘅文件係會公布嘅呢？

28 白令嘉先生：（經傳譯員）冇嘅。

29 主席：（經傳譯員）佢嘅會議紀錄會唔會公開嘅呢？

30 白令嘉先生：（經傳譯員）冇嘅。

31 黃女士：（經傳譯員）啲會議會唔會係提出建議畀啲七個嘅政府部門點樣去改善道

1 路嘅安全，特別係關乎巴士安全方面，有冇嘅呢？

2 白令嘉先生：（經傳譯員）喺上兩次嘅會議係冇討論過呢啲嘅項目。

3 黃女士：（經傳譯員）呢個議會如果見到佢有一啲關於巴士安全嘅某方面，佢哋可唔  
4 可以向運輸署或者不同嘅呢度所提過嘅局係作出建議嘅呢？

5 白令嘉先生：（經傳譯員）我相信可以嘅。因為不同嘅政府部門都有代表喺呢一個議  
6 會裏面，而呢一個議會嘅整體目標就係減低交通意外嘅數字。

7 黃女士：（經傳譯員）呢度講到有兩個嘅委員會嘅，有道路安全運動委員會、道路安  
8 全研究委員會，可唔可以話畀我哋聽呢個道路安全運動委員會係有咩嘢成員  
9 㗎？

10 白令嘉先生：（經傳譯員）道路安全運動委員會嘅主席就係道路安全議會嘅其中一個  
11 非官方嘅成員。

12 主席：（經傳譯員）你意思即係唔係嚟自政府嘅成員？

13 白令嘉先生：（經傳譯員）係。喺呢一個委員會亦都係有香港--我哋即係警方方面嘅  
14 個道路安全組，另外就係呢一個私人界別裏面喺公共關係方面嘅一啲專家。

15 黃女士：（經傳譯員）佢哋係會唔會定期開會嘅呢？

16 白令嘉先生：（經傳譯員）會，佢哋我相信每季開一次會嘅。

17 黃女士：（經傳譯員）佢哋會唔會--呢個委員會有冇會議紀錄嘅呢？

18 白令嘉先生：（經傳譯員）我而家喺度查緊。

19 黃女士：（經傳譯員）唔該。會唔會道路安全運動委員會會唔會討論話對於巴士司機  
20 方面嘅襲擊？

21 白令嘉先生：（經傳譯員）冇嘅，佢主要討論係點樣將道路道路安全嘅訊息嚟到去帶  
22 到畀唔同組別嘅人士，譬如話老人家、後生仔咁樣。

23 黃女士：（經傳譯員）關於道路安全研究委員會有咩嘢成員㗎？

24 白令嘉先生：（經傳譯員）或者由邱小姐可以幫手。

25 邱倩雯女士：The chairman of the--我講番中文。嗰個 research  
26 committee 嗰個主席就係 Deputy Commissioner of TD。另外嘅委員有警  
27 方，有路政署，有 TD 本身佢唔同單位嘅工程師，即係唔同單位嘅主管，亦都喺  
28 個委員會裏面會係間中會有一啲嘅 consultancy，會係做一啲解說咁樣，通常  
29 都係由運輸署去請佢哋去做一啲研究，喺嗰個會裏面就會係有一啲嘅講解。亦  
30 都係個委員會會有譬如係大學嘅講師，有關於交通事務嘅專家會喺個委員會裏面  
31 嘅。

- 1 主席：（經傳譯員）交通嘅專家，佢哋本身係一啲咩嘢職位㗎㗎？做啲咩嘢？
- 2 邱倩雯女士：以我所知，係有一啲嘅大學講師，但係佢哋主要嘅交通範疇喺邊度，我  
3 就唔太清楚。
- 4 黃女士：（經傳譯員）佢哋係咪都係定期開會嘅呢？
- 5 邱倩雯女士：會嘅，我哋每三個月，每季我哋會開一次會。
- 6 主席：（經傳譯員）你係咪參與呢個委員會嘅？
- 7 邱倩雯女士：冇錯，我係。
- 8 主席：（經傳譯員）而家？
- 9 邱倩雯女士：係。
- 10 主席：（經傳譯員）你已經代表咗警方幾耐？
- 11 邱倩雯女士：我由舊年嘅 2017 年 4 月開始，當我到任喺交通總部呢一個崗位嘅時  
12 候，我就開始有參與呢個會議，但係對上兩次我就冇去到，因為有其他公務，  
13 就有其他同事代去嘅。
- 14 主席：（經傳譯員）但係你一路都知道係傾咗啲乜嘢，係咪？肯定。
- 15 邱倩雯女士：係。
- 16 黃女士：（經傳譯員）即係你傾過啲乜嘢？
- 17 邱倩雯女士：以我所記得嘅，就未必係全部，例如有一啲細路仔嘅安全帶，喺車裏  
18 面，細路仔嘅安全帶，亦都有提過就係延長交通燈號綠公仔讓行人可以有長啲  
19 嘅過路時間，例如畀老人家嘅長啲嘅過路時間，有一個--我哋而家講嘅  
20 walkability，即係行人--多啲行人去行路，即係呢個係我印象所及嘅其中幾  
21 個嘅研究報告。
- 22 黃女士：What about technological
- 23 主席：（經傳譯員）等一等先。呢一啲嘅研究係咪公開可以攞到嘅？
- 24 邱倩雯女士：呢個我唔係太清楚。
- 25 黃女士：（經傳譯員）你開會有冇會議紀錄？
- 26 邱倩雯女士：有嘅。
- 27 主席：（經傳譯員）你只不過係 2017 年 4 月先參與呢個委員會，當然而家都差唔多  
28 十八個月，好肯定你係可以睇到以前嘅紀錄嘅，係咪？
- 29 邱倩雯女士：可以搵到嘅。

1 主席：（經傳譯員）肯定如果你想做得好呢個工作，你係要睇番以前嗰啲嘅物料、資  
2 料。

3 邱倩雯女士：對於再之前嘅報告我就有特別去睇過。

4 主席：（經傳譯員）黃律師。

5 黃女士：（經傳譯員）因為呢一個委員會叫做道路安全研究委員會，佢哋有冇傾過喺  
6 嗰路段嗰度或者喺嗰繁忙嘅道路，譬如話喺德輔道中嗰啲，會唔會將佢減速，  
7 有冇傾過呢啲問題呢？

8 邱倩雯女士：以我印象中，就有特別提過，即係關於減低速度，有。

9 黃女士：（經傳譯員）一般嚟講，巴士安全有冇傾過呢？

10 邱倩雯女士：有，我要返去再睇下一啲研究報告先記得，但係而家即時諗起就有。

11 黃女士：（經傳譯員）唔該。我想請問一個一般性問題，230 章，你覺得可以點樣將  
12 佢修改或者係加強去加強巴士嘅安全呢？因為你有呢啲執法經驗，你認為可以  
13 點樣做呢？

14 邱倩雯女士：我諗每個法例嘅成立都有一個立法原意喺度，Cap. 230A 主要都係針  
15 對就係喺巴士上面嘅乘客嘅行為同埋整個專營巴士嗰個運作嘅一啲規管，在於  
16 警方係需要執法，我諗就係可唔可以讓我哋比較順利執法，係我比較著重嗰個  
17 重點。

18 黃女士：（經傳譯員）我哋既然係講緊執法，我而家就會去最後一個題目，我相信其  
19 中一個你提供嘅回覆，你就話有五十宗致命意外，...

20 主席：（經傳譯員）你未講呢啲細節之前，有一啲嘢我都想跟進，我哋好幸運，白令  
21 嘉先生你就係參加道路安全運動委員會，同埋邱女士你係警方嘅代表就喺道路  
22 安全研究委員會嗰度，我就想請問兩位一個問題，如果有人嘅話，係邊一個，  
23 即係香港嚟講，係香港政府裏面邊一位係主導道路交通嘅安全嘅呢？即係嗰個  
24 動力係來自邊一位呢？邊個係去指令其他人嘅呢？邊個設置嗰啲措施或者政策  
25 嘅呢？

26 邱倩雯女士：我相信喺整體嘅交通嘅事務嚟講，香港政府運房局都係有個帶頭嘅  
27 policy 嘅角色喺度，政策嘅角色喺度，至於運輸署就係一個行政嘅組織，喺交  
28 通條例上面，或者喺交通嘅設計，道路嘅設計，都係需要 TD 去執行嘅。警方嘅  
29 角色就係根據法例賦予我哋嘅權力，我哋可以點樣盡忠職守咁樣去做好我哋個  
30 個檢控嘅工作。對於有一啲檢控，我哋頭先都有提過有少少束手無策，就例如  
31 係我講嘅違例泊車，咁樣我哋會盡量會喺現行嘅法例畀到我哋嘅權力裏面，我  
32 哋都會盡量做。

33 另外，喺法例嘅譬如修改或者喺道路嘅設計、道路嘅改善，咁樣我哋都會  
34 係--警方都係義不容辭咁樣希望可以供到意見畀運輸署，從而希望可以改善

1 到道路嘅安全，希望交通係暢順，希望係道路亦都每一個使用者都係受到保  
2 障。

3 主席：（經傳譯員）究竟係邊一位係提出一啲意見出嚟，就話我哋跟進啲乜嘢呀？我  
4 哋今日都傾過專利巴士上面嘅安全帶嘅問題或者有其他嘅車輛上面可以有嘅安  
5 全設施呀咁，究竟係邊啲人提出呢啲意見呢？

6 邱倩雯女士：我諗幾方面都會係有唔同嘅意見喺裏面，喺警方日常執法，其實我哋都  
7 會預見到有一啲海外嘅經驗，係可以畀我哋用得到嘅，亦都喺 TD 裏面嘅  
8 research，佢哋嘅研究工作，佢哋亦都會睇到，可能最終都係需要決策局運房  
9 局嗰個支持，無論係喺嗰個科技上面、喺金錢上面、喺法例上面，都希望係可  
10 以得到運房局嗰個最大嘅支持，咁樣喺 TD 同埋喺警方都希望可以喺日常嘅工作  
11 做得更加好。

12 主席：（經傳譯員）你就描述過呢一個運房局係要帶頭咁嘅作用，點樣帶頭法呢？運  
13 房局關於改善專利巴士嘅安全，佢提供過啲乜嘢嘅帶頭作用呢？

14 邱倩雯女士：我相信而家喺運輸署裏面已經有一個工作小組係著意咁樣睇專營巴士嗰  
15 個運作，無論喺佢哋嗰個發牌嘅制度同埋佢哋點樣可以係保障到道路安全，呢  
16 個希望就係運輸署嗰個工作小組可以提出更加多嘅意見畀我哋譬如執法部門可  
17 以去執法，或者喺嗰個政策部門嗰度可以係有更加完善嘅政策去保障各位市  
18 民。

19 主席：（經傳譯員）邊個工作小組呀？

20 邱倩雯女士：今朝聽到係有個工作小組，稍等。

21 主席：（經傳譯員）如果你講緊話加強專利巴士安全嘅工作小組，佢係今年 3 月 13  
22 號成立嘅，...

23 邱倩雯女士：係，冇錯。

24 主席：（經傳譯員）...你係咪講緊呢個？

25 邱倩雯女士：係，冇錯。

26 主席：（經傳譯員）喺呢個小組之前，運房局又提供過啲乜嘢嘅帶頭作用呢？係加強  
27 安全方面嘅。可能對你咁樣問係唔係好公道，但係好似你頭先描述你嘅認識嘅  
28 時候，你就係話嗰個運房局就係會畀一啲帶頭嘅作用，然後你就會執法，然後  
29 運輸署就係要去實施有關嘅政策。

30 邱倩雯女士：以我所知，喺運輸署嗰度亦都有一個關於巴士同埋鐵路嘅一個單位去處  
31 理有關專營巴士同埋鐵路嘅服務嘅，咁樣呢個警方唔係太多嘅 involvement  
32 喺裏面，但係期望就係 TD 可以藉住嗰一個嘅單位可以做多一啲嘢。

33 主席：（經傳譯員）有冇任何人真係帶頭去改善專利巴士嘅安全嘅呢？

1 白令嘉先生：（經傳譯員）主席，關於專利巴士，其實我係唔知道有任何一位人士係  
2 特別係負責專利巴士，其實道路安全議會係一個好好嘅平台讓我哋同埋唔同嘅  
3 有關交通運輸嘅部門可以一齊係交換意見，呢一個平台肯係可以為道路安全嘅  
4 政策起一個帶頭作用，但係我就唔知道有冇其他係咪話有一個委員會係特別處  
5 理專利巴士。

6 主席：（經傳譯員）邱女士，我想再問你，你就係參與道路安全研究委員會嘅，你知  
7 唔知道有冇一個呢啲委員會做嘅研究係講到話專利巴士如果用安全帶有咩嘢好  
8 處嘅？即係當然有啲人未必想用喇。

9 邱倩雯女士：以我嘅記憶，就有啲專利巴士講--即係有講過專利巴士嗰個安全帶問  
10 題，只係有記得就係小朋友嗰個叫 child restraining device 嗰度有提  
11 過，小朋友用嘅安全帶。

12 主席：（經傳譯員）好，唔該你。

13 黃女士：（經傳譯員）跟進呢一點，邊個負責建議議題畀呢一個道路安全研究委員會  
14 商討嘅呢？

15 邱倩雯女士：通常都係由 TD 去畀一啲 consultant's paper，我哋喺開會之前，  
16 我哋會睇，睇完之後，我哋就開會去傾。

17 黃女士：（經傳譯員）可唔可以有委員係去提議任何嘅項目，喺道路安全委員會度  
18 傾？

19 邱倩雯女士：我唔太清楚係由邊度會提出啲題目，咁樣我哋都係由運輸署個秘書處嗰  
20 度通知。

21 黃女士：（經傳譯員）即係話其實都係以運輸署所推動？

22 邱倩雯女士：係，以我所知，係。

23 黃女士：（經傳譯員）邱女士，去到最後一個嘅題目，就係關於 2018 年 5 月 7 號你  
24 提供畀委員會嘅一啲文件，就係關於五十一個係有死亡嘅致命嘅意外，就喺  
25 124-1 頁，就喺嗰個雜項文件夾嗰度，係第 124-1 至到 124-2 嗰個嘅文件，  
26 我就係想問你係某啲嘅問題，係關於用黑盒裏面嘅資料...

27 主席：（經傳譯員）未落之前，呢個其實唔係淨係五十一宗致命意外，其實喺巴士上  
28 面或者附近嘅？

29 黃女士：（經傳譯員）五十一項係致命嘅意外係涉及專營巴士嘅呢啲嘅意外。124  
30 頁，呢度就係講第 2 段，請你係提供一啲細節，係關於係致命意外嘅，就係喺  
31 呢一個嘅 2012 年至到 2014 年 2 月，特別係包括呢一個致命意外方面，同埋係  
32 有啲乜嘢嘅後來嘅檢控，有冇一啲去搵下佢成因等等。

33 主席：（經傳譯員）你未繼續之前，我代表委員會，我就要多謝 Cadman 總警司，其

1 實係佢--佢今日唔喺度，但係佢向我哋提供呢啲資料，佢都係花咗好多工夫嚟  
2 到去製備--喺咁短嘅時間裏面幫我哋製備呢啲嘅資料嘅。

3 黃女士：（經傳譯員）我哋都係好多謝你向我哋提供呢啲嘅文件嘅，有五十一宗嘅致  
4 命交通意外係涉及專營巴士，係第 124-2 頁，呢度係有啲嘅數字--啲個嘅個  
5 案嘅編號同埋啲嘅日期，有三十宗，有二十八宗係定罪，有兩宗係無罪釋放  
6 嘅，係文件嘅第 4 段寫嘅；亦都提供咗係十五宗嘅個案嘅撮要，冇檢控到呢一  
7 個司機，冇進一步嘅行動；有三宗只係有簡單嘅案情，有一宗仲未完結嘅，有  
8 兩個嘅初步報告同埋一宗就淨係係有呢一個嘅案件嘅結果。

9 我哋其實就係想講下你用呢啲黑盒或者係啲行車紀錄儀啲嘅數據係點樣  
10 用㗎？譬如佢哋減速或者係超速，喺一啲嘅法律訴訟程序裏面係點樣用㗎？舉  
11 一啲例子，124-5 頁，呢個就係 2012 年 9 月 5 號，就係一個危險駕駛引致死  
12 亡嘅個案。我哋落去 124-7 頁，呢一個嘅背景就係一宗嘅致命交通意外，喺土  
13 瓜灣道，第 2 段就係一架雙層巴士，係九巴嘅，有一個嘅老婆婆就係死亡，佢  
14 喺啲個安全島過馬路嘅時候發生嘅。

15 喺 124-8 頁嘅度，除咗相片之外，警方都係從九巴攞咗啲嘅行車紀錄數  
16 據，就顯示當啲個嘅巴士係離開車站嘅時候個車速、佢個嘅加速嘅情況同埋  
17 當個車長係刹咗幾次掣、踩咗幾次嘅刹掣。

18 呢度有好多嘅例子，呢個係其中一個。我想問呢啲嘅資料係咪好常喺一啲  
19 法律程序裏面使用嘅呢？

20 邱倩雯女士：喺調查一啲嚴重嘅交通意外，尤其是係有死亡嘅調查裏面，我哋都會係  
21 盡所有嘅辦法，攞齊所有嘅交通紀錄，包括埋巴士上面嘅 CCTV、巴士上面嘅行  
22 車紀錄。咁樣不過要提到一樣嘢，就係巴士個行車紀錄儀喺而家唔係法定必須  
23 要做嘅嘢㗎，如果佢架巴士有嘅話，我哋一定會攞嘅。

24 黃女士：（經傳譯員）一啲非致命意外，又點呀？

25 邱倩雯女士：喺其他如果係有死者嘅個案，係一啲嚴重嘅交通意外裏面，如果有個行  
26 車紀錄儀，我哋都會攞取愛㗎做證據。

27 主席：（經傳譯員）專營巴士自從 2014 年 7 月 1 號已經係要裝呢個黑盒㗎囉，唔  
28 係，抑或係話啲個日子之後所造嘅巴士，所有嘅專營巴士其實個事實就係已經  
29 係有呢一個行車紀錄儀㗎喇。

30 邱倩雯女士：而家喺專利巴士唔係每一架巴士都有嘅，以我哋所知，係小巴、PLB 就  
31 有，但係專利巴士就未係每一部都有。

32 主席：（經傳譯員）可唔可以將啲個嘅要求，有咁樣嘅要求擺上去屏幕嘅度畀我哋睇  
33 呢？我諗我哋係巴士公司畀我哋有咁嘅數據，話佢哋已經事後安裝晒呢啲，你  
34 而家係咪話警方係有遇到一啲專利巴士係冇裝呢個黑盒嘅呢？因為咁就有啲詭  
35 異。

1 黃女士：（經傳譯員）我哋而家搵呢份文件，不如答咗呢個問題先，你有冇遇過一啲  
2 咩嘢困難，想喺一啲非致命嘅意外度想搵黑盒嘅資料？

3 邱倩雯女士：我相信如果係佢本身已經有啲個資料喺度，我哋係冇困難去擷取呢啲資  
4 料嘅。

5 黃女士：（經傳譯員）TD-5 1597 頁，呢個係運輸署一封嘅信件，2003 年 10 月  
6 17 號嘅，就講到電子數據紀錄儀器最基本嘅要求，我哋睇到最起碼嘅要求就係  
7 有電子數據紀錄儀，呢個係喺 1598 頁，我哋第 1 段。電子數據紀錄儀嘅目的就  
8 係畀巴士公司有一個工具去監察同埋管理路上嘅車速同埋安全，即係佢啲個巴  
9 士啲個呢方面嘅行為，同埋係間接咁樣係鼓勵到良好嘅駕駛習慣，呢一個嘅儀  
10 器應該係提供以下嘅數據嘅，每一秒同埋啲個記--所能夠儲存嘅數據係喺一個  
11 嘅兩星期嘅期內每三十秒佢啲個嘅運作時間開車、啲個嘅轉動時間、係完成嘅  
12 時間等等。九巴同埋城巴亦都有一啲嘅講解話佢哋而家係更新咗黑盒嘅數字，  
13 係可以裏面係包含多啲嘅數據。

14 喺運輸署文件 8，我相信係 TD-1 第 87 頁，...

15 主席：（經傳譯員）呢個係運輸署提供畀委員會，喺我哋一開始研訊嘅時候提供嘅文  
16 件，我諗我哋要去睇 (c) 段最後一句，就話「而家所有嘅專營巴士都已經係有黑  
17 盒同埋呢一個車速限制器嘅」。

18 黃女士：Yes, "and speed limiters".

19 主席：（經傳譯員）或者我哋岔開咗一啲，我哋而家啲個嘅重點係講巴士，當然你啲  
20 個範疇係闊啲，我係想問你，你有幾常使用黑盒裏面嘅數據嚟到做檢控呢？

21 邱倩雯女士：而家喺--我頭先講過而家喺有--牽涉有死亡同埋一啲嚴重嘅交通意  
22 外，都會用到黑盒裏面嘅資料嘅，咁樣呢個亦都係喺警方調查裏面都--如果有  
23 啲個紀錄，我哋都唔會係好困難咁樣擷到，我相信喺我哋嘅交通意外調查組嘅  
24 同事都會係將所有嘅證據一併去考慮，然後作出檢控。

25 黃女士：（經傳譯員）可唔可以話畀我哋聽有冇困難，就話點解呢啲嘅數據係除咗喺  
26 一啲致命或者係嚴重嘅意外之外，喺一啲輕微嘅意外你唔用？

27 邱倩雯女士：我諗就係即係每一個案情都會有唔同，如果即係講話一啲有咁嚴重嘅交  
28 通意外，可能就係好普通嘅跌嚟、整嚟，咁樣呢個可能係唔牽涉係一個交通嘅--  
29 --即係嚴重交通意外需要所調查嘅方向，呢個我諗我哋都會再作檢討，喺每一宗  
30 嘅交通意外調查裏面，睇下係咪--都根據案情不論係嚴重或者唔嚴重我哋都需  
31 要擷呢個證據。

32 黃女士：（經傳譯員）喺所有嘅個案，你知唔知道啲黑盒數據係咪都係報告咗，譬  
33 如啲加速、減速，係咪所有嘅喺法庭裏面，有冇人質疑過呢？

34 邱倩雯女士：我手頭有呢一個分析嘅資料喺度。

- 1 黃女士：（經傳譯員）喺啲五十一宗...
- 2 主席：（經傳譯員）畀時間傳譯員譯咗先。
- 3 黃女士：（經傳譯員）唔好意思，...
- 4 主席：（經傳譯員）你未繼續之前，你可唔可以係幫我哋去查詢下，然後畀番個答案
- 5 我哋？
- 6 邱倩雯女士：可以。
- 7 黃女士：（經傳譯員）我知道小巴喺啲個有關嘅法例係有講到呢啲電子資料紀錄儀
- 8 嘅，係咪可以接納成為呈堂證供。
- 9 主席：（經傳譯員）可唔可以將佢擺上去個網度呢？
- 10 黃女士：Yes.
- 11 主席：（經傳譯員）係咪有一條嘅條款，就係令到用黑盒嘅數據做檢控係容易啲嘅。
- 12 黃女士：（經傳譯員）係。
- 13 主席：（經傳譯員）請問可唔可以話畀我哋聽啲個參考嘅編號？
- 14 黃女士：（經傳譯員）係，我哋搵緊有關嘅文件，或者我講咗個要點先，或者我哋需
- 15 要幾秒嘅。
- 16 主席：（經傳譯員）係，冇問題。係咪有另外一條條例嘅呢？
- 17 黃女士：（經傳譯員）呢個係關於道路安全嘅。
- 18 主席：（經傳譯員）係咪 374 章呀？
- 19 黃女士：Cap. 374.
- 20 主席：（經傳譯員）道路交通，因此就係同呢一個一般性嘅《道路交通條例》係有
- 21 關，係咪？
- 22 黃女士：Yes.
- 23 主席：（經傳譯員）好肯定我哋有人會幫我哋搵，我哋不如繼續，好唔好呀？
- 24 黃女士：（經傳譯員）一般嚟講，有一個具體嘅條文，係我哋修訂咗個條例之後，就
- 25 係講到邊啲嘅證據可以係法庭接納嘅，即係譬如話係公共小巴上面嘅電子紀錄
- 26 系統，咁就令到控方更加容易係舉證嘅。我個問題就係警方會唔會歡迎類似嘅
- 27 一種修訂呢？即係好似公共小巴有嘅條文，你會唔會歡迎呢？令到專營巴士嘅
- 28 黑盒資料都可以係接納呢？
- 29 邱倩雯女士：我同意嘅。

1 黃女士：（經傳譯員）主席，視乎我哋搵唔搵到嗰個具體嘅條文，我嘅提問已經完結  
2 喇。

3 主席：Very well.

4 邱倩雯女士：我想有少少補充，唔好意思。

5 黃女士：Thank you.

6 邱倩雯女士：頭先講嘅五十一宗嘅 fatal cases，因為喺預備嘅時間比較可能倉卒  
7 咗一啲，其實有一單係 number 19，嗰一單就係牽涉係 PLB 嘅，就唔係專利巴  
8 士，所以嗰個數字係有五十宗，一共係。

9 主席：（經傳譯員）唔該晒。即係嗰度係有專利巴士牽涉在內？

10 邱倩雯女士：係。

11 黃女士：（經傳譯員）我相信應該係 374A 章，《道路交通公共服務車輛規例》...

12 主席：（經傳譯員）係喇，呢啲就係嗰個儀器嘅規格，但係都應該有一條條文係關於  
13 舉證，係咪？可能係第 25 條㗎，有冇呢？或者我哋睇一睇 24 條，唔該，係，  
14 我哋成條睇一睇。或者我哋遲啲再將佢搵出嚟，肯定有一條係關於舉證嘅。今  
15 日喺呢度嘅警方代表可唔可以協助我哋，有冇試過動用過呢一個關於公共小巴  
16 嘅舉證條文呢？即係話當你檢控嘅時候，你係可以用黑盒嘅資料嚟去確定當時  
17 嘅車速㗎？

18 李大偉先生：有關--據我哋了解，我哋手頭有準確數字有關於幾多單案件引用呢個嘅  
19 數字，但係我印象之中係有一單案件曾經呢個裝置曾經喺法庭畀辯方去爭議  
20 嘅，亦都大家係會請咗互相嘅專家去爭論呢個個合法性同埋準確性嘅，結論就  
21 係法庭接納咗呢個 EDRD 嘅作用同埋佢嘅指定安裝人，而成功檢控個個案嘅。

22 主席：（經傳譯員）仲有另外一個方面嘅，即係關於公共小巴，仲有其他嘅條例都係  
23 同我哋今日考慮嘅事件係相關嘅，就係話專營巴士係咪都應該有呢一啲嘅速度  
24 顯示器，就係好似公共小巴咁樣，讓乘客都知道個車速？我要問嘅問題就係有  
25 冇一啲嘅困難或者衝突，係公共小巴嘅司機同埋乘客因為都睇到嗰個車速，就  
26 令到譬如話公共小巴嘅司機就係冇符合呢個車速，因為乘客睇到，咁就造成困  
27 難，有冇試過呢？

28 邱倩雯女士：有呢個難度，我相信就係如果乘客都可以睇到嗰個車速嘅話，呢個亦都  
29 係可以更加有效地保障到嗰個交通安全。

30 黃女士：（經傳譯員）主席，我已經搵到有關嗰個條文。

31 主席：（經傳譯員）唔該晒你。你講之前，有冇試過喺公共小巴嘅乘客就係影相，將  
32 嗰個車速顯示器係影相，然後就係提出一個投訴嘅，你知唔知道有咁嘅事呢？

1 李大偉先生：我哋有呢方面嘅資料。

2 主席：（經傳譯員）黃律師。

3 黃女士：（經傳譯員）主席，係喺 67A 條，喺番個主體條例，《道路交通條例》  
4 本身嗰度，67A 條，我哋可以睇第 (6) 款，應該係關於電子數據嘅紀錄系統嘅，  
5 呢一度就係講到話可以檢取有關嘅數據嘅權力嘅，第 (6) 款就話喺任何刑事程序  
6 當中，如果有一份文件就話係根據第 (5) 款 (b) 條檢取到嘅數據紀錄，佢就會係  
7 被法庭接納作為證據，就唔需要再進一步去舉證嘅。(5) (b)，你可以睇到就係  
8 話喺嗰個裝置咗嘅電子紀錄系統裏面嘅數據，而呢一個安裝嘅人就係由運輸署  
9 署長——對唔住，係警務處處長係授權佢做呢一個安裝嘅。

10 主席：（經傳譯員）邱女士，我諗你會同意，你都會係歡迎一個咁樣嘅條文，係用喺  
11 呢個專營巴士？

12 邱倩雯女士：（經傳譯員）係，我同意。

13 黃女士：（經傳譯員）主席，我係完成咗我喺呢方面嘅提問。

14 主席：（經傳譯員）好，唔該。仲有一、兩件事係要處理嘅。我哋知道除咗黑盒數據  
15 係有或者冇之外，而家其實喺好多巴士上面都有閉路電視，佢哋係可以攝錄咗  
16 好多事件嘅，尤其是一啲係前置嘅鏡頭，就可以讓你睇到係發生咩嘢事，亦都  
17 有一啲嘅攝錄機亦都係可以影到巴士嗰個車長個位嘅，呢一啲攝錄機裏面嘅紀  
18 錄係咪都用過嚟做檢控呢？我就記得五十宗嘅致命意外裏面，喺鯉魚門嗰度有  
19 一架巴士係翻側嘅，佢哋與其用嗰個黑盒嘅數據，佢係用番閉路電視裏面影到  
20 嘅嘢係去顯示個車速嘅。

21 邱倩雯女士：喺警方嘅意外調查裏面，我哋都可以係用到車裏面嗰個行車嗰個攝錄裏  
22 面嘅片段嘅，但係嗰個片段亦都係需要冇證人去提供呢一個證據，咁樣結合咗  
23 嗰個影像同埋口供嘅話，呢個係可以用嚟檢控裏面嘅。

24 主席：（經傳譯員）好，淨係講番閉路電視，係咪而家好多時都會用到嘅呢？就算你  
25 打劫銀行等等，都會係用到閉路電視嘅。

26 邱倩雯女士：有，而家喺好多嘅刑事檢控嗰度都有用到嘅。

27 主席：（經傳譯員）你頭先講話要證人，關於嗰個攝錄機仲要需要咩嘢證人？

28 邱倩雯女士：我諗最主要我哋需要嗰個 author，個原作者，邊一個譬如係  
29 install 嗰個相機，嗰個相機裏面嗰個影像有冇人去騷擾過、干擾過，呢啲資  
30 料需要...

31 主席：（經傳譯員）即係話係《證據條例》裏面第 22 條，應該係有一個電腦嘅，係  
32 咪？

33 邱倩雯女士：未必係電腦，可能係一個 chip，一個錄影帶，錄影嘅 chip。

- 1 主席：（經傳譯員）即係話你需要有人就係話係咪有人干擾過佢，...
- 2 邱倩雯女士：冇錯。
- 3 主席：（經傳譯員）...即係你需要一個技術員，而唔係一個證人？
- 4 邱倩雯女士：呢個視乎嗰個 cam. recorder 係有幾先進，有一啲係可能比較容易  
5 啲，自己車主可以做嘅，有啲可能係需要到譬如一啲 technician，一啲有技  
6 術嘅人做。
- 7 主席：（經傳譯員）我哋而家係講緊專營巴士，其實巴士車長都唔可以自己擺自己嘅  
8 攝錄機喺度，其實所有呢啲嘅攝錄機都係巴士公司安裝同埋維修嘅，我哋知道  
9 佢哋係安裝喺邊度，我哋亦都見到係有黑盒嘅數據嘅。
- 10 邱倩雯女士：我相信專利巴士公司嗰個行車紀錄儀係一定有一啲監管喺嗰度，就唔係  
11 個司機自己可以係擺到出嚟，咁樣，因為呢個除咗係一啲行車嘅紀錄嘅數據之  
12 外，亦都對於巴士公司嘅管理可能佢哋嗰度一啲資料佢係需要嘅，所以喺專利  
13 巴士嗰個 CCTV 係由巴士公司去管理，呢個係理解嘅。
- 14 主席：（經傳譯員）當然，巴士公司亦都有佢哋嘅資訊科技部門，好簡單，就係要有  
15 安裝，唔可以有干擾，就可以確保到嗰啲嘅影片嘅有效性，係咪？你問九巴嗰  
16 啲人畀你一個嘅證供，話所有嘢都係運作良好，就證明到佢喇。
- 17 邱倩雯女士：係。
- 18 主席：（經傳譯員）呢個就成為一啲好有價值嘅資料㗎喇？
- 19 邱倩雯女士：我唔知道佢哋需要幾多時間可以預備到，但係都喺一個調查裏面，我都  
20 希望佢哋係儘快可以配合。
- 21 主席：（經傳譯員）歐陽先生。
- 22 歐陽先生：（經傳譯員）我就而家想講番道路安全議會，希望兩位警司幫到我。你哋  
23 都係有參與過呢兩個委員會，你就知唔知道有冇任何嘅建議係畀房運局嘅呢？  
24 由呢一個議會，係關於安全嘅問題。
- 25 白令嘉先生：（經傳譯員）喺我所參與嘅兩次會，有一啲新嘅建議。
- 26 歐陽先生：（經傳譯員）睇番下嗰啲嘅會議紀錄，你知唔知呢個議會有冇向房運局提  
27 過啲咩嘢建議或者係畀房運局就係推翻或者係拒絕接受？
- 28 白令嘉先生：（經傳譯員）我就唔知道，我睇過過去嗰兩年嘅會議紀錄，但係我就睇  
29 唔到話係有啲咩嘢嘅建議係被拒絕或者係唔接受。
- 30 歐陽先生：Thank you. Ms Yau, same thing?
- 31 邱倩雯女士：喺研究嘅委員會裏面，我諗我都需要再睇睇佢有啲乜嘢嘅研究報告喺過

1 往幾年係可能有提及過一啲安全措施，我返去要睇睇。

2 歐陽先生：（經傳譯員）好，唔該主席。

3 主席：（經傳譯員）羅教授。

4 羅先生：（經傳譯員）我就有兩個嘅問題，第一個就係運輸署會唔會定期咁樣研究下  
5 啲啲意外嘅數字，睇下有啲咩嘢可以改善呢？係咪運輸署嘅工作之一呢？

6 白令嘉先生：（經傳譯員）係，運輸署係會睇下交通意外嘅數字，然後喺呢個議會嘅  
7 度係提供一啲嘅結論嘅。

8 羅先生：（經傳譯員）警方會唔會咁做？

9 白令嘉先生：（經傳譯員）警方就會咁做就係希望係針對我哋嘅執法同埋去制定一啲  
10 宣傳嘅資料去到特定嘅受眾，要嚟做宣傳。

11 羅先生：（經傳譯員）咁樣講公唔公道呢？警方嘅角色係執法、調查意外同埋去管理  
12 呢一個數據庫，呢個就係警方嘅基本角色，係咪？

13 白令嘉先生：（經傳譯員）係。道路安全嗰個策略嗰個整體係有三方面嘅，就係要有  
14 參與，有工程方面同埋係執法，警方個主要嘅角色就係執法，同埋部分係要去  
15 令到公眾係參與，而喺工程方面，係多啲由運輸署同埋路政署嚟到去做嘅。

16 主席：（經傳譯員）好，黃大律師，委員問過嘅問題，你有冇進一步嘅追問？

17 黃女士：（經傳譯員）冇。

18 主席：（經傳譯員）如果係咁，委員會就想多謝幾位代表今日出席咗好長嘅聆訊，我  
19 哋亦都希望你提供我哋所要求嘅資料，我哋就係希望儘快係將佢哋成為一個清  
20 單，係畀你哋知道，亦都畀埋有關嘅研訊謄本畀你，就希望你就係可以跟進  
21 嘅。我哋今日嘅取供嘅程序就完成，我哋就會喺星期四再繼續，多謝。

(9.00 am)

EXPERT EVIDENCE OF MR MIKE WESTON

CHAIRMAN: Good morning, Mr Weston.

MR MIKE WESTON: Good morning.

CHAIRMAN: Thank you for travelling from London to Hong Kong to assist us with our inquiry.

As you no doubt know, we are assisted by counsel who will pose questions to you, although there may be questions that we, the committee, wish to pose to you. If any of our questions are less than clear, by all means indicate that that is the case and we will see what we can do to make sure that the question is accurate.

I will ask Mr Duncan then to begin the evidence.

Examination by MR PETER DUNCAN

MR PETER DUNCAN: Thank you, Mr Chairman.

Mr Weston, good morning.

MR MIKE WESTON: Good morning.

MR PETER DUNCAN: I would like to echo the chairman's remarks and thank you for the assistance that you have rendered to the committee, and in particular for furnishing the committee with a written report.

Could I ask you to turn up that report, please, which will be found in bundle EXP-1 at page 115.

1           There are a number of topics that I wish to explore  
2           with you, but before doing so I'm going to ask you a few  
3           questions about your background and your experience, and  
4           then also the context in which you have provided your  
5           report.

6           So with regard, first of all, to your own  
7           experience, can I direct you, please, to page 118 of the  
8           bundle, and the section headed "Context", and the second  
9           paragraph:

10          "This report has been prepared by [yourself]  
11          an independent consultant with over 30 years' experience  
12          within the bus industry including senior roles at  
13          Transport for London most recently as director of  
14          buses."

15          Then there is reference to a career resume at  
16          appendix A.

17          I think if we would go to appendix A -- you will  
18          find that at page 157, where we have the benefit of  
19          "Personal profile", "Recent career history", and "Other  
20          professional interests".

21          If I could just direct your attention to the section  
22          headed, "Director of buses, Transport for London", and  
23          under that part of the page, going back to 1999 to 2003,  
24          "Head of bus infrastructure, London Buses". Can you  
25          tell us a bit about what that involved?  
26

1 MR MIKE WESTON: Yes. As head of bus infrastructure, which  
2 I was appointed to in 1999, prior to that I had been  
3 heavily involved in evaluation of bus route tenders.  
4 But in 1999 I was appointed head of bus infrastructure  
5 and had a range of responsibilities but was primarily  
6 responsible for the provision of all the bus  
7 infrastructure for the bus network; that's bus stops,  
8 bus shelters, bus stations, some of the bus garages  
9 which TfL owned but that wasn't the majority. So  
10 responsible both for the provision of the infrastructure  
11 but also for the day-to-day operation of that  
12 infrastructure.

13 That role also included an oversight of the  
14 engineering and bus specifications for the bus  
15 operators, so buses were included in that definition of  
16 infrastructure in that role.

17 MR PETER DUNCAN: Were you concerned with the safety of  
18 buses at all in that role?

19 MR MIKE WESTON: No, not directly. Clearly, I was  
20 responsible for the safety of the infrastructure. So,  
21 for example, the safe operation of bus stations, and  
22 monitoring of that locally. It was the role head of bus  
23 operations in 2003 where I became responsible for the  
24 safety of the London bus network, and then subsequently  
25 in 2004 as operations director.

1           So clearly, as head of bus infrastructure, there was  
2           clearly a role in terms of safety, as you would expect,  
3           but in terms of overall safety responsibility for the  
4           bus network, that was assumed in 2003.

5   MR PETER DUNCAN:   And that's when you took up the position  
6           of head of bus operations?

7   MR MIKE WESTON:   Yes, that's correct.

8   MR PETER DUNCAN:   Then operations director -- you have  
9           touched on that already -- could I just ask where that  
10          position sat within the management hierarchy of  
11          Transport for London?

12   MR MIKE WESTON:   Yes.   So at the time there were three  
13          directors, actually, reporting in on the bus side of the  
14          Transport for London business.   I was the operations  
15          director.   There was a performance director who was  
16          responsible for the performance of the bus contracts.  
17          And then there was a finance director who also had other  
18          responsibilities for other parts of the organisation.  
19          We reported into a managing director who, as well as  
20          being responsible for London Buses, was responsible for  
21          other modes within TfL, and he reported into the  
22          Commissioner for Transport for London.

23   MR PETER DUNCAN:   Then, in 2013, you were appointed director  
24          of buses.   How did that position relate to your previous  
25          position as operations director?

26

1 MR MIKE WESTON: In 2013, the decision was taken to combine  
2 the roles of performance director and operations  
3 director into one role. So, effectively, this new role  
4 of director of buses became responsible for the bus  
5 network, reporting into the managing director. As  
6 I said, the managing director had other responsibilities  
7 for the surface transport operation within London, so  
8 really the director of buses was responsible day to day  
9 for the provision of the bus network, the management of  
10 the contractors, and as it says there in the evidence,  
11 the budget of about 2 billion pounds per annum for the  
12 procurement of the bus network.

13 MR PETER DUNCAN: You have referred in the second paragraph  
14 there to the fact that included responsibility for the  
15 provision of a "safe network"?

16 MR MIKE WESTON: Yes. As I previously said, probably the  
17 head of bus operations was when I first became  
18 responsible for the safety team that was allocated to  
19 London Buses. Operations director took forward that  
20 role, but clearly, as director of buses, as the senior  
21 manager responsible for the bus network, I also assumed  
22 responsibility for the safe operation of that network.

23 MR PETER DUNCAN: You left that organisation, as  
24 I understand it, in 2016, September.

25 MR MIKE WESTON: Yes.

26

1 MR PETER DUNCAN: Since then, you have been working as  
2 an independent consultant. Can you tell us just  
3 a little bit in your own words what that work has  
4 entailed?

5 MR MIKE WESTON: Yes. It is probably worth just saying that  
6 I took the opportunity to leave the organisation in 2016  
7 as part of a sort of planned restructuring, and  
8 I volunteered to leave after 31 years.

9 As an independent consultant, I now focus on the bus  
10 industry, and there are two main areas of my focus. One  
11 is the environmental management of bus fleets, and  
12 that's an area where I gained quite a lot of experience  
13 in previous roles at Transport for London, but also  
14 franchising and tendering of bus services and network  
15 design, and I have been providing some support to  
16 a number of transport authorities within Europe on those  
17 subjects.

18 MR PETER DUNCAN: Thank you. I now ask you to go back,  
19 please, to page 118 of your report, and just focus on  
20 the context in which you have provided this report.

21 I think if I could just read out quickly some  
22 excerpts from this, so we all understand the context.  
23 The first paragraph:

24 "This report has been commissioned by [the  
25 committee] ... to seek further understanding on the  
26

1 organisation and structure of the London bus franchising  
2 system and to ascertain best practice which could  
3 potentially be used in Hong Kong to further improve the  
4 existing franchising model. The committee have already  
5 had sight of Transport for London's document titled  
6 'London's bus contracting and tendering process' dated  
7 August 2015."

8 Then if we jump a couple of paragraphs down:

9 "In commissioning the report, the IRC have asked for  
10 the following:

11 (i) A description of the regulatory and governance  
12 arrangements together with the operations and management  
13 of franchised buses in London, having regard to bus  
14 safety.

15 (ii) A summary of the regime obtaining in Hong Kong  
16 in respect of franchised buses.

17 (iii) So that, having regards to the differences in  
18 the two regimes at (i) and (ii), you are asked to  
19 express opinions as to the adequacy of the regime  
20 obtaining in Hong Kong and make recommendations, as are  
21 warranted in your opinion, to enhance the safety of the  
22 franchised system in Hong Kong."

23 Then the final paragraph:

24 "Sections 2 to 5 of the report give an overview of  
25 London's public transport system, explains the structure  
26

1 of the UK bus industry and the history of London's bus  
2 contracting regime and describes the current bus  
3 contracting regime and how contractor performance is  
4 monitored and managed. Section 6 gives an overview of  
5 safety management within London's bus industry and  
6 section 7 describes the various initiatives currently  
7 being delivered by Transport for London and the  
8 contracted bus operators under the bus safety programme.  
9 The report concludes in section 8 with the author's  
10 observations and opinions of how the approaches adopted  
11 in London could be used to improve the Hong Kong  
12 regime."

13 So there we have the context in which your report  
14 has been written.

15 You have referred, in that section, to some  
16 differences in the two regimes, between London and  
17 Hong Kong, and in order that we all understand what  
18 those differences are, I would just like to refer to  
19 a few of those before I explore some of these topics  
20 with you.

21 The first, if we go to page 120 of your report, you  
22 will see the number of passenger journeys in London, at  
23 2.2 billion, I think that's in a year. So that's the  
24 approximate number of passenger journeys.

25 In Hong Kong -- I will simply give everybody the  
26

1 reference rather than taking you to the document -- but  
2 at THB-2, page 103, we can work out that the equivalent  
3 number of passenger journeys in Hong Kong is  
4 1.4 billion. So that's the comparison with regard to  
5 numbers of passenger journeys.

6 The second comparison I would like to bring to your  
7 attention is the proportion of the populations within  
8 the two areas which use public transport.

9 Perhaps we will go to the bundle on this occasion;  
10 I'm not sure whether you have seen this. If you look at  
11 THB-2, page 2, footnote 2 on that page -- this is from  
12 a public transport strategy study conducted by the  
13 Transport and Housing Bureau in June of last year, and  
14 if you look at the footnote at the bottom of that page:

15 "According to a study conducted by the Land  
16 Transport Authority of Singapore in November 2014, the  
17 public transport usage rate in Hong Kong was the highest  
18 among 27 major cities."

19 And you can see from item 2 that the ratio in  
20 Hong Kong is as high as 90 per cent, and the comparator  
21 in London is 30 per cent. The 90 per cent you will see  
22 in paragraph 1.4 on that page:

23 "Public transport services are closely related to  
24 the daily life of the public. Every day, over  
25 12 million passenger trips are made through different  
26

1 public transport services in Hong Kong. This accounts  
2 for over 90 per cent of the total passenger trips each  
3 day, which is the highest in the world."

4 So I just bring your attention also to that  
5 statistic.

6 The third matter perhaps which is worthy of mention  
7 is the percentage of bus use as a percentage of the  
8 overall public transport journeys undertaken. You have  
9 referred to this yourself at page 120. I have  
10 a reference to 56 per cent in my notes. Perhaps I will  
11 have to check that.

12 In Hong Kong, if we are on THB-2 at page 103, we  
13 will see that franchised buses, at item 2, account for  
14 31.1 per cent, whereas heavy rail, which you can read as  
15 the MTR, is at 38.9 per cent. So there is a greater  
16 quantity in favour of the heavy rail system.

17 CHAIRMAN: Obviously that's the figure for Hong Kong, and  
18 that accords with my own memory, but what are you  
19 suggesting is the figure of the percentage of the use of  
20 franchised buses in London as a proportion of public  
21 transport in London?

22 MR PETER DUNCAN: Mr Chairman, I have --

23 CHAIRMAN: Perhaps Mr Weston can help.

24 MR PETER DUNCAN: Do you have that percentage at your  
25 fingertips, Mr Weston?

26

1 MR MIKE WESTON: I can't -- no doubt somebody has  
2 a calculator on the screen but it's over 50 per cent,  
3 because obviously 2.2 billion out of just under  
4 4 billion is more than 50 per cent, so it's 50-odd --  
5 56 per cent it comes up as, yes.

6 CHAIRMAN: Right.

7 MR PETER DUNCAN: So that's the 2.2 billion over 3.9 million  
8 on that page?

9 MR MIKE WESTON: Yes.

10 MR PETER DUNCAN: I think that's where I got the 56 per cent  
11 from.

12 MR MIKE WESTON: Mr Chairman, those two tables aren't  
13 entirely comparable, because for example, I noticed on  
14 the Hong Kong figures you have ferries included, where  
15 in London there are some river commuter services  
16 included, so they're not -- but the magnitude of the  
17 figures is correct.

18 MR PETER DUNCAN: Thank you. The fourth difference is the  
19 number of buses on respective networks. You have  
20 referred to this at page 126 of the report, where we see  
21 a reference of the bus fleet in 2018 consisting of 9,200  
22 buses.

23 I can give you the equivalent in Hong Kong -- I can  
24 simply give members the reference to the page -- it's  
25 THB-1 at page 30, paragraph 7. The equivalent number in  
26

1 Hong Kong is approximately 6,000.

2 Moving on to another difference, and this is the  
3 kilometres travelled annually by buses in the two  
4 territories. We can see, for London, this figure at  
5 page 120, just under the chart:

6 "During the period 2017/2018 the bus network  
7 operated 490 million kilometres ..."

8 Now, the equivalent figure for Hong Kong -- I will  
9 ask the assistant to turn up the bundle at THB-1,  
10 page 30, at paragraph 7. By multiplication, we get  
11 a figure almost the same as London, 500 million  
12 kilometres:

13 "About 6,000 franchised buses operate on the road  
14 every day. On average, franchised buses run over  
15 1.4 million kilometres every day."

16 Now, there is an interesting result of those  
17 figures, and that is the number of kilometres travelled  
18 by each bus in each territory per year. So, in London,  
19 if we divide 490 million kilometres by number of buses,  
20 that's 9,200, we get 53,260 kilometres per bus per year.  
21 In Hong Kong, if we divide the 500 million by the 6,000  
22 buses, then we get a figure of something like  
23 83,333 kilometres per bus per year.

24 Moving away from those statistics with regard to  
25 road use, and looking at the periods of contracts under  
26

1       which the bus operators work -- in London, you have set  
2       out for us the fact that London bus contracts typically  
3       run for an initial period of 5 years with the potential  
4       for a two-year extension.

5       We can see that on page 129, in the very last  
6       paragraph on that page.

7       In Hong Kong, by comparison -- and I will simply  
8       give the committee the reference again: it's TD-1 at  
9       page 73, paragraph 4; and TD-1, page 74, paragraph 8 --  
10      we have a franchise period of ten years, and that can be  
11      extended on application by five years or two years,  
12      depending on when the application for the extension is  
13      made.

14      Just one question for you, if I may, Mr Weston, with  
15      regard to the London franchise -- London contracting  
16      operation. It's five years, with the opportunity of  
17      an extension for two. Can a bus operator normally  
18      expect to get that same route back again at the end of  
19      the seven-year period, or are the chances of renewal of  
20      that route effectively not automatically in his favour.

21      MR MIKE WESTON: No. If the route runs for either five or  
22      seven years, it will then go back out to competitive  
23      tender. Clearly, the incumbent often has an advantage  
24      because perhaps the reason that they were successful  
25      with the route the first time was because they had  
26

1 a garage or a depot nearer to the route than their  
2 competitors. But, when it goes back out to tender,  
3 clearly they will bid for it and so will other  
4 operators, and it often depends on the state of the  
5 market at the time. If another operator has recently  
6 lost some routes, they may decide to be more competitive  
7 on this route to try to win this route from the  
8 incumbent.

9 I haven't got the exact percentages, but I think  
10 it's about two-thirds -- about 70 per cent of routes  
11 stay with the incumbent upon re-tendering; 30 per cent  
12 move between operators at the point of re-tendering.

13 MR PETER DUNCAN: Thank you.

14 Then another matter I would like to raise with you  
15 is the number of bus operators working on the London  
16 network. You have referred to this at page 126 of the  
17 report, where we see a reference to domination by six  
18 large bus groups, and then several smaller companies  
19 making up the remaining 5.6 per cent of the network.

20 Now, as you know, in Hong Kong, the franchised bus  
21 operators consist of three groups, and I think it's fair  
22 to say that the public in Hong Kong are quite aware of  
23 the difference between, say, Kowloon Motor Bus on the  
24 one hand and Citybus on the other.

25 With the number of bus networks in London, is the  
26

1 difference between the different bus companies something  
2 which is noticed or appreciated by the public? Does  
3 that have any effect on public use?

4 MR MIKE WESTON: Some members of the public will realise  
5 that their local bus is run by a particular operator,  
6 but the big difference between Hong Kong and London in  
7 this respect is that all the buses in London are painted  
8 red and have the Transport for London, London Buses,  
9 logo on the side. They also have the bus company logo  
10 on the side, but to most members of the public, it is  
11 a red bus, it is run by Transport for London as far as  
12 they are concerned, and if you asked most people in  
13 London who is responsible for the buses, they would say  
14 the Mayor of London is responsible, and people -- I'm  
15 sure a lot of members of the public realise there are  
16 different companies, but I think they very strongly  
17 understand that actually those companies are working for  
18 the transport authority, because the ticketing is  
19 provided by the transport authority, they pay the  
20 transport authority for their fares. So there is  
21 a strong recognition that there is a coordination by the  
22 transport authority in London.

23 MR PETER DUNCAN: So the average Joe Public would see a bus  
24 as being a bus of Transport for London rather than a bus  
25 of, say, Stagecoach?

26

1 MR MIKE WESTON: Yes, that's correct.

2 CHAIRMAN: Although the name of the individual bus operator  
3 is located on the bus itself, on the exterior, is it  
4 not?

5 MR MIKE WESTON: Yes, that's correct. So as well as the  
6 London Buses, Transport for London logo on the side of  
7 the vehicle, the operator's logo is also displayed on  
8 the side. But as I said, the buses are all red, so to  
9 most members of the public they will appear the same.

10 CHAIRMAN: At an earlier stage, were different liveries not  
11 used by different bus companies?

12 MR MIKE WESTON: Yes, in the early days of tendering from  
13 the mid-1980s through to probably the early 1990s, the  
14 private operators at the time, who were competing  
15 against the in-house London Transport-owned bus company,  
16 which was still publicly owned, were allowed to use  
17 buses in their own liveries, and there were probably two  
18 main reasons for this at the time. One was to show to  
19 the public that things were changing, that things were  
20 improving, and one of the ways of doing that was showing  
21 that there were new operators coming into the market, so  
22 having buses in different liveries was a good way of  
23 illustrating that. And the second reason at the time  
24 was really to show to the trade unions that things were  
25 changing and that the system was moving from a publicly

26

1 owned and publicly employed operation to a private  
2 operation. So there were probably two main reasons.

3 Eventually the decision -- and I think it was  
4 probably in the early/mid-1990s -- was taken that  
5 actually the marketing benefit of having a common livery  
6 was far stronger than those other messages that were  
7 probably by that point already accepted by the public.

8 MR PETER DUNCAN: I would like to move now, please, to  
9 another quite significant difference between London and  
10 Hong Kong, and that is the difference in the contractual  
11 framework which exists and which permits the bus  
12 operators to undertake their work.

13 As you appreciate, in Hong Kong, there are  
14 negotiated contracts by the form of a franchise under  
15 which the bus operators operate, whereas, as is evident  
16 from your report, in London you have what might be  
17 described, and I think has been described, as  
18 a route-based competitive tendering system.

19 I would just like to ask you some questions -- bring  
20 to your attention, first of all, some matters, and then  
21 ask you some questions about the system which operates  
22 in London in this respect.

23 Could I ask you to go to page 124. If I take you  
24 through the first few paragraphs of 3.3, I think we will  
25 get a very good idea of the system operating in London.

26

1           You say:

2           "It is useful to understand the contract regime  
3           pertaining to London to understand how safety  
4           management, by both TfL and the bus operators, fits into  
5           this regime. The competitive tendering of individual  
6           bus routes with the whole network being controlled,  
7           regulated and planned by the Transport Authority  
8           (Transport for London) is currently unique to London due  
9           to government policy dating back to 1985.

10          Route tendering was introduced in 1985 with the  
11          overall structure of awarding 5-year contracts, with  
12          operators receiving 2-year extensions if they meet  
13          certain performance criteria, having remained unchanged  
14          over this period.

15          Gross cost contracts are used by TfL with the  
16          operators being paid for each mile operated with  
17          additional bonuses and deductions based on the  
18          reliability of the service. Passenger revenue is  
19          retained by TfL so in practice any enhancements to the  
20          contract, including safety or other improvements to  
21          buses, are funded by Transport for London not the bus  
22          operator."

23          Then you have taken us through, again, some of the  
24          history behind the evolution of the system.

25          If I could bring your attention then to the last of  
26

1       those paragraphs, "1994":

2               "Remaining routes placed onto negotiated contracts  
3       with privatisation of the public owned companies. All  
4       bus operation privately owned but controlled and managed  
5       through the tendering process by London Transport."

6               So the first question I've got is: do negotiated  
7       contracts exist at all now in London, or is everything  
8       done by way of competitive tendering?

9       MR MIKE WESTON: No, they don't. Perhaps I can clarify the  
10       1994 position. So, as it says in the report, by 1993  
11       50 per cent of the bus routes had been competitively  
12       tendered. Some of those had been successfully won by  
13       private operators; some of them had been won by London  
14       Transport in-house bus companies that were still  
15       publicly owned. Because of a desire by the government  
16       at the time to privatise the bus companies that were  
17       still publicly owned and put them into the private  
18       sector, it was necessary to put the remaining bus  
19       routes, which at that point had basically received  
20       a block subsidy internally from London Transport to  
21       operate them -- it was necessary to put them onto some  
22       sort of contract. So the decision was taken to put each  
23       of these remaining routes that hadn't been subject to  
24       competitive tendering onto a negotiated contract, where  
25       the contract price was negotiated.

1 But the important thing that this probably fails to  
2 explain is that those negotiated contracts had a fixed  
3 life, so that the companies or the management that were  
4 buying these bus companies from London Transport had  
5 a portfolio of competitively won contracts but also  
6 a portfolio of negotiated contracts, but they knew the  
7 end date of each of those contracts. So they knew that  
8 in five years' time or four and a half years' time, that  
9 route would be subject to competitive tendering.

10 So it was a way, really, of sort of accelerating  
11 putting everything onto a route contract for  
12 privatisation, but with a clear view that those  
13 contracts would be re-tendered after a certain  
14 timescale, and they subsequently were all re-tendered  
15 and probably -- I'm just trying to think -- about five  
16 years later, they had all been then subject to the first  
17 round of competitive tendering.

18 CHAIRMAN: So by 1998/1999, all routes were operated on  
19 a tendered basis?

20 MR MIKE WESTON: Yes, roughly. Those dates are roughly  
21 about right, yes.

22 MR PETER DUNCAN: Thank you.

23 If we go back to the second paragraph on page 125,  
24 there are references in the second line to "additional  
25 bonuses and deductions" to the gross cost contracts  
26

1 "based on the reliability of the service".

2 I think if you go through to page 131, we get  
3 further detail as to these bonuses and deductions, at  
4 paragraph 4.3.3; is that correct?

5 MR MIKE WESTON: Yes, that's correct. So the quality  
6 incentive contract was or is a gross cost contract but  
7 with additional incentives for reliability and  
8 performance.

9 MR PETER DUNCAN: We can see the matters which are taken  
10 into account with regard to the incentives or  
11 disincentives, and there is reference to EWT, excess  
12 wait time. There is a quality of service indicator.  
13 And you say, at the end of the first paragraph:

14 "These payments could range between plus 15/minus  
15 10 per cent and were aimed at increasing operators'  
16 focus on reliability of the service in addition to  
17 quantity (ie mileage operated) which had been the focus  
18 of the gross cost contracts."

19 Does the element of safety have any relevance in the  
20 context of these bonuses or deductions?

21 MR MIKE WESTON: No, these bonuses are -- the potential  
22 bonuses of plus 15 per cent of the contract price or  
23 minus 10 per cent are purely related to the reliability  
24 of the service, as measured either by excess wait time,  
25 which is the measure for high-frequency services, or by

26

1 on-time performance, which is the measure for lower  
2 frequency performance.

3 So these payments only relate to the reliability of  
4 the service provided by the operators.

5 MR PETER DUNCAN: Could I take you back now to 127.

6 CHAIRMAN: Before you do that -- and in context, is the fact  
7 that a bonus of up to 15 per cent can be gained by good  
8 performance and a deduction of 10 per cent from the  
9 contract agreement important to bus operators, from  
10 a financial point of view?

11 MR MIKE WESTON: Yes, from a financial point of view --

12 I mean, the ability to get plus 15 per cent -- to get  
13 15 per cent is very, very difficult; the service has to  
14 be running almost perfectly. To get minus 10 per cent,  
15 again, is probably quite unusual because a service would  
16 have to be very poor. So probably the average payments  
17 range perhaps between 5 and 8 per cent of the contract  
18 price for an operator's portfolio of routes added  
19 together over the course of a year. That's significant  
20 and that roughly equates to the average return that  
21 a lot of the bus companies in London are making. So in  
22 many ways an operator achieving their reliability  
23 targets effectively is their profit on the contracts.  
24 So it is an important element and it is an important  
25 incentive to the operators to achieve those payments.

26

1 MR PETER DUNCAN: Could you give us an idea of what the  
2 maximum contract price would be for -- I assume it would  
3 be the longest route or the most complicated route?

4 MR MIKE WESTON: Yes. For a bus route of -- some of the  
5 bigger bus routes in London will have about 60 vehicles  
6 on them, and the contract price could be up to  
7 20 million pounds a year, so quite a significant  
8 contract, yes.

9 CHAIRMAN: And the basis of the contract is the bus operator  
10 says, "I will do this route for 20 million pounds", and  
11 Transport for London will pay them 20 million pounds,  
12 plus or minus the bonus or the deduction?

13 MR MIKE WESTON: Well, there are two payment regimes.  
14 There's the contract price which is then divided by the  
15 annual scheduled mileage to get a contract price per  
16 mile, and an operator is then paid that rate per mile  
17 for every mile that they operate. So effectively they  
18 lose the contract rate per mile for mileage that they  
19 fail to operate due to reasons within their control.  
20 So, for example, if they have no driver to run the  
21 journey or they have no bus because of mechanical  
22 failure, they would lose the rate per mile from the  
23 contract price.

24 But it is fair to say those deductions are  
25 relatively small. Probably, for mechanical loss

26

1        mileage, it's about 0.3 per cent; for staff, it is  
2        probably a very similar figure. So fairly small  
3        deductions for mileage not operated.

4            For mileage that is not operated due to reasons  
5        beyond their control -- so this is traffic delays, or  
6        diversions due to planned or unplanned events -- they  
7        are not deducted. That is considered not to be within  
8        their control so they are not deducted. Then  
9        separately, as we have said, there are these incentive  
10       payments or deductions for the reliability.

11           So the contract price relates to the quantity on  
12        a rate-per-mile basis, and then there is a relationship  
13        with these additional payments for reliability of the  
14        service.

15       CHAIRMAN: So, to crystallise that in a short example --  
16        could you do that for us?

17       MR MIKE WESTON: Yes. I will use simple figures to  
18        illustrate. So a contract price of 1,000 pounds and  
19        an operator is supposed to run 100 miles, the contract  
20        rate per mile will be 10 pounds per mile. For every  
21        mile they don't operate, they would lose 10 pounds per  
22        mile. These are very simple figures to illustrate the  
23        point.

24           But clearly, if the service was better than the  
25        excess wait time minimum standard within the contract,

26

1           they could earn some bonuses up to 15 per cent of that  
2           contract price. But, as I said earlier, plus  
3           15 per cent is very, very difficult to achieve. The  
4           average is probably nearer 8 to 10 per cent for a very  
5           reliable service.

6   CHAIRMAN: So, in order to avoid deductions for mileage lost  
7           that is your fault, it is important to have  
8           a maintenance regime for your buses and to have adequate  
9           staff numbers? Would that be a simple way of looking at  
10          it?

11   MR MIKE WESTON: Yes, Chairman, that's correct. So making  
12          sure you've got enough drivers every day to run the  
13          service, and that's why most depots will have some spare  
14          drivers because it is a way of protecting the mileage if  
15          some drivers don't show up for work, perhaps due to  
16          sickness. And then making sure you have adequate buses  
17          each day that are ready for service, so that's around  
18          adequate maintenance regimes but also adequate spare  
19          vehicles to provide cover when other vehicles are being  
20          maintained.

21                But it is fair to say that the maturity of the  
22          tendering system in London is such that the amount of  
23          mileage that operators lose due to staff and mechanical  
24          reasons is relatively small. It is pretty low, because  
25          there's a maturity in managing those aspects of the  
26

1 service.

2 CHAIRMAN: That's because of experience; bus operators know  
3 the margins that they need to have of staff and vehicles  
4 not to fall into that problem?

5 MR MIKE WESTON: Yes, that's correct.

6 MEMBER LO: To operate the system, do you have to gather  
7 information about the arrival time of every bus at every  
8 bus stop?

9 MR MIKE WESTON: Yes. So the excess wait time calculation  
10 and the on-time performance calculations historically  
11 were done by surveys, sample surveys, with inspectors  
12 standing on the roads noting down -- these are Transport  
13 for London-employed inspectors -- when buses went past  
14 that location, and that data was then used to calculate  
15 the excess wait time.

16 It might be worth just briefly explaining what the  
17 excess wait time is. The way that Transport for London  
18 measure the reliability of high-frequency services is  
19 through the statistic called excess wait time. So, for  
20 a ten-minute frequency bus service, the assumption is  
21 that passengers will arrive randomly at the bus stop.  
22 They won't use a timetable, they will just arrive at the  
23 bus stop. So, if the ten-minute service is running  
24 perfectly, on average you should wait five minutes,  
25 because you may have just arrived and missed the bus, so

26

1       you wait nearly ten minutes; you may arrive five minutes  
2       and wait five minutes, or you may arrive and literally  
3       the bus arrives, but on average you should wait five  
4       minutes.

5               So the excess wait time is how long you wait over  
6       that ideal wait time, and for a route the minimum  
7       standard may be one minute or may be 1.2 minutes' excess  
8       wait time. So that's how the calculation is used.

9               Historically, as I said, it was done by manual data  
10       collection. Now it is calculated automatically through  
11       the vehicle location system. So historically it was  
12       a sample; now it is effectively 100 per cent statistic  
13       based on all buses on that route.

14   MEMBER LO: A follow-up question. You said for factors out  
15       of their control, like congestion, would not be  
16       deducted, so how do they factor in congestion in their  
17       calculation?

18   MR MIKE WESTON: Sorry?

19   MEMBER LO: You mentioned about for factors outside their  
20       control, like detour, congestion, those factors will not  
21       cause any reduction or deduction in payment scheme, but  
22       how do they factor in congestion effect in this kind of  
23       calculation?

24   MR MIKE WESTON: Okay. So, for congestion, an operator,  
25       when they are submitting their tender bid, would be

26

1 expected to put in a timetable or a schedule. So  
2 Transport for London will specify the frequency of the  
3 service required and will specify the route of the  
4 service. But the operator has to turn that into  
5 an operating schedule and determine how many buses they  
6 need to run that route reliably. And an operator is  
7 expected to design a schedule to cope with the average  
8 congestion on the majority of days.

9 In extreme circumstances -- I'm trying to think of  
10 an example -- so an unplanned demonstration in Central  
11 London, a terrorist attack in Central London, for  
12 example, where there is a lot of disruption and major  
13 chaos and congestion, Transport for London will then  
14 void those days from the calculation. So, in extreme  
15 examples where the congestion is very, very bad and it  
16 is clear that the operator couldn't predict that and  
17 also couldn't manage the service in those circumstances,  
18 those days would be void from the calculation.

19 CHAIRMAN: So would that apply to, for example, a burst  
20 water main, the Dartford Tunnel having a vehicle on fire  
21 and being closed?

22 MR MIKE WESTON: Yes. What tends to happen for more  
23 localised incidents is that individual routes could be  
24 void for those days, not necessarily -- I think for --  
25 I was managing the bus network on the day of the 7 July  
26

1           2005 attacks on the Underground and bus network, clearly  
2           all the data for that day and subsequent days was void  
3           because it clearly wasn't the right thing to do, to try  
4           to monitor and penalise the operators.

5           But individual routes could be void due to a local  
6           issue, yes.

7   CHAIRMAN: Thank you.

8   MR PETER DUNCAN: So, going back to page 127, if we could,  
9           Mr Weston. You set out at paragraph 4.1 the contract  
10          responsibilities, and if I could try and reduce this to  
11          very simple terms by summarising four points -- if you  
12          can just confirm this is the case or, if not, please  
13          tell me -- first of all, Transport for London will  
14          invite tenders for a particular route. Secondly,  
15          a tender will put in a contract price for operating that  
16          route. Thirdly, Transport for London will keep all the  
17          fare revenue and thus assume the profits and the losses  
18          associated with the patronage on that route. Then,  
19          fourthly, Transport for London will simply pay the  
20          contract price to the operator with the bonuses and  
21          deductions you have just described.

22               Is that a very quick, very simple thumbnail summary?

23   MR MIKE WESTON: Yes, I think that's a good summary.

24   MR PETER DUNCAN: Now, on the routes which are made  
25          available for tender, who decides on the routes and what  
26

1 factors are taken into account in determining a new  
2 route or discard of an old route?

3 MR MIKE WESTON: Yes. So the route planning is done by  
4 Transport for London, and it is done under what are  
5 called the service planning guidelines which are some  
6 high-level guidelines which set the sort of aspirations  
7 for running bus services in London, and within those  
8 guidelines, for example, there is an aspiration that  
9 nobody is more than 400 metres from a bus stop in  
10 London. It's not totally achieved, it's almost achieved  
11 but not totally. And there will be various other  
12 guidelines about trying to provide a comprehensive  
13 service seven days a week, from a certain time in the  
14 morning to a certain time in the evening. So there are  
15 some guidelines that set the aspiration.

16 So all the route planning is done by Transport for  
17 London and they will determine which services should be  
18 enhanced, which services should be reduced. Some of  
19 that will be based on loadings and how busy routes are.  
20 Some of it will be based on working with colleagues in  
21 other parts of the organisation to determine changes  
22 likely to happen.

23 So at the moment, for example, there is a new  
24 railway line opening next year now, called the Elizabeth  
25 Line, which goes across Central London. Clearly, that  
26

1 will bring a lot of extra capacity to the Underground  
2 network, and as a result a lot of the bus routes in  
3 Central London will lose patronage and therefore they  
4 will be changed when the line opens. Some of them will  
5 be withdrawn and some will be reduced, to make sure that  
6 there is an efficient operation in terms of the services  
7 provided.

8 MR PETER DUNCAN: Does this involve consultation with the  
9 bus operators, or is this done exclusively within  
10 Transport for London?

11 MR MIKE WESTON: There will be some dialogue with bus  
12 operators, but essentially it is a sort of central  
13 planning process. There is a duty on Transport for  
14 London to consult with the local authorities in London  
15 and stakeholders, including members of the public, so  
16 Transport for London have to consult before service  
17 changes are made.

18 So there will be some dialogue with the operators  
19 but I wouldn't necessarily -- I wouldn't describe it as  
20 consultation.

21 MR PETER DUNCAN: You mentioned just a few moments ago that  
22 there was an aspirational approach -- persons living  
23 within a certain area should have access to a bus  
24 service. Assuming that route is unprofitable, would the  
25 route nevertheless continue, to enable that aspiration?  
26

1 MR MIKE WESTON: Yes. So the decision on each individual  
2 service change is done on a cost/benefit analysis. So  
3 there is a subsidy for the London bus network, and if  
4 you take that subsidy, for every pound you spend, you  
5 will be looking to maximise the passenger benefits. So  
6 every service change will go through a small  
7 cost/benefit calculation to make sure it is getting some  
8 passenger benefits to make sure it is worthwhile  
9 investing that pound of money.

10 But it's worth saying there is subsidy into the bus  
11 network and ultimately, Transport for London, under the  
12 direction of the mayor, in theory, could operate the  
13 service without subsidy, through a combination of  
14 running less unprofitable services and/or charging more  
15 to passengers to use the service. So the amount of  
16 subsidy that is put into the network is very much  
17 a political decision by the mayor, who sets the strategy  
18 for the organisation.

19 CHAIRMAN: So it could be user pay or it could be  
20 subsidised, as it is?

21 MR MIKE WESTON: Yes. As it says in my report, one of the  
22 key things that the mayor determines is passenger fares.  
23 So the decision to change passenger fares rests with the  
24 mayor, not with Transport for London. So, clearly, that  
25 has an impact on the financial performance of the bus  
26

1 network.

2 The current mayor, who was elected in 2016, in his  
3 manifesto made a commitment not to increase fares on the  
4 Underground or buses for four years of his initial term,  
5 and that clearly has big benefits to the travelling  
6 public in terms of value for money but obviously has  
7 implications on Transport for London in terms of fares  
8 income over the next four years.

9 CHAIRMAN: Where does the money come from?

10 MR MIKE WESTON: So the mayor has to find it from other  
11 sources, so, for example, from the Council Tax, the  
12 business rates; encourage -- well, part of it has been  
13 encouraging Transport for London to become more  
14 efficient as an organisation, through trying to reduce  
15 its costs. So a whole combination of ways of trying to  
16 balance the books.

17 CHAIRMAN: What proportion of the costs of running the buses  
18 does the total amount of fares represent?

19 MR MIKE WESTON: I'm trying to see if we've got any figures  
20 in here. At the moment, it is -- about a third of the  
21 cost of the operation is subsidy, so it's about 600.

22 I'm just looking at my notes for the figure.

23 CHAIRMAN: Take your time.

24 MR MIKE WESTON: Yes, sorry, in the financial year 2016/17,  
25 70 per cent of the cost of the network was covered by  
26

1 passenger revenue. So the other 30 per cent was  
2 subsidy, which was 626 million. But that's varied over  
3 the years, and I think my report makes reference that in  
4 1997/98, the network broke even, and the passenger  
5 revenue covered the cost of operation.

6 But we are stressing that those decisions are  
7 very -- are political decisions. They are decisions of  
8 the mayor about how he or she wants financially the bus  
9 network to operate.

10 CHAIRMAN: So if fares are frozen for four years, one could  
11 expect the 70 per cent covered by fares to drop to  
12 perhaps 60 per cent or some lower figure?

13 MR MIKE WESTON: Potentially, unless the service volume is  
14 reduced, which the current business plan assumes it will  
15 be slightly.

16 CHAIRMAN: Right. Thank you.

17 MR PETER DUNCAN: I think you have referred to the financial  
18 performance and the subsidy aspects that the chairman  
19 has been asking you about, at pages 120 and 121 of your  
20 report. Do you see there reference to the financial  
21 performance?

22 MR MIKE WESTON: Mmm.

23 MR PETER DUNCAN: I think, at the bottom of page 120, the  
24 last sentence, you have referred to one of the points  
25 you've just made:

26

1 "By financial year 1997/98 the network broke even  
2 with passenger revenue covering operating costs."

3 Then you have referred to the impact of elected  
4 mayors from 2000, at the top of page 121, and the  
5 figures, with the cost recovery of 70 per cent, apparent  
6 from the first paragraph on page 121.

7 MR MIKE WESTON: Yes. Correct.

8 MR PETER DUNCAN: So, for 2016/17, the amount of the subsidy  
9 seems to be something like 626 million pounds.

10 MR MIKE WESTON: Yes, that's correct.

11 MR PETER DUNCAN: So that's over 600 billion in Hong Kong  
12 dollar terms.

13 The chairman asked you who meets that subsidy. Is  
14 it simply the ratepayers of London, or how is that  
15 actually met?

16 MR MIKE WESTON: Historically, it was a combination of the  
17 ratepayers of London, both domestic, private ratepayers,  
18 but also businesses, but until this year it is also  
19 an element of government subsidy, so national subsidy.  
20 But from next year -- the government about three years  
21 ago gave notice to Transport for London that they would  
22 no longer be getting any revenue subsidy, ie subsidy to  
23 cover operating costs; they would only give the  
24 organisation capital grants, capital grants aimed at  
25 improving the infrastructure, so, for example, building  
26

1 new Underground lines, enhancing stations, for example.

2 So the last two or three years, Transport for London  
3 has seen its revenue grant from central government go to  
4 zero, so it has had to make up that shortfall from  
5 a combination of local funding from the 32 London  
6 boroughs and business rates and domestic rates, but also  
7 by some aggressive cost-cutting, in trying to cut  
8 overheads and reduce the costs of operating the  
9 business. So it's been quite a challenging time.

10 At the same time, the mayor made a decision to  
11 freeze fares for four years. I refer in the next  
12 paragraph to the fact that contract prices go up with  
13 inflation. So, for the next four years, the contract  
14 prices will go up with inflation, but the fares revenue  
15 will effectively be frozen. So that's again a big  
16 financial challenge for the organisation.

17 CHAIRMAN: What was the size of the central government  
18 subvention at the time the government indicated it would  
19 cease to provide it over a period of three years?

20 MR MIKE WESTON: It was around about 600 million, I think,  
21 at the time they decided they were going to reduce it to  
22 zero, and they took the decision to reduce it to zero  
23 over about a three or four-year period.

24 CHAIRMAN: So 600 million pounds reduced to nothing over --

25 MR MIKE WESTON: Yes. It's quite a significant reduction.

26

1 That was a grant to the whole organisation, not just to  
2 the bus parts of the business, but the whole of  
3 Transport for London.

4 CHAIRMAN: Are -- or were, perhaps -- subsidies of this kind  
5 provided for transport systems outside the metropolis,  
6 London?

7 MR MIKE WESTON: For the railways, yes. For buses, no. So,  
8 outside of London, bus services are deregulated, so that  
9 any operator, or anybody that is approved to operate  
10 buses, can operate, can register to operate, whatever  
11 bus services they like commercially. So, in the big  
12 cities, Manchester, Birmingham, for example, any  
13 operator can commercially operate whatever service they  
14 feel they want to, and the local authority or the  
15 transport authority can then buy in the bits of service  
16 that they feel are perhaps missing.

17 So, for example, if an operator operates a service  
18 commercially Monday to Saturday, the transport authority  
19 can then buy in a Sunday service, if it's not being  
20 provided commercially, and probably 90 per cent plus of  
21 the bus services are provided commercially, with the  
22 local authorities and transport authorities providing  
23 the top-up of what's not being operated commercially,  
24 although the government last year passed legislation to  
25 allow transport authorities outside of London to  
26

1 consider franchising bus services, to look at  
2 introducing franchising systems, and at the moment  
3 Manchester are looking at potentially moving from  
4 a deregulated environment to a franchise-type system.

5 CHAIRMAN: Thank you.

6 MR PETER DUNCAN: Could I ask you to go back now to  
7 page 127, where you have dealt with the contract  
8 structure, and leading on to page 128, under the heading  
9 4.2, "Contract life cycle".

10 If I understand this correctly, the operator would  
11 be bound by two agreements, first of all the framework  
12 agreement, which, according to the second arrow, sets  
13 out the general contractual requirements for operating  
14 bus services for Transport for London; and then, third  
15 from the bottom, a route agreement also which is issued,  
16 which details the specific route requirements, including  
17 minimum performance standards.

18 Have you made available examples of those in your  
19 supporting documents?

20 MR MIKE WESTON: Yes, there is a reference, web link, to the  
21 route agreement, that includes an example of -- sorry,  
22 the framework agreement, and the framework agreement  
23 includes an example of the route agreement.

24 MR PETER DUNCAN: Thank you. Yes, I see that's referred to  
25 at page 189. Yes, thank you.

26

1 MR MIKE WESTON: So the route agreement is a fairly big  
2 document, 160 to 200 pages, but each operator only signs  
3 up to the framework agreement once, and then every time  
4 they win a bus route they get a route agreement, which  
5 is the more specific information in relation to that  
6 route.

7 MR PETER DUNCAN: Now, at page 129, in the second  
8 paragraph --

9 CHAIRMAN: Before you move away from this -- we have had  
10 an account from Prof Stanley about the system that  
11 obtains in Melbourne, which involves an accreditation  
12 system. In what way, if at all, does the system in  
13 London, with a framework agreement, then prequalified  
14 operators -- in what way does that compare or can one  
15 contrast it with Melbourne and accreditation?

16 MR MIKE WESTON: The prequalification system is effectively  
17 assessing the suitability of a business to become  
18 an approved supplier for bus services. And it is trying  
19 to -- it is looking for an established operator that has  
20 an operator's licence from a government agency, and it  
21 is not the decision point at which a business wins  
22 a contract.

23 So the hurdles to become an approved supplier are  
24 relatively low. You have to be an established operator,  
25 you have to have an operator's licence, and you have to  
26

1 have some experience of running buses. But it is set  
2 relatively low because Transport for London, as well as  
3 trying to encourage big companies and big businesses to  
4 come in as approved suppliers, also see a place for some  
5 very small companies. So there are some very small  
6 companies who may operate 10 or 15 buses on school bus  
7 contracts, for example.

8 So the prequalification process is a relatively open  
9 process, to encourage people to participate in the  
10 tendering process, and it is the tendering process that  
11 then decides the suitability of an operator to win  
12 a particular contract.

13 So I certainly wouldn't describe it as  
14 an accreditation process. It is making sure that  
15 a potential operator has got the basic components in  
16 place to run buses in London.

17 CHAIRMAN: Thank you.

18 Yes, Professor.

19 MEMBER LO: Does it include whether they have a depot? Is  
20 that a qualification criteria?

21 MR MIKE WESTON: No. The requirement to have a depot -- as  
22 an approved supplier, you wouldn't have to have a depot.  
23 It is clearly a barrier to entry to the market, because  
24 getting a depot is a challenge, and where you locate it  
25 would be a challenge, and obviously one of the  
26

1 challenges for TfL is that for a new operator, they  
2 might award them a route with perhaps 20 vehicles' worth  
3 of work, but your depot might be 150 capacity, so you  
4 have to be confident you can win more work over time to  
5 fill that depot up. But, as an approved supplier, you  
6 don't have to have a depot in London. Logically,  
7 because you are already an operator, you will have  
8 a depot somewhere, but it could be somewhere else in the  
9 UK. It could be somewhere else in Europe. It could be  
10 somewhere else in the world, in theory.

11 MR PETER DUNCAN: At page 129, you have addressed the  
12 question of the evaluation of an operator's bid, which  
13 you describe in the first line:

14 "... an assessment of all aspects of their current  
15 performance including safety."

16 If I may continue to quote:

17 "This approach allows Transport for London to  
18 reflect an operator's current performance into the  
19 tender evaluation process thus acting as a strong  
20 incentive for operators to constantly improve their  
21 performance. In terms of safety performance, along with  
22 performance on all other aspects of the route agreement  
23 this will feed into the tender evaluation process and  
24 could result in either operating contracts not being  
25 renewed or an operator failing to win a new contract.

26

1           However, safety is not currently scored as part of the  
2           technical evaluation but treated as a 'red line' in  
3           terms of the award of new contracts. An example given  
4           by Transport for London was a contractor in 2015 who due  
5           to concerns about maintenance standards, which were  
6           visible due to high mechanical lost mileage and poor  
7           engineering quality monitoring results, was not awarded  
8           new contracts whilst they addressed the area of  
9           concern."

10           You have given one example there of the red line  
11           having been crossed, but could you give the committee  
12           some idea as to how one does cross the red line in this  
13           context?

14       MR MIKE WESTON: Yes. It is fair to say that the red line  
15           is -- there is no definition of the red line in terms of  
16           what is and isn't acceptable.

17           One of the big advantages of the route level  
18           tendering system over perhaps an area-based franchising  
19           system, such as for example in Singapore, is that the  
20           ability of the authority to adjust the size of a company  
21           through route awards is very, very flexible. The  
22           challenge with a big area franchise is that if  
23           performance in certain aspects of the contract isn't up  
24           to standard, it is a very big decision to terminate that  
25           contract. You may have a contract for 400 or 450 buses.

1 A very, very big decision and potentially very  
2 disruptive to the transport network and members of the  
3 public.

4 The benefit of the London system is that you can  
5 send some very clear messages to the operator by not  
6 awarding them some contracts for a period of time. It  
7 doesn't have a devastating effect on their business but  
8 sends a very strong message that they've got to improve  
9 their performance.

10 So I think the purpose for this red line is not  
11 defined in black and white. It's not a clear  
12 definition. It's just a very strong check, in terms of  
13 the tender valuation. You are looking at the commercial  
14 aspects of somebody's tender bid, you are looking at  
15 their current performance in relation to quality of  
16 service, volume of service on their other contracts,  
17 looking at all the other monitoring data, to come up  
18 with a score for their performance, and then separately  
19 there is a look at their safety indicators to see  
20 whether there are any areas of concern.

21 The example given there was it was pretty clear that  
22 this company was struggling with maintenance, mainly due  
23 to a high retirement rate of engineers. They were  
24 losing a lot of engineers who had been with the company  
25 for a large number of years, and they had failed to  
26

1 really anticipate that and recruit and train new people.  
2 So they were struggling to maintain their vehicles.  
3 That became visible in terms of a lot of mechanical  
4 breakdowns on the road, and poor engineering -- the  
5 quality monitoring that TfL undertook, the results were  
6 showing issues.

7 So, it was then that, because of that concern, the  
8 view was taken that that needed to improve. The  
9 operator was given a warning to improve their  
10 performance, and in the intervening period they were not  
11 awarded any new contracts. So probably over that period  
12 they may have lost four or five contracts that they  
13 would have otherwise won. Then, once that performance  
14 is returned to an acceptable standard, they were then  
15 able to win contracts again.

16 But it is worth stressing that red line is not  
17 defined; it's a judgment by the evaluation team and  
18 board of directors who will ultimately award those  
19 contracts. So they will have that discussion when they  
20 make that contract award.

21 CHAIRMAN: But in the example that you have given, the  
22 breakdowns, the high mechanical lost mileage and poor  
23 engineering, those are factors that would have shown up  
24 in quality performance monitoring, would they not?

25 MR MIKE WESTON: Yes. They will show up both in the lost  
26

1           mileage returns, because of the number of breakdowns on  
2           the road will start to increase, so the operator would  
3           be getting deductions for lost mileage, but they will  
4           also show up through the independent assessments that  
5           Transport for London undertake.

6   CHAIRMAN: I am just wondering where the two meet, the  
7           safety side of things and the breakdown of buses and  
8           therefore you are not meeting your requirements. Had  
9           this reached the stage where the wheels were coming off  
10          the bus and they were crashing into people?

11   MR MIKE WESTON: No. I think the first visual sign of sort  
12          of poorer maintenance tends to be mechanical breakdown,  
13          so vehicles breaking down because of perhaps gearbox  
14          failure or engine failure. I think it is fair to say  
15          that operators would always make sure that those sort of  
16          safety-related engineering things are done correctly  
17          because they realise -- because the other aspect is, as  
18          well as TfL's sanction of not awarding contracts, the  
19          government agency, who have a national role, do their  
20          own monitoring of engineering standards of bus companies  
21          across the whole of the UK, and they can ultimately call  
22          the operator to a public inquiry, and the traffic  
23          commissioner can restrict the number of vehicles that  
24          they can operate.

25                So there is another sanction that the government  
26

1 level can apply to a bus company.

2 CHAIRMAN: So was this perhaps, really, a potential safety  
3 issue? Your buses are breaking down so often that it  
4 means you are not maintaining them properly and  
5 therefore potentially there is a safety issue?

6 MR MIKE WESTON: I think if both the operator and Transport  
7 for London hadn't recognised the urgency of the issue,  
8 it could potentially become a safety issue. I don't  
9 think it did. I think it potentially could have become  
10 a safety issue.

11 CHAIRMAN: Yes. Thank you.

12 MR PETER DUNCAN: You did mention a couple of moments ago in  
13 one of your answers safety indicators in this context.  
14 Does Transport for London keep a list of particular  
15 safety indicators, or is this looked at from a more  
16 generic point of view?

17 MR MIKE WESTON: Yes, there's a whole host of safety  
18 indicators, and at the moment, with the operators, they  
19 have come up with a safety performance index which is  
20 about 41 indicators, which they are going to turn into  
21 a safety score for each operator, to try to bring all  
22 the various monitoring together, to give a clear  
23 indication of safety performance.

24 So there are a whole host of safety indicators, from  
25 engineering, mechanical lost mileage, the engineering

26

1 quality monitoring scores, driver quality monitoring  
2 scores, a whole host of things that could, if they start  
3 to look out of kilter with other operators, would be  
4 an indication that something is not right. It might not  
5 necessarily be safety-related but it tends to indicate  
6 that something is not going right in the company.

7 CHAIRMAN: Are these safety performance indicators publicly  
8 available yet, or are these matters to be announced  
9 soon?

10 MR MIKE WESTON: Not yet. They will be, yes. I think the  
11 intention is that the safety performance indicators will  
12 be made public but they haven't been as of yet. I think  
13 they will be announced shortly.

14 CHAIRMAN: So, at the moment -- or rather prior to, perhaps,  
15 the trial of these safety performance indicators, how  
16 was safety measured, if it was measured?

17 MR MIKE WESTON: There was a lot -- a lot of the  
18 monitoring -- there was a lot of trend analysis around  
19 collisions, falls on buses, all the measures -- all the  
20 statistics and data that was being gathered around  
21 safety and incidents was being -- there was a lot of  
22 trend analysis and a lot of comparison of performance  
23 between individual operators.

24 So, for example, TfL produced a lot of graphs  
25 showing the trends in falls on buses, in pedestrian  
26

1 conflict incidents, and those were broken -- those  
2 trends were shown both at a network level but also at  
3 an operator level, and operators, through one of the  
4 forums that was held with all the operators, would share  
5 that data, and were happy that other operators saw each  
6 other's data, so they were able to compare their  
7 performance with their peer group.

8 So a lot of the data was monitored and then shared  
9 amongst the operators.

10 CHAIRMAN: Is this data available on the internet?

11 MR MIKE WESTON: Yes. So the data of all -- TfL, with  
12 regards to bus data, bus safety, currently publish two  
13 lots of data. They publish every quarter an Excel  
14 spreadsheet of all incidents that have occurred on the  
15 bus network, all safety-related incidents, so slips,  
16 trips and falls on buses, incidents with other vehicles,  
17 incidents with pedestrians, incidents with cyclists. So  
18 that's produced quarterly as an Excel spreadsheet.

19 CHAIRMAN: But is that done globally or is that done  
20 operator by operator?

21 MR MIKE WESTON: Well, it's a spreadsheet of all incidents,  
22 but on the front end of the spreadsheet, anybody,  
23 including members of the public, are able to interrogate  
24 that by operator or by route. So there is a front  
25 dashboard where you can filter the spreadsheet by  
26

1 operator, by borough, which part of London, or by  
2 individual bus route. So it allows the public to  
3 interrogate that data on that basis.

4 Then, in addition --

5 CHAIRMAN: But it's not presented, for example, Abellio have  
6 a lot more trips, slips and falls than Stagecoach; it's  
7 not presented in that way?

8 MR MIKE WESTON: No, not at the moment, no. A member of the  
9 public or some other organisation could do that analysis  
10 themselves and come to that conclusion, but it is not  
11 presented in that way.

12 Then, in addition, every quarter, there is  
13 a performance dashboard for the safety performance of  
14 the bus network, at a network level, so it's showing the  
15 trends compared with previous quarters on various things  
16 like slips, trips and falls, accidents, and showing the  
17 trends with previous quarters. Again, that at the  
18 moment is done at a network level, not at an operator  
19 level.

20 CHAIRMAN: And the network level produces figures for  
21 fatalities and serious injuries as well?

22 MR MIKE WESTON: Yes, so for any incident on the bus  
23 network.

24 CHAIRMAN: Yes, thank you.

25 MR PETER DUNCAN: With regard to that data, what is the  
26

1           actual source of the data? Who provides the data into  
2           the system?

3       MR MIKE WESTON: There are two -- the main source of the  
4       data is the bus operators inputting into a central  
5       database, which is called the incident reporting system.  
6       So all operators have a requirement to enter all their  
7       incidents onto this central database, and that's the  
8       main source of the information, and there's audits  
9       undertaken by Transport for London to ensure that  
10      operators are correctly populating that database.

11           In addition, that data is cross-referenced with the  
12      police data for serious incidents. So the police, if  
13      they attend an incident, will have their own database.  
14      It's about to change its name but it's currently called  
15      STATS19 data. So TfL will cross-reference to make sure  
16      that all incidents will be picked up. But clearly, the  
17      police data is only the serious incidents they attend or  
18      incidents that are reported to them.

19           So, for example, trips and falls on the bus that  
20      aren't related to a road traffic incident wouldn't  
21      necessarily be picked up by the police. But the main  
22      source of that data is individual bus operators entering  
23      data onto a central database.

24      CHAIRMAN: Is the police data available publicly?

25      MR MIKE WESTON: Yes, that's also published quarterly. Yes,

26

1           that's also published quarterly.

2       CHAIRMAN: Under a website for the Metropolitan Police?

3       MR MIKE WESTON: It might even be a national website,

4           because I think it's actually national data.

5       CHAIRMAN: From which data can London be extracted or not?

6       MR MIKE WESTON: Yes, from STATS19 you can extract it, yes,

7           by the whole of London, by London boroughs, by certain

8           specified geographical parts of London, and I think by

9           vehicle type.

10      CHAIRMAN: So certainly, for example, you say the police

11         data encompasses serious incidents, so one could compare

12         all fatalities in or around buses from the police data

13         and the Transport for London database?

14      MR MIKE WESTON: Yes. I mean, those figures should

15         correlate. There should be no reason why they should be

16         any different, clearly. The minor injuries may not --

17         because there may be some minor injuries where the

18         police have attended, but there might be some minor

19         injuries where the police didn't attend. So the minor

20         injuries might not but certainly the serious and

21         fatalities should actually correlate with each other.

22      CHAIRMAN: Thank you.

23      MR PETER DUNCAN: In this context, could I ask you to turn

24         to page 150 of your report. At paragraph 7.8, is there

25         a paragraph on Transport for London's safety performance

26

1 indicator, as part of the bus safety programme? Do you  
2 see that?

3 MR MIKE WESTON: Yes.

4 MR PETER DUNCAN: Is that the safety performance indicator  
5 which Mr Chairman referred to but which has not yet been  
6 published?

7 MR MIKE WESTON: Yes. This is a proposal which TfL are  
8 working on, and one of the bus operators explained to us  
9 in August what would be involved in this basket. So,  
10 basically, it is 41 measures that are brought together  
11 into a safety performance score, and these measures may  
12 be weighted in different ways. So the measures may be  
13 "killed or seriously injured" figures, they may be  
14 "slips, trips and falls", various other monitoring  
15 results from engineering monitoring to driver  
16 monitoring, and they are all brought together.

17 The idea is they are brought together into  
18 a benchmark score of 80 for each operator, and the aim  
19 then is to monitor an operator's trend against that  
20 baseline of 80, and they are weighted in such a way  
21 that -- it is weighted so that the whole basket -- the  
22 trend is not just -- if you are unfortunate in having  
23 a fatal incident, which may not even be down to the bus  
24 company's fault, that doesn't send the score completely  
25 off the scale. So it's about trying to monitor trends

26

1 within the company and not to use it as comparing your  
2 performance with your peer group, because I think the  
3 concern then is that if you're the best, you think you  
4 don't need to necessarily do anything else to improve,  
5 but I think there is a recognition that everyone can be  
6 better and be safer. So the idea is your safety  
7 performance indicator is benchmarked at 80, and then  
8 along with TfL you monitor your performance against that  
9 baseline of 80 and you try and improve on it and improve  
10 that score.

11 I think the intention is that will be announced  
12 publicly, the content of it will be announced publicly  
13 in due course, but it hasn't been as of yet.

14 CHAIRMAN: When you say, "This was explained to us", you are  
15 referring, are you not, to a meeting that you and I had  
16 with managing directors and other officers of RATP --

17 MR MIKE WESTON: That's correct.

18 CHAIRMAN: -- at the end of August?

19 MR MIKE WESTON: Yes. They showed us the table of all the  
20 indicators, I think.

21 CHAIRMAN: And this was explained to us by Mr Jon Pike who  
22 was the head of safety and risks?

23 MR MIKE WESTON: Yes, that's correct.

24 CHAIRMAN: But as you say, we are looking forward to having  
25 this made available, if it is made available, in the  
26

1 middle of next month?

2 MR MIKE WESTON: Yes. I think it is going to be made  
3 available as part of their intended announcement of  
4 their bus safety standard in the middle of October.

5 MR PETER DUNCAN: Will this be likely to have any effect on  
6 the red-line approach to safety which is currently the  
7 manner in which safety is taken into account in  
8 assessing an operator who applies for either a renewal  
9 of a route or a new route?

10 MR MIKE WESTON: Well -- I mean, it is difficult to predict  
11 how it will be used, but certainly, if your first  
12 quarter or first period, you are benchmarked at 80, and  
13 your score starts to get progressively worse, I would  
14 expect that to start ringing alarm bells and potentially  
15 being a red line.

16 So it will be a strong indicator that your safety  
17 performance has deteriorated, because this is such  
18 a wide basket of measures that, you know, any  
19 significant deterioration would show up in this score.  
20 So you would expect that to really start to ring the  
21 alarm bells and be an area of concern.

22 MR PETER DUNCAN: Now moving to another topic --

23 CHAIRMAN: Before you do so -- why, if you have any view on  
24 this, has it proved necessary to have such a wide  
25 measure, encompassing 41 indicators, to determine  
26

1 a benchmark for safety?

2 MR MIKE WESTON: I think, as it says in the report, the  
3 methodology has been adopted from the rail industry, and  
4 my understanding of it is that you are trying to come up  
5 with a score that's not so sensitive to individual  
6 incidents, because ultimately, if you are a large bus  
7 operator, operating maybe 2,000 buses, you will  
8 unfortunately have some incidents involved in running  
9 those buses. So the idea is to come up with a group of  
10 measures that are then weighted and brought together to  
11 create a score.

12 If that score starts to move either way, you have  
13 clearly done quite a lot to shift or to improve, or  
14 not -- or allowed some to get worse -- a lot of those  
15 individual indicators. So it is trying to provide  
16 a more robust measure than just looking at one specific  
17 area.

18 So, for example, if you took the view that your  
19 prime measure would be the number of traffic collisions  
20 that a bus company has, it's a measure, but it could be  
21 perhaps an unfair measure because it could be that on  
22 certain routes there's been some circumstances on the  
23 road that have led to more collisions beyond the  
24 operator's control. It may not be a robust overview of  
25 an operator's safety performance, and this is trying to

26

1 take a wider basket of measures into account to give  
2 a broader indication of their safety performance.

3 CHAIRMAN: And what is the ambit of this wider basket?

4 MR MIKE WESTON: Sorry, what is the --

5 CHAIRMAN: Ambit. One can readily understand why you look  
6 at collisions. You might look at what are described as  
7 "trips, slips and falls". You might look at infractions  
8 of road traffic law, speeding, harsh braking. But what  
9 other factors come into play?

10 MR MIKE WESTON: I think included in these measures will be  
11 things like the driver quality monitoring results, so  
12 how well drivers are monitoring. I think they are also  
13 going to include public correspondence around safe  
14 driving. It's just trying to get a very broad basket of  
15 measures that the overall score then becomes a sort of  
16 good, high-level indicator of an operator's broader  
17 performance in terms of safety.

18 CHAIRMAN: By public correspondence, you mean complaints?

19 MR MIKE WESTON: It could be complaints, yes.

20 CHAIRMAN: Thank you.

21 MR PETER DUNCAN: One of the topics, Mr Weston, which was  
22 raised at the hearing when Prof Stanley was assisting  
23 the committee was the possible engagement in Hong Kong  
24 of a competitive bidding system, but where the bus  
25 operator of course collects the fare revenue and assumes  
26

1 the profit risk himself.

2 I want to ask you a little bit about this, but  
3 perhaps just to put this in context can I take you to  
4 the transcript of Prof Stanley's evidence where these  
5 possibilities were identified. We will get that from  
6 the transcript at Day 16, page 45.

7 CHAIRMAN: What was the date of that?

8 MR PETER DUNCAN: That was 15 September, Mr Chairman.

9 CHAIRMAN: Thank you.

10 MR PETER DUNCAN: Have you had the opportunity of reading  
11 this evidence?

12 MR MIKE WESTON: Yes.

13 MR PETER DUNCAN: Thank you. In that case, I can take you  
14 through it quite quickly, I think.

15 Perhaps I can start at page 45, at line 10, where  
16 counsel for the committee says this:

17 "I'm going to explore with you the second and third  
18 part a bit later, but the first part refers to the  
19 benefits from the existence of competitive tendering in  
20 Melbourne.

21 To some extent, you have explained bits of it  
22 already, but can I test with you the concept of  
23 competitive tendering and how that fits within the Hong  
24 Kong environment where the bus operators collect the  
25 fares and assumes the profit risk from the provision of  
26

1 route bus services."

2 Then, going down to line 22:

3 "I understand there are a number of options  
4 available, but perhaps I can get you to explain some of  
5 those options."

6 Then I think we can leave quite a bit out, because  
7 all I want to do is to identify what those possibilities  
8 appear to be from the evidence of Prof Stanley. I can  
9 jump down, I think, to the bottom of page 48. At  
10 line 21, Mr Derek Chan -- he is the counsel for the  
11 committee:

12 "So, if I understand your answer correctly, there  
13 can be a number of possibilities ... One is a bidder  
14 proposing to pay the government a sum for the operation,  
15 for the right to operate an area or a number of routes.  
16 The second possibility is the bidder offering to share  
17 part of the margins with the government, as part of the  
18 bid."

19 Then, at line 6:

20 "... a third possibility exists that there is no  
21 bidding price and the competition is based entirely on  
22 an assessment of the quality of the service expected to  
23 be provided."

24 Then, at line 22, the chairman offers I think  
25 a fourth alternative:  
26

1           "Presumably, another way in which it might be  
2           negotiated is the prospective new operator might say,  
3           'I can do these routes for 10 per cent less than the  
4           fares that the incumbent is doing it'?

5           Answer: Exactly, lower fares.

6           Chairman: There would be no payment to government,  
7           'but we are providing better value to the public'?

8           Answer: Absolutely. That's the kind of degree of  
9           freedom is what happens to fares.

10          Mr Chan: So that's the advantages of competitive  
11          bidding --"

12          So, bearing in mind those four possibilities,  
13          I would like then to take you to your report, at  
14          page 131, at paragraph 4.3.2, and the first paragraph,  
15          which seems to describe a situation which is not  
16          dissimilar to Hong Kong, at least as far as sharing the  
17          revenue is concerned. So it's "Net cost contracts":

18          "During the period 1995 to 2000 the organisation  
19          adopted a net cost contract regime with bus operators  
20          retaining the revenue for each route and taking the  
21          revenue risk. Operators would bid for contracts based  
22          on forecast revenue and either bid for a subsidy from  
23          London Transport for unprofitable routes or offered to  
24          pay London Transport a share of the surplus on  
25          profitable routes."  
26

1           If I could just continue with the second paragraph:

2           "Net cost contract only operated for a short period  
3           of time partly due to the heavy administrative burden it  
4           placed on London Transport in allocating revenue (the  
5           majority of which came from prepaid tickets) across over  
6           700 routes. Also, it became clear that operators in  
7           practice had very little influence over the actual route  
8           revenue as route planning, setting frequencies and fares  
9           was still controlled and managed by London Transport."

10          Now, let's assume, just for the sake of the  
11          discussion, that the first of the two problems in the  
12          second paragraph could be overcome, so we don't have  
13          that administrative burden. Leaving that out of the  
14          situation, is this net cost contract approach something  
15          that you would suggest for consideration in Hong Kong,  
16          or would you not think that it is workable?

17       MR MIKE WESTON: I think it becomes easier if you were  
18       looking at area franchises, where an operator was  
19       running and operating all the routes within a certain  
20       part of Hong Kong, or even in a certain part of London.  
21       The difficulty in London was one operator could be  
22       operating one route down a corridor and there could be  
23       four or five other routes operated by another operator,  
24       or a number of operators. Hence, the ability to  
25       actually influence your own route revenue is very, very

26

1 small.

2 So I think the real issue is, there is nothing wrong  
3 with net cost contracts; it's a model that is used for  
4 a number of the railway contracts, operating contracts,  
5 in the UK. There is nothing wrong with the model. You  
6 just have to ensure that the operator has some influence  
7 over the revenue and has the ability to change the  
8 revenue, either through some control of fares, either  
9 through the ability to change the level of service, or  
10 the ability to perhaps market or promote the service.

11 And in London Transport's case, all these levers, as  
12 I call them, were with the authority, not with the  
13 operator. So, essentially, an operator had very little  
14 influence over what the actual revenue would be, because  
15 even if they ran a very good, reliable service, if they  
16 were operating in a corridor with three or four other  
17 operators, and a lot of those buses were still going to  
18 the same common destination, passengers would just get  
19 on the first bus that comes along. They won't choose  
20 operator A over operator B.

21 So I think the real answer to the question is it can  
22 work -- it can probably work better where an operator  
23 has an area franchise, so manages all the routes in  
24 a certain part of the city, but also you've got to make  
25 sure the operator has the ability to control a number of

26

1 aspects of the service, because if all those controls  
2 are kept by the transport authority then it probably  
3 doesn't really work.

4 Hopefully that answers the question.

5 MR PETER DUNCAN: Thank you. Incidentally -- I don't think  
6 I have asked you this before -- but how many routes are  
7 there altogether in London?

8 MR MIKE WESTON: There's about 700, and they vary from  
9 individual routes that just do a school journey. There  
10 are actually -- all the bus routes in London, even if  
11 they run school bus routes, are still open to members of  
12 the public, but there are some journeys at school time  
13 specifically to take children to specific schools that  
14 run dedicated routes but members of the public can use  
15 them.

16 So some routes might be individual school buses, one  
17 bus per route, up to some of the bigger routes, there  
18 may be 60 to 70 buses, but overall there's about 700 bus  
19 routes.

20 MR PETER DUNCAN: Thank you. Another matter, if I may, that  
21 arose from Prof Stanley's evidence -- if we can go back  
22 to that, Day 16, at page 50. It follows on from the  
23 evidence to which I have just referred. At page 50,  
24 line 9, Mr Chan then asks this question:

25 "Are there any perceived advantages that competitive  
26

1 tendering brings about that relate more specifically to  
2 the safe operation of buses?"

3 We can see then the answer of Prof Stanley which  
4 really runs from page 50 right through to page 56, at  
5 line 16. Have you had the opportunity of reading this  
6 part of Prof Stanley's evidence?

7 MR MIKE WESTON: Yes, I have.

8 MR PETER DUNCAN: I think it's fair to say, if I may now be  
9 permitted to try to summarise his evidence, that there  
10 are no advantages relating specifically to safety out of  
11 competitive tendering. In fact, he thinks that the risk  
12 might be the other way.

13 Is that how you read his evidence?

14 MR MIKE WESTON: Yes. I mean, that's how I would read it.

15 I wouldn't disagree with the high-level view that there  
16 are no advantages to safety of competitive tendering,  
17 but I would say there are also no disadvantages, and it  
18 then depends on the model of competitive tendering  
19 that's adopted.

20 So, in London, the route level tendering process,  
21 whilst the tendering process itself doesn't bring any  
22 specific advantages in terms of safety, the tendering  
23 evaluation process itself is an opportunity for the  
24 authority to look at safety before making a decision  
25 and, as we talked about earlier, the example of a bus

26

1 company whose mechanical engineering standards were not  
2 as good as they should have been, it gives the transport  
3 authority the ability to then alter its recommendation,  
4 taking safety into account.

5 So the tendering process and competition process  
6 itself may not directly influence safety, but the  
7 presence of the tendering process, certainly in London's  
8 case, allows the authority to take safety into account  
9 when awarding contracts and renewing contracts.

10 CHAIRMAN: That is, the example you have given, taking  
11 safety into account where there is a negative side to  
12 a particular bus operator -- for example, failed  
13 maintenance programme. How, in this system, could the  
14 willingness of a company to be involved in innovation,  
15 with the use of technology, to be taken? In other  
16 words, a positive side of safety. This company is  
17 deploying forward-looking cameras on all its buses to  
18 pick up safe distances to travel -- how could that be  
19 picked up in this process of competitive tendering?

20 MR MIKE WESTON: I think the challenge is that clearly, if  
21 the authority have set some minimum standards in terms  
22 of safety, in terms of equipment, CCTV, on buses and  
23 forward CCTV cameras is an example in London, then all  
24 operators tendering for those routes have to meet those  
25 common standards.

26

1           So, if the authority set the standard, then it is  
2           a given and all operators have to meet those standards  
3           to be awarded the contract. I think the challenge of  
4           a competitive tendering process is that ultimately you  
5           have a commercial evaluation, you have a technical  
6           evaluation, and it is very difficult for a relatively  
7           small piece of innovation within a tender -- so, for  
8           example, an operator deciding they are going to use  
9           a new telematics system that might improve driver  
10          performance -- that clearly will help their technical  
11          score, but ultimately, to a degree, the overall  
12          technical score and commercial score will still dominate  
13          the decision.

14          So it is probably quite difficult to let individual  
15          bits of innovation influence the overall decision of  
16          contract award. That's the challenge and that's  
17          probably why London will see a move towards more common  
18          standards, safety standards, for all operators, in terms  
19          of things like the bus safety standard.

20          So it probably -- the tendering process, because  
21          clearly cost is always going to be an important element,  
22          maybe discourages additional innovation over and above  
23          what the operator has -- sorry, over and above what the  
24          transport authority has deemed necessary, unless the  
25          operator believes there is a strong business case in  
26

1           their own right for some of this innovation.

2           So, if they believe some of the technology or some  
3           innovation will actually reduce accidents enough to save  
4           them money, then they may do it off their own  
5           initiative. But I think small bits of innovation are  
6           very difficult to take into account in an evaluation  
7           process of this nature.

8   CHAIRMAN: So this would lead to a regulator or central  
9           authority-led imposition of minimum standards, rather  
10          than bus operators volunteering improvements in safety  
11          standards?

12   MR MIKE WESTON: I think that's probably the way it would  
13          end up going, and I think if you look at what Transport  
14          for London are doing with the bus safety standard,  
15          that's basically -- my assessment of that is the  
16          authority is saying, "There is lots of technology out  
17          there. We can either leave it to individual operators  
18          to innovate and adopt which ones they think are  
19          appropriate, or we could set a standard that everybody  
20          has to adopt, and if everybody has to adopt it,  
21          everybody has to cost that into their tender bids." So  
22          it keeps the playing field level, keeps the competition  
23          fair.

24   CHAIRMAN: So, in such circumstances, competitive tendering  
25          would be neutral to enhance safety?

26

1 MR MIKE WESTON: Yes, and maybe that is the right  
2 conclusion, that safety should be a given and the  
3 standards should be -- you know, certain standards  
4 should be achieved by all operators bidding for routes,  
5 and where you are looking for innovation is in other  
6 aspects of the way in which they provide the service.  
7 You want competition to affect the efficiency of their  
8 organisation, their overheads, how they run the routes,  
9 and that's where you want the impact of competition to  
10 give value for money back to the public sector.

11 CHAIRMAN: So performance rather than safety; that's where  
12 competition comes in?

13 MR MIKE WESTON: Yes.

14 CHAIRMAN: Is there a parallel between that kind of scenario  
15 and the airline industry, where standards are mandated  
16 by the authorities rather than individual airlines  
17 equipping their aeroplanes with better equipment, as it  
18 were, for safety?

19 MR MIKE WESTON: Yes. I'm not an expert on the aviation  
20 industry, but the impression you get of the industry is  
21 that safety is not seen as a competitive advantage by  
22 an airline over another airline. They treat it as  
23 a given that they all have to achieve a safety standard,  
24 and maybe that's the sort of approach that Transport for  
25 London are trying to achieve, so there's a safety  
26

1 standard that's the given and it's not seen as  
2 a competitive advantage for one operator over another  
3 operator.

4 CHAIRMAN: Thank you.

5 MR PETER DUNCAN: Have you seen such a movement in any of  
6 the cities in Europe towards that approach?

7 MR MIKE WESTON: In terms of safety?

8 MR PETER DUNCAN: In terms of a uniform standard for all  
9 buses being imposed by bodies such as Transport for  
10 London, rather than leaving it to the individual bus  
11 operators to decide what innovations they will  
12 introduce.

13 MR MIKE WESTON: No. I think from my knowledge, certainly  
14 in Europe, Transport for London, with their bus safety  
15 standard, are leading the way. It's fair to say that  
16 most operators in Europe, most of the big operator in  
17 Europe, will be trying some new technology to improve  
18 safety, but I think, from my knowledge, TfL are the  
19 first big transport authority to try to bring all of  
20 this together and try to come up with a common standard  
21 for all of their bus fleets.

22 MR PETER DUNCAN: Another matter you raised, in the context  
23 of competitive tendering, with particular reference to  
24 Hong Kong, is depot ownership and depot availability.

25 Can I bring your attention to page 151 of your  
26

1 report. Right at the end of that page, you have  
2 introduced the topic by saying:

3 "The availability of bus depots is often seen as  
4 a barrier to competition."

5 We can see the content of the paragraph for  
6 ourselves, and it ends up by saying:

7 "Any future competitive tendering of bus services in  
8 Hong Kong would require a clear strategy around depot  
9 ownership and availability."

10 Would you like to expand on that for us and just  
11 amplify the point you were making there, Mr Weston?

12 MR MIKE WESTON: Yes. If you look at the London competitive  
13 situation, the biggest challenge for a new operator  
14 coming into the market is depot availability. That's  
15 the combination of finding a suitable site where you can  
16 build a depot but also the economics of -- if you want  
17 to come into the market and you decide to build a depot  
18 for 150 vehicles, the first route you win might be  
19 25 vehicles, but to make that depot economic to run you  
20 have to be able to fill it up with contracts, otherwise  
21 it won't be economic.

22 So, even in London, the main barrier to entry is  
23 probably the availability of a depot site, and it's not  
24 impossible but it is a barrier. That's with  
25 a route-level tendering system. The challenge, if you  
26

1           were going down the road of an area-based franchising or  
2           bigger franchises, is that investment in new depot  
3           facilities would be enormous, and it would act as a big  
4           barrier to competition. The model adopted in Singapore  
5           for their tendering is that the authority have provided  
6           both the depot and the vehicles, so effectively the  
7           operators are bidding to run the contracts or run the  
8           franchise but with the vehicles and depot provided by  
9           the Land Transport Authority in Singapore. So that's  
10          quite a different model.

11           So I think the point here is that unless -- if there  
12          was going to be some competitive tendering of bus  
13          services in Hong Kong, there would need to be a clear  
14          strategy around the barriers to entry into the market,  
15          and as I see, the biggest barrier to entry is probably  
16          depot ownership, and unless there is a clear strategy  
17          around depot ownership then the likelihood is that the  
18          competition would be very weak and it would be probably  
19          only the incumbent competing for some of the services.

20       MR PETER DUNCAN: Is there any sharing of depots in London  
21          amongst the operators?

22       MR MIKE WESTON: The majority of bus depots in London are  
23          owned by the bus operators. Probably, of the 85,  
24          I think about 75, at least 75, are owned by the bus  
25          operators. About ten are owned by Transport for London,

1 for various historical reasons. Some of them were  
2 vacant at the time of privatisation of the bus companies  
3 in the mid-1990s, but due to the expansion of the bus  
4 network, since 2000 these depots have been reopened and  
5 then leased to the bus companies to use for their  
6 contracts. Of those, two of those depots are shared.  
7 So there is one in east London that's shared between  
8 Hackney Community Transport and Arriva, and there is one  
9 in north London that's also shared. It's fairly  
10 unusual, it takes both operators working closely  
11 together to make that work, but not impossible. So  
12 there are two depots that are actually shared. They  
13 will have separate parts of the depot for parking but  
14 they are using the same sort of entrance and the same  
15 sort of generic facilities.

16 MR PETER DUNCAN: So, in Singapore, have they provided  
17 depots for individual operators or are they also on  
18 a shared basis?

19 MR MIKE WESTON: No. The first two contracts in Singapore  
20 are new, purpose-built depots, but it is on the back of  
21 an expanding bus network in Singapore. So they have  
22 expanded the network into new areas and then built  
23 a depot to serve those areas. So a slightly different  
24 approach. But, if they carried on tendering, at some  
25 point they would probably have to think about a strategy  
26

1 around the existing depots and how they were brought  
2 into the competitive tendering process.

3 CHAIRMAN: So the barrier that depots pose to competition  
4 would be less dealing with new routes in developing  
5 parts of -- for example, in Hong Kong, developing parts  
6 of Hong Kong, a new town, we would have perhaps rural  
7 land which is now being made urban and that would be  
8 your opportunity for the authorities to secure depots?

9 MR MIKE WESTON: Yes, and my understanding is that's what's  
10 happened in Singapore. It's been new services from new  
11 depots. So it's been easier to achieve. But, clearly,  
12 if there were bus services into a new part of Hong Kong  
13 and there was a requirement for a new depot anyway, in  
14 theory that could be provided by the Transport  
15 Department as opposed to individual operators.

16 Depots is probably the biggest barrier that exists  
17 to bringing in new competition.

18 CHAIRMAN: In London, has there been consolidation, where  
19 perhaps a company outside of the UK has come into the  
20 market and acquired smaller bus companies and thereby  
21 acquired depots and entered the market in that way?

22 MR MIKE WESTON: Yes. The last big operator or the last  
23 operator to enter the market was an Australian company  
24 that had been trying to enter the market for a number of  
25 years, but had found this barrier of depot availability,

26

1 and also not just availability of the depot but where  
2 across London do you decide to put your depot to compete  
3 was the barrier. So, in the end, they acquired some of  
4 the depots of a bus company called First Group who were  
5 selling up their London business and they entered the  
6 market on the back of acquisition as opposed to starting  
7 from scratch.

8 CHAIRMAN: I'm looking at page 126 of your report, where we  
9 have a list of the ultimate groups of the bus operators.  
10 Is the Australian company you are describing  
11 ComfortDelGro Corporation?

12 MR MIKE WESTON: No. The Australian company is under  
13 "Other", because they run about 3 or 4 per cent of the  
14 network. It's called Tower Transit.

15 CHAIRMAN: Ah, yes. They operate in Singapore, don't they?

16 MR MIKE WESTON: Yes, Tower Transit operate in Singapore and  
17 so do ComfortDelGro. ComfortDelGro is a Singaporean  
18 company. Go-Ahead also operates in Singapore.

19 CHAIRMAN: For example, a company like RATP Development --  
20 is that a French company?

21 MR MIKE WESTON: Yes. There are two parts to RATP. RATP is  
22 the publicly owned transport operator in Paris, so they  
23 operate all the buses and the Metro in Paris. But RATP  
24 Development is their commercial arm that bids for  
25 overseas contracts. So I think, for example, they just  
26

1 won one of the contracts for the Riyadh Metro, for  
2 example, to operate the Riyadh Metro. And as it says  
3 there, they run about 11 per cent of the London bus  
4 network.

5 CHAIRMAN: Which metro were you describing?

6 MR MIKE WESTON: I think it's Riyadh they just won.

7 CHAIRMAN: Riyadh, in Saudi Arabia?

8 MR MIKE WESTON: Yes.

9 CHAIRMAN: But did not RATP Development take over several  
10 smaller London bus companies, historic bus companies?

11 MR MIKE WESTON: Yes, RATP also bought out a company called  
12 Quality Line, and they bought out part of another French  
13 transport company operating in London called Transdev.  
14 So they sort of evolved a little bit over the last few  
15 years. There has certainly been a lot of consolidation  
16 of the smaller bus companies selling out to these six  
17 big groups over the last few years.

18 CHAIRMAN: And how many of these companies have overseas,  
19 overseas from the United Kingdom, ownership? We have  
20 RATP, French.

21 MR MIKE WESTON: Running down the list fairly quickly,  
22 Abellio is the Dutch railways; Arriva is owned by  
23 Deutsche Bahn, the German railways; ComfortDelGro is  
24 a Singapore-based company; Go-Ahead is a UK PLC, public  
25 limited company in the UK; RATP, as I said already, is  
26

1 the French, Paris public transport operator; and  
2 Stagecoach is again a UK public company. So effectively  
3 three of them are overseas state-owned companies and one  
4 is a private company. So quite a mix.

5 CHAIRMAN: Yes.

6 Mr Auyeung?

7 MEMBER AUYEUNG: When one company buys the other, is it part  
8 of the condition that they take over the drivers?

9 MR MIKE WESTON: Yes. The framework agreement requires that  
10 if any bus company in London wants to buy another bus  
11 company, they need to seek agreement of Transport for  
12 London and seek agreement and novation of the contracts  
13 from one bus company to another. So ultimately TfL  
14 could object to a takeover of one company by another,  
15 and probably would if it led to -- if one of the big six  
16 companies there listed was trying to take over another  
17 one of the big six, TfL may object on competition  
18 grounds, and also the competition authorities in the UK  
19 may take a view that they want to intervene and review  
20 the competitiveness of the market.

21 So they have to seek the agreement of TfL.

22 Also in the UK, if they were buying the company,  
23 then they are assuming the assets and obligations of  
24 that company anyway, but there is also legislation in  
25 Europe, in UK and Europe, called the transfer of  
26

1       undertakings, the transfer of undertakings of  
2       employment.

3               So effectively, if one operator wins a contract from  
4       another, the operator that's lost the contract can  
5       insist that the drivers move to the other company, and  
6       the drivers have the right to move if they want to. So  
7       they have to move with the contract, or they can move  
8       with the contract. Sometimes an operator will take the  
9       view that he wants to keep the drivers because he may be  
10      short of drivers anyway, so he might decide to keep the  
11      drivers, and often drivers will want to stay with the  
12      company where they are because the depot is probably  
13      closer to where they live, as opposed to where the new  
14      company might be based. But ultimately drivers have the  
15      right to transfer with contracts between companies.

16   MEMBER AU YEUNG: Thank you.

17   CHAIRMAN: And to do so on their existing terms of  
18      employment?

19   MR MIKE WESTON: Yes, that's what the legislation says, that  
20      they have to transfer on existing terms and conditions.  
21      A company may subsequently decide to negotiate to change  
22      those terms and conditions, but at the point of transfer  
23      they have to stay on the existing terms and conditions.

24   CHAIRMAN: Was this not one of the -- declared as  
25      an achievement of the mayor in the recent year or two?

1 MR MIKE WESTON: Yes. The current mayor has done a number  
2 of things around drivers' terms and conditions. It's  
3 slightly different in the sense that the legislation  
4 requires you to move with -- if the contract moves and  
5 you want to move, you can opt to move to the new  
6 contractor, but they have to take you on your existing  
7 terms and conditions.

8 What the mayor has separately done, he has insisted  
9 that if a driver applies for a job with another bus  
10 company, perhaps because they are moving house and it is  
11 more convenient to go and work for Go-Ahead as opposed  
12 to Abellio, and they are successful in the job -- at the  
13 moment, if you opted to move by applying for a job, you  
14 start on the starter wage rate. What the mayor has  
15 agreed with the operators or told the operators they  
16 must do is if I'm a driver and I've got 15 years of  
17 experience in driving, and I apply to move from Abellio  
18 to Go-Ahead because it is more convenient for where  
19 I now live, I must be paid the rate that a 15-year  
20 service driver at Go-Ahead would be paid. So I haven't  
21 got to go back to the start of the promotional ladder in  
22 terms of driver seniority.

23 CHAIRMAN: Thank you.

24 MR MIKE WESTON: That's trying to make it fairer for drivers  
25 to transfer for sort of personal reasons.

26

1 CHAIRMAN: Mr Duncan.

2 MR PETER DUNCAN: Mr Chairman, are you minded to take  
3 a break?

4 CHAIRMAN: Yes.

5 MR PETER DUNCAN: It would be a convenient moment, if you  
6 are.

7 CHAIRMAN: I think it is. We think alike. We are going to  
8 break up our morning. I'm conscious that it's been more  
9 than two hours that you've been testifying. We'll take  
10 a 20-minute break now and resume at 11.30. Thank you.

11 (11.10 am)

12 (A short adjournment)

13 (11.30 am)

14 CHAIRMAN: Yes, Mr Duncan.

15 MR PETER DUNCAN: Thank you, Chairman.

16 Mr Weston, can I ask you to turn, please, to  
17 page 153 of your report. In section 8.6, you deal with  
18 the matter of the contractual relationship between the  
19 transport authority and the bus operators.

20 One of the points you make there appears in the  
21 first paragraph, the second sentence:

22 "Whilst the contractual structure is different in  
23 Hong Kong the high-level contractual model adopted in  
24 Hong Kong does not necessarily need to change to achieve  
25 improvement in terms of the contractual monitoring,

26

1 performance management and collaboration between  
2 franchised operators and the Transport Department."

3 A second point you have made, if I can refer you to  
4 the following page, 154, in the second paragraph, is  
5 what you described as an over-dependency on the  
6 statutory regulations applied to all vehicles.

7 You follow this up, in the last paragraph, by  
8 saying:

9 "In terms of experience from London, compliance with  
10 the statutory requirements relating to both vehicles and  
11 drivers is very much expected and it is the initiatives,  
12 projects and collaborative working beyond these that  
13 have and will make the real-world differences to  
14 safety."

15 You then refer to:

16 "The collaboration between the London bus operators  
17 and Transport for London and their willingness to  
18 innovate and try new technologies and approaches has,  
19 and as part of the bus safety programme, will deliver  
20 real results in terms of incident and injury reduction.  
21 [So] The Transport Department should consider how they  
22 can improve the collaborative working with the  
23 franchised bus operators."

24 So some sentiments there with regard to  
25 collaboration.  
26

1           The question I wish to ask you is: given that the  
2           Transport Department here is the regulator in this area,  
3           is there a danger of this close collaboration developing  
4           into something too cosy between the regulator and the  
5           bus operators?

6       MR MIKE WESTON: I think the two can sit side by side quite  
7           happily, and I think the reason why I have made those  
8           points in my report is, firstly, when I was at the TfL  
9           and was director of buses, I think I rarely referred to  
10          the framework agreement or the route agreement in any  
11          discussions with operators around performance or around  
12          issues, and I think that typified the nature of the  
13          relationship.

14          I think, when the chair and I met with some of the  
15          London operators in August, I don't think any of them  
16          mentioned the contract. The contract wasn't seen as  
17          an issue, wasn't seen as a barrier. I suppose I have  
18          also made that point because I feel that if  
19          an organisation -- and it would apply equally to TfL --  
20          wanted to make significant changes to a certain aspect  
21          of the operation, and safety is the one we are clearly  
22          interested in today, then doing it via the contract  
23          potentially becomes a very long process to actually  
24          agree how you will change the contract and what you will  
25          change in the contract.

1 I think if TfL had tried to introduce their bus  
2 safety standard and some of the other safety initiatives  
3 via changes to the contract, it would have taken a lot  
4 longer to deliver and it would have been a far slower  
5 process.

6 So I think there is an issue around the speed of  
7 delivering things, and you can deliver some things  
8 quicker through collaboration. I'm sure then at some  
9 point some of those things will get incorporated into  
10 the contract, into the framework agreement, at the  
11 appropriate point in time.

12 So I think that's one of the reasons there's a speed  
13 at which some of these things can be done if they are  
14 not totally locked into the franchise agreement or the  
15 contract.

16 I am also a strong believer that if -- it is  
17 important that there is a franchise agreement, there's  
18 a contract in place, or a framework agreement, that is  
19 clearly important in case of some dispute around the  
20 contract, but I am a strong believer that certain things  
21 can be taken forward more quickly and more effectively  
22 through collaboration, and that came out very, very  
23 clearly in the discussions in August with operators and  
24 with Transport for London, that collaboration, working  
25 together, was making quite significant progress in this  
26

1 safety field and in terms of the safety agenda.

2 I think that's why I have emphasised on  
3 collaboration.

4 There was a comment about the statutory requirements  
5 and meeting those. In terms of the UK requirements,  
6 there is just, in terms of vehicle maintenance standards  
7 and in terms of operators' requirements to meet the  
8 statutory requirements, there isn't a big issue. Most  
9 operators comfortably achieve those in London. So  
10 relying on those as your mechanism for improving won't  
11 really drive forward improvement.

12 CHAIRMAN: What are the aspects of collaboration that exist  
13 in London between Transport for London and the  
14 franchised bus operators that you would point to as  
15 evidencing the success that is to be achieved by  
16 collaboration?

17 MR MIKE WESTON: I think there's a number. The first one  
18 that's referred to in the report is the mechanism of the  
19 Bus Operator Forum, which is the forum of the managing  
20 directors of the bus companies and senior managers from  
21 the Transport for London buses department, who come  
22 together regularly to discuss issues of common interest,  
23 and safety is clearly one of those.

24 CHAIRMAN: Where do we find this in the report?

25 MR PETER DUNCAN: It's at page 136, Chairman.

26

1 MR MIKE WESTON: So the Bus Operator Forum, where operators  
2 would come together on an eight-weekly cycle, to meet  
3 with Transport for London managers, to discuss issues of  
4 common interest, and there are various subgroups below  
5 that that meet, again, to discuss issues of common  
6 interest but also to share best practice. And there is  
7 a safety subgroup --

8 CHAIRMAN: Before we get into the subgroup -- who are the  
9 people that meet at the Bus Operator Forum?

10 MR MIKE WESTON: It will be the managing directors of the  
11 individual bus companies, and the director level and  
12 senior managers of Transport for London, who will come  
13 together to that forum.

14 CHAIRMAN: Where is that meeting held?

15 MR MIKE WESTON: That's held at TfL's offices, usually on  
16 about an eight-weekly cycle.

17 It's probably got three objectives. One is to share  
18 good practice. It's a forum where operators can raise  
19 concerns, generic concerns they have, that they feel  
20 this forum can discuss. So they wouldn't necessarily  
21 raise specific issues that they have to do with their  
22 contract; it's more generic concerns.

23 CHAIRMAN: Could you give some examples?

24 MR MIKE WESTON: I'm trying to think of an example. It  
25 might be around enforcement of bus stops, for example,

26

1 parking at bus stops, where it's a generic issue for all  
2 operators. So it's a good forum to discuss what TfL can  
3 do to try to support enforcement at bus stops, for  
4 instance. It's those sorts of generic issues.

5 So it wouldn't be a forum where an operator would  
6 raise specific issues they've got with their contract or  
7 with their route agreements. It would be more --

8 CHAIRMAN: Taking that as an example, how would action be  
9 taken as a result? Who would do what?

10 MR MIKE WESTON: So TfL is then best placed to escalate  
11 those issues to either local authorities, who will be  
12 responsible for enforcement on certain highways, their  
13 own operational staff who may be able to contribute to  
14 enforcement, or the police, depending on the type of  
15 road.

16 So, again, TfL is often very better placed to  
17 escalate these things to other organisations who can  
18 help.

19 So those are the common issues. And then it is  
20 a good opportunity where TfL can use, through early  
21 engagement on some of the issues that they are thinking  
22 about, for example, sharing what the business plan might  
23 look like for the next five years for the organisation,  
24 which therefore could impact on the volume of work  
25 that's available to the operators, giving them advance  
26

1 notice of schemes that may be coming in, so big planning  
2 schemes for Central London, for example, changes to the  
3 bus networks, so using it as a forum to share what the  
4 organisation is planning to do.

5 CHAIRMAN: And, for example, things like the Elizabeth Line,  
6 the consequences of that, would that be something that  
7 would be raised?

8 MR MIKE WESTON: Yes. When I was at TfL, I can recall there  
9 being a couple of presentations by the bus planning  
10 department on the impact that line would have on the bus  
11 network in terms of how routes might change. So it's  
12 a good forum for sharing those sorts of issues.

13 CHAIRMAN: You mentioned subgroups. Can you describe them  
14 for us?

15 MR MIKE WESTON: Yes. There are a number of subgroups. The  
16 most pertinent ones in terms of safety are the safety  
17 subgroup and the engineering subgroup. So the safety  
18 subgroup is attended, again, by all the bus companies,  
19 sometimes at a managing director or director level,  
20 sometimes by the bus companies' head of safety. That's  
21 where again common issues around safety would be  
22 discussed.

23 The forum is also used as a place for operators to  
24 share lessons learnt from incidents, road traffic  
25 incidents. One of the things that I know the  
26

1 organisation was very conscious about, certainly when  
2 I was there, and still is, is that if one operator has  
3 an incident and does a very in-depth investigation and  
4 gets down to the root causes, it's clearly important  
5 that the other operators share the benefit and the  
6 wisdom of that investigation. It might not be totally  
7 applicable to them, but there might be some things that  
8 are applicable to them, but I think it would be remiss  
9 if the operators and TfL didn't share those lessons  
10 learnt and that good practice amongst each other.

11 So the forum is also used to share the outcome of  
12 investigations.

13 CHAIRMAN: For example, just by memory, there was  
14 an incident involving a bus driver who got out of his  
15 cab and hadn't put the handbrake on, and what that  
16 particular bus operator did to ensure that couldn't  
17 happen again.

18 MR MIKE WESTON: Yes. The incident you refer to, Chair, was  
19 where a driver had a problem with a wheelchair ramp and  
20 it wouldn't go back in correctly, so the vehicle  
21 therefore couldn't move. He called out an engineer.  
22 The engineer went to try and fix it but because the  
23 driver hadn't put the handbrake on, when he fixed it,  
24 the vehicle started to move, and unfortunately the  
25 engineer was killed in that incident. So that led the  
26

1 company to install a warning system whereby, when the  
2 driver leaves the cab, it warns him or her to make sure  
3 the handbrake has been deployed.

4 It is likely that TfL's bus safety standard would  
5 include that type of system as standard across the  
6 network, and it may even be more of an interlock.

7 But again it is a good example of where it's  
8 important that those sorts of lessons are shared across  
9 the contracted bus operators, and that operators don't  
10 see it as information that they should keep to  
11 themselves, that they are willing to share it, and they  
12 are willing to share with other operators those sorts of  
13 lessons learnt.

14 Then the engineering subgroup is generally made up  
15 of the engineering directors that will share issues  
16 around maintenance of vehicles. So often operators will  
17 have similar types of vehicles from the same  
18 manufacturers, so again there is an opportunity to share  
19 some of the lessons learnt for new vehicles coming into  
20 the fleet for issues they have had around maintenance,  
21 et cetera. So again another forum for collaboration and  
22 sharing good practice.

23 CHAIRMAN: And how often would the subgroups meet?

24 MR MIKE WESTON: On a similar cycle to the main group.

25 I mean, you could achieve this in a number of ways, but  
26

1 I think the underlying message here I think is that the  
2 bus operators in London are more than happy to  
3 collaborate and work together on issues that aren't  
4 necessarily of competitive advantage. And safety is one  
5 they see actually it's the greater good of everybody to  
6 improve safety, hence their willingness to work together  
7 and to collaborate.

8 CHAIRMAN: Apart from the representatives of the bus  
9 companies, and on the other hand Transport for London,  
10 do any of these meetings involve the attendance of bus  
11 drivers or trade union members?

12 MR MIKE WESTON: No. There's two separate lines of  
13 communication with the trade unions. One, TfL hold  
14 a meeting with -- I mean, London predominantly has one  
15 trade union --

16 CHAIRMAN: That's Unite?

17 MR MIKE WESTON: Unite, who probably represent 95-plus  
18 per cent of bus drivers, so in that sense consulting or  
19 liaising with a trade union from TfL's point of view is  
20 relatively easy, because there is only one trade union  
21 to liaise with.

22 So TfL have some regular meetings with the trade  
23 union to discuss things of generic interest. For  
24 example, they would meet with the trade union probably  
25 to share some of their thoughts on the bus safety  
26

1 standard, for example. But it is left down to the  
2 individual bus companies to deal with their local trade  
3 union representative in terms of local issues and local  
4 terms and conditions.

5 So there is a sort of two-tier approach to dealing  
6 with trade unions, with the official discussions and  
7 negotiations taking place at company level, not by TfL.

8 CHAIRMAN: Mr Duncan.

9 MR PETER DUNCAN: Thank you, Mr Chairman.

10 When was the forum established?

11 MR MIKE WESTON: That's a good question. At least 15 years  
12 ago, very established. I chaired it probably for six or  
13 seven years. But a good 15 years, a very established  
14 process, and maybe the fact that it's stood the test of  
15 time perhaps gives it some credibility in terms of its  
16 usefulness, otherwise I'm sure it wouldn't still be --  
17 the forum and the subgroups still wouldn't be there, if  
18 they weren't deemed to be useful.

19 MR PETER DUNCAN: Was it formed as a reaction to  
20 a particular event, or was it a proactive move, just to  
21 improve standards generally?

22 MR MIKE WESTON: If I recall, it was proactive, and I think  
23 it was probably at some point post the privatisation of  
24 the publicly owned companies, when it was felt there was  
25 a need to bring everybody together to discuss these  
26

1           sorts of common issues.

2       MR PETER DUNCAN: I wonder if I could refer you to  
3       Prof Stanley's report, page 94.

4           There's a paragraph 5.3, "Conclusions on other  
5       matters", where he says in this part of his report:

6           "In light of this discussion, the main areas that  
7       the author proposes that Hong Kong should consider in  
8       terms of possibly improving working/driving/rest  
9       provisions for, and technology used in, route bus  
10      operation are to", and there's a number there, but he  
11      refers to an item 6:

12          "establish a standing committee on bus safety,  
13      meeting at least twice yearly to review and evaluate the  
14      latest technology that may impact on bus safety,  
15      particularly for route bus operation, and advise  
16      government on desirable safety inclusions in the FB  
17      fleet and other bus systems. The newly formed working  
18      group on enhancement of franchised bus safety could form  
19      the basis for this committee but membership should be  
20      broadened to include other bus operators."

21          The question I've got for you is: is there a body or  
22      a group of any sort in London which effectively meets  
23      the objectives of Prof Stanley's standing committee,  
24      something which reviews and evaluates the latest  
25      technology with regard to what safety inclusions in the

26

1 buses are desirable? Is there any equivalent body in  
2 London for this?

3 MR MIKE WESTON: Well, the structure in London, it appears  
4 to be that TfL are leading the development of those  
5 standards and reviewing those technologies, but then  
6 liaising with the operators, either through workshops or  
7 through the Bus Operator Forum structure.

8 So I would say that the Bus Operator Forum and the  
9 safety subgroup are the nearest to that committee, but  
10 then it depends whether Prof Stanley was suggesting that  
11 committee should be broader than the bus operators and  
12 the Transport Department, whether it should have broader  
13 membership than that.

14 So I think the equivalent would be the Bus Operator  
15 Forum, in London's case.

16 MR PETER DUNCAN: Right, and if I understand your answer  
17 correctly, initially any developments that might be  
18 available with regard to technology would be something  
19 which TfL itself would identify and then ensure that  
20 it's discussed during the course of the forum meetings?

21 MR MIKE WESTON: Yes. Or operators have identified them and  
22 brought them up through the Bus Operator Forum  
23 structure. In all fairness, often the operators will  
24 identify some of this technology before TfL does, but  
25 the structure and the lines of communication are there

26

1           for all these ideas to flow both ways between the  
2           authority and bus operators.

3       MR PETER DUNCAN: Now, I would ask you to go to another page  
4           of Prof Stanley's report, this time at --

5       CHAIRMAN: Before you do, just let me pursue this.

6           So, for example, the Guardian drowsiness machine,  
7           that might be something that a particular bus operator  
8           had raised at a safety group meeting, and then it became  
9           something that Transport for London implemented a trial  
10          of the device; is that what you are describing?

11       MR MIKE WESTON: Yes. The technology you describe there --  
12          which was the Seeing Machines, I think it was called,  
13          wasn't it, where the cameras identify when drivers  
14          potentially were falling asleep -- the trial of that  
15          came about because TfL introduced something called the  
16          safety innovation fund and they went out to all the  
17          operators, saying, "We would like to fund a number of  
18          trials of new technology and make sure that we monitor  
19          those trials properly, make sure we get some good data  
20          on how successful they are", and so they asked for  
21          operators to put in bids for some of this funding, and  
22          that was an example of one of the trials that came  
23          about, on the back of this safety innovation fund, which  
24          I think at the time, the first round was 500,000 pounds,  
25          so half a million pounds of funding was put into these

26

1 various trials.

2 CHAIRMAN: And this, as I recall it, was July 2017, and  
3 people were asked to bid and then awards were made in  
4 November 2017?

5 MR MIKE WESTON: Yes, that's correct.

6 CHAIRMAN: Then the trials rolled out?

7 MR MIKE WESTON: Yes, the trials rolled out, and then the  
8 output and the monitoring and the results of those  
9 trials are fed into or are feeding into the bus safety  
10 standard.

11 CHAIRMAN: And that's what will be reported on in the middle  
12 of October, the success or otherwise of these various  
13 trials?

14 MR MIKE WESTON: Yes. I think it's on 16 October TfL are  
15 planning an event for bus operators and suppliers, not  
16 only to announce the first phase of their bus safety  
17 standard but also to feed back to all the operators the  
18 results of the various technology trials that have taken  
19 place.

20 CHAIRMAN: So the role of Transport for London was to come  
21 up with the money to fund -- one part of the role was to  
22 come up with the money to fund the trial of safety  
23 devices?

24 MR MIKE WESTON: Yes, but I think also to help the operators  
25 come up with the methodology for monitoring the trials.

26

1       There are two aspects, in my view, to a trial of new  
2       technology. It is easy to engage a supplier to fit  
3       technology to your bus. What's important is you've got  
4       some robust monitoring in place, that you clearly assess  
5       the benefits and understand whether it's actually  
6       delivering results, because that helps justify the  
7       future investment in that technology. And in the past  
8       I think things have been trialled where the monitoring  
9       hasn't perhaps been as robust as it should be, hence it  
10      is very difficult to determine whether or not that piece  
11      of technology is successful.

12     CHAIRMAN: So who in Transport for London would have given  
13      that assistance to the successful bus operators in their  
14      bids to get money to do trials?

15     MR MIKE WESTON: What Transport for London did in early 2015  
16      is set up a dedicated team to focus on the bus safety  
17      programme, and it included somebody who was seconded  
18      from the road safety team of TfL, and the aim was so  
19      they would focus, and that team is still focusing, on  
20      improving bus safety and delivering the bus safety  
21      programme.

22      So there is a dedicated team of two or three people  
23      whose job is purely focused on this agenda and driving  
24      bus safety.

25     CHAIRMAN: But, more specifically, how would they have  
26

1           assisted in ensuring that the monitoring was done  
2           properly?

3       MR MIKE WESTON: Oh, okay, sorry. So it's a combination of  
4           they would have helped the operators develop the  
5           monitoring framework, but they have also used  
6           an external consultancy called TRL to undertake some of  
7           the monitoring on behalf of TfL and the operators.

8       CHAIRMAN: TRL is Transport Research?

9       MR MIKE WESTON: Yes, it historically stood for Transport  
10          Research Laboratory which was actually  
11          a government-owned transport research centre focusing on  
12          accidents and crashworthiness of vehicles but was  
13          privatised a number of years ago. So it's effectively  
14          a consultancy but specialising in road transport matters  
15          and technical assessment of road transport matters.

16       CHAIRMAN: That is how the bus operators were assisted in  
17          monitoring the trials?

18       MR MIKE WESTON: Yes. Some of them. Some of them, they may  
19          have monitored themselves, but TRL have been involved in  
20          trying to understand the costs and benefits of these  
21          various technologies.

22       CHAIRMAN: TRL was involved in the test of the intelligent  
23          speed assistance or assessment trial, was it not?

24       MR MIKE WESTON: Yes, they were, in 2000 --

25       CHAIRMAN: June 2015?

26

1 MR MIKE WESTON: Yes, and then early 2016.

2 CHAIRMAN: Reported at the end of 2016?

3 MR MIKE WESTON: Yes, correct.

4 CHAIRMAN: Do we have that report in our bundle?

5 MR PETER DUNCAN: Yes. It's in SEC-3, Mr Chairman.

6 CHAIRMAN: Thank you.

7 MR PETER DUNCAN: I beg your pardon, it's in MISC-3.

8 I believe it starts at page 1002 of that bundle.

9 CHAIRMAN: So we see from this report, do we not, at  
10 page 1003, that the report had been amended and issued  
11 in November 2016? But I think it's apparent from the  
12 report that the initial testing had begun in June 2015.

13 MR MIKE WESTON: Yes. So my understanding is that in  
14 June/July 2015, the "before" data for the two selected  
15 bus routes was collected.

16 CHAIRMAN: Yes.

17 MR MIKE WESTON: And TfL selected two routes, one that went  
18 through Central London and then one that went from inner  
19 London to outer London. So they selected two quite  
20 different bus routes, the route 19 and the 486, and the  
21 "before" data was collected in July 2015. I think it  
22 took a number of months then for the technology to  
23 settle down and to be properly calibrated. There were  
24 some teething issues during 2015.

25 So the "after" data for route 19 was collected in  
26

1 September 2015, and for route 486 in January 2016.

2 CHAIRMAN: And one of the two bus companies involved, was  
3 that Go-Ahead?

4 MR MIKE WESTON: Yes, the 486 is Go-Ahead.

5 CHAIRMAN: And Mr John Trayner is the managing director of  
6 Go-Ahead?

7 MR MIKE WESTON: That's correct.

8 CHAIRMAN: Who we met in London?

9 MR MIKE WESTON: We did.

10 CHAIRMAN: Can you help us then to understand, just briefly,  
11 what role Transport for London and TRL had played in  
12 ensuring that this trial was monitored and assessed  
13 properly?

14 MR MIKE WESTON: So effectively TfL commissioned this trial  
15 of intelligent speed adaptation, and just to clarify,  
16 effectively what this technology does is it uses the  
17 digital speed map that's available for London, and each  
18 of the vehicles fitted with equipment talk to the  
19 digital speed map, and therefore restricts the driver's  
20 ability to accelerate beyond the speed limit. So it  
21 controls the driver's speed at the speed limit. So it  
22 doesn't take away any of his or her braking ability, but  
23 at the point at which the speed limit is reached, it  
24 stops the driver accelerating any further.

25 So this technology was funded on these two routes by  
26

1 Transport for London, but they commissioned TRL to do  
2 the monitoring, and the reason for that is that whilst  
3 I think the bus companies quite rightly could get a feel  
4 for how successful it was from driver feedback and from  
5 their own observations, it does take quite a lot of  
6 detailed monitoring to get some robust before and after  
7 data to show the real impact on the average speed of  
8 buses and the actual number of buses exceeding the speed  
9 limit before and after.

10 So I think there was a recognition, and this is  
11 a good example, of some new technology where it is  
12 important that you have some robust monitoring in place,  
13 ideally before it is installed but definitely after it  
14 is installed, to make sure you understand the changes  
15 and therefore understand what the benefits are.

16 So that's at TfL. TRL's role was the monitoring of  
17 these two bus routes, both before and after the fitment  
18 of the ISA kit.

19 CHAIRMAN: And to produce this very comprehensive report?

20 MR MIKE WESTON: And to produce the report, yes.

21 CHAIRMAN: This technology, intelligent speed assistance,  
22 was a technology that had been around for many years,  
23 had it not? Perhaps not implemented -- perhaps this was  
24 the time when it was ready to be implemented -- but the  
25 concept had been around for many years?

26

1 MR MIKE WESTON: Yes. I think the concept has been around.

2 It's clearly dependent on the digital speed map existing  
3 and being kept up to date. The concept of the  
4 technology had been around but I think this was the  
5 first time it had been trialled on buses. I think about  
6 three or four years before this trial, it was fitted to  
7 one of TfL's cars, and I had the opportunity to drive  
8 the car to see how it performed, and at the speed limit,  
9 you weren't able to accelerate beyond.

10 So this was the sort of first full-scale trial of  
11 the technology on buses in London.

12 CHAIRMAN: This was technology that had been written about  
13 in the EU, had it not? Had there not been papers  
14 extolling its virtues and inviting people to experiment  
15 with it?

16 MR MIKE WESTON: Yes. I think there was some reference to  
17 that during our discussions in London, but I'm not  
18 totally familiar with those papers.

19 CHAIRMAN: So the process of doing this trial, had it  
20 involved the use of the equipment on a car, first of  
21 all, three or four years earlier; then the funding of  
22 the equipment to be installed on these two bus routes,  
23 and then the funding of the consultancy --

24 MR MIKE WESTON: Yes.

25 CHAIRMAN: -- TRL to do the monitoring and the report?

26

1 MR MIKE WESTON: Yes.

2 CHAIRMAN: The project had been underway, therefore, for  
3 some years?

4 MR MIKE WESTON: Yes, but I don't think the funding was --  
5 I don't think the availability of funding was the issue.  
6 If I recall, the issue was the technology becoming  
7 mature enough to be successfully fitted to a vehicle  
8 that was in passenger service. So I think that was what  
9 TfL were waiting for, as opposed to the funding wasn't  
10 the reason that it wasn't being trialled.

11 CHAIRMAN: Is it known what the funding cost Transport for  
12 London?

13 MR MIKE WESTON: I don't have those figures but I would  
14 suggest that actually, probably, in reality, the  
15 monitoring was probably more expensive than the actual  
16 equipment for the number of buses fitted.

17 CHAIRMAN: Yes.

18 MR MIKE WESTON: I would suspect the monitoring would be the  
19 bigger cost involved. But in the context of the bus  
20 network, it would have been relatively -- well, it would  
21 have been very small sums of money.

22 CHAIRMAN: But this is an example of the authority, in this  
23 case Transport for London, funding the trial, the bus  
24 operator agreeing to participate in the trial?

25 MR MIKE WESTON: Yes. And hopefully a good example of the  
26

1 level of monitoring and assessment that you need to go  
2 into when looking at new technology. Hopefully the  
3 report gives you a feel for the sort of depth of  
4 analysis that's needed to make sure that you are  
5 investing your money in the right types of technology.

6 CHAIRMAN: And a rigorous monitoring and then analysis in  
7 the report itself?

8 MR MIKE WESTON: Yes, rigorous analysis, but also  
9 independent analysis, which is quite valuable as well.  
10 So commissioning somebody to independent monitor is of  
11 value as well. And TRL have also been engaged in the  
12 assessments of all the other technologies that are being  
13 considered as part of the new bus safety standard in  
14 London.

15 CHAIRMAN: By that, do you mean the various devices, the  
16 drowsiness device, the forward-looking device, the one  
17 that picks up the pedestrians about to cross the road?

18 MR MIKE WESTON: Yes.

19 CHAIRMAN: TRL have been involved in the monitoring side of  
20 that?

21 MR MIKE WESTON: Monitoring and understanding the  
22 cost/benefits of those different technologies.

23 CHAIRMAN: Yes, Mr Duncan.

24 MR PETER DUNCAN: Thank you, Chairman.

25 If I could ask you some supplementary questions on  
26

1       that topic, Mr Weston. First of all, with regard to  
2       when intelligent speed adaptation design was first  
3       considered by Transport for London.

4             If you would be good enough to look at that volume,  
5       MISC-3, at page 939, please.

6             Do we see there a report, dated as long ago as  
7       December 2009, on the topic of intelligent speed  
8       adaptation design?

9       MR MIKE WESTON: Mmm.

10      MR PETER DUNCAN: I think, if you look through to page 943,  
11      we see the commencement of the executive summary:

12             "This report outlines results from a project  
13      commissioned by TfL to further explore drivers'  
14      attitudes towards intelligent speed adaptation ... and  
15      specially to understand drivers' response to the design  
16      of the user interface."

17             So there was a study as long ago as 2009.

18             If I can take you then to 945, the introduction to  
19      the paper refers, in the first paragraph, if I may  
20      quote:

21             "ISA software development began in France in the  
22      1980s and has been trialled and evaluated in a number of  
23      different markets since, proving effective at reducing  
24      driver speed and incidents on the road. In May 2009  
25      Transport for London commenced a trial of one of the  
26

1 latest ISA systems in an attempt to reduce speed and  
2 road accidents in the capital."

3 If I could stop there. It would seem that this  
4 particular trial was not restricted, as you referred to  
5 before, to buses, or did not extend to buses; it was  
6 vehicles, it looks like, in general?

7 MR MIKE WESTON: Yes, that's correct, because TfL also have  
8 some generic road safety responsibilities as  
9 an organisation, because the strategic road network in  
10 London is TfL -- TfL owns and is TfL's responsibility.  
11 So, within TfL, there is a road safety unit, responsible  
12 for road safety generally. So these trials that this  
13 report is referring to, which is the ones -- I wasn't  
14 involved in but I recall because this would have been  
15 the cars that were fitted -- this wasn't specifically  
16 buses, this was vehicles generally, looking at the  
17 appropriateness of ISA for vehicles generally.

18 MR PETER DUNCAN: And if we look at the penultimate  
19 paragraph on the "Introduction" page:

20 "To date a year-long project has already been  
21 undertaken by TfL to understand and explore the London  
22 drivers' attitudes, motivations and barriers to ISA."

23 Then if we go through to page 960, in the context of  
24 cost/benefit analysis, do we see set out at page 960  
25 a list of the perceived benefits and barriers to the  
26

1 introduce of ISA?

2 MR MIKE WESTON: Yes.

3 MR PETER DUNCAN: If I could then take you, please, through  
4 to page 1004 of the same bundle. You will see the  
5 contents page of the TRL client contract report,  
6 published in November 2016.

7 I would just like to dwell upon some of the content  
8 of the report, the details of which we can see by  
9 reading the report, but in the context of the rigorous  
10 analysis, as Mr Chairman referred to it, as far as cost  
11 and benefits are concerned.

12 If we go through the contents, there's eight  
13 headings:

14 "1. Is ISA an effective method of speed compliance?

15 2. Is ISA an efficient method ...?

16 3. What is the impact of ISA vehicles on the  
17 behaviour of surrounding traffic speeds?

18 4. What is the impact of ISA vehicles on the  
19 behaviour of surrounding vehicle actions?

20 5. ... benefits and disbenefits of ISA for Transport  
21 for London."

22 Then you can see those headings and details set out  
23 at 5.2 to 5.13 in detail, and then item 6, the benefits  
24 and disbenefits of ISA for the bus operator; and then 7,  
25 the benefits and disbenefits of ISA for the bus driver;

26

1 and then 8, the benefits and disbenefits of ISA for the  
2 bus passenger.

3 So those are the various matters which TRL have  
4 explored and the details of which we can find in the  
5 report itself, in the report that was submitted to  
6 Transport for London.

7 I think, at page 1011, we can see the reference to  
8 2015 for the trial that the chairman referred to.  
9 I think it's in the last paragraph on that page:

10 "Subsequently, in 2015 TfL carried out a trial of  
11 ISA on London buses using an intervening ISA system by  
12 Zeta Automotive Ltd."

13 I think that's the trial that's been referred to  
14 before; is that correct?

15 MR MIKE WESTON: Yes. That's the sort of -- yes, I think  
16 that was a very small-scale trial before these two  
17 routes were trialled on a slightly bigger basis, on  
18 a larger basis.

19 MR PETER DUNCAN: Could I now take you back, please, to  
20 Prof Stanley's report, this time at page 70. Have you  
21 had the opportunity of reading this page of his report?

22 MR MIKE WESTON: Yes, I have.

23 MR PETER DUNCAN: On this page, Prof Stanley is bringing to  
24 our attention the fact that one of the notable  
25 differences between the arrangements between Melbourne  
26

1 and Hong Kong is that Melbourne has a separate -- I am  
2 quoting from the paragraph underneath the italicised  
3 part:

4 "... Melbourne ... has a separate independent safety  
5 regulator operating at the tactical level. Transport  
6 Safety Victoria was first established under the state's  
7 Transport Integration Act 2010, as discussed in  
8 section 3.3.1 of the first report under this brief,  
9 a role that has no equivalent independent safety entity  
10 in Hong Kong. The Transport Department monitors safety  
11 performance of franchised bus operators and is involved  
12 in promoting safety initiatives. However, the absence  
13 of an independent safety regulator in Hong Kong seems  
14 likely to lessen the relative focus on safety matters."

15 So, to summarise that, it would appear that in  
16 Melbourne, the safety aspect of the operation is taken  
17 away from the regulator and put in the hands of  
18 an independent regulator aimed at the safety aspects.

19 We can see more detail of this by going to page 99  
20 of the same report. If I could read from the  
21 second-last paragraph on that page:

22 "Operator support is available from BusVic, the  
23 industry association, if desired, across all three  
24 areas. For example, BusVic has developed templates ...  
25 which are available to its members, these templates  
26

1       having been developed in collaboration with the  
2       Transport Safety Director. The Transport Safety  
3       Director has a strong focus on the development and  
4       improvement of safety culture in a bus business and  
5       safety risk management, working with operators and the  
6       industry to improve practice. Guidance material is  
7       available, such as Guidance -- Safety Culture, September  
8       2016 ... and the director has indicated his willingness  
9       to share materials and ideas with Hong Kong, if desired.

10       The independence of the Transport Safety Director  
11       both elevates safety as a desirable policy outcome and  
12       provides an independent source of accountability and  
13       transparency on safety processes and outcomes that  
14       exceed what is likely to result if ... bus safety was  
15       left solely to the public transport regulatory agency  
16       and/or a governmental department to manage. The  
17       Transport Safety Director's audit processes and industry  
18       engagement has led the agency to the conclusion that  
19       Melbourne's route bus services and practices are safe  
20       and that the safety focus should be on developing  
21       a proactive and forward-looking safety risk management  
22       culture, as distinct from practices that react to safety  
23       concerns after they happen."

24       Then, going down the page, in bold:

25       "The major recommendation from the study is that the  
26

1 committee should give consideration to, within the  
2 legislative framework, recommending", and it's the  
3 second bullet:

4 "the creation of the independent position of  
5 Transport Safety Director, whose role is to be  
6 responsible for administering matters related to safety  
7 duties, ensuring compliance and enforcement."

8 Now, we can see the role of that body in Victoria  
9 and the recommendation. I suppose one of the questions  
10 that might be asked is whether we actually need another  
11 bureaucracy, as it would be, to carry out this role. Do  
12 you have any views on that?

13 MR MIKE WESTON: Yes. I think it does depends very much on  
14 the sort of local structures and circumstances that  
15 already exist in Melbourne or Hong Kong or London.

16 But I would suggest that if you look at some of the  
17 progress that TfL are currently making with the bus  
18 operators around safety, and the bus safety standard and  
19 the bus safety programme, and the relative speed in  
20 which that's being delivered, I would just -- I'm not  
21 adverse to the idea of a separate safety regulator in  
22 some way, and it is something that already exists in the  
23 UK rail industry, as is referred to in my report, and it  
24 is something that TfL are thinking of trying to  
25 encourage for the UK tram industry, in terms of setting  
26

1 standards and good practice.

2 But my fear would be that if it was suggested to  
3 establish this in London, for example, the potential is  
4 that whilst that's being established you get a period of  
5 inertia, with not much particularly happening. So  
6 I would be fearful in London, if the suggestion was  
7 made, that you may end up with a period of the current  
8 activity and current progress that's been made slows  
9 down whilst this regulator is established. So that  
10 would be my concern.

11 But no particularly strong views, just a little bit  
12 of a concern that it perhaps stifles progress in the  
13 short term, and maybe progress can be made quicker  
14 through collaboration and the current structures and the  
15 current players working together more closely.

16 CHAIRMAN: If I understand your evidence correctly, you are  
17 satisfied that appropriate progress is being made by  
18 virtue of collaboration between the franchised bus  
19 operators and Transport for London, in the various ways  
20 you have described?

21 MR MIKE WESTON: Yes, but the caveat on that comment is that  
22 that's within the tendering and competitive structure  
23 that London currently has. So whether that model  
24 transfers easily to other jurisdictions is a matter of  
25 debate, I suppose.

26

1           So, you know, it seems, from the evidence that  
2           I have seen over the last few years and the evidence  
3           that we have gathered for this report, it seems that  
4           quite significant progress is being made around the  
5           safety agenda for buses in London, but that's being made  
6           within the current structure that they have in London.  
7           So taking that model exactly and trying to put it into  
8           another region may not necessarily deliver results in  
9           exactly the same way. But the evidence from London is  
10          it certainly seems to be delivering some quite  
11          significant results and making some quite rapid progress  
12          around the use of technology and setting standards.

13       CHAIRMAN: What view do you take on what I understand to be  
14          Transport for London's claim that they are setting  
15          global standards?

16       MR MIKE WESTON: From my knowledge, it is the only transport  
17          authority that seems to be trying to set a bus safety  
18          standard for its bus fleet, and so it will set the  
19          scene, and it will certainly have a knock-on effect into  
20          other parts of the UK and possibly places such as  
21          Hong Kong and Singapore, mainly because the main bus  
22          manufacturers into London also supply the rest of the  
23          UK, and also the key suppliers into Hong Kong and  
24          Singapore. So you can see how there's going to be some  
25          obvious transition of some of this best practice to  
26

1 other vehicles that they build for other parts of the  
2 world. So there is clearly some good crossover by those  
3 manufacturers who I'm sure will be keen to sell some of  
4 this technology into other regions.

5 CHAIRMAN: One example of that would be, for example,  
6 changes to the design of the front of buses. As  
7 I understand it, changes that would modify the box shape  
8 of the front of the bus, putting in curves, so that  
9 rather than being knocked down and put under the wheels  
10 of a bus, the person who has impact with the front of  
11 a bus would be knocked sideways; do I understand that  
12 change correctly?

13 MR MIKE WESTON: Yes. So one of the initiatives that is  
14 likely to be included in the bus safety standard, when  
15 it is announced next month, is a sort of -- I call it  
16 softening of the front-end design of a bus. So it's not  
17 physical softening, but it's using more curves, looking  
18 at the rake of a windscreen, looking at having the  
19 spindles for the wipers at the top of the windscreen,  
20 not at the bottom, because if they are at the bottom  
21 they then become a point of impact for pedestrians if  
22 they are hit by the bus and potential injury.

23 So I suppose it is trying to make the front end of  
24 the design of the bus more forgiving. If a pedestrian  
25 is hit by a car at a certain speed, at a relatively low  
26

1 speed generally they will be thrown off the bonnet onto  
2 the pavement, onto the road, but at the same speed with  
3 a bus, you are more likely to be more seriously injured  
4 because of the design of the bus.

5 So it's trying to make the front end of a bus more  
6 forgiving in an accident with a pedestrian. In my mind,  
7 the likelihood is that is more of a design cost as  
8 opposed to an actual manufacturing cost, and the logic  
9 would be if that design is proved to be beneficial in  
10 London, why wouldn't the likes of Alexander Dennis and  
11 Wrights, who supply to the rest of the UK and to  
12 Hong Kong, adopt that for buses that they sold into  
13 their other markets. It would be a pretty obvious thing  
14 to do. So I think that's a good example of where we  
15 might see some good practice and best practice move  
16 across into other markets relatively quickly.

17 CHAIRMAN: Just to come back to your observations as far as  
18 this is concerned. The model works in London, that has  
19 regard to the structure that obtains in London, and the  
20 issue of a progressive, proactive transport authority  
21 achieving the same success is going to depend on the  
22 local structures in Hong Kong?

23 MR MIKE WESTON: Yes, and I think the question is which  
24 model will deliver these benefits quickest, using the  
25 current structures that are in place and trying to build  
26

1 on those or establishing a separate regulator that in  
2 the short term possibly will slow the progress down.

3 So it's trying to, I suppose, learn from the  
4 relative speed in which London has made some progress  
5 over the last couple of years and trying to see how that  
6 sort of good practice could be implemented sooner rather  
7 than later.

8 CHAIRMAN: Mr Duncan.

9 MR PETER DUNCAN: Thank you, Chairman.

10 So I think, between you and Prof Stanley, you have  
11 provided the committee with various options to improve  
12 this aspect. One might be something equivalent to the  
13 Bus Operator Forum. Another might be a standing  
14 committee which Prof Stanley suggested, although there  
15 doesn't seem to be a standing committee in Victoria.  
16 Then a third option might be this independent regulator,  
17 the transport safety regulator. So they all seem to be  
18 matters for the committee's consideration. Would you  
19 agree with that?

20 MR MIKE WESTON: Yes, and perhaps the difference between the  
21 Bus Operator Forum structure and the standing committee  
22 is perhaps fairly small and may be one of semantics and  
23 description more than anything. They may be the same  
24 thing in practice.

25 I suppose the question out of that is whether that  
26

1 committee would benefit from other third parties being  
2 involved, such as obviously the police or other  
3 authorities being involved in the debate.

4 MR PETER DUNCAN: You have no doubt heard of ISO, ISO 39001  
5 in particular. Does that standard have any sort of role  
6 in the bus system in London?

7 MR MIKE WESTON: I'm not sure. I know that certainly  
8 Go-Ahead have got an ISO standard for their engineering  
9 practices, but whether it's the same number or  
10 a different one, I don't know. So there are some bus  
11 companies in London that have ISO accreditation for  
12 certain aspects of their operation, but it is not  
13 a requirement of Transport for London to have any  
14 particular ISO accreditation. But I certainly know  
15 Go-Ahead do for their engineering practices, but whether  
16 it's the same number or not, I'm not sure.

17 MR PETER DUNCAN: Could I take you to page 146 of your  
18 report, where you deal in detail with the bus safety  
19 programme, and introduced on page 146 in this way:

20 "In February 2016 Transport for London, partly in  
21 response to increased public and stakeholder pressure,  
22 launched its bus safety programme the core elements of  
23 which can be summarised as follows".

24 We can see the "Core elements" in the left-hand  
25 column, and we can see the "Recent additions" on the  
26

1 right.

2 We may have touched on this earlier, just a few  
3 moments ago, but one of the questions I was interested  
4 in asking you was how long this bus safety programme was  
5 in the making?

6 MR MIKE WESTON: Not very long, and partly the reason I know  
7 is because I was still at TfL in February 2016 and was  
8 responsible for launching the bus safety programme.

9 The background to it is not that safety wasn't  
10 a priority and it's not that safety wasn't being  
11 progressed and taken forward and the Bus Operator Forum  
12 for safety existed and a lot of these things were  
13 happening anyway.

14 There was increased public pressure around the  
15 safety of buses, and that was partly driven by increased  
16 transparency from TfL in terms of publishing safety  
17 data, but it was also led by a number of stakeholders,  
18 including some members of the public that had been  
19 involved in serious bus accidents, that led to a lot of  
20 pressure on the organisation to move the safety agenda  
21 forward. So the bus safety programme was trying to pull  
22 together various aspects of work that were currently  
23 happening into a coordinated programme, where previously  
24 there had been lots of initiatives but it wasn't being  
25 seen as a coordinated programme. And February 2016 was

26

1           when that was launched, to try to progress this agenda  
2           in a more coordinated way.

3       MR PETER DUNCAN:   So how many people would have participated  
4           in the design of the programme?

5       MR MIKE WESTON:   Probably two or three people.   Very small  
6           team.   It would have been signed off internally at  
7           a higher level, but it would have been brought together  
8           by two or three people within the buses safety team.

9       MR PETER DUNCAN:   And the programme, would you describe it  
10          as a reactive step, a proactive step, or a mixture of  
11          both?

12      MR MIKE WESTON:   It wasn't reactive to a specific incident.  
13          I think it was an evolution of a number of things that  
14          were already happening, but probably a useful refocus on  
15          the agenda.

16                So, you know, I think it's clear in my mind that the  
17          bus operators and TfL have always taken safety  
18          seriously, for a number of years, but this was a useful  
19          point to try and refocus and rejuvenate the agenda and  
20          give it a little bit more direction.   That was the  
21          purpose of this.

22                But it wasn't triggered specifically by a specific  
23          event, but there was increasing public pressure.   There  
24          had been an increasing number of incidents with  
25          cyclists, because the number of cyclists in London was  
26

1 rising quite dramatically. There had been some serious  
2 bus accidents as well in Oxford Street. So a number of  
3 things were bubbling under that were putting more  
4 pressure on TfL to move this agenda forward.

5 But I should stress that a lot of this work was  
6 already happening but probably not in such a coordinated  
7 way.

8 MR PETER DUNCAN: If I could bring your attention to  
9 page 148. There's particular reference within the  
10 programme to the bus safety standard. That's introduced  
11 in the first paragraph, if I may quote:

12 "A core output of the bus safety programme is the  
13 development of a new bus safety standard. TfL have been  
14 working in collaboration since 2016 with road safety  
15 consultant TRL, Loughborough University, the bus  
16 operators and manufacturers to assess and then recommend  
17 features which should be incorporated into future bus  
18 design to help drive safety improvements."

19 Then in the second paragraph:

20 "Several potential technologies including  
21 intelligent speed assistance, autonomous braking,  
22 runaway bus prevention, pedal confusion prevention,  
23 acoustic and visual conspicuity, mirror design and  
24 frontal crash protection are being considered as part of  
25 this programme with both the costs and benefits of each  
26

1           being thoroughly assessed to ensure that the causality  
2           [I think that's casualty] reduction is maximised in  
3           return for the financial investment made."

4           Then we see a reference to intelligent speed  
5           assistance, and then the plan to announce the first  
6           phase of its bus safety standard on 16 October 2018, to  
7           which the chairman has referred, and the three  
8           introductory phases.

9           If I could pick it up after that:

10          "Although it is currently envisaged the standard  
11          will apply to new buses (around 700 per annum)  
12          consideration is also being given to the potential for  
13          retrofitting to existing buses possibly as part of their  
14          midlife refurbishment which takes place around 7 years.  
15          It is worth noting that TfL have adopted a rigorous  
16          approach to the assessment of each potential option  
17          using cost/benefit analysis to target the interventions  
18          which will give the greatest return for each pound spent  
19          in terms of injury/accident reduction.

20          It is not anticipated that seat belts will form part  
21          of the new bus safety standard."

22          When you say, "It is not anticipated", is that as  
23          a result of the rigorous cost/benefit analysis which has  
24          been applied to this particular topic?

25       MR MIKE WESTON: I think, during the discussions with TfL

1 staff about the bus safety standard, it was pretty clear  
2 that they have discounted seat belts as one of the  
3 options to be rigorously assessed fairly quickly. The  
4 view has clearly been taken that they don't want to  
5 pursue seat belts, I suspect because they know what the  
6 cost is and they feel that there are greater benefits  
7 from some of the other options that are listed above on  
8 that page.

9 I don't want to use the word they were "dismissive"  
10 of seat belts -- that sounds a little bit flippant  
11 because I don't think they were dismissive -- but it  
12 clearly is not featuring in their thinking in terms of  
13 the new bus safety standard. That was pretty clear from  
14 the discussions we held with TfL in August, that seat  
15 belts were not being considered.

16 CHAIRMAN: Mr Duncan's question was whether or not it had  
17 been dismissed, rejected, or not considered as a result  
18 of a rigorous analysis. The contrary is the impression  
19 that we anticipate to be confirmed in the future: it  
20 hadn't even been considered?

21 MR MIKE WESTON: The impression we had -- we were given the  
22 impression that it hasn't been considered.

23 CHAIRMAN: Not looked at?

24 MR MIKE WESTON: Not looked at.

25 MR PETER DUNCAN: If we look at page 134, have you set out,  
26

1           it appears in blue on that page, a quotation from the  
2           Department for Transport guidance note, which states the  
3           current situation with regard to seat belts on buses?

4           Is that the Department for Transport guidance note?

5   MR MIKE WESTON:   Yes.   The blue is a direct copy of their  
6           guidance.

7   MR PETER DUNCAN:   I'm going to ask you -- I will take you  
8           through that, because we want to examine the situation  
9           in Hong Kong, as it has evolved and as it is currently  
10          recommended.   So it is important, I think, that we  
11          understand this.

12               "General requirements since 1 October 2001, seat  
13          belts have been required to be installed in each forward  
14          and rearward facing seat in all new buses.   The use of  
15          an approved and properly fitted restraint system can  
16          help prevent death or serious injury, not only by  
17          restraining the occupant from forward motion but also by  
18          preventing their ejection from the vehicle, particularly  
19          in accidents where the vehicle rolls over.

20               The only exemption from this requirement is for  
21          buses that are designed for urban use with standing  
22          passengers.   An exemption is permitted for these  
23          vehicles because they are typically used for short  
24          journeys, in both time and distance, undertaken at  
25          moderate speeds on urban routes.   Although we are aware  
26

1           that vehicles equipped with seat belts are used by some  
2           operators for urban fare-paying services, ultimately, it  
3           is for the operator to choose the type of vehicle used  
4           to provide a service."

5           So that's the Department for Transport guidance  
6           note.

7   CHAIRMAN: Just for the record, this comes from a statement  
8           made by the Department for Transport issued in May 2010,  
9           does it not, headed "Seat belts on urban buses"?

10   MR MIKE WESTON: Yes, that's correct.

11   MR PETER DUNCAN: I think that note, Mr Chairman, to which  
12           you referred, is now in the bundles.

13   CHAIRMAN: Yes. Can you give us a reference for that?

14   MR PETER DUNCAN: It's being shown up now on the screen.

15   CHAIRMAN: But do you have a page reference for future  
16           purposes?

17   MR PETER DUNCAN: It's in MISC-3, Mr Chairman, at page 1274.

18   CHAIRMAN: Thank you very much.

19   MR PETER DUNCAN: Now, with regard to the position in  
20           Hong Kong with regard to seat belts on buses, I'm going  
21           to take you through some, if I can call it that -- I was  
22           going to say the history, but various considerations of  
23           this matter, and then will ask you a couple of questions  
24           at the end with regard to your opinion on certain  
25           matters.

26

1           We can start, I think, at SEC-3 at page 1310. This  
2           is a paper issued by the Environment, Transport and  
3           Works Bureau, as it then existed, in 2006. You will see  
4           that from page 1316. It is a submission to the  
5           Legislative Council Panel on Transport, with the  
6           heading, "Safety of franchised bus operations".

7           At 1315, you will see the topic, "Seat belt on  
8           franchised bus[es]".

9           Paragraph 18:

10          "Under Road Traffic (Safety Equipment)  
11          Regulations ... it is a mandatory requirement to provide  
12          seat belt for the driver ... As regards the passenger  
13          seats, about 34 per cent of franchised buses have been  
14          equipped with seat belt[s] at exposed seats. These seat  
15          belts had been installed by the bus manufacturers as  
16          standard equipment when the buses were purchased. All  
17          franchised bus operators have committed that new buses  
18          to be purchased by them will have seat belts installed  
19          at the exposed seats. In the light of recent traffic  
20          accidents, Transport Department has been reviewing with  
21          the franchised bus operators on retrofitting of seat  
22          belts on the existing buses, taking into account of the  
23          technical difficulties such as the structural strength  
24          of the seats, adequate anchorage points and design of  
25          the bus ...

1           19. We have conducted a research on overseas  
2 practices regarding the fitting and wearing of seat  
3 belts in buses. A summary of the corresponding seat  
4 belt requirements is at [the annex]. It can be seen  
5 that no overseas country requires fitting of seat belts  
6 in passenger seats of buses designed for urban use or  
7 for carrying standing passengers."

8           Then at 20:

9           "In view of the above, we consider that it is not  
10 appropriate to introduce mandatory requirements for  
11 installation and wearing of passenger seat belts for  
12 franchised buses."

13           So that is the situation as per the Transport  
14 Department's recommendation in 2006.

15           If we can move from that to SEC-3 at page 1323.  
16 This is a paper headed for the information of the  
17 Legislative Council Panel on Transport, so the same  
18 panel, and the heading this time, "Progress on measures  
19 to enhance safety of franchised bus operation".

20           At page 1329, we can see this is issued in January  
21 2007.

22           If we look at page 1323, we have the subheading,  
23 "Retrofitting seat belt on franchised bus[es]", and if  
24 we look through paragraph 3, some reports on the  
25 progress of retrofitting.

26

1 I can pick it up, I think, at paragraph 4:

2 "We have collected information from other countries  
3 on the requirements of fitting and fastening of seat  
4 belts on buses. So far, we are not found any country  
5 that have legal requirements for the provision of seat  
6 belts on passenger seats of buses designed for urban use  
7 and are allowed to carry standing passengers. According  
8 to the transport authorities of these countries, the  
9 benefit of imposing a seat belt requirement in their  
10 buses is uncertain."

11 And there's a summary at the annex.

12 So I think it's fair to say that between 2016 and  
13 2017, there was no change in the view of the department;  
14 there was the same recommendation on each occasion.

15 The next report I would like to commend to you is to  
16 be found at TD-1/94. So Transport Department volume 1  
17 at page 94.

18 The heading on this page is, "TD\_Paper\_08",  
19 "Application of new devices or technology on franchised  
20 buses", and if you go through to page 107 --

21 CHAIRMAN: This is a submission made by the Transport  
22 Department in April of this year?

23 MR PETER DUNCAN: That's correct, Mr Chairman, thank you.

24 So we have jumped from 2007 now, Mr Weston, through  
25 to 2018, and this is not a submission made to the  
26

1 Legislative Council. It is actually one of the  
2 documents submitted by the department to the committee,  
3 assisting the committee in its work.

4 If I could bring your attention first to page 94,  
5 you will see, at paragraph 4:

6 "Arising from the serious traffic accident involving  
7 a franchised bus of the Kowloon Motor Bus on Tai Po Road  
8 resulting in the death of a number of passengers in  
9 February 2018, the Transport Department set up a working  
10 group with representatives from all franchised bus  
11 companies and bus manufacturers in mid-March 2018 to  
12 review the technical feasibility and desirability of  
13 installing some new safety devices or applying new  
14 technology on the safety devices of franchised buses for  
15 enhancing protection to bus passengers. The outcome of  
16 the discussion and recommendations of the working group  
17 are set out in the ensuing [passages]."

18 You will see then from that what had prompted the  
19 setting up of this working group was the accident in  
20 Tai Po.

21 Paragraph 7 of the report, under the heading,  
22 "Installation of seat belts for all passenger seats" --  
23 perhaps I should start with paragraph 5:

24 "In the light of an accident in July 2006 in which  
25 a KMB bus collided with another vehicle resulting in  
26

1 a passenger on the upper deck of the bus being thrown  
2 out of the bus and another similar accident in December  
3 2007 ... the TD recommended and the franchised bus  
4 operators agreed that safety seat belts should be  
5 retrofitted on the four front seats on the upper deck of  
6 all the post-1997 licensed buses to prevent passengers  
7 from falling out from the upper deck front seats. At  
8 present, the seat belts for all the exposed seats have  
9 become a standard feature of all franchised buses."

10 Then paragraph 7:

11 "As regards the installation of seat belts for all  
12 passenger seats on franchised buses, the three  
13 double-decked bus manufacturers ... have confirmed that  
14 it is technically feasible, upon the request of the  
15 franchised bus operators, to supply all new buses with  
16 seat belts for all passenger seats which comply with the  
17 aforesaid international standards. Correspondingly, all  
18 franchised bus operators indicate that they agree to  
19 incorporate this requirement for procurement of new  
20 buses.

21 8. As for retrofitting of seats on all passenger  
22 seats of existing buses, the bus manufacturers have  
23 concerns that the floor structure (especially on the  
24 lower deck) of the franchised bus is not designed for  
25 seat belt installations for compliance with the  
26

1 international standards. To fulfil the requirements,  
2 reinforcement of the existing floor structure and  
3 replacement of all the existing passenger seats with new  
4 passenger seats are required. Subject to detailed  
5 assessment, the bus manufacturers have initially  
6 confirmed that it may be technically feasible to  
7 retrofit safety seat belts on all passenger seats of  
8 upper deck of the existing buses which are manufactured  
9 in certain specified years. They would also make  
10 further study on such feasibility and advise the  
11 recommended models or batches of buses used by the  
12 franchised bus operators that are suitable for  
13 installation of seat belts. Based on the Transport  
14 Department's understanding, the retrofitting work will  
15 involve substantial modifications, including  
16 reinforcement of the structure of a franchised bus,  
17 replacement of all seats with seat belts, as well as  
18 conducting pull tests of the seat belts and seats to  
19 confirm their compliance with the international  
20 standards, et cetera. The retrofitting and testing work  
21 for each franchised bus will take considerable time to  
22 complete and hence will affect the bus availability rate  
23 for bus operation during the process. The franchised  
24 bus operators will further study the proposal."

25 So that was the situation at April 2018, this year,  
26

1 as reported to the committee.

2 It's getting on for 1 o'clock so I will leave the  
3 following developments until after the break.

4 CHAIRMAN: Yes, certainly.

5 Mr Weston, we are going to take our lunch break now.

6 Can I ask, Mr Duncan, what progress we have made and  
7 what estimate, if any, you have of how much longer your  
8 questioning would last, given that we acknowledge that  
9 certainly my interruptions may delay you?

10 MR PETER DUNCAN: Thank you, Mr Chairman. I will do my best  
11 to anticipate the extent of Mr Chairman's so-called  
12 interruptions. I think we have made good progress.  
13 I think we will finish this by 3.30; if not by 3.30,  
14 before 4 o'clock, this afternoon.

15 CHAIRMAN: Thank you for that indication.

16 In which case, we will adjourn then until 2.30 this  
17 afternoon. Thank you.

18 (1.01 pm)

19 (The luncheon adjournment)

20 (2.30 pm)

21 CHAIRMAN: Good afternoon.

22 MR PETER DUNCAN: Good afternoon.

23 CHAIRMAN: Yes, Mr Duncan.

24 MR PETER DUNCAN: Thank you, Mr Chairman.

25 Mr Weston, good afternoon.

26

1 MR MIKE WESTON: Good afternoon.

2 MR PETER DUNCAN: Prior to the luncheon break, I had taken  
3 you to a document dated April 2018, that was Transport  
4 Department Paper No. 8.

5 I am now going to ask you to look at another  
6 document. Here, we are going to go back a little bit in  
7 time, to March 2018. We will find this in KMB-12 at  
8 page 4869-1. At this page, you will see the  
9 commencement of a document which is headed, "Working  
10 Group on Enhancement of Safety of Franchised Buses",  
11 "Notes of 1st meeting held on 13 March 2018 at 3.00 pm  
12 at ..." and it gives the place and it gives the people  
13 attending the meeting.

14 If you go to page 4869-6, you will see the section  
15 on "Installation of seat belts", and it's that  
16 information which has been summarised in a different  
17 form and provided to the committee in the document  
18 I showed you just before lunch, TD\_08, so I won't ask  
19 you to dwell on that any further.

20 What I would like to do is to take you to 4869-9,  
21 which confirms the scope of work for the working group.  
22 So this is the scope of work that the working group set  
23 for itself, and we can see that set out in full on  
24 page 4869-9.

25 With regard to items (2) and (3), there is --  
26

1           perhaps I will read them out quickly. Item (2):

2           "To examine the technical feasibility,  
3           cost-effectiveness, applicability and any other issues  
4           relating to installation of seat belts on all seats  
5           other than exposed seats;

6           (3) To explore the technical feasibility,  
7           cost-effectiveness, applicability and any other issues  
8           relating to the installation of on-vehicle safety  
9           device, including but not limiting to the following --

10          (a) Speed display unit for passengers;

11          (b) Active/passive roll stability control;

12          (c) Electronic stability control;

13          (d) Speed control aided by GPS;

14          (e) Speed limiter to cap maximum speed within  
15          70 kilometres per hour;

16          (f) Collision prevention and lane-keeping device;  
17          and

18          (g) Monitoring device on captain's condition  
19          eg dozing, drowsiness."

20                 What I would like to ask you is this. You told us  
21                 this morning, in fact, in your evidence and I think it  
22                 appears in your report, that with regard to safety  
23                 measures, there will, at least in London, be a rigorous  
24                 examination of the cost on the one hand and the effect  
25                 on the other, before any measure is introduced.

1           So what I am interested in is your opinion as to  
2           whether the period of three months that you will see on  
3           page 4869-11, "A report on the outcome and  
4           recommendations of the review is expected to be  
5           submitted to the Commissioner for Transport in 3 months'  
6           time", whether you would consider that period to be  
7           sufficiently adequate to undertake a rigorous cost and  
8           effect analysis of all those matters set out in the  
9           scope of work.

10          What is your opinion on that?

11       MR MIKE WESTON: On the face of evidence from London,  
12       I suppose I would cite two examples. First, the ISA  
13       study that we talked about this morning, and the time  
14       that study took to gain both pre and post data, and also  
15       the time it has taken so far for TfL to deliver its bus  
16       safety programme, which started -- work started in early  
17       2016 and has already delivered some elements, but the  
18       main focus of that, the bus safety standard, phase 1  
19       won't be announced until next month and will start to be  
20       implemented on vehicles from 2019.

21       Now, you could ask the question, has TfL taken too  
22       long to consider and deliver these suggestions, as  
23       opposed to being able to do it a lot quicker? I would  
24       suggest that to gather bus data from trials, you either  
25       need to have a small number of trial buses in service  
26

1 for a reasonably long period of time, or a very, very  
2 large numbers of buses in service for a shorter period  
3 of time, to collect robust data.

4 So in theory, yes, you could undertake trials and  
5 assessments in three months, but in my view, to collect  
6 robust data on the benefits of those trials, you would  
7 have to do a large number of vehicles. I can't remember  
8 quite how many vehicles were involved in the ISA scheme  
9 but you would have to make sure you had a big enough  
10 sample to get some robust data.

11 So three months does seem remarkably quick, although  
12 I'm sure in London some people would say the time TfL  
13 have taken could have been quicker. So maybe there is  
14 a balance there between the two.

15 CHAIRMAN: As far as ISA is concerned in London, there were  
16 two bus routes, but presumably, in order to sustain the  
17 service on two bus routes, that would involve many, many  
18 buses?

19 MR MIKE WESTON: Yes. I can't remember the exact number,  
20 but I think the 19, for example -- the route 19 is quite  
21 a big route, probably 30 or 40 buses. But I don't think  
22 all the buses were installed with the ISA equipment. It  
23 was just a smaller sample that were installed and  
24 monitored.

25 So three months does -- if you use TfL as  
26

1 a comparator and you assume that TfL hasn't been  
2 dragging its heels, this three months does seem a very  
3 quick turnaround of an assessment of all these  
4 technologies and all these options.

5 MR PETER DUNCAN: Thank you. I'm now going to take you  
6 through to April.

7 CHAIRMAN: Before you do that, although this initial  
8 13 March agenda suggested that a report would be  
9 expected to be submitted to the Commissioner for  
10 Transport in three months' time, in fact six months have  
11 gone past and no final report at least has been  
12 submitted that we're aware of. Just to give you that  
13 context.

14 MR MIKE WESTON: Which perhaps suggests that the three  
15 months was ambitious in the first place.

16 CHAIRMAN: Mr Duncan, there is one other matter. Just let  
17 me flag it. There was a LegCo meeting when issues  
18 germane to this working group were discussed, I think on  
19 15 February. Is that something you are going to go to  
20 at some stage? Three motions were passed.

21 MR PETER DUNCAN: Yes. I can take the committee to that.

22 CHAIRMAN: At some stage, because it gives context as to why  
23 it is that the Transport Department was considering the  
24 matters that they did consider in the working group.

25 MR PETER DUNCAN: Certainly, Mr Chairman. I would like to  
26

1 go to that now, to try to keep track of the dates in  
2 a reasonably chronological order.

3 We can actually find that, I think, at SEC-3, at  
4 page 1342.

5 At this page, Mr Weston, you will see minutes of the  
6 meeting of the Legislative Council's Panel on Transport  
7 of 15 February. So it is before the first meeting of  
8 the working group which we have just seen was held in  
9 March.

10 If we go to page 1359 -- just give me a moment,  
11 please.

12 CHAIRMAN: Yes. Take your time.

13 One of the passages I had in mind is at paragraph 3  
14 on 1360, one of the motions, which gives a shopping list  
15 of matters that the LegCo Panel urges the administration  
16 to explore.

17 MR PETER DUNCAN: Yes. I think the precursor to that can  
18 actually be found on page 1356.

19 CHAIRMAN: Yes.

20 MR PETER DUNCAN: There is a discussion on measures to  
21 enhance bus safety, and paragraph 59:

22 "The deputy chairman [of the meeting] suggested  
23 that, to minimise the number of casualties in case of  
24 bus accident, all franchised bus operators should  
25 consider retrofitting seat belts to all seats in buses  
26

1 by phases. Mr Luk Chung Hung recalled that there had  
2 been times all seats of certain bus models of Long Win  
3 Bus Company were retrofitted with seat belt. He asked  
4 why there was no such kind of buses at the moment.

5 Commissioner for Transport advised that all exposed  
6 seats of new buses purchased after 2003 had been  
7 installed with seat belts. After a serious bus accident  
8 in 2007, franchised bus companies had acceded to TD's  
9 request for retrofitting seat belts to the exposed seats  
10 and front-row seats on the upper decks for buses  
11 designed after 1997. Transport Department would,  
12 together with KMB and other franchised bus operators,  
13 actively study measures to enhance safety, including the  
14 technical feasibility of retrofitting seat belt to all  
15 seats. Managing director for KMB supplemented that KMB  
16 held an open mind on any suggestion to improve bus  
17 safety and would discuss the above suggestion with the  
18 Transport Department. In reply to Mr Luk, Commissioner  
19 for Transport said that Long Win had once proactively  
20 installed seat belts to all seats but no longer provided  
21 them having regard to the low usage.

22 Ms Claudia Mo noted the view of some transport  
23 experts that seat belt might not help reduce the number  
24 of casualties for such kind of serious bus accident.  
25 She was also concerned that, in case all seats were  
26

1 retrofitted with seat belt, whether there would be  
2 difficulties to require all passengers to wear the seat  
3 belts. She enquired about the timetable of considering  
4 the suggestion of retrofitting all seats with seat belts  
5 and whether a consultation would be conducted in this  
6 regard.

7 Commissioner for Transport said that the  
8 administration kept an open mind on the suggestion of  
9 retrofitting seat belt to all seats in franchised buses.  
10 However, apart from technical feasibility, passengers'  
11 acceptability should also be taken into account when  
12 considering the suggestion of retrofitting seat belt[s]  
13 to all seats. It would study the investigation report  
14 to be submitted by KMB in one month's time and would  
15 examine the suggestion having regard to relevant  
16 considerations."

17 Then I think, Mr Chairman, the motions commence at  
18 page 1359, at paragraph 77:

19 "The chairman advised that he had received three  
20 motions respectively ... He considered that the proposed  
21 motions were directly related to the agenda item under  
22 discussion. Members agreed that the motions be  
23 proceeded with ..."

24 And the motion was moved by Mr Chan Hak Kan and  
25 seconded, and the translation appears at 1360, and  
26

1 paragraph 3 reads:

2 "explore ways to further strengthen the safety  
3 installations on buses, including enhancing the  
4 protection for high-risk seats, retrofitting seat belts  
5 on more seats and making it compulsory in phases for  
6 passengers to wear seat belts, installing an external  
7 camera at the bus captain's seat, modifying the speed  
8 limiters on buses to ensure safe driving on high-risk  
9 road sections, and installing an auxiliary system for  
10 automatic emergency braking, so as to reduce the risk of  
11 injuries among passengers in an accident."

12 So you can see the motions of the Legislative  
13 Council which preceded the first meeting of the working  
14 group, and reference there to seat belts and some of the  
15 pros and cons.

16 MR MIKE WESTON: Yes.

17 MR PETER DUNCAN: So, if it is in order, I will then take  
18 you further, please, into the chronology by asking you  
19 to turn up minutes of the second meeting of the working  
20 group, which we will find at KMB-12/4887-1.

21 CHAIRMAN: This is 23 April 2018?

22 MR PETER DUNCAN: This is the meeting, indeed, on 23 April  
23 2018. These are the notes.

24 The relevant section I think you will find,  
25 Mr Weston, on page 4887-5.

1           So:

2           "After checking with the bus manufacturers on the  
3           feasibility for installation of seat belts for all  
4           passenger seats for new buses, all franchised bus  
5           operators advised that it was technically feasible to  
6           install seat belts for all passenger seats for new buses  
7           to be procured. KMB/Long Win supplemented that it would  
8           cost about an additional of 5,000 pounds for each  
9           double-decker to install seat belts for all passenger  
10          seats. All bus operators agreed to incorporate this  
11          requirement in their new single-decked buses and  
12          double-decked buses to be procured.

13          For new buses which had been procured but not yet  
14          delivered, KMB said they would request the bus  
15          manufacturers to install seat belts for all passenger  
16          seats if it would be feasible to include such  
17          requirement. KMB/Long Win advised that 145 new buses to  
18          be delivered before September 2018 could be able to  
19          install with seat belts for all passenger seats.  
20          Citybus and New Lantau Bus would advise Transport  
21          Department by end of April 2018 if the bus manufacturer  
22          could install seat belts for all passenger seats for new  
23          buses being manufacture[d].

24          For existing buses, Citybus and Kowloon Motor Bus  
25          advised that the technical feasibility for installation  
26

1 of the seat belts on all passenger seats at upper deck  
2 was still uncertain. Even if it proved to be  
3 technical[ly] feasible, the subject still needed further  
4 deliberation taking into consideration the financial  
5 implications and impacts on bus operation (ie the  
6 availability of bus) due to the time required for the  
7 substantial modification of buses. Transport Department  
8 encouraged all franchised bus operators to continue to  
9 study the technical feasibility of retrofitting seat  
10 belts on all passenger seats on each bus model before  
11 reaching the final decision."

12 So that's the position after the second meeting, and  
13 then the third meeting we can see, which was held on  
14 23 June -- so we've had March, April, and now we have  
15 June -- is at KMB-12/4908-1.

16 The relevant part of these notes with regard to seat  
17 belts appear at page 4908-7. At 25:

18 "The meeting noted that it was technically feasible  
19 to supply all new buses with seat belts for all  
20 passenger seats conforming to relevant international  
21 standards and all franchised bus operators committed  
22 that all new franchised buses would be incorporated with  
23 seat belts on all passenger seats."

24 And we have seen that the additional cost of that is  
25 going to be about 5,000 pounds per bus.

1           Then at 26:

2           "As for existing buses, the meeting noted that  
3 retrofitting seat belts on all passenger seats of the  
4 upper deck of some existing double-deck bus models  
5 should be feasible. Kowloon Motor Bus advised that they  
6 would retrofit seat belts on all passenger seats of the  
7 upper deck or deploy buses with seat belts on all  
8 passenger seats on routes which serve long-haul  
9 passengers or are operated on expressways with limited  
10 boarding or alighting activities at the en route stops.

11           [Post-meeting note: KMB advised that there would be  
12 about 400 new buses with seat belts on all passenger  
13 seats by mid-2019. KMB would deploy these buses to the  
14 required routes. Retrofitting seat belts to existing  
15 buses would depend on the actual situation/requirement  
16 at that moment.]

17           27. In the light of KMB's initiative, the meeting  
18 had discussed and come to the views that having regard  
19 to the technical feasibility in retrofitting seat belts  
20 on existing buses; operation of franchised buses in  
21 Hong Kong which were mostly deployed on urban routes  
22 with standing passengers; and the costs and downtime  
23 incurred to retrofit seat belts on all existing buses,  
24 as well as overseas experiences, that there were  
25 insufficient justifications to make it a mandatory  
26

1 requirement for all buses to be fitted with seat belts  
2 on all passenger seats. Nevertheless, members reckoned  
3 that as in the case of exposed seats and in bus  
4 compartment with no standees allowed, seat belts might  
5 give extra protection to seated passengers to prevent  
6 passengers from falling out from these seats.

7 28. In this regard, Citybus was requested to  
8 consider retrofitting seat belts on all passenger seats  
9 on the upper deck for the buses operating selected bus  
10 routes for long-haul passengers or operating on  
11 expressways with limited boarding and alighting  
12 activities along the routes. Citybus indicated that it  
13 would be difficult for their companies to allocate their  
14 buses to solely operate specific routes as their buses  
15 would serve a number of routes in a day under their  
16 existing operations. In addition, Citybus observed that  
17 very few passengers would make use of seat belts, it  
18 would not be financially viable to retrofit existing  
19 buses with seat belts on all passenger seats. Citybus  
20 requested the government to fund the retrofit of seat  
21 belts to existing buses if that was what the government  
22 wanted."

23 And the section concludes, in paragraph 31:

24 "... the Transport Department requested all  
25 franchised bus operators to estimate the number of  
26

1 long-haul bus routes operating via expressway with  
2 relatively fewer bus stops and the corresponding number  
3 of buses involved, and provide the information to the  
4 Transport Department for reference the soonest  
5 possible."

6 If we can then move from what you can see in that  
7 meeting to another document, this time at page 4938-1.  
8 You will see the notes of what is described as the 3rd  
9 meeting, held on 27 June this year, of the sub-working  
10 group on in-vehicle safety devices for franchised buses.  
11 So this is six days later, in the sub-working group.

12 If we go to page 4938-5, at paragraph 15 we see the  
13 heading, "Installation of seat belts for all passenger  
14 seats":

15 "Transport Department informed the meeting of their  
16 view to retrofit seat belts for bus routes serving  
17 long-haul passengers, or operating on expressways with  
18 limited boarding or alighting activities at the en route  
19 stops where passengers tend to use them. Transport  
20 Department had already requested franchised bus  
21 operators to provide return on the number of buses  
22 involved in these service natures. New World/Citybus  
23 emphasised that they did not [agree] to such retrofit  
24 work unless it would be funded by the government.  
25 New World also mentioned that it would take 3-4 skilled  
26

1 labour one week to retrofit a bus (eg one man-month).

2 Taking into account the labour cost and material cost,  
3 it was estimated that the retrofit cost for one bus  
4 would be around \$240,000."

5 Then the final paper, I think, which I then need to  
6 show you, is a paper which the Transport Department  
7 provided by way of an update to the LegCo's Transport  
8 Panel the following month, that's July of this year. We  
9 will find that in TD-1 at page 403.

10 At page 403, we can see the heading, "For discussion  
11 on 25 July 2018". It's to the Legislative Council Panel  
12 on Transport, "Enhancement of safety of franchised  
13 buses", and if you go through to page 412, you will see  
14 that it's a paper which has been provided by the  
15 Transport and Housing Bureau and Transport Department in  
16 July.

17 The purpose of the paper is set out on page 403, and  
18 the background is set out, referring to the working  
19 group and its scope of work. There are various sections  
20 in that paper. The one of relevance to seat belts,  
21 I think I can take you directly to paragraph 16 which is  
22 on page 409:

23 "Having regard to the points mentioned in  
24 paragraphs 10 to 15 above ..."

25 And it's in that section where the detailed  
26

1 matters -- I think which we have already gone through in  
2 the previous notes.

3 "... the working group has arrived at the following  
4 recommendations with a view to giving extra protection  
5 to seated passengers:

6 (a) seat belts should be provided for all seats in  
7 future procurement of new buses; and

8 (b) subject to further assessment on the technical,  
9 operational and financial feasibility, consideration may  
10 be given to retrofitting all seats in the upper deck  
11 with seat belts on buses deployed for specific bus  
12 routes, ie long-haul routes which are operated via  
13 expressways with relatively fewer bus stops.

14 The Transport Department will require the franchised  
15 bus operators to explore in more details in conjunction  
16 with the bus manufacturers to ascertain the technical  
17 feasibility of retrofitting seat belts on the upper deck  
18 of different bus models, the operational and capacity  
19 considerations in developing the timetable for the  
20 retrofitting works and how such considerations may be  
21 addressed, as well as the financial implications, in  
22 order to decide whether and, if so, how all passenger  
23 seats on the upper deck of existing double-deck buses  
24 deployed for long-haul routes mentioned in  
25 paragraph 16(b) can be retrofitted with seat belts. In  
26

1 the meantime, the Transport Department will work with  
2 the franchised bus operators to promote the use of seat  
3 belts if they are available (at exposed seats or on new  
4 buses)."

5 I think, in addition to those papers, I should also,  
6 before asking you a couple of questions, refer you to  
7 just some aspects of the evidence that the committee has  
8 heard. First of all, evidence from Citybus, who gave  
9 evidence at an early stage of the inquiry. We will find  
10 this at Day 4 of the transcript at page 102.

11 CHAIRMAN: Which transcript bundle is this to be located in?

12 MR PETER DUNCAN: It will be in 2A, Mr Chairman.

13 CHAIRMAN: Thank you. To give this context, this is 30 May  
14 2018.

15 MR PETER DUNCAN: That's right. That's before some of the  
16 matters we have just seen.

17 The part I wish to bring your attention to is at  
18 page 102. Perhaps I should go to the question, which  
19 you will find at page 101, at line 15, where I am  
20 examining Mr Samuel Cheng, who is a representative of  
21 Citybus:

22 "Can you point to anything specific which you would  
23 regard as beyond your financial capabilities at the  
24 moment, but which, if it could be could funded, would  
25 add materially to the matter of safety? Is there any  
26

1 specific matter?

2 Mr Samuel Cheng: I cannot give any examples which  
3 will substantially enhance the safety. Rather, there  
4 are certain things which the public would think that,  
5 when done, the safety would be enhanced.

6 I can give examples. Say, for example, this  
7 morning, you explored the idea of retrofitting safety  
8 seat belts for the upper deck. This morning, Mr Li  
9 talked about the cost. It will be 15,000 to  
10 20,000 pounds per bus, and we have got 1,100 buses  
11 falling into this category. If they all have to be  
12 retrofitted with safety belts on the upper deck, the  
13 total cost, as we have given, will be HK\$180 million to  
14 HK\$240 million."

15 That's Citybus.

16 Then if I could take you to Kowloon Motor Bus, more  
17 recently, Day 15 --

18 CHAIRMAN: Perhaps before we leave that, there is  
19 an observation that is relevant to the cost side of it,  
20 and that's the usage side of it. That's at the bottom  
21 of page 102. Perhaps you would draw Mr Weston's  
22 attention to that. Line 19 -- or line 16, perhaps.

23 MR PETER DUNCAN: If I leave out the next couple of  
24 paragraphs, Mr Weston, and pick it up at line 16:

25 "This morning, we have said that currently there are  
26

1 certain exposed seats on board and they have been fitted  
2 with seat belts, but then in fact I ride on the buses  
3 many times. I seldom see passengers occupying such  
4 seats put on the seat belts. In future, if you ask our  
5 company to spend \$100 million to \$200 million, or more  
6 than \$200 million to work on this, while we query very  
7 much the effectiveness, of course, if the administration  
8 would like to impose such a requirement, that is to  
9 retrofit the seat belts, then I very much hope that the  
10 government will provide a subsidy so that we can install  
11 the seat belts.

12 So this is one of the examples. Thank you.

13 Chairman: So your point really is this: if the  
14 government thinks that it's worthwhile doing because it  
15 gives passengers who might want to put a seat belt on  
16 the opportunity to do so, but it's your experience that  
17 if they don't do so, then it's up to government to fund  
18 this, rather than impose it on your own? Is that the  
19 point?

20 Answer: If the government sees the need for seat  
21 belts, in order for the passengers to put on the seat  
22 belts if they want to, if that's the case then I hope  
23 the government would fund the exercise because if we  
24 fund it, it would be a waste of resources."

25 I think if you go to page 58 --  
26

1 CHAIRMAN: Of this transcript on Day 4?

2 MR PETER DUNCAN: The transcript, yes.

3 CHAIRMAN: Yes.

4 MR PETER DUNCAN: -- there is a similar sentiment from

5 Mr Cheng at an earlier stage, at line 24 on page 58.

6 Yes, I had just referred to an extract from the forward  
7 planning programme for Citybus, where Mr Cheng's  
8 evidence is to this effect. I quote from line 25:

9 "It is feasible to install seat belts on all seats  
10 or on all seats on the upper deck. However, our  
11 observation shows that very few people wear the seat  
12 belts currently available at the exposed seats. Without  
13 any legislation to mandate the wearing of passenger seat  
14 belts on a franchised bus and the enforcement authority  
15 to strictly enforce the legislation, installing seat  
16 belts on all [buses] will be a waste of resources  
17 because vast majority of passengers will not wear seat  
18 belts even though they are provided."

19 So, then, moving from Citybus to Kowloon Motor Bus.  
20 Their evidence was given more recently, Day 15 on  
21 13 September. That's in bundle 6 of the transcripts,  
22 Mr Chairman.

23 CHAIRMAN: Thank you.

24 MR PETER DUNCAN: Day 15, page 18. At line 20, I have asked  
25 a question about new buses having seat belts:

26

1           "Do I understand that the new buses will have seat  
2           belts --"

3           Perhaps I need to go back a little further. At  
4           page 15, line 24, Mr Roger Lee -- he is from Kowloon  
5           Motor Bus -- is talking about the feasibility, first, of  
6           installing safety belts on the upper deck for retrofit:

7           "To install safety belts on the upper deck,  
8           technically speaking, we would have to consider the  
9           issue of gravity. The government and ourselves -- well,  
10          the government has consulted us for certain information  
11          and our supplier conducting a technical assessment, and  
12          the progress has been positive so far. The safety belts  
13          are relatively heavy. If they are to be installed on  
14          the upper deck, the government would have to conduct  
15          tilt tests. If this is technically feasible, it won't  
16          be an issue to install them. Whereas for the two main  
17          suppliers, Volvo and ADL, the progress has been very  
18          positive, however we would still have to wait until the  
19          tilt tests are completed.

20          Question: Can you give the committee some idea as  
21          to the financial implications of the retrofitting of the  
22          seat belts?

23          Answer: This is not cheap, or should I say, in the  
24          beginning of this year, a special committee of our  
25          company issued clear instructions. Our buses procured  
26

1 in 2019 and after would be fitted with safety belts. As  
2 for the retrofitting of safety belts, where possible,  
3 especially on long-haul routes, we would install safety  
4 belts on the upper deck. We do not want to see further  
5 accidents, so cost is not our main consideration. We  
6 have not considered the financial implications yet.  
7 Retrofitting of safety belts would cost about  
8 \$200,000 per bus.

9 Chairman: That is on the upper deck?

10 ...

11 Question: ... Approximately how many buses do you  
12 expect would be retrofitted, how many buses in your  
13 fleet?

14 Mr Leung Kin Wang [another representative]: I think  
15 nearly 3,600 long-haul buses."

16 Then there is an intervention at line 22 -- sorry,  
17 Mr Roger Lee at line 11:

18 "I would like to add something. Currently, we have  
19 4,200 to 4,300 buses. That is for KMB and Long Win Bus  
20 combined. Some buses are fully equipped with safety  
21 belts. For some others, as they will retire in the next  
22 years -- for buses that will retire in two or three  
23 years, they might not need to be retrofitted. For  
24 long-haul buses, I do not have the exact figure, but  
25 about one-third of our buses would go on long-haul  
26

1 routes, so that comes to about 1,000."

2 Then the chairman at line 22:

3 "Before you move on ... earlier, Mr Lee, you said  
4 this involved retrofitting 3,600 long-haul buses. Are  
5 you now correcting that statement and in fact it  
6 involves 1,000?

7 Answer: Yes."

8 At line 5:

9 "I'm just trying to do the mathematics. 1,000 buses  
10 at \$200,000 per bus?

11 Mr John Chan: Yes.

12 Question: \$200 million?

13 Dr Norman Leung: Yes.

14 Question: Is the cost of that something that has  
15 been discussed with the government?

16 Mr Roger Lee: No."

17 Finally, as regards material data I need to bring to  
18 your attention, we have the evidence from the Hong Kong  
19 Police Force representatives.

20 CHAIRMAN: Before you move on to that, there is something in  
21 the transcript that you have just read out, at page 16,  
22 line 17:

23 "... in the beginning of this year, a special  
24 committee of our company issued clear instructions. Our  
25 buses procured in 2019 and after would be fitted with  
26

1 safety belts. As for the retrofitting of safety belts,  
2 where possible, especially on long-haul routes, we would  
3 install safety belts on the upper deck."

4 I think, to give that context, it would be relevant  
5 to refer to the report to the Commissioner for Transport  
6 by KMB on the bus accident on the Tai Po Road which is  
7 to be found at KMB-1A at page 98, and to paragraphs 39  
8 and 40.

9 MR PETER DUNCAN: Do you have that in front of you,  
10 Mr Weston?

11 MR MIKE WESTON: Yes.

12 MR PETER DUNCAN: KMB-1A/98.

13 CHAIRMAN: Just to give you the context, Mr Weston, this was  
14 a report that the Commissioner for Transport required  
15 KMB to give in a period of a month. I think it was  
16 delivered on 12 March.

17 This precedes the very first day, which was the  
18 following day, when the working group met, and its  
19 agenda was provided to those who attended.

20 Perhaps I could invite you, Mr Duncan, to read this  
21 out, so we have it in the transcript, informing us as to  
22 the position taken by KMB in advance of any working  
23 group.

24 MR PETER DUNCAN: Yes.

25 If you go back to page 98 of this bundle, Mr Weston,  
26

1       you will see this is issued on 12 March. At  
2       paragraph 39 the bus company say, in their report to the  
3       Commissioner for Transport:

4                "In the aftermath of the incident, a number of  
5       comments and suggests have been raised by members of the  
6       Legislative Council, the media and members of the public  
7       on measures which should be considered with a view to  
8       enhancing the safety of public bus operations and of bus  
9       passengers. The special committee has considered these  
10      issues, in consultation with KMB's bus suppliers, and  
11      made various recommendations which KMB's management will  
12      be implementing or further examining.

13              40. KMB has already requested its suppliers to  
14      install safety belts on all seats as a standard feature  
15      for new buses ordered after 5 March 2018. As for buses  
16      that are currently in service, where certain routes so  
17      require, safety belts will be installed on the upper  
18      deck of KMB buses phase by phase."

19      CHAIRMAN: Thank you.

20      MR PETER DUNCAN: If I could then finally take you to the  
21      evidence from the police. This is Day 17 of the  
22      hearing. That was held on Monday, 24 September. That  
23      will be in transcript bundle 7, Mr Chairman.

24      CHAIRMAN: Thank you.

25      MR PETER DUNCAN: If I could bring your attention, please,  
26

1 to page 50. The exchange is between the chairman and  
2 Mr Auyeung, with Mr Stephen Baker, who is  
3 a representative of the police force.

4 CHAIRMAN: Chief Superintendent Baker.

5 MR PETER DUNCAN: Thank you.

6 I think probably I need to pick it up at page 49,  
7 where the chairman has indicated that the provision of  
8 seat belts is required for public light buses, and the  
9 chairman at line 8:

10 "But they do for PLBs.

11 Answer: They do, sir, yes.

12 Chairman: And what is the ease with which that is  
13 enforced or the difficulty?

14 Answer: It is difficult to enforce, and it is not  
15 enforced regularly. I would say it is enforced  
16 occasionally, when officers decide to take enforcement  
17 as a road safety issue. There is always more than one  
18 aspect to road safety -- publicity -- but it is also  
19 coupled with enforcement from time to time.

20 ...

21 I was going to add that we hope that people won't  
22 obey the law only because they feel they might be  
23 prosecuted for it, for not following the law. Yes.

24 Chairman: It took a long time to persuade people  
25 when they had a choice that they should wear seat belts

26

1 in cars.

2 Answer: Yes, sir. But going back to my earlier  
3 comment, in our view, it is better if people have the  
4 option to improve their own road safety, as a matter of  
5 choice.

6 Then Mr Auyeung raises this question:

7 "Just a quick question on the seat belt. Using the  
8 experience you have on the PLB, how successful has the  
9 police force been on enforcement?

10 Answer: I don't have enforcement figures, but, like  
11 I say, I would hope that people would follow the law  
12 because it was good for them rather than because they  
13 would be prosecuted if they didn't.

14 Chairman: But, as you said earlier, most people  
15 don't wear them on public light buses, enforcement is  
16 difficult, and one can see why, and you would expect  
17 that same trend to obtain with buses?

18 Answer: I would, sir, yes."

19 So there is a lot of information there I have asked  
20 you to digest, Mr Weston, but you can see what appears  
21 to be looming here. First of all, not just looming, but  
22 apparently decided that with regard to new buses,  
23 henceforth it is proposed that all buses be fitted with  
24 seat belts for each seat, irrespective of whether that  
25 bus is plying an urban route, presumably a very crowded

26

1 route where there is provision for standing passengers.  
2 That's the first issue, and we have heard that the  
3 additional cost to the bus companies for that facility  
4 would be something like 5,000 pounds per bus. So that's  
5 one aspect.

6 The second aspect is the retrofitting of the upper  
7 deck seats, where it is technically possible for buses  
8 which are plying on specific routes, exemplified by  
9 expressways, at a total cost, if we take the two major  
10 franchisees, of something like \$400 million.

11 So what I think the committee would appreciate would  
12 be your reaction to these two matters, first of all the  
13 provision for seat belts on each and every new bus, at  
14 that not insignificant cost, and then secondly the  
15 provision of a retrofitting on those buses which ply the  
16 expressways and those specific routes.

17 Would you be able to assist the committee with your  
18 views on those?

19 MR MIKE WESTON: Yes. I will give some sort of general  
20 observations. I think, on first sight, it seems, from  
21 the evidence this afternoon, that the decision to  
22 install seat belts has been more led by technical  
23 feasibility than assessment of the benefits. So there  
24 has clearly been a very in-depth technical assessment  
25 about whether it's possible. There has clearly been  
26

1       some work around the costs. What seems to be missing is  
2       whether there is any real benefit.

3           I could conclude from the evidence this afternoon  
4       that the decision to adopt seat belts in Hong Kong by  
5       the franchised bus operators has been as quick  
6       a decision as TfL's decision to dismiss seat belts. We  
7       spoke earlier this morning about TfL's dismissal of seat  
8       belts as an option, and maybe this has been as quick the  
9       other way.

10       I think it is clear that seat belts clearly have  
11       a benefit in an accident, whether it is a car or any  
12       other vehicle, it's clearly a benefit, but it must be  
13       worn, and we have talked -- or there is evidence around  
14       the enforcement issue and the ability to enforce the use  
15       of the seat belt.

16       The other issue that hasn't been mentioned and  
17       I haven't seen in any of the evidence but I would also  
18       be worried about is the ability to maintain these seat  
19       belts in working order. At the end of the day, you will  
20       buy a new bus with seat belts, and it is clearly  
21       important then that if the Transport Department and the  
22       franchised bus operators are going to encourage  
23       passengers to use these seat belts, it's clearly  
24       critical that they are maintained in working order, and  
25       that in itself is potentially a massive financial  
26

1 obligation and a massive time obligation. So there is  
2 an issue around maintenance, into continuous  
3 maintenance.

4 I think in my mind the bit that is missing in a lot  
5 of this assessment is really the cost/benefit, and  
6 really considering the cost of seat belts, and certainly  
7 the retrofitting is a huge cost. Even in new buses, the  
8 5,000 pounds is still a fairly significant cost compared  
9 with the overall cost of the vehicle.

10 The key question is what are the benefits of that  
11 investment in terms of seat belts, in terms of reducing  
12 injuries, compared with how that money could be spent on  
13 other safety measures across the network. I think one  
14 of the worries is that, you know, the commitment by  
15 people like KMB to invest such huge sums of money is  
16 credible, it's good, should be welcomed, but the danger  
17 is some other technology is waiting to be installed that  
18 then can't afford to be installed because the money has  
19 been spent on seat belts.

20 So I think there's a whole piece of work missing  
21 here about, for every dollar that's invested in bus  
22 safety, are there bigger benefits to be obtained by  
23 intelligent speed adaptation/assistance, autonomous  
24 braking, front-end design, can that money be spent more  
25 wisely on other things? And I think the worry is once  
26

1 the money has been spent on this, it's been spent.

2 Ultimately, from my understanding of the system in  
3 Hong Kong, this money can only come from three places.  
4 It can either come from the existing profits of the  
5 franchised bus operators -- although I have read some  
6 evidence that suggests that's not great -- it can come  
7 from the passengers in terms of increased fares, or it  
8 can come from the government; it's got to come from one  
9 of those three sources.

10 So there's a question about can that money be spent  
11 in a better way and get stronger results? If we added  
12 up all those figures, it's a significant amount of  
13 money, and I would question whether it could be spent on  
14 other forms of technology that would get better results.

15 However, I think just drawing on a bit of  
16 a difference between London and Hong Kong which I think  
17 is significant -- the decision -- TfL appear to be  
18 saying they are not really considering seat belts, but  
19 London is a very flat environment. There are very, very  
20 few roads where buses can run above 40 or 50 miles  
21 an hour. Buses generally don't go on expressways or  
22 motorways in London, so most buses are what you would  
23 term urban in London, where clearly in Hong Kong you  
24 have some quite challenging topography and you have some  
25 fast roads. So in my mind, I think I would be looking

26

1 at how you deal with those high-risk routes as opposed  
2 to a blanket one-size-fits-all in terms of solution.

3 So I think there could be some routes which are  
4 strong candidates for seat belts but it probably needs  
5 to be perhaps more selective as opposed to a blanket  
6 approach.

7 As I say, I think I would be interested in asking  
8 questions around what is the ongoing maintenance  
9 commitment going to be, in ensuring these seat belts are  
10 in working order.

11 CHAIRMAN: Can I ask you to move closer to the microphone.

12 MR MIKE WESTON: In ensuring these seat belts are in working  
13 order and are maintained properly, because that's quite  
14 rightly, if there is a strong campaign to encourage  
15 their use, the public then have a right that those seat  
16 belts are working when they get on a franchised bus.

17 CHAIRMAN: Are you able to give us any idea of the cost of  
18 maintenance of seat belts? I am right, am I not, in  
19 thinking that they are required to be installed and worn  
20 on coaches, in the United Kingdom?

21 MR MIKE WESTON: Yes. I suspect the challenge in London, if  
22 they were on service buses, would be -- the challenge in  
23 terms of maintenance would probably be in terms of  
24 vandalism and -- well, vandalism of the strap or of  
25 people putting things into the holder. So I suspect the  
26

1 challenge --

2 CHAIRMAN: Fortunately, in Hong Kong, that's very unlikely  
3 to be the problem. Are there any --

4 MR MIKE WESTON: Which is less of an issue.

5 CHAIRMAN: -- technical factors about maintenance that might  
6 be the problem here?

7 MR MIKE WESTON: I don't know. But I would be surprised if  
8 there wasn't some regular maintenance requirement of  
9 seat belts. On coaches in the UK, clearly, probably  
10 vandalism is less of an issue or potential vandalism is  
11 less of an issue.

12 Maybe if I can just refer to some interesting TfL  
13 data in my submission, which I think was appendix D of  
14 my submission, which --

15 CHAIRMAN: Just a moment.

16 Mr Duncan, can you give us a page number for that?  
17 Appendix D.

18 MR MIKE WESTON: It was the presentation by TfL to myself  
19 and the chairman.

20 MR PETER DUNCAN: 160, we believe, Mr Chairman.

21 CHAIRMAN: Thank you.

22 MR MIKE WESTON: There is an early slide of that  
23 presentation that --

24 CHAIRMAN: Do you have a page number for us so we can --

25 MR MIKE WESTON: I don't. That one there, yes. Backwards,  
26

1           sorry. Yes, that's it.

2       CHAIRMAN: Yes.

3       MR MIKE WESTON: This is data for 2017, showing slips, trips  
4           and falls on buses: 3,074 in the year 2017. I think it  
5           helpfully illustrates that the majority of injuries to  
6           passengers on board were those standing, while the  
7           vehicle is in motion, while they are boarding or  
8           alighting, while they are climbing or going up or down  
9           stairs. 13 per cent is seated passengers. So there are  
10          about 400 incidents of the 3,000 down to seated  
11          passengers, which suggests that perhaps the focus needs  
12          to be on -- as much as those, also needs to be on those  
13          standing and moving around the bus whilst it's in  
14          service.

15                I think that just hopefully illustrates the sort of  
16          breakdown of the injuries in London by what the  
17          passenger is doing on the bus at the time.

18       CHAIRMAN: In the statistics that we have in the forward  
19          planning programme, Mr Duncan, KMB, for example, 2018 to  
20          2022, distinguish between people who lose their balance,  
21          which is how we describe "slips, trips and falls", from  
22          people who are injured in their seat. My memory is that  
23          in that year -- though I think, looking at the figures  
24          for 2015 and 2016, two years -- 51.5 per cent were  
25          standing, or "lost balance" is the way it's put, and

26

1       only 1 per cent were injured in their seats, which  
2       suggests perhaps a lower rate of injury for seated  
3       passengers.

4       MR PETER DUNCAN: That does accord with my recollection,  
5       Mr Chairman, but I will ask my assistant to try and turn  
6       up the FPP reference to that.

7       CHAIRMAN: Yes.

8       One of the other issues that will arise if one was  
9       addressing this as a topic -- as required by the LegCo  
10      members in this panel, please have a look at seat belts,  
11      as you have seen -- would presumably be, first of all,  
12      what damage happens if you are not wearing a seat belt,  
13      and from the figures I have just quoted, the main damage  
14      appears to be people standing up or moving down  
15      staircases, moving around the bus, as opposed to people  
16      seated at seats, which seems to be small.

17      The other issue would be the usage of existing seat  
18      belts on a bus, and would it not be sensible to have  
19      some kind of survey to get empirical data about the  
20      actual usage, rather than the managing director of  
21      Citybus, who did tell us that he was a passenger on  
22      buses frequently, say, "Nobody wears them"? Would it  
23      not be sensible to have empirical data?

24      MR MIKE WESTON: It would be very easy to do, I would have  
25      thought, from perhaps CCTV observations and sampling of  
26

1 a certain number of journeys. It would be probably  
2 quite an easy thing to come up with, a current usage  
3 rate.

4 But I would hope that if a decision to fit the seat  
5 belts carries forward, there would be a strong campaign,  
6 a publicity/marketing campaign, to encourage their use,  
7 because at the end of the day, once the decision has  
8 been taken to make that investment, let's hope that at  
9 least the effort is then put in to maximise the benefit  
10 from that investment.

11 But, as the data from TfL shows, it probably  
12 supports the case in Hong Kong that that's not the  
13 biggest issue in terms of passengers on board a vehicle.

14 CHAIRMAN: Perhaps another factor would be to conduct  
15 a survey asking people if, because the authority thought  
16 and the bus company thought it would be a safe thing to  
17 do, to install seat belts, "Would you be prepared to use  
18 them? What's your willingness to use them?"

19 Such a survey was conducted back in 2007, I think.  
20 Perhaps Mr Duncan can find that reference. 2,200 people  
21 were called up by telephone is my memory.

22 MR MIKE WESTON: I suspect, Chair, that there is a danger  
23 with that question, in how it's asked, that people will  
24 give the answer that they are expected to give.

25 CHAIRMAN: The opposite of the question asked at the  
26

1 referendum about Brexit.

2 MR MIKE WESTON: Yes. "Of course I would wear the seat  
3 belt", but their actions in practice may be different.

4 CHAIRMAN: Yes.

5 MR MIKE WESTON: That's the challenge with one of those  
6 sorts of questions.

7 CHAIRMAN: I understand, but I assume it was done  
8 professionally, since the Transport Department quoted  
9 the statistic.

10 MR MIKE WESTON: Yes. But again, it goes back -- I'm not  
11 sitting here saying that the seat belts are necessarily  
12 a bad idea. My question is can that amount of money  
13 which has been quoted this afternoon be spent in a more  
14 cost-effective -- in a more beneficial way and result in  
15 greater benefits in terms of injuries to passengers and  
16 other road users. That's the question.

17 CHAIRMAN: Your concern is that if the money is spent and  
18 the pot is emptied, then money that might have been more  
19 usefully, more beneficially, spent on other aspects of  
20 safety will not actually be available to be spent?

21 MR MIKE WESTON: Exactly, and where we currently are, the  
22 operators have made a financial commitment for future  
23 years and could that financial commitment get greater  
24 benefits somewhere else?

25 CHAIRMAN: Just let me explain. We are going to take  
26

1 a short adjournment, and the reason for that is that  
2 Prof Lo has a commitment elsewhere that he must keep,  
3 but we are going to continue with our hearing and  
4 Prof Lo will have available not only the transcript of  
5 the proceedings but also the audio tape. But it is  
6 necessary now for us to take a short adjournment while  
7 Prof Lo is able to leave.

8 So we will take two or three minutes. Thank you.

9 (3.40 pm)

10 (A short adjournment)

11 (3.44 pm)

12 (In the absence of Prof Lo)

13 CHAIRMAN: Thank you.

14 Yes, Mr Duncan.

15 MR PETER DUNCAN: Thank you, Mr Chairman.

16 I am actually going to leave the topic of seat belts  
17 now, Mr Weston.

18 CHAIRMAN: Were you able to turn up the figures that I had  
19 in mind?

20 MR PETER DUNCAN: Not precisely, Mr Chairman, no, I'm  
21 afraid. Once we do locate what we think is being  
22 referred to, we will bring that to the committee's  
23 attention.

24 CHAIRMAN: I think they are on the screen.

25 MR PETER DUNCAN: Yes. I'm not sure that gives the  
26

1           distinction that Mr Chairman was referring to. It's  
2           certainly got the loss of balance of 54 per cent.

3   CHAIRMAN: There we are: loss of balance, 54 per cent;  
4           injury to passenger inside bus, that's 3 per cent.

5   MR PETER DUNCAN: Yes.

6   CHAIRMAN: And that I understand to mean the seated  
7           passenger, because that's the distinction between  
8           someone who has loss of balance.

9   MR PETER DUNCAN: Yes. I understand.

10   CHAIRMAN: To all events, it's a very marked difference in  
11           the small number of people injured while seated,  
12           although for obvious reasons there must have been  
13           a basis for installing seat belts on exposed seats. So  
14           the seat belts on the upper deck, at the front, I think  
15           came about because people were projected out of the bus.  
16           So at some stage a rail was put there, I think earlier,  
17           and then seat belts.

18           Then there are obvious places seated in the lower  
19           deck where there is no obstacle immediately in front of  
20           you, so if you are seated with another seat in front of  
21           you, you haven't got very far to go, and that seems to  
22           have been the rationale to that limited use.

23   MR PETER DUNCAN: I will just give you the reference to that  
24           page, Mr Chairman, which is now being shown. It's  
25           KMB-12, page 5115.

26

1 CHAIRMAN: Thank you.

2 MR PETER DUNCAN: So, subject to any other comments or  
3 questions, Mr Weston, I'm going to move away from seat  
4 belts and actually move to the final topic that I've got  
5 that I wish to explore with you.

6 That arises from page 149 of your report. I beg  
7 your pardon, it's page 146 initially. It's the issue of  
8 fatigue management, which we can see on page 146, in the  
9 introduction to the bus safety programme, was a recent  
10 addition to the bus safety programme. I would like just  
11 to ask you a few matters about this.

12 At page 149, at paragraph 7.6, you say in the last  
13 paragraph:

14 "It is also clear that there has ... been a shift  
15 towards 'behavioural safety' such as fatigue  
16 management."

17 Could you give the committee the benefit of your  
18 information with regard to that shift, and what is  
19 constituted by "behavioural safety"?

20 MR MIKE WESTON: Yes. I think the shift is that  
21 traditionally safety management has been around risk  
22 assessments, accident investigation, and often coming up  
23 with physical changes to either bus design or to  
24 suggested changes to road layout or changes to working  
25 practices.

26

1           One of the things that's certainly come out as part  
2           of the bus safety programme -- and it came out very  
3           strongly when the chairman and myself were meeting the  
4           London operators in August -- is that operators are now  
5           trying to dig further down into what the root causes of  
6           incidents may have been, and as part of that looking at  
7           the sort of behavioural impact of drivers.

8           An example in terms of fatigue management may be if  
9           a driver has an accident, traditionally the driver would  
10          have been interviewed, and the questions very much would  
11          have around what happened at the time of the accident,  
12          what were the factors, was the driver a contributory  
13          factor in the accident, very much focused on the  
14          incident itself.

15          What a lot of the operators are starting to do --  
16          and we saw examples -- is starting to look beyond the  
17          accident and the incident itself, starting to talk to  
18          drivers about what was happening perhaps half an hour  
19          before, had they had any conflicts with passengers that  
20          may have acted as -- may have not been a direct impact  
21          on the accident but it was a distraction with them, if  
22          they had had an argument with a passenger maybe half  
23          an hour before; talking to drivers about their  
24          lifestyle. What one operator noticed, from some  
25          analysis they had done, is that often a lot of their  
26

1 longer-serving drivers who had a very good safety  
2 records were far more conscientious about turning up for  
3 work early, giving themselves plenty of time to check  
4 their bus before they went into service, perhaps go to  
5 the toilet before they go into service, perhaps have  
6 a cup of tea before they go into service. So often  
7 these drivers were more conscientious about turning up  
8 on time, and in some interviews they had done -- and  
9 also more conscientious about making sure they went to  
10 bed at the right time the night before.

11 So operators appear to be broadening out their  
12 thinking about how they look at safety from  
13 investigating the incident itself and the factors around  
14 that incident, to a broader looking at driver behaviour  
15 and the impact that may have on fatigue. There are  
16 examples in bus companies whereby every night bus driver  
17 has a regular interview around their shift patterns and  
18 anything that might impact on their ability to drive at  
19 night.

20 So it's a sort of shift away, in simple terms, from  
21 investigating incidents, to try to look at driver  
22 behaviour more broadly.

23 CHAIRMAN: In that context, as I recall, questions asked  
24 about why you want to be a night-time driver: is it  
25 because you are delivering children to school and  
26

1       picking them up during the day, so that in fact you are  
2       not actually getting a proper, sustained rest; you are  
3       looking after family and doing a full-time job?

4       MR MIKE WESTON: Yes, and there were concerns expressed by  
5       some bus companies that one of the reasons they do  
6       regularly interview night bus drivers is to make sure  
7       that their work-life balance is right, and obviously  
8       a lot of pressure in big cities like London where  
9       drivers may have to share family responsibilities with  
10      their partners, to take children to school, then get  
11      home, then perhaps have three or four hours' rest before  
12      picking them up and then going to drive at night. So  
13      companies are very conscious of making sure that they  
14      understood more about a driver's ability to do the types  
15      of shift they were being asked to do, which I think is  
16      a new approach than has traditionally been the case.

17      MR PETER DUNCAN: To what extent is fatigue management made  
18      part of the training of bus drivers?

19      MR MIKE WESTON: Probably not as much as -- probably not  
20      that much, historically, and I think there are  
21      opportunities for a lot of this work to actually up the  
22      sort of interaction around the whole issue of fatigue  
23      management.

24             I personally don't think it's around bus drivers'  
25      hours. I think perhaps -- the danger is that the amount  
26

1       that bus drivers drive could be again another quick  
2       reaction to a problem, a bit like seat belts. I don't  
3       really think that's the issue. I think the drivers'  
4       hours and regulations in the UK are pretty well  
5       established. There is no suggestion that they allow  
6       excessive driving hours. It's about making sure drivers  
7       take enough rest between their shifts and they are not  
8       doing other jobs, although most London bus operators  
9       weren't overly worried about secondary employment, but  
10      a lot of them did have processes in place to check that  
11      drivers weren't undertaking secondary employment.

12             But I think this whole issue of fatigue management,  
13      and also supporting drivers in getting enough rest and  
14      living the right lifestyle to do the job, is just  
15      becoming more of a focus.

16      CHAIRMAN: Bus companies in London have access to the  
17      register, if that's the right name, of drivers who are  
18      allowed to drive minicabs and Uber, and so on; is that  
19      correct?

20      MR MIKE WESTON: Yes. So TfL, Transport for London, is the  
21      licensing authority for taxis and private-hire drivers  
22      and vehicles, and so they are able to share that  
23      database with the bus operators, so the bus operators  
24      can satisfy themselves that some drivers aren't also  
25      driving for minicab companies as a way of boosting their  
26

1 income, because I think most bus companies see, quite  
2 rightly, that bus driving is a primary job and if you  
3 are full time it should be your only job, because you  
4 should be resting the rest of your time.

5 CHAIRMAN: Am I right in recalling that some bus companies  
6 have some kind of limited checking of that information,  
7 surveillance of some kind?

8 MR MIKE WESTON: Yes. I think most of the checking tends to  
9 be reactive, reactive to incidents or to information  
10 that's received. So very few companies do blanket  
11 checking of whether the drivers are doing other things,  
12 but it will be in response to certain incidents, like,  
13 for example, if a driver is off sick, sometimes they get  
14 information to suggest the driver is working somewhere  
15 else, and they will then follow that up with their own  
16 internal investigation.

17 But, in summary, I think we are just seeing a shift  
18 from investigations very, very focused on the incident  
19 itself to try and look at the root causes, and trying to  
20 dig down more into what some of the root causes of  
21 accidents may be. Where traditionally and historically  
22 there's probably been very much a culture of -- were we  
23 as the bus company blameworthy or not blameworthy, and  
24 that's almost been the point where the investigation has  
25 ended, "Our driver wasn't blameworthy, it was the third  
26

1 party, there's a financial claim against the third  
2 party, that's investigation finished."

3 I slightly exaggerate to make the point, but I think  
4 what's happening now is there is more work going into  
5 identifying the root causes, and some of those root  
6 causes may only be small contributory factors but from  
7 that you can learn things that allow you to improve the  
8 safety culture and the safety practices.

9 CHAIRMAN: Where is the initiative coming from in this  
10 gradual change of approach to fatigue management?

11 MR MIKE WESTON: It's coming from the renewed focus of  
12 Transport for London to improved safety, and I think the  
13 operators see that as a joint responsibility. I don't  
14 think the bus operators in London have ever been  
15 dismissive of safety management, and it's a constant  
16 journey that in reality you will never finish because  
17 you can always become safer and safer. In our  
18 discussions in London in August, I think it was the  
19 managing director of Go-Ahead London was saying that  
20 when he joined as a apprentice probably 35 to 40 years  
21 ago, the biggest risk was people slipping over in  
22 garages because they were covered in diesel oil. That  
23 risk was eliminated years ago. So it's just a case of  
24 bus companies having to become more and more  
25 sophisticated to reduce the risk even further in  
26

1 operational areas.

2 So I think it's a constant process but everybody is  
3 becoming more focused and more sophisticated.

4 MR PETER DUNCAN: Does Transport for London govern the  
5 training of bus drivers or is that left entirely to the  
6 bus operators?

7 MR MIKE WESTON: There are two key aspects to training.  
8 There's the driving test itself, which is a Department  
9 for Transport national requirement. So, to get a public  
10 service vehicle driving licence, you have to undergo  
11 a driving test which is undertaken by either the  
12 government agency, the Driver and Vehicle Standards  
13 Agency, or a lot of bus companies will have dedicated  
14 examiners, so they will have their own examiners who can  
15 self-test but obviously are overseen to maintain  
16 standards.

17 Once you have your driving licence, every bus driver  
18 in the UK, and it applies -- it's European  
19 legislation -- has to do five days of accredited  
20 training every five years. Most bus companies will have  
21 a day's accredited training each year, and that is to  
22 maintain a bus driver's certificate of professional  
23 competence.

24 So those requirements apply to all bus and coach  
25 drivers across the whole of the UK, not just to London.

26

1           What London then does, it requires certain training  
2           courses to be undertaken, and the main one is  
3           an accredited qualification, accredited by  
4           an organisation called City and Guilds, which is called  
5           Professional Bus Driving in London, and it is a course  
6           that drivers must complete within one year of becoming  
7           a London bus driver, and they must complete that  
8           accredited training.

9           In addition, TfL has also developed some training  
10          that's been part of the five days of accredited  
11          training. So I refer in my report to one called In The  
12          Zone, which was a half-day training course that we  
13          developed, which was then delivered by bus company  
14          trainers to all bus drivers, and it was effectively  
15          a training course that used videos to show how drivers  
16          manage and assess risk, and basically it was a series of  
17          videos that took a bus driver through a typical morning  
18          and showed you different outcomes depending on how they  
19          had assessed risks during that half-hour prior to  
20          an accident and various incidents that took place. It  
21          was trying to illustrate that your behaviour and your  
22          risk assessment as you are driving can dramatically  
23          affect the outcome. So that was a half-day's training.

24          Then, more recently, they have undertaken something  
25          called Hello London which is a two-day training that all  
26

1       25,000 bus drivers in London have been through, and this  
2       was centrally organised and delivered by Transport for  
3       London. This was about trying to enhance customer  
4       experience and customer satisfaction, because one of the  
5       key areas where Transport for London and the bus  
6       operators were being criticised was around driver  
7       interaction with customers and the customer satisfaction  
8       with bus drivers.

9       So it was very much aimed at trying to improve the  
10      interaction and the customer service drivers gave to  
11      passengers.

12     CHAIRMAN: What was this course called?

13     MR MIKE WESTON: It was called Hello London, and it was  
14      delivered to a group of 100 drivers at a time, and it  
15      took two years to complete all 25,000 bus drivers. It  
16      was delivered by a small team of actors using  
17      interactive training. So they would play out a scenario  
18      and they would get drivers to comment on how they may  
19      have handled that differently.

20      It didn't specifically have a direct link to safety,  
21      but fair to say that because it was trying to get  
22      drivers to interact with passengers more positively and  
23      to manage difficult situations with passengers --  
24      I mean, one of the views is that if drivers can become  
25      less stressed and agitated by the way in which they deal  
26

1 with passengers, then hopefully they are less distracted  
2 when they are driving the vehicle after that incident or  
3 that interaction. So there is a link to safety because  
4 I think it was trying to help drivers deal with  
5 difficult situations and to defuse situations from  
6 becoming more difficult.

7 CHAIRMAN: So this would include the abusive/aggressive bus  
8 passenger?

9 MR MIKE WESTON: Yes, and one of the scenarios in the  
10 training is how you deal with that type of passenger,  
11 and the way to deal with it is not to necessarily react,  
12 and certainly not to get out of your cab and talk to the  
13 person. It's to try and pull back from it and  
14 hopefully, in most cases, that passenger will then board  
15 the bus and move on. And that becomes a distraction.  
16 That becomes a distraction to your focus on driving,  
17 so ...

18 CHAIRMAN: This was a course provided -- structured by  
19 Transport for London?

20 MR MIKE WESTON: Yes, structured by Transport for London,  
21 accredited with the accreditation agency, so it counted  
22 towards bus drivers' CPC, certificate of professional  
23 competence training, and in this case delivered  
24 centrally by Transport for London contractors. So it  
25 was a big commitment. But it was also trying to  
26

1           achieve -- one of the other criticisms from passengers  
2           often is inconsistency between drivers, and it was  
3           trying to achieve more consistency in how drivers deal  
4           with situations and how drivers deal with passengers.

5           As part of the bus safety programme there is the  
6           intention to have another safety-related course,  
7           centrally delivered and centrally accredited, as part of  
8           the bus safety programme, I think sometime in 2019.

9   CHAIRMAN: Presumably, the course was structured so that  
10          actors acted out a particular script, and the group of  
11          drivers were asked to respond to it? Is that how it was  
12          done?

13   MR MIKE WESTON: Yes. There were various scenes, and the  
14          first scene of day one was a driver coming into the  
15          garage. He asked to swap his shift in a week's time  
16          because he's got a family commitment. The supervisor is  
17          very dismissive of his request. He then has an argument  
18          with the supervisor, then gets on the bus, then drives  
19          the bus, and then a passenger gets on, but because he's  
20          in a bad mood a fairly minor situation becomes a bigger  
21          issue with a passenger.

22          So, initially, interestingly, a lot of the drivers  
23          sit there -- so when the actors say to the drivers,  
24          "Would you have dealt with that differently?", initially  
25          the reaction often is, "No, the supervisor was wrong,

26

1           they should have been more friendly or more helpful and  
2           the passenger could have been nicer or more polite", and  
3           then slowly they bring the drivers around to say,  
4           "I suppose if we had done this differently and that  
5           differently, maybe the outcome would have changed", and  
6           then the actors re-act that scene, taking on board those  
7           suggestions. It's trying to show that, yes, it might be  
8           somebody else's fault but you can change the outcome and  
9           you can influence what happens, and it is quite  
10          interesting to observe, to see how drivers come around  
11          to a different way of thinking, because their initial  
12          reaction often is that everybody else is at fault,  
13          "There's nothing I could have done better", but that  
14          changes.

15       CHAIRMAN: Is the, as it were, syllabus of this course  
16          available in written form?

17       MR MIKE WESTON: It should be. We can certainly find out.  
18          It's been accredited by independent accreditation agency  
19          for the CPC, but I would be very surprised if Transport  
20          for London weren't willing to share it with the  
21          committee anyway.

22       CHAIRMAN: Perhaps we might invite you to make those  
23          enquiries.

24       MR MIKE WESTON: Yes.

25       CHAIRMAN: Just as a template of the kind of issues.

26

1 Obviously local characteristics would present  
2 a different script, but it might be that the formula  
3 might be similar, or at least consideration could be  
4 given to it.

5 MR MIKE WESTON: Yes. I will make the request.

6 MR PETER DUNCAN: Do we see some details with regard to the  
7 In The Zone training and the Hello London initiative on  
8 pages 144 and 145 of your report?

9 MR MIKE WESTON: Yes.

10 MR PETER DUNCAN: Just going back to the question of fatigue  
11 management, can I bring your attention to page 146 and  
12 the last paragraph on that page, when I think, during  
13 the course of your preparation for your report, you had  
14 discussions with London bus operators and witnessed  
15 a demonstration of a driving fatigue monitoring system  
16 called Seeing Machines, and you've given details of that  
17 in that paragraph.

18 Has this actually been implemented by the bus  
19 operators yet, or is this something which is still under  
20 trial?

21 MR MIKE WESTON: No. This is one of the trials that has --  
22 it's been trialled by a bus operator, in this case it  
23 was RATP, and as part of -- and it's being assessed by  
24 TfL to consider whether it should feature in their bus  
25 safety standard. So I think, as part of the safety  
26

1 innovation fund, there were two trials of fatigue  
2 management. There was the Seeing Machines and there was  
3 another system that whilst it detected when drivers'  
4 eyes were starting to close and it vibrated their seat  
5 and it alerted the control room, it didn't video the  
6 incident, so it was very difficult then to  
7 retrospectively talk to the driver about what was  
8 happening because it wasn't capturing a video of the  
9 situation. With this system, it actually keeps the  
10 videos and captures the video of the driver, so it's far  
11 easier to engage and have a discussion with the driver.

12 The intention of the discussion is to move the  
13 discussion into fatigue management, "The video suggests  
14 you were starting to nod off and go to sleep; is there  
15 any reason why that might be the case?" It might prompt  
16 a discussion about some medical condition that perhaps  
17 a driver hasn't declared. It's a useful way to create  
18 a dialogue with the driver about their lifestyle.

19 So, from the various things trialled, this seemed to  
20 be one of the stronger systems in terms of monitoring  
21 driver fatigue.

22 CHAIRMAN: And this facility had a real-time function as  
23 well, did it not?

24 MR MIKE WESTON: Yes.

25 CHAIRMAN: So that the image that was captured was sent to  
26

1 a control room, I think in the United States?

2 MR MIKE WESTON: Yes.

3 CHAIRMAN: And the controller in the United States would  
4 then contact the control room in the bus company, who  
5 communicated a real-time alert to the driver?

6 MR MIKE WESTON: Yes. Clearly, if the driver had at that  
7 point fallen asleep, then that sequence of events  
8 wouldn't stop any subsequent accident, but the idea is  
9 that somebody in the central control room verifies that  
10 it is a fatigue incident and then prompts the bus  
11 company to speak to the driver as soon as possible to  
12 either ask them if there is any issues and certainly  
13 interview them when they return to the garage, to assess  
14 what the causes might have been.

15 As it says on the bottom of that page, the operator  
16 has observed a 25 per cent reduction in incidents since  
17 May on that one route, so quite a significant result and  
18 quite a significant benefit.

19 MR PETER DUNCAN: At present, are there any fatigue  
20 monitoring systems in place in London buses?

21 MR MIKE WESTON: Only the trials. Only the trials. But we  
22 will --

23 CHAIRMAN: But they are available or used, are they not, on  
24 the Croydon tram?

25 MR MIKE WESTON: Yes. They were fitted to -- I think it was  
26

1 the same system, if I recall, Seeing Machines, was  
2 fitted to the Croydon trams following an incident,  
3 a serious accident, last year, I think it was, or the  
4 year before, and a lot of long-distance coaches have  
5 similar systems. I think National Express have  
6 a similar system for driver fatigue, partly because  
7 probably driving on an expressway, motorway, at  
8 a constant speed, there is more chance of fatigue. So  
9 it's become the norm in that industry, but it will be  
10 interesting to see whether TfL, once they have gone  
11 through their cost/benefits analysis, these various  
12 options, decide this is one that should feature in their  
13 basket of proposals for their bus safety standard.

14 CHAIRMAN: The Croydon tram accident happened at the very  
15 early morning, did it not, around 5 o'clock in the  
16 morning or something like that?

17 MR MIKE WESTON: Yes, very early. It was a change of speed  
18 limit, so the speed limit going down from I think  
19 50 miles per hour to 30 or something like that, and the  
20 driver not observing the speed limit on a fairly tight  
21 curve on the system.

22 CHAIRMAN: So the issue really is whether or not there might  
23 be a difference between coach drivers on long, boring  
24 motorways, tram drivers in the early hours of the  
25 morning going down a track, compared with a bus driver  
26

1           having to stop every 300 or 400 yards, you wouldn't  
2           expect him to be going to sleep; is that the  
3           distinction?

4       MR MIKE WESTON: I think that's the distinction, but then  
5           there are times of the day, even for a London bus  
6           driver, where early in the morning, it's not as busy,  
7           you might not be stopping at many stops, nighttime  
8           drivers, in certain directions it can be a lot quieter.  
9           So there are situations -- you would naturally assume  
10          there is so much going on on a London road or even here  
11          in Hong Kong that you wouldn't have time to nod off, but  
12          I think there are times when you can be -- it can be  
13          a lot quieter and maybe those situations could occur.

14       CHAIRMAN: But the RATP driver was driving an urban bus  
15          route, was he not, and demonstrably going to sleep?

16       MR MIKE WESTON: He was. We saw the video.

17                But I think what the report at this point is trying  
18          to do is say there is a whole host of technologies and  
19          solutions out there, but they need to be properly  
20          assessed, and the judgment needs to be made about which  
21          ones will offer the best benefit, because ultimately it  
22          would perhaps be naive to assume that you could adopt  
23          all these technologies on every bus. It's clearly not  
24          going to be financially feasible. So it's a case of  
25          making sure there is a proper assessment to select the

26

1       ones that offer the maximum benefit in terms of reducing  
2       both passenger injuries but also injuries to third  
3       parties, pedestrians, cyclists, et cetera. That's what  
4       I think from my review of TfL's bus safety programme  
5       they are trying to achieve. They are trying to really  
6       go through quite a thorough cost/benefit analysis, to  
7       make sure that the money they've got or the money they  
8       need to find is spent in the best possible way.

9       CHAIRMAN: You have read Prof Stanley's report and you will  
10       be aware that that is the analysis, even down to the  
11       cost of life, that they undergo in Australia, before  
12       they determine whether or not it is worth this device  
13       which has these benefits, but there aren't very many  
14       people who will help and therefore perhaps it's not  
15       worth it; cost/benefit analysis to determine all these  
16       things.

17       MR MIKE WESTON: Yes, and the Department for Transport in  
18       the UK publish those figures for cost of life, cost of  
19       major injury, so you can build those costs, because  
20       those are the wider costs/benefits to society. So  
21       clearly the cost of saving a fatality is a cost to lots  
22       of people; it's a saving to the NHS or the hospital  
23       services. So, yes, it's capturing those costs and those  
24       wider benefits.

25       CHAIRMAN: And, at the end of the day, you choose the device  
26

1           that delivers most for the cost and delivers most  
2           benefit for the cost.

3       MR MIKE WESTON: Yes. The logic would be, if you've tested  
4           ten different systems and you understand the  
5           cost/benefit, you can rank them in order of cost/benefit  
6           and ultimately you can go down that list as far as you  
7           can afford in terms of the funding you have available.  
8           I think that's ultimately what the bus safety programme  
9           in London will do.

10       CHAIRMAN: And, as you say, the money comes either from  
11           profits, government, or fares?

12       MR MIKE WESTON: Yes. It's got to come from one of those  
13           three. It's got to either come from -- in London's  
14           case, it's either got to come from fares revenue, from  
15           the transport authority or from reduced profits of the  
16           bus companies.

17       MR PETER DUNCAN: Mr Chairman, that really completes the  
18           matters that I was going to explore with Mr Weston.

19       CHAIRMAN: There is one other matter that looms large in the  
20           Transport for London approach, and that is speed limits,  
21           which we see no consideration of in what is being  
22           undergone in Hong Kong at the moment. Perhaps you could  
23           set us the scene.

24           And if you, Mr Duncan, can locate any material that  
25           goes to this issue, perhaps in the material relating to  
26

1 London.

2 As I understand it, there is a digital map of London  
3 roads and speed limits, is there not?

4 MR MIKE WESTON: Yes.

5 CHAIRMAN: And 20 miles an hour limits are in green, and the  
6 map is green, is it not, now?

7 MR MIKE WESTON: Yes. There's been a trend across the  
8 32 London boroughs to implement more and more 20 mile  
9 per hour zones across large residential areas. So  
10 20 miles per hour equates to about 32 kilometres per  
11 hour. So we are seeing more and more roads becoming  
12 20 mile per hour speed limited. Most other roads will  
13 be 30 or 40, and perhaps a few 50. But in terms of bus  
14 routes in London, very few bus routes would operate on  
15 roads with a higher than 50 mile per hour speed limit.  
16 The majority will be less than that.

17 I think one of the challenges is around appropriate  
18 speed. The speed limit -- you could argue that for  
19 a large bus, a speed limit of 30 miles per hour may be  
20 the limit. It may not be the appropriate speed for that  
21 piece of road at that particular time. So it's trying  
22 to educate drivers to be aware of appropriate speed  
23 limits -- sorry, appropriate speed as opposed to just  
24 the speed limit.

25 CHAIRMAN: The appropriate speed for the section of road on  
26

1           which the vehicle is being driven?

2       MR MIKE WESTON: Yes, which could -- the appropriate speed  
3           could vary by time of day, depending on --

4       CHAIRMAN: And does, in London, when schools are encountered  
5           alongside the roads, the speed limit changes for the  
6           time that the school comes out? Or perhaps there are  
7           signs telling you what the speed limit is, reminding  
8           you?

9       MR MIKE WESTON: Yes, I think there might be reminders of  
10          speed limits, and there are often by schools warning  
11          signs that activate during the school periods but not  
12          actually change the speed limits.

13       CHAIRMAN: Very well.

14           Given that in Hong Kong, as you are aware, we have  
15          parts of Hong Kong that are urbanly dense, with many  
16          pedestrians on the sidewalk immediately adjacent to  
17          where traffic is moving, buses are plying. With that  
18          scenario, in London, are there now limits of 20 miles  
19          an hour in streets that match that description?

20       MR MIKE WESTON: Yes. Some of the major Central London  
21          roads now have 20 mile per hour limits. So it's not  
22          just residential roads; it is some of the sort of --  
23          I think, in the text on the screen at the moment, it  
24          talks about March 2015 trials, including Clapham  
25          High Street, which is a major thoroughfare.

26

1 CHAIRMAN: The ISA test on those two routes that you  
2 described earlier involved traversing 20 mile an hour  
3 zones, did it not, even back then in 2015-16?

4 MR MIKE WESTON: It did, and the results of that trial was  
5 that it was having -- the ISA trial on buses, 20 mile  
6 per hour zones was having a greater impact on other  
7 vehicle average speeds. So you tended to find that when  
8 the limit was 30, the average speed of other vehicles  
9 went down a lot less than when the limit was 20. So it  
10 was tending -- the slower bus was tending to slow other  
11 traffic down more as well, in greater proportion than it  
12 was on a 30 mile per hour road.

13 CHAIRMAN: I think it was described as a platoon or  
14 a convoy?

15 MR MIKE WESTON: Yes. One of the worries, when that trial  
16 was done, was if you start to flow the following traffic  
17 down, does some of the following traffic then start to  
18 take risks in terms of trying to overtake the bus,  
19 trying to nip past it at bus stops in dangerous  
20 situations, but from my reading of the report, there was  
21 no evidence of that. There was no evidence that it made  
22 other traffic behave any differently.

23 So, in practice, there was -- certainly in 20 mile  
24 per hour zones, restricting buses to 20 miles per hour  
25 could be a good way of helping enforce the speed limit  
26

1 on other vehicles, because it would force other vehicles  
2 to slow down.

3 CHAIRMAN: And the risk assessment that relates to the  
4 likelihood of serious injury or fatalities related to  
5 speed of buses shows that it falls significantly, does  
6 it not, as one goes down the speed limits, 40 miles  
7 an hour, 30 miles an hour, 20 miles an hour?

8 MR MIKE WESTON: Yes, I can't remember the exact ratios but  
9 clearly, the chances of being killed if you are hit by  
10 a bus at 25 or 30 miles an hour is significantly greater  
11 than if it's at 10 or 18 miles an hour. That would be  
12 the same for other vehicles, but with buses, as I think  
13 we've said this morning, the front of a bus is less  
14 forgiving perhaps than a car, if it's involved in  
15 an incident with a pedestrian or a cyclist.

16 CHAIRMAN: And the mass of the bus is quite different.

17 MR MIKE WESTON: Yes.

18 MEMBER AUYEUNG: One question. What's the feedback from the  
19 bus captains in terms of dealing with multiple speed  
20 limits? Are they expressing concerns of having to deal  
21 with too many speed limits?

22 MR MIKE WESTON: I'm not aware of anything, and partly  
23 because a lot of these 20 mile per hour limits have gone  
24 into wide areas on a blanket basis, so it's not as if  
25 the speed limit is constantly changing. The chairman

26

1           and myself saw some technology system called Mobileye  
2           that actually reminds the driver of the speed limit as  
3           it picks up speed limit signs painted on the road or on  
4           signage and then reminds him in his or her cab that  
5           that's the speed limit.

6   CHAIRMAN:   So the camera reads the speed limit sign and then  
7           reproduces it on a dial in front of the driver?

8   MR MIKE WESTON:  A dial, to act as a reminder.  It could be  
9           that the driver didn't notice that speed limit sign  
10          because he was looking the other way at that point.

11           The map on the screen now is the one that the  
12          chairman was referring to in terms of --

13   CHAIRMAN:  And I'm right in remembering that green was the  
14          20 mile --

15   MR MIKE WESTON:  Yes.  So you see a lot of inner London is  
16          20 miles per hour, apart from a few major corridor  
17          through that area, and I suspect that will change --  
18          that map will continue to get greener and greener.

19   CHAIRMAN:  Have the statistics showed any positive change,  
20          correlation to serious injuries and fatalities as  
21          a result of lower speeds, or not, or not yet?

22   MR MIKE WESTON:  Not yet, although I think if I recall the  
23          last quarter for TfL, they quoted to us that they had  
24          had no fatalities in the quarter.

25   CHAIRMAN:  I think that's the first quarter of 2018?

26

1 MR MIKE WESTON: Which is the first time for a long time  
2 that they had had a quarter with no fatalities. So --

3 CHAIRMAN: The second quarter proved the dangers of being  
4 complacent because they had six fatalities.

5 MR MIKE WESTON: Yes, but I think the average running rate  
6 is still lower than the previous year. It takes a long  
7 time to build those proper, robust trends, I think.

8 CHAIRMAN: Has there been any impact on the time that  
9 journeys take, or is London so congested it makes no  
10 difference?

11 MR MIKE WESTON: I think there's been bigger factors  
12 affecting the time the journeys take as opposed to the  
13 speed limit, because there has been -- certainly in  
14 Central London, there's been a lot of roadworks  
15 connected with the introduction of cycle lanes and cycle  
16 superhighways, and a lot of construction work has had  
17 a real impact on average bus speeds, and that's slowed  
18 the bus network down certainly in Central London, more  
19 so than the 20 mile per hour limit.

20 I think there's a lot of those corridors where even  
21 today, if drivers could go 20 miles per hour, they would  
22 be quite happy.

23 CHAIRMAN: Am I right in thinking that the average speed of  
24 traffic is 9.2 miles per hour?

25 MR MIKE WESTON: 9.2 in Central London, so the average is  
26

1 very low.

2 CHAIRMAN: Is that an aspect of road safety enhancement,  
3 franchised bus enhancement safety, that Hong Kong should  
4 look at, speed limits?

5 MR MIKE WESTON: I think the answer to that question is  
6 somebody should probably first understand what the  
7 average speed is and what the range of speeds are.  
8 I think, in London, just to clarify, these 20 mile per  
9 hour speed limits apply to all vehicles, not just buses.  
10 So they apply to all road vehicles.

11 First, I would suggest there is a case of  
12 understanding what the average speeds are on certain  
13 sections of road to understand the extent of the  
14 problem. I would suggest that probably greater benefits  
15 would come from reducing -- if there was a desire to  
16 reduce the average speed of all vehicles on a section of  
17 road as opposed to just buses, I think just to  
18 differentiate it between buses and other vehicles would  
19 probably be very difficult and quite challenging and  
20 I suspect the benefits would be greater from actually  
21 reducing the speed of all vehicles on sections of road.

22 But I think it's probably a case of first  
23 understanding what the issue is and what the problem is.

24 CHAIRMAN: And, like these other issues that we have  
25 discussed today, this is a matter where one needs to

26

1 obtain information first of all, as you have just  
2 described, average speeds, and so on, and then  
3 ultimately apply a cost/benefit analysis, the cost of,  
4 if traffic is going to move slower, and then the  
5 benefit?

6 MR MIKE WESTON: Yes, because the logic is, if you do slow  
7 all the bus routes down because you don't go as fast,  
8 then to run the same frequency you potentially need more  
9 buses and more drivers, so there's a cost to that, and  
10 it's back to the earlier point, is that more beneficial  
11 than fitting other safety features to the buses? It's  
12 trying to take an overview of all the options that are  
13 available and making an informed choice of all those, as  
14 opposed to perhaps picking certain things off one at  
15 a time. I think, if you do the latter approach, there  
16 is a danger you make some of the wrong decisions.

17 CHAIRMAN: For how long has this reduced speed limit of  
18 20 miles an hour, as opposed to the normal 30 miles  
19 an hour speed limit in urban areas -- for how long has  
20 that been available as an option for local authorities?

21 MR MIKE WESTON: I don't know exactly but I would say  
22 between about five and ten years, and it's available to  
23 all local authorities across the UK, not just London.  
24 But I would say about five to ten years. It's  
25 relatively new.

1 CHAIRMAN: Yes. I think we have on the screen "January  
2 2013" -- I think this is some kind of a publication by  
3 the circular, by the Department for Transport --

4 MR MIKE WESTON: Yes.

5 CHAIRMAN: -- telling local authorities what they can do,  
6 and the circumstances in which it would be appropriate.

7 MR MIKE WESTON: But initially, my personal recollection, it  
8 was intended to be very selective on selected pieces of  
9 road, in response to maybe the presence of a school or  
10 some other incident, and now we are starting to see more  
11 local authorities effectively doing wider blanket  
12 20 mile per hour zones as opposed to individual pieces  
13 of road. So we are seeing -- and that's probably  
14 because people are starting to learn that actually the  
15 impact of it on journey times is pretty marginal, but  
16 the safety benefits potentially are great --

17 CHAIRMAN: You mentioned that it can be now found on major  
18 London roads. You gave Clapham High Street as one.  
19 What of inner London, Regent Street, Oxford Street,  
20 roads like that?

21 MR MIKE WESTON: I'm not sure. I'm fairly confident that  
22 the road outside the TfL offices in Southwark is  
23 a 20 mile per hour zone, which is Blackfriars Road --  
24 I think that's 20, for example. So it is on quite a few  
25 major roads but I'm not sure about Oxford Street.

26

1           In Oxford Street, I think if you were able to go  
2           20 miles per hour you would be doing very well; it's  
3           a very congested road.

4   CHAIRMAN: Mr Duncan, is there anything arising from the  
5           topic that I --

6   MR PETER DUNCAN: Can I just give you a few references for  
7           matters that have come up recently.

8           First of all, Department for Transport setting local  
9           speed limits, you will find that at SEC-3 at page 1003.  
10          There was the earlier sheet from the "Safe London  
11          streets: our approach" document, October 2015, headed  
12          "Travelling too fast", and the statement that "A 1 mile  
13          per hour reduction in speed could reduce the frequency  
14          of collisions by around 6 per cent in urban areas", that  
15          can be found at MISC-3 at 987.

16          Then Mr Chairman also referred to --

17   CHAIRMAN: And that document is entitled "Reduction in  
18          speed", is it?

19   MR PETER DUNCAN: The overall document is called, "Safe  
20          London streets: our approach".

21   CHAIRMAN: Is this a Transport for London publication?

22   MR MIKE WESTON: Yes, it is. The major heading on page 986  
23          is "Our priorities", and then the first priority is  
24          "Travelling too fast".

25   CHAIRMAN: Thank you.

26

1 MR PETER DUNCAN: Then you had referred earlier to  
2 a preliminary passenger survey in May 2007 to gauge the  
3 views of bus passengers on the wearing of seat belts.

4 CHAIRMAN: Yes.

5 MR PETER DUNCAN: And that involving some 2,000 respondents.  
6 You will find that at SEC-1, page 295.

7 CHAIRMAN: Could we just put that on the screen so that  
8 Mr Weston can see what I was referring to.

9 MR PETER DUNCAN: It's paragraph 7.

10 CHAIRMAN: Yes. As you say, Mr Weston, it depends on what  
11 the question was.

12 MR MIKE WESTON: Yes.

13 CHAIRMAN: Thank you for those.

14 Are there any other matters, Mr Duncan?

15 MR PETER DUNCAN: No, Mr Chairman. Thank you.

16 CHAIRMAN: Mr Weston, are there any final matters that you  
17 would like to draw to our attention?

18 MR MIKE WESTON: No. I think the only thing that we hadn't  
19 talked about was incentivisation of contracts, financial  
20 incentivisation.

21 CHAIRMAN: Oh, yes.

22 MR MIKE WESTON: I think that was the only other area that  
23 I'm surprised you hadn't raised.

24 CHAIRMAN: Thank you for raising that. The issue, broadly  
25 speaking, is this. Is incentivising safety indicators  
26

1       likely to be neutral, positive or negative to enhancing  
2       safety of buses? So rewards to companies for performing  
3       well in safety-related indicators, is that likely to  
4       enhance safety of buses?

5       MR MIKE WESTON: In my report, I make the observation that  
6       some concerns -- and there were concerns expressed by  
7       the bus operators, interestingly, as well, whether  
8       direct financial incentives potentially drive the wrong  
9       behaviours in a bus company and potentially reduce  
10      information-sharing and collaboration with their peer  
11      group.

12       But I think, stepping back slightly from that,  
13      I think I would suggest that -- firstly, I think  
14      operators in London have always taken safety seriously  
15      anyway, so I think the question is what behaviours are  
16      you trying to change from a financial incentive, and  
17      I think where it becomes difficult is when you start  
18      paying a financial incentive for improvements in safety  
19      performance, but an operator is still having accidents,  
20      because effectively you then end up with a slightly  
21      perverse situation that, yes, your safety performance  
22      has improved this year compared with last year, but this  
23      year you perhaps still had three fatalities and  
24      80 serious injuries and here is your financial bonus for  
25      this year. It seems rather a strange link to make.

1           Now, clearly the other way of doing it is you just  
2           have pure deductions for safety performance. Now, the  
3           danger with that is if an operator feels they can't  
4           influence that safety performance quick enough, then  
5           they will just build those deductions into their  
6           original contract price to mitigate the impact.

7           So I think there is a whole host of concerns around  
8           directly linking financial incentives to the bus  
9           contracts. I think that's supported by TfL in their  
10          document about the bus route tendering process dated  
11          2015, where they explain why they don't think the  
12          financial incentive would be right.

13          I think, on the other hand, there could be potential  
14          for other sorts of incentives. The obvious one in my  
15          mind is does the eligibility for the two-year extension  
16          at the end of the first five years -- does that  
17          eligibility -- at the moment, it's only related to  
18          reliability -- could it be related to some trend in  
19          safety performance over the previous five years, for  
20          example? So there could be some other ways of  
21          incentivising operators as not directly financial.  
22          I think I have some big reservations about making  
23          financial incentives to do with safety because I think  
24          it just feels like the wrong approach, because you are  
25          either still paying people bonuses who are still having  
26

1 accidents or you are making deductions that they just  
2 build into their contract.

3 But maybe there are some other ways and the one that  
4 springs to mind is you are only eligible for a two-year  
5 extension if your safety performance in years 3 and 4 of  
6 the original contract have showed some positive trends,  
7 for example. That could be quite a strong incentive to  
8 operators. So it's not directly linked to financial  
9 reward.

10 CHAIRMAN: You use the word "incentives" but you have in  
11 mind deductions as well?

12 MR MIKE WESTON: It could be.

13 CHAIRMAN: So, to deal with the situation you posit, of  
14 giving somebody an incentive/reward for having only  
15 killed three people this year rather than six last year  
16 as being a strange way of doing it, the other way of  
17 doing that would be a deduction: "If you kill anybody,  
18 we deduct"?

19 MR MIKE WESTON: It could be. I think, again, you've got to  
20 make sure that over a reasonable period of time  
21 an operator has some chance of influencing that trend.  
22 Otherwise, if I am bidding for a contract for five years  
23 and I don't believe I can significantly change that  
24 trend over the period of five years, I will build that  
25 deduction or the cost of that deduction into my original

26

1 contract price, because it's a cost I know I will  
2 probably pick up during that five-year period.

3 So I think an incentive has got to drive a behaviour  
4 but it has also got to be realistically achievable,  
5 which is perhaps why, if I was asked by TfL to think  
6 what I would do, I would maybe think they are coming up  
7 with a safety performance indicator, this score for each  
8 operator, you possibly could link an improved trend in  
9 that score to the contract extension. That could be  
10 a way of incentivising operators.

11 CHAIRMAN: As things stand, the primary driving force for  
12 the extension is whether or not, am I correct in  
13 thinking, the reliability performance is being  
14 delivered?

15 MR MIKE WESTON: Yes. So, if an operator meets the minimum  
16 performance standard or the extension criteria which is  
17 slightly better than the minimum performance, as  
18 I understand it, they would be eligible for  
19 an extension.

20 CHAIRMAN: Yes.

21 MR MIKE WESTON: The other incentive that already exists --  
22 and again we talked about it this morning -- is that  
23 ultimately, because there is a rolling programme of  
24 route tendering, ultimately the incentive to perform  
25 well from a safety perspective is constantly there  
26

1           because if you don't, it is very easy for Transport for  
2           London to stop awarding you contracts for a period of  
3           time, and we discussed the example this morning of where  
4           that had occurred.

5   CHAIRMAN:   Thank you for that.

6           Are there any other matters you wanted to raise?

7   MR MIKE WESTON:   No, Chair.

8   CHAIRMAN:   In which case --

9   MR PETER DUNCAN:   Mr Chairman, may I be permitted to raise  
10           just one matter arising from that?

11   CHAIRMAN:   Certainly.

12   MR PETER DUNCAN:   There has been some discussion during the  
13           course of the hearing as to incentivisation of the  
14           drivers by the bus companies for safety performance. Do  
15           you have any views on that?

16   MR MIKE WESTON:   Again, I think it has to be meaningful, and  
17           it has to be well within the driver's control, and  
18           again, during our discussions in August, there was one  
19           company that used to have a direct driver incentive, but  
20           had consolidated it into their base pay at some point  
21           because they felt it had outgrown its usefulness and it  
22           wasn't really having any impact.

23           I think it could, but the measures need to be very  
24           meaningful to drivers, and also need to be designed in  
25           such a way that if a driver is involved in an incident,  
26

1           it then doesn't become a disincentive, "Because I've  
2           lost my bonus for the year." So again it's trying to  
3           calibrate it correctly.

4           But I think, during the discussions with operators,  
5           there seemed to be bit of a move away from directly  
6           incentivising drivers in terms of safety.

7   CHAIRMAN: One operator had a system, did they not, where  
8           the bus driver got some relatively small reward, perhaps  
9           50 pounds, I think it was, but his name went forward  
10          into a hat and after nine months, all the drivers who  
11          had won the driver of the month award were in the draw,  
12          and the winner of the draw got a car, a new car?

13   MR MIKE WESTON: A new car. That was funded by the  
14          telematics company. Actually, that was quite  
15          an interesting incentive because basically each  
16          four-weekly period in the garage, a list of the  
17          best-performing drivers was put up in the garage and  
18          I think it was a 50 pounds shopping voucher that those  
19          drivers got. But it's quite a natural thing amongst bus  
20          drivers in London, I'm sure it is in Hong Kong, that  
21          everyone wants to be considered to be a good driver, so  
22          actually having your name on the good drivers list was  
23          an incentive almost in itself, and you could argue it  
24          almost didn't need to be incentivised. People wanted to  
25          be considered to be a good driver. And the car was

26

1 relatively small cost in terms of the 2,500 bus drivers  
2 that company employed.

3 CHAIRMAN: But it was an illustration of an incentive  
4 directly related to a driver.

5 MR MIKE WESTON: Yes, but wasn't, Chair, a direct incentive  
6 into their pay packet or into their wages. It was away  
7 from their normal pay and terms and conditions.

8 MR PETER DUNCAN: Thank you, Mr Chairman. That was all.

9 CHAIRMAN: Mr Weston, may we close by inviting you to  
10 communicate with us with some addendum to your report,  
11 after Transport for London have delivered their bus  
12 safety standard, whatever it is they deliver, on  
13 16 October.

14 MR MIKE WESTON: Yes.

15 CHAIRMAN: That will be of great assistance to us, and any  
16 material that you are able to obtain to assist us.

17 MR MIKE WESTON: Yes. I will also see whether we can obtain  
18 the syllabus for the Hello London bus driver training  
19 campaign.

20 CHAIRMAN: Thank you.

21 On that note, it remains for the committee to thank  
22 you, as Mr Duncan said at the outset, for your report,  
23 and for fleshing that out and answering our enquiries in  
24 this oral session today. It's been most useful to be  
25 able to draw on your experience of so many years working  
26

1 with buses. It's certainly an assistance to our  
2 understanding of the considerations that are relevant to  
3 what we might recommend in Hong Kong.

4 On that note, may we wish you a safe return journey.

5 Thank you.

6 MR MIKE WESTON: Thank you, Chair.

7 (4.50 pm)

8 (The hearing adjourned until 10.00 am  
9 on Thursday, 4 October 2018)

EXPERT EVIDENCE OF MR MIKE WESTON .....	1
Examination by MR PETER DUNCAN .....	1

*[Blank Page]*

1 2018 年 9 月 27 日

2 上午 9 時正恢復聆訊

3 出席人士： Hon Mr Justice Michael Lunn（倫明高），香港專營巴士服務獨  
4 立檢討委員會主席

5 歐陽伯權先生，香港專營巴士服務獨立檢討委員會委員

6 羅康錦教授，香港專營巴士服務獨立檢討委員會委員

7 Peter N. Duncan（鄧樂勤）資深大律師，由高露雲律師行委聘，代  
8 表香港專營巴士服務獨立檢討委員會

9 Mr Mike Weston，獨立的客運交通顧問

10

11 主席：（經傳譯員）早晨，Weston 先生，係好多謝你就係由倫敦嚟到香港協助我哋  
12 嘅聽證會。你可能都知道我哋就係有律師係協助我哋，佢就會係問你啲問題，  
13 我哋委員會亦都會係向你提問嘅，如果啲問題問得唔清楚嘅說話，你就話畀我  
14 哋聽，我哋就會確保我哋嘅提問係好準確，我哋就請鄧樂勤資深大律師開始。

15 MR DUNCAN：（經傳譯員）多謝主席。Weston 先生，早晨。我就會--主席頭先所  
16 講，多謝你係協助我哋嘅委員會嘅工作，特別係提供畀委員會就有一個書面嘅  
17 報告，我哋就係想睇一睇，話請你返去去呢一個嘅報告，就係專家嘅呢個文件  
18 夾第 115 頁，就係第一份嘅，就有幾個課題，我就希望同你一齊探討嘅，但係  
19 開始之前，我就係想會問一問你嘅問題，係關於你自己嘅背景同埋經驗嘅，同  
20 埋就係話你寫個報告嘅時候你自己嗰個身處嗰個身分係點樣樣。

21 首先，你自己嗰個嘅經驗，我就請你翻開第 118 頁，呢度就係講個背景  
22 嘅，第二段就係你話你自己就準備咗呢一個報告，你係一個獨立嘅顧問，就有  
23 超過三十年嘅經驗，喺呢個巴士行業裏面，包括就係喺呢一個倫敦運輸局裏面  
24 嘅高層人士，同埋就最近就係呢一個巴士總監嘅。

25 同埋你就跟住就喺附件 A 裏面就有你嘅履歷，所以請我哋去到附件 A，喺第  
26 157 頁。我哋睇到有你自己嘅個人嘅簡歷、最近嘅工作經驗同埋其他嘅專業方  
27 面嘅事宜。我哋睇一睇係關於巴士部總監倫敦運輸局，喺呢一段裏面，就 1999  
28 就係 2003 就係講緊呢個巴士基建嘅主管同埋巴士營運主管，你可唔可以話畀我  
29 聽？

30 MR MIKE WESTON：（經傳譯員）巴士基建嘅主管 1999 年我就開始做，之前其實我  
31 就主要就係去評估一啲巴士嘅招標，1999 年我就係作為一個巴士基建主管嘅，  
32 我係負責一系列嘅事宜，就包括提供呢個巴士基建、巴士站、巴士上蓋同埋巴  
33 士站等等，同埋一啲倫敦運輸局嘅其他嘅設施，我哋就係要提供個基建同埋就

1 係平日個營運，亦都係包括我哋會監管，特別係呢一個工程部同埋工程同埋  
2 巴士嘅標準，呢啲一切都係包喺呢一個巴士基建個定義之內。

3 MR DUNCAN：（經傳譯員）呢個亦都有涵蓋巴士安全嘅？

4 MR MIKE WESTON：（經傳譯員）冇嘅，冇直接關係嘅，我亦都係負責基建嘅安  
5 全，譬如話係巴士站係安全，同埋監察相關嘅事宜，喺 2003 年我係巴士營運嘅  
6 主管，當時我就係負責呢個倫敦巴士網絡嘅安全，去到 04 年。喺作為巴士基建  
7 主管，我都有啲安全都係有一定嘅責任嘅，但係係巴士整體嘅網絡嘅營運嘅安  
8 全，我就係 2003 年先至開始做嘅。

9 MR DUNCAN：（經傳譯員）當其時你就係話係巴士營運部嘅主管嘅？

10 MR MIKE WESTON：（經傳譯員）冇錯。

11 MR DUNCAN：（經傳譯員）然後營運總監，你頭先就講過，喺成個管理層之中，呢  
12 一個係倫敦運輸局，究竟呢個營運總監個位置係點呢？

13 MR MIKE WESTON：（經傳譯員）當其時就一共係三個總監嘅，就係負責就係倫敦  
14 運輸局嘅，我自己就係營運總監。就係譬如話巴士合約方面同埋另外一個財務  
15 嘅總監，佢就係負責財務個方面。我哋就係係向董事總經理去負責嘅，亦都係  
16 除咗係倫敦巴士之外，其實都係倫敦運輸局之外，其他嘅交通運輸其實亦都係  
17 有負責嘅，我哋都係向呢一個運輸部主管——運輸部部長負責。

18 MR DUNCAN：Then, in 2013, you were appointed director of buses.  
19 How did that position relate to your previous position as  
20 operations director?

21 MR MIKE WESTON：（經傳譯員）呢一個 2013 年嘅時候，我哋就決定就係將兩個總  
22 監就合併咗，就變成一個巴士部總監，佢亦都係負責呢個巴士嘅網絡，亦都係  
23 向呢個董事總經理去負責，當然佢亦都有其他嘅責任，包括係其他嘅服務。巴  
24 士部總監都係每日嘅呢一個巴士嘅網絡嘅營運係需要負責，同埋係相關嘅合約  
25 嘅事宜，每一年個個去購買呢個巴士網絡大概係 20 億嘅英磅嘅，個財政。

26 MR DUNCAN：（經傳譯員）你喺第二段你就講過，你亦都係話負責就係提供一個安  
27 全嘅網絡嘅？

28 MR MIKE WESTON：（經傳譯員）係，冇錯。正如我頭先所講，我作為巴士部總  
29 監，我起初個時就係都會負責呢個安全團隊嘅，但係巴士部總監就係一個更加  
30 高層嘅職位，我就負責就係確保成個嘅巴士嘅網絡係安全營運嘅。

31 MR DUNCAN：（經傳譯員）你係 2016 年離開個機構，9 月嘅，之後你就係作為一個  
32 嘅獨立顧問去工作，你可唔可以話畀我哋聽呢一個獨立顧問嘅工作係乜嘢呢？

33 MR MIKE WESTON：（經傳譯員）我就 2016 年離開，三十一年喺個度服務之後，我  
34 就作為一個獨立顧問喇後來，我就主要都係巴士業嘅工作，主要係有兩點，一

1 個就係關於環保管理，特別係巴士車隊嗰方面，因為其實喺呢方面我都係經驗  
2 係好豐富嘅，喺倫敦運輸局做咗咁多年。另外就係巴士嗰個網絡嘅設計同埋呢  
3 個專營服務，我哋喺歐洲嘅運輸局當局，我都有同佢哋合作嘅。

4 MR DUNCAN：（經傳譯員）好，唔該晒。我就請你返番去第 118 頁，就係你個報告  
5 裏面嘅。我哋就睇番你係寫呢一個嘅報告嘅背景，我好快咁讀一讀，就喺呢一  
6 頁裏面嘅一啲嘅段落，第 1 點就係話呢個係我哋嘅委員會請你寫嘅報告，希望  
7 就更加了解就係呢一個倫敦巴士個專營服務系統同埋就係睇下有啲咩嘢良好嘅  
8 作法係可以令到香港可以繼續改善我哋嘅做法。我哋其實委員會就已經係睇過  
9 呢一個倫敦運輸局喺 2015 年 8 月嘅時候嘅報告，叫做倫敦巴士合約及呢一個嘅  
10 招標過程嘅。

11 然後繼續睇落去，你就有講到，呢度個報告就係有關於呢個規管同埋呢個  
12 管治嗰方面，特別係倫敦巴士嘅營運同埋管理方面，同埋係我哋亦都係要求就  
13 睇下--你睇下香港個專營巴士嗰方面嘅情況。同埋睇番 (i) 同 (ii) 之間嘅分  
14 別，你就係畀咗啲意見。就睇下香港嘅制度其實係咪是否足夠同埋良好同埋係  
15 提供建議，就可以改善香港專營服務同埋安全方面。

16 最後畀嗰段就係就「報告第 2 至第 5 段就係睇番倫敦嘅公共運輸服務，亦  
17 都解釋咗英國巴士業嘅歷史同埋結構，同埋就係睇下嗰個巴士嘅合約制度係點  
18 樣做同埋點樣監察。第 6 段就係講到嗰個安全管理。而第 7 個部分就係講到就  
19 係而家目前嗰個巴士安全計劃底下嗰個合約巴士營運商係點樣做。第 8 個部分  
20 就係講到作者對於呢一個嘅倫敦巴士嘅服務嘅觀察同埋相關嘅服務點樣可以幫  
21 助改善香港嘅制度。」

22 你就講到就兩個嘅制度係有啲嘅分別嘅，即係倫敦同埋香港嘅制度，就係  
23 令我哋明白有點樣唔同呢，或者我哋睇一睇，我以下所講，然後我哋再進一步  
24 去探討，第 120 頁，你嘅報告第 120 頁，我哋睇到就係呢個乘客嘅人次，喺倫  
25 敦，22 億嘅，呢個係 22 億人次嘅，喺巴士方面，喺香港，我就話畀你聽大概  
26 係幾多，就唔睇嗰個文件，呢個運房局，THB 第 2 個文件夾 103，就喺香港嘅  
27 乘客人次就係 14 億人次，所以呢個就係同呢個人次方面嘅比較。

28 第二個嘅比較，我想特別提一提就係兩個地方嘅人口，有幾多比例係用公  
29 交嘅，我唔肯定你有冇睇過，我哋睇 THB-2 文件冊第 2 頁，喺嗰個註腳，呢個  
30 係公交策略，就係由運房局進行嘅，係舊年 6 月進行嘅個研究，我哋睇番嗰個  
31 嘅註腳，喺頁裏面。喺新加坡嘅相關嘅機構，運輸局，2014 年 11 月做嘅研  
32 究，就係香港使用公交嘅比例喺二十七個城市係最高嘅。

33 喺第 2 點，喺香港嚟講，就係睇到係百分之九十嘅，係相比倫敦就係百分  
34 之三十嘅啫，喺第 1.4 段你睇到呢個百分之九十嘅數字，呢個講公交就係同香  
35 港市民嘅日常生活息息相關，每一日就係有一千二萬嘅人次，呢個等如就係呢  
36 一個百分之九十嘅，喺世界嚟講，係首屈一指嘅。我就希望特別係提出呢一  
37 點。

1 第三點我特別想提到嘅，就係話啲巴士嘅比例，就巴士嘅比例相對於成個  
2 公交個使用嘅比例，你就自己都有講到嘅，喺呢一點上面，喺第 120 頁，我就  
3 睇到係百分之五十六嘅，喺我個筆記係咁寫，但係我就要再搞清楚。

4 喺香港，我哋就喺 THB-2 個文件夾第 103 頁，我哋睇到香港嘅情況，呢  
5 一個專營巴士第 2 項，就係佔百分之三十一點一嘅，係重鐵，重型鐵路，就係  
6 講緊港鐵，就係百分之三十八點九，所以喺重鐵方面，個佔嘅比例係較高嘅。

7 主席：（經傳譯員）好明顯，呢個就係香港嘅數字嚟嘅，對於我嚟講，我都記得係咁  
8 樣嘅，你所講嘅就係話喺專營巴士喺倫敦個佔嘅公交個使用率嘅比例其實就  
9 係點樣呢？或者 Weston 先生可以講一講。

10 MR DUNCAN：（經傳譯員）或者 Weston 先生，你而家有冇呢方面嘅資料呢？

11 MR MIKE WESTON：（經傳譯員）我而家要係自己係計一計嘅，因為我哋講 22 億人  
12 次，就係 40 億嘅總數，所以應該係超過百分之五十，可能百分之五十六嘅。

13 主席：（經傳譯員）係喇。

14 MR DUNCAN：（經傳譯員）呢個係喺呢一頁裏面？

15 MR MIKE WESTON：（經傳譯員）係。其實呢兩個表格都係可以去比較嘅，喺倫敦  
16 其實都有啲呢一個河上面嘅交通工具嘅，所以有少少就未必係完全直接比較得  
17 到。

18 MR DUNCAN：（經傳譯員）第四個不同之處就係巴士嘅數目，第 126 頁你有提到個  
19 數字，你個個巴隊嘅數字，2018 年係有九千二百架巴士嘅，喺香港係幾多呢？  
20 THB-1 號文件冊，第 30 頁嘅第 7 段，喺香港嚟講，就係大概六千部巴士。

21 另外一個我哋唔同嘅地方，就係我哋每一年巴士個個行嘅里數，喺倫敦，  
22 喺第 120 頁，我哋睇到呢個數字，喺呢個表格嘅下底，2017 至 2018 年，就呢  
23 個講到係 4 億 9 千萬嘅公里嘅，係呢個巴士網絡方面。

24 喺香港嘅相應嘅數字，我請佢哋睇一睇 THB-1 號文件冊第 30 頁第 7 段  
25 嘅，我哋乘一乘，我哋得出嘅數字同倫敦係差唔多嘅，就係 5 億公里嘅，有六  
26 千架專營巴士每日，而平均嚟講，專營巴士每日係行走超過 140 萬公里嘅。

27 呢啲數字係好有趣，每架巴士、每個地方、每年嘅行車公里就有一啲數  
28 字，如果係倫敦嘅話，如果將 4 億 9 千萬除九千二百架巴士，我哋就會得出大  
29 概 53,000 公里，每架巴士每年行走嘅距離。而香港嘅話，如果將 5 億公里除  
30 以六千架巴士，大概就係 83,300 公里嘅每架巴士每年行走。

31 我哋而家講下一啲數字以外嘅事情，我哋睇下巴士公司嘅合約，喺倫敦，  
32 你就講到倫敦嘅巴士合約期一般係五年，然後係可以續期兩年嘅，呢個就係  
33 129 頁最後一段係有提到嘅。喺香港嚟講，我就想大家睇下 TD-1 文件冊第 73  
34 頁第 4 段同埋 TD-1 文件冊第 74 頁嘅第 8 段，我哋嘅專營合約期就係十年，可

1 以透過申請，再延期五年或者兩年嘅，視乎係幾時作出呢一個續期嘅申請。

2 Weston 先生，我就想問一個問題，就係關於倫敦嘅專營巴士服務同埋合  
3 約嘅，就五年合約期，然後可以續期兩年，巴士公司一般嚟講，係咪都即係喺  
4 七年之後可以繼續經營一樣嘅路線呢，定係未必係一定會自動畀番啲條--即係  
5 一樣嘅路線佢呢？

6 MR MIKE WESTON：（經傳譯員）五年再過兩年之後，就會再有一個投標或者招標  
7 嘅過程，當初間巴士公司可以攞到一條路線，可能因為佢哋有個車廠或者其他  
8 原因，但係招標之後，佢哋就要同其他嘅經營商係去競爭，亦都係要視乎當時  
9 市場嘅情況，一啲其他嘅公司可能會--即係以前可能失去咗一啲路線，佢哋可  
10 能想去爭番返嚟，我就有啲個啲數字响手，但係就係大概有七成嘅巴士公司會  
11 攞番相同嘅路線嘅。

12 MR DUNCAN：（經傳譯員）而我就想同你講另一個問題，就係喺倫敦嘅交通網絡經  
13 營嘅巴士公司，就想你睇第 126 頁，就係報告嘅 126 頁，呢度就講到呢個市場  
14 由六個主要嘅巴士集團係壟斷嘅，而餘下嘅百分之五點六就係由其他比較細嘅  
15 公司去營運嘅。

16 正如你所知，喺香港，專營巴士商包括有三個集團嘅，可以咁講，香港市  
17 民係知道九巴同城巴之間嘅分別嘅。喺倫敦嘅巴士網絡嚟講，市民知唔知道唔  
18 同巴士公司之間嘅分別呢？

19 MR MIKE WESTON：（經傳譯員）有一啲市民會知道佢哋嘅巴士可能係由某個營運  
20 商去經營，喺呢方面，香港同倫敦係好唔同，因為倫敦所有嘅巴士都係紅色  
21 嘅，同埋亦都係有呢一個倫敦運輸局巴士嘅標誌，亦都係有巴士公司嘅標誌，  
22 但係對市民嚟講，佢哋見到嘅巴士全部都係紅色同埋都係由倫敦運輸局去營運  
23 嘅，如果你問倫敦嘅市民究竟邊個負責係經營呢，佢可能會話係倫敦運輸局，  
24 而有一啲市民可能知道係由唔同嘅公司去營運，但係佢哋而家知道呢一個即係  
25 所有嘅公司都係為運輸當局服務嘅，因為佢哋嘅車費亦都係畀呢個交通當局  
26 嘅。

27 MR DUNCAN：（經傳譯員）所以一般市民都會覺得架巴士係由倫敦運輸局營運，而  
28 唔係由一間公司譬如話捷達集團營運嘅？

29 MR MIKE WESTON：Yes, that's correct.

30 主席：（經傳譯員）呢啲巴士公司嘅標誌都會印咗喺個巴士嘅車身，係咪？

31 MR MIKE WESTON：（經傳譯員）係，亦都係會有倫敦運輸局嘅標誌，但係正如我  
32 所講，呢啲巴士全部都係紅色嘅，所以對大部分市民嚟講，佢哋似乎都係一樣  
33 嘅。

34 主席：（經傳譯員）以前唔同嘅巴士公司係咪有唔同嘅車身嘅顏色或者圖案呢？

1 MR MIKE WESTON: (經傳譯員) 喺 80 年代中去到 90 年代初, 當時嘅私人營運商  
2 就係同倫敦運輸局自己嘅公司去競爭, 當時佢哋可以有自己嘅車身圖案, 當時  
3 主要嘅兩個原因就係第一, 話畀市民知啲服務係改善緊, 其中一個方法就係畀  
4 一啲新嘅營運商係有唔同嘅車身設計; 而第二個原因就係話畀工會知道啲事情  
5 係改變緊或者改善緊, 服務係由公營係走向私營, 所以呢兩個就係主要嘅原因。  
6 喺 90 年代初, 以一個市場推廣嘅角度, 有一個統一嘅車身顏色係有利嘅,  
7 而當時市民亦都係接受㗎。

8 MR DUNCAN: (經傳譯員) 我而家想講另一個主要嘅分別, 喺倫敦同香港之間嘅分  
9 別, 呢個就係合約制度嘅分別, 呢個就係就住巴士公司嘅合約制度。喺香港專  
10 營服務嘅合約係可以商議嘅, 根據你嘅報告, 喺倫敦, 你就係有一個以路線為  
11 本嘅競價招標制度, 我就想問一啲問題, 就係關於倫敦嘅制度, 我想請你睇下  
12 第 124 頁, 第 3.3 段嘅頭啲幾段, 我哋就可以睇到倫敦個系統或者制度係點  
13 運作嘅, 你就話「我哋係應該了解倫敦嘅合約制度, 先可以了解倫敦運輸局同  
14 埋巴士公司嘅安全管理係點樣可以融合喺呢個制度入面嘅。而一啲個別巴士路  
15 線嘅競價投標制度就係由運輸當局, 亦即係倫敦運輸局係管理同埋係控制嘅,  
16 呢個就係由 1985 年開始嘅一項倫敦嘅政策嚟嘅。

17 1985 年就開始就就住巴士路線進行招標, 而整體就會係批出一啲五年嘅合  
18 約, 而巴士公司如果係符合某啲嘅表現嘅目標, 係可以有兩年嘅續期, 而一啲  
19 成本合約就係由倫敦運輸局就係用呢一類嘅合約。

20 根據行車嘅里數, 巴士公司係可以有一啲嘅獎賞或者係扣減, 就係就住佢  
21 哋服務嘅可以靠程度嘅, 而倫敦運輸局係會保留一啲乘客嘅或者客務嘅收入,  
22 就如果需要係改善一啲巴士服務或者安全, 就係會由倫敦運輸局, 而唔係巴士  
23 公司去支付嘅。」呢個就係一啲巴士服務嘅演變。

24 我想你睇下最後一段嘅, 就係「1994 年-其餘嘅巴士路線都係已經納入㗎  
25 一啲協議嘅合約, 而公營嘅公司亦都係已經私有化, 而所有嘅巴士服務都係由  
26 私人運作, 而係由倫敦運輸局進行招標同埋管理嘅。」

27 而家喺倫敦係咪有一啲協商嘅合約, 定係所有服務都係經呢一個競價嘅招  
28 標完成呢?

29 MR MIKE WESTON: (經傳譯員) 唔係嘅。我想澄清一下 94 年嘅情況, 根據報告,  
30 喺到 93 年, 網絡嘅五成路線已經係經呢一個競價嘅招標係批出, 而有四成就係  
31 批㗎畀私人公司, 因為當時政府係希望將公營嘅巴士公司私有化, 然後將佢納  
32 入私人市場, 所以係必須將餘下嘅巴士路線--即係當時係倫敦運輸局係提供資  
33 助, 而當時係要將佢哋納入某一啲嘅合約, 而一啲餘下嘅路線就必須要納入一  
34 啲協議嘅合約, 但係報告有講嘅, 就係呢一啲嘅合約係有時限嘅, 所以呢啲巴  
35 士公司佢哋可能係有一啲合約係贏番嚟, 亦都有一啲係經協議得番嚟嘅, 但係  
36 佢哋亦都知道四年半或者五年之後嗰條巴士路線就要進行一個競價嘅招標, 所  
37 以當時嘅目標就係私有化, 而嗰啲合約經過某個年份或者期限之後都係要進行

1 招標嘅。大概五年之後，所有嘅合約都係要進行第一輪嘅招標。

2 主席：（經傳譯員）換句話講，98 或者 99 年所有嘅路線都係以一個招標嘅形式營  
3 運，係咪？

4 MR MIKE WESTON：（經傳譯員）係，大概係咁。

5 MR DUNCAN：（經傳譯員）唔該晒。我哋睇番 125 頁嘅第二段，第二行就講到係有  
6 一啲額外嘅獎賞或者係扣減，就係根據巴士服務嘅可靠性嘅，如果你睇番第  
7 131 頁，呢度就係有多啲嘅詳情，即係呢一啲嘅獎賞同埋扣減係點樣運作嘅。  
8 喺 4.3.3 段就係講到，係咪呀？

9 MR MIKE WESTON：（經傳譯員）冇錯，呢個就係同表現掛鈎嘅合約，係根據呢一  
10 個可靠性嘅表現，就係有一啲嘅獎賞嘅。

11 MR DUNCAN：（經傳譯員）呢度就係睇到考慮到一啲嘅獎賞，就係講到呢一個額外  
12 嘅等候時間，呢個就係其中一項服務指標嚟嘅，你提到，喺第一段尾就係「呢  
13 一啲嘅獎賞或者係扣減可能係介乎正百分之十五或者係負百分之十，目標就係  
14 鼓勵巴士公司係去更加著重服務嘅可靠性嘅。」就住呢啲獎賞或者扣減嚟講，  
15 有冇考慮到安全呢？

16 MR MIKE WESTON：（經傳譯員）冇嘅，呢一啲嘅獎賞就係合約價格嘅百分之正十  
17 五或者係負百分之十，呢個就係同可靠程度係掛鈎，包括就係呢一個額外嘅等  
18 候時間同埋巴士係咪準時等等。所以呢一啲嘅獎賞只係同巴士公司嘅可靠程度  
19 有關嘅，佢哋嘅服務。

20 MR DUNCAN：（經傳譯員）我想你睇第 127 頁。

21 主席：（經傳譯員）首先，巴士公司如果表現好，係可以得到高達百分之十五嘅獎  
22 賞，相反，可能係會扣百分之十，呢一點對巴士公司係——即係喺財務角度，對  
23 佢哋重唔重要呢？

24 MR MIKE WESTON：（經傳譯員）冇錯，喺一個財務角度，即係好難可以擺足百分  
25 之十五嘅，因為佢哋嘅服務係幾乎要完美，相反——即係同樣，扣百分之十亦都  
26 係好少見嘅，所以通常嗰個獎賞都係百分之五至八，即係合約價格嘅百分之五  
27 至八，以一個全年嚟講，嗰個銀碼都係唔細嘅。即係好多嘅倫敦巴士公司佢係  
28 可以透過呢個獎賞得到多啲嘅收益嘅，所以呢個制度好有效地可以鼓勵到巴士  
29 公司。

30 MR DUNCAN：（經傳譯員）可唔可以同我哋講一講最高嗰個嘅合約價格係幾多呢？  
31 我相信對於嗰啲長嘅路線咁講。

32 MR MIKE WESTON：（經傳譯員）對於巴士路線，一啲長嘅巴士路線，就有成六  
33 十輛巴士嘅，根據合約價格去到就一年係 2 千萬鎊，個成本都幾高嘅。

34 主席：（經傳譯員）個合約就係承辦商就會係花 2 千萬鎊，而呢個倫敦運輸局就會支

1 付呢個費用，就唔計嗰啲獎金，係咪？

2 MR MIKE WESTON：（經傳譯員）其實呢個支付嘅制度嗰個合約價格就會係分開嗰  
3 個里數同埋就住嗰個里數就會支付呢個咁嘅費用，其實就佢哋如果係唔能夠運  
4 作呢啲嘅里數，佢哋就得唔到嗰個嘅支付嘅費用，譬如話佢哋冇嗰啲司機或者  
5 係有一啲巴士或者有機件故障咁樣，做唔到呢啲里數，佢哋就喺嗰個合約價格  
6 嗰度損失咗呢啲嘅費用㗎喇，但係嗰個扣減就唔係咁高嘅，百分之三點四嘅，  
7 機件故意嘅問題，其實嗰個扣減--對於里數扣減唔係咁高嘅。

8 由於一啲佢哋不能控制嘅理由，做唔到呢啲里數，譬如話係交通阻塞、改  
9 道或者係一啲計劃、冇計劃嘅事項咁樣，嗰度佢哋都係喺佢哋嘅可控嘅範圍，  
10 其實呢啲咁嘅獎金其實就係獎勵佢哋嘅服務嘅可靠性嘅，個合約嘅費用就係根  
11 據嗰個數量同埋質量，同埋亦都係根據佢哋嗰個係咪可靠，嚟到去畀額外嘅獎  
12 金嘅。

13 主席：（經傳譯員）或者清晰啲，畀個例子，可唔可以畀啲例子我哋呢？

14 MR MIKE WESTON：（經傳譯員）或者我用一啲簡單嘅數字嚟到去講，一個合約成  
15 本，1,000 鎊咁樣，佢哋應該就係有 100 里嘅路程嘅，佢哋就如果做唔到，就  
16 係會損失 10 鎊一里咁樣，好簡單嘅例子就係咁樣，咁顯然如果嗰啲服務係好過  
17 呢一個過長嘅等候時間嘅情況，佢哋可以就係得到呢個去到百分之十五嘅獎勵  
18 嘅，正如我所講，百分之十五呢個獎勵其實都好難做得到嘅，通常就係百分之  
19 八嘅，對於嗰個服務可靠性。

20 主席：（經傳譯員）要避免扣減損失嗰個里數，最緊要嘅就係巴士有一個良好嘅維  
21 修、保養同埋有足夠嘅人數，係咪？係咪好簡單咁嘅觀點？

22 MR MIKE WESTON：（經傳譯員）係，你確保要每日係有足夠嘅車長，所以就係好  
23 多廠房都有一啲後備嘅車長喺度嘅，有一啲車長都可能返唔到工、病咗咁樣，  
24 佢哋就有足夠嘅車長，亦都係有足夠嘅車嚟到去調配，亦都需要有一個足夠嘅  
25 保養嘅計劃，足夠嘅車輛等佢哋可以係維持到個服務嘅。

26 但係公平咁講，倫敦嗰度嘅招標制度就好成熟㗎喇，由於人手或者機件問  
27 題係損失嗰啲里數嘅情況，嗰個情況都唔係咁高嘅，因為佢哋喺管理嗰方面都  
28 係幾成熟㗎喇。

29 主席：（經傳譯員）呢個係因為經驗，係咪呀？喺巴士運作嗰方面，佢哋係知道需要  
30 有一定嘅額外嘅剩餘嘅能力咁樣，所以就唔會造成呢啲問題，係咪？

31 MR MIKE WESTON：（經傳譯員）係嘅。

32 羅先生：（經傳譯員）喺運作嘅制度嘅時候，喺每一個巴士到站嘅時間嗰度，係咪都  
33 要規管？

34 MR MIKE WESTON：（經傳譯員）係，佢哋就係計嗰個到站嘅時間，通常就會係

1 有一啲嘅調查，有一啲嘅站長就會喺路上面就記錄晒--呢啲係倫敦運輸局嘅自  
2 己嘅視察人員，佢哋就會係記錄晒有關嘅資料，個數據就用嚟計算嗰個超--即  
3 係過長嘅候車時間嘅，呢個係解釋咗嗰個過長嘅輪候時間係點樣，咁其實佢哋  
4 係量度嗰啲高班次嘅一啲嘅服務，佢哋就會計嗰個嘅過長嘅時間，譬如話十分  
5 鐘一班嘅車咁樣，佢一定就--乘客就會係不斷咁嚟到嗰個巴士站，佢哋有一個  
6 時間表，如果嗰個十分鐘嗰個班次係冇問題嘅話，佢哋可能會等五至十分鐘，  
7 佢哋可能嚟到係走咗架巴士，係等十分鐘就會有架巴士嚟㗎喇，咁可能就係有  
8 啲就等五分鐘，有啲可能係一嚟就有巴士，通常就係等五分鐘嘅，其實嗰個即  
9 係過長嘅候車時間就用呢個方法嚟到計算出嚟嘅，某一啲嘅路線嗰個標準嘅標  
10 準就係一分鐘、一點五分鐘嘅過長嘅候車時間咁樣。

11 過去都係人手咁嚟到積累嗰啲數據，而家基本上都係自動咁樣係透過呢個  
12 系統嚟到去計出嚟㗎喇，其實我哋嘅數據就係根據個巴士嚟到去計嘅。

13 羅先生：（經傳譯員）好，跟進呢個問題，你話就係有幾個因素，交通嘅擠塞，呢個  
14 唔會扣減嘅，嗰個係點樣計嗰個交通擠塞嗰個因素呢？

15 MR MIKE WESTON：Sorry？

16 羅先生：（經傳譯員）你提到有四個因素係佢哋控制唔到嘅，譬如話係一啲交通擠  
17 塞，呢啲因素就唔會係導致有費用嘅扣減嘅，其實喺呢度計數嘅時候，點樣計  
18 嗰個交通擠塞㗎？

19 MR MIKE WESTON：（經傳譯員）對於交通擠塞，當佢哋係入標嘅時候，佢哋預計  
20 就會係有個時間表，有個行車嘅時間表，運輸局就會係考慮佢哋嗰個服務係點  
21 樣，同埋係訂定嗰個嘅路線，承辦商就需要就制定一套嘅運作嘅時間表，決定  
22 有幾多巴士係調配出嚟咁樣，佢哋就需要設計一個嘅時間表嚟到應付一般嘅日  
23 子嘅擠塞情況嘅。

24 喺極端嘅情況，我而家諗緊一個例子畀大家參考，譬如話喺倫敦中部有示  
25 威、有恐襲咁樣，就亦都會中斷咗好多嘅巴士嘅服務嘅，運輸局就會係避免喺  
26 呢啲日子，喺計算嘅時候就唔計呢啲日子落去嘅，呢啲係極端嘅例子，係好清  
27 楚營運商就唔可以預計呢啲咁嘅情況，亦都唔可以喺呢啲情況底下運作佢哋嘅  
28 服務嘅，所以我哋就唔計呢啲日子落去嘅。

29 主席：（經傳譯員）呢個譬如話係爆水管，喺 Dartford 隧道嗰度係有車著火又唔  
30 計，係咪呢？

31 MR MIKE WESTON：（經傳譯員）係，有一啲地方嘅情況，佢哋就會避咗呢啲嘅日  
32 子，我相信我係--當時 2005 年 7 月就係喺巴士受襲嘅時候，我當時都係管理  
33 呢啲巴士嘅，佢哋都係唔計呢啲咁嘅日子嘅，因為其實都唔應該係咁樣嚟到去  
34 計呢啲日子，計埋落去嘅，嚟到去懲罰嗰啲營辦商嘅。某一啲嘅路線可以扣番  
35 出嚟唔計嘅。

1 MR DUNCAN：（經傳譯員）好喇，睇番 127 頁，Weston 先生，請你睇 127 頁，  
2 4.1 嗰度就有講到嗰個合約嘅責任，或者好簡單咁樣係濃縮一下，總括四點出  
3 嚟，你確定咗就係話即係唔係咁樣嘅，你就話番畀我知，首先，就運輸局就會  
4 係招標，對於某路線就進行招標，跟住就佢哋就會--入標者就會訂定嗰個合約  
5 價格，對於嗰啲路線，第三，運輸局就會係保留所有嘅票價嘅收，咁就睇嗰個  
6 乘客嘅量嚟到去支付個費用，然後運輸局就會係支付嗰個合約嘅價格畀嗰個營  
7 辦商嘅，根據你正話所講嘅情況嚟到去做喇。好簡單講，係咪總括咗個情況  
8 呢？

9 MR MIKE WESTON：（經傳譯員）係嘅，呢個總括得非常之清晰嘅。

10 MR DUNCAN：（經傳譯員）好喇，喺招標嘅路線，其實係邊個決定嗰啲路線㗎？同  
11 埋有啲咩嘢因素係需要考慮嚟到決定一條新嘅路線或者係取消一啲舊嘅路線  
12 呢？

13 MR MIKE WESTON：（經傳譯員）係路線規劃嗰方面其實就係倫敦運輸局做嘅，佢  
14 哋係有一個服務計劃嘅指引，係高層次嘅一啲指引，呢個就係照顧到嗰個巴士  
15 嘅訴求咁樣，其實有人係--喺巴士站嘅提供方面，有人會超過係 400 公里咁遠  
16 嘅。

17 當然有其他嘅指引嚟度，但係要提供一啲全面嘅服務，一個星期有七日有  
18 呢啲嘅巴士服務，就係早上、夜晚都有咁樣，其實都係包括晒所有對巴士服務  
19 嘅訴求，呢個係運輸局做嘅，佢哋就會決定究竟提供邊啲嘅服務、減少邊啲嘅  
20 服務，有啲就係根據嗰個量，乘客量，有啲就係根據就係同其他嘅機構一齊磋  
21 商，睇下需唔需要作出調整呀咁樣。

22 譬如話有新嘅鐵路路線係明年通車喇咁樣，就係呢個伊利沙伯線，即係嗰  
23 個橫貫嗰條嘅鐵路，就會有好多嘅容量，有啲巴士嘅路線喺倫敦中部就會係損  
24 失咗乘客，佢哋就會係喺線鐵開通嘅時候就會調節，有啲會加，有啲會減，確  
25 保就係會有一個有效嘅運作嚟到提供嗰個服務嘅。

26 MR DUNCAN：（經傳譯員）呢方面係咪包括同巴士營運商大家磋商呢，還是就淨係  
27 呢一個運輸局自己作出呢個決定嘅呢？

28 MR MIKE WESTON：（經傳譯員）當時同巴士公司的確係有對話嘅，亦都係一個中  
29 央--唔係單係中央規定，運輸局就會係磋商地區嘅當局，同埋有關嘅持份者、  
30 公眾人士咁樣，運輸局的確係需要啲諮詢，然後先至係作出任何嘅更改嘅。我  
31 哋會有同巴士公司有對話，就可以話係一啲磋商、一啲諮詢咁樣。

32 MR DUNCAN：（經傳譯員）剛才你提到就話係有一啲嘅訴求，照顧一啲訴求，一般  
33 人就喺居住嘅地點都應該係有巴士服務提供畀佢哋咁樣，假定某一個路線係  
34 無利可圖嘅，咁會唔會係都繼續落去係照顧有關嘅意願呢？

35 MR MIKE WESTON：（經傳譯員）係嘅，其實要決定一啲服務嘅改變，咁就根據呢

1 個成本效益嘅角度嚟到睇嘅，我哋就睇嗰個巴士嘅網絡，如果你睇嗰個補貼，  
2 你每花一鎊，就都需要係提供最大嘅乘客嘅利益，任何嘅改變都係要睇嗰個成  
3 本效益嗰方面嘅角度嚟到去睇，等乘客係有一定嘅利益，睇下係咪能夠係每一  
4 鎊都使得物有所值嘅。

5 當然嗰個巴士路線嘅網絡係有補貼嘅，我哋倫敦運輸局嚟市長嘅指示底  
6 下，係可以有補貼底下嚟到提供服務嘅，就係營辦少啲利潤低嘅路線，或者係  
7 收費係收得高啲咁樣。其實嗰個網絡入面係有一定嘅補貼，呢個係一個市長  
8 本身嘅政治嘅決定嚟嘅。

9 主席：（經傳譯員）可以係用者自付嘅，係咪呀？即係可以係補貼，係咪呀？

10 MR MIKE WESTON：（經傳譯員）係嘅，响我報告當中有講其中一個重點，市長決  
11 定乘客嘅票價，就始終都係睇嗰個市長係咪改變嗰個嘅票價，呢方面對巴士個  
12 網絡嘅財政係有一定嘅影響，目前嘅市長佢就 16 年係當選嘅，喺佢嘅政綱入面  
13 作出咗一個承諾，就話係四年唔會加票價嘅。呢個好清楚就係對公眾人士、對  
14 乘客就係有一定嘅優惠，但係對呢一個運輸局未來四年嗰個財政有一定嘅影  
15 響。

16 主席：（經傳譯員）錢嚟邊度嚟呢？

17 MR MIKE WESTON：（經傳譯員）市長就係需要從其他嘅渠道係攞呢啲財政，譬如  
18 話係嗰個嘅稅收，佢哋會鼓勵呢個運輸局就更加提高嗰個效率，嚟到去減低個  
19 成本，所以有不同嘅五花八門嘅方法嚟到去減低個成本嘅。

20 主席：（經傳譯員）其實比例上嚟營運巴士--即係嗰個票價方面係佔咗個百分比係  
21 幾多呢？

22 MR MIKE WESTON：（經傳譯員）我睇下個數字有冇先。而家就係三分一嘅成本就  
23 係有補貼嘅，我睇番嗰個嘅數字，個筆記先。

24 主席：（經傳譯員）係，得。

25 MR MIKE WESTON：（經傳譯員）2016 年，七成嘅成本係乘客嘅收入嚟到去--嗰度  
26 嚟嘅，三成就係其他，呢個就係 2 千 600 萬，呢個每年個數字都唔同嘅，我報  
27 告當中，有講到 97/98 就係收支平衡嘅，嗰個票價係可以照顧到嗰個嘅運作。  
28 但係始終呢個係一個政治嘅決定，係市長嗰個嘅決定，就係佢其實嚟財政運作  
29 上係點樣處理嘅。

30 主席：（經傳譯員）票價係凍結四年，七成就本來話係票價可以照顧到，而家可能係  
31 跌到六成或者更低，係咪呀？

32 MR MIKE WESTON：（經傳譯員）除非嗰個乘客量係減低，估計可能會減低少少  
33 嘅。

34 MR DUNCAN：（經傳譯員）我諗你提到嗰個財政表現同埋有關嘅補貼，主席剛才都

1 提到呢個問題，喺 120 頁、121 頁嗰度，你睇到其實有講到嗰個財政嘅表現  
2 嘅，係咪？

3 MR MIKE WESTON：Mmm.

4 MR DUNCAN：（經傳譯員）120 頁最底嗰度，最後嗰句你就提到就 1997、98 年嘅  
5 時候，個網絡其實就係收支平衡，票價係可以支付到嗰個營運嘅費用，跟住你  
6 就講到市長喺 2000 年之後嘅做法，就係話 121 頁最頂嗰部分，同埋就係七成  
7 嘅收回成本，就喺第一段嗰度，喺 121 頁嗰度係有咁講嘅。

8 MR MIKE WESTON：（經傳譯員）係。

9 MR DUNCAN：（經傳譯員）好，2016 年、2017 年，補貼嗰個數量，睇嚟就係 6 億  
10 2 千 600 萬鎊嘅，就係 60 億港幣咁計喇。主席剛才問到你，就係你嗰個補貼嘅  
11 金額喺邊度嚟，係咪就係佢哋嘅嗰啲稅嘅方面呢？

12 MR MIKE WESTON：（經傳譯員）無論係商業機構或者係個人嘅畀稅嘅人士，佢哋  
13 都會係負擔，當然亦都有政府國家嘅補貼嘅，但係從明年開始，就事實上，三  
14 年之前政府就係話畀運輸局聽，其實就唔會再畀補貼佢哋，所以就只會係會畀  
15 營運者就資本嘅投入，就佢哋譬如話好似興建新嘅地下鐵路或者係改善站頭嘅  
16 設施等等。

17 所以運輸局喺過去兩、三年，就係從呢一個國家嘅運輸部就係有任何嘅補  
18 貼嘅，所以佢哋就要自己搵辦法，同埋就要去比較雷厲風行睇下點樣節省成  
19 本，令到成個營運嘅情況係可以改善，呢個係好大嘅挑戰。同時間，市長亦都  
20 係決定就係三至四年之內都唔會有一個--呢一個嘅津貼都係凍結嘅，所以其實  
21 會係因為喺嚟緊四年係呢一個合約價格就會隨住通脹增加，但係喺其他方面就  
22 係有增加嘅。

23 主席：（經傳譯員）中央政府個補貼嘅大概係幾多呢？

24 MR MIKE WESTON：（經傳譯員）當佢哋講話嚟緊三年成個補貼會凍嘅時候，大概  
25 係 6 億鎊嘅，佢哋決定就係三至四年就係減到零嘅。

26 主席：（經傳譯員）就係 6 億鎊就去到零嘅，...

27 MR MIKE WESTON：（經傳譯員）呢個其實都係一個好大嘅削減嚟，係呀，呢個係  
28 講緊津貼成個運輸局，就唔係單單係講巴士嘅。

29 主席：（經傳譯員）呢方面嘅津貼喺倫敦之外，其實有冇㗎？

30 MR MIKE WESTON：（經傳譯員）喺鐵路嚟講，有，巴士就有。就喺倫敦之外嘅地  
31 方，巴士服務其實就已經係放寬咗規管，已經唔規管㗎喇，所以任何人佢哋係  
32 被獲准係可以經營巴士呢，佢哋都係用商業去營運巴士，譬如好似係曼徹斯  
33 特、伯明翰等等，任何嘅營運商都係可以用商業原則去營運個巴士，當地嘅規  
34 管嘅機構就可能就譬如話係提供一啲缺乏嘅服務嘅。譬如話佢哋商業嚟講，佢

1 咁就會係禮拜一至到禮拜六就先至係營運，而政府當局就可以購買佢咁服務就  
2 係星期日去運作嘅。其實百分之九十嘅巴士服務其實係以商業形式嚟去運作  
3 嘅，而剩番個百分之十就係由當局政府去購買嚟提供服務。

4 喺倫敦以外嘅地方其實都有考慮緊會唔會有一啲嘅專營巴士服務，而家就  
5 探討緊，曼徹斯特特別就係諗緊就係從一個唔規管嘅環境就係去做到一個專營  
6 服務嘅方面。

7 主席：（經傳譯員）唔該晒。

8 MR DUNCAN：（經傳譯員）我哋睇番第 127 頁，呢度就係講到關於個合約個架構，  
9 去到 128 頁，4.2 就係講緊合約嘅週期，就有兩個嘅協議嘅，一個就係個框架  
10 協議，跟住根據第二個箭咀，就係講到一般嘅合約嘅要求，就特別係巴士營運  
11 商應該點樣遵守。另外就係一個路線嘅協議，裏面詳列咗係一啲特別嘅路線嘅  
12 要求，特別係一啲最低表現標準等等。你有冇你嘅資料之中提供一啲相關嘅  
13 例子呢？

14 MR MIKE WESTON：（經傳譯員）有。有關於路線協議嘅方面嘅，有個例子，對唔  
15 住，應該係框架協議嘅。

16 MR DUNCAN：（經傳譯員）我睇到嘅，第 189 頁嘅，係咪呀？係，冇錯。

17 MR MIKE WESTON：（經傳譯員）個路線協議就有一百六十頁嘅，每一個營運商都  
18 係要簽訂嘅，如果每一次佢哋去營辦一條路線，佢哋都係要簽呢個路線協議，  
19 裏面有好詳細嘅資料點樣營辦。

20 MR DUNCAN：（經傳譯員）第 129 頁第二段，...

21 主席：（經傳譯員）喺離開呢個題目之前，我哋睇一睇我哋 Stanley 教授有提過墨  
22 爾本嘅系統，裏面就關於一啲嘅認證嘅制度嘅，倫敦嘅制度有呢一個框架協  
23 議，有預審制度，呢個同墨爾本嘅情況係點樣對比呢，就關於認證嘅方面嘅？

24 MR MIKE WESTON：（經傳譯員）呢個預審制度就係實際上係審視呢個嘅公司就可  
25 唔可以成為一個嘅巴士服務供應商，我哋會睇番佢哋有冇政府機構嘅一個牌  
26 照，呢個唔係話呢個公司一定係會贏到呢個合約嘅，其實嗰個門蹕唔係太高  
27 嘅，你係有一個公司成立咗，你有啲經驗係提供巴士服務，嗰個門蹕係比較低  
28 嘅，因為倫敦運輸局希望能夠鼓勵各類一啲細嘅公司都可以成為個供應商，當  
29 然除咗有啲大嘅公司，譬如話其實佢哋可能係有啲細嘅公司佢哋係有--個車隊  
30 係十至十五部巴士嘅，佢哋都能夠可以係認可，希望能夠鼓勵更多嘅人就係可  
31 以參加招標個過程，然後我哋就可以決定究竟邊一間公司係能夠可以贏某一個  
32 嘅合約。

33 我唔會講呢個係一個認證嘅過程嚟嘅，我哋只係想希望有可能有潛力嘅公  
34 司佢哋係有基本嘅制度係可以提供巴士服務嘅。

1 主席：（經傳譯員）唔該晒。係，好。係，教授。

2 羅先生：（經傳譯員）會唔會包括佢哋係有一個車廠呢？

3 MR MIKE WESTON：（經傳譯員）冇嘅。你係唔需要有個車廠嘅，因為其實如果係  
4 咁，就會成為一個佢哋進入市場嘅障礙添，因為要設置一個車廠係一個好大概  
5 挑戰，譬如擺喺邊度。倫敦運輸局其實可能就會畀一間公司佢只係有二十部巴  
6 士，但係一個車廠好多時候都係需要一百五十部車先至能夠營運得成功嘅，所  
7 以你係唔需要有個車廠。但係如果你係一個嘅營運商，你就應該係有一個嘅車  
8 廠去支持你嘅，可能英國，或者呢個車廠係喺另外一個地方嘅。

9 MR DUNCAN：（經傳譯員）好，我哋睇番第 129 頁，你就提到關於評審嘅方面，關  
10 於個標書嘅評審，你就提到就會係佢哋嘅唔同範疇嘅表現，包括係安全表現，  
11 「呢個咁嘅方法就係可以讓到呢個運輸局就係睇清楚佢哋嘅表現情況，亦都讓  
12 到營運商佢有個誘因就係不停咁改善佢哋嘅服務。喺安全方面，亦都好似其他  
13 方面嘅表現一樣，都會係我哋考慮嘅，亦都會令到我哋係考慮究竟會唔會續約  
14 或者畀批新約佢。但係安全就唔係成為呢一個技術評審嘅一部分，但係成為一  
15 個『紅線』，其中一個例子就喺 2015 年，就有一個嘅合約商，因為佢哋嘅維修  
16 嘅呢個嘅標準唔達標，所以致使到佢哋失去咗好多嘅里數，因為嗰個器械嘅原  
17 因嘅問題，所以佢哋就有一個新嘅合約畀佢哋。」

18 你提到一個嘅紅線嘅問題，你可唔可以話畀我哋聽你點樣會超越咗嗰條嘅  
19 紅線呢？咩嘢為之超越嗰條紅線呢？

20 MR MIKE WESTON：（經傳譯員）紅線我哋就有一個定義嘅，就話乜嘢接受到或者  
21 乜嘢唔接受到。喺呢一個路線為本嘅招標嘅好處，相對於譬如話新加坡嘅專營  
22 嘅制度嘅好處就係話讓我哋運輸局就可以透過呢一個路線招標令到呢間公司就  
23 係個大細隨時可以有彈性增大或者係減細嘅。其實如果我哋係要終止合約，尤  
24 其是譬如話嘅四百或者或者四百五十部巴士嘅，係一個好大概嘅決定，對於我哋  
25 嚟講，成個巴士嘅服務係一個好大概嘅影響，同埋好明顯我哋就可以對於呢一個  
26 營運商，我哋--唔好嘅營運商呢，我哋就係唔批新嘅合約畀佢，就對佢哋嚟  
27 講，係一個好強嘅訊息，就係佢哋做得唔好。

28 所以呢條所謂嘅紅線就有清楚去界定嘅，或者定義係點樣，就我哋就希望  
29 就話我哋嚟招標嘅評審之中，我哋就會睇下清楚佢哋嘅服務質素同埋其他方面  
30 嘅表現，就係會畀分，同埋睇番啲安全嘅指標，睇下有冇問題。

31 呢度我舉咗個例子，呢度好清楚呢間公司嚟維修方面係做得唔好嘅，因為  
32 有好多嘅工程師都已經退休，佢哋好多做咗好多年嘅工程師都退咗休，佢哋就  
33 有預計到呢度咁嘅情況，亦都有做一啲嘅措施去培訓適合嘅維修人員；後來就  
34 有好多嘅機械嘅故障同埋有個好差嘅呢個工程質素嘅監測。所以因為咁樣嘅問  
35 題，我哋就決定佢哋係需要改善，喺呢段時間，我哋就有批新合約畀佢哋，喺  
36 呢段咁嘅時間，佢哋可能其實就失去咗四至五個合約，可能佢哋之前可能會可  
37 以贏到嘅，之後佢哋就係佢改善咗之後先至可以再入標。

1 所謂嘅呢一個紅線就係由我哋董事局同埋我哋嘅評審小組去決定嘅。

2 主席：（經傳譯員）你就頭先提個例子，關於個器械故障同埋就失去咗好多嘅里數  
3 同埋好差嘅工程嘅質素，其實呢啲你哋去表現監察嘅時候，你哋都已經睇到  
4 㗎喇，係咪呀？

5 MR MIKE WESTON：（經傳譯員）其實就佢失去咗好多嘅里數，同埋好多嘅路上  
6 機械故障嘅情況，所以佢哋就會扣減佢哋嗰筆款項嘅。

7 主席：（經傳譯員）我亦都係諗緊其實呢兩樣嘢同呢一個安全有咩嘢關係，係咪去到  
8 一個情況就係話嗰啲輾直情甩咗落嚟，然後係撞嚟人呢？

9 MR MIKE WESTON：（經傳譯員）冇，冇，冇，唔係咁。第一個嘅警示其實係就好—  
10 —就係通常都係機械故障嘅，即係講緊如果佢哋嗰個維修情況係好差。營運商好  
11 多時候都會確保安全都係好緊要嘅，因為倫敦運輸局會懲罰佢哋，就係唔會批  
12 新嘅合約畀佢哋，一啲國家嘅機構亦都係會做一啲監察安全嗰方面，如果有問  
13 題嘅時候，佢哋可能有公開聽證會等等，政府亦都會係有懲處嘅。

14 主席：（經傳譯員）其實呢個會唔會係一個潛在嘅安全嘅風險呢？因為呢個巴士成日  
15 都死火，佢因為佢維修不善，所以都會係一個可能嘅安全嘅危機㗎喇嗎？

16 MR MIKE WESTON：（經傳譯員）無論係運輸局或者營運商都會明白呢個都係一個  
17 問題㗎嘅，可能會真係會成為一個安全嘅危機，但係最後畀都有啲真係係安全  
18 方面出咗咩嘢問題，但係冇錯，係可能係一個安全危機㗎嘅。

19 MR DUNCAN：（經傳譯員）你就頭先講到就話呢一個有安全指標嘅，運輸局有冇一  
20 系列嘅一個清單嘅安全指標嘅呢？

21 MR MIKE WESTON：（經傳譯員）冇錯，係有一系列嘅安全指標嘅，目前營運商佢  
22 哋自己都有一啲安全表現嘅呢一個表現嘅指數，就四十一個嘅，我哋就會將呢  
23 啲所有嘢就考慮㗎一齊嘅時候，就睇番嗰個安全表現係點樣，實在譬如㗎呢一  
24 個嘅工程或者係機械方面，或者係呢個司機嘅安全等等，都係有一啲嘅安全嘅  
25 指標，我哋都會特別嘅監察。

26 主席：（經傳譯員）呢啲嘅安全指標係咪公眾人士可以參閱嘅呢，又或者係會不久將  
27 來會係公布呢？

28 MR MIKE WESTON：（經傳譯員）未目前為止其實都有公開嘅，但係好快我哋就會  
29 公開呢啲安全指標。

30 主席：（經傳譯員）㗎目前嚟講，或者係試行呢啲嘅安全指標嘅落實之前，其實而家  
31 有一啲咩嘢嘅安全嘅措施嘅呢？

32 MR MIKE WESTON：（經傳譯員）冇，有好多嘅監察，有好多分析趨勢等等，我哋  
33 會收集好多嘅數據同埋做好多嘅趨勢分析，有好多嘅比較、分析，就係譬如話  
34 個別嘅營運商會比較，運輸局會做好多嘅圖表，就睇下唔同嘅情況，譬如話同

1 行人個意外有咩嘢情況，呢啲嘅趨勢就會係我哋分析係一個網內嘅分析，亦  
2 都會係個別嘅營運商嚟分析嘅。而一啲巴士公司就會同其他嘅巴士公司係分享  
3 呢個數據，而佢哋之間都可以睇到大家之間嘅數據嘅，所以佢哋係可以比較佢  
4 哋嘅表現。

5 主席：（經傳譯員）呢啲數據喺網上係咪可以攞到嘅呢？

6 MR MIKE WESTON：（經傳譯員）倫敦運輸局係有發布兩類嘅數據，首先就係巴士  
7 網絡上面嘅任何意外，譬如話有人喺巴士上面跌低，即係踎低等等，每年--每  
8 一季都會係發布呢啲數據嘅。

9 主席：（經傳譯員）係咪即係全部嘅公司都會發布嘅呢，定係由個別去發布呢？

10 MR MIKE WESTON：（經傳譯員）就係有一份嘅圖表就係所有市民都可以睇到嘅，  
11 就係有一個嘅一覽表，你可以睇下倫敦唔同嘅郡或者唔同嘅巴士公司嘅表現，  
12 所以市民係可以係查詢呢啲資料嘅。

13 主席：（經傳譯員）所以就唔會話跟公司，譬如話 Abellio 公司就有多啲嘅人係噉  
14 到或者踎低？

15 MR MIKE WESTON：（經傳譯員）暫時唔係咁樣嘅。市民或者其他嘅機構可以自己  
16 去根據呢啲數據分析，而每一季都會有一個表現嘅一覽表嘅，即係就住巴士網  
17 絡嘅安全性，所以就睇到同上一季相比嘅表現。目前嚟講，就係一個網絡嘅層  
18 面去做嘅。

19 主席：（經傳譯員）呢個巴士網絡嘅數據包唔包傷亡數字呀？

20 MR MIKE WESTON：（經傳譯員）冇錯，係包括任何喺巴士網絡上發生嘅事件嘅。

21 主席：（經傳譯員）唔該晒。

22 MR DUNCAN：（經傳譯員）呢個數據嘅來源究竟喺邊度呢？邊個提供呢啲數據嘅  
23 呢？

24 MR MIKE WESTON：（經傳譯員）數據嘅主要來源就係巴士公司，佢哋就要將數據  
25 入一個中央嘅資料庫，即係一個報告嘅系統--匯報系統，而巴士公司亦要將佢  
26 哋嘅事故嘅數據係輸入呢一個系統，倫敦運輸局就會進行審核去確保啲巴士公  
27 司係正確咁樣去輸入呢啲資料嘅。而呢啲數據亦都係會同警方嘅數據係交叉去  
28 檢查，如果係一啲嚴重意外或者嚴重事故。而家就叫做 STATS19，就嚟會改名  
29 喇喇，而倫敦運輸局就會互相去檢查，去確保呢啲資料係正確。

30 譬如話喺巴士上有人絆倒或者踎低，警方係未必會統計嘅，但係呢個數據  
31 主要嘅來源就係個別嘅巴士公司，佢哋會將資料輸入一個中央資料庫。

32 主席：（經傳譯員）呢啲資料係咪公開㗎？

1 MR MIKE WESTON：（經傳譯員）冇錯，係會每季發布嘅。

2 主席：（經傳譯員）倫敦警方嘅網站有冇呢？

3 MR MIKE WESTON：（經傳譯員）可能係一個全國嘅網站上面睇得到嘅。

4 主席：（經傳譯員）倫敦嘅數據係可唔可以睇得到呢？

5 MR MIKE WESTON：（經傳譯員）你可以睇成個倫敦嘅數據，倫敦個別嘅郡或者係  
6 某啲嘅巴士公司或者甚至係車種嘅。

7 主席：（經傳譯員）你話警方嘅數據係會包括嚴重嘅事故，係咪包括所有嘅傷亡或者  
8 係死亡數字呢？而倫敦運輸局嘅資料庫係咪都會有？

9 MR MIKE WESTON：（經傳譯員）冇錯，呢啲嘅數據應該係脗合嘅，至於一啲輕微  
10 嘅受傷，因為可能警方係會有處理某啲呢啲輕微嘅受傷，所以輕微受傷嘅數字  
11 未必係脗合，但係一啲嚴重嘅傷亡應該係脗合嘅數據。

12 主席：（經傳譯員）係，唔該晒。

13 MR DUNCAN：（經傳譯員）請你攞去第 150 頁，你報告嘅第 150 頁，第 7.8 段，呢  
14 段就係關於倫敦運輸局嘅安全表現指標，呢個就係巴士安全計劃嘅一部分嚟  
15 嘅，你見唔見到？

16 MR MIKE WESTON：（經傳譯員）係，見到嘅。

17 MR DUNCAN：（經傳譯員）呢個就係咪主席所講嘅未經發布嘅安全表現指標呢？

18 MR MIKE WESTON：（經傳譯員）呢個就係其中一間巴士公司嘅建議，佢哋就喺 8  
19 月嘅時候向我哋簡介咗㗎喇，就有四十一項嘅建議，就得出一個安全表現嘅分  
20 數，有一啲嘅元素，包括係可能乘客噉倒或者跌低嘅數字，傷亡數字，司機嘅  
21 監察等等，呢啲就會得出一個標準，一個分數，個基準就係 80 分，然後就會係  
22 根據呢一個基準再去幫呢個巴士公司評分嘅。

23 如果你係遇上呢一個傷亡，有時未必係因為巴士公司嘅錯嘅，未必影響佢  
24 哋分數，所以有一個加權嘅系數，我哋嘅目標就係所有巴士公司都可以做得更  
25 加好、更加安全，所以我哋定咗一個安全表現嘅基準就係 80 分，然後你就會根  
26 據呢一個基線就盡量去改善你嘅分數同埋表現，所以呢個我哋計劃係會公布呢  
27 一個計劃嘅，但係暫時仲未。

28 主席：（經傳譯員）你話已經係向我哋解釋過，你係咪講緊我同你同埋一啲董事總經  
29 理，即係喺 8 月嘅會面？

30 MR MIKE WESTON：（經傳譯員）冇錯，佢哋係有睇過啲啲表嘅。

31 主席：（經傳譯員）呢個就係 Jon Pike 先生向我哋講過，佢就係安全及風險主管  
32 嘅？

1 MR MIKE WESTON：（經傳譯員）冇錯。

2 主席：（經傳譯員）呢個就係下個月中係會有嘅，係咪？

3 MR MIKE WESTON：（經傳譯員）冇錯。我諗佢哋喺 10 月中公布佢哋嘅安全計劃嘅  
4 時候，就會公布嘅。

5 MR DUNCAN：（經傳譯員）呢個對於嗰個處理安全嘅嗰個紅線嘅做法係會唔會有影  
6 響或者分別呢？而家就會有一個紅線嘅制度去決定會唔會同一間巴士公司續約  
7 或者畀新嘅路線佢。

8 MR MIKE WESTON：（經傳譯員）好難去形容會點樣去用嘅，如果你嘅分數係越嚟  
9 越差嘅話，我諗可能都會係--即係算係一條紅線嚟，即係可能反映你嘅表現係  
10 惡化緊。因為我哋係會睇好多嘅因素，如果喺任何一方面差咗，都會係反映喺  
11 個分數度嘅，所以如果你嘅分數係低咗，可能會係一個問題嚟嘅。

12 主席：（經傳譯員）點解係需要包括四十一個因素咁多呢？即係喺你計呢一個安全表  
13 現嘅分數嘅時候。

14 MR MIKE WESTON：（經傳譯員）正如報告所講，我哋係從呢一個鐵路業就係借  
15 鏡，即係得出呢一個制度嘅。我哋嘅原則就係個分數唔應該係受個別嘅事件影  
16 響，因為如果你一間大嘅巴士公司，有二千架巴士，你係會遇上一啲嘅事故  
17 嘅，所以我哋嘅設計就係得出一籃子嘅措施或者係因素去得出一個分數嘅。如  
18 果呢個分數上升或者下降，可能你嘅表現係大幅度地改善咗或者係惡化，呢個  
19 就係比起淨係睇某一個因素係好嘅。

20 例如如果你主要係睇一間巴士公司遇上嘅撞車嘅意外，可能係唔公平嘅，  
21 因為可能喺某啲路線有啲路面嘅情況係會導致撞車，並不代表成間巴士公司嘅  
22 整體表現嘅，所以我哋係要考慮一籃子嘅因素，先去評核佢哋嘅安全表現。

23 主席：（經傳譯員）呢一個一籃子因素嘅範圍係點呢？當然如果你睇呢個碰撞嘅數  
24 字，係大家都會明白，你睇到如果有乘客跌低、蹣倒等等，或者違反交通規  
25 例、超速、急速剎車等等，仲會考慮啲咩嘢其他因素呀？

26 MR MIKE WESTON：（經傳譯員）我哋會包括呢一個司機質素監管或者係監察，呢  
27 個亦都係同公眾對安全駕駛嘅期望係有關，所以我哋係想包括一系列嘅因素，  
28 先至得出一個分數去反映呢個巴士公司嘅整體表現嘅。

29 主席：（經傳譯員）即係你講緊公眾嘅回響，係咪講緊投訴呀？

30 MR MIKE WESTON：（經傳譯員）係，包括投訴。

31 主席：（經傳譯員）唔該晒。

32 MR DUNCAN：（經傳譯員）Weston 先生，喺 Stanley 教授喺向委員會--即係協助  
33 委員會時候講，香港就係有一個競爭性嘅投標制度，而巴士公司就會係自己係

1 收呢啲車資，但係佢哋亦都係要承擔風險嘅，我就想你睇睇呢一個嘅 Stanley  
2 教授嘅作供嘅謄本，呢個就係第 16 日嘅謄本，第 45 頁嘅。

3 主席：（經傳譯員）日期係幾時呀？

4 MR DUNCAN：（經傳譯員）9 月 15 號嘅。你之前有冇睇過呢份證供呀？

5 MR MIKE WESTON：（經傳譯員）有嘅。

6 MR DUNCAN：（經傳譯員）所以我就會好快咁樣帶你睇一睇呢份文件。我會由第 45  
7 頁開始，第 10 行，委員會嘅大律師就講到呢一點嘅，「第一部分就係講呢一個  
8 嚟墨爾本有呢個競爭性投標制度嘅好處，你都已經有提過呢一個議題㗎喇，所  
9 以我想同你講下呢個競爭性嘅投標制度，同埋呢個點樣係應用㗎香港嘅情況。  
10 巴士公司就會自己收呢一個巴士嘅車資，而佢哋就自己承擔營運巴士路線嘅風  
11 險。」

12 第 22 行，就話「我明白係有唔同嘅選項，但係我就想請你解釋下呢一啲  
13 嘅選項。」我諗之後有一啲部分可以略過，因為我諗你都知道啲啲嘅選項或者  
14 情景係乜嘢，就住 Stanley 教授所講。我就想跳去第 48 頁嘅頁底，第 21  
15 行。

16 陳政龍大律師就講到「如果我有理解錯，係可以有唔同嘅情景嘅，第一，  
17 就係一個投標商就係建議係支付政府一個營運嘅金額去換取經營某一個區域或  
18 者某啲路線嘅經營權，佢就會係同政府分享某啲嘅利潤。」

19 第 6 行就講到「第三個情景就係有一個競投嘅價格，而呢個投標嘅競爭係  
20 完全係視乎服務質素嘅評核。」

21 第 22 行就主席話「另一個方法就係呢一個新嘅巴士公司就可能會建議佢  
22 可以--我收嘅車費比現有嘅巴士公司係可以低一成嘅，即係呢個情景底下，就  
23 唔會畀錢政府，但係巴士公司就可以幫到乘客。」陳大律師就話「呢啲就係競  
24 爭性投標制度嘅好處。」

25 所以呢個就係有四個嘅情景，我就想睇番你啲份報告第 131 頁嘅，第  
26 4.3.2 段，第一段就係形容一個同香港相似嘅制度，就住呢個盈利分享，就講  
27 到呢一個淨價嘅合約。

28 「喺 1995 年至 2000 年，機構就係採納咗一個淨價嘅合約制度，而巴士  
29 公司就會係保留路線嘅車資收入，然後就係承擔呢個相關嘅風險，巴士公司就  
30 會係競投一啲合約，就住呢個預期嘅收入，佢會係競投一個倫敦交通局嘅資  
31 助，就住一啲比較有咁賺錢嘅路線，或者喺一啲賺錢嘅路線就係同倫敦運輸局  
32 係分享收益嘅。」

33 呢個淨價合約就只係運作咗一段短嘅時間，因為就倫敦運輸局佢嘅行政嘅  
34 負擔係非常之大概，因為佢係要分配超過七百條巴士路線嘅利潤或者收入。而

1 實際嚟講巴士公司係好難影響實際嘅路線車資收入嘅，因為路線嘅規劃、班次  
2 同埋車資嘅釐訂仍然係由倫敦運輸局去控制同埋管理嘅。」

3 我哋假定喺第二段嗰度所講嘅兩個問題都係可以克服得到咁講喇，即係個  
4 行政嘅負擔，嗰個情況就係呢一個淨成本合約嘅做法，你覺得香港係咪可以參  
5 考呢，還是係唔可以考慮呢？

6 MR MIKE WESTON：（經傳譯員）如果你係睇個專營權嗰度，嗰個營辦者就係喺香  
7 港某一啲部分就係營辦所有嘅路線，就好似倫敦嘅情況咁樣，就容易啲嘅。倫  
8 敦個問題就係營運者可以係有幾條線係有不同嘅營運者或者係若干營運者嚟到  
9 去做，因此對嗰個收入係有一定嘅影響嘅。所以實際嘅問題就係喺呢個淨成本  
10 合約係有乜問題嘅。

11 就睇下嗰個英國嘅合約，呢個係冇問題嘅，但係要確保就係嗰啲營運者係  
12 對嗰個收入有一定嘅影響，同埋係有能力係改變嗰個嘅收入，譬如話可以控制  
13 嗰個嘅票價或者係可以係將嗰個服務水平係改變，或者係有能力係可以係推廣  
14 或者係推銷佢哋嘅服務呀咁樣。

15 喺倫敦運輸局嘅情況，所有呢啲咁嘅工具就係掌握喺嗰個當局當中，就唔  
16 喺個營運者手中嘅，所以營運者其實對嗰個實際嗰個票價收入有好少嘅影響  
17 嘅，即使佢哋服務嘅質量都好好，佢哋喺嗰個走廊上面有三、四間嘅營運商，  
18 佢哋係有同樣嘅路線都好，乘客都係會有車嚟就搭㗎喇，佢哋唔會揀邊間巴士  
19 公司嚟搭嘅。

20 所以答你條問題，就係係可行嘅，可能就係如果營運者係有一個專營權係  
21 可以處理自己嘅路線，可以喺自己嘅範圍入面係有一定嘅控制權，就好有用  
22 嘅。呢個確保嗰個營運者係可以控制到若干嘅範疇，然後先至可行嘅，因為喺  
23 倫敦嗰度當局控制咗好多嘅情況，睇嚟就唔係話咁可行。我希望答到你嘅問  
24 題。

25 MR DUNCAN：（經傳譯員）唔該晒。其實我以前都有問過呢個問題，其實就係有幾  
26 多條路線，倫敦總有幾多條路線？

27 MR MIKE WESTON：（經傳譯員）有七百，就視乎係個別嘅路線，有啲就係學校嘅  
28 路線，倫敦嘅巴士路線加埋呢啲巴士路線，其實公眾人士都可以坐嘅，但係有  
29 一啲嘅路線喺返學嘅時間就淨係畀學生嚟到去搭一啲專門嘅路線嚟嘅。有一啲  
30 路線可能係個別嘅巴士線——校巴線，有啲就可能係長啲嘅路線，就係六百、七  
31 百輛巴士都有嘅。

32 MR DUNCAN：（經傳譯員）唔該晒。另一個問題就係 Stanley 教授證供當中有提到  
33 嘅。或者係返番去第 16 日嘅聆訊，第 50 頁嗰度，呢個就係喺正話我提嗰段嘅  
34 之後嘅啫，第 50 頁，第 9 行，陳律師就問，「係咪有一定嘅優點呢，即係喺嗰  
35 個競爭性嘅投標嗰度，而具體上就係同呢一個巴士安全運作係相關嘅？」我哋  
36 睇到就係教授嘅回覆就係第 50 頁一路係答到去 56 頁嘅，第 16 行嗰度，你有

1 有機會睇過 Stanley 教授呢方面嘅證供？

2 MR MIKE WESTON：（經傳譯員）係有嘅。

3 MR DUNCAN：（經傳譯員）我諗公道咁講，或者係可以總括一下咁講，其實喺具體  
4 上對安全同呢一個競爭性嘅投標係有一定嘅影響嘅，其實你睇呢個證供係咪咁  
5 樣睇呢？

6 MR MIKE WESTON：（經傳譯員）其實我嘅睇法都係咁樣嘅，我唔會唔同意嗰個睇  
7 法，就話係即係競爭性投標對安全係唔會話有影響，但係亦都唔會話有一定嘅  
8 優點。其實喺倫敦嗰度嗰個路線嘅投標，嗰個投標過程本身就並冇具體咁樣係  
9 對安全帶嚟一啲嘅優點，但係嗰個投標嗰個評估，其實等當局就可以就係睇埋  
10 嗰個安全嘅角度。

11 剛才我哋都講過，就有啲公司佢哋係有一啲機件--即係嗰個基建工程嘅水  
12 平就唔係話咁好，等運輸當局就係可以係有能力係更改佢哋嘅建議，特別係照  
13 顧個安全嘅問題，所以嗰個招標嘅程序或者嘅競爭性嘅招標未必係同安全有直  
14 接嘅關係，但係嗰個招標嗰個目的，特別喺倫敦嗰個情況就容許有關當局係可  
15 以係考慮埋嗰個安全角度，然後先至批嗰個合約或者係續嗰個合約嘅。

16 主席：（經傳譯員）呢個其實你係畀過呢啲嘅例子，考慮到嗰個嘅安全，就有一啲巴  
17 士公司佢哋喺呢方面唔係咁好嘅，喺嗰個保養嘅計劃入面係做得唔足咁樣，其  
18 實喺呢個制度入面，點樣--一間公司係咪願意進行呢個技術上嘅一啲創新，呢  
19 個對安全亦都係有一定嘅影響嘅，其實公司可唔可以係有一啲嘅前置嘅一啲嘅  
20 鏡頭咁樣，等佢哋可以睇到嗰個巴士同車輛嘅距離咁樣。喺呢一方面，呢個過  
21 程，競爭性投標方面係咪有一定嘅影響呢？

22 MR MIKE WESTON：（經傳譯員）我相信嗰個挑戰顯然，就係如果當局係訂定一啲  
23 最低嘅安全標準，譬如話一啲設備、閉路電視、即係巴士上面前、後嘅閉路電  
24 視，倫敦都有嘅，所有嘅營運者如果佢哋係要入標嘅話，都要符合呢個標準。  
25 如果當局係訂定呢啲標準，所有嘅營運者都係需要符合呢啲標準，然後先至可  
26 以得到個合約嘅

27 對於呢啲競爭性投標方面嘅程序，個挑戰性就係最終始終我哋係有一個商  
28 業嘅評估嘅，有個技術上嘅評估，有時就好難就話對一啲即係喺標書入面嘅少  
29 量嘅創新、科技創新，譬如話有一啲嘅通話嘅系統就可以改善到嗰個表現，因  
30 為未必得嘅有時。呢個會幫到佢哋嗰個技術上嘅得分，但係最終某程度上，整  
31 體嗰個商業上面嘅分數就會係佔咗主要嘅一個嘅決定嘅，呢個對於嗰個合約方  
32 面--喺呢方面又未必係有咁大嘅影響，所以個挑戰就喺呢度。所以喺倫敦就係  
33 用一啲一般嘅安全嘅標準，即係一般嘅巴士安全嘅標準咁樣。

34 嗰個招標嘅程序始終係有一個重要嘅元素，我哋唔會話唔鼓勵嗰個技術上  
35 嘅創新，即係佢哋可以係超越到呢個當局所要求嘅，當然如果佢哋覺得佢哋有  
36 一定嘅業務上可行嘅話，有一啲嘅技術上嘅創新，就可以減低嗰個嘅意外，亦

1 都可以節省佢哋嘅成本，佢哋亦都係好樂意咁嚟到去採納嘅，但係你少少嘅技  
2 術創新對嗰個評估方面又未必有大影響嘅。

3 主席：（經傳譯員）嗰啲規管當局其實就可以係訂定一啲最低嘅標準，就唔係話嗰啲  
4 巴士公司係主動咁樣嚟到去改善個安全，係咪呢？

5 MR MIKE WESTON：（經傳譯員）我諗呢個就可能係最終係要咁樣走㗎喇，嗰條  
6 路，喺呢個倫敦運輸局講到呢個巴士安全嘅水準咁樣。我嘅評估就係當局就會  
7 話其實有好多嘅技術創新喺度，我哋要睇嗰啲巴士公司點樣去進行創新，同埋  
8 係採納佢哋認為合適嘅科技，就唔係話訂定一啲標準等各方面係採納，否則，  
9 亦都係需要加埋呢個成本入去，咁樣先至係會公平嘅。

10 主席：（經傳譯員）喺呢個情況底下，呢啲競爭性嘅投標其實係提升嗰個安全方面係  
11 中性，係咪呢？

12 MR MIKE WESTON：（經傳譯員）係嘅，可能係咁樣，呢個可能係一個正確嘅結  
13 論，安全基本係必定㗎喇，其實所有嘅營運者都係需要符合一定嘅標準，佢哋  
14 喺其他方面可以係睇一啲技術嘅創新嚟到去改善嗰個服務，亦都係希望提升佢  
15 哋嘅效率，亦都係會增加佢哋嘅成本，其實對公眾人士嚟講係咪物有所值係一  
16 個問題。

17 主席：（經傳譯員）個表現，即係始終競爭係要提升表現，就唔係話安全？

18 MR MIKE WESTON：Yes.

19 主席：（經傳譯員）其實呢個情況同航空公司係咪可以類比嘅呢？當局訂定咗一定嘅  
20 標準，就唔係個別航空公司就係裝某啲嘅設備咁樣嚟到去提升安全。

21 MR MIKE WESTON：（經傳譯員）喺航空方面我都唔係一啲專家，但係我嘅印象就  
22 係你對呢個航空公司嘅印象，其實安全就喺航空公司嚟講，就唔係話一個乜嘢  
23 嘅特別嘅優點，而係一啲係一啲既定一定要做嘅嘢㗎喇，咁可能呢個做法喺  
24 倫敦運輸局都係要咁樣做嘅，安全嘅標準係必定嘅，就唔係話有一個競爭嘅優  
25 點，等呢啲公司可以大家互相競爭嘅。

26 MR DUNCAN：（經傳譯員）其實喺歐洲有冇城市係朝住呢個方向嚟到去走嘅呢？

27 MR MIKE WESTON：（經傳譯員）就安全嗰方面？

28 MR DUNCAN：（經傳譯員）即係一致嘅標準，所有巴士必須係當局訂定一定嘅標  
29 準，即係話喺倫敦運輸局係有一定嘅安全標準，就唔係話等公司嚟到去自己去  
30 決定點樣創新嚟到去點樣提升安全。

31 MR MIKE WESTON：（經傳譯員）我所照我嘅所知，倫敦運輸局嗰個安全標準係佔  
32 領先嘅地位嘅，其他歐洲嘅地方佢哋都係用一啲嘅科技嚟到提升安全，但係照  
33 我所知，倫敦運輸局其實就係有一定嘅一致嘅標準，所有公司係遵守。

1 MR DUNCAN：（經傳譯員）另一點你提嘅就係喺呢個競爭性投標嘅方面，就係就住  
2 香港，睇關於嗰個廠房嘅擁有權同埋係有冇廠房嘅問題，我想你睇係你報告嘅  
3 151 頁，最底嗰度，你就話「巴士車廠好多時就係對競爭嚟講係構成一個障礙  
4 嘅」，你睇到「喺將來，競爭性嘅投標嘅方面的確係需要有一定嘅清楚策略就  
5 係關於廠房嘅擁有權同埋有冇廠房提供嘅問題。」可唔可以同我哋係引申一下  
6 呢方面嘅講法呢？Weston 先生。

7 MR MIKE WESTON：（經傳譯員）係喇，如果你睇倫敦嗰個情況，最大嘅挑戰，如  
8 果你係新嘅營運者入嚟嘅話，始終都係有冇廠房嘅問題，呢個係始終係搵一個  
9 合適嘅地點嚟到起廠房同埋嗰個--如果你想係打入一個市場嘅話，你需要起一  
10 啲嘅廠房畀百五部車咁樣，咁你係需要係要令到嗰個廠房係喺經濟上可行先得  
11 嘅，等佢可以係攞到合約。

12 即使喺倫敦嚟講，嗰個要打入個市場都係嗰個廠房嘅問題，係咪有冇廠  
13 房，唔係話有可能嘅，但係呢個係一個障礙。另外喺嗰個路線投標嘅方面，如  
14 果你係要用一個專營權嘅方面嘅做法，喺投資新廠房嘅設施其實就係好重要  
15 嘅，呢個對競爭嚟講亦都構成一個障礙嘅。

16 喺新加坡嗰個嘅模式，佢哋當局就會提供嗰個廠房同埋有關嘅車輛嘅，基  
17 本上個營運者喺入標嘅時候就係要營運呢個嘅專營權，而廠房、車就係呢個新  
18 加坡嘅土地運輸局提供，呢個模式亦都係完全不同嘅。

19 不過問題就係除非有一啲嘅競爭性嘅投標，即係香港嚟講，我哋始終都係  
20 需要係有一定嘅策略，嚟到處理呢一個嗰個嘅障礙，始終呢個畢竟都係嗰個廠  
21 房嘅問題，我哋喺呢度需要有一定嘅清楚嘅策略，好可能嗰個競爭可能會好弱  
22 㗎喇，而現有嘅巴士公司可能會係贏到個合約嘅。

23 MR DUNCAN：（經傳譯員）可唔可以喺倫敦係大家分享啲廠房嘅呢？

24 MR MIKE WESTON：（經傳譯員）係喇，大多數嘅倫敦嘅廠房都係巴士公司擁有  
25 嘅，大約七十五間就係巴士公司所擁有嘅，十間就係運輸局所擁有嘅，其  
26 他即係種種原因，有啲就係私有化嘅時候都係空置緊嘅，由於係 2000 年一路擴  
27 展，嗰啲廠房一路都係有用嘅，巴士公司就係佢哋合約上面就係用呢啲嘅廠  
28 房，有兩間嘅呢啲廠房就係--即係倫敦東部其實就係 Hackney 同埋 Arriva 兩  
29 間公司，即係大家係分享嘅，呢個係比較少有嘅，佢哋都係大家互相合作，令  
30 到佢哋可行嘅，呢個做法都唔係話唔可行嘅，兩間廠房而家係大家係分享，有  
31 啲嘅車廠就用嚟泊車，佢哋係用當中嘅設施嘅。

32 MR DUNCAN：（經傳譯員）新加坡佢哋就提供呢啲車廠畀呢啲營運商，佢哋係咪都  
33 係分享呢啲嘅廠房㗎？

34 MR MIKE WESTON：（經傳譯員）新加坡有兩份嘅合約，就係有啲新設嘅車廠，佢  
35 哋亦都係--即係喺新加坡亦都係擴展呢啲嘅車廠嘅，佢哋嘅網絡亦都係擴展  
36 㗎，亦都有新嘅車廠，佢哋嘅做法係同其他地方係有所不同嘅，如果佢哋係繼

1 續呢啲嘅招標嘅工作，佢哋可能係需要考慮而家嘅車廠嘅安排，睇下點樣可以  
2 將佢係啲呢個程序入面係納入埋入面嘅。

3 主席：（經傳譯員）嗰個嘅障礙就係車廠，如果係講緊新嘅路線嘅時候，呢個障礙係  
4 咪會細啲呢？譬如喺香港，就我哋要發展一個新市鎮，我哋係需要有一啲嘅農  
5 村嘅地帶，我哋會將佢擺一啲城市嘅設施，所以就比較容易啲政府當局係可以  
6 起車廠嘅，係咪？

7 MR MIKE WESTON：（經傳譯員）係，冇錯。我所知，其實就係新加坡係有個新嘅  
8 服務嘅時候就有新嘅車廠建立。如果譬如喺香港有新嘅服去新嘅地方嘅時候，  
9 係如果係理論上就係應該由運輸署去起呢個車廠，而唔係話個別嘅公司嘅。車  
10 廠其實就係喺競爭方面係一個最大嘅障礙嚟嘅。

11 主席：（經傳譯員）喺倫敦嚟講，係咪有一啲嘅整合嘅情況呢？譬如話喺倫敦以外嘅  
12 公司佢入地倫敦，佢就係收購咗一啲細少嘅巴士公司，然後亦都係收購咗一  
13 啲嘅車廠，就藉以進入個市場，係咪咁？

14 MR MIKE WESTON：（經傳譯員）係。最後一個人嚟市場嘅時候就係一間澳洲嘅公  
15 司，佢哋嘗試好努力係好多年係進入個市場，但係嗰個車廠嘅障礙其實都係好  
16 大。唔單只係咁，喺倫敦，你亦都係將係--車廠亦都係要有競爭力嘅地點嘅  
17 度，所以佢哋就去--First Group 呢間公司就買一啲車廠，然後就進入呢個  
18 市場，就由收購開始進入市場。

19 主席：（經傳譯員）好，我哋係睇 126 頁嘅，你嘅報告，你就係列出咗巴士營運商  
20 嘅名稱，嗰個澳洲公司係咪 ComfortDelGro 呢？

21 MR MIKE WESTON：No. The Australian company is under "Other",  
22 because they run about...

23 主席：（經傳譯員）佢係咩嘢邊間公司話？

24 MR MIKE WESTON：（經傳譯員）佢唔係呢度嚟嘅，佢大概係佔市場係百分之三至  
25 四，Tower Transit。

26 主席：（經傳譯員）係咪都係喺新加坡嗰度係營運嘅呢？

27 MR MIKE WESTON：（經傳譯員）冇錯，佢亦都係喺新加坡嗰度叫做易塔通嘅呢間  
28 公司，都係新加坡有營運嘅。

29 主席：（經傳譯員）譬如好似 RATP Development 呢間公司，呢個係咪一個法國公  
30 司？

31 MR MIKE WESTON：（經傳譯員）係。佢有兩個部分嘅，RATP 就係公交嘅公司，喺  
32 巴黎嚟嘅，就係營運巴士同埋地鐵嘅，喺巴黎。RATP Development 係一個就  
33 佢哋嘅另外一間公司就係投資海外嘅業務嘅，佢哋係有成功投標咗一個叫做  
34 Riyadh Metro，係呢一個倫敦嘅中心地點嘅一個巴士嘅。

1 主席：（經傳譯員）邊間話？Riyadh Metro？

2 MR MIKE WESTON：（經傳譯員）係。

3 主席：（經傳譯員）RATP Development 係咪收購咗倫敦幾間比較古老嘅、細嘅巴  
4 士公司呢？

5 MR MIKE WESTON：（經傳譯員）係，RATP 亦都係收購咗一間叫 Quality Line  
6 嘅公司，亦都係收購咗另外一間呢個法國公司，佢哋倫敦有業務嘅，喺過去幾  
7 年，佢哋收購咗幾間公司，亦都係有好多細嘅巴士公司係有整合，亦都係將畀  
8 呢啲大嘅公司去吞併嘅。

9 主席：（經傳譯員）有幾多間公司其實係倫敦以外嘅公司，RATP 呢？

10 MR MIKE WESTON：（經傳譯員）Abellio 就係荷蘭公司，Arriva 係呢一個德國  
11 嘅鐵路公司，ComfortDelGro 就係新加坡公司，新加坡基地嘅公司，Go-  
12 Ahead Group PLC 係英國嘅一間有限公司，RATP Development 正如我頭先  
13 所講，係法國嘅巴黎嘅一個公交公司，Stagecoach 係亦都一個英國公司嚟  
14 嘅，所以係三間係外國公司公共公司，一個就係私人公司嚟嘅，所以其實都個  
15 組合都係唔同嘅。

16 歐陽先生：（經傳譯員）如果佢哋係要去收購一間公司，其實佢哋係咪要繼續聘請啲  
17 啲司機呢？

18 MR MIKE WESTON：（經傳譯員）係，冇錯嘅，嗰個框架協議就係如果有收購嘅情  
19 況，佢哋係要--首先佢就係要得到運輸局同意同埋佢呢個運輸局其實係可以有  
20 權反對收購嘅呢啲嘅行動嘅。如果呢個六個裏面嘅其中一個大嘅公司就想係收  
21 購另外一間大嘅公司，倫敦運輸局可能就會反對，因為唔想個競爭係減少。佢  
22 哋亦都會係喺第二啲情況係會介入嘅，因為佢哋想睇下成個競爭嘅情況會唔會  
23 可以保留到。無論如何，佢哋係需要得到倫敦運輸局嘅同意。

24 喺英國，如果你要收購一個公司，嗰間公司嘅資產亦都係有相對嘅責任你  
25 係要去履行嘅，咁嘅情況係喺英國同埋歐洲其實都係情況嘅，你係要將啲嘅  
26 員工同時間去移交嘅。如果一間公司如果係冇--贏到一個合約嘅時候，呢間公  
27 司嘅員工係有權係去到另外一間新公司嘅公司嗰度做。一間新嘅公司可能係決  
28 定係需要繼續聘請原有嘅員工，因為其實佢哋亦都缺乏員工，但係可能員  
29 工亦都可以決定去繼續留喺原有嘅公司嗰度嘅，可能個車廠已經係關閉咗等等  
30 咁樣樣。

31 歐陽先生：（經傳譯員）係。

32 主席：（經傳譯員）係咪都係原有個僱用條件都係要保留？

33 MR MIKE WESTON：（經傳譯員）冇錯，法例係咁規定嘅，佢哋係要保留原有嘅聘  
34 用條件嘅。呢間公司後來之後可能係同員工磋商，就係改變嗰個聘用條件，但

1 係喺呢個轉移啲刻，嗰個聘用條件應該係保留嘅。

2 主席：（經傳譯員）呢個係咪市長嘅成就嚟嘅，佢所做嘅呢？

3 MR MIKE WESTON：（經傳譯員）其實而家嘅市長其實已經做咗好多工作，譬如話  
4 係立法嗰方面，如果個合約係改變咗，你就係要遵守番原用嘅一直嘅合約條  
5 件，但係呢個而家嘅市長就係容許嗰啲員工係選擇過唔過去新公司嘅，個市長  
6 就講「如果我係一個嘅司機，我已經有十五年經驗，然後我喺申請由 Abellio  
7 去 Go-Ahead，因為 Go-Ahead 就近我住嘅地方，我仍然就係應該係享有十五  
8 年工作經驗嘅巴士司機嘅待遇，所以我就唔需要從頭開始，即係話我嗰個經驗  
9 會繼續係保留嘅。」對於咁樣嘅情況，如果啲司機係要調去另一間公司，就比  
10 較公平一啲。

11 主席：（經傳譯員）唔該晒。

12 MR DUNCAN：（經傳譯員）你係咪會唔會想小休呢？而家係一個幾合適嘅時間。

13 主席：（經傳譯員）我哋會係有個小休。已經係作咗供兩個小時，然後我哋而家會小  
14 休二十分鐘，我哋會係十一點半之前再返嚟嘅，十一點半會再返番嚟。

15

16 上午 11 時 10 分押聆訊押後

17

18 上午 11 時 30 分恢復聆訊

19 出席人士如前。

20

21 主席：（經傳譯員）鄧大律師。

22 MR DUNCAN：（經傳譯員）多謝主席。Weston 先生，請你撇去第 153 頁嘅，你報  
23 告嘅其中一頁，第 8.6 段，你就提到運輸當局同埋巴士營運商之間嘅合約關  
24 係，喺第一段第二句，你就提到「雖然合約結構喺香港係唔同嘅，香港所採用  
25 嘅呢一個高層次嘅合約模式係未必需要改變先至可以改善合約監管、表現管理  
26 同埋運輸署同埋專營巴士商之間嘅合作。」

27 另外我想你睇睇第 154 頁第二句，你就形容係過度依賴法定嘅規例，就係  
28 適用於所有嘅車輛嘅，然後最後一段，你講到「喺倫敦嘅情況係車輛同埋司機  
29 都係需要遵從呢個法定嘅要求嘅，而呢啲相關嘅措施、項目同埋合作，即係超  
30 越呢啲法規嘅呢啲合作同埋項目就會令到實際嘅安全得到改善嘅。」

31 然後你提到「倫敦巴士公司同埋倫敦運輸局之間嘅合作，佢哋係願意創新  
32 同埋試一啲新嘅技術同埋方法，同埋作為呢一個巴士安全計劃嘅一部分，呢啲

1 係會帶嚟一啲良好嘅結果，即係喺呢一個減少意外同埋受傷方面嘅，而運輸署  
2 係應該考慮佢哋點樣可以改善同專營巴士商之間嘅合作關係。」呢度就係提到  
3 一啲關於合作嘅觀點。

4 運輸署喺呢一方面係監管者嚟嘅，如果密切合作嘅話，會唔會引致監管者  
5 同埋巴士之間嘅個關係係太過係親近呢？

6 MR MIKE WESTON：（經傳譯員）我諗兩者係可以併存嘅，我喺報告度咁樣寫嘅原  
7 因係因為我喺倫敦運輸局擔任巴士服務總監嘅時候，我哋好少係講呢一個--即  
8 係我哋同巴士公司傾嘅時候好少講呢個框架協議嘅或者呢個路線協議，呢個就  
9 係我哋當局同埋巴士公司之間嘅關係。

10 我喺 8 月就係同一啲巴士公司嘅代表見面，我諗我哋冇提到合約，合約並  
11 唔係一個問題嚟嘅或者一個阻礙，我當時亦都係有咁樣講，因為我知道倫敦運  
12 輸局亦都係想致力去改善營運安全嘅，如果係要透過合約去著手，可能係需要  
13 好長嘅時間。如果倫敦運輸局係要引入一啲安全嘅標準，即係透過合約嚟講，  
14 就要好耐先可以睇到成果，呢個過程亦都係會係好慢嘅。

15 我諗如果係想快啲係做到嘢，合作係一個好嘅方法嚟嘅，我諗到咗某個時  
16 候，呢一啲元素可能係會納入成為合約嘅一部分。所以呢個可以獲得結果或者  
17 成果嘅速度係一個考慮嘅因素嚟嘅。

18 我亦都深信有合約係重要嘅，如果我哋有任何嘅爭議，但係我係相信有一  
19 啲事情透過合作，係更加快可以得到成果嘅，呢個喺 8 月同運輸局同埋巴士公  
20 司傾嘅時候都好清楚地帶出呢一點。喺呢方面，即係喺安全方面亦都取得好大  
21 嘅進展。所以我就強調合作呢一點。

22 至於法定嘅要求或者英國嘅要求，包括係一啲車輛嘅維修、車隊嘅管理等  
23 等，呢啲並冇大問題，大部分嘅巴士公司都係可以係符合呢啲要求。

24 主席：（經傳譯員）呢個合作嘅機制係點嘅呢？即係喺倫敦運輸局同埋專營巴士商之  
25 間嘅合作係點嘅呢？你就指出合作可以帶嚟成功嘅。

26 MR MIKE WESTON：（經傳譯員）報告所提到嘅第一點就係呢一個巴士公司會議嘅  
27 成果，即係嚟自巴士公司高層同埋倫敦運輸局嘅高層係去定期見面去傾下一啲  
28 討論點嘅，包括係安全。

29 主席：（經傳譯員）呢個喺報告邊一部分呀？

30 MR DUNCAN：（經傳譯員）第 136 頁嘅。

31 MR MIKE WESTON：（經傳譯員）呢個巴士營運商高峰會，喺呢個高峰會入面，每  
32 個星期巴士公司嘅代表會同倫敦運輸局嘅代表係會面，然後去傾一啲共同關注  
33 嘅問題，而轄下嘅安全小組亦都係會鼓勵啲營運商去分享佢哋嘅最佳做法，...

34 主席：（經傳譯員）喺呢一個巴士營運商嘅峰會有咩嘢人出席呢？

1 MR MIKE WESTON：（經傳譯員）就會係個別巴士公司董事總經理同埋倫敦運輸局  
2 嘅總監或者係以上級別嘅代表嘅。

3 主席：（經傳譯員）呢個峰會喺邊度進行㗎？

4 MR MIKE WESTON：（經傳譯員）就會係倫敦運輸局嘅辦公室，就係為期係八星  
5 期嘅為一個週期。有三大嘅目標，第一，就係分享一啲良好嘅做法，喺呢一個  
6 高峰會入面，巴士公司就可以提出佢哋嘅有咩嘢擔憂同埋佢哋想傾嘅議題嘅，  
7 佢哋未必係會傾一啲好個別嘅問題。

8 主席：（經傳譯員）可唔可以舉啲例子畀我哋聽？

9 MR MIKE WESTON：（經傳譯員）我諗緊就係一啲例子，譬如話關於啲巴士站嘅  
10 執行嘅措施，呢個論壇其實等運輸局係支援一啲巴士站嘅設置咁樣，仲有其他  
11 一般性嘅問題都係會討論嘅，而呢啲巴士公司係會提出佢哋嘅合約入面嘅事  
12 項，...

13 主席：（經傳譯員）用呢個例子咁嚟講，究竟討論完之後會採取咩嘢行動呢？

14 MR MIKE WESTON：（經傳譯員）運輸局其實就係最有能力係提升呢啲事項畀有關  
15 嘅當局，咁佢哋就係--譬如話喺公路係可以執行呢啲嘅措施，佢哋有人力，有  
16 警方呀咁樣，其實視乎啲個路段係點樣，運輸局其實就係可以有能力係引進其  
17 他嘅機構係一齊參與嘅，呢啲係一般嘅事項。

18 呢個亦都係一個好好嘅機會等倫敦運輸局係接觸有關嘅機構係講不同嘅問  
19 題，譬如話一啲嘅未來五年之後啲個--即係未來五年啲個嘅業務計劃係點樣，  
20 對啲個營運者係有一定嘅影響，同埋有一啲計劃係等巴士公司係預先係知道  
21 嘅，譬如改變啲個嘅巴士嘅網絡。呢個論壇其實就可以係大家分享啲個嘅工作  
22 係點樣。

23 主席：（經傳譯員）譬如話喺呢個伊利沙伯線，呢方面會唔會係會提出呢？

24 MR MIKE WESTON：（經傳譯員）係嘅，我喺運輸局做嘅時候，亦都係有一啲講  
25 解，一啲巴士嘅規劃嘅當局係解釋一下呢條新嘅橫貫嘅伊利沙伯線對巴士嘅路  
26 線有咩嘢路線呢咁，呢個係一個好好嘅論壇，等大家可以分享不同嘅事項嘅。

27 主席：（經傳譯員）你提到一啲小組，可唔可以同我哋講一講咩嘢嘅小組呢？

28 MR MIKE WESTON：（經傳譯員）有幾個小組喺度嘅，主要就係安全方面嘅事項嘅  
29 小組，有工程嘅小組，安全小組其實就係所有巴士公司都有參與嘅，有陣時啲  
30 嘅董事經理或者係一啲總監或者係喺安全方面嘅負責人係會有參與嘅。亦都係  
31 大家討論一啲安全嘅問題，個論壇亦都係等巴士公司可以大家分享一啲嘅汲取  
32 嘅--交通事故所汲取嘅教訓。

33 我知道巴士公司其實就係好關注呢方面嘅問題嘅，如果一間公司係有一啲  
34 嘅事故，係做過深入嘅調查，係查出啲個實際嘅底因，其他嘅巴士營運者亦都

1 係可以從呢個調查當中嘅結果係得出一啲嘅經驗，可能未必係完全適用嘅，有  
2 時都係會適用嘅。如果營運者同埋運輸局唔分享呢啲咁樣嘅結果，就係未必咁  
3 好嘅，所以呢個論壇其實就會係分享個調查嘅結果。

4 主席：（經傳譯員）譬如話係有一啲事件就係巴士司機就有係拉手掣嘅，釀成一啲嘅  
5 後果，呢啲喺呢個論壇就可以分享，確保唔會有類似事件發生，係咪呢？

6 MR MIKE WESTON：（經傳譯員）係，主席你都提到呢個事故，就係有個車長就係  
7 處理個嘅輪椅嘅斜度，佢就係啞咗工程師嚟，工程師就係處理個問題，但  
8 係司機就係處理當中有拉手掣，車就郁，最終個工程師就係有咗命添嘅。其實  
9 就我哋會有一個嘅警告，就話巴士車長離開佢座位嘅時候，就要確保係一定要  
10 拉咗手掣先可以離開嘅咁，其實呢個運輸局個嘅安全標準亦都會包括呢方面  
11 嘅環節嘅，就有一個鎖咁樣。

12 但係呢個係一個好好嘅例子，就係呢類咁樣嘅教訓其實大家巴士公司、巴  
13 士營運者係可以分享嘅。就有啲公司就係可能有一啲嘅資料同大家就係互相分  
14 享，大家可以汲取一個教訓嘅。

15 而工程個小組就係有一啲工程嘅總監就係參與，佢哋係分享一啲嘅維  
16 修、保養方面嘅事項，好多時營運者都係會面對類似嘅巴士嘅車種，佢哋有一  
17 個好好嘅機會等佢哋係有新嘅車加入車隊嘅時候，佢哋可以分開啲保養、維修  
18 嘅一啲經驗，呢啲嘅論壇就大家互相合作、互相係分享一啲最好嘅做法。

19 主席：（經傳譯員）佢哋係幾耐開一次會㗎？

20 MR MIKE WESTON：（經傳譯員）同個主要嘅論壇個時間差唔多，其實有最主要  
21 嘅一個訊息就係巴士嘅巴士營運者其實係好樂意大家互相合作嚟到處理一啲非  
22 競爭性嘅一啲問題，譬如話係安全，為咗整體嘅大局嚟到去分享一啲嘅經驗咁  
23 樣，所以呢度大家互相係會合作嘅，喺呢方面。

24 主席：（經傳譯員）除咗巴士公司嘅代表同埋運輸局之外，呢啲咁樣嘅論壇、會議會  
25 唔會係有巴士車長嘅參與或者係工會嘅參與呢？

26 MR MIKE WESTON：（經傳譯員）唔會嘅，其實係有--亦係兩方面嘅溝通嘅渠道嚟  
27 嘅，倫敦運輸局--即係倫敦就係有一個嘅工會就代表九成五嘅巴士車長嘅，所  
28 以我哋係會同工會諮詢、溝通，呢個比較容易，因為只係有一個嘅工會係進行  
29 溝通咁樣。

30 運輸局都係同工會的確有定期嘅會議嘅，嚟到討論一啲一般嘅關注嘅事  
31 項。譬如話佢哋係會分享一啲巴士安全標準嘅一啲嘅說法，呢個就視乎巴士公  
32 司睇下點樣處理佢哋嘅當地嘅工會，所以呢個係有兩層嘅做法嘅，喺處理工會  
33 個方面。我哋有一個正式嘅討論磋商嘅公司層面嘅渠道，就唔係呢一個倫敦運  
34 輸局嘅渠道。

35 MR DUNCAN：（經傳譯員）呢個論壇幾時成立㗎？

1 MR MIKE WESTON：（經傳譯員）呢個問得好好，起碼十五年前成立嘅。我做主席  
2 都有五、六年，就有不同嘅程序嘅，呢個亦都係經得起時間嘅考驗，亦都係好  
3 有用，係好有信譽，否則嘅話，嗰個論壇同埋小組亦都唔會係繼續存在嘅。

4 MR DUNCAN：（經傳譯員）呢個係咪某一個事件之後成立呢，還是係你哋主動嚟到  
5 去成立嘅呢？

6 MR MIKE WESTON：（經傳譯員）如果記得嘅話，應該係主動成立嘅，我相信應該  
7 係喺私有化之後，當時就有個睇法，就話應該大家聚埋一齊嚟到去討論呢啲共  
8 同關注嘅事項咁樣嘅。

9 MR DUNCAN：（經傳譯員）或者我想請你睇 Stanley 教授嗰份嘅報告，就係 94  
10 頁，94 頁 5.3 段，就話其他事項嘅結論咁樣，佢提到就話「鑑於有關嘅討論，  
11 作者建議香港考慮嘅主要事項，嚟到去改善工作、駕駛或者係休息嘅規定，同  
12 埋係使用技術」，佢就特別提到第 6 項嘅，「成立一個巴士安全嘅常設委員  
13 會，起碼一年開兩次會嚟到去檢討評估最新嘅科技，係對巴士安全有影響嘅，  
14 特別係對一啲巴士路線嘅運作，同埋建議政府係睇下喺啲專營巴士方面點樣可  
15 以加入呢啲嘅安全嘅措施。最新嘅工作小組改善呢一個安全，就可以就係作為  
16 一個基礎，個成員可以係擴大到去加入巴士嘅營運者。」咁樣。

17 個問題就係倫敦有冇一啲嘅組織，一啲嘅小組，其實佢哋係符合到教授所  
18 講嘅一啲嘅常設委員會嘅要求呢？譬如話呢個常設委員會可以檢討個最新嘅科  
19 技，可以將呢啲安全嘅措施係納入去個車隊入面，倫敦有冇類似嘅機構喺度嘅  
20 呢？

21 MR MIKE WESTON：（經傳譯員）倫敦嘅架構就係運輸局其實就係主導呢啲嘅安全  
22 標準嘅，佢哋就會睇啲最新嘅科技，同埋跟住同巴士公司大家磋商，透過論  
23 壇，透過呢啲工作坊，咁嚟到去同佢哋磋商嘅，可以話巴士營運者嘅論壇同埋  
24 小組就可以係話類似嘅措施，教授所講嘅常設委員會係可能係闊過呢一方面  
25 嘅，嗰個成員嘅組合可能係會闊啲，但係個相應嘅機構應該係我哋倫敦嘅一啲  
26 營運者嘅論壇。

27 MR DUNCAN：（經傳譯員）照我理解，如果我明白你嘅答案嘅話，任何嘅科技方  
28 面嘅發展，主要就係倫敦運輸局係做主導嘅，然後就喺嗰個論壇喺會議上面大  
29 家討論，係咪呢？

30 MR MIKE WESTON：（經傳譯員）係，所有呢啲嘅營運者都係可以提出呢啲嘅建議  
31 嘅，喺論壇上面提出嘅。好多時啲營運者都係會搵出呢啲咁樣嘅科技--新嘅  
32 科技，然後大家係喺論壇提出，大家可以溝通呀咁樣，其實就兩者喺當局同巴  
33 士公司之間係有互動嘅。

34 MR DUNCAN：（經傳譯員）或者想你睇教授嘅另一份嘅報告，...

35 主席：（經傳譯員）等一陣間，律師，我就想跟一跟呢方面嘅問題。舉個例，譬如話

1 一啲防止瞓眼瞓嘅一啲嘅工具，佢哋可能喺呢啲安全嘅論壇上面提出。倫敦嘅  
2 運輸局係可以係試行呢啲嘅做法，係咪呢？係咪可以咁樣做呢？

3 MR MIKE WESTON：（經傳譯員）係喇，你所講嘅一啲科技，我哋叫做 Seeing  
4 Machines，即係一啲就係有一啲嘅鏡頭就睇下個車長會唔會係瞓眼瞓咁樣，有  
5 呢啲咁樣嘅試驗，就係運輸局就覺得需要試行呢啲咁樣嘅做法，而巴士公司就  
6 話亦都係想係提供經費嚟到去試下呢啲科技係做成點，同埋啲監察嗰個嘅試  
7 驗，佢就係請呢啲巴士公司就提供部分嘅經費，就其實就我哋有一個嘅安全嘅  
8 創新基金，第一輪就係 50 萬鎊，之後就係有一啲嘅試辦。

9 主席：（經傳譯員）喺 2017 年 7 月，就佢哋係入標，就係 17 年尾就係批咗個標，  
10 然後就係進行嗰個試行嘅計劃？

11 MR MIKE WESTON：（經傳譯員）係喇。跟住就有監察同埋有關嘅試驗嘅結果就係  
12 加咗入去嗰個嘅安全標準入面。

13 主席：（經傳譯員）呢個 10 月係有匯報嘅，個成功與否就會係 10 月匯報？

14 MR MIKE WESTON：（經傳譯員）係喇，10 月 16 號就會有匯報，運輸局係會有一  
15 個嘅事項等供應商同埋巴士公司就宣布佢哋嗰個安全標準嘅水準，唔單只係  
16 咁，仲有就係將營運者嗰個嘅結果--試行嘅結果係將佢入納入去嗰個計劃入  
17 面。

18 主席：（經傳譯員）運輸局就係會出錢，係提供經費，即係其中一個角色就係試行呢  
19 啲安全嘅設施安全嘅設備，係咪呢？

20 MR MIKE WESTON：（經傳譯員）係喇，同埋就係幫營運者係制定一啲嘅方法嚟到  
21 去監察嗰個嘅進度嘅，喺試行呢啲新嘅科技嗰方面就可以請--好容易請供應商  
22 就安裝呢啲設備，但係最緊要就係我哋要監察嗰個嘅進度，睇下係咪有效益嘅  
23 同埋係取得一定嘅成效，而先至係證明係物有所值嘅。喺過去亦都係有一啲嘅  
24 試行，但係就有監察，咁好難就確定到有關嘅科技係咪成功嘅。

25 主席：（經傳譯員）喺倫敦運輸局嗰度，邊個單位係協助呢啲巴士公司係取得經費嚟  
26 到去做試驗？

27 MR MIKE WESTON：（經傳譯員）倫敦運輸局喺 2015 年所做嘅就係成立一個專責嘅  
28 隊伍係集中睇呢個巴士安全嘅計劃，呢個係有運輸局嗰個道路安全小組嗰度調  
29 咗一啲人手過嚟，等佢哋係改善專門改善巴士嘅安全同埋係推行呢一個嘅巴士  
30 安全計劃嘅，所以當時係有一隊嘅專門隊伍，係有兩、三人係專門係負責處理  
31 呢一方面嘅工作嘅，同埋係促進呢個巴士安全。

32 主席：（經傳譯員）具體嚟講，佢哋點樣係提供協助同埋確保係有關嘅監察係做得妥  
33 當呢？

34 MR MIKE WESTON：（經傳譯員）係喇，其實做幾樣嘢嘅，佢哋就會幫巴士公司係

1 制定呢一個嘅架構，同埋亦都有一啲外部嘅一啲顧問，我哋叫 TRL，就做呢一  
2 啲嘅監察嘅工作，就等...

3 主席：（經傳譯員）TRL 係咩嘢意思呀？運輸嘅研究，係咪呀？

4 MR MIKE WESTON：（經傳譯員）係喇，運輸研究嘅實驗室，佢哋係做一啲嘅運輸  
5 嘅研究，特別係睇啲意外或者係一啲撞車嘅情況，後來就幾年前就將佢係私  
6 有化咗，可以話係一個顧問公司，專門就係處理呢啲交通運輸技術上嘅分析、  
7 評估嘅工作嘅。

8 主席：（經傳譯員）巴士公司就係得到呢啲協助，然後進行呢啲試驗，係咪？

9 MR MIKE WESTON：（經傳譯員）係喇，其實運輸局就係睇呢啲不同嘅科技個個優  
10 點。

11 主席：（經傳譯員）呢啲實驗所就係亦都提供協助，係咪呀？喺呢個研究方面？

12 MR MIKE WESTON：（經傳譯員）係喇。

13 主席：（經傳譯員）2015 年...

14 MR MIKE WESTON：（經傳譯員）當時 2015 年--16 年初都係咁樣做嘅。

15 主席：（經傳譯員）16 年就遞交報告，係咪？

16 MR MIKE WESTON：（經傳譯員）係嘅。

17 主席：（經傳譯員）個報告係喺文件夾入面有冇㗎？鄧律師。

18 MR DUNCAN：（經傳譯員）係有嘅，喺 SEC-1--SEC-3。唔好意思，應該喺 MISC-  
19 3 嘅，MISC-3 嘅，應該係 1002 頁。

20 主席：（經傳譯員）我哋喺呢個報告睇到 1003 頁，係 2016 年 11 月係有發表同埋  
21 修改嘅，好清楚喺呢個報告講，就係 2015 年 6 月就開始去試驗嘅？

22 MR MIKE WESTON：（經傳譯員）冇錯，喺 2015 年 6 月、7 月嘅時候，呢兩個嘅-  
23 -呢個特別嘅巴士路線，我哋就收集一啲數據，然後嗰個研究實驗室，就會睇番  
24 倫敦中心區同埋倫敦以外，就係 19 號同埋 294 號，然後係喺 2015 年 6 月嘅時  
25 候就做一啲嘅數據收集，因為需要啲時間等啲嘅科技慢慢係可以係應用到出  
26 嚟，同埋有啲校正嘅工作，所以喺 2015 年會有啲少少嘅問題，喺 2015 年 9 月  
27 就係收集咗 19 號路線嘅數據，而係 2016 年我哋收集咗 486 號路線嘅數據嘅。

28 主席：（經傳譯員）邊間公司係 Go-Ahead 公司係有參與嘅？

29 MR MIKE WESTON：（經傳譯員）486 嗰個路線嘅試驗。

30 主席：（經傳譯員）John Trayner 就當其時係董事總經理，喺 Go-Ahead，我喺  
31 倫敦，我有見過佢，係咪？

1 MR MIKE WESTON：（經傳譯員）係呀。

2 主席：（經傳譯員）你可唔可以幫我哋去明白倫敦運輸局同埋 TRL，即係你哋嘅研究  
3 室，其實佢哋係扮演嘅咩嘢角色呢，特別係監察呢一個嘅計劃之中？

4 MR MIKE WESTON：（經傳譯員）運輸局就係委託就係做呢一個智能車速輔助系統  
5 嘅科技同埋做相關嘅試驗計劃，同埋係搞清楚究竟呢個科技係做乜嘢嘢，就係  
6 關於呢個數碼地圖，然後呢個巴士佢又裝置呢個系統嘅時候，就會令到呢個成  
7 個車速可以係限制嘅，換句話嚟講，就係會令到司機係唔會超速，亦都令到佢  
8 個剎車嗰個功能係可以停止嘅，亦都唔可以加速嘅，如果已經達到咗個最高上  
9 限。

10 呢個係倫敦運輸局資助嘅計劃，亦都係請我哋嘅研究中心去監察，呢個巴  
11 士公司亦都可以從佢哋自己嘅觀察同埋巴士車長嘅回應，知道究竟有成功，我  
12 哋亦都係之前同埋之後收集數據，睇下有幾有效，同埋有幾多嘅巴士喺呢個試  
13 驗計劃仍然都超速。

14 所以呢個係一個好好嘅例子，就話啲新科技係應用，亦都係一個好好嘅例  
15 子，我哋係需要有一個有效嘅監察制度，無論係推行計劃之前或者係推行計劃  
16 嘅期間，我哋都係需要去好好監察，呢個都係一個挑戰，令到我哋知道實際有  
17 咩嘢好處。運輸研究室其實都係喺呢一個科技應用之前同埋之後去監察相關嘅  
18 情況。

19 主席：（經傳譯員）亦都係佢哋係去製備呢一個嘅非常之完備嘅報告嘅，係咪？

20 MR MIKE WESTON：（經傳譯員）係。

21 主席：（經傳譯員）關於呢個科技，關於智能車速輔助系統或者科技，呢個科技其實  
22 就已經係存在咗好多年，係咪呢？或者係冇落實到，喺起初嘅時候可能有落實  
23 到，但係相關嘅概念其實就已經存在咗好耐？

24 MR MIKE WESTON：（經傳譯員）係，冇錯。其實就一直都有呢個意念㗎喇，其實  
25 都係要睇番我哋有冇呢個數碼速度地圖嘅，但係其實今次係第一次就喺巴士嗰  
26 度應用。喺呢個試驗計劃三或者四年之前，亦都係有喺運輸局上面有裝置嘅，  
27 我亦都係有試過呢個嘅自己揸呢架車，但係其實有呢個裝置之後，我哋就好--  
28 個司機如果超速，就好難加油嘅，但係今次第一次係全面係科技喺倫敦裏面有  
29 一個試驗計劃。

30 主席：（經傳譯員）呢個科技係咪其實喺呢個歐盟其實都有出現過，其實有啲嘅文  
31 件，有啲嘅--都有講話有啲人係嘗試去試驗？

32 MR MIKE WESTON：（經傳譯員）係呀，其實喺倫敦我哋會面嘅時候，我哋都有傾  
33 過呢一點。

34 主席：（經傳譯員）會唔會首先係其實三、四年前其實就係呢個科技係應用喺一架車

1 上面嘅，我哋然後係有資金就係將呢個科技應用喺呢兩嘅巴士上面，同埋亦都  
2 後來我哋亦都出資係畀呢一個 TRL，即係呢個運輸研究中心就係去監察嘅，係  
3 咪？

4 MR MIKE WESTON：Yes.

5 主席：（經傳譯員）但係個科技其實已經係存在咗一段時間嘅？

6 MR MIKE WESTON：（經傳譯員）係，冇錯。關於個--其實個資金，有冇資金其實  
7 唔係個問題，其實係反而個關鍵就係個科技係咪已經成熟，喺呢一個客運交通  
8 方面，我哋一定係等緊嗰個科技成熟，其實我哋都一直都係有個資金嘅。

9 主席：（經傳譯員）大概嗰個資金係幾多？

10 MR MIKE WESTON：（經傳譯員）對唔住，我真係有個數字。我會話其實個監察仲  
11 貴過嗰個裝置本身嘅，我懷疑其實嗰個監察其實仲貴過嗰個裝置，其實對於成  
12 個網絡嚟講，其實個裝置個費用可能唔係咁貴。

13 主席：（經傳譯員）但係呢個係一個嘅例子，就係話倫敦運輸局就係出資係畀呢一啲  
14 試驗計劃，而相關嘅營運商就同意參與嘅，係咪呀？

15 MR MIKE WESTON：（經傳譯員）係呀，呢個係一個幾好嘅例子，就係話我哋係需  
16 要有一定程度嘅評估同埋監察一啲新科技，先至有用嘅，然後我哋係需要深入  
17 嘅分析，我哋先至知道我哋係咪投資喺嗰嘅科技裏面。

18 主席：（經傳譯員）首先係監察，然後分析，同埋制定--去寫報告嘅，係咪呀？

19 MR MIKE WESTON：（經傳譯員）其實呢個運輸研究中心，其實佢哋都係好獨立  
20 嘅，所以呢個獨立呢樣嘢都係好緊要，我哋係需要有一個獨立嘅研究中心幫我  
21 哋做監察同埋分析嘅，TRL--對唔住，我成日都搞錯咗，混淆咗 TFL 同埋  
22 TRL，但係 TRL 同運輸研究中心亦都係有參與呢一個嘅最新嘅關於呢個安全標  
23 準制定嗰方面嘅，特別係喺呢個科技上面。

24 主席：（經傳譯員）你嘅意思係有唔同嘅裝置，譬如話向前嘅鏡頭，又或者有啲嘅鏡  
25 頭知道有個行人喺附近等等？

26 MR MIKE WESTON：（經傳譯員）冇錯。

27 主席：（經傳譯員）係呢啲方面嘅監察？

28 MR MIKE WESTON：（經傳譯員）同埋睇下佢個成本效益係點樣，佢哋都有參與  
29 嘅。

30 主席：（經傳譯員）鄧律師，係。

31 MR DUNCAN：（經傳譯員）多謝主席。我會有個補充嘅問題嘅，關於呢個課題嘅。  
32 首先智能車速輔助或者調節系統其實係幾時倫敦運輸局開始去考慮嘅呢？你睇

1 番 MISC 第 3 號文件冊，第 939 頁，我哋睇唔睇到？呢個係一個報告，2009 年  
2 12 月㗎喇，好耐之前，就係關於智能車速調節設計嘅。

3 去睇番第 943 頁，我哋睇到呢個係個倫敦運輸局委託嘅一個嘅研究，就係  
4 睇下司機對於呢個嘅科技嘅一啲嘅反應，同埋特別係呢一個用者個界面嗰方面  
5 究竟有啲咩嘢反應，呢度係一個研究，係 2009 年做嘅研究。

6 然後我哋去睇第 945 頁，呢個引言部分，呢度有講到第一段，就係呢個講  
7 「呢個智能車速嘅系統呢一個嘅軟件就係 1980 年喺法國已經開始開發㗎喇，亦  
8 都係喺唔同嘅市場係試過，亦都係能夠減低車速係有效嘅，喺 2009 年 5 月呢一  
9 個運輸局就係開展最新嘅試驗計劃，就係希望能夠減低個速度同埋減少呢個首  
10 都嘅路上嘅意外嘅。」

11 我喺度停一停，似乎喺呢個嘅試驗計劃唔係單單係限於就係巴士上面去使  
12 用，其他嘅車輛都係喺呢一個嘅試驗計劃裏面涵蓋嘅？

13 MR MIKE WESTON：（經傳譯員）係，冇錯。運輸局亦都係負責一般嘅道路安全  
14 嘅，因為其實都有好多嘅道路網絡喺倫敦，我哋有一個道路安全嘅分布係特別  
15 係負責呢方面，道路安全嘅，所以呢一個嘅就係呢度所指嘅，我都有參與其中  
16 嘅。所以呢度唔係淨係講巴士嘅，就係其他嘅車輛都係涵蓋，亦都係一般嘅道  
17 路安全嘅事項都涵蓋。

18 MR DUNCAN：（經傳譯員）喺引言最後一個嘅段，呢個第一年嘅計劃就係運輸局就  
19 已經開始㗎，亦都想明白去睇下倫敦巴士司機佢嘅態度、佢哋有啲咩嘢誘因同  
20 埋佢哋有啲咩嘢障礙佢哋去實行呢個嘅科技，我哋睇番第 960 頁，我哋睇番個  
21 成本效益分析，喺第 960 頁，我哋睇到一系列嘅，就有一啲嘅認為可以達到嘅  
22 好處同埋啲障礙，就係話智能車速調節係科技嘅應用就係乜嘢係好處、乜嘢係  
23 障礙，呢度列㗎出嚟？

24 MR MIKE WESTON：（經傳譯員）係嘅。

25 MR DUNCAN：（經傳譯員）然後我哋去睇番 1004 頁，都係同一個文件冊嘅，如果  
26 你睇到，喺呢個呢一頁裏面，2016 年 11 月係發表嘅報告，係 TRL 發表嘅，我  
27 哋係--啲啲細節我哋自己可以睇，但係我想係特別講幾點，主席就係話一定係  
28 要有一個好仔細嘅分析，特別係成本效益分析嗰度先至得嘅。

29 如果我哋睇番嗰個內容，一共有八個標題嘅，第 1 個就係呢一個嘅科技係  
30 咪一個有效嘅科技去減低個速度--限制速度？第 2，呢個係咪一個有效益嘅方  
31 法呢？第 3，就係話有呢個科技嘅車輛對於周圍嘅環境有乜嘢影響？第 4，就係  
32 對於其他嘅附近嘅車輛嘅行為有啲咩影響？第 5，就係好處同唔好處，特別對呢  
33 一個倫敦運輸局嚟講，有啲咩好處、唔好處？

34 第 5.2 至到 5.13 就係有講清楚啲啲嘅好處，第 6 項就係對於巴士營運商  
35 嚟講，ISA 係有啲咩好處定啲咩唔好處？第 7 題，對於巴士車長嚟講，ISA 有

1 咩嘢好處同唔好處？第 8 條，對於巴士乘客嚟講，呢個科技係有帶嚟咩嘢好處  
2 同埋唔好處呢？

3 呢個就係 TRL 係探討嘅事項，所有嘅詳情都係喺報告裏面可以睇得到，呢  
4 個報告就係提交畀倫敦運輸局嘅後來。

5 第 1011 頁，我哋睇到 2015 年就試驗計劃開始，主席啱啱提到，我相信  
6 應該係喺呢一個嘅係最後一段，係 2015 年就運輸局就係喺倫敦巴士就嘗試去試  
7 驗智能車速輔助系統，就用咗一個呢個 Zeta Automative Ltd. 嗰個相關嘅  
8 系統嘅。

9 呢個就係我哋頭先提到嗰個試驗計劃，係咪呀？

10 MR MIKE WESTON：（經傳譯員）呢個啱啱呢兩條路線去試驗之前，其實之前嗰個  
11 試驗係一個規模非常細嘅試驗嚟嘅。

12 MR DUNCAN：（經傳譯員）我哋而家去 Stanley 教授嘅報告第 70 頁，你有冇睇過  
13 呢個報告嘅呢一頁？

14 MR MIKE WESTON：（經傳譯員）有，有，我睇過。

15 MR DUNCAN：（經傳譯員）喺呢版裏面，Stanley 教授就讓我哋--希望我哋留意到  
16 其實墨爾本同香港一個最主要嘅唔同，墨爾本係--我而家就節錄呢一個，喺呢  
17 一個斜字下面嗰段，就係「墨爾本就有一個獨立嘅規管者，安全監管者，喺呢  
18 一個營運嘅層面，維多利亞呢一個相關嘅安全部門就係 2010 年開始成立嘅，就  
19 喺 3.3.1 段嗰度。呢個喺佢哋做--佢做嘅角色同香港--香港就有相類似嘅角色  
20 或者機構，佢哋就係監察專營巴士營運系統佢哋嘅--營運者佢哋嘅安全表現，  
21 亦都係推進安全嘅計劃嘅，但係喺香港就有一個咁樣嘅獨立嘅安全嘅規管者，  
22 就令到我哋對於安全嘅關注就有咁大。」

23 似乎喺墨爾本，監管者就有監管呢一個行車安全，而相反就係--即係呢個  
24 工作就係交畀一個負責安全嘅獨立管理者，詳情我哋可以睇第 99 頁，就係同  
25 一份報告嚟嘅，我就想讀出畀二個一段，「Bus Victoria 就係一個業界嘅組  
26 織去提供支援，即係可以提供三個部分嘅支援嘅，例如 BusVic 就係提供一啲  
27 嘅範本就畀佢哋嘅會員，而呢啲範本就係同交通安全總監共同係建立嘅，而總  
28 監就係著重呢一個發展巴士業務嘅一個安全文化，同埋風險管理，而佢哋亦都  
29 係同一啲業界同埋營運商係去改善做法嘅。係有一啲指引嘅文件，包括係呢一  
30 份叫 Guidance - Safety Culture 2016 年 9 月嘅文件，而總監亦都表示  
31 佢係願意同香港分享佢哋嘅資料同埋一啲理念嘅，如果有需要嘅話。

32 就呢一個總監嘅獨立性就係提升咗安全，亦都係可以提供咗一個獨立問責  
33 嘅來源，亦都係提供一啲安全步驟嘅一個透明度嘅。而總結嚟講，墨爾本嘅巴  
34 士服務係安全嘅，而應該係主動去建立一個安全嘅文化同埋安全管理嘅制度，  
35 而唔係一個被動式嘅回應。」

1 然之後喺呢一頁嘅下面就講到「呢一個研究得出嘅主要建議，就係委員會  
2 應該係改善或者應該係喺呢一個立法嘅框架下面考慮以下嘅，就係引入一啲可  
3 以執行嘅安全指引」，同埋「建立一個獨立嘅交通安全總監職位，要求所有嘅  
4 專營巴士公司商就係必須要得到總監嘅認證，先至可以攞到呢一個牌照嘅，同  
5 埋將呢一個要求延伸到所有嘅商業車服務。」

6 呢一個就係墨爾本嘅情況，我哋嘅問題就係我哋需唔需要建立一個咁嘅職  
7 位呢，喺我哋嘅編制底下？

8 MR MIKE WESTON：（經傳譯員）呢個就好視乎本地嘅情況，無論係香港或者倫敦  
9 都好。如果你睇番倫敦運輸局同巴士公司所建立嘅一啲安全項目，或者一個關  
10 於車速方面嘅事，我並不反對一個獨立嘅安全總監嘅，因為喺英國已經係有咁  
11 樣做㗎喇。而倫敦運輸局亦都係希望英國嘅電車業都係跟住做嘅，即係就住安  
12 全方面。

13 但係我擔心如果喺倫敦成立呢一個職位嘅話，可能係會受到一啲阻力嘅，  
14 所以我比較擔心如果喺倫敦實施嘅話，可能喺成立呢一個監管者嘅過程之中，  
15 呢一個發展安全嘅進度可能會係受到影響，呢個只係我一個小小嘅擔憂，可能  
16 會係影響短期嘅進展，所以透過合作--即係透過而家有嘅機構互相合作，可能  
17 係會更加快得到成果嘅。

18 主席：（經傳譯員）如果我有理解錯，你認為係透過專營巴士公司同埋倫敦運輸局嘅  
19 合作，係可以得到令人滿意嘅成果，係咪呀？

20 MR MIKE WESTON：（經傳譯員）係，係嘅，不過倫敦本身有一個具競爭性嘅投標  
21 制度，究竟呢一個模式可唔可以喺其他嘅地區度使用就係另一個問題。根據我  
22 過去嗰幾年所見，同埋呢份報告，即係倫敦巴士喺安全方面係有好大嘅改善，  
23 呢個就係--即係個背景就係佢哋用一個現有嘅架構嘅。

24 如果喺另一個地區，未必可以得出同樣嘅結果，但係喺倫敦嚟講，好明顯  
25 係取得好好嘅進展，同埋喺使用科技同埋制定標準方面亦都有好大嘅進展。

26 主席：（經傳譯員）倫敦運輸局係表示佢哋係定緊一啲世界級嘅標準，你係點睇呢？

27 MR MIKE WESTON：（經傳譯員）據我所知，佢哋係唯一一個為佢哋巴士車隊定立  
28 標準嘅一個監管當局，一定係會影響英國其他地方嘅機構，亦都可能係會影響  
29 到香港同埋新加坡嘅，因為製造倫敦巴士嘅供應商亦都有製造英國其他巴士，  
30 亦都係有供應巴士畀香港同新加坡嘅。所以呢啲嘅最佳做法可能係會伸延去  
31 世界其他嘅地方，所以係會有一個正面嘅影響嘅，因為呢啲製造商可能佢會想將  
32 佢哋嘅技術應用喺其他嘅地區。

33 主席：（經傳譯員）其中一個例子就係巴士車頭嘅設計，係咪？佢哋係會改善一個車  
34 頭，即係一個四方形嘅設計，個改善咗之後，如果畀個巴士車頭撞到，一個途  
35 人可能係會向側面係飛，而唔係向前面嘅？

1 MR MIKE WESTON：（經傳譯員）而下個月就會有一個新嘅設計，就係叫做將個車  
2 頭所謂令佢軟化一啲，我哋係會改變呢一個擋風玻璃，而呢一個水撥個鉸就  
3 會喺上面，而唔係喺下面，因為如果喺下面嘅話，就如果撞到人嘅話，可能會  
4 令到人受傷嘅，啲個鉸。而改善咗設計之後，如果有途人係畀架車撞到，即係  
5 係以低速去碰撞，佢可能會係被撞上呢一個行人路嘅，但係如果係以同樣車速  
6 畀一架巴士撞到，可能佢哋係會嚴重受傷嘅，所以我哋係想令到巴士車頭嘅設  
7 計係好啲，如果出現碰撞嘅情況。

8 呢個設計嘅費用係比呢個製造費係低好多嘅，呢一個亞歷山大丹尼斯公司  
9 冇理由就唔喺佢哋賣去其他國家嘅巴士度採用同樣嘅設計嘅，佢哋好有機會會  
10 咁樣做嘅，所以我哋可能會見到一啲良好嘅做法係延伸到去其他嘅市場。

11 主席：（經傳譯員）我哋講番你嘅觀察，呢個模式喺倫敦係可行嘅，呢個就係喺倫敦  
12 嘅架構底下係可行嘅，係有一個進步同埋主動嘅運輸當局，如果要喺香港取得  
13 成功，都係視乎香港嘅架構係點嘅？

14 MR MIKE WESTON：（經傳譯員）係嘅。我諗個問題就係邊一個模式可以最快取得  
15 成果，即係根據現有嘅架構，但係喺短期嚟講，如果我哋要定立一個--建立一  
16 個新嘅監管者，可能會影響短期嘅成果。過去幾年，即係運輸局亦都係有睇到  
17 呢個問題嘅。

18 主席：（經傳譯員）鄧大律師。

19 MR DUNCAN：（經傳譯員）多謝主席。你同 Stanley 教授，你係向委員會提供咗唔  
20 同嘅選項，點樣可以改善呢個做法，第一，就係呢一個巴士公司嘅峰會；第  
21 二，就係一個委務委員會，就係 Stanley 教授有提議過嘅，雖然喺維多利亞省  
22 就有一個咁樣嘅架構；第三，就係一個獨立嘅交通監管者。呢啲都係供委員會  
23 參考嘅，你同唔同意？

24 MR MIKE WESTON：（經傳譯員）係，呢個巴士營運商峰會同埋常務委員會之間嘅  
25 個分別可能只係文字上嘅分別啫，可能係同一件事嚟嘅，喺實際嚟講。我諗另  
26 一個問題就係呢個委員會如果有一啲第三方參與，譬如話係警方，會唔會佢哋--  
27 --即係可以幫助到佢哋嘅工作呢。

28 MR DUNCAN：（經傳譯員）你應該係會聽過 ISO 標準，就係特別係 ISO 39001，  
29 呢一項嘅標準對倫敦嘅整個巴士系統係有冇影響呢？

30 MR MIKE WESTON：（經傳譯員）喺呢個工程嘅標準係會符合呢個 ISO 嘅標準嘅，  
31 但係我唔知係咪同一個號碼或者有另外一個編號嘅。倫敦有一啲巴士公司係有  
32 ISO 認證嘅，喺佢哋業務嘅某啲方面。但係倫敦運輸局就係冇要求任何巴士公  
33 司係要有 ISO 認證，但係我相信佢哋嘅工程方面係得到一啲 ISO 認證，但係  
34 我唔知道啲標準係咪一樣。

35 MR DUNCAN：（經傳譯員）我想你睇第 146 頁，係你報告嘅一部分，你就詳細提到

1 呢個巴士安全計劃，第 146 頁就講，「喺 2016 年嘅 2 月，倫敦運輸局為咗回  
2 應公眾同埋持份者嘅施壓，佢就開展咗一個巴士安全計劃，而主要嘅元素就係  
3 以下嘅」，我哋見到呢一個核心嘅元素就係喺左面嗰一欄，而右面嗰一欄就係  
4 一啲最近新加嘅元素，我哋頭先都講到呢個問題，我亦都問過你究竟呢一個巴  
5 士安全計劃係籌備咗幾耐呢？

6 MR MIKE WESTON：（經傳譯員）唔係好耐嘅啫。點解我會知道呢？因為我 16 年 2  
7 月我仍然係即係喺倫敦運輸局嘅一部分，我係有份係開展呢個計劃嘅，個背景  
8 就係安全並唔係一個首要嘅考慮，而巴士營運商嘅峰會亦都有係著重呢個安  
9 全。

10 當時公眾施加嘅壓力係越嚟越大，其中一個原因就係倫敦運輸局就係發布  
11 呢個交數據嘅時候係更加高透明度，而有一啲嘅持份者，包括係公眾，佢係涉  
12 及喺一啲嚴重嘅巴士意外嘅，所以呢個機構係受到好大嘅壓力要改善安全。所  
13 以呢個巴士安全計劃就係希望係納入唔同嘅元素。

14 以前可能有一啲嘅措施，但係就並有一個整合嘅計劃，所以喺 2016 年 2  
15 月就開展咗呢項計劃，令到我哋可以更加有系統咁樣推展呢啲工作嘅。

16 MR DUNCAN：（經傳譯員）當時有幾多人係負責設計呢個計劃嘅呢？

17 MR MIKE WESTON：（經傳譯員）大概兩至三個人，只係一個好細嘅團隊嘅啫。係  
18 由喺呢個巴士安全小組入面兩至三個人係設計嘅。

19 MR DUNCAN：（經傳譯員）呢個計劃係包括一啲主動嘅，還是一啲被動嘅措施？

20 MR MIKE WESTON：（經傳譯員）呢個計劃並唔係係為咗回應某一個嘅事件或者意  
21 外，其實純粹係一個自然嘅進展，個目標就係去重新係聚焦喺呢個安全嘅。我  
22 好清楚巴士公司同埋倫敦運輸局一直都係好著重安全嘅，呢個計劃係純粹係令  
23 到呢一個問題更加聚焦，令到工作更加有方向，但係呢個計劃並唔係由某一個  
24 事件引起嘅，但係係為咗回應一個公眾嘅訴求，包括係踩單車嘅人，因為係越  
25 嚟越多入喺倫敦踩單車，亦都係佢哋涉及一啲嚴重嘅交通意外，所以市民係期  
26 望運輸局係拓展佢哋嘅工作，但係之前其實好多工作已經做緊，只不過就唔係  
27 喺一個好整合嘅方式去進行。

28 MR DUNCAN：（經傳譯員）我想你睇下第 148 頁嘅，呢度特別係講到一個巴士安全  
29 嘅標準，第一段有介紹過，「巴士安全計劃嘅一個主要嘅成果就係發展一個新  
30 嘅巴士安全標準，喺 2016 年開始，倫敦運輸局已經係同呢一個道路安全顧問  
31 TRL Loughborough University、一啲巴士公司同埋發展商係去評核同埋  
32 建議一啲未來巴士設計應該有嘅一啲設計特點去改善安全嘅。」

33 而第二段就講到「有幾項嘅潛在嘅科技，包括係智能車速輔助、一啲自動  
34 剎掣、一啲巴士嘅固定裝置、一個防止誤踏油門、一個鏡面嘅設計同埋巴士車  
35 頭嘅防撞保護等等，亦都係有考慮到各項嘅成本同埋好處，同埋亦都係想喺財

1 務投資同埋係減低意外方面取得一個平衡嘅，亦都有提到一個智能嘅車速輔助  
2 系統。」

3 跟住就係巴士安全標準嘅第一階段，就係喺 18 年 10 月 16 號宣布嘅，正  
4 話都講過，就話有三個嘅階段，「儘管而家預計個標準就適用於新嘅巴士（就  
5 一年大概有七百部），對於現時嘅巴士車隊都係會加裝呢啲設備嘅，作為一個  
6 中期翻新嘅計劃嚟到去加裝，大概需要就係七年嘅就加裝㗎喇。運輸局其實就  
7 係採取一個好嚴謹嘅態度嚟到睇不同嘅選項嘅，佢哋就會用成本嘅效益嘅分析  
8 嚟到去睇每一個嘅選項，確保就係每一鎊使出嚟都係物有所值，同埋可以係減  
9 低個傷亡嘅數字。」

10 巴士嘅安全帶就有預計就係喺呢一個安全標準嘅一部分咁樣，你就話「有  
11 預計有安全帶」，其實呢個係咪經過一個好嚴謹嘅成本效益嘅分析，然後先至  
12 係作出呢個結論嘅呢？

13 MR MIKE WESTON：（經傳譯員）我諗喺同呢個運輸局傾呢個巴士安全嘅時候，好  
14 顯然佢哋有係諗到呢一個安全帶係作為一個嘅安全嘅措施，佢哋嘅睇法就係佢  
15 哋知道個成本係點樣，同埋就相對於其他嘅選項個嘅效益係點樣，我唔會話  
16 佢哋覺得係冇用，但係顯然喺佢哋嘅諗法入面就有諗到呢一個安全帶係作為一  
17 個安全嘅標準咁樣，呢個當時就係 8 月嘅時候，當時有考慮到呢個安全帶嘅。

18 主席：（經傳譯員）鄧律師嘅問題就係話係咪有考慮到係——係咪經過嚴謹嘅考慮，然  
19 後先至唔採納呢一個嘅做法呢？係咪將來都唔會咁樣考慮呢個做法呢？

20 MR MIKE WESTON：（經傳譯員）我哋嘅印象就係佢哋唔會考慮嘅。

21 主席：（經傳譯員）唔會睇？

22 MR MIKE WESTON：（經傳譯員）唔會睇。

23 MR DUNCAN：（經傳譯員）如果你睇 134 頁，你睇你藍色嗰部分就係引述呢個運輸  
24 署個嘅指引，講到目前嘅安全帶，即係巴士安全帶個嘅情況咁樣嘅，呢個  
25 係咪運輸署嘅指引？

26 MR MIKE WESTON：（經傳譯員）係喇，藍色就係直接係轉載呢一個嘅指引嘅。

27 MR DUNCAN：（經傳譯員）我會帶你睇一睇呢一方面，我哋會睇香港個情況，即  
28 係而家嘅建議係點樣，「一般嘅規定，係 2001 年 10 月 1 號以嚟，每一個向前  
29 或者向後嘅座位都係需要有呢啲嘅安全帶裝置嘅，用一個批准同埋係妥善安裝  
30 嘅安全帶就可以防止死亡同埋嚴重受傷嘅，唔單只就可以係將個乘客綁住喺  
31 度，同時亦都係防止啲乘客彈出嚟，特別係反車嘅情況。」

32 唯一嘅例外就係某一啲嘅車可能係市區用嘅，係有企位嘅乘客嘅，對於短  
33 途嘅情況，就係有呢啲咁樣嘅豁免，喺時間又短，距離亦都短嘅，速度亦都唔  
34 快嘅，儘管我哋知道對於安全帶安裝方面，個營運者係可以選擇邊類嘅車種

1 係安裝安全帶嚟到提供呢啲服務。」呢個就係運輸署嘅指引嚟嘅。

2 主席：（經傳譯員）為咗記錄，運輸署就係 2010 年 5 月嘅時候亦都係有一啲嘅文獻  
3 就係講到巴士安全帶嘅情況嘅。

4 MR DUNCAN：（經傳譯員）係喇，主席亦都提供呢方面，亦都文件夾亦都有嘅。而  
5 家喺螢光幕上面都有打出嚟喇喇。

6 主席：（經傳譯員）有冇編號㗎？

7 MR DUNCAN：（經傳譯員）MISC-3 嘅，1274 頁。講到香港嘅情況，係巴士安全帶  
8 嗰方面，我想你係——我啱啱想講就話歷史，或者係對呢個問題嘅不同嘅考慮因  
9 素，我跟住就想請你表達下啲個人嘅意見。

10 首先我就想睇一睇 SEC-3 1310 頁，呢一份文件係環境運輸局所發出嘅，  
11 呢個係 2006 年嘅時候係寫嘅呢份文件，份文件就係畀立法會嘅運輸事務委員  
12 會，係講到呢一個專營巴士嘅安全嘅問題嘅，喺 1315 頁嗰度，你可以睇到個標  
13 題，就係專營巴士嘅安全帶。

14 第 18 段，「根據道路交通安全設備規例，司機係硬性規定係需要提供安  
15 全帶，其實就係百分之三十四有遮擋嘅座位都係有安全帶嘅，而呢個所有嘅專  
16 營巴士嘅經營者都係需要承擔新巴士係要喺啲有遮擋嘅座位嗰度就係安裝安全  
17 帶嘅。鑑於最近嘅交通意外，運輸署同專營巴士經營者就係檢討個情況，睇下  
18 現時巴士車隊入面係加裝安全帶，佢哋就會考慮嗰個技術問題，譬如話係座位  
19 係咪結構上係強而有力同埋係咪有一啲嘅鞏固點。

20 同時亦都係有研究做過海外嘅做法，有啲就睇嚟，就有一啲嘅海外國家就  
21 係規定安裝安全帶就係喺一啲市區使用或者係有企位嘅巴士上面係安裝嘅。

22 由於上述，我哋認為要引進強制規定安裝同埋係配戴安全帶，即係專營巴  
23 士上面，呢個係唔合適嘅。」

24 目前就住運輸署嗰方面個情況就係咁樣，嘅立場，當時就係 2006 年嘅。

25 或者我哋想睇 SEC-3，1323 頁，呢份文件就係立法會運輸事務委員會  
26 嘅，同一個事務委員會，個標題就係講到提升專營巴士運作安全嘅措施嘅進  
27 度。

28 1329 頁，我哋睇到呢個係 2007 年所發表嘅一份文件，當時係 1 月。

29 我哋睇 1323 頁，有個副標題就係喺專營巴士上面加裝安全帶，第 3 段，  
30 呢度就匯報番有關加裝安全帶嗰個嘅情況。

31 或者請大家睇第 4 段，「我哋從其他國家係關於加裝安全帶嘅情況，到目  
32 前為止，我哋搵唔到一啲國家佢哋係有一啲法律嘅規定就係話喺市區使用嘅巴  
33 士同埋係有企位嘅巴士上面就安裝或者使用一啲安全帶嘅。」

1 「所以專營巴士佢哋係同意係完成個改裝工程喺上層嗰度係安裝一啲強化  
2 玻璃嘅擋風玻璃」咁樣，但係呢個就係 2008 年--即係 2007 年，當時就係對於  
3 嗰個加裝安全帶係有任何嘅轉變嘅。

4 另一個事項係我想提嘅就係 TD-1 94，運輸署嘅第 1 沓文件嘅第 94 頁，  
5 個標題就係 TD 文件 08，係喺專營巴士上面應用新嘅裝置同埋科技嘅，你或者  
6 睇 107 頁...

7 主席：（經傳譯員）呢個係運輸署今年 4 月提交嘅文件，係咪？

8 MR DUNCAN：（經傳譯員）係嘅，主席。我哋由 07 年而家係去 2018 年，Weston  
9 先生，呢個唔係交界立法會嘅文件，呢份文件其實係運輸署提交畀委員會，協  
10 助委員會嚟到去進行佢嘅工作嘅。

11 或者我想請你注意第 94 頁，你睇到就係第 4 段，「跟進番牽涉專營巴士  
12 嘅嚴重嘅意外，即係九巴大埔嘅事件，牽涉到若干人死亡嘅，呢個就係 18 年 2  
13 月，跟住就係成立咗一個委員會就亦都係有牽涉專營巴士公司同埋巴士製造  
14 商，喺 2018 年 3 月中就檢討安裝一啲新嘅安全裝置或者係應用一啲新嘅安全技  
15 術嗰個嘅技術可行性嚟嚟到去提升巴士乘客嘅安全保障嘅。有關嘅討論嘅結果  
16 同埋係工作小組嘅建議，係已經開列咗喺下面嘅段落當中。」

17 你睇到就係成立呢一個工作小組嘅原因就係因為大埔嗰度發生交通意外，  
18 巴士嘅意外，第 7 段，報告嘅第 7 段，嗰度有講，就係對於所有乘客座位安裝  
19 安全帶嘅，第 5 段先，「鑑於 06 年 7 月嘅意外，當時九巴就同一輛車輛係相  
20 撞，就喺雙層巴士上層嗰度有乘客被拋出」，「運輸署就建議，而巴士公司係  
21 同意就係應該喺四個上層嘅前面座椅嗰度係加裝安全帶嘅嘅，呢啲就係 97 年之  
22 後發牌嘅巴士就防止巴士乘客就係跌出嚟嘅，目前，淨係一啲冇遮擋嘅座椅先  
23 至係需要加裝安全帶，呢個係標準嘅做法。」

24 第 7 段，「至於話對於所有座椅安裝安全帶，三間嘅雙層巴士製造商就確  
25 定技術係可行嘅，如果係經營者係要求嘅話，佢哋可以喺新嘅巴士對所有座椅  
26 係安裝安全帶，係符合上述所講嘅國際標準嘅；同樣，所有專營巴士嘅經營者  
27 指出就話佢哋同意係將呢一個嘅要求係納入去嚟採購新巴士嘅安排當中。」

28 「至於話現行巴士加裝安全帶，製造商表達關注就話喺地面嘅結構就有咁  
29 樣嘅設計就未必能夠安裝起嚟，符合國際嘅標準，係要符合呢個規定，係加固  
30 呢一個嘅地台嘅結構同埋係取代或者更換而家嘅巴士座椅。製造商亦都確定就  
31 係技術上係可以喺所有嘅上層嘅座椅係加裝安全帶，而佢係一定係某個年份製  
32 造先至得嘅，佢哋就會係就住呢個可行性做出研究嘅，同埋就係對於呢啲專營  
33 公司嘅巴士睇下係咪適合安裝呢啲安全帶。根據運輸署嘅了解，加裝安全帶係  
34 牽涉到重大嘅改裝，包括呢個專營巴士嗰個嘅結構同埋係更換所有嘅座椅，同  
35 埋係進行一啲拉力嘅測試，嚟到確定係咪符合國際標準等等。加裝安全帶同埋  
36 測試嘅工作係需要好長嘅時間嚟到去完成嘅，因此亦都影響巴士嗰個嘅出車率  
37 同埋有關嘅運作嘅。專營巴士公司經營者係會進一步研究有關嘅建議嘅。」

1 呢個就係 2018 年 4 月嘅情況，呢個就係運輸署提供畀委員會嘅報告。而  
2 家係已經 1 點鐘，或者可能就喺午膳時間我就會繼續。

3 主席：（經傳譯員）好，Weston 先生，我哋而家就會係午膳，所以我請鄧律師，你  
4 會唔會話畀我哋聽你需要再多幾多時間呢？我哋知道其實我就自己都問咗好多  
5 問題，所以亦都令到成個時間長咗。

6 MR DUNCAN：（經傳譯員）多謝主席。你亦都有打擾到我哋嘅，我哋其實個進展都  
7 相當良好嘅。我相信就三點半應該可以完，如果唔得嘅時候，就起碼都係 4 點  
8 之前可以完。

9 主席：（經傳譯員）我哋而家係午膳，兩點半先至再返嚟。唔該晒。

10  
11 下午 1 時 01 分押聆訊押後

12  
13 下午 2 時 30 分恢復聆訊

14 出席人士如前。

15  
16 主席：（經傳譯員）午安。係，鄧律師，唔該。

17 MR DUNCAN：（經傳譯員）多謝主席。Weston 先生，午安。喺午膳之前，我就睇過  
18 一份文件，2018 年 4 月嘅文件，係一個運輸署嘅文件，文件編號係 8 號，而家  
19 就請你睇另外一份文件，就係返番去時序再較早之前嘅事件，係 2018 年 3 月，  
20 係 KMB-12 號文件冊，4869-1。

21 喺呢頁上面，你睇到呢個嘅標題就係「專營巴士安全改善工作小組」，呢  
22 個係 2018 年 3 月 13 號嘅會議嘅記錄，係 3 點鐘舉行，而跟住就有一啲出席者  
23 嘅名單。去到 4869-6，呢度就係講裝置安全帶，呢度嘅資料就係有另外一個方  
24 法係去總結，然後係提供畀委員會，啱啱喺呢個 TD-08 嘅文件嗰度有展示出嚟  
25 嘅，喺食飯之前。我而家想做嘅就係就請你去到第 4869-9，就呢度講到佢個職  
26 責或者工作範圍，就係呢個工作小組嘅工作範圍。

27 呢個佢哋嘅工作範圍，工作小組自行制定佢嘅工作範圍，呢度係羅列咗出  
28 嚟，4869，就至到去橫劃第 9，第 (2) 同埋第 (3) 項，或者我讀出嚟，就第 (2)  
29 項就係話「去檢視個技術可行性呢一個嘅成本效益，同埋適用性同埋其他嘅方  
30 面，就係話關於除咗係呢個會暴露嘅座位之外，係其他巴士所有座位都裝置安  
31 全帶嘅，呢個講緊就係話技術可行性、成本效益同埋適用性就同埋係裝置呢啲  
32 咁樣嘅裝置嘅安全設施，譬如話係呢個車速顯示器，同埋呢一個嘅電子穩定控  
33 制，就係全球定位系統呢一個速度限制同埋呢一個速度限制器，就係每小時 70

1 公里，同埋防撞同埋呢一個保持行車線嘅裝置，同埋就係監察呢個巴士車長嘅  
2 情況，包括究竟佢有冇係瞓眼瞓。」咁樣。

3 你今朝早就話畀我哋聽，喺你嘅證供裏面，亦都喺你個報告亦都有提到  
4 嘅，就係話關於安全嘅措施，譬如係喺倫敦巴士嚟講，其實一方面你好謹慎去  
5 睇嗰個成本，但係另一方面亦都好睇嗰個效益，就係引入啲措施之前會咁樣去  
6 做。

7 所以我就想問下你嘅意見，就係話三個月，4869-11 嘅，呢度講嘅就係話  
8 喺檢討之後，就係會有一個啲建議，就係三個月之內去提交嘅。你覺得三個月  
9 係夠定唔夠呢？就去好小心、好謹慎睇嗰個成本同埋個效益，就頭先我哋睇到  
10 喺個工作範圍之中，有一系列嘅安全裝置，你覺得夠唔夠？

11 MR MIKE WESTON：（經傳譯員）喺倫敦嗰個情況，首先就係關於我哋今朝早講  
12 嗰個智能車速輔助系統，我哋之前同埋之後我哋都要收集數據，呢個係一個嘅  
13 經驗，同埋就係話我哋用咗幾多時間就係倫敦運輸局就係做嗰個巴士安全嘅計  
14 劃，2016 年開始嘅，但係我哋下一個月先至係 2018 年先至講第一期點樣做，  
15 2019 年先至落實嘅。所以你可以話倫敦運輸局用咗太多時間去考慮、去討論呢  
16 啲咁嘅建議嘅，就其實我哋可以做快啲嘅。

17 但係試驗計劃裏面嘅數據，你係需要有一少部分嘅巴士就係用好長時間去  
18 試，又或者好多巴士用比較少嘅時間去試，先至有足夠嘅數據。當然，理論上  
19 你可以喺三個月之內係做個試驗計劃，但係如果我哋真係需要好謹慎去睇呢啲  
20 嘅數據嘅時候，你就係要做——就係多啲時間，或者你需要更加嘅樣本嘅巴士先  
21 至做得到，所以三個月好似係太少，喺倫敦嚟講，嗰啲人，當然有人會講話倫  
22 敦運輸局係可能要做快啲都未定，但係我哋亦都要平衡嘅。

23 主席：（經傳譯員）關於呢個智能車速輔助系統喺倫敦就係有兩個路線係試驗嘅，係  
24 咪牽涉到都有好多部嘅巴士呢？

25 MR MIKE WESTON：（經傳譯員）我其實就唔係好記得，19 號其實都係條大線嚟  
26 嘅，可能係三十、四十，但係 486 就應該係少啲嘅。三個月如果你假設對我哋  
27 嚟講，如果我哋真係有去延誤嘅說話，其實真係太過快，太短喇時間，即係要  
28 去試咁多、咁多唔同嘅選項。

29 MR DUNCAN：（經傳譯員）唔該晒。而家我就想去睇一睇 4 月。

30 主席：（經傳譯員）喺做呢個之前，呢個係 3 月 13 號嘅議程，就係講話呢個嘅報告  
31 會係喺三個月之內提交畀運輸署署長，但係其實已經係過咗六個月，最終嘅報  
32 告都仲未提交嘅，就畀你知道。

33 MR MIKE WESTON：（經傳譯員）我覺得就三個月就太過有野心喇，如果咁樣做。

34 主席：（經傳譯員）鄧律師，或者有另外一件事我都想提一提嘅，喺立法會係有個會  
35 議嘅，就係同呢個工作小組有關，係 2 月 15 號，你會唔會喺某個階段，你都會

1 講一講呢一點呢？因為佢哋就通過咗三個動議嘅。

2 MR DUNCAN：（經傳譯員）係，我係...

3 主席：（經傳譯員）因為可能你都要提一提，因為會話到畀我哋聽個背景點解運輸署  
4 係要考慮佢哋工作小組裏面要考慮嘅事項。

5 MR DUNCAN：（經傳譯員）我就想希望按住時序去睇啲事件嘅，喺 SEC-3 嘅文件冊  
6 嗰度會見到嘅，第 1342 頁，喺呢一頁上面，Weston 先生你見到就係喺立法會  
7 嘅運輸事務委員會佢哋嘅會議，就係 2018 年 2 月 15 號嘅會議嘅會議記錄，就  
8 係工作小組第一次會議之前，嗰個會議就係喺 3 月舉行嘅，我哋頭先睇到。  
9 1359 頁--請畀少少時間我。

10 主席：（經傳譯員）好呀，你慢慢。其中有一段就係第 3 段嚟，第 3 段，1360 頁  
11 嘅，其中一個動議裏面就係話裏面列出咗呢一個委員會--立法局委員會就係促  
12 請政府係去考慮同埋探討一系列嘅措施。

13 MR DUNCAN：（經傳譯員）喺第 1356 頁，我哋就會睇到究竟呢個動議係點樣嚟  
14 喇。有討論到就話有啲咩嘢措施可以加強巴士安全，係第 59 頁講，就係「副主  
15 席就係建議係減低巴士意外裏面嘅傷亡數字，所有嘅專營巴士公司就應該係考  
16 慮係喺所有嘅巴士上面嘅座位係加裝安全帶，可以分期咁樣做，陸頌雄先生就  
17 係話佢話喺龍運巴士公司嘅時候，其實係所有嘅巴士係有好多--全部都有安全  
18 帶，但係點解而家有呢咁樣。

19 呢個運輸署署長就係話喺呢個新嘅巴士--喺 2003 年購置嘅巴士係一啲有  
20 遮擋嘅位置嘅時候都有安全帶，但係 2007 年一個嘅意外之後，巴士公司就係已  
21 經同意咗運輸署嘅要求，就係話有遮擋嘅位置同埋喺上層嘅前面都應該係有安  
22 全帶嘅，呢個運輸署同埋其他嘅巴士公司，包括九巴，都會係會係積極考慮去  
23 睇下可唔可以加裝所有嘅座位都有安全帶，呢個董事總經理九巴就話佢對呢個  
24 持開放態度，佢亦都會同運輸署去傾呢樣嘢。運輸署答陸仲雄先生嘅問題嘅時  
25 候，就係話佢哋曾經龍運就係所有巴士裏面嘅座位都有安全帶，但係因為太少  
26 嗰個用--使用率太低，所以佢哋就有喇，而家。

27 毛議員--毛孟靜議員就係話其實有一啲嘅專家就話即使有呢個安全帶，亦  
28 都未必可以減低傷亡數字嘅，佢亦都好關注如果即使所有座位都有呢一個嘅安  
29 全帶，有冇困難就係要求所有嘅乘客都係去戴上呢；佢亦都就係會問下會唔會  
30 係做一個公眾諮詢。運輸署署長就話政府當局係喺呢方面係持開放態度嘅，但  
31 係除咗話呢一個技術嘅可行性，究竟乘客是否接受呢樣嘢都係應該要考慮嘅，  
32 佢會係喺一個月之後，呢個九巴就會係提交一個調查報告，佢亦都會係睇番個  
33 調查報告，然後先至去決定或者考慮使唔使去裝置一個安全帶。」

34 喺 1359 頁，喺第 77 頁，「個主席就係話佢亦都係收到三個嘅動議，佢認  
35 為呢啲嘅動議同嗰個議程係有關嘅，而委員都係同意處理呢啲動議嘅。」

1 陳克勤先生就係動議人，呢個動議。喺 1360 頁就係有英文嘅翻譯嘅，呢  
2 個第 3 段就講，就係「探討有啲咩嘢方法，點可以改善巴士嘅安全，包括就係  
3 一啲高風險嘅座位亦都係增加個保護裝置，係喺更多嘅座位上面係加裝安全  
4 帶，同埋係分期係強制乘客應該係戴安全帶，同埋係喺巴士司機嘅外面係裝置  
5 一個嘅外置嘅攝錄機，同埋係改裝呢一個限速器，去確保喺一個高風險嘅道路  
6 上面有係安全嘅行車嘅。」

7 所以你睇到立法會嘅呢一個動議就係工作小組嘅第一次會議之前就舉行  
8 嘅，所以都係有提到一啲譬如話係裝置安全帶嘅一啲好處同埋難處嘅。

9 MR MIKE WESTON: Yes.

10 MR DUNCAN: (經傳譯員) 然後我就想跟住時序，我哋就睇番工作小組第二次會議  
11 嘅會議記錄，呢個係 KMB-12 4887-1。

12 主席: (經傳譯員) 呢個係 2018 年 4 月 23?

13 MR DUNCAN: (經傳譯員) 係，冇錯，呢個係 2018 年 4 月 23 號嘅會議，呢啲係個  
14 會議記錄，相關嘅部分就係 4887-5 頁，就去睇我哋呢啲嘅「巴士嘅營運者佢  
15 哋就同呢一個製造商睇下有冇辦法、有冇可行性可唔可以係喺座位上面係安裝  
16 安全帶，佢哋就會呢個都係可以，係有啲新嘅巴士去購買嘅時候就係可以裝置  
17 安全帶嘅，九巴同埋龍運就話會差唔多係每一架雙層巴士就係要 5,000 英鎊  
18 嘅，如果要咁做，所有嘅巴士營運商就都同意喺新購買嘅單層同埋雙層巴士都  
19 會係安裝安全帶嘅。

20 至於啲已經採購但係仲未送運嘅新巴士，九巴、龍運表示佢哋係會要求呢  
21 個生產商係喺所有嘅乘客座位度安裝安全帶嘅，如果係可行嘅話，而九巴、龍  
22 運就話喺 18 年 9 月之前送抵嘅一百四十五架新巴士都可以係喺所有嘅座位度安  
23 裝安全帶嘅。九巴同埋新大嶼山巴士就通知咗運輸署就係喺 18 年 4 月嗰陣時，  
24 如果係供應商係可以--即係佢哋係可以喺所有嘅乘客座位安裝安全帶嘅。

25 至於現有嘅巴士，九巴、龍運同埋城巴、新巴就表示呢一個喺所有乘客座  
26 位安裝安全帶嘅技術可行性評估仍然係未明朗嘅，即使技術上係可行，呢個問  
27 題仍然係要進一步考慮，因為要考慮到相關嘅財務安排同埋對巴士營運嘅影  
28 響，因為就要係相當嘅時間係去改裝啲巴士。運輸署就鼓勵所有巴士公司去繼  
29 續探討喺所有乘客座位加裝安全帶嘅技術可行性，應該喺每個巴士型號都去探  
30 討，然後先作出決定嘅。」

31 呢個就係第二次會面之後嘅結論，即係第二次同埋第三次嘅會議之後得出  
32 嘅結果，呢個就係 6 月 21 號，即係有 3 月、4 月同埋係 6 月。

33 喺 KMB-12 文件冊 4908-1 頁嘅，同安全帶有關嘅部分就係喺 4908-7 頁  
34 嘅，喺第 25 段，就話喺「會議上同意係可以喺所有新嘅巴士嘅乘客座位係安裝  
35 安全帶嘅，係可以符合相關嘅國際標準，而所有嘅巴士公司就承諾所有新嘅專

1 營巴士都係會喺全部嘅乘客座位度安裝安全帶嘅。」而額外嘅支出將會係每架  
2 巴士大概 5,000 鎊。

3 第 26 段，「至於現有嘅巴士，喺會議上係提到，喺某啲現有雙層巴士型  
4 號上層嘅所有乘客座位加裝安全帶係可行嘅，而九巴、龍運就表示佢哋會喺巴  
5 士嘅上層所有座位加裝安全帶，而喺呢啲係某啲長途嘅巴士或者喺一啲某啲行  
6 走高速公路嘅路線嘅。

7 而九巴、龍運就話到咗 2019 年中就會大概有四百新巴士會係所有嘅乘客  
8 座位度安裝安全帶嘅。九巴、龍運就會將呢啲巴士調配去上述嘅路線。喺現有  
9 嘅巴士加裝安全帶就要視乎實際嘅情況或者要求。

10 就住九巴、龍運嘅措施，喺會議上係同意喺現有嘅巴士加裝安全帶嘅，而  
11 係相關即係喺現有巴士安裝安全帶嘅成本同埋所需嘅時間，根據海外嘅經驗，  
12 就有足夠嘅證據支持佢成為一個強制嘅--所有巴士嘅強制要求。但係委員同意  
13 至於一啲冇保護嘅座位同埋一啲冇企位嘅車廂係需要嘅。

14 喺呢方面，城巴、新巴就被要求去考慮喺某啲長途巴士路線嘅上層所有座  
15 位加裝安全帶或者喺一啲喺高速公路行走嘅某啲路線，城巴、新巴表示會好難  
16 調配佢哋嘅巴士只係行走某一啲嘅路線，因為佢哋嘅巴士每日都會係調派去唔  
17 同嘅路線嘅。同時城巴、新巴亦都係表示好少乘客會係用安全帶，所以喺現有  
18 嘅巴士度加裝安全帶喺財務上係不可行嘅。城巴、新巴要求政府去支付加裝安  
19 全帶嘅費用，如果政府係咁樣要求嘅話。」

20 而個結論，喺第 31 段，就係話「運輸署係要求所有嘅專營巴士營運商去  
21 估計一啲行走巴士停站比較少、高速公路嘅長途巴士路線同埋相關嘅巴士數  
22 目，並將呢一個資料係儘早交界運輸署參考。」

23 我哋而家就睇另外一份文件，就係 4938-1，呢啲就係第三次會議嘅記  
24 錄，就係喺今年 6 月 27 號進行嘅，呢個就係一個專營巴士車內安全裝置嘅工作  
25 小組，換句話講，呢個就係六日之後所進行嘅一個會議。

26 我哋睇 4938-5 頁，第 15 段，嗰個標題就係喺所有嘅乘客座位安裝安全  
27 帶。「運輸署通知會議就係同佢哋就係喺長途巴士路線安裝安全帶嘅睇法，或  
28 者就係一啲喺高速公路行走而上落係比較少嘅路線，運輸署已經係要求專營巴  
29 士商係去提供參與呢啲服務路線嘅巴士數目。新巴、城巴強調佢哋唔同意呢一  
30 項嘅加裝工作，除非係由政府係畀錢嘅，咁亦都係睇到係需要三至四名技術嘅  
31 勞工，要用一個星期先可以為一架巴士加裝安全帶嘅，如果考慮到呢一個人手  
32 嘅支出同埋物料嘅支出，加裝一架巴士加裝安全帶嘅成本會大概係 24 萬嘅。」

33 而最後一份文件，我都想帶你睇一睇嘅，呢份就係運輸署交界立法會交通  
34 事務委員會喺今年 7 月提供嘅更新文件，呢一個就係 TD-1 文件冊 403 頁嘅。  
35 喺 403 頁，呢個標題你見到就係 2018 年 7 月 25 號討論嘅事項，就係畀立法會  
36 交通事務委員會嘅，標題就係改善專營巴士嘅安全。我哋睇第 412 頁，你見到

1 呢份就係由運房局、運輸署提供嘅文件就係喺今年 7 月嘅。

2 文件嘅目標就係寫咗喺 403 頁，而喺背景底下就講到呢一個工作小組同埋  
3 工作範圍，喺呢份文件有一啲部分就係講到安全帶嘅，我想你睇下第 16 段，就  
4 係 409 頁嘅，「就住以上 10 至 15 段所提到嘅要點」，嗰啲部分就講到一啲嘅  
5 詳情，即係我哋已經提到㗎喇。

6 「工作小組就得出以下嘅建議，目標就係為呢啲坐低嘅乘客提供更加多嘅  
7 保護，首先喺未來採購新嘅巴士應該喺所有座位都提供安全帶；而

8 (b) 就係喺進行進一步嘅技術營運同埋財務評估之後，係可以考慮喺某一  
9 啲嘅巴士路線嘅上層嘅座位提供安全帶嘅。換句話講，即係行走一啲巴士停站  
10 比較少、高速公路嘅長途路線。

11 運輸署係會要求專營巴士商去進一步同巴士製造商去探討喺唔同巴士型號  
12 嘅上層加裝安全帶嘅技術可行性，同埋亦都係要考慮到呢一個營運同埋容量同  
13 埋係要決定一個加裝工程嘅時間表，同埋呢個財務嘅可行性，然後先至去決定  
14 究竟會唔會喺 16 (b) 段所講嘅長途巴士路線嘅上層可唔可以加裝安全帶嘅。同  
15 時，運輸署會同專營巴士商去宣傳乘客使用安全帶，如果係有安裝嘅話（換句  
16 話講，就係一啲冇保護嘅座位，即係新嘅巴士上面冇保護嘅座位）。」

17 我就會問幾個問題嘅，我就會講番委員會已經聽取咗嘅證供嘅某啲部分  
18 嘅，首先就係城巴嘅證供，即係喺早前嘅聆訊佢哋係有作供嘅，呢個就係第 4  
19 日嘅謄本嘅，第 102 頁。

20 主席：（經傳譯員）邊一份文件冊㗎，你講緊？

21 MR DUNCAN：（經傳譯員）2A 文件冊嘅。

22 主席：（經傳譯員）呢個背景就係 18 年 5 月 30 號。

23 MR DUNCAN：（經傳譯員）冇錯，呢個就係之前我哋聽取嘅證供㗎嘅。我想你睇  
24 102 頁，我想你睇番第 101 頁第 15 行，我就喺度問緊城巴嘅 Samuel Cheng  
25 先生，我就問到呢一個財務嘅安排，就係「如果係可以支付呢個部分嘅話，會  
26 對安全有咩嘢幫助呢？」

27 鄭先生就話「我唔可以舉到任何可以改善安全嘅例子，但係有一啲事情可  
28 能公眾會覺得係可以改善到安全嘅，其中一樣嘢就係喺上層加裝安全帶。今朝  
29 李先生就講到成本，就會係每架巴士 15,000 至到 20,000 金鎊嘅，我哋係有  
30 一千一百架呢一類嘅巴士，如果佢哋全部都要喺上層加裝安全帶嘅話，總成本  
31 將會係 1 億 8 千萬至到 2 億 4 千萬港幣。」呢個就係城巴嘅情況。

32 我想你睇番九巴嘅部分，就係喺第 15 日，...

33 主席：（經傳譯員）首先想講下呢一個成本嘅問題，呢個就係 102 頁頁底嗰度，想  
34 Weston 先生睇睇嘅，第 19 行，或者第 16 行。

MR DUNCAN: (經傳譯員) 第 16 行就講話「今朝我哋講到喺車上有一啲嘅冇保護嘅座位，佢哋已經係裝咗安全帶，我就成日搭呢啲巴士嘅，但係我就好少見到乘客--即係呢啲座位嘅乘客會戴安全帶，以後如果你要我哋公司去使 1 億或者兩億或者甚至超過兩億做呢件事情嘅話，我哋就好懷疑究竟係冇用，即係如果政府係有呢個要求嘅話，如果係真係要加裝安全帶，我希望政府係會提供資助畀我哋係去安裝安全帶嘅。呢個就係其中一個例子，唔該晒。」

主席就話「你嘅意思就係如果政府係認為係需要咁做，因為乘客可能係想戴安全帶，但係根據你嘅經驗，如果佢哋唔咁做嘅話，應該係由政府去出錢，而唔係由你哋自己畀錢嘅？」

鄭先生話「如果政府認為係有需要乘客去戴安全帶，我希望政府係會資助呢一個安裝嘅工作，如果唔係，就--即係如果要我哋自己畀錢，就會係好浪費資源。」

睇番第 58 頁，...

主席: (經傳譯員) 係咪呢個謄本，第 4 日？

MR DUNCAN: The transcript, yes. (經傳譯員) 鄭先生早前都係有類似嘅睇法嘅，喺第 58 頁嘅 24 行，我就講緊一個城巴遠期計劃其中一部分嘅，第 25 行，我就話「係喺上層嘅所有座位安裝安全帶係可行嘅，但係根據我哋嘅觀察，而家好少人係會喺呢個未經保護嘅座位嗰度戴安全帶嘅，如果係冇立法係要求專營巴士嘅乘客安裝安全帶嘅話，而加上由執法單位去嚴格執行嘅話，喺所有座位安裝安全帶只會係浪費資源，因為多數嘅乘客都唔會戴嘅，即使係有提供嘅話。」

好喇，講完城巴，而家講九巴同埋近期啲嘅聆訊，第 15 日，9 月 13 號嘅，第 6 份嘅資料夾，第 15 日，18 頁，第 20 行嗰度，我就問過一個問題嘅，係關於新嘅巴士裝安全帶，我相信佢哋有安全帶嘅，或者睇番前少少，第 15 頁，24 行，李生，Roger Lee 就係九巴嘅，佢提到就係上層裝安全帶嘅可行性，「喺上層裝安全帶，技術上我哋係需要考慮到嗰個地心吸力嘅問題，政府諮詢過我哋同埋有關嘅供應商關於嗰個可行性--技術上可行性同埋個進度嘅。安全帶比較重嘅，如果你係要喺上層安裝，政府係需要考慮到嗰個傾側嘅測試，如果係技術可行，就唔會係一個問題，但係兩個供應商富豪同 ADL 嗰個進度就係喺正面嘅。」

跟住佢就係講到嗰個財政上嘅影響，就係喺呢個加裝安全帶。

「價錢唔平嘅，即係喺今年初嘅時候，就有個特別委員會就發出一個清楚指示，我哋嘅巴士 19 年買嘅同埋之後嘅就有安全帶，至於話加裝安全帶，如果可行嘅話，特別係啲長途嘅路線，我哋係會喺上層加裝安全帶，我哋唔希望係進一步有意外嘅，所以個成本唔係我哋主要考慮，有關安全帶就需要一加巴士就係需要 20 萬嘅，係上層咁計。」

1 「有幾多架巴士係會加裝呢？喺呢個車隊入面有幾多架呢？」

2 梁生（另一位代表）就話「我相信係三千六百部長途嘅巴士。」

3 跟住就第 22 段嗰度，李生，Roger Lee 就話佢要補充，「目前我哋有係  
4 四千二、四千三架巴士，呢個係九巴、龍運加埋，有啲巴士就係有安全帶，但  
5 係其他佢哋係明年將來嘅年份就會退役㗎喇，呢啲巴士係會兩、三年退役，但  
6 哋就唔會加裝嘅。對於長途線嘅巴士，我唔知道個實際個數字，但係三分一就  
7 會係長途嘅。」

8 主席喺 22 行嗰度就話「李生，你講過就話加裝三千六部嘅長途巴士，你  
9 係咪更改你嘅聲明，就話係一千呢？」佢就話「係嘅。」

10 第 5 行，就話「我就係嘗試就計一計數，一千部巴士，20 萬，每部巴士  
11 20 萬？」「係。」

12 「個數字就係 2 億元嘅？」梁博士就話「係嘅。」

13 「呢一點就需要同政府傾嘅？」個答案就係「唔會。」

14 好喇，最後，我想你留意一下嘅，就係我哋係聽取過警方嘅證供，...

15 主席：（經傳譯員）我哋講呢度之前，或者喺嗰個謄錄本嗰度，你正話提到第 16 頁  
16 嗰度，第 17 行，「喺今年年初就係我哋公司成立咗個委員會，就係特別委員會  
17 發出指示，我哋嘅巴士 19 年或者之後採購嘅係會有安全帶嘅，至於話安全帶嘅  
18 加裝，如果可行嘅話，特別係長途線，我哋係會喺上層嗰度係安裝安全帶  
19 嘅。」

20 我諗清楚啲嘅，就係呢個係提到九巴係就住大埔道交通意外佢提交嘅報  
21 告，呢個就係 KMB-1A 第 98 頁，同埋第 39 段、第 40 段。

22 MR DUNCAN：（經傳譯員）你睇到嘛，Weston 先生？

23 MR MIKE WESTON：（經傳譯員）係，睇到嘅。

24 MR DUNCAN：（經傳譯員）KMB-1A，98。

25 主席：（經傳譯員）呢個就講番個背景，係運輸署長係規定九巴喺一個月之內提交嘅  
26 一份報告，喺 3 月 12 號提交嘅，呢份報告就係喺工作小組開會之前嘅，就正話  
27 都有講過邊個出席咁樣。或者我想請 Duncan 大律師同我哋讀一讀，等我哋知  
28 道九巴喺呢個工作小組之前嗰個立場係點樣嘅。

29 MR DUNCAN：（經傳譯員）或者睇番 98 頁，文件夾嘅第 98 頁，Weston 先生，你  
30 睇到呢個就係 3 月 12 號，39 段，巴士公司就話喺報告當中係咁講嘅，呢個係  
31 昇運輸署長嘅，「事件之後，就立法會議員提出咗不同嘅意見同埋建議，傳  
32 媒、公眾人士都提到應該採取咩嘢措施嚟到去提升公共巴士運作嘅安全，特別

1 巴士乘客嘅安全，特別委員會考慮過呢啲事項，諮詢過九巴嘅巴士供應商，同  
2 埋作出若干嘅建議，而九巴嘅管理層係會執行同埋係進一步探討嘅。」

3 第 40 段，「九巴已經要求咗供應商係喺所有嘅座位安裝安全帶，呢個新  
4 訂嘅巴士，喺 18 年 3 月 5 號之後就會係既定嘅安排㗎喇。至於而家現行嘅巴  
5 士，如果有啲路線係需要嘅話，係可以喺上層分階段咁嚟到去安裝呢啲安全帶  
6 嘅，呢個係九巴嘅巴士。」

7 主席：（經傳譯員）唔該晒。

8 MR DUNCAN：（經傳譯員）好喇，最後就想請你睇一睇警方所畀嘅證供，呢個就係  
9 第 17 日嘅作供，日期就係 18 年 9 月 24 號星期一嘅，第 7 號嘅文件夾。

10 主席：（經傳譯員）唔該晒。

11 MR DUNCAN：（經傳譯員）或者想請你睇一睇第 50 頁，當時就係主席同歐陽先生係  
12 同 Stephen Baker 先生係對話嘅，Baker 先生就係警隊嘅代表，佢係總警司  
13 㗎嘅，或者睇番第 49 頁先，主席就提到安全帶嘅問題，即係小巴，公共小巴就  
14 有安全帶嘅。

15 主席就話「係咪小巴有？」Baker 先生話「係嘅。」

16 「其實喺執法嗰度有冇困難？係咪好容易嘅呢？」Baker 先生就話「好難  
17 執行嘅，因為呢個都唔係定期咁執行嘅，呢個係有時咁樣執行，警務人員就決  
18 定要執法，就係因為道路安全嘅問題，呢個係唔單只係一個環節嘅問題，即係  
19 需要宣傳，需要經常嘅宣傳嘅。我希望啲人就唔會話因為驚住檢控，然後先至  
20 係守法。」

21 主席話「呢個係需要好長嘅時間先至說服到啲人係坐車係戴安全帶。」佢  
22 就話「我哋認為如果啲人有得選擇，咁就更加好嘅，即係去改善佢哋嘅道路安  
23 全作為一個選擇，一個選項。」

24 歐陽先生就提咗一個問題，就話「安全帶嗰方面，根據小巴嘅經驗，警方  
25 喺執法方面係咪好成功呢？」Baker 先生話「我有啲嘅執法嘅數字，但係我希  
26 望市民係會守法，因為係對佢哋好嘅，即係而唔係進行檢控咁樣。」

27 「但係正如剛才所講，大多數嘅人就唔會喺小巴嗰度係繫安全帶，執法係  
28 好困難嘅，我哋可以睇到點解你預計喺巴士嗰度亦都有同樣嘅趨勢嘅？」Baker  
29 先生話「係嘅。」

30 好喇，有好多資料係提供咗畀你消化嘅，Weston 先生，但係你可以睇到  
31 呢度嘅情況就係肯定就係有個決定就係話至於話新嘅巴士以後--有個建議就話  
32 以後新採購嘅巴士就係會有安全帶嘅，每個座椅都係會有安全帶嘅，不管嗰輛  
33 巴士係行走呢個市區路線，咁係好擠逼㗎喇，我相信應該，亦都係有一啲企位  
34 嘅乘客。我哋聽到巴士公司嗰個額外嘅成本，就會係差唔多一架巴士就係

5,000 鎊嘅，呢個係其中一方面。

第二方面就係喺上層嗰度嘅座椅加裝安全帶，技術上係可行嘅，對於行某啲路線嘅巴士，即係行一啲譬如話高速公路嘅路線嘅巴士，如果你替兩間專營巴士公司嚟講，嗰個成本就差唔多係 4 億。

我相信委員會明白嘅就係你對呢兩方面其實都可能有你嘅意見，即係新購置嘅巴士係要安裝安全帶，呢個唔會話好大嘅開支。第二，就係加裝安全帶嘅問題，喺行走一啲高速公司、特別路線嘅巴士加裝安全帶，我好希望係聽下你嘅意見。

MR MIKE WESTON：（經傳譯員）係嘅，或者我畀一啲一般嘅觀察先，我相信初步睇嚟，從今日嘅證供聽到就係安裝安全帶就係技術上係可行嘅，亦都係有佢嘅優點嘅，即係有做過研究係咪可行，成本就係另一個問題，係咪有實際嘅優點呢？

從我嘅聽到嘅證供，就係話喺香港專利巴士經營者加裝安全帶，呢個佢哋接納呢個安排嘅速度好似呢個運輸局拒絕呢個安排係咁快咁樣，一樣咁快。我相信安全帶的確有佢嘅優點嘅，喺交通意外嘅時候，汽車又好，咩嘢車都好，的確係佢嘅幫助嘅。

我哋都係聽過一啲執法嘅問題，係咪有能力去到執法嘅問題，另一個問題提到嘅，就係喺證供嗰度係未必有提，就係係咪能夠令到呢啲安全帶係成日都係運作良好呢咁，最緊要就係你有啲安全帶，如果運輸署同埋專營經營者係要啲人係繫安全帶，就確保佢哋係用得到先得嘅，呢個亦都可能係一個好大嘅財政負擔嘅。喺保養嗰方面亦都係一個問題，經常要保養住呢啲安全帶。

我認為喺好多評估嗰度有睇到嘅就係嗰個成本效益嘅問題，安全帶嗰個成本，加裝安全帶亦都係一個好大嘅成本負擔嚟嘅，喺啲新巴士，5,000 鎊，亦都係有一個成本嗰度㗎嘛。主要嘅問題就係投資呢啲錢落去，個效益係點樣，安全帶喺減少交通意外傷亡嘅時候相對於嗰個——嘅價錢相對於嗰啲錢擺喺其他嘅措施嗰方面係點樣比較呢？其中一個擔憂嘅地方就係九巴投資龐大嘅金錢，呢個當然係值得歡迎，但係始終個危險就係有其他嘅高科技嘅措施係可以安裝嘅，亦都係同樣可以係投資喺嗰度嘅。

呢點，每一釐使落去，愛嚟提升安全係咪可以係取得更加好嘅效益呢？譬如話嗰個車頭嘅設計、自動減速、自動剎車等等嗰啲咁嘅措施，嗰啲錢係咪花得更加有成本效益呢？

啲錢一係就係嚟自現時專營巴士嗰個嘅利潤；我聽到一啲嘅證供就係都唔係好高嘅，一係就嚟自嗰個乘客，個票價會高啲；一係來自政府。始終都係呢三個來源係得到經費嘅，始終問題就係點樣使呢啲錢，點樣可以使得物有所值嘅，點樣可以取得更加好嘅成效。如果你加埋呢啲咁嘅數字，嗰個錢都唔係少嘅。

1 其實我就要問，係咪可以係花喺其他嘅形式嘅科技以取得更加好嘅成效呢  
2 咁？但係相對於倫敦、香港嘅比較，最重要嘅就係運輸局佢哋就唔係好贊成呢  
3 個安全帶，倫敦就係好平坦嘅地方，唔係話好多車就係每小時四、五十里咁  
4 行，大多數嘅巴士係喺倫敦就係同香港係唔同嘅，香港其實嗰個地勢就係好有  
5 挑戰性嘅，亦都係有唔同嘅。

6 所以我就會睇下其實特別係一啲高風險嘅路線點樣去處理，我哋可能就唔  
7 係話一刀切去做一啲嘢，可能係有啲唔同嘅方案。有一啲嘅路線其實可能真係  
8 需要安全帶嘅，但係我認為你哋應該選擇得比較好啲，而唔係一刀切嘅去做。

9 正如我所講，我就會問一個問題，就係話究竟保養方面究竟有需要幾多嘅  
10 承擔呢等等。

11 主席：（經傳譯員）你可唔可以埋啲個咪？

12 MR MIKE WESTON：（經傳譯員）就去確保呢個安全帶其實係保養得好，亦都係有  
13 一個好嘅功能繼續，使到佢哋可以繼續被使用嘅。當啲啲乘客去到架專營巴士  
14 嘅時候，其實真係嗰啲安全帶真係情況係好嘅。

15 主席：（經傳譯員）你可唔可以話畀我聽嗰個保養費係幾多呢？而家喺啲——譬如係喺  
16 英國，譬如旅遊車會唔會有㗎？

17 MR MIKE WESTON：（經傳譯員）喺倫敦嚟講，譬如話佢哋係一啲服務型嘅巴士嗰  
18 度，嗰個保養嘅挑戰就可能有啲人刻意破壞，就或者有啲人就係喺個安全帶嗰  
19 度就塞住嗰啲窿呀咁樣樣。

20 主席：（經傳譯員）香港嚟講，都係唔會係一個問題嚟嘅。喺呢一個保養會唔會係有  
21 啲嘅技術層面都會係一個問題嚟嘅呢？

22 MR MIKE WESTON：（經傳譯員）我唔係好清楚，就我相信就應該一定係會有一啲  
23 定期嘅保養嘅工作要做嘅，喺英國嘅一啲嘅旅遊車嚟講，其實即係刻意破壞呢  
24 樣嘢就唔係話真係個問題好嚴重嘅。或者我亦都係喺我個報告裏面講，就係附  
25 件 D 裏面，...

26 主席：（經傳譯員）請你稍等一下，鄧律師，你可唔可以畀我哋嘅頁碼呢？

27 MR DUNCAN：（經傳譯員）就係由運輸局係提交畀我同埋主席嘅，係第 160 頁嘅。

28 MR MIKE WESTON：（經傳譯員）有一個幻燈片呢度就係有講到...

29 主席：（經傳譯員）你有冇嘅頁數呢？

30 MR MIKE WESTON：（經傳譯員）冇錯喇，就係呢個喇，呢個。

31 主席：（經傳譯員）係。

32 MR MIKE WESTON：（經傳譯員）就係佢，呢一頁，2017 年嘅數字，就係話喺巴士

1 上面有啲人係跌嘅，就係 3,074 嘅數字，係 2017 年嘅數字。呢個就係睇到大  
2 部分嘅巴士上面嘅乘客受傷就係因為佢哋企喺度或者佢係上緊車、落緊車或者  
3 佢哋係上緊樓梯、落緊樓梯，就大概係百分之十三嘅，就係三千宗之中，大概  
4 係四百宗係呢一類型嘅。所以其實我所認為我哋焦點應該就係睇下嗰個企喺度  
5 嘅乘客，呢個係說明喺倫敦嗰個受傷嘅情況嘅分類，就係有啲人企喺度咁樣  
6 樣，同埋啲乘客喺乜嘢狀況底下喺架巴士上面係受傷嘅。

7 主席：（經傳譯員）喺遠期計劃裏面嘅一啲數字，鄧律師，2018 至到 2022 年就有  
8 講到有啲人就係佢哋係失咗平衡，佢哋跌嘅，亦都有啲數字就係嗰啲人坐喺度  
9 就係受傷嘅。2015 至 2016 年兩年，百分之五十一點五就係嗰啲企喺度嘅乘客  
10 嚟嘅，或者佢哋係失去重心、失去平衡，只係有百分之一嘅人就係佢哋坐緊嘅  
11 時候係受傷嘅，呢個似乎就係話就係坐喺度嘅乘客佢哋受傷嘅百分比係比較低  
12 嘅。

13 MR DUNCAN：（經傳譯員）呢個，主席，呢個好似似乎係我記憶所及嘅情況，可唔  
14 可以請我助手係將嗰個計劃再搵出嚟。

15 主席：（經傳譯員）另外一個問題係就呢個立法會議員就要求我哋審視下安全帶呢個  
16 問題，首先如果你唔配戴安全帶，你有咩嘢嘅受傷，可能似乎啲人就係話啲人  
17 喺架巴士行嚟行去、上樓梯或落樓梯，而唔係真係坐喺個座位受傷嘅，所以坐  
18 喺度嘅人受傷嘅比率係比較少。

19 另外就係話，其實而家我哋睇下而家巴士嘅人去使安全帶嘅情況係點樣，  
20 係咪應該做一個調查，呢一個城巴嘅董事總經理話畀我聽其實都冇人去戴嘅，  
21 其實會唔會我哋其實搜集一啲客觀嘅資料會好㗎？

22 MR MIKE WESTON：（經傳譯員）係好嘅，如果譬如話我哋係用一啲閉路電視去睇  
23 清楚究竟個使用率有幾多咁樣會係好。但係我認為你話要係裝安全帶嘅時候，  
24 你亦都係有一個宣傳運動去鼓勵啲人去配戴安全帶，如果你真係決定去投資去  
25 裝安全帶嘅說話，起碼都能夠將呢一個好處係擺到最大嘅。但係我哋嘅運輸局  
26 嘅數據顯示其實就呢個真係一個--係車上乘客嘅問題，呢方面唔係最大嘅。

27 主席：（經傳譯員）另外一個因素可能就係話係進行一個調查，就問下啲人因為呢一  
28 個巴士公司或者管理當局認為係安裝安全帶係安全嘅嘅，佢哋願唔願意使用  
29 呢？2007 年嘅時候，其實可能都--如果係，我有記錯嘅時候，就係都做過咁嘅  
30 調查嘅，佢哋就訪問咗，用電話訪問咗二千二百個人嘅。鄧大律師，可唔可以  
31 證實下呢一點呢？

32 MR MIKE WESTON：（經傳譯員）其實你點樣去問嘅時候，都會影響嗰啲人點樣去  
33 答嘅。

34 主席：（經傳譯員）係呀，係呀，譬如好似我哋話係脫鈎，咁都係有一個嘅全民投票  
35 去問呢啲問題都係有啲問題嘅。

1 MR MIKE WESTON：（經傳譯員）其實你問問題係一件事，但係實際上啲人點做係  
2 另外一件事嚟嘅。

3 主席：（經傳譯員）但係我認為如果係好專業咁去做，又會係好嘅。運輸署其實都畀  
4 過呢啲相類似嘅數據畀我哋。

5 MR MIKE WESTON：（經傳譯員）我就唔係咁講話其實安全帶就唔好嘅、係唔需要  
6 嘅，但係因為你要投資咁多錢，今日下晝我哋都講過有幾多錢，係咪啲錢係咪  
7 用得其所一啲呢可以？係咪真係有呢一個嘅成本效益等等，亦都會係帶嚟更多-  
8 -好多嘅好處。

9 主席：（經傳譯員）你就話如果我哋要花咁多錢嘅時候，呢筆錢就可能係用其--投資  
10 嚟其他嘅安全裝置會好啲嘅，而家可能冇使緊啲方面嘅錢。

11 MR MIKE WESTON：（經傳譯員）個營運商可能就係嚟緊要使一筆錢嘅，嚟緊呢幾  
12 年，但係其實呢筆錢係用緊其他用途更加物有所值嘅。

13 主席：（經傳譯員）等我解釋下，就我哋而家會小休，因為盧教授佢有其他嘅事情，  
14 佢一定要去嘅，但係我哋仍然都係要繼續嘅。我諗我哋而家要小休直至盧教授  
15 佢可以離開嘅。唔該晒。

16

17 下午 3 時 40 分押聆訊押後

18

19 下午 3 時 44 分恢復聆訊

20 出席人士： Hon Mr Justice Michael Lunn（倫明高），香港專營巴士服務獨  
21 立檢討委員會主席

22 歐陽伯權先生，香港專營巴士服務獨立檢討委員會委員

23 Peter N. Duncan（鄧樂勤）資深大律師，由高露雲律師行委聘，代  
24 表香港專營巴士服務獨立檢討委員會

25 Mr Mike Weston，獨立的客運交通顧問

26

27 主席：（經傳譯員）鄧律師。

28 MR DUNCAN：（經傳譯員）多謝主席。我就而家唔再講安全帶喇，Weston 先生。

29 主席：（經傳譯員）我哋頭先講啲數字，有冇搵到出嚟呢？

30 MR DUNCAN：（經傳譯員）對唔住，冇。如果我哋真係搵到嘅，我哋就會提交畀委

員會。

主席：（經傳譯員）我認為佢已經喺個螢幕上面。

MR DUNCAN：（經傳譯員）但係呢度就有講到主席你講過嗰啲嘅唔同類型嘅，就係百分之五十四就係失去重心，但係就係個巴士個乘客受傷係百分之三

主席：（經傳譯員）我相信呢個就係講緊坐喺度嘅乘客，因為我哋前面係講話失去重心咁嘛，呢啲就係嗰啲坐喺度嘅乘客喇。所以其實嗰個數字相距係好大，因為佢哋係坐喺度嘅時候，相對係少人係受傷嘅，好明顯個原因--所以就我哋喺有遮擋嘅座位嘅時候，我哋要裝置安全帶，我哋應該有原因嘅。

喺下層有啲座位前面就係有一啲嘅阻擋，所以即使你要拋開去外面，亦都唔會拋好遠，所以亦都唔需要下底個下層嗰度裝安全帶嘅，似乎咁樣就係個原因。

MR DUNCAN：（經傳譯員）主席，我就會話畀你聽個頁碼 KMB-12 第 5115 頁嘅。

主席：（經傳譯員）唔該晒。

MR DUNCAN：（經傳譯員）睇下仲有冇其他嘅意見或者問題，如果冇，我就唔再講安全帶，我就嚟到我第一個課題希望能夠同你探討嘅。呢個係你個報告嘅第 149 頁，嗰度提到，唔好意思，係應該係 146 頁嘅，係關於疲勞管理嗰方面嘅，喺 146 頁，呢個係巴士安全計劃嘅引言嗰度，呢個係講個係最近增加咗嘅項目就係疲勞管理方面，我就想係就呢方面問你幾條問題。

喺第 149 頁，7.6 段，你就話，最後一段你咁講嘅，「好清楚就係而家我哋嘅關注係越嚟越係關於行為安全嗰方面，特別係疲勞管理。」你可唔可以話畀委員會聽點解會有一個咁樣嘅改變呢？你所謂嘅「行為安全」係咩嘢意思呢？

MR MIKE WESTON：（經傳譯員）傳統嚟講，我哋就係講緊係安全管理或者係風險管理、調查意外同埋譬如話喺巴士嘅設計方面係有咩嘢改變、道路設計方面有咩嘢改變，同埋我哋嘅運作方面有咩嘢改變等等，呢個都會係呢一個巴士安全計劃裏面嘅部分嚟嘅。

我哋之前主席同我同倫敦巴士公司喺 8 月會面嘅時候，呢度都有提到，但係而家我哋就想掘深一啲，就係睇番嗰個根源嘅問題，特別係個司機嘅行為有啲咩嘢影響。

喺疲勞管理嘅其中一個例子就係如果有一個司機係涉及一個意外，以前即係傳統上就會問個司機發生咩嘢事，睇下嗰個司機即係喺嗰個意外嘅角色係乜嘢，即係我哋以前係會著重個意外本身，但係而家好多嘅巴士公司就開始唔單只睇嗰個意外本身，佢哋係開始同車長講喺意外之前半個鐘發生咩嘢事，即係有冇一啲同乘客嘅互動可能係會令到佢哋分心，例如啲公司亦都係會啲車司傾

1 佢哋個生活方式係點。

2 佢哋好多即係一啲好有經驗嘅車長，佢哋好多時都會係預早去返工，令到  
3 佢哋可以有充足嘅時間檢查佢哋嘅巴士先係去開車嘅，呢啲司機就會比較係準  
4 時去返工，而佢哋亦都係會比較清醒嘅，而呢啲巴士公司係會--即係佢哋唔單  
5 只係調查事件本身，佢亦都係會睇呢個同事事件有關嘅一啲元素或者環境，佢亦  
6 都係會睇下疲勞嘅可能嘅因素，有一啲嘅巴士公司係會經常係訪問佢哋嘅夜更  
7 司機，睇佢哋嘅個編更嘅情況等等。所以嗰個演變就係由睇個事件本身去到  
8 係訪問個司機本身嘅。

9 主席：（經傳譯員）你問啲司機點解佢會想開夜班車，佢哋會唔會係因為日頭想去接  
10 佢哋嘅小朋友，會唔會令到佢哋休息不足呢？

11 MR MIKE WESTON：（經傳譯員）有一啲巴士公司係表示一啲擔憂，點解佢哋經常  
12 係同一啲夜更司機傾偈呢？因為佢哋想去確保佢哋嘅工作同埋佢哋生活取得平  
13 衡嘅。因為有一啲嘅司機可能要同佢哋嘅另一半分擔呢個家庭嘅責任嘅，譬如  
14 話佢哋接完啲小朋友之後，可能會即係要休息三、四個鐘，先至去開車嘅，所  
15 以啲巴士公司就想了解多啲司機能唔能夠係履行佢哋嘅職務，所以呢一個相比  
16 起傳統嘅做法，係一個比較新嘅做法嚟嘅。

17 MR DUNCAN：（經傳譯員）喺車長培訓方面，有幾多係融入咗呢一個疲勞管理呢？

18 MR MIKE WESTON：（經傳譯員）以前一直都唔算係好多嘅，我自己覺得就未必係  
19 關車長嗰個工作時間事嘅，即係可能同安全帶一樣，可能有啲人會覺得個車長  
20 嗰個工作量係有關係，但係我覺得並唔係一個問題，英國係對工時係有管制  
21 嘅，就有跡象顯示呢啲司機係要超時去工作，佢哋喺更同更之間亦都有充足嘅  
22 休息，大部分嘅倫敦嘅巴士公司都唔係好擔心啲車長另外有工作嘅，有一啲公  
23 司會去睇下佢哋有冇其他嘅工作。佢哋亦都係會幫助車長，令到佢哋有足夠嘅  
24 休息同埋有一個健康嘅生活嘅。

25 主席：（經傳譯員）倫敦嘅巴士公司係可以睇到--即係揸巴士或者 Uber 車嘅司機嘅  
26 一個名冊，係咪？

27 MR MIKE WESTON：（經傳譯員）倫敦運輸局係的士嘅發牌機構同埋一啲私人預約  
28 車嘅，佢可以將呢一個資料庫同巴士公司分享，巴士公司就知道有一啲車長就  
29 會係--都係會開的士嘅，有一啲公司就覺得啲司機應該只係開巴士嘅啫，其餘  
30 時間應該要休息嘅。

31 主席：（經傳譯員）如果我有記錯，有一啲嘅巴士公司係會有限度地去檢查呢一個資  
32 料嘅，係咪呀？

33 MR MIKE WESTON：（經傳譯員）大部分呢啲檢查都係比較被動式嘅，就係就住一  
34 啲收到嘅資料，比較少公司就係全面檢查個司機會做緊啲咩嘢工作嘅。如果有  
35 車長病咗，如果佢哋認為呢個司機可能係去咗做其他工作，佢哋可能會調查

1 嘅。但係我哋嘅方向係由調查個事件本身去到搵一啲比較深層嘅原因，即係有  
2 咩嘢原因會引致到事件或者意外嘅。

3 傳統上，我哋通常都係睇究竟巴士公司有冇錯，或者睇下啲司機係有冇  
4 錯，定係會唔會向第三者進行索償，即係當然我係誇大少少咁講，但係而家會  
5 比較多係去搵出呢個問題嘅根源嘅，有一啲原因就並唔係一個完全嘅原因，但  
6 係你可以睇到呢一個係有建立咗一個安全嘅文化。

7 主席：（經傳譯員）喺呢個針對疲勞管理嘅文化嘅轉變，即係由邊個發起嘅呢？

8 MR MIKE WESTON：（經傳譯員）呢個就係因為倫敦運輸局係重新係重視呢個安  
9 全，呢個係一個聯合嘅責任嚟嘅，我諗巴士公司都係有責任，呢個係一個無終  
10 止嘅過程嚟嘅，喺今年 8 月，我哋會面嘅時候，倫敦運輸局嘅代表表示四十或  
11 者五十年前，最大嘅車廂——就係啲人踎低，因為就好多汽油喺個車上入面嘅，  
12 呢個就係好多年前，所以巴士公司係會越嚟越注意去減低呢個風險嘅，所以呢  
13 個過程係持續嘅，但係會越嚟越著重安全。

14 MR DUNCAN：（經傳譯員）倫敦運輸局有冇負責監督車長嘅培訓，定係交由巴士公  
15 司處理呢？

16 MR MIKE WESTON：（經傳譯員）培訓係可以分兩方面講嘅，首先呢一個駕駛考試  
17 就係一個全國交通部嘅要求，如果你要攞一個公共車輛嘅駕駛執照，你就要考  
18 一個駕駛試，就由一個汽車局進行考核，或者呢啲巴士公司亦都可以自己係進  
19 行考核嘅。

20 你攞到呢一個車牌之後，英國嘅司機每五年就要接受五日嘅認證培訓，多  
21 數嘅公司都會每年進行一日呢一個培訓，去維持司機嘅專業駕駛證書嘅，呢個  
22 係全英國嘅巴士同埋旅遊巴士司機都要做嘅，唔單只係倫敦嘅司機。司機係要接  
23 受一啲嘅訓練課程，而主要嘅課程，一個由 City and Guilds 認證嘅考核，  
24 呢個係一個專業巴士駕駛嘅課程，呢一個課程就係要喺你成為倫敦巴士司機一  
25 年內係完成嘅。而倫敦運輸局亦都發展咗一啲嘅培訓，呢個就係五日嘅認證課  
26 程嘅一部分嚟。

27 另外，我哋發展咗一個半日嘅培訓，就係由巴士公司提供畀所有嘅司機  
28 嘅，呢個培訓課程之中就有用一啲影片去話畀司機知道點樣可以去處理一啲嘅  
29 危機，啲司機就會見到喺意外之前係可以點樣去處理，然後就會——就去我哋會  
30 講解「你個駕駛表現點樣會影響到呢一個結果嘅」，呢個係一個半個鐘嘅培  
31 訓。

32 然後就有一個兩日嘅培訓，就係畀成個倫敦二萬五千個司機嘅，呢一個就  
33 係由倫敦運輸局安排嘅。呢個就係為咗改善顧客嘅滿意程度。因為好多人就批  
34 評倫敦運輸局同埋巴士公司就係就住巴士司機同埋乘客之間嘅互動嘅，所以呢  
35 個培訓就係想改善司機同埋乘客之間嘅互動嘅。

1 主席：（經傳譯員）呢個培訓叫咩嘢名？

2 MR MIKE WESTON：（經傳譯員）叫做 Hello London 嘅，就係每次就係培訓一百  
3 個司機嘅，就要用兩年嘅時間去培訓二萬五千個司機，就會由一個角色扮演嘅  
4 小隊去進行，佢哋就會進行一啲角色嘅扮演，然後就叫啲司機係去評論一下  
5 佢哋自己就會點樣處理呢啲情景嘅。

6 就呢個培訓就同安全有直接有關，但係可以話就係鼓勵啲司機係去用一個  
7 正面嘅態度同顧客互動、乘客互動同埋去處理一啲比較困難嘅情景嘅，同埋令  
8 到佢哋喺同乘客互動嘅時候就有咁大壓力，同埋可以平靜一啲。所以喺呢個方  
9 面都係同安全有關嘅，因為佢係會幫助一啲司機處理一啲比較難纏嘅情況。

10 主席：（經傳譯員）所以呢個就係包括同一啲比較惡嘅乘客係去互動，係咪？

11 MR MIKE WESTON：（經傳譯員）係嘅，因為有時你係出嚟同個乘客理論未必係最  
12 好嘅，你可能要係冷靜一啲，因為咁樣就可能引開咗你嘅注意力。

13 主席：（經傳譯員）呢個係咪由倫敦運輸局設計㗎？

14 MR MIKE WESTON：（經傳譯員）冇錯，就係由認證機構提供認證嘅。呢一個就係  
15 持續專業進修嘅一部分，喺呢個情況下，就係由倫敦運輸局係去統籌嘅，所以  
16 呢個係一項承諾㗎嘅，其中一個目標就係回應一啲乘客嘅投訴，就住呢啲司  
17 機，同埋令到司機處理乘客嘅方式更加一致嘅。呢個亦都係根據呢個巴士安全  
18 計劃底下，另外一個有同安全有關嘅課程，就係中央去統籌，同埋亦都係有認  
19 證嘅，呢個就大概係 2019 年開始。

20 主席：（經傳譯員）喺呢個課程嘅設計底下，有一啲嘅演員進行一啲角色嘅扮演，然  
21 後啲巴士司機就要回應，係咪咁樣做？

22 MR MIKE WESTON：（經傳譯員）冇錯，就係有唔同嘅情景，第一日就係司機入到  
23 個車廠，佢就要求下一個星期就調更，然後佢嘅上司就有理佢，然後司機就同  
24 呢一個上司係去理論，跟住之後佢開車，因為佢心情唔好，就因為一啲小事就  
25 同乘客爭拗等等。當演員問個司機佢會點樣處理，佢哋都好多都會話呢個佢哋  
26 嘅上司係唔啱嘅，佢哋啲乘客應該都要係有禮貌啲，跟住就講，如果司機處理  
27 嘅乘客唔同，可能個結果係唔同，然後啲演員就會係再係處理呢一個情景，所  
28 以就顯示其實你係可以改變呢個結果嘅，所以睇呢啲司機唔同嘅諗嘢嘅方法都  
29 係幾有趣嘅，因為佢哋一開始都覺得佢哋都係會咁做嘅，但係係會改變嘅。

30 主席：（經傳譯員）呢個課程嘅大綱有冇一個文字寫低嘅呢？

31 MR MIKE WESTON：（經傳譯員）呢個課程係由獨立嘅認證機構係認證嘅。倫敦運  
32 輸局係可以係向委員會分享嘅。

33 主席：（經傳譯員）即係可能係一個範本，本地嘅情況未必一樣嘅，但係嗰個方程式  
34 可能係相似嘅，可能係值得參考嘅。

1 MR MIKE WESTON：（經傳譯員）我會要求佢哋提供。

2 MR DUNCAN：（經傳譯員）我哋睇過呢一個半日嘅培訓同埋呢個 Hello London 嘅  
3 培訓，就係第 144 同 145 頁，就係你報告嘅一部分。

4 MR MIKE WESTON：（經傳譯員）係。

5 MR DUNCAN：（經傳譯員）講番呢個疲勞管理嘅問題，我想你睇第 146 頁同埋呢一  
6 版嘅最後嗰段，喺你準備呢份報告嘅時候，你其實就係同呢一個倫敦嘅巴士公  
7 司傾過嘅，就係有一個監察呢個疲勞嘅一個系統，就英文叫“Seeing  
8 Machines”，喺呢段，你亦都係畀過一啲嘅詳情嘅。呢個系統巴士公司係咪行  
9 緊，還是就而家都仲係試辦緊？

10 MR MIKE WESTON：（經傳譯員）呢個係一個試行，係巴士營辦商 RATP 係試行嘅，  
11 運輸局就會係評估，睇下係唔係將來喺嗰個巴士安全標準嗰度係納入喺裏面  
12 嘅，呢個係嗰個安全嘅創新基金嘅一部分，係關於嗰個疲勞嘅監察，我哋就會  
13 係測察巴士車長係咪眼係會瞓埋，如果係嘅話，就嗰張座椅就會震嘅，如果合  
14 埋眼就會係通知嗰個嘅上司，我哋喺嗰度有一啲嘅錄像嘅，係影住嗰個嘅車  
15 長，亦都可以就係同呢一個車長大家傾，喺嗰個傾談嘅時候就會講到嗰個疲勞  
16 嘅處理咁樣。就佢哋瞓眼瞓，跟住就瞓埋眼就瞓咗咁嘅情況。

17 佢討論嘅時候就會睇下係咪有一啲--有冇有一啲嘅醫療嘅問題，亦都係同個  
18 車長大家進行對話，傾下佢哋嘅生活方式咁樣。從嗰個試驗嚟睇，喺監察嗰個  
19 疲勞駕駛嗰方面呢個係有效嘅。

20 主席：（經傳譯員）呢個亦都係一個即時一個嘅功能，係咪？

21 MR MIKE WESTON：（經傳譯員）係嘅。

22 主席：（經傳譯員）嗰個影像就會係捕捉咗，然後嗰個主管人士就會係知道嘅，喺美  
23 國嗰度，個主管人員就會係--控制室就會係即時咁樣係提醒嗰個司機嘅，係咪  
24 呀？

25 MR MIKE WESTON：（經傳譯員）係嘅，如果車長喺當時係瞓咗嘅話，有關嗰個  
26 程序就唔會係導致任何意外發生，喺嗰個控制室嗰度如果係認為有疲勞駕駛嘅  
27 情況，就會係知會巴士公司，同車長就大家進行對話，就睇下有冇有一啲特別嘅  
28 問題，喺佢返車廠嘅時候就要睇下嗰個原因係點解。喺呢一版嗰度最後一段就  
29 講到，就話係自從 5 月之後，就喺呢條路線嗰個意外率嘅數目係減低咗百分之  
30 二十五嘅，都係有好大嘅裨益嘅呢方面。

31 MR DUNCAN：（經傳譯員）目前有冇有一啲嘅疲勞駕駛嘅監察系統，喺倫敦嘅巴士入  
32 面有冇？

33 MR MIKE WESTON：（經傳譯員）淨係嗰個試行，淨係個試行嘅做法，...

34 主席：（經傳譯員）但係都係有用嘅，係咪呀？係咪即係喺呢個 Croydon 嘅電車嗰

1 度有用㗎？

2 MR MIKE WESTON：（經傳譯員）係，嗰個同嗰個 Croydon 嘅電車喺意外之後，嗰  
3 個系統一樣嘅，應該係舊年或者前年嘅時候，有好多長線--長途嘅巴士亦都有  
4 類似嘅系統，我相信就係亦都有好多好類似嘅系統係監察疲勞駕駛嘅，特別係  
5 喺駕駛一啲長途車嘅時候，疲勞就會係更加容易發生嘅。我哋其實係好想知道  
6 呢個運輸局睇過成本效益之後係咪覺得應該將佢納入埋喺呢個交通安全標準入  
7 面嘅。

8 主席：（經傳譯員）Croydon 嘅電車事件就喺早上發生嘅，係咪呀？朝頭早 5 點發  
9 生嘅？

10 MR MIKE WESTON：（經傳譯員）係嘅，當時好早，嗰個速限就由 50 里去到 30 里  
11 嘅，嗰個司機就當時就喺嗰個好窄嘅彎位嗰度冇留意到嗰個速限咁樣咁出事  
12 嘅。

13 主席：（經傳譯員）個問題就係究竟揸巴士喺呢啲長途嘅車長同呢個電車喺呢啲彎位  
14 嗰度，即係三百、幾百嘅公里嘅里數嗰度係咪有差別呢，係咪有分別呢？

15 MR MIKE WESTON：（經傳譯員）係有分別嘅，喺倫敦嘅巴士車長喺大清早嘅時候  
16 喺繁忙嘅時候亦都唔會話停咁多站嘅，夜晚就嗰條路比較靜，所以好多時你會  
17 假定就係喺倫敦嘅道路上面就有好多情況發生，香港瞓著嘅機會就唔高嘅，倫  
18 敦嗰度就比較靜，就好多情況係--好多時有咁嘅情況。

19 主席：（經傳譯員）RATP 佢哋當時係揸緊一條市區路線㗎㗎，係咪呀？即係佢哋都  
20 瞓著㗎？

21 MR MIKE WESTON：（經傳譯員）係喇，我哋睇過呢啲咁嘅錄像嘅。我認為個報告  
22 要做嘅就係指出有一啲技術係可以係用嘅，就需要作出評估，就睇下邊一樣係  
23 有最好嘅效益，因為最終嚟講，如果我哋係採納晒所有呢啲嘅科技，就係--如  
24 果採納得晒所有嘅科技，咁比較天真嘅想法，因為財政上都係好龐大嘅，所以  
25 我哋要選擇一啲係有最大嘅效益，係可以減少呢個乘客嘅傷亡或者係對第三者  
26 嘅傷亡，路人或者係騎單車嘅人士咁樣。呢一個運輸局嘅安全計劃其實就係會  
27 做一個好全面嘅成本效益嘅研究，希望嗰啲錢係用得最好嘅。

28 主席：（經傳譯員）你睇過 Stanley 教授嘅報告，嗰度當時有分析過一啲生命嘅代  
29 價咁樣，澳洲嗰度佢係有研究過嘅，就睇下係咪值得係花錢用喺某一啲嘅裝置  
30 嗰度，就嗰個成本效益嗰個嘅研究嚟到去作出決定咁樣。

31 MR MIKE WESTON：（經傳譯員）係喇，英國嘅運輸署就會係睇到嗰個生命嘅代  
32 價，因為畢竟呢個就係比較廣泛嘅對社會嘅代價嚟嘅，譬如話係減低嗰個傷  
33 亡，其實對呢個醫療嗰方面亦都係有好大嘅節省嘅，所以呢個有廣泛嘅一啲嘅  
34 效益㗎度。

35 主席：（經傳譯員）最終嚟講，有關嗰個設備其實就應該係達到最高嘅效益㗎喇，係

1 咪呀？

2 MR MIKE WESTON：（經傳譯員）係，嗰個邏輯就係如果你係測試十種唔同嘅裝  
3 置，亦都係要睇嗰個成本效益，你可以係排優次，睇下嗰個嘅最高嘅效益，一  
4 路睇，睇落去嗰個清單上面，睇下你嗰個可以負擔得幾多，個經費有幾多咁  
5 樣，始終嗰個倫敦嘅巴士安全計劃就係咁樣。

6 主席：（經傳譯員）因為嗰個錢係嚟自利潤、票價或者係政府，係咪呀？

7 MR MIKE WESTON：（經傳譯員）係喇，即係始終都係呢三方面嘅財政來源，喺倫  
8 敦嗰度，喺票價嗰度或者係當局或者係嗰個利潤，巴士公司嘅利潤。

9 MR DUNCAN：（經傳譯員）主席，基本上我要探討嘅範圍都七七八八喇。

10 主席：（經傳譯員）仲有一個問題就都係好--呢個倫敦運輸局嗰度，我哋睇得好清楚  
11 就係嗰個嘅速限嘅問題，睇嚟，香港呢度就係我哋都可以睇一睇嘅，鄧律師，  
12 可唔可以同我哋睇下有冇一啲材料係關於呢方面嘅情況，亦都係同呢個倫敦係  
13 相關嘅呢？照我理解，就係有一啲電子地圖或者係同埋有一啲嘅速限嘅，喺倫  
14 敦嗰度。20 里係綠色嘅，個地圖就係綠色顯示嘅，係咪呀？

15 MR MIKE WESTON：（經傳譯員）係喇，其實有個趨勢就係三十二個倫敦嘅區佢哋  
16 都係推行呢個每小時 20 里嘅一個速限嘅，係好多住宅區佢哋有咁樣嘅安排，即  
17 係 20 里，即係 32 公里。有好多嘅道路而家漸漸都係 20 里嘅速限㗎喇，其他  
18 嘅道路就係 30、40 或者 50 每小時嘅速限，喺倫敦嘅巴士就好少就巴士會去到  
19 時速係 50 里嘅。

20 我相信其中一個挑戰就係要選擇一個合適嘅速度，個速限你可以話對於一  
21 啲大型嘅巴士，30 里其實都係嗰個限制，即係極限㗎喇，某啲道路我哋係要教  
22 育車長係要注意嗰個合適嘅速限--即係合適嘅速度，咁嚟到去即係要佢遵守嗰  
23 個速限嘅。

24 主席：（經傳譯員）某啲即係嗰啲道路，即係有車行嘅道路，係咪呀？

25 MR MIKE WESTON：（經傳譯員）不同時間亦都可能有不同嘅速限嘅。

26 主席：（經傳譯員）喺倫敦，如果有學校嘅話，嗰個速限係咪亦都會減低呢？即係學  
27 校放學嘅時候，亦都係會即係個速限會降低呢，或者係有一啲嘅牌寫明個速限  
28 呢？

29 MR MIKE WESTON：（經傳譯員）係，呢個係會提醒佢哋嗰個速限嘅，學校亦都有  
30 一啲警告牌，喺學校返學、放學嘅時候，佢哋就係可以改變個速限嘅。

31 主席：（經傳譯員）香港，照你所知，香港有部分嘅地方就係好人煙稠密嘅，喺行人  
32 路上面有好多嘅行人，而馬路上面亦都係有好多嘅車輛，巴士係經常喺隔離係  
33 行駛，以呢個咁嘅情景嚟講，倫敦係咪都係限喺 20 里呢？即係類似咁嘅道路係  
34 咪都係每小時 20 里呀？

1 MR MIKE WESTON: (經傳譯員) 係嘅, 一啲主要嘅倫敦嘅道路的確就係 20 里, 每  
2 小時係 20 里嘅車速, 有啲就係住宅嘅道路, 其實就係有一啲就係 15 里, 有一  
3 啲道路就係一啲主要嘅道路亦都係有咁樣嘅安排。

4 主席: (經傳譯員) 你正話所講嘅嗰個速限, 即係嗰個 30 里嗰嘅道路就係會去到  
5 15、16 里, 係咪呀?

6 MR MIKE WESTON: (經傳譯員) 呢個速限嗰個嘅試驗, 即係呢啲 20 里嘅道路, 呢  
7 個係對其他車輛有一定嘅影響嘅, 當個速限係 30, 一般嘅平均速度就係會去到  
8 20, 巴士就會好慢, 巴士甚至係會令到嗰個交通嘅流量係會減慢嘅, 即係比起  
9 30 里嗰度。

10 主席: I think it was described as a platoon or a convoy?

11 MR MIKE WESTON: (經傳譯員) 其中我哋關注嘅, 就係當我哋進行試驗嘅時候就  
12 會係減慢嗰個車速, 有啲車就可能係冒咗險就爬頭咁樣, 亦都會係導致一啲  
13 危險嘅景象嘅, 喺我報告當中所講, 暫時都有咁樣嘅證據, 有可能就係令到個  
14 交通就係個駕車人士個行為係有不同嘅。喺實際上, 喺 20 里嘅地區, 我哋將巴  
15 士下限到 20 里, 令到我哋係--幫我哋係--即係令到其他車輛係減慢嘅。

16 主席: (經傳譯員) 風險評估係牽涉到有冇可能就係造成一啲嚴重嘅傷亡, 即係有啲  
17 巴士嗰個--如果將 40、30、20, 一路減低, 就會係減低嗰個嘅風險嘅?

18 MR MIKE WESTON: (經傳譯員) 我唔記得個比例係點樣, 其實如果你係一架巴士  
19 行緊 25 或者 20 里, 相對於 20 里嗰個被撞到嗰個傷亡嘅程度係有咩嘢唔同,  
20 我就唔係好記得, 正如我哋今朝所講, 巴士嘅車頭其實就係牽涉到撞到乘客、  
21 撞到單車, 其實都係好嚴重嘅。

22 歐陽先生: (經傳譯員) 我想跟進一個問題, 車長佢哋嘅反應係點樣呢? 就係有不同  
23 嘅速限咁樣, 佢哋有冇表達過關注呢? 佢哋處理不同嘅速限咁樣。

24 MR MIKE WESTON: (經傳譯員) 我唔知道有咁嘅情況, 除咗話嗰啲 20 里嘅道路,  
25 佢哋係一致咁嚟到去執行, 呢個就唔係話嗰啲速限不斷咁改變, 其實係有一啲  
26 嘅裝置, 譬如 Mobileye 呢啲咁嘅裝置係可以提醒個車長嗰個速限係點樣嘅,  
27 又佢係感應到嗰個速限嘅標誌嘅, 喺司機位嗰度就會知道嗰個速限係點樣嘅。

28 主席: (經傳譯員) 嗰個鏡頭就係會睇到嗰個速限, 然後就會同司機就係表達一個訊  
29 息?

30 MR MIKE WESTON: (經傳譯員) 提醒個訊息係點樣嘅, 當然車長就未必留意到嗰  
31 個嘅標誌, 但係個機器就可以係睇到嘅, 喺面前嗰個嘅地圖就可以睇到, 譬如  
32 主席都講過, 就不同嘅顏色, ...

33 主席: (經傳譯員) 綠色就係呢個 20 里?

34 MR MIKE WESTON: (經傳譯員) 喺倫敦好多地方, 即係中部嘅地方其實都好多係

1 呢啲 20 里嘅速限嘅，我相信呢個係會嗰個地圖就可能會越嚟越綠㗎喇變㗎。

2 主席：（經傳譯員）喺數字上，睇唔睇到一啲正面嘅轉變呢，即係相對於嗰個嚴重嘅  
3 傷亡意外，喺減低咗呢個速限之後，有冇一啲嘅關係呢，還是有呀？

4 MR MIKE WESTON：（經傳譯員）暫時都未睇到。上一季佢哋係話嗰一季係冇一啲  
5 嘅死亡數字嘅。

6 主席：（經傳譯員）呢個係第一季，係咪呀？

7 MR MIKE WESTON：（經傳譯員）呢個係好耐以嚟，第一季係完全冇死亡數字  
8 嘅，...

9 主席：（經傳譯員）第二季就--呢個可能會係有自滿嘅情況，係有六宗嘅死亡意外。

10 MR MIKE WESTON：（經傳譯員）但係始終都係低過以前嘅數字，呢個係需要時間  
11 嘅，即係先睇到個趨勢係點樣。

12 主席：（經傳譯員）有冇一啲嘅影響，對於嗰個車程有幾長還是咁擠塞都有乜大分別  
13 呢？

14 MR MIKE WESTON：（經傳譯員）我相信就係有一個因素影響嗰個嘅車程嘅，因為  
15 特別喺倫敦中部有好多嘅道路工程，係有一啲嘅單車徑、單車路亦都有一啲工  
16 程嘅進行，亦都影響到嗰個車速咁樣，亦都係令到個巴士嘅速度，喺倫敦中部  
17 係會減慢㗎嘅，呢個影響比嗰個 20 里嘅車速限制影響就更加大嘅。呢啲司機就  
18 對於 20 里都係冇問題嘅。

19 主席：（經傳譯員）就喺呢一個大概係九--平均嘅速度就係每小時係 9.2 里嘅，係  
20 咪呀？喺倫敦。

21 MR MIKE WESTON：（經傳譯員）冇錯。

22 主席：（經傳譯員）呢個會唔會就係話我哋香港要改善我哋嘅道路交通同安全，其實  
23 呢個係我哋應該係特別留意嘅呢？

24 MR MIKE WESTON：（經傳譯員）我哋係需要明白平均嘅車速係點樣樣，同埋大致  
25 上嗰個幅度係幾多，喺倫敦嚟講，呢個 20 里就係適用於所有嘅車輛，唔係單單  
26 係巴士嘅，所以我哋首先要明白喺某一啲嘅道路個平均嘅車速係點樣樣先，我  
27 相信希望能夠就所有嘅車輛都平均減速，就唔係淨係巴士減速，就會有更大嘅  
28 裨益。我相信所有嘅道路同埋所有車輛一齊減速就會係個裨益會更加大，但係  
29 首先我哋要明白究竟個問題個根源喺邊度先嘅。

30 主席：（經傳譯員）我哋今日就傾到其他嘅課題，就同樣我哋係首先要搜集一啲數  
31 據，譬如話個平均車速係點樣樣，跟住就係去就做一个成本效益分析，如果個  
32 車速係減慢，究竟會係成本係點樣樣，個效益係點樣樣？

1 MR MIKE WESTON：（經傳譯員）係，冇錯，個邏輯就係咁，如果你就係要所有嘅  
2 巴士減速，你唔係--如果你係要維持所有嘅班次不變嘅時候，你就需要更多嘅  
3 巴士、更多嘅司機。返番去我哋頭先講嘅一點，究竟咁樣做呢，還是再裝置更  
4 多嘅安全裝置更加有效呢？我哋應該係有所有嘅數據，然後先至做選擇。如果  
5 你就咁純粹單一去做一個選擇可能會做錯選擇嘅。

6 主席：（經傳譯員）呢個 20 里嘅減速，市區，已經係行咗幾耐呢？係對於當地嘅政  
7 府機關嚟講？

8 MR MIKE WESTON：（經傳譯員）我就唔係好知道，我會話係五至十年，就係已經  
9 係喺英國各地佢哋呢一個嘅當地政府都係有呢個選擇，唔係淨係倫敦，但係已  
10 經係五至十年喇。

11 主席：（經傳譯員）而家我哋睇番呢個文件係 2013 年 1 月嘅，呢個係一個通告，係  
12 運輸部嘅，就話畀本地政府講佢哋可以做啲乜嘢嘢同埋係點樣為之適合嘅車  
13 速。

14 MR MIKE WESTON：（經傳譯員）據我自己嚟講，如果我記得冇錯嘅時候，其實嗰  
15 啲本地政府都可能好選擇性去做呢樣嘢嘅，譬如話係有學校喺附近等等，但係  
16 而家我哋越嚟越多嘅當地政府就係會喺某一啲嘅地段就有個 20 里嘅車速限制，  
17 當然我哋啲人係睇到其實對於嗰個車程時間嘅影響，其實唔係好大，但係就有  
18 好大嘅裨益，...

19 主席：（經傳譯員）你話係而家喺主要倫敦嘅道路都係有嘅？其他嘅道路，譬如  
20 Oxford Street、Clapham High Street 等等？

21 MR MIKE WESTON：（經傳譯員）我就唔係好肯定，喺呢一個 Blackfriars Road  
22 其實應該都係 20 里嘅，其實都係啲主要嘅道路都係 20 里嘅。如果喺 Oxford  
23 Road，你都係可以做到 20 里，其實已經係個交通好暢通㗎喇，因為其實基本  
24 上係好擠塞嘅嗰度。

25 主席：（經傳譯員）鄧律師。

26 MR DUNCAN：（經傳譯員）我就想畀你幾個參考嘅文件嘅，首先運輸部就係制定速  
27 限嗰樣嘢，SEC-3 1003 頁嘅，就係呢一個 2015 年嗰份文件，就係個標題係  
28 話行得太快，就如果你係減速一里，就可以喺市區嗰度減低咗撞車就百分之六  
29 嘅，然後另外一頁就係 MISC-3 987 頁嘅，主席...

30 主席：（經傳譯員）呢個文件叫做咩嘢名？係「減速」，係咪嘅意思呀？

31 MR DUNCAN：（經傳譯員）呢個係安全倫敦街道，我哋嘅方法，我哋嘅方案，呢個  
32 係喺 986 頁就話我哋嘅優先次序，第一個首要嘅次序就係話要係解決一個行得  
33 太快嘅問題。

34 主席：（經傳譯員）得，唔該晒。

1 MR DUNCAN：（經傳譯員）你亦都睇到 2007 年 5 月嗰個一個調查，就係講緊乘客  
2 嘅調查，有二千個嘅被訪者，呢個係 SEC-1 第 295 頁可以睇得到。

3 主席：（經傳譯員）我哋可唔可以擺上去屏幕嗰度，Weston 先生都可以睇得到我之  
4 前所提及嘅嗰個調查。

5 MR DUNCAN：（經傳譯員）第 7 段。

6 主席：（經傳譯員）係，就係喇，Weston 先生，就係其實都係視乎嗰個問題點問法  
7 嘅。

8 MR MIKE WESTON：Yes.

9 主席：（經傳譯員）多謝晒，唔該晒。鄧律師，仲有冇其他嘅事項？

10 MR DUNCAN：（經傳譯員）冇，主席，多謝，唔該。

11 主席：（經傳譯員）Weston 先生，你有冇最後有一啲嘅嘢你係想我哋特別留意嘅  
12 呢？

13 MR MIKE WESTON：（經傳譯員）冇，唯一一樣我哋冇提到嘅，就係話點樣去鼓勵  
14 或者一個合約嗰方面，呢個就我都覺得好奇怪點解你有提嘅。

15 主席：（經傳譯員）呢個咁樣嘅，關於呢個課題，其實係去做一啲鼓勵嘅措施或者係  
16 安全指標係對於改善安全會有作用或者冇作用還是係有一個負面嘅作用呢？譬  
17 如話我哋去獎勵一啲公司，如果佢哋個安全表現係好好嘅，特別喺安全指標嗰  
18 方面，咁樣會唔會真係可以改善巴士安全呢？

19 MR MIKE WESTON：（經傳譯員）喺我個報告裏面，我就有個觀察，就係話呢個巴  
20 士公司就有啲關注，就呢個——其實反而會唔會有一個直接嘅財務嘅獎勵，就會  
21 令到佢哋唔願意分享資訊等等，但係無論如何，我都想提一提。

22 倫敦嘅營運者其實向來都好重視安全，所以個問題就係話你有一個財務上  
23 獎勵，金錢嘅獎勵，你係想改變一啲嘅咩嘢行為呢？你開始係畀緊啲現金嘅獎  
24 賞或者一啲嘅財務嘅獎賞，但係呢一個嘅營運者仍然都係有意外，個問題就係  
25 話可能你今年嗰個安全表現相比於舊年就係改善咗，但係你仍然都係有三個人  
26 就係死亡，或者係八十個人受傷，但係你仍然都係有個獎金，所以其實嗰個情  
27 況就變得好奇怪。

28 另外一個方法去做就係話你係純粹係扣減，按住個安全嘅表現嚟扣減你個  
29 合約價格，但係就係嗰啲嘅營運者，如果佢哋認為佢哋喺安全嗰度表現得唔係  
30 好好嘅時候，佢哋係入標嘅時候，佢哋就會將呢樣嘢擺埋落去喇。所以話關於  
31 財務嘅一啲獎勵，都係好嘅。喺倫敦運輸局 2015 年嘅文件之中，佢哋都有提到  
32 呢一點，佢哋都解釋過就係財務嘅獎金或者鼓勵其實都係好嘅。

33 另外，其實其他嘅獎勵都可以嘅，可以考慮嘅，譬如我諗到就係話係喺頭

1 五年個合約期完咗之後，你之後啲兩年嘅續約就係有個優勢嘅，我哋而家就係  
2 話個服務嘅可靠性我哋主要嘅考慮，但係會唔會我哋就係話之前啲五年佢個安  
3 全嘅表現都可以考慮埋喺裏面呢？亦都另外一個方法就唔係話一定財務上嘅獎  
4 勵，我對於呢一個嘅安全表現有財務獎勵，我有好大保留，因為你可能--其實  
5 佢仍然有意外嘅時候，你仍然係畀緊佢咁嘅獎金，然後或者佢咁係會入標嘅時  
6 候將佢計埋個成本落去。

7 當然可能仲有其他嘅方法嘅，譬如話你係喺頭啲第三同埋第四年嘅時候，  
8 你個個安全表現係好嘅時候，你就可以有資格可以續約多兩年嘅，呢個就亦都  
9 會係一個幾好嘅鼓勵，就唔係一個財務嘅鼓勵嘅。

10 主席：（經傳譯員）你用呢一個「鼓勵」呢個字，但係你就係獎金咁，但係你就仍然  
11 就你又諗緊呢一個扣減嗎？譬如你可唔可以話你獎勵啲人其實今年係有三個人  
12 死亡，但係舊年有六個人嘅，所以你就有獎勵，但係另一個方法，你就係可以  
13 係扣減嘅，你個個畀佢咁嘅錢？

14 MR MIKE WESTON：（經傳譯員）係嘅，我哋要睇一個合理長嘅時間，而相關嘅營  
15 運商佢咁就有啲方法真係可以改變個情況，改變個趨勢，係如果我係得五年去  
16 營運嘅時候，我係有辦法喺五年之內作出改變嘅時候，我就會將呢一條成本就  
17 打埋落我個入標價個度。

18 所以我認為所謂嘅獎勵真係可以令到啲人個行為有改變，亦都係可以達  
19 到嘅，如果唔係咁，如果--倫敦運輸局應該點樣做呢？咁就會係有一個安全嘅  
20 指標，然後之後我會畀分，然後之後將呢個畀分就係去同佢能唔能夠係兩年續約去  
21 掛鈎，呢個就亦都可能係一個方法去鼓勵到相關嘅營運者嘅。

22 主席：（經傳譯員）而家目前嚟講，係話可唔可以續約就係關於佢咁嘅服務係咪可靠  
23 嘅，係咪呀？

24 MR MIKE WESTON：（經傳譯員）係，主要嘅考慮係咁，係嘅，如果個營運商係能  
25 夠滿足到最低表現嘅要求或者係做得好少少，佢咁就合資格係可以係續約嘅。  
26 另外一個獎勵嘅方法就係話，我哋今朝早都有提過，因為我哋常常都會再招標  
27 嘅，如果係--所以呢一個安全表現我哋一直都係考慮嘅，如果你有個好嘅安全  
28 表現嘅時候，我哋運輸局就唔會再係批新嘅約畀你。今朝早我哋亦都係傾咗好  
29 耐喇呢一點。

30 主席：（經傳譯員）有冇其他嘅事項你想提出嘅呢？

31 MR MIKE WESTON：（經傳譯員）冇嘅。

32 MR DUNCAN：（經傳譯員）主席，我哋都會想睇一睇，我哋有提到點樣可以獎勵啲  
33 巴士司機，就係由巴士公司去獎勵佢咁，特別係佢咁係喺安全係表現得好，你  
34 喺呢方面有冇乜嘢嘅意見呢？

35 MR MIKE WESTON：（經傳譯員）我認為係要有意義，亦都係個司機係可以控制

1 範圍之內先至可以做。有一間公司有一個直接嘅司機獎勵計劃，後來佢就係將  
2 佢納入咗佢嘅底薪嗰度，因為都覺得唔係好有用，冇乜影響，我覺得係可以做  
3 嘅，但係要考慮嘅就係話對於司機嚟講係有意思嘅。同埋設計到一個地步，就  
4 係司機可以參與嘅，而唔會話「因為我做得唔好，我就係冇咗個獎金。」唔會  
5 係一個反效果。同營運商嘅討論，似乎佢哋都唔係好想喺安全方面特別去獎勵  
6 司機嘅。

7 主席：（經傳譯員）有一個營辦商就係話有一個司機就係有被獎勵係 50 鎊嘅，同埋  
8 佢後來就係 9 月之後，佢個名就係擺落個抽獎嗰度，佢就係抽到架車嘅，係咪  
9 咁呀？

10 MR MIKE WESTON：（經傳譯員）係嘅，一架新車，呢個就係因為同一個遠程訊息  
11 系統有關嘅，亦都係一個好好嘅一個獎勵嚟嘅，佢就係擺到 50 鎊嘅。喺倫敦嘅  
12 巴士司機，好似香港都係，佢哋都想成為一個好嘅司機，有一個呢一個嘅好司  
13 機名單其實都係好好嘅，啲人就會係有希望得到鼓勵係可以成為榜上有名嘅。  
14 對於嗰架車嚟講，其實嗰個價錢都唔係好高嘅啫，我哋講緊係有二千五百個巴  
15 士司機嘅。

16 主席：（經傳譯員）呢個亦都係一個獎勵司機嘅一個例子，係咪？

17 MR MIKE WESTON：（經傳譯員）但係呢個唔係話係獎勵佢係用佢嘅加薪或者係其  
18 他嘅獎金去獎勵佢嘅。

19 MR DUNCAN：（經傳譯員）唔該晒主席，呢個係咁多喇。

20 主席：（經傳譯員）Weston 先生，我哋就結束喇，希望你能夠係就住你個報告，倫  
21 敦運輸局佢哋係公布咗呢個係 12 月 16 號公布咗架巴士安全標準之後，你可唔  
22 可以提交畀我哋呢？對我哋嚟講，係好大幫助嘅，又或者有其他嘅材料，你覺  
23 得係對我哋有幫助，都請你提交嘅。

24 MR MIKE WESTON：（經傳譯員）好，我就睇一睇可唔可以睇到嗰個嘅教程  
25 Hello London 嘅課程嗰個畀大家嘅。

26 主席：（經傳譯員）好多謝你，唔該晒你哋有呢啲嘅報告提交畀我哋，同埋係嚟到作  
27 證嘅。今日呢一個嘅聽證會都係非常之有用嘅。你嘅經驗，喺巴士業務嘅經驗  
28 係非常之寶貴嘅，亦都令我哋明白我哋對香港可以得出啲咩嘅建議。希望  
29 你一路順風嘅，唔該晒。

(10.01 am)

EVIDENCE FROM THE TRANSPORT DEPARTMENT: MS MABLE CHAN,  
MS AMY LEE, MS AMY TSE, MR PATRICK WONG, MR YK CHAN,  
MR WILLIAM SHUM, MR TONY YAU

CHAIRMAN: Good morning, Ms Chan, and good morning to your  
colleagues.

Thank you for accepting our invitation to give  
further evidence to the committee, to assist us in our  
enquiries.

At the outset, I would like to make a few  
observations about what happened yesterday. Yesterday,  
at 5 o'clock, we received a bundle of documents from the  
Transport Department. One of them is what appears to be  
the final version of the report of the Working Group on  
Enhancement of Safety of Franchised Buses, but we  
received new documents dealing with the implementation  
of a road safety audit and a study on low speed limit  
zones. We received other material in relation to  
facilities, the arrangements that are made, for bus  
captains at bus stations.

Now, service of documents at 5 o'clock on the day  
before a hearing obviously causes difficulties to  
counsel who are assisting the inquiry, because certainly  
so far as speed limits are concerned, low speed limits,

1       20 miles an hour or its equivalent in kilometres, is  
2       an area where there is a wealth of material to which you  
3       will, in due course, be referred, to assist us. But of  
4       course that material isn't available now. It has to be  
5       found. It has to be put into our bundles. It has to be  
6       scanned so that it can be put on the screens, and so on.

7             May I simply ask this question: why is it that the  
8       documents were served on us at 5 o'clock yesterday?

9       MS MABLE CHAN: Chairman, if I may? On behalf of the  
10      department, I would just like to send apologies to the  
11      committee for the late delivery of the papers.  
12      Actually, we have followed through the oral hearings  
13      since May, when I last attended the hearing at the  
14      committee, and we actually followed through carefully  
15      and we noted a number of important areas that the  
16      committee have expressed keen interest. Amongst those,  
17      we are actually giving thought to a number of important  
18      initiatives that we have to secure internal clearance  
19      and also we are securing additional dedicated resources  
20      to implement those initiatives.

21            So we would love to send those material across to  
22      the committee to facilitate your consideration and  
23      deliberation at an earlier juncture. Obviously, due to  
24      a number of pressing urgent commitments, so we would not  
25      be able to do that earlier. So I would send my deep  
26

1       apology for that. But hopefully, that will also serve  
2       as a reference material for the committee. We are not  
3       expecting the committee to take that into account in  
4       a very detailed way in hearing our further evidence to  
5       that, but in any event, we would just like to keep the  
6       committee posted of some of the developments within the  
7       government and within the department, and actually in  
8       parallel we are seeking dedicated resources to push  
9       forward a number of those initiatives. So we think that  
10      it may help to give the committee an idea of what we are  
11      thinking and what we are planning to do.

12             Thank you, Chairman.

13   CHAIRMAN: Thank you for that, and thank you for your  
14      confirmation that you are following the evidence that we  
15      are receiving, and from what I understand you to be  
16      saying that you are proactively responding to it, as is  
17      obvious from the topics that you have looked at. That  
18      is to be welcomed. That is the journey that we are all  
19      embarked on and we are pleased to learn that.

20             But let me give you an example. Apparently, in  
21      August of this year, a department of the Transport  
22      Department which goes by the initials VSSD issued a new  
23      requirement, basic minimum requirement, for electronic  
24      data recording device. That is August, the document is  
25      dated. Why are we not told about it until October? And

1       this is a topic we have been raising with various  
2       witnesses. Why is it that we are all operating from  
3       a requirement promulgated in November 2003, but in fact  
4       it's been superseded? Why was this not drawn to our  
5       attention?

6       MS MABLE CHAN: Chairman, that August update is actually  
7       a development arising from the deliberation of the  
8       Working Group on Enhancement of Bus Safety. The working  
9       group has actually gone through a number of rounds of  
10      discussions with the various parties involved, and that  
11      transpired to some of the updates.

12       With hindsight, we should have done that, on that  
13      particular update, on that document, and informed the  
14      committee on that occasion, but we actually have  
15      incorporated that as part of the whole working group  
16      report.

17       Let me just add a personal remark to that. It is  
18      actually our pledge in previous hearings and in previous  
19      submissions that we would like to complete the working  
20      group first-stage study within six months. Due to the  
21      various urgent commitments cropping up, especially in  
22      the midst of the super typhoon, we have not been able to  
23      schedule the last working group meeting with our bus  
24      operators in early September. Our original target is to  
25      finish it by then. So the last meeting had to be  
26

1        rescheduled to mid-September, and we actually made some  
2        fine-tunes to the working group report and made sure  
3        that everybody is well aware of the recommendations and  
4        the findings of the working group report.

5            We sent the working group report to the committee at  
6        5.00 last evening, it's actually subsequent to our --

7        CHAIRMAN: Forgive me for interrupting. Well, that's  
8        an improvement, because in the past we've been getting  
9        documents during the night, so at least we got it at  
10       5 o'clock and we are grateful for that.

11       MS MABLE CHAN: We certainly want to improve and we strive  
12       for the best, and my deep apology to the chairman for  
13       causing you difficulty and inconvenience, but we would  
14       like to keep you posted of any of our initiatives in  
15       a timely manner. Thank you, Chairman.

16       CHAIRMAN: The problem is not for the committee. The  
17       problem is for our counsel, because it is their job to  
18       assist us by testing the evidence that you advance, and  
19       in order to do so, they have to draw your attention to  
20       relevant documents that perhaps you have not provided  
21       but they are nevertheless relevant, and they can't do  
22       that in the time that they have been allowed. But thank  
23       you for what you have had to say.

24            Before I invite counsel to begin questioning, is  
25       there any statement that you wish to make at the outset?

26

1 MS MABLE CHAN: Chairman, I know time is precious, and if  
2 you allow I would just like to make brief remarks, just  
3 to highlight a few things in response to the interest  
4 areas that the committee has indicated and expressed  
5 over the last few months.

6 CHAIRMAN: Please do so.

7 Opening statement by MS MABLE CHAN

8 MS MABLE CHAN: Thank you.

9 Chairman and members of the committee, my team and  
10 I are pleased to appear today before the committee today  
11 to give further oral evidence in support of the  
12 committee's work.

13 Since our last attendance at the hearings in May, we  
14 know that the committee has invited other parties to  
15 provide oral evidence and have closely followed through  
16 the submissions made by various parties.

17 As the mission of the Transport Department tells, we  
18 strive to provide the world's best transport system  
19 which is safe, reliable, efficient, environmentally  
20 friendly, and satisfying to both users and operators.  
21 Safety is of utmost importance to the transport  
22 operation, including the provision of franchised bus  
23 services. To this end, we have been trying our very  
24 best to monitor franchised bus operations in accordance  
25 with the law and having regard to the franchise  
26

1 requirements.

2 Since May, we have provided supplementary  
3 information for reference of the committee at the  
4 committee's request and suggestion. Today, we stand  
5 ready to answer any questions or issues to be raised by  
6 the committee.

7 I just wish to highlight a few things to address  
8 a number of aspects on which we think the committee has  
9 expressed keen interest.

10 First of all, we have been taking some proactive  
11 action in enhancing road safety and developing our road  
12 safety management system. To ensure continuous  
13 improvement of the system, the department reviews it  
14 with reference to overseas practices and experience from  
15 time to time. Apart from preparing in late 2017 for  
16 embarking on a consultancy study on the review of  
17 potential roadside safety hazards in the Hong Kong road  
18 network in May this year, following a recent review in  
19 May, we have identified a further area of improvement to  
20 strengthen the performance evaluation and auditing of  
21 the system by introducing a road safety audit mechanism  
22 within the Transport Department.

23 We have proposed to set up a dedicated team to  
24 implement road safety audit to all new roads, to enhance  
25 road safety in a proactive, comprehensive and systematic  
26

1 manner, and are securing dedicated manpower resources in  
2 this regard.

3 I wish to add that late last week, we have just got  
4 information from the Financial Services and the Treasury  
5 Bureau that we would be able to get a few spare hands  
6 approved for implementing this road safety audit, and it  
7 is on that basis that we can confirm that we will  
8 implement this audit mechanism within the department in  
9 the coming months.

10 Secondly, the Working Group on Enhancement of Safety  
11 of Franchised Buses has completed its first six-month  
12 study and come up with a number of recommendations to  
13 further enhance bus safety, including the feasibility of  
14 installation of in-vehicle safety devices and equipment  
15 and review of training for bus captains.

16 Chairman, this is not the end, but rather  
17 a beginning. The working group will continue its work  
18 and will meet on a regular basis so as to monitor the  
19 progress of follow-up actions and review the practice  
20 note on training framework for bus captains to achieve  
21 the best possible industry standard practices.

22 Meanwhile, I would like to report that the Transport  
23 Department is actively taking forward the  
24 recommendations of the working group, including the  
25 various development and tests, trials and feasibility  
26

1 studies, with the FB operators and bus manufacturers.

2 One of the initiatives that the working group has  
3 been pushing for is the development of a prototype of  
4 the bus monitoring and control system, BMCS in short,  
5 for franchised buses. This embraces the black box, GPS,  
6 geo-fencing, two-stage speed limiter with mapping  
7 against the statutory speed limits.

8 As a first step, in particular Citybus and New World  
9 First Bus have embarked on the phase 1 trial of the BMCS  
10 on their whole fleet since 18 September this year,  
11 whereby real-time audio alerts will be provided to the  
12 bus captains when the vehicle speed exceeds the  
13 corresponding legal speed limit.

14 Apart from overseeing such trials by franchised bus  
15 operators, the Transport Department sees the need to  
16 push it from ourselves by engaging a service provider to  
17 carry out an independent trial on vehicles, to evaluate  
18 the applicability and effectiveness of using geo-fencing  
19 technology to control vehicle speed, which is one of the  
20 vital parts of the BMCS.

21 We will review the outcome of the trials and will  
22 have further discussions with bus operators with a view  
23 to developing a clear roadmap for enhancing the  
24 franchised bus monitoring through implementation of the  
25 BMCS.

26

1           Meanwhile, we are also in the process of securing  
2           manpower resources to have a dedicated team to oversee  
3           transport technology, which will help speed up the  
4           process of such trials and initiatives.

5           Thirdly, we are equally concerned with the welfare  
6           of the bus captains and assisting in every possible way  
7           in facilitating the provision of ancillary facilities at  
8           the bus termini. Since December 2017, the Transport  
9           Department has set up a task force with representatives  
10          of relevant government departments and franchised bus  
11          operators, to monitor the provision or upgrading of the  
12          public transport ancillary facilities at public  
13          transport interchanges, bus stops and termini, and will  
14          continue to work closely with the relevant approving  
15          authorities through regular meetings, with a view to  
16          speeding up the processing of the applications.

17          Looking ahead, we will explore in consultation with  
18          relevant government bureaus and departments to pursue  
19          along the approach of providing such ancillary  
20          facilities at new public transport interchanges and bus  
21          termini at government cost, while the franchised bus  
22          operators will pay the rent and recurrent costs for  
23          using these facilities.

24          In this regard, we will have to pursue this and take  
25          it further with the relevant bureaus and departments

26

1 overseeing the management of such facilities and also  
2 regarding the funding arrangements.

3 With the latest review of the guidelines of bus  
4 captains' working hours, rest times and meal breaks in  
5 early 2018, franchised bus operators have started to  
6 implement the latest guidelines by phases since the  
7 second quarter of 2018, targeting for full compliance by  
8 the second quarter of 2019, subject to the recruitment  
9 of sufficient bus captains to fill up the shortfall  
10 arising from the shortening of duty hours and driving  
11 hours of bus captains.

12 Bus operators have been trying hard to recruit new  
13 bus captains and retain the existing bus captains,  
14 including improvement in the remuneration packages.  
15 This will inevitably have an impact on the franchised  
16 bus operators' accounts. A number of developments are  
17 happening on this front and I would like to report that  
18 by now the government has just received fare increase  
19 applications for all of the bus operators, and we will  
20 take every effort to process these applications in  
21 a timely manner and go through the due process,  
22 including consultation with the various approving  
23 authorities within the government.

24 Finally, Chairman and members of the committee, it  
25 has always been my intention to personally attend before  
26

1 the committee during the whole hearing today.

2 Regrettably, due to an urgent commitment to attend  
3 a special meeting of the Legislative Council House  
4 Committee later this afternoon to discuss the aftermath  
5 issues arising from the super typhoon which cannot be  
6 rescheduled, I will have to apologise for not joining  
7 you throughout the hearing today, but please rest  
8 assured that my team members appearing today will  
9 continue to offer the best support to the committee for  
10 the rest of the hearing, and if necessary for the  
11 hearing on Saturday I will be able to join the rest of  
12 my team to help the committee for your work.

13 Thank you very much, Chairman.

14 CHAIRMAN: Thank you, Ms Chan, and thank you for your  
15 explanation which we were informed of in advance about  
16 your unavailability this afternoon. Of course we  
17 understand that, and I hope that the commencement of  
18 proceedings today hasn't given you a bad start to that  
19 whole day.

20 But I would ask counsel now to start asking  
21 questions. Thank you.

22 MS MABLE CHAN: Thank you.

23 Examination by MR DEREK CHAN

24 MR DEREK CHAN: Thank you, Ms Chan, for those opening  
25 remarks. I will be kicking off the questions today on  
26

1 a number of copies topics, and Ms Maggie Wong, senior  
2 counsel, will carry on questioning on other topics,  
3 possibly later today or on Saturday, so it will be  
4 mostly me today.

5 Ms Chan, can I start off with the first topic, and  
6 that is on the issue of competitive tendering in  
7 Hong Kong, and by competitive tendering I am referring  
8 to both competitive tendering of franchises as a whole  
9 or individual bus routes.

10 Just to give you some context to my questioning, the  
11 committee has heard evidence from two overseas experts,  
12 Mr Weston and Prof Stanley, on the operating environment  
13 of urban buses in London and Melbourne respectively.

14 Have you had an opportunity to go through that evidence?

15 MS MABLE CHAN: Yes.

16 MR DEREK CHAN: In that case, rather than taking you in  
17 detail through the report, perhaps I will just summarise  
18 the position so that the questions I am about to ask  
19 will have some proper context.

20 Firstly, the situation in London is that all urban  
21 bus routes are open for competitive tender, with  
22 contract lengths of five years plus a possible extension  
23 of two years, after which the route will be open to  
24 competitive tendering again. So that's the situation in  
25 London. The market is dominated by six large bus  
26

1 groups, comprising of around 94 per cent of the bus  
2 network.

3 Mr Chairman, just for the reference, on record,  
4 that's the expert bundle, page 126, in Mr Weston's  
5 report.

6 CHAIRMAN: Yes. I'm familiar with the table.

7 MR DEREK CHAN: So that's London.

8 In Melbourne -- again, since you have been through  
9 the evidence, I will just summarise it instead of going  
10 to the report -- about two-thirds of the bus network in  
11 Melbourne are subject to negotiated contracts, and there  
12 are about 15 contracts with 12 operators.

13 Again, just as a matter of reference, that's Day 16  
14 of the evidence, page 34, line 3.

15 Secondly, about one-third of the bus network in  
16 Melbourne is provided for by way of a single contract  
17 across a defined spatial area that is subject to  
18 competitive tendering. The contract length would be  
19 seven years.

20 Again, the reference, if I may just put it on  
21 record, is Day 16 of the evidence, pages 22 to 27.

22 So that's the position in London and Melbourne.

23 Now, in Hong Kong, before I ask questions on that,  
24 can I just take you to an annual report of Transport  
25 International Holdings, which is the parent company to  
26

1 KMB. I'm taking you to the 2015 annual report at KMB-5,  
2 page 1523.

3 CHAIRMAN: For which year?

4 MR DEREK CHAN: 2015.

5 CHAIRMAN: Thank you.

6 MR DEREK CHAN: Do you have that, Ms Chan?

7 MS MABLE CHAN: Yes.

8 MR DEREK CHAN: You are looking at page 32 of the annual  
9 report for 2015, which is page 1523 of our bundle. Can  
10 I just draw your attention to the column at the  
11 right-hand side of the page, at the first paragraph of  
12 that column. I will just read it out into the record:

13 "In 2015, two competitive tendering exercises for  
14 new bus routes were finalised by the HKSAR Government,  
15 and KMB was awarded both tenders. As a result of the  
16 first tender, routes 290 and 290A were introduced in  
17 March 2015 to operate between Tseung Kwan O and  
18 Tsuen Wan. The call for tenders for the route package  
19 for Anderson Road Development Area was made in mid-2015  
20 and KMB was notified that it had been award the tender  
21 in November 2015. Services on the routes will commence  
22 in phases from the first quarter of 2016 in line with  
23 the population intake."

24 So there is a reference to some competitive  
25 tendering of routes in Hong Kong. So, in the context of

26

1 all of this, I have a number of questions for you. The  
2 first one is: what is the scale of competitive tendering  
3 that exists in Hong Kong at the moment?

4 MS MABLE CHAN: I do not have the ready figure in  
5 quantifiable terms, but as this statement in the KMB  
6 report pointed out, there have been a number of  
7 occasions whereby, should there be a new town  
8 development, a new social transport need emerging, or  
9 there is any particular circumstances whereby a package  
10 of routes would involve profit-making or  
11 non-profit-making, then the Transport Department will  
12 venture out to proceed with competitive tendering.

13 Let me quote a recent example. It is the high speed  
14 rail station in West Kowloon. We have introduced three  
15 routes, one from Admiralty to West Kowloon, the other  
16 one is from Kwun Tong to West Kowloon, and the last one  
17 is from Sheung Shui to West Kowloon. We have actually  
18 discussed the needs and designed the routing, and then  
19 we have packaged the tender exercise in a way to  
20 facilitate competitive bidding, while striving for  
21 a sustainable financial operation of the routes  
22 involved.

23 The outcome is that -- colleagues perhaps may  
24 supplement on that -- one route is awarded to Citybus  
25 Ltd --

1 CHAIRMAN: I was at that bus station yesterday.

2 MS MABLE CHAN: Yes. One route is awarded to Citybus Ltd  
3 and two routes are awarded to KMB.

4 For the reference of the committee, in the last two  
5 routes awarded to KMB, our internal guesstimate is that  
6 one of the routes would not be profit-making, and it is  
7 through this competitive tendering strategy that we  
8 would like to invite competition, although the spatial  
9 area of the new routes may be perceived to be well  
10 served or well covered by KMB, that doesn't stop us from  
11 venturing out to proceed with competitive tendering to  
12 attract competition while achieving sustainable  
13 financial operation of the routes involved.

14 Let me also quote another example. It's the  
15 Hong Kong-Zhuhai-Macau Bridge new routes. We also  
16 proceed with a competitive tendering whereby we have  
17 awarded at least one route to the New Lantao Bus Co Ltd,  
18 and the route actually straddles service areas which is  
19 currently also served by the major bus companies like  
20 KMB.

21 My point is just to answer senior counsel's question  
22 that under our current franchise model, we will also  
23 proceed with competitive, route-by-route, tendering  
24 exercise.

25 Thank you.

26

1 MR DEREK CHAN: After the hearing, or later on if possible,  
2 can you give us some actual numbers of the proportion of  
3 routes that are now subject to competitive tendering and  
4 also the contract details --

5 MS MABLE CHAN: Sure.

6 MR DEREK CHAN: -- of those competitively tendered  
7 contracts?

8 MS MABLE CHAN: Yes.

9 MR DEREK CHAN: Thank you very much.

10 CHAIRMAN: Before you move on, if that's what you are going  
11 to do -- the competitive tendering what you've  
12 described, has that been of the open public competitive  
13 tendering nature, or restricted to certain participants?

14 MS MABLE CHAN: Perhaps I would ask my colleagues to  
15 supplement on that detail.

16 CHAIRMAN: Certainly.

17 MS MABLE CHAN: Amy Tse.

18 CHAIRMAN: Ms Tse.

19 MS AMY TSE: The operator selection exercise is restricted  
20 to the local market, namely the Citybus, the New World  
21 First Bus, the Long Win, KMB and New Lantao.

22 CHAIRMAN: So restricted to those operators that currently  
23 hold one or more franchises; is that the case?

24 MS AMY TSE: Yes, in the local service market.

25 MS MABLE CHAN: Local franchised bus operators.

26

1 CHAIRMAN: Five bus companies?

2 MS MABLE CHAN: Yes.

3 CHAIRMAN: Were these tenders in that restricted market --  
4 were they promulgated publicly so it was known by  
5 an interested member of the public that this exercise  
6 was going on?

7 MS AMY TSE: Before we conduct the operator selection  
8 exercise, when we plan the routing, we will consult the  
9 district councils involved on the routings and the  
10 details.

11 CHAIRMAN: Did you inform the district councils that you  
12 proposed to embark upon a tendering exercise restricted  
13 to these five bus companies?

14 MS AMY TSE: We will inform them that we will select the  
15 operators and based on the routings and the details and  
16 any comments they can provide.

17 CHAIRMAN: So you were consulting them about routes, not  
18 about how you were going to tender? Is that the  
19 position?

20 MS AMY TSE: Yes.

21 CHAIRMAN: So, if an interested member of the public wanted  
22 to find out about, for example, West Kowloon -- we've  
23 built this new bus station, next to the Express Rail  
24 station -- who's going to be running the buses, how  
25 would he have found that out, in advance of it actually  
26

1           happening, in other words? If he had turned up, like  
2           me, yesterday, he would have seen a Citybus going to  
3           Admiralty, and he would have seen KMB buses going  
4           elsewhere, but how would he have known in advance?

5   MS AMY TSE: We will just inform the district council and  
6           conduct the consultation with the district council.

7   CHAIRMAN: So this is reflected in correspondence, is it?

8   MS AMY TSE: Yes.

9   CHAIRMAN: Is it reflected in the minutes of the councils?

10   MS AMY TSE: Yes.

11   CHAIRMAN: So perhaps you could provide us with that  
12           correspondence, and if you've got the minutes, can you  
13           provide us with the minutes?

14   MS AMY TSE: Yes. Okay.

15   CHAIRMAN: Thank you.

16           Prof Lo.

17   MEMBER LO: I just want to find out more about the tendering  
18           process. Does it involve the safety record of the  
19           company when you award a route contract, or what is  
20           being considered? What are the major factors? Is the  
21           fare being considered? What are the factors that award  
22           one route to one company and not to the other?

23   MS AMY TSE: Fare is one of our criteria to assess. The  
24           other is the accident rate that we would also compare.

25   MEMBER LO: So how exactly do you compare the accident rate

26

1 of two companies? Do you have parameters or do you have  
2 factors you look at in a very explicit manner, so people  
3 can actually know in a very transparent manner?

4 MS AMY TSE: It will be assessed based on the existing  
5 parameters, like the number of accidents involvement  
6 rate, as we are now using -- in the vehicle-kilometre  
7 that we are now using as a parameter.

8 CHAIRMAN: These are statistics that one has seen in the  
9 forward planning bus safety sections of the companies;  
10 is that what you are describing?

11 MS AMY TSE: Yes, and the number of accident rates in the  
12 past three years.

13 CHAIRMAN: But do you give any weighting for different kinds  
14 of accidents, for example an accident kills ten people  
15 or an accident where an old lady falls over in a bus?  
16 Do you weight them?

17 MS AMY TSE: We will count all the types of accidents.

18 CHAIRMAN: But do you give different weightings for them?  
19 Do you understand my point?

20 MS AMY TSE: No, we do not give the weighting to different  
21 types of accident. We take it as a whole.

22 CHAIRMAN: So it's a raw figure?

23 MS AMY TSE: Yes.

24 CHAIRMAN: The number of accidents per millions of  
25 kilometres or whatever statistic you use; is that it?

26

1 MS MABLE CHAN: Chairman, if I may --

2 MS AMY TSE: Yes.

3 MS MABLE CHAN: -- I would ask Amy or Patrick to elaborate  
4 a little bit, that there are a number of factors that  
5 they will consider in a restricted tender exercise. So,  
6 in response to the member's question about safety, Amy  
7 has quoted the indicator that we have used and made  
8 reference to in the forward planning exercise. Apart  
9 from the safety factor, there are a number of other  
10 factors regarding performance and service standards that  
11 they will also consider.

12 I would suggest we will provide, after the hearing,  
13 the factors considered in the marking scheme --

14 CHAIRMAN: Thank you.

15 MS MABLE CHAN: -- for the complete reference for the  
16 committee.

17 CHAIRMAN: Yes. Thank you very much. If you could provide  
18 that before we have our hearing on Saturday, then we  
19 would be in a position to ask questions that might  
20 arise. Can that be done?

21 MS MABLE CHAN: Yes, sure.

22 CHAIRMAN: Thank you.

23 Yes, Mr Chan.

24 MR DEREK CHAN: Thank you.

25 Ms Chan, on the issue of the safety performance  
26

1 indicator, it is a matter I will come to in a moment,  
2 but before I move on, may I just pick up on a question  
3 Prof Lo asked, about whether fares is a criterion. Can  
4 I just understand -- so in the tender exercise, the  
5 bidder will put in a proposed fare for the route; is  
6 that correct? So it's not set by the government?

7 MR PATRICK WONG: No.

8 CHAIRMAN: Sorry, was there an answer to that?

9 MR PATRICK WONG: Actually, because it's competitive  
10 tendering, the bus company will put forth their proposed  
11 fares, which we have -- the fare scale governs the  
12 maximum fare per distance. Each company has their own  
13 fare scale. So whenever they submit a bid for the  
14 particular route under tender, they would put forth  
15 their proposed fare, which may be below the ceiling fare  
16 level under the scale I have just mentioned.

17 CHAIRMAN: How is the ceiling fare made known to the bus  
18 company?

19 MR PATRICK WONG: It's been gazetted and basically  
20 published.

21 CHAIRMAN: Is that a fare per kilometre and how is it  
22 articulated?

23 MR PATRICK WONG: Basically, they set different kilometres  
24 with different fares. In other words, the longer  
25 distance, they can charge higher fares. Also, it

26

1 depends on different service types they provide. For  
2 example, some recreational routes which can be operated  
3 on Sunday and public holidays, they can be allowed to  
4 charge higher fares, and overnight services, they can be  
5 allowed to charge higher fares, and so on and so forth.

6 CHAIRMAN: And this is gazetted?

7 MR PATRICK WONG: Yes.

8 CHAIRMAN: Can you provide us with a copy of the current  
9 version?

10 MR PATRICK WONG: Yes, sure.

11 CHAIRMAN: Thank you.

12 MR DEREK CHAN: Would these fares still be subject to the  
13 fare adjustment mechanism for the normal franchise  
14 agreements, or are they separately considered? So, once  
15 they have bid for the route, according to the contract  
16 price, and they want to increase it later on, is it done  
17 under the same mechanism?

18 MR PATRICK WONG: Yes, once they offer and we accept the  
19 tender, the fare will be charged in accordance with that  
20 fare, and if they want to raise that fare they are  
21 subject to the fare increase mechanism, as you have just  
22 mentioned.

23 MR DEREK CHAN: If I understand correctly, from a policy  
24 perspective, this competitive tendering exercise would  
25 be restricted to new towns, or new developments, when  
26

1 a package of routes becomes available.

2 Are there any plans, that the government may or may  
3 not have, to expand the scope of competitive tendering,  
4 and if so to what extent?

5 MS MABLE CHAN: Perhaps I will answer that question.

6 It is always the government's objective to promote  
7 competition and to improve service standards. As  
8 a forward-looking perspective, there are a number of new  
9 development areas or districts like in the New  
10 Territories or even in the urban Kowloon, like the  
11 Kai Tak development. So, while we are venturing into  
12 competitive routing in such new town developments or new  
13 area developments, should there be any routes that  
14 straddle across these new areas to the existing built-up  
15 area, like between Kwun Tong and also the Kai Tak East  
16 development, then we also will try out the approach of  
17 competitive routing, route-by-route, tendering approach.

18 Looking ahead, under the current franchise model, it  
19 will not preclude us from doing more in this regard.

20 I also wish to add that from the past experience, should  
21 a franchised bus operator fail in the service standards  
22 or compliance with the franchise requirements, like in  
23 the 1990s there has been occasions that we actually  
24 suspend the operation of certain routes or certain  
25 package of routes, like in the case of the China Motor

26

1           Bus, and then we take out those routes or package of  
2           routes for competitive tendering, to invite new  
3           operators to operate those routes. So there is always  
4           the opportunity for us to do more and to use this as  
5           a vehicle to salvage the service performance of existing  
6           operators.

7           Thank you.

8   CHAIRMAN: When was the last open, public, competitive  
9           tender in Hong Kong for bus routes? Open public.

10   MS AMY TSE: It was at 1998, when we first tendered the  
11           routes for the airport service.

12   CHAIRMAN: Thank you.

13   MS AMY TSE: Sorry, to China Motor Bus, in 1998.

14   CHAIRMAN: So such competitive tendering as there has been  
15           since has all been restricted competitive tendering?

16   MS AMY TSE: Yes.

17   CHAIRMAN: Thank you.

18   MR DEREK CHAN: Are there any plans, or at least plans under  
19           consideration, to subject the old routes currently under  
20           the franchise agreements -- subject those routes to  
21           competitive tendering, in an open manner, not just  
22           restricted to Hong Kong incumbents?

23   MS MABLE CHAN: At the present moment, we do not have  
24           immediate plan, but we would not rule out such  
25           opportunity because we always keep in view the service

26

1 performance of the various franchised operators in terms  
2 of various bus routes.

3 MR DEREK CHAN: If I may then move on to the next topic,  
4 which is the use of, firstly, safety indicators or  
5 safety performance indicators. I will also ask  
6 questions about the virtues or non-virtues of using  
7 incentives or penalty clauses in contracts linked to  
8 such a safety performance indicator.

9 If I may take it step by step, firstly, by looking  
10 at the concept of a safety performance indicator.  
11 I would like to start by looking firstly at what is  
12 currently used by the Transport Department, and then  
13 later on ask for your comments on the evidence that this  
14 committee has received in terms of possible improvements  
15 in this area.

16 Before I go to the details, can I start off by  
17 asking you to clarify one aspect of the full report of  
18 the Working Group on Enhancement of Safety of Franchised  
19 Buses. That may or may not have relevance to this  
20 topic, I'm not sure, so I want to ask you to clarify  
21 that.

22 That report has made it into bundle TD-5.

23 Mr Chairman, I don't have the page references. If  
24 I may just use the paragraph numbers of the report at  
25 this stage.

26

1 CHAIRMAN: Yes.

2 Ms Chan, do you have the report in front of you?

3 MS MABLE CHAN: Just a minute.

4 MR DEREK CHAN: Please take your time.

5 MS MABLE CHAN: Yes, I am ready.

6 MR DEREK CHAN: Mr Chairman, just for the record, the first  
7 page of the report is at page 1757 of TD --

8 CHAIRMAN: As normal, I am working on the document that was  
9 provided overnight, so I don't have page numbers, as is  
10 normal.

11 MR DEREK CHAN: So am I. Perhaps I can just put the page  
12 numbers in for the record of the transcript, so that  
13 when we come back to it later on, we have  
14 a page reference there.

15 The first reference is TD-5, page 1757, and I wish  
16 to refer you to paragraph 4.26, which is page 1798 in  
17 the bundle.

18 Just to give some context to this paragraph, this  
19 paragraph is contained in a section on training, so at  
20 first blush it may not be relevant to the topic of  
21 safety performance indicators. So I may just invite you  
22 to clarify.

23 If I can just read out 4.26 first:

24 "The working group considers that in order to ensure  
25 that adequate and appropriate trainings are provided to  
26

1 bus captains, all franchised bus operators should also  
2 enhance their internal monitoring and audit mechanism  
3 for the training of bus captains, including developing  
4 key performance indicators, monitoring the  
5 implementation and their effectiveness, and formulating  
6 appropriate remedial follow-up actions."

7 And the rest of the paragraph talks about reporting  
8 to management.

9 Can I just ask you to explain what you mean by  
10 development key performance indicators; what is it  
11 a reference to?

12 MS MABLE CHAN: This key performance indicator is regarding  
13 the training of the bus captains and it is not directly  
14 relevant to the safety performance indicator as you may  
15 have mentioned at the outset. For the committee's  
16 background, in the past, the franchised bus operators  
17 have volunteered to set an indicator for their training,  
18 say the number of bus captains to be trained in the past  
19 three years.

20 MR DEREK CHAN: I see.

21 MS MABLE CHAN: This is just a starting point, but with the  
22 promulgation of the practice note on the training  
23 framework of bus captains, one of the issues and  
24 observations that we have found is that by just relying  
25 on one single indicator of the number of bus captains to  
26

1 be trained in the past three years, it does not suffice  
2 to achieve the training requirement of bus captains.

3 The proposal of developing key performance  
4 indicators will cover the performance of the bus  
5 operators, in providing training of in-service bus  
6 captains for refresher course, remedial course, and also  
7 for those that are necessary to rectify the driving  
8 misbehaviour of those bus captains committing traffic  
9 offences. And, on the other hand, we have also observed  
10 that while the bus operators have mentioned that they  
11 will provide behind-the-wheel training for the  
12 in-service bus captains, this may not be actually  
13 provided for the in-service bus captains to the extent  
14 that we expect. Say, for example, some of the  
15 behind-the-wheel training will actually involve that  
16 particular bus captain watching behind another bus  
17 captain behind the wheel, so he's just observing from  
18 behind. So this does not fulfil the expectations of  
19 behind-the-wheel training.

20 So we are expecting the franchised bus operators to  
21 develop key performance indicators along these fronts,  
22 so that it is easier and more efficient for the bus  
23 operators to achieve an internal monitoring and audit  
24 mechanism.

25 We are also expecting them to provide regular  
26

1 reports. If I remember correctly, it's half-yearly, at  
2 least half-yearly, to their management boards. On the  
3 other hand, they should also provide exceptional reports  
4 to the management boards on their training indicators  
5 and the effectiveness of their training. In parallel,  
6 these reports should be provided to the Transport  
7 Department for our regular monitoring and also for us to  
8 review with them in our regular meetings with them, with  
9 their senior management.

10 Thank you.

11 MR DEREK CHAN: For my purposes, just to make it clear,  
12 these performance indicators do not relate to driving  
13 behaviour as a result of the training?

14 MS MABLE CHAN: In a way, it is a training target.

15 MR DEREK CHAN: Training target. Thank you for that  
16 clarification.

17 If I may then move on to looking firstly at how  
18 safety indicators are presently, currently, being used  
19 by the Transport Department.

20 Can I do that by first taking you to the bus safety  
21 section of KMB's forward planning programme for 2018 to  
22 2022. The page reference for that is TD-1, page 180.

23 Just to remind you of the context, this would be  
24 a document prepared by KMB and submitted to the  
25 Transport Department around mid-2017, which relates to  
26

1 the next five years, 2018 to 2022.

2 If I can take you immediately to page 192 of this  
3 document. Under paragraph 8.8.1, under the heading  
4 "Proposed Target and Other Measures", the paragraph  
5 states as follows:

6 "KMB proposes to use the 3-year average of 2014 to  
7 2016 actual accident involvement rate of 2.71 (defined  
8 as the number of buses involved in accidents per million  
9 kilometres operated) as a target for the purpose of this  
10 five-year plan period. It represents a 6 per cent  
11 reduction from the accident rate in 2014, the highest  
12 record among 2014 to 2016."

13 So the point that I wish to draw to your attention,  
14 before I move on to the next document, is that the  
15 target that KMB set for themselves is 2.71.

16 Can we then move forward a year to see what happened  
17 in 2017, so the next document that I wish to take you to  
18 will be the next forward planning programme for 2019 to  
19 2023, and the page reference for that is TD-5,  
20 page 1728.

21 Do you have that before you, Ms Chan?

22 MS MABLE CHAN: Yes.

23 MR DEREK CHAN: Page 1728, first of all, is a letter from  
24 the Transport Department to KMB, dated 21 May 2018,  
25 basically providing KMB with a list of what needs to be  
26

1 included in the next forward planning programme. So  
2 that's the context.

3 MS MABLE CHAN: Yes, please.

4 MR DEREK CHAN: Then over the page, at 1729 to 1731 is your  
5 letter to KMB as to what needs to be included in the  
6 next FPP.

7 If I may just read the first two paragraphs of  
8 page 1729, under the heading of "Bus Safety":

9 "We note that there was an increase in the number of  
10 KMB buses involved in accident per million  
11 vehicle-kilometres from 2.74 in 2016 to 3.04 in 2017,  
12 which was at a high level.

13 The table below which summarises the number of KMB  
14 buses involved in the traffic accidents by severity of  
15 accident from 2015 to 2017 reveals that there was  
16 a decrease in the number of fatal accidents from 11  
17 cases in 2015 to 3 cases in 2017. However, the number  
18 of slight traffic accident has shown an increasing trend  
19 from 737 in 2015 to 866 in 2017. Also, the actual  
20 accident involvement rate, which is 3.04 in 2017, was  
21 higher than the proposed target accident ... rate in  
22 your FPP (2018 to 2022), which was 2.71."

23 So KMB did not meet a target that it set for itself.  
24 And we can see in the table below the two paragraphs  
25 I just read the number of KMB buses involved in traffic  
26

1 accidents as a rate per million vehicle-kilometres had  
2 been increasing from 2015 to 2016 to 2017, the rate  
3 being 2.62, 2.74 to 3.04.

4 The second table below on that page also shows  
5 an increasing number of traffic accidents involving KMB  
6 buses throughout the same three years.

7 So it would appear from this analysis -- and please  
8 correct me if I am wrong -- that the two safety  
9 indicators that the Transport Department focused on here  
10 are, firstly, accident rates per million  
11 vehicle-kilometres, and secondly, the number, the  
12 absolute number, of traffic accidents involving KMB  
13 buses.

14 Would that be a fair summary?

15 MS MABLE CHAN: Yes.

16 MR DEREK CHAN: Then we can skip forward to page 1731, which  
17 is the last page of that letter. Under subparagraph  
18 (4), the heading is "Target for target accident rate",  
19 and can I just read it out. The Transport Department  
20 says:

21 "Your company is required to

22 a. propose target accident rate for the coming FPP  
23 to pursue continuous improvement to the safety of your  
24 operation

25 b. propose target reduction of accident involvement  
26

1 rate per million kilometre yearly for the coming five  
2 years."

3 Again, the focus is on the accident rate per million  
4 vehicle-kilometres. Can I explore with you the utility  
5 of using this accident rate per million  
6 vehicle-kilometres rate as a safety performance  
7 indicator.

8 Firstly, would you agree with me this rate covers  
9 both accidents where the bus driver is at fault and also  
10 accidents where the bus driver is not at fault? Would  
11 that be correct?

12 MS MABLE CHAN: This is a general indicator of counting the  
13 number of accidents. So the number of accidents may  
14 cover some of the accidents involving driver's fault or  
15 may not. The causes of the accidents may be multiple  
16 and the investigation of the accidents and also the  
17 determination of the causes of whether the driver is  
18 a contributing factor will be subject to the judicial  
19 proceedings.

20 Thank you.

21 CHAIRMAN: So the short answer is "yes"?

22 MS MABLE CHAN: Yes.

23 MR DEREK CHAN: And, therefore, this rate includes factors  
24 to which the bus driver or bus operator cannot control;  
25 would you agree with that?

26

1 MS MABLE CHAN: Yes.

2 MR DEREK CHAN: With that in mind, can I refer you to the  
3 evidence of Prof Stanley on this point, and can I invite  
4 your observations or comment on that.

5 Can I firstly take you to the transcript of Day 16,  
6 which is 15 September 2018, which should be in  
7 transcript bundle 7, page 67.

8 I would like to pick it up at page 67, line 16.  
9 Just to give you some context to the answer, I was  
10 asking questions of Prof Stanley about using a benchmark  
11 safety performance indicator as a trigger to a penalty  
12 or incentive clause. But can I just pick it up on line  
13 16, where Prof Stanley talks about what he would expect  
14 to be included in a safety performance indicator.  
15 I will just read it out for the record, at line 16:

16 "I would just make a few comments which -- I talked  
17 before the break about, for example, fatalities, 'slips,  
18 trips and falls', and so on, being some of the sorts of  
19 things you might take into account. In terms of  
20 developing KPIs [that's short for key performance  
21 indicators] or performance indicators, there's a number  
22 of criteria that you would expect them to meet. They  
23 need to be specific. You've clearly got to be able to  
24 measure them. They ought to be achievable. They  
25 clearly need to be relevant. The data, and so on, needs  
26

1 to be available on a timely basis. And all of those  
2 KPIs need to be something that the operator can affect.  
3 There's no point having a KPI if the operator is not  
4 able to, by their performance, influence the outcomes of  
5 them. So they are really important."

6 In the same vein, can I also take you to page 93 of  
7 the same day's evidence, and can I pick it up at line 22  
8 of page 93. Again, just to give you some context,  
9 looking at the exchange above, the discussion was about  
10 whether the indicator includes something that the  
11 operator has or has not control over. At line 22,  
12 Prof John Stanley says this:

13 "I think, when we were talking about the criteria  
14 for indicators, it needs to be something that you've got  
15 control over."

16 So, given that we have just looked at the accident  
17 rate per vehicle-kilometres, which includes pretty big  
18 weighting of accidents to which the bus operator has no  
19 control over because the bus driver is not at fault,  
20 what observations do you have in terms of Prof Stanley's  
21 suggestion of what a performance indicator ought to  
22 include, something that the bus operator does have  
23 control over? Do you have any observations in that  
24 regard?

25 MS MABLE CHAN: Firstly, in terms of key performance  
26

1 indicator, I think it serves the purpose of having -- of  
2 serving as a management tool or indicator for both the  
3 regulator, ie the Transport Department, and the  
4 franchise operators, to review their performance in the  
5 aspect of safety at the outset.

6 As I answered your question a minute ago, in terms  
7 of road transport or land transport, there could be  
8 a number of contributing factors leading to accidents.  
9 While following this KPI in terms of the number of  
10 accidents in absolute terms and also the number of  
11 accidents per million km, we are also in the process of  
12 the forward-planning exercise, digging into the analysis  
13 of the nature of accidents, in terms of the bus type,  
14 bus model, the type of accidents, be it collision or  
15 non-collision, and also the age of the drivers involved,  
16 the routes of those accidents involved. Merely relying  
17 on the KPI will just help us as a very high-level tool  
18 to evaluate the overall safety performance of  
19 a franchised bus operator, but that would not suffice.  
20 We are actually asking the franchised bus operators to  
21 cover in their safety chapter, as we have provided in  
22 May for the committee's reference, that they actually  
23 have to break down those accidents by the various  
24 categories that I have just mentioned.

25 In fact, my Bus and Railway Branch and also the Road  
26

1 Safety and Standards Division have joined hands in  
2 analysing the trend of the accidents according to the  
3 various categories as I mentioned, in order to evaluate  
4 in more detailed terms the safety performance of the  
5 franchised bus operators.

6 MR DEREK CHAN: Ms Chan, if I may -- obviously, if you want  
7 to expand, please let me know -- but my question is more  
8 focused on the indicator. Obviously, the evaluation, as  
9 you have mentioned, it is important to dig deep into  
10 different causes and all that --

11 CHAIRMAN: Forgive me for interrupting, Mr Chan, but I think  
12 this matter can be put very simply. You don't agree  
13 with Prof Stanley that a KPI must be something that  
14 a bus operator can influence the outcome? You don't  
15 agree with that?

16 MS MABLE CHAN: To answer your question, I would not agree,  
17 because a KPI, in terms of a management tool --

18 CHAIRMAN: That answers my question. Let Mr Chan pursue his  
19 question.

20 MS MABLE CHAN: Thank you.

21 MR DEREK CHAN: Thank you, Chairman.

22 You mentioned analysis and the different causes and  
23 breakdowns and all that. From my reading of the  
24 documents, there is no targets at all set for the bus  
25 company in respect of individual categories of analysis.

26

1           The only target that I can see is this accident per  
2           million vehicle-kilometres.

3           So, in terms of using something as a target, do you  
4           agree that you should be using something that the bus  
5           company has control over?

6   MS MABLE CHAN: If we are operating in a vacuum, and in  
7           taking a purist approach, it would be good if we can  
8           have some KPI that a company can have full control.  
9           But, as I have answered the chairman's question, I do  
10          not totally agree that a KPI will have to be fully  
11          controlled by a company, because it is an indicator, to  
12          start with, and it serves as a basis for us to evaluate  
13          its performance. Because the accidents are complex and  
14          could be contributed by various factors, it is by our  
15          detailed analysis of the various types of accidents and  
16          the nature of accidents involved that we can start to  
17          dig deep into the various other related performance  
18          indicators.

19          If I may, you have mentioned about the training  
20          targets. In the working group discussions, the safety  
21          is our utmost concern, and while the company may not  
22          have full control of the number of accidents involving  
23          their buses in a particular year, as far as the bus  
24          type, the bus safety and the bus captains are concerned,  
25          there are a number of ways that they can help to bring  
26

1 down the number of accidents in absolute terms and also  
2 the number of accidents involved per million kilometres.

3 It is actually on this front that we have come up  
4 with the practice note, and then to expect them to  
5 develop key performance indicators on training, and also  
6 with the update of the specifications of the black box,  
7 and also with the installation of the CCTV, all these  
8 devices will help the company to investigate whether or  
9 not a driver is particularly involved or cause fault to  
10 that accident or there are other contributing factors.

11 So we will take all this into account in evaluating  
12 whether the company has tried its best in providing  
13 a safe bus, as also to equip the driver with a safe  
14 driving behaviour and attitude.

15 MR DEREK CHAN: So, when you are weighting these various  
16 different incidents and analysis that you are talking  
17 about, different aspects, different causes, you  
18 investigate through CCTV and all that, so the weighting  
19 will be done in your head?

20 MS MABLE CHAN: Perhaps it would be helpful if I quote  
21 an example of how we would deal with this. Say in the  
22 case of KMB, we have pointed out that its accident rate  
23 has actually exceeded its pledged target. We have asked  
24 them to provide further analysis in terms of the nature  
25 and category of the accidents. Our initial observation  
26

1       has found that the number of non-collision accidents  
2       have actually increased relatively over the last year,  
3       and the installation of the black-box device and also  
4       the CCTV would actually help the company to advise us of  
5       whether or not there is something wrong with  
6       a particular bus model or whether there is something  
7       wrong with a particular bus captain's driving behaviour,  
8       that has led to the increase in non-collision accidents  
9       involving the falling of passengers or losing of  
10      passengers' balance within a bus.

11       There are a number of routes, say, for example, that  
12      we may observe there are higher occurrence of such kind  
13      of accidents. We actually go deep down to that level of  
14      detail to investigate and to ask the companies to come  
15      up with focused measures. If the chairman and members  
16      may remember correctly, when we last presented the  
17      safety chapters, you can see that the companies have  
18      presented quite standard paragraphs on the improvement  
19      measures to enhance safety, but I think since the last  
20      submission of the FPP we have actually, with the  
21      comparison of the analysis of the accident trend, gone  
22      deep into the accident analysis and asked them to  
23      provide focused measures to address the various  
24      occurrence of accidents by bus routes, by the bus type,  
25      and also by the type of the accidents. This will help  
26

1           us with the reference of the KPI, as a start, for us to  
2           evaluate in a more comprehensive and holistic manner the  
3           safety performance of franchised bus operators.

4   CHAIRMAN: Where is this request of the bus companies that  
5           they perform a more detailed analysis?

6   MS MABLE CHAN: We have written to the various bus  
7           operators, setting out our requirements. One of the  
8           examples is just illustrated in the bundle, our letter  
9           to the KMB. We can certainly provide other letter  
10          samples for the committee's reference. And following  
11          the issuance of those letters the various franchised bus  
12          operators are in the process of finalising the coming  
13          forward planning programme, in particular the safety  
14          chapter. So the process is developing and is evolving.

15          The whole FPP exercise will end by the end of this  
16          year, by which we will submit the finalised FPP,  
17          including the route planning exercise, as well as other  
18          chapters, in particular the safety chapters, to the  
19          bureau for the agreement -- in accordance with the law.

20   CHAIRMAN: This is delayed compared with previous years, is  
21          it not?

22   MS MABLE CHAN: Sorry, Chairman?

23   CHAIRMAN: Is this not a delay compared with the normal  
24          timetable for the forwarding of the forward-planning  
25          exercise?

1 MS MABLE CHAN: I think it is more or less in line, but  
2 obviously --

3 CHAIRMAN: So it will be the end of the year before the bus  
4 companies have given you this safety chapter in their  
5 forward-planning exercise?

6 MS MABLE CHAN: To be correct, the franchised bus operators  
7 have submitted a draft of the FPP, including the safety  
8 chapter, by the deadline --

9 CHAIRMAN: The deadline being?

10 MS MABLE CHAN: End of June, and it is supposed to be around  
11 the end of September/early October that we will come  
12 back to them with comments, and hopefully we will reach  
13 some sort of agreement on the contents of the chapter,  
14 and then it will take us from early October to the end  
15 of this year for us to submit to the bureau and for  
16 clearance of the FPP.

17 CHAIRMAN: Is there not some statutory requirements about  
18 this timetable?

19 MS MABLE CHAN: It is a statutory requirement, correct.

20 CHAIRMAN: Can you remind me where this is to be found? The  
21 dates you have mentioned, as I recall, it was the end of  
22 June and certainly September.

23 MS MABLE CHAN: End of September, yes.

24 While me colleagues are searching through the  
25 bundles, you are correct, there are two dates mentioned

26

1 in the ordinance. They have to submit by the end of  
2 June, and then we are supposed to reach agreement with  
3 them by the end of September --

4 CHAIRMAN: Otherwise, you can go for an arbitration via the  
5 Secretary for Transport and Housing; is that right?

6 MS MABLE CHAN: Yes, and the process beyond September and  
7 taking us to the end of December is the internal process  
8 for us to seek the clearance from the Secretary for  
9 Transport and Housing, when we will submit all the  
10 details of the route planning exercise.

11 CHAIRMAN: Which is why I asked the question. Are you not  
12 past 1 September or the end of September? Have you  
13 reached agreement with the bus companies?

14 MS MABLE CHAN: The date of end of September has passed. In  
15 this particular year, because of a number of questions  
16 we have posed to the operator, we are expecting them to  
17 provide supplementary beefing-up sections to the safety  
18 chapter, and that is why by now they are still  
19 finalising the additional pieces of information to the  
20 safety chapter.

21 CHAIRMAN: So you haven't reached agreement this year yet?

22 MS MABLE CHAN: No.

23 Chairman, the reference to the statutory provision  
24 is clause 12A of the Public Bus Services Ordinance.

25 CHAIRMAN: Thank you. When do you expect to reach agreement  
26

1           this year?

2       MS MABLE CHAN: We hope to agree with them as early as  
3           possible.

4       CHAIRMAN: Obviously, but do you have any expectation when  
5           that might be achieved?

6       MS MABLE CHAN: Perhaps a piece of information: we have  
7           recently met with Citybus Ltd and New World First Bus on  
8           the FPP, and we are also arranging a meeting with the  
9           KMB and Long Win on the FPP. So a lot of work is  
10          underway for us to reach an agreement as early as  
11          possible.

12       CHAIRMAN: You've said that twice now. Are you unable to  
13          put a date on it? If you are, just say so.

14       MS MABLE CHAN: I cannot mention a date at this juncture,  
15          but it is my objective to reach an agreement as early as  
16          possible, because we also have to finalise the routes  
17          for the next year, for the planning purpose and for  
18          early dissemination to the public of information.

19       CHAIRMAN: Yes, Mr Chan.

20       MR DEREK CHAN: Mr Chairman, again just for the record,  
21          section 12A, the section Ms Chan referred to, is  
22          contained in THB-2, page 109.

23       CHAIRMAN: Thank you.

24       MR DEREK CHAN: An earlier question by the chairman is about  
25          your request to the bus operators to provide further  
26

1 breakdown of the causes. I think one example of that  
2 would be at TD-5, page 1729 to 1730, which is the  
3 document we have just been looking at.

4 At page 1728, the letter dated May 2018, and then at  
5 the bottom of page 1729 you require the KMB to conduct  
6 an analysis of traffic accidents, and over the page you  
7 ask them to analyse the traffic accidents related to  
8 non-driver factors.

9 So is that the sort of request to bus companies that  
10 you were referring to in your evidence?

11 MS MABLE CHAN: Yes. And actually over the page on 1730  
12 there is also a long list of the analysis that we are  
13 expecting the company to conduct and provide.

14 CHAIRMAN: At page 1729, the bottom of that page, "Your  
15 company is required to (a)", and then the last sentence:  
16 "The analysis shall include the trend, the nature  
17 and causes of the accident, as well as the reasons for  
18 the increases."

19 So you are requiring them to give you causes?

20 MS MABLE CHAN: Yes.

21 CHAIRMAN: Is that developed further on the next page, 1730?

22 MS MABLE CHAN: Yes, Chairman.

23 CHAIRMAN: Perhaps you can point out where that theme is  
24 developed. Just read it out, when you find it.

25 MS MABLE CHAN: Okay.

26

1           So we are expecting the company to provide further  
2           analysis on the identification of the causes of the  
3           accidents and whether there are any common factors in  
4           the accidents as identified. This will provide a basis  
5           for them to tell us what specific proposals or the  
6           improvement measures and programmes that they will  
7           provide. Say in the case of non-collision accidents  
8           involving falling passengers, the location of the  
9           passengers, are they along the stairs or are they on the  
10          lower deck or the upper deck.

11   CHAIRMAN: Where is that spelt out in this letter?

12   MS MABLE CHAN: I am just giving an example of --

13   CHAIRMAN: Before you give an example, can you read from the  
14          text anything that supports what you are saying? We've  
15          got this phrase "You are required to give us an analysis  
16          of the nature and causes of the accident", that's page  
17          1729.

18   MS MABLE CHAN: Yes.

19   CHAIRMAN: All I'm asking you is: is that developed further  
20          on the next page?

21   MS MABLE CHAN: It is further developed on the next page,  
22          down the page of 1730 we have mentioned the  
23          safety-related plans, Chairman.

24   CHAIRMAN: Yes.

25   MS MABLE CHAN: So with a view to lower the accident  
26

1 involvement rate of buses and to further enhance the  
2 safety of buses provided to passengers, we are expecting  
3 them to propose the respective specific plans and  
4 proposals: to enhance the existing monitoring system or  
5 introduce new monitoring system on the safe driving of  
6 buses; to enhance the awareness of the company's  
7 employees on the consequences of the monitoring system,  
8 what sort of disciplinary action and penalties that may  
9 have; and also to develop action plan for automation of  
10 monitoring of bus captain driving behaviour through the  
11 data captured in black boxes of similar devices; as well  
12 as to propose publicity plans and programmes in the next  
13 two years to enhance passenger safety.

14 And also, over the page, to 1731, we also expect  
15 them to provide programmes in the next two years to  
16 enhance bus captain training for part-time and full-time  
17 bus captains respectively -- this is also related to the  
18 working group recommendation on the training framework.  
19 And to provide a programme of surveys to assess the  
20 utilisation rate of seat belts on buses which are  
21 installed with 3-point seat belt on all seats as  
22 suggested in the 2018-2022 FPP submitted to the  
23 Transport Department.

24 On this latter point, we are also picking up some of  
25 the initiatives they mention in the previous FPP and we  
26

1 are expecting the company to follow through with  
2 assessment and survey to evaluate the effectiveness and  
3 utilisation, so that they can provide us more detailed  
4 data and information for us to monitor the  
5 effectiveness.

6 CHAIRMAN: Just coming back to page 1730, at the top, three  
7 or four lines down, "Analysis on traffic accident  
8 related to non-driver factors", and then there is a lot  
9 of detail about that.

10 There is no requirement that I can see where there  
11 is to be an analysis of driver-related factors, if  
12 a driver braked too harshly because he was going too  
13 fast as he approached the bus stop. Where is the  
14 requirement to give you that analysis?

15 MS MABLE CHAN: Chairman, in the case of the KMB, here we do  
16 not specify to that extent and ask them to provide  
17 detailed analysis as to what kind of behaviour of the  
18 driver has caused the traffic accidents. But can  
19 I quote the example in the Citybus, whereby they are  
20 upgrading the black-box specifications and the  
21 installation. They are actually keeping a log of the  
22 events caused by the driver and those will be the cases  
23 whereby is there any very speedy acceleration or speedy  
24 deceleration.

25 CHAIRMAN: 50 per cent of all accidents that are  
26

1 non-collision are loss of balance, are they not?

2 MS MABLE CHAN: Yes.

3 CHAIRMAN: And it's obvious beyond imagination that that  
4 must be related to braking, accelerating or swerving,  
5 for one reason or another. But then the information  
6 that you need to help you with that comes as to the  
7 cause of the accident, and that's why I'm asking you why  
8 you don't ask for details of what caused the accident.  
9 The answer might be the bus driver was driving  
10 inattentively, and what then was the cause of the  
11 accident? Because he had to brake too hard.

12 MS MABLE CHAN: In this current letter that we sent to the  
13 KMB, we haven't gone down to that level of detail.

14 CHAIRMAN: Have you done so for Citybus?

15 MS MABLE CHAN: Can I check for that, because in the updated  
16 minimum requirements for the black box, we actually have  
17 specified them to illustrate the events where there is  
18 an over-speedy acceleration or deceleration. Can I ask  
19 my deputy commissioner to update the committee on that,  
20 about the acceleration of the G force of that, so that  
21 to facilitate the company to identify whether there are  
22 any sudden braking or over-braking, harsh braking, by  
23 the driver?

24 CHAIRMAN: Yes, please do.

25 You are addressing the August 2018 basic minimum  
26

1 requirements for electronic data recording device, are  
2 you?

3 MR YK CHAN: That was a minimum requirement, but what I am  
4 talking about is --

5 CHAIRMAN: Let's start with the minimum and then you can go  
6 on to what is the maximum, what you are hoping they will  
7 do. What's the minimum first of all? And what we are  
8 looking for is data about acceleration or braking.

9 MR YK CHAN: May I have a minute?

10 CHAIRMAN: It's appendix 2, if that helps you.

11 MR DEREK CHAN: Just for the record, Mr Chairman, that's  
12 appendix 2 to the working group report, and the page  
13 reference is 1807 of TD-5.

14 CHAIRMAN: Not on the bundle I've got. There are no page  
15 numbers.

16 MR YK CHAN: Mr Chairman.

17 CHAIRMAN: Yes.

18 MR YK CHAN: The basic minimum requirement for the  
19 electronic data recording device, which we commonly  
20 refer to as black box.

21 CHAIRMAN: Yes.

22 MR YK CHAN: For this update, we have sort of updated with  
23 new additions or requirements.

24 CHAIRMAN: I understand that. What we are looking for is  
25 acceleration and braking. Which one is that?

26

1 MR YK CHAN: Item 4(a):

2 "Accident report -- vehicle speed profile at time  
3 interval of 1 second for the 3 minutes period preceding  
4 detection of 0.4G deceleration."

5 This is a requirement that the equipment should be  
6 able to record that sort of acceleration or  
7 deceleration --

8 CHAIRMAN: This is deceleration. It used to be 0.2, didn't  
9 it?

10 MR YK CHAN: No. 0.4 has been in this since first inception  
11 already.

12 CHAIRMAN: Thank you. Why is 0.4 deceleration chosen? Is  
13 that when you hit the wall? Is that what 0.4 means?

14 MR YK CHAN: No. Actually, 0.4 is a figure that we adopted  
15 some time ago. It was actually based on a study.

16 CHAIRMAN: What does it represent?

17 MR YK CHAN: It represents the force, when you step on the  
18 brake, the sort of gravitational force that you may  
19 experience as a normal person.

20 CHAIRMAN: I understand --

21 MR YK CHAN: To put simply, 0.4 -- normally, we are talking  
22 about gravitational force is 9.81 metres per second per  
23 second. Now, 0.4 is a fraction of that. Now, on  
24 a bus --

25 CHAIRMAN: What does this actually mean for a real driver?

26

1           Braking where smoke is coming off the wheels; is that  
2           it?

3       MR YK CHAN:   No.

4       CHAIRMAN:   Give us a real example; what does it mean?

5       MR YK CHAN:   No, the definition of this one is actually --  
6           what it demonstrates is a deceleration force of 3.92  
7           metres per second, which would be experienced by  
8           a passenger sitting on a seat would fall off the seat.  
9           So this is sort of a braking force that is large enough  
10          or deceleration force large enough to cause a passenger  
11          who normally sits on a seat and fall off.   So this is  
12          a requirement specified in this equipment.

13       CHAIRMAN:   So a passenger seated but without a seat belt  
14          would fall off a seat at this level of deceleration?

15       MR YK CHAN:   Fall off the seat -- well, now, to put it more  
16          technically, there was no dislodgement of passenger from  
17          the seat in more than 95 per cent of the sample cases.  
18          So this is a probability of 95 per cent of the  
19          passengers would probably fall off the seat without  
20          a seat belt, if a retardation force of 0.4G is applied  
21          on the bus suddenly.

22       CHAIRMAN:   Thank you.   So what that then triggers is if you  
23          have a deceleration of that kind, you must provide speed  
24          for the previous three minutes, but that's it, is it?

25       MR YK CHAN:   This is purely when you apply -- this is  
26

1           an instant moment, but we also need records of what  
2           happens in the previous three seconds.

3   CHAIRMAN:   Yes.   Thank you.

4   MR YK CHAN:   Three minutes, sorry.

5   CHAIRMAN:   At item 2 there is a reference to brakes at (c),  
6           is there not, "Activation of brake"?   So the machine  
7           must always report when the brake has been applied?

8   MR YK CHAN:   Well, the machine should be able to -- item 2  
9           refers to it should be capable of recording those data  
10          at every second interval.

11   CHAIRMAN:   Yes.

12   MR YK CHAN:   And store data every 30 seconds for a period of  
13          two weeks.

14   CHAIRMAN:   Yes.

15   MR YK CHAN:   So all those (a) to (f), this black box should  
16          be able to keep those information intact.

17   CHAIRMAN:   Thank you for that explanation.   That's the  
18          minimum.   But what is it that you say that you are  
19          expecting the bus companies to do above the minimum?

20   MR YK CHAN:   Well, actually, the system that we saw from --  
21          understand from -- actually, we saw how it works from  
22          Citybus and New World First Bus -- it actually can  
23          record all those information.

24   CHAIRMAN:   Can record what?

25   MR YK CHAN:   Speed.

26

1 CHAIRMAN: Yes.

2 MR YK CHAN: Let me refer to this -- it actually, obviously  
3 can record the operating time.

4 CHAIRMAN: Are you referring to a document?

5 MR YK CHAN: Yes, the document, the minimum specification we  
6 just talked about, in paragraph 2. Vehicle speed;  
7 activation of the brake, that can be seen on the screen.

8 CHAIRMAN: Yes.

9 MR YK CHAN: Actually, whenever the bus pulls into the stop  
10 and opens the rear door, that can be shown on the  
11 screen. Obviously the GPS coordination actually can --

12 CHAIRMAN: It's coordinates, is it not?

13 MR YK CHAN: Yes, the position of that bus, and whether  
14 a bell has been pushed. All those information are able  
15 to be provided by the bus company.

16 CHAIRMAN: But this is the minimum. I'm asking about what  
17 it is you expect them to provide, because the black box  
18 does a lot more than this, does it not?

19 MR YK CHAN: I think black box is a common term for  
20 an equipment, telematics system installed on buses and  
21 obviously they can provide various functions, but as far  
22 as bus operation and fleet management is concerned, the  
23 parameters specified are the parameters we are looking  
24 for, particularly when you are talking about whether  
25 a vehicle is actually speeding, whether the driver is

26

1 driving in a proper manner, whether he's applying hard  
2 brakes or not, whether the driver actually is servicing  
3 the passengers in the correct manner, whether someone  
4 might complain about the bus driver did not stop. So we  
5 can actually see from the system that the driver  
6 actually pulled into the stop and also, in response to  
7 the bell, pushed bell, and see what happens, and also  
8 let the passenger get off the buses with the doors open.  
9 All this information is related to operation of the bus  
10 services, and this is really the key information that we  
11 are looking for.

12 Also, the bus companies are actually developing  
13 their monitoring indicators as to how should this  
14 information be recorded and also how they analyse it  
15 later.

16 CHAIRMAN: All this information is recorded. The question  
17 is getting them to analyse it and use it.

18 MR YK CHAN: That's right.

19 CHAIRMAN: The buses are awash with CCTV cameras. They've  
20 got these telematics devices that store all this  
21 information.

22 MR YK CHAN: Yes.

23 CHAIRMAN: But the question is: is it being used, and is it  
24 being used to enhance safety?

25 On that note, we will take our morning break.  
26

1 20 minutes.

2 MR YK CHAN: Okay.

3 (11.35 am)

4 (A short adjournment)

5 (11.55 am)

6 CHAIRMAN: Yes, Mr Chan.

7 MS MABLE CHAN: Chairman, sorry.

8 CHAIRMAN: Yes.

9 MS MABLE CHAN: Just before the break, on the point about  
10 whether we have asked the FB operators to provide the  
11 causes of --

12 CHAIRMAN: May I invite you to be closer to the microphone.

13 MS MABLE CHAN: Sorry. Before the break, you asked us to  
14 provide some evidence to see whether we have asked the  
15 FB operators to analyse the causes of those  
16 non-collision accidents, in particular the  
17 loss-of-balance accidents.

18 May I refer you to our letter to KMB in the bundle.

19 CHAIRMAN: The 21 May letter?

20 MS MABLE CHAN: Yes, 21 May.

21 CHAIRMAN: That's TD-5 at page 1728.

22 MS MABLE CHAN: Yes. Thank you, Chairman.

23 On page 8 of our letter.

24 CHAIRMAN: Yes, page 1729.

25 MS MABLE CHAN: May I refer to the last item, "Analysis of  
26

1 traffic accidents involving KMB", and we asked them to  
2 conduct an analysis on the traffic accidents involving  
3 KMB in 2017, in conjunction with the situation in 2015  
4 and 2016, presented in annex E(i).

5 May I refer to the annex E(i)?

6 CHAIRMAN: Yes. Where do we find that?

7 MS MABLE CHAN: Sorry, Chairman, perhaps the annex is not  
8 included in the bundle, but I can certainly submit --

9 CHAIRMAN: What's included in the bundle is what we've been  
10 given either by KMB or by the Transport Department. But  
11 if you've got annex E(i), we can have it copied now.

12 MS MABLE CHAN: Yes. Should I --

13 CHAIRMAN: If someone can come forward and take the annex  
14 from you and then we will have it copied.

15 MS MABLE CHAN: Sorry, Chairman, about that. (Handed).

16 CHAIRMAN: Perhaps you could come back to that in a moment.

17 MS MABLE CHAN: Sure.

18 CHAIRMAN: Mr Chan, are there other questions you could ask  
19 in the meantime?

20 MR DEREK CHAN: I could perhaps follow up on one factual  
21 matter arising out of the exchange between Mr Chairman  
22 and Mr Chan of the Transport Department about the  
23 black-box requirements, in the meantime.

24 CHAIRMAN: Yes.

25 MR DEREK CHAN: Perhaps, Mr Chan, I can take you to the new,  
26

1           2018, black box minimum requirements which we had been  
2           looking at before the break, which is at appendix 2 of  
3           the working group's report.

4           Do you have that in front of you, Mr Chan?

5   MR YK CHAN: Yes. May I -- sorry.

6   CHAIRMAN: Let Mr Chan get to his question and then you may.

7   MR YK CHAN: I just want to make one point. Before the  
8           break, I answered to Chairman that the requirement under  
9           paragraph (a), the 0.4G, has it ever changed --

10   CHAIRMAN: I think you will find that's where Mr Chan is  
11           taking you.

12   MR YK CHAN: But after I double-checked with the 2003  
13           version, it's actually been changed from 0.2 to 0.4.

14   CHAIRMAN: So it's been doubled, the deceleration threshold,  
15           0.2 to 0.4?

16   MR YK CHAN: That's right. Yes.

17   CHAIRMAN: And 0.4 is 95 per cent of people falling off  
18           their bus seats.

19   MR YK CHAN: Yes, the chance of 95 per cent --

20   CHAIRMAN: What's 0.2? How many fall off their bus seats at  
21           that level?

22   MR YK CHAN: 0.4 was actually a threshold taken a long time  
23           ago, and at that time -- let me explain --

24   CHAIRMAN: No, can you help me with -- perhaps you don't  
25           know the answer -- how many people fall off their bus  
26

1           seats if the braking is 0.2?

2       MR YK CHAN: I don't have the answer. I cannot answer.

3       CHAIRMAN: Can you answer this question: why was it changed  
4           from 0.2 to 0.4?

5       MR YK CHAN: The reason is that in 2006, when we discussed  
6           with the operators on this minimum specification,  
7           actually when we have meeting with them and assessing  
8           the performance of the requirement, it was come out that  
9           because the 0.2 really is a very, very, very light  
10          deceleration force which will come up very, very  
11          frequently and doesn't provide any meaningful indication  
12          for monitoring purpose, and at that time we have  
13          discussed with the operators and agreed at meetings that  
14          the 0.2G version was changed to 0.4, but unfortunately,  
15          at that time, the number hadn't been changed in the  
16          specification, so this time we take the opportunity to  
17          update it. That's why.

18      CHAIRMAN: 12 years later? It took 12 years to update it?

19      MR YK CHAN: Yes. I think this is an overlook that we  
20          should have done earlier.

21      CHAIRMAN: Do you have minutes of this meeting of 2006 where  
22          this matter was discussed?

23      MR YK CHAN: Yes, I think we have notes of meeting too.

24      CHAIRMAN: Can you provide them to the committee?

25      MR YK CHAN: Yes.

26

1 CHAIRMAN: Thank you.

2 Now, Mr Chan, you were cut off. Perhaps, for the  
3 record, you can give us the reference to the 2003  
4 minimum requirements.

5 MR DEREK CHAN: Yes. That's at TD-5, page 1598.

6 CHAIRMAN: Perhaps we could have that on the screen.

7 Yes. There it is. 3(a).

8 This reference that you made to 95 per cent of  
9 people falling off the seat at 0.4G deceleration, is  
10 that a study that someone has conducted?

11 MR YK CHAN: From our search, it was a study conducted by  
12 the US department of transportation in 1977.

13 CHAIRMAN: Can you give us the details of that? Do you have  
14 that paper?

15 MR YK CHAN: We can provide it later.

16 MR DEREK CHAN: Does the study that you refer to include the  
17 probabilities of standing passengers losing their  
18 balance at 0.2 versus 0.4G?

19 MR YK CHAN: Unfortunately, there is no reference made to  
20 the standing passengers, because for sitting passenger  
21 you have a proper seat and people will sit in  
22 a prescribed, defined area, but for people standing,  
23 that is another matter, because how people stand is  
24 really -- there's not much control and also there's no  
25 set form of standing. So, from that, we don't have any

26

1 sort of equivalent deceleration force applied make  
2 reference to standing passengers.

3 CHAIRMAN: Yes, but we can readily infer by using common  
4 sense that they would all be on the floor, wouldn't  
5 they, if not through the front of the bus?

6 MR YK CHAN: Yes and no. Because it really depends on how  
7 people stand, and we actually specify in the buses there  
8 are lots of devices to facilitate standing passengers,  
9 holding bars and grips, and if people are doing the  
10 right thing when standing then I think the chance of  
11 falling down may not be as severe. But of course we  
12 understand people, they come on the bus carrying their  
13 packages and walk around when the bus is moving, then  
14 that's another matter.

15 CHAIRMAN: Mr Chan.

16 MR DEREK CHAN: I have just been handed a document which --

17 CHAIRMAN: I think this is the document that you wish to  
18 speak to -- we now have it -- headed annex E(i).

19 MS MABLE CHAN: Yes, Chairman. This is the annex E(i)  
20 attached to the letter to the KMB as well as other  
21 franchised bus operators. In this table, we are asking  
22 them to categorise and analyse the contributing factors  
23 of traffic accidents involving bus captains. We have  
24 provided in this table for the handy reference  
25 a comparison of the number of bus captains involved in  
26

1       those traffic accidents in three years, and we have  
2       divided the factors as listed in the table.

3               So, in the second item, "Factors related to bus  
4       captains".

5       CHAIRMAN:   Yes.

6       MS MABLE CHAN:   And the second item -- because this is  
7       a partial description of the nature of the accidents, we  
8       have input here as stopping or starting negligently as  
9       an example, and following this description, in our  
10      letter to the various bus operators, the bus operators  
11      are elaborating in their safety chapter the various  
12      factors relating to these kinds of accidents.

13             And in terms of stopping and starting negligently,  
14      we notice in their safety chapter, which is being  
15      finalised for our consideration, that in the case of  
16      KMB, they are actually subdividing the accident counts  
17      by the incidence of accelerating, of bus braking in  
18      traffic, bus braking when stopping for passengers, when  
19      pulling off or leaving bus stop.   So there are  
20      individual categorisation of number of accident counts  
21      in terms of the bus braking under various circumstances.

22             So while the bus braking is not specifically  
23      mentioned in this table, because this is a starting  
24      reference for them, and we expect them to provide the  
25      detailed accounts of the accident situations, they are

26

1 providing in their safety chapter on the causes, whether  
2 or not hard braking is applied during the traffic or  
3 whether they are pulling off from the bus stop,  
4 et cetera.

5 Thank you, Chairman.

6 CHAIRMAN: Can you just help me, at least: where has this  
7 data come from?

8 MS MABLE CHAN: The data has been compiled with reference to  
9 the past accident statistics described in the previous  
10 bus safety chapters of the various bus operators.

11 CHAIRMAN: So is this collation of data an exercise done by  
12 the Transport Department? This table in front of us,  
13 this one page.

14 MS MABLE CHAN: Maybe Tony, our chief engineer, can help us  
15 on that.

16 CHAIRMAN: Yes.

17 MR TONY YAU: Chairman, yes, this data we collected from the  
18 police traffic accident system.

19 CHAIRMAN: From the police?

20 MR TONY YAU: Yes.

21 CHAIRMAN: But it is the Transport Department that have  
22 produced this document?

23 MR TONY YAU: Yes.

24 CHAIRMAN: And what are these police statistics called?

25 MR TONY YAU: The name is case investigation --

26

1 CHAIRMAN: Speak closer to the microphone, if you would.

2 MR TONY YAU: Because they have changed to a new system with  
3 a new name.

4 The system is named case management incident system.

5 CHAIRMAN: CMIS I think is the acronym they use.

6 MR TONY YAU: Yes.

7 CHAIRMAN: Because we had evidence from the police.

8 MR TONY YAU: Yes.

9 CHAIRMAN: And you have access to their data bank, do you  
10 not?

11 MR TONY YAU: Yes.

12 CHAIRMAN: Have you read the transcript of the evidence that  
13 the police gave us not so long ago?

14 MR TONY YAU: No. We only can access the data --

15 MS MABLE CHAN: The transcript, police transcript.

16 MR TONY YAU: Yes.

17 CHAIRMAN: Then you know that the police told us that they  
18 had a template of I think 60 factors that was given to  
19 the police constable who's investigating the accident,  
20 and he ticks one or more of these boxes and then inputs  
21 it into the computer; that's how this data is obtained.  
22 Then apparently it is reviewed by someone higher up.

23 So that's where this information is coming from, the  
24 police?

25 MR TONY YAU: That's another table, those factors shown on  
26

1 the screen is the factors that the police referred to.

2 That mean when they input the traffic data, they will

3 choose the factors that contribute to the accident.

4 CHAIRMAN: Yes, Mr Chan.

5 MR DEREK CHAN: If I may move back to, at a more conceptual

6 level, the use of a safety performance indicator, which

7 we had been discussing before the break.

8 CHAIRMAN: Before you do that, let me ask this of Ms Chan,

9 if I may: this letter that you wrote to the Kowloon

10 Motor Bus Company -- I'm looking at page 1729 now, where

11 we find annex E(i) -- there is no indication in the text

12 of the letter as to where this data comes from, is

13 there?

14 MS MABLE CHAN: No, Chairman.

15 CHAIRMAN: Is there any reason why you wouldn't tell KMB

16 where the data comes from?

17 MS MABLE CHAN: If I may explain. Because it's quite

18 a common practice for us to refer to the police database

19 on the number of accidents and also the categorisation

20 of the causes of the accidents, because apart from the

21 police, TD do not categorise the number or the nature of

22 the accidents.

23 So, actually, this traffic accident data compiled in

24 2015, 2016 and 2017, as attached to the letter, there is

25 actually a subsequent briefing for the FB operators on

26

1       our expectations. So we just have a briefing and there  
2       is no sort of written records. So, on that briefing, we  
3       are explaining to them the details of the data that we  
4       are expecting. So we do not have a record of the  
5       discussion but obviously it is quite a common knowledge  
6       of the bus operators that we are referring to that  
7       accident database as administered by the police and have  
8       access by the TD.

9       CHAIRMAN: Yes.

10      MR DEREK CHAN: Ms Chan, returning, if I may, to the issue  
11      of the safety performance indicator. I seem to  
12      understand from your evidence that you disagree with the  
13      use of a safety performance indicator. Just to make  
14      sure that I'm correct in understanding, I'm just going  
15      to put to you two short passages in Prof Stanley's  
16      evidence, just to make sure there is no ambiguity in  
17      what we are talking about.

18             Can I take you to the transcript of Day 16, which is  
19      15 September 2018, at page 61 of the transcript. Can  
20      I start with the question at page 61, line 21, where the  
21      chairman asks:

22             "What other ways can one measure safety?"

23             And Prof Stanley says this:

24             "I think accident rate is a really good starting  
25      point, and if you look at some of the reporting that has  
26

1        been done I think in the safety plans of the five-year  
2        forward plans, there's information on fatalities,  
3        collisions, non-collisions -- 'slips, trips and falls'  
4        types of involvement involvements as well -- and in my  
5        view, if you are going to go down the path of developing  
6        safety as an incentive or penalty provision, I would  
7        drill down into where are the safety problems. So you  
8        wouldn't use accident involvement rate in total; you  
9        would look at the fatality rate, you would look at  
10       'slips, trips and falls'. And you would form a view,  
11       I think, on what is the relative importance of those two  
12       things.

13       I think one operator I saw, for example, had  
14       an increase in the 'slips, trips and falls' type  
15       accidents, but a drop in fatalities. So, if you add  
16       them up together, and say one incident is an incident,  
17       you are missing that nuance. So I would be trying to  
18       decompose it a bit and look at the major areas of safety  
19       concern and make sure that there are KPIs, if you like,  
20       or incentive/penalty clauses that relate to those. That  
21       means you are going to really end up with a bundle,  
22       I think, of measures. I don't know how many elements  
23       are in that bundle. That's something that needs to be  
24       settled by negotiation between government operators with  
25       advice, for example, from committees such as your own,

26

1 about what the components are.

2 But I would start with what are the main sources of  
3 safety problems and start to target those."

4 On that same subject, can I take you to page 72 in  
5 the same transcript, at line 18. Prof Stanley is saying  
6 that:

7 "... accident rates per million vehicle-kilometres  
8 are a very blunt and, I believe, a misleading measure."

9 The question that I was asking:

10 "You would need a more nuanced indicator or set of  
11 indicators?

12 Prof John Stanley: Absolutely. You need a set of  
13 more nuanced indicators. These should form part of it,  
14 but it should be the components, not the total.

15 And the components need to be weighted in some way  
16 to reflect -- I mean, as an economist, I would use the  
17 cost of those different sorts of accidents, which we  
18 regularly measure in Australia and I'm sure you do here  
19 in Hong Kong: you have a value for a typical fatal  
20 accident, you have a value for a typical serious injury  
21 accident, and you have a value for a typical slight  
22 injury accident. I would use those weights to come up  
23 with a weighted, if you like, accident rate per million  
24 vehicle-kilometres.

25 Have in mind also, though, there would be other  
26

1 things you would want to include as well."

2 So do I understand it correctly, from your evidence  
3 this morning, that you would disagree with this approach  
4 to measure safety?

5 MS MABLE CHAN: I would like to elaborate a little bit more  
6 on my stance and observation.

7 First of all, when being asked before the break  
8 whether or not I agree with Prof Stanley's point that  
9 the KPI simply cannot be a useful factor in measuring  
10 the safety performance, my answer is I do not agree  
11 because, similarly, I think that there should be  
12 a reference point and a starting point, and for the  
13 management --

14 CHAIRMAN: Well, you disagreed earlier that a KPI that is  
15 outside the control of the bus company is not relevant.  
16 I think that was the issue; it's a KPI that's outside  
17 control. That was Prof Stanley's point.

18 MS MABLE CHAN: My point is noting the KPI on the safety  
19 factor in terms of number of accidents, while that to  
20 a certain extent may not be controlled by the company at  
21 all, we still think that this KPI is useful in measuring  
22 the service performance.

23 On the other hand, as I mentioned, because  
24 an accident could be contributed by a number of factors,  
25 if we go down to a very specific indicator, say for  
26

1       example the number of accidents involving a bus captain  
2       who apply harsh braking in certain circumstances, if we  
3       do not go deep to investigate the contextual  
4       circumstances of that occasion, this kind of indicator,  
5       again, may not be primarily contributed by the driver  
6       alone.

7       As I have already seen a number of occasions, as  
8       revealed from the CCTV by one or two of the bus  
9       operators, when the black box tracks an event log  
10      whereby the bus captain has applied harsh braking,  
11      without the investigation of the other data collected as  
12      revealed from the CCTV, we do not know that perhaps it  
13      may involve an outside factor which cannot be controlled  
14      by the driver or the company as well. It could be the  
15      driver has to make a hard choice in whether or not he  
16      has to apply harsh braking in order to prevent colliding  
17      with another vehicle or a passenger, that he has applied  
18      harsh braking, and it also leads to losing balance of  
19      a passenger on board a compartment.

20      My point is just to illustrate that it is difficult  
21      for us to come up with a simple, specific indicator  
22      alone, to measure the safety performance of the company.  
23      Prof Stanley's suggestion of, say, coming up with  
24      a weighted accident rate could be an area that we can  
25      consider and further discuss and explore, but still we  
26

1           need to have a reference point and we need to have  
2           a starting point. In having a safety performance  
3           indicator like the number of accidents or the number of  
4           accidents involving the bus travelling distance, we can  
5           have a trendal comparison or analysis, year on year. As  
6           illustrated in KMB's case, we can see that there is  
7           an increase in the number of accidents rate in 2017 as  
8           compared to 2016 and also exceeding the target rate.  
9           These are targets or pledges set by the companies  
10          themselves. So that also can serve the purpose in  
11          evaluating whether they have made their very best in  
12          reducing the number of accidents year on year and  
13          whether they are complying with the pledge that they  
14          have volunteered and offered to us.

15                Thank you, Chairman.

16       MR DEREK CHAN: What about Prof Stanley's opinion that using  
17               that measure is too blunt and may be misleading; do you  
18               agree with that?

19       MS MABLE CHAN: I think I have tried to answer that  
20               question.

21       MR DEREK CHAN: Thank you, Ms Chan.

22               Then if I may take you to how London is doing it at  
23               the moment.

24               What I'm going to do, Ms Chan, is first take you to  
25               a passage in Mr Weston's report on the London approach.

1 I'm going to take you then to a short passage in his  
2 evidence that relates to what I'll be reading from the  
3 expert report, and then I will be going to a document  
4 from Transport for London on the same issue. So, with  
5 that information in mind, I will be asking for your  
6 observations on London's approach.

7 Firstly, Mr Weston's report. Can I take you to the  
8 expert bundle at page 150, at paragraph 7.8 of  
9 Mr Weston's report. Can I just first read it out into  
10 the record. Under the heading "TfL safety performance  
11 indicator", Mr Weston says this:

12 "As part of the bus safety programme TfL [Transport  
13 for London] have developed a safety performance  
14 indicator (SPI) based on an approach already used within  
15 the rail industry. The SPI monitors a basket of  
16 measures including incident data and outputs from the  
17 observational measures giving an operator an overall  
18 score which is benchmarked at 80. Their individual  
19 future performance is then measured against the  
20 benchmark to track for either deterioration or  
21 improvement. The system is not designed to compare bus  
22 companies between each other but to track the trend of  
23 an individual company."

24 So that's what Mr Weston says in his report. I'm  
25 going to take you then --

26

1 CHAIRMAN: I think it's important to emphasise the point  
2 that this safety performance indicator is being  
3 developed for use in the bus safety programme, and it's  
4 the bus safety programme that will be announced on  
5 16 October. So this is a new system.

6 MS MABLE CHAN: Yes. I understand that, because we have  
7 exchanges with the Transport for London commissioner as  
8 well.

9 CHAIRMAN: Can you speak closer to the microphone, please.

10 MS MABLE CHAN: I also noticed their new initiative and we  
11 have exchanged with Transport for London and obviously  
12 we are also striving to see if there is an effective  
13 measurement of the safety performance of the bus and  
14 rail industry.

15 Thank you.

16 MR DEREK CHAN: Perhaps I can quickly take you to  
17 Mr Weston's evidence on this same paragraph of the  
18 report. That's at evidence at Day 18, 27 September  
19 2018, at page 52.

20 Can I take you to the end of page 51 first. At line  
21 23, you will see a question from Mr Duncan.

22 CHAIRMAN: We don't see anything on our individual screens  
23 yet.

24 Yes, thank you.

25 MR DEREK CHAN: At line 23, you see Mr Duncan taking  
26

1 Mr Weston to paragraph 7.8 of the report, which we've  
2 just read. Can I then skip to page 52, line 4.

3 Mr Duncan asks this question:

4 "Is that the safety performance indicator which  
5 Mr Chairman referred to but which has not yet been  
6 published?

7 Mr Weston: Yes. This is a proposal which TfL are  
8 working on, and one of the bus operators explained to us  
9 in August what would be involved in this basket. So,  
10 basically, it is 41 measures that are brought together  
11 into a safety performance score, and these measures may  
12 be weighted in different ways. So the measures may be  
13 'killed or seriously injured' figures, they may be  
14 'slips, trips and falls', various other monitoring  
15 results from engineering monitoring to driver  
16 monitoring, and they are all brought together.

17 The idea is that they are brought together into  
18 a benchmark score of 80 for each operator, and the aim  
19 then is to monitor an operator's trend against that  
20 baseline of 80, and they are weighted in such a way  
21 that -- it is weighted so that the whole basket -- the  
22 trend is not just -- if you are unfortunate in having  
23 a fatal incident, which may not even be down to the bus  
24 company's fault, that doesn't send the score completely  
25 off the scale. So it's about trying to monitor trends  
26

1 within the company and not to use it as comparing your  
2 performance with your peer group, because I think the  
3 concern then is that if you're the best, you think you  
4 don't need to necessarily do anything else to improve,  
5 but I think there is a recognition that everyone can be  
6 better and be safer. So the idea is your safety  
7 performance indicator is benchmarked at 80, and then  
8 along with TfL you monitor your performance against that  
9 baseline of 80 and you try and improve on it and improve  
10 that score.

11 I think the intention is that will be announced  
12 publicly, the content of it will be announced publicly  
13 in due course, but it hasn't been as of yet."

14 Lastly, can I refer you to a document published by  
15 the Transport for London on this very same issue. Can  
16 I take you to bundle MISC-3, page 1194. Perhaps I could  
17 start at 1189, which is the first page of the document.

18 Ms Chan, the document I am taking you to is  
19 an update on the bus safety programme published by  
20 Transport for London, in response to London's Assembly  
21 Transport Committee report.

22 CHAIRMAN: This is November 2017?

23 MR DEREK CHAN: Yes, that's correct, Mr Chairman. I'm just  
24 trying to find the date.

25 Anyway, Ms Chan, can I just take you to page 1194,  
26

1           which is headed, "Contract and performance management".

2           The introduction says:

3                 "We use a range of data as part of the assessment of  
4           an operator's ability to provide a safe service. As  
5           part of the bus safety programme we are considering  
6           methods to improve this process and to increase the  
7           emphasis on safety in the award and management of  
8           contracts.

9                 Progress

10                Having considered a range of methods to best monitor  
11           operator safety, we are developing an operator safety  
12           performance index (SPI). The SPI is based on the same  
13           principle as the consumer price index, that is,  
14           a composite measure, using basket of indicators to  
15           generate a single performance index. The operator SPI  
16           builds on the success of the TfL bus network-wide SPI  
17           which was introduced in 2017 to better monitor safety  
18           performance across 81 safety-related indicators. The  
19           operator SPI will include 41 indicators, a mix of  
20           incident-generated data and behavioural observations,  
21           covering: staff and customer safety, network safety,  
22           risk management, driving standards and engineering.  
23           Each operator's performance will be tracked against  
24           their own baseline, to encourage continuous  
25           improvement."

1           So, Ms Chan, my question for you is this --

2       CHAIRMAN: Are you going to go to the document entitled,  
3           "Driven to distraction", the Greater London Assembly's  
4           earlier document dealing with this issue?

5       MR DEREK CHAN: Yes, I was going to deal with it in the  
6           context of giving incentives, because that's what --

7       CHAIRMAN: Yes, because this is a response to what the  
8           Greater London Assembly had had to say.

9           By all means do it whenever you like, but I think  
10          that's the context. This is Transport for London's  
11          response to what was in effect an attack on their  
12          approach.

13       MS MABLE CHAN: Yes.

14       MR DEREK CHAN: Perhaps I can come back to that, because it  
15          is a document I will go to shortly after.

16       CHAIRMAN: Certainly.

17       MR DEREK CHAN: Ms Chan --

18       MS MABLE CHAN: Yes.

19       MR DEREK CHAN: -- I'm not suggesting we need to copy 41  
20          factors that London uses. My question is more on  
21          a conceptual level, about the idea of coming up with a  
22          basket of measures to form an overall safety performance  
23          indicator, with which we can monitor and measure the  
24          progress that a bus operator makes, and to encourage  
25          them to improve as against that measure.

26

1           What is your observation about that type of  
2           approach?

3       MS MABLE CHAN: Thank you, Chairman, and senior counsel, for  
4           drawing reference to the initiative of Transport for  
5           London. Actually, we also take note of their recent  
6           initiative, which is actually November 2017. We have  
7           actually arranged our officers to visit Transport for  
8           London, which has been planned some time ago, to learn  
9           more about their road safety and public transport safety  
10          programme and plans.

11          I think the gist of the initiative is to -- the  
12          conceptual rationale is to take into account a basket of  
13          factors in evaluating the safety performance of bus  
14          operators. We think that there should be a performance  
15          indicator, at least a performance indicator for us to  
16          evaluate the safety of the bus company. That said, we  
17          also think that if we can move towards the direction of  
18          embracing a number of key relevant factors, and come up  
19          with a simple index or indicator, that could be an area  
20          that we can further explore and study and examine.

21          Meanwhile, with the working group recommendations to  
22          push for a comprehensive and holistic bus fleet  
23          monitoring and control management system, what we are  
24          pushing for is to ask the bus companies to install all  
25          the relevant devices and to provide real-time monitoring

26

1 of the drivers' attitude and behaviour, to keep track of  
2 the key events, say like braking, harsh braking or  
3 acceleration, in the black-box log, coupled with our  
4 expectations of the bus operators to follow the training  
5 framework. All these could be a number of factors that  
6 we can take into account in further developing a more  
7 sophisticated performance indicator on safety.

8 So this is something that we also have interest in,  
9 and with all the other recommendations and developments  
10 on the real-time automatic surveillance of a bus  
11 operation and drivers' behaviour and attitude, I think  
12 we will have firmer ground for us to explore and discuss  
13 this with the bus operators, in order to find  
14 a pragmatic way and yet a more sophisticated way to  
15 measure the bus operators' safety performance. This is  
16 certainly an area that we will have keen interest to  
17 examine and study.

18 Thank you.

19 CHAIRMAN: When do you expect to be able to identify the  
20 relevant factors and come up with a simple index of  
21 performance?

22 MS MABLE CHAN: I cannot commit at this juncture, but being  
23 the head of the department and with our initiative to  
24 visit Transport for London on the whole rationale and  
25 issues involved in this sort of SPI, we would certainly  
26

1           hope to come up with some preliminary thinking and  
2           analysis, say within a year, Chairman.

3           Thank you.

4   CHAIRMAN: Is this something that you have discussed with  
5           the franchised bus operators?

6   MS MABLE CHAN: We haven't yet reached that stage, but  
7           obviously, with the development of key performance  
8           indicators on training, and with the real-time  
9           monitoring with the black-box functions and all the  
10          other driver-assisted device, I think now we are in the  
11          process of following up all these in our working group  
12          forum. As I mentioned in my opening statement, with the  
13          learning of the various experiences and views and  
14          suggestions through this Independent Review Committee,  
15          both the operators and the TD find the working group as  
16          a very useful forum. We will continue our work on that  
17          front and that will be an appropriate forum to bring the  
18          parties together to pursue all these meaningful  
19          initiatives to enhance measurement of safety performance  
20          of franchised bus operators. We will take it forward in  
21          that forum, Chairman.

22   CHAIRMAN: You have used the word "forum" several times  
23           there. Do you have in mind the recommendation that  
24           Mr Weston made that this working group should become  
25           a standing committee, a Bus Operator Forum is the term

26

1           used in London; is that what you have in mind?

2       MS MABLE CHAN: I also noticed that reference in the expert  
3           evidence about a forum, operators' forum. So while we  
4           call it a working group, it is similar in terms of its  
5           nature and in terms of its scope of work.

6           Thank you, Chairman.

7       CHAIRMAN: No, the specific question is this: do you have in  
8           mind making this permanent, not a working group working  
9           on a particular project, but a permanent group that  
10          would meet regularly, in future?

11      MS MABLE CHAN: It will be a permanent group which will meet  
12          regularly.

13      CHAIRMAN: And it would be similar, therefore, to the Bus  
14          Operator Forum which exists in London?

15      MS MABLE CHAN: Yes.

16      CHAIRMAN: Which is what Mr Weston has recommended we adopt  
17          in Hong Kong. So you are accepting his recommendation?  
18          You are doing it?

19      MS MABLE CHAN: Yes. Yes. Thank you, Chairman.

20      MR DEREK CHAN: Ms Chan, so the first side of the equation  
21          is coming up with some combined, sophisticated safety  
22          performance indicator. The second part of this same  
23          equation is the concept of incentivising or having  
24          penalties imposed in, say, a franchise agreement, for  
25          meeting or not meeting targets for this safety  
26

1 performance indicator. That's the concept I want to  
2 explore with you.

3 For that, can I take you directly to the London  
4 Assembly Transport Committee, the "Driven to  
5 distraction" document that Mr Chairman was talking  
6 about. The document is at MISC-3, page 1134, and the  
7 document, as you can see, is dated July 2017.

8 The concept that I'm focusing on is incentivising  
9 safety, or penalising it, for not meeting certain  
10 targets.

11 Can I take you to page 1151 of the report. Perhaps  
12 I should start on 1150, to give it some context.

13 Under the heading "Setting safety targets", if I can  
14 pick it up under paragraph 2.2:

15 "Injury and collision targets could be used to  
16 provide TfL and operators with clear incentives to  
17 improve London's bus safety record. They have a clear  
18 role in improving performance for many private and  
19 public services. As we explore in this chapter,  
20 performance targets have helped TfL drive up the  
21 reliability of the bus network in recent years. We  
22 believe that a similar approach could also be applied to  
23 bus safety by directly linking safety performance to  
24 profits for all bus operators working in London, and to  
25 the pay of senior TfL management."  
26

1           Now 2.3:

2           "TfL has told us that it intends to introduce bus  
3           safety targets, but there is no indication that they  
4           would be linked to financial incentives. In November  
5           2016, TfL's Safety, Sustainability and Human Resources  
6           Panel was asked to agree a bus customer major injury  
7           target for 2007/18. TfL also told us in February that  
8           it would aim to set bus safety targets by the end of the  
9           year. We are waiting for TfL to publish these targets,  
10          but we think that they need to be linked to financial  
11          incentives if they are to be effective."

12          So it's the second part that I am focusing on.

13          If you go over the page, at page 1151, can I pick it  
14          up at 2.6:

15          "TfL has previously explained its decision not to  
16          set safety targets for the operators by stating that:

17          '[Safety] is not directly related to  
18          payments/deductions due to the importance of avoiding  
19          the suggestion that safety of operation is in any way  
20          a negotiable trade off against cost.'

21          While we understand TfL's argument, we fundamentally  
22          disagree with it. Operators will behave in line with  
23          the incentives (particularly the financial ones) that  
24          are set by TfL -- their shareholders would expect  
25          nothing less. By not factoring safety into the payment  
26

1 structure of contracts, TfL is failing to direct  
2 operators to provide the safe service we think London  
3 needs. As the case study below illustrates, financial  
4 payments have been successfully linked to safety in  
5 transport contracts in other countries."

6 The box itself talks about the Spanish example which  
7 I will skip for the moment. If I could pick it up again  
8 at 2.7:

9 "If TfL wants to take positive steps to reduce  
10 injury and collision rates, it must introduce meaningful  
11 incentives for operators to make their services safer.  
12 Londoners agree with us: of the 1,662 Londoners we  
13 surveyed, 88 per cent thought it was important that TfL  
14 incentivised safety as well as punctuality."

15 So, Ms Chan, from a conceptual level, can I ask for  
16 your observations or comments on this concept of  
17 incentivising safety and penalising not meeting targets.

18 MS MABLE CHAN: First of all, I think this is not an easy  
19 topic. It involves correlation of the safety  
20 performance to the financial payment or financial  
21 penalty to the operator. I think this suggestion or  
22 this idea raised in the London circumstances whereby we  
23 know that in London, they implement a sort of MOM model,  
24 a management and operation model, for their bus  
25 services. Whether or not the safety performance can be  
26

1 related to a financial subsidy or payment to the  
2 operator or a financial penalty to the operator will  
3 involve a lot of discussion and debate in the context of  
4 Hong Kong whereby we actually operate bus services under  
5 a franchise model.

6 So, conceptually, we are operating under a different  
7 model. This is the first point I wish to make.

8 Secondly, under our current regime, we have a  
9 statutory provision whereby if a franchised bus operator  
10 fails in providing a proper and efficient service, then  
11 we can make a case to the Executive Council as to  
12 whether or not we can impose a financial penalty.

13 So I think, in the Hong Kong context, should we in  
14 the future come up with a more sophisticated safety  
15 performance index or so, it may provide a more effective  
16 and meaningful reference or basis for us to make our  
17 cases to the Executive Council as to penalise in terms  
18 of financial terms on a bus operator for failing to  
19 fulfil its target in terms of safety performance.

20 On the other hand, whether or not we can sort of use  
21 this and translate into a financial payment to the  
22 operator, I think it is a different game. We know that  
23 this one is currently discussed and explored in London.  
24 Obviously, we will learn a bit more directly from  
25 Transport for London on this, but at this juncture  
26

1 I will not take this lightly. So we will keep an open  
2 mind and KIV the developments and obviously we will take  
3 into account the experience in London as well as in  
4 other jurisdictions. We will not rule out the  
5 possibility for us to deliberate and explore this  
6 internally, but my point is whether or not we can take  
7 it forward, we have to take into account a number of  
8 other factors and in a very careful and prudent manner.

9 Thank you.

10 MR DEREK CHAN: Yes. Unless you have any further  
11 observations on this issue about benchmarking,  
12 indicators, and incentivising issue, I will be moving on  
13 to my next topic.

14 CHAIRMAN: Just to understand what the Greater London  
15 Assembly were saying here, at 2.6 on page 1151, there's  
16 a reference to what TfL had said, "safety is not  
17 directly related to payments/deductions". Now, that  
18 phrase "payments and deductions" is clearly a reference  
19 to their system, which we don't have, of incentivising  
20 better performance of service provision, and penalising  
21 a failure to deliver performance service.

22 What the Greater London Authority appear to be  
23 saying is that if you can do it for performance, then  
24 you can do it for safety. But your point is this, that  
25 our model of Hong Kong is different, we don't have  
26

1 a system of bonuses or deductions, so all that perhaps  
2 we would be left with would be a system of penalties, if  
3 you fail to meet a safety performance indicator.

4 MS MABLE CHAN: Yes.

5 CHAIRMAN: That's what they have in Singapore, is it not?

6 MS MABLE CHAN: Yes. Chairman, actually, the penalty  
7 provision is now currently in the law, so we can refer  
8 to that clause, and with the development of more  
9 sophisticated and balanced performance safety  
10 indicators, one area that we can further develop and  
11 take forward in our forum with the bus operators is how  
12 that can translate into a more systematic and formalised  
13 system of imposing penalty.

14 Of course, in the past, there are accounts that we  
15 have imposed both statutory fines or penalty by  
16 referring to this clause. We have. But how it can  
17 relate systematically to a sophisticated performance  
18 indicator, including safety, is something that we can  
19 seriously take forward in our working group with the bus  
20 operators.

21 CHAIRMAN: When was such a penalty last imposed?

22 MS MABLE CHAN: I have the data with my folder, but perhaps  
23 I need to find time and supplement it to the committee  
24 in a moment.

25 CHAIRMAN: Yes, because it was my memory that when this  
26

1           issue was dealt with on 7 May, we were told that it had  
2           never been used.

3       MS MABLE CHAN:   Yes.

4       CHAIRMAN:   Am I correct in remembering that, Mr Chan?

5       MR DEREK CHAN:   Yes, that accords with my memory, but I need  
6           to dig up the reference to be sure.

7       CHAIRMAN:   Yes.

8           But you are telling us it has been used?

9       MS MABLE CHAN:   Let us double-check on that, and the date.

10           Let us double-check on that and then we will supply the  
11           information later in this hearing.

12       CHAIRMAN:   Yes, certainly.

13           Mr Chan, do we have the provision that obtains in  
14           Singapore? My memory is that it is a financial penalty,  
15           I think S\$100,000, if an accident rate is exceeded,  
16           a specific accident rate.

17       MR DEREK CHAN:   I have an idea of where that may be, but  
18           perhaps we can deal with that reference over the break.

19       CHAIRMAN:   Certainly.

20           Mr Auyeung?

21       MEMBER AUYEUNG:   Ms Chan, is it true that such penalty  
22           system does exist within the public transport system in  
23           Hong Kong, for example within the MTR system?

24       MS MABLE CHAN:   Yes, you are correct.

25       MEMBER AUYEUNG:   Thank you.

26

1 MS MABLE CHAN: Chairman, based on the current records  
2 I have, there is an account of us imposing a penalty in  
3 1996, but we will further check as to the basis upon  
4 which we have imposed that fine.

5 CHAIRMAN: No doubt that was on China Motor Bus.

6 MS MABLE CHAN: Yes, Chairman, you are correct.

7 CHAIRMAN: Yes, Mr Chan.

8 MR DEREK CHAN: Mr Chairman, just to follow up on the  
9 reference to the evidence on 7 May, the issue was raised  
10 with the Secretary for Transport and Housing Bureau,  
11 Mr Joseph Lai. That is page 8 of the transcript for  
12 7 May 2018.

13 CHAIRMAN: Yes. Perhaps we could have that on the screen.

14 MR DEREK CHAN: I'm looking at the transcript for 7 May  
15 2018, at page 32, line 19.

16 CHAIRMAN: Just wait until we can all share it.

17 MR DEREK CHAN: Chairman asked this question:

18 "Before you move on, Mr Duncan -- by that do you  
19 mean no financial penalty has ever been invoked?

20 Mr Joseph Lai: Chairman, by that I mean the  
21 question of safety issue leading to an attempted use of  
22 this particular section concerning financial penalty has  
23 never been invoked thus far, so it's not tested."

24 Then Mr Duncan goes on to ask:

25 "So do we understand correctly from that answer that  
26

1 no financial penalty has ever been imposed for any of  
2 the reasons set out in that section, section 22?

3 Mr Joseph Lai: Chairman, not to my recollection or  
4 understanding. I would be more than happy to come back  
5 with a written confirmation of that, but certainly not  
6 in recent times."

7 CHAIRMAN: That's a matter that you can come back to.

8 MS MABLE CHAN: Chairman, Mr Joseph Lai's statement is  
9 correct, because he was answering in respect of safety.  
10 The recollection is there has not been any fine imposed  
11 on previous occasions. The incident that I mentioned  
12 regarding China Motor Bus in 1996 is regarding the lost  
13 trips of that franchised bus operator and we imposed  
14 a fine of 8,000 on China Motor Bus in -- the incident  
15 was in 1995 and we imposed the fine in 1996.

16 CHAIRMAN: But I think there was a second part to the  
17 answer -- I'm only looking at the screen. We can see at  
18 the top of the screens:

19 "... no financial penalty has ever been imposed for  
20 any of the reasons set out in that section, section 22?"

21 And that also got a negative answer, to his  
22 understanding. So that's now been qualified, has it?  
23 Does section 22 deal with a range of matters for which a  
24 penalty can be applied?

25 MS MABLE CHAN: Proper and efficient service, and safety is  
26

1           one of the factors that we consider in whether or not  
2           a franchised bus operator is providing a proper and  
3           efficient service.

4   CHAIRMAN:  So, insofar as that suggests it has never been  
5           applied for any of the reasons, that's now qualified; it  
6           had been imposed for lost trips occurring in 1994 but  
7           the penalty was imposed in 1996?

8   MS MABLE CHAN:  1995 lost trips, and the fine was imposed in  
9           1996.

10  CHAIRMAN:  Thank you.

11           Yes, Mr Chan.

12  MR DEREK CHAN:  Mr Chairman, I am about to move to the next  
13           substantive topic of the approach to bus safety taken by  
14           the Transport Department.  I was going to kick it off  
15           with a general question.  Perhaps I can ask that --

16  CHAIRMAN:  We are not going to have the commissioner this  
17           afternoon, so perhaps it's a good opportunity to ask the  
18           general question.

19  MR DEREK CHAN:  Yes.

20           Ms Chan, the general question I'm going to kick off  
21           this topic with is this.  In the context of the  
22           Hong Kong system, who is responsible for driving bus  
23           safety or driving improvements to bus safety?  Who  
24           provides the impetus for new safety measures to be  
25           implemented?

26

1 MS MABLE CHAN: I would say, in terms of public transport,  
2 and in particular bus safety, the Transport Department  
3 will no doubt be the party to be responsible to monitor  
4 and enhance the safety of bus operation, and we will  
5 make our effort to drive public transport safety.

6 MR DEREK CHAN: With that in mind, I was about to look at  
7 some examples of how the Transport Department has dealt  
8 with enhancements to bus safety throughout the years,  
9 before making some observations on that.

10 Perhaps I can start that process after the lunch  
11 break, if that's convenient to the committee.

12 CHAIRMAN: Perhaps we can just ask one or two more questions  
13 at this stage, so the commissioner can reply.

14 Who in the Transport Department has responsibility  
15 for driving issues of bus safety? Which person or  
16 persons?

17 MS MABLE CHAN: Within the department, it will be a joint  
18 effort of our Bus and Railway Branch and also the Road  
19 Safety and Standards Division. The assistant  
20 commissioner for Bus and Railway Branch is Mr Patrick  
21 Wong, and in the Road Safety and Standards Division,  
22 it's the chief engineer Mr Tony Yau who is also present  
23 today, Mr Tony Yau.

24 CHAIRMAN: Yes.

25 MS MABLE CHAN: So both parties, both units, are responsible  
26

1           for joining hand in hand to push and drive for public  
2           transport safety.

3           Thank you.

4       MR DEREK CHAN: Do I take it from that answer there is no  
5           team within the Transport Department that's dedicated  
6           solely to bus safety?

7       MS MABLE CHAN: There is not a single team, but the Bus and  
8           Railway Branch oversees all policy and operational  
9           matters related to franchised buses, and the Road Safety  
10          and Standards Division will also provide impetus and  
11          input to enhance road safety, including public bus  
12          safety.

13          So, apart from these two major divisions, we have  
14          the Vehicle Safety and Standards Division, which is  
15          responsible for monitoring and regulating on the  
16          hardware, ie the maintenance and the standards of buses.  
17          And the assistant commissioner is Mr Reg Chan, who is  
18          also acting as deputy commissioner of the Transport  
19          Department. They oversee in general the vehicle  
20          standards and safety of vehicles, including franchised  
21          buses.

22       CHAIRMAN: There was a second part to the question, which  
23           was: who is responsible for new innovations?  
24           Technological safety devices, let's try that.

25       MS MABLE CHAN: This is a very interesting subject,  
26

1 Chairman. Actually we learned a lot throughout this IRC  
2 process. Over the past year or so, the Vehicle Safety  
3 and Standards Division, headed by Mr YK Chan, has been  
4 overseeing the new technology advancements in vehicle  
5 standards and maintenance. While there is no dedicated  
6 team or extra manpower resources, their division is  
7 driving for new technological advancements, and under  
8 the working group we have a technical group chaired by  
9 Mr YK Chan. That is the main forum for us to drive and  
10 push the various in-vehicle safety devices and automated  
11 real-time systems and features, including black box,  
12 GPS.

13 May I also add that we see the need and the  
14 importance of having a dedicated team, as in the case of  
15 London and in other jurisdictions, of enhancing  
16 transport technology research capability within the  
17 department. We are actually securing and bidding  
18 necessary manpower resources involving engineers,  
19 transport officers and electrical and mechanical  
20 engineers, to set up a dedicated transport technology  
21 team within the department.

22 We have not been able to say a bit more for the  
23 committee's reference because this one is actually  
24 undergoing an internal resource bidding process, but  
25 I would just like to give an idea for the committee's  
26

1 reference.

2 Thank you, Chairman.

3 CHAIRMAN: The technical group that Mr YK Chan heads in the  
4 working group, that is something that followed,  
5 obviously, the setting up of the working group, and that  
6 was 13 March 2018. The technical group presumably  
7 happened second, later.

8 MS MABLE CHAN: That is correct, Chairman. The idea of  
9 having a working group actually arose from our  
10 attendance at the Tai Po District Council and the  
11 Legislative Council Panel on Transport immediately  
12 following the tragic accident in February. On those two  
13 occasions --

14 CHAIRMAN: I think you are referring to 12 February and  
15 15 February respectively.

16 MS MABLE CHAN: Yes, of February, Chairman, you are correct.

17 There are a lot of different ideas and suggestions  
18 flagged up on those two occasions. Coming out from  
19 those two meetings, my team and I considered that we  
20 have to take a proactive approach and a more systematic  
21 approach to take heed of all these suggestions and ideas  
22 and advice, and we have to try and push for ourselves,  
23 and we subsequently informed the Transport Advisory  
24 Committee, on 27 February, about our suggestion of  
25 forming a working group, with the proposed terms of  
26

1 reference to cover three areas.

2 First is on on-board vehicle-safety devices and  
3 equipment technology. The second aspect is on the  
4 feasibility and effectiveness of the installation of  
5 seat belts. The third is on enhancing the training for  
6 bus captains.

7 So we formalised this idea in late February, after  
8 the tragic accident, and this did lead us to formally  
9 establish the working group in mid-March.

10 Thank you, Chairman.

11 CHAIRMAN: You said earlier that you had decided, following  
12 the meeting with the district council in Tai Po of  
13 12 February, and the 15 February LegCo meeting and  
14 motions that you were going to be proactive, but in fact  
15 you are being reactive to events that have already  
16 happened, are you not?

17 MS MABLE CHAN: Chairman, if I may, I think that there is  
18 a lot more proactiveness that we can adopt. Of course,  
19 this idea of forming a working group is reacting to the  
20 tragic bus accident. I think we have taken  
21 a forward-looking and proactive approach by not just  
22 waiting for the various advisory committees and parties  
23 to make request and for us to respond. Rather, we  
24 should set our agenda by forming that working group, and  
25 it was on that basis that we have, at the start of the  
26

1           working group meetings, come up with a number of  
2           possible ideas and initiatives, to set the agenda and go  
3           through it one by one with the bus operators and the  
4           manufacturers.

5           So I think, in that sense, we are taking a more  
6           systematic and forward-looking approach to set the  
7           agenda for ourselves, rather than waiting for the bus  
8           operators or the bus manufacturers to tell them what  
9           they can or will do.

10          Thank you, Chairman.

11   CHAIRMAN: We've gone over time. We will take the lunch  
12           break now. We thank you for your attendance this  
13           morning. We hope you have a good afternoon. We look  
14           forward to seeing you on Saturday.

15   MS MABLE CHAN: Thank you, Chairman, sure.

16   CHAIRMAN: Thank you for your assistance.

17   MS MABLE CHAN: Thank you.

18   CHAIRMAN: We will adjourn now until 2.30.

19   (1.05 pm)

20                   (The luncheon adjournment)

21   (2.30 pm)

22   CHAIRMAN: Good afternoon.

23   MR DEREK CHAN: Mr Chairman, before I resume my questioning,  
24           can I just report back on a reference that Mr Chairman  
25           asked for, in terms of the Singapore penalty provision.

1 CHAIRMAN: Yes.

2 MR DEREK CHAN: One reference to that is expert bundle  
3 page 229, at paragraphs 3.19 and 3.20.

4 CHAIRMAN: Can we have that on the screen.

5 What is the document that we are looking at?

6 MR DEREK CHAN: The document itself is an appendix to  
7 a Transport Department document. The relevant paragraph  
8 starts at paragraph 3, which looks at the Singapore  
9 situation.

10 CHAIRMAN: I'm sorry, tell me again, if you would, what the  
11 document is. Is there not an original document from  
12 Singapore which spells out this?

13 MR DEREK CHAN: Yes. Just to answer the chairman's question  
14 earlier and then going to the source document itself,  
15 the document that I took Mr Chairman to is annexed to  
16 a letter to the Singapore authority --

17 CHAIRMAN: Ah, yes, thank you.

18 MR DEREK CHAN: -- asking them, "Look, this is the materials  
19 that the committee has received" and asking for the  
20 assistance of the Singapore Land Transport Authority.

21 CHAIRMAN: Yes.

22 MR DEREK CHAN: The document that I took Mr Chairman to is  
23 an annexure to the letter sent to the Singapore  
24 authority, to seek their assistance.

25 The letter itself is at page 198 of the same bundle.

26

1 CHAIRMAN: Thank you. We don't need to be delayed by this.

2 MR DEREK CHAN: In any event --

3 CHAIRMAN: Is there no reference to a penalty being enforced  
4 or available in relation to the accident rate per  
5 million kilometres?

6 MR DEREK CHAN: Perhaps I will come back to you on that,  
7 Mr Chairman, with a more specific reference, instead of  
8 just handing up references that have provided to me in  
9 the moment.

10 CHAIRMAN: Yes.

11 MR DEREK CHAN: Perhaps I can just review the references  
12 first myself.

13 CHAIRMAN: Yes. Very well. Thank you.

14 MR DEREK CHAN: So, Mr Chan, I understand you will be taking  
15 over the main answering of the questions.

16 MR YK CHAN: Yes.

17 MR DEREK CHAN: Before the lunch break, questions were  
18 directed at Ms Chan in relation to the approach taken by  
19 the Transport Department on bus safety, and Ms Chan was  
20 questioned on the general question about who was  
21 responsible for taking this forward.

22 My next series of questions will be in relation to  
23 a number of historical events, and I'll be going through  
24 them quite quickly, just to see the Transport  
25 Department's handling of issues about bus safety

26

1 historically. I'm just going to go through them. If  
2 you recollect them, that's fine. If you want  
3 a reference to the raw documentation, please let me  
4 know.

5 Firstly, in July 2003, a bus fell down a slope from  
6 Tuen Mun Road, resulting in 21 fatalities and a number  
7 of people injured. Arising from that Tuen Mun incident,  
8 there is now put in place hazard speed limiters that  
9 limit the maximum speed of the bus. So these speed  
10 limiters were required to be installed after the  
11 Tuen Mun accident, and this has now become a standard  
12 feature for franchised buses. Is that correct?

13 MR YK CHAN: That's right.

14 CHAIRMAN: Where is the requirement first time for speed  
15 limiters?

16 MR YK CHAN: After the incident, we have looked into the  
17 possible ways of putting this right and then we discuss  
18 with the operators, and then after that we impose the  
19 new requirement to incorporate in buses the speed  
20 limiter, limiting those buses to 70kph.

21 CHAIRMAN: Yes, that's why it happened. Where do we find  
22 it? Was it a letter, a requirement in the franchise;  
23 where is it?

24 MR YK CHAN: We should have incorporated in the  
25 specification, the minimum spec of the buses, but  
26

1 of course before that, I believe there should be  
2 a series of discussions with the bus company and then  
3 perhaps there's a an exchange of documents, but at the  
4 moment we are checking.

5 CHAIRMAN: Thank you. It's a very simple question: what  
6 document do we look for to find it; yes?

7 MR YK CHAN: Yes. We can provide.

8 MR DEREK CHAN: A second safety measure arising from that  
9 same accident was the requirement for the franchised  
10 buses to have black boxes. We have been through that  
11 requirement this morning. It's in a letter dated  
12 October 2003. But do you recall that black-box  
13 requirement also arising out of the Tuen Mun accident?

14 MR YK CHAN: Yes.

15 CHAIRMAN: Would you repeat the reference for the  
16 promulgation of that document?

17 MR DEREK CHAN: TD-5, page 1597, being the letter; 1598  
18 being the requirement itself.

19 CHAIRMAN: Thank you.

20 MR DEREK CHAN: Then, in July 2006 and December 2007, there  
21 were two incidents of franchised bus collisions that  
22 resulted in passengers being thrown out of franchised  
23 buses.

24 The bus safety measures that were implemented as  
25 a result of those incidents were, firstly, a horizontal  
26

1 guardrail being required to be installed on the upper  
2 deck windscreen; and, secondly, safety belts were  
3 required to be installed on the four upper deck front  
4 seats.

5 Firstly, do you recollect those two safety measures  
6 being implemented --

7 MR YK CHAN: Yes.

8 MR DEREK CHAN: -- as a result of those incidents?

9 MR YK CHAN: Yes.

10 MR DEREK CHAN: Both these features are again now standard  
11 features for franchised buses?

12 MR YK CHAN: That's correct.

13 CHAIRMAN: Do you have any reference to where this was  
14 promulgated? If not, come back to it.

15 MR DEREK CHAN: It's all in the list of franchised bus  
16 requirements which is annexed to the franchise  
17 agreement. I will come back to Mr Chairman on the  
18 reference to that list.

19 CHAIRMAN: When was this first required? Again, if you  
20 don't have detail, come back later.

21 MR YK CHAN: We will come back on the exact date.

22 MR DEREK CHAN: Again, in 2016, there were three bus  
23 accidents which caused the breaking of glass on the exit  
24 doors of buses, which caused injury to passengers.  
25 Arising from those incidents, an additional guard bar  
26

1           was installed on the exit door. Do you recall that  
2           safety feature being implemented as a result of those  
3           incidents?

4       MR YK CHAN: Yes.

5       MR DEREK CHAN: Again, this has become a standard feature  
6           for all franchised buses?

7       MR YK CHAN: That's correct.

8       CHAIRMAN: Again, when was that required, first of all?

9       MR YK CHAN: That's required after the accident, but I can  
10           tell that all the -- after that, the buses have been  
11           retrofitted with such a guard bar, and they all  
12           completed in June 2017.

13      CHAIRMAN: Thank you.

14      MR DEREK CHAN: On 22 September 2017, there was a fatal bus  
15           accident which occurred in Sham Shui Po that resulted in  
16           three fatalities and a number of passengers injured.

17           As a result of that accident, it led the Transport  
18           Department to conduct a review of the Guidelines on Bus  
19           Captain Working Hours, Rest Times, and Meal Breaks,  
20           which resulted in a new improved set of guidelines in  
21           February. Is that a correct summary?

22      MR YK CHAN: Yes.

23      MR DEREK CHAN: Then, in March 2018, following the Tai Po  
24           accident in February 2018, a Working Group on  
25           Enhancement of Safety of Franchised Buses was set up.

26

1 I'm going to go to the chronology of the setting up of  
2 this working group in a moment, but can I first ask you  
3 this question.

4 We have just been through what appear to be a number  
5 of fairly useful safety features that have been  
6 implemented throughout the years as a result of bus  
7 accidents. Is there any reason why those safety  
8 measures were put in place only after the accidents had  
9 occurred and were not proactively put in place before  
10 the accidents occurred? Is there a reason for that?

11 MR YK CHAN: What I can say is when we -- we require the bus  
12 companies to provide a proper and efficient service, and  
13 provision of properly equipped buses to serve passengers  
14 is one of them, and all along we have been monitoring  
15 the performance of bus companies, of course including  
16 the equipment, the vehicles they use.

17 Now, of course, normally, when the services are  
18 being provided without any major incidents, then  
19 of course we will presume that they are actually  
20 operating properly, and actually this is a system  
21 instilled in our organisation that we take note or  
22 actually monitor continuously the operation of these  
23 buses, and if ever, in any circumstances, we discover  
24 there is any major fault of these buses or the way they  
25 provide the service, then the Transport Department would  
26

1           proactively follow up the cases.

2           Hence, I would say that those accidents are  
3           unfortunate events that we don't want to see, but the  
4           Transport Department actually is proactively  
5           continuously monitoring what's happening to the  
6           operation of buses, and if we ever discover any  
7           incidents that have a major cause or to a specific type  
8           of accident, then we will sort of discuss with bus  
9           operators to provide and implement the necessary  
10          measures and equipment to ensure that those accidents  
11          won't happen again. This is the way I believe is  
12          a responsible way to ensure the safe operation of buses  
13          in Hong Kong.

14       CHAIRMAN: Can you point to some safety feature that was  
15          imposed, a requirement, without there having been  
16          an accident before that might have been connected to the  
17          safety feature?

18       MR YK CHAN: Apart from that, apart from monitoring the  
19          operation of bus services in Hong Kong, we also take  
20          note of what's happening in other parts of the world.  
21          One example I can quote is actually recently, some years  
22          back, we actually discovered or take note of there's  
23          some fire happened, occurred on buses --

24       CHAIRMAN: Fire in the engine compartment? Is that what you  
25          have in mind?

26

1 MR YK CHAN: Yes. When it's in operation, the fire actually  
2 broke out in a bus, but of course those cases maybe come  
3 from engine or other purpose, or other situations.

4 Arising from that, we actually -- our Vehicle Safety  
5 and Standards Division to carry out a research on what  
6 can we do, what can be done, to sort, of prevent that,  
7 and arising from that we require the bus companies to  
8 put in place the fire suppression system on all these  
9 buses and it has now become a standard feature in our  
10 bus specification.

11 CHAIRMAN: So this was again in response to there being some  
12 fires and then you did some research and then you put in  
13 place a requirement for fire suppression.

14 MR YK CHAN: You can say that.

15 CHAIRMAN: Do I understand you correctly?

16 MR YK CHAN: Yes.

17 CHAIRMAN: What I was asking you for is an example where you  
18 imposed a safety requirement without it being connected  
19 to an event that had occurred earlier. If you want to  
20 think about it and come back later, do so.

21 MR YK CHAN: I cannot think of any major sort of standard  
22 features or improvement with the buses, but I believe,  
23 actually, our Vehicle Safety and Standards Division does  
24 discuss, we have regular meetings with bus companies on  
25 vehicle repairs and maintenance aspects regularly.

26

1           There may be small things that happen. We can find  
2           out, for example, there are new features and faults  
3           commonly found in buses during our inspection. Those  
4           things that we notice, if we take note of that, then we  
5           can discuss with bus companies and require them to take  
6           particular note and pay attention for remedial action.

7           I think one of the examples is sometimes when we do  
8           the inspection and discover some leakage of oil from  
9           a particular part, or whether there's any rusting on the  
10          chassis, and for those things, probably it won't cause  
11          accidents as such, but this is a small thing that can  
12          accumulate to a certain stage that may cause some sort  
13          of vehicle breakdowns and inconvenience to bus  
14          passengers.

15          Those small things, although it looks they are not  
16          very significant, but we do discuss with bus companies,  
17          and one thing, if we discover such minor faults in the  
18          buses, we not only discuss with that particular company,  
19          we also put this across to other bus companies to take  
20          note, because they do operate similar types of vehicle.

21          I think this is the way that we continuously  
22          monitor -- we do an inspection, monitor, and find out  
23          what's happening to those buses and if any fault we  
24          require the bus company to take action.

25          For major incidents like the ones you mentioned,  
26

1           of course, after our investigation, if we can identify  
2           any sort of ways, technically feasible ways, to address  
3           that, then we sort of follow through.

4   CHAIRMAN:   Thank you.

5   MR DEREK CHAN:  I will then next go on to look at the  
6           setting up and the process of the Working Group on  
7           Enhancement of Bus Safety, and I will deal with the  
8           events in a chronological manner.

9           If I may first start off with the minutes of the  
10          LegCo Panel On Transport, please, the LegCo Panel on  
11          Transport meeting that took place on 15 February --

12   CHAIRMAN:  If you are going to deal with this  
13           chronologically, doesn't the district council meeting on  
14           12 February come first?

15   MR DEREK CHAN:  Yes, it does, Mr Chairman.

16   CHAIRMAN:  That I think is a meeting that the commissioner  
17           attended.

18   MR DEREK CHAN:  Yes.  The document for that is in the DC-2  
19           bundle, page 782.

20   CHAIRMAN:  Yes.

21   MR DEREK CHAN:  As you can see from the first page of the  
22           translation of the document, at page 782, this meeting  
23           of the Tai Po District Council took place on 12 February  
24           2018.

25           Over the page, at 783, you can see that Ms Mable  
26

1 Chan, Commissioner for Transport, was present in the  
2 meeting.

3 As you can see from page 784, the topic of  
4 discussion was the accident on Tai Po Road. I won't go  
5 through the minutes in detail. Suffice for me to  
6 summarise it in this way: a lot of views were expressed  
7 by different members of the district council, which  
8 Ms Chan, the Commissioner for Transport, explained this  
9 morning she took into account. So that's the first  
10 event.

11 CHAIRMAN: I think it's worth going to paragraph 8, where  
12 Ms Chan is speaking. One sees that perhaps one of the  
13 first steps that was being taken:

14 "The Transport Department had asked KMB to submit  
15 a report for the ... accident as soon as possible and  
16 KMB had also promised that they would submit [a report]  
17 within one month."

18 Then there is an indication that it had been  
19 announced that this committee would be set up. There is  
20 an indication in the last three or four lines that the  
21 commissioner was aware of concerns expressed by the  
22 Tai Po District Council about road safety in the Tai Po  
23 district and the relevant road section in the past, and  
24 this would be followed up closely.

25 There is another reference, as I recall, from the  
26

1 commissioner later on. Are you able to take us to that,  
2 Mr Chan? Yes, paragraph 34.

3 MR DEREK CHAN: Yes, at page 798 of the bundle, Mr Chairman.

4 So, again, perhaps just summarising the four points  
5 that the Commissioner for Transport raised in this  
6 meeting, the first one being driving tests for bus  
7 captains and the vehicle examination issue. The second  
8 point is a review of the safety and speed limits;  
9 thirdly, locations of bus stations; and fourthly, that  
10 KMB will set up an investigation committee.

11 So these were the matters addressed by Ms Chan at  
12 this meeting.

13 CHAIRMAN: I think it is worth noting what is in (ii):

14 "The Transport Department will review the safety and  
15 speed limits of the roads in Hong Kong from time to  
16 time."

17 That's a general statement, no doubt.

18 "Although the site of the current accident is not  
19 a traffic black spot, the department will consider  
20 appropriate accident-improvement measures in  
21 consideration of the number and nature of past  
22 accidents, road design, site environment, and the impact  
23 on the drivers."

24 That of course is what happened.

25 Then, as I think you said, the final reference is,  
26

1 in (iv), in anticipation of the KMB accident report.

2 I think that gives a context to the next date which,  
3 as you were saying earlier, is 15 February, and it's the  
4 LegCo meeting.

5 MR DEREK CHAN: Yes. That document is at bundle SEC-3,  
6 page 1342.

7 Mr Chan, do you have the document in front of you?

8 MR YK CHAN: I am looking at the screen.

9 MR DEREK CHAN: At page 1342, you can see this is a set of  
10 minutes of the special meeting held by the Panel on  
11 Transport on 15 February 2018, and over the page, at  
12 page 1343, towards the bottom of the page, you can see  
13 Ms Mable Chan attended as the Commissioner for  
14 Transport.

15 Again, I won't take you through the discussions, but  
16 can I go straight to the motion that was passed as  
17 a result of this meeting, at page 1360. The motions  
18 record that the panel urges the administration to,  
19 firstly:

20 "1. request franchised bus companies to review the  
21 staffing establishment of bus captains, provide  
22 reasonable working hours, rest time, meal breaks and  
23 remuneration packages for bus captains, and provide on  
24 a compulsory basis regular training on a safe driving  
25 attitude for full-time and part-time bus captains to  
26

1 ensure that bus captains are equipped with the qualities  
2 of a good driver".

3 So the first motion concerns the guidelines, the  
4 working hour guidelines, and training. The second  
5 motion states as follows:

6 "2. apply anti-skid surface dressing, erect  
7 additional declaration warning signs and install speed  
8 enforcement cameras on the subject road section  
9 immediately, and review the 'high-risk' road sections  
10 across the territory and expeditiously enhance the  
11 relevant safety measures to safeguard the safety of road  
12 users ...

13 3. explore ways to further strengthen the safety  
14 installations on buses, including enhancing the  
15 protection for high-risk seats, retrofitting seat belts  
16 on more seats and making it compulsory in phases for  
17 passengers to wear seat belts, installing an external  
18 camera at the bus captain's seat, modifying the speed  
19 limiters on buses to ensure safe driving on high-risk  
20 road sections, and installing an auxiliary system for  
21 automatic emergency braking, so as to reduce the risk of  
22 injuries among passengers in an accident."

23 So the third motion concerns the installation of  
24 in-vehicle safety devices or measures, as well as the  
25 issue of seat belts.

26

1 Now, next in the chronology is the submission of  
2 KMB's investigation report on the Tai Po accident to the  
3 Transport Department on 23 March 2018.

4 Mr Chairman, the reference to that is KMB-1,  
5 page 98.

6 I won't go to this document yet. I just note that  
7 it was handed in on this date and I will come back to it  
8 a bit later.

9 CHAIRMAN: Very well.

10 MR DEREK CHAN: Now, what happened after the submission of  
11 the KMB investigation report is the first meeting of the  
12 working group, which was held on 13 March 2018.

13 Before I get to the minutes, I want to first go to  
14 the agenda, which is at CTB-3, page 588.

15 I simply ask you to note from this agenda that the  
16 main issue on the agenda appears to be "Discussion on  
17 the scope of works and membership of the working group".  
18 There is no date on the agenda. Do you recall whether  
19 this agenda was issued before KMB submitted its  
20 investigation report or afterwards?

21 MR YK CHAN: The meeting -- you mean the working group on  
22 13 March?

23 MR DEREK CHAN: No, the meeting was on the 13th. Presumably  
24 the agenda would have been sent out before the meeting.  
25 The KMB investigation report was given to the Transport  
26

1 Department on the 12th, so would this agenda have been  
2 set before the 12th?

3 MR YK CHAN: I think we have to come back to check on the  
4 exact date --

5 CHAIRMAN: Presumably -- forgive me for interrupting -- it  
6 was sent out under cover of a letter. Would that not be  
7 what one would expect?

8 MS AMY LEE: It is an email.

9 MR YK CHAN: We cannot confirm whether it's a letter or by  
10 means of an email.

11 CHAIRMAN: But either way, there is a record of it?

12 MR YK CHAN: Yes, that's right.

13 CHAIRMAN: That's what you are suggesting, is it? You can  
14 check and provide it?

15 MR YK CHAN: Now, if I --

16 CHAIRMAN: Before you move on -- when were the franchised  
17 bus operators first contacted at all about participating  
18 in a working group? When did that happen?

19 MR YK CHAN: I cannot tell the exact date but presumably the  
20 bus company would be advised in advance that there would  
21 be a working group.

22 CHAIRMAN: Presumably, they were asked, "Would you be  
23 prepared to take part in a working group?"

24 MR YK CHAN: Yes.

25 CHAIRMAN: You can't recall when that was?

26

1 MR YK CHAN: I can't recall the exact date.

2 CHAIRMAN: Do you recall who did it? Did you do it?

3 MR YK CHAN: Not me personally, no.

4 CHAIRMAN: Not you. Did any representatives of the  
5 Transport Department now present make that contact?

6 MR YK CHAN: Probably not one of our representatives here  
7 today.

8 CHAIRMAN: Very well.

9 MR YK CHAN: Somebody in the office.

10 CHAIRMAN: Yes, very well, in which case can you try to help  
11 us with some emails, correspondence, which helps us  
12 understand the time frame in which this was set up?

13 MR YK CHAN: Yes.

14 CHAIRMAN: Thank you, Mr Chan.

15 MR DEREK CHAN: Can I then move on to the actual minutes of  
16 the first meeting, and this is KMB-12, page 4869-1.

17 Mr Chan, can I just confirm with you that you have  
18 the right document in front of you. It should be  
19 KMB-12, page 4869-1 on the bottom right-hand corner.

20 That should be the first page of the notes of the  
21 first meeting of the working group.

22 MR YK CHAN: Yes.

23 MR DEREK CHAN: Can I confirm that you have the notes of the  
24 first meeting of the working group held on 13 March 2018  
25 in front of you?

26

1 MR YK CHAN: Yes.

2 MR DEREK CHAN: So you can see the attendees at that meeting  
3 on the first page.

4 Can I take you to the second page, 4869-2. In the  
5 opening remarks by the convenor, who is Ms Rachel Kwan,  
6 Assistant Commissioner for Transport, can I pick it up  
7 six lines down from the top, where the convenor says  
8 that:

9 "... the purpose of the WG meeting was to review and  
10 study measures with a view to further enhancing bus  
11 safety."

12 My first question is this. Is there any reason why  
13 a working group of this type, which gets together  
14 everybody -- well, not everybody -- gets together the  
15 franchised bus operators and the Transport Department  
16 for the purposes of studying measures to enhance bus  
17 safety -- is there any reason why such a working group  
18 had not been set up prior to the Tai Po accident?

19 MR YK CHAN: I would say that this is a working group that  
20 was specifically set up in the wake of this particular  
21 incident. In the normal time, the other time, when the  
22 Transport Department do have other regular meetings set  
23 up to follow up with all aspects of the operations of  
24 the bus companies.

25 So, for this particular group, I think we have  
26

1 a specific target or specific purpose for investigation,  
2 that's why we set up this working group, and it involved  
3 all the franchised bus companies and the relevant  
4 sections or divisions of the Transport Department.

5 CHAIRMAN: Who attended these other regular meetings?

6 MR YK CHAN: Well, we have different sort of regular  
7 meetings in the Transport Department and the bus  
8 operators.

9 CHAIRMAN: I'm sure you do. Was there any -- let's call it  
10 a forum -- was there any forum at which the very senior  
11 people in the bus operators attended together?

12 MR YK CHAN: Yes. We have regular forums with senior  
13 management of the bus companies. TD, the Transport  
14 Department's representative, may typically be the  
15 assistant commissioner of the Bus and Railway Division,  
16 and this meeting -- and the counterparts from the bus  
17 companies, they normally would be the operational  
18 directors.

19 CHAIRMAN: Not the managing directors?

20 MR YK CHAN: Not the managing director.

21 CHAIRMAN: Because that's the signal difference, is it not,  
22 between the working group and whatever else might have  
23 happened before? You've got the top of the companies  
24 there?

25 MR YK CHAN: If there are very important and specific items  
26

1           that have to be discussed and which have to be decided  
2           by the many top management level, then probably there  
3           will be meetings.

4   CHAIRMAN: Can you provide us with the minutes of such  
5           a meeting, where the managing directors were present of  
6           the various franchised bus operators where safety was  
7           being discussed?

8   MR PATRICK WONG: Yes, sure.

9           Mr Chairman, may I supplement what Mr Chan said?  
10          Basically, we had different regular meetings on --  
11          sometimes they're regular and sometimes ad hoc basis,  
12          and as you can see from the working group members, what  
13          Mr Chan mentioned about the manager or the operation  
14          directors, for example, KMB's Mr Godwin So is also  
15          attending another regular meetings, we are partners on  
16          various issues and Mr William Chung of Citybus and New  
17          World First Bus as well.

18          So, basically, we are partners and we had different  
19          meetings on various issues as mentioned by Mr Chan.  
20          Also on services, maybe included some regular meeting on  
21          safety and other --

22   CHAIRMAN: It's a very specific question. It's safety. And  
23          it's very specific. Managing directors -- Roger Lee,  
24          when was he last present at such a meeting together with  
25          Mr Cheng the managing director of Citybus, together with  
26

1 the senior people at the Transport Department? That's  
2 the question.

3 Were there any such meetings: safety, top of the  
4 companies, top of the Transport Department?

5 MR YK CHAN: Mr Chairman, the regular meeting with the Bus  
6 and Railway Branch, meeting with their counterparts at  
7 the bus operations, the representative from those  
8 companies, like Godwin So and William Chung, et cetera,  
9 they are really the people that have been authorised by  
10 the company to make top-level decisions on all matters  
11 on operations. That is the regular forum that we have,  
12 to discuss with them all aspects of the bus operation,  
13 including safety. And the decision made at those  
14 meetings or items discussed at those meetings, they  
15 actually will be honoured if agreed by these companies.  
16 So probably there's not specific meetings that we have  
17 to actually meet the managing director.

18 CHAIRMAN: So the answer is "no"? The short answer to the  
19 question is "no"? The explanation is what you've told  
20 us first?

21 MR YK CHAN: Normally, no.

22 CHAIRMAN: Thank you.

23 MR DEREK CHAN: Now, at paragraph 2 of the minutes, there is  
24 a note that:

25 "The members had no objection to the membership and  
26

1 the scope of work of the working group."

2 And there's a reference to an annex. The annex we  
3 can find at page 4869-9. The first item of the scope of  
4 work for this working group is to review the training  
5 arrangements. This is a matter that was covered by the  
6 motion passed by the LegCo Panel on Transport on  
7 15 February 2018 that we just looked at a moment ago.

8 The second item for this working group is:

9 "To examine the technical feasibility, cost  
10 effectiveness, applicability and any other issues  
11 relating to the installation of seat belts on all seats  
12 other than exposed seats."

13 Now, again, the issue of seat belts was something  
14 mentioned in the motion passed by the LegCo Panel on  
15 Transport that we looked at moments ago.

16 Thirdly, the scope of work for the working group  
17 included the exploration of:

18 "... the technical feasibility, cost effectiveness,  
19 applicability and any other issues relating to the  
20 installation of on-vehicle safety devices ..."

21 Again, that is also something mentioned by the  
22 motion of LegCo Panel on Transport.

23 My question is --

24 CHAIRMAN: Before you move on, item (a), the speed display  
25 unit for passengers, was that mentioned in either the  
26

1 debate or the motions?

2 MR DEREK CHAN: Not that specific unit. It was more  
3 a general reference.

4 CHAIRMAN: Thank you. But were the other items all  
5 mentioned or not?

6 MR DEREK CHAN: The speed limiter cap is certainly  
7 mentioned. The other specific matters were not  
8 addressed --

9 CHAIRMAN: It's a matter that can be checked simply by  
10 reference to the minutes of the LegCo meeting and the  
11 motions. So perhaps you can come back to us on that.

12 MR DEREK CHAN: Certainly, Mr Chairman.

13 My question for you, Mr Chan, is whether the  
14 definition of this scope of works for the working group  
15 was driven very much by the motion passed by the LegCo  
16 Panel on Transport; is that a fair observation?

17 MR YK CHAN: Well, I disagree to that. As you know, the  
18 scope of work as given in this minute, they go into  
19 quite detail, and also, as you can take note that in  
20 particular at item (3), there are a number of subitems  
21 included, specific devices that we are going to look at.

22 Actually, before this working group, we have done  
23 a lot of preparatory work, to look into what sort of  
24 thing we can do to improve or to help the bus captains  
25 on buses and what sort of device that can possibly be

26

1           useful for installation.

2           Of course, those are the research we have done and  
3           then incorporate in the scope of work for further  
4           investigation and discussion with the operators.

5           Some of the ideas may have been raised or suggested  
6           by the public or by LegCo members, or by others. But,  
7           in this world of putting safety equipment on buses,  
8           there is nothing -- there really are a number of things  
9           that you can do. If you are talking about seat belts,  
10          of course everybody will readily recognise that seat  
11          belts might help and this is a legitimate item to be  
12          investigated.

13          Whether training for bus captains, of course this is  
14          an accident that might arise from inadequate training of  
15          bus captains, and thus legitimately an item which we  
16          should investigate in the working group report.

17          All in all, before this working group report, we  
18          actually did some research and prepared for the items to  
19          be discussed. I think this is a responsible way to do  
20          it. Otherwise, if we just go to a meeting that allow  
21          the operators to make wild suggestions or even not  
22          responding to specific measures -- our view was,  
23          actually, in conducting this working group, we have done  
24          our research first and then prepared the items to be  
25          discussed, so that we have a more focused discussion  
26

1           during this working group meeting, in the hope that we  
2           can achieve something meaningful and useful out of this  
3           working group.

4       CHAIRMAN:   When was this research done about safety devices?

5       MR YK CHAN:   We actually did a large part of our research in  
6           a compact time, about February.

7       CHAIRMAN:   So it was done after the Tai Po accident?

8       MR YK CHAN:   You may say so.

9       CHAIRMAN:   Well, do you say so?

10      MR YK CHAN:   Yes.

11      CHAIRMAN:   Thank you.

12      MR DEREK CHAN:   Can I compare the list of safety devices  
13           here with the list of safety devices mentioned in the  
14           KMB investigation report, which was available the day  
15           prior to this meeting.

16           For that, can I ask you to keep 4869-9 open, and at  
17           the same time go to KMB-1, page 114. KMB-1, page 114,  
18           is part 5 of the KMB investigation report that was  
19           submitted by KMB to the Transport Department on 12 March  
20           2018.

21           Under this section, KMB was considering "Other  
22           measures to enhance bus safety".

23           In terms of safety devices, you can see, at  
24           paragraph 41, KMB mentioned the electronic stability  
25           programme, or also called electronic stability control.

26

1 MR YK CHAN: Yes.

2 MR DEREK CHAN: If you compare that against the scope of  
3 works document, at 4869-9, that's item 3(c).

4 Then, at paragraph 42 of the KMB investigation  
5 report, page 114, you can see a reference to  
6 geo-fencing, and that's a reference to speed control  
7 aided by GPS.

8 CHAIRMAN: Do you agree that the two mean the same thing?

9 MR YK CHAN: I would say so.

10 MR DEREK CHAN: I'm sorry, Mr Chairman --

11 CHAIRMAN: Please.

12 MR DEREK CHAN: And speed control aided by GPS is item 3(d)  
13 in the list of safety devices to be considered by the  
14 working group.

15 Over the page, at paragraph 45, KMB raised the issue  
16 of speed limitation. So sort of a speed retardation  
17 system that does more than just cutting fuel when the  
18 bus goes past a certain speed limit. That is also  
19 mentioned as one of the devices to be considered by the  
20 working group at paragraph 3(e).

21 At paragraph 47 of the KMB investigation report,  
22 there is consideration being given to a device to  
23 monitor the drowsiness of bus captains, and that is also  
24 a device to be considered by the working group at  
25 paragraph 3(g) of the scope of works document.

26

1           My general question is this: why do we see  
2           a substantial overlap between the devices that KMB said  
3           they are considering and the devices that are to be  
4           considered in the scope of works for the working group?  
5           Had there been prior coordination or discussion between  
6           the Transport Department and KMB on safety devices that  
7           can be considered and what should be put on the agenda?

8   MR YK CHAN:   Okay.   Let me try to answer this question.

9           Previously, I mentioned that before the working  
10          group meeting, the Transport Department has been  
11          carrying out some research on the sort of equipment that  
12          may help to improve equipment we fit on vehicles, to  
13          improve or to help the drivers, and also improve the  
14          safety standards, safety of vehicles.

15          In the course of doing that research, apart from our  
16          research we actually talked to the manufacturers.   This  
17          is a logical way to do it because when you try to find  
18          out --

19   CHAIRMAN:   Before you go on with your long answer, can you  
20          answer the specific question: had there been prior  
21          discussions between the Transport Department and KMB  
22          about what should be on the agenda; "yes" or "no", or  
23          "I don't know"?

24   MR YK CHAN:   No.

25   CHAIRMAN:   No?   Now, by all means, carry on.

26

1 MR YK CHAN: I just want to try to set the scene what has  
2 been done. When we do our research, apart from our own  
3 normal context, we also approach the vehicle  
4 manufacturer of those buses. So mainly it's the three  
5 main manufacturers of buses in Hong Kong, ADL, Volvo and  
6 MAN, and we discuss with them and try to find out what  
7 can possibly be done to be fitted on those buses to  
8 improve the safety of vehicles.

9 I think for improving the safety of buses, there are  
10 only a number of things you can do. There is nothing  
11 new. But we can find out and bus companies can find  
12 out. I don't know whether they have discussed with the  
13 manufacturer to do the same thing as well, but for us,  
14 we do that independently in February.

15 MR DEREK CHAN: Mr Chan, if you don't mind, can I summarise  
16 it in this way: what you are saying is that you did your  
17 own independent research, KMB might have done their own  
18 independent research, you don't know, but it's  
19 a coincidence, a proper one, that you come up with  
20 a similar list of safety devices; is that the case?

21 CHAIRMAN: Because there are only a limited number of safety  
22 devices that are relevant; isn't that your evidence?

23 MR YK CHAN: That is right. And you can also notice that  
24 what KMB proposed, not all of their proposals are in our  
25 list, so obviously they are doing their own research and  
26

1 think there is something that should be investigated.

2 CHAIRMAN: Yes.

3 MR DEREK CHAN: Still on the scope of works issue, can

4 I take you back to the minutes itself at paragraph 3.

5 That's at page 4869-2, paragraph 3.

6 Paragraph 3 says this:

7 "As regards the proposed scope of work, KMB/Long Win  
8 further suggested including four other aspects advise  
9 assault on bus captain, illegal parking at bus stops,  
10 traffic congestion, aggravating bus captains' driving  
11 fatigue and pressure as well as bus stop arrangements in  
12 the scope of work."

13 Paragraph 4 contains the Transport Department's  
14 response to that suggestion.

15 Can I pick it up over the page, around six lines  
16 down from the bottom. The minutes recorded this:

17 "Given the 3-month limited time span of the working  
18 group, it was agreed at the meeting that the working  
19 group should focus on the proposed scope of work set out  
20 at annex ..."

21 And it goes on to record what that scope of works  
22 is.

23 Am I correct to interpret it as saying that, at this  
24 stage, the intended limited time span of the working  
25 group meant that additional bus safety related matters

26

1 proposed by KMB should not be discussed in order to  
2 focus on the proposed scope of works of the working  
3 group? Is that a correct interpretation?

4 MR YK CHAN: At that time, as I just mentioned, the  
5 intention was to complete the working group and  
6 investigation and also come up with the recommendation  
7 in a really tight time, in about three months. That's  
8 why, at that moment, we sort of want to focus on those  
9 critical items.

10 Now, all other items, we are not saying that they  
11 are not relevant.

12 CHAIRMAN: But the answer to the question is "yes".

13 MR YK CHAN: Yes.

14 CHAIRMAN: The question was, was KMB's shopping list  
15 rejected because of the short time span? And the answer  
16 is "yes; is that right? Do I understand your evidence?

17 MR YK CHAN: That's right, that's right.

18 We also mentioned to the bus companies that those  
19 items can be discussed at other forums; it's not  
20 necessary to be covered in this working group.

21 MR DEREK CHAN: Yes. Now, at this stage, what was the  
22 rationale behind the intended limited life span of  
23 a working group of this nature? At that stage, why was  
24 it not a permanent group; why was it intended to be only  
25 three months? What was the thinking behind it?

26

1 MR YK CHAN: The thinking behind it at that time was we  
2 tried to find out and develop measures as quickly as  
3 possible, and three months' time at that time was  
4 considered appropriate, in order to cover the scope that  
5 we have defined at that time.

6 CHAIRMAN: What was the urgency in finding out and  
7 developing measures as quickly as possible? What was  
8 the urgency?

9 MR YK CHAN: I suppose the urgency was that a serious bus  
10 accident had occurred, and the Transport Department  
11 would like to work with the bus companies to develop  
12 remedial measures as quickly as possible, so as to  
13 minimise or even eradicate the occurrence of such  
14 incidents in future. But of course those items cannot  
15 be implemented in one day but we try to complete it as  
16 soon as possible.

17 CHAIRMAN: And presumably -- and say so if it wasn't -- this  
18 was also a reaction to the fact that there had been  
19 considerable concern expressed in LegCo, in the district  
20 council and publicly about the incident, the 10 February  
21 accident. Was that a factor in the urgency?

22 MR YK CHAN: I would say this is a contributing factor to  
23 that.

24 CHAIRMAN: There was a need to be seen to be doing  
25 something; is that it?

26

1 MR YK CHAN: No.

2 CHAIRMAN: Yes, Mr Chan.

3 MR DEREK CHAN: Mr Chairman, it may be convenient here again  
4 to note the reference on the transcript on the scope of  
5 work discussion between KMB and the Transport  
6 Department. There's a series of correspondence on this  
7 very topic, which starts at KMB-12, page 4939. I don't  
8 intend to go to that detail at this stage, but again the  
9 reference is there.

10 CHAIRMAN: Just give me a moment because I want to  
11 understand what you are talking about.

12 This is correspondence about the KMB shopping list,  
13 as I've called it?

14 MR DEREK CHAN: Yes, and then the Transport Department's  
15 response. So there are four rounds of communication, if  
16 I may put it that way, starting at 4939.

17 CHAIRMAN: Yes. Thank you.

18 MR DEREK CHAN: Mr Chan, can I then take you back to the  
19 minutes of the first meeting, and can I take you,  
20 please, to paragraph 16, which is page 4869-6.

21 Mr Chan, I am going to come back -- this  
22 paragraph 16 is on the issue of seat belts. I am going  
23 to come back to you on seat belts as a separate topic  
24 later on. But, at this point in the chronology, can  
25 I just ask you this question which arises from

26

1 paragraph 16.

2 At paragraph 16 -- I will just read it into the  
3 record:

4 "CTB/NWFB queried the practicability of installation  
5 of seat belts on all seats to enhance passengers safety  
6 because it would be difficult for the bus captains to  
7 ensure passengers on buses wearing seat belts. Besides,  
8 CTB/NWFB also raised the concerns on the need of wearing  
9 seat belt by standees who could not be provided with  
10 seat belts. TD advised that there were requests for  
11 a comprehensive review on seat belts installation on bus  
12 after the traffic accidents."

13 Now, Mr Chan, what "requests" is referred to in this  
14 paragraph here? We know, in the LegCo Panel on  
15 Transport, in the motions passed there was a reference  
16 to seat belts, which is a month before this meeting.  
17 Does the "requests" there refer to the requests made by  
18 the LegCo Panel on Transport in its motion, or does it  
19 refer to some other requests?

20 MR YK CHAN: I think what you mentioned, the LegCo session,  
21 the request for seat belts, to review the seat belt  
22 arrangement, is one --

23 CHAIRMAN: Could you speak into the microphone more  
24 directly. Thank you.

25 MR YK CHAN: Yes. I believe that what you mentioned about  
26

1 the LegCo members' request for review on seat belts is  
2 one source of information, but of course we cannot  
3 specifically mention which one, which occasions that the  
4 requests were made, but from our meeting of the press  
5 and also from other sources, we do note that seat belts  
6 is an item that we are expected to look into.

7 CHAIRMAN: Are you moving on?

8 MR DEREK CHAN: Yes.

9 CHAIRMAN: There is a reference here, in the plural, to  
10 "traffic accidents". Now, Tai Po was one accident. To  
11 what other accident was this referring?

12 MR YK CHAN: I think it really mentions that particular  
13 accident.

14 CHAIRMAN: So plural is a mistake? It should be "the  
15 traffic accident"?

16 MR YK CHAN: I think that was a general statement, referring  
17 traffic accidents. There's not particular mention of  
18 other accidents, but the Tai Po accident is the one that  
19 brings up this issue for review.

20 CHAIRMAN: Yes. Thank you.

21 MR DEREK CHAN: The next matter in the chronology that  
22 I want to deal with is the issue of a digital speed map.  
23 What I'm referring to is a digital map with speed limits  
24 incorporated into the map itself.

25 The first document I want to take you to in this  
26

1           respect is at TD-1, page 366.

2           What you should have before you, Mr Chan, is  
3           an email. Can I first take you to the bottom email on  
4           page 366. It is an email from the committee's  
5           secretariat to the Transport Department, one Mr Tony KT  
6           Yau.

7   CHAIRMAN: What is the date of the email?

8   MR DEREK CHAN: The date of the email is 1 June 2018. You  
9           can pick that up at the bottom of page 366.

10           The email itself is over the page at page 367. You  
11           can see from the second paragraph from the top:

12           "It was noted from the hearing that CTB and NWFB had  
13           set their black box system to automatically generate  
14           over-speeding report for drivers driving above 70 km/h  
15           generally, as well as for drivers driving above 50 km/h  
16           on 25 road sections selected by the companies for  
17           enhanced monitoring ... A question was posed to CTB and  
18           NWFB on whether the bus company management had any  
19           information on the percentage (in terms of length) of  
20           roads travelled by CTB's and NWFB's buses and with a  
21           statutory speed limit of 50 km/h that were covered by  
22           the abovementioned 25 road sections. In response, CTB  
23           and NWFB replied that they did not have the figure (as  
24           they said that they did not have a full set of digital  
25           data detailing the speed limit of all roads in Hong

26

1 Kong) but agreed to share with the committee a digital  
2 map depicting all roads that their buses operate on.

3 It is in connection to the above that I am writing  
4 to seek your assistance in providing the committee with  
5 digital maps showing the statutory speed limits of roads  
6 in Hong Kong, so that the committee may compare those  
7 maps with the ones to be provided by CTB and NWFB."

8 Now, (i) and (ii) set out the detail of that  
9 request, but that request was made on 1 June 2018.

10 What then happened on this topic is a letter was  
11 then sent to the bus companies by the Transport  
12 Department, on 7 June 2018, just a few days after this  
13 email.

14 Can I firstly take you to the document, at TD-1,  
15 page 477. Do you have before you the letter from the  
16 Transport Department to the bus operators dated 7 June  
17 2018?

18 Mr Chan, do you have that before you?

19 MR YK CHAN: Yes.

20 MR DEREK CHAN: In this letter, in the second paragraph, the  
21 Transport Department says:

22 "I am pleased to inform you that the dataset of  
23 speed limits under the road networks managed by TD in  
24 the geographical information system format is already  
25 available to download from data.gov.hk [website] of the  
26

1 HKSAR government."

2 In the third paragraph, you inform the bus operators  
3 that:

4 "You may utilise these GIS data packages to explore  
5 the technical feasibility on speed control by GPS or  
6 geo-fencing with your bus manufacturers or other  
7 appropriate parties to conduct relevant trials."

8 Now, my question is this. Is there any reason why  
9 the Transport Department wrote to the bus companies,  
10 drawing their attention specifically to the availability  
11 of a speed limit digital map, in the context of GPS  
12 speed control, only after this committee has enquired  
13 into its availability? Is there any connection between  
14 the two?

15 MR YK CHAN: Well, the date of the letter was sent on the  
16 7th to the operators.

17 MR DEREK CHAN: Yes.

18 MR YK CHAN: We sent this letter because Citybus said --  
19 I believe they are not aware of the city map data is  
20 already available.

21 CHAIRMAN: That was apparent from what had been stated in  
22 the letter from the committee, was it not, that it was  
23 obvious they didn't know about the availability of this  
24 digital map?

25 MR YK CHAN: I presume Citybus did not know.  
26

1 CHAIRMAN: No.

2 MR YK CHAN: That's why we sent a letter to them to advise  
3 the datas are actually available.

4 CHAIRMAN: So there is a connection between the fact that it  
5 came out in the inquiry, this letter, perhaps, to the  
6 Transport Department, telling you that, although it was  
7 already available on the transcript, and that's why  
8 there was a response saying, "If you don't know about  
9 its availability, here it is, it's available"; is that  
10 it?

11 MR YK CHAN: I think there's a connection.

12 CHAIRMAN: Yes, thank you. Perfectly sensible, if I might  
13 say so.

14 MR DEREK CHAN: Then, moving on from that, Mr Chan -- there  
15 were various meetings held in March, April and then  
16 June. I will come back to some of the details of the  
17 matters discussed in the meetings on the issue of seat  
18 belts, but at this stage can I then go forward in the  
19 chronology to 25 July 2018. That date is relevant  
20 because we have a meeting by the LegCo Panel on  
21 Transport, and a briefing note was prepared by the  
22 Transport Department in advance of that meeting or for  
23 the purpose of that meeting.

24 That document is at TD-1, page 403.

25 MR YK CHAN: Yes.

26

1 MR DEREK CHAN: So that's the briefing paper prepared for  
2 the panel meeting.

3 Now, Mr Chan, I had originally prepared a number of  
4 questions to ask you on the basis of this briefing  
5 paper, but those issues have now been superseded by the  
6 report, the full report, of the working group that the  
7 department provided to the committee yesterday  
8 afternoon, so I will pick up the matters that I want to  
9 ask you from the full working group report.

10 The report -- Mr Chairman, my copy is unpaginated,  
11 but again, for the transcript's record --

12 CHAIRMAN: Thank you.

13 MR DEREK CHAN: -- the report of the working group is at  
14 TD-5, page 1757.

15 CHAIRMAN: Which paragraph number are you going to?

16 MR DEREK CHAN: I'm going firstly to the summary at  
17 section 5 of the report.

18 Mr Chan, I'm going directly first to the summary of  
19 recommendations at chapter 5 --

20 CHAIRMAN: Yes, I have it.

21 MR DEREK CHAN: -- which is internal pagination page 41.

22 Mr Chan, at paragraph 5.3, it deals with the  
23 proposed installation of in-vehicle safety devices, and  
24 5.3 says:

25 "All new double-deck buses procured from July 2018  
26

1           onwards will be incorporated with:

2           (a) electronic stability control system, and

3           (b) speed limiting retarder."

4           At 5.4, it is noted that for existing buses, the  
5           franchised bus operators will be working on retrofitting  
6           these two items on to the buses.

7           So that deals with one category which is devices  
8           which will be installed.

9           At 5.5, this deals with devices that will be  
10          trialled to see whether they are worth installing, and  
11          under that category we have the BMCS, which is the bus  
12          monitoring control system, the collision-alert and  
13          lane-keeping devices, and the driver-monitoring device.  
14          So these are the devices that are to be trialled.

15          My question is this: is there any reason why these  
16          numerous enhancements to bus safety were considered only  
17          after the Tai Po accident and not before that?

18       MR YK CHAN: I would say that these improvement measures or  
19          new equipment is an outcome of our discussion with the  
20          bus operators and the vehicle manufacturers to prove  
21          that they might be useful, actually useful, for  
22          improving the safety of buses, and that comes out, the  
23          recommendation like this.

24       CHAIRMAN: But the question is, why weren't you having these  
25          discussions with the bus manufacturers prior to the  
26

1 Tai Po accident? That's really the question.

2 MR YK CHAN: Well, perhaps, as I mentioned before, this  
3 Tai Po accident actually entails a series of questions  
4 on whether something more can be done to improve the  
5 safety of operation of buses, and arising from that  
6 I would say that this is the outcome of the discussions,  
7 and this is the way we have been moving forward.

8 CHAIRMAN: I think it comes to this, does it not: because of  
9 what had been said in LegCo, the district council,  
10 publicly, the press, that was the impetus that got you  
11 looking into these areas; is that fair?

12 MR YK CHAN: Yes.

13 CHAIRMAN: Thank you.

14 MR DEREK CHAN: Now, can I focus on the BMCS for the moment,  
15 which is the bus monitoring control system. Is it  
16 a fair summary to say the bus monitoring control system  
17 consideration arises as a result of the technological  
18 advancements of the black box or telematics systems  
19 that's available to be installed on franchised buses?  
20 Would that be a fair observation?

21 MR YK CHAN: Yes. Black box is sort of a major item that is  
22 embedded in this sort of system.

23 MR DEREK CHAN: Yes. It is the black box that enables the  
24 BMCS to be further advanced?

25 MR YK CHAN: Yes.

26

1 MR DEREK CHAN: We have already looked at the pre-existing  
2 requirements that the Transport Department imposed on  
3 the franchised buses this morning, in a document dated  
4 2003. In that regard -- to some extent we have already  
5 covered this this morning, but there are a few matters  
6 I want to ask you about, at paragraph 2.22.

7 We've already been through this morning that annex 2  
8 contains the updated black-box requirement. At 2.22,  
9 the report says:

10 "Moreover, the working group notes that the TD has  
11 recently reviewed and updated the 'Basic minimum  
12 requirements for electronic data recording device' which  
13 was first issued in 2003."

14 So my question is when was this reviewed and what  
15 prompted the review?

16 MR YK CHAN: Well, it is a review of the function, the  
17 capability of the telematics that are now available --  
18 for the telematics now currently used by the bus  
19 companies, and then the review give us the results that  
20 there are some other functions that actually the  
21 telematics is capable of recording or taking signals and  
22 it would be useful in enhancing the BMCS. That's why  
23 I would say that the revision of the basic minimum  
24 requirement for the electronic data recording device is  
25 arising from this review.

26

1 CHAIRMAN: Sorry, is arising from this review, the  
2 committee?

3 MR YK CHAN: This review.

4 CHAIRMAN: Thank you.

5 MR DEREK CHAN: Still on the issue of the BMCS, can I take  
6 you to paragraph 5.14.

7 At 5.14 of the report, it says this:

8 "Moreover, the Transport Department is keen to see  
9 the development and trials on BMCS which enables  
10 franchised bus operators to adopt a more holistic  
11 approach in both enhancing bus safety and management and  
12 control of bus fleet. Apart from overseeing trials by  
13 franchised bus operators, the Transport Department plans  
14 to engage a service provider to carry out an independent  
15 trial on vehicles to evaluate the applicability and  
16 effectiveness of using geo-fencing technology to control  
17 vehicle speed, which is one of the vital parts of the  
18 BMCS. Looking ahead, the TD would review the findings  
19 as revealed in the trials and would have further  
20 discussions with franchised bus operators with a view to  
21 developing a clear roadmap for uplifting the franchised  
22 bus monitoring through implementation of the BMCS."

23 Now, I've got a couple of questions on this proposed  
24 engagement of a service provider to carry out  
25 independent trials. What progress has currently been  
26

1           made on this front, engaging an independent service  
2           provider to conduct trials independently by the TD?

3       MR YK CHAN: We are actually applying for resources,  
4           funding, to fund this independent trial.

5       MR DEREK CHAN: So does that mean that there's not yet  
6           an identification of who may be providing this service?

7       MR YK CHAN: Not yet.

8       CHAIRMAN: This term, "service provider", what does that  
9           actually mean? Independent consultant? What is it?

10      MR YK CHAN: Well, this is a party who can provide this sort  
11           of service to the Transport Department to carry out this  
12           trial. May I put it more specific?

13      CHAIRMAN: Please.

14      MR YK CHAN: We are looking to engage the Hong Kong  
15           Productivity Council to carry out this sort of trial for  
16           us. But this is not yet fixed because we are still  
17           waiting for funding.

18      CHAIRMAN: Perhaps you can help me. Why is it that you  
19           think that they have the expertise to deal with this?

20      MR YK CHAN: We have actually tried to source a suitable  
21           party to assist Transport Department to do  
22           an independent research on this geo-fencing technology.  
23           This is because we want to try to be more proactive, to  
24           do more research in this regard, and also we have some  
25           more independent information to verify the bus  
26

1 operators' claim on their development, whether they are  
2 genuine or not.

3 In the search of these parties, we find that the  
4 Hong Kong Productivity Council, they do have  
5 an automotive parts and accessory system and R&D centre.  
6 We have discussed with them and we believe that they  
7 have the sort of capability to carry out this sort of  
8 research.

9 CHAIRMAN: Thank you.

10 MR DEREK CHAN: So I take it from your answers that you do  
11 not yet have a defined scope for the engagement, or have  
12 you got something?

13 MR YK CHAN: We are working on the detailed project brief,  
14 on the scope of the project, but basically what we want  
15 to do is -- we will try to do this trial in two phases.  
16 The first one is to test out this geo-fencing  
17 technology, to see what can be done to improve the  
18 accuracy of this positioning system and whether it is  
19 working properly, and we also intend to try in other  
20 types of vehicle, to see whether it works.

21 In the second phase, subject to a successful trial  
22 in the first phase, then we will talk to the bus  
23 companies, whether we can adopt this technology to try  
24 on their buses as well. So we will have our independent  
25 trial and the bus company also engage their own supplier  
26

1 to do more or less the same thing. But this is  
2 something that we try to cross-reference and see whether  
3 we are actually doing the right thing or they are doing  
4 the right thing.

5 CHAIRMAN: I'm sorry, the first part of the test is to test  
6 the accuracy of the GPS system? Is that what you said?

7 MR YK CHAN: Well, the first part is -- I think, out of this  
8 whole geo-fencing technology, one aspect is, the most  
9 difficult, is the application of this GPS positioning in  
10 Hong Kong environment.

11 CHAIRMAN: Yes.

12 MR YK CHAN: And there are a lot of feedbacks that they are  
13 not very accurate and that's why they have to apply  
14 geo-fencing technology to actually map out -- sort of  
15 map out these road networks and then try to provide  
16 a more accurate reading on the route itself. This is  
17 something that has to be tried out.

18 Also, I understand that the service provider working  
19 for Citybus and also KMB is also working on that sort of  
20 technology and has produced some quite good results, but  
21 we want to try to -- we really want to have  
22 an independent trial to sort of verify and then  
23 understand more about this technology.

24 CHAIRMAN: And this technology is, first of all, GPS, Global  
25 Positioning System?

26

1 MR YK CHAN: Mm-hmm.

2 CHAIRMAN: And its implementation in a geo-fencing system;  
3 is that it?

4 MR YK CHAN: Yes.

5 CHAIRMAN: Thank you.

6 MR DEREK CHAN: I'm sorry, do you want to say something,  
7 Mr Chan?

8 MR YK CHAN: No, that's all.

9 MR DEREK CHAN: Mr Chan, there is nothing in this report  
10 that talks about a similar proposed appointment of  
11 an independent consultant or a separate independent  
12 Transport Department trials for the other devices that  
13 are being tried. They are the collision-alert and  
14 lane-keeping devices and the driver monitoring devices.

15 Now, are there any plans by the Transport Department  
16 to conduct their own independent trials or consultancy  
17 work, and if not, why not?

18 MR YK CHAN: We would like to do more, but the reality is we  
19 do need resources to do it. As the commissioner this  
20 morning also mentioned, we are actually applying for  
21 resources to set up an IT -- technology group, to carry  
22 out that sort of studies and researches. With the  
23 resources we have at the moment, and like this trial we  
24 are also applying for funding to do it, if we have  
25 sufficient resources, we certainly would like to go into

26

1           that sort of -- more researches.

10 CHAIRMAN: And by "speed limiters" you mean active  
11 retarders?

13 MR DEREK CHAN: Mr Chan, so we have been through the way the  
14 Transport Department has dealt with various enhancements  
15 to bus safety. Now I want to contrast that by looking  
16 at the London approach.

21 MR DEREK CHAN: Yes. Thank you, Mr Chairman.

23 (4.02 pm)

25 (4.22 pm)

1 CHAIRMAN: Yes, Mr Chan.

2 MR DEREK CHAN: Mr Chairman, I think I owe the committee  
3 a reference in terms of the Singapore penalty situation.

4 CHAIRMAN: Yes.

5 MR DEREK CHAN: The document that we have that describes the  
6 franchised bus services in Singapore is at SEC-2,  
7 page 822. That's the first page of the document.

8 So, Mr Chairman, the document itself is  
9 an information note from the research office of the  
10 Legislative Council Secretariat, and the part relevant  
11 to us for our question is at paragraph 3.19 at page 834.  
12 At 3.19, there is a reference to "Quality of Service  
13 Standards", defined as "QoS", and the end of the  
14 paragraph says:

15 "Currently, the QoS standards comprise the following  
16 two categories:

17 (a) Operating performance standards which measure  
18 minimum daily or monthly operational deliverables,  
19 either at the bus network or route levels. They cover  
20 the aspects of bus reliability, loading and safety ..."

21 So that's where safety comes in.

22 At 3.20, the paragraph sets out consequences of  
23 non-compliance with the QoS standards and the scale of  
24 the fines.

25 CHAIRMAN: Yes.

26

1 MR DEREK CHAN: Turning over the page, at 835, we have  
2 a table of the quality of service standards, grouped  
3 under different headings.

4 CHAIRMAN: Yes.

5 MR DEREK CHAN: Mr Chairman will note that under the heading  
6 "Reliability", the third item is a bus breakdown rate,  
7 which is set at less than 1.5 per cent monthly, and  
8 under the heading "Safety" it would appear that the  
9 Singapore Land Transport Authority also uses only the  
10 accident rate of all bus services of less than 0.75 per  
11 100,000 bus kilometres per month.

12 CHAIRMAN: And as we would express that, 7.5 per million  
13 kilometres?

14 MR DEREK CHAN: Yes. And again, page 837 --

15 CHAIRMAN: A high figure compared with our accident rate for  
16 our buses in Hong Kong?

17 MR DEREK CHAN: Yes, purely on an accident rate basis.

18 CHAIRMAN: But nevertheless a penalty to be visited on the  
19 franchised bus operator if that event occurs?

20 MR DEREK CHAN: Yes, that's correct.

21 CHAIRMAN: Am I right in recalling that we have asked those  
22 assisting us in the Land Transport Authority in  
23 Singapore whether or not this penalty has ever been  
24 used?

25 MR DEREK CHAN: Yes. The committee has written letters to  
26

1 the Land Transport Authority, setting out a number of  
2 matters which arose from this research, information  
3 note.

4 CHAIRMAN: And that's one of the questions: has this penalty  
5 provision ever been invoked?

6 MR DEREK CHAN: Yes, it is.

7 CHAIRMAN: Thank you.

8 MR DEREK CHAN: Mr Chan, before the break, I was going to  
9 contrast the Hong Kong approach to the London approach.  
10 So, firstly, can I deal with the topic of what they have  
11 referred to as intelligent speed assistance, which is  
12 similar to our geo-fencing speed limitation concept.

13 For that, can I first take you to a document --

14 CHAIRMAN: Do you agree with that proposition, that ISA is  
15 similar to geo-fencing?

16 MR YK CHAN: Yes.

17 MR DEREK CHAN: Can I first take you to a document at  
18 bundle MISC-3, page 939.

19 Mr Chan, what you have before you should be the  
20 first page of a report published by Transport for London  
21 titled, "Intelligent speed adaption design", dated  
22 December 2009.

23 Can I go to the introduction to this report to give  
24 context to what was happening in December 2009, and for  
25 that can I go to page 945.

26

1           So what is being looked at now are the introduction  
2           part -- I will just read out the first two paragraphs:

3           "ISA [that's intelligent speed assistance] software  
4           development began in France in the 1980s and has been  
5           trialled and evaluated in a number of different markets  
6           since, proving effective at reducing driver speed and  
7           incidents on the road. In May 2009 TfL commenced a trial  
8           of one of the latest ISA systems in an attempt to reduce  
9           speed and road accidents in the capital. Prior to this  
10          trial TfL developed one of the most comprehensive  
11          digital speed maps of any city.

12          The three types of ISA modes currently available are  
13          Advisory, Voluntary and Mandatory ISA. The Advisory ISA  
14          displays the speed limit to the driver via a digital map  
15          and GPS system in the vehicle, and is currently an  
16          add-on unit, similar to a satnav device. Voluntary ISA  
17          goes a step further, linking the speed limit information  
18          with the vehicle engine management electronics, and can  
19          limit the vehicle's performance once the speed limit has  
20          been reached. Under the Voluntary system the equipment  
21          can be switched off if the driver wishes so that the  
22          device does not affect acceleration. The Mandatory ISA  
23          differs in that the equipment cannot be switched off  
24          (except in case of emergency). TfL is sponsoring a trial  
25          of Advisory and Voluntary ISA within London."  
26

1           And can I take you to the second-to-last paragraph  
2           from the bottom:

3           "To date a year long project has already been  
4           undertaken by TfL to understand and explore the London  
5           drivers' attitude, motivations and barriers to ISA."

6           Again, my reference to this document is to set the  
7           scene and give a date as to when the Transport for  
8           London has been looking at this ISA system.

9           The second document that I want to take you to, on  
10          the same subject, is a report from the Transport  
11          Research Laboratory dated November 2016 on the same  
12          issue. In the same bundle, can I take you forward to  
13          page 1002.

14          Mr Chan, I hope you have before you a report by TRL,  
15          the Transport Research Laboratory, in London, on  
16          intelligent speed assistance on London Buses, and it  
17          says, "A trial on two London bus routes".

18          Over the page on 1003, you can pick up the report  
19          date near the top of the page, which is November 2016.  
20          Again, can I pick up the context of this report from the  
21          introduction, which is at page 1011 of the report.

22          Starting at the middle part of the page, under the  
23          heading, "What is ISA?", the first paragraph describes  
24          what intelligent speed assistance is -- it's similar to  
25          what we've looked at so I'm not going to read it out --

26

1 and the second paragraph, which I will read out, says  
2 this:

3 "In the Pedestrian Safety Action Plan, TfL made a  
4 commitment to run a trial of ISA Technology on a small  
5 number of vehicles in the bus fleet to understand the  
6 potential role of this technology in promoting adherence  
7 to speed limits across the road network and its impact  
8 on reducing KSI casualties. Subsequently, in 2015 TfL  
9 carried out a trial of ISA on London buses using an  
10 intervening ISA system by Zeta Automotive Ltd. Such a  
11 system is the focus of the study."

12 So, Mr Chan, I just want to pick up the dates from  
13 this report, because the report is dated November 2016,  
14 but the trials took place in 2015.

15 Again, can I take you quickly to page 1105, which is  
16 an appendix to the same report. It's a report on  
17 a trial, and the report is dated October 2015. Again,  
18 just picking up dates of various things happening in  
19 this context.

20 Over the page, at 1106, it gives us a little bit  
21 more information about the trials in the first bullet  
22 point:

23 "TfL are running a trial of intelligent speed  
24 assistance technology on 48 London Buses. The  
25 technology brings together internal information on the  
26

1 vehicle speed with external information on the speed  
2 limit, and actively controls the speed of the vehicle to  
3 stay within the speed limit."

4 The second bullet point says this:

5 "ISA has been trialled across Europe and research in  
6 Sweden shows a positive impact of the technology both in  
7 terms of improving road safety and acceptance from  
8 drivers."

9 Just to complete the picture, 1120, we can pick up  
10 the date of the second trial, which is January 2016, at  
11 page 1120 of the report. There's a report on the phase  
12 2 trial.

13 So the documents show that the ISA had been under  
14 consideration by Transport for London as early as 2009,  
15 with trials conducted in 2015 and 2016.

16 My question is this: was the Transport Department  
17 aware of TfL's extensive analysis into intelligent speed  
18 assistance prior to the Tai Po accident?

19 MR YK CHAN: We are not aware of this.

20 MR DEREK CHAN: Leaving this topic of intelligent speed  
21 assistance, I'm going to move to look at how London  
22 approach their bus safety programme.

23 Can I pick that up firstly from Mr Weston's report,  
24 which is at expert bundle page 148.

25 CHAIRMAN: Internal pagination?

26

1 MR DEREK CHAN: Internal pagination, page 34.

2 CHAIRMAN: Thank you.

3 MR DEREK CHAN: And I'm looking at paragraph 7.5 which is  
4 headed, "Bus safety standard".

5 Mr Chan, I'm just going to read the first two  
6 paragraphs under the heading, paragraph 7.5, which  
7 provides the context in which Transport for London was  
8 looking into setting up the bus safety standard:

9 "A core output of the bus safety programme is the  
10 development of a ... bus safety standard. TfL have been  
11 working in collaboration since 2016 with road safety  
12 consultant TRL, Loughborough University, the bus  
13 operators and manufacturers to assess and then recommend  
14 features which should be incorporated into future bus  
15 design to help drive safety improvements. The primary  
16 objective of the bus safety standard is casualty  
17 reduction especially those killed and seriously injured.

18 Several potential technologies including intelligent  
19 speed assistance, autonomous braking, runaway bus  
20 prevention, pedal confusion prevention, acoustic and  
21 visual conspicuity, mirror design and frontal crash  
22 protection are being considered as part of this  
23 programme with both the costs and benefits of each being  
24 thoroughly assessed to ensure that the casualty  
25 reduction is maximised in return for the financial

26

1 investment made."

2 Now, the committee has heard evidence that this  
3 process of developing a bus safety standard began in  
4 February 2016, and still has not been completed as of  
5 today.

6 CHAIRMAN: That is Mr Weston's evidence?

7 MR DEREK CHAN: Yes, and the reference to that, Mr Chairman,  
8 is at Day 18, which is 27 September 2018, page 115, line  
9 7, which gives us the date for that.

10 CHAIRMAN: Thank you.

11 MR DEREK CHAN: As Mr Chairman mentioned this morning, the  
12 bus safety standard is expected to be announced in  
13 mid-October 2018. So it's more than a two-year process,  
14 in that sense.

15 CHAIRMAN: I think what we've been told is that it is  
16 intended to be rolled out in phases, and the first phase  
17 will be announced in October.

18 MR DEREK CHAN: Yes. Actually, if I can just read on, if  
19 you look at page 148, the same page that we are looking  
20 at, just a bit further down, just under the middle of  
21 the page, it says here:

22 "TfL are planning to announce the first phase of its  
23 bus safety standard on 16 October 2018 and it is  
24 currently envisaged that they will have three  
25 introductory phases:

26

1 -- phase 1 ...

2 -- phase 2 ...

3 -- phase 3 ..."

4 And you've got the dates there.

5 Having looked at the Hong Kong approach and having  
6 looked at the London approach, what would be your  
7 response to a suggestion that the Transport Department's  
8 previous approach to enhancement of bus safety appears  
9 to be more reactive to accidents having occurred rather  
10 than proactively and systematically seeking out  
11 additional measures to enhance bus safety before  
12 accidents occurred?

13 MR YK CHAN: I cannot comment on the background, how this  
14 bus safety programme comes from. We don't know what  
15 institute the authority --

16 CHAIRMAN: You are not being asked to comment on that.

17 MR YK CHAN: I know. I understand. But what I'm saying is  
18 I don't know whether the bus safety standard is more or  
19 less equivalent to what we have already, something that  
20 we have the recommended minimum specification  
21 requirement for new franchised buses.

22 In these specifications, it includes all the  
23 features a franchised bus should have, in terms of  
24 providing services or facilitating passengers using the  
25 buses, and obviously a large part in it does cover

26

1 safety and new safety measures to be incorporated.

2 Again, this standard, this time we have reviewed it  
3 and also amended it, in August this year, and we will  
4 continue to do so, to include the new standards, to be  
5 incorporated in here.

6 The bus safety standard mentioned to be revealed or  
7 to be unveiled in London comprises a lot of phases and  
8 certainly I would suppose it's a very comprehensive and  
9 very complicated programme. Certainly, the Transport  
10 Department will look into that and see what we can learn  
11 from this. As the commissioner said, we will send  
12 somebody to the UK later, and certainly this is one  
13 aspect that we can further look into.

14 MR DEREK CHAN: Mr Chan, can I then move on to seek your  
15 observations on some of the recommendations that the  
16 committee has heard that may improve the consideration,  
17 proactiveness of the considerations being given to the  
18 enhancement of bus safety, and I would like to invite  
19 your observations on them.

20 Firstly, the committee has heard various terms being  
21 given to this, but one term is a Bus Operator Forum.  
22 That's from Mr Weston. Prof Stanley talks about  
23 a standing committee on bus safety, the main aim being  
24 putting together various interested parties and  
25 collaborate on bus safety issues on a regular basis.

26

1           To some extent, Ms Chan has accepted that  
2           recommendation this morning, by referring to the  
3           extension or turning the Working Group on Enhancement of  
4           Bus Safety into a permanent group. So I want to ask --  
5 CHAIRMAN: She accepted in terms that she was accepting the  
6           recommendation of Mr Weston.

7 MR DEREK CHAN: Yes. In that sense, can I ask some further  
8           questions about this working group intended to be made  
9           permanent.

10           Can I first pick it up from the working group's  
11           final report at paragraph 5.13. Again, just for the  
12           reference of the transcript, this is TD-5, page 1803,  
13           internal pagination page 43.

14           Mr Chan, I hope you are looking at paragraph 5.13,  
15           which is under the heading, "TD's proposed actions".  
16           The first part of 5.13 talks about the steps that TD  
17           proposes to take in respect of the devices proposed.

18           Can I pick it up at the last sentence, the last line  
19           of internal pagination page 44, which says this:

20           "The TD will continue to keep track of the latest  
21           development of other devices and technologies with a  
22           view to further enhancing bus safety. Taking a  
23           proactive approach, the TD will continue to convene  
24           working group meetings to monitor the progress of trials  
25           closely on a regular basis, and provide a platform for  
26

1 the Transport Department and the franchised buses  
2 operators to exchange views on the latest bus technology  
3 advancement and the applicability of new safety devices  
4 and technologies on franchised buses."

5 This is a reference to what Ms Chan said this  
6 morning about extending the life of the working group.  
7 Is that correct?

8 MR YK CHAN: Yes.

9 MR DEREK CHAN: Is there any document which sets out the  
10 details of what is now a permanent working group? For  
11 example, is there a document setting out any expanded  
12 scope of work, any set regular meeting intervals, any  
13 document which tells us how this working group has  
14 changed from an interim group to a permanent group?

15 MR YK CHAN: Nothing in writing at the moment, but certainly  
16 during our discussions with the bus operators, we will  
17 discuss this -- we have sort of mentioned about --  
18 because all those initiatives mentioned in the working  
19 group will take some time for implementation, and also,  
20 as we mentioned, we will also look into the new  
21 initiatives where possible. So the working group will  
22 carry on, but now, as discussed this morning, this  
23 working group is going to be changed to become  
24 a permanent forum, but nothing in writing yet.

25 CHAIRMAN: Have you secured the agreement of the franchised  
26

1 bus operators to continue to be members of this  
2 permanent forum?

3 MR YK CHAN: Yes.

4 CHAIRMAN: That's been done orally?

5 MR YK CHAN: We mentioned in the last working group.

6 MS AMY LEE: Last working group meeting.

7 CHAIRMAN: I'm sorry?

8 MR YK CHAN: We have thrown this idea out at the last  
9 working group meeting and they did not express any  
10 objection to it.

11 CHAIRMAN: What was the date of that meeting?

12 MR YK CHAN: 21 September.

13 CHAIRMAN: Yes. That's referred to at paragraph 1.5 of the  
14 full report.

15 Can you give me a page reference in the paginated  
16 version, Mr Chan?

17 MR DEREK CHAN: TD-5, page 1763.

18 The reference to there being a meeting is at the  
19 second line of paragraph 1.5.

20 MR YK CHAN: Yes, in the working --

21 CHAIRMAN: So it was mentioned at that meeting?

22 MR YK CHAN: Yes, the four dates mentioned for the working  
23 group, it was the last one, 21 September.

24 CHAIRMAN: Yes. The committee has been provided with the  
25 unredacted full notes or draft notes of these other  
26

1 meetings. That is other than 21 September and 29 August  
2 2018.

3 Would you please provide those to the committee?

4 MR YK CHAN: As I understand it, the notes of the last  
5 meeting are still being prepared and to be commented by  
6 the operators, so we will --

7 CHAIRMAN: Right. Well, no doubt it's in draft form, it's  
8 ten days ago or more, so there must be a draft. Prepare  
9 a draft and we will accept it on that basis.

10 MR YK CHAN: Yes. We will discuss with the operator.

11 CHAIRMAN: Yes. Well, we found that when we ask everybody,  
12 they agree to do it for themselves and defer in respect  
13 of others, so eventually we got some redacted notes and  
14 then Citybus must have said, "Yes, we don't mind the  
15 committee having them", and we got the full version. We  
16 would like to get to the end result, straight away if we  
17 can.

18 MR YK CHAN: Yes. We will certainly look into this. The  
19 only worry is because the notes are in draft format and  
20 have not been seen by the members, so I don't know  
21 whether it will be the final version.

22 CHAIRMAN: Just give them the draft notes now and get them  
23 to comment. If there are reservations, then by all  
24 means make them.

25 MR YK CHAN: We will consider it.

26

1 CHAIRMAN: That's the best you can do, "We will consider  
2 it"? All right.

3 Yes, Mr Chan.

4 MR DEREK CHAN: Just on this working group, can I just ask  
5 one further question about the scope or the intended  
6 scope of this working group going forward.

7 From the passage at paragraph 5.13 of the working  
8 group report that I just read out, it appears from the  
9 wording that the scope of works of the working group is  
10 intended to be restricted to discussions on  
11 technological enhancements on safety device of  
12 franchised buses. Would that be a fair observation of  
13 the intended scope of this working group going forward?

14 MR YK CHAN: It would be fair to say that the scope of the  
15 working group has been defined beforehand, and it is  
16 a common understanding of the members of the working  
17 group that we will restrict our discussion to those  
18 items.

19 MR DEREK CHAN: Yes. As we have established when I went  
20 through the chronology in respect of this working group,  
21 that scope of work was agreed with a time frame of three  
22 months for the life of the working group in mind.

23 MR YK CHAN: Yes.

24 MR DEREK CHAN: The new intention is for this working group  
25 to be permanent.

26

1 MR YK CHAN: Right.

2 MR DEREK CHAN: So my question is: is it intended that the  
3 scope of works of this transformed working group is  
4 still going to be restricted --

5 MR YK CHAN: No.

6 MR DEREK CHAN: -- to only technical considerations, or is  
7 it intended to consider other aspects of bus safety that  
8 may relate to safe practices or bus-related road safety  
9 issues, for example?

10 MR YK CHAN: Well, with the change of the scope, the working  
11 group into a permanent forum, I would expect the scope  
12 of the new forum will cover much more than the original  
13 scope and if there's any need to extend to other issues  
14 related to safe operation of buses, I think we will  
15 include it. We are open-minded about this.

16 CHAIRMAN: So you would expect, or you anticipate, the scope  
17 of this permanent working group/forum to encompass all  
18 issues of safety/safe operation of buses? Is that it?

19 MR YK CHAN: Yes.

20 CHAIRMAN: Thank you.

21 MEMBER LO: Can I ask a question?

22 CHAIRMAN: Please do. Prof Lo.

23 MEMBER LO: What about membership of the working group, like  
24 for example police or Road Safety Council people, who  
25 would be relevant to look at bus safety?

26

1 MR YK CHAN: Well, the membership -- since we will be  
2 transforming this working group into a more permanent  
3 forum, the membership, we can consider whether it should  
4 be extended to other relevant members, whether  
5 government or non-government. But at the moment,  
6 I think we will have to discuss and see how this group  
7 is going to work, in terms of membership and the scope  
8 as well.

9 CHAIRMAN: When do you expect these matters to be resolved,  
10 that is to say the scope identified and the membership  
11 to be identified?

12 MR YK CHAN: I would say we will do it as quickly as  
13 possible. There's a million things going on, and we  
14 certainly hope we can take forward this new initiative  
15 as soon as possible.

16 CHAIRMAN: By the end of the year? You are identifying  
17 scope and you are identifying members. Those are the  
18 two matters.

19 MR YK CHAN: Perhaps we can take this target for  
20 achievement.

21 CHAIRMAN: You will consider that as a possible target?

22 MR YK CHAN: Yes.

23 CHAIRMAN: Potential?

24 MR YK CHAN: Bearing in mind -- may I supplement -- because  
25 as I mentioned before we are trying to get more support,  
26

1 resources, to take forward this initiative, and  
2 certainly this is a factor that we have to consider.

3 CHAIRMAN: Yes, Mr Chan.

4 MR DEREK CHAN: The next recommendation that has been  
5 suggested to the committee which may have an effect of  
6 encouraging a proactive approach is what has been termed  
7 as a safety innovation fund in London.

8 Can I first take you to the evidence of what that  
9 fund is, and then I will ask for your observations on  
10 that. Firstly, can I take you to the expert bundle at  
11 page 146.

12 Mr Chairman, that's --

13 CHAIRMAN: Mr Weston's report?

14 MR DEREK CHAN: Yes, Mr Weston's report, internal pagination  
15 page 32.

16 CHAIRMAN: Thank you.

17 MR DEREK CHAN: I am interested in the paragraph under the  
18 heading, paragraph 7.3, "Safety innovation fund".

19 Again, I will just read it out:

20 "During November 2017 TfL announced as part of the  
21 safety innovation fund the award of 500,000 pounds to  
22 six bus operators to develop new ideas that will improve  
23 safety across London's bus network. Abellio, CT Plus,  
24 Go-Ahead, RATP, Tower Transit and Metro line were all  
25 awarded funding for their ideas for safety devices and  
26

1 to improve workplace behaviour. These trials form part  
2 of the data collection process which has fed into the  
3 development of the bus safety standard."

4 Mr Weston then goes on to describe the actual  
5 devices being trialled, so I won't go through that.

6 Can I then go to a passage at page 152 which  
7 contains Mr Weston's recommendations.

8 Mr Chairman, that's page 38, internal pagination  
9 page 38.

10 CHAIRMAN: Thank you.

11 MR DEREK CHAN: A related recommendation that Mr Weston  
12 gives, under the heading "Network financial  
13 performance" -- can I pick it up at the second full  
14 paragraph of that page:

15 "Consideration could be given as to whether certain  
16 safety initiatives, such as the uptake of new safety  
17 technology and bus driver training targeted specially at  
18 safety might need to be funded by the Transport  
19 Department as direct grants outside of the franchise  
20 agreements with specific outcomes linked to these  
21 grants. Providing funding outside of the franchise  
22 agreements is also justified especially if the benefits  
23 accrue to the wider society."

24 Having that context in mind, what observations does  
25 the Transport Department have in terms of establishing  
26

1           some sort of fund that provides funding for trialling  
2           and developing or coming up with new ideas or new  
3           measures to enhance bus safety?

4       MR YK CHAN: As you may know, in Hong Kong the operating  
5           situation is very different to that of the UK.  
6           I believe the bus services in the UK are tendered out  
7           and actually the government is providing funding to run  
8           those services, while in Hong Kong the bus companies  
9           actually should be responsible to run the network or bus  
10          routes on their own, under commercial principles.

11       CHAIRMAN: Sorry, under what?

12       MR YK CHAN: Commercially viable -- commercial principles.

13       CHAIRMAN: Thank you.

14       MR YK CHAN: So these are private companies, and the bus  
15           companies should be responsible to pay for all the  
16           outlays for operating the bus services and we believe  
17           that the operation, the equipment and buses are being  
18           provided by the bus companies and they should normally  
19           continue to do so. So the UK situation is very  
20           different from Hong Kong.

21           But about new initiatives, whether it should be  
22           subsidised by the government can be a topic that can be  
23           discussed. In actual fact, even nowadays in Hong Kong,  
24           we actually sort of are subsidising the bus companies to  
25           put up the display units on one-for-one arrangement. So

26

1           this is not an item that cannot be touched. We are  
2           open-minded about this. But do they establish funding  
3           solely for a particular purpose? That I think will have  
4           profound implications and real cost implications to  
5           other public transport modes as well.

6           But for individual items, certainly we are  
7           open-minded about it and it should be discussed, if the  
8           bus companies see there is a need to do so.

9   CHAIRMAN: What is this display unit that you subsidise?

10   MR YK CHAN: Currently?

11   CHAIRMAN: Yes.

12   MR YK CHAN: Currently, the government is providing  
13           subsidised funding for installation of real-time display  
14           units on the bus shelters or bus stops, and also the  
15           seatings at those bus stops on a one-for-one  
16           arrangement. That means if the bus company provides  
17           one, the government will subsidise for another one. So  
18           this is the arrangement that has been implemented. So  
19           we do provide assistance to take forward initiatives  
20           that are beneficial to the general travelling public.

21   CHAIRMAN: This real-time display unit tells the member of  
22           the public the estimated time of the arrival of the next  
23           bus?

24   MR YK CHAN: That's right.

25   CHAIRMAN: Are you saying that government does a one-for-one  
26

1 subsidy?

2 MR YK CHAN: Yes.

3 CHAIRMAN: The bus company provides one, the government does  
4 another?

5 MR YK CHAN: Yes.

6 CHAIRMAN: And what about bus shelters, bus seats, seats at  
7 bus shelters?

8 MR YK CHAN: Yes, seats at the bus shelters, installed at  
9 the bus shelters.

10 CHAIRMAN: A one-for-one arrangement?

11 MR YK CHAN: Yes.

12 MR PATRICK WONG: Seats no. All subsidised by government.

13 MR YK CHAN: Sorry, seats --

14 CHAIRMAN: I'm sorry, what's the position with seats?

15 MR PATRICK WONG: For seats, basically we subsidise the  
16 provision of the seats installed at the bus shelters,  
17 for the bus shelters basically built by the bus  
18 operators themselves, and for the ETA, we call it the  
19 display unit, just mentioned by Mr Chan, it's being  
20 subsidised on a matching basis one by one.

21 CHAIRMAN: So you pay for the member of the public to sit  
22 down at the bus stop to watch one in two of the displays  
23 that you have paid for; the other is paid for by the bus  
24 company? Is that it?

25 MR PATRICK WONG: Actually, I think for seats, basically we  
26

1 have a lot of requests and feedback from especially  
2 elderly and those people in need, they prefer to have  
3 seats. So we want to -- actually, it's the government  
4 policy under the public address -- policy address, that  
5 it subsidises the bus company to expedite the provision,  
6 to make more numbers available for those who are in  
7 need.

8 Thank you.

9 CHAIRMAN: Who pays for the bus shelter, the structure?

10 MR YK CHAN: The bus company.

11 CHAIRMAN: Right. Thank you.

12 Yes, Mr Chan.

13 MR DEREK CHAN: Another recommendation that has been  
14 suggested to the committee by Prof Stanley is the  
15 establishment of an independent safety regulator.

16 Again, you have read Prof Stanley's report. I'll  
17 just give the context to the question. In Australia --

18 CHAIRMAN: I think it would help to be taken to his  
19 recommendations, so we can understand it.

20 MR DEREK CHAN: Yes.

21 Can I take you to two parts of Prof Stanley's  
22 report. The first one is at expert bundle page 70.

23 Mr Chairman, this is a reference to Prof Stanley's  
24 second report.

25 CHAIRMAN: Thank you.

26

1 MR DEREK CHAN: Internal pagination page 70.

2 Mr Chan, can I just draw your attention to page 70.  
3 The page is headed up, "Governance", "Main agencies and  
4 roles", and in the middle italicised passage  
5 Prof Stanley quotes something from the Transport and  
6 Housing Bureau on the system in Hong Kong. Can I pick  
7 it up in the paragraph under the italicised passage:

8 "THB thus performs the strategic or policy role, the  
9 TD undertakes the tactical role and franchised bus  
10 operators provide the operational or delivery role.  
11 This parallels the Melbourne arrangement, where  
12 Transport for Victoria undertakes the strategic role and  
13 the Public Transport Development Authority has  
14 responsibility for the tactical level. As shown in  
15 figure 3.1 [which is the figure over the page], however,  
16 a notable difference between arrangements in the two  
17 jurisdictions is that Melbourne also has a separate  
18 independent safety regulator operating at the tactical  
19 level. Transport Safety Victoria was first established  
20 under the State's Transport Integration Act 2010, as  
21 discussed in section 3.3.1 of the first report under  
22 this brief, a role that has no equivalent independent  
23 safety entity in Hong Kong. The Transport Department  
24 monitors safety performance of FB operators and is  
25 involved in promoting safety initiatives. However, the  
26

1       absence of an independent safety regulator in Hong Kong  
2       seems likely to lessen the relative focus on safety  
3       matters."

4             So that's the first part that I wish to draw your  
5       attention to.

6             The second part, if I may ask you to turn to page 99  
7       of the same bundle.

8             Mr Chairman, that's internal pagination page 46.

9   CHAIRMAN:   Thank you.

10  MR DEREK CHAN:  Can I pick it up at the middle of the page,  
11       so I'm going to read the paragraph under the numbers 1,  
12       2 and 3.  Prof Stanley says this:

13             "Operator support is available from BusVic, the  
14       industry association, if desired, across all three  
15       areas.  For example, BusVic has developed templates for  
16       MISs and MMSs which are available to its members, these  
17       templates having been developed in collaboration with  
18       the Transport Safety Director.  The Transport Safety  
19       Director has a strong focus on the development and  
20       improvement of safety culture in a bus business and  
21       safety risk management, working with operators and the  
22       industry to improve practice.  Guidance material is  
23       available, such as Guidance -- Safety Culture, September  
24       2016 ... and the director has indicated his willingness  
25       to share materials and ideas with Hong Kong, if desired.

1           The independence of the Transport Safety Director  
2           both elevates safety as a desirable policy outcome and  
3           provides an independent source of accountability and  
4           transparency on safety processes and outcomes that  
5           exceed what is likely to result if (route) bus safety  
6           was left solely to the public transport regulatory  
7           agency and/or a governmental department to manage."

8           So, in that context, what is the Transport  
9           Department's observation as to this idea of setting up  
10          an independently accountable safety regulator that  
11          focuses on safety issues?

12       MR YK CHAN: Well, I don't know the scale of operations --  
13          is it in Australia, Melbourne? -- under this Victoria,  
14          and as I understand the bus operations in Victoria, they  
15          are sort of quite de-centralised to quite a number of  
16          operators, and obviously the scope of monitoring is much  
17          larger.

18       CHAIRMAN: This is a report really about Melbourne rather  
19          than the state of Victoria, which obviously is huge.

20       MR YK CHAN: Yes, but it's talking about BusVic. I'm not  
21          sure whether it's talking about the whole of Victoria or  
22          it really only concentrates on Melbourne.

23       CHAIRMAN: Yes. I follow your point.

24       MR YK CHAN: But even if it is talking about Melbourne, as  
25          I understand, Melbourne bus operations, the bus  
26

1 operation in Melbourne is very different from Hong Kong.

2 In Melbourne, I think they are talking about quite

3 a number of operators, in quite a large number, and --

4 CHAIRMAN: Yes. I think we can help you with that.

5 MR DEREK CHAN: In terms of negotiated services, which is

6 about two-thirds of the routes, there are 15 contracts

7 and 12 operators, and in terms of one-third of the route

8 which is subject to competitive tendering, there is one

9 contractor, but that is subject to change or may change

10 every seven years.

11 MR YK CHAN: So talking about less than 20 operators?

12 CHAIRMAN: 13.

13 MR YK CHAN: 13. So obviously you are looking at quite

14 a number of operators across the spectrum, and the

15 regulators of these operators have to manage quite

16 a number of these operators.

17 But for Hong Kong, we are looking at -- well, we

18 have six franchisees, and roughly into three core

19 groups: KMB/Long Win, New World First Bus/Citybus, NLB.

20 CHAIRMAN: Long Win.

21 MR YK CHAN: Long Win and KMB.

22 MR DEREK CHAN: New Lantao is the other one.

23 MR YK CHAN: Yes, NLB, New Lantao Bus. So we are managing

24 basically three large groups, six franchisees.

25 Under this regime, I would say it is much easier,

26

1           because we don't have to manage such a large number of  
2           operators, and quite easy -- if you talk about  
3           maintenance of safety standards, that will be a much  
4           smaller task, as I see it.

5       CHAIRMAN:   In Hong Kong?

6       MR YK CHAN:   In Hong Kong.

7           Also, as already mentioned previously by the  
8           commissioner, in the Transport Department we do have  
9           specific professional branches and groups to look into  
10          safety. We have the Road Safety and Standards Division,  
11          the Vehicle Safety and Standards Division, and also Bus  
12          and Railway Branch, all these are actually exercising  
13          very tight control on the monitoring of these operators.

14          As far as I can see now, we are doing -- well,  
15          I think the way we are working is very efficient, very  
16          efficient in the sense that with one department and  
17          dealing with only three big groups, and what we want to  
18          achieve sort of in raising the safety standards of these  
19          operators is not a tremendous task, like in Melbourne  
20          you have to convince probably 13 or 14 operators to  
21          achieve a common goal.

22          In particular, when you talk about turning a working  
23          group into a permanent forum now, it actually is  
24          creating a much more focused core group. I would say  
25          this forum will take on the duty, I would say very  
26

1 similar to what is being proposed, as an independent  
2 audit sort of set-up, like the one in Melbourne.

3 So, in the Hong Kong context, I think the need for  
4 establishing a separate entity to oversee the operation  
5 over the Transport Department and the operators is not  
6 absolutely necessary.

7 CHAIRMAN: But what's independent about a forum that is  
8 comprised of the Transport Department and the bus  
9 operators? They are not independent of each other, are  
10 they? They are not independent.

11 MR YK CHAN: I would say, yes, they are not independent,  
12 between those two parties, but I think we can further  
13 look into the membership of this group and see whether  
14 it is possible to bring in independent opinions into the  
15 group, to provide independent opinions on the operations  
16 and running of this group.

17 CHAIRMAN: Who do you have in mind?

18 MR YK CHAN: I don't have anybody yet, but we certainly will  
19 look into this.

20 MEMBER LO: I was talking about the Road Safety Council  
21 people.

22 MR YK CHAN: We certainly would welcome.

23 CHAIRMAN: You would regard them as being independent, if  
24 they were members of this permanent working group forum,  
25 that would give an element of independence; do you  
26

1 agree?

2 MR YK CHAN: Yes, yes, members from the Road Safety Council  
3 are actually quite independent members.

4 CHAIRMAN: Please, Mr Auyeung.

5 MEMBER AUYEUNG: I hear the comment about this forum, that  
6 you will be -- sort of you are having permanent  
7 meetings, including many stakeholders, but one of the  
8 comments I would make is that this forum would discuss  
9 more than just safety, because you would discuss many  
10 other things.

11 What about within the Transport Department having  
12 a particular unit just responsible for safety? Is it  
13 a possibility?

14 MR YK CHAN: At the moment, we have a unit called Road  
15 Safety and Standards Division. This unit actually looks  
16 into the safety aspects of all modes of transport.  
17 Certainly franchised bus is one of them.

18 But I see that this unit alone cannot achieve  
19 specifically what we want to achieve for enhancing the  
20 safety of buses, because it involves more than roads; it  
21 also involves vehicles and the sort of operations.

22 So, in actual fact, within the Transport Department  
23 internally we can certainly form a group comprising the  
24 experts from all these divisions, to specifically look  
25 into franchised bus safety. I think this is workable.

26

1 MEMBER AUYEUNG: We heard from the commissioner this morning  
2 that there are about four units responsible for safety  
3 jointly. But how often do those units meet? Do they  
4 meet regularly, like monthly, to discuss safety issues?

5 MR YK CHAN: At the moment, there is no set regular meeting  
6 between these units, but certainly, particularly in the  
7 backdrop of we are going to sort of create a new forum  
8 to take forward the bus safety issues, and obviously all  
9 these units will be sort of involved, and perhaps under  
10 this forum we will sort of have to internally arrange  
11 regular meetings to discuss and take forward  
12 initiatives, bring to the Transport Department's notice.

13 MEMBER AUYEUNG: Thank you.

14 MEMBER LO: May I ask a question?

15 CHAIRMAN: Please, Professor.

16 MEMBER LO: I try to explore a little bit more about the  
17 Road Safety Council. So how does that work with the TD  
18 and the police? Is that sort of like an independent  
19 body to look after safety? Has it served an independent  
20 role already? I'm trying to understand the working  
21 relationship between Road Safety Council, the TD, the  
22 police, and also a Road Safety Research Committee which  
23 is part of the Road Safety Council -- how would these  
24 four entities work together to promote or to look at  
25 safety?

26

1 MR YK CHAN: On this question, may I invite Mr Yau to talk  
2 about it?

3 CHAIRMAN: Yes, please.

4 MR TONY YAU: Thank you, Chairman. The Road Safety Council  
5 combines a representative from different departments or  
6 bureaus, and also from outside official members, such as  
7 motorist associations, Institute of Logistics and  
8 Transport, Hong Kong Medical Association and Hong Kong  
9 Road Safety Association, IT fields and insurance.

10 So the Road Safety Council is an independent body,  
11 and under the Road Safety Council we have two  
12 subcommittees. The first one is the Road Safety  
13 Research Committee -- Prof Lo, you are one of our  
14 members -- and the second one is the Road Safety  
15 Campaign Committee. The Road Safety Research Committee,  
16 that means if we have some new initiative under the road  
17 safety, no matter if the initiative it related to  
18 vehicle safety, road safety or other new issues, it  
19 would be discussed in the Road Safety Research  
20 Committee.

21 In the Road Safety Research Committee, we have  
22 academics from different universities, and also some  
23 members from other relevant road safety associations.

24 For the Road Safety Campaign Committee, it mainly  
25 focuses on publicity and education. Under Road Safety

26

1 Council, we have a quarterly meeting for each council  
2 and each subcommittee. In the Road Safety Council, the  
3 TD will report the quarterly accident record to the  
4 council members, and the accident record will include  
5 bus accident record. So members of the council will  
6 offer their comments on the bus safety performance.

7 CHAIRMAN: And whose statistics are these for franchised bus  
8 accident records?

9 MR TONY YAU: Similar to other accident records, we retrieve  
10 the data from the police system and then do our  
11 analysis --

12 CHAIRMAN: So it's based on the police primary data, is it?

13 MR TONY YAU: Yes.

14 CHAIRMAN: And you collate and analyse that?

15 MR TONY YAU: Yes.

16 CHAIRMAN: Who does that?

17 MR TONY YAU: My office, TD, Transport Department, and we  
18 report to the council members the safety performance,  
19 the trends, or any observations.

20 CHAIRMAN: Can I ask you to speak into the microphone more  
21 closely.

22 Yes, so based on police records which your Transport  
23 Department collate and analyse?

24 MR TONY YAU: Yes. Then we report the safety performance to  
25 the council members, report any observation we identify,  
26

1           any trend of accidents or any common contributory  
2           factors noted in our analysis.

3           Because the Road Safety Council consists of members  
4           from our bureau, the police and other external bodies,  
5           so if they have any comments or suggestions, any  
6           initiative to enhance or any policy to enhance bus  
7           safety, they will be discussed in the Road Safety  
8           Council, and the members under the council would follow  
9           up on the ideas raised in the council.

10       CHAIRMAN: Does the Road Safety Council make recommendations  
11           specifically relevant to enhancing franchised bus  
12           safety?

13       MR TONY YAU: In recent few years, they do not have any  
14           particular recommendations.

15       CHAIRMAN: Has it ever made a recommendation about enhancing  
16           franchised bus safety?

17       MR TONY YAU: I think, because the recommendation may  
18           involve legislation, enforcement as well as publicity,  
19           although to my memory there's no specific comment or  
20           suggestions about the legislation, but on the  
21           enforcement as well as the publicity there are some  
22           suggestions to enhance the bus safety.

23       CHAIRMAN: Can you provide us with some examples of that,  
24           where a recommendation has been made?

25       MR TONY YAU: For example, I remember that we identified the  
26

1 trend of accidents, for example, the passenger lost  
2 balance, and then the publicity we propose in the Road  
3 Safety Council is focused on alerting passengers to hold  
4 the handrail firmly. That's one example.

5 CHAIRMAN: I had more in mind recommendations relating to  
6 perhaps the design of buses, the safety devices, seat  
7 belts. Has the council ever made those kinds of  
8 recommendations?

9 MR TONY YAU: No. I think why there's no recommendation  
10 from the Road Safety Council is, over the past few  
11 years, the overall accident numbers remained stable for  
12 the franchised bus.

13 CHAIRMAN: Isn't that all the more reason to make  
14 recommendations, if the accident rate is not dropping?  
15 Isn't that a reason to make recommendations? That seems  
16 to be the driving force in London, to get the accident  
17 rate down. They have a goal. I think they call it  
18 zero, goal zero or some phrase like that. So, if the  
19 accident rates are not dropping, why aren't  
20 recommendations being made?

21 MR TONY YAU: Yes. We have also the target in the Road  
22 Safety Council -- we are also discussing any plan to  
23 lower the accident rate. But we are not talking about  
24 lowering the accident rate for franchised bus. We are  
25 talking about lowering the accident rate of the whole --

26

1 all the transport.

2 CHAIRMAN: Is the reality that this council makes no  
3 recommendations that are directly relevant to franchised  
4 bus safety, apart from holding onto the handrail?

5 MR TONY YAU: As I mentioned, this is one of the examples of  
6 publicity. The Road Safety Council has recommended  
7 enhanced publicity, and also, for enforcement, the Road  
8 Safety Council also recommend the police to do  
9 enforcement.

10 CHAIRMAN: Enforcement of what?

11 MR TONY YAU: Such as illegal parking at bus stops, because  
12 it will affect the operation of the bus as well as --

13 CHAIRMAN: Yes. When was that recommendation made?

14 MR TONY YAU: I have to check the records.

15 CHAIRMAN: Can you provide that information to us? Because  
16 that is a subject that has been a constant refrain of  
17 bus companies, in particular KMB, and of the trade  
18 unions, the drivers, that there is an ongoing problem,  
19 not solved, not really addressed. I think they might  
20 say the police are not really interested.

21 MR TONY YAU: Because each year the police, in the Road  
22 Safety Council, they will consult on their STEP  
23 programme, the selective traffic enforcement programme,  
24 and, in the STEP, there's selective enforcement about  
25 the illegal parking.

26

1 CHAIRMAN: Please provide documents that show this  
2 recommendation that the police enforce the law about  
3 illegal stopping at bus stops.

4 MR TONY YAU: I will check. I am not sure whether it is  
5 particular for bus stops or in general the illegal  
6 parking.

7 CHAIRMAN: I'm sorry?

8 MR TONY YAU: I have to check the record, to check if the  
9 illegal parking is focused on bus stops or any location  
10 on road carriageway that affects road safety.

11 CHAIRMAN: Well, any recommendation of either of those  
12 areas, please provide us a copy of the document.

13 MR TONY YAU: Yes.

14 CHAIRMAN: Yes, Mr Chan.

15 MR DEREK CHAN: Mr Chairman, I was about to move on to the  
16 topic of seat belts, but I see the time.

17 CHAIRMAN: Yes. That's obviously an appropriate moment.

18 But, Mr Chan, if there's something you wish to say,  
19 please do so.

20 MR YK CHAN: Thank you, Chairman. Talking about the  
21 enforcement of illegal parking at bus stops, I believe  
22 it is not the mainstream work of the Road Safety  
23 Council. Actually, this is a subject, as you have  
24 rightly pointed out, that the unions and the bus  
25 companies mention; this is a common problem.

26

1           For this, the Transport Department actually is  
2           taking active action, has been taking active action, to  
3           push -- not push -- to request the police to take  
4           enforcement action, and we do receive specific requests  
5           from bus companies and then we refer them to them, and  
6           also we follow up whether they have done it or not.

7           So it would be fair to say that operational problem  
8           like this will be sort of more or less undertaken by the  
9           Transport Department rather than by the Road Safety  
10          Council.

11       CHAIRMAN: Yes. We've encountered your efforts in that  
12          respect. We've been provided with correspondence, and  
13          so on. We've heard from the police about it as well.

14       MR YK CHAN: We can find out some sample of it.

15       CHAIRMAN: All that I was trying to do was to find out what  
16          it is that the Road Safety Council does that is relevant  
17          to enhancing safety on franchised buses.

18          But we have reached the end of our day. Thank you,  
19          ladies and gentlemen, for your assistance today. There  
20          are quite a number of documents that we will be asking  
21          you to provide before we sit on Saturday, but we are now  
22          going to adjourn until Saturday.

23          What time are we sitting on Saturday?

24       MR DEREK CHAN: I understand we are starting at 10 o'clock,  
25          Mr Chairman.

CHAIRMAN: So we will adjourn then until 10 o'clock on  
Saturday. Thank you very much.

(5.31 pm)

(The hearing adjourned until 10.00 am  
on Saturday, 6 October 2018)

EVIDENCE FROM THE TRANSPORT DEPARTMENT: MS MABLE .....1

CHAN, MS AMY LEE, MS AMY TSE, MR PATRICK

WONG, MR YK CHAN, MR WILLIAM SHUM,

MR TONY YAU

Opening statement by MS MABLE CHAN .....6

Examination by MR DEREK CHAN .....12

*[Blank Page]*

1 2018 年 10 月 4 日

2 上午 10 時 01 分恢復聆訊

3 出席人士： Hon Mr Justice Michael Lunn（倫明高），香港專營巴士服務獨  
4 立檢討委員會主席

5 歐陽伯權先生，香港專營巴士服務獨立檢討委員會委員

6 羅康錦教授，香港專營巴士服務獨立檢討委員會委員

7 陳政龍大律師及黃佩琪大律師，由高露雲律師行委聘，代表香港專營巴  
8 士服務獨立檢討委員會

9 陳美寶女士，運輸署署長（運輸署代表）

10 陳英傑先生，副署長／公共運輸事務及管理（署理）（運輸署代表）

11 黃志光先生，助理署長／巴士及鐵路（運輸署代表）

12 謝善怡女士，首席運輸主任／巴士及鐵路 1（運輸署代表）

13 邱國鼎先生，總工程師／道路安全及標準研究（運輸署代表）

14 岑毅安先生，總機電工程師／車輛安全及標準（運輸署代表）

15 李美鳳女士，總運輸主任／特別職務（運輸署代表）

16

17 主席：（經傳譯員）早晨，陳女士同埋你嘅同事，多謝你接受我哋邀請嚟進一步向委  
18 員會作供，協助我哋嘅調查工作，嘅研訊工作。或者一開始，我想先講幾點嘅  
19 觀察，就係琴日發生咩嘢事，琴日 5 點鐘--下晝 5 點鐘，我哋收到一沓文件，  
20 係運輸署畀我哋，其中一份似乎就係工作小組嘅最後嘅報告，呢個就係檢討巴  
21 士安全嘅工作小組嗰個工作報告嚟嘅，同埋亦都有幾份文件，一份係講嗰個時  
22 速限，就係一個關於道路安全嘅審核同埋低時速限制區嘅研究，另外就係關於  
23 巴士車長嘅輔助設施嘅，即係喺巴士總站嗰度。

24 咁晏 5 點鐘先畀到文件我哋，當然就好難協助到我哋嘅研訊，特別係講到  
25 話係低時速限制區，譬如話時速 20 公里等等，呢啲肯定係相關嘅材料，當然我  
26 哋係需要一陣你會提到嚟協助我哋嘅，但係嗰份文件係咁遲先至畀到我哋，因  
27 為我哋又要將佢掃描，加咗入我哋嗰個文件夾度等等，都係要好多工。

28 所以我就想問一個問題，點解要琴日下晝 5 點鐘先交呢啲文件畀我哋呢？

29 陳美寶女士：（經傳譯員）主席，容許我回答，代表運輸署，我哋首先向委員會致  
30 歉，因為我哋咁遲交呢啲文件。其實我哋一路自從 5 月我哋出席咗第一次嘅聽

證會之後，一路都有做跟進工作，我哋好小心咁跟進，我哋亦都察悉到委員會就住幾個重要方面都表達咗興趣，我哋其實都有考慮幾個重要嘅措施，但係我哋需要首先內部通過到，亦都要爭取到額外嘅資源去實施啲額外嘅設施，所以我哋就希望可以交到呢啲資料畀委員會，係儘早畀到你哋，等你哋考慮。但好明顯，因為同時我哋亦都有好多其他緊急而重要嘅工作，所以冇辦法更早咁提交呢啲資料，我係誠心致歉。

但係我亦都希望呢啲嘅資料可以作為參考資料畀委員會嘅，我哋唔係話預期委員會要好仔細咁嚟考慮呢啲資料，即係嚟我哋進一步作供嘅時候，只不過我哋係想向委員會報告政府內部同埋部門內部嘅一啲最新嘅發展，其實我哋正在爭取專項嘅資源，可以落實當中嘅幾項措施，我哋只不過係希望畀多啲資料委員會，等你知道我哋而家諗緊啲乜嘢同埋打算做啲乜嘢嘢。

主席：（經傳譯員）好，多謝你，多謝你證實話你都係有跟進，亦都有一路係留意我哋所收到嘅證供，同時你亦都係去回應，好明顯從你睇到啲嘅課題，我哋都好高興睇到你係咁做嘅，只不過係呢個過程我哋大家都係一齊行，所以都希望可以從中學習。

但係我可以畀一個例子你，譬如係今年 8 月，運輸署就用咗呢個叫 VSSD，就係話有一個電子嘅數據記錄儀嚟嘅，呢份係 8 月嘅情況嚟嘅，點解要等到 10 月先話畀我哋聽呢？呢份文件，個日期就 8 月嘅，其實呢件事我哋一路都係有唔同證人都有提出，而有關嘅要求其實係 2003 年 11 月已經係定咗㗎喇，點解之後又係冇再用呢？點解唔早啲講畀我哋聽？

陳美寶女士：（經傳譯員）主席，8 月嗰次嘅更新其實就係因為加強專營巴士安全工作小組嘅工作而做出嚟嘅，佢哋考慮到嘅，佢哋亦都係有好多輪嘅討論，亦有牽涉唔同嘅人士，之後就有呢個更新，睇番轉頭，我哋其實應該係嚟更新咗文件之後，立即通知委員會，但係我哋其實係將呢部分納入咗工作小組嘅整體報告裏面嘅。

或者我都可以再補充一個個人意見，就係嚟之前嘅作供同埋我哋都係知道，係要喺六個月內首先完成工作小組嘅第一期嘅工作，做咗份報告，但係同時亦都係出現咗一啲緊急嘅工作，特別係因為嗰個超強颱風，所以最後一次嘅工作小組嘅會議就要 9 月初先至可以同相關嘅巴士營運商開到會，但係因為 9 月初開唔到會，所以就要改期到 9 月中，然後之後我哋要再修訂一下嗰個報告，亦都要確保所有人都知道相關嘅建議，呢個工作小組報告就琴日 5 點鐘交畀委員會，其實係因為...

主席：（經傳譯員）對唔住，容許我打斷一下，咁都係改善咗㗎喇，其實過去我哋都試過半夜收到文件，起碼今次係 5 點鐘，我哋都已經好多謝你喇。

陳美寶女士：（經傳譯員）我哋肯定係希望改善，我哋會盡力去做，我亦都係再誠心向主席同委員會致歉，為你哋造成不便。我哋亦都係會儘量適時咁樣向大家報告最新嘅發展。

1 主席：（經傳譯員）唔係淨係我哋嘅委員會嘅，就算律師都係，因為佢要係事先睇到  
2 個資料，先至可以幫助到我哋去提問嘅，但係呢啲係相關嘅文件，雖然你有之  
3 前睇到，但係其實係相關嘅，但係你就睇唔到足夠時間佢哋去睇。不過點都  
4 好，多謝你。或者喺我請律師開始提問之前，我想問下你想唔想一開始作一個  
5 評論？

6 陳美寶女士：（經傳譯員）我知道時間好寶貴，主席，如果你容許嘅話，我只係想好  
7 快咁講一講幾點，就係委員會顯示關注嘅範疇，係過去幾個月你哋提出嘅，我  
8 想好快咁講一講。

9 主席：（經傳譯員）好，請你開始。

10 陳美寶女士：（經傳譯員）多謝主席。我同我嘅同事好高興今日可以再次出席委員會  
11 嘅聽證會係作進一步證供協助委員會工作。

12 喺我哋上一次 5 月出席聽證會之後，我哋知道委員會係邀請唔同人士提供  
13 口述證供，亦都係有唔同人士提供咗好多嘅文件嘅，我哋作為運輸署，我哋亦  
14 都係會盡力為香港提供最好嘅運輸系統，安全、可靠、有效率、環保，而且亦  
15 都係照顧到用家同埋營運商嘅；安全就係我哋嘅運輸系統最重要嘅一環，所以  
16 喺呢方面，我哋一路致力去監察巴士營運商嘅表現，係要確保佢哋符合法律，  
17 亦都遵守所有嘅安全要求。

18 喺 5 月之後，我哋都提交咗補充資料畀委員會參考，呢個係因應委員會要  
19 求嘅，今日係樂意回答任何委員會提出嘅問題，我只係想特別係提及幾點，就  
20 我哋相信係委員會過去表達關注嘅。

21 一直以嚟，我哋都係積極採取行動，加強道路安全同埋改善我哋嘅道路安  
22 全管理系統嘅，我哋為咗要確保系統不斷改善，運輸署係會參考外國嘅經驗同  
23 埋做法嘅，不時都會咁做。喺 2017 年底，我哋亦都係開展咗一個顧問研究，就  
24 睇下喺香港路邊嘅危險嘅因素，我哋係亦都有確認咗有好幾方面可以再加強個  
25 個改善嘅工作，係加強我哋個表現評估，同埋有個制度係做道路安全審核  
26 嘅。

27 我哋亦都有建議係成立一個特別嘅隊伍係實施道路安全審核，即係所有新  
28 嘅道路都會咁做，同埋積極、全面同有系統咁樣加強道路安全，我哋已經係取  
29 得有關所需嘅人力資源。

30 我哋亦都想補充，喺上星期，財經事務局嗰度亦都通知我哋，話已經批准  
31 咗畀我哋有額外嘅人手，可以實施道路安全審核嘅工作嘅，所以我哋就會喺部  
32 門裏面喺未來幾個月會開始實施呢個系統。

33 第二方面，講到話係專營巴士服務安全加強個方面，我哋就完成咗一個六  
34 個月嘅研究，即係呢個工作小組做嘅工作，就要提出一啲建議，可以加強巴士  
35 嘅安全，包括埋喺巴士裏面安裝一啲嘅安全設施同埋係有關於巴士車長嘅培訓

1 亦都會檢視。

2 主席，呢個唔係終結，而係開始，我哋會繼續做我哋嘅工作，工作小組會  
3 繼續做佢嘅工作，就會定期開會，就係去監察有關嘅跟進工作嘅進度，同埋會  
4 檢視業內嘅一啲嘅做法，希望可以提出最佳嘅業內嘅安全做法。

5 另外我亦都係想報告運輸署已經積極執行工作小組提出嘅建議，包括各項  
6 嘅發展、測試、試行同埋可行性嘅研究等等，都做咗，亦都係同巴士營運商同  
7 埋巴士製造商合作一齊去做嘅，其中一個就係要做一個原型，係巴士監察管理  
8 系統 BMCS，就係裏面會有黑盒，會有全球定位系統，有地標圍欄同埋兩階段嘅  
9 時速限制等等，等佢哋可以符合嗰個法定嘅時速嘅。

10 作為第一步，城巴同埋新巴就已經係開始咗試用嘅工作，喺全個車隊自從  
11 今年 9 月 18 號就開始試行，就會有實時嘅響號嘅警報，等巴士車長可以知道佢  
12 哋超速。

13 運輸署亦都覺得我哋需要去推動有關嘅工作，我哋就已經係聘用咗一個服  
14 務營辦商就係進行獨立嘅測試去睇下有啲咩嘢方法可以控制車速，呢個就係  
15 BMCS 嘅一個重要部分嚟嘅。我哋就會係檢視嗰個測試嘅結果，然後亦都會同巴  
16 士營運商一齊確定一個更好嘅路線圖，更清楚，點樣去加強專營巴士嘅監測，  
17 就可以用呢個 BMCS 嚟做得到嘅。

18 另外，我哋亦都會睇外國嘅一啲嘅最新嘅科技，希望我哋有一個專責小組  
19 會做，就睇下點可以加快有關嘅測試。

20 第三，我哋亦都係非常關注巴士車長嘅福利，係希望係每一方面都能夠協  
21 助到佢哋係提供更多嘅輔助設施喺總站嗰度嘅，自從 2017 年 12 月中，運輸署  
22 就成立咗一個專責小組，係有各個相關政府部門同埋專營巴士營辦商嘅代表參  
23 與嘅，就去監察喺公共交通交匯處嗰度嘅設施點樣可以係加強。我哋會繼續密  
24 切同各方一齊合作，尤其是係一啲負責審批嘅部門，等我哋可以係儘快去處理  
25 相關嘅申請。

26 往前睇，我哋就會考慮同相關嘅政府部門同埋政策局，諮詢佢哋，睇下點  
27 樣可以用政府嘅資源去提供一啲輔助設施喺公共交通交匯處同埋巴士總站，等  
28 營辦商可以畀租金就可以用到呢啲嘅設施嘅，喺呢方面，我哋會同相關嘅政策  
29 局同埋部門就一齊工作，就會睇下點樣可以管理到相關嘅設施同埋處理有關嘅  
30 撥款問題。

31 有關於巴士車長嘅休息時間、用膳時間等等，我哋之前已經做過一次嘅檢  
32 討，而家已經係逐步咁樣去落實最新嘅指引嘅，即係由 2018 年初就開始咁做。  
33 而喺 2018 年第二季，最新嘅指引已經係逐階段落實，亦都因為要聘用足夠嘅巴  
34 士車長嗰度可能係出現短缺，所以又要睇下點樣，如果僱用到車長之後，就縮  
35 短佢哋嘅工作時間、駕駛時間等等嘅。

而巴士營運商亦都努力去招聘新嘅巴士車長同埋可以係保留現有嘅巴士車長，佢哋已經係改善咗有關嘅服務條件等等嘅。所以喺呢方面有好幾樣事情都係做緊嘅，我就想報告政府啱啱收到所有嘅專營巴士承辦商提交嘅增加車資嘅申請，我哋就會適時咁樣去處理呢啲嘅申請，亦都會做番相關嘅工作，包括係諮詢各個有關政府嘅審批部門等等。

最後我一直都希望可以喺全部嘅聽證會裏面親自出席嘅，但係因為今日需要特別臨時係出席立法會今日下午嘅內務委員會嘅特別會議，係處理因為超颱風引出嘅一啲問題，所以我首先要道歉，我今日係冇辦法全日出席呢個聽證會，但係請你放心，我嘅同事，今日出席嘅同事會繼續盡力協助委員會嘅。如有需要，星期六再舉行聽證會嘅話，我同我嘅同事就可以出席協助各位嘅工作嘅，多謝。

主席：（經傳譯員）多謝你，陳女士，多謝你解釋。我哋係事前知道話你今日下晝係唔能夠出席聽證會，我哋當然明白嘅，希望今日可以一早就開始做呢個聽證會，令你今日都係一開始得唔好嘅，不過無論如何，而家我可以請律師向你提問。

陳政龍先生：（經傳譯員）好，多謝你，陳女士，你頭先嘅開場發言，而今日就由我就住幾個方面提出問題，先開始，然後遲啲黃律師就會就住其他可能今日晏啲嘅時候或者禮拜六就會問其他嘅問題嘅，所以今日主要係由我提問先。

陳女士，一開始我係想講下就係競爭性投標呢一個嘅問題，投標即係包括就係專營巴士成個嘅服務或者係個別嘅巴士線嘅，委員會聽到嘅證供就係有兩個海外嘅專家，就係 Weston 教授同埋 Stanley 教授，就係講到倫敦同埋墨爾本佢哋嘅市區巴士嗰個營運，你有冇機會睇過嗰啲證供呢？

陳美寶女士：（經傳譯員）睇過㗎喇。

陳政龍先生：（經傳譯員）好喇，與其係要你詳細咁睇嗰啲嘅報告，不如我就撮要講一講，然後我就係會問相關嘅問題，首先倫敦嘅情況就係所有嘅市區巴士都係可以畀人競投嘅，嗰個合約期係五年，亦都可以係續期兩年嘅，之後嗰啲嘅路線又會再次攤出嚟係投標，呢個就係倫敦嘅情況。嗰個嘅市場就係由六大間嘅巴士公司嚟到係去佔咗最大嘅市場佔有率，大概百分之九十四嘅。主席，呢個就係喺 Weston 先生嗰個專家文件查第 126 頁。

主席：（經傳譯員）係咪即係你話專家定係嗰個嘅證物？

陳政龍先生：（經傳譯員）係專家嗰查嘅文件。

主席：（經傳譯員）好，我知道。

陳政龍先生：（經傳譯員）呢個就係倫敦，至於墨爾本，因為你都睇過證供，我就係撮要，就唔會逐頁去睇。

1 墨爾本個個嘅巴士嘅網絡有三分二就係大家去洽商出嚟嘅合約，而大概有  
2 十五份合約，十二個嘅營運商，呢個就係第 16 日嘅證供，第 34 頁第 3 行。另  
3 外有三分一嘅墨爾本嘅巴士網絡就係由一個單一嘅合約，就係一個特定嘅區域  
4 行走嘅，呢一度係要競投嘅，個合約期係七年。為咗紀錄，我就想講係我哋第  
5 16 日作供嘅第 22 頁去到 27 頁。呢個就係倫敦同埋墨爾本嘅狀況。

6 香港，我未問香港嘅情況，就我想你睇一睇呢一個九巴個個母公司交通運  
7 輸國際集團佢個個嘅周年報告，我而家就想你睇 2015 年嘅年報，係 KMB-5 個  
8 一沓嘅文件，頁數就係...

9 主席：（經傳譯員）邊一年話？

10 陳政龍先生：（經傳譯員）2015 年嘅。

11 主席：（經傳譯員）好，唔該。

12 陳政龍先生：（經傳譯員）頁數就係 1523 頁，呢個就係呢個載通嘅年報，搵唔搵到  
13 呀，陳女士？

14 陳美寶女士：（經傳譯員）搵到。

15 陳政龍先生：（經傳譯員）第 32 頁，年報 2015 年，就喺我哋文件第 1523 頁，我  
16 想你睇右手面個一欄，第一段，我讀出嚟，「喺 2015 年有兩次嘅投標嘅，一啲  
17 新嘅巴士線，就係特區政府就係落實咗，而九巴就係兩次都係中標嘅，第一次  
18 嘅投標就係關乎路線 290、290A，就喺 2015 年 3 月開始咗係行走將軍澳同埋  
19 荃灣嘅，安達臣路發展區就喺 2015 年嘅年中就係招標，而九巴就係獲通知，喺  
20 2015 年 11 月就係得到通知話『我哋中標嘅』。而呢一啲路線嘅服務係會分階  
21 段開始，喺 2016 年嘅第一季開始，就係同佢哋人口嘅遷入係配合嘅。」呢個就  
22 係關於香港某啲嘅路線嘅投標安排。

23 我哋睇番晒正話所講嘅，我有幾個問題，第一，香港個個嘅--而家嘅投標  
24 個個嘅規模有幾大呢？

25 陳美寶女士：（經傳譯員）我就有一啲量化嘅數字係即刻講得到，但係正如正話九巴  
26 嘅年報都係指出係喺好多情況，如果係有咗新嘅發展區嘅話，如果有一個新嘅  
27 交通需求又，或者有任何嘅情況我哋需要有一組嘅路線，係包括埋有啲係可能  
28 有利可圖嘅，有啲就係未必能夠係有利潤嘅，運輸署就會係擺出嚟投標嘅。

29 舉個例，最近就係西九個個高鐵站，我哋就有三條新線，一個就係金鐘去  
30 到西九龍，第二個就係觀塘去到西九，第三，就係上水去西九。我哋討論過個  
31 個需求，跟住就設計咗一個路線，然後我哋喺呢一個投標係有一組嘅路線，一  
32 方面係可以有競爭性嘅投標，另外一樣就希望個個嘅運作係財政上係可以維持  
33 得到嘅。個結果就係有一條路線就係畀咗城巴。

34 主席：（經傳譯員）我琴日都去咗個個站。

1 陳美寶女士：（經傳譯員）哦。有一條嘅路線就係批咗畀城巴，另外有兩條就係畀咗  
2 九巴，畀委員會嘅參考就係喺嗰兩條嘅路線係畀咗九巴，我哋內部估計其中有一  
3 一條係唔能夠有利潤嘅，就係我哋就係呢個投標嘅策略就係我哋想引入競爭，  
4 而有一啲嘅新嘅路線可能佢嘅服務範圍就可能已經覺得係已經係有九巴係服務  
5 緊嘅，但係我哋都仍然係繼續係攤出嚟投標，去鼓勵競爭，亦都係希望呢啲路  
6 線嘅營運係喺財政上係可持續嘅。

7 我亦都係想舉另外一個嘅例子，就係港珠澳大橋嘅新路線，我哋做咗一個  
8 投標，我哋起碼有一條路線就係畀咗新大嶼山巴士公司嘅，而其實呢條路線其  
9 實亦都可能同一啲九巴嘅主要路線係有重疊嘅地方，我想指出就係我哋而家個  
10 個嘅專營嘅模式，我哋係會有鼓勵競爭，同埋逐條路線嘅一個投標嘅工作。唔  
11 該。

12 陳政龍先生：（經傳譯員）好喇，而家或者係今日之後，可唔可以畀我哋有一啲實際  
13 嘅數目，有幾大部分嘅路線而家係用競投嘅方式，同埋嗰啲嘅合約嘅詳情呢？

14 陳美寶女士：（經傳譯員）可以。

15 陳政龍先生：（經傳譯員）好，唔該晒。

16 主席：（經傳譯員）未繼續之前，我就想問，呢啲所謂有競爭性嘅投標係一啲係公開  
17 嘅投標抑或係有限制性嘅投標呢，即係只係某啲嘅人可以參與嘅--某啲嘅公司  
18 可以參與？

19 陳美寶女士：（經傳譯員）或者我請我嘅同事係補充。

20 主席：（經傳譯員）唔該。

21 陳美寶女士：（經傳譯員）係 Amy Tse。

22 主席：（經傳譯員）謝善怡女士。

23 謝善怡女士：（經傳譯員）好喇，而家嗰啲嘅篩選營運商個個工作，我哋係限制喺本  
24 地市場嘅，即係話城巴、新一巴、龍運、九巴同埋新大嶼山巴士。

25 主席：（經傳譯員）即係畀只係限於而家有一或者兩個嘅專營權嗰啲巴士，係咪呀？

26 謝善怡女士：（經傳譯員）係，即係本地嘅市場。

27 陳美寶女士：（經傳譯員）係本地嘅專營巴士。

28 主席：（經傳譯員）五間公司？

29 陳美寶女士：（經傳譯員）係。

30 主席：（經傳譯員）呢啲嘅喺一個有限制嘅投標係咪都係向公眾嚟到係公開嘅呢？因  
31 為我想知道公眾知唔知道而家係就某啲嘅路線有投標嘅呢？

1 謝善怡女士：（經傳譯員）我哋未開始去篩選或者選擇營辦商之前，我哋首先就係規  
2 劃咗條路線，我哋會諮詢區議會，話畀佢聽嗰個定線同埋呢啲嘅細節。

3 主席：（經傳譯員）你有冇話畀區議會聽話你打算淨係限制畀呢五間嘅巴士公司去競  
4 投嘅呢？

5 謝善怡女士：（經傳譯員）我哋會話畀區議會聽我哋定線嗰個嘅細節同埋佢哋提供嘅  
6 一啲嘅評語或者意見嚟到去揀選營辦商。

7 主席：（經傳譯員）即係你會關於路線就係諮詢佢哋，但係點樣投標，你哋就唔會問  
8 佢，係咪呀？

9 謝善怡女士：（經傳譯員）冇錯。

10 主席：（經傳譯員）如果有公眾有一個新嘅公司，就係想--或者公眾有一個相關嘅人  
11 士，佢哋想知道譬如話西九，關於呢個新嘅巴士站點樣起同埋喺嗰個嘅高鐵站  
12 隔離、邊個會係營運呢啲巴士，佢哋點樣去查到呢啲嘅資料呢？預先點樣呢？  
13 如果佢琴日嚟到，佢就見到一架城巴去金鐘，又見到九巴，周圍都係有，佢會  
14 唔會事先可以知道嘅呢？

15 謝善怡女士：（經傳譯員）我哋會話畀區議會聽，然後就諮詢區議會。

16 主席：（經傳譯員）係咪喺一啲信件裏面書信往來係反映得到？

17 謝善怡女士：（經傳譯員）係。

18 主席：（經傳譯員）係喺區議會嗰個嘅會議紀錄度係睇到嘅？

19 謝善怡女士：（經傳譯員）係。

20 主席：（經傳譯員）可唔可以畀我哋睇下你哋嘅書信往來同埋有關嘅會議紀錄？

21 謝善怡女士：（經傳譯員）可以嘅。

22 主席：（經傳譯員）唔該。

23 羅先生：（經傳譯員）呢個考慮呢啲嘅路線或者係批出呢啲路線嘅時候，你會唔會考  
24 慮嗰啲嘅安全嘅表現呢，嗰個嘅往績呢？即係你哋去批出呢條路線畀呢間公司  
25 嘅時候係有咩嘢嘅考慮因素呢？

26 謝善怡女士：（經傳譯員）車資係一個嘅準則，另外，嗰個意外率亦都係我哋比較嘅  
27 一個準則。

28 羅先生：（經傳譯員）你點樣去比較兩間公司嘅意外率呢？係咪有一啲嘅參數抑或你  
29 有一啲嘅因素去可以睇下兩間公司，咁可以係好透明咁樣係睇得到嘅呢？

30 謝善怡女士：（經傳譯員）我哋係會基於現有嘅參數，譬如話涉及意外嘅數字，佢個  
31 嘅比率，我哋係用緊係每車行車公里嘅，呢個係一個參數。

1 主席：（經傳譯員）呢啲嘅統計數字係咪嗰間公司嘅關於呢一個安全方面嘅規劃嗰部  
2 分係咪睇得到㗎？遠期嘅計劃係咪睇到㗎？

3 謝善怡女士：（經傳譯員）係，同埋喺過去三年每一年嗰個嘅意外率。

4 主席：（經傳譯員）不同類型嘅意外會唔會有不同嘅比重㗎？譬如話有一個意外就係  
5 令有十個人死亡，話有另外一個意外，就係有個老太太喺巴士度跌㗎，你會唔  
6 會有不同嘅加權㗎？

7 謝善怡女士：（經傳譯員）我哋會數晒所有類型嘅意外。

8 主席：（經傳譯員）但係會唔會有不同嘅加權㗎？你明唔明我嘅意思呀？

9 謝善怡女士：（經傳譯員）冇嘅，不同類型嘅意外，我哋唔會將佢加權嘅，就係攞晒  
10 總數。

11 主席：（經傳譯員）即係話係一個嘅原始嘅數據，係咪？

12 謝善怡女士：Yes.

13 主席：（經傳譯員）即係話每一百萬行車公里嗰個嘅意外數字，或者你其他所有嘅數  
14 字，係咪咁呀？

15 陳美寶女士：（經傳譯員）主席，...

16 謝善怡女士：（經傳譯員）係。

17 陳美寶女士：（經傳譯員）...我會叫謝女士或者係黃生幫我補充嘅，佢哋會解釋一  
18 下我哋嘅一啲限制性嘅投標點樣做嘅，關於講到安全嘅問題，謝女士亦都係有  
19 一啲嘅指標話我哋用過嘅，喺遠期規劃嗰度係作為參考。除咗呢一個安全嘅因  
20 素，仲有其他嘅因素，關於就係佢哋嘅表現、服務水準，佢哋都會考慮嘅，呢  
21 個嘅研訊之後，我哋可以畀嗰個評分表大家睇，...

22 主席：（經傳譯員）好吖。

23 陳美寶女士：（經傳譯員）...就係畀委員會嚟到參考。

24 主席：（經傳譯員）好呀，唔該。我希望我哋喺星期六嘅研訊之前係得得到，我哋就  
25 可以問問題，可唔可以呢？

26 陳美寶女士：（經傳譯員）可以。

27 主席：（經傳譯員）唔該。陳生。

28 陳政龍先生：（經傳譯員）好，唔該。講到呢啲嘅安全表現嘅指標，我哋一陣間都會  
29 講嘅，但係未講嗰樣嘢之前，我可唔可以係去番正話羅教授問嘅，到底車資就  
30 係一個考慮嘅因素，喺呢啲投標裏面，係咪由嗰個嘅競投人自己提議一個嘅--  
31 某條路線嘅車資嘅，抑或唔係由政府去定㗎？

1 黃志光先生：（經傳譯員）唔係嘅。

2 主席：（經傳譯員）咩嘢？個答案係咩嘢話？

3 黃志光先生：（經傳譯員）係其實呢個係一個競爭性嘅投標，所以巴士公司就會建議  
4 佢哋嘅車資，就我哋亦都會有一個車資嘅級表，就係話每一個嘅路程最高可以  
5 收到幾多車資，每間公司都可以定佢哋嘅車資嘅，佢哋喺提交標書嘅時候，佢  
6 哋亦都要提出--係根據我哋呢一個嘅車資水平嗰個嘅表就係上限提出一啲嘅建  
7 議。

8 主席：（經傳譯員）最高係幾多呢？

9 黃志光先生：（經傳譯員）係已經係賣咗憲報，大家都知嘅。

10 主席：（經傳譯員）係咪每公里幾多錢，係點樣計㗎？

11 黃志光先生：（經傳譯員）其實係不同嘅公里亦都有不同嘅車資嘅，譬如話車程越  
12 長，佢哋可以係收貴啲，亦都視乎不同類型嘅服務嘅，如果係一啲康樂性嘅路  
13 線，佢係星期日或者係公眾假期先行走，佢哋亦都可以係貴啲，又或者係一啲  
14 嘅晚間服務、通宵服務，佢哋都可以嘅貴啲嘅。

15 主席：（經傳譯員）係咪已經係賣咗憲報㗎？

16 黃志光先生：（經傳譯員）係。

17 主席：（經傳譯員）可唔可以畀我哋一份而家嗰個版本？

18 黃志光先生：（經傳譯員）可以嘅。

19 陳政龍先生：（經傳譯員）如果呢啲嘅車資係可唔可以用而家嗰個嘅車資調整機制㗎  
20 到係去調整㗎？

21 黃志光先生：（經傳譯員）如果我哋接受咗嗰一個--如果我哋批出咗嘅話，佢哋就要  
22 根據呢一個車資㗎到去收費，如果佢哋想加價，佢哋就要根據車資調整機制㗎  
23 到係去調整嘅。

24 陳政龍先生：（經傳譯員）從一個政策嘅角度嚟睇，呢一個嘅競投或者係投標嘅工作  
25 會唔會只係限於一啲新市鎮或者係一啲新嘅發展或者有一啲新嘅路線組合先至  
26 會做嘅呢？政府有冇咩嘢計劃去擴闊呢一個投標嘅範圍？如果係嘅話，諗住去  
27 到咩嘢程度呢？

28 陳美寶女士：（經傳譯員）或者等我答，政府嗰個目標一向都係想係促進呢個競爭㗎  
29 到去改善服務水平嘅。如果向前看嚟睇，其實有一啲新嘅發展區，譬如係新界  
30 或者係九龍嘅市區，譬如係啟德嘅發展區都會有一啲新嘅需求嘅。當我哋喺呢  
31 啲新嘅市鎮或者新嘅發展係想有一啲具競爭性嘅路線嘅，我哋就會諗下應唔應  
32 該係重疊一啲而家係舊嘅區，譬如觀塘或者啟德東嘅呢啲已發展區嘅一啲路

1 線，要唔要個度有重疊嘅。

2 我哋都會試下逐條線、逐條線咁樣嚟睇--嚟到去投標嘅，向前睇，我哋喺  
3 呢一個現有嘅專營模式，我哋亦都覺得冇乜嘢係令我哋--冇嘢--我哋係可以喺  
4 呢一方面做多啲嘅。我亦都可以話根據經驗，如果有一間嘅專營巴士營運商喺  
5 佢哋服務水平方面係唔符呢一個專營權嘅要求，好似喺 1990 年代，我哋係試過  
6 係某啲嘅路線係唔畀佢再營運嘅，或者係某啲嘅路線組合，就好似中巴咁，我  
7 哋就擺走咗啲嘅路線或者係一啲路線嘅組合嚟到出嚟投標，畀一啲新嘅營辦  
8 商嚟到去運作嘅，所以其實我哋成日有機會都係會係再進一步係用呢個作為一  
9 個工具嚟到去改善個服務水平嘅。

10 主席：（經傳譯員）上一次喺香港嘅巴士路線公開嘅競爭性招標係幾時呢？即係對上  
11 一次嘅公開招標。

12 謝善怡女士：（經傳譯員）係 1998 年嘅，當時我哋就第一次就就住呢啲機場嘅巴士  
13 路線進行招標，就係中巴公司，就係 1998 年嘅。

14 主席：（經傳譯員）當時嘅競爭性招標係咪有限度咁進行嘅呢？

15 謝善怡女士：（經傳譯員）係。

16 主席：（經傳譯員）唔該晒。

17 陳政龍先生：（經傳譯員）你哋有冇計劃係就住現有嘅專營協議嘅現有路線係會唔會  
18 進行競爭性招標呢？

19 陳美寶女士：（經傳譯員）暫時我哋係冇計劃咁做嘅，但係我哋唔會排除咁樣做，因  
20 為我哋一直都係有監察唔同專營巴士公司唔同路線嘅表現嘅。

21 陳政龍先生：（經傳譯員）我就想講另一個議題，就係首先用一啲安全或者安全表現  
22 指標，我就會問一啲問題，就係會講下使用一啲獎勵--即係喺合約入面使用獎  
23 勵或者懲罰嘅好處同埋壞處嘅，即係就住呢啲安全表現指標。

24 首先，我就想去睇下安全表現指標呢一個概念，首先，我就想問一下運輸  
25 署現行嘅做法，同埋跟住我就會問你嘅意見嘅，就係點樣可以改善呢一個方  
26 面，喺我講啲細節之前，我就想請你澄清呢一個加強專營巴士安全工作小組報  
27 告上面有一點我就想你澄清嘅。

28 呢個就係 TD-5 文件冊，我就有啲個頁數，我就可能會講啲報告嘅頁數  
29 或者啲個段數嘅。

30 主席：（經傳譯員）好。陳女士，你有冇呢份報告响手呢？

31 陳美寶女士：（經傳譯員）請等等。係，我睇到喇。

32 陳政龍先生：（經傳譯員）報告嘅第一頁就係 1757 頁嘅。

1 主席：（經傳譯員）呢份文件係啱啱先至有啫，所以我就有啲個頁數嘅。

2 陳政龍先生：（經傳譯員）或者我可以加番呢個頁數，令到我哋嘅謄本度都可以記錄  
3 到。

4 第一，我想先睇 TD-5 文件冊嘅 1757 頁，我想你睇下 4.26 段嘅，呢個係  
5 1798 頁，首先，我想講下呢一段嘅背景嘅，呢一段就係講培訓，即係喺培訓底  
6 下嘅，驟眼睇，可能同安全表現指標呢一個議題有直接嘅關係，我有一點想你  
7 澄清嘅，我就想先讀出 4.26 段。

8 「工作小組認為如果係要向車長提供足夠同埋相關嘅培訓，所有嘅專營巴  
9 士公司係應該改善佢哋培訓巴士車長嘅內部監管同埋核證機制，包括係開發一  
10 啲主要嘅服務指標，監察佢哋嘅實行同埋有效性同埋係制定一啲合適同埋有效  
11 嘅跟進行動，並且向管理層匯報。」

12 我想你解釋一下發展一啲主要嘅表現指標係咩嘢意思呢？同埋係有咩嘢關  
13 係呢？

14 陳美寶女士：（經傳譯員）呢啲嘅主要表現指標就係同車長嘅培訓有關，而且同你所  
15 講嘅安全表現指標係有直接關係嘅。以往專營巴士公司係主動制定咗一啲培訓  
16 嘅指標，例如係過去三年培訓車長嘅數目，呢個只係起點嚟嘅啫，我哋係有提  
17 倡呢一個專營巴士車長訓練綱領嘅實務守則，我哋發現如果我哋只係依賴一個  
18 單一嘅表現指標，例如係過去三年訓練嘅車長數目，係不足夠嘅。

19 就發展一啲主要嘅表現指標係可以監察到巴士公司嘅表現，即係就住現有  
20 車長嘅培訓同埋一啲嘅溫習課程、一啲跟進課程，呢啲就可以有效係矯正一啲  
21 犯下駕駛錯誤車長嘅表現或者係行為嘅。而巴士公司表示佢就會係為現有嘅車  
22 長提供實地嘅駕駛訓練，但係呢一類嘅培訓就並唔能夠滿足我哋嘅需要嘅，例  
23 如有啲呢啲嘅駕駛訓練--即係有陣時呢啲訓練只係由一個車長去喺監察或者睇  
24 住另一個車長去駕駛，呢一個就同我哋預期嘅要求係唔同嘅。

25 而我哋係希望專營巴士公司係可以做多一啲，佢哋就可以更加有效地進行  
26 內部嘅監核，我哋亦都期望巴士公司係定期提供報告，應該係起碼每半年係向  
27 佢哋嘅管理層或者董事局係提供報告嘅，佢哋亦都要提供一啲特別事故嘅報  
28 告，向佢哋嘅管理層，就住佢哋嘅培訓、培訓嘅有效性，亦都係要提供嘅。而  
29 呢啲報告亦都係要提供畀運輸署，令到我哋可以定期去監察，同埋喺我哋同佢  
30 哋嘅管理層會面嘅時候，亦都可以定期檢討嘅。

31 陳政龍先生：（經傳譯員）有一點想澄清嘅，呢一啲嘅表現指標同駕駛行為，即係因  
32 為培訓所引起嘅駕駛行為係有關？

33 陳美寶女士：（經傳譯員）呢一個係一個培訓嘅項目之一。

34 陳政龍先生：（經傳譯員）多謝你澄清。而家我就想睇睇現時運輸署點樣用呢啲安全  
35 表現指標嘅，首先，我想你睇睇九巴嘅遠期計劃，就係 2018 至 22 年，頁數就

1 係 TD-1 文件冊嘅第 180 頁，我想提一提呢個背景，呢份文件就係由九巴準  
2 備，就係呈交咗畀運輸署，就係喺 2017 年中嘅，呢個就係關於未來個五年嘅計  
3 劃，即係 18 至 22 年嘅。

4 我想你睇睇第 192 頁，喺 8.8.1 段，呢個標題就係建議嘅目標同埋其他嘅  
5 措施，呢一段就係咁講嘅，「九巴係建議係用 2014 至 16 年嘅三年平均實際意  
6 外率，就係 2.71，（呢個定義就係每 100 萬行車公里涉及意外巴士嘅數目），  
7 呢個就作為五年遠期計劃嘅目標，呢個就亦都係等同係即係比起 2014 年嘅意外  
8 率係減低咗百分之六，呢個亦都係 14 至 16 年嘅最高紀錄。」

9 我就想向你指出，九巴自行制定嘅目標就係 2.71，然後我哋就睇一睇下一  
10 年，即係 2017 年係發生咗咩嘢事，下一份我想你睇嘅文件，就係下一份嘅五年  
11 遠期計劃，就係 2019 至 23 年，頁數就係 TD-5 文件冊嘅 1728 頁。你睇唔睇  
12 到呢份文件，陳女士？

13 陳美寶女士：（經傳譯員）係。

14 陳政龍先生：（經傳譯員）第 1728 頁，呢封係運輸署向九巴發出嘅信件，就係 18  
15 年嘅 5 月 21 號，就向九巴提供咗一個清單，就係講咗下一份遠期計劃需要包括  
16 嘅項目，背景就係咁樣。

17 至於喺 1729 至 1731 頁就係你向九巴發出嘅信件，就係提出喺下一份嘅遠  
18 期計劃要包括嘅項目，我就想讀出頭個兩段，呢個標題就係「巴士安全」嘅。

19 就話「我哋發現喺涉及意外嘅九巴巴士數目，即係喺每百萬行車公里計，  
20 就由 2016 年嘅 2.73 上升到 2017 年嘅 3.04，呢一個係一個高嘅數字嚟嘅。

21 以下呢一個表就總結咗 2015 至 17 年涉及交通意外嘅九巴巴士數目，就係  
22 以意外嘅嚴重程度去分類。就結果顯示致命意外嘅數目就由 15 年嘅 11 宗下降  
23 到 17 年嘅 3 宗，而輕微交通意外嘅就有輕微上升嘅趨勢，就係由 15 年嘅 737  
24 宗上升到 17 年嘅 866 宗，而實際嘅意外率就係喺 2017 年係 3.04 嘅，呢個就  
25 係比喺 2018 年至 22 年遠期計劃嘅目標意外率為高嘅，而呢個當時預期嘅意外  
26 率係 2.71。」

27 換句話講，九巴就達成唔到佢自己定下嘅目標，而下面呢個表，你就會見  
28 到呢個就係涉及交通意外嘅九巴巴士數目，就係以每百萬公里計嘅，呢個趨勢  
29 係上升緊嘅，由 15 去到 16 至 17 年，呢個意外率分別係 2.62、2.74 同埋  
30 3.04。

31 下面第二個表亦都係顯示咗涉及九巴巴士交通意外數目，呢三年內亦都係  
32 有上升嘅趨勢嘅。

33 根據呢度嘅分析，似乎運輸署所著重嘅兩項安全指標，第一，就係每百萬  
34 行車公里嘅意外率；第二，就係交通意外嘅數目，就係涉及九巴巴士嘅意外數  
35 目嘅。我咁講，啱唔啱呀？

1 陳美寶女士：（經傳譯員）係，啱嘅。

2 陳政龍先生：（經傳譯員）我哋可以跳去 1731 頁，就係呢封信嘅最尾嘅部分，喺第  
3 (4) 分段，個標題就係「目標意外率」呢一個目標，運輸署就話「你哋公司係必  
4 須要喺緊嘅遠期計劃係指出一個目標嘅意外率，同埋係包括一個改善安全嘅  
5 建議」，第二項，就係「喺緊嘅五年就係提出一個每百萬行車公里減低意外  
6 率下降嘅目標。」

7 我就想同你探討一下點解使用呢一個每百萬行車公里嘅意外率作為一個安  
8 全嘅指標，首先，呢一個意外率係包括咗因為巴士車長犯錯引起嘅意外同埋不  
9 涉及巴士車長嘅意外，啱唔啱呀？

10 陳美寶女士：（經傳譯員）呢個係一個一般性嘅指標，係去統計意外嘅數目嘅，呢啲  
11 意外可能係包括一啲涉及巴士車長犯錯嘅意外，但係有時就同車長無關嘅。呢  
12 個就視乎意外嘅調查同埋意外嘅成因，睇下車長係咪其中一個成因。

13 主席：（經傳譯員）所以簡單嚟講，個答案就「係」嘅，係咪？

14 陳美寶女士：（經傳譯員）冇錯。

15 陳政龍先生：（經傳譯員）換句話講，呢個意外率係包括咗一啲巴士公司或者車長都  
16 控制唔到嘅元素，係咪？

17 陳美寶女士：（經傳譯員）係。

18 陳政龍先生：（經傳譯員）我想你睇下 Stanley 教授嘅證供嘅，我就想你評論一  
19 下，首先，我就想你睇睇第 16 日嘅謄本，就係 9 月 15 號，就係喺第 7 號文件  
20 夾第 67 頁，我就想講 67 頁嘅第 16 行，我就想講番一啲背景畀你聽，當時我  
21 就問 Stanley 教授一啲問題，我就問緊一啲--用一啲標準嘅安全表現指標就作  
22 為制定一個獎賞或者懲罰嘅方法，我想講番第 16 行，Stanley 教授就講佢認  
23 為安全表現指標應該包括啲咩嘢，我就想讀出嚟，第 16 行。

24 「我就有一啲意見嘅，喺休息之前，我講到一啲意外，譬如話一啲致命嘅  
25 意外，噉倒、跌嚟等等，呢啲係你可以考慮嘅元素嘅，至於制定一啲主要嘅服  
26 務或者主要嘅表現指標，你係應該符合一啲嘅元素，佢哋一定係要有針對性，  
27 你係可以量度得到，亦都係可以實行得到，亦都係要相關嘅，而相關嘅數據應  
28 該係要定期或者及時去提供，而呢一啲嘅指標就係要係呢啲巴士公司係影響得  
29 到嘅，如果巴士公司係唔能夠係影響呢啲指標嘅話，就係有意思嘅。」

30 我亦都想你睇下第 93 頁，就係同一日嘅謄本嚟嘅，第 22 行，第 93 頁  
31 嘅，我亦都想講番一啲背景畀你聽，當時就係講緊呢啲指標究竟巴士公司係控  
32 唔控制得到嘅，喺第 22 行，Stanley 教授就話「我認為如果我哋講呢個指標  
33 嘅範圍，咁必須係一啲你控制得到嘅事項。」

34 我哋就啱啱講緊每百萬行車公里嘅意外率，好大部分嘅意外都係巴士車長

1 控制唔到，即係話啲車長係冇犯錯嘅。你就住 Stanley 教授嘅意見，你認為呢  
2 啲指標係應該包括啲咩嘢呢？即係巴士公司係能夠控制到，你有咩嘢意見呢？

3 陳美寶女士：（經傳譯員）首先，講到話主要表現指標，目的就係作為一個管理工具  
4 或者係一個指標，就係畀規管當局，即係運輸署同埋專營巴士營運商，都可以  
5 檢視佢哋就住安全嗰方面嘅表現嘅，喺我頭先啱啱答你之前一個問題嘅時候，  
6 講到道路安全或者係陸路交通安全都係有好多因素導致意外發生嘅，我哋睇呢  
7 個主要表現指標，即係話係實際交通意外嘅數字同埋每 100 萬公里嘅涉及交通  
8 意外率，其實都係喺呢方面，我哋都做緊——就係講係一個遠期計劃嘅工作，就  
9 係去嘗試去探討分析意外嘅性質，牽涉一啲巴士嘅種類、巴士嘅型號、意外嘅  
10 種類、到底係碰撞抑或係冇碰撞，同埋所牽涉巴士司機嗰個年紀同埋啲巴士  
11 路線等等。

12 純粹如果只係——我哋係純粹係倚賴呢啲嘅主要表現指標幫我哋去定一啲高  
13 層次嘅工具去評估整體安全表現，即係指專營巴士營運商，但係唔係足夠嘅，  
14 我哋都實際有要求話專營巴士營運商喺佢哋有關於安全嗰個章節裏面，即係今  
15 年 8 月畀委員會嘅時候，都有提到佢哋要將呢啲意外將佢細分做唔同嘅種類，  
16 之前我有提及。

17 而事實上，我哋部門嘅巴士及鐵路部都同埋道路安全及標準處都有聯手去  
18 分析巴士意外嘅趨勢，即係各種嘅分類，同埋係更加仔細咁去評估專營巴士營  
19 運商嘅安全表現。

20 陳政龍先生：（經傳譯員）陳女士，如果你想再擴大啲講，請你話畀我聽，但係我個  
21 問題就係話就係呢個評估嘅指標...

22 主席：（經傳譯員）或者畀我打斷一下，陳律師。其實可以好簡單咁問呢個問題，你  
23 就唔同意 Stanley 教授所講，就話主要表現指標必須係巴士營運商可以影響嘅  
24 結果嘅一個指標，係咪？你唔同意，係咪？

25 陳美寶女士：（經傳譯員）係，我唔同意，因為作為主要表現指標，就係一個管理工  
26 具，...

27 主席：（經傳譯員）你已經係答咗個問題，已經係答咗個問題。

28 陳美寶女士：（經傳譯員）唔該。

29 陳政龍先生：（經傳譯員）主席。你提到話係要分析唔同嘅意外成因，但係其實喺有  
30 關文件裏面冇定一啲指標畀巴士公司就話按唔同分類嗰個分析嚟去睇嘅，唯一  
31 一個指標就係呢個每百萬公里意外涉及率，如果你話用某一啲嘢嚟做一個指  
32 標，你同唔同意就係應該用一啲巴士公司可以控制到嘅因素嚟做指標？

33 陳美寶女士：（經傳譯員）如果我哋純粹喺理論層面咁講，當然可以有啲主要表現指  
34 標係巴士公司完全控制到就最好，但係喺我頭先答主席問題嘅時候，我唔係完  
35 全同意話主要表現指標係應該要由公司全面可以控制到嘅，因為呢個一開始只

1 不過係一個指標，就作為一個基礎，等我哋去評估佢哋嘅表現，因為意外嘅成  
2 因係好複雜嘅，可以係有好多唔同嘅因素導致，所以我哋係要詳細分析各類嘅  
3 意外、佢嘅性質同埋種類，然後等我哋可以作好深層次咁去分析一下相關嘅表  
4 現指標。

5 你頭先提及話培訓嘅指標，喺工作小組嘅討論裏面，安全係我哋最關心嘅  
6 問題，巴士公司未必能夠全面控制到牽涉到佢哋巴士嘅意外宗數，即係每一  
7 年，但係講到話巴士安全同埋巴士車長嘅方面，其實係有唔同嘅方法佢哋可以  
8 做到係將意外嘅整體數字係減低嘅，或者以百萬公里計嘅意外率都可以減低，  
9 所以喺呢一方面，我哋就制定咗實務守則，就預期巴士公司能夠制定一啲嘅就  
10 住培訓嘅主要表現指標。

11 至於話黑盒個規格同埋加裝閉路電視呢啲嘅做法，所有呢啲儀器都可以  
12 幫到巴士公司去調查到底有關嘅巴士車長係咪牽涉到造成個宗嘅交通意外嘅。

13 所以我哋會考慮晒所有嘅因素去評估到底巴士公司係咪已經盡咗力去提供  
14 安全嘅巴士服務，同埋亦都可以令到佢哋嘅巴士車長有安全嘅駕駛行為同埋態  
15 度。

16 陳政龍先生：（經傳譯員）你喺計算唔同嘅事故、分析個個比重嘅時候，你頭先提及  
17 係喺你個腦裏面做呢啲比重？譬如裝閉路電視等等。

18 陳美寶女士：（經傳譯員）或者可唔可以一個具體例子我哋點樣做，譬如話九巴，佢  
19 嘅意外率其實係超出咗佢哋自己提出嘅目標，我就要求佢哋進一步分析有關意  
20 外嘅性質同埋種類，我哋嘅觀察發現有涉及碰撞嘅意外個數字係增加咗嘅，即  
21 係相對於前一年，而裝設黑盒同埋閉路電視其實可以幫到公司話到畀我哋聽到  
22 底係咪有一種嘅巴士型號有啲咩嘢問題又或者係有一個巴士車長個個駕駛行為  
23 係有問題，因此導致係有涉及碰撞嘅意外宗數增加，即係話包括係乘客跌倒或  
24 者乘客喺車上面企唔穩。亦都有一啲嘅路線，譬如我哋發現係呢類咁嘅意外係  
25 會多啲嘅，所以我哋就係會仔細咁去調查，就要求公司提出一啲特定嘅措施去  
26 處理。

27 或者上一次我哋提交有關安全章節嘅時候，你都會睇到各間公司都係提交  
28 咗一啲牽涉到標準嘅段落，係話佢哋落實咗啲乜嘢加強安全嘅措施，但係自從  
29 上一次提交遠期計劃之後，我哋都係實際會去分析意外嘅趨勢同埋係深入咁分  
30 析相關嘅意外，要求佢哋提供一啲特定嘅措施去處理唔同類型，就住按巴士路  
31 線個啲嘅意外率、巴士嘅型號等等咁樣，等我哋可以更加全面、整體咁樣去評  
32 估專營巴士營運商嘅安全表現。

33 主席：（經傳譯員）你話要求呢啲公司做更詳細嘅分析，喺邊度有寫？

34 陳美寶女士：（經傳譯員）我哋係寫咗畀唔同嘅巴士營運商就係提出呢啲要求，其中  
35 一個例子就係喺九巴嘅信件嘅，喺一份文件夾裏面有㗎喇，我哋當然可以提  
36 交有關嘅信件嘅範本畀你哋參考嘅。而喺發出呢啲信件之後，有各個專營巴士

1 營運商都已經喺度制定下一個嘅遠期計劃，就會特別係處理呢個安全嘅章節  
2 嘅，呢個過程係不斷會係演變嘅。整個遠期計劃就今年年尾會完成，我哋就會  
3 提交嗰啲計劃畀政策局，就會根據法例去做嘅。

4 主席：（經傳譯員）係咪比起之前係遲咗呀？即係比起一般嗰個時間表，即係提交呢  
5 個遠期計劃，今年係咪遲咗？

6 陳美寶女士：（經傳譯員）我覺得係差唔多係跟番過往嘅，...

7 主席：（經傳譯員）即係喺年尾之前，巴士公司就會係提交佢哋遠期計劃裏面嗰個安  
8 全章節？

9 陳美寶女士：（經傳譯員）專營巴士營運商其實已經提交咗遠期計劃嘅草擬本，包括  
10 埋安全章節，係按嗰個--喺個限期之前交咗嚟喇。

11 主席：（經傳譯員）限期係幾時呀？

12 陳美寶女士：（經傳譯員）6 月中--6 月尾，6 月尾。應該係 9 月尾或者 10 月初，  
13 我哋要畀番我哋嘅意見佢哋，然後希望之後我哋可以就住有關章節嘅內容達成  
14 協議，就可能係年底或者明年初就交畀運房局係批准嘅。

15 主席：（經傳譯員）呢個時間表係咪有一個法定規定㗎？

16 陳美寶女士：（經傳譯員）係有法定規定嘅。

17 主席：（經傳譯員）可唔可以提一提我喺邊度可以搵到個法定要求呀？即係你提嗰啲  
18 日期，因為如果我有記錯，應該係 6 月中同埋係 9 月嘅。

19 陳美寶女士：（經傳譯員）9 月尾。我同事搵緊嗰沓文件夾，但係你講得啱嘅，係有  
20 兩個日期喺條例有提及嘅，佢哋係要喺 6 月尾提交，然後我哋就應該係要 9 月  
21 尾同佢達成協議...

22 主席：（經傳譯員）否則嘅話，可能--可以就去到運房局局長嗰度做審裁，係咪呀？

23 陳美寶女士：（經傳譯員）係，係一路去到 9 月嗰度嗰個過程就係內部過程㗎嘅，就  
24 係要取得運房局局長嘅同意，我哋會提交所有路線嘅詳細計劃等等。

25 主席：（經傳譯員）所以我就個問題就係問你係咪已經過咗 9 月尾，你係咪已經同巴  
26 士公司達成協議呢？

27 陳美寶女士：（經傳譯員）9 月尾個日期已經過咗，喺今年，特別呢一年係因為有一  
28 系列嘅問題我哋向營辦商提出咗，所以我哋就預期佢哋就住嗰個安全章節就要  
29 提供一啲補充--即係要再補充一啲資料，再加強，所以而家佢哋係就住呢一個  
30 章節係制定最後嘅內容。

31 主席：（經傳譯員）即係今年你哋仲未達成協議，係咪？

- 1 陳美寶女士：（經傳譯員）係，未達成嘅。主席，有關嗰個法定條文，就係第 12A  
2 條，《公共巴士服務條例》第 12A 條。
- 3 主席：（經傳譯員）今年你哋預計幾時可以達成協議？
- 4 陳美寶女士：（經傳譯員）我哋希望儘早同佢哋達成協議。
- 5 主席：（經傳譯員）好明顯喇，但係有冇話一個大概幾時做得到呢？
- 6 陳美寶女士：（經傳譯員）或者可以提供個資料畀你哋，我哋最近同城巴同埋新巴都  
7 係就住佢哋遠期計劃開過會，我哋亦都係同九巴安排緊，同埋龍運安排緊會議  
8 係處理佢哋嘅遠期計劃，所以我哋係做緊各項工作，係儘可能儘早同佢哋達成  
9 協議。
- 10 主席：（經傳譯員）你講咗兩次喇，你係冇辦法畀到個日期，係咪？如果係真係咁，  
11 你就講，照講。
- 12 陳美寶女士：（經傳譯員）喺現階段，我唔可以提一個日期，但係我嘅目標就係希望  
13 儘早去達成協議，因為我哋亦都需要定到明年嗰個最後嗰啲巴士路線，亦都係  
14 而且要將有關資料發放畀公眾嘅。
- 15 主席：（經傳譯員）陳律師。
- 16 陳政龍先生：（經傳譯員）主席，為咗做紀錄，就係 12A 條，即係頭先陳女士所提  
17 嘅點就係喺 THB-2 文件夾 109 頁嘅。
- 18 主席：（經傳譯員）好，唔該。
- 19 陳政龍先生：（經傳譯員）好喇，講番較早之前主席嘅問題，你就係話你要求巴士營  
20 運商進一步提供細分資料關於嗰啲嘅意外成因嘅，喺 TD-5 文件夾 1729 至  
21 1730 頁其實就係頭先我哋啱啱睇嗰份文件，係 TD-5 文件夾 1729 頁。
- 22 1728 頁嗰封信件就係 2018 年 5 月嘅日期，然後嗰度底部，即係 1729 頁  
23 底部，你就要求九巴就住巴士意外就係做分析，然後下一頁，一個佢哋分析同  
24 非巴士司機相關因素嘅交通意外做分析，呢個係咪你嘅頭先提及嘅，頭先？
- 25 陳美寶女士：（經傳譯員）係，而喺 1730 頁其實都係有一個好長嘅清單，就話我哋  
26 要求公司去做嘅分析嘅，要佢哋提供呢啲資料嘅。
- 27 主席：（經傳譯員）喺 1729 頁底部，「要求你哋公司(a)」，然後第二，就係「分  
28 析有關意外嘅性質同埋成因，同埋解釋點解意外宗數增加嘅理由。」呢個係你  
29 要求佢哋做嘅，係咪呀？
- 30 陳美寶女士：（經傳譯員）係，冇錯。
- 31 主席：（經傳譯員）然後下一頁 1730 又進一步再要求，你可唔可以指出喺邊度就話  
32 繼續係有呢啲要求呢？如果搵到嘅，讀出嚟，唔該。

1 陳美寶女士：（經傳譯員）我哋就係希望公司提出進一步嘅分析，就係呢一個意外嘅  
2 成因，同埋佢哋有冇一啲相同嘅因素，想佢哋話畀我哋聽佢哋有啲咩嘢具有嘅  
3 建議嚟到去改善嘅，譬如話非碰撞式嘅意外，就係啲乘客跌嘅，到底佢哋喺邊  
4 度跌倒嘅呢？喺上層定係下層吖，定係喺樓梯呢？

5 主席：（經傳譯員）喺邊度寫出嚟呀？

6 陳美寶女士：（經傳譯員）我而家係舉個例...

7 主席：（經傳譯員）但係你未舉例之前，可唔可以讀出嗰個文本係支持你而家講嘅嘢  
8 呢？我哋有呢一句「你係要畀我哋一個分析係關乎意外嘅趨勢、成因同埋類  
9 型」，呢個就係喺 1729，下一頁嗰度係...

10 陳美寶女士：（經傳譯員）喺下一頁就係我哋繼續講落去，1730，我哋提到同安全  
11 相關嘅計劃，主席。我哋就話目標要去減低涉及巴士嘅意外，同埋係加強向乘  
12 客提供巴士服務個安全，你哋公司係要畀我哋有關嘅計劃或者建議去改善現時  
13 嘅監察制度或者係要新嘅監察制度係關乎巴士嘅安全同埋增加你哋公司員工個  
14 個意識，就係呢啲監察制度個結果同埋會有啲乜嘢嘅紀律行動或者係懲罰  
15 嘅，亦都要發展一個嘅計劃書，就係自動咁樣嚟到去監察到車長嘅駕駛行為，  
16 就係透過喺黑盒裏面或者類似嘅儀器裏面嘅一啲嘅資料，另外就係要有一啲嘅  
17 宣傳計劃嚟到係去嚟嚟緊兩年加強乘客嘅安全。

18 下一頁，1731 頁，我哋亦都希望佢哋嚟嚟緊嘅兩年提供一啲嘅計劃去加強  
19 車長嘅訓練，無論係兼職或者係全職嘅，亦都係希望佢哋--個工作小組嘅建議  
20 就係關於訓練個嘅框架，另外就係畀我哋一啲嘅計劃，嚟到去調查個用三  
21 點安全帶呢一個嘅有幾頻密嘅。我哋亦都要求佢哋係做一啲嘅調查或者係評  
22 估，去評估呢啲嘅安全帶個嘅使用狀況、有效程度等等。

23 主席：（經傳譯員）好，去番 1730 頁，喺頭個四行，就係要去分析一啲唔關乎個  
24 車長嘅造成意外個嘅因素，喺過去個五年，呢度有冇做過分析？有冇一啲係  
25 同車長相關嘅分析呢？譬如話佢哋車速太快，就嚟要去入站嘅時候，就係突然  
26 嚟到去剎掣，有冇呢一類型咁樣嘅分析？

27 陳美寶女士：（經傳譯員）主席，喺九巴方面，呢一度我哋有講到呢個程度話要佢詳  
28 細咁樣去分析車長嘅乜嘢駕駛行為係引致交通意外。但係我可唔可以舉個例  
29 呢？喺城巴方面，佢哋係更新緊黑盒個嘅規格嘅，佢哋將司機嘅一啲事件記  
30 錄低，即係譬如係有冇太過快嘅快速或者係減速。

31 主席：（經傳譯員）有一半嘅意外都係非碰撞式嘅，都係因為乘客失咗平衡，係咪  
32 呀？

33 陳美寶女士：（經傳譯員）係。

34 主席：（經傳譯員）我覺得毫無疑問，呢一個一定係佢哋係太快嘅突然間剎掣或者係  
35 加速或者係搖擺嘅或者係扭軚嘅，呢一方面，我就係想問你呢啲都係同意外嘅

1 成因有關，我就問你點解係有問到一啲關於呢啲意外嘅問題？有時就係啲司機  
2 揸車嘅時候就唔留心，有時佢就係刹掣刹得太急。

3 陳美寶女士：（經傳譯員）喺呢一封信，我哋畀九巴嘅時候，我哋冇去到咁細緻嘅。

4 主席：（經傳譯員）你城巴有冇呢？

5 陳美寶女士：（經傳譯員）我查一查喇。不過喺我哋最新嘅、起碼嘅，關於黑盒規格  
6 嘅要求，我哋就係規定佢要--如果係有一啲係過急嘅刹掣或者係踩油嘅時候，  
7 係要喺黑盒裏面係記錄到呢啲嘅事件嘅。或者我請我嘅助理署長話畀委員會聽  
8 喺呢一個嘅踩油嘅時候，佢哋公司係咪能夠搵得到係有突然刹掣或者係刹得太  
9 急或者係刹得太多嘅、太過份。

10 主席：（經傳譯員）係，唔該。你就喺 2018 年 8 月嘅時候關於係最基本嘅要求，話  
11 嗰個電子數據紀錄儀，係咪呀？

12 陳英傑先生：（經傳譯員）呢個係咪講緊最起碼嘅要求？

13 主席：（經傳譯員）講緊最起碼嘅要求先，然後再講到你期望達到最高嘅水準--水  
14 平，可以做到乜嘢呢？關於踩油同埋係刹掣嘅啲數據。係咪喺附件 2 呀？

15 陳政龍先生：（經傳譯員）為紀錄嘅原因，應該係工作小組嗰個嘅報告，係附件 2 嗰  
16 個嘅編碼係 1807，係 TD-5。

17 主席：（經傳譯員）但係唔係我哋一查文件度喎，冇編碼嘅--冇頁碼嘅。

18 陳英傑先生：（經傳譯員）嗰個電子數據紀錄儀嘅最起碼要求，我哋就平時叫佢做黑  
19 盒，呢個更新，我哋係對於嗰個嘅新嘅版本或者新嘅要求係有一啲更新嘅。

20 主席：（經傳譯員）我知道，到底如果我哋係關於係加速或者係刹掣方面喺邊度呀？

21 陳英傑先生：（經傳譯員）其實係 4(a)，「意外報告，就係當時嘅車速，係要去記  
22 錄到每秒鐘嘅時段，係要持續三分鐘，就喺呢個 0.4G 減速嘅呢啲嘅事件之  
23 前。」呢個就係話呢一個嘅儀器要起碼記錄到呢一類型嘅加速或者減速...

24 主席：（經傳譯員）但係呢個係減速，應該以前係 0.2 嘅，係咪呀？

25 陳英傑先生：（經傳譯員）唔係，係 0.4，自從一開始用，就已經係咁。

26 主席：（經傳譯員）點解係 0.4，減速 0.4 呢？係咪咁樣就係--咩嘢叫 0.4 呢？

27 陳英傑先生：（經傳譯員）0.4 係一個數字係我哋以前喺一個研究之後採納嘅。

28 主席：（經傳譯員）咩嘢意思呢？

29 陳英傑先生：（經傳譯員）就係話嗰個嘅力度，當你一踩落去嗰個刹車掣嘅時候，嗰  
30 個嘅地心吸力嘅，你會一個正常人所感受到嘅力。

- 1 主席：（經傳譯員）我明，...
- 2 陳英傑先生：（經傳譯員）擺喺 0.4，其實就係講緊嗰個係每秒鐘 9.81 米，即係  
3 0.4...
- 4 主席：（經傳譯員）咁咩意思呀？係咪對於一個嘅司機嚟講，咩意思呢？係咪話  
5 當喺嗰架車轆都有煙出嘅時候嚟到剎掣？
- 6 陳英傑先生：（經傳譯員）唔係，唔係。
- 7 主席：（經傳譯員）畀一個嘅例子我。
- 8 陳英傑先生：（經傳譯員）譬如話有一個嘅乘客坐喺車度，佢如果喺咁嘅減速，佢會  
9 係踎出嚟㗎喇，呢個就係一般一個剎掣力係大到咁樣嘅地步，就係能夠令一個  
10 坐喺椅上面嘅乘客就係跌落嚟嘅，呢一個係需要喺儀器裏面記錄得到嘅。
- 11 主席：（經傳譯員）即係係一個冇繫安全帶嘅乘客會係跌落嚟？
- 12 陳英傑先生：（經傳譯員）會跌出個座位--就更加技術性咁講，就係九成五嘅乘客如  
13 果喺咁--如果有戴安全帶，喺咁樣嘅減速力度，0.4 嘅話，就係會突然之間係  
14 跌出座位嘅。
- 15 主席：（經傳譯員）好，唔該。呢個就係話如果有咁樣類型嘅減速，你一定要係提供  
16 喺之前嗰三分鐘嗰個嘅車速，係咪呀？
- 17 陳英傑先生：（經傳譯員）呢個係一個嗰一刻嘅時間，但係我哋亦都需要知道喺呢一  
18 個事件發生之前嗰三秒--唔係，對唔住，係三分鐘嗰個係發生咩嘢事。
- 19 主席：（經傳譯員）第 2 項就係指到嗰度有提到剎車掣嘅，喺(c)嗰度，係咪呀？就  
20 係嗰個嘅儀器一定要係記錄到幾時係踩過剎車掣？
- 21 陳英傑先生：（經傳譯員）係喇，呢個應該係第 2，就係話可以記錄到每一秒時段嗰  
22 個嘅資料。
- 23 主席：（經傳譯員）係喇。
- 24 陳英傑先生：（經傳譯員）即係可以記錄到喺兩個星期嘅時段裏面係每三十秒嘅資料  
25 嗰啲數據可以喺嗰度，即係話呢個黑盒應該係可以係保持到呢啲資料完整。
- 26 主席：（經傳譯員）係，多謝你解釋，呢個就係最起碼嘅要求，但係你就話希望巴士  
27 公司係做高過你哋嘅最低要求嘅？
- 28 陳英傑先生：（經傳譯員）係，我哋嗰個制度希望就係話城巴同埋新一巴都係可以記  
29 錄所有呢啲嘅資料。
- 30 主席：（經傳譯員）乜嘢資料？
- 31 陳英傑先生：（經傳譯員）車速嘅資料。係可以係去記錄到嗰個嘅運作時間。

1 主席：（經傳譯員）你係講緊邊一份文件呀？

2 陳英傑先生：（經傳譯員）係呀，呢一份文件，係最低嘅起碼嘅要求，喺第 2 段，就  
3 係個車速、幾時剎車，呢個係可以喺螢幕上面睇得到。

4 主席：（經傳譯員）係。

5 陳英傑先生：（經傳譯員）譬如話嗰個巴士係去到車站嘅時候就開咗呢一個車尾嘅  
6 門，呢啲全部喺嗰個屏幕上都可以嘅。呢個係咪全球定位系統嗰個嘅協調...

7 主席：（經傳譯員）係有座標，係咪呀？

8 陳英傑先生：（經傳譯員）即係話巴士嗰個位置、到底有冇人揸過鐘，呢啲資料全部  
9 都係由巴士公司提供嘅。

10 主席：（經傳譯員）呢個係最起碼嘅要求，我就係問你，你希望嗰啲黑盒係做得更  
11 多，係咪呀？

12 陳英傑先生：（經傳譯員）其實黑盒係一個一般嘅即係講呢啲儀器嘅名嚟嘅啫，其實  
13 係呢一個嘅安裝喺巴士上面就係佢哋可以做唔同嘅功能嘅，喺巴士營運同埋車  
14 隊管理方面，嗰啲嘅參數就係如果你係講緊一架巴士係咪真係超速、嗰個車長  
15 駕駛係唔係合適、佢係踩呢個剎車掣係咪踩得太急、佢係咪用一個合適嘅態度  
16 嚟到去服務乘客、有冇人係會投訴，我哋都喺呢個嘅系統裏面係--譬如話嗰個  
17 司機係咪停喺嗰個車站度，有人揸鐘，佢就會係停車，呢啲全部都係可以睇得  
18 到嘅。而公司亦都係發展緊一啲嘅監察指標，睇下呢啲資訊應該點樣去記錄、  
19 佢哋點樣嚟到去分析。

20 主席：（經傳譯員）所有嘅資料都係記錄嘅，嗰個問題就係佢哋要分析同埋使用，巴  
21 士亦都係有呢個嘅閉路電視嚟到去睇住佢哋，嗰個問題就係係咪用緊，係咪用  
22 佢哋到去增加呢個安全？

23 喺呢個時候，我哋就休息二十分鐘。

24

25 上午 11 時 35 分聆訊押後

26

27 上午 11 時 55 分恢復聆訊

28 出席人士如前。

29

30 主席：（經傳譯員）陳先生。

31 陳美寶女士：（經傳譯員）主席，喺休息之前，就講到我哋有冇要求專營巴士公司...

- 1 主席：（經傳譯員）可唔可以對正個咪講嘢？唔該。
- 2 陳美寶女士：（經傳譯員）喺休息之前，你就要求我哋去提供一啲嘅證據去睇下我哋  
3 有冇要求專營巴士公司有冇去睇下某一啲嘅意外，包括係跌低或者係蹺低，我  
4 想講番 5 月 21 號嗰封信嘅。
- 5 主席：（經傳譯員）就係 TD-5 嘅 1728 頁。
- 6 陳美寶女士：（經傳譯員）係，唔該晒。係我哋封信嘅第 8 頁。
- 7 主席：（經傳譯員）就係 1729 頁嘅。
- 8 陳美寶女士：（經傳譯員）我想講最後個項目，就係「分析涉及九巴嘅交通意外」，  
9 我哋要求佢哋分析喺 2017 年涉及九巴嘅交通意外，同埋亦都分析 15 同埋 16  
10 年嘅情況，就係喺附錄 E(i) 嘅，我想睇番附錄 E(i)。
- 11 主席：（經傳譯員）喺邊一頁呢？
- 12 陳美寶女士：（經傳譯員）唔好意思，主席，文件冊入面就有呢個附錄，附錄...
- 13 主席：（經傳譯員）文件冊入面有嘅嘢就係由九巴或者係運輸署提供嘅。如果你有附  
14 錄 E(i)，可唔可以畀一份我哋呢，而家？
- 15 陳美寶女士：Yes. Should I...
- 16 主席：（經傳譯員）或者有人可以係從你手中攞一份呢個附錄，然後畀一份我哋呢。
- 17 陳美寶女士：（經傳譯員）唔好意思，主席。
- 18 主席：（經傳譯員）或者你可以一陣間再講呢個問題。
- 19 主席：（經傳譯員）陳大律師，你有冇其他問題想問呢？
- 20 陳政龍先生：（經傳譯員）我就想跟進其中一點，就係運輸署陳先生同埋主席之間嘅  
21 對話，即係關於呢個黑盒嘅要求。主席，我想你睇一睇 2018 年最新嘅黑盒嘅要  
22 求，就係休息之前我哋講到嘅，就係工作小組報告，你有冇呢份文件，主席？
- 23 陳英傑先生：Yes. May I -- sorry.
- 24 主席：（經傳譯員）或者畀陳大律師問埋佢嘅問題先。
- 25 陳英傑先生：（經傳譯員）我就先講一點嘅，喺休息之前，我就回應主席，就講到  
26 4(a) 段，就係 0.4G 嘅減速率有冇改變過...
- 27 主席：（經傳譯員）我諗陳大律師就係想同你講呢一點。
- 28 陳英傑先生：（經傳譯員）呢一個就係 2003 年嘅版本，就係由 0.2 去到 0.4 嘅。
- 29 主席：（經傳譯員）即係話呢一個減速嗰個上限就係由 0.2 就去到 0.4，係咪？

1 陳英傑先生：That's right. Yes.

2 主席：（經傳譯員）喺 0.4 嘅減速率之下，百分之九十五嘅乘客都會喺個座位度跌  
3 出嚟。

4 陳英傑先生：Yes, the chance of 95 per cent...

5 主席：（經傳譯員）如果係 0.2G 嘅減速率又點呢？有幾多人會跌出嚟呢？

6 陳英傑先生：（經傳譯員）呢一個嘅上限就係好耐之前採用嚟喇，...

7 主席：（經傳譯員）如果係 0.2G 嘅減速率底下，有幾多乘客會跌出嚟，你答唔答到  
8 呢？

9 陳英傑先生：I don't have the answer. I cannot answer.

10 主席：（經傳譯員）或者你可唔可以答呢個問題呢，點解由 0.2G 轉咗去 0.4G 呢？

11 陳英傑先生：（經傳譯員）喺 2006 年，我哋同巴士公司討論呢一個規格嘅時候，當  
12 我哋會面嘅時候，我哋評估咗呢項嘅要求，我哋發現 0.2G 只係好輕微嘅減速，  
13 係會經常出現嘅，亦都係對於監察嚟講，冇意義嘅，當時我哋同巴士公司會  
14 面，亦都同意咗就將 0.2G 轉去 0.4G，不幸地，當時--即係喺呢個規格入面就  
15 冇更新呢個相關嘅數字嘅，所以今次我哋就更新咗呢個數字。

16 主席：（經傳譯員）即係過咗十二年之後先做，係咪呀？即係用成十二年先去更新呢  
17 個數字？

18 陳英傑先生：（經傳譯員）我諗呢個工作應該係會早啲做嘅。

19 主席：（經傳譯員）你有冇 2006 年呢一個會議嘅紀錄呢？

20 陳英傑先生：Yes, I think we have notes of meeting too.

21 主席：（經傳譯員）你可唔可以向委員會提供呀？

22 陳英傑先生：Yes.

23 主席：（經傳譯員）唔該晒。陳律師，頭先打斷咗你，或者你可唔可以講番 2003 個  
24 個最低要求嗰個文件紀錄？

25 陳政龍先生：（經傳譯員）就係 TD-5 文件夾 1598 頁。

26 主席：（經傳譯員）或者係擺上螢幕喇。係喇，呢度有喇，3(a)。你頭先提及百分  
27 之九十五嘅人坐喺位都會跌咗落嚟，即係話如果係用 0.4G 嘅減速衝力嘅話，呢  
28 個係咪有人做過一個研究㗎？

29 陳英傑先生：（經傳譯員）從我哋嘅搜尋，就喺 1997 年嘅時候，運輸署做一個研究  
30 發現嘅。

1 主席：（經傳譯員）有冇有關嘅文件？

2 陳英傑先生：（經傳譯員）我哋可以遲啲畀你。

3 陳政龍先生：（經傳譯員）你所講嘅研究包唔包括埋如果企喺度嘅乘客會企唔穩呢？  
4 即係嗰個數字係幾--呢度有冇呢？即係關於 0.2 同 0.4G。

5 陳英傑先生：（經傳譯員）有關於站立嘅乘客，恐怕就有提及嘅，因為坐喺度嘅乘  
6 客，佢係有個正式嘅位坐喺度，就可以容易啲去界定，但係企喺度嘅乘客，係  
7 另一回事嚟嘅，因為啲人點樣企法我哋就唔可以控制到嘅，亦都有話既定用咩  
8 嘢方法企嘅，所以我哋就有相關嘅減速衝力嘅，係針對站立嘅乘客嘅。

9 主席：（經傳譯員）或者我哋可以用常識，你哋都係應該--佢哋應該都會跌晒落地，  
10 係咪？

11 陳英傑先生：（經傳譯員）可以係，可以唔係，因為好視乎佢哋點樣企法，喺巴士裏  
12 面，我哋其實有訂明話巴士有啲咩嘢設施可以幫到嗰啲站立嘅乘客，譬如佢係  
13 扶住一條柱--一支杆等等，如果佢哋企得好穩陣，未必係咁大機會會跌落地  
14 嘅，但係當然有啲人佢上咗巴士，可能手拎住啲嘢，然後巴士行嗰陣時候行嚟  
15 行去咁又另一回事喇。

16 主席：（經傳譯員）陳律師。

17 陳政龍先生：（經傳譯員）啱啱我收到一份文件，就係你頭先想提嗰份文件，陳女  
18 士，就係附錄 E(i)，係咪？

19 陳美寶女士：（經傳譯員）係，主席。呢個就係附件 E(i)，就係我哋夾附畀九巴同  
20 埋其他專營巴士公司嘅信件嗰度嘅，喺呢度，我哋就想佢哋分類，將導致巴士  
21 意外嘅原因嘅分類，呢度就係比較有幾多巴士車長係牽涉喺嗰三年期嘅交通意  
22 外裏面嘅，我哋就將佢因素就拆開嚟，就列咗喺嗰個表度。

23 喺第二項就係同巴士車長有關嘅因素，同埋因為呢啲係講話唔同意外嗰個  
24 性質，呢度有個描述嘅，就係講話譬如一開始嘅時候，佢係大意咁樣開車等  
25 等，例如作為一個例子，然後我哋同巴士公司傾過之後，巴士公司就係佢哋嘅-  
26 -而家會喺嗰個安全章節嗰度就會詳細講述每一類呢啲意外嘅成因。

27 譬如如果話講到話巴士車長大意咁停車或者開車，呢啲嘅安全因素都會喺  
28 個安全章節嗰度最後訂明嘅，而譬如好似九巴，就會將佢交通意外數字分類，  
29 就話譬如話喺停車畀乘客上落車或者係離開巴士站嘅時候嗰啲嘅情況，所以就  
30 將嗰啲交通意外就分咗咁多個細類，就係唔同情況嘅時候所發生嘅。

31 如果特別講話係踩剎車掣呢一點，就有特別具體咁提及嘅，因為呢個係一  
32 個可以話係一個起始嘅一個參考水平嚟嘅，但係我哋預計佢哋喺嗰個安全章  
33 節就會好詳細咁講出各個意外嘅成因係咪話佢突然間剎車或者係喺巴士站開車  
34 出嚟嘅時候等等。

- 1 主席：（經傳譯員）呢啲數據係嚟自邊度㗎？
- 2 陳美寶女士：（經傳譯員）呢啲數據就係根據過往嘅交通意外統計數字，就係之前嘅  
3 各間巴士公司嗰個安全章節裏面有提及嘅。
- 4 主席：（經傳譯員）即係話呢個就係由運輸署將啲數據組合起上嚟，係咪？即係呢  
5 個表只係得一頁嘅之嘛。
- 6 陳美寶女士：（經傳譯員）或者我哋嘅總工程師邱生可以幫一幫手。
- 7 邱國鼎先生：（經傳譯員）係，我哋呢啲數據係從警方嘅交通意外調查組嗰度攞番嚟  
8 嘅。
- 9 主席：（經傳譯員）係警方呀？但係呢份文件係運輸署提供嘅，係咪呀？
- 10 邱國鼎先生：（經傳譯員）係，係佢哋運輸署做出嚟嘅。
- 11 主席：（經傳譯員）呢啲警察嘅統計數字叫做乜嘢㗎？
- 12 邱國鼎先生：（經傳譯員）個名稱係...
- 13 主席：（經傳譯員）請你可唔可以近啲個咪講嘢？
- 14 邱國鼎先生：（經傳譯員）因為佢哋而家轉緊一個新嘅系統，所以有個新嘅名，嗰個  
15 系統就係「事故個案管理系統」。
- 16 主席：（經傳譯員）CMIS，係咪呀？即係佢哋用個縮寫，CMIS。
- 17 邱國鼎先生：Yes.
- 18 主席：（經傳譯員）因為我哋聽過警方作供嘅。你哋係可以用到佢哋個數據庫嘅，係  
19 咪？
- 20 邱國鼎先生：（經傳譯員）係。
- 21 主席：（經傳譯員）有冇睇過警方唔係幾耐之前向我哋作供嗰個證供謄本呀？
- 22 邱國鼎先生：（經傳譯員）冇，我哋只係可以接觸呢啲數據。
- 23 陳美寶女士：The transcript, police transcript.
- 24 邱國鼎先生：（經傳譯員）有，有，有睇過。
- 25 主席：（經傳譯員）你係咪--你都知道警方話過畀你聽佢哋有個範本嘅，係有六十個  
26 成因，即係話警員如果佢調查交通意外嘅時候，就有呢個範本，有六十個成  
27 因，佢哋就剔每一個成因，然後就將啲資料輸入去電腦，然後就會有高層嘅  
28 人就會檢視呢啲嘅資料，所以嗰個資料係咁嚟嘅，即係由警方嗰度。
- 29 邱國鼎先生：（經傳譯員）係，其實佢哋有個表，而家顯示啲因素都係其實警方所

1 提及嘅因素嚟嘅，即是喺佢哋將呢啲嘅數據輸入去電腦嘅時候，佢哋就會揀係  
2 邊啲因素導致個交通意外嘅。

3 主席：（經傳譯員）陳律師。

4 陳政龍先生：（經傳譯員）或者我返番去轉頭，講一個比較概念性嘅問題，就係話係  
5 安全表現指標，因為喺小休之前我哋都有傾緊嘅。

6 主席：（經傳譯員）或者係喺你咁做之前，可唔可以先問一問陳女士，呢封信係你寫  
7 畀九巴嘅，我睇嘅係 1729 頁，喺嗰度，我哋就搵到附件 E(i)，嗰度信件其實  
8 冇提及呢啲數據嘅來源嘅，係咪？

9 陳美寶女士：（經傳譯員）冇嘅。

10 主席：（經傳譯員）有冇咩嘢特別理由點解你唔話畀九巴聽呢啲數據係邊度嚟嘅呢？

11 陳美寶女士：（經傳譯員）或者我解釋一下，因為我哋一般個做法都係用警方關於譬  
12 如交通意外數字嘅數據庫同埋佢哋嘅分析等等，因為其實只係有警方會話將啲  
13 意外分類，我哋運輸署有嘅，所以呢啲關於 2015、16、17 年所制定嘅交通意  
14 外嘅數據都係咁樣嚟嘅。

15 其實我哋之後都會係會向巴士公司做一個講解嘅，就會講我哋要求佢哋做  
16 啲乜，如果喺做嗰個簡介會嘅時候，我哋就向佢解釋我哋預計--希望佢哋提交  
17 啲數據要有幾細緻，我哋就有嗰個討論嘅紀錄，但係好明顯呢個都係巴士公  
18 司一般都知道，就係話我哋其實係用警方所管理嘅數據庫，而運輸署係有權用  
19 嘅，純粹係咁。

20 主席：（經傳譯員）好。

21 陳政龍先生：（經傳譯員）主席，或者我返番去講安全表現指標嘅問題，從你哋嘅證  
22 供，似乎你係唔同意用一個安全表現指標，為咗確保我嘅理解正確，我就想請  
23 你睇 Stanley 教授嘅供詞裏面有兩段，等我哋好清晰知道我哋大家講緊乜嘢，  
24 唔會有含糊或者混淆。

25 好，而家睇番第 16 日聽證會嘅證供謄本，即係 2018 年 9 月 15 號，61  
26 頁，謄本 61 頁，61 頁，第 21 行，我由嗰個問題開始。

27 主席問「仲有乜嘢其他方法我哋可以量度安全呢？」而 Stanley 教授就話  
28 「我覺得意外率係一個好嘅起點，如果你睇番喺嗰五年遠期計劃裏面嘅安全計  
29 劃裏面提及嘅一啲嘅數據，譬如話係碰撞式，有導致死亡嘅意外，有碰撞嘅意  
30 外，滑到、絆倒、跌倒嘅意外等等，你可以沿住呢個去再制定一啲關於安全嘅  
31 鼓勵措施或者係罰則。如果你唔用嗰個整體嗰個意外牽涉率，你睇嗰個死亡率  
32 同埋睇下滑到、絆倒、跌倒嘅意外等等，你就可以形成一種睇法。我就覺得呢  
33 個係相對係重要嘅。

34 就如果佢哋加埋晒所有呢啲，話一宗事故都係一宗事故，你其實就睇唔到

1 嗰啲細節嘅，所以我就會將佢再拆分一啲嚟睇，就睇下啲主要安全關注嘅地  
2 方。同埋確保主要表現指標係同呢啲相關嘅，而你鼓勵或者罰則都係同呢啲有  
3 關嘅。我唔知道嗰查裏面係有幾多嘅元素，我諗就需要由政府同埋營辦商去討  
4 論、去協商。

5 又我哋或者可以睇番乜嘢係主要影響安全問題嘅因素，然後由嗰度做一個  
6 起點。」

7 然後就請你睇第 72 頁，係同一份謄本，18 行，Stanley 教授就話「每  
8 100 萬行車公里意外率，就我覺得係一個誤導，而且係太過粗疏嘅一個指標嚟  
9 嘅。」

10 跟住我就問「你係咪需要一個更加細緻嘅指標或者一組嘅指標？」  
11 Stanley 教授話「絕對係需要嘅，你需要一套好細緻嘅指標，呢啲都係成個指  
12 標嘅一部分，能夠反映到，由於作為一個經濟學家，我就會話嗰啲唔同意外嘅  
13 一個成本係乜嘢，就可以咁樣去量度，我相信肯定你哋香港都會咁樣去量度  
14 嘅。譬如話係典型嘅導致死亡嘅意外係有一個數值，其他輕微啲嘅意外又有一  
15 個數值，就可以當佢係一個加權咁樣嚟睇嘅。當然仲有其他嘅因素可能你都想  
16 包括埋係其中。」

17 所以從你今朝早作供，你就話你係唔同意用呢個方法嚟去量度安全，啱唔  
18 啱？

19 陳美寶女士：（經傳譯員）或者我可唔可以再詳細啲解釋我哋嘅立場或者觀察？喺小  
20 休之前，你就問過我係咪同意 Stanley 教授嗰個講法，就話主要表現指標就唔  
21 可以係唯一個指標去量度安全，我就話唔同意，我就話只不過係需要有一個起  
22 點，一個參考點。

23 主席：（經傳譯員）唔係，其實早啲時候，你係唔同意就話主要表現指標如果係巴士  
24 公司唔可以控制嘅，就唔相關嘅，我諗我哋講嘅呢個問題，就係主要表現指標  
25 係咪控制得到，呢個就係 Stanley 教授嘅睇法。

26 陳美寶女士：（經傳譯員）我諗講到話安全因素，譬如講話有幾多宗意外，喺某程度  
27 上，就唔係話巴士公司完全可以控制到嘅，但係我哋覺得用一個咁嘅指標仍然  
28 都係可以幫到我哋去量度個安全表現嘅。而另一方面，我提到話一宗意外可能  
29 係好多因素造成嘅，如果我哋用一啲好具體嘅指標，例如話牽涉到巴士車長嘅  
30 意外宗數，可能係因為佢大力剎車，即係某啲情形之下，如果淨係咁樣睇，又  
31 再深入啲去調查當時係咩嘢情況嘅話，呢一類咁嘅指標就未必可以係完全顯示  
32 到佢係完全由巴士司機造成嘅意外嘅。

33 譬如可能話巴士公司去睇番嗰啲閉路電視嘅錄影帶，又有個黑盒有紀錄，  
34 就睇到巴士司機急劇剎車咁樣，可能都仲要睇埋譬如話閉路電視有啲其他嘅數  
35 據，就顯示可能係牽涉一啲外在嘅因素，係巴士司機或者係巴士公司有辦法控  
36 制嘅，可能巴士司機係要作一個艱難嘅決策，到底係咪要大力剎車，避免同其

1 他車相撞，或者係撞到一個路人咁樣，而當--因為佢大力剎車可能都導致啲乘  
2 客企唔穩等等。所以好難話我哋做到一個好簡單單一嘅一個指標去量度巴士公  
3 司嘅安全表現嘅。

4 Stanley 教授建議話用一個加權嘅意外率，可能喺呢一方面，我哋可以進  
5 一步去探討同討論，但係我哋需要有一個起點，一個參考點嘅。而講到話有幾  
6 多宗交通意外，幾多交通意外牽涉到巴士嘅行車里數嘅話，其實變咗我哋可以  
7 有一個比較嘅基礎，係按年咁去做比較，而我哋亦都可以--譬如話從咁，我哋  
8 可以睇到係咪話個意外率增加，即係 2017 年相對於 2016 年係增加咗，而且亦  
9 都係超越咗佢哋個目標意外率嘅，呢個目標就係由巴士公司自己定嘅。咁亦  
10 都能夠達到我哋嘅希望做到，就係我哋有啲咩嘢方法可以按年咁去減低個意  
11 外率或者宗數，呢個就係佢哋可以提供嘅資料嚟嘅。

12 陳政龍先生：（經傳譯員）Stanley 教授嘅建議就係話用呢一個嘅方法係太過粗  
13 疏，可能有誤導性嘅，你有咩嘢睇法？

14 陳美寶女士：（經傳譯員）我諗我已經答咗呢個問題㗎喇。

15 陳政龍先生：（經傳譯員）好，唔該。好，而家就睇一睇倫敦點樣做，倫敦而家嘅狀  
16 況。陳女士，就想請你睇一段 Weston 先生講到倫敦個做法嘅報告書，我就  
17 會喺佢嘅口供個度擺一小段嘅文字嚟讀出嚟，就喺佢嘅專家嘅報告，仲有就係  
18 講到倫敦方面嘅證供，我會讀咗出嚟先，然後請你係畀下你嘅睇法嘅。

19 首先，Weston 先生嘅報告就係專家文件 150 頁，7.8 段，Weston 先生  
20 嘅報告，我讀喇，喺「TFL 安全表現指標」，Weston 先生就話「係作為佢哋倫  
21 敦運輸個嘅巴士安全計劃，佢哋有一個安全表現指標，個做法就係基於鐵  
22 路業個嘅做法嘅，佢哋就係會監察一籃子嘅措施，包括一啲意外嘅數據同埋  
23 一啲可以觀察出嚟嘅措施嘅一啲嘅表現，佢個個整體嘅數字就係 80 嘅，將來嘅  
24 表現就係根據呢一個嘅基準 80 嚟到去比較，就係睇下到底有改善抑或係惡化  
25 嘅，呢個制度唔係要去比較巴士與巴士公司之間，反而係睇一間個別公司個  
26 嘅趨勢。」Weston 先生嘅報告就係咁。

27 主席：（經傳譯員）呢個重要嘅就係話要去強調安全表現指標係要嚟發展用喺一個嘅  
28 巴士安全計劃個度，而呢一個巴士安全計劃就係會喺 10 月 16 號嘅時候公布，  
29 呢個係一個新嘅制度？

30 陳美寶女士：（經傳譯員）係，我明白嘅，我哋同倫敦嘅運輸署都係有一啲聯絡。

31 主席：（經傳譯員）可唔可以對住個咪講大聲啲？

32 陳美寶女士：（經傳譯員）係，我哋同倫敦個嘅運輸嘅局係有一啲嘅聯絡。我哋就  
33 係想睇下有冇一個有效嘅量度就係關於巴士同埋鐵路業個安全表現。唔該。

34 陳政龍先生：（經傳譯員）而家想請你睇下 Weston 先生喺同一個報告嘅睇法，就係  
35 喺 2018 年呢一個嘅係 9 月 27 號，第 18 日嘅研訊講嘅。喺 51 頁尾個度，第

1           23 行，你睇到鄧先生係一個嘅文件嘅。

2   主席：（經傳譯員）我哋而家仲未睇到。得喇，睇到喇。

3   陳政龍先生：（經傳譯員）就係鄧大律師就係問 Weston 先生，佢話「可唔可以去睇  
4   你報告 150 頁？」我就想去第 52 頁第 4 行，鄧先生就問「係咪有一個安全表  
5   現指標已經係——即係有指稱過，但係未公布嘅？」

6           「係呀，就話呢個就係一個嘅建議，呢一個倫敦運輸局係做緊嘅，巴士營  
7   運商係向我哋 8 月嘅時候解釋過，就係牽涉埋落去嘅有四十一個嘅措施，係呢  
8   一個嘅安全表現分數嗰度就可以有不同嘅加權，可以包埋係一啲死亡或者嚴重  
9   受傷嘅數字，可能係滑倒、絆倒或者係跌倒呀咁樣嘅。

10           佢哋目標就係要去監察一個營辦商嗰個嘅趨勢，就係根據呢個 80 呢一個嘅  
11   基準，佢係經過加權，加權落去成個籃子嘅指標裏面。就係話唔單只話有一宗  
12   致命意外咁簡單，就係話呢個可能唔關嗰個巴士公司嘅事嘅，呢個就唔會令到  
13   佢個分數大大咁降低嘅，我哋係想監察呢間公司入面嘅趨勢，就唔係要佢嚟去  
14   同其他嘅公司去比較。我覺得咁樣做未必係幫到佢改善嘅，只不過係一個認  
15   可，就話你而家呢間公司係做得好咗、安全咗。如果譬如嗰個基準係 80，你就  
16   係基於呢個 80 嘅標準嚟到去改善嘅。嗰個目標就係喺適時就係會向公眾公布，  
17   不過而家仲未嘅。」

18           最後，請你睇下倫敦係交通局佢哋嗰個公布嘅一份嘅文件，係關於同一個  
19   事項嘅，請你睇雜項文件 3 第 1194 頁，或者由 1189 頁開始講，係呢一份文件  
20   嘅第一頁。

21           陳女士，嗰份嘅文件就係呢一個巴士安全計劃嘅最新情況，呢個就係呢個  
22   倫敦嘅交通局係應佢哋嗰個嘅有關嘅委員會要求係提交嘅一個報告。

23   主席：（經傳譯員）呢個係 2017 年 11 月？

24   陳政龍先生：（經傳譯員）冇錯。想搵番個日子。無論如何，陳女士，請你睇 1194  
25   頁，個標題就係合約同埋呢一個嘅表現管理。

26           喺引言嗰度話「我哋用一系列嘅數據去評估一個營辦商係咪能夠提供一個  
27   安全嘅服務嘅，作為巴士安全計劃嘅一部分，我哋考慮緊一啲方法去改善呢個  
28   程序同埋係更加可以係著重獎勵安全同埋係合約嘅管理嘅。

29           我哋考慮過一系列嘅方法之後，我哋而家決定有一個營辦商安全表現指  
30   標，呢個叫 SPI，係基於呢一個消費物價指數嘅同一個原則，喺一個嘅綜合嘅  
31   措施，係有一籃子嘅指標嚟到係得到一個單一嘅表現指數。呢個係因為我哋喺  
32   2017 年係引入咗呢一個巴士網絡嘅安全表現指標，都係好成功，會有八十一個  
33   相關嘅指標，而呢一個指數係四十一個指標，係包括一啲係意外衍生嘅數據同  
34   埋一啲行為方面嘅觀察，包括係員工同埋呢個顧客安全、網絡安全、呢個風險  
35   管理、駕駛嘅水平、工程嘅情況等等。每一個營辦商嗰個表現都係會根據佢自

己個個嘅表現嘅指標做一個追蹤，嚟到去鼓勵持續嘅改善。」

陳小姐，我嘅問題就係...

主席：（經傳譯員）你而家係咪會去講“Driven to distraction”，呢個係大倫敦議會佢哋啲一份嘅文件？

陳政龍先生：（經傳譯員）係，我會一陣間係講一講話「提供誘因」呢一點嘅，咁...

主席：（經傳譯員）係呀，呢個係回應呢一個大倫敦議會佢哋呢一方面嘅要求嘅。你可以用你嘅方法去做，但係我覺得個個就係背景，呢個係倫敦嘅運輸局個個嘅回應，亦都係有人對佢呢個做法有一啲嘅批評嘅。

陳美寶女士：（經傳譯員）係。

陳政龍先生：（經傳譯員）我一陣間會講番呢一度，因為呢一份文件我好快就會講到㗎喇。陳女士，我唔係話我哋要照抄呢四十一個倫敦用嘅因素，我係更加概念性嚟講，我哋會唔會都係想有一籃子嘅措施，畀我哋一個整體嘅安全表現指標，我哋可以一路監察，亦都係去量度巴士營辦商個個嘅進展嘅，亦都鼓勵佢哋係根據呢啲嘅措施一路去改善嘅，你有啲咩嘢嘅評論？

陳美寶女士：（經傳譯員）多謝主席同埋陳生係去向我哋提出倫敦運輸局個個嘅措施嘅，其實我哋都知道佢哋呢啲最新嘅發展，其實係 2017 年 11 月㗎喇，我哋已經安排咗我哋嘅職員去探訪佢哋嘅部門，其實之前已經係計劃咗，去認識多啲佢哋關於道路安全同埋公共交通安全計劃嘅一啲計劃。

我諗佢哋嘅措施簡單嚟講就係要有一個好概念性嘅做法，就係去考慮到一籃子嘅因素去評估巴士營辦商個安全表現，我覺得應該係有一個嘅表現指標嘅，起碼有一個指標等我哋去評估呢間巴士公司係咪安全。話雖如此，我覺得我哋應該要向住呢個方向發展，我哋要有好幾個相關嘅因素，然後要有一個單一嘅指數或者指標，呢一個範疇我哋可以再探究、研究嘅。

工作小組嘅建議就係話想有一個全面嘅巴士車隊嘅監察同埋管控計劃，我哋而家係想叫巴士公司係安裝晒所有相關嘅儀器，而提供實時嘅監察去睇住車長個個嘅駕駛態度，係睇住佢一啲主要嘅事宜，好似話剎車、係咪急劇嘅剎車、加速同埋個個黑盒個個紀錄。另外我哋亦都係期望巴士營辦商係跟住個個嘅訓練框架，呢啲係一系列嘅因素我哋會考慮，嚟到去發展一個更加精確嘅表現指標，嚟到關於巴士嘅安全嘅。

呢啲我哋都係有興趣係會繼續，仲有其他嘅建議同埋一啲嘅發展，就係關於巴士嘅用儀器嚟到實時監察巴士嘅運作，同埋車長個個嘅態度，我諗呢個係畀我哋更堅實嘅基礎嚟到去繼續探究，就同巴士公司方面去研究，我覺得呢個都係實務嘅，呢個係一個更加係進深嘅一個方法，我諗我哋都係好想喺呢方面研究嘅。

1 主席：（經傳譯員）你估大概要幾時先至可以搵到相關嘅因素，有一個單一嘅或者係  
2 簡單嘅表現指數呢？

3 陳美寶女士：（經傳譯員）喺呢個時候，我講唔實，但係我係運輸署署長，我哋亦都  
4 係諗住去拜訪倫敦嘅運輸局，我哋會同佢哋討論下成個安全表現指標嗰個嘅理  
5 念，我諗大概嚟講，應該一年內，我哋會有一啲初步嘅諗法嘅，唔該。

6 主席：（經傳譯員）你係咪已經同專營嘅巴士營運者係傾過嘅呢？

7 陳美寶女士：（經傳譯員）我未嘅，但係話去發展一啲嘅主要表現指標，喺訓練方面  
8 嘅，同埋係實時嘅黑盒嘅監察功能同埋其他係協助到車長嘅一啲儀器，我已經  
9 係跟進緊㗎喇，同我哋嘅工作小組。喺我開場白嗰度話我哋根據經驗，同埋喺  
10 呢一個嘅檢討小組裏面嘅一啲建議，運輸署都覺得工作小組係一個好有用嘅一  
11 個制度，我哋會繼續用嗰個機制將所有相關嘅各方就係坐埋一齊，我哋就會睇  
12 下點樣用一啲係有用嘅措施嚟到去改善安全表現呢個問題。

13 主席：（經傳譯員）你用咗「場合」呢個字幾次，你係咪即係聽到或者個心係咪諗住  
14 Weston 先生就話呢個工作小組應該係一個常設嘅委員會，一個嘅巴士營運嘅機  
15 制，係咪咁呢？

16 陳美寶女士：（經傳譯員）我都係睇到專家嘅證供係有用“forum”，即係營辦商嘅  
17 “forum”呢個字，我會叫佢係一個工作小組，其實佢嗰個嘅性質同埋嘅工作範  
18 疇都係差唔多嘅。

19 主席：（經傳譯員）嗰個更加具體嘅問題，你而家心裏面係咪諗住將呢個成為一個永  
20 久嘅委員會或者機制，就唔係一個工作小組嘅，係會有定期會議，係咪呀？

21 陳美寶女士：（經傳譯員）呢個係一個永久嘅小組，會定期咁開會。

22 主席：（經傳譯員）咁即係有啲似倫敦而家嘅巴士營辦商大會咁，係咪呀？

23 陳美寶女士：（經傳譯員）類似喇。

24 主席：（經傳譯員）Weston 先生亦都係建議我哋嚟香港採納嘅，你係咪接受佢呢個  
25 建議呢？

26 陳美寶女士：（經傳譯員）係嘅。多謝主席。

27 陳政龍先生：（經傳譯員）陳女士，呢一方面就係要有一啲合併嘅，比較係精準嘅安  
28 全表現指標，而另外一方面就係話要用一啲嘅誘因或者係賞罰嚟到擺落你嗰個  
29 嘅營辦協議嗰度，即係佢哋能唔能夠達標就係可以有賞罰嘅，呢一點我想同你  
30 係探討一下。我想請你睇倫敦議會交通委員會嘅一份文件，呢個主席正話係講  
31 到嘅就係雜項文件 3，係第 1134 頁，大家睇到，個日期係 2017 年 7 月嘅，我  
32 而家想集中睇嗰個概念就係話唔達到某啲嘅目標嘅時候就係有一啲賞或者罰  
33 嘅，係 1151 頁，呢一份報告書--唔好，由 1150 頁開始，等我哋知道個背景。

1 呢度會係「制定安全目標」，第 2.2 段，「受傷同埋一啲嘅碰撞目標係可  
2 以要嚟作為一啲嘅指標去改善倫敦嘅巴士安全紀錄嘅，呢個有好清晰嘅角色，  
3 係好多--無論係公營或者係私營嘅服務都係可以改善佢哋嘅表現。我哋相信可  
4 以用一個類似嘅方式嚟到係將安全表現係同呢啲巴士營辦商個個利潤連結起  
5 嚟，就係亦都係直接影響佢哋高層管理員個個嘅薪酬嘅。」

6 喺 2.3 段，「倫敦運輸局就係向我哋表示佢係有意引入一啲巴士安全嘅目  
7 標，但係就有計劃--冇跡象顯示佢哋係呢啲係會同一啲金錢嘅獎勵係拉上關係  
8 嘅。喺 16 年 11 月，倫敦運輸局嘅安全可持續性同埋人力資源小組就係被要求  
9 係去決定 2017/18 年嘅巴士乘客主要嘅受傷數字嘅目標，而倫敦運輸局亦都同  
10 我哋講喺 2 月有同我哋作出一個匯報嘅。」

11 我想講 2.6 段，「之前倫敦運輸局係解釋點解冇向巴士公司定立一啲安全  
12 嘅目標，佢就表示『安全就有直接同一啲金錢或者一啲扣減係相關，因為佢哋  
13 係唔想有帶出一個訊息就係營運嘅安全就係一個可以協商嘅一個代價嚟嘅。』

14 我哋明白倫敦運輸局嘅睇法，但係我哋就並唔同意嘅，營運公司係會根據  
15 一啲獎賞係去行事，特別一啲財務上嘅獎賞，而佢哋嘅股東亦都係有相同嘅期  
16 望嘅。如果唔將安全納入一啲合約嘅支付架構，就倫敦運輸局就唔能夠鼓勵營  
17 運商係去承諾一啲安全嘅表現。」

18 喺 2.7 段就講到「如果倫敦運輸局係想減少呢一個意外或者受傷同埋碰撞  
19 率，佢必須要向呢一個巴士公司引入一啲有意義嘅獎賞，令到佢哋提供更加安  
20 全嘅服務。而倫敦嘅市民亦都係同意我哋嘅做法嘅，我哋訪問嘅一千六百名倫  
21 敦市民之中，百分之八十八同意倫敦運輸局係必須要就住呢一啲安全同埋及時  
22 嘅表現係提供一啲獎賞嘅。」

23 陳美寶女士：（經傳譯員）首先我認為呢個唔係一個簡單嘅議題嚟嘅，因為呢個就係  
24 涉及就將呢一個安全嘅表現同埋巴士公司嘅財務誘因係去掛鈎。喺倫敦嘅情況  
25 下，我哋知道倫敦就引入咗一個叫“MOM”嘅模式，就住佢哋嘅巴士公司。

26 至於安全表現可唔可以比巴士公司嘅獎賞或者係懲罰有關呢？呢個係喺香  
27 港係有好大嘅討論空間，亦都係涉及究竟巴士公司係咪以一個專營權嘅方式去  
28 經營，我哋首先要睇下我哋係咪用緊同一個模式；第二，喺我哋現有嘅機制  
29 下，我哋係有一個法定嘅框架，如果專營巴士公司無法係提供適當同埋有效率  
30 嘅服務，我哋係可以向行政長官係提出係對佢哋進行財務上嘅懲處嘅。

31 喺香港嘅情況之下，如果我哋日後係引入一個更加複雜嘅安全表現指標，  
32 就可以令到我哋更加有效咁樣向行政會議係提出係懲處一啲無法去滿足安全要  
33 求嘅巴士經營商。

34 究竟我哋可唔可以將呢樣嘢轉化為針對巴士公司嘅金錢嘅懲處，呢個係另  
35 一個問題，呢個問題之前喺倫敦係有探討過嘅，倫敦運輸局可能會對我哋有一  
36 啲啟示，但係喺現階段，我哋係會保持開放嘅態度。我哋會考慮倫敦同埋其他

1 司法管轄區嘅經驗，但係我哋唔會排除係去內部探討呢個問題，但係個問題我  
2 哋會唔會實行，我哋就會考慮好多其他嘅因素，我哋係要小心謹慎去考慮。唔  
3 該主席。

4 陳政龍先生：（經傳譯員）除非你有其他嘅觀察想提出，呢一個獎勵嘅機制，我就會  
5 係講下一個議題。

6 主席：（經傳譯員）或者畀佢答一答，你係咪有嘢想講？

7 陳美寶女士：No.

8 主席：（經傳譯員）至於倫敦議會所講，喺第 1151 頁嘅第 2.6 段就講到倫敦運輸局  
9 講咗啲咩嘢，「安全就有直接就同一啲款項或者扣減掛鈎」，呢個就係講緊佢  
10 哋嘅制度，佢哋就係會獎勵一啲好嘅服務，而如果啲巴士無法係提供滿意嘅服  
11 務，佢哋係會受到懲罰嘅。而倫敦當局嘅做法就係呢個制度可以延伸到去安全  
12 表現嘅，但係喺香港嘅制度係唔同，我哋有一個獎賞或者扣減嘅制度。我哋只  
13 有一個懲罰嘅制度，如果你唔可以滿足一個安全表現指標，就會懲罰。

14 陳美寶女士：Yes.

15 主席：（經傳譯員）新加坡都係一樣，係咪？

16 陳美寶女士：（經傳譯員）係，主席。我哋法律入面係有懲處嘅條文，我哋就會引用  
17 啲啲條文，然後係去發展一啲比較平衡嘅安全表現指標，根據我哋同巴士公司  
18 之間嘅峰會，我哋其中一項就提到我哋喺懲處方面點樣有一個更加高透明度嘅  
19 制度，以往我哋係有一啲法定嘅罰款，根據呢個條文，究竟我哋點樣將佢哋同  
20 安全表現指標掛鈎，呢個就係喺我哋同巴士公司參與嘅工作小組都可以做嘅  
21 嘢。

22 主席：（經傳譯員）上一次進行懲處係幾時呢？

23 陳美寶女士：（經傳譯員）我有呢個資訊喺我個文件夾入面，但係暫時就畀唔到一個  
24 答案委員會。

25 主席：（經傳譯員）就講到一個 5 月 7 號嘅文件就話從來冇用過，係咪？

26 陳美寶女士：（經傳譯員）係。

27 主席：（經傳譯員）我有冇記錯，陳大律師？

28 陳政龍先生：（經傳譯員）根據我嘅記憶係咁嘅，但係我要搵番個相關嘅資料。

29 主席：（經傳譯員）但係你而家同我哋講係有用到，係咪？

30 陳美寶女士：（經傳譯員）我哋要再去確認一下嗰個日子，我哋會確認一下，然後會  
31 稍後再提供呢個資料嘅。

1 主席：（經傳譯員）陳大律師，我哋有冇新加坡嗰面嘅資料呢？如果根據我個記憶，  
2 就係有個金錢上嘅懲處，就係十萬元新加坡元嘅，即係如果係超過咗某個嘅意  
3 外率。

4 陳政龍先生：（經傳譯員）或者我哋喺一陣間下晝返嚟去處理呢一個問題。

5 主席：（經傳譯員）係，可以嘅。歐陽先生。

6 歐陽先生：（經傳譯員）香港嘅公共交通系統係有一個懲處嘅制度，例如係港鐵嘅制  
7 度，係咪？

8 陳美寶女士：（經傳譯員）冇錯嘅。主席，根據我哋有嘅紀錄，係有記錄我哋係喺  
9 96 年係進行過懲處嘅，但係我哋會再去確認一下我哋嗰個當時個原因係咩嘢。

10 主席：（經傳譯員）應該係針對中巴嘅懲處，係咪？

11 陳美寶女士：（經傳譯員）冇錯，主席。

12 主席：（經傳譯員）陳大律師。

13 陳政龍先生：（經傳譯員）主席，我想講番 5 月 7 號嘅證供，就係向運房局提供--  
14 即係向呢一個黎以德先生常務秘書長嘅，就係今年 5 月 7 號嘅謄本，或者我哋  
15 可以顯示出嚟，第 19 項嘅。呢個就係 5 月 7 號嘅謄本，第 8 頁嘅。

16 主席：（經傳譯員）係，慢慢。

17 陳政龍先生：（經傳譯員）唔好意思，應該係第 32 頁，第 19 行。

18 主席：（經傳譯員）稍等。

19 陳政龍先生：（經傳譯員）主席問咗呢個問題，「鄧大律師，喺你繼續之前，你嘅意  
20 思係咪從冇施加過財務嘅懲罰呢？」而黎以德先生就話「主席，就我講嘅就係  
21 因為安全而令到我哋要引用呢個條文，即係財務懲處嘅條文。」「就從來冇係  
22 因為--即係啟用 22 條嘅懲處嘅？」而黎先生就話「主席，我就記憶中就冇嘅，  
23 我就見唔到要引用呢一個嘅條文。」

24 陳美寶女士：（經傳譯員）主席，黎以德先生嘅證供係正確嘅，因為佢係回應緊安全  
25 方面嘅問題，而佢嘅印象中，就以前係冇施加過罰款嘅，而我所提到嘅情況，  
26 即係就住中巴喺 96 年嘅情況，就係同嗰間嘅專營巴士公司嘅脫班有關嘅，我哋  
27 係向中巴施加咗 8,000 釐嘅罰款，呢個事件就係喺 1995 年，我哋喺 96 年係  
28 施加罰款嘅。

29 主席：（經傳譯員）我就問題嘅第二部分--答案第二部分，上面都有講到「係冇引用  
30 過 22 條而去施加任何嘅罰款？」而答案就係「冇錯嘅，以我嘅記憶或者係了  
31 解。」第 22 條係咪同罰款有關？

32 陳美寶女士：（經傳譯員）就係一個合適同埋有效率嘅服務，而安全就係其中一項我

1 咁考慮嘅因素之一。

2 主席：（經傳譯員）換句話講，就從來冇係--即係 94 年出現咗脫班？

3 陳美寶女士：（經傳譯員）95 年都出現咗脫班，而喺 96 年就係施加咗罰款嘅。

4 主席：（經傳譯員）唔該晒。陳大律師。

5 陳政龍先生：（經傳譯員）主席，我就準備講下一個嘅議題，就係運輸署對安全嘅做  
6 法，...

7 主席：（經傳譯員）我哋下晝署長就唔會喺度嘅，或者可能一啲一般性嘅問題可能而  
8 家問咗先會好啲。

9 陳政龍先生：（經傳譯員）主席，我想問嘅一般性嘅問題就係以香港嘅制度嚟講，邊  
10 個係負責推廣或者係改善巴士安全？邊個係負責係去發動去實施一啲新嘅安全  
11 措施呢？

12 陳美寶女士：（經傳譯員）喺公共交通嚟講，特別係巴士安全，當然運輸署係負責嘅  
13 單位，佢哋係負責係監察同埋改善巴士安全，而我哋亦都係會努力係改善公共  
14 交通嘅安全。

15 陳政龍先生：（經傳譯員）我想睇一睇一啲嘅例子，就係睇下運輸署一直以來點樣去  
16 改善巴士嘅安全嘅，或者我哋喺午飯後就開始進行呢個過程。

17 主席：（經傳譯員）或者我哋可以問多一、兩個問題，畀運輸署署長係作答嘅。運輸  
18 署係邊一位係負責係推廣巴士安全呢，係邊啲人士負責呢？

19 陳美寶女士：（經傳譯員）喺運輸署之內，就係一個我哋係一個共同嘅努力，呢個我  
20 哋有一個巴士及鐵路科，我哋亦都係有一個道路安全同埋標準部嘅，我哋助理  
21 署長同埋負責呢一個鐵路部就係黃先生，或者黃志光先生，呢兩個單位都會係  
22 共同係推廣公共交通安全嘅，唔該，同埋我哋同埋亦都係有邱國鼎先生嘅。

23 陳政龍先生：（經傳譯員）換句話講，就係喺運輸署入面有一個單一嘅單位係負責巴  
24 士安全？

25 陳美寶女士：（經傳譯員）係，有一個單一嘅單位，但係巴士及鐵路科就係負責係睇  
26 所有嘅政策同埋營運嘅事宜嘅，就住專營巴士。而道路安全及標準研究部亦都  
27 係有份係去推廣同埋係改善道路安全嘅，包括係公共巴士安全。

28 除咗呢兩個主要單位之外，我哋亦都有一個車輛標準及安全部，就係負責  
29 監管同埋監督呢一個硬件方面問題，包括係維修同埋巴士嘅標準，而助理署長  
30 陳先生亦都係運輸署嘅副署長，佢哋係負責監管整體嘅車輛安全同埋標準，包  
31 括係專營巴士嘅。

32 主席：（經傳譯員）問題嘅第二部分就係邊個係負責一啲創新嘅事宜，包括係安全嘅

1 裝置呢？

2 陳美寶女士：（經傳譯員）呢個係一個好有趣嘅問題，喺過去嗰一年左右，車輛安全  
3 及標準部，即係陳英傑先生所帶領，佢係負責去睇一啲嘅車輛保養同埋安全方  
4 面嘅一啲新技術，我哋有一個特定嘅單位同埋一啲額外嘅人手，呢個部門係負  
5 責推廣一啲新嘅技術，而喺工作小組底下，我哋亦都有個技術小組，亦都係由  
6 陳英傑先生係去主持，呢個就係一個主要嘅平台畀我哋係去推廣一啲唔同嘅安  
7 全裝置同埋一啲自動化嘅實時系統，包括係黑盒、全球定位系統等等。

8 我亦都想補充，我哋見到有一個獨立隊伍嘅重要性同埋需要嘅，即係正如  
9 我哋喺倫敦同埋其他嘅地方嘅例子度睇到，係去改善呢一個公共交通嘅研究能  
10 力。我哋亦都係爭取一啲人力嘅資源，包括一啲工程師、運輸主任同埋一啲機  
11 電嘅工程師，同埋我哋目標係去喺部門之內係創立一個交通嘅科技隊伍。呢個  
12 我哋就係一個內部爭取資源嘅過程嘅，我就想畀委員會參考。

13 主席：（經傳譯員）陳英傑先生嗰個嘅技術小組，佢一路做緊工作，但係好明顯一路  
14 就係負責係成立嗰個工作小組，就係 2018 年 3 月 13 號，之後先至成立嗰個技  
15 術組，係咪呀？

16 陳美寶女士：（經傳譯員）係，正確嘅，主席。我哋成立呢個工作小組個意念就係來  
17 自我哋參加大埔區議會會議嘅時候提出嘅，因為喺個 2 月嘅意外之後，就出席  
18 呢個會議嘅，...

19 主席：（經傳譯員）你講緊 2 月，2018 年 2 月，係咪呀？嘅 12 同 15 號。

20 陳美寶女士：（經傳譯員）係，正確，主席。就話由好多--當時提出好多嘅睇法，建  
21 議，好多諗法，就係嗰兩次嘅會議度提出嚟嘅，而喺嗰兩次會議之後，我同我  
22 嘅團隊就認為我哋需要主動同埋更有系統咁樣去處理所有呢啲嘅建議，所以我  
23 哋要自己努力去推動有關工作，之後我哋就通知咗交通諮詢委員會，就喺 2 月  
24 27 號嘅時候通知佢哋，就話我哋係建議成立一個工作小組，嗰個職權範圍，建  
25 議就包括三個部分。

26 第一，就係巴士上嘅安全裝置，第二，就係安裝安全帶嘅可行性，第三就  
27 係加強巴士車長嘅培訓。所以我哋喺 2 月底嘅時候就係制定呢啲嘅建議，就係  
28 因為喺嗰次交通意外之後，因此就令我哋正式 3 月中嘅時候成立咗呢個工作小  
29 組。唔該主席。

30 主席：（經傳譯員）你較早時候講話你決定跟進大埔區議會 2 月 12 同 15 號嘅建議  
31 同埋立法會相關嘅會議同提出嘅動議等等，你話會採取行動，但係其實你根本  
32 係回應緊已經發生咗嘅事件嘅，雖然你話你係主動，係咪？

33 陳美寶女士：（經傳譯員）主席，我諗我哋可以做嘅主動措施仲有好多，至於話成立  
34 工作小組呢個嘅諗法係回應嗰次嘅巴士意外慘劇，但係我哋亦都採取咗前瞻同  
35 埋主動嘅做法，唔係等各個相關嘅諮詢委員會或者相關人士提出，我哋先至回

1 應，相反，我哋應該定出嗰個日程就係成立呢個工作小組，所以係喺咁嘅基  
2 礎，喺工作小組一開始開會嘅時候，我就已經係提出咗各個可能考慮嘅措施，  
3 然後定咗嗰個會議議程，然後就同巴士公司同埋巴士製造商逐個咁樣去傾呢啲  
4 建議，所以我哋係採取一個比較有系統同埋前瞻性嘅做法，為我哋自己定咗個  
5 議程，唔係等巴士公司或者係巴士製造商話畀我哋聽「你哋可以做到啲乜  
6 嘢。」唔該主席。

7 主席：（經傳譯員）好喇，我哋超時喇，我哋而家就係午膳時間。多謝你哋今朝早出  
8 席我哋嘅聽證會，希望星期六可以再見到你，陳女士。

9 陳美寶女士：（經傳譯員）好，唔該。

10 主席：（經傳譯員）好多謝你嘅協助。好，而家我哋就休會到兩點半。

11  
12 下午 1 時 05 分聆訊押後

13  
14 下午 2 時 30 分恢復聆訊

15 出席人士如前。

16  
17 主席：（經傳譯員）午安。

18 陳政龍先生：（經傳譯員）主席，喺我繼續提問之前，我可唔可以報告一下，頭先主  
19 席你問到有個參考編號㗎，就係關於星加坡嗰個罰則嘅條文，其中一個參考就  
20 係專家文件夾 229 頁，係第 3.19 同埋 3.20 段。

21 主席：（經傳譯員）有冇擺上螢幕嗰度？我哋睇緊嗰份係咩嘢文件？

22 陳政龍先生：（經傳譯員）文件本身就係一份運輸署文件嘅附錄㗎，相關嘅段落就  
23 喺第 3 段開始，就係睇星加坡嘅情況㗎。

24 主席：（經傳譯員）係，唔好意思，你可唔可以再講一次畀我聽呢份係咩嘢文件？係  
25 咪星加坡原本嘅文件㗎，即係原來源自星加坡？

26 陳政龍先生：（經傳譯員）係，或者就係答你較早嘅問題喇，然後就講番個文件本身  
27 喇，我呢度請主席睇嘅文件就係一封信寫畀星加坡嘅管理當局，就問佢哋話呢  
28 份文件就係我哋委員會收到嘅，咁就問番，所以星加坡嗰個陸路交通嘅管理局  
29 喇，咁就有封信就係發咗畀星加坡嘅有關規管當局，就係請佢哋協助嘅，咁而  
30 嗰封信本身就喺第 198 頁，即係同一套文件夾裏面。

31 主席：（經傳譯員）好，我諗我哋唔需要喺呢度花時間。好喇。有冇提及話嗰啲罰則

1 點樣執行？係針對譬如話每一百萬行車公里意外率嘅呢？

2 陳政龍先生：（經傳譯員）主席，或者我之後再返嚟畀番啲具體嘅參考資料，咁我自  
3 己都要搵番個有關編號出嚟先。

4 主席：（經傳譯員）好，唔該你。

5 陳政龍先生：（經傳譯員）主席，我知道陳生今日晏晝係由你主要回答問題喇，喺午  
6 膳之前我哋就向陳女士提問，就話運輸署喺巴士安全方面所採取嘅做法，咁我  
7 哋問咗陳女士一啲一般性嘅問題，就話邊個係負責推動巴士安全嘅，而我跟住  
8 落嚟嘅一連串問題充係講番啲過往嘅事件嘅，主要充睇下運輸署過往係點樣處  
9 理巴士安全嘅問題，咁我會逐項去講，咁如果你記得嘅話，咁就最好喇，但係  
10 如果譬如你想問番有關嗰個原文件嘅參考編號，請你話畀我知。好，第一，  
11 2003 年 7 月，有一架巴士喺屯門公路跌咗落去個山坡，導致二十一人死亡，亦  
12 都有相當人數受傷，因為屯門公路嘅事故，而家就有啲被動式嘅時速限制器就  
13 限制咗巴士行駛嘅時速，咁呢啲時速限制器就喺屯門意外之後係規定巴士公司  
14 要安裝，而家已經成為所有專營巴士嘅標書裝置嚟㗎，啱唔啱？

15 陳英傑先生：係。

16 主席：（經傳譯員）第一次規定限速器係幾時？

17 陳英傑先生：（經傳譯員）係嗰次事故之後，我哋就睇番有啲咩嘢嘅方法可以糾正個  
18 問題，咁我哋就同巴士公司傾過之後，咁我哋就施工咗一個新嘅規定，就係話  
19 巴士要安裝時速限速器就係限制個時速係每小時 70 公里。

20 主席：（經傳譯員）係，但係點解發生？係邊度搵到嗰封信或者嗰個專營權嘅規定係  
21 點？

22 陳英傑先生：（經傳譯員）係，我哋應該係將佢納入咗個規格裏面嘅，咁但係即係巴  
23 士嘅最低規格，但係之前係--我相信係我哋同巴士公司有一連串嘅討論嘅。

24 主席：（經傳譯員）其實係一個好簡單嘅問題啫，就係想搵嗰份文件，咁請你搵出  
25 嚟。

26 陳英傑先生：（經傳譯員）好，我哋會提供嘅。而家聽唔聽到？

27 陳政龍先生：（經傳譯員）第二項嘅安全措施亦都係因為同一宗交通意外而引申出嚟  
28 嘅，就係規定專營巴士公司安裝黑盒，今朝早我哋都已經睇過呢個規定喇，就  
29 係 2003 年 10 月嘅一封信嚟嘅，咁你記唔記得呢個黑盒嘅規定亦都係因為屯門  
30 公路嘅意外而出現嘅呢？

31 陳英傑先生：（經傳譯員）係。

32 主席：（經傳譯員）咁你可唔可以重複嗰份頒布文件嘅參考編號？

1 陳英傑先生：（經傳譯員）係 TD-5 號文件夾，1957 頁就係嗰封信喇，1958 頁就係  
2 嗰個附錄嘅文件--嗰封知件嘅附錄，即係個規定本身。

3 陳政龍先生：（經傳譯員）然後 2006，7 月同埋 2007 年 12 月又有兩宗專營巴士相  
4 撞嘅事故，導致有乘客由專營巴士嗰度拋咗出去，最後因為呢啲事故而施加嘅  
5 巴士安全措施，第一就係要喺上層巴士嘅玻璃窗安裝個打橫嘅欄杆；第二就係  
6 喺上層前面四個位要安裝安全帶，咁你記唔記得有呢啲嘅安全措施就因為嗰兩  
7 次事故而提出嘅呢？

8 陳英傑先生：（經傳譯員）係，記得。

9 陳政龍先生：（經傳譯員）好喇，咁而同樣喇，而家呢啲設施已經係專營巴士嘅標書  
10 設施喇？

11 陳英傑先生：（經傳譯員）係，正確。

12 主席：（經傳譯員）咁有冇一個參考編號幾時頒布呢個規定？如果有嘅話，或者遲啲  
13 畀番喇。

14 陳英傑先生：（經傳譯員）全部都係喺專營巴士嘅規定清單嗰度嘅，或者遲啲我畀番  
15 嗰個參考編號你，主席。

16 主席：（經傳譯員）第一次規定係幾時？同樣喇，如果你而家有呢個細節，或者遲啲  
17 畀番我哋。

18 陳英傑先生：（經傳譯員）我哋會之前畀番個具體日期畀你。

19 陳政龍先生：（經傳譯員）好喇，咁然後喺 2016 年就有三宗嘅巴士意外，喺嗰個巴  
20 士門嗰度就爛咗玻璃，咁就導致有人受傷嘅，乘客受傷嘅，咁因為呢啲事故  
21 喇，咁又額外加裝咗一條防護杆喺嗰個巴士門嗰度，咁就係因為呢啲事故就安  
22 裝咗呢個新嘅安全設施...

23 主席：（經傳譯員）同樣喇，而家亦都變成係專營巴士嘅標準設備嚟嘅，又係喇，第  
24 一次規定係幾時？

25 陳英傑先生：（經傳譯員）係喺個意外之後㗎，我可以講嘅就係話自此之後，所有嘅  
26 巴士都係加裝咗呢啲嘅防護欄杆，咁就全部喺 2007 年 6 月嘅時候完成加裝嘅，  
27 2017 年 6 月完成加裝。

28 主席：（經傳譯員）好，唔該。

29 陳政龍先生：（經傳譯員）2017 年 12 月 22 日，有宗導致死亡嘅巴士交通意外，就  
30 喺深水埗，就有三人死亡，亦都有乘客受傷，咁亦因為呢次嘅交通意外，運輸  
31 署就檢討咗巴士車長嘅有關於佢哋工時、午膳同埋休息時間嘅指引嘅，咁亦都  
32 實施咗，啱唔啱，係因為嗰次嘅事故？

1 陳英傑先生：（經傳譯員）咁。

2 陳政龍先生：（經傳譯員）然後喺 2018 年 3 月，因為 2018 年 2 月大埔嘅交通意外  
3 之後，咁就成立咗加強專營巴士安全工作小組，等一陣我會再講番成立呢個工  
4 作小組嗰個時序喇，不過或者我首先問你，就係我哋頭先已經係睇過喇，睇嚟  
5 似乎都係相當有用嘅一連串嘅安全設施，咁多年嚟一路都施加咗喇，咁有冇咩  
6 嘢理由，點解喺意外發生之後先至實施呢啲安全措施，唔係喺意外發生之前已  
7 經咁做，有冇咩嘢原因係咁樣？

8 陳英傑先生：（經傳譯員）我哋要求巴士公司提供有效率嘅服務，咁亦都要提供裝置  
9 妥善嘅巴士嚟服務市民，我哋一路都監督住巴士公司嘅表現，當然包括埋佢哋  
10 用嘅設備、用嘅巴士等等，咁當然喇，一般如果提供服務，又有咩嘢大事發生  
11 嘅話，咁我哋當然就會假設巴士公司嘅營運妥善。咁喺我哋個機構裏面有一個  
12 制度，等我哋可以持續監督住巴士嘅運作，咁如果有任何嘅情況發現係巴士有  
13 啲咩嘢--巴士公司提供服務有啲咩嘢大嘅問題，咁運輸署就會主動跟進嘅。我  
14 必須講，嗰啲意外事故係好不幸嘅事故，我哋唔想見到發生，咁但係運輸署係  
15 一路持續密切咁監督住巴士運作嘅，咁如果我哋發現有任何巴士事故，或者有  
16 啲特別具體類型嘅意外同巴士有關，我哋都會同巴士公司傾，係咪可以再施加  
17 啲咩嘢嘅設施或者係裝一啲咩嘢裝置，避免呢啲意外再發生，咁我相信咁係一  
18 個負責任嘅態度，確保巴士服務係安全㗎。

19 主席：（經傳譯員）你可唔可以指出一啲嘅安全設施係喺有發生意外嘅時候就已經提  
20 出要做嘅呢？

21 陳英傑先生：（經傳譯員）除咗話監督巴士嘅服務之外，我哋都會睇下世界各地發生  
22 緊咩嘢事嘅，係有幾年前我哋其實就發現或者留意到有啲巴士發生火警。

23 主席：（經傳譯員）係個巴士引擎著火？你係咪咁嘅意思？

24 陳政龍先生：（經傳譯員）係喇，即係喺巴士行駛嘅時候，喺巴士上面著火，咁但係  
25 可能係因為其他原因，即係有其他情況㗎，咁總之係因為咁樣，我哋嘅車輛安  
26 全嘅標準部做咗啲研究，睇下我哋可以做啲咩嘢防止呢啲情況出現，咁喺嗰  
27 次嘅檢討之後，我哋就要求巴士公司喺所有巴士都要有滅火嘅設備，咁而家已  
28 經係巴士嘅一個標準裝置㗎喇。

29 主席：（經傳譯員）咁即係呢個同樣亦都係因為有發生過一啲火警，然後你做咗啲研  
30 究，然後你就係有個規定，就要做滅火設備，我個理解正唔正確？

31 陳英傑先生：（經傳譯員）係。

32 主席：（經傳譯員）我問你一個例子，就係話你係喺--有冇施加過任何嘅安全措施，  
33 係唔係同之前任何嘅事故相關㗎，如果要諗一諗，咁你可以遲啲先至話番畀我  
34 聽，你可以咁樣做嘅。

35 陳英傑先生：（經傳譯員）我就有諗過啲乜嘢重大嘅--即係啲特別重大嘅例子喇，咁

1 但係我哋嘅車輛安全及標準部係會同巴士公司定期開會，係講及巴士嘅維護、  
2 保養同埋安全設備等等嘅。咁可能亦都係有啲比較細微嘅事故發生，譬如話喺  
3 我哋檢驗巴士嘅時候，可能發現有啲嘅小問題，咁如果我哋留意到，我哋會同  
4 巴士公司傾，又要求佢哋要注意或者採取啲補救行動，有啲例子就係譬如有時  
5 我哋檢驗巴士嘅時候，發現漏油，喺巴士嘅某一部分漏油，又或者喺個車底盤  
6 嗰度就生鏽，咁呢啲情況都唔會話引起意外嘅，咁但係呢啲小毛病積累落去就  
7 可能最後會導致車輛發生故障，對乘客造成不便。咁雖然呢啲情況唔係好嚴  
8 重，但係我哋都會同巴士傾嘅，咁如果我哋發現有呢啲咁比較巴士上面細微嘅  
9 瑕疵，咁我哋唔單只淨係同相關嗰一間巴士公司傾，我哋亦都會話埋畀其他巴  
10 士公司聽，等佢哋都知道，因為佢哋都係用緊類似嘅巴士型號嘅，咁所以我哋  
11 係會做檢驗，然後就監督住情況，睇下啲巴士上有啲咩嘢嘅毛病或者瑕疵，我  
12 哋就會要求巴士公司採取行動。如果係啲重大嘅事故，好似之前提及嗰啲，當  
13 然喇，喺我哋做調查之後，我哋發現有任何嘅方法，技術上可行，可以處理到  
14 呢啲問題嘅，我哋就一定跟進到底嘅。

15 陳政龍先生：（經傳譯員）好喇，跟住我哋睇成立加強專營巴士安排工作小組嘅過  
16 程，我就會跟時序咁樣去處理。或者首先就睇番立法會運輸事務委員會嘅會議  
17 紀錄，喺今年 2 月 15 號開始嘅。

18 主席：（經傳譯員）如果係由時序開始，咁係咪首先應該睇 2 月 12 號區議會嘅會議  
19 開始先？

20 陳政龍先生：（經傳譯員）係。

21 主席：（經傳譯員）因為嗰次會議就係運輸署署長有出席嘅。

22 陳政龍先生：（經傳譯員）係，嗰份文件就係 DC2 號文件夾，782 頁。

23 主席：（經傳譯員）係。

24 陳政龍先生：（經傳譯員）咁你睇到喇，喺呢一份文件翻辯嘅第 1 頁係 782 頁，呢  
25 個係大埔區議會 2 月 12 號 2018 年開會嘅會議紀錄。783 頁，陳女士，即係運  
26 輸署署長係有出席呢個會嘅。784 頁你都睇到，討論嘅話題就係大埔道發生嘅  
27 交通意外，我就唔會詳細睇呢一份嘅會議紀錄喇，咁我就撮要嚟講，區議員都  
28 係表達咗唔同嘅意見，而運輸署嘅署長今朝都係同我哋講過㗎喇，佢都係有考  
29 慮到表達過嘅意見。

30 主席：（經傳譯員）好，睇下第 8 段，陳女士係喺呢度發言嘅，佢話第一步會做嘅就  
31 係運輸署叫咗九巴去提交一份交通意外嘅報告書，儘快，而九巴亦都係答應喺  
32 一個月內提交呢份報告。咁當時就係已經公布咗我哋呢個委員會係會成立嘅，  
33 表示咗。咁最後嗰四行就話署長亦都係知道大埔區議會有一個共識，就係關於  
34 大埔區同埋相關路段佢哋以前都係表達過關注嘅，佢話就會同幾個部門緊密咁  
35 樣合作。我記得運輸署署長仲係稍後係有提過呢啲類似嘅論點，咁你記唔記得  
36 喺邊？喺第 34 段。

1 陳政龍先生：（經傳譯員）798 頁。呢度就想撮要下，就係運輸署長喺呢個會裏面講  
2 咗咩嘢呢，第一，首先就係嗰個嘅車長要考駕駛嘅試喇，咁另外就係運輸署會  
3 係檢討香港道路嘅安全同埋車速限制喇，咁就係話會成立一個小組，呢個就係  
4 陳女士喺當時所提到嘅各點。

5 主席：（經傳譯員）值得注意嘅就係喺羅馬數字第 ii 段嗰度就係話運輸署就係會不  
6 時咁樣檢討香港道路嘅安全同埋時速限制，呢個都係一個比較一般嘅講法喇，  
7 咁雖然話嗰個發生意外嘅嗰個地段唔係一個交通意外嘅黑點，部門都係會考慮  
8 一啲改善嘅措施，因為考慮到過往嗰啲意外嘅性質同埋數目喇，嗰個道路設  
9 計、環境同埋對於車長嘅影響，咁當然後來就係一如佢講咁發生咗喇，咁我諗  
10 你最後一點就係講緊下一個日子喇，就係立法會開會嗰日。

11 陳政龍先生：（經傳譯員）係喇，喺 SEC-3，1342 頁。陳生，你有冇嗰份文件？

12 陳英傑先生：（經傳譯員）我而家係望住個螢幕㗎。

13 陳政龍先生：（經傳譯員）134--1340 頁，係立法會交通事務委員會特別會議，日  
14 子係 2018 年 2 月 15 號。下一頁，1343 頁，喺最底嗰度近紙尾嗰度，就係睇  
15 到運輸署署長陳女士有出席嘅。咁我唔會話同你一路講嗰個嘅會議討論，咁不  
16 如我哋直接就去到 1360，就係佢哋嗰日通過嘅一啲動議。嗰個動議就係話委員  
17 會懇請政府--速請政府，係要求專營巴士嚟到係檢討佢哋車長嗰個嘅編制喇，  
18 佢哋工作時數、休息時間、食飯時間等等，咁亦都係要強制咁樣喺定期咁有一  
19 啲嘅訓練，咁呢個就係包括兼職同埋係全職嘅司機佢哋嘅駕駛態度等等。咁第  
20 一個嘅議程就係一啲工作嘅指引同埋訓練。

21 第二個嘅動議就話用一啲防滑嘅路面喇，鋪設防滑嘅物料喇，係要有多啲  
22 嘅警示牌同埋係有一啲即係規管呢個車速嘅一啲偵測嘅攝錄機等等。第三就係  
23 要睇下有咩嘢嘅方法係進一步加強巴士嘅安全裝置，包括係對一啲高危嘅座位  
24 係多啲安裝番呢個安全帶，同埋係分階段強制乘客要繫安全帶，咁就要喺一啲  
25 巴士--喺車長外面嘅位係裝一啲嘅攝錄機，仲要改裝一啲嘅限速器，就確保喺  
26 啲高危嘅路段就係會小心啲嚟到去駕駛，咁就減少喺意外嘅時候乘客嘅傷亡。  
27 咁第三個嘅動議就係關於安全，喺車內一啲安全裝置嘅安裝或者措施同埋關於  
28 安全帶嘅問題。

29 咁按時序，下一件事就係九巴就大埔呢一個意外向運輸署提交呢一個調查  
30 報告，呢個係 2018 年 3 月 23 號嘅事。呢個就係九巴一嘅文件第 98 頁，我就  
31 而家唔會係進入呢份文件度討論，不過我就知道係嗰一日嚟到係提交咗報告，  
32 我稍後會講番佢嘅。

33 主席：（經傳譯員）冇問題。

34 陳政龍先生：（經傳譯員）講到城巴講嗰個報告，咁就係工作小組嘅一次會議喇，就  
35 係 2018 年 3 月 13 號第一次嘅會議。好喇，我未講嗰個會議紀錄之前，想講下  
36 嗰個會議議程就係 CTB-3 第 588 頁。我就想請你係備悉呢一個嘅議程，喺議程

1 嗰個主要嘅項目就係去討論呢個工作小組個工作範圍同埋成員。呢一個嘅議程  
2 係有日子嘅，咁你記唔記得呢個議程係幾時發出？係九巴交咗報告書之前定之  
3 後嘅事？

4 陳英傑先生：（經傳譯員）你講呢個會議？

5 陳政龍先生：（經傳譯員）呢個會議係 3 月 13 號，咁估計應該個議程係會議之前係  
6 提交。咁九巴嗰個嘅調查報告就係 3 月 12 號交畀立法會嗰個嘅事務委員會。

7 陳英傑先生：（經傳譯員）咁我諗我要去查一查先知道確實嗰個日子。

8 主席：（經傳譯員）唔好意思，我就打一打岔，應該係有一封信咁樣附隨呢一個嘅議  
9 程？

10 陳英傑先生：（經傳譯員）我哋唔記得到底用係電郵或者係用信嚟到係寄出。

11 主席：（經傳譯員）咁無論如何，都係有紀錄㗎，係咪可以？

12 陳英傑先生：（經傳譯員）係有㗎。

13 主席：（經傳譯員）咁你可以幫我哋去查一查，再話番畀我哋聽。我哋未繼續之前，  
14 我想知道專營巴士公司係你哋幾時去接觸佢，係關於要佢哋參與呢個工作小組  
15 嘅呢，你哋幾時去接觸佢哋嘅呢？

16 陳英傑先生：（經傳譯員）我而家就講唔到確切嘅日期，不過應該係會預先通知咗呢  
17 啲公司會有一個工作小組。

18 主席：（經傳譯員）係喇，咁估計你就會問佢哋「你打唔打算參加呢個工作小組」？

19 陳英傑先生：（經傳譯員）係。

20 主席：（經傳譯員）你唔記得幾時？

21 陳英傑先生：（經傳譯員）我唔記得嗰個確實嘅日子。

22 主席：（經傳譯員）咁你記唔記得係邊個邀請佢哋，係咪你？

23 陳英傑先生：（經傳譯員）唔係我自己個人去同佢哋講。

24 主席：（經傳譯員）唔係你，咁有冇運輸署任何嘅代表而家喺度嘅，在座嘅係去負責  
25 聯絡巴士公司嘅呢？

26 陳英傑先生：（經傳譯員）應該唔係今日在座嘅代表喇，不過係辦事處嘅其他職員。

27 主席：（經傳譯員）好，咁你可唔可以幫我哋去查下有冇一啲嘅電郵或者係書信嘅往  
28 來，等我哋知道呢個工作小組係幾時嚟到去成立？

29 陳政龍先生：（經傳譯員）好喇，咁我哋去第一次會議嘅紀錄，就係 KMB-12，嗰個

1 頁數就係 469-1--係 4869-1。陳生，可唔可以同你確認你而家係搵到嗰一份  
2 文件，係 KMB-12，4869-1，4969-1。係應該會議紀錄嘅第 1 頁。

3 陳英傑先生：（經傳譯員）搵到。

4 陳政龍先生：（經傳譯員）我可唔可以確認你係有呢個工作小組 2018 年 3 月 13 號  
5 第一次會議嘅會議紀錄喺你面前？

6 陳英傑先生：（經傳譯員）係。

7 陳政龍先生：（經傳譯員）你睇下出席嘅人吖，第 1 頁。第 2 頁，4869-2，喺開場  
8 白嗰段係關女士，佢係就係助理運輸署署長，佢就係呢一個工作小組嘅召集  
9 人。由頭數落去第六行，召集人就話工作小組嘅會議目標就係去研究、去複檢  
10 一啲嘅措施可以係進一步加強巴士安全嘅。我想問，呢啲工作會議--或者呢個  
11 工作小組係所有人又或者起碼係巴士公司同埋運輸署喺埋一齊就去研究巴士安  
12 全嘅，有冇咩嘢理由，點解咁樣類型嘅工作小組唔係喺大埔嗰次嘅意外之前就  
13 成立？

14 陳英傑先生：（經傳譯員）因為呢個工作小組就係因為嗰個嘅事件之後特別而成立  
15 嘅，喺正常或者平時，運輸署係有其他嘅定期會議同埋其他嘅機制去跟進巴士  
16 公司各方面嘅營運嘅，咁呢一個工作小組係有一個特定嘅目標，有一個特定嘅  
17 目的就係調查嘅，咁所以我哋成立咗呢個工作小組喇。咁所有嘅專營巴士公司  
18 同埋運輸署相關嘅組別都係有介入。

19 主席：（經傳譯員）咁邊一個會出席啲啲其他嘅定期會議？

20 陳英傑先生：（經傳譯員）運輸署有好多其他嘅定期會議同專營巴士公司開嘅。

21 主席：（經傳譯員）一定係有喇，或者叫做一啲嘅場合會唔會有啲專營巴士公司好高  
22 層嘅管理人員係一齊出席嘅呢？

23 陳英傑先生：（經傳譯員）有嘅，我哋定期都會同巴士公司嘅高層管理人員有一啲嘅  
24 會面嘅機會嘅。運輸署嘅代表應該就係助理署署長，佢係負責巴士同埋鐵路嘅  
25 營運嘅，而呢個會議佢哋嘅對口單位就係巴士公司喇，佢哋就係啲啲嘅營運總  
26 監。

27 主席：（經傳譯員）唔係嗰個管理...

28 陳英傑先生：（經傳譯員）唔係嗰個管理嘅總監。

29 主席：（經傳譯員）因為其實係有一啲嘅分別嘅，因為呢個工作小組同埋以前嘅--唔  
30 係由公司最高級嘅人嚟到去參與嘅咩？

31 陳英傑先生：（經傳譯員）佢有啲好重要同埋好特定嘅項目係要討論嘅，咁係要由啲  
32 啲非常之高層嘅管理人員做決定嘅，咁應該係有啲咁嘅會議。

1 主席：（經傳譯員）咁可唔可以畀我哋類似呢啲會議嘅紀錄，就係話佢哋嘅總監係會  
2 有出席嘅？

3 黃志光先生：（經傳譯員）係，我補充喇，有時呢啲會議係定期，有啲就係就一啲特  
4 定嘅事嚟成立嘅，咁你睇到呢一個嘅工作小組嘅成員喇，陳先生就係提到蘇先  
5 生喇，咁仲有一個，佢係嚟自九巴嚟喇，仲有鍾先生，佢就係新一巴嘅，咁我  
6 哋其實係夥伴嘅形式，我哋有不同嘅會議，討論不同嘅事項，好似陳生咁講，  
7 咁有時我哋有啲定期嘅會議係講安全嘅。

8 主席：（經傳譯員）我個問題係非常之有針對性嘅，就係關於安全嘅，咁個個嘅營運  
9 總監李先生，佢幾時係試過同你哋開過會？呢個就係城巴個個嘅總監，咁佢有  
10 冇同你哋開過會？幾時？有冇咁樣類似嘅會議係講到安全嘅，係由呢啲公司最  
11 高層嘅人嚟到去出席嘅呢？

12 陳英傑先生：（經傳譯員）主席，即係巴士及鐵路部嘅常規會議，即係同啲啲巴士公  
13 司代表，即係好似蘇先生或者鍾先生等等，佢哋就係由佢哋公司授權係去做一  
14 啲營運嘅決定嘅，咁呢個就係我哋定期嘅會議去討論所有關於車務，包括係安  
15 全嘅事宜嘅，咁而啲啲會議所作嘅決定都係會即係由佢哋相關嘅公司係去授權  
16 或者係同意嘅，所以就有一啲特別嘅就係會涉及佢哋嘅董事總經理嘅。

17 主席：（經傳譯員）咁所以個問題係咪即係唔會，即係根據你同我哋所講？

18 陳英傑先生：（經傳譯員）係，通常都唔會嘅。

19 陳政龍先生：（經傳譯員）喺會議紀錄嘅第 2 段就講到委員有反對成員嘅組成同埋工  
20 作小組嘅工作範圍，咁就係提到附錄嘅，咁而附錄就係喺 4869-6 頁或者-9 頁  
21 嘅。咁工作範圍嘅第一項就係來檢討培訓嘅安排，呢個就係立法會喺 4 月 15 號  
22 交通事務委員會所通過嘅動議嘅內容。咁而工作小組嘅第二項工作範圍就係去  
23 檢討喺所有嘅座位安裝安全帶嘅技術可行性、成本效益同埋其他嘅事宜嘅，咁  
24 而該項動議，即係立法局交通事務委員會所通過嘅動議亦都有提到安裝安全帶  
25 嘅。第三就係探討安裝車上安全裝置嘅技術可行性、成本效益同埋其他嘅事  
26 宜，咁呢個亦都係立法會個項動議入面提到嘅。

27 主席：（經傳譯員）首先喺 a 項就係乘客嘅車速顯示儀，咁呢個係咪動議入面提到嘅  
28 呢？

29 陳政龍先生：（經傳譯員）冇特別提到呢一個裝置嘅。

30 主席：（經傳譯員）咁其他嘅項目係咪都有提到？

31 陳政龍先生：（經傳譯員）咁車速限制器個個車速上限係有提到嘅，冇提到其他嘅事  
32 項...

33 主席：（經傳譯員）睇番立法會會議紀錄個項動議係咪就可以睇到，係咪可以向我哋  
34 確認？

1 陳政龍先生：（經傳譯員）係，可以嘅。我嘅問題就係呢個係咪--即係呢個工作小組  
2 嘅工作範圍就係受呢一個嘅立法會個項動議所影響，係咪？

3 陳英傑先生：（經傳譯員）我唔同意。呢個會議紀錄入面嘅工作範圍係相當詳細嘅，  
4 咁喺第三項你見到係有好多分項，係有非常之針對性咁樣提出我哋會睇嘅裝置  
5 嘅，咁喺成立呢個工作小組之前，我哋已經做咗好多準備工作去探討我哋可以  
6 做嘅乜嘢係去幫助到巴士車長同埋可以安裝嘅乜嘢有用嘅裝置。咁我哋即係研  
7 究咗嘅結果就係加咗入去呢一個工作範圍入面嘅。其中一啲項目可能係由公眾  
8 建議或者係由立法會議員去建議，或者係其他人士建議嘅。咁但係就住喺巴士  
9 安裝安全裝置，即係如果你講安全帶嘅話，當然大家都知道安全帶係會有幫  
10 助，咁所以包括埋佢都合理嘅。咁至於車展嘅培訓方面，即係如果巴士車長嘅  
11 培訓不足係可能會引致意外，咁當然我哋喺工作小組係應該探討嘅，咁所以我  
12 哋係即係做咗一啲研究係決定去即係傾嘅乜嘢嘅，咁我諗呢個係一個負責任嘅  
13 做法。如果我哋淨係開會就有嘅巴士公司係提出乜嘢都可以，而我哋唔講一啲  
14 特別嘅措施嘅話，即係我哋喺未開始工作小組工作之前，我哋已經做咗功課，  
15 咁樣我哋喺日後嘅會議就可以更加集中討論，咁我哋希望係可以做到一啲嘢  
16 嘅，透過呢個工作小組。

17 主席：（經傳譯員）即係關於呢啲安全裝置嘅研究係咩嘢時候做嘅呢？

18 陳英傑先生：（經傳譯員）咁大部分嘅研究都係大概係 2 月嘅時候做嘅。

19 主席：（經傳譯員）即係話喺大埔意外之後做嘅？

20 陳英傑先生：（經傳譯員）你可以咁講。

21 主席：（經傳譯員）你會唔會咁講？

22 陳英傑先生：（經傳譯員）係。

23 主席：（經傳譯員）唔該晒。

24 陳政龍先生：（經傳譯員）我想比較一下呢一啲安全裝置同埋調查報告入面所講嘅安  
25 全裝置，咁呢個報告係即係喺前一日就係公布嘅，咁我想你睇下 KMB-1 文件冊  
26 嘅 114 頁，同埋同時繼續睇 4609 頁嘅。KMB-1 文件冊 114 頁，114 頁，  
27 係，KMB-1 文件冊 114 頁。咁呢個係九巴調查報告嘅第五部分，咁呢個就係喺  
28 18 年 3 月 12 號呈交界運輸署嘅，咁而喺九巴就提到一啲其他改善巴士安全嘅  
29 措施。喺安全裝置方面，你見到第 41 頁九巴就有提到呢個電子穩定程底，或者  
30 可以叫做電子穩定控制系統。咁如果你同呢一個工作小組工作範圍比較，即係  
31 喺 4869-9 頁就係 c 項嘅，咁喺第 42 段，喺九巴嘅調查報告第 42 段，喺 114  
32 頁，咁就講到地理圍欄，咁就對應由全球定位系統輔助嘅車速控制。

33 主席：（經傳譯員）你同唔同意兩者係講緊同一樣嘢？

34 陳英傑先生：（經傳譯員）係，我可以咁講嘅。

1 陳政龍先生：（經傳譯員）另外就係車速限制，就係由全球定位系統輔助，咁呢一個  
2 就係喺呢一個安全裝置嗰個清單嘅 d 項嘅。咁喺下一頁嘅 45 段，九巴就提到限  
3 制車速呢個問題，咁就有一個減速嘅系統，咁唔單只淨係隔斷呢個燃油嘅，咁  
4 呢個亦都係喺工作小組嘅 3e 段提到嘅。咁喺 47 段，九巴嘅研究報告就講到話  
5 係即係監察車長瞓眼瞓嘅情況，咁而工作小組同樣係喺第 3g 段係有提到呢一個  
6 安全裝置嘅，即係喺呢個工作範圍嘅文件之中。咁我有一個即係一般性嘅問  
7 題，咁我哋見到九巴考慮嘅措施同埋工作小組工作範圍入面嘅安全裝置係非常  
8 啱合嘅，之前運輸署同埋九巴有冇係傾過即係考慮安裝啲咩嘢安全裝置，同埋  
9 即係會喺個議程上面包括啲乜嘢？

10 陳英傑先生：（經傳譯員）我嘗試答呢個問題，早前我就提到喺工作小組會議之前，  
11 運輸署係做咗一啲研究，就係關於可以喺車上安裝啲咩裝置去幫助啲司機同埋  
12 改變車輛嘅安全嘅，咁喺進行啲研究嘅時候，同時我哋亦都有同巴士嘅製造  
13 商對話，咁呢個係一個合理嘅做法嚟嘅。

14 主席：（經傳譯員）即係你答一個好長嘅答案之前，你可唔可以先回答呢個問題，運  
15 輸署之前同九巴有冇傾到究竟喺個議程上面應該寫啲咩嘢？有定係冇，或者你  
16 唔知道？

17 陳英傑先生：（經傳譯員）冇。

18 主席：（經傳譯員）好，請你繼續。

19 陳英傑先生：（經傳譯員）我就想講一講即係個背景，我哋進行研究嘅時候，我哋係  
20 有接觸一啲巴士嘅製造商，咁主要係三大嘅巴士製造商喇，就係我哋有同佢傾  
21 過即係包括係 ADL、Volvo 同埋 MAN 呢五間公司，我哋有同佢傾過點樣可以改  
22 善啲巴士嘅安全，咁就係改善巴士安全方面，其實做嘅嘢係有限，即係有啲嘢  
23 係新嘅，我哋知道喇，巴士公司亦都知道，我唔知佢哋有冇同啲巴士製造商係  
24 傾過去做一啲一樣嘅事情，咁但係對我嚟講，我哋喺 2 月就有做...

25 陳政龍先生：（經傳譯員）陳先生，總括可唔可以咁講呢，你做咗--即係你自己一個  
26 獨立嘅研究，你唔知九巴有冇做獨立研究喇，咁但係就即係咁啱，咁巧合你哋  
27 得出嘅安全裝置嗰個清單都係一樣嘅？

28 主席：（經傳譯員）因為相關嘅安全裝置嘅數目都係有限嘅？

29 陳英傑先生：（經傳譯員）冇錯，咁而九巴--即係九巴建議嘅事項唔係所有都有係我  
30 哋個清單上面，咁所以即係佢哋認為係--即係有啲嘢佢哋認為應該做嘅。

31 陳政龍先生：（經傳譯員）咁我想你睇番會議紀錄嘅第 3 段，就係 4869-2 頁第 3  
32 段嘅。第 3 段就話就住呢個建議嘅工作範圍，九巴龍運進一步就建議係包括四  
33 個其他方面嘅，即係就住襲擊車長--包括襲擊車長、巴士站違泊，塞車令到即  
34 係巴士車長嘅疲勞加劇同埋壓力，同埋巴士站嘅安排嘅。咁第 4 段就有運輸署  
35 嘅回應，咁我想講下一頁最尾第六行，咁會議紀錄就話因為工作小組嘅時限只

1 有三個月，咁會員同意工作小組應該係著重討論附錄入面嘅建議工作範圍，咁  
2 而附錄就有提到呢個工作範圍係乜嘢。咁可唔可以咁樣理解，當時工作小組有  
3 限嘅工作時間就即係反映嚟工作小組嘅工作範圍唔應該傾九巴提出嘅改善安全  
4 建議喇，可唔可以咁樣去理解？

5 陳英傑先生：（經傳譯員）當時嗰個目標係完成工作小組嘅工作同埋調查，同埋得出  
6 一啲嘅建議，咁所以時間只有三個月係非常之緊張嘅，所以當時我哋係想著重  
7 處理呢一啲重要嘅事項。咁我哋嘅意思就唔係話其他事項係無關。

8 主席：（經傳譯員）咁但係你個答案就係「係」，係咪？即係但係九巴嘅--你話九巴  
9 嘅建議係唔會考慮，因為時間緊絀，係咪？

10 陳英傑先生：（經傳譯員）係，冇錯。我哋亦都提到--即係向巴士公司提，即係呢啲  
11 問題可以嚟其他嘅會議或者峰會上面去傾，唔一定要嚟呢個工作小組度傾嘅。

12 陳政龍先生：（經傳譯員）咁喺當時，呢個工作小組嘅時限--即係點解會有一個有限  
13 嘅工作時限？咁當時點解--即係決定呢個工作小組只係一個三個月嘅工作小  
14 組，而唔係一個常規嘅小組，當時嘅說法係點？

15 陳英傑先生：（經傳譯員）當時我哋係想儘快得出一啲嘅建議，咁所以三個月係合適  
16 嘅呢個長度，就去完成我哋訂立嘅工作範圍。

17 主席：（經傳譯員）點解要儘快去得出一啲嘅措施？點解咁有逼切性？

18 陳英傑先生：（經傳譯員）我諗個原因就係有一個嚴重嘅巴士意外喇，咁而運輸署就  
19 係希望同巴士公司合作去制訂--即係儘快制訂一啲補救措施，目的就係去避免  
20 日後有同樣嘅意外發生嘅，咁當然呢一啲嘅項目唔能夠係即時去實行，但係我  
21 哋係盡量係儘快去完成嘅。

22 主席：（經傳譯員）咁換句話講，當時就係回應--因為區議會、立法會等等，或者係  
23 公眾都係對呢一個事件係有好大嘅關注嘅，即係呢一個 2 月 10 號嘅意外，所以  
24 係咪因為咁，好有逼切性？

25 陳英傑先生：（經傳譯員）我會話呢個係其中一項原因。

26 主席：（經傳譯員）即係你想畀人哋知道你係做緊一啲嘢，係咪？

27 陳英傑先生：（經傳譯員）唔係嘅。

28 主席：（經傳譯員）陳大律師。

29 陳政龍先生：（經傳譯員）主席，呢個謄本入面有講到呢一個工作範圍嘅，咁呢個就  
30 係 KMB-12 文件夾 4939 頁開始嘅，咁但係我就唔會詳細講，咁但係個頁數就喺  
31 呢度。

32 主席：（經傳譯員）請你畀少少時間我，因為我想知道你講緊乜嘢嘅。呢封信函就係

1 經九巴嗰個「購物清單」喇，我會咁叫佢喇。

2 陳政龍先生：（經傳譯員）係，冇錯，佢哋有四輪嘅溝通嘅，同運輸署，就係由  
3 4939 頁開始。

4 主席：（經傳譯員）好，唔該。

5 陳政龍先生：（經傳譯員）陳生，我想你而家睇番第一次會議嘅會議紀錄，請你睇第  
6 16 段，4869-6 頁。陳生，呢度第 16 段講嘅就係安全帶嘅問題，或者我遲啲先  
7 至再獨立講安全帶呢個問題，但係而家即係純粹係從時序嘅角度睇，呢個問題  
8 就係第 16 段嗰度引申出嚟嘅，第 16 段我或者讀出嚟喇，就係「巴士同埋城巴  
9 質疑所有座位都安裝安全帶嘅實際可行性，即係用呢一個嚟加強乘客嘅安全，  
10 因為其實要巴士車長確保所有乘客都上咗車真係有戴安全帶都有困難嘅，而且  
11 新巴同城巴都提出個關注，就係話如果企喺度嘅人，係咪又係需要安排安全帶  
12 呢？咁運輸署就話係全面檢討過，有呢啲咁嘅提出，就係因為喺交通意外之  
13 後，全面檢討過喺巴士安裝安全帶嘅問題嘅。」咁喺呢一段嗰度提及話有啲要  
14 求係唔只乜嘢嘢？我哋知道喺立法會嘅運輸署事務委員會會議上通過咗啲動  
15 議，就係話要喺巴士安裝安全帶，咁呢個就係呢次會議之前一個月提出嘅動議  
16 嚟嘅，咁所以呢啲嘅要求係指立法會交通事務委員會提出啲啲要求㗎，定係其  
17 他要求？

18 陳英傑先生：（經傳譯員）我諗你所提及嘅即係立法會要求話安裝安全帶...

19 主席：（經傳譯員）請你可唔可以直接對住個咪講？

20 陳英傑先生：（經傳譯員）係，我相信立法會議員提及話安裝安全帶呢個其中一個要  
21 求喇，咁但係我哋就好難好具體咁講話係喺邊一次會議就提出呢啲嘅要求，因  
22 為我哋有同新聞界，同其他人都有見過，咁我哋都有留意係有提過安全帶呢  
23 樣，就要求我哋要去研究嘅。

24 主席：（經傳譯員）請你繼續。呢合有個提及，就係話大埔嘅交通意外喇，咁仲有話  
25 有其他嘅交通意外嘅，咁指嘅係邊啲其他嘅交通意外？

26 陳英傑先生：（經傳譯員）我諗其實主要都係講嗰一宗嘅交通意外。

27 主席：（經傳譯員）所以呢度用咗交通意外眾數係錯㗎，係嘛？係指嗰個交通意外？

28 陳英傑先生：（經傳譯員）我相信係指一般嘅講法，就係提及交通意外，有話特別講  
29 邊一宗交通意外，但係大埔交通意外只係其中一個帶出呢個問題嘅意外嚟嘅  
30 啫。

31 主席：（經傳譯員）好，唔該。

32 陳政龍先生：（經傳譯員）下一個事項，或者喺個時序裏面下一個事項我想講就係發  
33 表一個電子地圖，即係意思電子地圖上面有時速限制加咗落去，喺呢方面第一  
34 份我想請你睇嘅文件就係 TD-1 號文件冊 366 頁。喺你面前，陳生，應該係睇

1 到一封電郵，請你先睇電郵嘅底部 366 頁嗰度喇，呢封電郵係委員會秘書署寫  
2 畀運輸署 Tony KT。

3 主席：（經傳譯員）個電郵日期係幾號？

4 陳政龍先生：（經傳譯員）2018 年 6 月 1 號，喺 366 頁底部會見到嘅。咁呢封電郵  
5 其實個內容就喺 367 頁嗰度出現嘅。由上數落去第 2 段，就從個聽證會嗰度知  
6 悉，城巴同新巴已經係裝住黑盒嘅系統，係會自動做呢個超速嘅報告嘅，即係  
7 話如果司機駕駛個時速係超過咗 70 公里嘅話，咁而至於話嗰啲巴士公司管理層  
8 會唔會有資料知道話譬如喺嗰個駕駛路段幾多嘅百分比，即係新巴同城巴嘅巴  
9 士係嗰個法定嘅時速係 50 公里嘅，咁而係又係以上提及嗰二十五個路段有包含  
10 嘅，咁喺回應嘅時候，新巴同城巴就話佢哋有呢個數字，因為佢哋話佢哋有全  
11 套嘅電子數據係顯示晒香港所有路段嘅時速--所有道路嘅時速限制嘅，咁但係  
12 就同意交畀委員會一份嘅電子地圖係顯示佢哋喺邊啲道路上面佢哋嘅巴士有運  
13 作嘅。

14 咁喺呢一方面，我就想請你協助委員會提供一啲電子地圖係顯示香港所有  
15 道路嗰個法定時速限制嘅，咁等我哋委員會可以比較呢啲嘅地圖，即係呢啲地  
16 圖新巴同城巴將會提供畀我哋㗎，咁呢個就係 2018 年 6 月 1 號嘅電郵。咁跟  
17 住運輸署就寫咗信畀各間巴士公司，就喺 6 月 7 號，即係出咗電郵之後幾日  
18 喇，咁呢度就係 TD-1 號文件冊，4077 頁--或者係 477 頁。請問你而家睇唔睇  
19 到運輸署寫畀巴士公司--各間巴士公司嘅信件，日期係 2018 年 6 月 7 號，陳  
20 生，你面前睇唔睇到呢封信？

21 陳英傑先生：（經傳譯員）係，睇到。

22 陳政龍先生：（經傳譯員）喺呢封信嗰度第 2 段，運輸署就話「我好高興通知你有關  
23 於時速限制嘅數據，即係運輸署所管理嘅道路系統--嘅網絡裏面，咁已經係可  
24 以喺 data.gov.hk 呢個網頁嗰度下載嘅」。咁然後第 3 段你就話畀啲巴士公  
25 司聽「你哋可以利用呢啲嘅數據，即係地理資訊系統嘅數據，GIS 嘅數據嚟去  
26 探討點樣可以控制時速，用全球定位方式或者係地標圍欄方式，咁你可以同你  
27 哋嘅巴士製造商去討論呢個問題，然後進行有關嘅測試」。有冇咩特別原因  
28 點解運輸署會寫信畀巴士公司，特別請佢哋留意話有關於一個時速限制嘅電子  
29 地圖，其實係已經有嘅，咁你係要等到我哋委員會問有冇呢啲資料嘅時候，你  
30 先至寫信畀巴士公司，兩者之間有冇關連嘅呢？

31 陳英傑先生：（經傳譯員）嗰封信嘅日期係 6 月 7 號寫畀巴士公司，各間，我哋出呢  
32 封信，因為城巴話--我諗佢哋係--我相信佢哋係唔知道呢啲嘅地圖數據係已經  
33 存在嘅。

34 主席：（經傳譯員）呢個係委員會寫嘅信裏面已經有提及喇，咁係咪有乜可能佢哋唔  
35 知道？

36 陳英傑先生：（經傳譯員）我假設城巴係唔知道，所以點解我哋寫信畀佢哋，提醒佢

1 咁有關嘅數據其實已經存在。

2 主席：（經傳譯員）咁即係話係因為喺研訊裏面提到，咁跟住就運輸署就再寫信話畀  
3 佢哋聽有呢個數據，雖然其實呢個資料喺我哋個聽證會謄本已經有㗎喇，係咪  
4 咁解？

5 陳英傑先生：（經傳譯員）我相信係有咁嘅關連嘅。

6 主席：（經傳譯員）好，唔該，我覺得咁亦都係完全合理。

7 陳政龍先生：（經傳譯員）好喇，咁我哋繼續，陳生。喺 3 月、4 月、6 月都開過好  
8 幾次會——一連串嘅會議喇，咁我一陣就會再返嚟講話嗰個安全帶嘅問題，咁但  
9 係喺呢個階段，我想繼續跟住個時序去到 2018 年 7 月 25 號嗰個日期相關嘅，  
10 因為我哋有一個會議，係立法會交通事務委員會嘅會議，咁而運輸署喺開嗰次  
11 會之前準備咗一份文件嘅，呢份文件就係 TD-1 號文件冊，403 頁。呢份係簡介  
12 文件，為嗰個交通事務委員會嘅會議準備嘅。咁我有幾個問題就住呢份文件想  
13 問你嘅，咁但係嗰啲問題就已經——原本係準備問你，但係而家因為工作小組已  
14 經出咗報告喇，所以就唔需要問喇，琴日下晝你就交咗呢份報告畀我哋喇，咁  
15 所以我就會從嗰個工作小組報告裏面去提出呢啲問題嚟問你。主席，我嗰份報  
16 告就未有編頁碼嘅，咁但係為咗紀錄，咁呢個就係 TD-5 號文件冊，1757 頁  
17 嘅。

18 主席：（經傳譯員）係邊一段，你想講？

19 陳政龍先生：（經傳譯員）首先我講嗰個撮要喇，第 5 節，撮要第 5 節文件，即係個  
20 報告嘅。主席，我首先想請你睇嗰個建議嘅撮要，就係第五章。

21 主席：（經傳譯員）係，我哋有喇。

22 陳政龍先生：（經傳譯員）佢嗰份報告本身嘅頁數就係 41 頁。陳生，喺 5.3 段，處  
23 理嘅問題就係建議喺車內安裝嘅安全裝置，就話由 2018 年 7 月 2 號採購嘅新  
24 雙層巴士都需要裝有嗰個電子穩定控制系統，同埋第二就係時速限制器——車速  
25 限制減速器，咁就即係話專營巴士公司就要首先就係處理啲新巴士，由現有巴  
26 士就係咪安裝嘅問題喇。然後 5.5 段就係處理一啲會試用嘅一啲安全裝置，睇  
27 下又係咪要安裝，咁呢度我哋睇到就係嗰個 BMCS 喇，即係巴士監控嘅系統喇，  
28 同埋就係一啲碰撞警報、換線裝置等等喇，咁呢度又——我想問下喇，點解所有  
29 呢度咁多加強巴士安全嘅措施都係喺大埔意外之後先至考慮，唔喺之前考慮？

30 陳英傑先生：（經傳譯員）呢啲新嘅改善措施或者新裝置都係喺我哋同專營巴士公司  
31 同埋巴士製造商傾過之後，覺得佢哋係有用，可以改善巴士安全，因此先至提  
32 出呢啲建議嘅。

33 主席：（經傳譯員）但係個問題係點解呢啲討論即係你唔會喺話大埔意外之前已經同  
34 巴士製造商有呢啲討論？

1 陳英傑先生：（經傳譯員）或者好似我之前都有提到喇，大埔嘅意外其實就牽涉到一  
2 連串嘅問題，就話我哋仲可以做啲乜嘢去加強巴士運作嘅安全，咁呢個就係個  
3 個討論嘅結果，咁所以我哋就係朝呢個方向去。

4 主席：（經傳譯員）個個問題，我諗其實就係譬如話喺立法會、區議會、媒體、公眾  
5 都係有提話——係因為有呢啲情況先至即你令到你會去睇呢啲事項，咁講係咪公  
6 道？

7 陳英傑先生：（經傳譯員）係嘅。

8 陳政龍先生：（經傳譯員）可唔可以特別聚焦睇呢個 BMCS，即係巴士監控系統，巴  
9 士監控系統。呢個考慮就係因為科技進步，即係黑盒個個科技進步先至會考慮  
10 嘅，咁係咪一個公道嘅觀察？

11 陳英傑先生：（經傳譯員）係，黑盒可以話係一個主要嘅元素喺呢個監控系統裏面  
12 嘅。

13 陳政龍先生：（經傳譯員）係喇，就係因為有黑盒，先至可以令到巴士監控嘅系統可  
14 以再有新嘅進步嘅措施？

15 陳英傑先生：（經傳譯員）係。

16 陳政龍先生：（經傳譯員）咁運輸署就要求專營巴士公司就今朝嗰份文件——即係睇到  
17 2003 年嗰份文件就要求你哋做一啲嘅設施，咁而喺今朝我哋亦都有提及㗎喇，  
18 咁就喺嗰個報告 2.2 段，我而家想問一問你嘅。唔好意思，係 2.22 段。我哋  
19 今朝都講過呢一樣嘅，就係附件二就係已經更新咗個對黑盒嘅要求，唔係你  
20 喇，係嗰個報告書咁講，2.2 話「再者，工作小組就係備悉運輸署最近係檢討  
21 過同埋係更新咗電子數據紀錄儀嘅基本要求，咁最初係 2003 年頒布」。咁我想  
22 知道嗰個嘅——上一次係幾時檢討呢一個嘅最低要求，同埋點解有咁樣嘅檢討？

23 陳英傑先生：（經傳譯員）呢個就係檢討嗰啲嘅電子數據紀錄儀裏面嘅——巴士裏面所  
24 用嘅佢哋嘅功能喇，嗰個嘅容量喇，咁呢一個嘅檢討就令我哋知道嗰啲黑盒係  
25 可以記錄或者係可以幫助我哋加強呢個巴士監控嘅系統，咁我哋就話呢個對於  
26 電子紀錄儀嘅——數據紀錄儀嘅基本要求更新咗。

27 主席：（經傳譯員）對唔住，呢個係因為咩嘢？因為呢一個檢討——因為呢一個委員  
28 會？

29 陳英傑先生：（經傳譯員）係，呢個檢討。

30 主席：（經傳譯員）唔該。

31 陳政龍先生：（經傳譯員）仍然講緊呢個巴士監控系統，請你去睇 5.14 段。5.14  
32 段即係報告書裏面就話「再者，運輸署係好希望睇到巴士監控系統嗰個嘅發展  
33 同埋試用，因為佢係能夠令到專營巴士公司採納一個更全面嘅方法嚟到去改善  
34 巴士安全同埋車隊嘅管理同埋控制嘅。咁除咗呢啲巴士公司喺海外嘅試行之

1 外，運輸署都係打算請一個嘅服務提供者去做一個獨立嘅試行，喺車輛上面嚟  
2 到去評估一下用呢個地理圍欄嘅科技係咪用得到同埋係咪有效，例如去控制車  
3 速，咁呢個就係呢一個系統一個非常重要嘅一點。向前望，運輸署係會喺呢啲  
4 嘅試行計劃裏面去檢討啲嘅結果喇，咁就進一步同專營巴士公司去商討，係  
5 希望發展一個好清晰嘅路線圖，去加強專營巴士嘅監控嘅，咁就係透過呢一個  
6 系統」。好喇，我有幾個問題嘅，關於呢個建議，話請一個嘅服務提供者去做  
7 一啲獨立嘅測試或者試行計劃，咁我想問喺呢方面聘用獨立服務提供者方面有  
8 咩嘢進展？

9 陳英傑先生：（經傳譯員）我哋而家係申請緊資源，即係錢喇，嚟到去做呢個獨立嘅  
10 試行計劃㗎。

11 陳政龍先生：（經傳譯員）咁即係話而家都仲未係話搵到邊一個嘅服務提供者嚟到做  
12 呢一件事嘅？

13 陳英傑先生：（經傳譯員）未嘅。

14 主席：（經傳譯員）呢個「服務提供者」其實咩嘢意思？點解㗎，呢個字？係咪一個  
15 獨立嘅顧問，定係咩嘢？

16 陳英傑先生：（經傳譯員）呢個可以向運輸署提供呢個服務，幫我哋做試行計劃嘅一  
17 方喇，我再講得具體啲，我哋想聘用香港嘅生產力促進局去幫我哋做呢一個嘅  
18 試行計劃嘅，咁但係呢個仲未落實嘅，因為我哋都仲係等緊要有資金先做到。

19 主席：（經傳譯員）或者你幫一幫手，點解你覺得佢哋有咁樣嘅專材去做呢一件事？

20 陳英傑先生：（經傳譯員）我哋係試過去搵不同嘅機構去幫運輸署去做一個獨立嘅研  
21 究嘅，關於地理圍欄嘅科技，因為我哋想係更加積極主動，做多啲嘅研究嘅，  
22 喺呢方面。另外，我哋想有一啲獨立嘅數據去確認，到底巴士公司方面聲稱話  
23 佢哋或者佢哋呢一方面嘅發展係真抑或假嘅，咁喺呢一個去搵合適機構嘅過  
24 程，我哋就發覺香港生產力促進局就係有呢啲嘅車輛嘅部件喇，有有關嘅系統  
25 係喺佢哋個個科研中心，我哋同佢哋傾過，咁我哋相信佢有咁樣嘅能力去做呢  
26 一個研究嘅。

27 主席：（經傳譯員）唔該。

28 陳政龍先生：（經傳譯員）咁從你嘅答案就顯示你仲未有一個嘅確定嘅範圍嘅，係  
29 嘛，呢一個--或者你已經係有一啲複稿？

30 陳英傑先生：（經傳譯員）我哋而家做緊一個嘅項目嘅概要，即係關乎呢一個項目嘅  
31 範疇，但係我哋係想分兩階段嘅，首先要試下地理圍欄技術係有咩嘢辦法令到  
32 佢個定位能力係更加精準。另外，我哋亦都係想喺其他車輛入面試行下，睇  
33 下佢係咪行得通。咁另外我哋如果係有做咗一啲成功嘅試行計劃，我哋就會同  
34 巴士公司個度傾下，睇下佢可唔可以將呢個技術擺擺喺佢哋嘅巴士上面試下，  
35 咁我哋有自己嘅獨立試行計劃，巴士亦都有自己嘅供應商去做一啲差唔多嘅

1 嘢，不過我哋希望可以互相參照，睇下我哋或者佢哋係咪做緊一啲正確嘅事。

2 主席：（經傳譯員）唔好意思，嗰個測試嘅第一部分係測咩嘢？係咪測嗰一個嘅全球  
3 定位系統係咪準確？

4 陳英傑先生：（經傳譯員）呢啲叫做地理圍欄技術，今日最困難嗰方面就係香港呢個  
5 環境用全球定位系統呢一個應用嘅，咁有好多嘅回應就話佢哋唔係幾準確㗎，  
6 咁所以佢哋係要應用地理圍欄技術去提供一個路線方面、道路網絡方面一個更  
7 加準確嘅數據，呢個係要試過先得嘅。據我所知，幫九巴同埋城巴做嘅服務提  
8 供者都係做緊一啲類似嘅技術，咁結果都係唔錯，但係我哋想有一個獨立嘅測  
9 試去核實同埋對呢個技術了解多啲。

10 主席：（經傳譯員）咁呢個技術就係首先一個全球定位系統，咁然後就係用呢個地理  
11 圍欄技術，係咪？

12 陳英傑先生：（經傳譯員）係。

13 主席：（經傳譯員）唔該。

14 陳政龍先生：（經傳譯員）陳生，你係咪有嘢想講？

15 陳英傑先生：（經傳譯員）唔係嘅。

16 陳政龍先生：（經傳譯員）陳生，呢度報告書裏面係有提到一個話類似係聘用一個獨  
17 立或者係外聘一個顧問嚟到去試行其他呢度建議嘅一啲器材，咁呢個就係碰撞  
18 警報裝置同埋保持行車線裝置等等嘅，我想問，運輸署會唔會都係就其他嘅儀  
19 器聘用自己獨立嘅服務提供者或者顧問去試行？如果唔會嘅話，點解？

20 陳英傑先生：（經傳譯員）我哋都想做多啲嘅，但係現實就係需要有資源先做得到。  
21 好似我哋今朝署長咁講喇，我哋而家係想搵一啲資源去成立一個嘅資訊科技組  
22 嚟到去做呢一類型嘅研究嘅，暫時我哋所有嘅資源，好似呢一個咁樣嘅項目，  
23 我哋都要去申請撥款嘅，如果我哋有足夠嘅資源，我哋當然係想做多啲嘅研究  
24 喇。其實喺呢個項目，即係呢個嘅獨立試行項目第二階段我哋就會用呢一個嘅  
25 技術去睇下車輛嗰個嘅車速限制，咁就會試行下可唔可以喺一啲嘅路段上面係  
26 施加呢一個嘅車速限制器嘅。

27 主席：（經傳譯員）係講嗰啲車速限制器係咪即係車速限制減速器？

28 陳英傑先生：（經傳譯員）係。

29 陳政龍先生：（經傳譯員）陳生，我哋都講完咗運輸署點樣處理呢啲種種提高安全嘅  
30 儀器喇，我而家就另一方面想講下倫敦嗰個嘅做法。

31 主席：（經傳譯員）既然你都要開另一個題目，我哋都係要小休㗎喇，亦都畀陳生休  
32 息一陣喇，咁或者我哋而家休息二十分鐘，二十分鐘。

1 陳政龍先生：（經傳譯員）唔該。

2

3 下午 4 時 02 分聆訊押後

4

5 下午 4 時 22 分恢復聆訊

6 出席人士如前。

7

8 主席：（經傳譯員）陳大律師。

9 陳政龍先生：（經傳譯員）主席，咁我有提到新加坡嘅罰則，請等一等。

10 主席：（經傳譯員）係。

11 陳政龍先生：（經傳譯員）文件係形容咗新加坡嘅專營巴士服務，就係 SEC-3 文件  
12 冊嘅第 822 頁，呢個就係文件嘅第 1 頁。唔好意思，應該係 SEC-2 文件夾嘅  
13 822 頁。主席，呢一份文件係立法會秘書處研究部嘅資料文件，咁相關嘅部分就  
14 係 3.19 段，就係第 834 頁。3.19 段，有提到服務質素標準，咁呢一段最後就  
15 講到，暫時，即係目前呢一個服務質素嘅標準就包括以下兩類，(a) 係營運表現  
16 標準，就係量度每日嘅最低或者每月嘅營運嘅標準，咁就包括就係巴士嘅可靠程  
17 度、負載同埋安全；咁而 3.20 段就提出如果唔符合呢啲標準嘅相關嘅罪則。

18 主席：（經傳譯員）係。

19 陳政龍先生：（經傳譯員）咁 835 頁就有一個表，就係服務質素標準，就係有唔同  
20 嘅標題。

21 主席：（經傳譯員）係。

22 陳政龍先生：（經傳譯員）主席，咁你會見到，喺可靠性呢一個標題底下，第三項，  
23 就係巴士故障率，咁個目標就係每個月少於百分之一點五。咁似乎新加坡嘅交通  
24 局都係用呢一個巴士服務意外率即係低於某一個數目，即係話每百萬行車公里七  
25 點五。

26 主席： And as we would express that, 7.5 per million kilometres?

27 陳政龍先生： Yes. And again, page 837 --

28 主席：（經傳譯員）咁呢個係比香港嘅巴士意外率係高嘅？

29 陳政龍先生：（經傳譯員）係，純粹係睇嗰個巴士意外率嘅啫。

1 主席：（經傳譯員）咁呢一個就講到對專營巴士嘅罰則？

2 陳政龍先生： Yes, that's correct.

3 主席：（經傳譯員）咁我哋已經問過新加坡嘅陸路交通當局，就我哋有問過佢哋有冇  
4 即係畀過呢啲嘅罰款，係咪？

5 陳政龍先生：（經傳譯員）係，我哋係問過新加坡嘅交通當局一啲嘅問題嘅。

6 主席：（經傳譯員）咁係咪即係從來未施加過呢一啲嘅懲罰？

7 陳政龍先生：（經傳譯員）係，冇錯。

8 主席：（經傳譯員）唔該晒。

9 陳政龍先生：（經傳譯員）陳先生，喺休息之前，我就希望比較一下香港同埋倫敦嘅  
10 做法。首先，我想講一講佢哋所謂嘅智能車速調節系統，即係同我哋嗰個地理圍  
11 欄嘅概念係相似嘅，咁我想先你睇下呢一份文件。

12 主席：（經傳譯員）你同唔同意呢個講法，智能車速調節系統係同地理圍欄係相似  
13 嘅，你同唔同意？

14 陳英傑先生：（經傳譯員）係。

15 陳政龍先生：（經傳譯員）我想你睇下一份文件，就係 MISC-3 文件冊嘅 939 頁。  
16 陳生，你面前睇到嘅應該就係一份報告嘅第 1 頁，係倫敦運輸局所發表，個題目  
17 就係智能車速調節設計，日期就係 2009 年 12 月。可唔可以首先睇下呢個報告  
18 嗰個引言？咁就可以畀大家有個背景係咩嘢情況，或者去 945 頁。呢度引言--  
19 我讀出頭兩段。「ISA 軟件設計嘅制訂就喺 80 年代喺法國開始，咁就自此喺  
20 唔同嘅市場都有評估，證實係有效可以減少--減低車速，同埋喺道路上嘅事  
21 故。喺 2009 年 5 月，倫敦運輸交通局就開始一個測試，就用最新嘅嗰套智能系  
22 統，就希望可以減低車速同埋道路交通嘅意外。咁喺呢個測試之前，倫敦運輸局  
23 已經係制訂咗一套全面嘅電子車速限制地圖，即係係所有城市都有嘅，咁總共有  
24 三種唔同嘅智能系統嘅模式，而家係有個叫勸喻式，一個係自願式，一個係硬性  
25 規定，就強制式。咁如果係勸喻式，就即係顯示嗰個速度限--車速限制畀司  
26 機，就通過呢個電子地圖，等司機可以睇到；而自願，就再進一步就係會將呢個  
27 車速嘅限制嘅資料，同嗰個汽車嘅引擎管理電子系統係連結喺上嚟，咁喺呢個自  
28 願系統之下，如果熄咗呢個設備嘅時候，司機係可能咁選擇咁樣做，咁就變咗嗰  
29 個裝置就唔會影響嗰個加速。」咁另外再睇下落幾段就係「到目前為止，佢已經  
30 做咗一年嘅呢個計劃，即係倫敦嗰面，咁佢等佢哋可以認識，同埋探討到倫敦司  
31 機嗰個駕駛態度，同埋要做呢個系統，有啲咩嘢嘅可能嘅障礙等等。」咁即係  
32 話，倫敦交通局就一路睇緊呢套嘅智能系統，智能車速調節系統喇，即係 ISA。

33 咁第二份文件我想你睇嘅，都係講同一個課題，就係運輸及研究實驗所嘅  
34 一份報告，日期就係 2016 年 11 月，喺同一個文件冊裏面，我想你睇 1002

1 頁。陳生，你面前應該睇到嘅就係 TRL，即係倫敦運輸研究實驗所嘅一份報  
2 告，就係話倫敦巴士上面，裝咗呢個智能車速輔助系統。咁你睇到嗰個報告個  
3 日期，喺上面就係 2016 年 11 月。咁又係嘞，我哋講講呢份報告嘅引言嗰度相  
4 關內容，1011 頁。喺中間嗰部分嗰頁，就話嘞，ISA 係咩嘢，咁第一段就描述  
5 呢一個智能系統係咩嘢，就同我之前讀出嗰個係好近似。由第二段就係咁講，就  
6 話「為呢個即係呢個行人輔助--行人安全行動計劃，我哋管理局就係承諾就會  
7 做一個試驗計劃，喺少量嘅巴士上面做，睇下佢呢個係--個科技係點樣應用。  
8 咁之後喺 2015 年，倫敦運輸局就係進行咗一個智能系統嘅測試，就係倫敦巴士  
9 上面做，咁就係一間公司 Zeta Automotive 所提供嘅系統嚟。」咁呢個報告  
10 日期就係 2016 年 11 月，而嗰個測試就係 2015 年進行。

11 而家去 1105 頁，咁都係就係嗰份報告嘅附錄嚟。呢份報告就係講到嗰個  
12 試驗計劃，咁日期就係 2015 年 10 月，咁就解釋咗當中發生嘅事。咁 1106 就  
13 畀多少少資料我哋嘞，就係話「管理局就做呢個智能車速輔助科技，咁就係主要  
14 係喺--即係睇下嗰個--即係外在嘅就係關於嗰個車輛嘅速度，同埋內在嘅資料  
15 同埋外在資料就係嗰個車速限制，咁呢度就係已經喺歐洲同埋其他地方有使用，  
16 證明都可以改善道路安全，而司機亦都接受。」咁或者係 1120 頁，我哋睇到第  
17 二次做試驗嘅日期，就係 2016 年 1 月，就係 1120 頁，同一份報告，就係第二  
18 階段嘅試驗。所以呢度就顯示，呢個 ISA 系統就係倫敦嘅運輸局就有考慮，咁  
19 佢哋喺 2009 年就已經考慮，然後 15 年、16 年都做個試驗。咁呢個主要就係--  
20 --即係倫敦嗰方面就係就住呢個智能車速調節系統係做過大量嘅分析，係咪呢啲  
21 情況都係喺個大埔意外之前出現嘅呢，即係做嘅呢？

22 陳英傑先生：（經傳譯員）我哋係唔知道㗎。

23 陳政龍先生：（經傳譯員）好，我哋而家唔好講呢個 ISA，我哋講番倫敦係有個計劃  
24 加強巴士安全。首先，Weston 先生嘅報告裏面，就係專家文件冊 148 頁。

25 主席：（經傳譯員）嗰份文件本身嘅頁碼係幾多？

26 陳政龍先生：（經傳譯員）34。

27 主席：Thank you.

28 陳政龍先生：（經傳譯員）我睇緊嘅係 7.5 段，就係巴士安全標準。陳生，我會讀  
29 出頭兩段，即係 7.5 嗰度，因為呢個提供咗嗰個背景就係話倫敦嗰方面係點  
30 樣定嗰個巴士安全標準。「巴士安全計劃第一個關鍵嘅成果就係要制訂一個新嘅  
31 巴士安全標準，運輸局一路都--自從 2016 年就同道路安全顧問 TRL，一間  
32 Loughborough 嘅大學，同埋巴士營運商同埋製造商，一齊去評估同埋提出  
33 一啲建議，建議一啲設施就可以加入去未來嘅巴士設計裏面，咁主要目標就係減少  
34 傷亡，特別係嚴重嘅傷亡同埋死亡。咁有幾個可能又可以考慮嘅技術，包括就係  
35 智能車速調節系統，自動剎車系統，同埋好多其他嘅設施。咁就係所有每一項設  
36 施嗰個成本效益都係全面咁樣去評估，確保我哋一方面可以盡量減少傷亡，但係  
37 同時亦都係喺我--就住我哋所做嘅財務投資嗰度，得到最高嘅回報，從傷亡減

1 少嘅角度嚟睇。」咁呢個就係 2016 年開始嘅工作，到而家都未完成。

2 主席：（經傳譯員）呢個係 Weston 先生嘅報告，係咪呀？

3 陳政龍先生：（經傳譯員）係，而呢度就有個參考嘅資料，就係喺第 18 日嘅聽證  
4 會，即係 2018 年 9 月 27 號，第 115 頁，第 7 行，即係謄本嗰度。

5 主席： Thank you.

6 陳政龍先生：（經傳譯員）好似主席今朝都提到，巴士安全標準，我哋預期應該係喺  
7 2018 年 10 月中嘅時候公布，咁即係話呢個過程係超過兩年。

8 主席：（經傳譯員）我諗係原本係想逐--分階段咁推出，第一階段就應該喺 10 月公  
9 布。

10 陳政龍先生：（經傳譯員）係，我可以繼續睇落去，如果去到 148 頁，即係同一個  
11 報告，再落啲，同一頁，喺中間嗰度，就話「我哋倫敦運輸局計劃第一階段嘅巴  
12 士安全標準就會喺 2018 年 10 月 16 號公布，咁佢哋預計就會三個嘅開始嘅--  
13 三個嘅階段，就係第一、第二、第三階段去引入。」咁我哋睇番香港嘅--喺香  
14 港嘅做法，亦都睇到倫敦嘅做法，咁你對於一個建議，就話運輸署之前嘅加強巴  
15 士安全嘅做法，似乎更多係回應意外，即係喺意外發生之後先至回應，而唔係主  
16 動積極咁，同埋有系統咁樣去睇下仲有啲咩額外措施可以加強巴士安全，就避  
17 免發生意外？

18 陳英傑先生：（經傳譯員）我就唔可以評論嗰個背景，就話倫敦嗰個巴士安全計劃係  
19 點樣出嚟，我哋唔知道有啲乜嘢...

20 主席：（經傳譯員）我哋冇叫你評論嗰點啫。

21 陳英傑先生：（經傳譯員）我明白，我明白。但係我想講嘅就係，我唔知道巴士安全  
22 標準係咪同我哋已經有嘅標準係一樣，因為我哋都有啲最低規格要求，係要求專  
23 營巴士公司做得到。咁呢啲嘅規格，包括所有嘅設施，即係話專營巴士必須要具  
24 備嘅，呢個講就係話要提供服務畀乘客，可以方便利用到巴士服務，咁而好大部  
25 分都係講安全，同埋新嘅安全設施係要加入嘅。呢啲嘅標準，今次我哋又再檢  
26 視，亦都有修訂，就係今年 8 月嘅時候做。我哋會繼續咁做，去包括一啲新嘅標  
27 準。巴士安全標準喺倫敦嗰度話係會引進或者檢視㗎喇，咁佢哋有好多個階段，  
28 咁我會相信佢哋應該係好全面，亦都好複雜嘅一個計劃㗎。運輸署肯定會睇下從  
29 中可以學習到啲乜嘢嘢，又正如署長講，遲啲我哋會派人去英國㗎，肯定呢個係  
30 其中一方面我哋會睇嘅。

31 陳政龍先生：（經傳譯員）陳生，咁我可唔可以繼續請你睇下委員會聽過嘅一啲建  
32 議，你嘅睇法係點嘅？就係話點樣可以積極主動咁去加強巴士安全嘅一啲建議。  
33 首先，委員會聽到有好多嘅名詞提及，其中一個就係巴士營運商論壇，呢個係  
34 Weston 先生講嘅，而 Stanley 教授就提到話有一個常設委員會係處理巴士安  
35 全，咁當中就包括咗各個相關嘅人士，或者係各方都有參與佢哋定期開會，合作

1 處理巴士安全嘅事宜。咁喺某程序上，陳女士今朝早都接納咗呢個建議，咁佢話  
2 嗰個工作小組係會繼續--永久存在。

3 主席：（經傳譯員）佢話接納，佢係--佢就係話佢接納咗係 Weston 先生呢個建議  
4 㗎。

5 陳政龍先生：（經傳譯員）咁好，從呢方面睇，咁可以問呢個係可唔可以進一步問  
6 題，係咪準備將呢個工作小組變咗係常設呢？或者先講工作小組最後報告，  
7 5.13 段。係 TD-5 號文件冊，1803 頁，佢內部嗰個頁數就係 43。陳生，請你  
8 睇 5.13 段，就係話運輸署嘅建議行動。咁佢第一部分就講話，你哋會採取啲咩  
9 嘢步驟係回應嗰啲建議，或者最後一句我想睇，第四十--即係佢本身 43 頁嘅最  
10 後一行，就話「運輸署會繼續留意最新嘅裝置同埋科技嘅發展，目的就係想進一  
11 步加強巴士安全，咁運輸署會採取主動積極嘅做法，繼續召集工作小組會議，係  
12 密切咁樣監測住試驗嘅進度，會定期咁做，而且會提供個平台畀運輸署，同埋專  
13 營巴士公司交換意見，睇下最新嘅巴士科技發展，同埋係有啲咩嘢新嘅安全裝置  
14 同埋技術可以應用喺專營巴士上面。」咁呢個其實就係同今朝早陳女士提及話會  
15 延長呢個工作小組嘅壽命嗰點嘞，啱唔啱呀？

16 陳英傑先生：（經傳譯員）係。

17 陳政龍先生：（經傳譯員）有冇任何文件，係列出而家已經係一個常設工作小組嘅細  
18 節嘅呢？例如有冇一份文件，就話佢嗰個工作範圍，擴大咗係點樣樣？有冇話佢  
19 定期開會，同埋有冇文件可以話畀我哋聽，呢個工作小組已經由一個臨時嘅工作  
20 小組變咗一個常設嘅工作小組？

21 陳英傑先生：（經傳譯員）喺現階段，有冇任何文字嘅紀錄嘅，咁佢係肯定，喺我哋同  
22 巴士公司傾嘅時候，我哋會傾呢一點，我哋都略為--之前略為提過喇。因為工  
23 作小組提出咗好多建議，咁所以係需要時間先可以落實。而正如我哋提過，我哋  
24 都會睇下一啲新--即係儘可能仲有冇啲新嘅措施嘅，咁所以工作小組係會繼續  
25 工作。但係好似今朝早都有提到，呢個工作小組會成為一個常設嘅會議，但係暫  
26 時有啲文件上面有寫低。

27 主席：（經傳譯員）你係咪已經取得專營巴士公司同意，繼續做呢個常設嘅基制嘅成  
28 員呢？

29 陳英傑先生： Yes.

30 主席：（經傳譯員）係咪已經口頭上做咗？

31 陳英傑先生：（經傳譯員）係，我哋喺上一次工作小組會議已經有提到㗎嘞。

32 李女士： Last working group meeting.

33 主席： I'm sorry?

34 陳英傑先生：（經傳譯員）即係上一次嘅工作小組會議，我哋有提出呢個睇法，諗

1 法。

2 主席：（經傳譯員）嗰次會議係幾時，日期？

3 陳英傑先生：（經傳譯員）咁嗰次會議，佢哋係冇反對。嗰次會議日期，係 9 月 21  
4 號。

5 主席：（經傳譯員）噯，喺呢個報告嘅 1.5 段有提及嘅。可唔可以畀個頁數我，陳  
6 生？

7 陳政龍先生：（經傳譯員）TD-5 號文件冊，1763 頁。咁嗰度提及話有個會議，喺  
8 1.5 段第 2 行有提及。

9 陳英傑先生：Yes, in the working --

10 主席：（經傳譯員）咁喺嗰次會議嗰度有提及，係咪呀？

11 陳英傑先生：（經傳譯員）係，就係最後，即係嗰個四個工作小組會議嘅最後一個，  
12 就係 9 月 21 號。

13 主席：（經傳譯員）係，嗰個委員會已經收到一整套所有嗰啲會議紀錄嘅正式版本，  
14 或者係草擬版本，係完全冇刪減嘅，咁但係就係 9 月 21 號同 8 月 29 號嘅好似  
15 仲未有，咁你可唔可以提供畀我哋？

16 陳英傑先生：（經傳譯員）上一次會議嘅會議紀錄都仲準備緊，咁又需要巴士公司評  
17 論先。

18 主席：（經傳譯員）係，咁就算係草擬本都可以畀我哋先㗎，一定係有個草擬本喇，  
19 係咪呀？咁一條個草擬本，就用個草擬本提交畀我哋喇。

20 陳英傑先生：（經傳譯員）我哋同巴士公司商量㗎。

21 主席：（經傳譯員）我哋問佢哋嘅時候，佢哋都係同意，但係又話要問下其他啲人，  
22 咁最後我哋得到係一啲刪減過嘅會議紀錄，跟住就城巴就話「係呀，我哋唔介意  
23 畀委員會㗎。」咁我哋要嗰個嘅成個完整版本。

24 陳英傑先生：（經傳譯員）係，我哋會睇下，唯一憂慮嘅就係，嗰啲草稿係未畀其他  
25 委員睇過，咁所以我唔知道嗰個最終嘅版本係咩嘢。

26 主席：（經傳譯員）咁而家就畀佢哋睇嗰啲草稿喇，咁叫佢哋評論喇，如果係有啲咩  
27 嘢嘅保留，咁就改喇。

28 陳英傑先生：（經傳譯員）我哋會考慮佢㗎。

29 主席：（經傳譯員）我覺得呢個係--就係咁喇，你會考慮，好㗎。陳律師。

30 陳政龍先生：（經傳譯員）關於呢個工作小組，我想再問多個問題，就係佢呢個工作  
31 小組再發展落去，嗰個範圍你諗住係點嘞。咁我哋而家啱啱就讀㗎 5.13 段報告

1 書，咁從字裏行間就睇嚟，呢一個工作小組嘅工作範圍係會限嚟討論一啲科技嘅  
2 發展，就係關於點樣改善專營巴士嘅安全，我咁樣講公唔公道？呢個就係工作小  
3 組未來嗰個嘅工作範圍？

4 陳英傑先生：（經傳譯員）係喇，其實工作小組嗰個工作範圍一早已經係界定咗，而  
5 委員會嘅成員嘅共識都係，我哋嘅討論就會限嚟--局限嚟呢啲嘅範圍裏面。

6 陳政龍先生：（經傳譯員）係，咁我哋一開始嘅時候，都係按住時序講，呢個工作小  
7 組點樣成立㗎喇，咁當時就係話呢個工作小組嘅壽命係三個月嘅啫。

8 陳英傑先生： Yes.

9 陳政龍先生：（經傳譯員）但係而家嗰個打算將工作小組變成常設。

10 陳英傑先生： Right.

11 陳政龍先生：（經傳譯員）咁所以我想問，呢一個經過轉型嘅工作小組，係會唔會仍  
12 然工作嘅範圍係咁有限呢？

13 陳英傑先生： No.

14 陳政龍先生：（經傳譯員）會唔會淨係講呢個技術嘅考慮呢？會唔會考慮巴士安全嘅  
15 其他方面，譬如話係巴士有關嘅道路安全嘅事宜，一啲安全嘅做事方法呀咁？

16 陳英傑先生：（經傳譯員）咁範圍改變咗之後，嗰個工作小組就會成為一個常設嘅基  
17 制，我諗。咁我估計佢呢個新嘅基制嘅範疇就會比較原本嗰個範疇闊啲㗎，咁我  
18 諗係可以處理巴士安全其他嘅事項，我哋呢方面係保留開放嘅態度。

19 主席：（經傳譯員）咁即係你預期，呢一個常設嘅工作小組或者係基制就係會個範疇  
20 係包括多所有關於巴士嘅安全，或者安全運作嘅事宜，係咪呢？

21 陳英傑先生：（經傳譯員）係。

22 主席：（經傳譯員）好，唔該。

23 羅先生：（經傳譯員）咁我可唔可以問一個問題呢？

24 主席：（經傳譯員）隨便。

25 羅先生：（經傳譯員）咁關於工作小組嘅成員又係點嘅呢？舉例，警方或者係道路安  
26 全議會，會唔會都係成為佢嘅一員？

27 陳英傑先生：（經傳譯員）因為關於嗰個成員，因為我哋會改變呢個工作小組，成為  
28 一個常設嘅基制，咁嗰個成員我哋要考慮應唔應該係包埋其他嘅人士，咁包括官  
29 方或者非官方。但係嗰個時候，我哋要討論下先，咁睇下呢一個嘅工作--呢  
30 個小組或者佢嘅範疇係點樣運作，包括埋佢嘅成員同埋佢嘅範疇。

31 主席：（經傳譯員）咁你預期呢啲嘅問題幾時可以落實到呢？幾時先至可以定出工作

1 小組嘅範圍，同埋佢嘅成員係邊個？

2 陳英傑先生：（經傳譯員）我只可以話我哋希望儘快，因為有千百萬樣嘢都係發生  
3 緊，我哋當然希望就係儘快將新嘅措施係實施。

4 主席：（經傳譯員）可唔可以喺呢個年尾之前呀？你而家係到底係搵緊工作小組嘅範  
5 疇定係成員？呢個兩樣嘢嚟嘅。

6 陳英傑先生：（經傳譯員）我諗我哋希望如果年尾做得到就係我哋嘅目標喇。

7 主席：（經傳譯員）即係你覺得係一個可能達得到嘅目標？

8 陳英傑先生：（經傳譯員）係。

9 主席： Potential?

10 陳英傑先生：（經傳譯員）係，我哋都要留意番，我哋而家係想攞一啲資源多啲嘅支  
11 援，多啲嘅資源，嚟到去實施有關嘅措施，咁呢點我哋要考慮在內。

12 主席：（經傳譯員）陳律師。

13 陳政龍先生：（經傳譯員）下一個嘅建議係向委員會提過嘅，就係可以鼓勵一個比較  
14 積極主動嘅做法，就係喺倫敦，佢哋有個安全創新基金，可以睇你--睇下關乎  
15 呢個基金嘅證供，咁睇下你自己有乜嘢觀察嘞。係專家文件夾 146 頁。

16 主席：（經傳譯員）即係 Weston 先生嘅報告？

17 陳政龍先生：（經傳譯員）係，Weston 先生嘅報告，自己嘅頁數就係 32。

18 主席：（經傳譯員）好，唔該。

19 陳政龍先生：（經傳譯員）咁喺 7.3 段，安全創新基金。我再讀出嚟喇，「喺 2017  
20 年 11 月嘅時候，倫敦運輸局就係宣布佢安全創新基金嗰部分，就係會係提供  
21 500,000 英鎊畀六間巴士公司，去發展新嘅嘅概念，嚟到改善倫敦嘅巴士網絡  
22 嘅安全，咁呢六間公司全部都係就佢哋嘅安全嘅設備，同埋改善工作嘅行為，員  
23 工嘅表現，係得到呢啲基金嘅支助。咁亦都係佢哋做嘅試行計劃又係一個資料搜  
24 集嘅過程，亦都係後來係擺咗入去發展呢個巴士安全標準。」好，而家我想去另  
25 外一段，係 152 頁，就係 Weston 先生嘅建議。主席，呢個係 38 頁，呢個報告  
26 書嘅 38 頁。

27 主席： Thank you.

28 陳政龍先生：（經傳譯員）呢個相關嘅建議，Weston 先生提出嘅，就係喺網絡財務  
29 表現嗰度，係成段我想讀出嚟嘞。「我哋應該要考慮某啲嘅安全措施，例如話係  
30 引用新嘅安全技術，同埋車長嘅訓練，目標就係要加強安全，係應該由運輸署以  
31 直接資助嘅形式，喺專營協議以外，係提供畀巴士公司，就要達到一啲指定嘅成  
32 效。咁喺專營協議以外提供一啲資金，係有理據嘅，因為佢可以係令成個嘅社會

1 受益。」咁我想問，運輸署對於成立一個基金有咩睇法？個基金係要嚟資助，  
2 要嚟發展，試用一啲新嘅措施，新嘅器材，嚟改善巴士安全嘅，你哋嘅睇法係咩  
3 嘢呢？

4 陳英傑先生：（經傳譯員）大家都可能知道，香港嘅經營環境同英國係好唔同。我相  
5 信英國嘅巴士服務係由政府畀錢，然後就係外判畀公司。而香港就唔同，我哋就  
6 係用一個嘅商業...

7 主席：（經傳譯員）咩嘢話？

8 陳英傑先生：（經傳譯員）商業嘅原則就係畀巴士公司嚟到經營呢啲嘅網絡。

9 主席：（經傳譯員）咩嘢話？

10 陳英傑先生：（經傳譯員）係要商業上可行嘅商業原則。

11 主席： Thank you.

12 陳英傑先生：（經傳譯員）咁所以呢啲私人公司，即係巴士公司就要負責營運巴士嘅  
13 所有成本，所有開支，咁我哋相信啲嘅器材、巴士，都係由巴士公司去提供，  
14 咁佢哋應該繼續係用呢個模式，英國嘅情況同香港好唔同。關於一啲新嘅措施應  
15 唔應該由政府補貼都係可以討論嘅，呢個問題。事實上，即使今時今日，香港我  
16 哋都係有補貼畀巴士公司，去做呢啲嘅顯示器嘅，係即係一對一咁樣嘅安排。咁  
17 即係話，呢一個嘅建議都唔係話不能夠去考慮嘅，我哋都係持開放嘅態度。但係  
18 話如果單單成立一個基金，有一個特定嘅目標，我相信就會對成個嘅公共巴--  
19 公共運輸嘅系統有一啲成本方面嘅影響，咁但係對一啲個別嘅項目，我哋都係持  
20 開放嘅態度，可以係討論嘅，如果巴士公司認為有需要嘅話。

21 主席：（經傳譯員）呢個你哋補貼緊嘅顯示系統係咩嘢嚟嘅？

22 陳英傑先生：（經傳譯員）而家？

23 主席： Yes.

24 陳英傑先生：（經傳譯員）而家政府係補貼緊畀巴士公司，去安裝一啲實時嘅顯示系  
25 統，喺巴士站，或者係巴士站嗰度顯示，咁另外喺呢啲巴士站嘅座位，即係用一  
26 個一對一咁樣嘅安排，巴士公司負責起--負責一個項目，我哋政府就係補貼另  
27 外一個項目，咁呢個係配對，咁呢一個安排已經係實施緊，我哋係都係提供咗一  
28 啲協助，嚟到係推行一啲對整體運輸大眾有益嘅呢啲措施。

29 主席：（經傳譯員）呢個實時嘅顯示系統，就係等搭車嘅人知道大概下一班車幾時  
30 到？

31 陳英傑先生：（經傳譯員）係嘞。

32 主席：（經傳譯員）咁你就話政府係一個一對一嘅配對？

- 1 陳英傑先生：（經傳譯員）係。
- 2 主席：（經傳譯員）咁巴士就係公司提供一個，政府就提供另一個？
- 3 陳英傑先生：（經傳譯員）係。
- 4 主席：（經傳譯員）咁啲啲——係嘞，巴士站，巴士座位，巴士站嘅座位又點呢？
- 5 陳英傑先生：（經傳譯員）係，係巴士站啲啲座位。
- 6 主席：（經傳譯員）亦都係一對一嘅？
- 7 陳英傑先生： Yes.
- 8 黃志光先生： Seats no. All subsidised by government.
- 9 陳英傑先生：（經傳譯員）對唔住，係座位...
- 10 主席：（經傳譯員）乜啲啲座位嘅情況係點呀？
- 11 黃志光先生：（經傳譯員）即係我哋就係話喺巴士站上蓋下面，如果佢哋係要裝呢啲  
12 座位，就係由巴士公司佢哋自己起嘅。咁至於啲啲嘅預計巴士到達時間，我哋就  
13 叫啲啲顯示系統，咁就係一個配對，一對一嘅安排。
- 14 主席：（經傳譯員）咁即係你係畀錢畀啲乘客，就睇下啲啲嘅顯示器，睇下巴士幾時  
15 到，你哋就出資興建一個，咁巴士公司就一個？
- 16 黃志光先生：（經傳譯員）係呀，咁關於啲啲座位，我哋就係特別喺老人家同埋一啲  
17 有需要嘅人士，都係好多嘅要求，希望喺巴士站提供座位嘅。咁政府其實喺施政  
18 報告都係話呢個政策，我哋會補貼巴士公司係儘快提供座位，咁等有需要嘅人係  
19 可以有多啲嘅位嚟坐。
- 20 主席：（經傳譯員）咁邊個畀錢起呢個巴士站嘅上蓋？
- 21 陳英傑先生：（經傳譯員）巴士公司。
- 22 主席：（經傳譯員）好，唔該。陳律師。
- 23 陳政龍先生：（經傳譯員）另外一個建議，Weston 先生——Stanley 教授亦都係向  
24 委員會建議，就係話要有一個嘅獨立嘅安全嘅規管機構。咁你都讀過——睇過  
25 Stanley 教授嘅報告喇，咁我就講講個背景先。喺澳洲...
- 26 主席：（經傳譯員）我諗畀我哋去睇下 Stanley 教授嘅建議，咁就等我哋大家理解  
27 下。
- 28 陳政龍先生：（經傳譯員）好，咁我就帶大家睇 Stanley 教授嘅報告書嘅兩部分，  
29 第一個就係專家文件夾，第 70 頁。咁呢個就係 Stanley 教授嘅第二份報告。

1 主席： Thank you.

2 陳政龍先生：（經傳譯員）佢自己報告嘅頁碼係 70。主席，請大家睇睇第 70 頁。佢  
3 嗰個嘅大題目係管治，跟住就係主要嘅機構，同埋角色。咁呢一度就係香港嗰個  
4 嘅房運局喺 4 月 24 號嘅一個意見嘞。就係房運局就係負責嗰個嘅策略嘅角色，  
5 咁運輸署就係實際提供服務㗎，咁呢個就係同物業局嘅安排係類似。「維多利亞  
6 運輸局就係有一個策略嘅角色，而佢哋嘅公共運輸發展局就係負責去執行。咁但  
7 係兩者有一個好明顯嘅差別，就係墨爾本有一個獨立嘅安全規管當局，就係喺策  
8 略性嘅層面嚟到運作嘅。咁呢個維多利亞嘅運輸，交通嘅安全就係喺佢哋 2010  
9 年嘅法案嗰度成立㗎。咁但係喺香港，我哋就有一個對等嘅當局，運輸署就係去  
10 監察專營巴士公司嘅安全表現，而都係負責促進一啲安全嘅措施，但係香港有一  
11 個獨立嘅安全規管當局，咁似乎就係減低咗大家對安全問題嘅關注嘞。」呢個就  
12 係第一部分我想大家留意嘅。第二部分，請大家揭去第 99 頁，同一沓嘅文件。  
13 主席，呢個文件本身嘅--報告嘅本身頁數係 46 頁。

14 主席：（經傳譯員）唔該。

15 陳政龍先生：（經傳譯員）大概係中間嗰度，我就會係讀一、二、三段下面嗰一段，  
16 教授就話「呢個維多利亞巴士公司係會有營運方面嘅支援，呢個係業界嘅委員  
17 會。咁譬如話佢哋係會為 MIS、MMS 係發展一啲嘅範本，咁就所有嘅成員都係用  
18 得到嘅。而呢一個運輸安全總監係非常--佢嘅焦點、重點就係發展同埋改善呢  
19 一個巴士業界嘅安全文化，同埋呢個安全風險管理，亦都係同公司同埋業界去改  
20 善佢哋嗰個做法。咁佢哋有一啲指引嘅文件，呢一個運輸安全總監係獨立，就係  
21 令到一個--有一個好好嘅政策，就亦都可以有一個獨立嘅問責同埋透明嘅，呢  
22 一個嘅安全過程。咁就巴士安全就係完全係由呢一個公共交通規管當局嚟到去負  
23 責㗎。」咁喺呢方面嚟講，運輸署嗰個有咩嘢嘅觀察，對於話去成立一個係獨立  
24 嘅交通安全，或者係運輸安全嘅監察當局，你有咩嘢睇法？

25 陳英傑先生：（經傳譯員）我唔知喺澳洲即係墨爾本嗰個業務嘅規模，呢個係維多利  
26 亞省嘅，咁即係據我了解喇，維多利亞省嘅巴士營運就係唔係中央化嘅，咁而監  
27 管嘅規模係好大多。

28 主席：（經傳譯員）呢個就係講緊墨爾本，而唔係整個維多利亞省嘅。

29 陳英傑先生：（經傳譯員）咁但係佢講緊一個巴士監管機構，即係我唔知佢係講成個  
30 維多利亞省咁定係淨係墨爾本。

31 主席： Yes. I follow your point.

32 陳英傑先生：（經傳譯員）就算淨係講墨爾本，即係據我所知，墨爾本嘅巴士業務同  
33 香港好唔同嘅，喺墨爾本係有唔同嘅經營公司喇。

34 主席：（經傳譯員）我諗我哋可以幫下你。

35 陳政龍先生：（經傳譯員）至於話協商嘅服務，就佔路線嘅三分二，就有十五份合

1 約，十二間公司，咁而有三分一嘅路線都係有呢個競爭性嘅競投嘅。咁但係每七  
2 年，係可能係會轉變嘅。

3 陳英傑先生：（經傳譯員）咁講緊係咪少過二十間？

4 主席：（經傳譯員）十三間嘅。

5 陳英傑先生：（經傳譯員）所以你講緊係即係好多唔同嘅巴士營運商，咁而呢啲營運  
6 商嘅監管機構係需要即係管理唔同嘅公司嘅，咁但係喺香港嚟講，我哋有六間嘅  
7 專營巴士公司，咁主要有三個集團，咁龍運、新巴、城巴。

8 主席：Long Win.

9 陳英傑先生：（經傳譯員）九巴、龍運。

10 陳政龍先生：New Lantao is the other one.

11 陳英傑先生：（經傳譯員）新巴同埋城巴，同埋新大嶼山嘅巴士。咁基本上我哋係管  
12 理緊三間集團底下嘅六間專營巴士公司。我可以咁講，咁樣係容易好多，因為我  
13 唔使管理好多唔同嘅公司，如果講緊維持呢啲安全嘅標準，係會相對容易嘅。

14 主席：（經傳譯員）喺香港？

15 陳英傑先生：（經傳譯員）係，喺香港嘅。正如即係署長所講，運輸署係有獨特--即  
16 係特定嘅即係專業嘅分支，咁我哋有道路安全部、車輛標準及安全部，同埋一個  
17 巴士及鐵路科嘅。咁我哋係好嚴謹咁樣去控制同埋管理呢一啲巴士公司嘅，即係  
18 我哋係做得唔錯嘅，因為我哋嘅工作係非常之有效率，因為我哋一個部門只需要  
19 同三大集團係交涉。咁至於提升啲巴士公司嘅質素，或者安全標準，就同墨爾本  
20 唔同，喺墨爾本，係你係要即係說服十幾間公司，先至可以達到你嘅目標。咁至  
21 於即係將呢個工作小組變成一個常規嘅會議，係令到我哋可以有一個即係集中嘅  
22 核心小組，咁呢個會議嘅目標嘅功能，同一個獨立嘅審核機構係好相似，即係同  
23 墨爾本個機構好相似嘅。咁而香港嘅情況嚟講，成立一個獨立嘅監管機構，去即  
24 係監管運輸署同埋巴士公司並不必要嘅。

25 主席：（經傳譯員）咁呢一個會議係包括運輸署同埋巴士公司喇，咁有咩嘢獨立性？  
26 佢哋--即係呢個唔係一個獨立嘅會議嚟嘅？

27 陳英傑先生：（經傳譯員）係，唔係獨立嘅，因為即係有兩方，咁但係我哋可以睇下  
28 個成員嘅組成，咁然後我哋會睇下可唔可以引入一啲獨立嘅意見，咁可以為車務  
29 提供獨立嘅意見。

30 主席：（經傳譯員）你心目中有咩嘢人選？

31 陳英傑先生：（經傳譯員）我哋暫時冇其他人，但係我哋係一定會去探討呢個問題  
32 嘅。

1 羅先生：（經傳譯員）我哋講緊係道路安全議會嘅委員喇，成員喇。

2 陳英傑先生：（經傳譯員）我哋好歡迎佢哋。

3 主席：（經傳譯員）你認為佢哋係獨立，即係如果佢哋成為呢一個工作小組嘅成員，  
4 咁係咪就有一個獨立性响度？你同唔同意？

5 陳英傑先生：（經傳譯員）係嘅，道路安全議會嘅成員都係頗為獨立嘅。

6 主席： Please, Mr Auyeung.

7 歐陽先生：（經傳譯員）咁呢一個--就住呢個工會，就會喺唔同嘅持份者之間，會有  
8 即係定期會議喇，咁呢一個會議唔單只係會講安全嘅，你會講其他嘅事宜。咁運  
9 輸署會唔會有一個即係單位，專門係負責安全，咁樣可唔可行呢？

10 陳英傑先生：（經傳譯員）目前，我哋有一個道路安全及標準研究科，咁呢個單位就  
11 係處理所有公眾--公共交通嘅安全，包括係專營巴士。咁但係呢一個分支並唔  
12 可以達致我哋提升巴士安全嘅目標，因為唔單只係涉及道路，亦都涉及車輛同埋  
13 營運。所以實際嚟講，喺運輸署入面，我哋即係可以成立一個小組，係包括呢啲  
14 唔同嘅分支嘅專家，去特別去睇專營巴士嘅安全，我認為咁樣係可行嘅。

15 歐陽先生：（經傳譯員）咁今朝，署長就表示係有四個單位係共同負責巴士安全嘅，  
16 咁但係呢啲嘅分支係咪有定期會議？會唔會係每月都會會面？

17 陳英傑先生：（經傳譯員）目前就有即係一啲定期嘅會議，即係喺呢啲唔同嘅單位，  
18 咁就住即係成立一個新嘅會議去處理巴士安全嘅事宜，當然呢啲單位都會參與  
19 喇，咁而喺呢個會議入面，我哋內部即係都要安排一啲會議，係去討論同埋去實  
20 施一啲嘅措施嘅。

21 歐陽先生：（經傳譯員）唔該晒。

22 羅先生： May I ask a question?

23 主席：（經傳譯員）羅教授。

24 羅先生：（經傳譯員）我想探討一下呢一個道路安全議會嘅，佢同運輸署同埋警方之  
25 間點樣合作？佢係咪一個獨立嘅機構，去處理安全問題？佢係咪已經有一個獨立  
26 嘅地位？我想知道道路安全議會、運輸署同埋警方之間嘅合作關係，同埋呢一個  
27 道路安全嘅研究委員會嘅，咁呢四個單位係點樣去合作處理安全問題？

28 陳英傑先生：（經傳譯員）咁喺呢個問題，我想請邱先生去講一講嘅。

29 主席： Yes, please.

30 邱國鼎先生：（經傳譯員）唔該，主席。道路安全議會係包括唔同部門嘅同埋局嘅代  
31 表，同埋亦都有啲非官守成員，例如係一啲即係車輛總會、醫委會、香港道路安  
32 全協會、一啲保險界嘅代表等等。咁所以道路安全議會係一個獨立嘅機構嚟，咁

1 喺道路安全議會底下，有兩個委員會，第一，就係道路安全嘅研究委員會，咁羅  
2 教授係其中一名嘅委員；咁另外就係道路安全嘅宣傳委員會，咁就如果我即係喺  
3 呢個研究委員會嗰度，如果我哋有一啲新嘅措施，無論佢哋係關於車輛安全、道  
4 路安全，或者其他嘅問題，都會喺呢一個道路安全嘅研究委員會度傾嘅。咁而道  
5 路安全嘅研究委員會下，我哋係有唔同大學嘅學者，亦都有一啲來自即係相關即  
6 係組織嘅成員嘅，咁而道路安全嘅宣傳委員會，主要係負責公眾教育同埋宣傳。  
7 咁喺道路安全議會底下，我哋係每季都會有--即係同委員會會面，咁而喺道路  
8 安全議會下，即係亦都係運輸署每一季會即係檢討一個意外嘅紀錄，咁而呢啲嘅  
9 意外紀錄會包括巴士嘅意外，咁樣委員會嘅委員就可以提供意見嘅，即係就住巴  
10 士安全表現。

11 主席：（經傳譯員）咁呢啲專營巴士意外嘅數據係喺邊度？

12 邱國鼎先生：（經傳譯員）即係同其他嘅意外紀錄一樣，我哋係會即係依賴警方嘅數  
13 據。

14 主席：（經傳譯員）咁即係主要係靠警方嘅數據？

15 邱國鼎先生： Yes.

16 主席：（經傳譯員）然後你就會整理同埋分析，係咪？

17 邱國鼎先生： Yes.

18 主席：（經傳譯員）邊個做㗎？

19 邱國鼎先生：（經傳譯員）我哋嘅同事，即係運輸署嘅同事，咁我哋就會向委員匯報  
20 呢個安全表現，趨勢等等。

21 主席：（經傳譯員）你可唔可以向--對正個咪講嘢？你就睇警方嘅紀錄，運輸署就  
22 會加以整理同埋分析嘅？

23 邱國鼎先生：（經傳譯員）係，然後我哋就會將呢個安全表現匯報畀安全議會嘅委  
24 員，我哋就會講下我哋嘅觀察、趨勢，同埋一啲共同嘅--共通嘅成因等等。因  
25 為道路安全議會就係包括唔同嘅局、警方同埋第三方嘅代表，如果佢哋有任何意  
26 見，或者建議，即係就住政策，或者係改善嘅巴士安全嘅措施，咁就會喺道路安  
27 全議會度傾嘅，咁而議會嘅委員就會進一步跟進嘅。

28 主席：（經傳譯員）道路安全議會會唔會就住改善專營巴士安全，係作出一啲建議？

29 陳英傑先生：（經傳譯員）喺近年嚟講，佢哋就有即係提供建議。

30 主席：（經傳譯員）佢哋有冇曾經提供過一啲改善專營巴士安全嘅建議？

31 邱國鼎先生：（經傳譯員）因為建議可能涉及立法同埋執法，同埋宣傳，咁據我即係  
32 所知，就有特別講關於立法嘅意見，但係就係有一啲建議就係關於執法同埋宣

1 傳，咁目的就係改善巴士安全。

2 主席：（經傳譯員）你可唔可以畀啲例子我哋，即係曾經即係作出過嘅建議？

3 邱國鼎先生：（經傳譯員）例如我哋係分析咗意外嘅成因，例如係乘客失去平衡，咁  
4 而我哋係即係向道路安全議會作出嘅建議，就係主要係即係提醒乘客就係緊握扶  
5 手，咁呢個係其中一個例子。

6 主席：（經傳譯員）即係有冇任何其他嘅建議，係關於巴士嘅設計、安全裝置、安全  
7 帶，即係議會有冇即係作出過呢啲嘅建議？

8 邱國鼎先生：（經傳譯員）冇，我諗個原因就係喺過去幾年，整體嘅意外數字都係維  
9 持穩定嘅，即係就住專營巴士。

10 主席：（經傳譯員）咁如果係咁，唔係應該更加即係作出一啲建議咩？即係意外數字  
11 係冇下降到咁，咁樣唔係應該更加係需要即係作出一啲建議？咁倫敦嘅情況，佢  
12 哋係有一個零意外嘅目標嘅，咁目標就係即係令到意外減少，咁佢哋就有個咁嘅  
13 零意外目標嘅。咁佢哋嘅意外率係下降緊，而佢哋亦都係有一啲嘅建議。

14 邱國鼎先生：（經傳譯員）我哋亦都係有一啲即係目標，即係去--我哋亦都係有一啲  
15 即係建議就係減低呢一個意外率，就係所有交通工具意外率，唔單只係專營巴  
16 士。

17 主席：（經傳譯員）咁實際上，道路安全議會係咪冇即係就住專營巴士作出任何即係  
18 針對性嘅建議，即係除咗緊握扶手之外？

19 邱國鼎先生：（經傳譯員）正如我所講，呢個係一個即係宣傳措施嘅例子。咁道路安  
20 全議會就係有即係提供一啲建議去加強宣傳同埋執法，即係而喺執法方面，道路  
21 安全議會亦都係有一啲建議嘅。

22 主席：（經傳譯員）邊方面嘅執法？

23 邱國鼎先生：（經傳譯員）例如係違泊等等，因為即係喺啲巴士站嘅違泊情況，因為  
24 就會影響巴士嘅營運。

25 主席：（經傳譯員）幾時作出呢啲建議㗎，係？

26 邱國鼎先生：（經傳譯員）我要即係睇番啲紀錄先。

27 主席：（經傳譯員）你可唔可以向我哋提供呢個資料？因為呢個就係即係一直以嚟，  
28 巴士公司，特別係九巴工會同埋車長即係嘅一個持續嘅問題嚟嘅，而係冇解決  
29 到，咁可能佢會覺得即係警方係有咩嘢興趣去處理。

30 邱國鼎先生：（經傳譯員）咁每年，道路安全議會即係都會係即係徵詢個一個嘅--一  
31 個重點交通執法項目，咁喺呢個項目底下，係有包括呢個違泊問題嘅。

32 主席：（經傳譯員）咁請你畀一啲文件我哋，顯示警方係有就住巴士站違泊嘅情況執

1 法嘅。

2 邱國鼎先生：（經傳譯員）我會去睇番啲紀錄。咁我唔肯定呢個係即係特別係喺巴士  
3 站嘅執法，定係一個一般嘅執法。

4 主席： I'm sorry?

5 邱國鼎先生：（經傳譯員）我就要睇下啲紀錄，睇下呢一個即係針對違泊行動係喺即  
6 係針對巴士站咁定係喺即係一般--即係其他地方。

7 主席：（經傳譯員）我諗任何嘅情況都--即係如果有文件，都可以畀我哋嘅。

8 邱國鼎先生： Yes.

9 主席：（經傳譯員）陳大律師。

10 陳政龍先生：（經傳譯員）主席，我想講下呢一個安全帶嘅問題，咁但係我見個時間  
11 就可能差唔多。

12 主席：（經傳譯員）即係可能唔係好適合而家講嘞。咁但係陳大律師，如果即係有嘢  
13 你想講，就請你而家講。

14 陳英傑先生：（經傳譯員）喺巴士站違泊嘅執法問題，呢個就唔係道路安全議會嘅主  
15 要工作。咁正如你所講，但係呢一個就係工會同埋巴士公司指出嘅一個問題，運  
16 輸署係已經係有主動去做咗一啲嘢，係去要求警方係進行執法，我哋係有收到巴  
17 士公司嘅求助，咁我哋就會即係將呢啲個案轉介，咁然後我哋就會跟進下，睇下  
18 究竟佢哋有冇做到。咁可以咁講喇，呢啲嘅營運問題，主要係由運輸署處理，而  
19 唔係道路安全議會嘅。

20 主席：（經傳譯員）咁我哋係有即係睇到你呢方面嘅工作，我哋睇到相關嘅書信，而  
21 警方亦都係有提到嘅。

22 陳英傑先生：（經傳譯員）我哋可以即係舉一啲例子。

23 主席：（經傳譯員）我淨係想知道，道路安全議會有邊方面嘅工作就係同提升專營巴  
24 士嘅安全有關，咁但係我哋今日嘅時間就到嘞，咁多謝各位嘅今日嘅協助。咁我  
25 哋要求咗你提供即係一啲嘅文件，即係喺星期六之前，咁我哋而家就會即係休  
26 會，直至星期六繼續嘅。星期六我哋會幾點開始？

27 陳政龍先生：（經傳譯員）係朝早九點半嘅--9 點嘅--10 點嘅，應該係。朝早 10  
28 點，唔好意思。

29 主席：（經傳譯員）咁我哋星期六嘅朝早 10 點繼續，多謝各位。

(10.01 am)

EVIDENCE FROM THE TRANSPORT DEPARTMENT: MS MABLE CHAN,

MS AMY LEE, MS AMY TSE, MR PATRICK WONG, MR YK CHAN,

MR WILLIAM SHUM, MR TONY YAU

CHAIRMAN: Good morning.

MR DEREK CHAN: Good morning.

MS MABLE CHAN: Good morning, Chairman.

CHAIRMAN: Thank you for attending on a Saturday to help us  
take this evidence.

At the outset, let me explain the absence of  
Prof Lo. Prof Lo has duties at Hong Kong University of  
Science and Technology today, because they are hosting  
an Asian Deans' Forum of Engineers, and he is unable to  
attend, but rather than dislocate our hearing, what we  
are going to do is this. We will continue, and  
of course, and because we have a live transcript, we are  
able to -- and this is what we are going to do -- we are  
going to have this emailed to him during the course of  
the day at different stages so that he can review it to  
see if there are questions that he wants to pose and he  
can do that through me.

At the end of the day, of course, he will have  
available the corrected transcript, and we have an audio  
record as well, so he will be able to review everything

1           that has been discussed and, if there are any matters  
2           arising subsequently, then those are matters that we may  
3           find it necessary to pose in written questions.

4           But that explains, I hope, Prof Lo's absence.

5           I'm going to ask Mr Chan now to recommence the  
6           questioning.

7           Examination by MR DEREK CHAN (continued)

8   MR DEREK CHAN: Good morning, Ms Chan, and to your  
9           colleagues as well.

10          Thank you for providing to the committee yesterday  
11          some additional materials on matters arising from the  
12          hearing on Thursday. I would like to follow up on one  
13          matter arising from the new material provided. That is  
14          the material concerning the black box deceleration  
15          threshold.

16          Firstly, can I take this step by step -- can  
17          I firstly remind ourselves what the threshold is  
18          currently, and for that can I take you to appendix 2 to  
19          the report of the Working Group on Enhancement of Safety  
20          of Franchised Buses. The page reference is TD-5,  
21          page 1807.

22          Ms Chan, do you have appendix 2 in front of you?

23   MS MABLE CHAN: Yes.

24   MR DEREK CHAN: This was canvassed with your colleague

25          Mr Chan during Thursday afternoon's session. Attention  
26

1 was drawn to paragraph 4 of this new black box  
2 requirement, which says that the software for analysing  
3 on-board or downloaded data should be capable of  
4 reporting the following:

5 (a) Accident report -- vehicle speed profile at time  
6 interval of 1 second for the 3 minutes period preceding  
7 detection of a 0.4G deceleration."

8 There was a discussion on Thursday afternoon about  
9 the change from 0.2G in the 2003 requirement to 0.4G,  
10 which is what we see here now. There was a discussion  
11 on Thursday afternoon when this was changed and some of  
12 the additional materials that were provided to us  
13 yesterday evening relate to this change. May I just go  
14 through that change, and I also want to ask questions  
15 about the rationale for this selection of the 0.4G  
16 threshold, which we discussed Thursday afternoon, and  
17 the new materials throw some light on that selection.  
18 So I'm going to go through those two issues as I go  
19 through the documents.

20 If I can take it again in stages, firstly, I will go  
21 through the process of the change in I think 2005 to  
22 2006 and 2007. For that, can I refer you to the new  
23 materials that came in last night. I'm going to go to  
24 a document headed "Annex C1".

25 Mr Chairman, I know we are probably both working on  
26

1 unpaginated version.

2 CHAIRMAN: I have annex C1 in front of me.

3 MR DEREK CHAN: For the purposes of the transcript, the  
4 bundle reference now is TD-5, page 1853.

5 Ms Chan, I hope you have before you minutes of  
6 meeting of the Transport Department and CTB liaison  
7 meeting which took place on 19 May 2005.

8 There were a number of representatives present from  
9 the Transport Department. I take it from the names that  
10 appear there that none of the colleagues present today  
11 attended this meeting; would that be correct?

12 MR YK CHAN: Correct.

13 MR DEREK CHAN: If I can go over the page, under the heading  
14 "Black box", paragraph 25 refers to the issue of  
15 retrofitting. At paragraph 26:

16 "Citybus mentioned that during the last Transport  
17 Department/franchised bus companies joint meeting, 2  
18 suggested changes of the black box requirements were  
19 discussed:

20 -- The accident log of the black box should be  
21 triggered by 0.4G deceleration instead of 0.2G;

22 -- The accident log record should be 3 minutes with  
23 30 second after and 2 minutes 30 second before."

24 And at paragraph 27:

25 "The Transport Department advised that they had no  
26

1 objection to the suggested changes and would like to  
2 gather more feedback from operators."

3 So it would appear from this minute that 0.4G was  
4 something that was selected by Citybus; would that be  
5 a correct reading?

6 MR YK CHAN: Can you hear?

7 CHAIRMAN: Yes, we can.

8 MR YK CHAN: I understand that the subject was discussed in  
9 2005. Possibly, it was arising from a request from  
10 Citybus, to see whether the triggering point should be  
11 varied because of the 0.2G deceleration.

12 CHAIRMAN: So the answer is "yes"?

13 MR YK CHAN: Yes.

14 CHAIRMAN: It's Citybus' idea. Try to use "yes" or "no" if  
15 you can -- by all means explain afterwards. But the  
16 answer is "yes"?

17 MR YK CHAN: Yes.

18 CHAIRMAN: Mr Chan.

19 MR DEREK CHAN: If you go to the next document, annex C2,  
20 you have an email more than a year later, on  
21 19 September 2006, attaching the proposed requirements  
22 for the black box to be installed. And over the page,  
23 we see a draft requirement and in a table in the middle  
24 of the page we can see 0.4G being referred to in item 2  
25 and item 4. So that's the position as at September  
26

1           2006.

2           Can I then move on to the next --

3   CHAIRMAN: Just for the purposes of the record, because  
4           things have been redacted, who was the sender of this  
5           information and to whom was it sent? Perhaps, Mr Chan,  
6           you can deal with that.

7   MR DEREK CHAN: Yes, Mr Chairman.

8           It appears from the first page of annex C2 that the  
9           email was sent by a Mr Walter Foo of the Transport  
10          Department; is that a correct reading of the document?

11   MR YK CHAN: May I invite Chief Engineer Shum to reply to  
12          this question?

13   MR DEREK CHAN: Yes.

14   MR WILLIAM SHUM: The email is sent by Mr Walter Foo who is  
15          one of the engineers of the Transport Department at that  
16          moment.

17   MR DEREK CHAN: And it looks like, from what is left  
18          unredacted from the recipients of the email, that the  
19          email was sent to the franchised bus operators; would  
20          that be a correct reading of the email?

21   MR WILLIAM SHUM: Yes. All the recipients are the staff in  
22          various franchise operators, even those which are fully  
23          redacted.

24   MR DEREK CHAN: Mr Chairman, my apologies. I didn't notice  
25          that the letters on the left were not translated in  
26

1 English, so, for the purposes of the record, the first  
2 line is the sender.

3 CHAIRMAN: I can work that out myself, but it's important  
4 that it's in the record because otherwise, when one  
5 reads this later, it needs more explanation.

6 MR DEREK CHAN: Certainly, Mr Chairman.

7 The next document is annex C3, which takes us to  
8 28 March 2007. I hope you have before you the minutes  
9 of the 28th joint meeting between the Transport  
10 Department and franchised bus companies.

11 On the first page, you can see that those present  
12 from the Transport Department and also representatives  
13 of the franchised bus companies were also present, with  
14 their names redacted on the version that we have.

15 Can I then take you over the page to paragraph 5,  
16 which is the only passage on the black box. Under the  
17 heading, "black box data box data recording device", it  
18 is recorded that:

19 "The Transport Department advised that the  
20 functional requirements and specification of the  
21 electronic data recording device had been finalised and  
22 all bus operators would be updated in due course."

23 So that was the position as at March 2007.

24 Then the next document, annex C4, is an email dated  
25 5 October 2007, which attaches the black box  
26

1 specification. Again, can you just confirm that the  
2 email was sent by a Mr Steven Tse and he is a colleague  
3 of yours in the Transport Department?

4 MR WILLIAM SHUM: Yes.

5 MR DEREK CHAN: And the recipients, can you tell us who they  
6 are? Because I only see a reference to KMB and Citybus.

7 MR WILLIAM SHUM: All the distribution, even in the redacted  
8 parts, are the staff of all the franchised bus  
9 operators.

10 CHAIRMAN: Why have they been redacted?

11 MR WILLIAM SHUM: Because the email contains the names of  
12 the staff. That's why we redacted those, the name of  
13 the staff of the franchise operators.

14 CHAIRMAN: Why do you do that? What's so offensive about  
15 someone's name being there? Is this compliance with  
16 data protection? Is it really?

17 MS MABLE CHAN: Chairman, I think, when the staff redacted  
18 in the preparation of the response yesterday, I think  
19 they may not have the time to seek the consent of the  
20 relevant staff. We can certainly --

21 CHAIRMAN: So the answer is "yes"?

22 MS MABLE CHAN: Yes.

23 CHAIRMAN: This is because you are concerned about data  
24 protection?

25 MS MABLE CHAN: Yes.

26

1 CHAIRMAN: That's an extraordinary spanner to throw in the  
2 works of perfectly ordinary correspondence, is it not?

3 MS MABLE CHAN: We are working on a more prudent basis.

4 Thank you, Chairman.

5 CHAIRMAN: I'm not criticising you. It may be the  
6 unintended effects of this legislation.

7 MR DEREK CHAN: Can I then go to the second page of annex  
8 C4, which contains what I understand to be the finalised  
9 black box requirement, after what appears to be two  
10 years of discussions. Would that be a correct  
11 understanding?

12 MR WILLIAM SHUM: Yes.

13 MR DEREK CHAN: So that's the process by which the black box  
14 requirement was changed.

15 Next, I want to go into the rationale of using --

16 CHAIRMAN: Before you do that -- why did this change, if  
17 that's what it was, not find its way into the document  
18 that was issued -- a document of the type that was  
19 issued in August 2018? Why was there a 12-year delay  
20 before it found its way into that format?

21 MR YK CHAN: Chairman, on Thursday I mentioned already that  
22 the process of discussion and eventual change of this  
23 deceleration force took place between 2005-2007, and  
24 I think at that time the staff of the Transport  
25 Department actually recognised that the change -- the

26

1 new deceleration attributes have been taken on board,  
2 but --

3 CHAIRMAN: No. Please answer the question: why was there  
4 a delay of 12 years before it was put into the format  
5 that we now have, August 2018? That is the question,  
6 nothing else.

7 MR YK CHAN: I would say that the staff of the Transport  
8 Department at the time did not take the trouble or  
9 omitted to change these parameters in the specification.

10 CHAIRMAN: So it ought to have been done but it wasn't; is  
11 that it?

12 MR YK CHAN: In hindsight, we believe we should have done it  
13 earlier.

14 CHAIRMAN: Yes. Thank you.

15 Mr Chan.

16 MR DEREK CHAN: Thank you, Mr Chairman.

17 I want to now move to the rationale of using 0.4G as  
18 the threshold. We discussed this on Thursday afternoon.  
19 I'm going to start by reminding you of the evidence  
20 given on Thursday and then go to the new materials to  
21 seek your observations or comments on them.

22 Can I first take you to the transcript of Thursday's  
23 hearing, which is Day 19, 4 October 2018, starting  
24 firstly at page 54.

25 Just to give context to the passage I will be  
26

1 reading, at page 53 there were discussions about why  
2 0.4G deceleration was chosen, and can I pick it up at  
3 page 54, line 4, where Mr Chairman asked the question:

4 "Give us a real example; what does it mean?"

5 Mr Chan said this:

6 "No, the definition of this one is actually -- what  
7 it demonstrates is a deceleration force of 3.92 metres  
8 per second, which would be experienced by a passenger  
9 sitting on a seat would fall off the seat. So this is  
10 sort of a braking force that is large enough or  
11 deceleration force large enough to cause a passenger who  
12 normally sits on a seat and fall off. So this is a  
13 requirement specified in this equipment.

14 Chairman: So a passenger seated but without a seat  
15 belt would fall off a seat at this level of  
16 deceleration?

17 Mr Chan: Fall off the seat -- well, now, to put it  
18 more technically, there was no dislodgement of passenger  
19 from the seat in more than 95 per cent of the sample  
20 cases. So this is a probability of 95 per cent of the  
21 passengers would probably fall off the seat without  
22 a seat belt, if a retardation force of 0.4G is applied  
23 on the bus suddenly."

24 So that's the first part I want to take you to.

25 CHAIRMAN: Before we move on, which is it, no dislodgement  
26

1 of 95 per cent, or a possibility that 95 per cent would  
2 fall off? They are contradictory, aren't they?

3 MR YK CHAN: I think I would clarify this point. It is the  
4 probability of -- 95 per cent of the probability of  
5 passengers would not be dislodged from the seat.

6 CHAIRMAN: Would not?

7 MR YK CHAN: Would not.

8 MR DEREK CHAN: That figure of 95 per cent is something I am  
9 going to take up with you in the article that you  
10 provided to us.

11 CHAIRMAN: So 95 per cent of passengers seated but without  
12 a seat belt would not be dislodged from their seat by  
13 0.4G deceleration?

14 MR YK CHAN: That's correct.

15 CHAIRMAN: Thank you.

16 MR DEREK CHAN: Still on the same issue, can I move forward  
17 a little bit in the transcript to page 61, and pick it  
18 up at line 3. The question from Mr Chairman was this:  
19 "Can you answer this question: why was it changed  
20 from 0.2 to 0.4?

21 Mr Chan: The reason is that in 2006, when we  
22 discussed with the operators on this minimum  
23 specification, actually when we have meeting with them  
24 and assessing the performance of the requirement, it was  
25 come out that because the 0.2 really is a very, very,

26

1       very light deceleration force which will come up very,  
2       very frequently and doesn't provide any meaningful  
3       indication for monitoring purpose, and at that time we  
4       have discussed with the operators and agreed at meetings  
5       that the 0.2G version was changed to 0.4, but  
6       unfortunately, at that time, the number hadn't been  
7       changed in the specification, so this time we take the  
8       opportunity to update it."

9       So there's a reference there -- the point that  
10      I want to take from that is the operators are saying,  
11      "Look, 0.2 is too low; you get a lot of hits coming up."

12      Page 62, I'm going to read it from line 8, it's the  
13      question from Mr Chairman:

14      "This reference that you made to 95 per cent of  
15      people fall off the seat at 0.4G deceleration, is that  
16      a study that someone has conducted?

17      Mr Chan: From our search, it was a study conducted  
18      by the US Department of Transportation in 1977.

19      Chairman: Can you give us the details of that? Do  
20      you have that paper?

21      Mr Chan: We can provide it later."

22      Just pausing here, that has now been provided by the  
23      Transport Department at annex D of the materials  
24      provided to us yesterday evening. I'm going to go to  
25      that next, but can I just finish off reading the rest of  
26

1 the transcript, because it's relevant to the point that  
2 I wish to take you to in the discussion paper. I will  
3 pick it up again at line 16, where my question was:

4 "Does the study that you refer to include the  
5 probabilities of standing passengers losing their  
6 balance at 0.2 versus 0.4G?

7 Mr Chan: Unfortunately, there is no reference made  
8 to the standing passengers, because for sitting  
9 passenger you have a proper seat and people will sit in  
10 a prescribed, defined area, but for people standing,  
11 that is another matter, because how people stand is  
12 really -- there's not much control and also there's no  
13 set form of standing. So, from that, we don't have any  
14 sort of equivalent deceleration force applied make  
15 reference to standing passengers.

16 Chairman: Yes, but we can readily infer by using  
17 common sense that they would all be on the floor,  
18 wouldn't they, if not through the front of the bus?

19 Mr Chan: Yes and no. Because it really depends on  
20 how people stand, and we actually specify in the buses  
21 there are lots of devices to facilitate standing  
22 passengers, holding bars and grips, and if people are  
23 doing the right thing when standing then I think the  
24 chance of falling down may not be as severe. But of  
25 course we understand people, they come on the bus

26

1 carrying their packages and walk around when the bus is  
2 moving, then that's another matter."

3 The point I wish to pick up when I go to the study  
4 is the 0.4G and 95 per cent issue and secondly, whether  
5 there is any scientific data for standing passengers.

6 For that, can I take you to annex D of the materials  
7 provided yesterday.

8 Excuse me, Mr Chairman, I will just get the page  
9 reference.

10 CHAIRMAN: Yes.

11 MR DEREK CHAN: For the record, it's TD-5, page 1862.

12 CHAIRMAN: Thank you.

13 MR DEREK CHAN: Mr Chairman, I will be working off the  
14 internal pagination.

15 CHAIRMAN: As always, so am I.

16 MR DEREK CHAN: Mr Chan, can I first take you to the  
17 introduction to this paper, at page 9 of 28 in the top  
18 right-hand corner.

19 CHAIRMAN: Can you supply a paginated number for that, for  
20 future use?

21 MR DEREK CHAN: Yes. The bundle pagination is page 1870, in  
22 bundle TD-5.

23 CHAIRMAN: Thank you.

24 MR DEREK CHAN: If I can just read the first two paragraphs  
25 of this introduction:  
26

1           "Very little experimental research has been  
2           performed on the effects of deceleration on seated users  
3           of ground transportation. Of this limited research,  
4           only two previous studies have used live human subjects.  
5           In studies aimed at developing specifications for street  
6           railways (trolley cars), Hirshfield accelerated standing  
7           subjects at constant jerk rates of between 1 and 10 g  
8           per second. Participating subjects ranged from 11 to  
9           78 years, 39 (87) to 107 g (235 pounds), and 132 (4 feet  
10          4 inches) to 193 centimetres (6 feet 4 inches) in  
11          height. In the study, the foot movement accompanying  
12          loss of balance resulted in the opening of a sensor  
13          switch. Loss of balance occurred at 0.16 g for both  
14          forward-facing, unsupported males wearing low-heeled  
15          shoes and forward-facing, unsupported females in high  
16          heels. Loss of balance occurred at 0.23 g for subjects  
17          holding an overhead strap, and at 0.27 g for subjects  
18          holding a vertical stanchion.

19          The second study, by Browning, also measured only  
20          standees. Ninety subjects ranging from 15 to 65 years  
21          participated. Subjects could face either forward or  
22          backward and use a handrail if they so desired.  
23          Observer ratings of movement indicated that subjects  
24          reacted equally to acceleration (facing forward) or  
25          deceleration (facing backward). Ratings of 'slight  
26

1 relative movement' occurred at 0.055 g for unsupported  
2 subjects and at 0.115 g for subjects holding the  
3 handrail. Safe emergency deceleration in excess of  
4 0.2 g were postulated for seated subjects."

5 So it would appear from this that there were studies  
6 done even before 1977 on the effects of acceleration or  
7 deceleration on standing passengers. Would that be  
8 a fair observation, Mr Chan?

9 MR YK CHAN: Well, this is a short introduction provided in  
10 the report in giving a summary of what the author would  
11 observe, for which we don't have full access to the  
12 details of those studies. So, yes, as quoted in the  
13 paper, there were studies --

14 CHAIRMAN: But this is an academic paper.

15 MR YK CHAN: Yes.

16 CHAIRMAN: And of course there is a list of references, and  
17 if we go to page 19 of 20, or 27 of 28, we see the  
18 Hirshfield paper, do we not, item 1, "Disturbing Effects  
19 of Horizontal Acceleration. Electrical Railway  
20 Presidents' Conference Committee, September 1932".

21 MR YK CHAN: Yes, there were previous studies.

22 CHAIRMAN: And we have the Browning report. The Browning  
23 report is October 1972, and it comes from the "Royal  
24 Aircraft Establishment, Technical Report, Farnborough"  
25 in the United Kingdom. So both reports are identified.

26

1           The provenance of the statistics is clear.

2           Yes, Mr Chan.

3       MR DEREK CHAN: At this stage, I'm going to go further to  
4           another part of the discussion paper, but at this stage  
5           can I ask this question. Were these papers or studies  
6           considered by the Transport Department when they agreed  
7           to use 0.4G acceleration as the threshold?

8       MR YK CHAN: As far as I understand, these papers were not  
9           considered at the time when we considered to change the  
10          threshold.

11       CHAIRMAN: So are you saying that no regard was had to the  
12           effects of different levels of deceleration on standees,  
13           but regard was had only to seated persons? Is that what  
14           you are saying?

15       MR YK CHAN: Yes.

16       CHAIRMAN: Thank you. Why?

17       MR YK CHAN: The parameter adopted in this specification is  
18           the specification for the bus operators to develop their  
19           black box. At that time, we believed the sitting  
20           passengers -- the black box should be able to measure  
21           deceleration that affects passengers who are seated in  
22           the buses and those who are most secure.

23       CHAIRMAN: But why not consider the standees, who are going  
24           to be affected by lower levels of deceleration?

25       MR YK CHAN: Well, the passengers sitting on the seat, from  
26

1 observation, would be more difficult -- well, since they  
2 are seated in confined, proper seating, it would be more  
3 difficult for them to dislodge, and if we can use the  
4 black box to measure the deceleration, which is -- we  
5 suppose it is the higher forces that enable to dislodge  
6 passengers from the seats, and this is the more serious  
7 incidents that we would like to look at.

8 CHAIRMAN: So what are you saying, that standees being  
9 thrown to the floor is less serious?

10 MR YK CHAN: Not at all, but I would invite Mr Shum to  
11 supplement further technical points.

12 CHAIRMAN: Yes, probably a good idea.

13 MR WILLIAM SHUM: One of the considerations is that for the  
14 seated passengers we seldom ask them to hold the  
15 handrail tightly, and we had a series of publicity  
16 advising standing passengers to hold the handrail or the  
17 other parts firmly when they are standing inside the  
18 bus. That is one of the considerations we believe to be  
19 taken into account when considering revising the  
20 deceleration rate from 0.2G to 0.4G.

21 CHAIRMAN: To be fair to you, you weren't involved in this  
22 decision, were you, in 2005-2007; is that right?

23 MR WILLIAM SHUM: No -- yeah, I am not involved in the  
24 discussion at that moment.

25 CHAIRMAN: Do you have any more information than we have  
26

1           here as to why this change was made, to help you answer  
2           these rather obvious questions?

3       MR WILLIAM SHUM: No, sorry. We don't have that.

4       CHAIRMAN: So you are doing the best you can to produce  
5           ex post facto rationalisation for the change; is that  
6           it?

7       MR WILLIAM SHUM: Yes.

8       CHAIRMAN: Thank you.

9       MR DEREK CHAN: Just to round up this point, can I take you  
10           to another passage at page 26 of 28 of the same  
11           document. That's TD-5, page 1887.

12           Again, I will just read from the first and second  
13           paragraphs:

14           "The goals of this study were both to provide data  
15           to understand the influence of various parameters on  
16           seated passengers during emergency stops, and to obtain  
17           initial estimates of the emergency decelerations to be  
18           specified for transit systems.

19           These data indicate that seated passengers can  
20           safely experience deceleration levels about twice those  
21           reported for standees. A conservative estimate of the  
22           emergency deceleration to be specified in the design of  
23           transit systems at which 84 per cent of the occupants of  
24           an untilted forward-facing standard transit seat will  
25           remain securely in the seat is 0.47 g. To insure

26

1           retention of 84 per cent of the occupants of  
2           a side-facing seat, the best estimate is 0.41 g. And,  
3           for a seat tilted back 5 degrees (facing forward), the  
4           best estimate is 0.52 g."

5           Mr Chan, there's a reference to 84 per cent of the  
6           occupants in an untilted forward-facing seat. What  
7           I can't find is a reference to 95 per cent. It may be  
8           that I have missed something. Can you perhaps direct me  
9           to the part where the 95 per cent comes from?

10       MR YK CHAN: I will invite Mr Shum to reply to this  
11       question.

12       MR WILLIAM SHUM: In the "Discussion" section, the  
13       0.41 deceleration rate is referring to the side-facing,  
14       and for what we are referring to, can I bring you to  
15       page 11 of this paper.

16       CHAIRMAN: Are you taking the numbers from the top or the  
17       bottom? Because there's a difference.

18       MR WILLIAM SHUM: That's the page with three graphs.

19       CHAIRMAN: But there are two sets of numbers. One appears  
20       at the top, and it says, for example, "26 of 28", but  
21       when you look at the bottom, it says "18". So which  
22       numbers are you taking?

23       MR WILLIAM SHUM: The page number is --

24       MS MABLE CHAN: The bottom.

25       CHAIRMAN: Thank you. So page 11.

26

1 MR WILLIAM SHUM: Yes. Here is the top-most graph. In this  
2 top-most graph, there is the wording "95 per cent  
3 retention". Yes, this one.

4 MR DEREK CHAN: Is that the one at 0.42G?

5 MR WILLIAM SHUM: Yes, referring to 0.42G. You can also  
6 notice in the X axis, there is an item, a figure, 0.4G.  
7 Yes, this one.

8 MR DEREK CHAN: So, if I understand the graph correctly, at  
9 0.4G, 95 per cent of the seated passengers would not be  
10 dislodged; is that correct?

11 MR WILLIAM SHUM: Yes.

12 CHAIRMAN: It's more than 95 per cent, isn't it, on the  
13 graph?

14 MR WILLIAM SHUM: Yes.

15 CHAIRMAN: So what is it? 98, something like that?

16 MR WILLIAM SHUM: We can't have an estimate. That's why we  
17 quote more than 95 per cent of the sampled case would  
18 not be dislodged under the 0.4G deceleration.

19 CHAIRMAN: Thank you.

20 MR DEREK CHAN: In the "Discussion" passage that I just read  
21 out previously, there was also a reference to the data  
22 indicating that seated passengers can safely experience  
23 deceleration levels about twice those reported for  
24 standees.

25 So it would appear, on the face of this study, in  
26

1 the passages I just read out, including the passages  
2 read out in the introduction part -- it would appear  
3 that standing passengers holding onto fixed supports,  
4 such as overhead straps or vertical bars, would lose  
5 their balance at deceleration values of 0.23G or 0.27G.  
6 Do you agree with this observation on what appears in  
7 the "Introduction" part of this paper?

8 CHAIRMAN: Those are the results of the Hirshfield study,  
9 1932.

10 MR WILLIAM SHUM: Yes.

11 MR DEREK CHAN: So, on the face of the figures put forward  
12 in this study, it would appear that the selection of  
13 a deceleration threshold of 0.4G would adequately look  
14 after the interests of the sitting passengers but not  
15 the interests of the standing passengers. Do you have  
16 any observations to this suggestion?

17 MR WILLIAM SHUM: Yes.

18 MR DEREK CHAN: So does the Transport Department consider  
19 that more careful and scientific analysis ought to be  
20 conducted on whether the 0.4G threshold sufficiently  
21 protects the safety of standing passengers?

22 MR YK CHAN: Yes. I think we can do more to study, to find  
23 out how the various deceleration force could have  
24 an effect on various types of passengers such as those  
25 standing and sitting.

26

1 CHAIRMAN: The papers that we've been looking at were 1977,  
2 1972 and 1932. Have you looked for papers more recently  
3 than that, academic technical research into this issue,  
4 in the last 50 years?

5 MR YK CHAN: That's what we have been trying to do and --

6 CHAIRMAN: You've tried to do that?

7 MR YK CHAN: We have tried.

8 CHAIRMAN: With what success?

9 MR YK CHAN: Not much success. This is the paper that we  
10 can find out.

11 CHAIRMAN: Again, you were somebody not involved at the time  
12 that this was discussed; is that right?

13 MR YK CHAN: Correct.

14 CHAIRMAN: So when was this attempt made to look for more  
15 recent studies?

16 MR YK CHAN: In the last couple of weeks.

17 CHAIRMAN: Can you help us as to where you were looking?

18 Who did you contact?

19 MR YK CHAN: We have our engineers to do the internet search  
20 and also dig out from our files and documents to see  
21 whether there actually was any material reference that  
22 we can make in regard to the study of this subject. So  
23 far, our searches on the internet and also other sources  
24 have not been very successful.

25 CHAIRMAN: So internet searches, your own records, and what  
26

1           else?

2       MR WILLIAM SHUM: That's the only two ways.

3       CHAIRMAN: Have you contacted the excellent local  
4           universities, their departments of engineering,  
5           Hong Kong University of Science and Technology, that is  
6           Prof Lo's university?

7       MR WILLIAM SHUM: In the past few weeks, we haven't done  
8           that.

9       CHAIRMAN: Thank you.

10      MR DEREK CHAN: Mr Chairman, I will move on to the next  
11           topic, of seat belts.

12      CHAIRMAN: Please do.

13      MR DEREK CHAN: Ms Chan, I rather assumed that you will be  
14           dealing with this, so I will be addressing you, but if  
15           you feel other colleagues are more suited to answer,  
16           please indicate.

17           Can I first pick up the seat belt topic from the  
18           working group's full report, because the issue of seat  
19           belts was dealt with extensively in that report. Again,  
20           for the purposes of the record, the full report begins  
21           at TD-5, page 1757, and I would invite that attention be  
22           drawn to section 3 of that report, which deals with the  
23           issue of seat belts.

24           I would like to start this topic by first looking at  
25           the position in other jurisdictions, firstly, and  
26

1 secondly, what the Transport Department's historical  
2 position on this issue is. So, in respect of the  
3 overseas jurisdictions, can I first take you to  
4 paragraph 3.11 of this full report.

5 CHAIRMAN: Is there a paginated number for this page?

6 MR DEREK CHAN: Yes, Mr Chairman, the internal pagination is  
7 page 28, the bundle reference is TD-5, page 1788.

8 CHAIRMAN: Thank you.

9 MR DEREK CHAN: Again, I will just read out paragraphs 3.11

10 and 3.12. At 3.11, the report says this:

11 "Noting the divergent views of franchised bus  
12 operators, the working group has reviewed the prevailing  
13 overseas practices or requirements on the installation  
14 and wearing of seat belts on buses. Currently, for  
15 inter-city or cross-boundary routes, some overseas  
16 jurisdictions (for example United States, United Kingdom  
17 and Netherlands) have mandated the provision of seat  
18 belts for all passenger seats, while others (for example  
19 United Kingdom, Netherlands, and Australia (Victoria))  
20 have imposed mandatory requirement of wearing seat  
21 belts. Nevertheless, for the urban buses or buses  
22 allowed to carry standing passengers, none of the  
23 overseas jurisdictions that have been reviewed thus far  
24 have statutory requirements for the provision of seat  
25 belts on passenger seats. According to the transport

26

1 authorities of those jurisdictions, the urban buses are  
2 typically used for short journeys, in terms of both time  
3 and distance, and undertaken at moderate speeds on urban  
4 routes. Thus, no seat belt requirement for passenger  
5 seats on these urban buses has been imposed. A summary  
6 of the findings is at the appendix IV."

7 And appendix IV is page 1809 in the bundle.

8 Mr Chairman, I think page 1809 simply sets out what had  
9 been described in the paragraph that I just read  
10 already.

11 CHAIRMAN: Yes, I have it in front of me.

12 MR DEREK CHAN: So, for urban buses with standing  
13 passengers, there is no seat belt requirement in those  
14 jurisdictions reviewed.

15 Just one minor matter of clarification. When was  
16 this review conducted in the context of this working  
17 group report? Would it be in the course of 2018 or  
18 before that?

19 MS MABLE CHAN: The review is conducted in 2018, in  
20 preparation and in the process of the discussion of the  
21 working group report.

22 MR DEREK CHAN: Thank you. I ask that because a similar  
23 review was conducted in 2005-2007. Before I go to that,  
24 perhaps I will just round off this part by reading  
25 paragraph 3.12 of the report as well. Paragraph 3.12  
26

1       says this:

2               "The above review findings were also echoed by the  
3       three bus manufacturers who advised that seat belts were  
4       not required for buses travelling in cities in other  
5       countries, and that in Europe, seat belts are only  
6       required for inter-city coach without standing  
7       passengers and passengers on city bus tend not to wear  
8       seat belt due to its short travelling time. They also  
9       opined that the retrofitting of seat belt in franchised  
10      buses of Hong Kong could not protect standing  
11      passengers."

12             3.12, as I understand it, is a reference to the  
13      observations of the bus manufacturers that were  
14      expressed during the subgroup meetings of the working  
15      group that involved the bus manufacturers; is that  
16      correct?

17      MS MABLE CHAN: Correct.

18      MR DEREK CHAN: So, with the 2018 review in mind, can I then  
19      move back in time to a similar review conducted in  
20      2005-2007. With that, can I stay on the working group  
21      report and go to paragraph 3.2 to introduce that  
22      historical review, because it's referred to in the  
23      report. Paragraph 3.2, internal pagination page 23,  
24      bundle reference page 1783, says this:

25             "The TD has made it a requirement to install seat  
26

1       belts on selected seats in the light of accidents  
2       involving franchised buses in 2006 and 2007. The  
3       Transport Department recommended that the franchised bus  
4       operators agreed in 2007 that seat belts should be  
5       retrofitted at the four front seats on the upper deck of  
6       all the post-1997 licensed buses to prevent passengers  
7       from falling out from the upper deck front seats. We  
8       have taken the opportunity in the 2012, 2015 and 2017  
9       franchise negotiation exercises to make it a franchise  
10      requirement for bus companies to install seat belts at  
11      all exposed seats."

12       So that's a summary of the review undertaken in  
13      2006-2007. Again, can I go to one of those historical  
14      documents in 2006 to illustrate the review undertaken  
15      back then. For that, can I refer you to the bundle  
16      SEC-1, page 266.

17       At page 266, I hope you have before you a paper  
18      prepared by the Transport Department for the Legislative  
19      Council Panel On Transport, "Safety of Franchised Bus  
20      Operations". You can see the date of the paper at  
21      page 272, which is October 2006.

22       Can I draw your attention directly to paragraph 19  
23      at page 271, which appears in the section titled, "Seat  
24      belt on Franchised Bus".

25       Can I read directly paragraphs 19 and 20 for the  
26

1 point of the overseas jurisdiction review conducted back  
2 in that time. Paragraph 19:

3 "We have conducted a research on overseas practices  
4 regarding the fitting and wearing of seat belts in  
5 buses. A summary of the corresponding seat belt  
6 requirements is at annex."

7 The annex is at page 273, but I will read on first:

8 "It can be seen that no overseas country requires  
9 fitting of seat belts in passenger seats of buses  
10 designed for urban use or for carrying standing  
11 passengers. Studies conducted in Australia and Canada  
12 indicated that the additional safety benefit of  
13 installing seat belt on all seats in a bus might not be  
14 as great as envisaged and that it is very difficult to  
15 ensure that all passengers will use seat belts.

16 In view of the above, we consider that it is not  
17 appropriate to introduce mandatory requirements for  
18 installation and wearing of passenger seat belts for  
19 franchised buses. However, we will continue to work  
20 with the franchised bus operators to identify measures  
21 for better protection of passenger safety."

22 So is it fair to say that the overseas jurisdictions  
23 that the Transport Department have considered have not  
24 changed their stance between 2006 and 2018 in respect of  
25 not requiring seat belts to be installed on urban buses  
26

1 with standing passengers?

2 MS MABLE CHAN: Yes. I would say that in the two rounds of  
3 review, the overseas experiences and practices as  
4 revealed from the review show that the overseas  
5 jurisdictions' stance towards the installation of seat  
6 belts remains largely the same.

7 CHAIRMAN: There is reference in paragraph 19 to studies  
8 conducted in Australia and Canada indicating that the  
9 "additional safety benefit of installing seat belt on  
10 all seats in a bus might not be as great as envisaged",  
11 and then the second issue, "and that it is very  
12 difficult to ensure that all passengers will use seat  
13 belts".

14 Can you give us references to these two studies, or  
15 perhaps there are more, Australia and Canada?

16 MS MABLE CHAN: I do not have the details of the references  
17 of the studies with me now, but we can certainly provide  
18 the reference afterwards.

19 CHAIRMAN: Thank you.

20 Do any of your representatives know to what studies  
21 this is a reference? I know the Australians,  
22 particularly New South Wales, have examined seat belts  
23 on a number of occasions.

24 MS MABLE CHAN: Yes.

25 CHAIRMAN: And this is consistent with what they have had to  
26

1 say.

2 MS MABLE CHAN: Yes.

3 CHAIRMAN: No one can help us? But you can in due course?

4 MS MABLE CHAN: We have those materials and the references,  
5 but offhand we are not in a position to quote the  
6 specific references.

7 CHAIRMAN: No, but you will provide them in due course?

8 MS MABLE CHAN: I will provide that, yes.

9 CHAIRMAN: Thank you.

10 MR DEREK CHAN: So, with that historical context in mind --

11 MS MABLE CHAN: Sorry, Chairman, my colleague Mr Tony Yau  
12 would like to add on the comparison of the stances of  
13 the overseas jurisdictions. Perhaps I will invite him  
14 to point out an observation in regard to the US.

15 CHAIRMAN: Yes. Please do.

16 MS MABLE CHAN: Thank you, Chairman.

17 MR TONY YAU: Thank you, Mr Chairman.

18 Mr Chan, you are right that for urban buses, the  
19 requirements are more or less the same between 2006 and  
20 2018 reviews. But if you consider, except for urban  
21 bus, that means for some inter-city buses, there is  
22 a change in United States legislation. In November  
23 2013, the US passed a new legislation, requiring seat  
24 belts for each passenger sitting position in all new  
25 buses, except urban buses or school buses.

26

1 CHAIRMAN: It's urban buses that we are talking about.

2 MR TONY YAU: Yes.

3 CHAIRMAN: We know, for example, that coaches in the United  
4 Kingdom, say going between Birmingham and London, they  
5 are required to provide seat belts, but buses in both of  
6 those cities are not. So it's the urban buses we are  
7 interested in.

8 MR TONY YAU: Yes, but those inter-city buses are more or  
9 less the same like our long-haul buses, that means from  
10 Hong Kong Island to NT, those buses are required to  
11 travel on several expressways, the high-speed  
12 expressways.

13 CHAIRMAN: And are there any speed limits at which those  
14 buses can travel in the United States? Because there is  
15 a difference between travelling at 70 kilometres per  
16 hour and being able to do 110 kilometres per hour, is  
17 there not?

18 MR TONY YAU: Yes.

19 CHAIRMAN: Is there a difference? Are they allowed to do  
20 high speeds?

21 MR TONY YAU: I think there is also a requirement for the  
22 bus running at high speeds in those jurisdictions.

23 CHAIRMAN: Yes. One can see the obvious difference. It is  
24 no doubt the logic, the rationale, applied to coaches --  
25 coaches going down English motorways do so at  
26

1           considerable speed, not at 70 kilometres per hour.

2           MR TONY YAU:   Yes.

3           CHAIRMAN:    Yes, Mr Chan.

4           MR DEREK CHAN:  So, with that historical context in mind,  
5           can I then consider the current position adopted in the  
6           working group report.

7           Before I go to the details, I understand that the  
8           position is slightly different in respect of new buses  
9           and in respect of retrofitting existing buses, so I will  
10          deal with those two situations in turn.

11          Going firstly to the position with new buses, can  
12          I please take you to paragraph 3.4 of the report, which  
13          is internal pagination page 24, and bundle reference  
14          page 1784.  Can I just read paragraph 3.4 first:

15          "As regards the installation of seat belts for all  
16          passenger seats on franchised buses, all three  
17          double-deck bus manufacturers (that is ADL, Volvo and  
18          MAN) have confirmed that it is technically feasible to  
19          supply new buses with seat belts for all passenger seats  
20          which comply with the aforesaid international standards  
21          if such installation is made as a procurement  
22          requirement.  In light of this, the working group  
23          recommends that seat belts should be provided for all  
24          seats in future procurement of new buses.  All  
25          franchised bus operators have agreed that all new buses

26

1 ordered from July 2018 onwards should be installed with  
2 seat belts."

3 So that's the position for new buses.

4 Before I ask the next question, I want to draw  
5 attention to another piece of information that may or  
6 may not be relevant to the next question that I am about  
7 to ask. That is the cost of installing seat belts on  
8 all seats on new buses. For that, can I take you to --  
9 it would be good if you have the working group report  
10 open in front of you while we go to this other  
11 reference -- KMB-12, page 4887-5.

12 Perhaps I can go to 4887-1 first, just to give that  
13 document some context.

14 Ms Chan, at page 4887-1, you should have before you  
15 the notes of the second meeting of the working group,  
16 held on 23 April 2018.

17 Can I draw your attention to paragraph 16 of those  
18 minutes, which is at page 4887-5, and again I will just  
19 read out paragraph 16:

20 "After checking with the bus manufacturers on the  
21 feasibility for installation of seat belts for all  
22 passenger seats for new buses, all franchised bus  
23 operators advised that it was technically feasible to  
24 install seat belts for all passenger seats for new buses  
25 to be procured. KMB/Long Win supplemented that it would  
26

1 cost about an additional of 5,000 pounds for each  
2 double-decker to install seat belts for all passenger  
3 seats. All bus operators agreed to incorporate this  
4 requirement in their new single-decked buses and  
5 double-decked buses to be procured."

6 The reference to 5,000 pounds' extra cost per bus to  
7 install seat belts on all seats referred to in the  
8 minutes, did that turn out to be a correct estimate,  
9 with the information you have now, compared to April  
10 2018?

11 MS MABLE CHAN: This is the information that we are aware.

12 Thank you.

13 MR DEREK CHAN: So it's correct, an extra 5,000 pounds?

14 MS MABLE CHAN: Yes.

15 MR DEREK CHAN: With that information in mind, my question  
16 is this: what has changed since 2006-2007 that led to  
17 the Transport Department making this recommendation for  
18 new buses? Has the analysis on the benefit of seat  
19 belts on urban buses with standing passengers changed  
20 during that time?

21 MS MABLE CHAN: In our working group discussion, the seat  
22 belt is one of the key areas that we have looked into.  
23 Before preparing for the working group discussion, the  
24 Transport Department has undertaken to conduct a further  
25 review of the overseas experiences. As I just answered  
26

1 to the senior counsel's question, it appears to us that  
2 the overseas jurisdictions' stance towards the  
3 installation of seat belts for urban buses remains  
4 generally the same.

5 That said, we have taken this issue very seriously.  
6 There has been a number of discussions raised in the  
7 Legislative Council Panel on Transport, so we have to  
8 look into this subject very carefully. We consider it  
9 from different aspects. First, it's from a road safety  
10 and public transport safety aspect. Secondly, we also  
11 look into the technical feasibility of installation of  
12 seat belts for new buses and on existing buses.  
13 Thirdly, we also look into the cost and financial  
14 implications of doing this extra installation of seat  
15 belts for all passenger seats.

16 On the public transport safety point of view, we  
17 have actually taken this seat belt issue to the Road  
18 Safety Council for discussion and for seeking their  
19 advice. On this aspect, I will later invite Mr Tony Yau  
20 to supplement on that, on our position regarding the  
21 safety and protection that we think the installation of  
22 seat belts would provide to the passengers on board our  
23 urban buses in Hong Kong.

24 On the technical feasibility --

25 CHAIRMAN: Before you move on, when did you refer this  
26

1 matter to the Road Safety Council?

2 MR TONY YAU: In April, Road Safety Research Committee,  
3 subcommittee, we discuss.

4 CHAIRMAN: In April of this year?

5 MR TONY YAU: Sorry, it should be July, July's meeting.

6 CHAIRMAN: Presumably, by a paper or an email?

7 MS MABLE CHAN: Yes, paper.

8 MR TONY YAU: It's a meeting, it's a subcommittee meeting.  
9 We discussed by paper.

10 MS MABLE CHAN: A paper was submitted.

11 CHAIRMAN: Can you provide a copy of that as well?

12 MS MABLE CHAN: Yes.

13 CHAIRMAN: What date in July was this meeting?

14 MR TONY YAU: May I check my diary?

15 CHAIRMAN: Yes. Take your time.

16 MR TONY YAU: 17 July.

17 CHAIRMAN: Thank you.

18 Yes, Mr Chan.

19 MR DEREK CHAN: Yes, Ms Chan, I think you were --

20 CHAIRMAN: I interrupted you, Ms Chan.

21 MS MABLE CHAN: That's okay.

22 CHAIRMAN: You were dealing with the first aspect, that's  
23 for road safety.

24 MS MABLE CHAN: Yes, on road safety and public transport  
25 safety, we have consulted the Road Safety Council, the  
26

1 relevant committee, and presented a paper. But on this  
2 score, I would also ask Mr Tony Yau to elaborate  
3 a little bit more in a minute.

4 I would like to just cover the other two aspects.  
5 On the technical feasibility, in the working group  
6 discussions with the presence of the bus operators and  
7 the bus manufacturers, we have actually tackled the  
8 issue on two fronts. First is on the new buses. As  
9 revealed from the meeting notes, we have looked into the  
10 feasibility of whether or not seat belts can be  
11 installed for all passenger seats for the new buses to  
12 be procured, and we got confirmation from the bus  
13 manufacturers that this is technically feasible, and we  
14 also have the bus operators present at the meeting  
15 confirming that they would be prepared to take this into  
16 account for the procurement of the new buses in the  
17 future.

18 On the costing and the financial implications, for  
19 the new buses, the additional 5,000 pounds for each  
20 double-decker bus amounts to about 1.5 per cent of the  
21 total cost of a new double-decker bus. At the meeting,  
22 the bus operators considered that it is technically  
23 feasible and also operationally feasible for them to  
24 procure new buses with the installation of the seat  
25 belts on board for, for the new buses.

26

1 I think the next question will be on those existing  
2 buses.

3 We also go through the different bus models.

4 MR DEREK CHAN: Ms Chan, for retrofitting, I'm going to take  
5 that as a separate topic, if I may, which I will be  
6 expanding on that, and then I will be asking for your  
7 views on a number of issues relating to retrofitting, if  
8 you don't mind.

9 MS MABLE CHAN: Sure. That's okay.

10 Should I invite Mr Tony Yau to say --

11 CHAIRMAN: I think it's more efficient if we allow counsel  
12 to explore the matters that he thinks are relevant for  
13 us. If matters are not a raised that you feel you want  
14 to raise, by all means do so, but can we proceed by  
15 a questioning method first.

16 MR DEREK CHAN: Ms Chan, you have helpfully referred to  
17 three considerations. What appears to me -- and I may  
18 not be correct but it appears to me that there doesn't  
19 seem to be an attempt to carry out an analysis on the  
20 benefits, an objective, scientific analysis on the  
21 benefits that seat belts on all passenger seats may  
22 bring. Is that a fair observation?

23 MS MABLE CHAN: I beg your pardon?

24 CHAIRMAN: Are you addressing the issue of cost/benefit  
25 analysis, or only benefit?

26

1 MR DEREK CHAN: We have the cost here of 5,000 pounds.

2 CHAIRMAN: Yes. The question appears to be: you don't to  
3 have conducted a cost/benefit analysis. That's the  
4 proposition being put to you.

5 MS MABLE CHAN: I would not agree.

6 MR DEREK CHAN: Again, just a side point --

7 CHAIRMAN: Before we move on -- what analysis did you do  
8 then, if you don't agree with that proposition?

9 MS MABLE CHAN: First, we have looked into the cost of the  
10 installation of seat belts on all passenger seats for  
11 new buses. On the other hand, we have also discussed  
12 and looked into the benefits of providing seat belts for  
13 all passenger seats for new buses.

14 CHAIRMAN: And what was the result of that analysis?

15 MS MABLE CHAN: We considered that the provision of seat  
16 belts for all passenger seats will render additional  
17 protection for the passengers on board the new buses,  
18 and on that I would invite Mr Tony Yau to just  
19 supplement on this aspect.

20 CHAIRMAN: Yes.

21 MR TONY YAU: If we are required to do any cost/benefit  
22 analysis, we have to base on like-to-like comparison.

23 What we are concerned with is the safety belt is  
24 a protective measure. What others previously proposed,  
25 those in-vehicle devices, such as collision alert,  
26

1 electronic stability control, speed limiter and  
2 retarders, they are all preventive measures. They are  
3 trying, via transport technology, to prevent accidents  
4 occur. But for seat belts, it's a protective measure.  
5 That means, after all, the accident still happens and  
6 the seat belt is the general measure that can protect  
7 the passengers.

8 So if we need to compare or do a cost/benefit  
9 analysis, we have to find other device that has the same  
10 protective performance or is in the same category as the  
11 seat belt. I am not seeing any similar things that can  
12 provide similar benefit to bus passengers and have the  
13 same protective measure during the accidents.

14 And considering the cost, during the working group  
15 we discussed with the bus operators, the cost is about  
16 5,000 pounds per vehicle. We are talking about each new  
17 bus is over HK\$3 million cost. That means the  
18 additional cost is only about --

19 CHAIRMAN: We've been told it's about 1.5 per cent of the  
20 cost of a new bus.

21 MR TONY YAU: Yes. So comparatively the cost is quite low,  
22 and the protective benefit is quite good, very  
23 significant.

24 CHAIRMAN: What are the incidence of passengers being  
25 injured while they are seated on buses at seats where  
26

1           there are no seat belts? Did you look at that?

2       MR TONY YAU: There is some analysis but it is for private  
3       cars, the seat belt can reduce the severity of the  
4       accident.

5       CHAIRMAN: Cars are quite different from buses. Did you  
6       look at the incidence, the number, of passengers being  
7       injured or killed whilst seated at bus seats that are  
8       not equipped with seat belts? Did you look at that?

9       MR TONY YAU: There are no specific study on public  
10      transport --

11      CHAIRMAN: So is the answer no?

12      MR TONY YAU: (Shook head).

13      CHAIRMAN: But why not?

14      MR TONY YAU: We also discussed, as I mentioned before, in  
15      the Road Safety Research Committee, and I looked at --  
16      we have mentioned it in the working group report, 5.10.

17      CHAIRMAN: The question is simple: why didn't you look at  
18      the number of people that are being injured or killed  
19      while seated at bus seats where there are no seat belts,  
20      as an indication of what the cost of the problem is?

21      MS MABLE CHAN: Chairman, may I add?

22      CHAIRMAN: Please.

23      MS MABLE CHAN: We need to acknowledge that based on  
24      colleagues' evidence, we have not made any quantifiable  
25      analysis into the causes of the accidents whereby any  
26

1 passengers without a seat belt will be more seriously  
2 hit. But I would like to point out the historical  
3 perspective --

4 CHAIRMAN: Before you do that, "why not" is the question;  
5 why haven't you done a quantifiable analysis?

6 MS MABLE CHAN: We have not done so and I do not have  
7 a ready answer, but I would like to point out --

8 CHAIRMAN: Let me try to help: are there statistics  
9 available? Have these records been kept? Have they  
10 been collated?

11 MS MABLE CHAN: Chairman, I don't think there are specific  
12 statistics collected or collated in this regard.

13 CHAIRMAN: None by the police?

14 MS MABLE CHAN: We cannot answer on behalf of the police.

15 CHAIRMAN: Well, you have access to their accident data  
16 bank, do you not? I'm not asking you to answer on  
17 behalf of them. Do they have any category of statistics  
18 that helps you with this?

19 MR TONY YAU: Chairman, in our road traffic accident  
20 statistics we issue to the public each year, we have  
21 those figures.

22 CHAIRMAN: But you have figures presumably that include  
23 cars. I'm asking about buses.

24 MR TONY YAU: We have buses.

25 CHAIRMAN: Yes. What have you got?

26

1           Perhaps you would like to consider this. I don't  
2           want to be unfair to you. If you need a bit of time to  
3           collate the information, do so, and we will come back to  
4           it later.

5           Yes, Mr Chan.

6       MR DEREK CHAN: Mr Chairman, since reference to the police  
7           data has been made, I am asking those assisting me to  
8           find the reference for the police letter that they sent  
9           to us very recently, that does have some data on seated  
10          passengers being injured.

11       CHAIRMAN: Yes, it does. Yes, you have reminded me.

12       MR DEREK CHAN: Yes.

13       CHAIRMAN: Is this material on our internet, on our website?

14       MR DEREK CHAN: Yes, it is. I'm just getting it.

15                It may not answer the point fully.

16       CHAIRMAN: No.

17       MR DEREK CHAN: But at least it would be of some relevance.

18                May I please draw your attention to MISC-1C,  
19           page 124-561.

20                Mr Chairman, it's a letter from the police to this  
21           committee, dated 3 October 2018, in case you have that  
22           document somewhere else.

23                Ms Chan, I hope you have before you this letter from  
24           the police to the committee dated 3 October 2018. At  
25           paragraph 3, the police notes:

26

1 "Traffic Branch Headquarters could not find any  
2 record of any consultation from the Transport Department  
3 regarding the recommendation to install seat belts on  
4 buses in 2007."

5 And the rest of the paragraph talks about the  
6 meeting of the Road Safety Council.

7 Over the page, at paragraph 4, the police says this:

8 "The police have been keeping statistics on the  
9 number of passengers who were injured while seated on  
10 a bus and not wearing a seat belt. The figures were  
11 tabled as below."

12 We can see statistics were kept by the police in  
13 2015, 2016 and 2017 of what appears to be passengers who  
14 were injured wearing or not wearing seat belts.

15 Has this sort of data been considered by the  
16 Transport Department when making the recommendation that  
17 seat belts should be installed on all new buses, when  
18 considering the benefit analysis?

19 CHAIRMAN: Or is this the first time you have seen this  
20 data?

21 MR TONY YAU: No, no, we are aware of those data.

22 CHAIRMAN: So you have seen it?

23 MR TONY YAU: Not exactly. They are usually in different  
24 presentations. But the figures, the source, we have  
25 seen.

26

1 CHAIRMAN: Did you consider it when making your analysis?

2 MR TONY YAU: Because currently those casualties, maybe the  
3 passengers are not -- no seat belt is provided to them,  
4 and for our proposals to provide seat belt, did it  
5 really concern with the security?

6 CHAIRMAN: No. The question is very simple: did you  
7 consider this data or not? Don't tell us what else you  
8 considered, but did you consider it or not in your  
9 analysis?

10 MR TONY YAU: We have not considered --

11 CHAIRMAN: Thank you. "Yes" and no" are very simple words.  
12 Is there something more you wish to say about what you  
13 did consider?

14 MS MABLE CHAN: Chairman, may I add that to be fair to my  
15 colleague, he is the road safety expert in the  
16 department. He has been participating in the Road  
17 Safety Council and the relevant subcommittee meetings.  
18 He has close liaison with the police. I think, in their  
19 experience and based on their past research and work,  
20 they have gathered and have access to the police  
21 figures. It's true that they have not considered the  
22 figures as tabulated in this form. So I think it's true  
23 for them to say that they have not considered such  
24 statistics in this presentation, but as Tony would just  
25 like to present and explain to this committee and

26

1           honourable chairman, it is their expert and professional  
2           analysis that provision of seat belts will provide  
3           additional protection to a passenger when seated on  
4           a bus.

5           That's all I would like to supplement. Thank you,  
6           Chairman.

7   CHAIRMAN: Yes. We had a chief superintendent of police  
8           giving evidence here, and he reminded us of that  
9           well-worn phrase, "Seat belts save lives". That's not  
10          in dispute.

11          The issue is what is problem, what is the extent of  
12          the problem on buses what is the cost of fixing it, and  
13          that's all we are trying to find out.

14   MS MABLE CHAN: Yes.

15   CHAIRMAN: Mr Yau, did you perform any analysis, make any  
16          paper on this point, that can help us understand what  
17          you say you did, and if so can you provide it to us?

18   MR TONY YAU: So that's why, in our working group report,  
19          5.3 and 5.4 ...

20   CHAIRMAN: Can you answer my question first: did you produce  
21          a paper addressing this cost/benefit analysis?

22   MR TONY YAU: No. I want to mention --

23   CHAIRMAN: Can you just answer the question: did you do so  
24          or not?

25   MR TONY YAU: We are going to request in the working group  
26

1 report that those --

2 CHAIRMAN: No, Mr Yau. Please answer my question. I will  
3 give you all the time you want to give whatever other  
4 explanations you want to give. Did you prepare a paper  
5 that addresses this issue? Take your time to think  
6 about it. It's a simple question.

7 MR TONY YAU: No.

8 CHAIRMAN: Thank you. Now, what else do you want to say?

9 MR TONY YAU: As mentioned in paragraph 5.4 of the working  
10 group report, that's why, for existing buses, that means  
11 the retrofitting of seat belts of existing buses, the  
12 working group recommends that TD, the franchised bus  
13 operators and the bus manufacturers to continue to work  
14 closely.

15 CHAIRMAN: Very well. That's what you wanted to tell us.

16 We now know what you wanted to tell us.

17 Yes, Mr Chan.

18 MR DEREK CHAN: Again, Ms Chan, my next question is this.

19 It may be unfair in the sense that it asks you to  
20 explain what may or may not have been done by your  
21 predecessors, but my question is this. If the Transport  
22 Department considers that seat belts are so good, then  
23 why wasn't such requirement imposed in the 2006-2007  
24 review?

25 MS MABLE CHAN: I cannot answer on behalf of my predecessors

26

1 of the review at that time and the position taken at  
2 that time, but in the course of the working group  
3 discussion, the Transport Department's point of view is  
4 that the seat belt would render additional protection to  
5 passengers, but whether or not it can achieve the effect  
6 that we would like to would depend very much on whether  
7 the passenger will use the seat belt, in the first  
8 place, and whether or not they are seated.

9 We know the constraints that may affect the  
10 effectiveness of the seat belt, but notwithstanding that  
11 we think that for new buses, the installation of seat  
12 belts is cost-effective, but it will render additional  
13 protection, while the additional cost is not  
14 significant. But I will address the retrofitting of  
15 existing buses in a later stage.

16 Thank you.

17 CHAIRMAN: Yes, Mr Chan.

18 MR DEREK CHAN: Before I move on to retrofitting, perhaps  
19 I can just make one side point.

20 In KMB's investigation report on the Tai Po  
21 accident, which was made available to the Transport  
22 Department on 12 March, so before the first meeting of  
23 the working group, KMB already indicated voluntarily  
24 that it would install seat belts on all passenger seats.

25 Can I just give a page reference -- I think you  
26

1 remember that.

2 CHAIRMAN: Can we have that reference, please. And can we  
3 have it on the screen.

4 MR DEREK CHAN: KMB-1, page 114, paragraph 40.

5 Mr Chairman, 114 is part of the KMB investigation  
6 report on the Tai Po accident dated 12 March 2018.

7 CHAIRMAN: Yes. We get that from page 98, which gives us  
8 the front page.

9 MR DEREK CHAN: Yes.

10 If I can just read out paragraph 40, headed "Safety  
11 belts", which is in part 5 of the investigation report,  
12 titled "Other measures to enhance bus safety". If I may  
13 just read out paragraph 40:

14 "KMB has already requested its suppliers to install  
15 safety belts on all seats as a standard feature for new  
16 buses ordered after 5 March 2018. As for buses that are  
17 currently in service, where certain routes so require,  
18 safety belts will be installed on the upper deck of KMB  
19 buses phase by phase."

20 Now, it would thus appear that even before the first  
21 meeting of the working group, KMB themselves have  
22 already taken the step to install seat belts on all  
23 passenger seats.

24 CHAIRMAN: On all new buses.

25 MR DEREK CHAN: On all new buses. Thank you, Mr Chairman.

26

1           So my question is this. Given this position of KMB,  
2           to what extent did this position play a part in your  
3           working group's recommendation that seat belts should be  
4           installed in all passenger seats for the other  
5           franchised bus operators as well?

6   MS MABLE CHAN: First of all, I would like to say that the  
7           receipt of the KMB's report to me on 12 March was later  
8           than our email to inform the various bus operators on  
9           6 March regarding the measures that we would like to  
10          study to enhance the franchised bus safety.

11          We have provided the committee with our email on --  
12   CHAIRMAN: This is not in dispute. On 15 February, the  
13          LegCo discussion focused, to some degree, on seat belts.

14   MS MABLE CHAN: Yes.

15   CHAIRMAN: So it's not surprising that you have put this on  
16          your agenda. There is no dispute about that.

17   MS MABLE CHAN: Okay.

18   CHAIRMAN: The question being asked is this. The fact that  
19          KMB have come to this decision before the working group  
20          ever met, did that play a part in you requiring that  
21          other -- or proposing that all franchised bus operators  
22          install seat belts on new buses? That's the question:  
23          did it play a part or not?

24   MS MABLE CHAN: We take note of the plan of KMB to request  
25          the suppliers to install safety seat belts on all seats  
26

1 for their new buses. We take note of that.

2 But in the working group discussion on the  
3 installation of seat belt issue, we take our due  
4 diligence to look into the technical feasibility, the  
5 financial implication and the road safety perspective of  
6 this --

7 CHAIRMAN: Forgive me interrupting, but to crystallise it,  
8 you took note of the feasibility, the cost, and the  
9 benefit -- the road safety perspective, you call it --  
10 but that means the benefit to passengers?

11 MS MABLE CHAN: Yes.

12 CHAIRMAN: Yes, Mr Chan.

13 MR DEREK CHAN: Mr Chairman, I was going to move to the  
14 issue of retrofitting seat belts.

15 CHAIRMAN: Very well, but before we leave this topic -- can  
16 you help the committee as to this: what proportion of  
17 the franchised buses in Hong Kong does the KMB Group, if  
18 I can call it that, operate?

19 MS MABLE CHAN: You means in terms of the number of buses?

20 CHAIRMAN: Yes, buses. 4,000, from my memory?

21 MS MABLE CHAN: 4,000 out of 5,900.

22 CHAIRMAN: Well, let's call it 6,000. So two-thirds of the  
23 buses. The company running two-thirds of the buses has  
24 decided to introduce seat belts on new buses, leaving  
25 the consideration about what to do with the other  
26

1           one-third, and you say of that, "We took note of that";  
2           is that it? That's your evidence?

3       MS MABLE CHAN: Yes.

4       CHAIRMAN: Thank you. We will take a 20-minute break now.

5       MS MABLE CHAN: Thank you, Chairman.

6       (11.32 am)

7                               (A short adjournment)

8       (11.53 am)

9       CHAIRMAN: Yes, Mr Chan.

10      MR DEREK CHAN: Mr Chairman, if I may then move on to the  
11      issue of retrofitting.

12           Again, I am going to start by looking at the  
13      passages in the working group report that deals with the  
14      issue of retrofitting. I'm going to read more passages  
15      than before because I recognise that the issue of  
16      retrofitting is more complicated.

17           So I think, to do justice to the analysis carried  
18      out in the report, I ought to read a few paragraphs in  
19      full. Can I first take you to paragraph 3.8 of the  
20      working group report, internal pagination page 26,  
21      bundle reference TD-5, page 1786.

22           Mr Chairman, there appears to be something wrong  
23      with the screen. Ah, there we are.

24      CHAIRMAN: Yes. Has that been resolved?

25      MR DEREK CHAN: Yes.

26

1 CHAIRMAN: Thank you.

2 MR DEREK CHAN: Ms Chan, do you have paragraph 3.8 in front  
3 of you?

4 MS MABLE CHAN: Yes.

5 MR DEREK CHAN: I'm going to read out 3.8, 3.9 and 3.10, and  
6 pausing towards the end of 3.10 to make a few remarks,  
7 but I will start reading first. 3.8 is contained in  
8 a section, "Retrofitting of seat belts on existing  
9 franchised buses", and the issue now is retrofitting on  
10 the upper deck. 3.8 says this:

11 "Even though it would be technically feasible to  
12 retrofit seat belts on all passenger seats on the upper  
13 deck, there are other implications. First, it is  
14 expected that the weight of the bus will increase by 300  
15 to 400kg and the passenger carrying capacity will  
16 probably be reduced by 7 to 8 passengers as a result of  
17 the modification. Moreover, the retrofitting and testing  
18 work for each franchised bus will take considerable time  
19 to complete and hence will affect the bus availability  
20 rate for bus operation during the process. Subject to  
21 the manpower available for the retrofitting works ADL  
22 and Volvo have estimated that the retrofitting would  
23 take about one week, requiring 3 to 4 skilled labour,  
24 per bus. However, since bus manufacturers have indicated  
25 that they could not provide the manpower and workshop

26

1 for the retrofitting work, the franchised bus operators  
2 would need to carry out the work by engaging contractors  
3 or utilise their own manpower and workshop. The  
4 availability of skilled workers and workshop facilities  
5 are critical factors in determining the time required  
6 for the retrofitting and testing work. Based on a very  
7 rough estimate, it would take about 6 to 12 years to  
8 complete the full retrofitting for about 3,300 buses.

9 3.9. In the light of the above, some bus operators  
10 have expressed concerns that the retrofitting of seat  
11 belts would not only incur significant financial  
12 implications, but also considerable time and manpower  
13 resources, not to mention the need to re-deploy or  
14 procure additional buses to maintain the existing bus  
15 service level during the whole process."

16 Pausing here, the reference to "significant  
17 financial implications" has a footnote 10 next to it,  
18 and at the bottom of the page, footnote 10 says this:

19 "In the absence of a detailed study on the technical  
20 details for retrofitting seat belts on all seats in the  
21 upper deck, a rough estimate on the costs of  
22 retrofitting a bus is about HK\$200,000 (excluding  
23 manpower and overhead costs)."

24 So, pausing here, it would appear from this that on  
25 the cost side of the analysis, you are looking at  
26

1 something like HK\$600 million in order to carry out the  
2 retrofitting over six to twelve years. Is that  
3 a correct rough way of looking at it?

4 MS MABLE CHAN: Correct, in terms of a rough estimate.

5 MR DEREK CHAN: If I may then continue reading from --

6 CHAIRMAN: Before you do so, what is meant by "excluding  
7 manpower and overhead costs"? What costs are they?

8 MR YK CHAN: Mr Chairman, may I answer this question? The  
9 cost quoted in the footnote only comprises the quote  
10 provided by the manufacturers on the equipment and  
11 fittings. In completing the whole retrofitting work,  
12 additional costs will be involved, including labour and  
13 other overheads, which is not included in this amount,  
14 at that time.

15 CHAIRMAN: So the manpower costs of the engineers who  
16 retrofit these devices is not included; is that it?

17 MR YK CHAN: It's not included because at that time there  
18 was no estimate about it.

19 CHAIRMAN: And what about the overhead costs? Is that  
20 something to do with the fact that the bus is out of  
21 action for a week?

22 MR YK CHAN: Another overhead might be workshop rental,  
23 things like that.

24 CHAIRMAN: I see. But what about the fact that the bus is  
25 out of action; is that costed into this?

26

1 MR YK CHAN: That's not factored into this at all.

2 CHAIRMAN: So that's an extra cost that's not yet  
3 calculated?

4 MR YK CHAN: That's correct.

5 CHAIRMAN: So the 600 million global figure is plus, plus,  
6 plus; is that correct?

7 MR YK CHAN: Yes.

8 CHAIRMAN: Thank you.

9 MR DEREK CHAN: If I may continue reading paragraph 3.10:

10 "In this regard, all franchised bus operators opine  
11 that, from their day-to-day observation, those  
12 passengers sitting on exposed seats do not normally wear  
13 seat belts. Seen in this light, the retrofitting works  
14 appeared not to be cost-effective."

15 Pausing here, I will ask you to note that this is  
16 something that I want to follow up with after we have  
17 read all the passages.

18 "On the other hand, they consider that public  
19 education should be conducted to promote the use of seat  
20 belts on buses. Amongst the five franchised bus  
21 operators, KMB and Long Win emphasise that they support  
22 the seat belt installation for new buses. Subject to  
23 the proposal from bus manufacturers, KMB and Long Win  
24 would retrofit seat belts on upper deck passenger seats  
25 or deploy buses with seat belts at all passenger seats

26

1 on routes which serve long-haul passengers or are  
2 operated on expressways with limited boarding or  
3 alighting activities at the en route stops. The  
4 remaining three franchised bus operators (that is  
5 Citybus, New World First Bus and New Lantao Bus) do not  
6 support the retrofitting works due to the expected low  
7 utilisation rate and huge retrofitting cost, and request  
8 for government subsidy should the proposed retrofitting  
9 be taken forward."

10 Now, again, just pausing here, there are references  
11 in this paragraph to franchised bus operators opining  
12 that passengers sitting on exposed seats do not normally  
13 wear seat belts and an expected low utilisation rate.

14 Am I correct that these sentiments were expressed  
15 during the working group meetings by the franchised bus  
16 operators?

17 MS MABLE CHAN: Yes.

18 MR DEREK CHAN: Again, just to give this issue more context,  
19 this committee has heard evidence from the police, and  
20 Chief Superintendent Baker, on behalf of the police,  
21 indicated an expectation that most people would use seat  
22 belts.

23 Mr Chairman, the reference to that evidence, if  
24 I can just give it, on the transcript, is Day 17,  
25 24 September 2018, page 48, line 20, and also at  
26

1 page 50, line 13.

2 I understand there is an option of just retrofitting  
3 seat belts on the upper deck and only on the routes that  
4 involve using expressways, and that's covered in 3.13,  
5 so I will read that as well before I start questioning.

6 3.13, under the heading "Conclusion and actions  
7 ahead":

8 "Having regard to the operation of franchised buses  
9 in Hong Kong which involves mostly urban buses with  
10 standing passengers, the technical feasibility of, and  
11 the costs and time required for, retrofitting seat belts  
12 on existing buses, the working group considers that  
13 there are insufficient grounds to make it a mandatory  
14 requirement for all buses to be fitted with seat belts  
15 on all passenger seats."

16 Just pausing here, I'm wondering if it's a typo or  
17 an issue with the language, because I understand that  
18 the working group recommends seat belts to be fitted on  
19 all passenger seats in new buses, so should this  
20 sentence read, "There are insufficient grounds to make  
21 it a mandatory requirement for all buses to be  
22 retrofitted with seat belts"?

23 MS MABLE CHAN: I can clarify on that. First, for new  
24 buses, the working group's recommendation is that all  
25 the new buses to be procured would be installed with  
26

1 seat belts for all passenger seats.

2 The working group considers that there are  
3 insufficient grounds to make it mandatory or I should  
4 emphasise that to make it a statutory requirement for  
5 all the buses, including both new or existing buses, to  
6 be fitted with seat belts on all passenger seats. When  
7 we make this statement, we are mindful of the various  
8 issues involved, which is still yet to be further  
9 examined and assessed, in particular the technical  
10 feasibility, the cost and time required for retrofitting  
11 seat belts on existing buses.

12 Thank you.

13 MR DEREK CHAN: So a distinction here is drawn between  
14 a franchise requirement and a statutory requirement? Is  
15 that a correct understanding?

16 MS MABLE CHAN: This is the first distinction, and the other  
17 distinction is that the franchise requirement is for all  
18 new buses, but we do not make a franchise requirement  
19 for all buses.

20 MR DEREK CHAN: Thanks for that clarification. If I may  
21 read on in that paragraph:

22 "Nevertheless, the working group recognises that as  
23 in the case of exposed seats and in bus compartment with  
24 no standees allowed, seat belts may offer extra  
25 protection to seated passengers. Hence, the working  
26

1 group recommends, and all franchised bus operators have  
2 agreed, that the feasibility of retrofitting of existing  
3 buses for installation of seat belts has to be further  
4 examined. Subject to further assessment on the  
5 technical, operational and financial feasibility,  
6 consideration should be given to retrofitting all seats  
7 in the upper deck with seat belts on those buses  
8 deployed for specific bus routes, that is those  
9 long-haul routes which are operated via expressways with  
10 relatively fewer bus stops."

11 Now, at footnote 11, the working group report gives  
12 examples of what expressways are being referred to, and  
13 at footnote 12, the number of buses required for  
14 retrofitting appears to be reduced to 2,000.

15 Am I correct to interpret this as saying, under this  
16 option, again on a global rough estimate, we are looking  
17 at something like HK\$400 million, plus, plus, plus --

18 MS MABLE CHAN: Correct.

19 MR DEREK CHAN: Going back, if I may, to the general  
20 statements that I have read out before about  
21 retrofitting works appear to be not cost-effective --  
22 now, when you are talking about cost-effectiveness, is  
23 that expressed in relative terms to the benefits that  
24 retrofitting might bring to passengers?

25 MS MABLE CHAN: Yes.

1 MR DEREK CHAN: Given Mr Chairman has indicated that the  
2 Transport Department has not made any quantifiable  
3 analysis on the benefits of seat belts, how is the  
4 cost-effectiveness measured, assessed?

5 MS MABLE CHAN: The statement that the retrofitting of seat  
6 belts on existing buses appears not to be cost-effective  
7 was made on the following considerations.

8 First, we notice that amongst the existing buses,  
9 not all bus models would be technically feasible for  
10 retrofitting of seat belts.

11 Secondly, for those models which are technically  
12 feasible for installation of seat belts, the  
13 installation of seat belts for seats on the lower deck  
14 would have implication on the structure and the  
15 operation aspects of the buses.

16 Thirdly, we also notice about the operational  
17 implications in terms of time and in terms of the labour  
18 arrangement, manpower and workshop arrangement, for the  
19 retrofitting work, which may have an implication and  
20 impact on the availability of the buses for the various  
21 bus operators to deploy.

22 Taking all this into account, the working group have  
23 carefully considered this and discussed with the bus  
24 operators, and as the senior counsel has also mentioned,  
25 in paragraphs 3.13 and 3.14, it is on this basis that we  
26

1 consider, and the bus operators agree, that the  
2 feasibility of retrofitting the existing buses for  
3 installation of seat belts has to be further examined.

4 So, to answer your question, the statement that it  
5 appears not to be cost-effective hasn't undergone  
6 a quantifiable and robust cost/benefit analysis in that  
7 term, but we have required, and the FB operators have  
8 agreed, that the operational and financial feasibility  
9 have to be, amongst other things, further assessed  
10 before we consider whether or not the seat belts can be  
11 installed with -- the seats on the upper deck can be  
12 installed with seat belts and, if so, whether they could  
13 be applicable to those long-haul routes which are  
14 operated via expressway with relatively fewer bus stops  
15 on which there may be a higher chance for the  
16 passengers, because they are not getting on and off that  
17 frequently, so it would be on that basis that the  
18 promotion of the use of seat belts would stand a higher  
19 chance.

20 Thank you.

21 CHAIRMAN: By that you mean that the utilisation rate would  
22 be higher?

23 MS MABLE CHAN: Yes, Chairman.

24 MR DEREK CHAN: Noting in your answer that more assessment  
25 is required, can I take you to an approach to this  
26

1 cost/benefit analysis suggested by Prof Stanley and  
2 Mr Weston, and then after I have read out the evidence  
3 I will invite your observations on whether this approach  
4 ought to be adopted.

5 If I may first take you to the transcript of  
6 Prof Stanley's evidence. That's at Day 16, 15 September  
7 2018, page 124.

8 Perhaps I can take it from page 123, just to give it  
9 some context. At page 123, line 20, you can see the  
10 topic is on the installation of seat belts on all seats,  
11 and at page 124, line 1, I was asking this question:

12 "So can I just start with a general question, that  
13 is are seat belts required to be installed on urban  
14 buses in Australia?

15 Prof John Stanley: No.

16 Mr Derek Chan: Is there a reason for that?

17 Prof John Stanley: The belief is that the mass of  
18 the vehicle itself is normally going to provide  
19 sufficient occupant protection in the event of  
20 an accident, such that seat belts are not going to add  
21 much more on top of that. There is also a challenge  
22 with existing vehicles of retrofitting and the cost of  
23 so doing.

24 The way that we would approach this sort of question  
25 in Australia -- and I don't know whether you might do  
26

1 exactly the same thing -- is we have a process called  
2 a regulatory impact statement, and if we were looking,  
3 for example, to require seat belts to be mandatory on  
4 route buses, that would probably need to go through the  
5 process of a regulatory impact statement that would look  
6 at the cost of various ways of going about undertaking  
7 that work, and then do an assessment of the  
8 probabilities of various sorts of incident types being  
9 reduced, putting a dollar value on that, and coming up  
10 with a view as the basis of that assessment. That's the  
11 normal way we do this kind of assessment.

12 Chairman: And who does the regulatory impact  
13 statement?

14 Prof John Stanley: It would be done by the relevant  
15 government department. A lot of these sorts of things  
16 would happen at a national level in Australia, so they  
17 would be done by the National Transport Commission which  
18 is the successor body to the National Road Transport  
19 Commission that I was deputy chairman of for nine years.  
20 We did multiple regulatory impact statements into  
21 various aspects of vehicle requirements."

22 So that's one passage.

23 Another passage that I would like to read out in the  
24 same day's evidence is at page 144. At 144, line 4, my  
25 question was this:  
26

1           "With all that information in mind, what is your  
2           observation or comment on the installation of seat  
3           belts, firstly on all the seats, and secondly focusing  
4           on the upper deck, where there is no standing  
5           passengers?

6           Prof John Stanley: Thank you. This really takes me  
7           back to an answer I gave maybe half an hour ago about  
8           the notion of a regulatory impact statement. I think  
9           there are two levels to this particular question. The  
10          first level is: is it technically feasible to fit seat  
11          belts in certain kinds of positions on buses, for  
12          example on the upper deck of new buses, on retrofitting  
13          for older buses. That's a technical question of  
14          feasibility.

15          The second level then is: if it is technically  
16          feasible, what is the cost/benefit ratio of doing that  
17          installation? In other words, what will it cost? That  
18          is the probability of particular kinds of accidents  
19          being reduced if those seat belts are installed? Will  
20          people wear them, is one of the questions that needs to  
21          be addressed in that setting?

22          I don't have a view in any particular circumstances  
23          whether it is a good idea or not. What I would say is  
24          that that's exactly the kind of problem that you should  
25          submit to a regulatory impact statement. There will be  
26

1 information around on the probabilities of accidents,  
2 these different varieties. You can put monetary values  
3 on the probability of those sorts of accidents being  
4 reduced. You probably can form a view too on the  
5 probability of wearing seat belts, which would affect  
6 the effectiveness of the wearing thereof.

7 So I think this is an exercise that needs a serious  
8 piece of cost/benefit analysis done on it. Now,  
9 government may decide it wants to make a policy decision  
10 to install seat belts where it is technically feasible.  
11 That's fine. As a matter of course, the way I would  
12 approach this, though, is to say you need to go through  
13 this cost/benefit analysis first, and I think that's  
14 what should be done in this situation.

15 So, rather than taking it on the basis that people  
16 think it's going to be this or going to be that, the  
17 kinds of concerns that have been raised by the various  
18 parties are really genuine and legitimate concerns and  
19 they affect the values of the potential installation,  
20 but until you have actually done that proper  
21 cost/benefit analysis, it's just speculation.

22 If I had a gut feel, it's going to be that probably  
23 it's not going to be worthwhile, with extensive seat  
24 belt fitting, but that would be no more than a gut feel,  
25 and ideally this needs to go through a proper  
26

1 evaluation.

2 Chairman: Because a gut feel is not good enough; you  
3 should do a cost/benefit analysis?

4 Prof Stanley: Exactly ..."

5 I will pick it up at line 9 again:

6 "Prof John Stanley: Exactly. In principle, it's  
7 a pretty straightforward cost/benefit analysis. Getting  
8 some of the values or the probabilities you need will  
9 need a bit of serious research, but the process and the  
10 sorts of things you need to look for are very much  
11 encapsulated by a lot of the responses that you have  
12 read out in the various submissions."

13 Then the rest of it talks about where you could get  
14 that type of information in Australia, which I won't  
15 read out.

16 Another passage that I want to go to, along the same  
17 lines, is at page 149, line 4. Again, I'm picking it up  
18 in the middle of Prof Stanley's answer which focuses  
19 more on the benefits side. Line 4:

20 "But then it's a case of what are the benefits, so  
21 then you need to look at what are the sorts of accidents  
22 that are happening in the vehicle, and, for example, is  
23 this happening to people who are standing; is it  
24 happening to people who are sitting; what is the  
25 probability that exposure to those sorts of accidents

26

1 will be reduced in the event that seat belt-wearing is  
2 required, and what do you need to do to encourage that  
3 seat belt-wearing?

4 If I was doing that kind of exercise, I would  
5 probably be talking to psychologists about how you would  
6 get through the message about wearing seat belts, about  
7 getting people to take this seriously. The point you  
8 make, Chair, about looking at what happens in those  
9 seats that are currently required to do it in Hong Kong,  
10 very important in terms of forming a view on the  
11 probabilities that will happen. I would be talking to  
12 whoever are the custodians of the values or the costs of  
13 different sorts of accidents. So, in other words, what  
14 is the cost of a fatal accident in Hong Kong, what is  
15 the cost of a serious injury accident, what is the cost  
16 of a minor injury accident, those sorts of things,  
17 because they will be the sorts of unit values you need  
18 to apply to the reductions in the probability of  
19 an accident of a particular kind taking place."

20 So that's Prof Stanley's view on how a cost/benefit  
21 analysis can be carried out.

22 I'm going to take you also to a short passage in  
23 Mr Weston's report about the London approach, and then I  
24 am going to ask for your observations. Can I take you  
25 to Mr Weston's report. The report starts at expert  
26

1 bundle page 115, and the short passage that I want to  
2 refer you to is at page 148 of that bundle, internal  
3 pagination page 34.

4 Ms Chan, as you can see, page 148, the topic being  
5 discussed is the bus safety standard, and the context  
6 concerns what safety devices to include as part of the  
7 bus safety standard. I will just read the third  
8 paragraph from the bottom, the paragraph starting with,  
9 "Although it is currently envisaged". I will just read  
10 out that paragraph first:

11 "Although it is currently envisaged that the  
12 standard will apply to new buses (around 700 per annum)  
13 consideration is also being given to the potential for  
14 retrofitting to existing buses possibly as part of their  
15 midlife refurbishment which takes place around 7 years."

16 Now, Ms Chan, it's not talking about seat belts  
17 here. The next part is what I want to focus on:

18 "It is worth noting that TfL have adopted a rigorous  
19 approach to the assessment of each potential option  
20 using cost/benefit analysis to target the interventions  
21 which will give the greatest return for each pound spent  
22 in terms of injury/accident reduction."

23 CHAIRMAN: I think, to put that into context, it would be  
24 useful to refer to the second paragraph under the  
25 heading "Bus safety standard", where the various  
26

1 technologies that have been examined are stipulated.

2 MR DEREK CHAN: Yes. Thank you, Mr Chairman. Perhaps I can  
3 read that for the record as well.

4 So the second paragraph under the heading "Bus  
5 safety standard" says this:

6 "Several potential technologies including  
7 intelligent speed assistance, autonomous braking,  
8 runaway bus prevention, pedal confusion prevention,  
9 acoustic and visual conspicuity, mirror design and  
10 frontal crash protection are being considered as part of  
11 this programme with both the costs and benefits of each  
12 being thoroughly assessed to ensure that the casualty  
13 reduction is maximised in return for the financial  
14 investment made."

15 So it would appear from the two experts' evidence  
16 that a similar rigorous cost/benefit analysis is  
17 undertaken in both jurisdictions. What I would like is  
18 the Transport Department's observations in respect of  
19 such an approach to the issue of retrofitting seat belts  
20 on franchised buses.

21 MS MABLE CHAN: Referring to the first expert submission,  
22 I notice that the reference that a regulatory impact  
23 assessment is considered necessary to consider any  
24 mandatory requirement for the installation of seat  
25 belts, and in this second submission or evidence from  
26

1 Transport for London, Mr Weston, it mentions about  
2 cost/benefit analysis.

3 From the Transport Department's perspective, I would  
4 say that I agree that for any installation of in-vehicle  
5 device to improve bus safety standard, we would need to  
6 go through a robust and careful assessment. While we  
7 may not be referring to the similar terminology as in  
8 the case of the two expert submissions, ie the  
9 regulatory impact assessment or the cost/benefit  
10 analysis, the working group's observation and  
11 consideration of requiring further study on the  
12 feasibility and operational considerations and the  
13 financial implications of the retrofitting of seat belts  
14 also embraces the need to look at this issue in a more  
15 systematic and holistic manner.

16 As the chairman pointed out a little bit earlier, in  
17 paragraphs 3.13 and 3.14 in the working group report, we  
18 may not have mentioned about comparing this cost or  
19 implications with the benefit. As a forward-looking  
20 approach, when we take this forward, I agree that we  
21 would have to look into these operational and technical  
22 and financial considerations and compare them with the  
23 benefits.

24 Given the retrofitting of the existing buses for  
25 seat belts appears to be not cost-effective at the  
26

1 present moment, and it involves a number of  
2 considerations, obviously, should there be any decision  
3 to make it a mandatory or statutory requirement for all  
4 existing buses to be installed with seat belts, in  
5 particular on the upper deck, we would have to look into  
6 seriously on how much marginal benefit we can achieve as  
7 compared with the cost and the technical considerations.

8 So, in short, to answer your question, I agree with  
9 the expert advice that if we want to go forward with  
10 a mandatory requirement, we have to go through some  
11 cost/benefit analysis or impact assessment.

12 Thank you.

13 MR DEREK CHAN: What about the suggestion from Prof Stanley  
14 and to some extent in Mr Weston's report about some  
15 scientifically-based quantifiable analysis on the  
16 benefits that can be achieved by the installation of  
17 seat belts? Do you agree with that observation and the  
18 need to do that in our present case?

19 MS MABLE CHAN: I agree, though I think a lot of work would  
20 need to be done in that perspective, because so far the  
21 buses, the franchised buses, in Hong Kong, we do not  
22 have such installation. So it is difficult to gather  
23 the data in this sense. But still, we can go further,  
24 to do some overseas research, and also we can do further  
25 analysis based on the accident figures in other types of  
26

1 vehicles. But still the constraint would be those  
2 vehicles are not double-decker. On the other hand, we  
3 think it is also worth to further consider, because the  
4 protection and the choice that can be provided to the  
5 passengers would also merit our consideration of whether  
6 the provision of seat belts on the upper deck passengers  
7 is worth further consideration and examination.

8 MR DEREK CHAN: Mr Chairman, if I may, I was going to move  
9 into the topic of bus accident data.

10 CHAIRMAN: Yes, but before you do that, there are some  
11 questions that I'd like to ask.

12 Have you obtained any data of the utilisation rate  
13 of the seat belts that are currently installed in  
14 franchised buses?

15 MS MABLE CHAN: No. No, Chairman.

16 CHAIRMAN: Why not?

17 MS MABLE CHAN: Sorry, I don't have the answer.

18 CHAIRMAN: Is that something that you intend obtaining in  
19 the future?

20 MS MABLE CHAN: That's something I would intend to do.

21 I just wish to add that we also notice the view  
22 expressed by the bus operators at the working group that  
23 they are inclined to think that the utilisation rate of  
24 seat belts is low. I wish to add that while noting that  
25 statement, we don't think, if it is true, that the  
26

1 current low or relatively low utilisation rate of seat  
2 belts should not be a key factor to stop us from  
3 exploring or examination or assessment of the  
4 installation of seat belts on existing buses, because  
5 I think this is something that both government and also  
6 the bus operators should do more in passenger education.

7 CHAIRMAN: We have received evidence from Mr Samuel Cheng,  
8 the managing director of Citybus, of his personal  
9 experience as somebody who travels a lot on buses that  
10 seat belts are not used. Do you accept that that is  
11 a fair assessment, not not used by anybody, but the very  
12 low rate of use?

13 MS MABLE CHAN: I notice his statement, although I do not  
14 receive similar statement by other bus operators'  
15 operations staff.

16 Thank you, Chairman.

17 CHAIRMAN: But do you accept what he's observed? He says he  
18 goes on buses all the time.

19 MS MABLE CHAN: Chairman, I would just accept his statement,  
20 although I would like to add I also travel on buses all  
21 the time.

22 CHAIRMAN: Do you notice people wearing seat belts?

23 MS MABLE CHAN: I'm the one using the seat belt.

24 CHAIRMAN: Apart from you?

25 MS MABLE CHAN: I notice a number of people actually like to  
26

1 sit on the exposed seats, like the front seats on the  
2 upper deck. On my personal experience, I have seen  
3 people using the seat belt.

4 CHAIRMAN: Would it not be simplicity itself to ask the bus  
5 operators to use their CCTV cameras to capture the use  
6 of seat belts? For example, those upper deck seats at  
7 the front.

8 MS MABLE CHAN: I think that would be a good idea, because  
9 the installation of CCTV on buses, the rate, I mean the  
10 number of buses installed with CCTV, have already  
11 reached some 80 per cent, and CCTV are installed on the  
12 upper deck, and I think this is actually a good idea  
13 that we can consider.

14 CHAIRMAN: Do you have any intentions as to whether or not  
15 you would seek to have the use of seat belts made  
16 mandatory on buses where they are fitted?

17 MS MABLE CHAN: Should we consider this as a way forward,  
18 then this is exactly the point that I would like to make  
19 and agree with the expert observation that we have to go  
20 through a robust impact assessment before making it  
21 a statutory or mandatory requirement.

22 Thank you, Chairman.

23 CHAIRMAN: Have you considered the difficulties that lie in  
24 the way of making the use of seat belts mandatory on  
25 a bus, a double-decked bus, with only one bus driver, no  
26

1 conductor? How is it to be enforced; have you  
2 considered that?

3 MS MABLE CHAN: I would not underestimate the issues or  
4 difficulties involved in an actual operation context, in  
5 particular the enforcement. We will certainly take that  
6 into account when we consider the operational aspect of  
7 examining the installation of seat belts on all buses.

8 Thank you.

9 CHAIRMAN: Mr Auyeung.

10 MEMBER AUYEUNG: What about education? Is there any way TD  
11 can educate the public more on encouraging them to use  
12 seat belts?

13 MS MABLE CHAN: This is certainly an area that we can do  
14 more. We are actually working diligently on a passenger  
15 education campaign. There are a number of themes,  
16 regarding their attitude and their responsibility when  
17 on-boarding public transport modes. The issue of seat  
18 belt and the use of seat belt wherever it is available  
19 is certainly an area that we would promote further.

20 Thank you.

21 MR DEREK CHAN: In that context, would a mandatory  
22 requirement, leaving aside the issue of  
23 enforceability -- would a mandatory requirement to wear  
24 seat belts where available assist in the public  
25 education, drawing on the experience in public light  
26

1 buses?

2 MS MABLE CHAN: In a way, it may help, but on the other hand

3 I think that the enforceability and the impact --

4 because it will have to be enforced, and implemented by

5 the bus operators. So we would certainly need to take

6 that into account seriously when we move towards any

7 step of making this as a mandatory requirement.

8 MR DEREK CHAN: Can you just remind me, for my benefit --

9 I think we have received evidence on this, but instead

10 of me digging around for the reference -- is the wearing

11 of seat belts on public light buses a mandatory

12 requirement under statute?

13 MS MABLE CHAN: Yes.

14 CHAIRMAN: It is, is it not, and has been for quite a few

15 years?

16 MS MABLE CHAN: Yes. 2005? I don't have the exact date.

17 We can check.

18 CHAIRMAN: Yes. We have that information. We have received

19 evidence about this.

20 But perhaps this is the real point. When Chief

21 Superintendent Baker was telling us that the expectation

22 would be of a low utilisation of seat belts on

23 franchised buses, he did so having already observed that

24 there was a low utilisation on PLBs, and he also said

25 that there were real difficulties in enforcement, and in

26

1 fact enforcement only happened in bursts when particular  
2 policemen decided to enforce it, but generally it was  
3 an unenforced law.

4 MS MABLE CHAN: If I may add that -- I noticed his  
5 statement, but I think it is always a chicken and egg  
6 issue. I think, if we have to consider any safety  
7 installation or device, to make it mandatory, we need  
8 to -- when we take this to the Legislative Council, it  
9 is an established practice for the administration to  
10 submit our assessment, including any impact assessment,  
11 to the Legislative Council for passing anything into the  
12 law. We have to support that with figures and with  
13 anecdotal evidence, with statistics. Whether or not it  
14 could be enforceable is also one of the issues that  
15 always our Legislative Councillors will raise when we  
16 put something into the law. But once it is agreed and  
17 passed in the law, I think it will be up to operational  
18 departments, like TD, and also the enforcement agency to  
19 make our best effort to ensure a law, the legislative  
20 requirement, is implemented to its fullest possible.

21 Thank you, Chairman.

22 CHAIRMAN: Earlier on you said, as I recall, that if the  
23 utilisation of installed seat belts on buses was to be  
24 made mandatory, it would have to be enforced by the bus  
25 operators.

1 MS MABLE CHAN: I think, in the outset, when a bus passenger  
2 gets onto the bus, no doubt a bus captain on a bus would  
3 be the first point of contact to have first-hand  
4 information and knowledge about the utilisation of  
5 passengers.

6 If something is written into the law, and it is  
7 always the law enforcement agency's responsibility.  
8 Should they receive any complaint or should they see  
9 this on the roadside, it will be in their prerogative to  
10 ensure that something in the law is enforced.

11 CHAIRMAN: The reason I raise that with you is because we  
12 had evidence from a bus company who said they couldn't  
13 possibly do that, there's one bus driver and 135 people  
14 on the bus, and there are two decks to the bus.

15 MR DEREK CHAN: Chairman, we appreciate and acknowledge the  
16 difficulties and the pressure on the bus captain. So  
17 I think, should we go along that path to make it  
18 mandatory, of course we have to be true to ourselves, to  
19 make sure something written in law is enforceable, and  
20 we would have to think of ways to help or equip our bus  
21 operators to help ensure that the seat belt, if  
22 available, can be utilised.

23 The usage of CCTV or the promotion campaign, all  
24 these will be considered in ensuring this, but I think  
25 at this present stage we will not take this lightly and  
26

1 we are not anywhere near the stage of making the wearing  
2 of seat belts a mandatory requirement. That is why we  
3 are taking a very prudent approach here.

4 Thank you.

5 CHAIRMAN: Yes, thank you.

6 Yes, Mr Chan.

7 MR DEREK CHAN: If I may move on to the next topic, which is  
8 bus accident data.

9 Can I deal firstly with the present situation, as it  
10 currently is. We have looked at the "Bus safety"  
11 sections of the forward planning programmes, which  
12 I will refer to as FPPs, of the bus operators on  
13 numerous occasions, so I'm not going to go back to them,  
14 but they contain a lot of data and analysis on bus  
15 accidents.

16 We have also heard from the police that the police  
17 do not have access to the data contained in the "Bus  
18 safety" sections of the FPPs.

19 Mr Chairman, the reference to that evidence is  
20 Day 17, 24 September 2018, page 19. I'm not going to go  
21 to it; I'm just giving you the reference for the  
22 transcript.

23 CHAIRMAN: Thank you. That's Chief Superintendent Baker,  
24 isn't it?

25 MR DEREK CHAN: Yes, that's correct.

26

1           So, Ms Chan, my question is this. Prior to such  
2           data being made available to the public through the  
3           provision of it to this committee, had this data and  
4           analysis been made available to the public?

5       MS MABLE CHAN: Perhaps I will start off and then I will ask  
6           my colleagues to supplement.

7           Based on my knowledge and recollection, we have  
8           asked the franchised bus operators to make further  
9           disclosure of their accident data on an annual basis.

10       CHAIRMAN: When was that request made?

11       MS MABLE CHAN: I'm afraid that we have to provide the year  
12           in which this has been included as a franchise  
13           requirement. Based on my colleague's cursory knowledge,  
14           it has been for quite some years.

15       CHAIRMAN: It's a franchise requirement, is it?

16       MS MABLE CHAN: Franchise requirement.

17       MR DEREK CHAN: It's a franchise requirement to provide it  
18           to the Transport Department. My question is more  
19           towards disclosure of it to the public.

20       MS MABLE CHAN: Yes. Let me elaborate a little bit.

21       CHAIRMAN: Yes.

22       MS MABLE CHAN: Or, actually, perhaps it may be useful if  
23           I can provide a copy -- it's already there. On the  
24           screen is the New World First Bus Fuller Disclosure,  
25           2017.

26

1           So, go down the page, at the bottom of the page, and  
2           go down. 13, I think. I think this is not the example  
3           I would like to refer to. Perhaps I can supply you with  
4           the page of the Citybus Fuller Disclosure, 2017 -- I can  
5           provide this page to the committee.

6   CHAIRMAN: Yes. We have that in our bundles.

7           Where are they, Mr Chan?

8   MR DEREK CHAN: Yes, we do. I'm looking for it now.

9   CHAIRMAN: Just give us a moment.

10   MR DEREK CHAN: The document is contained in TD-3, page 906.

11           Ms Chan, is that the document you were trying to  
12           locate?

13   MS MABLE CHAN: Yes.

14   CHAIRMAN: And what page, perhaps, if you've got the  
15           original, the internal pagination?

16   MS MABLE CHAN: There is no page on that.

17   MR DEREK CHAN: The page number is in the top-left and  
18           top-right-hand corner.

19   MS MABLE CHAN: Paginated page 909.

20   CHAIRMAN: 909? Thank you.

21   MR DEREK CHAN: The point I would like to make is the bus  
22           operator, they provide the accident data in their fuller  
23           disclosure report which is disclosed to the public.  
24           Of course, I would need to point out that the  
25           description and the outline of the accident data may not

26

1 go down into the further deeper level, which, as  
2 circumstances require, we may ask them to provide  
3 further analysis into more detail on specific causes of  
4 accidents. But this is the sort of accident data  
5 required to be provided in their fuller disclosure to  
6 the public.

7 CHAIRMAN: You're referring to paragraph 13?

8 MS MABLE CHAN: Yes, item 13.

9 CHAIRMAN: Have you had a look at the Transport for London's  
10 accident data on the internet?

11 MS MABLE CHAN: I have. It's more --

12 CHAIRMAN: You have seen how broad that is, how it's  
13 produced every quarter?

14 MS MABLE CHAN: Yes, I understand that.

15 CHAIRMAN: Is there any reason why we couldn't do that in  
16 Hong Kong?

17 MS MABLE CHAN: As we shared with the chairman, the previous  
18 FPP that we presented to the committee in May, on  
19 a personal account, I think there are a lot of areas  
20 that we can elaborate and enhance, and actually, in the  
21 process of FPP in the coming 2019-2023, we have also  
22 produced to the committee the letter that we have  
23 written to the FB operators that the areas that we would  
24 like them to further elaborate and analyse. With that  
25 as the basis, there is certainly scope for us to request  
26

1 the bus operators to disclose in an even greater extent  
2 of the accident data for the public's information.

3 CHAIRMAN: Is there any reason why the "Bus safety" chapter  
4 with the accident data that we've seen in these forward  
5 planning programmes could not be made public, all of it?  
6 Is there any reason?

7 MS MABLE CHAN: Obviously, we haven't gone through that  
8 detailed discussion with the bus operators, as to  
9 whether or not that safety chapter can be disclosed in  
10 full. I just wish to point out that --

11 CHAIRMAN: Well, can you think of any reason that it  
12 couldn't be disclosed? There's nothing commercially  
13 sensitive about it, is there?

14 MS MABLE CHAN: In general, there may not be any immediate  
15 commercial sensitivity that I can think of in that "Bus  
16 safety" chapter.

17 CHAIRMAN: By all means take time to think of it, because  
18 I can't think of a single thing that would be  
19 commercially sensitive so that it might not be something  
20 that ought to be revealed.

21 MS MABLE CHAN: I just want to highlight one point.

22 CHAIRMAN: Yes.

23 MS MABLE CHAN: Because when we asked the franchised bus  
24 operators to provide further information for the purpose  
25 of the FPP, not for the purpose of the fuller  
26

1 disclosure, we have ventured into the area of asking the  
2 bus operators to diagnose the accident causes, say by  
3 bus route, down to bus route, or into very specific  
4 reference to certain bus routes. So I'm not saying that  
5 may be commercially sensitive, but I think we have to be  
6 conscious that should that "Bus safety" chapter be made  
7 as a fuller disclosure to the public -- I mean, the  
8 commercial sensitivity angle would have to be taken into  
9 account.

10 CHAIRMAN: Can you think of any commercial angle? I'm  
11 inviting you to do so. What is there that could  
12 possibly be commercially sensitive in a chapter about  
13 bus safety?

14 MS MABLE CHAN: I'm just thinking of it in a theoretical  
15 way, Chairman, first of all. Because the bus company is  
16 also required to advise and elaborate on their plans and  
17 proposals to enhance bus safety and measures to be  
18 taken, so the bus operator may put in some dollar sign  
19 on to some specific measure on to that programme, and  
20 also the timeline for implementing that specific  
21 proposal in the coming five years or so, as part of  
22 their investment of the company in the forward-planning  
23 exercise for the coming five years.

24 CHAIRMAN: In the "Bus safety" chapter?

25 MS MABLE CHAN: Yes.

1 CHAIRMAN: I'm going to ask Mr Chan to take us to that -- in  
2 due course, Mr Chan -- so you can explore this issue.  
3 The question is, is there anything that could possibly  
4 be properly commercially sensitive in this data? Please  
5 come back to that later, Mr Chan.

6 MR DEREK CHAN: Yes. I will perhaps deal with that  
7 particular point after lunch.

8 CHAIRMAN: Whilst we are on this topic, is there any reason  
9 why this data, in the forward planning programme "Bus  
10 safety" chapter, could not be disclosed to the police?  
11 They said they would be delighted or happy to receive  
12 it. Is there any reason why the police couldn't get it?

13 MS MABLE CHAN: Chairman, on this front, I do not see there  
14 is any particular difficulty in providing this data for  
15 sharing with our close partner, ie the police.

16 CHAIRMAN: So can I take that --

17 MS MABLE CHAN: This is something that we can consider.

18 CHAIRMAN: You are only going to consider it? You can't say  
19 yes, they can have it?

20 MS MABLE CHAN: I think the best I can say is that we will  
21 consider that.

22 CHAIRMAN: You are open to discussing it, are you?

23 MS MABLE CHAN: Yes.

24 CHAIRMAN: Thank you.

25 MR DEREK CHAN: Again, just focusing on what is available to  
26

1 the public --

2 MS MABLE CHAN: Perhaps, if I may -- because the safety  
3 chapter has been compiled and provided to TD in the  
4 context of the forward planning programme, so apart from  
5 providing detailed information and analysis, the primary  
6 objective is to let the bus operator inform and advise  
7 the government and administration of their  
8 forward-planning exercise, their investments, their  
9 plans, and all that. That's why I need to take a bit of  
10 caution here that I would not at this point commit the  
11 government on any specific disclosure of a particular  
12 chapter; although, as I answered the chairman's  
13 question, that the sharing of that "Bus safety" chapter  
14 with the police is something that is worth us  
15 considering.

16 Thank you.

17 CHAIRMAN: I am right, am I not, Mr Chan, in recalling that  
18 Mr Weston recommended that this data be made public?

19 MR DEREK CHAN: Yes, I was going to go to that --

20 CHAIRMAN: Perhaps after lunch you can come back with that  
21 reference.

22 MR DEREK CHAN: Yes. I was going to go to the  
23 recommendations a bit later.

24 CHAIRMAN: Thank you.

25 MR DEREK CHAN: Again, just focusing on what the current  
26

1 situation is and then looking at what could be the  
2 situation a bit later -- in the hearing on Thursday, the  
3 Transport Department provided, during the hearing  
4 itself, a document entitled, "Contributory factors of  
5 traffic accidents" with a reference "Annex E" on the top  
6 right-hand corner.

7 I understand that that document has not yet made its  
8 way into the bundle.

9 Ms Chan, do you have a copy of that document? It's  
10 on the screen but do you have a hard copy of that  
11 document before you? A copy is being made available to  
12 you now. (Handed).

13 CHAIRMAN: Thank you.

14 MR DEREK CHAN: I'll just give the context of this document.

15 This document was provided as part of a letter that the  
16 Transport Department sent to KMB --

17 MS MABLE CHAN: Yes.

18 MR DEREK CHAN: -- on 21 May 2018, asking KMB to provide  
19 accident analysis in a similar format.

20 Just for the transcript, the page reference of that  
21 letter from the Transport Department to KMB is at TD-5,  
22 page 1728.

23 My question, actually, is quite simple. Has a table  
24 like this been made available to the public on  
25 a systematic and regular basis, going into this level of  
26

1 detail?

2 MS MABLE CHAN: No.

3 MR DEREK CHAN: To be fair, I understand that the Transport  
4 Department does publish road accident statistics on its  
5 website annually.

6 MS MABLE CHAN: Yes.

7 MR DEREK CHAN: And part of the information does relate to  
8 franchised buses. My question is more whether the  
9 disclosure goes to this level of detail.

10 MS MABLE CHAN: No, not to that detail.

11 MR DEREK CHAN: Again, Ms Chan, before going to the  
12 recommendations and what could be the position, I just  
13 want to establish the passing of accident data from the  
14 franchised bus operators to the Transport Department.

15 CHAIRMAN: Before you move on to that -- just looking at  
16 annex E, given that we've been told about the  
17 considerable number of accidents that involve people  
18 losing balance on buses, which are the categories of  
19 driving behaviour that contribute to that, looking at  
20 this schedule?

21 I ask that question because when I look at  
22 "Stopping/starting negligently", whatever that means,  
23 but let's assume stopping with harsh braking and  
24 starting with excessive acceleration, that seems to be  
25 a very small number of incidents. So what is it that  
26

1 contributes to losing balance?

2 MR YK CHAN: Mr Chairman, making reference to this list,

3 I would go through probably one by one.

4 CHAIRMAN: Take your time for a moment. Take what you say

5 is the big one, and then go down in scale.

6 MR YK CHAN: I would say stopping and starting negligently.

7 CHAIRMAN: But why are there so few, if that's --

8 MR YK CHAN: This is only one of the factors. Possibly to

9 avoid collision, probably the driver's action is to try

10 to stop -- press hard on the brake to avoid collision,

11 that may cause the unbalance of the passenger on board.

12 "Overtaking/lane changing negligently", yes,

13 certainly, that may cause passenger imbalance in there.

14 "Driving too fast" -- it may, but if you only drive

15 constantly too fast that may --

16 CHAIRMAN: It's completely irrelevant, isn't it, driving too

17 fast? It's the change of speed that makes

18 a difference --

19 MR YK CHAN: That is right.

20 CHAIRMAN: -- or swerving.

21 MR YK CHAN: No, so probably it is not a major factor to

22 that.

23 U-turning, it depends on the rate --

24 CHAIRMAN: You don't see too many buses doing U-turns, do

25 you?

26

1 MR YK CHAN: No.

2 CHAIRMAN: Right.

3 MR YK CHAN: But usually our routes will be tried out on the  
4 first hand, but when they really need to U-turn, then we  
5 should ask them to exercise caution. But U-turning may  
6 be one factor, because it involves turning direction  
7 with different speed, so it may cause imbalance.

8 Further down: "Failing to observe traffic  
9 signals/traffic signs", it may not be.

10 CHAIRMAN: Well, just tell us the ones that are, not the  
11 ones that are not.

12 MR YK CHAN: "Driving inattentively" may be one. "Lost  
13 control of vehicle" may be one.

14 CHAIRMAN: These figures don't really help us, do they?

15 MR YK CHAN: No.

16 CHAIRMAN: Because if one was to start with this question,  
17 "We've got a problem with people losing balance on  
18 buses; what's causing it?", where do we find that  
19 information from?

20 MR YK CHAN: Perhaps we may do more analysis. I think we do  
21 have the consequence of the accidents, like whether,  
22 say, a passenger on board has lost balance and got  
23 injured.

24 CHAIRMAN: Let's just take that as an example.

25 MR YK CHAN: Based on that, I think we can do more analysis

26

1 on the cause.

2 CHAIRMAN: When that happens, somebody is injured on a bus  
3 because they have lost balance, they are thrown into  
4 some hard object on the bus and they are injured, does  
5 the bus operator perform an analysis of the  
6 circumstances? And there would be easy ways to do that:  
7 CCTV, to show whether or not he was braking because of  
8 a child running across the road, a car changing lanes.  
9 And then one could see if that wasn't the case, you  
10 might see that he had gone past the bus stop and was  
11 braking hard so he could stop near the bus stop. Is  
12 that kind of analysis done?

13 MR YK CHAN: I understand bus companies do carry out such  
14 investigations.

15 CHAIRMAN: Do they give you the results, the data, to show  
16 what has caused it?

17 MR YK CHAN: We do not receive those information for each  
18 and every accident, but for specific incidents or  
19 accidents, we ask for more detailed information of the  
20 investigation, they will provide us with the reasoning.

21 CHAIRMAN: I'm not asking whether or not you get data for  
22 each and every accident, but surely this information  
23 could be collated and they could say, "We have 200  
24 people injured on the buses where the bus drivers are at  
25 fault, and these are the conditions that have caused it:

26

1 accelerating too fast, decelerating harshly."

2 MS MABLE CHAN: Chairman, I will try to help while my  
3 colleagues are finding some specific evidence on that.  
4 I recall that in past years, say in 2006 or 2007, in  
5 their analysis of the accidents of passengers losing  
6 balance of certain bus companies, then colleagues have  
7 noted a rise in the trend and also the number of  
8 accounts, and they have asked the companies to  
9 investigate. One of the causes then was the lack of  
10 adequate handrails along the staircase and also on the  
11 lower deck. It was arising from the analysis then that  
12 we have required the bus companies to install additional  
13 devices in the bus compartment, to help to address this  
14 particular factor of, say, passengers rolling over down  
15 the stairs onto the lower deck.

16 CHAIRMAN: In what years was this data required and  
17 provided?

18 MS MABLE CHAN: My colleagues are checking. I think we have  
19 reported that in one of our previous submissions.

20 CHAIRMAN: There's no need to hurry because we have reached  
21 lunchtime. Maybe you can deal with that after lunch.

22 MS MABLE CHAN: I can quote the reference, yes.

23 CHAIRMAN: Thank you.

24 We will take our lunch break now and resume at 2.30  
25 this afternoon. Thank you.

26

1 (1.03 pm)

2 (The luncheon adjournment)

3 (2.31 pm)

4 CHAIRMAN: Good afternoon.

5 Yes, Mr Chan.

6 MR DEREK CHAN: Mr Chairman, I think before the lunch break

7 both Ms Chan and myself owed the committee a couple of

8 references.

9 CHAIRMAN: Yes.

10 MR DEREK CHAN: Can I take them one by one, in turn.

11 The first reference that the committee was

12 interested in was in relation to Mr Weston and

13 Prof Stanley's views about making the "Bus safety"

14 section of the forward planning programmes public.

15 CHAIRMAN: Yes.

16 MR DEREK CHAN: The first reference for that can be found in

17 the report of Prof Stanley, which is at expert bundle,

18 page 67, internal pagination page 14 of the second

19 report.

20 CHAIRMAN: Thank you.

21 MR DEREK CHAN: Again, if I can just read it out:

22 "The forward planning programme documents are

23 understood to be confidential documents, as between the

24 relevant franchised bus operators and the Transport

25 Department. The author believes that the data and

26

1 analysis they contain is an important part of the  
2 process of an operator demonstrating their capacity to  
3 operate a proper and efficient service. The fatalities  
4 associated with these services are largely pedestrian  
5 fatalities, making them a significant societal or  
6 external cost of service operation. It is argued in  
7 section 4 of this report that franchised/contracted  
8 route bus operators need to be subject to performance  
9 pressure to help ensure they provide a proper and  
10 efficient service. Being publicly accountable for their  
11 safety performance would help to sustain performance  
12 pressure. There are solid arguments favouring  
13 publication of the "Bus safety" chapter of the FPPs,  
14 because of the wider societal costs of accidents."

15 Prof Stanley expands on this in his evidence, so  
16 I will take the committee to that as well. Can I refer  
17 the committee to the evidence of Prof Stanley on Day 16,  
18 15 September 2018, at page 178.

19 CHAIRMAN: Yes.

20 MR DEREK CHAN: If I can pick it up at line 3. That is  
21 where I am asking the question, and I am asking  
22 Prof Stanley this:

23 "You make that point at page 69 of your expert  
24 report. At the bull bullet point of page 69 you say:

25 'There are solid arguments favouring publication of  
26

1 the "Bus safety" chapter of the five year forward  
2 planning programmes, because of the wider societal costs  
3 of accidents.'

4 I think you were referring to a number of analytical  
5 statistics that relate to safety issues.

6 Prof John Stanley: Yes, Mr Chan. I thought that the  
7 discussion in some of those "Bus safety" chapters was  
8 really informative, and it is the sort of information  
9 that I believe, in the public interest, should be more  
10 widely available.

11 I'm referring, for example, to the kinds of analysis  
12 that was presented on the driving our links and how that  
13 affects accident performance, I think it was.

14 Chairman: Yes, and non-links, as I think it was  
15 established, between the number of hours you drive, the  
16 age of the drivers, that sort of comparison?

17 Prof John Stanley: Exactly, Chair. Accident rate by  
18 years of service, accident rate by hours of duty before  
19 the accident. I mean, I think this is really good  
20 analysis, and it shouldn't be stuck in documents that  
21 are only available to a few select people. It's really  
22 important information in the public interest, in my  
23 view, and it shows that there's some really good  
24 research being done, trying to come to grips with the  
25 challenges that are being faced in the safety sense and  
26

1           it would give people confidence in what the industry is  
2           trying to do."

3           Can I then pick it up over the next page, at  
4           page 180, where Prof Stanley deals with Mr Weston's  
5           opinions on the same topic, so I can probably deal with  
6           both together.

7           Picking it up at line 16, where I ask this question:

8           "Yes. Mr Weston also makes a similar point, on the  
9           transparency of this sort of data. Can I quickly take  
10          you to that at page 153 of the expert bundle, and if  
11          I can just read you --" and can I drop to line 25:

12          "Paragraph 84, under the heading, 'Safety data  
13          transparency/performance'. If I can read it out."

14          Mr Chairman, what follows is an extract from  
15          Mr Weston's evidence so I will read that as well so I  
16          can deal with both Mr Weston and Prof Stanley at the  
17          same time.

18       CHAIRMAN: Yes.

19       MR DEREK CHAN: Reading from line 2 on page 181:

20          "'It is clear from London's experience that greater  
21          transparency of data necessarily the safety performance  
22          of the bus network not only leads to greater stakeholder  
23          and public scrutiny [but] it also leads to a sharper  
24          focus from both the transport authority and its  
25          contracted bus operators on the safety agenda. An open  
26

1 approach to incident data leads to accountability.

2 Consideration should be given to what safety data in  
3 relation to the Hong Kong franchised bus network could  
4 be placed into the public domain.'

5 Professor, do you agree with that or do you have any  
6 other observations in that regard?

7 Prof John Stanley: I agree fully with that, Mr Chan.  
8 My view generally on the Greater London Authority and  
9 Transport for London is they are almost without peer in  
10 terms of availability of data and information, in  
11 a global sense, and they don't try [to] hide things,  
12 they try [to] put it out there, and warts and all are  
13 prepared to confront the sorts of challenges that that  
14 shows.

15 I think that really leads to a lot of confidence in  
16 that process, so I'm very supportive."

17 So those are the views of both Mr Weston and  
18 Prof Stanley.

19 CHAIRMAN: Can you provide the reference for Mr Weston's  
20 evidence? What day and page was that?

21 MR DEREK CHAN: The quote that I was reading out is actually  
22 a reference to Mr Weston's report.

23 CHAIRMAN: Yes. Where is it?

24 MR DEREK CHAN: Expert bundle, page 153, which is internal  
25 pagination page 39 of Mr Weston's report, under the  
26

1 heading, "Safety data transparency/performance",  
2 paragraph 8.4.

3 CHAIRMAN: That's very helpful. Thank you.

4 MR DEREK CHAN: Hopefully, that deals with the first issue.

5 The second and third issues deal with the contents  
6 of --

7 CHAIRMAN: This may be an opportunity for you, Ms Chan, to  
8 respond about the issue -- if it's not yet the right  
9 opportunity say so -- of whether or not there is  
10 anything in this safety chapter accident data  
11 information that might be commercially sensitive.

12 MS MABLE CHAN: Chairman, I have been looking through past  
13 FPP safety chapter. It appears to me that there may not  
14 be a significant part of the information that may  
15 directly relate to the commercial sensitivity of the  
16 companies involved. I would like to add that open data  
17 policy and approach is something that Hong Kong  
18 government and Transport Department is also advocating.  
19 So more transparency, greater transparency of data, in  
20 particular on safety that is of concern to members of  
21 the public, is an approach and a direction that I think  
22 TD would actively pursue and discuss with the bus  
23 operators.

24 Thank you.

25 CHAIRMAN: And when do you expect to be in a position to  
26

1 make a determination about this issue?

2 MS MABLE CHAN: As mentioned in the past hearing, our  
3 working group will continue its work. It will be one of  
4 the topics on the agenda to explore.

5 In parallel, we are also working with the bus  
6 operators to improve and elaborate the various analysis  
7 in the safety chapter of the FPP reports. We will also  
8 raise this issue with the bus operators in the coming  
9 months.

10 Thank you, Chairman.

11 CHAIRMAN: Do you expect to be able to decide this by the  
12 end of the year?

13 MS MABLE CHAN: I may not be able to commit at this point in  
14 time, but we will try our best.

15 Thank you, Chairman.

16 CHAIRMAN: Yes, Mr Chan.

17 MR DEREK CHAN: Ms Chan, as you will note from the evidence  
18 that I have just read out, there's a reference to the  
19 data being available in London being without peer.  
20 Prof Stanley said the view generally on the Greater  
21 London Authority and Transport for London is that they  
22 are almost without peer in terms of availability of data  
23 and information.

24 The London approach is something that I will come  
25 back to in a moment, and in terms of how we can learn

26

1 from that, and whether their approach is commendable  
2 here, but before I do so, perhaps I can deal with one  
3 more issue arising from the "Bus safety" chapter that  
4 arose during the evidence before lunch, and that is the  
5 issue about the cause of accidents in the "Bus safety"  
6 section of the reports, a particular example being  
7 raised is the issue of people losing their balance and  
8 what causes people to lose their balance.

9 Mr Chairman, this is actually covered, at least from  
10 what I can find, in two of the years of the "Bus safety"  
11 section, so perhaps I can take them in turn.

12 The first in time is the "Bus safety" chapter in  
13 KMB's forward planning programme for 2017 to 2021. That  
14 can be found at KMB-12, page 5320.

15 Ms Chan, I hope you have before you, at page 5320,  
16 the five-year plan for KMB, 2017 to 2021. Such a plan  
17 would be made available to the Transport Department  
18 around the middle to third quarter of 2016; is that  
19 correct?

20 MS MABLE CHAN: Correct.

21 MR DEREK CHAN: Just on the issue of loss of balance and the  
22 cause of it, as an example, can I take you to page 5324.

23 CHAIRMAN: Just pausing there -- this plan has to be  
24 forwarded to the Transport Department by 30 June, has it  
25 not?  
26

1 MS MABLE CHAN: Yes.

2 CHAIRMAN: And the Transport Department, together with the  
3 company, are to resolve whatever problems there might be  
4 by 30 September?

5 MS MABLE CHAN: Yes, you are correct.

6 MR DEREK CHAN: So if we can go to 5324, the paragraph that  
7 I'm interested in is 8.2.7, but as you can see the  
8 context of it is under -- it's contained within the  
9 section, "Accidents by nature", and it's one paragraph  
10 within a series of analysis, but this paragraph has  
11 particular relevance to the example that was being  
12 discussed in the evidence before lunch, so I will just  
13 read it out, 8.2.7:

14 "The majority of the accidents (52.4 per cent) were  
15 due to passengers losing balance while on the bus. More  
16 than half of these cases were caused by the bus braking  
17 in traffic. Accidents with injuries sustained as  
18 a result of different kinds of collisions accounted for  
19 36.5 per cent while accidents with injury to pedestrians  
20 accounting for 4.3 per cent of all the accidents."

21 So, in this context, the bus operators have tried to  
22 articulate the cause of the majority of the accidents  
23 arising from passengers losing their balance. Is this  
24 something that you were referring to or trying to refer  
25 to in the evidence before lunch?

26

1 MS MABLE CHAN: The statement I have made regarding the  
2 observation of the accidents relating to passengers  
3 losing balance, that I am referring to, and the  
4 subsequent analysis and the action to be taken is  
5 relating to passengers losing balance.

6 The thing that I would like to refer to before lunch  
7 is that as an ongoing exercise, passengers losing  
8 balance has been an ongoing issue of concern to us, and  
9 in the 2013 franchise renewal exercise, whereby there is  
10 agreement on the franchise and also the exchange of the  
11 commitment letter, that we have required the company, as  
12 a result of our discussion with them and analysis of the  
13 accidents by nature, in particular of passengers losing  
14 balance, one of the measures that we have required the  
15 bus companies to do is to install and improve the  
16 handrailing along the staircase, double railing along  
17 the staircase, as one of the issues tackling particular  
18 incidents with passengers losing balance along the  
19 staircase.

20 So this is an ongoing issue of concern to us. The  
21 2016 FPP has also highlighted the majority of the  
22 accidents relate to passengers losing balance while on  
23 the bus. So I think this is something that the bus  
24 companies and also the TD have always been concerned  
25 about, and we continue to take efforts to see what can  
26

1 be further done.

2 Thank you.

3 MR DEREK CHAN: Ms Chan, I want to follow up with you the  
4 Transport Department's monitoring of harsh braking  
5 situations, since you have mentioned that it's a cause  
6 for concern to the department.

7 CHAIRMAN: Before you do so, perhaps those who are not on  
8 their feet might assist you by finding the reference in  
9 the franchise renewal to a requirement that a handrail  
10 be fitted to the staircase.

11 MR DEREK CHAN: Yes.

12 MS MABLE CHAN: We can also refer to the --

13 CHAIRMAN: Thank you. It doesn't have to be done  
14 immediately; at some suitable time.

15 Yes, Mr Chan.

16 MR DEREK CHAN: Before I go to the harsh braking issue,  
17 Mr Chairman, I have referred to the 2017-2021 FPP.  
18 Perhaps I will just give you the reference to the same  
19 or similar paragraph in the 2018-2022 FPP.

20 CHAIRMAN: Of KMB?

21 MR DEREK CHAN: Yes, of KMB. The page reference is TD-1,  
22 page 180, that's where the report starts, and page 183  
23 is where you find a similar paragraph.

24 At paragraph 8.2.7 --

25 CHAIRMAN: It's a replica with a slightly different figure

26

1 from the previous year.

2 MR DEREK CHAN: Yes.

3 CHAIRMAN: The majority of the accidents is 51.5 here, as  
4 opposed to 52.4:

5 "... due to passengers losing balance while on the  
6 bus. More than half of these cases were caused by the  
7 bus braking in traffic."

8 That's the same observation as the year before.

9 MR DEREK CHAN: Yes.

10 CHAIRMAN: Thank you.

11 MR DEREK CHAN: Ms Chan, I see you are looking for  
12 something.

13 MS MABLE CHAN: Yes. I am actually trying to identify the  
14 reference, as an example of the enhanced safety feature  
15 of double handrailing at staircase in our letter to the  
16 KMB --

17 CHAIRMAN: Feel free to come back to that at a suitable  
18 opportunity. Don't be distracted. I'm sure somebody  
19 next to you can help you.

20 Mr Chan, in the analysis that we have seen of this  
21 kind of accident data, is there not an analysis  
22 somewhere about the liability for accidents? In other  
23 words, 100 accidents but only -- I think this is the  
24 figure -- 75 per cent caused by others, 25 per cent by  
25 our bus captains?

26

1 MR DEREK CHAN: That analysis -- yes, it's in the "Bus  
2 safety" chapter for 2019-2022, which is the one that was  
3 handed in in August 2018, where they actually split the  
4 driver contributory causes.

5 CHAIRMAN: Whilst we are dealing with this topic, could we  
6 have a look at that? What is the reference to that?

7 MS MABLE CHAN: Chairman, the paragraph 8.2.10 on page 5325  
8 refers to the statement that you recall.

9 CHAIRMAN: Thank you very much.

10 MS MABLE CHAN: "The breakdown of liability in the two-year  
11 period is shown in table 8.3 below. For 79 per cent of  
12 the cases, the bus captains were not blameworthy. The  
13 pending cases ... are those pending for police  
14 action ..."

15 CHAIRMAN: Mr Chan, the bundle reference? Is that KMB-12?

16 MR DEREK CHAN: Yes, that's the following page.

17 CHAIRMAN: Yes.

18 MR DEREK CHAN: So we are still in the 2017 FPP.

19 CHAIRMAN: Yes. It may be it's repeated elsewhere, but in  
20 this document liability is assessed at 25 per cent for  
21 bus captain.

22 MR DEREK CHAN: Yes. I think Mr Chairman will recall the  
23 evidence, in terms of the 2018 FPP, the Transport  
24 Department issued a letter in May 2018, annexing that  
25 table that we have just seen on Thursday and today,

26

1           which --

2       CHAIRMAN:   Annex E?

3       MR DEREK CHAN:   Exactly, which separates factors caused by  
4           bus captains, and factors not caused by bus captains,  
5           and the request made to KMB to further break down  
6           accidents in that sort of category, which actually led  
7           to an even more detailed analysis in the 2018 "Bus  
8           safety" section that relates to 2019-2023.  So that's  
9           where we get a lot of analysis in the next "Bus safety"  
10          chapter, even more detailed, that splits it into driver  
11          contributory factors and non-driver contributory  
12          factors.

13       CHAIRMAN:   Where is the 2019 five-year plan?

14       MR DEREK CHAN:   It's in the same bundle, KMB-12, at  
15          page 5011.  That is where it starts.

16                 For example --

17       CHAIRMAN:   Give me a moment.

18       MR DEREK CHAN:   Sorry.

19       CHAIRMAN:   Yes.

20       MR DEREK CHAN:   For example, at page 5016, we see a similar  
21          heading, "Accidents by nature", and again you see the  
22          breakdown.  But at page 5020 there is a new chart,  
23          "Accidents by cause", and it's broken into bus captains'  
24          blameworthy factors and -- the "Accidents by nature"  
25          part, there's no breakdown of bus captains blameworthy  
26

1 or not blameworthy, and then at 8.2.3, there is that  
2 breakdown of bus captain blameworthy factors which we  
3 don't find in previous FPPs.

4 CHAIRMAN: Yes. Thank you.

5 Ms Chan, can I ask you this. We are looking now at  
6 the data that the bus company KMB have been compiling.  
7 Do you know how it is that they compile this data; how  
8 do they determine liability or non-liability?

9 MS MABLE CHAN: Chairman, I'm afraid I do not have the ready  
10 answer.

11 CHAIRMAN: Has there been no correspondence when these kinds  
12 of figures were asked to be produced, "How is it that  
13 you are producing them?" Not that you're aware of?  
14 Nobody asked them?

15 MS MABLE CHAN: It is as part of the process that colleagues  
16 will discuss with them and get the analysis. I have to  
17 be careful, at this juncture, not to give you any  
18 conclusive or misleading answer.

19 CHAIRMAN: Certainly don't give us misleading answers. But  
20 somebody must know how this data is tested. Somebody at  
21 the Transport Department surely tests the data. How are  
22 you doing it?

23 MS MABLE CHAN: Based on our knowledge, because regarding  
24 accidents involving bus captains, the liability, very  
25 often the accidents will have to be determined and  
26

1           investigated through the police proceedings. Then they  
2           will identify which is relating to the drivers' fault  
3           and which accidents are not. Based on that information,  
4           bus companies will also differentiate those accidents by  
5           the specific type of causes relating to the bus  
6           captain's behaviour.

7   CHAIRMAN: If the bus captain is being prosecuted that would  
8           be a very easy way to say, "That's our liability", but  
9           I'm asking you: is that not something that you asked  
10          them, "How are you reaching these figures"?

11   MS MABLE CHAN: I do not have a ready answer because the  
12          colleagues involved in the discussion with KMB are not  
13          the persons involved on this table. If you can allow  
14          us, we can perhaps supplement with an example to  
15          illustrate how we test the data with the bus company.

16   CHAIRMAN: Mr Auyeung.

17   MEMBER AUYEUNG: Maybe the other way to ask the question is  
18          the Transport Department gives those categories to fill  
19          in? So are these classifications identified by the  
20          Transport Department?

21   MS MABLE CHAN: Chairman, based on my knowledge and the  
22          advice from our colleagues, this information is compiled  
23          by the company themselves.

24   CHAIRMAN: So the categories are their categories, not  
25          yours?

1 MS MABLE CHAN: Not our category.

2 CHAIRMAN: Frankly, looking at these figures, it's very  
3 difficult to understand how it is that 25 per cent of  
4 all accidents are caused by passengers losing balance,  
5 with those figures. Has nobody troubled to ask them  
6 what this all means?

7 Anyhow, perhaps you could provide us with  
8 an explanation for what action, if any, has been taken  
9 by the Transport Department, and if possible illustrate  
10 it with correspondence, indicating the enquiries that  
11 were made and the responses that were given -- if they  
12 were made orally, then it can be dealt with by  
13 identifying the conversations, the dates, the persons --  
14 so that we can have an evidential basis for  
15 understanding this data.

16 MS MABLE CHAN: Thank you, Chairman.

17 MR DEREK CHAN: Ms Chan, can I follow up with you the  
18 concern that the Transport Department has on the issue  
19 of harsh braking.

20 At the moment, how does the Transport Department  
21 monitor harsh braking behaviour of bus captains, if at  
22 all?

23 MS MABLE CHAN: Chairman, I'm just confirming my  
24 understanding with my colleagues.

25 CHAIRMAN: Yes, of course. Please take your time.

26

1 MS MABLE CHAN: Chairman, based on our previous submissions  
2 to the committee, the Transport Department has been  
3 asking the franchised bus operators to submit  
4 information on the number of random checks and how they  
5 monitor the black box administration of the franchised  
6 buses. So our monitoring is based on the information  
7 provided by them.

8 In the past few months, we have, in the course of  
9 the working group discussion, discussed with the  
10 franchised bus operators on enhancing the black box  
11 features and functions, and based on the updated minimum  
12 requirements on the black box, we are asking the  
13 franchised bus operators to provide further information  
14 on the event logs of the black box data as captured in  
15 their regular monitoring.

16 So we will continue to monitor in particular  
17 regarding the specific misbehaviour of the bus captains,  
18 including harsh braking or braking suddenly.

19 CHAIRMAN: What is the further information on the event logs  
20 that you have asked for?

21 MS MABLE CHAN: Chairman, the event logs, as logged by the  
22 black box, will include vehicle speed, harsh  
23 acceleration, harsh deceleration. So different  
24 companies may have slightly different thresholds for the  
25 event logs and also for issuing real-time alerts to the  
26

1 bus companies. So this is the area that we are working  
2 with the bus companies on allowing the event logs to be  
3 provided to the Transport Department.

4 CHAIRMAN: The updated minimum requirements came in in  
5 August, did they not?

6 MS MABLE CHAN: Yes, there is -- yeah.

7 CHAIRMAN: So, presumably, this request for further  
8 information about event logs was made after that?

9 MS MABLE CHAN: Yes, corresponding --

10 CHAIRMAN: When was it made?

11 Was it made in correspondence?

12 MS MABLE CHAN: It is not made in correspondence, but we  
13 have met the Citybus -- I'm sorry, can I repeat again?

14 CHAIRMAN: Yes.

15 MS MABLE CHAN: Colleagues, further to the issue and update  
16 of the basic minimum requirements of the black box, have  
17 first met with Citybus company on 26 September regarding  
18 the new requirements on the event logs and the  
19 submission of the data. We haven't done that with KMB  
20 but we are in the process of doing so.

21 CHAIRMAN: And were the Transport Department representatives  
22 any of the people who are present here today?

23 MS MABLE CHAN: Yes, Amy, Amy Tse.

24 CHAIRMAN: Perhaps Ms Tse can help us as to what this new  
25 information was.

26

1 MS AMY TSE: We understand that KMB has been setting some  
2 thresholds for speed limit and harsh acceleration and  
3 harsh deceleration. So we welcome this initiative, so  
4 we discuss with Citybus, New World First Bus and NLB, to  
5 see if they could also generate this type of threshold  
6 as a way to monitor their bus drivers' driving  
7 performance.

8 Thank you.

9 CHAIRMAN: What are the thresholds that you understand that  
10 KMB have now set for speed limit, harsh acceleration,  
11 I think that's probably described as sudden  
12 acceleration, and harsh deceleration. What are the  
13 those thresholds?

14 MS AMY TSE: For KMB and Long Win, the harsh acceleration  
15 threshold is vehicle accelerates at a speed of over  
16 4 kilometres per second, and for harsh deceleration,  
17 vehicle decelerates at a speed of over 7 kilometres per  
18 second.

19 CHAIRMAN: And speed?

20 MS AMY TSE: Yes, the speed.

21 CHAIRMAN: What about the speed?

22 MS AMY TSE: For speed it's vehicle speed over 70 kilometres  
23 per hour or above. For Citybus, we understand they are  
24 also using the latest technology to define the road  
25 sections with speed limits of 50 kilometres per hour and  
26

1 with the aid of the digital maps --

2 CHAIRMAN: This is not the latest technology, is it? This  
3 is technology that's existed for years?

4 MS AMY TSE: Yes, I understand.

5 CHAIRMAN: Perhaps the way to put it is that the use that is  
6 now made of long-existing technology.

7 MS AMY TSE: Yes, it's their use of the technology.

8 And for other road sections with a speed limit of  
9 70 kilometres per hour in the black box.

10 Thank you.

11 CHAIRMAN: And what was the result of your requests of  
12 Citybus?

13 MS AMY TSE: For Citybus and New World First Bus, they  
14 replied that they are willing to study, but they have  
15 a concern of what type of threshold to set for the  
16 deceleration and the acceleration, because the accident  
17 may be a bit complex, so they need to discuss with the  
18 unions to see whether a specific threshold could be set.

19 For NLB --

20 CHAIRMAN: Just before you move on -- sorry to interrupt --  
21 but specific thresholds have been delineated by KMB.  
22 Are you suggesting that they were concerned about the  
23 thresholds that KMB had set?

24 MS AMY TSE: Yes, we share KMB's threshold setting  
25 information with Citybus and New World First Bus, and  
26

1           they are willing to study it.

2       CHAIRMAN: I understand that. You said they were concerned  
3           about the thresholds that had been set, so are you  
4           saying they were questioning the thresholds that KMB had  
5           imposed?

6       MS AMY TSE: They need to study it before they make  
7           a decision.

8       CHAIRMAN: That was because they were concerned about the  
9           level of the thresholds; do I understand you?

10      MS AMY TSE: Yes.

11      MS MABLE CHAN: Chairman, can I add a word on that?

12      CHAIRMAN: Of course.

13      MS MABLE CHAN: In my recent exchange with Citybus, I wish  
14           to add to what Ms Tse has added, by expressing that they  
15           need to study and see if that threshold can be  
16           implemented in the Citybus case, the Citybus management  
17           is considering how it could be operated and then to  
18           consider the follow-up actions, if any, by  
19           non-compliance by the bus captains. So they are  
20           considering the operational issues regarding the  
21           applicability of the threshold.

22      CHAIRMAN: Yes, Mr Chan.

23      MR DEREK CHAN: You mentioned that KMB already has  
24           a threshold system in place, and I think Ms Tse  
25           mentioned -- I'll just focus on harsh braking because  
26

1           it's easier if I focus on an example.

2           Does the Transport Department know whether the  
3           monitoring done by KMB of harsh braking allows them to  
4           focus on harsh braking on an incident-by-incident basis,  
5           or what does the Transport Department know about that?

6   MS MABLE CHAN: What we know is that they have set the  
7           threshold, and for monitoring, because of the black box  
8           availability, of the black box function, the black box  
9           can actually generate exceptional reports of  
10          non-compliance or exceedance of the threshold. So we  
11          know that the bus operator is using this function to  
12          help them to monitor as well.

13   CHAIRMAN: So, as you understand it, KMB can use the black  
14          box to generate exceptional reports of harsh braking?

15   MS MABLE CHAN: Yes. The same also applies to Citybus and  
16          New World. They would also use the black box function  
17          to generate exception reports.

18   MR DEREK CHAN: It's your understanding, and I'm simply  
19          asking for the Transport Department's understanding, of  
20          these exception reports, do they identify individual  
21          instances of harsh braking?

22   MS MABLE CHAN: I cannot speak on behalf of the franchised  
23          bus operators but the black box function and technology  
24          and the generation of the exception reports will help  
25          them to monitor to a great extent how the bus captains

26

1       apply braking, either acceleration or deceleration. So  
2       I think they will have to take that into account in  
3       an actual operational context, to see if the exception  
4       report with the threshold can actually help them to  
5       monitor in a very effective way.

6       MR DEREK CHAN: So am I understanding you correctly that  
7       insofar as this aspect, in terms of what generates  
8       an exception report, the Transport Department leaves it  
9       to the judgment of the franchise operator; would that be  
10      a fair way of doing it?

11      MS MABLE CHAN: At the present moment, I think the process  
12      is ongoing, but we would certainly be very interested  
13      and we consider that it is also necessary and effective  
14      to know the threshold and how they generate the  
15      exception report, so that it can help us to focus on  
16      investigating the causes of the accidents, leading to  
17      passengers losing balance, because this is an ongoing  
18      issue of concern, and the hard braking has been  
19      identified as one of the key factors contributing. So  
20      with the black box function and the generation of the  
21      exception reports, we would very much like to pursue and  
22      look into this further in our working group.

23      MR DEREK CHAN: If I may then move away from the issue of  
24      harsh braking and back into the more general topic of  
25      bus accident data.

26

1           We know from the evidence that the Transport  
2           Department shares a database with the police, that is  
3           the case management information system, and the  
4           Transport Department would obtain data and do its own  
5           analysis from that database. So that's one part of the  
6           information that's available to the Transport  
7           Department.

8           What I want to focus on is the other part of the  
9           information, which is the accident data from the  
10          franchised bus operators.

11          We know from the "Bus safety" section of the FPPs,  
12          the bus operators make available its own data along with  
13          its own analysis to the Transport Department once  
14          a year. So, leaving that aside, and excluding major  
15          incidents where the Transport Department would obviously  
16          require the bus companies to submit an investigation  
17          report as we have seen in the Tai Po accident, would  
18          there be any other systematic and regular reporting of  
19          bus accident data by the bus operators?

20   MS MABLE CHAN: I am checking some of my notes.

21   MR DEREK CHAN: Yes. So leaving aside the "Bus safety"  
22          chapter and leaving aside major incidents.

23   MS MABLE CHAN: I would invite Ms Tse to reply on that.

24   CHAIRMAN: Yes, Mr Tse.

25   MS AMY TSE: So each month we obtain the information from  
26

1 the police, and we will analyse the data from the  
2 police, and if we find that the accident rate has been  
3 increasing or some abnormal situation, we will write to  
4 or we will discuss with the operators and find out the  
5 situation or any rectification or any things that have  
6 to be done.

7 Thank you.

8 MR DEREK CHAN: Can I perhaps illustrate what I'm asking  
9 with a very simple example. Say an incident involving  
10 an old lady losing her balance in the bus, she injures  
11 herself slightly, I imagine not reported to the police,  
12 but the bus operator was aware of the incident and keeps  
13 its own records.

14 Would the Transport Department know about this  
15 incident, or would it simply form part of the accident  
16 data submitted under the "Bus safety" section?

17 MR PATRICK WONG: Mr Chairman, may I take this question? As  
18 explained by Ms Tse, what we did was for the incidents,  
19 we rely on the police cases which have been  
20 investigated. For those mentioned by the SC, at the  
21 moment we do not receive that sort of information,  
22 because it happens basically every day. So the answer  
23 is "no".

24 MR DEREK CHAN: I'm going to go on to the London approach on  
25 something like this in a moment, but before I do that,  
26

1 can I establish one more fact about what the Transport  
2 Department does with the two sets of data.

3 When you have the bus safety data from the bus  
4 operators annually under the "Bus safety" chapter, does  
5 the Transport Department do any crossmatching between  
6 the two data sets that it receives, one from the police  
7 and one from the bus operators? Does the Transport  
8 Department do any crossmatching exercise?

9 MS MABLE CHAN: Based on my knowledge, with the involvement  
10 of Mr Tony Yau's road safety division and also the Bus  
11 and Railway Branch, I can confirm that in our  
12 preparation for the forward-planning exercise, we did  
13 look at the data submitted by the company and also we  
14 looked into the police data. We may not compare it one  
15 by one, but we will look at it on a trendal analysis,  
16 and if there is any obvious discrepancy then it is  
17 certainly the areas that we will question and ask for  
18 further analysis.

19 I can also mention that because the government has  
20 also representative on the management boards of the bus  
21 operators, on the board discussion they will also at  
22 times submit some information on the accident data. We  
23 will also look at that, and in preparation of our  
24 discussion at the management boards, our colleagues will  
25 also look at those regular accident data and then we  
26

1 will also compare with the database that we have access  
2 to. Should there be any discrepancy or differences, we  
3 will also point it out in the management board.

4 Thank you.

5 CHAIRMAN: So you don't specifically cross-check?

6 MS MABLE CHAN: We don't specifically cross-check but we  
7 will also look into and see whether there is any area of  
8 discrepancy and difference.

9 CHAIRMAN: Can you help me, at least, as to what it is that  
10 you mean by your colleagues on the management boards  
11 giving you accident data, if that's what you were  
12 saying?

13 MS MABLE CHAN: I am one of the directors on the management  
14 board. In preparation for the management board  
15 discussion, in looking at the accident data or the  
16 safety report submitted by the company to the board,  
17 colleagues will also have access to the data provided by  
18 the company and then we will compare it with the  
19 database that we have, and should there be any case that  
20 differs, then we will make that remark and point it out  
21 at the management board and ask them that they would  
22 have to make sure that their data should align with the  
23 police data available.

24 Thank you.

25 CHAIRMAN: I'm trying to understand: what role do these  
26

1 government directors on the management of the companies'  
2 boards perform? Are you suggesting that they are  
3 a channel, separate channel, for information to the  
4 Transport Department?

5 MS MABLE CHAN: I would not say that it is a separate  
6 channel to the Transport Department.

7 CHAIRMAN: Well, what are you saying?

8 MS MABLE CHAN: I just would like to mention some forum at  
9 which there may be also availability of this accident  
10 data, and a government director being present on the  
11 management board would also have the opportunity to make  
12 our comments and observations on the information  
13 provided by the company.

14 CHAIRMAN: Thank you.

15 MR DEREK CHAN: If I may, Ms Chan, then take you to the  
16 London approach. I am going to take you to a few  
17 documents so that we have a more complete picture on the  
18 evidence that we have on how Transport for London  
19 approaches the issue of data transparency.

20 Can I start first by going to Mr Weston's report at  
21 page 141 of the expert bundle.

22 Mr Chairman, internal pagination page 27 of  
23 Mr Weston's report.

24 CHAIRMAN: Thank you. Yes.

25 MR DEREK CHAN: The expert bundle, page 141.

26

1 Ms Chan, maybe I can just read bits of this out and  
2 then ask you to comment on some of them. I will be  
3 pausing and asking you to comment on individual  
4 paragraphs.

5 Firstly, under paragraph 6.2, Mr Weston says this:

6 "As part of bus operators' contractual requirements,  
7 they are required to submit comprehensive data relating  
8 to incident and accidents which have occurred across the  
9 network. This data is submitted through IRIS (incident  
10 reporting information system) although in the case of  
11 serious [accidents] these will be reported and monitored  
12 in real time through TfL's central control room who will  
13 work with other agencies to manage the [immediate]  
14 response to the incident.

15 TfL also publish STATS19 data which is the national  
16 data set of road traffic collisions involving death or  
17 personal injury. This data is compiled by the police  
18 and is published on a quarterly basis."

19 Pausing here, Transport for London appears to be  
20 working on a similar concept as the Transport Department  
21 here, in the sense that they have two data sets, one  
22 from the bus operators and one from the police, and it  
23 would be the data set from the bus operators which I am  
24 most interested in, in comparing what, if anything,  
25 Hong Kong can do to improve on this front.

26

1           If I can drop down to the second paragraph from the  
2           bottom of the same page:

3           "Every quarter TfL publish Excel spreadsheets  
4           listing all reported incidents which occurred across the  
5           network and include the following information for each  
6           incident -- route, date, operator, location in terms of  
7           London borough, injury result (treated at scene, taken  
8           to hospital), details of the injured party whether  
9           passenger, third party, their gender and, if known,  
10          their age.

11          TfL also publish, on a quarterly basis a bus safety  
12          dashboard which provides a narrative of the published  
13          data and trend analysis with previous quarters."

14          Over the page:

15          "This openness, and the associated increased  
16          scrutiny from stakeholders, encourages accountability  
17          from both TfL and its contracted bus operators for  
18          safety performance and encourages continuous  
19          improvement."

20          Just pausing here and going back to the issue of the  
21          Excel spreadsheet listing all reported incidents which  
22          occur across the bus network -- do you have any  
23          observations as to the utility of publishing data down  
24          to this level of detail?

25          CHAIRMAN: Before you ask that question, this is an appendix  
26

1 to Mr Weston's report, is it not?

2 MR DEREK CHAN: It is a web link.

3 CHAIRMAN: Yes, but it's -- I'm asking you this question,  
4 really. I have a file that has printed out the data you  
5 are describing. Is that material in our bundle?

6 MR DEREK CHAN: I see that the secretariat has pulled up the  
7 table on the screen. My understanding is we have  
8 separately downloaded the data from the internet, but  
9 not having incorporated it into the bundles in paginated  
10 form.

11 CHAIRMAN: So you can illustrate it from what's on the  
12 screen?

13 MR DEREK CHAN: Yes.

14 CHAIRMAN: It says "Q1, 2018".

15 MR DEREK CHAN: Yes. Perhaps I can just describe for the  
16 record what's being shown on the screen.

17 CHAIRMAN: Yes.

18 MR DEREK CHAN: It is one data set that has been downloaded  
19 from Transport for London's website, and in the page on  
20 the screen that you can see, it is in relation to the  
21 accidents that occurred in January 2018, and on the  
22 spreadsheet we can see each incident, the route, the  
23 operator, the borough, the injury result description,  
24 victim's sex, adult/child, victim casualty category,  
25 et cetera, et cetera.

26

1 CHAIRMAN: Is there any information that goes off to the  
2 right-hand side, as I am looking at it? Yes, so there  
3 is.

4 So let's categorise, as we are looking at it -- are  
5 you able to see this?

6 MS MABLE CHAN: Yes.

7 CHAIRMAN: What we call "loss of balance", they call "slip,  
8 trip and fall".

9 MS MABLE CHAN: Yes.

10 CHAIRMAN: And we can see the frequency with which they have  
11 that problem as well.

12 MR DEREK CHAN: Ms Chan, my question was: do you see any  
13 utility in the context of Hong Kong for setting up  
14 a kind of reporting system and making public information  
15 to this level of detail?

16 MS MABLE CHAN: Perhaps I may make a few preliminary  
17 observations. The information set out on the screen, on  
18 the details of the incidents, as mentioned in Transport  
19 for London's evidence, is down to the very detail of the  
20 individual incident. I think, in the Hong Kong context,  
21 we are not yet in that position, to track down to every  
22 incident to that level of detail. At the present  
23 moment, we will have an established system to keep track  
24 of fatal accidents regarding the route involved, the  
25 operator, the victim involved and the driver involved.

26

1 I personally think that while we will advocate open  
2 data and transparency, so as to enhance the  
3 accountability of both the regulatory authority and the  
4 transport operators, the publication or disclosure on  
5 every incident with that detail may not -- while it may  
6 help to enhance transparency and accountability, it may  
7 also go far beyond the level of detail that the public,  
8 members of the public, may be interested to know.

9 I wish to point out also --

10 CHAIRMAN: But isn't that a matter for the public? If they  
11 are not interested in it they wouldn't bother reading  
12 it, but they can't read it if it's not available.

13 MS MABLE CHAN: And also, very often, the incident, once  
14 happened, there could be a lot of subsequent  
15 developments, regarding the situations of the passengers  
16 involved and the pedestrians involved. So I think, once  
17 we have to consider disclosure on an incident basis, the  
18 timely updating and ensuring the factual accuracy of the  
19 information in this format will also have to be  
20 considered, because we have to make sure that the public  
21 that has access to this kind of information can have  
22 correct knowledge of what happened in those particular  
23 incidents.

24 CHAIRMAN: No doubt that's what they do in London. Are you  
25 suggesting we're not capable of doing this in Hong Kong?

1 MS MABLE CHAN: No. That's why the third point I would like  
2 to make, as I mentioned the day before, we are also  
3 hoping to learn more from Transport for London and the  
4 Road Safety and Standards Division colleagues have  
5 arranged a visit to Transport for London in February  
6 2019. This is one of the areas that we would like to  
7 learn more about the preparation, the issues and also  
8 the resources that are required and how they discuss and  
9 liaise with the various bus operators, and also to have  
10 to verify the data with the police department, so as to  
11 see how this kind of information in this format will  
12 actually help to enhance transport data accountability  
13 and transparency while not causing any complications in  
14 the disclosure process.

15 CHAIRMAN: What are the complications when looking at this  
16 bland information: the date of an accident, the route of  
17 the bus, the bus operator, the garage from which it  
18 came, the place at which it happened, the nature of the  
19 injury, male/female, adult/child, type of injury, and  
20 whether or not it's a passenger or presumably somebody  
21 else, a driver?

22 MS MABLE CHAN: Yes. Mr Chairman, I think the information  
23 here, tabulated in this form, will serve to provide  
24 members of the public a simple and factual account of  
25 the incident.

1           The point I would like to add is when we consider  
2           whether or not we would disclose or provide the  
3           information in this format, we will also have to  
4           consider how this information will have to be further  
5           updated or elaborated, once it is promulgated.

6   CHAIRMAN:   What update do you need to make from this?

7           A female is not going to become male.   Adult is not  
8           going to become a child.   The accident is not going to  
9           happen in another place.   What's the update?

10   MS MABLE CHAN:   Chairman, because in particular I notice  
11           that there is a column showing the injury description.

12   CHAIRMAN:   Yes.

13   MS MABLE CHAN:   My point is while this table will present  
14           a factual account of the injury description at the  
15           juncture or immediately, we, from the administration's  
16           point of view, also need to consider whether or not  
17           there would need to be further updates on the injury  
18           description and whether there is any development on  
19           that, because I think once the public get this  
20           information, there may be also further follow-up  
21           questions from the members of the public on what  
22           follow-up action has been done and are there any further  
23           developments.

24           So this is something that we would need to discuss  
25           further with Transport for London, on how to feed back

26

1 to this kind of information disclosure, if there is.

2 CHAIRMAN: Thank you. May I ask that we have a paper copy  
3 of this page, so that we can follow for our records what  
4 it is we've been looking at, and could that be  
5 distributed to everybody.

6 Yes, Mr Chan.

7 MR DEREK CHAN: Ms Chan, you mentioned a moment ago  
8 Hong Kong, we, are not in a position to look at this on  
9 an incident-by-incident basis. But that's because the  
10 operators at the moment are not required to report on an  
11 incident-by-incident basis; is that correct?

12 MS MABLE CHAN: Yes.

13 MR DEREK CHAN: If we look at London's reporting  
14 obligations -- and perhaps I can ask you the  
15 practicalities of setting up that sort of system or the  
16 utility as well, and for that can I please take you to  
17 bundle MISC-3, page 1189, which is a publication from  
18 Transport for London, titled, "Update on bus safety  
19 programme".

20 Ms Chan, the passage that I'm going to take you  
21 to --

22 CHAIRMAN: Just a moment while I take a note.

23 Thank you.

24 MR DEREK CHAN: I wish to take you to page 1191.

25 CHAIRMAN: This is the November 2017 response of Transport  
26

1 for London; am I right?

2 MR DEREK CHAN: Yes, Mr Chairman. And within the report  
3 there is a description of what the system currently is  
4 and what they hope can be done to improve the system.  
5 So I will be asking Ms Chan on both those aspects.

6 Ms Chan, at page 1191, the heading is "Bus collision  
7 data analysis". I'm not going to read out the  
8 "Introduction" paragraph. I want to focus on the  
9 paragraphs under the heading "Progress", because the  
10 publication starts off that part on a description of  
11 what their current system is, and I first want to ask  
12 you questions about that.

13 If I can just read it out first:

14 "We currently have two main data sets for bus  
15 collision data: IRIS and STATS19."

16 Again, we have established from Mr Weston's report  
17 that STATS19 is a reference to the police data.

18 I will continue reading:

19 "IRIS is used by bus operators under contract with  
20 TfL for reporting incidents relating to their  
21 operational activities. This includes collisions, but  
22 also slips, trips and fall and other safety incidents  
23 such as assault. Operators are required to report  
24 serious incidents within 48 hours, and all incidents  
25 within seven days. The system serves as the complete  
26

1           and reliable single source of information on all  
2           incidents involving or affecting London's buses."

3           Now, just pausing here, comparing that to Hong Kong,  
4           we also have access to the police data, so in that sense  
5           it looks at least the same, but would you agree that the  
6           Transport Department in Hong Kong is disadvantaged in  
7           the sense that it does not have a similar data set on  
8           every incident from the bus operators?

9       MS MABLE CHAN: Yes, I would agree that under the current  
10           franchise regime, there is no such requirement on the  
11           specific report of specific incidents to the Transport  
12           Department.

13       MR DEREK CHAN: Yes. For the future, do you think it would  
14           be useful to require the franchised bus operators to  
15           have a similar reporting obligation? Because it seems  
16           to me, from a practical perspective, all it requires is  
17           the setting up of a computer system.

18       MS MABLE CHAN: I think this is certainly an area that is  
19           worth pursuing, and also, with the automatic data  
20           transmission, I think there can be ways to make this  
21           data compilation and transmission more efficient and  
22           more effective.

23       MR DEREK CHAN: And instead of receiving different data sets  
24           from different bus operators, you can have one common  
25           system that all franchised bus operators use to report  
26

1 incidents; would that be helpful?

2 MS MABLE CHAN: I think it would always be helpful and wise  
3 to have a common set of template for data report and for  
4 data compilation, so that it can equip relevant parties  
5 to do data analysis and further investigation and for  
6 recommendation of any further follow-up actions.

7 CHAIRMAN: Mr Chan, before you move on, reference is made at  
8 this London update on bus safety programme to this being  
9 a requirement under the contract that the bus operators  
10 in London have with TfL.

11 MR DEREK CHAN: Yes.

12 CHAIRMAN: Are you aware of where that provision is in the  
13 contract?

14 MR DEREK CHAN: No. I have tried to make some effort to  
15 look for that, and at the moment this is the only  
16 paragraph I can find where the reporting obligation is  
17 set out in some detail. I can perhaps attempt to look  
18 for it after the hearing.

19 CHAIRMAN: No doubt that's a matter we could raise with  
20 Mr Weston.

21 MR DEREK CHAN: Yes.

22 CHAIRMAN: Because it's presumably a simple contractual  
23 provision that requires bus operators to report  
24 incidents, including collisions, slips, trips, falls and  
25 other safety instances.

26

1 MR DEREK CHAN: Yes.

2 CHAIRMAN: So it would be useful to know what it is, how  
3 they couch it.

4 If I could ask you, Ms Chan: this would be very  
5 simple, to say to the franchised bus operators, "This is  
6 what we want you to report. You can design your own  
7 template. We want the date, we want the place, we want  
8 to know adult/child, female" -- because age is clearly  
9 relevant to trips, slips and falls, as they call it, and  
10 London reports, as we do, that it's older people who  
11 suffer more, sometimes even sadly fatally, from those  
12 kinds of accidents. But this would be very easy to  
13 request of the bus operators, would it not?

14 MS MABLE CHAN: I think it is something that we can actively  
15 pursue, Chairman.

16 MR DEREK CHAN: The other advantage which I am getting on  
17 to, when I read on in this publication, is if you have  
18 an event incident-by-incident report from the operators,  
19 if the matter was reported to the police, you would also  
20 have the same data from the police database, which would  
21 allow you to conduct a matching exercise to see the  
22 quality of the information recording process that the  
23 franchised bus operators adopt. Would you agree with  
24 that suggestion?

25 MS MABLE CHAN: That will help in data matching and in  
26

1 identifying of any discrepancy or exceptions. I think  
2 it boils down to the question of how to set the template  
3 and to identify major headings for the data template,  
4 and then we can get the various bus operators to come up  
5 with a similar set of categorisation and also incidents  
6 reporting.

7 So this is something that I think we can take the  
8 matter further and discuss with the bus operators.

9 CHAIRMAN: Presumably, the bus companies themselves require  
10 their bus captains to make reports of this nature?

11 MS MABLE CHAN: Yes, Chairman.

12 CHAIRMAN: Are you aware of the nature of the information  
13 the bus companies require?

14 MS MABLE CHAN: Because, as we have asked them to provide  
15 the data and the analysis by causes of incidents in the  
16 "Safety" chapter, it's actually collated based on their  
17 raw data and the accounts of the incidents. So we  
18 consider that it is not difficult for the bus operators,  
19 for the bus company, to capture these data in a more  
20 systematic way and report it to the Transport  
21 Department.

22 CHAIRMAN: But do you know, for example, what KMB require  
23 their bus drivers to report when there is an incident,  
24 an accident? Do you know?

25 MS MABLE CHAN: I do not know to the level of detail.  
26

1           Perhaps -- Ms Tse would like to add.

2           CHAIRMAN:   Yes.

3           MS AMY TSE:   Thank you, Chairman.

4                       We understand that bus operators will require the  
5           bus captains to report any incident that happens, say  
6           within the bus, if there is injury, then they should  
7           report to the police.

8           CHAIRMAN:   So, if there's an injury, the bus captain should  
9           report it to the police?

10          MS AMY TSE:   Yes, Chairman.

11          CHAIRMAN:   So the police reports ought to match 100 per cent  
12          to the bus captain's, if the systems work?

13          MS AMY TSE:   Yes, Chairman.

14          CHAIRMAN:   Is this reflected in writing?  Is it part of  
15          a handbook, for example?  I think the bus companies have  
16          got quite useful bus captain handbooks.  Have you seen  
17          this requirement?  If you haven't, say so.

18          MS AMY TSE:   We don't have the information in hand.  We may  
19          have to check with the bus operators, whether they have  
20          put it in the handbook.

21          CHAIRMAN:   We've got bus captain handbooks in our bundles,  
22          do we not?

23                       Mr Chan, perhaps someone can look for that and we  
24          might be able to turn it up now; well, in due course.

25          MR DEREK CHAN:  Yes.  Perhaps I can round up this issue or

26

1           this topic by looking at what remains for London to do.

2           Ms Chan, are you still on page 1191 of the MISC-3  
3           bundle that we were just looking at?

4       MS MABLE CHAN: Yes.

5       MR DEREK CHAN: I had read out the first paragraph under  
6           "Progress", which describes what the system in London  
7           presently is.

8           The next paragraph under that -- I won't read it  
9           out -- describes the police data, so it refers to  
10          STATS19 being the old police system, and also refers to  
11          COPA which is an updated police system so I'm not going  
12          to refer to that.

13          Over the page, at 1192, under the heading "Future  
14          works", this is what Transport for London is aiming for:

15          "Work is being done to improve the compatibility of  
16          IRIS, STATS19 and COPA. A complex matching exercise is  
17          continuing to ensure better consistency and reliability  
18          of each data set. We are also developing a software  
19          system to improve the efficiency and accuracy of  
20          collecting IRIS data by enabling it to be automatically  
21          updated from bus operators' own various databases."

22          My question is this, Ms Chan: in terms of looking  
23          into the future, should this type of synergy between  
24          different data sets be something that Hong Kong should  
25          be aiming for in terms of its bus accidents, data

26

1 collection and reporting process?

2 MS MABLE CHAN: Certainly, I think this will be an area that  
3 we would hope we can achieve, especially with the  
4 improved consistency and reliability of different data  
5 sets.

6 At the present moment, the various bus operators,  
7 they keep track of the data, while we have asked them to  
8 try to categorise the accident data in terms of the  
9 nature and the contributory factors, the description may  
10 not be exactly the same as what the police department  
11 has done.

12 I think a common and consistent data set with more  
13 frequent updates, say in an automatic way, I think will  
14 certainly help the relevant parties to have better  
15 articulation and also diagnosis of the issues of concern  
16 and then the corresponding follow-up actions.

17 Also, I would like to add that the expert  
18 evidence/submission in this regard actually demonstrates  
19 the complexity involved in accidents, in the  
20 contributory factors to the accidents, very often the  
21 accidents can be contributed by various factors, and the  
22 diagnosis of the accidents very often would have to come  
23 after thorough investigation by the police and also  
24 judicial proceedings.

25 But, in any event, it will not stop us from trying  
26

1 to get the first-hand information and categorisation of  
2 the incident data from the various bus companies.

3 MR DEREK CHAN: Mr Chairman, that completes the topics that  
4 I have to cover, but before I sit down can I come back  
5 to you on this operations handbook, staff handbook,  
6 because those assisting me have very helpfully given me  
7 the reference already, and I think I can provide  
8 an answer to the committee.

9 CHAIRMAN: Yes.

10 MR DEREK CHAN: Can I refer the committee to bundle KMB-8A,  
11 page 3086. It's showing up on the screen at the moment.

12 CHAIRMAN: Yes.

13 MR DEREK CHAN: What is being shown on the screen is the  
14 first page of the document from Kowloon Motor Bus,  
15 headed, "Outdoor operations staff handbook", and the  
16 bottom of the page states that the last update is  
17 January 2018.

18 The relevant part dealing with the procedures when  
19 encountering a traffic accident can be found at  
20 page 3123 of the bundle.

21 Volume 8A, Mr Chairman.

22 CHAIRMAN: Yes.

23 MR DEREK CHAN: Page 3123.

24 Under part nine, the handbook says this:

25 "If a staff member is involved in a traffic accident  
26

1 while driving company vehicle, he/she should fill in and  
2 submit the 'traffic Accident Report' with letter of  
3 authorisation within 72 hours of the accident  
4 (hospitalised staff should submit the report as soon as  
5 possible after discharged from hospital). Please pay  
6 attention to the followings", and there's some detail  
7 about the description of the report.

8 After the items 1, 2, 3 and 4, it says:

9 "The completed 'Traffic accident report' should be  
10 submitted to the designated duty dispatch sections of  
11 respective depot and countersigned by staff members who  
12 collect the report. Any staff members who fail to  
13 submit the report on time will have to bear the  
14 consequences and will be disqualified from receiving the  
15 'bus captain good services bonus'. Moreover, the  
16 company also considers taking disciplinary action  
17 against the staff member for non-compliance."

18 Mr Chairman, I won't read on, but I think the point  
19 to take from this is there is no express obligation or  
20 direction to the staff to report the matter to the  
21 police, although there is a reference to providing  
22 a statement made to the police to the legal department,  
23 at the third bullet point from the bottom.

24 CHAIRMAN: Does this handbook contain the traffic accident  
25 report?

1 MR DEREK CHAN: Not in the version that we have in the  
2 bundle.

3 CHAIRMAN: In that case, may I ask that we make a request of  
4 KMB to provide us with whatever this document is so that  
5 we can see the detail that is required in this report.  
6 That would help the Transport Department know what  
7 information should be available in KMB.

8 MR DEREK CHAN: Yes. Mr Chairman, on that note, if I may  
9 hand over the questioning to Ms Wong.

10 CHAIRMAN: Not just yet, Mr Chan.

11 I'd like you to pursue, if you would, the issue of  
12 harsh braking and the information that we've received  
13 from KMB as to what they do with these reports, and then  
14 to take us to one of their so-called four-minute  
15 accumulated total, so we can see how they gather the  
16 data.

17 MR DEREK CHAN: Yes.

18 For that purpose, Ms Chan, I think it would be  
19 useful for you to have two documents together. Can  
20 I first ask you to have before you KMB-12, page 4848.  
21 Also, can I ask for the secretariat's assistance in  
22 providing the page reference for a recent submission  
23 from KMB dated 3 October 2018, which I have in  
24 an unpaginated form.

25 CHAIRMAN: Then you have the same version as I have. We can  
26

1 work from that.

2 MR DEREK CHAN: Yes. I'm trying to give a reference so that

3 Ms Chan can also have a copy of that before her.

4 CHAIRMAN: Yes.

5 MR DEREK CHAN: KMB-1, page 571.

6 Again, just to clarify, what I wish to have before  
7 you, Ms Chan, is firstly KMB-12, page 4848, which is  
8 a harsh braking exception report provided to us by KMB;  
9 and also KMB-1, page 571, which is a submission from KMB  
10 which describes how that harsh braking exception report  
11 had been generated. So that's why I want these two  
12 documents side by side.

13 Page 4848 is a Chinese version of the harsh braking  
14 report.

15 Mr Chairman, the English translation is at  
16 page 4851. Perhaps I can use the translated version for  
17 convenience.

18 Just reading the table for the moment, Ms Chan, you  
19 see that the table heading, "BC performance from  
20 6 February to 12 Feb", so about a week, and the harsh  
21 braking -- in the heading -- is said to have accumulated  
22 more than four minutes.

23 If you look at the fourth column from the left, the  
24 "harsh brake accumulated" is described as "deceleration  
25 more than 8 kilometres per hour". So this is what the  
26

1 table looks like.

2 With that table in mind, can I ask you to look at  
3 KMB's description of how this harsh braking report is  
4 generated.

5 For that, can I ask you to look at the submission  
6 from KMB at paragraph 3(B), firstly, page 572.

7 CHAIRMAN: Before you do that, the document that we've been  
8 looking at on page 4848, is this a document that's come  
9 to us from Kowloon Motor Bus?

10 MR DEREK CHAN: Yes, that's correct.

11 CHAIRMAN: And it comes from their records?

12 MR DEREK CHAN: Yes.

13 CHAIRMAN: It's not a document that is sent to the Transport  
14 Department?

15 MR DEREK CHAN: Not as far as I understand, because this is  
16 the exception report that KMB generates for themselves.

17 CHAIRMAN: Let's ask: the document at 4848, is that sent to  
18 the Transport Department, that kind of document, or not?

19 MS MABLE CHAN: No.

20 CHAIRMAN: Thank you. So this is a KMB internal record.

21 MR DEREK CHAN: Under paragraph 3(B), page 572, KMB sets  
22 out, The criteria for generating weekly bus captain  
23 performance reports are as follows". So the first bit  
24 deals with speeding; the second bit deals with sudden  
25 acceleration; the third bit, over the page, deals with

26

1       harsh braking. If I can just read that out, under the  
2       heading "Harsh braking":

3               "BC's name will be shown in the BC performance  
4       reports when the accumulated duration of harsh braking  
5       (that is for any particular second, the decrease in  
6       speed compared with the speed of the preceding second  
7       exceeds 7 kilometres per hour) ..."

8               And if you look at footnote 3 at the bottom:

9               "The threshold was set at 8 km/hr per second prior  
10      to 1 August 2018."

11              That's why we see the reference to 8 kilometres per  
12      hour in the table.

13              Continuing reading from the top:

14              "... recorded by the black boxes of all buses driven  
15      by that BC during a particular week is more than 4  
16      minutes."

17              At paragraph 6, KMB says this:

18              "The causes of BCs' sudden acceleration and harsh  
19      braking vary, for example, they might do so due to  
20      actual traffic conditions at such particular time.  
21      Accordingly, KMB and Long Win's approach is to monitor  
22      the bus captains' driving behaviour first instead of  
23      taking immediate investigation and follow-up actions.  
24      KMB and LWB thus do not have the practice of generating  
25      detailed incident-based reports for sudden acceleration

26

1 and harsh braking. Further, the number of entries would  
2 be numerous if such detailed reports were generated.  
3 For example, an aggregation of 60 minutes (that is 3,600  
4 seconds) of sudden acceleration by one BC would create  
5 at least 3,600 entries in the report while an aggregate  
6 of 4 minutes (that is 240 seconds) of harsh braking by  
7 one BC would create at least 240 entries. Given the  
8 massive volume of data involved, the information  
9 technology department of KMB and LWB has made their best  
10 effort in conducting manual analysis of the relevant  
11 data to generate irregular detailed reports (with the  
12 adoption of BC performance report standard) in response  
13 to the requests of IRC as explained below."

14 So, Ms Chan, just to give you some context, KMB also  
15 provided other data pursuant to this manual effort for  
16 the purposes of the committee, so I'm not going to go  
17 into that more.

18 CHAIRMAN: I'd like you to go to that, because one sees what  
19 four minutes of accumulated braking actually means.  
20 This is done over one week, 240 seconds, and as one can  
21 imagine and as you will see, you don't do harsh braking  
22 for 20 seconds in a row, because you would be stationary  
23 after several seconds. So we get a measure of how often  
24 this harsh braking is happening.

25 Mr Chan, perhaps you can go to the first of the  
26

1 pages. It's annex 1(b) (1) -- it's page 1 of 16.

2 MR DEREK CHAN: Yes. I think that's already on the screen.

3 CHAIRMAN: Thank you. Perhaps we could have this printed  
4 out for the benefit of the Transport Department. Is  
5 this in hard-copy form that would be available to them  
6 in a file that is with them?

7 MR DEREK CHAN: I certainly looked at it as a soft copy on  
8 my computer because it was quite long. I didn't cause  
9 that to be printed out.

10 CHAIRMAN: I have a hard copy here myself, so presumably  
11 hard copies have been produced.

12 There's a lot of pages on sudden acceleration and  
13 there are fewer pages on harsh braking.

14 MR DEREK CHAN: Yes. The report on harsh braking begins at  
15 page 5578 of KMB-12.

16 Ms Chan, I hope you have before you a document --  
17 there's a heading on the top left-hand corner of the  
18 page which says "Annex 1(b) (i) harsh braking report for  
19 selected BCs".

20 Ms Chan, just to give you some context, according to  
21 the KMB submissions, this is not a document that is  
22 regularly generated by KMB themselves. It's a document  
23 that they generated at the request of the committee, to  
24 look at the individual instances of harsh braking that  
25 make up a four-minute entry which then appears in their  
26

1 regular exception report.

2 Ms Chan, what you can see is that this set of  
3 records at the bottom comprises of 18 pages and you will  
4 be looking at the first page, at 5578. All these  
5 records relates to an employee number 3965, and if you  
6 look across the page you can see a number of information  
7 about the route, the time, the date, and the speed  
8 deceleration.

9 CHAIRMAN: Have we been given any explanation for some of  
10 these abbreviations, for example "ba\_value"?

11 MR DEREK CHAN: Yes. The explanation is actually at the  
12 written submission we have just been looking at, at  
13 KMB-1.

14 CHAIRMAN: So what is "ba\_value"? I think we can do it by  
15 deductive logic.

16 MR DEREK CHAN: The ba\_value, according to KMB, and this is  
17 in footnote 4 of the submission we have been looking at,  
18 the item "ba\_value" refers to brake deceleration value  
19 which is calculated by comparing the speed of  
20 a particular time with the speed of the preceding  
21 second. So that is the speed difference.

22 CHAIRMAN: So the speed at 06:05:45 was 5.8 kilometres per  
23 hour, and that had come about because the vehicle had  
24 been braked by 9.5 kilometres per hour from the previous  
25 second; is that it?

26

1 MR DEREK CHAN: Yes, that's correct, Mr Chairman.

2 Ms Chan, from 5578 to 5586, you can see the entries  
3 generated for employee 3965. Then, on that page, you  
4 can see the employee number then changes to 63287.

5 CHAIRMAN: Do we know what the accumulated total of this  
6 particular driver's harsh braking was?

7 MR DEREK CHAN: According to KMB submission, at  
8 paragraph 7(b) that we have just been looking at --  
9 I will read it out:

10 "The detailed record of harsh braking for BC with  
11 employee number 3965 (401 entries entailing 6.68 minutes  
12 of harsh braking) ..."

13 So that's for 3965.

14 "... and BC with employee number 63287 (395 entries  
15 totalling 6.58 minutes of harsh braking) ..."

16 Ms Chan, I think you can see 63287 from page 5586  
17 down to 5595, comprising, as I said, 395 entries.

18 So, Ms Chan, from the perspective of the Transport  
19 Department, do you have any observations about the  
20 practice of KMB of basically not generating an exception  
21 report for a bus captain for harsh braking until this  
22 bus captain accumulates something like hundreds of times  
23 of crossing the harsh braking threshold within any  
24 particular week? Do you have any observations about  
25 that?

26

1 CHAIRMAN: It might be you want to reflect on that, and we  
2 are going to take a break soon, and give you a chance to  
3 think about the question.

4 But perhaps next we might move to what it is that is  
5 provided to the Transport Department about harsh  
6 braking.

7 MR DEREK CHAN: Yes. I have that document. I had that  
8 document a moment ago. Give me a moment, Mr Chairman.

9 CHAIRMAN: Yes, of course.

10 MR DEREK CHAN: In terms of what is given to the Transport  
11 Department, I think Ms Tse mentioned this a moment ago.  
12 Can I take you to TD-4, page 1020. This document at the  
13 top says, "Monthly report on monitoring measures  
14 relating to bus safety", and I think this is a document  
15 that Ms Tse referred to earlier about requiring bus  
16 operators to submit a form of random checks that they  
17 take -- or checks that they do take on the black box  
18 data.

19 If I can take you down to one-third of the way up  
20 from the bottom, under the heading, "Checking black box  
21 data box data for monitoring of driving behaviours of  
22 bus captains", the second box under that heading, under  
23 the item, "No. of ad hoc checks on black box data  
24 conducted"; second column:

25 "No. of mal-practice cases found (as at end month)

26

1 Please provide breakdown of cases by nature [of]:

2 - speeding.

3 - braking suddenly.

4 - others (please specify)."

5 And for this example braking suddenly is reported as  
6 eight times, and verbal warning is 13 times. So, when  
7 the Transport Department gets a document like this, and  
8 it is reported that there is eight "braking suddenly"  
9 cases, it appears to suggest, how does the Transport  
10 Department interpret this data?

11 So does the Transport Department interpret it as  
12 eight individual instances of harsh braking, or what?

13 CHAIRMAN: Perhaps now would be the time to take the break,  
14 and you can reflect on the question whilst we have  
15 a break. Let's take 15 minutes.

16 MS MABLE CHAN: Thank you, Chairman.

17 (4.16 pm)

18 (A short adjournment)

19 (4.31 pm)

20 CHAIRMAN: Yes, Mr Chan.

21 MR DEREK CHAN: So, Ms Chan, before the break I asked you  
22 two questions.

23 Firstly, from the perspective of the Transport  
24 Department, do you have any observations as to KMB's  
25 practice of basically not generating an exception report  
26

1 on harsh braking until an individual bus captain has  
2 accumulated what is hundreds of occasions of crossing  
3 the harsh braking threshold within a particular week?  
4 That was the first question.

5 The second question was in respect of the monthly  
6 report, at TD-4, page 1020. So, when the Transport  
7 Department receives the report and sees on one of the  
8 entries, "braking suddenly", what appears to be eight  
9 cases, how does the Transport Department interpret that  
10 data?

11 Perhaps Ms Chan can deal with those in turn.

12 MS MABLE CHAN: I will address the first question and then  
13 I will invite my colleague Mr Patrick Wong to respond to  
14 the second.

15 On the first question, I think with the availability  
16 of the black box function to generate exception report,  
17 and with the focus of issue of concern on harsh braking,  
18 I think we expect the company to take a very serious  
19 approach to how to make use of this function and their  
20 data to help them to closely monitor the driving  
21 behaviour of bus captains.

22 No doubt, the data generated by the black box alone  
23 may not necessarily lead to any conclusion that the bus  
24 captain drives the bus in a negligent manner. Still, it  
25 provides some objective data for the bus company to  
26

1 investigate further. We expect that with, say, the  
2 availability of installation of CCTV, and with also the  
3 plain-clothed inspectors on board the buses, all these  
4 are helping, equipping the bus company to take into  
5 account any other relevant observations on the bus  
6 driver's behaviour. But no doubt this black box data is  
7 very essentially and first-hand information and a basis  
8 for them to identify any misbehaviour or malpractice of  
9 the bus captain.

10 I will invite Mr Patrick Wong to address on the  
11 second question, regarding the information that we ask  
12 the bus companies to provide regarding the black box  
13 data.

14 MR PATRICK WONG: Mr Chairman, basically the template shown  
15 on the screen has been --

16 MR DEREK CHAN: Which is page 1020 of TD-4.

17 MR PATRICK WONG: Yes. It's been designed by the Transport  
18 Department and shared with -- actually, we requested the  
19 franchised bus companies to provide such information  
20 since January this year.

21 For the case you mentioned about the braking  
22 suddenly, we gather that -- because on the left column,  
23 it shows 400, but we are not sure actually, for  
24 designing this template, we just ask the franchised bus  
25 companies to provide the information about the number of  
26

1 malpractice cases found. So, under the "braking  
2 suddenly", we cannot confirm whether it's actually based  
3 from the acceleration or deceleration black box data on  
4 this, but maybe we gather that the bus company would do  
5 some more investigation, maybe interview with the bus  
6 captain, before coming up whether it is established as  
7 a malpractice. That's what we understand.

8 Thank you, Chairman.

9 CHAIRMAN: I'm sorry, can you help me -- what does the  
10 figure that you pointed out -- what does 400 mean?

11 MR PATRICK WONG: Number of checks, ad hoc checks.

12 CHAIRMAN: So ad hoc as opposed to routine; is that it? The  
13 box above it, "Routine".

14 MS AMY TSE: Chairman, the ad hoc checks by bus company is  
15 normally based on the complaints, not the routine one  
16 but the extra one that they did. The routine one would  
17 be 8552 for the KMB case, as shown.

18 CHAIRMAN: But that doesn't address braking, that's only  
19 speeding, which is the point really. They check  
20 speeding, not harsh braking.

21 MS AMY TSE: For speeding, because they have a report  
22 generated from the black box, but for the ad hoc  
23 checkings, normally they act on the complaint, and  
24 because the braking, they might need to investigate  
25 based on the CCTV, before they just simply use the data  
26

1 to say that it is the negligence of the bus drivers.

2 They need more different investigation before they could  
3 classify it as a malpractice of bus captains.

4 CHAIRMAN: So what it comes down to is this: there is an  
5 exception report generated for speeding?

6 MS AMY TSE: Yes, there is report generated for speeding.

7 CHAIRMAN: But there is no exception report generated for  
8 harsh braking?

9 MS AMY TSE: To our understanding, they can set the  
10 threshold, but at the moment they may not generate the  
11 report because they need more investigation.

12 CHAIRMAN: Let's just deal with the facts. The explanation  
13 can be another matter. There is no exception report  
14 generated for harsh braking?

15 MS AMY TSE: Yes, to my understanding.

16 CHAIRMAN: The ad hoc report comes about because there had  
17 been a complaint and they go and investigate it as  
18 a result of the complaint.

19 MS AMY TSE: Yes.

20 CHAIRMAN: But the fact is the data is available, as we have  
21 seen in all these pages of data, to monitor/understand  
22 the volume of harsh braking that's occurring; correct?

23 MS AMY TSE: Yes, Chairman.

24 CHAIRMAN: Now, one of the factors that is obvious is that  
25 the threshold they are setting, which used to be for  
26

1           braking more than 8 kilometres, now reduced apparently  
2           to 7 kilometres per hour change per second, is in the  
3           range of 0.2G thereabouts, is it not? They are not  
4           monitoring this at 0.4G, are they?

5       MS MABLE CHAN: No.

6       MR WILLIAM SHUM: Yes, for the 7km/hour/second, is  
7           approximately equal to 0.2G.

8       CHAIRMAN: Yes. That is relevant to problems caused to  
9           people standing in a bus.

10           Yes, Mr Chan.

11       MR DEREK CHAN: Mr Chairman, that completes my questioning,  
12           so with your permission I will hand over the questioning  
13           to Ms Wong.

14       CHAIRMAN: Yes. Thank you very much for your help.

15       MR DEREK CHAN: Thank you, Chairman.

16       CHAIRMAN: Just give me a moment, Ms Wong, to dispose of  
17           some of these files.

18       MR DEREK CHAN: Mr Chairman, Ms Wong didn't let me sit down.

19       CHAIRMAN: I think she was probably encouraged by me.

20       MR DEREK CHAN: The reason is because Ms Wong has very  
21           helpfully dug up the traffic accident report that we had  
22           been looking at, in terms of what the bus drivers are  
23           instructed to do when they encounter an accident.

24       CHAIRMAN: Yes.

25       MR DEREK CHAN: There is actually a better reference than  
26

1 the one I took you to earlier.

2 So perhaps I can invite Mr Chairman firstly to look  
3 at bundle KMB-10A, page 4190-1.

4 Just for the purposes of the record, the Chinese of  
5 the document starts at 4161; English translation,  
6 4190-1.

7 CHAIRMAN: Yes.

8 MR DEREK CHAN: The document that you should have before you  
9 is headed, "Quality guide on how to handle bus traffic  
10 accidents", and it's a document from KMB.

11 CHAIRMAN: Yes.

12 MR DEREK CHAN: Perhaps just starting at the last point,  
13 which is the actual traffic accident report.  
14 Mr Chairman will find that at appendix II of this  
15 document which is at page 4190-31.

16 And I think at 4190-29 is the English translation of  
17 that document.

18 CHAIRMAN: Is there a legible, or more legible, version of  
19 the one at 4190-31? That looks as though it's a scanned  
20 version.

21 MR DEREK CHAN: Yes. There's not in this file. Perhaps we  
22 can liaise with KMB afterwards to get that.

23 CHAIRMAN: Yes.

24 MR DEREK CHAN: But what is interesting is if I can draw the  
25 committee's attention to 4190-38, which appears to be  
26

1 a standard form letter of consent, seeking the  
2 passenger's consent for not to file a report with the  
3 police, even though he sustained injuries.

4 So it does not appear to be a matter of course that  
5 incidents would definitely be reported to the police.

6 CHAIRMAN: Yes. Thank you for that.

7 MR DEREK CHAN: Ms Wong has very helpfully found a more  
8 legible copy of the traffic accident report, at bundle  
9 KMB-10B, page 4397.

10 CHAIRMAN: Yes. Thank you, Ms Wong.

11 So what appears to be missing from this form  
12 compared with the information that is on the Transport  
13 for London website, details of incidents resulting in a  
14 fatality or injuries, which required hospital attendance  
15 and treated on scene." What is missing is any reference  
16 to the nature of injuries, is it not? But there is  
17 a reference to a fatal, admitted, discharge --  
18 presumably that's a reference to hospitals.

19 MR DEREK CHAN: Yes, under the heading "Particulars of  
20 casualties", there appear to be boxes that can be  
21 ticked.

22 CHAIRMAN: Yes.

23 MR DEREK CHAN: "Not verified", "left scene", "discharged",  
24 "admitted", "fatal". I think what appears to be missing  
25 is a characterisation that is perhaps more useful for  
26

1           analytical purposes later on as to whether it's a  
2           "slips, trips and falls" accident, whether it's a loss  
3           of balance case, those kind of categories.

4   CHAIRMAN: Yes. Ms Chan, that would be something that, if  
5           you were to design a template and require franchised bus  
6           operators to give you this kind of information so that  
7           you had a better database, then you could design  
8           whatever it is you wanted them to tell you.

9   MS MABLE CHAN: Yes. I will, yes, because this is very  
10           important, and how we can sort of describe it and set in  
11           the template, to enable accurate data reporting, is  
12           something that we will have to look into. Yes, we will.

13           Thank you, Chairman.

14   CHAIRMAN: Thank you.

15   MR DEREK CHAN: Yes, Mr Chairman. May I once again attempt  
16           to hand over hand over the microphone to Ms Wong.

17   CHAIRMAN: Thank you very much.

18           Ms Wong.

19                   Examination by MS MAGGIE WONG

20   MS MAGGIE WONG: Thank you, Mr Chairman, and thank you,  
21           Ms Chan, and ladies and gentlemen.

22           I will be asking a few topics. The first topic is  
23           on the Working Group on Speed Limit Review, and its  
24           functions and its interrelationship with the Road Safety  
25           Audit that you mention in your new annex and how it

26

1 works in practice.

2 With that remark, may I first of all ask you -- we  
3 know from the evidence that the Transport Department's  
4 Working Group on Speed Limit Review includes  
5 representatives from the Transport Department and two  
6 NGOs, which are the Motorist Association of Hong Kong  
7 and Senior Drivers Association of Hong Kong.

8 CHAIRMAN: I think that might be a translation that is  
9 supposed to capture advanced motorists; am I right?

10 MS MAGGIE WONG: Yes.

11 And also representatives from the police. Is that  
12 correct?

13 MR TONY YAU: Yes.

14 MS MAGGIE WONG: We also heard evidence that the person who  
15 convenes the meeting is the assistant commissioner of  
16 the Transport Department; is that also correct?

17 MR TONY YAU: Correct.

18 MS MAGGIE WONG: The Transport Department also provides the  
19 secretarial side of it. May I ask first of all, the  
20 function of the working group -- would the working group  
21 consider based on objective facts and assessment of  
22 accident data in determining whether there should be  
23 suggestions for changing speed limits of certain road  
24 sections?

25 CHAIRMAN: Before you answer that question -- is this  
26

1 committee described in our papers somewhere, in our  
2 bundles?

3 MR TONY YAU: I think in our paper 10. TD-1, page --

4 MS MAGGIE WONG: 120. TD-1, pages 120 to 121.

5 MR TONY YAU: 120, yes.

6 CHAIRMAN: But is it a working group or is it a committee?

7 MR TONY YAU: It's a working group.

8 CHAIRMAN: Thank you.

9 MR TONY YAU: The main purpose of the speed limit review  
10 working group is to advise on TD's review of speed  
11 limits and advise on TD's practice on setting speed  
12 limit.

13 The members offer comments on the speed limit  
14 review, based on the major four factors. The first one  
15 is the accident history of the concerned road sections.  
16 The second one is the geometric environment of the road  
17 sections. That means the road's environment conditions.  
18 And the third one is the number of changes in speed  
19 limit, the existing speed limit and the connecting road  
20 speed limit. The fourth one is the actual vehicular  
21 speed, that means the speed measured on site.

22 CHAIRMAN: That's the 85th centile?

23 MR TONY YAU: Yes.

24 MS MAGGIE WONG: I understand that the working group also  
25 meet on a quarterly basis, and may I ask -- we have  
26

1           heard evidence that the choice of the road sections is  
2           for the Transport Department to decide; is that correct?

3       MR TONY YAU:   Yes, correct.

4       MS MAGGIE WONG:  If there is a situation where you receive  
5           complaints from the district council about certain road  
6           sections that need to review speed limit, how would that  
7           reach the Working Group on Speed Limit Review?

8       MR TONY YAU:  Usually, when there is a request from district  
9           councils, they will approach our regional district  
10          engineer, and our regional district engineer will base  
11          on those criteria of a speed limit review and see if any  
12          significant change.

13               Also, the main three points they have to consider is  
14          whether there is a change of accident and change of road  
15          environment.  If there is a public request, they will  
16          consider whether they will prepare the speed limit  
17          report and submit to the working group for discussion.

18       MS MAGGIE WONG:  You mentioned one of the things is whether  
19          there is a change of accident.  What do you mean?

20       MR TONY YAU:  As I mentioned, to consider the speed limit  
21          review, one of the criteria is the accident history.  We  
22          usually will calculate the average year -- the year  
23          accident rate.  So, if the district engineer noticed  
24          that there are significant increase of accident, they  
25          may consider to do a speed limit review.

26

1 CHAIRMAN: How is "accident" defined?

2 MR TONY YAU: It is the personal injury accident rate of the  
3 road section concerned, as compared with the figure of  
4 the whole territory.

5 That means the concerned road section's accident  
6 history compared with territory-wide, to see if the  
7 accident rate of the concerned road is particularly  
8 higher than the average one.

9 CHAIRMAN: So it doesn't get into the statistics unless  
10 there is a personal injury?

11 MR TONY YAU: Only consider the personal injury accident.

12 CHAIRMAN: Yes, so you could write the car off and get out  
13 and walk away and it doesn't go in the statistics; is  
14 that it?

15 MR TONY YAU: It's based on the record from the police.

16 CHAIRMAN: It requires an injury before it gets in the  
17 figures?

18 MR TONY YAU: Yes.

19 CHAIRMAN: Thank you.

20 MS MAGGIE WONG: You mentioned the accident rate, and that  
21 it only requires -- it only qualifies as an accident  
22 rate if there is a personal injury. What happens --  
23 maybe you quote an example -- in this scenario it is  
24 Tai Po Road -- which particular district would you  
25 compare the statistics before it reaches the working  
26

1 group?

2 MR TONY YAU: Usually, we will compare with the  
3 territory-wide average values.

4 MS MAGGIE WONG: In the Tai Po Road section, which district  
5 would that be?

6 MR TONY YAU: For Tai Po Road, we would consider -- we would  
7 select the concerned sections of Tai Po Road, and then  
8 we sum up the accidents and we calculate the accident  
9 rate for that concerned section of road, and then  
10 compare it with the territory-wide figures.

11 MS MAGGIE WONG: There's one situation --

12 CHAIRMAN: Forgive me for interrupting again -- accident  
13 rate per what?

14 MR TONY YAU: Accidents per million vehicular kilometres.

15 CHAIRMAN: Thank you.

16 MS MAGGIE WONG: You mentioned accidents per million  
17 vehicular kilometres, but it doesn't state accidents  
18 that necessitate personal injuries. So, in that sense,  
19 it is qualified by the Transport Department as accident  
20 for injuries per million vehicular kilometres; is that  
21 the position?

22 MR TONY YAU: We only count the personal injury as accident,  
23 as traffic accident.

24 MS MAGGIE WONG: Thank you.

25 CHAIRMAN: Why?

26

1 MR TONY YAU: Because we base on the police figures. We  
2 only retrieve -- we only can assess the accident, the  
3 traffic accident, involving personal injuries. I know  
4 that from police, there are quite some accidents that  
5 maybe the motorist vehicle hit some street furniture and  
6 they left, and those figures, they did not have a  
7 quite -- cannot record all that incident because the  
8 concerned motorist maybe disappeared after those  
9 accidents that do not involve any personal injury.

10 CHAIRMAN: But there clearly was an accident. It might, for  
11 example, be a bend where cars go off regularly, but it's  
12 only an accident if somebody is injured?

13 MR TONY YAU: Yes, but because required by the regulations,  
14 only accidents involving personal injury need to be  
15 reported to the police. So maybe for those that do not  
16 involve personal injury, they do not need to report to  
17 the police, so we do not have very true figures of that  
18 kind of accident.

19 CHAIRMAN: I understand what you're talking about, the  
20 requirement in law to report if there's an accident  
21 involving injury. But if the car is broken at the side  
22 of the road, the driver might have run away, but there  
23 clearly has been an accident -- tyre marks all over the  
24 road, lamppost knocked down -- and that doesn't count?

25 MR TONY YAU: It doesn't count in this exercise of speed  
26

1 limit review.

2 CHAIRMAN: Very well.

3 MS MAGGIE WONG: Now, on this accident rate, can I ask  
4 another scenario. It's if that particular section of  
5 the road has a lot of speeding, and the police issue  
6 a lot of fixed penalty tickets for speeding, and  
7 I understand that some of the accidents would be shared  
8 with the Transport Department in terms of accident data,  
9 but would that sort of fixed penalty tickets data be  
10 shared with the Transport Department?

11 MR TONY YAU: You mean that maybe --

12 MS MAGGIE WONG: Speeding.

13 MR TONY YAU: Yes, speeding, the police issue tickets for  
14 speeding and actually there are quite a number of  
15 vehicles are speeding, but it did not reflect in the  
16 accident rate.

17 MS MAGGIE WONG: Yes.

18 MR TONY YAU: That's the reason why we might consider the  
19 accident rate. If in that case that many -- or maybe  
20 most of the vehicles are speeding, but the accident rate  
21 is still low, there may be a problem of the speed limit  
22 set. So, under the current situation, they have to  
23 conduct a speed limit review. Maybe the speed limit  
24 imposed on the road is too slow, from traffic engineer's  
25 viewpoint. That's why most of the cars are speeding but

26

1 the accident rate is very low.

2 CHAIRMAN: I think part of the question was, "Do the police  
3 provide you with their data as to the fixed penalty  
4 speeding tickets issued on the section of road as  
5 a matter of course?" Do they do that?

6 MR TONY YAU: No, not for the speed limit review exercise.

7 MS MAGGIE WONG: Can you give us a ballpark figure --  
8 because you talked about the accident rate being  
9 screened by the engineer of the particular region, and  
10 compared to the particular district, can you give us  
11 a ballpark figure as to what figure it reached would it  
12 warrant the investigation or review or consideration by  
13 the Working Group on Speed Limit Review?

14 MR TONY YAU: Yes. Maybe I can give you some figures. The  
15 territory-wide accident rate, I mean it's  
16 territory-wide, not particular district accident rate,  
17 we annually issue the road traffic accident statistics.  
18 For example, the accident rate for territory-wide in  
19 2017, accident rate per million vehicle-kilometres is  
20 1.15. That means, for a particular section of road, if  
21 the district engineer finds that after the calculation,  
22 the accident rate is higher than 1.15, they will  
23 consider to conduct a speed limit review.

24 CHAIRMAN: Is this material in our bundles? What's the name  
25 of this document where this is contained?

26

1 MR TONY YAU: I would like to add, in addition to the  
2 accident rate, even there's no observation from accident  
3 rate or other factors, they would conduct a regular  
4 review of the road section, a regular review of the  
5 speed limit of the concerned road section.

6 CHAIRMAN: Where is this figure, territory-wide accident  
7 rate per million vehicular kilometres 2017 -- what  
8 document is it in?

9 MR TONY YAU: It is in the booklet the Transport Department  
10 issue every year. The name is "Road Traffic Accident  
11 Statistics". It is available on our Transport  
12 Department homepage.

13 CHAIRMAN: Ms Wong, is that in our material?

14 MS MAGGIE WONG: No. I haven't seen that. Maybe we can be  
15 provided with that.

16 CHAIRMAN: This is available on the internet?

17 MR TONY YAU: Yes.

18 CHAIRMAN: Perhaps we can see if we can locate it now. What  
19 page is it at?

20 MR TONY YAU: Page 9.

21 Yes, on this page, the 1.15 accident rate.

22 CHAIRMAN: Yes. Could we have a copy of that printed,  
23 please, and distributed.

24 MS MAGGIE WONG: According to this table, it doesn't specify  
25 the territory.

26

1 CHAIRMAN: Is that term perhaps found elsewhere in these  
2 statistics?

3 MR TONY YAU: Because this table summarises the whole  
4 Hong Kong figures.

5 CHAIRMAN: Yes, but is that spelt out somewhere else?

6 MR TONY YAU: Maybe you can refer to figure 2.13.

7 CHAIRMAN: Yes. Do we have to go to the bottom to get  
8 a total?

9 MR TONY YAU: Yes.

10 CHAIRMAN: "All roads", that's the figure?

11 MR TONY YAU: "All roads", yes.

12 CHAIRMAN: Thank you.

13 MS MAGGIE WONG: On that table, "All roads", does that mean  
14 all roads within that territory, or all roads within the  
15 selected roads mentioned there?

16 MR TONY YAU: All roads within the territory.

17 MS MAGGIE WONG: So, when you mentioned earlier in the  
18 evidence about the engineer would look at the accident  
19 rate based on territory-wide, would this table assist?

20 MR TONY YAU: Yes. Territory-wide is actually the "All  
21 roads" accident rate figure.

22 MS MAGGIE WONG: So you would look at the 0.13 figure and  
23 not the 1.15 figure; is that the position?

24 MR TONY YAU: 1.15 should be on the bottom.

25 CHAIRMAN: 1.15 is the territory-wide accident rate, but the  
26

1 Tai Po Road rate is 0.13, is it not? You look at the  
2 two figures, don't you, how the particular section of  
3 road compares with the territory-wide ...

4 MR TONY YAU: In the speed limit review report, the engineer  
5 has to select a concerned section of road, and then use  
6 that section of road, to retrieve all the accident  
7 occurred over the past one year, and then calculate the  
8 accident rate.

9 CHAIRMAN: By that, are you suggesting that the reference  
10 "Tai Po Road Sha Tin" is a broader area of the road than  
11 the section of the road that the engineer would select;  
12 is that what you mean?

13 MR TONY YAU: Yes, because the exact boundary may be  
14 different.

15 CHAIRMAN: Yes. So the Tai Po Road from beginning to end  
16 might have quite a number of different sections; is that  
17 it?

18 MR TONY YAU: Yes.

19 CHAIRMAN: And this figure is the summation of all of those  
20 different sections?

21 MR TONY YAU: Yes, I think so.

22 MS MAGGIE WONG: Yes. Now, you mentioned earlier in the  
23 evidence that even without this accident rate, the  
24 Transport Department would regularly review the limits  
25 or the road sections or the speed limit of the road  
26

1 sections. On what basis would it conduct that exercise?

2 MR TONY YAU: It mentions in our submission, the latest  
3 submissions, the paper.

4 MS MAGGIE WONG: Is that TD Paper 10?

5 MR TONY YAU: No, the submission that we submit on  
6 Wednesday, on 3 October.

7 MS MAGGIE WONG: That would be TD-5?

8 MR TONY YAU: That's the table.

9 MS MAGGIE WONG: That would be TD-5, page 1817. Is that the  
10 paper?

11 MR TONY YAU: Yes.

12 MS MAGGIE WONG: You stated there, at page 1819,  
13 paragraphs 12 and 13, that "As mentioned" -- if I could  
14 read that into record:

15 "As mentioned in TD Paper 10 ... speed limit reviews  
16 taking into consideration a number of factors, including  
17 accident rate, actual vehicular travelling speed, road  
18 geometry and environment of the road section, will be  
19 carried out regularly and discussed in the standing  
20 Working Group on Speed Limit Review."

21 Then at 13 you stated there:

22 "A review of speed limits on all roads will be  
23 carried out at regular intervals, and the frequency for  
24 such reviews will make reference to their road  
25 types ..."

26

1           And you specify that there are three road types:  
2           trunk roads, the frequency will be 36 months; primary  
3           distributor roads, 48 months; and rural roads, 60  
4           months. That would be equivalent to five years.

5           Can you explain or elaborate what is meant by "trunk  
6           roads"?

7       MR TONY YAU: Trunk road is the major, usually with higher  
8           standard, including the expressways, and usually it's  
9           linking inter-district or inter-region. That means the  
10          trunk road may be linking different districts or from  
11          regions, say Kowloon to the New Territories.

12          We also have a definition of that. This is under  
13          our transport planning design manual, we have  
14          a definition of trunk road; do you want me to --

15       MS MAGGIE WONG: Yes. Can you either read it out or give us  
16          a copy.

17       MR TONY YAU: I will read it out. The trunk roads -- there  
18          are two different types of trunk roads, the first one is  
19          rural trunk road. Rural trunk roads is:

20          "... Roads connecting the main centres of  
21          populations. High-capacity roads with no frontage  
22          access or development, pedestrian segregated, widely  
23          spaced grade-separated junctions, and 24-hour stopping  
24          restrictions."

25          For the urban trunk roads, they are:

26

1 "... roads connecting the main centres of  
2 populations. High capacity roads, with no frontage  
3 access or development, segregation of pedestrians,  
4 widely spaced grade-separated junctions, and 24-hour  
5 stopping restrictions."

6 CHAIRMAN: Yes.

7 MS MAGGIE WONG: What about the primary distributor roads?

8 MR TONY YAU: Primary distributor, under the same design  
9 manual, it means:

10 "... roads forming the major network of the urban  
11 area. Roads having high capacity junctions, though may  
12 be at-grade, segregated pedestrian facilities wherever  
13 possible and frontage access limited if not entirely  
14 restricted, and 24-hour stopping restrictions."

15 MS MAGGIE WONG: So it's not limited to urban roads; it  
16 could include New Territories, roads in New Territories,  
17 as long as it fits the description?

18 MR TONY YAU: Maybe the new towns. New towns, the nature is  
19 similar to the urban areas.

20 MS MAGGIE WONG: Yes. Sorry, I should have asked earlier  
21 about this trunk road. Trunk road, would that be mostly  
22 urban roads or does it also cover roads in New  
23 Territories?

24 MR TONY YAU: Both, cover urban and rural.

25 MS MAGGIE WONG: And what about rural roads?

26

1 MR TONY YAU: Rural roads are:

2 "... roads connecting the smaller centres of  
3 populations or popular recreation areas with major road  
4 networks. Frontage access should be limited wherever  
5 possible and junction design whilst not necessarily  
6 grade separated should be of a high capacity standard."

7 MS MAGGIE WONG: I see, in your footnote 1, you mentioned  
8 that:

9 "For most roads, if the speed limit accords with the  
10 design speed set for their existing road types and road  
11 characteristics, changing the speed limit will not be  
12 required ..."

13 On this section first, the existing road types is  
14 the three road types that you mentioned; is that the  
15 position?

16 MR TONY YAU: Do you mean Tai Po Road?

17 MS MAGGIE WONG: No, generally, this statement, "existing  
18 road types", does this "existing road types" mean the  
19 road types that you mention in paragraph 13, ie the  
20 trunk roads, primary distributor roads and rural roads?

21 MR TONY YAU: Yes, "existing road types" covers all the  
22 different roads.

23 In this footnote, there's a new term, the design  
24 speed. That means, for an engineer, when they design  
25 a road, they have an intention on what the design speed

26

1 for that road. For example, if a road is designed for  
2 50 kilometres per hour, I think no matter whatever  
3 change of the road environment, the surrounding area, or  
4 accidents, even though you review several times, the  
5 speed limit will remain 50 but will not have any chance  
6 to increase to 70 because that is the design speed, it  
7 is the road constraint, the site constraint that limits  
8 the speed limit.

9 CHAIRMAN: What about decreasing it, if you have lots of  
10 accidents?

11 MR TONY YAU: Under the current speed limit structures, our  
12 lowest speed limit usually is 50.

13 CHAIRMAN: You don't consider any other lower speed limit?

14 MR TONY YAU: We've mentioned that in the paper.

15 CHAIRMAN: We are going to come to that as a separate topic.

16 MS MAGGIE WONG: The second part is:

17 "... changing speed limit will not be required  
18 unless there has been demand on it or the accident rate  
19 on the concerned road is above the territory-wide  
20 average."

21 There are two provisos here. The first is there has  
22 been demand of it.

23 CHAIRMAN: Sorry, where are you reading from?

24 MS MAGGIE WONG: From footnote 1, Mr Chairman, I apologise,  
25 page 1819.

1 "There has been demand on it"; what do you mean?

2 MR TONY YAU: That's echo what I just mentioned before,  
3 there are two ways to trigger the speed limit review.  
4 The first one is the regular review. Regular review,  
5 which follows the road types, and the frequency of  
6 review, that means the table mentioned under paragraph  
7 13. And the second way to trigger the speed limit  
8 review will be triggered by public demand or accident  
9 rate, and accident rate, I have just explained how to  
10 compare with the territory-wide average.

11 CHAIRMAN: So public demand might be district councillors  
12 communicating to you complaints made by residents; would  
13 that be it?

14 MR TONY YAU: The members of the public.

15 CHAIRMAN: Through the district council?

16 MR TONY YAU: Maybe.

17 CHAIRMAN: We've seen that in the Tai Po Road itself. That  
18 clearly is a public demand, is it not? Or don't you  
19 regard that as a public demand?

20 MR TONY YAU: When we receive a demand from DC members, we  
21 will consider a review.

22 CHAIRMAN: Yes.

23 MS MAGGIE WONG: You mentioned, "When we receive a demand  
24 from DC members, we would consider a review." The "we",  
25 who are you referring to?

26

1 MR TONY YAU: Usually, the DC members will approach our  
2 district traffic engineers.

3 MS MAGGIE WONG: So it will be screened by the district  
4 traffic engineer first, to see if it reached the  
5 accident rate before it reached the working group; is  
6 that the position?

7 MR TONY YAU: Yes. They would consider also -- accident  
8 rate is one of their considerations. They will also  
9 consider whether there is a significant change in the  
10 environment around their district.

11 MS MAGGIE WONG: Yes. What do you mean by "significant  
12 change in the environment"?

13 MR TONY YAU: For example, with some new developments,  
14 property that will affect the traffic mix or increase  
15 the traffic flows.

16 MS MAGGIE WONG: Is there a mechanism where if the distinct  
17 council or district councillor, the public, disagrees  
18 with the consideration given by the traffic engineer  
19 that the road should be reviewed, what can the public do  
20 in those circumstances, apart from going repeatedly to  
21 the to traffic engineer? Is there a review mechanism  
22 where it could reach the Working Group on Speed Limit  
23 Review?

24 MR TONY YAU: Because, based on our current practice whether  
25 to conduct a speed limit review or -- the speed limit  
26

1 review itself is quite technical. So it really depends  
2 on the traffic engineer to conduct a speed limit review  
3 and find out the most suitable speed limit for that  
4 concerned road section.

5 MS MAGGIE WONG: In terms of the current practice, this  
6 traffic engineer, if the accident rate doesn't meet the  
7 criteria, would the traffic engineer, having received  
8 a number of complaints, or the district council is  
9 dissatisfied with the complaints and requests  
10 the engineer to review it, would the engineer as  
11 a protocol go and visit that particular site in  
12 question?

13 MR TONY YAU: Yes.

14 MS MAGGIE WONG: So it's a protocol?

15 MR TONY YAU: Usually, the traffic engineer will have a site  
16 visit with the concerned DC members, and see if -- even  
17 though there may not be sufficient reason to trigger the  
18 speed limit review, they may see on site what kinds of  
19 traffic improvement measure can be done.

20 CHAIRMAN: By that, do you mean perhaps improving signage,  
21 or chevrons, that sort of thing?

22 MR TONY YAU: Yes. Sometimes it improves the -- usually it  
23 is the pedestrian crossing facility. They may find the  
24 speed limit is too high, and they have difficulty  
25 crossing the road.

26

1 MS MAGGIE WONG: Still on that page, can I proceed to ask  
2 you about that paragraph below the table:

3 "Over the past five years, speed limits of 143 road  
4 sections have been reviewed and discussed in the Working  
5 Group on Speed Limit Review."

6 These 143 road sections, is there a breakdown of  
7 which road type it was?

8 MR TONY YAU: Yes, I have a record.

9 MR DEREK CHAN: Can you give us the figure?

10 MR TONY YAU: I will check whether I have the information  
11 available.

12 I have a table showing all the road types of each  
13 143 road sections, but do not have a summary or  
14 an example of primary distributor or --

15 MS MAGGIE WONG: Yes. First of all, can you give us  
16 an average of the road sections that would be reviewed  
17 on a yearly basis?

18 MR TONY YAU: Average is at least 24 road sections, each  
19 year.

20 MS MAGGIE WONG: Is that number a fixed number or can it be  
21 changed subject to circumstances?

22 MR TONY YAU: Yes, it's the minimum number, at least we have  
23 to review 24.

24 MS MAGGIE WONG: How do you select the 24 road sections?

25 MR TONY YAU: It's based on the regional engineer's  
26

1           considerations.

2       MS MAGGIE WONG: And the regional engineer considerations  
3           will be based on the three criteria you mentioned  
4           earlier?

5       MR TONY YAU: Yes, and also the public demand, accident  
6           rate.

7       MS MAGGIE WONG: Would this information be made public,  
8           these 143 road sections, or the 24 road sections that  
9           are going to be reviewed; would this information be made  
10          public so that the public knows the working group would  
11          review these 24 sections and give their comments before  
12          the working group convenes?

13      MR TONY YAU: No. But if there are any changes in the speed  
14          limit finally recommended in the working group, we  
15          usually will consult the district council.

16      MS MAGGIE WONG: You mention also in that paragraph that out  
17          of the 143 road sections reviewed, seven road sections  
18          have been recommended for speed limit changes.

19           Can you tell us, first of all, these seven road  
20          sections, which type it is, or which road types they  
21          are?

22      MR TONY YAU: For that seven road sections, two roads are  
23          primary distributors, one road is a district  
24          distributor, and two roads are sliproads of expressway,  
25          and one is a rural -- two primary distributors, one

26

1 district distributor, two sliproads of expressway, one  
2 rural, and one local distributor.

3 MS MAGGIE WONG: Second, the speed limit, you stated there  
4 that there had been changes. What is the change?

5 MR TONY YAU: Five road sections, the speed limit is  
6 decreased, and two road sections, the speed limit is  
7 increased.

8 MS MAGGIE WONG: So which are the road sections where the  
9 speed limit is decreased?

10 MR TONY YAU: You mean the name of the road section?

11 CHAIRMAN: Do you mean the name or the type of road?

12 MS MAGGIE WONG: I mean first of all the road type, and if  
13 you would also be able to assist on the specific road  
14 sections, and the year.

15 MR TONY YAU: Maybe, from the time chronology -- in 2015,  
16 for the five road types that the speed limit decreased,  
17 there is one primary distributor, one district  
18 distributor, one rural, one local distributor, and one  
19 sliproad of expressway. Those five road types have  
20 a decrease of their speed limit.

21 For the two road sections have an increase of the  
22 speed limit, one is primary distributor and another one  
23 is sliproad of expressway.

24 MS MAGGIE WONG: I see the time, Mr Chairman, but I would  
25 like to explore this. I would be grateful if you would

26

1 provide more information about this 2015 in relation to  
2 these five roads types where the speed limit is  
3 decreased, and the specific sections which we are  
4 concerned with and the reasons why they are decreased in  
5 terms of speed limit, and the relevant minutes of the  
6 meeting of the working group.

7 CHAIRMAN: Before the witness answers the question, may  
8 I enquire what is the relevance of this line of  
9 questioning?

10 MS MAGGIE WONG: Mr Chairman, I wish to know on what basis,  
11 first of all, would it reach the working group in terms  
12 of specific road sections; and the second is what  
13 considerations have been given in the working group and  
14 what weight has been given in the working group as to  
15 the complaints made by the district council.

16 Maybe, if they could address these two matters  
17 without minutes, I'm happy with that.

18 CHAIRMAN: Ultimately, what is the purpose of finding out  
19 this information?

20 MS MAGGIE WONG: It's whether we could improve the working  
21 group system or the protocol in terms of reviewing of  
22 road limits, when it comes to complaints from district  
23 council, without simply using the accident rate per  
24 territory-wide coverage, because it appears artificial.

25 CHAIRMAN: You have in mind the benchmark being what  
26

1           happened on this Tai Po Road section that we are  
2           concerned with?

3       MS MAGGIE WONG:   Yes, specifically.

4       CHAIRMAN:   Very well.

5           Can you provide information as to that?

6       MS MABLE CHAN:   We will try to dig out those minutes to  
7           facilitate.

8       CHAIRMAN:   Thank you.

9       MS MAGGIE WONG:   In terms of -- before I go on with this  
10           paper, can I ask a few questions, going back to this  
11           Working Group on Speed Limit.   May I ask a few questions  
12           as to why it is set up in the first place.   We have  
13           information that this working group -- or rather you  
14           provided information that this Working Group on Speed  
15           Limit Review has been formed in 2000.   Can you tell us  
16           why this Working Group on Speed Limit Review has been  
17           formed in 2000?

18       MR TONY YAU:   Yes.   The working group was formed in 2000.  
19           In that year, I remember there's a LegCo paper, stating  
20           why we set the Working Group on Speed Limit, because at  
21           that time there is quite public enquiries or comments  
22           that the then road section, the speed limit were usually  
23           set too low and the police will invoke enforcement for  
24           those road sections.   So there's quite a strong request  
25           from public, in particular the motorists' association,  
26

1           that we have to review the speed limit with a view to  
2           seeing if any particular roads, any concerned road, the  
3           speed limit can be increased.

4   CHAIRMAN: Who was it that suggested forming a working group  
5           to deal with the public concerns?

6   MR TONY YAU: The Transport Department.

7   CHAIRMAN: Thank you. Is that set out in the paper, the  
8           LegCo paper?

9   MR TONY YAU: Yes.

10   MS MAGGIE WONG: We have the LegCo paper pulled up on the  
11           screen and we will distribute copies now.

12   CHAIRMAN: Do we have a bundle reference or not?

13   MS MAGGIE WONG: I apologise, Mr Chairman, it is not in our  
14           bundle yet, but we picked it up from the LegCo  
15           documents. It is a document prepared by the Transport  
16           Bureau, dated 24 January 2000.

17           Is that the paper that you -- or the LegCo paper you  
18           refer to in your evidence?

19   MR TONY YAU: Yes.

20   MS MAGGIE WONG: Thank you. If I may, for the purposes of  
21           the record, it is a LegCo paper headed or entitled,  
22           "Speed limit in Hong Kong", and this paper was presented  
23           by the Transport Bureau in relation to three aspects:  
24           the structure of speed limit categorisation and the  
25           criteria of setting speed limits on roads in Hong Kong;

26

1 second, the review of speed limits in Hong Kong; and the  
2 relationship between traffic accidents and speed limit.

3 We can see in paragraph 3 there is this speed limit  
4 categorisation. In terms of low band, which is 50km per  
5 hour for urban or new town built-up areas; middle band,  
6 70 to 80 for areas outside urban or new town built-up  
7 areas; and high band, for 100km per hour for high  
8 standard expressways.

9 If we go over the page --

10 CHAIRMAN: Before you move on -- for how long has Hong Kong  
11 adopted that approach of these three bands, perhaps  
12 earlier expressed in miles per hour, but for how long  
13 have we had that approach?

14 MR TONY YAU: I think around the same time that the paper is  
15 issued.

16 CHAIRMAN: This came into being in 2000?

17 MR TONY YAU: Yes, but before 2000, in Hong Kong, the speed  
18 limit of roads also generally can be classified in those  
19 three bands, but in that paper, in that LegCo paper, we  
20 clearly specified that Hong Kong have those three speed  
21 limits.

22 CHAIRMAN: What is the status of this structure, the  
23 three-band structure?

24 MR TONY YAU: It's still valid --

25 CHAIRMAN: No. What is its status? This is an approach  
26

1           adopted by the Transport Department. Is it a law?

2       MR TONY YAU: No.

3       CHAIRMAN: So what is it?

4       MR TONY YAU: It's our current approach.

5       CHAIRMAN: Transport Department's approach?

6       MR TONY YAU: Administration's approach.

7       CHAIRMAN: The government's approach?

8       MR TONY YAU: Yes.

9       CHAIRMAN: The Transport and Housing Bureau's policy  
10           approach?

11      MR TONY YAU: Yes.

12      CHAIRMAN: Is that expressed in any other document?

13      MR TONY YAU: I'm not aware of that, apart from this paper,  
14           there is any paper about the speed limits structures.

15      MS MABLE CHAN: Chairman, perhaps, if I may.

16      CHAIRMAN: Please.

17      MS MABLE CHAN: I would think that to put it in a more  
18           accurate context, it's the government approach as set  
19           out in the Transport Department's transport, planning  
20           and design manual. I may not say it to that far as  
21           a policy approach.

22      CHAIRMAN: Transport, planning and design manual?

23      MS MABLE CHAN: Yes.

24      CHAIRMAN: Thank you.

25           Ms Wong, we are already over time. I'm leaving it  
26

1 to you to choose a moment when a topic is finished.

2 MS MAGGIE WONG: Maybe just to end this topic.

3 CHAIRMAN: Yes.

4 MS MAGGIE WONG: What is the date of this manual that you  
5 refer to?

6 MR TONY YAU: You mean the transport planning manual?

7 MS MAGGIE WONG: Yes, the transport planning --

8 CHAIRMAN: Presumably you update it from time to time.

9 MR TONY YAU: Yes, we have submitted this copy to the  
10 secretary of the committee.

11 CHAIRMAN: When was it born, this manual? Does it go back  
12 to the 1960s? 1950s?

13 MR TONY YAU: Please wait. I need to check. It's based  
14 on -- I remember it's based on some similar UK manual at  
15 the time, and we drafted one to suit Hong Kong road  
16 conditions.

17 CHAIRMAN: Yes. I have looked at a copy from the Hong Kong  
18 University, so I think it has its origins in the 1960s,  
19 doesn't it, UK in the 1960s?

20 MR TONY YAU: Yes. That's the first edition.

21 CHAIRMAN: Yes.

22 MS MAGGIE WONG: Has this speed limit structure in the  
23 transport manual ever been reviewed or updated?

24 MR TONY YAU: Yes. The concerned structure we will  
25 regularly update.

26

1 MS MAGGIE WONG: You mentioned "regularly update". On what  
2 criteria would you update it?

3 MR TONY YAU: We will check if there are any changes, say,  
4 to overseas practice that triggers our update in light  
5 of overseas matters.

6 MS MAGGIE WONG: We will touch upon this overseas practice  
7 maybe in the next session, but if I could go back to  
8 this LegCo paper, just to finish off this document  
9 before we break. It's in paragraph 6 of this LegCo  
10 paper. It talks about the review of speed limit in  
11 1999, and:

12 "... the administration commissioned the Transport  
13 Research Laboratory (TRL) in the UK, an independent  
14 leading transport research establishment in the world,  
15 to carry out a study on the speed limits in Hong Kong."

16 It also specified some of the findings in the  
17 paragraph that follows.

18 So my question is this. Apart from this 1999  
19 commissioning of the Transport Research Laboratory in  
20 the UK, has there been other commissioning of the  
21 Transport Research Laboratory in recent years?

22 MR TONY YAU: No.

23 MS MAGGIE WONG: So that's the only one that has ever been  
24 done?

25 MR TONY YAU: Yes.

26

1 CHAIRMAN: Is this document available publicly, this  
2 consultancy report?

3 MR TONY YAU: I don't think so. It may be a kind of  
4 internal consultancy report.

5 CHAIRMAN: Right. Is it a document you can provide to us?

6 MR TONY YAU: Yes.

7 MS MABLE CHAN: Yes, Chairman, certainly.

8 CHAIRMAN: Thank you. If you could provide it, we'd be  
9 grateful.

10 MS MAGGIE WONG: So do I take it that apart from 1999, there  
11 has not been a consultancy study or a big study on the  
12 overseas practice in terms of speed limit structure in  
13 Hong Kong since 1999?

14 MR TONY YAU: No, there's not a particular consultancy study  
15 on speed limit review, but as we mentioned in our paper  
16 of low speed limit zones, we are aware that many of the  
17 European cities implement some lower speed limit, say  
18 20 miles per hour, it's similar to 30 kilometres per  
19 hour. We are studying whether such measures would be  
20 suitable in Hong Kong.

21 MS MAGGIE WONG: Yes. I understand. That would be perhaps  
22 a new job for the Road Safety Audit team; is that the  
23 position?

24 MR TONY YAU: No. This is different. The low speed limit  
25 study is related to the road designs, whether it's a  
26

1           suitable traffic calming measure to make the vehicles  
2           drive at such low speed limit.

3       MS MABLE CHAN: So, to put it shortly, irrespective of  
4           whether or not the Road Safety Audit team is in place,  
5           this low speed limit zone, we have already started some  
6           pilot scheme and study.

7       CHAIRMAN: There's a lot of material available, isn't there?

8       MS MABLE CHAN: Yes.

9       MS MAGGIE WONG: When did you start this low speed limit  
10          zone study?

11      MR TONY YAU: We start the study under the walkability  
12          study, and the walkability study commenced in December  
13          2017.

14      CHAIRMAN: What is the walkability study?

15      MR TONY YAU: Walkability study, to review our current  
16          standard and design to see if any particular measure or  
17          innovative measure can enhance the pedestrian  
18          environment so that encourage the road user to walk  
19          more.

20      CHAIRMAN: In the way that they have developed it in London?

21      MR TONY YAU: London is one of our reference in this study.

22      MS MABLE CHAN: This is quite relevant, Chairman, because  
23          I notice, in the discussion with the expert about the  
24          reference to certain road sections in London, that is  
25          exactly one of the reference points for us in taking  
26

1 forward the walkability study.

2 While the study focuses or branches out from  
3 improving the pedestrian environment, it actually  
4 touches upon how to improve the road and also pedestrian  
5 pathway, in order to ensure the safety and also to  
6 enhance the ambience of the environment, and it touches  
7 upon the study of whether low speed limit zones in some  
8 of the road sections is worth considering.

9 CHAIRMAN: Yes. The two go together, don't they?

10 MS MABLE CHAN: Yes, the two go together.

11 I would just like to add that in Hong Kong, we are  
12 actually focusing on a few road sections in the urban  
13 districts, in particular like Hong Kong Island.

14 MS MAGGIE WONG: What is the membership of this walkability  
15 study or low speed limit zone study? What is the  
16 membership?

17 MR TONY YAU: We appoint a consultant to do that.

18 CHAIRMAN: And who are they?

19 MR TONY YAU: Mott MacDonald.

20 CHAIRMAN: Sorry, could you repeat that?

21 MR TONY YAU: Mott MacDonald consultant.

22 MS MAGGIE WONG: Maybe that is an appropriate time to stop,  
23 Mr Chairman.

24 CHAIRMAN: I'm sure it is.

25 We will adjourn our proceedings. I ought to say  
26

1           this, for the record, that as I indicated at an earlier  
2           stage in the day, we have been providing Prof Lo with  
3           a running transcript, and in the course of the day he's  
4           come back to us with questions, but obviously these  
5           proceedings will have to be adjourned, and so, at the  
6           resumed hearing, he can pose those questions. It might  
7           well be that we are dealing with other topics and we  
8           will have to go back to them, and it's better that he  
9           should have the opportunity to put them himself. But he  
10          has come back to us during the day.

11           So what we will do is adjourn now and we will resume  
12          at a date that is mutually convenient to you, Ms Chan,  
13          and your representatives, and counsel. We will have to  
14          investigate diaries as to when that date is. But we  
15          will confirm in due course when we will resume these  
16          hearings.

17   MS MABLE CHAN: Thank you very much, Chairman.

18   CHAIRMAN: So we are now adjourned to a future date. Thank  
19          you.

20   (5.48 pm)

21           (The hearing adjourned to a date to be fixed)

EVIDENCE FROM THE TRANSPORT DEPARTMENT: MS MABLE .....1

CHAN, MS AMY LEE, MS AMY TSE, MR PATRICK

WONG, MR YK CHAN, MR WILLIAM SHUM,

MR TONY YAU

Examination by MR DEREK CHAN (continued) .....2

Examination by MS MAGGIE WONG .....160

1 2018 年 10 月 6 日

2 上午 10 時 01 分恢復聆訊

3 出席人士： Hon Mr Justice Michael Lunn（倫明高），香港專營巴士服務獨  
4 立檢討委員會主席

5 歐陽伯權先生，香港專營巴士服務獨立檢討委員會委員

6 陳政龍大律師及黃佩琪大律師，由高露雲律師行委聘，代表香港專營巴  
7 士服務獨立檢討委員會

8 陳美寶女士，運輸署署長（運輸署代表）

9 陳英傑先生，副署長／公共運輸事務及管理（署理）（運輸署代表）

10 黃志光先生，助理署長／巴士及鐵路（運輸署代表）

11 謝善怡女士，首席運輸主任／巴士及鐵路 1（運輸署代表）

12 邱國鼎先生，總工程師／道路安全及標準研究（運輸署代表）

13 岑毅安先生，總機電工程師／車輛安全及標準（運輸署代表）

14 李美鳳女士，總運輸主任／特別職務（運輸署代表）

15

16 主席：（經傳譯員）早晨。唔該晒星期六出席呢個聽證會協助委員會去取證嘅。我一  
17 開始要解番羅教授嘅情況，羅教授今日喺科技大學係有工作在身嘅，因為佢哋  
18 係有一個論壇就係關於亞洲嘅工程學系嘅，佢今日嚟唔到。我哋個做法就會咁  
19 嘅，我哋會繼續，因為我哋有現場嘅謄本，我哋嘅做法就會係喺今日唔同階段  
20 將呢一個現場嘅謄錄版本去電郵畀佢，可以係透過我--如果佢有需要，可以問  
21 一啲問題，而到今日最後嘅時候，就會有一個更正版本嘅謄本同埋錄音版本，  
22 等教授可以知悉番我哋討論過嘅事項，如果之後仲有需要嘅話，亦都可以以書  
23 面嘅方式去再提問嘅。我先解釋番羅教授今日係嚟唔到嘅。而家我會邀請陳律  
24 師係繼續嘅。

25 陳政龍先生：（經傳譯員）陳女士，署長早晨，多謝你哋尋日向委員會提交咗一啲嘅  
26 文件，就係星期四嘅聆訊之後，一啲跟進嘅文件，我想跟進番一件事嘅，就係  
27 根據新提供嘅文件，關於黑盒減速嘅嗰個數據嘅，我想首先問你嗰個限額係幾  
28 多？而可唔可以請你睇番呢個專營巴士加強安全嘅小組嘅一個報告？嗰個報告  
29 就係第 1807 頁，陳女士，而家有冇附件 2 呢？

30 陳美寶女士：Yes.

31 陳政龍先生：（經傳譯員）呢個就係陳先生喺星期四下晝聽證會嘅時候就提交出嚟

1 嘅，而家就講番啲文件嘅第 4 段，關於黑盒嘅要求，就話用嚟--嗰個軟件係應  
2 該可以提交報告，關於以下嘅事項嘅，就係呢一個嘅偵察到減速 0.4G 嘅時候  
3 嘅一個三分鐘嘅時間呢個車輛嘅速度嘅情況，我哋就星期四下晝問過，嚟 2003  
4 年嗰個要求係 0.2G 嘅，而家見到個要求係 0.4G 嘅減速嘅。星期四下晝就有討  
5 論過點解會改咗，同埋嚟尋日傍晚就提交咗啲文件，關於呢一個嘅更改嘅，我  
6 想問下呢樣嘢。我亦都想問下背後改嘅理據嘅，即係點解會選擇個界限值係  
7 0.4G，呢樣嘢亦都係討論過嘅。想同你傾下關於呢兩個問題嘅。

8 我逐步講，首先會講番呢一個改動，嚟 04、05、06、07 年，嗰個改動，  
9 我而家就先請你睇番尋晚提交嘅一啲文件，而家先請你睇附件 C1，我哋而家--  
10 主席，...

11 主席：（經傳譯員）我都睇到 C1 㗎喇。

12 陳政龍先生：（經傳譯員）主席，呢度係未有頁碼嘅，呢個應該係運輸署第 5 號嘅文  
13 件冊嘅 1853 頁。

14 陳女士，而家你應該見到係運輸署同埋城巴一個聯絡嘅會議，呢個 2005 年  
15 5 月 19 號嘅會議紀錄，有啲代表嘅，係運輸署代表出席，我睇番啲名應該係你  
16 今日在場嘅同事當時都有出席呢一個嘅會議嘅。

17 陳英傑先生：（經傳譯員）冇錯。

18 陳政龍先生：（經傳譯員）我想而家請你睇第 25 段，即係話黑盒，黑盒就講--即係  
19 安裝個黑盒，到 26 段嘅時候，就提過話嚟上一次嘅專營巴士同運輸署嘅聯合會  
20 議入面就建議黑盒嘅要求就有兩項嘅更改，就商量過嘅，第一，就係呢一個黑  
21 盒嘅意外紀錄，應該係由 0.2G 改做 0.4G 嘅減值；另外就係呢一個嘅意外紀錄  
22 應該係嚟之後--即係三十秒之後記錄三分鐘同埋三十秒之前記錄兩分鐘嘅。而  
23 運輸署就話冇反對以上嘅更改，亦都想知道營運商有咩嘢意見嘅。

24 睇番呢個會議紀錄，似乎 0.4G 減速就係城巴選擇嘅，咁樣睇，你同唔同  
25 意？

26 陳英傑先生：（經傳譯員）聽到嘛？聽到嘛？

27 主席：（經傳譯員）聽到喇。

28 陳英傑先生：（經傳譯員）我明白呢個題目 2005 年討論過，好可能係據城巴要求，  
29 去睇下呢個數值係咪應該要更改，因為 0.2G 嘅本來係。

30 主席：（經傳譯員）答案即係「係」喇？

31 陳英傑先生：（經傳譯員）係。

32 主席：（經傳譯員）城巴提議嘅。你盡量係答「係」或者「唔係」，即係簡單嚟講，  
33 個答案係「係」喇？

1 陳英傑先生：（經傳譯員）冇錯。

2 主席：（經傳譯員）陳律師。

3 陳政龍先生：（經傳譯員）如果我哋睇跟住嘅一封電郵，係 annex C，即係附件  
4 C2，係一年之後㗎喇，就係 2006 年 9 月 19 號，個附件就係話安裝黑盒要嘅要  
5 求，之後嗰頁，我哋見到呢個黑盒嘅要求草擬本，喺呢頁中間，我哋見到喺呢  
6 個表嘅第 2、第 4 都出現 0.4G 嘅，即係話去到 2006 年 9 月個情況就係咁喇。

7 主席：（經傳譯員）為咗記錄起見，因為有啲部分係有遮蓋嘅，我想問下係邊個，寄  
8 件者同埋收件者係咩嘢人？陳先生，或者你可以處理。

9 陳政龍先生：（經傳譯員）可以嘅。主席，如果睇番附件 C2 第一頁，電郵就係一個  
10 運輸署叫做 Walter Foo 嘅人士發出嘅，㗎唔㗎呢？

11 陳英傑先生：（經傳譯員）我可以邀請岑毅安先生，即係話我哋總機電工程師回答  
12 嘅。

13 岑毅安先生：（經傳譯員）呢個電郵係--冇錯，係 Walter Foo 先生，佢當時就係  
14 運輸署嘅一個機電工程師，發出嘅。

15 陳政龍先生：（經傳譯員）而睇番有遮蓋啲嘅部分，喺電郵收件者嗰一欄似乎係電郵  
16 發畀啲嘅專營巴士公司嘅？

17 岑毅安先生：（經傳譯員）冇錯。呢啲係唔同嘅專營巴士公司嘅唔同嘅職員...

18 陳政龍先生：（經傳譯員）唔好意思，主席，我有留意到，其實封信喺左手面係冇翻  
19 譯到出嚟嘅。應該咁樣講，第一欄就係寄件者。

20 主席：（經傳譯員）得㗎喇，喺紀錄上面就可以㗎喇，我自己可以理解。

21 陳政龍先生：（經傳譯員）下一份文件就係 2007 年 3 月 28 號，喺附件 C3，你而家  
22 面前見到就係一個會議紀錄，係運輸署同埋專營巴士公司嘅第二十八次聯合會  
23 議。第一頁你可以見到運輸署代表同埋巴士公司嘅代表，但係人名嗰度就係遮  
24 蓋嘅，我哋有嘅版本，我而家想請你睇第 5 頁，關於黑盒嘅，黑盒數據記錄儀  
25 器，呢個係個標題，呢度記錄就係話根據運輸署，就係話呢個電子數據記錄儀  
26 器嘅要求同埋規格係已經細節落實，所有巴士營運商係喺稍後就會收到最新嘅  
27 通知，呢個情況就係 2007 年 3 月嘅。

28 下一份文件係附件 C4，2007 年 10 月 5 號，呢度就有一個附件關於黑盒要  
29 求，可唔可以確認呢一個係叫做一個 Steven Tse 嘅人士發出，係運輸署你嘅  
30 同事㗎嘅？

31 岑毅安先生：（經傳譯員）冇錯。

32 陳政龍先生：（經傳譯員）收件人，可唔可以講下係咩嘢人呢？我哋只係見到有九

1 巴，有城巴。

2 岑毅安先生：（經傳譯員）喺遮蓋嘅部分嘅收件者其實係所有專營巴士公司嘅職員。

3 主席：（經傳譯員）點解需要遮蓋呢？

4 岑毅安先生：（經傳譯員）因為電郵入面提到嗰啲職員嘅名，我哋就遮蓋番嗰啲職員  
5 嘅名。

6 主席：（經傳譯員）點解要咁做呢？點解呢個職員嘅名喺度嘅話，係會侵犯到佢呢？  
7 係咪同個人資料私隱有關呢？

8 陳美寶女士：（經傳譯員）主席，我諗喺準備呢一個回應，我啲同事遮蓋嘅時候就有  
9 去問番有關職員嘅同意嘅。

10 主席：（經傳譯員）個答案即係「係」喇？

11 陳美寶女士：Yes.

12 主席：（經傳譯員）係因為你係關注呢一個嘅個人資料保障喇？

13 陳美寶女士：Yes.

14 主席：（經傳譯員）好奇怪，一個咁普通嘅書信來往，點解需要加呢個枝節呢？

15 陳美寶女士：（經傳譯員）我哋只不過係謹慎啲去行事。

16 主席：（經傳譯員）我唔係批評你，可能係呢個法例本身引發咁嘅現象。

17 陳政龍先生：（經傳譯員）我而家揭去附件 C4，第二頁，似乎係傾咗兩年之後，就  
18 係嗰啲最終個黑盒嘅要求嘅細節就敲定喇？

19 岑毅安先生：（經傳譯員）係。

20 陳政龍先生：（經傳譯員）黑盒要求改變嗰個--有更改嗰個過程就係咁喇，我跟住想  
21 問下你...

22 主席：（經傳譯員）你喺繼續問之前，點解如果係有呢一個改變，喺 2018 年 8 月發  
23 出嘅有關嘅文件入面係有反映出嚟呢？點解延遲咗十二年先至用咁樣嘅格式  
24 呢？

25 陳英傑先生：（經傳譯員）主席，我尋日都提過，討論過程同埋呢一個減速值嘅更改  
26 就喺 2005 年、2007 年之間討論嘅，運輸署嘅職員當時就認為新嘅減速值...

27 主席：（經傳譯員）請你回答番個問題，點解延遲咗十二年先至用咁樣嘅格式呢？即  
28 係我哋而家 2018 年見到嘅格式呢？

29 陳英傑先生：（經傳譯員）我會話運輸署嘅職員當時--或者為免麻煩，或者佢哋遺漏

1 咗去將呢一個規格嘅啲參數改變。

2 主席：（經傳譯員）而家事後係咪應該咁做呢？

3 陳英傑先生：（經傳譯員）如果而家事後睇番，應該嘅。

4 主席：（經傳譯員）好，唔該。陳律師。

5 陳政龍先生：（經傳譯員）唔該晒，陳先生，我而家想講下用 0.4G 作為界限值嘅理  
6 據，我哋喺星期四下晝都討論過，我而家可以提醒番你星期四嘅證供係點樣，  
7 然後再睇番一啲新嘅文件，聽下你對呢啲文件有咩嘢意見。

8 而家先睇番星期四嘅謄本，2018 年 10 月 4 號第 19 日嘅聽證會，第 54  
9 頁，我而家解釋一下我讀緊啲乜嘢先，第 53 頁嘅時候，就傾緊點解選擇呢個  
10 0.4 嘅減速值嘅，而家喺 54 頁第 4 行，繼續講。

11 主席問咗條問題「畀一個實際嘅例子，咩嘢意思呢？」陳先生就話「唔係，  
12 呢一個嘅定義就係顯示呢一個減速嘅力度就係每秒 3.92 米，即係話有乘客坐喺  
13 座位嘅話，會係跌出座位嘅，而呢一個嘅剎車嘅力度就會令到--或者減速嘅力  
14 度係會令到一個乘客係由座位度跌出嚟嘅，呢個係要求嚟嘅。」

15 主席跟住話「即係話如果唔戴安全帶嘅話，一個坐喺度嘅乘客就會係因為咁  
16 樣嘅減速嘅程度去跌出座位？」而陳先生回答「跌出座位呢，其實技術層面講  
17 就係喺百分之九十五嘅樣本嘅情況，就會令到乘客係跌離座位嘅，即係話有個  
18 百分之九十五嘅可能性，如果有戴安全帶嘅話，呢一個乘客會跌出嚟，如果係  
19 有 0.4G 嘅減速值嘅話。」

20 主席：（經傳譯員）喺繼續講之前，呢度話有百分之九十五嘅情況，乘客喺座位度跌  
21 出嚟，或者話百分之九十五嘅可能性，係咪有呢兩句說話有矛盾？

22 陳英傑先生：（經傳譯員）我講--我要更正番，呢度係話有百分之九十五嘅可能性個  
23 乘客係唔會跌出架車。

24 陳政龍先生：（經傳譯員）再講百分之九十五呢個數我陣間會同你再討論嘅。

25 主席：（經傳譯員）即係百分之九十五坐喺度嘅乘客冇戴安全帶，如果係有個 0.4G  
26 嘅減速值嘅話，都唔會跌出個座位嘅？

27 陳英傑先生：（經傳譯員）正確嘅。

28 主席：（經傳譯員）唔該晒。

29 陳政龍先生：（經傳譯員）係同一個課題，我哋去睇一睇謄本第 61 頁，第 3 行，主  
30 席就問「你可唔可以回答呢條問題？點解係由 0.2 轉到去 0.4？」陳先生就講  
31 話「就係話喺 2006 年當我哋係同呢一個經營商去講最低規格嘅時候，當我哋見  
32 佢哋同埋去做評估佢哋嘅表現嘅時候，我哋就發現 0.2 就係一個好輕微嘅減速

1 嘅動力，其實成日都會發生嘅，對我哋嚟講，如果要監察嘅說話，就唔係好有  
2 意思。喺嗰陣時候，我哋就同呢一個營運商亦都係同意咗，就話 0.2G 就應該係  
3 更改到去 0.4，但係不幸，喺嗰個規格之中就有改到嘅，所以今次我哋就利用  
4 呢個機會就去更改佢。」

5 我喺度想問嘅就係話營運商就話 0.2 係太多，因為經常都會發生嘅，喺第  
6 62 頁，我哋就係由第 6 行開始睇——唔好意思，應該係第 8 行，呢個亦都係主席  
7 問嘅問題，呢個就係話係「係百分之九十五嘅人就喺 0.4G 嘅減速嘅時候就會跌  
8 落張凳嗰度，呢個係咪有人係曾經做過研究嘅呢？」陳生就話「我哋嘅資料，  
9 就係喺美國嘅運輸署嘅時候 1977 年曾經做過一個咁樣嘅研究。」

10 主席就話「你可唔可以畀我哋一啲細節呢？你有冇呢個文件呢？」陳先生就  
11 話「我哋係可以提供畀你。」

12 而家就運輸署已經係提供咗呢個文件，就喺附件 D 嗰度嘅，琴晚就提交畀  
13 我哋，遲少少我就會係再睇呢個文件。我而家就再讀埋呢一個其他嘅謄本嘅部  
14 分先，因為都好有關嘅。

15 喺第 16 行，我嘅問題就係話「呢個嘅調查研究，你講嘅就係話有冇提到係  
16 0.2 同埋 0.4G 嘅限值嘅時候，企喺度嘅客人佢哋會唔會跌呢？」陳先生就話  
17 「唔好意思，就係有關於企喺度嘅乘客嘅，因為坐喺度嘅客人佢哋係坐喺個座  
18 位度，佢哋都會喺特定嘅位置嗰度係坐低，但係如果嗰人企喺度嘅時候，嘅情  
19 況就好唔同，因為嗰人點樣企其實我哋係控制唔到，亦都係有任何規格嗰人係  
20 點樣企法嘅，所以因此我哋就係有關於有呢啲嘅——關於企嘅乘客嘅呢啲嘅數據  
21 喇。」

22 主席就話「其實如果係一般嘅常識嚟講，佢哋都會係跌咗喇？」陳先生就話  
23 「就睇下佢哋究竟係點樣企嘅，我哋喺巴士裏面其實都講清楚其實如果一啲人  
24 企喺度，佢哋係可以拎住啲扶手，如果佢哋係做姿勢係正確嘅時候，可能佢哋  
25 跌低嘅機會就唔係好大，但係如果有嗰人佢哋有行李上嚟或者佢哋郁嘅時候，  
26 可能個情況就好唔同喇。」

27 所以我就會特別想講一講關於個研究嗰度就係呢一點，就係 0.4G 同埋百分  
28 之九十五嘅問題，同埋就有冇一啲嘅科學嘅數據，就係特別係一啲企喺度嘅乘  
29 客佢哋嘅情況係點。我可唔可以請大家睇下附件 D，就係琴日提供嘅嗰份文件。  
30 主席，唔好意思，我就睇一睇嗰個頁碼係幾多。呢個係 TD-5 嘅 1862 頁嘅。

31 主席：（經傳譯員）唔該晒。

32 陳政龍先生：（經傳譯員）主席，我就或者我睇一睇我哋自己本來本身嗰個頁碼。陳  
33 生，我哋可唔可以首先睇一睇佢個引言？係呢一個嘅 28 頁嘅第 9 頁嘅，喺右上  
34 角。

35 主席：（經傳譯員）你可唔可以話畀我聽頁碼呢，如果喺個文件夾之中？

1 陳政龍先生：（經傳譯員）就係 1870 嘅，就係 TD-5 嘅文件冊嘅。

2 主席：（經傳譯員）唔該晒。

3 陳政龍先生：（經傳譯員）我哋可以係第一、二段去講一講，「其實係關於減速嗰度  
4 其實就喺呢方面嘅研究就好少嘅，特別就係一啲坐喺度嘅乘客嘅，就喺呢啲嘅  
5 研究之中，其實就係只係有兩個研究就係同一啲人有關嘅，特別係喺呢啲嘅研  
6 究就係譬如話係鐵路嗰度，Hirshfield 就係發現就係 1 吋埋 10g 每一秒就會  
7 係有一啲郁動嘅，然後喺 107g（235 磅）、132（4 呎 4 吋）去到 193 厘米  
8 （即是 6 呎 4 吋）嘅高度嘅時候，就會係個情況係咁。如果有啲人係失去咗平  
9 衡嘅時候，喺 0.16 嘅 g 嘅呢個限值嘅時候，嗰啲坐——佢哋係向前，啲男士佢  
10 哋係著低踭鞋同埋女士係高踭鞋嘅時候，佢哋會失去平衡。而對於佢哋拎住一  
11 啲嘢嘅時候，佢係 0.23g 嘅時候，就會係失去平衡。

12 第二個調查係 Browning 嘅，佢哋就係講企嘅乘客，有 15 至 60 歲嘅人，  
13 九十個人係參與，如果佢哋係向前同埋向後，而佢哋係揸住個扶手嘅時候，我  
14 哋發現就係如果加速嘅時候，同埋減速嘅時候就會係對於佢哋有啲影響嘅，喺  
15 0.055g 嘅呢個動力嘅時候，如果佢哋係有嘢扶住嘅時候，佢哋就會輕微有郁  
16 動，而佢捉住呢一個嘅扶手嘅時候，喺 0.115g 嘅呢個限值嘅時候，佢哋就會  
17 有動，而坐喺度嘅人，0.2g 嘅時候，佢哋就係會有影響嘅。」

18 呢個就係同呢一個企喺度嘅乘客對於呢一個加速嘅時候就有啲影響嘅，呢個  
19 係咪一個好——係一個正確嘅觀察嚟嘅呢，陳先生？

20 陳英傑先生：（經傳譯員）呢個係一個簡單嘅簡短嘅引言，就係呢個報告裏面，就係  
21 嗰個作者嘅觀察，我哋對於呢啲研究，我哋有啲個細節，喺文件裏面講，呢個  
22 就係有個研究，...

23 主席：（經傳譯員）呢個係一個學術嘅文件研究嚟嘅，如果你去到第 19 頁嘅時候，  
24 我哋都睇到有其他嘅文件或者研究，就係話橫向嘅加速嘅時候，有啲咩嘢嘅影  
25 響嘅，呢個係 Browning 嘅研究，1972 年，就係一個嘅技術嘅研究嚟嘅，係英  
26 國嘅，嗰啲數據係非常之清楚，個問題亦都係好清楚嘅，睇得。陳先生。

27 陳政龍先生：（經傳譯員）喺呢一個階段，我就想問一問呢個問題，呢啲嘅研究或者  
28 文件，運輸署當佢去同意係用 0.4 嘅減速值嘅時候，作為一個界限值嘅時候，  
29 有冇參考過呢啲文件呢？

30 陳英傑先生：（經傳譯員）就我所知，呢個文件，當我哋係改變嗰個界限值嘅時候，  
31 我哋有考慮到嘅。

32 主席：（經傳譯員）係咪意思，你就係話意思就係話唔同嘅減速嘅程度係對於企嘅乘  
33 客個影響你有考慮到，你純粹係考慮坐喺度嘅乘客呢？

34 陳英傑先生：（經傳譯員）係，冇錯。

1 主席：（經傳譯員）唔該晒。點解呀？

2 陳英傑先生：（經傳譯員）呢個係嗰個我哋定嗰個界限，就係為巴士營運商去開發黑  
3 盒嘅用途嘅，喺當其時我哋覺得嗰個黑盒應該係可以量度到當減速嘅時候對於  
4 坐喺度嘅乘客有咩嘢影響，佢哋係個影響係點樣。

5 主席：（經傳譯員）點解你有考慮到企喺度嘅乘客呀？佢哋受一啲減速，即使唔係好  
6 快嘅時候，佢哋都會影響得好緊要嘅。

7 陳英傑先生：（經傳譯員）因為嗰啲嘅坐喺度嘅乘客，佢哋就坐喺度，對佢哋嚟講，  
8 佢哋要郁動係比較難嘅，所以我哋就用黑盒去量度嗰個減速個程度，佢個減速  
9 要大啲，先至啲人會係跌出嚟嘅，所以呢個就亦都會個情況係比較嚴重。

10 主席：（經傳譯員）你嘅意思話企喺度嘅乘客，如果佢哋跌低嘅時候，個情況有咁嘅  
11 嚴重？

12 陳英傑先生：（經傳譯員）唔係嘅，或者我想請岑先生佢去補充嘅。

13 岑毅安先生：（經傳譯員）其中一個我哋考慮就係話嗰啲坐喺度嘅乘客，我哋好少叫  
14 佢話「你係捉緊個扶手」嘅，但係企喺度嘅乘客，我做好多嘅宣傳活動，就叫  
15 佢哋——勸籲佢哋企喺度嘅乘客捉緊個扶手或者係捉緊一啲其他嘅部分，當佢哋  
16 企喺個巴士上面，所以呢個其中一個考慮因素，當我哋去更改個減速嘅 G 值嘅  
17 時候，由 0.2 更改到去 0.4G 嘅時候。

18 主席：（經傳譯員）我要好公平嘅，你咁講，你當其時 2005 年、07 年嘅時候，你  
19 都有參與嗰個決定嘅？

20 岑毅安先生：（經傳譯員）冇嘅，我真係冇參與嘅。

21 主席：（經傳譯員）你有冇多一啲嘅資料可以提供畀我哋呢？點解會作出呢個更改，  
22 就幫助你去回答呢啲，聽落去都係好明顯嘅問題？

23 岑毅安先生：No, sorry. We don't have that.

24 主席：（經傳譯員）你已經盡你所能去回答呢個問題，就係提供一啲點解要做更改嘅  
25 理由，你已經盡你嘅所能，係咪？

26 岑毅安先生：（經傳譯員）係。

27 主席：（經傳譯員）唔該。

28 陳政龍先生：（經傳譯員）好，或者我總結下呢一點，第 28 頁裏面嘅第 26 版，就  
29 係同一個嘅文件嘅，呢個係 TD-5 1887 頁嘅，我哋就第一、第二段去讀，「呢  
30 個研究嘅目的就係提供數據，就係睇下唔同嘅限值對於坐喺度嘅乘客喺突然剎  
31 車嘅時候有咩嘢影響，同埋就睇下呢一個嘅突然減速嘅時候有咩嘢影響，  
32 呢啲嘅數據就係表示，話畀我哋聽呢一個佢哋嘅坐喺度嘅乘客，當佢有一個減

1 速嘅時候，佢哋個經驗比嗰啲企喺度嘅乘客有兩倍咁多，呢個百分之八十四嘅  
2 喺一個座位上面嘅乘客佢向前嘅時候，當佢個減速值係 0.4g 嘅時候，佢哋就  
3 可以安然坐喺個位嘅。要確保喺呢個打橫嘅位嘅時候，百分之八十四嘅乘客喺  
4 0.41g 嘅限值，同埋呢一個嘅傾側 5 度嘅時候，嗰個限值應該係最好係 0.52g  
5 嘅。」

6 呢度有講過，就係百分之八十四乘客就坐喺呢一個嘅向前嘅座位嘅時候嘅情  
7 況，百分之九十五呢個就有講到嘅，喺呢一度提到，或者我係漏咗啲嘢嘅，你  
8 可唔可以話畀我聽你百分之九十五個數字係點樣嚟嘅呢？

9 陳英傑先生：（經傳譯員）我請岑先生去回答。

10 岑毅安先生：（經傳譯員）喺我哋去同巴士公司傾嘅時候，0.4G 嘅減速值嘅時候，  
11 就係講嗰啲打橫排嗰啲座位嘅，我哋去睇一睇呢個文件嘅第 11 頁。

12 主席：（經傳譯員）你係睇緊上高定係下底嗰個嘅頁碼呢？

13 岑毅安先生：（經傳譯員）呢個係有三個圖表嘅嗰個。

14 主席：（經傳譯員）有唔同嘅頁碼嘅，呢個就係第 11，下底就係 1872 等等，你睇  
15 緊邊個頁碼？

16 陳美寶女士：（經傳譯員）下底嗰個。

17 主席：（經傳譯員）好，下底嗰個頁碼，第 11 頁。

18 岑毅安先生：（經傳譯員）呢個係睇第一--最上嗰個圖表，喺呢個圖表之中，呢度寫  
19 百分之九十五嘅保留值，就係呢個喇。

20 陳政龍先生：（經傳譯員）呢個係咪 0.42G 嗰個減速值嘅？

21 岑毅安先生：（經傳譯員）係，冇錯，0.42G 減速值。你睇 x 軸，呢度寫住有一啲  
22 嘅數據，係 0.4G 嘅，寫住。係，冇錯，就係呢個喇。

23 陳政龍先生：（經傳譯員）如果我咁樣去理解圖表，啱唔啱呢？就係 0.4G 嚟計，百  
24 分之九十五嘅坐喺度嘅乘客就唔會跌出嚟嘅？

25 岑毅安先生：（經傳譯員）係嘅，冇錯。

26 主席：（經傳譯員）其實如果你睇呢，其實係多過百分之九十五講嘅，係咪呀？

27 岑毅安先生：Yes.

28 主席：（經傳譯員）還是百分之九十八定係點呢？

29 岑毅安先生：（經傳譯員）我哋就唔能夠去正確講，所以我哋就話係多於百分之九十  
30 五嘅，就多於百分之九十五嘅乘客就係唔會跌出嚟嘅，就係當係 0.42 嘅減速值  
31 嘅時候。

1 主席：（經傳譯員）唔該晒。

2 陳政龍先生：（經傳譯員）就頭先我讀出嚟嗰段亦都係講到嗰啲數據就會係坐喺度嘅  
3 乘客就係感受到嗰個減速係兩倍嘅個感覺強過一啲企喺度嘅乘客，因此喺呢一  
4 個嘅研究，我就頭先讀出嗰段，就包括喺引言部分嗰啲嘅文字，就話企喺度嘅  
5 乘客，如果佢係有緊握嘅扶手等等，佢哋會失去平衡，就會係 0.3G 同埋  
6 0.27G 嘅時候，就係會失去平衡嘅，似乎喺引言嗰度係咁講嘅，你會唔會同意  
7 呢？

8 主席：（經傳譯員）呢個係 Hirshfield 1932 嗰個嘅研究嘅結果嚟嘅？

9 岑毅安先生：（經傳譯員）係，冇錯。

10 陳政龍先生：（經傳譯員）喺呢個調查之中個數據，似乎就係話--我哋去 0.4G 嘅減  
11 速 G 值其實就已經係可以足以係去照顧好嗰啲坐喺度嘅乘客，但係嗰啲企喺度  
12 嘅乘客，佢哋嘅情況就有被照顧，而我呢個咁嘅講法，你有啲咩嘢觀察或者同  
13 唔同意？

14 岑毅安先生：（經傳譯員）係。

15 陳政龍先生：（經傳譯員）運輸署會唔會諗就係話更加小心同埋更加科學嘅研究，去  
16 做一啲咁嘅研究，去睇清楚 0.4G 嘅呢個值係咪真係可以保障到個乘客嘅--或  
17 者企喺度乘客嘅安全呢？

18 陳英傑先生：（經傳譯員）係嘅，我覺得我哋可以做多啲嘢，做多啲研究去找出唔同  
19 嘅減速值點樣去影響唔同嘅乘客，譬如話企嘅或者係坐嘅。

20 主席：（經傳譯員）我哋睇咗嘅文件係 1977、1972 同埋 1932 年做嘅，你有冇睇過  
21 一啲近期啲嘅學術或者係技術方面嘅研究呢？譬如喺過去五十年有冇呢？

22 陳英傑先生：（經傳譯員）我哋都係嘗試咁樣做...

23 主席：（經傳譯員）你有嘗試咁樣做？

24 陳英傑先生：（經傳譯員）有。

25 主席：（經傳譯員）有冇成功呀？

26 陳英傑先生：（經傳譯員）唔係好成功，我哋能夠搵到嘅文件都係呢一啲。

27 主席：（經傳譯員）當然，你係有當時參與呢一啲討論，係咪？

28 陳英傑先生：（經傳譯員）係，正確。

29 主席：（經傳譯員）究竟係幾時嘗試去搵一啲比較近期嘅研究呢？

30 陳英傑先生：（經傳譯員）喺過去幾個星期。

- 1 主席：（經傳譯員）你可唔可以協助我哋，話畀我哋聽你喺邊度搵？你接觸過邊個？
- 2 陳英傑先生：（經傳譯員）我哋嘅工程師喺網上尋找同埋睇番自己嘅檔案或者文件，  
3 去睇下究竟有冇任何嘅材料我哋係可以搵到關於研究呢一個題目嘅，到而家，  
4 我哋網上嘅搜尋同埋其他嘅資源，我哋都係冇乜成功。
- 5 主席：（經傳譯員）好喇，即係網上搜尋同埋你自己嘅檔案，仲有冇其他呢？
- 6 岑毅安先生：（經傳譯員）就係呢兩個方法。
- 7 主席：（經傳譯員）你有冇接觸過本地非常之傑出嘅大學，譬如話佢哋嘅工程學系或  
8 者係港大、科大，甚至其他嘅大學呢？
- 9 岑毅安先生：（經傳譯員）喺過去幾個星期，我哋有咁樣做。
- 10 主席：（經傳譯員）好，唔該。
- 11 陳政龍先生：（經傳譯員）主席，我而家打算開始另外一個題目，就係關於安全帶。
- 12 主席：（經傳譯員）好呀。
- 13 陳政龍先生：（經傳譯員）陳女士，我假設會係你去處理問題，所以我係會向你發  
14 問，但係如果你認為其他嘅同事應該回答，你可以請佢哋回答。
- 15 首先，我而家想講關於安全帶，係睇番工作小組嘅報告嘅，因為喺嗰個報告  
16 裏面係詳細咁樣處理咗安全帶嘅問題，為咗個紀錄，嗰個報告係喺 TD-5 嗰查文  
17 件 1757 頁開始嘅，我請大家睇第 3 部分，呢一部分係處理安全帶嘅問題嘅。首  
18 先，我係請大家睇一睇其他司法管轄區嘅情況，然後睇下運輸署以前嘅立場係  
19 點樣嘅，關於其他司法管轄區，我想大家睇 3.11 段，喺呢一個全面報告嘅。
- 20 主席：（經傳譯員）我哋自己畀一個頁碼佢呢？
- 21 陳政龍先生：（經傳譯員）有嘅，主席，我哋內部嘅頁碼係第 28 頁，我哋聽證文件  
22 嘅頁碼就係 TD-5 號文件 1788 頁。法官閣下，我而家就會讀出 3.11 同埋  
23 3.12 段嘅。
- 24 3.11，個報告係咁講嘅，「我哋考慮到專營巴士公司方面不同嘅意見，工  
25 作小組就係檢討咗而家海外嘅做法同埋佢哋嘅要求嘅，即係關於喺巴士上面安  
26 裝安全帶嘅問題，如果係城際或者係跨境嘅一啲路線，譬如話美國、英國同埋  
27 荷蘭，佢哋就係硬性規定所有嘅座位都要有安全帶，但係其他人。譬如英國、  
28 荷蘭同埋喺澳洲嘅維多利亞省，就係話一定係要戴安全帶添嘅。但係如果係市  
29 內或者係有企位嘅巴士，任何嘅海外司法管轄區，即係我哋檢討過嗰啲，有一  
30 個係法定規定一定要喺個座位嗰度配備安全帶嘅。根據呢一啲司法管轄區嘅運  
31 輸當局，市內嘅巴士好多時都係用嚟畀人搭一個短嘅時間，無論係時間或者係  
32 距離都係嘅。同埋好多時喺市內嗰個速度都係唔會好快嘅，因此對於呢啲市內  
33 巴士就唔會有安全帶嘅要求嘅，有關嘅數據就係喺附件 IV 嗰度。」

1 喺附件 IV，就喺 1809 頁嘅，即係我哋嗰啲會議文件 1809 頁。陳女士，  
2 1809 頁就只不過係詳細講出我剛才讀出嗰個段落所描述嘅嘢。主席話佢係搵到  
3 嘅。即係話如果係喺市內嘅巴士，就佢哋檢討過嘅司法管轄區就並冇法定要求  
4 要有安全帶，我只不過係想有一個細微嘅點想你澄清一下，呢一個檢討係幾時  
5 做嘅呢？即係就呢一個工作小組嘅報告嚟講，係咪喺 2018 年呢？

6 陳美寶女士：（經傳譯員）呢一個檢討係 2018 年做嘅，係當我哋準備同埋當呢個工  
7 作小組係佢自己討論嘅時候。

8 陳政龍先生：（經傳譯員）唔該晒，我咁樣問係因為有一個類似嘅檢討，係 2005 同  
9 埋 2007 年有做過嘅，但係我講嗰樣之前，我而家又想讀埋 3.12 段出嚟嘅。

10 3.12 段係咁講嘅，「以上嘅檢討結果，就嗰三個巴士製造商都係同意嘅，  
11 佢哋嘅意見就係話如果喺其他嘅國家，譬如喺城市內嘅巴士都係唔需要冇安全  
12 帶嘅。喺歐洲，如果係城際嘅大巴士，而且係冇企位嘅話，先至係需要呢一啲  
13 嘅安全帶嘅，佢哋就認為喺香港就算加裝安全帶，都唔會保障到企位嘅乘  
14 客。」大家可以睇到 3.12 其實就係嗰啲巴士製造商，佢哋喺小組討論嘅時候佢  
15 哋發表嘅意見嚟嘅，我咁樣講啱唔啱呢？

16 陳美寶女士：（經傳譯員）係，正確。

17 陳政龍先生：（經傳譯員）喺 2018 年做咗呢個檢討之後，我而家就想回顧一下一個  
18 類似嘅檢討，就係 2005 至 2007 年做嘅，好喇，我哋而家留住呢個工作小組個  
19 報告，我哋去 3.2 段嗰度係向大家介紹一下呢個以前做過嘅類似嘅檢討，3.2  
20 段，內部頁碼第 23 頁，我哋嘅聽證會文件頁碼 1783 頁。

21 3.2 段係咁講嘅，「運輸署就係規定，喺 2006 年、2007 年嘅時候因為有  
22 專營巴士係牽涉喺意外嗰度，因此喺某啲嘅座位就規定要有呢一啲嘅安全帶，  
23 而喺 2007 年，專營巴士公司都係同意喺上層最前嗰四個位係要安裝安全帶，即  
24 係話所有 1997 年之後發牌嘅巴士都要咁樣樣，以防止佢哋係跌出座位嘅，喺  
25 2012、2015、2017 年我哋喺傾呢一個續牌嘅時候，我哋都利用嗰個機會，就  
26 係規定所有巴士公司就係話呢一啲冇任何遮擋嘅座位都要安裝安全帶嘅。」呢  
27 一個就係因為 06、07 年嘅時候有一啲意外發生。

28 好喇，我而家講番其中一份歷史性嘅文件，就講下當時做嘅一個檢討嘅，而  
29 家請大家睇一睇 SEC-1 嗰一查文件，第 266 頁，喺 266 頁，我希望大家都睇  
30 到呢一份文件，係運輸署準備嘅，係畀立法會運輸事務委員會開會嘅時候用  
31 嘅，你可以喺 272 頁睇到嗰個日子就係 2006 年 10 月寫嘅，請大家直接睇 271  
32 頁第 19 段，呢一度嘅大題目就係話公營巴士上嘅安全帶，我而家直接係讀出第  
33 19 段同埋第 20 段，係講到海外嘅司法管轄區點樣處理安全帶嘅問題。

34 第 19 段，「我哋係做咗一個研究去睇下海外點樣去處理巴士安全帶嘅問  
35 題，有關嘅要求就會喺個附件嗰度有一個摘要嘅。」呢一個附件喺 273 頁，不  
36 過我繼續讀咗先。「我哋可以睇到冇任何一個外國嘅國家係要求喺市內嘅巴

1 士，即係城市內嘅巴士，就算係有企位嘅乘客，係要求佢哋安裝安全帶嘅。喺  
2 澳洲同埋加拿大做嘅研究就係發現如果喺所有嘅座位嗰度安裝安全帶，其實額  
3 外嘅安全利益都唔係咁多嘅，因為我哋都好難想像所有嘅乘客都會願意扣上安  
4 全帶。

5 因此我哋認為並不適當去硬性規定所有專營巴士都要安裝同埋係強逼乘客配  
6 戴安全帶嘅。但係我哋會繼續同專營巴士公司一齊工作去搵多啲措施確保乘客  
7 安全。」

8 我咁樣講公唔公道呢？就係海外司法管轄區，就係話運輸署考慮過啲嘅，係  
9 有改變佢哋嘅立場嘅，2006 年至到今年 2018 年，關於話唔去規定喺市內嘅巴  
10 士，就算有企位，乘客都要安裝安全帶。

11 陳美寶女士：（經傳譯員）係嘅，我認為喺我哋兩輪嘅檢討之中，海外嘅做法同埋經  
12 驗，好似我哋嘅檢討都顯示出對於安全帶嘅配備，佢哋嘅立場大致上係冇改  
13 變。

14 主席：（經傳譯員）喺第 19 頁，就係講到澳洲同加拿大嘅研究，就話就算喺所有嘅  
15 巴士座位安裝安全帶，其實額外嘅安全利益都唔係大到好似我哋想像咁嘅，然  
16 後跟住就話好難想像所有嘅乘客都可以確保佢哋用呢一個安全帶，你可唔可以  
17 畀澳洲同埋加拿大呢一啲嘅研究嘅參考嘅資料畀我哋呢？

18 陳美寶女士：（經傳譯員）我而家就有啲嘅詳細嘅資料，但係我哋可以畀番有關嘅參  
19 考資料畀大家嘅。

20 主席：（經傳譯員）你哋呢一度嘅代表，有冇邊位知道呢一啲嘅研究係乜嘢研究呢？

21 陳美寶女士：（經傳譯員）我知道喺新南威爾斯州澳洲嗰度係有做過一啲研究嘅。

22 主席：（經傳譯員）但係我想知佢哋點樣講，你喺適當時候畀番啲參考資料我哋。

23 陳美寶女士：（經傳譯員）我哋有嘅，我哋有有關嘅參考資料，不過而家我哋好難引  
24 述嗰個參考嘅資料畀大家。

25 主席：（經傳譯員）但係你會向我哋提供？

26 陳美寶女士：（經傳譯員）會嘅。

27 陳政龍先生：（經傳譯員）好喇，我哋睇咗呢一個歷史背景之後...

28 陳美寶女士：（經傳譯員）唔好意思，主席，我嘅同事邱生想講一講海外司法管轄區  
29 嘅比較，我想邀請佢向大家講出佢嘅觀察。

30 主席：（經傳譯員）好呀。

31 邱國鼎先生：（經傳譯員）多謝主席。陳律師，你係講得啱嘅，喺市內巴士個要求喺  
32 2006 年同 2018 年間係冇大改變嘅，不過除咗市內巴士之外，如果你講係城際

1 巴士，喺美國嘅法例係有改變，喺 2013 年 11 月，美國係通過咗新嘅法例，就  
2 係規定所有新嘅巴士都要有安全帶，即係除咗校巴同埋市內巴士之外。

3 主席：（經傳譯員）我哋知道喺英國，喺伯明翰至到倫敦之間嗰啲嘅大旅遊巴係需要  
4 有安全帶嘅，因此我哋而家想講嘅唔係城際巴士，係市內巴士。

5 邱國鼎先生：（經傳譯員）係，我意思就係話如果城際巴士就好似我哋嗰啲比較長線  
6 嘅巴士，即係譬如話由港島去到新界，佢哋係要用高速公路嘅話咁樣。

7 主席：（經傳譯員）呢一啲巴士，如果你講番美國嗰啲，佢哋有冇一個車速限制呢？  
8 因為如果車速係 70 公里同 110 公里，咁就爭好遠㗎嘅？

9 邱國鼎先生：Yes.

10 主席：（經傳譯員）會唔會個規定係唔同呢？佢哋可唔可以係以高速行駛呢？

11 邱國鼎先生：（經傳譯員）我相信係有規定嘅，喺嗰啲嘅司法管轄區，如果佢哋高速  
12 行駛，應該有規定。

13 主席：（經傳譯員）係喇，我都覺得係有分別，所以嗰個邏輯就係會適用於呢啲大嘅  
14 旅遊巴，因為佢哋事實上都係高速行駛嘅，並不是每小時行 70 公里。陳律師。

15 陳政龍先生：（經傳譯員）好喇，我哋而家有咗呢個歷史背景之後，而家我想考慮一  
16 下工作小組報告裏面講到嘅現時嘅立場。我未講到個細節之前，我明白個立  
17 場，對於新巴士同埋加裝安全帶嘅現有巴士係有些少唔同嘅，我係會逐一講呢  
18 一個唔同嘅狀況。

19 首先，講新巴士嘅立場，請大家睇報告第 3.4 段，內部頁碼 24，聽證會文  
20 件頁碼 1784。首先，我讀出 3.4 段，「關於喺公營巴士上面所有嘅座位安裝安  
21 全帶，所有三個嘅巴士製造商，即係亞歷山大丹尼斯、富豪同埋合德猛獅，就  
22 話技術上係完全可能嘅，甚至係合乎國際嘅標準，即係如果你認為呢個係採購  
23 嘅要求，我哋係可以咁樣安裝嘅。鑑於呢一個咁嘅講法，工作小組嘅建議就係  
24 喺採購新巴士嘅時候，所有嘅座位都應該有安全帶嘅，所有嘅專營巴士嘅公司  
25 都同意，就話從 2018 年 7 月起，佢哋訂購嘅巴士全部座位都應該有安全帶。」  
26 呢個就係新巴士嘅情況。

27 我問下一個問題之前，我想大家留意另外一項資料，可能同下一個問題有關  
28 或者無關嘅，就係關於嗰個成本，喺所有座位安裝安全帶，如果係新巴士嚟  
29 講，個成本係幾多，我想請大家留住呢個工作小組嘅報告，然後我哋睇另外一  
30 份文件，係 KMB 第 12 沓文件，4887-5 嗰一頁，或者我去 4887-1 嗰一頁先，  
31 等大家知道嗰個背景。

32 陳女士，喺呢一頁，你應該係面前見到㗎喇，呢個係第二次工作小組會議嘅  
33 筆記，日期係 2018 年 4 月 23 號嘅，而家請你睇番第 16 段，呢個會議紀錄，  
34 呢個係 4887-5 頁，等我讀出第 16 段。

「同巴士廠商係查問過，對於新嘅巴士座位安裝安全帶嘅可能性之後，所有巴士公司都話技術上係可以喺採購嘅新巴士嘅所有乘客座位度安裝安全帶嘅，而九巴龍運亦都係補充，每一架嘅雙層巴士係要額外 5,000 鎊嘅成本係為所有乘客座位安裝安全帶，所有巴士公司都同意喺佢哋嘅新嘅單層同埋雙層採購嘅巴士係實施呢個新嘅要求嘅。呢度提到有額外成本，就係每一架巴士 5,000 鎊去安裝乘客嘅安全帶，呢個係會議紀錄入面提到嘅。」

呢個係咪一個正確嘅估算呢？根據你而家有嘅資料。

陳美寶女士：（經傳譯員）睇番喺 2018 年 4 月，呢個係據我哋所知嘅資料。

陳政龍先生：（經傳譯員）即係咁囉喎，額外每一架巴士成本係 5,000 鎊？

陳美寶女士：Yes.

陳政龍先生：（經傳譯員）你有呢個資料，我個問題係喺 06、07 年之後有咩嘢更改呢，令到運輸署有呢一個建議，為新嘅巴士裝安全帶？對於喺市內巴士安裝安全帶，係咪個益處有改變呢，喺呢段時間？

陳美寶女士：（經傳譯員）喺我哋工作小組嘅討論入面，安全帶係其中一個好主要我哋討論過嘅題目，喺準備工作小組嘅討論之前，運輸署係有進一步檢討過海外嘅做法。頭先回答番大律師嘅問題，似乎海外對於市內巴士乘客座位安裝安全帶嘅立場大致一樣，呢一點我哋係好認真看待嘅，喺立法會嘅交通事務委員會都提過數個建議，我哋需要好小心咁樣考慮呢一個課題。

我哋由唔同嘅角度考慮，首先係道路交通同埋公共交通安全；第二，我哋亦都考慮到技術可行性，對於新採購巴士同埋現有巴士安裝乘客嘅安全帶；第三，我哋亦都考慮如果額外加裝所有乘客座位嘅安全帶嘅話，額外嘅成本，對於安全角度，我哋其實係有向道路安全議會提出呢啲議題，去討論擺佢哋嘅意見。

接住落嚟，喺呢個題目，我可以請邱國鼎先生補充一下我哋對於安全同保障嘅立場，即係話如果喺我哋市內巴士喺香港乘客座位加裝安全帶嘅影響，...

主席：（經傳譯員）你繼續講之前，你可唔可以話你幾時向道路安全議會提出呢個議題㗎？

邱國鼎先生：（經傳譯員）4 月，喺道路安全研究小組曾經討論過呢個題目。

主席：（經傳譯員）今年 4 月？

邱國鼎先生：（經傳譯員）對唔住，係 7 月，係 7 月嗰個會。

主席：（經傳譯員）係咪以文件或者電郵方式呀？

邱國鼎先生：（經傳譯員）係一個會議，一個小組會議㗎嘅，就有文件，有討論文件

1 嘅。

2 陳美寶女士：（經傳譯員）我哋有提交文件畀議會嘅。

3 主席：（經傳譯員）可唔可以提供文件副本畀我哋？

4 陳美寶女士：（經傳譯員）可以嘅。

5 主席：（經傳譯員）呢個係 7 月邊一日呀，個會議？

6 邱國鼎先生：May I check my diary?

7 主席：（經傳譯員）你慢慢喇。

8 邱國鼎先生：（經傳譯員）7 月 17 號。

9 主席：（經傳譯員）唔該。陳律師。陳女士，我打斷咗你，我哋講緊你第一個嘅關  
10 注，即係話...

11 陳美寶女士：（經傳譯員）係呀，道路安全同埋公共交通安全，我哋就有諮詢過道路  
12 安全議會有關嘅小組，亦都提交咗文件，第二，呢一方面，我都會請邱國鼎先  
13 生隨後補充。但係我而家先講埋另外兩方面，喺技術可行性方面，工作小組嘅  
14 會議，亦都得到巴士廠商同埋巴士公司嘅參與。

15 我哋係處理兩個問題，第一，就係新嘅巴士，你可以睇番會議紀錄，我哋係  
16 有討論過，新採購嘅巴士，乘客座位都安裝安全帶呢個可行性，廠商嘅回覆係  
17 話技術上係可行嘅。專營巴士公司嘅代表喺會議上亦都係話--都確認佢哋係可  
18 以就住新採購巴士喺將來係實施呢一個建議嘅。

19 對於成本同埋財政影響方面，對於新嘅巴士，每一架雙層巴士額外嘅成本  
20 5,000 鎊，即係等如總成本嘅百分之一點五，即係話購置一架雙層巴士嘅總成  
21 本嘅百分之一點五。喺會議嘅時候，巴士公司亦都係話係喺技術上、操作上都  
22 係可行嘅，如果喺新採購嘅巴士所有乘客座位安裝安全帶。

23 下一條問題就係話現有巴士加裝安全帶，我哋參考過唔同巴士嘅模型...

24 陳政龍先生：（經傳譯員）喺加裝嗰個問題，我稍後會另一個題目先至再詳細討論，  
25 而家先講番幾個問題。

26 陳美寶女士：（經傳譯員）我而家係咪請邱國鼎先生去補充先呢？

27 主席：（經傳譯員）我諗我哋如果畀大律師去問晒所有有關嘅問題，先會更加有效率  
28 嘅，如果仲有啲事項遺漏嘅話，你可以提出，不過請佢繼續問先。

29 陳政龍先生：（經傳譯員）陳女士，我而家繼續問番嗰三個考慮，如果我錯，請你更  
30 正我，不過似乎係有做過一個客觀嘅、科學嘅分析，係如果所有乘客座位都加  
31 裝安全帶嘅話係有咩好處，咁樣講公唔公道？

1 陳美寶女士：（經傳譯員）唔好意思，我唔明。

2 主席：（經傳譯員）你係咪講緊成本效益嘅分析吓，定點？

3 陳政龍先生：（經傳譯員）我哋有呢個成本就係 5,000 鎊...

4 主席：（經傳譯員）係呀，你個問題似乎係--你話「你似乎有做過任何成本效益嘅分  
5 析」，佢係咁樣問嘅。

6 陳美寶女士：（經傳譯員）我唔同意。

7 陳政龍先生：Again, just a side point...

8 主席：（經傳譯員）我哋繼續講之前，你做過乜嘢分析呀，如果你唔同意佢講法？

9 陳美寶女士：（經傳譯員）首先，我哋有考慮成本，如果新巴士所有乘客座位安裝安  
10 全帶嘅成本，我哋有考慮；第二，亦都有考慮效益。

11 主席：（經傳譯員）你個分析結果係點呢？

12 陳美寶女士：（經傳譯員）我哋結論係如果係所有乘客座位都裝安全帶嘅話，就會為  
13 喺車上嘅乘客提供額外嘅保障，呢一方面可以請邱國鼎先生係補充嘅。

14 邱國鼎先生：（經傳譯員）如果我哋要做成本效益分析嘅話，我哋要對等比較嘅，我  
15 哋關注嘅係安全帶係一個保護裝置，之前我哋提過喺車廂內嘅其他嘅譬如係限  
16 速器或者係穩定控制系統，所有呢啲都係一啲防禦嘅措施嚟嘅，就係用技術去  
17 防止意外嘅發生，但係安全帶係一個保護裝置，因為畢竟都係會發生意外，而  
18 安全帶就係一啲安全措施可以保障乘客，如果我哋做一啲成本效益分析嘅時  
19 候，我哋要搵一啲類似嘅同等嘅有咁樣嘅保護功能嘅儀器去同安全帶去比較，  
20 而我有見到有任何一種保護裝置可以對乘客，特別喺發生意外嘅時候提供一樣  
21 嘅保障。

22 而喺工作小組，我哋亦都有同巴士公司討論，額外嘅費用就係每一部巴士  
23 5,000 鎊，而每一架雙層巴士就係超過 300 萬。

24 主席：（經傳譯員）我哋知道㗎喇，即係話係總成本嘅百分之一點五。

25 邱國鼎先生：（經傳譯員）喺比較總成本嚟講，係比較低嘅，但係呢一個帶嚟嘅保  
26 護，呢個得益係好高嘅。

27 主席：（經傳譯員）有冇啲情況係有車上嘅座位乘客因為冇安全帶而受傷呢？你有冇  
28 研究過呢一樣嘢呢？

29 邱國鼎先生：（經傳譯員）有啲研究嘅，係私家車，安全帶可以減低意外嘅嚴重性。

30 主席：（經傳譯員）私家車同巴士好唔同，你有冇考慮過--有冇研究過有啲事件有乘  
31 客係喺車上坐喺個座位度因為冇安裝安全帶而受傷或者係甚至死亡呢，你有冇

1 研究過呢？

2 邱國鼎先生：（經傳譯員）有一個特定嘅研究。

3 主席：（經傳譯員）即係答案就係你有喇？

4 邱國鼎先生：（沒有可聽到的回答）

5 主席：（經傳譯員）點解冇呢？

6 邱國鼎先生：（經傳譯員）我哋亦都有討論過，正如我頭先提過，就係喺道路研究小  
7 組嗰度傾過，呢個係喺工作小組報告嘅 5.10 段嗰度。

8 主席：（經傳譯員）個問題好簡單，點解你有去研究過喺巴士上座位嘅乘客冇安全帶  
9 而導致到有受傷或者死亡嘅事件去顯示番個問題喺邊呢？

10 陳美寶女士：（經傳譯員）請容許我補充，主席。我哋要承認番，根據職員嘅證供，  
11 我哋係冇做過任何可以量化嘅研究，考慮到意外嘅成因嘅，去研究一下係唔係  
12 冇帶安全帶嘅乘客個傷勢會重啲，...

13 主席：（經傳譯員）你喺繼續講之前，我而家問你嘅問題，點解冇做咁嘅研究，或者  
14 係可以量化嘅分析呢？

15 陳美寶女士：（經傳譯員）我哋冇咁樣做，我而家都答唔到你，但係我想指出...

16 主席：（經傳譯員）等我協助你，有冇咁嘅統計數據？有冇紀錄？有冇整理過呢啲資  
17 料？

18 陳美寶女士：（經傳譯員）主席，我諗喺呢方面有收集過或者整理過統計數據嘅。

19 主席：（經傳譯員）警方有？

20 陳美寶女士：（經傳譯員）我哋唔可以代表警方回答。

21 主席：（經傳譯員）你接觸佢哋嘅交通意外數據庫嘅，你唔係叫你幫佢答，有冇任何  
22 數據係協助到你嘅？

23 邱國鼎先生：（經傳譯員）主席，喺我哋嘅路上交通意外數據，我哋每年係的確有啲  
24 數字嘅。

25 主席：（經傳譯員）有啲數字係包括私家車，但係我問嘅係巴士。

26 邱國鼎先生：（經傳譯員）我哋巴士方面都有嘅。

27 主席：（經傳譯員）你有啲咩嘢數字呢？或者你可以考慮下呢點，我就唔想對你唔公  
28 平，如果你需要啲時間去整理下啲資料，我哋可以稍後再返番呢一點嘅。陳律  
29 師。

1 陳政龍先生：（經傳譯員）主席，因為提到警方嘅數據，我問緊我嘅助手搵番最近警  
2 方發畀我哋嘅函件，有啲資料關於係巴士座位乘客受傷嘅數據嘅。

3 主席：（經傳譯員）你都提醒咗我，呢啲資料喺我哋嘅網站有冇呢？

4 陳政龍先生：（經傳譯員）有嘅，未必可以完全回答到呢個問題嘅，但係都有啲關係  
5 嘅，而家想請你睇番雜項 1C 嘅，頁數係 124-561，主席，呢個係 10 月 3 號  
6 2018 年警方發畀我哋委員會嘅函件。陳女士，你而家面前都應該有呢一封信  
7 件，係警方係喺 2018 年 10 月 3 號寫畀委員會嘅，第 3 段，警方知悉佢哋嘅總  
8 部係搵唔到任何運輸署根據喺 2007 年呢個建議喺巴士上安裝安全帶嘅任何諮詢  
9 嘅，呢一段就講到同道路安全議會嘅會議，之後嗰頁。

10 第 4 段，警方係咁講嘅，警方就係有一啲統計數字，關於係喺巴士上嘅座  
11 位乘客冇戴安全帶受傷嘅，跟住就係 2015 年、2016 年、17 年警方有啲數據提  
12 供，似乎就係一啲乘客係有帶同冇帶安全帶而受傷嘅數字嘅。

13 運輸署有冇考慮到呢一啲數據呢，當時你係提議話喺新嘅巴士係有安全帶，  
14 你去考慮個益處嘅時候，有冇睇過呢啲數據呀？

15 主席：（經傳譯員）還是你第一次去睇到呢啲嘅數據呢？

16 邱國鼎先生：（經傳譯員）唔係，唔係嘅，我哋都係知道呢啲嘅數據。

17 主席：（經傳譯員）係，你以前見過㗎喇，係咪呀？

18 邱國鼎先生：（經傳譯員）其實佢哋嗰個格式可能唔同嘅，但係嗰個來源，其實我哋  
19 都知嘅。

20 主席：（經傳譯員）當時你去做分析嘅時候，有冇考慮呢啲數據？

21 邱國鼎先生：（經傳譯員）而家嗰啲傷亡嘅情況，因為有啲--而家我哋就有安全帶咗  
22 嘛，我哋嘅建議就係話要提供安全帶，我哋比較關注...

23 主席：（經傳譯員）唔係，唔係，唔係，個問題好簡單嘅啫，你有冇考慮過呢啲嘅數  
24 據呢？你可以話畀我聽你仲考慮過其他嘢，但係有冇考慮過呢啲數據？

25 邱國鼎先生：（經傳譯員）我哋冇考慮嘅。

26 主席：（經傳譯員）是或者否其實好簡單嘅啫，如果你想補充嘅時候，你可以話畀我  
27 聽你考慮過其他嘢都得。

28 陳美寶女士：（經傳譯員）主席，我哋要好公道嘅，對啲同事，佢哋我哋嘅運輸署其  
29 實係道路安全嘅專家，佢有參加道路安全議會嘅會議，佢亦都係有同警方去聯  
30 繫，基於佢哋以前嘅研究，佢哋係攞到警方嘅資料同埋數據嘅，冇錯，如果有  
31 咁樣嘅數字，點樣嘅方法係去表達呢啲數字嘅時候，佢哋就有考慮過，但係邱  
32 先生可能想解釋嘅就係話佢哋嘅專業嘅分析就會話畀佢聽有安全帶就會係對於

1 坐喺度嘅乘客提供額外嘅保障嘅。

2 主席：（經傳譯員）我哋之前有警司係嚟作供嘅，佢話畀我哋聽，提醒我哋有如果呢  
3 一個嘅乘客佢係戴安全帶戴得好嘅說話，佢就可以個生命得到保障，呢個嘅問  
4 題就係大家唔爭論嘅，個問題就係話--個問題--而家個問題喺邊度，同埋究竟  
5 嗰個成本係點樣樣。邱先生，其實你有冇做到啲分析同埋有冇一啲文件去令我  
6 哋明白你究竟係做過啲咩嘢分析，你可唔可以提供呢？

7 邱國鼎先生：（經傳譯員）喺我哋嘅工作小組嘅報告第 5.3、5.4 段嗰度，我哋有提  
8 到...

9 主席：（經傳譯員）你可唔可以首先回答我個問題，其實你有冇係做過一個文件就係  
10 有呢一個成本效益分析呢？

11 邱國鼎先生：No. I want to mention...

12 主席：（經傳譯員）你可唔可以就咁答問題？有冇咁做？

13 邱國鼎先生：We are going to request in the working group report  
14 that those...

15 主席：（經傳譯員）對唔住，邱先生，唔該你答我嘅問題。你需要幾多時間都得，你  
16 係需要點樣解釋都得，我會畀時間你，但係回答我問題，喺呢一個課題上面，  
17 你有冇去撰寫過一個文件？或者呢個係一個好簡單嘅問題，你用--你可以花啲  
18 時間去諗一諗。

19 邱國鼎先生：（經傳譯員）冇。

20 主席：（經傳譯員）好，你係想講啲乜嘢嘢呢？

21 邱國鼎先生：（經傳譯員）第 5.4 段，呢個工作小組嘅報告就話「所以喺現有嘅巴  
22 士，如果我哋要加裝安全帶，個工作小組就建議運輸署、專營巴士公司同埋巴  
23 士廠就係大家緊密繼續聯繫同埋去工作嘅。」

24 主席：（經傳譯員）係，呢個係咪你想話畀我哋聽嘅？

25 邱國鼎先生：（經傳譯員）係。

26 主席：（經傳譯員）好，陳生，繼續。

27 陳政龍先生：（經傳譯員）陳女士，我下一條問題就係咁嘅，可能唔係咁公道嘅，咁  
28 樣問你，就係請你解釋就係你上一手做過或者冇做過啲乜嘢，但係無論如何，  
29 個問題就係話運輸署--如果個安全帶係咁好，點解喺 2006、07 年做個檢討嘅  
30 時候，冇加入咁樣嘅要求呢、規定呢？

31 陳美寶女士：（經傳譯員）我就唔可以係代我嘅上一手嘅人去回答，但係喺我哋工作  
32 小組嘅討論嘅當中，運輸署嘅睇法就係安全帶就會提供畀乘客一個多一層嘅保

障，但係可唔可以達到我哋希望達到嘅成果呢？亦都係視乎嗰個乘客會唔會使用或者配戴呢啲安全帶，同埋佢哋係咪真係坐喺度嘅乘客。

我哋知道有限制嘅，對於呢一個安全帶有冇效，但係即使係咁，我哋認為係新巴士嚟講，如果我哋要配有安全帶，其實都幾有成本效益，亦都會係提供額外嘅保障，而嗰個額外嘅成本亦都唔係咁大嘅。係關於現有巴士我哋再加裝，遲少少我就會講多啲。

主席：（經傳譯員）唔該晒。陳生。

陳政龍先生：（經傳譯員）喺加裝之前，我就係都想提一點嘅，喺九巴關於大埔嘅意外嘅調查報告嘅時候，2018 年 3 月 12 號提交畀運輸署，九巴就係講，就話——自願咁講，就係話佢會係安裝——喺所有嘅座位之中安裝安全帶，...

主席：（經傳譯員）我哋可唔可以睇一睇嗰個頁數呢？

陳政龍先生：（經傳譯員）KMB-1 第 114 頁第 40 段嘅，主席，114 頁嘅，就係九巴，係大埔公路嘅意外嘅其中一個嘅部分嚟嘅，係 3 月 12 號嘅。

主席：（經傳譯員）冇錯，我哋睇到喇。

陳政龍先生：（經傳譯員）或者我讀一讀出嚟，第 40 段嘅，就係「安全帶」係標題，係呢個調查報告嘅第 5 部分，就係「其他措施可以改善巴士安全」嘅，好，我哋讀出第 40 段嘅。

「九巴就已經係要求呢個嘅供應商就係新巴士喺 2018 年 3 月 5 號採購嘅巴士之中就係都係有安全帶嘅，係一個標準嘅一個設施嚟嘅，而家現有嘅巴士嚟講，如果係有一啲特定嘅路線係需要嘅時候，就係上層嘅巴士上層嘅座位之中就會係逐步咁安裝安全帶嘅。」

所以喺工作小組第一個會議之前，九巴自己就已經係採取行動係去裝置安全帶喺所有嘅所有座位之中，...

主席：（經傳譯員）係所有新巴士。

陳政龍先生：（經傳譯員）係，冇錯，主席，係，唔該晒。我個問題就係九巴而家個情況就係咁，九巴呢個咁樣嘅決定其實有冇影響到工作小組個建議，就係話係建議其他嘅專營巴士公司都係要喺所有嘅座位度安裝安全帶呢？

陳美寶女士：（經傳譯員）首先，我會想講九巴提供嘅報告，2018 年 3 月 12 號收到嘅，係遲過我哋發出電郵，就係 3 月 6 號就係畀所有嘅巴士營運商，就係話畀佢哋聽其實我哋會研究乜嘢嘅措施去改善巴士安全嘅，我哋提供畀委員會其實已經係提供咗相關嘅電郵嘅。

主席：（經傳譯員）冇錯，我哋喺呢點係有爭議，喺 2 月 15 號立法會有討論過呢個問題，佢哋都有傾過關於呢個安全帶嘅，所以其實你嘅議程裏面，你擺上一個

1 咁嘅議程就係唔奇怪，冇問題嘅，呢個冇爭議，個問題就係話九巴其實係工作  
2 小組開會之前佢哋作出咁樣嘅決定，呢個冇冇影響到你哋工作小組嘅建議，就  
3 係話提議其他嘅專營巴士公司，其他或者係所有嘅專營巴士公司都係新嘅巴士  
4 嗰度係有安全帶，冇冇影響嘅呢？

5 陳美寶女士：（經傳譯員）我哋知道九巴有呢一個咁嘅計劃，就話係需要供應商嘅新  
6 嘅巴士有安全帶，但係係工作小組我哋去討論嘅時候，討論關於安全帶嘅時  
7 候，我哋係盡力希望睇下其實嗰個技術可行性、財務方面係點樣樣，同埋道路  
8 安全嗰個方面係點樣樣。

9 主席：（經傳譯員）對唔住，我真係要打斷一下，或者我講得清楚少少，你係睇番個  
10 個嘅可行性，技術嘅可行性，同埋係呢一個關於呢一個對於道路安全同埋乘客  
11 嗰個益處嘅，係咪呀？

12 陳美寶女士：（經傳譯員）係，冇錯。

13 主席：（經傳譯員）好，陳先生。

14 陳政龍先生：（經傳譯員）主席，我就而家係去到關於加裝安全帶方面，...

15 主席：（經傳譯員）好，我哋係做呢樣嘢之前，其實你可唔可以幫一幫委員會，喺呢  
16 一方面，專營巴士或者係九巴其實係大概佔嘅比例係幾多呢？

17 陳美寶女士：（經傳譯員）你嘅意思係巴士嘅數目，係咪呀？

18 主席：（經傳譯員）係，巴士嘅數目，佔幾多？大概係四千，係咪呀？

19 陳美寶女士：（經傳譯員）係。

20 主席：（經傳譯員）大概係三分之二，即係六千部之中，四千元係九巴嘅。呢間公司  
21 其實係三分二，擁有香港嘅巴士車隊，佢就係決定係新巴士裏面係裝置安全  
22 帶，其餘三分之一，你就話被悉到呢個九巴嘅決定嘅，係咪？

23 陳美寶女士：（經傳譯員）係。

24 主席：（經傳譯員）好，或者我哋而家小休二十分鐘。

25  
26 上午 11 時 32 分聆訊押後

27  
28 上午 11 時 54 分恢復聆訊

29 出席人士如前。

1 主席：（經傳譯員）陳律師。

2 陳政龍先生：（經傳譯員）主席，而家我想講加裝安全帶嘅問題，我首先係講番工作  
3 小組有關嘅段落，我係會讀多啲段落出嚟嘅，因為我發現加裝呢個問題係比較  
4 複雜嘅，為咗對工作小組嘅分析公道，我係會係全部讀幾段出嚟，首先請大家  
5 睇 3.8 段，係工作小組報告，內部頁碼 26，聽證會號碼係 TD-5 文件 1786  
6 頁，主席，似乎個個屏幕有少少問題--而家有喇。

7 主席：（經傳譯員）解決咗未呀？

8 陳政龍先生：（經傳譯員）係，解決咗。陳女士，你睇唔睇到 3.8 段呀？

9 陳美寶女士：Yes.

10 陳政龍先生：（經傳譯員）我而家係會將佢讀出嚟，亦都會讀出 3.9、3.10，然而  
11 就會停一停，到時我會係講幾句嘅，不過首先我讀咗先。

12 3.8，佢嘅部分就係話嚟現有專營巴士上加裝安全帶呢一部分嘅，佢就係咁  
13 講，而家個問題就係講加裝上層嘅安全帶嘅，3.8 係咁講嘅「就算係喺上層所  
14 有乘客座位加裝安全帶係技術上可行都好，都有其他嘅影響嘅，首先，我哋認  
15 為巴士嘅重量係會增加 300 至 400 公斤，而載客嘅容量可能會減少七至八位乘  
16 客，因為係要將佢改裝；仲有加裝同埋測試嘅工作，喺每一架專營巴士嚟講，  
17 都要需要好多嘅時間，因此亦都會係影響喺呢一個程序當中巴士嘅操作同埋巴  
18 士可用率嘅。同埋睇下仲有冇呢一啲嘅人力，ADL 同富豪就話係需要一個星  
19 期，每一架巴士一個星期，仲要三至四個有技能嘅技工嘅，但係因為巴士廠就  
20 話佢哋冇咁樣嘅地方係可以做呢啲加裝嘅工作，公營巴士嘅公司就要自己用自  
21 己嘅工場嘅地方同埋自己請承辦商去做，因此有冇咁樣有技能技工同埋工場有  
22 冇地方就會係一啲好重要嘅考慮。基於一個比較粗略嘅估計，係可能需要六至  
23 十二年嘅時間，將全部三千三百架巴士加裝上層安全帶嘅。」

24 3.9 段，「因此有一啲嘅巴士營辦商就係表達咗一啲關注，就話加裝安全  
25 帶唔單只係令到佢哋財務上有負擔，甚至喺時間同埋人力方面都係好可觀  
26 嘅，仲要就係可能要重新調配或者係購置新嘅、額外嘅巴士令到喺整個程序當  
27 中都有足夠嘅巴士服務嘅。」

28 好喇，講到呢一度，我停一停，喺註腳 10 個度就係講到有關嘅財務負擔  
29 嘅，佢就係咁講，「我哋未詳細去研究呢一啲技術上嘅細節之中，我哋係假設  
30 一架巴士如果係要做呢個加裝就要 20 萬港元嘅，仲未計人力同埋係一啲間接嘅  
31 費用嘅。」因此講到成本個方面，喺個分析嘅時候，你係睇緊成香港六億元  
32 嘅，咁樣先可以係六年到十二年做晒所有嘅加裝，我咁樣講係咪正確呢？

33 陳美寶女士：（經傳譯員）正確，粗略嘅估計係咁。

34 陳政龍先生：（經傳譯員）或者而家我繼續去讀，...

1 主席：（經傳譯員）你再讀之前，咩嘢意思就係話人力同埋間接費用係唔包括呢？咩  
2 嘢意思呢？

3 陳英傑先生：（經傳譯員）主席，或者我答呢個問題，喺呢一個註腳嗰度講嘅成本就  
4 只係包括巴士製造商嘅器材同埋嗰個加裝嘅安全帶嗰度佢哋報價，其他嘅費用  
5 或者係人力仲未包括在內嘅，因此我哋係咁講。

6 主席：（經傳譯員）即係話譬如話要有啲工程師，佢哋係要加裝呢一啲嘅安全帶，即  
7 係話工程師嘅費用未加落去？

8 陳英傑先生：（經傳譯員）係，冇錯。因為當時係未能夠係估計嘅。

9 主席：（經傳譯員）咩嘢叫做間接嘅費用？係咪即係話譬如話架巴士可能成個禮拜唔  
10 用得呀咁？

11 陳英傑先生：（經傳譯員）有可能係包括你要租個工場嘅地方。

12 主席：（經傳譯員）仲有架巴士喺嗰個禮拜係唔用得㗎嘛？

13 陳英傑先生：（經傳譯員）係呀，都未計算喺呢一度嘅。

14 主席：（經傳譯員）嗰個就係額外嘅成本㗎喇？

15 陳英傑先生：That's correct.

16 主席：（經傳譯員）所以呢一個總體嘅數字話 6 億，其實仲有其他嘅成本係未包括在  
17 內嘅？

18 陳英傑先生：（經傳譯員）冇錯。

19 陳政龍先生：（經傳譯員）跟住第 3.10 段，「喺呢一方面，所有嘅巴士公司都係話  
20 由佢哋每日嘅觀察，坐喺冇遮閉嘅座位嘅乘客通常都唔會戴安全帶嘅，如果係  
21 咁嘅情況嘅話，似乎加裝安全帶就唔係符合成本效益喇。」喺呢一度停一停，  
22 我想跟進一點。

23 「另一方面，佢哋覺得應該加強公眾教育去鼓勵喺巴士上配戴安全帶，喺五  
24 個專營巴士公司㗎講，九巴同龍運強調佢哋就住新嘅巴士係支持安裝安全帶  
25 嘅，亦都要睇下巴士廠商嘅建議，九巴、龍運就會喺上層嘅座位加裝安全帶，  
26 又或者係如果有一啲係行公路嘅路線，長途嘅路線，係中段站好少嘅話，亦都  
27 可以喺所有嘅乘客座位加裝安全帶，其餘嘅三間巴士公司，即係城巴、新巴、  
28 大嶼山巴士公司就唔支持加裝呢一個建議嘅，係因為使用率好低喇預期，同埋  
29 係加裝嘅費用高昂，要求政府如果係要加裝呢個建議實施嘅話，係提供津貼  
30 嘅。」

31 停一停，睇番呢一段，係講到巴士公司嘅意見，佢哋話喺冇遮閉嘅座位嘅乘  
32 客嗰度，其實一般都唔戴安全帶，佢哋預期個使用率係好低嘅，係咪喺工作小

1 組嗰時開會都同巴士公司討論呢一點呢？

2 陳美寶女士：（經傳譯員）係嘅。

3 陳政龍先生：（經傳譯員）委員會聽過警方嘅證據，而警方嘅代表，即係總警司  
4 Baker 佢都係話預期大部分嘅人都會用安全帶嘅。主席，就住呢一個證據、證  
5 供，可以講番係喺膳本個度嘅第 17 日嘅聽證會，9 月 24 號 2018 年，第 48 頁  
6 20 行同埋第 50 頁 13 行，據我理解，仲有一個做法，就話只係上層安裝安全  
7 帶，同埋只係喺長途車，行公路嘅路線，冇乜站先至安裝安全帶。

8 呢一個就喺 3.13 嗰段有提到嘅，「結論同埋未來嘅工作」，呢度係咁講  
9 嘅，「考慮到喺香港嘅專營巴士嘅營運狀況都係喺市內巴士，亦都係有企位，  
10 同埋喺現有嘅巴士加裝安全帶嘅技術可行性、費用同埋所需時間，工作小組認  
11 為係理據不足去令到所有嘅巴士係強制安裝座位嘅安全帶。」

12 我停一停，我唔知道係咪有打錯字㗎，定話係語言嘅問題，因為我理解工作  
13 小組係有就住新巴士建議所有座位安裝安全帶嘅，呢度就話所有巴士，如果係  
14 要強制安裝安全帶嘅話，就理據不足，係咪有啲搞錯呢？

15 陳美寶女士：（經傳譯員）我可以澄清一下嘅，首先，對於新嘅購置嘅巴士，工作小  
16 組嘅建議就係所有新嘅巴士都係所有乘客座位都安裝安全帶嘅，工作小組嘅建  
17 議就認為如果係話全部巴士，我哋有一個法定要求或者強制要求要所有巴士，  
18 包括新購置巴士同埋現有嘅巴士都係所有乘客座位要加裝安全帶嘅話，就理據  
19 不足嘅。我哋咁樣講嘅時候，我哋係明白好多問題，嗰啲問題仲需要仔細考慮  
20 去評估嘅，譬如話係安全帶。

21 陳政龍先生：（經傳譯員）所以呢度有個分別，就係話呢個係一個專營巴士嘅協議嘅  
22 要求，同埋法定嘅要求，啱唔啱？

23 陳美寶女士：（經傳譯員）呢個第一個分別，另外就係話所有巴士㗎，定係所有新嘅  
24 巴士。

25 陳政龍先生：（經傳譯員）多謝你嘅澄清，我再繼續讀呢一段，「然而工作小組亦都  
26 承認喺有遮閉座位同埋係巴士車廂係有企位嘅情況下，安全帶係會為坐低嘅  
27 乘客提供額外保障，所以工作小組亦都建議，而所有公司亦都同意現有巴士加  
28 裝安全帶呢個可行性係要进一步考慮嘅。視乎技術性、操作上同埋財政上嘅可  
29 行性嘅評估，當局應該考慮喺有啲巴士係指派行某一啲嘅路線，譬如話係長途  
30 巴士，係行公路，比較少中途站嘅，上層嘅所有座位都應該加裝安全帶。」

31 睇下個附註，佢就畀咗啲公路嘅例子，呢個係第 11 號--第 12 號嘅附註，  
32 就係話根據巴士公司，似乎牽涉嘅巴士嘅數目會減低，就大概係二千。

33 咁樣講啱唔啱呢？呢一個數字都係一個粗略估算㗎嘅，啱唔啱呀？就即係 4  
34 億港元，稍為超過 4 億港元。

1 陳美寶女士：（經傳譯員）係嘅。

2 陳政龍先生：（經傳譯員）講番轉頭，我頭先讀過嘅段落，即係話如果加裝安全帶似  
3 乎唔符合成本效益，當大家講到符合成本效益嘅時候，係咪相比加裝安全帶為  
4 乘客嚟嘅益處而言呀？

5 陳美寶女士：（經傳譯員）冇錯。

6 陳政龍先生：（經傳譯員）陳女士都有提過，因為運輸署冇就呢一方面，即係安全帶  
7 嘅效益做一個成本效益研究，你點樣去評估成本效益呢？

8 陳美寶女士：（經傳譯員）對於現有巴士加裝安全帶似乎唔符合成本效益，呢句說話  
9 就係有以下考慮嘅，首先，我哋留意到唔係所有現有巴士嘅型號都係適合加裝  
10 安全帶嘅；第二，有啲巴士型號適合加裝安全帶嘅技術上，但係喺下層都加裝  
11 安全帶嘅話，就會對於巴士嘅結構同埋運作有影響；第三，我哋亦都留意到運  
12 作上嘅影響，譬如話時間、所需嘅人手，如果話係要喺工場嗰度加裝嘅話，呢  
13 樣嘢亦都會影響專營巴士可以調配嘅巴士嘅數目嘅。考慮到呢啲情況，工作小  
14 組係仔細考慮過，亦都有同巴士公司商討嘅，正如資深大律師亦都提到喺 3.13  
15 段、3.14 段，係基於咁嘅原因，而巴士公司亦都同意現有巴士加裝安全帶呢件  
16 事係要進一步去研究嘅。

17 所以回答番你嘅問題，呢句說話話似乎唔符合成本效益係有經過一啲可以量  
18 化同埋穩健嘅成本效益分析，但係我哋有要求巴士公司要進一步評估操作上同  
19 埋財務上嘅可行性，我哋先會進一步考慮到底喺上層可唔可以加裝安全帶，如  
20 果係嘅話，對於係行走公路嘅長途巴士路線，中途比較少巴士站嘅，會唔會係  
21 有比高嘅機會咁樣做呢，因為乘客係有咁頻密要上車、落車嘅，而係根據咁嘅  
22 基礎，係有較大機會使用安全帶嘅。

23 主席：（經傳譯員）你意思係嗰個使用率會高啲，係咪呀？

24 陳美寶女士：（經傳譯員）冇錯，主席。

25 陳政龍先生：（經傳譯員）你都提過話需要更多嘅評估，Stanley 教授同埋  
26 Weston 教授都有一啲建議嘅，我讀咗佢哋嘅證供之後，再邀請你去回應一下，  
27 你覺得呢個方法係咪可行。而家請你睇番 Stanley 教授嘅證供嘅謄本，就係  
28 2018 年 9 月 15 號，第 124 頁，或者由 123 頁開始講起，畀大家一啲背景資  
29 料，第 123 頁第 20 行，你可以見到個題目就係「所有座位加裝安全帶」。

30 124 頁第 1 行，我就問呢個問題嘅，「喺澳洲市內巴士係咪有要求加裝安  
31 全帶嘅呢？」「冇。」

32 我個問題就話「係咪有原因嘅呢？」Stanley 教授就話「一般嚟講，呢架  
33 車輛本身嘅重量，就會提供足夠嘅保障，而安全帶就唔會提供更多嘅保障，而  
34 且現有嘅車輛加裝安全帶亦都係一個挑戰，成本亦都會增加。

1 我唔知你明唔明，有一樣嘢就叫做係一個條例帶嚟嘅影響嘅一個陳述嘅，譬  
2 如話如果係喺巴士路線，現有嘅，係強制安裝安全帶嘅話，似乎就要去做一個  
3 條例實施嘅影響嘅研究，去睇下咁樣做牽涉嘅成本，同埋亦都要睇下唔同嘅事  
4 故嘅情況嘅唔同嘅機率係咪會減低。然後再計下佢個成本，然後去作為一個  
5 評估嘅基礎嘅。我哋平時就會咁樣做嘅。」

6 而主席跟住就問，「呢個嘅條例影響係咩嘢意思呢？」「通常就會由政府部  
7 門做嘅，喺澳洲就有係國家嘅層面會做好多嘢，譬如係話佢國家嘅交通局，就  
8 係我亦都做咗副主席九年嘅，我哋係有做過唔同嘅車輛研究嘅，唔同方面嘅條  
9 例影響嘅說明嘅。」

10 呢個係其中一段，另外一段都係教授嘅證供，就係第 144 頁，144 頁第 4  
11 行，我問題係話「考慮到啲啲資料，你對於呢個意見，即係話喺所有座位安裝  
12 安全帶，或者第二，淨係喺上層冇企位嘅乘客去安裝安全帶，你嘅觀察係點  
13 呢？」

14 教授就回答話「多謝，呢個係令我要返番去半個鐘頭前提到嘅啲個答案嘅，  
15 我覺得係有兩個層面嘅，第一，就係話喺巴士嘅某啲位置，譬如話係新巴士嘅  
16 上層係技術上係可以安裝安全帶或者係舊嘅巴士去加裝。

17 第二個層面，就係話如果係技術上可行嘅話，呢一個成本效益比率係幾多  
18 呢？即係意思話成本要花幾多，同埋如果安裝咗安全帶之後，啲啲意外嘅種類  
19 發生嘅機率係咪會減低呢？人哋會唔會戴安全帶呢？呢啲問題都係需要回答  
20 嘅。

21 我會講話呢啲問題就係你要係喺條例實施嘅影響嘅評估入面去做嘅，有唔同  
22 呢啲種類呢啲意外發生嘅機率個資料係點樣呢，你亦都可以係就住呢啲意外機  
23 率減低去睇下用金錢去量化計算，然後你亦都可以對於配戴安全帶嘅機率有個  
24 意見，亦都會影響戴安全帶嘅有效性嘅。

25 政府喺決定如果係技術可行嘅話，作為一個政策嘅決定去安裝安全帶都可以  
26 嘅，而咁樣做，你要去先做一個嘅成本效益分析，我覺得喺呢個情況應該咁樣  
27 做嘅，所以我覺得個基礎唔可以係話就咁憑人嘅意見認為應該咁做、應該點樣  
28 做。

29 我哋要考慮好多一啲真實而係有基礎嘅一啲關注，同埋會影響係咪去安裝安  
30 全帶，但係你要做一個恰當嘅成本效益分析先，如果唔係，所有都係猜測嘅。

31 我自己就覺得人哋可能覺得係應該要安裝安全帶，不過呢個冇恰當嘅評估嘅  
32 話，只係一個意見嚟嘅。」

33 「即係話就咁一個嘅感受係唔夠嘅，你要做一個嘅成本效益分析？」

34 「冇錯。」

1 「而咁樣做嘅話，你會睇啲乜嘢情況呢？」

2 「理論上，原則上，就會係非常簡單嘅成本效益分析，而要考慮個機率嘅價  
3 值嘅話，你要做一啲比較嚴肅啲嘅研究，你要睇番你喺唔同嘅收到嘅陳述書入  
4 面已經係提到過嘅。」

5 跟住落嚟嘅證供就問關於澳洲嘅好多嘅資料，我就唔會讀出嚟。另外一段我  
6 想講嘅都係同一點嘅，就係喺第 149 頁第 4 行，Stanley 教授個答案中間，呢  
7 一段開始，第 4 行係講效益嘅。

8 「但係呢個情況就要問係有乜嘢效益，你要睇下呢架車係會發生乜嘢類型嘅  
9 意外，譬如係咪喺企位嘅乘客定座位嘅乘客會有意外，而如果要求戴安全帶嘅  
10 話，呢一類型嘅意外機率係咪會減低幾多，而你要做啲乜嘢去鼓勵大家戴安全  
11 帶呢？」

12 如果係咁樣做嘅話，我就可能係要同心理學家講下你點樣去叫人戴安全帶、  
13 點樣令到人哋去認真處理，我覺得喺香港，而家都係應該要咁樣做嘅，係好重  
14 要嘅就係去考慮到底會發生嘅機率係幾多，我會同——即係話我會考慮發生呢啲  
15 意外之後嗰個成本係幾多，即係話如果香港有致命意外嘅話，牽涉嘅費用係幾  
16 多、個成本係幾多、嚴重受傷嘅意外係幾多，因為你要將呢一啲嘅價值去將佢  
17 轉換去應用喺係某一種嘅意外發生嘅機率減低咗嘅話，個價值係幾多。」即係  
18 解釋咗就點樣去做一個成本效益分析嘅。

19 就我就會睇一睇 Weston 先生喺倫敦嘅情況，然後我就會問一問你點樣睇  
20 佢哋嘅意見。好，我哋而家去睇番去 Weston 先生嘅報告，係呢個專家嘅文件  
21 冊 115 頁，我就想睇一段簡短嘅一段，就係呢一個嘅文件夾嘅第 148 頁，喺文  
22 件裏面就係第 34 頁嚟嘅。

23 陳小姐，第 148 頁，呢個就係「巴士安全標準」嘅，呢個背景就係關於應  
24 該係裝置一啲乜嘢嘅安全裝置，我就會讀下面數上嚟第三段。

25 呢度講話「雖然話呢個新嘅標準就會喺新嘅巴士適用，每一年就有七百部  
26 嘅，我哋亦都係諗緊其實可唔可以喺而家嘅巴士裏面加裝，特別就係而家係中  
27 期嘅時段，就大概係會係需要七年時間去完成嘅。我哋特別要留意就係倫敦運  
28 輸局就係採取一個非常嚴謹嘅措施就去睇番每一個嘅可能性，就用一個成本效  
29 益分析嘅，就會係希望能夠達到就係話每一鎊我哋使咗嘅錢就能夠達成最大嘅  
30 傷亡同埋意外減低嘅效益嘅。」

31 主席：（經傳譯員）呢個係巴士安全嘅標準，我哋睇緊唔同嘅巴士嘅科技嘅。

32 黃女士：（經傳譯員）或者我亦都係為紀錄起見，我都係睇一睇第二段，就係「巴士  
33 安全標準」。

34 「有唔同嘅科技我哋睇緊嘅，包括智慧車速輔助、自動剎車同埋呢一個聲控  
35 同埋影像嘅分析等等，其實都係我哋睇緊嘅，我哋都係設計去睇呢一啲嘅唔同

1 嘅選項，就確保我哋係投資咗幾多錢，我哋應該係能夠攞盡嗰個益處同埋利益  
2 嘅。」

3 因此呢兩個嘅專家嘅報告話畀我哋聽其實佢哋都有做--喺兩個唔同嘅司法  
4 管轄區都做一啲好嚴謹嘅成本效益分析嘅，我希望運輸署特別去睇一睇呢一個  
5 咁樣嘅方法，就特別喺專營巴士裏面加裝安全帶，會唔會係做同類嘅嘢呢？

6 陳美寶女士：（經傳譯員）第一位專家嘅供詞，佢就講到個規管影響研究，就佢認為  
7 係需要嘅，如果我哋係要強制係要加裝或者安裝安全帶嘅時候，就需要嘅，喺  
8 呢一個 Weston 先生，倫敦，佢就講到係成本效益分析，運輸署嘅睇法就係我  
9 哋同意喺車上面係安裝一啲嘅裝置去改善巴士安全標準，我哋係需要有一個嚴  
10 謹同埋小心嘅評估，或者我哋所用嘅字眼係同佢哋唔相同嘅，同嗰個專家，譬  
11 如話規管影響研究或者成本效益分析，可能我哋用嘅字眼唔同，但係工作小組  
12 嘅觀察同埋佢考慮就係話我哋都係需要進一步去探討個可行性同埋嗰個運作上  
13 嘅影響、財務嘅承擔等等，係就住--即係話就住加裝或者安裝安全帶。換句話  
14 嚟講，我哋都係睇緊用一個更有系統嘅方法，更全面嘅方法去睇呢一個嘅課  
15 題。

16 主席較早前都提出，喺第 3.13、3.14 段，喺呢個工作小組嘅報告裏面，  
17 我哋可能有講過話就係將成本同埋效益嚟作一個對比，但係我哋都係前瞻嘅，  
18 前瞻嘅，當我哋再去推進呢個項嘅時候，我同意我哋係需要睇番喺操作技術同  
19 埋財務方面嘅承擔同埋睇番我哋嗰個嘅效益係點。

20 我哋而家喺現有嘅巴士加裝安全帶似乎唔係咁符合成本效益，我哋亦都考慮  
21 過幾個因素，所以其實係咪應該成為一個強制或者法定嘅規定，抑或要求特別  
22 係喺目前現有巴士上層加裝安全帶，我哋真係要去認真去睇下究竟我哋係有乜  
23 嘢額外嘅成本或者額外嘅效益，特別係我哋亦都係睇番成本同埋個技術嘅可行  
24 性。

25 專家提過，如果我哋係需要有個強制嘅要求嘅時候，我哋需要係進行一啲成  
26 本效益分析或者係做一啲影響嘅研究。唔該晒。

27 陳政龍先生：（經傳譯員）又或者 Stanley 教授或者 Weston 先生嘅報告都有提  
28 到，就話有啲科學嘅、量化嘅一啲嘅效益，如果我哋真係要加裝安全帶，我哋  
29 需唔需要做呢啲嘢呢？你同唔同意呢？

30 陳英傑先生：（經傳譯員）我同意嘅。我哋需要做好多嘅工作嘅。專營巴士喺香港，  
31 我哋暫時都未有呢啲嘅裝置，所以其實喺呢方面，我哋都係好難收集數據，但  
32 係我哋都可以係研究海外嘅經驗，作進一步嘅分析，特別係基於嗰啲意外嘅數  
33 據、其他嘅車輛嘅意外數據，但係我哋要考慮到佢哋唔係雙層嘅車輛。我哋需  
34 要為乘客提供保護，我哋亦都要考慮呢一點，去決定究竟我哋要唔要求或者係  
35 需唔需要進一步考慮喺上層去加裝安全帶嘅。

36 陳政龍先生：（經傳譯員）主席，我就想去另外一個嘅課題，就係關於巴士意外數

1 據。

2 主席：（經傳譯員）喺做呢個之前，我又自己都有幾個問題想問一問嘅，你有冇去搜  
3 集一啲數據，就係關於安全帶，如果有啲安全帶，佢哋嘅使用率係點樣呢？  
4 即係講緊啲專營巴士嘅安全帶。

5 陳美寶女士：（經傳譯員）冇，主席，冇。

6 主席：（經傳譯員）點解冇呢？

7 陳美寶女士：（經傳譯員）對唔住，我有答案。

8 主席：（經傳譯員）你有冇打算將來會收集呢啲數據？

9 陳美寶女士：（經傳譯員）我會咁樣做嘅。我想補充，就係我哋亦都留意到係巴士營  
10 運商嘅工作小組嘅時候，佢哋亦都畀過一啲意見，佢哋傾向於認為就係嗰個使  
11 用率都係好低嘅，我哋知道有咁嘅意見，而家個使用率係相對較低嘅，但係呢  
12 個唔係一個我哋應該關鍵去考慮嘅因素，當我哋去考慮就應唔應該喺現有巴士  
13 裏面加裝安全帶，因為我哋認為無論係政府或者係巴士公司，應該係做多啲乘  
14 客教育嘅。

15 主席：（經傳譯員）我哋 Mr Samuel Cheng 先生，城巴嘅董事總經理，佢喺作供  
16 嘅時候，佢就話佢係--佢自己都成日搭巴士，但係安全帶係啲人係唔多用嘅，  
17 你覺得呢個係咪一個公道嘅講法呢？就係有人用或者係一個使用率係好低。

18 陳美寶女士：（經傳譯員）我有知道佢嘅證供係咁嘅，但係其他嘅巴士公司或者佢哋  
19 嘅員工，佢哋個個講法係唔一樣嘅。

20 主席：（經傳譯員）佢話佢成日都搭巴士嘅。

21 陳美寶女士：（經傳譯員）主席，我係接受佢嘅證供，但係我自己都成日搭巴士嘅。

22 主席：（經傳譯員）但係你有冇發現啲人係就會配戴安全帶呢？

23 陳美寶女士：（經傳譯員）我自己會戴嘅。

24 主席：（經傳譯員）其他呢，其他人呢？你自己之外。

25 陳美寶女士：（經傳譯員）其實其他有啲人鍾意喺啲有遮擋嘅座位嗰度坐，譬如話上  
26 層嘅頭一排，我自己個人嘅經驗，我就見到啲人係有用--有配戴安全帶。

27 主席：（經傳譯員）其實如果我哋叫巴士公司用閉路電視睇下啲人有冇用安全帶，其  
28 實會唔會好簡單？譬如特別係呢一個上層嘅乘客。

29 陳美寶女士：（經傳譯員）呢個係一個好嘅建議嚟嘅。如果我哋安裝閉路電視，其實  
30 而家已經有百分之八十嘅巴士就有閉路電視，有啲就喺上層安裝嘅，我覺得你  
31 呢個建議係好嘅。

1 主席：（經傳譯員）你計唔計劃會強制--如果有啲人--有啲巴士已經安裝咗安全  
2 帶，強制啲乘客一定要配戴呢？

3 陳美寶女士：（經傳譯員）呢個正正係我想係提出嘅一點，我係同意專家嘅觀察，我  
4 哋係需要有一個嚴謹嘅規管影響研究，先至決定係咪應該係強制啲人一定係要  
5 配戴安全帶。

6 主席：（經傳譯員）你有冇考慮過如果係要強制乘客配戴安全帶係會有咩困難呢？  
7 我哋上高冇其他嘅人手，只係有個車長喺度，會唔會真係有困難呢？如果有個  
8 強制嘅要求。

9 陳美寶女士：（經傳譯員）我唔會低估嗰個困難嘅，特別係實際喺營運嘅當中，特別  
10 係話點樣去執法，我哋肯定會考慮呢一點嘅，如果我哋特別去係審視喺所有巴  
11 士裏面安裝安全帶嘅時候。唔該晒。

12 歐陽先生：（經傳譯員）關於教育嗰方面呢？

13 主席：（經傳譯員）歐陽先生，係。

14 歐陽先生：（經傳譯員）呢一個運輸署有冇方法點樣去更加去教育乘客同埋鼓勵佢哋  
15 去做安全帶？

16 陳美寶女士：（經傳譯員）其實呢個我哋可以做得更多嘅，我哋希望有個乘客嘅宣傳  
17 運動，亦都係會有唔同嘅主題，關於佢哋嘅態度、佢哋嘅責任，特別佢哋喺公  
18 交嘅時候、坐車嘅時候佢哋應該點樣做，關於安全帶點樣使用，如果真係有安  
19 全帶嘅時候，佢哋應該使用。呢個肯定我哋係需要做多啲宣傳嘅。唔該。

20 陳政龍先生：（經傳譯員）如果係一個強制嘅要求，如果真係有已經安裝咗安全帶，  
21 強制要求佢哋配戴，呢個會唔會成為你哋嘅工作其中一個部分呢？你曾經喺呢  
22 個小巴做過嘅，你可唔可以睇下啲經驗係點？

23 陳美寶女士：（經傳譯員）係有幫助嘅，但係嗰個執法同埋個影響都要考慮嘅。我哋  
24 係要執法嘅，同埋個巴士公司係應該去落實嘅，如果真係要成為呢個強制規定  
25 嘅時候，我哋係要考慮呢啲。

26 陳政龍先生：（經傳譯員）我哋之前又睇過一啲嘅證供，我就唔吵，你可唔可以話畀  
27 我聽其實喺香港嘅法例嚟講，喺小巴裏面強制啲乘客去戴安全帶係咪有強制嘅  
28 規定㗎？

29 陳美寶女士：（經傳譯員）係嘅，係嘅。我哋可以係去搵番啲資料。

30 主席：（經傳譯員）其實我哋都有呢啲資料，我哋都聽過一啲證供嘅。總警司  
31 Baker 先生，你就話畀我哋聽其實你都--如果專營巴士要--即係你即係個使用  
32 率係非常之低，喺公共小巴裏面嘅使用率都係好低，其實喺執法嚟，都係好難  
33 嘅，可能係分--即係某一個時期特別去執法咁樣。

1 陳美寶女士：（經傳譯員）我想補充，我知道佢個證供嘅，其實呢個永遠都係一個  
2 雞同雞蛋嘅問題，如果我哋要考慮任何嘅安全裝置，我哋係令到佢係一個強制  
3 性嘅措施，如果我哋係要將呢個建議提交立法會嘅時候，政府一直嘅做法就係  
4 會係將我哋嘅影響嘅評估嘅資料都係提交畀立法會嘅，喺立法之前，我哋好多  
5 時候都係需要提交一啲嘅數字、數據去支持我哋嘅建議。

6 另外一點，我哋嘅立法會議員都會問，就係究竟執法係咪可行呢？但係一旦  
7 立法，就係運輸署或者其他嘅執法部門就會盡我哋嘅努力去確保啲立法嘅、  
8 啲咁法例嘅規定係真係可以盡力去落實嘅。唔該晒。

9 主席：（經傳譯員）你之前講過，如果我有記錯，如果配戴係要一個強制嘅規定，可  
10 能係需要巴士公司去執法，係咪去落實佢呢？

11 陳美寶女士：（經傳譯員）開始嘅時候，巴士車長就會係乘客嘅第一個嘅接觸點，就  
12 係話畀巴士乘客聽相關嘅資料，如果已經係立法喇，永遠都係啲咁執法機構嘅  
13 責任去執法嘅，如果佢哋係收到投訴又或者佢哋係知道有違法嘅情況，佢哋嘅  
14 責任係去執法嘅。

15 主席：（經傳譯員）點解我提出呢一點呢？因為巴士公司嘅證供話畀我哋聽，其實佢  
16 哋真係做唔到，只係有一個巴士司機，有好多嘅乘客喺巴士上面，亦都係巴士  
17 有兩層。

18 陳美寶女士：（經傳譯員）主席，我哋知道，亦都明白巴士車長嘅困難同埋佢嘅壓  
19 力，如果我哋真係要強制咁樣做，我哋要確保個法例寫到一個地步，其實呢個  
20 條例係可以執行到嘅。同樣，我哋可能亦都係要令到巴士嘅營運者就係確保啲  
21 啲安全帶就係會被乘客去配戴嘅。閉路電視同埋宣傳計劃都可以考慮嘅，但係  
22 喺呢一個階段，我哋唔會掉以輕心，其實而家我哋都未係話可以好快令到呢一  
23 個係強制性嘅，所以我哋係好謹慎進行。

24 主席：（經傳譯員）好，陳律師。

25 陳政龍先生：（經傳譯員）好，我而家講下一個嘅課題，就係巴士意外嘅數據。首  
26 先，我要處理一下現時嘅狀況先嘅，我哋睇咗啲咁係所謂 FPP，即係前瞻性策  
27 劃嘅計劃嘅關於巴士安全啲咁嘅部分，我唔會再講，但係啲度係有好多關於巴  
28 士意外嘅數據喺啲咁個部分嘅，我亦都聽到警方嘅證供，就係話警方係並不能接  
29 觸到巴士安全報告裏面嘅一啲數據嘅。主席，警方嘅證供就係第 17 日，第 19  
30 頁嘅，我唔會真係要詳細讀出嚟。

31 主席：（經傳譯員）呢個係總警司 Baker 嘅證供。

32 黃女士：（經傳譯員）陳女士，我個問題係咁嘅，喺公眾得到呢一啲數據之前，即係  
33 話你未將呢一啲數據交畀委員會，因此公眾得到呢啲數據之前，請問呢一啲嘅  
34 分析數據有冇向大眾公布過呢？

35 陳美寶女士：（經傳譯員）我會答先，然後我會請我嘅同事補充嘅。基於我自己嘅知

1 識同埋記憶，我哋係有叫專營巴士公司進一步披露佢哋嘅意外嘅數據，我哋就  
2 係請佢哋每年咁樣做。

3 主席：（經傳譯員）你係幾時作出呢個要求呢？

4 陳美寶女士：（經傳譯員）等我哋查核一下先。可能我哋只能夠講個一個年份，我哋  
5 係將佢作為一個續牌嘅要求。根據我嘅同事所講，就已經好多年㗎喇。

6 主席：（經傳譯員）即係呢一個係續牌嘅要求嚟嘅？

7 陳美寶女士：（經傳譯員）係呀。

8 陳政龍先生：（經傳譯員）你意思係將個數據交畀運輸署？但係我頭先個問題係講  
9 話要向公眾披露有關嘅數據㗎。

10 陳美寶女士：（經傳譯員）或者我詳細講一下，或者--有喇，係咪呀？而家喺屏幕上  
11 面係有新巴 2017 年話佢更全面披露嘅一份文件，或者我哋睇關於個頁底個部  
12 分，再繼續向下，第 13 項。呢個唔係我真係想舉嘅例子，或者我遲啲再畀城巴  
13 2017 更全面披露嘅一份文件畀大家，我遲啲畀一個頁碼大家。

14 主席：（經傳譯員）其實喺我哋啲聆訊文件裏面有嘅，喺邊度呢？

15 陳政龍先生：（經傳譯員）畀少少時間我哋搵一搵。文件喺 TD-3 第 906 頁，陳女  
16 士，你係咪想搵呢份文件？

17 陳美寶女士：（經傳譯員）係。

18 主席：（經傳譯員）係邊一頁呢？如果你有原本啲份文件啲個內部嘅頁碼係幾多呢？

19 陳政龍先生：（經傳譯員）喺左上同左右都有一啲嘅文件嘅編頁嘅。

20 陳美寶女士：（經傳譯員）但係喺底部我哋係睇到 909 呢一頁。我想講嘅就係巴士  
21 營辦商喺佢哋更全面披露呢一種嘅報告裏面就係會將意外嘅數據公布畀公眾  
22 嘅，但係我都要指出啲數據嘅描述未必係可以去到比較深嘅層次嘅，因為如  
23 果個情況係需要嘅話，我哋係會請佢哋更加詳細咁樣去分析，講出個意外嘅原  
24 因，但係呢一啲咁樣嘅就係意外嘅數據，就係我哋要求佢哋喺全面披露報告裏  
25 面公布畀公眾嘅。

26 主席：（經傳譯員）你係咪睇緊第 13 段呀？

27 陳美寶女士：（經傳譯員）係，第 13 項。

28 主席：（經傳譯員）你有冇網上睇倫敦方面啲個意外數據嘅報告呀？

29 陳美寶女士：I have. It's more...

30 主席：（經傳譯員）你有冇見到佢哋其實每季都提供一啲粗略嘅數字，香港點解唔可  
31 以咁做呢？

1 陳美寶女士：（經傳譯員）主席，之前嗰啲前瞻性嘅策劃報告，即係我哋喺 5 月嘅時  
2 候提交畀委員會嗰啲，我個人認為有好多嘅範疇其實都可以改善嘅，即係喺  
3 2019 同埋 2023 年嘅時候，我哋再做呢一啲遠期計劃嘅時候，就好似我哋提議  
4 過，會請佢哋係進一步做多啲分析嘅，肯定我哋係可以進一步要求巴士營辦商  
5 以更詳細嘅方式將意外嘅數據係公布畀公眾人士嘅。

6 主席：（經傳譯員）有冇咩嘢嘅原因係我哋喺呢啲遠期計劃裏面睇到嘅意外數據點解  
7 唔可以全面披露畀公眾呢？有冇咩嘢理由嘅呢？

8 陳美寶女士：（經傳譯員）好明顯，我哋仲未同巴士營辦商詳細去傾，就係話呢一類  
9 咁樣嘅安全數據可唔可以全面披露，我只係想指出...

10 主席：（經傳譯員）你諗唔諗到啲咩嘢原因呀？點解唔可以全面披露？呢啲唔係商業  
11 性嘅敏感資料㗎嘅。

12 陳美寶女士：（經傳譯員）一般嚟講，唔會話有即時嘅商業敏感性，...

13 主席：（經傳譯員）唔緊要，你要多啲時間諗，你可以諗嘅，但係我自己就覺得好簡  
14 單啫，應該唔會有咩嘢商業嘅敏感性而因此係唔可以向公眾披露。

15 陳美寶女士：（經傳譯員）我只係想強調一點，當我哋請專營巴士營辦商提供多啲嘅  
16 資料去做遠期計劃，而唔係因為要全面披露嘅理由，我哋仲未係去叫巴士營辦  
17 商去分析每一條巴士路線嘅意外原因嘅，即係我哋冇具體咁樣要求。我唔係話  
18 呢樣嘢會有商業敏感性，但係我哋都要明白如果呢一個巴士安全嘅章節都要變  
19 成全面披露嘅資料嘅話，我哋都要由商業敏感性呢一個角度去考慮佢。

20 主席：（經傳譯員）你又諗到啲乜嘢嘅商業敏感性嘅角度呢？我而家就邀請你咁做，  
21 有啲乜嘢係會有商業敏感性嘅呢？呢個只係講巴士安全嘅章節啫。

22 陳美寶女士：（經傳譯員）我只係理論上咁樣去思考一下啫而家，主席，因為巴士公  
23 司都需要詳細講出一啲嘅計劃去加強巴士安全同埋佢哋會採取咩嘢措施，巴士  
24 嘅營辦商有可能對於某啲具體嘅措施係講明需要用幾多錢同埋會講實施某一個  
25 具體措施，喺未來五年嗰個時間性嘅，即係亦都會講到佢哋成間公司喺呢一方  
26 面要做幾多投資嘅。

27 主席：（經傳譯員）你意思係巴士安全嗰個章節？

28 陳美寶女士：Yes.

29 主席：（經傳譯員）如果係咁，或者陳律師，一陣間你可以帶我哋去睇嗰個章節，去  
30 睇下係咪有咁嘅情況。我一般嘅問題就係話究竟係咪真係喺呢一啲數據裏面有  
31 任何嘅商業敏感性？我就要問呢個問題。陳律師，請你一陣間返嚟處理呢個問  
32 題。

33 陳政龍先生：（經傳譯員）好呀，我喺食晏之後會處理呢一點。

1 主席：（經傳譯員）當我哋講緊呢一個題目嘅時候，我想問下有冇咩嘢嘅理由，點解  
2 呢一個巴士安全嘅章節亦都唔可以披露畀警方呢？因為警方就話如果收到，佢  
3 哋會好高興，點解連警方都收唔到呢？

4 陳美寶女士：（經傳譯員）主席，我就睇唔到有咩嘢嘅困難嘅，如果要提供呢一啲數  
5 據同警方分享嘅話，應該有咩嘢困難嘅，呢樣嘢我哋係可以考慮嘅。

6 主席：（經傳譯員）即係你只可以考慮，你唔可以話一定得呀？

7 陳美寶女士：（經傳譯員）我諗喺而家我哋可以講嘅只係話考慮。

8 主席：（經傳譯員）即係你係可以同佢哋討論，係咪？

9 陳美寶女士：（經傳譯員）係。

10 主席：（經傳譯員）唔該。

11 陳美寶女士：（經傳譯員）或者我想講，因為呢一個巴士安全嘅章節係以遠期計劃嘅  
12 其中一部分交畀運輸署嘅，除咗係畀好多詳細嘅分析之外，其實有一個目標就  
13 係要讓巴士營辦商話畀政府聽佢哋嘅遠期計劃裏面有啲乜嘢嘅投資、佢哋嘅策  
14 劃等，所以喺呢一方面，我要小心啲，我喺呢一方面，我唔能夠為政府承諾任  
15 何一個章節會有咩嘢具體嘅披露嘅，好似我剛才回答主席，呢一個巴士安全嘅  
16 章節如果要同警方去分享，我哋只能夠話我哋可以考慮。

17 主席：（經傳譯員）我咁樣講啱唔啱呢？陳律師，我記得 Weston 先生就建議，就話  
18 有關嘅數據要向公眾披露。

19 陳政龍先生：（經傳譯員）係嘅，啱嘅。

20 主席：（經傳譯員）或者喺食晏之後，你亦都可以返嚟講番呢一點。

21 陳政龍先生：（經傳譯員）係，之後我哋會講有關嘅建議嘅。好，而家我哋再集中睇  
22 一睇現時嘅情況，然後睇下將來嘅情況可以係點樣。喺星期四嘅聆訊當中，運  
23 輸署喺聆訊當中提供咗一份文件，就係話交通意外嘅成因嘅，就係喺右手面上  
24 角就寫住“E”嘅附件嘅。

25 照我所知，呢一份文件仲未納入我哋嘅聆訊文件冊當中嘅。主席，而家都喺  
26 屏幕上面，請問你有冇自己一份呢，主席？而家向大家派發一個副本嘅。

27 我講一講個背景先，呢一份文件係一封信裏面嘅一部分，就係運輸署畀九巴  
28 嘅一封信件，係 2018 年 5 月 21 號嘅，就係請九巴提出佢哋對意外嘅分析嘅，  
29 為咗膳本嘅利益，呢一個嘅膳本嘅頁碼就係 TD-5 1728 頁。我個問題好簡單，  
30 咁樣嘅一個表有冇向公眾披露過呢，係好有系統、好定期咁樣，以一個咁樣嘅  
31 表列嘅公眾公布過呢一啲嘅資料呢？

32 陳美寶女士：（經傳譯員）冇。

1 陳政龍先生：（經傳譯員）我要對你公道嘅，我知道運輸署係有發布--即係喺網上，  
2 每年發布道路交通意外嘅一啲資料，個資料亦都包括專營巴士嘅，我只不過係  
3 想問下有冇好似咁詳細咁樣公布呢？

4 陳美寶女士：（經傳譯員）冇嘅，冇咁詳細咁樣公布。

5 陳政龍先生：（經傳譯員）陳女士，我哋未講個建議同埋將來嘅情況可以點之前，首  
6 先，我想確立一下呢一啲意外嘅數字，由專營巴士營辦商交界運輸署...

7 主席：（經傳譯員）你未講呢一點之前，我想睇番 E 附件呢一度，我哋聽到有好多嘅  
8 意外，其實都係關乎到啲人係喺巴士上面失去平衡嘅，呢一度有啲乜嘢係巴士  
9 車長嘅駕駛態度係同呢一度有關--呢一樣嘢有關嘅呢？請你睇一睇呢個表。

10 我咁樣問係因為當我睇到話係好疏忽咁樣開動或者係剎車，同埋係好重咁樣  
11 剎車或者係突然間好快咁加速，似乎嗰啲事件嘅數字係好細嘅，究竟係有啲乜  
12 嘢嘅原因係令到巴士乘客失去平衡呢？

13 陳英傑先生：（經傳譯員）主席，講番呢一個表，我想逐一項咁樣講，...

14 主席：（經傳譯員）你等一等。你講咗啲比較重要嘅先，然後由最重講到最唔重要。

15 陳英傑先生：（經傳譯員）我會覺得係停車或者開動架車係疏忽嘅。

16 主席：（經傳譯員）點解得咁少事件呢？

17 陳英傑先生：（經傳譯員）我相信佢哋有可能係防止碰撞，個車長可能會好快咁樣剎  
18 車嘅，即係可能係要防止同其他嘅車輛碰撞，就會令到乘客係失去平衡嘅；同  
19 埋係好疏忽咁樣爬頭、轉線，亦都會令到乘客失去平衡；開得太快，有可能，  
20 但係如果佢係一路都係揸得太快...

21 主席：（經傳譯員）咁就有問題㗎，其實個問題就係佢係要改變個速度先至會令人失  
22 去平衡，或者係突然間扭軚。

23 陳英傑先生：（經傳譯員）所以呢個揸得太快應該唔係嘅。如果係掉頭，...

24 主席：（經傳譯員）巴士都唔需要掉頭，係咪呀？

25 陳英傑先生：（經傳譯員）冇錯嘅，唔係好多時巴士需要掉頭。但係一般嚟講，我哋  
26 嘅路線係會畀我哋測試過嘅，但係如果佢哋真係需要掉頭嘅話，我哋係會請佢  
27 哋小心謹慎嘅。但係掉頭有可能嘅，因為佢轉嘅方向，一路轉嘅時候有唔同嘅  
28 車速，就會令到乘客失去平衡。再睇落去，「冇留意交通訊號／交通燈」，應  
29 該唔會嘅。

30 主席：（經傳譯員）不如你話有關係啲啲，好唔好？

31 陳英傑先生：（經傳譯員）「不專注駕駛」應該可能會係，「不能控制車輛」可能  
32 係，「巴士車長突然間生病」...

1 主席：（經傳譯員）呢一啲咁嘅數字唔係好幫到我哋嘅。等我哋再問過呢個問題，因  
2 為而家就話巴士乘客會失去平衡，我就想知道係有啲咩嘢理由，喺邊度可以搵  
3 到呢啲資料？

4 陳英傑先生：（經傳譯員）或者我哋可以做多啲分析，我諗我哋係有意外一啲後果  
5 嘅，譬如車上有冇乘客失平衡受傷。

6 主席：（經傳譯員）用呢個做例子。

7 陳英傑先生：（經傳譯員）我哋可以根據呢個情況，做多啲分析。

8 主席：（經傳譯員）如果有人係喺車上失平衡，受傷，可能撞到車上嘅硬物受傷，巴  
9 士公司會唔會分析番意外成因呢？呢個係最易嘅方法嚟嘅，係咪因為有小朋友  
10 突然過馬路要急刹吓，定係架車突然轉線吓，會唔會去睇下係咪咁嘅情況呢？  
11 或者佢個巴士站係要埋站嘅時候佢係急劇刹掣咁樣，有冇做咁樣嘅分析呢？

12 陳英傑先生：（經傳譯員）我理解巴士公司有調查。

13 主席：（經傳譯員）調查之後嘅數據會唔會畀結果你睇，睇下意外成因？

14 陳英傑先生：（經傳譯員）我哋冇收到呢個資料，唔係每一宗意外都有，但係一啲特  
15 定嘅事故或者意外，我哋有要求佢哋調查更多詳情嘅話，佢哋係會提交嘅。

16 主席：（經傳譯員）我唔係問緊你有冇數據，但係你都可以整理資料，譬如話喺巴士  
17 上，我哋有二百個乘客受傷係因為司機嘅問題嘅，譬如話係加速太快或者係急  
18 劇減速。

19 陳美寶女士：（經傳譯員）主席，我嘗試協助，呢一方面我同事而家搵番有關嘅資料  
20 先，我就記得過去，譬如 2006、07 年，喺佢哋嘅分析，喺意外當中，任何巴  
21 士公司，即係分析乘客失衡嘅時候受傷，亦都有係睇下有幾多宗咁嘅事故，要  
22 求佢哋調查嘅，其中一件事--其中一個原因就係話喺樓梯嗰度缺乏扶手，同埋  
23 喺下層缺乏扶手，係因為做完呢個分析之後，我哋就要求巴士公司加裝車廂嘅  
24 儀器去處理呢個因素，即係話有乘客喺上層由巴士樓梯碌落嚟，碌咗去下層。

25 主席：（經傳譯員）係邊一年份呀？你要求呢一個數據，嚟提供數據。

26 陳美寶女士：（經傳譯員）我同事而家喺度搵緊。應該係我哋之前一份意見書，提交  
27 咗㗎喇。

28 主席：（經傳譯員）唔使趕，因為而家已經午膳時間，或者喺午飯之後繼續，而家午  
29 飯休息，下晝兩點半繼續，唔該。

30

31 下午 1 時 03 分聆訊押後

32

1 下午 2 時 32 分恢復聆訊

2 出席人士如前。

3

4 主席：（經傳譯員）午安。陳律師。

5 陳政龍先生：（經傳譯員）主席，午飯時間，陳女士同我係要幫委員會查番一啲資料  
6 嘅，我而家逐樣講番，第一個參考嘅資料委員會有興趣知嘅就係 Weston 先生  
7 同埋 Stanley 教授啲呢個巴士遠期計劃入面關於增加巴士安全嘅管理嘅事項嘅  
8 意見。

9 而家先睇番 Stanley 教授嘅意見，喺專家文件冊嘅第 67 頁，即係喺第二  
10 份報告入面嘅第 67 頁。等我讀出嚟。

11 「呢一個遠期計劃嘅文件就係保密文件嚟嘅，係巴士公司同埋運輸署之間嘅  
12 保密文件，作者相信入面嘅數據同埋分析係作為營運商工作一個重要嘅部分去  
13 顯示佢哋係有能力提供恰當有效嘅服務，而同呢啲服務有關嘅主要傷亡都係行  
14 人嘅，令到佢哋嘅社會或者係外在成本係增加嘅。喺呢份報告嘅第 4 段就係話  
15 呢啲嘅營運商要確保佢哋提供恰當有效嘅服務，就喺表現方面會受到壓力嘅。  
16 而佢哋安全表現係要公開嘅話，可以令到佢哋持續地受到呢一種表現嘅壓力。  
17 亦都有一啲嘅說法，認為喺呢個遠期計劃入面嘅巴士安全嘅章節係應該公開  
18 嘅，係考慮到呢啲意外嘅更廣泛嘅社會嘅成本。」

19 另一方面，Stanley 教授嘅證供就係喺 9 月 15 號 2018 年第 178 頁嘅，  
20 佢有嚟到委員會度作證。

21 主席：（經傳譯員）繼續。

22 陳政龍先生：（經傳譯員）可以睇番第 3 行，第 3 行就我問咗一個問題，我問  
23 Stanley 教授「你喺你嘅專家報告第 69 頁提出一個論點，第 69 頁嘅第一點就  
24 係話『有啲有力嘅論點就係對於五年遠期計劃巴士安全嘅章節係應該發布嘅，  
25 係因為意外比較廣泛嘅社會成本。』」

26 跟住 Stanley 教授就話「係嘅，陳先生，我覺得係關於巴士安全章節嘅某  
27 啲部分嘅討論係好有資料性嘅，呢啲為咗公眾起見，係應該畀公眾參考，譬如  
28 舉個例，喺駕駛嘅分析同埋點樣影響意外表現，我認係有關連，呢個關連係重  
29 要嘅。」

30 「係，我覺得應該係有啲比較，譬如係話你駕駛嘅時數、司機嘅年齡喇  
31 咁？」

32 「冇錯，係譬如係入職年期同埋喺意外之前嘅駕駛嘅鐘數同埋意外率，我覺得  
33 應該而家係只係畀少數人知道，我就覺得喺公眾嘅利益起見係好重要嘅，係  
34 令到大家可以做一啲好好嘅研究，就可以知道喺安全嗰方面大家面對咩嘢挑

1 戰，亦都係令大眾有信心業界係嘗試去解決問題嘅。」

2 然後到 180 頁嘅時候，Stanley 教授喺同一個題目，就係回應番 Weston  
3 先生嘅專家嘅意見，我而家可以請大家睇下第 180 頁第 16 行，我就咁樣問嘅，  
4 「係，Weston 先生都講咗一個類似嘅講法嘅，即係話呢啲數據要有透明度，我  
5 可唔可以而家請你睇下專家文件冊嘅 153 頁，我就可以讀畀你聽」。

6 然後第 25 行，「84 段，標題係安全數據嘅透明度同埋表現，然後我就讀  
7 出嚟。」

8 主席，跟住就係講番 Weston 先生嘅證供嘅部分，然後亦都可以再處理  
9 Stanley 教授點樣回應嘅，由第 2 段，第 181 頁開始。

10 「由倫敦嘅經驗，好清楚關於巴士網絡安全表現嘅數據要有更高嘅透明度係  
11 會令到持份者同埋公眾更加能夠去監察，亦都可以畀運輸當局同埋外判嘅巴士  
12 營運商係更加聚焦喺安全嘅問題，其中一個公開事件嘅數據係會帶嚟問責性  
13 嘅，應該考慮到喺香港嘅專營巴士網絡安全數據方面應該係公開。教授，你同  
14 唔同意或者你喺呢一方面有咩嘢觀察？」

15 Stanley 教授就話「我完全同意嘅，陳律師，對於係倫敦當局同埋運輸  
16 局，就係一般嚟講，我個意見就係佢哋係獲得大量嘅數據同埋資料，而佢哋整  
17 體嚟講，係唔會隱瞞任何嘢嘅，佢哋就咁將佢係公開，而且就顯示係有啲乜嘢  
18 挑戰，我亦都覺得好有信心嘅，對於呢一個做法，我好支持嘅。」呢個就係  
19 Stanley 教授嘅意見。

20 主席：（經傳譯員）你可唔可以提供番 Weston 先生佢嘅證供，即係喺邊一日嘅證  
21 供，同第幾頁呢？

22 陳政龍先生：（經傳譯員）我讀出嚟嘅就係 Weston 先生嗰份報告。

23 主席：（經傳譯員）係喺邊度？

24 陳政龍先生：（經傳譯員）專家文件冊第 153 頁，即係話嗰份報告嘅第 39 頁，標題  
25 係「安全數據透明度及表現」，呢個係第 8.4 段。

26 主席：（經傳譯員）好，多謝你協助。

27 陳政龍先生：（經傳譯員）呢個希望處理到第一個問題。第二、第三個問題...

28 主席：（經傳譯員）或者畀個機會陳先生你可以回應番--如果你覺得而家仲未係時  
29 候，你就出聲，但係呢個機會可以畀你回應下喺呢一個巴士安全嘅章節，就話  
30 呢一個--就提出話呢啲資料應該係喺商業上都係有敏感度。

31 陳美寶女士：（經傳譯員）我睇過以前嘅遠期計劃嘅安全嘅章節，我就覺得似乎有一  
32 個好重要嘅資料係可能牽涉公司一啲嘅商業敏感資料嘅。我就想補充，開放數  
33 據嘅政策或者個方法，香港政府同埋運輸署都係倡議嘅，我同意係要數據有更

1 高透明度，尤其係同安全有關，牽涉公眾，而家嘅方向或者我哋做法就係運輸  
2 署會同巴士公司繼續商量。

3 主席：（經傳譯員）你覺得幾時先可以就呢一個議題有啲決定呢？

4 陳美寶女士：（經傳譯員）正如我之前喺聆訊嗰度講過我哋嘅小組會繼續係探索呢個  
5 議題嘅，同一時間，我哋都同專營巴士公司商量，睇下呢一個遠期計劃嘅巴士  
6 安全章節入面嘅細節，呢個問題我哋都會同巴士公司喺未來幾個月傾嘅。

7 主席：（經傳譯員）可唔可以喺今年年底前有個決定呢？

8 陳美寶女士：（經傳譯員）我呢個階段唔可以承諾，我哋會盡力嘅，唔該晒主席。

9 主席：（經傳譯員）陳律師。

10 陳政龍先生：（經傳譯員）陳女士，我頭先讀咗啲證供出嚟，提到喺倫敦，數據係公  
11 開嘅，正如 Stanley 教授講，就係話喺倫敦嘅交通當局都係話佢哋喺公開數據  
12 方面差唔多係同儕之間首屈一指嘅，而倫敦呢個方法，我就陣間會再講下嘅，  
13 睇下我哋點樣可以從倫敦嗰度學習或者應唔應該採取佢哋嘅方法。

14 但係關於巴士安全章節，我仲有一個問題要講嘅，呢個係喺午飯前，我哋嘅  
15 證供嗰度係引出嘅一個問題，就係喺報告巴士安全章節嘅講及意外原因，譬如  
16 話係乘客失去平衡，同埋係佢哋失平衡嘅原因。

17 主席，喺我搵到嘅就係起碼有兩年嘅報告入面嘅巴士安全嘅章節都有提到  
18 嘅，我而家可以逐一講下。第一，係九巴嘅巴士安全章節，即係話喺九巴 2017  
19 年至 2021 年嘅五年遠期計劃嘅巴士安全章節，呢個係文件冊嘅 5320 頁。

20 陳女士，喺你面 5320 頁就係一個九巴 2017 年至 2021 年嘅五年遠期計劃，  
21 通常喺 2016 年嘅年中或者第三季就會提交畀運輸署嘅？

22 陳美寶女士：（經傳譯員）冇錯。

23 陳政龍先生：（經傳譯員）關於乘客失去平衡同埋原因，我舉呢個例子，而家請你睇  
24 下...

25 主席：（經傳譯員）請等等。呢個計劃係咪 6 月 30 號前要交畀運輸署呀？

26 陳美寶女士：（經傳譯員）係。

27 主席：（經傳譯員）運輸署就要同公司解決當中任何嘅問題，要喺 9 月 30 號前完成  
28 嘅？

29 陳美寶女士：（經傳譯員）冇錯。

30 主席：（經傳譯員）如果睇番 5324，我想睇嘅係 8.2.7，呢個係講緊意外嘅性質，  
31 跟住就係有一連串嘅分析，就係呢一段就尤其同我哋講嘅例子有關嘅，即係我

1 咁午飯之前你證供提到嘅。

2 8.2.7 段就係話「係百分之五十二點四，即係話意外嘅大部分都係因為乘  
3 客喺車廂內失去平衡，呢啲個案超過一半係因為交通情況巴士剎掣導致嘅，而  
4 因為有意外導致受傷嘅係因為唔同嘅情況嘅碰撞，就百分之三十六點五，而係  
5 對行人造成傷害嘅意外就係所有意外中嘅百分之四點三。」

6 即係話巴士公司嘗試解釋導致到乘客失去平衡嘅意外嘅大部分嘅成因，呢個  
7 係咪就係你喺午飯之前提及呢一點嗰時想講有關嘅證供呀？

8 陳美寶女士：（經傳譯員）關於同喺意外時乘客失去平衡，我嘅觀察同埋其後嘅分  
9 析，會採取咩嘢行動，即係話都係關於乘客失去平衡喇，我想喺午飯前講番  
10 嘅，就係話作為一個恆常嘅工作，可以話我哋一直都有關注乘客喺車廂內失去  
11 平衡嘅。

12 喺 2013 年嘅專營巴士專營權續期嘅時候，亦都有一個嘅交換承諾嘅信件，  
13 喺我哋同巴士公司傾完同埋係意外嘅性質，包括係乘客失去平衡嘅問題，之後  
14 我哋有要求巴士公司喺樓梯嗰度係要加裝雙排嘅扶手嘅，呢個係針對特定嘅事  
15 件，即係話有乘客喺上層樓梯碌落嚟，呢個我哋係特別關注嘅。

16 2016 年遠期計劃亦都有指出意外大部分同乘客喺巴士車廂失去平衡有關  
17 嘅，即係話呢樣嘢運輸署同九巴一直都好關注嘅，我哋亦都有致力睇下點樣解  
18 決。

19 陳政龍先生：（經傳譯員）陳女士，我想同你跟進一點，運輸署係點樣監察急剎嘅問  
20 題，你都會呢個係你關注...

21 主席：（經傳譯員）你問之前，或者你坐喺旁邊嘅助手都可以搵番喺專營權續期嘅時  
22 候增加呢一個雙排扶手嘅要求。

23 陳政龍先生：（經傳譯員）係，可以嘅。

24 主席：（經傳譯員）你唔需要立即搵嘅，你可以而家同事由佢哋做。陳律師。

25 陳政龍先生：（經傳譯員）我講急剎之前，我提到 2017 年至 2021 年嘅五年遠期計  
26 劃，我講番類似一段，喺 2018 年至 2022 年嘅遠期計劃入面都有嘅。

27 主席：（經傳譯員）即係都係九巴？

28 陳政龍先生：（經傳譯員）冇錯。TD-1 180，呢個就係個報告開始嗰頁，然後 183  
29 頁你就會搵到類似嘅段落，第 8.2.7 段...

30 主席：（經傳譯員）其實啲數字唔同，但係嗰個用字都係一樣。

31 陳政龍先生：（經傳譯員）係。

32 主席：（經傳譯員）大部分嘅意外，百分之五十一點五，之前就係百分之五十二點

1 四，「多過一半就係因為有巴士剎車嘅問題嘅。」

2 陳政龍先生：（經傳譯員）係。

3 主席：（經傳譯員）唔該，唔該晒。

4 陳政龍先生：（經傳譯員）陳女士，你而家喺度搵緊啲嘢，係咪呀？

5 陳美寶女士：（經傳譯員）我就嘗試就睇下個文件，就係關於喺樓梯嘅雙層扶手，我  
6 哋係寫封信畀九巴...

7 主席：（經傳譯員）可能我哋遲少少，有機會先至再睇，我哋或者而家唔好分心做呢  
8 樣嘢，我相信你隔離個可以幫到你嘅。

9 陳大律師，我哋就頭先睇到個分析，呢個嘅意外數據，有冇睇到喺邊度講到  
10 關於嗰個意外嘅責任係點樣？我認為，一百宗之中就係百分之五十就係啲乘客  
11 有關，而百分之二十五就係同我哋巴士車長有關。

12 陳政龍先生：（經傳譯員）呢個係睇巴士安全章節有關，就係 2019-2020 年，就係  
13 2018 年 8 月提交嘅報告嚟嘅，我哋就係將佢嗰個百分比寫咗出嚟嘅。

14 主席：Whilst we are dealing with this topic, could we have a  
15 look at that? What is the reference to that?

16 陳美寶女士：（經傳譯員）第 5325 頁嘅第 8.2.10 段，就係正正係講，就係「呢個  
17 係兩年之間究竟邊個負責任，百分之七十九其實嗰啲巴士車長都唔需要負責  
18 嘅，其他大概百分之一就係等緊警方去進一步行動嘅。」

19 主席：（經傳譯員）呢個係邊一個文件冊㗎，係咪 KMB-12 文件冊呢？

20 陳政龍先生：（經傳譯員）係，下一頁嘅。

21 主席：（經傳譯員）係。

22 陳政龍先生：（經傳譯員）我哋仍然係 2017 年嗰個報告--2017 年嘅遠期計劃。

23 主席：（經傳譯員）可能喺其他地方都有重複到，但係呢度講到就係巴士車長係要為  
24 百分之二十五嘅意外負責嘅。

25 陳政龍先生：（經傳譯員）主席，你講緊就係 2018 個遠期計劃，運輸署就係 2018  
26 年 5 月就寫封信，就裏面有附件就有--我哋睇到就係頭先個表，就係...

27 主席：（經傳譯員）附件 E 嘅？

28 陳政龍先生：（經傳譯員）係，冇錯。就係講緊有啲乜嘢因素係因為個車長，有啲乜  
29 嘢唔係，然後我哋就請呢個九巴再細分啲數字，之後又有一個更詳盡嘅分析，  
30 就係喺 2018 年嘅巴士嘅安全個章節嗰度，係就係由 2019 至到 2023 年，我哋  
31 就有更加詳細嘅資料嘅，就有一啲關於巴士車長有關、巴士車長有關。

1 主席：Where is the 2019 five-year plan?

2 陳政龍先生：（經傳譯員）呢個係同一個文件冊，係第 5011 頁嘅，2019 年嘅五年  
3 計劃嘅，講緊。譬如呢度有個例子...

4 主席：（經傳譯員）對唔住，等一等。

5 陳政龍先生：（經傳譯員）譬如好似喺 5016 頁，我哋睇到相同嘅標題，係「意外嘅  
6 性質」，我哋見到個仔細嘅分析，5020，我哋有另外新嘅圖表，就係話意外嘅  
7 原因，就關於係有巴士車長有關嘅原因或者因素，呢個巴士嘅性質嗰度，其實  
8 我哋就有細分話究竟巴士車長使唔使負責嘅，但係呢一個嘅 8.2.3 嘅圖表嗰度  
9 我哋睇到有幾多係巴士車長要負責嘅，但係 2019 年之前嗰啲報告，我哋就有一  
10 個咁樣嘅細分。

11 主席：（經傳譯員）係，唔該。陳女士，我可唔可以問你，我哋而家就睇緊啲九巴嘅  
12 數據，你知唔知佢哋點樣去收集同埋分析呢啲數據？佢哋點樣去決定邊個係需  
13 要負責或者邊個唔需要負責呢？

14 陳美寶女士：（經傳譯員）主席，對唔住，我諗我就有答案。

15 主席：（經傳譯員）你哋有冇書信來往呢？你就叫佢哋提交啲數據，你有冇問佢「究  
16 竟你哋點樣去整合呢啲數據嘅呢？」你係咪你唔知，有人問，定係點樣呢？

17 陳美寶女士：（經傳譯員）呢個係成個過程嘅一個部分，我哋同事會同佢哋討論，然  
18 後我哋就會攞到呢啲嘅分析資料，喺呢一刻，我就唔想畀一啲誤導性嘅答案畀  
19 你。

20 主席：（經傳譯員）但係有啲人一定知道其實呢啲數據係咪真，或者去嘗試去測試下  
21 啲數據呀咁樣，運輸署一定有人咁做㗎？

22 陳美寶女士：（經傳譯員）就我哋所知，關於係意外同車長有關嘅，嗰個負責任嗰樣  
23 嘢，好多時候嗰啲意外就係由警方去調查，佢哋就會話畀我哋聽究竟邊一啲意  
24 外係同巴士車長嘅缺失有關、有邊啲唔係。根據我哋嘅資料，巴士公司亦都會  
25 係將佢細分，就係嗰啲意外個原因係乜嘢嘢，就係會唔會有啲係同巴士車長嘅  
26 行為係點。

27 主席：（經傳譯員）如果個巴士車長佢係被起訴嘅時候，佢當然係負責，但係我話問  
28 你，就係話你有冇問佢哋點樣去整合同埋搜集呢啲數據、點樣去釐訂係呢啲數  
29 據呢？

30 陳美寶女士：（經傳譯員）對唔住，我真係冇呢啲嘅答案，因為同九巴傾嘅同事其實  
31 佢就有喺度，或者其實我哋可以補充係話畀你聽究竟我哋點樣去測試呢啲嘅數  
32 字嘅，同九巴。

33 歐陽先生：（經傳譯員）或者另外一個嘅方法去問，就係話係咪運輸署畀呢啲嘅不同  
34 嘅項目畀佢哋係填啲數字，係咪由運輸署釐訂一啲唔同嘅分目嘅呢？

1 陳美寶女士：（經傳譯員）主席，就我所知，我亦都問過同事，呢啲資料就係由公司  
2 自己編製嘅。

3 主席：（經傳譯員）呢啲分項係佢哋嘅分項嚟嘅？

4 陳美寶女士：（經傳譯員）係，冇錯，唔係我哋嘅分項嚟嘅。

5 主席：（經傳譯員）好坦白，你睇番呢啲數字，其實我哋就唔係好明，點解譬如話所  
6 有嘅數字之中，百分之二十五就係話因為一啲嘅乘客佢失去平衡咁樣，有冇人  
7 就話問下佢點解、呢啲係咩嘢數字嚟嘅呢？

8 或者你之後可以話畀我哋聽，解釋畀我聽運輸署採取啲咩嘢行動、有咩嘢角  
9 色就係去睇呢啲數字嘅？或者你同佢有書信來往，或者你係問佢問題，佢哋係  
10 有回答，係咪口頭問佢哋問題，或者佢係咩嘢日子、邊個去問等等，所以我哋  
11 知道就係有好嘅證據去話畀我哋聽我哋點樣去理解呢啲數字，可唔可以呀？

12 陳美寶女士：（經傳譯員）係，可以。唔該晒主席。

13 陳政龍先生：（經傳譯員）陳女士，我同你跟進一個問題，運輸署關於急劇剎車呢樣  
14 嘢係咪好關注，喺而家，你哋係點樣去監察呢個車長佢係急劇剎車㗎？如果你  
15 真係有監察嘅說話。

16 陳美寶女士：（經傳譯員）主席，等我--我而家同同事嘗試確定緊。根據我哋以前提  
17 交嘅證供，運輸署就係叫緊一啲嘅專營巴士公司係提交佢哋點樣去監察黑盒嘅  
18 數據，所以我哋嘅監察係基本上係基於佢哋提供畀我哋嘅資料，喺過去數個  
19 月，喺工作小組嘅討論嘅過程當中，我哋同專營巴士公司講過就係點樣可以改  
20 善黑盒嘅功能同埋功用，我哋亦都係更新咗一個最低嘅要求，就係關於黑盒嘅  
21 方面，我哋叫專營巴士公司就提供進一步嘅資料，就係關於黑盒喺日常之中嘅  
22 一啲嘅數據提供更加多，我哋就會特別監察到就譬如巴士車長佢哋嘅行為不  
23 當，譬如話佢哋急剎、突然之間停車等等。

24 主席：（經傳譯員）你仲要求咩嘢額外嘅資料呢，係關於個紀錄嘅方面？

25 陳美寶女士：（經傳譯員）主席，嗰個事件紀錄嘅方面就係黑盒嘅方面，關於個車  
26 速，突然之間加速，突然之間減速，唔同嘅公司其實有唔同嘅界限值嘅，就係  
27 講緊啲事件紀錄方面，或者就係實時係發出警告畀間公司咁樣。呢個我哋同巴  
28 士公司一直係做緊呢方面嘅工作，就希望能夠就佢哋嗰個事件紀錄能夠提供得  
29 更好。

30 主席：（經傳譯員）呢個最新嘅最低要求係 8 月生效嘅，係咪？

31 陳美寶女士：（經傳譯員）係，冇錯。

32 主席：（經傳譯員）所以話呢個希望事件紀錄被提供更多嘅資料，呢個嘅要求其實就  
33 係之後先至提出嘅。

- 1 主席：（經傳譯員）幾時提出㗎，呢個要求？係咪喺書信嘅來往之中提出要求嘅呢？
- 2 陳美寶女士：（經傳譯員）我哋就係同城巴會面。我再從--嚟過。就關於我哋就同城  
3 巴就係 9 月 26 號見面嘅，就特別係關於呢個事件紀錄最新嘅要求，我哋就同九  
4 巴仲未見，但係我哋就同佢哋而家安排緊。
- 5 主席：（經傳譯員）運輸署嘅代表或者今日出席嘅人士其實有冇同佢哋傾嘅呢？
- 6 陳美寶女士：（經傳譯員）或者 Amy Tse，謝善怡女士。
- 7 主席：（經傳譯員）呢啲最近嘅資料係啲咩嘢？
- 8 謝善怡女士：（經傳譯員）我哋知道九巴就係釐訂緊一啲嘅車速嘅界限值同埋急劇加  
9 速同埋急劇減速嘅。我哋歡迎佢哋做呢一啲咁樣嘅計劃，我哋亦都係同呢一個  
10 城巴、北大嶼山巴士公司同埋新巴就睇下可唔可以就係釐訂一啲類似嘅界限  
11 值，就可以監察司機嘅行為。
- 12 主席：（經傳譯員）九巴而家佢哋最新嗰個界限值，譬如話急剎、急劇加速、急劇減  
13 速等等，嗰個界限值而家最新係點樣？
- 14 謝善怡女士：（經傳譯員）九巴同龍運急劇加速嘅界限值每秒鐘係超過 4 個公里，減  
15 速，每一秒係超過 7 個公里嘅。
- 16 主席：（經傳譯員）而嗰個車速呢？
- 17 謝善怡女士：（經傳譯員）係，車速。如果佢哋係每個小時 70 公里，佢哋就係超  
18 速。我哋明白到佢哋採用緊啲最新嘅科技係睇緊一啲嘅道路係計過係有 50 公里  
19 嘅車速嘅...
- 20 主席：（經傳譯員）呢個唔係最新嘅科技，其實呢個科技已經係有好多年㗎喇。或者  
21 你應該咁講，你就係用緊一啲以前一直已經存在嘅科技。
- 22 謝善怡女士：（經傳譯員）係，其他嘅道路如果係有 70 公里嘅車速嘅時候，佢哋都  
23 會睇嘅。
- 24 主席：（經傳譯員）你哋提出個要求之後，城巴點樣回應呢？
- 25 謝善怡女士：（經傳譯員）城巴、新巴佢哋嘅回答就係佢哋願意去睇一睇，但係佢哋  
26 就好關注就應該係點樣設一個點樣嘅界限值，特別係減速或者係加速嗰方面，  
27 因為意外好多時候都好複雜嘅，所以佢哋係需要同工會去傾一傾應唔應該係釐  
28 訂某個特定嘅界限值嘅。
- 29 主席：（經傳譯員）請你唔好繼續住，我想打岔一下。其實九巴已經定咗具體界限  
30 值，你而家係咪話佢哋係關心到九巴嗰個係嘅限值呢？
- 31 謝善怡女士：（經傳譯員）我哋知道九巴嘅資料之後，已經係畀咗新巴同城巴，佢哋  
32 就話願意去研究嘅。

1 主席：（經傳譯員）我明白，但係你話佢哋係關注到九巴已經定咗個限值，你意思係  
2 咪話佢哋質疑九巴定咗具體限值呢？

3 謝善怡女士：（經傳譯員）佢哋話需要研究一下，然後先至決定。

4 主席：（經傳譯員）係因為佢哋係有啲關注嗰個限值，係咪？我嘅理解啱唔啱？

5 謝善怡女士：（經傳譯員）啱嘅。

6 陳美寶女士：（經傳譯員）主席，我可唔可以繼續補充呢？

7 主席：（經傳譯員）可以。

8 陳美寶女士：（經傳譯員）我最近同城巴交談嘅時候--我都想補充一下謝小姐所講  
9 嘅，佢哋表達過話要研究一下，去睇下可唔可以喺城巴嗰度都實施同一個限  
10 值，城巴嘅管理層係考慮緊點樣去操作同埋去考慮使唔使採取一啲巴士車長不  
11 守規嘅時候嘅跟進行動，所以佢哋係考慮緊呢一個限值喺適用性方面嗰個操作  
12 方面嘅事情。

13 主席：（經傳譯員）陳律師。

14 陳政龍先生：（經傳譯員）你就提過九巴已經定咗呢啲限值，已經有喇，謝女士亦都  
15 講過係急剎車嘅時候嘅情況，運輸署知唔知道九巴去監察呢一個大力剎車嘅情  
16 況係咪就可以令到佢哋可以每一個意外都可以集中睇下係咪有急剎車嘅情形  
17 呢？

18 陳美寶女士：（經傳譯員）我哋所知嘅，就係佢哋定咗個限值去做監察嘅，因為黑盒  
19 嘅功能已經係可以產生呢一啲係超出限值或者係不合規嘅呢啲嘅報告，我哋知  
20 道九巴就可以用呢一個咁嘅功能幫助佢哋做呢個監察喇。

21 主席：（經傳譯員）即係話照你理解，九巴就可以黑盒去產生一啲例外報告出嚟，如  
22 果有急剎車嘅情況？

23 陳美寶女士：（經傳譯員）係，新巴、城巴亦都可以用呢一啲黑盒嘅功能去印出一啲  
24 例外報告。

25 陳政龍先生：（經傳譯員）我想問下，係咪你嘅理解，就係我問緊運輸署嘅理解，呢  
26 一類嘅例外報告係咪都可以講出任何一個大力剎車嘅事情呢？

27 陳美寶女士：（經傳譯員）我唔可以代表專營巴士公司去答，但係黑盒嘅功能同埋佢  
28 嘅科技同埋呢一啲嘅例外報告，的而且確到好大程度上可以幫佢哋監察個巴士  
29 車長點樣剎車、點樣加速、減速，佢哋喺實際操作嘅時候都要考慮呢一點，去  
30 睇下個例外報告同埋有關嘅限值係咪可以好有效呢，幫助佢哋做監察。

31 陳政龍先生：（經傳譯員）我咁樣理解啱唔啱呢？就係講番呢一啲例外報告，運輸署  
32 其實就係留番畀專營巴士公司自己去判斷，係咪呢？咁樣係咪公道呢？

1 陳美寶女士：（經傳譯員）我諗而家嗰個程序仲係繼續緊嘅，但係我哋當然係好有興趣，  
2 我哋亦都覺得係有需要，同埋都係一個有效嘅方法，等我哋知道如果有咗  
3 呢啲例外報告之後係咪可以幫助我哋調查意外嘅原因，而係牽涉到乘客失衡  
4 嘅，我哋想知道係咪呢一個係其中一個促成意外嘅成因，因此黑盒同埋例外報  
5 告都係我哋想喺工作小組嗰度進一步跟進嘅事嚟嘅。

6 陳政龍先生：（經傳譯員）或者而家唔再講呢個大力剎車嘅問題，而家去番一個比較  
7 一般性嘅題目，就係關於巴士嘅意外數據。我哋聽到證供就話運輸署係同警方  
8 係分享呢個個案管理嘅系統嘅，然後運輸署就從呢一個資料庫嗰度攞啲資料去  
9 做自己嘅分析，因此運輸署其中一個資料嘅來源就係呢一個系統。

10 我想集中嘅就係講另外嗰方面嘅資料，就係專營巴士公司嘅意外數據，我哋  
11 知道由呢個巴士安全嗰個部分，即係遠期計劃裏面，巴士公司就會係提供自己  
12 嘅數據同埋分析，然後每年交界運輸署。

13 好，而家將呢件事擺埋一邊先，亦都排除一啲比較大嘅事件，當然，有大嘅  
14 事件嘅時候，運輸署就要求巴士公司提供調查報告，就好似喺大埔嗰個意外咁  
15 樣。我就想問下，有冇其他嘅有制度性嘅定期嘅報告係巴士公司交界你係講關  
16 於啲意外嘅事情嘅？

17 陳美寶女士：（經傳譯員）我而家查一查我嘅筆記先。

18 陳政龍先生：（經傳譯員）係喇，我唔係講遠期計劃裏面嗰個巴士安全章節同埋比較  
19 大嘅事故，係其他嘅。

20 陳美寶女士：（經傳譯員）我請謝女士回答呢個問題。

21 主席：（經傳譯員）好呀，謝女士。

22 謝善怡女士：（經傳譯員）每一個月，我哋會得到警方嘅資料，然後我哋會分析由警  
23 方得到嘅數據，如果我哋發現意外率係有所增加或者有任何不尋常嘅情況，我  
24 哋會同巴士公司傾，睇下個情況係點，同埋有乜嘢要改正或者佢哋需要做啲咩  
25 嘢呀咁。

26 陳政龍先生：（經傳譯員）或者我說明一下我想問嘅問題，我而家用一個例子，譬如  
27 話有一個事件，有一位老婦喺巴士上失去平衡，佢自己係受咗輕傷，但係就有  
28 報警嘅，不過巴士公司知道呢件事，佢自己做咗紀錄，運輸署咁會唔會知道呢  
29 件事？抑或就只會係成為巴士安全部分嘅其中一個數字呢？

30 黃志光先生：（經傳譯員）主席，請問我可唔可以答呢個問題呢？好似謝女士所解  
31 釋，我哋基本上係倚賴警方嘅事件數字嘅，好似大狀頭先提嗰啲咁嘅例子，現  
32 時嚟講，我哋係唔會收到呢啲嘅資料嘅，因為基本上日日都會發生，所以個答  
33 案係有嘅，係唔知嘅。

34 陳政龍先生：（經傳譯員）好，我講番喺倫敦方面係點樣做，不過之前我仲想確立另

1 外一個事實嘅，就係運輸署點樣處理呢兩組嘅數據，當你收到巴士公司每年畀  
2 你嘅巴士安全數據，即係喺呢一個巴士安全章節嗰度寫嗰啲，運輸署會唔會去  
3 做核對嘅呢？兩套嘅資料，即係由警方收到一套，巴士公司嗰度又收到一套，  
4 你兩者之間會唔會做一啲比對或者核對嘅呢？

5 陳美寶女士：（經傳譯員）邱先生，佢有呢一個道路安全嘅工作，同埋另外一位同  
6 事，基於我嘅所知，當做呢一個遠期計劃嘅時候，當我哋睇巴士公司嘅資料，  
7 我哋亦都會睇埋警方畀我哋嘅資料，我哋未必會逐項去比對，但係我哋會睇趨  
8 勢分析，如果兩者之間有好明顯嘅差別，我哋係會提出問題同埋要求進一步嘅  
9 分析。

10 我都可以提及，就係政府係有派代表坐喺巴士公司嘅管理局嗰度嘅，喺管理  
11 局有關討論嘅時候，都會提供一啲意外數字，我哋會睇咗嗰啲數字先，我哋嘅  
12 同事亦都會睇呢一啲定期嘅意外數據，同埋係比對我哋有嘅數據庫，如果有  
13 一啲好明顯嘅差別，我哋都會喺嗰個董事局嗰度係會提出嚟。

14 主席：（經傳譯員）即係唔會好具體咁做核對嘅？

15 陳美寶女士：（經傳譯員）我哋唔會，但係我哋會睇下有冇邊一度係好明顯嘅差別或  
16 者落差嘅。

17 主席：（經傳譯員）你可唔可以協助我，當你話你哋喺董事局嗰啲嘅同事就係話會畀  
18 啲數據你嘅，你頭先係咁講？

19 陳美寶女士：（經傳譯員）喺公司嘅董事局係會有運輸署嘅代表，喺睇嗰啲意外嘅數  
20 字同埋公司向董事局提交嘅巴士安全報告嘅時候，我哋嘅同事就會攞到有關嘅  
21 資料，我哋就會將佢同我哋數據庫裏面嘅資料核對嘅，如果係發覺係有唔同，  
22 我哋都可以喺董事局嗰度係講出嚟嘅。我哋就會話畀佢哋聽佢哋嘅數據應該係  
23 同警方嘅數據一致嘅。

24 主席：（經傳譯員）我而家想嘗試明白一下政府代表喺呢啲公司嘅董事局嘅角色係乜  
25 嘢，你而家係咪話佢哋係另外一個渠道讓運輸署攞到資料呢？

26 陳美寶女士：（經傳譯員）我唔會話係另外一個渠道。

27 主席：（經傳譯員）你意思係咩嘢？

28 陳美寶女士：（經傳譯員）我只係想提及話有一啲嘅平台我哋都可能攞到呢啲意外嘅  
29 數據嘅，政府係有董事坐喺呢啲公司嘅董事局嗰度，就令到我哋可以評論或者  
30 係講出我哋對於公司提交資料嘅一啲觀察。

31 主席：（經傳譯員）好，唔該。

32 陳政龍先生：（經傳譯員）陳女士，而家我想講下倫敦嗰個做法，我會讓你睇幾份文  
33 件，然後我哋就可以好全面咁睇一睇倫敦嘅運輸局佢哋係點樣做呢一啲數據點  
34 樣係有透明度嘅。

1 首先，我睇番 Weston 先生嘅報告，就係專家文件冊第 141 頁，內部嘅頁  
2 碼就係 Weston 先生報告第 27 頁，專家文件冊第 141 頁。陳女士，或者我讀  
3 某啲部分出嚟，然後請你提出一啲意見，我會不時讀完一段就停一停，請你畀  
4 意見嘅。

5 第一，開始就係 6.2 段，佢話「喺巴士公司合約嘅要求當中，巴士公司係  
6 要提供全面嘅數據，係關於事件同埋意外嘅，係成個網絡裏面嘅，呢一啲係通  
7 過事件報告資料系統提交嘅，如果有嚴重嘅事件就會係實時報告同埋係監察，  
8 就係通過有關嘅中央控制室，然後我哋係會即時同嗰個有關嘅機構發出一啲即  
9 時嘅回應嘅。

10 倫敦嘅運輸局亦都係會提供全國嘅一啲數據就係關於車輛嘅碰撞，如果係造  
11 成傷亡，就會咁樣做嘅。每一個季度都會有警方嘅報告。」

12 似乎倫敦同香港都係有兩套嘅資料，一就係來自巴士公司，一就係來自警察  
13 嘅，來自巴士公司嗰啲嘅資料就係我最有興趣嘅地方，我哋就想睇下香港同倫  
14 敦比較之後，香港點樣可以改善嘅。

15 而家我想睇下畀二個一段，同一頁，「每一季，倫敦嘅運輸局就會係用一啲  
16 大嘅表係表列出所有報告咗嘅事件嘅，就係成個網絡都係咁，然後每一個事件  
17 所有嘅資料，就係個路線、日期、邊個係營運商、嗰個地點、有冇人受傷、係  
18 咪當場處理咗抑或係入院、如果受傷嘅人究竟係乘客，抑或係第三者、佢哋嘅  
19 性別，同埋我哋知道佢哋嘅年紀。

20 佢亦都係每一季度就會去比較之前嗰個季度同埋做一啲趨勢嘅分析嘅。呢一  
21 度就話咁樣可以鼓勵透明度同埋係可以鼓勵佢哋繼續係改善嘅。」

22 好喇，而家停一停，講番呢一個大嘅表，就係成個巴士嘅服務網絡都係會包  
23 括晒嘅，我想知道你知唔知道有冇用咁樣嘅形式，用咁具體嘅形式係畀呢一個  
24 數據呢？

25 主席：（經傳譯員）其實呢一個係 Weston 先生報告嘅一個附件嚟嘅，係咪呀？

26 陳政龍先生：（經傳譯員）呢個係一個連結嚟嘅，網上嘅連結。

27 主席：（經傳譯員）唔係，我而家就係問緊你--因為我有一個檔案就係印出咗你而家  
28 描述緊嘅數據，究竟係咪喺我哋嘅文件冊裏面嘅呢？

29 陳政龍先生：（經傳譯員）我睇到秘書處已經將有關嘅表打咗喺屏幕上面，我嘅理解  
30 就係我哋係由網上下載咗有關嘅資料，但係仲未包括有頁碼嘅文件冊裏面嘅。

31 主席：（經傳譯員）即係你而家我哋睇番呢一個屏幕，係咪呀？

32 陳政龍先生：（經傳譯員）或者我描述一下，等我哋喺個紀錄嗰度都可以講出究竟屏  
33 幕上係顯示出啲乜嘢嘅。

1 係一份數據集，係倫敦交通局個網頁嗰度下載嘅，你睇呢一頁會見到  
2 1 月發生嘅意外，呢個係 2018 年 1 月，嗰個試算表你可以見到每一件事  
3 路線、營運商、所屬嘅區分、傷勢、受害人嘅性別、年紀、係屬於乘客定係邊一  
4 類型。

5 主席：（經傳譯員）睇右邊，我而家睇緊畫面嗰度再過啲仲有冇資料㗎？睇到喇。我  
6 哋見到嘅分類係咪你都見到呀？

7 陳美寶女士：Yes.

8 主席：（經傳譯員）我哋叫做失去平衡，佢哋就係叫做蹣倒、絆倒或者係跌倒嘅。

9 陳政龍先生：（經傳譯員）陳女士，睇香港嘅情況，用咁樣嘅匯報嘅方式將資料公開  
10 去到咁仔細，你覺得應唔應用到香港？

11 陳美寶女士：（經傳譯員）或者我可以初步畀一啲觀察，螢幕上顯示嘅事故嘅詳情，  
12 關於倫敦嘅運輸當局，呢個係睇到每一件事嘅仔細嘅詳情，但係香港嘅情  
13 況，我哋就有辦法去追蹤去到每一件事，去到咁仔細喇。我哋而家嘅做法就  
14 係有一個系統記錄有致命嘅意外係行咩嘢路線、受害人嘅資料、司機嘅資料，  
15 我自己覺得我哋係倡議公開數據同埋透明性，令到規管當局同埋交通營運商問  
16 責性更高，但係每一件事去到咁仔細去公開嘅話，未必——即係可能係可以加  
17 強透明度、問責性，但係亦都可能超越公眾可能有興趣知道詳情嘅層面，...

18 主席：（經傳譯員）呢樣嘢都係由公眾決定，佢哋冇興趣都好，佢可以睇咗之後冇興  
19 趣，但係佢而家直頭係有辦法睇到。

20 陳美寶女士：（經傳譯員）好多時候一有意外發生嘅時候，係有好多事後嘅發展嘅，  
21 牽涉乘客，亦都牽涉行人，所以我哋要考慮就住各宗事故嘅披露嘅時候，我哋  
22 亦都要確保呢一個格式嘅資料入面係咪準確、係咪最新嘅資料，因為我哋要確  
23 保如果公眾攞到呢啲資料嘅話，佢哋都係要有正確嘅認知嘅事件。

24 主席：（經傳譯員）佢哋倫敦都係咁做，你係咪意思我哋香港就有能力做到呢？

25 陳美寶女士：（經傳譯員）唔係嘅，所以第三點我想提到嘅就係我之前嗰日都提到我  
26 哋都係希望參考倫敦嘅交通當局，而我同事其實已經安排咗一個嘅訪問嘅，係  
27 倫敦交通當局，睇 2019 年 2 月嘅時候去，就係正好畀機會我哋去學習準備呢啲  
28 嘅問題、需要嘅資源、佢哋點樣同唔同嘅巴士公司商量，仲要同警方核對資  
29 料，睇下嗰個格式咁樣嘅資料點樣可以加強咗交通上嘅數據透明度，而同時  
30 唔會因為披露資料期間會有啲複雜嘅問題。

31 主席：（經傳譯員）我哋睇到呢一個咁實事求是嘅資料，就睇番巴士公司、路線、廠  
32 房嘅邊、傷勢、傷者嘅性別、年紀、意外嘅事故類別、受害人係乜嘢人、係乘  
33 客定司機、行人。

34 陳美寶女士：（經傳譯員）我諗嗰呢一個表格入面嘅資料係可以用一個好簡單、好客

1 觀嘅方法去向公眾交代呢個事件嘅原因同埋詳情，個問題係我哋用咁樣嘅格式  
2 提供資料嘅時候，仲要考慮呢一啲資料係點樣可以喺發布之後再更新。

3 主席：（經傳譯員）你由呢度要點樣更新呀？係咪即係個受害人由女變男、成人變番  
4 小童？個意外其實喺第二度發生？所謂更新係咩嘢意思呀？

5 陳美寶女士：（經傳譯員）我留意到，主席，有一行就係話受傷嘅描述嘅，呢個表可  
6 能係形容番啲意外發生嗰一刻或者意外發生之後佢哋立即得到嘅資料，我哋作  
7 為當局都要考慮下要唔要進一步更新番個傷勢嘅描述，喺呢一方面有冇進展  
8 嘅，因為可能公眾都有進一步追問有咩嘢跟進行動，有冇進一步發展，呢啲係  
9 我哋要同倫敦當局再進一步傾去實施披露資料。

10 主席：（經傳譯員）唔該，我想呢一頁有副本喺手，等我哋可以睇下入面嘅內容，希  
11 望全部人都有副本。陳律師。

12 陳政龍先生：（經傳譯員）陳女士，頭先提到喺香港我哋就唔適宜係逐件事件咁樣去  
13 睇，係因為而家呢一刻冇要求巴士公司就每宗事故匯報嘅？

14 陳美寶女士：（經傳譯員）冇錯。

15 陳政龍先生：（經傳譯員）如果你睇下倫敦嘅匯報要求，問下可唔可以成立咁嘅系  
16 統、點樣應用，我而家請你睇雜項 3 嘅文件冊，1189 頁，係倫敦嘅交通局一個  
17 叫做巴士安全計劃嘅最新情況嘅文件。

18 主席：（經傳譯員）你等一等，我做一做筆記先。呢個係 2017 年 11 月嘅，回應番  
19 呢一個交通當局嘅。

20 陳政龍先生：（經傳譯員）冇錯，呢度就描述番個最新嘅情況同埋要點樣去改善個系  
21 統，我就呢兩方面問番陳女士嘅。陳女士，喺 1191 頁，標題係「巴士碰撞數據  
22 分析」，簡介嗰段我唔讀喇，我想讀跟住嗰段，標題係「進度」，因為呢個文  
23 件一開頭就形容佢哋而家嘅系統係點，我都要問一個問題先嘅。

24 佢係咁講，「我哋而家對於巴士撞擊嘅數據係有兩組主要嘅數據集，係  
25 IRIS 同埋 STATS19。」而 Weston 先生嘅報告就提到 IRIS 係警方嘅數據嚟  
26 嘅。

27 我繼續讀，「IRIS 係由巴士公司使用嘅，關於佢哋嘅營運活動嘅事件嘅匯  
28 報，包括撞擊，亦都包括係滑倒、絆倒或者跌倒，同埋一啲嘅安全事故，包括  
29 襲擊嘅。而巴士公司要喺四十八小時之內匯報嚴重事件，所有嘅事件就要喺七  
30 日之內匯報嘅，呢一個系統係完整、可靠、單一嘅資料來源，呢啲資料就係所  
31 有嘅影響或者係涉及倫敦巴士嘅事故。」

32 我停一停先，相比香港嘅情況，我哋亦都可以接觸到警方數據，睇落去係好  
33 似，但係你同唔同意香港嘅運輸署有一方面係輪蝕咗嘅，因為由巴士公司入面  
34 係有能夠提交到啲數據集，關於巴士意外嘅？

1 陳美寶女士：（經傳譯員）我同意，喺而家嘅巴士專營權營運制度入面係有要求就住  
2 特定嘅事件需要特定嘅匯報嘅。

3 陳政龍先生：（經傳譯員）將來你覺得咁樣有冇作用呢？如果要求巴士公司有一個類  
4 似嘅匯報嘅制度，因為似乎喺實際嘅角度嚟講，要做嘅只不過係成立一個電腦  
5 嘅系統？

6 陳美寶女士：（經傳譯員）我諗呢個當然係一個可以跟進嘅範圍，再加埋自動數據傳  
7 輸，我相信係有辦法令到呢個數據嘅紀錄或者係整理係更加有效率嘅。

8 陳政龍先生：（經傳譯員）即係話可以唔使由唔同巴士公司收到唔同嘅數據組，而係  
9 有一個單一嘅系統要佢哋匯報？可唔可能呢？

10 陳美寶女士：（經傳譯員）我覺得關於匯報數據、採集數據方面，我哋一直都可以做  
11 一個單一嘅系統，等我哋可以分析好啲數據再提交報告建議進一步嘅行動嘅。

12 主席：（經傳譯員）陳律師，喺你繼續之前，而家提到巴士安全計劃嘅最新情況，喺  
13 合約入面有冇標明巴士公司向倫敦交通當局有咩嘢責任呢？有冇咁嘅條文呢？

14 陳政龍先生：（經傳譯員）我唔知道，我而家唯一搵到嘅就係呢一段，入面有講係一  
15 啲嘅匯報嘅責任嘅詳情，我可以係嘗試再搵下。

16 主席：（經傳譯員）呢個我哋亦都可以問下 Weston 先生嘅意見。可能係好簡單有一  
17 條嘅合約嘅條款，就係話有啲事故嘅話，包括係碰撞、有人滑倒、絆倒、跌  
18 倒，都係需要由巴士公司向當局匯報嘅，咁樣係好有幫助。

19 陳女士，我想問一問你，咁樣同專營巴士公司嘅制度好相近嘅，我哋想有咁  
20 嘅範本、有日期、時間、受害人嘅特色，譬如話係佢年紀、性別，因為當然佢  
21 個年紀亦都係同譬如話有冇跌倒有關，同埋有陣時受害人因為某啲特質，但可  
22 能係個傷勢較重，甚至係死亡嘅，可唔可以係要求巴士公司提交呢？

23 陳美寶女士：（經傳譯員）我諗我哋可以好積極跟進嘅，主席。

24 陳政龍先生：（經傳譯員）我繼續讀嘅時候睇到另外一個問題，如果你係由巴士公司  
25 逐宗事故去匯報嘅話，如果係向警方匯報嘅話，你都有一樣嘅數據㗎，喺個  
26 數據庫入面，就可以令你對照一下，睇下專營巴士公司係記錄資料嘅時候  
27 佢嘅方法妥唔妥當？

28 陳美寶女士：（經傳譯員）咁樣對於核對數據同埋去找出有乜嘢錯漏、差異係有用  
29 嘅，所以我哋應該有個範本，一啲主要嘅標題，然後我哋可以由唔同嘅巴士公  
30 司去決定類似或者係一樣嘅分類，然後匯報事故，我諗呢一方面我哋可以進一  
31 步考慮嘅，同巴士公司商量。

32 主席：（經傳譯員）巴士公司都會要求車長去匯報呢啲嘅事件㗎？

33 陳美寶女士：（經傳譯員）係。

1 主席：（經傳譯員）你知唔知道巴士公司要求咩嘢資料呀？

2 陳美寶女士：（經傳譯員）因為我哋要求佢哋提供數據同埋資料，係喺嗰個巴士安全  
3 嘅章節嗰度提供，呢個亦都係根據佢哋嘅原數據同埋佢哋畀嘅證據去再整理  
4 嘅，巴士公司係用一個更加系統性嘅方法去收集數據、匯報畀運輸署係唔難  
5 嘅。

6 主席：（經傳譯員）但係你知唔知道譬如話有件事發生或者意外發生嘅時候，公司  
7 要求車長匯報乜嘢資料呢？

8 陳美寶女士：（經傳譯員）我有呢個詳情，或者可以由謝女士補充。

9 謝善怡女士：（經傳譯員）唔該。我哋知道巴士公司要求車長匯報喺車上發生嘅，譬  
10 如話意外有受傷嘅話，就要係匯報畀--就報畀警方聽嘅。

11 主席：（經傳譯員）即係話如果有受傷嘅話，巴士車長係要匯報畀警方聽？

12 謝善怡女士：（經傳譯員）係。

13 主席：（經傳譯員）如果系統係有效嘅話，警方嗰啲數據同巴士公司應該係百分百  
14 合？

15 謝善怡女士：（經傳譯員）係。

16 主席：（經傳譯員）呢樣嘢係咪書面反映番呢？有冇一個手冊--巴士公司應該有啲幾  
17 有用嘅巴士車長手冊畀佢哋嘅，你有冇見過？你有見過，你可以話冇見過。

18 謝善怡女士：（經傳譯員）而家我哋冇資料，我哋要問下巴士公司先。

19 主席：（經傳譯員）我哋嘅文件冊係咪有車長嘅證供呀？或者可以睇下，而家可以答  
20 到我哋嘅--或者稍後答喇。

21 陳政龍先生：（經傳譯員）或者我可以總結呢一個問題，就係睇下倫敦點樣做，陳女  
22 士，你仲係咪喺 1191 頁呀？我哋頭先睇緊嗰一頁。

23 陳美寶女士：（經傳譯員）係。

24 陳政龍先生：（經傳譯員）我讀咗「進度」嘅第一段，形容番喺倫敦嘅系統而家點樣  
25 做嘅。我繼續想讀第二段，講警方數據嘅，STATS19 就係警方舊嘅系統，仲有  
26 COPA，係一個警方更新咗嘅系統，我就唔繼續講呢方面。到 1192 頁，後面嗰  
27 頁，未來嘅工作嘅標題，呢個就係佢哋交通當局要做嘅乜嘢。

28 「要花啲工夫去改進喺 IRIS、STATS19 同 COPA 嘅相容性，我哋係會繼續  
29 做嗰個複雜嘅核對嘅工作去確保每一個數據組嘅可靠性同埋相容性嘅。我哋亦  
30 都做緊一個嘅--開發緊一個軟件系統，可以係改善 IRIS 嘅數據收集嘅效率同  
31 埋係準確性嘅，因為係會由巴士公司自己嘅數據嗰度自動更新嘅。」

1 未來路向，陳女士，你覺得唔同嘅數據組能夠協同嘅話，係咪香港應該做嘅  
2 呢？即係我講緊嘅係收集數據同埋匯報嘅工作。

3 陳美寶女士：（經傳譯員）肯定係嘅，呢個係一個範疇我哋希望能夠做多啲，特別係  
4 希望能夠唔同嘅數據更加可靠同埋更加一致，目前嚟講，唔同嘅巴士營運商佢  
5 哋有自己嘅數據庫，我哋希望佢哋能夠將佢哋啲意外分類，譬如就住啲個性  
6 質或者係成因嚟分，但係啲佢哋嘅形容詞可能同警方啲形容詞可能唔一  
7 樣，因此我覺得應該有一個致嘅數據庫或者數據集，亦都係更新得更加頻密，  
8 就肯定會幫唔同嘅各方明白個情況，同埋去分析大家關注嘅事宜，同埋去採取  
9 適當嘅跟進行動。

10 我亦都想補充，專家嘅證供同埋佢哋供詞，啲呢方面嘅供詞係話畀我哋聽其  
11 實係意外嚟講，啲啲成因好複雜嘅，通常有多於一個嘅成因，啲個分析個意外  
12 好多時候都係要係詳盡由警方調查之後先至可以搵得到同埋可能經過相當嘅程  
13 序先至可以確定。但係無論如何，我哋都會係搜集第一手嘅資料同埋希望能夠  
14 係向唔同嘅巴士公司攞到一啲唔同嘅數據。

15 陳政龍先生：（經傳譯員）主席，我就已經完成咗我要探討嘅課題，但係完之前，我  
16 哋就講關於一個營運嘅手冊啲方面，其實我同事已經畀咗我，我而家畀個答案  
17 你——畀委員會，提供啲資料畀委員會。

18 KMB-8 (A)，第 3086 頁，而家已經係個螢幕度打咗出嚟，呢個係第一頁嚟  
19 嘅，呢個係九巴嘅文件，就係戶外營運同事或者員工嘅手冊，呢個就係講 2018  
20 年 1 月最後更新嘅。相關同程序有關嘅部分就特別係意外嘅時候，3123 頁嘅度  
21 可以睇到，第 8 (A)，第 3123 頁，係第 9 個部分。

22 呢個手冊就講，「如果有一個員工就係有交通意外，尚當佢係揸緊公司嘅車  
23 嘅時候，佢就應該係填咗呢一個『交通意外報告』同埋一個授權書，就係係意  
24 外七十二小時之內，如果啲個同事要住院嘅時候，佢出院之後，就儘快做。」  
25 呢個跟住就係話要係留意啲咩嘢，跟住就有幾項。

26 1、2、3、4 之後，呢度就講，就話「呢個填好咗嘅『交通意外報告』就應  
27 該係去提交畀相關嘅車廠嘅有關嘅部門，亦都係畀啲接受個報告啲個人去簽  
28 署嘅。如果佢哋就有咁做嘅時候，佢哋就話係唔會收到呢一個嘅『好服務獎  
29 賞』，亦都可能因為佢哋冇遵從相關嘅規矩，公司可能會採取呢一個紀律行動  
30 嘅。」

31 呢度講到——冇清楚講清楚就係話畀員工聽係一定要去報警嘅，雖然呢度就  
32 話可能係要提供一份嘅口供或者係呢一個嘅報告畀警方，呢個係第三段所講  
33 嘅。

34 主席：（經傳譯員）呢個嘅手冊有冇包含呢一個交通意外嘅報告呢？

35 陳政龍先生：（經傳譯員）冇，冇係我哋嘅文件冊度嘅。

1 主席：（經傳譯員）如果係咁嘅時候，我哋就要求九巴就係提供呢個相關嘅文件，致  
2 使到我哋知道究竟呢個報告嗰個需要個詳情係幾仔細，致使到運輸署可以知道  
3 呢個九巴其實係手頭上有啲咩嘢資料。

4 陳政龍先生：（經傳譯員）主席，就我哋請黃律師繼續去發問嘅。

5 主席：（經傳譯員）我希望能夠係再傾一傾關於急剎車嗰個問題，同埋九巴就係話  
6 畀我哋聽究竟呢啲嘅報告佢哋點樣處理，同埋就係關於呢個四分鐘嘅一個規定  
7 係點樣樣。

8 陳政龍先生：（經傳譯員）好，我哋睇兩份文件，會比較幫到我哋嘅。首先我哋睇一  
9 睇 KMB-12 第 4848 頁，我希望請秘書處幫一幫，就話畀我哋聽嗰個頁數，一個  
10 最近嘅文件，2018 年 10 月 3 號九巴提交嘅。

11 主席：（經傳譯員）你係同我嗰個版本一樣嘅，係咪呀？如果係咁嘅時候，我可以就  
12 睇呢一個版本。

13 陳政龍先生：（經傳譯員）我希望有個頁碼，陳女士知道究竟係講緊邊一頁。KMB 第  
14 1 號文件冊第 571 頁。

15 我澄清一點，陳女士，希望係睇到，第一，KMB-12 第 4848 頁，呢個係急  
16 剎嘅一個報告，就係由九巴提交畀我哋嘅，另外 KMB 第 1 號文件冊第 571 頁，  
17 就亦都係九巴提交嘅意見書--陳述書，佢就講到呢個嘅急剎報告係點樣編製，  
18 所以我就希望呢兩份文件就一齊併排我哋睇。

19 4848 頁，呢個係一個中文嘅報告，個英文嘅翻譯就喺 4851 頁，又或者我  
20 哋用嗰個英文嘅翻譯本，就等大家方便啲，睇起上嚟。我而家就係睇下呢個圖  
21 表，陳女士，你睇到嗰個標題就係 2018 年 2 月 6 號到 2 月 12 號嗰個急剎嘅情  
22 況，就係總次數係--或者個總時數係多過四分鐘嘅，你睇番左邊第四個，就係  
23 話急剎嘅次數，就係減速係每小時係高於 8 個公里嘅。呢個表就係咁。

24 然後我哋睇一睇嗰個形容係點樣樣，呢個咁嘅報告係應該點樣係編製出嚟，  
25 我哋睇一睇嗰個文件，我哋睇一睇就九巴呢個提交呢一份文件，第 3 段，  
26 3(B)，第 572 頁。

27 主席：（經傳譯員）第 4848 頁，呢個嘅文件係咪九巴提交㗎？

28 陳政龍先生：（經傳譯員）係，冇錯。

29 主席：（經傳譯員）係佢哋嘅紀錄當中嘅？

30 陳政龍先生：Yes.

31 主席：（經傳譯員）呢個唔係提交畀運輸署嘅一個文件，係咪？

32 陳政龍先生：（經傳譯員）就我所知，就有嘅，呢個嘅係九巴...

1 主席：（經傳譯員）呢個 4848 有冇提交畀運輸署嘅？

2 陳美寶女士：（經傳譯員）冇嘅，冇嘅。

3 主席：（經傳譯員）好，呢個係佢哋自己內部紀錄嚟嘅。

4 陳政龍先生：（經傳譯員）第 3 (B) 段係第 572 頁，佢哋就講就話呢一個車長嘅每周  
5 嘅表現點樣去做，呢個就係包括佢哋超速或者急剎等等，我就讀出嚟。

6 「呢度個車長個名就會喺佢哋嘅車長嘅表現報告嗰度寫出嚟嘅，當嗰個急剎  
7 嘅總時數或者累計時數就係——呢個嗰個減速嘅情況係相對於之前嗰一秒嘅減速  
8 係超過 7 公里」，佢哋就會寫出嚟。

9 而我哋睇番嗰個註釋，第 3 嗰度就係話「就 2018 年 8 月 1 號之前，其實  
10 佢之前嗰個嘅準則就係每秒係 8 個公里嘅。」

11 好，我哋繼續。呢個就係由「黑盒所記錄嘅，就係如果個累計嘅時數喺之前  
12 嗰個禮拜係多過四分鐘，就係會記錄。」

13 第 6 段，就係話「呢個嘅嗰個原因，急剎都會係好多原因嘅，譬如因為可  
14 能實際嘅交通嘅情況，喺某段時間係需要佢哋咁做。九巴同埋龍運嘅方法就係  
15 話去監察佢哋嗰個車長嘅情況同埋嗰個行為，而唔係即刻採取行動嘅，九巴同  
16 埋龍運巴士就唔會係有一啲好仔細嘅報告就係講急劇嘅剎車同埋加速嘅。如果  
17 做得好多次嘅時候，就會係有報告，譬如話如果係佢嗰個累計時嘅時數係多過  
18 六十分鐘，佢就會係喺個報告嗰度，而另外佢係嗰個時數係多過四分鐘嘅時  
19 候，佢哋就會有二百四十個提到嘅。因為個數據嘅數量好大，所以嗰個技術部  
20 門就會盡佢哋嘅最大能力去編製一啲報告，如果係有異常情況出現嘅時候，就  
21 會去編製呢啲報告。」

22 陳女士，我就想畀啲背景你，九巴除咗呢個嘅守則之外，亦都畀咗好多其他  
23 嘅數據我哋，但係我哋就唔會講得好仔細。

24 主席：（經傳譯員）就一個累計呢個剎車係超過四分鐘係咩嘢意思，其實係講緊係一  
25 個星期其實係講緊二百四十秒嘅，但係你就唔會話做得好頻密嘅，所以我哋就  
26 知道嗰個急剎嘅情況係幾咁頻密。

27 我哋去睇番第一頁，附件 1 (b) (1)，第 1 頁。或者我哋睇一睇呢個文件，  
28 我哋讓運輸署了解得更加好，呢個係咪喺紙張上面㗎？其實係咪喺個檔案裏面  
29 可以提供畀佢哋呢？

30 陳政龍先生：（經傳譯員）呢個係我嘅檔案，其實喺我個電腦裏面，其實都幾長嘅。

31 主席：（經傳譯員）就我相信有一啲紙張嘅版本嘅，係咪？係急劇加速其實就係好多  
32 頁嘅，但係急剎就比較少啲頁數。

33 陳政龍先生：（經傳譯員）急剎嗰個報告就係 5578 頁開始嘅，係 KMB 第 12 號嘅或

1 者係九巴 12 號嘅文件冊嗰度。

2 陳女士，我希望你呢度睇到一份文件，嗰個標題係左上角寫咗，就係附件  
3 1(b)(i)，就係急剎報告，就係特別針對幾位特別嘅車長嘅。就九巴嘅文件，  
4 一般嚟講，就其實就唔係話九巴會係定期去編製嘅，就係因為我哋委員會要  
5 求，佢哋就編製，我哋就想睇番呢個急剎嘅個別嘅事件，就講緊係四分鐘嘅急  
6 剎嘅累計時數，然後就會喺個報告裏面出現，呢啲咁嘅情況。

7 所以，陳女士，呢度就係睇到呢個一共係有十八頁，你就我哋而家睇第  
8 5578 頁嘅第一頁，呢啲嘅紀錄就係個員工嘅紀錄，員工編號 3965 嘅呢位員工  
9 嘅，你睇番呢一頁，其實好多嘅資料，關於佢哋嘅路線、時間、日期、車速、  
10 減速等等。

11 主席：（經傳譯員）呢啲咁嘅簡寫其實佢哋有冇解㗎，“ba value”咁？

12 陳政龍先生：（經傳譯員）相關嘅解釋其實就喺我哋頭先嘅 KMB 第 1 號文件冊。

13 主席：（經傳譯員）“ba value”係乜嘢呀？我哋可以推想出嚟嘅。

14 陳政龍先生：（經傳譯員）九巴就講，喺註釋第 4 號嘅時候，我哋頭先睇過講直情  
15 “ba value”就係呢個制動器嘅加速嘅值，就係同呢一秒同之前嗰秒去比較嘅。

16 主席：（經傳譯員）呢個係嗰個車速就係每個小時 5.8 嘅公里，個 ba value 就係  
17 9.5 嘅，所以相對於之前嗰一秒其實就係嗰個加速個值就係咁樣，係咪咁呀？

18 陳政龍先生：（經傳譯員）係。陳女士，由 5578 頁去到 5586 頁，你可以睇到  
19 3965 號員工嗰啲記項，然後你亦都可以睇到有關嘅員工嘅編號就變咗 63287。

20 主席：（經傳譯員）我想請問嗰一位特別嘅車長，佢大力剎車嘅累計分鐘係幾多呢？

21 陳政龍先生：（經傳譯員）根據 7(b) 嗰個文件，我都讀番出嚟先。

22 「3965 號車長嘅累計就係 6.68 分鐘，就有 401 個記項嘅」，「63287 號  
23 車長就係 395 個記項，總共係 6.58 分鐘大力剎車」。

24 陳女士，我諗你亦都睇到 63287 係由 5586 頁開始去到 5595 頁嘅，總共  
25 係有 395 個記項嘅。陳女士，從運輸署嘅角度睇㗎，你對於九巴呢一個做法有  
26 咩嘢觀察呢？基本上就係車長大力剎車方面都有一個例外嘅報告，直至到呢個  
27 車長係累積咗幾百次超越咗大力剎車嗰個門檻，即係喺某一個星期裏面，佢先  
28 至有呢啲報告，你有咩嘢觀察呀？

29 主席：（經傳譯員）或者你都想用啲時間諗一諗，我哋好快會有一個小休，就令到你  
30 可以有時間諗下呢個問題。我亦都想問，佢哋交啲咩嘢嘅報告畀運輸署嘅呢？  
31 如果有大力剎車嗰啲嘅事故。

32 陳政龍先生：（經傳譯員）我有有關嘅文件嘅，或者畀少少時間我搵出㗎。

1 主席：（經傳譯員）好呀。

2 陳政龍先生：（經傳譯員）講到話有啲乜嘢係交界運輸署，我諗陳女士都有講到嘅，  
3 就係 TD-4 1020 頁，呢一份文件最頂個度就係講到關於巴士安全監察措施嘅每  
4 月報告，陳女士剛才都講過，就係話公司係要提交一啲嘅表格，係講到關於黑  
5 盒嘅數據，佢哋啲突擊嘅檢查嘅。

6 我哋睇下最冠個度個三分之一，就係話查核黑盒嘅數據以監察巴士車長嘅駕駛  
7 行為，可以睇到就係話有幾多次突擊嘅檢查，就係喺月尾個度有幾多次咁樣嘅  
8 個案呢，譬如話個性質係超速、突然剎車啲咁樣，我哋睇到突然間剎車係有  
9 八次嘅，口頭嘅警告係有十三次嘅。

10 當運輸署收到呢一類咁樣嘅文件，就係話有八次係突然剎車嘅，呢度似乎係  
11 咁寫，運輸署會點樣去詮釋呢一個數據嘅呢？運輸署嘅詮釋會唔會認為係有八  
12 次唔同嘅事件呢？即係話分開有八次突然間剎車抑或係點呢？

13 主席：（經傳譯員）或者我哋而家休息一陣，等你去考慮下呢一個問題，即係當我哋  
14 小休嘅時候。我哋而家小休十五分鐘。

15 陳美寶女士：（經傳譯員）多謝主席。

16

17 下午 4 時 15 分聆訊押後

18

19 下午 4 時 32 分恢復聆訊

20 出席人士如前。

21

22 主席：（經傳譯員）陳律師。

23 陳政龍先生：（經傳譯員）陳女士，喺小休之前問咗你兩個問題嘅，第一，運輸署嘅  
24 角度嚟講，你對於九巴嘅做法有咩嘢觀察？即係關於用力剎車係唔會每一次做  
25 一個報告，只係如果有一個巴士司機係某一個禮拜係累積咗幾百次咁嘅情況先  
26 會有個報告；第二，關於每個月嘅報告，即係 TD 文件冊第 4 號 1020 頁，當運  
27 輸署收到報告，見到其中有一個嘅記項就係有八次嘅突然嘅急速剎車，係點樣  
28 處理呢個數據呢？或者陳女士可唔可以回答呢兩個問題？

29 陳美寶女士：（經傳譯員）我會答第一個問題，同埋我邀請我嘅同事回應第二個問  
30 題。

31 第一個問題就係有黑盒嘅功能去顯示一啲嘅事件嘅報告，就係睇下用力剎車  
32 嘅情況，我哋預期巴士公司係認真看待點樣使用呢一個功能同埋啲數據去密切

1 監察巴士司機嘅表現。

2 而黑盒嘅數據，單憑數據就未必可以係有一個嘅結論司機係疏忽駕駛，但係  
3 可以係作為一個理據，巴士公司可以進一步調查。如果有閉路電視監察嘅系統  
4 同埋喺車上有便裝嘅調查員嘅話，係可以進一步去睇下觀察一下巴士司機嘅表  
5 現，但係毫無疑問黑盒嘅數據係好重要，亦都提供一啲資料作為根據畀佢哋去  
6 睇下巴士車長有乜嘢不當嘅行為。

7 我而家請黃志光先生回應番關於黑盒嘅數據係要求巴士公司提供咩嘢資料。

8 黃志光先生：（經傳譯員）主席，基本上螢幕上顯示嘅...

9 陳政龍先生：（經傳譯員）即係 1020 頁，係運輸署嘅文件冊第 4 冊。

10 黃志光先生：（經傳譯員）呢個係由運輸署決定，我哋要求巴士公司提交有關嘅數  
11 據，由今年 1 月已經開始。

12 你提到突然剎車嘅問題，左手邊個欄目顯示“400”，我哋只係要求巴士公  
13 司提供佢哋搵到嘅不當嘅行為有幾多個個案，至於突然剎車，我哋唔可以確認  
14 係唔係根據黑盒嘅突然加速或者剎車嘅數據，或者巴士公司可能會進一步調查  
15 一下，可能係同巴士車長會面咗，跟住先有呢個數據嘅，我哋呢個就係收到嘅  
16 就係咁。

17 主席：（經傳譯員）可唔可以協助下我呢？你提到呢個數目字“400”係咩嘢意思？

18 黃志光先生：（經傳譯員）呢個係即場嘅臨時嘅一個檢查。

19 主席：（經傳譯員）即係相比起一個例行檢查，係咪呀？上面嗰一格就係寫住「例行  
20 嘅檢查」。

21 謝善怡女士：（經傳譯員）巴士公司突擊檢查就唔係例行檢查，通常因為有投訴，而  
22 突然間作出嘅，而例行檢查就係上面 8552。

23 主席：（經傳譯員）但係嗰度冇講剎車嘅，淨係講緊超速啫，即係佢哋係有檢查超  
24 速，但係冇突然剎車。

25 謝善怡女士：（經傳譯員）超速呢個就係根據黑盒嘅數據產生出嚟嘅報告，但係對於  
26 突擊檢查就係因為有人投訴，而剎車好多時候要調查埋譬如話閉路電視嘅數  
27 據，而唔可以淨係用黑盒嘅數據去指稱司機疏忽嘅，佢哋要進一步調查先可以  
28 將佢定性為係唔係不當行為。

29 主席：（經傳譯員）即係話超速方面就會產生一啲嘅例外報告嘅？

30 謝善怡女士：（經傳譯員）超速就係咁嘅情況。

31 主席：（經傳譯員）但係如果係剎掣嘅就有喇？

1 謝善怡女士：（經傳譯員）我哋嘅理解，佢哋可以設定一個界限值嘅，就係而家就唔  
2 會話去即刻產生一個報告，因為佢哋需要進一步調查。

3 主席：（經傳譯員）我哋處理一下個事實先，即係話急剎係唔會因為咁產生報告嘅？

4 謝善怡女士：（經傳譯員）據我哋理解，就係咁嘅。

5 主席：（經傳譯員）而突擊檢查嘅報告係因為有投訴，佢哋係就住個投訴去調查所得  
6 嘅？

7 謝善怡女士：（經傳譯員）係。

8 主席：（經傳譯員）但係其實我哋見過有咁多頁嘅數據，即係話係已經有現成嘅數  
9 據，去監察理解到底急剎呢個情況係有幾嚴重？

10 謝善怡女士：（經傳譯員）係。

11 主席：（經傳譯員）其中一個因素係要急劇剎掣嘅，譬如由 8 公里而家減到去 7 公  
12 里，講緊每秒嘅改變就係 0.2G 嘅，佢哋唔係監察 0.4G 嘅，咁唔咁呀？

13 陳美寶女士：No.

14 岑毅安先生：（經傳譯員）正確嘅，喺時速 7 公里每秒嘅轉變就係等如 0.2G 嘅。

15 主席：（經傳譯員）當然對於喺巴士站立嘅乘客就會有問題喇。係嘅，陳大律師。

16 陳政龍先生：（經傳譯員）主席，我已經完成提問喇。我而家請黃大律師繼續。

17 主席：（經傳譯員）唔該晒。黃大律師，畀少少時間我去處理一下呢度啲文件先。

18 陳政龍先生：（經傳譯員）主席，黃大律師就請我唔好坐低住。

19 主席：（經傳譯員）或者佢可能得到我嘅鼓勵。

20 陳政龍先生：（經傳譯員）原因係咁嘅，因為黃大律師就幫忙我就搵到啲報告，就睇  
21 番話巴士司機收到咩嘢指示，如果遇到巴士有意外嘅時候。或者我可以先邀請  
22 主席睇番文件冊 10 (A)，4190-1 頁，係 4161 頁嘅，呢個中文版，英文譯本就  
23 係 4190-1 頁。

24 主席：（經傳譯員）係。

25 陳政龍先生：（經傳譯員）而家喺你面前有嘅文件就係話如何處理交通意外嘅指引，  
26 係九巴嘅。我哋可以睇下最後一點，關於交通意外報告，主席，你睇番附件  
27 II，即係 4190-31 頁，你可以見到嘅，交通意外報告表。4190-29 頁就應該  
28 係佢英文譯本。

29 主席：（經傳譯員）有冇一個更加清晰可以閱讀㗎？因為呢個睇落，係一個掃瞄嘅版  
30 本。

1 陳政龍先生：（經傳譯員）或者我哋之後可以同九巴聯絡攞番嘅。

2 有趣嘅地方，就係我想邀請委員會留意 4190-38，呢個就似乎係一個標準  
3 嘅一個表格，係尋求乘客嘅同意唔好去警方嗰度作出投訴，即使有受傷。即係  
4 似乎唔係話理所必然一定係有事件，就會去向警方舉報嘅。

5 主席：（經傳譯員）係，唔該。

6 陳政龍先生：（經傳譯員）黃大律師亦都好幫手，搵到一個係交通意外報告表，一個  
7 更加容易閱讀，清晰嘅，呢個係喺 4397 頁嘅，九巴嘅文件冊 10(B)。

8 主席：（經傳譯員）似乎喺呢個報告表缺乏嘅資料，相比起喺倫敦嘅交通局個網站  
9 嘅，就係意外嘅傷亡或者意外嘅結果，係咪需要當場接受治理定留院，但係呢  
10 度係冇提到受傷嘅性質嘅，定話係有啲譬如話死亡、留醫、出院呀咁樣。

11 陳政龍先生：（經傳譯員）係，喺呢一個傷亡者資料嗰度係有啲空格可以剔嘅，有  
12 「死亡」、「留醫」、「出院」、「離開現場」、「未能確定」，似乎有嘅部  
13 分就係分類，呢個可能係其後分析嘅時候更加有用，睇下係咪一個滑倒、絆倒  
14 或者跌倒定係一個失去平衡嘅情況。

15 主席：（經傳譯員）其實可以設計一個範本要求巴士公司向你提供一啲資料，等你可  
16 以改善你嘅數據庫，因為你可以要求佢哋提交咩嘢資料。

17 陳美寶女士：（經傳譯員）係，係好重要嘅，同埋我哋點樣可以喺個範本入面形容，  
18 喺個報告入面反映，呢一個當然我哋係會考慮嘅。

19 主席：（經傳譯員）唔該。

20 陳政龍先生：（經傳譯員）主席，或者我而家嘗試再一次將個時間交界黃大律師。

21 主席：（經傳譯員）好。

22 黃女士：（經傳譯員）唔該晒主席，唔該晒陳女士。

23 各位，我會問幾個範圍嘅問題嘅，第一個範圍就係呢一個嘅車速檢討嘅小組  
24 委員會佢嘅功能同你喺新嘅文件附件入面提到道路安全有咩嘢關係同埋個關係  
25 係乜嘢。首先我想講，我哋由啲證供入面聽到運輸署有同你哋傾關於車速限制  
26 嘅就包括係運輸署嘅代表，就有兩個非政府組織，就係香港車輛組織...

27 主席：（經傳譯員）我諗係應該有一個翻譯就係關於係高級嘅司機？

28 黃女士：Yes.（經傳譯員）同埋就係警方嘅代表，係咪呀？

29 邱國鼎先生：（經傳譯員）冇錯。

30 黃女士：（經傳譯員）我哋亦都聽到證供就係話會議召集人就係運輸署嘅助理署長  
31 嘅？

1 邱國鼎先生：Correct.

2 黃女士：（經傳譯員）運輸署亦都係提供秘書處嘅服務嘅，而個工作小組，我想問一  
3 問，就係嗰個功能係乜嘢嘢--工作小組會唔會考慮基於一啲客觀嘅事實同埋評  
4 審，就係睇下嗰啲意外嘅數字，就去決定係會唔會建議某一啲嘅道路應該係更  
5 改個時速限制？

6 主席：（經傳譯員）問呢個問題之前，呢個嘅工作小組嘅委員會喺我哋嘅文件冊之中  
7 有冇提到㗎？

8 邱國鼎先生：（經傳譯員）喺 10 號文件，TD-1，...

9 黃女士：（經傳譯員）TD-1 嘅第 120 頁至到 121 頁。

10 主席：（經傳譯員）呢個係工作小組還是係一個委員會？

11 邱國鼎先生：（經傳譯員）呢個係一個工作小組。

12 主席：（經傳譯員）唔該。

13 邱國鼎先生：（經傳譯員）呢個速度限制檢討工作小組主要嘅目的就係提供意見畀運  
14 輸署要唔要檢討速度限制同埋點樣做，嗰啲委員亦都會係提供意見，佢哋基於  
15 四個主要嘅因素，第一個就係將嗰個相關道路嗰個意外嘅紀錄或者歷史；同埋  
16 嗰個路面嘅情況；第三，就係話呢一條道路同佢相近連接嘅道路嗰個嘅速度限  
17 制有冇分別或者改變；第四，就係話汽車嗰個速度，就係話我哋實際嗰個車  
18 速。

19 主席：（經傳譯員）呢個係講緊第八十五個嘅分位？

20 邱國鼎先生：Yes.

21 黃女士：（經傳譯員）我知道工作小組就每季係會開會嘅，我哋有證供話畀我哋聽就  
22 運輸署佢決定究竟係邊一條路去睇嘅，係咪㗎？

23 邱國鼎先生：（經傳譯員）係嘅。

24 黃女士：（經傳譯員）如果你有一個情況，就係話你接到投訴話係區議會提交嘅投  
25 訴，就係話有某一啲嘅道路需要係檢討個車速限制，呢個咁嘅意見就點樣可以  
26 交到畀個工作小組嗰度睇呢？

27 邱國鼎先生：（經傳譯員）如果區議會有意見或者建議，佢哋會搵我哋嘅區域嘅工程  
28 師，嗰啲工程師就根據我頭先講嘅準則，就睇下需唔需要建議車速嘅限制會改  
29 變，主要考慮三點嘅，個交通嘅事故意外有冇改變同埋嗰個道路嘅環境有冇改  
30 變，如果有需要嘅時候，佢哋就會係編製一個報告，然後提交畀工作小組去考  
31 慮。

32 黃女士：（經傳譯員）你就提過就話有冇意外有冇咩嘢改變，咩嘢意思呢？

1 邱國鼎先生：（經傳譯員）其中一個嘅準則就係嗰個意外嘅歷史，我哋通常就會計算  
2 每一年嗰個意外率，如果嗰個區域嘅工程師發現嗰個意外嘅數目突然之間增加  
3 咗，佢哋就會做一個嘅速度限制嘅檢討。

4 主席：（經傳譯員）我哋點樣去定義乜嘢叫做意外呢？

5 邱國鼎先生：（經傳譯員）呢個就係嗰個個人受傷率，相比於成個香港嗰個受傷率，  
6 即係話相關嗰個道路嗰個率就係同全港嘅受傷率係比較會唔會佢哋係特別高。

7 主席：（經傳譯員）如果有人係受傷嘅，你就會去搜集一啲數據？

8 邱國鼎先生：（經傳譯員）係，冇錯，係。

9 主席：（經傳譯員）如果一啲人離開咗、走咗，我哋就唔會嗰啲數字可以反映出嚟  
10 嘅？

11 邱國鼎先生：（經傳譯員）就我哋會睇番個紀錄。

12 主席：（經傳譯員）其實你首先要有人受傷，然後你先至係搜集嗰啲數據，係咪呀？

13 邱國鼎先生：（經傳譯員）係呀。

14 主席：（經傳譯員）唔該。

15 黃女士：（經傳譯員）你提到意外率，如果佢係要計算落意外率，就要有人受傷，如  
16 果--或者你係舉一個例子，如果譬如話喺一個咁嘅情況，大埔道，你就會將佢  
17 嘅數據就會同另外邊個區比較，然後先至將意見提交畀工作小組？

18 邱國鼎先生：（經傳譯員）我哋就會睇番全香港嘅數字。

19 黃女士：（經傳譯員）如果喺大埔道嚟講，佢就係屬於邊個區㗎？

20 邱國鼎先生：（經傳譯員）我哋就會睇番大埔道嘅某一個嘅路段，然後我哋就睇番嗰  
21 個意外個數目，然後就計算出意外率，然後將佢同全港嘅意外率去作比較。

22 主席：（經傳譯員）唔好意思，我要打岔一下。意外率係每乜嘢嘅意思呢？

23 邱國鼎先生：（經傳譯員）係每百萬行車公里嘅意外率。

24 主席：（經傳譯員）唔該。

25 黃女士：（經傳譯員）你又提到每百萬行車公里嘅意外率，你又有提到就話呢啲意外  
26 率一定係要有人受傷先至計入去，係咪運輸署其實就將佢改一改，就其實就係  
27 話有人受傷嘅意外率，每百萬行車公里？

28 邱國鼎先生：（經傳譯員）我哋真係會淨係睇有人受傷，我哋先至係叫嗰啲做係交通  
29 意外嘅。

1 黃女士：（經傳譯員）唔該。

2 主席：（經傳譯員）點解呢？

3 邱國鼎先生：（經傳譯員）因為我哋就會睇番警方嘅數字，我哋只係睇到有人受傷嘅  
4 意外嘅數字嘅啫，我知道譬如有一啲嘅意外，有一啲嘅車佢就係撞到嗰啲路邊  
5 嘅情況，但係佢哋就離開咗嗰啲車，所以佢哋就唔應該——佢哋唔會係呢啲所有  
6 嘅意外都係有紀錄嘅，因為好多時候嗰個司機，其實佢就離開嘅即刻，當中亦  
7 都係冇人受傷。

8 主席：（經傳譯員）但係好明顯呢個都係意外㗎，或者係有一個彎位，其實嗰啲車成  
9 日都會撞到嘅。

10 邱國鼎先生：（經傳譯員）咁係根據我哋嘅規例，就係只係有人受傷嘅意外先至係需  
11 要係向警方報告嘅，如果其他意外，佢哋就唔需要報警嘅，所以因此我哋就有  
12 呢方面嘅意外嘅數字。

13 主席：（經傳譯員）我明你講乜，呢個係法律就話有人受傷嘅意外先至係要報警，但  
14 係如果架車係壞咗，可能嗰個司機係走咗嘅，但係好明顯其實係有意外嘅，譬  
15 如話有嗰個燈柱撞低咗等等。

16 邱國鼎先生：（經傳譯員）對唔住，我哋喺計算嗰個速度限制嘅時候，我哋就唔計呢  
17 一類嘅意外嘅。

18 主席：（經傳譯員）好。

19 黃女士：（經傳譯員）我又想問一問呢一個關於意外率嘅度，我就譬如話有好多人喺  
20 呢一段嘅車速嘅度，喺呢個道路嘅度超速，警方就發出咗好多張罰款通知書，  
21 我哋又知道有某一啲嘅意外嘅資料就會同呢一個嘅運輸署一齊去分享嘅，但係  
22 關於呢個定額罰款通知嘅呢啲資料會唔會係交畀運輸署去知悉㗎？我哋講緊超  
23 速

24 邱國鼎先生：（經傳譯員）我哋警方就發出呢個告票咁樣，或者係，呢個嘅意外率裏  
25 面係冇反映出嚟。所以點解我哋考慮意外率嘅，淨係意外率，或者大部分嘅車  
26 都係有超速嘅，意外率仍然都係好細，所以其實個車速可能有問題嘅，就可能  
27 嗰個車速有時候會係太慢，所以咁多車都會係超速，而同時個意外率仍然都  
28 係好低嘅。

29 主席：（經傳譯員）嗰個問題其實係警方有冇提供佢哋嘅數據，就係講關於就係佢哋  
30 關於超速發出嘅定額罰款通知書，關於某一個道路？

31 邱國鼎先生：（經傳譯員）冇，冇，冇，就係關於我哋檢討車速限制嗰方面嗰個工作  
32 嚟講，佢哋冇畀一啲呢啲資料我哋。

33 黃女士：（經傳譯員）你可唔可以畀一個大概嘅數字畀我哋？你講到就係關於呢個意  
34 外率就係由當區嘅工程師去睇嘅，而將佢係同當區嚟再去比較嘅，你可唔可以

1 大概嘅數字畀到我哋？個數字去到乜嘢位，然後你先至會去睇--工作小組會去  
2 睇一睇呢一個嘅路段需唔需要檢討個速度限制呢？

3 邱國鼎先生：（經傳譯員）我可以畀啲數字你，喺全港嚟講，意外率，全港，就唔係  
4 一個特別嘅區域，每年我哋都會發布呢個意外率嘅數字嘅，全港意外率，2017  
5 年每百萬行車公里 1.15，意思就係話如果呢個道路嘅路段個工程師發現其實呢  
6 個意外率係高於 1.15，佢哋就會諗下要唔要檢討個速度限制。

7 主席：（經傳譯員）你呢啲嘅資料有冇喺我哋嘅文件冊嗰度有㗎，喺邊一張文件呀？

8 邱國鼎先生：（經傳譯員）除咗意外率之外--或者我哋有嗰個意外率睇到，佢哋都會  
9 係定期去檢討某一個路段嘅車速限制嘅。

10 主席：（經傳譯員）我哋喺邊度去睇到呢個嘅數字，就係講緊 2017 年每百萬行車公  
11 里嘅意外率？

12 邱國鼎先生：（經傳譯員）我哋運輸署每一年都會係有一個小冊子，係講緊道路交通  
13 意外嘅，喺運輸署嘅網頁都有嘅。

14 主席：（經傳譯員）黃律師，係咪喺我哋嘅文件冊當中？

15 黃女士：（經傳譯員）冇，我有見過。我哋可能遲少少會提供。

16 主席：（經傳譯員）係喺網上可以睇到嘅？

17 邱國鼎先生：Yes.

18 主席：（經傳譯員）或者我哋睇一睇，睇下可唔可以搵得出嚟。係第幾頁呀？

19 邱國鼎先生：（經傳譯員）第 9 頁嘅。係，冇錯，就係呢一頁，我哋睇落少少，  
20 1.15，見到呢度。

21 主席：（經傳譯員）我哋可唔可以打印呢一份出嚟，然後我哋分發畀大家？

22 黃女士：（經傳譯員）就根據呢個圖表，呢度有講話係全港㗎㗎。

23 主席：（經傳譯員）會唔會喺呢啲數字嘅其他嘅部分可以睇到呢一個嘅形容呢？

24 邱國鼎先生：（經傳譯員）呢個嘅圖表就係講全香港嘅。

25 主席：（經傳譯員）但係會唔會好清楚喺邊一度講明呢個係一個全港嘅數字？

26 邱國鼎先生：（經傳譯員）我哋睇 2.13，圖表 2.13。

27 主席：（經傳譯員）我哋係咪去到...

28 邱國鼎先生：（經傳譯員）係。

29 主席：（經傳譯員）我睇到喇，「所有道路」？

- 1 邱國鼎先生：（經傳譯員）係，冇錯。
- 2 主席：（經傳譯員）唔該晒。
- 3 黃女士：（經傳譯員）喺呢一個圖表就係「所有道路」係咩嘢意思呢？係咪等如係呢  
4 啲嘅被選擇嘅道路嘅所有嘅道路還是...
- 5 邱國鼎先生：係全港所有道路。
- 6 黃佩琪女士：（經傳譯員）你之前嘅作供，就係話就嗰個工程師就會睇一睇嗰個意外  
7 率--全港嘅意外率，呢個圖表係咪其實可以幫到佢㗎？
- 8 邱國鼎先生：（經傳譯員）係，就全港嗰個就係話全港所有道路。
- 9 黃女士：（經傳譯員）你就會睇番你 0.13 嗰度，而唔睇 1.15？
- 10 邱國鼎先生：1.15 should be on the bottom.
- 11 主席：（經傳譯員）1.15 就係全港嘅意外率，而大埔道就係 0.13，個意外率，係  
12 咪咁呀？你睇呢兩個數字，係咪？就係某一個路段同全港嗰個點樣比較？
- 13 邱國鼎先生：（經傳譯員）係喺呢個速度限制檢討個報告之中，嗰個工程師就會揀某  
14 一段嘅道路，然後我哋就去睇，睇番過去一年所有嘅意外數字，然後我哋就計  
15 出嗰個意外率。
- 16 主席：（經傳譯員）呢個係大埔道沙田其實係講緊係一個大少少嘅範圍，而唔係淨係  
17 嗰個工程師選嘅好細嘅路段？
- 18 邱國鼎先生：（經傳譯員）嗰個界限其實就係可能有唔同嘅。
- 19 主席：（經傳譯員）大埔道就可能有唔同嘅路段嘅，係咪呀？
- 20 邱國鼎先生：（經傳譯員）係嘅。
- 21 主席：（經傳譯員）呢個就呢個數字等如係所有呢啲嘅唔同嘅路段嘅總和嘅平均，係  
22 咪？
- 23 邱國鼎先生：（經傳譯員）係。
- 24 黃女士：（經傳譯員）你剛才嘅口供就提到就算有呢個意外率，運輸署都會定期檢討  
25 不同路段嘅車速限制，你咁樣做嘅時候，個基礎係乜嘢？
- 26 邱國鼎先生：（經傳譯員）喺我哋嘅文件裏面，我哋都係提交過。
- 27 黃女士：（經傳譯員）係咪第 10 號文件呀？
- 28 邱國鼎先生：（經傳譯員）唔係，係我哋星期二提交嘅文件--唔係，應該係星期三，  
29 總言之係 10 月 3 號。係一個表嚟嘅。

1 黃女士：（經傳譯員）TD-5，喺 TD-5 第 1817 頁，係咪呢一份呢？

2 邱國鼎先生：（經傳譯員）係。

3 黃女士：（經傳譯員）喺嗰度，係 1819 頁，第 12 同埋第 13 段，或者我讀，因為  
4 咁就可以寫落去個紀錄嗰度，「我哋睇番 TD 嘅運輸署嘅文件，呢一啲嘅檢討會  
5 睇唔同嘅因素嘅，譬如意外率、實際嗰啲車嘅速度、嗰個道路嘅幾何環境，呢  
6 啲就會係定期做嘅，亦都會喺工作小組嗰度傾。同埋所有道路嘅車速檢討都會  
7 係定期咁樣做嘅，而有關嗰個頻率就會睇番唔同種類嘅道路。」

8 你就話道路可以分為三種嘅，主要幹道，就係每三十六個月，主要嘅道路，  
9 四十八個月，或者係鄉村嘅道路就係六十個月，即係五年嘅。你可唔可以話畀  
10 我哋聽咩嘢叫「主幹道路」呢？

11 邱國鼎先生：（經傳譯員）即係嗰啲最主要嘅路，亦都係最高標準，包括高速公路，  
12 通常係會將唔同嘅區域或者區係連結埋一齊嘅道路，譬如話由九龍去到新界，  
13 我哋喺呢一方面係有定義嘅，我哋係有定義嘅，即係對於主幹道，...

14 黃女士：（經傳譯員）你一係讀出嚟，一係畀個副本我哋。

15 邱國鼎先生：（經傳譯員）主幹路係有兩種嘅，第一，就係鄉村主幹道，呢啲就係將  
16 嗰啲人口中心係會連結埋一齊嘅，甚至係有唔同高度嘅入口或者出口嘅；如果  
17 係喺城市方面嘅主幹道，就會係「將唔同嘅人口中心連結埋一齊，佢係會將行  
18 人係分開同埋係有唔同嘅高度或者係層次嘅。」

19 黃女士：（經傳譯員）好。另外嗰啲區域或者係幹路，又係咩嘢嘅？

20 邱國鼎先生：（經傳譯員）區域幹路就係話將市區嘅道路組成一個主要網絡嘅，佢哋  
21 亦都係有好高嘅容量，同埋進入呢啲道路係有限制嘅，同埋係有二十四小時不  
22 准停車嘅一啲限制嘅。

23 黃女士：（經傳譯員）即係話唔單只係指市區嘅道路，亦都包括新界嘅道路？總言之  
24 係符合呢個定義，就包括？

25 邱國鼎先生：（經傳譯員）或者係新市鎮，因為新市鎮嘅性質同市區都好相近。

26 黃女士：（經傳譯員）唔好意思，我亦都要講番主幹道嗰度，係咪大概都一定係市區  
27 嘅呢？抑或都包括埋新界呢？

28 邱國鼎先生：（經傳譯員）兩樣都包括嘅。

29 黃女士：（經傳譯員）鄉村嘅道路又點呢？

30 邱國鼎先生：（經傳譯員）鄉村嘅道路係會將比較細嘅人口中心連結埋一齊，或者係  
31 將嗰啲康樂嘅地方同主要道路網絡連結埋一齊，佢會係有一啲嘅--個容量未必  
32 係好高嘅。

1 黃女士：（經傳譯員）喺嗰個註腳 1 嗰度，你就話喺大部分嘅道路，如果個時速係符  
2 合嗰個道路嘅特徵同埋佢嘅設計嘅容量，就唔會需要改變佢嘅時速嘅，所謂現  
3 行嘅道路種類係咪就係呢三類呢？

4 邱國鼎先生：（經傳譯員）你講緊大埔道？

5 黃女士：（經傳譯員）唔係，一般嚟講，你有個講法，就話現行嘅道路種類，係咪就  
6 係你 13 段所講嘅道路種類呢？係咪就係主幹道、主要幹路同埋鄉村道路呢？

7 邱國鼎先生：（經傳譯員）其實而家現行嘅道路種類係包括晒所有嘅道路嘅。當一個  
8 工程師設計一條道路嘅時候，佢要自己打算嗰個設計嘅時速係幾多嘅，如果一  
9 條路係要設計成每小時 50 公里做時速限制嘅，個道路環境或者周圍嘅環境有咩  
10 嘢改變都好，就算你檢討幾多次都好，嗰個時速都會係維持喺 50，都唔會有機  
11 會去到 70，因為嗰個原本設計嗰個時速就係 50，係考慮到有關嗰個周圍嘅限制  
12 嘅。

13 主席：（經傳譯員）但係如果有好多意外，會唔會考慮將佢減低呢？

14 邱國鼎先生：（經傳譯員）根據我哋而家嘅時速嘅系統，最低都係 50 公里。

15 主席：（經傳譯員）即係你唔會考慮再低啲嘅時速？

16 邱國鼎先生：（經傳譯員）我哋喺個文件都有提過。

17 主席：（經傳譯員）係，係，我哋之後可以分開再講呢一點。

18 黃女士：（經傳譯員）其實仲有第二部分嘅，改變時速係唔會需要嘅，除非係有一個  
19 咁嘅要求，或者除非嗰個路段嘅意外率係高過全港意外率，呢度有兩個但書，  
20 第一，就係話有要求...

21 主席：（經傳譯員）你而家讀緊邊度？

22 黃女士：（經傳譯員）註腳 1，主席，對唔住，1819 頁。即係話有要求，咩嘢意思  
23 呀？

24 邱國鼎先生：（經傳譯員）呢個就係回應我頭先所講嘅，就係話有兩個方法係可以引  
25 發一個檢討嘅，第一，就係定期嗰個，即係我哋 13 段所講嗰啲定期嘅檢討；第  
26 二，要引發時速檢討，就係公眾人士要求或者係意外率。意外率我頭先已經解  
27 釋咗，係同全港嗰個平均去比較。

28 主席：（經傳譯員）公眾嘅要求就有可能係話居民有投訴，因此區議會就向你反映，  
29 係咪呢？

30 邱國鼎先生：（經傳譯員）公眾人士。

31 主席：（經傳譯員）係咪要通過個區議會呢？

1 邱國鼎先生：（經傳譯員）有可能。

2 主席：（經傳譯員）但係喺大埔道好明顯已經有公眾要求，係咪？你覺唔覺得嗰個就  
3 係公眾要求呀？

4 邱國鼎先生：（經傳譯員）當我哋收到區議會議員嘅要求，我哋係會考慮嘅。

5 黃女士：（經傳譯員）你就話當你收到區議員嘅要求嘅時候，你就話「我哋」，「我  
6 哋」係邊個呢？

7 邱國鼎先生：（經傳譯員）一般嚟講，區議會嘅會員就會係接觸我哋區嘅工程師。

8 黃女士：（經傳譯員）即係話會係由區嘅交通工程師去審議，睇下佢會唔會係達到一  
9 個意外率，然後先至會交到去工作小組，係咪呢？

10 邱國鼎先生：（經傳譯員）係嘅。意外率係其中一個考慮，佢哋亦都會考慮個環境係  
11 咪有重大嘅改變。

12 黃女士：（經傳譯員）咩嘢叫做「環境有重大改變」？

13 邱國鼎先生：（經傳譯員）譬如話有啲新嘅發展，譬如房地產嘅發展，係會影響啲  
14 唔同車輛嘅種類或者係加咗交通流量呀咁。

15 黃女士：（經傳譯員）有冇一個機制係公眾人士或者區議員係同交通工程師嘅考慮嘅  
16 意見係不一致嘅，如果係咁，公眾人士可以點做呢？除咗不斷咁同嗰個交通工  
17 程師講，有冇一個檢討嘅機制讓呢件事可以去到車速檢討工作小組嗰度呢？

18 邱國鼎先生：（經傳譯員）根據我哋慣常嘅做法，車速檢討其實係好技術性，我哋真  
19 係要倚賴交通工程師去做咗車速檢討，然後提議有關嘅路段應有嘅車速限制。

20 黃女士：（經傳譯員）關於你講呢個現行嘅做法，呢一個交通嘅工程師，如果個意外  
21 率未達到有關嘅準則，雖然佢收到唔同嘅投訴，而區議員又唔滿意嗰啲投訴，  
22 就要求個工程師再檢討，個交通工程師會唔會就因此去做一個當地嘅視察？係  
23 咪一個慣常做法呢？

24 邱國鼎先生：（經傳譯員）係一般嚟講，交通工程師都會同有關嘅區議員一齊去實地  
25 視察，可能就算未有足夠嘅理由去引發一個時速檢討，佢都可以實地睇下可唔  
26 可以有啲交通嘅改善嘅措施。

27 主席：（經傳譯員）你意思係咩嘢呀？係咪即係話嗰啲指示牌或者喺地面畫一啲箭咀  
28 咁樣？

29 邱國鼎先生：（經傳譯員）有時如果有行人過路嘅措施，佢哋就會覺得個車速太高，  
30 行人過路比較難，就可以做啲嘢嘅。

31 黃女士：（經傳譯員）喺同一頁，我想問你關於呢一個表下面嗰一段嘅，喺過去五  
32 年，我哋檢討過一百四十三個路段嘅時速限制，亦都喺工作小組嗰度傾過嘅，

- 1 關於一百四十三個路段，有冇將佢哋分類，係屬於邊類嘅道路呢？
- 2 邱國鼎先生：（經傳譯員）有嘅，我有個紀錄嚟度。
- 3 黃女士：（經傳譯員）你可唔可以畀啲數字我哋呢？
- 4 邱國鼎先生：（經傳譯員）我而家睇一睇我係咪手上有資料先。我有一個表係列明呢  
5 一百四十三個路段屬於咩嘢嘅道路嘅種類，但係我就有一個總數話係邊一類有  
6 幾多個路段嘅。
- 7 黃女士：（經傳譯員）首先，你可唔可以畀一個平均數字我哋，每一年係檢討幾多個  
8 路段呢？
- 9 邱國鼎先生：（經傳譯員）平均嚟講，最少係二十四個路段，每一年。
- 10 黃女士：（經傳譯員）係咪一個固定嘅數字嚟㗎，抑或可以就唔同嘅情況改變？
- 11 邱國鼎先生：（經傳譯員）呢個係最細嘅數字，即係最少要檢討二十四個路段。
- 12 黃女士：（經傳譯員）你點樣選擇呢二十四個路段呢？
- 13 邱國鼎先生：（經傳譯員）係基於區域交通工程師嘅考慮。
- 14 黃女士：（經傳譯員）區域嘅工程師考慮就會基於你頭先講嘅三個準則？
- 15 邱國鼎先生：（經傳譯員）仲有就係公眾要求同埋意外率。
- 16 黃女士：（經傳譯員）有關嘅資料會唔會公布嘅呢？即係關於呢個一百四十三路段又  
17 好，二十四路段又好。呢啲咁嘅資料會唔會公布嘅呢？等公眾知道工作小組就  
18 會檢討呢二十四個路段，然後向工作小組提供意見，咁佢先開會呢？
- 19 邱國鼎先生：（經傳譯員）唔會嘅，但係最後工作小組建議改變個時速嘅話，我哋就  
20 會去諮詢區議會。
- 21 黃女士：（經傳譯員）呢一段你都有話㗎呢一百四十三個路段之中，有七個工作小組  
22 就係建議改變個時速限制嘅，首先，你可唔可以話畀我哋聽呢七個路段係屬於  
23 咩嘢嘅道路種類呢？
- 24 邱國鼎先生：（經傳譯員）呢七個路段，有兩個係主要幹路，一個就係區嘅幹路，有  
25 兩個係高速公路嘅連接路，而一個就係鄉村道路，即係話兩個係主要幹路、兩  
26 個就係區嘅幹路、一個就係鄉村道路。
- 27 黃女士：（經傳譯員）關於時速，你就話有改變過，點樣改變法呢？
- 28 邱國鼎先生：（經傳譯員）有五個路段就係減咗速，有兩個路段係加咗個時速限  
29 制。
- 30 黃女士：（經傳譯員）有邊啲嘅路段係減咗速嘅呢？

1 邱國鼎先生：（經傳譯員）你意思係要路段嗰個名呀？

2 主席：（經傳譯員）你講種類定係個名呀？

3 黃女士：（經傳譯員）我意思首先就係個種類，如果你都可以，甚至講埋啲咩嘢路段  
4 就好喇，同埋邊一年。

5 邱國鼎先生：（經傳譯員）好，我用時序嚟講，2013 年，關於減咗速嘅路段，一個  
6 係主要幹路，一個區嘅幹路，一係本地--當地嘅幹路，一個就係鄉村道路，一  
7 個就係高速公路嘅連接路，就有呢五個路段就係減咗時速限制。另外有兩個路  
8 段就係增加咗時速限制，一條就係主要幹路，另外一條就係高速公路嘅連接  
9 路。

10 黃女士：（經傳譯員）我留意到時間，主席，但係我都想再探索一下。如果你可以提  
11 供多啲資料，關於 2015 年呢五種道路種類車速限制係降低咗，同埋我哋關注嘅  
12 某啲路段，同埋點解會減咗個車速限制嘅，同埋嗰啲嘅工作小組有關嘅會議紀  
13 錄。

14 主席：（經傳譯員）證人回答問題之前，我要問下你問呢啲嘅問題有咩嘢關連呢？

15 黃女士：（經傳譯員）主席，係嘅，我想知道有咩嘢理據去傾某啲路段，工作小組；  
16 第二，就係工作小組考慮咗咩嘢，同埋喺工作小組考慮區議會投訴嘅時候，畀  
17 幾多比重去考慮。如果唔需要睇番會議紀錄都回答到呢兩個問題嘅話，我都好  
18 接受嘅。

19 主席：（經傳譯員）最終，你要知道呢個資料有咩嘢作用？

20 黃女士：（經傳譯員）去睇下我哋可唔可以改善工作小組嘅工作，又或者係喺檢討道  
21 路嘅車速限制嘅慣常做法係點，如果有收到投訴嘅時候，而唔係淨係睇嗰個嘅  
22 意外率嘅，喺全港，因為似乎係人工做出嚟嘅。

23 主席：（經傳譯員）你知唔知道呢一個大埔公路嘅基準係幾多？

24 黃女士：（經傳譯員）係嘅。

25 主席：（經傳譯員）好。畀時間你搵番啲嘅會議紀錄出嚟。

26 黃女士：（經傳譯員）你答番頭先嘅問題之前，我再問下其他問題，講番呢一個道路  
27 速度限制檢討嘅工作小組，我想問下點解起初會成立呢個工作小組呢？我哋有  
28 啲資料--或者其實你提供呢啲資料嘅，就係話喺 2000 年嘅時候成立呢個工作  
29 小組嘅，係檢討車速嘅，可唔可以解釋下點解 2000 年會成立呢個小組呢？

30 邱國鼎先生：（經傳譯員）工作小組係喺 2000 年成立，當年，我記得有立法會文件  
31 解釋係點解成立呢個工作小組檢討車速限制，因為當時有好多公眾查詢或者意  
32 見，就係話某啲嘅路段嗰個車速限制太低，而警方喺嗰啲路段又會執法，所以  
33 係公眾嘅一個要求--幾強烈嘅要求，我哋應該去檢討一下道路嘅車速限制，去

1 睇下有冇邊一啲路段嗰個車速限制可以提高。

2 主席：（經傳譯員）係邊個建議成立工作小組去處理公眾關注呢？

3 邱國鼎先生：（經傳譯員）運輸署。

4 主席：（經傳譯員）唔該。係咪喺立法會文件都有指出㗎？

5 邱國鼎先生：Yes.

6 黃女士：（經傳譯員）我哋有立法會文件而家喺畫面度見到嘅，我哋亦都會派發文  
7 件。

8 主席：（經傳譯員）喺文件冊入面有冇？

9 黃女士：（經傳譯員）對唔住，主席，暫時而家未加入去我哋文件冊，呢個係喺立法  
10 會嗰啲文件嗰度搵出嚟嘅，呢個係運房局係 2000 年嘅 1 月 24 號準備嘅文件。  
11 你頭先講嗰個係咪就係呢份嘅立法會文件，你頭先嘅證供？

12 邱國鼎先生：（經傳譯員）係嘅。

13 黃女士：（經傳譯員）唔該。而家為咗紀錄起見，我而家要講出呢一個標題係「香港  
14 車速限制」，係喺立法會嗰度交通事務委員會，由運房局提供嘅，呢一個文件  
15 就會講三件事嘅，就係車速限制分類嘅結構，同埋係點樣喺香港道路上設置道  
16 路車速限制、點樣檢討車速限制同埋交通意外同埋車速限制嘅關係。

17 到咗第 3 段，佢係講緊話譬如係低速嘅，就係喺市區或者係新市鎮嘅密集  
18 人口地區就係時速 50 公里，而中階嘅就係喺市區以外或者係新市鎮嘅密集人口  
19 地區就係時速 70 或者 80 嘅，...

20 主席：（經傳譯員）你繼續講之前，香港用呢一個方法有三個階級嘅，係已經用咗幾  
21 耐？

22 邱國鼎先生：（經傳譯員）我諗係呢個文件發出嘅時間差唔多。

23 主席：（經傳譯員）即係 2000 年？

24 邱國鼎先生：（經傳譯員）係，但係喺 2000 年之前，喺香港道路嘅車速限制一般都  
25 係分做呢三級嘅，喺呢個文件交界立法會嘅，我哋就清楚指明香港係有三級嘅  
26 車速限制，呢一個結構，即係話有三個級別嘅，而家係咩嘢狀態？

27 邱國鼎先生：（經傳譯員）仍然有效，...

28 主席：（經傳譯員）唔係，我問佢個地位係點樣嘅？係咪運輸署採納嘅方式？係咪條  
29 法例？

30 邱國鼎先生：（經傳譯員）唔係。

- 1 主席：（經傳譯員）咁係咩嘢呢？
- 2 邱國鼎先生：（經傳譯員）係我哋而家嘅做法。
- 3 主席：（經傳譯員）即係運輸署做法？
- 4 邱國鼎先生：（經傳譯員）係行政嘅做法。
- 5 主席：（經傳譯員）即係政府嘅做法？
- 6 邱國鼎先生：Yes.
- 7 主席：（經傳譯員）即係運房局嘅政策嘅做法？
- 8 邱國鼎先生：（經傳譯員）係。
- 9 主席：（經傳譯員）喺其他文件有冇提及㗎？
- 10 邱國鼎先生：（經傳譯員）除咗呢份文件，我就唔知道仲有咩嘢文件係關於車速限制  
11 嘅。
- 12 黃女士：（經傳譯員）主席，我諗更加準確咁講，就係政府嘅做法係喺運輸署嘅運輸  
13 設計計劃手冊嗰度，我就唔可以將佢講話一定係政策嘅做法。
- 14 主席：（經傳譯員）呢個係交通設計規劃手冊？
- 15 陳美寶女士：Yes.
- 16 主席：（經傳譯員）唔該。我哋已經過時㗎喇，我而家係等你黃大律師去選擇幾時完  
17 成，或者你講完某一個部分之後。
- 18 黃女士：（經傳譯員）你講過呢個手冊嘅日期係幾時㗎？
- 19 邱國鼎先生：（經傳譯員）你講係嗰個交通設計及規劃手冊？
- 20 黃女士：Yes, the transport planning...
- 21 主席：（經傳譯員）你應該話不時有更新嘅。
- 22 邱國鼎先生：（經傳譯員）我哋亦都有交一份畀秘書處嘅。
- 23 主席：（經傳譯員）係幾時開始有呢個手冊？係咪 50 年代、60 年代？
- 24 邱國鼎先生：（經傳譯員）我要去查核一下，但係據我理解，係根據英國一啲類似嘅  
25 手冊係制定嘅，再睇番香港嘅情況。
- 26 主席：（經傳譯員）係呀，我都睇過香港大學嘅一份副本，我諗係好似 60 年代寫㗎  
27 喇，係喺英國。
- 28 邱國鼎先生：（經傳譯員）可能係第一版，冇錯。

1 黃女士：（經傳譯員）呢一個車速限制嘅結構，喺手冊入面寫嘅從來有冇更新過或者  
2 檢討過？

3 邱國鼎先生：（經傳譯員）係，有關嘅章節我哋都係不時會更新嘅。

4 黃女士：（經傳譯員）你提到定期更新係有咩嘢條件你就去更新呢？

5 邱國鼎先生：（經傳譯員）如果有任何更改，譬如話海外嘅做法，我哋都會係跟番去  
6 更新嘅。

7 黃女士：（經傳譯員）或者喺下一節我哋再講詳細啲，但係我而家講番呢份立法會文  
8 件，去快啲講埋呢份嘅文件，然後我哋可以休息。我哋講到係呢份文件嘅第 6  
9 段，佢提到喺 1999 年個車速限制有檢討過，「喺英國就有一個嘅獨立嘅交通研  
10 究嘅院所，亦都係喺全球領先地位嘅，叫 TRL，就做過一個研究，關於香港嘅  
11 車速限制嘅。」而跟住嗰一段就係講佢個結果。

12 我想問嘅就係除咗 1999 年開始去請英國嘅呢一個嘅交通研究實驗所去做一  
13 個研究之外，喺近年有冇請過呢一間機構做研究呢？

14 邱國鼎先生：（經傳譯員）冇。

15 黃女士：（經傳譯員）即係呢個係唯一一個做過嘅？

16 邱國鼎先生：（經傳譯員）係。

17 主席：（經傳譯員）呢個係咪公開嘅文件嚟㗎，呢份顧問報告？

18 邱國鼎先生：（經傳譯員）應該唔係，可能係內部嘅顧問報告。

19 主席：（經傳譯員）可唔可以提交呢個報告畀我哋？

20 邱國鼎先生：（經傳譯員）可以。

21 陳美寶女士：（經傳譯員）可以，主席。

22 主席：（經傳譯員）多謝你提供呢個文件。

23 黃女士：（經傳譯員）除咗 1999 年之外，就有一個主要嘅研究或者顧問研究係睇番  
24 喺外國嘅做法，去比較香港嘅車速限制嘅結構？

25 邱國鼎先生：（經傳譯員）冇嘅，對檢討車速限制有一個特別嘅顧問報告，但係我哋  
26 喺文件都提到過啲低速嘅地區，喺歐洲一啲嘅城市係用啲較低嘅車速限制嘅，  
27 譬如係時速 20 英里，即係等如 30 公里，我哋都有研究過呢啲嘅措施喺香港是  
28 否合適。

29 黃女士：（經傳譯員）係，明白。可能係道路安全嘅審核小組嘅新嘅任務喇？

30 邱國鼎先生：（經傳譯員）唔係，呢樣嘢唔同嘅，呢個研究其實係同道路設計，睇下

1 用咁樣嘅措施係咪適合司機喺道路上用咁樣嘅低速去行駛。

2 陳美寶女士：（經傳譯員）即係話呢個道路安全審核小組無論係有冇喺度，我哋都已  
3 經係開咗一個嘅試驗計劃同埋研究㗎喇，關於個低速嘅地帶。

4 主席：（經傳譯員）係咪有好多有關嘅資料㗎？

5 陳美寶女士：Yes.

6 黃女士：（經傳譯員）你幾時開始做一個低速區嘅研究？

7 邱國鼎先生：（經傳譯員）我哋喺做易行城市嘅時候嘅研究開始嘅，呢個研究就係  
8 2017年12月開始做嘅。

9 主席：（經傳譯員）易行研究係咩嘢意思呀？

10 邱國鼎先生：（經傳譯員）即係檢討我哋現有嘅標準同埋設計，睇下有冇一啲措施或  
11 者係有創意嘅措施可以改善行人嘅步行環境去鼓勵用家多啲行路。

12 主席：（經傳譯員）係喺倫敦發展起嚟嘅，係咪呀？

13 邱國鼎先生：（經傳譯員）倫敦係我哋其中一個參考嘅地方。主席，呢個都幾有關係  
14 嘅，我都留意到喺同專家嘅討論期間講到一啲路段係喺倫敦，呢個就係我哋參  
15 照嘅地方，去做一個易行嘅研究嘅時候，去改善行人嘅步行環境嘅時候，其實  
16 亦都係睇下點樣可以改善道路同埋行人路去提高道路安全同埋改善環境嘅個氣  
17 氛嘅。亦都係某啲路段係提及到嗰啲嘅車速限制都係應該係考慮嘅。

18 主席：Yes. The two go together, don't they?

19 陳美寶女士：（經傳譯員）係呀，兩樣有關嘅。我都想提到我哋喺香港係聚焦喺市區  
20 某啲嘅路段，尤其係香港島。

21 黃女士：（經傳譯員）呢一個嘅易行或者係低車速區嘅研究係有咩嘢委員？

22 邱國鼎先生：（經傳譯員）我哋委任顧問做嘅？

23 主席：（經傳譯員）係邊個？

24 邱國鼎先生：（經傳譯員）Mott MacDonald, Mott MacDonald 顧問公司。

25 黃女士：（經傳譯員）或者喺呢個時間暫停，主席，都合適？

26 主席：（經傳譯員）係。我哋而家就會暫停，不過我要講，喺今日較早嘅時候我都提  
27 過，我哋會將而家一路打嘅謄本都會交畀羅教授，睇下佢最尾有冇問題，但係  
28 今日都係要暫停，呢個聆訊再恢復嘅時候，佢可能會問一啲嘅問題。我哋可能  
29 而家係講緊某個題目嘅，佢會去問番其他啲題目，但係佢會有機會咁樣做嘅。

30 而家我哋會暫停，然後再另定各方都方便嘅日期，即係律師同埋陳女士同埋

1           你啲同事，佢哋去搵一個日期，下一次再恢復聆訊。

2   陳美寶女士：（經傳譯員）唔該晒主席。

3   主席：（經傳譯員）我哋而家押後去另外一日繼續聆訊。

4

5   2018 年 10 月 6 日

6   下午 5 時 48 分聆訊押後

Tuesday, 16 October 2018

(10.21 am)

EVIDENCE FROM THE TRANSPORT DEPARTMENT: MS MABLE CHAN,  
MS AMY LEE, MS AMY TSE, MR PATRICK WONG, MR YK CHAN, MR  
WILLIAM SHUM, MR TONY YAU

CHAIRMAN: Good morning, Mr Chan, and good morning to your  
colleagues.

We understand that the Commissioner for Transport is  
required elsewhere at the moment, but she will join us  
when her duties elsewhere permit her to do so.

First of all, apologies to you and to everyone else  
for the delayed start. As I think a lot of people have  
experienced today, there have been transport  
difficulties, ironically, as it were, for this  
particular committee, and Prof Lo had particular  
difficulties, but now we are ready to start and I would  
ask Ms Wong to begin the questioning.

Examination by MS MAGGIE WONG (continued)

MS MAGGIE WONG: Yes. Thank you, Mr Chairman, and thank  
you, ladies and gentlemen, for coming.

I will touch upon the topic of resting facilities  
first -- I haven't finished with the topic on speed  
limit, but given it is a policy matter, I will wait  
until the Commissioner for Transport to arrive before  
further questioning.

1           So, on the resting facilities, may I ask some  
2           general questions first: can you let us know, in your  
3           new submission filed on 3 October 2018 -- you  
4           mentioned -- that's TD-1 (TD-5?) at page 1825 -- this is  
5           a paper that you submitted at annex 3, titled, "Provision  
6           of ancillary facilities for bus captains at public  
7           transport interchanges and bus termini", and if I may  
8           invite you to paragraph 13 first, at line 3. You  
9           mentioned that "the Transport Department has set up  
10          a task force on monitoring of the provision or upgrading  
11          of public transport ancillary facilities at public  
12          transport interchanges, bus stops and termini" since  
13          2007, and the representatives include the Lands  
14          Department, GPA and Housing Department as well as FB  
15          operators "have been invited to attend the task force  
16          meeting for exchanging views and reviewing the progress  
17          of the applications".

18                 Can you tell us about some of the 2017 task force:  
19          when was it set up?

20         MR YK CHAN: May I invite Mr Wong to reply to this question?

21         MS MAGGIE WONG: Yes.

22         CHAIRMAN: Certainly.

23         MR PATRICK WONG: As mentioned in the paper, I think the  
24          task force first meeting was held on 21 December and we  
25          had another meeting on 27 August.

1 MS MAGGIE WONG: So the meeting was -- the task force was  
2 only set up in December 2017; is that the case?

3 MR PATRICK WONG: Yes.

4 MS MAGGIE WONG: Can you tell us why you set up this task  
5 force?

6 MR PATRICK WONG: Basically, I think by setting up this task  
7 force, as mentioned in the paper, we noted that there  
8 are some outstanding applications, in particular for  
9 provision of ancillary facilities, in particular those  
10 submitted to other departments concerned.

11 It took rather a long time to process this  
12 application, so, with a view to expediting the handling  
13 or assessing this application, we set up this task force  
14 to take the lead to invite the departments concerned as  
15 well as the franchised bus operators to come together,  
16 so that we can have, you know, a face-to-face discussion  
17 so that we can find out how we can expedite and what  
18 sort of problems are encountered in assessing this  
19 application, and so forth.

20 MS MAGGIE WONG: Is it intended that this task force would  
21 be a standing committee, rather than on an ad hoc basis?

22 MR PATRICK WONG: Basically, we target to hold such task  
23 force meetings ongoingly, until and unless we have  
24 resolved all the applications, especially those  
25 complicated or difficult ones, may I say, could be

26

1 settled.

2 May I supplement some more, because for talking  
3 about ancillary facilities, we are talking about -- in  
4 addition to handling such application we are also  
5 discussing with the concerned department about, at the  
6 request of the bus companies, how to improve the design  
7 or in particular the size of such facilities like the  
8 rest rooms, because, as mentioned in the paper, somehow  
9 the TD is not delegated to approve the size of such  
10 facilities, over something. In order to improve the  
11 efficiency, we suggested to, say, the Lands Department  
12 to explore whether the delegation could be provided to  
13 Transport Department to approve such applications.

14 CHAIRMAN: Can you just help me with the acronyms -- what  
15 does "GPA" mean?

16 MR PATRICK WONG: Government Property Agency.

17 CHAIRMAN: Thank you.

18 MS MAGGIE WONG: Thank you, Mr Wong. You mentioned about  
19 the limitations of the Transport Department in approving  
20 kiosks or the size of the kiosk.

21 You mentioned in your submission, I believe at  
22 paragraph 10 -- in fact, you stated there that there are  
23 four venues in which the franchised bus operators can  
24 apply for permission or submit applications to build  
25 facilities, and the first one is of course the Transport  
26

1 Department, under the Land (Miscellaneous Provisions)  
2 Ordinance, but the Transport Department, in approving  
3 the installation of ancillary facilities, would be  
4 limited to a size not exceeding 4.62 square metres base  
5 area and 7.09 square metres roof area on unleased and  
6 unallocated government land.

7 That's the first situation.

8 The second is if the size exceeded the specified  
9 area, they would have to apply to the Lands Department  
10 directly.

11 The third is where it concerned public transport  
12 interchanges that have been assigned to the Financial  
13 Secretary Incorporated, the franchised bus operators  
14 have to submit applications to Government Property  
15 Agency directly.

16 And the fourth is where the bus termini or public  
17 transport interchanges fall within the jurisdiction of  
18 the Housing Department or Link REIT areas, FB operators  
19 will have to submit applications to them directly.

20 So there are four venues.

21 Can I ask about this: have these four departments  
22 considered collaborating their efforts or setting up  
23 a task force so that, when the FB operators or  
24 franchised bus operators apply for permission, there  
25 could be a uniform channel or there could be one channel  
26

1           that they could achieve that purpose, rather than going  
2           through different places?

3       MR PATRICK WONG: Basically, at the moment, the FB operators  
4       have to submit application to the concerned departments  
5       direct, but for some cases, like the GPA, because -- let  
6       me explain, for the GPA, why GPA, because the PTI are  
7       actually owned by the FSI, and the Transport Department  
8       basically is the coordinator for that PTI. So, for  
9       handling such application, Transport Department can play  
10      a role to pass the application on some cases to the GPA  
11      for processing, because normally GPA will ask for the  
12      advice from TD, whether we support the application  
13      first, so that they can process the subsequent  
14      formalities.

15           And for the oversize facilities, because as  
16      mentioned in the paper, because the constraint or -- may  
17      I use the word "constraint" of the law, so it has to be  
18      processed by the Lands Department, and they have the  
19      standing procedures to process the application, like  
20      other provision of facilities.

21           And for the Housing Department, because they are  
22      under the Housing Authority, and they have procedures  
23      too.

24           So, to answer your questions, except GPA -- for TD,  
25      we can work together with GPA to pass or in the process  
26

1 of applications. For the Lands D and Housing  
2 Department, normally the franchised bus operators are  
3 required to submit their applications to them for  
4 processing.

5 But for the task force, we sort of try to get the  
6 concerned departments together so that to discuss  
7 whether the processing of the application could be  
8 streamlined or fast-tracked.

9 CHAIRMAN: When did the Lands Department delegate authority  
10 to the Transport Department to approve these  
11 constrained-size applications?

12 MR PATRICK WONG: I don't have the information but it's been  
13 delegated for some time because, according to my memory,  
14 it was something like 2 square metres, very small one,  
15 some years ago, but I don't have the information now  
16 about that.

17 CHAIRMAN: This delegation as it currently stands, is it  
18 five, ten, 20 years old? Do you have some idea? If you  
19 can't, say so, and then you can provide it to us later.

20 MR PATRICK WONG: I think maybe more than 20 years.

21 CHAIRMAN: And why is it constrained to these peculiar  
22 figures, 4.62 square metres base? Where does that come  
23 from?

24 MR PATRICK WONG: The size, basically, we took into account  
25 the advice and, at the time, the size of the provision  
26

1 of similar activities normally used by the franchised  
2 bus operators.

3 CHAIRMAN: So, whenever this was done, you took the existing  
4 size of facilities; is that it?

5 MR PATRICK WONG: Yes.

6 CHAIRMAN: And these are these curious kiosks, I think  
7 they're called, that one finds in bus stations. They  
8 come from decades ago, do they not?

9 MR PATRICK WONG: I think there were different types of  
10 kiosks, as Mr Chairman mentioned. For those, some older  
11 ones, they have around 2 metres square size still exist,  
12 as far as I know, and for the size mentioned here,  
13 I think -- I quote example, it's like the size,  
14 Mr Chairman, you went to the West Kowloon Station, the  
15 size of the rest room is within the size of that -- the  
16 size so that we can approve, the TD can approve, with  
17 the delegation from the Lands D direct.

18 CHAIRMAN: Has no consideration been given to enlarging  
19 these rest facilities from these extraordinarily cramped  
20 conditions?

21 MR PATRICK WONG: Yes. I think, as mentioned in the paper,  
22 at paragraph 16, we have actually discussed with the  
23 Lands D whether to enlarge the size of such facilities  
24 to 6.21 metres squared base area, and 11.14 metres  
25 squared for the roof area.

26

1 CHAIRMAN: When was that suggestion first put forward?

2 MR PATRICK WONG: I don't have the actual time, but  
3 according to my colleagues, around 2015 to 2016. We  
4 have to check.

5 CHAIRMAN: Why is that not a matter that's been resolved, if  
6 that's been there for two to three years?

7 MR PATRICK WONG: I think we did chase the Lands Department  
8 before that, even before the hearing, as far as I know,  
9 and still it's being handled by the Lands Department.

10 CHAIRMAN: So if, as I imply by my question, there's been  
11 delay, it's the Lands Department who are at fault? Is  
12 that what we are to understand?

13 MR PATRICK WONG: I think, to put the things correct,  
14 I think, basically, through the delegation, I think the  
15 TD can approve the provision ourselves, so we can  
16 fast-track the process, the applications. Actually,  
17 now, the bus companies can apply to the Lands D, but for  
18 such provision they have to be considered with other  
19 formalities, like they have to enter a tenancy agreement  
20 and pay the rent, and so on, and so forth.

21 So we are hoping to have that delegation soon so  
22 that we can adopt the fast-track mode.

23 CHAIRMAN: To try to persuade you to answer my question  
24 directly, if there is culpability in delay, it's not the  
25 Transport Department? You have made your request. The  
26

1 delay is caused by the Lands Department; do I understand  
2 you correctly?

3 MR YK CHAN: Mr Chairman, the Transport Department is  
4 discussing with the Lands Department to enlarge the size  
5 of the kiosks, to be approved by the Transport  
6 Department. I think different departments will have  
7 their own priorities, and also procedures to follow.

8 CHAIRMAN: So is the answer, "Yes, it's the Lands  
9 Department"?

10 MR YK CHAN: I would say we are still discussing with them.

11 CHAIRMAN: Well, is it the Transport Department's  
12 culpability? Whose is it?

13 MR YK CHAN: I cannot say.

14 CHAIRMAN: Really?

15 Thank you.

16 Ms Wong.

17 MR YK CHAN: Can I also supplement a point here? For those  
18 small -- the size that we have been delegated with the  
19 authority to approve nowadays, the bus companies also  
20 have options to apply not only one kiosk. So in terms  
21 of size, really the bus companies can see if they have  
22 the need for more space, then they can certainly --

23 CHAIRMAN: Quite obviously they have the need for more  
24 space. Visiting any bus station tells you that.

25 MR YK CHAN: And indeed more than one kiosk has been  
26

1 approved in some the PTIs, public transport  
2 interchanges, for them to use.

3 CHAIRMAN: This is a sticking-plaster approach; it is not  
4 a solution to what is an obvious problem, is it?

5 MR YK CHAN: No.

6 CHAIRMAN: Ms Wong.

7 MS MAGGIE WONG: You earlier stated that you have discussed  
8 with the Lands Department about this enlargement of the  
9 kiosk, the size of the kiosk. Do you have any written  
10 correspondence about this?

11 MR PATRICK WONG: Yes.

12 MS MAGGIE WONG: Would you be happy to provide to us?

13 MR PATRICK WONG: We can provide afterwards.

14 CHAIRMAN: What we would ask for is correspondence that  
15 illustrates the chronology of the requests and the  
16 responses, so that we can understand from the documents,  
17 no doubt, where the problem lies in this delay.

18 MS MAGGIE WONG: Thank you.

19 May I just clarify one answer that you provided  
20 earlier about this delegation having been there for  
21 20 years. Is it the size -- also include the size of  
22 the ancillary facilities with that specific area? Is it  
23 in place for over 20 years; is that the case?

24 MR PATRICK WONG: I think the delegation is with the size,  
25 and as far as I recall, it was about 2 square metres.

26

1 MS MAGGIE WONG: I mean how old is this figure implemented,  
2 this 4.62 square metres' space area, for how long or  
3 since when?

4 MR PATRICK WONG: I think we have to check and advise.  
5 Around 2000, but we have to check the exact year.  
6 Roughly.

7 MS MAGGIE WONG: Thank you.

8 Can I ask, before I go into some documents, what is  
9 the role of the Planning Department in terms of granting  
10 ancillary facilities to the franchised bus operators?  
11 What is the role of the Planning Department?

12 MR PATRICK WONG: As far as I know, I think the Planning  
13 Department is not too involved in the actual  
14 construction or planning of the PTI, because the  
15 Planning Department would, as far as I know, it's to  
16 decide or set the land status for that particular piece  
17 of land. If it is designated for the construction of,  
18 say, residential development or a housing estate, the  
19 relevant -- may I say it's a project proponent, say, for  
20 the development of such piece of land, for example  
21 Housing Department or Housing Authority or some private  
22 developer, they will propose in the construction of such  
23 residences or facilities the need to include a public  
24 transport interchange, something like this, and we will  
25 discuss with the project proponent on the actual

26

1 requirement.

2 MS MAGGIE WONG: So it is at the planning stage of the  
3 construction of bus facilities, is that the case, that  
4 the role is mainly to do with the planning of the  
5 construction of the bus terminus?

6 MR PATRICK WONG: I think it would not be construction but  
7 the designation of the piece of land for the particular  
8 use and any requirement for the use of such land, and  
9 conditions, and so forth.

10 MS MAGGIE WONG: Is there, within the Transport Department,  
11 a Transport Planning and Design Manual governing the  
12 provision of passenger facilities and also facilities in  
13 general for public transport interchange, et cetera; can  
14 you confirm that?

15 MR PATRICK WONG: Yes.

16 MS MAGGIE WONG: Which section would that be?

17 MR PATRICK WONG: I think it's volume 9, chapter 2.7.

18 MS MAGGIE WONG: What about the public transport  
19 interchange; would that be chapter 8 as well?

20 CHAIRMAN: Mr Wong said chapter 2.7. What do you mean by  
21 "chapter 8 as well"?

22 MS MAGGIE WONG: Chapter 2, is that related to -- first of  
23 all, do you mind telling us what chapter 2 is?

24 MR PATRICK WONG: I'm not sure about the source of your  
25 information, I think according to TPDM they have  
26

1 different volumes, and for public transport, it's under  
2 volume 9, and there are different chapters, and  
3 according to my information here, chapter 2.7 is about  
4 the size standards for bus terminus facilities.

5 MS MAGGIE WONG: Can you provide us with the relevant  
6 section which sets out the relevant requirements in  
7 relation to toilet, washroom and canteen facilities for  
8 bus operators?

9 CHAIRMAN: Well, first of all, are those matters dealt with  
10 in chapter 2.7?

11 MR PATRICK WONG: Mr Chairman, it's also chapter 8, about  
12 public transport interchange.

13 CHAIRMAN: And can you provide us with the terms of whatever  
14 this document sets out?

15 MR PATRICK WONG: I think the relevance, for the chapter,  
16 it's chapter 8.4, about the design requirements for  
17 public transport interchange.

18 CHAIRMAN: Can you help us with a reference, where this  
19 material is to be found?

20 MS MAGGIE WONG: Mr Chairman, this is material which we  
21 retrieved, but we haven't had the official source from  
22 the Transport Department. We wonder if the Transport  
23 Department could provide us with the relevant paragraphs  
24 that point to the granting of facilities specifically  
25 for franchised bus operators, in relation to resting  
26

1 facilities and toilets, because the provisions there are  
2 quite loose, so we would need your help on this.

3 MR PATRICK WONG: Okay.

4 CHAIRMAN: Do you have the hard copies in front of you now?

5 MR PATRICK WONG: No.

6 MS MAGGIE WONG: We will --

7 CHAIRMAN: I'm asking Mr Wong. Do you have it in front of  
8 you now?

9 MR PATRICK WONG: I don't have a hard copy, sorry, no.

10 CHAIRMAN: Do you have a soft copy?

11 MR PATRICK WONG: It's actually in our TD homepage. Sorry,  
12 it's ...

13 MS MAGGIE WONG: It's not. I don't think so.

14 CHAIRMAN: Well, wherever it is, can you access it and give  
15 us a copy? And can that be done now?

16 MR PATRICK WONG: Yes, we can access it and give you  
17 a copy -- I don't have it -- I can have it now but  
18 according to my colleagues, it's not directly from the  
19 TD homepage. We have to extract.

20 CHAIRMAN: Wherever it comes from, can somebody do it now,  
21 so we can print off hard copies?

22 MS AMY LEE: Mr Chairman, we have in fact passed a CD copy  
23 to the secretariat, about the transport design and  
24 planning manual. So we agree that the secretariat can  
25 use the TDPM, print the hard copy for the members and  
26

1 committee's reference.

2 CHAIRMAN: Very well. Thank you for that information. May

3 I ask the secretariat that that is done now, that these

4 chapter references are printed off as hard copy.

5 Yes, Ms Wong.

6 MS MAGGIE WONG: Whilst that is being processed, can I ask

7 a general question: about all these chapters 2 and

8 chapter 8 -- first of all, on the screen is "Extracted

9 from chapter 2 (Franchised Bus) of volume 9 (Public

10 Transport) of Transport Planning and Design Manual".

11 This particular chapter, can you tell us when was

12 this reviewed or when was this chapter 2 reviewed or has

13 it ever been reviewed, this chapter, or updated?

14 MR PATRICK WONG: Sorry, I don't have the information. We

15 have to check.

16 MS MAGGIE WONG: And the other part that you mentioned is

17 8.4, concerning --

18 CHAIRMAN: Before we leave 2.7.11.4 -- an extraordinary way

19 of referencing things but can we have that back on the

20 screen:

21 "... toilets, washroom and canteen facilities for

22 operator's staff will not be required in a bus terminus

23 if such facilities are available in nearby development."

24 That's the provision. Isn't this the difficulty we

25 have heard about for months now with bus captains having

26

1 to go into nearby shopping malls to find toilets?

2 MR PATRICK WONG: To answer your question, Mr Chairman,

3 I don't think we have taken that course in our

4 consideration or in our dealings with the franchised bus

5 operators for provision of those ancillary facilities or

6 planning any facilities for the public transport

7 interchange.

8 CHAIRMAN: Where does this provision come from? How long

9 has it been there? It's an extraordinary provision.

10 MR PATRICK WONG: As I answer -- we have to check. I can't

11 give you the exact date for that, when that clause,

12 2.7.11.4, was included. I'm afraid we have to check and

13 advise later.

14 CHAIRMAN: Very well.

15 Yes, Ms Wong.

16 MS MAGGIE WONG: Thank you. About this provision about

17 toilets -- if such facilities are available in nearby

18 development -- if you wish to review this particular

19 chapter or this particular paragraph, who would you need

20 to consult?

21 MR PATRICK WONG: I think we can include such review in our

22 task force for discussion. I can't give you a straight

23 answer, whether there's a particular department which

24 should be involved at this stage, because -- I can say,

25 if the Transport Department and the bus companies decide

26

1           whether that course should be taken, for example,  
2           I think that should the actual situation as we are  
3           dealing with, the public transport operators and the  
4           government departments, because we didn't take that into  
5           account for not providing the facilities -- if such  
6           facilities are available in nearby developments, it's  
7           not actually in line with what we are doing now.

8   CHAIRMAN: Let me ask a simple question. This is  
9           a Transport Planning and Design Manual. Can you change  
10          this manual, that is the Transport Department, or do you  
11          have to consult others?

12   MR TONY YAU: Chairman, maybe I can supplement.

13   CHAIRMAN: Let's have a simple answer to a simple question.

14          Who can change this: Transport Department --

15   MR TONY YAU: We can change this.

16   CHAIRMAN: So it is entirely within the Transport  
17          Department?

18   MR TONY YAU: We have the TPDM working group and compliance  
19          with the Transport Bureau --

20   CHAIRMAN: We don't need a long answer. This can be done  
21          within the Transport Department; is that right?

22   MR TONY YAU: We can initiate the change and consult in the  
23          working group.

24   CHAIRMAN: Who gives approval to it taking place?

25   MR TONY YAU: The TPDM working group.

26

1 CHAIRMAN: What does the acronym mean?

2 MR TONY YAU: That means we can propose the changes and  
3 circulate --

4 CHAIRMAN: What is "TPDM"?

5 MR TONY YAU: Transport Planning and Design Manual.

6 CHAIRMAN: Thank you. So this a Transport Department  
7 decision?

8 MR TONY YAU: Yes.

9 CHAIRMAN: Thank you.

10 MS MAGGIE WONG: Now, the TPDM working group, since when did  
11 you form this TPDM working group?

12 MR TONY YAU: I think maybe we prepared the document, we set  
13 up the working group, it's internal with other  
14 department representatives and THB representative.

15 MS MAGGIE WONG: What are the other department  
16 representatives?

17 CHAIRMAN: No, the question was "when", not why, where, how;  
18 "when".

19 MR TONY YAU: Maybe when we draft the Transport Planning --

20 CHAIRMAN: Just think before you answer. Just give us  
21 a date.

22 MR TONY YAU: I don't have the exact information right now.

23 CHAIRMAN: Thank you. Can you give us a rough idea?

24 MR TONY YAU: I think maybe in around 1980s.

25 CHAIRMAN: 1980s?

26

1 MR TONY YAU: Yes.

2 CHAIRMAN: Thank you.

3 Yes, Ms Wong.

4 MS MAGGIE WONG: Thank you.

5 How regularly do they meet?

6 MR TONY YAU: There's no regular meeting of the working  
7 group, but when there's any proposals to revise the  
8 TPDM, they will circulate the document to the working  
9 group members and, if necessary, a meeting will be  
10 arranged to discuss their comments.

11 CHAIRMAN: So who is the convenor of this group?

12 MR TONY YAU: Transport Department.

13 CHAIRMAN: Who?

14 MR TONY YAU: Deputy commissioner of the Transport  
15 Department.

16 CHAIRMAN: Anyone by name?

17 MR TONY YAU: Now it's Mr WL Tang.

18 CHAIRMAN: Thank you.

19 MS MAGGIE WONG: What would be the criteria for putting  
20 forward proposal to this working group?

21 MR TONY YAU: I think the Transport Department can propose  
22 any change to the working group, for consideration.

23 MS MAGGIE WONG: You mentioned earlier that there are other  
24 department representatives.

25 MR TONY YAU: Yes.

26

1 MS MAGGIE WONG: Who are they?

2 MR TONY YAU: I do not have the information. I remember  
3 this includes Highways Department and police.

4 MS MAGGIE WONG: Does that include the Planning Department  
5 as well?

6 MR TONY YAU: I have to check. I have to check whether it  
7 is included.

8 CHAIRMAN: Please provide us with that information.

9 MR TONY YAU: Yes.

10 MS MAGGIE WONG: May I ask a hypothetical situation first:  
11 if the franchised bus operators or the trade union  
12 complained about the resting facilities for many years,  
13 saying that it's insufficient facility, the kiosk is too  
14 small, and things of that sort, where Transport  
15 Department staff were present and were aware of the  
16 situation, would that sort of matter be brought to the  
17 attention of the working group, the working group of  
18 this TPDM, Transport Planning and Design Manual?

19 MR PATRICK WONG: For answering this question, I think it's  
20 been dealing with two situations. One is for the  
21 existing bus termini or public transport interchange  
22 which do not have such facilities, as we responded  
23 earlier, we have a mechanism to work with the franchised  
24 bus operators to provide such ancillary facilities,  
25 through applications, and we want to adopt a fast-track  
26

1 approach to approve such provisions.

2 For the TPDM, I think it's talking about whether  
3 provision of such facilities will be included as a must  
4 when planning for the new bus termini or bus transport  
5 interchanges.

6 CHAIRMAN: Ms Wong, do you propose dealing with the West  
7 Kowloon Express Rail bus terminus?

8 MS MAGGIE WONG: Yes. I'm going to deal with it now,  
9 Mr Chairman.

10 We have heard complaints from Kowloon Motor Bus  
11 about the new West Kowloon Station bus termini. The  
12 complaint is this. They said there is no toilet  
13 facility within the bus termini, not the public  
14 transport interchange. They complain that there is no  
15 toilet facilities or resting facilities for the new West  
16 Kowloon Station. That's the first complaint.

17 The second complaint is there appears to be no  
18 consultation or planning beforehand, when this West  
19 Kowloon bus terminus was built.

20 May I take you first of all to the report on the  
21 West Kowloon Station bus terminus visit on 3 October  
22 2018 by the chairman of the committee and the  
23 secretariat in the afternoon of 3 October 2018.

24 Did you have a chance to read this site visit  
25 report?

26

1 MR PATRICK WONG: Yes.

2 CHAIRMAN: Are you familiar with this particular site, in  
3 any event?

4 MR PATRICK WONG: Yes.

5 CHAIRMAN: Have you visited it since the report?

6 MR PATRICK WONG: I think not after the date, but before.

7 CHAIRMAN: But you have visited it before?

8 MR PATRICK WONG: Yes.

9 MS MAGGIE WONG: Can I take you to some of the complaints  
10 voiced by the bus captains in this paper, and the  
11 walking distance. First of all, on this particular  
12 page, 1275, if you look at paragraph 1.

13 CHAIRMAN: In which bundle?

14 MS MAGGIE WONG: This is in MISC-3 bundle.

15 We can see, during the visit, in the first  
16 paragraph, that KMB had put seven structures inside the  
17 bus terminus, located on the pedestrian pavement near  
18 the bus terminus of routes 95, 42A, W1 and W2.

19 We can see that in some of the photos taken, at  
20 pages 1279 to 1282.

21 1275; have you got that?

22 The second is if you scroll down and look at the  
23 third dot, it is stated there that:

24 "All kiosks of KMB and CTB appear to have been  
25 installed in the terminus after the completion of the

26

1 construction works, as all kiosks had to be put on  
2 concrete slabs on top of the brick layering and the  
3 water from the air-conditioning unit had to be collected  
4 using empty water fountain bottles instead [of] being  
5 directed to nearby drains."

6 The third is:

7 "The only toilet available was the public toilet  
8 immediately outside the far end of the bus terminus,  
9 which had six urinals and six water closets in the male  
10 toilet alone."

11 The fourth point is:

12 "It took the chairman and staff of the secretariat  
13 about 3 minutes and 38 seconds to walk from KMB's  
14 terminus supervisor office to the male toilet."

15 Now, those four --

16 CHAIRMAN: I think, to put that into context, the committee  
17 had received evidence from Mr Patrick Pang about the  
18 time it took him to walk, and I think that was slightly  
19 longer, was it not?

20 MS MAGGIE WONG: Yes. He said it took about four minutes.

21 CHAIRMAN: Yes.

22 MS MAGGIE WONG: But if you go back and forth, it would take  
23 ten minutes, including the return trip.

24 Before I go on further, about these four matters  
25 identified on site, it appears there hasn't been any  
26

1 consultation or discussion by the Transport Department,  
2 the Planning Department, the bus operators when the West  
3 Kowloon bus terminus was constructed. Do you accept  
4 this suggestion?

5 MR PATRICK WONG: Pardon, can you repeat the question again?

6 MS MAGGIE WONG: From the observations on site, we can see  
7 all these structures --

8 CHAIRMAN: I think the question is really quite simple.

9 When this bus terminus was planned and constructed, was  
10 there any consultation with the franchised bus operators  
11 about its construction, its design?

12 MR PATRICK WONG: I don't have the actual information now,  
13 but I would have thought that the bus operators should  
14 have been consulted before the -- but I can't confirm  
15 this.

16 CHAIRMAN: Perhaps we could take Mr Wong to what Kowloon  
17 Motor Bus said about this.

18 MS MAGGIE WONG: Yes. The transcript is on 12 September  
19 2018, Day 15, page 65, line 8. That's the TSCP-6  
20 bundle. Day 15, page 65.

21 If we can start from there, Mr Patrick Pang of  
22 Kowloon Motor Bus stated that:

23 "Let me give you some examples."

24 But before that, his complaint is in relation to the  
25 fact that in some termini, there are no toilets:

26

1 "Even if we can add chemical toilets, but for new  
2 termini, I am quite surprised that they have not  
3 factored in a permanent toilet.

4 Let me give you some examples. For example, the  
5 West Kowloon XRL Station bus terminus. It's a sizeable  
6 bus terminus but there is no toilet. For Hung Luen Road  
7 in Hung Hom, there is a new terminus to replace the  
8 Hung Hom pier terminus. It is a public transport  
9 interchange; again, there is no toilet, there is no rest  
10 kiosk. For the Hong Kong-Macau-Zhuhai Bridge terminus,  
11 as we see now, there will be no toilet.

12 So again I would like to thank you for raising this  
13 issue for these resting facilities ...", et cetera.

14 The complaint, if we can go further, at line 25,  
15 Mr Patrick Pang continued by stating:

16 "I do not know whether this is a design failure.  
17 For termini built in the past, there are permanent  
18 resting facilities, including kiosks and toilets, but  
19 surprisingly, for some new termini, there are no such  
20 facilities.

21 For new termini, apart from a lack of resting  
22 facilities, there are design deficiencies as well. For  
23 the West Kowloon Station and Hung Luen Road termini,  
24 after they were commissioned, the Transport Department  
25 invited the bus operators to conduct trials, but we  
26

1 found that the designs do not suit certain models of  
2 buses, and eventually wholesale modifications must be  
3 made at the termini before our buses can use these  
4 termini.

5 For older termini, they weren't designed with  
6 12-metre-long buses in mind. This is something we  
7 understand. But for new termini, we are rather  
8 surprised."

9 The complaint, as you can see, by Kowloon Motor Bus  
10 is that this terminus, this new terminus, appears to  
11 have no consultation with the franchised bus operators,  
12 when they constructed the West Kowloon Station. Can you  
13 confirm if that is the position or do you have an answer  
14 to this?

15 MR PATRICK WONG: I think I can't confirm this statement at  
16 this moment. We have to check back, whether there's  
17 correspondence --

18 CHAIRMAN: Well, perhaps in due course you can provide it.

19 MR PATRICK WONG: Yes.

20 CHAIRMAN: Because, if there was consultation, no doubt  
21 there was correspondence or there are minutes.

22 MR PATRICK WONG: Yes. Sure.

23 MS MAGGIE WONG: Yes. If I may go back to the site visit  
24 report in the MISC-3 bundle as to the other complaints  
25 they made, the bus captains' complaints. If we can go  
26

1 to page 1276, and if we look at the third dot on that  
2 page, it started with the words:

3 "For the KMB and CTB routes terminating at this bus  
4 terminus, the time between a bus captain arriving at the  
5 terminus and starting off the return trip was generally  
6 no more than 15 minutes, assuming optimal traffic  
7 conditions (ie no delay when arriving at the terminus).  
8 When traffic conditions were suboptimal (eg during the  
9 morning peak hours), the time could be reduced to only  
10 one to two minutes. Some bus captains even had to start  
11 the return trip immediately upon arrival at the  
12 terminus."

13 And the next paragraph:

14 "The location of the public toilet was considered by  
15 the first two KMB bus captains whom the chairman met to  
16 be located too far away, as it could take them more than  
17 10 minutes to go to the toilet and back to the  
18 terminus."

19 The complaint really is, quite apart from no  
20 consultation, it's the toilet being located too far  
21 away, even though it is situated within the public  
22 transport interchange. We can see, from your earlier  
23 Transport Planning and Design Manual that one of the  
24 paragraphs -- that's chapter 2, paragraph 2.7.11.4 -- it  
25 appears from the reading of this paragraph, 2.7.11.4,  
26

1 the highlighted yellow parts, it appears the problem  
2 lies in this particular provision, that as long as there  
3 are such facilities available in nearby developments,  
4 toilets, washrooms and canteen facilities will not be  
5 required in a bus terminus.

6 So this is the problem, where all this problem  
7 arises, or this is the source of the problem.

8 So my question is this: have you considered, first  
9 of all, making recommendation to change this particular  
10 paragraph in the coming future, or would you welcome the  
11 amendment to this provision?

12 MR PATRICK WONG: Let me explain. As mentioned in our  
13 submission on the paper --

14 CHAIRMAN: Before you go on, can you answer the question  
15 directly, first of all: have you considered recommending  
16 a change to this provision? Try to answer that "yes" or  
17 "no".

18 MR PATRICK WONG: Yes.

19 CHAIRMAN: You have. And can you say when that was  
20 considered?

21 MR PATRICK WONG: Actually, for the toilet --

22 CHAIRMAN: Just a date. When?

23 MR PATRICK WONG: I think, for amending this, we will  
24 consider, but -- maybe I answer Mr Chairman.

25 CHAIRMAN: You're only being asked about when. When was  
26

1           this considered? Are you saying -- the past tense was  
2           being used before. Are you answering "yes" to the past  
3           tense?

4       MR PATRICK WONG: I think we have internally deliberated,  
5           but to answer your question, we will review and revise  
6           that.

7       CHAIRMAN: So future tense now?

8       MR PATRICK WONG: Future tense.

9       CHAIRMAN: Thank you.

10           Yes, Ms Wong.

11       MS MAGGIE WONG: Thank you.

12           And related to this problem is the working  
13           guidelines, which provides resting time for bus  
14           captains, and if I may invite you to turn up  
15           bundle MISC-2 at page 897 to 898.

16           This is a table setting out all the guidelines  
17           through the years, the working guidelines. I'm  
18           interested, in particular, in the 23 February 2018  
19           guideline. We can see the "Breaks during duty" in  
20           particular, that row, which provides that after six  
21           hours there would be 40 minutes, but within that six  
22           hours there would be a total of 20 minutes, but no less  
23           than 12 minutes within the first four hours of duty.

24           Now, to quote, for example, this particular West  
25           Kowloon Station bus terminus, which requires bus

26

1 captains at least ten minutes to travel to and from the  
2 toilets, how would you construe in terms of resting time  
3 of bus captains, in ensuring that the bus companies  
4 would comply with this guideline, when they may not even  
5 have sufficient time to go to the washroom? How do you  
6 ensure compliance?

7 MS AMY TSE: Mr Chairman, I would like to answer this  
8 question.

9 CHAIRMAN: Yes.

10 MS AMY TSE: The guidelines set out the minimum requirement.  
11 That means the bus operators can, depending on the  
12 situation, provide more time for their bus drivers to  
13 have rest, including maybe going to the toilet or taking  
14 a break.

15 CHAIRMAN: So going to the toilet is a rest?

16 MS AMY TSE: Yes, that would be including time --

17 CHAIRMAN: That's within the rest --

18 MS AMY TSE: -- and they could provide more. That would set  
19 out just the minimum requirement.

20 MS MAGGIE WONG: But have you considered the journey time,  
21 the scheduled, gazetted journey time, that the bus  
22 operators undertook to provide to the public? Have you  
23 considered that question, when considering this issue?

24 MS AMY TSE: When we process the schedule of service,  
25 colleagues will go with the bus operators to check the  
26

1 bus journey time, and then they will work out  
2 a timetable that will include the rest time for, say,  
3 the next departure, that type of timetable, that type of  
4 frequency, for the bus operators to operate in the  
5 actual situation.

6 Thank you.

7 MS MAGGIE WONG: So do I understand you correctly, the  
8 resting time would include the toilet time; is that the  
9 position?

10 MS AMY TSE: Yes.

11 Thank you.

12 MS MAGGIE WONG: And going back to that site investigation  
13 report, there is a second issue that I wish to raise  
14 with you. It's also at page 1276, bundle MISC-3.

15 Because of the problem created concerning the design  
16 of this West Kowloon bus terminus, the KMB, according to  
17 the KMB, if we see the third-bottom dot, it starts with  
18 the paragraph:

19 "The terminus supervisor confirmed that according to  
20 his knowledge, KMB had applied for the installation of  
21 four chemical toilets in the terminus and was waiting  
22 for approval from the Transport Department."

23 Can I ask you about this: what is the progress of  
24 this application?

25 MR PATRICK WONG: I think we have approved the application  
26

1 on 28 September.

2 MS MAGGIE WONG: 28 September?

3 MR PATRICK WONG: Yes.

4 MS MAGGIE WONG: There is another issue in relation to this  
5 resting facilities topic.

6 CHAIRMAN: Before you move on, this is a brand-new bus  
7 terminus, next to a prestigious railway station. Why is  
8 it necessary to apply and approve chemical toilets?

9 MR PATRICK WONG: To answer, Mr Chairman, I think --  
10 I understand that in just this exchange of views on  
11 this, because the public toilet in place at the public  
12 terminus, as mentioned by KMB, is not quite suitable for  
13 their actual operation, like the scenario you mentioned,  
14 especially during peak hours, that they need more time  
15 to go to that public toilet, so we discussed -- actually  
16 KMB, during the site meeting, mentioned to us that maybe  
17 they can submit application to put chemical toilets  
18 there, so that the rest time and the others would not be  
19 affected, so that their captains can use that chemical  
20 toilet.

21 CHAIRMAN: But if there is a need for toilets inside a bus  
22 station, and you have approved it, this is a matter that  
23 should be addressed in the planning, design and  
24 construction stage, should it not, not an ex post facto,  
25 after the event, Elastoplast job? It should be done

26

1 properly.

2 MR PATRICK WONG: Apart from that particular bus terminus,  
3 we can deal with that situation in one of two ways. One  
4 is we ask the bus companies to give more rest time for  
5 the bus captains for that bus terminus, because they  
6 need to spend more time going to that public toilet; or  
7 alternatively, we may approve the application from the  
8 bus operators to provide their chemical toilets, under  
9 that situation, because we can't construct another  
10 permanent at that location that fast and timely.

11 CHAIRMAN: No, but doesn't this highlight the flaw in the  
12 system? This is a brand-new bus station, the paint is  
13 hardly dry, and yet you have found it necessary to  
14 approve an application that KMB have found it necessary  
15 to make to install toilets inside the bus station.  
16 Shouldn't these things be anticipated?

17 MR PATRICK WONG: I would not dispute Mr Chairman's  
18 observation, but I think, during my site observation,  
19 the actual situation came across by the bus companies  
20 and their captains would be quite -- I wouldn't say  
21 different, because -- I'm not sure when you went there,  
22 there are bus stacking area near the toilets, it is also  
23 for the bus stacking places for those --

24 CHAIRMAN: By that you mean parking?

25 MR PATRICK WONG: But, of course, actual operation is  
26

1 different with that sort of operation, so we have to  
2 tackle that situation.

3 CHAIRMAN: Stacking means parking, does it?

4 MR PATRICK WONG: Parking, yes.

5 CHAIRMAN: Yes, we saw the parking. The parking is also for  
6 coaches, is it not?

7 MR PATRICK WONG: Yes. Basically, that's exclusive for  
8 franchised bus parking.

9 CHAIRMAN: But the point that you are making is that that's  
10 different from buses in operation, where the bus driver  
11 has only a short break?

12 MR PATRICK WONG: Initially, yes, for example, if they park  
13 their bus upon arrival, instead of going straightly to  
14 the pickup point, they can park there and then go to the  
15 toilet and then drive back the bus, when there is  
16 a service at the pickup point.

17 CHAIRMAN: Ms Wong.

18 MS MAGGIE WONG: Before I go to another document, or  
19 a letter of reply by the Planning Department, I would  
20 like to ask you a general question. This problem about  
21 resting facilities and the planning beforehand has  
22 actually been raised for a number of years.

23 If I may show you one example of the document. It  
24 is in the trade union bundle, TU-1B, at page 260-206.  
25 It is a minutes of meeting dated 23 September 2015. As  
26

1           you can see, it involved the Transport Department,  
2           police force, Labour Department, Lands Department, and  
3           the Legislative Councillor and representative of the  
4           Hong Kong Federation of Bus Industry Trade Unions.

5           You can see on this page the persons in attendance  
6           include the Assistant Commissioner/Bus and Railway  
7           Division (Principal) of the Transport Department, and  
8           a number of officers within that division of the  
9           Transport Department, as well as the police force and  
10          Lands Department.

11          If I may invite you to go to page 260-209, at  
12          paragraph (ii):

13          "The unions expressed that there are insufficient  
14          facilities at certain bus terminus, although the bus  
15          companies have applied to install rest kiosks, but due  
16          to opposition from the local community, eventually they  
17          can only install a rather small ... kiosks. Therefore  
18          the unions hoped to understand the standard that the  
19          department used to review and approve the size ... to be  
20          installed."

21          The second dot stated:

22          "The unions expressed that there are no toilets  
23          within certain bus terminus and the bus captains must  
24          use the nearby public toilets or toilets in the shopping  
25          mall. Since the opening hours of the toilets in the  
26

1 shopping mall may not match with the bus captains' shift  
2 hours, therefore it is hoped that when planning for new  
3 bus terminus, toilet must be included."

4 And if we go over the page, at page 260-210, this is  
5 the response of the Transport Department, and if I may  
6 go down to the bottom paragraph, it is stated there:

7 "Besides, the relevant department [meaning the  
8 Transport Department] will draw references from  
9 established standards to design new and temporary roads  
10 and public transport interchange to ensure all roads and  
11 temporary traffic arrangement will comply with road  
12 safety."

13 Then this sentence:

14 "In planning for new bus termini, the Transport  
15 Department will request the bus companies to provide  
16 opinions on facilities at the bus termini and  
17 arrangement for the relevant necessary facilities. The  
18 Transport Department will urge the bus companies to  
19 listen to the opinion of their employees about the  
20 terminus facilities and to reflect the same to the  
21 department."

22 Now, I am just quoting one example, because there  
23 are a number of minutes of that nature, pleading for  
24 a discussion beforehand in relation to the planning of  
25 new bus terminus. And we can see the date is as early  
26

1 as 2015, or that's the minutes provided to us. My  
2 question is, that this problem has been occurring since  
3 2015, at least we can see from the minutes, and we can  
4 see from the Transport Department's stance on this that  
5 they will request the bus company to provide opinion on  
6 facilities at the bus termini.

7 So, in this particular instance of West Kowloon, why  
8 was this not done? Do you know?

9 MR PATRICK WONG: As I answered to Mr Chairman earlier, we  
10 have to check and advise the committee later on, on our  
11 checking whether we actually consulted the bus companies  
12 on the case of West Kowloon bus terminus.

13 CHAIRMAN: It's my memory that KMB were saying that the  
14 franchise was not allocated until after this design  
15 stage, so that that's one reason that the bus company is  
16 not involved in giving their opinions. Is there  
17 anything you want to say about that?

18 MR PATRICK WONG: I can't comment on that statement until we  
19 actually check the actual information from our --

20 CHAIRMAN: Yes. Perhaps that's one of the matters that you  
21 can check so that we can see the connection, if there is  
22 one, between --

23 MR PATRICK WONG: Personally, actually, I handle such case  
24 before, but I don't think that would be the  
25 consideration, whether the franchise -- the expiry of  
26

1 franchise, say, is coming soon and we will not process.

2 CHAIRMAN: This is not a question of an expiry. This is  
3 a new route, is it not, three routes in West Kowloon?

4 MR PATRICK WONG: Three routes, but we have another 11,  
5 actually, inside the bus terminus as well, operated by  
6 KMB.

7 CHAIRMAN: Yes. KMB have two of the new routes and Citybus  
8 one; is that right?

9 MR PATRICK WONG: Yes, for the new routes.

10 CHAIRMAN: When you have a market dominated by a couple of  
11 big players, it doesn't really matter which one of the  
12 two gets three routes and the other gets none, because  
13 you could consult both, could you not?

14 MR PATRICK WONG: I agree with Mr Chairman's observation.

15 CHAIRMAN: And you would do it on this basis: "We don't know  
16 yet who's going to get the routes, but what are your  
17 opinions as to what facilities ought to be provided?"  
18 That would be easy, would it not?

19 MR PATRICK WONG: Yes, I agree with your observation, but  
20 again, we have to check for this particular case whether  
21 actually we consulted KMB, because, as I mentioned,  
22 there were 11 bus routes operated nearby which were  
23 transferred to that bus terminus.

24 CHAIRMAN: Thank you. We understand. Please check, and  
25 please provide us with all the material that's relevant.

26

1 MR PATRICK WONG: Yes.

2 MS MAGGIE WONG: Yes. Now I'm going to take you to another  
3 document. It is a letter of reply by the Planning  
4 Department. It is dated 27 September 2018, in relation  
5 to the Independent Review Committee's invitation for  
6 written submission in relation to rest and toilet  
7 facilities at bus termini.

8 It is in MISC-3, page 1313. If I may take you to  
9 the second page, paragraph 3, which sets out the  
10 question.

11 Now, the first question -- have you had a chance to  
12 look at this document before coming to this hearing?

13 MR PATRICK WONG: Yes.

14 MS MAGGIE WONG: And paragraph 3, it stated the question as,  
15 "Have the Transport and Housing Bureau and/or the  
16 Transport Department drawn to the attention of the  
17 Planning Department any difficulties arising in practice  
18 for franchised bus operators in providing rest and  
19 toilet facilities for their employees at bus termini?  
20 If so, please describe the circumstances ... and, if in  
21 writing ... copies of the correspondence and ...  
22 replies."

23 The reply is this:

24 "The THB [that's the Transport and Housing Bureau]  
25 or the Transport Department, has not drawn to the  
26

1 attention of Planning Department specifically with  
2 respect to the difficulties arising in practice for  
3 franchised bus operators in providing rest and toilet  
4 facilities for their employees at bus termini."

5 Can you confirm if that's the position so far as  
6 your department is concerned?

7 MR PATRICK WONG: I can answer that. I don't -- I agree  
8 with the reply from Planning D, from their perspective,  
9 because they have checked, but as explained earlier, we  
10 did not involve Planning D as much in the construction  
11 and the provision of facilities at the PTI at that  
12 stage. But we have no dispute on the answer to that  
13 question provided by Planning D at this stage.

14 MS MAGGIE WONG: Mr Chairman, I'm going to go to, in quite  
15 detail, in relation to the Hong Kong Planning Standards  
16 and Guidelines, which set out the relevant provisions on  
17 public transport terminals in relation to franchised bus  
18 services. So would this be a convenient time to have  
19 a rest?

20 CHAIRMAN: That's very short, isn't it? It's only two or  
21 three lines; am I right?

22 MS MAGGIE WONG: It would engage a number of questions, in  
23 particular --

24 CHAIRMAN: We had a late start. Perhaps we can press on.  
25 We'll take a short break, but later.

26

1 MS MAGGIE WONG: Thank you, Chairman.

2 If I may take you first of all to the Hong Kong  
3 Planning Standards and Guidelines. Before I go to that,  
4 can I address you on the second question which the  
5 committee raised with the Planning Department. The  
6 question was this:

7 "Have the THB and/or TD asked the Planning  
8 Department to particularise the phrase 'other ancillary  
9 provisions' as used in paragraph 4.1.6 of chapter 8 of  
10 the Hong Kong Planning Standards and Guidelines, perhaps  
11 to stipulate the provision of 'rest and toilet  
12 facilities'?"

13 This particular paragraph, 4.1.6, is at page 1317 of  
14 the same bundle. We can see in paragraph 4.1.6, which  
15 set out the standards for bus termini, and the last line  
16 stated there:

17 "A regulator's kiosk and the other ancillary  
18 provisions would be required."

19 Now, one of the issues raised is: there is no  
20 specification or definition of the term "other ancillary  
21 provisions", and on top of that, if I may invite you to  
22 look at 4.1.9, which is at page 1317 as well, 4.1.9,  
23 which stated:

24 "Where they form part of a public transport  
25 interchange, access would be physically separated but  
26

1 walking distances between modes should be minimal."

2 If I may go back to the letter of the Planning  
3 Department, at page 1314, it is stated there, the second  
4 paragraph in relation to the second question:

5 "Notwithstanding that, paragraph 4.1.9 ... states  
6 that bus termini can form part of a public transport  
7 interchange ... In this connection, the HKPSG [that's  
8 the Hong Kong Planning Standards and Guidelines] sets  
9 out that subject to the availability of space, the  
10 operators' facilities including toilets, seating  
11 facilities, regulators' office ... which are essential  
12 facilities, should be provided at the PTI ..."

13 So the criteria is "subject to availability".

14 "... while the actual size of the PTI should be  
15 determined by Transport Department ... As such, the  
16 phrase 'other ancillary provisions' could make reference  
17 to those essential facilities as specified under PTI."

18 It also continued, stated there:

19 "TD, as the authority on transport matters, has  
20 documented technical ... guidelines for provision of bus  
21 termini and PTIs (both of which include regulators'  
22 offices/kiosks and toilets) in chapters 2 and 8 of its  
23 Transport Planning and Design Manual ... respectively.  
24 Chapter 8 ... highlighted that detailed guidelines  
25 should make reference to TD's TPDM."  
26

1           If we go over the page, it is stated there:

2           "For information, the phrase 'other ancillary  
3           provisions' was first incorporated for bus termini in  
4           the HKPSG in 1991 and has remained unchanged since then.  
5           The current planning standards and guidelines for bus  
6           termini in the HKPSG, among other types of public  
7           transport facilities, were last reviewed and  
8           subsequently promulgated in 2000. That round of review  
9           was initiated by the then Transport Bureau and TD to  
10          meet the Transport Strategy ... upon completion of the  
11          Third Comprehensive Transport Study in 1999. The  
12          wording of the amendments to the HKPSG including those  
13          for the bus termini and PTI (including specifications of  
14          operators' facilities, for example regulators' office  
15          and toilet facilities) were based on TD's input."

16          Now, the answer from the Planning Department --  
17          there are a number of issues I wish to raise with you.  
18          First, they stated there that this guideline would work  
19          hand in hand with the Transport Planning and Design  
20          Manual, designed by the Transport Department. Is that  
21          the case?

22       MR PATRICK WONG: Yes.

23       MS MAGGIE WONG: So, if you don't make the change in the  
24          TPDM, there won't be any consequential change in the  
25          Hong Kong planning -- in the HKPSG guidelines? Is that

26

1 the position?

2 MR YK CHAN: May I answer to this question? I think the  
3 TPDM sets out the more detailed requirement for setting  
4 up these ancillary facilities, including toilets. Yes,  
5 if you change the contents or specification in the TPDM,  
6 there may be consequential changes to the Hong Kong  
7 planning standards guidelines, but as you may notice,  
8 the Hong Kong planning standards guidelines is sort of  
9 more high-level guidelines, they don't go into  
10 specifics.

11 CHAIRMAN: Well, they go into one specific. For some  
12 reason, you've got to have a regulator's kiosk in  
13 standards for bus termini. I'm looking at 4.16 at  
14 page 1317. But everything after that is left vague, as  
15 vague as imaginable. "Other ancillary provisions", is  
16 that to be construed as ancillary to the regulator's  
17 kiosk, or is it to be construed as ancillary to the  
18 operation of a bus terminus? This could very easily be  
19 spelt out. Very simple.

20 MR YK CHAN: Yes.

21 MS MAGGIE WONG: Now, would you follow up with the Planning  
22 Department in terms of the more detailed specification  
23 as to what "other ancillary provisions" entail, namely  
24 toilets and resting facilities for bus termini?

25 MR YK CHAN: Yes.

26

1 MS MAGGIE WONG: So you would follow up with the amendment  
2 of this particular paragraph? Because it's not just one  
3 paragraph. There is another paragraph in this manual.

4 If you go to page 1324, it concerns the design  
5 requirement for public transport interchanges.

6 Page 1324 is part of 4.5.3, paragraph 4.5.3, at 1322,  
7 which sets out the design requirement for public  
8 transport interchanges.

9 One of the requirements set out there is in (c):

10 "Passenger and operators' facilities and security  
11 and safety installations: such as queue railing,  
12 toilets, seating facilities, ticket machine ...  
13 fire-fighting equipment, CCTV, regulators' office ...  
14 Subject to availability of space, it is recommended that  
15 these essential facilities should be provided at the  
16 public transport interchanges."

17 Now, what is not provided there is whether the  
18 toilet is limited to public use or whether it's  
19 exclusively for the bus captains in a bus terminus. So  
20 it's not simply the paragraph we have looked at; it is  
21 this paragraph as well which needs to seek clarification  
22 or amendment.

23 Would you also make consequential amendment to this  
24 particular paragraph as well, to the Planning  
25 Department?

26

1 MR YK CHAN: Well, having reviewed the toilets and other  
2 ancillary facilities, and if there are any changes,  
3 of course consequential changes need to be made.

4 MS MAGGIE WONG: If we go back to the letter at page 1315,  
5 of the Planning Department, the Planning Department  
6 stated clearly that the procedure for amending this  
7 guideline requires your initiation, the THB or TD  
8 initiation, before amendments could be made to chapter 8  
9 of the Hong Kong planning standards guidelines, in view  
10 of the operational needs. So it needs your activation  
11 of the process, in that regard.

12 I'm going to move on to another topic, if I may.

13 CHAIRMAN: And what topic is that?

14 MS MAGGIE WONG: That's the illegal parking.

15 CHAIRMAN: Very well. We will take a break, but since we  
16 had a late start we will make this a ten-minute break.  
17 Ten minutes, ladies and gentlemen.

18 MS MAGGIE WONG: Thank you.

19 (11.48 am)

20 (A short adjournment)

21 (12.02 pm)

22 CHAIRMAN: Ms Wong.

23 MS MAGGIE WONG: Thank you. We are moving on to the topic  
24 of illegal parking. We heard from the trade union and  
25 the franchised bus operators that it causes a problem to  
26

1 the bus captains, and some of the incidents of assaults  
2 on bus captains were caused by illegal parking. We have  
3 seen examples, emails, in relation to that, which had  
4 been communicated to the Transport Department.

5 I will not take you to those emails and documents,  
6 but I would like to take you to a letter from the police  
7 about measures recently taken by police in curbing the  
8 illegal parking problem. That's bundle MISC-1C at  
9 page 124-539. That's a letter of the police dated  
10 10 August 2018.

11 If I may take you to paragraph 5, it refers to  
12 a project, in April 2017:

13 "... the 'Energizing Kowloon East Office' led by the  
14 Development Bureau has proposed to conduct a feasibility  
15 study of the application of CCTV against illegal parking  
16 and congestion-related moving offences."

17 It includes two phases. The first phase is a:

18 "... 21-month phase 1 proof of concept trial on  
19 'Loading and Unloading Goods Monitoring System' at  
20 Kwun Tong industrial area ... launched in January 2018."

21 Before I go on further, can you explain what this  
22 "proof of concept" trial is?

23 MR PATRICK WONG: The system is down.

24 MS MAGGIE WONG: Yes. I think maybe to facilitate you, it  
25 went to the second phrase. It is stated there that:

1           "The second phase 24 months EKEO's proof of concept  
2           trial on 'illegal parking' will tentatively commence in  
3           August 2018. These projects will need policy and  
4           financial support as well as legislative amendments and  
5           address to privacy concern of the public. More time is  
6           required for these complicated projects to develop  
7           further."

8           Before I go on, I would also like to take you to  
9           a minutes of meeting at page 124-564. We can see there  
10          is a "Note of the kick-off meeting on illegal parking,  
11          PoC" -- meaning proof of concept -- "trial", and the  
12          persons in attendance include the Development Bureau,  
13          police, consultant and Transport Department, at the  
14          bottom.

15          My question is this: can you explain how the proof  
16          of concept trial will detect offences involving illegal  
17          parking, or stopping at bus stops?

18       MR YK CHAN: I think the colleagues who were at that meeting  
19          are not present here and at hand we don't have the  
20          precise information of what that proof of concept trial  
21          would mean.

22       MS MAGGIE WONG: So, on this issue, I would assume none of  
23          you could assist in detail on the workings of this  
24          concept, or proof of concept trial?

25       MR YK CHAN: We don't have the full information, so I think  
26

1 it could be misleading if I talk something that --

2 CHAIRMAN: No, we understand. You are covering a wide ambit  
3 of topics and by all means say if you are not in  
4 a position to answer. Thank you.

5 Yes, Ms Wong.

6 MS MAGGIE WONG: If that's the case, I will move on to  
7 another topic, on assaults on bus captains.

8 We have heard from the Transport and Housing Bureau,  
9 Mr Joseph Lai, that on this topic it is planned that  
10 there would be education to be given to the public on  
11 the sort of behaviour to be expected.

12 May I take you to the transcript of his evidence  
13 first. That's Day 1, page 38. The date is 7 May 2018.

14 If I may draw your attention to the bottom  
15 paragraph, Mr Joseph Lai:

16 "Chairman, we are aware of the concern of bus  
17 companies and bus drivers in that respect, and I could  
18 add that one of the things which the Commissioner for  
19 Transport and her colleagues are working on is  
20 an education plan, to educate the travelling public on  
21 the sort of behaviour expected of them, and also the  
22 sort of complaints channels that they could or they  
23 should resort to in case of any dissatisfaction with  
24 either bus service generally or with the service of  
25 a particular driver.

26

1           So the Transport Department is working on that  
2           already."

3           Can you tell us more about this education plan, in  
4           relation to the sort of behaviour expected of  
5           passengers?

6   MR YK CHAN:   Mr Wong will answer.

7   MR PATRICK WONG:  Mr Chairman, actually, we had discussed  
8           the publicity planned with the presence of all the  
9           franchised bus operators, including -- and also MTR as  
10          well, because the problem that they encounter would be  
11          that they would like to educate the passengers, to  
12          appeal they are considerate and courteous to the  
13          operators and their staff while using the public  
14          transport services, both franchised buses and the MTR.

15          So we are thinking of producing a video clip to be  
16          broadcast at social media, because we thought that for  
17          the conventional propaganda on TV may not be too  
18          effective, so we are working on that video clip, short  
19          video clip, for, say, half a minute or something like  
20          this, for each series.  We are still working on that.

21          But the theme is we want to use a softer approach  
22          rather than hard-line approach to the education, and the  
23          theme would be, "Let's be considerate and courteous when  
24          using public transport."  Basically, we will work out  
25          some scenarios on that and we may invite some celebrity

26

1 to be the actor in the video, something like this.

2 CHAIRMAN: When was this meeting with all the franchised bus  
3 operators and the MTR?

4 MR PATRICK WONG: Actually, we have, as far as I remember,  
5 say three meetings. The last one, it was I think a week  
6 before. I forgot the actual date.

7 CHAIRMAN: When was the first meeting? Over what period  
8 have you been discussing it?

9 MR PATRICK WONG: I think it's about a few months ago but  
10 I have to provide the exact date for the first meeting  
11 after this.

12 CHAIRMAN: Thank you.

13 MS MAGGIE WONG: Thank you. Moving to another topic, if  
14 I may. It's in relation to the bus design. I have  
15 three aspects that I would like to ask you.

16 First is the front of the bus. We have received  
17 evidence from the Community for Road Safety in relation  
18 to the design and construction of franchised buses. One  
19 of the concerns is they mentioned something about the  
20 structure of the bus being not strong enough and as  
21 a result of the incident or accident the frontal part of  
22 the bus could easily collapse and could injure  
23 passengers on the upper front of the bus.

24 I am going to show you some photographs of some of  
25 the buses, the condition of the bus after Typhoon  
26

1 Mangkhut.

2 Can I take you first of all to Mr Julian Kwong's  
3 evidence, Day 7, bundle 3A, 16 July 2018. That's  
4 page 56, line 3.

5 If you look at page 56, line 7, in response to  
6 chairman's question as to, "What is it that is unsafe at  
7 the moment about the front of a bus, or relatively  
8 unsafe?", Mr Julian Kwong expressed that:

9 "... the upper deck of a bus, at the front, there is  
10 very limited space, what we call the concept of crumple  
11 zone. Safety belts on the upper deck front seats are  
12 beneficial for certain types of incidents, for example  
13 a bus braking abruptly, or a bus colliding with a safety  
14 barrier, colliding with a small passenger car. But  
15 considering that the double-decker bus collides with  
16 a container vehicle in the front, or colliding with  
17 a bridge pier, then the upper deck front passengers,  
18 even if they are restrained by seat belts, they will  
19 suffer severe injuries.

20 And in this respect, maybe I also invite Dr Kou to  
21 supplement the information."

22 And Dr Kou's evidence starts at line 23. He states:

23 "So in an unrestrained or restrained passenger, if  
24 the occupant compartment collapses, say for example in  
25 the upper front part of the bus, it is the interior  
26

1 posterior type of compression that causes serious  
2 injuries to the occupant in the chest, which we have all  
3 the major organs inside, and also the abdomen and the  
4 pelvis, and we know that by this type of compression  
5 injuries, especially in the chest and pelvis, it would  
6 result in very severe and even fatal internal bleeding.

7 That's the reason why Mr Kwong noted that the upper  
8 front seats of a double-decker bus, the occupants ...  
9 restrained or unrestrained, they are at a higher risk."

10 Before you answer, can I also take you to Mr Kwong's  
11 submission in April 2018. That's the Community for Road  
12 Safety submission, at bundle MISC-2, page 805. It's on  
13 the topic requiring bus superstructure to have  
14 sufficient strength to maintain a volume of residual  
15 space integrity during a rollover test. Page 805.

16 Under the heading, "Compartmentalisation", at the  
17 bottom, "Rollover test to UNECE regulation":

18 "This widely accepted regulation requires bus  
19 superstructures to have sufficient strength to maintain  
20 a defined volume of residual space integrity during and  
21 after a rollover test with the objective to promote  
22 passengers' survival."

23 Now, I would like to ask whether the Transport  
24 Department has considered reinforcing the front part  
25 structure of the bus, having regard to representations  
26

1 made, of the upper deck?

2 MR YK CHAN: I will hand over the question to Mr Shum.

3 MR WILLIAM SHUM: We haven't such consideration.

4 MS MAGGIE WONG: Why?

5 MR WILLIAM SHUM: For the UNECE no. 66, it's mainly related  
6 to the bus structure, and it provides some technical  
7 requirement, especially for the single-decked buses  
8 only. It's for the single-decked bus only.

9 MS MAGGIE WONG: Before I go on, can I take you to some of  
10 the pictures taken after Typhoon Mangkhut. That would  
11 be in bundle SEC-3 at page 1440, in relation to some of  
12 the news articles by Oriental Daily, by Economic Times  
13 and also by Apple Daily.

14 We can see at page 1442 some of the tree crotches  
15 happened to the KMB bus, causing the window to crash, to  
16 break, and also page 1443 we can see some photos about  
17 the tree crotch, when it was driven through Po Lam  
18 North Road.

19 And page 1445, we can see the right side of the  
20 Citybus of route no. 682 was being cut open.

21 And at page 1447, we can see the roof of the bus of  
22 New World First Bus was damaged in the tree collapse.

23 So it would appear that it may warrant some studies  
24 in terms of the rooftop or the front part of the bus, to  
25 reinforce the structure of the bus. What would you  
26

1 respond to that suggestion?

2 MR WILLIAM SHUM: Actually, we shall look into the case, to  
3 see whether there is any improvement measure applicable  
4 to have improvement, especially in the bus structure.  
5 But I would like to supplement that all the buses in  
6 Hong Kong are manufactured by the three main bus  
7 manufacturers, and they have confirmed that their bus  
8 structure are designed in accordance with the European  
9 standards. This is their confirmation provided to us.  
10 This is the current situation.

11 If there is other improvement areas applicable, such  
12 as to strengthen -- whether there is a possibility to  
13 strengthen the structure to handle such situation shown  
14 in the picture, we can work in this direction.

15 CHAIRMAN: Strengthening adds weight, doesn't it, normally?

16 MR WILLIAM SHUM: Yes, of course.

17 CHAIRMAN: And adding weight reduces the number of  
18 passengers.

19 MR WILLIAM SHUM: Sure. So that's why we have to strike  
20 a balance between such things.

21 At the same time, as we have discussed in the  
22 working group, we are going to -- for the new bus, we  
23 are going to have seat belts in all buses, and we are  
24 also considering to retrofit the seat belts at the upper  
25 deck, and one of the considerations they point out is  
26

1           they also have an effect of adding extra weight to the  
2           bus.

3           So I think these issues will be all together, to be  
4           considered in one go.

5       MR YK CHAN:   Chairman, I would like to supplement from  
6           another angle, from an operational angle. Of course,  
7           when you see those pictures, the upper deck is damaged  
8           by overhanging trees, branches, things like that. But  
9           in the normal operation of buses, all the bus routes  
10          should have been tested properly before they are  
11          supposed to be used to take passengers.

12          I'm not sure about the status of those buses being  
13          damaged, whether they are actually taken out for a trial  
14          or being in actual operation of service, but I would  
15          say, seeing those pictures of the upper deck being  
16          damaged does not necessarily mean those buses are not  
17          safe, because they are not supposed to -- as we always  
18          do, they are not supposed to be operated in such  
19          conditions that overhanging trees and other obstructions  
20          are in the way. So, as my colleague suggests, we will  
21          look at those cases and see under what circumstances  
22          those buses have been damaged, and see whether there  
23          should be any follow-up actions or whether strengthening  
24          of the structure is necessary.

25          Thank you.

1 CHAIRMAN: Your primary position, as I understand it, is you  
2 take consolation in the fact that all these buses are  
3 manufactured to European standards?

4 MR YK CHAN: Yes. Those buses -- you can rest assured that  
5 all the buses used in Hong Kong are safe and complying  
6 to the European standards, and in normal circumstances  
7 they should not be damaged like this.

8 MS MAGGIE WONG: The second design I wish to explore with  
9 you is -- our expert in this committee, Mr Mike Weston,  
10 suggested making changes to the design of the front of  
11 the bus, and his evidence is on 27 September 2018.  
12 Day 18, page 111, line 5.

13 In response to the question raised by the chairman  
14 at line 5, in terms of the technology:

15 "One example of that would be ... changes to the  
16 design of the front of buses. As I understand it,  
17 changes that would modify the box shape of the front of  
18 the bus, putting in curves, so that rather than being  
19 knocked down and put under the wheels of a bus, the  
20 person who has impact with the front of a bus would be  
21 knocked sideways; do I understand that change  
22 correctly?"

23 Mr Mike Weston stated:

24 "Yes. So one of the initiatives that is likely to  
25 be included in the bus safety standard, when it is  
26

1 announced next month, is a sort of -- I call it  
2 softening of the front-end design of a bus. So it's not  
3 physical softening, but it's using more curves, looking  
4 at the rake of a windscreen, looking at having the  
5 spindles for the wipers at the top of the windscreen,  
6 not at the bottom, because if they are at the bottom  
7 they then become a point of impact for pedestrians if  
8 they are hit by the bus and potential injury.

9 So I suppose it is trying to make the front end of  
10 the design of the bus more forgiving. If a pedestrian  
11 is hit by a car at a certain speed, at a relatively low  
12 speed generally they will be thrown off the bonnet onto  
13 the pavement, onto the road, but at the same speed with  
14 a bus, you are more likely to be more seriously injured  
15 because of the design of the bus.

16 So it's trying to make the front end ... more  
17 forgiving in an accident with a pedestrian. In my mind,  
18 the likelihood is that is more of a design cost as  
19 opposed to an actual manufacturing cost, and the logic  
20 would be if that design is proved to be beneficial in  
21 London, why wouldn't the likes of Alexander Dennis and  
22 Wrights, who supply to the rest of the UK and to  
23 Hong Kong, adopt that for buses that they sold into  
24 their other markets ... So I think that's a good  
25 example of where we might see some good practice and  
26

1 best practice move across into other markets relatively  
2 quickly."

3 So the long and short of it is, it is suggested in  
4 the new bus safety standard programme in London, they  
5 try to soften the front end of the bus. Has this new  
6 idea been explored within the Transport Department?

7 MR WILLIAM SHUM: We will look into this issue.

8 CHAIRMAN: So is the answer no, but you will in the future?

9 MR WILLIAM SHUM: Yes, "no". Yes, we will do it in future,  
10 and we will liaise with Alexander Dennis to see what  
11 their proposal will be and see whether there is any  
12 possibility to have some trial, something like that.

13 CHAIRMAN: Thank you.

14 MS MAGGIE WONG: And the third issue I would like to explore  
15 with you is the 12.8-metre bus model. We have heard  
16 representation from the Federation of Bus Industry Trade  
17 Unions, and also other trade unions' representatives,  
18 that there are difficulties in manoeuvring this type of  
19 rear-wheel steering, a 12-8-metre bus. And the trade  
20 unions requested to participate in the testing of these  
21 buses, in the oral hearing.

22 As to this suggestion, what would the Transport  
23 Department say to this?

24 MR WILLIAM SHUM: For the 12.8 metres, with steerable tag  
25 axles, the design is in compliance with international  
26

1 safety standards, and currently TD has a two-tier system  
2 to whether such design, that is the bus length in  
3 12.8 metres with steerable tag axle.

4 The first tier is the type approval, vehicle type  
5 approval process, and the second one is the route  
6 approval process.

7 For the vehicle type approval process, we will check  
8 whether the design is in compliance with the  
9 international standards, something like that.

10 And the second one is the route approval process.  
11 Currently, we will collaborate with the bus operators  
12 and the police to conduct a test run of such bus, that  
13 is the 12.8 metres, to ascertain the suitability of  
14 existing routes to accept this different design bus to  
15 run such bus route.

16 Subject to the route test run, we may apply certain  
17 constraints or approval condition to such -- use such  
18 type of bus, in using those particular routes.

19 CHAIRMAN: So, in short, it passes the vehicle type process,  
20 and the next step is route approval?

21 MR WILLIAM SHUM: First, and then route approval, yes.

22 Also, the franchised bus operators are also required  
23 to provide training to the bus captains, to ensure they  
24 know how to operate -- at least they know how to operate  
25 such kind of 12.8-metre with steerable tag axle buses.

26

1 CHAIRMAN: Where is that requirement stipulated?

2 MS AMY LEE: Mr Chairman, for the new bus model training,  
3 all franchised bus operators are required to provide  
4 behind-the-wheel training for all bus captains before  
5 these bus captains are scheduled to drive these new  
6 model buses.

7 CHAIRMAN: The question was: where do we find this  
8 requirement?

9 MS AMY LEE: It's in the practice note.

10 CHAIRMAN: Thank you.

11 Before we go on any further, may I ask that somebody  
12 from the secretariat comes and helps me with the  
13 transcript, which has ceased to work. Just give me  
14 a moment.

15 Well done. Thank you. Normal service resumed.

16 MS MAGGIE WONG: Going on to the next topic, it's on speed  
17 limit. I know the Commissioner for Transport is not  
18 here, but I will ask --

19 CHAIRMAN: I am told she is about to arrive. May I have  
20 an indication of how soon?

21 SECRETARIAT: In a couple of minutes.

22 CHAIRMAN: In that case, what we will do, to allow her to  
23 take her seat with more decorum, we will adjourn for  
24 a few minutes. Thank you.

25 (12.33 pm)

26

1 (A short adjournment)

2 (12.38 pm)

3 CHAIRMAN: Good afternoon, Ms Chan, and welcome back. Thank  
4 you for joining us. We will continue with Ms Wong  
5 posing questions.

6 MS MABLE CHAN: Thank you.

7 MS MAGGIE WONG: Yes. Thank you for -- I'm going to deal  
8 with two topics with you. First is the speed limit and  
9 second is the proof of concept trial.

10 The first topic, on speed limit, we were on to this  
11 question about the government would approach speed limit  
12 based on the Transport Department's planning transport  
13 and design manual. Then you also testified that you  
14 would regularly update the speed limit structure in the  
15 transport manual based on overseas practice.

16 My first question is this. In terms of this  
17 three-band speed limit structure, has the Transport  
18 Department carried out any consultancy study or  
19 investigation in relation to overseas practice on the  
20 speed limit structure?

21 MS MABLE CHAN: I will invite Mr Tony Yau to give the  
22 evidence. Thank you.

23 MR TONY YAU: Chairman, no. We haven't any particular  
24 consultancy study to review the three-tier speed limit  
25 structure.

1 MS MAGGIE WONG: What about any study, apart from the  
2 walkability study or the low speed limit zone?

3 MR TONY YAU: The last one is the one that I mentioned in  
4 the last hearing, the speed limit review procedure --

5 CHAIRMAN: May I ask you to be closer to the microphone, and  
6 don't feel shy about speaking so we can all hear.

7 MR TONY YAU: Sorry, Chairman.

8 The last one is conducted by the Transport Research  
9 Laboratory, TRL, in 1999, on the speed limit review  
10 procedures.

11 MS MAGGIE WONG: Do you know that London has carried out  
12 a study on the speed limit structure as early as January  
13 2013, in its setting local speed limits? There is  
14 a paper issued by Transport for London; are you aware of  
15 this?

16 CHAIRMAN: Is that Transport for London or the Transport  
17 Department?

18 MS MAGGIE WONG: UK Department for Transport.

19 CHAIRMAN: Yes. That was the latest version of a document  
20 that had been in being earlier, was it not?

21 MS MAGGIE WONG: Yes.

22 CHAIRMAN: So the question is, did you know about the  
23 guidelines, I think they are called, that govern the  
24 approach to setting different speed limits, and what we  
25 are interested in is lower speed limits. Did you know  
26

1 about this UK approach?

2 MR TONY YAU: Thank you, Chairman. We know about the new  
3 technical circular issued by the Department for  
4 Transport, but we have not studied in detail the  
5 mechanism proposed in the circular.

6 CHAIRMAN: Perhaps we could have that document on the  
7 screen.

8 MS MAGGIE WONG: Yes.

9 CHAIRMAN: What is the reference?

10 MS MAGGIE WONG: That's in bundle SEC-3, page 1003.

11 CHAIRMAN: Were you aware that it addresses specifically,  
12 beneath the heading "Urban speed management", the  
13 specific speed limit of 20 miles an hour? Were you  
14 aware of that?

15 MR TONY YAU: Yes, we are aware that 20 miles an hour zone.  
16 That's why, in our submission, we have mentioned our  
17 study on the implementation of low speed limit zone for  
18 a trial.

19 CHAIRMAN: That's your reference to Islington, is it not?  
20 You mention Islington in your paper.

21 MR TONY YAU: That's right.

22 CHAIRMAN: Islington is a bit of an outlier, is it not?  
23 It's been overtaken by subsequent events.

24 MR TONY YAU: Yes, because we know that Islington, after the  
25 implementation of the 20 miles, the actual travel speed  
26

1 is only lowered by one.

2 CHAIRMAN: Yes. That's history though, isn't it?

3 MR TONY YAU: Yes.

4 CHAIRMAN: I will leave to Ms Wong to pursue with you, but  
5 I would be interested to hear from you in due course as  
6 to how that is where we should take our benchmark.

7 Yes, Ms Wong.

8 MS MAGGIE WONG: Yes. Can I take you to this document,  
9 first, and then I'm going to take you to a paper  
10 prepared also by the Community for Road Safety, in  
11 advocating safer and attractive streets with lower speed  
12 limit, and whether the Transport Department would  
13 consider reviewing or updating the three-band speed  
14 limit structure.

15 If I may take you to this document, bundle SEC-3,  
16 page 1003, and if I may take you to 1005, which sets out  
17 the introduction and the key points.

18 One of the matters that I would like to ask you is  
19 whether you agree with some of the principles first.

20 It's the last paragraph under "Key points". It's:

21 "Traffic authorities are asked to keep their speed  
22 limits under review with changing circumstances, and to  
23 consider the introduction of more 20 miles per hour  
24 speed limits and zones, over time, in urban areas and  
25 built-up village streets that are primarily residential,

26

1 to ensure greater safety for pedestrians and cyclists,  
2 using the criteria in section 6."

3 Now, in principle, would you agree with that view,  
4 that traffic authorities would need to keep their speed  
5 limits under review from time to time with changing  
6 circumstances?

7 MR TONY YAU: Yes, agree.

8 MS MAGGIE WONG: The second is in relation to the  
9 introduction of more 20 mile per hour speed limits and  
10 zones, which is similar to the study that seems to be  
11 carried out at the moment, which is the walkability  
12 study and the low limit zones. But can you tell us more  
13 whether it's only limited to urban routes or urban  
14 areas?

15 MR TONY YAU: Yes. As mentioned in this paragraph, the main  
16 purpose for setting the low speed limit zones is  
17 although it will enhance the overall road safety, but  
18 the main purpose is to enhance the pedestrian safety,  
19 because there are many research and studies showing that  
20 with such a low speed limit, the fatality, the fatal  
21 accidents of vehicle colliding with pedestrians can be  
22 100 per cent removed.

23 So that's why usually the low speed limit zones will  
24 be proposed in urban areas, with busy pedestrian  
25 activities, and also protection to vulnerable road users  
26

1           such as cyclists, as well as motor cyclists.

2       MS MAGGIE WONG: Is this concept applied to the low speed  
3           limit zone study that the Transport Department is  
4           carrying out?

5       MR TONY YAU: Yes, because the main purpose is to enhance  
6           the pedestrian safety, so we study that low speed limit  
7           zone under the walkability study.

8           I would like to supplement that the walkability  
9           study, in addition to studying the urban area, also  
10          studied the rural area.

11       MS MAGGIE WONG: Oh, it's both urban and rural areas?

12       MR TONY YAU: Yes.

13       MS MAGGIE WONG: How many districts or road sections are we  
14          studying in this?

15       MR TONY YAU: The study is studying the principle, the  
16          standard, in setting different standards for traffic,  
17          vehicles, or maybe pedestrian facilities. There are no  
18          particular -- the study will not be confined to any  
19          particular district.

20       MS MAGGIE WONG: Yes. If I may move on to this paper, on  
21          some of the underlying principles, and see if you agree  
22          as well. It's paragraph 27 on page 1012. Under the  
23          section, "The underlying principles":

24               "The aim of speed management policies should be to  
25          achieve a safe distribution of speeds consistent with  
26

1 the speed limit that reflects the function of the road  
2 and the road environment. This should imply a mean  
3 speed appropriate to the prevailing road environment,  
4 and all vehicles moving at speeds below or at the posted  
5 speed limit, while having regard to the traffic  
6 conditions."

7 Now, this paper suggested a mean speed. Is there  
8 a difference between a mean speed and 85 percentile  
9 speed?

10 MR TONY YAU: The mean speed, that means 50 per cent of  
11 vehicle speed is above that mean speed and also  
12 50 per cent slower than the mean speed. So it is  
13 different from 85 percentile speed. For 85 percentile  
14 speed, it's only 15 per cent of vehicles travelling  
15 speed is above the 85 percentile speed.

16 MS MAGGIE WONG: So, in relation to this adoption of mean  
17 speed, what would the Transport Department say to this  
18 mean speed as opposed to using 85 percentile speed, that  
19 is currently the practice of the Transport Department?

20 MR TONY YAU: I'm not sure whether this paragraph is using  
21 the mean speed as the consideration of the speed limit  
22 review. We have to check, because just from this  
23 paragraph it's not clear that they use the mean speed.

24 MS MAGGIE WONG: Yes. I'm going to take you to some  
25 evidence in due course, Mr Yau, but just assume for the  
26

1 present purposes it is the mean speed that the Transport  
2 Department is adopting, the Department for Transport is  
3 adopting. What would the Transport Department's view be  
4 on this matter?

5 MR TONY YAU: I think, to our understanding, it is a common  
6 practice. Most of the jurisdictions are using 85  
7 percentile speed. If you set the speed limit at -- if  
8 you set the mean speed at the speed limit, that means  
9 half of the vehicles will be speeding.

10 CHAIRMAN: And what you want to achieve is to set a speed  
11 limit that most drivers feel is the right speed for the  
12 road, and only 15 per cent are miscreants; is that it?  
13 Is that the approach?

14 MR TONY YAU: Thank you, Chairman. Because the actual speed  
15 is one of our considerations. Another consideration is  
16 the accident rate. That means most of the vehicles  
17 travel at that speed and the accident rate is low, that  
18 means that it's safe to travel at that speed, so we  
19 should consider that in setting our speed limit.

20 MS MAGGIE WONG: I'll come back to this topic when we deal  
21 with the appropriate evidence.

22 Just reading on from this document, at paragraph 30,  
23 it specified a number of important factors when  
24 considering appropriate speed limit. It sets out six  
25 factors there:

26

1           "-- history of collisions, including frequency,  
2           severity, types and causes;  
3           -- road geometry and engineering ...  
4           -- road function ...  
5           -- composition of road users ...  
6           -- existing traffic speeds; and  
7           -- road requirement ..."

8           Would the Transport Department also agree with those  
9           important factors when considering appropriate speed  
10          limit?

11       MR TONY YAU: Yes, I agree with that, and in fact our  
12          considerations more or less cover those points mentioned  
13          in this paragraph.

14       MS MAGGIE WONG: If we move on to paragraph 31, it set out  
15          an approach called, I believe, cost/benefit analysis.  
16          It's:

17               "Before introducing or changing a local speed limit,  
18          traffic authorities will wish to satisfy themselves that  
19          the expected benefits exceed the cost. Many of the  
20          costs and benefits do not have monetary values  
21          associated with them, but traffic authorities should  
22          include an assessment of the following factors",  
23          which includes six factors.

24               First, collision and casualty savings; conditions  
25          and facilities for vulnerable road users; impacts on  
26

1 walking and cycling and other mode shift; congestion and  
2 journey time reliability; environmental, community and  
3 quality of life impact; and the costs, including of  
4 engineering and other physical measures including  
5 signing, maintenance and cost of enforcement.

6 As to these six factors, would the Transport  
7 Department also agree on this cost/benefit analysis?

8 MR TONY YAU: Thank you. I think this is the most  
9 interesting part that we are interested in. It brings  
10 out the concept of cost/benefit analysis, and the cost  
11 will cover the time saving, vehicle operating cost, also  
12 CO2/NOX emissions, journey time, and reliability.  
13 I think those factors, if we consider in doing the  
14 cost/benefit analysis, will be useful. So we are  
15 interested in these suggestions and we will study  
16 further, to see any chance we enhance our current  
17 system.

18 MS MAGGIE WONG: So this has been the consideration in the  
19 current study, or will you consider in future? Which  
20 one is it?

21 MR TONY YAU: I think not in the context of a cost/benefit  
22 analysis, as suggested in this article. So we are  
23 interested in it and we will study in details.

24 MS MAGGIE WONG: If I may take you to the section on the  
25 different speed limits proposed. One of the sections  
26

1           that I would like to take you to is section 5 at  
2           page 1020, which set out the speed limit appraisal tool.

3           If I may draw your attention to paragraph 66, this  
4           appraisal system or appraisal tool is that it will  
5           provide a tool to:

6           "... help local authorities to assess the full costs  
7           and benefits of any proposed schemes and help make  
8           evidence-based decisions to introduce local speeds that  
9           reflect the needs of all road users."

10          And they have published that online, and the three  
11          factors that they have identified in the tool are in  
12          paragraph 66. The first is forecast mean and 85th  
13          percentile speeds for speed limit changes; forecast  
14          changes to journey time, business and personal users,  
15          vehicle operating costs, et cetera; and appraise changes  
16          in speed limits to six different, or perhaps seven  
17          different speed limits: 20, 30, 40, 50, 60, and on dual  
18          carriageways, 70.

19          Now, what would the Transport Department say in  
20          relation to this speed limit appraisal tool that is  
21          adopted in this paper?

22       MR TONY YAU: We are interested in this appraisal tool as  
23       well. In particular, this appraisal tool can forecast  
24       the mean and 85 percentile speed after the speed limit  
25       change, as well as the forecast of journey times,

26

1           which -- those forecasts cannot be done under our  
2           current system, so it is also the suggestion that we are  
3           interested in and we will study in details.

4       MS MAGGIE WONG: On this note, we can see, if we go on to  
5           read one more section, it's in relation to the  
6           advocating of the different speed zones, at different  
7           speed limits and zones.

8           If I can take you, first of all, to the 20 mile per  
9           hour zones, at page 1025, paragraph 89. And at  
10          paragraph 89 it specified that 20 mile per hour zones  
11          are very effective at reducing collisions and injuries.  
12          I think, Mr Yau, you earlier mentioned there were  
13          studies about reducing speed limit would reduce  
14          casualties.

15          Then paragraph 90 mentioned that:

16          "20 mile per hour zones are predominantly used in  
17          urban areas, both town centres and residential areas,  
18          and in the vicinity of schools ... shops, markets,  
19          playgrounds and other areas with high pedestrian or  
20          cyclist traffic, though they should not include roads  
21          where motor vehicle movement is the primary function.  
22          It is generally recommended that they are imposed over  
23          an area consisting of several roads."

24          Now, they are advocating a zone based on whether --  
25          the use of that zone and whether it's related to  
26

1 residential, shops, where people frequent.

2 On this matter, what is your view on this, or the  
3 department's view on this?

4 MR TONY YAU: I think we concur with this view. As

5 I mentioned before, the low speed limit zone is mainly  
6 to enhance pedestrian safety. That's why the zone or  
7 the area proposed in this paragraph, it mentions that --  
8 you can see that there would be many pedestrians on the  
9 road, just like the school/residential area, the  
10 pedestrians will run on the footpath, as well as on the  
11 road carriageway.

12 MS MAGGIE WONG: If I may finish this 20 mile per hour zone  
13 before we break. If we go over to paragraphs 95 and 96.  
14 95 mentioned that there was:

15 "Research into signed-only 20 mile per hour speed  
16 limits which shows that they generally lead to only  
17 small reductions in traffic speeds. Signed-only 20 mile  
18 per hour speed limits are therefore most appropriate for  
19 areas where vehicle speeds are already low."

20 Then, going over to the next paragraph:

21 "20 mile per hour limits covering most streets in  
22 Portsmouth have demonstrated that it is possible to  
23 introduce large-scale 20 mile per hour limits in some  
24 built-up environments. Traffic speeds in most of the  
25 streets treated were relatively low (less than 20 miles  
26

1 per hour) to start with. The early evidence suggests  
2 that it is likely that some speed and casualty  
3 reductions have taken place and this is consistent with  
4 previous research that has indicated that 20 mile per  
5 hour limits without traffic calming reduce mean speeds  
6 by about 1 mile per hour on average."

7 In relation to this, would you agree with some of  
8 the suggestion made here that 20 mile per hour limits  
9 can be used in some of the built-up environments and on  
10 streets where the speed limit is already low and  
11 populated?

12 CHAIRMAN: The speed limit is already low or the actual  
13 speed?

14 MS MAGGIE WONG: The actual speeds are already low.

15 MR TONY YAU: Yes, we agree with that. These two paragraphs  
16 mention two points. One is the traffic impact. Whether  
17 the low speed limit point can be implemented  
18 successfully, maybe you may anticipate some motorists  
19 may have different views, if you set such a low speed  
20 limit zone. So the main point we consider is to reduce  
21 the traffic impact. So, for urban area, that means the  
22 average actual speed is low. If we lower the speed  
23 limit, we will not have any traffic impact, because the  
24 actual average speed is already low. But we can, by  
25 this initiative, decrease the variance of speed limit,  
26

1           that means the acceleration or deceleration rate would  
2           be decreased.

3           The second point, I mentioned before, is such a low  
4           speed limit zone requires the road design and they need  
5           traffic calming measures, so that the road design itself  
6           is self-enforcing and the actual speed will be lower.

7   MS MAGGIE WONG: Yes, Mr Chairman. I see the time.

8   CHAIRMAN: Very well.

9   MS MAGGIE WONG: It's convenient.

10   CHAIRMAN: Given that we lost time this morning, we are  
11           going to, if it doesn't inconvenience anyone, take  
12           a shorter lunch break, and what I propose is that we  
13           resume at 2.15. Does that create any problems for  
14           anybody?

15   MS MABLE CHAN: No.

16   CHAIRMAN: Thank you. 2.15 it is then.

17   (1.04 pm)

18                               (The luncheon adjournment)

19   (2.15 pm)

20   CHAIRMAN: Good afternoon.

21           Ms Wong.

22   MS MAGGIE WONG: Yes. If we may finish off this document on  
23           setting local speed limits. We had finished the  
24           20 miles per hour limit, but to wrap this matter up,  
25           they also stated, at page 1028, paragraph 108, that

26

1           30 miles per hour is the standard speed limit for urban  
2           areas, but a 40 mile per hour limit may be used where  
3           appropriate and in exceptional circumstances a 50 miles  
4           per hour limit may be considered.

5           And paragraph 109 specified that the roads suitable  
6           for 40 miles per hour are generally higher quality  
7           suburban roads or those on the outskirts of urban areas  
8           where there is little development; and in paragraph 110,  
9           50km [sic] per hour limit is meant for higher quality  
10          roads.

11       CHAIRMAN: That's miles per hour, not kilometres.

12       MS MAGGIE WONG: Yes. 50 miles per hour limit may also be  
13          used on higher-quality roads where there is little or no  
14          roadside development. And table 1 sets out the limits,  
15          the different speed limits, in miles per hour, and where  
16          limits should apply.

17          In other words, they have divided it up by different  
18          zones, different purpose of the zones, and whether there  
19          is development in that particular zone, in deciding the  
20          appropriate speed limit.

21          As to this matter, I would like to ask whether the  
22          Transport Department would consider reviewing this paper  
23          and see whether the criteria used in table 1 would be  
24          applicable in Hong Kong.

25       MR TONY YAU: Thank you, Chairman.

26

1 I note it illustrates in table 1, 30 miles is  
2 equivalent to 48 kilometres per hour, and then 40 is  
3 equivalent to 64, and then 50 is equivalent to 80.

4 I think our current speed limit structure is more or  
5 less similar to this one, except for the low speed limit  
6 zone. That's why we are now studying to see whether the  
7 low speed limit zone can be introduced, as a trial, and  
8 if the trial is a success, we may consider to include a  
9 low speed limit zone in our current speed limit  
10 structure.

11 MS MAGGIE WONG: Mr Yau, may I take you back to your paper  
12 on this implementation of road safety audit and study on  
13 low speed limit zone, annex 2. That's the submission  
14 you made on 3 October 2018. That's in TD-5, page 1817.  
15 I would like to invite you to look at paragraph 15, at  
16 page 1820.

17 This paragraph mentions two matters that I will take  
18 up with you. The first is, starting from line 4, where  
19 you stated that:

20 "... it is observed that for some cities simply  
21 imposing a low speed limit zone cannot automatically  
22 ensure that travelling speeds are reduced or the overall  
23 accident rate is correspondingly brought down."

24 I would like to first of all show you two papers  
25 that have been produced recently, in May 2018, which  
26

1 suggested that if average speed is reduced by even  
2 1 mile per hour, the accident rate would fall by  
3 approximately 6 per cent on urban main roads, and  
4 residential roads with low average speeds.

5 If I may take you first of all to two documents  
6 which are not currently in the bundle. The first is  
7 an article by a Mr Rod King, and it is dated 23 May  
8 2018. If I may distribute that. (Handed).

9 This article is dated 23 May 2018, headed, "Reducing  
10 speed limits from 30 miles per hour to 20 miles per hour  
11 typically results in more than 20 per cent fewer  
12 casualties", and then it mentions, under the first  
13 paragraph:

14 "Speed reduction is significant to casualty levels  
15 because:

16 'if average speeds reduced by 1 mile per hour, the  
17 accident rate would fall by approximately 6 per cent on  
18 urban main roads and residential roads with low average  
19 speeds'."

20 Then it mentions a few studies, historic research,  
21 and if we go to paragraph 2.2, that's the "Recent  
22 Research (early 2008)":

23 "There have been three recent ... studies which have  
24 shed allowed us to understand better the impact of  
25 20 miles per hour speed limits on casualties."  
26

1           And it mentioned three studies, one by University of  
2           Westminister; second, by the University of West of  
3           England; and finally, the council's review, in the third  
4           dot:

5           "The council's review of the impact of the  
6           introduction of 20 miles per hour ... across Calderdale  
7           in West Yorkshire found:

8           -- A 30 per cent casualty reduction over a 3-year  
9           period (and later schemes indicate a 40 per cent  
10          reduction).

11          -- A 1.9 miles per hour mean reduction in speed  
12          (taken from 3.5 million readings with variations in some  
13          areas).

14          -- A rate of return of 3.65 pounds for every 1 pound  
15          spent ...

16          Overall ... it appears reasonable to assert that:

17          -- Where speeds are reduced to a maximum of 20 miles  
18          per hour in built-up areas a decline in casualties of  
19          more than 40 per cent will occur.

20          -- In built-up areas, on non-arterial roads, where  
21          the speed limit is reduced from 30 to 20 miles per hour  
22          there is typically an average decline in casualties of  
23          at least 20 per cent."

24          Then later on there is another article, we see, on  
25          25 May 2015, "Global consensus that 20 miles per hour is  
26

1 best practice", and it cited a number of respectable  
2 organisations, including WHO, the EU, iRAP, the Global  
3 Network for Road Safety Legislators and the OECD, all  
4 strongly recommended a lower speed limit, under 30km per  
5 hour.

6 If we look over the page, it also confirmed, the UK  
7 study, if we go over the page, the third paragraph --

8 CHAIRMAN: What is the page number?

9 MS MAGGIE WONG: Page 2 --

10 CHAIRMAN: Yes, thank you.

11 MS MAGGIE WONG: -- at the top, and we can see in the third  
12 paragraph.

13 CHAIRMAN: Yes.

14 MS MAGGIE WONG: "And whilst the UK has been a late starter,  
15 in the last 10 years over 25 per cent of the population  
16 have gained a 20 miles per hour limit on the streets  
17 where they live, learn, shop or work. Most of our  
18 iconic cities have a 20 miles per hour limit for most  
19 roads. 43 per cent of Londoners live on 20 miles per  
20 hour roads and 75 per cent of people in inner London  
21 boroughs. Even complete counties such as Lancashire,  
22 Sefton, Calderdale ... have adopted wide-area 20 mile  
23 per hour limits for all.

24 Casualty benefits show impressive reductions of 20  
25 plus per cent."

1           So based on this study -- and in fact this is not  
2           the only one because Transport for London has also  
3           issued a paper in October 2015, called the Safe London  
4           Streets approach, which also stated that the lower the  
5           speed limits, the lower the casualties.

6   CHAIRMAN:   Are we going to go to that?

7   MS MAGGIE WONG:   Yes.   Mr Chairman, that would be in the  
8           miscellaneous bundle, page 984.

9   CHAIRMAN:   Which miscellaneous bundle?

10   MS MAGGIE WONG:   MISC-3, page 984. The document starts at  
11           page 982.

12           If we go to page 987, we can see at the top:

13           "A 1 mile per hour reduction in speed could reduce  
14           the frequency of collisions by around six per cent in  
15           urban areas."

16           Then the first paragraph:

17           "The speed of motor vehicles is a contributory  
18           factor in many serious and fatal collisions."

19           So, based on all these papers, it appears -- Mr Yau,  
20           what the Transport Department stated there, that  
21           simply --

22   CHAIRMAN:   Just pausing there, before you pose your  
23           question -- we see, at 987, a reference, under the  
24           heading, "20mph pilots", the statistic given there, and  
25           this is October 2015, is "Almost 25 per cent of the  
26

1 capital's roads now have 20 miles per hour speed  
2 limits", and the other statistic you gave us earlier was  
3 that 43 per cent of Londoners live on 20 miles per hour  
4 roads.

5 MS MAGGIE WONG: Yes.

6 CHAIRMAN: Is there any update of that figure in more recent  
7 material? For example, the Transport for London  
8 document speaks about the number of roads, which is  
9 slightly different from urban density of population, but  
10 is there any figure, current figure, for the number of  
11 roads, the percentage of roads in London that are  
12 subject to a 20 mile an hour speed limit?

13 MS MAGGIE WONG: Mr Chairman, may I check that and revert on  
14 this? But we have evidence from Mr Mike Weston who  
15 testified, showing a plan, that a lot of London boroughs  
16 have changed the speed limit to 20 miles per hour.

17 CHAIRMAN: That's the digital map of London showing speed  
18 limits, is it not, and it does it by colour?

19 MS MAGGIE WONG: Yes, it does it by colour.

20 CHAIRMAN: Perhaps we can have that map on the screen.

21 MS MAGGIE WONG: Yes.

22 CHAIRMAN: 20 miles an hour is green, isn't it?

23 MS MAGGIE WONG: That would be in bundle MISC-3, page 1226.

24 We can see, in this map, that different colour  
25 denotes different speed limits, and there are five speed  
26

1 limits there. Green represents the 20 miles per hour;  
2 blue, 30; pink, 40; light brown, 50; and purple, 70. We  
3 can see, in the middle part, a lot of the roads have  
4 adopted 70 miles per hour.

5 Can you see that, Mr Yau?

6 MR TONY YAU: Yes.

7 MS MAGGIE WONG: And the evidence of Mr Mike Weston --

8 CHAIRMAN: Where does this document come from?

9 MS MAGGIE WONG: This document is a Vision Zero plan taken  
10 forward by the mayor's transport strategy. It's issued  
11 in July 2018. The document starts at page 1207.

12 With the assistance of Mr Chan, we have found the  
13 figure, which is at page 1223. Under the section 3.2,  
14 "A new approach to reducing speeds in London", in the  
15 first paragraph, it stated:

16 "London has already taken action to reduce speeds,  
17 and around a third of streets in London now have  
18 a 20 miles per hour speed limit ... The majority of  
19 remaining streets have a 30 miles per hour limit, the  
20 national urban default limit, with the rest having 40,  
21 50 and 70 miles per hour limits."

22 So that's the more updated figure.

23 CHAIRMAN: At page 1226, which is the map you showed us  
24 earlier, I notice that next to the term "Figure 10",  
25 this is said to be the "proposed speed limits on the  
26

1 TLRN" -- Transport for London Road Network, I suspect?

2 MS MAGGIE WONG: Yes.

3 CHAIRMAN: What is the actual speed limits? Because there  
4 exists, does there not, a digital map?

5 MS MAGGIE WONG: If you go to figure 9 at page 1225.

6 CHAIRMAN: Thank you.

7 MS MAGGIE WONG: That's the current speed limits.

8 CHAIRMAN: And what is the date of the implementation of the  
9 proposal?

10 MS MAGGIE WONG: The only date we are able to locate is at  
11 page 1223, bottom right-hand corner:

12 "TfL will engage on proposals to reduce speed limits  
13 on the TLRN [Transport for London] by:

14 a. Ensuring all of the TLRN within the central  
15 London congestion charging zone has a 20 miles per hour  
16 limit, to be implemented by May 2020;

17 b. Delivering a programme to reduce speed limits  
18 on other locations on the TLRN to address areas of high  
19 road danger, delivered over the period until 2024."

20 CHAIRMAN: Thank you.

21 MS MAGGIE WONG: If we can go back to your document, the  
22 Transport Department's document -- in annex 2,  
23 paragraph 15, as to the comment or the observation that  
24 "simply imposing a low speed limit zone cannot  
25 automatically ensure the travelling speeds are reduced  
26

1 or the overall accident rate is correspondingly brought  
2 down" -- appears to be overtaken by the documents and  
3 statistics I have shown to you. Would you accept that?

4 MR TONY YAU: Yes, in this paragraph I just want to point  
5 out that simply by introducing a low speed limit zone  
6 without any modification of the road design, the effect  
7 may be not so satisfactory.

8 So that's why we are going to study the low speed  
9 limit zone, and we will see if it can be coupled with  
10 some suitable road design so that the benefit of low  
11 speed limit zone can be more significant. We are  
12 working on it.

13 CHAIRMAN: Low speed limit zones are accompanied by  
14 speed-calming measures, are they not? Isn't that the  
15 London approach?

16 MR TONY YAU: If you refer to the SEC bundle --

17 CHAIRMAN: Can you answer the question first and then take  
18 us to the material. Is that not the approach?

19 MR TONY YAU: Yes, turn out from the result of trial in  
20 different countries.

21 CHAIRMAN: Yes. So you don't just impose a speed limit; you  
22 have calming measures. Your starting point is to take  
23 places -- urban density, pedestrian density -- where the  
24 speed of traffic, the actual speed, is low. Then you  
25 impose a speed limit, and you accompany that with  
26

1 traffic-calming measures. Is that not the system?

2 MR TONY YAU: Because if you just simply lower the speed  
3 limit, the average speed -- or road design, the designed  
4 speed, most of the vehicles maybe travel at around  
5 40 kilometres per hour. That may be --

6 CHAIRMAN: Concentrate on what I've suggested to you. It's  
7 an overall summary. It's put together by component  
8 parts. You look at low speed actually happening.  
9 Pavements with lots of pedestrians on it. Then you have  
10 a speed limit zone, but in order to make it efficient,  
11 you have calming measures. Is that not the system?  
12 It's as simple as that.

13 MS MABLE CHAN: Chairman, can I take this question?

14 CHAIRMAN: Please do.

15 MS MABLE CHAN: Your presentation and the analysis is  
16 correct. The imposition of the low speed limit zone is  
17 an area that we are studying and we will look into. The  
18 introduction or adoption of calming measures is part and  
19 parcel of the package, so as to implement a low speed  
20 limit zone.

21 CHAIRMAN: Thank you.

22 MS MAGGIE WONG: This setting local speed limits is actually  
23 referred to in a paper presented by the Community for  
24 Road Safety in May 2013, where it was presented at the  
25 second United Nations Global Road Safety Week.

26

1           If I may take you to page 820-25 of bundle MISC-2,  
2           it is a paper presented by the Community for Road  
3           Safety, and you can see the date, presented at the  
4           Energizing Kowloon East Office, 7 May 2013.

5           If I may first take you to 820-57, which sets out  
6           the current practice in Hong Kong. It states there that  
7           in Hong Kong, the urban speed limit is 50km per hour.  
8           Guideline on speed limit is given in volume 6 of the  
9           TPDM published by the Transport Department, and it's  
10          stated there, clause 6.4.2.5, that:

11          "Generally, speed limits lower than 50 ... are not  
12          recommended for public roads, as they require a higher  
13          level of enforcement to ensure compliance, and it is  
14          doubtful that the lower speed limit imposed will  
15          contribute significantly to accident prevention."

16          Then clause 6.5.3.2 also states that:

17          "Justification for a permanent speed limit of 30km  
18          per hour will need to be considered on an individual  
19          basis having regard to the particular circumstances,  
20          including the road environment, design speed and  
21          accident rate ... However, narrowness of the road,  
22          and/or the existence of isolated hazards along it are  
23          not sufficient reasons for the imposition of such  
24          a speed limit."

25          So, based on your evidence earlier, it appears these  
26

1 two clauses will not be updated as of to date; is that  
2 the position?

3 MR TONY YAU: These two clauses are about our current  
4 practice on speed limit. So, when we study the  
5 feasibility of low speed limit zone, if it will be  
6 implemented, this clause of TPDM will be updated  
7 accordingly.

8 MS MAGGIE WONG: And if you go to 820-35, the Community for  
9 Road Safety is advocating the development of a system  
10 for Hong Kong based on 20, 30 and 40km per hour, with  
11 different zones, as you can see on the screen: new  
12 towns, commercial and tourist areas, industrial zones,  
13 residential/household developments, housing estates,  
14 et cetera.

15 Has the TD considered the way this is presented by  
16 the Community for Road Safety, in terms of delineating  
17 different zones for different speed limits?

18 MR TONY YAU: So far, under our study, we concentrate on the  
19 low speed limit zone of 30 kilometres per hour zone, not  
20 exactly the proposal, the suggestion proposed by the  
21 Community for Road Safety.

22 MS MAGGIE WONG: We have finished with this document. Just  
23 a general question about the 85 percentile speed.

24 Julian Kwong stated that the 85 percentile speed is  
25 not as ideal as average speed. If I may take you to his  
26

1 evidence on Day 8, that would be 17 July 2018, in TSCP  
2 bundle 3, page 67, line 14. Mr Julian Kwong said, in  
3 response to Mr Chairman's question, explaining the 85  
4 percentile approach to speed limit -- at line 14, he  
5 stated:

6 "But I would also like to say that 85th percentile  
7 speed is not the only value we are looking at.  
8 According to the document which the chairman quoted  
9 yesterday, the document entitled 'Setting Local Speed  
10 Limit, 2013', issued by the Department for Transport of  
11 the United Kingdom.

12 In this document actually they are advocating the  
13 use of average speed. Average speed is clear, meaning  
14 that, say, we have all the 100 vehicles counted, and we  
15 have the average of the speed. So they are not using  
16 85th percentile speed anymore to determine [speed].  
17 They are now actually using average speed.

18 The idea is the average speed probably reflects what  
19 the majority of sensible drivers wish to travel at, the  
20 speed which they want to travel at.

21 The significance is that if we use 85th percentile  
22 speed, then it may not be in favour of, say,  
23 pedestrians. If we use average speed, that can be  
24 a better solution."

25 Now, in terms of this idea, what is your view on  
26

1           this matter?

2       MR TONY YAU: I note that Mr Julian Kwong's evidence refers  
3           to setting a local speed limit issued by the Department  
4           for Transport.

5       CHAIRMAN: This is the issue that you didn't understand  
6           earlier, as to what it actually meant, is that right,  
7           whether they were recommending what Julian Kwong says  
8           they are?

9       MR TONY YAU: Julian Kwong recommended that we should use  
10          mean speed instead of --

11      CHAIRMAN: Yes, but he is saying that's what the United  
12          Kingdom is doing, and you were querying that, were you  
13          not?

14      MR TONY YAU: Right.

15      CHAIRMAN: So you are not sure what the UK guidelines is.

16      MR TONY YAU: Yeah, because I just read from the guidelines.

17      CHAIRMAN: No, I understand, but that's your position, isn't  
18          it, you are not sure that that is what is meant?

19      MR TONY YAU: No.

20      CHAIRMAN: I'm sorry, I interrupted you.

21      MR TONY YAU: Because I note that in fact both mean speed  
22          and 85 percentile speed were considered in the system,  
23          but maybe under a matrix with some factors, so that both  
24          speeds will be considered.

25      MS MAGGIE WONG: Thank you.

26

1           If we also look at the evidence of Mr Mike Weston,  
2           the expert, on Day 18, in the transcript of 27 September  
3           2018 at page 188.

4           Page 188 first, at line 7. First of all, it refers  
5           to the map that we have looked at, and then he says:

6           "There's been a trend across the 32 London boroughs  
7           to implement more and more 20 mile per hour zones across  
8           large residential areas. So 20 miles per hour equates  
9           to about 32 kilometres per hour. So we are seeing more  
10          and more roads becoming 20 mile per hour speed limited.  
11          Most other roads will be 30 or 40, and perhaps a few 50,  
12          but in terms of bus routes in London, very few bus  
13          routes would operate on roads with a higher than 50 mile  
14          per hour speed limit. The majority will be less than  
15          that."

16          And if we go over to page 194, Mr Mike Weston  
17          proposed a number of approaches that we could possibly  
18          take. The first is, if we look at line 6, page 194 --  
19          he said the question is:

20          "... somebody should probably first understand what  
21          the average speed is ..."

22          He also mentioned here the average speed and not the  
23          85th percentile speed.

24          And then the second question, what the range of  
25          speeds are, and then he said:

1 "I think, in London, just to clarify, these 20 mile  
2 per hour speed limits apply to all vehicles, not just  
3 buses."

4 Then he said:

5 "First, I would suggest there is a case of  
6 understanding what the average speeds are on certain  
7 sections of road to understand the extent of the  
8 problem."

9 Then the second issue is -- so if we look at lines  
10 22 to 23, the underlying issue is to find out what the  
11 problem is, and then, having done that, one could do the  
12 cost/benefit analysis, like what would be the cost if  
13 traffic is going to move slower, and the benefit.

14 If we look at page 195, line 6, in response to the  
15 chairman's question, he answered:

16 "... the logic is, if you do slow all the bus routes  
17 down because you don't go as fast, then to run the same  
18 frequency you potentially need more buses and more  
19 drivers, so there's a cost to that, and it's back to the  
20 earlier point, is that more beneficial than fitting  
21 other safety features to the buses? It's trying to take  
22 an overview of all the options that are available and  
23 make an informed choice of all those, as opposed to  
24 perhaps picking certain things off one at a time.  
25 I think, if you do the latter approach, there is  
26

1 a danger you make some of the wrong decisions."

2 So the approach he suggested is, first of all, to  
3 find out what the average speed is, what the range of  
4 speed is, and then do the cost/benefit analysis, and  
5 having known all these factors, to balance it out with  
6 other safety features to see if it is worthwhile on  
7 a cost/benefit analysis to conduct a reduction of speed  
8 limit.

9 He also mentioned this exercise in London has taken  
10 five to ten years, at least five to ten years, to  
11 complete. So it takes time.

12 So my question for the Transport Department is  
13 whether, apart from the lower speed limit study, you  
14 would consider adopting a similar approach as that  
15 advocated by Mr Mike Weston.

16 MR TONY YAU: I think, in our study, we will consider that.

17 As I mentioned in the morning session, we are quite  
18 interested in the cost/benefit analysis. I think those  
19 analyses will be useful for us to compare which option  
20 will be the best option to enhance road safety as well  
21 as the bus safety.

22 MS MAGGIE WONG: Yes. Now, I would like to also ask

23 Mr Yau -- I understand there is a consultancy study by  
24 the Transport Department on review of potential roadside  
25 safety hazards in the Hong Kong road network, to be  
26

1 commenced in May 2018. Is that correct?

2 MR TONY YAU: Yes, correct.

3 MS MAGGIE WONG: We need not turn up that document, but for  
4 chairman's benefit, it's TD-1, page 372.

5 CHAIRMAN: Is this being performed by Mott MacDonald or is  
6 that a different consultancy?

7 MR TONY YAU: This is performed by AECOM. It's a study on  
8 the review of road safety hazards.

9 CHAIRMAN: Thank you.

10 MS MAGGIE WONG: And the study would commence on 14 May  
11 2018, for completion on 13 November 2020, within 30  
12 months' time.

13 I would like to ask -- it appears the consultancy  
14 brief is limited to roads that are 70km per hour; is  
15 that correct?

16 MR TONY YAU: No, this covers all the Hong Kong road  
17 networks, up to 4,200 kilometres of both bounds.

18 CHAIRMAN: That's when you measure the roads going in two  
19 directions; in other words, you double 2,000 kilometres?

20 MR TONY YAU: Right, 2,000.

21 CHAIRMAN: That took a bit of working out, and we had to  
22 look at what is the length of our roads in Hong Kong.  
23 You measure them both ways, for some reason. Anyway,  
24 I understand it now.

25 MR TONY YAU: Because the study has to travel each bound.

26

1 MS MAGGIE WONG: Yes.

2 CHAIRMAN: So it's all roads at all speeds?

3 MR TONY YAU: Right.

4 MS MAGGIE WONG: Maybe I just wish to clarify, because I can  
5 see in the in bundle TD-5, page 1685, if we look at  
6 paragraph 2.3, that's the consultancy brief in relation  
7 to this study.

8 If we look at paragraph 2.3, it is stated there:

9 "To minimise the risk of the existing roads,  
10 Transport Department and Highways Department have been  
11 jointly conducting road safety check for identifying and  
12 rectifying potential roadside safety hazards on existing  
13 roads with speed limit of 70km per hour or above."

14 So I would like to clarify, the assignment -- we can  
15 also see at paragraph 4 that:

16 "The assignment covers the following main tasks for  
17 all public roads (approximate bound length of 4,200km)  
18 in the whole Hong Kong network ..."

19 Then we can see there are a number of matters that  
20 invite the consultancy to do, and one of the matters  
21 involves, (c):

22 "To conduct RSC to systematically inspect and  
23 identify roadside safety hazards on all public roads,  
24 including about 200 identified locations adjacent to ...  
25 road sections identified by Highways Department in  
26

1           2013".

2           So, in fact, because initially, when I read it, it's  
3           a bit confusing as to what it covers, so, according to  
4           you, it actually covers all roads, not simply limited to  
5           70km per hour?

6       MR TONY YAU: It should be covered by all roads. It should  
7           cover all roads.

8           In paragraph 2.3, it mentioned that before this  
9           consultancy, TD and Highways staff will conduct a road  
10          safety check for roads 70 kilometres or above, because  
11          of the resource issue, so we engage a consultant to  
12          investigate all the roads.

13       CHAIRMAN: So these are two different studies? Transport  
14          and Highways Department were doing one at 70 kilometres  
15          and above, and now you are doing all roads; two  
16          different things?

17       MR TONY YAU: For the 70 kilometres roads or higher, this is  
18          an internal one.

19       CHAIRMAN: Yes.

20       MS MAGGIE WONG: Now, I've completed this topic on this  
21          particular lowering of speed limit. Unless Mr Chairman  
22          has other questions, I will move on to the Tai Po  
23          accident more specifically.

24       CHAIRMAN: Please do.

25       MS MAGGIE WONG: Mr Yau, I would like to ask -- so that you  
26

1 know where I am going, my question is this. Thank you  
2 for providing us with the Working Group on Speed Limit  
3 Review for the five road sections where the speed limit  
4 was reduced. I would like to ask ultimately the  
5 question as to whether you would consider appropriate to  
6 introduce a review mechanism where, if a particular  
7 district council is dissatisfied with the progress or  
8 the inaction, or whatever term you phrase it, of the  
9 traffic engineer in not reviewing or changing the speed  
10 limit, in not changing the speed limit, whether you  
11 would consider introducing a review mechanism so that  
12 the matter can be brought before the working group to  
13 consider whether it is an appropriate case to review the  
14 speed limit.

15 So my question ultimately hopes to ask you this  
16 question, and the question or the documents I'm going to  
17 show you --

18 CHAIRMAN: Just before you move on -- the traffic engineer  
19 doesn't decide the speed limit, does he? He decides  
20 whether or not to refer it to others; am I right?

21 MS MABLE CHAN: Correct.

22 CHAIRMAN: So your question is aimed at should the district  
23 councils have an ability to review, presumably as  
24 a result of public complaints --

25 MS MAGGIE WONG: Yes.

26

1 CHAIRMAN: -- the decision of a traffic engineer not to  
2 refer the matter for consideration of changing speed  
3 limit?

4 MS MAGGIE WONG: Yes.

5 CHAIRMAN: Thank you.

6 MS MAGGIE WONG: Thank you.

7 Before I go to documents, may I just ask some  
8 general question, without going to the document. Would  
9 you accept that in this Tai Po Road accident, there had  
10 been complaints by district councillors, from Tai Po  
11 District Councillors, on two matters? First is the  
12 speed limit of the subject road section. Second is the  
13 installation of speed enforcement camera. Will you  
14 accept that as a general statement, before the Tai Po  
15 accident?

16 One in 2015, where the district councillor asked to  
17 review the speed limit of the subject road section, and  
18 one in 2017, where the Tai Po District Council asked for  
19 the installation of speed enforcement camera.

20 MR TONY YAU: Thank you, Chairman.

21 Based on our records, for the first one we received  
22 a request from the district councillor -- they were  
23 requesting to install 50 speed limit signs on a road  
24 with a speed limit of 50. And for the second one, yes,  
25 we have received their request for installation of speed

26

1 enforcement cameras.

2 MS MAGGIE WONG: So can I clarify that the installing of  
3 50km speed limit sign on a road with speed limit of 50,  
4 what I meant is not with a speed limit of 50 but with  
5 a speed limit of 70, they asked to lower the speed limit  
6 to 50, from 70 to 50.

7 MR TONY YAU: To our record, we received the letter to  
8 request to install 50 kilometre speed limit signs on  
9 a road with speed limit of 50.

10 CHAIRMAN: I don't think the letter says that. It requests  
11 a 50 kilometre speed limit sign, but it designates  
12 a place, and the place clearly had a speed limit of  
13 70 kilometres per hour. The district councillor  
14 involved, if my memory is correct, explained to us that  
15 that was his way of requesting a change in the speed  
16 limit. Whether or not you understood that to be his  
17 request is another matter.

18 Perhaps we ought to look at the document.

19 MS MAGGIE WONG: Yes. If we may look at the documents  
20 chronologically, the first document I would like to ask  
21 you to look at is a letter from the Japanese  
22 International School dated 10 February 2015. The  
23 English is at 840-84 in the TU bundle.

24 CHAIRMAN: This is Ms Ashdown's letter, is that right?

25 MS MAGGIE WONG: Sorry, in DC-2B bundle.

26

1 Yes, that's Ms Ashdown's letter.

2 This is a letter sent by the Japanese International  
3 School, I believe to the district council, and if we can  
4 see right at the first paragraph:

5 "I am writing to ask for your help ... outside our  
6 school a lady was killed whilst crossing the road. The  
7 speed limit is 70km per hour which probably contributed  
8 to the severity of her injuries."

9 If we drop our eyes down to the last paragraph:

10 "I believe that it is important that a 50km per  
11 hour ... is implemented as soon as possible in order to  
12 prevent another serious accident happening."

13 So this is the first letter.

14 Then if I may invite you to go to the minutes of the  
15 second meeting, dated 13 March 2015, of the Tai Po  
16 District Council. Bundle DC-2B, page 840-91.

17 This is a meeting dated 13 March 2015, and we can  
18 see the persons who attended, including Assistant  
19 District Officer (Tai Po)/Highways Department, and also  
20 Senior Transport Officer of the Transport Department,  
21 and also other engineers of the Transport Department.

22 If we may go to the next page, 840-92, where there  
23 was "A request from the Japanese International School to  
24 reduce the speed limit of Tai Po Road section at Tai Po  
25 Kau".

26

1 And:

2 "The chairman expressed that the T&TC had received  
3 a letter from the Japanese International School which  
4 requested to reduce the speed limit of the road section  
5 in front of their school from 70km per hour to 50. They  
6 also invited the T&TC to visit the JIS to discuss with  
7 their students the traffic problems ..."

8 And in paragraph 80:

9 "Mr Wong Kwok Leung [that's the engineer of the  
10 Transport Department] responded that the Japanese  
11 International School suggested that the speed limit of  
12 the road section in front of the [school] be reduced  
13 from 70 to 50 in view of a traffic accident on the  
14 section of Tai Po Road in front of the Japanese  
15 International School in 2014 in which a member ... was  
16 killed. The TD and police were examining the cause of  
17 the traffic accident ..."

18 Then if we drop a few lines:

19 "The TD would examine whether the present speed  
20 limit of that road section was appropriate."

21 Then 81:

22 "A member, who was the district councillor of the  
23 constituency concerned, said that he had paid a visit to  
24 the site ... He indicated his deference to the views of  
25 the TD and residents in the vicinity of the site  
26

1 concerned. He would further report to the committee  
2 after examination by the TD."

3 The next document is the letter from the Tai Po  
4 District Council dated 24 July 2015. That's four months  
5 after the meeting. That's in bundle DC-2B, page 840-75.  
6 Then it stated there that:

7 "... am a Tai Po District Councillor and have  
8 recently received requests for assistance from the  
9 residents in the vicinity of Tai Po Road. This is  
10 because owing to the absence of speed limit traffic  
11 signs around the bend of Savanna Garden, traffic  
12 accidents happened frequently.

13 To ensure the safety of road users, your department  
14 is now requested to expeditiously install the '50km'  
15 speed limit signs at the above location to remind the  
16 motorists to pay attention to driving at safe speed for  
17 prevention of unnecessary incidents."

18 Now, the Savanna Garden, that road section, is  
19 a 70km per hour zone, or the road section is 70km per  
20 hour.

21 CHAIRMAN: Before you go on -- do you accept that? Do you  
22 need to have a look at a map?

23 MR TONY YAU: Yes.

24 CHAIRMAN: Let's put the map up, please.

25 MR TONY YAU: Yes, the then speed limit was 70.

26

1 CHAIRMAN: Thank you.

2 MS MAGGIE WONG: But this is not the only document he sent.

3 According to Mr Chan Siu Kuen, the Tai Po District  
4 Councillor, he said there were telephone conversations.

5 If I may take you to the transcript reference.

6 That's Day 6, 14 July, page 9, line 18. It's in TSCP  
7 bundle 3A.

8 Mr Chan stated there, at line 18:

9 "At that time, the Transport Department did not give  
10 me a direct reply. However, I have spoken to them on  
11 the phone. They said that if the speed is to be reduced  
12 to 50 they would have to consult residents as well as  
13 owners corporations. And in 2014, near the Japanese  
14 International School there was a traffic accident at the  
15 signal junction, as a result a person was injured, and  
16 the Transport Department replied to me. He said for the  
17 speed to be reduced to 50 the TD would have to conduct  
18 a study, and after the accident they have appealed to  
19 the public to abide by road traffic regulations. They  
20 said that from the perspective of the TD, for the speed  
21 to be reduced to 50, they would have to do a lot of  
22 consultation and to liaise with the police.

23 I have been waiting. And I have been in contact  
24 with them. Well, Mr Wong of the Transport Department  
25 has been transferred out. And regrettably we had the

26

1 traffic accident at Tai Po Mei. And I approached the  
2 police, because the TD could not help us. I asked the  
3 police to install speed cameras and I have been  
4 following that up."

5 Then he repeated that at page 11 --

6 CHAIRMAN: I think this establishes the point: we have  
7 evidence that there was a conversation that makes it  
8 perfectly clear that the request was for a reduction in  
9 the speed limit.

10 MS MAGGIE WONG: Yes.

11 If we may proceed to the letter requesting for  
12 installation of speed camera. That would be 5 June  
13 2017. There's also in bundle DC-2B, page 840 --

14 CHAIRMAN: We've been through all this evidence before.

15 You've tried to put a general proposition to Mr Yau, and  
16 I think he didn't agree with it, but I think he now does  
17 agree with it, as to the first matter, that is to say  
18 this was a request for the reduction of the speed limit,  
19 when one looks at the location that was involved,  
20 Savanna Garden, and at the evidence we have received.  
21 So the second issue is the request to install a speed  
22 camera, and perhaps you could just summarise it first to  
23 see if Mr Yau agrees with that.

24 MS MAGGIE WONG: Yes.

25 The speed camera is in short that the district  
26

1           councillor sent a letter to the police, in June 2017,  
2           copied to the Transport Department --

3       CHAIRMAN: Am I not correct in remembering that this is the  
4           letter the Transport Department said they didn't  
5           receive? Have I got that right?

6       MS MAGGIE WONG: This is -- the Transport Department replied  
7           to the question of the IRC on 13 July 2018, stating the  
8           Transport Department acknowledged receipt of a copy of  
9           the police reply to Mr Chan of 16 June 2017.

10      CHAIRMAN: So my memory is wrong about that then. Perhaps  
11           you had better take us through it.

12      MS MAGGIE WONG: Yes. That's at TD-1, page 395, at  
13           paragraph 9.

14           In paragraph 9 at page 395, you stated there that:

15           "On 21 June 2017, the TD received a copy of [the  
16           police force's] reply to Mr Chan of 16 June ... which  
17           stated that 'The Transport Department currently has no  
18           plan to install fixed speed enforcement camera in the  
19           captioned road section.'

20           Upon receiving [the police's] reply to Mr Chan, the  
21           TD checked the accident records in the vicinity of  
22           Tai Po Road near Deerhill Bay and Tai Po Mei and noted  
23           that there was no record of traffic accident involving  
24           vehicle speeding over the past three years, and hence  
25           that there was no plan to install fixed speed

26

1 enforcement camera thereat. Since TD had nothing to add  
2 to the Police's reply, the TD did not provide a separate  
3 reply to Mr Chan."

4 I believe in your answer to the IRC question, you  
5 also acknowledge, at paragraph 17 in the same paper, at  
6 page 400, the last line of paragraph 17, in relation to  
7 the TD's response:

8 "The WG had not been asked on any earlier occasion  
9 to consider the appropriateness of the speed limit in  
10 place for that section of road."

11 Just to complete the picture, it never reached the  
12 working group, this request to reduce the speed limit  
13 and the request to install speed enforcement cameras.  
14 It stayed at the level of the traffic engineer of the  
15 relevant traffic division. So --

16 CHAIRMAN: First of all, do you accept that, on the  
17 evidence?

18 MR TONY YAU: Yes, I think so.

19 MS MAGGIE WONG: And if we accept that --

20 CHAIRMAN: Just give me a moment, please.

21 MS MAGGIE WONG: Yes. Sorry.

22 CHAIRMAN: Thank you.

23 MS MAGGIE WONG: And if we accept that, I wouldn't take you  
24 to the minutes of meeting on 12 February 2018, where you  
25 have a meeting with the Tai Po District Council, after  
26

1 the Tai Po accident, in which I believe Ms Chan was also  
2 present at the meeting.

3 Basically --

4 CHAIRMAN: We have been through this before, have we not?

5 MS MAGGIE WONG: Yes.

6 CHAIRMAN: What is the purpose? Can we not summarise this  
7 evidence?

8 MS MAGGIE WONG: Yes. The evidence is simply that the  
9 Transport Department will review the speed limit --

10 CHAIRMAN: And that's what it did.

11 MS MAGGIE WONG: And that's what it did, in two months'  
12 time, and the working group ultimately sent or reviewed  
13 the relevant section. The working group had a meeting  
14 on the speed limit review on 27 March 2018, and agreed  
15 to the proposed reduction or lowering of the speed limit  
16 of the subject road section.

17 CHAIRMAN: What's the reference for that, if you could give  
18 it to me?

19 MS MAGGIE WONG: Yes. The reference is at TD-1, page 166.  
20 That's 27 March 2018.

21 And the minutes which I wish to take you to is at  
22 TD-6, page 1923 to 1927. This is the new document you  
23 have provided to us recently, on 12 October 2018.

24 If I may take you to the minutes of the Working  
25 Group on Speed Limit Review. That would be 1916. If we  
26

1 can see on that page, the persons present included the  
2 Transport Department, the Hong Kong Automobile  
3 Association, Institute of Advanced Motorists Hong Kong,  
4 and a number of Transport Department officials,  
5 including those who are traffic engineers.

6 If I may take you to 1917, that's the section on the  
7 subject road section, 4.2. It appears the heading  
8 stated there is "Report no. 3 and no. 4", concerning the  
9 "Subject road section of Tai Po Road between Tsun  
10 King Road and Yung Yi Road, Tai Po, (both bounds)".

11 Can I ask whether these minutes summarise the  
12 proposal set out in the report, because we have not been  
13 given the report, so we don't know what has been  
14 proposed in the report itself. Can you confirm whether  
15 the proposal set out in these few paragraphs are the  
16 proposals advanced by the transport engineer of the  
17 Transport Department?

18 MR TONY YAU: Yes.

19 MS MAGGIE WONG: It's noted, not simply from these minutes,  
20 that you have taken -- the pattern is this. You will  
21 review the survey 85th percentile speeds during off-peak  
22 hours for light vehicles at the concerned road section.  
23 That's stated at 4.2.1, paragraph (a). And the second  
24 is you will review the accident rates in terms of  
25 personal injury accidents per million vehicle-kilometre.

26

1 That's in paragraph (b).

2 But if I may take you to the last sentence, in  
3 particular the northbound section:

4 "... the accident rates for the northbound and  
5 southbound of the northern section were 1.21 and 1.57  
6 respectively, both of which were higher than the  
7 territorial average accident rate (1.18 in 2016) for all  
8 roads."

9 CHAIRMAN: Which were lower, not higher, isn't that right?

10 MS MAGGIE WONG: Higher.

11 CHAIRMAN: I'm sorry. You are reading from paragraph (b),  
12 are you?

13 MS MAGGIE WONG: Yes, the last few lines.

14 CHAIRMAN: Thank you. I was reading higher up.

15 MS MAGGIE WONG: I'm sorry.

16 CHAIRMAN: No, that's my mistake. Thank you.

17 MS MAGGIE WONG: And we can see, based on (e), "considering  
18 the above observed 85th percentile speeds and accident  
19 rates", it was recommended lowering the speed limit at  
20 both bounds of the subject road section to 50 km per  
21 hour and retaining the speed limit of the remaining part  
22 of the subject road section under review.

23 I believe, Mr Yau, you have stated in the last  
24 hearing that one of the criteria is to consider the  
25 accident rates, personal injury accident rates, as  
26

1 compared to the accident rate for the territory, and it  
2 appears the statistic would clearly reveal, as noted  
3 here, that the accident rates were higher than the  
4 territory accident rates in 2016, 1.18.

5 I think we have established that you accepted that  
6 there had been complaints from the district councillor  
7 to the Transport Department about reviewing or reducing  
8 the speed limit of the subject road section.

9 Now, in light of what we have seen, do you consider  
10 that there might be a need to introduce a review  
11 mechanism where the district councillor can appeal to  
12 the working group if the traffic engineer refuses to  
13 carry out the study of the subject road section?

14 MR TONY YAU: Yes. I --

15 MS MAGGIE WONG: Or refer to the working group?

16 MR TONY YAU: Yes, I agree with that. I think we need  
17 a mechanism for the traffic engineers to reference  
18 whether they can forward the demand from the public to  
19 the working groups. So we will review the mechanism of  
20 speed limit review, so to duly consider the public  
21 opinion.

22 CHAIRMAN: How should that be done? If there is clearly  
23 a need to have a mechanism by which you can review  
24 a traffic engineer's decision, he being the recipient of  
25 a request from a district council for a change of speed  
26

1 limit, how should that be done?

2 MR TONY YAU: I think we should first discuss the new  
3 mechanism or proposals in the speed limit working group,  
4 and then the proposer will then consult the district  
5 council, to seek their comments.

6 CHAIRMAN: Thank you.

7 MS MAGGIE WONG: Mr Chairman, I'm going to move on to the  
8 topic of illegal parking and the proof concept trial.

9 CHAIRMAN: Yes.

10 MS MAGGIE WONG: We have heard evidence from trade unions,  
11 from Kowloon Motor Bus, from practically all franchised  
12 bus operators, that there is illegal parking problem,  
13 and this problem --

14 CHAIRMAN: Anybody with eyes would be able to see that.

15 MS MAGGIE WONG: Yes.

16 CHAIRMAN: So what is it specifically that is relevant for  
17 us?

18 MS MAGGIE WONG: May I ask -- there is a letter from the  
19 police dated 10 August 2018, in bundle MISC-1C, at  
20 page 124-539. It mentioned there is a proof of concept  
21 trial.

22 CHAIRMAN: Before we get buried in the detail, what is the  
23 issue that we would benefit from having the evidence of  
24 the Transport Department? What is the issue?

25 MS MAGGIE WONG: First of all, I think one of the issues  
26

1 involved is -- it mentions there that they are going to  
2 review the illegal parking problem by having CCTV  
3 cameras installed at various parking or stopping places,  
4 and because there are no details as to how this proof of  
5 concept trial works, my question is whether it involves  
6 video recognition of car plate numbers captured in the  
7 video footage, and whether it would involve a system  
8 where it involves the computer detecting, for example,  
9 if a car parked at a specific location and in  
10 a stationary position or no change of shape, and being  
11 observed for a few minutes and didn't move, how would  
12 that trigger the Transport Department or the police to  
13 carry out enforcement action?

14 CHAIRMAN: Well, the Transport Department are not involved  
15 in carrying out enforcement of illegal parking, are  
16 they? That's a matter for the police.

17 MS MAGGIE WONG: That's a matter for the police.

18 CHAIRMAN: The Transport Department's interest, no doubt,  
19 would be with illegal parking generally, because it  
20 affects congestion, but more specifically illegal  
21 stopping in bus stops is an issue that concerns this  
22 committee.

23 MS MAGGIE WONG: Yes. Maybe, because we don't have any  
24 information about this proof of concept trial, except  
25 what's stated in the letter from the police, may  
26

1 I confirm the study involves the matters that I have  
2 identified is to use a CCTV camera and to observe the  
3 vehicle for a certain period.

4 CHAIRMAN: What is your question then for the Transport  
5 Department?

6 MS MAGGIE WONG: Whether you know much about this proof of  
7 concept trial and your involvement in this proof of  
8 concept trial and --

9 CHAIRMAN: Well, one question at a time. Let's try those  
10 two questions first.

11 MS MABLE CHAN: Thank you, Chairman. Thank you for  
12 Ms Wong's question.

13 The Transport Department is not involved in this  
14 feasibility study of proof of concept trial.

15 As regards the question about whether any CCTV is  
16 adopted or how the video images are to be captured and  
17 to facilitate enforcement, we regret that because we are  
18 not involved, we cannot shed any light in that regard.

19 But just a remark that I may make is that we would  
20 welcome any pilot study or proof of concept feasibility  
21 study that may help to promote or enhance the use of  
22 technology for traffic enforcement matters that fall  
23 under the prerogative of the police.

24 Thank you.

25 CHAIRMAN: Yes.

26

1 MS MAGGIE WONG: And the final question I would like to ask  
2 is the suggestion put forth by Mr Julian Kwong on  
3 whether it is possible to have a protocol in which even  
4 though technically the legal speed limit is, for  
5 example, 70km per hour, but the bus company can, on its  
6 own, provide guidelines for the drivers in respect of  
7 certain road conditions to drive at a safer speed or  
8 a lower speed, and that there be a monitoring mechanism  
9 to ensure that the exact speed would not exceed the  
10 protocol that they set. For example, if they find that  
11 a particular section of the road is dangerous, and  
12 instead the legal speed limit of 50, they could  
13 self-impose a lower speed limit, and then the Transport  
14 Department could take up a more active role in  
15 monitoring the compliance of this.

16 This is what Julian Kwong suggested in his evidence.

17 May I know if your department would support that  
18 position or recommendation?

19 MS MABLE CHAN: Thank you, Chairman. We note the remark and  
20 suggestion from Mr Julian Kwong, and I also follow the  
21 oral evidence provided by KMB about their previous  
22 proposal or idea of issuing some guidelines to caution  
23 or remind bus captains on some particular road sections  
24 that may merit the imposition of a lower speed in their  
25 driving.

26

1 But I think, as Mr Tony Yau has been giving the oral  
2 evidence in response to Ms Wong, I think from the  
3 Transport Department's point of view we will attach  
4 great importance to the study that we have just  
5 commenced, in particular in regard to the imposition of  
6 low speed limit zone, with adoption of calming measures,  
7 I think that is a more fundamental issue that we should  
8 pursue.

9 As to whether or not the bus companies will continue  
10 to pursue and explore the possibility of issuing  
11 guidelines, I think the use of the two-stage speed  
12 limiter with retarder will actually do a great step in  
13 helping the drivers to adapt to the two statutory speed  
14 limits currently practised in Hong Kong's regime.

15 So I think the use of technology is an important  
16 area that we should pursue. Whether or not the  
17 guidelines could help, I think this is an area we can  
18 certainly take an open-minded approach, to further  
19 discuss with the bus operators.

20 Thank you.

21 MS MAGGIE WONG: Lastly, we have heard a lot during the  
22 course of this hearing about the use of mandatory bus  
23 lane, as in Singapore --

24 CHAIRMAN: Before you leave this topic -- forgive me for  
25 interrupting -- there's a matter that I'd like to draw  
26

1 to your attention. It is to be found in Mr Weston's  
2 report, which is to be found in EXP-1, and it is at  
3 page 142, paragraph 6.4.

4 It is this. In London, as Mr Weston says here:

5 "As part of the framework agreement operators are  
6 required to produce a route risk assessment for each  
7 route it operates. The aim of this RRA is to identify  
8 potential risks along a route, for example a difficult  
9 junction or the presence of a school which might  
10 generate a lot of pedestrian movement at certain times  
11 of the day. Drivers allocated to that route would be  
12 expected to be familiar with [what should be RRA,  
13 I think."

14 Now, in Hong Kong, do we have any system where the  
15 franchised bus operators are required to produce  
16 a similar assessment?

17 MS MABLE CHAN: Chairman, at present, there is no such  
18 systematic route risk assessment mechanism, though  
19 I would like to point out that in our regular liaison  
20 with the bus operators, it also comes to our knowledge  
21 that certain routes actually warrant specific care and  
22 particular measures to ensure that the driver will pay  
23 attention to the road environment and pedestrian  
24 movement.

25 May I quote an example to illustrate? That is a bus  
26

1 route near Sha Tin district, Shui Chuen O housing  
2 development. The road environment and the gradient for  
3 that road from the Shui Chuen O Estate to the main road  
4 may cause some risk concerns, and that has led the  
5 Transport Department and the bus operator to impose  
6 a mandatory bus stop along the road section, so that  
7 that will ensure that the bus captains, irrespective of  
8 whether or not there are passengers waiting in the bus  
9 stop, they will have to -- there is a requirement for  
10 them to mandatorily stop in the bus stop, as  
11 a mitigation measure, to enhance road safety.

12 So I think any systematic assessment of routes will  
13 certainly help to consolidate our existing practice and  
14 discussions with the bus operators to ensure road safety  
15 in respect of routes.

16 Thank you, Chairman.

17 CHAIRMAN: Obviously, the Transport for London mechanism is  
18 more formalised, because the route risk assessment has  
19 to be done by the bus operator and then communicated to  
20 Transport for London. That ensures that the information  
21 is available to both parties, which might result in what  
22 you've just described in Sha Tin.

23 Is there merit in having such a requirement in  
24 Hong Kong; for example, in the forward planning  
25 programme, perhaps, bus safety, or somewhere else?  
26

1 MS MABLE CHAN: Chairman, I think we can certainly look at  
2 that and consider that, because in the safety chapter,  
3 depending on the circumstances of the operational needs  
4 of certain bus operators, the analysis of the causes of  
5 the accidents sometimes will also point towards a higher  
6 accident rate in certain routes.

7 So I think the idea of having a sort of more  
8 systematic route risk assessment exercise could  
9 certainly help in that regard. We can certainly explore  
10 that with the bus operators. A possible area will be in  
11 the context of the safety chapter.

12 Thank you, Chairman.

13 CHAIRMAN: We have received evidence addressing the issue of  
14 29 sharp bends that were identified internally with KMB  
15 at some stage, when recommendations were formulated and  
16 they were about to be, it seems, published to the bus  
17 drivers, but then it appears not given to them.

18 Was the Transport Department made aware by KMB of  
19 its, if you like, risk route assessment, 29 sharp bends  
20 where your speeds should be lower than the speed limit?

21 MS MABLE CHAN: Chairman, based on our best knowledge, the  
22 Transport Department was not aware of that internal  
23 arrangement regarding those 29 bends.

24 Thank you.

25 CHAIRMAN: That kind of no doubt exhaustive work that KMB  
26

1           spent on that project, is that not something that it  
2           would be useful for you to know about in the Transport  
3           Department?

4       MS MABLE CHAN: That would certainly be useful for us to  
5           know about and to explore any further idea of having  
6           a more systematic risk assessment in respect of routes.

7           Thank you.

8       CHAIRMAN: Thank you.

9           Yes, Ms Wong.

10       MS MAGGIE WONG: May I ask a follow-up question on the  
11           systematic risk assessment of certain routes at specific  
12           locations, and if the Transport Department, seized of  
13           these materials, discovered that there are certain  
14           merits in certain road sections which require lowering  
15           of speed limits, how would that matter be dealt with?  
16           Would that be referred to the Working Group on Speed  
17           Limit Review, or would that be referred to the standing  
18           committee or Working Group on Enhancement of Bus Safety?

19       MS MABLE CHAN: I think it may not be appropriate for me to  
20           respond direct to this question. I think, as  
21           I responded to the chairman's suggestion and idea, we  
22           will go back and certainly look at how this route risk  
23           assessment exercise can be made more systematic and we  
24           will take it from there.

25           Thank you.

26

1 MS MAGGIE WONG: The last topic is on -- I would like your  
2 views, because we have heard some evidence about the  
3 system used in Singapore, about the Mandatory Give Way  
4 to Buses scheme, and also the bus priority lane that was  
5 imposed by the Land Transport Authority in Singapore.

6 If I may refer you to bundle SEC-2, at page 832.  
7 The paper actually starts at page 822. It's a research  
8 information note on "Franchised bus services in Seoul  
9 and Singapore".

10 If we go to 832, paragraph 3.15, one of them is the  
11 "Provision of ... Give Way to Buses scheme". So the  
12 idea is:

13 "When nearing a bus stop under the scheme, motorists  
14 will first see triangular give way markings on the road.  
15 These markings indicate that motorists approaching these  
16 bus stops need to slow down and watch out for buses  
17 pulling out of the bus bay."

18 And there will be signs or road markings like "Give  
19 Way to Buses", and there will be a penalty if someone  
20 violates this.

21 First of all, would the Transport Department  
22 consider this Mandatory Give Way to Buses scheme?

23 MS MABLE CHAN: First of all, may I invite Mr Tony Yau to  
24 give his observation from the road safety angle. In any  
25 event, this idea or measure can be further looked into  
26

1 in the Working Group on Enhancement of Bus Safety as one  
2 of the road enhancement measures that may be possible  
3 for improvement of bus safety, but may I invite Mr Yau  
4 to make some observation from the road safety angle?

5 CHAIRMAN: Yes.

6 MR TONY YAU: Thank you, Chairman.

7 The concept they are proposing in Singapore is using  
8 a mandatory give way road marking. This is a regulatory  
9 marking, it's mandatory. That means the vehicles, when  
10 they travel to the traffic lane next to the bus lay-by,  
11 all the vehicles have to stop, no matter whether there  
12 is a bus leaving the bus lay-by.

13 So I think we need to study whether this is suitable  
14 in Hong Kong because --

15 CHAIRMAN: This is not a proposal in Singapore. This is  
16 a system they've got, is it not?

17 MR TONY YAU: It has been implemented in Singapore.

18 CHAIRMAN: Yes. You said "proposed".

19 MR TONY YAU: Sorry.

20 So we need to study whether it is suitable in  
21 Hong Kong, because that means, with that mandatory road  
22 marking, all the vehicles, the main traffic have to be  
23 stopped, so we worry about maybe the rear-end collision,  
24 whether the chance will be increased.

25 But the concept --

26

1 CHAIRMAN: Rear-end collision caused by what? Not noticing  
2 that a bus has stopped?

3 MR TONY YAU: Because the main traffic, the vehicles have to  
4 be stopped, maybe suddenly -- they have to --

5 CHAIRMAN: There are two kinds of bus stops, aren't there,  
6 one where the bus pulls off the road, and the other  
7 where it's in the road lane; right?

8 MR TONY YAU: Yes. Can we show the photos?

9 MS MAGGIE WONG: Page 833.

10 MR TONY YAU: As shown in the photos, there's a triangle  
11 "Bus".

12 CHAIRMAN: Yes. That's a bus stop that's off the road, is  
13 it not?

14 MR TONY YAU: Yes. You can see a lay-by, it's a bus stop.

15 CHAIRMAN: Yes.

16 MR TONY YAU: And it shows a yellow background with  
17 an arrow.

18 CHAIRMAN: That's the bus has priority to get back onto the  
19 road.

20 MR TONY YAU: Yes. That means all the vehicles have to stop  
21 in front of that yellow road marking.

22 CHAIRMAN: What, to leave a gap for the bus?

23 MR TONY YAU: Yes.

24 CHAIRMAN: But if there's no other vehicle in front, does  
25 the vehicle have to stop?  
26

1 MR TONY YAU: But maybe the vehicle behind the stopping  
2 vehicle may not stop promptly.

3 CHAIRMAN: Aren't you supposed to look at where the vehicle  
4 in front of you is, whether or not it's stopped moving  
5 or slowing down? Isn't that the primary duty of a  
6 driver of any vehicle?

7 MR TONY YAU: Right. Yes. So we need to study whether the  
8 motorists in Hong Kong -- it's suitable in Hong Kong  
9 but --

10 CHAIRMAN: What, you think it's too complicated for people  
11 in Hong Kong; they can do this in Singapore but our  
12 drivers couldn't handle this?

13 MR TONY YAU: This is an area we need to study. But the  
14 concept of using traffic aids, that means traffic signs  
15 or road markings to assist a bus leaving is good. We  
16 can refer --

17 CHAIRMAN: But do you accept this as a proposition, that it  
18 makes socially to give priority to a vehicle with 135  
19 passengers on board over and above a vehicle with  
20 a chauffeur and a boss sitting in the back? Doesn't  
21 that make social sense?

22 MR TONY YAU: Yes, I agree.

23 MS MAGGIE WONG: And related to this scheme is also the bus  
24 lane scheme. We can see how it works at page 831.

25 In short, the system requires little intervention by  
26

1 driver, as the video installed in the bus will  
2 continuously monitor the road in front of the bus, so  
3 that the video camera would catch those motorists  
4 infringing bus lanes. And we can see at page 832 the  
5 photograph showing the video camera, and anyone, any  
6 motorist, violating this infringing bus lane will be  
7 penalised with a fine.

8 So this is related to the Mandatory Give Way to  
9 Buses scheme. Would you also consider this in your  
10 Working Group on Enhancement of Bus Safety?

11 MS MABLE CHAN: Chairman, we will take that into account  
12 when we explore and consider the idea of Mandatory Give  
13 Way to Buses scheme in the working group.

14 I would also like to add that, as the chairman has  
15 also pointed out, any particular measure to give  
16 priority to buses, in particular when they pull out of  
17 the bus stop, will make sense. The issue that we will  
18 have to look carefully into is that in Hong Kong is a  
19 very congested environment where the bus stops may be  
20 perhaps provided along the street, where there may only  
21 be two lanes, and there is high traffic flow. We need  
22 to be careful to look into whether this mandatory scheme  
23 can really help, in all circumstances, and if not, the  
24 fundamental question is whether or not that bus lay-by  
25 or bus stop is suitable to be placed on that road  
26

1 section.

2 Very often, we have been receiving requests for  
3 placing more bus stops along busy and congested roads,  
4 but with the increasing public expectation on importance  
5 to bus safety and priority to be given to buses, we have  
6 to strike a balance in this regard.

7 In any event, we will look into that seriously in  
8 our standing working group forum.

9 Thank you.

10 MS MAGGIE WONG: Thank you.

11 Mr Chairman, I have completed the questioning,  
12 unless the committee would like me to touch on other  
13 subjects.

14 CHAIRMAN: Yes.

15 We have received information in the Chief  
16 Executive's policy address about a statement in relation  
17 to seat belts being retrofitted on buses. And, as  
18 I understand it, there was a statement made by the  
19 Secretary for Transport and Housing on some of the  
20 details of what appears to be a subsidy. Perhaps you  
21 could explore that.

22 Do you have the two matters, that is the policy  
23 address excerpt, I think it's all of four lines, and  
24 then the statement of the secretary?

25 MS MAGGIE WONG: Mr Chairman, I have the policy address.

26

1 I need to dig up the statement by the Chief Executive on  
2 the exact amount.

3 CHAIRMAN: Why don't we take a five-minute break. If you've  
4 finished, then we are going to review what other  
5 questions we have, and then we can finish the oral  
6 evidence in short compass.

7 But let's take until 4 o'clock. Thank you.

8 (3.54 pm)

9 (A short adjournment)

10 (4.04 pm)

11 CHAIRMAN: Yes, Ms Wong.

12 MS MAGGIE WONG: Thank you for the time.

13 Mr Chairman, we have retrieved the Chief Executive's  
14 2018 policy address and her statement afterwards as to  
15 the amount that would be subsidised by the government in  
16 retrofitting existing buses with appropriate safety  
17 devices and retrofitting all seats on the upper deck of  
18 some buses with seat belts.

19 The relevant paragraphs can be shown on the screen:

20 "Secretary for Transport and Housing announced at  
21 the press conference" --

22 CHAIRMAN: Can't we deal with the Chief Executive's policy  
23 address first?

24 MS MAGGIE WONG: Yes. The Chief Executive's 2018 policy  
25 address at paragraph 264. It stated there:

26

1            "To further enhance the operational safety of  
2            franchised buses, the government will subsidise  
3            franchised bus operators in retrofitting existing buses  
4            with appropriate safety device, including retrofitting  
5            all seats on the upper deck of some buses with seat  
6            belts."

7            And following on that policy address, if we can go  
8            to the statement by the Secretary for Transport and  
9            Housing at the press conference on the Chief Executive's  
10          policy address. It is stated on the screen -- we have  
11          extracted the Chinese and the English translation, and  
12          if I may read into the record:

13          "With a view to further enhancing the operational  
14          safety of the franchised buses, we propose to subsidise  
15          the franchised bus operators for retrofitting of three  
16          safety devices on appropriate existing buses, including  
17          the electronic stability control system, speed limiters  
18          with retardation function, and seat belts for all seats  
19          on the upper deck of long-haul buses running on  
20          expressways with fewer stops. We will be funding  
21          80 per cent of the relevant cost, involving about  
22          \$500 million. For the remaining cost as well as the  
23          subsequent maintenance and repair works, they will be  
24          borne by the franchised bus operators."

25          CHAIRMAN: Yes.

1 MS MAGGIE WONG: Would Ms Chan be able to explain perhaps,  
2 first of all, when this government subsidy would be  
3 implemented in terms of these safety devices?

4 MS MABLE CHAN: Yes. First of all, for the committee's  
5 reference, the installation of safety devices, including  
6 electronic stability control, the retarder on speed  
7 limits, and seat belts, arise from the deliberations at  
8 the Working Group on Enhancement of Franchised Bus  
9 Safety. The installation will be subject to detailed  
10 technical and operational assessment by the bus  
11 operators.

12 So, as mentioned in the Chief Executive's policy  
13 address and in the statement delivered by the Secretary  
14 for Transport and Housing, the government has planned to  
15 reserve a total involving about 500 million, to provide  
16 funding or financial incentive to facilitate the bus  
17 operators to install the various devices.

18 In particular for the seat belts, as we mentioned  
19 and responded in giving our oral evidence in previous  
20 hearing sessions, the installation of seat belts will  
21 particularly have to undergo a detailed assessment,  
22 including operational, technical and financial  
23 feasibility assessment. So --

24 CHAIRMAN: Will it have to undergo a cost/benefit analysis  
25 or not?

26

1 MS MABLE CHAN: Yes, Chairman.

2 So the seat belt will undergo a cost/benefit  
3 analysis, covering technical, operational and financial  
4 feasibility.

5 As regards the ESC and the retarder, as reflected in  
6 our deliberations of the working group, various bus  
7 operators have already been giving thought to installing  
8 or retrofitting these two devices on their existing  
9 buses. So, again, the money will be made available and  
10 on a matching basis, as an incentive to enable the bus  
11 operators to achieve early installation of the safety  
12 devices.

13 So, in short, the policy address initiative is  
14 actually a positive step in responding to the findings  
15 and recommendations in the working group, which we have  
16 submitted to the committee for your consideration.

17 Thank you.

18 MS MAGGIE WONG: Is there a timetable for installation of  
19 these safety devices? Has that been discussed?

20 MS MABLE CHAN: Taking into account the preliminary  
21 assessment of the bus operators during the discussions  
22 of the working group, the money would be set aside and  
23 provided for a six-year horizon from 2019/2020 to  
24 2024/2025. Again, I would like to emphasise that the  
25 installation of the seat belts will undergo  
26

1 a cost/benefit analysis.

2 Thank you.

3 MS MAGGIE WONG: It made reference --

4 CHAIRMAN: Forgive me for interrupting. This is

5 a conditional statement made by both the Chief Executive  
6 and the Secretary for Transport and Housing, and the  
7 effect of it is this, as I understand it: subject to  
8 a cost/benefit analysis -- let's just take seat belts --  
9 the government is prepared to make a subsidy in the  
10 formula that is articulated in the statement, but it's  
11 conditional?

12 MS MABLE CHAN: Yes, Chairman.

13 Chairman, can I elaborate on that?

14 CHAIRMAN: Please do.

15 MS MABLE CHAN: This is an attempt by the government to  
16 provide and set aside the money as stated in the policy  
17 address and also in the secretary's statement for  
18 providing the funding.

19 For internal estimate and provision of money, we  
20 have said that the funding is to be provided on  
21 a six-year horizon, and that has also taken into account  
22 the initial guesstimate as provided by the bus  
23 operators, taking into account the possible timing for  
24 retrofitting.

25 In the statement as mentioned in the policy  
26

1 address -- may I refer to the policy address paragraph?

2 CHAIRMAN: Yes. Can we put that on the screen?

3 MS MABLE CHAN: The phrase, the last part of the sentence,  
4 "including retrofitting all seats on the upper deck of  
5 some buses with seat belts", this actually reflects what  
6 we have been explaining and elaborating to this  
7 committee on the working group's deliberation that it is  
8 our recommendation in the working group that  
9 a cost/benefit analysis of retrofitting all seats on the  
10 upper deck of some buses, ie including long-haul buses  
11 with fewer bus stops, to be installed with seat belts,  
12 to be further looked into.

13 Thank you.

14 CHAIRMAN: I think the phrase you missed out there was "on  
15 expressways". These are the various caveats.

16 MS MABLE CHAN: Yes.

17 CHAIRMAN: Long-haul buses, one; running on expressways,  
18 two; with fewer stops, three.

19 MS MABLE CHAN: Yes. Thank you, Chairman.

20 CHAIRMAN: May I ask that the transcript for Day 20, which  
21 is 6 October, be put up on the screen, page 73. I want  
22 to take you, Ms Chan, to line 24. This is an answer  
23 that you were giving on this very issue. You said this:

24 "Given the retrofitting of the existing buses for  
25 seat belts appears to be not cost-effective at the  
26

1 present moment, and it involves a number of  
2 considerations, obviously, should there be any decision  
3 to make it a mandatory or statutory requirement for all  
4 existing buses to be installed with seat belts, in  
5 particular on the upper deck, we would have to look into  
6 seriously on how much marginal benefit we can achieve as  
7 compared with the cost and the technical considerations.

8 So, in short, to answer your question, I agree with  
9 the expert advice that if we want to go forward with  
10 a mandatory requirement, we have to go through some  
11 cost/benefit analysis or impact assessment."

12 Although that narrow quote relates to the issue of  
13 being made mandatory, are we to understand that  
14 a cost/benefit analysis it to be applied to the  
15 subsidising of retrofitting of any seat belt analysis,  
16 that that will be the first exercise to see if the  
17 cost/benefit analysis delivers a positive result?

18 MS MABLE CHAN: Yes, Chairman.

19 CHAIRMAN: Thank you.

20 MS MABLE CHAN: Thank you.

21 CHAIRMAN: Yes, Ms Wong.

22 MS MAGGIE WONG: I think Ms Chan has addressed my initial  
23 question on this topic, on cost/benefit analysis, so  
24 I will have no further questions.

25 CHAIRMAN: Thank you.

26

1 MS MAGGIE WONG: Thank you.

2 Questioning by THE COMMITTEE

3 MEMBER AU YEUNG: Thank you, Chairman. I just have one  
4 question, going back to Ms Chan.

5 During one of the previous hearings, you did mention  
6 about safety is a shared responsibility among all your  
7 units, and at the same time, from our expert  
8 recommendation, there has been a recommendation that  
9 there should be someone or a unit being responsible for  
10 safety alone.

11 So I just want to hear your opinion again, after all  
12 this expert opinion: in your mind, are you currently  
13 happy with safety being shared by all your units, or  
14 should there be a particular individual or unit being  
15 responsible for safety only? Thank you.

16 MS MABLE CHAN: Thank you for this question, a very good  
17 question.

18 I think I have, in my previous evidence given to  
19 this committee, provided facts about the current  
20 division of responsibility amongst various units in the  
21 Transport Department. I think the current establishment  
22 serves well in enabling that the policy unit overseeing  
23 the bus and railway services continues to exercise their  
24 policy oversight on the provision of franchised bus  
25 services.

26

1           On the other hand, we have the Road Safety and  
2           Standards Unit, overseeing the general road safety, also  
3           including a focus on bus safety.

4           On the other hand, we have the Vehicle Safety and  
5           Standards Division, responsible for ensuring the  
6           compliance of the bus operators in the provision of safe  
7           buses according to statutory provisions.

8           But I would also like to add that with the quick  
9           development of technology and with the increasing  
10          expectations on public bus safety, we actually see the  
11          merit of having, apart from the three units that  
12          I mentioned, two dedicated units to pursue some of other  
13          recommendations amongst others. The two dedicated units  
14          are, one, set up of the transport technology unit, to  
15          take heed of the latest developments of transport  
16          technology, including the adoption of technology and  
17          safety devices to promote bus safety. On the other  
18          hand, we also propose to set up a dedicated unit to take  
19          up the issue of road safety audit, and the road safety  
20          audit will not only focus on the enhancement of the road  
21          safety system, but to introduce a particular and  
22          additional system to audit what we are now doing under  
23          the road safety management system.

24          We think that with this enhancement and introduction  
25          of a road safety audit division, it will help us to take  
26

1           us a big step forward, in taking into account any public  
2           request for review of road environment and other  
3           improvement measures to improve road safety and public  
4           bus safety, and it also helps to advocate and promote  
5           an establishment of accreditations for auditors to audit  
6           and check all our roads in Hong Kong.

7           So all the issues, a number of issues that the  
8           senior counsel has just mentioned about imposition of  
9           low speed limit zones, road safety features, will all be  
10          taken into account to ensure there is check and balance  
11          within the department, and with these extra and  
12          dedicated resources we hope that we will have a more  
13          holistic approach to drive public transport safety.

14          Thank you.

15   CHAIRMAN: Thank you.

16   MS MABLE CHAN: Thank you, Chairman.

17   MEMBER LO: Commissioner, I just have a follow-up question  
18          on that. Will this audit team look into a more  
19          systematic, regular basis to look at accident statistics  
20          with the objective of coming up with rectification  
21          measures on a regular basis, so things are being looked  
22          at regularly and rigorously over time?

23   MS MABLE CHAN: This is exactly what I want to do. Thank  
24          you.

25   MEMBER LO: A follow-up question is, what about those  
26

1 cost/benefit analyses? Will they also be conducted in  
2 this particular unit, for example in the case of safety  
3 belts, will they be looked at by this particular team,  
4 look into the detail of the cost/benefit analysis?

5 MS MABLE CHAN: No. The cost/benefit analysis of the  
6 installation of safety on-board vehicle devices,  
7 including seat belts, will be looked into under the  
8 context of the Working Group on Enhancement of Bus  
9 Safety.

10 MEMBER LO: So there are three parties, right: the working  
11 group, audit team, and technology team? So how would  
12 they work together as a coherent unit?

13 MS MABLE CHAN: The working group is a standing forum, to be  
14 led currently by a deputy commissioner, with the  
15 participation of representatives from the bus operators  
16 and bus manufacturers. It is a forum for us to meet  
17 with the bus operators and bus manufacturers.

18 The various units or newly set up teams will no  
19 doubt provide their support and input and analysis to  
20 the working group. So the working group can take into  
21 account the advice and input from these subgroups, but  
22 of course the road safety audit and the transport  
23 technology unit, they have very specific and dedicated  
24 scopes of responsibilities under the areas that I have  
25 just described.

26

1 Thank you.

2 CHAIRMAN: Who, in this standing or permanent working group  
3 forum, is actually going to do the cost/benefit analysis  
4 in respect of the retrofitting of seat belts on some  
5 existing buses, with the caveats that have been entered  
6 in the Secretary for Transport and Housing Bureau's  
7 statement?

8 MS MABLE CHAN: Chairman, thank you.

9 We would certainly have to put forward some thoughts  
10 on the scope and factors to be taken into account in  
11 a cost/benefit analysis, and then we will provide papers  
12 and agenda items to put up our thoughts for discussion  
13 with the bus manufacturers and operators, and we will  
14 expect them to provide critical and detailed assessment  
15 according to the parameters and the factors that we set.

16 So that will provide a basis for us to take forward  
17 a cost/benefit analysis. So, at the end of the day, any  
18 recommendation on the provision or the dishing out of  
19 the subsidy will depend on the completion of the  
20 cost/benefit analysis with the submissions from the bus  
21 operators.

22 CHAIRMAN: The three members that you have identified so far  
23 as being members are the bus manufacturers, the  
24 Transport Department and the franchised bus operators.  
25 I think, when Mr YK Chan was giving evidence, he said he

26

1 would welcome participation by members of the Road  
2 Safety Council. Do you have in mind any further  
3 expansion of this permanent working group forum on  
4 standards of bus safety?

5 MS MABLE CHAN: I note the evidence provided by Mr Chan  
6 about the possible consideration to be given to  
7 expanding the membership by including some independent  
8 members, say for example from the Road Safety Council.

9 Another possible area -- it may not be an additional  
10 member but I think certainly we need to look at some  
11 professional and academic leaders on transport and  
12 transport technology.

13 Thank you.

14 CHAIRMAN: Do you consider it likely that to do  
15 a cost/benefit analysis of this kind on the retrofitting  
16 of seat belts to existing buses, in the circumstances  
17 that we have defined, that it would be necessary to get  
18 consultants, independent consultants, to perform the  
19 analysis?

20 MS MABLE CHAN: Chairman, on cost/benefit analysis, it is  
21 already apparent from the initial feedback received at  
22 the working group about the possible costs, including  
23 the operational implications, the financial cost --  
24 I think the important part is to identify and analyse  
25 the benefit, if so, generated from the installation of  
26

1 seat belts. We can certainly look into engaging some  
2 independent professional to look into that, but we are  
3 mindful of the time consideration involved to engage  
4 an independent consultant, but apart from that, we can  
5 certainly give thought to how to engage sort of  
6 an independent expert advice, from that angle.

7 I also wish to point out that during the course of  
8 the hearings, we are actually very grateful to have the  
9 opportunity to look into detail about the expert  
10 submissions. In parallel, we have been also getting in  
11 touch with the overseas transport authorities, including  
12 of course Transport for London. I personally met him  
13 two weeks ago --

14 CHAIRMAN: That is the commissioner?

15 MS MABLE CHAN: The commissioner. And also, we have  
16 actually made arrangement for two of my staff to have  
17 a short-term attachment to Transport for London, and  
18 this will also provide us a forum and opportunity for us  
19 to learn a bit more and see whether any independent  
20 expert advice or service could be further engaged to  
21 help us with the cost/benefit analysis.

22 Thank you.

23 CHAIRMAN: Moving to another topic, expert bundle 1,  
24 page 90. This is Prof Stanley's report, where he makes  
25 a specific recommendation, and I'd like to draw your  
26

1 attention to it.

2 It is this, that he has recommended that there be,  
3 if you like, greater emphasis on training and in  
4 particular the control of training by the Transport  
5 Department, and that there should be stipulated training  
6 courses/modules.

7 We see, from the practice note, that some of those  
8 matters are addressed, but there's one specific matter,  
9 in the last three lines of the third paragraph on that  
10 page, he recommends this:

11 "The training framework that is developed needs to  
12 include a specific component on fatigue management,  
13 which could form part of an occupational health and  
14 safety module and should extend to supervisors."

15 There is no specific reference to that material in  
16 the practice note, is there? That's the first question.

17 MS MABLE CHAN: No in specific terms.

18 CHAIRMAN: So the question then would be this, in general  
19 terms. Given that we have had issues and concerns, and  
20 they have been expressed in evidence to this committee,  
21 about fatigue, in part, for example, resulting from very  
22 long working hours -- 14-hour day, 11 hours driving, to  
23 be I think 10 hours driving, but very long days, so  
24 fatigue is an issue for us -- is this something that  
25 ought to be considered to be included specifically in  
26

1 the training structure?

2 MS MABLE CHAN: Chairman, my team has actually given serious  
3 thought to that. No, there is no specific reference in  
4 the practice note at the present moment. Occupational  
5 health and safety, however, forms one of the modules for  
6 induction and refresher courses. Fatigue management can  
7 sit well in that module, and we are ready and prepared  
8 to discuss with the franchised bus operators to include  
9 the element of fatigue management in conducting their  
10 refresher course under the practice notes, under the  
11 module of occupational health and safety. That can be  
12 done.

13 Thank you, Chairman.

14 CHAIRMAN: Ms Wong, are there any questions that you wish to  
15 ask arising from the questions that the members have  
16 asked?

17 MS MAGGIE WONG: No, thank you, Mr Chairman.

18 CHAIRMAN: Ms Chan and your colleagues, we thank you for  
19 assisting us yet again on a long day.

20 This, we anticipate, brings to an end our oral  
21 evidence sessions. We thank you very much for your  
22 written submissions, but in particular your assistance  
23 in giving us answers to the many questions we've  
24 peppered you with, and we thank you for that.

25 Closing statement by MS MABLE CHAN

26

1 MS MABLE CHAN: Chairman, on behalf of my department, I also  
2 want to set for the record in my oral evidence that down  
3 from my heart, the Transport Department, me and my team,  
4 are very grateful for the untiring efforts of the  
5 chairman and members of the committee and for the  
6 comprehensiveness in seeking evidence from various  
7 stakeholder and parties and in particular from seeking  
8 expert submissions from overseas experts.

9 In this regard, we think, yes, we agree, it is  
10 a very tough and robust process, but on the other hand  
11 we find it very fruitful and valuable. I think we also  
12 look forward to receiving candid advice and  
13 recommendations from the independent committee, and  
14 I also wish to assure the committee that, as I mentioned  
15 in response to the chairman's last few questions, that  
16 the working group will be turned into a permanent  
17 set-up, and we will use that forum to discuss with our  
18 stakeholders on various proposals. This is an ongoing  
19 exercise and it is not just a six-month task.

20 On that particular respect, we have also indicated  
21 in this committee that one of the very tasks is to look  
22 into the introduction of a more sophisticated safety  
23 performance index, which -- whether or not it can form  
24 the basis for us to assess the performance and monitor  
25 the performance of bus operators pursuant to the public  
26

1 services ordinances.

2 Another area that I have just responded to members'  
3 questions is the road safety audit and also the review  
4 of the speed limit. That is also an area that my  
5 department will take note and we will learn a bit more  
6 from the overseas relevant transport authorities, in  
7 order to take it forward.

8 Last of all, we wish to emphasise that we are  
9 equally concerned about the welfare of bus captains.  
10 Apart from the hardware of the buses and other on-bus  
11 safety devices, we think that we cannot afford to not  
12 pay attention to the welfare of the bus captains, and as  
13 my colleague on my right has given evidence this  
14 morning, we have agreed that we will factor in the  
15 requirement of ancillary facilities in the early  
16 planning stage in the planning of new transport  
17 interchanges and bus stops. This is an area that we  
18 will work even harder to advocate and promote the  
19 welfare of the bus captains.

20 Lastly, let me express our thanks again for the  
21 chairman's effort and also for your questions in helping  
22 us to give this matter very serious consideration. Let  
23 me just stress that safety is of utmost importance and  
24 the Transport Department will spare no effort in  
25 advocating it further and in promoting it further.

26

1 Thank you, Chairman.

2 CHAIRMAN: Thank you. In those circumstances, these  
3 proceedings are at a close. Thank you.

4 (4.36 pm)

EVIDENCE FROM THE TRANSPORT DEPARTMENT: MS MABLE .....1

CHAN, MS AMY LEE, MS AMY TSE, MR PATRICK

WONG, MR YK CHAN, MR WILLIAM SHUM, MR TONY

YAU

Examination by MS MAGGIE WONG (continued) .....1

Questioning by THE COMMITTEE .....135

Closing statement by MS MABLE CHAN .....143

*[Blank Page]*

2018 年 10 月 16 日

上午 10 時 20 分恢復聆訊

出席人士： Hon Mr Justice Michael Lunn（倫明高），香港專營巴士服務獨立檢討委員會主席

歐陽伯權先生，香港專營巴士服務獨立檢討委員會委員

羅康錦教授，香港專營巴士服務獨立檢討委員會委員

陳政龍大律師及黃佩琪大律師，由高露雲律師行委聘，代表香港專營巴士服務獨立檢討委員會

陳英傑先生，副署長／公共運輸事務及管理（署理）（運輸署）

黃志光先生，助理署長／巴士及鐵路（運輸署）

謝善怡女士，首席運輸主任／巴士及鐵路 1（運輸署）

邱國鼎先生，總工程師／道路安全及標準研究（運輸署）

岑毅安先生，總機電工程師／車輛安全及標準（運輸署）

李美鳳女士，總運輸主任／特別職務（運輸署）

主席：（經傳譯員）陳先生，早晨，我哋知道運輸署署長而家喺其他嘅地方係忙緊，咁我哋就等佢忙完佢嘅職務，可以嚟到同我哋一齊喇。首先要同大家道歉，今朝都係遲咗開始，不過相信好多人今日都係經歷到交通上面嘅困難喇。咁好諷刺，呢一個嘅檢討委員會就係要係講呢一樣嘢，咁羅教授今朝就係即係遇到困難喇，咁我哋而家就請黃律師繼續。

黃女士：（經傳譯員）多謝，主席。而家想講一講啲休息嘅設施，因為車速限制方面我係未講完嘅，不過因為呢個係政策嘅問題或者係等運輸署署長到達，然後先再問呢一方面嘅問題喇。講到休息嘅設施，我想問啲一般嘅問題先，可唔可以話畀我哋聽，喺你新嗰份嘅文件，係 10 月 3 號，2018 年呈交嘅文件，嗰度提到 TD-1 (TD-5?)，1825 頁，1825 頁，TD-1 (TD-5?)。呢一份嘅文件喺附件三嗰個嘅標題就係為車長提供呢一個休息嘅設施，就喺公共交通交匯處同埋巴士總站嘅地方。咁請先睇第 13 段，喺第三行，第 13 段。呢度就提到話運輸署成立一個嘅專責小組去監察喺交通交匯處、巴士站同埋總站提供或者係去改善一啲公共運輸嘅附屬設施，咁自從 2017 年已咁做㗎喇，代表就有地政總署、政府產業管理署、房署同埋一啲專營巴士公司都係獲邀嚟到去出席呢個專責小組嚟去交換意見同埋去檢討下嗰一啲嘅申請嘅進度。喺 2017 年呢一個嘅工作小組係幾時成立嘅呢？

1 陳英傑先生：（經傳譯員）我想請黃先生係去回答呢個問題。

2 主席：（經傳譯員）冇問題。

3 黃志光先生：（經傳譯員）呢份文件就提到第一次嘅會議就係 12 月 21 號開嘅，咁  
4 跟住 2018 年 8 月 27 號開過另外一次嘅會。

5 黃女士：（經傳譯員）咁呢個專責小組係喺 2017 年 12 月先至係成立嘅？

6 黃志光先生：（經傳譯員）係。

7 黃女士：（經傳譯員）咁可唔可以話畀我哋聽點解會成立呢個專責小組？

8 黃志光先生：（經傳譯員）係成立呢個專責小組，好似文件咁講喇，我哋係備悉到有  
9 一啲嘅申請仲未處理到嘅，就係話係提供一啲嘅附屬嘅設施，咁係關乎其他部  
10 門嗰啲係未批到嘅，咁就都用咗相當時間去處理呢啲嘅申請，我哋就希望加速  
11 呢啲嘅申請嘅處理或者係評估，我哋就成立呢一個專責小組，就係由我哋主導  
12 嘅，就同相關嘅部門同埋巴士專營公司坐埋一齊，我哋可以面對面咁樣討論  
13 下，睇下點樣可以加快喇，有啲咩嘢問題喇，去審批呢啲嘅申請嘅時候。

14 黃女士：（經傳譯員）咁呢個專責小組係咪打算係一個常設嘅委員會，抑或係一個只  
15 係專責短暫成立嘅委員會？

16 黃志光先生：（經傳譯員）我哋嘅目標係持續咁樣開會嘅，直至到所有嘅申請，特別  
17 係嗰啲比較複雜嘅個案完成為止。咁我再補充，講到呢啲附屬嘅設施，我哋係  
18 講，除咗去處理呢啲嘅申請之外，我哋亦都係同相關部門商討，即係呢個係應巴  
19 士公司嘅要求喇，點樣去改善呢啲設施嘅設計同埋嗰個嘅大細，特別係休息室  
20 方面，因為運輸署就係唔係專責嚟到去批准呢啲設施嘅大細嘅，咁為咗改善嗰  
21 個嘅效率，我哋希望地政總署就可以研究下可唔可以畀運輸署嚟到係去審批。

22 主席：（經傳譯員）你嗰個簡稱“GPA”係咩嘢意思？

23 黃志光先生：（經傳譯員）就係政府產業管理署。

24 黃女士：（經傳譯員）多謝，黃先生。你提到運輸署嚟審批呢啲嘅休息亭嗰個嘅限  
25 制。喺你嘅文件第 10 段你提到，你就話嗰度有四個嘅地點，專營巴士公司係可  
26 以提出申請，嚟到興建佢哋嘅設施，第一個就係運輸署係根據《土地（雜項）  
27 條例》，但係運輸署嚟通過呢啲附屬設施嘅時候，佢嗰個嘅面積係不能夠大過  
28 4.62 平方米同埋呢一個 7.09 嘅平方米，4 個就係嗰個嘅基座喇，個地--而  
29 係 7.09 就係個上蓋喇，咁呢個第一個情況。第二個就係如果嗰個嘅面積係大過  
30 指定嘅範圍，佢哋就要直接向地政總署申請嘅。第三就係一啲公共交通交匯  
31 處，咁就係由財政司司長法人團體嚟到去負責，咁所以專營巴士公司就係要向  
32 政府產業署嗰度係提出申請嘅。咁第四就係如果係個巴士總站或者係公共交通  
33 交匯處如果係喺房署嘅範圍，咁呢啲專營巴士公司就要直接咁樣向房署嚟到去  
34 申請，等佢哋審批嘅，有四個嘅唔同情況。我想問一問，呢四個部門有冇考慮

1 過係合作或者係成立一個專責小組，咁樣當呢啲專營巴士公司遞交申請嘅時  
2 候，可以有一個統一嘅渠道或者平台去達成呢個目標，而唔需要係喺唔同嘅地  
3 方做嘅？

4 黃志光先生：（經傳譯員）基本上，專營巴士公司係必須向相關嘅部門係直接遞交申  
5 請嘅，咁但係喺某一啲嘅情況下，譬如話係呢個政府產業署。即係我想解釋一  
6 下，即係公共交通交匯處就係由 FSI 去持有喇，或者係呢個財政司法人團體，  
7 咁當處理呢啲申請嘅時候，運輸署係可以處理一啲--即係將一啲個案交界政府  
8 產業署去處理嘅，因為通常就政府產業署就會係徵詢運輸署，去睇下我哋支唔  
9 支持申請。咁至於呢啲即係設備嘅大細喇，即係正如文件所講，因為即係有一  
10 啲嘅限制喇，必須係要由地政總署去處理，咁而亦都有一啲常設嘅程序係去處  
11 理申請嘅，即係同其他設施一樣。至於呢一個房屋嘅設施，因為佢哋係歸房委  
12 會係管理，亦都係有一啲既定嘅程序，所以回答你嘅問題，喺政府產業署方  
13 面，即係我哋會同政府產業署係合作喇，或者將呢一個申請就交界地政總署或  
14 者係房屋署嘅，咁通常巴士公司係需要即係向佢哋遞交申請嘅。咁至於呢個專  
15 責小組，我哋係希望可以聚集唔同嘅相關部門去開始去傾呢一啲處理嘅申請。

16 主席：（經傳譯員）地政總署幾時係授權運輸署係去批准呢一啲嘅申請？或者即係呢  
17 啲關於大細嘅申請？

18 黃志光先生：（經傳譯員）我有呢個資料响手，咁但係都已經係授權咗一段時間喇，  
19 即係根據我記得，嗰個大細，即係好多年前已經係大概係兩平方米，就係一個  
20 好細嘅空間嚟嘅，咁但係而家我哋就有資料。

21 主席：（經傳譯員）呢個授權係咪已經畀咗五年、十年、廿年咁樣？可唔可以畀一個  
22 即係大概嘅概念我哋？如果你講唔到係隨便講嘅可以--即係你可以咁樣講--你  
23 可以遲啲先至向我哋提供資料嘅。

24 黃志光先生：（經傳譯員）我諗應該超過二十年㗎喇。

25 主席：（經傳譯員）點解有呢啲嘅數字限制？即係例如 4.62 平方米，即係呢個數字  
26 點樣嚟㗎？

27 黃志光先生：（經傳譯員）基本上我哋係考慮到一啲建議喇，同埋當時專營巴士公司  
28 常用嘅設施。

29 主席：（經傳譯員）即係話當時你係採納咗當時設施嘅大細，係咪？

30 黃志光先生：（經傳譯員）冇錯。

31 主席：（經傳譯員）咁呢啲嘅休息室，即係呢啲巴士站入面嘅休息室就係即係已經有  
32 咗幾廿年㗎喇，係咪？

33 黃志光先生：（經傳譯員）有唔同種類嘅休息室嘅，主席。即係正如主席提到喇，一  
34 啲舊啲嘅休息室係大概係兩平方米嘅面積，而而家仲係有嘅，咁至於即係喺呢

1 度講個大細，即係舉個例喇，主席，可能你去過西九龍站，即係個休息室  
2 嘅大細，大概係個種嘅大細，咁而運輸署就可以直接係批准呢啲申請嘅，即係  
3 根據呢個地政總署嘅授權。

4 主席：（經傳譯員）即係有冇考慮過係擴大呢啲休息設施？因為係非常之擠逼嘅。

5 黃志光先生：（經傳譯員）係。正如文件第 10 所講--唔好意思，應該係第 16 段  
6 嘅，我哋已經同地政總署傾過會唔會係擴大呢啲設施去到 6.21 平方米，即係  
7 個個基礎個面積，而個天花板就係 11.14 平方米嘅。

8 主席：（經傳譯員）幾時得出呢項建議㗎？

9 黃志光先生：（經傳譯員）我有個實際嘅日子喇，但係根據我記憶，就大概係  
10 2015 或者 16 年嘅，我哋要再去確認一下。

11 主席：（經傳譯員）咁點解仲未解決呢個問題？即係如果已經係做咗兩、三年嘅話？

12 黃志光先生：（經傳譯員）我哋係有迫地政總署嘅，咁但係地政總署仍然係處理緊。

13 主席：（經傳譯員）即係正如我嘅問題所講喇，即係如果係有延誤，就係地政總署有  
14 錯嘅呢？

15 黃志光先生：（經傳譯員）我諗正確嚟講，運輸署係可以自己核准呢一個過程嘅，因  
16 為得到授權，咁我哋就可以加快呢個過程喇。而家巴士公司係可以向地政總署  
17 提交申請嘅，咁但係呢啲嘅設施嚟講，佢係要考慮其他嘅程序喇，例如要簽署  
18 一個租約喇，交租喇等等嘅，所以我哋希望我哋可以儘快獲得呢個授權，咁然  
19 後我哋就可以快速咁樣處理啲申請喇。

20 主席：（經傳譯員）即係我希望你可以直接答我嘅問題喇，咁如果係即係有延誤嘅  
21 話，個個責任就唔係運輸署度，而係地政總署度，你係咪咁嘅意思？

22 陳英傑先生：（經傳譯員）主席，運輸署係同地政總署傾緊係去擴大呢一個休息室  
23 嘅大細，咁呢個就係畀運輸署係去進行批准嘅，咁我諗唔同部門係有唔同嘅優  
24 次。

25 主席：（經傳譯員）咁你嘅問題係咪即係「係」？

26 陳英傑先生：（經傳譯員）係，我哋仍然係同佢傾緊嘅。

27 主席：（經傳譯員）咁究竟係邊個嘅責任？係咪運輸署？

28 陳英傑先生：（經傳譯員）我講唔到。

29 主席：（經傳譯員）真係？

30 陳英傑先生：（經傳譯員）我想補充一點嘅，即係呢個授權方面，即係而家啲巴士公  
31 司係可以申請超過一個休息室嘅，咁所以巴士公司係可以睇下佢哋有咩需要

1           喇，如果佢哋需要多啲嘅空間，...

2   主席：（經傳譯員）咁當然佢哋係需要多啲空間喇，如果你有去過巴士站就知㗎喇。

3   陳英傑先生：（經傳譯員）即係喺某一啲嘅公共交通交匯處係有超過一個嘅休息室  
4           嘅。

5   主席：（經傳譯員）咁呢個就係即係小修小補嘅方法，就並唔係一個方案㗎嘅，係  
6           咪？

7   陳英傑先生：No.

8   主席：（經傳譯員）黃大律師。

9   黃女士：（經傳譯員）早前，你講到你係有同地政總署係傾過擴大休息室呢個問題  
10           嘅，你有冇任何嘅文件或者書信來往？

11   黃志光先生：（經傳譯員）有嘅。

12   黃女士：（經傳譯員）可唔可以向我哋提供？

13   陳英傑先生：（經傳譯員）可以嘅。

14   主席：（經傳譯員）我哋要求就係呢啲書信來往係要顯示呢個要求嗰個--幾時係作出  
15           呢個要求喇同埋幾時回應喇，咁樣我哋先至可以睇文件入面睇到究竟即係點解  
16           會出現呢個延誤嘅。

17   黃女士：（經傳譯員）唔該晒。我想澄清一個你早前嘅回應，就係即係呢一個授權已  
18           經係有咗成廿年㗎喇，即係呢個嘅大細嘅限制，包唔包括一啲相關地方嘅附屬  
19           設施嘅大細，即係係咪咁嘅情況？

20   黃志光先生：（經傳譯員）我諗嗰個即係授權係涵蓋呢個大細嘅，咁即係我記得係大  
21           概係兩平方米。

22   黃女士：（經傳譯員）我嘅意思係即係已經係實施咗幾多年？即係呢一個 4.62 平方  
23           米嘅呢個大細限制，幾時開始有呢個要求？

24   黃志光先生：（經傳譯員）我哋要去搵一搵，大概係 2000 年，不過我哋要再去確認  
25           一下。

26   黃女士：（經傳譯員）唔該晒。即係喺我開始講呢啲文件之前，我想問一問，規劃署  
27           喺批准附屬設施，即係向巴士公司批准呢啲設施嘅時候，佢哋嘅角色喺邊度？

28   黃志光先生：（經傳譯員）即係據我所知，規劃署就有太參與呢個公共交通交匯處嘅  
29           規劃嘅，因為規劃署據我所知，佢哋係會即係決定某個地段嘅狀態喇，如果係  
30           即係作為住宅發展嘅，譬如或者係公共屋邨用，咁呢啲相關嘅項目倡議人就係  
31           即係會負責係發展呢塊土地，譬如話房屋署、房委會或者一啲私人發展商，而

1 佢哋就會係決定係去發展呢啲住宅設施，而我哋就會同項目倡議人去傾下一啲  
2 相關嘅要求嘅。

3 黃女士：（經傳譯員）咁換句話講，即係興建巴士站嘅規劃階段，係嘛？即係個角色  
4 主要係巴士站興建嘅規劃，係咪？

5 黃志光先生：（經傳譯員）我諗唔係嗰個建築嘅部分，而係去劃定嗰個地段係作咩嘢  
6 嘅用途，同埋使用呢啲土地嘅相關嘅要求或者係條件嘅。

7 黃女士：（經傳譯員）咁喺運輸署以內，有冇一份嘅運輸規劃嘅手冊——應該叫做運輸  
8 規劃及設計手冊，係去決定呢啲交通設施同埋乘客設施，或者係公共交通交匯  
9 處等等應該點樣規劃，你可唔可以確認一下？

10 黃志光先生：（經傳譯員）係。

11 黃女士：（經傳譯員）係邊一個部分，手冊入面？

12 黃志光先生：（經傳譯員）我諗係第九冊嘅 2.7 段嘅，或者 2.7 章。

13 黃女士：（經傳譯員）咁公共交通交匯處又點？會唔會係第 8 章？

14 主席：（經傳譯員）黃先生就話 2.7 章，咩嘢叫做第 8 章，你啱啱講？

15 黃女士：（經傳譯員）首先你可唔可以同我哋講第 2 章係關於啲乜嘢㗎？

16 黃志光先生：（經傳譯員）即係喺呢個手冊入面又唔同嘅冊喇，即係交通呢部分就係  
17 第九冊，咁係有唔同嘅章節，咁據我所知，2.7 章就係關於呢個巴士站附屬設  
18 施嘅大細嘅。

19 黃女士：（經傳譯員）你可唔可以向我哋提供相關嘅章節？即係關於呢一個洗手間同  
20 埋食堂設施嘅相關要求，即係對巴士公司嚟講。

21 主席：（經傳譯員）首先，呢啲嘅問題係咪 2.7 段處理嘅呢？

22 黃志光先生：（經傳譯員）主席，其實第 8 章關於公共交通交匯處都係相關嘅。

23 主席：（經傳譯員）可唔可以畀我哋呢一份文件裏面所講嘅係乜嘢嘅範圍，話畀我哋  
24 聽？

25 黃志光先生：（經傳譯員）相關嘅章節應該係 8.4 段，就係關於公共交通交匯處嘅  
26 設計要求。

27 主席：（經傳譯員）可唔可以話畀我哋聽喺邊度搵到呢一份文件㗎？

28 黃女士：（經傳譯員）呢一份文件係我哋搵出嚟嘅，但係未從呢個運輸署畀我哋作為  
29 一個正式嘅來源嘅，我就想問運輸署可唔可以話畀我哋聽邊啲係相關嘅段落係  
30 關於話休息室、洗手間呢啲設施提供，係邊個批准嘅呢？因為呢度嘅條款都係  
31 有啲鬆散，我哋想請運輸署幫一幫。

- 1 黃志光先生：（經傳譯員）可以。
- 2 主席：（經傳譯員）你會唔會已經係有打印本喺面前㗎喇？我係問黃先生，你而家有  
3 冇嗰份嘅打印本？
- 4 黃志光先生：（經傳譯員）冇。
- 5 主席：（經傳譯員）咁有冇嗰個網上嘅紀錄？
- 6 黃志光先生：（經傳譯員）冇。其實喺我哋運輸署嘅網頁--唔係...
- 7 主席：（經傳譯員）無論喺邊都好喇，可唔可以係搵番出嚟畀我哋一份？
- 8 黃志光先生：（經傳譯員）可以嘅，可以。我有，但係就我同事提我，唔係話喺運輸  
9 署個網頁度搵到。
- 10 主席：（經傳譯員）喺邊度搵到都好喇，可唔可以而家搵出嚟畀我哋？咁我哋可以打  
11 印啲版本出嚟。
- 12 李美鳳女士：（經傳譯員）主席，其實我哋係將幾份係畀咗秘書處，就係關於個設計  
13 嘅要求，我哋同意秘書處可以係用嗰一個嘅紀錄印出嚟畀大家。
- 14 主席：（經傳譯員）咁秘書處，唔該，可唔可以係印咗嗰啲相關嘅段落出嚟畀我哋？  
15 黃律師。
- 16 黃女士：（經傳譯員）做緊嗰樣嘅嘢時候，我就想問一個一般嘅問題，第 2 同埋第 8  
17 章，第 2 章就係--從呢個屏幕上第 2 章嗰度就係話第九冊係公共交通嘅規劃同  
18 埋設計手冊，可唔可以畀我哋聽呢一個嘅手冊或者係第 2 章，特別喇，係幾時  
19 有--有冇檢討過？有冇修訂過？或者更新過㗎？
- 20 黃志光先生：（經傳譯員）我有呢一個嘅資料，要去查一查。
- 21 黃女士：（經傳譯員）另外一部分你提到就係 8.4 段，...
- 22 主席：（經傳譯員）我哋睇一睇 2.7.11，可唔可以喺屏幕上--洗手間同埋食堂設施  
23 係畀職員嘅，同埋呢一個站長嘅辦事處，咁呢啲就唔會喺巴士總站度提供，如  
24 果喺附近嘅物業發展嗰度有嘅話，呢個係咪我哋呢幾個月都係聽到車長話呢個  
25 嘅困難，就係要去附近嘅商場去搵洗手間嘅？
- 26 黃志光先生：（經傳譯員）回答你嘅問題，主席，我哋有將呢條嘅條款喺我哋同專營  
27 巴士公司同埋其他部門嚟到去講喺公共交通交匯處要去設計啲咩設施嘅時  
28 候，其實有將呢條嘅條款係考慮在內嘅。
- 29 主席：（經傳譯員）咁呢條嘅規定喺邊度嚟嘅呢？已經係幾時開始有嘅呢？都係好異  
30 常嘅，呢一條嘅條款。
- 31 黃志光先生：（經傳譯員）正如我咁講，主席，我要去查一查，而家我有一個實際嘅

1 日期係講得出 2.7.11.4 幾時加落去嘅，我諗我哋要去查一下。

2 主席：（經傳譯員）好。好，黃律師。

3 黃女士：（經傳譯員）唔該。關於呢條嘅條款，洗手間--如果呢啲咁嘅設施喺附近嘅  
4 發展係有嘅，就唔需要喺呢度提供，呢一段你哋如果真係想去檢討呢一段嘅條  
5 款，要去諮詢啲乜嘢嘅人士？

6 黃志光先生：（經傳譯員）我哋可以喺我哋個專責小組係作為議程係討論呢一方面  
7 嘅修訂，呢一度就好難直接話係邊一個特別嘅部門係相關嘅，因為如果運輸署  
8 同埋專營巴士公司係決定話要擱走呢一條嘅條款，咁--喺，我諗應該就係政府  
9 部門同埋專營巴士公司，因為其實我哋係去提供設施嘅時候其實係有考慮呢個  
10 條款嘅，因為我哋而家唔係咁樣做。

11 主席：（經傳譯員）即係運輸--呢一個嘅公共交運輸嘅規劃同埋設計手冊係咪你哋-  
12 -因為你哋係運輸署喇，就可以去修訂呢個手冊，抑或要係諮詢其他部門先？

13 邱國鼎先生：（經傳譯員）主席，或者我補充。

14 主席：（經傳譯員）畀個--好簡單嘅問題，簡單咁樣答喇，邊個可以去修改呢個手  
15 冊。

16 邱國鼎先生：（經傳譯員）運輸署可以。

17 主席：（經傳譯員）係咪運輸署自己可以決定㗎？

18 邱國鼎先生：（經傳譯員）我哋會有一個嘅工作小組嘅，有運輸局...

19 主席：（經傳譯員）我哋唔使咁長嘅答覆，我淨係想問運輸署自己係咪可以去修訂？

20 邱國鼎先生：（經傳譯員）我哋可以係開展呢個工作，然後我哋要諮詢嘅。

21 主席：（經傳譯員）咁邊一個係負責㗎？

22 邱國鼎先生：（經傳譯員）就係呢一個公共運輸規劃同埋設計手冊嘅工組小組？

23 主席：（經傳譯員）咩嘢意思話？

24 邱國鼎先生：（經傳譯員）即係我哋可以...

25 主席：（經傳譯員）乜嘢係 TPDM？

26 邱國鼎先生：（經傳譯員）就係運輸規劃同埋設計手冊。

27 主席：（經傳譯員）呢個係運輸署自己決定㗎㗎，係嘛？

28 邱國鼎先生：Yes.

29 主席：（經傳譯員）好，唔該。

- 1 黃女士：（經傳譯員）呢一個嘅運輸規劃同埋設計手冊工作小組上一次開會嘅時候係  
2 幾時？或者係幾時去成立㗎？
- 3 邱國鼎先生：（經傳譯員）我諗我哋就預備咗嗰啲文件，就成立呢個工作小組，咁就  
4 係內部有其他嘅部門代表嚟到去參與。
- 5 黃女士：（經傳譯員）咁咩嘢其他嘅代表？
- 6 主席：（經傳譯員）唔係問你係點解、點樣或者係邊度，係幾時，幾時成立，你諗清  
7 楚先至答，畀一個日子我哋，幾時成立嘅？
- 8 邱國鼎先生：（經傳譯員）我有確切嘅資料。
- 9 主席：（經傳譯員）唔該。可唔可以大概咁，大概講？
- 10 邱國鼎先生：（經傳譯員）大概喺八十年代，1980 年代。
- 11 主席：（經傳譯員）係，唔該。黃女士。
- 12 黃女士：（經傳譯員）佢哋有幾常開會㗎？
- 13 邱國鼎先生：（經傳譯員）冇定期會議嘅，呢個工作小組，但係如果係有建議話要修  
14 訂呢一個手冊，就會傳閱畀呢一個工作小組嘅成員，如果有需要就會召開一個  
15 會議嚟到去商量。
- 16 主席：（經傳譯員）邊個係個召集人？
- 17 邱國鼎先生：（經傳譯員）係運輸署。
- 18 主席：（經傳譯員）邊個？
- 19 邱國鼎先生：（經傳譯員）係呢個一個副運輸署署長。
- 20 主席：（經傳譯員）冇冇名㗎？
- 21 邱國鼎先生：（經傳譯員）而家係 WL Tang。
- 22 主席：（經傳譯員）好，唔該。
- 23 黃女士：（經傳譯員）咁要去向呢個工作小組提交一啲建議，有咩嘢準則㗎？
- 24 邱國鼎先生：（經傳譯員）運輸署係可以建議任何嘅修訂畀工作小組考慮嘅。
- 25 黃女士：（經傳譯員）你正話提到有其他部門嘅代表嘅，係乜嘢部門？
- 26 邱國鼎先生：（經傳譯員）我而家有資料，我記得係包括路政署、警方。
- 27 黃女士：（經傳譯員）包唔包埋規劃署？
- 28 邱國鼎先生：（經傳譯員）我要去查下先，我要核證一下。

1 主席：（經傳譯員）咁請你稍後畀番相關嘅資料我哋。

2 邱國鼎先生：（經傳譯員）好。

3 黃女士：（經傳譯員）問你一個假設性嘅問題，如果專營巴士公司或者係工會方面就  
4 係投訴--佢哋投訴呢啲嘅休息設施好多年喇，話設施唔夠喇、休息室太細，或  
5 者呢一類嘅投訴，咁如果係運輸署嘅職員在場，又或者佢哋知道佢哋嘅投訴，  
6 咁會唔會將呢啲嘅事情係畀工作小組知道？呢一個嘅運輸規劃同埋設計手冊嘅  
7 工作小組，會唔會話畀呢個小組聽？

8 黃志光先生：（經傳譯員）回答呢個問題，我諗而家係有兩個情況要處理嘅，一，就  
9 係嗰啲現有嘅巴士總站或者係公共交通交匯處係未有呢啲嘅設施嘅，咁好似我  
10 哋早前咁講喇，會有一個嘅機制，同專營巴士公司去講下點樣提供呢個設施，  
11 佢哋可以提出申請嘅，我哋呢用一個快速啲嘅方法嚟到去審批呢啲嘅申請，至  
12 於運輸規劃同埋計劃手冊，就係咪話規劃一啲新嘅巴士總站或者係公共交通交  
13 匯處嘅時候，係咪必須要去--即係必須要提供呢啲嘅設施嘅。

14 主席：（經傳譯員）黃律師，你會唔會講埋呢一個西鐵站個巴士總站嘅情況？

15 黃女士：（經傳譯員）我而家正打算講㗎喇，主席。我哋聽到一啲嘅投訴，就係九巴  
16 佢話新嘅九鐵站嗰個巴士站係點呢，佢哋嘅投訴就係話冇洗手間設施喇，喺呢  
17 一個總站嗰度，即係而家唔係嗰個公共運輸交匯處，而係話呢個西鐵嗰個嘅--  
18 呢個嘅高鐵站，西九龍站嗰度就係冇呢一個休息設施，冇洗手間嘅，咁個投訴  
19 就係似乎喺去規劃呢一個西九嘅巴士總站嘅時候，係冇諮詢或者係冇規劃嘅預  
20 先。首先，我想你睇睇呢一個西九站巴士總站嘅報告嘅，咁就係喺 2018 年 10  
21 月 3 號委員會嘅主席同埋秘書處喺下晝就係到訪咗西九站嘅巴士總站嘅，你有  
22 冇睇過呢份報告？

23 黃志光先生：（經傳譯員）有。

24 主席：（經傳譯員）你對呢一個嘅地點熟唔熟悉？

25 黃志光先生：（經傳譯員）係熟嘅。

26 主席：（經傳譯員）你喺發出報告之後，你有冇去過？

27 黃志光先生：（經傳譯員）我諗係我之前有去過。

28 主席：（經傳譯員）即係你之前有去過，係咪？

29 黃志光先生：（經傳譯員）係。

30 黃女士：（經傳譯員）我想帶你睇一睇，即係有一啲巴士車長嘅投訴，首先就係喺呢  
31 一頁，1275 頁，咁如果...

32 主席：（經傳譯員）邊一份文件冊？

1 黃女士：（經傳譯員）呢個就雜項三嘅文件冊，1275 頁嘅。我哋見到喺第 1 段，九  
2 巴就喺巴士總站入面就係安裝咗七個嘅建築物喇，就係喺行人路上面，就係接  
3 近 95 號、42A 號、W1 同埋 W2 號嘅巴士路線附近嘅。咁 1279 頁你就見到有啲  
4 相，就係去到 1282 頁嘅，呢度就有一啲相片。1275 頁，你見唔見到？咁如果  
5 繼續向下捲，第三點就講九巴同埋城巴嘅休息室全部都係安裝咗喺巴士站入面  
6 嘅，因為所有嘅休息室都要裝喺呢啲嘅石屎範圍入面喇，咁而呢個冷氣機嘅水  
7 必須係要經過一啲空樽收集，而唔係直接係去排落一啲附近嘅渠度嘅。咁而唯  
8 一一個廁所就係一個公廁，就係喺巴士站嘅遠端，就有六個嘅--即係有六個嘅  
9 坐廁喇，同埋六個嘅尿兜喇，即係喺男廁入面。咁主席同埋秘書處嘅職員要係  
10 行大概三分鐘三十秒先至係可以由站長室行去嗰個嘅男廁嘅，...

11 主席：（經傳譯員）即係可能實際嘅情況就係--即係彭先生就話如果佢要行，可能要  
12 長啲？

13 黃女士：（經傳譯員）就係要大概係四分鐘嘅。

14 主席：（經傳譯員）係嘅。

15 黃女士：（經傳譯員）咁如果你來往，係大概係要十分鐘。咁首先喺呢四點方面，似  
16 乎就有經過任何嘅諮詢或者係討論，即係同規劃署--運輸署同埋九巴公司都係  
17 有做緊，即係當興建呢個西九站嘅巴士站嘅時候，你同唔同意呢個講法？

18 黃志光先生：（經傳譯員）你可唔可以重複一次個問題？

19 黃女士：（經傳譯員）根據我哋當日考察嘅觀察...

20 主席：（經傳譯員）我諗個問題係好簡單嘅啫，當規劃同埋興建呢個巴士站嘅時候，  
21 有冇徵詢過任何嘅專營巴士公司，即係就住佢嘅興建同埋設計？

22 黃志光先生：（經傳譯員）即係我而家有嗰個資料响手，但係我認為巴士公司之前應  
23 該係有被徵詢嘅，但係我確認唔到。

24 主席：（經傳譯員）或者我哋畀黃先生睇下九巴點樣講。

25 黃女士：（經傳譯員）咁呢一個謄本就係 9 月 12 號第十五日嘅，就係第 65 頁第八  
26 行，呢個就係 TSCP-6 文件冊嘅。第十五日，喺第 65 頁嘅。咁我哋由呢度開始  
27 講喇，九巴嘅 Patrick Pang 先生就講話即係佢可以舉啲例，咁佢嗰個投訴就  
28 係「關於某一啲嘅巴士站就係有廁所嘅，即使可以裝一啲化廁，喺一啲新嘅巴  
29 士站，我係好驚訝都有一啲即係永久嘅廁所，咁我想舉一啲例嘅，例如呢個西  
30 九高鐵站嘅巴士站，呢個係一個相當大嘅巴士站，咁但係係有廁所嘅，而紅磡  
31 紅鸞道就係將會有一個新嘅巴士站係去代替舊嘅紅磡碼頭巴士站，佢係一個公  
32 共交通交匯處，咁但係同樣喇，都係有廁所，亦都係有休息室嘅，咁而港珠澳  
33 大橋嘅巴士站，即係正如我哋而家所見，都唔會有廁所嘅，所以我想多謝你係  
34 即係提出呢一個休息室嘅問題，包括係廁所嘅。」

1 咁然後我哋可以睇下喺第二十五行，彭先生就繼續講喇「我唔知呢個係咪  
2 一個設計上嘅缺陷喇，咁以往起嘅巴士站就係有永久嘅休息設施，包括係休息  
3 室同埋廁所，咁但係好驚訝地，喺某一啲新嘅巴士站係有呢啲設施嘅，咁而新  
4 嘅巴士站嗰度，除咗係缺乏休息設施，亦都係有一啲嘅設計缺陷嘅。西九站同  
5 埋紅鸞道嘅巴士站，當佢哋開幕嘅時候，運輸署係邀請咗巴士公司係去進行一  
6 啲嘅試驗，咁而我哋發現呢啲設計就並唔適合某一啲嘅巴士模型或者係型號，  
7 咁而最後就係要有一啲好重大嘅改變，咁我哋嘅巴士先可以用到呢啲嘅巴士站  
8 嘅。咁而呢啲舊嘅巴士站，佢哋設計嘅時候有考慮到呢啲 12 米長嘅巴士喇，咁  
9 我哋明白嘅，咁但係如果新嘅巴士站都係咁，我哋就會比較驚訝喇。」

10 咁你可以見到九巴嘅控訴就係呢啲新嘅巴士站，即係好似--嘅時候有同巴  
11 士公司係去傾嘅，即係呢一個西九站嘅巴士站，你可唔可以確認一下個情況係  
12 咪咁？或者你有冇其他嘅回應？

13 黃志光先生：（經傳譯員）我唔能夠確認呢一個嘅講法，我哋係要確認一下呢啲書  
14 信。

15 主席：（經傳譯員）或者你可以儘快提供。如果係有徵詢嘅話，咁一定有一啲書信來  
16 往或者會議紀錄嘅，係咪？

17 黃志光先生：Yes. Sure.

18 黃女士：（經傳譯員）咁我想講番呢一個考察嘅報告，就係雜項三嘅文件冊，就係巴  
19 士車長就係有其他嘅控訴嘅，咁我哋睇 1276 頁，我哋睇第三點，咁佢就講到九  
20 巴同埋城巴嘅巴士路線，即係呢啲喺呢個巴士站作為終站嘅九巴同埋城巴路  
21 線，即係一個車長到達車站同埋再開始下一段嘅旅程之間，嗰個時間通常都唔  
22 會超過十五分鐘嘅，即係如係交通暢順嘅話，即係話到達車站係有延誤，咁但  
23 係當交通情況係不理想，例如係即係朝早繁忙時間，咁呢個時間可能會減少至  
24 大概一至兩分鐘，有一啲巴士車長佢哋一到咗車站就要即刻係回程喇。

25 咁而下一段就話公廁嘅位置就係頭兩名嘅九巴車長，即係主席所見嘅頭兩  
26 個九巴車長，佢哋都覺得呢個公廁太遠喇，因為可能佢來回要超過十分鐘嘅。  
27 咁意見就係啲廁所係太遠喇，即使佢哋係喺公共交通交匯處入面，咁我哋見到  
28 喺嗰個交通規劃及設計手冊嗰度，喺第 2 章，2.7.11.4 段，咁呢一個就即係  
29 用黃色間住嘅文字，咁根據呢個條款，即係只要喺附近嘅建設度有呢啲措施，  
30 包括係廁所、洗手間同埋食堂係即係唔需要出現喺呢一個巴士站入面，咁所以  
31 呢個就係問題嘅源頭喇。咁我嘅問題就係首先你有冇考慮係發出一啲建議去--  
32 即係喺緊要嘅將來或者你係會歡迎係改動呢一啲嘅條款？

33 主席：（經傳譯員）首先你可唔可以直接答咗我問題先？你有冇考慮過係即係建議修  
34 訂呢啲嘅條文？

35 黃志光先生：（經傳譯員）有。

1 主席：（經傳譯員）幾時係考慮㗎？畀個日子我吓，幾時？

2 黃志光先生：（經傳譯員）即係我哋係會考慮去修改...

3 主席：（經傳譯員）個問題係幾時，幾時考慮？之前你用係過去式嘅，咁你講嗰個  
4 「有」係講緊係過去嘅事喇，係咪？即係之前嘅事喇，係咪？

5 黃志光先生：（經傳譯員）我哋內部係有傾過嘅，咁但係即係答番你嘅問題喇，我哋  
6 會咁做嘅，我哋係將會修訂。

7 主席：（經傳譯員）即係呢個係未來式嘅，係咪？

8 黃志光先生：（經傳譯員）冇錯。

9 主席：（經傳譯員）係，唔該。黃律師。

10 黃女士：（經傳譯員）唔該。咁關於呢個問題，即係嗰個嘅工作指引就係話要為車長  
11 提供休息時間嘅，或者請你去搵雜項二嘅文件，897 頁至到 898 頁。呢一張表  
12 就係將咁多年嚟嘅指引係列咗出嚟嘅，我特別關心就係 2018 年 2 月 23 號嗰個  
13 嘅指引，我哋睇到日間嘅休息，即係六個鐘頭之後有四十分鐘嘅休息，但係喺  
14 嗰六個鐘頭裏面係總共二十分鐘嘅休息，但係喺頭嗰四個小時嘅當值期間係不  
15 少於十二分鐘，舉例喇，西九巴士總站呢度，車長起碼要行十分鐘，來回，去  
16 洗手間嘅，咁佢哋嘅休息時間，車長，你點樣確保巴士公司係會遵守呢一個嘅  
17 守則，當嗰啲車長要去洗手間嘅時間都唔夠嘅話，你點樣確保佢哋遵守呢一個  
18 嘅守則--指引？

19 謝善怡女士：（經傳譯員）主席，或者我答我呢個問題，嗰啲嘅指引定出嗰個最低嘅  
20 要求，最起碼嘅，咁即係話巴士公司可以視乎情況為車長提供多啲嘅休息時間  
21 嘅，要嚟去洗手間同埋休息。

22 主席：（經傳譯員）即係包埋去洗手間？

23 謝善怡女士：（經傳譯員）係，佢哋可以提供多啲時間，呢個只不過係提出最起碼嘅  
24 時間啫。

25 黃女士：（經傳譯員）但係你有冇考慮過嗰個係喺憲報裏面講，巴士佢係要向公眾提  
26 供嗰個服務嘅嗰個車程，你有冇考慮到呢一點？

27 謝善怡女士：（經傳譯員）當我哋係去睇行車時間表嘅時候，我哋會同呢一個巴士公  
28 司一齊去核證嗰個嘅行車時間，跟住佢哋會制訂一個嘅時間表，就係包埋喺下  
29 一次再開車之前嗰個嘅休息時間係幾多。咁呢個就係畀巴士公司喺實際運作嘅  
30 時候去跟從嘅。

31 黃女士：（經傳譯員）咁我嘅理解正唔正確？即係休息時間係包埋去廁所嘅時間，係  
32 嘛？

1 謝善怡女士：（經傳譯員）係㗎。

2 黃女士：（經傳譯員）去到嗰個考察嘅報告喇，呢個就係第二點我想同你講㗎喇，係  
3 1276 頁，係雜項二嗰一沓嘅文件--三嗰個文件。因為呢個西九站嘅巴士總站個  
4 設計係有一啲問題嘅，根據九巴佢哋就話如果係由尾數上嚟第 3 段，就係站長  
5 就係確認根據佢自己嘅--以佢所知，其實九巴就係申請喺呢個總站度有四個化  
6 學廁所，咁而係等緊運輸署嚟到去通過嘅。我喺呢度可唔可以問下你，呢一個  
7 申請嘅進度點？

8 黃志光先生：（經傳譯員）我哋已經批准㗎喇，喺 9 月 28 號已經批准㗎。

9 黃女士：（經傳譯員）9 月 28 號？

10 黃志光先生：（經傳譯員）係。

11 黃女士：（經傳譯員）另外仲有一點嘅，關於係休息設施方面...

12 主席：（經傳譯員）你未繼續之前，呢一個係一個全新嘅巴士站，喺一個係非常之--  
13 一個新嘅鐵路站隔離，點解要用化學廁所？化學劑嘅廁所？

14 黃志光先生：（經傳譯員）主席，要回答呢個問題，即係呢個係一個交換意見喇，因  
15 為喺巴士總站嘅公共廁所就據九巴講唔係好適合--即係喺嗰個嘅高峰期嘅時  
16 候，就佢哋需要多啲嘅時間去嗰個嘅公共洗手間，咁所以喺呢一個實地嘅會議  
17 嘅時候，九巴就話佢哋可能會提出申請，有一啲化學劑嘅洗手間，咁休息時間  
18 同埋其他情況唔會受影響，就畀車長用嘅。

19 主席：（經傳譯員）但係喺巴士總站裏面係需要有廁所，你亦都係通過㗎喇，咁呢個  
20 應該喺嗰個規劃設計同埋興建階段處理㗎，係嘛？唔係話去到事後先至就話去  
21 處理呢個問題㗎嗎？

22 黃志光先生：（經傳譯員）或者我解釋下喇，呢一個嘅巴士總站我哋可以用兩個方法  
23 處理嘅，一，就係叫巴士公司為車長提供多啲嘅休息時間，喺呢一個巴士總  
24 站，因為佢哋行去嗰個嘅公共洗手間要多啲時間，另外一個做法就係批准巴士  
25 公司申請喺嗰個嘅情況提供用化學劑嘅廁所，因為喺嗰度有咁快可以起到一個  
26 正式嘅廁所。

27 主席：（經傳譯員）呢個就係顯示你哋個制度出咗問題，呢個係一個全新興建嘅巴士  
28 站㗎嘛，咁連啲油好似都未乾咁嘅，咁你就發覺需要事後去通過九巴提出嘅  
29 申請，喺呢個巴士站裏面安裝廁所，呢啲唔係應該一早預計在內㗎喇咩？

30 黃志光先生：（經傳譯員）主席，我唔會反駁你嗰個嘅評論，不過我自己嘅觀察就係  
31 巴士公司同埋車長所遇到嘅問題，我唔會話係有唔同喇，不過我唔知道--我就  
32 唔知道喺嗰個廁所附近係咪好多巴士停泊喺度，但係實際運作起上嚟係有啲唔  
33 同㗎。

34 主席：（經傳譯員）即係查㗎定係咩嘢意思？

1 黃志光先生：泊咗喺度。

2 主席：（經傳譯員）我哋見到啲巴士泊咗喺度，嗰度亦都係有一啲嘅旅遊巴㗎？

3 黃志光先生：（經傳譯員）係，呢個係畀呢一個專營巴士專用嘅泊車地方。

4 主席：（經傳譯員）咁你嘅意思係話呢個同運作中嘅巴士有唔同嘅，即係話嗰啲嘅車  
5 長得好短嘅時間休息？

6 黃志光先生：（經傳譯員）係，冇錯，譬如話佢哋到站嘅時候就係泊咗架車，佢哋唔  
7 需要即刻就去到畀乘客上車嘅地方，佢哋可以泊咗喺度先，咁跟住去洗手間返  
8 嚟㗎。

9 黃女士：（經傳譯員）我未去另外一份文件之前，或者未去講規劃署嘅一封回信之  
10 前，我想問下你，呢個係關於休息設施嘅問題，就係話應該要預先規劃，其實  
11 都講咗好多年㗎喇。我畀你一個例子睇下，喺工會嘅文件 TU-1B，260-06  
12 頁，咁係一次嘅會議嘅紀錄，咁就係 2015 年 9 月 23 號，咁你會見到喇，運輸  
13 署、警方、勞工處、地政總署、立法會議員、呢一個嘅工聯會嘅巴士分會嗰個  
14 嘅代表、呢一個係巴職聯都係有出席嘅，你就睇到呢度出席包埋助理運輸署署  
15 長，仲有喺呢一個嘅運輸署裏面好幾個嘅負責官員喇，另外警方喇、交通部  
16 喇，同埋呢一個運輸署都係有出席嘅，咁我而家想請你睇 260-209 頁，羅馬數  
17 字 ii 呢一段。工會就係表達呢個關注嘅，喺某啲嘅巴士總站係設施不足，雖然  
18 巴士公司就係要申請一啲休息室，咁但係當局就市民反對，咁所以後來係冇，  
19 咁因此工會就係想知道部門到底係用咩嘢嘅準則嚟到去批准呢啲嘅休息室，同  
20 埋點樣決定佢哋嗰個嘅大細。而委員會就話喺某啲嘅巴士總站係冇廁所，車長  
21 一定要用附近嘅或者喺商場嘅一啲公廁，因為商場嗰啲廁所嘅開放時間同車長  
22 嘅當更時間未必相配嘅，咁佢哋希望係規劃新嘅巴士總站嘅時候一定包埋有廁  
23 所。

24 260-210 頁，一下頁嘅，呢個係運輸署嘅回應，或者一路落去最後嗰段，  
25 就話有關部門，即係運輸署喇，就會參考一啲已定嘅標準嚟到去設計新嘅同臨  
26 時道路同埋公共交通交匯處，去確保所有嘅道路同埋臨時嘅運事安排都係符合  
27 呢個道路安全，去規劃新嘅巴士總站嘅時候，運輸署會要求巴士公司提供意  
28 見，關於巴士總站應該有嘅咩嘢設施同埋要有啲咩嘢嘅安排，令到相關同埋所  
29 需嘅設施，運事署會促請巴士公司去聆聽僱員對呢啲問題嘅意見，咁就係去反  
30 映番畀運輸署聽。我只係指出一個例子，因為其實喺會議紀錄嗰度係有好多類  
31 似嘅例子嘅。即係其實係話應該喺規劃新嘅巴士總站之前係要去處理啲問題。  
32 喺最早，2015 年已經提出，無論如何，呢個係我哋收到呢一份會議紀錄嘅時間  
33 喇。

34 即係呢個問題自從 2015 年我哋都睇到個問題一再出現，咁運輸署嘅立場  
35 就係會要求巴士公司就係就呢啲巴士站嘅設施係提供意見。咁喺西九龍巴士總  
36 站呢度點解係冇做，你知唔知點解？

1 黃志光先生：（經傳譯員）正如我早前回應主席喇，我哋要去確認一下，遲啲先可以  
2 同委員會係匯報嘅，咁我哋就要即係再確認一下喺西九龍站嗰個情況。

3 主席：（經傳譯員）咁我記憶之中，九巴話喺呢一個設計階段之後先至係批出呢個專  
4 營權嘅，咁所以巴士公司就有參與係提供意見嘅，你有冇任何嘢想講？

5 黃志光先生：（經傳譯員）我唔能夠評論呢個講法，我哋係要先去確認下相關嘅資  
6 料。

7 主席：（經傳譯員）咁或者你哋亦都可以係去確認一下呢方面嘅資料。

8 黃志光先生：（經傳譯員）個人嚟講，我之前有處理過呢啲嘅個案，咁但係我認為即  
9 係呢一個...

10 主席：（經傳譯員）即係呢個就同專營權到期有關，呢個就係講緊新嘅路線，西九站  
11 係有三條路線？

12 黃志光先生：（經傳譯員）係有三條路線，咁其實喺巴士站入面係亦都有十一條係由  
13 九巴經營嘅路線嘅。

14 主席：（經傳譯員）九巴有兩條新嘅線，城巴一條，係咪？

15 黃志光先生：（經傳譯員）係，冇錯。

16 主席：（經傳譯員）咁如果市場就係由即係幾間大公司係壟斷嘅時候，究竟邊個擺到  
17 三條線或者其他一啲公司擺唔到都好，你都可以即係兩間都諮詢㗎嘛，係咪？

18 黃志光先生：（經傳譯員）我同意主席嘅觀察嘅。

19 主席：（經傳譯員）咁你可能就會可以諗--即係你唔知道邊個會擺到呢啲路線，咁但  
20 係佢哋應該要提供啲咩設施？即係咁樣就會容易啲喇，係咪？

21 黃志光先生：（經傳譯員）我同意係觀察嘅，咁但係正如我哋所講喇，我哋要確認一  
22 下呢個個案，即係我哋要先徵詢九巴嘅，即係正如我哋所講喇，附近都有十一  
23 條巴士路線就轉移去呢個巴士站。

24 主席：（經傳譯員）我哋明白嘅，請提供所有相關嘅資料，唔該。

25 黃女士：（經傳譯員）而家我想你睇一睇另一份文件，呢個就係規劃署嘅回覆信，日  
26 期就係 18 年嘅 9 月 27 號，呢個就係即係關於獨立檢討委員會嘅陳述，即係委  
27 員會係邀請提交陳述嘅，就住呢一個巴士站入面嘅休息室同埋廁所，咁係喺雜  
28 項三文件冊第 1313 頁。我想你睇一睇第 2 版嘅第 3 段，咁問題就喺呢度，第  
29 一個問題，你之前有冇睇過呢份文件？

30 黃志光先生：（經傳譯員）有。

31 黃女士：（經傳譯員）第 3 段，問題就係運輸及房屋局與或者運輸署有冇留意到即係

1 規劃署有冇就住專營巴士公司提供休息同埋廁所設施嘅時候，有冇任何嘅難  
2 度，如果有，請你形容下呢一啲嘅通訊同埋係提供相關嘅書信同埋回應嘅。咁  
3 而回應就係話運房局或者運輸局就係有留意到規劃署係喺專營巴士公司喺巴士  
4 站為佢哋嘅員工提供休息同埋廁所設施嘅時候係出現任何嘅問題嘅，你可唔可  
5 以確認一下你哋個情況係咪咁？

6 黃志光先生：（經傳譯員）我同意規劃署嘅回應嘅，因為佢哋有確認過，咁正如之前  
7 所解釋喇，喺呢一個興建公共交通交匯處同埋相關設施嘅時候，就並冇係涉及  
8 到規劃署。

9 黃女士：（經傳譯員）主席，我想特別講下香港規劃標準與準則嘅，咁就係有一啲關  
10 於公共交通交匯處就住專營巴士嘅一啲要求嘅，或者我哋係咪應該休息下？

11 主席：（經傳譯員）其實好短啫，得一、兩行，係咪？

12 黃女士：（經傳譯員）咁就係有一系列嘅問題嘅，特別就係...

13 主席：（經傳譯員）咁我哋今日遲咗開始，或者我哋繼續先喇，我哋遲啲先至休息。

14 黃女士：（經傳譯員）多謝，主席。首先，我想你睇一睇香港規劃標準與準則，咁首  
15 先我想你睇一睇第二個問題，就係委員會早前向規劃署提出嘅，問題就係咁樣  
16 「運房局同埋或者運輸署有冇要求規劃署係去特別就喺香港規劃標準與準則  
17 4.1.6 嘅要求，同埋係要求有廁所同埋休息設施呢？」咁 4.1.6 段就喺 1317  
18 頁嘅，喺同一份嘅文件冊入面。咁喺 4.1.6 段就係有巴士站嘅標準，最後一行  
19 就講到站長室--即係必須係有站長室同埋其他嘅附屬設施嘅，咁我哋其中一個  
20 問題就係呢個「其他附屬設施」呢啲字眼就有一個定義嘅，咁我而家想你睇下  
21 4.1.9 段，就係喺第 1314 頁嘅--唔好意思，係 1317 頁，4.1.9 段嘅。

22 「咁如果佢哋係公共交通交匯處嘅一部分，咁佢哋嘅位置就係會有一個間  
23 隔，即係隔開咗喇，咁但係應該係徒步可達嘅，即係呢啲唔同嘅設施」，咁而  
24 我想你睇下第 1314 頁，1314 頁第 2 段，就係第 2 段嘅。咁 4.1.9 段就指出  
25 巴士站係可以成為公共交通交匯處嘅一部分嘅，咁喺呢方面，香港規劃標準與  
26 準則就指出，如果空間允許嘅話，營運嘅設施，包括係廁所、座位、站長辦公  
27 室等，呢啲係必要嘅設施喇，應該係喺公共交通交匯處入面係提供嘅，咁所以  
28 個問題就係有冇空間。咁呢個公共交通交匯處嘅大細應該係由運輸署係決定  
29 嘅，咁所以呢個所謂嘅「其他附屬設施」即係可以係對應呢一啲嘅重要嘅設施  
30 嘅。

31 「運輸署係運輸事宜嘅監督，佢係有制訂一啲詳細嘅技術指引，即係就住  
32 巴士站同埋公共交通交匯處嘅設施，咁就係喺呢一個交通規劃與設計手冊入面  
33 第 2 同第 8 章係列出嘅，係喺第九冊。咁而香港規劃標準與準則嘅第 8 章就係  
34 有提及，咁而第 2 頁就講到『其他附屬設施』呢一個用詞就係首次喺 1991 年喺  
35 香港規劃與標準準則係加入嘅，即係就住呢個巴士站，之後亦都係有改變。咁  
36 而現有規劃與標準準則，巴士站嘅規劃標準同埋指引就同其他嘅公共交通設施

1 一樣，就上一次嘅檢討同埋發布就係喺 2000 年嘅，當時就係由當時嘅交通局同  
2 埋運輸署係啟動呢一個嘅檢討喇，係去符合呢一個運輸研究嘅，即係就喺 1999  
3 年完成第三次全面交通研究嘅時候。咁而當時規劃與標準準則字眼嘅修訂係包  
4 括咗巴士站同埋公共交通交匯處，包括係營運公司嘅設施嘅規格，例如係站長  
5 室同埋廁所等等，就係根據運輸署嘅意見嘅。」

6 首先有幾個問題，首先佢哋指出呢項指引就會符合交通規劃與設計手冊  
7 嘅，啱唔啱，咁樣？

8 黃志光先生：（經傳譯員）係。

9 黃女士：（經傳譯員）咁如果唔修訂手冊嘅話，咁喺香港規劃標準與守則亦都係唔會  
10 有相應嘅修訂嘅，情況係咪咁樣？

11 陳英傑先生：（經傳譯員）我想回應一下，手冊嘅要求係有詳細嘅要求，即係包括呢  
12 個廁所嘅設施嘅。咁如果你修改手冊入面嘅規格，香港規劃與準則亦都可能係  
13 有相關嘅修訂，正如你所知道，規劃標準與準則就係一項比較高層次嘅規劃指  
14 引，就有講一啲詳細嘅事項。

15 主席：（經傳譯員）都唔係嘅，譬如話佢講到係要有站長室喇，咁我睇緊 4.1.6 段  
16 就係有講到巴士站嘅規格，就係喺 1317 頁嘅。咁之後就係一啲都好模糊嘅，咁  
17 但係都係可以理解嘅，即係有提到「其他附屬設施」，咁附屬嘅意思係咪就係  
18 附屬呢一個站長室吖，或者係附屬呢個巴士站？即係呢個可以好直接咁指出  
19 嘅。

20 陳英傑先生：（經傳譯員）係。

21 黃女士：（經傳譯員）你有冇同規劃署係跟進，去攞一啲詳細啲嘅規格，究竟呢啲所  
22 謂「其他附屬設施」係包括啲咩嘢？例如係廁所同站長室？

23 陳英傑先生：（經傳譯員）係，係嘅。

24 黃女士：（經傳譯員）咁你就會係跟進呢一段嘅修訂，係咪？即係呢個唔係淨係得一  
25 段，仲有另外一段㗎，喺呢個手冊。或者 1324，1324 頁，就係關於公共交通  
26 交匯處嗰個嘅設計嘅。1324 頁，就係 4.5.3 段，就係 1323，就係講到公共交  
27 通交匯處嘅一般設計嘅要求，嗰度其中一個嘅要求喺(c)，顧客同埋公司嘅設施  
28 喇、嗰個安全喇、保安嘅安排，譬如話排隊嗰啲嘅欄河喇、洗手間座位嘅設  
29 施、售票機、公共電話、呢一個消防設施等等，即係如果係有空間嘅時候，應  
30 該呢啲必須嘅設施就係喺公共交通交匯處裏面提供嘅。呢度有寫嘅就係有講到  
31 底嗰啲嘅廁所係畀埋公眾，即係乘客使用，抑或只係車長或者巴士公司專用。  
32 呢一段都要睇埋嘅，都要需要澄清嘅，睇下使唔使修訂嘅。你會唔會係對於呢  
33 一段都係有一啲相應嘅修訂，就係透過規劃署？

34 陳英傑先生：（經傳譯員）檢討過廁所同埋附屬設施嘅相關嘅條款，咁可能呢一度都  
35 要有相應嘅修訂嘅。

1 黃女士：（經傳譯員）咁去番 1315 頁，規劃署嗰封信，規劃署嗰呢度寫得好清晰，  
2 要修訂呢啲指引嘅程序係需要由運房局或者係運輸署嚟到去提出，咁然後先至  
3 會修訂香港規劃標準嘅準則就係第 8 章嘅，咁就係需要你哋嗰邊去提出嘅。咁  
4 如果係可以，我就會去另外一個嘅話題。

5 主席：（經傳譯員）咩嘢話題？

6 黃女士：（經傳譯員）就係非法泊車。

7 主席：（經傳譯員）咁好，我哋而家就係休息，因為我哋今朝都遲咗開始喇，我哋休  
8 息十分鐘。

9 黃女士：（經傳譯員）好，唔該。

10  
11 上午 11 時 48 分聆訊押後

12  
13 下午 12 時 01 分恢復聆訊

14 出席人士如前。

15  
16 主席：（經傳譯員）黃大律師。

17 黃女士：（經傳譯員）唔該。我哋而家就講違例泊車嘅問題，工會同埋巴士專營公司  
18 就表示呢個問題係影響到巴士車長喇，亦都係有一啲襲擊車長嘅事件，咁有一  
19 啲呢啲事件就係因為違泊而起嘅，咁我哋有睇到一啲例子喇，亦都係一啲相關  
20 嘅電郵喇，亦都係已經有通知咗運輸署嘅。我就唔會就請你睇啲啲文件或者電  
21 郵，但係我就想你睇下一封信，就係警方發出嘅，咁呢個就係講緊最近警方針  
22 對違泊採取啲咩嘢措施，咁呢個就係雜項一文件冊，124-539 頁，呢個就係 18  
23 年 8 月 10 號嘅信件嚟嘅。雜項一文件冊，我想你睇一睇第 5 段，咁呢度就講到  
24 喺 17 年嘅 4 月，起動九龍東辦事處，即係喺發展局底下嘅呢個辦事處，就係建  
25 議就住針對違泊安裝閉路電視進行一個可行性研究同埋一啲同交通擠塞相關嘅  
26 道路罪行，咁為期廿一個月嘅第一階段嘅試驗，即係喺呢一個觀塘工業居卸貨  
27 嘅監察系統就喺 2018 年 1 月係發起嘅。咁你可唔可以解釋一下呢一個嘅試驗計  
28 劃或者概念認證嘅計劃係關於啲咩嘢嘅呢？

29 黃志光先生：The system is down。

30 黃女士：（經傳譯員）或者即係幫一幫你喇，呢個就係第二階段嘅計劃，咁呢個就係  
31 維期二十四個月，起動九龍東辦事處嘅概念認證計劃，就係針對呢個違泊嘅，  
32 就係暫時就喺 2018 年嘅 8 月開始，呢啲項目就係需要政策同埋財務嘅支持，亦

1 都係需要係修訂法例，同埋亦都係要解決即係公眾對私隱嘅擔憂嘅，咁所以需要  
2 要多啲時間係去發展呢一啲複雜嘅計劃。首先我想你睇下會議紀錄，124-564  
3 頁，呢個就係違例泊車概念認證試驗嘅啟動會議，咁出席人士包括係嚟自發展  
4 局、警方、顧問同埋運輸署嘅。咁我個問題就係你可唔可以解釋一下呢個概念  
5 認證點樣可以係即係偵察到違例泊車或者喺巴士站違例停車嘅情況？

6 陳英傑先生：（經傳譯員）當時有出席嘅同事今日唔喺度，咁所以我哋手上就有實質  
7 嘅資料去講呢一個概念認證嘅試驗係做咩嘢嘅。

8 黃女士：（經傳譯員）咁即係換句話講，你哋係無法係解釋多啲呢一個概念認證嘅試  
9 驗係做咩嘢嘅？

10 陳英傑先生：（經傳譯員）我哋有完整嘅資料，即係如果我講一啲嘢，可能會有啲誤  
11 導嘅...

12 主席：（經傳譯員）我明嘅。即係我哋有好多嘅--即係我哋明白嘅，如果你係唔方便  
13 講嘅話。

14 黃女士：（經傳譯員）咁如果係咁，我就會講另一個議題，就係襲擊巴士車長嘅問  
15 題，我哋聽取咗運房局黎以德先生嘅證供，咁根據呢個計劃係會進行一啲公眾  
16 教育喇，去話畀你知應該點樣去對待車長，咁我想你睇番個謄本，就係第一日  
17 第 38 頁嘅，咁日期就係 18 年嘅 5 月 7 號，係喺第 38 頁嘅。咁我想你睇下最  
18 後一段，黎以德先生嘅作供，佢就話「主席，我哋知道巴士公司同埋巴士車長  
19 都係有一啲擔憂嘅，咁我想補充，運輸署署長同埋佢嘅團隊而家就係做緊一份  
20 嘅教育計劃喇，係去教育乘客佢哋應該點樣去--即係佢哋應該有啲咩嘢行為  
21 嘅，同埋如果有任何不滿巴士服務或者任何司機嘅服務不滿，都係有一啲投訴  
22 嘅渠道，咁所以運輸署係已經著手工作㗎喇。」你可唔可以講多啲呢一個教育  
23 計劃，即係就住乘客應有嘅行為？

24 陳英傑先生：（經傳譯員）黃先生會答嘅。

25 黃志光先生：（經傳譯員）主席，我哋有傾過呢個宣傳計劃喇，亦都所有嘅專營巴士  
26 公司亦都係有參與，亦都包括港鐵公司嘅，佢哋遇到嘅問題就係佢哋希望教育  
27 乘客--即係佢哋係希望乘客就係有禮同埋尊重呢個公共交通嘅員工喇，包括係  
28 巴士同埋港鐵，咁我哋準備就係製造短片，就喺社交媒體嗰度係發布，因為我  
29 哋覺得一啲傳統嘅媒界，例如係電視，未必係有效嘅，咁所以我哋係著手咁拍  
30 緊呢段嘅短片，譬如話可能係三十秒喇，每個系列，我哋仍然係做緊嘅。咁但  
31 係個重點我哋係想用一個比較軟性嘅手法去進行宣傳，咁個主題就係我哋--即  
32 係大家應該係更加有禮喇，即係喺用呢個公共交通工具嘅時候，我哋可能會即  
33 係邀請一啲嘅明星係去出鏡嘅。

34 主席：（經傳譯員）即係呢個會面係幾時㗎，即係同呢啲巴士公司同埋港鐵？

35 黃志光先生：（經傳譯員）我記得應該我哋係會面過三次，咁最近一次就係大概一個

1 星期之前，我就唔記得個實際日子。

2 主席：（經傳譯員）第一次係幾時？即係究竟係傾咗幾耐？

3 黃志光先生：（經傳譯員）應該係幾個月之前，不過我要再搵番個實際嘅日期係幾  
4 時。

5 主席：（經傳譯員）唔該晒。

6 黃女士：（經傳譯員）唔該。咁我想講另一個嘅話題，就係關於巴士嘅設計，我有三  
7 個方面想問嘅。首先就係車頭嘅設計，我哋聽取咗道路安全議會嘅證供喇，就  
8 係專營巴士嘅設計同埋建造，佢哋提到嘅一項嘅擔憂就係巴士嘅結構未必係夠  
9 堅固，即係如果係有意外或者事故，車頭嘅部分係好容易係會損毀，可能會令  
10 到喺車頭嗰度嘅乘客受傷嘅，咁我一陣間就會畀一啲相--即係巴士嘅相你睇  
11 嘅，就係佢哋顯示咗喺颱風山竹之後嘅情況。咁我想你睇番喺第七日鄭先生嘅  
12 證供，就係 3A 文件冊，18 年嘅 7 月 16 號，就係喺 56 頁第三行嘅。

13 第 56 頁嘅第七行你就見到佢回應主席嘅問題，即係話「而家喺巴士車頭方  
14 面，有咩嘢方面係唔安全或者係相對唔安全？」咁而鄭先生就話「喺巴士上層  
15 嘅前方，空間係好有限，就係一個好容易會壓爛嘅一個位置，咁而上層前方安  
16 裝安全帶，就可以喺某一啲嘅事故之中可能係有用，例如係巴士係急速剎掣或  
17 者係撞上一個安全欄，或者係同一架細嘅車去碰撞等等，咁但係如果雙層巴士  
18 係同喺前方嘅貨車碰撞或者係撞上橋墩等等，咁上層前方嘅乘客就算有戴安全  
19 帶都會係嚴重受傷嘅，所以我希望請顧博士係去補充。」咁而顧博士就話喺巴  
20 士嘅上層，呢個上層嘅乘客可能會喺胸部係有嚴重嘅受傷，因為就所有嘅主要  
21 嘅器官都喺入面喇，咁包括係腹部同埋盆部，咁而呢啲嘅壓縮性嘅受傷就會係  
22 引起非常之嚴重，甚至係致命嘅內部出血。咁所以鄭先生就講到呢一個上層嘅  
23 前方嘅乘客無論有冇戴安全帶都係好高危嘅。

24 咁我想你睇番鄭先生喺 4 月嘅陳述，呢個就係道路安全議會嘅陳述，就係  
25 雜項二 805 頁嘅，呢個議題就係要求巴士嘅外殼有足夠嘅堅固度，咁先至喺翻  
26 側嘅時候係仍然可以有一個相當嘅空間喺入面嘅，就係喺第 805 頁。

27 講到「分格」呢一段，最後嗰度就係翻側嘅測試，就係需要巴士嘅外殼有  
28 足夠嘅力度喺一個既定嘅空間嗰度，即係萬一佢架車係翻側嘅時候，都係保持  
29 到呢一個嘅空間，咁去保障乘客可以係生還嘅。咁如果係加強巴士外殼前頭個  
30 個嘅結構，你覺得係點？即係考慮到大家有呢一方面嘅表達。

31 陳英傑先生：（經傳譯員）我而家就係會畀岑先生嘅。

32 岑毅安先生：（經傳譯員）我哋冇考慮過呢一樣。

33 黃女士：（經傳譯員）點解？

34 岑毅安先生：（經傳譯員）呢一個 UNECE 第 66 嘅規例就係講到巴士嗰個嘅結構，就

1 係一啲技術上嘅改善，特別係單層巴士嘅啫，係畀單層巴士嘅。

2 黃女士：（經傳譯員）咁我未落去之前，我想畀你睇一啲喺颱風山竹之後嘅一啲拍嘅  
3 照片，就喺 SEC-1，1440，即係東方日報喇、呢一個嘅信報喇，仲有蘋果日報  
4 喇。1442，有啲嘅樹丫就係插爛咗一啲巴士嘅窗門喇，另外 1443 頁有一啲嘅  
5 照片，就係嗰啲嘅——呢架車行駛呢個寶林北道嘅時候，就係畀啲樹枝插咗入去  
6 嘅。1445 頁，右手邊係城巴 682 號，就係被割開㗎。1447 頁，新一巴嘅呢架  
7 巴士嘅車頂係樹塌嘅時候係損壞咗嘅。咁顯示出可能要研究一下喇，即係巴士  
8 嘅車頂同埋車頭嘅部分係咪要加固，你嘅回應係咩嘢，關於呢個建議？

9 岑毅安先生：（經傳譯員）我哋會研究下，睇下有冇一啲嘅改善措施係適用，嚟到係  
10 去改善巴士嘅結構，但係我都要補充，香港所有嘅巴士都係由三間主要嘅巴士  
11 製造廠製造，佢哋確認佢哋巴士嘅結構係根據歐洲嗰個嘅標準，呢個係佢哋提  
12 供畀我哋嘅資料，現時就係咁樣嘅狀況，如果有其他改善嘅地方係適用，譬如  
13 話要加強佢哋嘅結構，嚟到去處理呢啲照片所顯示嗰啲情況，我哋就係會咁樣  
14 睇。

15 主席：（經傳譯員）即係加強就會——要加固就會增加重量，係咪？

16 岑毅安先生：Yes, of course.

17 主席：（經傳譯員）咁即係話會減少咗可以運載嘅乘客數目？

18 岑毅安先生：（經傳譯員）係，所以我哋要有一個平衡㗎，同時間我哋會嚟工作小組  
19 裏面討論呢個問題。新一巴就會全車係加裝安全帶，我哋亦都係考慮喺上層後  
20 加番安全帶。另外，咁呢個亦都會有一個效果，就係加重咗成架巴士嘅重量。  
21 呢啲嘅事項係要同一時間一齊考慮。

22 陳英傑先生：（經傳譯員）主席，我想補充一下，從呢一個運作嘅角度嚟睇，當然，  
23 你睇到呢啲嘅圖片就係一啲垂落嚟嘅樹枝就係損壞咗巴士嘅車頂，但係喺正常  
24 嘅情況，所有嘅巴士路線係有過測試，然後先至開始接載乘客，我唔知道嗰啲  
25 受到損害嘅巴士嘅狀況係點，係咪佢哋擺出去試行，抑或係真係接載緊乘客，  
26 睇到呢啲嘅照片，睇到上層係受到毀壞，唔代表呢啲巴士係唔安全嘅，因為佢  
27 哋其實係唔預期喺呢啲嘅狀況，即係有一啲嘅樹枝低垂落嚟或者係有其他障礙  
28 物嘅時候繼續行車，不過我哋會去研究下呢啲嘅個案，就睇下喺咩嘢情況之下  
29 呢啲巴士會係損壞咗，係咪需要啲咩嘢跟進或者係必須要——係咪加固嗰個車身  
30 嘅。

31 主席：（經傳譯員）咁我嘅理解即係話呢啲嘅巴士全部都係根據歐洲嘅標準嚟到去製  
32 話，你覺得係有啲嘅保證？

33 陳英傑先生：（經傳譯員）係，我可以向你保證，我哋所有嘅香港用嘅巴士都係安全  
34 同埋符合歐洲標準，喺正常嘅情況，佢哋唔會受到咁樣嘅損壞嘅。

35 黃女士：（經傳譯員）第二項嘅設計我想同你去探討下，就係 Weston 先生，我哋嘅

1 專家就建議改善巴士前頭嘅一個設計。喺 9 月 27 號，2018 年，佢嘅作供係我  
2 哋委員會第十八日嘅聆訊。

3 主席：（經傳譯員）第幾頁？

4 黃女士：111，第五行。主席，正話嘅問題，我哋第五行喇，就係講到嗰個技術，  
5 「其中一個就係去改變巴士車頭嗰個嘅設計，呢個就係會改變咗佢嗰個箱形嘅  
6 設計，就係要有一啲弧度，咁嗰個喺巴士前面，如果喺撞車嘅時候，佢就唔會  
7 係入咗去嗰個空隙嗰度，而係就去咗側邊嘅，係咪？」

8 「咁即係話巴士安全標準嗰度可能就係要有呢個措施嘅，下個月就會提  
9 出，就係將巴士前面嗰個設計係軟性啲。唔係話整軟佢，而係話係多啲嘅弧  
10 度，可以睇下車頭嗰個嘅水撥，同埋睇下嗰個嘅乘客如果係畀巴士撞到嘅時  
11 候，佢哋會可能有啲咩嘢嘅損害，咁我相信巴士前面嗰個嘅設計就係好啲嘅。  
12 如個乘客畀一架慢駛嘅巴士撞到，佢哋就係畀車頭撞咗落去--拋出去路--去側  
13 邊嘅，但係如果嗰個巴士嗰個嘅設計可能係會令到嗰個嘅傷害更大嘅，咁所以  
14 就個前面嘅設計就會--萬一有撞車嘅時候，就對於路人係會好啲。咁即係我諗  
15 呢個係關乎設計嘅問題，就唔係話好關乎嗰個嘅製作成本。咁譬如話 Dennis  
16 車廠同埋 Wrights，佢哋就係供應車畀英國同埋香港，咁佢哋亦都可以係用呢  
17 啲嘅巴士係賣畀其他嘅市場。咁我覺得呢個係一個好嘅例子嘅，我哋可以睇下  
18 其他嘅市場係有啲咩嘢良好嘅做法我哋可以跟從。」

19 即係話係一啲新嘅巴士安全標準計劃喺倫敦，佢哋就大概將巴士最前方嗰  
20 個設計多啲弧度嘅，呢一度運輸署有冇考慮過呢個設計？

21 岑毅安先生：（經傳譯員）我哋會考慮呢一個議程，呢個嘅項目。

22 主席：（經傳譯員）即係你以前就有考慮過呢點，將來你會？

23 岑毅安先生：（經傳譯員）係，我哋會喺未來就係同 Dennis 同埋 Wrights 呢間車  
24 廠係去傾下，可唔可以試下有咁樣嘅設計。

25 主席：（經傳譯員）好。

26 黃女士：（經傳譯員）第三點想同你探討下嘅，就係 12.8 米長嘅巴士號型。呢個巴  
27 聯會就係表達仲有其他嘅工會代表都表達過，話呢一類長度嘅巴士，即係 12.8  
28 米長度嘅後輪嘅呢啲嘅巴士，佢哋去運作嘅時候有啲困難，咁佢哋就係話想係  
29 參與呢一個巴士嘅測試，佢哋喺嗰個作供嘅時候，咁運輸署點？

30 岑毅安先生：（經傳譯員）咁 12.8 米呢一個就係後軸嘅扭軚，嗰個嘅設計係符合呢  
31 個國際安全標準嘅，而家運輸署有一個兩層嘅制度，呢一類嘅設計即係話嗰個  
32 巴士嘅長度係 12.8 米，而且係喺後軸嗰度嚟到係去--嗰個軚嘅呢，咁第一層  
33 就係要首先批咗呢一個嘅類型，咁就係嗰個過程。第二就係去批准嗰啲嘅路線  
34 喇。至於嗰個嘅車種嘅審批過程，我哋就會睇下呢個設計係咪符合呢個國際標  
35 準，而第二個就係嗰個路線嘅審批過程，我哋就會同專營巴士公司同埋警方係

1 有一次嘅路試嘅，去試下呢啲 12.8 米嘅，去睇下佢係咪適合嚟到行駛現有嘅路  
2 線，現有嘅路線係咪適合用呢一種嘅車種嘅。咁要視乎呢一個路線測試嘅結果  
3 喇，我哋可能會施加某啲嘅限制嘅，當通過使用呢一類型嘅巴士嘅時候。

4 主席：（經傳譯員）咁即係簡單嚟講，首先就係要係審准咗呢個車種先，咁如果批准  
5 咗之後就要係去批咁條路線？

6 岑毅安先生：（經傳譯員）係，專營巴士公司亦都需要為巴士嘅車長提供訓練嘅，咁  
7 樣嘅車長先至知道係點樣係揸呢啲 12.8 米長嘅巴士嘅。

8 主席：（經傳譯員）邊度有講話有呢一項要求？

9 李美鳳女士：（經傳譯員）主席，喺呢啲新巴士嘅型號，所有嘅專營巴士公司係必須  
10 為所有嘅車長提供實路嘅培訓喇，咁佢哋必須喺車長揸呢啲新嘅巴士型號之前  
11 係要接受培訓嘅。

12 主席：（經傳譯員）我嘅問題係邊度有寫？

13 李美鳳女士：（經傳譯員）喺嗰個實務守則入面嘅。

14 主席：（經傳譯員）唔該晒。首先，有冇秘書處嘅同事去過嚟幫一幫我即係呢一個嘅  
15 --即係呢個字幕嘅系統，因為好似唔係好用得到而家，請稍等。好，可以繼續  
16 喇。

17 黃女士：（經傳譯員）我想講下一個話題，就係車速限制嘅，我知道運輸署長唔喺  
18 度...

19 主席：（經傳譯員）咁聽講佢就嚟會嚟到喇，咁但係就唔知會真係幾多點到。或者我  
20 哋稍為休息兩至三分鐘係等佢嚟喇。

21  
22 下午 12 時 32 分聆訊押後

23  
24 下午 12 時 38 分恢復聆訊

25 出席人士： 陳美寶女士，運輸署署長（運輸署）

26 陳英傑先生，副署長／公共運輸事務及管理（署理）（運輸署）

27 黃志光先生，助理署長／巴士及鐵路（運輸署）

28 謝善怡女士，首席運輸主任／巴士及鐵路 1（運輸署）

29 邱國鼎先生，總工程師／道路安全及標準研究（運輸署）

1 岑毅安先生，總機電工程師／車輛安全及標準（運輸署）

2 李美鳳女士，總運輸主任／特別職務（運輸署）

3

4 主席：（經傳譯員）你好，署長，咁我哋而家就繼續即係畀黃大律師發問嘅。

5 黃女士：（經傳譯員）我就會同你講兩個議題，第一就係車速限制，第二就係呢一個  
6 概念認識嘅測試嘅。首先係車速限制，我哋講到政府係點樣看待呢一個車速限  
7 制，就係根據運輸署嘅交通規劃與設計手冊嘅，咁然後你作供嘅時候指，你係  
8 會定期係更新呢一個車速限制嘅結構，即係喺呢個手冊入面嘅車速限制就根據  
9 外國嘅經驗嘅。咁我第一個問題就係即係喺呢一個車速結構方面，運輸署有冇  
10 進行任何嘅顧問研究或者係調查，即係就住外國嘅經驗，即係呢一個車速限制  
11 嘅結構？

12 陳美寶女士：（經傳譯員）我就會請邱國鼎先生係去回答嘅。

13 邱國鼎先生：（經傳譯員）主席，我哋有做任何嘅顧問研究係去檢討呢一個三級制嘅  
14 車速限制嘅。

15 黃女士：（經傳譯員）有冇進行過任何研究，除咗呢一個可行性研究或者係呢一個低  
16 車速區域嘅研究之外？

17 邱國鼎先生：（經傳譯員）即係最上一次就係...

18 主席：（經傳譯員）你可唔可以對正個咪講嘢？你唔需要講得咁怕醜，如果唔係我哋  
19 就聽唔到。

20 邱國鼎先生：（經傳譯員）咁最後一個就係由交通研究實驗室，就喺 1999 年做嘅，  
21 就係呢一個速度限制檢討嘅程序。

22 黃女士：（經傳譯員）你知唔知道倫敦係進行過一項嘅研究，即係就住呢一個車速結  
23 構嘅限制，就係喺 2013 年 1 月做嘅，咁當佢哋制訂車速嘅時候，咁呢個就係倫  
24 敦運輸局嘅文件度有提到，你知唔知道？

25 主席：（經傳譯員）呢個係倫敦運輸局定係運輸署？

26 黃女士：（經傳譯員）呢個係英國嘅運輸部嘅。

27 主席：（經傳譯員）呢個就係最新版本嘅文件，係咪？

28 黃女士：（經傳譯員）Yes.

29 主席：（經傳譯員）佢哋係叫做指引嚟嘅，呢個就係政府制訂唔同車速嘅程序，你清  
30 唔清楚英國呢一啲嘅程序？

31 邱國鼎先生：（經傳譯員）多謝，主席，我哋知道運輸部嘅呢個文件，但係我哋就有

1 詳細去睇呢一份嘅通告嘅。

2 主席：（經傳譯員）或者我哋顯示嗰份文件，好唔好？你可唔可以畀個頁數我哋？

3 黃女士：（經傳譯員）SEC-3 文件冊，1003 頁嘅。

4 主席：（經傳譯員）喺市區車速管理，你知唔知道有呢一個時速 20 英里嘅車速限  
5 制，你知唔知道？

6 邱國鼎先生：（經傳譯員）我哋知道有呢個 20 英里嘅車速限制，咁所以喺我哋嘅供  
7 詞入面，我哋講到係試驗呢一個低車速區。

8 主席：（經傳譯員）呢個就係你嘅回應，係咪？你講到係 Islington 嘅，係咪？咁  
9 佢呢個係一個--即係一個例外嘅情況嚟嘅，係咪？

10 邱國鼎先生：（經傳譯員）我哋知道係採納咗 20 英里車速，之後--即係  
11 Islington 嗰個--即係實際嘅車速就只係下降咗 1 英里。

12 主席：（經傳譯員）咁當然喇，個歷史就係咁樣，咁但係我就會留番畀黃大律師去同  
13 你再跟進呢個問題，咁但係我係想聽下你係咪--即係我哋嗰個標準就係呢度？

14 黃女士：（經傳譯員）我想你睇下一份文件，跟住我就想你睇下一份道路安全議會  
15 嘅一份倡議安全街道嘅文件，咁然後想睇下運輸署會唔會係考慮去檢討或者更  
16 新嗰個三層制嘅車速限制，我想你睇下 SEC-3 文件冊嘅 1003 頁。或者我想你  
17 睇下 1005 頁，就係一個嘅簡介，同埋有一啲重點。我想問，你同唔同意呢一啲  
18 嘅原則嘅，咁喺重點入面嘅最後一段就講到運輸當局係被要求係要根據外在嘅  
19 情況係去檢討車速限制，同埋考慮係引入多啲時速 20 英里嘅限制同埋區嘅，咁  
20 同埋喺呢一啲嘅市區同埋一啲已經發展嘅鄉郊街道就係一啲主要係住宅區，咁  
21 就可以令到行人同埋其他嘅人更加安全喇。原則上，你同唔同意呢個睇法，就  
22 係話運輸當局應該因為情況嘅改變，係不時咁樣去檢討時速限制嘅？

23 邱國鼎先生：（經傳譯員）係，同意。

24 黃女士：（經傳譯員）第二點就係話去引入呢個多啲時速 20 英里嘅時速限制嘅區  
25 域，咁呢個就係有少少似稍後嗰個嘅可行--是否適合步行同埋一啲低速嘅區  
26 域，咁你可唔可以話畀我聽，係咪只係關乎一啲市區嘅路線或者係市區？

27 邱國鼎先生：（經傳譯員）係，好似喺呢一段度講喇，點解要去定一啲嘅低速嘅限制  
28 嘅區域，呢個係會增加整體嘅道路安全喇，而主要嗰個目標就係改善行人嘅安  
29 全，因為好多嘅研究都係顯示如果嗰個嘅時速限制係低啲嘅，嗰個嘅死亡率係  
30 會可以百分百咁樣減低--意外率就可以減低百分百。咁點解就係話喺市區裏面  
31 係建議一啲時速比較低嘅地方，就多行人嘅同埋係保障一啲容易受影響嘅道路  
32 使用者，好似係電單車或者係騎單車嘅人士。

33 黃女士：（經傳譯員）呢個研究就係做緊一個低速路段嘅，呢一個研究係咪相關嘅  
34 呢？

1 邱國鼎先生：（經傳譯員）係，呢個主要嘅目標就係喺呢一個鼓勵多步行呢個研究裏  
2 面係關乎行人嘅安全嘅，咁我哋亦都會係睇埋不論係市區或者係鄉郊地區都係  
3 包括埋嘅。

4 黃女士：（經傳譯員）哦，兩個，咁喺呢一個研究包括幾多個區或者幾多個路段？

5 邱國鼎先生：（經傳譯員）我哋係研究嗰啲嘅原則同埋嗰啲嘅標準，不同嘅交通工具  
6 同埋行人設施嘅不同水平、標準，咁我哋就唔係限話--呢個研究唔係特定限喺  
7 邊一個嘅區域嘅。

8 黃女士：（經傳譯員）咁或者去到呢一份文件嘅一啲原則，睇下你同唔同意喇，咁我  
9 哋 1012 頁，第 27 段，係呢一個原則呢一方面，「呢個時速限制管理呢個政策  
10 嘅目標應該係要有一個安全嘅分布嘅時速，咁你就係話有一個平均嘅速度，係  
11 要適合呢一個路面嘅情況，咁亦--所有嘅車輛就係要低於呢一個--嗰個嘅時速  
12 限制，咁考慮到交通嘅狀況。」即係話呢個平均同埋八十五--百分--嗰個嘅係  
13 咪一樣意思㗎？

14 邱國鼎先生：（經傳譯員）咁呢一個平均時速，即係話五成嘅車速都係高過呢一個平  
15 均時速，咁呢個就係同呢個八十五--同八十五分嗰個嘅時速係唔同嘅，即係話  
16 只係得百分之十五嘅車輛係會高過呢個八十五百分嗰個嘅時速。

17 黃女士：（經傳譯員）咁用呢一個嘅平均時速，咁運輸署就話到底同用而家嗰個八十  
18 五分呢一個咁樣嘅時速有咩嘢分別？

19 邱國鼎先生：（經傳譯員）我就唔覺得呢度係用平均時速嚟到去做佢個研究，因為  
20 呢一段就我覺得唔係好清晰佢哋到或者係用邊一個嘅水平。

21 黃女士：（經傳譯員）邱先生，為咗我哋而家呢一個嘅答案，我哋就係講緊嗰個平均  
22 嘅時速喇，即係運輸署所用嘅，運輸署呢方面嘅睇法係點嘅呢？

23 邱國鼎先生：（經傳譯員）其實大部分嘅管轄區都係用八十五百分位嚟到係做㗎，個  
24 延伸--咁如果你用嗰個平均時速，咁即係話有一半嘅車輛都係用嗰個嘅速度向  
25 前。

26 主席：（經傳譯員）咁你係咪想--如果你係想施加一個嘅時速限制，即係話大部分嘅  
27 司機都係覺得呢個係車輛行駛呢條道路嘅應有嘅時速，咁即係有百分之十五佢  
28 哋就係唔守呢個規則，係咪咁？

29 邱國鼎先生：（經傳譯員）係，因為嗰個嘅實際時速係我哋其中一個考慮。呢個考慮  
30 即係個意外率，即係話如果大部分嘅車輛都係用呢個嘅速度行駛，而意外率又  
31 低，咁就即係話用呢個車速嚟到行駛就係安全喇，咁我哋就會用嗰個做我哋嘅  
32 時速限制喇。

33 黃女士：（經傳譯員）我哋稍後就會係去再講呢個題目嘅，第 30 段就係有好幾個嘅  
34 重要嘅因素去考慮嚟到定出合適嘅時速限制嘅，咁包括係碰撞嘅歷史喇、嗰個

1 道路嘅幾何同埋工程狀況、道路嘅功能、不同嘅道路使用者嘅組成、現時嘅交  
2 通速度同埋道路嘅環境等等嘅。運輸署會唔會都係同意用呢啲重要嘅因素嚟到  
3 考慮一條路嘅時速限制？

4 邱國鼎先生：（經傳譯員）同意嘅，我同意嘅，咁我哋其實嘅考慮點都同呢度所提出  
5 嘅類似喇。

6 黃女士：（經傳譯員）第 31 段就話係一個嘅成本效益分析，係未施加或者係改變一  
7 個地方嘅車速限制嘅時候，運輸當局就係必須要確信嗰啲預期嘅得益係超過成  
8 本嘅，大部分嘅成本同埋得益都唔係話有一個數值、一個銀碼咁樣嘅，但係應  
9 該運輸當局會考慮以下嘅因素，譬如碰撞同埋傷亡方面嘅節省喇、情況同埋一  
10 啲設施、對一啲比較容易受影響嘅道路使用者、咁對於步行同埋踩單車同埋其  
11 他嘅運輸方式嘅影響喇、運輸交通所——嗰個行車時間、環境、社會同埋生活質  
12 素嘅影響，另外成本，包括係嗰個嘅工程同埋其他一啲措施嘅，譬如有交通燈  
13 號、維修等等嗰個影響嘅，咁係咪運輸署都同此呢一個嘅成本效益分析？

14 邱國鼎先生：（經傳譯員）係，我覺得大部分都係嘅，我覺得呢度好有趣，佢就係提  
15 出咗成本同埋效益嗰個分析喇，咁成本係會包括埋節省嘅時間、個車輛嘅運作  
16 成本同埋二氧化碳排放、行車時間係咪可靠等等，我覺得呢啲嘅因素如果我哋  
17 係做呢個成本效益分析嘅時候係好有用㗎，我哋對於呢啲嘅建議都係好有興趣，  
18 我哋會進一步去研究，睇下我哋可唔可以改善我哋現有嘅系統嘅、現有嘅  
19 制度。

20 黃女士：（經傳譯員）喺而家呢個研究就已經係有考慮呢啲因素，抑或你會喺將來嘅  
21 研究先至係會包含呢啲嘅概念？

22 邱國鼎先生：（經傳譯員）我諗而家我哋就有呢個成本效益嘅分析喇，好似喺呢一個  
23 文章建議咁，但係我哋都相當感興趣我哋會再詳細研究下㗎。

24 黃女士：（經傳譯員）咁我哋而家睇下所建議嘅不同嘅時速限制。睇下第 1020 頁第  
25 5 段，嗰度亦都係有一個時速限制嘅評估，一個評核。第 66 段我想你睇下，佢  
26 話呢一個嘅時速限制嘅評估係提供一個工具幫助運輸當局去做一啲以實際為正  
27 嘅研究，嚟到去決定應該係定出咩嘅時速限制嘅，咁呢度有三個嘅因素佢哋  
28 搵到㗎，咁係 66 段，首先就係嗰個預計嘅平均同埋係八十五百分位車速，咁另  
29 外就係預測對於譬如行車時間，不論係個人或者係商業車輛嗰個嘅影響喇，咁  
30 另外就係 20、30、40、50、60 同埋係一啲雙程嘅行車路 70 嘅嗰啲不同嘅限  
31 制，不同嘅車速時限會帶嚟咩嘅轉變。咁運輸署會唔會都係採納呢一度嘅車  
32 速限制評核嘅工具？

33 邱國鼎先生：（經傳譯員）我哋都係對佢相當感興趣嘅，其實呢一個嘅工具可以預測  
34 到平均同埋八十五百分位嘅車速，咁同埋嗰個嘅車速限制嘅改變，同埋係預測  
35 埋嗰個行車時間，咁而家我哋嘅制度就係有做到呢一方面嘅預測，我哋都係相  
36 當感興趣，係會詳細啲研究㗎。

1 黃女士：（經傳譯員）或者睇多一段，就係倡議要有不同嘅時速限制嘅地區同埋睇一  
2 睇係 1025 頁，第 89 段，第 89 段就係話呢啲限咗時速係 20 英里嘅區域係係預  
3 防碰撞同埋傷亡方面係好有效嘅，喺 1996 年嘅研究就話佢可以大大咁樣減低呢  
4 啲嘅傷亡，咁跟住喺市區大致上都--不論係市中心或者係住宅區，都係用呢個  
5 20 英里嘅時速限制區嘅，喺學校附近都係咁，喺舖頭、商舖、街市、遊樂場同  
6 埋係多行人同埋單車流量，都係應該用嘅，但係如果嗰條路主要係要嚟被行車  
7 作為主要嘅功能，就唔應該用呢一個嘅時速限制嘅。咁佢哋係睇個嘅區域、  
8 個嘅用途，睇下佢係咪住宅㗎喇，抑或係好多嘅商舖，會好多人行嘅，佢用  
9 呢一個做基礎。你同唔同意呢一個嘅概念？

10 邱國鼎先生：（經傳譯員）我哋都同意嘅，我哋都話一啲低速嘅限制區其實主要係要  
11 促進行人安全，所以喺呢一段佢哋就話喺一啲好多行人嘅地方，譬如學校、住  
12 宅區，嗰啲行人就好多時會喺行人路或者甚至喺路面度行，咁就係用呢啲低速  
13 嘅限制喇。

14 黃女士：（經傳譯員）咁就住呢個 20 里嘅車速區，我哋睇第 95 同埋 96 頁，第 95  
15 頁就話就住呢啲 20 英里車速區嘅研究就表示佢只係能夠輕微咁樣降低呢個車  
16 速，咁而所以一啲 20 英里嘅車速限制就只係喺一啲車速已經低嘅地區先係有用  
17 嘅啫。咁而一段就講到呢啲樸茨茅夫大部分街道嘅 20 英里車速限制就顯示到係  
18 可以喺有一啲發展咗嘅地區係引入呢啲 20 里嘅車速限制都係可行嘅。咁而一啲  
19 初步嘅證據就顯示有一啲嘅車速或者--可以降低一啲車速同埋一啲意外率，咁  
20 而呢啲同埋早期嘅一啲研究係脗合嘅，咁而嗰啲研究就話呢啲嘅車速限制係可  
21 以平均係將車速降低 1 里。咁你認為呢一啲嘅 20 里嘅車速限制可唔可以喺一啲  
22 即係已經發展嘅區或者已經係車速低嘅地方嗰度用？我係講緊呢一啲實際車速  
23 已經低嘅地區。

24 邱國鼎先生：（經傳譯員）我哋同意嘅。呢兩段講到兩點，第一就係對交通嘅影響，  
25 究竟呢啲低車速區係可唔可以成功地實施，咁有一啲嘅駕駛者可能有唔同嘅睇  
26 法喇，即係如果你定一個低車速嘅區，咁所以我哋考慮嘅重點就係減低對交通  
27 嘅影響，咁以市區嚟講，呢個平均嘅實際車速係必須要低嘅。咁即係我哋再進  
28 一步係降低車速係唔會影響交通嘅。咁透過呢啲措施，我哋可以即係減少呢一  
29 個車速嘅波幅，咁即係話加速同埋減速嘅幅度都會係少咗。咁第二點就係設立  
30 呢一個低車速區，係需要一啲緩和交通嘅措施嚟嘅，咁呢個實際車速就會慢一  
31 啲喇。

32 黃女士：（經傳譯員）係，主席。

33 主席：（經傳譯員）好。我哋今朝就遲咗開始，即係我哋嘅午飯時段即係就會縮短一  
34 啲，咁我哋兩點十五分就返嚟，大家同唔同意？咁我哋兩點十五分返嚟。

36 下午 1 時 03 分聆訊押後

下午 2 時 15 分恢復聆訊

出席人士： Hon Mr Justice Michael Lunn（倫明高），香港專營巴士服務獨立檢討委員會主席

歐陽伯權先生，香港專營巴士服務獨立檢討委員會委員

羅康錦教授，香港專營巴士服務獨立檢討委員會委員

陳政龍大律師及黃佩琪大律師，由高露雲律師行委聘，代表香港專營巴士服務獨立檢討委員會

陳美寶女士，運輸署署長（運輸署代表）

陳英傑先生，副署長／公共運輸事務及管理（署理）（運輸署代表）

黃志光先生，助理署長／巴士及鐵路（運輸署代表）

謝善怡女士，首席運輸主任／巴士及鐵路 1（運輸署代表）

邱國鼎先生，總工程師／道路安全及標準研究（運輸署代表）

岑毅安先生，總機電工程師／車輛安全及標準（運輸署代表）

李美鳳女士，總運輸主任／特別職務（運輸署代表）

主席：（經傳譯員）午安。黃律師。

黃女士：（經傳譯員）或者我哋可以完成呢份文件先，就關於係一啲低速嘅車速限制區嘅，我哋就講緊係完成咗嗰個嘅 20 英里時速嘅車速限制，但係去繼續講番呢樣嘢就係 1028 頁第 108 段，就係 30 英里時速就係喺市區嘅車速限制嘅標準嘅嘅，而 40 英里就係如果合適嘅時候都可以用嘅，同埋喺啲例外情況都可以用到 50 嘅，可以考慮 50 英里嘅。

亦都有講到就係話喺 40 英里時速嘅道路通常都係喺市郊嘅比較高質素嘅道路，嗰啲通常係喺市區以外嘅周邊地方，而 50 英里嘅時速，即係喺第 110 段嗰度就係係高啲質素嘅路段。

主席：（經傳譯員）呢度講緊係英里，唔係公里，係咪？

黃女士：（經傳譯員）冇錯嘅，英里，50 英里呢個時速限制就可以喺高啲質素嘅道路度使用嘅，只要嗰啲道路附近係冇路邊嘅發展，而跟住有個表就顯示唔同嘅——以英里計算嘅時速嘅限制同埋幾時——係用乜嘢限制。換句話講，佢哋係有唔同嘅時速嘅限制、唔同嘅目的，同埋睇下嗰個地帶有冇乜嘢發展，先至去決定應

1 該用邊一個車速限制嘅。喺呢件事，我就想問下運輸署有冇考慮過檢視呢份文  
2 件，考慮下喺第表 1 嘅呢個嘅呢啲嘅車速限制對香港係適唔適用呢？

3 邱國鼎先生：（經傳譯員）唔該晒主席，我睇到表 1 嗰度，30 英里即係時速 48 公  
4 里，40 就即係 64 公里，50 英里就係 80 公里，我諗我哋而家嘅車速限制嘅架  
5 構同呢一個都係類似嘅，除咗係一個叫做低速嘅地區，我哋而家就睇下一個研  
6 究，可唔可以引入一啲係以試行嘅形式去做一啲低車速限制區域嘅，亦都可以  
7 考慮喺我哋而家嘅車速限制嘅架構入面加上呢個低速嘅區域嘅。

8 黃女士：（經傳譯員）邱先生，而家想你睇番你自己嗰份文件，就係關於係呢一個嘅  
9 道路安全審核，同埋一個研究係關於係低車速嘅限制區嘅，呢個就係你喺 2018  
10 年嘅 10 月 18 號提交嘅書面意見嘅，呢個就係 1817 頁嘅，而家請你睇第 15  
11 段，係第 1820 頁。

12 呢一段提到有兩件事我想同你跟進番嘅，第一，就係喺第四行開始，你就  
13 話「據觀察所得，有一啲嘅城市如果就咁係引入一個低車速嘅地區，係唔能夠  
14 自動去確定車速係真係會減低，又或者相應地個整體意外率係會減低嘅。」

15 我想首先畀你睇番兩份文件，最近喺 2018 年 5 月提交嘅，就係提到如果  
16 平均車速減低係 1 英里都好，喺市區主要道路，已經係可以減低百分之六嘅意  
17 外率㗎喇，嗰度會有好多住宅區，亦都係比較低速嘅車速嘅限制嘅。

18 而家請你睇番兩份文件，而家唔係文件冊嗰度嘅，第一，就係一位叫做 Mr  
19 Rod King 先生寫嘅文章，日期就係 2018 年 5 月 23 號，我而家可以派發畀大  
20 家。呢份文件 2018 年嘅 5 月 23 號，個標題就係話如果係減速由 30 英里至到  
21 20 英里時速嘅話，基本上都會導致到係傷亡嘅比率減低百分之二十嘅。

22 然後佢提到就係話「佢係同意外受傷率有關嘅，因為如果減低 1 英里嘅車  
23 速嘅話，意外率就係可以減低百分之六嘅，嗰啲路段就係喺市區有啲住宅區嘅  
24 地方。」

25 然後就有一個研究，如果你睇番第 2.2 段嘅話，呢個就講緊話係喺 2018  
26 年年初嘅最新近嘅研究，就話「有三個新嘅研究，就協助我哋可以更加了解 20  
27 英里時速對於傷亡率嘅影響。」一個就係喺西敏寺大學做嘅，一個就係西英格  
28 蘭大學做嘅。

29 然後就話「喺英約郡嘅一個叫 Calderdale 嘅地方引入 20 英里嘅時速限  
30 制，喺過去三年減低咗百分之三十嘅傷亡率，後來就係顯示百分之四十嘅下降  
31 嘅。」

32 而喺個車速嘅平均數減低 1.9 嘅英里，就係喺某啲地區就有一啲變化嘅，  
33 但係整體嚟講，就係攞咗三百五十萬次嘅讀數。整體嚟講，就係話如果喺人口  
34 密集嘅地區減低車速嘅限制去到 20 英里嘅話，就會令到傷亡率係減低超過百分  
35 之四十嘅，而喺人口密集地方或者唔係主要幹道，如果車速限制係由 30 英里減

1 到 20 英里嘅話，基本上就喺呢個傷亡率方面平均可以減百分之二十嘅。」

2 另一方面，我哋喺 2018 年 5 月 25 號嘅一份文件，就係話一個全球嘅共  
3 識，就係最佳做法應該係 20 英里嘅，而呢個機構就提到一啲機構，包括世界衛  
4 生組織、歐盟、iRAP 同埋係道路安全全球網絡同埋經合組織，都係建議低車速  
5 嘅車速限制嘅，就係應該係少過 30 嘅時速，即係 30 公里嘅。

6 如果我哋揭去後面嗰一頁，都見到係英國一啲研究，我哋而家可以揭去後  
7 一頁，第三段，頁數第 2 頁頂部，我哋見到第 3 段，佢就話「雖然英國起步較  
8 遲，喺過去六年超過百分之二十五嘅人口，喺佢哋住、工作、購物同埋學習嘅  
9 地方嘅街道上已係車速增加咗 20 英里嘅，而我哋大部分城市都係有 20 英里嘅  
10 車速，而倫敦嘅，百分之四十三人住嘅道路上係時速限制係 20 英里，而百分之  
11 七十五就住喺倫敦中心嘅，就算有一啲嘅文件所講嘅地點都係講緊話係 20 英  
12 里嘅時速嘅。而傷亡率方面就可以見到係減低咗超過百分之二十嘅。」

13 所以我哋就見到係倫敦嘅運輸局亦都喺 2015 年 10 月發表咗一份文件，就  
14 係話安全倫敦，亦都係話如果車速限制越低嘅話，傷亡率亦都會減低。

15 主席：（經傳譯員）我哋係咪會睇呢份文件，係嘅。

16 黃女士：（經傳譯員）係嘅，呢個會係雜項文件冊第 984 頁。

17 主席：（經傳譯員）邊份雜項文件？

18 黃女士：（經傳譯員）雜項文件冊第 3 第 984 頁，係 982 頁開始嘅呢份文件。請睇  
19 987 頁，987 頁頂嗰度見到「喺車速減低 1 英里嘅話，係可以喺市區減低碰撞  
20 嘅頻率達到百分之六嘅。」第一段，「車速就係喺好多嚴重同埋導致傷亡嘅碰  
21 撞入面嘅一個因素嚟嘅。」根據呢啲文件，邱先生，似乎運輸署嘅講法...

22 主席：（經傳譯員）等等。你問問題之前要等等。我哋 987 頁嗰度見到係話「20 英  
23 里時速試行」，我哋就見到 2015 年就係話「喺首都嘅道路嘅百分之二十五都已  
24 經係實施咗 20 英里嘅車速限制，你頭先提到一啲嘅統計數字，就係話喺百分之  
25 四十三嘅倫敦人口都係住喺一啲道路上，係有 20 英里嘅時速限制嘅」，呢一方  
26 面嘅數字有冇更加更新嘅數字呢？有冇新啲嘅資料呢？譬如話係倫敦運輸局  
27 嘅，佢嘅文件就提到有幾多道路，可能佢哋喺市區嘅人口密集程度係有唔同，  
28 但係對於最新近嘅數字，譬如話係有幾多百分比嘅道路喺倫敦係實施咗 20 英里  
29 嘅時速限制呢？

30 黃女士：（經傳譯員）主席，我要查下再回答呢個問題，但係我哋亦都聽過 Mike  
31 Weston 先生嘅證供，佢作證時就係出示咗一幅圖，有好多倫敦市內嘅地方已經  
32 將車速限制改做 20 英里。

33 主席：（經傳譯員）呢個就係數碼嘅地圖，係倫敦嘅，佢就用個顏色顯示嘅？

34 黃女士：（經傳譯員）係呀。

1 主席：（經傳譯員）我哋可唔可以去打呢一個嘅地圖出嚟喺個螢幕度呢？

2 黃女士：Yes.

3 主席：（經傳譯員）每小時 20 英里係應該綠色顯示，係咪呀？

4 黃女士：（經傳譯員）呢個應該係雜項文件冊 1226 頁嘅，我哋可以睇到呢個地圖有  
5 唔同嘅顏色顯示唔同嘅車速限制，有五個時速限制，綠色就係 20 英里，藍色係  
6 30，粉紅 40，淺咖啡色 50，然後紫色係 70 嘅。你睇到中間嘅部分其實好多嘅  
7 道路都係有 20 英里嘅時速限制，睇唔睇到呀？邱先生，睇唔睇到？

8 邱國鼎先生：（經傳譯員）睇到。

9 黃女士：（經傳譯員）Weston 先生嘅證供就係...

10 主席：（經傳譯員）你呢個文件喺邊度嚟㗎？

11 黃女士：（經傳譯員）係一個願景 2.0 嘅規劃，就係由倫敦市長 2018 年 7 月嘅時  
12 候發表嘅，佢就 1207 頁開始嘅，呢個文件。

13 陳先生就幫咗我哋手，我哋就搵咗一啲數據，就係 1223 頁嘅，喺第 3.2  
14 嘅部分，就係喺倫敦一個新嘅方法去減速，第一個段就話「倫敦就已經係採取  
15 行動就係去減低個車速，大致上係倫敦三分之一嘅道路而家就係 20 個英里嘅時  
16 速限制，其他嘅--其餘啲嘢大部分都係 30 英里，係一個成個國家嘅標準，然後  
17 其他啲嘢就大概係 40、50 同埋 70 英里嘅限制。」呢個係最新嘅數據。

18 主席：（經傳譯員）喺 1226 頁，就係你頭先地圖展示啲頁，我發現喺第圖 10 嘅旁  
19 邊就寫話「TLRN 嘅建議嘅時速」就係--我懷疑就係倫敦運輸局道路網絡。但係  
20 實際上啲個時速限制係點樣？因為呢個就唔係一個數碼嘅地圖嚟嘅。

21 黃女士：（經傳譯員）或者我哋睇睇 1225 頁嘅圖 9，呢個就係目前嘅車速限制。

22 主席：（經傳譯員）我哋落實啲嘢嘅建議係咩嘢日期呢？

23 黃女士：（經傳譯員）我哋就搵到唯一一個嘅日子就係 1223 頁嘅，右下角，「TfL  
24 就會係落實減速嘅建議，就係倫敦運輸局道路網絡嘅情況，我哋會確保喺倫敦  
25 中心嘅所有嘅道路就係 20 英里限制就係 2020 年 5 月之前會實施。亦都係其他  
26 嘅地點亦都會採取方法去減速嘅，尤其是係解決呢一個嘅道路上面危險嘅情  
27 況，就會係直至到 2024 年就會係實施呢啲嘅建議。」

28 主席：（經傳譯員）唔該晒。

29 黃女士：（經傳譯員）我哋睇番運輸署嘅文件，附件 2 第 15 段，有個評論或者觀  
30 察，就係話「如果純粹係施加低速嘅限制就唔能夠自動確保啲個整體嘅意外率  
31 係會相應地減低」，似乎我頭先所講嘅文件就推翻咗呢個評論或者觀察，你會  
32 唔會接受呢個講法呢？

1 邱國鼎先生：（經傳譯員）喺呢一個段落，我哋想指出嘅就係純粹係施加呢一個低車  
2 速限制區而有改變嗰個道路嘅設計，個情況未必係咁理想嘅，正正係咁，因為  
3 我哋就係要研究下低車速限制區，睇下可唔可以同佢--同其他一啲道路設計嘅  
4 改變一齊做，致使到呢一個嘅限制區個帶嚟嘅影響或者個結果會更加好，我哋  
5 而家係進行緊嘅。

6 主席：（經傳譯員）低車速限制區就會係同呢一個減低嘅車輛擠塞嘅措施一齊推行  
7 嘅，係咪㗎？呢個係咪倫敦個方法呀？

8 邱國鼎先生：（經傳譯員）我哋...

9 主席：（經傳譯員）你可唔可以首先回答呢個問題，然後你先至去話畀我哋聽邊一啲  
10 嘅材料？呢個係咪就係倫敦所採取嘅方法呢？

11 邱國鼎先生：（經傳譯員）喺唔同地方嘅試驗計劃都有咁樣嘅結果。

12 主席：（經傳譯員）你哋施加車速限制嘅時候，你同時間亦都會有啲嘅緩行嘅措施，  
13 亦都係睇睇行人嘅個密度，你就會係--其實就會施加低車速限制區同埋緩行  
14 嘅措施，所以就會係--呢個係個方法，係咪呀？

15 邱國鼎先生：（經傳譯員）我哋嘅道路嘅設計就係令到嗰啲人大致上就係每小時係  
16 40 公里，...

17 主席：（經傳譯員）或者你集中番答番我個問題，我有唔同嘅組成部分，我哋睇下呢  
18 啲嘅低車速限制區究竟發生緊咩嘢事，行人道如果係有好多行人嘅，你有一個  
19 嘅車速限制區，但係令到佢能夠奏效，你同時間就會有緩嘅措施，呢個係咪就  
20 係我哋應該採取嘅方法呢？就係咁簡單。

21 陳美寶女士：（經傳譯員）我可唔可以回答呢個問題？

22 主席：（經傳譯員）可以。

23 陳美寶女士：（經傳譯員）你嘅分析係正確嘅，我哋施加呢個低車速限制區，我哋係  
24 研究緊，我哋同時間係引入一啲緩行措施，呢個係成個我哋嗰個嘅建議嘅其中  
25 一部分嚟嘅，亦都係成個低車速限制區我哋嘅建議嘅其中一部分。

26 黃女士：（經傳譯員）就話施加車速限制呢樣嘢就係道路安全一個嘅團體之中其實都  
27 有提議過呢一個建議嘅，就係 2013 年 5 月嘅時候，當其時就係係聯合國嘅全球  
28 道路嘅一個安全嘅論壇嗰度有講過嘅，就係雜項 2 文件冊嘅 820-25 嗰度有提  
29 到。呢個係道路安全一個嘅團體所提交嘅文件嚟嘅，佢就係 2013 年 5 月、7 月  
30 就係起動九龍東嘅嗰個時候嗰個會議嘅時候去提交嘅。

31 呢個係 820-57 就係講緊香港而家個情況係點樣嘅，820-57 頁嘅，呢  
32 度咁講，就係香港就係呢一個城市嘅市區嘅道路車速限制就係每小時係 50 公  
33 里，呢一個就係運輸署係佢哋相關嘅手冊嗰度就係講到嘅。

1 喺 6.4.2.5 段嗰度就係話「一般嚟講，車速限制如果係少過 50 個公里就  
2 係唔建議嘅，因為我哋係需要更加多嘅執法先至可以確保啲人遵守嘅。好可疑  
3 嘅就係話其實如果我哋係減低個車速，係咪真係減低嗰個意外率呢？」

4 喺 6.5.3.2 嗰度，佢就係咁講嘅，就係「如果話我哋係有一個永久嘅車速  
5 係每小時 30 公里嘅時候，我哋要考慮嘅時候，我哋真係睇番個別嘅情況，包括  
6 呢一個嘅交通嘅環境、個設計同埋交通意外率等等。譬如話條路好窄或者有好  
7 大嘅危機嘅時候，都唔係一啲好好嘅理據，就係話要施加一個咁嘅車速限  
8 制。」

9 你同我哋講嘅時候，呢一方面--呢兩段冇更新到嘅，係咪呀？直至到目前  
10 為止。

11 邱國鼎先生：（經傳譯員）而家就係講緊關於我哋而家關於車速限制方面嘅現狀，如  
12 果當我哋去研究低車速限制區嘅可行性嘅時候，我哋就會係再更新呢兩個條款  
13 嘅。

14 黃女士：（經傳譯員）820-35，道路安全嘅一個團體，佢就係話建議就係香港係成  
15 立一個系統，就係有 30、40 同埋 20 嘅公里嘅，就係睇番唔同嘅地點，譬如話  
16 新市鎮或者係商業、旅遊區或者係住宅或者係屋邨等等咁樣。運輸署有冇考慮  
17 過道路安全研究小組呢個建議嘅呢，就係劃出唔同嘅區域做唔同嘅車速限制區  
18 呢？

19 邱國鼎先生：（經傳譯員）喺我哋嘅研究之中，我哋都係專注喺每小時 30 公里嘅低  
20 車速限制區，我哋就有特別睇到道路安全研究小組嘅建議嘅。

21 黃女士：（經傳譯員）我哋就呢個文件已經睇完。有一個一般性嘅問題我想問問嘅，  
22 就係一個百分之八十五嘅百分位嘅，Julian Kwong 就係講話呢一個八十五嘅  
23 百分位，鄺子憲先生，佢就話呢個唔係一個平均嘅車速嚟嘅，我哋睇一睇第 8  
24 日嘅聽證會，2018 年 7 月 17 號，TSCP 第 3 號嘅文件冊，係第 67 頁，第 67  
25 頁第 14 行。

26 鄺子憲先生就係--主席就問佢嘅問題，佢就係咁樣回答嘅，佢就係解釋緊  
27 呢個八十五百分位嘅車速限制嘅，第 14 行佢就話「八十五百分位就係唔係單單  
28 我哋睇緊嘅唯一嘅價值嚟嘅，根據主席琴日講個文件，呢個文件就係話係 2013  
29 年訂定車速限制，呢個就係英國嘅運輸署所發出嘅。

30 喺呢個文件，佢就係話用平均車速嚟計，平均車速係非常之清楚嘅，因為  
31 我哋就係數一百架車，然後我就睇下佢一百架車嘅平均車速係點樣，佢哋就  
32 唔係用緊呢一個八十五百分位嘅車速去決定嗰個車速嘅，佢哋而家係用緊呢一  
33 個平均車速嘅。

34 即係話呢一個平均車速好可能係反映合理嘅司機、大部分嘅司機佢哋係希  
35 望用咩嘢車速去行走，如果我哋用八十五百分位嘅車速嘅話，可能就對行人就

1 有益處嘅，如果我哋用一個平均嘅車速嘅話，可能係一個更好嘅答案。」

2 對於呢一個說法，你嘅意見係點呢？

3 邱國鼎先生：（經傳譯員）我知道鄭子憲先生佢提到話係運輸署建議一啲嘅區域車速  
4 限制。

5 主席：（經傳譯員）呢一個問題你較早唔係好明係咩嘢意思嘅，係咪呀？即係到底佢  
6 哋係咪建議——即係話鄭先生佢嘅講法。

7 邱國鼎先生：（經傳譯員）佢建議我哋可以引入呢一個...

8 主席：（經傳譯員）係呀，但係佢意思就係話英國就係咁樣做嘅，而你都有質疑，係  
9 咪呀？

10 邱國鼎先生：（經傳譯員）冇錯。

11 主席：（經傳譯員）即係你都唔肯定英國嘅指引係點？

12 邱國鼎先生：（經傳譯員）因為我淨係睇番個指引。

13 主席：（經傳譯員）我明白點解嘅，但係你嘅立場係咁咩嘛，你唔係好肯定個意思係  
14 乜嘢？

15 邱國鼎先生：No.

16 主席：（經傳譯員）唔好意思，我打斷咗你。

17 邱國鼎先生：（經傳譯員）因為我留意到個平均車速同埋八十五百分位嘅車速都有考  
18 慮到，但係用一啲計算方法，就兩種車速都有考慮嘅。

19 黃女士：（經傳譯員）我哋可以睇番 Mike Weston 嘅證供，佢嘅睇法，呢個係 18  
20 日聆訊，2018 年嘅 9 月 27 號嘅謄本第 188 頁，第 18 日，第 188 頁開始第 7  
21 行，首先就係睇番我哋睇過嘅一幅圖，然後就話「喺三十二個倫敦市鎮都係有  
22 一個趨勢，喺大型嘅住宅區域係實施 20 英里嘅時速限制，即係等如 32 公里，  
23 我哋見到越嚟越多道路係實施 20 英里嘅時速限制，好多其他嘅道路就可能係  
24 30、40，甚至 50 嘅，但係喺倫敦嘅巴士路線嚟講，好少巴士線係會行走一啲  
25 超過 50 英里時速限制嘅道路嘅，大部分都會係低過呢個數嘅。」

26 我哋揭去 194 頁，Mike Weston 先生建議咗數個方法我哋可以採取嘅，  
27 首先係睇番 194 頁第 6 行，佢就話——個問題就係話「大家首先要理解乜嘢係平  
28 均車速」，佢都提到係講平均車速，而唔係話八十五百分位嘅車速，然後就再  
29 知道有乜嘢範圍，喺車速嗰方面。

30 「喺倫敦要澄清呢一啲嘅 20 英里時速係所有車輛，唔單只係巴士要遵守  
31 嘅。」「所以我建議要理解喺某啲道路上嘅平均車速嘅話，先至可以理解到個  
32 問題嘅嚴重性嘅。」

1 第二點，睇番第 22 至 23 行，所以個問題就係要知道嗰個問題本身喺邊，  
2 之後先可以做成本效益分析嘅，即係話如果車輛行得慢啲，成本係乜嘢。

3 如果睇 195 頁嘅話，第 6 行，回答番主席問題嗰時，Mike Weston 先生  
4 就話「個邏輯就係如果你將所有嘅巴士路線都行慢啲，因為你唔想行得咁快嘅  
5 話，又要維持咁多同樣嘅班次嘅話，你就即係話要多啲巴士、多啲司機。回答  
6 之前嘅問題，就係咁樣係咪會好過對於巴士嘅安全裝置係加強呢？呢個係考慮  
7 晒所有有嘅選擇，然後知道晒每種選擇之後，你先至去決定嘅。我覺得如果你  
8 用後者嘅話，有一個危險，就係你可能會有啲決定係做錯。」

9 所以首先係要知道平均車速，車速嘅範圍係幾多，然後去做一個嘅成本效  
10 益分析，然後再去平衡番，譬如話加強巴士安全裝置嘅情況，然後先去決定係  
11 咪減車速嘅，佢亦都提到喺倫敦做呢個工作，起碼係花咗五至十年先完成到  
12 嘅，即係話都要花時間。

13 我而家個問題問運輸署嘅就係除咗降低個車速限制，你會唔會採取呢一個  
14 類似嘅方法，就好似 Mike Weston 先生建議咁呢？

15 邱國鼎先生：（經傳譯員）我諗我哋喺研究入面會考慮嘅，正如我朝頭早已經提到我  
16 哋都對於成本效益分析幾有興趣嘅，我哋覺得呢一個分析會幫助我哋去選擇邊  
17 一個方案去加強道路同埋巴士嘅安全。

18 黃女士：（經傳譯員）邱先生，我又想問你，係有一個顧問研究嘅，就係睇下有可能  
19 喺香港嘅道路網絡入面有咩嘢路邊嘅意外嘅危險，呢個喺 2018 年 5 月開始做，  
20 係咪呀？

21 邱國鼎先生：（經傳譯員）係。

22 黃女士：（經傳譯員）我哋而家唔需要睇番喺邊度，但係其實就係第 1 個文件冊嘅  
23 372 頁。

24 主席：（經傳譯員）係咪 Mott MacDonald 嗰個顧問公司定係邊間呢？

25 邱國鼎先生：（經傳譯員）係 AECOM 顧問公司，係一個研究嚟嘅。

26 黃女士：（經傳譯員）有三十個月時間完成呢一個嘅研究，研究喺 2018 年 5 月 14  
27 號開始至到 2020 年 11 月 13 號，我就想問番，似乎呢一個嘅顧問公司就研  
28 究，只係去到至到--即係只係 70 公里時速嘅道路？

29 邱國鼎先生：（經傳譯員）唔係嘅，係一路--係所有都包括嘅道路。

30 主席：（經傳譯員）你講緊係兩個方向都有嘅，係--我哋要知道我哋香港嘅道路總長  
31 幾多，你係兩個方向都有度嘅？

32 邱國鼎先生：（經傳譯員）係因為我哋嘅研究係要兩方向嘅行車。

1 主席：（經傳譯員）即係所有嘅道路、所有嘅車速限制都要研究？

2 邱國鼎先生：Right.

3 黃女士：（經傳譯員）我就係想澄清呢點，我可以見到喺 TD-5 嘅文件冊第 1685  
4 頁，1685 頁，睇番 2.3 段，呢個係顧問研究嘅--就住呢個研究嘅一個文件，  
5 2.3 段就話「減低現有道路危險，運輸署、路政署係有聯合檢查道路安全嘅，  
6 去辨認出喺現有嘅道路如果車速限制係時速 70 公里或更高嘅話，會有一啲乜嘢  
7 潛在嘅路邊安全嘅風險，同埋點樣去改善嘅。」

8 我要同你澄清，我哋喺第 4 段亦都見到，就話「呢一個嘅工作就包括  
9 4,200 公里總長嘅香港道路網絡」，然後我哋可以見到有啲事項就邀請顧問要  
10 研究嘅，其中一樣嘢就係(c)個點，「即係話喺香港所有公共道路，包括係路政  
11 署喺 2013 年研究得出嘅啲二百個地點嘅路邊安全嘅隱患」。

12 有啲我睇完，唔係好明白嘅，其實意思即係話係包括所有道路，而唔係包  
13 括只係時速 70 公里以上嘅道路，啱唔啱？

14 邱國鼎先生：（經傳譯員）應該係包括所有道路，應該包括所有道路。喺 2.3 段提  
15 到，喺呢個顧問之前，運輸署同埋路政署做過道路安全嘅檢查嘅，就係就住係  
16 時速 70 公里或以上嘅路段，但係因為資源問題，我哋就聘請顧問去做。

17 主席：（經傳譯員）即係呢度係兩個唔同嘅研究喇，運輸署、路政署自己做過一個，  
18 就係時速 70 公里以上嘅道路，而顧問係包括所有道路嘅？

19 邱國鼎先生：（經傳譯員）係嘅，喺時速 70 公里或更高嘅，呢個係一個內部嘅研  
20 究。

21 主席：（經傳譯員）冇錯。

22 黃女士：（經傳譯員）我已經完成呢一個部分嘅提問，即係關於降低車速限制，除非  
23 主席有其他問題，如果唔係，我就會繼續問得比較仔細啲大埔嗰個巴士意外。

24 主席：（經傳譯員）你可以問。

25 黃女士：（經傳譯員）邱先生，我解釋畀你聽我準備問乜嘢，我個問題係咁嘅，首先  
26 多謝你提供個工作小組嘅檢討報告，就住五個路段係降低咗車速嘅限制嘅。  
27 其實我想問下你，你覺得合唔合適呢，如果我哋引入一個覆核嘅機制，譬如話  
28 如果某個區議會係不滿交通工程嘅，無論佢哋係唔採取行動或者進度唔良好去  
29 改善或者降低車速限制嘅話，即係話你會唔會考慮引入一個覆檢嘅機制，令到  
30 呢件事可以向工作小組反映，等工作小組反映呢一個個案是否合適去檢討嗰段  
31 路嘅車速限制？所以我其實係想問你呢條問題嘅。而有關嘅文件，...

32 主席：（經傳譯員）你繼續問之前，交通工程師--運輸工程師唔係負責決定嘅，佢係  
33 決定係咪要轉介個案嘅啫，係咪？

1 陳美寶女士：（經傳譯員）係，冇錯。

2 主席：（經傳譯員）所以你嘅問題就係話，就如果區議會，佢係咪應該有能力係去檢  
3 討可能收到嘅一啲嘅投訴，就係運輸工程師佢冇轉介一啲嘅要求就話去改變個  
4 車速限制，係咪咁樣樣？

5 黃女士：（經傳譯員）係，冇錯。我睇文件之前，我就係想問一啲一般性嘅問題，唔  
6 睇文件之前，你會唔會接受就係話喺呢一個大埔公路嘅意外，區議會或者區議  
7 員就係大埔區議會嘅就有兩個嘅投訴，兩項嘅，第一，就係關於係呢個相關道  
8 路嘅車速限制，第二，就係話係應該係有個裝一啲嘅車速嘅監察嘅相機，你會  
9 唔會接受呢個係真嘅或者係確切嘅呢？呢個係講緊喺大埔意外之前嘅，一個係  
10 2015 年嘅時候，嗰個區議員就係要求係檢討嗰個相關道路嘅車速限制，然後  
11 2017 年大埔區議會亦都係有要求，就係應該裝呢個車速偵察相機嘅。

12 邱國鼎先生：（經傳譯員）多謝主席。基於我哋嘅紀錄，第一個事項，區議員提出要  
13 求，佢哋就係要求個車速係限制係每小時 50 公里，第二個事項就係佢哋都有要  
14 求我哋裝設呢個車速偵察嘅相機嘅，攝錄機。

15 黃女士：（經傳譯員）我可唔可以澄清，就係話就話喺呢一條道路上面擺出呢一個嘅  
16 --樹立呢一個嘅每小時 50 公里嘅路牌嘅時候，我哋就係--因為呢條路係 70 公  
17 里，所以其實佢哋就係要求緊就係將個車速限制由 70 減到係 50 嘅，係咪呀？

18 邱國鼎先生：（經傳譯員）喺我哋嘅紀錄所知，佢哋就要求我哋係就係喺呢一個嘅  
19 50 公里嘅道路上面係樹立一個相關嘅呢一個嘅路牌。

20 主席：（經傳譯員）但係就我所知，睇嗰啲文件，就係話佢哋就係喺 70 路嘅上面希  
21 望能夠就係樹立 50 公里嘅路牌，其實正正係佢嗰封信係咁講嘅，佢就係用呢個  
22 方法係希望你哋能夠將嗰個車速限制係減低嘅，呢個就係睇下你明唔明佢哋講  
23 乜。或者你睇一睇嗰個文件，好唔好呀？

24 黃女士：（經傳譯員）或者我哋係按住時序去睇嗰個文件，第一個文件我哋想睇一  
25 睇，就係日本嘅國際學校，2015 年嘅 2 月 10 號嘅，英文版就係 TU 嘅文件夾  
26 就係 840-47 嘅，呢一個係 DC 第 2 號嘅文件冊嘅。

27 主席：（經傳譯員）呢個係 Ashdown 先生嘅函件嚟嘅？

28 黃女士：（經傳譯員）呢一封信就係日本國際學校就發畀我相信應該係大埔區議會  
29 嘅，第一段，佢就係咁講嘅，佢就話「我希望你能夠協助我，因為喺我哋學校  
30 外面，一個女士佢過馬路嗰陣時候就係撞死咗嘅，嗰陣時候嘅時速限制就係 70  
31 公里，亦都係解釋咗點解佢受傷咁嚴重。」

32 然後我哋去到最尾嗰段，「我相信呢個係好重要，就係話我哋係應該時速  
33 嘅限制應該係 50 公里，應該儘快去實施，致使到係唔會--避免另外一個更加嚴  
34 重嘅意外會發生嘅。」

1 呢個係呢個第一封信嘅，而我請你睇一睇 2015 年 3 月 13 號呢個大埔區議  
2 會第二個會嘅，呢個係 DC-2 號文件冊，第 840-9 頁嘅，呢個係 2015 年 3 月  
3 13 號嘅會議，我哋睇到呢度有啲人出席，包括大埔嘅助理民政專員、路政署、  
4 高級運輸主任就係運輸署嘅，同埋運輸署嘅其他工程師。

5 而家我哋睇一睇之後嗰頁，840-92，呢度就日本國際學校就係希望能夠大  
6 埔道個時速限制係減低嘅，主席就係交通局運輸委員會就話佢哋就係曾經收過  
7 呢個學校嘅函件，就希望能夠係喺佢哋學校前面個路段嗰個車速限制就由每小  
8 時 70 公里去到每小時 50 公里。佢亦都邀請委員會就係去呢一個學校就係同佢  
9 哋傾佢哋嘅交通問題嘅。

10 第 80 段，「王國良先生，呢一個就係運輸署嘅工程師，佢就回應，佢話呢  
11 個嘅日本國際學校提議就呢一個嘅學校之前嘅路段就應該時速限制係應該由 70  
12 去到 50 嘅，因為喺 2014 年嘅時候，喺大埔道呢間學校面前嗰個路段就係有交  
13 通意外同埋有人係死亡嘅。運輸署同埋警方佢就係研究緊呢個嘅意外嘅原  
14 因」。

15 跟住落嘅呢點，「呢個運輸署就會睇下而家睇下個路段嗰個時速限制係是  
16 否合適。」

17 第 81 段，「一個委員，就係佢係當區嘅區議員，佢亦都係去到嗰個交通意  
18 外現場睇過，佢就話佢亦都係非常之擔心呢個情況嘅，亦都係知道嗰個附近嘅  
19 居民嘅擔心，佢亦都會係喺運輸署睇完呢個情況之後，佢係會再進一步去匯報  
20 畀呢一個委員會知道。」

21 下一個文件就係大埔區議會 2015 年 7 月 24 號嘅文件，就係講緊呢個會議  
22 四個月之後嘅，就係 DC-2(B)，文件冊 840-75 頁嘅，呢度就講，就「大埔區  
23 議會就係畀呢個王國良呢個工程師呢一封信，呢個係運輸署交通工程部嘅一位  
24 工程師，佢哋就話最近係有大埔道附近一個居民就係要求佢哋協助，因為就係  
25 喺附近就係有啲車速限制嘅交通標記，就係 Savanna Garden 附近嘅彎位，所  
26 以就交通意外就經常發生。」

27 要確保呢啲嘅道路使用者嘅安全，佢就要求呢一個運輸署就係馬上就係去  
28 到呢一個嘅翡翠花園附近嗰度就樹示呢一個 50 公里嘅交通嘅標誌，就係提醒呢  
29 一個司機應該係小心駕駛，就唔會出意外嘅。其實呢個路段就係其實係 70 公里  
30 嘅係...

31 主席：（經傳譯員）你繼續之前，你接唔接受呢一個嘅講法？你使唔使睇一睇個地  
32 圖？

33 邱國鼎先生：（經傳譯員）係，係，需要。

34 主席：（經傳譯員）或者我哋將個地圖打出嚟。

35 邱國鼎先生：（經傳譯員）車速限制係 70 公里嘅，喺當時嚟講。

1 主席：（經傳譯員）唔該晒。

2 黃女士：（經傳譯員）呢個就佢唔係唯一發咗呢一封信嘅，陳笑權呢一個係大埔區議  
3 員，佢亦都話佢亦都傾過電話嘅，我哋睇番謄本，第 6 日嘅聽證會，7 月 14  
4 號，第 9 頁第 18 行，就係 TSCP 第 3(A) 嘅文件冊，陳先生就係咁講，佢話  
5 「當其時，運輸署就有直接回答我嘅問題，但係我就同佢哋傾過電話，佢話如  
6 果嗰個車速限制係要減到係 50，佢就係需要徵詢居民同埋嗰個業主立案法團，  
7 2014 年就係喺日本國際學校就係有交通意外，特別係交通燈個位，有個人就係  
8 受傷，然後運輸署就答我，就係如果係要減到係 50，運輸署係需要做一個研  
9 究，喺意外之後，佢亦都係呼籲市民應該係遵守交通規則嘅，佢除咗係運輸署  
10 嘅角度嚟講，如果真係要減到去 50，佢哋係需要做好多嘅諮詢，同埋同警方去  
11 商討。

12 我係一直等緊，我亦都係一直同佢哋接觸嘅，王先生運輸署就係已經係調  
13 離咗，好不幸，我哋就喺大埔尾就有交通意外。我亦都係去聯絡警方，因為運  
14 輸署幫唔到我。亦都係請警方就係加裝呢個車速偵測攝錄機，我一直都跟進緊  
15 呢件事嘅。」佢亦都係重複，喺第 11 頁，...

16 主席：（經傳譯員）我哋又有個證供，就係話其實係有一個嘅談話，就讓我哋清楚知  
17 道就實際係有人係提出要求過要將個時速限制係減低嘅。

18 黃女士：（經傳譯員）係，我哋就去睇番信件，就係希望要求加裝車速偵測攝錄機，  
19 就係 2017 年 6 月嘅，就係 DC-2(B)...

20 主席：（經傳譯員）其實我哋之前都睇過㗎喇，係咪呀？呢啲所有嘢，你希望提出嘅  
21 論點，就邱先生，但係佢就唔同意嘅，但係佢而家同意，就第一個事項，就係  
22 話有人係要求過將呢一個嘅車速限制去減低嘅，當我哋睇到相關嘅地方嘅時候  
23 就係翡翠花園，另外嘅一個嘅要求就係話加裝車速偵察攝錄機，或者你係再總  
24 結一下，睇下邱先生會唔會同意你個講法？

25 黃女士：（經傳譯員）呢個車速偵察攝錄機就係話區議員就係 2017 年 6 月嘅時候就  
26 寫過一封信畀警方嘅，副本就畀運輸署嘅...

27 主席：（經傳譯員）我好似記得就係話運輸署話佢係冇收過呢封信㗎，係咪呢？係咪  
28 咁嘅呢？

29 黃女士：（經傳譯員）運輸署回應就係委員會嘅提問，就係 2018 年 7 月 13 號嘅，  
30 運輸署就係話佢哋有收到警方嘅回信，就係 2017 年 6 月 16 號。

31 主席：（經傳譯員）或者我記錯咗，或者你就睇一睇呢封信。

32 黃女士：（經傳譯員）就係 TD-1 號嘅文件冊，就係第 395 頁第 9 段。第 9 段，第  
33 395 頁，你就話「喺 2017 年 6 月 21 號運輸署就係有收到係警方係回函畀陳先  
34 生嘅，嗰封信件就係 2017 年 6 月 16 號，呢度就講，就話『運輸署暫時冇計劃  
35 就係有一個車速偵察攝錄機。』收到警方回覆畀陳先生嘅信件之後，運輸署係

1 檢查過喺大埔道近住大埔尾嘅地方嘅意外紀錄，就發現係過去三年係有涉及車  
2 輛超速導致交通意外嘅紀錄，亦都有計劃喺嗰度安裝固定嘅車速監測相機嘅，  
3 因為運輸署亦都有就住警方回應有補充，所以亦都有自己回覆番畀陳先生。」

4 我相信你回應委員會嘅問題嘅時候，你亦都承認喺同一份文件第 17 段，第  
5 400 頁，400 頁最後嗰行，17 呢一點係講番運輸署回應嘅，「工作小組，之前  
6 係冇人問過工作小組呢一個路段嘅車速限制是否合適嘅。」

7 再解說一下，即係話從來呢個建議都有去到工作小組度嘅，即係話有人要  
8 求喺呢段路減速同埋安裝車速偵測嘅攝影機其實都係一路個建議停留喺運輸署  
9 嗰個有關小組，...

10 主席：（經傳譯員）首先你同唔同意呢？

11 邱國鼎先生：（經傳譯員）同意。

12 黃女士：And if we accept that...

13 主席：（經傳譯員）畀啲時間我。唔該。

14 黃女士：（經傳譯員）如果你接納呢個講法嘅話，我就唔需要再講番喺 2018 年嘅 2  
15 月 12 號嘅會議紀錄，當時你係喺大埔個意外發生之後會見過大埔區議會嘅，會  
16 議當中陳先生都喺度嘅，...

17 主席：（經傳譯員）我哋之前咪講過呢一點囉，可唔可以簡要、扼要咁樣講，目的係  
18 乜嘢？

19 黃女士：（經傳譯員）運輸署會檢討車速限制嘅，...

20 主席：（經傳譯員）係呀。

21 黃女士：（經傳譯員）...兩個月之內佢係咁樣做到，後來工作小組係有檢討有關路  
22 段，工作小組亦都喺 3 月 27 號 2018 年，曾經就住車速限制呢件事開過會，亦  
23 都同意呢一個建議嘅，即係話有關路段係減低個車速。

24 主席：（經傳譯員）喺邊度可以參考到呢，個文件？

25 黃女士：（經傳譯員）係 TD-1 號文件冊第 166 頁，3 月 27 號嘅今年。我想請你睇  
26 嘅會議紀錄係喺 TD-6 文件冊 1923 頁去 1927 頁，TD 文件冊第 6 號，呢一份  
27 新嘅文件係由你提供畀我哋嘅最近，2018 年 10 月 12 號提交。

28 想請你睇番工作小組嘅會議紀錄，即係 1916 頁，嗰一頁提到出席人士包  
29 括運輸署、香港汽車會、香港--或者 IAMHK 香港進階駕駛者學院同埋係有關嘅  
30 運輸署工程師，咁樣而家請你睇 1917 頁，4.2 段就係講番有關嘅路段，似乎個  
31 標題就係話第 3、第 4 號報告，關於駿景路同雍宜路嘅之間嘅大埔道嘅路段，雙  
32 線嘅行車。

1 我而家想問呢份會議紀錄係咪都係提供番報告嘅一個撮要呢？因為我哋就  
2 有個報告喺手，我哋就唔知道嗰份報告本身嘅建議係乜嘢，可唔可以確認一下  
3 喺呢幾段提到嘅所謂建議係唔係就係運輸署嘅工程師嘅提議呢？

4 邱國鼎先生：（經傳譯員）係。

5 黃女士：（經傳譯員）唔單只喺會議紀錄入面，我哋留意到個做法通常就係你會檢討  
6 八十五百分位嘅車速限制嘅，喺有關路段對於輕型貨車喺繁忙時間嘅車速，呢  
7 個就係 4.2.1 段入面嘅 (a) 段提到；第二，就會檢討個意外率嘅，呢個就係睇  
8 下每百萬行車公里嘅意外率，呢個係第 (b) 段。

9 睇下最耐嗰句，尤其係北行嘅行車線，「北行同南行嘅路段嘅意外率係  
10 1.21 同 1.57 嘅，嗰個係講緊喺北面嘅路段，兩個數字都係比起喺香港嘅所有  
11 道路嘅平均意外率，即係喺 2016 年 1.18」...

12 主席：（經傳譯員）邊一個係高啲？

13 黃女士：（經傳譯員）係高啲嘅。

14 主席：（經傳譯員）你而家讀緊 (b) 段？

15 黃女士：（經傳譯員）係，最耐嗰四行。

16 主席：（經傳譯員）唔該晒，因為我頭先睇上面嗰度，我搞錯咗，唔該。

17 黃女士：（經傳譯員）我哋可以見到，根據 (e) 嗰段，「考慮到以上觀察到八十五百  
18 分位車速同埋意外率，我哋建議喺赤泥坪同雍宜路，即係話北面路段嘅南行、  
19 北行方向嘅路段都係由時速 70 減到去時速 50 嘅，而其餘部分就可以維持原有  
20 嘅車速限制。」

21 邱先生，你喺上一次嘅聆訊都提到其中一個條件就係考慮意外率，個人受  
22 傷意外率，就將佢同全港嘅意外率比較，似乎數字清楚反映，就好似呢度咁  
23 樣，呢度嘅意外率，喺 2016 年起碼，係高過全港平均嘅意外率嘅 1.18 嘅。

24 我諗我哋都可以確立呢點，你亦都接納嘅，就係有區議員向運輸署投訴過  
25 要求檢討或者係減低有關路段嘅車速限制。我哋頭先睇過呢啲證據，之後，你  
26 同唔同意係有需要引入檢討嘅機制呢？即係話區議員係可以向工作小組上訴，  
27 如果運輸署工程師係拒絕就住有關路段去檢討車速限制嘅話？

28 邱國鼎先生：（經傳譯員）係嘅。

29 黃女士：（經傳譯員）我講緊工作小組。

30 邱國鼎先生：（經傳譯員）我諗我同意，我諗我哋需要一個機制係畀運輸工程師去考  
31 慮是否需要將公眾要求交去畀工作小組，所以我同意係應該有個咁嘅覆檢嘅機  
32 制，去充分考慮公眾意見。

1 主席：（經傳譯員）應該點做呢？好明顯係有咁嘅需要呢個機制，可以去反對番一  
2 個運輸工程師嘅意見，即係譬如話收到區議員嘅一個要求改個車速限制，但係  
3 要點做呢？

4 邱國鼎先生：（經傳譯員）我覺得我哋首先要喺工作小組度討論呢一個建議嘅新嘅車  
5 速限制，然後，呢個意見我哋可以諮詢區議會，尋求佢哋嘅意見。

6 黃女士：（經傳譯員）主席先生，我而家會繼續講非法泊車。我哋之前喺工會、九  
7 巴，差不多係所有嘅專營巴士公司，都聽過佢哋嘅證供，係有違例泊車嘅問  
8 題，而呢個問題，...

9 主席：（經傳譯員）任何有眼睇嘅人都知道喇，對我哋嚟講，呢個聆訊邊部分有關  
10 呀？

11 黃女士：（經傳譯員）警方有封信嘅，2018 年嘅 8 月 10 號，呢個係雜項文件冊  
12 1 (C)，124-539 頁，入面就提到就有一個引證一個概念嘅試驗嘅。

13 主席：（經傳譯員）我哋喺講呢啲細節之前，我哋而家聽運輸署佢哋嘅證供，對呢個  
14 論點有乜嘢--對我哋嚟講有咩嘢幫助呢？到底個論點係乜嘢呢？

15 黃女士：（經傳譯員）其中一個有關嘅問題就係佢哋會檢討違例泊車嘅問題，即係話  
16 佢哋會安裝閉路電視喺一啲違例泊車嘅黑點，但係呢一方面就我哋唔知道點樣-  
17 -呢一個嘅試驗計劃點樣係實行嘅，所以我就係要問下呢個概念驗證嘅試驗計劃  
18 會唔會有一個電腦辨認嘅系統，譬如話有架車泊咗喺某個位置，或者佢固定咗  
19 某一段時間係完全靜止不動嘅，然後觀察咗幾分鐘，佢都係完全冇移動嘅話，  
20 點樣係會引發個系統或者運輸署或者警方去執法呢？

21 主席：（經傳譯員）運輸署係對於執法打擊違例泊車係唔關事㗎㗎，呢個係警方嘅工  
22 作㗎㗎。

23 黃女士：（經傳譯員）係，呢個係警方嘅工作。

24 主席：（經傳譯員）運輸署有關嘅就會係，毫無疑問，即係一般嚟講，就違例泊車會  
25 影響交通同埋係喺巴士站嗰度違例停車，呢個亦都係個委員會關注嘅地方㗎  
26 嘅。

27 黃女士：（經傳譯員）因為關於呢一個嘅概念驗證嘅試驗計劃，我哋冇資料，除咗警  
28 方有封信件，我哋可唔可以確認一下呢個研究係包括我提出嘅地方呢，就包括  
29 係會用到拍攝影片同埋係要觀察車輛一段時間？

30 主席：（經傳譯員）即係你個問題想問運輸署咩嘢呢？

31 黃女士：（經傳譯員）你知唔知道呢個概念驗證嘅試驗計劃係點？同埋你有冇參與嘅  
32 呢？

33 主席：（經傳譯員）或者逐條逐條問喇，首先問呢兩條先。

1 陳美寶女士：（經傳譯員）多謝主席，多謝黃律師嘅問題。運輸署有參與呢一個概念  
2 論證嘅可行性研究。至於閉路電視會唔會去加裝同埋啲影像係點樣去攝錄，  
3 我哋都有參與嘅，所以我哋都喺呢方面唔能夠有啲咩嘢去評論。但係我想講  
4 嘅，我哋會歡迎任何嘅概念論證嘅試驗計劃，只要佢係能夠引用科技可以喺交  
5 通方面執法，警方咁樣做，我哋都係歡迎嘅。唔該晒。

6 主席：（經傳譯員）係。

7 黃女士：（經傳譯員）最後一個問題，就係話鄭子憲先生佢提出一個問題，佢就問會  
8 唔會可能有一個嘅機制，可能就係話法例就係時速限制係每小時 70 公里，但係  
9 巴士公司佢哋自己亦都可以去為佢哋嘅車長去提供指引，喺某一啲嘅路段嘅時  
10 候會用更加安全同埋一個更低嘅速度同埋監察速度，以確保，所以佢做個——  
11 佢哋個參數係唔會被超越嘅。譬如話呢一個嘅路段好危險嘅，所以可能法定嘅  
12 時速係 50 嘅，但係佢哋可以係實施低於呢一個嘅時速限制，而運輸署可以幫手  
13 係睇下可唔可以確保呢啲嘅司機係遵守，呢個係鄭子憲先生所提嘅意見，我想  
14 問一問運輸署會唔會都係支持呢個建議呢？

15 陳美寶女士：（經傳譯員）多謝主席。我哋鄭先生嘅意見，我哋係備悉嘅，九巴亦都  
16 係提供證供，口頭陳述就係話佢哋係會發出一啲嘅指引去提醒車長喺某一啲嘅  
17 路段可能需要係用一個更低嘅車速行車，但係係邱先生亦都講過，喺運輸署嘅  
18 角度嚟睇，我哋好著重啱啱我哋開始咗嘅研究，特別就係設立低車速限制區，  
19 就同埋係用一啲緩行嘅措施，我覺得應該係著重喺啲方面。

20 至於巴士公司會唔會係探討、會唔會發出指引，我覺得限速器嘅裝置亦都  
21 係幫到車長去遵守法定嘅車速限制，利用科技，我相信我哋都係要繼續嘅，但  
22 係啲個指引係會幫唔幫到，我相信我哋係持開放嘅態度，我哋會再同巴士公司  
23 商討嘅。唔該晒。

24 黃女士：（經傳譯員）最後，我哋都聽過好多關於——喺我哋取證嘅過程之中，關於就  
25 係巴士專線，強制嘅巴士專線，就好似新加坡咁，...

26 主席：（經傳譯員）或者我打岔一下，有一個事項我就特別想大家留意嘅，係  
27 Weston 先生嘅報告，係 EXP 第 1 號文件冊第 142 頁第 6.4 章，呢個係咁嘅，  
28 喺倫敦，Weston 先生講就係話「就喺呢一個框架協議之中，啲個營運商就係需  
29 要做一個道路風險評估嘅，呢個個目的主要就係話睇下一個道路係有冇一啲嘅  
30 潛在嘅風險，譬如話一個好麻煩或者一個好有問題嘅道路嘅交通路口，或者就  
31 有一間學校，有好多行人，司機如果佢係要揸呢一條路嘅時候，佢就係要知道  
32 呢個道路風險評估嘅結果嘅。」

33 喺香港，我哋有冇一個制度就係話專營巴士公司係需要係做一個相關或者  
34 類似嘅評估呢？

35 陳美寶女士：（經傳譯員）主席，喺目前嚟講，有一啲有系統性嘅道路風險評估嘅機  
36 制，但係我想指出，喺我哋同巴士公司嘅日常嘅聯絡之中，我哋都知道某一啲

1 嘅道路係需要我哋特別小心嘅，或者有啲特別嘅措施去確保司機係留心當地嘅  
2 情況同埋行人嘅情況。

3 我就舉一個例子嚟說明，呢個巴士路線係喺沙田附近嘅，水泉澳邨附近，  
4 嗰個道路嘅環境同埋嗰個斜度，從水泉澳邨去到大路嗰度可能都會有一啲風險  
5 嘅，因此，運輸署同埋巴士公司都係強制就係喺呢條路嗰度，巴士要停一停，  
6 就確保車長或者個巴士站，如果即使冇巴士站等，佢哋係強制一定要喺呢個巴  
7 士站停一停嘅，而確保就係個車速係緩減同埋嗰個道路更加安全。

8 或者係要系統性嘅去評估道路，肯定會幫到我哋而家目前所做緊嘅，亦都  
9 係確保--而我哋同巴士公司去傾嘅時候，我哋都會提到呢一點，去確保喺呢啲  
10 相關嘅路線係安全嘅。

11 主席：（經傳譯員）譬如倫敦嗰個嘅機制就好似比較正式一啲，因為有一個道路風險  
12 評估係需要由嗰個巴士公司去做，亦都係資料要提交畀倫敦運輸局，因此兩方  
13 都知道相關嘅資料，亦都係會係可能就係你頭先講沙田嘅情況，就係佢哋一啲  
14 嘅研究所得出嚟嘅結果，你覺得香港值唔值得係做一啲推行類似嘅機制？譬如  
15 話喺遠期計劃嗰度係要求係咁做，或者係某個地方要求佢哋咁做呢？

16 陳美寶女士：（經傳譯員）主席，我哋肯定可以去研究一下嘅，睇一睇。喺呢一個安  
17 全嗰一章嘅時候，唔同嘅巴士公司有唔同嘅安全要求，當我哋睇番意外嘅成因  
18 嘅時候，我哋會睇到某一啲嘅道路可能個交通意外率係比較大嘅，所以可能有一  
19 個更加有系統嘅道路風險評估都會幫到嘅，我哋肯定可以同巴士公司一齊去  
20 探討，可能一個合適嘅地點就係喺嗰個遠期計劃裏面關於安全嗰個章節。

21 主席：（經傳譯員）我哋之前聽過證供，就係話就係有喺--九巴其實某一個時段，佢  
22 哋就識辨出咗二十九個急彎嘅，亦都係向巴士司機公布嘅，但係後來就有嘅其  
23 實，運輸署知唔知道，即係九巴有冇同你講就係話關於呢二十九個急彎，嗰個  
24 車速應該係低於呢個車速限制？

25 陳美寶女士：（經傳譯員）就我哋所知，運輸署其實就唔知道呢個嘅內部嘅安排嘅就  
26 係講關於呢二十九個急彎嘅。

27 主席：（經傳譯員）呢個唔係正正就係對運輸署嚟講其實都係好有用嘅資料咩？

28 陳美寶女士：（經傳譯員）對我哋嚟講，如果有呢啲資料，都會好有用嘅，亦都係幫  
29 到我哋究竟會唔會應該係可以有系統嘅做一啲道路風險評估嘅。

30 主席：（經傳譯員）係，好，唔該晒，黃律師。

31 黃女士：（經傳譯員）我想跟進一個問題，就係關於有系統嘅道路風險評估，特別係  
32 針對某一啲路段，如果運輸署有呢啲資料，然後發現其實喺某一啲路段實在係  
33 需要我哋減低個車速限制，你會點樣處理呢？會唔會係將相關嘅資料畀咗呢個  
34 車速限制檢討工作小組或者畀提升專營巴士安全工作小組考慮呢？

1 陳美寶女士：（經傳譯員）或者我直接回答都唔係咁適合嘅，較早前我就係同回答主  
2 席都係咁講嘅，我哋睇下呢個咁樣嘅風險評估可唔可以做得更加有系統，或者  
3 我哋就咁樣去處理。

4 黃女士：（經傳譯員）最後一個嘅課題，希望能夠你係話畀我哋聽，因為我哋就睇到  
5 關於新加坡嘅做法，就係話強制就讓路畀巴士嘅一個制度，同埋呢個巴士優先  
6 專線，就係新加坡嘅陸路運輸局去推出嘅。我哋睇番 SEC 第 2 號文件冊第 832  
7 頁，個文件就係 822 開始嘅，就係關於新加坡同埋南韓嘅專營巴士嘅情況，我  
8 哋睇番 832 頁，第 3.15 段，就係呢個讓畀巴士嘅線或者巴士優先線咁樣，專  
9 線。

10 「如果呢啲司機就係近呢個巴士嘅時候，佢哋首先喺個地上面睇到一啲三  
11 角形嘅路標，呢啲嘅路上嘅標誌就係話畀佢聽佢哋就已經就嚟去到個巴士站，  
12 佢哋係要慢駛，然後睇清楚有冇巴士就係由巴士站開出嘅。」亦都會有一啲嘅  
13 巴士嘅標誌就係話讓路畀巴士咁樣。如果佢唔遵守嘅說話，就會有懲處嘅，所  
14 以我想問一問運輸署，你會唔會考慮呢種嘅強制讓路畀巴士嘅一種嘅機制呢？

15 陳美寶女士：（經傳譯員）首先，我想請邱先生從道路安全角度講下佢嘅觀察，咁樣  
16 嘅措施喺加強巴士安全嘅工作小組個度亦都考慮過呢一個嘅有可能嘅方案，可  
17 以去改善巴士安全，或者我而家請邱先生由道路安全嘅角度去講下佢嘅見解。

18 邱國鼎先生：（經傳譯員）喺新加坡建議嘅概念就係話用一個嘅強制性嘅讓路措施，  
19 呢個路標就係一個嘅強制措施，即係話車輛行到一個巴士停車處附近嘅時候，  
20 所有車輛都要停落嚟嘅，無論係喺個巴士停車處個度有冇巴士正在駛出。我  
21 哋要研究呢一個喺香港係咪可行，...

22 主席：（經傳譯員）呢個唔係佢哋嘅建議，直頭係有咁嘅系統運行。

23 邱國鼎先生：（經傳譯員）係已經實施。

24 主席：（經傳譯員）因為你頭先講話佢哋建議。

25 邱國鼎先生：（經傳譯員）即係我哋要研究一下喺香港道路係咪可行，因為如果有咁  
26 嘅強制道路標記嘅話，所有喺大路行緊嘅車都要停落嚟，我哋都會擔心，譬如  
27 係話會唔會係有撞車尾嘅情況，...

28 主席：（經傳譯員）撞車尾係乜嘢導致呢？係即係話有留意到有巴士停落嚟？

29 邱國鼎先生：（經傳譯員）因為大路車輛係一定要停落嚟，...

30 主席：（經傳譯員）係，有兩種巴士站，有一種就係喺道路側邊有個停車處，一邊就  
31 直頭喺路邊嘅。

32 邱國鼎先生：（經傳譯員）可唔可以顯示一啲圖片？

33 黃女士：（經傳譯員）第 833 頁。

1 邱國鼎先生：（經傳譯員）喺呢幅相嗰度見到，呢度係有一個三角形寫住「巴士」嘅  
2 標記。

3 主席：（經傳譯員）係呀，呢個就係架車就咁喺路邊停低。

4 邱國鼎先生：（經傳譯員）你可以見到都有個巴士停車處嘅，然後就有個黃色嘅地  
5 標，就有一個箭咀。

6 主席：（經傳譯員）冇錯，就即係話巴士優先駛番出大路嘅。

7 邱國鼎先生：（經傳譯員）即係話喺後面嘅所有車輛都要喺個黃色箭咀嗰度停低。

8 主席：（經傳譯員）係要留空間畀架巴士？

9 邱國鼎先生：Yes.

10 主席：（經傳譯員）但係如果前面冇其他車輛嘅話，架車要唔要停落嚟呢？

11 邱國鼎先生：（經傳譯員）但係可能後面架車輛佢未必能夠及時停低。

12 主席：（經傳譯員）你唔係要睇番你前面架車係行緊定行緊咩？佢哋係咪停車，係咪  
13 慢車，呢個唔係任何車輛嘅司機首先要嘅職責嚟嘅咩？

14 邱國鼎先生：（經傳譯員）冇錯嘅，我哋要研究一下喺香港係咪可行，係咪適合。

15 主席：（經傳譯員）你係咪覺得係咪對香港人嚟講，太複雜呀？新加坡就做到，我哋  
16 嘅司機就做唔到？

17 邱國鼎先生：（經傳譯員）呢一方面我哋要研究。但係使用道路嘅輔助嘅，譬如話係  
18 標記咁樣嘅嘢去協助巴士駛番出大路，我哋要考慮...

19 主席：（經傳譯員）但係接唔接納有個咁嘅建議都係合理嘅，喺社會上應該係讓巴  
20 士，因為巴士車上有一百三十五名嘅乘客，即係相比起有個專業司機駕駛，有  
21 個老闆坐喺車入面嘅私家車，你同唔同意呀？

22 邱國鼎先生：（經傳譯員）同意。

23 黃女士：（經傳譯員）仲有一個嘅巴士線計劃都係有關嘅，我哋可以睇下佢點樣實施  
24 嘅，喺 831 頁，個系統就係唔係好需要司機嘅干預嘅，因為喺巴士嘅車上係有  
25 個視像系統一路係監察車前狀況，就可以影低違反巴士專線嘅車輛嘅司機嘅，  
26 我哋亦都可以睇到有幅相顯示個個攝錄機嘅，任何嘅司機如果違反呢一個巴士  
27 專用嘅車線嘅話，都會係被罰嘅。呢個亦都係同強制嘅讓巴士嘅安排有關嘅，  
28 你工作小組喺研究加強巴士安全嘅時候有冇考慮呢樣嘢呢？

29 陳美寶女士：（經傳譯員）主席，我哋會考慮呢一點嘅，當我哋研究係畀巴士優先  
30 嘅建議嘅時候，工作小組會咁樣做。但係我都想回應另外一點，任何措施係讓  
31 巴士由巴士站駛出嘅時候都係合理嘅，我哋會仔細研究乜嘢呢？就係因為香港

1 係一個好擠擁嘅城市，而巴士站好多時候就係喺路邊，條路可能只係得兩條行  
2 車線，亦都車輛流量係好密嘅，我哋要考慮下呢一種強制性嘅措施係咪真係能  
3 夠協助到呢，喺咁嘅情況，如果唔係嘅話，基本嘅問題就係要問到底巴士停車  
4 處或者巴士站係咪應該喺個路段設置呢？好多時候我哋有一啲要求嘅，收  
5 到，都係話喺一啲繁忙嘅路段應該增設巴士站，但係我哋亦都希望加強公眾意  
6 識，應該先讓巴士，同埋要提高巴士嘅安全性嘅，我哋都會考慮呢啲，我哋亦  
7 都會認真考慮呢一個方案嘅，喺我哋嘅常設嘅工作小組跟進嘅工作入面。

8 黃女士：（經傳譯員）主席，我已經完成提問嘅部分，除非委員會有其他嘅議題想討  
9 論。

10 主席：（經傳譯員）係，我哋收到一啲資料，喺行政長官施政報告入面提到安全帶，  
11 就係話喺巴士度要加裝安全帶，據我理解，運房局嘅局長係提到一啲細節，似  
12 乎會有一個資助計劃，可以而家講下，你有冇呢兩份文件呢？應該就係施政報  
13 告嗰度就係得四行字，另外仲有係運房局局司嘅發言嘅。

14 黃女士：（經傳譯員）主席，我有施政報告，但係我要搵番行政長官嘅發言嘅有關部  
15 分。

16 主席：（經傳譯員）我哋而家休息五分鐘，我哋亦都可以喺呢個時候，睇下仲有冇其  
17 他嘅問題，然後就可以完成口頭取證嘅部分。而家我哋休息，至到 4 點，唔  
18 該。

19  
20 下午 3 時 53 分聆訊押後

21  
22 下午 4 時 04 分恢復聆訊

23 出席人士如前。

24  
25 主席：（經傳譯員）黃律師。

26 黃女士：（經傳譯員）多謝主席畀啲時間我哋，我哋已經係搵番嗰個 2018 年行政長  
27 官嘅施政報告同埋佢嘅之後發表嘅嗰個講法，就係講關於政府會補貼幾多錢就  
28 係喺現有嘅巴士上面加裝一啲嘅安全裝置同埋部分巴士嘅上層所有座位加裝安  
29 全帶，呢個相關嘅段落就係喺螢幕已經打咗出嚟。就運輸及房屋局局長就喺呢  
30 一個嘅記者會上咁講，...

31 主席：（經傳譯員）或者我哋睇睇呢一個施政報告先。

32 黃女士：（經傳譯員）2018 年嘅施政報告第 264 段就咁講嘅，就係話「為進一步加

1 強專營巴士的營運安全，政府會資助專營巴士營辦商喺現有巴士上加裝合適安  
2 全嘅裝置，包括喺部分巴士嘅上層所有座位加裝安全帶。」

3 之後我哋就睇一睇運輸及房屋局局長所發表嘅聲明，就喺個記者會上面所  
4 講嘅，佢就話--呢度係一個中文同埋英文，我哋都打出嚟，我哋就讀喇。

5 「為咗進一步提升專營巴士嘅營運安全，我哋建議資助喺合適嘅現有巴士  
6 加裝三項安全裝置，包括有助加強車輛穩定性同埋減低翻側風險嘅電子穩定控  
7 制系統，對減速功能嘅偵速限制器同埋喺行走快公路或較少停站嘅長途巴士嘅  
8 所有上層座椅加裝安全帶，我哋建議資助專營巴士營辦商八成嘅相關費用，涉  
9 及開支大概係 5 億元，其餘費用同埋日後嘅維修保養就係由營辦商自行負責  
10 嘅。」

11 陳小姐，可唔可以講一講，首先就係話呢個嘅嗰個補助其實會幾時落實  
12 呢？講緊呢個安全裝置嘅補助？

13 陳美寶女士：（經傳譯員）係，首先，委員會可能想要知道，就係裝置呢個安全裝  
14 置，包括電子穩定控制系統同埋車速限制器同埋安全帶，就提升專營巴士安全  
15 工作小組有提出相關嘅建議，所以就係有咁嘅建議。

16 個安裝方面就要視乎我哋係要巴士商--巴士公司係喺工程同埋可行性方  
17 面，同埋營運可能性方面再睇一睇，呢一個行政長官同埋相關嘅局長就講過政  
18 府係打算大概係撥備 5 億元就係提供一啲財務嘅鼓勵措施，就鼓勵巴士營運商  
19 係裝置呢啲安全裝置嘅，特別係安全帶方面，喺我哋之前提供口述證供嘅時  
20 候，我哋都講過，係安全帶嘅裝置我哋特別係需要係仔細嘅評估，無論係技  
21 術、財務同埋營運嘅可行性方面都要評估嘅，...

22 主席：（經傳譯員）需唔需要係做一個成本效益分析呢？

23 陳美寶女士：（經傳譯員）需要嘅，所以嗰個安全帶我哋會做一個成本效益分析，我  
24 哋會睇下番呢個技術、營運同埋財務嘅可行性。

25 關於呢個嘅電子穩定控制系統同埋車速限制器，我哋之前都喺工作小組就  
26 講過，唔同嘅巴士營運商就已經係考慮緊呢兩個裝置，就喺而家現有嘅巴士上  
27 面安裝，所以我哋就會提供相關嘅款項，就係有一個配對嘅形式，就希望鼓勵  
28 到巴士嘅營運商去希望儘快係裝置呢啲安全裝置。

29 所以簡單嚟講，呢個施政報告所提到嘅呢啲嘅措施其實都係政府係好積極  
30 係回應工作小組提出嘅建議，我哋亦都係將相關嘅建議之前提交過畀呢度委員  
31 會嘅。唔該晒。

32 黃女士：（經傳譯員）有冇相關嘅時間表，就係呢啲安全裝置幾時安裝呢？有冇討論  
33 過？

34 陳美寶女士：（經傳譯員）我哋考慮到我哋初步嘅評估嘅情況，喺工作小組我哋討論

1 過，啲啲--我哋就係六年會提供嘅，2019/20 至到 2024/25，當然，我哋都  
2 會係喺安全帶方面，我哋先會做一個成本效益分析嘅。

3 黃女士：It made reference...

4 主席：（經傳譯員）唔好意思，我又要打斷一下。呢個就係--呢個聲明係由特首同埋  
5 運輸及房屋局局長有條件嘅一個咁嘅一個聲明嚟，係咪呀？要視乎就係有冇--  
6 譬如話安全帶、成本效益個分析，睇下成本效益分析嘅結果係點樣，然後政府  
7 係願意係會提供呢一個嘅相關嘅資助嘅，就喺呢個聲明嗰度講，但係有附帶條  
8 件嘅，係咪？

9 陳美寶女士：（經傳譯員）係，或者我係詳細講解一下？

10 主席：（經傳譯員）係，唔該晒。

11 陳美寶女士：（經傳譯員）政府就會提供，喺施政報告同埋局長嘅聲明書嗰度有講我  
12 哋會提供相關嘅費用，我哋係內部嘅估計同埋點樣提供撥款，我哋就會係六年  
13 嘅時間，我哋亦都考慮到巴士公司佢哋嘅初步嘅數字，佢哋亦都話要加裝啲  
14 安全帶其實係需要咩嘢時間嘅，所以係呢個嘅施政報告裏面講到，我哋睇一  
15 睇，睇番施政報告點講。

16 主席：（經傳譯員）好，或者我哋打出嚟。

17 陳美寶女士：（經傳譯員）嗰個句子最後一個部分係寫，就話「包括喺部分巴士嘅上  
18 層所有座位加裝安全帶」，呢個正正係反映我哋係一直所解釋嘅，係向委員會  
19 解釋嘅，就係話工作小組嘅討論就係講到嘅提議就係就會進行呢一個成本效益  
20 分析，喺呢一個巴士上層所有座位加裝安全帶，特別係一啲長途嘅巴士，佢係  
21 比較少停站啲，其實都應該我哋會再睇嘅。

22 主席：（經傳譯員）你可能--其實你漏咗，就係仲有行走快速公路嘅、較少停車站  
23 嘅、長途嘅巴士，所以有三點嘅。

24 陳美寶女士：（經傳譯員）係嘅，主席。

25 主席：（經傳譯員）我可唔可以問一問，謄本第 10 月 6 號嗰日嘅聽證會嘅謄本，係  
26 呢一頁，我哋去到第 24 行嘅，你就係就呢個課題，你曾經咁講嘅，你就咁講  
27 嘅，「因為而家現有巴士加裝安全帶就唔係咁可行，亦都係會係需要考慮多方  
28 嘅因素，如果--究竟係咪需要係強制或者係法定嘅要求，特別係上層嚟講，我  
29 哋係要認真去睇睇究竟有啲咩嘢額外嘅利益，亦都係要睇番我哋比較成本同埋  
30 技術方面嘅考慮。回答你嘅問題，我哋就係如果我哋係要有一個強制嘅一個方  
31 法，我哋就係需要做一啲嘅成本效益分析同埋影響嘅評估嘅。」

32 我哋知道成本效益分析係咪適用於就係話，就係睇下有冇加裝安全帶喺任  
33 何嘅座位上面都係合適嘅呢，呢個會唔會係第一步呀？

34 陳美寶女士：Yes.（經傳譯員）主席。

1 主席：（經傳譯員）唔該。黃大律師。

2 黃女士：I think Ms Chan has addressed the question...

3 主席：（經傳譯員）聽唔到，唔該。

4 黃女士：（經傳譯員）我諗陳女士已經答咗我呢個成本效益分析嘅問題，所以我有進  
5 一步問題。

6 主席：（經傳譯員）唔該。

7 歐陽先生：（經傳譯員）好，我一條問題。你上一次聆訊提到安全係你所有部門嘅共  
8 同責任嚟嘅，另外專家亦都建議有任何人係單一負責呢個安全議題嘅，所以我  
9 又想聽下你專家嘅意見。你而家滿唔滿意，係咪你全部嘅部門都係負責呢一個  
10 安全嘅呢個責任吖，定話你係有邊一個部門係單一應該負責呢？

11 陳美寶女士：（經傳譯員）唔該晒你個問題。我諗我喺之前畀證供嘅時候已經有提到  
12 過喺運輸署屬下唔同科嘅關於安全嘅責任嚟喇，我諗而家嘅情況，我哋係有政  
13 策嘅部門去睇巴士同埋鐵路服務嘅，佢哋亦都會係繼續就專營巴士服務嘅提供  
14 方面提供呢個政策嘅——係負責政策嗰方面嘅。

15 另一方面，我哋亦都係有道路安全標準嘅部門，佢哋係睇番一般嘅道路安  
16 全，包括係聚焦喺巴士嘅安全，另一方面，我哋亦都有關於車輛嘅標準同安全  
17 嘅，就係睇下提供安全嘅巴士嗰方面係要根據所有法例規定嘅。

18 但係我都要補充，由於科技快速嘅發展同埋公眾日漸對於公眾巴士嘅期望  
19 提高，我哋其實係明白除咗有三個部門之外，我哋另外應該有兩個專責部門去  
20 跟進其中嘅一啲建議嘅，其中嘅兩個專責嘅部門就包括一個係運輸科技嘅部  
21 門，係去研究所有最新嘅交通運輸嘅科技，包括最新嘅科技同埋裝置要去提升  
22 巴士安全。

23 另一方面，我哋亦都建議有一個專責嘅部門係提供呢一個道路安全審核嘅  
24 專責嘅工作嘅，佢哋唔單只係會聚焦加強道路安全嘅系統，亦都有進一步嘅系  
25 統，即係比我哋而家道路安全管理系統仲有多一重嘅系統。我哋相信咁樣係亦  
26 都可以加強道路安全審核嘅部門，令我哋係大大提升現有嘅工作嘅。呢個係因  
27 應公眾嘅要求去檢討道路嘅環境同埋其他嘅改善嘅措施去改善巴士安全，亦都  
28 幫我哋去倡議同埋係推廣一個嘅認證嘅系統去檢查香港整體道路嘅安全。

29 剛才大律師提過譬如係低車速嘅地區同埋係其他嘅道路安全嘅裝置咁樣，  
30 我哋所有嘢都會考慮嘅，喺部門裏面。希望有專項嘅資源，我哋可以有一個更  
31 全面嘅方法去加強道路安全。唔該晒，主席。

32 羅先生：我有一個跟進問題，呢個審核小組係咪會定時檢視有冇達到目標呢？即係一  
33 個定期嘅工作，去睇下過一段時間我哋係咪有積極跟進？

34 陳美寶女士：（經傳譯員）呢個我哋都打算咁做嘅。

1 羅先生：仲有一個跟進問題，成本效益分析方面，會唔會都係喺呢一個部門負責做  
2 呢？譬如係安全帶問題，會唔會係由呢一個部門去負責，睇下呢一個成本效益  
3 分析？

4 陳美寶女士：（經傳譯員）唔會嘅，因為安裝安全帶呢一種嘅車上嘅安全裝置，呢一  
5 方面係會由工作小組負責嘅。

6 羅先生：即係話有三方，有個工作小組，有個審核小組同埋有科技組，佢哋會點合作  
7 呀？點樣作為一個合作嘅團隊呢？

8 陳美寶女士：（經傳譯員）我哋係有工作小組作為一個常設嘅平台，而家就係由副署  
9 長主持嘅，亦都有巴士營運商同埋巴士廠商嘅代表參與，呢個平台上，我哋就  
10 可以定期同佢哋會見嘅。而其餘嘅部門或者係新成立嘅隊伍都可以提供佢哋嘅  
11 意見、佢哋嘅支持同埋係分析嘅。而喺呢啲小組入面亦都提供意見畀工作小組  
12 參考嘅，但係喺科技組方面，佢哋亦都係有好特定嘅工作範圍，就好似我頭先  
13 提到咁樣。唔該。

14 主席：（經傳譯員）呢一個常設或者係呢個工作小組嘅平台係邊個負責去做成本效益  
15 分析呢？即係話關於係現有巴士加裝安全帶呢個問題，尤其係考慮到嚟運房局  
16 局長嘅發言入面提到嘅？

17 陳美寶女士：（經傳譯員）唔該主席。我哋當然係要考慮到喺呢個成本效益分析入面  
18 嘅範圍係乜嘢，然後我哋會提供議程文件，我哋亦都會提出我哋嘅意見去畀巴  
19 士廠商同埋營運商考慮，亦都會期望對方提供必要嘅同埋仔細嘅評估嘅，根據  
20 我哋提出嘅因素同埋係參數，呢個就會提供一個嘅基礎畀我哋去繼續做呢一個  
21 成本效益分析，而最終我哋建議係提供幾多嘅資助去加裝安全帶，就會睇下完  
22 成咗呢一個嘅分析同埋係巴士營運商、廠商嘅意見。

23 主席：（經傳譯員）你提到嗰三個部門，即係話巴士廠商、運輸署同埋專營巴士公  
24 司，應該係有一位陳先生去作供嘅時候，佢都係歡迎道路安全議會提供嘅參與  
25 嘅，你有冇諗住將呢一個工作小組平台進一步擴展，去--即係喺巴士安全嘅議  
26 題上面？

27 陳美寶女士：（經傳譯員）我留意到陳先生嘅證供，就係話有可能會考慮增加會員  
28 嘅，譬如係話一啲獨立會員，好似道路安全議會咁樣。仲有一啲係新增委員都  
29 可以嘅，喺其他範圍，可能係喺專業或者係喺運輸或者係運輸科技嗰方面有知  
30 識嘅專家。

31 主席：（經傳譯員）你覺唔覺得做呢一類型，即係話加裝安全帶嘅成本效益分析，你  
32 覺唔覺得有需要搵獨立嘅顧問去做呢？

33 陳美寶女士：（經傳譯員）喺成本效益分析方面，顯然喺工作小組初步收到嘅回應，  
34 譬如話喺運作上、財務上嘅影響，我相信好重要一點，就係我哋要睇下安裝安  
35 全帶會帶嚟乜嘢嘅效益，當然我哋亦都可以考慮有啲獨立嘅專業人士去研究，

1 但係我哋亦都謹記如果聘用顧問嘅話，去用咩嘢時間、用幾多成本，我哋係知  
2 道嘅，但係除此之外，我哋亦都係由呢個角度，希望得到獨立嘅意見嘅。

3 我亦都要提出喺聆訊過程，我哋十分感激有呢個機會睇番專家畀嘅意見  
4 書，喺呢一方面，其實我哋都接觸咗一啲海外嘅交通局，包括係倫敦交通局  
5 嘅。其實我兩星期前係會見過...

6 主席：（經傳譯員）會見過邊個？係咪個局長？

7 陳美寶女士：（經傳譯員）係嘅。亦都有安排咗兩位職員去倫敦嘅交通局嗰度做一個  
8 短期嘅實習嘅，呢個亦都提供一個平台畀我哋，一個機會畀我哋去學習，同埋  
9 睇下一啲獨立嘅專家意見，或者係需唔需要獨立嘅專家嘅服務去協助我哋做成  
10 本效益分析嘅。唔該。

11 主席：（經傳譯員）而家講另外一個題目，專家文件冊第 1，第 9 頁，Stanley 教  
12 授嘅報告，佢有一個建議嘅，我而家想請你睇番，佢就建議，就強調就係話要  
13 有培訓，同理由運輸署去監控番培訓嗰部分，呢一點亦都係話要列明有啲乜嘢  
14 培訓課程，我哋見到有嘅作業備考，就提到呢啲問題嘅。當中有一點，最後嘅  
15 三行，第三段嘅三行，佢就話建議發展出嚟嘅培訓嘅框架應該入面有一啲嘅  
16 特定嘅管理嘅，呢個亦都可以作為係職業安全嘅一個單元，亦都可以延伸去到  
17 主管級嘅。喺嗰個作業備考入面係有提到呢一點嘅，呢個係我第一個問題，咁  
18 唔啱呀？

19 陳美寶女士：（經傳譯員）即係唔係話咁樣咁具體咁寫嘅。

20 主席：（經傳譯員）我問題就係籠統啲講，既然我哋關注呢個問題，而其實委員會都  
21 聽過證供講過疲勞嘅問題，譬如話因為工時長，要每日揸十四個鐘，應該就係  
22 十或者十一個鐘嘅駕駛時間，總之就工時好長，我哋都係關注嘅。呢一方面會  
23 唔會係喺個培訓嘅架構入面係包括嘅呢？

24 陳美寶女士：（經傳譯員）我個團隊都認真考慮過呢一點嘅，喺個實務守則嚟講，而  
25 家就有特別係提到，但係職安健對我哋嚟講，都係我哋喺入職同埋重溫培訓嘅  
26 時候其中一個單元嚟嘅。疲勞管理可以係加入呢一個嘅單元當中，我哋係好願  
27 意就同專營巴士公司就加入疲勞管理就係重溫培訓嗰度，喺實務守則職安健個  
28 部分可以加入去嘅，呢個可以做到嘅。唔該主席。

29 主席：（經傳譯員）黃律師，就委員所提嘅問題，你有冇跟進嘅問題呢？

30 黃女士：（經傳譯員）冇，多謝主席，冇。

31 主席：（經傳譯員）多謝陳女士同埋你嘅團隊，多謝你，今日都好長，多謝你協助我  
32 哋嘅工作，我哋嘅口頭陳述嘅環節就已經完，我哋多謝你提供呈交嘅書面陳述  
33 書同埋好多謝你回答咗我哋提出好多嘅問題，多謝晒。

34 陳美寶女士：（經傳譯員）主席，代表我嘅部門，我就想特別喺口頭上提呢一點，係

1 希望能夠係記錄在案嘅。我同埋我哋嘅團隊就係好多謝主席同埋委員會嘅委員  
2 就一直都係好盡力去聽取唔同方面嘅證供，特別係海外嘅專家嘅證供，我哋同  
3 意呢個係一個好冗長同埋都係好艱辛嘅過程，但係係好有成效嘅，我哋係好期  
4 望就呢個委員會畀我哋一啲好寶貴嘅意見。

5 我亦都係想向委員會保證嘅，就正如我就頭先回答委員嘅提問，呢個工作  
6 小組就會成為一個常設嘅委員會，我哋就會利用呢個平台去同我哋嘅持份者討  
7 論唔同嘅建議，呢個係一個延續嘅工作，唔係純粹係一個六個月嘅工作。

8 我哋亦都向委員會表示其中一個我哋要做嘅工作係探討就係可能係要制定  
9 一個更加好嘅安全指標，可能就用佢嚟去監察巴士公司嘅表現，特別係嚟巴士  
10 條例方面底下要求嘅表現。

11 另外就係關於道路安全審核嗰方面，同埋檢討車速限制，呢個另外一個範  
12 疇我哋嘅部門會特別留意，我哋亦都會係向其他司法管轄區嘅相關嘅做法去參  
13 考。

14 最後，我就想--我哋都係好關注巴士車長嘅福祉，除咗話巴士上面嘅安全  
15 裝置之外，我哋都係要特別留意巴士車長嘅福祉，正如我右邊嘅同事所講，今  
16 朝早佢提到我哋同意我哋會係嚟公共交通交匯處同埋巴士站嘅初步設計嘅時  
17 候，我哋一定會係考慮需要設置一啲輔助設施，我哋希望能夠改善巴士車長嘅  
18 福祉。

19 到最後，我哋亦都再一次多謝主席你嘅努力同埋你嘅問題，幫助我哋，讓  
20 我哋可以有機會認真去思考呢個問題。我再重申一次，安全係非常重要，運輸  
21 署會全力去確保提升巴士嘅安全。

22 主席：（經傳譯員）我哋今日所有嘅程序都完結，謝謝。

24 2018 年 10 月 16 日

25 下午 4 時 35 分聆訊完畢

*[Blank Page]*
